B. Unity. The question of the unity of Hab. 1 and 2 is closely tied to the question of its interpretation. As mentioned above, Wellhausen together with Giesebrecht deleted 1:5-11 and attempted to create a continuous lament with the remaining verses of ch. 1. Others, finding different objects for the lament in 1:2-4, rearrange and in some cases delete various verses within the opening chapters (Eissfeldt, pp. 417-420). If, however, the traditional interpretation is assumed, the first two chapters contain a distinct unity of theme and can be related to a sequence of events in the prophet's struggle with God during the closing days of the Assyrian empire and the rapid rise of Babylon in its place.

The psalm of ch. 3 presents additional problems. Stylistically distinct from the remainder of the book, the psalm has been subject to continued scrutiny and attack from scholars of a variety of persuasions. Many have found in the musical directions an indication of a second temple provenance, an argument which turns, however, on the question of dating not merely Hab. 3 but the Psalms in general (cf. G. L. Archer, *Survey of OT Intro.* [rev. ed. 1974], pp. 356f.). Apart from such considerations, one may conclude that the psalm was either composed by the author of chs. 1 and 2 or added to the prophecy by the same individual, who perhaps drew from a variety of sources. Certainly in its canonical form the third chapter is necessary to complete the thought of the book. Reference has been made to the absence of the third chapter in the Habakkuk commentary from Qumrân, but several reasons may account for this absence. For example, it has often been noted that the Qumrân commentaries lack the kind of systematic chapter-by-chapter exposition expected in a modern series.

C. Date. With the exception of questions surrounding the style of ch. 3, matters of dating are closely related to those of interpretation. Budde, and more recently Mowinckel, on the theory that the oppressors in 1:2-4 are the Assyrians rather than the wicked Jews, date the prophecy in the period before the destruction of Nineveh (621-612 B.C.). Scholars such as Wellhausen and Giesebrecht, who see in 1:2-4, 12-17 a lament concerning the mistreatment of Judah by the Chaldeans, would date the prophet to the time of the Neo-Babylonian empire (612-538 B.C.). Neither of the above seems necessary if we maintain the traditional interpretation.

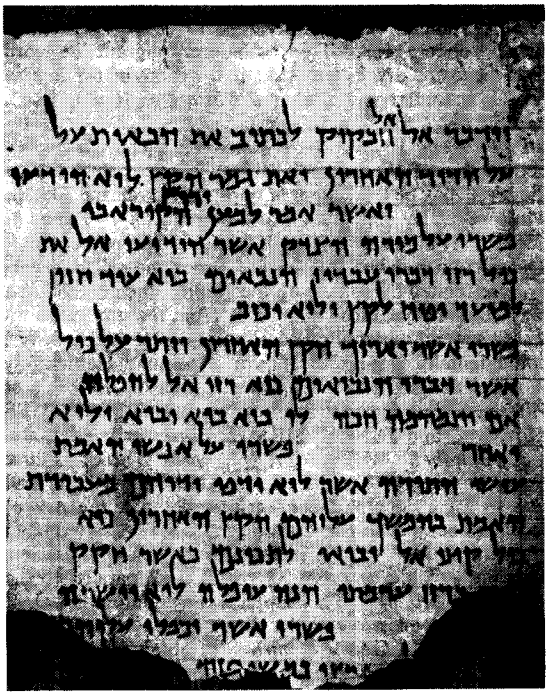
If 1:2-4 is interpreted as referring to the oppression of Jews by Jews and 1:5-11 as a threat that Yahweh will raise up the Chaldeans already known as a nation thirsting for blood, then the dating of the prophecy becomes much more specific. Verses 5-11 would seem to indicate that, although the Babylonians had already given exhibitions of the cruel character of their warfare, they had not yet come into any direct contact with Judah. This would tend to place the prophecy in the period just before or after the destruction of Nineveh by the Babylonians and their allies in 612 B.C. It was not until 605 B.C. at the earliest that Judah was to feel the full force of Babylonian power, although by that time the coming of the Babylonians or Chaldeans would hardly be unbelievable. For this reason scholars generally prefer to date the prophecy closer to the time of Nineveh's destruction, perhaps just before that event, when Assyrian rather than Chaldean power would still be the expected source of an invasion.

D. Canonicity. Habakkuk was early grouped with the other so-called minor prophets in the Book of the Twelve, the acceptance of which was never questioned in either Jewish or Christian circles. Disputes about the unity of the book are essentially modern — there is no ancient record of a dispute over ch. 3 — and do not seem to have affected its acceptance.

E. Text. The text of Habakkuk is generally considered to be in a better state of preservation than has traditionally been supposed. Modern scholars tend less than their predecessors to attribute obscurities in an ancient text to copyists' errors. One textual emendation of substance proposed by Duhm in an earlier generation changed the name "Chaldean" (Heb. *hakkaśdîm*) to "Greeks" (*hakkittîm*). This emendation, considered precarious by Duhm's contemporaries, is rendered completely unacceptable by the Habakkuk commentary from the Dead Sea. In that document the original *hakkaśdîm* is neither excised nor changed into *hakkittîm*. Instead, the Dead Sea sectaries left the word for Chaldeans in the text but argued that they were to be identified with the *kittim* (the Seleucid or Roman forces). This was clearly not an emendation but an interpretation. *See* Vol. I, Plate 16; picture of 1 QpHab in COMMENTARIES, HEBREW.

The text of ch. 3 has suffered much under the hands of many interpreters, including W. F. Albright, who proposed "some 38 corrections of the Masoretic text" ("The Psalm of Habakkuk," in H. H. Rowley, ed., *Studies in OT Prophecy Presented to T. H. Robinson* [1950], pp. 1-18). When all is said and done, the many attempts to emend the text of ch. 3 have created as many difficulties as they have removed; thus the original remains preferable, if somewhat obscure.

F. Form and Style. Much has been said about the liter-



Column 7 of the *pēšer* (commentary) on Habakkuk from Qumrân (1QpHab) (J. C. Trever)

ary form of Habakkuk, but a word should be added about the book's literary power. The book is full of force, the descriptions are graphic and powerful, the thought and expression are alike poetic. Habakkuk is a master of terse, parallelistic, pregnant, classical style; and if ch. 3 is to be attributed to the same author, he is, moreover, a lyric poet of high order. The grand imagery and rhythmic flow of this psalm will bear comparison with some of the finest productions of the Hebrew muse.

Taking the first two chapters as traditionally interpreted, Habakkuk is stylistically unique among the prophets of Israel. Whereas most prophetic writings give the oracles of God as proclaimed through the prophet, this short book offers a glimpse of the theological and philosophical inner life of the poet dressed in the form of a short but gripping dialogue. The counterpoint of lament (or complaint) and judgment oracle in ch. 1 is matched by the taunt song as a response to the lament in ch. 2. Although elements of these forms are clearly part of the common stock of Hebrew prophetic literature (cf. 2:12 with Mic. 3:10; v. 13 with Jer. 51:58; v. 14 with Isa. 11:9; v. 16b with Jer. 25:15f.; vv. 18-20 with Isa. 44:9ff.; 46:6f.; Jer. 10:1-16), the general character of the first two chapters is unique.

Chapter 3, which combines personal affirmation with theophany and historical retrospect, is like certain of the Psalms or passages from the book of Job.

III. Theology.—Habakkuk's message, the core of which is found in 2:4, forms a basic point in OT theology and is cited as pivotal in three NT books. Paul, in Rom. 1:17, introduces his gospel as one of salvation by faith as opposed to salvation by works and cites Hab. 2:4, "the righteous shall live by faith," as OT support for his argument. Gal. 3:11ff. sets forth faith as the antithesis of law or legal salvation and again Hab. 2:4 serves as a supporting text. Finally, in the intriguing passage He. 10:37f., Hab. 2:3f. is again quoted, but the context focuses on the pending fulfillment of the vision and the identification of the Hebrews with those who have faith and thus persevere under pressure.

But the theological value of Habakkuk cannot be limited to a few NT quotations. The prophet asks some of the most penetrating questions in all literature, and the answers given are basic to a proper view of God and His relation to history. If God's initial response (1:5-11) sounded the death knell for any strictly nationalistic theology of Judah, his second reply (2:2-20) outlines in a positive sense that all history is hastening to a conclusion which is as certain as it is satisfying. For Habakkuk that conclusion was prefigured by the coming day when the Chaldeans themselves would receive just judgment for their violent deeds. For the NT writer of Hebrews the climax of history was to be found not in the destruction of any one temporal power but in the coming of the Lord Jesus Christ, whose return is merely prefigured in both the judgments on the nation and tribulations of the people of God.

In the interim, while history is still awaiting its conclusion (and Habakkuk is not told when the end will come), the righteous ones are to live by faith. The faith prescribed (or faithfulness, as many have argued that Heb. *ʾᵉmûnâ* should be translated) is still called for as a basic response to the unanswered questions in today's universe. This theology for life both then and now stands as Habakkuk's most basic contribution. That this faith or faithfulness is related in NT theology to the objective salvation provided by the work of Christ is both to be expected and a natural development in the progress of revelation from the dark days of the late 7th cent. before Christ to the full light of God's coming in the person of His Son.

HABAZINIAH (Jer. 35:3, AV). *See* HABAZZINIAH.

HABAZZINIAH hab-ə-zi-nī'ə [Heb. *ḥ*^{a}*baṣṣinyâ*] (Jer. 35:3); AV, NEB, HABAZINIAH. The grandfather of Jaazaniah, the leader of the Rechabites, whom Jeremiah tested (Jer. 35:3-10).

HABERGEON hab'ər-jan. A medieval coat of mail. The AV uses this term for Heb. *taḥrâ* (Ex. 28:32; 39:23; RSV "garment"), *širyôn* (2 Ch. 26:14; Neh. 4:16 [MT 10]; RSV "coat of mail"), and *širyâ* (Job 41:26 [MT 18]; RSV "javelin"). *See* WEAPONS OF WAR.

HABIRU hă'bi-rōō, hă-bē'rōō [more correctly HAPIRU or 'APIRU; to conform to standard conventions, the form *Ḫapiru* will be adopted henceforth]. A term used in cuneiform and Egyptian literature of the 21st to 12th cents. B.C. to designate disparate groups of peoples. These peoples were apparently ubiquitous, appearing in the texts from sites in modern Iran (Susa), Iraq (Larsa, Nuzi, Babylon, Asshur), Turkey (Alishar, Boghazköy), Syria (Mari, Tell Brak, Alalakh, Ugarit), Lebanon (Kumidi), Palestine (Beth-shean), and Egypt (Memphis, Thebes, Heliopolis, Amarna).

I. Name.–A. In Cuneiform. 1. Ideographic Writing: SA.GAZ. Although it sometimes appears in the agglutinated forms SA.GAZ.E (with subject element), SA.GAZ.ZA (with genitive element), and SA.GAZ.ŠÈ (with terminative element), SA.GAZ (or its variant SAG.GAZ) has no clear Sumerian meaning and appears to have been a pseudo-ideograph for the Akk. *šaggāšu*, "murderer, aggressor, marauder," or for the West Sem. *šgš*, "to be restive." The Akkadian lexical equivalent to SA.GAZ is *ḫabbātu*, "robber, brigand" or "wanderer, migrant," a word used occasionally as an Akkadian synonym for *ḫapiru* (cf. C. Schaeffer, ed., *Palais Royal d'Ugarit*, III, 16.03, $^{lú.meš}$SA.GAZ^{ru}).

2. Phonetic Writing: ḫa-pí-ru/la₄-pí-ru. The exact phonetic value of the Akkadian form is uncertain because the labial may be read either *bi* or *pí*; moreover, the Akk. *ḫ*, while regularly reflecting Proto-Semitic **ḫ* (= Arab. *ḫ*, not *ḥ*), may in proper names of foreign origin reflect *ḥ* or *ʿ*. Though two men bearing Kassite names and called *ḫa-bir-aya* are related by some with the Ḫapiru, the gentilic *-aya* may suggest that these men came from the otherwise attested second-millennium Mesopotamian town *Ḫa-bi-ri*^{ki}, coincidentally similar to Ḫapiru. One may legitimately theorize the SA.GAZ = *Ḫapiru* equation on the basis of Hittite god lists from Boghazköy, in which DINGIR.MEŠ ^{lú}SA.GAZ and DINGIR.MEŠ *Ḫa-pí-ri* freely alternate.

3. Alphabetic Writing: ʿpr, (pl.) *ʿprm*. Three tax lists from the king of Ugarit, one in Akkadian syllabic and two in Ugaritic alphabetic scripts, detail a registry of localities subject to the Ugaritic monarch. A city named Ḫalbi (probably Aleppo) is listed in four parallel entries, with the syllabic ^{uru}*Ḫal-bi* $^{lú.meš}$SAG.GAZ parallel to the alphabetic *Ḫlb ʿprm*. This supplies the equation SA.GAZ = *ʿpr*, and, combined with the Hittite evidence cited above, the equation SA.GAZ = *Ḫapiru* = *ʿpr* obtains. In an effort to preserve a connection with the root *ʿbr*, some scholars appeal to the *b/p* interchange in Akkadian to argue that an original Sem. *b* shifted to *p* in the Ugaritic dialect. But as Astour has shown, whereas Akkadian exhibits an ambiguous *b/p*, in Ugaritic *b* can shift to *p* only rarely (by regressive assimilation in direct contact with an unvoiced consonant). Further, Ugaritic possessed the lexeme *ʿbr* (*UT*, p. 453), so there is no reason to suppose that Ugaritic scribes regularly spelled this word with a *p*. Again, appeal to a Hurrian influence is doomed to failure, owing to the presence of initial *ʿ*, which, if Hurrian, would have been lost.

B. In Egyptian: ʿpr, (pl.) *ʿpr.w*. Attempts to explain the *p* as the Egyptian rendering of an original Sem. *b* because it is followed by the liquid *r* are no longer tenable linguistically. Egyptian transcription of Semitic names containing the labial *b* always preserves the original *b* when it is found in an intervocalic position (as would be the case if the form were **Ḫa-bi-ru*).

C. Root and Etymology. Consonantal evidence from Ugarit and Egypt is uniform, mutually corroborating, and philologically unambiguous, so it is safe to assert that the root in question is *ʿpr*. Akkadian evidence suggests that the intermediate vowels respectively are *a* and *i* (possibly **e*), producing the hypothetical form **ʿapiru*. (Vowel quantity cannot yet be absolutely determined orthographically.) The initial pharyngeal *ʿ* justifies the West Semitic origin of the root *ʿpr*. Thus, theories connecting *ʿpr* with non-Semitic Sum. gabiri, "desert," Hitt. *ḫappariya*, "transfer, sale," or Hurrian *ipri*, "lord, aristocrat," are dubious at best. Moreover, etymological speculation dependent upon the Semitic root *ḥbr*, "bind, join" — e.g., "a confederate, ally" (cf. *ḥ*^{a}*bērîm*) — must be excluded. Additionally, etymologies predicated upon the root *ʿbr*, "cross over" — e.g., "a wanderer, nomad, boundary jumper" (cf. *ʿibrî*) — are rendered untenable linguistically. Another unattractive theory sees in *ʿpr* the West Semitic cognate of Akk. *epēru*, "dust" — e.g., "one covered with dust after long journeys, one who lives in tents." Semantics and lexicography argue against this latter theory. No Ḫapiru citations clearly place them

in a "dusty" context, although one could counter that such an original meaning had already been lost by the time the form was used as a standard social designation. In no West Semitic text, however, does *'pr* mean "dust." A more plausible etymology sees in *epēru*, "work for a livelihood, provide with food," a reflex of West Semitic *'pr*. After all, Ḫapiru texts are full of references to their working in order to receive food, equipment, and living quarters. But the corresponding West Semitic root, as shown by Ugaritic, is *ḫpr*, not *'pr*. To argue that *'pr* means "outlaw" is to rely too heavily upon Amarna evidence and English etymology, in the absence of Semitic lexicography. One can conclude only that the problem of the etymology of *'pr* remains unresolved.

II. Historical Survey of the Evidence.–*A. Ur III* (21st-20th cents.). Documentation from this period includes two court depositions about persons called sa-gaz. In one of these texts the sa-gaz is the claimant, and in the other the sa-gaz may be the defendant. The tablets are somewhat fragmentary, however, and difficult to interpret. Another tablet, a Sumerian literary text, states that the sa-gaz people roam the steppe, destroy everything, and refuse to obey King Šulgi. A second tablet suggests that another king finds it necessary to punish the sa-gaz.

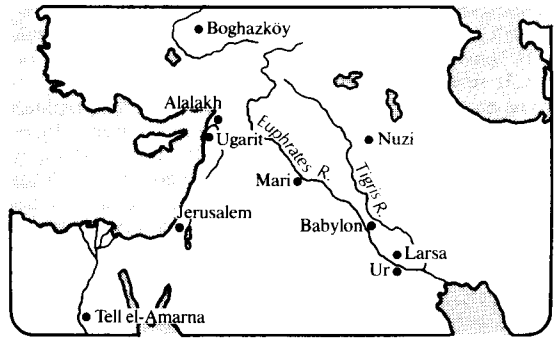
B. Larsa (19th cent.). Official court records from the reigns of Warad-Sin and Rīm-Sin detail monthly rations of small animals or clothing consigned by the king to the sa-gaz (in one case, to the Ḫapiru). One of these documents explicitly mentions that these people represent a contingent of state-supported troops.

C. Alishar (18th cent.). An Old Assyrian text speaks of a group of Ḫapiru who were attached to the palace of an enterprising Assyrian merchant near Alishar. The text goes on to imply that the Ḫapiru were dependent as well upon Alishar officials.

D. Mari (18th cent.). Ḫapiru occupy a dual role according to the Mari texts. On the one hand, they are loyal mercenaries allied with the forces of local kings. As such, they own land and donkeys and are among the settled population. Though their numbers are normally of moderate size, a large contingent of two thousand march under the command of one northern Mesopotamian monarch. On the other hand, the Ḫapiru represent independent groups of raiders. Ranging from Ḫarran on the upper Balīkh River to Larsa in southern Mesopotamia, an obvious reflection of their disparate character, Ḫapiru are constantly reported as raiding and seizing towns and carrying off booty. Like the Amarna Age pharaohs, King Zimri-Lim receives appeals from his vassals for protection against the Ḫapiru. At one place, an apparently influential local king enters into an alliance with a band of Ḫapiru so that he can raid a neighboring town.

E. Alalakh (18th, 15th cents.). Attesting to the importance of Ḫapiru at Alalakh is an economic document (18th cent.) concluding with the following date formula: "The year in which Irkabtum the king made peace with Šemuma and the *Ḫapiru* soldiers." The significance of this event may be measured by its serving to date the entire year.

Ḫapiru of the 15th cent. display a striking heterogeneity. Geographically, census lists supply names of individual Ḫapiru and more than forty localities from which they have come. They are always associated with towns; thus their place of origin is urban, not desert. Further, one should observe that a Ḫapiru's place of origin is almost always other than the town in which he is currently found. Ethnically, the names of Alalakh Ḫapiru reflect several linguistic backgrounds. Vocationally, those called Ḫapiru are shepherds, priests, city administrators, charioteers,



messengers, slaves, and several categories of soldiers. Some of these professions connote recognized positions of leadership within existing society, whereas others imply highly sophisticated training. Their hospitality to strangers is illustrated by Idrimi's autobiographical inscription. This king, fleeing from his native Alalakh, found refuge for seven years with a Ḫapiru colony near the Syrian coast, after which he was able to recover his kingdom with their military assistance.

F. Boghazköy (16th-13th cents.). Two documents from the Old Kingdom era tell of a treaty concluded between Hittite and Ḫapiru troops. Consistent with this notice is a tablet that speaks of Ḫapiru as a component of the Hittite army. A force of three thousand Ḫapiru mercenaries were deployed by a Hittite monarch to man a royal garrison against Hurrian insurgents. More than a dozen treaty texts from the Empire period of this central Anatolian archive mention, among those official deities invoked as divine witnesses and guarantors, the gods of the SA.GAZ and the gods of the Ḫapiru. This datum strongly suggests that Ḫapiru were a recognized stratum within society. An exorcism text specifically delineates various classes within Hittite society, including the Ḫapiru class between the children of nobility and commoners. Compatible evidence emerges from tablets that mention two female SA.GAZ who serve as official court singers and a SA.GAZ named Tette who achieved the high level of king in the Syrian town of Parqa near Ebla. Elsewhere six hundred SA.GAZ, presumably prisoners, are assigned service in Hittite temples. Ḫapiru urbanization is reflected in a document that speaks of their own settlement.

G. Nuzi (15th cent.). Memoranda from the private sector of Nuzi disclose that male and female Ḫapiru often made labor contracts with rich citizens, apparently with the right to end the agreement upon furnishing proper compensation. Ḫapiru would voluntarily enter this service, in return for which they received food and clothing. The occasional inclusion of patronymics, which would be highly unusual were these ordinary slaves, suggests that only to a certain degree were the Ḫapiru socially indigent. Only in cases of contract default did a Ḫapiru sink to the status of absolute slave. One tablet clearly indicates that a Ḫapiru parent had the right to arrange for his children to enter this voluntary service; at times parent and offspring entered together.

Public documents describe consignments of food or clothing to Ḫapiru. It is again reasonable to assume that these consignments were made to people serving as palace mercenaries, since mention is sometimes made of the distribution of barley for horses owned by Ḫapiru, and included among Ḫapiru professions were the hipponomist and military officer. Other Ḫapiru vocations included the carpenter, stone engraver, fisherman, and the enigmatic *ubbūtu*. Nuzi Ḫapiru seem to have emigrated from other

settled regions and occasionally appear as family units, although remarkable ethnic dissimilarity characterizes them.

H. Ugarit (14th-13th cents.). Tax lists from Ugarit (cf. I.A.3) suggest that the Ḫapiru enclave at Ḫalbi had become normalized enough to lend its name to a geographical region. In fact, Ḫapiru settlements were accorded official recognition as fugitive havens in a Hittite-Ugaritic treaty discovered at Râs Shamrah. In this important text King Hattusilis III promised his Ugaritic contemporary that if a Ugaritic fugitive fled to the SA.GAZ territory, he would be extradited to the king of Ugarit. This text attests to the refugee element within Ḫapiru ranks (cf. Idrimi, Amarna evidence), yet its phraseology implies that, in this case, the Ḫapiru were dependent upon a Hittite sovereign. Moreover, the document specifies a definable SA.GAZ territory, again suggesting recognition within the bounds of society. The same picture seems to be mirrored in an Ugaritic royal grant which exempts the grantee from having to house SA.GAZ. Instead, such a one was to be quartered at the state's bidding. Some have suggested that Ḫapiru served in the Ugaritic navy at the time of the invasion of the Sea-peoples.

I. Amarna (14th cent.). The largest number of SA.GAZ/Ḫapiru references is to be found in the Amarna correspondence. Normally referred to in uncongenial circumstances and very often as a powerful military force, they represent one of a number of Syro-Palestinian population groups poised to exploit a moment of political weakness. They were mercenaries at the disposal of the seditionary ʿAbdi-Aširta, founder of Amurru, who is himself called one of them, and they were partially responsible for capturing vast areas of the Phoenician coast and parts of Syria. After ʿAbdi-Aširta's death, Ḫapiru formed part of the menacing forces under the aegis of his two sons. Often Palestinian Ḫapiru are described as small, marauding bands of men who seize, loot, and burn towns and generally ravage the landscape. At other times they form alliances with towns. The king of Megiddo complained that the sons of Labʾayu king of Shechem had hired Ḫapiru to fight him. And the king of Jerusalem related that Labʾayu had established a private Ḫapiru garrison at Shechem. Citizens of Lachish are said to have defected from Egypt to become Ḫapiru, as did the kings of Hazor and Tushulti. Elsewhere, the Ḫapiru are supported by the towns of Gezer and Ashkelon. Yet in three tablets Ḫapiru act in concert with Egyptian loyalists. An Egyptian commissioner numbers a contingent of Ḫapiru among his troops; in one case he bequeaths cities to the Ḫapiru. And the loyal governor of Byblos finds a Ḫapiru who is willing to transmit a message to a neighboring town. Though the Amarna Ḫapiru seem to be composed of diverse ethnic elements from various localities, they rather consistently represent an unrespectable element of society. They are associated with robbers (cf. 299:26, ^{lú}SA.GAZ$^{meš\text{-}tu_4}$, where phonetic complement suggests the reading *ḫabbātu*) and are twice called "dogs."

J. Egyptian Documents (15th-12th cents.). The *ʿpr.w* appear in Egyptian documents between the reigns of Thutmose III (or perhaps Hatshepsut) and Ramses IV in a consistently menial role, serving as quarry workers, wine pressers, bowmen(?), and stone haulers. Most likely Syro-Palestinian natives, they were perceived to be foreigners, as is sometimes indicated by a foreigner determinative written with *ʿpr.w*. Documents from two pharaohs that describe Egyptian encounters with the *ʿpr.w* in Palestine portray them as a disruptive element. A general in the army of Thutmose III requests princes near Joppa to permit horses to be stabled inside the city, lest the *ʿpr.w* pass by and steal them. A stele of Seti I states that warring *ʿpr.w* from Mt. Yarmut, in the Galilean highlands, were roundly defeated by Egyptian forces. A commemorative stele includes 3600 *ʿpr.w* among the booty brought to Egypt at the conclusion of the second campaign of Amenhotep II into Syro-Palestine. Their servile status is also reflected in letters discovered at Kumidi and dictated by an Amarna pharaoh, who instructed his vassals near Damascus to send certain Ḫapiru to Egypt in order that they might be resettled in Nubia. Ramses II forced the *ʿpr.w* to haul stones in conjunction with his building enterprise near Memphis. Some *ʿpr.w* are included in a list of items dedicated by Ramses III to a temple at Heliopolis. Ramses IV dispatched them as unskilled laborers to the turquoise mines in Wâdī Ḥammāmāt. The status of servitude ascribed to the *ʿpr.w* in Egypt resulted from their having been taken prisoner; thus their position there says nothing about their original status in Syro-Palestine.

***III. Ḫapiru as Designation.**—A. Ethnic.* Following the publication of the Amarna Tablets, many scholars regarded "Ḫapiru" as an ethnic designation; now, however, the ethnic heterogeneity of the Ḫapiru has contributed to a change of thought. In the Old Babylonian period most Ḫapiru bore Akkadian names, while a few from Mari were West Semites. Alalakh Ḫapiru bore mostly non-Semitic names, and some were recognizably Hurrian. Though the majority of the Nuzi population was Hurrian, a full two-thirds of the Ḫapiru were Akkadians while others were varieties of non-Semites. Though no Nuzi Ḫapiru bore West Semitic names, Amarna Ḫapiru were largely West Semites. Ḫapiru names certainly suggest a mixed ethnic composition, often similar in stock to the local population. To such heterogeneity must be added geographic diversity. Ḫapiru are said to have been natives of towns in Babylonia, Assyria, Anatolia, Syria, Lebanon, Phoenicia, and Palestine. As a result of political exigencies, individuals or entire towns could become Ḫapiru overnight. And if Ḫapiru were an ethnic term at Ugarit, like other ethnica, it would have been written **ʿprym*, not *ʿprm*.

B. Socio-Legal. Texts describe Ḫapiru as having a predilection for military service, showing a tendency to remain in enclaves, possessing an economic status spanning the entire economic spectrum, displaying a great vocational variety, and exhibiting a warm hospitality (especially to fugitives). They frequently owned their own property, including houses, horses, donkeys, and land, and their origin was consistently urban, not desert fringe. Though united by a sense of foreignness, Ḫapiru were largely part of organized society. As such, they appear to have been uprooted persons who found a means of subsistence for themselves by entering a state of dependence to individuals or city-states. One should note in passing that their first appearance in Mesopotamia coincides with the cataclysmic upheavals and mass migrations at the end of the Early Bronze Age and that they no longer appear in literature after the advent of Aramean expansionism. Ḫapiru served various levels of need within a local society in exchange for supplies and shelter. Only in times of weak political authority (e.g., Mari, Boghazköy Old Kingdom[?], Alalakh VII [?], Amarna) do Ḫapiru abandon their status and become somewhat or absolutely independent. For this reason Greenberg argues that SA.GAZ originally derives not from *šaggāšu*, "murderer," but from West Semitic *šgš*, "be restive." Accordingly, *ḫabbātu* became the Akkadian lexical equivalent to SA.GAZ because it functioned as the semantic approximate of *šgš* (see I.A.1 above). In times of political disarray, however, by analogic extension the inoffensive SA.GAZ = *šgš*, "restive one, migrant," developed into the pejorative SA.GAZ = *šaggāšu*, "murderer."

IV. Impossibility of Equation of Ḫapiru and Hebrews in Biblical Studies.– A. Impossibility of General Equation. Beyond its ancillary role in questions pertaining to patriarchal antiquity, the equation Hebrews = Ḫapiru is applied in a critical way to biblical studies at two points: (1) the manner of the biblical Conquest, and (2) the date of the Hebrew Exodus from Egypt. To be sure, the Hebrews were too limited geographically, chronologically, and ethnically to permit their outright equation with the farflung and heterogeneous Ḫapiru. For this reason, advocates of the sociological approach to the biblical Conquest or the fifteenth-century date of the Exodus somewhat arbitrarily restrict their equation to the Ḫapiru of the Amarna Tablets.

B. Equation of Amarna Ḫapiru and Biblical Hebrews. Adherents of the sociological model for the Conquest see in the Hebrews = Ḫapiru an oppressed element of the native population of Palestine which, for religious reasons, willingly withdrew from all societal obligations and, in a manner reminiscent of the German Peasants' Revolt, established for themselves a counter socio-political system revolving around a covenant with Yahweh. The Conquest is thus viewed as a religious revolt against the ruling class, and its success is attested in the astonishing numerical growth of the Hebrews from seventy to more than one million — these were religious devotees. Accordingly, the Hebrews' basis of solidarity at the point of the Conquest was religion. Adherents of the fifteenth-century Exodus rely heavily upon the Hebrews = Ḫapiru equation both because, when taken in connection with the notice of 1 K. 6:1, a corroborative fixed chronological point exists, and because one then obtains an extrabiblical contemporary record of the Conquest. But this equation is confronted by a number of obstacles, which are problematic if not irreconcilable.

1. Philologically. The lexemes *ʿapiru* (Ḫapiru) and *ʿibrî* (Hebrew) are unrelated in derivation, morphology, and semantics. As already shown (see I.C above), whereas *ʿibrî* derives from the root *ʿbr*, *ʿapiru* incontestably derives from the root *ʿpr*. To suggest that the latter form can be explained as a phonetic variant of **ʿabiru* requires an unprecedented consonantal transformation in Ugaritic (see I.A.3 above) and Egyptian (see I.B above). Though Albright had theorized to the contrary, citing what he considered to be an example of Akk. *malik-* shifting to *milk-* in first-millennium Canaanite, the required vocalic shift from *ʿapir-* to *ʿibr-* is equally untenable. *Milk-* forms, now attested in cuneiform names as early as the Ur III period, show themselves to be parallel to *malik-* forms. Morphologically *ʿapiru* exhibits the adjectival *qaṭil* pattern whereas *ʿibrî* follows the *qiṭl* plus gentilic substantive model. Semantically, *ʿibrî* is an ethnicon and preserves no trace of social implications while *ʿapiru* refers to a socio-legal entity without indicating ethnic overtones.

2. Ethno-Socially. Aside from the fact that both the Ḫapiru and the Hebrews are depicted as militaristic groups, they are incompatible ethno-socially. "Ḫapiru" is an appellation denoting social status and referring to ethnically heterogeneous groups that show no discernible tribal structure and are usually politically subordinate. Their actions in no way reflect that they were part of a mass movement of peoples from outside Palestine. Though one could join their ranks voluntarily, various groups in their number do not seem to be united by a common cause, and their activities are sporadic and dissociated. On the other hand, "Hebrew" is an ethnic designation used to refer to the ancestors of the Israelite nation, beginning with Abraham, if not with Eber. (Does Hebrew equal Eberite?) This ethnically homogeneous group is uniformly bound by familial ties and tribal strictures, and appears to have been politically autonomous. The Hebrews' solidarity revolved around an ethnic, not a religious, axis and the biblical narratives contain no hint that one voluntarily became a Hebrew. The Joshua account shows that the Hebrews came from territories outside Palestine and that their conquest was strategically and tactically conceived and executed in a systematic, coherent, and purposeful manner.

3. Onomastically. The names of cities and kings specifically mentioned both in conjunction with the biblical Conquest under Joshua and with the Ḫapiru upheavals in the Amarna Tablets may be diagrammed as follows:

Place Name	King According to Joshua Account	King According to Amarna Tablets
Jerusalem	Adoni-zedek (10:1)	Abdi-Ḫeba (285-290)
Lachish	Japhia (10:3)	Yabni-Ilu (328) Zimredda (329) Šipti-baʿal (330-332)
Gezer	Horam (10:33)	Milki-Ilu (267-271, 369) Yapaḫu (298-300, 378)
Hazor	Jabin (11:1)	Abdi-Tirshi (228)
Hebron	Hoham (10:3)	Šuwardata(?) (278-284, 366)

If the Joshua account and the Amarna Letters described the same events, at least some of these personal names should be identical or analogous, especially in cases where more than one king from a given city faced the Ḫapiru dilemma. But no cases exist in which the names bear even a slight resemblance. Further, in one instance (possibly two) the corresponding names derive from dissimilar ethnic origins, which would normally imply a dynastic succession.

4. Historically. Historical discrepancies between the circumstances of the Ḫapiru and the Hebrews exist at several levels. First, the vast preponderance of Amarna texts that mention the Ḫapiru derive from exactly those cities and regions which, according to the Conquest narratives, Israel never attempted to capture. Alternatively, it is circular to reason, with Meyer and Böhl, that places like Shiloh, Bethel, Gibeon, and Hebron are not represented in the Amarna Letters because they had already fallen to the Hebrews. Leaving aside the possible representation of Hebron in the correspondence, such a contention would leave unexplained the fact that Lachish and Gezer, mentioned in the Conquest narrative precisely in conjunction with the liberation of Gibeon, *are* attested in Amarna documents as allies, not enemies, of the Ḫapiru. Further, one would then have to explain the Hebrew antagonism to the king of Hazor when according to the Amarna texts this king was a colleague of the Ḫapiru. The alleged equation also cannot offer an adequate explanation of the Ḫapiru loyalty to native governors or Egyptian emissaries sometimes attested in Amarna literature, when the Conquest account uniformly portrays Hebrew antipathy toward the local population. Additionally, Israel did not use chariot warfare in the Conquest (Josh. 11:6, 9; 2 S. 8:4), so it was unable to conquer the maritime and Esdraelon plains. Amarna Ḫapiru, however, were quite adept at this kind of warfare.

Second, in considering Egypt's political involvement in Syro-Palestinian affairs, one notices a conspicuous absence of reference to Egypt or an Egyptian hegemony in the Joshua-Judges narrative — suggesting that Egypt was politically passive at the time of the Conquest. Yet the Amarna Letters contain numerous requests for Egyp-

tian assistance against the Ḫapiru, and the Kumidi tablets speak of Egyptian attempts to thwart Ḫapiru incursions — suggesting that Egypt was politically active at the time of the correspondence.

Third, historical discrepancies surface when discussing the manner and mission of the Conquest vis-à-vis the aim of the Ḫapiru. The biblical accounts agree that the Conquest, for however long its process continued, was tribal and that large groups of people, united by a sense of blood kinship, were motivated in their organized conquest and killing by a desire to acquire land for tribal occupation. On the other hand, the Ḫapiru are characterized as marauding plunderers. Engaging in sporadic forays in which they looted and burned towns only to withdraw quickly with their booty, the small, fragmented bands of Ḫapiru displayed no interest in mass depopulation and resettlement of an area. These data have the cumulative effect of evoking the greatest doubt regarding the proposed equation Ḫapiru = Hebrew.

B. J. BEITZEL

HABITATION [Heb. *môšāḇ*] (Ex. 35:3; Lev. 13:46; Ps. 132:13; Ezk. 6:14); NEB HOME, SETTLEMENT, etc.; [*šāḵan*] (Dt. 12:5; Ps. 104:12); NEB DWELL, NEST; [*māʿôn*] (Dt. 26:15; 2 Ch. 30:27; Ps. 26:8; 68:5 [MT 6]; 91:9; Jer. 21:13; 25:30); AV also DWELLING PLACE; NEB DWELLING-PLACE, "beauty," REFUGE, LAIR; [*nāweh*] (2 S. 15:25; Job 18:15; Ps. 79:7; Isa. 27:10; Jer. 10:25; etc.); AV also DWELLING PLACE; NEB DWELLING-PLACE, HOME, etc.; [*miškān*] (2 Ch. 29:6; Ps. 46:4 [MT 5]; 78:28; Isa. 22:16; 54:2; Hab. 1:6); NEB DWELLING-PLACE, RESTING-PLACE, etc.; [*zeḇûl*] (Isa. 63:15; Hab. 3:11); NEB ZENITH, "heights where thou dwellest"; [Gk. *épaulis*] (Acts 1:20); NEB HOMESTEAD; [*skénōma*] (Acts 7:46); AV TABERNACLE; NEB DWELLING-PLACE; [*katoikía*] (Acts 17:26); NEB TERRITORY; [*skēnḗ*] (Lk. 16:9); NEB HOME; **ABODE** [Heb. *yāšaḇ, šeḇeṭ*] (Ex. 15:17; Ju. 20:47; Ps. 68:16 [MT 17]); AV also DWELL; NEB DWELLING-PLACE, REMAIN, DWELL; [*šāḵan, miškān*] (Ex. 40:35; Lev. 26:11); AV also TABERNACLE; NEB SETTLE, TABERNACLE; [*nāweh*] (Ex. 15:13; Prov. 3:33); AV HABITATION; NEB DWELLING-PLACE, HOME; [*ḥāṣîr*–'grass'] (Isa. 34:13); AV HABITATION; NEB HAUNT; [*sōḵ*–'hut'] (Ps. 76:2 [MT 3]); AV TABERNACLE; NEB TENT; [*ʿălîyâ*–'upper room'] (Ps. 104:13); AV CHAMBER; NEB HIGH PAVILION.

The terms signify a place of dwelling. Human dwelling places consisted of tents (Ex. 35:3; Lev. 13:46), caves (Isa. 22:16), or permanent homes (Hab. 1:6). Frequently, the terms refer specifically to God's dwelling place in both its transcendent and immanent aspects. Cross made a distinction between Yahweh dwelling in heaven and Yahweh dwelling among His people, expressed by the verbs *yāšaḇ,* "sit," "dwell" (Ugar. *yṯb;* Akk. [*w*]*ašābu*) and *šāḵan,* "settle," "inhabit" (Ugar. *škn;* Akk. *šakānu*). The former term points to the occupation of heaven (*māʿôn* also clearly refers to the heavenly nature of God's dwelling place in Dt. 26:15; 2 Ch. 30:27; and Jer. 25:30); the latter indicates Yahweh's dwelling upon earth (cf. Woudstra, pp. 68-77). God's taking up residence (*miškān;* Ugar. *mškn*t) with His people, either in a temporary dwelling (tabernacle) or a permanent dwelling (temple), is indicative of His affection for, His condescension to, and His identification with, His people (cf. Fairbairn and Vos). In this connection, note the significance of Jn. 1:14: "The Word became flesh and dwelt [*eskḗnōsen,* lit. "tabernacled"] among us."

The Akk. *nawūm* is similar to Heb. *nāweh.* In the Mari documents, *nawūm* means "encampment" (Malamat). This sense would cover all pastoral associations of the Hebrew cognates. The combination of *nāweh* and *ṣeḏeq* (Job 8:6) is translated "an abode befitting you" by Holladay (*CHAL,* p. 231). Ugar. *zbl* (cf. Heb. *zeḇul*) means "ruler" or "lord" as a noun, and "exalt" or "elevate" as a verb (cf. Held and Ward). The exalted nature of God's heavenly abode is apparent in Isa. 63:15; and the fact that the sun and moon were appointed "rulers" at the creation (Gen. 1:16) may shed light on the very difficult Hab. 3:11.

J. T. DENNISON, JR.

HABOR hā'bōr [Heb. *ḥāḇôr*; Gk. *habōr*]. A tributary of the Euphrates, called "the river of Gozan" (2 K. 17:6) from the region through which it flows (*see* GOZAN). It originates in the general vicinity of Haran, flows southeastward and then southward, and empties into the Euphrates not far above Mari. The name occurs in Assyrian inscriptions as *ḫabûr* and continues in use today as Ḫabûr (Khābûr). Tiglath-pileser (1 Ch. 5:26) and "the king of Assyria," either Shalmaneser or Sargon (2 K. 17:6; 18:11), settled some of the Israelite exiles in regions along the Habor.

W. S. L. S.

HACALIAH hak'ə-lī'ə [Heb *ḥaḵalyâ*] (Neh. 1:1; 10:1 [MT 2]); AV HACHALIAH. Father of Nehemiah.

HACHILAH hə-kī'lə, hak'i-lə. **HILL OF** [Heb. *ḥaḵîlâ*]. A hill in the wilderness of Judah, associated with the wanderings of David. It is stated to be S of Jeshimon (1 S. 23:19) and "on the east of Jeshimon" (1 S. 26:1). It was near Ziph and Maon, but the site has not been identified.

HACHMONI hak'mō-nī; **HACHMONITE** hak'mō-nīt [Heb. *ḥaḵmônî*–'wise']. In 1 Ch. 11:11 the family of JASHOBEAM, one of David's heroes. The reference to him in 2 S. 23:8 as a "Tahchemonite" has resulted from textual corruption, and should agree with 1 Ch. 11:11 in form. In 1 Ch. 27:32 "Hachmonite" is the preferred reading.

HADAD hā'dad.

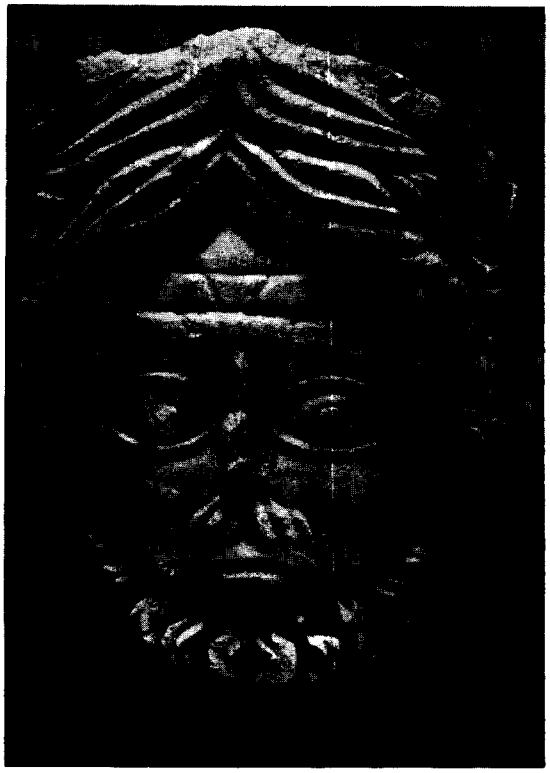
1. [Heb. *ḥaḏaḏ*] (Gen. 25:15 par. 1 Ch. 1:30); AV also HADAR. One of the twelve sons of Ishmael.

2. [Heb. *ḥaḏaḏ*] (Gen. 36:35f. par. 1 Ch. 1:46f.). A king of Edom, son of Bedad, "who defeated Midian in the country of Moab," and whose "city was Avith."

3. Another king of Edom, written *ḥaḏar,* "Hadar," in Gen. 36:39 by a copyist's mistake, but *ḥaḏaḏ* in the parallel passage in 1 Ch. 1:50f. His city was Pau or Pai.

4. A member of the royal family of Edom during David's time, who as a child escaped Joab's slaughter of the Edomites and fled to Egypt. On David's death he returned to Edom, where he made trouble for Solomon by stirring up the Edomites against the rule of Israel (1 K. 11:14-22, 25).

5. An alternative name for Baal, the head of the Canaanite pantheon, whose worship was expressed in fer-



Head of Hadad from Khirbet et-Tannur SE of the Dead Sea, possibly showing Hellenistic-Parthian influences (E. K. Vogel; picture American Schools of Oriental Research)

tility rites. (*See* BAAL I; UGARIT.) The storm-god Hadad is mentioned in Assyrian inscriptions, and called on the monolith of Shalmaneser "the god of Aleppo." In the Assyrian inscriptions he is identified with the air-god Rimmon. The union of the two names in Zec. 12:11 suggests this identity. G. R. HOVEY R. K. H.

HADADEZER hā-dad-ē'zər, had-ə-dē'zər [Heb. *hᵃḏaḏᶜezer*] (2 S. 8:3-12; 1 K. 11:23); [*hᵃḏarᶜezer*] (2 S. 10:16, 19; 1 Ch. 18:3-11; 19:16, 19); AV HADAREZER. Mentioned in connection with David's wars of conquests, Hadadezer was king of Zobah in Syria. The exact position and size of this Syrian principality are uncertain, but it seems to have extended in David's time southward toward Ammon and eastward to the Euphrates.

When the Ammonites had put themselves in the wrong with David by the insult done to his ambassadors (2 S. 10:1-5), they summoned to their aid against the incensed king of Israel the Syrians of various adjoining principalities, among them the Syrians of Zobah under Hadadezer, the son of Rehob. The strategy of Joab, who arrayed the force under the command of his brother Abishai against the Ammonites and himself attacked the Syrian allies, won for Israel a decisive victory. Not content with this result, Hadadezer gathered together another Syrian force, summoning this time also "the Syrians who were beyond the Euphrates" (2 S. 10:16), with Shobach the captain of his host at their head. On this occasion David himself took command of the Israelite forces, and again defeated the Syrians near Helam, Shobach being left dead on the field. Hadadezer and his Syrian vassals, finding resistance hopeless, "made peace with Israel, and became subject to them" (2 S. 10:19). For the name Hadad- or Hadarezer, *see* BENHADAD.

Bibliography.–T. H. Robinson, *History of Israel,* I (1951), 201, 237f.; *WBA,* p. 123; M. F. Unger, *Israel and the Aramaeans of Damascus* (1957), pp. 42-48. T. NICOL

HADAD-RIMMON hā-dad-rim'on, hä-dad-rim'on [Heb. *hᵃḏaḏ-rimmôn*]. A name mentioned in Zec. 12:11 of uncertain designation. The term seems to be a compound name for Baal composed by combining the Aramean Hadad, "thunderer," with the Akkadian Rammân, "thunderer."

The two major views of its reference in Zec. 12:11 are: (1) The term refers to a place near Megiddo at which mourning for Josiah took place after his death in battle against Pharaoh Neco (2 K. 23:29f.; 2 Ch. 35:20-25). (2) The reference is to ceremonies in the worship of Baal held near Megiddo. In either case, "the mourning of Hadad-rimmon" was so famous that it could be used to illustrate the mourning to be exercised in Jerusalem when they "look on him whom they have pierced," which according to Jn. 19:37 refers to viewing the crucified Christ, whose side had been pierced by the soldier's spear.

See HADAD **5.** R. J. HUGHES, III

HADAR hā'där (Gen. 36:39). *See* HADAD **3.**

HADAREZER had-ər-ē'zər (AV 2 S. 10:16, 19; 1 Ch. 18; 19:16, 19). *See* HADADEZER.

HADASHAH hə-dash'ə [Heb. *ḥᵃḏāšâ*–'new']. A town of Judah (Josh. 15:37) in the lowlands. The Mishnah (*Erubin* v. 6) claims it had only fifty inhabitants. It was possibly located between Gath and Lachish, but the exact site is unknown.

HADASSAH hə-das'ə [Heb. *hᵃḏassâ*] (Est. 2:7). The Hebrew name formerly borne by ESTHER. If derived from Akk. *ḫadaššatu,* "bride," it would be one of the goddess Ishtar's titles that had been conferred on Esther (2:7). Otherwise it would be the Hebrew-Aramaic name of an evergreen shrub bearing white or pink flowers, and used by the Jews in the Feast of Tabernacles (Neh. 8:15). R. K. H.

HADATTAH hə-dat'ə (Josh. 15:25, AV). *See* HAZOR-HADATTAH.

HADES hā'dēz [Gk. *ᾅδης*]; AV HELL; NEB also DEATH (Mt. 16:18; Acts 2:27, 31), DEPTHS (Mt. 11:23; Lk. 10:15), DEATH'S DOMAIN (Rev. 1:18). The underworld or realm of the dead.

In Greek mythology Hades was originally the proper name of the god of the underworld (Homer *Il.* xv.188), and the underworld was called "the house of Hades" (*Il.* vii.330; xxiii.389; xxiv.593). The regular use of Hades as the name of the place of the dead may have originated with Homer (*Il.* xxiii.244; cf. LSJ, p. 21). The LXX used Hades almost exclusively to translate Heb. *šᵉʾôl,* the most common OT term for the realm of the dead. The OT says little about SHEOL; it was apparently a gloomy underworld (Isa. 7:11) where all the dead went (Gen. 42:38; Eccl. 9:10).

In the intertestamental period the idea of the afterlife underwent some development. In Jewish apocalyptic literature Hades was an intermediate place (1 En. 51:1) where all the souls of the dead awaited judgment (22:3f.). The dead were separated into compartments, the righteous staying in an apparently pleasant place (v. 9) and various classes of sinners undergoing punishments in other compartments (vv. 10-13). The Pharisees also believed that the

righteous were rewarded and the wicked punished (Josephus *Ant.* xviii.1.3 [14]; Ps. Sol. 14:6f.; 15:11f.).

The NT description of Hades resembles that of the OT and intertestamental portrayals. The depths of Hades are contrasted with the heights of heaven (Mt. 11:23 par. Lk. 10:15; cf. Isa. 7:11). Like the Babylonian (*ANET,* pp. 107-110) and Greek (Homer *Il.* v.646) mythologies, the NT Hades has gates like a city (RSV mg., Mt. 16:18; cf. Isa. 38:10; Job 38:17), although as Jeremias points out, this is figurative language, and the gates represent the "ungodly powers of the underworld" (*TDNT,* VI, 927). Thus the RSV's "powers of death," though not a literal translation, conveys the sense of the passage. In the book of Revelation Hades and Death are always paired and personified (1:18; 6:8; 20:13f.; an exception to this personification may occur in 1:18 if the genitives are understood as objective; cf. R. H. Charles, comm. on Revelation [*ICC,* 1920], I, 32). Christ has the keys of Death and Hades (1:18; Jeremias, *TDNT,* III, 746f., notes the rabbinic parallel in T.B. *Taanith* 2a). In 6:8 the personified Death and Hades seem to represent the ungodly powers of the underworld as they are loosed on the earth after the opening of the fourth seal.

The other NT passages that mention Hades are the focus of a debate about the NT view of the occupants of Hades. For Jeremias (*TDNT,* I, 148f.) Acts 2:27, 31 imply that all the dead are in Hades, whereas Lk. 16:19-31 and Rev. 20:13f. point to only the ungodly being in Hades. Bietenhard (*DNTT,* II, 207) claims that both Lk. 16 and Acts 2 regard Hades as the repository of all the dead, but Rev. 20 places only the ungodly in Hades. M. Rist (*IB,* XII, 520, 524f.) claims that Rev. 20 has all the dead (except the martyrs; cf. v. 5) in Hades. The reason for such conflicting interpretations seems to be that the NT presents an incomplete (though not necessarily inconsistent) picture of the afterlife, and each of these scholars tries to complete that picture without sufficient evidence.

The parable of the rich man and Lazarus (Lk. 16:19-31) should not be used as a definitive statement about the afterlife, since parables were told to illustrate a point, not to give a systematic account of any doctrine. Thus Jesus intended not to describe Hades, but to warn His listeners about their hardheartedness. Also, the text nowhere states that both Lazarus and the rich man were in Hades; Lazarus is clearly placed in "ABRAHAM'S BOSOM," a place "far off" (v. 23) from Hades and separated from it by "a great chasm" (v. 26).

As E. Haenchen pointed out, Acts 2:27, 31 may mean that Jesus "was not delivered into Hades" (comm. on Acts [Eng. tr. 1971], pp. 181f.), an interpretation that accords well with the psalmist's intent (cf. A. Weiser, *Psalms* [Eng. tr., *OTL,* 1962], pp. 176-78). A related, widely held view is that these verses teach that only the soul is in Hades. The parallelism, however, suggests that the whole person is referred to; this is especially clear in Hebrew, where *nepeš,* "soul" (the word used in Ps. 16:10, which Peter quotes here), is often used for a person (*CHAL,* pp. 242f.) and as a substitute for the personal pronoun (e.g., 1 K. 20:32; cf. H. W. Wolff, *Anthropology of the OT* [Eng. tr. 1974], pp. 10-25; *TDNT,* IX, 620). For the Hebrews a person was a unity, not to be divided into body, soul, and spirit as the Greeks did. Gk. *psychē* also can mean the whole person (Bauer, rev., p. 894; *TDNT,* IX, 639f.). Thus Acts 2:27, 31 offer little help in understanding the afterlife.

Rev. 20:13f. must be considered ambiguous. Although vv. 12 and 15 suggest that all the dead were in Hades, vv. 4-6 imply that believers had already been resurrected (cf. G. E. Ladd, comm. on Revelation [1972], pp. 263-68, 273f.). In the face of such conflicting evidence, it is better to suspend judgment than force an interpretation onto the texts. For a cautious but sensible treatment of this problem, see G. E. Ladd, *Last Things* (1978), pp. 33-39.

See DEATH. G. A. L.

HADID hā'did [Heb. *ḥādîḏ*–'sharp'; Gk. *Hadida*]. A town of Benjamin (Neh. 11:33f.) which, along with Lod and Ono, was a home of exiles returning from Babylon (Ezr. 2:33; Neh. 7:37). It was located at the mouth of the valley of Aijalon NE of the coastal plain. It is included in the Karnak list of Thutmose III and also in the Mishnah (*Arakhin* ix.6) as existing as a walled city since Joshua. Hadid was rebuilt and fortified by Simon Maccabeus (1 Macc. 12:38; *see* ADIDA) and by Vespasian (Josephus *BJ* iv.9.1 [486]). It is probably to be identified with modern el-Ḥadîtheh, 5 km. (3 mi.) ENE of Lod (*WHAB*).

D. W. BAKER

HADLAI had'lī [Heb. *ḥaḏlāy*]. An Ephraimite (2 Ch. 28:12), father of Amasa, who was one of the heads of the tribe in the time of Pekah king of Israel.

HADORAM hə-dôr'əm [Heb. *ḥᵃḏōrām*].

1. Son of Joktan and apparently sixth in descent from Noah (Gen. 10:27 par. 1 Ch. 1:21).

2. Son of Tou king of Hamath, sent by his father with presents to King David (1 Ch. 18:10). In 2 S. 8:9f., written probably incorrectly "Joram," son of "Toi."

3. Rehoboam's superintendent of the forced labor department (2 Ch. 10:18), called ADORAM in 1 K. 12:18, a contraction of ADONIRAM. He was sent by Rehoboam as messenger to Israel at the time of the revolt of the ten tribes and was stoned to death by them.

G. R. HOVEY

HADRACH had'rak [Heb. *ḥaḏrāḵ*]. A place, probably a city-state, in northern Syria. "The land of Hadrach" is mentioned in Zec. 9:1, along with Damascus, in connection with a prophecy concerning "the cities of Aram." It is almost certainly to be identified with Ḥatarikka in Assyrian texts. Tiglath-pileser III named "the city of Hatarikka" in his annals as one of the "nineteen districts of Hamath" that had gone over to support Azariah of Judah (or Azriyau of Ya'udi, cf. *ARAB,* I, § 770; §§ 815, 821). Sennacherib referred to the "eponymy of Gahilu, governor of Ḥatarikka," in the Taylor Prism (*ARAB,* II, § 428). It has been identified with Tell Āfis, about 45 km. (28 mi.) SW of Aleppo, where the stele of Zakir (*ca.* 800 B.C.) was found (cf. *DOTT,* pp. 242-250). In Old Aramaic the name is written *ḥzrk,* suggesting an original **ḥḏrk* (or Hadhrak), but this raises a problem with the identification with Assyr. Ḥatarikka, for *ḏ* should be reflected by *z* in Assyrian. W. S. L. S.

HA-ELEPH hā-ē'lef [Heb. *hā'elep*]; AV, NEB, ELEPH. One of the cities of Benjamin, in the vicinity of Jerusalem (Josh. 18:28). The name is omitted from the LXX B; in A it is joined to the preceding word (Heb. *ṣēlaʿ*), reading Gk. *Sēlaleph.* The exact site is unknown, but it is perhaps to be identified with Liftā, NW of Jerusalem (*HDB*; BDB, p. 49), though this has also been identified as (Me-)Nephtoah. K. G. JUNG

HAEMORRHOIDS. *See* TUMORS.

HAG. *See* NIGHT HAG.

HAGAB hā'gab [Heb. *ḥagaḇ*–'locust'; Gk. Apoc. *Agaba*]; AV Apoc. AGABA; NEB Apoc. GABA. Ancestor of

some of the Nethinim who returned from the Babylonian captivity with Zerubbabel and Nehemiah. The name occurs in Ezr. 2:46; 1 Esd. 5:30, but is omitted entirely from the parallel list of Neh. 7:48.

HAGABA hag'ə-bä [Heb. *ḥ"gāḇā'*]. *See* HAGABAH.

HAGABAH hag'ə-bä [Heb. *ḥ"gāḇâ*–'locust']; AV GRABA; NEB AGGABA (1 Esd. 5:29). Like Hagab, an ancestor of some of the temple servants who returned from Babylon with Zerubbabel (Ezr. 2:45); spelled "Hagaba" in the parallel passage (Neh. 7:48).

HAGAR hā'gär [Heb. *hāgār*–'emigration,' 'flight'; Gk. *Hagar*]. An Egyptian woman, the handmaid or slave of Sarai; a present, perhaps, from Pharaoh when Abram dissembled to him in Egypt (Gen. 12:16). Mention is made of her in two passages (Gen. 16; 21:8-21).

In the first narrative (Gen. 16) it is related that Sarai, despairing at her age of having children, gave Hagar to Abram as a concubine. As Hagar was not an ordinary household slave but the peculiar property of her mistress (cf. 29:24, 29), any offspring which she might bear to Abram would be reckoned as Sarai's (cf. 30:3–9). In the prospect of becoming a mother, Hagar, forgetting her position, seems to have become insolent toward her childless mistress. Sarai felt keenly the contempt shown her by her handmaid, and in angry tones brought her conduct before Abram. Now that her plan was not working out smoothly, she unfairly blamed her husband for what originated with herself, and appealed to God to redress her grievance. Abram refused to interfere in the domestic quarrel and, renouncing his rights over his concubine and her claims on him, put her entirely at Sarai's disposal. Under the harsh treatment of her mistress Hagar's life became intolerable, and she fled into the wilderness, turning her steps naturally toward Egypt, her native land.

But the angel of the Lord (who is here introduced for the first time as the medium of the theophany) appeared to her as she was resting by a spring and commanded her to return and submit herself to her mistress, promising her an innumerable seed through her unborn son, concerning whom he uttered a striking prediction (*see* ISHMAEL). To the angel (who is now said to be the Lord Himself) Hagar gave the name "Thou art a God of seeing" (16:13).

Obedient to the heavenly vision Hagar returned, as the narrative implies, to her mistress and gave birth to Ishmael, Abram being then eighty-six years old.

The other narrative (Gen. 21:8–21) relates what occurred in connection with the weaning of Isaac. The presence and conduct of Ishmael during the family feast held on the occasion roused the anger and jealousy of Sarah who, fearing that Ishmael would share the inheritance with Isaac, peremptorily demanded the expulsion of the slave-mother and her son. But Abraham's fatherly heart recoiled from such a cruel course, and it was only after the revelation was made to him that the ejection of Hagar

Jean Baptiste Corot, *Hagar in the Wilderness* (A.D. 1835). This oil painting shows the angel coming to encourage Hagar and Ishmael (Metropolitan Museum of Art, Rogers Fund, 1938)

and her son would be in the line of the divine purpose — for Isaac was his real seed, while Ishmael would be made a nation, too — that he was led to forego his natural feelings and accede to Sarah's demand. So next morning the bondwoman and her son were sent forth with the bare provision of bread and a skin of water into the wilderness of Beer-sheba. When the water was spent, Hagar, unable to bear the sight of her boy dying from thirst, laid him under a shrub and withdrew the distance of a bowshot to weep out her sorrow. But the angel of God, calling to her out of heaven, comforted her with the assurance that God had heard the voice of the lad and that there was a great future before him. Then her eyes were opened to discover a well of water; she filled the skin and gave her son a drink. With God's blessing the lad grew up amid the desert's hardships, distinguished for his skill with the bow. He made his home in the wilderness of Paran, and his mother took a wife for him out of her own country.

In Gal. 4:21-31 Paul makes an allegorical use of this episode in the history of Ishmael and Isaac to support his argument for the transitory character of the Jewish ritual and the final triumph of Christian freedom over all Judaizing tendencies. In elaborating his reference, the apostle institutes a series of contrasts. Hagar, the bondwoman, represents the old covenant which was given from Mt. Sinai; and as Ishmael was Abraham's son after the flesh, so the Judaizing Christians, who wish to remain in bondage to the law, are Hagar's children. On the other hand, Sarah, the freewoman, represents the new covenant instituted by Christ; and as Isaac was born to Abraham in virtue of the promise, so the Christians who have freed themselves entirely from the law of carnal ordinances and live by faith are Sarah's children. Thus Hagar corresponds to "the Jerusalem that now is," that is, the Jewish state which is in spiritual bondage with her children; while Sarah represents "the Jerusalem that is above," "our mother" (RSV), the mother of us Christians, that free spiritual city to which Christians even now belong (Phil. 3:20). By this allegory the apostle would warn the Galatian Christians of the danger which beset them from their Judaizing brethren, of their subjection to the covenant of works and their ultimate expulsion from the household of faith.

To us Paul's reference does not appeal with the same force as it would do to those to whom he was writing. The incident taken by itself, indeed, does not contain any suggestion of such a hidden meaning. Yet the history of the Hebrew nation is but typical of the history of the Church in all ages, and the apostle's familiarity with rabbinical modes of interpretation may have led him to adopt this method of confirming the truth which he had already proved from the law itself.

HAGGAI hag'ē-ī, hag'ī [Heb. *ḥaggay*; LXX *haggaios*]; AV also AGGEUS (1 Esd. 6:1; 7:3; 2 Esd. 1:40). A prophet of the 6th cent. B.C. and the tenth book of the Minor Prophets. Haggai was written before the other two post-exilic prophets Zechariah and Malachi.

I. Name.–The name means "festal," coming from the word *ḥag*, "feast, festival," usually linked with the pilgrimage feasts of Passover (Unleavened Bread), Pentecost (Weeks), and Tabernacles. Perhaps Haggai was born close to the time one of those feasts was being observed.

II. Personal Ministry.–Haggai was probably born to a humble family, since the name of his father is unknown. He may have been about eighty years old when he prophesied, because Hag. 2:3 implies that he had seen Solomon's temple prior to the exile. His age could explain the brevity of his ministry.

According to Ezr. 5:1 and 6:14 Haggai was a contemporary of the prophet Zechariah, and together the two men encouraged the rebuilding of the temple. Ezr. 5:2 mentions their valuable assistance in the building project. Haggai and Zechariah are linked together again in headings to several psalms found in major versions. For example, the Vulgate mentions them in the titles to Pss. 111 and 145, while the LXX lists the two in the headings of Pss. 137 and 145-148. This tradition — not found in the MT — may reveal the involvement of the two prophets in the worship of the temple they helped to rebuild.

Haggai, like Malachi, is called "the messenger of the Lord," a title that can refer to prophets (2 Ch. 36:15) or priests (Mal. 2:7). Although his ministry was short, no prophet was more successful.

III. Historical Background.–After Cyrus King of Persia captured Babylon in 539 B.C. he made a decree that allowed the Jews to return to Palestine and rebuild the temple, destroyed forty-seven years earlier by Nebuchadrezzar and his Chaldean armies. Under Zerubbabel and other leaders, about fifty thousand Jews did return to the Jerusalem area in 538 B.C. They soon began work on the temple and, with the help of skilled Phoenicians, the foundation was laid in 536 B.C. amid great rejoicing and thanksgiving (Ezr. 3:8-10). Unhappily their efforts were stalled by the opposition of the Samaritans, a mixed race of Jews and Gentiles who had been living in Palestine since the seventh century. They asked Cyrus and his successor, Cambyses, to stop the work on the temple, pointing to the number of times Judah rebelled before the exile. Apparently the Persians heeded the Samaritan complaints and intervened, because little additional work was done on the temple between 536 and 520 B.C.

In the year 521 B.C., however, Darius the Great came to power and, after quelling a series of revolts, adopted a policy of supporting religious activity throughout his empire. It should have brought a quick response from the Jews, but instead they made no effort to resume building. They seemed content to live without a temple, although the temple had been the focal point of the life of the nation. It was to awake them from this lethargy that Haggai began to preach his short but powerful sermons. The people were convinced and work on the temple began in 520 B.C. By 516 B.C. the task was completed and worship was fully restored.

IV. Date and Structure.–The book of Haggai consists of a series of four messages firmly dated in a four-month span during the second year (520 B.C.) of Darius the Great. The first message was given on the first day of the sixth month, which overlapped August and September. This

was followed by a second message on the twenty-first day of the seventh month (September-October), the last day of the Feast of Tabernacles, the final religious festival of the year (Lev. 23:33). Both messages were addressed to Zerubbabel, governor of Judah, and Joshua, the high priest. The final two messages were given on the twenty-fourth day of the ninth month (November-December). The third message began with a legal question directed to the priests, while the fourth was a word of encouragement addressed to Zerubbabel alone.

V. Message.–A. The Challenge (1:1-15). The first message (1:1-11) presents a scathing attack on a nation that had neglected to finish the temple while at the same time individuals beautified their own homes. Their selfish attitude resulted in economic woes, for crops had failed and animals were diseased amid a severe drought sent by the Lord. The punishment was in line with the curse Moses had predicted in Dt. 28:38-40. Yet, through Haggai, the Lord challenged the people to resume the rebuilding of the temple so that He might bless them.

Led by Zerubbabel and Joshua, the nation responded wholeheartedly to the Lord's rebuke. They began to respect and fear God rather than the hostile neighbors who opposed their work. The Lord in turn "stirred up" the spirit of the people, just as he had done eighteen years earlier when he brought the remnant back from exile (Ezr. 1:5).

B. The Encouragement (2:1-9). After the work had resumed, a question arose as to how the new temple would compare with Solomon's. It was clear that the new building could not match the splendor of Solomon's temple, so the people were somewhat discouraged. In his second message (2:1-9) Haggai told the nation to "be strong" and "work," for God was with them. The same words were used by David when he challenged Solomon to complete the building of the first temple (1 Ch. 28:10, 20). Their material resources could not match Solomon's, but the same powerful God would help them. He would protect them as He did during the Exodus, and He would "shake all nations" and "fill this house with glory" (2:6f.).

The "shaking of nations" may have two aspects. It could refer to a "turnover" of resources — the financial help given to the temple by King Darius (Ezr. 6:8f.; cf. Isa. 60:5). The shaking also includes the overthrow of nations (see 2:21f.), perhaps referring to the fall of the Persian empire to the Greeks. He. 12:26f. quotes Hag. 2:6 in an eschatological setting. When Christ returns to earth He will defeat all the nations of the world (Joel 3:16 [MT 4:16]).

Another phrase with messianic overtones is "the desire (desired) of nations" in 2:7. The word "desire" can refer to material wealth or "valuables" (2 Ch. 32:27; cf. Isa. 60:5), a meaning that fits the silver and gold of 2:8. But "desire" (or "preciousness") can also refer to individuals who are highly esteemed. Three times Daniel is called a man of "high esteem" (Dnl. 9:23; 10:11, 19; cf. also 11:37). Perhaps Haggai wanted the word to refer not only to material wealth or "glory" but also to the glory of the presence of God. When Christ entered the temple, the building was filled with glory (cf. Lk. 2:32). In the OT the only glory that "fills the temple" (2:7) is the cloud that signifies the presence of God (Ex. 40:34f.; 1 K. 8:10f.). But not even Solomon's temple saw the glory of the incarnate Christ (2:9). At his second coming Christ will bring peace to "this place," that is, to Jerusalem and all mankind (cf. Isa. 60:17f.).

C. The Reversal of Fortunes (2:10f.). More than two months later Haggai presented his third message (2:10-19). He began with a question addressed to the priests as to how holiness and uncleanness are transmitted. The priests rightly answered that it is much easier to become unclean than clean (cf. Lev. 6:27). Because of their sin the nation had polluted the land and even the crops had suffered. In vv. 16f. Haggai reviewed the meager harvests they had experienced prior to resuming work on the temple. They still suffered from the effects of their sin because there had not been time for new harvests in the intervening few months. But if the people remained faithful in their resolve to rebuild the temple, the Lord promised that future harvests would be plentiful.

D. The Promise (2:20-23). The final message (2:20-23) also was given on that same twenty-fourth day of the ninth month. This time Zerubbabel alone is addressed, as Haggai brings the book to a climax. Verses 21 and 22 return to the theme of the overthrow of nations discussed in vv. 6 and 7. Parallel passages are found in Ezk. 38:19-23 and Zec. 14:13f. On that day of victory Zerubbabel will be exalted. The governor is called "my servant" and "chosen" one, two titles that sometimes have a messianic connotation (Isa. 42:1; 52:13). This does not mean that Haggai thought that Zerubbabel himself was the Messiah. But Zerubbabel was part of the messianic line (cf. Mt. 1:12) and his rise to power in Judah was a sign that one day the Messiah would come. In Jer. 22:24 the Lord said that King Jehoiachin was set aside as one would pull off a signet ring. Now Zerubbabel is compared to a signet ring, thus indicating that the line of David has been reinstated.

VI. Style.–The book of Haggai is rare among the prophetic books because it has no poetic lines. Yet its clarity and abruptness combine to make a powerful impact. Haggai's authority is derived from the fact that he was declaring the word of the Lord. In 1:1, 3 and 2:1 the Lord spoke "through" (literally "by the hand of") Haggai and in 2:10 and 20 the word "came to" the prophet. He delivered the "message of the Lord" (1:13) and "thus says the Lord" occurs in 1:2, 7, 13; 2:4, 6-9, 11, 14, 23.

Repetition of key words and ideas is skillfully used. Several times Zerubbabel the governor, Joshua the high priest, and the remnant are mentioned in the same verse (1:12, 14; 2:2, 4). The idiom "set your heart" or "consider" is found in 1:5, 7 and 2:15, 18. In ch. 1 Haggai twice speaks of the Lord's house being "desolate" or "in ruins" (vv. 4, 9) and 2:6, 21 repeat the prophetic line "I will shake the heavens and the earth."

A number of rhetorical questions are effectively used. The Lord directs probing questions to the people in 1:4, 9 and again in 2:3, 19. In 2:12f. Haggai was instructed to ask the priests an important question. Malachi, another postexilic prophet, employs rhetorical questions with even greater frequency and power.

Haggai also alludes frequently to earlier books. Hag. 1:6 reflects Dt. 28:38-40 and Hag. 2:17 refers to the "blight and mildew" of Dt. 28:22. The prophet uses these brief allusions to remind the people that the curses predicted by Moses had indeed come true. In Hag. 2:4 the thrice repeated phrase "Take courage" is identical to its more famous counterpart in Josh. 1:9. This time another Joshua — son of Jehozadak and the high priest — is the recipient of the exhortation.

VII. Text.–Haggai is relatively free from textual controversy, but some scholars reject 1:7b and 13 as later interpolations and on the basis of the ancient versions accept minor revisions in 1:9 and 12. The date formula in 1:15 is suspect because elsewhere the date tells when the word of the Lord came to Haggai (1:1; 2:1, 10, 20) and usually comes first in the sentence (except 2:20). Moreover, the time notation of 2:1 immediately follows 1:15, although each date makes good sense as it stands.

The LXX omits the first part of 2:5, adds a dozen words to 2:9, and expands 2:14 using Am. 5:10. The

charge that 2:17 is dependent on Am. 4:9 fails to realize that both passages go back to Dt. 28:22 (see VI above).

HAGGEDOLIM hag-ə-dō'lēm [Heb. *haggᵉḏôlîm*] (Neh. 11:14); AV "one of the great men." According to the RSV and NEB, the father of the priest Zabdiel. The term may be better rendered by the AV. (Cf. the LXX, of which some texts omit the entire clause, while others read *tōn megálōn*, "the great men.")

HAGGERI hag'ə-rī (AV, NEB, 1 Ch. 11:38). *See* HACRI.

HAGGI hag'ī [Heb. *ḥaggî*–'festive']. The second son of Gad (Gen. 46:16; Nu. 26:15). The latter passage refers to his descendants as Haggites, of whom nothing else is known.

HAGGIAH ha-gī'ə [Heb. *ḥaggîyâ*]. Named in 1 Ch. 6:30 as among the descendants of Levi. See *IP*, p. 222.

HAGGITES hag'īts. *See* HAGGI.

HAGGITH hag'ith [Heb. *ḥaggîṯ*–'festal']. According to 2 S. 3:4; 1 K. 1:5, 11; 2:13; 1 Ch. 3:2, the fifth wife of David and the mother of his fourth son, Adonijah. Adonijah was born in Hebron while David's capital was there (2 S. 3:4f.).

HAGIA hā'gi-ə (1 Esd. 5:34, AV). *See* HATTIL.

HAGIOGRAPHA hag'ē-og-rə-fə [Gk. *hagiographa*–'holy writings']. The third division of the Hebrew Bible, also known as the Writings (Heb. *kᵉṯûḇîm*), comprising Psalms, Proverbs, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, 1 and 2 Chronicles. *See* BIBLE III.A.1, 2; IV.A.3; CANON OF THE OT I.C.

HAGRI hag'rī [Heb. *hagrî*] (1 Ch. 11:38); AV, NEB, HAGGERI. The father of Mibhar, one of the "mighty men" who rallied round David during his foreign wars. He is mentioned only in 1 Ch. 11:38; the parallel passage (2 S. 23:36) gives instead the name "Bani the Gadite."

HAGRITES hag'rīts [Heb. *hagrî'îm*] (1 Ch. 5:10, 19f., 27, 30; Ps. 83:6 [MT 7]); AV, NEB, HAGARITES, HAGERITE, HAGARENES. An Arab tribe, or confederation of tribes, against which the Reubenites fought in the days of Saul. Along with such traditional enemies of Israel as the Moabites, Edomites, and Ishmaelites, the Hagrites lived in Transjordan. In the early monarchy the Reubenites absorbed the Hagrites by conquest (1 Ch. 5:10, 19-22); and under David, Jazaz the Hagrite became an overseer of the flocks (1 Ch. 27:30). The extent to which the Hagrites were related to Hagar the mother of Ishmael (Gen. 16) has yet to be determined. R. K. H.

HA-HIROTH ha-hī'roth. *See* PI-HAHIROTH.

HAI hā'ī (AV Gen. 12:8; 13:3). *See* AI.

HAIL [Heb. *bārāḏ* (Ex. 9–10; Job 38:22; Ps. 78:47f.; etc.); Gk. *chálaza* (Rev. 8:7; 11:19; 16:21]; **HAILSTONES** [Heb. *bārāḏ* (Ps. 18:12f. [MT 13f.]), *ʾeḇen bārāḏ* (Josh. 10:11; Isa. 30:30), *ʾeḇen ʾᵉlgāḇîš* (Ezk. 13:11, 13; 38:22); Gk. *chálaza* (Rev. 16:21)]; AV also HAIL.

Hailstorms are not unknown in Syria and Palestine and when they occur may be of great severity. They occasionally take place in Egypt.

The plague of hail (Ex. 9:23f.; Ps. 78:47) was a local storm, as is usual, falling on the Egyptians and not striking the people of Israel in Goshen. It was of great severity, "such as had never been in all the land of Egypt since it became a nation" (Ex. 9:24). It took place in January, for the barley "was in the ear and the flax was in bud" (v. 31), and it caused great damage to the crops. After Israel's battle with the Amorites at Gibeon there was a great hailstorm, which killed more Amorites than the Israelites killed in battle (Josh. 10:11).

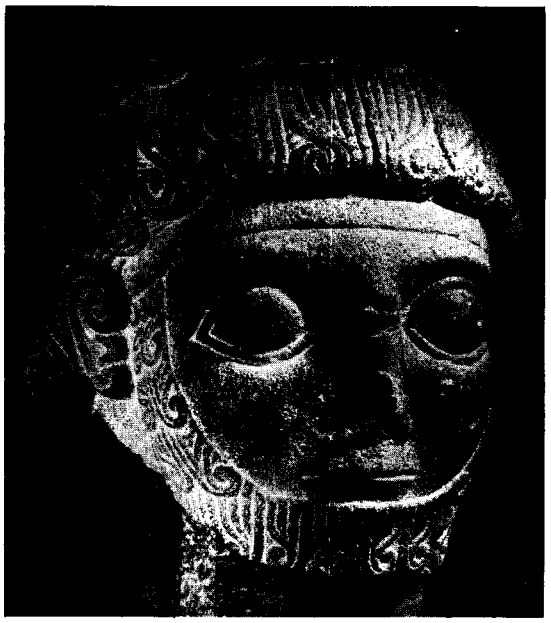
Hail is often spoken of as a means of punishing the wicked: "like a storm of hail . . . he will cast down to the earth with violence" (Isa. 28:2); "and hail will sweep away the refuge of lies" (v. 17). It is used as a symbol of God's anger: "there shall be . . . great hailstones in wrath" (Ezk. 13:13; cf. Isa. 30:30; Hag. 2:17; Rev. 8:7; 11:19; 16:21).

God's power and wisdom are also shown in controlling the hail: "Have you seen the storehouses of the hail . . . ?" (Job 38:22); "fire and hail, snow and frost, fulfilling his command" (Ps. 148:8). A. H. JOY

HAIL. This interjection, found only in the Gospels as the translation of Gk. *chaíre, chaírete* (imperative of *chaírō*, "rejoice") is used as a greeting or salutation. The word "hail" is Old English and was formerly an adjective used with the verb "be," meaning "well, sound, hale," e.g., "Hale be thou." Wyclif has "heil" without the verb, followed by other English versions, except that the Geneva Bible has "God save thee" in Mt. 26:49; 28:9. The word occurs in Mt. 26:49; 27:29; 28:9 (NEB "greeting"); Mk. 15:18; Lk. 1:28 (NEB "greetings"); Jn. 19:3. *See* GODSPEED; GREETING.

HAIR [Heb. *śēʿār* (Lev. 13:3f., 10, 20, etc.; Jgs. 16:22; 2 S. 14:26; etc.), *śaʿᵃrâ*–'(single) hair' (Jgs. 20:16; 1 S. 14:45; Ps. 40:12 [MT 13]; etc.) *māraṭ*–'pluck hair,' 'grow bald' (Lev. 13:40f.; Neh. 13:25), *miqšeh*–'set hair' (Isa. 3:24), *nēzer*– 'unshorn, consecrated hair' (Jer. 7:29); Aram. *śᵉʿar* (Dnl. 3:27; 4:33 [MT 30]; 7:9); Gk. *thrix* (Mt. 3:4; 5:36; Lk. 7:38; Jn. 11:2; Rev. 1:14; etc.), *kómē* (1 Cor. 11:15), *komáō*–'wear long hair' (1 Cor. 11:14f.), *plégma*–'woven, braided' (1 Tim. 2:9)]; **HAIRY** [Heb. *śāʿîr* (Gen. 27:11, 23), *śēʿār* (Gen. 25:25; Ps. 68:21 [MT 22]; Zec. 13:4)]; AV also "rough" (Dnl. 8:21; Zec. 13:4); NEB also COARSE HAIR (Zec. 13:4). The Heb. *pᵉʾaṯ rōʾšᵉḵem* of Lev. 19:27 is translated literally by the AV as "corners of your head." The RSV has the more idiomatic "hair on your temples," and the NEB renders "side to side" (cf. Jer. 9:26 [MT 25]). The Heb. *ṣammâ* (Cant. 4:3; 6:7; Isa. 47:2) is translated "locks" in the AV, although "veil" (RSV, NEB) is to be preferred (see M. Pope, *Song of Songs* [*AB*, 1977], p. 457).

I. Hair Fashions.—Hair was worn in various fashions by the peoples of biblical times, and not always in the same way among the same people at different periods. We know from Egyptian literature and monuments, as well as from the writings of Greek authors (esp. Herodotus), that the dwellers on the Nile had their heads shaved in early youth, leaving only a side lock until maturity was attained, when this mark of childhood was taken away. Priests and warriors kept their heads closely shaved; nothing but the exigencies of arduous warfare was allowed to interfere with this custom. On the other hand, the Hebrew people, like their Babylonian neighbors (Herodotus i.195), kept long, well-cared-for, bushy curls of hair as emblems of manly beauty. References are frequent in the



Hittite head of a man with short curled hair and beard (Louvre)

Scriptures and elsewhere. Absalom's long, luxuriant hair is specially mentioned (2 S. 14:26). The "seven locks" of Samson's never-shaven head (Jgs. 16:13f., 19) may have been plaits of hair resembling those of modern young bedouin warriors. The Shulammite sang of the locks of her beloved that were "wavy" (AV "bushy") and "black as a raven" (Cant. 5:11). The hair of the beloved "is like a flock of goats, moving down the slopes of Gilead" (4:1). The "flowing locks" (Heb. *dallâ*) of 7:5 signify the thin threads that represent the unfinished web in the loom (cf. Isa. 38:12), and thus the flowing hair of women. The Hebrew word *r*^{e}*hāṭîm* means literally the "gutters" at which the flocks were watered (e.g., Gen. 30:38, 41) and figuratively women's long plaits (RSV, NEB, "tresses"; AV "galleries"), which charm men (Pope, p. 629). Josephus (*Ant.* viii.7.3 [185]) reported that Solomon's bodyguard was distinguished by youthful beauty and "hair hang[ing] down to a very great length."

II. Hair in Idol Worship.–It is well known that among the gentile nations that surrounded Israel the hair of childhood or youth was often shaved and consecrated at idolatrous shrines (cf. Herodotus ii.65 for Egypt). Frequently this custom marked an initiatory rite into the service of a divinity (e.g., that of Orotal [Bacchus] in Arabia, Herodotus iii.8). To the Jew it was therefore an abomination of the Gentiles (see Lev. 19:27; Jer. 9:26; 25:23; 49:32). The Syriac version of the latter passage renders, "You shall not let your hair grow long" (i.e., in order to cut it as a religious rite in honor of an idol). It is, however, probable that among the Jews, as still among many Moslems, the periodic cropping of the hair, when it had become too cumbersome, was connected with some small festivity during which the hair was weighed and its weight in silver was given in charity to the poor. At least, the weighing of Absalom's hair (2 S. 14:26) may be related to some such custom, which is paralleled in other countries. The use of balances in connection with the shaving-off of the hair in Ezk. 5:1 is probably common (W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], p. 87).

III. The Nazirite Vow.–The shaving of the head of the Nazirites may be compared to these gentile practices, though the resemblance is superficial. The man who made a vow to God was responsible to Him with his whole body and being. Not even a hair was to be injured wilfully during the entire period of the vow, for all belonged to God. The conclusion of the Nazirite vow was marked by sacrifices and the shaving of the head at the door of the sanctuary (Nu. 6:1-21), indicative of a new beginning of life. (Cf. Acts 18:18; F. F. Bruce, comm. on Acts [*NICNT*, repr. 1960], p. 377.) The long, untouched hair was therefore considered the emblem of personal devotion (or devotedness) to the God of all strength. Thus it was easily inferred that Samson's strength was in his hair (Jgs. 16:17, 20).

IV. Later Fashions.–In NT times, especially in the Diaspora, the Jews frequently adopted the fashion of the Romans in cropping the hair closely (1 Cor. 11:14); still the fear of being tainted by the idolatrous practice of the Gentiles, which is specially forbidden in Lev. 21:5, was so great that the side locks remained untouched and were permitted to grow freely. This is still the custom among the Jews of Eastern Europe and the Orient.

Long hair was a custom that Paul (1 Cor. 11:15) linked to "nature" (Gk. *phýsis*) or "general [human] consciousness" (F. W. Grosheide, comm. on 1 Corinthians [*NICNT*, 1953], p. 260). The reference to the "covering" of hair (cf. v. 13, "uncovered," Gk. *akatakálypton*) is an allusion to the OT practice according to which married women had their hair "covered," i.e., "bound up" (W. F. Orr and J. A. Walter, comm. on 1 Corinthians [*AB*, 1976], p. 260) or "orderly" (Grosheide, p. 260). Long, covered hair was a mark that distinguished the Corinthian Christian woman from the Corinthian prostitute whose hair was cut (Grosheide, p. 254).

Paul's warning against braided hair (1 Tim. 2:9) is not directed against the practice of braiding (an accepted custom in 2 K. 9:30; Jth. 10:3) but perhaps against the identification with prostitutes (M. Dibelius and H. Conzelmann, comm. on 1 Timothy [Eng. tr., *Hermeneia*, 1976], p. 46). For Peter (1 Pet. 3:3) inward purity is the "glory" of women, not outward "braiding of hair" (an emphasis echoed by Tertullian, distinguishing between Christian and Roman life-styles, esp. in *De cultu muliarum* ii.11; see also ii.6-8).

V. Hair Color and Symbolism.–The "flowing locks . . . like purple" in Cant. 7:5 (MT 6) are possibly a color achieved through dyeing (Heb. *karmîl*, "red," a play on the word "Carmel," the mountains N of Palestine (Pope, pp. 629f.). Black hair could signify health and youth in contrast to white hair, the color of sickness and decay (Lev. 13:3f., 10, 29-37; Cant. 5:11 [see Pope, pp. 536f.]). Gray hairs (Heb. *śêḇâ*, "gray-headedness," Prov. 20:29; 2 Macc. 6:23) and the hoary white of old age (Prov. 16:31; cf. Lev. 19:32) were highly honored by the Jews. They express old age (Dt. 32:25; Ps. 71:18; Isa. 46:4) and wisdom (Wisd. 4:9). Sometimes white hair is the emblem of a glorious, divine presence (Dnl. 7:9; 2 Macc. 15:13; Rev. 1:14). Calamity befalling the gray-headed was doubly terrible (Gen. 42:38; 44:29). The "hair of the flesh" is said to "stand up" (Job 4:15; Sir. 27:14) when sudden terror or fear takes hold of a person. The symbolic language of Isa. 7:20 compares Judah to a human body of which the head and the "hair of the feet" (a euphemism) will be shaved; Judah will be depopulated (KD *in loc.*). The expression "to sling a stone at a hair and not miss" (Jgs. 20:16) signifies an accurate aim.

God has numbered the very hairs of the head (Mt. 10:30 par. Lk. 12:7), which convey the idea of innumerableness (Ps. 40:12 [MT 13]; 69:4 [MT 5]). What God can number, He can also protect, so that not even a hair of the head might "fall to the ground" or "perish." These phrases express complete safety (1 S. 14:45; 2 S. 14:11; 1 K. 1:52; Lk. 21:18; Acts 27:34).

Sumerian statuette (3rd millennium B.C.) of a woman whose hair, adorned only by a ribbon, flows loosely down her back (Trustees of the British Museum)

Statue of a minor goddess with a large headdress and hair falling to her shoulders (early 2nd millennium B.C.) (Direction générale des antiquités et des musées, Damascus, Syria)

VI. Barbers.–The care of the hair, especially its periodic cutting, early necessitated the trade of barbers. The Heb. *gallāḇ* is found in Ezk. 5:1, and the plural form of the same word occurs in an inscription at Citium (Cyprus) (*Corpus Inscriptionum Semiticarum,* I [1881], 1586), where the persons thus described clearly belonged to the priests or servants of a temple.

VII. Ointments.–Numerous were the cosmetics and ointments applied to the hair (Eccl. 9:8; Mt. 6:17; perhaps Ruth 3:3), but some, reserved for sacramental purposes, were prohibited for profane use (Ex. 30:32; Ps. 133:2). Such a distinction is also found in Egypt, where the walls of temple laboratories were inscribed with extensive recipes of such holy oils, while the medical papyri (see esp. Papyrus Ebers, plates 64-67) contain numerous ointments for the hair. Even Greek and Roman medical authors have transmitted to us the knowledge of some such prescriptions compounded, it is said, by Queen Cleopatra VI of Egypt, the frivolous friend of Caesar and Antony (see H. L. E. Luering, *Die über die medicinischen Kenntnisse der alten Aegypter berichtenden Papyri,* etc. [1888], pp. 121-132). According to Josephus (*Ant.* xvi.8.1 [233]), Herod the Great, in his old age, dyed his hair black, a custom, however, which does not appear to be specifically Jewish, as hair dyes as well as means for bleaching the hair were well known in Greece and Rome. It is certain that the words in Mt. 5:36 would not have been spoken had this been a common custom in the days of Our Lord. A special luxury is mentioned by Josephus (*Ant.* viii.7.3 [185]), who stated that the young men who formed the bodyguard of King Solomon were in the habit, on festive occasions, of sprinkling their long hair with gold dust.

Barber at work in ancient Egypt. Tempera copy of a wall painting (*ca.* 1430 B.C.) in the tomb of the royal scribe User-het, Thebes (Metropolitan Museum of Art)

For the Jews the anointing of the head was synonymous with joy and prosperity (e.g., Ps. 23:5; 92:10 [MT 11]; He. 1:9; cf. also "oil of gladness" in Isa. 61:3; Ps. 45:7 [MT 8]). It was also, like the washing of feet, a token of hospitality (Ps. 23:5; Lk. 7:46).

But it was the custom in times of personal or national affliction and mourning to wear the hair unanointed and disheveled, or to cover the head with dust and ashes (2 S. 14:2; Josh. 7:6; Job 2:12), or to tear the hair or cut it off (Ezr. 9:3; Neh. 13:25; Jer. 7:29). Lepers were required to have their hair cut (Lev. 14:8f.), but natural baldness was not considered a stigma. *See also* BALDNESS.

H. L. E. LUERING
R. W. V.

HAIR, PLUCKING OF. *See* PUNISHMENTS IV.L.

HAIRCLOTH. In 2 K. 1:8 the RSV interprets Heb. *ba'al śē'ār* (lit. "a hairy man"; cf. AV, NEB) as a reference to Elijah's garments (cf. J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 464), which could be understood as typical garb of a prophet (cf. Zech. 13:4; Mk. 1:6 par. Mt. 3:4). *See* CAMEL'S HAIR.

HAKKATAN hak'ə-tan [Heb. Gk. *haqqāṭān*–'the little one'; Apoc. Gk. *Akatan*] (Ezr. 8:12; 1 Esd. 8:38); AV Apoc. ACATAN; NEB Apoc. HACATAN. The father of Johanan, who returned with Ezra to Jerusalem.

HAKKOZ hak'oz [Heb. *haqqôṣ*; Apoc. Gk. *Akkōs*] (1 Ch. 24:10; Ezr. 2:61; Neh. 3:4, 21; 7:63; 1 Esd. 5:38); AV also KOZ, Apoc. ACCOZ; NEB Apoc. ACCOS.

A priest and chief of the seventh division of Aaron's sons selected by David (1 Ch. 24:10) whose descendants returned with Zerubbabel from the captivity. The family was denied the privileges of priestly ministry at that time because they could not substantiate their claim to priestly rank. In 1 Macc. 8:17 the name is given as ACCOS.

HAKUPHA hə-kōō'fə [Heb. *ḥ"qûpā'*; Gk. *Akipha* (Ezr. 2:51), *Achipha* (Neh. 7:53), *Achiba* (1 Esd. 5:31)]; AV Apoc. ACIPHA; NEB Apoc. ACHIPHA. A family name of some of the temple servants who returned with Zerubbabel from Babylon.

HALAH hā'lə [Heb. *ḥalaḥ*; Gk. *Halae, Hallae, Chaach, Chalach, Chala*]. A place in "Assyria" to which the "king of Assyria" exiled Israelites (2 K. 18:11). Because of the close association of Halah with the river HABOR in all three texts (2 K. 17:6; 18:11; 1 Ch. 5:26), scholars have tended to locate Halah near Habor. The suggested identification with Calah (Assyr. *Kalaḥ*, Nimrûd; cf. Gen. 10:11) presents geographical and philological difficulties. In the passages in Kings (but not Chronicles), however, the phrase "and in the cities of the Medes" is added, somewhat complicating the geographical problem. W. S. L. S.

HALAK hā'lək, **MOUNT** [Heb. *hāhār heḥālāq*–'the bald mountain']. A mountain in the Negeb that was one of the landmarks used to describe the southern limit of the conquests by Joshua (Josh. 11:17; 12:7). The mountain is described as "going up (to) Seir," but the context indicates that the area is W of the Arabah (*see* SEIR). In Nu. 34:4; Josh. 15:3, the southern boundary is described with reference to "the ascent of Akrabbim"; hence Mt. Halak is probably to be located in that general area. Modern Jebel Halâq, about 42 km. (26 mi.) S of Beersheba, may preserve both the site and the name.

W. S. L. S.

HALAKAH hə-lä'kə [Heb. *h"lāḵâ*]. *See* TALMUD I.

HALE; HALING. An obsolete English term (from Old English *halen*) meaning "pull" or "drag," used by the AV to translate Gk. *sýrō* in Acts 8:3 and *katasýrō* in Lk. 12:58. The RSV uses "drag" in both instances. A more frequent modern form is "haul."

HALF [Heb. *ḥ"sî, ḥēṣî* (Ex. 24:6; 25:10; etc.); Gk. *hḗmisys* (Mk. 6:23; Lk. 19:8; etc.)]. For Dnl. 7:25; 12:7; Rev. 12:14, *see* TIME, TIMES AND A HALF.

HALF A SHEKEL; HALF-SHEKEL [Heb. *maḥ"ṣît haššeqel* (Ex. 30:13, 15; 38:26), Gk. *dídrachmon* (Mt. 17:24)]; AV also TRIBUTE MONEY (Mt. 17:24), NEB also TEMPLE TAX (Mt. 17:24). An annual payment of the atonement money (Ex. 30:13, 15; 38:26) or of the temple tax (Mt. 17:24). Both were paid by males over nineteen years of age. The atonement money required of male Israelites was "an offering to the Lord" (Ex. 30:13), whereas the half-shekel of Mt. 17:24 was payment by Jewish males for the upkeep of the temple cult in Jerusalem. The atonement money of the OT served as the basis for this later temple tax.

The Gk. *dídrachmon* literally means "two drachmas," a coin worth two Attic drachmas. It was equivalent in value to the half-shekel of the Jews (Bauer, rev., p. 192). The coin from the fish's mouth (Mt. 17:27) was the Gk. *statḗr*, a silver coin worth four drachmas, thus translated "shekel" in the RSV (Bauer, rev., p. 764).

See MONEY; TAX.

HALF-TRIBE [Heb. *ḥ"ṣî šēḇeṭ* (Nu. 32:33; 34:13-15; Dt. 3:13; 29:8; Josh. 1:12; 12:6; 13:29; 21:5f.; etc.); NEB also HALF. The designation always refers to a portion of the Israelite tribe of Manasseh. Permission was granted to Reuben, Gad, and one-half of Manasseh to settle E of the Jordan River if they would help in the conquest of the land on the west. The remainder of Manasseh settled within the Promised Land itself (Josh. 17:5-12). *See* MANASSEH 1.

HALHUL hal'hul [Heb. *ḥalḥûl*]. A town in the hill country of Judah (Josh. 15:58), the modern Ḥalḥûl about 6 km. (4 mi.) N of Hebron and SE of Beth-zur. In the war with Rome it was called Alurus, where the Idumeans assembled in the campaign of A.D. 68 (Josephus *BJ* iv.9.6 [522]).

HALI hā'lī [Heb. *ḥ"lî*–'ornament'; Gk. A *Tholi*, B *Aleph*]. One of the twenty-two cities, with their villages, assigned to the tribe of Asher when the land of Canaan was divided among the tribes of Israel after the conquest under Joshua (Josh. 19:25). It has not yet been definitely located.

HALICARNASSUS hal'ə-kär-nas'əs [Gk. *Halikarnassos*] (1 Macc. 15:23). The largest and strongest city of the ancient country of CARIA in Asia Minor, situated on the shore of a bay, about 90 km. (55 mi.) S of Ephesus. Its site was beautiful, its climate temperate; the soil of the surrounding country was unusually fertile and noted for its abundance of fig, orange, lemon, olive, and almond trees.

When the ancient country fell into the possession of the Persians, the kings of Caria were still permitted to rule. One of the rulers was the famous queen Artemisia who fought at the battle of Salamis (490 B.C.). The most famous of the rulers, however, was Mausolus (d. *ca.* 353 B.C.), whose tomb (the Mausoleum) was long considered one of the wonders of the ancient world. Pliny described the tomb as a circular structure, 43 m. (140 ft.) high, 125 m. (410 ft.) in circumference, and surrounded by thirty-six

columns; it was covered with a pyramidal dome. The ancient writer Vitruvius, in his description of the city, said that the agora was along the shore; behind it was the Mausoleum, and still farther away was the temple of Mars. To the right of the agora were the temples of Venus and Mercury, and to the left was the palace of Mausolus.

In 334 B.C. Alexander the Great destroyed the city after a long siege, though he was unable to take the acropolis. The city never quite recovered; yet it was later distinguished as the supposed birthplace of Herodotus and Dionysius. That a number of Jews lived there is evident from 1 Macc. 15:23, which states that in the year 139 B.C. a letter was written by the Roman senate in their behalf. In the 1st cent. B.C. a decree was issued granting to the Jews in Halicarnassus liberty to worship "according to the Jewish laws, and to make their *prosendrae* [place of prayer] at the seaside, according to the customs of their forefathers" (Josephus *Ant.* xiv.10.23 [258]).

The modern town of Bodrum represents the ancient Halicarnassus and covers a part of its site. The site was excavated by C. T. Newton in 1857/58.

Bibliography.—C. T. Newton and R. P. Pullan, *History of Discoveries at Halicarnassus, Cnidus, and Branchidae* (2 vols., 1862-1863); D. Magie, *Roman Rule in Asia Minor* (1950).

E. J. BANKS

HALL [Heb. *'iškâ* (1 S. 9:22), *'ûlām* or *'ulām* (1 K. 7:6-8), *bayiṯ* (Est. 5:1); Aram. *bayiṯ* (Dnl. 5:10); Gk. *gámos* (Mt. 22:10), *scholé* (Acts 19:9), *akroatérion* (Acts 25:23)]; AV also PARLOR, PORCH, HOUSE, etc.; NEB also COLONNADE, CHAMBER, etc. In 1 S. 9:22 *liškâ* refers to a room adjacent to a shrine, where a meal could be eaten. In 1 K. 7 Heb. *'ûlām*, or *'ulām*, points to porches or vestibules in Solomon's palace. The word *bayiṯ* also applies to parts of a king's palace.

In Mt. 22:10 Gk. *gámos* occurs in a figurative sense and refers to the hall where the wedding banquet was held rather than to the wedding itself. (A few manuscripts read Gk. *nymphôn* rather than Gk. *gámos*.) In Acts 19:9 Gk. *scholḗ* is used to describe the place where Paul preached to the residents of Corinth. A *scholḗ* was a place where students and teachers met. Paul was heard by Agrippa and Bernice in an *akroatérion*, a place that was used by a procurator to meet his subjects in somewhat private sessions (cf. Bauer, rev., p. 33).

HALL OF JUDGEMENT (Jn. 18:28, AV). *See* PRAETORIUM.

HALLEL ha-lāl', hal'əl [from the Hebrew root *hll*–'praise']. In the fifth book of the Psalms (107–150) there are several groups of Hallelujah Psalms: 104–106; 111–118; 135; 146–150. In the worship of the synagogue Pss. 135–136 and 146–150 were used in the daily morning service. Pss. 113–118 were called the "Egyptian Hallel" and were sung at the feasts of the Passover, Pentecost, Tabernacles, and Dedication. At the Passover, Pss. 113 and 114 (according to the school of Shammai only Ps. 113) were sung before the feast, and Pss. 115–118 after drinking the last cup. The song used by Our Lord and the disciples on the night of the betrayal (Mt. 26:30), just before the departure for the Mt. of Olives, probably included Pss. 115–118. *See* HALLELUJAH.

J. R. SAMPEY

HALLELUJAH hal'ə-lōō'yə [Heb. *hal'lû-yāh*–'praise ye the Lord'; Gk. *allēlouiá*]; AV, NEB, also ALLELUIA (Rev. 19:1, 3f., 6). The philology of this expression presents certain problems. Intensive and reflexive forms of the verb *hāla'* occur in the OT (cf. 2 S. 14:25; 2 Ch. 23:12; 1 K. 20:11; Ps. 97:7; etc.), and while the expression has the particle "yah" (evidently a shortened form of the tetragrammaton *YHWH*) attached by means of a hyphen, it never occurred as a compound form in the MT, unlike the LXX and some other versions. Opposed to this interpretation is the Jewish tradition that "hallelujah" was a very ancient acclamation containing no reference to the divine name at all. It is unknown whether the expression originated in secular or cultic circles.

In the Psalter it occurs twenty-four times as one of several calls to praise. In some Psalms "hallelujah" is an integral part of the song (Ps. 135:3), but in others it simply serves as a liturgical interjection found either at the beginning (Ps. 111) or at the close (Ps. 104) of the Psalms, or both (Ps. 146). The Hallelujah Psalms are found in several groups: 104–106; 111–113; 115–117; 135; 146–150. In the first group "hallelujah" is found at the close of the Psalm as a liturgical interjection (106:1 is an integral part of the Psalm). In the second group "hallelujah" is found at the beginning (113:9 is an integral part of the Psalm depending on the adjective "joyful"). In the last two groups "hallelujah" is found both at the beginning and at the close of the Psalm. In Pss. 115–117 "hallelujah" seems to be an integral part of the Psalm. These groups were probably taken from an older collection of Psalms like the group Pss. 120–134. In the NT "hallelujah" is found as part of the song of the heavenly host (Rev. 19:1-6). The word is preserved as a liturgical interjection by the Christian Church.

A. L. BRESLICH R. K. H.

HALLOHESH ha-lō'hesh [Heb. *hallôḥēš*–'the whisperer'] (Neh. 3:12; 10:24 [MT 25]); AV also HALOHESH. A postexilic chief whose son Shallum assisted in repairing the walls of Jerusalem. He was also one of the leaders who signed the national covenant.

HALLOW; HALLOWED [Heb. *qāḏēš, qōḏeš, miqdāš*]; AV also SANCTIFIED (Gen. 2:3); NEB also HOLY, "make holy," "declare holy," "keep holy," etc.; [Gk. *hagiázō*] (Mt. 6:9 par. Lk. 11:2). The usual meaning of the Hebrew and Greek terms is "holy" and "holiness." The translation "hallow," "hallowed" appears twelve times in the RSV as compared with thirty-seven times in the AV. The RSV, NEB, and other contemporary translations often employ "holy," "sacred," "consecrate," and "sanctify" for "hallow" and "hallowed."

1. In the OT.—Basic to the Hebrew concept of holiness is the idea of separation. God alone is "the Holy One" (Isa. 1:4; 47:4; Ezk. 39:7; cf. 1 S. 2:2; Ps. 99:9; Isa. 6:3). God's holiness is unique to His being, except when He imparts it to another person or thing. In this sense holiness is a relational concept, for it issues from, and is related to, the most elemental quality of God. It denotes on the one hand the awesomeness and unapproachability of God, the inscrutable mystery and otherness of God, and even His fearfulness when offended. On the other hand it signifies the kindly God who has chosen Israel in love and grace (Dt. 7:6-9) and who has mercy upon His people.

Leviticus 22:32 states that Yahweh's "holy name" shall not be "profaned." The Hebrew verbal root *ḥll*, "profane, pollute," is the most emphatic antonym to holiness. Unusual significance is placed upon the holiness of the name of God, because His name is an expression of His personal essence (cf. Ex. 3:5; Josh. 5:15). Yahweh "will be hallowed among the people" (Lev. 22:32). The people's hallowing of Yahweh grew out of a recognition of His holiness (Lev. 11:44; 19:2; 20:26; 21:8; Ps. 99:3, 5, 9; Isa. 6:3; 40:25). It is only God who can make mankind holy (Lev. 22:32) and who is able to restore Israel's holiness

(Ezk. 20:21; 37:28). God's holiness becomes the measure and example of human holiness. Lev. 11:44 emphasizes that the people of Israel were to "consecrate" themselves, and "be holy, for I am holy." Human holiness derives from, and is made possible through, God's holiness.

Cultic holiness came to expression in a variety of ways. The temple is to be "hallowed" (2 Ch. 36:14; cf. 1 K. 6:16; Ps. 5:7 [MT 8]), as well as the altar (Lev. 16:19) and the gifts (Ex. 28:38; Nu. 18:29; cf. Ex. 29:33; Lev. 2:3). Cultic time is to be hallowed in the year of Jubilee (Lev. 25:10).

God "hallowed" the seventh day (Gen 2:3; NEB "made it holy"; cf. Ex. 20:11; Ezk. 20:20). This comes as the climax of the creation account that opens the Bible. Just as the creation account is concerned with mankind, so the whole process of creation has its final goal in the institution of the seventh-day sabbath for all mankind. That the seventh day is the gift of God for mankind is seen in the fact that God made this day holy when He Himself "hallowed" (sanctified) it. In making the seventh day holy He separated it from all other days of creative activity through His rest and blessing. The holiness of the seventh day determines all ordered and fixed time, the origin of which is founded in creation. The regular workdays of the week find their goal in the seventh day as God's own property. The sabbath commandment enjoins mankind to "hallow" the sabbath (Ex. 20:11; Ezk. 20:20; Jer. 17:24, 27; cf. Neh. 13:22) by "keeping" it. Mankind's recognition of the holiness and separation of the sabbath, and his keeping it holy from the remaining days, is rooted in, and springs from, his acknowledgment of God as the Maker of heaven and earth who Himself made the seventh day holy, rested on it, and imbued it with blessing. *See* SABBATH.

II. In the NT.–The term *hagiázō,* infrequent in extrabiblical Greek, is employed a number of times in the NT but translated with the meaning "hallow" only in the Lord's Prayer: "Hallowed be thy name" (Mt. 6:9 par. Lk. 11:2). The logical subject of "hallowing" or treating as holy is God alone, not mankind. To the Semitic mind the name expressed and represented the person. Therefore, His name is the essence of His person, which is holy in itself and is revealed in its holiness (Ezk. 20:41; 38:16). The first petition of the Lord's Prayer echoes the third commandment (Ex. 20:7; Dt. 5:11) in a positive form. That is to say, the hallowing of God's name is achieved not merely by repeating a petition but also by human actions. To hallow the name of God requires that mankind speaks of the Supreme Being with words of reverence and that one manifests His name in every act of life. This hallowing of the name of God in the world can come about only as His name, His person, is hallowed first in the person that utters this petition. Historically the hallowing takes place first in the believer and then through the believer. But finally it takes place eschatologically in the Day of Judgment, because the petition, as the whole prayer, is oriented toward the eschaton.

G. F. HASEL

HALT [Heb. *'āmaḏ*–'stand'] AV TARRY (2 S. 15:17), STAND (2 K. 5:9; Nah. 2:8), STAND STILL (Neh. 12:39), REMAIN (Isa. 10:32); NEB also STAND (2 K. 5:9), STOP (Nah. 2:8), "pitch camp" (Isa. 10:32); [*bāṣa'*–'cut off'] (Joel 2:8); AV "wounded." In the RSV (and NEB) "halt" has the modern sense of "cease" or "stop." The AV uses "halt" in the obsolescent sense of "limp" for Heb. *ṣālaʿ* (Gen. 32:31; Mic. 4:6f.; Zeph. 3:19) and *pāsaḥ* (1 K. 18:21), "fall" for Heb. *ṣelaʿ* (Ps. 38:17 [MT 18]; Jer. 20:10), and "lame" for Gk. *chōlós* (Mt. 18:8 par.; Jn. 5:3).

HAM [Heb. *ḥām*]. Son of Noah, brother of Shem and Japheth, and thus grandson of Lamech (Gen. 5:28-32). Ham is said to be the youngest of Noah's sons (Gen. 9:24), though he is always mentioned second among the three (Gen. 5:32; 6:10; 7:13; 9:18; 10:1; 1 Ch. 1:4). One explanation for the apparent inconsistency of mentioning the youngest son before his elder brother (Japheth) is that "his youngest son" (Gen. 9:24) may be a reference to Canaan, Noah's grandson, rather than to Ham. Support for this is seen in that the curse of Noah fell on Canaan rather than upon Ham, and that in Hebrew "son" can also mean "grandson." The deed, however, is attributed to Ham rather than to Canaan. It could be that Noah's curse was prophetic; certainly the punishment of a son would punish equally his father. For the children to suffer for the sins of their parents is not unusual in the Bible, especially before the Exile (cf. Ezk. 18:1-24).

The meaning of the name "Ham" is not clear. It may be connected with the West Semitic deity Ḥammu (cf. J. Lewy, *HUCA,* 18 [1943/44], 473-76), or it may be akin to the Egyptian word *Kem,* which means "land of Egypt." Ham's descendants were Cush (Ethiopia), Egypt (AV, NEB, "Mizraim"), Put (Libya; AV "Phut"), and Canaan (Gen. 10:6). His territory was Egypt, and presumably the rest of Africa as well. Egypt was later called the "land of Ham" (Ps. 78:51; 105:23, 27; 106:22). The portion assigned to Canaan, Palestine, was for centuries under Egyptian control.

Noah's curse rested only upon Canaan, whose descendants included the residents of Palestine before the Israelite invasion; some of these became "hewers of wood and drawers of water" for the conquerors in apparent fulfillment of Noah's prophecy (Gen. 9:25; cf. Josh. 9:21-27).

The reference to "Ham" in 1 Ch. 4:40 is obscure; it is not clear whether the reference is to a people or to a place. In language similar to that of Jgs. 18:7-27, it is stated that some descendants of Simeon found attractive pasture-land near Gedor, "for the former inhabitants there belonged to Ham." Unless the text is altered, as some have suggested, it is fair to assume that these peace-loving inhabitants were descendants of Ham who were expelled by the Simeonites. In any case, the author(s) of Genesis shows only a passing interest in the posterity of Ham and concentrates instead upon the descendants of Shem, the Semitic race which dominated the Middle East until the rise of Cyrus the Persian. Recent studies of African history reveal the existence in central Africa of a high level of civilization, probably nurtured by the posterity of Ham.

G. A. TURNER

HAM [Heb. *hām*] (Gen. 14:5). A city about 16 km. (10 mi.) E of Beth-shean on the King's Highway between Ashteroth-karnaim and Shaveh-kiriathaim. Chedorlaomer and his allies subdued the Zuzim there, and Thutmose III included a "Huma" in his list of conquered cities (*ANET,* p. 242), although M. Avi-Yonah (*Encyclopedia Judaica* [1971], VII, *s.v.*) doubted the identification of Ham with Huma.

Two problems are connected with Ham, one textual and the other archeological. The LXX, followed by the Vulg. and Pesh., reads "with them" (= Heb. *bāhem*) for MT *bᵉhām,* "in Ham," and 1QapGen 21:29 reads *bʿmn,*

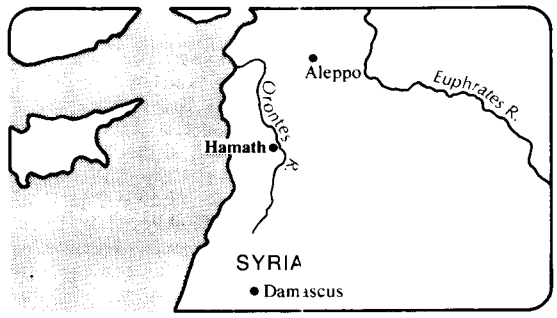
"in Ammon," probably under the influence of Dt. 2:20 (see J. Fitzmyer, *Genesis Apocryphon of Qumran Cave I* [rev. ed. 1971], pp. 164f.), but neither of these changes seems warranted. Excavations at Tell Hâm near the modern village of Hâm have uncovered three megalithic walls and some pottery but no remains from the patriarchal (Middle Bronze) age. G. A. L.

HAMAN hā'mən [Heb. *hāmān;* Gk. *Haman*]; AV also AMAN (Ad. Est. 10:7; 12:6; 13:3, 6, 12; 14:17; 16:10, 17). A Persian noble and vizier of the empire under Xerxes. He was the enemy of Mordecai, the cousin of Esther. Mordecai, being a Jew, was unable to prostrate himself before the great official and to render to him the adoration that was due to him in accordance with Persian custom. Haman's wrath was so inflamed that one man's life seemed too small a sacrifice, and he resolved that Mordecai's nation should perish with him. This was the cause of Haman's downfall and death. When ESTHER, wife of king Ahasuerus, revealed the plot, Haman was hanged on the very gallows that he had prepared for Mordecai. When the Jews were allowed to punish their enemies by way of retaliation, they also killed Haman's ten sons (Est. 9:6-10).

Haman's home was in an area adjacent to Media, described as "Agazi" in the Annals of Sargon. Thus the reference to Haman as an AGAGITE (Est. 3:1, 10; 8:3, 5; 9:24) is to his place of origin, not to any alleged relationship with Agag the Amalekite (cf. 1 S. 15:8f.). R. K. H.

HAMATH hā'math [Heb. *ḥ^{a}māṯ*–'citadel']; AV also HEMATH (1 Ch. 13:5; Am. 6:14), AMATHIS (1 Macc. 12:25). An important royal city of the Hittites, perched on a gigantic mound beside the Orontes 120 km. (75 mi.) S of Aleppo. The advantageous defensive position of the city makes its name especially apt. The modern town of some 65,000 is built in four quarters around the ancient citadel and is prosperous because it is located in a fruitful plain and serves as an important rail center.

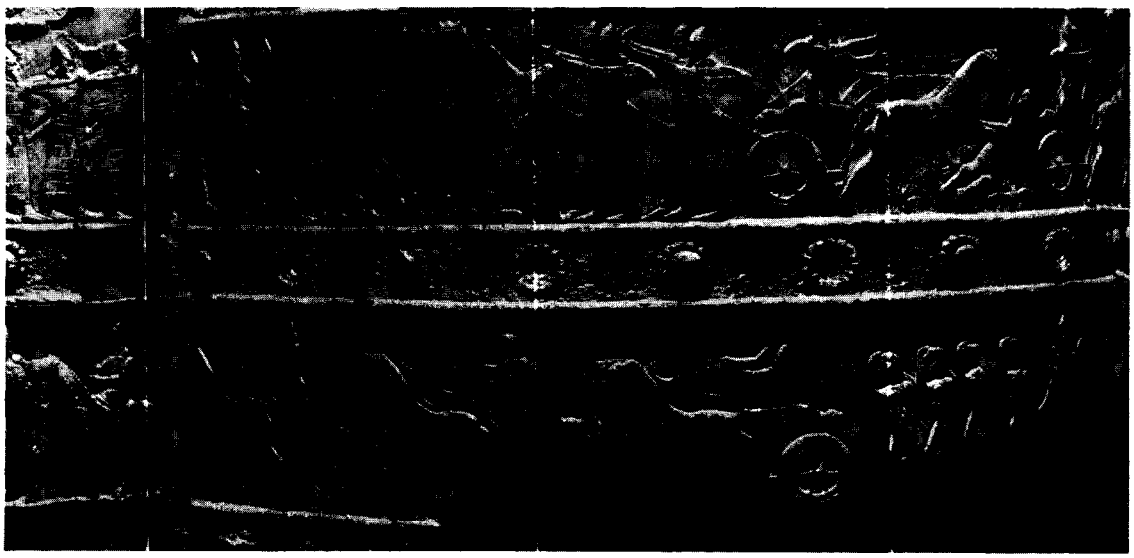
A Danish archeological expedition under the leadership of H. Ingholt excavated at Hamath between 1932 and 1938, uncovering twelve occupational layers dating back to Neolithic times. Important Hittite hieroglyphic inscriptions came to light during the excavations.



After the Hittite empire ended *ca.* 1200 B.C., numerous Hittite city-states sprang up in Syria. Hamath was one of the most powerful of these states and dominated the main trade route from Asia Minor to the south. Some idea of its power and wealth may be seen in the claim of Shalmaneser III of Assyria to have captured eighty-nine towns belonging to it. Although Assyrian rulers knew how to make a good story out of a military victory, this claim still indicates that Hamath was more than an isolated fort.

The Hamathites are mentioned in Gen. 10:18 among the sons of Canaan; but in historic times the population, as the personal names testify, seems to have been for the most part Semitic. The ideal boundary of Israel reached the territory, but not the city, of Hamath (Nu. 34:8; Josh. 13:5; Ezk. 47:13-21). David entered into friendly relations with Toi, its king (2 S. 8:9-12), and Solomon erected store-cities in the land of Hamath after an apparent show of force in the area (2 Ch. 8:4). Cuneiform inscriptions from the time of Ahab mention Hamath, and its king Irḫuleni was a party to the alliance of Syrian rulers that included Benhadad of Damascus and Ahab of Israel against Shalmaneser III of Assyria, who sought to extend his empire westward. At the Battle of Qarqar in 853 B.C. Irḫuleni contributed seven hundred chariots and ten thousand men. Although Shalmaneser claimed an overwhelming victory, he apparently greatly overstated his successes because Irḫuleni was active on more than one occasion in subsequent years defending his kingdom against Shal-

Bronze relief from the palace gate of Shalmaneser III (858-824 B.C.) depicting the assault on Hamath (upper register) and female captives being led away from the city (bottom) (Trustees of the British Museum)



maneser. But ultimately Hamath capitulated to Shalmaneser.

As the Assyrian empire declined during the 8th cent., Jeroboam II of Israel extended his borders northward at the expense of Hamath (*ca.* 780 B.C.; 2 K. 14:28; Am. 6:2). When Assyria revived under Tiglath-pileser III, Enilu of Hamath was forced to pay tribute (730 B.C.). But Tiglath-pileser was not satisfied; he divided its lands among his generals and transported 1223 of its inhabitants to Sura on the Tigris as hostages. Hamath rose again. In 720 Sargon II "rooted out the land of Hamath and dyed the skin of Ilu-bi'di [Yau-bi'di] its king, like wool," and colonized the country with 4300 Assyrians. Still not cowed, Hamath required the attention of Sennacherib, who claimed to have taken the kingdom *ca.* 700 B.C. (2 K. 18:34; 19:13; 1 Ch. 36:19; 37:13). In Isa. 11:11, Israelites are said to be in captivity at Hamath, and Hamathites were among the colonists settled in Samaria (2 K. 17:24) by Esarhaddon of Assyria in 675 B.C. Subsequently the kingdom fell under the power of Babylonia (Jer. 39:5).

The Hamathite country is mentioned in 1 Macc. 12:25 in connection with the movements of Demetrius and Jonathan. The Seleucid king Antiochus IV Epiphanes (175-164 B.C.) renamed it Epiphaneia after himself, and by this name it was known to the Greeks and Romans. Locally, however, the ancient name never disappeared, and since the Moslem conquest it has been known as Ḥama. Saladin's family ruled it for a century and a half, but after the death of the famous Arab historian Abulfeda, who was its prince from 1310 to 1331, it sank into decay.

In connection with the northern boundary of Israel, "the entrance of Hamath" is frequently mentioned (Nu. 13:21; 1 K. 8:65; etc.). It has been sought in the Orontes Valley, between Antioch and Seleucia, and also at Wâdī Nahr el-Barid, leading down from Homs to the Mediterranean N of Tripoli. But from the point of view of Palestine, it must mean some part of the great valley of Coelesyria (Beqa'). Probably instead of translating, we should read here a place name, "Lebo-Hamath." The presence of the ancient site of Lebo (modern Lebweh) 22 km. (14 mi.) NNE of Baalbek, at the headwaters of the Orontes and commanding the strategic point where the plain broadens out to the north and to the south, confirms this conjecture.

See Vol. I, Map X.

See H. Ingholt, *Rapport préliminaire sur sept campagnes de fouilles à Hama en Syrie, 1932-38* (1940).

H. F. VOS

HAMATH-ZOBAH hā'math-zō'bə [Heb. *ḥ"māṯ ṣôḇâ*] (2 Ch. 8:3). Apart from the well-known Hamath on the Orontes, no site answering to this name is known. Zobah (Assyr. *Ṣubutu*) was the most powerful of the Aramean kingdoms of Syria in the late 11th cent. B.C., with its center of power in the region of modern Homs and apparently extending S to include Damascus and N to encompass Hamath (*WHAB*). Many would therefore simply identify Hamath-zobah with Hamath, and would see the double name as an effort on the part of the author to distinguish the site from Zobah in the Hauran (2 S. 23:36). The LXX B suggests a reading Beth-zobah ("house of Zobah") — omitting all reference to Hamath. If this reading is correct, 2 Ch. 8:3 may simply be saying that Solomon fought against the house or kingdom of Zobah and took territory from the kingdom, after which he built several fortified centers in the occupied land. In any case the reference is uncertain. H. F. VOS

HAMMATH ham'əth [Heb. *ḥammaṯ*–'hot spring'].

1. [Gk. B *Mesēma*]; AV HEMATH. The father of the house of Recab (1 Ch. 2:55). The NEB reads: "Kenites who were connected by marriage with the ancestor of the Rechabites."

2. A fortified city included in the territory assigned to Naphtali after the conquest under Joshua (Josh. 19:35). The city is represented by modern Ḥammâm Ṭabariyeh located about 3 km. (2 mi.) S of Tiberias on the western shore of the Sea of Galilee. Very probably this was the Naphtalite city assigned to the Levites (Gershonites) referred to as Hammoth-dor (Josh. 21:32) and Hammon (1 Ch. 6:76 [MT 61]).

At least since Josephus's day (the city is called Emmaus or Ammathus in *Ant.* xviii.2.3 [36]; *BJ* iv.1.3 [11]) the hot springs (about 60°C [140°F]) have been famous for treatment of the sick. Ancient fortifications and aqueduct remains are still visible on the slopes above the public baths.

See *EAEHL*, IV, *s.v.* "Tiberias, Hammath" (M. Dothan).

R. J. HUGHES, III

HAMMEDATHA ham-ə-dā'thə [Heb. *hamm"ḏāṯā'*] (Est. 3:1); AV also AMADATHUS (Ad. Est. 12:6). The father of Haman, generally called "the Agagite." The name may be of Persian origin, meaning "given by the moon."

HAMMELECH ham'ə-lek (AV Jer. 36:26; 38:6). The AV wrongly translates Heb. *hammeleḵ* ("the king") as a proper name.

HAMMER [Heb. *maqqeḇeṯ*] (Jgs. 4:21; 1 K. 6:7; Isa. 44:12; Jer. 10:4); [*paṭṭîš*] (Isa. 41:7; Jer. 23:29; 50:23); NEB also "gilder" (Isa. 41:7); [*kêlāp;* cf. Akk. *kalapāti*] (Ps. 74:6); NEB PICK; [*mappēṣ*] (Jer. 51:20); AV, NEB, BATTLE AXE. Pieces of shaped stone used for pounding or fashioning were among the earliest of human implements. Attempts at fitting handles seem to have been begun in the Early Bronze Age, and hammer heads with a hole bored for that purpose have been recovered from many sites. The *maqqeḇeṯ* was used for driving tent pegs into the ground and was the favored tool of the blacksmith and stonemason. The *paṭṭîš* was also used by the latter, whereas the *mappēṣ* of Jer. 51:20 was more correctly a weapon of war, as the AV and the NEB indicate. (*See* WEAPONS OF WAR.) The term *kêlāp* is a loanword which is probably better translated "axes." R. K. H.

HAMMOLECHETH ha-mol' ə-keth [Heb. *hammōleḵeṯ*–'the queen'] (1 Ch. 7:18); AV, NEB, HAMMOLEKETH. The daughter of Machir and sister of Gilead.

HAMMON ham'ən [Heb. *ḥammôn*–'hot spring'?].

1. A city included in the territory assigned to Asher after the conquest under Joshua (Josh. 19:28). Probably identified with modern Umm el-'Awāmîd, it is located on the Mediterranean coast about 16 km. (10 mi.) S of Tyre.

2. A city of Naphtali assigned to the Levites (Gershonites) (1 Ch. 6:76 [MT 61]), and probably identical with HAMMATH (Josh. 19:35) and HAMMOTH-DOR (Josh. 21:32). R. J. HUGHES, III

HAMMOTH-DOR ham-oth-dôr' [Heb. *ḥammōṯ dō'r*–'hot springs of Dor']. A city in the territory of the tribe of Naphtali that together with the surrounding pastureland was given to the Gershonites of the tribe of Levi (Josh. 21:32). It is probably to be identified with the Hammath found in a list of the fortified cities of Naphtali (19:35) and with the Hammon in 1 Ch. 6:76 [MT 61], but not the Hammon in Josh. 19:28. The city was situated on the western shore of the Sea of Galilee just S of Tiberias at the location of modern el-Ḥammâm. The hot springs for

which the city was named are still frequented by people seeking relief from various diseases. Josephus referred to the locality and its warm baths as the village of Emmaus (Gk. *Ammaous, Ant.* xviii.2.3 [36]; *BJ* iv.1.3 [11]).

D. H. MADVIG

HAMMUEL ham'û-əl [*ḥammû'ēl*]; AV, NEB, HAMUEL. A son of Mishma, a Simeonite, of the family of Shaul (1 Ch. 4:26).

HAMMURABI ham-ə-rä'bē. Sixth king of the 1st Babylonian Dynasty, Hammurabi is considered an outstanding statesman, military planner, and lawgiver. The main source of information concerning him comes from archeological finds that date to the 2nd quarter of the 2nd millennium B.C. These include about 150 tablets with Hammurabi's signature, the well-known law code found by the French expedition to Susa in the winter campaign of 1901/02, and a multitude of tablets from contemporary sites such as Mari and Alalakh.

I. Date
II. Name
III. Events of Reign
IV. Personal Traits
V. Code of Hammurabi
  A. Discovery and Description
  B. Editions of the Code
  C. Comparison with the OT

I. Date.–There has been much discussion concerning the date of Hammurabi. The earliest date assigned was 2123-2081 B.C. (S. A. Cook, *CAH,* I [1924], 154; originally supported by W. F. Albright, *Revue d'Assyriologie et d'archéologie orientale,* 18 [1921]). R. W. Rogers (*History of Babylonia and Assyria* [1915], pp. 492f.), utilizing a British Museum tablet of Nabonidus that claimed that Hammurabi preceded Burnaburiaš by seven hundred years, dated Hammurabi *ca.* 2075 B.C. From another British Museum tablet, which records the observations of the planet Venus during the twenty-one years of the reign of Ammi-ṣaduqa, the tenth king of the 1st Babylonian Dynasty, J. K. Fotheringham, in collaboration with S. H. Langdon and Carl Schoch, placed Hammurabi *ca.* 2067-2025 B.C. F. Thureau-Dangin reduced the date to 2003-1961. Subsequent discoveries at Mari revealed that the last years of Šamši-Adad I of Assyria were contemporary with the early years of Hammurabi, so that the above dates were much too early. Albright revised his date to 1870 B.C., and two years later, on the basis of new evidence from Mari, further reduced it to *ca.* 1800-1760.

One of the difficulties with using the material on the movements of the planet Venus is that it permits several dates for the end of the 1st Babylonian Dynasty. The most probable of these are 1651, 1595, 1587, and 1531. J. W. S. Sewell reduced the original calculation by 275 years, a full cycle, and put Hammurabi at 1792-1750 B.C. S. Smith, using a different approach, arrived at the same conclusion. This date has the support of M. B. Rowton (*JNES,* 17 [1958], 111), and is the consensus of most scholars. Albright reduced his own date to 1728-1686, and this date is supported by R. de Vaux and also by R. T. O'Callaghan (*Aram Naharaim* [1948]). P. van der Meer (*Chronology of Ancient Western Asia and Egypt* [1963]) and M. A. Beck (*Atlas of Mesopotamia* [1962]) have reduced the date by four years to 1724-1682. C. H. Gordon (*World of the OT* [1958]) and E. F. Weidner (*AfO,* 15 [1939/40], 1945-1951) agree on 1704-1662. For further information on dating, cf. R. K. Harrison, *Intro. to the OT* (1969), pp. 159-166.

II. Name.–The alphabetic writing of the name from Ugarit (*'mrpi*) would argue for a "p" instead of a "b," and "h" does not correctly represent the first consonant. Perhaps *'Ammurapi* would be the best spelling.

Hammurabi was of West Semitic stock, an Amorite. His ascription of his victories to Dagan (Dagon) "his creator" and his title "King of the Amorites" indicate the pride he felt in his ethnic background. Later Babylonian scribes treated his name as foreign and translated it *kimtarapashtum,* "my family is great," taking *ḥammu* as the same as *ammi,* "people" and equivalent to *kimtu,* "family." Several variants of the name are found: Ammi-rabi, Ammu-rapi, Ḥammum-rabi and Hamu(m)-rabi. *Ammu* or *Ḥammu* is most likely a god, and the name should therefore be translated "Ammu is Great."

The first two decades of the 20th cent. saw an almost universal identification of the biblical AMRAPHEL with Hammurabi. From the same passage in Gen. 14, Arioch was thought to be Warad-Sin (Eri-Aku) of Larsa, Chedorlaomer to be Kudur-Lagamar of Elam, and Tidal to be one of the Hattic princes of Anatolia. As early as 1919, however, L. W. King (*History of Babylon,* p. 159) indicated that there were "too many difficulties in the way of accepting the suggested identification of Arioch with Warad-Sin." And 1QapGen 21:23 identifies this land as *Kptwk,* which is probably Cappadocia instead of Larsa. Tidal represents the cuneiform *Tudḫalias,* the name of at least five Hittite rulers. To identify Amraphel with Hammurabi is very precarious. The final *l* would be an error for *y,* and the initial *'aleph* a mistake for *'ayin,* which is highly suspect. The suggestions that Amraphel is a compressed form of Ammurapi-ilu, "Hammurabi is my god," or that the final *l* is the determinative *ilu,* "god," or that the *l* should be placed on the following word (thus *limlōḵ*) are unconvincing. It is best not to try to identify Amraphel with Hammurabi.

III. Events of Reign.–The predecessors of Hammurabi were occupied mainly with peaceful pursuits consisting of religious and defensive building and the digging of canals. The territory over which they exercised control was not extensive, probably within 80 km. (50 mi.) of the capital city, Babylon. Dogmatism must be avoided, however, since the materials for writing a history are scanty. Even for much of the period of Hammurabi himself evidence is scarce. Most of the letters written by him seem to be from the end of his reign, and little is known about his early years. His father Sinmuballit had ruled about twenty years, and since Hammurabi ruled for forty-three, it is presumed that he was a young man when he ascended to the throne. In his early years he seemed to have been content to follow his predecessors in strengthening his realm and seeking to gain for it the leadership of the south.

Social reform may have been initiated in his very first

year. The date-formula (*ANET,* pp. 269-271) for his second year indicates that he "established justice in the country." This act was not a novelty with Hammurabi, for it had a long-standing history going back to the kingdoms of Isin and Larsa, but with Hammurabi it became a regular practice. Each king, at his accession, issued a decree of "righteousness." The edict of Ammiṣaduqa has been preserved, and from this document it is clear that the main purpose of this action was to ease the burden of indebtedness — both to the state and to individuals — accumulated during the preceding reign, and to readjust the law to fit the necessities of an ever changing world.

In his seventh year Hammurabi conquered Isin and Uruk (Erech), two of the principal cities of Babylonia. The land of Yamutbal (Emutbal) fell to him in his eighth year. The ninth year was marked by one of his greatest nonmilitary achievements, the digging of the canal called *Hammurabi-hegal.* Years ten and eleven indicate military campaigns in which he crushed the army (or city) and inhabitants of Malgium (or Malgu, a kingdom situated on the banks of the river SE of Eshnunna), and conquered Rapiqum and Shalibi. The attack on Malgium may have been as a member of a coalition, with Šamši-Adad as the superior.

The eleventh year was the end of the first period of Hammurabi's military activity. Twenty years passed before he again mentioned a military campaign. During this period he bided his time and engaged in various building projects. In his twenty-fourth year he redug the *tilida*-canal for the benefit of the temple of Enlil, and he also dredged the bed of the Euphrates.

Hammurabi clearly saw his own limitations. He was content to wait for his opportunity and to play off one opponent against another. Much of the information for this activity is derived from the Mari tablets, which reveal the dealings of Hammurabi with Mari itself and with Rīm-Sin of Larsa in the early and middle periods of his reign. These letters indicate that the political and military situation in Babylonia and the surrounding countries was one of general weakness. This is perhaps expressed best in a letter written to Zimri-Lim by his emissary Itur-Asdu, who reported what he had conveyed to the local sheikhs along the Euphrates: "There is no king who is mighty by himself. Ten or fifteen kings follow Hammurabi, the man of Babylon, a like number Rim-Sin of Larsa, a like number Ibalpiel of Eshnunna, a like number Amutpiel of Qatana, and twenty follow Yarimlim of Yamkhad." (Cf. Gadd, *CAH,* II/1 [3rd ed. 1973], 181f.)

When Šamši-Adad died, Zimri-Lim came back from exile in Aleppo and regained his father's throne at Mari. Ibal-pī'el of Eshnunna reasserted his independence, conquered Rapiqum, and defeated the army of Assyria. Now instead of one hostile power on his north Hammurabi had two states who were bitter rivals. He concluded an alliance with Zimri-Lim of Mari and with Rīm-Sin of Larsa. Evidence that Hammurabi was making preparations for expansion can be seen in the building of fortresses between his nineteenth and twenty-fifth years, and the prominent place this activity assumed in his date-formulas. But for a decade the whole of Mesopotamia experienced an uneasy peace. The land was split into two camps: Assyria, Malgium, Gutium, Elam, and Eshnunna were on one side; Babylon, Mari, and Larsa were on the other.

The thirtieth year of Hammurabi was decisive: it marked the beginning of his second period of military activity, which lasted almost a decade. He marched against the Assyrian coalition and defeated it soundly. In his date-formula he claimed to have "re-established the foundation of the empire of Sumer and Accad." The next year he promptly turned on his erstwhile confederate Rīm-Sin and destroyed the city of Larsa. In this campaign he seemed to have had the help of Mari and Eshnunna.

Hammurabi was now master of all Babylonia. In the north, however, the Assyrian coalition attempted to rise again; but it was defeated, and the lands along the Tigris as far as Assyria came under the control of Babylonia. Hammurabi was strong enough to turn again on his allies. Zimri-Lim was the target, and the city of Mari and the land of Malgium fell in his thirty-third year. That same year the famous *Hamurabi-nuhus-nisi* canal was dug. This canal provided water for Eridu, Ur, Larsa, Erech, Isin, and Nippur. No military action is recorded for the next year, but in the thirty-fifth year he destroyed Mari and Malgium because they had broken the terms of their peace treaties. Assyria and her allies were again defeated two years later. Eshnunna fell in the thirty-eighth year, when Hammurabi took advantage of a devastating flood that had hit the city and left its inhabitants helpless. Finally, Asshur and Nineveh were conquered the next year.

Hammurabi now reigned over an empire that stretched from the Persian Gulf along the Tigris, up to and including the Assyrian cities, and along the Euphrates to about the confluence of the Balîkh River. The Hittites probably prevented Hammurabi from extending his territory further west than Hit and Mari, and the Hurrians kept him from going further north and east than Nineveh. His last four years were devoted to lawgiving and matters of religion, but it is ominous that the last two of these years were named after defensive walls built on the Euphrates and at Sippar.

IV. Personal Traits.–Little is known about the personal life of Hammurabi, but this is common for ancient Near Eastern kings. From his code it can be inferred that he had a strong sense of justice, and his personal letters seem to bear this out. In a letter to Sinidinnam, Hammurabi mentioned a complaint which had come from an official by the name of Lalum against a certain judge named Ali-elatti. On the basis of evidence at court, Hammurabi decreed an investigation be made in the case, and if Lalum had been wronged, the matter was to be rectified and Ali-elatti was to be punished.

Such letters indicate that Hammurabi was a man who kept in close contact with events in his kingdom and took a personal interest in those who came to him with their complaints. A wide range of subjects received his attention and are mentioned in the letters: bribery, the claim of a grain merchant against a governor, regulation of food supplies, labor on public works, etc.

The letters from Mari describe the king through the eyes of the agents of Zimri-Lim. They portray him as a "busy and capable administrator immersed in affairs of war, diplomacy, and even society. He is ever prominent and in personal control — no ministers seem to be mentioned" (Gadd, *CAH,* II/1 [3rd ed. 1975], 189).

Hammurabi portrayed himself in the epilogue to his code as a shepherd and father to the black-headed people whom Enlil had given him and Marduk had committed to him. He claimed to have carried the people in his bosom, governing them in peace and sheltering them in wisdom. He was the protector of the weak and defender of the oppressed. He granted justice to orphans and widows. He was an efficient and perfect king, a king of justice whose words are choice and whose deeds have no equal.

See Vol. I, Map III.

V. Code of Hammurabi.–A. Discovery and Description.

During the winter campaign of 1901/02, the French expedition under M. J. de Morgan discovered at the acropolis of Susa a black diorite stone 2.25 m. (7.4 ft.) high and tapering from 1.9 m. (6.2 ft.) at its base to 1.65 m. (5.4 ft.) at the top. The stone was found in three pieces, but was easily assembled and now is in the Louvre in Paris. Fragments from other copies of its text were also found, indicating that stelae were erected in several places in the kingdom. Examination of the stele revealed that it was a codification by Hammurabi of the extant laws of his period. The stele had originally contained about 282 laws, arranged in forty-nine rows or registers of approximately four thousand lines and eight thousand words. Five registers on the front were erased by an Elamite king, presumably for the purpose of preparing the stone for a new inscription.

A bas-relief on the upper portion of the stele, measuring 0.65 m. (2.1 ft.) high and 0.6 m. (2 ft.) across, shows Hammurabi standing before the sun-god Šamaš with his right arm raised in a gesture of worship. The god, who is seated on a throne with his feet resting on conventionalized mountains, is presenting the king with a scepter and a ring. This scene probably represents the occasion when Hammurabi received the laws from the sun-god himself. The rest of the front of the stele is covered with a beautifully carved cuneiform writing in sixteen registers arranged horizontally, though each line in the register is read vertically. The reverse contains twenty-eight registers of text. This text is the longest Semitic inscription so far discovered, and the language, which is Akkadian, was already grammatically advanced and is now considered classical. The style of the Code was followed by later generations, and it seems to have made a greater contribution to the field of literature than to legislation. The stele was erected by the king toward the end of his long reign of forty-three years in the temple Esagila at Babylon, if the epilogue (lines 60-70) is interpreted correctly.

B. Editions of the Code. The first translation of the Code was published by V. Sheil in 1902 in the official report of the expedition, *Memoires de la délégation en Perse,* IV (1902), 11ff. Since then the text has been published many times and translations have appeared in many languages. The most comprehensive work is that of G. R. Driver and J. C. Miles, *The Babylonian Laws,* I (1952) and II (1955). Two other good English translations available are T. J. Meek's (includes prologue and epilogue) in *ANET,* pp. 163-180, and W. J. Martin's (laws only) in *DOTT,* pp. 29-37. The best source for the original text is A. Deimel, *Codex Hammurabi* (1930-1932); the cuneiform section now is in a third edition by E. Bergmann, *Codex Hammurabi: textus primogenius* (1953), and the transliteration and translation also in a third edition, *Codex Hammurabi: transcriptio et translatio latina* (1950), prepared by A. Pohl and R. Follet.

C. Comparison with the OT. The Code is a case-by-case formulation of customary law, covering civil, criminal, and administrative law, and reflects a well-developed commercial society. Subsequent discoveries of other law codes have made it clear that the Code of Hammurabi is neither the oldest nor the most original, but it is still the most detailed and most interesting. The wide variety of subjects covered, the types of crimes mentioned, and the penalties suggested tell us much about the society at that time.

The three social classes are specifically named: the *awīlu* (or *amīlu*), the *muškēnu,* and the *ardu* (or *wardum*). The last is the easiest to define: a slave, in the lowest rank of society. The *awīlu,* translated "free man," "patrician," or "seignior," is the highest in rank. *Muškēnu* seems to be

The top of the stele of Hammurabi showing the king (left) before the sun-god Šamaš, the god of justice. Below is part of Hammurabi's code. From Susa, *ca.* 1700 B.C. (Louvre)

a "commoner," a free person, but apparently subject to the corvée. Gadd suggests that the distinction between *awīlu* and *muškēnu* was one of social estimation only, not based strictly on ascertainable facts, and may have rested ultimately on wealth. The status of a person was important, for this affected the application of the law.

In the biblical legal system, a distinction is also made according to status or the ability to pay. Examples are found in the sin offering. A priest must offer a young bull (Lev. 4:3), a leader a male goat (4:23), and a member of the community a female goat (4:28) or a female lamb (4:32). Anyone not able to afford a lamb brought two doves or two young pigeons (5:7), or if that was beyond his means he brought a tenth of an ephah of fine flour (5:11). Purification of women after childbirth shows this same distinction: a year-old lamb and a pigeon or dove is required if the person is financially able (Lev. 12:6); otherwise two doves or two young pigeons are offered (12:8).

The first five paragraphs of the Code deal with standards or principles of legal process. A claim must be proved, and any accusation entailing the death penalty that is not proved means death for the accuser (§ 3). Dt. 19:16-21 states that the false accuser is to be punished with the same penalty he intended to bring on the accused.

Theft, burglary, robbery, and other such crimes are dealt with severely (§§ 6-15). Theft from private citizens requires multiple restitution, but theft from the government (temple or palace) is punishable by death (§ 6). The receiver of stolen goods is also put to death. Theft of an ox, sheep, ass, pig, or goat from the state requires a

thirtyfold restitution, and similar theft from a private citizen a tenfold restitution. If the thief is too poor to make restitution, he is put to death (§ 8). Similar laws are found in Ex. 22:1-4,9. Anyone who steals an ox or a sheep and slaughters it or sells it, must pay back fivefold for the ox and fourfold for the sheep. If the thief has no means to make restitution, he must be sold to pay for the theft. If a stolen animal is found in his possession he must pay back double. Lev. 6:3-6 discusses property which is either entrusted to a person or is stolen or found. The guilty party must return the property, pay a 20 percent fine, and offer a ram as a guilt offering.

Kidnapping carries the death penalty (§ 14), as does abetting the escape of a slave (§ 15) or keeping the slave of another (§§ 16-19). Ex. 21:16 also requires the death penalty for kidnapping, but Dt. 23:15 (MT 16) prohibits a person from returning a fugitive slave to his master if he has come to him for refuge.

Laws concerning agriculture are extensive (§§ 42-58), and laws for horticulture are also emphasized (§§ 59-66), since the economic life of the Babylonians depended largely on the cultivation of grain and date palms. Babylonian laws suggest that much of the farmland was rented out to tenants, and many laws govern this procedure. In Israel this was not the case. Each man worked his own land. Only §§ 57 and 58, which discuss the damage done to a crop by sheep, have a parallel in the biblical text. Ex. 22:5 (MT 4) demands restitution from the man who lets his livestock stray and damage the crop in another man's field. Restitution must also be made if fire gets out of control and burns a field (22:6 [MT 5]). Unlike Mesopotamia, Israel was to allow the land to lie fallow every seventh year (Ex. 23:10f.). For the benefit of the poor the entire field was not to be harvested or gleaned (Lev. 19:9f.; Dt. 24:19-22). Anyone could enter a vineyard and eat all the grapes he wanted as long as he did not carry any away. Most of the orchards in Babylonia were date orchards; in Israel the laws concentrate on vineyards.

Several laws deal with deposits and debts (§§ 112-126). Failure to transport consigned goods carries a fivefold penalty (§ 112), stealing of goods on deposit requires double restitution (§ 113), while seizure of persons for a bogus debt carries a monetary payment (§ 114). According to Ex. 22:7-9 (MT 6-8), if valuables have been entrusted to a man by another and they are stolen, the thief is to pay back double. If the thief is not found, the owner of the house where the valuables were kept must be examined to determine his guilt or innocence.

Members of a family bound over for debt have to be released after three years (§ 117). The Babylonian law allows a man to subject his wife or children to slavery for three years. The Hebrew law (Ex. 21:2-11; Dt. 15:12-18) allows the man to enter slavery himself and serve six years. He may also sell his daughter, but a distinction is made between the treatment of a man and a woman. The woman is likely to become a wife, so she is not to be released at the end of six years. If her master is not pleased with her, she may be redeemed at any time.

The laws concerning the rights of a family are very extensive (§§ 127-195). Marriage requires a contract (§ 128) and the fidelity of the wife is presupposed, for the woman caught in adultery is to be drowned with the adulterer (§ 129) unless the husband wishes to save his wife, and then the king may reprieve the adulterer. A parallel is found in Lev. 20:10 and Dt. 22:22, except that the biblical law has no provision for clemency. Lev. 19:20-22 and Dt. 22:23-26 show some similarity to §§ 130 and 156, which speak of the rape of a married woman or one betrothed to the rapist's son. In the former the rapist is to die, and in the latter he pays a monetary penalty. The biblical text demands the death of both the man and woman in the former; in the latter both die only if the rape of the virgin takes place in the city, and only the man dies if the rape takes place in the country. In the case of a woman who is not pledged to be married (Dt. 22:28f.) a monetary payment must be made and the man must marry the woman. The law about a wife suspected of infidelity (§§ 131f.) is paralleled by Nu. 5:11-28. Both have trials by ordeal. The Code requires her to plunge into the sacred river, and the Mosaic law requires her to drink holy water that has been mixed with dust from the floor of the sanctuary. If nothing happens in either case, the wife is innocent. If she is guilty she drowns (§ 132) or swells up (Nu. 5:21f.).

Divorce is spelled out in detail in the Code (§§ 136-143), but only one law is found in the Bible (Dt. 24:1-4), and that gives the right of divorce to the man for almost any cause. The woman has no rights.

The Code gives specific penalties for incest. If a man has sexual relations with his daughter, he is expelled from the city (§ 154); with a daughter-in-law, he is bound and thrown into the water (§ 155); with a woman pledged to his son, he makes a monetary payment (§ 156); with his mother (after his father's death), both are burned (§ 157); with a wife of his father (after his father's death), he is expelled from his house (§ 158). Dt. 22:30 prohibits a man from marrying his father's wife, and Lev. 18:6-18; 20:11, 19-21 cover all other possible conditions with a penalty of being "cut off from the people."

The laws of inheritance in Babylonia are complicated and cover many situations. A son may receive a present of real estate from his father and also share equally with his brothers (§ 156). A young son who has not been given a wife may have money above his portion for a marriage settlement (§ 166). If a man has two wives, the children divide the dowries of their respective mothers and all share equally in the father's estate (§ 167). Other laws regulate disinheritance of children (§§ 168f.), the status of the children of slaves (§§ 170f.), the rights of the wife (§§ 171-74), the status of children of mixed marriages between persons of slave and nonslave classes (§§ 175f.), minor children of a widow (§ 177), and the rights of a priestess (§§ 178-182).

The biblical text (Dt. 21:15-17) is relatively simple. The firstborn son receives a "double portion." Favoritism must not be shown to the son of a favorite wife. Nu. 27:8-11 provides for daughters to inherit when there are no sons, and, if no daughters, for the nearest paternal relative. If a daughter inherits property she must marry within her tribe (Nu. 36:2-12). Children may be disinherited if the cause warrants (§§ 168f.), but the biblical text (Dt. 21:18-21) specifies death for a son who proves unworthy. Anyone who curses his father or mother is put to death (Ex. 21:17). In the Code (§ 195) the son who strikes his father has his hand cut off. Priestesses have special rights in matters of inheritance and support (§§ 185-194)

Damages are spelled out in detail, and there are many applications of the *lex talionis*: eye for eye (§ 196), bone for bone (§ 197), tooth for tooth (§ 200); but monetary payments are also frequent, generally for lesser offenses or when injuring one of a lower class. The status of the person responsible for the injury and the status of the injured person are taken into consideration. If one strikes the cheek of another and both are members of the *awīlu* class, the penalty is one mina of silver (sixty shekels) (§ 203); if both are from the *muškēnu* class, it is ten shekels (§ 204); but if a slave (*ardu*) strikes a member of the *awīlu*, he has his ear cut off (§ 205). Unintentional injury is covered by a fine (§§ 207f.). If an injury causes a

miscarriage and death to a woman of high rank, the daughter of the one causing the injury is killed (§ 210), but the miscarriage and death of a lower-class woman carries only a monetary payment (§ 214). These laws are closely paralleled by Ex. 21:18-27. Wilful murder is punished by death. Accidental homicide is not punished (§ 206, he swears an oath that it was an accident; Ex. 21:13, he flees to the sanctuary). If a man injures another in a fight he pays for the physician (§ 206) or for the lost time and medical expense (Ex. 21:19). The two sources differ in reference to slaves. The biblical text deals with owners injuring or killing their own slaves (Ex. 21:20f., 26f.), while the Code deals with injury by others (§§ 199, 213f.). Both stress the principle of eye for eye and tooth for tooth (Ex. 21:23-25). The laws regulating Babylonian society are more complex because of the three distinct classes.

Several laws govern possible loss of animals from various causes, some of which are charged to the person who has hired them, while others, such as an act of God, are the responsibility of the owner. According to § 250, if an ox gores a person on the street and kills him, there is no penalty. If the ox has a habit of goring and he kills a man, the owner pays a monetary penalty (§§ 251f.). Ex. 21:28 requires the death of the ox if anyone is gored and killed. If the ox has a habit of goring and the owner has been warned, and the ox gores someone and kills him, the owner is put to death, or, if demanded, payment is made for redemption. If the ox gores a slave, a monetary payment is required (Ex. 21:32).

In the Code a surgeon is responsible for certain operations, and penalties are assessed to discourage abuses. Legally fixed fees are paid and are determined by the class of the patient (§§ 215-220). The work of the veterinary surgeon is also controlled by law (§§ 224f.). Various occupations are governed by laws, and hiring procedures are closely regulated. The last paragraphs concern slaves.

This brief examination of the Code reveals that offenses can be classified as being against the gods, against the state, or against the individual. These offenses cover nearly every situation in society, and the penalties, too, vary greatly. Thirty-two offenses call for the death penalty, and lesser punishment includes bodily mutilation such as branding, cutting off of the ear, hand, tongue, or breast, and destroying the eye. The motive behind the law seems to have been to uphold the authority of the state and to preserve the social organism. Whether the Code actually achieved this purpose is doubtful, for the numerous contemporary documents fail to give any evidence of its practical application. This may be because the Code appeared, in the form we now know it, shortly before the death of Hammurabi; there may not have been time for its implementation.

Much work has been done on a comparison of the Code of Hammurabi with the Mosaic legislation. There are many similarities since they are dealing with areas where there is universal agreement. In spite of resemblances there is no evidence of borrowing. The tone of the Hebrew law is most often more humane than that of the Babylonian.

HAMONAH hə-mō'nə [Heb. *hᵃmônâ*–'multitude'] (Ezk. 39:16). A city in the "Valley of Hamon-gog," where the forces of Gog will be destroyed. The NEB understands the word as a noun, "great horde," rather than a place name, but in order to do so the NEB emends the rest of the verse. Since there is no textual evidence for such an emendation, it is best to understand the verse as an explanatory gloss (cf. *GTTOT*, § 1439; W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], p. 528). G. A. L.

HAMON-GOG hā'mən-gog' [Heb. *hᵃmôn gôg*–'the multitude of Gog']. A valley, possibly in Transjordan, where "Gog and all his multitude" are to be buried (Ezk. 39:11, 15).

HAMOR hā'môr [Heb. *ḥᵉmôr*–'ass'; Gk. *Emmōr*] (Gen. 33:19; 34; Josh. 24:32; Jgs. 9:28; Acts 7:16); AV, NEB, also EMMOR (Acts 7:16). Hamor was the father of Shechem from whom Jacob bought a piece of ground on his return from Paddan-aram for one hundred pieces of silver (Gen. 33:19), which became the burial place of Joseph when his body was removed from Egypt to Canaan (Josh. 24:32). "The men of Hamor" were inhabitants of Shechem and suffered a great loss under Abimelech, a prince over Israel (Jgs. 9:22-49).

Dinah, Jacob's daughter, was seduced by Shechem the son of Hamor. Afterward Shechem, with the cooperation of his father, requested her to be given to him in marriage. The sons of Jacob deceitfully agreed to intermarriage with the Shechemites on the condition that every male inhabitant of the city be circumcised, and when this was done, the sons of Jacob killed all the men in their weakened condition, thus taking vengeance upon Shechem and his father Hamor.

A clue to the name "Hamor" may be provided by the discovery that Middle Bronze Age Amorites at Mari frequently ratified treaties by the sacrifice of an ass. The custom survived among the seminomadic Canaanite stockbreeders of patriarchal and subsequent times, being particularly favored by the descendants of Shechem, the *bᵉnê-ḥᵃmôr*, or "sons of the ass." B. H. DEMENT
R. K. H.

HAMRAN ham'ran [Heb. *ḥamrān*] (1 Ch. 1:41); AV, NEB, AMRAN. The first of four sons of Dishon, a clan chief. *See also* HEMDAN.

HAMSTRING [Heb. piel of *'iqqēr*]; AV HOUGH. To disable an animal by cutting the large tendon at the back of the knee on the hind legs.

It has been a common military act throughout mankind's history to disable an enemy's horses by hamstringing them. This rendered them useless for military action. It was often done when the force capturing the horses was too small or incapable of using them for themselves. Before his victory over Jabin of Hazor, God commanded Joshua to hamstring the horses that he would capture (Josh. 11:6, 9), since the Israelites were not yet trained in the use of the horses and chariots. David, who knew how to use chariots, captured too many horses and hamstrung those he could not use (2 S. 8:4 par. 1 Ch. 18:4). This prevented his enemies from recapturing the horses for their own use.

The hamstringing of oxen served no military function, and in Gen. 49:6f. is attributed to uncontrolled anger. Here the AV translates MT *'iqqᵉrû-šôr* as "they digged down a wall" on the basis of several versions (Vulg., Pesh., Targ., Aq., Symm.; cf. also Gen. 34:25); this translation, however, is based on the qal of *'qr*, "pull, root up" (cf. Eccl. 3:2), and follows the versions in reading *šûr*, "wall," for MT *šôr*, "ox." H. W. LAY

HAMUEL ham'û-əl (AV, NEB, 1 Ch. 4:26). *See* HAMMUEL.

HAMUL hā'məl [Heb. *ḥāmûl*–'pitied,' 'spared']. A son of Perez, and head of one of the clans of Judah (Gen. 46:12; 1 Ch. 2:5; Nu. 26:21). His descendants were called "Hamulites."

HAMUTAL hə-mû'təl [Heb. *ḥᵃmûṭal* (2 K. 23:31), *ḥᵃmîṭal* (2 K. 24:18; Jer. 52:1)]. A daughter of Jeremiah of Libnah, and wife of King Josiah, and mother of Jehoahaz and Zedekiah. In the AV of 2 K. 24:18; Jer. 52:1, and in the LXX the name appears as "Hamital." Swete gives a number of variants, e.g., 2 K. 24:18: B, Gk. *Mitat*; A, *Amitath*; Jer. 52:1: B, *Hameitaal*; ℵ, A, *Hamitaal*; Q, *Hamital*.

HANAMEL han'ə-mel [Heb. *ḥᵃnam'ēl*] (Jer. 32:7-9, 12); AV HANAMEEL. Jeremiah's cousin, son of Shallum, from whom the prophet, while in prison during the time when Jerusalem was besieged by the Chaldeans, bought a field with due formalities, in token that a time would come when houses and vineyards would once more be bought in the land (Jer. 32:6-15).

HANAN hā'nən [Heb. *ḥānān*–'gracious'].

1. A chief of the tribe of Benjamin (1 Ch. 8:23).

2. The youngest son of Azel, a descendant of Saul (1 Ch. 8:38; 9:44).

3. One of David's mighty men of valor (1 Ch. 11:43).

4. The head of a family of the temple servants who returned with Zerubbabel (Ezr. 2:46; Neh. 7:49; 1 Esd. 5:30, AV, NEB, ANAN).

5. An assistant of Ezra in expounding the law (Neh. 8:7; 1 Esd. 9:48, AV, NEB, ANANIAS). Possibly the same person is referred to in Neh. 10:10 (MT 11).

6. One of the four treasurers put in charge of the tithes by Nehemiah (Neh. 13:13).

7, 8. Two who "sealed the covenant" on the eve of the restoration (Neh. 10:22, 26 [MT 23, 27]).

9. A son of Igdaliah, "the man of God," whose sons had a chamber in the temple at Jerusalem (Jer. 35:4).

B. H. DEMENT

HANANEL han'ə-nel, **TOWER OF** [Heb. *migdal ḥᵃnan'ēl*–'tower of God is gracious']; AV HANANEEL ha-nan'ē-el. A tower in the north wall of Jerusalem (Neh. 3:1; 12:39) named for an unknown person. It adjoined the Tower of the Hundred where the Mishneh Wall (Zeph. 1:10) crossed the ridge later called Bezetha, and may have been the west tower of the fortress (Neh. 2:8) that guarded the northern approach to the temple. Herod the Great later built the Antonia Tower here.

Alternately it is held to be the west tower of the Fish Gate. In Jer. 31:38 it is foretold that "the city shall be rebuilt for the Lord from the tower of Hananel to the Corner Gate" — possibly the whole north wall. In Zec. 14:10 it is said Jerusalem "shall remain aloft upon its sight . . . from the Tower of Hananel to the king's wine presses." These latter were probably at the south end of the city. Thus the entire N-S length of the city is described.

See M. Avi-Yonah, *IEJ*, 4 (1954), 241f.

D. J. WIEAND

HANANI hə-nā'nē [Heb. *ḥᵃnānî*–'gracious']; AV and NEB Apoc. ANANIAS.

1. A musician and son of Heman, David's seer, and head of one of the courses of the temple service (1 Ch. 25:4, 25).

2. A seer, the father of Jehu. He was cast into prison for his courage in rebuking Asa for relying on Syria (1 K. 16:1, 7; 2 Ch. 19:2; 20:34).

3. A priest, of the sons of Immer, who had married a foreign wife (Ezr. 10:20; 1 Esd. 9:21).

4. A brother or kinsman of Nehemiah who carried news of the condition of the Jews in Palestine to Susa and became one of the governors of Jerusalem (Neh. 1:2; 7:2).

5. A priest and chief musician who took part in the dedication of the walls of Jerusalem (Neh. 12:36).

See also JOSHBEKASHAH.

B. H. DEMENT

HANANIAH han-ə-nī'ə [Heb. *ḥᵃnanyāhû, ḥᵃnanyâ*; Gk. *Ananias*, "Yahweh has been gracious"]. This was a common name in Israel for many centuries.

1. A Benjaminite (1 Ch. 8:24).

2. A captain of Uzziah's army (2 Ch. 26:11).

3. Father of one of the princes under Jehoiakim (Jer. 36:12).

4. One of the sons of Heman and leader of the 16th division of David's musicians (1 Ch. 25:4, 23).

5. Grandfather of the officer of the guard who apprehended Jeremiah on a charge of desertion (Jer. 37:13).

6. A false prophet of Gibeon, son of Azzur, who opposed Jeremiah, predicting that the "yoke of Babylon" would be broken in two years, and that the king, the people, and the vessels of the temple would be brought back to Jerusalem. Jeremiah would have been glad if it should have been so; nevertheless it was not to be. The question arose, "Who is right, Jeremiah or Hananiah?" Jeremiah claimed that he was right because he was in accordance with all the great prophets of the past who had prophesied evil and whose words had come true. Therefore his words were more likely to be true. The prophet of good, however, had to wait to have his prophecy fulfilled before he could be accredited. Hananiah took off the yoke from Jeremiah and broke it in pieces, symbolic of the breaking of the power of Babylon. Jeremiah, seemingly beaten, retired and received a message from Yahweh that the bar of wood would become a bar of iron, and that Hananiah would die during the year because he had spoken rebellion against Yahweh (Jer. 28).

7. One of Daniel's companions in Babylon whose name was changed to Shadrach (Dnl. 1:6f., 11, 19; Song Three 66; AV ANANIAS).

8. A son of Zerubbabel (1 Ch. 3:19, 21).

9. A Levite, one of the sons of Bebai, one of those who married foreign wives (Ezr. 10:28; 1 Esd. 9:29; AV, NEB, ANANIAS).

10. One of the perfumers (AV "apothecaries") who helped in rebuilding the wall under Nehemiah (Neh. 3:8).

11. One who helped to repair the wall above the Horse Gate (Neh. 3:30). This may be the same person as **10.**

12. A governor of the castle, i.e., the *bîrâ* or fortress, whom Nehemiah placed in charge of the whole city of Jerusalem, because "he was a more faithful and God-fearing man than many" (Neh. 7:2).

13. One of those who sealed the covenant under Nehemiah (Neh. 10:23 [MT 11]); a Levite.

14. A priest who was present at the dedication of the walls of Jerusalem (Neh. 12:12, 41).

15. One who returned with Ezra from Babylon to perform the functions of a priest in Jerusalem (1 Esd. 8:48; AV CHANNUNEUS; NEB CHANUNAEUS).

J. J. REEVE

HAND [Heb. usually *yād*, also *kap*–'palm (of hand)'; Gk. *cheír*]. The hand is that part of the body which enables man to be a doer, a tool-making and tool-using being; thus it is associated with power or control (e.g., hands are called "keepers of the house" in Eccl. 12:3; in referring to parts of the body, Paul gives priority to the hand in 1 Cor. 12:15, 21).

The word "hand" appears in the RSV a total of 1782 times, five hundred of these in the literal sense. The basic notion is of the hand as a whole; thus to wear jewelry such as rings "on the hand" means on the fingers (Gen. 41:42; Jer. 22:24; Lk. 15:22), or bracelets "upon the hands" means on the wrists (Ezk. 23:42). Thumb (Heb. *bōhen*) is mentioned on only three occasions: the ordination of priests (Ex. 29:20; Lev. 8:24), the cleansing of lepers (Lev. 14:14-28), and the mutilation of an enemy (Jgs. 1:6f.). FINGER appears twenty-five times, twice with "right" (Lev. 14:16, 27), twice with "little" (1 K. 12:10 par. 2 Ch. 10:10). "Finger of God" (Ex. 8:19; 31:18; Lk. 11:20; cf. Dt. 9:10) is an expression used with the same force as "hand of God" (see below). PALM occurs only in Lev. 14:15, 26, and fist in the context of quarrels (Heb. *'egrōp*, "rake, hoe," Ex. 21:18; Isa. 58:4), as a gesture (Heb. *yaḏ*, Isa. 10:32; Zeph. 2:15), and as a symbol of power (*ḥōpen*, "hollow of hand," Prov. 30:4).

Benjaminites were distinguished as being ambidextrous (1 Ch. 12:2) or left-handed (Jgs. 3:15, 21; 20:16). References to "left and right" or "left or right hand" are numerous. As with Moslems and many oriental peoples today, the left hand may have been associated with uncleanness (since it was used in sanitation) and evil (Mt. 25:41), though there is little conclusive evidence for this (Jgs. 3:21; Prov. 3:16; Cant. 2:6; 8:3; Mk. 10:37, 40). The right hand, however, appears alone thirty-seven times, and with the left an additional thirty-nine times, suggesting preference for the right hand as the efficient agent (Ps. 118:16; Isa. 10:13). Thus, to be "on" or "seated at" the right hand is to be in the superlative and unique place of power, honor, and prestige, a notion which appears frequently in the OT (e.g., Ps. 110:1) and NT (e.g., Mt. 25:33f.), and also in the Apostles' Creed.

Frequently "hand" occurs in a variety of gestures (*see* GESTURES I). In Isa. 57:8, 10 it is a euphemism for the male sex organ (RSV "nakedness" and "strength," Heb. *yaḏ*, "hand"). In contexts of offering sacrifices, giving blessings, healing the sick, and ordination, hands were placed on animals or people (*see* HANDS, LAYING ON OF).

In the DSS (1QS) a penalty of ten days without food was laid on a member who, while in conversation, gesticulated with the left (unclean) hand. A penalty of thirty days without food was imposed upon a member for "bring[ing] out his hand from under his cloak," which may have meant to "expose himself that his private parts become visible" (7:12, 14, Gaster tr.). L. H. Silberman, however, interprets this to mean that in the community meetings the hands of a speaker had to be kept under his robe or in his pocket, and he cites a similar regulation in the court practice in Persia, possibly also in Babylonia. To cover the hands as an act of reverence in the presence of God is shown in the fresco paintings of the Dura-Europos Synagogue (*ca.* A.D. 250): "Abraham Receiving the Covenant Promise," where his arms are crossed and his hands are enveloped in his outer garment (Gk. *himátion*), and "Samuel Anointing David," where David's arms are crossed and his hands are wrapped in his outer garment (Kraeling).

A "sign [=mark] on the hand" (Ex. 13:9, 16; Dt. 6:8) for Israel meant the *t*ᵉ*pillîm*, or phylacteries (*see* PHYLACTERY). In pagan practice devotees honored gods by cutting or branding marks on the hand (Isa. 44:5; Rev. 20:4) and by kissing the hand in adoration (Job 31:27). A "handbreadth" is a rough linear measurement, the width of the hand at the base of the fingers, about 8 cm. (3 in., 1 K. 7:26; Ezk. 40:5; 43:13).

"Hand" is used figuratively in almost thirteen hundred passages in the RSV. The largest number of references is to the hand of God or of the Lord (186 times) in the sense of God's supreme and almighty power and authority. The phrase is modified frequently by adjectives, e.g., "right" (31 times), "mighty" (10 times), and "strong" (3 times). It signified the "mighty acts of God"; e.g., it is "by the finger of God that I [Jesus] cast out demons" (Lk. 11:20; cf. Mt. 12:28, "by the Spirit of God").

Other figurative uses of hand are "from, out of, into the hand of" (or "the hand of") denoting power and dominion (135 times), jurisdiction (180 times), or safekeeping or deliverance (42 times). Less frequent are "requiring something at your hand," or demanding an account for something for which one is responsible (sheep, Ezk. 24:10, and blood elsewhere); "take, hold life in one's hand," meaning to enter into a critical situation (e.g., 1 S. 19:5; 28:21); "under by the hand of," or under the leadership of some person(s), with the connotation of prosperity or success (e.g., Ps. 77:20 [MT 21]); the "work of your hand," signifying the labor or the product of a skilled handcraftsman; "lay hands upon" or "lay the hand on the neck of," i.e., dominion. The expressions "with a high hand" (or defiantly, Nu. 15:30), "put forth thy hand" (or attack, Job 1:11f.; 2:5), "relax your hand" (or be slow or negligent, Josh. 10:6), and "strengthen the hand" (or comfort or encourage, 1 S. 23:16) are noteworthy.

From such a survey of the OT, it is clear that the Hebrews were especially conscious of the hand. Is this a trait common to all people? Expressions in the English language employing "hand" in both literal and figurative senses show a comparably wide variety, as in the phrase "under the hand and seal of" the owner. Perhaps the widespread use of "hand" in English reflects the influence which the English Bible has had on the vocabulary and idioms of English-speaking people.

Bibliography.–C. H. Kraeling, *The Synagogue: Excavations at Dura-Europos*, Final Report VIII, Pt. I (1957), 166f., Plate LXVI, 238f.; Plate LXXVIII, 261; T. H. Gaster, *Dead Sea Scriptures in English Translation* (1956), pp. 54, 99. P. L. GARBER

HANDBAGS. *See* BAG.

HANDBREADTH [Heb. *ṭepaḥ*, *ṭōpaḥ*] (1 K. 7:26; 2 Ch. 4:5; Ps. 39:5 [MT 6]; Ex. 25:25; 37:12; Ezk. 40:5, 43; 43:13). A Hebrew linear measurement containing 4 fingers, or digits, and equal to about 8 cm. (3 in.). *See* WEIGHTS AND MEASURES.

HANDFUL. Four Hebrew words are used to indicate what may be held in the hand, either closed or open. (1) *Ḥōpen* in Ex. 9:8 is the fist or closed hand and signifies what can be taken in the two hands conjoined, a double handful. (2) *Kap*, "hollow of the hand," is an open handful, occurring literally in 1 K. 17:12 and figuratively in Eccl. 4:6. (3) *Šō'al*, "hollow hand," is the amount of dust Benhadad's soldiers can put into their hands in 1 K. 20:10 and the measured daily portion of barley in Ezk. 13:19. (4) *Qōmeṣ* is a measure of flour (Lev. 2:2; 5:12; 6:15 [MT 8]).

The RSV and the NEB correctly render Heb. *pissâ* "abundance" in Ps. 72:16 (AV "handful"). H. PORTER

HANDKERCHIEF [Gk. *soudárion*] (Acts 19:12). A loanword from the Lat. *sudarium*, found in the plural in

Acts 19:12 (*soudária*; cf. Lat. *sudor*, "perspiration"). Literally it means "a face-cloth used to wipe off perspiration" (Bauer, rev., p. 759). It may have been some sort of headdress. Elsewhere it is rendered "napkin" (Lk. 19:20; Jn. 20:7) or "cloth" (Jn. 11:44). *See also* NAPKIN.

HANDLE [Heb. *tāpaś* (Jer. 2:8; 46:9; 50:16; Ezk. 21:11; 27:29; Am. 2:15), *'āśâ* (Ezk. 23:3, 8), *'āḥaz* (2 Ch. 25:5), *yāḏ* (Isa. 45:9), *'ēṣ* (Dt. 19:5), *kap* (Cant. 5:5); Gk. *psēlaphάō* (Lk. 24:39), *háptō* (Col. 2:21), *orthotoméō* (2 Tim. 2:15)]; AV also HELVE (Dt. 19:5), BRUISE, TOUCH; NEB also CARRY, GRASP, PRESS, etc. The part of an object designed to be held by the hand, or the act of grasping the object.

In the OT the vb. *tāpaś* is used of scribes handling the law (Jer. 2:8), the armies of Ethiopia and Put handling their shields (Jer. 46:9), etc. In Jer. 50:16, the NEB translates *tāpaś* and its object by a single word which expresses both ideas: "reaper" rather than "one who handles a sickle" (RSV; cf. Ezk. 27:29; Am. 2:15). In Ezekiel, Heb. *'āśâ*, which usually means "make" (KoB, pp. 739f.), is translated "handle," and refers to an unchaste act performed upon Oholah and Oholibah in connection with their activity as harlots (23:3, 8, 21). The two women represent Samaria and Jerusalem and the passage is a critique of their unfaithfulness to God and a description of the punishment they received for it. In Ezk. 23:21, *lᵉmaʿan* ("for the sake of") is emended to *'āśâ* on the basis of the context.

Nouns translated "handle" in the RSV OT are Heb. *'ēṣ* (lit. "wood," KoB, pp. 724f.), *kap* (usually "palm" of the hand, KoB, pp. 449f.), and *yāḏ* ("hand," KoB, pp. 362f.). In Isa. 45:9, *yāḏîm* is translated "handles" by the RSV, "hands" by the AV, and "you have no skill" by the NEB (see C. F. Whitley, *VT*, 11 [1961], 458f.; E. J. Young, *Book of Isaiah*, III [*NICOT*, 1972], 203f.).

In the NT Paul warned against a legalism which prohibited the handling of certain foods (Col. 2:21). After His resurrection, Jesus invited the disciples to handle Him in order to demonstrate the reality of His corporeal resurrection body (Lk. 24:39). The meaning of *orthotoméō* in 2 Tim. 2:15 is debated. It may mean "guide [the word of truth] along a straight path" (Bauer, rev., p. 580), "teach [the word] aright" (MM, p. 456), or "follow [the word]," i.e., obey it (*TDNT*, VIII, *s.v.* τέμνω κτλ.: ὀρθοτομέω [Köster]). The RSV rendering is to be preferred over the AV ("rightly dividing") and NEB ("be straightforward") translations. P. L. BREMER

HANDMAID [Heb. *'āmâ*] (1 S. 25:24f., 28, 31, 41; Ps. 86:16; 116:16); NEB (HUMBLE) SERVANT, SLAVE-GIRL, "I," "me"; [*šiphâ*] (1 S. 28:21f.; 2 S. 14:6f., 12, 15, 17, 19); NEB "I," "me"; [Gk. *doúlē*] (Lk. 1:38); NEB SERVANT; **HANDMAIDEN** [Gk. *doúlē*] (Lk. 1:48); NEB SERVANT. A term of humility or obeisance used by the speaker before a great man or God. The distinction between the two Hebrew words is not clear. It is thought that *siphâ* originally meant an unfree, untouched girl in the service of a woman, while *'āmâ* was an unfree woman, either a concubine or the wife of a slave. Heb. *ben-'āmâ* is also a term of humility, but is spoken by a man, "the son of thy handmaid" (Ps. 86:16; 116:16). The suggestion of M. Mansoor (*Thanksgiving Hymns* [1961], p. 31), followed by M. Dahood (comm. on Psalms, II [*AB*, 1968], p. 296), that the text be repointed to read "your true children" (Heb. *ben ᵓmitteḵā*), has little to commend it, especially in view of the parallelism and the absence of any other examples in the OT. Also, its occurrence in the Qumrân texts should probably be related to the Qumrân theology. The Gk. *doúlē* meant a "female slave," a common oriental expression of humility used when speaking to someone of higher rank; it is the word used by the LXX to translate both *šiphâ* and *'āmâ* in all the above passages except 2 S. 14:17; Ps. 86:16; 116:16.

Bibliography.–F. C. Fensham, *VT*, 19 (1969), 312-321; A. Jepsen, *VT*, 8 (1958), 293-97; E. Neufeld, *Ancient Hebrew Marriage Laws* (1944), pp. 121-23. A. L. PERLMAN

HANDPIKE [Heb. *maqqēl yāḏ*] (Ezk. 39:9); AV HANDSTAFF; NEB THROWING-STICK. A weapon perhaps like the staff used by travelers or shepherds (cf. Gen. 32:10 [MT 11]; Ex. 12:11; Nu. 22:27; 1 S. 17:40).

HANDS, LAYING ON OF [Heb. *sāmaḵ yaḏ ʿal*–'lean a hand upon' (Ex. 29:10, 15, 19; Lev. 1:4), *šîṯ yaḏ ʿal*–'place a hand upon' (Gen. 46:4), etc.; Gk. *títhēmi tás cheíras ep'* (Mk. 10:16), *epitíthēmi tás cheíras* (Mt. 19:15), *epíthesis tṓn cheirṓn* (1 Tim. 4:14), etc.]. The practice of laying hands upon the head of another person, usually a part of a religious rite, sometimes in order to impart a blessing. In Am. 5:19 the phrase "the laying of the hand upon" is used in a secular sense and is translated by the RSV as "[he] leaned with his hand against."

I. In the OT.–The laying on of hands was used in several distinct ways: in offering certain sacrifices, in consecrating or ordaining, in imparting blessings, and in passing judgment. The first two are connected with Heb. *sāmaḵ* and seem to connote a "leaning" of the hands. The third is expressed by Heb. *šîṯ* and connotes "placing" hands on the other.

A. In Offering. The person presenting a peace offering (Lev. 3:1f.) or a sin offering (Lev. 3:8, 13; 4:4; Nu. 8:12) was to lay his hands upon the animal so that he identified himself with the animal being offered. Most scholars believe that there was no transference of the guilt of sin. Rather, the value seemed to result from the offering of a pure and innocent life or of a being without blemish as an expiation for the guilt-laden life of the offerer. The only situation where the laying on of hands transferred the guilt of sin was that of the scapegoat (*see* AZAZEL). The high priest laid his hands upon the head of the animal, confessing the sins of the people. He then drove the goat, bearing the sins of the people, into the wilderness (Lev. 16:21).

B. In Ordaining. Beginning with the ordination of the Aaronic priesthood (Lev. 8:14, 22) and the consecration of the Levites (Nu. 8:12), the laying on of hands set apart a man for a special office. Moses laid his hands upon Joshua to symbolize his assumption of the leadership of the nation (27:23). Although Nu. 27:18 states that Joshua already had been given the Holy Spirit, the action does not seem to convey a special spiritual grace. The rite, however, was always accompanied with a special commission and the man commissioned was given special authority.

C. In Blessing. Jacob laid his hands on his grandsons' heads to bless them (Gen. 48:14). The laying on of hands was undoubtedly intended to convey some beneficial virtue.

In one instance God is said to lay (Heb. *šîṯ*) His hand upon David (Ps. 139:5) as a sign of blessing. We should not forget that the divine blessing underlies human blessing. There is no higher blessing, as Job acknowledged in his confrontation with God (Job 9:33).

D. In Passing Judgment. At the trial of a blasphemer each witness, to show his acceptance of the verdict of judgment, placed his hands upon the one to be executed (Lev. 24:14). In Ex. 7:4 the expression refers to an act of divine judgment by which God would visit the plagues upon Egypt. When a victim was spared death, as when God allowed the elders and leaders of Israel to see Him

without executing the judgment of death (Ex. 24:11) or when Abraham was commanded not to sacrifice Isaac (Gen. 22:12), the sparing of judgment is described in terms of hands not being laid on the possible victim.

II. In the NT.–The same basic pattern is followed in the NT except that its sacrificial usage is dropped and the spiritual gifts are added. When Jesus blessed the children (Mt. 19:15 par. Mk. 10:16), He laid His hands upon them. Both Jesus (e.g., Mt. 9:18; Mk. 6:5) and His apostles (Acts 5:12; 28:8) healed by laying on their hands (cf. 9:12, 17). The miracles often occur, however, without the laying on of hands, so the miraculous power for the healings was surely a personal power and was not specifically connected to the action of the hands.

Special spiritual gifts seem to have been given through the laying on of hands. The Holy Spirit was given to the Samaritans (Acts 8:17-20) and to the disciples of John the Baptist (19:6) by the laying on of the apostles' hands. In each case it is possible that the laying on of the hands confirmed a questionable baptismal practice, for the gift of the Holy Spirit is more normally given at baptism. Timothy also received special spiritual gifts from the hands of the elders (1 Tim. 4:14) and from the hand of Paul (2 Tim. 1:6). Some consider these verses to be the basis for the modern practice of confirmation.

On two occasions the laying on of hands was part of the setting of persons aside for special tasks. The seven chosen to care for the widows were selected by the church (Acts 6:6), while Paul and Barnabas were set apart by the Holy Spirit (13:3). The laying on of hands was a part of the formal ceremony by which the church commissioned them and then sent them into their new service. Paul admonished Timothy that this act, probably connected with ordination, ought to take place only after the entire matter was properly considered (1 Tim. 5:22).

On He. 6:2 see the comms. for a discussion of the problematic context.

Coppens, *L'Imposition des mains et les rites connexes dans le NT et dans l'Eglise ancienne* (1925); D. Daube, "The Laying on of Hands," in *NT and Rabbinic Judaism* (1956), pp. 224ff.; *TDNT*, VIII, *s.v.* τίθημι κτλ. (Maurer). D. W. WEAD

HANDSOME [Heb. *yᵉpēh-ṭō'ar* (Gen. 39:6), *ṭôḇ* (1 S. 9:2), *ṭôḇ rō'î* (1 S. 16:12), *ṭôḇ-tō'ar* ("very handsome," 1 K. 1:6), *ṭôḇ mar'eh* (Dnl. 1:4)]; AV GOODLY, GOODLY TO LOOK TO, WELL FAVOURED; NEB also BETTER (1 S. 9:2), STRIKING APPEARANCE, GOOD LOOKS. In 2 S. 23:21, the RSV, AV, and NEB follow the *Q* *'îš mar'eh* (*K* *'ᵃšer mar'eh*); however, the JB, NAB, and NIV follow *BH*'s suggestion to emend *mar'eh* to *middâ*, "stature, size," on the basis of the par. 1 Ch. 11:23. This slight change vastly improves the sense of the text.

Joseph, Saul, David, Adonijah, the young Judean captives, and even the Egyptian slain by Benaiah are described as handsome. One interesting omission among the heroes so described is the name of Solomon, whose appearance may have been a serious disadvantage in his contest with Adonijah.

HANDSTAFF. *See* HANDPIKE.

HANDWRITING (Col. 2:14, AV). *See* BOND.

HANES hā'nēz [Heb. *ḥānēs*, meaning unknown, possibly Egyptian]. A place of uncertain identification mentioned in Isa. 30:4. The passage reads literally, "For his princes were [*hāyû*] in Zoan, and his messengers reach [*yaggîʿû*] Hanes." The problem involved in translating perfects and imperfects in poetical passages is well known, but in this passage both verbs are in concessional clauses, and appear to be undefined general tense, as translated by the RSV, "For though his officials are at Zoan and his envoys reach Hanes. . . ." Hanes was formerly identified with Heracleopolis Magna, Coptic Ahnes, (modern) Arabic Ihnâsiyeh el-Medîna, on an island between the Nile and Baḥr Yûsûf opposite Beni Suef, about 30 km. (50 mi.) above (i.e., S of) Memphis. The objection has been raised (cf. *ISBE* [1929], II, *s.v.* [M. G. Kyle]) that Zoan is in the northeastern Delta, and that Hanes is therefore somewhere between that region and Israel. Tahpanhes has been suggested, but this requires an emendation of the MT to agree with the Targum. K. A. Kitchen (*NBD*, p. 504) offers two other suggestions. (1) W. Spiegelberg (*Aegyptische Randglossen zum AT* [1904], pp. 36-38) postulated a "Heracleopolis parva" in the eastern Delta, on the basis of Herodotus ii.137, 166. Kitchen equates the name "Anysis" with Egyp. **Ḥ(wt-nnỉ-)nsw*, Akk. *Ḫininši*. (2) The second suggestion, proffered by Kitchen himself, is that the Hebrew is a transcription of Egyp. **ḥ(wt)-nsw*, "mansion of the king." In this case, "Zoan" is more closely defined by "the king's mansion." The problem is further complicated by the interpretation given to "his" — whether this pronoun refers to Pharaoh or to the (unmentioned) Israelite king who sent his official and envoys to make a league with Egypt (cf. 30:2). Straightforward grammar would require that the pronoun agree with the near antecedent, Pharaoh. In this case, the clause "and his envoys reach Hanes" does not necessarily require a location nearer Israel, although it must be admitted that the statement seems to lack significance if it is interpreted to mean that Pharaoh's messengers stretch from Zoan to Heracleopolis Magna. The suggestion that "Hanes" refers to the king's mansion in Zoan makes even less sense if "his" is taken to refer to Pharaoh, for why would Pharaoh's "messengers" (*mal'ăḵāyw*) "reach" his palace? It therefore seems best to reject the suggested identifications, whether Heracleopolis Magna, or a smaller Heracleopolis otherwise unknown, or the king's mansion in Zoan, and to admit that Hanes is an unidentified location to which (probably) Egyptian envoys came to meet the Israelite envoys who were seeking to "make a league" (30:1). W. S. L. S.

HANGING [Heb. *tālâ*; Gk. *kremánnumi*]. In the OT, where the word is used in connection with punishments, it refers to the hanging of the corpse in public after execution. Stoning was the usual form of capital punishment, but as an added warning (cf. Gen. 40:19; Josh. 8:29; 10:26; 2 S. 4:12) Deuteronomic law permitted the corpse to be hanged, so long as it was taken down and buried that same day (Dt. 21:22f.; cf. Josephus *Ant.* iv.8.6, 24 [202, 264f.]; Mish. *Sanhedrin* vi.4). However, there were times in Israelite history when this provision was not observed, as in the case of David, who handed over certain of the sons of Saul to the Gibeonites for execution (2 S. 21:5-9; hiphil of Heb. *yāqaʿ*, on which see S. R. Driver, *Notes on the Hebrew Text and the Topography of the Books of Samuel* [2nd ed. 1913], p. 351) and subsequent prolonged exposure. The Egyptians apparently did not remove a hanging corpse until it had been partially consumed by carrion birds (cf. Gen. 40:19), and perhaps the Philistines were following the same general practice in connection with the body of Saul (1 S. 31:10; 2 S. 21:12f.).

Scripture appears to contain only two clear examples of people who died by hanging, i.e., by strangulation, namely Ahithophel (2 S. 17:23 [Heb. *ḥānaq*]) and Judas Iscariot (Mt. 27:5, Gk. *apánchō*). Both of these were cases of

suicide, not of execution. The method by which Pharaoh's baker was hanged (Gen. 40:18-22) is unknown. In Est. 2:23; 5:14; 6:4; 7:9f.; 8:7; 9:13f., 25, the verb *tālâ* ("hang up, suspend") is used of hanging. The "gallows" (Heb. *ʿēṣ*), however, most probably consisted of a stake on which the victim was impaled, since according to Herodotus this kind of punishment was practiced in Persia (iii.125, 159); *see* picture in CROSS. "Hanging on a tree" is applied to the crucifixion of Christ in Acts 5:30; 10:39 (cf. Lk. 23:39), and the "curse" associated with such a fate is quoted from Dt. 21:23 in Gal. 3:13. *See also* PUNISH.

R. K. H.

HANGINGS [Heb. *qᵉlāʿîm*] (Ex. 27:9-15; 35:17; 38:9-18; 39:40; Nu. 3:26; 4:26); [*bottîm*] (2 K. 23:7); NEB VESTMENTS. In Ex. 27:18 and Est. 1:6 the term "hangings" is supplied. The term represents curtains or drapes used to enclose or partition the tabernacle, its court, and the tent of the meeting. Those for the tabernacle (Ex. 27:9-15; 38:9-18; Nu. 3:26; 4:26) were made of "twined linen" of lengths corresponding to the sides of the enclosure. They were hung from silver hooks between supporter pillars. Another drape hung at the door of the tent of the meeting. The "hangings" were carried and cared for by Levites of the family of Gershon (Nu. 3:25; 4:26-28). The Heb. *bottîm* (2 K. 23:7; cf. Arab. *batt*, "woven garment"; J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 730) were probably woven garments used to clothe the Asherah.

A. L. PERLMAN

HANIEL. *See* HANNIEL 2.

HANNAH han'ə [Heb. *ḥannâ*–'grace, favor'; Gk. *Hanna*]. One of the two wives of Elkanah, an Ephraimite who lived at Ramathaim-zophim. Hannah visited Shiloh, where the tabernacle was located, yearly with her husband to offer sacrifices. She was greatly distressed because they had no children, so she prayed earnestly for a male child, whom she promised to dedicate to the Lord from his birth. The prayer was heard, and she called her son Samuel. When he was weaned he was carried to Shiloh to be trained by Eli the priest (1 S. 1:24-28). Hannah became the mother of five other children — three sons and two daughters (2:2). Her devotion in sending Samuel a little robe every year is one of the tenderest recorded instances of maternal love (2:19). She was a prophetess of extraordinary talent, as is evident from her song elicited by God's answer to her prayer (2:1-10). B. H. DEMENT

HANNATHON han'ə-thon [Heb. *ḥannāṯôn*–'gracious, favored']. A city on the northern boundary of the territory assigned to the tribe of Zebulun when Canaan was divided among the tribes of Israel after the Conquest (Josh. 19:14). It is mentioned in the Amarna Letters (Am. Tab. 8, 245). It was probably located about midway between Mt. Carmel and the Sea of Galilee, perhaps at modern Tell el-Bedeiwîyeh. R. J. HUGHES, III

HANNIEL han'ē-el [Heb. *ḥannîʾēl*–'God has been gracious'].

1. The son of Ephod and a prince of Manasseh who assisted in dividing Canaan among the tribes (Nu. 34:23).

2. A son of Ulla and a prince and hero of the tribe of Asher (1 Ch. 7:39; AV, NEB, HANIEL).

HANOCH hā'nok; **HANOCHITES** hā'nok-īts [Heb. *ḥᵃnôḵ*]; NEB ENOCH.

1. A grandson of Abraham by Keturah, and an ancestral head of a clan of Midian (Gen. 25:4; 1 Ch. 1:33; AV HENOCH.

2. The eldest son of Reuben (Gen. 46:9; Ex. 6:14; 1 Ch. 5:3). His descendants were known as "Hanochites" (Nu. 26:5, NEB "Enochites").

HANUN hā'nən [Heb. *ḥānûn*].

1. A son and successor of Nahash king of Ammon. Upon the death of Nahash, David sent Hanun sympathetic communications, which were misinterpreted and the messengers dishonored. Because of this indignity David waged a war against him, which caused the Ammonites to lose their independence (2 S. 10:1ff.; 1 Ch. 19:1ff.).

2. One of the six sons of Zalaph who assisted in repairing the east wall of Jerusalem (Neh. 3:30).

3. One of the inhabitants of Zanoah who repaired the Valley Gate in the wall of Jerusalem (Neh. 3:13), perhaps identical with **2.** B. H. DEMENT

HAP; HAPLESS; HAPLY. All three words are from the Old Norse *happ*, "luck, chance." "Hap" and "haply" are archaic terms used by the AV. "Hap" translates Heb. *miqreh*, "happening, occurrence," in Ruth 2:3. "If haply" translates Heb. *lû'*, "if only" (1 S. 14:30), Gk. *ei ára*, "if then" (Mk. 11:13), and *ei ára ge* (Acts 17:27). "Lest haply" translates Gk. *mḗpote*, "lest at any time" (Lk. 14:29; Acts 5:39), and *mḕ pōs*, "lest in any way" (2 Cor. 9:4).

"Hapless" is still used to denote "luckless" or "unfortunate," as in the RSV translations of Heb. *ḥēlᵉḳâ* (AV "poor"; NEB "poor wretch," "poor victim") in Ps. 10:8, 10, 14.

HAPAX LEGOMENON hā'pox lə-go'mə-non [Gk. *hápax legómenon*–'once read']. A word (or expression) that occurs only once in a certain writing or collection of writings (in biblical studies, usually either the Hebrew OT or Greek NT).

HAPHARAIM haf-ə-rā'əm [Heb. *ḥᵃp̄ārayim*–'two pits']; AV HAPHRAIM haf-rā'əm. One of the sixteen cities, with their villages, assigned to the tribe of Issachar when Canaan was divided among the tribes of Israel after the Conquest under Joshua (Josh. 19:19). Sheshonq (Shishak) includes it in his list of conquered towns (cf. *ANET*, p. 242). Perhaps eṭ-Ṭaiyibeh, about 13 km. (8 mi.) NW of Beth-shean, represents it now. R. J. HUGHES, III

HAPPINESS [Heb. *ṭôḇâ*] (Lam. 3:17); AV, NEB, PROSPERITY. *See* PROSPER.

HAPPIZZEZ hap'ə-zez [Heb. *happiṣṣēṣ*]; AV, NEB, APHSES. A priest on whom fell the lot for the eighteenth of the twenty-four courses that David appointed for the temple service (1 Ch. 24:15).

HARA hā'rə [Heb. *hārāʾ*]. A place mentioned in 1 Ch. 5:26 as a location of Israelite exiles. Since this passage relates to the exiles of the Transjordan tribes and the time of Tiglath-pileser, whereas the seemingly parallel passages (2 K. 17:6; 18:11) refer to "the king of Assyria" and the fall of Samaria, the passage in Chronicles is problematic. Hara is not mentioned in either Kings passage, and the LXX of 1 Ch. 5:26 omits Hara. On the other hand, the LXX of 2 K. 17:6; 18:11 reads *horē mēdōn*, "the mountain of the Medes," where the MT reads *ʿārê māḏay*, "the cities of the Medes." The suggestion that *ʿārê*, "cities of," has been confused with *hārê*, "mountains of," possibly because the name Hara dropped out, is intriguing but involves a complicated series of textual problems.

Thus the location of Hara, if indeed there were such a place, is not known. W. S. L. S.

HARADAH hə-rā'də [Heb. *ḥ^{a}rāḏâ*] (Nu. 33:24f.). A place where the Israelites stopped on their journey from Egypt. It is listed between Mt. Shepher and Makheloth, but its location is unknown.

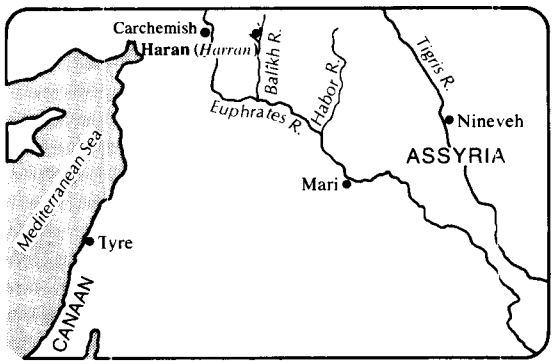
HARAN hā'rən [Heb. *hārān*].

1. Son of Terah, younger brother of Abraham and Nahor, and father of Lot (Gen. 11:27). He had two daughters, Milcah and Iscah (v. 29).

2. A Gershonite of the family of Shimei (1 Ch. 23:9).

3. A Judahite, one of Caleb's sons by the concubine Ephah. He was the father of Gazez (1 Ch. 2:46).

HARAN hə-ran', hā'ran [Heb. *ḥārān*] (Gen. 11:31f.; 27:43; 28:10); NEB HARRAN; [Gk. *Charran*] (Acts 7:2, 4); AV CHARRAN, NEB HARRAN. A city in the northern loop of the Euphrates River, about 80 km. (50 mi.) E of Carchemish. Abraham's family moved to Haran after God had spoken to him in Ur of the Chaldees (Acts 7:2, 4).



After Abraham's father Terah died in Haran (Gen. 11:31f.), Abraham, taking his possessions, wife, and nephew Lot, left Haran for Canaan (12:4f.). Jacob also went to Haran when he fled from Esau's anger, being sent by his mother Rebekah to her brother Laban (27:43; 28:10). Jacob arrived at a well, met men from Haran, and was introduced to Rachel, whom he eventually married after being tricked by Laban into first marrying her older sister Leah.

Haran (Harran) is included in the list of cities conquered by Sennacherib king of Assyria when he threatened Hezekiah (2 K. 19:12; Isa. 37:12). In his lament over Tyre, Ezekiel reflected the commercial interests of Haran when he referred to the clothing and carpets that Tyre had obtained from Haran (Ezk. 27:23).

A city by this name has been continuously occupied in this area since at least the 3rd millennium B.C. The Mari texts reflect life in the area during the early 2nd millennium B.C. very similar to that of the biblical patriarchs. Its continuous occupation may be due to its strategic position at the crossroads of trade routes going between the major commercial centers of that part of the world. This fits well with the biblical account of Abraham's prosperity, and the ease with which the patriarchs traveled and sent messengers to the area after settling in Canaan (cf. Gen. 24).

With Ur this city provided sites for famous temples of Sin, the moon-god. Assyrian rulers repeatedly added to the city, used it as a provincial capital, and embellished its temple. After Nineveh fell (612 B.C.), the final Assyrian government was located in Haran until defeated by the Babylonians in 609 B.C. The Babylonians restored the worship of Sin in both Ur and Haran. Nabonidus's mother (who died at age 104) was high priestess in the temple at Ur, and later his daughter was high priestess in the temple at Haran.

Crassus, a member of the first Roman triumvirate, was defeated, captured, and executed at Haran by the Parthians in 53 B.C. The city has been ruled by Zoroastrians, Nestorian Christians, Moslems, and Crusaders, and exists today as a town in southern Turkey.

See Vol. I, Map III.

R. J. HUGHES, III

HARARITE hā'rə-rīt [Heb. *hah^{a}rārî, hā'rārî*]. A gentilic (derived from an unknown place) applied to the fathers of some of David's mighty men.

1. Agee, father of Shammah (2 S. 23:11).

2. Shammah, son of Agee (2 S. 23:11, 33). The par. passage, 1 Ch. 11:34, has "Shagee" (AV, NEB, SHAGE) in place of "Shammah" and names him as the father of Jonathan.

3. Ahiam, son of Sharar the Hararite (2 S. 23:33). 1 Ch. 11:35 has "Sacher" (AV, NEB, SACAR) for Sharar.

HARBONA, HARBONAH här-bō'nə [Heb. *har^{e}bônā', har^{e}bônâ*]. One of the seven eunuchs who served Ahasuerus and who was commanded to bring Esther before the king (Est. 1:10). He suggested that Haman be hanged upon the same gallows that he had erected for Mordecai (7:9). The Persian equivalent of the name means "donkey driver."

HARD; HARDNESS [Heb. *gāḏôl*] (Ezk. 29:18); AV GREAT; NEB LONG; [*galmûḏ*] ("hard hunger," Job 30:23); AV FAMINE; NEB HUNGER; [*dāḇaq*] ("pursue hard," etc., Jgs. 20:45; 1 S. 14:22; Jer. 42:16); AV also CLOSE; NEB "hot pursuit," STILL; [*dāḥâ*] ("push hard," Ps. 118:13); AV SORE; [*ḥāḇā'*] (Job 38:30); AV HIDE; NEB COVER; [*ḥāzāq*] (1 S. 14:52; 2 S. 11:15; Job 37:18; Jer. 5:3; Ezk. 3:7-9); AV also HOTTEST, IMPUDENT, SORE, STRONG; NEB also BITTER, BRAZEN, FIERCEST, STUBBORN; [*ḥîḏâ*] ("hard question," 1 K. 10:1; 2 Ch. 9:1); [*ḥāṯar*] ("row hard," Jonah 1:13); [*kāḇēḏ*] (Jgs. 20:34; 1 S. 31:3; 1 Ch. 10:3; Ezk. 3:5f.); AV also SORE; NEB also DIFFICULT, HEAVY; [*nāgaś*] ("hard pressed," 1 S. 13:6); AV DISTRESSED; [*^{a}ḇōḏâ*] ("hard service," 1 K. 12:4; 2 Ch. 10:4; Isa. 14:3); AV also GRIEVOUS; NEB also CRUEL; [*'ōz*] (Eccl. 8:1); AV BOLDNESS; NEB GRIM LOOKS; [*'āmāl*] ("hard labor," Ps. 107:12); AV LABOUR; [*pālā'*] (Gen. 18:14; Dt. 30:11; Jer. 32:17, 27); AV also HIDDEN; NEB DIFFICULT, IMPOSSIBLE; [*pāṣar*] ("press hard," Gen. 19:9); AV SORE; NEB "crowded in"; [*ṣāḇā'*] ("hard service," Job 7:1); AV APPOINTED; [*ṣûq*] (Jgs. 14:17; 16:16; Job 41:24 [MT 16]; AV also FIRM, "press," SORE; NEB FIRM, "pester"; [*qāšâ*] (Gen. 35:16f.; Dt. 1:17; 15:18; Isa. 27:1); AV also SORE; NEB AMISS, CRUEL, DIFFICULT, PAINS, SEVERE PAINS; [*qāšeh*] (Ex. 1:14; 18:26; Dt. 26:6; Jgs. 4:24; 2 S. 3:39; 2 K. 2:10; Job 30:25; Ps. 60:3 [MT 5]); Isa. 19:4); AV also CRUEL, "prevailed against," TROUBLE; NEB also BITTER, CRUEL, DIFFICULT, MUCH, "pressed home"; [*rōḇ*] (Lam. 1:3); AV GREAT; NEB ENDLESS; [*rāḏap*] ("hard driven," Lam. 5:5); AV PERSECUTION; NEB OVERDRIVEN; [Gk. *báros*] (Mt. 23:4); AV GRIEVOUS; [*deinós*] (Lk. 11:53); AV VEHEMENTLY; NEB FIERCELY; [*dysbástaktos*] ("hard to bear," Lk. 11:46); AV GRIEVOUS; NEB INTOLERABLE; [*dysermēneutos*] (He. 5:11); NEB DIFFICULT;

[*dýskolos*] (Mk. 10:24); [*dyskólōs*] (Mt. 19:23; Mk. 10:23; Lk. 18:24); [*dysnóētos*] ("hard to understand," 2 Pet. 3:16); NEB OBSCURE; [*thlíbō*] (Mt. 7:14); AV, NEB, NARROW; [*perissotérōs*] (1 Cor. 15:10); AV MORE ABUNDANTLY; NEB OUTDONE; [*polýs*] (Rom. 16:6, 12; Col. 4:13; He. 10:32); AV GREAT, MUCH; NEB also GREAT, SO LONG, TIRELESSLY; [*pṓrōsis*] (Mk. 3:5; Eph. 4:18); AV also BLINDNESS; NEB also OBSTINATE; [*sklērokardía*] ("hardness of heart," Mt. 19:8; Mk. 10:5); NEB CLOSED; [*sklērós*] (Mt. 25:24; Jn. 6:60); NEB also "more than we can stomach"; [*sklērótēs*] (Rom. 2:5); NEB RIGID; [*synéchō*] ("be hard pressed," Phil. 1:23); AV "in a strait"; NEB TORN.

(1) One of the main uses of the word "hard" in the OT is concerned with the idea of difficulty. The commandments given by Yahweh to Israel are not difficult to perform (Dt. 15:18; 30:11). Difficult judicial cases are to be resolved by Moses (Ex. 18:26; Dt. 1:17). The questions that the queen of Sheba poses to Solomon (1 K. 10:1; 2 Ch. 9:1) are called "hard," i.e., "difficult." Ezekiel is sent to the house of Israel because its language will not be difficult for him to understand (Ezk. 3:5f.). Elisha's request for a double share of Elijah's spirit is characterized as difficult of accomplishment (2 K. 2:10). Nothing is too difficult for Yahweh (Gen. 18:14; Jer. 32:17).

In the NT also the word "hard" is associated with the idea of difficulty. Some of the ideas of the Christian faith are difficult to understand (He. 5:11; 2 Pet. 3:16). Entry into the kingdom of God is difficult (Mt. 7:14; Mk. 10:24), especially for the rich (Mt. 19:23; Mk. 10:23; Lk. 18:24), as is Jesus' saying about the bread of life (Jn. 6:60; *see* HARD SAYING). The master in the parable of the talents is called a "hard man" (Mt. 25:24), difficult to satisfy. Paul has difficulty in deciding between life and death because of his devotion to Christ (Phil. 1:23).

(2) A second use is to characterize any activity that requires great exertion, effort, or persistence: the effort of Nebuchadrezzar's army against Tyre (Ezk. 29:18); the pursuit of the Benjaminites by the Israelites (Jgs. 20:45), of the Philistines by the Israelites (1 S. 14:22), of the Israelites by famine (Jer. 42:16); the rowing of the men in the boat with Jonah (Jonah 1:13); the persistence with which Delilah pursued Samson's secret (Jgs. 14:17; 16:16); Rachel's labor during the birth of Benjamin (Gen. 35:16f.). Severe fighting is often characterized as "hard" (Jgs. 4:24; 20:34; 1 S. 13:6; 14:52; 31:3; 2 S. 11:15; 1 Ch. 10:3). The psalmist says that he has been pushed so hard that he falls (Ps. 118:13); the men of Sodom pushed Lot hard (Gen. 19:9). In the NT this sense occurs particularly with respect to the efforts of Paul (1 Cor. 15:10) and his associates (Rom. 16:6, 12; Col. 4:13; He. 10:32).

(3) "Hard" occurs several times in the sense of "close"or "near to," as in "pursue hard" (Jgs. 20:45) and "follow hard" (Jer. 4:20; 42:16).

(4) Another use of "hard" concerns oppressive treatment or work; the treatment of the people of Israel by Solomon (1 K. 12:4; 2 Ch. 10:4) or by the king of Babylon (Isa. 14:3); the Israelites' life in Egypt (Ex. 1:14; Dt. 26:6) or in exile (Lam. 1:3; 5:5); the nature of life in general (Job 7:1; 30:25; Ps. 60:3; 107:12). The Egyptians are destined to become oppressed, says Isaiah (19:4, "hand of a hard master"). In the NT "hardness" is linked to oppressive burdens which the interpreters of the Jewish law lay upon the people (Mt. 23:4; Lk. 11:46).

(5) Yet another use characterizes those who are stubborn or pitiless as "hard" (2 S. 3:39; Jer. 5:3; Ezk. 3:7-9).

Qoheleth says that wisdom can change the hardness of a man's countenance to shining light (Eccl. 8:1). Isaiah says that Yahweh's sword is hard (Isa. 27:1). In Lk. 11:53 the Pharisees and scribes ask Jesus harsh and unfriendly questions. "Hardness of heart" is an affliction which hinders both belief (Mk. 3:5; Rom. 2:5; Eph. 4:18) and understanding (Mt. 19:8; Mk. 10:5).

The book of Job makes several uses of the term "hard." Job describes famine as "hard hunger" (30:3); Elihu describes the harsh, glaring sky as "hard" (37:18); and Yahweh describes frozen water as being "hard like stone" (38:30), as also is Leviathan's heart (41:24).

J. R. PRICE

HARD SAYING; HARD SENTENCES. In Dnl. 5:12 the AV renders "hard sentences" for Aram. *ʾᵃḥîḏān* (RSV, NEB, "riddles"). The Hebrew equivalent, *ḥîḏâ*, denotes something obscure or enigmatic; cf. Nu. 12:8 ("dark speech"); Jgs. 14:12-19 ("riddle"); 1 K. 10:1 ("hard questions"); Ps. 49:4 ("riddle"). *See* DARK SAYINGS.

Greek *sklēros* (lit. "harsh" [Jn. 6:60; NEB "more than we can stomach"]; cf. Jude 15) conveys quite another meaning. Jesus' words about eating His flesh and drinking His blood were "hard" to His hearers because they could not accept His claims — not because His saying was enigmatic. As Calvin says, "To unbelievers... who obstinately oppose it, [Christ's teaching] will be a hammer breaking the rocks in pieces, as the prophet puts it in Jer. 23:29" (comm. on John, *in loc.*).

HARDEN; HARDENED [Heb. *ḥāzaq*] (Ex. 4:21; 7:3, 13, 22; 8:19; 9:12, 35; 10:20, 27; 11:10; 14:4, 8, 17; Josh. 11:20); NEB "make (be) obstinate," "make stubborn," "offer an obstinate resistance"; [*ʾāmaṣ*] (Dt. 15:7; 2 Ch. 36:13); NEB "be hard-hearted," "be stubborn"; [*kāḇēḏ*] (Ex. 7:14; 8:15, 32; 9:7, 34; 10:1; 1 S. 6:6); NEB "be (make) obdurate," "be stubborn"; [*qāšâ*] (Dt. 2:30; Job 9:4; Ps. 95:8; Prov. 28:14); NEB "make stubborn," "stubbornly resist," "grow stubborn"; [*qāšaḥ*] (Isa. 63:17); [*rāgaʿ*] (Job 7:5); AV BROKEN; NEB omits; [Aram. *tᵉqēp*] (Dnl. 5:20); NEB "become stubborn"; [Gk. *pōróō*] (Mk. 6:52; 8:17; Jn. 12:40; Rom. 11:7; 2 Cor. 3:14); AV also BLINDED; NEB CLOSED, DULLED, "make blind," "make insensitive"; [*sklērýnō*] (Rom. 9:18; He. 3:8, 13, 15; 4:7); NEB "make (grow) stubborn"; **HARDENING** [Gk. *pṓrōsis*] (Rom. 11:25); AV, NEB, BLINDNESS.

"Harden" occurs most frequently in the phrase "to harden the heart." This hardening of people's hearts is attributed both to God and to people themselves, e.g., with reference to the hearts of Pharaoh and the Egyptians (Ex. 4–11). The verb *ḥāzaq* ("make strong") is used in both the qal and the piel, with the piel occurring where God hardens the heart and the qal where man is the subject. With the exception of Ex. 10:1, *kāḇēḏ* (in the piel and hiphil) is used where the hardening is attributed to man's own act, and means literally to "be heavy, dull, or insensitive." The verb *qāšâ* occurs only in the hiphil and is used both of hardening that is God's work and hardening that is man's work; this term is also used figuratively in the phrase "stiffen the neck" (*see* STIFF-NECKED). In the NT the verbs *pōróō* and *sklērýnō* are used only in the figurative sense of "harden the heart (or mind)."

The hardening of people's hearts by God is a way of punishment, but it is always a consequence of their own self-hardening. In Pharaoh's case we read that he "hardened his heart" against the appeal to free the Israelites. Hardening himself, he became more confirmed in his obstinacy, till he brought the final doom upon himself: sin is made to become its own punishment. In Hebrew religious thought everything was directly attributed to God, and the hardening *is* God's work, but it is always the consequence

of human action out of harmony with God's will (cf. Rom. 1:18-32, esp. vv. 21, 24, 26, 28). W. L. WALKER

HARE [Heb. *'arnebet*] (Lev. 11:6; Dt. 14:7); cf. Akk. *annabu*, Ugar. *anhb*, Arab. *'arnab*. This animal is mentioned only in the lists of unclean animals in Leviticus and Deuteronomy, where it occurs along with the camel, the coney, and the swine. The camel, the hare, and the coney are unclean "because they chew the cud but do not part the hoof, the swine, because it parts the hoof but does not chew the cud." The hare and the coney are not ruminants, but might be supposed to be from their habit of almost continuously moving their jaws. Although *'arnebet* occurs only in the two passages cited, there is no doubt that it is the hare. The LXX has Gk. *dasýpous*, "rough-footed," which, while not the commonest Greek word for the hare (*lagôs*), refers to the remarkable fact that in hares and rabbits the soles of the feet are densely covered with hair. The commonest Arabic word for "hare," *'arnab*, is from the same root as Heb. *'arnebet*.

Hares, which are rodents of the *Leporidae* family, are closely related to the rabbit (*Lepus cuniculus*), but have longer legs and ears, besides being much swifter than the rabbit. Hares are widely distributed in the northern hemisphere, whereas in Bible times there were no rabbits in Palestine. Tristram regarded the species *Lepus syriacus*, an animal closely resembling its English counterpart in size and coloring, as native to the northern regions of Palestine, although other species also occur elsewhere in the country. R. K. H.

Desert creatures, including a hare, in a reconstruction of Egyptian wall paintings (Royal Ontario Museum, Toronto)

HAREM [Heb. *bêt hannāšîm*] (Est. 2); AV "house of the women," WOMEN'S HOUSE; NEB WOMEN'S QUARTERS. The young women chosen for Ahasuerus were taken into the women's quarters, under the care of a eunuch, to prepare for their night with the king. Having spent that night, they resided in a separate part of the harem in charge of another eunuch to await the king's command to return. Some might wait in vain. Esther was a favored one.

HAREPH hâr'əf [Heb. *hārēp*–'scornful']. A chief of Judah, one of the sons of Caleb and father of Beth-gader (1 Ch. 2:51).

HARETH hâr'əth [Heb. *ḥāreṯ*, in pause]. *See* HERETH.

HARHAIAH här-hā'yə [Heb. *ḥarhᵃyâ*]. A goldsmith whose son Uzziel helped to repair the walls of Jerusalem under Zerubbabel (Neh. 3:8).

HARHAS här'has [Heb. *ḥarḥas*]. Grandfather of Shallum, husband of Huldah (2 K. 22:14). The name appears as Hasrah in the parallel passage 2 Ch. 34:22.

HAR-HERES. *See* HERES 1.

HARHUR här'hûr [Heb. *ḥarḥûr*; Gk. *Hasour*]. One of the temple servants whose descendants came from Babylon with Zerubbabel (Ezr. 2:51; Neh. 7:53). 1 Esd. 5:31 has Asur and Pharakim in place of Harhur.

HARIM hâr'im [Heb. *ḥārim*]. A family name.

1. A nonpriestly family that returned from captivity with Zerubbabel (Ezr. 2:32; Neh. 7:35); mentioned among those who married foreign wives (Ezr. 10:31); also mentioned among those who renewed the covenant (Neh. 10:27 [MT 28]).

2. A priestly family returning with Zerubbabel (Ezr. 2:39; Neh. 7:42; 12:3,15 [*see* REHUM]; 1 Esd. 5:25; AV CARME, NEB CHARME); members of this family covenanted to put away their foreign wives (Ezr. 10:21; Neh. 10:15 [MT 6]). A family of this name appears as the third of the priestly courses in the days of David and Solomon (1 Ch. 24:8).

3. In Neh. 3:11 is mentioned Malchijah, son of Harim, one of the wall-builders. Which family is here designated is uncertain. W. N. STEARNS

HARIPH hâr'if [Heb. *ḥārîp*]; NEB also HARIF. One of those who returned from exile under Zerubbabel and helped to seal the covenant under Nehemiah and Ezra (Neh. 7:24 [par. Ezr. 2:18 has "Jorah"]; 10:19 [MT 20]).

HARLOT; PLAY THE HARLOT [Heb. *zānâ, zônâ* (Gen. 34:31; 38:15, 24; Ex. 34:15f.; etc.), *qᵉḏēšâ* (Gen. 38:21f.); Gk. *pórnē* (Mt. 21:31f.; Lk. 15:30; He. 11:31; Jas. 2:25; Rev. 17:1, 5, 15f.; 19:2)]; AV also WHORE, GO A WHORING, COMMIT FORNICATION, etc.; NEB COMMON WHORE, PROSTITUTE, TEMPLE-PROSTITUTE, etc.

A harlot is a woman who uses her sexual capacity either for gain or for pagan religious purposes. In contrast to the adulteress she is promiscuous and usually shows no regard for who her mate might be.

Prostitution is a very ancient practice. As early as Gen. 38 we read of it as an established custom. In the ancient world the harlot who worked for gain usually belonged to one of two classes of people. She might be a slave whose earnings as a harlot went to her masters. Baby girls were often deserted by their parents to die; these babies were frequently picked up and raised for the purpose of prostitution. On other occasions free women entered the profession. Prostitution was considered a profession, and licenses were often required from the state. Most of these women doubled as banquet musicians. If a prostitute was free she often became very rich. In ancient Greece Solon established houses of prostitution from which the state gained revenues.

The OT pictures the prostitute as having special clothing (Prov. 7:10), which probably included a veil that covered the face (Gen. 38:14f.). On occasions such women

lived together in houses that might be called brothels (1 K. 3:16). They were available for hire at greatly varying prices. Prov. 6:26 says that a prostitute would make herself available for a loaf of bread, while the price Judah offered Tamar was a kid (Gen. 38:17). Joel illustrates the depth to which Israel's contempt for human life had fallen by saying that they would give a boy for a harlot's wages (Joel 3:3 [MT 4:3]). A harlot's earnings were not an acceptable offering to God (Dt. 23:18 [MT 19]).

The harlot is condemned in numerous places throughout the OT. A priest is excluded from marrying one, since he is allowed to marry only a virgin (Lev. 21:7-14). If at her marriage a young woman could not produce the tokens of her virginity, she could be stoned as a harlot (Dt. 22:21). The child of a harlot also was despised (Isa. 57:3; Hos. 2:4 [MT 6]). Because Jephthah was the son of a harlot, he was forced to withdraw from his clan and was not called to leadership until the situation was desperate (Jgs. 11:1-11).

Throughout the OT there are references to religious prostitution. Heb. *qᵉḏēšâ* comes from a root meaning "holy" (*qāḏôš*) and carries that connotation. It is the equivalent of the Gk. *hieródoulos* (lit. "temple slave"). While in the classical world these temple slaves were occasionally prostitutes, this often was not the case. Temple prostitution was a much more common practice in the Near East. The religions of this region commonly deified nature and its reproductive forces, and paid homage to these in licentious rites. The Code of Hammurabi allowed female prostitutes at any temple. The Gilgamesh Epic pictures such a woman in connection with the temple of Ishtar (cf. *ANET,* p. 75). Herodotus (i.199) says that the Babylonians compelled every native female to attend the temple of Venus once in her life and to prostitute herself in honor of the goddess. While this practice was not so widespread among the Greeks and Romans, Eryx and Corinth are known to have had vast numbers of temple prostitutes. Here they merely shared their gains with the temple with which they were connected.

When the Israelites entered the Promised Land religious prostitution was an immediate problem (Nu. 25:1). The extermination of the inhabitants of the land was commanded so that the Israelites would not fall into this practice (Ex. 34:11-16). Dt. 23:17 [MT 18] forbids cult prostitution for Israel and indicates that this was carried on by men as well as women. "Dog" in v. 18 (RSV mg. "sodomite") is usually interpreted to mean "male prostitute." In the period of the judges religious prostitution was one of the basic causes of the degradation of the people (Jgs. 2:17). They came to worship both the priestly ephod and certain Baals by means of sacred prostitution (8:27-35). Samson spent the night with a Philistine harlot (16:1). The captivity of the half-tribe of Manasseh resulted from their participation in the religious prostitution connected with the Canaanite gods (1 Ch. 5:25). The same can be said of the fall of both the northern and southern kingdoms, as the idolatrous practices they followed included such rites (Ezk. 16:16-58).

The degradation of the human being through religious prostitution becomes a figure for the spiritual infidelity that Israel and Judah show to God. The OT pictures Yahweh as the husband of Israel. For example, Israel and Judah are depicted as faithless sisters who play the harlot, being unfaithful to their beloved (see esp. Jer. 3:1-3 and Ezk. 23). The deep religious significance of such a figure is apparent when we see the close connection between idolatry and religious prostitution. To demonstrate the faithlessness of Israel, Yahweh commanded the prophet Hosea to take a wife who had been a harlot. Unable to break the habit of her former life, she became a living representation of Israel's faithlessness to Yahweh. Hosea filled the role of God, who was always willing to forgive. (*See* GOMER.)

In the NT we do not find the usual Greek word for harlot, *hetaíra*. Though this word is common in the LXX, Christian literature favors *pórnē*. Yet from the story of the Prodigal Son, who spent his inheritance on harlots (Lk. 15:30), and from the references to Rahab the harlot (He. 11:31; Jas. 2:25), we may be sure that the meaning is the same. Mt. 21:31f. shows that Jesus appealed to this class of people with His message. In this passage the harlot is pictured as a part of the lowest class of society, despised along with the tax collector. Although we cannot be sure that the woman taken in adultery (Jn. 8:1-10) belonged to this class, yet Jesus showed her forgiveness. In His statement of forgiveness, however, He commanded the woman to turn from her former ways.

Paul also joins in this condemnation of prostitution. In 1 Cor. 6:15-20 he shows that when the Christian goes to a harlot he actually becomes one flesh with such a sinful person. In a probable reference to the religious prostitution that was so rampant in Corinth, Paul says that one in whom the Holy Spirit dwells should not be joined to a prostitute. Such immorality is a sin against one's own body, which is the temple of God. The Christian should rather glorify God with his body.

In Rev. 17 an angel shows the judgment of the great harlot. In this vision a woman seated upon a great beast is called the mother of harlots. The final verse of the chapter suggests that the harlot is the city of Rome and her government which rules the world. Thus, the harlot here stands for that government which is opposed to God. She is condemned for being drunk with the blood of His saints. God is praised for destroying the one who corrupted the earth with her fornication and for avenging the blood of His saints (Rev. 19:2). In Rev. 18 the same judgment of the harlot is described in hymns. The first declares that Babylon the great (equivalent to the harlot) has fallen. The second hymn (vv. 4-8) calls for the people of God to come out from her lest they be charged with her sin. Finally, her fornication with the kings of the earth is portrayed in terms of the great wealth of the city. She is fallen, and within her is found the blood of the saints (Rev. 18:24).

HARLOTRY. *See* CRIMES.

HAR-MAGEDON här-mə-ged'ən (Rev. 16:16, ASV). *See* ARMAGEDDON.

HARMON här'mən [Heb. *haharmônâ*] (Am. 4:3); AV PALACE; NEB DUNGHILL. The meaning of this hapax legomenon has been disputed from ancient times. The LXX translates it Gk. *tó óros tó Remman,* "the mountain of Remman." The Targum has Aram. *ṭûrê harmênî,* "the mountains of Armenia." The AV apparently reads Heb. *'armôn* and the NEB *hammaḏmēnâ* in its stead. Modern scholars have also suggested *ʿᵃrummôṯ,* "naked," *ḥērem,* "devoted to destruction,"ᵛ and *hermônâ,* "to Hermon," the mountain N of Bashan.

HARMONY [Gk. *tó autó phroneín*] (Rom. 12:16; 15:5); AV SAME MIND, LIKE-MINDED; NEB EQUAL REGARD, AGREE; [*teleiótēs*] (Col. 3:14); AV "bond of perfection"; NEB "complete whole." Though there are several cognate forms in the NT, Paul is the only one to exhort the churches literally to "think the same thing." Only in the Roman passages does the RSV translate *tó autó phroneín* as "harmony," using "agree" in 2 Cor. 13:11 and Phil. 2:4, and "same mind" in Phil. 2:2.

"Harmony" is most closely related to Gk. *phrḗn* rather than Gk. *noús*. The Gk. *phrḗn* corresponds to the Heb. *nepeš*–'soul.' While not excluding intellectualization, *phrḗn* is broad enough in scope to include all the mental powers, though the emphasis here is on attitude. To "think the same thing" thus means to "have a similar disposition, outlook."

The idea of "living in harmony" occurs only in contexts addressed to the Church. In every case, Paul envisions full agreement as an aim, as his prayer for a congregation, not as something that has already happened. The goal of harmonious living, however, does not happen naturally among any people who desire unanimity. Harmony can be a guiding principle only in the Christian community, only "in accord with Christ Jesus" (Rom. 15:5). Harmony is not important simply as an experience in itself, but as the basis for worship. Paul challenges the Church to a healthy spirit of oneness, in order that "together you may with one voice glorify the God and Father of our Lord Jesus Christ" (Rom. 15:6).

The RSV uses the interesting phrase "perfect harmony" in Col. 3:14 for *teleiótēs* (lit. "completeness"). This passage specifies love as the golden key of harmony, its source and motivating power. It contrasts this liberating and healing harmony with the divisive self-centeredness of the non-Christian world (Col. 3:7f.; cf. Eph. 4:13). Gk. *teleiótēs* (cf. Gk. *teleióō*–'finish,' 'bring to an end') also suggests that harmony must be a supreme goal and purpose toward which the Christian community energetically aims.

See *TDNT*, VIII, *s.v.* τελέω κτλ. (Delling), esp. p. 79; IX, *s.v.* φρήν κτλ. (Bertram). C. G. CHRISTIANS

HARMONY OF THE GOSPELS. An arrangement of the material in the Gospels that takes their parallels into account. One type of harmony combines the Gospel material into a single continuous narrative. The earliest example is the *Diatessaron* of Tatian (*ca.* A.D. 175), which became the standard text of the Gospels in some churches until the 5th cent. (cf. *ODCC*, *s.v.* "Diatessaron," with bibliography). One example of the several English harmonies of this type is L. Boettner, *A Summary of the Gospels* (1933).

The much more common type of harmony, also known as a synopsis, developed from the work of Ammonius of Alexandria and Eusebius. It calls attention to the parallelisms, similarities, and differences among the Gospels without interweaving or conflating their materials, usually by printing the three "Synoptic" Gospels or all four Gospels in parallel columns. For this type of harmony *see* SYNOPSIS.

HARNEPHER här'nə-fər [Heb. *ḥarneper*]. A member of the tribe of Asher (1 Ch. 7:36).

HARNESS [Heb. *'āsar*–'bind'] (Jer. 46:4); [*rāṭam*–'bind fast'] (Mic. 1:13); AV BIND. The term "harness" is of Celtic origin, and in the AV refers to different types of armor (cf. 1 K. 22:24; 2 Ch. 9:24; 18:33; etc.). In the RSV it occurs only twice, with the meaning "saddle up," and with this sense it appears also in the NEB. R. K. H.

HAROD hā'rod [Heb. *ḥ^{a}rōḏ*–'trembling'; *ḥ^{a}rōḏî*–'Harodite'].

1. The location of the fountain beside which Gideon and his army were encamped (Jgs. 7:1). Smith (*HGHL*, pp. 397f.) shows how the terrain made Gideon's test of the army meaningful. There is no good reason to question the accuracy of the common view, which places this spring at 'Ain Jālûd, on the edge of the Valley of Jezreel, about 3 km. (2 mi.) E of Zer'în and just under the northern cliffs of Gilboa. A plentiful and beautiful spring of clear cold water rises in a rocky cave and flows out into a large pool, whence it drains off, in Nahr Jālûd, down the valley past Beisān to the Jordan. This spring may possibly be the fountain near which Saul encamped before the battle of Gilboa (1 S. 29:1).

2. The home of two of David's heroes, Shamma and Elika (thus the AV calls them Harodites). The LXX omits the second name. In 1 Ch. 11:27, the AV calls Shammoth "the Harorite"; the second is omitted. "Harorite" is a scribal error for "Harodite," ד being taken for ר. "Harodite" may be connected with the spring of Harod.

R. P. DUGAN

HAROEH hə-rō'ə [Heb. *hārō'eh*–'the seer'] (1 Ch. 2:52); NEB REAIAH. A Judahite, son of Shobal. In 4:2 Shobal's son is Reaiah (Heb. *r^e'āyâ*); probably *hārō'eh* in 2:52 should be emended to *r^e'āyâ* (see the comms.).

HARORITE. *See* HAROD 2.

HAROSHETH-HA-GOIIM hə-rō'shəth hə-goy'əm [Heb. *ḥ^{a}rōšeṯ haggôyim*] (Jgs. 4:2, 13, 16); AV HAROSHETH OF THE GENTILES; NEB HAROSHETH-OF-THE-GENTILES, HAROSHETH (Jgs. 4:16). The location (headquarters?) of Sisera, commander of the army of Jabin king of Canaan, prior to his battle with Barak. The term *ḥ^{a}rōšeṯ* may be related to *ḥōreš*, "wooded height" (*pace* BDB, p. 361); *gôyim*, ostensibly the word for "nations," may be an entirely unrelated name (cf. Josh. 12:23, "king of Goiim in Galilee" [RSV, emending "Gilgal" to agree with the LXX]; Gen. 14:1, "Tidal king of Goiim"). If so, "Galilee of the Goiim" could be an earlier term that came to be understood later as "Galilee of the nations" (*see* GALILEE). Attempts to identify Harosheth-ha-goiim with sites either in Galilee or in the Sharon plain are not convincing, but the general location near the scene of the battle by the Kishon is beyond question. Aharoni considers Harosheth-ha-goiim "not a place name at all," preferring to regard it as the forest regions of Galilee (*LBHG*, p. 201). The name appears to be preserved in the Arabic village of *el-Ḥarithiyeh* (*GP*, II, 343f.), but excavations of nearby Tell 'Amr (proposed by Albright, *JPOS*, 2 [1922], pp. 284ff.) indicate that it was not occupied until the 10th cent. B.C. Against Aharoni's suggestion, and the similar one of B. Maisler (Mazar) that the term applied to all of Galilee above the Valley of Esdraelon (*HUCA*, 24 [1952-53], 80f.), is the clear indication in Jgs. 4:2 that Sisera was located (lit. "was dwelling/sitting") at a specific place called Harosheth-ha-goiim.

See *GTTOT*, § 548. W. S. L. S.

HARP [Heb. *nēḇel*, *neḇel*, *k^{e}lî-neḇel*, *kinnôr*; Aram. *p^{e}santērîn* < Gk. *psaltḗrion*; Gk. *kithára*]; AV also PSALTERY, VIOL; NEB also DULCIMER, LUTE, LYRE. *See* MUSIC II.B.

HARPOON [Heb. *śukkâ*] (Job 41:7 [MT 40:31]); AV BARBED IRON. Both harpoons and fishing spears are of little use in catching Leviathan. Other methods of FISHING were by hook and line (Job 41:1 [MT 40:25]) and by net (Eccl. 9:12).

HARROW [Heb. *šāḏaḏ*] (Job 39:10; Isa. 28:24; Hos. 10:11); AV also "break (his) clods." The term generally means to break up and smooth the soil, but it is not known whether the process corresponds to what is involved in modern agriculture. The reasons for this uncertainty are: (1) the ancient Egyptians have left no records of the prac-

tice; (2) even before mechanization was introduced into Palestinian agriculture, it was not too common for harrowing to be performed, though on occasions the ground was leveled after plowing with the threshing-sledge or a log drawn by oxen. Cross-plowing was utilized for breaking up the lumpy soil (cf. the "clods" of Hos. 10:11, AV), particularly at the end of a long, dry summer. The verb *šāḏaḏ* could also refer to the plowing of border furrows, though this is doubtful. Equally uncertain is the view that "harrowing" refers to the dragging of branches over the soil to cover the seed, since the seed was normally sown before plowing. *See* AGRICULTURE III.A.1.

J. A. PATCH R. K. H.

HARROWS [Heb. *ḥārîṣ*] (AV 2 S. 12:31; 1 Ch. 20:3). *See* PICKS.

HARSHA här'shə [Heb. *ḥaršā'*]. Head of one of the families of the temple servants (Ezr. 2:52; Neh. 7:54); 1 Esd. 5:32, "Charea."

HART. *See* DEER.

HARUM här'əm [Heb. *ḥārûm*]. A Judahite (1 Ch. 4:8).

HARUMAPH hə-rōō'maf [Heb. *ḥ^{a}rûmap*] (Neh. 3:10). Father of Jedaiah, who assisted in repairing the walls of Jerusalem under Nehemiah.

HARUPHITE hə-rōō'fīt [Heb. *K ḥ^{a}rîpî, Q ḥ^{a}rûpî*]. In 1 Ch. 12:5 (MT 6) Shephatiah, one of the companions of David, is called a Haruphite. If the *K* be the correct reading, it is connected with HARIPH or perhaps HAREPH.

HARUZ här'əz [Heb. *ḥārûṣ*]. Father of Meshullemeth, the mother of Amon king of Judah (2 K. 21:19).

HARVEST [Heb. *qāṣîr*]; NEB also CROP (Lev. 19:9; Isa. 17:11), VINTAGE (Isa. 18:5); [*m^{e}lē'â*] (Ex. 22:29 [MT 28]); AV "ripe fruits"; [*p^{e}rî*] (Dt. 26:2); AV FRUIT; NEB PRODUCE; [*'ōsep*] (Isa. 32:10); AV GATHERING; NEB PRODUCE; [*t^{e}ḇû'â*] (Gen. 47:24; Jer. 2:3; 12:13); AV INCREASE, REVENUE; NEB also CROP; [Gk. *therismós*]; NEB also CROP; [*karpós*] (Rom. 1:13; Jas. 3:18); AV FRUIT; NEB also "(achieving) something"; [*génnēma*] (2 Cor. 9:10); AV FRUIT. For the Hebrew people — and indeed for any people engaged in agriculture — harvest was a most important season (Gen. 8:22; 45:6; *see* CALENDAR II.B.1 for a discussion of the Gezer Calendar, a tenth-century B.C. text that mentions three harvests). Events were reckoned from harvests (Gen. 30:14; Josh. 3:15; Jgs. 15:1; Ruth 1:22; 2:23; 1 S. 6:13; 2 S. 21:9; 23:13). Harvest time came to be the occasion for festivals and rejoicings on the part of all the people (Ex. 34:22; Isa. 9:3 [MT 2]). Harvest was more than a merely material and self-centered order, for from early times it was associated with requirements with respect to God and mankind. On the one hand the first fruits of the harvest must be offered to Yahweh (Ex. 22:29; Lev. 23:10); and on the other hand the harvester must leave a corner of his field without harvesting it, setting it aside for the poor person and the stranger (Lev. 19:9; 23:22; Dt. 24:19).

The three principal feasts of the Jews corresponded to the three harvest seasons (Ex. 23:16; 34:21f.): (1) the Feast of the Passover in April at the time of the barley harvest (cf. Ruth 1:22); (2) the Feast of Pentecost seven weeks later at the wheat harvest (Ex. 34:22); and (3) the Feast of Tabernacles at the end of the year (October) during the fruit harvest (Lev. 23:24). Olives were harvested from the middle of September to the middle of November by beating the trees with long sticks (Dt. 24:20; Isa. 17:6). Flax was harvested in March and April by cutting it off near the ground and then laying the stalks out to dry (Josh. 2:6).

There has been little change in the seasons since biblical days. Between the reaping of the barley in April and the wheat in June, most of the cereals are harvested. The grapes begin to ripen in August, but the gathering-in for making wine and molasses and the storing of the dried figs and raisins are at the end of September. Between the barley harvest and the wheat harvest only a few showers fall. They are welcomed because they increase the yield of wheat (cf. Am. 4:7). Samuel made use of the unusual occurrence of rain during the wheat harvest to strike fear into the hearts of the people (1 S. 12:17). From the wheat harvest until the fruit harvest no rain falls (2 S. 21:10; Jer. 5:24; cf. Prov. 26:1). The harvesters long for cool weather during the reaping season (cf. Prov. 25:13).

A sickle was used to cut the grain (Joel 3:13 [MT 4:13]; Dt. 16:9; Mk. 4:29), or it was pulled up by the roots. The latter method was practiced in both Palestine and Egypt. However, excavations have revealed evidence that the use of the sickle goes back to very early times. The grain stalks were usually cut about a foot beneath the head, and in some cases even higher (Job 24:24). The reaper grasped them in handfuls (Ruth 2:16), reaped them with his arm (Isa. 11:5), and laid them behind him. The binder then followed gathering them, as Ps. 129:7 says, into "his bosom." Then they were tied with straw into sheaves (Gen. 37:7) and set in heaps (Rev. 2:7).

A number of definite laws were instituted regarding the harvest. GLEANING was forbidden (Lev. 19:9; 23:22; Dt. 24:19). The children of Israel were enjoined to reap no harvest for which they had not labored (Lev. 25:5). The law that required the first fruits to be presented to Yahweh (Lev. 23:10) has continued through the centuries, and Christians in Syria who own vineyards bring their first bunches of grapes to the church.

The figurative use of harvest occurs frequently in Scripture. A destroyed harvest typified devastation or affliction (Job 5:5; Isa. 16:9; 17:11; Jer. 5:17; 50:16). The "time of harvest" frequently meant the day of destruction (Jer. 51:33; Hos. 6:11; Joel 3:13). "Joy in harvest" typified great joy (Isa. 9:3) and "harvest of the Nile" meant an abundant harvest (Isa. 23:3). "The harvest is past" meant that the appointed time was gone (Jer. 8:20). Yahweh chose the most promising time to cut off the wicked, namely, "when there is a cloud of dew in the heat of harvest" (Isa. 18:4f.). This occurrence of hot misty days just before the ripening of the grapes is still common and is welcomed because it hastens the harvest. In Proverbs the harvesting of the ant is mentioned as a lesson for the sluggard (6:8; 10:5; 20:4).

In the Gospels Jesus frequently refers to the harvest of souls (Mt. 9:37; 13:30; Mk. 4:29; Jn. 4:35). In explaining the parable of the tares Jesus spoke figuratively of the harvest as the end of the world (Mt. 13:39; cf. Rev. 14:15). Here the law of correspondence between sowing and reaping finds its perfect expression. The fruits of our actions will reach their full maturity only in the day when God Himself shall reap them. The task of separating the wheat from the tares is not entrusted to God's servants but to the divine harvesters (Mt. 13:30). So the time of harvest is in God's hands, but to mankind is committed the time of sowing, and the harvest is determined by what is sown. "For he who sows to his own flesh will from the flesh reap corruption; but he who sows to the Spirit will from the Spirit reap eternal life" (Gal. 6:8).

Various stages of the harvest: threshing and separating the grain from the straw (top); measuring the grain (center); carrying away the grain and picking flax (bottom, right to left). Mural from the tomb of Nakht at Thebes (15th cent. B.C.) (Service des musées, Cairo; picture Lehnert and Landrock)

HASADIAH has-ə-dī'ə [Heb. *ḥᵃsaḏyâ*–'Yahweh is kind'; Gk. *Asadias* (Bar. 1:1)]. A son of Zerubbabel (1 Ch. 3:20).

HASENUAH has-ə-nū'ə (1 Ch. 9:7, AV). *See* HASSENUAH.

HASHABIAH hash-ə-bī'ə [Heb. *ḥᵃšaḇyâ*].

1. Two Levites of the family of Merari (1 Ch. 6:45; 9:14).

2. A Levite who dwelt in Jerusalem at the time of Nehemiah (Neh. 11:15).

3. A son of Jeduthun (1 Ch. 25:3, 19).

4. A Hebronite, chief of a clan of warriors who had charge of West Jordan in the interests of Yahweh and the king of Israel (1 Ch. 26:30).

5. A Levite who was a "ruler" (1 Ch. 27:17).

6. One of the Levite chiefs in the time of Josiah, who gave liberally toward the sacrifices (2 Ch. 35:9). In 1 Esd. 1:9, the AV has "Assabias," the NEB "Sabias."

7. A Levite whom Ezra induced to return from exile with him (Ezr. 8:19). The AV in 1 Esd. 8:48 has "Asebia," NEB "Asebias."

8. One of the twelve priests set apart by Ezra to take care of the gold, the silver, and the vessels of the temple

on their return from exile (Ezr. 8:24). In 1 Esd. 8:54 the AV has "Assanias," the NEB "Asamias."

9. Ruler of half of the district of "Keilah," who helped to repair the walls under Nehemiah (Neh. 3:17), and also helped to seal the covenant (Neh. 10:11 [MT 12]; 12:24).

10. A Levite (Neh. 11:22).

11. A priest (Neh. 12:21).

12. A layman who divorced his foreign wife (Ezra 10:25). The AV Malchijah and NEB Malchiah follow the MT, while the RSV follows the LXX and 1 Esd. 9:26. J. J. REEVE

HASHABNAH hə-shab'nə [Heb. *ḥᵃšaḇnâ*]. One who sealed the covenant under Nehemiah (Neh. 10:25 [MT 26]).

HASHABNEIAH hash-ab-nə-ī'ə [Heb. *ḥᵃšaḇnᵉyâ*]; AV, NEB, HASHABNIAH.

1. Father of one of the builders of the wall (Neh. 3:10).

2. A Levite mentioned in connection with the prayer preceding the signing of the covenant (Neh. 9:5); possibly identical with HASHABIAH **7, 8, 9,** or **10.**

HASH-BADDANAH hash-bə-dā'nə [Heb. *ḥašbaddānâ*]; AV HASHBADANA. Probably a Levite. He was one of those who stood at Ezra's left hand when he read the law, and helped the people to understand the meaning (Neh. 8:4). 1 Esd. 9:44 has "Nabariah" (Gk. *Nabareias*; AV NEB, NABARIAS).

HASHEM hā'shem [Heb. *hāšēm*] (1 Ch. 11:34). A Gizonite, one of David's thirty heroes. The AV and the RSV in the par. passage, 2 S. 23:32, have "sons of JASHEN."

HASHMONAH hash'mō-nə [Heb. *ḥašmōnâ*–'fatness'). A desert camp of the Israelites between Mithkah and Moseroth (Nu. 33:29f.). *See* WANDERINGS OF ISRAEL.

HASHUB hash'əb. *See* HASSHUB.

HASHUBAH hə-shōō'bə [Heb. *ḥᵃšuḇâ*–'consideration(?)']. One of the sons of Zerubbabel (1 Ch. 3:20).

HASHUM hā'shəm [Heb. *ḥāšum*].

1. In Ezr. 2:19; Neh. 7:22, "sons of Hashum" are mentioned among the returning exiles. In Ezr. 10:33 (also 1 Esd. 9:33; AV, NEB, ASOM), members of the same family are named among those who married foreign wives.

2. One of those who stood on Ezra's left at the reading of the law (Neh. 8:4; 1 Esd. 9:44, "Lothasubus"). The signer of the covenant (Neh. 10:18 [MT 19]) is possibly the same.

HASIDEANS has'ə-dē'ənz; **HASIDIM** has-ə-dēm' [Heb. *ḥᵃsîḏîm*; Gk. *hasidaioi*]; AV ASSIDEANS. The Hebrew term is a masculine plural of *ḥāsîḏ*; it frequently means "pious" in the OT and is usually translated "SAINTS" (cf. 2 Ch. 6:41; Ps. 30:4 [MT 5]; 31:23 [MT 24]; 37:28; 50:5; etc.). The Greek term, a transliteration of the Hebrew, is never used in canonical Scripture, though it is used in the Apocrypha (1 Macc. 2:42; 7:13; 2 Macc. 14:6). The Hasideans were pious Jews who staunchly defended the law against the encroachments of Hellenism.

Although they are not mentioned before the Maccabean struggle, it seems that the Hasideans were already in existence. Soon after the Maccabees revolted against Antiochus IV Epiphanes' demands that the Jews give up their ancestral worship of Yahweh, "there united with them a company of Hasideans, mighty warriors of Israel, every one who offered himself willingly for the law" (1 Macc. 2:42). After the death of Mattathias, the Hasideans recognized the leadership of Judas Maccabeus (son of Mattathias) and fought with him against the Hellenistic intrusion into the Jews' worship of God. The Maccabees fought and won many difficult battles against Antiochus Epiphanes' forces. In 163 B.C., however, the Syrian forces had laid siege to Jerusalem. Judas Maccabeus was in a desperate situation because of a food shortage due to a Sabbatical Year. Fortunately, because of internal problems due to Antiochus's death, the Syrians were anxious to make a peace treaty with Judas and guaranteed the Jews religious freedom (1 Macc. 6:28-63).

Having achieved religious freedom, Judas also wanted to gain political freedom. The Hasideans did not agree with Judas in this. In fact, in 161 B.C., when Alcimus was selected as high priest by the Syrians and came to Jerusalem with General Bacchides, the Hasideans sought to establish peace with Alcimus and Bacchides and thus split from Judas's ranks. Although the reason for this move is not given, it is probable that the Hasideans were satisfied that Alcimus was from the Aaronic line and that the Syrians had guaranteed them freedom of worship. Alcimus, however, who had promised no harm to the Hasideans, seized and slew sixty of them. Hence, they turned against him and returned to Judas (1 Macc. 7:10-18; Josephus *Ant.* xii.10.2 [393-97]). Alcimus asked the Syrians for more military help against Judas and the Hasideans, who were causing trouble and thus preventing tranquillity in the kingdom (2 Macc. 14:6).

After this, nothing is explicitly heard of them. It is thought by most scholars that they were the forerunners of the Pharisees and the Essenes.

HASIDIM has-ə-dēm'. *See* HASIDEANS; SAINTS.

HASMONEANS haz'mə-nē'ənz [Gk. *Asamomaios*; Heb. *ḥašmônay*]. In the broader sense the term Hasmonean refers to the whole "Maccabean" family (*see* MACCABEES). According to Josephus (*Ant.* xii.6.1 [265]), Mattathias, the first of the family to revolt against Antiochus IV's demands, was the great-grandson of Hashman. This name may have derived from the Heb. *ḥašmān*, perhaps meaning "fruitfulness," "wealthy." Hashman was a priest of the family of Joarib (cf. 1 Macc. 2:1; 1 Ch. 24:7). The narrower sense of the term Hasmonean has reference to the time of Israel's independence beginning with Simon, Mattathias's last surviving son, who in 142 B.C. gained independence from the Syrian control, and ending with Simon's great-grandson Hyrcanus II, who submitted to the Roman general Pompey in 63 B.C. Remnants of the Hasmoneans continued until A.D. 100.

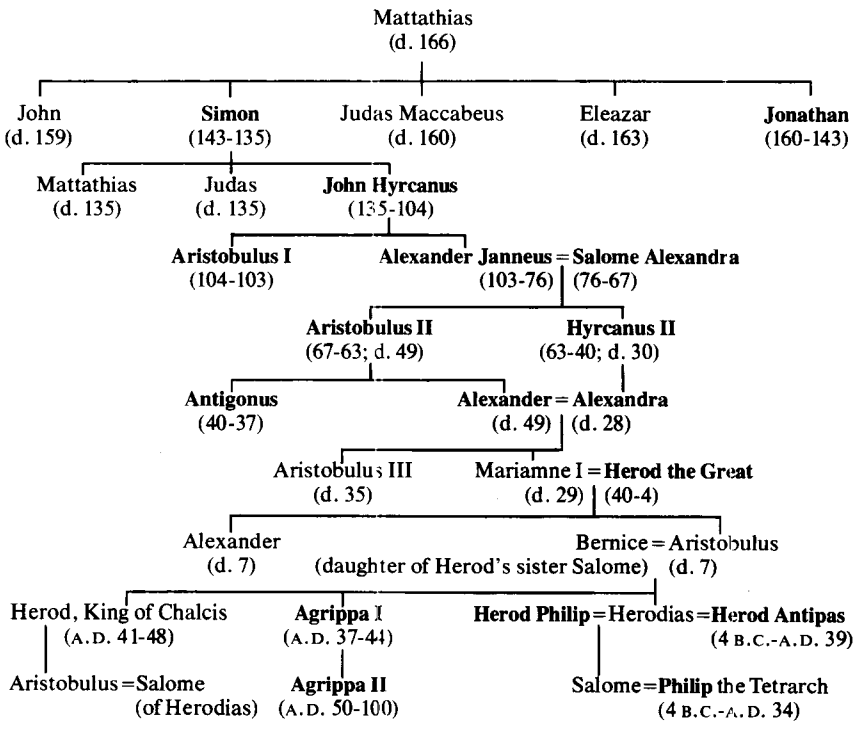
I. Revolt of the Maccabees.–The Hasmonean name does not occur in the books of Maccabees, but appears in Josephus several times (*Ant.* xi.4.8 [111]; xii.6.1 [265]; xiv.16.4 [490f.]; xv.11.4 [403]; xvi.7.1 [187]; xvii.7.3 [162]; xx.8.11 [190]; 10.3 [238]; 10.5 [247, 249]; *BJ* i.7 [19]; 1.3 [36]; *Vita* 1 [2, 4]) and once in the Mishnah (*Middoth* i.6). These references include the whole Maccabean family beginning with Mattathias. In 166 B.C. Mattathias, the aged priest in Modein, refused to obey the order of Antiochus IV's envoy to sacrifice to the heathen gods, and instead slew the envoy and a Jew who was about to comply. He then destroyed the altar and proclaimed, "Let every one who is zealous for the law and supports the covenant come out with me" (1 Macc. 2:15-27; *Ant.* xii.6.1-2 [265-272]; Dnl. 11:32-35). Mattathias and his five sons fled to the mountains. This marked the beginning of the Maccabean revolt. They waged war against the Jews who complied with Antiochus, tore down heathen altars, circumcised children who had been left uncircumcised, and exhorted all Jews to follow in their struggle. Mattathias died (166 B.C.) and left the crusade in the hands of his third son Judas, with whom a new era of fighting commenced (1 Macc. 2:42-70; *Ant.* xii.6.2-4 [273-286]).

Judas was very able and at Emmaus defeated the three generals sent by the Syrian regent Lysias and at Beth-zur defeated Lysias himself (1 Macc. 4:1-35; *Ant.* xii.7.4f. [305-315]). Judas had regained the entire country and this allowed him to restore the worship in the temple in Jerusalem. On Chislev 25 (14 December, 164 B.C.), exactly three years after its desecration, the temple with its altar was rededicated and the daily sacrifices were reinstituted (1 Macc. 4:36-59; 2 Macc. 10:1-8; *Ant.* xii.7.6f. [316-326]). This marked the commencement of the Jewish Feast of Dedication or Lights (Heb. *ḥ^anûkkâ*).

Judas continued to fight Lysias. Finally in 163 B.C. Lysias had laid siege to Jerusalem. Because of adverse situations on both sides, Lysias and Judas made peace and guaranteed religious freedom for the Jews (1 Macc. 6:28-63). But Judas also wanted to have political freedom and continued in this struggle until his death at Eleasa in 160 B.C. (1 Macc. 7:14–9:22; *Ant.* xii.9.7–11.2 [384-434]). This brought disarray to Maccabean forces and the Hellenists were temporarily in control under the leadership of the Syrian general Bacchides.

Judas's brother Jonathan (fifth son of Mattathias) continued the guerilla warfare against Hellenism. In 157 B.C. Jonathan's defeat of Bacchides at Beth-basi (10 km. [6 mi.] S of Jerusalem) resulted in a peace treaty, and Bacchides returned to Antioch. This weakened the Hellenists and because of the internal struggles of Syria Jonathan gained strength for the next five years (1 Macc. 9:23-73; *Ant.* xiii.1.1-6 [1-34]). In 152 B.C. Syria had further internal struggles when Alexander Balas, who claimed to be the son of Antiochus IV, challenged the Seleucidian king Demetrius I. In 150 B.C. Alexander Balas won and made Jonathan a general, governor, and high priest of Judah (the king of Syria selected the high priest but none had been chosen since the death of Alcimus in May, 159 B.C.) and considered Jonathan one of his chief friends (1 Macc. 10:22-66; *Ant.* xiii.2.3f. [46-61]; 4.1f. [80-85]). This was a strange combination: Alexander Balas, professed son of Antiochus Epiphanes, was in league with a Maccabean! Alexander Balas's rule was challenged by Demetrius's son, Demetrius II Nicator, in 147 B.C. and Balas was

THE MACCABEES AND THE HASMONEANS (166 B.C.-A.D. 100)



Rulers' names are in boldface.

finally defeated in 145 B.C. Demetrius II confirmed Jonathan's high priesthood and gave Jonathan the three districts of southern Samaria that he had requested. In 143 B.C. Demetrius II's army rebelled, and Diodotus Tryphon (a general of Alexander Balas) claimed the Syrian throne for Alexander Balas's son, Antiochus VI. Jonathan took advantage of the situation and sided with Tryphon, who in turn made Jonathan head of the civil and religious affairs and his brother Simon head of the military. Tryphon, however, fearful of Jonathan's success, deceived him, arranged a meeting with him, and subsequently killed him (1 Macc. 10:67–13:30; *Ant.* xiii.4.3–6.6 [86-212]).

II. Rule of the Hasmoneans.–A new phase of the Maccabean rule had emerged. Although the term "Hasmonean" is sometimes applied to the whole of the Maccabean family, it is more strictly applied to the high-priestly house, from the time of Simon to 63 B.C. The reason for this is that the Maccabean dream had finally come true, namely, that the Israelites had become politically and religiously an independent nation.

Judas had already achieved religious freedom, and Jonathan had become both the religious leader, by being appointed high priest, and the political leader, by becoming the sole ruler over Judea and by ousting the Hellenistic elements. Simon attempted and achieved complete independence from the Seleucid rule. This independence endured until Rome's intervention in 63 B.C.

A. Simon (143-135 B.C). Simon, the second oldest son of Mattathias, succeeded his younger brother Jonathan. There was a great upheaval in Syria because Tryphon killed Antiochus VI and reigned in his stead as a rival to Demetrius II (1 Macc. 13:31f.; *Ant.* xiii.7.1 [218-222]; Diodorus xxxiii.28.1; Livy *Epit.* lv; Appian *Syr.* 68; Justinus xxxvi.1.7). Because of the dastardly act of Tryphon against Simon's brother, Simon naturally attached himself to Demetrius II on the condition of Judea's complete independence. Since Demetrius II no longer controlled the southern parts of the Syrian empire, he extended to Simon complete exemption from past and future taxation. The significance of this is that the gentile yoke over Israel had been removed for the first time since the Babylonian Captivity, and Judea's political independence meant that they could write their own documents and treaties. This was in 142 B.C. (1 Macc. 13:33-42; *Ant.* xiii.6.7 [213f.]).

In order to insure the security of the new independent state, Simon took two actions. First, because of the possible threat of Tryphon, Demetrius II's rival, Simon seized the fortress of Gazara (Gezer) between Jerusalem and Joppa, expelling the Gentiles and replacing them with Jews, and appointed his son John Hyrcanus as governor (1 Macc. 13:43-48, 53; 16:1, 21; *Ant.* xiii.6.7 [213-17]). Second, Simon shortly afterward captured the fortress of Acra in Jerusalem. Acra had never been in the hands of the Maccabeans but had been in the control of the hellenizers for more than forty years, serving as a reminder of the Syrian control. With the last vestige of Syrian control overthrown, the Acra was purified on the twenty-third day of the second month in 141 B.C. (3 June, 141 B.C.) (1 Macc. 13:49-52; *Ant.* xiii.6.7 [215-17]). Like his brothers Judas (1 Macc. 8:17) and Jonathan (1 Macc. 12:1), Simon made a peace treaty with Rome and Sparta, who guaranteed the freedom of worship.

In commemoration of Simon's achievement, in 140 B.C. (Sept. 13) the Jews conferred upon him the position of leader and high priest forever until a faithful prophet should arise (1 Macc. 14:25-40, esp. v. 41). The high priesthood formerly belonged to the house of Onias but this had come to an end in 174 B.C. The Syrian kings had selected the intervening high priests, namely, Menelaus, Alcimus, and Jonathan. But now the Jews appointed Simon and his descendants as successors of the high priesthood. This marked the beginning of the Hasmonean dynasty, in that Simon and his successors had both the priestly and political power vested in their persons, and thus had far greater power than the political power of Judas and Jonathan or the religious power of the family of Onias.

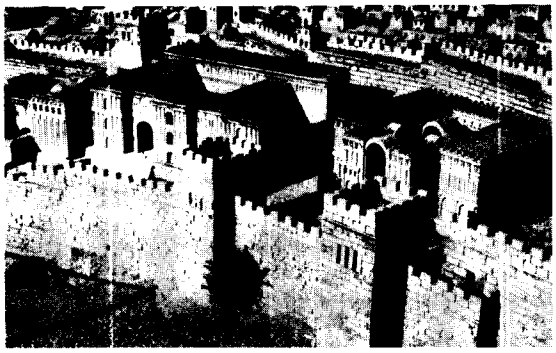
In 139 B.C. Demetrius II was captured by the Parthians. In Demetrius II's place his brother Antiochus VII Sidetes took up the struggle against Tryphon. He invited Simon's help in his struggle against Tryphon by confirming to him all the rights and privileges already granted to him with the additional right to strike his own coins. Simon, however, refused the invitation. When Tryphon finally fled and committed suicide, Antiochus VII turned his attention to Simon. He accused Simon of unlawful expansion and demanded the surrender of Joppa, Gazara, and the Acra in Jerusalem along with tribute he received from the captured cities outside of Judea. If Simon refused these demands, he could pay an indemnity of one thousand talents. Simon refused to comply because he insisted that all these territories were rightly a part of Judea. Antiochus VII sent his general, Cendebeus, but was defeated by Simon's two sons, Judas and John Hyrcanus (1 Macc. 15:1-14, 25–16:10; *Ant.* xiii.7.2f. [223-27]; *BJ* i.2.2 [50-53]). This brought peace to Judea.

Finally, in 135 B.C. Simon and his two sons, Mattathias and Judas, were slain at a banquet near Jericho by his son-in-law Ptolemy, who had been appointed governor over the plain of Jericho but had ambitions for greater power. Ptolemy sent men to kill Simon's second son, John Hyrcanus, at his residence in Gazara (where, also, he was the military governor). John, however, being warned of their coming, captured and killed them. John Hyrcanus went to Jerusalem and was well received (1 Macc. 16:11-23; *Ant.* xiii.7.4–8.1 [228-235]; *BJ* i.2.3f. [54-60]).

Simon's rule of eight years (*Ant.* xiii.7.4 [228]) had accomplished much for the Jews. He brought independence both politically and religiously. He had extended the boundaries of the nation, gained control over the land, and brought peace to the people whereby "each man sat under his vine and his fig tree, and there was none to make them afraid" (1 Macc. 14:4-15).

B. John Hyrcanus (135-104 B.C.). John Hyrcanus succeeded his father as high priest and ruler of the people. In the first year of his reign he had trouble because Antiochus VII, who had failed to take over Judea under Simon, asserted his claim of ruler over Judea, seized Joppa and Gazara, ravaged the land, and finally besieged Jerusalem for more than a year. With food supplies dwindling, Hyrcanus asked for a seven-day truce in order to celebrate the Feast of Tabernacles. Antiochus not only complied but also sent gifts to help them in their celebration. This action indicated Antiochus's willingness to negotiate a peace settlement. The result was that the Jews had to hand over their arms; pay heavy tribute for capture and possession of Joppa and other cities bordering on Judea; and give hostages, one of whom was Hyrcanus's brother. The walls of Jerusalem were destroyed, but the Syrians could not establish a garrison in Jerusalem (*Ant.* xiii.7.4–8.3 [228-248]; *BJ* i.2.5 [61]). The independence won by Jonathan and Simon was destroyed by a single blow, though only because Syria could concentrate its efforts. In 130 B.C., however, Antiochus VII became involved in a campaign against the Parthians that resulted in his death in 129 B.C. Demetrius II, released by the Parthians, again gained control of Syria (129-125 B.C.), but because of the troubles within Syria Demetrius II was unable to bother Hyrcanus. Hyrcanus renewed the alliance with

HASMONEANS



The Hasmonean palace, originally built by Hyrcanus I; part of M. Avi-Yonah's Jerusalem Temple Model (W. S. LaSor)

Rome whereby Rome confirmed his independence and warned Syria against any incursion into Hyrcanus's territory. Also, Hyrcanus's payment of indemnity for Joppa and other cities ceased. The long struggle between the Hasmoneans and the Seleucids came to an end (*Ant.* xiii.9.2 [259-266]). Hyrcanus took advantage of the situation and extended his borders to the east by conquering Medeba in Transjordan, to the north by capturing Shechem and Mt. Gerizim and by destroying the Samaritan temple at Mt. Gerizim (128 B.C.), and to the south by taking over the Idumean cities of Adora and Marisa, where he forced the Idumeans to be circumcised and to obey the Jewish law or emigrate (*Ant.* xiii.8.4–9.1 [249-258]; *BJ* i.2.6f. [62-66]). Later in 109 B.C. Hyrcanus and his sons conquered Samaria and thus were able to occupy the Esdraelon Valley all the way up to Mt. Carmel (*Ant.* xiii.10.2f. [275-283]; *BJ* i.2.7 [64-66]). Hyrcanus's independence was further demonstrated by the minting of coins bearing his own name, an unprecedented action for a Jewish king (110/109 B.C.).

With Hyrcanus's successes came a rift between him and the Pharisees. Although the origins of the Pharisees and the Sadducees are somewhat obscure, they were well established and influential by the time of Hyrcanus's reign. The Pharisees, who were descendants of the Hasideans, were somewhat indifferent to the political success of the Hasmoneans and felt that the high priesthood had become worldly by hellenization and secularization. Hence they questioned whether Hyrcanus should be the high priest. The Sadducees, however, a party of mostly wealthy priestly aristocracy, were antagonistic toward the Pharisees and sided with Hyrcanus. Consequently, Hyrcanus joined in with the Sadducees. This indicates both the thinking of the Sadducees and the decline of the office of the high priest (*Ant.* xiii.10.5f. [288-296]; T.B. *Berakhoth* 29a).

After thirty-one years of rule Hyrcanus died peacefully (104 B.C.), leaving five sons (*Ant.* xiii.10.7 [299f.]; *BJ* i.2.8 [67-69]).

C. Aristobulus I (104-103 B.C.). Hyrcanus desired that his wife would head the civil government while his oldest son Aristobulus I would be the high priest. Displeased with this, Aristobulus imprisoned all his brothers except Antigonus, who shared in ruling until Aristobulus became suspicious and had him killed. Aristobulus's rule lasted only a year, but he was able to conquer Galilee, whose inhabitants he compelled to be circumcised. Aristobulus died of a severe illness (*Ant.* xiii.11.1-3 [301-319]; *BJ* i.3.1-6 [70-84]).

D. Alexander Janneus (103-76 B.C.). On the death of Aristobulus, his wife Salome Alexandra released his three brothers, one of whom was Alexander Janneus, from prison. She appointed him as king and high priest and subsequently married him, though he was thirteen years her junior (*Ant.* xiii.12.1 [320-24]; *BJ* i.4.1 [85]). This marriage was against the law, for the high priest was to marry only a virgin (Lev. 21:13f.) Alexander Janneus endeavored to follow in the footsteps of his father and brother in territorial expansion. He captured the coastal Greek cities from Carmel to Gaza (except Ascalon), compelling the inhabitants to follow the Jewish law. He was successful in his conquests in Transjordan and the south, so that the size of his kingdom was equal to that of David and Solomon (*Ant.* xiii.12.2–13.4 [324-371]; *BJ* i.4.2 [86f.]).

There were, however, real conflicts within his domain. The Pharisees saw that the Hasmoneans were deviating more from their ideals, for Alexander Janneus was a drunkard who loved war and was allied with the Sadducees. Tension came to a head at a celebration of the Feast of Tabernacles when Alexander Janneus poured the water libation over his feet instead of on the altar as prescribed by the Pharisaic ritual. The people, enraged, shouted and pelted him with lemons. Alexander ordered his mercenary troop to attack, and six thousand Jews were massacred (*Ant.* xiii.13.5 [372-74]; *BJ* i.4.3 [88f.]; T.B. *Sukkah* 48b). This act brought great bitterness, and the people awaited an opportunity for revenge.

The time came in 94 B.C. when Alexander Janneus attacked Obedas king of the Arabs, but suffered a severe defeat and barely escaped with his life. Upon his return to Jerusalem the people turned against him; with the help of foreign mercenaries Alexander Janneus fought six years against his people, slaying no less than fifty thousand Jews. The Pharisees finally in 88 B.C. called upon the Seleucid Demetrius III Eukairos to help them. Wars bring strange allies, for the descendants of the Hasideans asked the descendants of Antiochus Epiphanes to aid them in their fight against the descendants of the Maccabees! Alexander Janneus was defeated at Shechem and fled to the mountains. Six thousand Jews, however, realizing that their national existence was threatened, sided with Alexander Janneus because they felt it the lesser of two evils to side with him in a free Jewish state than to be annexed to the Syrian empire. But when Alexander Janneus reestablished himself, he forced Demetrius to withdraw, and he ordered eight hundred Pharisees to be crucified and their wives and children to be killed before their eyes while he was feasting and carousing with his concubines. Because of these atrocities eight thousand Jews fled the country (*Ant.* xiii.13.5–14.2 [375-383]; *BJ* i.4.4-6 [90-98]).

After this there were upheavals in the Seleucid empire that affected Alexander Janneus. The Nabateans were becoming strong and opposed a Seleucid rule. Around 85 B.C. the Nabatean king Aretas invaded Judea, and Alexander Janneus retreated to Adida (32 km. [20 mi.] NW of Jerusalem), but Aretas withdrew after coming to terms with Janneus. From 83 to 80 B.C. he was successful in his campaign in the east, conquering Pella, Dium, Gerasa, Gaulana, Seleucia, and Gamala. The last three years of his life (79-76 B.C.) he contracted an illness due to his overdrinking, and when he died he was buried with great pomp (*Ant.* xiii.14.3–16.1 [384-406]; *BJ* i.4.7f. [99-106]).

E. Salome Alexandra (76-67 B.C.). On his deathbed, Alexander Janneus appointed his wife, Salome Alexandra, as his successor. Because the Law barred a woman from the priesthood, Salome selected her oldest son Hyrcanus II as the high priest. This did not please her younger son Aristobulus II, who was ambitious for power. Alexander Janneus also advised his wife to make peace with the Pharisees since they controlled the mass of the people. She followed his advice and this marked the revival of the Pharisaic influence. This change was not difficult since her brother, Simeon ben Shetah, was the leader of the

Pharisees. It soon became obvious that though she had the title, the Pharisees were really the power behind the throne. The Pharisees reintroduced Pharisaic legislation that had been abandoned by John Hyrcanus a few years earlier. Also, the Pharisees sought revenge for the slaughter of the eight hundred Pharisees, their wives, and their children during Alexander Janneus's reign, and thus put to death some of those who had advised Alexander Janneus in this atrocity. The Sadducees, who saw that as an attack on them, sent a delegation to Alexandra to protest this revenge. One of the delegates was her son Aristobulus II, who openly sided with the Sadducees against the Pharisees. With Alexandra's permission, the Sadducees were allowed to leave Jerusalem and to take control of several fortresses in various areas of the land. With Aristobulus II as their military leader, Hyrcanus II complained to Alexandra of Aristobulus's strength. When Alexandra became sick, Aristobulus II realized that he must win support if he, rather than Hyrcanus II, were to gain the throne. Aristobulus II left Jerusalem to enlist support of the surrounding cities, and within fifteen days he had the support of most of the country and control of twenty-two fortresses. Hyrcanus II and his advisers became alarmed and sought Alexandra's advice. She wanted Hyrcanus II to succeed her, but before anything could be done she died. Her reign was marked with peace both at home and abroad, except for the family turmoil (*Ant.* xiii.15.6–16.6 [399-432]); *BJ* i.5.1-4 [107-119]).

F. Aristobulus II (67-63 B.C.). With Alexandra's death Hyrcanus II assumed the positions of king and high priest. This, however, was short-lived, for Aristobulus II declared war on him. With many of Hyrcanus II's soldiers deserting him, Hyrcanus II fled to Jerusalem's citadel (later known as Fortress Antonia) and finally was forced to surrender. The two brothers agreed that Hyrcanus II was to relinquish his positions as king and high priest to Aristobulus II and to retire from public life and that Aristobulus II was to leave Hyrcanus II's revenue undisturbed. Hyrcanus II ruled for only three months.

Hyrcanus II was willing to accept this, but the Idumean Antipater II (the son of Antipater I, who had been appointed governor of Idumea by Alexander Janneus, and the father of Herod the Great) had other plans for him. Antipater realized that Hyrcanus II was a weak and idle man and that he could control him. Yet he himself could not be the high priest because he was an Idumean. Antipater convinced Hyrcanus II that Aristobulus unlawfully took the throne and that Hyrcanus II was the legitimate king. Furthermore, he convinced him that Hyrcanus II's life was in danger, and so he traveled by night from Jerusalem to Petra, the capital of Edom. Aretas was willing to help Hyrcanus II on the condition that he would give up the twelve cities of Moab taken by Alexander Janneus. Hyrcanus and Aretas having agreed, Aretas attacked Aristobulus II, who was defeated and retreated to the temple mount at the time of Passover in 65 B.C. Many people sided with Hyrcanus II (*Ant.* xiv.1.2–2.2 [4-28]; *BJ* i.6.1f. [120-26]; cf. also Justin Martyr *Dial.* lii; Eusebius *HE* i.6.2; 7.11; T.B. *Baba Bathra* 3b-4a; *Kiddushin* 70a).

Meanwhile the Roman army under Pompey was moving through Asia Minor after defeating Mithridates in 66 B.C. Pompey sent Scaurus to Syria, and upon his arrival at Damascus he heard of the dispute between the two brothers. When he had hardly arrived in Judea, both brothers sent emissaries asking for support. Aristobulus II offered four hundred talents, and Hyrcanus II followed suit, but Scaurus accepted Aristobulus II, for he felt he would be able to pay. He commanded Aretas to withdraw or else be declared an enemy of Rome. He pursued Aretas, inflicting a crushing defeat, and then returned to Damascus. Shortly after, Pompey arrived in Damascus, and three envoys approached him: one from Hyrcanus II who complained that Aristobulus II seized the power unlawfully; a second from Aristobulus II who claimed he was justified in his actions and that his brother was incompetent to rule; and a third from the Pharisaic element who asked for the abolition of the Hasmonean rule and the restoration of the high-priestly rule. Pompey wanted to delay his decision until after the Nabatean campaign.

Aristobulus II, displeased with this, quit fighting for Pompey against the Nabateans. Pompey dropped the Nabatean expedition and went after Aristobulus II. Aristobulus II lost heart and Pompey asked for the surrender of Jerusalem in exchange for Pompey's dropping his hostilities. Pompey's general Gabinius was sent to Jerusalem but was barred from the city. Pompey was outraged and attacked the city. Within the city Aristobulus II's followers wanted to defend themselves while Hyrcanus II's followers wanted Pompey as an ally and wanted to open the gates. Because the majority were with Hyrcanus II, the gates were opened, but Aristobulus II's men held out at the temple mount. After a three-month siege, Pompey entered the temple mount, and twelve thousand Jews were killed (autumn of 63 B.C.). Pompey entered the holy of holies, but he did not disturb it. In fact, on the following day he gave orders for cleansing it and for resuming the sacrifices there. Hyrcanus II was reinstated as high priest, and Aristobulus II, his two daughters and two sons, Alexander and Antigonus, were taken to Rome as prisoners of war. Alexander escaped. In the triumphal parade in 61 B.C. Aristobulus II was made to walk before Pompey's chariot.

This marked the end of the seventy-nine years (142-63 B.C.) of independence of the Jewish nation as well as the end of the Hasmonean house. Hyrcanus II, the high priest, was merely a vassal of the Roman empire (*Ant.* xiv.2.3–4.5 [29-79]; *BJ* i.6.3–7.7 [128-158]; Tacitus *Hist.* v.9; Appian *Mithridactic Wars* 106,114; Florus i.40.30; Livy 102; Plutarch *Pompey* xxxix; cf. Dio Cassius xxxvii.15-17).

III. Demise of the Hasmoneans.–The loss of independence brought about the decline of the Hasmoneans. Their power was weakened and what power they had was gradually being transferred to the Herods (*see* HEROD).

A. Hyrcanus II (63-40 B.C.). Although Hyrcanus II was reappointed high priest, Antipater was the power behind the throne who was responsible for Hyrcanus II's position and honor. Antipater proved himself useful to the Romans in government. On the other hand, the Romans helped Antipater quell troubles caused by some of the Hasmoneans. Aristobulus II's family bitterly resented Rome's favoring Hyrcanus II over his brother Aristobulus II, and they made attempts to regain his status of high priest and political ruler. In 57 B.C., while Alexander (son of Aristobulus II), a Roman prisoner, was being taken to Rome, he escaped and succeeded in collecting an army of ten thousand heavily armed soldiers and one thousand four hundred horsemen, but he was finally defeated by Gabinius, the new Roman governor of Syria, and Mark Antony. In 56 B.C. Aristobulus II and his other son Antigonus escaped from their Roman imprisonment and caused a revolt in Judea, but a Roman detachment attacked his little band and they were driven across the Jordan. Although attempting to defend themselves in Machaerus, Aristobulus II and Antigonus had to yield after two days and they were again sent to Rome as prisoners. The Roman Senate decided to keep Aristobulus II in prison but released his two sons, Alexander and Antigonus, because of their mother's helpfulness toward Gabinius. They returned to Judea. In 55 B.C. Alexander revolted again and won many people to his side, but this

was quickly brought to an end. Gabinius then went to Jerusalem and reorganized the government according to Antipater's wishes (*Ant.* xiv.5.1–6.1 [80-97]; *BJ* i.8.2-7 [160-178]; Dio Cassius xxxix.56; Plutarch *Antony* iii).

Antipater married a woman named Cypros, of an illustrious Arabian family, by whom he had four sons — Phasael, Herod, Joseph, Pheroras — and a daughter, Salome (*Ant.* xiv.7.3 [121]; *BJ* i.8.9 [181]).

When Julius Caesar became ruler of Rome in 49 B.C., Pompey and the party of the Roman Senate fled from Italy. This left Antipater and Hyrcanus II in the precarious situation of possibly being unable to handle revolts. In fact, Caesar released the imprisoned Aristobulus II and gave him two legions to fight the party of Pompey in Antioch and finally take control of Syria and Judea. But before he could leave Rome, Aristobulus II was poisoned by friends of Pompey. In addition, Aristobulus II's son, Alexander, who sided with Caesar, was beheaded at Antioch by order of Pompey. This means that only Antigonus, the other son of Aristobulus II, remained as a threat to Hyrcanus II and Antipater (*Ant.* xiv.7.4 [123-25]; *BJ* i.9.1f. [183-86]; Dio Cassius xli.18.1).

When Julius Caesar defeated Pompey in Egypt in 48 B.C., Hyrcanus and Antipater attached themselves to the victor. Caesar made Antipater a Roman citizen with exemption from taxes. He appointed him procurator of Judea and reconfirmed Hyrcanus II's high priesthood. He also gave Hyrcanus the title of Ethnarch of the Jews (*Ant.* xiv.8.1-5 [127-155]; 10.2 [191]; *BJ* i.9.3–10.4 [187-203]). Immediately after, Antipater went about the country to suppress disorder and appealed to the restless Judean population to be loyal to Hyrcanus II. In essence, however, Antipater was ruling, and it was he who appointed his son Phasael as the governor of Jerusalem and his second son Herod as governor of Galilee in 47 B.C. (*Ant.* xiv.9.1f. [156-58]; *BJ* i.10.4 [201-203]). Herod was successful in ridding Galilee of bandits.

In 47 B.C. or early 46 B.C., some Jews complained to Hyrcanus II that Herod was becoming too powerful and that he had violated the Jewish law and consequently should be tried before the Sanhedrin. So Hyrcanus II ordered Herod to a trial. Herod came to the trial, not appearing as an accused person, but as a king, decked in purple and attended by a bodyguard. Sextus Caesar, the new governor of Syria, ordered Hyrcanus II to acquit Herod or serious consequences would follow. Herod was released and fled to join Sextus Caesar at Damascus. Sextus appointed Herod as governor of Coelesyria because of his popularity and thus Herod became involved with the affairs of Rome in Syria. Herod began to march against Jerusalem in order to avenge himself for the insult Hyrcanus II had directed toward him, but was persuaded by his father and brother to abstain from violence (*Ant.* xiv.9.3-5 [163-184]; *BJ* i.10.6-9 [208-215]; cf. T.B. *Kiddushin* 43a).

After Cassius, Brutus, and their followers murdered Julius Caesar in 44 B.C., Cassius came to Syria. Needing to raise certain taxes required by Cassius, Antipater selected Herod, Phasael, and Malichus for the job. Herod was very successful in this, and Cassius appointed him governor of Coelesyria (as he had been under Sextus Caesar). Since the Herods were gaining strength, Malichus, whose life Antipater had previously saved, bribed the butler to poison Antipater. Herod killed Malichus (*Ant.* xiv.11.3-6 [277-293]; *BJ* i.11.2-8 [220-235]).

Herod was growing in power but was not always liked by the Jews because he was an Idumean. Although he was married to Doris, who was probably Idumean also, he became betrothed to Mariamne, who was the granddaughter of Hyrcanus II (her mother was Alexandra) and the daughter of Aristobulus II's son, Alexander, and thus a niece to Antigonus, the rival of Herod (*Ant.* xiv.12.1 [300]; *BJ* i.12.3 [241]). This strengthened Herod's position immensely, for he would marry into the royal house of the Hasmoneans and would become the natural regent when Hyrcanus II, who was growing old, passed away.

In 42 B.C. when Antony defeated Cassius, the Jewish leaders accused Herod and Phasael of usurping the power of the government while leaving Hyrcanus II with titular honors. Herod's defense nullified these charges (*Ant.* xiv.12.2-6 [301-323]; *BJ* i.12.4-6 [242-45]; Plutarch *Antony* xxiv; Dio Cassius xlviii.24; Appian *Civil Wars* v.4). Since Hyrcanus II was there, Antony asked him who would be the best qualified ruler, and Hyrcanus II chose Herod and Phasael. Antony appointed them as tetrarchs of Judea (*BJ* i.12.5 [243f.]; *Ant.* xiv.13.1 [324-26]).

B. Antigonus (40-37 B.C.). The next year (40 B.C.) the Parthians appeared in Syria. They joined Antigonus in the effort to remove Hyrcanus II. After several skirmishes, the Parthians asked for peace. Phasael and Hyrcanus II went to Galilee to meet the Parthian king while Herod remained in Jerusalem, suspicious of the proposal. The Parthians treacherously put Phasael and Hyrcanus II in chains, and Herod with his close relatives, Mariamne, and his troops moved to Masada and then to Petra (*Ant.* xiv.13.3-9 [335-364]; *BJ* i.13.2-9 [250-264]). Antigonus was made king (Dio Cassius xlviii.41; inferred in *Ant.* xiv.13.10 [368f.]; *BJ* i.13.9 [268-270]; cf. also Dio Cassius xlviii.26). In order to prevent the possibility of Hyrcanus II's restoration to high priesthood, Antigonus mutilated him. Phasael died either of suicide or poisoning (*Ant.* xiv.13.10 [367-69]; *BJ* i.13.10f. [271-73]). Hyrcanus II was taken to Parthia (*Ant.* xv.2.1 [12]).

Herod went to Rome where Antony, Octavius Caesar, and the Senate designated him King of Judea (*Ant.* xiv.14.6 [381-85]; *BJ* i.14.4 [282-85]; cf. also Strabo *Geog.* xvi.2.46; Appian *Civil Wars* v.75; Tacitus *Hist.* v.9). In late 40 or early 39 B.C. Herod returned to Palestine, and with the help of Antony's legate Sossius, was able to recapture Galilee. In the spring of 37 B.C. he prepared for the siege of Jerusalem. While assigning his army several duties he left for Samaria to marry Mariamne to whom he had been betrothed for about five years. This was a contemptuous act against Antigonus, the uncle of Mariamne, for her being a Hasmonean strengthened Herod's right to the throne. After the wedding he returned to Jerusalem, which fell in the summer of 37 after a long and bitter struggle (*Ant.* xiv.15.8–16.2 [439-480]; *BJ* i.16.7–18.2 [320-352]; Tacitus *Hist.* v.9; Dio Cassius xlix.22). At Herod's request, the Romans beheaded Antigonus (*BJ* i.18.3 [357]; Plutarch *Antony* xxxvi; cf. also Dio Cassius xlix.22), which meant the end of the Hasmonean rule. Herod, therefore, ceased to be the nominee for king and became king *de facto*.

C. Mariamne and Her Sons (37-7 B.C.). One of the first moves Herod made as king was to appoint Ananel (Hananeel), who was of the Aaronic line, as high priest to replace Hyrcanus II who, although just returning from the Parthian exile, was disqualified because Antigonus had mutilated him (*Ant.* xv.2.1-4 [11-22]). Herod chose a priest who had no influence. Alexandra, who was Herod's mother-in-law as well as Hyrcanus II's daughter, was infuriated by his choice of a priest outside the Hasmonean line, especially because he overlooked her own sixteen-year-old son, Aristobulus III, the brother of Herod's wife Mariamne. Finally, Alexandra, with Cleopatra's pressure upon Antony, forced Herod to set aside Ananel (which was unlawful because a high priest was to hold the office for life) and make Aristobulus III high priest when he was

only seventeen years old (late 36 or early 35 B.C.). Because of Aristobulus III's growing popularity, Herod managed to have him accidentally drowned in a swimming pool at Jericho right after the Feast of Tabernacles. Herod arranged for an elaborate funeral. Although the people never questioned the official versions, Alexandra believed that her son had been murdered. She reported this to Cleopatra, who persuaded Antony to summon Herod for an account of his actions. Realizing that his life was in danger, Herod put his wife Mariamne under surveillance and secretly instructed those in charge to kill Mariamne if he were killed so that she would not become someone else's lover. By eloquence and bribery, Herod persuaded Antony to free him of any charges. Upon his return in 34 B.C. Herod realized that Mariamne found out about his plan to kill her, but he also heard the charge that she had an affair with the one who was to watch her while he was away. She denied the charge, and after some debate they were reconciled. Herod surmised that some of the troubles were caused by her mother Alexandra, so he put her in chains and under guard (*Ant.* xv.2.5–3.9 [23-87]; *BJ* i.22.2-5 [437-444]).

Antony was defeated by Octavius in the Battle of Actium on 2 September, 31 B.C. Herod, in the spring of 30 B.C., went to Rhodes to meet Octavius and convince him that he was loyal. Before Herod left for Rhodes, he sentenced and executed Hyrcanus II, the only remaining rival claimant to the throne. Also, he had Mariamne and her mother Alexandra placed under observation and instructed two guards to execute them if he did not return from Rhodes. At their meeting in Rhodes in the spring of 30 B.C., Octavius was convinced of Herod's loyalty and confirmed his royal rank (*Ant.* xv.5.1–6.7 [108-201]; *BJ* i.19.3–20.3 [369-395]).

While Herod was at Rhodes, however, Mariamne found out from the two guards that she was to be killed in the event that he did not return. This caused an intense situation for Herod, and after a complicated series of events, he condemned and finally executed Mariamne at the end of 29 B.C. (*Ant.* xv.7.1-5 [202-236]). But Herod never accepted Mariamne's death. He fell ill, and because his recovery was doubtful, Alexandra tried to win over two fortified places in Jerusalem so that she could secure the throne. When Herod heard of this plot, he had her executed in 28 B.C. (*Ant.* xv.7.6-8 [237-252]). Finally, the governor of Idumea, Costobarus (husband of Herod's sister Salome), who had earlier conspired with Cleopatra against Herod, once again came under suspicion for alleged pro-Hasmonean sympathies. Herod killed Costobarus and his followers, the influential sons of Babas, who remained loyal to Antigonus. Herod now could console himself that all of the male relatives of Hyrcanus II (who could dispute the occupancy of the throne) were no longer living (*Ant.* xv.7.9f. [253-266]).

The only Hasmoneans who would claim the throne were Herod's own sons by Mariamne. She bore him five children. The two daughters were Salampsio and Cypros (*Ant.* xviii.5.4 [130-32]). The youngest son died during the course of his education in Rome (*BJ* i.22.2 [435]). The older sons were Alexander and Aristobulus (*Ant.* xvi.4.6 [133]; xvii.5.4 [134]). Herod made out a will in 22 B.C. that would make these two sons his successors. Both of these sons had no real fondness for their father, for he had killed their mother. When Herod heard and believed the rumors that these two sons planned to kill him to avenge their mother's death, he made out a new will in 13 B.C. declaring Antipater, son of his first wife Doris, the sole heir (*BJ* i.23.2 [451]). Antipater realized that Herod could again change his mind about the will, so he repeatedly wrote letters from Rome, kindling his father's anger against Alexander and Aristobulus and ingratiating himself. Finally, in Italy in 12 B.C., Herod brought Alexander and Aristobulus to trial before Augustus to prove that they were not worthy of the throne. The outcome of the trial, however, was reconciliation, and when they returned home Herod made out his third will, naming Antipater as his first successor and after him Alexander and Aristobulus (*Ant.* xvi.3.1–4.6 [66-135]; *BJ* i.23.1-5 [445-466]).

Scarcely had they arrived home when Antipater, being helped by Herod's sister Salome and Herod's brother Pheroras, began to slander the two sons of Mariamne. Alexander and Aristobulus became decidedly more hostile in their attitude. Herod became more morbid about the situation, and Antipater played on Herod's morbid fears. Although there was a reconciliation in 10 B.C., finally in 7 B.C. with Augustus's instruction his sons were tried at Berytus (Beirut) and found guilty. Herod had Alexander and Aristobulus executed by strangulation at Sebaste, where he had married their mother thirty years before (*Ant.* xvi.8.1–11.8 [229-404]; *BJ* i.24.7–27.6 [488-551]).

The remaining Hasmonean influence came after Herod's death. Aristobulus had married Bernice, the daughter of Herod's sister Salome, and they had three notable children (*BJ* i.28.1 [552f.]). First, there was Herod who was king of Chalcis from A.D. 41 to 48. Second, there was Herod Agrippa I who was king of the Jews from A.D. 37 to 44 (Acts 12), being succeeded by his son Herod Agrippa II, who was king of the Jews from A.D. 50 to 100 (Acts 25–26). Third, there was Herodias who married Herod Antipas, who ruled as tetrarch over Galilee and Perea from 4 B.C. to A.D. 39 (Mt. 14:3-12; Mk. 6:17-29; Lk. 3:1, 19f.; 13:31-33; 23:6-12). Herodias had a daughter, Salome, from a previous marriage, who married Herod Antipas's brother, Philip the tetrarch (Lk. 3:1).

HASRAH haz'rə, has'rə [Heb. *ḥasrâ*].

1. Grandfather of Shallum, who was the husband of Huldah the prophetess (2 Ch. 34:22; in 2 K. 22:14, HARHAS).

2. In 1 Esd. 5:31 (AV AZARA, NEB ASARA), the head of a family returning to Jerusalem with Zerubbabel. His name is omitted in the par. passages (Ezr. 2:49; Neh. 7:51).

HASSENAAH has-ə-nā'ə [Heb. *hassᵉnā'â*]. In Neh. 3:3 the "sons of Hassenaah" are mentioned among the builders of the wall. Probably the same as SENAAH (Ezr. 2:35; Neh. 7:38) with the definite article, i.e., has-Senaah. The latter, from the connection, would appear to be a placename. *See also* HASSENUAH.

HASSENUAH has-ə-nōō'ə [Heb. *hassᵉnu'â, hassᵉnû'â*]. A family name in the two lists of Benjaminite inhabitants of Jerusalem (1 Ch. 9:7, AV "Hasenuah"; Neh. 11:9, AV "Senuah"). The name is possibly the same as HASSENAAH, yet the occurrence of the singular ("son of

Hassenuah") does not accord so well with the idea of a place name.

HASSHUB hash'ub [Heb. *ḥaššûḇ*–'considerate']; AV everywhere Hashub except 1 Ch. 9:14.

1. A builder of the wall (Neh. 3:11).
2. Another builder of the same name (Neh. 3:23).
3. One of the signers of the covenant (Neh. 10:23).
4. A Levite chief (Neh. 11:15; 1 Ch. 9:14).

HASSOPHERETH has-o-fē'reth [Heb. *hassōpereṯ*–'the scribe' (Ezr. 2:55); Gk. *Assaphiōth* (1 Esd. 5:33)]; AV SOPHERETH, AZAPHION; NEB Apoc. ASAPPHIOTH. Father of some of the "sons of Solomon's servants" who returned to Jerusalem with Zerubbabel.

HASTE; HASTEN; HASTY verbs: [Heb. piel of *māhar, ḥûš, bāhal, ḥāpaz, 'āmēṣ, 'ûṣ, nāḥaṣ* (1 S. 21:8 [MT 9]), *dāḥap* (Est. 3:15), *rûṣ* (Cant. 1:4), *bāraḥ* (Cant. 8:14), *nûs* (Jer. 46:5), *qāḏam* (Jonah 4:2), *rāpas* (Prov. 6:3), *'ûš* (Joel 3:11 [MT 4:11]), *šā'ap* (Eccl. 1:5), *pû(a)ḥ* (Hab. 2:3); Gk. *speúdō* (Acts 22:18)]; AV also "make speed" (2 S. 15:14), SPEEDILY (Ps. 69:17), "be swift" (Prov. 6:18), RUN (Cant. 1:4), etc.; NEB also QUICKLY (Gen. 19:22), "be overcome" (Gen. 43:30), "rose with all speed" (Josh. 8:14), PROMPTLY (Josh. 8:19), SUDDEN (Jgs. 20:37), URGENT (1 S. 21:8), etc.; substantives: [Heb. *ḥippāzôn, mahēr, mᵉhērâ* (Jgs. 9:54); Aram. *bᵉhîlû* (Ezr. 4:23); Gk. *spoudḗ* (Lk. 1:39), *tachéōs* (1 Tim. 5:22)]; AV also SUDDENLY (1 Tim. 5:22); NEB also HURRIEDLY (Jgs. 9:54), etc.

The Hebrew verb most often represented by the word-group "haste," "hasten," etc., is *māhar* (in the piel, "make haste, hasten"). Used independently, the verb *māhar* consistently has the meaning "hurry, hasten, act quickly" (cf. Gen. 18:7; 1 S. 9:12; Isa. 5:19; Nah. 2:5). Far more frequently, however, *māhar* is followed by a finite verb or infinitive (cf., e.g., Gen. 45:9, "make haste and go up"; 18:7, "who hastened to prepare it") so that it has an adverbial force (in the above examples, "go up quickly" and "prepare it quickly"). A slightly extended sense is apparent in the rare instances when the simple passive (niphal) stem of *māhar* is used; i.e., "be hurried" may connote "anxious" or "hasty." In Hab. 1:6 the Chaldeans, ever eager to annex more territory, are thus characterized as "hasty" or "impetuous." The cognate substantives *mᵉhērâ*, "haste" (Jgs. 9:54), and *mahēr*, "swift, quick" (Prov. 25:8) similarly have an adverbial force.

In Prov. 13:11 the translations for *mēheḇel* ("by vanity," AV) in the RSV ("hastily") and NEB ("quickly") follow the LXX and Vulgate and assume an emendation to *mᵉhērâ* or *mᵉḇōhāl*, "by haste." The MT *mēheḇel*, if authentic, would perhaps refer to speculatively derived wealth (vis-à-vis that derived from honest effort). The emendations meaning "hastily gotten wealth" imply that which comes by questionable or fraudulent means (see W. McKane, pp. 458f.). In 1 S. 9:12 the NEB follows the LXX in assuming *hārō'eh*, "the seer," for MT *mahēr*, "make haste."

The synonymous verb *ḥûš* in the simple active (qal) stem basically means "be quick," as, e.g., in Ps. 119:60, "I hasten and do not delay," and in the familiar plea of the psalmist, "make haste to help me!" (Ps. 38:22 [MT 23]; etc.). The causative (hiphil) stem of *ḥûš* is used to express several nuances: (1) "act quickly, manifest haste" (Ps. 55:8 [MT 9]); (2) "cause to hurry" (Isa. 60:22); and (3) "be hasty, precipitous" (Isa. 28:16; NEB here assumes *mûš* for MT *ḥûš* and translates "waver"). In effect, *ḥûš* also frequently has an adverbial force.

There is a duality of meaning in both the Aramaic and Hebrew cognates of the root *bhl*: (1) "hurry," and (2) "be alarmed, terrified." Which meaning is the original is uncertain (see *TDOT*, II). In any event, the use of Heb. *bāhal* with the sense "hasten, hurry" (cf. 2 Ch. 35:21; Est. 6:14; 8:14; Prov. 20:21) is a development that occurred late in biblical Hebrew under the influence of the Aramaic cognate *bᵉhal* (cf. Dnl. 2:25; 3:24; 6:19 [MT 20]). The duality of meaning can be detected in Est. 6:14 and 8:14, in the sense that one who is alarmed acts in haste. The basic sense of "urgency" that underlies both meanings is apparent in the use of the Aramaic substantive *bᵉhîlû*, "haste," in Ezr. 4:23.

The English word group is used to translate a number of other Hebrew verbs for which this sense is an extension of its original meaning. Thus, *ḥāpaz*, "be alarmed, in trepidation," may also have the sense "be in a hurry." In contexts of retreat or escape the RSV renders it with "making haste" (e.g., 1 S. 23:26; cf. NEB "trying desperately"), and "haste" (2 S. 4:4; 2 K. 7:15). The cognate substantive *ḥippāzôn*, "haste" (lit. "trepidation"), is used in Ex. 12:11 to characterize the manner of the eating of the Passover meal (cf. also Isa. 52:12, where with the same language the prophet says that in the second Exodus the people will not leave in "haste").

The reflexive (hithpael) stem of *'āmēṣ*, "make oneself strong, alert," has the connotation of "making haste" or "acting with dispatch" in 1 K. 12:18 par. 2 Ch. 10:18 (AV "make speed"). J. Gray suggested that *hiṯ'ammēṣ* expresses "not so much the haste with which Rehoboam mounted his chariot as his rallying of his faculties to do so" (*I & II Kings* [*OTL*, rev. ed. 1970], p. 307).

The verb *'ûṣ*, "be narrow, pressed," is naturally extended to mean "make haste, be in a hurry, be anxious" (cf. Josh. 10:13; Prov. 19:2; 28:20). Similarly, *dāḥap*, "drive," in late Biblical Hebrew and Mishnaic Hebrew has the meaning "hasten." Est. 3:15 illustrates this: the king's runners "hasten" in the sense that they are "driven" under the compulsion of their task (cf. also 2 Ch. 26:20). That *rûṣ*, "run," should have the connotation "hasten, hurry" as, e.g., in Cant. 1:4 (AV, NEB, "run"), is natural and expected.

Bāraḥ, "flee," is in one instance in the OT (Cant. 8:14) translated "make haste" (NEB "come into the open"), since flight implies quick or hurried movement (cf. the similar treatment of *nûs*, "flee, escape," in Jer. 46:5). The synonymous verbs *šā'ap*, "gasp," and *pû(a)ḥ*, "pant," are each used once in the extended sense of "hasten." In Eccl. 1:5 the sun is figured as a "gasping" (i.e., "hurrying") racer, and in Hab. 2:3 the prophet describes his vision as one that "pants" (i.e., "hastens") to the end (AV "it shall speak"; NEB "in breathless haste").

For the hapax legomenon *'ûš* in Joel 3:11 (MT 4:11), the meaning "help, lend aid" is suggested by the Arabic cognate. The RSV translation, "hasten," assumes the emendation *ḥûš*. Another possibility, relevant to the context, is *'ûr*, "rouse (yourselves) up." The renderings of the AV ("assemble yourselves") and NEB ("rally") follow the LXX.

Another hapax legomenon, *nāḥaṣ*, which the RSV renders as "haste" in 1 S. 21:8 (NEB "urgent"), deserves mention. The meaning, "be urgent," is derived from the context and the LXX reading *spoudḗ*, "haste, urgency").

An occurrence of *rāpas*, "tread, stomp, befoul by treading" (cf. Akk. *rapāsu*, "trample"), in the reflexive (hithpael) stem in Prov. 6:3 is translated "hasten" by the RSV. The precise meaning of the reflexive stem of *rāpas*, however, is uncertain. The AV rendering, "humble yourself," was based on the assumption that "stomping one-

self down" meant "humbling oneself" or "swallowing one's pride" (see McKane, pp. 322f.). But the context of going to importune (*rāhaḇ*, lit. "storm, act boisterously with") one's neighbor has been considered by some scholars to be a serious difficulty for the above interpretation. Thus it has been reasoned that "trampling oneself" could mean instead "wearying oneself" or "not flagging" in one's task (see G. R. Driver, *JTS*, 30 [1929], 374f.). This and the LXX reading, "do not slacken," are cited in support of the translation "hasten." The NEB follows another conjecture, "bestir yourselves."

The intensive (piel) stem of *qāḏam*, "go before, meet, be in front," is translated "make haste" in Jonah 4:2. The context is one of precipitate flight as Jonah "made haste to flee" (lit. "went beforehand to flee"; see N. H. Snaith, *Notes on the Hebrew Text of the Book of Jonah* [1945], p. 36).

The Greek verb *speúdō* has the intransitive sense "hurry, make haste" in Lk. 2:16; 19:5f.; Acts 20:16; 22:18. Like Heb. *māhar*, *speúdō* commonly has an adverbial force (e.g., in Acts 22:18 "make haste and get quickly out" means "leave as quickly as possible"). In 2 Pet. 3:12 *speúdō* has the transitive meaning "hasten, strive for" (the reference being the Parousia; cf. NEB "work to hasten").

The related substantive *spoudḗ*, "haste, speed," appears in the phrase *metà spoudḗs*, "with haste, in a hurry," in Mk. 6:25 and Lk. 1:39 (cf. also Ex. 12:11, LXX; Josephus *Ant.* vii.223). The extended sense of *spoudḗ*, "zeal, zealous concern," also appears in the NT in such passages as Rom. 12:11 ("zeal"); 2 Cor. 7:11 ("eagerness"); *see* EAGER; ZEAL. The Greek adverb *tachéōs*, "(too) quickly," is translated "hasty" in 1 Tim. 5:22 (AV "suddenly"; NEB "over-hasty").

Bibliography.–*TDOT*, II, *s.v.* "bāhal" (Otzen); *TDNT*, VII, *s.v.* σπουδάζω κτλ. (Harder); W. McKane, *Proverbs* (*OTL*, 1970).

D. G. BURKE

HASUPHA hə-sōō'fə [Heb. *ḥᵃśûp̄ā'*, *ḥᵃśup̄ā'*]. Head of a family of temple servants among the returning exiles (Ezr. 2:43; Neh. 7:46). Neh. 7:46 AV has "Hashupha," and in the par. passage 1 Esd. 5:29 the AV and the NEB have "Asipha."

HAT [Aram. *karbᵉlā'*] (Dnl. 3:21). Worn by Daniel's three friends when they were cast into the furnace. The term *karbᵉlā'*, a hapax legomenon, recalls the Akk. *karballatu* ("cap," "helmet"), and reflects accurately the Babylonian cultural milieu against which the book of Daniel was written (*see* DANIEL, BOOK OF). Little is known about the early headgear, and even the Beni-hasan tableau, an Egyptian relief from the early patriarchal period (*ca.* 1900 B.C.) that depicts a group of seminomads entering Egypt, shows only that the women held their hair in place by means of bands (*ANEP*, no. 3). The "ropes" worn on the head in connection with mourning in the monarchy period (1 K. 20:31) have been paralleled on Egyptian monuments by scenes depicting Syrians who wore cords tied around their heads. On the sculptures that illustrate Sennacherib's capture of Lachish in 701 B.C. the men wear circular caps that come to a shallow point, while many of the women wear long wimples (*ANEP*, no. 373). Attire of this kind, like the turbans of the high priest, tended to change but little throughout the period of biblical history.

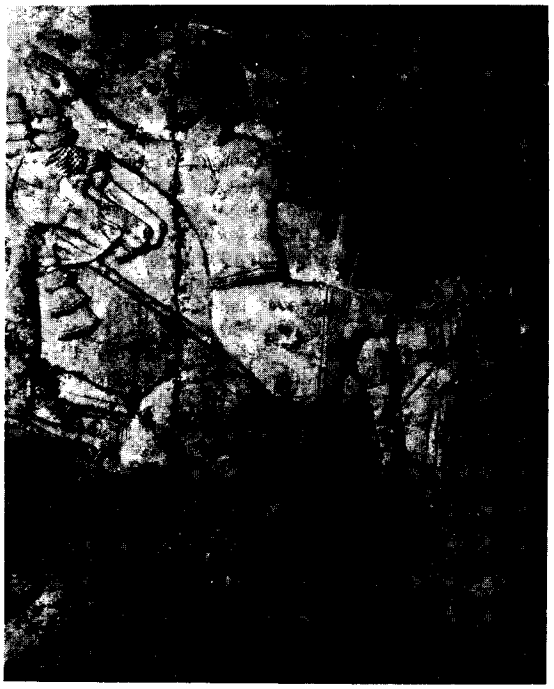
HATACH hā'tak. *See* HATHACH.

HATCHET [Heb. *kaššîl*] (Ps. 74:6); AV "axes." *See* AX.



Horseman with unusual hat surrenders to Assyrians. Relief from the palace of Tiglath-pileser III (745-727 B.C.) at Nimrûd (Trustees of the British Museum)

HATE; HATRED [Heb. *śānē'*, *śin'â* (Gen. 24:60; 26:27; etc.), *śāṭam* (Gen. 27:41; 49:23; 50:15; Job 16:9; Ps. 55:3 [MT 4]); Aram. *śᵉnē'* (Dnl. 4:19); Gk. *miséō* (Mt. 5:43; Mk. 13:13; etc.), *stygētós* (Tit. 3:3)]; NEB also "enemies" (Gen. 24:60), "bore a grudge" (Gen. 27:41), "not loved" (Gen. 29:31), "odious" (Tit. 3:3), etc. To have intense emotions of animosity for another person or persons, or, as a noun, the animosity itself. The Hebrew and Greek terms manifest distinct variations in their semantic range, from the malicious hatred of a person who seeks the death of an enemy, a hate seated both in the feelings and the will, to the hate that is disregard, rejection, and dislike without deliberate determination to do harm. Other occurrences simply denote a lack of love.

I. In the OT
   A. Human Hatred
   B. Divine Hatred
II. In the DSS
III. In the NT
   A. Human Hatred
   B. Divine Hatred

I. In the OT.–The most frequently used Hebrew word for "hate" is *śānē'*, from the root *śn'*. In Hebrew poetical texts derivatives of this root often designate the "ENEMY" (e.g., NEB in Gen. 24:60 [Heb. *śōnē'*]; Nu. 10:35; Dt. 32:41; 33:11; etc. [*mᵉśanā'*]). This designation for an enemy can be compared to two other OT terms for enemy. Heb. *ṣar* (Gen. 14:20; Nu. 10:9; Dt. 32:41; etc.) is a derivative of the root *ṣrr* ("be hostile toward," "be in a state of conflict with"; Ex. 23:22; Nu. 10:9; Isa. 11:13; etc.). The cognate Akk. *ṣerru* means "enemy," "adversary" (*CAD*, XVI, 137f.). In Ugaritic, *ṣrt* means "enemy" and *ṣrr* means "hurt," "afflict" (Gordon, *UT*, p. 476).

The Hebrew word *śāṭam* occurs several times in the OT for "hate" (Gen. 27:41; 49:23; 50:15; Job 16:9; Ps. 55:3). Heb. *śāṭan*, with final *-n*, is identical in meaning and

is attested in Akkadian, Arabic, Ethiopic, etc. (see KoB, pp. 918f.). The most widely used OT term for "enemy" is *'ōyēḇ* (Gen. 22:17; Ex. 15:6, 9; 23:4, 22, 27; etc.), which is attested in Akkadian as *ajābu* (*CAD*, A/I, 221-24; von Soden, pp. 23f.) and in Ugaritic as *ib* (cf. Donner, pp. 344ff.). The "enemy" whose name is derived from the root *śn'* is primarily a "hater" whose disposition of soul and mind has produced outright hostility and enmity. Other meanings of this Hebrew root are discussed below.

A. Human Hatred. In the Hebrew mentality "hate" is not necessarily always the direct antonym to the feeling of "love" in relations between human beings. When the patriarch Jacob is said to have "hated" his first wife Leah (Gen. 29:31), it does not mean so much the emotion of hate in the traditional sense as it expresses that she was "unloved" (NEB) or "disliked" (NAB), i.e., strong overtones are present in the context that show that he disregarded and rejected her in restricting his marital rights toward her and favoring Rachel. A significant semantic counterpart is found in the Code of Hammurabi where "a woman dislikes [*i-ze-er-ma*, "hates"] her husband and says, 'You have no marital rights (anymore) to me . . .'" (§ 142 as quoted in *CAD*, XXI, 97; cf. *ANET*, p. 172a). Here the "hating" (Akk. *zêru*, "dislike, hate, avoid," *CAD*, XXI, 97-99) involves a dislike that leads to the denying of sexual relations. Other nuances of the Akkadian verb *zêru* are "disregard" or "spurn" (Atra-ḫasis Epic iii.1.23; Gilgamesh Epic xi.26; cf. *ANET*, pp. 95, 105).

Ancient Israelite divorce law prohibited divorce for a man who "spurns" (NAB "dislikes," NEB "turns against") his wife and falsely accuses her of not having been a virgin when he married her (Dt. 22:13-21). It is likely that "hate" here means that the marriage partner sought to force a divorce by foregoing sexual relations as in Babylonian divorce law (Code of Hammurabi § 142; *ANET*, p. 172a). But no such "hate" provided sufficient legal grounds for divorce in Israelite family law. That this kind of "hate" was an adequate ground for divorce among Israel's neighbors is evident from Babylonian law (*ANET*, p. 172a) and Philistine custom (Jgs. 14:16; 15:2). The Hebrew laws of inheritance stipulated that the firstborn son of a "hated" (NEB "unloved," NAB "disliked") wife in a polygamous marriage was to be accorded the full right of a double share of the property, even if the "loved" wife had a son, provided that the latter was not the firstborn son of that home (Dt. 21:15-17). The personal disregard for one wife and corresponding preference of another by a polygamous husband was to have no legal bearing on the Israelite law that secured the inheritance of the firstborn (cf. Code of Hammurabi §§ 168-170; *ANET*, p. 173b). It is fairly certain that Israelite law was written in such a way as to discourage a situation of "hate" from arising in a polygamous home. It would certainly not bring legal advantage to the husband or to his "loved" wife or her offspring. The "hated" wife and her offspring were protected.

Different kinds of hate in relations between people are reflected in various passages of the OT. Isaac experienced the selfish hate of the Philistines when they drove him out of their territory because of the dispute over water rights (Gen. 26:27). This hate was characterized by a deliberate determination to do no physical harm (vv. 26-29). Esau "hated" (NEB, NAB, "bore a grudge against") Jacob (Gen. 27:41) because Jacob acquired the deathbed blessing from Isaac (cf. E. A. Speiser, *JBL*, 74 [1955], 252ff.). This hate sought revenge and forced Jacob to seek physical safety abroad (cf. Dt. 19:11). A despising hate led to Jephthah's rejection by his brothers and drove him from his house in Gilead, because he was the innocent victim of an illegitimate birth (Jgs. 11:1, 7). Absalom hated Amnon for the rape of his sister Tamar (2 S. 13:22). This hate not only led to a rejection of Tamar or a dislike of him; it was a deep-seated animosity that caused Absalom to have Amnon murdered (v. 28).

Hate, then, can be that innermost disposition of hostility and enmity that leads to premeditated killing. Hebrew criminal law required that in the case of homicide it should be ascertained whether or not the manslayer had "hated" the victim (Dt. 19:11; NEB "enemy of another"). Should such malicious hate be established by at least two or three witnesses, then the manslayer was to be judged a murderer worthy of death; but if no such hate could be established, then the killing was to be judged accidental (Dt. 4:42; 19:4, 6, 11; Josh. 20:5). In order to curb all such hurtful and destructive hate, the divine command prohibited it comprehensively and unequivocally, "You shall not hate your brother [neighbor] in your heart" and charged, "You shall love your neighbor as yourself" (Lev. 19:17f.; cf. Mt. 5:43ff.; Lk. 10:29-37). Here love and hate are contrasted; love is to take the place of malicious hate. In view of the Israelite laws prohibiting the "alien" or "sojourner" (Heb. *gēr*, Ex. 20:10; Dt. 5:14; 10:18f.; 14:29; 16:11, 14; 24:17-21; 26:12f.; 27:19; cf. Josh. 9), it is not possible to support the suggestion that originally the substitution of love for hate was to occur only toward members of the covenant community. The Israelite is indeed commanded to "love" the alien (Dt. 10:19).

A lack of love is equal to hate. Thus the father who withholds the punishment due to his son (Prov. 13:24) is failing to give love its due expression in the best interests of the person. There is no suggestion here of ill will, aversion, hostility, or rejection.

The psalmist speaks of the enemies as the ones who "hate" (Ps. 18:17; 21:8; 25:19; 34:21; 41:5, 7; 44:7) the worshiper of God "without cause" (35:19; 69:4) and "wrongfully" (38:19). Regardless of how the enemies are identified (G. W. Anderson, *BJRL* 48 [1965], 18-29), there is no reason for doubting that they are real human beings and not demons or mythical powers of death. The enemies of the psalmist are also the enemies of God, for they "hate" God (Ps. 68:1; 81:15). Those who "hate" God plot crafty plans against God's people (83:2), and "hate" Zion (129:5), the city of God's choice and blessing. They also "hate" peace (120:6) and discipline (50:17). The psalmist's prayer for deliverance, preservation, and salvation from these hateful enemies (25:20f.; 86:17; 109:3, 5) makes it clear that these wicked ones may meet exactly the same fate that they intend "without cause" for the righteous (7:12-16; 9:16; 34:31; 35:7f., 19; 69:4; 141:10). The upright man "hates" evil (97:10), falsehood (119:163), and the false way (119:104, 128); he also hates the one who acts perversely (101:3), who is double-minded (119:113), and the whole assembly of evildoers (26:5).

The person who fears God hates not so much because these wicked ones threaten the well-being and existence of those whom they hate, but because they threaten the very foundation of all human order, which God has established at His creation in the beginning of time. The enemies and evildoers have placed themselves into a sphere apart from God and joined in a covenant with forces that have purposed the disruption and destruction of the divinely established order (cf. Ps. 22:13-17; 57:5; 73:6-9). The psalmist asks, therefore: "Do I not hate them that hate thee, O Lord? And do I not loathe them that rise up against thee?" (139:21). There is thus a hatred that is natural for the God-fearing one (Ex. 18:21; Ps. 97:10; 119:104, 128, 163; Prov. 8:13; 13:5; 28:16; Isa. 33:15). But this hatred is not a personal, malicious hatred which seeks

the death of the enemy (cf. Prov. 24:17f.). Punishment of the enemies is to come from God and not from those whom the enemies hate. In the Song of Moses (Dt. 32) the hate of the enemies remains until the day of vengeance and requital (v. 35) when Yahweh will repay His foes and requite those who hate Him (v. 41). Because of their sin and rebellion, the just man hates those who hate his God; nevertheless, the righteous man maintains an attitude of nonretaliation. He refrains from usurping what is God's prerogative. He hates evil and loves good (Am. 5:15), while the wicked man hates good and loves evil (Mic. 3:2). The prophetic message shows that the act of decision between hate and love over against good and evil is not a matter based on the emotions of the human heart. To the contrary, it is a decisive choice of the will, for it is a choice for life or death.

As man is able to love God, so he is able to hate Him (Ex. 20:5; Dt. 5:9; 7:10; 32:41, 43; Ps. 68:1; 74:4, 23; 83:2). Man's hatred of God comes to expression in conscious opposition to God's revealed will, commandment, and law. Hatred against God is thus a sign of persistent rejection and constant obduracy (*TDNT*, IV, 687). God punishes the parental wrongdoing down to the third and fourth generation of those who hate Him (Ex. 20:5; Dt. 5:9). This does not mean that punishment comes for parental guilt alone (Ezk. 18:21f.), but only as the children participate in the sins of their parents by themselves walking in sinful ways. Certain natural results of a sinful course of life are certainly passed on to future generations. Hate in this instance means to live a life opposed to the divine will and the revealed principles of God.

B. Divine Hatred. Yahweh "hates" (NAB "detests") the worship of heathen gods (Dt. 12:31; Jer. 44:4) and the erection of *maṣṣēḇôṯ*, or sacred pillars associated with pagan cult practices (Dt. 16:22; 2 K. 23:14; cf. C. F. Graesser, *BA*, 35 [1972], 34-63). The reason for the "hate" of Yahweh against these standing stones seems to rest upon the desire to keep Israel free from foreign cults and influences, to separate them from the other nations, and to avoid the use of "images" (1 K. 14:23f.; 2 K. 17:8-11; Ex. 20:4; Lev. 26:1; Mic. 5:13). An Ugaritic text states that "Baal hates [*šn'a.b'l*]" certain cultic "banquets" which are unacceptable to the deity (II AB III.17:21; *ANET*, p. 132). The OT employs this same strong language (Heb. *śn'*) to condemn Canaanite forms of worship.

It must have been shocking and repulsive to the Israelite leaders and ordinary citizens to learn through the prophets of Yahweh that their God "hates" their worship (Isa. 1:14; 61:8; Hos. 9:15; Am. 5:21; Zec. 8:17; Mal. 2:13; cf. Jer. 12:8; 44:4). Israel's worship was thereby reduced to the level of idolatry, which God detests. The reason for God's hate of Israel's sacrifices, new moons, sabbaths, etc., lies in the deterioration of Israelite worship to an empty and meaningless ritual in which the worshiper engaged without inner devotion, wholehearted obedience, and complete justice in daily life. Thus God hates injustice (Isa. 61:8) and those who are evildoers (Ps. 5:6). Because of their wicked deeds, God will love His people no longer (Hos. 9:15f.). Such vices as self-assertiveness, lying, perjury, and acts disrupting society, which are based upon a deep-seated corruption of motives, are an abomination to Yahweh which He hates (Prov. 6:16-19). A list of vices hated by personified Wisdom begotten by Yahweh mentions pride, arrogance, evil conduct, and twisted speech (Prov. 8:13). God's hatred of sin is expressive of His utter abhorrence, disgusting repugnance, and vehement aversion. Thus God hates both sin and sinners, insofar as they persist in a way of life opposed to God's will and purpose, because this rebelliousness attracts the hatred due to sin. God desires the wholehearted repentance of the sinner, but if he refuses to repent and persists in turning away from the ways of God, He is obliged in justice and love to punish and destroy (Hos. 11:5-12).

II. In the DSS.–The sectarian literature of the Qumrân community provides a unique insight into an aspect of Judaism in late pre-Christian and early Christian times. The Qumrân covenanters considered themselves to be the only true REMNANT of Israel, the Chosen People, the "sons of Aaron" and "Israel" (1QS 5:21f.). All those outside their ranks were considered to be "sons of darkness" (1QM 1:1–2:14), who are under the sway of the spirit of darkness which issues from the Angel of Darkness. God "loathes and forever hates its [the spirit of darkness'] ways" (1QS 3:26–4:1). According to the Community Rule one should love one's neighbor (cf. Lev. 19:17f.), who was by their definition a member of the Qumrân community: "love all the sons of the light" (1QS 1:10). The "sons of light" or Qumrân covenanters in turn are to "hate all the sons of darkness, each according to his guilt in God's vengeance" (1QS 1:10), i.e., all those outside their community of faith, who were considered their enemies. This hate is unqualified as an "everlasting hatred in a spirit of secrecy for the men of perdition" (1QS 9:21). The "everlasting hatred" is thus practiced in a "spirit of secrecy" or concealment, in that it does not interfere in worldly affairs. This means that the "son of light" practices nonretaliation by refraining from repaying evil with evil. "I will pay to no man the reward of evil; I will pursue him with goodness" (1QS 10:17). To pursue the "son of darkness" with goodness is not the result of love but a special case of the application of the concealed "everlasting hatred." The member is "to love all that He has chosen and to hate all that He has rejected" (1QS 1:3f.). As the ones who once were members now "hate the neighbor [member of the community]" (CD 8:6), so the members themselves "will have no compassion on all who depart from the way" (1QS 10:20); i.e., love remains restricted to the faithful members of the community whereas the unfaithful ones are hated just as are the nonmembers. The Qumrân covenanters follow this unusual two-edged ethic because of their imminent eschatology, which taught that God would soon execute vengeance.

III. In the NT.–The Greek term *miséō* as used in the NT reflects a variety of semantic ranges, which must each be evaluated in its own context.

A. Human Hatred. In relations between human beings "hate" has been radically called into question by Jesus. In the Sermon on the Mount Jesus quoted a popular (SB, I, 253) maxim: "You shall love your neighbor and hate your enemy" (Mt. 5:43). Whereas the command to love one's neighbor is based upon Lev. 19:18, there is in the OT no positive teaching that one should hate one's enemy. To the contrary, it is possible to speak of the love of one's enemy (Ex. 23:4f.; Dt. 22:4). It can also be maintained that in Lev. 19:18 the demand of love for one's neighbor means also love of one's enemy (v. 17). It has, therefore, been said that Jesus was slanderous in referring to the hate of one's enemy when neither Judaism nor the OT explicitly taught such hate. The finds from Qumrân in 1947 have thrown totally new light on this issue. The Manual of Discipline demands that as part of an oath upon entering the Qumrân community the one seeking entrance must vow to "love all the sons of light,... and hate all the sons of darkness" (1QS 1:10). It has been shown above (II) that the "sons of darkness" are nonmembers or outsiders, who are the enemies of the Qumrân covenanters. This Qumrân concept of hate comes as close to the corresponding phrase in Mt. 5:43 as could be, and it provides a vivid

background that demonstrates that there was actually such a demand in a segment of the Judaism of NT times. Jesus overturned this concept of hate toward one's enemy by commanding His disciples to live by a new principle: "love your enemies" (Mt. 5:44). This is much more than treating an enemy well, as is shown by the demand to pray for one's enemy (v. 44b). Jesus' charge to "do good to those who hate you" (Lk. 6:27) is a corollary of love and not an outgrowth of an "eternal hatred" (1QS 9:21) as in Qumrân. Jesus' ethic, by a total application of the absolute mandate of love in all situations of life, overcomes the irreconcilable tension of the two-edged ethic of love toward one's brother and hate toward one's enemy as practiced by the community and other segments of Judaism. Man is unable to live with the attitudes of both hate and love (Mt. 6:24; Lk. 16:13). One cancels the other.

Discipleship to Jesus involves a certain kind of hate. A prerequisite for becoming a follower of Jesus is the "hate" (Gk. *miseí*, NAB "turning his back on") of one's father, mother, brothers, sisters, wife, and children (Lk. 14:26). This is no malicious hate that seeks wrong; it is neither to lack love, nor to dislike, nor to disregard, but it is to put one's total commitment to someone higher and more important than even those to whom one has the closest ties in the human sphere. No personal interest is to take precedence over loyalty to the Master. To "hate" here means to "love less" as the Matthaean form of this saying shows: "He who loves father and mother more than me is not worthy of me" (10:37). In true discipleship relatives must take second place; first place must be given to Jesus and His kingdom (Mt. 6:19ff., 33). The Fourth Gospel contains another related saying of Jesus: "He who loves his life loses it, and he who hates his life in this world will keep it for eternal life" (Jn. 12:25; cf. Dodd, pp. 78-81). The basic antithesis is between loving and hating one's life. The follower of Jesus must not treasure his life "in this world" more than the life that will last into and throughout eternity. "Hate" here means a repudiation of a life apart from the Source of life. Man cannot live at the same time in the spheres of both the old and new life (cf. Tit. 3:3).

Of all the NT witnesses, the Johannine writings employ the word "hate" more often than any of the others. In Jn. 3:20 (cf. 1QS 4:24) the evildoer is said to "hate" the light. Evildoers are unbelievers who continue to practice wickedness; they can see the light of Jesus shining into their hearts, but through their evil deeds they demonstrate their hate and thus their rejection of the light of Jesus (1:4, 9; 8:12; 9:5; 12:35f.). Not only the Jews (Jn. 7:1) but also the world hates Jesus because of the evidence He brings that what it does is evil (v. 7). Since the world hates Jesus, it will also hate His followers (15:18f.), who are not of the world (17:14; cf. 1 Jn. 3:13) but do the works of Jesus. He who hates the follower of Jesus hates Jesus Himself. He who hates Jesus hates the Father also (Jn. 15:23). In 1 John hate belongs to the old aeon and not to the new one. These two aeons are contrasted by the typical Johannine dualism of darkness and light. Corresponding to this dualism is the antithesis of hate and love. He who hates belongs to the realm of darkness and has no part in the sphere of light. He who hates his brother, therefore, is still in the darkness of the old aeon (1 Jn. 2:9), walking in the darkness that has blinded his eyes (v. 11) from the light of the new aeon. The hate of the brother is not merely dislike, lesser love, or disregard; it is equal to murder (3:15). He who makes a profession to love God but hates his brother is a liar (4:20), for one cannot hate the one seen and love the One unseen.

In the Synoptic Gospels hate is a characteristic of the enemy and of the nonbeliever (cf. Tit. 3:3 [Gk. *stygētos*]). The first advent of Jesus Christ means deliverance from "all who hate us" (Lk. 1:71). This deliverance may not be immediate for each believer, for the follower of Jesus must expect to be hated by all for Jesus' name's sake (Mt. 10:22). As one of the eschatological woes, the hate of all nations will be directed against the followers of Jesus (Mt. 24:9; Mk. 13:13; Lk. 21:17). This hate will cause a falling away, a betraying, and a hating of one another (Mt. 24:10). Hate is therefore a sign of the eschaton at the second coming of Christ. The follower of Jesus will expect hate from the nonbeliever and should even rejoice in it (Lk. 6:22), because in experiencing it he is associated with the destiny of the Lord. The believer does not live by the *lex talionis*, but by love as the only rule for his life, also in relation to his enemies. The follower of Jesus does not live in a state of nonresistance, but of nonretaliation based on love. The Christian's task is to resist by doing good to those who hate him (Lk. 6:27; cf. Rom. 12:20; Klassen, pp. 345-350).

B. Divine Hatred. The NT is noted primarily for its presentation of the love of God. There are, however, some instances in which the idea of divine hate comes to expression. Basic to both OT and NT is the notion that the God of love is also the holy and jealous God who is obliged to destroy in the day of final judgment those who persist in rebellion against Him. The NT never speaks of hate in God. Still it knows the idea of God's hate. Paul quotes in Rom. 9:13 a saying from Mal. 1:2f.: "Jacob I loved, but Esau I hated." The prophetic saying maintains that God's choice of Jacob was an act of His grace and was not conditioned by the merit or failure of either of these twin brothers. God's freedom of choice is preserved. The "hatred" of Esau and the peoples descended from him does not involve ill will or the intention to harm and destroy on the part of God. The preference of Jacob is like that of the husband who "loves" one of his spouses and "hates" or "loves less" the other. God's "hatred" of Esau does not imply eternal damnation; it is expressive of God's freedom in working out the counsels of His own will. Paul's point in quoting this complex declaration is to illustrate that God still maintains His freedom of choice as to who shall be the recipient of His promises. The present "hate" of literal Israel and choice of spiritual Israel to accomplish God's purpose for the world is not guided by an arbitrary love or hate of God and it does not imply injustice on His part. It demonstrates God's righteousness in making salvation possible for all mankind, because "Israel" means the elect and not Jews by physical descent. By election God follows a unique plan of love and salvation for all mankind.

The hate of Jesus (and the Church) for the works of the Nicolaitans in Ephesus (Rev. 2:6) differentiates between the ones who work evil and their evil works. Only the evil works are hated. An extension of this differentiation leads to the well-known idea of hating the sin and loving the sinner. This idea is already embedded in the OT, where God hates sin but has no pleasure in the death of the sinner, and desires only that he be converted from his ways and live (Ezk. 18:23).

Hebrews 1:9 applies the sentence of Ps. 45:7, "thou hast loved righteousness and hated lawlessness," to the lordship of Jesus Christ. Hate is here again directed against sin but not the sinner. The purpose of this quotation is to support the supremacy of Jesus Christ.

HATHACH hā'thak [Heb. *hᵃṯāḵ*; Gk. *Hachrathaios*]; AV HATACH. One of the eunuchs of Ahasuerus, appointed to attend on Esther (Est. 4:5f., 9f.), through whom she learned from Mordecai of Haman's plot.

HATHATH hā'thath [Heb. *ḥᵃṯaṯ*] (1 Ch. 4:13). Son of Othniel and grandson of Kenaz.

HATIPHA hə-tī'fə, hat'i-fə [Heb. *ḥᵃṭîpā'*–'taken, captive'(?)]. The ancestral head of a family of temple servants that returned from Babylon (Ezr. 2:54; Neh. 7:56; 1 Esd. 5:32 [AV Apoc. ATIPHA, NEB Apoc. ATEPHA]).

HATITA hə-tī'tə, hat'i-tə [Heb. *ḥᵃṭîṭā'*]. Head of a family among the "sons of the gatekeepers" who returned from exile (Ezr. 2:42; Neh. 7:45; 1 Esd. 5:28 [AV Apoc. TETA, NEB Apoc. ATETA]).

HATTIL hat'il [Heb. *ḥaṭṭîl*]. A company of servants of Solomon appearing in the postexilic literature (Ezr. 2:57; Neh. 7:59; 1 Esd. 5:34 [AV, NEB, Apoc. HAGIA]).

HATTUSH hat'ush [Heb. *ḥaṭṭûš*].

1. Son of Shemaiah, a descendant of the kings of Judah, in the 5th generation from Zerubbabel (1 Ch. 3:22). He returned with Zerubbabel and Ezra from Babylon to Jerusalem (Ezr. 8:2; Neh. 12:2). In 1 Esd. 8:29 Hattush (Gk. *Attous*; AV LETTUS; NEB ATTUS) is called the son of Shecaniah, as in Ezr. 8:2. It is possible that the Hattush of the house of David and the priest of the same name, mentioned in Neh. 10:4; 12:2, are identical. The latter was one of those who signed the covenant with Nehemiah (Neh. 10:4).

2. Son of Hashabneiah; he aided Nehemiah in repairing the walls of Jerusalem (Neh. 3:10).

HAUGHTY; HAUGHTINESS [Heb. *rûm*] (2 S. 22:28 par. Ps. 18:27 [MT 28]; Prov. 6:17; 21:4; Isa. 10:12; Jer. 48:29); AV also HIGH, PROUD; NEB also PROUD, VAINGLORY, INSOLENT; [*gaʾᵃwâ*] (Isa. 13:11); NEB ARROGANCE; [*gāḇâ*] (Ps. 101:5; 138:6; Prov. 16:18; 18:12; Isa. 2:11, 17; 3:16; 5:15; Ezk. 16:50; Zeph. 3:11); AV also HIGH, PROUD, LOFTY; NEB also PROUD, ARROGANCE, "hold themselves high," "flaunt your pride"; [*yāhîr*] (Prov. 21:24); [Gk. *hyperḗphanos*] (Rom. 1:30); AV PROUD; NEB ARROGANT; [*hypsēlós*] (Rom. 12:16); AV HIGH THINGS; [*hypsēlophronéō*] (1 Tim. 6:17); AV HIGHMINDED; NEB PROUD; [*megála*] (Rev. 13:5); AV GREAT THINGS; NEB BOMBAST; **HAUGHTILY** [Heb. *mārôm* (2 K. 19:22 par. Isa. 37:23), *rômâ* (Mic. 2:3)]; AV also "on high"; NEB also UPRIGHT; [*gaʾᵃwâ*] (Ps. 31:23 [MT 24]); AV PROUD; NEB ARROGANT.

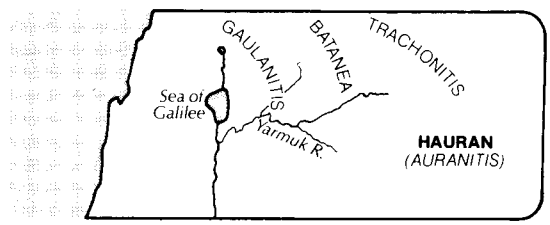
The OT and NT terms all have the meaning of holding oneself high or exalted. The haughtiness of mankind is hated by the Lord (Prov. 6:17) and will be brought down in the day when the Lord is glorified (Isa. 2:17).

N. J. O.

HAUNT [Heb. *regel*–'foot'] (1 S. 23:22); NEB omits; [*nāweh*] (Isa. 34:13; 35:7); AV HABITATION; NEB ROUGH LAND; [*māʿôn*] (Jer. 49:33; 51:37); AV DWELLING, DWELLING PLACE; [Gk. *phylakḗ*] (Rev. 18:2); AV HOLD, CAGE. A haunt is generally a place frequented with some regularity. David hid in the rocky strongholds in the Wilderness of Ziph (1 S. 23:14-24; 26:1-5) during his flight from Saul. Heb. *regel* refers, literally, to the place where David's "foot" was. Jackals (Isa. 34:13; 35:7; Jer. 49:33; 51:37) usually inhabit a desolate or ruined place — in these passages, places devastated as a result of God's judgment. Gk. *phylakḗ* usually refers to a place of detention for those awaiting sentence — thus, a "prison" (cf. He. 11:36; 1 Pet. 3:19; Rev. 20:7). In this sense, fallen Babylon (Rev. 18:2) would be equivalent to the abode of Satan, the fallen angels, and the spirits of unbelievers as they await the final sentence of divine judgment. It is also possible, however, that here *phylakḗ* designates the habitation from which these beings keep watch (cf. R. Mounce, comm. on Revelation [*NICNT*, 1977], p. 323; H. B. Swete, comm. on Revelation [repr. 1954], p. 227).

Bibliography.–W. J. Dalton, *Christ's Proclamation to the Spirits* (1964), pp. 158ff.; M. H. Scharlemann, *Concordia Theological Monthly*, 27 (1956), 81-94. J. T. DENNISON, JR.

HAURAN ho'ran, hôr'ən [Heb. *ḥawrān*–'black-land'? (see BDB, p. 301; KoB, p. 284); Gk. *Auranitis*; Gk. *Loraneitis* in Ezk. 47:18 appears to be a copyist's error]. A province in Transjordan N of the Yarmuk River and E of the Sea of Galilee. The term occurs in the Bible only in Ezk. 47:16, 18 and serves to mark the boundary of the ideal land of Israel at its northern and eastern extent.



The name occurs in Egyptian texts of the 19th Dynasty as *Ḥu-ru-na*, and four centuries later in Assyrian texts. In his eighteenth year, Shalmaneser III (859-824 B.C.) crossed the Euphrates for the sixteenth time, moving against the Aramean city-states. He records, "I advanced as far as the mountains of Hauran" (*šadêᵉ* ^{mât}*ḫa-ú-ra-ni*; see *ARAB*, I, § 672; *ANET*, p. 283). According to Y. Aharoni, Tiglath-pileser III (745-727 B.C.) reorganized sixteen districts of Aram-Damascus into four or five Assyrian provinces, one of which was Hauran (*LBHG*, p. 333). In an accompanying map, Aharoni shows the province of Hauran lying E of the provinces of Karnaim and Gilead, hence only the eastern portion of what is generally included in the term. (He does not provide specific documentation for these data. The reference to "sixteen districts of Aram" is found in *ARAB*, I, § 777; *ANET*, p. 283.) Ashurbanipal (669-631), in his ninth campaign, which was chiefly against Uate' king of Arabia, records a victory in a bloody battle "in the district of Haurina" (*ARAB*, II, § 818; *ANET*, p. 298).

Jews, Greeks, and Nabateans settled in Hauran in the 4th and succeeding centuries B.C., and there were continuing struggles for control. The Maccabeans conquered the region in the 2nd cent., and the Nabateans took it from Alexander Janneus in 90 B.C. It was then known as Auranitis, a province bounded on the north by Trachonitis and on the northwest by Gaulanitis (Josephus *Ant.* xvii.11.4 [319]; xviii.4.6 [106]). It was made part of the Decapolis by Pompey. About 23 B.C. Augustus gave it to Herod the Great, and upon his death it passed to Herod Philip (Lk. 3:1). Caligula gave it to Herod Agrippa I in A.D. 37, and subsequently it was ruled by Agrippa II until the Roman war. For a brief period (A.D. 85-106) it was ruled by the Nabateans, but it was finally passed to the Romans and was made part of the province of Syria (*BJ* i.20.4 [398-400]; ii.6.3 [94f.]; ii.17.4 [421]).

The extent of the identification of Hauran with BASHAN cannot be determined, but the names refer in part at least to the same territory, which is tableland at an elevation of between 490 and 700 m. (1600 and 2300 ft.), extremely fertile, with well-watered soil of volcanic origin. Except for the slopes of Jebel ed-Druze to the east, the region is almost without trees, and is important for the production of wheat.

Modern Hauran (Ḥaurân) is approximately equivalent in extent to the province of Auranitis, extending from Jebel el-'Aswad in the north to the Yarmuk River in the south, and from el-Jōlân (Golan) on the west to Jebel ed-Druze on the east. It is thus the eastern portion of Hauran as the term is generally applied, and constitutes a region about 80 km. (50 mi.) long and 72 km. (45 mi.) wide. Ḥaurân is divided into three districts: (1) el-Lejâ in the northwest, a region filled with volcanic rocks; (2) en-Nuqra in the southwest, a region of decomposed lava; and (3) el-Jebel, the mountain range on the east, known as Jebel Ḥaurân and as Jebel ed-Druze. It received the latter name because the Druzes settled in this region after they were driven from the Lebanon in 1860. Jebel Ḥaurân is mentioned in the Mishnah as one of the heights where the fire signals were lighted to announce the beginning of the New Year (*Rosh ha-Shanah* ii.4).

W. S. L. S.

HAVEN [Heb. *ḥôp*; cf. Arab. *ḥaffat*–'border'] (Gen. 49:13); [*māḥôz*] (Ps. 107:30); NEB HARBOUR; [*bô'*] (Isa. 23:1); AV "entering in"; NEB "port of entry." *Ḥôp* means primarily "shore" (cf. RSV "shore" in 49:13a); the context, however, indicates a place where ships are harbored. Heb. *māḥôz* occurs only once in the OT and seems to refer to a "shipyard" (KoB, p. 512). The verb *bô'* means literally to "enter."

In biblical times Palestine possessed no good harbors. South of Mt. Carmel the coastline is almost straight. The Bay of Accho, called Ptolemais in NT times (Acts 21:7), offered the best natural harbor, but it lacked adequate shelter from the winds. Dor and Joppa were also used, but they provided even less protection in stormy weather. Phoenicia's shoreline is much rougher, and natural ports at places such as Tyre and Sidon encouraged the development of trade. *See* SHIPS.

See *WBA*, p. 18. N. J. O.

HAVILAH hav'ə-lə, hav'ē-lä [Heb. *ḥᵃwîlâ*–perhaps 'a stretch of sand' as diminutive of *ḥôl*–'sand'].

1. A son of Cush and a grandson of Ham (Gen. 10:7; 1 Ch. 1:9).

2. A son of Joktan and a grandson of Eber (Gen. 10:29; 1 Ch. 1:23).

HAVILAH hav'ə-lə, häv'ē-lä [Heb. *ḥᵃwîlâ*–perhaps 'a stretch of sand' as diminutive of *ḥôl*–'sand']. A land (or lands?) of uncertain location. Gen. 2:11f. associates it with the Pishon River and with the natural resources of gold, bdellium, and onyx stone. The Pishon has been variously identified with a lower branch of the Nile (Aharoni, p. 21), the Indus or Ganges rivers (cf. Skinner, pp. 64f.), the Wâdī el-Dhawasir in central Arabia (Glaser, pp. 319-326), and other rivers. Gold and fragrant gums are found in various places in the Arabian peninsula. No certainty of location is therefore achieved by these associations. Gen. 10:30 places it somewhere between Mesha (northern Arabia?) and the "hill country of the east," but neither of these can be identified with certainty. Gen. 10:7 places it near Seba (southwestern Arabia?), Sabtah (northwestern or southern Arabia?), Raamah (southwestern Arabia?), and Sabteca (?), but again no certainty of location can be attained. Gen. 25:18 makes it, with Shur (on the northeastern border of Egypt), a boundary of the Ishmaelites. This might suggest a location in eastern Arabia, but a southern location cannot be ruled out. 1 S. 15:7, in language akin to Gen. 25:18, traces Saul's routing of the Amalekites from "Havilah as far as Shur," thus locating it somewhere in the northeastern Sinai peninsula (however, in this passage an original Hachilah may have been corrupted to Havilah; cf. 1 S. 23:19; 26:1, 3). The ancient geographer Strabo mentions a people called Chaulotaioi who lived in northern Arabia (*Geog.* xvi.4.2) and who may in some way be connected. Another possible connection is the ancient city of Avalitis (Pliny *Ep.* vi.28), modern Zeila in Somalia.

None of this evidence is conclusive, and it may well be that more than one area was known as Havilah. It is also possible that a single Havilah encompassed a large geographical area.

Bibliography.–Y. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* (rev. ed. 1977); E. Glaser, *Skizze der Geschichte Arabiens*, II (1890); J. A. Montgomery, *Arabia and the Bible* (1934); J. Skinner, comm. on Genesis (*ICC*, 2nd ed. 1930).

J. E. H.

HAVOC. In the RSV the word is used only once. The apostle Paul is described in Acts 9:21 as "the man who made havoc [Gk. *porthéō*] in Jerusalem." The Greek verb means "pillage" or "destroy" (cf. AV "destroy"; NEB "try to destroy").

HAVVOTH-JAIR hav'əth jā'ər [Heb. *ḥawwōṯ yā'îr*–'the tent-villages of Jair'; Gk. *Ayōth Iaïr*]; AV HAVOTH-JAIR, "towns of Jair" (1 Ch. 2:23). A number of villages in Bashan (hence AV Bashan-havoth-jair in Dt. 3:14) and/or Gilead (Nu. 32:40f.; Dt. 3:14; Jgs. 10:4; 1 Ch. 2:23; cf. "towns of Jair," Josh. 13:30; "villages of Jair," 1 K. 4:13). According to Dt. 3:14 Jair of the tribe of Manasseh took possession of "all the region of ARGOB," defined as "Bashan, as far as the border of the Geshurites and the Maacathites," and called the villages after his name, Havvoth-jair. This seems clear, but other passages complicate the problem. In Josh. 13:30 "all the towns of Jair" (lit. "all Havvoth-jair") were in Bashan, specifically "sixty cities." Jgs. 10:4, however, specifies "thirty cities, called Havvoth-jair" and locates them "in the land of Gilead." According to 1 K. 4:13 a certain Ben-geber "had the villages of [Heb. *ḥawwōṯ*] Jair the son of Manasseh, which are in Gilead, and he had the region of Argob, which is in Bashan, sixty great cities with walls and bronze bars." 1 Ch. 2:23 records that Jair had 33 cities in the land of Gilead, but Geshur and Aram "took from them Havvoth-jair, Kenath and its villages, sixty towns."

There are several problems. (1) Jair is a descendant of Manasseh in all references except 1 Ch. 2:23, which traces his descent from Judah through Tamar, Perez, and Hezron. Possibly traditions have become intertwined, and two persons named "Jair" are to be distinguished. However, Machir the son of Manasseh settled in Gilead (Nu. 32:40), and Jair was the son of Segub and grandson of Hezron and the daughter of Machir (1 Ch. 2:21f.). It is therefore possible to conclude that only one Jair is intended. (2) Were there 60, 30, or 33 villages? The assumption that there were 30 (or 33, with 30 serving as a round number) in Gilead and either another 30 (totaling 60) or an additional 60 in Bashan agrees with 1 K. 4:13. (3) The precise boundaries of Bashan cannot be determined (*see*

BASHAN), but the Yarmuk River is generally taken to be the boundary between Gilead (to the south) and Bashan (to the north). (4) The inclusion of "as it is to this day" indicates that part or all of the passage in Dt. 3:14 is a scribal gloss of a later date and cannot be used as an earlier and therefore more definitive description. (5) The relationship of Argob to Bashan is problematic. The above problems prevent a clear solution at present.

W. S. LASOR

HAWK [Heb. *nēṣ*; Gk. *hiérax*] (Lev. 11:16; Dt. 14:15; Job 39:26). One of several small or medium-sized birds of prey of the genus *Accipiter*. In biblical times the largest Palestinian hawks were 60 cm. (2 ft.) long with flat heads, hooked beaks, strong talons, and extremely keen eyes. They nested on Mt. Carmel and on the Galilean hills in large trees and on mountain crags. Flocks of them were found near Beer-sheba and in the region of the Dead Sea. They constructed crude nests of twigs, and most of the food they found was carried off alive to their young. The lists of Lev. 11:13-19 and Dt. 14:11-18 each included hawks of several species. The sparrow hawk (*Accipiter nisus*) may be referred to in Lev. 11:16; Dt. 14:15; Job 39:26, while in Lev. 11:14; Dt. 14:13; Job 28:7 (Heb. *'ayyâ*, "falcon, buzzard"; AV KITE, VULTURE; NEB also KITE) either the falcon (*Falco peregrinus*), the buzzard (*Buteo ferox*), or the harrier (*Circus aeruginosus*) could be indicated. Perhaps the kite (*Milvus migrans*) was referred to in Lev. 11:14 (possibly the "buzzard" of Dt. 14:13). The allusion in Job 39:26 appears to be to the soaring flight of these birds.

The species of bird designated by Heb. *qā'aṯ* in Isa. 34:11 is uncertain. The RSV translates "hawk," whereas the AV has "cormorant" and the NEB "horned owl."

See also FALCON; KITE.

R. K. H.

HAY [Gk. *chōrtos*] (1 Cor. 3:12). Used metaphorically by Paul to describe faulty "work" built on the foundation of Jesus Christ. *See* GRASS.

HAZAEL hă'zə-el [Heb. *ḥ*^{a}*zâ'ēl*, *ḥ*^{a}*zā'ēl*, Akk. *Ḫaza'ilu*]. A highly placed court official under Ben-hadad (II?). Hazael was first mentioned in a statement by God to Elijah that the prophet was to anoint Hazael as king of Syria (1 K. 19:15). Subsequently Ben-hadad became ill and sent Hazael to Elisha for a prognosis (2 K. 8:7-9). While visiting the prophet in Damascus, Hazael was informed that he himself would succeed to the throne of Syria, a prospect that dismayed Elisha considerably even though he was the bearer of the tidings (2 K. 8:11-13). On his return Hazael suffocated his ailing master and succeeded immediately to the throne (*ca.* 843 B.C.). In the annals of Shalmaneser III king of Assyria (859-824 B.C.), the incident was recorded in the following terse statement: "Adad-'idri forsook the land; Hazael, the son of a nobody [i.e., one without royal parentage], seized the throne."

In an early demonstration of Syrian power, Hazael resisted the attack of a coalition formed by Jehoram of Israel and Ahaziah of Judah (*ca.* 842 B.C.). Ramoth-gilead, which had been recaptured by Jehoram, was besieged by Hazael, and in the ensuing battle Jehoram sustained severe wounds and returned to Jezreel (2 K. 8:28f.; 9:14f.). The annals of Shalmaneser III recorded that in his 18th year (*ca.* 841 B.C.) he fought a battle against Hazael at Damascus, in which the Syrian capital and its king survived, although the surrounding countryside and its villages were devastated. The annals claimed the defeat of the Syrian king, who was described as losing 1121 chariots, 6000 soldiers, and 470 horsemen, along with large quantities of supplies and a considerable amount of Syrian territory. Hazael survived yet another Assyrian attack on Damascus (*ca.* 837 B.C.), after which Shalmaneser abandoned any further attempts to curb the increasing strength of the city-states in Syria.

Hazael's name in cuneiform (2nd line: *^{m}ḫa-za-'i-il*). Detail from the Black Obelisk of Shalmaneser III (Trustees of the British Museum)

Freed from the threat of Assyrian military intervention, Hazael was able to move against Israel and Judah at will. Jehu of Israel (841-813 B.C.) found himself in a state of almost continuous submission to Hazael, having to forfeit all of his lands E of the Jordan (2 K. 10:32f.; Am. 1:3) from the Arnon to Bashan in the north. Jehu's successor Jehoahaz (813-798 B.C.) fared little better than his predecessor. The Syrians swept through the country (2 K. 13:1-9), and the forces of Jehoahaz were reduced in numbers to such an extent that Israel was in complete servitude to Syria.

This eventuality was viewed in 2 K. 13:3 as an outpouring of divine anger upon an apostate nation, and would have resulted in the extermination of Israel had not God shown some compassion (2 K. 13:22f.). Not content with subjugating Israel, Hazael also turned his attention to the southern kingdom. Apparently he was eager to control the lucrative caravan trade routes which terminated in Philistia. Accordingly Hazael marched southward, reducing Gath (2 K. 12:17) and other Philistine cities. Having secured his flank he turned to attack Jerusalem, but was dissuaded from his objective by Joash of Judah (837-796 B.C.), who offered him large amounts of palace and temple treasure if he would spare the capital city (2 K. 12:17f.; 2 Ch. 24:23f.).

Hazael died *ca.* 798 B.C., shortly after the decease of Jehoahaz of Israel (2 K. 13:24), and it was only then that the northern kingdom was able to halt further Syrian aggression under Hazael's son Ben-hadad. Hazael did much to ensure that Damascus became a prosperous and attractive capital city, and for this enterprise he was commemorated in subsequent ages (Josephus *Ant.* ix.4.6 [93]). Archeological excavations at Arslan Tash, the site of a provincial capital known to the Assyrians as Ḫadâtu, revealed the presence of a small ivory inlay from a couch or bed. On the inlay was written ". . . belonging to our lord Hazael. . . ." The bed may have been taken as spoil to Assyria during a raid by the armies of Adad-nirari III (805-782 B.C.).

R. K. H.

HAZAIAH hə-zā'yə [Heb. *ḥ*^{a}*zāyâ*—'Yahweh sees']. Among

the inhabitants of Jerusalem mentioned in the list of Judahites in Neh. 11:5.

HAZAR-ADDAR hā'zər-ad'ər [Heb. *ḥ^{a}ṣar-'addār*–'noble (or 'wide') village'; Gk. *épaulis Arad*]. A place named among the settlements of southern Judah, near the border with Edom (Nu. 34:4). The site of Khirbet el-Qudeirât, 11 km. (7 mi.) NW of Kadesh-barnea, fits the context very well (cf. Ezk. 47:17). Evidently it is the same place mentioned in Josh. 15:3 by the name HEZRON, although in this passage ADDAR follows as a separate locality.
A. H. LEWIS

HAZAR-ENAN hā'zər-ē'nən [Heb. *ḥ^{a}ṣar ʿênān*–'village of the spring'; Gk. *aulḗ toú Ainan*; *Asernain*]; **HAZAR-ENON** [Heb. *ḥ^{a}ṣar ʿênôn*]. A place at the easternmost point of the ideal northern boundary of the Promised Land, midway between Damascus and the land of Hamath (Nu. 34:9; Ezk. 47:17 [NEB also 16; RSV also 18]; 48:1). Simons (*GTTOT*, §§ 283f.) places it at modern Qaryatein, about 112 km. (70 mi.) NE of Damascus in the direction of Palmyra. From its name and position, Hazar-enan must have been an important desert oasis. A. H. LEWIS

HAZAR-GADDAH hā'zər-gad'ə [Heb. *ḥ^{a}ṣar gaddâ*–'village of good fortune'; Gk. B *Seri*, A *Asergadda*]. One of the southern towns taken and inhabited by the tribe of Judah (Josh. 15:27). Some have suggested a locality near the western shore of the Dead Sea. "Cliff" or "riverbank" is an alternate connotation of *gaddâ* (Aram. *gûddā'*), which could indicate a site overlooking one of the wadis such as the towering Masada. A. H. LEWIS

HAZAR-HATTICON. *See* HAZER-HATTICON.

HAZARMAVETH hā-zər-mā'veth [Heb. *ḥ^{a}ṣarmāweṯ*–'court of death'; Gk. *Asarmṓth*]; NEB HAZARMOTH. A place founded by descendants of the Semite Joktan (Gen. 10:26; 1 Ch. 1:20). Its location along the southern coast of Arabia is still marked by the cognate name (Wâdī) Hadramaut, which is a region of the Aden Protectorate. Excavations in this area have produced evidence of an ancient and powerful civilization; its capital was at Sabteca.

Bibliography.–H. von Wissman and M. Höfner, *Beiträge zur historischen Geographie des vorislamischen Südarabien* (1952); *BASOR*, 129 (1953); W. L. Brown and A. F. L. Beeston, "Sculptures and Inscriptions from Shabwa," *Journal of the Royal Asiatic Society* (1954), 43-62. A. H. LEWIS

HAZARMOTH. *See* HAZARMAVETH.

HAZAR-SHUAL hā'zər-shōō'əl [Heb. *ḥ^{a}ṣar šûʿāl*–'village of the fox'; Gk. *Arsṓla, Asersoual, Esērsoual, Esēreoulab*]. One of the localities of the Negeb assigned to the tribe of Simeon (Josh. 19:3; 1 Ch. 4:28). It occurs only three times in the OT and always in connection with Beer-sheba. It may be identified hypothetically with Khirbet el-Meshash, 24 km. (15 mi.) E of Beer-sheba (*GTTOT*, § 317). Postexilic Judah again occupied Hazar-shual (Neh. 11:27). A. H. LEWIS

HAZAR-SUSAH hā'zər-sū'sə [Heb. *ḥ^{a}ṣar sûsâ*–'horse corral'; Gk. B *Sarsousin*, A *Asersousim*] (Josh. 19:5); **HAZAR-SUSIM** sū'sim [Heb. *ḥ^{a}ṣar sûsîm*; Gk. *hémisy Sōsim*] (1 Ch. 4:31). A place listed among the villages of Simeon in the central part of the Negeb (Josh. 19:5). The neighboring village of Beth-marcaboth, whose name means "house of chariots," strengthens the idea that these towns were either depots for horse traders or military stations. The plural form of the name in 1 Ch. 4:31 suggests that it is to be understood generically, rather than as "station of the mare." The site has not been identified, though *WHAB* suggests Sbalat Abū Sûsein, about 32 km. (20 mi.) W of Beer-sheba. A. H. LEWIS

HAZAZON-TAMAR haz'ə-zon-tā'mar [Heb. *ḥaṣ^{e}ṣōn tāmār*–'Hazazon of the palm trees']; AV HAZEZON-TAMAR. A place described (Gen. 14:7) as the home of an Amorite (Canaanite) group that was conquered along with En-mishpat and the territory of the Amalekites by an Elamite coalition under Chedorlaomer. In 2 Ch. 20:2 it is identified with En-gedi, a freshwater spring situated at about the midpoint of the west coast of the Dead Sea, whose ancient name has survived to modern times. The Chronicler's identification may be only approximate, since the site of the village has yet to be uncovered. Quite possibly it was the same place as the Tamar Solomon fortified (1 K. 9:18) in southeast Judah, which was located by Ezekiel (Ezk. 47:19; 48:28) in the southeast corner of the land of Israel. Tamar may perhaps be the modern Kurnub, 32 km. (20 mi.) WSW of the southern end of the Dead Sea, or if Hazazon-tamar is identified with En-gedi, its name has been preserved in the nearby oasis of Wâdī el-Ḥaṣāṣa NW of ʿAin Jidi. R. K. H.

HAZEL. *See* ALMOND.

HAZELELPONI. *See* HAZZALELPONI.

HAZER-HATTICON hā'zər-hat'ə-kon [Heb. *ḥ^{a}ṣēr hattîḵôn*–'the middle village'; Gk. *aulḗ toú Saunan*] (Ezk. 47:16); AV HAZAR-HATTICON; NEB HAZAR-ENAN. From its context the name appears to be another name for HAZAR-ENAN. A. H. LEWIS

HAZERIM hə-zir'im [Heb. *ḥ^{a}ṣērîm*] (Dt. 2:23, AV); RSV VILLAGES; NEB HAMLETS. This term is found only in the AV's transliteration in Dt. 2:23. It should be translated as "villages" (unwalled settlements; cf. Lev. 25:31) as in the RSV here and in the RSV and AV in Josh. 19:8; Neh. 11:25; etc. The villages were located in southwest Palestine, near Gaza, and were inhabited by the Avvim.

HAZEROTH ha-zē'rōth, haz'ə-roth [Heb. *ḥ^{a}ṣērôṯ*–'enclosures']. An Israelite camp during the wilderness wanderings, the third from Sinai (Nu. 33:17f.; 11:35; 12:16; Dt. 1:1). It was there that Miriam and Aaron spoke against Moses' marriage to the Cushite woman and against his position as the sole mediator between God and Israel (Nu. 12:1f.). Miriam's resultant leprosy caused a week's delay in their journey (12:15f.; cf. *GTTOT*, § 432). The probable location is ʿAin Ḥaḍrā ("spring of the enclosure"), about 48 km. (30 mi.) NE of Jebel Mûsā (Mt. Sinai?), on the way to Aqabah.

See *GP* (1938), II, 214, 344. D. M. WATSON

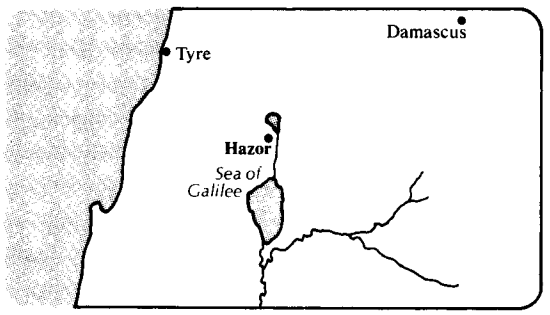
HAZEZON-TAMAR. *See* HAZAZON-TAMAR.

HAZIEL hā'zi-əl [Heb. *ḥ^{a}zî'ēl*–'divine vision'] (1 Ch. 23:9). A Levite of the sons of Shimei, of David's time.

HAZO hā'zō [Heb. *ḥ^{a}zô*] (Gen. 22:22). Fifth son of Nahor. Possibly the eponym of a Nahorite family or clan.

HAZOR hā'zōr, hot'sôr [Heb. *ḥāṣôr*; Gk. *Asōr*]; AV Apoc. NASOR; NEB Apoc. ASOR.

1. A major urban center of Galilee during the 2nd mil-



lennium B.C., perhaps the capital of the region; later an important city in the Israelite monarchy.

I. Name.–The Middle Bronze Age forms in nonbiblical sources, *ḥdw3i* (Egyptian Execration Texts) and ^{uru}*ḥa-ṣú-ra(-a)*^{ki} (Akkadian from Mari), and from the Late Bronze Age, *ḥ-ḏ-r* (Thutmose III, *et al.*) and ^{uru}*ḥa-ṣú-ra/ri* (Am. Tab.), all point to an original **Ḥaṣōr(ā)*, evidently < **Ḥaḍār-*, meaning "settlement" (cf. BDB, p. 347). The shift of ā > ō suggests that the form is Canaanite in origin.

II. History.–The earliest historical allusion (12th Dynasty = M. B. II A, *ca.* 20th cent. B.C.) to Hazor is in the Egyptian Execration Texts' list of enemies to be cursed. The ruler of Hazor had the apparently non-Semitic name *Geṯ3i*; evidently he was not a vassal of Egypt, or he would not have been designated for the curse.

Hazor next appears in the archives of Mari, the famous Amorite center on the Euphrates. An ambassador to Hazor from Babylon, accompanied by an escort from Hazor, passed through Mari on his way back to Mesopotamia (*ARM*, VI, 78:5-17). Another group of ambassadors from several Babylonian cities traveled by way of Mari to the cities of north Syria and Hazor (*ARM*, VI, 23:19-24). An unpublished text records that the king of Hazor, Ibni-Adad, sent gifts to Ugarit and to Kaptara (Caphtor); Hazor also received a shipment of valuable metal from Mari (*ARM*, VI, 236). All of these passages agree with information from an ancient itinerary embedded in the text of a Babylonian "Dream Book." Hazor was the southernmost station on the route from Babylon to the West. It was evidently a major city in the Amorite milieu of that day (the Mari-Hammurabi age, M. B. II B, *ca.* 19th-18th cents. B.C.). That its ruler had an Akkadian name (Ibni-Adad) rather than an Amorite one (which would be Yabni-Addu) is remarkable, but this conforms with the find of an Išme-type name incised on a jar in the excavations at Hazor.

In the Late Bronze Age, Hazor again appears as one of the major cities of Galilee. It was conquered by Thutmose III (mid-15th cent. B.C.), but its appearance in a list from the reign of Amenhotep II (*ca.* 1430) suggests that it had some part in the rebellions against Egyptian rule under the 18th Dynasty. On the other hand, an emissary from Hazor (with an unusual spelling) appears in the Leningrad (St. Petersburg) Papyrus 1116A along with other representatives from some of the principal city-states in the Levant, especially Galilee.

During the 14th cent. B.C. Hazor continued to play an important role in the political foment of the so-called Amarna age. The ruler of Hazor is known to have sent two epistles to Pharaoh (Am.Tab. 227f.). In one he dares to call himself "king," but in the other he is more circumspect vis-à-vis the Egyptian overlord and gives himself the customary title "man" of Hazor. He is the only Canaanite ruler to adopt the royal title in correspondence with Egypt. He avers that he is faithfully preserving "Hazor together with its cities" for Pharaoh. Apparently an Egyptian military campaign was at hand and the monarch's arrival at Hazor was imminent. The local ruler, ʿAbdi-tirši, pleaded for Pharaoh's attention to the hostile activity against Hazor. But two other rulers in Canaan accused Hazor of disloyalty and sedition. Ayyāb (Job), apparently ruler of Ashtaroth in Bashan, accused Hazor's king of taking three towns from him (Am.Tab. 364:17-23); thus Hazor may have been expanding its influence eastward. Abimilki king of Tyre charged that "the king of Hazor has left his house [i.e., his proper sphere of influence] and aligned himself with the ʿApiru" (Am.Tab. 148:41-43). The outcome of these intrigues is unknown.

The disturbances that rocked the Levant during the transition from the 18th to the 19th Egyptian Dynasty probably permitted city-states such as Hazor a short breathing space of independence until Seti I succeeded in reimposing Egyptian suzerainty over the area; then Hazor appears again on that pharaoh's topographical list. Its geographical significance on the major route leading from Galilee to the Lebanese Beqaʿ is emphasized by the "Satirical Scribe" (*ANET*, p. 477b). A survey in Golan has shown that Bronze Age sites do not lie along the Roman road from Hazor to Damascus (across the "Bridge of Jacob's Daughters"); the more ancient highway must have followed the western side of the Huleh Valley to Abel-beth-maacah and Dan.

When the Israelites entered Galilee they experienced a confrontation with the royal house of Hazor on two fronts: in upper Galilee near the waters of MEROM (not Lake Huleh!) as depicted in Josh. 11, and in lower Galilee (Jgs. 4f.). Its fate was exceptionally hard in contrast to the other Canaanite centers in the area: ". . . none of the cities that stood on mounds did Israel burn, except Hazor only . . ." (Josh. 11:13). Hazor had formerly been the acknowledged leader in Galilee (Josh. 11:10), a position she had probably enjoyed sporadically from the Middle Bronze Age until the arrival of the Israelites. Either the same ruler of Hazor, Jabin, or a member of his dynasty, seems to have ruled southern Galilee (Harosheth-ha-goiim) through his viceroy Sisera. The Israelite victory under Deborah (Jgs. 4f.) marked the decline of Hazor's power in the region (Jgs. 4:23f.).

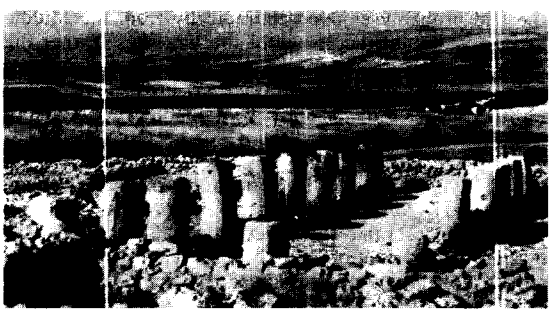
The city was allotted to the territory of Naphtali (Josh. 19:36), and its position in the list of Naphtali's towns (after Ramah) suggests that it was reckoned with upper Galilee in spite of its position in the valley below. During the united monarchy Hazor assumed a major role as one of Solomon's chief fortified cities (1 K. 9:15) along with Gezer and Megiddo (concerning the similar fortifications at all three sites, see below). Although it is not specifically mentioned, Hazor can scarcely have avoided destruction during the attack by Ben-hadad king of Aram in Galilee (1 K. 15:20; 2 Ch. 16:4).

Around 733 B.C. Tiglath-pileser III of Assyria invaded Galilee and brought Israelite independence there to an end. Hazor was one of the major towns captured at that time (2 K. 15:29). The city then fell into obscurity until the Hellenistic period, when Jonathan Maccabeus achieved a great victory over the Seleucid Demetrius (1 Macc. 11:67-74). The enemy retreated to the high ground around Kadesh (cf. Tob. 1:2).

III. Site.–Josephus (*Ant.* v.5.1 [199]) stated that Hazor was located "above Lake Semachonitis," the modern Lake Huleh (drained 1956); but he does not, as often supposed, equate the lake with the "waters of Merom" (Josh. 11:5). The first modern investigator to identify Hazor correctly with the mound of Tell el-Qedaḥ (also known as Tell el-Waqqâṣ) was J. L. Porter (*Handbook for Travellers in*

House at Hazor from the time of Amos showing earthquake damage (cf. Am. 1:1) (Institute of Archaeology, Hebrew University of Jerusalem)

These pillars at Hazor, at one time thought to be part of Solomon's stables, are now identified as part of a large storehouse (9th cent. B.C.) (W. S. LaSor)



Syria and Palestine [1875], pp. 415f.). His proposal was ignored or forgotten by other scholars until J. Garstang revived it (apparently unaware of Porter's priority) and conducted some excavations on the site (*Joshua-Judges* [1931], pp. 183-198, 381-83).

During the years 1955-58 four extensive seasons of excavation were carried out at Tell el-Qedaḥ under the direction of Y. Yadin. A further season was devoted to special problems during the fall of 1968. The abundance of finds has revealed much about the development of Hazor as an ancient urban center. *See* Plate 22.

Between Areas A and B, for example, later excavations have brought to light a shaft from the Israelite period that evidently was part of a water system similar to those at Megiddo and elsewhere. Area H reveals a temple whose plan has affinities with those of north Syria. Its later phases saw certain modifications in the ornamentation and utilization of the various rooms, including the addition of a "porch." Two pillars stood *within* the porch (note the striking parallel to 2 Ch. 3:17); the general arrangement is reminiscent of that later established for the Solomonic temple, with two major differences: the temple was already oriented N to S, and the innermost room contained the principal cult apparatus, altars, basins, etc. The niche in the northernmost wall would logically correspond to the holy of holies of the Israelite shrine; the image of the deity must have stood there, perhaps behind a veil.

A. F. RAINEY

2. An unidentified town in southern Judah (Josh. 15:23). On the basis of the LXX B reading (*Asōrionaín*), some scholars (e.g., *WHAB*) would read it as Hazor-ithnan (cf. HAZOR-HADATTAH) and identify it with el-Jebarîyeh on the Wâdī Umm Ethnān, about 60 km. (37 mi.) SW of Beer-sheba.

3. Another town in southern Judah, identified with KERIOTH-HEZRON (Josh. 15:25).

4. A town inhabited by Benjaminites after the Exile (Neh. 11:33). It is now Khirbet Hazzûr, about 5 km. (3 mi.) NW of Jerusalem.

5. An unidentified place in Arabia conquered by Nebuchadnezzar (Jer. 49:28-33). It is uncertain whether the reference is to one town or several villages (cf. J. Bright, *Jeremiah* [*AB*, 1965], p. 336) G. A. L.

HAZOR-HADATTAH hā'zôr-hə-dat'ə [Aram. (?) *ḥāṣôr ḥ"ḏattâ*–'new Hazor'] (Josh. 15:25); AV HAZOR, HADATTAH. A city of Judah in the south, toward Edom (15:21). The presence of the Aram. adj. *ḥ"ḏaṯ* (cf. Heb. *ḥāḏāš*) is peculiar, since Aramaic influence is generally thought to be limited to the northeastern area of Palestine. Although Eusebius *Onom.* lists an *Asōr tēn kainēn*, it is located E of Ashkelon, and thus too far north to be Hazor-hadattah. It may be that residents of Hazor (which probably had some Aramean influence) resettled in the Negeb and named their town "New Hazor," using their native language, Aramaic. G. A. L.

HAZZELELPONI haz-ə-lel-pō'nē [Heb. *haṣṣ"lelpônî*]; AV HAZELELPONI. A feminine name in the list of the genealogy of Judah (1 Ch. 4:3).

HE hā [ה]. The fifth letter of the Hebrew alphabet, transliterated in this encyclopedia as *h*. It came also to be used for the numeral five and with the diaeresis for five thousand. *See* WRITING.

HEAD [Heb. *barzel*] (Dt. 19:5; 2 K. 6:5); [*gulgōleṯ*] (Ex. 38:26; Nu. 1:2, 18, 20, 22; 1 Ch. 10:10); AV also MAN, POLLS; NEB also SKULL; [*lehāḇâ*] (1 S. 17:7); [*lipnê*] ("at the head," Dt. 3:28; 10:11; 31:3; Jgs. 3:27; 9:39; 2 S. 10:16; 1 Ch. 19:16; Zec. 12:8); AV "before"; NEB also "across," "before," "led out"; [*m"ra'"šâ*] (Gen. 28:11, 18; 1 S. 19:13, 16; 26:7, 11f., 16; 1 K. 19:6; Jer. 13:18); AV also BOLSTER, PILLOW, PRINCIPALITY; NEB also "pillow for his head"; [*nûḏ*] ("wag the head," Ps. 64:8 [MT 9]; Jer. 48:27); AV "flee from," "skip for joy"; [*nāṣaḇ*] ("stand as head," 1 S. 19:20); AV APPOINTED; [*nāśî'*] (Nu. 3:24, 30, 35; 7:2; 25:14); AV CHIEF, PRINCE; NEB also CHIEF; [*pāqaḏ*] ("set as head," Jer. 13:21); AV CHIEF; [*ṣawwā'r*] (Cant. 7:5 [MT 6]); [*ṣemaḥ*] (Hos. 8:7); AV STALK; [*qāḏaḏ*] ("bow the head," Gen. 24:26, 48; 43:28; Ex. 4:31; 12:27; 34:8; Nu. 22:31; 1 Ch. 29:20; 2 Ch. 20:18; Neh. 8:6); NEB also "down," "low," etc.; [*qoḏqōḏ*] ("crown [or scab] of the head," Dt. 28:35; 33:16, 20; 2 S. 14:25; Job 2:7; Isa. 3:17; Jer. 2:16); AV also CROWN; NEB also BROW, SCALP; [*qāraḥaṯ*] ("bald head," Lev. 13:42f.); NEB FOREHEAD; [*rō'š*] (Gen. 3:15; 40:13, 16ff.; 47:31; 48:14, 17f.; 49:26; Ex. 6:14, 25; 12:9; etc.); AV also CAPTAIN, CHIEF, CHIEF MAN, CHIEFEST PLACE, FOREFRONT, LEAD, RULER, TOP, etc.; NEB also ABOVE, CHIEF, CHIEF CITY, CORNER, CROWNED, "in authority," LEADER, LORD, MASTER, etc.; [*śêḇâ*] (Lev. 19:32; 1 K. 2:6, 9; Prov. 16:31); NEB GREY HAIR; [*śar*] (1 Ch. 29:6; Ezr. 8:29); AV CHIEF; [Aram. *rē'š*] (Ezr. 5:10; Dnl. 2:28, 32, 38; 3:27; 4:5, 10, 13 [MT 2, 7, 10]; 7:1, 6, 9, 15, 20); AV also CHIEF; NEB also LEADER; [Gk. *akatakályptos*] ("head uncovered," 1 Cor. 11:13); AV UNCOVERED; NEB BARE-HEADED; [*ákron*] (He. 11:21); AV, NEB, TOP; [*kephalḗ*] (Mt. 5:36; 6:17; 8:20; 10:30; 14:8, 11; 21:42; 26:7; 27:29f., 37, 39; Mk. 6:24ff.; etc.); NEB also CORNERSTONE, HAIR, KEYSTONE, MAIN, etc.; [*kephalióō*] ("wound in the head," Mk. 12:4).

I. In the OT.–In the OT the primary meaning of "head" is its literal sense of the upper part of the body (Gen. 28:11, 18; 40:16f.; etc.).

A. Of People. In the OT gestures and expressions involving the head had great symbolic significance. Bowing the head was an indication of prayer (Ps. 35:13), worship (Gen. 24:26, 48; Ex. 4:31; 12:27; 34:8; Nu. 22:31; 1 Ch. 29:20; 2 Ch. 20:18; Neh. 8:6), or obeisance (Gen. 43:28). Obeisance might also be indicated by winding ropes about the head (1 K. 20:31f.). Blessings were conferred on the heads of men (Gen. 48:14, 17f.; 49:26; Prov. 10:6; 11:26). The installation of priests and kings involved crowning and anointing the head with oil (Ex. 29:6f.; Lev. 8:9, 12; 1 S. 10:1; 2 K. 9:3, 6); anointing also indicated the receipt of God's blessing (Ps. 23:5; 133:2), and good men would not be anointed with the oil of the wicked (Ps. 141:5).

What was done to the head could also indicate mourning, which usually involved putting dust or ashes on it (Lev. 10:6; Josh. 7:6; 1 S. 4:12; 2 S. 1:2; 13:19; etc.). Shame called for covering the head (Jer. 14:3f.). Mockery or derision was expressed by wagging the head (2 K. 19:21; Job 16:4; Ps. 22:7 [MT 8]; 64:8; 109:25; Isa. 37:22; Jer. 18:16; 48:27; Lam. 2:15). Feeding a hungry enemy heaps coals on his head (Prov. 25:22; Rom. 12:20), but joy rests on the heads of God's ransomed ones (Isa. 35:10; 51:11).

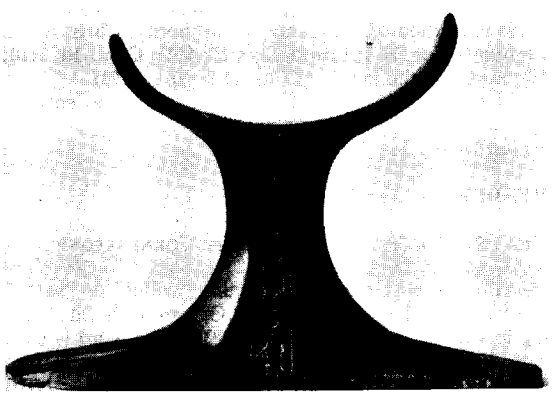
A man's responsibility for his deeds was indicated by the statement that they would return upon his head, whether murder (Josh. 2:19; 2 S. 1:16; 3:29; 1 K. 2:32ff.; Ezk. 33:4), other evil acts (1 S. 25:39; 1 K. 2:44; 8:32; 2 Ch. 6:23; Est. 9:23; Ezk. 9:10; 11:21; 16:43; 17:19; 22:31; Joel 3:4, 7 [MT 4:4, 7]; Ob. 15), taunts (Neh. 4:4), or mischief (Ps. 7:16 [MT 17]). To lift up one's head was to show pride (Jgs. 8:28; Job 10:15; Ps. 83:2 [MT 3]; 140:9 [MT 10]), but if Yahweh were the lifter, it was evidence of His favor (Ps. 3:3 [MT 4]; 27:6; 110:7; Jer. 52:31). The story of Joseph's encounter with Pharaoh's butler and baker contains an interesting juxtaposition of two meanings of "to lift the head," one indicating the restoration of someone to favor and the other indicating decapitation (Gen. 40:13, 19f.).

The head is also the center of the intellect and imagination (Dnl. 2:28; 4:5, 10, 13; 7:1, 15). "From head to foot" indicates the involvement of a man's entire body (Lev. 13:12; Dt. 28:35; Job 2:7; Isa. 1:5f.) or physical appearance (2 S. 14:25).

Finally, a "head" represents simply one person, as numbered for tax (Ex. 38:26) or census (Nu. 1:2, 18, 20, 22) purposes.

B. Of Animals. "Head" occurs also in the literal sense when it is used of animals: the serpent in Eden (Gen. 3:15); the Passover lamb (Ex. 12:9); bulls (Ex. 29:10; Lev. 1:4, 8; 3:2; 4:4, 11, 15; 8:14; Nu. 8:12), rams (Ex. 29:15, 17, 19; Lev. 8:18, 20, 22), sheep or goats (Lev. 1:12; 3:13; 4:24, 29; 16:21), lambs (Lev. 3:8; 4:33), calves (Lev. 9:13), and turtledoves or pigeons (Lev. 1:15; 5:8) used in regular or special sacrifices; mythical creatures, e.g., Leviathan (Job 41:7; Ps. 74:14), dragons (Ps. 74:13), and the creatures of the visions of Ezekiel (1:22, 25f.; 10:1) and Daniel (7:6, 20). Solomon's throne had a calf's head

Wooden headrest from Egypt (18th Dynasty, 16th-14th cents. B.C.) inscribed for the head gardener Daya (Royal Ontario Museum, Toronto)



on the back (1 K. 10:19). A famine caused the price of an ass's head to be drastically inflated (2 K. 6:25). Abner protested any implication of disloyalty to Saul by his denial of being a dog's head (2 S. 3:8).

C. Of Things. "Head" is also used of the top or upper end of a variety of other things: beds (Gen. 47:31; 1 S. 19:13, 16), idols (1 S. 5:4; Dnl. 2:32, 38), grain (Job 24:24; Hos. 8:7), gates (Ps. 24:7, 9), streets (Lam. 2:19; 4:1; Ezk. 16:25, 31; Nah. 3:10) and highways (Ezk. 21:19, 21), valleys (Isa. 28:1, 4), and the table at a feast (1 S. 9:22). It is the part of an axe (Dt. 19:5; 2 K. 6:5) or spear (1 S. 17:7) used for striking.

D. Position of Leadership. Another major meaning of "head" is the position of leadership, greatest authority, or honor (Dt. 1:15; 3:28; 10:11; 20:9; 28:13, 44; 31:3; Jgs. 3:27; 9:39; 10:18; 11:8f., 11; 2 S. 10:16; 1 Ch. 19:16; 2 Ch. 13:12; 20:27; Ps. 18:43 [MT 44]; Isa. 7:8f.; etc. Closely related to this meaning is the understanding of "head" as the one who holds this position of leadership, particularly among the families or tribes of Israel (e.g., Ex. 6:14, 25; 18:25; Nu. 1:4, 16; 2:24, 30, 35; 7:2; 10:4; 13:3; 17:3; 25:14f.; 30:1; 31:26; 32:28; 36:1; Dt. 1:13, 15; etc.).

II. In the NT.–*A. Of Persons.* In the NT the primary meaning of "head" is also the literal (Mt. 5:36; 6:17; 10:30; Mk. 12:4; Lk. 7:38, 46; 12:7; 21:18, 28; Jn. 13:9; 20:7, 12; Acts 21:24; 27:34; 1 Cor. 12:21). Jesus' head receives considerable attention: He has nowhere to lay it (Mt. 8:20; Lk. 9:58); it is anointed (Mt. 26:7; Mk. 14:3); it receives a crown of thorns (Mt. 27:29; Jn. 19:2) and blows (Mt. 27:30; Mk. 15:19), and the charge against Him is put over it (Mt. 27:37); He bows it in death (Jn. 19:30). Wagging the head is again a sign of mockery (Mt. 27:39; Mk. 15:29). In Mt. 14:8, 11 and Mk. 6:24ff. the decapitation of John the Baptist is graphically described.

Paul instructs the Corinthians that men should pray with heads uncovered, while women should cover theirs (1 Cor. 11:4f., 7, 10, 13). In Acts 18:6 ("Your blood be upon your head!") he reminds them of their responsibility for their own fate, while for the Romans (Rom. 12:20) he recalls the admonition of Prov. 25:21f.

B. Of Visionary Creatures. The book of Revelation contains references to the heads of a variety of visionary creatures: "One like a son of man" (1:14; 14:14), the twenty-four elders (4:4), sailors (18:19), an angel (10:1), a woman (12:1), one "called Faithful and True" (19:12), locusts (9:7), horses (9:17), lions (9:17), serpents (9:19), a dragon (12:3), and assorted beasts (13:1, 3; 17:3, 7, 9).

C. Of Things. In the NT "head" refers also to the top of a staff (He. 11:21) and to the most important stone in the foundation of a building, used metaphorically of Christ as the cornerstone of the Church (Mt. 21:42; Mk. 12:10; Lk. 20:17; Acts 4:11; 1 Pet. 2:7).

D. Position of Leadership. A head is also the one who holds a position of leadership and authority: Christ in the Church (1 Cor. 11:3; Eph. 1:22; 4:15; 5:23; Col. 1:18; 2:10, 19), a man in the family (1 Cor. 11:3; Eph. 5:23).

HEADSTONE (Ps. 118:22, AV). *See* CORNERSTONE.

HEADY. An obsolete term, meaning "wilful" or "rash," employed by the AV to translate Gk. *propetḗs* (lit. "falling forward, headlong") in 2 Tim. 3:4. The word is used figuratively here of those who are ready to rush into anything without thought (cf. RSV "reckless"; NEB "adventurers"). *See* RECKLESS.

HEAL [Heb. *rāpā'* almost exclusively] (Nu. 12:13); AV MAKE WHOLE (Job 5:18), CURE (Jer. 33:6); NEB CURE (2 K. 20:8), RECOVER (2 K. 8:29), DRESS (A WOUND, Jer. 6:14), TEND (THE SICK, Ezk. 34:4), etc.; also [*gāhâ*–'remove'] (Hos. 5:13), AV, NEB, CURE; [*ḥāyâ*] (Josh. 5:8); AV BE WHOLE; NEB RECOVER; [Gk. *therapeúo*–'serve'] (Mt. 8:7); AV CURE (Mt. 17:16); NEB most often CURE (Mt. 8:7), also SET FREE (Lk. 8:2); [*iáomai*]; AV MAKE WHOLE (Mt. 15:28); NEB most often CURE (Mt. 8:9), RECOVER (Mt. 8:13), RESTORE TO HEALTH (Mt. 15:28); BUT REGAIN ITS FORMER POWERS (*iathḗ dé mállon,* He. 12:13); [*hygiḗs génesthai*–'become healthy'] (Jn. 5:4, 6, 9); AV MAKE WHOLE; NEB RECOVER; [*hygiḗs poieín*–'make healthy'] (Jn. 5:11, 15); AV MAKE WHOLE; NEB CURE; [*sṓzō*– 'rescue'] (Acts 4:9); AV MAKE WHOLE; NEB CURE; [*diasṓzō*–'preserve'] (Lk. 7:3); NEB SAVE (LIFE); **CURE** [Heb. *'āsap*–'remove'] (2 K. 5:3); AV RECOVER; NEB RID; [*rāpā'*] (Hos. 5:13); AV HEAL; [Gk. *therapeúō*] (Lk. 9:1); AV HEAL; **MAKE WELL** [Gk. *sṓzō*] (Mt. 9:21); AV most often MAKE/BE WHOLE (Mt. 9:21), HEAL (Mk. 5:23), SAVE (Lk. 18:42); NEB most often CURE (Mt. 9:21); [*poieín hygiḗs*] (Jn. 7:23); AV MAKE WHOLE; NEB GIVE HEALTH; **HEALER** [Heb. *rōpē'*] (Ex. 15:26); [*ḥōbēš*] (Isa. 3:7); NEB BE MASTER; **PHYSICIAN** [Heb. *rōpē'*] (Jer. 8:22); NEB STITCHING A PATCHWORK OF LIES (*rōpᵉ'ê 'ĕlîl,* Job 13:4); [Gk. *iatrós*]; NEB DOCTOR (Mt. 9:12); **HEALING** [Heb. *marpē, marpēh*]; AV HEALTH (Prov. 4:22), REMEDY (Prov. 6:15), CURE (Jer. 33:6); NEB HEALTH (Prov. 4:22), REMEDY (Prov. 6:15), HEAL (Prov. 12:18, etc.); [*tᵉ'ālâ*] (Jer. 46:11); AV CURE; NEB (NEW) SKIN (Jer. 30:13; 46:11); [*tᵉrûpâ*] (Ezk. 47:12); AV MEDICINE; NEB ENJOYMENT; [*yāgôn*] (Jer. 8:18, meaning uncertain), AV, NEB, SORROW; [*'ᵃrûḵâ*–'new skin (over a healing wound)'] (Isa. 58:8); AV HEALTH; [*rāpā'*] (Isa. 19:22); AV HEAL; [Gk. *therapeúō*]; NEB CURE (Mt. 4:23); [*therapeía*] (Lk. 9:11); [*íasis*] (Acts 4:22); [*íama*] (1 Cor. 12:9, 30); **CURE** [Gk. *íasis*] (Lk. 13:32); **MEDICINE** [Heb. *rᵉpu'â*] (Jer. 30:13; 46:11); NEB REMEDY; [*gēhâ*] (Prov. 17:22); NEB COUNTENANCE; **REMEDY** [Heb. *marpē'*] (2 Ch. 36:16); **HEALTH** [Heb. *'ᵃrûḵâ*]; NEB SKIN (Jer. 8:22); [*marpē'*] (Prov. 16:24); [*šālôm*] (Ps. 38:3 [MT 4]); AV REST; [*ḥālam*] (Isa. 38:16, "restore to health"); AV RECOVER; NEB RESTORE; [Gk. *holoklēría*–'wholeness'] (Acts 3:16); AV SOUNDNESS; NEB COMPLETELY WELL; [*hygiaínō*] (3 Jn. 2).

Health is a condition in which the components of the body-mind complex are free from disease and function together to promote the person's well-being. A person can be healthy even with minor pathological conditions, such as benign swellings or degenerated bodily tissues due to normal aging.

Healing is a process, often involving medical, surgical, or psychiatric treatment of a pathological condition, that culminates in the functional repair, and sometimes the actual regeneration, of a previously diseased or damaged part of the body or mind.

I. Health and Healing in the Ancient Near East.–In antiq-

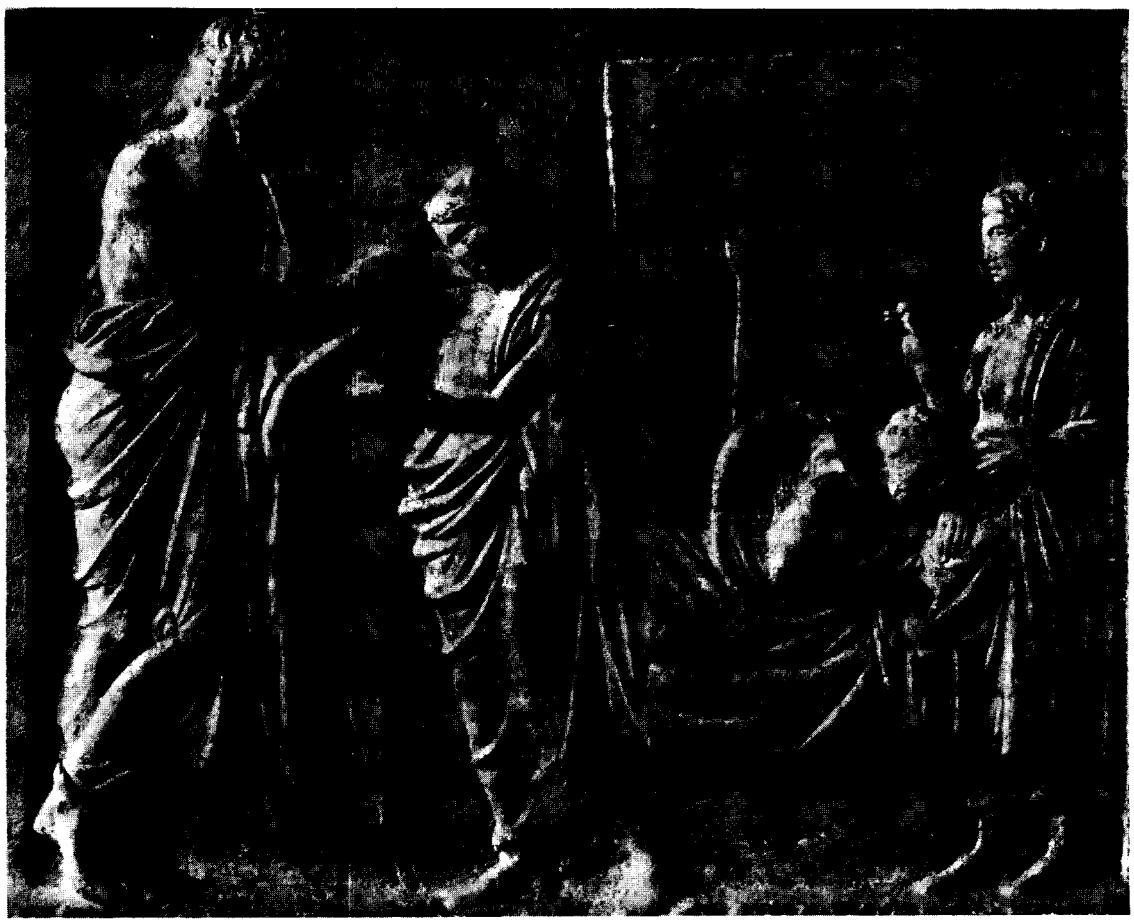
uity elevated or mountain areas, such as inland Anatolia or the Palestinian uplands, were considerably more healthy than swampy river bottoms, lowlands, or marshy districts, where mosquitoes and other disease carriers could breed. Egypt was notorious for its diseases (Dt. 28:60; cf. Ex. 15:26; Dt. 7:15), which were popularly attributed to demons or other unseen forces. Although the river regions of Mesopotamia did not seem to be so pestilential, the *Utukku* and *Ṭi'i* series of cuneiform texts suggest that the people did suffer from diseases such as malaria, smallpox, boils, water-borne infections (including amoebiasis, cholera, spirochetal jaundice, and typhoid fever), and environmental afflictions (including sandfly fever and the ophthalmic diseases hinted at in the Code of Hammurabi, §§ 215-220). More sinister diseases of demonic origin included the obscure "pestilence" in the Akkadian myth known as "Series Irra," as well as "plague," an affliction of uncertain nature.

In Egypt the priest-physicians began to establish their traditions in the late 4th millennium B.C., and early evidences of their medical practices are fiber splints for fractures (*ca.* 2800 B.C.) and the engraved representations of surgery (circumcision and perhaps amputation) on a tomb near Memphis (*ca.* 2500 B.C.). Some ancient papyri deal with medical treatment and surgery (Ebers papyrus), pharmacy and medicine (Hearst papyrus), and the treatment of surgical cases (Edwin Smith papyrus). This material probably dates from the very early 3rd millennium B.C. In what is sometimes regarded as a "pre-scientific" age, the ancient Egyptians discovered the correct (and only) way of reducing a dislocated lower jaw and established the four basic elements of a compound prescription (basis, adjuvans, corrigens, excipient) used to prepare many modern medicines. Although most of their therapeutic procedures were heavily overlaid with magic and superstition, the Edwin Smith papyrus, probably the earliest extant systematic record of surgical case histories, contains records of the examination, diagnosis, and treatment of conditions including hemiplegia, cranial traumata, fevers, and spinal and other dislocations.

The Babylonian priest-physicians generally used an etiological rather than an empirical approach to healing, although they too understood the principles involved in such matters as the treatment of fractures and certain eye problems, including cataract. Because disease was attributed to demonic activity, healing could occur only after the evil power had been exorcised and the patient given relief and peace of mind. Again, in a supposedly "pre-scientific" age, this procedure was in fact thoroughly rational, since it has been discovered in the late 20th cent. that healing of tissues is hindered if the patient is greatly worried or otherwise disturbed emotionally.

In the exorcism, the priest called upon Ea (Enki), the powerful water-deity, for help and often sprinkled the suf-

Votive relief (first half of the 4th cent. B.C.) from the sanctuary of Amphiaraus at Oropus, between Attica and Boeotia. At left, Amphiaraus, a divinized epic hero, heals Archinos, who successively sleeps in a bed (center) and dedicates a stele to the shrine (right) (National Archaeological Museum, Athens)



ferer with water to assure him that he was in direct contact with the omnipotent god. Sometimes the priest poured water upon the patient while reciting an incantation or "powerful word," a practice suggesting that the ailment would drain from his body into the ground along with the water. A ceremony of this sort, replete with spiritual power and psychological suggestion, could hardly fail to bring immediate relief to Mesopotamians afflicted with a form of emotogenic disease.

Apart from their reliance upon magic and sorcery, the Mesopotamians were at one with the Egyptians in their empirical use of a wide variety of therapeutic substances, especially herbs. The Sumerians were the first to discover the antipyretic and analgesic qualities of acetylsalicylic acid ("aspirin," the world's most widely used drug), which they made either by infusion or decoction from the bark and leaves of willow trees (one of the species of *Salicaceae* perhaps *Salix babylonica*). They were also familiar with the healing properties of many shrubs and plants, and among other achievements they have been credited with the discovery of the cathartic qualities of castor oil (*Oleum ricini*). During the period of Hammurabi (*ca.* 1792-1750 B.C.), patients were charged according to their means, and penalties were prescribed for malpractice (*see also* DISEASE II.B, C, D).

Though superstition and magic were prominent in attempts at healing in the ancient Near East, no doubt certain therapeutic procedures were prompted by essentially rational considerations. There is very little evidence that serious attention was given, either in Egypt or in Mesopotamia, to regulating diets in order to promote and maintain good health. No doubt a person would avoid substances that, when ingested, produced an allergic reaction. But aside from personal choice or religious taboo all edible substances were potentially available as food; by contrast, the restrictive dietary traditions of the Hebrews were unique in the ancient Near East. Thus, methods to ensure health and healing in the ancient Near East were based upon etiological or empirical rather than preventive considerations, and, despite their rational aspects, they were ultimately based on superstition, magic, and fear of the gods.

II. Prophylactic Legislation for Israel.—One of the unique features of ancient Hebrew life was the manner in which life was regulated in terms of divine holiness. Although other nations observed religious traditions that penetrated their daily lives to varying degrees, the Hebrews were distinctive in being bound to the one true living God by a covenant relationship intended to make the Israelites a kingdom of priests and a holy nation (Ex. 19:6). The physical, emotional, and spiritual health of the nation was one important aspect of this relationship to the all-provident God of Sinai, and like other elements of promised prosperity could be obtained only by implicit obedience to God's will. Thus anyone who resorted to the medical practices of contemporary pagan societies demonstrated a lack of faith in God's ability to keep His covenant promise to be His people's healer (15:26). If obedience and trust resulted, among other things, in bodily health, anyone who became ill was by implication a sinner who was being punished visibly for his transgressions.

The Sinaitic and associated pentateuchal legislation, which represented God's will for His people's welfare, enshrined specific principles which, if observed, would contribute to good health. Their concept of preventive medicine and absolute repudiation of anything that resembled magic fundamentally differed from ancient medical or hygienic procedure.

A. Sabbath Observance. The practice of regarding specific days of each month as restricting the activities of certain classes of people apparently arose during the 3rd millennium B.C. in Mesopotamia. Later Babylonian tablets spoke of the fifteenth day of the month as the *šabattu* (*šapattu*), which designated the full moon in the Babylonian lunar calendar. Other days, such as the seventh, fourteenth, twenty-first, and twenty-eighth, were also regarded as ill omened or evil, and the texts placed restrictions upon certain forms of activity (*see* SABBATH). Whereas the Babylonians calculated their "sabbaths" from the beginning of each month, the Hebrew sabbath occurred every seventh day throughout the calendar year and had no relationship to lunar phases. It was based upon the concept of the divine rest from creative activity on the seventh day (Gen. 2:3); the covenant nation was required to keep it holy by worshiping God and ceasing all normal work (Ex. 20:8). Three obvious purposes were served by the enactment of sabbath observance. First, it constantly reminded the Israelites of their moral responsibility to venerate regularly and in community the deity to whom they owed their very being. Second, it legitimated the person's important biological need to abstain from normal work one day each week so that the body's cells might be renewed more readily. Third, because the law of sabbath rest applied also to domesticated animals (Ex. 23:12), it brought an extremely significant humanitarian influence to bear upon an area of God's creation that was otherwise subject to gross exploitation. Even the land on which the Israelites lived was required to remain fallow every seventh year after the harvest (Lev. 25:2-7), so that the mineral and nutrient reserve of the soil would not become impoverished unduly.

Some societies in more recent times have experimented with a different interval of time for the day of rest or have repudiated completely the need for a regular day of rest, much less divine worship. Medical science has shown, however, that the ideal rest period for the healthy operation of the human body and mind is that of one day in seven. Some persons appear to survive for a time without a regular "sabbath" interval, but it is doubtful that they are performing at anything approaching their maximum and they are certainly making themselves vulnerable to physical or mental breakdown. Thus the biblical concept of the sabbath has not merely positive and recuperative values for the individual but also serves to guard against disease.

B. Circumcision. Most Semitic peoples customarily removed the prepuce, or foreskin, of the male sexual organ. Some Levantines, however, such as the Philistines and the Greeks, did not observe the practice and in consequence were sometimes reviled by others as "the uncircumcised" (Jgs. 14:3; 15:18; 1 S. 14:6; Acts 15:1; Gal. 5:1-12; etc.). Those who had been circumcised, especially the Hebrews, felt morally superior. God had instituted the procedure for them as a covenantal sign (Gen. 17:10-14; cf. Ex. 12:48; Lev. 12:3), in which the small amount of blood shed sealed the relationship between God and man. Just as among other peoples CIRCUMCISION marked the initiation of a person into a tribe or manhood, among the Hebrews it indicated that the individual had become formally a member of the covenant community. The Torah permitted only this form of laceration because of its specifically religious associations.

The ancient Egyptians regarded circumcision as a special indication of culture that conferred certain hygienic benefits upon the nation. Others thought that circumcision prevented certain kinds of boils and venereal disease. Modern medical science has discovered that the *glans penis* secretes a certain amount of sebum from the *corona glandis*, which forms the prominent posterior border of

the glans. This substance (*smegma*) is a carcinogen thought to cause much of the cervical cancer in women. In cases of phimosis, or narrowness of the aperture of the prepuce, an accumulation of smegma can produce irritation of and preoccupation with the glans. Cancer of the penis appears to be a rare complication of uncircumcision. Some advocate resection of the prepuce to reduce male sexual desire, but the evidence for this suggestion is of uncertain validity. While some decry the value of the procedure, it must not be forgotten that circumcision for the ancient Hebrews, as for their descendants, was not so much a medical procedure as a a distinctive religious symbol of the ideals of the covenant relationship. Physical hygiene may have resulted from circumcision, but it was always subsidiary to the spiritual meaning of the rite.

C. Sexual Relationships and Hygiene. Considerations of physical and spiritual health underlay the legislation in Israel dealing with sexual relationships. Among contemporary pagan nations, abhorrent sexual perversions continually threatened the stability of family and social life. These practices endangered the spirituality of the covenant people in Palestine because of their association with cultic idol worship. In consequence, an important body of legislation dealing with sexual activity from a spiritual, social, and biological standpoint was imposed on the Israelites. The Decalogue prohibited adultery and lust (Ex. 20:14, 17), and the bestiality found among the Hittites, Egyptians, and others was deemed a capital offense (22:19). Homosexuality, common to most Near Eastern religions, was condemned as an abomination (Lev. 18:22), for which the penalty in the Torah was death (20:13).

Since sexual activity was legislated to preserve the spiritual distinctiveness of the chosen people, it is unfortunate that Israel sometimes disregarded these sanctions of divine authority. Levitical law discouraged polyandrous, polygamous, and matriarchal relationships, even though such unions were well known in the Near East during the Bronze Age; the Hebrews instead were required to marry within the clan or tribe. Since even this type of endogamy could be fraught with danger, specific legislation prevented marriage within certain degrees of blood relationship. From the time of Moses onward a man was forbidden to marry his paternal half-sister, even though Abraham and Sarah had been thus related (Gen. 20:12). Lev. 18 set out representative prohibitions of six consanguineous relationships (vv. 7, 9-13) and eight instances of affinity, or connections through marriage (vv. 8, 14-18).

Degrees of affinity were regarded as being of blood or kinship, on the basis that husband and wife were "one flesh" (Gen. 2:24). As a result, regulations applied to maternal as well as paternal consanguinity. A careful reading of Leviticus seems to indicate that the regulations governed both marriage and casual sexual relations outside marriage. Many unions frequently found in Near Eastern nations were designated as incestuous by this legislation, which attempted to avoid rather than to prevent incest. Genetic studies have shown that the closer the blood relationship between husband and wife, the more probable is the incidence of detrimental or lethal genes. On the other hand, close inbreeding can purge recessive lethal and other damaging genes, a process that is accompanied by genetic deaths among the offspring. After many generations of such inbreeding the genetic deaths subside, since lethal genes have been largely eliminated from the stock. The covenant community could avoid all these genetic problems, with their accompanying personal and social hardships, and reflect divine holiness by following scrupulously the biblical regulations governing permissible degrees of relationships in marriage.

The prophylactic approach of the Levitical regulations is seen clearly in the matter of sexual hygiene. Sexual relations were considered ceremonially defiling, and the participants had to wash themselves and be treated as ceremonially "unclean" until the evening. Spontaneous seminal emission rendered the male unclean for the same period of time (Lev. 15:16-18). Menstruation made the woman unclean for seven days. Coition during this period defiled the male for seven days (vv. 15:19-24) because it involved contact with blood, which was prohibited to the Hebrews. (*See* CLEAN AND UNCLEAN II.B, IV.B.1.)

Near Eastern peoples may have had coition during menstruation as a contraceptive method, but it was specifically forbidden to the Hebrews (Lev. 20:18). In fact, Israelites apparently were not encouraged to practice contraception of any kind, since for them, as for other peoples, the chief aim of marriage seems to have been reproduction of the species. Coitus interruptus, practiced by Onan (Gen. 38:9), was thus judged to be a perversion of natural functions.

Physical and moral cleanness was fundamental to the life of the Hebrew community, and the associating of defilement with coitus helped to safeguard the nation against the gross promiscuity of surrounding peoples. It also introduced a sense of moral responsibility toward sexual behavior in general, so that those who indulged in coition were accountable at a level other than the purely physical.

Women were defiled by unusually lengthy menstruation, profuse bleeding, or intermittent hemorrhaging, such as might occur with uterine growths. Personal hygiene was again emphasized by regarding the woman as unclean till seven days after the discharge had ceased. Cleansing ceremonies followed the complete cessation of hemorrhagic discharge (Lev. 15:25-30) so that the highest possible standards of personal hygiene were assured. Although childbirth was a ceremonially defiling occasion because of the involvement of blood, the newborn child was always considered clean. Because of the postpartum secretion known as the *lochia*, the mother was unclean for two weeks if she bore a female child but only one week if she had a son; no explanation is given for the distinction (Lev. 12:2-5). The health of the offspring was protected by a nursing period of two or more years. Parents possibly did not cohabit between conception and the weaning of the child, a period that could exceed three years. During the incapacity of the legal wife, the husband could have recourse either to a concubine, if he could afford one, or a prostitute. But since prostitution usually impaired covenant spirituality, the less affluent married men in the community were clearly placed under some self-discipline, and even hardship, by Mosaic enactments. Nevertheless, the laws emphasizing the great significance of rest and personal hygiene after childbirth did protect the health of the mothers. Because the rules governing sexual activity carried the force of covenant law, sexual activity had a moral character that affected community health and was inextricably connected with the larger morality of the covenant deity.

D. Regulations Concerning Edible Food. Many diseases, both ancient and modern, have been shown to result from dietary deficiencies or imbalances that reduce the blood's ability to combat infection or repair damaged tissues. Some have argued from Gen. 1:29 that humans lived as vegetarians until the fall (cf. 3:18), and only after the Flood began to eat flesh (cf. 9:3). If humans had been designed as vegetarians, however, they would have one or more additional stomachs and a much larger intestinal system. Moreover, humans obtain more readily assimilable

protein from meat than from commonly accepted substitutes and need iron and vitamins, especially of the B complex, not provided in a purely vegetarian diet.

Levitical legislation concerning foods, unique in the ancient Near East, embodied dietary principles that accord with modern scientific discoveries. Based on the distinction between "clean" and "unclean" which goes back at least to the Flood (Gen. 7:2), legislation protected individual and communal health and prevented infections or epidemic disease. Although the origin of the "clean" and "unclean" differentiation is unknown, there is no reason to associate it with primitive religions' totemism and taboos, which involved magical and superstitious concepts foreign to Hebrew covenantal life.

"Clean" animals parted the hoof and chewed the cud (Lev. 11:3-8; Dt. 14:4-8); all other mammals were "unclean." Although humans were not commanded to be vegetarian, all the mammals Scripture permitted them to eat had to be exclusively herbivores. Aquatic creatures with fins and scales were permitted for food, but all other species, including the edible crustaceans, were forbidden (Lev. 11:9-12). Hebrews could not eat rapacious, aquatic, and predatory birds (vv. 13-19) because they could acquire infection from them. All insects except the locust were "unclean."

Blood, the symbol of life, was strictly prohibited as food (Lev. 7:26), as was the flesh of "clean" animals that had not been slaughtered in such a manner as to drain the blood completely from the tissues. Animals that had died from natural causes (Dt. 14:21) or that had been mutilated by other animals and left to die also could not be eaten. Like the blood, the fat of an animal belonged to God and could not be consumed at any time (Lev. 7:22). The rationale underlying these prohibitions has become clear in modern times. Blood sustains bodily health when its components are properly balanced, but it can cause death when that balance is impaired. Thus to ingest whole blood except under the most carefully controlled clinical conditions is to run grave risk of infection from any noxious elements it contains. Similarly, the fat of certain animal species contains parasitic organisms that can produce illness and death in humans.

The "unclean" animals cataloged in Leviticus included the pig, an animal reared quite widely in the Near East. Modern studies indicate that the pig is the intermediate host for the parasitic tapeworm *Taenia solium,* which if ingested by humans can cause small nodules to form under the skin and in the eyes and muscular tissue. When these swellings occur in the brain, epileptiform convulsions can occur. Humans readily develop trichiniasis (*trichinosis*), a nematode (roundworm) infestation frequently accompanied by gastrointestinal problems and severe muscular pain, by eating poorly cooked pork and pork products. A small tapeworm, the *Echinococcus granulosus,* which people can acquire by drinking water polluted by pigs, causes cysts to form in the brain, heart, liver, and elsewhere in the body. Pigs which have eaten the flesh of dead or infected animals may transmit the protozoan causing toxoplasmosis, a disease damaging the tissues and central nervous system of humans and animals.

Carrion-eating birds and crabs, snails, and other shellfish also could transmit infection and so were forbidden as food.

Even the Hebrew diet of "clean" species of birds, animals, and fish could be unhealthy. For example, poorly cooked beef may contain a large tapeworm, *Taenia saginata,* and the *Echinococcus granulosus,* mentioned above. People ingest the parasitic worm *Diphyllobothrium latum* in caviar or improperly cooked fish. Tularemia, an affliction whose symptoms resemble those of both bubonic plague and undulant (Malta) fever, usually results from being bitten by insects, especially the fly *Chrysops discalis,* but also from handling carcasses of animals that died from the disease. The people of the primitive, semitropical Near East had to take scrupulous care to avoid the many sources of infections that often caused death. Thus the strictures of Leviticus are necessary and important guides to individual and communal health, directed at preventing rather than curing the diseases.

E. Sanitation and General Cleanliness. Usually seminomadic or nomadic communities are not concerned with sanitary practices, since they can move to a different environment if necessary. Desert nomads, unlike river-dwelling peoples, may have so little water that they must save it for their animals and for cooking. Where water happens to be in more ample supply, as at an oasis, the tradition of conservation still discourages the use of water for baths. Even today among Arab bedouin tribes, the women tend to use scents, ointment, and rose water instead of washing themselves, while the men often contrive to dispense with washing altogether.

Because of a lack of personal hygiene, communities of this sort are open to various infections from sources of human pollution, especially during the heat of Near Eastern summers. This is true for sedentary occupants unless they take strict measures to ensure sanitary conditions. In contrast to the Bronze Age cities of Sumer and other Mesopotamian centers, which had good sanitary facilities in middle- and upper-class houses and royal palaces, Jerusalem for much of its history had only rather rudimentary forms of sanitation. Garbage of all sorts accumulated in the streets although it could be dumped in the Valley of Hinnom, and as a result the city was a very unhealthy place in which to live during the hot summers. It is hardly surprising that food- and water-borne infections would take their toll, possibly with such frequency that they were accepted as an inevitable fact of life and thus were barely if ever alluded to in the biblical writings.

In addition to minimizing the threats to health by regulating "clean" and "unclean" foods, Levitical law protected the sources of food and water from pollution by by the carcasses of "unclean" species (Lev. 11:31-39). Observance of these rules would reduce the incidence of infectious fevers and diseases such as cholera, spirochetal jaundice, polioencephalitis, and bubonic plague. The legislation was the first of its kind to recognize that infection could be transmitted by both food and water.

The emphasis upon the burying of feces (Dt. 23:13) away from the camp in the wilderness period is a noteworthy attempt to control the spread of such insect-borne diseases as ophthalmia and poliomyelitis.

III. Healing in the OT.–Since God was His people's physician, health and other forms of prosperity could be expected as the result of implicit obedience to the divine commands. Only God could restore the sick to health. The penal view of disease was a natural consequence under such circumstances, but the book of Job disproves the idea of a necessary connection between sin and disease. What it does demonstrate, however, is that a positive response to suffering (as distinct from disease) results in emotional and spiritual maturity. Job's symptoms, which included fever (Job 30:30) and an occurrence of irritating, disfiguring sores on his entire body (2:7), were probably caused by allergies and thus could disappear rapidly when he began to submit himself to God in faith and obedience (cf. 40:4f.; 42:2-6). (*See also* DISEASE III.J.)

Healing also occurred from a deepening of spirituality in the case of King Hezekiah (2 K. 20:1-31), where tears evidently showed contrition as well as shock. He appeared to be in a poor state of health and was suffering

from a carbuncle, a condition resembling a boil (*furuncle*) but considerably more extensive and dangerous in nature. The healing followed the pattern of some of Christ's miracles, where some material factor was involved in the restorative process (cf. Jn. 9:6f.). As far as Hezekiah was concerned, a fig poultice removed the suppuration and promoted cutaneous healing. A hippiatric prescription recovered from Ugarit testified to the value of figs in treating certain ailments affecting horses (C. H. Gordon, *Ugaritic Literature* (1949), pp. 128f.).

Another Judean ruler, Asa, was not healed of his ailment (*see* DISEASE III.J) because he trusted in the physicians rather than in God (2 Ch. 16:12f.). Physicians (Heb. *rōpᵉ'îm,* from a root meaning "repair, stitch together") probably cared for those wounded in wars and may have had some experience also with empirical herbal remedies. Contemporary Near Eastern medicine posed a real threat to Israel's faith because the Sinai covenant demanded that the nation trust in God alone for healing, not in human skills, magic, or superstitious practices. This tradition was being observed even when the prophets occasionally furnished advice about specific ailments or prognoses.

These functions were elements of the prophetic office, and in that respect the prophet was a surrogate for God Himself. Thus Nathan (2 S. 12:14), Elijah (2 K. 1:4), Ahijah (1 K. 14:4-16), and Elisha (2 K. 5:27; cf. 2 K. 8:10) predicted sickness and death. Prophetic intervention brought about the healing of Naaman (2 K. 5:3-14), the son of the Zarephath widow (1 K. 17:19-23), the son of the Shunammite (2 K. 4:18-37), a dead man who was cast into a grave containing Elisha's bones (2 K. 13:21), and Hezekiah (2 K. 20:1-7). Preexilic prophets neutralized the poisons in the impure waters of Jericho (2 K. 2:20f.) and pottage seasoned with lethal herbs (2 K. 4:41). In the early days of the covenant it is possible that fractured limbs were left unset (cf. Lev. 21:19), as happened periodically in Egypt, but by the exilic period they were apparently treated with some kind of pressure bandage (AV "roller," Ezk. 30:21). Presumably splints were used to keep the fractured bones properly aligned and supported. Wounds and suppurating sores were treated by a variety of folk remedies, including balsamic resin and oil (cf. Isa. 1:6). The resinous gums of Palestine and Arabia were mostly antiseptic and astringent in nature and could thus be used empirically for minor dressings.

Priests as well as prophets promoted health, but they were not so much healers as diagnosticians who supervised certain purification rituals to promote and ensure individual and communal health. Leviticus prescribed seven purificatory procedures controlled by the priests. These procedures were used for childbirth (Lev. 12), suspected and actual leprosy (ch. 13), venereal disease (15:2-15), emissions of semen (vv. 16-18), menstruation (vv. 19-30), and priestly contact with the dead (15:19-30; 22:4; cf. Nu. 5:2). The priest could administer a potion only in the so-called jealousy ordeal (Nu. 5:11-31), in which powerful suggestive mechanisms tested a woman's fidelity to her husband as she drank holy water containing dust from the tabernacle floor.

By the 2nd cent. B.C. the physician was more prominent than previously in Jewish life; this eventuality coincided with a marked increase of superstition and magic in Palestine. Although Ben Sira taught that medicines were the gift of God because they were natural products intended for the well-being of His children (Sir. 38:1-15), contemporary physicians employed magical charms, incantations, and spells to bolster the efficacy of the medicaments they administered.

IV. Jesus' Teaching on Health and Healing.—Diseases and infirmities that had plagued people for millennia were very much in evidence in Christ's time. Although His curing the afflicted was a rather minor part of His total ministry, it nevertheless perpetuated in the minds of His followers the biblical tradition that God was His people's physician. Jesus made no attempt to explain the rationale of disease any more that He expounded the larger problem of evil. The whole problem of evil was dealt with on the cross, where the Lord's Servant (Isa. 53:4) bore our griefs (Heb. *ḥᵒlî,* "disease") and carried our sorrows (Heb. *maḵ'ōḇ,* "pain"). Christ's atonement not merely took away human sin (Jn. 1:29) but brought sickness and disease within His saving work as well. If this identification of the Servant with the crucified Lord is correct, it is entirely proper to see in the cross a basis for physical as well as spiritual healing.

Christ's ministry to individuals as body-spirit complexes needing proper integration is evident from both His teachings and miracles. The Sermon on the Mount (Mt. 5–7) and didactic material reveal His tremendous emphasis on human motivation and His recognition of powerful emotions like love, fear, hatred, lust, and anxiety as causes of mental and physical diseases. His first recorded address, given in the synagogue at Nazareth, expressed His concern for the sick, disabled, and oppressed (Lk. 4:18; cf. Isa. 61:1) — a very different attitude from that of many of His contemporaries, who found the sick and infirm exasperating and contemptible.

In a significant advance upon the OT penal concept of disease, Jesus regarded sickness as an evil influence that had disrupted the delicate holism of the human personality. His healing reunified body and mind so that the believer might have abundantly the life God willed for him (Jn. 10:10). The man who was born blind had not sinned any more than his parents (9:1-41) but was in that condition to show how God might be glorified through faith. When the man submitted in obedience and faith to the ministrations of the Great Physician, he received not merely physical sight but greater spiritual perception. Thus Christ showed that sickness was not the will of God for mankind, nor was it imposed on individuals either as a punishment or as a means of acquiring fortitude or patience. When, immediately after the Sermon on the Mount (Mt. 8:2-4; cf. Mk. 1:40; Lk. 5:12f.), a leper tentatively suggested that divine healing might not, after all, be his privilege, Christ abruptly dismissed the notion and healed him instantly with a touch of His hand.

Because Christ promulgated no doctrine about healing but instead responded spontaneously in loving concern to cases of sickness, the processes by which He restored people to health must be largely inferred. Jesus attributed certain types of pathology unhesitatingly to the influence of the devil (cf. Lk. 13:16), whose works He had come to destroy (1 Jn. 3:8). He therefore repudiated any suggestion that His own healings were performed under demonic influences (Mk. 3:23-27; Lk. 11:17-23). Christ was clearly aware of the nature-nurture relationship from which so much disease proceeds and was at pains to deal effectively with the sin that was an evident part of the situation. His conversation with the Samaritan woman (Jn. 4:7-29), who had come to the well for water, not for spiritual healing, bypassed a topic of general historical and theological argument (4:20) to concentrate on the way in which the woman's marital escapades had repeatedly broken God's laws. His analysis of her disreputable condition and His presentation of Himself to her as the Messiah (4:26) who would fulfill her deepest needs is a classic demonstration of spiritual counseling.

Christ's intuitive diagnostic powers, as evident in the Gospel narratives as His willingness to heal, probably attracted the deranged and desperate alike, who looked to

Christ as their only hope of healing. The healing of Mary Magdalene, an acutely psychoneurotic person (Lk. 8:2), the woman with a chronic hemorrhage (Mt. 9:20; Mk. 5:25; Lk. 8:43f.), lepers, and the blind depended upon their demonstration of faith in God's restorative power (cf. Mt. 9:29; Lk. 17:19), but the narrative form of the Gospels does not necessarily record this prerequisite (cf. Mt. 9:1-8; 12:9-13). Indeed, in some healings the matter of faith on the part of the sick seems to have been ignored completely in the spontaneity of Christ's response (Mk. 1:31, 34; Lk. 13:11-13; 14:4; 22:51) and may reveal that Christ's absolute healing abilities do not depend on any human response. He intended to heal the sin-damaged personality, knowing that once the imbalance was corrected and the turmoil of the subconscious mind calmed, the person would enjoy a new relationship with God characterized by health.

V. Healing in the NT.–Christ's occasional references to physicians, which do not seem particularly negative in tone, indicate that they were active in society (cf. Mt. 9:12; Lk. 4:23). As always, some afflictions defied the best efforts of the physicians, and in at least one instance (Mk. 5:25-34) Christ intervened to effect a cure. The author of the Third Gospel was described elsewhere as the "beloved physician" (Col. 4:14), indicating that, despite the magical accompaniments of contemporary medical therapy, some physicians were acclaimed for their work.

Votive foot with Greek dedication from Lucilla Pompeia to the Greek god of healing, Asclepius. It was found near the Sheep Pool in Jerusalem (Louvre)

The diseases that Jesus healed were the ordinary afflictions of the day, of which blindness (*see* DISEASE IV.C) was prominent. The Jerusalem beggar was congenitally blind (Jn. 9:1) though not mentally retarded; another person, who seems to have become blind gradually, perhaps through physical agents, had his sight restored by stages so as not to impair his new visual accommodation (Mk. 8:22-25). Bartimaeus when a child (Mk. 10:46-52) and two other beggars (Mt. 20:29-34) may have been blinded by ophthalmia.

The healing of cutaneous afflictions (*see* DISEASE IV.D) included the curing of ten lepers (Lk. 17:12-19), who, because of their isolation from society, appear to have been genuine victims of Hansen's disease. Luke's clinical observation (Lk. 5:12) of the disease indicates a stage in which the subcutaneous tissues and nerves of the patient had been grossly affected by leprosy. Probably other skin afflictions healed by Christ included acquired leucoderma, psoriasis, impetigo, and acne, although specific evidence is lacking.

Christ healed several paralytics, whose affliction apparently resulted from disease in the central nervous system. The centurion's servant (Mt. 8:5-13; Lk. 7:1f.) seems to have suffered from Landry's paralysis, which usually causes death within three weeks. The Capernaum paralytic (Mt. 9:2; Mk. 2:3; Lk. 5:18-25) was probably paraplegic, perhaps from a birth injury. The sick man of Bethzatha (Jn. 5:2) had a disease that produced progressive muscular atrophy, perhaps amyotrophic lateral sclerosis. The man with the atrophied hand (Mt. 12:9-13; Mk. 3:1-5; Lk. 6:6-10) probably had contracted anterior poliomyelitis as a child. (*See also* DISEASE IV.B.)

Christ healed a man with dropsy (Lk. 14:2), which is really a symptom of disease elsewhere in the body; a woman with a hemorrhage (Mt. 9:20-22 par. Mk. 5:25f.; Lk. 8:43-48), who may have had a uterine fibroid; a nobleman's son (Jn. 4:46-53), perhaps a victim of cerebro-spinal meningitis; and Peter's mother-in-law (Mt. 8:14f. par. Mk. 1:30f.; Lk. 4:38f.), who probably had malaria. A complete lack of evidence prevents identification of the fatal ailments of Jairus's daughter (Mk. 5:22-43 par. Lk. 8:41-56), Lazarus (Jn. 11:1-44), and the widow's son at Nain (Lk. 7:11; *see* DISEASE IV.G). Psychosomatic illness probably caused a woman's spinal deformity (Lk. 13:11), and Zechariah's functional aphonia (Lk. 1:11-22).

In the primitive Church the disciples performed healings in the manner of the Master (cf. Acts 2:43; 5:12; 8:7) and confronted exactly the same pathology. Thus Peter restored a Tabitha, who had died from unknown causes, in the classic manner (9:40f.); Paul healed Publius's father by the imposition of hands (28:8). The latter miracle attracted a crowd of sick people, just as the healing works of Christ had done. Paul's own blindness was clearly psychogenic in origin (9:3-9) and disappeared once his emotional and spiritual tensions were resolved (*see* DISEASE IV.F). Apostles healed the cripple at the temple gate (3:2-8) and one at Lystra (14:8-10). Their paralysis may have resulted from a birth injury or cerebral palsy.

Mental illness was prominent among pathologies in Christ's day, and numerous instances of healings took place in His ministry. Insanity was uniformly attributed to demons, and even Christ's power to heal was credited by some of His enemies to demonic sources (Mt. 12:24 par. Mk. 3:22; Lk. 11:15). The complaint of the disciples (Mk. 9:38; Lk. 9:49) and an incident in Paul's ministry (Acts 19:14) indicate that exorcisms were frequent in the early NT period. Demon possession (*see* DEMONOLOGY) was distinguished from epilepsy, which is a chronic functional disorder of the nervous system, usually marked in its later stages by mental disturbance. Psychogenic forms of epilepsy should be distinguished from symptomatic and uncinate epilepsy in which there is demonstrable brain disease. Christ dramatically healed a boy whose severe epilepsy was attributed to a "dumb spirit," after the disciples had failed in the attempt (Mt. 17:14-18 par. Mk. 9:17-27; Lk. 9:37-42). Both epilepsy and demon possession were regarded as caused by demons (cf. Lk. 8:2), but probably some distinctive behavioral feature, perhaps suicidal or homicidal impulses (cf. Mk. 5:5; Acts 19:16), helped people differentiate the two conditions.

VI. Herbs and Medicaments.–Because health and healing came from God alone, Scripture contains no information on the preparation and administration of therapeutic

substances like those in the extensive pharmacopeias of Egypt and Mesopotamia. Nevertheless, from early times certain substances were credited with therapeutic qualities, even though, as with the mandrake, the association was of a purely superstitious nature. Folk medicine was widespread in the ancient Near East, and without doubt the Hebrews employed some herbs and other substances empirically to restore and maintain health.

Incense and pomegranate rind were burned as fumigants and disinfectants in Bible times. Aromatic oils and scents were used for personal hygiene. Olive oil was employed widely to keep exposed parts of the skin supple, to relieve chafing, and to heal bruises and lacerations. Shepherds used it to treat sheep injured while grazing or traveling (Ps. 23:5).

A famous therapeutic substance in Palestine was the BALM OF GILEAD, exported to Egypt and Phoenicia (Gen. 37:25; Ezk. 27:17). It is actually difficult to identify botanically, and though commonly associated with the shrub *Balsamodendron opobalsamum* L., it has been thought also to be the gummy exudate of more than one shrub in Gilead. The balm was renowned for its soothing qualities and for its ability to promote tissue repair. A less elaborate unguent was the mixture of oil and wine that the Good Samaritan (Lk. 10:33f.) used to treat the battered traveler from Jerusalem in Jesus' story that undoubtedly drew upon real-life circumstances. The alcohol in the wine would act as an astringent and antiseptic; the oil would soothe and heal the tissues. Olive oil was boiled with sodium carbonate, or when more convenient, glasswort or saltwort plants, to make all-purpose soap.

Herbs traditionally renowned for promoting health found their way into the diet of the Hebrews. They included gastric stimulants and tonics such as dill, cummin, garlic, the caper berry, coriander, and fennel. In addition to the "bitter herbs" of the PASSOVER (Ex. 12:8), which probably were chicory, lettuce, watercress, dandelion, and endive, popular culinary herbs included anise, spelt, rosemary, thyme, mint, marjoram, and sage. Some shrubs, flowers, and gourds were poisonous (2 K. 4:39; Hos. 10:4) and no doubt took a toll of the uninitiated. The "deadly thing" of Mark 16:18 (mg.) was a drink into which some kind of poison, probably vegetable, had been put, but deliberate poisoning was not very common in Palestine during Christ's time.

HEALING, GIFTS OF [Gk. *charísmata iamátōn*].

"Gifts of healing" are among the spiritual gifts enumerated in 1 Cor. 12:4-11, 28-30. The current revival of interest in the so-called charismata warrants a thorough study of gifts of healing.

I. Terminology.–Greek *chárisma* (pl. *charísmata*) means "grace," "favor," "a benefit conferred." It is used of divine gifts, especially of the supernatural kind enumerated in Rom. 12:6-8 and 1 Cor. 12:4-11, 28-30. Specific occurrences of Gk. *chárisma* and its derivatives are: Rom. 1:11; 5:15f.; 6:23; 11:29; 12:6; 1 Cor. 1:7; 7:7; 12:4, 9, 28-31; 2 Cor. 1:11; 1 Tim. 4:14; 2 Tim. 1:6; 1 Pet. 4:10. The charismata are not received *in abstracto* but always in the form of specific aptitudes for service to the entire Church. The charismata of 1 Cor. 12 are literally benefits or graces conferred upon certain individual members of the body of Christ for the use and benefit of the worshiping Church (v. 7). They are not the personal possession of the members who exercise them within the church community. They are, rather, manifestations of the Spirit through Christians who are serving the spiritual edification of the Church as a whole (vv. 8-11).

Greek *íama* (pl. *iámata*) means "healing" (1 Cor. 12:9, 30). In order to understand the gifts of healing it is helpful to consider healing in the Bible as a whole.

II. Healing in the OT.–The OT shows little concern with the biological causes of sickness. What predominates, rather, is the growing conviction that Yahweh gives and prevents sickness (Ps. 32:3f.; 38:3-11 [MT 4-12]; 103:3; etc.). Sickness and disease are often regarded as signs of God's wrath (Isa. 38:10-20 par. 2 K. 20:1-11), but the idea that *all* sickness is punishment for sin is rejected (e.g., Job's disease had another cause; cf. Job 2:4-8).

Deliverance from sickness by Yahweh is considered a mark of divine pleasure (Gen. 20:17; Ex. 15:26); conversely, Job's friends interpreted God's failure to deliver Job as a mark of divine displeasure. The chief means of such healing in the OT and in Judaism was prayer. Prayer for physical healing is very early linked with the temple cultus (Ps. 5:3, 7 [MT 4, 8]; 28:2; 38:6; 42:9 [MT 10]; 88:13 [MT 14]; etc.). Regular patterns of such prayers and thanksgiving for resultant healings appear in Ps. 6; 16:10; 30:2 [MT 3]; 32:3f.; 38; 41:4 [MT 5]; 51:7f. [MT 9f.]; etc.

The Jews of the Dispersion, however, developed a more scientific and secular attitude toward medical cures, largely due to the influence of the Greeks (see Sir. 38:1-15, esp. v. 4: "The Lord created medicines out of the earth, and a prudent man will have no disgust at them"). Conflicting attitudes about whether the diseases had natural causes and medical cures are evident in the NT period. It was into this state of affairs that Jesus came.

III. Healing in the NT.–The view that sickness is closely related to sin appears in Lk. 13:11-16, where it is called bondage to Satan; cf. also Mt. 12:22-28; Acts 12:23; Rev. 16:2. Furthermore, in Mk. 2:1-12 Jesus connects His authority over disease with His authority to forgive sins. Other instances where Jesus links sin and sickness are Mk. 5:34 and Lk. 7:9f. (where faith, the antithesis of sin [Rom. 14:23], brings healing); Jn. 5:14.

Jesus, however, rejected the belief of some OT writers that sickness is always divine punishment for sin. It is He, in fact, who removed the view of a causal relationship between sin and sickness; cf. Jn. 9:2f.: "And his disciples asked him, 'Rabbi, who sinned, this man or his parents, that he was born blind?' Jesus answered, 'It was not that this man sinned, or his parents, but that the works of God might be made manifest in him'"; also Jn. 11:4 and Lk. 13:2ff. Thus Jesus removed the idea of sickness as divine retribution for sin from its central place in the understanding of the earliest disciples.

Paul, following the lead of Jesus and applying His insight, maintained strictly and consistently that sickness, like all suffering, is due primarily to natural causes and not to divine retribution (see Rom. 8:28; 2 Cor. 4:17). While God can and does work *through* sickness for His own glory and purpose (Rom. 8:28; 2 Cor. 12:7ff.), He does not ordinarily place sickness upon one as a punishment for sin. Rather, disease and sickness are evils that contradict and hinder God's will and purpose for His creatures.

Those in the apostolic Church who followed the lead of Jesus and Paul regarded without disgust physicians and the development of medical science, while at the same time looking to God and praying for His deliverance from sickness and disease. For example, the good Samaritan uses natural means to cure illness (Lk. 10:34); Col. 4:14

calls Luke the beloved physician; and 1 Tim. 5:23 counsels the use of wine to counter stomach infirmities. At the same time that this understanding and appreciation of medical science grew, the Church developed its own more spiritual means of dealing with sickness and disease. The two approaches, however, were not thought to be mutually exclusive; they were, rather, complementary, because sickness was no longer viewed as God's punishment of sin.

IV. Gifts of Healing in the Apostolic Church.–There was an order of "healers" in the early ministry of the NT Church (1 Cor. 12:28) and "gifts of healing" were considered to be a grace conferred by the ascended Lord upon His body the Church (v. 9). This means that gifts of healing were part of the equipment of the witnesses to Christ's kingdom. Acts 3:6 and 14:8-10 demonstrate these gifts in action, as do other NT references (e.g., Jas. 5:13ff.). Col. 1:24 on the other hand shows Paul's "rejoicing in infirmities," and 1 Tim. 5:23 speaks of temporary sickness that might be cured by natural rather than by supernatural means.

From this we may conclude that throughout the apostolic age the power to heal sickness and disease was a spiritual gift conferred by the risen Lord upon certain members of His Church. But spiritual "gifts of healing" are in no way to be understood as contrary to the fullest development of medical knowledge and technique. The point is that God is concerned that people be whole, that is, sound in flesh, mind, and spirit. Yahweh is the God who heals and Jesus came to make human beings whole. The Church receives and transmits "gifts of healing" through its ministries.

V. Gifts of Healing in the Church Today.–The gifts of healing continued in use during the first two centuries after Christ, according to Justin Martyr (*Apol.* ii.6), Irenaeus (*Adv. haer.* ii.32, 34), Tertullian (*Apol.* xxii), and Origen (*Contra Celsum* 6.4). The operation of these gifts gradually diminished, due, no doubt, to the growth of ecclesiasticism and asceticism. The ritual of the Church became formalized and impersonal while the ascetic temper relegated physical healings to a relatively insignificant place. In fact, pain and sickness were sometimes considered to be the indispensable ministers of God to the soul.

Gifts of healing, however, have never been totally absent from the Church's life. Francis of Assisi, Luther, Wesley, the Waldenses, the early Moravians, the Quakers, and others have experienced these gifts intermittently throughout church history. Since the turn of the century, Pentecostals and others have laid heavy stress upon the revival of all the charismata conferred upon the Church, including gifts of healing. Charismatics and neo-Pentecostals from all branches of the Christian church have experienced and are emphasizing a renewal of these apostolic charismata.

Perhaps this revival of interest and emphasis upon the gifts of healing within the modern Church will help all Christians to reaffirm the reality and permanence of the *charísmata iamátōn* while relating them to the modern practice of medicine as a complementary ally in the quest for human wholeness.

R. E. COTTLE

HEAP. The noun "heap" is used in several different ways in the OT. Usually it refers to a heap of ruins or rubble. Several Hebrew words are used in this sense: *tel* (Dt. 13:16 [MT 17]; Josh. 8:28); *'ašpôṯ* (1 S. 2:8; Ps. 113:7; Lam. 4:5); *'î* (Isa. 17:1; Mic. 1:6; 3:12); *gal* (2 K. 19:25; Job 15:28; Isa. 25:2; 37:26; Jer. 9:11 [MT 10]; 26:18; 51:37; Hos. 12:11 [MT 12]; *'ărēmâ* (Neh. 4:2 [MT 3:34]; possibly Jer. 50:26).

The Heb. *'ărēmâ* usually refers to heaps of grain (Ruth 3:7; Cant. 7:2; Hag. 2:16; Neh. 13:15; possibly Jer. 50:26). In 2 Ch. 31:6-9 *'ărēmâ* is used five times of heaps that probably include both fruit and grain.

The Heb. *gal* refers to heaps of stones (cairns) set up for some special purpose. Jacob and Laban set up stones to serve as a witness to the compact they made (Gen. 31:46-52). On three occasions a heap of stones was piled on top of a dead body (Josh. 7:26, Achan; Josh. 8:29, King of Ai; 2 S. 18:17, Absalom). Each of these cases involved an ignominious death, so that the heap of stones was a reminder of the shameful deeds of the person buried underneath.

The Heb. *nēḏ* is used four times in the special sense of a heap (or bank) of waters, in reference to the Red (Reed) Sea (Ex. 15:8; Ps. 78:13) and to the Jordan River (Josh. 3:13, 16). (In Isa. 17:11, therefore, where the MT makes unusual reference to a harvest heap, the RSV and NEB emend.) The related expression "pile up" in Ex. 15:8 translates Heb. *'āram*, used in the niphal to refer to the waters of the Red (Reed) Sea forming a bank on each side, enabling the Israelites to pass through. *See* PILE.

Several passages refer to heaps of dead bodies. In Ex. 8:14 [MT 10] *ḥōmer* refers to heaps of frogs. With a play on the Hebrew words for "ass" and "heap" (both *ḥ'môr*), Jgs. 15:16 refers to heaps of Philistines who had been slain by Samson with the jawbone of an ass. The NEB, following an etymological conjecture, translates this passage "I have flayed them like asses." In Nah. 3:3 *kōḇeḏ* also refers to heaps of the slain. Heb. *ṣibbur* is used once — Jehu piles the heads of the slain members of the royal house in two heaps at the entrance of the city gate (2 K. 10:8). This was a common practice of the Assyrians after conquering a territory (M. Astour, *JAOS*, 91 [1971], 388).

Several Hebrew verbs are occasionally translated "heap." The hiphil of *sāpâ* (which should probably be emended to *yāsap*, "add to" [KoB, p. 664]), is used once of heaping on punishment (Dt. 32:23). In Prov. 25:22 *ḥāṭâ*, usually used of snatching up fire or coals, is translated "heap" (coals on the enemy). The verb *ṣāḇar* refers on three occasions to the heaping up of riches (Job 27:16; Ps. 39:6 [MT 7]; Zec. 9:3). In Hab. 1:10 it refers to the heaping up of earth as part of a siege. The Heb. *rāḇâ*, meaning "multiply," is translated "heap" where it refers to the punishment of Jerusalem (Ezk. 24:10), and "heap up" where it refers to someone appropriating what is not his (Hab. 2:6). The Heb. *kānas*, translated "heap up" in Eccl. 2:26, refers to the amassing of wealth.

"Heap" is also used in the translation of some difficult passages. In Job 30:24 the MT has *bᵉʿî*, meaning "in a heap of ruins," and the RSV has made good sense of the passage using this translation. The NEB, however, emends *bᵉʿî* to *bᵉʿānî* and translates it "beggar," while the AV translates it "grave."

In 1 S. 20:19 the RSV emends the MT *hā'eḇen hā'āzel*, "the stone Ezel," to agree with the LXX and reads "beside yonder stone heap" (cf. NEB "by the mound"). In v. 41 the RSV ("beside the stone heap") and NEB ("beside the mound") again follow the LXX, emending the MT *mē'ēṣel hannegeḇ*, "from beside the south."

In 1 K. 9:8 the MT has *'elyôn*, meaning "high" (AV). The RSV and NEB emend to *lᵉʿîyîn*, "(heap of) ruins," following the Old Syriac, Aquila, and the Old Latin.

In Hab. 3:15 *ḥōmer*, rendered by the AV "heap," is better understood as a verb; cf. the RSV, "surging," and the NEB, "boil."

In Isa. 3:6 reference is made to a "heap of ruins" (Heb. *maḵšēlâ*), probably referring to the future destruction of Jerusalem. The NEB emends this to "family" (*mišpāḥâ*),

probably because of the context of v. 6, but without sufficient justification.

The RSV once translates Heb. *šûḇ*, "return," as "heaping (oppression upon oppression)" (Jer. 9:6 [MT 5]), based on a redivision of the consonants following the LXX (see J. Bright, *Jeremiah* [*AB*, 1965], p. 72). This is superior to the literal AV, "Thine habitation is in the midst of deceit."

In the NT "heap" translates three verbs. Prayer is not to consist of heaping up empty phrases (Gk. *battalogéō*, "utter meaningless words, babble," Matt. 6:7). Rom. 12:20 is a quotation of Prov. 25:21f., Gk. *sōreúō* translating Heb. *ḥāṭâ*, "heap" (coals on the enemy). In Rev. 18:5 Gk. *kalláō* means "unite" or "come in close contact with"; so Babylon's sins have "reached unto heaven" (AV) or are "heaped as high as heaven" (RSV).

J. C. MOYER

HEAR; HEARKEN; LISTEN; OBEY; etc. These words overlap in meaning, as is indicated not only by these various translations of the same Hebrew or Greek words, but also by frequent synonymous parallelism (e.g., Ps. 17:1; Isa. 28:23; 42:23; Jer. 23:18). The most frequent words are Heb. *šāmaʿ* (Aram. *šᵉmaʿ*), *qāšab* (hiphil), *ʾāzan* (hiphil), Gk. *akoúō* and *hypakoúō*. The semantic field ranges from the physical reception of a sound to the active response to what is heard: a response either of assent (to one of equal or lesser authority) or of obedience (to one of greater authority).

I. In the OT.–On the most basic level, to hear is to perceive a sound (always Heb./Aram. *šāmaʿ*); thus one hears a whisper (Job 26:14), music (Am. 5:23; Dnl. 3:5, 15), the voice of a god (Dt. 4:33), and the sound of tools being used (1 K. 6:7). In silent prayer a voice is not heard (1 S. 1:13). The deaf cannot hear (Ps. 38:13 [MT 14]), nor can idols (Dt. 4:28; Dnl. 5:23). In Eden God could be heard walking (Gen. 3:8, 10; cf. 2 S. 5:24 for similar use of *qôl*, "sound"). Amos prophesied that God's words would cease to be heard (through the prophets, 8:11). The references to God hearing prayers (Gen. 17:20; 30:6; 2 S. 22:7; etc.; *see* ANTHROPOMORPHISM) and grumblings (Ex. 2:24; 6:5, 17; etc.) also may be regarded as passive, although a more active sense, implying some response, is apparent when God "hearkens" (Gen. 30:17, 22; Nu. 21:3; etc.) or "listens" (Jgs. 13:9; Ezr. 8:23; Ps. 66:19), or when He does not "hearken, give ear," e.g., Dt. 1:45.

This ambiguity between the passive and active senses may also be seen in the frequent introductory imperatives "give/incline (the) ear, hear, hearken, listen"; these may be viewed either as attention-getting devices, which indicate the urgency or importance of what follows, or as a call to the hearer to understand (so the RSV translates *šāmaʿ* in Gen. 11:7; 42:23; Isa. 33:19; etc.) and respond to what is said. Thus in Gen. 4:23 Lamech perhaps desires a response of fear; Dt. 6:4f. certainly implies a response of faith (*see* SHEMA). In Job 34:16; 37:14 Elihu presents an argument to which he hopes Job will assent. A similar sense may be seen in people's responses to each other ("hearkened," Gen. 16:2; 34:24; 1 S. 12:1; etc.; "listened," Gen. 42:21f.; Ex. 6:9, 12; etc.).

Three special uses of this imperative should be noted. First, prayers often include such injunctions (2 K. 19:16; Ps. 5:1 [MT 2]; 17:6; etc.), and in several instances a response seems to be in view (71:2; 86:1; 102:2 [MT 3]; etc.). Second, in proclaiming judgment the prophets frequently admonish the rulers (Isa. 28:14; 39:5; Jer. 19:3; etc.) and the people (Isa. 66:5; Jer. 2:4; 10:1; etc.) to "hear the word of the Lord." (Even where this phrase is not in the text, e.g., Isa. 34:1; Am. 4:1; Mic. 3:9, it is frequently implicit.) Such denunciations may be viewed as calls to repentance. Third, a similar use occurs in conjunction with apostrophe in Dt. 32:1; Isa. 1:2; Mic. 6:1f.; cf. Ps. 50:1 (on the covenant background of these texts cf. M. G. Kline, *Structure of Biblical Authority* [1975], pp. 116, 141; P. C. Craigie, *Deuteronomy* [*NICOT*, 1976], pp. 139, 366, 376; J. Limburg, *JBL*, 88 [1969], 291-304).

In some texts this call for attention and understanding has obedience as a consequence. This is especially clear in instructions or commands, both human (Prov. 4:20; 5:1, 13; etc.) and divine (Jer. 34:14; 35:15; 44:5; etc.).

The common expression for "obey" is *šāmaʿ bᵉqôl*, "hear the voice of." (The NEB frequently translates simply "obey," thus avoiding the unnecessary and somewhat awkward literalness of the RSV, AV, "obey the voice of.") Usually it is the voice of God that is to be obeyed. The vital importance of such obedience as the proper response to God is obvious from the many texts that call for obedience (Ex. 19:5; Dt. 13:4, 18; etc.) and denounce disobedience (Dt. 8:20; 9:23; 28:5; etc.; *see also* DISOBEDIENCE). (*Šāmaʿ* alone may mean obey; cf. Nu. 27:20; Josh. 1:17; 1 K. 2:42; etc.) The classic text on obedience is 1 S. 15:22, which clearly demonstrates that the inward aspect of hearing and obeying is more important than the outward conformity to law (cf. Isa. 1:11-17; Hos. 6:6). The motivation for obedience is not only spiritual, however; there are more earthly, practical reasons (cf. Dt. 11:13-15; 28:1-13; Isa. 1:19; etc.).

In the realm of human relations, children are to obey their parents (cf. Dt. 21:18-21 and Prov. 30:17 for the dire consequences of disobedience), and subjects obey their rulers (2 S. 22:45; 1 Ch. 29:23).

II. In the NT.–NT uses are similar. One may hear a sound, such as a whisper (Mt. 10:27), a voice wailing (Mt. 2:13), a heavenly voice (Acts 9:4; 22:9), music (Lk. 15:25), or wind (Jn. 3:8). Jesus heals the deaf, so that they can hear (Mt. 11:5 par.). To hear "the word of God," i.e., the gospel, usually does not imply a response (Lk. 11:28; Acts 13:7, 44; 15:7; 19:10; Rom. 10:14; etc.). James especially points out the vital difference between hearing the word and responding to it in obedience (1:22-25).

The basic difference between hearing and understanding is pointed up in Mt. 13:19 par. and Acts 28:26, although the overlap in meaning is also apparent when people are directed to hear a parable (Mt. 13:18; 21:33), a word of judgment (Lk. 18:6), or a sermon (Acts 2:22); in these instances a response seems desired. "Listen" is often used in a way that could be interpreted either as an attention-getting device, or as a call to hear and understand and perhaps even respond in obedience or faith (Mt. 17:5 par.; Mk. 4:3; Acts 13:16; 15:13; Jas. 2:5). Jesus' repeated saying "He who has ears to hear, let him hear" (Mt. 11:15; 13:9, 43; etc.; *see also* EAR) entails understanding and perhaps also a response of faith.

Although the NT quotes no cries for God to hear prayers, it is said that He does hear them, and this hearing implies response (cf. Mt. 6:7; Lk. 1:13; Acts 10:31; Heb. 5:7 [all of which use *eisakoúō*]; Jn. 9:31; 11:41; 1 Jn. 5:14 [all of which use *akoúō*]; note that the RSV does not use "hearken" in the NT).

A similar use of *akoúō* may be seen in Mt. 18:15f., where human relations are in view, and in Lk. 16:29, 31, where Moses and the prophets are to be heard with a response of repentance. The phrase "He who has an ear, let him hear [*akoúō*] what the Spirit says" (Rev. 2:7, 11, 17; etc.) recalls the prophetic admonitions, which call for repentance and obedience (cf. Ezk. 3:27).

The close association of faith and obedience is mani-

fested in several ways. Obedience is used as a synonym for conversion (Acts 5:32; 6:7; Rom. 1:5; 15:18; 16:26; 1 Pet. 1:22), and as a primary characteristic of believers (Rom. 6:17; 16:19; 2 Cor. 2:9; 7:15; Philem. 21; 1 Pet. 1:2); hence, believers are called "children of obedience" (1 Pet. 1:14). When they are misled and cease to "obey [*peíthōmai*] the truth" (Gal. 5:7), they require reproof and correction in order to avoid judgment (Rom. 2:8).

Believers then are to obey the leaders of state (Tit. 3:1; *see also* SUBJECT) and church (Heb. 13:17); children are to obey their parents (Eph. 6:1; Col. 3:20), wives their husbands (1 Pet. 3:6), and slaves their masters (Col. 3:22); and of course God and His word are to be obeyed (Jn. 3:36; Acts 5:29; Gal. 5:2; etc.).

Jesus' authority was dramatically demonstrated when nature (Mt. 8:27 par.) and demons (Mk. 1:27) obeyed him.

See also HEED; OBEDIENCE OF CHRIST; OBSERVE.

HEART [Heb. *lēḇ, lēḇāḇ, libbâ* (Dt. 20:8; Ps. 73:26; Ezk. 16:30; etc.), *nepeš*–'soul' (Ex. 23:9; etc.), *kᵉlāyôṯ*–'reins, kidneys' (Job 19:27; etc.) *mēʿîm*– 'bowels' (Job 30:27; etc.), *qereḇ*–'interior' (Jer. 9:8 [MT 7]; etc.), *beṭen*–'belly' (Job 15:35; 32:19; etc.), *raḥᵃmîm*–'compassion' (Gen. 43:30; 1 K. 3:26; etc.), *kāḇēḏ*–'liver' (Lam. 2:11; etc.), *ḥēleḇ*–'fat' (Ps. 17:10; etc.), *sāṯūm*–'enclosure' (qal pass. part., Ps. 51:6 [MT 8]), *moṯnayim*–'loins' (Ezk. 21:6 [MT 11]; etc.); Aram. *lᵉḇaḇ* (Dnl. 5:20, 22; etc.); Gk. *kardía* (Mk. 7:6 par. Mt. 15:8; Rom. 8:27; 2 Cor. 4:6; Eph. 1:18; etc.), *splánchnon*–'inward part' (2 Cor. 7:15; Philem. 7, 12, 20; 1 Jn. 3:17; etc.), *koilía*–'belly' (Jn. 7:38; etc.), *psychḗ*–'soul' (Eph. 6:6; Col. 3:23; cf. Acts 4:32)]; AV also SOUL (Prov. 19:18), MIND (Jer. 15:1), REINS (Job 19:27; Jer. 12:2), BOWELS (Job 30:27; Philem. 7, 12, 20), etc.; NEB also APPETITE (1 S. 2:33), DESIRES (Ps. 10:3), "single-minded" (Ezk. 25:15), MIND (Ps. 7:9), "inward parts" (Ps. 16:7), KIDNEYS (Lam. 3:13), BOWELS (Job 30:27; Cant. 5:4), etc.

In the OT the Hebrew substantives *lēḇ* and *lēḇāḇ* dominate the terms translated "heart" in the RSV (about 850 occurrences, in stark contrast to the eleven occurrences of Heb. *nepeš* for RSV "heart"). Similarly, Gk. *kardía* is predominant in the NT.

I. Physical Organ of the Body
II. Center of the Inner or Psychical Life
  A. Emotions
  B. Volition and Purpose
  C. Intellectual Activity, Perception, and Knowledge
III. Center of the Ethical and Religious Life
IV. Synecdoche
V. Heart as "Remote Place"
VI. Related Terms
VII. Heart of God

I. Physical Organ of the Body.–Ancient Hebrew anthropological thought, being prescientific, did not always clearly differentiate the internal organs of the body. Also, because the inner organs are concealed, Hebrew thought tended to attribute psychical as well as physical activities to them.

OT anthropology considered the heart more important than the other organs, probably because it can be located accurately by its beating (cf. Ps. 38:10 [MT 11]) in the chest cavity. Thus it is mentioned more often than *nepeš*, "soul," and *bāśār*, "flesh"; indeed, the heart can even be considered the place where the *nepeš* resides. Because of its important role as a life-sustaining organ (as well as the mystery of its concealed nature — a secret, inner place where thoughts can supposedly be "hidden" [Job 10:13; Ps. 36:1 (MT 2); 40:10 (MT 11); 51:6]), "heart" takes on a wide range of psychical meaning in the OT and can represent the human person in the totality of psychical and physical life.

In Ps. 84:2 (MT 3) *lēḇ* forms a hendiadys with *bāśār* ("my heart and my flesh") to express the total unity of the inner and outer person (NEB "my whole being"). The heart in OT thought performs the functions now generally associated with the brain. "Heart" in both the OT and NT only rarely (e.g., 1 S. 25:37; 2 K. 9:24; Ps. 38:10) represents the actual physical organ that sustains the human circulatory system. In most OT references the "heart" governs the intellectual, emotive, volitional, and physical dimensions of the inner person. Gk. *kardía* in the LXX has approximately the same range of nuances as Heb. *lēḇ* and *lēḇāḇ* in the OT (cf. Hatch).

The very limited NT (and LXX) use of *kardía* as bodily organ and center of human physical vitality (e.g., Acts 14:17; Jas. 5:5) directly contrasts with the use of the term in Josephus and Philo. Josephus used Gk. *diánoia*, "mind," or *psychḗ*, "soul," where the OT has "heart," and he reserved *kardía* for the central circulatory organ of humans and animals (cf. *Ant.* v.4.2 [193]; vii.10.2 [241]). Philo had learned from physicians (cf. *Legum allegoriae* ii.6) that the heart is that marvelous organ, located within the human *stḗthos*, "chest" (*Legum allegoriae* i.68), one of the seven inner parts of the body (*Legum allegoriae* i.12), which functions as the center of the bloodstream (*De specialibus legibus* i.216, 218). The much more prominent biblical use of heart in the metaphorical sense (as the center of the spiritual, intellectual, and emotive life) is not reflected in Philo, though he did wrestle with the Hellenistic anthropological problem of whether the *hēgemonikón*, "guiding reason," is located in the heart or brain. The classical Greek authors used *kardía* in its full range of meanings, from the physiological sense as central circulatory organ (e.g., Homer *Il.* x.94; xiii.442; Aristotle *De somno et vigilia* iii.456) and thus of the physical life in general, to the metaphorical sense as center of the inner life (e.g., Homer *Il.* xxi.547; Euripides *Akestis* 837; Sophocles *Antigone* 1105; cf. *TDNT*, III, 608-611).

II. Center of the Inner or Psychical Human Life.–*A. Emotions.* The heart may be glad (Ex. 4:14; Dt. 28:47; Jgs. 18:20 [NEB "pleased"]; Acts 2:26), merry, i.e., "drunk" (Jgs. 16:25; Ruth 3:7; 1 S. 25:36; Est. 1:10), thrilled (Cant. 5:4, Heb. *mēʿîm*), find delight (Prov. 29:17 [cf. H. Donner and W. Röllig, *Kanaanäische und aramäische Inschriften*, I (3rd ed. 1971), 26.A.I.13]) or pleasure (Eccl. 2:10), and be thankful (Col. 3:16).

Contrarily, the heart is also the locus of grief (Gen. 43:30; 1 S. 2:33 [Heb. *nepeš*; NEB "appetite"]; Lam. 2:11, 19 [Heb. *kāḇēḏ*]). It may even be "broken" in grief (Ezk. 21:6) or despair (Ps. 69:20; 34:18; 109:16; cf. Barn. 2:10), etc. Depression occurs when hearts are bowed down under hard labor (Ps. 107:12) and are heavy (Prov. 25:20) or dull (Lam. 3:65). The heart may throb in pain (Jer. 4:19; Isa. 65:14) or despondency (Ps. 38:10), know bitterness (Prov. 14:10), or be wrung within because of remorse (Lam. 1:20).

The angry person's heart becomes hot within (Ps. 39:3), carries him away (Job 15:12), and rages against the Lord (Prov. 19:3) when he has foolishly ruined himself. The avenger of blood is said in Dt. 19:6 to pursue the manslayer "in hot anger" (RSV; cf. AV "while his heart is hot"; NEB "in the heat of passion"). But the heart burning within may also signify excitement rather than anger (Lk. 24:32).

Empathy or compassion is expressed by the phrase "the heart goes out to" in Jgs. 5:9 and 2 S. 14:1 (cf. 15:13), or "cries out for" in Isa. 15:5. Israel, because of its

sojourn in Egypt, knows the heart of a stranger (Ex. 23:9; NEB "how it feels to be") and thus should not oppress foreigners. Yahweh's compassion for His people is expressed in Isa. 63:15 as the "yearning" (Heb. *mĕʾîm*) of His heart (AV "the sounding of thy bowels"; cf. Jer. 31:20; 2 Cor. 7:15).

The heart is particularly subject to fear (Dt. 28:67; Ps. 27:3). In fear the heart is said to melt (Dt. 1:28; 20:8) like water (Josh. 7:5) or like wax (Ps. 22:14 [MT 15]) as courage slips away (Josh. 2:11) or spirit departs (Josh. 5:1). Cf. also Gen. 42:28; 45:26; Lev. 26:36; Dt. 20:3; 28:65; 1 S. 4:13; 17:32; 28:5; Job 19:27; 37:1; Ps. 40:12; 61:2; 143:4; Isa. 7:2. (The RSV "losing heart" in 2 S. 22:46 par. Ps. 18:45 [MT 46] translates Heb. *yibbōlû* as a form of *nāḇēl*, "wither, droop" [cf. AV] rather than *yāḇal*, "carry away" [cf. NEB]. In the NT "lose heart" translates Gk. *enkakéō*, "tire, become weary" [Lk. 18:1; 2 Cor. 4:1, 16; Eph. 3:13] and *eklýō*, "slack, give out" [Gal. 6:9].)

The same human heart, so easily discouraged and fearful, is also the center of courage (2 Ch. 17:6; Ps. 27:14; Jer. 4:9), bravery (Ps. 76:5, RSV "stouthearted"; Am. 2:16, RSV "stout of heart"), and daring (2 S. 7:27, RSV "courage"; Jer. 30:21; cf. Dnl. 11:25). Thus the idiom from the language of love, "speak to the heart" (Heb. *dibbēr ʿal-lēḇ*), may mean encourage or move to decision, as in Gen. 34:3 (RSV "spoke tenderly"; cf. 50:21; Jgs. 19:3; etc.). The NT uses the Gk. *parakaléō* with *kardía* in the idiom "encourage the heart" (Eph. 6:22; Col. 2:2; 4:8; cf. 2 Th. 2:17), and imperative forms of *tharséō* and *euthyméō* to mean "take heart" (Mt. 9:2, 22; Mk. 6:50; 10:49; Acts 27:22, 25).

The heart may be weighed down with anxiety (Prov. 12:25) or worry (1 S. 9:20, RSV "set your mind on"). The heart suffers anguish (Ps. 55:4 [MT 5]; Jer. 4:19), sometimes as a burning fire (Jer. 20:9), so that one must cry out (Isa. 15:5). Yet it may also experience tranquillity (Prov. 14:30, Heb. *lēḇ*, RSV "mind") and freedom from anxiety (Isa. 60:5, lit. "enlargement of heart").

B. Volition and Purpose. The heart's role as the center of emotions is important, but its role as the center of will and purpose, intentionality and decision making, is even more significant.

Will and purpose originate in the heart (Dt. 8:2; 1 S. 2:35; 2 S. 7:3, 21; 1 K. 8:17; 1 Ch. 17:2; 28:2) and thus also intentionality (Jer. 23:20 [Heb. *mᵉzimmôṯ libbô*]; RSV "intents of the mind"), which is often a matter of "setting the heart" (1 Ch. 22:19; Ezr. 7:10). Resolve comes from the heart (Acts 11:23 [Gk. *prothései tḗs kardías*, NEB "resolute hearts"; RSV "steadfast purpose"]; Dnl. 1:8, lit. "put on the heart"; RSV "resolved") as does presumption (Est. 7:5; cf. AV "presume in his heart"). Paul indicates in 1 Cor. 4:5 that the Lord at His coming will "disclose the purposes of the heart" (Gk. *boulás tṓn kardiṓn;* cf. Jgs. 16:15; Ps. 55:21 [MT 22]; 139:23; etc.).

The heart's desire (2 S. 3:21; Ps. 10:3; 21:2; 37:4) often refers to determination, i.e., that on which one's heart is set (Dt. 24:15; Prov. 19:18; Eph. 6:5; Col. 3:22). Ezekiel speaks of idolatry in terms of the heart's desire: "takes his idols into his own heart" (Ezk. 14:3f., 7; NEB "sets his heart on idols"). It is idolatry also, though in a more subtle form, that Jesus has in mind when He says in Mt. 6:21 (par. Lk. 12:34), "For where your treasure is, there will your heart be also."

An idiomatic way of expressing wilful purpose or intent is that of "incline the heart" (Heb. hiphil of *nāṭâ* + *lēḇ;* Josh. 24:23; Jgs. 9:3; 1 K. 8:58; Ps. 117:36). The idiom "direct the heart" (Heb. hiphil of *kûn* + *lēḇ*) in 1 S. 7:3; Job 11:13; etc., is similar. As a causative form in Hebrew, either idiom may denote external influence in the human heart (e.g., that of God: 1 Ch. 29:18; cf. 2 Thess. 3:5; of David: 2 S. 19:14 [MT 15]; and of Satan: Acts 5:3).

The inner impulse (Ps. 108:1 [MT 2]) for decision or choice comes from the heart (Ex. 35:21, 29; 2 K. 12:4 [MT 5]) and leads a person to be willing to contribute offerings (Ex. 25:2; 35:22; 2 Ch. 29:31) or work (Ex. 36:2) with a generous heart (Ex. 35:5; Acts 2:46; cf. Nu. 16:28; 1 S. 10:26; etc.). Reluctance or indecision can be seen in the expression "slow of heart to believe" (Lk. 24:25). Persistence in a decided course of action even against sound advice is stubbornness or obduracy of heart (Dt. 29:19 [MT 18]; Isa. 46:12), a heart that is, or is made, hard (Ex. 4:21; 7:3; Dt. 2:30; 15:7 [against the poor]; Prov. 28:14; Ezk. 2:4; Mk. 3:5; Rom. 2:5; Eph. 4:18; He. 3:8). When people agree, they have "one heart" (Heb. *lēḇ ʾeḥāḏ*, i.e., unanimity; 1 Ch. 12:38 [MT 39]; 2 Ch. 30:12; Jer. 32:39 [par. *dereḵ ʾeḥāḏ*, "one way"]; Ezk. 11:19). A person "after one's own heart" (1 S. 13:14; Jer. 3:15; Acts 13:22; cf. Jgs. 16:15) thinks or wills the same things one does. The idiom for discord or duplicity is having a "double heart" (Heb. *lēḇ wālēḇ;* 1 Ch. 12:33 [MT 34]; Ps. 12:2 [MT 3]).

C. Intellectual Activity, Perception, and Knowledge. Quite frequently Heb. *lēḇ, lēḇāḇ,* and Gk. *kardía,* etc., have the meaning "mind" (Dt. 5:29 [MT 26]; 28:28 [Heb. *timhôn lēḇāḇ,* "confusion of mind"]; 1 K. 3:9, 12; Job 17:4; Prov. 11:20; 12:8; Lk. 21:14; Rom. 1:21; etc.). Similar expressions using *lēḇ* or *lēḇāḇ* can be translated as a changing of mind (Ex. 14:5) or as receiving "another heart" (1 S. 10:9). In the NT "heart" and "mind" (Gk. *noús*) are closely related. Both designate the self as willing, intending, thinking, etc. In 2 Cor. 3:14f. the two terms are parallel in content (RSV uses "mind" for both), and in Phil. 4:7 they appear together in hendiadys. When so connected *noús* represents knowledge and *kardía* emotion and volition, so that together they signify the total person as a fully responsible self before God (see Bultmann, pp. 220ff.).

Expressions using "heart" signify various intellectual processes: "lay [something] to heart" means "consider carefully" (Dt. 4:39; 1 K. 8:47; Eccl. 7:2; 9:1) and "take seriously" (Ex. 7:23; Dt. 32:46; 1 S. 21:12 [MT 13]; cf. Dt. 11:18; Job 22:22; 2 S. 13:20; etc.). To "give the heart" (Prov. 23:26) means to pay attention, as does "set the mind" (Heb. *lēḇ,* Ezk. 40:4; NEB "mark well"; cf. Prov. 8:5 and Dt. 8:5, NEB "take to heart"; cf. also Ex. 9:21; 1 S. 25:25; Eccl. 1:13, 17; etc.). The heart also ponders (Ps. 4:4 [MT 5]; 77:6 [MT 7]; Lk. 2:19, 51), meditates (Ps. 19:14 [MT 15]; 49:3 [MT 4]), and is the locus of belief (Josh. 23:14; Rom. 10:9f.).

One's heart contains thoughts and ideas (1 Ch. 29:18; Lk. 2:35; 9:47) which may often be base (Dt. 15:9), evil (1 S. 17:28; Mt. 12:34; 15:18f.), or deceitful (Prov. 26:24; Jer. 12:2; 23:26). Similarly, one questions (Mk. 2:6, 8; Lk. 5:22; 24:38) and doubts (Mk. 11:23) in his heart. A frequent idiom for "think" is "say or speak in one's heart" (i.e., think to oneself; Gen. 24:45; Dt. 7:17; 8:17; 1 S. 1:13; 27:1; 1 K. 12:26; Rom. 10:6; Rev. 18:7; cf. Job 1:5, "cursed God in their hearts").

The heart does not simply store up ideas and impressions; it can devise plans to put these ideas quickly into action (Heb. *ḥāšaḇ,* "think, devise"; e.g., Ps. 33:11; 140:2 [MT 3]; cf. Jer. 9:8 [MT 7]; Acts 5:4). Creative thought, ascribed to the heart in Gen. 6:5 (Heb. *kol-yēṣer maḥšᵉḇôṯ libbô,* "every imagination of the thoughts of his heart"); 8:21, is particularly focused in the *yēṣer,* "invention, creation," which in the human is here said to tend toward some base purpose. In Lk. 1:51 the "imaginations of the heart" (Gk. *dianoía kardías*) are the fabric of false pride (cf. Ps. 45:1 [MT 2]; Jer. 14:14).

The heart as the seat of knowledge and understanding is closely associated with *ḥokmâ*, "wisdom," and *tᵉḇûnâ*, "understanding," in Prov. 2:2 and Ex. 31:6, and with *daʿaṯ*, "knowledge," in Dt. 29:4 [MT 3]. The heart is also particularly associated with Solomon (1 K. 4:29 [MT 5:9]) to whom God gave "largeness of mind [Heb. *lēḇ*] like the sand on the seashore" (cf. 1 K. 3:12). The ancient Egyptians also perceived the heart as the seat of understanding (see *TDNT*, IX, 627).

The heart can recall things (Heb. hiphil of *šûḇ* + *ʾel-lēḇ*) e.g., Isa. 44:19, "consider"; Dt. 30:1, "call . . . to mind").

Something turned aside from the heart (Heb. *sûr* + *millᵉḇāḇ*) is forgotten (Dt. 4:9; cf. Ps. 31:12 [MT 13]).

III. Center of the Ethical and Religious Life.–In the OT it is the heart that most closely approximates what we call conscience. The heart as conscience "smites" David (2 S. 24:5 [MT 6]). Similar is 1 Jn. 3:20f., "whenever our hearts condemn us" (cf. 1 S. 25:31; 2 K. 22:19; 2 Ch. 34:27). The heart functions as the seat of moral and ethical thought and thus is often described in terms of purity (e.g., Ps. 24:4; 73:1 [Heb. *bar lēḇāḇ*, "pure in heart"]; cf. "blameless" in 2 Ch. 15:17; Mt. 5:8).

Integrity (Heb. *tom-lēḇāḇ;* Gen. 20:5f.; 1 K. 9:4; Ps. 78:72; 101:2) and uprightness or straightforwardness (Heb. *yōšer*, lit. "on the level"; e.g., Dt. 9:5; 1 K. 3:6; 9:4; Ps. 119:7) come from the heart. A righteous life (Heb. *ṣᵉḏāqâ*) results from responding to Yahweh "with all [one's] heart" (1 S. 7:3; 12:20, 24; Jer. 3:10; 24:7; cf. Dt. 4:29; 6:5; Mk. 12:30 par. Mt. 22:37; Lk. 10:27).

Faithfulness (Heb. *ʾᵉmeṯ* or *neʾᵉmān*; 1 S. 12:24. 1 K. 2:14; Neh. 9:8), steadfastness or firmness (Heb. *nāḵôn*; Ps. 57:7 [MT 8]; 78:37; 112:7; cf. Akk. *libbu kēnu*, "steadfast heart"), and humility (Mt. 11:29, "I am gentle and lowly in heart"; cf. Dnl. 5:22; T. Reub. 6:10) are desirable qualities of the heart.

By nature, however, the human heart is not pure or faithful; it tends to be perverse (Heb. *ʿiqqēš*; Ps. 101:4; Prov. 11:20 [RSV "mind"]). The heart can function ethically only by the help of God (Ps. 73:26, "My flesh and my heart may fail, but God is the strength of my heart").

Thus God examines or tests (Heb. *bāḥan*; Gk. *dokimázō*) human hearts (1 Ch. 29:17; Ps. 7:9 [MT 10]; 17:3; Prov. 17:3; Jer. 11:20; 12:3; 17:10; 1 Th. 2:4; etc.).

God knows all the weaknesses of the human heart because He "searches" (Heb. *dāraš*; Gk. *eraunáō*) all hearts (1 Ch. 28:9; Rom. 8:27) and minds (Rev. 2:23). He knows that the heart's imagination or creativity (Heb. *yēṣer*) is often intent on evil (Heb. *raʿ*) rather than on His own standard of uprightness, as in Gen. 6:5 and 8:21 (cf. 1 S. 17:28, where "the evil of your heart" parallels "presumption"). The idol-worshiping heart "turns away" (Heb. *pānâ*; Dt. 29:18 [MT 17]; 30:17; cf. 1 K. 11:2ff.; Acts 7:39) or "turns aside" (Heb. *sûr*; Dt. 11:16; 1 S. 12:20; etc.) from God. Perhaps the heart's greatest weakness is pride (2 Ch. 26:16; 32:25f.; Isa. 9:9 [MT 8]; Jer. 49:16; Ezk. 28:2; Hos. 13:6; Ob. 3; Lk. 1:51; 2 Cor. 5:12), which causes the heart to be haughty (Prov. 18:12) or lifted up (Dt. 8:14; 2 K. 14:10; Ps. 131:1; Dnl. 5:20). The heart may dull its moral sensitivity with a layer of fatness so that it fails to act uprightly (Ps. 119:70; Isa. 6:10; Acts 28:27; Jas. 5:5; cf. 1 Jn. 3:17). Indeed, it can even become petrified (Job 41:24 [MT 16]; Ezk. 11:19; 36:26; Zec. 7:12).

Only God can open (Acts 16:14) or illumine (2 Cor. 4:6) the heart to bring a person to faith. He can give the heart firmness and integrity and cause it to be true to Him (1 K. 8:61; 9:4; 15:3, 14; Heb. *šālēm;* RSV "wholly true"; NEB "perfect in loyalty," "faithful"). Ezekiel warned, "Get yourselves a new heart" (18:31; 36:26; cf. Ps. 51:10 [MT 12], "a clean heart" parallel to "a new and right spirit"; Acts 15:9, "cleansed"; and He. 10:22, "sprinkled clean from an evil conscience"). Jeremiah envisioned this new relationship between God and His people as a new covenant in which God's Torah would be inscribed on the hearts (Jer. 31:31-33). The heart deserves careful attention, for in it the "wellsprings of life" are found (Prov. 4:23).

See picture in DEATH.

IV. Synecdoche.–Since it includes so many dimensions of emotional, mental, and volitional activity, the term "heart" is often used in synecdoche — a figure of speech in which a part is used to represent the whole. The heart thus frequently stands for the whole person, e.g., "let not your heart be glad" in Prov. 24:17 (for "yourself"; cf. Lev. 26:41; Dt. 11:16; 1 K. 9:3 par. 2 Ch. 7:16; cf. 2 K. 5:26; cf. also *ANET*, p. 322).

V. Heart as "Remote Place."–The heart, as a concealed organ, connotes inaccessibility and thus is sometimes used in anthropomorphisms: the "heart of the sea" (Ex. 15:8; Prov. 23:34; 30:19; Ezk. 27:4, 25ff.; 28:2; 2 Esd. 13:3) means the unknown and unexplored "high seas" or the sea's awesome depths (Ps. 46:2 [MT 3]; Ezk. 28:8; Jonah 2:3 [MT 4]); the "heart of heaven" to which the mountain (Horeb) burned with fire (Dt. 4:11) refers to the inaccessible heights of the great mountain; the "heart of the earth" refers to the grave.

VI. Related Terms.–Greek *sklērokardía* denotes "hardness of heart" and is a LXX neologism created to translate Heb. *ʿorlaṯ lēḇāḇ* (Dt. 10:16; Jer. 4:4; Sir. 16:10). It occurs in the NT only in Mk. 10:5; 16:14 (cf. Mt. 19:8) and in various intertestamental and patristic writings (see *TDNT*, III, 614). The Gk. *kardiognṓstēs*, "the one who knows the heart," occurs only in the NT and later literature (see *TDNT*, III, 613). Gk. *eúsplanchnos*, "tenderhearted" (Eph. 4:32; 1 Pet. 3:8), describes kind and compassionate relationships. Its antonym, Gk. *ástorgos*, occurs only in Rom. 1:31 ("heartless") and 2 Tim. 3:3 ("inhuman"), in each instance in a catalog of vices. The phrase *ek psychḗs* is rendered "heartily" (i.e., "gladly" or "from the heart") in Col. 3:23 and "from the heart" in Eph. 6:6.

VII. Heart of God.–"Heart" is applied to God in much the same way as to humans. God seeks people "after his own heart" (1 S. 13:14, disobedient Saul's loss of the kingdom), for what is in His heart is His will. Thus the word comes to Eli in 1 S. 2:35, "I will raise up for myself a faithful priest, who shall do according to what is in my heart and in my mind" (Heb. *kaʾᵃšer bilᵉḇāḇî ûḇᵉnapšî*, lit. "according to my will and desire"). The kindness of His heart (Lam. 3:33) and the profound way in which human evil has "grieved him to his heart" are readily apparent. In Hos. 11:8 God, in contemplating judgment, speaks of the "overthrow" (Heb. *hāpaḵ*) of His mind (RSV "my heart recoils within me"), the reversal of His own decision. As Wolff (p. 58) puts it, "God's heart, i.e., his free resolve of love, turns against his decision of anger. So Hosea promised that decision in the heart of God which has been sealed for all nations in Jesus Christ."

HEARTH [Heb. *môqᵉḏâ*] (Lev. 6:9 [MT 2]); AV BURNING; [*yāqûḏ*] (Isa. 30:14); NEB "glowing embers"; [*har'ēl*] ("altar hearth," Ezk. 43:15); AV ALTAR; [*ʾᵃrî'ēl*] ("altar hearth," Ezk. 43:16f.); AV ALTAR; [*mᵉḫaššᵉlôṯ*] (Ezk. 46:23); AV "boiling places"; NEB "fire-places."

In tents, the hearth was nothing more than a depression in the ground in which a fire burned, either for cooking or for providing warmth. Cakes were baked in the ashes on the hearth or on hot stones. The smoke escaped from the tent through the door, since there was no chimney. Such primitive facilities were also present in the poorer houses.

While the function of the hearth is thus clear, the Hebrew terms exhibit a variety of meanings. In Lev. 6:9, the "hearth" was the uppermost level of the altar of the burnt offering where the fire was kindled to consume the sacrifice (cf. RV mg., "on its firewood"). This may be what is implied by the terms in Ezk. 43:15f., namely, the area of a sanctuary in which a fire was maintained for the burning of offerings. In Isa. 30:14 the expression means simply "that which is kindled," referring to the bed of live coals, while the rare term in Ezk. 46:23 designates the kitchen hearths in Ezekiel's visionary temple (cf. v. 24).

R. K. H.

HEARTILY. The translation of Gk. *ek psychḗs*, lit. "out of the soul": "whatever your task, work heartily, as serving the Lord and not men" (Col. 3:23; NEB "put your whole heart into it"). "Heartily" also occurs in the AV of 2 Macc. 4:27, "Antiochus was heartily sorry" (Gk. *psychikṓs*, "from the soul").

HEAT [Heb. *ḥōm* (Gen. 8:22; 18:1; 1 S. 11:11; 2 S. 4:5; Job 24:19; Jer. 17:8), *ḥōreḇ* (Gen. 31:40; Job 30:30; Isa. 4:6; 25:4f.; Jer. 36:30), *ḥarḥur* (Dt. 28:22), *ḥᵒrî* (Dt. 29:24 [MT 23]), *rešep* (Dt. 32:24), *ḥammâ* (Ps. 19:6 [MT 7]), *ḥᵃrāḇôn* (Ps. 32:4), *ḥēmâ* (Isa. 42:25; Ezk. 3:14; Hos. 7:5), *zalʿāpâ* (Lam. 5:10), *ḥārôn* (Nah. 1:6; Zeph. 3:8); *ʾawwaṯ nepeš* (Jer. 2:24); *zāraḇ* (Job 6:17); Gk. *kaúsōn* (Mt. 20:12; Lk. 12:55; Jas. 1:11), *thérmē* (Acts 28:3), *kaúma* (Rev. 7:16; 16:9)]; AV also DROUGHT, BURNING, HOT, FURY, FIERCE, etc.; NEB also HOT, ANGER, OUTBURST, BLAZING SUN, etc. The RSV understands Ps. 58:9a as a case of ellipsis and supplies "heat" before "thorns." In Isa. 18:4b the NEB, with the support of twelve Hebrew MSS, LXX, Vulgate, and Syriac, emends the MT to read *bᵉyôm* (*qāṣîr*), "at harvest time," instead of *bᵉḥōm*, "in the heat (of harvest)." The AV takes the consonants *ḥmt* in Hos. 7:5 as being from *ḥēmeṯ*, "water-skin," instead of *ḥēmâ*, and so reads "with bottles of wine" instead of "with the heat of wine" (RSV).

The various terms for "heat" represent different usages. The Heb. *ḥōreḇ* is used particularly of the dryness of the ground resulting from the heat of the sun, and is rendered "drought" three times by the AV. For *ḥarḥur*, on the other hand, KoB (p. 333) suggests "feverish heat," and for *rešep* (Dt. 32:24), "pestilence" (p. 911). In Palestine the most blasting heat is produced by the east wind, the sirocco. Some have understood Gk. *kaúsōn* to refer to these winds, especially in Mt. 20:12 and Jas. 1:11 (the LXX uses *kaúsōn* to refer to these winds, but generally accompanied by *ánemos* or *pneúma*); most commentators, however, think *kaúsōn* in the NT refers only to the heat of the sun. The term *thérmē*, which occurs only once in the NT, is used of the heat of a fire (Acts 28:3).

Many of the occurrences of "heat" show that it was an oppressive enemy. The heat of the day consumed a person (Gen. 31:40), the hot summer wore one out (Ps. 32:4). Noontime is referred to as "the heat of the day" (Gen. 18:1). People generally sought rest during the hot afternoon; however, an enemy could take advantage of this fact to commit treachery, such as the assassination of Ishbosheth while he was resting in his house (2 S. 4:5-8). The sun is the source of heat (Ps. 19:6: "there is nothing hid from its heat"). But too much sun and wind without rain create drought. Consequently, the versions fluctuate between translating *ḥōreḇ* as "heat" (Gen. 31:40 and Ps. 32:4, RSV) or "drought" (AV).

"Heat" is a word with numerous metaphorical uses, particularly in the areas of sickness (Dt. 28:22), anger (Isa. 42:25; Nah. 1:6), and sex (Jer. 2:24). During his intense suffering Job exclaimed, "My bones burn with heat" (Job 30:30). No doubt he was describing both the fever and the intense discomfort he felt in his body. Another sickness, that of becoming intoxicated, is described in Hos. 7:5 as "became sick with the heat of wine" (cf. Jer. 51:39). Heat is also one of the curses that the Lord brings on those who break the covenant. Since the word appears between physical diseases and natural plagues in Dt. 28:22, it is difficult to tell if it applies to the person (NEB) or to nature (RSV). Heat dries up vegetation and causes famine. The intensity of famine is called "the burning heat of famine" (RSV) or "the ravages of starvation" (NEB) in Lam. 5:10. Viewed as a curse, heat becomes part of the imagery of the catastrophic judgments against sinners described in Rev. 16:8f.: "the fourth angel poured his bowl on the sun, and . . . men were scorched by the fierce heat" (RSV).

Heat is connected with anger to stress the dynamic intensity of this emotion (Dt. 29:24; Zeph. 3:8; frequently *ḥēmâ* and *ḥārôn*), especially when God comes forth to judge the disobedient. Ezekiel's initial reaction to being coerced by the Holy Spirit was to respond in bitterness and in "the heat of [his] spirit" (Ezk. 3:14, RSV). Such a reaction indicates that he maintained his own inner emotional life in spite of the Spirit's directional force. After the initial encounter, it took seven days before the events gained their perspective and he could begin his prophetic task. The NEB understands the import of the passage differently; it renders "in the heat of my spirit" as "full of exaltation" (cf. *TDOT*, IV, 463f.). If this is correct, then Ezekiel became exhilarated rather than angry. Jeremiah, however, Ezekiel's contemporary, experienced intense anger in response to the Word of God (Jer. 15:17). This evidence may suggest that Ezekiel's experience was one of anger.

The RSV translates the word for "desire" as "heat" in reference to a wild ass in its time of mating (Jer. 2:24). The Hebrew, however, uses heat in reference to sex more frequently; e.g., "bred" in Gen. 30:38f., 41, "mating season" in Gen. 31:10, and "conceive" in Ps. 51:5 (MT 7).

In the time of judgment the wrath of God is intense against the disobedient, but the righteous experience God like "a shade by day from the heat" (Isa. 4:6). Then in the new age all the discomforts in this life will be gone. According to Rev. 7:16, those who have been cleansed by the blood of the Lamb "shall hunger no more, neither thirst any more; the sun shall not strike them, nor any scorching heat."

HEATH. The AV translation of Heb. *ʿarʿār* in Jer. 17:6

(RSV SHRUB; NEB JUNIPER) and of *ʿrôʿēr* in 48:6 (RSV "wild ass"; NEB "sand-grouse"). In the latter passage, the RSV emends the text, following the LXX and Aquila.

HEATHEN. *See* GENTILE.

HEAVE OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT.

HEAVEN [Heb. *šāmayim*–'heights,' *mārôm*–'height' (Job 25:2; Isa. 24:18, 21), *maʿʿaleh*–'ascent' (Isa. 7:11); Aram. *šᵉmayim* (Dnl. 4:11 [MT 8]); Gk. *ouranós*–'that which is raised up']; AV also AIR (cf. Gen. 1:26), SKY, SKIES, ON HIGH, HEAVENS (Zec. 6:5; He. 8:1), HEAVENLY (1 Cor. 15:48), "places," "the high ones" (Isa. 24:21), HEIGHT; NEB also SKY, SKIES, HEAVENS, HEAVENLY, "realm on high," etc.; **HEAVENS** [Heb. *šāmayim, mārôm* (Ps. 78:69); Aram. *šᵉmayim* (Jer. 10:11); Gk. *ouranoí* (cf. Mk. 13:25)]; AV also HEAVEN (cf. Gen. 1:1), HEAVENS OF HEAVEN (Ps. 68:33 [MT 34]), VERY HIGH, "palaces" (Ps. 78:69), "astrologers" (Isa. 47:13); NEB also HEAVEN (cf. Gen. 1:1; Ps. 68:33), HIGH PLACES, "astrologers" (Isa. 47:13). "Heaven" denotes the sky, outer space, the abode of God, angels, and other spiritual creatures, or may be used as a circumlocution for God, depending on the context.

I. OT.–In the OT, heaven is often metaphorically conceived as something fixed and material: it has windows (Gen. 7:11), pillars (Job 26:11), foundations (2 S. 22:8), and it can be torn (Isa. 63:19) like a curtain (cf. Mk. 1:10). In these senses, heaven is related to the "firmament" (Heb. *rāqîʿa*; cf. Gen. 1:8).

Heaven often refers to the space immediately enveloping the earth, i.e., the atmosphere, and a number of meteorological phenomena are mentioned: rain (Gen. 8:2), snow (Isa. 55:9-11), frost (Job 38:29), dew (Dt. 33:13, AV, RSV mg.), hail (Josh. 10:11), thunder (1 S. 2:10), wind (Zec. 6:5), and clouds (Ps. 147:8). Thus, heaven is the realm of various signs, both natural (Mt. 16:2f.) and supernatural (Ex. 10:21f.). In a combination of these two views, heaven is also the realm wherein the rainbow, God's sign of his covenant with Noah, is seen (Gen. 9:13-17).

Heaven can also denote outer space, where the lights (Gen. 1:14) and stars (Dt. 4:19) are located. The planets Venus and Saturn are referred to (Isa. 14:12; Am. 5:26), though they are not distinguished from the fixed stars. (*See* ASTRONOMY II.B, C.) Several constellations are mentioned (Job 9:9; 38:31). Though cultic worship was often associated with astrology among the peoples of the Near East, such practice was forbidden to the Hebrews (Ex. 20:4). The prophets condemned sacrificial offerings to the stars (Jer. 44:17-25), and astrological speculations were forbidden (Isa. 47:13). Such warnings reflect the conviction that the heavens, too, were part of the created order (Gen. 1:1; cf. Ps. 33:6) and therefore not to be worshiped in the place of the Creator. (*See also* ASTROLOGY IV.)

In many passages, "heaven" is the abode of God: "Look down from heaven and see, from thy holy and glorious habitation" (Isa. 63:15). Both God's habitation (Ps. 33:14) and His sanctuary (Ps. 102:19 [MT 20]; cf. Ps. 61:4 [MT 5]) are "in the heavens." God's throne is in heaven (Ps. 14:2; 103:19), and at times heaven is called the throne of God (Isa. 66:1; Mt. 5:34; He. 8:1). God's house is in heaven (Ps. 61:4; Jn. 14:2) and He dwells there (1 K. 8:12). Thus, God is often called "the God of heaven" (e.g., Gen. 24:3, 7; 2 Ch. 36:23; Ezr. 1:2; Neh. 1:4f.; Dnl. 2:37, 44). Yahweh, the God of heaven, is implored in prayer (Dt. 26:15) to "look down from thy holy habitation from heaven, and bless thy people Israel." Since God was thought to be above, people lifted their hands in oaths (Dt. 34:20) and in prayer (Ex. 9:29).

II. NT.–In postexilic Judaism the term heaven came to be used as a circumlocution for the divine name Yahweh or for the term "God." This phenomenon occurs only once in the OT (Dnl. 4:23 [MT 20]) but is frequent in the NT. In the parable of the Prodigal Son, the son returns and confesses to his father: "I have sinned against heaven," meaning that he had sinned against God (Lk. 15:21). Jesus referred to this common practice of using heaven as a substitute for God when He said, ". . . he who swears by heaven, swears by the throne of God and by him who sits upon it" (Mt. 23:22). Similarly Jesus asked the priests and elders whether John's baptism was "from heaven or from men" (Mt. 21:25), and John the Baptist is reported to have said, "No one can receive anything except what is given him from heaven" (Jn. 3:27). This phenomenon can also be seen in Jesus' preaching of the kingdom: Mark and Luke consistently use the phrase "the kingdom of God," but Matthew usually substitutes the phrase "the kingdom of heaven" (cf. Mk. 1:15 par. Mt. 3:17; Mk. 4:11 par. Mt. 13:11, etc.). (*See also* KINGDOM OF GOD V.A.)

Reference to heaven is made as a means of establishing the authority of someone or something. Thus "the heavens were opened" at Jesus' baptism (Mt. 3:16), indicating the authoritative nature of His mission. The heavenly voice (Mt. 3:17) was also indicative of divine authority. Similarly, Paul testified before King Agrippa, justifying his apostolic mission with reference to "the heavenly vision" (Acts 26:19).

Of great significance is the ambivalent portrayal of heaven given in the biblical materials. The popular conception of heaven revolves around clouds, harps, and angels, with humanity marching through the Pearly Gates to live a life of bliss. This conception is far removed from the biblical witness. Rather, the Bible depicts heaven under the wrath of God, the scene of cosmic warfare, and finally subject to dissolution prior to the creation of a new heaven. This ambivalence surrounding heaven is to be expected because of the fundamental antithetical structure of biblical eschatology, which is conceived in terms of this present evil age and the age to come (*see* ESCHATOLOGY; KINGDOM OF GOD). It must be stressed that in this framework this whole age experiences turbulence, disquiet, and flux; both heaven and earth experience the wrath of God, the powers of evil, personal incompleteness, and temporality. Only the age to come is "heaven" in any idyllic sense. In support of this view attention should be given to the following points.

(1) Heaven is populated by angels that are not absolutely good. Rom. 8:38 implicates heavenly angels in the execution of the wrath of God. This is also seen in Paul's warning that the saints will judge the angels (1 Cor. 6:3). This judgment is not restricted to the fallen angels (cf. Jude 6; 2 Pet. 2:4), but rather, in light of the absence of any qualifying epithet (Gk. *angélous*), the angels in view here must be considered "good" angels.

(2) The heavenly tribunal was accessible to the accuser, Satan (Job 1:6; cf. Zec. 3:1). In Lk. 10:17-20 we are told that the accuser had been refused hearing before the heavenly tribunal and had been cast down. This occurred initially during the temptation and the exorcistic activities of Jesus and His disciples. This event is symbolically depicted at Rev. 12:7-12, a description of a war in heaven. At vv. 8, 10, and 12 we are told that Satan was "cast out"

and that "no longer" was there any place for him in heaven. Hence, only since Christ's death and ascension to heaven has Satan's access to heaven been terminated.

(3) Some of the cosmic powers created by God (Col. 1:16) stand in need of redemption and reconciliation (v. 20), which was accomplished in the cross of Christ. Some of these heavenly powers will be destroyed, being beyond redemption (cf. 1 Cor. 15:24). These cosmic powers are evil, and Paul describes the Christian's warfare as against them (cf. Eph. 6:12). *See* HEAVENLY.

(4) Even in those heavenly precincts where God's presence is manifested there is disquiet and turmoil: the souls of the martyrs kept under the altar cry out and complain, saying, "O Sovereign Lord, . . . how long?" (Rev. 6:9f.). They are perplexed and even impatient at the postponement of judgment. Only Jesus' parousia and the subsequent completed judgment will bring these souls full blessedness. Though they are given white robes and told to rest "a little longer" (6:11), it is difficult to understand how the souls of the righteous could enjoy rest knowing that their fellow servants are being slaughtered. This "rest" is certainly not the rest of perfection, of completed blessedness.

(5) Paul tells us (2 Cor. 5:1-10) that the saints now in heaven are naked (Gk. *gymnoí*, v. 3), having not yet received their spiritual bodies (1 Cor. 15:44), which await the Parousia. Thus the intermediate state of the righteous prior to the eschatological consummation must not be one of complete felicity. Indeed, in 2 Cor. 5:1-5 Paul seems to shrink before the prospect of dying and going to heaven prior to the Parousia.

(6) Lastly, and perhaps most significantly, the Bible indicates that heaven will experience an eschatological catastrophe that will bring this age to a close. Heaven and earth were created together (Gen. 1:1), they will experience dissolution together (Isa. 51:6), and they will be redeemed together. In Mt. 24:29 Jesus said that "the powers of the heavens will be shaken," referring to the angelic or cosmic powers (Gk. *dynámeis*) that are "in the heavenly places" (Eph. 6:12): the heavens will perish (Ps. 102:26-28; Isa. 34:4), but they will be remade (cf. Isa. 65:17; 66:22).

It is in the NT that this final catastrophic judgment of heaven is clearly seen (cf. He. 1:10-12). He. 12:6, which refers to Hag. 2:6, says that the Lord will shake "not only the earth but also [Gk. *allá kaí*] the heaven," with this adversative construction stressing heaven's participation in the final cataclysm. Not only the visible, celestial heavens will be destroyed, but rather heaven in its entirety is subjected to the judgment of God. He. 1:10 and 2 Pet. 3:7, 10, 12 stress the plural "heavens" (*ouranoí*), which is explained not only with reference to the commonly used Heb. plural *šāmayim* but also by the Jewish belief in the plurality of the heavens (cf. 2 Cor. 12:2).

Whereas other religions often conceive of heaven, the beyond, as the place of complete felicity and look upon the celestial sphere as a place of pure light and untainted glory, the NT tradition never entertains such thinking. Rather, heaven was and is, even in the period after Christ, a place of conflict. God exercises wrath against the demonic attack that threatens to remove Him from his sovereign throne. It is this representation, the picture of a total age including the heavens of this age taken up in the catastrophe of evil, which finds normative expression in the NT. Thus the Christian does not seek ultimate release in this age or in the heaven of this age, for this age is impregnated with evil and hence subject to wrath. Rather, those who are "in Christ" here on earth and those who are "with Christ" in heaven anticipate that splendid day when Christ the Lord shall appear and by divine power end the demonic threat and inaugurate the coming age of glory. Then shall the saints of God fully rejoice and in transformed bodies eternally reign with the Father, Son, and Holy Spirit in the new heavens and new earth. *See also* HEAVENS, NEW.

SCHOONHOVEN

HEAVEN, HOST OF. *See* ASTROLOGY IV; HOST OF HEAVEN.

HEAVEN, ORDINANCES OF. In Job 38:33 the term refers to the constellations of certain stars (*see* ASTRONOMY IV.C) and signifies their laws. In Jer. 33:25 the term (Heb. *huqqôt*, "regulations," KoB, p. 327) may mean the "natural laws" of the universe (cf. *IB*, V, 1052).

HEAVEN, WINDOWS OF. In a few OT passages "the windows [Heb. *ʾarubbâ*, "openings," KoB, p. 82; "lattice," "window," "sluice," BDB, p. 70] of heaven" symbolize the way God, who is in heaven, interacts with His creatures on earth. These "windows" can be opened and closed (cf. Gen. 7:11; 8:2). In the Flood account (Gen. 7:11) they are the atmosphere from which heavy rains fell (cf. Isa. 24:18). In 2 K. 7:2, 19 "windows in heaven" symbolizes Yahweh's deliverance of Samaria (cf. Mal. 3:10). *See also* HEAVEN.

HEAVENLY [Heb. *bᵉnê ʾēlîm*–lit. 'sons of gods' (Ps. 29:1; 89:6 [MT 7]); Gk. *ouránios* (Mt. 5:48; 6:14, 26, 32; 15:13; 18:35; etc.), *ouranós* (Lk. 11:13; 2 Cor. 5:2), *epouránios* (Eph. 1:3, 20; 2:6; 3:10; 6:12; 2 Tim. 4:18; He. 3:1; 6:4; etc.)]; AV also "ye mighty" (Ps. 29:1), "sons of the mighty" (Ps. 89:6 [MT 7]), "from heaven" (2 Cor. 5:2), "high places" (Eph. 6:12), etc.; NEB also "gods" (Ps. 29:1), "court of heaven" (Ps. 89:6 [MT 7]), "of heaven" (Jn. 3:12), "realms of heaven" (Eph. 3:10), "in the heavens" (Eph. 6:12). Adjectival form of HEAVEN. "Heavenly" occurs only twice in the RSV OT, where "heavenly beings" translates Heb. *bᵉnê ʾēlîm* (lit. "sons of gods"). The "heavenly beings" are the gods of the pagan pantheons who must pay homage to Yahweh (cf. M. Dahood, *Psalms I* [*AB*, 1965], pp. 175f.; A. Weiser, *Psalms* [Eng. tr., *OTL*, 1962], p. 262).

In the NT, "heavenly" is used in a variety of contexts. In Jn. 3:12 it means that certain matters can be known by people with reference to their own abilities ("earthly") while other matters can be known only by revelation ("heavenly"). In 1 Cor. 15:40, 48f. the thought is eschatological and refers to the glorious resurrection bodies of believers that will correspond to the body of the resurrected Lord. In Ephesians the phrase "in the heavenlies" occurs at 1:3, 20; 2:6; 3:10 and 6:12 as a formulaic expression, so its meaning must therefore be consistent throughout the Epistle. From these passages the startling conclusion must be drawn that not only God, Christ, and believers who are "in him" dwell in the "heavenly places," but that evil cosmic powers also dwell there (cf. 3:10; 6:12). The phrase "in the heavenly places" in this Epistle is equivalent to "in the heavens" and so signifies a supernatural location. This idea of locale is seen in Phil. 2:10 and 2 Tim. 4:18. In Hebrews the thought appears to be of the superior value of the "heavenly things" as compared with the earthly things, not because of their heavenly

location per se but because of their association with Christ, the High Priest (9:23f.).

C. R. SCHOONHOVEN

HEAVENS, NEW [Heb. *šāmayim ḥ*ᵃ*ḏāšîm* (Isa. 65:17; 66:22); Gk. *kainós ouranós* (2 Pet. 3:13; Rev. 21:1)]. "New heavens and a new earth" is a technical term referring to an important element of biblical eschatology. The phrase itself is found in only four passages. In Isaiah the new creation is promised in these words, "For behold, I create new heavens and a new earth; and the former things shall not be remembered or come into mind" (Isa. 65:17; cf. 66:22). In 2 Pet. 3:13 the new creation is identified as the focus of our hope: "But according to his promise we wait for new heavens and a new earth in which righteousness dwells." The apostle John saw the inauguration of the age to come in which the promise is fulfilled: "Then I saw a new heaven and a new earth; for the first heaven and the first earth had passed away" (Rev. 21:1).

The new heaven and new earth have through the centuries of biblical proclamation comprised the apogee of the eschatological hope of the pious Jew and the devout Christian, a hope for an age of complete blessedness in which the destruction of evil would be complete. The biblical hope, however, is separated from surrounding religious expectations by the conviction that man's emancipation could not occur apart from the redemption of the created order, for HEAVEN as well as earth was implicated in the revolt against God.

The character of the eschatological hope of a new heaven and new earth is variously described. He. 12:28 refers to it as a "kingdom which cannot be shaken." Although the present earth and heaven are impermanent, the new heaven and new earth will remain forever (cf. Isa. 66:22). 2 Pet. 3:13 describes the new creation as one in which "righteousness dwells." Indeed the stress in vv. 7, 10, and 12 is on the present lack of righteousness in the heaven of this age, which will be remedied only in the new heaven of the age to come.

The writer of Revelation draws a marked contrast between the new heaven and new earth and the present heaven and earth. The new heaven and new earth are distinguished by absolute purity (21:27) and freedom from the wrath and curse of God (22:3). Indeed, the author's purpose in these final two chapters of the Revelation is to tell the reader that the new heaven and new earth are in every way different from their predecessor. Also, it is important to observe that the "dualism" of heaven and earth is not retained after Rev. 21:1, for the new Jerusalem has come down out of heaven so that now is the time of consummation, "Behold, the dwelling of God is with men" (Rev. 21:2f.). The heavenly order is now subsumed in a terrestrial kingdom where all things are new. In this way God's redemption of a fallen cosmos is completed in the re-creation of the heavens and the earth wherein this age is taken up into the age to come and God dwells with men so that He may be all in all.

C. R. SCHOONHOVEN

HEAVY; HEAVIER; HEAVILY [Heb. *gešem*] ("heavy rain," Ezr. 10:9, 13); AV GREAT; NEB RAINY SEASON; [*kāḇēḏ*] (Ex. 5:9; 9:18, 24; 14:25; 18:18; Nu. 11:14; Jgs. 1:35; 1 S. 4:18; 5:6, 11; 2 S. 14:26; 1 K. 12:10f., 14; etc.); AV also "chargeable," GREIVOUS, MORE, REPLENISHED; NEB also BURDEN, MORE BURDENSOME, "deafened," DEEPLY, HARD, "increased pressure," "outweigh," etc.; [*maᶜᵃmāsâ*] (Zec. 12:3); AV BURDENSOME; [*sāḇal*] (Ps. 144:14); AV STRONG; NEB "fat and sleek"; [*siḇlôṯ*] ("heavy burden," Ex. 1:11); [*sāmaḵ*] ("lies heavy," Ps. 88:7 [MT 8]); AV LIE HARD; NEB "rises"; [*qāšâ*] (1 S. 5:7; 1 K. 12:4; 14:6; 2 Ch. 10:4); AV also GRIEVOUS, SORE; NEB also CRUEL; [*rāḇâ*] (Eccl. 6:1; 8:6); AV COMMON, GREAT; NEB also GREATLY; [*raᶜ*] (Prov. 25:20); [Gk. *baréō*] (Mt. 26:43; Lk. 9:32); NEB also DEEP; [*baréōs*] (Mt. 13:15; Acts 28:27); AV DULL; NEB DULLED; [*katabarýnō*] (Mk. 14:40); [*mégas*] (Rev. 11:19); AV GREAT; NEB "storm"; [*talantiaíos*] (Rev. 16:21); AV WEIGHT; NEB WEIGHING; [*phortízō*] (Mt. 11:28); [*phortíon*] (Mt. 23:4).

The major meaning of "heavy" in the OT is "hard to bear, burdensome, harsh, oppressive." It has a variety of referents: (1) Yahweh's wrath (Ps. 88:7), or His hand laid in punishment on His people (1 S. 5:6f., 11; Job 23:2; Ps. 32:4), or His chains put on those who are in exile (Lam. 3:7); (2) the hand of the house of Joseph on the Amorites (Jgs. 1:35) and of Babylon on Israel (Isa. 47:6); (3) the work imposed on the Israelites by the Egyptians (Ex. 1:11; 5:9) and the work imposed by Solomon (1 K. 12:4; 2 Ch. 10:4), by Jeroboam (1 K. 12:10f., 14; 2 Ch. 10:10f., 14), and by Nehemiah's predecessors (Neh. 5:15, 18); (4) Moses' responsibilities (Ex. 18:18; Nu. 11:14); (5) Job's calamity (Job 6:3); (6) the psalmist's iniquities (Ps. 38:4), the earth's transgressions (Isa. 24:20), and mankind's troubles in life (Eccl. 6:1; 8:6); (7) Elihu's pressure on Job — which, he says, will not be oppressive (Job 33:7). In the NT Jesus says that He comes to relieve people of their oppressive burdens (Mt. 11:28), even those imposed by the law and its interpreters (23:4).

Another meaning is "of great physical weight" and refers to Eli (1 S. 4:18), Absalom's hair (2 S. 14:26), or, figuratively, to Jerusalem as an immovable stone (Zec. 12:3). This meaning is combined with the preceding to describe metaphorically the relationship between a large stone and a fool's provocation (Prov. 27:3).

Great amounts of hail (Ex. 9:18, 24; Rev. 11:19), rain (Ezr. 10:9, 13), and large hailstones (Rev. 16:21) are called "heavy," as are pregnant cattle (Ps. 144:14) and well-loaded ships (Ezk. 27:25). Mud-clogged chariot wheels drive "heavily" (Ex. 14:25).

Yet other meanings refer to emotional states: "depressed with trouble or sorrow" (1 K. 14:6) and "without vivacity or interest" (Prov. 25:20). "Heavy eyes" denotes sleepiness in Mt. 26:43; Mk. 14:40; Lk. 9:32.

The message that Isaiah received from Yahweh in his temple vision included the injunction to make the ears of the people "heavy" so that they would be unable to hear the word of salvation until the time which Yahweh should choose (Isa. 6:10). This verse is quoted twice in the NT (Mt. 13:15; Acts 28:27), each time indicating that the hour of salvation has arrived.

J. R. PRICE

HEBER hē'bər [Heb. *ḥeḇer*—'associate'; Gk. *Eber*]. Occurs several times in the OT as the name of an individual or of a clan.

1. A member of the tribe of Asher and son of Beriah (Gen. 46:17; Nu. 26:45; 1 Ch. 7:31f.).

2. A Kenite, whose wife Jael deceptively slew Sisera, captain of the army of the Canaanite king Jabin (Jgs. 4:17; 5:24). Heber had separated himself from the main body of the Kenites, which accounts for his tent being near Kedesh, the place of Sisera's disastrous battle (Jgs. 4:11).

3. Head of a clan of Judah, and son of Mered by his

Jewish, as distinguished from his Egyptian, wife. He was father, or founder, of Soco (1 Ch. 4:18).

4. A Benjaminite, or the clan or family of Elpaal of the tribe of Benjamin (1 Ch. 8:17).

5. Heber, of Our Lord's genealogy (Lk. 3:35, AV; the RSV and the NEB have "Eber"). E. B. POLLARD

HEBERITES hē'bər-īts [Heb. *haḥebrî*]. Descendants of Heber, a prominent clan of Asher (Nu. 26:45); *see* HEBER **1.** Some suppose them to be connected with the HABIRU.

HEBREW (PEOPLE) [Heb. *'ibrî*; Gk. *Hebraios*].

An ethnic term originally designating the ancestral lineage of the Israelite nation down to the *b'nê Yiśrā'ēl*, "sons of Israel," who were sojourning in Egypt. As a gentilic noun for a proto-Israelite, *'ibrî* was applied to the patriarch Abraham (Gen. 14:13), to the land of patriarchal pilgrimage (40:15), and to Joseph and his brothers (39:14; 43:32).

Most uses of *'ibrî* occur in two biblical episodes: (1) the Israelite-Egyptian narratives in the Pentateuch (five times in the Joseph cycle [Gen. 39:14–43:32] and thirteen times in the Exodus story [Ex. 1:15–10:3]), and (2) the Israelite-Philistine narratives in Samuel (eight times in 1 S. 4:6–29:3).

These passages use *'ibrî* in one of three ways. (1) A non-Israelite may identify an *'ibrî* in contrast to himself or other non-*'ibrî*. Thus it is used five times by Egyptians (Gen. 39:14,17; 41:12; Ex. 1:16; 2:6; cf. 1:22[?]) and six times by Philistines (1 S. 4:6,9; 13:3,19; 14:11; 29:3). A legitimate contextual inference from these passages is that *'ibrî* is an ethnic term used in contradistinction to "Egyptian" or "Philistine." Such an inference is reinforced by the antithesis *'ibrî-miṣrî* of Gen. 43:32 and Ex. 1:19, in which the ethnic character of the term is vividly illustrated. The argument that proposes that the basis of differentiation in Gen. 39:14–Ex. 10:3 is master-servant, not Israelite-Egyptian (but see Gen. 40:15; 43:32!), cannot adequately account for the basic Israelite-Philistine parity in 1 Samuel. Furthermore, the alternation "the Lord God of *Yiśrā'ēl*" (Ex. 5:1) and "the Lord God of the *'ibrîm*" (Ex. 5:3) clearly identifies the *'ibrî* with the Israelite; it would be inconceivable that the author should consider Yahweh as God of any but Israelites.

(2) One may identify himself or another as *'ibrî* in contrast to non-Israelites. Joseph used the appellation in this way (Gen. 40:15), as did a number of Israelites in the Exodus narratives (Ex. 1:19; 2:7; 3:18; 5:3; 7:16; 9:1,13; 10:3; cf. Jonah 1:9).

(3) A writer or speaker of Scripture may wish to distinguish the *'ibrî* ethnos from another (Gen. 43:32; Ex. 1:15; 2:11,13; 1 S. 14:21; cf. Acts 6:1; 2 Cor. 11:22; Phil. 3:5). In the same way laws distinguish the *gôyim* (non-Israelite) slaves, whose servitude was lifelong (Lev. 25:44-46), from the *'ibrî* slave, who suffered only temporary servitude (Ex. 21:2; Dt. 15:12; cf. Jer. 34:9,14 [note the *'ibrî-Y'hûḏî* alternation]).

These passages suggest that the normal usage of *'ibrî* conveyed no derogatory nuance. Moreover, no passage provides explicit ground for extending the meaning of *'ibrî* to include non-Israelites. On the plausible assumption that it is intended to mean "Eberite" (see below), *'ibrî* ought logically to apply to non-Israelites as well (e.g., Gen. 10:21-31; 11:14-26; 1 Ch. 1:17-27). In fact, however, no passage uses *'ibrî* to denote anyone but a descendant of Abraham-Isaac-Jacob, nor is *'ibrî* attested in extrabiblical literature. Sometimes 1 S. 14:21 is cited in an attempt to adduce support for an *'ibrî*-Israelite distinction. But in the preceding chapter (13:19f.), the author shows that the Philistines had been preventing the Israelites (*'ibrîm*) from forging their own swords and spears: the Israelites were forced to journey to the Philistines for such services.

With the advent of the Exodus-Sinai events inaugurating the nationhood of Israel came a corresponding change in its official nomenclature to the honorific *b'nê Yiśrā'ēl*, to which religious and national pride came to be attached.

No etymological hypothesis advanced for *'ibrî* has been totally convincing or garnered common consensus. It is suggested that *'ibrî* derives from the root *'br*, "cross over, go beyond." Accordingly, an *'ibrî* was one who had crossed over a river (cf. Gen. 14:13 [LXX], *Abram tṓ perátē*), though it is unclear whether the river involved was the Jordan, the Euphrates, or the Balikh. Building on the same root, others aver that an *'ibrî* was one who had crossed over a boundary (i.e., a pejorative term signifying a boundary jumper, trespasser). Still less convincing are those theories that seek to identify *'ibrî* with the Ḥapiru, suggesting that the *'ibrî* were donkey drivers or state benefactors (*see* HABIRU). The term has been interpreted as referring to the patriarchal ancestor Eber, grandson of Shem (Gen. 10:21, 24f.); in this sense an *'ibrî* was an Eberite (note the gentilic ending).

The entire OT was written in Hebrew except for 268 verses that were written in Official or Imperial ARAMAIC (Dnl. 2:4–7:28; Ezr. 4:8–6:18; 7:12-26; Jer. 10:11). Both Hebrew and Aramaic belong to the Semitic family of languages.

I. Semitic Languages.–Relatively few words in the OT do not have their counterpart in some other Semitic language, though seldom with an exact correspondence of

form or meaning. The Semitic family itself belongs to a still larger group of languages called Afroasiatic or Hamito-Semitic, which comprises Chadic, Berber, Egyptian, Cushitic, and Semitic. The languages spoken in the Middle East during the historical period dealt with in the Bible have been called Semitic, after Shem the son of Noah from whom the majority of peoples speaking these languages — Arabs, Hebrews, Arameans, and Assyrians (Gen. 10:21-31) — were descended. Yet not all of Shem's descendants spoke Semitic; cf., e.g., Elam (Elamite) and Lud (Lydian). Even non-Semitic peoples are found speaking a Semitic language, e.g., Canaan and Cush (Ethiopic) who were sons of Ham (Gen. 9:18; 10:6-20). Gen. 1:11 records a time when all the descendants of Shem, Ham, and Japheth spoke a common language. The biblical record and Jewish tradition imply that Hebrew was the original language of mankind, but this is not the view among Semitists today.

A. Members of the Semitic Family. About seventy distinct forms of Semitic have been classified to date, the latest being Eblaic (discovered in 1975). These languages and dialects were spoken in an area extending from the Caspian Sea to the Horn of Africa, and from the Mediterranean Sea to the Tigris valley. It is customary to fit them into one of the following three divisions:

(1) East Semitic. This is made up chiefly of Akkadian with its two main dialects, Babylonian and Assyrian. Written in cuneiform and attested from 2500 B.C. to 75 B.C., Akkadian was the lingua franca of the Middle East until it was superseded by Official Aramaic in the 8th cent. B.C.

(2) Northwest Semitic. The oldest attested member of this group is probably Eblaic. Written in cuneiform, it dates back to *ca.* 2350 B.C. Dated between 1900 and 1500 B.C. are the fragmentary Sinai inscriptions. West Semitic personal names appear in the Mari Letters *ca.* 1760 B.C. (*see* AMORITES). The Râs Shamrah tablets date from the 14th-12th cents. B.C. and are in alphabetic cuneiform script. The Canaanite glosses in the Amarna Letters date from the 14th cent. B.C. The earliest Aramaic records date from the 10th cent. B.C. Later developments are grouped into East and West Aramaic. To the former belong Syriac, Mandean, and the language of the Babylonian Talmud; to the latter, Samaritan, Nabatean, Jewish Palestinian Aramaic (found in the Palestinian Talmud and the Targums), Palmyrene, and Biblical (or Official) Aramaic. Other members of this group are Hebrew (Old Canaanite), Phoenician-Punic (10th cent. B.C. to 2nd cent. A.D.), Moabite (mid-9th cent. B.C.), and Ya'udi (8th cent. B.C.).

(3) South Semitic. This group is composed of (a) North Arabic and (b) South Arabian plus Ethiopic. To the former belong the preclassical North Arabic dialects (Thamūdic, Liḥyānite, and Ṣafāitic) and classical Arabic. To the latter belong Sabean, Minaean, Qatabanian, Ḥaḍramut, and Awsanian. The modern Semitic languages of Ethiopia are represented by Tigrina, Tigre, Amharic, Harari, and Gurage.

B. Comparative Semitic Studies. Early Hebrew customs, folklore, laws, architecture, and religious ideas show remarkably close affinities with those of surrounding Semitic peoples. It is not surprising, therefore, to find that this affinity extends to their respective languages also. Most modern commentators recognize and exploit this fact. The cognate languages are consulted to elucidate the meaning of rare Hebrew words and to clarify the nuances of various Hebrew words. Although there is a remarkable agreement morphologically (i.e., with regard to the forms of the words) among all the Semitic languages once the phonetic laws have been taken into account, this agreement cannot be taken for granted in the area of semantics (the meanings of the words). The table illustrates the close morphological affinity:

	Prefix form	Suffix form	Active Participle
*Ugaritic	yaqbur	qabara	qābir
Hebrew	yiqbór	qābár	qōbĕ́r
Aramaic	yiqbúr	q^{e}bár	qābĕ́r
Syriac	neqbór	q^{e}bár	qāber
Ethiopic	yéqber	qabára	qā́ber
Arabic	yáqburu	qábara	qā́bir
Akkadian	íqbur	(qabir)	qābiru(m)
Eblaic	iqbur	qabara	?

*The vowel system is not fully indicated in Ugaritic, so the Proto-Semitic system has been supplied here.

Extreme caution, however, is needed in the area of comparative semantics, as J. Barr has demonstrated (*Semantics of Biblical Language* [1961]). Samples of roots taken from two such closely related languages as Syriac and Hebrew were found to have similar meanings in only 30 to 40 percent of the cases. Between Arabic and Hebrew the results were similar, but for Ethiopic there was only 17 percent agreement in meaning. If, however, a wider comparison is made between the names for objects, occupations, etc., there is about 65 percent agreement between Syriac and Hebrew (*Encyclopaedia Judaica* XIV, 1155a).

II. History of the Hebrew Language.—The Hebrew language of the OT is in a very stable state linguistically. The variations between the strata of the language are slight compared with the difference between modern and classical Arabic.

A. Origin of the Hebrew Language. According to Gen. 11:1f. the whole post-Flood civilization dwelt in one locality — the Plain of Shinar. Abraham's family (and ancestors?) dwelt at Ur. Presumably they were an integral part of this city-state socially and linguistically. Abraham's family may well have spoken a language akin to Old Akkadian or early Babylonian. Later, Abraham moved to Haran where the principal language was apparently Aramaic (cf. Gen. 31:47; Dt. 26:5). It may well be that bilingualism was common among the Semites (see E. Ullendorff, *BJRL*, 44 [1962], 455-465).

A common trend is to view the Hebrews who conquered Canaan under Joshua's leadership as primitive nomadic desert tribes speaking a tribal dialect of Old Aramaic, probably with close affinities to the speech of Canaan. After the Conquest these primitive tribes from across the Jordan appear to have been assimilated gradually into the culture and civilization of the conquered Canaanites and to have adopted their speech. On this view, then, we do not know the precise nature of the original language of the Hebrew invaders. For further discussion of the history of the Hebrews *see* ISRAEL, HISTORY OF THE PEOPLE OF.

B. Earliest References to Spoken Hebrew. The earliest biblical reference to spoken Hebrew occurs in Gen. 31:47 where Laban and Jacob refer to a heap of stones in their own native speech. Laban calls it *Jegarsahadutha,* which is Aramaic, while Jacob calls it *Galeed* and a nearby pillar *Mizpah,* two Hebrew words. This would place spoken Hebrew in the 18th cent. B.C., at the latest. One thousand years later we find Hebrew being called *y^{e}hûḏît* or the "language of Judah" (2 K. 18:26). In Isa. 19:18 it is called "the language [Heb. *śᵉpaṯ,* "lip"] of Canaan," possibly because this was how the Egyptians referred to it. The designation "Hebrew" for the language first occurs in Ben Sira's prologue (*ca.* 130 B.C.).

C. Earliest References to Written Hebrew. On numerous occasions Moses was commanded to write down what God had spoken (e.g., Ex. 17:14). This took place either in the 15th or the 13th cent. B.C., depending on the date of the Exodus (*see* EXODUS, DATE OF). In the period of

the judges a young man could write down the names of the seventy-seven elders of Succoth without any apparent difficulty (Jgs. 8:14). The Book of Jashar may have been in existence in the early period of the monarchy (Josh. 10:13; 2 S. 1:18). Court records of the kings of Israel and Judah were kept from the earliest times. Records of prophecies were kept either by the prophet himself or by his disciples. We have no reason to cast doubt on the biblical references to Hebrew writing, although extant evidence only takes it back to the 11th cent. B.C.

D. Early Hebrew Inscriptions. The chief extrabiblical evidence for written Hebrew is as follows. (1) The ʿIzbet Ṣarṭah inscription was discovered in 1976. Dated to the 11th cent. B.C., it contains around eighty letters (M. Kochavi, *Tel Aviv*, 4 [1977], 1-13 [also pp. 14-27]). (2) The schoolboy's GEZER CALENDAR lists the agricultural significance of the successive months of the year. It is dated *ca.* 925 B.C. and is written in the Paleo-Hebrew script. (3) In 1976 about seventy Hebrew and Phoenician inscriptions were found at Kuntillet ʿAjrūd in Sinai, and dated between the 9th and 8th cents. B.C. (Z. Meshel, *Biblical Archaeology Review*, 5/2 [1979], 24-35). One text refers to God — under His covenant name *YHWH* — in conjunction with the goddess Ashtaroth, reminding one of the Elephantine papyri parallel. (4) The Siloam inscription dates from *ca.* 705 B.C. (5) The Samaria Ostraca date from the reign of Jeroboam II (*ca.* 770 B.C.), and consist mainly of receipts for taxes. (6) The Lachish Letters date from *ca.* 587 B.C., and consist largely of military communications from a Jewish outpost to its headquarters. These inscriptions indicate the way Hebrew was written and spelled in those periods. By the time the DEAD SEA SCROLLS were written (2nd cent. B.C.) the Paleo-Hebrew script had given way to the Aramaic "square script" (*see* INSCRIPTIONS; WRITING).

III. Hebrew Literature.–Israel may have had a vast literature before the close of the OT period, yet nothing of it has come down to us except the OT writings. The biblical books refer to other works and are themselves composite in character. The period between the Old and New Testaments saw an increase in works of an apocalyptic nature, but these and many other works were not so carefully preserved. The writings of the Qumrân sect survived because they were hidden in jars in the favorable climate of the Dead Sea valley.

A. Uniform Language. One of the most remarkable facts connected with the Hebrew of the OT is that, although its literature covers a period of over a thousand years, the language (grammar and vocabulary) of the oldest parts differs little from that of the latest. That is not to rule out dialectal differences, which we know did exist (see C below). Rather, just as the Koran — the first extensive work composed in Arabic that has survived — became the pattern for all future compositions, so the books of Moses became the pattern for all future Hebrew compositions because of their dominant influence on Hebrew life and culture. Note especially the influence of Deuteronomy on the language and outlook of the major prophets.

Many other reasons can be given for this uniformity and much will depend on one's view of the literary development and the date of composition of the OT. Some OT books (e.g., Genesis) incorporate a good deal of oral tradition, in which case the written form of the tradition may not be an exact reproduction of its first telling. For example, a "modern" place name may replace an earlier one which the readers or listeners would not have known, as in Gen. 14:14 where we read that Abram "went in pursuit as far as Dan." The oral tradition probably said "Leshem," as "Dan" did not exist in Abraham's time (cf. Josh. 19:47). Sometimes the old and the "modern" names are given (e.g., Gen. 23:2; 35:19). It also appears that later custodians of the written oral tradition felt it necessary to insert explanatory comments for the benefit of their readers or listeners; hence the information is supplied that "At that time the Canaanites were in the land" (Gen. 12:6; 13:7); or the observation that a custom or monument exists "unto this day" (see B. S. Childs, *JBL*, 82 [1963], 279-292). Some of these glosses in the Pentateuch are clearly post-Mosaic, e.g., Gen. 36:31; Ex. 6:26f.; 11:3; 16:35f. (cf. Josh. 5:11f.); and Dt. 34:5-12. It is safe, therefore, to assume that the purpose of these glosses was to keep these stories and traditions alive and relevant to each new generation; this may contribute to the apparent uniformity. The following factors, however, may have played a part also. (1) Behind much of Israel's early writings lies a strong oral tradition, which would itself have had an overall uniform character before it was committed to writing. (2) On the assumption that oral tradition underwent a continuous gradual development or updating over the centuries, this development would be "frozen" once it was written down. The written form would then set the pattern for any further writing of it or additions to it. (3) It is possible that the consonantal text is original but not its present Masoretic vocalization, which was added to the text sometime between the 6th and 9th cents. A.D., hence the apparent uniformity.

B. Stylistic Differences. When one considers the contributors — prophets, priests, kings, rich men, poor men, poets, philosophers, and historians — one is not surprised to find such a variety of styles. The style of Hosea is noticeably distinct from that of his contemporary Amos. The same author may reveal a number of styles depending on subject matter, genre, and time of writing, e.g., Isaiah and Daniel.

C. Dialectal Differences. Many attempts have been made to reconstruct the pre-Masoretic vocalization of the Hebrew writings without any major agreement among scholars. When the Masoretes vocalized the consonantal text Deborah's idiolect (the distinctive pronunciation, grammar, and vocabulary of an individual speaker) was made indistinguishable from Esther's, which can hardly have been the case from a diachronic point of view. That there were dialectal differences as early as the period of the judges is certain from Jgs. 12:6. In the Ephraimite dialect initial *š* became *ś*, whereas in the Gileadite dialect these two phonemes remained distinct. This meant that a man from Ephraim would say *sibboleth* when he tried to pronounce the word *shibboleth*. In both dialects the word meant "a stream in flood" (cf. Ps. 69:2 [MT 3], 15 [MT 16]; Isa. 27:12). It would appear that northern Israelites used *'ty* for the 2nd fem. sing. pronoun, as against *'t* elsewhere (see BDB, p. 61b). The book of Job is also thought to be written in a dialect different from classical Hebrew (see comms.).

D. Foreign Influences. It is a recognized fact that the chronological stages of a nation's literature can be determined by the foreign elements imbedded in its vocabulary and structure. Thus, in Anglo-Saxon literature the numerous Latin ecclesiastical terms indicate that the English derived their religion from the Romans. Chaucer's *Canterbury Tales* show clearly that the Norman-French conquerors had imposed their civilization upon the Saxons and had dominated them in government, social customs, and nearly every sphere of life and thought. The Hebrews, too, came under the dominion of great empires — Babylonian (Abraham's time), Egyptian (400 years), Assyrian (*ca.* 853-612 B.C.), Neo-Babylonian (612-539 B.C.), Persian (539-331 B.C.), Greek (331-63 B.C.), and finally the Roman Empire. In one way or another these empires left their mark on Israel, especially on its language. According to

M. Ellenbogen, 50 percent of the loanwords in the OT came from the Akkadian, including words of Sumerian origin. Egyptian contributed 22 percent, Iranian (Persian) 18 percent, and the remaining 10 percent comprises words of Indian and Greek origin. According to Strong's concordance, Biblical Hebrew has a vocabulary of 8674 words, and of these, according to Ellenbogen, only 146, or less than 2 percent, are loanwords. This makes Biblical Hebrew a relatively pure language compared with English.

E. Extinction of Spoken Hebrew. The Babylonian Exile began the demise of Hebrew as the common language of the people. The educated classes were deported to Babylon or fled to Egypt. Those who remained quickly adopted the language of their conquerors or their foreign spouses. When Nehemiah arrived back in Jerusalem in 432 B.C. he found the people speaking hybrid languages (Neh. 13:24). Whatever may be the correct interpretation of Neh. 8:8, it proves that the people of that time had great difficulty understanding spoken Hebrew. It is very likely that Aramaic replaced Hebrew as the spoken language by the 3rd cent. B.C., but that Hebrew continued as the literary and sacred language. We have examples of literary Hebrew in the 2nd cent. B.C. in the works of Ben Sira (*ca.* 130 B.C.) and the Qumrân scribes. Hebrew was used on coins minted during the Maccabean period. It was used as late as A.D. 135 in Bar Cochba's letters and in fragments of Hebrew Christian prayers found at Dura-Europas (late 3rd cent. A.D.; cf. J. L. Teicher, *JQR*, 54 [1963], 99-109). Whether Hebrew was spoken as an everyday language in NT times is still debated (see J. A. Emerton, *JTS*, 24 [1973], 1-23).

IV. Chief Characteristics of Hebrew.—The Hebrew language, like Phoenician, Aramaic, and Arabic, but unlike English, is written from right to left. The language itself differs no less strikingly from English.

A. Phonology. Unlike English, which includes the vowels in its twenty-six-letter alphabet, the Hebrew alphabet consists of twenty-two consonantal sounds or phonemes. The first letter in the Hebrew alphabet is not *a* but the glottal stop *'ālep* (a breathing sound produced by the glottis). The nearest equivalent in English would be the "gap" in the Cockney pronunciation of "water." There are no equivalents for *'ayin*, *ḥêṭ*, or *qôp* in English. On the other hand, Hebrew has no equivalents for the English *j* (as in Jeremiah), or *ch* (as in Charles), or *x* (as in six).

The Masoretes distinguished fourteen different vowel sounds. These consist of long and short forms of the five English vowels, plus half-vowels of three of them, namely, ^{a}, ^{e}, and ^{o}, and finally an extremely brief indeterminate sound called *shewa* (^{e}). The diphthongs *ay* and *aw* were formed with the help of vowel letters.

B. Use of Vowel Letters. Until *ca.* 1000 B.C. only the consonants were written in Hebrew. The vowels were supplied by the reader from memory or from his knowledge of the language. Around 900 B.C. Hebrew scribes began to use the letters *hê*, *wāw*, and *yôḏ* in a semiconsonantal function. *Hê* was used to indicate final *ā* (sometimes final *ō*), *wāw* final *û*, and *yôḏ* final *ī*. Around 600 B.C. these three semiconsonants occur unambiguously as vowel letters in both medial and final positions. Thus these three consonants, while retaining their own consonantal value, served to indicate the type of vowel to be read until new methods were devised to indicate more accurately the quality and quantity of the vowels. The Masoretic system is the most elaborate of all and is used in the Hebrew Bible today.

C. The Syllable. In Hebrew no word or syllable may begin with a vowel such as the English *easy* and *age*. No syllable or word may begin with two or more consonants as happens in English, e.g., *blow*. In Hebrew this would have to be read as *b^{e}low*, e.g., the initial consonant *b* would have to take at least the brief shewa vowel (^{e}) after it in order to pronounce it properly and to break up the initial pair or cluster of consonants.

D. Triconsonantal Roots. Practically every word in the Hebrew language has at its heart a root consisting of three consonants (also characteristic of the other Semitic languages). Indeed, once a root has been learned it is not difficult to form verbs, nouns, etc., from it. Hebrew has around 1800 roots, of which only about thirty are quadriradicals (i.e., consisting of four consonants). In modern Hebrew quadriradicals comprise between 35 and 50 percent of all roots. With twenty-three consonants (including *ś* and *š*) Hebrew could theoretically form 12,167 three-letter roots (i.e., 23^3). It has substantially fewer than this because of certain phonetic difficulties or incompatibilities. For example, two identical consonants or two consonants with a similar point of articulation cannot appear as the first two consonants in any root (see J. H. Greenberg, *Word*, 6 [1950], 161-181; 18 [1962], 262-68).

E. Nouns and Adjectives. Following the Arab grammarians, medieval Jewish grammarians divided Hebrew grammar into three parts, namely, verbs, nouns, and particles. They made no distinction between nouns and adjectives. This is not surprising when we consider that both are formed in an identical manner, e.g., *sûs ṭôḇ*, "a good horse (*sûs*)" (masc. sing.); *sûsâ ṭôḇâ*, "a good mare" (fem. sing.); *sûsîm ṭôḇîm*, "good horses" (masc. pl.); and *sûsôṯ ṭôḇôṯ*, "good mares" (fem. pl.). To make these definite the article (*ha* + doubling of the first consonant where possible) is prefixed to both the noun and the following "adjective," thus: *hassûsîm haṭṭôḇîm*, "the good horses" (masc. pl.). There are four points to note here. (1) The masc. sing. form of the noun and adjective serve as the basis for the formation of the other genders and numbers (i.e., they are the unmarked forms). In Hebrew everything is either masculine or feminine; there is no neuter gender. (2) Both noun and adjective take the same gender and number endings: *-â* for fem. sing., *-îm* for masc. pl., and *-ôṯ* for fem. plural. (3) If the noun has the definite article, the adjective must also have it. (4) The adjective almost always follows the noun. There are, of course, exceptions to every general rule; the reader should consult a good Hebrew grammar for these.

For the sake of clarity we shall divide the broad category of nouns into the following three subdivisions: (1) substantive nouns, (2) pure and generic adjectives, and (3) epithet nouns.

(1) The substantive nouns are easily identifiable since they are usually an arbitrary name given to an object without reference to its quality or any other attribute, e.g., *ḥ^{a}môr*, "an ass," *sûs*, "a horse."

(2) Pure adjectives are those words which can be used to describe *both* animate and inanimate subjects or objects, e.g., *ṭôḇ*, "good," *lāḇān*, "white," *ḥāzāq*, "strong," *rāḥôq*, "distant, far," etc. Such adjectives are very rarely substantivized, though Hebrew can, like English, use the adjective to express the abstract, e.g., *haṭṭôḇ*, "the good." Generic adjectives, on the other hand, qualify only animate beings, and it is from this type of adjective that Hebrew forms its epithet nouns which require special notice.

(3) Biblical Hebrew almost exclusively uses epithet nouns rather than its adjectives, which are not nearly as numerous. Most of the generic adjectives are easily transformed into epithet nouns by simply using them on their own. For example, *k^{e}sîl* in *bēn k^{e}sîl*, "a foolish son" (Prov. 17:25), is an adjective, whereas in *'ênê k^{e}sîl*, "eyes of a fool" (Prov. 17:24), it is an epithet noun. Similarly, *ḥārēš* on its own would mean "a deaf man," and

it is not necessary to write or say *'îš ḥārēš* "a man, a deaf one." There is a semantic difference between the epithet noun and the adjective. "The man is foolish" (adjective) is not as strong or as harsh as "The man is a fool" (epithet noun). The adjective conveys the indefinite and the general, while the epithet noun conveys the specific; the adjective imputes an external quality while the epithet noun describes the nature of the man, or his permanent state. A wise man can make a mistake, but a fool does nothing else, hence the saying: "The tongue of the wise [*ḥ^{a}ḵāmîm*] dispenses knowledge, but the mouths of fools [*k^{e}sîlîm*] pour out folly" (Prov. 15:2).

F. Formation of Adjectives. Hebrew has a paucity of pure adjectives, i.e., a paucity of that category of words which express an indefinite external quality, but the language has made good this deficiency in a number of ways. This paucity is particularly noticeable in the Psalms where a total of forty-seven psalms have not a single pure adjective (i.e., where the adjective follows the noun it qualifies). The same is true of nine chapters in Job, five in Genesis, ten in Numbers, etc. Indeed, there is not a book in the Bible that can boast of an adjective in every chapter. On the other hand, there is hardly a chapter that does not have an epithet noun in it, or one or more of the following ways of forming adjectives.

(1) In the construct state, Hebrew brings two nouns together in apposition to create a compound idea, e.g., *'îš '^{ĕ}lōhîm* means "a godly man" (lit. "a man of God"); likewise, *har qōḏeš* means "a holy mountain" (lit. "a mountain of holiness"). To make these compounds definite the article is prefixed only to the genitive or second noun, e.g., *'îš hā'^{ĕ}lōhîm,* "the man of God." The construct state is used only where the language does not have a single word for the concept being expressed. In such cases the Hebrew speaker circumvented the problem in much the same way that anthropologists circumvent the problem of inventing new names to describe new species of men, i.e., first the genus is identified, *homo,* then a further defining or limiting word is added, such as *sapiens* or *erectus.* Hebrew did not have a single word for "silver sockets," so it mentioned the object first, *'aḏnê,* "sockets," and then limited the class of socket to the "silver" ones, as opposed to gold or bronze sockets, hence *'aḏnê kesep* or "sockets, silver" = "silver sockets."

(2) Adjectives are formed from the nominal qualities of the participle when these are placed in apposition with a noun, thus *'ēš 'ōḵeleṯ,* "a devouring fire" (Ex. 24:17).

(3) Relative nouns and adjectives are formed by suffixing *î* to the noun stem. The difference between them is that the relative noun is formed from a proper noun, e.g., from *miṣrayim,* "Egypt," is formed *miṣrî,* "Egyptian," and from *y^{e}hûḏâ,* "Judah," is formed *y^{e}hûḏî,* an inhabitant of Judah (the termination corresponds to the -ish in Irish, English, etc.); while the relative adjective is formed from a common noun, e.g., *'ēṯ,* "time," but *'îš 'ittî* means "a man, a fit (or 'ready, timely') one" (Lev. 16:21).

So fluid is the category of adjective in Hebrew that the same word may be used as a pure adjective, a common noun, or a proper name. For example, *b^{e}lîya'al,* "worthless," in *'îš rā' ûḇ^{e}lîya'al,* "the wicked and base fellows" (1 S. 30:22), is a pure adjective; in *'îš habb^{e}lîya'al,* "you worthless fellow" (2 S. 16:7), it is a common noun (note that it takes the definite article); and in *b^{e}nê-ḇ^{e}lîya'al,* "sons of Belial," it is a proper noun, which very rarely takes the definite article (see Gesenius, *et al.,* §§ 125f.).

A point often overlooked in Hebrew grammars is that Hebrew does have three word patterns which are purely adjectival; these are *qaṭlāl, q^{e}ṭalṭāl,* and *q^{e}ṭalṭōl.* While it is true that Hebrew does not have many pure adjectives, it is also clear that it has many other ways of expressing the adjectival idea.

G. Verbal System. Alongside its quota of participles, infinitives, and its various moods (imperative, jussive, and cohortative), Hebrew has seven indicative themes in two basic forms, perfect and imperfect. The perfect form is:

qal	*kāṯaḇ 'eṯ haddāḇār*	"he wrote the word" (base or ground form)
niphal	*niḵtaḇ haddāḇār*	"the word was written" (pass. of qal)
piel	*šibbēr 'eṯ hakkaḏ*	"he smashed the pitcher" (intensive)
pual	*šubbar hakkaḏ*	"the pitcher was smashed" (pass. of piel)
hiphil	*he'^{ĕ}ḇîr 'eṯ hā'ām*	"he led the people across" (causative)
hophal	*ho'^{o}ḇar hā'ām*	"the people were led across" (pass. of hiphil)
hithpael	*hiṯqaddēš*	"he sanctified himself" (reciprocal)

The chief morphological difference between the perfect (or suffix form) and the imperfect (or prefix form) is that the former suffixes the pronominal subject to the verbal root, whereas the latter prefixes it. The main semantic difference between the two forms is still a matter of debate. It used to be thought that the suffix form indicated past time, and the prefix form the present and future times. This view was abandoned last century in favor of a complete (or perfect) and incomplete (or imperfect) opposition. This theory, while certainly an improvement on the former, is not without its difficulties. Another view regards these two verb forms as representing different ways of communicating events and ideas. We might illustrate this as follows. A family could hand down a visual account of its history to future generations in the form of (1) an album of "still" snapshots, or (2) "live" pictures by means of videotape or cine-camera film. Both would be equally valid, and, indeed, the biblical writers record the same event using the equivalent of both methods (cf. esp. the parallel passages in Kings-Chronicles, e.g., 1 K. 22:41 and 2 Ch. 20:31). The nearest parallel to the "still" and "live" forms of recording or retelling historical events in English would be the use of the past tense (= "still") and the historic present tense (= "live"), which is seldom used today. But the parallel should not be pressed as there are no "tenses" as such in Hebrew, which uses both forms in any time sphere.

A modification of the above view suggests that when the biblical writers used the suffix form (*qāṭal*) they were attributing or imputing actions or states to the subject of the verb, e.g., "In the beginning God created [*bārā'*] the heavens and the earth" (Gen. 1:1); whereas in using the prefix form (*yiqṭōl*) they intended to let the subject "speak for himself," as it were, and we see the original action once again being acted out, e.g., "And God said [*wayyō'mer,* or "proceeds to say"], 'Let there be [*y^{e}hî*] light,' and there was [*way^{e}hî*] light" (Gen. 1:3). The prefix form, then, on this view, has more the flavor of an "on-the-spot" reporting of an event; whereas the suffix form presents the listener with the facts themselves.

H. Syntax. Hebrew literature can be divided into three categories for the sake of discussing its syntax; these are (1) prose, (2) prophecy, and (3) poetry. The first two follow the same normal word order, namely, verbal predicate + noun subject + noun object + adverb or prepositional phrase, e.g., (prose) *wayyāḇē' yôsēp 'eṯ dibbāṯām rā'â 'el '^{a}ḇîhem,* "and Joseph brought an ill report of them to their father" (Gen. 37:2). Any deviation from the normal word order will be for emphasis (e.g., Gen. 3:13)

HEBREW LANGUAGE

or contrast (e.g., Gen. 13:12). Poetry, on the other hand, tends to be much more flexible in its clause structure.

An analysis of the way the RSV has translated the Hebrew verb forms is interesting.

	Indicative Mood			Other Moods
	Past	Present	Future	
wā + prefix	14,205	307	27	490
wᵉ + prefix	70	196	435	734
prefix	773	3,374	5,452	4,705
wᵉ + suffix	488	541	2,929	2,418
suffix	10,820	2,671	256	335

("Other moods" includes other translations, such as nouns or adjectives, and untranslated verbs.)

(1) Prose syntax shows a distinct preference for *wā* + prefix in initial position to describe or relate historical events, and the suffix form (without a prefixed *wāw*) in a noninitial position. Generally a narrative will commence with a suffix form in a noninitial position, and this will be followed by a series of prefix forms in initial position, e.g., *'îš hāyâ bᵉ'ereṣ 'ûṣ 'iyôḇ šᵉmô . . . wayyiwwāleḏû . . . wayhî. . . .*, "There was a man in the land of Uz, whose name was Job . . . and there was born to him . . . and he had . . ." (Job 1:1-3). Normally when the series or chain of *wā* + prefix forms is interrupted so that the prefix form is detached from the initial conjunctive *wāw*, the following verb will be in the suffix form, e.g., *wayyiqrā' 'ᵉlōhîm lā'ôr yôm wᵉlaḥōšeḵ qārā' lāylâ*, "God called the light Day, and the darkness he called Night" (Gen. 1:5). Occasionally the prefix form is retained in a noninitial position if there is some special emphasis on the initial word, e.g., "And it [the little ewe lamb] grew up [*wattigdal*] . . . it used to eat [*tōḵal*] of his morsel, and drink [*tišteh*] from his cup, and lie [*tiškāḇ*] in his bosom, and it was like [*watt'hî*] a daughter to him" (2 S. 12:3).

(2) Prophecy shows a distinct preference for *wᵉ* + suffix in initial position to relate future events, and the prefix form (without a prefixed *wāw*) in a noninitial position. Prophecies seldom begin with a prefix form in noninitial position, followed by suffix forms in initial position, as one might expect on the analogy of prose syntax. Instead, the prophetic formula: "Thus said the Lord" is followed by *lāḵēn*, "Therefore" plus either a participial phrase, *hinnî nōṭeh yāḏî*, "Behold, I will stretch out my hand" (Ezk. 25:16), or a suffix form, *hinᵉnî nāṭîṯî*, "Behold, I have stretched out my hand" (Ezk. 25:7), or *wᵉ* + suffix, as in *wᵉnāṭîṯî yāḏî*, "I will stretch out my hand" (Ezk. 25:13).

Normally when a series or chain of *wᵉ* + suffix forms is interrupted so that the suffix form is detached from the initial conjunctive *wāw*, the following verb will be in the prefix form, e.g., *wᵉnāṯaṯi lāḵem lēḇ bāśār wᵉ'eṯ rûḥî bᵉqirbᵉḵem*, "and I will give you a heart of flesh. And I will put my spirit within you" (Ezk. 36:26f.).

A striking feature of Hebrew syntax, especially in prose, is the relative rarity of subordinating conjunctions marking adverbial clauses as such. Instead, one finds long sequences of clauses and even single verbs (cf. 2 Ch. 28:17 [MT 15]), connected only by a form of the conjunctive *wᵉ* ("and"). Because of this, it is obviously impossible to translate literally into acceptable English. For example, see the various translations of *wayyāqem* in Jgs. 2:16.

(3) The syntax of poetry is a little freer as regards word order and sentence structure. A comparison of the parallel passages in Ps. 18 and 2 S. 22 shows that the poet can dispense with the conjunctive *wā* before the narrative prefix form without in any way affecting the meaning, e.g., Ps. 18:6 [MT 7] = 2 S. 22:7; Ps. 18:13 [MT 12] = 2 S. 22:12.

Poetic language is also distinguished from prose, not only by a rhythm due to more strictly balanced (parallel) members and stress patterns, but also by peculiar words and meanings, inflexions and syntactical constructions that are used in addition to those usual in prose. Peculiar words in poetry, for which others are customary in prose, are *'ᵉnôš*, "man" = *'āḏām* in prose; *'ōraḥ*, "path" = *dereḵ*; *millâ*, "word" = *dāḇār*; *ḥāzâ*, "to see" = *rā'â*; *'āṯâ*, "to come" = *bô'*. It also has longer forms of prepositions of place: *ʿᵃlê = ʿal*, *'ᵉlê = 'el*, *ʿᵃḏê = ʿaḏ*; the endings *-î*, *-ô* in the noun; the pronominal suffixes *-mô*, *-āmô*, *-ēmô* for *-m*, *-ām*, and *-ēm*, the plural (Aramaic) ending *-în* for *-îm*. With regard to syntax there is a more sparing use of the article, of the relative pronoun, and of the accusative particle *'eṯ*. The construct state is used even before prepositions, which have a wider governing power, and in general there is a forcible brevity of expression.

Because Hebrew does not have tenses as such (the table above shows that every verb form can be translated by any tense), only the context can supply this information. Thus *wᵉhāyû šᵉmōnâ qᵉrāšîm* is translated as "There were eight frames . . ." in Ex. 36:30; but in the parallel passage, the same clause is translated, "And there shall be eight frames . . ." (Ex. 26:25). Similarly, *yihyû* in Ex. 26:24 is future, but in Ex. 36:29 it is past; *wᵉlō' yizzaḥ* is future in Ex. 28:28, but past in Ex. 39:21; *wᵉṣippîṯâ* is future in Ex. 26:37, but *wᵉṣippâ* in 36:38 is past.

The beginner in Hebrew is often surprised to find the verb "to be" missing in most of the cases where it would be necessary in English. Where the AV supplied the verb "to be" it put it in italics as follows: "and darkness *was* upon the face of the deep" (Gen. 1:2, but cf. Gen. 15:17); "And Noah *was* six hundred years old" (Gen. 7:6, but cf. 2 S. 4:4); and "for she *was* a virgin" (2 S. 13:2, but cf. 1 Ch. 22:11).

V. Conceptual Characteristics of the Semites.—Almost every aspect of research into the ancient civilizations of the Near East throws some light on the literature, laws, and customs of the Hebrew people. This research makes the student of the Bible aware of the fact that the Hebrews were a Semitic people, thoroughly at home in their Semitic environment.

A. Concrete and Abstract. The thinking of the Hebrews, like that of other Semitic peoples, was done not in the abstract but in the concrete. Thus we find the material put for the immaterial, the expression for the thought, the instrument for the action, the action for the feeling. This mode of thought frequently gives rise to striking physical metaphors, e.g., the abstract "stubborn" is literally "hard of neck"; "impudent" = "hard of face"; "extensive" = "broad of hands"; "miserable" = "bitter of soul." The "eye" stands for "watchfulness" or "care" (cf. Ps. 33:18); the "long hand" for "far-reaching powers" (Isa. 59:1); "broken teeth" for "defeated malice" (Ps. 3:7 [MT 8]); the "sword" for "slaughter" (Ps. 78:62); "haughty eyes" for "superciliousness" (Prov. 6:17); "to say in one's heart" for "to think" (Ps. 10:6); and "to lift up the eyes" for "to see." A number of these and similar Hebraisms have come into the English language through the AV.

B. View of Nature. Hebrew poets hardly seem to draw any distinction between the animate and inanimate creation on occasions. All nature is animate (Ps. 104:29). The hills rejoice (Ps. 65:12 [MT 13]), the mountains skip (114:4), the trees clap their hands (Isa. 55:12). Such expressions were never intended to be taken literally but express the intensity and imaginative nature of the poets' feelings. All nature is one under man's dominion (Ps. 8:6 [MT 7]).

C. Pictorial Imagination. The highly imaginative nature of the Hebrew writer comes into play when he is recounting past events or telling stories. To his mind's eye all past events come alive and he recounts them as if they were unrolling before his very eyes. In English the historic present tense is used to achieve a similar effect, though Hebrew seems to have its own historic present in the form of the participle; thus, "So they went up [*wayya'ălû*] to the city. As they were entering [*hēmmâ bā'îm*] the city, they saw Samuel coming out [*šᵉmû'ēl yōṣē'*] toward them on his way up to the high place" (1 S. 9:14). The writers prefer to let the characters in the stories speak for themselves, hence their frequent use of direct quotation. Moreover, the historian writes in much the same manner as the professional storyteller narrates, that is, he will often repeat himself (1 S. 5:1f.).

D. Poetry. Semitic poetry possesses no regular meter or rhyme. Its essential characteristic is rhythm — the rhythm of balancing thought against thought, and word against word. The Hebrew language is characterized by a vigorous terseness and power of condensation which cannot be preserved in English. On the special vocabulary and syntax of Hebrew poetry, see IV.H.3 above; *see also* POETRY, HEBREW.

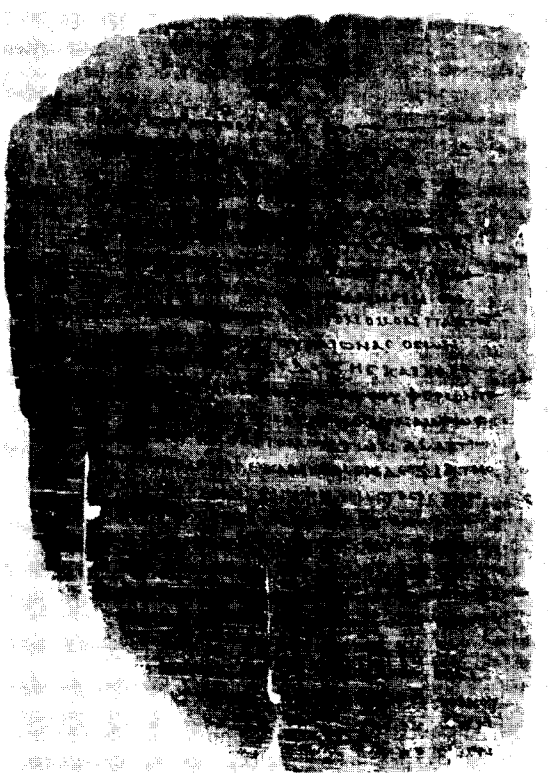
X. Analytical Outline

I. Title.–The oldest title for which we have any evidence contained the words "to Hebrews" (Gk. *prós Hebraious*). Even here the earliest attestation is not before the 3rd century. It is often supposed that this brief title may not have been original but was rather a scribal addition. If so, it may well have been no more than an inference from the contents of the book. The additional words "The Epistle of Paul the Apostle" found in the AV are a still later addition and reflect the tradition of the churches regarding the authorship of the book. Yet even if the briefer title is treated as editorial, it may not necessarily be assumed to be inaccurate. It is certainly vague, and this has raised suspicions in the minds of many regarding its authenticity.

Early tradition knows of no alternative title, however, and this may be taken to indicate that the consensus of opinion in the early period of the Church was that this letter was addressed to Hebrew people. There will be further discussion of the correctness of this assumption in V below, but it is evident that uncertainty regarding the title is a disadvantage when considering the historical setting. We are left to draw inferences from the book's

Chester Beatty papyrus ($\mathfrak{p}^{46}$), 3rd cent. A.D., Rom. 16:23–He. 1:7. Note the heading *pros ebraious*, "to the Hebrews" (University of Michigan Library)



historical allusions, which at best are very vague and fragmentary. Nevertheless, there are some advantages for the exegete in this indeterminacy, for his interpretation of the contents is not greatly dependent upon conclusions regarding authorship, destination, and date, none of which is ascertainable with a great degree of certainty. Indeed, for the exegete the background of thought is of much greater importance. It may be said at once that criticism of the book may proceed with the primary intention of elucidating this background.

II. Literary Form.–A. Author's Culture and Style. The writer was evidently a man of culture who had a masterful command of the Greek language. He was well read in Hellenic literature (e.g., the Wisdom of Solomon) and showed some points of contact with Philo's system of thought, although it is by no means certain that he had read the works of that writer. This latter factor will be touched upon when dealing with the background, but for the present it is sufficient to note that the similarities in thought are indications of the author's level of culture. The writer's method of argument generally proceeds in accordance with the rules of Greek rhetoric. He does not digress the way Paul does in most of his letters. As Moffatt commented, "Where the literary skill of the author comes out is in the deft adjustments of the argumentative to the hortatory sections" (*Intro.*, pp. 424f.). He has been classified with Luke as the most "cultured" of the early Christian writers.

B. Literary Category. Since the book opens without an introductory greeting or address but concludes normally with personal references and salutations, the problem of its literary character becomes difficult to answer and gives rise to a variety of hypotheses.

Does the book fulfil the conditions of a true letter? Certain features support the view that it does. The concluding chapter provides evidence that the writer has had personal contact with the readers, details of which will be given below when discussing the readership. A reference to Timothy (13:23) implies that he was well known to writer and readers alike. Moreover, the body of the letter contains other indications that the writer is addressing a particular community.

There are no parallels, however, for a letter without an address, and the absence of one in Hebrews demands an explanation. Two different lines of approach have been taken in attempting to solve the problem. Either it is assumed that an address originally stood at the head of the work, or it is assumed that it is not a letter at all, in which case the concluding chapter or parts of it are regarded as not original. A variation of the former alternative is to suppose that the writer designed his work as a real letter but for some reason suppressed the introduction.

The idea that the introduction was lost in the course of the transmission of the book raises considerable difficulties, although it is not altogether impossible. In the absence of the slightest textual indication of any variation in the opening portion, it is questionable to build upon such a supposition. It would be necessary to supply an adequate reason why the introduction dropped off. If by accident, it must have been from the original itself, and this would be highly unlikely. If by intention, there must have been a strong motive. Harnack's suggestions that the suppression may have been occasioned by prudence in a time of persecution, or by its being unnecessary because the bearer could communicate to the recipients details of the letter's origin are quite unconvincing. It is much better to proceed from the known data and to attempt to explain Hebrews as it stands, without an introduction. It may well be that the author never intended the book to fit into the Greek category of a letter, in which case the lack of an introduction would lose some of its significance (cf. Roller's discussion of ancient Greek literary practice, *Das Formular der Paulinischen Briefe* [1933], pp. 213ff.).

The remaining suggestion, that it was never originally intended to be a letter but was really a homily, deserves careful consideration. There are some features that strongly support this contention. It possesses the oratorical character of a sermon. It contains hortatory asides, which might well suggest a preacher pausing in the course of his argument to address direct appeals to his audience (cf. 2:1; 3:1-12; 4:1, 14; 5:11; 6:9; 10:9; 13:7). Moreover, the carefully thought-out argument would fit in well with the idea of a preacher who before he begins has his conclusion clearly in mind. The digressions are carefully controlled and the drift of the main theme is never lost. This latter consideration does not necessarily point to a sermon but would be well explained by such a hypothesis.

But if the subject matter originally constituted a sermon, other problems arise. Was it actually delivered to one community and sent to another? Did the hearers of the original sermon request that it be written down and preserved? Or did the preacher prepare his message for a particular community only to be prevented from visiting them, with the result that he forwarded his address for their edification? In the event of any of these, the concluding greetings must have been added by the writer as a kind of covering letter; but there is a good measure of conjecture in all of these suggestions. It is probably better to assume that the subject matter had previously formed part of an address given by the writer and that he himself incorporated the main features of it, which were still in his mind, when dealing with the general problems of a particular community with which he was in direct personal touch. A. B. Bruce raised the objection to the sermon theory that Hebrews is too long and abstruse (p. 10). But what seems abstruse to modern minds might not have been so to early Christians, and the length is often exceeded by modern preachers. The sermon idea did not appeal to A. Nairne (*CGT*, p. lxxiii) either, who was impressed by the fact that the letter appears to have been called forth by some very urgent occasion.

A variation of the sermon idea is that of Deissmann, who regarded Hebrews as an example of Christian literary art. According to him, Hebrews belongs to the category of a written treatise, a kind of literary exercise (G. A. Deissmann, *Bible Studies* [2nd ed., Eng. tr. 1909], pp. 49f.; *The NT in the Light of Modern Research* [Eng. tr. 1929], p. 51). But the writer's purpose is too serious to be regarded in this light (cf. W. Manson, p. 5). The historical allusions, however vague, demand a more adequate explanation.

C. Unity of the Letter. Because of the problems raised by the letter as it stands, some scholars have proposed that parts of the concluding chapter do not belong to the original. The idea that 13:22-25 was a later addition, appended to give the original letter a Pauline flavor in order to make it more canonically acceptable, was first advanced by F. Overbeck in *Zur Geschichte des Kanons* (1880). He incorporated with this the suggestion that at first another name was attached, but was later dropped. But if 13:22-25 was appended for canonization purposes, would it not have been more effectual to have incorporated an introductory formula? This would hold even under the theory that 13:22-25 was genuinely Pauline although the rest was not.

A variation of this hypothesis is that of W. Wrede (pp. 2ff.), who advanced the view that the writer twice changed his mind in the course of writing Hebrews. His

first intention was a homily, but after ch. 12 he decided on a letter and finally gave it a Pauline flavor in 13:22-25. A similar theory was suggested by C. C. Torrey (*JBL*, 30 [1911], 137-156), who extended the Pauline additions to include vv. 1-7, 16-19. But the evidence of change in style in ch. 13 is inadequate to warrant such a theory. C. Spicq (*ConNT*, 11 [1946], 226-236) argued that four of the main themes of chs. 1–12 are echoed in ch. 13; such thematic continuity strongly supports the unity of the whole book. There does not appear to be adequate evidence for suggesting that the whole or part of ch. 13 is not original, so this solution of the problem of the literary form must be excluded.

III. Author.–*A. External Evidence.* A survey of the early Christian approach to the book of Hebrews shows that no firm tradition existed regarding its authorship, at least in the earliest period. It is certain that Clement of Rome knew it, although he cites it without acknowledgment (cf. He. 11:7 and 1 Clem. 9:4; He. 1:3f. and 1 Clem. 36:1f.). In the passages cited from Hebrews in 1 Clement, the sequence of thought is so closely reproduced that there can be no doubt that Clement wrote with this work before him. This shows that Hebrews possessed authority in Rome at an early date. There are a few similarities of expression with the Shepherd of Hermas. The possible marks of its influence on the works of Polycarp and Justin Martyr are very uncertain, while Marcion did not include it in his canon — although this omission may have been for dogmatic reasons, since he would have found the theme of Hebrews unpalatable. Its omission from the Muratorian Canon is more significant, but this could possibly be accounted for by the fragmentary character of the canon. In any case, Paul's church Epistles are said to be seven in number, which would exclude Hebrews.

When the book emerges into the clear light of history toward the end of the 2nd cent., the tradition as to its authorship is divided into three different streams.

1. Pauline Tradition. The idea that Hebrews was the work of Paul first appeared in Alexandria. Clement tells how his teacher, apparently Pantaenus, explained why Paul did not in this letter, as in others, address his readers under his own name. He supposed that Paul refrained from putting his own name to a work addressed to Hebrew people out of reverence for the Lord, who Himself had been their Apostle. Clement accepted this explanation and in addition supposed that the original had been written in Hebrew and that Luke had translated it into Greek. This latter speculation was probably not based on any genuine tradition but was rather an inference drawn by Clement himself from the title, from the dissimilarity of the Greek from that of Paul's Epistles, and from the similarities observed between Hebrews and Acts.

Origen noted the differences in style between Hebrews and Paul's Epistles but was impressed by the Pauline character of the thoughts. His own suggestion was that some disciple had written down what he had heard from Paul. He knew of traditions that held Luke or Clement of Rome to be the author, but he himself was not prepared to venture upon any identification. He declared that "God alone knows." Origen's caution was not heeded by his successors in Alexandria, who assumed without question the Pauline authorship, an assumption which by the 4th cent. had spread throughout the Eastern churches.

2. Barnabas Tradition. The only other tradition that can claim ancient attestation is that of Barnabas, and even this seems to have been held in only a restricted area, for its sole authority is Tertullian, who, when introducing a quotation from He. 6:1, 4-6, writes: "There is also an Epistle to the Hebrews under the name of Barnabas . . . and the Epistle of Barnabas is more generally received among the churches than that apocryphal 'Shepherd' of adulterers" (*De pudicitia* 20). Tertullian is not expressing his mere personal opinion but quoting a tradition that had so far established itself as to appear in the MS title of the book; and he betrays no consciousness of the existence of any other tradition. Vernon Bartlet (*Expos.* 6th ser., 5 [1885], 423) considered that Tertullian was here magnifying Hebrews at Hermas's expense. In any case, he does not appear to regard it very highly, for the quotation referred to is the only one he makes from Hebrews, whereas he has copious citations from Paul's Epistles. Moffatt (*Intro.*, p. 437) thought that behind this view of authorship was some Roman tradition, but the evidence is too slight to be certain. Later, the African Church, whose opinion Tertullian appears to be representing, embraced the Alexandrian view, for at the councils of Hippo (393) and Carthage (419) Hebrews was included among the Epistles of Paul.

3. Tradition of Anonymity. No tradition of authorship appears elsewhere in the West until the 4th century. The earliest definite evidence in support of the Pauline authorship of this book is found in the works of Jerome and Augustine. Yet neither of these seems convinced of Pauline authorship, even though they cite it as Paul's. Since Hebrews was known as early as Clement in Rome, but without mention of author, it seems most probable that the book circulated in the West anonymously until through Jerome and Augustine the Eastern view was mediated to the West.

The theory of anonymity finds support in the fact that the earliest evidence for the Pauline tradition seems to have arisen in an attempt to explain the absence of Paul's name, i.e., the anonymity. But how did the strong Pauline tradition arise? It is highly probable that the superficial similarities of doctrinal presentation struck the early Alexandrians. To Origen the Pauline flavor of the thoughts was apparent. Since the work so clearly possessed apostolic authority, it is not difficult to see why the assumption arose that Paul was the author. There is no certain evidence that the Pauline ascription was added to make Hebrews acceptable from a canonical point of view. It is more probable that its canonicity was accepted before its apostolic authorship and not vice versa. In other words, its own spiritual authority and value made it impossible to exclude it from the canon, and the same cause led it to be classed with that other body of theological writings, the Pauline Epistles.

Until the time of the Reformers the Pauline tradition remained unchallenged. But Erasmus, Luther, and Calvin all questioned it. Luther suggested Apollos as author, but he seems to have been the first to do so. Later, Grotius returned to the theory of Lukan authorship, which had been current in Origen's time. Since Grotius many different views have been held and these will be considered next.

B. Internal Evidence. The failure of the external tradition to solve the problem of authorship throws the onus on the internal evidence, which is so sparse that the solution remains a matter of conjecture. The absence of the author's name is further complicated by the paucity of hints about his personality. But a few details may be inferred. He was probably a Hellenist, a Greek-speaking Jew. He was familiar with the OT Scriptures and with the religious ideas of the Jews. He claims the inheritance of their sacred history, traditions, and institutions (1:1) and dwells on these with an intimate knowledge and enthusiasm that would have been improbable, though not impossible, in a proselyte, and even more so in a Christian convert from heathenism. But he apparently knew the OT only in the

LXX, which he follows even where it deviates from the Hebrew. He writes Greek with a purity of style and vocabulary to which the writings of Luke alone in the NT can be compared. Like Philo, his mind is imbued with a combination of Hebrew and Greek thought. His general typological mode of thinking, his use of the allegorical method, as well as his use of many terms that are most familiar in Alexandrian thought, all reveal the Hellenistic mind. Yet his fundamental conceptions are in full accord with the teaching of Paul and of the Johannine writings.

The central position assigned to Christ, the high estimate of His person, the saving significance of His death, the general trend of the ethical teaching, the writer's opposition to asceticism, and his esteem for the rulers and teachers of the Church all bear out the inference that he belonged to a Christian circle dominated by Pauline ideas. Neither the author nor the readers appear to have been personal disciples of Jesus; rather, they had received the gospel from those who had heard the Lord (2:3). By the time of writing some of these may have been dead (13:7). The writer had probably lived among those whom he addressed and had probably been their teacher. He is anticipating visiting them again soon (13:18). Although the foregoing data are not inconsiderable, they are hardly conclusive enough to be attached to any specific person. Yet many attempts have been made.

C. Various Suggestions. Since much tradition points to Paul, he must be considered first. There are a number of reasons why scholars are almost unanimous in rejecting Pauline authorship. (1) Paul makes no claim to be the author. This contrasts strikingly with his practice as we know it from his acknowledged Epistles. If he had been the author, it is difficult, if not impossible, to suggest a reason why he would have omitted his name. Pantaenus's view that it was from reverence for the Lord, the true Apostle to the Hebrews, is quite unconvincing. Moreover, the author nowhere shows any consciousness of apostolic authority, which was of concern to Paul. (2) The style of Hebrews differs in many respects from that of Paul. As mentioned above, it is nearer to the classical Greek style, and it lacks digressions so frequent in Paul. Its theme is also more carefully worked out according to a definite pattern. All this does not automatically exclude Pauline authorship, since the different occasion and subject matter may have had some bearing on these matters. (3) The author does not show evidence of the same spiritual experience so characteristic of Paul. There is no allusion to the great crisis on the Damascus road. (4) The writer quotes the OT in a different way from Paul. Instead of "It is written" or "The scripture says," he has "God says," or "The Holy Spirit says," or "One somewhere says." The writer also keeps closer to the LXX. (5) The doctrinal emphases are also somewhat different, although not in conflict, with those of Paul. The dominant theme of Hebrews, the high-priesthood of Christ, finds no direct allusion in Paul's Epistles (although O. Moe, *TLZ*, 72 [1947], 335-38, finds a few hints of it). The author's view of the work of Christ also differs in emphasis, being less concerned with the redemptive aspect and more with the cleansing and purifying work. Unlike Paul, there is no reference to the tension between flesh and spirit. It must not, of course, be supposed that any author is obliged to reproduce all his doctrinal positions in every letter he writes, and to this extent care must be taken not to overstress the differences. (6) The historical situation seems much more conclusive in excluding Paul, for that apostle could hardly have written He. 2:3, where the author states that he had received instruction from those who had heard the Lord. Paul was constantly stressing that he was taught through supernatural revelation (cf. Gal. 1:12). The writer of Hebrews quite definitely seems to class himself with his readers among those who had received the tradition secondhand. In view of these considerations and the uncertainty of the external tradition, it is reasonable to conclude that Paul is not likely to have been the author.

Is there any more to be said for Barnabas? The African tradition that Tertullian mentions was probably a conjecture, but there are a few considerations that might support it. As a Levite, Barnabas would certainly have been acquainted with the temple ritual, but this consideration carries little weight, inasmuch as the author of Hebrews is more interested in the biblical cultus than in the current ritual. At the same time, a converted Levite would certainly have been deeply concerned about the issues raised in this book. It has been maintained that the author's knowledge of Jewish ritual is derived from Jewish tradition rather than from his acquaintance with the temple worship (cf. Moffatt, *Intro.*, p. 438). Whatever the source of his knowledge, there is nothing in the author's arguments that would make it impossible for Barnabas to have written it. The Hellenistic background might have made its mark upon him in Cyprus. On the other hand, it is difficult to suppose that Barnabas would have written He. 2:3, although the absence of any data regarding the way in which he became a Christian makes it impossible to be certain. The impression given by Acts is that Barnabas was closely linked with the Jerusalem church, although no indication is given of the length of his residence there.

Luke has found various supporters, who have mainly based their contentions on certain verbal similarities between Hebrews and Acts, particularly some affinities with Stephen's speech (cf. F. D. V. Narborough, p. 11; Manson, comm., p. 36, for details of the latter). The argument rests on the assumption that the speech of Stephen is Luke's own composition, but if Luke is reproducing the genuine ideas of Stephen himself the evidence would not necessarily point in the direction of the Lukan authorship of Hebrews. Moreover, it is evident that the predominantly Jewish background of Hebrews is not shared by the Lukan writings.

There is some slight tradition favoring Clement as author, but a careful comparison of 1 Clement with Hebrews does not lead to the conviction that they were both written by the same author. The parallels are well accounted for on the supposition that Clement was acquainted with Hebrews.

Silvanus (or Silas) has been proposed as author, and there are things to be said in his favor. He was known at Rome and at Jerusalem. He knew Timothy and had worked with him. He may have become acquainted with the temple cultus during his stay in Jerusalem. And if he were the virtual writer of 1 Peter as some scholars believe, it is clear that he was versed in the LXX (cf. G. Wohlenberg, *Neue Kirchliche Zeitschrift*, 24 [1913], 742-762; and Hewitt, pp. 26-32). This is a conjecture that can neither be confirmed nor rejected. There are inadequate data for determining whether Silvanus possessed the necessary background to write Hebrews.

There would seem to be more to be said for Apollos, for according to Acts 18 he was an Alexandrian and therefore could have been well versed in the type of thought current there. Acts mentions his great biblical knowledge and his oratorical gifts, both of which would support the claim of his authorship of Hebrews. Moreover, he also knew Timothy and had had close association with Paul. This theory, first suggested by Luther, is a plausible conjecture, although it is no more than a conjecture. If a name must be attached, that of Apollos would be as good as any.

The suggestion of Harnack that the author was Priscilla, aided by her husband, is based on a number of question-

able suppositions. It was argued that Priscilla was the more important of the two because she is so often mentioned first in the NT, that she must have possessed high intelligence to instruct Apollos, that she uses the plural in 13:18 to include her husband, and that her name was omitted owing to prejudice against women teachers. But while these suppositions may be true, the evidence does not in fact require them. Apollos was in need more of spiritual than intellectual instruction; and there is nothing in Acts to show that Priscilla was equipped for the task of writing Hebrews.

This list has not exhausted all the proposals that have been made, but enough has been said to show that the only reasonable course is to maintain an open verdict. If we reject Pauline authorship, attaching the letter to any other person will not materially affect our understanding of the background.

IV. Destination.–Just as there is no certain knowledge of the author, so there are no certain indications of the destination. The three main suggestions are Jerusalem, Alexandria, and Rome. The first of these should probably be excluded in view of He. 2:3, the Hellenistic background of the book, the known poverty of the Jerusalem church (contrast 6:10; 10:34; 13:16), the use of the LXX, and 12:4, which suggests that no one in the church had as yet suffered martyrdom. These objections would not be so strong for Palestine generally, but a more predominantly Hellenistic area would better suit the background of Hebrews.

Concepts identified as "Alexandrian" do not support an origin in Alexandria itself, since Alexandrian thought was widely distributed throughout the Greek-speaking areas. Moreover, the Alexandrian church did not lay claim to it. On the contrary, we have seen that this church was the first to maintain Pauline authorship.

The arguments in favor of Rome are much more impressive. Hebrews was known there at an early date and was cited authoritatively by Clement. The reference in 13:24 to "those from Italy," whether it means Italians in Italy or away from home, points to some connection with Rome. If it indicates a greeting from Italians away from home, it would be most intelligible if these people were saluting those at home, i.e., at Rome. The words might also mean the alternative, but in that case they would indicate the location of the writer rather than the readers. On the whole, it seems easier to interpret the phrase as referring to a small group of Italians away from home rather than to Italian Christians generally. Timothy was known at Rome, while the allusions to the readers' generosity would agree with what is known of the Roman church. Furthermore, the Roman Christians had suffered spoliation of goods as had the recipients of Hebrews (He. 10:32).

Yet none of the above factors is conclusive; they can all be explained on the basis of many other destinations. Moreover, He. 2:3 is a problem if the destination were Rome, for the readers appear to have been taught by eyewitnesses; this could hardly have been the experience of the whole Roman church. There is much to be said for the view that the readers formed only a small group within a larger church, which could easily have happened at Rome.

Among other suggestions that have been made are Colossae, Ephesus, Galatia, Syria (Antioch), Corinth, Cyprus, and Berea (for details see Guthrie, p. 41). Since most of these are pure conjecture there is little point in discussing them, but the variety of hypotheses is evidence enough that no view can be anything more than tentative. Of more importance is the character of the readers.

V. Readers.–(1) They were a particular community. These Christians had received the word from eyewitnesses (2:3), had seen signs and wonders (2:4), knew the principles of Christian teaching (6:1), were fruitful in good works (6:10), and had ministered to those who had been ill-treated (10:32-34). All of these details are known to the writer. He speaks of "former days" (10:32) and of earlier persecutions (10:32; 12:4). He is aware of their present state of mind (5:1ff.; 6:9f.), which indicates that a specific community was in view.

(2) They were a community known to the writer. The preceding details might have been received from an informant, but it is clear from 13:19, 23 that the writer has himself visited them and hopes to return soon. He urges them to pray for him (13:18) and mentions Timothy's release as if it were a matter of mutual interest.

(3) They were a community that formed part of a larger community. When the writer tells them (5:12) that they ought by now to be teachers, it seems clear that he could hardly have had in mind the rank-and-file members of a church. He must have been thinking of a group of those who were capable of a teaching ministry, perhaps a small group of more intellectually inclined people. This must not be overstressed, however, since the most effective teachers in the Church have not always been the most intellectual. They were not in any case the leaders, for they are exhorted to remember these. The injunction not to forsake the assemblies (10:25) may well point to a small group of Christians who had segregated themselves from the main body of the church, as many another small group has subsequently done. It is possible that the recipients were a house community in Rome (or in some other city). But the next question that arises is whether they were Jews or Gentiles.

(4) Were they a community of Jewish Christians? Whatever value is attached to the title, the description "To the Hebrews" bears testimony to a strong belief that the readers were Hebrew Christians. The internal evidence would seem to support this belief. The dominance of the OT in the argument, the detailed interest in the Levitical cultus, the significant place given to the high-priesthood of Christ and to the New Covenant, the reference in 2:16 to Abraham's descendants, and the whole trend of the argument itself would be more relevant to Jewish Christians than to Gentiles. But if this is so, the community must have been made up of Jews of the Dispersion, since the original language was Greek and the LXX was used throughout.

(5) Were they a community of gentile Christians? The preceding arguments have not satisfied all scholars that the readers were Jewish. It has been maintained that Gentiles as well as Jews would be acquainted with the OT, since this was the Scripture of the early Church. Admittedly, the development of the argument in Hebrews would not be easy for Gentiles, but the same might be said for parts of the Epistle to the Romans, and Rome is generally assumed to have been a predominantly gentile church. The absence of reference to the temple is also brought forward as evidence of gentile rather than Jewish readers, but this is inconclusive, since the argument deals rather with biblical principles than the ritual procedure. According to E. F. Scott, the writer did not understand Judaism (*The Literature of the NT* [1932], p. 200), but even if this were true it would not necessarily indicate gentile readers. It has further been pointed out that the list of first principles in 6:1 would be inapplicable to Jews (cf. Vos, pp. 14-18). The apostasy mentioned in Hebrews could, according to von Soden (*Hand-Kommentar zum NT* [1899], pp. 12-16), mean apostasy to heathenism rather than to Judaism. But the argument of Hebrews would hardly answer such a threat.

(6) Or were they a mixed community? Since neither the evidence for Jewish nor for gentile readers is conclusive,

it might be better to assume that the writer had in mind neither group, but rather, Christians generally who needed encouragement (cf. Scott, *op. cit.*). But the peculiar nature of the theme would certainly seem to be more biased toward Jewish Christians. Further light may, however, be thrown on the problem by a consideration of the author's purpose.

VI. Purpose.–A discussion of the writer's aim is important for a correct interpretation of Hebrews. But again, many different opinions have been expressed. It is possible here to do no more than summarize them. Before doing so, we should note that the author has described his own work as "my word of exhortation" (Gk. *paráklēsis*, 13:22). If by this description he intended to refer to the whole preceding work, it is clear that Hebrews was designed not primarily as a theological treatise, but as a practical exhortation. When this is kept in mind, it will be seen that the hortatory passages are not interludes but are essential to the purpose.

Theories regarding the author's purpose will clearly be influenced by the decision about the nationality of the readers. Those assuming a Jewish Christian destination will be enumerated first.

(1) To warn against apostasy. The strong language of chs. 6 and 10 is obviously intended to warn against a serious situation, and the most generally accepted interpretation is that the readers were on the point of returning to Judaism. The glories of the cultus they had left might have appeared in striking contrast to the absence of such external glories in Christianity. The whole theme of Hebrews sets forth the superiority of Christianity over the old order and thus would be well designed to offset any temptation to return to Judaism. Although chs. 6 and 10 could be otherwise interpreted, it is reasonable to interpret them in the light of the argument as a whole, and this view of the threat of apostasy has much to recommend it in this respect.

Some have attempted to define this purpose more specifically. Nairne envisaged the author addressing a group of his intellectual friends who were finding it difficult to give up Judaism (*CGT*, p. lxxii). Bornhäuser, and more recently Spicq (pp. 226-231), favor the view that a group of converted priests was being addressed, and the argument of Hebrews would have strongly appealed to them. Such men might well have been exhorted to be teachers (5:12), but the difficulty is that no supporting evidence exists of a community composed exclusively of converted priests. Yet another possibility is that the readers were converts from Qumrân who had not been fully emancipated from the attractions of the sect. The priestly emphasis would thus be explained as would the interest in OT exegesis; but the absence of emphasis upon the ancient law in Hebrews would be a problem. Nevertheless, the conjecture is not impossible and should be kept in mind.

(2) To encourage the world mission. W. Manson agreed that the readers were Jewish Christians, but disputed that the danger was apostasy to Judaism. He maintained that the threat to these Christians was a failure to recognize that Christianity was universalistic in its appeal. The writer's aim was therefore to show that the universal truths of Christianity were far more important than the restricted Jewish cultus. In comparing Hebrews with Stephen's speech, Manson detected a similar approach to that cultus. The suggestion is a fascinating one, but the strong terms of warning in chs. 6 and 10 seem out of place in such a cause.

(3) To set out the absolute character of Christianity. If the readers were mainly Gentiles, it might be argued that the purpose of Hebrews was to show that Christianity is superior to all other religions. But the author's method of demonstrating this would then be somewhat baffling. Why in that case is there so much emphasis upon the cultus, unless, as Moffatt maintained (*Intro.* p. 445), the readers were affected by speculative Judaism? In any case, there is no reference to pagan rites or ablutions. Moreover, the elaborateness of the argument from biblical material could hardly have convinced a gentile Christian who was not already convinced of the absolute character of his new faith.

(4) To counteract a heresy. Some scholars have supposed that a form of Gnosticism of a Jewish type is being combated. Narborough (pp. 20-27) has suggested a general sect of Jewish Gnostics who were attempting to influence some of the Christians to apostatize to their views; T. W. Manson was more specific in supposing the author to have had the Colossian heresy in mind (*BJRL*, 32 [1949-50], 1-17). In the latter case, He. 1–4 would answer the idea of intermediaries (cf. Col. 2:18) and chs. 5–10 the ritual tendencies (cf. 2:14ff.). Manson's theory is tied to his acceptance of Apollos as author, and if this is granted it is not altogether impossible. The type of heresy at Colossae, however, may well have been widespread.

VII. Date.–Although it is difficult to fix any precise date, the general period may be deduced from certain data in Hebrews itself, even though these data are differently interpreted by different scholars. One point of disagreement concerns the fall of Jerusalem: did Hebrews appear before or after that event? It may be argued that if it appeared afterward the author would surely have quoted it as a significant historical indication that the old order was finished. On the other hand, if the author is not concerned with the Jerusalem temple ritual he may not have been so deeply impressed with the theological significance of its fall. Nevertheless, the reference to Timothy, the primitive ecclesiastical situation, and the fact that many of the readers appear to be first converts in the community would support an early dating. The passing reference to "former days" requires some interval of time to allow for the community to possess a history, but all these conditions would be satisfied by a date in the early 60's.

Many scholars, however, prefer a much later date, i.e., *ca.* A.D. 80 or soon after. Evidence for this view is the reference to an earlier persecution (He. 10:32f.), which is thought to be identical with Nero's outburst against the Church. The text suggests that this happened soon after their conversion, in which case the letter could not have been issued until some time after A.D. 64. Yet the major difficulty in this view is the statement that they had not yet resisted to the point of shedding their blood (12:4), which is difficult to imagine in view of the intensity of the Neronian persecutions.

Some have argued from the writer's supposed use of the Pauline Epistles, which would require a sufficient interval for these to have circulated and would push the date of Hebrews considerably later than the death of Paul. But literary affinities are uncertain supports on which to base calculations of date. Few scholars would date Hebrews after Clement's letter, even if they are impressed by this latter argument. Some suggest it was received only just before Clement wrote his; indeed, Goodspeed (*Intro. to the NT* [1937], pp. 258f.) suggested that Clement's letter was written in response to He. 5:12. But even if Goodspeed's theory is correct, this would tell us nothing about the date of Hebrews. The evidence as a whole seems to make the earlier date preferable.

VIII. Background.–It is important to analyze the constituent parts of an author's background, if possible, in order to be able to place his work correctly in the development of Christianity. In the case of Hebrews there were several influences at work. The author's acquaintance

with the writings of Philo of Alexandria has been much emphasized. Indeed, at one time it was assumed that Hebrews could not be properly interpreted without reference to Philo. This movement was at its zenith at the turn of the century. The most important features in which Hebrews shows parallels with Philo are the tendency to allegory and especially the use of Melchizedek as a type, the widespread use of the LXX as authoritative, the similar method of quoting Scripture, and the assumption that the present order is but a copy of the real. It is this last consideration that has caused some to assume that the writer is interpreting Christianity in the light of current Hellenistic philosophical ideas. Hebrews contrasts the new and the old in a series of antitheses very similar to Philo's theory of ideas. Philo's fundamental approach to the OT is to treat it as allegory, which leaves him free to superimpose his own philosophical system upon it.

Hebrews, however, treats the OT essentially as history rather than allegory, although there may be a trace of allegorization in the Melchizedek story. The approach is in short more biblical. What similarities exist are on the surface, and it cannot be assumed that Philo's influence upon Hebrews is great. The author may have been, as Spicq claims (p. 198), a converted Philonist; but the evidence is not conclusive.

Another problem of continuing interest is the extent of the influence of Paul's thought on the author of Hebrews. As noted above, the similarities impressed the early Christians to such an extent that the assumption of common authorship remained unchallenged for centuries. There are certainly some strong grounds for maintaining that the writer was in close touch with Paul's teaching, whether from personal acquaintance or from knowledge of his letters. There is a similar doctrine of Christ, His part in creation, His humiliation, obedience, and self-offering. There are also similar conceptions of the new covenant and of Abraham as an example and a similar use of OT passages (both appeal to Ps. 8; Dt. 32:35; Hab. 2:4). Differences from Paul's approach have already been pointed out, but the evidence seems to show that the author had inherited much from Paul. Indeed, it seems safe to assume that he was a member of the Pauline circle.

An influence that earlier scholars tended to overlook, but which now has been brought to the fore, is that of the primitive tradition. No longer can it be maintained that Hebrews stands midway between Paul and John with no contacts with the primitive period. Such a view is the product of a unilateral conception of Christian development. It is nearer the truth to maintain that Paul, John, and Hebrews all represent parallel and complementary developments from the earliest period. The similarities with Stephen's speech noted above are evidence of the close affinities between Hebrews and the primitive period. Moreover, the writer appears to have had close acquaintance with early Jewish Christianity.

It is hardly necessary to emphasize the powerful influence of OT thought upon the author. Indeed, it may be said that Hebrews is a Christian assessment of the OT cultus. It is as if the author is attempting to answer the problem of the place of OT cultic thought in Christian theology. He finds that a good deal of the imagery points to Christ as its perfect fulfillment. Christianity is a "better way" than the old.

IX. Leading Themes.–A large portion of Hebrews is taken up with the theme of Christ's high-priesthood (4:14–10:18), and this may at once be said to be the dominating thought. Not only is it made clear that Christ has the necessary qualifications to be the perfect high priest, but His order of priesthood is contrasted with that of Aaron. Furthermore, the priesthood of Christ is shown to operate within a more perfect sanctuary than that of Aaron or his successors. The greatest feature of all in Christ's superiority was that as priest He offered Himself. This is the only perfect offering that has ever been made, and because of its perfection it requires no repetition. Within this main section there are various digressions such as strong exhortations to the readers (5:11–6:12).

The problem arises over the remaining portions. In 1:1–4:13 the writer deals with the superiority of Christ's person, and he does so against the background of the history of Israel at the time of the Exodus. The events of this period clearly exercised a molding influence upon his thought. Christ's superiority to angels was to offset the angelic agencies that had a part in establishing the Israelite nation. The loss of inheritance by the generation of wilderness wanderers is contrasted with the Christian's inheritance in the present day of grace (ch. 3). Great as Moses was in Jewish eyes, Christ is as much greater as a son is compared with a servant. Even the inheritance ultimately secured by Joshua was but a pale pattern of that secured in Christ (4:1-13). The whole of the first part of Hebrews is therefore designed to show that Christianity is a kind of spiritual reenactment of the most critical events in the development of Israel as a nation. In the emergence of a spiritual Israel, One greater than either Moses or Joshua took up the leadership and led His people into a more perfect "rest."

If the idea that Christians are on a spiritual pilgrimage toward a perfect inheritance is borne in mind, the relevance of the high-priest theme will become clearer. The Israelite wanderers needed an established order of worship with its official priestly representative and its sacrificial system. But the new Christian order, called by the writer the order of Melchizedek, is superior to this and substitutes spiritual for cultic worship on the basis of Christ's sacrifice.

The practical portion of Hebrews continues the same strain. The heroes of faith in ch. 11, apart from the brief concluding summary in vv. 32-38, are wholly from the period up to the wilderness wanderings. The great attention paid to Abraham reaches its climax in the statement that he never possessed his own inheritance, but pressed on toward a more enduring city prepared by God. Even when dealing with the theme of chastening, the writer comes back to the theme of the wilderness wanderings and, recalling the terrifying fire of Mt. Sinai, draws a contrast between this and the blessedness of Mt. Zion. In the concluding exhortations he remembers the imagery of the tabernacle and calls attention to the need to go forth outside the camp (13:13), while the magnificent concluding prayer appeals to the efficacy of the blood of the eternal covenant (13:20). There can be no doubt that the theme that holds the whole book together is that of the Christian Church as a new and better Israel, with Christ Himself fulfilling all the offices imperfectly performed by the great heroes of the past.

X. Analytical Outline

I. The Superiority of Christ and Christianity (1:1-10:18)
  A. To Old Revelation (1:1-3)
  B. To Angels (1:4–2:18)
  C. To Moses (3:1-19)
  D. To Joshua (4:1-13)
  E. The Priesthood of Christ (4:14–7:28)
  F. The Priestly Work of Christ (8:1–10:18)

II. Exhortations Based on Preceding Arguments (10:19–13:17)
  A. Use of the Superior Method (10:19-25)
  B. Danger of Apostasy (10:26-31)
  C. Memory of Past Days (10:32-39)

D. Examples of Historic Endurance (11:1-40)
E. The Example of Christ (12:1-11)
F. Avoidance of Moral Inconsistency (12:12-17)
G. Reminder of the Superiority of the New Covenant (12:18-29)
H. Practical Results (13:1-17)

III. Conclusion (13:18-25)

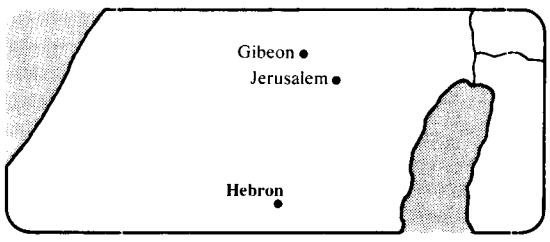
HEBRON hē'brən [Heb. *ḥeḇrôn*–'league, association'].

1. The third son of Kohath, son of Levi (Ex. 6:18; Nu. 3:19, 27; 1 Ch. 6:2, 18; 23:12, 19).

2. A son of Mareshah and descendant of Caleb (1 Ch. 2:42f.). *See also* KORAH.

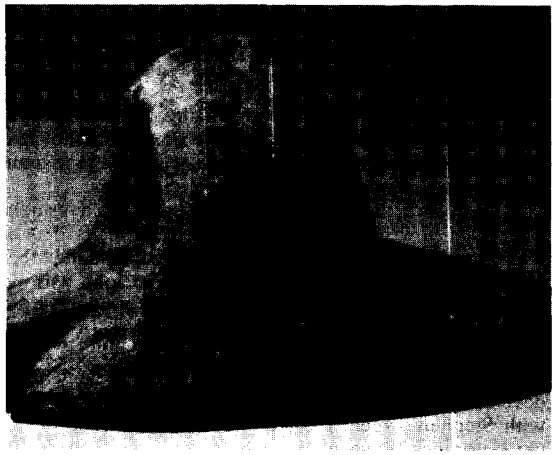
HEBRON hē'brən [Heb. *ḥeḇrôn*–'league' or 'confederacy'; Gk. *Chebrōn*]. A city known in ancient times as Kiriath-arba, located about 30 km. (19 mi.) SSW of Jerusalem on a sloping hill, er-Rumeideh. The hill is 927 m. (3040 ft.) above sea level and overlooks a fertile valley to the west with an unusual supply of wells and springs. About 3 km. (2 mi.) to the north is Mamre, modern Râmet el-Khalîl. Modern Hebron since the time of the Crusades was rebuilt just E of this ancient site.

The Hebron district, especially the terebinth of Mamre, marks the residence of Abraham for numerous events recorded in Gen. 12–25. Here he purchased from the Hittites the cave of Machpelah, which became the burial place for the patriarchs Abraham, Isaac, and Jacob and the matriarchs Sarah, Rebekah, and Leah (Gen. 23:1-20; 49:31; 50:13).



The ancient city of Hebron was built seven years before the Egyptian city of Tanis (Nu. 13:22 [MT 23]). If the building of Tanis (also called ZOAN) is correctly identified with the Hyksos rebuilding project, then the date for the beginning of Hebron is *ca.* 1700 B.C. This would account for the apparent explanatory references on the temple of Karnak in Upper Egypt to the "Field of Abram," perhaps the first outside source reference to Abraham's connection with Hebron (cf. *WBA*, p. 149).

When the Israelite spies explored the region of Hebron the Anakim occupied this area (Nu. 13:22, 28, 33). In the conquest of Canaan, Joshua killed Hoham the king of Hebron, who had joined the anti-Gibeonite coalition (Josh. 10:1-27). Caleb received Hebron and the surrounding territory for his family possession after defeating the Anakim (Josh. 14:12f.; 15:13f.; Jgs. 1:10, 20). Later it served as a Levitical city and a city of refuge (Josh. 20:7; 21:11). David was anointed king of Judah in Hebron (2 S. 2:4) and continued to use Hebron as his capital for seven and a half years. Absalom launched his unsuccessful rebellion at Hebron (2 S. 15:7ff.). Rehoboam fortified Hebron during his reign (2 Ch. 11:10). Many large storage jars from the 8th cent. onward stamped with the royal seal bear the name of Hebron, indicating that Hebron was a place where jars were produced in this era of the monarchy of Judah. These jars, with a capacity of 2 baths or 38 liters (10 gallons), were used for commerce and payment of taxes (cf. *WBA*, pp. 193f.).



Jar handle (8th cent. B.C.) with royal seal and "Hebron" (*ḥbrn*) inscribed in old Hebrew (Trustees of the British Museum)

Modern Hebron is a town that was within the boundaries of the Hashemite kingdom of Jordan (1949-1967; occupied by Israel in 1967). In A.D. 1167 it was the see of a Latin bishop but was captured by Saladin's forces in 1187. The traditional site of the cave of Machpelah is marked by a mosque in an enclosure measuring 60 by 34 m. (198 by 111 ft.), around which the modern city has been built. The mosque formerly was a Crusader church and stands on the site of the Justinian basilica of the 6th century. In the mosque, the cenotaphs, presumably over the site of the patriarchal and matriarchal tombs, are covered with elaborate gold and embroidered textiles in green and

crimson. Regarded as a sacred spot by the Islamic world, the cave apparently has not been accessible since the time of the Crusades.

Crusaders regarded Hebron as the castle of Abraham. The Arabs designate Hebron or the oaks of Mamre as el-Khalîl, "the friend" (cf. Isa. 41:8; Jas. 2:23); in the LXX the words "my friend" are inserted after the word "Abraham" in Gen. 18:17. S. J. SCHULTZ

HEBRONITES hē'brən-īts [Heb. *ḥeḇrônî*]. A family of Levites, descendants of Hebron, third son of Kohath (Nu. 3:27; 26:58; etc.).

HEDGE [Heb. *meśûḵâ* (Isa. 5:5; Mic. 7:4, "thorn hedge"; cf. Prov. 15:19), *gᵉḏērâ* (Jer. 49:3), vbs. *sāḵaḵ* (Job 3:23), *śûḵ* (Job 1:10; Hos. 2:6); Gk. *phragmós* (Mt. 21:33; Mk. 12:1; Lk. 14:23)]; NEB also FENCE (Isa. 5:5), BRIARS (Mic. 7:4), GASHES (Jer. 49:3), BLOCK (vb.) (Hos. 2:6), WALL (Mt. 21:33; Mk. 12:1), HEDGEROW (Lk. 14:23). Hedges were generally made of cut thorn branches or formed from thorny plants. A "fence" normally comprised a loose stone wall, such as surrounded fields and vineyards.

See also FENCE (Nah. 3:17); WALL; GEDERAH (1 Ch. 4:23).
R. K. H.

HEDGEHOG [Heb. *qippōḏ*; Gk. *echínos*; cf. Arab. *qunfuḏ* (Isa. 14:23; Zeph. 2:14)]; AV BITTERN; NEB (RUFFED) BUSTARD. The RSV translates *qippōḏ* as "porcupine" in Isa. 34:11; here the animal is a member of the family *Hystricidae*, perhaps the European porcupine, *Hystrix cristata*. That *qippōḏ* is probably derived from a word meaning "roll up" has led to the traditional identification with the porcupine, of which three species have been reported in Palestine. Zephaniah obviously saw a ruined Nineveh as the home of hedgehogs or porcupines, and if a destroyed city was in fact being contemplated, it would be unnecessary to try to find some bird species to fit the idea of *qippōḏ*, as in the NEB.

See also PORCUPINE. R. K. H.

HEED [Heb. *šāmaʿ*]; AV also HEAR, HEARKEN, OBEY; NEB also HEAR, LISTEN, ACCEPT, PAY ATTENTION, OBSERVE; [qal and niphal of *šāmar*]; AV also HEARKEN, GIVE EAR, BEWARE, "be circumspect," OBSERVE, etc.; NEB also BE CAREFUL, ACCEPT, TAKE (GOOD) CARE, LISTEN, etc.; [hiphil of *qāšaḇ*]; AV also HEARKEN, REGARD, HEARD, ATTENDED; NEB also LISTEN, ATTEND, GIVE A READY EAR, etc.; [Gk. *blépō*]; NEB TAKE CARE, BEWARE, TAKE NOTE, "all you can expect" (Gal. 5:15), etc.; [*proséchō*]; AV also HAD REGARD, ATTENDED TO; NEB KEEP (A) WATCH, RESPONDED, GIVE THEIR MINDS TO, etc.; [*horáō*]; NEB BEWARE; [*akoúō*]; AV HEAR; NEB PAID NO HEED, LISTEN; [*parakaléō*] (2 Cor. 13:11); AV "be of good comfort"; NEB TAKE OUR APPEAL TO HEART; [*epéchō*] (1 Tim. 4:16); NEB MAKE THESE MATTERS YOUR BUSINESS; [*ameléō*] (He. 8:9); AV REGARDED (NOT); NEB ABANDONED; [*eulabéomai*] (He. 11:7); AV "moved with fear"; NEB TOOK GOOD HEED; [*hypakoúō*] (Rom. 10:16); AV OBEYED; NEB RESPONDED; **HEEDLESS** [Heb. *rēq*] (Prov. 13:10).

In the OT the RSV translates many Hebrew words as "(give) heed": *šāmaʿ*, "hear" (Dt. 21:18), qal and more frequently niphal of *šāmar*, "keep," "watch," "preserve" (Dt. 6:12; NEB "be careful," "take care" [8:11]), hiphil of *qāšaḇ*, "give attention to" (Ps. 66:19); occasionally *bîn*, "discern" (Dnl. 10:11), *ʿāṯar*, "pray," "supplicate" (2 S. 24:25), hiphil of *śāḵal* (Dnl. 9:13), hiphil of *ʾāzan* (Ps. 5:1 [MT 2]); only once *lāqaḥ*, "take" (Prov. 10:8), *nāṯan lēḇ*, "give heart" (Eccl. 7:21); *śîṯ lēḇ*, "set heart" (1 S. 4:20), *yāḏaʿ*, "know" (Job 35:15), *ʿānâ*, "answer" (Prov. 29:19), *zāʿaq*, "cry" (Ps. 142:6), *šûḇ*, "turn" (Prov. 1:23; NEB "respond").

In Dnl. 3:12; 6:13 the Jews do not pay heed to the Babylonian king. Here the verb is Aram. *śîm* with a basic meaning of "set, make," plus *ṭᵉʿēm*, "judgment." So the best translation would be "show proper respect to" (the king).

A few problem passages deserve special attention. "Take heed" is the RSV translation of Heb. *pillēś*, "weigh," "make level" (Prov. 4:26; 5:6; AV "ponder"; NEB "look out" [4:26], "watch" [5:6]). Though there can be no certainty, the context would lend support to the NEB and RSV translations. On three occasions the RSV takes the common word for "see" (Heb. *rāʾâ*) as "heed." In Jer. 2:31 the NEB confines to a footnote the whole sentence "You, O generation, see the word of the Lord." This is an unsound approach, even if it is a later marginal comment as some commentators have argued. In Prov. 13:10 the RSV "heedless" and the NEB "brainless fool" are based on reading Heb. *rēq* instead of *raq*. This change of vowels is probably correct. (Vowels were not originally written in Hebrew.)

In the NT nine different Greek words are translated "(give or take) heed." Of these *blépō*, "see" (cf. Gal. 5:15) and *proséchō*, "turn one's mind to" (e.g., Acts 8:10) occur frequently, *horáō*, "see," three times (Mt. 16:6 par. Mk. 8:15; Lk. 12:15), *akoúō*, "hear," twice (Jn. 10:8, 16), and the remaining five once. *Horáō* and *proséchō* occur together in Mt. 16:6 "take heed and beware" (NEB "beware . . . be on your guard"), and *horáō* and *blépō* in Mk. 8:15.

There are at least four uses of "heed": (1) things are to be "heeded," i.e., to be listened to and acted upon (the sound of the trumpet [Jer. 6:17], or wisdom [Prov. 1:23]), to be used (one's talents [Lk. 8:18]), to be aware of (pride [1 Cor. 10:12]), to be properly prepared for (leprosy [Dt. 24:8]), not to be touched (the mountain of the Lord [Ex. 19:12]), not to be taken (the land of Edom [Dt. 2:4]), not to be listened to (the curses of others against oneself [Ecc. 7:21]).

(2) People are "heeded," i.e., listened to (Ex. 18:24), obeyed (Dt. 21:18), responded to (1 S. 4:20), recognized in terms of their rights (Dt. 15:9).

(3) Man is to "heed" God's commandment (Ex. 15:26), His statutes (Dt. 4:1), His covenant (Jer. 11:3), His offerings (Nu. 28:2), and His prophets (Dt. 18:15) (which few do [Jer. 23:18]). Finally, we are to await the return of Christ (Mk. 13:33).

(4) God "heeds" the affliction of Hagar (Gen. 16:11), of Jacob (31:24), of Joseph in prison (39:23), of Job (Job 23:6), and countless others.

HEEL [Heb. *ʿāqēḇ*] (Gen. 3:15; 25:26; 49:17, 19; Job 18:9; Ps. 41:9 [MT 10]; Hos. 12:3 [MT 4]); AV also "at the last"; NEB also FETLOCK, "from the rear," paraphrases in Ps. 41:9; Hos. 12:3; [*regel*–'foot'] (Jgs. 4:10; 5:15; Job 18:11); AV FEET, "on foot"; NEB FEET, omits in Jgs. 4:10; 5:15; [Gk. *ptérnan*] (Jn. 13:18).

The heel or calx is the posterior rounded extremity of the foot, the heel bone itself being known anatomically as *os calcis*. Though occurring mostly in a literal sense in Scripture, the allusion in Gen. 3:15 is figurative, describing the partial victory of evil over humanity. The

reference to the tribe of Dan is also of a figurative nature (Gen. 49:17), describing the stealthy tactics of the Danites in time of war. The use of "heel" in Jn. 13:18 (a quote from Ps. 41:9) may allude either to a cunning blow inflicted by a wrestler or to an action symbolizing rejection (cf. 1QH 5:24, which is a clear reference to Ps. 41:9 and which parallels "lift the heel" to *zll*, "mock, sneer").

R. K. H.

HEGAI hē'gī [Heb. *hēgay* (Est. 2:8, 15), *hēgē'* (2:3); Gk *Gaí*]; AV HEGE. A eunuch under the Persian king Ahasuerus. Hegai was placed in charge of the young women from whom Esther, Queen Vashti's successor, was chosen.

HEGEMONIDES heg-ə-mon'ə-dēz, hej-ə-mō-nī'dēz [Gk. *Hēgemonídēs* < *hēgemoneúō*–'be leader, rule'] (2 Macc. 13:24). A Syrian officer placed in command of the district extending from Ptolemais to Gerar. In this verse, the AV understands both *Hēgemonídēs* and *stratēgós* as adjectives referring to Maccabeus and translates "principal governor."

HEGLAM heg'ləm [Heb. *heglām*] (1 Ch. 8:7); AV "he removed them"; NEB "he it was who removed them." The AV and NEB take the Hebrew to be the hiphil of *gālâ*, "remove, take into exile." The RSV rendering interprets it as an alternate name for GERA, the son of Ehud and father of Uzza and Ahihud.

HEIFER hef'ûr [Heb. *pārâ*] (Nu. 19; *see* HEIFER, RED; Hos. 4:16); [*'eglâ* elsewhere in the OT]; [Gk. *dámalis*] (He. 9:13). For the "heifer of three years old" in the AV, RV mg. of Isa. 15:5; Jer. 48:34, *see* EGLATH-SHELISHIYAH. A young cow that has yet to produce a calf. The *'eglâ* figures specifically in religious rites only in the ceremony of Dt. 21:1-9 for the cleansing of the land, where an unexpiated murder had been committed. This was not a sacrificial rite — the priests are witnesses only, and the animal was slain by breaking the neck — but sacrificial purity was required for the heifer. In the sacrifices proper the heifer could be used for a peace offering (Lev. 3:1), but was forbidden for the burnt (Lev. 1:3) or sin (4:3, 14) offerings. Hence the sacrifice of 1 S. 16:2 was a peace offering. In Gen. 15:9 the ceremony of the ratification of the covenant by God makes use of a heifer and a she-goat, but the reason for the use of the females is altogether obscure. *See* HEIFER, RED.

Figuratively, the heifer appears as representing sleekness combined with helplessness in Jer. 46:20 (cf. the comparison of the soldiers to "fatted calves" in the next verse). In Jer. 50:11; Hos. 10:11, the heifer is pictured as engaged in threshing. This was particularly light work, coupled with unusually abundant food (Dt. 25:4), so that the threshing heifer served especially well for a picture of contentment. ("Wanton" in Jer. 50:11, however, is an unfortunate translation in the RV, RSV.) Hosea, in contrast, predicts that the "heifers" shall be set to the hard work of plowing and breaking the sods. In Jgs. 14:18, Samson uses "heifer" in his riddle to refer to his wife. This, however, was not meant to convey the impression of licentiousness that it sometimes gives the modern reader.

B. S. EASTON
R. K. H.

HEIFER, RED. In Nu. 19 a rite is described in which the ashes of a "red heifer" and of certain objects are mixed with running water to obtain the so-called "water for impurity" (Nu. 19:9, 13, 20f.; 31:23). This water was employed in the removal of the uncleanness of a person or thing that had been in contact with a dead body, and also in removing ritual defilement from booty taken in war.

I. Origin and Significance of the Rite.–The general origin of the rite is clear enough, as is the fact that this origin is related to the official sacrificial system of Israel. For the removal of impurity, ritual as well as physical, water, preferably running water (v. 17; cf. Lev. 14:5ff.; 15:13), is the natural means, and is employed universally. But where the impurity was unusually great, mere water was not felt to be adequate, and various substances were mixed with it in order to increase its efficacy. So (among other things) blood is used in Lev. 14:6f., and dust in Nu. 5:17 (*see* WATER OF BITTERNESS). The use, however, of ashes in Nu. 19:17 is unique in the OT, although parallels from elsewhere can be adduced — e.g., Ovid *Fasti* iv.639f., 725, 733; the last of these references, "The blood of a horse shall be a purification, and the ashes of calves," is remarkably close to the OT. The ashes were obtained by burning the heifer completely, "her skin, her flesh, and her blood, with her dung" (the contents of the entrails) (v. 5; cf. Ex. 29:14). Here only in the OT is blood burned for a ceremonial purpose, and here only is burning a *preliminary*; elsewhere it is either a chief act or serves to consume the remnants of a finished sacrifice — Lev. 4:12 and Nu. 19:3 are altogether different.

The heifer is a *female*. For the regular sin offering for the congregation, only the male was permitted (Lev. 4:14), but the female was used in the purificatory ceremony of Dt. 21:3 (a rite that has several points of similarity to that of Nu. 19). An individual sin offering by one of the common people, however, required a female (Lev. 4:28), but probably only in order to give greater prominence to the more solemn sacrifices for which the male was reserved. A female is required again in the cases enumerated in Lev. 5:1-6, most of which are ritual defilements needing purification; a female was required at the purification of a leper (in addition to two males, Lev. 14:10), and a female, with one male, was offered when a Nazirite terminated his vows (Nu. 6:14). Some connection between purification and the sacrifice of a female may be established by the list, for even in the case of the Nazirite the idea may be removal of the state of consecration. But the reason for such a connection is anything but obvious, and the various explanations that have been offered are hardly more than guesses. It was required also that the heifer be "red," i.e., reddish brown (Nu. 19:2). Likeness in color to blood is at first sight the most natural explanation, but likeness in color to ripe grain is almost equally plausible. It may be noted that certain Egyptian sacrifices also required red cattle as victims (Plutarch *De Iside* 31). The heifer is to be "without defect" ("faultless"), "in which there is no blemish," the ordinary requirement for sacrifices. (The Jewish exegetes misread this "perfectly red, in which there is no blemish," with extraordinary results; see below.) But an advance on sacrificial requirements is that she shall be one "upon which a yoke has never come." This requirement is found elsewhere only in Dt. 21:3 and in 1 S. 6:7. But in other religions this requirement was very common (cf. Homer *Il.* x.293; Vergil *Georgics* iv.550f.; Ovid *Fasti* iv.336).

II. Use of Cedar and Hyssop.–While the heifer was being burned, "cedar-wood, and hyssop, and scarlet" (i.e., scarlet wool or thread) were cast into the flames. The same combination of objects (although differently employed) is found at the cleansing of a leper (Lev. 14:4), but their meaning is entirely unknown. The explanations offered are almost countless. It is quite clear that hyssop was especially prized in purifications (Ps. 51:7 [MT 9]), but the use of hyssop as a sprinkler and the use of ashes

of hyssop may be quite unrelated. Hyssop and cedar were supposed to have medicinal properties (*see* HYSSOP). Perhaps what was important was the use of aromatic woods. All that can be said definitely is that Lev. 14:4 and Nu. 19:6 show that the combination of objects was deemed to have a high purificatory value.

III. Application and Sacredness of the Ashes.–The ashes, when obtained, were used in removing the greatest of impurities. Consequently, they themselves were deemed to have an extraordinarily "consecrated" character, and they were not to be handled carelessly. Their consecration extended to the rite by which they were produced, so that every person engaged in it was rendered unclean (Nu. 19:7f., 10), an excellent example of how in early religious thought the ideas of "holiness" and "uncleanness" blend. It was necessary to perform the whole ceremony "outside the camp" (v. 3), and the ashes, when prepared, were also kept outside the camp (v. 9), probably in order to guard against contact that would defile anyone (as well as to keep them from being defiled). When used they were mixed with running water, and the mixture was sprinkled with hyssop on the person or object to be cleansed (vv. 17-19). The same water was used to purify booty (31:23), though whether it had any connection with the water of expiation (8:7) is doubtful. In addition to the similarities already pointed out between Nu. 19 and Dt. 21:1-9, the rites resemble each other also in the fact that, in both, laymen are the chief functionaries and that the priests have little to do (in Dt. 21:1-9 they are mere passive witnesses).

At the same time it should be noted that Eleazar the priest, and not a lay leader, was ordered to dip his finger in the animal's blood and sprinkle some of it at the front of the tent of meeting seven times (Nu. 19:4). The consequent ritual uncleanness of the priest and the requirement for cleansing (v. 7) place the rite in a category analogous to that of the sin offering of Lev. 4:6, 17. A ceremonial status of a priestly character was assigned even to the "clean" person whose responsibility it was to dispose of the ashes, for he, too, was considered unclean until the evening. The prescriptions of this ceremony are so much in accord with the ethos of the Levitical sacrificial system that it is difficult to believe that the rite had any connection whatever with contemporary non-Israelite bull-worship, as older liberal scholars used to urge. Indeed, the entire procedure is classified specifically as a "statute of the law which the Lord has commanded," and is totally different both in ethos and intent from the episode in the Ugaritic Baal myth in which the dead god somehow contrived to indulge in bestiality with a heifer in the underworld, thereby regaining his vitality (*UT*, 67:V:18-22; Eng. tr. in *ANET*, p. 139). Whereas the Baal myth was part of a fertility-cult tradition, the ceremony prescribed in Nu. 19 was intended to remove personal uncleanness or ritual defilement, and had no connection whatever with a pagan death-and-resurrection mythology.

See G. B. Gray, *Numbers* (*ICC*, 1903), pp. 241-256.

HEIGHT; HEIGHTS [Heb. *bāmâ*] (Nu. 21:28; 2 S. 22:34; Ps. 18:33 [MT 34]; Isa. 14:14; 58:14; Jer. 26:18; Ezk. 36:2; Am. 4:13; Mic. 3:12); AV HIGH PLACES; NEB also HIGH ABOVE, HIGH GROUND, HIGHLAND, MOUNTAINS, ROUGH HEATH; [*gaḇ*] (Ezk. 43:13); AV HIGHER PLACE; [*gāḇah*] (2 Ch. 33:14); [*gōḇah*] (1 S. 17:4; 2 Ch. 3:4; Ezk. 31:10; Am. 2:9); NEB also "grew," TALL; [*ḥ^{a}ṣî*] ("half [its] height," Neh. 4:6); [*mārôm*] (Jgs. 5:18; 2 K. 19:23; Ps. 102:19 [MT 20]; 148:1; Isa. 22:16; 26:5; 33:16; etc.); AV also HIGH, HIGH PLACES, ON HIGH; NEB also HIGH, HIGHEST, HIGH TOWERS, HIGH UP, LOFTY, ON HIGH; [*qômâ*] (Gen. 6:15; Ex. 25:10, 23; 27:1, 18; 30:2; 37:1, 10, 25; 38:1; 1 S. 16:7; 1 K. 6:26; 7:2, 15f., 32; etc.); AV also HIGH, STATURE; NEB also HIGH, TALL, TALLEST; [*rō'š*] (Nu. 14:40, 44); AV TOP; [*rō'š-m^{e}rômîm*] (Prov. 8:2); AV "top of the high places"; NEB "top of the hill"; [*rûm*] (Prov. 25:3); [*rāmâ*] (1 S. 22:6); AV RAMAH; NEB HILL-TOP; [*śî*] (Job 20:6); AV EXCELLENCY; NEB HIGH; [*š^{e}pî*] ("bare height," Nu. 23:3; Isa. 41:18; 49:9; Jer. 3:2, 21; 4:11; 7:29; 12:12; 14:6); AV HIGH PLACES; NEB DUNES, SAND-DUNES, "forthwith," HIGH BARE PLACES; [*tāwe*ḳ] (Isa. 16:3); AV MIDST; NEB HIGH; [*tô'āpôṯ*] (Ps. 95:4); AV "strength"; NEB FOLDS; [Aram. *rûm*] (Ezr. 6:3; Dnl. 3:1; 4:10; NEB also HIGH; [Gk. *hýpsos*] (Eph. 3:18; Rev. 21:16); AV also DEPTH; [*hýpsōma*] (Rom. 8:39).

A "height" in the OT is primarily a geographical designation, referring to a high place above a level, a HILL, or mountain; it is used literally (e.g., Nu. 21:28; 23:3; 1 S. 22:6; 2 K. 19:23; Isa. 22:16; 37:24; Jer. 49:16; 51:53; Ezk. 36:2) and also figuratively, referring to Jerusalem itself and the site of the temple in Jerusalem (e.g., Jgs. 5:18; Isa. 26:5; Jer. 26:18; 31:12; Ezk. 17:23), to the location of those blessed by Yahweh (2 S. 22:34; Ps. 18:33; Isa. 33:16; 41:18; 49:9), to the seat of wisdom (Prov. 8:2). Jeremiah characterizes the "heights" as a particularly appropriate place to become aware of Yahweh's judgment (Jer. 3:2, 21; 4:11; 7:29; 12:12; 14:6).

"Height" is also a dimension of measure specifying extent or distance upward. It is used to refer to the stature of a man (1 S. 16:7; 17:4; Job 20:6; Am. 2:9) or of trees (Isa. 10:33; Ezk. 19:11; 31:3, 10, 14; Dnl. 4:10; Am. 2:9). It also refers to the measure of various constructed items: altars (Ex. 27:1; 30:2; 37:25; 38:1; Ezk. 43:13), walls (2 Ch. 33:14; Neh. 4:6; Ezk. 40:5), a vestibule (2 Ch. 3:4), Noah's ark (Gen. 6:15), the ark of the covenant (Ex. 25:10; 37:1), a table (Ex. 25:23; 37:10), a court (Ex. 27:18), a cherub (1 K. 6:26), the House of the Forest of Lebanon (1 K. 7:2), pillars (1 K. 7:15; 2 K. 25:17; Jer. 52:21), capitals (1 K. 7:16; 2 K. 25:17; Jer. 52:22), a wheel (1 K. 7:32), the house of God in Jerusalem (Ezr. 6:3), and an idol (Dnl. 3:1). Midday, when the sun reaches its highest point, is called the "height" of noon (Isa. 16:3). The height of the new Jerusalem will equal its length and its breadth (Rev. 21:16).

Height is listed with depth as being unable to separate the Christian from God's love (Rom. 8:39), for this love is all-encompassing (Eph. 3:18). J. R. PRICE

HEIR [Heb. *yôrēš* (Gen. 15:3f.; 21:10; 2 S. 14:7; Jer. 49:1), *ben-mešeq* (Gen. 15:2), *mānôn* (Prov. 29:21); Gk. *klēronómos* (Mt. 21:28; Mk. 12:7; Lk. 20:14; Rom. 4:14; 8:17; Gal. 3:29; 4:1, 7; Tit. 3:7; He. 1:2; 6:17; 11:7; Jas. 2:5), *synklēronómos*–'inheriting together with,' 'fellow heir' (Rom. 8:17; Eph. 3:6; He. 11:9; 1 Pet. 3:7)]; AV also STEWARD (Gen. 15:2), SON (Prov. 29:21); NEB also INHERITANCE (Gen. 21:10), SUCCESSION (2 S. 14:7), "ungrateful" (Prov. 29:21), "claim" (He. 11:7). Cognates of the Hebrew verb *yāraš*, "inherit," are Ugar. *yrṯ*, Old Aram. *yrt*, Syr. *yiret*, Moabite *yrš*, Late Bab. *yāritu*, "heir." An heir is a person who is legally entitled to inherit the parental or another's estate, which can be either material or spiritual.

3. Widows
B. Religious Aspects
II. In the NT
A. Christ as Heir
B. Christians as Heirs

I. In the OT.—This topic is closely related to the broader biblical concept of inheritance (*see* INHERIT), which goes beyond the legal and religious aspects associated with the term "heir." Only the respective notions directly related to the concept "heir" are here treated.

A. Legal Aspects. The OT injunctions securing the right of possession by inheritance, namely, to inherit property or staple goods in any form and to gain their permanent title, are few. The reason for this seems to lie in a deeply religious view of property and inheritance. Property was usually not divided up among many heirs, and in accordance with the law of the Jubilee Year all alienated property was to return to the original owner (Lev. 25:8-34). Nevertheless, a number of OT texts address themselves to the question of who has the legal right to be heir.

1. Sons. The normal procedure according to the various OT injunctions is that sons were the heirs to the parental estate.

a. Adopted Sons. The earliest appearance of the term "heir" (Heb. *yôrēš*) is found in a narrative reflecting early patriarchal customs (Gen. 15:2-4). The noun here reflects the original meaning of the Hebrew verb *yāraš* from which it derives, namely, the legal notion associated with inheritance. The religious aspect seems to be a later development. Abraham's dialogue with God shows his concern that in spite of the promise (Gen. 12:1-4) he is still without physical offspring. Abraham has made arrangements for Eliezer of Damascus to be "the heir of my house" (Gen. 15:2). Since Abraham has no descendants his estate will pass to a chosen member of his household. The Nuzi Texts throw much light on Hurrian family law, which was also normative for the patriarchs. These cuneiform texts are invaluable for explaining the legal aspects of this passage. Numerous Nuzi documents show the well-established custom for childless persons to adopt an heir, called *ewuru* (*CAD*, IV, 415) in distinction to the direct heir, *aplu* (*CAD*, A/II, 173-77), who was a physical descendant. The *ewuru*, or indirect heir, whom the law recognized when normal inheritors were lacking, owed his adoptive parents filial respect, maintained the estate, took care of the parents' physical needs, and performed the funeral rites at their death. In return, the adopted son became the legally recognized heir to the estate. If a natural son *(aplu)* was born after the adoption, the rights and obligations of both parties were clearly set forth. In such eventualities the natural son or direct heir *(aplu)* shall receive a "double portion" (*ANET*, p. 220). Abraham's slave Eliezer appears to have become his *ewuru* or adopted heir, whereas later, Isaac, the *aplu* or direct heir, was born.

b. Natural Sons. The legal rights of inheritance could be rather complicated in patriarchal society. Sarah followed the social custom of her society reflected in the Nuzi Texts, which specified that an upper-class wife who had borne her husband no sons would provide him with a slave girl. Thus Sarah gave the Egyptian maid Hagar to Abraham in order to "obtain children by her" (Gen. 16:2). After Hagar had borne Ishmael, Sarah was blessed with a son, Isaac. Resentful of Hagar and her son (cf. Gen. 16:4f.), Sarah tells Abraham: "Cast out this slave woman with her son; for the son of this slave woman shall not be heir with my son Isaac" (Gen. 21:10). But earlier Sarah had made the promise that the Egyptian maidservant Hagar's children should be recognized as her own (Gen. 16:2). According to the Nuzi Texts Ishmael had a right to inheritance, and Abraham was displeased at sending him away (Gen. 21:11). The Nuzi marriage contracts stipulate that the offspring of a slave woman must not be sent away (*ANET*, p. 200). Sarah's counsel to send away Ishmael does not appear to have been completely ruled out according to the presently known Nuzi contracts, because birthright was not so much a matter of physical birth as of parental decree. The clause that the wife should not drive out or send away the slave woman's offspring does not necessarily limit the right to do so, but may prevent a possible misuse. The Code of Hammurabi stipulates that if a female slave bears children to her owner and he acknowledges them as his own during his lifetime, then they "shall share equally in the goods of the paternal estate, with the first-born, the son of the first wife, receiving a preferential share" (§ 170; *ANET*, p. 173), but if they are not acknowledged, they receive no inheritance and are set free (§ 171; *ANET*, p. 173). The sons of the slave women Bilhah and Zilpah were given equal rank with those of Rachel and Leah (Gen. 49:1-28), having an equal share with them in the land of Canaan. The reason is that they had been adopted by Rachel or by Leah (Gen. 30:3-13), and named by them.

Only a few legal texts in the OT refer to the rights of the heir (Dt. 21:15-17; Nu. 27:1-11; 38:6-9). The basic rule is that only sons are considered heirs. Among the sons, the oldest or first-born had the privileged position and received a "double portion" (Dt. 21:17); by implication the other sons shared the remaining property equally. The provision that the oldest would receive a double share of his father's estate is also attested in the Code of Hammurabi (§§ 168-170; *ANET*, p. 173), the Middle Assyrian Law (*ANET*, p. 185), the Nuzi Texts (*ANET*, p. 220), and at Mari. The Lipit-Ishtar Code (*ca.* 1934-1924 B.C.), to the contrary, provides that all sons, whether of the first wife or the second wife, "shall divide equally the property of their father" (§ 24; *ANET*, p. 160). The "double portion" in Dt. 21:17 means that if a man had five sons the inheritance would be divided into six portions, the eldest son receiving two (cf. Gen. 48:22; 2 K. 2:9).

2. Daughters. In cases where there were no male heirs, daughters would inherit the estate (Nu. 27:1-11; 36:1-13), but with the proviso that they were to find husbands from a clan of their father's tribe, and so prevent the family estate from being passed to another tribe (Nu. 36:1-9). Under this law the daughters of Eleazar married their cousins (1 Ch. 23:22).

A notable exception is Job 42:13-15, where the three daughters of Job receive inheritance along with their seven brothers. This reflects an early and not a late custom as is sometimes assumed. In the Law Code of Lipit-Ishtar, a proviso gives legal right for equal shares of the estate among all children, including daughters (§§ 22, 24; *ANET*, p. 160).

3. Widows. Normally the wife of the deceased husband had no legal right to inherit the estate of her husband. If a man died without offspring, the estate passed to his male kinsmen on his father's side in the following order: his brothers, his father's brothers, the nearest family kinsman (Nu. 27:9-11). In contrast to this, the Babylonian Code of Hammurabi provides that the widow would receive her dowry and an equal share of the inheritance (§ 172; *ANET*, p. 173) and the gifts she received from her late husband (§§ 171f.). The laws at Nuzi also assure an inheritance to the widow, as do the Middle Assyrian Laws (*ANET*, pp. 182, 184) and the Neo-Babylonian Laws (*ANET*, p. 197). The contracts of the Elephantine papyri allow a childless

widow to inherit from her husband (de Vaux, p. 54). The biblical evidence indicates that a childless widow could return to her father's house (Gen. 38:11; Lev. 22:13; Ruth 1:8) or could become a member of her husband's family by levirate marriage (Dt. 25:5-10). Thus, the widow was not entirely unprotected by law and custom. One of the reasons for levirate marriage was the concern to prevent the alienation of family property. To preserve both name and inheritance for the family and to provide for the widow, remarriage of the widow was required (cf. Mt. 22:24-26). If a widow had grown-up children, they would provide for her as the heirs; but if they were still young, she may have managed the estate left to them as a trustee. This seems to be the situation in 2 K. 8:3-6, where the Shunammite woman receives the estate of her late husband that had become the property of the king while she was in a foreign land.

B. Religious Aspects. It has been noted above that the earliest appearance of the noun "heir" is in connection with Yahweh's covenant with Abraham in Gen. 15, where the Lord ratified His promise even though Abraham was still without a physical heir. The promise that Abraham's own son shall be his heir (v. 4) climaxes in the covenant promise that Abraham's descendants shall be heirs of Canaan, the Promised Land (vv. 18-21). The heirs of Abraham will inherit both the promise and the land of inheritance (Gen. 26:3; 35:12; Ex. 6:8; etc.). In contrast to Israel's neighbors, the land of inheritance is not Yahweh's proper domain that He passes on to the heir Israel as an inheritance, for the whole earth belongs to Him (Ex. 19:5; Dt. 10:14). Yahweh is not the God of a local domain. Canaan, as the land of inheritance, is a gift of God (Dt. 4:1; 6:18; 8:1; 11:9). Yahweh "gives" the land to them to "possess" it (Gen. 15:7; Dt. 3:18; 5:28; 9:6; 12:1; 19:2, 14; 21:1; Josh. 1:11). If the Promised Land is Yahweh's gift, it is His inheritance for Israel, because He has given it to His people and has chosen to make His abode there (Ex. 15:17). The Israelites, as heirs to the promises of their patriarchal fathers, receive Canaan from their Lord, because the land is the Lord's (Lev. 25:23). Thus, the OT sees the descendants of Abraham as heirs of the promise and the land as the inheritance of Yahweh given to Israel for its inheritance.

II. In the NT.–The NT concept of "heir" is deeply rooted in the religious and theological aspects of the OT concept.

A. Christ as Heir. In a limited number of NT passages, Jesus is designated as "heir" (Gk. *klēronómos*). The root of this identification must be sought in the teaching of Jesus. In the Synoptic Gospels the term "heir" appears only in the parable of the wicked husbandmen (Mt. 21:38; Mk. 12:7; Lk. 20:14). It is widely recognized that this parable reflects the Isaianic Song of the Vineyard (Isa. 5:1-7), which stresses God's ownership of the vineyard. In the parable, the son (Jesus) of the owner (God) of the vineyard (Israel) "is the heir" (Mt. 21:38). The owner's son possesses (by birth) the legal rights of inheritance of his father's estate. "A firm link is established between sonship and inheritance such as we hardly ever find in the OT and later Judaism, and it runs through the whole of the NT" (*TDNT,* III, 781f.). The emphasis on the link between sonship and inheritance is absent from the version of this parable in Logion 65 of the gnostic Gospel of Thomas: "Those husbandmen, since they knew that he was the heir of the vineyard, they seized him (and) killed him" (H-S, I, 518). No mention is here made of sonship. The OT emphasizes, however, that sonship provided the right of inheritance. This is also the common view of both Greek and Roman law.

It should be noted that the husbandmen plotted to kill the son. They assumed that the father as holder of the title of inheritance was dead and thus they stupidly supposed that by murdering the son they would obtain the inheritance. The center of interest is the murder of the heir — the hearers were to recognize what the Jewish leaders (husbandmen) were plotting. In veiled manner Jesus spoke here of His death. Jesus made the point that the sonship that assures inheritance involves more than just birth. It is gained in its fulness only by doing the will of the Father (Jn. 5:30; 6:38-40; 7:17; Mt. 7:21; Mk. 3:35), which for Jesus meant death on the cross (Mt. 26:42; Lk. 22:42). Through death and resurrection Jesus Christ gained authority and thus inheritance (Mt. 28:18). The inheritance that Jesus gained is not the vineyard in its limited sense of literal Israel but "the kingdom of God" (Mk. 12:7; Mt. 21:43; 25:34; cf. 1 Cor. 6:9; 15:50; Jas. 2:5). By linking "son" and "heir" to "kingdom of God" Jesus breaks through the barriers of a limited and narrow conception of heirship and stresses also certain eschatological aspects of heirship.

The identity of Jesus with the "heir" rests on Jesus' own teaching and is found only in one other NT passage. The author of Hebrews shows his intensely christological emphasis in linking the "appointed heir of all things" to Him "through whom also he created the world" (He. 1:2). The Creator is here the one who is the divinely appointed heir.

B. Christians as Heirs. Since Christ is "heir" on the basis of His sonship, those who are followers of Jesus Christ are His brothers (He. 2:11, 17), and thus sons through Christ. "For in Christ you are all sons of God" (Gal. 3:26). The believer is a son of God not in his own right, but by being a follower of Christ. In Rom. 8:14-17 Paul applies the phrase "sons of God" to those who are led by the Spirit of God and who have thus received sonship. And if sons of God, "then [they are also] heirs, heirs of God and fellow heirs with Christ" (v. 17). Three ideas are brought together here by Paul: sonship, heirs, and fellow heirs. The sonship of the believer is not established by natural birth or physical descent; it comes through the redemption of Jesus Christ through which "we might receive adoption [*huiothesía*] as sons" (Gal. 4:5). God gives by His Spirit a "spirit of sonship" (Gk. *huiothesía,* Rom. 8:15, NAB "spirit of adoption"; NEB "a Spirit that makes us sons"), i.e., He has made "adoption" *(huiothesía)* possible through His Son, because "flesh and blood cannot inherit the kingdom of God" (1 Cor. 15:50). A unique NT emphasis is that sonship and adoption into sonship are possible only through the means God has established in Jesus Christ. Through the Son the believer becomes God's son, and "if a son then an heir" (Gal. 4:7; cf. 4:1). To be sons of God and thus "heirs according to the promise" (3:29) means to have been set free by God from the condition of slavery to the elemental spirits of the universe (4:3, 7).

The change from the condition of slavery to that of sonship which establishes heirship comes about by nothing less than a new creation that is to be found only "in Christ" (2 Cor. 5:17; 4:6; Gal. 6:15). Paul speaks of sonship that establishes inheritance as a gift of grace (Rom. 4:13-25) in terms of a present reality for the believer. On the other hand, he can also regard adoption into sonship with the heir's inheritance as a future experience of an eschatological nature (Rom. 8:23f.). This tension in Pauline theology reflects that adoption into divine sonship is a process: the first phase is the joining of the believers into the death of Christ at baptism (Gal. 3:23–4:7), and the final phase is experienced at the eschatological "re-

demption of our bodies" (Rom. 8:23). This is not unrelated to the believer's inheritance of the kingdom of God in the present and his expectation of experiencing the full manifestation of God's kingdom in power and glory in the future, when he will as Christ's fellow heir (Rom 8:17; 1 Pet. 3:7) enter the Holy City (He. 11:10, 16), the new Jerusalem (Rev. 21:2). It is then that the heir will receive the reward (Col. 3:24).

The letter to the Hebrews moves from Christ as heir (1:2) to those who have become "heirs of the promise" (6:17). The context of the latter phrase indicates that God guaranteed the "heirs of the promise" by two unchangeable things that they shall receive the inheritance, namely, by His promise (v. 15; cf. Gen. 12:1-4; 15:1-5; etc.) and by His oath (v. 17; cf. Gen. 22:16-18). The author of this letter assures these heirs or Christians that they are the ones who are inheriting the promises through faith and patience (v. 12) and that they can therefore be fully assured of that for which they hope until the end (v. 11).

The proof that this hope of the heirs is not in vain rests not only in God's promise and oath but also in the fulfillment of God's promises to Noah, who "became an heir of the righteousness which comes by faith" (11:7). Furthermore, by faith (11:9) and patience (6:12) Abraham obtained his son (6:15) and was to obtain the Promised Land as his inheritance (Gk. *klēronomía*, 11:8f.). Isaac and Jacob were "fellow heirs" (Gk. *synklēronómoi*) with Abraham in the same promise (11:9). But these three heroes of faith "did not obtain what had been promised" (v. 13, NAB), viz., a heavenly country (v. 16) with a "city which has foundations, whose builder and maker is God" (v. 10). This is a clear indication that the inheritance that the "heirs of the promise" still await is the kingdom of God which will come at the Parousia. The letter to the Hebrews contributes to the NT concept of heirship in a twofold way: (a) the person who is an heir is a person of faith, patience, and hope; and (b) God guarantees the eschatological coming of the inheritance through divine promise and divine oath, which are pledges whereby the believer is to seize the hope that is placed before him. Although the believer is heir here and now, his inheritance in the form of the Promised Land is yet to come. It is also clear that the heirship established through the sonship of the believer anticipates in some way the inheritance he will obtain in "the world to come."

G. F. HASEL

HELAH hē'lə [Heb. *hel'â*]. A wife of Ashhur, father of Tekoa (1 Ch. 4:5, 7).

HELAM hē'lam [Heb. *hêlām*; Gk. *Hailam*]. A city near the northern boundary of Gilead, near which David defeated the Aramean army under Hadadezer (2 S. 10:16f.). The LXX in Ezk. 47:16 located it between the territories of Damascus and Hamath. It may be identical with the ALEMA of 1 Macc. 5:26, 35 = 'Alma, NE of Der'ā (Edrei) in Ḥaurân. The name appears as *Ḥl'm* in the Egyptian Execration Texts (1850-1825 B.C.). B. E. HOVEY

HELBAH hel'bə [Heb. *ḥelbâ*—'fertile']. A town from which the tribe of Asher failed to drive out the Canaanites after settling in the land conquered under Joshua (Jgs. 1:31). It is identified with Maḥalib (Mehelab, AHLAB) of Sennacherib's prism inscription, and is located 6.4 km. (4 mi.) NE of Tyre near the Leontes River, as modern Khirbet el-Maḥâlib. R. J. HUGHES, III

HELBON hel'bon [Heb. *ḥelbôn*]. A region in the vicinity of Damascus famous for its high-quality wines. Ezekiel mentions the "wine of Helbon" among the chief articles of trade between the merchants of Tyre and Damascus (Ezk. 27:18). The site is to be identified with the productive valley of Halbûn, 29 km. (18 mi.) N of Damascus, where Moslem farmers continue to cultivate the terraced vineyards along the slopes of the Anti-Lebanon. From the Belino Cylinder we know that Nebuchadnezzar enjoyed wines from *mât helbûnim*, the land of Helbon. Persian kings also considered the wine of Helbon to be of great value (Strabo *Geog.* XV.3.22). A. H. LEWIS

HELCHIAH hel-kī'ə. *See* HILKIAH 7.

HELDAI hel'dī [Heb. *ḥelday*].

1. A captain of the temple service, appointed for the twelfth month (1 Ch. 27:15). Same as Ḥeled in the parallel list (1 Ch. 11:30), and is probably also to be identified with Heleb (NEB Heled), son of Baanah the Netophathite, one of David's heroic leaders (2 S. 23:29).

2. One of a company of Jews who brought gifts of gold and silver from Babylon to assist the exiles under Zerubbabel (Zec. 6:10, 14). In v. 14 the AV, following the MT, reads Helem (which the LXX translated by *hypoménō*, "wait for," apparently understanding Helem [Heb. *ḥēlem*] to be from *ḥîl* [as in Jgs. 3:25; Lam. 3:26]).

HELEB hē'ləb [Heb. *ḥēleḇ*] (2 S. 23:29); NEB HELED. *See* HELDAI **1.**

HELECH hē'lək [Heb. *ḥêlēḵ*] (Ezk. 27:11); AV "thine army"; NEB CILICIA. The NEB is possibly correct. Assyrian records refer to Cilicia as Ḫilakku. The region was home to pirates and bandits from prehistoric times until the Roman empire. Such men would be willing mercenaries for Tyre. The AV takes it to be the common noun *ḥayil*, "army," with a pronominal suffix.

HELED hē'ləd [Heb. *ḥēleḏ*] (1 Ch. 11:30). *See* HELDAI **1.**

HELEK hē'lək [Heb. *ḥēleḵ*]. Son of Gilead the Manassite (Nu. 26:30; Josh. 17:2). Patronymic, "Helekites" (Nu. 26:30).

HELEM hē'ləm.

1. [Heb. *hēlem*; LXX B, Gk. *Balaam*, A, *huiós Elam*—'son of Elam'] (1 Ch. 7:35); NEB HOTHAM. A great grandson of Asher, called Hotham in v. 32.

2. [Heb. *ḥēlem*—'strength']. *See* HELDAI **2.**

HELEPH hē'ləf [Heb. *ḥēlep*; Gk. B *Moolam*, A *Meeleph*]. The first of nineteen cities, with their villages, listed in the territory assigned to the tribe of Naphtali when Canaan was divided among the tribes of Israel after the conquest under Joshua (Josh. 19:33). Its location is uncertain, although Khirbet 'Arbathah, NE of Mt. Tabor, has been suggested (cf. *GTTOT* §§ 333f.).

R. J. HUGHES, III

HELEZ hē'ləz [Heb. *ḥeleṣ*; Gk. *Sellēs, Chellēs*].

1. (2 S. 23:26; 1 Ch. 11:27; 27:10). One of David's mighty men; according to 1 Ch. 27:10, he belonged to the sons of Ephraim and was at the head of the seventh course in

David's organization of the kingdom. He is called a Paltite in 2 Samuel (but cf. LXX A *Phellōnei*), but in 1 Chronicles he is called a Pelonite, which is probably correct since 1 Ch. 27:10 calls him an Ephraimite.

2. (LXX *Chellēs*, 1 Ch. 2:39). A man of Judah of the clan of the Jerahmeelites.

HELI hē'lī [Gk. *Hēlei* for Heb. *'ēlî*].

1. The father of Joseph the husband of Mary in Luke's genealogy of Jesus (Lk. 3:23).

2. AV form of ELI (2 Esd. 1:2).

HELIODORUS hē-li-ə-dō'rəs [Gk. *Hēliodōros*]. Treasurer of the Syrian king Seleucus IV Philopator (187-175 B.C.), the immediate predecessor of Antiochus Epiphanes who carried out to its utmost extremity the hellenizing policy begun by Seleucus and the "sons of Tobias." Greatly in need of money to pay the tribute due to the Romans as one of the results of the victory of Scipio over Antiochus the Great at Magnesia (190 B.C.), Seleucus learned from Apollonius, governor of Coelesyria (Palestine) and Phoenicia, of the wealth that was reported to be stored up in the temple at Jerusalem and commissioned Heliodorus (2 Macc. 3) to plunder the temple and to bring its contents to him. The temple seems to have served the purposes of a bank in which the private deposits of widows and orphans were kept for greater security, and 2 Macc. 3:15-21 narrates the panic at Jerusalem that took place when Heliodorus came with an armed guard to seize the contents of the temple. In spite of the protest of Onias the high priest, Heliodorus was proceeding to carry out his commission when "the Sovereign of all spirits and of all authority caused so great a manifestation" that he fell down, and deep darkness overcame him. While he was lying prostrate and speechless, and on the point of death, Onias interceded for him, as a result of which he was restored to health and glorified God for the great works that he had seen. The narrative given in 2 Macc. 3 is not mentioned by any other historian, though 4 Maccabees refers to the plundering of the temple, and assigns the deed to Apollonius.

Heliodorus is also mentioned by Appian (*Syr.* 45) and in an inscription found in the temple of Apollo on the Aegean island of Delos. J. HUTCHISON

HELIOPOLIS hē-li-op'ə-lis [Heb. *bêṯ šemeš*–'house of (the solar deity) Shemesh'; Gk. *hēlíou pólis*–'city of the sun'] (Jer. 43:13); AV, NEB, BETH-SHEMESH. The reference here is to the Egyptian city ON, also called the City of the Sun (Isa. 19:18) and Aven (Ezk. 30:17; *see* AVEN 3). Heliopolis was also the Greek name for the Lebanese city of BAALBEK.

HELKAI hel'kī [Heb. *ḥelqāy*, perhaps an abbreviation for Helkiah–'Yahweh is my portion.' Not in LXX B; LXX L *Chelkias*] (Neh. 12:15). The head of a priestly house in the days of Joiakim the high priest.

HELKATH hel'kath [Heb. *ḥelqaṯ*–'field, portion'] (Josh. 19:25; 21:31); also called **HUKOK** hōō'kək [Heb. *ḥûqōq*; Gk. *Hikak, Hakōk*] (1 Ch. 6:75 [MT 60]). The first city, with its villages, listed in the territory assigned to the tribe of Asher when Canaan was divided among the tribes of Israel after the conquest under Joshua (Josh. 19:25). It was a Levitical city assigned to the Gershonites (Josh. 21:31). Though the exact location is still disputed, it may be represented by the modern Tell el-Harbaj on the northeast slope of Mt. Carmel, about 8 km. (5 mi.) inland from the mouth of the Kishon River. The city may appear as *ḥrqt* in topographical lists of Pharaoh Thutmose III, *ca.* 1460 B.C. (cf. *NBD, s.v.*). R. J. HUGHES, III

HELKATH-HAZZURIM hel'kath haz'zōō-rim [Heb. *ḥelqaṯ haṣṣurîm*–'field of flints' or 'field of sword edges'] (2 S. 2:16). The name of the area near the pool of Gibeon (v. 12) where twelve of Joab's men and twelve of Abner's men fought and killed each other. The meaning of the name is uncertain, as the variety of modern translations indicates: NEB "Field of Blades"; JB "Field of Sides," which requires only a slight change (*haṣṣurîm* to *haṣṣiddîm*) and which Driver prefers for its contextual appropriateness; NIV mg. "field of hostilities," which requires only a repointing of *haṣṣurîm* to *haṣṣārîm*. The LXX *Meris tōn epiboúlōn* offers yet another alternative, "field of the plotters [or 'liers in wait']," which also reflects only a slight change from MT *haṣṣurîm* to *haṣṣāḏîm* or *haṣṣōḏîm*. Curiously, although *BH* suggests all of these emendations, *BHS* has no notes at all on the verse.

See S. R. Driver, *Notes on the Hebrew Text and the Topography of the Books of Samuel* (2nd ed. 1913), pp. 242f. G. A. L.

HELL [Gk. *géenna*, *tartaróō*–'hold captive in Tartarus']. On Gk. *géenna, see* GEHENNA. In the NT Gk. *tartaróō* occurs only in 2 Pet. 2:4, where the angels who sinned were "cast... into hell" (cf. RSV mg. and NAB). The verb *tartaróō* is derived from the noun *Tartaros* (cf. LXX Job 40:20; 41:24 [Eng. 32]; Prov. 30:16), which in Greek mythology was the locale below Hades where the Titans were imprisoned (Homer *Il.* xiv.279; Josephus *CAp* ii.33 [240]). Homer also located it at the "undermost limits of earth and sea" (*Il.* viii.481). His description of it as murky (viii.13) apparently carried over to Sib. Or. 4:186 and perhaps to 2 Pet. 2:4, since Peter described Tartarus as having "pits of nether gloom."

HELL, HISTORY OF THE DOCTRINE OF.

I. Early Church.–The issues that have dominated the doctrinal discussion of hell — its nature, purpose, and duration — arose at once in the patristic age. Concerning its nature, many early fathers, including the apologist Justin (*Dial.* 45.4) and the Latin fathers Tertullian (*De res.* 5ff.) and Jerome (cf. *Ep.* 119), assumed a fiery hell. Origen, on the other hand, gave it a spiritualized sense, in which the emphasis fell on remorse and separation from God (*De prin.* ii.10.4). In the 4th cent. Basil of Caesarea (*De Spiritu sancto* 40) and Chrysostom (*Ad Theodorum lapsum* 1.9f.) offered vividly materialistic depictions, but Gregory of Nazianzus (*Oratio* 40[on baptism].36) and Gregory of Nyssa (*Oratio catechetica* 26) followed more in the steps of Origen. Augustine (*Ench.* 112f.) helped to shape Western thought by championing a combination of spiritual and natural (or sensory) penalties in keeping with his attempt to avoid the dualism that had tempted him in his Manichaean period.

For most of the fathers hell clearly served the purpose of retribution for demons and impenitent sinners. Origen (*In Ezech. Hom.* 1, 2), however, introduced the possibility of a remedial hell that might form a final stage of reclamation even for demons. This view found some support in eastern fathers such as Gregory of Nyssa (*Oratio catechetica* 26), who had plain inclinations toward universalism, but the official decision of the Church went against it at the 543 Council of Constantinople.

Hell could obviously be of limited duration if it served an educative or rehabilitatory goal. Where it was regarded

HELL, HISTORY OF THE DOCTRINE OF

Devils taking away the damned: from left, a fashionable lady, a nun, and a miser. Right archivolt of the central south panel, Cathedral of Notre-Dame, Chartres (A.D. 1194-1260) (Rosenthal Art Slides)

as retributive it was also stated to be unending, although a few fathers thought that impenitent unbelievers were ultimately annihilated. A minor difference of opinion arose over the time of entry into hell. In the early period some writers, e.g., Justin Martyr (*Apol.* i.28), argued that hell commences only after the last judgment. The general opinion, however, was that hell began for the wicked immediately at death (cf. Jerome *In Joel* 2:1; Augustine *De praedestinatione sanctorum* 24).

II. Middle Ages and Reformation.–The medieval West contributed little that was essentially new to the doctrine of hell, but it added many interesting details. Aquinas (*Summa Theol.* III supp. qq. 69ff.) followed Augustine (*Civ. Dei* 20.22; 21.9) in postulating pains of sense as well as the supreme pain of spirit involved in deprivation of the vision of God. These torments of sense, being related to the resurrection body, were usually construed in very materialistic terms, the medieval imagination being spurred by Dante's *Inferno* and the common location of hell in the fiery depths of the earth. Degrees of retribution were discerned, but hell, as distinct from nearby purgatory, served only a retributive purpose and commenced immediately at death according to the important statement *Benedictus Deus* in 1336. Hell was eternal. Purgatory carried with it severe penalties, which could often be described no less vividly than those of hell itself, but they served a remedial purpose and were limited in duration.

The consignment of unbaptized infants to hell went hand in hand with an important differentiation. Infants were guilty only of original sin, not actual sin, and the penalty for this came to be understood as the more negative and spiritual one of loss of the beatific vision, sensory torments being related exclusively to actual sin (H. Denzinger, nos. 321, 410). Thus cartographers of the infernal regions divided hell into three separate compartments: the main area for the lost in general, a special "limbo" for unbaptized infants, and another "limbo" in which OT believers had been kept prior to Christ's "harrowing" of hell (from Middle English *harwen*, "harry, rob [hell of the souls of the righteous]") between His death and resurrection. To symbolize their special fate, those who died in infancy unbaptized were buried in an unconsecrated area that lay within the churchyard.

The Reformers accepted the retributive purpose of hell and its eternal duration but had reservations about its nature. Luther, for example, rejected the terrifying portrayals by artists ("I think nothing of the picture of the artists," *WA*, xviii, 225f.), refused to speculate about the condition of the lost (*WA, Tischreden* 4, no. 3962), and, while he regarded hell as a place (*WA*, xix, 225f.), argued that its worst torments are fear, terror, and despair (*WA*, xii, 591). He also contended strongly that God did not want hell (*WA*, lii, 726f.) and that in its own way it will be "full of God and the highest good" (*WA*, vi, 127). Calvin agreed with Luther that corporeal images are figurative representations of hell and found its real dreadfulness in alienation from God's presence and experience of the never-ending effects of His wrath (*Inst.* iii.25.12). All the Reformers also rejected the limbo of infants; they did not see any absolute necessity of baptism for salvation and replaced it by the milder necessity of precept. The doctrine of predestination, however, gave a somber touch to the Reformed development of the doctrine of hell, since it carried the implication that, as God had prepared heaven to give an eternal display of His grace in and to the elect, so He had prepared hell to give an eternal display of His justice in and to the reprobate.

III. Modern Period.–The more detailed discussion of hell in seventeenth-century dogmatics led to the reinstatement of the idea of physical as well as moral or spiritual

penalties. Thus L. Riissen, who strongly opposed the idea of annihilation, argued for definite torments as well as the loss of the vision of God (*Francisci Turretini compendium theologiae didactico-elencticae* [Amsterdam, 1695], xviii, 20). He accepted degrees of punishment, but only in intensity, not in duration. J. H. Heidegger stated similarly that hell has a definite location (*Medulla theologiae christianae* [Zurich, 1696], xxvii, 52), and J. Cocceius believed that the pains of hell can be felt, though again to differing degrees (*Summa doctrinae de foedere et testamento Dei* [Amsterdam, 1648], xvi, 644). The Westminster Larger Catechism (q. 29) added "grievous torments in soul and body" to the chief penalty of "everlasting separation from the comfortable presence of God." Whether the fire of hell was itself material, however, was regarded as a debatable matter, e.g., by M. F. Wendelin (*Collatio doctrinae christianae* [Cassel, 1660], p. 510). (For a summary of these views, see Heppe, pp. 710-12.)

Eighteenth-century neology revived the universalistic thinking of Origen by virtually equating hell with purgatory. Impenitent and unbelieving sinners would be subjected to a process of education and purification, but this would not be eternal and would have final redemption as its goal. Schleiermacher (*Christian Faith*, § 163 Appendix) accepted this elimination of hell with his hope for a restoration of all human souls. During the 19th and early 20th cents. liberal Protestantism, while not wishing to minimize the importance or solemnity of personal decision, fairly consistently rejected the idea of eternal retribution, especially in a materialistic sense. Annihilationism also enjoyed a limited revival in some more orthodox circles that wished to maintain the idea of a definitive penalty but had difficulty with the concept of unending punishment; they thus equated hell with the extinction of being. Roman Catholicism and orthodox Protestantism, however, have generally continued to resist both the annihilationists with their dubious exegesis and the universalists with their dogmatic presupposition that God's love demands an ultimate restoration for all. They agree with patristic, medieval, and Reformation theologians that, according to biblical teaching, a final decision against God has an eternal and irreversible consequence. Since concepts of the nature of the resurrection body are less dogmatic now, attempts to portray hell in corporeal terms are usually more restrained. Nevertheless, the biblical unity of body and soul carries with it the undeniable implication that hell in some way affects the whole person.

HELLENISM. A term that may be used in various senses: it has sometimes been applied to the whole of distinctively Greek culture, including that of the days before Alexander the Great (336-323 B.C.); it is more commonly employed, however, of the civilization that spread through much of the ancient world in the wake of Alexander's conquests. We shall here use it in this latter sense.

I. Introduction
II. Greek Language
III. Cosmopolitanism
IV. Greek Science
V. Literature
VI. Philosophy
VII. Religion

I. Introduction.–Alexander's conquests covered an immense area and brought him sovereignty over many nations. He proposed to solve the problems of ruling so heterogeneous a group of people and bringing coherence into his empire by eschewing a narrow nationalism and imposing a culture that would transcend national boundaries, in which all people could be at home. Basically, this meant that the Greek way of life would be extended to the non-Greeks, but in the process there ensued an amalgam of Greek and non-Greek ideas, so that the resulting Hellenism was far from being purely Greek. Nevertheless, Greek culture dominated the whole, and the result is not unjustly called Hellenism.

Sometimes Greek influence concerned more or less surface matters like the wearing of Greek dress, or athletic contests modeled after the Greek games. Sometimes it penetrated deeply into the realms of religion and philosophy. Hellenism was all-embracing. Alexander encouraged a thorough mixing of the conquerors and the conquered by intermarriage. He himself set the example and many of his officers and men likewise married women from the conquered peoples. Alexander died too soon to be able to accomplish his aim, but the policy of hellenization lived on after him.

We should not understand this as an unwelcome policy ruthlessly enforced from above. Doubtless it was this in some cases, and it was in this way that the Jews, for example, encountered it. Yet even they used the language and accepted some of the ideas, although many of them rejected the religion and the immorality. On the whole, people eagerly welcomed Hellenism. The Greeks had notable scholars, artists, and scientists, and many were impressed by the superiority of the Greek achievement. Thus people everywhere were ready to learn the language and adopt the culture of the conquering Greeks. It became fashionable to adopt the latest Greek fads.

The small city-state of earlier days seems to have been at the basis of the greatest Greek achievements. At their highest and best, Greek art and thought have never been surpassed in the minds of many. Names like Plato and Phidias conjure up thoughts of an excellence of which any civilization might well be proud. The little city-states of ancient Greece produced a notable group of outstanding men. Curiously, this did not persist when Greece became one nation and developed into a mighty empire. But although the city-state produced the men and the ideas, it was by means of the empire that the ideas were effectively spread abroad among the greatest number of people. Many factors were involved, but we shall concentrate only on the following.

II. Greek Language.–This was a potent force in the whole process. It became fnown in most places, with the result that it became a kind of lingua franca. It was a great convenience for the first Christian missionaries that when they went abroad with the gospel they did not have to learn another language. All over the known world people were brought into contact with one another by the medium of the Greek tongue; a further advantage was that with Greek they had access to the treasures of Greek literature.

III. Cosmopolitanism.–To a questioner who asked to what country he belonged, Socrates is said to have replied, "I am a citizen of the world"; and Diogenes gave his adherence to the same concept when he called himself *kosmopolítēs*, "world-citizen." In the days of the city-state, people had tended to confine themselves largely to local affairs; but with the stirring of the pulses brought about by Alexander's conquests and the consequent contact with new lands and peoples, people began to look down on narrow nationalism and to cultivate an outlook on life that deserved the name "cosmopolitan." This did not mean that on occasion there might not be a concentra-

tion on purely local issues, but it did mean that merely local concerns were never allowed to dominate.

This caused trouble for "provincials" like the Jews and later the Christians. When people of every nation other than the Jewish found it quite possible to subject local customs and ideas to cosmopolitan ones, it was a mystery to cultured people why the Jews could not. Specifically, the Jewish and Christian refusal to conform to custom by accepting a mild form of idolatry did not make sense to the Hellenists, who did not take the gods very seriously and could not see why these provincials did. When we read of Jews or Christians who came into conflict with those who embodied the Hellenistic spirit we should not understand this as a purely local clash. Nor, at least as far as the Hellenists were concerned, was it a purely religious issue. For them it represented a conflict between a small group with a provincial outlook and many others who had a worldwide outlook. The cosmopolitans never could understand the obstinacy with which the provincials clung to their narrow outlook.

IV. Greek Science.–The Greek spirit of free inquiry found outlet in many directions, and the scientific contributions of the age were impressive. In astronomy, the Ptolemaic geocentric picture of the universe is noteworthy. In the pre-Ptolemaic period many Greeks had quite different ideas, some thinking of the earth as a sphere moving around the sun. R. H. Pfeiffer draws attention to the work of Aristarchus of Samos, who gauged the sun's volume to be three hundred times that of the earth. He concluded from this and other considerations that the earth rotates on its axis and moves around the sun (*HNTT*, p. 112). With the acceptance of the Ptolemaic system, people came to think of the earth as central to the universe and of the sun, moon, and planets as moving around it. Another notable scientific feat was that of Eratosthenes of Cyrene, who calculated the circumference of the earth at 252,000 stadia. This has been worked out as 39,681 km. (24,662 mi.), not so very far from modern measurements. The mathematical studies of Euclid and the discoveries of Archimedes in the physical sciences are so well known they hardly need mentioning. It was a period when people were discovering a great variety of things about their environment.

V. Literature.–People were not interested only in scientific endeavor, for the humanities thrived as well and literature was popular. Poets like Callimachus of Cyrene and Theocritus of Syracuse flourished, and some poets wrote on more or less scientific themes. Menander wrote widely acclaimed comedies.

Special mention should be made of the historians. Hellenistic historians did not understand their task in quite the same way as does the modern scientific historian, being more concerned with the dramatic and the sensational. The abbreviator of Jason of Cyrene, who produced 2 Maccabees, tells us in well-known words: "We have aimed to please those who wish to read, to make it easy for those who are inclined to memorize, and to profit all readers" (2 Macc. 2:25). This was the kind of thing at which many historians aimed, and the results were varied. Some were too concerned with the pleasant and let the claims of literary form override respect for the facts; others were too didactic. But the best of them produced valuable histories, e.g., Polybius, who is normally regarded as first-rate. Josephus is another whose history is both well known and valuable. We owe a good deal to the historiographers of the Hellenistic period, even if we must be on our guard against attaching too much weight to the propagandizing and the striving for dramatic effect that characterizes some of them.

VI. Philosophy.–Philosophy was, of course, a prime interest of cultured Greeks. The great traditions of Plato and Aristotle were continued, although perhaps the best-known school was that of the Stoics. Many were attracted by its solutions of metaphysical problems and by its offer of peace of mind. Others were followers of Epicurus, though one should bear in mind that in modern times his teaching has often been misrepresented. He taught that pleasure is the aim of life, but he did not conceive of pleasure in merely sensual terms, since he held that it is virtue that enables one to enjoy true pleasure. Other schools also flourished and philosophical views varied greatly, including some that were highly skeptical. It is clear that the Greeks of this age took great delight in wrestling with profound problems and in examining critically the solutions others put forward.

They were not, however, concerned with only purely theoretical issues. Many of them were profoundly interested in ethics and made every effort to promote virtue. One reason why some philosophers were not interested in religion was that the religions they knew did little to promote morality. It is true that the philosophers found it difficult to achieve the ethical standards they advocated, but at least they were concerned with getting people to lead good lives.

They taught people not to be dominated by their passions. Detachment was a necessary characteristic of the wise person, and it enabled him to rise above the promptings of his own lower nature. Many saw mankind as nothing but the plaything of a blind fate. But the philosopher did not allow himself to yield to despair, aspiring, rather, to a freedom of spirit that would enable him to rise above the circumstances of life.

VII. Religion.–The Hellenistic world had many religions, though some of the variety was mitigated by the tendency to regard a god worshiped in one place under one name as identical with another god worshiped elsewhere under another name. Thus the Greek Zeus was identified with the Roman Jupiter. Hellenistic religion is of perennial interest to the Christian, for some maintain that certain features of Christianity are derived from the Hellenistic religious environment. Traditional Greek religion, centering on the gods of Olympus, had little influence at this time, for the development of Greek thought had deprived the earlier myths of their credibility. This does not mean that nobody took the Olympian deities seriously; some people undoubtedly did, although for most people there was no dynamic, no conviction in the official cultus.

It was otherwise with the mystery religions. Some, like the Eleusinian mysteries, were Greek and ancient. But more typically, they were comparatively recent arrivals from the East that flourished when transplanted to the West. Not a great deal is known about the details of these cults, for the devotees vowed to keep secret what went on and the vows must have been quite well kept. It is known, however, that the members were put through a horrifying initiation, which led to an experience of peace. The adherents were given the promise of immortality. These cults had an enthusiasm and a vitality that was lacking in the official Olympian religion. Thus they made a wide appeal and were a witness to the unsatisfied longings of the human heart.

The Eleusinian mysteries go back to great antiquity and, while not strictly Hellenistic, are typical of much Hellenistic religion. They center on the spring rites with the thought of the deity dying and rising again. The ritual was accompanied by the myth that told of Persephone, the daughter of Demeter, being carried off to the under-

world by Hades, and of how eventually she was released for more than half of each year. Some of the other mysteries seem to have been of essentially the same type, such as those of Dionysus, Adonis, and Osiris, though each had its own variations. Thus the Dionysian rites were characterized by a wild ecstasy. Female devotees (the maenads) would be caught up in a supposedly divine frenzy in which they tore apart living animals and ate their bloody flesh.

Orphism was another religion with an air of wildness about it, though we should also notice that it had some interesting ideas about both heaven and hell. Probably the only other such religion we should notice is Mithraism. The worship of Mithras was of great antiquity in the East, but it did not become important in the Roman world until the 2nd cent. A.D. Mithras underwent many transformations during his long history, but at the time of his popularity in the West he appears to have been a sun god especially beloved by soldiers. It was the Roman legions who carried his worship everywhere. Associated with it was the *taurobolium,* a rite in which the initiate was placed in a pit covered with boards on which a bull was slain in such a manner that the blood flowed through and drenched the worshiper below. He believed that he thereby was filled with the strength and other qualities of the beast. Mithraism spread widely during the early centuries of our era and some scholars have seen it as a serious threat to Christianity. But it faded away before the reality and the vitality of the Christian faith.

Various Hellenistic religions contain parallels to Christian rites and teachings, which some of the Apostolic Fathers explained as parodies inspired by the devil. There is no reason for holding, as do some, that the Christians borrowed from the Hellenistic cults. While there is no reason why Christianity should not have taken over what was good from any source, the facts seem to show that Christianity was not inspired by the mysteries. It arose, rather, from the revelation made in the OT followed by the coming of the Son of God. Christianity brought people a real salvation, one accomplished by the Son of God Himself. The Hellenistic religions witness to the deep longings and needs of the human soul, but they cannot satisfy them. God in Christ does.

HELLENIST [Gk. *Hellēnistēs*]; AV GRECIANS; NEB "those of them who spoke Greek," "Greek-speaking Jews," "Gentiles." The word seems to derive not directly from *Hellēn,* but mediately through *hellēnizō,* by the addition of the termination *-tēs,* which denotes the doer of the action. Thus the word ought to point to one who practices or causes others to practice Greek ways (the causative force is often but not always present in such formations). There were many in the 1st cent. A.D. who tried to introduce Greek culture, so it is not difficult to see how the word might have come into use.

Unfortunately, however, we have no evidence that this conclusion from semantics accurately represents the historical facts. The situation is far from clear. The word "Hellenist" apparently was not used before its occurrence in Acts, where it is found three times (6:1; 9:29; 11:20; there is a textual problem in this last passage, where many MSS, and the RSV, read *Hellēnas,* "Greeks," instead of *Hellēnistas*; but most critics accept *Hellēnistas*). Since there are no previous examples we cannot appeal to a well-established sense. And when the word does begin to be used, its meaning seems indistinguishable from that of *Hellēn.* At a later time, then, the word meant "Greek," not "follower of Greek ways" or the like.

The big problem is the meaning of the term in Acts 6:1: "Now in these days when the disciples were increasing in number, the Hellenists murmured against the Hebrews because their widows were neglected in the daily distribution." Traditionally it has been held that the reference here is to Jews who were Greek-speaking, whereas "the Hebrews" were Jews who did not speak Greek. But in recent times it has often been pointed out that "Greek-speaking Jews" is a difficult way of taking "Hellenists," and one that is not elsewhere attested. It is also pointed out that "Hebrews" normally refers to Jews by race, not to people who spoke Hebrew. The inference is that "Hellenist" will have a corresponding meaning.

We should consider a number of possibilities.

(1) The traditional view may be supported in that up to this point Luke has said nothing about Gentiles being converted. The whole Church appears to be Jewish. If this is so, the natural way of distinguishing between "Hellenists" and "Hebrews" would be on the basis of Greek influence. The Hellenists would be those who spoke Greek and possibly had also imbibed something of the Greek outlook on life.

As evidence of this, when the difficulty arose, a committee of seven was set up, all of whom bear Greek names. One of them is called "a proselyte of Antioch" (Acts 6:5). Another, namely Stephen, had disputes in "the synagogue of the Freedmen" (Acts 6:9). This shows that they were Jews, and it seems natural to see in this synagogue one frequented by Greek-speaking Jews with both Stephen and his opponents belonging to the group.

(2) H. J. Cadbury argues powerfully for the view that "Hellenists" here must be taken to mean "Greeks." "Hebrews" is used outside this passage mostly in the sense "Jews" and we expect a corresponding meaning with "Hellenists." As we have already noted, when the word "Hellenist" appears in later writers it usually seems to mean much the same as "Greek." Cadbury meets the argument that Luke has thus far spoken only of Jews as members of the Christian movement by contending that he is not describing a straight line of development of Christianity from Jewish to Greek. Rather, Luke is showing that the acceptance of the gospel by Gentiles was a recurring phenomenon. Cadbury sees this as at least not contradicted by Acts 9:29 where the context does not demand conclusively any particular meaning. But to take the word in the sense "Gentiles" would give a suitable meaning, as it would show a prompt fulfillment of the prophecy that Paul would have a ministry to the Gentiles. In Acts 11:19f. Cadbury thinks the textual problem should be resolved in favor of *Hellēnistas* (*Hellēnas* has weaker attestation; transcriptional probability is also against it, for scribes would be more likely to alter the unusual word to the more usual one). He thinks the context shows that Jews cannot be meant, not even Greek-speaking Jews. The meaning "Gentiles" is demanded.

(3) Some have felt that the Hellenists were Jewish proselytes who had now become Christians. In favor of this is the fact that up to this point Acts has given no indication that Gentiles had joined the Christian Church; moreover, as already noted, at least one of the Seven was a proselyte. A division between proselytes and those who were

native-born Jews is held to be not unlikely. On the other hand, nowhere else do proselytes appear to be designated in this way.

(4) We know that there were groups in the early Church not unfairly called parties (e.g., in 1 Cor. 1). Some have thought that here we have evidence for the existence of a short-lived party, perhaps one which did not follow the Jewish way of life. This may be so, but the evidence cannot be said to be strong. "Hellenist" would be a natural correlative of "Judaist" or "Judaizer," but that seems as far as we can go. Of the same essential type is the view that the "Hellenists" were Christians of gentile origin in distinction from "Hebrews" who were Jews by race. Marcel Simon sees in them Jews who accepted Greek ways, or were thought to do so.

(5) F. F. Bruce favors the idea that the word is not used in any technical way but means simply "Greek-speakers" (*Acts of the Apostles* [2nd ed. 1952], p. 151). He thinks that the context will determine precisely what kind of Greek-speakers is in mind on each occasion. In Acts 6:1 it will probably mean Greek-speaking Jewish Christians, in Acts 9:29 Greek-speaking Jews in the synagogues, and in Acts 11:20 Gentiles. This might be supported by the fact that the verb *hellēnízō* normally seems to have been used in the sense "speak Greek" (cf. LSJ, *s.v.* Ἑλλην-). The natural meaning of the derived noun would accordingly be "Greek-speaker." Again, the word *Hellēnisti* refers to language and means "in Greek." It is formed independently of *Hellēnistēs*, but, as Cadbury points out, popular etymology might connect them.

From all this it is evident that the meaning of the term is far from clear. No one neat solution accounts for all the facts and excludes other views. On the whole it seems that the last-mentioned solution is most likely to be correct. The derivation of the word does make it look like "Greek-speaker." And this fits all the passages in Acts, especially when we bear in mind that rather diverse groups of people might well speak this language. It is a point in favor of this view that it does not demand that on every occasion the "Greek-speakers" be of the same national group. It is a weakness of the other views that they suit one context better than the rest.

HELM. *See* RUDDER.

HELMET. *See* WEAPONS OF WAR.

HELON hē'lon [Heb. *ḥēlōn*–'power'; LXX B *Chailón*]. The father of Eliab, the prince of the tribe of Zebulun (Nu. 1:9; 2:7; 7:24, 29; 10:16).

HELP [Heb. nouns *yᵉšûʿâ* (Ps. 3:2 [MT 3]), *ʿēzer*, *ʿezrâ*, *ʿezrāṯ* (Ps. 60:11 [MT 12]; 108:12 [MT 13]), *ṣᵉḏāqâ* ("righteous help," Ps. 71:24), *tᵉšûʿâ* (1 Ch. 19:12); Gk. nouns *boētheia* (He. 4:16), *epikouría* (Acts 26:22), *epichorēgía* (Phil. 1:19)]; [Heb. vbs. *ḥāzaq* (2 Ch. 29:34), *yāšaʿ* (2 S. 10:11), *nāšā* (Est. 9:3), *ʿāzaḇ* (Ex. 23:5), *ʿāzar* (Gen. 49:25), *pāqaḏ* (Ps. 106:4), *qārā'* (Ps. 59:4 [MT 5]); Gk. vbs. *antéchō* (1 Th. 5:14), *antilambánomai* (Lk. 1:54), *boēthéō* (Mt. 15:25), *syllambánō* (Lk. 5:7), *symbállomai* (Acts 18:27), *synantilambánomai* (Lk. 10:40; Rom. 8:26), *synypourgéō* (2 Cor. 1:11)]; **HELPED** [Heb. *yāšaʿ* (Ex. 2:17); Gk. *syllambánō* (Acts 18:27)]; **HELPFUL** [Gk. *symphérō* (1 Cor. 6:12)]; **HELPING** [Heb. *sāʿaḏ*; Aram. *sᵉʿaḏ* (Ezr. 5:2), *yᵉšûʿâ* (Ps. 22:1 [MT 2])]; **HELPLESS** [Heb. *pûn* (Ps. 88:15 [MT 16]), *rāpâ* (Jer. 6:24); Gk. *asthenēs* (Rom. 5:6), *rhíptō* (Mt. 9:36)]; AV also SUCCOUR, VISIT WITH SALVATION, SAVE, SUPPORT, etc.; NEB also SUPPORT, AID, DELIVER, PROTECTOR, DEFENDER, FRIEND, etc.

Hebrew *ʿāzar* can be used with a human subject (2 S. 8:5), but often it is used of God who gives "help" to a person. God assisted the Israelites in battle and Samuel called the place Ebenezer—"Hitherto the Lord has helped us" (1 S. 7:12). Ps. 124:8 affirms, "Our help [*ʿēzer*] is in the name of the Lord." Many of the psalms praise God, for He is the God who "helps" His people in a time of need.

Gen. 2:18 uses *ʿēzer* to speak of woman's relation to man. Since man should not be alone, God makes a woman to be his "helper" (AV "help"; NEB "partner"; *see also* FIT). Since the same word is applied to God, it seems clear that the reader should not infer that woman is inferior to man simply because the Bible calls woman a "helper." The term serves to underscore her function rather than delimit her status.

Another important Hebrew verb is *yāšaʿ*. Here again a person can be designated as the one who gives assistance to another person, but often the term is used to describe God's gracious assistance to people (Ps. 20:6 [MT 7]; 21:1, 5 [MT 2, 6]).

"Help" becomes such a characteristic word for God's gracious assistance to His people that even Heb. *ṣᵉḏāqâ* (God's righteous activity that saves) can be translated as "help" (Ps. 88:12 [MT 13]; 71:24; AV "righteousness").

A number of Hebrew words convey the idea of "cry out for help" (*zāʿaq*, *ṣāʿaq*) and "help" occurs in the translation of such terms (Jgs. 4:3; 6:6).

In the NT the Canaanite woman and the father of the epileptic boy ask Jesus for "help" (Gk. *boēthéō*, Mt. 15:25; Mk. 9:22, 24); the man of Macedonia asks Paul to "help" (*boēthéō*, Acts 16:9). The NT urges Christians to "help" others (Acts 20:35; 1 Thess. 5:14). On two occasions Paul speaks of the "help" of the Spirit. Phil. 1:19 affirms that the Spirit will give him "help," "support" (Gk. *epichorēgía*) and enable him to be delivered from prison. Rom. 8:26 states that the Spirit comes to the assistance of the weak. Mary sings a song in which she praises God and one of the things that she singles out is that God has "helped" Israel (Lk. 1:54).

The Epistle to the Hebrews encourages the Christian to rely on Jesus, for Jesus is one who is able to "help" those who are being tempted (2:18); He is a high priest in whom the Christian can find "help" in time of need (4:16).

See also *TDNT*, II, *s.v.* βοηθέω κτλ. (Büchsel).

P. L. BREMER

HELPER [Heb. *ʿāzar*] (Gen. 2:18, 20; 1 Ch. 12:18; Job 9:13; Ps. 10:14; etc.); AV also HELP; NEB also PARTNER, PROTECTOR, DEFENDER, ALLY, PARTISAN, BODYGUARD, "those who aided"; [Gk. *prostátis*] (Rom. 16:2); AV SUCCOURER; NEB GOOD FRIEND; [*boēthós*] (He. 13:6); [*diakonéō*] (Acts 19:22); AV "them that ministered"; NEB ASSISTANTS; [*antílēmpsis*] (1 Cor. 12:28); AV HELPS; NEB "ability to help others."

The OT terms for "helper" are all based on the Hebrew verb *ʿāzar*, a very general term for "help" or "succor." The purpose for the creation of woman is included in this concept: she is a "helper," i.e., a partner who corresponds to a man, in contrast to any animal (Gen. 2:18, 20). The Lord is the ultimate Helper (Ps. 30:10 [MT 11]; 54:4 [MT 6]; cf. He. 13:6).

In the NT the Lord is the source of *antílēmpsis*, the ability to be a helper to others in the Church (1 Cor. 12:28); note that this is one of the "gifts of the Spirit," and not an office. The cognate verb means to help in a general sense, and is used in both the NT and the LXX (cf. *TDNT*,

I, *s.v.* αντιλαμβάνομαι κτλ. [Delling]). Those who have proved themselves able assistants are commended to others in this role (Rom. 16:2). The term used in Acts 19:22 of Paul's "helpers" Timothy and Erastus is a participle based on *diakonéō*, a verb denoting personal service done out of a motive of love (cf. Lk. 22:26f., where the RSV renders the part. *diakonōn* as "one who serves").

See *TDNT*, II, *s.v.* διακονέω (Beyer).

R. J. HUGHES, III

HELPS. **1.** The AV translation of Gk. *antilḗmpseis* in 1 Cor. 12:28 (RSV "helpers"; NEB "ability to help others"). *See* HELPER.

2. The AV translation of Gk. *boḗtheiai* in Acts 27:17 (RSV "measures"; NEB "tackle"). The more technical term in this case is probably *hypozṓmata*. *See* SHIPS III.

HELVE (Dt. 19:5, AV). *See* HANDLE.

HEM. In the RSV "hem" occurs as a verb only in Lk. 19:34, "your enemies will hem you in on every side" (Gk. *perikyklóō*; AV "compass thee round"). For the classic instance of the term in the AV of Mt. 9:20, *see* FRINGES; GARMENTS X.

HEMAM hē'məm [Heb. *hêmām*] (Gen. 36:22). The AV and NEB rendering of HEMAN. *See also* HOMAM.

HEMAN hē'mən [Heb. *hêmān*–'faithful'].

1. A musician and seer, Levite, son of Joel and grandson of the prophet Samuel; of the family of the Kohathites (1 Ch. 6:33), appointed by David as one of the leaders of the temple singing (1 Ch. 15:17; 2 Ch. 5:12). He had fourteen sons (and three daughters) who assisted their father in the chorus. Heman seems also to have been a man of spiritual power; he is called "the king's seer" (1 Ch. 25:5; 2 Ch. 35:15).

2. One of the noted wise men prior to, or about, the time of Solomon. He was one of the three "sons of Mahol," a guild of temple singers or dancers (1 K. 4:31 [MT 5:11]); also called a son of Zerah (1 Ch. 2:6).

Psalm 88 is inscribed to Heman the Ezrahite, who may have been the leader of a musical guild during the monarchy.

3. A Horite descendant of Esau (Gen. 36:22). He is called HOMAM in 1 Ch. 1:39.

HEMATH hē'məth (AV 1 Ch. 2:55; Am. 6:14). *See* HAMATH (Am. 6:14); HAMMATH **1.**

HEMDAN hem'dən [Heb. *ḥemdān*–'pleasant' (?)]. A descendant of Seir, the Horite (Gen. 36:26). In 1 Ch. 1:41 the name occurs as "Hamran" (AV, NEB, AMRAM).

HEMLOCK. *See* POISON; WEEDS **2**; WORMWOOD.

HEMORRHAGE [Gk. *pēgḗ toú haímatos*] (Mk. 5:29); AV "foundation of her blood"; [*haimorroéō*] (Mt. 9:20); AV "issue of blood"; **FLOW OF BLOOD** [*rhýsis toú haímatos*] (Lk. 8:43f.); AV "issue of blood." In the three parallel accounts of the story of the woman whose hemorrhage Jesus healed we find three different terms. Each of these is the equivalent of a corresponding phrase in the LXX. Mk. 5:29 has its parallel in Lev. 12:7, which deals with the normal secretions connected with childbirth; Mt. 9:20 has its parallel in Lev. 15:33, which deals with abnormal secretions unrelated to either childbirth or menstruation (gonorrhea?); and Lk. 8:43f. has its parallel in Lev. 15:19, which involves menstruation, and v. 25, which again involves neither childbirth nor menstruation and is abnormal. Most probably the woman healed by Jesus was troubled by a uterine fibroid that resulted in her hemorrhaging for twelve years.

The woman was burdened not only physically and financially (cf. Mk. 5:26) but religiously as well, because during those twelve years she was ceremonially unclean and made anyone unclean who associated with her (cf. Lev. 15:25). Perhaps this is why, in part at least, she was afraid (Mk. 5:33) for having touched Jesus.

R. H. STEIN

HEN hen [Heb. *ḥēn*–'favor']. In Zec. 6:14 the AV, following the MT, reads "And the crowns shall be to Helem . . . and to Hen the son of Zephaniah." But as this person is called Josiah in v. 10, the RSV and NEB (following the Syriac) read "Josiah." *See* JOSIAH **2.**

HEN. *See* CHICKEN.

HENA hen'ə, hē'nä [Heb. *hēna'*; Gk. *Ana*]. One of the Syrian cities captured by Sennacherib and given as a warning of the coming fate of Jerusalem (2 K. 18:34; 19:13). Its location remains unknown, but evidently it was near the north Syrian provinces of Arpad and Hamath.

Cheyne (*EB*, *s.v.*) rejected a geographical connotation, "Hena and Ivvah," in favor of the translation "He has driven away and overturned" (so Tg.; cf. J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 677 n. g). This "witticism" (as he calls it) does not easily fit the context, but is preferable to Hommel's view that these are pagan deities (*Expos.T.*, 9 [1897/98], 330).

Isaiah quotes from this same message of the Assyrian king, thereby confirming the existence of the places mentioned, including Hena (Isa. 37:13). A. H. LEWIS

HENADAD hen'ā-dad [Heb. *ḥēnāḏāḏ*–'favor of Hadad'; LXX *Hēnaad, Hēnadad, Hēnadab, Hēnalab* (Ezr. 3:9; Neh. 3:18, 24; 10:9). One of the heads of the Levites in the postexilic community.

HENNA [Heb. *kōper*; Gk. *kýpros*] (Cant. 1:14; 4:13); AV CAMPHIRE. The henna plant, *Lawsonia inermis* L., originally grown in northern India. The pulverized leaves had a cosmetic use, as attested by the orange-colored nails, palms, and fingertips of some Egyptian mummies. A reference to Hebrew disapproval of this custom is seen in Dt. 21:11f.

In Cant. 7:11 (MT 12) the NEB reads "henna-bushes" (so KoB), while the other English versions and the LXX translate "villages" (so BDB). R. K. H.

HENOCH hē'nək [Heb. *ḥ^{a}nôḵ*].

1. AV in 1 Ch. 1:3 (RSV, NEB, ENOCH). *See* ENOCH **2.**

2. AV in 1 Ch. 1:33 (RSV HANOCH; NEB ENOCH). *See* HANOCH **1.**

HEPHER hē'fər; **HEPHERITES** hē'fer-īts [Heb. *ḥēper, ḥeprî*].

1. LXX *Hopher* (Nu. 26:32f.; 27:1; Josh. 17:2f.); the head of a family or clan of the tribe of Manasseh. The clan is called the Hepherites in Nu. 26:32.

2. LXX *Hēphal* (1 Ch. 4:6); a man of Judah.

3. LXX *Hopher* (1 Ch. 11:36); one of David's heroes. Note that the parallel text in 2 S. 23:34 differs substantially; one or both may be corrupt.

HEPHER hef'ər, hē'fər [Heb. *ḥēper*]. A Canaanite town, listed between Tappuach and Aphek, whose king Joshua defeated (Josh. 12:17). The "land of Hepher" is men-

tioned with Socoh (Shuweikeh, 3 km. [2 mi.] N of Tulkarm) and Arubboth (ʿArrābah, 19 km. [12 mi.] NE of Tulkarm) in one of Solomon's districts, under the direction of Ben-hesed. (Hepher may also be mentioned with Arubboth in one of the Samaria ostraca; cf. R. Dussaud, *Syria*, 6 [1925], 314-338.) Thus it is usually located in the northern area of the Plain of Sharon, although its precise location is uncertain. Some have suggested Hafireh, about 3 km. (2 mi.) E of Arubboth, or Tell Ibshar, about 13 km. (8 mi.) W of Tulkarm.

See J. Gray, *I & II Kings* (*OTL*, 2nd ed. 1970), p. 137.

HEPHZIBAH hef'zi-ba [Heb. *ḥepṣî-bāh*–'my delight is in her'].

1. LXX *Hopseiba, Hapseiba, Hophsiba*; the wife of Hezekiah and the mother of Manasseh (2 K. 21:1).

2. The new name of Zion (Isa. 62:4, AV, NEB, RSV mg.); LXX translates Gk. *thélēma emón*, "my delight" (cf. the RSV).

HERALD [Heb. *mᵉḇaśśēr*] (Isa. 40:9; 41:27); AV "(one) that bringeth good tidings"; NEB "(one) who brings good news" (Isa. 40:9); "defending counsel" (Isa. 41:27); [Aram. *kārôz*] (Dnl. 3:4); [Gk. *kḗryx*] (2 Pet. 2:5); AV, NEB, PREACHER.

Hebrew *bāśar* (root of *mᵉḇaśśēr*) is related to Ugar. *bšr* and Akk. *bussuru/passuru*. In the majority of cases in all three languages, the roots mean to "bring good news." Oppenheim argues that the Akkadian term carries the neutral sense "bring a message," regardless of content (cf. *TDOT*); however, the research of Fisher supports the positive, rather than the neutral, connotation of the term. The eschatological significance of the Isaianic passages finds inaugural fulfillment in the coming of the kingdom with the good news of Christ's advent (note the LXX translation of *bāśar*, i.e., *euangelízō*; cf. Mk. 1:14).

The Aram. *kārôz* was once thought to be derived from the Gk. *kḗryssō*. However, Nuzi legal documents (*ca.* 1500 B.C.) contain the Hurrian *kirezzi*, meaning "proclamation." This proclamation was required for proper legal status and sheds light on the binding nature of the declaration in Dnl. 3:4-6.

The idea that Noah preached (cf. 1 Tim. 2:7) to his generation finds support in both Jewish (Josephus *Ant.* i.3.1) and early Christian (1 Clem. 7:6) tradition. However, if *dikaiosýnēs kḗryka* (2 Pet. 2:5) is not an objective genitive (as Dalton suggests), then the translation becomes "righteous herald," referring to Noah's personal character rather than the character of his preaching (cf. Gen. 6:9).

See GOOD NEWS.

Shaffer, *Orientalia*, 34 (1965), 32-34; W. J. Dalton, *Christ's Proclamation to the Spirits* (1964); *TDOT*, II, *s.v.* "bśr" (Schilling).

J. T. DENNISON, JR.

HERB; HERBAGE [Heb. *ʿēśeḇ* (Gen. 2:5; Dt. 32:2; Prov. 27:25; Isa. 42:15; Jer. 14:6), *ʾōrâ* (2 K. 4:39), *deše'* (Ps. 37:2), *yārāq* (Prov. 15:17); Gk. *láchanon* (Lk. 11:42)]; AV also GRASS (Dt. 32:2; Jer. 14:6); NEB also PLANT (Gen. 2:5), YOUNG PLANT (Dt. 32:2), VEGETABLES (Prov. 15:17), GREEN GROWTH (27:25), etc.

The RSV normally has "plants" or "grass" for Heb. *ʿēśeḇ* (cf. Akk. *išbabtu*) but translates "herb" in a few instances. Heb. *yārāq* (cf. Akk. *arqu*) indicates vegetables or greens (cf. RSV in Dt. 11:10; 1 K. 21:2; NEB in Prov. 15:17). Heb. *deše'* is usually "grass" in the RSV. Many biblical words for vegetation are of uncertain designation (cf. *MPB*, pp. 251-54).

AV references to herbs in Isa. 18:4; 26:19 have been altered in later versions. Mt. 13:32, RSV, has "shrubs."

See also BITTER HERBS (Ex. 12:8; Nu. 9:11); FLORA; GRASS.

R. K. H.

HERCULES hûr'kū-lēz [Gk. *Herakles*] (2 Macc. 4:19). The Greek god honored by games every five years in Tyre. The Greek name was used for the ancient Tyrian deity Melqart (cf. Josephus *Ant.* viii.5.3 [146]).

HERD. *See* CATTLE.

HERDSMAN [Heb. *rōʿeh*] (Gen. 13:7f.; 26:20; 1 S. 21:7); AV HERDMEN; NEB also SHEPHERDS; [*bôqēr*] (Am. 7:14); AV HERDMAN; [*šāḇeṭ*–'herdsman's staff'] (Lev. 27:32); AV "rod"; NEB "counting rod"; [Gk. *bóskontes*] (Mt. 8:33; Mk. 5:14; Lk. 8:34); AV "they that kept them," "they that fed the swine"; NEB "the men in charge of them." One who attended to the needs of any domesticated flocks of animals. He was responsible for their general well-being and was thus important in the kind of pastoral economy reflected in the OT. While the owner of flocks or herds might well have exercised a general oversight of the animals, the herdsman did the bulk of the work and was usually hired for that purpose. Heb. *nôqēḏ* occurs twice in the OT, once to describe Amos as a "shepherd" (Am. 1:1; AV "herdman"; NEB "sheep-farmer"), and once in reference to Mesha of Moab (2 K. 3:4) as a "sheep breeder" (AV "sheepmaster"). On the basis of Ugaritic and Akkadian evidence, Scandinavian scholars have thought that *nôqēḏ* was an official priestly or cultic title. While this might have been true of Mesha, it certainly was not of Amos, as he himself made clear.

R. K. H.

HERES hē'rēz, hē'res.

1. [Heb. *har-ḥeres*–'mountain of the sun'] (Jgs. 1:35); RSV HAR-HERES. A place from which the Danites failed to expel the Amorites. It is here associated with Aijalon and Shaalbim, which in Josh 19:41 (Shaalabin) are associated with Ir-shemesh. Since *heres* is a rare Hebrew word for "sun," the commoner word being *šemeš*, it is believed that Har-heres and Ir-shemesh are identical and refer to the well-known border fortress of BETH-SHEMESH, Heb. *har* ("mount") perhaps being a copyist's error for Heb. *ʿîr* ("city"). Other possibilities are Bain Harasheh, NE of Aijalon, and Bit Ninib of the Amarna Letters (Ninib being the fierce morning sun).

2. [Heb. *maʿᵃlēh heḥāres*, "the ascent of Heres"] (Jgs. 8:13). A place where Gideon turned back from pursuing the Midianites. The AV reads "before the sun was up." The presence of the article before *ḥāres* is slightly against its being a proper name; however, *maʿᵃlēh* elsewhere means the path ascending a hill, not the sun's path. If a place, Heres should lie E of the Jordan; but its site is unknown.

3. [Heb. *ʿîr haheres*] (Isa. 19:18). *See* CITY OF THE SUN.

F. WEDDLE

HERESH her'esh [Heb. *ḥereš*; LXX B, Gk. *Rharaiēl*; A, Gk. *Hares*]. A Levite among the returning exiles in 1 Ch. 9:15; he is not listed in the parallel Neh. 11:15f.

HERESY [Gk. *haíresis* < *haírein*–'take,' mid. 'select']. The term has three meanings in classical Greek: "seizure" (e.g., of a city); "choice" or "selection"; "resolve" or "effort directed to a goal." In Hellenism it acquired the related senses of "teaching" and "school." In the latter sense it came to be used of the philosophical schools, i.e.,

the groups that in a larger society follow the teachings of particular leaders in distinction from others.

I. Judaism.–In the LXX *haíresis* was still employed in the original sense of choice at Gen. 49:5. Philo, as one might expect, used the term for the philosophical schools of the Greek world. Josephus reapplied it, however, by speaking of the "heresy" of the Essenes and the three religious "heresies" of the Essenes, Sadducees, and Pharisees (*Ant.* xiii.5.9 [171]). So far, of course, the word had the neutral sense of a party with distinctive emphases and concerns. The rabbis of the time used the Hebrew equivalent in the same way. By A.D. 100, however, they began to reserve it for divergent movements and by A.D. 200 non-Jewish groups, especially Christians and Gnostics, were particularly in view.

II. NT.–For the most part *haíresis* has in the NT the same meaning as in Josephus. Acts 5:17 speaks of the school or party of the Sadducees and 15:5 of that of the Pharisees. Paul in 26:5 claimed to belong to "the strictest party of our religion," that of the Pharisees. Christianity itself was at first regarded as a sect or party in Judaism. Thus Paul in 24:5 is called "a ringleader of the sect of the Nazarenes," obviously in this instance a group that was viewed with disfavor. Paul himself seemed not to accept this designation in 24:14: "According to the Way, which they call a sect, I worship the God of our fathers." The term was also used unfavorably by the Jewish leaders in Rome: "For with regard to this sect we know that everywhere it is spoken against" (28:22).

Within the Church itself the term had from the very first a pejorative nuance. Paul in Gal. 5:20 put *haíresis* on his list of works of the flesh. It is unlikely that the word has a technical meaning here; "party spirit" (RSV) is probably what Paul had in mind. In 1 Cor. 11:19 the heresies seem to correspond to the "dissensions" of 1:10ff. and the "divisions" of 11:18 (both Gk. *schísmata*). They represent "factions" which are totally incompatible with the one being of the community; their only function is to bring the genuine members to recognition. The heresies of 2 Pet. 2:1 are more serious than ordinary divisions because they involve divergent teachings insidiously introduced by false teachers. The idea of incompatibility of opinion is thus added to that of faction and the term is well on the way to the technical sense it acquired in Christian history. In Tit. 3:9-11 the heretic, i.e., the person who "is factious," engaging in controversies and dissensions, is to be admonished twice and then, if stubborn, shunned by the community as perverted, sinful, and self-condemned.

III. Early Church.–The Christian writers of the first two centuries (e.g., Justin *Dial.* 82.3) could still use the term "heresies" for philosophical schools and Jewish parties. Nevertheless, they had an awareness that there is no place for parties in the Church, especially when those parties are not just schismatic but also hold divergent opinions under private and unauthorized leadership. Ignatius (Eph. 6:2) and Justin (*Dial.* 51.2) made this clear.

It is thus that the word finally undergoes the change of meaning that makes it a technical term in Christian history. The original sense may still be glimpsed, for heresy arises when a party develops around a particular leader (self-willed and possibly self-appointed) whose divergent opinion opposes some common teaching of the Church. The offense of heresy is threefold. (1) It represents an individualistic choice; (2) it diverges from basic teaching; (3) it repudiates the very being of the Church as not just an aggregate of parties but as the one body of the one Lord with one faith and one Spirit (cf. Eph. 4:4ff.).

IV. Christian Heresies.–As one might expect, over hundreds of years of Christian history divergent views have been held on almost all the Church's teachings. Only where these views have been actively promoted, however, have heresies arisen. To list all these would be tedious and unprofitable. Accounts of early heresies may be found in the *Panarion* of Epiphanius (4th cent.) and Book II of the *Fount of Divine Wisdom* of John of Damascus (8th cent.). All that will be attempted here is to indicate some of the more serious heresies in the successive historical periods.

A. Early Heresies. Apart from the Judaizing movement, Gnosticism posed the first heretical threat to Christianity. Incipient forms of Gnosticism appeared in the NT itself but the movement reached its peak in the 2nd century. Its general teachings included separation of the true God from the Creator, dualism of soul and body, denial of the bodily reality of Christ, and redemption of the soul alone, not the whole person. Marcionism, a distinct but related movement, opposed the NT God of grace to the OT God of retribution and rejected the OT canon.

Trinitarian and christological heresies entered the picture from the late 2nd century. In defense of the divine monarchy Adoptionists viewed Jesus as a man adopted to deity, Subordinationists arranged the divine persons in a descending hierarchy, and Modalists or Sabellianists treated Father, Son, and Holy Spirit as economic (revelational), not essential, modes of the one God, so that Patripassianists could say that the Father no less than the Son suffered on the cross.

In the 4th cent. Arianism insisted that Christ, while preexistent, was created. Semi-Arians resisted the consubstantiality of Father and Son. Macedonians, or, more accurately, Pneumatomachians, applied the same type of thinking to the Holy Spirit. In contrast, Apollinarianism, believing that the Logos replaced the rational soul in Jesus, truncated his full humanity. All these teachings were condemned at Constantinople in 381.

The Nestorians in the 5th cent. were accused of teaching two persons as well as two natures in Christ and consequently of denying the title *theotokos* (God-bearer) to the virgin. The Eutychians and Monophysites went to the opposite extreme and found only one nature as well as one person. Later the Monothelites tried a compromise and found only one will even though there might be two natures. The councils at Ephesus (431), Chalcedon (451), and Constantinople (681) excluded these deviations.

Dualism, revived in the 4th cent. by the Manichaeans, formed the first anthropological heresy. Speculations about the preexistence and transmigration of souls could be found in Origen. As originally presented, these hardly had the status of heresies, but they came under formal condemnation in the 6th century. Origen also suggested universalism and was followed at this point by Gregory of Nyssa, although again it was taught more as a possibility than a divergent doctrine. In the 5th cent. Pelagianism, while well-intentioned, took a heretical turn when it denied original sin and argued for freedom to live a righteous life and thereby to attain salvation without the divine forgiveness in Christ. After some vacillation, the Church rejected it at Ephesus in 431. The mediating movement known as Semi-Pelagianism, which tried to retain some initiative for mankind, failed to establish itself and was condemned a century later at the Council of Orange (529).

Differences on charismatic and disciplinary matters produced three important schismatic movements, Montanism, Novatianism, and Donatism, in the 2nd, 3rd, and 4th centuries. In relation to the main credal articles these were not heretical. Nevertheless, the Montanists were rejected for erroneous views on prophesying and ascetic practice, the Novatianists and Donatists for separatist

concepts of the Church, and the Donatists for failure to accept the validity of acts of ministry performed by real or suspected apostates and those ordained by them. Divergent groups also arose on many minor issues. Thus the Aquarians were condemned for using only water at the Lord's Supper and the Cataphrygians for baptizing the dead.

B. Medieval Heresies. In the Western Church the centralizing of ecclesiastical power in the papacy brought all divergent groups under the risk not only of dogmatic condemnation but also of physical repression. Anathemas were exchanged between East and West over the question whether the Holy Spirit proceeds from the Father alone or also from the Son. By the 11th cent. a papal document proclaimed exclusion from salvation for anyone not in communion with the see of Rome. The same century saw the harsh treatment of Berengarius for his rejection of a bodily presence of Christ in the eucharistic elements. In the 13th cent. the Albigenses no doubt merited their condemnation as heretics because of their Manichaean tendencies, although this was no excuse for their brutal suppression. The Waldenses, in contrast, seem not to have denied traditional doctrines but simply to have resisted such later accretions as purgatory, invocations, and transubstantiation. Similarly the Wycliffites and Hussites in the 14th and 15th cents. were condemned only for their rejection of new dogmas and their opposition to papal authority and ecclesiastical abuses. Perhaps the only substantial charge against Wyclif is that like the Donatists he argued that bad priests cannot perform valid acts of ministry.

From the standpoint of the reforming "heretics" of the Middle Ages, the Western Church itself had adopted many heretical teachings which formed no part of basic Christian doctrine. Thus the concepts of papal primacy, purgatorial expiation, eucharistic sacrifice, and the treasury of merit might all be regarded as innovative heresies. Notwithstanding their lack of apostolic foundation or sanction, these ideas had been given the status of official dogmas. Certainly the older orthodoxy had been retained intact, but a new heterodoxy had now been added to it. Lacking ecclesiastical force, the reforming movements could not have these new doctrines officially declared heretical. Indeed, their own opposition received the heretical label. Nevertheless, the opposition arose because medieval developments brought the official Church itself under the charge of promoting new and serious heresies.

C. Reformation Heresies. The upheavals of the 16th cent. brought to the surface new or renewed teachings which came under general condemnation. The revolutionary millennialism of certain Anabaptists provides a clear example. So, too, does the odd christological view of Menno Simons that Christ did not take flesh from the Virgin. At more central points Servetus championed unitarianism, and the rationalistic Socinians departed from orthodoxy in relation to Christ's person and work.

From the Roman standpoint the Reformers were also guilty of teaching heresies. Individual Reformers were excommunicated and in some cases (e.g., Ridley and Cranmer in England) exterminated. The Council of Trent (1545-1563) anathematized their teachings, e.g., on Scripture, justification, and the eucharist, although in its positive statements it left some room for freedom of interpretation. Lutheranism, Zwinglianism, Calvinism, Anglicanism, and Anabaptism all took on the rank of new heresies according to the Tridentine understanding.

For their part the Reformers viewed the Tridentine formulations and the underlying medieval teachings as the real heresies, as may be seen in Calvin's *Antidote* or Jewel's *Apology.* Roman Catholicism, as distinct from the true catholicism which it had changed and distorted by addition, represented the real departure from the faith that had to be resisted and corrected. In particular it evaded the authority of Scripture, misunderstood justification, and promoted nonapostolic inventions in such questions as baptism, the eucharist, penance, purgatory, and papal primacy.

Differences between the Reformers, especially the Lutherans and Calvinists, led to a confused situation in which charges and countercharges of heresy were exchanged. Specific points at issue were the eucharistic presence, the related christological understanding of the communication of the attributes of the two natures of Christ, and the nature of election. All the main groups combined, however, to resist the spiritualism of Carlstadt and Franck, the antinomianism of Agricola, and the teaching of Osiander concerning justification by infused righteousness.

D. Modern Heresies. Within the post-Reformation churches various movements appeared which came to be stigmatized as heretical. Roman Catholicism moved against the strong Augustinianism of the Jansenists and the passivity of the Quietists in the 17th cent., against the suspected dangers of "Americanism" in the 19th cent., and against the liberal teachings of the Modernists (Loisy, Tyrrell) in the early 20th century. Those who would not assent to papal infallibility in 1870 were also ejected. In the Reformed churches Arminianism was condemned by the Synod of Dort in 1618-1619, although many Protestants would not regard Arminianism as heretical. Anglicanism in the 17th cent. opposed not only Puritanism but secondary groups like the Seekers, Levelers, and Quakers, although there was no formal dogmatic condemnation and coexistence with the Presbyterians, Congregationalists, and Baptists began by the end of the century. In twentieth-century Germany the so-called German Christians, who attempted a compromise with National Socialist (Nazi) doctrines, earned the unofficial theological anathemas of the Declaration of Barmen (1934).

When Roman Catholicism added three important dogmas, Protestants generally could only resist them as new and erroneous accretions. Two of these belonged to the sphere of Mariology: the Immaculate Conception of the Virgin (1854) and her bodily assumption (1950). The third was a declaration of papal infallibility in official pronouncements on faith and morals (1870).

On a broader front liberal Protestantism, of which Modernism was the Roman Catholic counterpart, has been considered by many the great heresy of the modern age. This comprised, and comprises, many individual heresies which it would be unprofitable to list in detail. Neither as a whole nor in detail has liberal Protestantism been generally defined as a heresy by the leading Protestant churches, although Barth explicitly treated it as such in his *Church Dogmatics.* Nevertheless, since many of its tenets revive ancient heresies, the movement as such, from the standpoint of biblical and apostolic orthodoxy, may plainly be viewed as heterodox.

Various sectarian forms or offshoots of Christianity have been considered modern heresies. Among these are Shakerism, Swedenborgianism, Mormonism, Christian Science, Jehovah's Witnesses, and perhaps the Unification Church. The Christianity of some of these groups is very tenuous. Nevertheless, to the extent that they have Christian sources or connections they come within the broader definition of heresy. Nor do they bear less likeness to authentic Christianity than the Gnostic sects of the early period or many liberal Protestant groups or schools that are contemporary with them.

HERETH, FOREST OF hē'rəth, hər'əth [Heb. *yaʿar ḥereṭ*–'forest of Hereth'; Gk. *pólis Sarich*–'city (of) Sarich']; AV, NEB, FOREST OF HARETH. The place where David went after the prophet Gad warned him to leave Mizpeh of Moab and return to Judah (1 S. 22:5). According to Grollenberg (*GAB*, p. 152) it is between Adullam and Giloh but the basis for this location is not given. Abel (*GP*, II, 343) locates it near Kharās (*ḥarās*), a hamlet about 11 km. (7 mi.) NW of Hebron near Khirbet Qila (Qᵉʿila); however, the equation of Heb. *ḥereṭ* with Arab. *ḥarās* is phonemically unlikely. The LXX reads "into the city Sarich," which is similar to Josephus's "into the city of Saris" (*Ant.* vi.12.4 [249]). The derivation of "Sarich" from "*Ḥarās*" requires a reversal of the consonants *ḥ*, *r*, and *s*, and since the equation of "*Ḥarās*" with Heb. *ḥereṭ* is doubtful, the identification of the forest of Hereth with the city of Sarich/Kharās is far from convincing. *See* ADULLAM. W. S. L. S.

HERETIC. The term is used by the AV and NEB in Tit. 3:10 for Gk. *hairetikós*. The RSV, with "factious," is probably closer to the intent of the passage. The Greek term refers to an agitator who creates divisions and parties. *See* FACTIONS; HERESY.

HERITAGE [Heb. *naḥᵃlâ* (Dt. 9:26, 29; 32:9; Josh. 18:7; etc.), *naḥᵃlāṯ* (Ps. 16:6), *nāḥal* (Ps. 119:111; Jer. 3:18), *yᵉrušŝâ* (Ps. 61:5 [MT 6]); Gk. *klēronoméō* (Rev. 21:7)]; AV also INHERITANCE, INHERIT (Rev. 21:5); NEB POSSESSION, PORTION, SHARE, INHERITANCE, PATRIMONY, etc. That which is passed down to descendants or succeeding generations, distinguished from "inheritance" in that "heritage" frequently refers to things other than property (e.g., traditions), while "inheritance" is used especially of property. The RSV makes no such distinction. *Naḥᵃlâ* denotes any sort of inherited possession; usually the reference is to land, a people, or material goods. In Ps. 136:21f. "heritage" is used of the land transferred by Yahweh from the Canaanites to Israel. Frequently Israel is spoken of as the heritage of the Lord (Dt. 9:26, 29; 32:9; 1 S. 10:1; etc.). *See* INHERIT.

HERMAS her'məs [Gk. *Hermas*]. One of the recipients of greetings in Rom. 16:14, otherwise unknown. Attempts to identify him with the author of the Shepherd of Hermas are unfounded.

HERMAS, THE SHEPHERD OF. *See* APOSTOLIC FATHERS IX.

HERMENEUTICS hûr-mə-nōō'tiks. *See* INTERPRETATION.

HERMES hûr'mēz [Gk. *Hermēs*].

1. A Greek god, son of Zeus and Maia, called "Mercury" by the Romans. In Greek mythology he functioned primarily as the attendant, herald, and interpreter of the gods. He was the god who conducted the souls of the dead to the underworld. Like his half brother Apollo, Hermes was celebrated as a skilled musician, being credited with the invention of the lyre and the pipes of Pan, and also as an athlete. He was popular as the patron of orators and the protector of travelers. Known as the god of gain — whether honest or dishonest — and renowned for his trickery, he was the patron of both merchants and thieves. His symbols were the caduceus, winged shoes, and purse. The caduceus was a golden rod he used as the shepherd-god who protected sheep and cattle. Though he played many roles in Greek mythology, in the cult he functioned primarily as a god of fertility, as is evidenced by the ithyphallic images erected to represent him. *See also* RELIGIONS OF THE BIBLICAL WORLD: GRECO-ROMAN.

Statue of Hermes found at Nineveh (State Antiquities Organization, Republic of Iraq)

In Acts 14:12 Paul is said to have been identified with Hermes because he was "the chief speaker." It was therefore to Hermes' character as the divine herald and god of oratory that the Lycaonians were referring. The people of Lystra were apparently familiar with the popular legends in which Zeus and Hermes had "come down . . . in the likeness of men" (v. 11) to their district; cf. the legend of Baucis and Philemon (Ovid *Metamorphoses* viii.611ff.). *See also* ZEUS.

2. The name of a Roman Christian, otherwise unknown, to whom Paul sent greetings (Rom. 16:14).

HERMOGENES hûr-moj'ə-nēz [Gk. *Hermogenēs*–'born of Hermes'] (2 Tim. 1:15). A Christian mentioned by Paul as having, along with Phygelus and "all who are in Asia," turned away from him. It is not clear when or where the defection of these Asiatic Christians from the apostle took place, whether it was at Rome at the time of Paul's second imprisonment there, and especially on the occasion of his being brought before the emperor's supreme court to be tried on a charge now involving the death penalty, or whether it was at some previous time in Ephesus.

If it was the latter, then Paul here wishes to inform or remind Timothy of how in Ephesus, where Timothy was the presiding minister of the church, these persons had turned away from him, i.e., had refused to submit to his authority and had rejected the Christian doctrine which he taught. Some expositors believe this to be the probable signification because the verb, Gk. *apestráphēsan*, "they turned away," is in the aorist tense, referring to a time long past.

On the other hand, there is no evidence that there ever was a time when "all who are in Asia" turned away from obedience to Paul. Whatever may have been the disloyalty and disobedience of individuals (and this certainly existed; see, e.g., Acts 20:29f.), the NT does not show that all who were in Asia — the Christian community as a whole in Ephesus, Miletus, Laodicea, Hierapolis, Colossae, and other places — repudiated his apostolic authority. If these words refer to all the Christians from the province of Asia who happened to be in Rome at the time of Paul's second imprisonment there, it can easily be understood that they should turn away from him at that testing time. It is impossible to say exactly what form their desertion of the apostle assumed. Their turning away would likely be caused by fear that they might be involved in the same imprisonment as had overtaken him, and probably also in the same death penalty.

It is altogether in favor of a reference to Rome that what is said about Phygelus and Hermogenes is immediately followed by a reference to the great kindness shown by Onesiphorus in diligently seeking out the apostle in Rome. On the whole, therefore, a reference to Asians who had accompanied Paul to Rome and then deserted him seems most probable. J. RUTHERFURD

HERMON hûr'mən, **MOUNT** [Heb. *har ḥermôn* < *ḥāram*–'devote']. The highest peak of the Anti-Lebanon Mountains, marking the southern end of that range. *See* Plate 21.

This majestic mountain has three peaks, the highest of which is 2813 m. (9232 ft.). The name appears in the plural form in Ps. 42:6 (MT 7), probably referring to these different peaks. (The word should not be rendered "Hermonites" as in the AV.)

The mountain is snow-covered most of the year, with patches of snow in protected gullies the year around. The sources of the Jordan River are to be found on its western slopes. Mt. Hermon marked the northern limits of Joshua's conquests (Josh. 11:17; 12:1).

The sacred character of the mountain is suggested not only by the etymology of the name, but also by the name Baal-Hermon (the mountain of the Baal of Hermon) used in Jgs. 3:3 and 1 Ch. 5:23. The mountain was also called Sirion by the Sidonians and Senir by the Amorites (Dt. 3:9; cf. Ps. 29:6; Ezk. 27:5; "Sion" in Dt. 4:48, AV, should also be read "Sirion," with the RSV and NEB, following the Syriac). The Arabs call the mountain Jebel esh-Sheikh or Jebel eth-Thalj, "mountain of the snow." Jebel esh-Sheikh is variously explained as the "gray-haired mountain," or the mountain of the elder or chief. Conder (in *HDB*) suggests that it is designated Jebel esh-Sheikh because the religious sheikh of the Druzes made Hermon his residence in the 10th century. R. A. GWINN

HERMONITES hur'mən-īts [Heb. *ḥermônîm*]. AV in Ps. 42:6 (MT 7); RSV HERMON; NEB HERMONS. *See* HERMON, MOUNT.

HEROD hâr'əd [Gk. *Hērōdēs*]. The name of several members of a dynasty that was appointed to govern Jewish Palestine under Roman rule.

I. Herodian Dynasty
II. Herod the Great (47-4 B.C.)
  A. Governor of Galilee (47-37 B.C.)
  B. King of the Jews (37-4 B.C.)
    1. Consolidation (37-25 B.C.)
    2. Prosperity (25-14 B.C.)
    3. Domestic Troubles (14-4 B.C.)
III. Herod's Will Disputed
IV. Archelaus (4 B.C.-A.D. 6)
V. Antipas (4 B.C.-A.D. 39)
  A. Antipas's Realm
  B. Antipas's Reign
    1. Antipas and Archelaus
    2. Antipas and John the Baptist
    3. Antipas and Jesus
    4. Antipas and Exile
VI. Philip the Tetrarch (4 B.C.-A.D. 34)
VII. Agrippa I (A.D. 37-44)
VIII. Agrippa II (A.D. 50-100)

I. Herodian Dynasty.–The struggle between Hellenism and Judaism came to a climax during the Maccabean revolt against Antiochus Epiphanes when the Jews became more or less an independent nation beginning in 142 B.C. under the rule of Hasmoneans. During the reign of Alexander Janneus (103-76 B.C.) the Herodians began their influence in leadership. Herod the Great's grandfather Antipater (or Antipas) was appointed governor of Idumea by Alexander (Josephus *Ant.* xiv.1.3 [10]). On his deathbed Alexander appointed his wife, Salome Alexandra, to succeed him. Since she could not be high priest, she appointed Hyrcanus II as high priest. Upon her death in 67 B.C. Hyrcanus II assumed the position of king and high priest. His weak character enabled his brother Aristobulus II to force him to relinquish his position as king and high priest (*Ant.* xiv.1.2 [4-7]; xv.6.4 [180]; *BJ* i.5.4 [117-19]).

Antipater II, son of Antipater and father of Herod the Great, being an Idumean (*BJ* i.6.2 [123]; cf. also *Ant.* xiv.1.3 [9]; Justin Martyr *Dial.* 1ii.3; Eusebius *HE* i.6.2; 7.11; T.B. *Baba Bathra* 3b-4a; *Kiddushin* 70a), realized that though he could not become king and high priest he could nevertheless be the power behind the throne of a weak person like Hyrcanus II. He convinced Hyrcanus II that he had been deprived of his hereditary rights by his younger brother and persuaded him to flee to Aretas, king of Arabia, with a view to recovering his rightful place as king and high priest of Israel. He fled to Petra (*Ant.* xiv.1.3f. [8-18]). Aretas agreed to help Hyrcanus II provided he

would give up twelve cities of Moab that were taken by Alexander Janneus. Having agreed, Aretas attacked and defeated Aristobulus, who retreated to the temple mount at the time of the Passover in 65 B.C.

Rome then came into the picture. Each brother (Hyrcanus II and Aristobulus II) asked Pompey, the Roman general, to side with him against the other. After some delay and signs of rebellion by Aristobulus II, Pompey joined with Hyrcanus (*Ant.* xiv.3.3 [46f.]). Pompey made war against Aristobulus II, besieged the Jerusalem temple for three months, and finally prevailed in the autumn of 63 B.C. This marked the end of Jewish independence and the Hasmonean house (142-63 B.C.). Pompey entered the holy of holies but did not plunder. In fact, on the following day he ordered its cleansing and the resumption of the sacrifices. He reinstated Hyrcanus as high priest (*Ant.* xiv.4.4 [69-73]; *BJ* i.6.5–7.6 [133-153]; Tacitus *Hist.* v. 9; Appian *Mithridatic Wars* 106, 114; Florus i.40.30; Livy *Epit.* cii; Plutarch *Pompey* xxxix; cf. Dio Cassius *Hist.* xxxvii.15-17). In the reorganization of the government in Palestine, Antipater initiated many of his own changes.

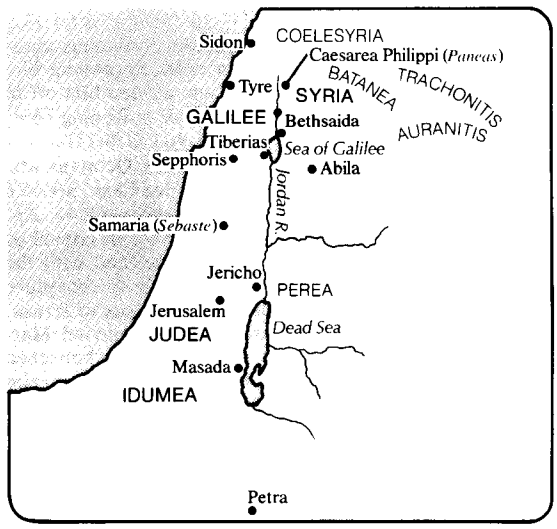
Antipater married Cypros, an illustrious Arabian woman, by whom he had four sons — Phasael, Herod, Joseph, Pheroras — and a daughter, Salome (*Ant.* xiv.7.3 [121]; *BJ* i.8.9 [181]).

After Julius Caesar defeated Pompey in Egypt (48 B.C.), Hyrcanus and Antipater attached themselves to Caesar's party. Because Antipater had risked his life for Caesar by fighting in Egypt in 48-47 B.C., Caesar made him a Roman citizen with exemption from taxes and appointed him procurator of Judea. Caesar also reconfirmed Hyrcanus's high-priesthood and gave him the title of Ethnarch of the Jews (*Ant.* xiv.8.1-5 [127-155]; 10.2 [191]; *BJ* i.9.3–10.4 [187-203]). Antipater was officially recognized as administrator of Judea and thus began to develop dynastic ambitions. He appointed his son Phasael as governor of Jerusalem and his second son Herod as governor of Galilee in 47 B.C. (*Ant.* xiv.9.1-2 [156-58]; *BJ* i.10.4 [201-203]). Although he encouraged the Jews to be loyal to Hyrcanus, Antipater was the real power behind the throne.

II. Herod the Great* (47-4 B.C.)–*A. Governor of Galilee (47-37 B.C.). Although Herod was only twenty-five when he became the governor of Galilee, he was admired by the Galilean Jews and the Roman officials in Syria for his efficient leadership in capturing and executing the brigand Ezekias and many of his followers (47/46 B.C.). Some persuaded Hyrcanus that Herod had violated Jewish law in executing Ezekias and his followers and consequently he should be tried before the Sanhedrin. Herod was brought to the trial, but Sextus Caesar, governor of Syria, ordered Hyrcanus to acquit Herod or suffer the consequences. Hyrcanus adjourned the trial and Herod fled to join Sextus Caesar in Damascus. Herod secured from Sextus Caesar the command of the city of Samaria and the district of Coelesyria and began to march against Jerusalem to avenge himself for the insult he received from Hyrcanus, but he was persuaded by his father and brother to refrain because this sort of rebellion would be looked upon with great disfavor by the Roman government (*Ant.* xiv.9.2-5 [158-184]; *BJ* i.10.5-9 [204-215]; cf. T.B. *Kiddushin* 43a).

Shortly thereafter Caecilius Bassus, a partisan of Pompey and foe of Julius Caesar, murdered Sextus Caesar and assumed the leadership of Syria (Dio Cassius xlvii.26.7–27.2; Livy *Epit.* cxiv; *Ant.* xiv.11.1 [268]; *BJ* i.10.10 [216]). The Caesarian commanders moved against Bassus and caused an indecisive war that lasted for about three years. After Cassius, Brutus, and their followers murdered Caesar on March 15, 44 B.C., Cassius arrived in Syria and by defeating Bassus assumed the leadership there.

Cassius was in desperate need of money. Herod was



selected as one of those who would raise the funds. Because of his successful collection in Galilee, Cassius appointed him governor of Coelesyria (as he had been under Sextus) with the further promise of making him king after he and Brutus defeated Octavius and Antony. When Cassius left Syria to help Brutus, new disturbances arose in Judea but they were quelled by Herod (43 B.C.). Shortly thereafter Aristobulus's son Antigonus made an advance into Judea, but Herod, seeing the danger, drove him out (42 B.C.). Herod was received with acclamations by the people and with gratitude by Hyrcanus (*Ant.* xiv.11.3–12.1 [277-299]; *BJ* i.11.2–12.3 [220-240]).

Herod's first wife Doris, who was probably an Idumean, had borne him a son named Antipater. Herod now became betrothed to Mariamne, whose mother was Hyrcanus II's daughter and whose father was Aristobulus II's other son, Alexander, and thus a niece to Antigonus, the rival of Herod (*Ant.* xiv.12.1 [300]; *BJ* i.12.3 [241]). This arrangement strengthened Herod's political base, for he was marrying into the royal house of the Hasmoneans and would become the natural regent when aging Hyrcanus passed away. Thus he gained acceptance in the Judean circles.

In 42 B.C. Antony defeated Cassius, and the Jewish leaders accused Herod and Phasael of usurping the power of the government while leaving Hyrcanus with titular honors. Herod's defense nullified these charges (*Ant.* xiv.12.2-6 [301-323]; *BJ* i.12.4-6 [242-45]; Plutarch *Antony* xxiv; Dio Cassius xlviii.24; Appian *The Civil Wars* v.30-38). In the autumn of 41 B.C. new accusations were made against Herod and Phasael, and a trial was held in Antioch with Antony present. Since Hyrcanus was at the trial, Antony asked him who he thought would be the best qualified ruler and Hyrcanus selected Herod and Phasael. Antony appointed them as tetrarchs of Judea (*BJ* i.12.5 [243f.]; *Ant.* xiv.13.1 [324-26]).

In the next year (40 B.C.) troubles arose for the two new tetrarchs. The Parthians arrived in Syria and joined Antigonus (whose father was Hyrcanus's deposed brother Aristobulus) in his struggle to remove Hyrcanus. Parthians had besieged Jerusalem and asked for peace. Herod was suspicious of the offer, but Phasael and Hyrcanus went to Galilee to meet the Parthian king, who betrayed them by putting them in chains. Hearing of the treachery, Herod with Mariamne, his close relatives, and his troops moved to Masada and then Petra (*Ant.* xiv.13.3-9 [335-364]; *BJ* i.13.2-9 [250-264]). Antigonus was made king (Dio Cassius

xlviii.41; inferred in *Ant.* xiv.13.10 [368f.]; *BJ* i.13.9 [268-270]; cf. also Dio Cassius xlviii.26). Antigonus mutilated his uncle Hyrcanus's ears in order to prevent him from being restored as high priest and carried him off to Parthia. Phasael died either of suicide or poisoning (*Ant.* xiv.13.10 [365-69]; xv.2.1 [12]; *BJ* i.13.9-11 [270-73]).

Herod departed for Rome, where Antony, Octavius, and the Senate designated him King of Judea (*Ant.* xiv.14.6 [381-85]; *BJ* i.14.4 [282-85]; cf. also Strabo xvi.2.46; Appian *The Civil Wars* v.75; Tacitus *Hist.* v.9). In late 40 or early 39 B.C. Herod returned to Palestine, and with the help of Antony's legate Sossius was able to recapture Galilee. Finally in the spring of 37 he laid siege to Jerusalem. Before the fall of Jerusalem Herod married Mariamne, niece of Antigonus, to whom he had been betrothed for five years. The intention of this marriage was to spite Antigonus and to strengthen Herod's claim to the throne since she was a Hasmonean. Jerusalem fell in the summer of 37 (*Ant.* xiv.15.8–16.2 [439-480]; *BJ* i.16.7–18.2 [320-352]; Tacitus *Hist.* v.9; Dio Cassius xlix.22). Herod requested that the Romans behead Antigonus (*BJ* i.18.3 [357]; Plutarch *Antony* xxxvi; cf. also Dio Cassius xlix.22), thus ending the Hasmonean rule. Herod, therefore, became the king of the Jews.

B. King of the Jews (37-4 B.C.). Herod's reign can be divided into three periods: first, consolidation from 37 to 25 B.C.; second, prosperity from 25 to 14 B.C.; and finally, the period of domestic troubles from 14 to 4 B.C.

1. Consolidation (37-25 B.C.). First, it was necessary for Herod to gain loyalty from his subjects and to eliminate those hostile to his rule. He contended with four adversaries: the populace and the Pharisees, the aristocracy, the Hasmonean family, and Cleopatra of Egypt.

Since the Pharisees held sway over the majority of the people, there was a reluctance to have Herod rule because he was an Idumean, a half-Jew, and a friend of the Romans. Herod punished with severity those Pharisees and elements of the population that opposed him. On the other hand he rewarded with favors and honors those who showed signs of loyalty to him. Two Pharisees, Pollion and his pupil Samaias (Shammai?) rendered favorable service to Herod, for they felt the domination by a foreigner was a result of a divine judgment that the population should willingly bear (*Ant.* xv.1.1 [2f.]; *BJ* 1.18.4 [358]).

The second adversary was the aristocracy, who were supporters of Antigonus. Herod executed forty-five of the Sadducean aristocracy; many if not all of them were members of the Sanhedrin. He confiscated their property to pay the demands placed upon him by Antony (*Ant.* xv.1.2 [5f.]; cf. xiv.9.4 [175]; *BJ* i.18.4 [358]).

The third adversary was the Hasmonean family. Herod's mother-in-law Alexandra, the mother of Mariamne, was the cause of the trouble. One Hasmonean was Hyrcanus, the former high priest, who had a good relationship with Herod. Upon Hyrcanus's return from the Parthian captivity, however, he was not able to resume his office as high priest because of his physical mutilation. Therefore, since Herod was an Idumean and could not assume the rule of high priest, Herod selected Ananel (Hananeel) of the Babylonian Diaspora. He was an insignificant priest from the Zadokite family thought to be of the Aaronic line, and who had held the high priesthood before the Hasmoneans. Herod thought this to be a legitimate way of bypassing the Hasmonean priestly line (*Ant.* xv.2.1-4 [11-22]).

Herod's mother-in-law Alexandra felt insulted, for she wanted her sixteen-year-old son Aristobulus, Mariamne's brother, to be high priest since he was the only legitimate heir for that position from the Hasmonean line. Alexandra put pressure on Herod by appealing to her friend Cleopatra, who then convinced Antony of Herod's wrong conduct; consequently under Antony's urging Herod removed Ananel (an unlawful removal since the high priest's office was lifelong) and installed Aristobulus as high priest when he was only seventeen years of age, *ca.* late 36 or early 35 B.C. (*Ant.* xv.2.5–3.1 [23-41]).

Although this action brought some relief to the tension between Herod and Alexandra, it was short-lived, because Herod thought of the Hasmonean family as his enemies. This distrust was so overbearing that Alexandra and her son Aristobulus tried to escape to Egypt in two coffins but were caught in the act when the plan was betrayed to Herod. Although he overlooked the offense because of his fear of Cleopatra's reprisals, his suspicion of Alexandra only intensified (*Ant.* xv.3.2 [42-49]). At the following Feast of Tabernacles (35 B.C.) Aristobulus officiated as high priest and the populace showed great affection for him; his popularity caused Herod to view him as a dangerous rival who had to be removed. Immediately after the festivities, Alexandra invited Herod to be her guest in Jericho. Herod exhibited friendliness toward Aristobulus and on a hot day suggested that they go swimming to cool off. Some of Herod's servants and friends were swimming and playing in the water with Aristobulus. As if in sport Herod's friends held Aristobulus's head too long under water and he drowned. Herod simulated the most profound grief and provided a lavish funeral and a very fine tomb (*Ant.* xv.3.2-4 [42-61]; *BJ* i.22.2 [437]).

Although the populace accepted the official version of an accidental death, Alexandra knew the facts and devoted herself to revenge. She convinced Antony through Cleopatra of Herod's misdeeds and Antony summoned Herod to appear before him at Laodicea (on the coast of Syria). Realizing that he could be sentenced to death, Herod put his wife Mariamne under the surveillance of his uncle Joseph, who was also the husband of Herod's sister Salome, and ordered her death if Herod were sentenced to die. Herod convinced Antony by means of gifts and eloquence that he was not guilty. When he returned Salome accused her husband Joseph of having intercourse with Mariamne. Mariamne denied this and Herod believed her. She revealed, however, that Joseph had informed her of Herod's order to kill her if Antony sentenced him to death. In a fit of rage Herod was now convinced that Salome's charge of adultery was accurate, and without a trial Joseph was executed. Since he felt that many of these problems were caused by Alexandra, Herod put her in chains and under guard (*Ant.* xv.3.5-9 [62-87]; *BJ* i.22.4f. [441-44]).

The final adversary was Cleopatra. She was greedy, and wanted to eliminate Herod and Malchus of Arabia and possess their land. Antony would not permit this, but he did give her the whole of Phoenicia, the coast of Philistia S of the Eleutherus River (except the free cities of Tyre and Sidon), the district of Jericho, which was the most fertile land of Herod's territory, having palm trees and balsams, and a part of Arabia (*Ant.* xv.4.1f. [88-103]).

In 32 B.C. civil war broke out between Octavius and Antony. Herod wanted to help Antony but was prevented by Cleopatra, who wanted Herod to make war on the Arabian king because he was late in paying his tribute to Cleopatra. Ultimately she wanted Herod and the Arabian to weaken and exhaust each other so she could take over both of their territories. In 31 B.C., shortly after the war between these two vassal rulers had come to a standstill, there was a terrible earthquake in Palestine that killed thirty thousand people. The Arabs seized the opportunity to attack, but Herod was able to muster an army, completely rout the Arabs, and demand their surrender. Herod returned home a victor (*Ant.* xv.5.2-5 [121-160]; *BJ* i.19.2f. [369-385]).

Soon afterward, on September 2, 31 B.C., Octavius de-

feated Antony in the Battle of Actium. This was a blow to Herod, who now had to skillfully convince Octavius that he was the legitimate ruler of Palestine. Fortune was on his side. In Cyzicus there were gladiators of Antony who were training for the games that were to be a part of the victory celebration of Antony over Octavius. When they heard of Antony's defeat they attempted to go to Egypt to help him, but were prevented from passing through Syria by Didus, the governor of Syria, and Herod (*Ant.* xv.6.7 [195]; *BJ* i.20.2 [392]; Dio Cassius li.7).

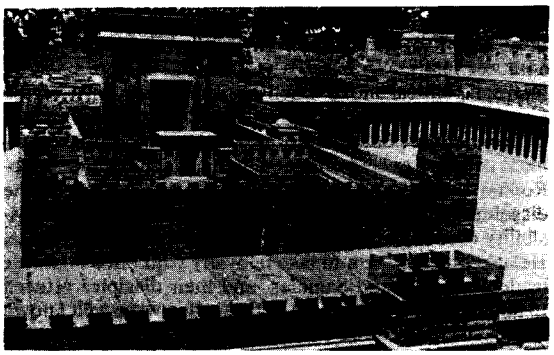
With this demonstration of loyalty, Herod now could go to Octavius. Before he departed to meet him, however, he did two things. First, he accused Hyrcanus, the only remaining rival to the throne, of plotting with the king of the Nabateans and had him executed (*Ant.* xv.6.1-4 [161-182]; *BJ* i.20.1 [386]). Second, fearing that possibly his mother-in-law, Alexandra, might cause some problems, Herod put her and his wife Mariamne in Alexandreion under the surveillance of his steward Joseph (not his brother-in-law) and Soēmus, a trusted friend. He ordered their death if he were killed, and the preservation of the kingdom for his sons and his brother Pheroras (*Ant.* xv.6.5 [183-86]).

Herod met Octavius at Rhodes (spring, 30 B.C.) and handled the situation skillfully. Although he admitted his loyalty to Antony, he demonstrated that he actually did not fight Octavius during the civil war because of his skirmish with the Arabs. Octavius was convinced of his loyalty, and confirmed his royal rank. Leaving Asia Minor, Octavius went along the Phoenician coast to invade Egypt. With great pomp Herod met him in Ptolemais, giving him eight hundred talents, duly appreciated by Octavius (*Ant.* xv.6.6f. [188-201]; *BJ* i.20.1-3 [387-395]).

After Octavius defeated Antony in Egypt, Herod went to Egypt to congratulate him. Octavius returned Jericho (which had been taken by Cleopatra) to Herod, and added Gadara, Hippos, Samaria, Gaza, Anthedon, Joppa, and Strato's Tower (which later became Caesarea) (*Ant.* xv.7.3 [215-17]; *BJ* 1.20.3 [396]). Indeed, Herod had gained much. He accompanied Octavius as far as Antioch on their return from Egypt in late 30 B.C.

Although Herod was politically successful, his domestic affairs fell into disarray. While Herod was in Rhodes, Mariamne discovered from the guard Soēmus that she was to be killed in the event that he did not return. This caused great upheaval in Herod's life. With the encouragement of his sister Salome, and their mother Cypros, both of whom hated Mariamne, Herod finally executed Mariamne at the end of 29 B.C. (*Ant.* xv.7.1-5 [202-236]). Herod never fully accepted her death. He became ill, and because there was some doubt that he would recover, Alexandra attempted to seize control of two fortified places in Jerusalem in order to secure the throne. Hearing of this plot, Herod had her executed in 28 B.C. (*Ant.* xv.7.6-8 [237-252]). Finally, the governor of Idumea, Costobarus (husband of Herod's sister Salome), who earlier conspired with Cleopatra against Herod but was forgiven because of Salome's entreaty, once again came under suspicion for alleged pro-Hasmonean sympathies. Salome now wanted to get rid of her husband, and supplied information about his plans for a revolt. She charged that her husband was preserving the influential sons of Babas who remained loyal to Antigonus and always spoke ill of Herod. Herod was incensed and executed Costobarus and his followers (25 B.C.). All the male relatives of Hyrcanus had now been removed, and no living contenders for Herod's throne remained (*Ant.* xv.7.9f. [253-266]). This marks the end of the first period of Herod's rule.

2. Prosperity (25-14 B.C.). Although there were times of distress, this period of Herod's reign was marked with splendor. Reference may be made first to the cultural developments. Although violating the Jewish law, Herod introduced the quinquennial games in honor of Caesar and constructed theaters, amphitheaters, and hippodromes (*Ant.* xv.8.1 [267-276]; xvii.10.3 [255]; *BJ* ii.3.1 [44]). He rebuilt many fortresses in the land and temples in gentile territories. Strato's Tower was restored and renamed Caesarea. In 24 B.C. he built for himself a royal palace in Jerusalem (*Ant.* xv.8.5–9.6 [292-341]). His greatest achievement in construction was the temple, which was begun in 20 B.C. and completed in A.D. 63, long after his death (*Ant.* xv.11.1-6 [380-425]). The rabbis stated, "He who has not seen the temple of Herod has never seen a beautiful building" (T.B. *Baba Bathra* 4a), and they saw its construction as an "atonement for having slain so many sages of Israel" (Midr. *Nu. Rabbah* 14:8). Herod acquainted himself with Greek culture by surrounding himself with men of Hellenistic education. Herod's tutor, Nicolas of Damascus, was the most noted of the Greek rhetoricians who advised him and was entrusted with complex diplomatic assignments. After Herod's death Nicolas was very much involved in the settlement of his will.



M. Avi-Yonah's model of the Herodian temple in Jerusalem (W. S. LaSor)

Second, there were domestic changes. Late in 24 B.C. Herod married Mariamne (who will be designated as Mariamne II), daughter of Simon, whom Herod appointed as high priest (23-6 B.C.). In 22 B.C. Herod sent his two sons by Mariamne I, Alexander and Aristobulus, to Rome for their education. They were received by Caesar personally and stayed at the home of one of Herod's close friends, Asinius Pollio. It seems that at this time Herod made the first of his six wills, wherein he was allowed by Caesar to give his kingdom to whichever son he wished (*Ant.* xv.10.1 [342f.]). Upon the completion of their education in 17 or 16 B.C., Herod went to Rome. Returning to Judea with Herod, Aristobulus married Bernice, the daughter of Herod's sister Salome, and Alexander married Glaphyra, the daughter of Archelaus king of Cappadocia (*Ant.* xvi.1f. [6-11]; *BJ* i.23.1 [445f.]).

Third, there were political advances. In 22 B.C. when Herod's two sons went to Rome, Augustus (Octavius's newly acquired title) awarded Herod the new territories of Trachonitis, Batanea, and Auranitis (*Ant.* xv.10.1f. [343-49]; *BJ* i.20.4 [398f.]). Two years later, Augustus came to Syria and gave to Herod the additional territory formerly belonging to Zenodorus that lay between Trachonitis and Galilee (containing Ulatha and Paneas), and the immediate area N and NE of the lake of Gennesaret. In addition, Augustus made the procurators of Syria responsible to Herod for all their actions (*Ant.* xv.10.3 [354-360]; *BJ* i.20.4 [400]; Dio Cassius liv.7.4-6; 9.3). Herod also obtained the tetrarchy of Perea for his brother Pheroras (*Ant.* xv.10.3 [362]; cf. *BJ* i.24.5 [483]). To show appreci-

ation he erected a beautiful temple for Augustus in Zenodorus's territory near Paneion (later called Caesarea Philippi) (*Ant.* xv.10.3 [363]; *BJ* i.21.3 [404-406]). Herod made an internal political move when he remitted a third of the people's taxes. This tax cut was made under the pretext of crop failure, but actually it was to soothe the resentment of many people offended by his emphasis on Greco-Roman culture and religion, which was leading to the dissolution of their religion and customs. Fearing the possibility of revolts, Herod forbade the people to congregate. He also ordered them to take a loyalty oath. Two Pharisaic leaders, Pollion and Samaias, and their disciples refused to take the oath. Since both of these men were well known and had helped Herod earlier in his life, he thought it wise not to pursue the matter. Also, because of his high regard for the Essenes, they were exempted from the oath (*Ant.* xv.10.4 [365-372]). In 14 B.C. Herod again lowered the taxes by one-fourth (*Ant.* xvi.2.5 [64f.]).

In conclusion, the period from 25 B.C. to 14 B.C. was one of advancement. Herod had a good relationship with the Roman government, and although there was some resentment among the people, he had them under control. His domestic situation was reasonably calm although toward the end of this period there were rumblings of trouble to come.

3. Domestic Troubles (14-4 B.C.). The last ten years of Herod's life were marked by intrigue. He was getting old and there was much infighting among his sons. This problem was compounded since Herod had ten wives, each of whom wanted her son(s) to be his successor (*Ant.* xvii.1.3 [19-22]; *BJ* i.28.4 [562f.]). His first wife Doris bore him one son, Antipater. Herod repudiated her and Antipater when he married Mariamne I, the granddaughter of Hyrcanus, in 37 B.C. By her he had two daughters and three sons (*Ant.* xiv.12.1 [300]; *BJ* i.22.1f. [431-35]). Late in 24 B.C. Herod married his third wife, Mariamne II, by whom he had Herod (Philip). In late 24 or early 23 B.C. Herod married his fourth wife, Malthace, who was a Samaritan and by whom he had Archelaus and Antipas. He married his fifth wife, Cleopatra of Jerusalem, probably sometime during 22 B.C., and she bore him Philip. The other five wives played no significant role and only three of them, Pallas, Phaedra, and Elpis, are even mentioned by name (*Ant.* xvii.1.3 [19-22]; *BJ* i.28.4 [562f.]).

Herod's two favorite sons were those by Mariamne I, Alexander and Aristobulus. When they returned from their education in Rome in 17 or 16 B.C. new domestic troubles arose. Herod's sister Salome had an intense hatred toward these two sons of Mariamne I, even though her daughter Bernice was married to Aristobulus. Salome wanted her son to succeed to his uncle's throne. Being Hasmonean, Alexander and Aristobulus at times were arrogant. Consequently, Salome spoke ill of their mother whom Herod had killed. Salome and Pheroras (brother of Herod and Salome) warned Herod that these two sons were out to avenge their mother's murder by bringing charges against him before Caesar that would cause him to lose his throne (*Ant.* xvi.3.1f. [66-77]).

Disturbed, in 14 B.C. Herod recalled his oldest son Antipater (son of Doris) from exile to curb the reckless attitude of Alexander and Aristobulus. Consequently, in 13 B.C. Herod made his second will, wherein he made Antipater sole heir of his domain. Herod sent Antipater with Agrippa (a friend of Augustus) to be presented to the emperor and possibly to have the will ratified. Antipater realized that Herod could again change his mind, and from Rome he wrote to Herod slanderous letters against Alexander and Aristobulus. Herod became more infuriated toward these two sons and finally in 12 B.C. he brought them before Augustus in Aquileia (near Venice) to be tried. This case resulted not in execution but in reconciliation. Returning home with Alexander, Aristobulus, and Antipater, Herod made his third will naming all three sons as successors (*Ant.* xvi.3.3–4.6 [86-135]; *BJ* i.23.2-5 [451-466]).

Shortly after their return from Rome (*ca.* 11 or 10 B.C.) Antipater, with the aid of Herod's sister Salome and brother Pheroras, began once more to slander Alexander and Aristobulus, which again aroused Herod's suspicions. Antipater furnished proof from one of Alexander's friends that Alexander, with the help of Aristobulus, was planning to kill Herod and flee to Rome to lay claim on Herod's kingdom. Herod imprisoned Alexander, but Alexander's father-in-law Archelaus, king of Cappadocia, was concerned about the welfare of his own daughter, and was able to reconcile Herod and Alexander (*Ant.* xvi.7.2–8.6 [188-270]; *BJ* i.24.2–25.6 [467-512]). There was peace again in Herod's household.

Although his troubles subsided, Herod had some difficulties with external enemies and even with the emperor. About forty of Herod's subjects in Trachonitis had become rebellious and fled to a neighboring Arab territory under the ruler Syllaeus, who had overthrown the king Obodas. In consultation with Saturninus and Volumnius, governors of Syria, Herod entered the Arab territory to capture the brigands and killed twenty-five Arabs who had come in defense of the brigands. Syllaeus, however, went before Augustus in Rome to accuse Herod of devastating the Arab territory and killing 25,000 Arabs. Augustus believed Syllaeus and wrote to Herod that he was to be treated as a subject and no longer a "friend of Caesar," a most coveted title. Herod immediately sent an embassy to Rome to defend himself, and when this failed he sent a second under the leadership of Nicolas of Damascus (*Ant.* xvi.9.1-4 [271-299]).

Meanwhile, new domestic troubles arose. A certain Eurycles from Lacedemon, in behalf of Antipater, played Alexander and Aristobulus against Herod. Other troublemakers became involved and finally Herod became so suspicious that he imprisoned Alexander and Aristobulus and accused them of treasonable plots in a report to the emperor (*Ant.* xvi.10.1-5 [300-324]; *BJ* i.26.1–27.1 [513-535]; cf. also Pausanias ii.3.5; Strabo viii.5.1; Plutarch *Antony* 67).

In Rome Nicolas of Damascus had an audience with the emperor and explained to him the true situation concerning Herod and the Arabs. When the emperor fully understood the situation, he executed Syllaeus and reconciled himself to Herod. About that time messengers from Herod arrived in Rome seeking the emperor's advice regarding his sons. Augustus gave Herod full authority to deal with his sons as he wished, but advised him to have a trial outside of Herod's territory at Berytus (Beirut) with Roman officials attending it. In accordance with the emperor's advice there was a trial in Berytus and the court pronounced the death sentence upon Alexander and Aristobulus. Thus, at Sebaste (Samaria), where Herod married Mariamne thirty years before, her two sons were executed by strangulation, probably in 7 B.C. (*Ant.* xvi.10.6–11.8 [325-404]; *BJ* i.27.1-6 [536-551]). This wiped out the Hasmonean line with the exception of Herodias, Antipas's wife, and her brother Agrippa I, who began his rule in A.D. 37.

Herod now made his fourth will naming Antipater as the sole successor. Antipater was impatient, however, and had secret conferences with Herod's brother Pheroras, tetrarch of Perea. Salome, Herod's sister, knew of these conferences and reported to Herod their intention to kill him. Herod's relationship with Antipater became strained. Realizing this, Antipater arranged with his friends in Rome to have Augustus request Herod to send Antipater to him. Herod sent him to Rome with the new will that named Antipater as the sole ruler, and in the event

that Antipater's death was before his own, he named Herod (Philip), son of Mariamne II, as his successor.

While Antipater was in Rome, Pheroras died. His death was the seal of Antipater's fate. Upon investigation, Herod found that Pheroras was killed by poison sent by Antipater, but that the poison had been intended for Herod himself. From the female slaves of Pheroras Herod learned of Antipater's meetings with Pheroras, his complaint about Herod's long life, and the uncertainties of his own prospects for the throne. Herod recalled Antipater from Rome under false pretenses. With no suspicion Antipater returned and Herod immediately imprisoned him in the king's palace. The next day he was tried before Varus, the governor of Syria, and was without defense. Herod put him in chains and sent a report to Augustus. Meanwhile, another plot of Antipater against Herod was unveiled. Becoming very ill and realizing that his death was near, Herod drew up his fifth will, wherein he omitted Antipater and his next two oldest sons, Archelaus and Philip, because Antipater had poisoned his mind against them. He selected his youngest son Antipas, son of the Samaritan Malthace, as his sole successor (*Ant.* xvii.2.4–6.1 [32-146]; *BJ* i.29.1–32.7 [567-646]).

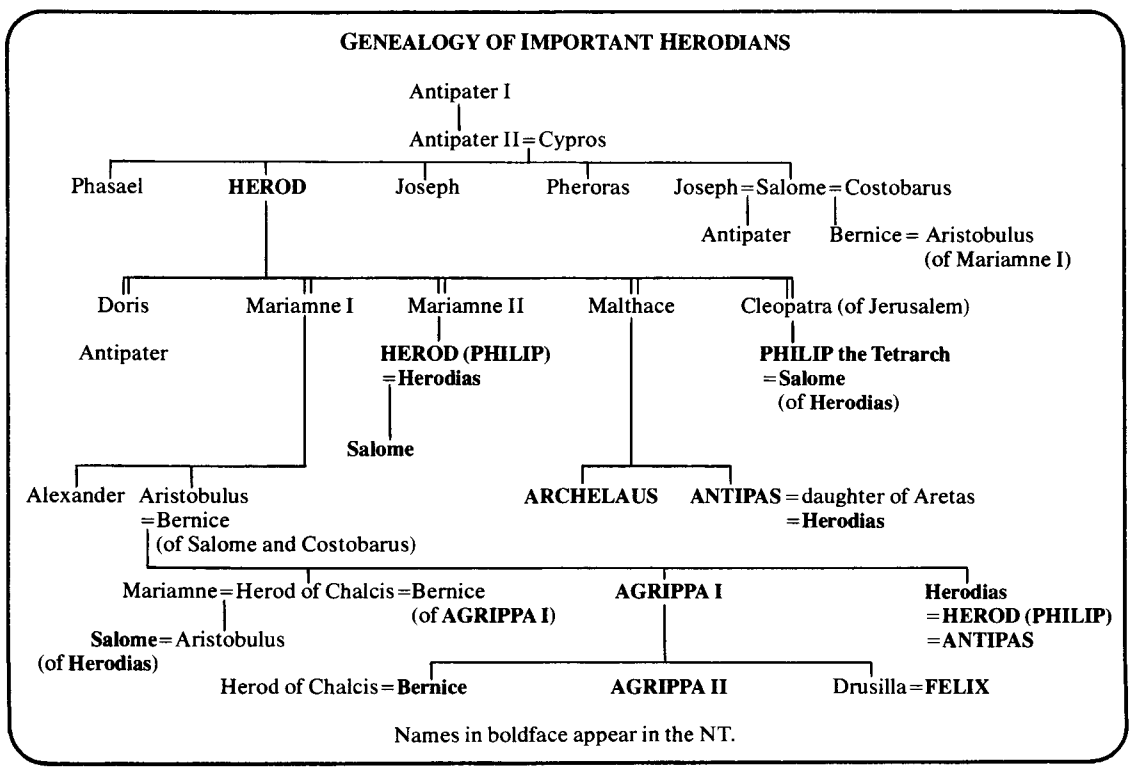
In the winter of 5-4 B.C. (quite possibly) Jesus was born. Magi had come to Jerusalem inquiring about the birthplace of the newborn king of the Jews. Herod summoned the wise men to tell him of the exact location of the Christ child so that he could come also and worship Him. When the wise men found Jesus in Bethlehem they were warned in a dream to return home another way. The Lord appeared to Joseph in a dream instructing him to flee to Egypt because of Herod's desire to kill the child. After they fled to Egypt, Herod killed all the male children of Bethlehem who were two years old and younger (Mt. 2:1-16). *See also* ASTROLOGY V.B.

New troubles arose for the aging Herod. He was nearly seventy years old and his incurable diseases only grew worse. Because of his condition two rabbis, Judas son of Sepphoraeus, and Matthias son of Margalus, incited the people to tear down the offensive eagle from the temple gate, an action they thought would be pleasing to God. Although Herod was weak, he seized the offenders and ordered that they be burned alive.

When he realized that the warm spring baths at Callirrhoe were no longer helping his diseases, Herod returned to Jericho. He ordered the notable Jews from all parts of the nation to come to him, and when they arrived he locked them in the hippodrome. Realizing how the people disliked him, he ordered his sister Salome and her husband Alexas to slay all the leaders in the hippodrome at the moment of his death, in order to insure national mourning rather than a festival. While giving these instructions, he received a letter from Rome in which the emperor granted him permission to execute his son Antipater, and he did so immediately. Herod then made his final will in which he selected Archelaus, the older son of Malthace, as king, his brother Antipas as tetrarch of Galilee and Perea, and their half brother Philip as tetrarch of Gaulanitis, Trachonitis, Batanea, and Paneas.

Finally, only five days after Antipater's execution, Herod died at Jericho in the spring of 4 B.C. Rather than killing the leaders that were locked up in the hippodrome, Salome and Alexas released them. In a public assembly at the amphitheater in Jericho, Ptolemy, who had been entrusted with the king's seal, read Herod's last will in public and the crowd acclaimed Archelaus as their king. A royal funeral procession accompanied Herod's body from Jericho for about 1½ km. (1 mi.) in the direction of Herodium, where he was buried (*Ant.* xvii.6.1-8 [147-199]; *BJ* i.33.1-9 [647-673]).

Herod's reign was one of violence, lasting for thirty-four years if one reckons the beginning of his reign as 37 B.C. His rule, however, was not much different from that of other potentates of his day. In the eyes of the Romans



he ruled well; they realized that the Jews, because of their religious scruples, were not easy to satisfy. Since Herod was half Idumean, many Jews did not look upon him as a truly Jewish king.

III. Herod's Will Disputed.—During his life Herod made six wills, the last one only five days before his death. Archelaus took over the leadership, but did not accept the title of king nor allow himself to be crowned, for Herod's last will needed the emperor's ratification (*Ant.* xvii.8.4 [202f.]; *BJ* i .1.1 [2f.]). The crowds, however, began making demands and Archelaus complied, thinking he would ingratiate himself with them. Some revolutionaries among the crowd sought to avenge the blood of those whom Herod killed for cutting down the eagle from the temple gate. Failing to pacify rioters who stirred up the crowd now attending the Passover, Archelaus sent in the army to suppress the crowd, and three thousand people were killed (*Ant.* xvii.8.4–9.3 [204-218]; *BJ* ii.1.2f. [4-13]).

Immediately after the Passover, Archelaus and Antipas left for Rome to contest Herod's last two wills, while Philip took care of the home front. Archelaus claimed that he should be king because that was the last will expressed by his father. Antipas contended for the validity of Herod's fifth will, which made Antipas king, because it had been ratified by the emperor and Herod was in good physical and mental health when he made it, in contrast to his health when he made his sixth will five days before his death. While the claimants were in Rome a revolt broke out in Jerusalem at the feast of Pentecost, and it took the Romans about two months to squelch it. As a result of the revolt a Jewish delegation was sent to Rome pleading autonomy for the nation and its unification with Syria. Philip also went to Rome. After considerable delay Augustus offered a compromise whereby he appointed Archelaus as ruler over Idumea, Judea, and Samaria. He gave him the title of ethnarch with the promise that he could become king if he provided good leadership. Antipas was made tetrarch over Galilee and Perea, and Philip was appointed tetrarch over Gaulanitis, Trachonitis, Batanea, and Paneas (*Ant.* xvii.9.5–11.4 [218-320]; *BJ* ii.2.1–6.3 [14-100]). This compromise prevented either Antipas or Archelaus from being given the coveted title *king*.

IV. Archelaus (4 B.C.-A.D. 6).—Archelaus, the son of Herod the Great and Malthace (a Samaritan), was born *ca.* 22 B.C. His killing of about three thousand people at the Passover before he left for Rome, combined with the prolonged revolt at the feast of Pentecost that spread to the countryside of Judea, Galilee, and Perea, made a bad beginning of Archelaus's rule. His treatment of the Jews and Samaritans was one of brutality and tyranny (*BJ* ii.7.3 [111]), as substantiated by Matthew (2:20-23), who states that when Joseph, Mary, and Jesus returned from their flight to Egypt, Joseph heard that Archelaus was ruling over Judea and was afraid to go there. Thus, being warned by God, they went to Nazareth of Galilee. Also, Archelaus removed the high priest Joazar, the son of Boethus, because he supported the rebels, and appointed Joazar's brother Eleazar whom Archelaus later replaced by Jesus son of See (*Ant.* xvii.13.1 [339-341]). He divorced his wife Mariamne in order to marry Glaphyra, the former wife of Alexander (son of Herod and Mariamne I and thus a half brother of Archelaus), and thereby transgressed the ancestral law, since she already had a son by Alexander (*Ant.* xvii.13.1, 4f. [341, 350-53]; *BJ* ii.7.4 [114-16]).

Although his rule was mediocre, he followed his father's example in building projects. He rebuilt the royal palace in splendid fashion, and diverted half of the water of the village of Neara into the newly planted palm trees in the plain of Jericho. He founded a village and honored himself by naming it Archelais (*Ant.* xvii.13.1 [340]).

Because of his oppressive rule he was finally deposed in A.D. 6. A delegation of Jews and Samaritans complained to Augustus about Archelaus's brutality and tyranny. For these two bitter enemies to join in their complaint against Archelaus indicated how bad the situation was. Also, Archelaus's brothers, Antipas and Philip, went to Rome and brought charges against him, probably because of his oversight of them while he was the ethnarch of the entire nation. As a result, Archelaus was banished to Vienna in Gaul (modern Vienne on the Rhone, S of Lyons) and Antipas and Philip retained their domains. Archelaus's territories were reduced to an imperial province under the rule of prefects (*Ant.* xvii.13.1-5 [342-355]; *BJ* ii.7.3–8.1 [111-18]; Strabo xvi.2.46; Dio Cassius lv.27.6).

V. Antipas (4 B.C.-A.D. 39).—Antipas, the son of Herod and Malthace (a Samaritan) and full brother to Archelaus, was born *ca.* 20 B.C.

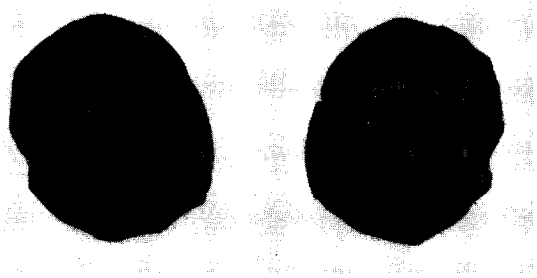
A. Antipas's Realm. Of all the Herodians, he figures most prominently in the NT because he was the tetrarch over Galilee and Perea, the two territories in which John the Baptist and Christ had most of their ministries, and he reigned during their lives and activities.

Upon his return from Rome, Antipas had to restore order and rebuild that which had been destroyed from the revolt at the feast of Pentecost in 4 B.C. Following in the train of Alexander the Great and his father Herod the Great, Antipas founded cities. He rebuilt Sepphoris, the largest city in Galilee (*ca.* A.D. 8-10) and the capital of his territories until he built Tiberias. Joseph, Mary's husband, living in Nazareth only 6.4 km. (4 mi.) SSW of Sepphoris, may well have plied his trade as a carpenter (Mt. 13:55; Mk. 6:3) during its rebuilding. The second city to be rebuilt was Livias (or Julias) of Pereas in honor of Augustus's wife Livia. It was completed *ca.* A.D. 13 (*Ant.* xviii.2.1 [27]).

Although the Herodian family had built twelve cities, Tiberias was the first city in Jewish history to be founded within the municipal framework of a Greek *polis*. Antipas had difficulty in populating Tiberias because in the process of building the city they struck upon a cemetery, and the Jews thus considered the area unclean. Antipas enticed them to move there by offering free houses and lands and exemption from taxes for the first few years. The city, named in honor of the Emperor Tiberius, was finished around A.D. 25 and served as Antipas's capital (*Ant.* xviii.2.3 [36-38]).

B. Antipas's Reign. 1. Antipas and Archelaus. The only important event recorded early in Antipas's reign was the downfall of his brother Archelaus in A.D. 6. This was accomplished when he, his brother Philip, and a Jewish and Samaritan delegation went to Rome to complain about his rule to Tiberius (*Ant.* xvii.13.2 [342-44]; *BJ* ii.7.3 [111]). Although Antipas remained a tetrarch, he was able to obtain the dynastic title *Herod* (cf. *BJ* ii.9.1 [167]; *Ant.* xviii.2.1 [27]), which was of great significance both to his subjects and to the political and social circles of the Roman world. Tiberius may have given him this title in lieu of the coveted title *king*.

2. Antipas and John the Baptist. More than anything else Herod Antipas is known for his imprisonment and beheading of John the Baptist (Mk. 6:17-29 par.; *Ant.* xviii.5.2 [116-19]). Antipas had been married to the daughter of the Nabatean king Aretas IV. This marriage may have been arranged by Augustus, who was known for instigating intermarriages between various rulers for the sake of peace in the empire. This marriage provided not only for peace between the Jews and the Arabs, but also made Aretas available as a buffer between Rome and Parthia. If it was arranged by Augustus, the marriage must have been before A.D. 14.



Coin of Antipas labeled (obverse) HPΩΔOY TETPAPXOY ("Herod, Tetrarch") and (reverse) TIBE PIAΣ ("Tiberias") (Trustees of the British Museum)

Antipas traveled to Rome *ca.* A.D. 29. On his way he visited his brother Herod (Philip), who apparently lived in one of the coastal cities of Palestine. Antipas fell in love with Herodias, his host's wife and his own niece. She saw the opportunity to become the wife of a tetrarch and agreed to marry Antipas upon his return from Rome, provided that he divorce his first wife (*Ant.* xviii.5.1 [109f.]). In some way Antipas's first wife discovered the plan and fled to her father. This divorce was an insult to Aretas, who later retaliated against Antipas.

When Antipas married Herodias, John the Baptist boldly criticized the marriage and was imprisoned by Antipas. The Mosaic law forbade the marriage of a brother's wife (Lev. 18:16; 20:21) except for levirate marriage (Dt. 25:5; Mk. 12:19). Since Antipas's brother had a daughter Salome, and more importantly, his brother was still living, levirate marriage did not apply.

Identifying Herodias's first husband is a problem. The Gospels state that he was Philip (Mt. 14:3; Mk. 6:17) but Josephus states that he was Herod, son of Herod the Great and Mariamne II, daughter of Simon the high priest (*Ant.* xviii.5.1 [109]). Since the Herodian family is confusing, it is thought by many that the Gospel writers had confused this Herod with Philip the tetrarch who later married Herodias's daughter Salome. However plausible this solution may seem at first, it is untenable for several reasons.

First, the Gospels would be guilty of three historical errors, namely, (1) that they confused this Herod with his half brother Philip, (2) that they made Philip the tetrarch (4 B.C.-A.D. 34) the husband of Herodias instead of the husband of her daughter Salome, and (3) that Salome would have been the daughter of Philip the tetrarch who, according to Josephus, had no children. These errors would seem to be incredible in light of the Evangelists' usual familiarity with historical matters. Also, when the early Christian community had people like Joanna, wife of Chuza, who was Antipas's financial minister (Lk. 8:3), and Manaen who was a close friend of Antipas (Acts 13:1), it seems that such a historical blunder is incredible.

Second, the Gospels speak of Herodias having a daughter previous to her marriage to Antipas (Mt. 14:6, 8-11; Mk. 6:22, 24-26, 28). This harmonizes exactly with Josephus's reference to her having a daughter named Salome from the former marriage (*Ant.* xviii.5.4 [136]). These details are more than coincidental, and thus it seems highly improbable that the Evangelists confused the Philips.

Third, some would argue that Herod the Great would not name two of his sons with the same name. It must be realized, however, that though both had the same father, they had different mothers. Furthermore, Herod the Great did have two sons named Antipas/Antipater and two sons named Herod.

Fourth, it is very probable that Herodias's first husband was called both Herod and Philip or Herod Philip. Although some argue that double names were not in use at that time, no one disputes that the Herod of Acts 12:1, 6, 11, 19-21 is the Agrippa of Josephus nor that Archelaus is Herod Archelaus.

Fifth, if the Gospel writers intended that Herodias's former husband was actually Philip the tetrarch, why did they not call him Philip the tetrarch as they had Herod Antipas within that same pericope (cf. Mt. 14:1, par. Mk. 6:14, 26, where Herod is first called tetrarch and then king)?

In light of the discussion above it seems most reasonable to conclude that the Philip in the Gospels and the Herod in Josephus are one and the same person; to do otherwise would seem to create inextricable confusion.

John's imprisonment was not enough for Herodias. At an appropriate time she arranged for a banquet, probably for Antipas's birthday, at Machaerus in Perea, in order to eliminate John the Baptist. There her daughter danced before dignitaries who served Antipas. Overwhelmed by her dance, Antipas promised with an oath to give her up to half of his kingdom. With the advice of her mother she asked for the head of John the Baptist on a platter. Although Antipas regretted his promise, he had to fulfil it because of his oath and because of the presence of his audience. John's death occurred *ca.* A.D. 31 or 32.

3. Antipas and Jesus. Antipas's relationship to Jesus is seen in three incidents. The first of these was when he heard of Jesus' ministry and, with a note of possible irony, concluded that this was John the Baptist resurrected (Mt. 14:1f.; Mk. 6:14-16; Lk. 9:7-9). Antipas thought he had eliminated a dangerous movement led by John, but now there seemed to be a more successful and remarkable people's preacher. Hence, he concluded it was John the Baptist all over again. Antipas desired to see Jesus, but was unable to do so because Jesus now withdrew from Antipas's territories. Furthermore, when Jesus did minister in his territories, Antipas did not want to have a confrontation that would cause resentment among his citizens as had occurred in his treatment of John the Baptist.

The second incident to be mentioned was Jesus' final journey to Jerusalem. While He was still in Antipas's territory of Galilee, some of the Pharisees told him that He ought to leave because Antipas wanted to kill Him (Lk. 13:31-33). Jesus told them to "Go tell that fox" that He would continue His ministry of casting out demons and healing the diseased for a short time, and when He accomplished His goal He would then go to Jerusalem to die. Apparently Antipas was fearful of Christ's popular movement, and although he threatened Him with death, it is highly improbable that he would have carried out his threat. He appeared fearful of an increase in resentment by the people who had not forgiven him for killing John the Baptist, whom they considered a prophet. Jesus intended to finish His ministry without interference. Although Antipas killed John the Baptist in his territory, he did not control the fate of Jesus.

The final incident was Jesus' trial by Antipas in A.D. 33 (Lk. 23:6-12). Since this incident is not in the other Gospels, some scholars think that this pericope is legendary. Luke, however, had an interest in the Herods, and since his addressee, Theophilus, was probably a Roman official, it is understandable that Luke would have included a pericope showing the relationship between the Herods and the prefects of Judea, especially since this pericope reports the reconciliation between Antipas and Pilate. On the other hand, since no progress in the trial of Christ is recorded in this pericope, it is understandable why the other Gospels omitted it. Some scholars argue that the source of this pericope is Acts 4:25f. (which quotes Ps.

2:1f.), but it seems that the opposite is true. Other scholars claim that the origin of this pericope was in the Gospel of Peter, but upon examination of this apocryphal work one will not find any real parallel to Luke's account of Antipas's trial of Jesus. In fact, the apocryphal account holds Antipas responsible for Jesus' death, whereas Luke does not mention his responsibility.

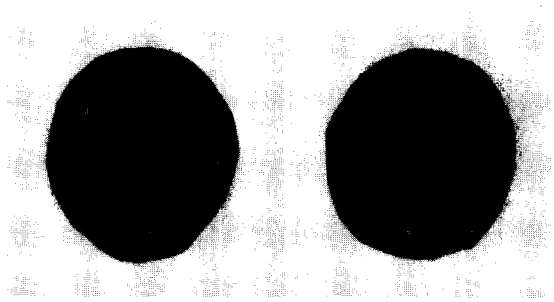
According to Luke, Pilate sent Jesus to Antipas, who was in Jerusalem for the Passover, when he heard that Jesus was from Antipas's territory, Galilee. Legally Pilate did not have to consult Antipas, but he wanted to extricate himself from an awkward situation. The Jews insisted on having Jesus killed; he felt that Jesus was innocent. Furthermore, Pilate needed to improve his relationship with Antipas because it had been strained by his killing some of Antipas's citizens (Lk. 13:1), and because Antipas had reported to Tiberius the trouble Pilate had caused the Jews when he brought votive shields into Jerusalem. As a result, Tiberius ordered Pilate to remove them immediately (Philo *Legatio ad Gaium* 299-304). Pilate had overstepped himself and needed to appease Antipas. On the other hand, Antipas did not want to give Pilate any reason to report him to the emperor, and so, after mocking Jesus, he sent Him back to Pilate without comment. As a result of this courtesy the two potentates became friends from that day forward (Lk. 23:12).

4. Antipas and Exile. In A.D. 36 Aretas attacked and defeated Antipas to avenge Antipas's treatment of Aretas's daughter when Antipas fell in love with Herodias. The Jews saw this defeat as a divine retribution upon Antipas for his killing of John the Baptist (*Ant.* xviii.5.1f. [109-119]). Tiberius ordered Vitellius, governor of Syria, to help Antipas, but before the governor attacked Aretas he went to Jerusalem with Antipas to celebrate the feast (probably Pentecost in A.D. 37). While in Jerusalem Vitellius learned of Tiberius's death (March 16, 37), and consequently called off his expedition against Aretas until he received orders from the new emperor Caligula.

Upon his accession, Caligula gave his friend Agrippa I, brother of Herodias, the land of Philip as well as the tetrarchy of Lysanius, with the title of king (*Ant.* xviii.6.10 [225-239]). Later (about August of 38), Agrippa went to see his acquisition in Palestine. When Agrippa I had received the coveted title of king, his sister Herodias became intensely jealous. She felt that her husband Antipas should have had the title for his faithful rule over the years. She prodded her husband into going to Rome to seek the same honor. Finally, in A.D. 39 Antipas and Herodias went to Rome, but meanwhile Agrippa sent one of his freedman to Rome to bring accusations against Antipas. This action resulted in Antipas's banishment to Lugdunum Convenarum, now Saint-Bertrand de Comminges in southern France, in the foothills of the Pyrenees. Caligula discovered that Herodias was the sister of Agrippa I and excused her from the exile; she chose to follow her husband. As a result, Agrippa I gained Antipas's territories (*Ant.* xviii.7.1f. [240-255]; *BJ* ii.9.6 [181-83]).

***VI. Philip the Tetrarch* (4 B.C.-A.D. 34).**–Philip was the son of Herod the Great and Cleopatra of Jerusalem, born *ca.* 22/21 B.C. In the settlement of Herod the Great's will, Augustus appointed him tetrarch over the northern part of Herod the Great's domain: Gaulanitis, Auranitis, Batanea, Trachonitis, Paneas, and Ituraea (*Ant.* xvii.8.1 [189]; 9.4 [319]; xviii.4.6 [106]; 5.4 [136]; *BJ* i.33.8 [668]; ii.6.3 [95]). The population of his territories was primarily Syrian and Greek (thus predominantly non-Jewish), and this is the reason he was the first and the only Herodian who minted coins with the emperor's image on them.

Philip the tetrarch rebuilt two cities (*Ant.* xviii.2.1 [28];



Coin of Philip the Tetrarch (4 B.C.-A.D. 34) showing head of Augustus (obverse) and the temple built by Herod to honor Augustus (reverse) (Trustees of the British Museum)

BJ ii.9.1 [168]). First, he rebuilt and enlarged Paneas, a city near the source of the Jordan. He renamed it Caesarea Philippi to honor the Roman emperor and to distinguish it from the Caesarea on the coast. It was here that Peter confessed Jesus' messiahship and received the revelation of the formation of the Church (Mt. 16:13-20 par. Mk. 8:27-30). Second, he rebuilt and enlarged the fishing village of Bethsaida (where the Jordan flows into the Sea of Galilee) to the status of a Greek *polis*. He renamed the city Julias in honor of Augustus' daughter Julia. It was here that Jesus healed the blind man (Mk. 8:22-26) and near this city He fed the five thousand and probably later the four thousand.

Philip lived a quiet and peaceable life. He was well liked by his subjects (*Ant.* xviii.4.6 [106-108]). He married Herodias's daughter Salome whose dance led to the execution of John the Baptist. They had no children (*Ant.* xviii.5.4 [137]).

When Philip died in A.D. 34, Tiberius annexed his territory to Syria. When Caligula became emperor in A.D. 37, he gave this territory to Agrippa I, brother of Herodias.

***VII. Agrippa I* (A.D. 37-44).**–Agrippa I, the son of Aristobulus (son of Herod the Great and Mariamne I) and Bernice (daughter of Herod's sister Salome and Costobarus), was born in 10 B.C. (*BJ* i.28.1 [552]; *Ant.* xix.8.2 [350]). He was the brother of Herodias.

Agrippa I was considered the black sheep of the Herodian family, for he accumulated many debts in his careless and extravagant life, especially after his mother's death. When his friend Drusus, son of the emperor Tiberius, was poisoned by Sejanus in A.D. 23, Agrippa lost the support and favor of the imperial family. Thus he was forced to retire quietly to Maltha, a fortress in Idumea, leaving many angry creditors behind him in Rome (*Ant.* xviii. 6.1f., 4 [143-47, 165]). Because of his bad situation, he contemplated suicide, but his wife Cypros pleaded with his sister Herodias for help. Sometime between A.D. 27 and 30 his uncle and brother-in-law, Antipas, provided him with a home and a small civil service position as an inspector of markets in Antipas's new capital Tiberias. Antipas and Agrippa I were not too favorably disposed toward one another, and their relationship was completely severed when at a feast (*ca.* A.D. 32/33) both had drunk too much wine and Antipas reproached Agrippa for his poverty and pointed out to the guests that the very food he was eating he owed to Antipas. Agrippa went to L. Pomponius Flaccus, legate of Syria, whom he had known intimately at Rome, but soon left for Rome after they quarrelled (*ca.* A.D. 35/36). He repaid old debts by incurring new ones (*Ant.* xviii.6.2f. [148-160]).

Upon returning to Rome he befriended Gaius Caligula. One day he made an unwise remark to Gaius, stating that

he wished Tiberius would relinquish his office to Gaius, who was much more capable of ruling. This was reported to Tiberius by one of Agrippa's servants, and consequently Tiberius put Agrippa in prison, where he remained until Tiberius's death six months later (*Ant.* xviii.6.4-10 [161-236]; *BJ* ii.9.5 [178-180]; Dio Cassius lix.8.2).

When Caligula became emperor, he released Agrippa from prison and gave him a chain of gold equal in weight to the chain he had worn in prison. Furthermore, he conferred upon him the territory of Philip the tetrarch and the more northerly tetrarch of Lysanius and gave him the coveted title of king (*Ant.* xviii.6.10 [237]; *BJ* ii.9.6 [181]). The Senate also conferred upon him the honorary rank of praetor, a guardian of the state (Philo *In Flaccum* 40), and subsequently consular rank (Dio Cassius lx.8.2).

In late summer of A.D. 38 Agrippa went to Palestine to see his newly acquired domain. His presence in the land provoked Antipas's jealousy because he had obtained the title of king that Antipas had desired for many years. Agrippa's sister Herodias was even more incensed and she persuaded Antipas to ask the emperor for the title. Antipas departed for Rome in A.D. 39. When Agrippa heard of Antipas's mission he sent one of his freedmen, Fortunatus, to Rome to accuse Antipas of conspiracy against Rome. Agrippa's move was successful; it led to the downfall of Antipas and Agrippa's acquisition of Antipas's tetrarchy and property (*Ant.* xviii.7.1f. [240-256]; *BJ* ii.9.6 [181-83]).

When Caligula was murdered in A.D. 41, Agrippa happened to be in Rome and helped Claudius ascend to the throne (*Ant.* xix.4.1-6 [236-273]; *BJ* ii.11.1-4 [204-213]; Dio Cassius lx.8.2). As emperor, Claudius confirmed Agrippa in his rule and added Judea and Samaria to his domains. He now ruled over all the territory of his grandfather Herod the Great (*Ant.* xix.5.1 [274f.]; *BJ* ii.11.5 [214f.]).

In the NT Agrippa is remembered for his persecution of the early Church in order to gain the favor of the Jews (Acts 12:1-19). He killed James the son of Zebedee and imprisoned Peter, who was released by an angel. Agrippa ordered the execution of the prison guards. He was the most liked by the Jews of any of the Herods (*Ant.* xix.7.3 [328-331]; Mish. *Sotah* vii.8).

In A.D. 44 Agrippa died in Caesarea. There are two accounts of his death. Josephus states that on the second day of a festival in Caesarea, Agrippa appeared in a theater with a robe made of silver. The people, seeing his robe sparkling in the sunlight, cried out flatteries and declared him to be a god and begged for his mercy. While the king was basking in the adulation, he noticed an owl on a rope, an omen of his imminent death. Immediately, he had severe stomach pains and was carried to his house and died five days later (*Ant.* xix.8.2 [343-352]). On the other hand, Luke states that he was in Caesarea sitting on the judgment seat dressed in royal robes and was addressing the ambassadors from Tyre and Sidon with whom he had been displeased. While speaking, the people cried out that his voice was divine. Immediately an angel of the Lord struck him down because he did not give glory to God, and he was eaten by worms and died (Acts 12:20-23).

The principal parts of the two accounts are: (1) it occurred at Caesarea; (2) he was wearing a bright robe; (3) he was flattered by the crowd; and (4) a sudden death came upon him. The two accounts could be reconstructed as follows: Agrippa went to the festival in Caesarea as mentioned by Josephus, and on the second day (Acts 12:1 speaks of an appointed day), dressed in royal apparel he made the speech to the ambassadors of Tyre and Sidon and then died five days after he was struck down by an angel of the Lord. Thus, the two narratives can be harmonized.

His survivors were three daughters, Bernice, Mariamne, and Drusilla, and a son also named Agrippa who was seventeen years of age (*Ant.* xix.9.1 [354f.]; *BJ* ii.11.6 [218-220]). Because of Agrippa II's young age his father's territories were reduced to a Roman province.

VIII. Agrippa II (A.D. **50-100**).–Agrippa II, the son of Agrippa I and Cypros, daughter of Phasael (Herod the Great's brother's son) and Salampsio (Herod the Great's daughter), was born in A.D. 27 (*Ant.* xviii.5.4 [130-32]). Although Claudius wanted to make Agrippa II king over his father's territories, two freedmen persuaded him that a youth of seventeen years of age would not be able to rule such a large territory with so many diverse elements among the population. In A.D. 50, however, two years after the death of Agrippa II's uncle and brother-in-law Herod king of Chalcis, Claudius made Agrippa II king of Chalcis (*Ant.* xx.5.2 [104]; *BJ* ii.12.1 [223]). In 53 Claudius granted Agrippa II the tetrarchy of Philip — Abilene (or Abila), Trachonitis, and Arca (the tetrarchy of Varus) — in exchange for the territory of Chalcis (*Ant.* xx.7.1 [138]; *BJ* ii.12.8 [247]). Shortly after Nero became emperor in A.D. 54, he gave Agrippa the Galilean cities of Tiberias and Tarichea and their surrounding land as well as the Perean cities of Julias (or Betharamphtha) and Abila and their surrounding land (e.g., Julias had fourteen surrounding villages) (*Ant.* xx.8.4 [159]; *BJ* ii.13.2 [252]). In appreciation for the imperial favor, Agrippa enlarged his capital city Caesarea Philippi and renamed it Neronias (*Ant.* xx.9.4 [211]). Agrippa II now ruled Philip the tetrarch's territory with the added toparchies of Galilee and the three detached territories of Abilene, two middle toparchies of Perea, and Arca.

Agrippa II's private life was not exemplary. His sister Bernice came to live with him after their uncle, who was also her second husband, Herod king of Chalcis, died in A.D. 48. Because of the rumors of incest, she resolved to marry Polemo of Cilicia, but shortly after this she returned to her relationship with her brother. This incestuous relationship became the common chatter in Rome (*Ant.* xx.7.3 [145-47]; Juvenal *Satires* vi.156-160).

Like his father Agrippa I, and his uncle Herod king of Chalcis, Agrippa II had control of the vestments of the high priest and had the right to appoint the high priests (*Ant.* xv.11.4 [405-407]; xx.1.1-3 [9-16]; 5.2 [103]; 9.4 [213]). The Romans would consult him on religious matters and this may be why Festus asked him to hear Paul at Caesarea in A.D. 59. Agrippa was accompanied by his sister Bernice (Acts 25–26).

In May of 66 the revolution in Palestine began (*BJ* ii.14.4 [284]). Although Agrippa failed to quell the revolt, he sided with the Romans all through the war of 66-70. After Nero's suicide on June 9, 68, Vespasian sent his son Titus, with Agrippa accompanying him, to pay respects to the new emperor Galba. Before they reached Rome, however, they received the news of Galba's murder (Jan. 15, 69) and Titus returned to Palestine while Agrippa continued to Rome. After Vespasian was elected emperor (July 1, 69) by the Egyptian and Syrian legions, Agrippa returned to Palestine to take the oath of allegiance to the new emperor (Tacitus *Hist.* ii.81). Agrippa sided with Titus, who was in charge of the war in Palestine (Tacitus *Hist.* v.1), and after the capture of Jerusalem (Aug. 5, 70), Agrippa was probably present at the victory celebrations in Rome over the destruction of his people (*BJ* vii.1.2f. [5-40]).

Vespasian confirmed Agrippa in the possession of the kingdom he had previously governed and added new territories that are not recorded. In A.D. 75 he and his sister Bernice went to Rome where she resumed being Titus's

mistress (as she had been during the war of 66-70). This became a public scandal (Tacitus *Hist.* ii.2). The Roman populace was against oriental queens because one of their choicest sons, Mark Antony, had been destroyed by the lust of the oriental queen Cleopatra. So Titus sent her away. When he became emperor in A.D. 79, Bernice returned again to Rome hoping to become the emperor's wife. But once again Titus sent her away (Dio Cassius lvi.18), and she returned to Palestine, fading out of the pale of history.

After this time, nothing is known of Agrippa except that he corresponded with Josephus about *The Jewish War,* praised him for his accuracy, and subsequently purchased a copy (*Vita* xv [361-67]; *CAp* i.9 [47-52]). Some theorize that Agrippa II died in A.D. 93, but it seems more likely to have been *ca.* A.D. 100. Although the Talmud (T.B. *Sukkah* 27a) implies that Agrippa had two wives, Josephus gives no indication of his being married or having any children. His death marked the end of the Herodian family.

H. W. HOEHNER

HERODIANS hə-rō′de-ənz [Gk. *Hērōdianoi*]. The name of men of influence who were partisans of the Herodian house. They are mentioned specifically in three passages of the Gospels dealing with two incidents, one in Galilee and one in Jerusalem. Mark and Matthew associate the Herodians with the Pharisees in their opposition to Jesus (Mk. 3:6; Mt. 22:16= Mk. 12:13), but neither Luke nor John mentions them. Their origin may be traced to the time when Herod the Great sought to establish his right to rule in Palestine, because Josephus speaks of those both in Galilee and Judea who were of Herod's party (*Ant.* xiv.15.10 [450]; *BJ* i.16.6 [319]).

There has been much discussion of the origin of the name. Some think that the Latin suffix *-ianus* was appended to three adjectives employed as substantives in that period of Greek literature, meaning that they were domestic servants of Herod. Others hold that the suffix really represents the true Greek ending and would have the meaning of officers or agents of Herod. When one examines the Gospel narratives, however, it seems that the Herodians were neither domestic servants nor official agents of Herod, but rather adherents or partisans of Herod who were men of standing and influence. Their outlook was friendly to the Herodian rule, and consequently to the Roman rule upon which it rested.

Evidence from the Gospels seems to indicate that they were adherents of Herod Antipas. They preferred his rule to the direct rule of the Roman prefects. Although at the time of Herod the Great's death there were some Jews who wanted to put an end to the Herodian rule, later they found the rule of the prefects was less bearable than that of the Herodians. Consequently, Herod Antipas's rule was strengthened, and some Jews wanted a united nation under him. This may account for their being in Judea as well as in Galilee.

Were the Herodians an entirely separate group, or were they affiliated in some way to another party or sect? The problem comes to the fore when dealing with the meaning of the leaven of Herod in Mk 8:15, and its replacement by the leaven of the Sadducees in Mt. 16:6. This becomes more acute if Mark's secondary reading, "the leaven of the Herodians" (p^{45} W, Θ, $f^{1, 13}$), is the correct one. The problem here is not the interpretation of the passage but whether there is any connection between the Herodians and the Sadducees. At first sight this connection seems incredible, because Herod the Great tried to discredit the Hasmonean house, and he never selected a priest from the Sadducees who was pro-Hasmonean. Rather, Herod the Great and Agrippa I selected most of the high priests from the house of Boethus (between Herod's death [4 B.C.] and Agrippa I's accession [A.D. 37] Judea was under Roman prefects and most of the high priests came from the house of Annas). It seems probable, therefore, that Boethusians who were pro-Herodian were really the Herodians, and the Sadducees were pro-Hasmonean. With Herod Antipas's marriage to Herodias (a Hasmonean on her mother's side), however, the political differences between the Boethusians (Herodians) and the Sadducees were less clear-cut. It may be possible that Antipas married Herodias to gain the support of the Sadducees. In fact, later rabbinic sources used the Boethusian name interchangeably with that of the Sadducees (Mish. *Menahoth* x.3). One might say that religiously and economically the Sadducees and the Herodians would have been very close if not identical. Although recently there has been an attempt to identify the Herodians with the Essenes, it seems impossible because the two groups are so different in character.

In conclusion, it seems best to identify the Herodians with the Boethusians who were religiously the same as the Sadducees, but were more pro-Herodian, while the Sadducees can be identified more with the Hasmoneans. As previously stated, these distinctions were less clear-cut with the marriage of Herod Antipas and Herodias. Furthermore, the Herodians and the Sadducees would have been on the same side of the political fence in opposition to the Pharisees; the former being pro-Roman while the Pharisees were anti-Hasmonean, anti-Herodian, and anti-Roman. Hence, it can be seen why the Herodians and the Pharisees, though political and religious enemies, would together oppose Jesus, because He was introducing a new kingdom that neither would have wanted. The Pharisees thought that Jesus misinterpreted the Mosaic law, and the Herodians felt that their mentor Herod Antipas should rule and have tribute money for the Roman coffers.

H. W. HOEHNER

HERODIAS her-ō-dī′əs [Gk. *Hērōdias*]. The wife of Herod Antipas, who contrived the beheading of John the Baptist (Mt. 14:3-12; Mk. 6:17-29; Lk. 3:19f.). She was born *ca.*

8 B.C., the daughter of Aristobulus and Bernice. *See* chart in HEROD.

According to Josephus (*Ant.* xviii.5.1 [109]), Herodias's first husband was called "Herod," son of Herod the Great and Mariamne II, daughter of Simon the high priest. According to Mt. 14:3 and Mk. 6:17, however, he was called "Philip" (although a few Western MSS read "Herod" in Mt. 14:3, the best reading is clearly "Philip"; the name is not given in par. Lk. 3:19). Many scholars think that the Gospel writers confused him with Philip the tetrarch, who had married Herodias's daughter Salome. This is discussed in greater detail in HEROD V.

Herodias deserted her husband, Herod Philip, and married Herod Antipas in A.D. 27 after he divorced his first wife, a Nabatean princess (Josephus *Ant.* xviii.5.1 [110f.]). After John the Baptist publicly criticized her marriage to Antipas, Herodias contrived his execution. Later she shared Antipas's exile after Agrippa I arranged his downfall.

HERODION hə-rō'di-ən [Gk. *Hērōdiōn*] (Rom. 16:11). A Roman Christian to whom Paul sent greetings. The name seems to imply that he was a freedman of the Herods, or a member of the household of Aristobulus the grandson of Herod the Great (cf. v. 10). Paul calls him "my kinsman" (Gk. *syngenēs*). In Rom. 9:3 this term is used with reference to the Jews with whom Paul shared his *génos*. Here however, Paul may be using the term in a different sense; for many of the persons referred to in ch. 16 are Jews, but he refers to only a few as *syngenēs* (vv. 7, 11, 21). Thus, some have taken it to mean a close blood relative or close Christian companion.

HERODOTUS hə-rod'ə-təs. A fifth-century-B.C. Greek historian called "the father of history," who was initially a student of geography and ethnology. His historical research took him to Asia Minor, Mesopotamia, Phoenicia, and Egypt. Employing the accounts of eyewitnesses, plus his own accounts, archeological findings, traditions, and other written material, he attempted to probe the causes of important events; however, the limitations of his outlook place him at a distance from modern historiography. Among his notations about the people he called the "Syrians of Palestine" is a reference to their having originated in the area of the Red Sea. G. WYPER

HERON [Heb. *ʾănāpâ*; Gk. *charadriós*; Lat. *Ardea cinerea*]; NEB CORMORANT. Herons are mentioned only in the abomination lists of Lev. 11:19 and Dt. 14:18. They are near relatives of the crane, stork, ibis, and bittern. The Hebrew term may have been a generic name for the seven or so varieties of *Ardeidae* still found in Palestine. Of these, the most common is *Ardea bubulcus*, the white ibis, which has Lake Huleh as its normal habitat. Closer to the Jordan, and also on the coast, are the common heron (*Ardea cinerae*) and the purple heron (*Ardea purpurea*). That several species existed in the 2nd millennium B.C. appears to be suggested by the association of the phrase "according to its kind" with the *ʾănāpâ* in Lev. 11:19. The white herons are somewhat smaller than the purple variety, the latter being about 1 m. (3½ ft.) in length with a wingspread of approximately 1½ m. (5 ft.). The beak, neck, and legs constitute almost two-thirds of the length of the body, which is small, lean, and bony. Its general appearance of size results from its long, loose feathers. The heron eats fish and other aquatic animals, and was forbidden as food in the Mosaic legislation because of the possibility that it may have fed on unclean species. R. K. H.

HESED hē'səd, **SON OF** (1 K. 4:10, AV). *See* BEN-HESED.

HESHBON hesh'bon, hesh'bōn [Heb. *ḥešbôn*; LXX *Esebōn*]; AV also ESEBON (Jth. 5:15). A Transjordanian town mentioned thirty-eight times in the Bible. For geographical and linguistic reasons it is identified with Tell Ḥesbân, a mound rising 895 m. (2940 ft.) above sea level that guards the northern edge of the rolling Moabite plain where a southern tributary to the Wâdī Ḥesbân begins to cut down sharply toward the Jordan River about 24 km. (15 mi.) to the west. The tell is about 56 km. (35 mi.) E of Jerusalem, 19 km. (12 mi.) SW of Amman, 6 km. (4 mi.) NE of Mt. Nebo, and 180 m. (600 ft.) higher than ʿAin Ḥesbân, the perennial spring with which it is associated. Between 1968 and 1976 Andrews University sponsored five seasons of excavation there; in 1978 Baptist Bible College (Pennsylvania) continued the excavation of a Byzantine church.

Tell Ḥesbân from the southeast (Heshbon Expedition, Andrews University; picture G. Unger)

I. History.–A. Biblical. The reference to Heshbon's earliest history is in Nu. 21:21-25 (cf. Dt. 2:16-37; Jth. 5:15), where it is referred to as the city of Sihon king of the Amorites, whose kingdom extended from the Jabbok in the north to the Arnon in the south, from the Jordan on the west to the Ammonites on the east (cf. Josh. 12:2; 13:10; Jgs. 11:22). Nu. 21:26-31 is an apparent attempt to justify

Israel's occupation, under Moses, of territory claimed at various times by Moab. This passage claims that at least the southern half of Sihon's kingdom, the geographical tableland known in the OT as the Mishor (Nu. 21:30; cf. Dt. 2:36), had indeed been Moabite, but that earlier Sihon had wrested it from Moabite control. As proof, the so-called Song of Heshbon (Nu. 21:27b-30), ostensibly an Amorite war taunt, was inserted in the narrative. The Israelite argument thus was that though Moabite territory was forbidden to them, the Mishor was an exception because it had been in Amorite hands during the Conquest. This claim was again made in Jgs. 11:12-28, where Jephthah denies the Ammonites ownership of the region between the Jabbok and Arnon on the basis that it was from the Amorites and not the Ammonites that it was originally taken by Israel.

The tribes of Reuben and Gad requested the territory that had been encompassed by Sihon's kingdom for their tribal allotment on the basis that it was good for their cattle (Nu. 32:1-5), but it was actually Reuben that built Heshbon and other nearby towns (Nu. 32:37), which were (according to the difficult and cryptic next verse) "changed as to name . . . and they called by [other?] names the names of the cities which they built." Josh. 13:15-23 confirms the allotment of Heshbon to Reuben, though vv. 24-28 indicate that it was contiguous to Gad's allotment. When Heshbon became a Levitical city it was considered a city of Gad (Josh. 21:34-40). If there is not outright confusion in the sources, apparently Reuben, like Simeon, soon lost its tribal identity and was absorbed, in this case, by Gad (cf. 1 Ch. 6:81 [MT 66]).

Though Heshbon is not mentioned by name in connection with the history of the united monarchy, 1 K. 4:19 puts "the land of Gilead, the country of Sihon king of the Amorites" in Solomon's twelfth district. Cant. 7:4 (MT 5) says, "Your eyes are like [with the versions] pools in Heshbon, by the gate [pl. in LXX and Vulg.] of Bath-rabbim."

The Mesha Stone (9th cent. B.C.) does not mention Heshbon, but since Medeba, Nebo, and Jahaz all came back into Moabite hands at that time, presumably Heshbon did as well. At least by the close of the 8th cent. and into the 7th cent., Heshbon appears to have been under firm Moabite control, for it figures in both extant recensions of a prophetic oracle against Moab (Isa. 15:4; 16:8f.; and Jer. 48:2, 34f.), in which its fields, fruit, and harvest are mentioned. By this time it may have been a steep tell, for fugitives stop in its shadow (Jer. 48:45). In Jer. 49:3, Heshbon appears again in the oracle against the Ammonites; perhaps it had changed hands again. Heshbon's final biblical mention is in Neh. 9:22, where it is included in a historical allusion to the Israelite Conquest.

B. Postbiblical. In the postbiblical literary sources, conveniently brought together by Vyhmeister, Heshbon is commonly called Esbus (though there are many variant spellings). Josephus says that in the 2nd cent. B.C. Tyre of the Tobiads was located "between Arabia and Judea, beyond Jordan, not far from the country of Heshbon" (*Essebōnitis, Ant.* xii.4.11 [233]). Further on he lists Heshbon among the cities (perhaps the capital) of the Moabitis, a district in dispute between the Ptolemies and the Nabateans (*Ant.* xiii.15.4 [397]). The Maccabean John Hyrcanus captured the cities of Medeba and Samaga in 129 B.C. (*Ant.* xiii.9.1 [255]). Even though Esbus is not specifically mentioned, it probably came into the hands of John Hyrcanus at this time because it is listed among the Jewish possessions in Moab during the reign of Alexander Janneus (103-76/75 B.C.), although not as a city captured by him (*Ant.* xiii.15.4 [397]).

Esbus is next mentioned in the late 1st cent. B.C. when Josephus includes *Esebōnitis* among several fortresses and fortified cities that Herod the Great built to strengthen his kingdom (*Ant.* xv.8.5 [294]); he populated it with veterans, probably to protect his border with the Nabateans. During the rule of Herod's son, Antipas (4 B.C.-A.D. 39), his territory of Perea was on the south "bounded by the land of Moab, on the east by Arabia, Heshbonitis, Philadelphia, and Gerasa" (*BJ* iii.3.3 [47]). Then at the beginning of the Jewish war (A.D. 66) the Jews sacked *Esebōnitis* (*BJ* ii.18.1 [458]). When the Roman province of Arabia Petrea was created in A.D. 106, Esbus was certainly a part of it; at least it appears there in Ptolemy's *Geog.* (v. 17), which reflects the political conditions of *ca.* A.D. 130-160. Ptolemy even gives its exact location, 68½ degrees longitude and 31 degrees latitude.

To summarize what is known about Esbus-Ḥesbân from later sources, the site should have been occupied in the following periods: 3rd cent., locally minted coins; 4th cent., Eusebius's *Onom.*'s site location; and all through this period, milestone evidence; Early Byzantine (4th-5th cent.), Christian council evidence; Late Byzantine (6th-7th cents.), continuing bishopric. Thereafter the evidence is skimpy until the Mameluke period (1260-1456), when once again the site enjoyed a resurgence of importance.

II. Excavations.–Six seasons of archeological excavation at Tell Ḥesbân have not uncovered any remains antedating *ca.* 1200 B.C. This poses a problem for the location of Sihon's Amorite capital, which may not have been found either because it is elsewhere on the site (unlikely) or because its (seminomadic) impermanent nature left no trace to be discovered (more likely). More extreme options are to consider the biblical account unhistorical or at least anachronistic (now favored by such OT scholars as Miller, Thompson, and Van Seters) or to seek the Amorite capital at another location, e.g., Jalul (a view favored by Horn). Most would at least identify Tell Ḥesbân with Greco-Roman Esbus, based on coin and milestone evidence coupled with such geographical specifications as required by Ptolemy and Eusebius. If one accepts Cross's reading of (Ammonite) Ostracon A.3 found at the site in 1978, it would support such an identification for Iron Age Heshbon as well. Altogether, the Andrews University expedition has reconstructed nineteen superimposed strata from the excavated remains, covering a period from *ca.* 1200 B.C. to A.D. 1500.

A. Iron Age Remains. The Iron Age remains (*ca.* 1200-500 B.C.) are very fragmentary due to periodic removals of earlier strata on top of the hill by later builders; nevertheless evidence for at least four strata remains. Stratum 19 (12th-11th cents.) probably represents a small unfortified village dependent on an agrarian-pastoral economy. In its earliest phase its most notable installation was a trench, 15 m. (50 ft.) long, 3.6 m. (12 ft.) deep, crudely carved out of bedrock on the tell's southern shelf. There is no real clue as to its purpose, though suggestions have included a moat for defense, storage, cultic activity, subterranean habitation, or a water channel (if not a narrow reservoir itself). In its later phase this installation was filled in with soil and into it were built both the cobbled floor of a room and a "filler" wall 2½ m. (8 ft.) wide. An egg-shaped cistern may also be associated with this phase, which produced so many loom weights that there may have been a cottage industry. Stratum 18 (10th cent.) left no *in situ* remains but its typologically later pottery was found in deep dump layers outside the contemporary settlement on the western slope; it may have been a continuation of the Stratum 19 village. Stratum 17 (9th-8th cents.) is also represented by sloping debris layers dumped to the west but it is better known for (perhaps) the initial construction, on the tell's

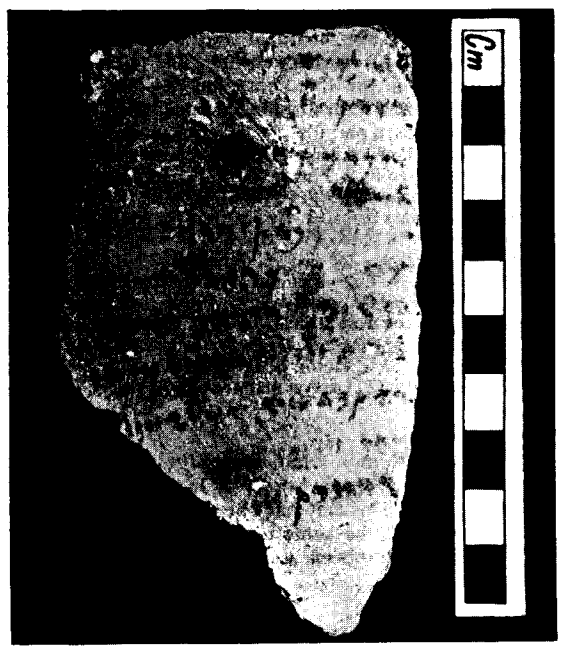
Reservoir at Heshbon. Note the header-and-stretcher construction (Iron II/Persian Period) and the plaster *in situ* on the right (Heshbon Expedition, Andrews University; picture A. Dick)

southern shelf, of an almost 2,000,000-l. (500,000-gal.) reservoir, 15 m. (50 ft.) to a side (its thrice-plastered eastern wall supplemented a bedrock cut by a header-stretcher retaining wall), and 6 m. (20 ft.) deep. Though several channels carved out of adjoining bedrock funneled rain water to the reservoir, its capacity appears to exceed the normal amount of winter rain that would fall on the catchment area; perhaps it was intended that extra water be transported up to the reservoir from below the mound. If so, this stratum may be what is left of Mesha's attempt to fortify his northern border with Israel. Could this be the pool referred to in Cant. 7:4?

Stratum 16 (7th-6th cents.) was the best preserved Iron Age stratum; its remains indicate a general prosperity and continued growth, probably clustered around a fort. A few scattered domestic units came to light on the western slope and the reservoir continued in use — perhaps a part of a way station or supply depot on the King's Highway. It was probably controlled by the Ammonites, to judge from the pottery and several ostraca found in the reservoir fill. (These ostraca have already been important in enlarging our knowledge of the Ammonite dialect and script.) Stratum 16 may have come to a violent end, considering the great quantity of ash in the debris scraped from the abandoned town into the reservoir by the (Maccabean?) rebuilders in the 2nd century.

B. Hellenistic and Roman Remains. After about a three-hundred-year abandonment of the site, Tell Ḥesbân was again occupied in the Late Hellenistic period. The remains from the Hellenistic and Roman periods (*ca.* 200 B.C.-A.D.

Heshbon Ostracon IV, containing a list of goods, e.g., grain, cattle, wine, "for the king" (*lmlk*, line 1). From the late 7th-early 6th cent. B.C. (Heshbon Expedition, Andrews University)



365) comprise at least five strata. Stratum 15 (*ca.* 200-63 B.C.) consisted primarily of a rectangular military fort at the site's summit, probably surrounded by the dwellings of dependents that were often associated with bell-shaped subterranean store silos. In Stratum 14 (*ca.* 63 B.C.-A.D. 130) Esbus came under the control of Herod the Great, probably as a border fort against the Nabateans. There is abundant evidence for extensive underground dwellings on the mound and characteristic Herodian-period family tombs in the cemetery (where two such tombs were found sealed by rolling stones). The town of Stratum 14 was destroyed by an earthquake, so Stratum 13 (A.D. 130-*ca.* 193) contained much new building. A new inn with an enclosed courtyard S of the fort testifies to the increased traffic past the road junction (*via nova* and Esbus-Livias) at which Roman Esbus was located. In Stratum 12 (*ca.* A.D. 193-284) the inn was partially rebuilt and well used. On the acropolis, earlier masonry was incorporated into what has been interpreted as a small temple — perhaps the one depicted on the Elagabalus coin minted for Esbus, a very fine example of which was found at the site in 1973. Access to the temple from the south was by a ramp. Stratum 11 (*ca.* A.D. 284-365) continued to demonstrate a modest level of prosperity. A porch was added to the temple and a double colonnade built eastward from it. The inn S of the acropolis platform was demolished, and a wide monumental stairway replaced the earlier earth ramp. The stratum came to an abrupt end with the severe earthquake of A.D. 365.

C. Byzantine and Early Arab Remains. Apart from the earthquake the transition from the Roman to the Byzantine periods was a gradual one. The Roman cemetery continued to be used. At least six strata encompass the Byzantine and Early Arab remains (A.D. 365-*ca.* 1000). Two basilica-type churches were built during this period, though at the end of the period the site was apparently abandoned.

D. Ayyubid/Mameluke Remains. Although it was a village of no particular significance during the earlier periods of Islamic rule, after a gap in the sedentary occupation Ḥesbân flourished again immediately after the Crusades. It even replaced 'Amman as the capital of the Belqa' region of central Transjordan. Its remains comprise at least three strata (*ca.* 1200-1456) that were relatively well preserved compared to earlier remains. The tell was apparently deserted in the 15th cent., but the late 19th cent. marks the gradual return to limited occupation in the Ottoman and Modern periods.

L. T. GERATY

HESHMON hesh'mon [Heb. *ḥešmôn*] (Josh. 15:27). An unidentified place on the border of Judah toward Edom, near Beth-pelet. This may have been the original home of the Hasmoneans (the name used by Josephus [e.g., *BJ* i.1.7(19)] and the rabbis [e.g., Mish. *Middoth* i.6] for the Maccabees).

HETH heth [ח]. The eighth letter of the Hebrew alphabet; transliterated in this encyclopedia as *ḥ* (guttural *h*). It came also to be used for the number eight and with the diaeresis for eight thousand. *See* WRITING.

HETH heth [Heb. *ḥēṯ*] (Gen. 10:15; 23:10 [AV]; 1 Ch. 1:13). In Gen. 23:10 the ancestor of the Hittites (Heb. *bᵉnê ḥēṯ*). In the Table of Nations (Gen. 10:15; cf. 1 Ch. 1:13) Heth is the second son of Canaan. The Hittites (AV "sons of Heth") who appear in Gen. 23; 25:10; 49:32 were probably early migrants or colonists from some part of the Hittite empire, which itself never actually extended so far south into Palestine. Perhaps an allusion to such a migration is reflected in the order of names in Gen. 10:15f., where Heth was placed between Sidon and the Jebusites.

See also HITTITES.

HETHLON heth'lon [Heb. *ḥeṯlôn*; Pesh. *ḥeṯrōn*]. A place mentioned on the ideal northern border of Israel (Ezk. 47:15; 48:1). Apparently its location would be between the Mediterranean coast and the "entrance of Hamath" in northern Palestine, or it may be identical to the "entrance of Hamath" (Nu. 34:8; Ezk. 47:15, LXX; 48:1). Perhaps the modern Heitela, NE of Tripoli, Syria, represents it. The exact location is unknown. R. J. HUGHES, III

HEW; HEWER; HEWN [Heb. *ḥāṣaḇ, ḥāṣēḇ*] (Dt. 6:11; 1 K. 5:15; 2 Ch. 26:10; Neh. 9:25; Isa. 5:2; 10:15; 22:16; 51:1; Jer. 2:13; Hos. 6:5); AV also DIG, MAKE; NEB also QUARRYMAN, DIG, LASH (Hos. 6:5); [*gāḏa'*] (Dt. 7:5; 12:3; 2 Ch. 14:3; 31:1; 34:4, 7; Isa. 10:33); AV also CUT DOWN; NEB also HACK DOWN; [*pāsal*] (Dt. 10:1, 3; 1 K. 5:18); NEB CUT, "shape the blocks"; [*ṯāzaz*] (Isa. 18:5); AV CUT DOWN; NEB STRIKE OFF; [*kāraṯ*] (Isa. 14:8; Jer. 6:6); AV also FELLER; NEB FELL, CUT DOWN; [*kārâ*] (Gen. 50:5; 2 Ch. 16:14); AV DIG, MAKE; NEB BUY; [*šāsap*] (1 S. 15:33); [*ḥāṭaḇ*] (Dt. 29:11; Josh. 9:21, 23, 27; 2 Ch. 2:10); NEB CHOP, WOODMAN; [*gāzîṯ*] (Ex. 20:25; 1 K. 6:36; 7:9, 11f.; Lam. 3:9; Ezk. 40:42; Am. 5:11); NEB also DRESSED, "blocks of"; [Aram. *gᵉḏaḏ*] (Dnl. 4:14, 23); [Gk. *latoméō*] (Mt. 27:60; Mk. 15:46); NEB CUT.

"Hew" is used to translate several Hebrew words having the meaning of "cutting." Heb. *ḥāṣaḇ* generally means to excavate a rock chamber, e.g., a cistern (Dt. 6:11; 2 Ch. 26:10) or a well (Jer. 2:13); *ḥḥṣbm*, "miners," occurs in the SILOAM inscription (lines 4, 6), describing those who tunneled through rock to supply Jerusalem with water. *Gāḏa'* expresses the idea of bringing down or "hacking" (NEB) the Asherah (Dt. 7:5; 2 Ch. 14:3). *Pāsal* means to cut into a shape, e.g., the tablets of the law (Dt. 10:1, 3), while *kāraṯ* means to cut down trees. The AV and RSV render *kārâ* by its meaning of cutting out or excavating; the NEB, on the other hand, renders the other meaning of "purchase." Though Heb. *ḥāṭaḇ* is translated "hew," it is probably closer in meaning to Arab. *ḥaṭaḇa*, meaning to "gather firewood"; it is usually found in construct with Heb. *ʿēṣîm*, "wood" or "trees." The Gibeonites were compelled to gather firewood as punishment for their subterfuge (Josh. 9:21, 23, 27). "Hewn" is generally Heb. *gāzîṯ* from the verb *gāzâ*, "cut off." It applies solely to hewn or dressed stone. The prohibition against the use of dressed stones on the altar is found in Ex. 20:25.

Aramaic *gᵉḏaḏ* appears only in Dnl. 4:14, 23, meaning to cut down a tree. "Hewn" appears twice in the NT for Gk. *latoméō*, meaning to hew out of rock.

A. L. PERLMAN

HEXATEUCH. This word, formed on the analogy of

"Pentateuch," "Heptateuch," etc., is used by modern writers to denote the first six books of the Bible (i.e., the Law and Joshua) collectively. The notion that the Hexateuch was a fundamental element of a consciously constructed history of Israel consisting of Genesis through 2 Kings was one of the offshoots of nineteenth-century literary-critical speculation. Indeed, for those scholars who held that the Pentateuch had been compiled on the basis of underlying "documents," which they designated by such symbols as J, E, D, P, H, and L, the existence of at least a Hexateuch seemed assured if only because they felt confidence in their ability to trace these alleged sources into Joshua, Judges, and even beyond. Unfortunately, it was not apparent to Wellhausen and his followers that the book of Joshua began an entirely new phase in Hebrew history, and had they appreciated this elementary fact they might have been less enthusiastic than they were about thinking in terms of a "Hexateuch."

More recent scholarship has necessitated a revision of this approach to pentateuchal criticism. Liberal writers, arguing from a seventh-century B.C. date for Deuteronomy, have thought of the canonical compositions from Joshua through 2 Kings as a so-called "Deuteronomic history," which in part overlaps and conflicts with the idea of a history of Israel beginning at Genesis and ending with 2 Kings. Joshua, Judges, Samuel, and Kings had all undergone Deuteronomic editing, it was alleged. This presumably meant that a supposed Deuteronomic school of scribes, which Wellhausen and others had credited with the production of Deuteronomy in the 7th cent. B.C., had worked over the historical material in question and had compiled and edited a variety of literary sources until something approaching the canonical writings emerged. On the ground that the basic integrity of the Hexateuch has considerably less in its favor than that of the so-called Deuteronomic history, many liberals have arrived at the conclusion that the "Hexateuch" is at best an unreal postulate. Some have even conceded the folly of attempting to recover supposed J and E sources in Joshua, Judges, and beyond, and of identifying them with their alleged counterparts in the Pentateuch proper. For conservative scholars, the fact that the "sources" of nineteenth-century literary criticism are themselves entirely illusory, and that their existence at any time is totally undemonstrated, is in itself sufficient warrant for avoiding the concept of a "Hexateuch." When it is realized further that form criticism can be employed to refute decisively any possibility of the presence of such imaginary literary entities as "J" and "E" in Genesis, and, by implication, elsewhere in the Pentateuch (*see* GENESIS II), the fallacy of pursuing such nonexistent "documents" into the post-Mosaic historical writings becomes apparent immediately.

When the evidence for a second-millennium B.C. date and wilderness provenance for Deuteronomy is examined carefully (*see* DEUTERONOMY IV), it becomes obvious that any attempt to envisage Deuteronomy as a work composed just prior to 621 B.C., when a sacred law scroll was discovered in Jerusalem, lends active support to a fraudulent view of its authorship and date. This being the case, it is difficult to see precisely how a "Deuteronomic school" could ever have existed in the first place, and much more how such a "body" could have edited the post-Mosaic historical writings. If one turns from scholarly fantasies to the factual world of Hebrew tradition, it has to be admitted immediately that there has never been any work known to the ancient Hebrews as the "Hexateuch," since the Jewish canon made an entirely separate entity of the Pentateuch, and placed Joshua and the related historical writings in a different section. The Samaritans went even further, denying canonicity to any piece of writing except the books of the Pentateuch. Had there been a Hexateuch in existence when the Samaritans limited their scriptural canon to their Pentateuch, it would most certainly have been recognized at that time. At the hands of both liberal and conservative scholars, therefore, the concept of a Hexateuch appears to have met its fate.

HEZEKI hez'ə-kī. *See* HIZKI.

HEZEKIAH hez-ə-kī'ə [Heb. *ḥizqîyâ, ḥizqîyāhû*–'Yahweh strengthens'; Gk. *Hezekias*]; AV also EZEKIAS (Mt. 1:9f.). **1.** Son of Ahaz and king of Judah. His leadership marks a significant religious era in Judah's history, being a direct contrast to the idolatry and apostasy that prevailed under his father Ahaz and his son Manasseh. Sirach ranks Hezekiah with David and Josiah among the noteworthy pious rulers (Sir. 49:4). The scriptural accounts of his reign are given in 2 K. 18:1–20:21; 2 Ch. 29:1–32:33; Isa. 36–39. Cf. also Sir. 48:17-25.

Chronologically it seems reasonable to allot the twenty-nine-year reign of Hezekiah to the years 716-687 B.C. The references in 2 K. 17:1 and 18:9f. may represent an adjusted synchronism, according to E. R. Thiele (*MNHK*, pp. 139-148).

Throughout his reign Hezekiah encountered problems with the Assyrians, to whom Ahaz had committed the kingdom of Judah as a vassal. Although Hezekiah enjoyed periods of considerable freedom, the threat of Assyrian interference and occupation became acute on several occasions.

Hezekiah initiated a drastic reaction to the idolatry that prevailed under Ahaz. Being twenty-five years of age when he began to reign, he had observed the gradual disintegration and capitulation of the northern kingdom as the Assyrians advanced southward. Keenly did he realize that Israel had been taken into captivity because of its disobedience to God's laws. Placing his confidence in God, Hezekiah was concerned to renew the covenant his people had broken. Not only in Judah, but also extending north into Israel, he led an effective reform. Acknowledging the suzerainty of Sargon II (722-705), Hezekiah apparently encountered no serious impositions even when the Assyrian king conquered Ashdod in 711 B.C. Isaiah, walking barefoot and clad as a slave for a three-year period, dramatically warned his people that it was futile for them to look to Egypt for help even though Shabaka had successfully established the 25th Dynasty about this time.

The temple was immediately reopened. Hezekiah called in the Levites to repair and cleanse their place of worship. Things primarily used for idol worship were removed to the brook Kidron for destruction. Temple vessels that Ahaz had desecrated were sanctified. In sixteen days the temple was ready for worship.

Hezekiah and the officials of Jerusalem initiated the sacrifices in the temple. As had been the custom in Davidic times, musical groups accompanied by harps, lyres, and cymbals participated. The presentation of the burnt offerings was accompanied by liturgical singing. As the people worshiped, they sang praises to God using the words of David and Asaph.

Attempting to heal the breach that had separated Judah and Israel since Solomonic times, Hezekiah sent letters throughout the land inviting the people to come to Jerusalem for the Passover. Although some ignored Hezekiah's appeal, many responded, coming from Asher, Manasseh, Ephraim, and Issachar, as well as from Judah,

to celebrate the festival. After consulting with the religious leaders, Hezekiah planned the celebration of the Passover one month later than prescribed so as to allow adequate time for preparation. In other respects the law of Moses was carefully observed; but the month's postponement was, most likely, a conciliatory measure to gain the participation of the northern tribes, who had been following the observance date instituted by Jeroboam I (1 K. 12:32). When some priests came without proper sanctification, Hezekiah prayed for their cleansing. A large congregation assembled in Jerusalem to participate in the reformation. Altars throughout the capital were removed to the Kidron Valley for destruction. Led by the priests and Levites, the people offered sacrifices, sang jubilantly, and rejoiced before the Lord. At no time since the dedication of the temple had Jerusalem seen such joyful celebration.

During this reformation Hezekiah destroyed the bronze serpent provided by Moses (Nu. 21:4-9), in order to terminate its use as an object of worship. Inspired by the king, the people went out to demolish pillars, Asherim, high places, and altars throughout the land. With the organization and employment of the priests and Levites, the tithe was reinstituted for their support. Feasts and seasons were again observed in accordance with the law.

Although Isaiah is not mentioned in the accounts of this great reformation, it is reasonable to assume that he cooperated fully in Hezekiah's attempt to restore worship according to the Mosaic law. The only reference to Isaiah's activity during the first half of Hezekiah's reign is the prophet's warning during the Ashdod rebellion in 711 B.C. This may have prevented an attack by the Assyrians on Jerusalem at this time.

Anticipating difficulties with Assyria, Hezekiah also developed an extensive defense program. Fortifications around Jerusalem were reinforced, the production of shields and weapons was increased, and combat forces were organized. To assure Jerusalem of an adequate water supply in time of siege, Hezekiah constructed a tunnel connecting the pool of SILOAM and the spring of GIHON. (This feat of engineering, whereby fresh water was channeled through 533 m. [1748 ft.] of solid rock, has attracted tourists in Jerusalem ever since its discovery in 1880, when Hezekiah's inscription was read in the tunnel.) The wall of Jerusalem was also extended to include this vital source of water, the pool of Siloam, in the city limits. Other springs of water in the surrounding area were cut off when it became apparent that the Assyrians were advancing on Jerusalem.

Having done all he could from the human standpoint, Hezekiah placed his trust in God. This attitude of confidence in God was boldly expressed by the king himself before the people assembled in the city square, with the words: "With him is an arm of flesh; but with us is the Lord our God to help us, and to fight our battles" (2 Ch. 32:8).

The biblical accounts of the Hezekiah-Sennacherib relations (2 K. 18–20; 2 Ch. 32; and Isa. 36–39) have been subjected to extensive interpretation in the light of new discoveries. Tirhakah (Isa. 37:9) was probably born *ca.* 709/708 B.C., which approximates to the period when Shabaka established himself on the Egyptian throne. Shabataka, who was associated with Shabaka in 699, became sole ruler *ca.* 697. Tirhakah became associated with Shabataka in 689 and became sole ruler in 684. Consequently, the account in which Tirhakah figures as a threat to the Assyrian king seems to refer to events after 689 B.C. (cf. K. A. Kitchen, *Ancient Orient and OT* [1966], pp. 82-84).

Sennacherib's accession to the Assyrian throne in 705 precipitated rebellions in Babylon. By 702 Merodach-baladan was forced to retreat from Babylon, leaving his throne to Bel-ibni, a native Chaldean. Subsequently, the Assyrian armies advanced westward in the Fertile Crescent, taking Sidon, Joppa, and Ekron, en route to Eltekeh, where they defeated the Egyptians. Hezekiah was forced to release Padi king of Ekron. In addition, the king of Judah paid a heavy tribute, stripping the temple of its silver and gold.

Apparently it was during this period of Assyrian pressure (*ca.* 701 B.C.) that Hezekiah became severely ill (Isa. 38:1-21; *see* BOIL). Although Isaiah warned the king to prepare for death, God intervened. The divine promise to

Siloam Tunnel inscription (8th-7th cents. B.C.), which recounts the completion of the tunnel cug by two teams who started at opposite ends and finally met (Israel Department of Antiquities and Museums)

Hezekiah was twofold — a fifteen-year extension of his life, and deliverance of Jerusalem from the Assyrian threat (Isa. 38:4-6).

In the meantime Sennacherib was besieging Lachish. Perhaps aware that Hezekiah had placed his confidence in God for deliverance, the Assyrian king sent his officers to the Fuller's Field highway near the Jerusalem wall to urge the people to surrender. Sennacherib even claimed that he was commissioned by God in demanding the capitulation of Jerusalem, citing an impressive list of conquests where other nations had trusted in their gods. Isaiah, who already in the days of Ahaz had predicted that the Assyrians would not wholly absorb the kingdom of Judah (Isa. 7:20; 8:8), now continued to reassure Hezekiah (Isa. 37:6f.).

Rumors of a Babylonian rebellion reached Sennacherib while he was besieging Libnah. Immediately the Assyrians departed, since Babylon was strategically more important than Egypt for Sennacherib. Even though he had conquered forty-six walled cities in the maritime plain, he makes no such claim for Jerusalem. In his records he boasts of taking some 200,000 Judean captives and reports that Hezekiah was shut up like a bird in a cage. Isaiah's prediction of Sennacherib's assassination was not fulfilled until twenty years later, but Hezekiah experienced immediate relief from the Assyrian threat.

Hezekiah's physical recovery and successful resistance to Assyria brought him the acclaim and recognition of surrounding nations, who bestowed upon him many gifts (2 Ch. 32:23). The powerful Babylonian leader Merodach-baladan, who was still stirring up rebellions, sent his congratulations to Hezekiah on his recovery — perhaps a recognition of the king's successful recovery from the economic hardships of Assyrian occupation (2 Ch. 32:27-29) as well as of his personal restoration to health. Hezekiah's triumph and his enthusiastic reception of the Babylonian embassy were tempered by the solemn warning by Isaiah that succeeding generations would be subjected to Babylonian captivity (Isa. 39:1-8). Nevertheless, this outstanding deliverance may have given the religious reformation a new impetus, while peace and prosperity continued under the reign of Hezekiah for another fifteen-year period. Apparently Manasseh, who became a "son of the law" at the age of twelve in 696/695, was officially made a co-regent with his father on the throne of David.

After numerous attempts to maintain control of the Babylonians, Sennacherib destroyed the city of Babylon in 689 B.C. Hearing of Tirhakah's advance, Sennacherib proceeded into Arabia toward Egypt, which may have been his real objective in his previous campaign in 701. Possibly hoping to ward off Judean interference, he dispatched letters addressed to Hezekiah personally with an ultimatum to surrender (Isa. 37:9-38). This time Hezekiah does not seem to be disturbed by this threat but confidently takes the letter to the temple and engages in prayer. Divine assurance of safety comes through a message sent by Isaiah to Hezekiah. The location of Sennacherib's army is not indicated in the scriptural account, which describes how 185,000 troops were slain through divine intervention. Immediately, the Assyrian king returned to Nineveh, so that Hezekiah's peaceful reign continued. When Hezekiah died he was buried in honor. S. J. SCHULTZ

2. An ancestor of Zephaniah (Zeph. 1:1; AV Hizkiah).

3. One of the returned exiles from Babylon (Ezr. 2:16; Neh. 7:21) who set his seal with Nehemiah on the covenant (Neh. 10:17 [MT 18]).

4. The AV rendering of HIZKIAH (1 Ch. 3:23).

HEZEKIAH, MEN OF. A body of men to whom is ascribed the compilation of a supplementary collection of Solomonic proverbs (Prov. 25:1). *See* PROVERBS, BOOK OF.

HEZEKIAH'S SICKNESS. *See* BOIL; DISEASE III.J.

HEZION hē'zi-ən [Heb. *ḥezyôn*; LXX B *Azein*, A *Azaēl*]. An ancestor of Ben-hadad I, king of Syria (1 K. 15:18).

HEZIR hē'zər [Heb. *ḥēzîr*; LXX B *Chēzein*, A *Iezir*].

1. A Levite in the time of David (1 Ch. 24:15).

2. [LXX *Hezeir*]. A chief of the people in the time of Nehemiah (Neh. 10:20 [MT 21]).

HEZRO hez'rō; **HEZRAI** hez'rī [Heb. *K ḥeṣrô, Q ḥeṣray*] (2 S. 23:35; 1 Ch. 11:37). A Carmelite, i.e., an inhabitant of Carmel, who was one of David's thirty mighty men. The ancient versions almost unanimously support the form "Hezrai," which is the reading of the AV and NEB in 2 S. 23:35.

HEZRON hez'ron [Heb. *ḥeṣrôn, ḥeṣrōn*; LXX *Asron*].

1. A son of Reuben (Gen. 46:9; Ex. 6:14), and head of the family of the Hezronites (Nu. 26:6).

2. A son of Perez and grandson of Judah (Gen. 46:12; Nu. 26:21; 1 Ch. 2:5, 9, 18, 21, 24f.; 4:1); a direct ancestor of David (Ruth 4:18f.). He appears also in the genealogy of Our Lord (Gk. *Esrōm*; Mt. 1:3; Lk. 3:33).

HEZRON hez'ron [Heb. *ḥeṣrôn*–'enclosure']. A town on the southern border of Judah between Kadesh-barnea and Addar (Josh. 15:3); the parallel passage Nu. 34:4 mentions HAZAR-ADDAR, which may be a combination of Hezron and Addar or a neighboring town. Conder suggested that the name has survived in Jebel Hadîreh, a mountain NW of Petra in the Tîh. It is to be distinguished from Keriath-hezron, which is also located in southern Judah.

HEZRONITES hez'rōn-īts [Heb. *haḥeṣrônî, haḥeṣrōnî*; LXX *ho Asrōnei*]. The name of the descendants of Hezron the son of Reuben (Nu. 26:6), and of the descendants of Hezron the son of Perez (26:21).

HIDDAI hid'ī [Heb. *hidday*; Gk. *Hatthai*]. One of David's thirty mighty men (2 S. 23:30), described as "of the brooks of Gaash." In the parallel list in 1 Ch. 11:32 the form of the name is Hurai (Heb. *hûray*).

HIDDEKEL hid'ə-kel [Heb. *ḥiddeqel*; Sum. Idiglat, Idigna; Akk. *Idiqlat*; Old Pers. *Tigrâ*; postbiblical Aram. *dîglaṯ*; cf. modern Turkish *Dicle*]. The AV rendering in Gen. 2:14 and Dnl. 10:4 for the TIGRIS River.

HIDE [Heb. *kāsâ* (Gen. 18:17; Ps. 32:5; Isa. 51:16), *kāḥaḏ* (Gen. 47:18; Josh. 7:19; 1 S. 3:17f.; etc.), *ṣāpan* (Ex. 2:2f.; Job 10:13; 14:13), *ʿālam* (Lev. 20:4; Job 6:16; 42:3; etc.), *sāṯar* (Ex. 3:6; Dt. 7:20; 31:17f.; etc.), *ḥāḇâ'* (Gen. 3:8, 10; Josh. 2:16; etc.), *nûs* (Jgs. 6:11), *ṭāman* (Gen. 35:4; Ex. 2:12; Josh. 2:6; etc.), *maṭmôn* (Job 3:21), *taʿᵃlumâ* (Job 28:11), *ḥāpaś* (Prov. 28:12), *kānap* (Isa. 30:20), *ḥaḇâ* (1 K. 22:25; 2 K. 7:12; Isa. 26:20), *mistār* ("hiding place," Ps. 10:8; Jer. 49:10; Lam. 3:10), *sēṯer* ("hiding place," Ps. 32:7; 119:114), *maḥᵃḇē'* (Isa. 32:2); Gk. *krýptō* (Mt. 5:14; 25:25; Lk. 18:34; Jn. 8:59; 12:36; Rev. 6:15f.), *kryptós* (Mk. 4:22), *apokryptō* (25:18), *apókryphos* (Lk. 8:17; Col. 2:3), *enkrýptō* (Mt. 13:33; Lk. 13:21), *lanthánō* (Mk. 7:24), *perikrýptō* (Lk. 1:24)]; AV also COVER, REMOVE; NEB also CONCEAL, SHELTER, WITHDRAW, BLIND, etc.; **HIDDEN** [Heb. *sāṯar* (Gen. 4:14; Ps. 19:12 [MT 13]; 38:9 [MT 10]; etc.), *ʿālam* (Lev. 4:13; 5:2-4; Nu. 5:13; etc.), *ṭāman* (Dt. 33:19; Josh. 7:21f.; Job 3:16; Ps. 31:4 [MT 5]), *kāḥaḏ* (2 S. 18:13; Ps. 69:5 [MT 6]; 139:15), *ḥāḇâ'* (Isa. 42:22), *maṭmôn* (Prov. 2:4), *sôḏ* (Prov.

11:13), *nāṣar* (Isa. 48:6), *ṣāpan* (Josh. 2:4), *bāṣar* (Jer. 33:3); Gk. *krýptō* (Mt. 13:35, 44; 1 Tim. 5:25; Rev. 2:17), *kryptós* (Mt. 10:26; Lk. 12:2; 1 Cor. 4:5; 1 Pet. 3:4), *apokrýptō* (Mt. 11:25; Lk. 10:21; 1 Cor. 2:7; Eph. 3:9; Col. 1:26), *lanthánō* (Lk. 8:47), *aphanēs* (He. 4:13)]; AV also SECRET, 'lay privily," MIGHTY, etc.; NEB also BURIED, CONCEALED, SHIELDED, etc.

A large number of words are used in the English versions to render the concept of "hiddenness." A common usage of this idea in the Bible is that of "hiding" as the ordinary action of concealment for physical protection. In the OT, Moses' mother hid him at the river's brink to protect him from Pharaoh's command to kill all Hebrew boy babies (Ex. 2:2f.; cf. He. 11:23); Rahab the harlot hid two men prior to Israel's conquest of Jericho (Josh. 2:4f.); and David was urged by Jonathan to go into hiding when King Saul wished to kill him (1 S. 19:2; 23:19; 26:1). The command to hide came to Elijah from God (1 K. 17:3), and God provided for him. Yet this type of hiding was not always successful, as when Ahaziah was killed while hiding in Samaria (2 Ch. 22:9), and also in the case of evildoers who try to hide themselves from the eyes of God (Job 34:21f.). Occasionally in the OT the concept is used for that which is secret and concealed, e.g., sin (Job 31:33; Ps. 32:5; cf. 19:12) or love (Prov. 27:5; cf. 11:13).

Yet in the OT the usage of the idea of "hiddenness" goes far beyond physical actions and develops as an important theological concept. The wide variety of Hebrew synonyms for expressing the thought is an indication of the distinctive attitude of the Hebrew mind in its "deep sense of the hidden mystery of God" (Richardson, *Intro. to the Theology of the NT,* p. 58). "The mind of Israel was characterized by a profound sense of the hiddenness of things, in marked contrast to Greek thought with its sanguine capacity of reason to probe the inmost secrets of reality" (*RTWB,* p. 108). This is the presupposition of the doctrine of revelation, viz., that God is hidden from people's sight and therefore must reveal Himself if mankind is ever to know Him or His purposes.

In part, God's own "hiddenness" is due to His transcendence, His being "wholly other" than human. God is invisible to mankind and not observable like human beings or objects in the world (1 K. 8:12; Dt. 4:11). He and His wisdom are withdrawn from mankind and "hid from the eyes of all living" (Job 28:21). Yet nothing can be "hidden" from this God who controls all being; "everything that is hid he brings forth to light" (Job 28:11; cf. Ps. 139:15). "The OT takes God's omnipresence and omniscience more seriously than any other religion" (*TDNT,* III, 967).

But "hiddenness" is also a characteristic of God's dealings and presence in the world. This is due chiefly to the results of human sin. In the book of Isaiah the people are told: "Your iniquities have made a separation between you and your God and your sins have hid his face from you so that he does not hear" (Isa. 59:2; cf. Ezk. 39:23f.; Hos. 5:3). From a faithless generation God is said to "hide his face" (Dt. 31:16-18), leaving people in despair about His absence (Ps. 104:29; 143:7; 89:46 [MT 47]; etc.). Throughout the centuries "Israel had to bear the mystery of God's withdrawal and often spoke of the experience and trials which this entailed." Her experience taught her that "all true knowledge of God begins with a knowledge of his hiddenness" (von Rad, II, 374, 377; cf. Barth, pp. 179-204).

Though Yahweh may be hidden from His people, His people cannot hide from Him, for His eyes are "upon all their ways . . . nor is their iniquity concealed" from His eyes (Jer. 16:17). No one can find a place so secret that God cannot see him (Jer. 23:24; cf. Isa. 29:15); such was the experience of Adam and Eve when they tried to hide themselves among the trees of the garden (Gen. 3:8, 10; cf. 4:14). Death was the result for Achan, who broke the command not to steal during the battle of Jericho and was found out by Joshua after a word from Yahweh (Josh. 7:19-21). Ps. 139 gives a vivid portrayal of the vanity of trying to flee from God's omniscience.

The righteous person gives up this useless flight, no longer trying to conceal his iniquity (Ps. 32:5) but confessing every innermost sin (69:5) and disclosing all his perversity to God. This acknowledgment brings restored fellowship to him and enables him to receive the wonder of God's forgiveness (cf. Pss. 38, 51, 102, 130, 143, etc.).

Restored fellowship brings comfort to the righteous person, who finds now that his way is not hidden from the Lord (Isa. 40:27) and that he is given a share in the "hidden life" of Yahweh. God "covers" the righteous and hides them in the "shadow of his hand" (Isa. 49:2; 51:16); He is for them "a hiding place" (Ps. 27:5; 32:7; 119:114; etc.). According to Anderson, "the Hebrew *sēṯer* is the favourite term of the Psalmists. . . . The idea may have originated in the ancient belief and practice that the sanctuary offered a right of asylum" (II, 836).

Yet Yahweh is in continuing control of His revelation and may conceal it (Prov. 25:2), even from His prophets (2 K. 4:27). Increased incapacity to receive revelation may lead to increased concealment by Yahweh (Isa. 57:17) and "even the righteous knows the painful experience of God's concealing His face or His ear from him" (*TDNT,* III, 969; cf. Job 13:24; 34:29; Ps. 44:24 [MT 25]; etc.). This distress is almost unbearable (Ps. 69:17 [MT 18]) and the psalmist wonders how long the pain and sorrow of it all will last (13:1f. [MT 2f.]; *sāṯar* here can be rendered "turn your face" as *apostréphō* in the LXX, and "denotes divine displeasure or even punishment," as in Isa. 54:8; 59:2; etc.; see Anderson, I, 128). This experience of God is as a bear or lion waiting in ambush, ready to attack (Lam. 3:10). The believer's only hope is the remembrance of Yahweh's "steadfast love" and "faithfulness" (Lam. 3:22f.). The lamenter in Scripture "flees from the hidden God to the revealed God" in prayer (*TDNT,* III, 969).

As God's commandments (law) are like "hidden treasures" (Prov. 2:4) and His promises true (Ps. 119:140; cf. 2 S. 22:31), the "immediate task of the righteous is to hide this treasure in himself" (*TDNT,* III, 970; cf. Ps. 119:11, AV "Thy word have I hid [*ṣāpan*] in mine heart, that I might not sin against thee"). God's demand, however, is that what He says and does is not to be kept hidden but is to be proclaimed joyfully in the worshiping community (Ps. 40:10 [MT 11]; cf. 22:22 [MT 23]) and to the coming generations (78:4).

In the NT a similar pattern may be observed. The main words (Gk. *krýptō, kryptós,* and *apokrýptō*) agree with the oldest sense of the Hebrew terms, meaning to "cover" or "conceal." Jesus' simile of the kingdom of heaven being "like treasure hidden in a field, which a man found and covered up" (Mt. 13:44) is reminiscent of Yahweh's command to Jeremiah to hide a linen cloth by the Euphrates and then to dig it up again (Jer. 13:4-6), an action that became a sign of judgment on arrogant Judah. This concept of concealment is found throughout the Synoptic Gospels, where "everything divine is primarily and essentially hidden" and is "accessible only through God's revelation" (*TDNT,* III, 973, cf. 967f.). God has finally revealed Himself fully in the life and work of Jesus Christ, but the revealing of the salvation found in Him is "concealed" from the unreceptive, the proud, and the opinionated. Revelation is closed to human unreceptivity (Lk. 18:34; 19:42; cf. 9:45), for these things are "hidden from

the wise and understanding" but are revealed to "babes" (Mt. 11:25; Lk. 10:21; cf. Mt. 13:35). Jesus impresses on His disciples that God's cause, having emerged from its original concealment, is now given over to them, and that now God will bring it out in the open (Mk. 4:22 par.). God's kingdom, like a buried treasure, is now found and brings great joy (Mt. 13:44); or like a tiny morsel of leaven mixed with a measure of meal, it will come forth from a most insignificant beginning (Jeremias, pp. 201, 149). Selfishness in hiding this message is condemned (Mt. 25:14-30 par.). The disciples' lives are to radiate its light, keeping the message as conspicuous as a city set on a hill (Mt. 5:14).

Though God's revelation to sinful mankind may be given and yet be "concealed," a person's secret acts or motives cannot be kept hidden from God. If one tries to cover his hypocrisy, one is engaged in a futile attempt to hide the truth (Mt. 10:26; Lk. 12:2), because "before God no creature is hidden" (He. 4:13; Gk. *aphanēs*). "Nothing escapes the scrutiny of God's eyes and before him everything lies exposed and powerless" (Bruce, p. 83).

Yet for the person with an "inward beauty of character" (Beare, p. 155; cf. 1 Pet. 3:4), even his concealed good deeds will ultimately become known, for "they cannot remain hidden" (1 Tim. 5:25). At the final time of judgment, when the secret acts of people are brought to light, their motives will be the grounds for judgment, for at that time every person's work will be truly understood. This revelation of the counsels of the heart will be the basis for commendation from God (1 Cor. 4:5). Here "Paul's readers might learn with relief that the time of ultimate judgment is not necessarily a dreadful day of wrath. At last everyone will be fully understood, and God will disclose the basis for true praise" (W. F. Orr, *I Corinthians* [*AB*, 1976], p. 181).

This God who is hidden by nature has given His people a share in His "hidden life" (Rev. 2:17) by revealing His "secret and hidden wisdom" (1 Cor. 2:7) in the One "in whom are hid all the treasures of wisdom and knowledge," Jesus Christ (Col. 2:3). This wisdom is no secret, esoteric knowledge concealed from the "uninitiated" and claimed by false teachers. For the apostle, if there is a secret at all it is in Christ (see Moule, p. 86). This message of Christ, hidden for ages and generations, has now been made plain for all (Eph. 3:9), and for God's people to find new life through the "hiding" of their lives in His (Col. 3:3).

The NT uses this concept in the physical sense in its account of Jesus' detection in the crowd of the hemorrhaging woman (Lk. 8:47). Jesus could not escape the notice of the people when He was in Tyre and Sidon (Mk. 7:24), though in two instances He was able to hide from His enemies (Jn. 8:59; 12:36). The book of Revelation gives a vivid picture of people hiding in caves in the mountains, attempting to escape from the One seated on the throne and from the wrath of the Lamb (6:15f.).

HIEL hī'əl [Heb. *hi'ēl*; Gk. *Achiēl*]. A Bethelite who according to 1 K. 16:34 rebuilt Jericho in the time of Ahab (874-853 B.C.). This was done in defiance of the severe curse imposed by Joshua upon anyone who would dare to rebuild the city, which had been devoted to God. Such an act of rebuilding would cost the life of the person's firstborn as "payment" for the foundations, and his youngest son for the establishing of the gates (Josh. 6:26). The curse had its effect upon Hiel, who lost his eldest son Abiram and his youngest son Segub while the reconstruction was in progress. Precisely how they died is uncertain, but their demise was seen as the fulfillment of Joshua's curse. Human sacrifice was practiced at this period, and Garstang reported finding what he interpreted as foundation sacrifices of children at OT Jericho (Tell es-Sulṭân). In contemporary society, a period of acute crisis was sometimes thought to merit the sacrifice of a human being, as illustrated by the way in which the king of Edom offered up his eldest son to appease the national deity and gain success in battle (2 K. 3:27; cf. Mic. 6:7). R. K. H.

HIERAPOLIS hī-ə-rap'ə-lis, hēr-ap'ō-lis [Gk. *Hierapolis*—'holy city'] (Col. 4:13; Sib. Or. 5:310; 12:280). A city of Asia Minor. The name originally may have been derived from Hiera, a mythical Amazon queen.

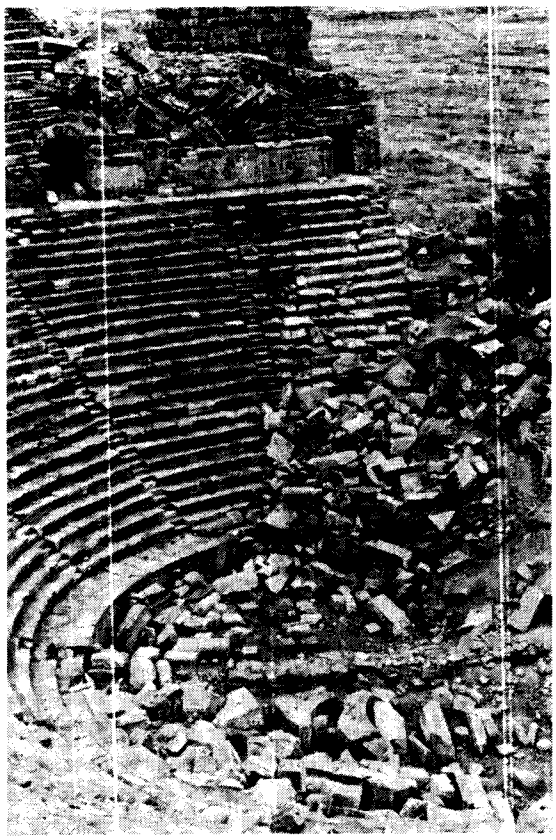
The city is situated nearly due E of Ephesus in the Anatolian hinterland, 10 km. (6 mi.) N of Laodicea and 19 km. (12 mi.) NW of Colossae, on a 150-m. (500-ft.) terrace overlooking the Lycus River. It was famed for its Plutonium or Charonion, a small hole opening deep into the earth and emitting deadly fumes, the vapors of which Strabo intimates poisoned even birds in flight (*Geog.* xiii.4.14). Likewise it is known for its gushing medicinal mineral pools, which flow at the rate of about 38,000 l. (10,000 gal.) per minute and deposit about 20 cubic m. (26 cubic yds.) of limestone sediment each day, so that the cliffs have been likened to an immense frozen cascade, whence also the nearby city's modern name Pamukkale, "cotton castle." *See* Plate 44. Hierapolis was thus positioned in a natural setting for the development of ancient religious traditions.

Colonizers from Macedonia and Pergamum established the Greek city in the early 2nd cent. B.C. when the Pergamenians wrested control of the area from the Seleucids. It then passed into Roman hands in 133 B.C. The city was subject to earthquakes (Tacitus *Ann.* xiv.27) and the gap in the presence of coins from the time of Nero to Trajan indicates that Hierapolis must have suffered a severe shock *ca.* A.D. 60.

The colonnaded main street of Hierapolis ran in a southeasterly direction; among the ruins (which fortunately have not suffered from local scavengers of building materials) can be found traces of Roman baths, arches, a gymnasium, a great "statuary" hall, both a Greek and a Roman theater (the latter being one of the best preserved in Asia Minor), and four possible churches, one of which seems to have been an octagonal building, probably from the 4th century.

The Phrygian god Sabazios was adopted at Hierapolis, symbolized by the snake, and worshiped under the name of Echidma. The Anatolian goddess Cybele under the name of Leto was likewise worshiped, together with her son Larbenos. Their sanctuaries were established very near the sacred Plutonium. During the Roman period other deities such as Asclepius and Isis were also introduced. A large Jewish community was established here, but it gradually disappeared with the growth of Christianity.

Christianity was probably brought to the city by Paul or one of his followers (W. M. Ramsay suggested Timothy rather than Paul, but this thesis depends on the meaning given to Col. 2:1). Some later traditions suppose that Philip the evangelist was the first Christian messenger to Hierapolis. At least it is fairly certain according to Polycrates of Ephesus that Philip spent his latter days in this vicinity, and two of his daughters were buried here (Eusebius *HE* iii.31.3). The existence of a church at Hierapolis in the 1st cent. is attested by Col. 4:13. Christianity apparently



General view of the Roman theater at Hierapolis (L. T. Geraty)

flourished in this city, and during the 4th cent. it seems to have been sufficiently strong to have had the Plutonium filled with stones, so that today it is no longer recognizable. In Byzantine times the city was the seat of a metropolitan bishop. Two of its most renowned residents were the Christian Papias and the philosopher Epictetus.

HIEROGLYPHICS hī-rō-glif'iks [< Gk. *hierós*–'sacred' + *glýphein*– carve']. A system of writing using pictorial characters, especially the system of the priests of ancient Egypt. *See* ARCHEOLOGY OF EGYPT II.B; EGYPT V.C-E; WRITING.

HIERONYMUS hī-ə-ron'ə-məs [Gk. *Hierōnymos* (also Latin form of the name Jerome)] (2 Macc. 12:2). One of the regional governors in Palestine at the time of Antiochus V who would not permit the Jews to live in peace and security.

HIGGAION hi'gī-on, hi-gā'on [Heb. *higgāyôn*] (Ps. 9:16 [MT 17]). A musical notation of uncertain meaning. It is derived from the verb *hāgâ*, "mutter, speak, ponder," and occurs elsewhere with the meaning "meditation" (Ps. 19:14 [MT 15]) or "murmur" (Lam. 3:62, NEB). In Ps. 92:3 (MT 4) it occurs in a musical context, but the variety of translations indicates the uncertainty of its meaning (AV "solemn sound"; RSV, NIV "melody"; JB "rippling"; NEB "sounding chords"). In view of the general connotation of a quiet or low sound, JB's translation "muted music" in Ps. 9:16 seems preferable to Mowinckel's "musical flourish" (*Psalms in Israel's Worship* [Eng. tr. 1962], II, 211).

HIGH. Used by the AV in the obsolete sense of "haughty" in Ps. 101:5; Prov. 21:4; Isa. 10:12; etc.

HIGH DAY. Found in Gen. 29:7 as a rendering of the Heb. *yôm gāḏôl*, literally "great day" (NEB "the sun is still high"). The Hebrew means the day at its height, broad daylight, as contrasted with the time for getting the cattle to their sheds for the night (cf. Fr. *grand jour*). In Jn. 19:31, "high day" renders Gk. *megálē hēméra*, literally "great day" (NEB "day of great solemnity"), and refers to the Passover sabbath, a sabbath of special sanctity.

HIGH, MOST. *See* GOD, NAMES OF.

HIGH PLACE [Heb. *bāmâ*]. The Hebrews undoubtedly borrowed the word (as well as the installation itself) from the Canaanites, who in turn derived it from a common Semitic vocabulary where (in Akkadian and Ugaritic) it meant literally "back" or "ridge." It is now recognized that it could have the same literal meaning in Hebrew, though it also came to have the following extended meanings: "cultic platform," "sanctuary," "altar," "grave mound."

  H. Features of the Typical High Place
II. Archeological Evidence
  A. Surrounding Countries
  B. Petra
  C. Palestine
  D. Models and Survivals

I. Biblical Evidence.—A. Poetic Usage. Among the nearly one hundred occurrences of *bāmâ* in the Hebrew OT, at least a dozen of them are best understood in the primitive, literal sense. Interestingly, each of these examples occurs in poetry. In the Lament of David (2 S. 1:19, 25), *bāmâ* refers to the ridge of Mt. Gilboa where Saul was slain. It is used in a similar way in an oracle of Micah against the temple, "Jerusalem shall become a ruin, and the temple mount a wooded 'ridge' [or 'height']" (3:12; this prediction was later remembered in the context of Jeremiah's Temple Sermon [26:18] and probably saved Jeremiah's life). In the taunt against the king of Babylon (Isa. 14:14), secondarily applied to Satan, the vocabulary used is identical to that found in Canaanite mythology, "I will climb on the *back* of the cloud; I will make myself like the Most High." This terminology is used also in descriptions of Yahweh in Job 9:8; Am. 4:13; and Mic. 1:3, where He is pictured as one "who treads on the *back* of Sea" or "Earth." "Sea" and "Earth" were mythological symbols

in Canaan of the powers of chaos. It is possible that biblical poetry portrays Israel's God as having power over the Canaanite deities who were merely personifications of nature, but it is more likely that the authors were only making use of poetic imagery. That is certainly the case in the Song of Moses (Dt. 32:13), the Blessing of Moses (Dt. 33:29), and the blessing on sabbath observance (Isa. 58:14), where it is Israel whom Yahweh causes to ride on the back of its enemy. In the royal Psalm of thanksgiving (Ps. 18:33 [MT 34] par. 2 S. 22:34) and the Psalm of Habakkuk (Hab. 3:19), which is dependent on it, this corporate victory is individualized to celebrate personal victory. Here Yahweh is the one "who makes my feet like (the feet of) does, who makes me tread on the *back* (of Death)."

B. Prose Usage. In the majority of OT (mostly prose) occurrences, however, *bāmâ* has a meaning derived from the original "back" or "ridge." The term was first applied to the summits of either natural or artificial hills or mounds that were set aside for cultic purposes. As the cult at these open-air sites became more institutionalized, shrines were sometimes built and operated by cultic functionaries. The designation "high place" then came to refer not so much to the elevation of the site but rather to denote the entire installation wherever it was located.

C. Pre-Monarchial Period. The earliest chronological reference to such high places is found in the Amorite victory song of Heshbon (Nu. 21:28): "A fire went forth from Heshbon, a flame from the city of Sihon. It consumed the cities of Moab, engulfed the high places of Arnon." It was undoubtedly from a similar high place that Balak and Balaam surveyed the camp of Israel (Nu. 22:41; cf. Josh. 13:17) during their passage through Moab. Yahweh warned Moses of the high places in Cisjordan (Nu. 33:52; cf. Dt. 7:5), but near the time of the Exile these Moabite high places still existed (Isa. 15:2; 16:12; Jer. 48:35; cf. line 3 of the Moabite Stone: "I made this high place for Chemosh").

Apparently the Canaanite practices at the high places were proscribed for Israel rather than the use of such sites themselves. At least this is the inference derived from one of the sanctions at the end of the Holiness Code in which Yahweh says, "If you do not obey me, then I will destroy your high places, and knock down your incense altars, and throw your corpses on the memorial stelae of your idols, and my spirit will loathe you" (Lev. 26:30; cf. Ezk. 6:3-6). In any case, the high place seems to have survived as a legitimate site for sacrifice and worship in Israel until, ideally, the building of Solomon's temple (1 K. 3:2f.); in practice, however, it continued till the reforms of Hezekiah (2 K. 18) and Josiah (2 K. 23).

D. United Monarchy. Three Israelite high places are named in connection with permissible worship. Ramah (modern er-Râm) and Gibeath-elohim (Tell el-Fûl) both figure in the account of Saul's quest for Samuel in 1 S. 9–10. Both David and Solomon patronized the high place at Gibeon (modern el-Jîb, though the actual high place was very possibly the nearby Nabi Samwil or the traditional tomb of Samuel), where at the tent of meeting the priestly family of Zadok sacrificed on an altar and Solomon burned incense (1 Ch. 16:39; 21:29; 1 K. 3:2-4; 2 Ch. 1:3, 13). All three of these sites were in Benjamin just N of Jerusalem. Neither Ramah nor Nabi Samwil has been excavated, and though Tell el-Fûl was partially excavated by Albright and P. Lapp, only an Israelite fortress was found.

Solomon, however, supported not only the worship of Yahweh, but on the hill opposite Jerusalem he built high places to Chemosh of the Moabites, Molech (or Milcom) of the Ammonites, and Astarte of the Sidonians (1 K. 11:7f.; 2 K. 23:13). If not before, then certainly at this time, high places became associated with traditions and practices that tended to degrade Israelite religion.

E. Northern Kingdom. To prevent his subjects from worshiping at Jerusalem, where he would run the risk of losing their political allegiance as well, Jeroboam I encouraged the building of shrines, complete with illegitimate priests, at the local high places, and set up calves as pedestals for Yahweh at Dan and Bethel (1 K. 12:31f.; 13:33). This activity resulted in an oracle from an unnamed Judean prophet predicting the overthrow by Josiah of the shrines with their altars at the northern high places (1 K. 13:2, 32). Much later, Amos prophesied the desolation of these high places (Am. 7:9), and the Bethel high place was singled out by Hosea especially as deserving of condemnation (Hos. 10:8; cf. 4:13). In summary, 2 K. 17:9-12 attributes the fall of the northern kingdom and the Israelites' captivity in Assyria to this syncretism and idolatry. Even during the Exile, however, the high places had their devotees, because the Assyrians settled foreigners in the territory of the northern kingdom who repopulated the high places with priests to officiate in the shrines (2 K. 17:29-32).

F. Southern Kingdom. In the meantime, the kingdom of Judah was not free from the same syncretistic practices. In the reigns of most of the kings, high places were built and their cults patronized; those specifically mentioned include Rehoboam (1 K. 14:23; 2 Ch. 11:15), Asa (1 K. 15:14; 2 Ch. 15:17), Jehoshaphat (1 K. 22:43; 2 Ch. 20:33), Jehoram (2 Ch. 21:11), Jehoash (2 K. 12:3 [MT 4]), Amaziah (2 K. 14:4), Azariah or Uzziah (2 K. 15:4), Jotham (2 K. 15:35), and Ahaz (2 K. 16:4; 2 Ch. 28:4, 25). Though Asa (2 Ch. 14:3, 5 [MT 2, 4]) and Jehoshaphat (2 Ch. 17:6) apparently made some effort to stem the tide, the first real reform is attributed to Hezekiah, who destroyed the high places and their appurtenances throughout the land and attempted to centralize the cult in Jerusalem (2 K. 21:3; 2 Ch. 33:3, 19).

The reform was shortlived, however, because his son Manasseh rebuilt the high places, equipping them with the customary altars and Asherim (2 K. 21:3; 2 Ch. 33:3, 19). Jer. 7:31 (cf. 19:5) adds that they built the high place of Topheth in the valley of Ben-hinnom and sacrificed their children by fire. Obviously by this time the term "high place" had lost its connotation of height and connoted instead the standard cultic installation. After the captivity, conversion, and restoration of Manasseh, the people continued to sacrifice at the "high places," but only to Yahweh (2 Ch. 33:17). This reform, too, was a fleeting one.

It was left to Josiah to effect reforms that would really make an impact on the nation. He purged all the high places, from Samaria in the north to Beersheba in the south (including the Bethel high place, in fulfillment of prophecy [2 K. 23:16]), destroying their altars, incense stands, Asherim, pillars, and carved and molten images, and slaughtering their priests (2 K. 23; 2 Ch. 34:3-7). Again, as prophets looked back over the history of Israel, the high places were constantly adduced as primary reasons for Yahweh's displeasure with His chosen people (Ps. 78:58; Ezk. 16:16; 20:28f.; cf. Mic. 1:5; Jer. 17:3; Ezk. 36:2; 43:7-9).

G. Deities Worshiped at High Places. Though the worship of Yahweh appeared to predominate in many periods of Israel's history, syncretistic tendencies were usually present and were often fostered by what occurred at the high places. Among the other deities worshiped there was Baal (Jer. 19:5; 32:35), the fertility-god par excellence of the Canaanites. His proper name was Hadad, though he was popularly referred to as Baal, meaning "lord." Later he was identified with Greek Zeus Helios (the sun), who in

turn was identified with the Roman Jupiter. Child sacrifice by fire, undoubtedly for votive offerings, was practiced in his cult.

Worship of Chemosh, Milcom or Molech, and Ashtoreth is mentioned in 1 K. 11:5-8; 2 K. 23:13. Ashtoreth was the main Semitic fertility-goddess worshiped throughout the ancient Near East, though in Mesopotamia, where she was also an astral deity, she was called Ishtar. Later she was identified with Greek Aphrodite and Roman Venus. Palestinian excavations often recover images of Ashtoreth that depict her as a nude woman with her sexual features accentuated; these artifacts are usually referred to as Astarte figurines or plaques (Astarte being the Greek transliteration of Ashtoreth), though it is now thought that many of these actually represented Asherah, the supreme Canaanite mother goddess, whose memory was obliterated in the Iron Age through the spread of the Mesopotamian Ishtar cult.

Chemosh was the name or (more probably) the title of the god of the Moabites, which in line 17 of the Moabite Stone is compounded with Athtar, the astral deity. Again, Molech or Milcom is probably not the name but the title of the national god of Ammon. From Jgs. 11:24 it is apparent that these two deities were actually one. Both, then, were local manifestations of the astral deity, the Venus star, Athtar. Finally, demons as well as deities were worshiped at certain high places (2 K. 23:8; cf. Lev. 17:7; 2 Ch. 11:15).

In general, one detects a strong interest in fertility and the reproductive powers of nature at the high places, and of course it was this that called forth strong denunciations from the prophets (Hos. 4:13f.; Isa. 57:3-10; Jer. 3:2; 1 K. 14:24).

H. Features of the Typical High Place. From such references as Lev. 26:30; Nu. 33:52; Dt. 12:2f.; 1 K. 14:23; and Ezk. 6:3-6, we may identify the essential features of a typical *bāmâ*, which was usually (though not always) situated on the wooded heights of a hill or mountain.

Standing stones (Heb. *maṣṣēḇôṯ*, sing. *maṣṣēḇâ*, usually translated "pillar") were commonly associated with high places. Etymologically, a *maṣṣēḇâ* could be any stone that is "set up"; its unnatural position would then serve the purpose of being some kind of a reminder. From the biblical point of view, the practice was both permitted (Gen. 28:18; 31:45-52; Ex. 24:4) and denounced (Dt. 16:22; 2 K. 23), depending, of course, on the purpose for setting up the stone. Though these stones have been variously interpreted as phallic symbols, sacred abodes of animistic spirits, and idols or representations of deity, a comprehensive study of standing stones by Graesser suggests that they normally perform one of four kinds of functions: (1) memorial, to mark the memory of a dead person or the position of his grave (Gen. 35:20; 2 S. 18:18); (2) legal, to mark a legal relationship between two or more individuals, such as boundary and treaty stones (Gen. 31:45-52; Ex. 24:4; Dt. 19:14; 27:17; Josh. 24:26f.); (3) commemorative, to commemorate an event and especially to call to mind its participants (1 S. 7:12; 15:12); (4) cultic, to mark the sacred area where the deity might be found or even the exact point where the deity is cultically immanent, i.e., where worship and sacrifice will reach the deity (Gen. 28:16-18; 35:14; 2 K. 3:2; 10:26f.). Naturally, the standing stones erected at the high places were most closely associated with this last function. As Graesser notes, "Cultic stones had a special tendency to assume transferred functions so that for many these stones 'enabled' or 'effected' the deity's presence" (p. 37). This is why certain biblical writers could consider standing stones to be idols (Lev. 26:1; Mic. 5:13 [MT 12]). At times, *maṣṣēḇôṯ* may even have been set up to serve as surrogates for worshipers themselves who wished to be continually represented before their deity at the high place.

Another object common to the high places was the *peger* (pl. *pᵉgārîm*), usually translated as "corpse." How such a meaning related to the *bāmâ* was enigmatic till the cognate *pgr* was found on two Ugaritic stone stelae recording a sacrifice to Dagon. Nieman suggests that the word refers to the stones themselves and that it appears with this meaning in such biblical passages as Ezk. 43:7, 9; Lev. 26:30. This suggestion permits the inclusion of "memorial stones" or "stelae" among the cult objects to be found at the high place.

Two kinds of altars are often mentioned in connection with the high place. The word *mizbē(a)ḥ* is the commonest designation for altar in the OT. Derived from the verb *zāḇaḥ*, "sacrifice," it does not specify the type of sacrifice made on it. *Ḥammānîm* (always in the plural) were also altars, but a type used exclusively for the burning of incense at the high place. Till recently this term was misunderstood and usually translated as "sun statues" (ASV) or "images" (AV). Known from excavations as small limestone altars with a "horn" or projection at each corner, their identification was finally assured by the appearance of the word itself on an altar from Palmyra. Thus the meaning "incense altar" well suits the meaning of the verb *ḥāmam*, "be hot, burn."

Another essential feature of the typical *bāmâ* was the *ʾᵃšērâ* (pl. *ʾᵃšērîm*), a term that has been translated by a variety of words, including "grove" and "sacred pole." Avoiding the problem altogether, the RSV just transliterates the term. Basically, *ʾᵃšērâ* refers either to the proper name for the Canaanite goddess of vegetation (the female counterpart of Baal) or the cult object which symbolized her. The latter was usually found at high places dedicated to Baal (Jgs. 3:7; 6:30; 1 K. 16:32f.; 2 K. 23:5f.). Unfortunately, the form of the cult object and its use at the high place are not described in the Bible, nor has any object been found in an excavation which can confidently be called an *ʾᵃšērâ*. Some of this information, however, can be inferred by a study of the biblical references to the object. Though it was not a tree it was upright and made of wood, or at least contained wood, and could be burned (Dt. 12:3; Jgs. 6:25f.; Isa. 27:9; etc.). W. L. Reed suggests that, as with the similar cult object made in the image of Dagon (1 S. 5:2-4), the *ʾᵃšērâ* was an image of the fertility-goddess Asherah.

Finally, various types of images are associated with the high place: (1) *pesel* (pl. *pᵉsilîm*), derived from the verb *pāsal*, "hew," and usually translated "graven image"; (2) *massēḵâ* (pl. *massēḵôṯ*), derived from the verb *nāsaḵ*, "pour out," and usually translated "molten image"; (3) *ṣelem* (pl. *ṣᵉlāmîm*), usually translated merely "image"; (4) *gillûlîm*, appearing only in the plural; though its derivation is uncertain, it is usually translated "idols"; (5) *maśkîṯ* (pl. *maśkîyôṯ*), perhaps from the root *śkh*, "to look out," and usually translated "carved stone."

II. Archeological Evidence.–Near Eastern archeology has provided evidence that may illustrate the biblical data. Unfortunately not too much of this evidence comes from Palestine in the biblical period — due probably to the nature of the high place itself. The summit of a mound, where the high place was frequently built, was often the first area of the mound to be denuded, either by natural or artificial causes. Since the typical simple installation was in the open air, perhaps it is expecting too much to find them today preserved "on every high hill and under every flourishing tree" (2 K. 17:10) as they were in the days of Israel's prophets.

An older generation of scholars found high places wherever they found standing stones, "cup marks," or cultic implements. No longer, however, are these phenomena considered sufficient evidence for a high place. It is now known that standing stones served as common structural elements in the buildings of the Iron Age (the archeological term for the Israelite period in Palestine). And when these stones were set up as markers, they may have served any of several functions, only some of which were cultic. It is now known, too, that "cup marks" which are common in Palestinian limestone bedrock are often a result of natural causes, but that even when they are made by humans they may serve some secular use, such as for mortars. Though cultic implements were obviously used for religious purposes, it is now clear they were appropriate almost anywhere, never being restricted solely to a high place. Thus older handbooks that use these phenomena to argue for the identification of high places must obviously be used with caution.

Having stated the case for the discovery of Israelite high places negatively, what remains to illustrate the biblical data? Apart from a few as yet unpublished examples such as Dan, one must leave either the biblical period (chronologically) or the Israelite territory (geographically) in order to find meaningful parallels from archeological discovery.

A. Surrounding Countries. Open-air temples — all possessing standing stones — that have been found in countries surrounding Israel have often been referred to as high places. The field of 140 stelae found at Asshur (modern Qal'at-Sharqat in Iraq), one of the ancient capitals of Assyria, falls into this category. These two rows of stones — some crude, some squared, some as high as 3 m. (10 ft.), some inscribed with the names of kings who ruled from the 15th to the 7th cents. B.C. — were thoroughly excavated and published by W. Andrae when he worked for the Deutsche Orientgesellschaft between the turn of the century and the outbreak of World War I. Rather than being a high place in the biblical sense, however, these rows of stones may have served as a "walk-in calendar," since they were arranged in chronological order and the names inscribed on them were names from eponym lists which the Assyrians used to compute dates. To be compared to the standing stones of Asshur are the *maṣṣēḇôṯ* in the contemporary temple of Dagon at Ugarit (modern Râs Shamrah in Syria), though again, this phenomenon is probably not identical to the biblical high place.

Closer to Israel and closer to the Israelite high place was the Obelisk Temple of Byblos in Lebanon, excavated in the 1930's by Dunand. The installation dates to the 19th cent. B.C., and had more than forty standing stones of all sizes, grouped in an open court around a cella and procella which were built on a raised platform in the open air. Several of the *maṣṣēḇôṯ* even had offering tables positioned in front of them, so there is no doubt as to their cultic function. One of the stones contains a dedication to the Egyptian god Arsaphes, who may have been assimilated to Resheph, the well-known Canaanite god of the underworld.

South of Palestine at Serābîṭ el-Khâdim in the Sinai Peninsula, Sir Flinders Petrie in 1905 discovered a nineteenth-century-B.C. Egyptian temple in whose environs were many *maṣṣēḇôṯ*. This site, where several turquoise mines were worked by the Egyptians, is best known for its Proto-Sinaitic alphabet inscriptions from the 15th cent. B.C. In the same general vicinity along the ridges was a series of cairn cemeteries that Albright studied again in 1948. Albright was convinced that these phenomena provided the clue to the origin and development of the high place, which he saw to be funerary in character. His theory, however, has not found general acceptance.

At Timnah in the region of the Arabah where the Egyptians and Midianites exploited the copper deposits, B. Rothenberg discovered in the 1960's two installations that may have served as high places between the 14th and 12th cents. B.C. Each had curtain walls around an area that included a cella, *maṣṣēḇôṯ*, basins, and offering benches. One of them is built up against the sandstone formation known to tourists as Solomon's Pillars.

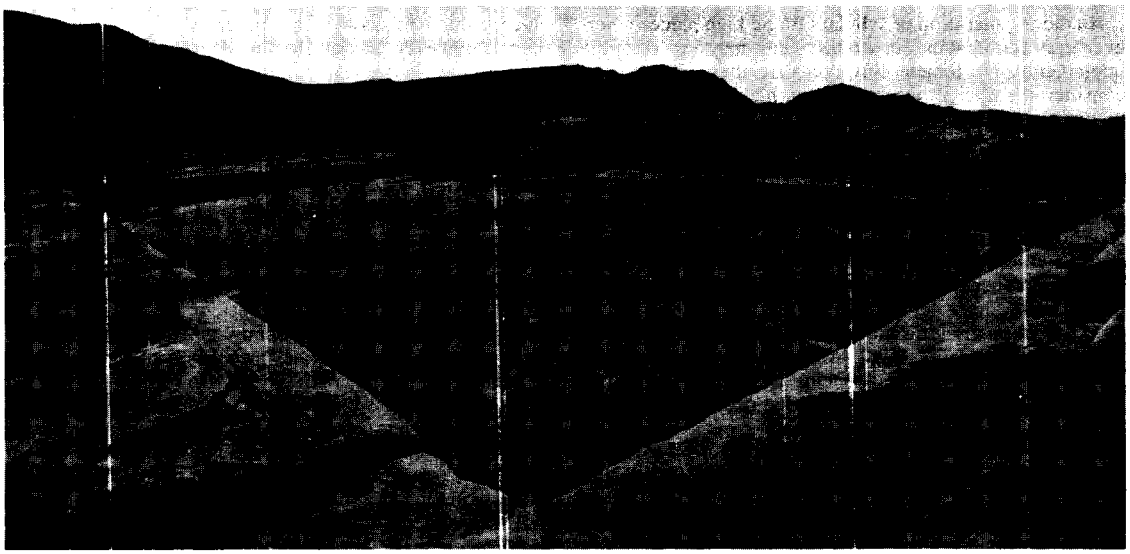
Across the valley and nearer the Dead Sea in Transjordan, surface exploration at such sites as Bâb edh-Dhrâ', Lejjun, and Ader has revealed various alignments of large standing stones out in the open air. Though there is no sure way of dating them, they are usually attributed to the 3rd millennium B.C. With no excavation and little evidence to go on, it is dangerous to speculate about the role they served. That some of these cultic installations from surrounding countries are parallel to the biblical high place at least in function is probable, but because of the distance in time and space, details cannot be pressed.

B. Petra. One of the best known and best preserved high places in the Middle East is Robinson's High Place (Zibb 'Atuf) in the mountain fortress of Petra in Transjordan. Petra was in Edomite territory during biblical times, but by the end of the 4th cent. B.C. it had been taken over by the Nabateans, who carved their monuments out of the rose-red sandstone characteristic of the region. They also probably cut the famous high place out of the solid rock.

Despite the difference in time and place from the Israelite period, Albright stated that this class of high place "probably carries on the tradition of ancient Israelite high places more closely than any other extant installation" (*AP*, p. 163). It is approached by a flight of steps which, like the other features, is cut into the solid rock. The central court is about 14.3 m. (47 ft.) long and 6.7 m. (22 ft.) wide, and situated about midway of its length is a rock platform about 1.8 m. (5 ft.) long and half as wide. It has been suggested that this platform, 12.7 cm. (5 in.) high, was either the pedestal for the *'ᵃšērâ*, or was the place where the sacrificial victim was killed (there is no positive evidence for human sacrifices). North of this is a bench, 8.2 m. (27 ft.) long, on which the sacrifice may have been prepared for the burnt offering, while S of the court was a water tank or laver (approximately 2.7 m. [9 ft.] square and 1.2 m. [4 ft.] deep) probably used for ablutions. Ascent to the rectangular (2.7 m. by 1.8 m. by 0.9 m. [9 ft. by 6 ft. by 3 ft.]) altar of burnt offering on the east was made by a flight of steps leading up to its top, which contains a shallow pan (perhaps to receive the fire). Slightly S of this first altar is another one with its own flight of steps, but this one is round. It probably served either for drink offerings or for the place of slaughter, because near its center are two concentric pans, the larger nearly 1.2 m. (4 ft.) in diameter, and the smaller ½ m. (1½ ft.) in diameter, and from this inner basin a conduit 1 m. (3 ft.) long leads to a tank where the liquid was caught. Near this installation, but farther to the south, are two 6-m. (20-ft.) obelisks which were exposed when the surrounding rock was hewn away, probably for buildings in the town below.

C. Palestine. Though most of them are not as spectacular as the one at Petra, several high places have been found in Cisjordan. They appear to be of at least four different types.

One type may be called a cairn high place. Such a heap, carefully constructed of rough stones, could serve either as an altar or as a commemorative installation. Albright and R. Amiran each excavated an example of the latter in 1924 and 1953 respectively, on a ridge near Malḥah, SW of



The Nabatean high place at Petra in Transjordan (E. K. Vogel; picture Department of Antiquities, Government of Palestine)

Jerusalem. The date of these two tumuli was fixed by pottery as near the end of the Judean monarchy (around the 7th cent. B.C.). Much earlier are the cultic cairns found at Megiddo by G. Loud and at Nahariyah by M. Dothan. The round altar platform of Megiddo (known as installation 401), also constructed of rough stones, is 7.6 m. (25 ft.) in diameter and 1.2 m. (4 ft.) high. It seems to date from the middle of the 3rd millennium B.C. when it was associated with three nearby sanctuaries. At a later time within the Middle Bronze Age (20th–16th cents. B.C.), some thirty to forty *maṣṣēḇôṯ* were erected over the high place, so that its cultic function continued for many centuries. The Nahariyah cairn, nearly 6 m. (20 ft.) in diameter, was found near a small shrine of the 18th cent. B.C. with which it was later associated. The shrine itself was probably dedicated to the Canaanite goddess Asherah.

A second type of high place is represented by the famous unwalled Gezer high place. It was first excavated and then covered over again by R. A. S. Macalister shortly after the turn of the century, but was reexcavated by the Hebrew Union College Expedition directed by W. G. Dever. The installation consists of a N-S line of ten monoliths or *maṣṣēḇôṯ*, the tallest of which is 3.3 m. (10 ft. 9 in.) and the shortest half that high. Just back of one of the pillars a square block was found with a rectangular hole 38 cm. (15 in.) deep cut in its upper side. Its function has been the subject of debate, with suggestions ranging from a laver or altar for blood sacrifice to a base for an Asherah. Around the bases of the stones, all of which were erected *ca.* 1600 B.C., were a low curb and a narrow paving of limestone chips. In the general vicinity Macalister found a number of infant jar burials, two interconnected caves in bedrock, and a cistern containing some human bones. Combining all these elements which modern scholars now know come from widely differing chronological periods, Macalister reconstructed an eclectic cultus which involved child sacrifice and oracular consultation in the two caves. Since there is no evidence for this fanciful interpretation, his theory must be abandoned. A. M. Furshpan-Walker, who reexcavated the installation for the Hebrew Union College Expedition, suggested that it functioned as a place of covenant making for groups around Gezer. Drawing on treaty and covenant-making parallels in Palestine and Syria, she thought that each of the stones might have been set up by a covenanting unit accompanied by a blood sacrifice on the block. This interpretation is, however, also far from certain.

A third type of high place is a smaller, walled installation of the kind made famous by Y. Yadin's excavation at Hazor. There he found among several shrines from the Late Bronze Age (15th-13th cents. B.C.) unroofed Shrine 6136 in Area C of the Lower City. It was built up against the slope of the earthen Hyksos rampart and contained ten small basalt *maṣṣēḇôṯ* in an apsidal niche at the back of the high place. The most interesting standing stone was inscribed with two forearms stretched upward toward a divine lunar symbol — a crescent and a disk. On one side of the row of stones was a basalt statuette of a seated male figure with an inverted crescent pendant on his chest. Benches for offerings lined the walls. A similar high place from the Israelite period may have been found at Beth-shemesh by D. Mackenzie. Unfortunately, since findings have not been completely published, the site is difficult to interpret.

A fourth type of high place in Palestine is Shrine E207 found at Samaria by the Joint Expedition in the 1930's. It is similar to the one at Petra in that it is formed by a trench, trapezoidal in layout and cut from solid rock. The trench itself is 6 m. (20 ft.) wide at the top, 4 m. (13 ft.) wide at the bottom, and about 3 m. (10 ft.) deep. The inner area, connected with the outer area by a rock bridge 2.4 m. (8 ft.) wide, is about 30 m. by 26 m. (100 ft. by 85 ft.). There was no sign of a building nor any other cultic artifacts, but the excavators presumed that it was a high place, dated ceramically to the 8th cent. B.C.

D. High Place Models and Survivals. Not only have some actual high places been found, but archeological discovery has provided us with several ancient models. The Louvre in Paris contains a bronze model from the 12th cent. B.C. of an Elamite high place found in Susa. Among the equipment of this *ṣît šamši* (as the model is known) are *maṣṣēḇôṯ*, lavers, altars, possible statues, and perhaps even an Asherah (*see* Vol. I, Plate 3). The Cyprus Museum in Nicosia displays two interesting clay models of ancient sacred enclosures from the northern coast of the island. From Tomb 22 at Vounous comes a model, late

third millennium B.C., of a circular, open-air enclosure or *témenos* surrounded by a wall with a gate set in one side. Within the enclosure a ritual ceremony is taking place that focuses on three human figures who seem to be wearing bull masks and holding snakes. Figures of both people and bulls crowd the area. The seventh-century-B.C. sanctuary of Ayia Irini was excavated by the Swedes in 1929. Its enclosure contained a libation table and altar surrounded by two thousand terra-cotta votive figures representing bull figures, worshipers, war chariots, armed men, and centaurs — all of which now take up most of a room in the museum.

Besides these visual aids from ancient times, modern survivals of activities occurring at the high place may be helpful in understanding the biblical data. One such survival is the annual Samaritan Passover celebration, which takes place in a rectangular enclosure of rough stones on the summit of Mt. Gerizim. Another survival may be the cult of the hero shrines (Arab. *welis*) that dot the summits of mountains and hills throughout the Middle East. Here Arab peasants gather to mourn or rejoice, depending on the occasion.

L. T. GERATY

HIGH PRIEST. *See* PRIEST, HIGH.

HIGH THING. The AV uses this translation of Gk. *hypsēlós* ("high, lofty, elevated") in Rom. 12:16, and for *hýpsōma* ("height, loftiness, exaltation") in 2 Cor. 10:5. In both passages the reference is to pride, to things that are exalted in the eyes of the world.

HIGHEST HEAVEN. [Heb. *šᵉmê haššāmayim*] (1 K. 8:27; 2 Ch. 2:6; 6:18); AV HEAVEN OF HEAVENS; cf. the RSV in Dt. 10:14; Neh. 9:6. Although biblical cosmology shares features with the Semitic three-storied cosmology (e.g., pillars, Job 26:11; windows, Gen. 7:11; foundations, 2 S. 22:8), it is sometimes more akin to the modern viewpoint in its conception of the vastness of the universe; cf. Gen. 15:5; Ps. 147:4. In Akkadian mythology the highest heaven was the abode of the supreme god Anu. The Hebrew expression, however, may be nothing more than poetic imagery. *See* FIRMAMENT. G. WYPER

HIGHMINDED. In modern usage "highminded" denotes elevation of principles and conduct, but in the AV it is used in the archaic sense of disdainful pride. In Rom. 11:20 and 1 Tim. 6:17 it translates Gk. *hypsēlophronéō* ("be proud, haughty"); in 2 Tim. 3:4 it renders *typhóomai* ("be puffed up with conceit"; cf. 1 Tim. 3:6; 6:4). "No one can be *highminded* without thinking better of himself, and worse of others, than he ought to think" (G. Crabb, *English Synonymes* [1916]).

HIGHWAY. *See* ROADS, HIGHWAYS; ROMAN EMPIRE AND CHRISTIANITY III.F; WAY.

HILEN hī'len [Heb. *ḥîlēn*] (1 Ch. 6:58 [MT 43]). A village in the hill country of Judah, assigned to the Levites. The form of the name in Josh. 15:51; 21:15 is HOLON.

HILKIAH hil-kī'ə [Heb. *ḥilqîyâ*–'Yahweh is my portion,' or 'Yahweh's portion']. The name of nine individuals in the OT, or eight, if the person mentioned in Neh. 12:7, 21 is the same who stood with Ezra at the reading of the Law (Neh. 8:4). The latter appears as Ezecias (AV) in 1 Esd. 9:43 (RSV Hezekiah; NEB Hezekias). Five of this name are clearly associated with the priesthood, and the others are presumably so, as the etymology suggests. Either interpretation of the name expresses the person's claim on Yahweh or the parents' recognition of Yahweh's claim on him.

1. The person mentioned above (Neh. 8:4, etc.).
2. A Levite of the descendants of Merari (1 Ch. 6:45).
3. Another Levite of Merari, son of Hosah (1 Ch. 26:11).
4. Father of the Gemariah whom Zedekiah of Judah sent to Nebuchadnezzar (Jer. 29:3).
5. The man in 2 K. 18:12ff. who is evidently more famous as the father of Eliakim, the majordomo of Hezekiah's palace (Isa. 22:20ff.; 36:3ff.).
6. A priest of Anathoth, father of Jeremiah (Jer. 1:1).
7. The son of Shallum (Bar. 1:7, AV Chelcias), and the best known of the name (1 Ch. 6:13). He was the great-grandfather of Ezra through his son Azariah (1 Esd. 8:1, AV Helchiah; NEB Chelkias; cf. 1 Ch. 9:11; Neh. 11:11). He discovered the lost book of the law during the repairing of the temple (2 K. 22:4, 8ff.), and became chief leader in the ensuing reformation in 621 B.C. (2 K. 23:4; 2 Ch. 34:9ff.; 35:8). He showed the recovered book to Shaphan the scribe, who in turn brought it to the notice of the king. At Josiah's request he led a deputation to Huldah the prophetess to "enquire of the Lord" concerning the new situation created by the discovery. The law scroll was originally thought to have been the canonical book of Deuteronomy, but further study shows that it was considerably smaller in size, and perhaps contained only a section of the covenant legislation, consisting possibly of the decalogue and some associated regulations. In the last analysis its content must remain uncertain. *See* DEUTERONOMY.

He may also be the father of Susanna (Sus. 2, 29, 63 [AV Chelcias]). According to tradition he was the brother of Jeremiah.

8. Ancestor of Jeremiah's servant Baruch (Bar. 1:1, AV Chelcias). H. WALLACE

HILL; HILL COUNTRY; MOUNT; MOUNTAIN; etc.

I. Terms.–A. General. Several Hebrew words are used with some overlap in meaning, as suggested by the frequent synonymous parallelism (e.g., Dt. 33:15; Ps. 114:4, 6; Isa. 40:12; 54:10). But Heb. *giḇ'â* (lit. "arch, swell") is generally a lower elevation than Heb. *har*; thus the RSV always translates *giḇ'â* as "hill" (except where it is understood to be the town GIBEAH or part of another place name, e.g.,

Gibeath-haaraloth in Josh. 5:3 [cf. RSV mg., AV. "the hill of the foreskins"]). The AV is similar, except that four times "little hills" is used (Ps. 65:12 [MT 13]; 72:3; 114:4, 6). The NEB occasionally uses "hill-top" (2 K. 16:4; 2 Ch. 28:4; Jer. 3:23) and once "high summit" (Isa. 31:4).

Hebrew *har* is much more frequent and more ambiguous. In Jgs. 16:3 and 1 K. 16:24 the RSV translates it "hill," and in Cant. 4:1 "slopes" (cf. 6:5, where the RSV supplies "slopes" and the NEB "Mount"), but usually the RSV uses "hill country," "mount," or "mountain." In contrast, the AV uses "hill country" only in Josh. 13:6, and "hill" many times, though "mount" and "mountain" still predominate. In 1 K. 11:7 and Jer. 3:23 the NEB uses "height"; elsewhere the NEB usually agrees with the RSV, although it sometimes follows the AV (e.g., Josh. 15:9; 1 S. 25:20).

The RSV translates three other Hebrew words only rarely by "hill": *ʿōpel* (*see* OPHEL) in 2 K. 5:24 (AV "tower"; NEB "citadel"); Isa. 32:14 (AV "tower"; NEB "citadel"); Isa. 32:14 (AV "fort"; NEB "citadel"); Mic. 4:8 (AV "stronghold"); *qeren* (usually "horn") in Isa. 5:1 (NEB "hill-side"); and *maʿᵃleh* (from *ʿālâ*, "go up") in 1 S. 9:11.

Aramaic *ṭûr* (cf. Heb. *ṣûr* [*see* ROCK], Ugar. *ġr*) is translated "mountain" in Dnl. 2:35, 45.

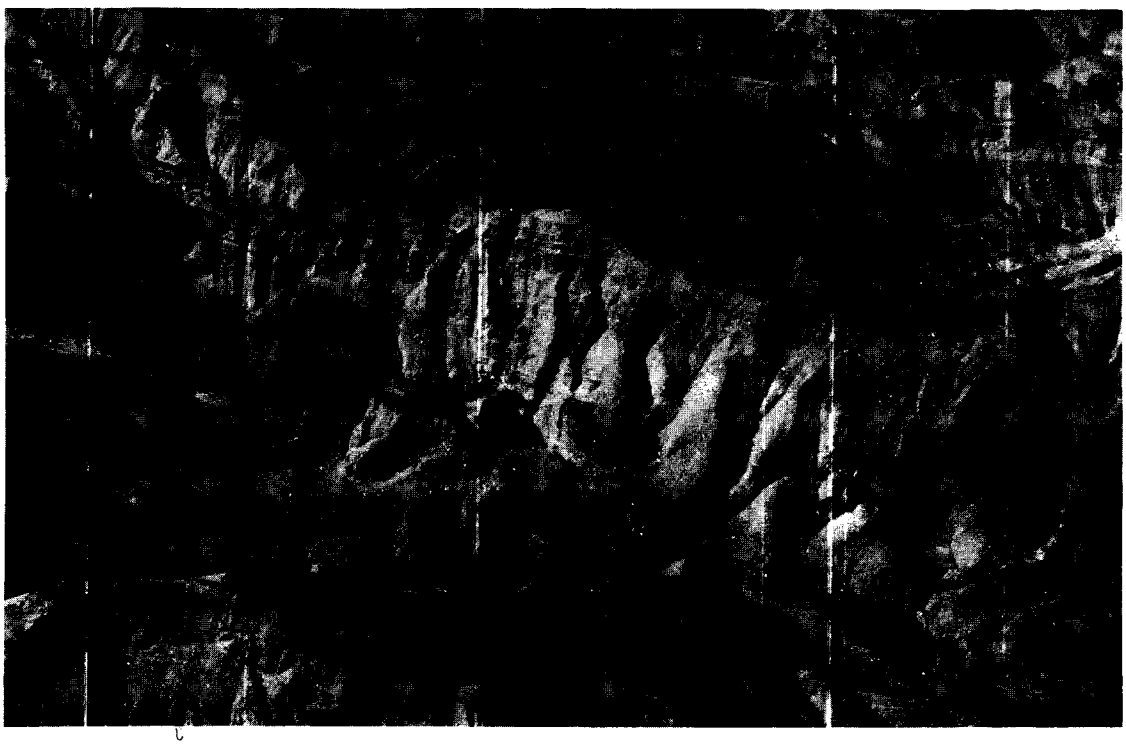
In the NT Gk. *bounós* ("hill") occurs only in Lk. 3:5 and 23:30 (both quotations from the LXX, although *bounós* usually translates Heb. *giḇʿâ* in the LXX). *Oreinē* ("hill country"; NEB "uplands") occurs in Lk. 1:39, 65, both times in reference to the Judean hill country (a reference that I. H. Marshall, comm. on Luke [*New International Greek Testament Comm.*, 1978], p. 80, calls "traditional practice"), although it occasionally translates Heb. *har* in the LXX. *Óros* is the predominant term, used for both "hill" and "mountain." Twice the RSV translates it "hillside" (Mk. 5:11, AV "mountain"; Lk. 8:32, AV "mountain," NEB "hill").

B. Parts. Various words are used for the top, sides, and bottom of the hill/mountain, often by analogy to the human body. Thus *rōʾš* (lit. "head") *hāhār* refers to the "top" (e.g., Gen. 8:5), "peak" (Cant. 4:8), or "summit" (e.g., 2 S. 15:32; Jer. 22:6; AV "head"; NEB "heights"); similarly *rōʾš giḇʿâ*, "top of the hill" (Ex. 17:9f.; Jgs. 16:3; 2 S. 2:25; 2 K. 1:9).

The sides or slopes of the hill/mountain are indicated by various Hebrew words. Thus in Gen. 48:22 Heb. *šᵉḵem* (lit. "shoulder") is "mountain slope"; Heb. *ʾᵃšēdâ* (either "leg, support," based on Akk. *išdu*, Ugar. *išd*, and post-biblical Aram. *ʾašdāṯa*; or "watershed," based on post-biblical Aram. *ʾᵃšad* and Syr. *ʾᵃšaḏ*) is "slope" in Dt. 3:17; 4:49; Josh. 10:40; 12:3, 8; 13:20. *Kāṯēp* ("shoulder") is

The highlands of Gilead as seen from the castle of Ajlun (D. Baly)

The remains of the Byzantine castle Metzad Zohar, which guarded the road west from the south end of the Dead Sea. This road was considered one of the easiest routes in the Judean hill country (D. Baly)



used in Josh. 15:8,10f.; 18:16; *ṣēlaʿ* (lit. "rib") *hāhār* is translated as "hillside" in 2 S. 16:13, and *ṣaḏ* (lit. "flank, side") *hāhār* as "side of the mountain" in 1 S. 23:26; 2 S. 13:34. *Yarkᵉṯayim* (lit. "two thighs") *hāhār* is "the remote parts of the hill country" of Ephraim in Jgs. 19:1, 18 (AV "on the side of mount Ephraim"; NEB "heart of the hill-country"), and "far recesses" in 2 K. 19:23 par. Isa. 37:24. *Taḥtîṯ* (lit. "lower") is the "foot" of the mountain in Ex. 19:17, as is *taḥaṯ* (lit. "under") in 24:4; 32:19; Dt. 4:11; Josh. 12:3. The "foundations" (Heb. *môsāḏ*) of the mountains are mentioned in Dt. 32:22 (MT 23; NEB "roots") and Ps. 18:7 (MT 8; cf. 2 S. 22:8, "foundations of heaven," which has been adduced, e.g., by L. I. J. Stadelmann, *Hebrew Conception of the World* [*Analecta Biblica*, 39, 1970], pp. 45f., 48, as evidence for the Hebrew belief that the mountains supported the heavens). Two words are translated "roots": Heb. *šōreš* (Job 28:9), apparently synonymous with the "foundations" mentioned in Ps. 18:7; and Heb. *qeṣeḇ* (lit. "extremity," Jonah 2:6 [MT 7]; AV "bottoms"; NEB "troughs"), perhaps a reference to the underworld, i.e., Sheol (cf. Stadelmann, p. 169).

The only similar Greek expression is *ophrýs*, for the "brow" of a hill in Lk. 4:29 (*see also* DESCENT).

II. Specific Topographical References.–The "hill country of" is often used with names of tribes, peoples, or towns to designate an area rather than one specific hill or peak: Gilead (Gen. 31:21), Seir (36:8), Israel (Josh. 11:16), Judah (11:21), Ephraim (17:15), Naphtali (20:7), Amalekites (Jgs. 12:15), Bethel (1 S. 13:2). "Mount" is usually more specific: Seir (Gen. 14:6), Sinai (Ex. 19:11), Horeb (33:6), Hor (Nu. 20:22), Shepher (33:23), Hermon (Dt. 3:8), Sirion (4:48), Gerizim (11:29), Ebal (11:29), Nebo (32:49), etc. (cf. "mountain[s]" of Ararat [Gen. 8:4], Gilboa [2 S. 1:21], Jerusalem [Isa. 66:20], etc.).

III. Characteristics and Use.–A. Natural. The elevated regions were sometimes quarried for stone (e.g., 1 K. 5:15; 2 Ch. 2:2, 18 [MT 1, 17]). The relatively high rainfall made such areas fertile, providing grass for grazing (Ps. 50:10; 104:14; 147:8; Ezk. 34:14), trees for timber (Josh. 17:18; 2 K. 19:23; Ezk. 17:23), and spices (Cant. 8:14). Wild animals lived there (Ps. 104:18), including birds (Isa. 18:6) and beasts (Cant. 4:8) of prey.

Hills and mountains had various other functions. They were the sites of ambush (Jgs. 9:25). Their peaks offered excellent vistas during times of war (Isa. 18:3) or peace (Dt. 3:27; 34:1). For auditory advantages elevated places were sometimes selected as speaking platforms (Jgs. 9:7; 2 Ch. 13:4; Isa. 40:9). Their inaccessibility made them refuges in wartime (Jgs. 6:2; 1 S. 13:6; 14:21f.; 23:14; Jer. 49:16; Ob. 3; Mt. 24:16), and hiding places for fugitives (Josh. 2:16, 22; 23:14; Ezk. 7:16). Hills also served as a natural boundary (Josh. 15:8-11).

Their ancient origin is frequently referred to, especially in passages about creation (Job. 15:7; Ps. 90:2; 104:5-8; Prov. 8:24-29; Ezk. 28:13f., 16).

B. Figurative. Hills and mountains are frequently personified. They rejoice (Ps. 98:8), leap (114:4, 6), sing (Isa. 44:23; 49:13; 55:12), and praise God (Ps. 89:12). At God's touch or presence they tremble and shake (Jgs. 5:5; Ps. 68:8 [MT 9]; Isa. 64:1; Nah. 1:5; Hab. 3:10) or melt (Ps. 97:5; Mic. 1:4). They are addressed by God (Ezk. 6:3) and called to witness a covenant lawsuit (Mic. 6:1f.; cf. J. Limburg, *JBL*, 88 [1969], 291-304).

Symbolically the mountains represent power (Jer. 51:25; Zec. 4:7), continuance or stability (Dt. 33:15; Ps. 30:7 [MT 8]; 125:1; Isa. 54:10; Hab. 3:6), and protection (Ps. 125:2). They are also symbolic of God's strength (Ps. 65:6 [MT 7]) and blessing (Dt. 33:15).

C. Religious. 1. Pagan. In much of the ancient Near East, the elevated regions were considered the dwellings of the gods (cf. Isa. 14:13f.), and thus centers of worship were established there (*see* HIGH PLACE). In OT times such Canaanite centers (often attended by Israelites) were located on hills (2 K. 17:9-12; Jer. 2:20; 17:2) and mountains (1 K. 11:7; 2 K. 23:13; Isa. 57:7; Ezk. 18:6, 11, 15; 22:9). (That there was no distinction between these terms is indicated by several texts where both are mentioned, e.g., Dt. 12:2f.; Isa. 65:7; Jer. 3:23; Ezk. 6:13; Hos. 4:13.) Balaam apparently favored the elevated regions (Nu. 22:41; 23:7, 9, 14, 28).

2. Israelite. Either through syncretism on the people's part or accommodation on God's part, the mountains and hills had special religious significance for the Hebrews (the extent of this significance and its impact on other nations may be seen in 1 K. 20:23, where the Syrians assume that Yahweh is a god of the hills). Divine appearances often occurred there (e.g., to Moses in Ex. 3:1–4:17; to Elijah in 1 K. 19:8-18), and God "came" from Teman, Paran, or Seir (Hab. 3:3; Dt. 33:2). Thus God spoke and made covenants from the mountaintop (Ex. 19–20). The people made sacrifices (Gen. 22:2-14; 31:54; Dt. 33:19; 1 K. 18:19-39) and worshiped God there (Josh. 8:30). Sanctuaries were established on various mountains, e.g., on Bethel (Gen. 12:8; 28:11-22; 35:1-15), on Ebal and Gerizim (Dt. 27:4-8; Josh. 8:30), on Shiloh (Josh. 18:1; Jgs. 18:31; 1 S. 1:3), and of course on Jerusalem/Zion. The ark was set on a hill at Bethel (Jgs. 20:18-28) and elsewhere before David brought it to Jerusalem (1 S. 7:1; 2 S. 6:3).

This close association of God and mountain is perhaps best seen in the frequent references to "the mountain of God/Yahweh," "the holy mountain," used of Horeb/Sinai (Ex. 3:1; 4:27; 18:5; 24:13; 1 K. 19:8) and Zion (Ps. 2:6; 3:4 [MT 5]; Isa. 27:13; 56:7; etc.). Zion is also called His city or abode (Ps. 48:1f. [MT 2f.]; 68:16 [MT 17]; 76:2 [MT 3]).

Prophecy is sometimes directly connected with a hill or mountain (1 S. 10:5f.; Ezk. 40:2; cf. He. 11:38). Elijah (1 K. 1:9) and Elisha (4:25) apparently lived in such areas.

References to mountains occur in eschatologies. Abundance of water will be found in the mountains during the last days (Isa. 30:25; Joel 3:18 [MT 4:18]; Zec. 14:8) and will bring tremendous fertility to the area (Ezk. 36:8; Joel 3:18; Am. 9:13). Judgment will also occur there, however. The terror and despair of unbelievers will drive them to seek a quick death in the mountains (Hos. 10:8). The battle with Gog will, at least in part, be fought in the mountains (Ezk. 38:8, 20; 39:2, 4). Yahweh Himself will fight from the Mt. of Olives (Zec. 14:3-5). In His wrath He will slaughter the nations so that the mountains will "flow with their blood" (Isa. 34:2-4). After His victory He will prepare a feast on Zion (Ezk. 38:17) and remove suffering and death from the people (Isa. 25:6-8). Then from the mountaintop Israel will proclaim its liberation (25:9; cf. 40:9-11; 52:7-10). The final reconciliation and ensuing worship of Yahweh will occur on Zion (2:1-4; 11:6-9; cf. Zec. 14:16). (In these eschatological references, Zion may be equivalent to the heavenly Jerusalem; see comms.)

3. NT. As in the OT, elevated regions are frequently mentioned. Sheep fed on the mountains (Mt. 18:12) and pigs on the hillside (Mk. 5:11). The Gerasene demoniac wandered in the mountains (Mk. 5:5). The Samaritans worshiped on Mt. Gerizim (Jn. 4:20).

Mountains played a significant role in Jesus' ministry. Not only did He mention them in striking illustrations, e.g., a city set on a hill cannot be hid (Mt. 5:14), and faith can move mountains (Mt. 17:20; 21:21 par.; cf. 1 Cor. 13:2); He also used them as a place to be alone (Jn. 6:15), to pray (Mt. 14:23 par.; Lk. 6:12), or to teach His disciples privately (Mt. 5:1; Mk. 3:13). He may have gone into the

mountains to take advantage of the good acoustics for teaching large crowds or to force people to decide whether to follow Him (Mt. 15:29f.; Jn. 6:3-5; see *TDNT*, V, 485). The devil used a high mountain as a vista to tempt Jesus (Mt. 4:8; but cf. Lk. 4:5, where a visionary experience is implied). The Transfiguration occurred on a high mountain, perhaps Hermon (Mt. 17:1-8 par.). Finally, the Ascension apparently took place on the Mt. of Olives (Acts 1:3-12; cf. Lk. 24:50), although in Matthew Jesus' last recorded appearance is on a mountain in Galilee (Mt. 28:16).

Several references in Revelation indicate the role that the mountain plays in NT eschatology. In 6:14-16 a cataclysm removes the mountains and causes the people to hide among the rocks of the mountains, seeking either refuge or a quick death (cf. Lk. 23:30; both texts refer to Hos. 10:8). In 8:8 something like a fiery mountain is cast into the sea, destroying much of the sea. In 16:20 another cataclysm occurs, destroying the mountains. The seven mountains of 17:9 refer either to Rome or to world empires (see comms.). Like Ezekiel, the author is carried by the Spirit to a high mountain from which he views the new Jerusalem (21:10).

For fuller information on specific mountains, see separate articles.

HILLEL hil'el [Heb. *hillēl*–'he greatly praised'; LXX Gk. *Ellēl*].

1. An inhabitant of Pirathon in the hill country of Ephraim, and father of Abdon, one of the judges of Israel (Jgs. 12:13, 15).

2. Hillel "the Elder" (Heb. *hazzākēn*; *ca.* 60 B.C.-A.D. 20?). An eminent Jewish scholar and rabbinic leader in Jerusalem in the early Herodian period. Biographical details are scant, but it seems certain that Hillel was a native of Babylonia (T.B. *Pesahim* 66a; *Sukkah* 20a). He came to Jerusalem to study biblical exegesis, and Shemaiah and Abtalion, two of the early great "expositors" (Heb. *daršānîm*, T.B. *Pesahim* 70b), became his teachers. Hillel excelled in the elucidation of legal rules (Halakoth) from Scripture, and his zeal for Torah study, despite his poverty, became a model for later students (T.B. *Yoma* 35b). Other traditions state that Hillel, like Moses, lived one hundred twenty years (*Sifre* Dt. xxxiv.7 [357]) and that he was descended from David (T.B. *Ketuboth* 62b; "Rabbi" [*ca.* A.D. 135-220] was descended from Hillel), but these claims may be pious veneration rather than fact. It is still debated whether Hillel was the father or grandfather of Gamaliel I, the teacher of Paul (Acts 5:34; 22:3). The issue turns upon the questioned existence of a certain Simeon, mentioned only in T.B. *Shabbath* 15a in the rabbinic literature, who some scholars claimed was Hillel's son (R. T. Herford, "Pirke Aboth," in *APOT*, II, 694; recently reasserted by Guttmann, *Rabbinic Judaism*, p. 177; denied by E. Schürer, *HJP*², II, 367).

Hillel became leader (Heb. *nāśî*, "prince") of the rabbinic council after giving three arguments for the priority of the paschal sacrifice over the sabbath. The council had forgotten the Halakah on this issue and consulted Hillel, who finally silenced their arguments by appealing to previous tradition: "Thus have I heard from Shemaiah and Abtalion" (T.B. *Pesahim* 66a).

Hillel's exegesis was frequently opposed by Shammai (*ca.* 50 B.C.-A.D. 30), a Judean who, like Hillel, gathered a school of disciples about himself that continued after his death. Hillel generally favored a freer interpretation of the biblical text than Shammai, who usually adhered to the letter of the law. The difference between the two schools is illustrated by the issue of DIVORCE, which centered on the phrase "some indecency" (Heb. *'erwaṯ dāḇār*, lit. "nakedness of a thing") in Dt. 24:1. The school of Shammai restricted the meaning to illicit sexual conduct by focusing on *'erwaṯ* ("shamefulness," "nakedness"), but the Hillelites emphasized *dāḇār* ("thing," "matter") and construed the phrase to mean "*any* indecent thing," even as trivial as spoiling the husband's food (T.B. *Gittin* 90a). This controversy lies behind the question of the Pharisees in Mt. 19:3 (cf. Mk. 10:2), "Is it lawful to divorce one's wife *for any cause*?" The restriction of divorce to the one cause of UNCHASTITY in Mt. 5:32; 19:3 reflects the stricter interpretation of the school of Shammai (SB, I, 312-320).

On one occasion a non-Jew came to Shammai and asked to become a proselyte on the condition that Shammai teach him the whole law while the gentile stood on one foot. Shammai, apparently doubting his sincerity, chased him away with a measuring stick. Thereupon the man came before Hillel, who said, "What is hateful to you, do not do to your neighbor; that is the whole Torah, the rest is commentary" (T.B. *Shabbath* 31a). *See* GOLDEN RULE.

Another important decision rendered by Hillel was his issuance of the so-called *prozbul* (Heb. *pᵉrôzbôl* or *pᵉrôsbôl* from either Gk. *prós Boulē Bouleutōn*, "before the assembly of the counselors," or *prosbolḗ*, "delivery"; cf. *Jew. Enc.*, X, 219; *HJP*², II, 366f., etc.), a judicial edict that in effect canceled the OT ordinance that all debts should be remitted during the SABBATICAL YEAR (Dt. 15:1-11). Hillel's intent was to prevent transgression on the part of those who refused to give loans prior to the seventh year (cf. Dt. 15:9).

According to later tradition Hillel demonstrated seven hermeneutical rules (Heb. *middôṯ*) when he was called before the council (Tosefta *Sanhedrin* vii; *Aboth de Rabbi Nathan* xxxvii). The presence of several of these interpretative principles in the NT has led scholars to compare Hillel's use of Scripture with that of Jesus and Paul. Hillel's first rule, *qal wāḥômer* (lit. "light and heavy," i.e., what applies in a lesser case will certainly apply in a greater case), is exemplified in Mt. 7:11 (par. Lk. 11:13); Jn. 10:34-36; Rom. 5:15-21, which all have an "if . . . then how much more" argument (cf. R. Longenecker, *Biblical Exegesis in the Apostolic Period* [1975], pp. 32-38, 68, 117, etc.). Paul's use of other rules of Hillel led J. Jeremias to conclude that Paul was a Hillelite ("Paulus als Hillelit," in E. Ellis and M. Wilcox, eds., *Neotestamentica et Semitica* [1969], p. 89).

Glatzer argued ("Hillel the Elder in the Light of the Dead Sea Scrolls," in K. Stendahl, ed., *The Scrolls and the NT* [1957], p. 244) that Hillel's teaching may show an awareness of the Qumrân sect's break from Jerusalem Judaism. Hillel's purpose was thus one of reform within Judaism (contra H. L. Strack, *Intro. to the Talmud and Midrash* [Eng. tr. 1931; repr. 1969], p. 108) to counter the influence of that group.

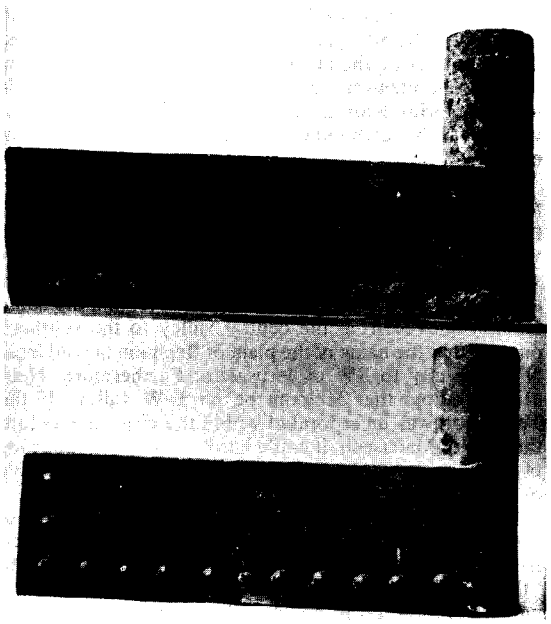
HIN hin [Heb. *hîn*]. A liquid measure containing 12 logs,

Basalt door pivot in its socket, from the Canaanite temple at Hazor (Institute of Archaeology, Hebrew University of Jerusalem)



Bronze pivot hinges from Egypt (Trustees of the British Museum)

equal to about 3 liters (6½ pints). *See* WEIGHTS AND MEASURES.

HIND. *See* DEER; GAZELLE.

HIND OF THE DAWN, THE. The translation of Heb. *'ayyeleṯ haššaḥar* in the title of Ps. 22, possibly the name of some well-known tune to which the psalm was intended to be sung, which may have had reference to the habits of deer in search of water and food, or to the flight of the hind from hunters in early dawn; or "dawn" may symbolize the deliverance from persecution and sorrow. *See* MUSIC III.B; PSALMS II; DAWN.

HINGE [Heb. *sîr*; Akk. *ṣirru*]. The Hebrew term in Prov. 26:14 refers to some device that enabled a door to turn on a pivot, and thus be opened or closed. Specimen hinges from ancient Near Eastern sites include metal bars having a piece at one end which projects downward at a right angle, so as to fit into a stone socket placed beneath the bottom corner of a wooden or stone door. In Mesopotamian temples these sockets were frequently inscribed with the name and titles of the reigning monarch who had constructed the temple. Presumably, the reference in Proverbs is to the slowness with which these usually massive doors moved on their hinges. R. K. H.

HINNOM hin'əm, **VALLEY OF** [Heb. *gê hinnōm*] (Josh. 15:8; 18:16); [*gê ḇen-hinnōm*, "valley of the son of Hinnom"] (Josh. 15:8; 18:16; 2 Ch. 28:3; 33:6; Jer. 7:31f.; 19:2, 6; 32:35; *Q* in 2 K. 23:10, read by the NEB); NEB "Valley of Ben-hinnom"; [*gê ḇ^{e}nê-hinnōm*, "valley of the sons (AV "children") of Hinnom"] (*K* in 2 K. 23:10, read by the AV and the RSV); [*haggay'*, "the valley" (referring to Hinnom)] (2 Ch. 26:9; Neh. 2:13, 15; 3:13; Jer. 31:40; perhaps also Jer. 2:23). A deep narrow valley immediately S of Jerusalem, marking the boundary between Judah and Benjamin (Josh. 15:8; 18:16) — especially the E-W section of the Wâdī er-Rabâbi, though the name is commonly extended to include the N-S section just W of the present city walls. The forms *ben-* and *b^{e}nê-hinnōm* suggest that Hinnom is a personal name.

I. Biblical References and History.–The Harsith Gate, or Gate of the Earthenware Pots (Jer. 19:2), and the Valley Gate (Neh. 2:13; 3:13) opened into the Valley of Hinnom. Here Ahaz (2 Ch. 28:3) made idols, burned incense, and offered his sons to the Baals; likewise Manasseh (2 Ch. 33:6) "burned his sons as an offering" here. Josiah stopped the offering of children to Molech by defiling Topheth, the eastern end of Hinnom near its confluence with the Kidron (2 K. 23:10). Because of the pagan rites practiced there, Jeremiah prophesied that the name would be changed to the "Valley of Slaughter" in the Day of Vengeance (7:31f.; 19:5f.). In view of its notoriety Jeremiah could refer to it simply as "the valley" (2:23). Lightfoot and others thought that it was used as the refuse dump of the city where dead animals and garbage were burned and smoke from the burning rose continually. Thus Hinnom became an appropriate symbol of woe and judgment (Jer. 7:31; 19:6; cf. Isa. 66:24).

The theological significance of the Valley of Hinnom (GEHENNA) heightens in the intertestamental Jewish literature, where, for example, the evil inherit Gehenna (Mish. *Pirke Aboth* i.5; v. 19f.) and the "furnace of Gehenna" is set over against the "paradise of delight" (2 Esd. 7:36, RSV mg.). In the NT Gehenna is the "hell of fire" (Mt. 5:22) associated with the last judgment.

II. Location.–The Valley of Hinnom has been identified by different scholars as each of the three great valleys of Jerusalem. Some early Christian, Moslem, and Jewish writers identified Hinnom with the Kidron. It is more likely, however, that the identification of the Kidron (because of its nearness to the temple) as the scene of the last judgment — the "valley of Jehoshaphat" of Joel 3:2 [MT 4:2] — probably led to its designation as Gehenna, the scene of the punishment of the wicked, after the ancient geographical position of the Valley of Hinnom had long been lost. The following arguments weigh heavily against the Kidron theory: (1) the Kidron Valley is always called a *naḥal* ("wadi") and not a *gay'* ("gorge"); (2) the Valley

Gate did not lie to the east of the city; (3) En-rogel, which lay E of the beginning of the Valley of Hinnom (Josh. 15:8; 18:16), cannot be the ancient Gihon (2 Ch. 33:14), but is rather to be identified with Bîr Ayyûb; (4) if Hinnom is identified with Kidron, Jerusalem would be in Judah, whereas Josh. 18:28 indicates that Jerusalem is in Benjamin.

The theory that the Valley of Hinnom was located originally in what was later known as the Tyropoeon Valley (the valley that separates the eastern hill, Ophel, from the western hill) does not flatly contradict the boundary description in Josh. 15:8; 18:6. But this theory requires the acceptance of two unlikely assumptions: (1) that the name Hinnom moved from the central valley to the southern one; (2) that the name of the plain of Rephaim moved from N of the city to SW of Jerusalem. Furthermore, Neh. 11:30 requires that Hinnom be an E-W valley. If the Tyropoeon was incorporated within the city walls before the time of Manasseh, it could hardly have been the place of sacrifice of children (2 K. 23:10), for this must have occurred outside the city limits.

The clearest geographical data (Josh. 15:8; cf. 18:16) state that the boundary of Judah and Benjamin passed from En-rogel "by the valley of the son of Hinnom" to "the northern end of the Valley of Rephaim. . . ." If the modern Bîr Ayyûb is En-rogel, as is probable, then the Wâdī er-Rabâbi is the Valley of Hinnom. The name may have extended to the wide-open land formed by the junction of the three valleys (some locate Topheth here), but there is no need to extend the name beyond the gorge. The Wâdī er-Rabâbi commences in a shallow, open valley W of the modern Jaffa Gate; near the gate it turns S for less than a kilometer (half mile) and then gradually curves to the east where it becomes a gorge (Heb. *gay'*) descending rapidly to its junction with the Kidron. *See* JERUSALEM II.B.

Well-founded tradition locates Akeldama on the south side of the Valley of Hinnom. Here Jewish and Christian tombs of Roman and Byzantine times may be seen.

Bibliography.—G. A. Smith, *Jerusalem,* I (1907), 170-180; J. Simons, *Jerusalem in the OT* (1952), pp. 10-12, 52 n.2.

D. J. WIEAND

HIP [Heb. *nāšeh*] (Gen. 32:32 [MT 33]); AV "which shrank"; NEB NERVE; [*ṣaḏ*–'side'] (Isa. 66:12); AV SIDES; NEB ARMS; [*šôq*] (Jgs. 15:8); [*šēṯ*–'buttock'] (2 S. 10:4); AV, NEB, BUTTOCKS; [*mipśā'â*] (1 Ch. 19:4); AV BUTTOCKS.

The Hebrew terms relate in a general way to the trunk, waist, or lower abdominal area of the body, although in Gen. 32:32 it is the muscular structure of the thigh which is designated. In Jgs. 15:8, the violent slaughter resulted in bodies being hacked into pieces and limbs piled upon each other (lit. "leg upon thigh") in heaps. The humiliation of David's servants (2 S. 10:4; 1 Ch. 19:4) involved among other things the exposing of their pudenda, following ancient Near Eastern custom. In Isa. 66:12, the child is being held by his mother's arms along one side of her body, with his main weight resting upon her hip. R. K. H.

HIRAH hī'rə [Heb. *ḥîrâ*] (Gen. 38:1, 12, 20-23). A native of Adullam and a "friend" of Judah. In v. 12 (cf. v. 20) both the LXX and the Vulgate designate Hirah "his shepherd" (Heb. *rō'ēhû*) instead of "his friend" (*rē'ēhû*).

HIRAM hī'rəm; **HURAM** hu'rəm (2 Chronicles) [Heb. *ḥîrām, ḥûrām, ḥîrôm,* probably an abbrev. of *'ᵃḥîrām*–(my) brother is exalted'; Gk. *Chiram, Cheiram*].

1. Hiram I king of Tyre, who lived on friendly terms with both David and Solomon. Tyre, rebuilt by Sidonian Phoenicians in the 12th cent. B.C., was capital of a state that by this time controlled the whole southern Phoenician littoral from the Bay of Acre northward. Under Hiram I Tyre enjoyed considerable expansion and prosperity; and before the end of the 10th cent. B.C. colonies existed in Cyprus, Sicily, and Sardinia, where copper mines were exploited.

David, whom Hiram loved (1 K. 5:1) and whose Lord he acknowledged (2 Ch. 2:11f.), entered into a friendly alliance with Hiram (2 S. 5:11). The terms of the alliance included the sending of Tyrian workmen, who excelled in architecture, and also materials to build a palace for David at Jerusalem. Solomon also entered into a treaty, which had considerable advantages for both sides and was probably the most important of Solomon's alliances. Palestine became the "granary of Phoenicia," for Hiram received large quantities of wheat, barley, oil, and wine annually for both his household and his workers (1 K. 5:11; 2 Ch. 2:10). In return Solomon received cedar, fir, and algum trees, which came in rafts by sea to Joppa (land carriage would have been too slow and costly) for building the temple. No doubt this was not just a commercial agreement, for Phoenicia would welcome an alliance with a strong military power that would protect its eastern trade routes but not embark on any scheme of conquest.

At the end of twenty years Solomon gave Hiram twenty cities of Galilee. This has been interpreted as a measure of desperation on the part of Solomon. By this time Solomon's financial position must have been embarrassingly acute and the royal coffers severely overstrained. The cities were either sold outright or advanced as collateral against a cash loan and later redeemed. Hiram was not at all pleased with the cities and contemptuously called them "CABUL" (1 K. 9:10-14). Hiram apparently returned these cities, for later Solomon rebuilt them and settled his own people in them (2 Ch. 8:2).

Hiram and Solomon maintained merchant vessels on the Mediterranean and shared mutually in a profitable trade with foreign ports (1 K. 10:22). Hiram's sailors, men of considerable experience, taught Solomon's men seamanship. They used the route from Ezion-geber on the Gulf of Aqabah to Ophir, where large stores of gold, as well as almug wood, precious stones, ivory, apes, and baboons (RSV mg.) were brought to the royal palace every three years (1 K. 9:26-28; 10:22-25; 2 Ch. 8:17f.).

Josephus (*CAp* i.17f. [106-127]), on the authority of Menander of Ephesus and Dius the Phoenician, recounts that Hiram was the son of Abibaal and died at the age of fifty-three after a reign of thirty-four years. This, however, may be a different king, for the biblical account requires a longer reign. Josephus also tells us on the same authority that Hiram and Solomon sent riddles to one another, but that Hiram could not solve those sent to him by Solomon, whereupon he paid to Solomon a large sum of money which had first been agreed upon. Eusebius recounts that Hiram gave his daughter in marriage to Solomon (from Tatian; *Praep. ev.* x.11) and this compares well with 1 K. 11:1.

HIRE [(vb.) Heb. *śāḵar, sāḵaṛ* (Ezr. 4:5), *tānâ* (Hos. 8:9f.); Gk. *misthóomai* (Mt. 20:1, 7)]; AV also REWARD (Prov. 26:10); NEB also "sell themselves" (1 S. 2:5), BRIBE (Neh. 6:12f.; Ezr. 4:5), BARGAIN (Hos. 8:9f.); [(subst.) Heb. *śāḵîr, śāḵār, 'eṯnān* (Dt. 23:18 [MT 19]; Isa. 23:17f.; Ezk. 16:31, 34, 41; Hos. 9:1; Mic. 1:7), *'eṯnâ* (Hos. 2:12 [MT 14]), *śeḵer* (Isa. 19:10), *mᵉḥîr* (Mic. 3:11); Gk. *místhios* (Sir. 7:20; Lk. 15:17, 19), *misthōtós* (Mk. 1:20)]; AV

also REWARD (Ezk. 16:34; Hos. 2:12; 9:1), "sluices" (Isa. 19:10), HIRELING (Sir. 7:20); NEB also MERCENARIES (Jer. 46:21), WAGES (Dt. 24:15), REWARD (Gen. 30:18), FEE (Dt. 23:18), PROFITS (Isa. 23:18), TRADE (Isa. 23:17).

As a verb, "hire" in all but three instances represents the Hebrew verb *śāḵar* (sibilant confusion has yielded *sāḵar* in Ezr. 4:5; in later Aramaic *ś* became *s*). The meaning is to employ a person to perform a service for compensation. The cognate noun, *śāḵār,* represents the compensation or wage paid to the hired person for his service (cf. Dt. 24:15). An apparently synonymous term, *śeḵer* (also a derivative of *śāḵar*), occurs only once in the OT (Isa. 19:10) in the phrase *'ōśê śeḵer,* "those who work for hire." Sibilant confusion again led to the AV translation "make sluices." The NEB has freely rendered the phrase as "artisans." Since the context of Isa. 19:10 is a brief catalog of skilled crafts, it is possible that a designation of "brewers" (*'ōśê šēḵār*) has been obscured by the MT pointing; cf. LXX *zýthos,* "beer," and Syr. *šaḵrā',* "strong drink."

The most common Hebrew substantive is the remaining cognate, *śāḵîr,* most often translated as "hired servant" by the RSV and "hired man" or "hired labourer" by the NEB (*see also* HIRELING). Dt. 24:14f. clearly delineates the meaning — the *śāḵîr* is the "wage-earner" or "day-laborer" who is paid the *śāḵār* in compensation for his labor. Though this paid laborer is usually human, *śāḵîr* may also be applied to a hired beast of burden (Ex. 22:15 [MT 14]) or even a figurative razor (Isa. 7:20).

The Hebrew substantive *'eṯnān* (and once the synonymous *'eṯnâ,* Hos. 2:12) constitutes a "wage" class all by itself, for in all its occurrences it denotes the "hire" or "fee" of the prostitute (cf., e.g., Dt. 23:18). The term is commonly employed in figurative depiction of Israel's unfaithfulness to Yahweh (cf. Ezk. 16:31, 34, 41; Hos. 2:12; 9:1); *see* HARLOT. *Mᵉḥîr,* usually meaning simply "price" or "payment" (e.g., Isa. 55:1), has a particularly opprobrious connotation in Mic. 3:11, where the prophet laments the unethical practice of paying priests for decisions.

The NT terms are all derivatives of *misthós,* "wages, payment due a laborer for work accomplished" (cf. 1 Tim. 5:18; *see* WAGES). *Misthóomai* appears twice in the NT (Mt. 20:1, 7), both times in the strictly secular sense, "to hire for payment" (as, e.g., a laborer in a vineyard). *Místhios* also appears only twice (Lk. 15:17, 19), in each case as a noun denoting the simple, classical sense of the term "hired worker," or "day laborer." Similarly, *misthōtós* appears three times, always as a noun, and also in the above sense of "day laborer" (Mk. 1:20) or "hireling" (Jn. 10:12f.).

The precise nature of the work or service performed by the "hired" varied widely. Day laborers were hired for agricultural tasks (Lk. 15:17, 19), horticultural work (Mt. 20:1, 7), general labor (Dt. 24:14f.; 1 S. 2:5), and even crew service on a fishing trawler (Mk. 1:20). The hiring of skilled craftsmen is mentioned in Isa. 46:6 (a goldsmith) and 2 Ch. 24:12 (masons and carpenters), and of mercenary soldiers or military allies in Jgs. 9:4; 2 S. 10:6; 2 K. 7:6; 1 Ch. 19:6f.; 2 Ch. 25:6; Jer. 46:21; and Hos. 8:9f. Apparently, the practice of hiring oneself out in mercenary service was frequently viewed by impoverished and debt-ridden commoners as a more desirable alternative than bankruptcy and voluntary slavery. The hiring of a diviner (Dt. 23:4; Neh. 13:2), a prophet (Neh. 6:12f.), a priest (Mic. 3:11; Jgs. 18:4), advisors (Ezr. 4:5), a work animal (Ex. 22:15 [MT 14]), and a prostitute (Dt. 23:18; etc.) further exemplify the variety of services that may be rendered for hire. A caution against the hiring of a fool or drunkard is offered in Prov. 26:10.

While the OT gives no direct information about the amount of the wage earned by such hired workers, the NT in one instance (Mt. 20:1-15) expressly states that certain vineyard laborers were hired at the rate of a denarius a day. In addition to the common daily arrangement, hire could also be contracted by the year (cf. Lev. 25:50, 53).

The lot of the hired laborer was understandably no enviable one, and Israelite law thus included some safeguards of his rights (e.g., Lev. 19:13 and Dt. 24:14f. stipulate that the hired worker must be paid for his work each evening; cf. Mt. 20:8f.). While the hired laborer's livelihood was apparently harsh and precarious, he was at least not a slave. The use in Israel of both native and foreign-born freemen as hired laborers or craftsmen who render services in exchange for livelihood must not be confused on the one hand with the institution of slavery (*see* SLAVE), nor on the other with the custom of native Israelites selling or indenturing themselves to another out of economic necessity (cf. Dt. 15:12-18; see de Vaux, pp. 82f.).

The term *śāḵār* occurs once in the Qumrân literature. The Damascus Document contains a regulation (CD 14:12) that the earnings of at least two days out of each month be appropriated by the administration for public welfare.

While there were in Israel large-scale commercial concerns (e.g., the various textile and metallurgical industries) that certainly employed substantial numbers of laborers, direct references in the Bible to such guilds of workers are scarce (cf. 1 Ch. 4:21; 2 Ch. 2:7 [MT 6]; Neh. 3:31; *WBA,* p. 188; Mendelsohn, pp. 17-21).

Bibliography.–I. Mendelsohn, *BASOR,* 80 (1940), 17-21; *TDNT,* IV, *s.v.* μισθός (Preisker, Würthwein); R. de Vaux, *Ancient Israel* (Eng. tr. 1961), I, 76, 82f.

D. G. BURKE

HIRELING [Heb. *śāḵîr*] (Job 7:1f.; 14:6; Isa. 16:14; 21:16; Mal. 3:5); NEB HIRED LABOURER, SERVANT (Job 7:2); [Gk. *misthōtós*] (Jn. 10:12f.).

The Hebrew substantive *śāḵîr,* "hireling" or "hired man," is derived from the verb *śāḵar,* "to hire for payment," and thus denotes the "wage earner" or "day laborer" who is paid the "hire" (*śāḵār*) in compensation for his (usually temporary) manual or skilled labor. The Gk. *misthōtós* appears twice in the NT (Jn. 10:12f.) as a noun with the particular sense (in the context) of "hired shepherd," even though, like Heb. *śāḵîr,* the term itself has reference only to the hiring of service or labor in general and not to any specific craft or occupation (cf. *místhios,* "a man whom you will pay" [AV "hireling"] in Tob. 5:11 [LXX 12]). Elsewhere in the NT *misthōtós* occurs only in Mk. 1:20, where it denotes the hired crew of a fishing trawler.

The transience of the hireling's work is underscored in Jn. 10:12f., where Jesus contrasts the hireling shepherd or "paid keeper" with the good shepherd. In stark contrast to the permanent shepherd, such a temporary employee is depicted as being markedly less conscientious about the responsibilities of his job. While labor was commonly contracted on a per diem basis (cf. Lev. 19:13; Dt. 24:15), per annum hiring was also practiced (cf. Isa. 16:14; 21:16).

Mal. 3:5 is illustrative of the frequent prophetic protest against the cheating of the hireling out of his rightful earnings. That such employer malfeasance was common may be inferred from both the prophets' condemnations and the legal sanctions that protected the hireling's wage rights (cf. Lev. 19:13; Dt. 24:14f.; Job 7:2). Elsewhere, sympathy is expressed for the anxiety-ridden harshness of the day laborer's more or less hand-to-mouth existence on a subsistence wage (cf. Job 7:1f.; 14:6; Sir. 7:20).

For further details and bibliography, *see* HIRE.

D. G. BURKE

HIS. Used often in the AV with reference to a neuter or inanimate thing, or to a lower animal (Gen. 1:11, "after *his* kind"; Lev. 1:16, "pluck away his crop"; Acts 12:10, "of *his* own accord"; 1 Cor. 15:38, "*his* own body"; etc.). The RSV substitutes "its."

HISS [Heb. *šāraq*] (1 K. 9:8; 2 Ch. 29:8; Job 27:23; Jer. 18:16; 19:8; 25:9, 18; 29:18; 49:17; 50:13; 51:37; Lam. 2:15f.; Ezk. 27:36; Mic. 6:16; Zeph. 2:15); NEB also JEER, GASP (1 K. 9:8), WHISTLES (Job 27:23), "a thing (or object) of derision" (2 Ch. 29:8; Jer. 25:9, 18; 29:18; 51:37). The Hebrew root means "to whistle," and the RSV has used "hiss" to indicate contemptuous or derisive whistling. The note of bitter invective is clearly present in Lam. 2:15f. and Zeph. 2:15. However, some of the above passages (e.g., 1 K. 9:8; 2 Ch. 29:8) may be interpreted in a less pejorative sense; e.g., one may express astonishment by whistling through the teeth. J. T. DENNISON, JR.

HISTORY [Heb. *tôlēdôṯ*] (Gen. 37:2); AV GENERATIONS; NEB STORY OF THE DESCENDENTS; [*diḇrê*-'words'] (2 Ch. 9:29); AV BOOK. The former reference is to a family history or genealogy, of a type frequent in the book of Genesis, which points back to the beginnings of the family or other social unit in question. The latter concerns the royal annals kept by Nathan; cf. RSV 1 Ch. 29:29. G. WYPER

HITHERTO. In modern English usage the term means "up to this time." The RSV uses it in this sense for Heb. *ʿᵉmôl* (Ex. 5:14), *ʿaḏ kōh* (Josh. 17:14), *ʿaḏ hēnnâ* (1 S. 7:12; 1 Ch. 9:18; 12:29), and for Gk. *héōs árti* (Jn. 16:24; 1 Cor. 8:7).

The AV sometimes uses "hitherto" in the obsolete sense of "thus far," e.g., for Heb. *ʿaḏ hᵊlôm* (2 S. 7:18; 1 Ch. 17:16), *ʿaḏ pōh* (Job 38:11).

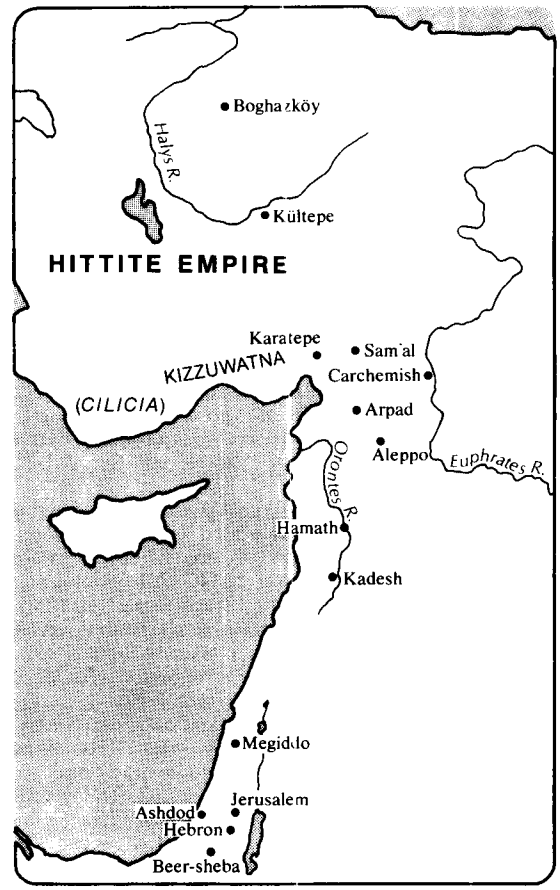
HITTITES hi'tīts [Heb. *bᵉnê ḥēṯ, ḥittîm*; Gk. *Chettaioi*]. A designation given in the OT (1) to a great nation which gave its name to the whole Syrian region, "from the wilderness and this Lebanon as far as the great river, the river Euphrates, all the land of the Hittites to the Great Sea [Mediterranean] towards the going down of the sun" (Josh. 1:4; cf. Jgs. 1:26), and (2) to one of the ethnic groups resident in Canaan from patriarchal times until after the Israelite settlement (Gen. 15:20; Dt. 7:1; Jgs. 3:5), whose eponymous ancestor was Heth, a son of Canaan (Gen. 10:15; 1 Ch. 1:13).

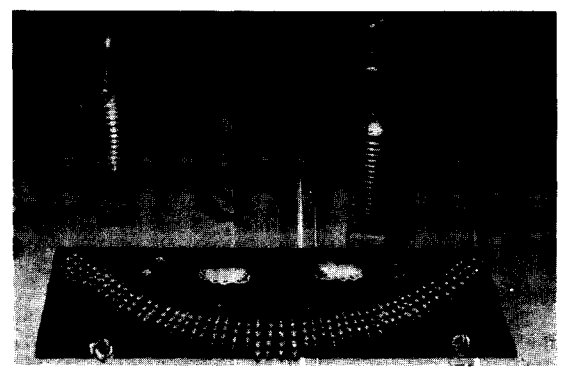
I. Anatolian Hittites
II. Neo-Hittite City-States
III. Hittites of Palestine

I. Anatolian Hittites.–The Hittites first make their appearance in history as Indo-European immigrants from the northeast who settled in east-central Asia Minor in the Early Bronze Age III B (*ca.* 2000 B.C.). They had been preceded two or three centuries earlier by another Indo-European group, the Luwian-speaking Arzawans, who settled farther west, around Beycesultan. The area in which the Hittites settled was occupied before their arrival by an indigenous Anatolian people called the Ḫatti, with whom the immigrants amalgamated and whose name they assumed. As in other parts of the Near East in the 2nd millennium B.C., we can recognize a dominant Indo-European caste united in one national entity with a subordinate non-Indo-European infrastructure.

In the records of the Assyrian trading colony at Kültepe (Kaneš) Hittite proper names appear *ca.* 1800 B.C. The Hittite archives from Boghazköy (Hattusas), later capital of the Hittite empire, preserve a half-legendary account of an early king named Piṯḫanas, ruler of Kussaras (an unidentified city), who conquered the city of Nesas (provisionally, but not certainly, identified with Kaneš), which his son Anittas adopted as his capital. From the name of this city the Hittites' Indo-European language is referred to in their own records as "Nesian" (*nasili, nesumnili*). (The language of the indigenous Ḫatti is referred to as *hattili*, conveniently translated "Hattic.")

Anittas was the first of the Hittite rulers to adopt the title of "Great King" — an index of his imperial ambition. His son Tuḏḫaliyas I (*ca.* 1720 B.C.) has been tentatively identified with "Tidal king of Goiim," one of the allies of Chedorlaomer in Gen. 14:1. A later king, Labarnas, extended his rule over a number of Hittite city-states





Proto-Hittite gold objects (23rd cent. B.C.) from Alaça Hüyük in present-day Turkey (Hittite Museum, Ankara; picture W. S. LaSor)

The site of Hattusas (Boghazköy), the capital of the Hittite kingdom (16th-13th cents. B.C.) (B. K. Condit)

in Anatolia that had previously been independent; his name is used by later Hittite kings as a title meaning "emperor" (cf. the development of the personal name Caesar in Roman imperial history). His son Ḫattusilis I extended his dominion into north Syria (*ca.* 1600 B.C.). He was succeeded by Mursilis I, who moved his capital to Hattusas, in the area enclosed by the curve of the river Halys (modern Kızıl Irmak). Here the seat of the empire remained for nearly four centuries, and it was the unearthing of the state archives on this site in 1906 and the following years that brought to light the lost history of early Hittite civilization. Mursilis I captured Aleppo and toward the end of his reign (*ca.* 1560 B.C.) raided Babylon — an event that precipitated the downfall of the 1st Babylonian Dynasty.

Early in the 15th cent. B.C. the Hittite constitution and laws were codified by King Telepinus. The Hittite king was not an absolute monarch; his authority was limited (in the earlier period at least) by a council or assembly called the *pankus*. Succession to the throne required ratification by this body. The king was a military, civil, and religious leader; the succession normally passed to his son or son-in-law. The role of the queen (*tawanannas*) was chiefly religious; she retained her authority for life, and not until the death of the queen mother did the king's wife acquire the title. The social status of women in general was better secured in Hittite law than among many of the neighboring peoples. In religious matters the Hittites appear to have taken over the practice of their predecessors, the Ḫatti. The Hittite laws were more humane than

Hittite wall at Boghazköy. Note how the massive stones are fitted together (F. E. V. LaSor)

those of Babylonia and Assyria. They exhibit points of resemblance with the earliest OT law codes, but more in details than in basic principles. For example, while the OT laws, like several other ancient Near Eastern law codes, apply the law of retaliation (*lex talionis*), the Hittite code is characterized by the distinctively Indo-European principle of compensation (*Wergeld*). No degrading mutilations are imposed as penalties in the Hittite code, and conquered enemies are treated with clemency. Diplomacy is preferred, when possible, to military force; royal intermarriage is a recurring instrument of Hittite relations with foreign powers, and the sanctity of treaties is carefully respected.

HITTITES

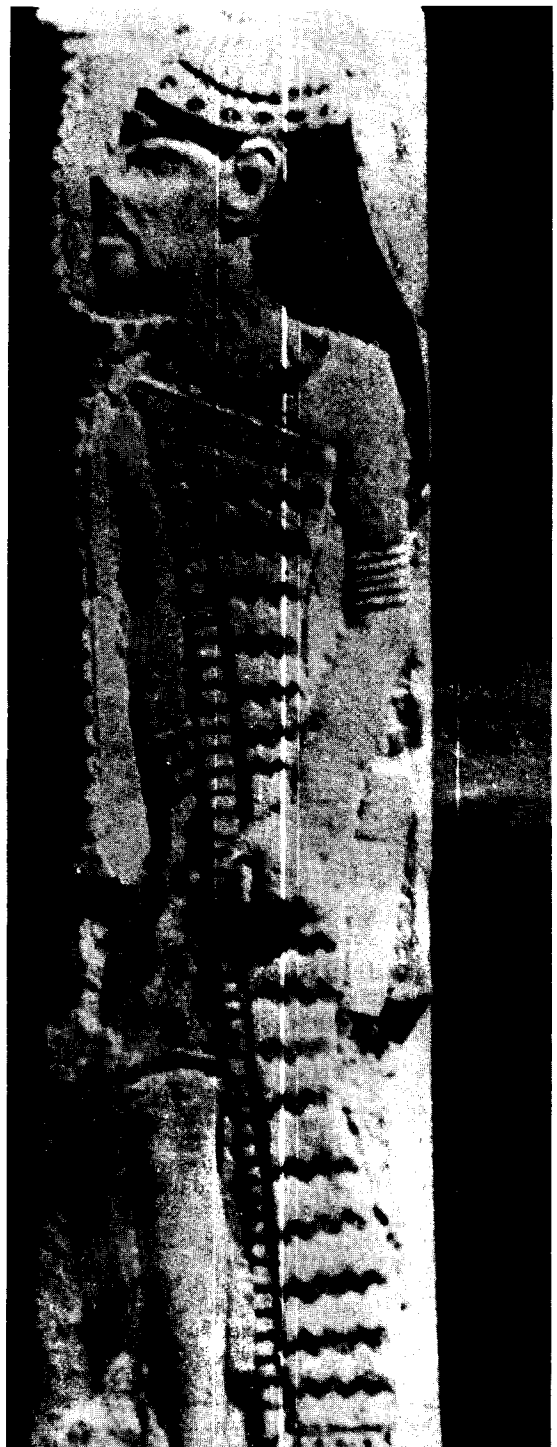
In the reign of the next king, Tudḫaliyas II, the Hittites first came into close contact with Egypt, when Thutmose III, after his great victory at Megiddo (*ca.* 1468 B.C.), advanced to Carchemish on the Euphrates and Kadesh on the Orontes, thus approaching the southern frontier of the Hittite sphere of influence. Tudḫaliyas judged it wise to send to Thutmose an embassy with gifts.

Šuppiluliuma I (*ca.* 1380-1350 B.C.) consolidated his power in Asia Minor and established his supremacy over the Hurrian kingdom of Mitanni in upper Mesopotamia and over the city-states of Syria as far S as the Lebanon Range. It was during his reign that iron was first smelted on a significant scale in the Near East, in the province of Kizzuwatna (Cilicia). The manifest might of Šuppiluliuma moved some Syrian city-states, hitherto vassals of Egypt, to transfer their allegiance to him. Nevertheless he endeavored to maintain friendly relations with Egypt: he congratulated Akhenaten on his accession (*ca.* 1377 B.C.), and some twenty years later Akhenaten's daughter, the widow of Tutankhamen, sent a delegation to Šuppiluliuma to discuss the possibility of her marrying one of his sons. The failure of this plan, and the assassination of a Hittite prince who had been sent to Egypt to explore the situation, led to a state of intermittent war between the two imperial powers that culminated in the indecisive battle of Kadesh on the Orontes in the fifth year of Ramses II (*ca.* 1297 B.C.). This war was brought to an end seventeen years later with a nonaggression pact between Ramses and the Hittite king Ḫattusilis III, recognizing the common frontier of the two empires on the Orontes. This agreement was confirmed a few years later by a marriage between Ramses and one of the daughters of Ḫattusilis.

The following decades witnessed a continual weakening of the Hittite power: with the capture and destruction of Hattusas by invaders from the west (*ca.* 1200 B.C.) the Hittite empire came to an end.

II. Neo-Hittite City-States.—After the fall of the empire the Hittite home territory on the Anatolian side of the Taurus Range was encroached upon by the Phrygians; one Hittite state in that area was known to the Assyrians as Tabal (cf. Tubal in Gen. 10:2; Ezk. 27:13; 38:2; etc.). Seven city-states on the Syrian side of the range that had belonged to the Hittite sphere of influence continued for several centuries to bear the Hittite name, and their rulers were known as "the kings of the Hittites." Prominent among these neo-Hittite states were Carchemish, Sam'al (modern Zenjirli), Aleppo, Arpad, and Hamath on the Orontes. King Toi of Hamath entered into treaty relations with David (2 S. 8:9-12), whose kingdom stretched as far N as "Kadesh in the land of the Hittites" (2 S. 24:6, RSV, emended on the basis of the LXX from the meaningless MT Heb. *taḥtîm ḥoḏšî*). His son Solomon traded and intermarried with these "kings of the Hittites" (1 K. 10:28f.; 11:1). A century later the reputation of their military strength was sufficient to strike panic into an army of Damascus (2 K. 7:6). In the 8th cent. B.C., however, these city-states were reduced by the Assyrians: Hamath and Arpad fell to them in 720 B.C. and Carchemish three years later (as the Assyrians repeatedly boast in their attempts to intimidate Judah and other weak states; cf. 2 K. 18:34; 19:13; Isa. 10:9; etc.).

The Hittite inscriptions in north Syria are written in hieroglyphs, whereas the records of the Anatolian Hittites (and of some of their neighbors) are in cuneiform script on clay tablets. The two forms of Hittite are distinguished materially as well as in respect of script: "hieroglyphic Hittite" has affinities with Luwian, the Indo-European language of Arzawa (which was first identified in modern times in Ann.Tab. 31f.). The credit for identifying the Indo-



Faience tile (12th cent. B.C.) of a Hittite captured by the Egyptians. He wears a short kilt under a bright mantle baring the left shoulder, a decorated cap, and a beaded collar (Service des musées, Cairo)

HITTITES

Copy of a stamp seal with the portrait and name of a Hittite prince (Tarkondemos) in Hittite cuneiform and hieroglyphs (Ashmolean Museum, Oxford; picture W. S. LaSor)

European character of "cuneiform Hittite" belongs to the Czech scholar B. Hrozný (1917). Less progress has been made with the decipherment of "hieroglyphic Hittite," even after the study of the eighth-century-B.C. bilingual inscriptions in Phoenician and "hieroglyphic Hittite" discovered at Karatepe in Cilicia in 1946 and 1947.

From these city-states the whole Syrian territory in which they were situated is called "the land of the Ḫatti" in Assyrian records of this period; even the inhabitants of Ashdod are described by Sargon II as "the faithless Ḫatti" (711 B.C.). The term persists in the usage of the Neo-Babylonian empire: Nebuchadrezzar in his chronicles (*ca.* 600 B.C.) regularly speaks of Palestine as "the land of the Ḫatti" — so long a shadow did the long-extinct empire of Šuppiluliuma cast, far beyond its southern frontier.

III. Hittites of Palestine.–This Assyrian and Babylonian usage has nothing to do with the earlier OT listing of the Hittites as one of the seven nations in Canaan overthrown by the Israelites under Joshua (Dt. 7:1; etc.). The identity of these Hittites presents an unsolved problem. They appear as inhabitants of the central hill country (Nu. 13:29). In Gen. 23:3-20 they are the native population of the Hebron district, "the people of the land," among whom Abraham lives as "a stranger and a sojourner," and from whom he buys the field containing the cave of Machpelah as a family burying place. His grandson Esau annoys his parents, Isaac and Rebekah, by marrying two Hittite wives with Semitic names, "daughters of the land" — apparently in the Beer-sheba district (Gen. 26:34f.; 27:46). It is scarcely satisfactory to treat "Hittites" in these contexts as simply the designation for the native population employed in that particular strand of the tradition, when we consider other references to Hittites in Canaan in conjunction with, but in distinction from, other ethnic groups. Jerusalem, according to Ezk. 16:3, 45, had a mixed Hittite and Amorite foundation. This statement has been held to be confirmed by the Hittite etymology of the name of Araunah the Jebusite (2 S. 24:16-24), if it is rightly related to Hitt. *arawanis*, "freeman," "noble." (H. Hoffner relates it to Hurrian *ewri-ne*, "the lord.") In any case, Uriah the Hittite, one of David's mighty men, was evidently a Jerusalemite (2 S. 11:3-24; 23:39). Uriah's name, however, is not Indo-European: conceivably it may be connected with Hurrian *ewri* ("lord"), but is much more probably Semitic, as are all the names of other Hittites specifically mentioned in the OT, from Ephron son of Zohar in Gen. 23:8 to Ahimelech, one of David's outlaw companions (1 S. 26:6).

E. Forrer tried to link the presence of Hittites in Palestine with the reference in an inscription of the Hittite king Mursilis II (*ca.* 1330 B.C.) to certain of his rebel subjects whom the Egyptians allowed to settle in part of their territory — which then included the southern region of Palestine. But this doubtful interpretation of a Hittite document could have no bearing on the Hittites mentioned in the patriarchal narratives. Much more attractive is Sir Leonard Woolley's suggestion that the Hittites of Canaan in patriarchal times were survivors of a wave of Khirbet Kerak people who left the southern Caucasus toward the end of the 4th millennium B.C. and settled in the 'Amuq plain, E of the Gulf of Alexandretta — the original producers of Khirbet Kerak pottery being the ancestors both of the Anatolian Hittites and of the Palestinian Hittites. The one difficulty about this suggestion is its failure to explain how the Palestinian wave acquired the name "Hittites." The Anatolian Hittites took over this name from the indigenous Ḫatti whom they found already occupying their new habitat after their entry into Anatolia, long after the time when (on Woolley's hypothesis) they had parted company with the wave of Khirbet Kerak people who continued south and ultimately reached Hebron and Beer-sheba. Whence then could the latter have come independently to be called Hittites? It would be mere speculation to envisage a group of Hittites leaving the main body after the settlement in Anatolia and migrating to the south of Palestine. It has been argued that the terms of Abraham's transaction with Ephron, as set out in Gen. 23:16-20, agree remarkably with Hittite mercantile procedure: "permeated with intricate subtleties of Hittite laws and customs, correctly corresponding to the time of Abraham" (M. R. Lehmann). But it is questionable if the Hittite laws and customs referred to can be attested so early as the time of Abraham; besides, the Hebrew terms are not so technical as to demand a distinctively Hittite provenance; they accord with general Near Eastern usage of the period, and exhibit no features that would be inconsistent with the practice of Semitic peasants in that area in the patriarchal age.

A further suggestion is that the Palestinian Hittites (of the patriarchal period at least) are the people whom we otherwise know as HURRIANS. No problem is presented by the presence of Hurrians in Palestine at this time: it was their presence that made the Egyptians refer regularly to Palestine as "the land of the Hurrians" (*ḫ'rw*). But this identification would raise fresh problems regarding the relation between the Palestinian Hittites and the HORITES or HIVITES. It is possible, after all, that the Palestinian Hittites were accidentally homonymous with the Hittites of Anatolia and the city-states of north Syria, to whom they bore no historical relation.

F. F. BRUCE

HIVITES hī'vīts [Heb. *ḥiwwî*; Gk. *Heuaioi*]. A name that occurs twenty-five times as a designation of one of the nations the Israelites found in Palestine W of the Jordan; the Samaritan text and the LXX have it also in Gen. 15:21 and Nu. 13:29.

Apart from the traditional enumerations of gentile nations in Palestine we find Hivites mentioned in Gibeon (Josh. 9:7, where the LXX has Horite, and 11:19, where they are absent from the LXX), in Shechem (Gen. 34:2, LXX "Horite"), and in the north (Josh. 11:3, "under Hermon in the land of Mizpah"; Jgs. 3:3 "on Mount Lebanon, from Mount Baal Hermon as far as Lebo-Hamath"; cf. also 2 S. 24:7).

Inasmuch as Zibeon, who is called a Hivite in Gen. 36:2, is mentioned as a Horite in Gen. 36:20, and the name Horites never occurs together with the name Hivites in the traditional enumerations, scholars assume that the Hivites and the Horites were the same nation; cf. also the LXX variants quoted above. Perhaps both names go back to the same self-designation of the Horites or Hurrians, *ḥurwî*, which might develop both into *ḥōrî*, "Horite," and into *ḥuwwî*, which by means of a popular etymology (cf. *ḥawwâ*, "tent village") might become *ḥiwwî*, "Hivite."

The name disappeared soon; it does not occur later than David's time (2 S. 24:7), though some scholars (cf. the RSV and NEB) read it in Isa. 17:9, following the Greek text.

A. VAN SELMS

HIZKI hiz'kē [Heb. *ḥizkî*; Gk. *Azaki*]; AV, NEB HEZEKI. A son of Elpaal, a descendant of Benjamin (1 Ch. 8:17).

HIZKIAH hiz-kī'ə [Heb. *ḥizqîyâ*–'strength of Yahweh'; Gk. *Ezekia*].

1. A son of Neariah, of the royal family of Judah (1 Ch. 3:23; AV HEZEKIAH).
2. AV form of HEZEKIAH in Zeph. 1:1.

HOAR, HOARY. *See* COLOR V.D; HAIR.

HOARFROST hōr'frost [Heb. *kᵉpôr*] (Ex. 16:14; Job 38:29; Ps. 147:16; Sir. 43:19); NEB also FROST (Job 38:29; Sir. 43:19). A synonym for FROST. In Ex. 16:14 the MANNA on the ground is as "fine as hoarfrost." All the other passages mention hoarfrost as another example of God's creative and sovereign involvement in nature.

HOBAB hō'bab [Heb. *ḥōḇāḇ*–'beloved'; LXX *Obab*]. This name occurs only twice (Nu. 10:29; Jgs. 4:11). It is not certain whether it denotes the father-in-law (RSV) or the brother-in-law (cf. Jgs. 4:11, NEB) of Moses. The direct statement of Nu. 10:29 is that Hobab was "the son of Reuel" (AV "Raguel"). This is probably the correct view and finds support in Ex. 18:27, which tells us that sometime before the departure of the Israelites from Sinai, Jethro had departed and returned to his own land. The statement of Jgs. 4:11 is ambiguous, and therefore does not help us out of the difficulty, but is rather itself to be interpreted in the light of the earlier statement in Nu. 10:29.

Moslem traditions favor the view that Hobab was only another name for Jethro. But this has little weight against the statements of Scripture. However, whether father-in-law or brother-in-law to Moses, the service he rendered to the leader of the hosts of Israel was most valuable and beautiful. Hobab was an experienced sheikh of the desert whose counsel and companionship Moses desired in the unfamiliar regions through which he was to journey. His knowledge of the wilderness and of its possible dangers would enable him to be to the Israelites "as eyes."

The facts recorded of this man are too meager to enable us to answer all the questions that arise concerning him. A difficulty that remains unsolved is that in Jgs. 1:16 (cf. LXX A, Lucian, Origen) and 4:11 he is described as a Kenite, while in Ex. 3:1 and 18:1, the father-in-law of Moses is spoken of as "the priest of Midian."

J. L. COTTON

HOBAH hō'bə [Heb. *ḥôḇâ*]. A place N (AV "on the left hand") of Damascus, to which Abraham pursued the defeated army of Chedorlaomer (Gen. 14:15). It may be identical with the modern Ḥoba, about 96 km. (60 mi.) NW of Damascus. Some scholars have associated the place with the territory of Ube mentioned in the Amarna Tablets (e.g., 53:63), whose capital prior to the 16th cent. B.C. may have been located in the region of Tell el-Salihiye, about 16 km. (10 mi.) E of Damascus. Excavations at the site indicate traces of occupation from the Neolithic Age onward, but whether it is the Hobah of the Abrahamic period is uncertain.

HOBAIAH. *See* HABAIAH.

HOD hod [Heb. *hôḏ*–'majesty, splendor'; LXX A *Hōd*, B *Ōa*] (1 Ch. 7:37). One of the sons of Zophah, a descendant of Asher.

HODAIAH hō-dā'yə. *See* HODAVIAH 4.

HODAVIAH hōd-ə-vī'ə [Heb. *hôḏawyâ, hôḏawyāhû*; LXX A, Gk. *Hōdouia*].

1. One of the heads of the half-tribe of Manasseh on the east side of the Jordan (1 Ch. 5:24).
2. A Benjaminite, the son of Hassenuah (1 Ch. 9:7).
3. A Levite, who seems to have been the head of an important family in that tribe (Ezr. 2:40). In Neh. 7:43 the name is Hodevah (Heb. *K hôḏᵉwâ, Q hôḏᵉyâ*–'splendor of Yahweh'; NEB Hodvah; cf. Ezr. 3:9).
4. A son of Elioenai, and a descendant of David (1 Ch. 3:24; Heb. *K hôḏaywāhû, Q hôḏawyāhû*; AV, NEB, Hodaiah).

HODESH hō'desh [Heb. *ḥōḏeš*–'new moon']. One of the wives of Shaharaim, a Benjaminite (1 Ch. 8:9).

HODEVAH hō-dē'və, hō'də-və. *See* HODAVIAH 3.

HODIAH hō-dī'ə [Heb. *hôḏîyâ*–'splendor of Yahweh']; AV HODIJAH in all occurrences except 1 Ch. 4:19.

1. A brother-in-law of Naham (1 Ch. 4:19), and possibly for that reason reckoned a member of the tribe of Judah. The AV and NEB translation "his wife" is probably wrong (but cf. KD *in loc.*).
2. One of the Levites who explained to the people the law as read by Ezra (Neh. 8:7; 1 Esd. 9:48 [AV Auteas]) and led their prayers (Neh. 9:5). He is doubtless one of the two Levites of this name who sealed the covenant of Nehemiah (Neh. 10:10,13 [MT 11,14]).
3. One of the chiefs of the people who sealed the covenant of Nehemiah (Neh. 10:18 [MT 19]).

J. G. MCALLISTER

HOE [Heb. *maʿdēr*] (Isa. 7:25); AV MATTOCK; [*ʿāḏar*] (Isa. 5:6; 7:25); AV DIG; NEB also WORK. An implement used to loosen the earth and to weed. *See* MATTOCK.

HOGLAH hog'lä [Heb. *ḥoglâ*–'partridge']. The third of five daughters of Zelophehad of the tribe of Manasseh (Nu. 26:33). Zelophehad had no male heirs, and it was

made a statute that the inheritance in such cases should pass to the daughters as joint heirs, on condition, however, of marriage within the tribe (Nu. 27:1-11; 36:1-12; Josh. 17:3f.). The name also occurs in the Samaria ostraca (no. 47).

HOHAM hō'ham [Heb. *hôhām*] (Josh. 10:3). An Amorite king of Hebron and one of the five kings of the Amorites who joined together for war on Gibeon because of its peace treaty with Joshua. The five were defeated in the decisive battle of Beth-horon and shut up in a cave at Makkedah in which they had taken refuge; after the battle, they were slain, hanged, and cast into the cave (Josh. 10:1-27).

HOISE. An archaic form of "hoist," used by the AV in Acts 27:40 to translate Gk. *epairō*, "lift up."

HOLD [Heb. *'āḥaz, ḥāzaq, tāmaḵ* (Prov. 31:19), *tāpaś* (Jer. 49:16); Gk. *échō* (and compounds of it), *kratéō, epilambánomai, háptō*]; AV also CATCH, RETAIN, KEEP, etc.; NEB also GRASP, SEIZE, CLUTCH, CLING, ADHERE, etc.

Hebrew *'āḥaz* can refer to physical acts of holding or seizing, e.g., Jacob seizes Esau's heel (Gen. 25:26). It can, in addition, have a more figurative sense; Job says that affliction has "taken hold" of him (Job 30:16). The word is also used anthropomorphically to describe God's protection of His people (Ps. 73:23; 139:10). Similarly, Heb. *ḥāzaq* can be used to speak of a literal act of holding (Gen. 21:18), but it also is used with the preposition *be* to describe a person's "adherence" or "obedience" to various things — other gods (1 K. 9:9), God's covenant (Isa. 56:4), instruction (Prov. 4:13).

The NT uses Gk. *kratéō* in a literal sense (Mt. 12:11) but also in a more figurative sense. The Jews "hold" to traditions of their fathers (Mk. 7:8), and the Christian community must "hold" to certain teachings (2 Thess. 2:15; He. 4:14; Rev. 2:13,25). The Epistle to the Hebrews exhorts its readers to "hold fast" (*katéchō*) to their confession (3:6, 14; 10:23). In 1 Tim. 6:12, 19 Christians are urged to "take hold of" the life that has been offered to them (*epilambánomai*).

In addition, the word "hold" can convey the sense of "hold back" or "prevent from going away" (Lk. 4:42, AV), "hold counsel" (Mk. 3:6), "hold down," or "suppress" (Rom. 1:18, AV), "hold in honor" (Acts 5:34), "hold one's peace," or "be silent" (2 S. 13:20), "hold out" (Est. 4:11), "hold up" (2 S. 2:22, AV), "consider," or "reckon" (Rom. 3:28), "contain" (2 Ch. 4:5), "place" (Ps. 66:9, AV), "prefer" (Mt. 6:24, AV).

One interesting usage is found in Jn. 20:17 where Jesus forbids Mary to "hold" Him since He has not yet ascended to His Father (AV "touch"; NEB "cling"). The imperative is in the present tense and thus lends support to the suggestion that the verse means "Do not cling to me." Jesus' work on earth has been completed, and He must now ascend to the Father.

Bibliography.–Bauer, rev., pp. 295, 422f., 448f.; BDB, pp. 28, 304f., 1069, 1074; *TDNT*, II, *s.v.* ἔχω κτλ. (Hanse); III, *s.v.* κρατέω (Michaelis). P. L. BREMER

HOLD (ONE'S) PEACE AT. An archaic expression meaning "say nothing to," used by the AV to translate Heb. *ḥāraš* in Nu. 30:4, 7, 14; Est. 4:14; etc., and Gk. *sigáō* (e.g., Lk. 20:26), *siōpáō* (e.g., Mt. 20:31), and *phimóō* (Mk. 1:25; Lk. 16:13).

HOLDERS [Heb. *bāttîm*, pl. of *bayiṯ*] (Ex. 25:27; 26:29; 30:4; 36:4; 37:14, 27; 38:6); AV PLACES; NEB RINGS. The term refers to attachments upon some items of furniture in the tabernacle through which the poles used in transporting the articles would pass. Similar arrangements on the boards or frames of the structure provided a means of stabilizing the walls.

HOLIDAY [Heb. *yôm ṭôḇ*] (Est. 8:17; 9:19, 22; cf. 1 S. 25:8); AV GOOD DAY. The Feast of Purim, celebrating Israel's deliverance from its Persian enemies, was the only really secular Jewish festival and was given over to merriment. In postbiblical times a "good day" was any holy or feast day.

HOLINESS; HOLY. A fundamental element in the distinctive nature of God as revealed in Scripture and a basic response to His grace on the part of the people of God as they become molded into His likeness.

I. Terminology
II. In the OT
  A. Holiness of God
  B. Holiness of Israel
  C. Holiness of the Cultus
III. In the NT
  A. Holiness of the Godhead
    1. Father
    2. Son
    3. Spirit
  B. Holiness of God's People
    1. Their Calling
    2. Their Conduct
    3. Problems

I. Terminology.–Heb. *qōḏeš* (Ex. 15:11), used as adj. (Ex. 3:5); the adj. *qāḏôš* (Lev. 20:7); Gk. *hágios* (2 Pet. 1:18), NEB also "sacred"; *hagiázō*, "make holy," "consecrate" (1 Cor. 7:14); NEB also "belongs to God"; *hagiasmós*, "sanctification," "holiness" (Rom. 6:19); NEB also "a holy life"; *hagiótēs* (Heb. 12:10); *hagiōsýnē* (2 Cor. 7:1); NEB also "consecration"; adj. *hierós* (2 Tim. 3:15, AV); *hósios* (Acts 2:27); NEB also "loyal servant."

II. In the OT.–A. Holiness of God. It is no exaggeration to state that this element overshadows all others in the character of the deity so far as the OT revelation is concerned (Ps. 99:3, 5, 9). The lesser emphasis in the NT is readily accounted for on the assumption that the massive presentation under the old covenant is accepted as an underlying presupposition.

Judging from the usage of the root *qḏš*, the basic idea conveyed by the holiness of God is His separateness, i.e., His uniqueness, His distinction as the Wholly Other, the One who cannot be confused with the gods devised by men (Ex. 15:11), the One who stands apart from and above the creation. Secondarily the holiness of God denotes His moral perfection, His absolute freedom from blemish of any kind (Ps. 89:35 [MT 36]). This aspect is strikingly set forth in the account of Isaiah's call to the prophetic office, in that the reiterated angelic pronouncement of the divine holiness brought to him the overpowering awareness of his own sinfulness (Isa. 6:5). Even though the seraphim are not characterized by sin, their demeanor proclaims that a gulf is fixed between them as creatures and God the Creator and Lord of all. The verbal communication by the seraphim was coupled with the vision of God's glory, the luminous token of His presence. Glory and holiness are closely related concepts. The threefold proclamation of the holy nature of God (the trisagion) is significant for its uniqueness. No other attribute is so treated. Farnell notes that "wherever theistic belief has prevailed, holiness has belonged to the essence of the idea" (p. 186).

God's holiness is reflected in His demand for an exclusive worship rather than one that is shared with various deities of man's creation. This demand is clearly reflected in the first two commandments of the Decalogue. This demand is not a characteristic of the deities of other religions in ancient times.

The possible danger that the holiness of God should be taken as an indication of remoteness and aloofness is overcome by the close alliance between His holiness and His righteousness (Isa. 5:16). He asserts the right to monitor the conduct of His own people. Through the prophet God points out the incompatibility between Israel's conduct and His character. For example, "A man and his father go in to the same maiden, so that my holy name is profaned" (Am. 2:7). Because His holiness is flaunted, His wrath comes into action. When His people are holy in name but not in fact, He cannot in righteousness refrain from expressing His displeasure in terms of judgment (Hos. 13:4-14; Am. 4:2; Ezk. 2:17-22). Likewise, the arrogant cruelty of other nations offends His righteousness and calls for punishment (Ezk. 38:17-23). At times a prophet could become disconcerted that a holy God would permit an alien nation to overwhelm His own people, who by comparison were more righteous (Hab. 1:12f.). The very fact that both in the OT and in the NT the people of God, His chosen and beloved ones, are not exempt from chastening is a sure token that His holy and righteous character is never compromised.

B. Holiness of Israel. Clearly holiness is not something native to this people, but a quality derived only from God. As with God, so with His people, holiness has a twofold aspect. The first consists in a privileged position. This nation is chosen, in distinction from all the peoples of earth, to be the special possession of the Almighty (Dt. 7:6). The choice was not dictated by Israel's prominence, seeing that it was the fewest in number of all peoples, but was due to His love (Dt. 7:7f.). Thus, the nation's holiness is to be traced primarily to its position in God's purpose. But that very position makes it natural and inevitable that Israel will be summoned to honor His will by being obedient to His commandments and faithful to His covenant (Ex. 19:5f.). This is acquired holiness (Lev. 11:44f.; Dt. 28:9).

A serious threat to Israel's commitment to keep the law of God presented itself when the tribes took possession of Canaan and found themselves surrounded by neighboring peoples who worshiped other gods. Despite advance warnings by Moses about the peril of intermarriage with these peoples, a course of action that held the threat of apostasy to an alien worship (Dt. 7:2-4), Israel succumbed to this danger. The most notable example is the imposition of Baal worship on the northern kingdom by Ahab's marriage to Jezebel. Both the northern and the southern kingdoms suffered captivity because of their unfaithfulness to the Lord God of their fathers. Even then the lesson was not fully learned, for in the days following the return from Exile many took alien wives: "The holy race has mixed itself with the peoples of the lands" (Ezr. 9:2). This comment was motivated not by racism but by concern for the purity of the community's worship and life under God.

The concept of holiness permeated the life of Israel. Even the land occupied by the people was considered holy (Zec. 2:12), since it was the land of the Holy One of Israel and belonged to the nation as His gift. The capital city Jerusalem is designated as the city of God, the holy habitation of the Most High (Ps. 46:4 [MT 5]). What the holy of holies meant in relation to the rest of the sanctuary, Jerusalem the holy city meant in relation to the rest of the land. When the nation became involved in military action against neighboring peoples, the conflict was regarded as a holy war and those who participated as warriors understood that such a conflict laid on them the responsibility to refrain from intercourse with women (2 Sam. 11:11; cf. 1 Sam. 21:4f.). For the nation as a whole one day in the week, the sabbath, was to be kept holy to the Lord as a special day of rest on which a holy convocation was held (Lev. 23:3). The appointed festivals of the Lord, held at specified times during the year, were proclaimed as holy convocations (Lev. 23). One who took upon himself the vow of the Nazirite, whether for life or for a limited period, was regarded as holy, as separated to the Lord. He was to abstain from wine and strong drink, to let his hair grow long, and to avoid going near a dead body, even that of a loved one. These aspects of separation constituted his special holiness (Nu. 6). The claims of holiness reached deeply into the daily life of the people. An example is the law of the tithe: Of the products of the soil and of the flock and of the herd the people were required to set aside a tenth for the Lord (Lev. 27:30, 32). Those who lived at a distance from Jerusalem were permitted to convert these items into money which was to be regarded as holy, and as such was to be conveyed to the Lord's treasury (Lev. 27:30-33).

C. Holiness of the Cultus. Since any place where God is pleased to reveal Himself can rightfully be proclaimed holy (Ex. 3:5), it is natural that everything connected with His worship should be so designated. The tabernacle erected in the wilderness according to divine specifications was placed in the center of the camp as a constant reminder of the presence of a holy God in the midst of His people.

The division of this structure into two portions, the holy place and the most holy, was calculated to emphasize the awesomeness of the privilege of drawing near to the living God. In the former area the priests, duly consecrated for their ministrations, carried on their labors, but only the high priest was permitted access to the most holy place where God's presence was uniquely experienced once a year on the Day of Atonement.

In a special way the ark of the covenant symbolized and epitomized the divine presence. Its later history in the land of promise is revealing. The loss of it to the Philistines in battle was interpreted to mean that the glory of Israel had departed (1 S. 4 22). Its sojourn among an alien people brought to them affliction and terror, disclosing the fact that the Holy One of Israel would not permit Himself to be treated as a prize of war. Even on the soil of Israel the attempt to carry the ark by unconsecrated hands brought retribution (2 S. 6:6f.). Levites should have been assigned to bear it.

Not only were the Levites holy in order to be able to assist the priests (2 Ch. 35:3), but the priests themselves, who presented the offerings of the people to the Lord, were holy (Lev. 21:6), and above all the high priest as the head of a holy order. His garments (Ex. 28:2) and his crown were labeled holy (Ex. 39:30). He was consecrated to his office with holy anointing oil that was also used for his sons, for the tent of meeting, and for the utensils needed in worship (Ex. 30:22-33).

All these features were retained when the temple supplanted the tabernacle. It was likewise pronounced holy (Ps. 65:4 [MT 5]), being the place where holy offerings were presented and where God met with His people. Though the earthly sanctuary, constructed and used for His worship, was considered holy, heaven was recognized as the true sanctuary, God's proper and holy abode (1 K. 8:30; 2 Ch. 30:27). This recognition made more meaningful the divine condescension, "I dwell in the high and holy place and also with him who is of a contrite and humble spirit" (Isa. 57:15).

No doubt the element of beauty prominent in the vest-

ments of the priests and the utensils used in the priestly service was intended to portray the beauty of holiness in the moral and spiritual sphere. The danger resident in cultic observance was that the worshiper would be content with going through the motions, making the prescribed sacrifices but failing to realize adequately the presence and holiness of God in a personal way. We read of priests and Levites being sent among the people of Judah to teach them (2 Ch. 18:7-9). While their instruction undoubtedly gave prominence to the ethical aspects of the law, it is probable that attention was paid also to the significance of the temple ritual, so that when worshipers presented their gifts and sacrifices they would realize the importance of dedicating themselves afresh to the Lord.

Holiness in the ceremonial sense is contrasted with various conditions. One is uncleanness due to eating food designated as unclean, coming into contact with a dead body, etc. (Dt. 23:14). Another area is the common (Lev. 10:10; Ezk. 44:23), that which is not consecrated or that which is ordinary, such as common bread in distinction from the sacred loaves in the holy place (1 S. 21:4). A third classification, this one having more than ceremonial aspects, involves what is so abhorrent to the divine holiness that a curse is placed upon it and it becomes marked for destruction. The term *ḥērem* is used to indicate it. An example is the city of Jericho and its inhabitants, utterly destroyed by God's command (Josh. 6:17-19).

III. In the NT.–Understandably the NT carries over much OT data, though the frame of reference may be altered. For example, we read of God as holy (1 Pet. 1:15), of holy angels (Lk. 9:26), holy prophets (Acts 3:21), the firstborn as being holy (Lk. 2:23), a holy priesthood (1 Pet. 2:5), a holy nation (1 Pet. 2:9), the Holy City (Mt. 4:5), the Holy Scriptures (Rom. 1:2), etc. The most striking difference is the virtual eclipse of the purely ceremonial aspect of holiness and a flooding of the sacred page with allusions to holiness as conformity to the nature of God.

A. Holiness of the Godhead. 1. Father. In His great prayer the Son of God addressed His Father as holy (Jn. 17:11) and in giving instruction to the disciples on prayer directed them to recognize the heavenly Father as worthy of being acclaimed and honored as unique, without a rival — "Hallowed be thy name" (Mt. 6:9). The seer of Patmos reports the angels' praise of God through the trisagion (Rev. 4:8), as well as the appeal of martyrs for their vindication by Him (Rev. 6:10) and the adoration of the saints who had defied the beast (Rev. 15:4).

2. Son. The angelic prediction that Mary would have a son included the observation that He would be called holy (Lk. 1:35). This was accented during His ministry by the admission of demons (Mk. 1:24), after His resurrection by the Church at prayer (Acts 4:27, 30), by the apostolic unfolding of the fulfillment of prophecy in His person (Acts 2:27; 13:35), and by epistolary writers (e.g., He. 7:26).

3. Spirit. Though by no means lacking mention in the OT, He is seldom designated there as the Holy Spirit ("the Spirit of the Lord" is the most common title). In the Synoptic Gospels He is represented as resting on Jesus for the accomplishing of His mighty works (Lk. 4:14, 18). When certain scribes attributed the exorcisms of Jesus (obviously a beneficent ministry) to the power of Satan (a malevolent source), Jesus pronounced this an unforgiveable sin, namely, blasphemy against the *Holy* Spirit (Mk. 3:22-30).

In the book of Acts the Holy Spirit assumes leadership of the Church by illuminating, empowering, and directing the servants of Christ (1:8; 2:4; 5:32; 13:2; 16:6f.), and by keeping the Church pure (5:1-11).

A shift is discernible in the letters to churches by Paul and others, for here the emphasis falls on the Spirit's work in the gathering of the saints and in individual lives. He is there to promote holiness (1 Thess. 4:7f.; 1 Cor. 6:19).

B. Holiness of God's People. 1. Their Calling. In view of the general parallelism between Israel and the Church, it is not unexpected that the NT children of God should be considered holy by virtue of their position. This is fundamental to any consideration of their condition. It may strike one who examines 1 Corinthians as contradictory that Paul should address his readers as saints or holy ones (1 Cor. 1:2; cf. 3:17), whereas much of what he says about them in the body of the letter seems to contradict this characterization. The apparent contradiction is ameliorated by translations that suggest a future frame of reference for holiness by inserting *to be* between "called" and "saints," as though the holiness is only a future, hoped-for reality. Such translations miss the point, for Paul is asserting that these people are holy by virtue of their call. It is a matter of position in relation to God rather than a condition. In keeping with this, the preceding statement about these believers, that they are sanctified in Christ, can only bring confusion if it is taken as a description of their state, since this is not confirmed by the contents of the letter. Clearly, they are being described here as set apart to God in Christ.

Once more, in the same letter, the apostle uses the term "sanctified" in a way that removes it from any possible human activity. He states that the Corinthian believers were washed, sanctified, and justified (1 Cor. 6:11). This was done, he states, in the name of the Lord Jesus and by the Spirit of God. Clearly this does not mean that the Corinthians were made holy in character. The term "sanctified," placed as it is before "justified," can only mean a positional holiness, something that was granted concurrently with justification but given prior mention because of the context.

It is helpful in this connection to consider Paul's description of himself (1 Cor. 1:1). He is not saying that people call him an apostle, but rather that he *is* an apostle by virtue of being summoned by God to this responsibility. The position of his readers as saints is parallel to his position as apostle, i.e., both relationships depend on the divine call. Issues concerning character or conduct *at this point* are irrelevant. That is not to assert or imply that they are unimportant in the overall consideration of holiness. But it is the habit of NT writers to base their appeal for holiness of life upon their readers' call, their choice by a holy God. Peter's approach is typical: "As he who called you is holy, be holy yourselves in all your conduct" (1 Pet. 1:15). That call is intimately connected with God's choice, His electing (1:2).

2. Their Conduct. Clearly the divine choice has in view also an actual life change, the molding of character, what may be described as progressive sanctification. So it behooves us to examine the second aspect of holiness, namely, an actual improvement in one's manner of life. Though the believer must involve himself in this process, his involvement is not something meritorious, as though it could become a contributing factor to his acceptance by a holy God. Salvation is already his as a gift of God's grace. But by virtue of being born into the family of God he should desire to reproduce the family likeness. This is the will of God. The starting-point for the development of a holy character is the realization that the mercies received from God call for an adequate response. Paul identifies this as the presentation of one's body as a living sacrifice, holy and acceptable to God (Rom. 12:1). He does not mean the body as a physical entity distinct from the inner life, but rather as the normal vehicle for implementing the desires and purposes of the one who has become a new creation in Christ. This dedication of the

person will have to face the temptation to be conformed to this age, a temptation that can be met by the renewal of the mind (the thoughtful recollection and appreciation of the divine mercies) so as to experience an ever increasing transformation (v. 2) that is doubtless to be thought of as a growing conformity to the likeness of Christ (2 Cor. 3:18). In the latter passage it is made clear that the Holy Spirit is the agent of this transformation, but not the pattern, for that is Christ Himself, the holy Son of God. The apostle stresses this in writing to the Galatians, who were floundering in their misapprehension of the sufficiency of the Savior: "My little children, with whom I am again in travail until Christ be formed in you!" (Gal. 4:19). What was needed was the appropriation of the Lord in all the fulness of His power.

The Greeks were notorious for their laxity in sexual relations. Consequently Paul had to cope with the issue, especially among the Thessalonians and Corinthians. He makes several observations, based on the premise that it is God's will that they be holy (1 Thess. 4:3). God's call had in view for them a holy life (v. 7). Sexual deviation is an affront to the Holy Spirit who has been given to them (v. 8). The body is not meant for immorality but for the Lord (1 Cor. 5:13). The believer's body is a temple of the Holy Spirit (v. 19). Believers should not associate with a so-called brother who is guilty of immorality (5:11). Persistence in an unholy course should bring expulsion (5:13). The Church must be protected, for it is holy, the temple of God, as is the believer's body (3:17).

Not infrequently Christians are reminded to greet one another with a holy kiss (e.g., Rom. 16:16), holy because free from any erotic association. It was a token of mutual love in the Lord. This practice served as a reminder of the fact that the love of God shed abroad in human hearts is a holy love.

Growth in holiness is not possible apart from the means of grace. Scripture is an inspired record, given by God for the profit of His people, a holy, powerful instrument calculated to promote a life of godliness. Prayer should be linked with the Word as its natural and expected response, for whereas by Scripture God speaks to us, in prayer we respond to Him. The Holy Spirit who is indispensable for the interpretation of the Word (1 Cor. 2:12f.) is equally necessary for a satisfactory experience in prayer (Rom. 8:26f.). These two factors, the Word and prayer, both of them under the tutelage of the Spirit and working together, should produce the needed response of obedience to God that in turn results in holiness. Contrary to a rather widespread opinion, extreme asceticism does not promote holiness, for while it may remove outward temptation it does not deliver from inward desire.

3. Problems. One problem is antinomianism, a point of view overly intrigued by the truth that Christ is the end of the law for righteousness to everyone who believes (Rom. 10:4). What results is more interest in freedom to live as one chooses than to cultivate a holy life. Paul rebukes such a tendency with the observation that the believer, as God sees it, has died with Christ to sin. He has no further obligation to serve it. It is incongruous, therefore, to think that one should continue to live in sin (Rom. 6:1-11). Antinomianism can easily be refuted, and few would openly endorse it; nevertheless it remains a snare to believers who are content to come to terms with sin in their own lives and remain unwilling to seek a way of deliverance.

The opposite tendency is perfectionism, the position that it is possible for a believer to make such diligent use of the means of grace and to be so fully committed to the will of God that sin is effectually banished. It should be granted that the desire to attain such a state is praiseworthy. Consequently perfectionism can be set aside only for the best of reasons. Foremost is the serious doubt that Scripture endorses such a view. When we find that Paul, who is appealed to for support of the perfectionist position because of his teaching (e.g., 2 Cor. 7:1), actually denies perfection in his own case (Phil. 3:12) and assigns the realization of it to the age to come (1 Cor. 13:10), we begin to sense that the whole subject needs careful scrutiny and clarification. The word "perfect" must of course be given its full weight when used of God (Mt. 5:48). He is our ultimate standard of holiness and we should not desire a lesser one. But the word itself in its general manward use means fully grown or mature, and that is its meaning in the teaching on sanctification (Phil. 3:15; Col. 4:12). In Eph. 4:13 Paul presents as the goal of Christian ministry "a perfect man." He is not thinking in individual terms, but collectively ("we all"), so he does not have in mind the hope that a few individuals may arrive at sinless perfection. Rather, his desire is that his readers, all of them, may be no longer babes. So the perfection in view is spiritual maturity.

Furthermore, the picture of the Christian life presented in Scripture is one of incessant antagonism and conflict between the flesh and the Spirit (Gal. 5:17). There is no reason to think that this situation relates only to some believers or that it will be altered during one's earthly pilgrimage. The victory of which Paul writes in Romans is not the complete banishment of sin but the breaking of its dominion in the life of the Christian (6:12-14). One need be no longer a slave to its mastery. He can have deliverance by counting on the fact that he has died with Christ to sin and by presenting himself and his renewed powers of body and spirit to God for His holy use.

Finally, Scripture leads us to expect perfection for the whole person in the future, when Christ comes again (1 Thess. 5:23). After we have come to Christ for salvation, our minds are still limited. Only when we see Him face to face will we know as we have been known (1 Cor. 13:12). Our bodies are still subject to incursions of illness and to decrepitude, heralding the prospect of death. Why, in view of the unity of the whole person, should it be thought possible for the redeemed human spirit alone to anticipate the perfection that is reserved for the future? Maturity should be our goal for the present life. Perfection belongs to the day of Christ, when we will be fully transformed into His likeness. Meanwhile, only One has been able to ask without fear, "Which of you convicts me of sin?" (Jn. 8:46). Even though one may feel that he has not sinned for a considerable period, it is hazardous to make feelings the criterion. Furthermore, holiness is not simply the absence of sin but being filled with the Spirit and reflecting the love of Christ. Can anyone say in good faith that he has done this consistently?

In summary, holiness has a threefold aspect. All believers are positionally holy by virtue of their calling as saints. They are then summoned to such conduct as befits their new position in Christ. They are to seek by God's help to grow and mature with the life of Christ as their pattern for appropriation. Without this holiness, which confirms the salvation experience, no one will see the Lord (He. 12:14). The final phase of holiness will be reached when Christ completes the process of salvation by His return, when all His own will be like Him, seeing Him as He is, the perfect and glorious Son of God (1 Jn. 3:2).

E. F. HARRISON

HOLLOW. The RSV uses "hollow" to translate four Hebrew words:

(1) Heb. *kap* regularly means the palm of the hand but is also applied to other concave objects, including the hollow of the thigh (Gen. 32:25, 32; usually assumed to mean the socket of the thigh-joint) and the hollow of a sling (1 S. 25:29; AV "middle"; AV mg. "bought"; NEB omits).

(2) The "hollow" of the hand in Isa. 40:12 (NEB "palm") is Heb. *šō'al*.

(3) Heb. *maḵtēš* is literally "mortar" (Prov. 27:22, and postbiblical Hebrew); it is applied to a hollow rock formation in Jgs. 15:19.

(4) The two great bronze pillars which flanked the entrance to Solomon's temple are called "hollow structures" (Heb. *nāḇûḇ*) in Jer. 52:21; a parallel passage occurs in the LXX of 1 K. 7:15, but is omitted by the MT (RSV and NEB follow the LXX, while the AV omits with the MT).

Ex. 27:8; 38:7 describe the wilderness altar as "a hollow structure of planks" (*nᵉḇûḇ luḥōṯ*) overlaid with bronze. Its apparent unsuitability as an altar on which fires are to burn continually leads many scholars to regard it as an artificial retrojection of Solomon's altar, made portable by the priestly author to suit the needs of the wandering Israelites.

D. J. HALPERIN

HOLM TREE [Heb. *tirzâ*; Vulg. *ilex*] (Isa. 44:14); AV CYPRESS; NEB ILEX. Omitted by the LXX, this term has been much disputed. The Douay, RV, and RSV have "holm tree"; but the true holm or holly (*Ilex aquifolium* L.) does not grow in the locality specified in Isaiah. It is perhaps the massive oriental plane tree, *Platanus orientalis* L., widely distributed throughout Lebanon and Palestine, or the slender *Cupressus sempervirens* L.

See also OAK (Sus. 58).

HOLOFERNES hol-ə-fûr'nēz [Gk. *Olophernēs*]; NEB HOLOPHERNES. According to the book of Judith, chief captain of Nebuchadrezzar, king of the Assyrians (Jth. 2:4), who was commissioned to make war upon the west country and to receive from the inhabitants the usual tokens of complete submission, earth and water. The object of the expedition of Holofernes, who thus became the typical persecutor of the Jews, was to compel people everywhere to worship Nebuchadrezzar. He was slain by Judith, the heroine of the book of that name, during the siege of Bethulia. There is no notice of Holofernes except in the book of Judith. The termination of the word would seem to indicate a Persian origin for the name.

HOLON hō'lən [Heb. *ḥōlōn, ḥōlôn*].

1. One of the towns in the hill country of Judah (Josh. 15:51) assigned to the Levites (21:15). In 1 Ch. 6:58 (MT 43) it is called HILEN. It is usually identified with Khirbet 'Alîn, about 16 km. (10 mi.) NW of Hebron, although this location would place it in the region of Beth-zur (Josh. 15:58) rather than Debir.

2. Probably once an important town in the "tableland" of Moab (Jer. 48:21); the site is unknown.

HOLY. *See* HOLINESS.

HOLYDAY. This word occurs twice in the AV (Ps. 42:4 [MT 5]; Col. 2:16). In the latter case it renders Gk. *heortḗ*, the ordinary term for a religious festival (RSV, NEB "festival"). In the former instance "keeping holyday" renders Heb. *ḥôḡēḡ*. The verb *ḥāḡaḡ* means "make a pilgrimage" or "keep a religious festival." The psalmist (who was perhaps an exiled priest) remembers with poignant regret how he used to lead religious processions on festival occasions.

HOLY OF HOLIES [Gk. *hágia hagíōn*] (He. 9:3). *See* MOST HOLY PLACE.

HOLY ONE. *See* GOD, NAMES OF II.E.2.

HOLY PLACE [Heb. *haqqōḏeš*] (Ex. 26:33; Lev. 16:2; 1 K. 8:8; 2 Ch. 5:11; Ezk. 41:21; etc.); AV also SANCTUARY; NEB also SANCTUARY, INNER COURT; [*māqôm qāḏôš*] (Ex. 29:31; Lev. 6:16 [MT 9]; etc.); NEB also SACRED PLACE; [*mᵉqôm qāḏôš*] (Eccl. 8:10); AV "place of the holy"; [*mᵉqôm qoḏšô*] (Ezr. 9:8); [*mᵉqôm haqqōḏeš*] (Lev. 14:13); NEB SACRED PRECINCTS; [*hammiqdāš*] (Ezk. 45:4); AV, NEB, SANCTUARY; [*hā'ārôn*] (2 Ch. 5:9); AV ARK; [*môʿēḏ*] (Ps. 74:4); AV CONGREGATIONS; [Gk. *tópos hagíos*, and variants thereof] (Mt. 24:15; Acts 6:13; 21:28); NEB also SANCTUARY; [*hágia, tá hágia*] (He. 9:2, 12, 25); AV, NEB, also SANCTUARY. The outer compartment of biblical sanctuaries; also the outer court of the tabernacle (Lev. 6:16 [MT 9], 26 [MT 19]; 10:13), the "most holy place" of the temple (Ezk. 41:21, 23; He. 9:12, 25), the temple itself (Ezr. 9:8; Ps. 24:3; 74:4; Acts 21:28), the inside of the temple in general (2 Ch. 29:5), the temple grounds (Ezk. 45:4).

Each of the biblical sanctuaries had two main compartments, as originally exemplified in the tabernacle. Here the inner and outer rooms were separated by a tapestried curtain supported on four pillars (Ex. 26:33). The dimensions of the holy place in the tabernacle are usually calculated at twenty cubits length and ten cubits breadth and height (approx. 9 by 4.5 by 4.5 m. [30 by 15 by 15 ft.]). It was in this chamber that the priests performed many of their routine duties, tending the golden lampstand, the table of showbread, and the golden altar of incense. He. 9:1-5 implies that these all had symbolic value.

In Solomon's temple the measurements of the length and breadth of the holy place were probably double those of its tabernacle prototype. 1 K. 6:2 is normally understood to mean that the height was thirty cubits (approx. 14 m. [45 ft.]). There were now ten golden lampstands, five on either side (1 K. 7:49), and, according to 2 Ch. 4:8, there were also ten tables of showbread. This outer chamber had light from clerestory windows which appear to have had splayed jambs (cf. 1 K. 6:4). It was separated from the most holy place by a wall in which were set doors made of olivewood; these were carved and overlaid with gold (1 K. 6:31f.).

The length and breadth of the holy place in the Herodian temple were the same as in Solomon's building, but

larger figures for the height are given by Josephus (*BJ* v.5.5) and in Mish. *Middoth* iv.6. The same passage in Josephus indicates that the Herodian temple had the standard items of furniture associated with the holy place (cf. 1 Macc. 1:21f. for the second temple in the time of Antiochus IV). Only the golden lampstand and the table of showbread are shown on the Arch of Titus, which commemorates the capture of Jerusalem in A.D. 70.

R. P. GORDON

HOLY SEPULCHRE. A term referring to the place in Jerusalem where Jesus was entombed. Nowhere in the NT is it referred to as "holy." It is simply called a *mnēmeíon*, the Greek term for "sepulchre" or "tomb." Certain information is given about this tomb. It was the private burial plot of Joseph of Arimathea (Mt. 27:57-60). No one had previously been buried in this tomb (Lk. 23:53). It was located in a garden near where He was crucified (Jn. 19:41). It was near but outside the city (v. 20).

It was not until the 4th cent. that a site was singled out for veneration as the tomb of Christ and declared "holy." Eusebius (*Vita Constantini* iii.25-40) states that Constantine the Great directed Bishop Macarius to locate the place of the crucifixion and burial. It seems he was led to the site through a vision of the Queen Mother Helena. Constantine then demolished the Temple of Aphrodite that stood on the spot and erected the Church of the Anastasis. It was replaced by later churches, and the present massive building known as the Church of the Holy Sepulchre dates to the Crusader period. It has undergone numerous renovations and remodelings through the years. *See* Plate 40.

Though the traditional identification of this site dates to the 4th cent., it is not without problems. One of the major questions that has never been satisfactorily answered is whether the place was outside the city walls in the Roman period. In sharp contrast to this massive ancient church, located in the heart of a city whose history is blighted with bigotry, greed, and selfishness, is another site which has been accepted by many as the Holy Sepulchre. It is known as the "Garden Tomb" and is located a short distance N of the Damascus Gate. Though it cannot be established as the tomb of Christ with any more certainty than the site of the Church of the Holy Sepulchre, it is a more meaningful place for many Christians because of its quiet surroundings so completely reminiscent of the biblical narrative.

See JERUSALEM III.H.14, 15.

III. Summary: The Development and Significance of the Biblical Doctrine of the Holy Spirit

I. The OT Doctrine of the Spirit.—A. The Concept of Spirit in the OT. Hebrew *rû(a)ḥ*, "breath," "wind," and "spirit," comes from a root meaning "breathe out violently," almost "snort." The noun connotes unusual force or energy as seen in the mysterious breath of life in man (Job 9:18; 12:10; Ps. 104:29; etc), in the mighty and terrifying power of wind (Ps. 107:25; 148:8), in a dominating aspect of a person's disposition (Ex. 6:9; Nu. 5:14; 14:24; cf. Gen. 26:35), or most commonly in the ecstatic states of prophetic consciousness experienced as invasion by an external power (1 S. 10:6; 2 Ch. 24:20; Hos. 9:7).

From these fundamental experiences of spirit as intensity, mystery, and power are derived uses that pertain more directly to the Spirit as related to the covenant God of Abraham, Isaac, and Jacob. Breath in man is seen in association with the breath of God (Job 32:8). Combining the imagery of breath and wind, the breath of God is viewed as an overwhelming force (Isa. 30:28) or as a creative power (Ps. 104:30; cf. Gen. 1:2). In keeping with the primitive imagery of *rû(a)ḥ* the Spirit in relation to God is conceived more as an agency than as an agent, commonly using a quasi-liquid form as an analog of the Spirit (cf. Isa. 32:15; 44:3; Joel 2:28 [MT 3:1]).

B. The Spirit and God's People. The OT doctrine of the Spirit, rooted in religious phenomenology, is developed overwhelmingly within a theocratic context of the living God who acts, rather than in a context of metaphysics and science as later in the Greek concept of spirit as *pneúma*. Virtually all OT references to the Spirit, whether early or late, are related to the religious life of Israel as God's covenant people. Therefore, the preponderance of references pertain to the prophetic calling, state, and experience or to the charismatic powers given to Israel's leadership—prophets, priests, and kings.

1. The Spirit and Prophecy. The Spirit in the OT is above all the "Spirit of prophecy," for the most frequent manifestation of the Spirit of God is in relation to prophecy. Repeatedly, "the Spirit of Yahweh" (or "of 'Elohim" or simply "the Spirit") "came upon" someone to prophesy (Balaam, Nu. 24:2; Saul, 1 S. 10:10; Jahaziel, 2 Ch. 20:14) or, more vividly and violently, "clothed itself" with the one receiving prophetic power (cf. Amasai, 1 Ch. 12:18 [MT 19]; Zechariah, 2 Ch. 24:20). Indeed, Hosea equates the phrase "man of the Spirit" (Heb. *'îš hārû(a)ḥ*) with the term "prophet" (Heb. *nābî'*; Hos. 9:7); both were peculiarly characterized by the powerful activity of the Spirit of God.

Micah's classic statement makes clear that his mission as a prophet is related to God's powerful presence by His Spirit. He proclaims, "But as for me, I am filled with power, with the Spirit of the Lord, and with justice and might, to declare to Jacob his transgression and to Israel his sin" (Mic. 3:8). Ezekiel warns against false prophets who speak from their own spirits, having seen nothing from the Spirit of the Lord (Ezk. 13:3). The same role of the Spirit is seen in Zedekiah's scornful reply to Micaiah (1 K. 22:24), in Zechariah's interpretations of Israel's pro-

phetic history (Zec. 7:12), and in the Levites' prayer (Neh. 9:20, 30). Significantly, many of Israel's great leaders, not generally considered prophets, are recognized as prophetic (e.g., Jacob, Joseph, Moses, Daniel). In fact it is understood that the whole people of God ought to be prophetic and indeed will be in the future (Nu. 11:29; Joel 2:28; cf. Ps. 105:15).

The manifestations of the Spirit in Israel's earliest prophecy were ecstatic in that unusual states of consciousness were generally involved. This is most clearly seen in the early bands or schools of prophets in which, evidently, prayer, music, and ritual dance were part of the prophetic context. The story of Saul's messengers who, "when they saw the company of the prophets prophesying, and Samuel standing as head over them," also began to prophesy because the "Spirit of God came upon them" (1 S. 19:20) is a classic example of ecstatic prophecy among the prophetic bands caused by the sudden action of the Spirit. The story of Saul's call to kingship (1 S. 10:1-13) specifically mentions musical instruments (and implied ritual dance) as well as the ecstatic experience of prophecy; "the spirit of the Lord will come mightily upon you, and you shall prophesy" (v. 6). The accounts of Moses and the seventy elders (Nu. 11:25), Eldad and Medad (Nu. 11:26), Balaam (Nu. 24:2), and Zechariah (2 Ch. 24:20) also indicate the sudden powerful action of the Spirit, with prophecy a sign of its presence or impartation, whether momentary or permanent.

Though of a somewhat different character, the later prophets indicate no absolute disjunction from the earlier prophets in terms of the role of the Spirit or the ecstatic nature of the prophetic experience. The emphasis, however, does shift from the Spirit as the *cause* of prophetic ecstasy to the Word as the *content* of that experience. Also, beyond prayer and fasting, there is no hint of the use of special means such as music and ritual dance as a context for prophecy. Ezekiel and Zechariah are the clearest examples of the continuity in psychologically unusual prophetic states. Nevertheless, the role of the Spirit in prophecy is often clearly stated (Isa. 48:16; Ezk. 11:5; Mic. 3:8). The prophets view the Spirit as the cause of earlier prophecy (Zec. 7:12) and as the source of the future prophetic ministry of the Messiah (Isa. 61:1) or among the whole people of God (Joel 2:28 [MT 3:1]).

This last point is of special significance for the development of the relation of the Spirit to prophecy in the OT. What begins as a sporadic and uncommon experience of prophecy limited to certain key leaders comes to a focus in a messianic figure, uniquely characterized as the man of the Spirit (Isa. 11:2; 42:1; 61:1), and finally is to be universalized and naturalized among the whole people of God in the age to come (Joel 2:28).

2. The Spirit and Israel's Leadership. A second dominant theme in the relation of the Spirit to the people of God is the charismatic endowment of Israel's leadership. The episode of Moses and the seventy elders was primarily intended to legitimate the authority of an administrative institution in Israel. A permanent endowment of the Spirit as found in Moses was evinced by a single experience of ecstatic prophesying and was required for true administrative authority. Through Moses' hands, Joshua also participates in the Spirit to serve as Israel's leader (Nu. 27:18-20; Dt. 34:9).

The same endowment for leadership can be seen in the experiences of the judges, including Gideon, Jephthah, Samson, and others (Jgs. 6:34; 11:29; 14:6). It is especially evident in Saul (1 S. 10:1-13) and David (1 S. 16:13f.) as the first kings of Israel. Even after the Exile Zerubbabel was to lead by the power of the Spirit (Zec. 4:6). Again it is important to note that this charismatic line of leadership culminates in a messianic figure especially equipped by the Spirit (Isa. 11:2; 42:1; 61:1) and followed by an age in which all are endowed with the Spirit and attended by His power (Isa. 44:3-5; Ezk. 39:29; Joel 2:28).

C. The Spirit and God. Because of the emphasis on Spirit in terms of religious experience and unusual power, the OT has little concern for the Spirit as personal or for His inner relationship to God. Isaiah stresses that "spirit" is essentially of God rather than of mankind or of anything in the created order, specifically setting a sharp disjunction between God and mankind, "spirit" and "flesh" (Isa. 31:3). Thus the Spirit, uniquely of God, is made virtually synonymous with God's power (Zec. 4:6; Mic. 3:8) or His presence (Ps. 139:7). The model underlying the OT conception of the relation of God and the Spirit is one of agent and agency, pictured anthropomorphically as God and the breath of His mouth (Isa. 30:28).

In the parallelism between God's presence and His Spirit there is, however, a place for a hypostatizing of the Spirit. The Spirit as God's presence and power active in the life and leadership of Israel is depicted as being grieved (Isa. 63:10), as giving rest (v. 14), as one who could not be directed by people (40:13), as being patient (Mic. 2:7), and as an instructor to God's people in the wilderness (Neh. 9:20). This lays the foundation for the further understanding of the Spirit as personal in the history and experience of the early Church.

D. The Spirit and Man. Apart from the chief religious experiences of the Spirit in prophecy and leadership, very little is said about the Spirit in relation to mankind in general. The most significant conception in the OT period was that He is the source of human life. The creation account in Gen. 2:7 presents man's self-consciousness as a living person (*nepeš*) as the result of a distinct action of God, who breathes into man the "breath of life" (Heb. *nišmaṯ ḥayyîm*). Man, as the image of God, is given a distinction not given to the rest of the sentient creation.

This notion of the Spirit of God as the ongoing source of man's life is found also in Gen. 6:3, which contrasts man as flesh with the continuation of God's *rû(a)ḥ* within him, and in the book of Job, which equates man's breath with the *rû(a)ḥ* of God within man's nostrils (Job 27:3; 33:4; 34:14). The function of God's spirit in man extends also to his creative and intellectual activities. Bezalel's skills as an artisan of the tabernacle are directly ascribed to his being "filled with the Spirit of God — with ability and intelligence, with knowledge and all craftsmanship" (Ex. 31:3; 35:31). The same connection of the Spirit of God ("the breath of the Almighty") to man's intellectual functioning is generalized in Job 32:8: "But it is the spirit in a man, the breath of the Almighty that makes him understand." These notions of the relation of God's Spirit to people are summed up in the phrase that characterizes God as "the God of the spirits of all flesh" (Nu. 16:22; 27:16).

A more general use of the Hebrew term *rû(a)ḥ* in relation to man focuses less on God as the source and more on the effects of *rû(a)ḥ* on man, construed in terms of his own psychical functioning. Of the 378 OT occurrences of *rû(a)ḥ*, perhaps one quarter (especially in Psalms and Proverbs) involve a conception bordering on the functions of *nepeš*. By Ezekiel's time *rû(a)ḥ* in relation to man was assimilated to *nepeš*, though generally with higher associations and with more profound intensity and significance.

E. The Spirit and Creation. The role of the Spirit in creation is not extensive. It is, however, in keeping with the primary experiential orientation to the Spirit as the

mighty power of the living God, immanent and active among His people. Ps. 33:6 presents the basic biblical order and emphasis in creation as a coordination of God's creative Word (Heb. *dāḇār*) and His mighty *rû(a)ḥ*, which proceeds as breath from His mouth. This same coordination of *rû(a)ḥ* and *dāḇār* is majestically portrayed in the first account of creation (Gen. 1:1–2:4). Here the creative word is prominent, but all is prefaced by a reference to the "brooding" Spirit as the "wind of God" moving over the primal state of creation prior to its progressive ordering through the Word (unless *rû(a)ḥ ʾĕlōhîm* means simply "mighty wind"). Other references to the Spirit's role in creation are sparse and do not add any significant points (see Job 26:13). The Spirit of God is viewed in relation not only to the action of creation but also to the preservation of the life of man and beast (Ps. 104:27-30).

F. The Spirit and the Age to Come. The development of the OT doctrine of the Spirit within its theocratic context reaches its culmination in the eschatological hope of the age to come In this final age of God's glory (Isa. 11:9; Hab. 2:14) and the glory of His people the Spirit really comes into His own, because that age is uniquely characterized as the age of the Spirit. This can be seen in a threefold way — first, in the figure of the coming messianic deliverer, perceived as prophetic (Dt. 18:15), as a kingly, charismatic leader (Isa. 11:1-10), and finally as a glorious supernatural person of divine qualities (Dnl. 7:13f.). Isaiah particularly characterizes this "one who comes" as a man of the Spirit (Isa. 11:2; 42:1; 61:1). Second, the age to come is inaugurated by the outpouring of the Spirit (Isa. 32:15; 44:3; Ezk. 39:29; Joel 2:28 [MT 3:1]). According to these passages there is to be an effusion of the Spirit in that age so that the people of God will experience the activity of the Spirit universally, permanently, and powerfully through inner, moral, and spiritual renewal. The Spirit's activity is to be so extensive that even the earth will be renewed as a fulfillment of the Spirit's role in the original creation. Third, this age of the Spirit is to be marked by a deeper, inward spirituality as summed up in Isaiah's and Jeremiah's expectation of a new covenant (Isa. 59:20f.; Jer. 31:31-34; 32:37-40). Although the Spirit's role in the new covenant is not delineated in these passages, His new and deepened inwardness is emphasized. However, Ezekiel's conception of this new covenant reality specifically mentions the role of the Spirit. God says, "I will put my spirit within you and cause you to walk in my statutes" (Ezk. 36:27). Here the role in the heart of the law (Jer. 31:33) and the fear of God (Jer. 32:40) are portrayed in terms of a new spirit and a new heart through the abiding inner presence of God's Spirit, guaranteeing an obedience never attainable prior to the future age.

Thus, a development can be perceived in the OT concept of the Spirit as the Spirit of the living God. That development is from sporadic, selective, and external activity of the Spirit, to His total pervasiveness both within God's people and within the created order. This eschatological hope, which within the OT remains only a hope, forms the only adequate basis for understanding the NT message of the kingdom of God established through Jesus Christ and inaugurated by the Spirit at Pentecost.

G. Intertestamental Developments. The intertestamental literature in the Apocrypha and Pseudepigrapha and the writings of Qumrân, Josephus, and Philo reveal no really significant changes beyond the OT conception. Generally, the Spirit is regarded as the prophetic Spirit that worked in the golden age of Israel's history but is now quiescent (Sir. 48:12, 24; 1 Macc. 9:27). In the wisdom literature the role of the Spirit is intellectualized as the Spirit of wisdom (Wisd. 7:22–8 1). Philo, a Jewish expositor of Platonic Mosaism, sees the Spirit in more philosophic terms or in terms of ecstatic or mystical inspiration. The pseudepigraphic writings, emerging within a context of heavy political oppression coupled with the lack of any authentic religious voice, do pick up and amplify the OT eschatological hopes of a coming age in which a man of the Spirit would appear and an effusion of the Spirit would take place (Ps. Sol. 17:37 [var. 42]; 18:7 [var. 8]; T. Levi 18:7; T. Jud. 24:2).

II. The NT Doctrine of the Holy Spirit.–*A. Introduction.* The NT teaching on the Spirit is incredibly rich and complex in comparison with OT materials. Yet there is a definite sense of continuity in one major aspect — the Spirit is above all still the experience of God powerfully present and active in the midst of His people. And this experience, as in the OT, is totally conditioned by the theocratic context of relation to the living God of Israel's patriarchs and by the eschatological framework of the two ages. This context is, however, at the same time both more focused and more universalized. It is more focused in that the NT experience is inextricably bound up with the historical Jesus. It is more universalized in that this experience is "naturalized" into the individual and corporate life of all of the people of God, who are now uniquely the people of the Spirit participating in the reality of the age of the Spirit.

It is important to note at the outset that the whole NT teaching regarding the Spirit is radically conditioned by the experience of the Spirit, Pentecostal and post-Pentecostal, so that even the pre-Pentecostal references to the Spirit are understood within the later experience and understanding of the Church. Further, it is necessary to remember always that the NT teaching arises from varied circumstances and over an extended period. This gives rise in the NT to a series of doctrinal strands regarding the Spirit that indicate both development and an underlying complementary unity. The thrust of NT teaching on the Spirit can best be reviewed by a survey of the various basic strands as they are presented, but especially as they reflect the development of the doctrine in terms of Jesus and the Church within the broadest framework of the two-age eschatological structure. Three fundamental strands of teaching on the Holy Spirit are to be discerned in the NT: (1) Lukan; (2) Pauline; (3) Johannine. Matthew and Mark can be assimilated to the more extensive frame of Luke-Acts, and the remaining NT writings provide materials requiring only brief comment. The order of treatment favors the coherency of the overall meaning of the NT doctrine of the Spirit rather than chronology.

B. The Holy Spirit in Luke-Acts. To Luke must go the title "Historian of the Holy Spirit," even as Paul and John must share the title "Theologian of the Holy Spirit." This is not to say that Luke is not theological in his treatment of the Church's experience of the Holy Spirit. Rather it is because he uses the vehicle of history preeminently to provide an external framework large enough to contain the full significance of the experience of the Holy Spirit, even as Paul and John plumb the depths of His meaning and content in a more detailed and personal fashion. Luke focuses on the movement of salvation-history, on the leadership of the Holy Spirit in the missionary task of the Church, and on the manifestation of the Holy Spirit in the external frame of history. In this way he provides the context within which may be contained the Pauline and Johannine analysis of the "inwardness" of the experience of the Spirit. Luke, Paul, and John all share the same basic frame of salvation-history, though in rather complementary ways and with definite variation of emphasis. Thus, within this external frame which Luke develops

HOLY SPIRIT

most obviously, the three fundamental NT strands on the Holy Spirit may be seen to cohere in presenting the full NT understanding of the Spirit.

Luke clearly sees himself as historian in the classical sense, as he announces in his introduction to the work (Lk. 1:1-4). But though his stated purpose is "to write an orderly account" of the "things which have been accomplished" among the community of believers, both internal observation and comparison with the other Gospels reveal that Luke's selection of materials uniquely reflects a concern for the activity of the Holy Spirit. The second part of his work leaves no doubt whatsoever as to this emphasis, which is particularly evident in Luke's conception of the Spirit as the Spirit of prophecy (as in the OT), as the agency of the progression of salvation-history, and as the agency and power of the Church's missionary movement.

Luke is especially convinced that the Spirit is the source of prophetic experience in strict continuity with the OT tradition. Accounts of the prophesying of Elizabeth (Lk. 1:41-45), Mary (1:46-55), Zechariah (1:67-79), Simeon (2:25-27), Anna (2:36-38), and John the Baptizer (3:15ff.), in which they are usually described as "filled with the Holy Spirit" (a phrase that must also be interpreted in the light of Acts 2:4; 4:8, 31; 6:3, 5; 7:55; 9:17; 13:9), clearly indicate Luke's interest in this aspect of the Spirit's activity. Luke sees this experience of the renewal of prophetic Spirit in the OT tradition as inaugurating a transition from the *status quo* of this age and anticipating the advent of something new. For Luke divine intervention in John's conception and that of Jesus by the Holy Spirit is the beginning of a transition in salvation-history, a transition especially marked by an accompanying renewal of the OT Spirit of prophecy.

This transition is continued at Jesus' baptism by John at the Jordan. Jesus, conceived by the Holy Spirit, is thus uniquely endued with the Spirit as a permanent reality, enabling Him to take the office of Messiah (anointed by the Spirit) and to carry out His ministry in the Spirit's power as one who is uniquely the man of the Spirit (Lk. 3:22; 4:1, 18-21). The transition is completed through the events of His "exodus" in death, resurrection, and ascension, after which He is portrayed as receiving the "promise of the Father" (Acts 1:4; 2:33). As the man of the Spirit now become the exalted Lord of the Spirit, He "pours" out the Holy Spirit, thus inaugurating the age to come, the age of the Spirit promised in the eschatological hope of the OT prophets, particularly Joel (Acts 2:16-21). Luke sees the OT structure of the two ages as fulfilled, in part yet also in actuality, through the history of Jesus the Messiah and its continuation in the history of the community of the Spirit.

It is within this revolutionary understanding of the history of Jesus as effecting the transition of the OT eschatological hope into a present (although partial) realization of the age to come, a history characterized at each critical point by the unique activity of the Holy Spirit, that Luke presents his narrative. Luke is able, then, to center on the Church, as the community of the Spirit of the age to come, in its missionary task of "preaching the kingdom of God and teaching about the Lord Jesus Christ" (Acts 28:31). Luke actually wrote within the context of the Church's missionary expansion; his concern is clearly along these lines, as Acts 1:8, which outlines the rest of the work, indicates. Therefore Luke, in strict conformity with the OT conception of the Spirit of prophecy, speaks primarily in terms of a dynamic power guiding (Acts 8:29; 10:19; 13:2, 4; 15:28; 16:6f.) and enabling the community of believers in His continuation of "all that Jesus began to do and teach" (1:1).

The very fact that Luke wrote two "treatises" indicates both a continuity and a parallelism between the ministry of Jesus and that of the Church. This is quite evident in the Gospel's beginning with Jesus' self-definition as one uniquely anointed with the Spirit to proclaim and to heal (Lk. 4:18f.), recalling Isa. 61:1f., and the second book's beginning with a unique, epochal empowering of the Spirit mediated from Jesus as the new exalted Lord of the Spirit, fulfilling Joel's prophecy (Joel 2:28-32 [MT 3:1-5]). Because of Luke's missionary concern, conceptualized as the Church's continuing Jesus' activity, and the fact that Luke essentially does not advance beyond the OT conception of the Spirit of prophecy, Luke-Acts emphasizes not the Spirit as the eschatological reality that totally conditions the believer (as found in Paul), but the manifestation of the Spirit as ecstatic and powerful, i.e., signs and wonders.

1. Jesus and the Spirit. In his Gospel Luke traces, basically from the same materials underlying all of the Synoptics, the relationship of Jesus and the Holy Spirit. His narrative gives the fullest account of the promise of Jesus' conception by the Holy Spirit (evidently learned from Mary herself; cf. Lk. 2:19, 51). The conception is described as a "coming upon" or an "overshadowing." The OT flavor is very strong in the parallelism between the Holy Spirit and the "power of the Most High" (1:35). The significance given to this fact of divine action in Jesus' conception is that Jesus' relation to the Spirit is not simply that of another pneumatic figure in the OT prophetic tradition (contrast with John who, though "filled with the Holy Spirit even from his mother's womb" [1:15], is not conceived by the Holy Spirit). Jesus is, rather, from the very beginning uniquely a man of the Spirit, even by origin, so that He is holy, the special Son of God (1:35).

The next event that indicates the relation of Jesus and the Spirit is His baptism by John at the Jordan (3:21f.). John the Baptizer, already introduced by Luke as a prophetic figure in the mold of Elijah (1:17), is presented as one whose ministry is preparatory to Jesus. John's message is freighted with intense eschatological expectation of the immediate appearance of a messianic deliverer and the violent inbreaking of the age to come, accompanied by a special baptism of judgment in wind and fire through the Holy Spirit (Mk. 1:7f.; Mt. 3:11f.; Lk. 3:15-17). Essentially a preparatory and not initiatory ministry, John's activity in the renewed OT Spirit of prophecy in itself was not a new beginning or eschatological but was a sign of a new beginning soon to take place through another, described by John as one who baptizes with the Holy Spirit (the reality) rather than with mere water (as John himself did). His call to the people was preparation for the ushering in of the new age and a pointing to the one who was actually to initiate that event. John's baptism was thus a preparation for the true baptism in the Holy Spirit.

The actual experience of Jesus' baptism is beautifully and delicately described by Luke. He carefully separates Jesus from the repentant crowd in His baptism (3:21), and as He is praying (a point of significance for the later Christians, cf. Lk. 11:13; Acts 4:31) the Spirit descends upon Him, symbolized by a dove, and a word of special divine approbation is given to Him. All the Evangelists attest to this special endowment with the Holy Spirit at the beginning of Jesus' public ministry. The Fourth Gospel notes explicitly and forcefully what is only implicit in the Synoptic Gospels, that the Spirit not only comes upon Jesus but remains there, thereby establishing Him as one who is characterized as "baptizer with the Holy Spirit" (Jn. 1:32f.).

The alternate reading in Codex Bezae messianically interprets Ps. 2:7. It is correct in its insight that this event

constitutes Jesus' own entry into the reality of the age to come in terms of its *powers*, though not in terms of the *life* of that age. He already possessed the latter by virtue of His unique conception by the Holy Spirit. This special endowment of the Spirit is necessary if Jesus is to fulfil His role as initiator of the age to come. Through this experience Jesus is depicted as *the* man of the Spirit who, in the context presented by Luke, is also then the head of the renewed race of Adam (cf. Lk. 3:23-38, where Jesus is traced back to Adam, "the son of God").

Entrance into the coming eschatological reality was initially restricted to Jesus Himself, though He did give His disciples temporary authority over disease and demons (Lk. 9:1-6; 10:1-20). It was only as Jesus went through His representative messianic baptism (Lk. 12:50; Mk. 10:38) — His death, resurrection, and consequent exaltation as the Lord of the Spirit (Acts 2:33) — that the life and the power of the new age could be made available to the Church, the renewed people of the promised age. Only after the total transposition of the humanity of Jesus the Messiah into the form of the future age could the reality of the life and power of that age be poured out upon all flesh.

The implied motif of Jesus as the head of a renewed race of Adam is continued in Jesus' wilderness temptation, where He is led (Mark implies "compulsion" [RSV "drove him out"; Gk. *ekbállei*], Mk. 1:12) by the Holy Spirit. Luke describes Jesus as "full of the Holy Spirit," the result of the Spirit's descent. The newly endowed Jesus first experiences intense spiritual discipline and struggle in the desert (Lk. 4:1-13), in which Jesus, the Spirit-filled man, overcomes the devil's temptation, succeeding where Adam failed.

Significantly, Jesus, after the descent of the Holy Spirit upon Him, acts only in the Spirit's power rather than in His own power as the Son of God. Only after Jesus is anointed by the Spirit does He begin His messianic ministry. Thereafter, though references to the Holy Spirit are not frequent, Jesus' power and authority quite clearly result from the continuing presence of the Holy Spirit with Him as the man of the Spirit. Jesus' whole ministry is construed as being under the guidance and power of the Spirit. Luke emphasizes this by noting that, at the beginning of Jesus' public ministry, after His victory over temptation, He "returned in the power of the Spirit into Galilee" (Lk. 4:14).

Later references also indicate that Jesus always acted by the Holy Spirit's power rather than His own. In 5:17 "the power of the Lord was with him to heal," suggests OT idiom for "the Spirit of the Lord." In 11:20, a verse of key significance in interpreting Jesus' person and ministry in relation to the OT eschatological hope, Jesus makes it clear that His exorcisms (and by implication all of His deeds of power) were performed by the power of "the finger of God," or as in the parallel Mt. 12:28, by the Holy Spirit.

In this connection, the "blasphemy against the Holy Spirit" is specially relevant, particularly in the Markan account (Mk. 3:19-30; cf. Mt. 12:24-32; Lk. 12:8-12; cf. Mk. 13:11). The point specifically at issue is the source of Jesus' ministry of power in healing, especially exorcisms. Jesus' enemies attributed His power to Beelzebul. Jesus counters first by pointing out the absurdity of such a tactic on the part of Satan and second by referring to the sin against the Holy Spirit. It is clear that in this context this sin is one of wilful spiritual self-blindness in attributing to Satan the work of the Holy Spirit in Jesus' ministry (cf. Mark's comment "for they had said, 'He has an unclean spirit'" [3:30]).

It is important to note for historical reasons that this sin is very specific and therefore cannot be generalized to some unknown sin that is arbitrarily categorized as an "eternal" or "unforgivable" sin. Untold amounts of useless and neurotic agony have been wrought in the experience of some who dreaded that they had committed this sin unknowingly.

Luke's presentation here indicates an extension of this sin in a direction particularly relevant to the early Church. In the context of Jesus' warnings against apostasy in persecution, he mentions the sin against the Holy Spirit, along with the promise that the Holy Spirit will provide the proper words to speak (cf. the experience of Stephen the first martyr; Acts 6:8–7:60). In the early Church apostasy was a serious issue and the question of the reinstatement of the lapsed was much debated. This saying of Jesus follows a serious warning about such apostasy. He then goes on to say that those who oppose the followers of Jesus are guilty of a sin more awful than apostasy, a sin not of timidity but of outright hostility to the Holy Spirit's activity in the midst of God's people. In post-Pentecostal perspective this saying of Jesus indicates that the sin against the Holy Spirit as active in the Spirit-filled community is of the same order as blasphemy against the Spirit as the source of Jesus' ministry, healing, and power. This conforms very much with Luke's main theme of the continuity of mission between Jesus and the Church in the same Spirit and dynamic.

Even more important than these indirect indications of the role of the Spirit in Jesus' ministry is His own inaugural address given in Nazareth, "where he had been brought up" (Lk. 4:16-22). In a dramatic setting Jesus opened the prophetic scroll to Isaiah and read the charter of His own ministry: "The Spirit of the Lord God is upon me, because the Lord has anointed me to bring good tidings to the afflicted; he has sent me to bind up the brokenhearted, to proclaim liberty to the captives, and the opening of the prison to those who are bound; to proclaim the year of the Lord's favor" (Isa. 61:1f.).

In this striking way Jesus takes to Himself the role of Isaiah's Servant of the Lord, thereby characterizing His own ministry as initiated, empowered, and justified only on the basis of His anointing with the Spirit of the Lord. He is *the* prophet, with plenary endowment of the Spirit for ministry. Isa. 61:1f. might well be taken as Luke's own introduction of the basic theme of Luke-Acts, the Spirit-empowered mission of Jesus begun in His own history and continued in the missionary expansion of the Church through the same initiative and power. Matthew, in his own unique way, reinforces this picture of Jesus as the Spirit-endued Servant of the Lord by quoting another passage in Isaiah: "Behold, my servant whom I have chosen, my beloved with whom my soul is well pleased. I will put my Spirit upon him, and he shall proclaim justice to the Gentiles . . ." (Mt. 12:18-21; Isa. 42:1-4). In view of Jesus' self-definition as the Spirit-endowed Servant of the Lord and the many indirect references to His ministry as empowered by the Spirit, it is clear that even where there is no explicit mention of the Holy Spirit the assumption is that all is done through His power.

The eschatological significance of Jesus' ministry in the power of the Spirit is epochal in nature. Jesus was not functioning simply as the latest in the long line of prophetic figures as a "man of the Spirit" (cf. Hos. 9:7). Rather Jesus is clearly perceived as *the* man of the Spirit, who both initiates and rules the coming age of glory and who *also* experiences and demonstrates this new age as the age of the Spirit. This becomes strikingly evident in the *logion* of Jesus in which He replied to the scribes and

Pharisees who attributed His power to Beelzebul. He said: "But if it is by the finger of God that I cast out demons, then the kingdom of God has come upon you" (Lk. 11:20; "by the Spirit of God," Mt. 12:28). By this saying Jesus provides the key to His self-interpretation. The power and authority He exercised were to Him evidence that the long-awaited kingdom of God was already present in some sense. Jesus experienced the reality of the age to come through the power of the age to come, the eschatological Spirit. This power to heal and to exorcise, which came so easily for Jesus, was but the smallest sample of the tremendous power of the kingdom of God — the mere "finger of God," a power that was clearly an expression of the activity of God's Spirit.

Luke has clearly interpreted Jesus, in the light of Jesus' self-definition, as *the* man of the Spirit, who brings about the age of the Spirit in which the Church also participates. Jesus' conception by the Holy Spirit and the attendant renewal of the Spirit of prophecy mark him from the very beginning as uniquely related to the Spirit. John the Baptizer's saying characterizing Jesus as the "one who baptizes with the Spirit" points to His eschatological mission. Jesus' experience, in His baptism, affirming His unique status as the Son of God, coupled with a plenary and permanent endowment of the Holy Spirit as the source of His direction and power, marks His own entry into the power of the age to come. His inaugural address recalling Isaiah's Servant of the Lord indicates His intense awareness of special anointment by the Spirit for an eschatological ministry of healing and proclamation. That for which John made preparation Jesus already experienced as present — at least in part.

2. Jesus, the Spirit, and Pentecost. For Luke, the final step in developing the eschatological meaning of Jesus' person and ministry in relation to the Spirit awaits the post-resurrection events of Ascension and Pentecost. Luke's first "treatise," the Gospel, ends with Jesus' ascension and His command for the disciples to wait before commencing the task of witnessing. Jesus Himself is to send the "promise of the Father" upon them through which they will be clothed, in OT metaphor, with the divine power of the Holy Spirit promised through the prophets in association with the coming glorious eschatological age.

Acts, Luke's second treatise, begins by retracing the Ascension in more detail in preparation for the narrative's real beginning. At this point Luke sets the stage masterfully, emphasizing the Gospel's focus on the ministry that Jesus had *begun* prior to the ascension. Then, in immediate anticipation of what was to follow, reference is made to John the Baptizer's depiction of Jesus' ministry as baptizing with the Holy Spirit, a characterization that Jesus Himself adopts. The fulfillment of that promise is imminent, laying the foundation both for Luke's concern with the mission of the Church and for the manifested power of the Spirit in that mission (Acts 1:8). All of this is set within an eschatological frame that sweeps aside inadequate conceptions of the kingdom of God as merely political (1:6), making room for the eschatological event about to take place, yet without bringing the final (but temporarily undetermined) apocalyptic coming of the kingdom of God.

Following this preparation Luke proceeds, after a transitional section (1:12-26), to describe briefly but vividly the epochal event of Pentecost. The disciples, gathered together in eschatological excitement anticipating the promised Holy Spirit and evidently observing the Jewish feast of Pentecost, suddenly experienced a powerful inrush of spiritual reality, described by Luke as being "filled with the Holy Spirit," and they overflowed with tremendous joy in a prophetic ecstasy of praise in other tongues (languages that were recognized by others). This was attended by other manifestations comparable to the rushing of a powerful wind (reminiscent of a common meaning of *rû(a)ḥ* and *pneúma*) and to the appearance of a divine fire resting upon each person present, symbolic of a participation in the new and wonderful spiritual reality. The noise and excitement of the event provided the opportunity for a Spirit-filled, prophetic explanation of the event's significance by Peter, along with the eleven. *See* Plate 38.

Eschatologically, this experience is the beginning of the age of the Spirit in its universal and naturalized form, fulfilling the OT promisé, specifically as mentioned by Joel (Joel 2:28-32 [MT 3:1-5]). Not a matter of another prophetic band, it was the coming of the long-awaited promise of the Spirit "poured out upon all flesh" with attendant evidence of the Spirit's presence in terms of charismatic manifestations — visions, dreams, and prophecy — manifestations once restricted to a few but now universalized.

This fulfillment is possible only through the agency of the risen and exalted Jesus (Acts 2:32f.). The Pentecost event confirms both that Jesus is Lord and Messiah (v. 36) and that this eschatological experience is a result of His activity as the Lord of the Spirit, for it is the exalted Jesus who pours forth "this which you see and hear" (v. 33).

This is clearly the culmination of the Lukan development of the relation of Jesus to the Spirit of the age to come. He has now effected a new stage in the progress of salvation-history in which the endowment of the Spirit that He experienced at Jordan is made available to His people through the messianic baptism of death and the subsequent resurrection and ascension. What once He alone experienced as the Man of the Spirit, now as exalted Lord He provides to all of His disciples.

That the early Christians experienced the Spirit only as derived from the ascended Lord and not as their own, independent spiritual experience ties the experience of the early Church to the history of Jesus. It does not allow for a generalized "mysticism" of religious experience. Pentecost is clearly the beginning of a new era and marks the entrance of the disciples into the power of that age. The availability of this gift of the Spirit is expressed in terms of repentance — faith, baptism in water, and reception of the Holy Spirit — an opportunity extended to all who receive God's sovereign call (Acts 2:38f.). With this salvation-history has transited by means of the activity of the Holy Spirit and through the person of Jesus from the age of anticipation to the age to come, present and powerfully manifested but not fully realized (1:11).

Luke's method of historical narrative does not discuss directly the significance and mode of reception of this promised "baptism in the Holy Spirit" by Jesus as exalted Lord of the Spirit. No rigid pattern is to be found in Acts concerning the order and conditions of the baptism in the Holy Spirit. The composite picture for individual entrance into the community of the Spirit encompasses several events — hearing, repentance, baptism in water, laying on of hands, reception of the Spirit with charismatic manifestations (2:38; 8:12-19; 10:44-48; 18:8; 19:5f.) — the total initiation of the person, both conversion and empowering.

Theologically the phrase "baptism in the Spirit" is perceived as a unitary event with a twofold purpose and a twofold anthropological reaction. The giving of the Spirit by Jesus aims to communicate the new life of the age to come with the resurrected Lord as archetypal (Paul uses the concept "first fruits" [Gk. *aparché*], which John implies in his account of the pre-Pentecostal giving of the Spirit; Jn. 20:22). It aims also at the communication of new power experienced as the person's total immersion

into the reality of the Spirit with an attendant empowering for ministry, exactly parallel to Jesus' baptism at Jordan. Two experiences result. The communication of the life of the age to come is connected with the experience of conversion. The communication of new power is associated with the introduction to charismatic manifestation. The former is universally experienced by its very nature as dynamic life activity. The second, though potentially universal, is both conceptually and experientially separable from the first (cf. the Samaritans, Acts 8:14-17; and the Ephesian "disciples," 19:2-6) and must be actively received (cf. 2:38). A case can also be made for limiting the phrase "baptized in the Holy Spirit" to the introduction to the charismatic manifestation of the Spirit; thus the phrase "to receive the Holy Spirit" (Acts 2:38; 8:15, 17, 19; 10:47; 19:2; cf. Rom. 8:15; 1 Cor. 2:12; 2 Cor. 11:4; Gal. 3:2, 14) becomes a technical term indicating an active appropriation of this experience.

Though these two realities are separable in principle they were not generally separated in the experience of the early Church. The NT shows no concern for seeking any second, post-conversion experience. All Christians are viewed as having experienced the total complex of events. Indeed, the narrative of the Samaritan mission seems to imply that until that time all converts had experienced the total complex; the lack of the expected charismatic reception of the Spirit was recognized, so further action was taken by the apostles in the form of laying on of hands (Acts 8:9-19). This "pan-Pentecostal assumption" is one way to understand the overall experience of the Holy Spirit underlying the NT writings.

3. The Spirit and the Church in Acts. The rest of the narrative in Acts carefully reviews the experience of the early Church in its Spirit-directed and Spirit-empowered mission from Jerusalem "to the end of the earth" (1:8). This experience of the Spirit can be seen in the quality of the early Church's life as community, in relation to certain persons as especially filled with the Spirit, and in the very precise leading of the Holy Spirit in directing the mission.

The quality of life in the early Church is clearly connected to the promise of the Spirit. The beautiful picture of the initial community of believers (Acts 2:42-47), which depicts apostolic teaching, fellowship, breaking of bread, prayers, signs, wonders, holding "all things in common," and praise to God, indicates that all are implicitly connected with the first outpouring of the Spirit. The experience of Ananias and Sapphira (5:1) illustrates this point, for their sin is described as tempting the "Spirit of the Lord" (v. 9). Luke encapsulates the Church's situation as being "built up; and walking in the fear of the Lord and in the comfort of the Holy Spirit" (9:31). After the mission of Paul and Barnabas at Antioch in Pisidia the new converts were "filled with joy and with the Holy Spirit" (13:52).

While all believers are depicted as endowed with the Spirit, certain figures emerge as especially Spirit-endued. Peter speaks as one filled with the Holy Spirit not only at Pentecost but also before the high priestly commission (4:8). The Hellenists chosen to serve the widows are described as "full of the Spirit," particularly Stephen (6:3-6). Philip, also one of the seven, in the later evangelistic mission to the Samaritans performed signs, healings, and exorcisms by the Spirit (8:4-8). Barnabas is characterized as "a good man, full of the Holy Spirit and of faith" (11:24). Some persons such as Agabus were recognized by the community of the Spirit as prophets, much in the manner of the OT tradition (Acts 11:27f.; 21:10f.). Paul was clearly filled with the Spirit at his conversion through Ananias (9:17). He exercised a ministry of extraordinary power in signs and wonders (13:9-11; 14:8-11; 15:12; 19:11f.) and was unusually fruitful in bringing many into the community of the Holy Spirit (cf. Rom. 15:17-19).

The specific leading of the mission of the early Church by the Holy Spirit is quite pronounced. Philip, in the midst of his successful mission to the Samaritans, is led by the Spirit to the Ethiopian ruler (Acts 8:26, 29) and subsequently is "snatched away" by the Spirit, much after the fashion of Elijah or Ezekiel, to continue his mission (8:39). The variant reading in Codex Alexandrinus, "the Holy Spirit fell upon the eunuch and the angel of the Lord caught up Philip," shows both the strong expectation of the early Church that conversion should be attended by an identifiable spiritual experience and the dramatic leading of the Spirit. Similar influence of the Spirit upon missionary efforts is reflected in the experiences of Peter among the Gentiles (10:19f.; cf. 11:12), Barnabas and Saul (13:1-4), and Paul and Timothy (16:6f.; cf. 21:11). Even the appointment of elders in Paul's mission was related to the leading of the Holy Spirit (20:28). At the conclusion of the Jerusalem Council on the relation of gentile converts to the Mosaic customs the leaders expressed their conclusions in a letter delimiting conditions that "seemed good to the Holy Spirit" and to the Jerusalem leaders (15:28).

It is obvious that Luke and the Synoptists did not progress materially beyond the OT concept of the Spirit as the Spirit of prophecy. Yet, because of the new experience of the Spirit after Pentecost, it became more natural to speak of the Spirit in personal terms. Luke's description of the Holy Spirit as speaking (Acts 10:19f.; 11:12; 13:2; 21:11; cf. 15:28), being "tempted" (5:9), and forbidding Paul to preach (16:6f.) reveals a clear awareness of a personal dimension of the Spirit analogous to that of Jesus. Indeed, the Spirit is once described by Luke as the "Spirit of Jesus" (v. 7). Supplemented by the Matthaean liturgical form (Mt. 28:19), which links the Holy Spirit with the Father and the Son, this indicates that the personhood of the Spirit is recognized in the Luke-Acts-Synoptic strand of NT teaching. The full complement of NT teaching from Paul and John lays a very solid foundation for the theological formulation of the personhood and deity of the Spirit in trinitarian orthodoxy.

C. The Holy Spirit in the Pauline Epistles. The circumstances and literary form of the Pauline writings are compatible to express all aspects of the Spirit linked together in a basically coherent theological understanding. Paul combines Luke-Acts' external manifestation orientation and the Fourth Gospel's inward individualist approach in the two-age eschatological framework. These two interpretations he associates with the historical, resurrected Jesus through the corporate structure of the Church viewed as the body of Christ animated by the one Holy Spirit. His teaching encompasses both the life and the power of the age to come — the former in terms of inner renewal experienced in conflict with the "law" and the "flesh," the latter both as the Church's missionary dynamic and also as the source of its corporate unbuilding through the various manifestations of the Spirit. In short, the Pauline conception of the Spirit is one of totality. The Spirit is viewed as that which radically and totally determines the life and existence of the Christian, indeed, as that which defines the sphere of Christian existence. Participation in the reality of eschatological salvation is "in the Spirit." To be Christian is to be "in the Spirit" (Rom. 8:9). The wealth and complexity of the Pauline materials prohibit anything more than a look at their major points.

1. The Spirit in Eschatological Perspective. The eschatological framework in which the future age has already come in principle (if not in full manifestation) in the pres-

ence of the eschatological Spirit, first in Jesus Christ and then through Him as exalted Lord of the Spirit in the community of the Spirit viewed as a colony of that age (Phil. 3:20), is clearly accepted in the Pauline writings (Rom. 12:2; 1 Cor. 1:20; 2:6,8; 2 Cor. 4:4; Eph. 1:21; 2:7). This becomes especially clear in his reference to the Spirit as the "first fruits" (Gk. *aparchḗ*) in anticipation of the incomparable "glory that is to be revealed," the "glorious liberty of the children of God," and the "redemption of our bodies" (Rom. 8:18-25). Here the Spirit is looked upon as the initial stage of and in strict identity and continuity with the age to come — already experienced. Paul expresses the same concept through different images, referring to the Christian experience of the Spirit as a "guarantee" (Gk. *arrabṓn*) (2 Cor. 1:22; 5:5; Eph. 1:14) or under the figure of "sealing" (2 Cor. 1:22; Eph. 1:13).

This eschatological perspective provides the measure of the true nature of the Christian experience of the Spirit, whether it be in terms of a new life, "fruit of the Spirit" (Gal. 5:22) or the image of Jesus Christ (Rom. 8:29), or in terms of a new power, in the manifestations of the Spirit ("gifts"; "ministries"; "offices"; 1 Cor. 12:4-11,28; Eph. 4:11). Obviously, both the new life and the new power are essential to the very nature of the Church and to the Christian life. There can be no mere passing manifestations of the Spirit designed only for the establishment of apostolic authority. Rather, all manifestations of the Spirit are signs and scintilla of glory exhibiting the true nature of the Church as possessing the "first fruits" of the coming glory.

2. The Spirit and Jesus. The Pauline conception of the relation of the Spirit to the historic and risen Jesus is not a simple one. Writing from a powerful experience of the Spirit and with pastoral rather than philosophical concern, he speaks of the Spirit both as the mode of the presence of the exalted Lord within the individual Christian and as distinct from yet intimately related to Jesus (Rom. 15:30; 1 Cor. 6:11; 12:4; 2 Cor. 13:14). The point of greatest significance in the Pauline awareness of the relation of Jesus and the Spirit is the existence of a reciprocity between the two. There is no experience of Jesus apart from the Spirit even as there is no recognition of any "spirit" that is not related to the Jesus of history now exalted. In Paul's complaint to the Corinthians this becomes evident: "For if some one comes and preaches another Jesus than the one we preached, or if you receive a different spirit from the one you received, or if you accept a different gospel from the one you accepted, you submit to it readily enough" (2 Cor. 11:4).

Paul does not recognize any spirit that is not related to Jesus, no matter what the phenomenon presented. Ecstasy is not enough (1 Cor. 12:3), nor is prophetic utterance (2 Thess. 2:2). Rather, the Spirit for Paul is preeminently the "Spirit of Jesus Christ" (Phil. 1:19). The Spirit, which produces true confession of Jesus in the Spirit-filled worshiper (1 Cor. 12:3), is the "Spirit of life in Christ Jesus" (Rom. 8:2).

Paul recognizes that the transposition of Jesus' humanity into the glorified form of the age to come through resurrection and ascension means that He can be experienced only as "spirit" — not in the natural, material mode. Paul expresses this in his development of the "last Adam" interpretation of the risen Lord (1 Cor. 15:45); this does not mean He became the Spirit, but that He is now in the mode of spirit and is experienced only as such (cf. v. 50). Similarly, Paul's admittedly difficult statement that "the Lord is the Spirit" (2 Cor. 3:17f.) certainly cannot mean "God [Yahweh] is Spirit" (in Johannine style, Jn. 4:24), nor can it mean any confusion of Jesus ("the Lord") with the Holy Spirit. Rather it means that Jesus is experienced as spirit in contrast to the letter, which kills (2 Cor. 3:6). Here Jesus, experienced as spirit, changes the Christian into the likeness of Jesus (v. 18), showing again that the Spirit Paul recognizes is tied to and conditioned by the Jesus of history (cf. also Rom. 8:15-17).

3. The Spirit and the Body of Christ. Paul exhibits special concern for the functional aspects of the community of the Spirit. He applies primarily the image of the Church as the body of Christ animated and unified by the Holy Spirit (Rom. 12:4-8; 1 Cor. 12:17-31; Eph. 1:22f.; 4:11-16; Col. 1:18, 24), though he also uses other images (e.g., "God's temple," 1 Cor. 3:16f.; "household of God" and the metaphor of a building, Eph. 2:19-22; "great house," 2 Tim. 2:20f.; "pillar and bulwark of the truth," 1 Tim. 3:15). Through these images he depicts the unity of the Church (Eph. 4:3), the character of its worship as "in spirit" (Phil. 3:3), and its power through the manifestations of the Spirit.

As in the Luke-Acts materials, Paul applies the familiar motif of the Spirit as the source of signs and wonders in missionary activity. Paul so summarizes his own ministry. "For I will not venture to speak of anything except what Christ has wrought through me to win obedience from the Gentiles, by word and deed, by the power of signs and wonders, by the power of the Holy Spirit . . ." (Rom. 15:18f.), and more succinctly, "my speech and my message were . . . in demonstration of the Spirit and power . . ." (1 Cor. 2:4; see also 1 Thess. 1:5).

Paul does provide, however, a new insight into the relation of the Spirit and the Church not found in the Lukan materials. He sees the power and manifestations of the Spirit in the charismata not only in relation to mission but also and especially in relation to the very nature and functioning of the Church as it builds itself up and matures corporately into "the stature of the fulness of Christ" (Eph. 4:13). Twice Paul speaks of the charismata of the Spirit when he discusses the Church as the body of Christ and the Spirit's activity within the Church (Rom. 12:3-8; 1 Cor. 12:4-30). Once in the same context he speaks of the "gifts" (Gk. *dōreá*; Eph. 4:7-16). Gifts, offices, and ministries in the Church are all perceived as manifestations of the Spirit (cf. especially 1 Cor. 12:7, 11; 14:12).

All of these are permanent to the Church both because they reflect its eschatological nature and because of their very purpose in nurturing it into a mature state. There is no real exegetical foundation for any view that dismisses any gift, office, or ministry as merely temporary, as existing simply for the establishment of apostolic authority, or as associated with a phase of immaturity in the Church. (Nevertheless, the office of apostle, though it may continue in one sense, certainly is not continued in terms of the establishing of normative teaching and practice for the Church; Eph. 2:20). This is reinforced by the theological view of the Spirit's various manifestations as eschatological.

4. The Spirit and the Charismata. In view of twentieth-century movements of the Spirit in the Church it is necessary here to mention specifically the more spectacular and psychologically unusual manifestations of the Spirit as cataloged in 1 Cor. 12:3-10, particularly prophecy and "tongues." The precise nature and manner of the functioning of these charismata are not stated specifically, so it is difficult exegetically to go beyond mere inferences. Present-day experiences identified with these gifts may provide much clarification. In any case it seems clear that though the manifestations of these charismata may have involved unusual ("Spirit-filled") states of consciousness they were generally not fully ecstatic. This is implied in the Pauline commands to exercise control over the ex-

pression of tongues or of prophecy. It is also stated as an explicit principle that "the spirits of prophets are subject to prophets" (1 Cor. 14:32).

In Pauline use prophecy is not the same as preaching or teaching but is an especially appropriate and powerful spontaneous utterance in the speaker's own language given to those present in worship for purposes of upbuilding, encouragement, and consolation (1 Cor. 14:3). Prophecy sometimes concerned the future and could be quite specific (1 Cor. 14:24f.; 2 Thess. 2:2; cf. Acts 11:27; 21:11). Such utterances were not to be uncritically received but were to be evaluated in relation to the criterion of the historical Jesus (1 Cor. 12:3) and by the Church as a whole (1 Cor. 14:29; 1 Thess. 5:19-21). Evidently gifts of discernment functioned here along with objective criteria related to apostolic teaching (1 Cor. 12:3; 2 Thess. 2:2). Prophecy was highly valued by Paul because of its value for the Church (1 Cor. 14:4). Therefore he urged all to seek with great intensity this manifestation of the Spirit even above the others, which they were also to seek (1 Cor. 14:1, 39).

Some question exists about the manifestations of tongues in Acts and that of which Paul speaks in the Corinthian situation. In Acts tongue-speaking clearly results from an unusual initiatory experience of the Spirit (Acts 2:4; 10:44-46; 19:6; cf. 8:18). The purpose was neither preaching the gospel nor upbuilding the Church as a worshiping community, but more a sign of receiving the Spirit. At least on Pentecost, the speaking was in known human languages (Acts 2:7-11). In the Corinthian circumstances internal evidence indicates that it was more self-initiated than a result of a sudden experience of the Spirit (1 Cor. 14:15, 27f.), and that its purpose was either as an individualized form of prayer (14:2, 4, 28), or, with the parallel gift of interpretation (which also could be sought, v. 13), as an equivalent to prophecy (v. 5), or as a sign to unbelievers who might be present (v. 22). Corporate or individual singing in tongues may have been practiced and encouraged by Paul (v. 15; Eph. 5:19; cf. Col. 3:16, "spiritual songs"). Paul seems to imply that all might speak in tongues (1 Cor. 14:5) but that only some exercised this gift and that of interpretation in the context of the worshiping community (1 Cor. 12:30). Further, in contrast to the picture presented in Acts, Corinthian tongues seem generally not to be known human languages (cf. "tongues of men and of angels"; 1 Cor. 13:1; "no one understands him, but he utters mysteries in the Spirit"; 14:2), though they are clearly languages of some sort because they bear a meaning that may be interpreted. There is no evidence whatsoever that Paul or any of the apostles used tongues as a means of preaching the gospel in their missionary efforts. The cessation and renewal of tongues and other of the more unusual charismata in the Church are historical rather than exegetical or theological matters.

5. The Spirit and the Christian Life. Most Pauline references to the Spirit relate to the individual Christian's inner experience and behavior as one totally determined by being "in the Spirit." They encompass the initial giving and receiving of the Spirit, the relation between the individual and the Church, and the ethical significance of being "in the Spirit," a concept uniquely and highly developed in Paul's writings.

As for the OT prophets, so for Paul the Holy Spirit was a gift from God, not something constitutive to man as man. Repeatedly Paul refers to this fact: "Now we have received not the spirit of the world, but the Spirit which is from God" (1 Cor. 2:12); "Your body is a temple of the Holy Spirit within you, which you have from God" (1 Cor. 6:19); "he [God] has . . . given us his Spirit in our hearts" (2 Cor. 1:22; see also 5:5; 11:4); "God has sent the Spirit of his Son into our hearts" (Gal. 4:6); "God, who gives his Holy Spirit to you" (1 Thess. 4:8). Paul correlates the fact of being given the Spirit by God with the actual reception of the Spirit in the individual Christian's experience. The very origin of the Christian life (as in Jn. 3:5) Paul attributes to the Spirit, which he describes as "renewal in the Holy Spirit" (Tit. 3:5). He epitomizes this point in his ethical injunction to the Galatians, "If [=since] we live by the Spirit, let us also walk by the Spirit" (Gal. 5:25). The Christian "lives by the Spirit" and the Spirit "dwells" in the Christian; the whole Christian life is premised upon this fact.

Paul deals with the reception of the Spirit most clearly in his Galatian Epistle. In refuting the error of the Judaizers and their legalism Paul states that Christ redeemed from the law "that we might receive [Gk. *lábōmen*] the promise of the Spirit through faith" (Gal. 3:14). Reception of the Spirit was not something merited or earned but a gift received by faith. In keeping with Acts and the Pauline pan-Pentecostal premise, however, this reception was not simply an acceptance of a divine fact but a definite experience to which Paul could appeal in his discussions with the Galatians. He asks them, "Did you receive the Spirit by works of the law, or by hearing with faith?" — a question that Paul knows can be answered not simply as a doctrinal affirmation but as an experience. The type of reception to which Paul refers is clearly the sort found in the Lukan descriptions in Acts. The whole dramatic episode of conversion-initiation with its suddenness and depth (repentance-faith), its active response in water baptism, and the crowning experience of the charismata, the outward, discernible manifestations of the Spirit, provides an unequivocal experience of reception of the Holy Spirit to which appeal could be made. Paul's further question, "Does he [Jesus] who supplies the Spirit to you and works miracles among you do so by works of the law, or by hearing with faith?" (Gal. 3:5), indicates this type of reception in no uncertain terms. Paul sees this same experience as universal to the Corinthians as they entered into the body of Christ, the sphere of the Holy Spirit who animates that body (1 Cor. 12:13). For Paul baptism by the exalted Jesus into the sphere of the Spirit is the basis both of diversity of manifestation of the Spirit and of a fundamental unity (1 Cor. 12:11).

Life in the Spirit is experienced in manifold ways. The Spirit is the source of divine love (Rom. 5:5), joy (1 Thess. 1:6; Rom. 14:17), and hope (Rom. 15:13), indeed of a whole constellation of moral and spiritual virtues, the "fruit of the Spirit" (Gal. 5:22f.). He leads the Christian (Rom. 8:14; Gal. 5:18), strengthens both his physical nature (Rom. 8:11) and his "inner man" (Eph. 3:16), produces a deep sense of sonship reflective of Jesus' own awareness (Rom. 8:15-17; Gal. 4:6; cf. Mk. 14:36), aids in prayer (Rom. 8:26, 27; Eph. 2:18; 6:18), enables him to "understand the gifts bestowed on us by God" (1 Cor. 2:12), teaches him (v. 13), is the source of any charismata he manifests (vv. 7, 11; 2 Tim. 1:6f.), provides the experience of true liberty in relation to the law (2 Cor. 3:17), inspires true worship both corporately and individually (Phil. 3:3; Eph. 5:18f.), and is generally the dynamic behind sanctification (2 Thess. 2:13).

This development of an all-encompassing activity of the Spirit in the life of the Christian, which combines enthusiastic, ethical, and eschatological elements into a unified whole, is the high point in the biblical doctrine of the Spirit in relation to the individual. Paul provides a balance between inner spiritual and moral renewal, "the fruit of the Spirit," and the proper functioning of the external manifestations of the Spirit, "the gifts of the Spirit," a balance found elsewhere only in the Johannine materials,

yet without the corresponding balance of external, eschatological, and corporate elements.

6. The Spirit, the Law, and the Flesh. Two points of special significance in Paul's treatment of life in the Spirit are the contrast between law and Spirit and the struggle between flesh and Spirit. Paul does not fall into a false "perfectionism" in his awareness of the powerful present experience of the eschatological Spirit. Rather, he fully recognizes the element of struggle and conflict in the Christian life as well as its victory in anticipation of the final revelation of the "glorious liberty of the children of God" (Rom. 8:18-25).

One of the primary threats to true life in the Spirit was a threat from Paul's own background as a Pharisaic Jew, the threat of legalism. Law, as misunderstood in the Pharisaic tradition, reduces everything to the level of man's self-righteousness (Phil. 3:9) with its attendant tendency to self-adulation (Gal. 6:13-15) and bondage (Rom. 7:6; 8:15), and it leads ultimately to spiritual death (2 Cor. 3:6). The only law Paul acknowledges is the "law of the Spirit of life in Christ Jesus," which sets free "from the law of sin and death" (Rom. 8:2). This new law fulfils the requirements of the old (Rom. 13:10) without leading back to the error of self-justification (Gal. 2:15-21). So radical a disjunction did Paul see between the "letter of the law" and the Spirit who brings life and freedom (2 Cor. 3:6, 17) that to be under law is to be severed from Christ, outside the sphere of God's grace, and therefore not in the hope of righteousness through the Spirit (Gal. 5:3-5). Paul speaks of this disjunction in terms of death to the law and resurrection to a totally different sphere with a totally new relationship and life (Rom. 7:1-6). "Spirit" for Paul is no indefinite thing in comparison with the law but is quite vivid and precise so that one can not only enter into the life of the age to come as a result of the Spirit's activity but can also "walk in the Spirit," or conduct his total daily life "by the Spirit" (Gal. 5:18, 25).

Intimately connected with the contrast between the way of law and the way of the Spirit is the conflict between flesh and Spirit (spirit). The way of law is one expression of "the flesh" (Gal. 3:3). Paul uses the word "flesh" (Gk. *sárx*) in a variety of ways in his Epistles. Some uses are traditional and ethically neutral (see Rom. 3:20; 4:1; Gal. 1:16; etc.), but the most significant application of this term relates to the struggle and conflict between flesh and spirit (Rom. 8:1-9; Gal. 5:16-24). The primary significance of Paul's ethical use of the term "flesh" is man's functioning apart from the Holy Spirit. Paul makes this eminently clear by characterizing flesh as implacably hostile to God and spiritual things (Rom. 8:5-8), declaring that those occupied by the Spirit of God are "not in the flesh" but "in the Spirit" (v. 9). To be "in the flesh," then, is obviously not a matter of having bodily existence but of being in an inner state of separation from God, unresponsive to the activity of the Spirit and spiritually dead (Eph. 2:1). Such a state follows its own inner impulse leading to final corruption, even as walking in the Spirit (Paul uses the figure of "sowing") leads to the fulness of life (Gal. 6:8). This independence from God and from the influence of the Spirit is in constant conflict with the new principle (or "law of the Spirit of life in Christ Jesus"; Rom. 8:2). It accounts for spiritual conflict even in those who now enjoy the "first fruits" or "guarantee," through the Holy Spirit's indwelling, of the total redemption of the age to come (Rom. 7:13-25; Gal. 5:16-24). On the basis of the Spirit's indwelling, Paul exhorts and commands that Christians "live by the Spirit" (Gal. 5:25), i.e., as true "pneumatic Christians" (Gk. *pneumatikoí*), and not as "babes in Christ" or "men of the flesh" (Gk. *sárkinoi*; 1 Cor. 3:1-4). In experience it is through the Spirit that the flesh (="deeds of the body") is "put to death" (Rom. 8:13). Indeed, Christians are to be "aglow with the Spirit" (Rom. 12:11). This conflict between the flesh and the Spirit precludes any simplistic perfectionism or any passive acceptance of "the flesh" and leads into an ever increasing renewal in the image of God (Eph. 4:22f.; Col. 3:9f.) and in the image of the eschatological man of the Spirit, Jesus, now experienced as "spirit" (Rom. 8:29; 1 Cor. 15:45-49).

7. The Spirit and God. Paul's terminology for the Spirit indicates a continuity with the OT prophetic tradition in perceiving the Holy Spirit primarily as the dynamic presence and power of God. His teaching also reflects the post-Pentecostal experience of the Church, which understands the Spirit as emanating from Jesus Christ and as conditioned by the person and character of the historical Jesus. Thus both the deity and the personhood of the Spirit are implied.

Paul most frequently speaks of the "Holy Spirit" or "Spirit of God" rather than simply using the term "Spirit." In this he is true to his OT background. He conceives the Spirit as intimately connected with God, so much so that there is a special community of knowledge and will between God and the Spirit (Rom. 8:27; 1 Cor. 2:10f.). Yet even his mode of expression indicates the distinction between God as such and the Spirit. This is especially clear in the many references to God giving or sending His Spirit.

References to the relation between the Spirit and Jesus are rare but very significant, as demonstrated above ("Spirit of Christ," Rom. 8:9; "Spirit of his Son," Gal. 4:6; "Spirit of Jesus Christ," Phil. 1:19). Paul's teaching links the OT Spirit, which was conceived primarily in terms of God's presence and power, with Jesus, so that in turn Jesus' presence and power are mediated to the Christian through the Spirit. This close identification of Jesus and the Spirit provides further insight into the personhood of the Spirit. Paul speaks of grieving (Eph. 4:30) or quenching (1 Thess. 5:19) the Spirit, which also imply the personhood of the Spirit.

The Pauline association of the Spirit with "God" and with "the Lord Jesus Christ" in the apostolic benediction (2 Cor. 13:14), much as in the baptismal liturgical form in Mt. 28:19, attests the full coordination of the Spirit with God and the exalted Lord. This same harmony is found in 1 Cor. 12:4-6, which speaks of "same Spirit," "same Lord," "same God" in a direct parallel, and again in Tit. 3:4-6, which speaks of "God our Savior" pouring out the "Holy Spirit" through "Jesus Christ our Savior."

D. The Holy Spirit in the Johannine Writings. The Johannine interpretation of the Spirit in the Fourth Gospel, perhaps best understood in relation to growing institutionalism in the Church and an accompanying tendency toward a type of sacramentalism, emphasizes neither the external manifestations of the Spirit (as in Luke-Acts) nor the inner experience of the individual Christian sharing in the charismatic community of the Spirit (as in Paul). Rather, it emphasizes the immediacy of the relation of the individual disciple to Jesus through the Spirit. For John the Spirit is essentially *alter Christus*, "another counselor [Paraclete]" (Jn. 14:16) who comes from the glorified Jesus and takes His place.

John's Gospel is a marvelous example of the deep, penetrating, spiritual and theological grasp of the meaning of the person and history of Jesus that became possible after the Pentecostal effusion of the Spirit. In a sense, John himself is the example *par excellence* of the fulfillment of Jesus' own words regarding the Spirit's ministry, that "the Holy Spirit . . . will teach you all things, and bring to your remembrance all that I have said to you" (14:26)

and "the Spirit of truth . . . will guide you into all truth; for he will not speak on his own authority, but whatever he hears he will speak" (16:13). John's presentation of Jesus has a unique style, a self-contained form and purpose, a careful reanalysis of the history of Jesus, and a clear relevance to his contemporary relation to the Church and the missionary task. Thus John clearly expresses the balance between the present and dynamic activity of the Spirit in the Church ("teaching" and "guiding") and the historical and normative significance of Jesus by which all genuine activity of the Spirit is determined ("all that I have said," "not on his own authority"). This balance requires that the background, situation, and purpose of John be especially kept in mind in attempts to grasp particular points in his presentation.

John presents the Spirit as especially related to the Jesus of history, perhaps more so even than Paul, but with a special awareness of Jesus' personal presence in the individual Christian's life and experience through the indwelling of the Spirit. This becomes clear at several points in John's presentation. He introduces Jesus as peculiarly endowed with the Spirit. The Spirit not only descended upon Jesus at Jordan (as the Synoptists note), but also remains upon Him (1:32). Thus Jesus is characterized as the one "who baptizes with the Holy Spirit" (Gk. *ho baptízōn en pneúmati hagíṓ*; v. 33). In his Gospel John never presents Jesus as fulfilling this role, but he does speak repeatedly of Jesus as the source of the Spirit for the individual Christian.

In 3:34 Jesus is again represented as uniquely endowed with the Spirit from the Father ("not by measure") for His ministry of proclamation of God's "words." The usual studied ambiguity of John's style allows Jesus also to be the one who gives the Spirit without measure. In Jesus' dialogue with the Samaritan woman, in symbolic reference to the Spirit through the image of "living water," He says He is the source of that water to all who ask Him (4:10) and that it becomes a wellspring of eternal life to the one receiving it (v. 14). The same thought is implied when Jesus, in the synagogue at Capernaum, presents His midrash on the text "He gave them bread from heaven to eat" (6:31). He says that "he who believes in me shall never thirst" (6:35).

John interprets Jesus' offer of "rivers of living water" to all who will believe in Him (7:38) as a reference to the giving of the Spirit by the glorified Jesus. From the perspective of the movement of salvation-history it is very important that the Spirit was not available (literally "the Spirit was not yet") to believers in the special way that Jesus alone can provide until He was "glorified" (i.e., until His death, resurrection, and ascension). This corresponds to the Lukan representation of Jesus as Lord of the Spirit only after His ascension (Acts 2:33). The same point is made in the Paraclete sayings: "It is to your advantage that I go away, for if I do not go away [i.e., ascend], the counselor [Paraclete] will not come to you; but if I go, I will send him to you" (16:7).

John ends his Gospel treatment of the relation of Jesus and the Spirit with a description of the risen Jesus acting as author of the life of the new age in clear parallelism to the account of man's original creation in Gen. 2:7 (Jn. 20:22). The LXX of Gen. 2:7 uses the same word as in Jn. 20:22 (Gk. *enephýsēsin*); significantly, the same root is used in Ezk. 37:9 (*emphýsēson*) with reference to the life-giving power of God's *rû(a)ḥ*. John clearly intends that Jesus be seen as the source both of the original creation as the divine Logos (1:1-3, 10) and of the new creation with its new life through the Spirit (cf. Jn. 3:5-8). John's emphasis on being born "from above" (Gk. *ánōthen*) in contrast to being born "of the flesh" or "of the earth" (3:31) is analogous to Paul's contrast of the "first Adam" or "man of dust" with the "last Adam" or "man of heaven" (1 Cor. 15:45).

The precise relation of this action of Jesus to the Pentecostal effusion recorded by Luke in Acts has been argued since the time of Theodore of Mopsuestia (A.D. 350-423). In terms of John's intention and the self-contained unity of the whole Gospel some have seen this as John's theological rendition of the historical Pentecost event, especially in view of references to Jesus' ascending (Jn. 20:17) and the immediate context for mission that precedes this action (v. 21) and follows it (v. 23). Internal evidence in John's work, however, indicates that he does not simply transpose theology into history, and the references to the earlier giving of the Spirit do not seem well fulfilled by the simple, symbolic action of breathing. Therefore it seems best to interpret this action as the initial impartation of the life of the new age, of resurrection life, the eternal life that is John's chief concern in writing his Gospel (v. 31). If this is correct, then Jesus' action, which takes place after the Resurrection but before the Ascension, bears the same relation to His effusion of the Spirit at Pentecost as quickening does to endowing (cf. the comms. on John by F. Godet [2 vols., repr. 1978] and B. F. Westcott [repr. 1954]).

A deep theological principle is involved in this distinction between the new life of the age to come, which derives from the Resurrection, and the new power of that age, which derives from Jesus' exaltation to the right hand of the Father. It thereby becomes clear that *in principle* the reality of the Christian experience of the Holy Spirit is separable into two aspects, new life and new power. It must be noted, however, that what the disciples experienced as two distinct events separated in time was the result of their unique position in relation to the transition of the stages of salvation-history. In the early Church, as has already been pointed out, there was no such separation in time (though the new life and new power were yet separable in principle; cf. Acts 8:14-17). The normative experience in the early Church was the experience both of new life as conversion and of new power as charismatic manifestation in one dramatic episode of initiation into the community of the Spirit.

In the unique Johannine material on the Holy Spirit as the Paraclete the close personal identification of the Spirit with Jesus becomes especially evident. Only in the Fourth Gospel is the Holy Spirit designated as the Paraclete (RSV "Counselor"; Gk. *paráklētos*). The word itself, which means literally "one called alongside," has multiple meanings, depending on interpretation of the Greek etymology. Literally, the noun indicates "defense attorney." If the verb *parakaleín* is taken as the background, then the word means "an intercessor" (RSV "advocate"; 1 Jn. 2:1) or "a comforter" or "consoler." If the noun *paráklēsis* is taken, the idea of "exhorter" or "encourager" prevails. All of these have some validity in expressing the complex ministry of the Holy Spirit. To allow the full range of possibilities of meaning it may be best simply to transliterate and speak only of the "Paraclete," allowing John's own rich usage to fill in the meaning of the term.

The Paraclete is above all an *alter Christus*, both a substitute for ("another Paraclete," Gk. *állon paráklēton*; 14:16) and a continuation (14:18) of the presence and ministry of Jesus. This substitution/continuation is only possible after the Ascension (16:7) in keeping with the Synoptic understanding. A comparison of Jesus' ministry with the future ministry of the Paraclete reveals a striking similarity, already implied by the reference to the Paraclete as

"another Paraclete" (14:16). This means that Jesus is a Paraclete too. Both come from the Father (13:3; 14:26); both are sent (5:36f.; 15:26); both are related to the truth (Jesus is the Truth, 14:6 and the Paraclete is the "Spirit of truth," 15:26); both somehow remain in the disciple (compare 14:17 with vv. 20, 23); both are rejected by the world (14:17; 15:18); both testify against the world (7:7; 16:8). Moreover, there is a parallelism between the relation of Jesus to the Father and that of the Paraclete and Jesus, so that what Jesus is to the Father the Paraclete is to Jesus (cf. 5:19, 30; 14:13; 15:26; 16:13f.). This emphasis on the continuing relation of the believer with the glorified Lord clearly solves the problems related to a growing institutionalism and sacramentalism in the Church as well as those arising from the unexpected delay in the return of Jesus. In a significant sense later generations of believers are no more distant from Jesus' personal presence than the first (17:20) because Jesus is present through the Paraclete, having already returned functionally in the Spirit's coming.

The ministry of the Spirit/Paraclete in the life of the individual Christian is very rich. He is the source of his life (3:5-8). He is the "dimension" in which genuine worship takes place — a worship "in spirit," i.e., in charismatic, Spirit-inspired worship (4:24). He makes His home within the believer (14:17), teaching all the necessary things and guiding into all the truth — but only in relation to Jesus Himself as source, subject, and norm (14:26; 16:13-15). His presence with and in the believer is the prerequisite for the mission of the disciples (20:21-23), and through them the Paraclete will be a witness to Jesus (15:26f.) and will serve as a prosecuting attorney against the world for its sin and unbelief (16:7-11). The believer's ministry in charismatic power is also clearly related to the activity of the Spirit when Jesus promises that the one who believes in Him "will also do the works that I do; and greater works than these will he do, because I go to the Father" (14:12; cf. 16:7: "It is to your advantage that I go away").

In the first Epistle the Spirit's rich ministry is specifically related to the contemporary situation. The Spirit is the anointing given to each Christian and teaches truth (1 Jn. 2:20, 26f.). He is the "spirit of truth" in opposition to the "spirit of error" (4:6) and provides the relevant discernment of any "spirit" or spiritual experience (4:1-3). Indeed, He is the witness along with the history of Jesus, "water and blood," to Jesus' incarnation and deity (4:2; 5:7-9, 20). The giving of the Spirit to the believer is the evidence that assures the believer that God abides in him and he in God (3:24; 4:13). The individualism of all this should be noted, for very little explicitly points to the Pauline emphasis on the Church as the body of Christ charismatically ordered and endued. Also significant, in the Paraclete teachings the full personhood of the Spirit is clearly and strongly presented both in the grammar (masculine pronoun with neuter noun; Jn. 14:26; 15:26; 16:13) and in the close identification of the Spirit and Jesus as a kind of tandem.

The materials in the Apocalypse do not add a great deal. There is an interesting triadic coordination of the Spirit (as the sevenfold spirit of fulness) with God and Jesus Christ (Rev. 1:4). The Spirit is clearly presented here as the OT Spirit of prophecy (22:6), who speaks prophetically to the seven churches (2:7, 11, 17; etc.) and who is the ecstatic source of the visions recorded in the book (1:10; 4:2; 17:3; 21:10). The Spirit, in conjunction with the Church as the bride of Christ, invites all to enter into the life of the glorious age to come (22:17).

E. The Holy Spirit in Other NT Writings. The remaining NT documents add little to the understanding of the Holy Spirit beyond the three basic strands of NT teaching already surveyed. The Epistles of James, 2 and 3 John, and Philemon do not mention the Spirit at all. In Hebrews the Spirit is related mostly to the Scripture (He. 3:7; 9:8; 10:15). In 2:4 reference is made to charismatic manifestations of the Spirit in establishing the apostolic mission. In 6:4f. it is noted that Christian initiation, described in the comprehensive sense of enlightenment (Gk. *phōtisthéntas*), involves above all contact with and participation in the Holy Spirit and experience of the word (*rhēma*) of God and the manifestations of the Spirit perceived as the "powers of the age to come." In view of 4:12, which speaks of the word of God (*lógos toú theoú*) in terms of the Spirit's almost personal presence (cf. the Pauline equation of the "word of God" [*rhēma theoú*] with the "sword of the Spirit" [Eph. 6:17]), it appears that even the phrase "word of God" in He. 6:5 might be construed as a manifestation of the Spirit (perhaps of prophecy); thus all of the elements in Christian initiation are related to the Spirit or His activity. The death of Christ is portrayed as a high-priestly sacrifice offered through the "eternal Spirit" effecting purification of the conscience and thereby allowing true service to God (9:14). The Spirit is called the "Spirit of grace" in 10:29, a phrase which admirably describes both the Spirit and His overall ministry.

In 1 Pet. 1:10f. the Spirit in OT prophecy is specifically identified with the "Spirit of Christ," and 2 Pet. 1:21 strongly affirms that all true OT prophecy was initiated by the Holy Spirit rather than by the prophet. Christians are said to be "sanctified by the Spirit" (1 Pet. 1:2), and the good news is proclaimed "through the Holy Spirit sent from heaven" (1:12), a clear reference to the events of Pentecost. The Spirit is described as the "spirit of glory and of God" in 1 Pet. 4:14, an apt phrase for the eschatological Spirit. Indeed, the phrase sums up the diverse biblical portrayal of the essence of the Holy Spirit's total ministry as it moves from creation to new creation, from "this age" to the "age to come," the age of the Spirit, the age of doxophany. Jude speaks only of those "devoid of the Spirit" in contrast to those "who pray in the Holy Spirit" (Jude 19f.).

III. Summary: The Development and Significance of the Biblical Doctrine of the Holy Spirit.—The biblical doctrine of the Holy Spirit is the doctrine of God immanent and active in the experience of His people, a doctrine that begins and ends with experience. The primitive imagery underlying the biblical notion of spirit (Heb. *rû(a)ḥ*) is that of violent power encountered in human experiences within the dimensions of depth, mystery, and power. These experiences can be clearly perceived from the basic root meanings and uses of *rû(a)ḥ* — "hard breathing," "wind," and "dominating impulse or disposition of an individual."

This phenomenology of religious experience, first encountered in OT religion, is overwhelmingly construed by the biblical writers not in terms of philosophy or science, but in terms of the God who acts, the covenant God of Abraham, Isaac, and Jacob in the OT. Thus, in the OT, the points at which references to the Spirit emerge in the material are all theocratically oriented. The preponderance of the references to the Spirit in the OT pertain to the prophets' calling or state, to charismatic powers given to the leadership of Israel, or to the presence of God experienced as tremendous power and energy (*mysterium tremendum*).

A developmental process, however, may be perceived in the other OT references to the Spirit. The most significant development was in the eschatological framework of OT religion. The great prophets of Israel increasingly

refer to the Spirit in terms of a coming glorious kingdom initiated by the Spirit (Isa. 32:15), ruled by a Davidic king especially endued by the Spirit (Isa. 11:1-10; 42:1; 61:1), and characterized by a general effusion of the Spirit upon the people through both inner renewal (Ezk. 36:26f.) and charismatic endowment (Joel 2:28 [MT 3:1]).

In the intertestamental period the only significant development of the doctrine of the Spirit was its increased intellectualization as seen in the wisdom writers and in Philo's Platonic interpretations of OT materials. The trauma of the Exile and return, the cessation of recognized prophetic activity, the state of constant servility to gentile powers, plus increased contact with Greek religious and philosophical speculations did produce a more explicitly apocalyptic understanding of the coming glorious kingdom. In particular the concept of history as divided into "this age" and "the age to come" is significant because of its adoption by Jesus and the early Church in explicating the OT eschatological materials.

Therefore, the OT demonstrates a development from the primary religious phenomenology of the Spirit through a theocratic understanding of that Spirit active in Israel's religious and political life to a state of expectation of a final glorious age and kingdom in which the presence, power, and activity of the Spirit are characteristic.

In the NT both fulfillment and expectation are represented. After centuries of prophetic silence in Israel, in quick succession came John the Baptizer with an arousing message ("Repent, for the kingdom of heaven is at hand"; Mt. 3:2), and Jesus of Nazareth proclaiming "the time is fulfilled, and the kingdom of God is at hand; repent, and believe in the gospel" (Mk. 1:15). Both came with a sense of urgency and immediacy. The apocalyptic inbreaking of the age to come was imminent. John saw his own message and baptism as preparatory to the "one who was coming," characterized as uniquely the man of the Spirit, who baptizes in the Spirit (Mk. 1:7f.; Lk. 3:16f.; Mt. 3:11f.; Jn. 1:26f., 33). Jesus perceived Himself as one anointed with this Spirit (Lk. 4:18f.; Isa. 61:1f.), already exercising by this same Spirit the powers of the age to come (Mt. 12:28; Lk. 11:20). Therefore, in a sense the age to come was already present in the ministry of Jesus. It was confined to Him alone until the events of the Passion, Resurrection, and Ascension were completed, when He became the Lord of the Spirit who received the "promise of the Father" (Acts 1:4) and who then baptized His waiting disciples in the Spirit on the day of Pentecost. Thus His ministry as the anointed man of the Spirit (the Messiah) was vindicated and the age of the Spirit was inaugurated more fully through the creation of the community of the Spirit (the Church) in fulfillment of Joel's prophecy (Acts 2:16, 33-36).

The early Church viewed itself as a "colony" of the age to come, experiencing the mighty workings of the Spirit both in terms of charismatic powers in the OT tradition of the Holy Spirit's theocratic activity and in terms of inner renewal, in fulfillment of the new covenant expectations of Jeremiah and Ezekiel. This can be seen in Paul's use of the comprehensive phrases "in Christ" (Rom. 8:1; 2 Cor. 5:17) and the equivalent "in the Spirit" (Rom. 8:9; cf. Gal. 5:25), as well as the specific notions of "the fruit of the Spirit" (Gal. 5:22f.) and "the gifts of the Spirit" (1 Cor. 12:4-11). The writer to the Hebrews encapsulated this, describing Christians as those who have "tasted the goodness of the word of God and the powers of the age to come" (He. 6:5).

The experience of the early Church was radically determined by its experience of the Spirit of the age to come, encountered only as the Spirit of Messiah, of Jesus. It cannot be understood apart from this experience. This is clearly seen in all strands of NT writings, including Luke-Acts, which stresses the external and charismatic experiences of the Spirit, Paul, who weaves together into a complex pattern both external manifestations and inner renewal, and the Johannine tradition, which highlights Jesus as the source of the Spirit (Jn. 7:37-39) and the full, present experience of the life of the age to come through the Spirit (Jn. 3:5).

Despite the emphases on the present realization of the future age of the Spirit, the community of the Spirit still anticipated the consummation of the OT promises of that age in terms of the parousia of Jesus. The Spirit was experienced now in reality, but only as a "pledge" (Gk. *arrabōn*; RSV "guarantee"; Eph. 1:14) or as the "first fruits" (*aparchē*; Rom. 8:23) of the final manifestation of the glory of that age.

Only when understood in terms of the fundamental biblical framework of eschatology does the full meaning of the biblical teaching of the Holy Spirit attain final perspective and significance. In the biblical materials the "final cause" — the ultimate category of interpretation, the point of reference that provides the most universal scope — for the unfolding drama of creation and history is doxophany, the full manifestation of the glory of God. The doxology of Paul expresses it succinctly: "For from him and through him and to him are all things. To him be glory for ever. Amen" (Rom. 11:36). The song of the twenty-four elders before the throne of God is eloquent: "Worthy art thou, our Lord and God, to receive glory and honor and power, for thou didst create all things, and by thy will they existed and were created" (Rev. 4:11). All of this fulfils God's OT promises concerning the future age as that of His coming glory (Nu. 14:21; Isa. 11:9; 60:19; Hab. 2:14). In the NT this is adapted in terms of the light of glory from "God and . . . the Lamb" (Rev. 21:23; 22:5).

From this ultimate eschatological perspective the Holy Spirit is the "Spirit of Glory" (1 Pet. 4:14) — the eschatological glory of doxophany! To miss this point is to reduce the Spirit and the experience of the Spirit (whether charismatic or inner renewal) to a man-centered level. The role of the Spirit must not be seen simply in terms of creation or the redemptive process, but in terms of the glory of God. All the activity of the Spirit leads to doxophany in the created order and full doxology from all creation: "And I heard every creature in heaven and on earth and under the earth and in the sea, and all therein, saying, 'To him who sits upon the throne and to the Lamb be blessing and honor and glory and might for ever and ever!'" (Rev. 5:13).

History of the Doctrine

I. Credal and Baptismal Witness.—As in the case of the Father and the Son, the baptismal formula and the creeds

constitute basic evidence for the thinking of the Church on the being and role of the Holy Spirit. The church order known as the *Didache* confirms the practice of baptism in the name of the Father, Son, and Holy Spirit, probably in connection with the threefold immersion or pouring that is also prescribed. Second-century creeds express faith in the Father, the Son, and the Holy Spirit the Paraclete, with whom is associated the Church and also forgiveness or resurrection. In the Hippolytan rite of baptism (*ca.* 200) the credal interrogatory puts as the third question, "Dost thou believe in the Holy Spirit, in the holy church, and in the resurrection of the flesh?" and when the answer, "I believe," is given, the candidate is dipped the third and final time. The anointing which follows is also given in the name of the Father Almighty, and Jesus Christ, and the Holy Spirit.

II. The Spirit and Baptism.–One often hears the complaint that the Church has neglected the doctrine of the Holy Spirit. A glance at early baptismal thinking and practice will quickly show how untrue this is. From the very outset the Spirit plays an important role in relation to the baptismal remission and regeneration. In Hermas the white robe symbolizes the Spirit (Sim. 8:2:2f.). In Barnabas the Holy Spirit comes to indwell the believer and effects a new creation. Justin views Christian baptism as a baptism with the Spirit imparting enlightenment, forgiveness, and regeneration (*Apol.* 61). Irenaeus finds in the Spirit who is given at baptism a pledge of eternal life. Clement of Alexandria links regeneration with the Spirit, who is also the stamp or impress made on the believer at baptism. Origen speaks of baptism in Christ, in water, and in the Holy Spirit (*De prin.* ii.10.7).

Most of the early writers plainly associate baptism itself with the Spirit, who does the true baptismal work. In the West, however, a tendency develops to relate baptism to forgiveness and then to link the Spirit more narrowly with the included but ensuing anointing and laying on of hands. Tertullian holds this view in his work *De baptismo*. He describes the new birth as a work of the Spirit and then says that the Spirit is not received in the water. Rather, one invokes the Spirit by the laying on of hands (8). Developing this understanding, some third-century authors could even argue that the gift of the Spirit does not come with baptism at all, baptism with the Spirit being differentiated from water baptism and related exclusively to anointing and the laying on of hands. Cyprian in Carthage resisted this conclusion. He argued that those baptized in an emergency, without the laying on of hands, still receive the Spirit. He was not insensitive, however, to the fact that in Acts 8 the imparting of the Spirit comes, not with Philip's baptism, but with the apostles' laying on of hands.

The 4th and 5th cents. display no little confusion in this area. On the one side the relating of baptism to the work and gift of the Spirit finds strong support, as in Athanasius, Hilary, Cyril of Jerusalem (*Catechetical Lectures*), and Augustine. On the other side the descent of the Spirit is strongly associated with anointing, sometimes even in the same writers, e.g., Hilary and Cyril (cf. especially his *Mystagogical Lectures*, although their authenticity is in serious question). In explanation of this view appeal is made to the texts in Acts and also to the descent of the Spirit on Jesus after His baptism.

How could the apparent contradiction be reconciled? In a sense it did not have to be, for baptism, anointing, and the laying on of hands all formed parts of the same rite. Since, however, external separation might take place, and with the rapid increase of infant baptisms did so in the West, some solution had to be offered. Two related lines of thinking may be noted in this regard. The first is that with the anointing or laying on of hands the Spirit confers a strengthening, fortifying, or perfecting of those who have remission and regeneration in baptism. Hence the laying on of hands came to be known as confirmation. The second is that this strengthening is with the sevenfold gift of the Holy Spirit. Hence the Spirit could be associated with baptism in respect of the new birth and still connected with the anointing or the laying on of hands in respect of His fortifying gift or gifts.

III. The Spirit and Scripture.–If the Holy Spirit figured prominently in the baptismal thinking and practice of the first centuries, he claimed no less attention in the important sphere of the inspiration of Scripture. Here again the testimony goes back to the first period and is uniform throughout. Such diverse writers as Origen, Basil, and Jerome can all describe the Bible as written by the Holy Spirit. Inspiration is seen as applying equally to every book and to Scripture as a whole. All its writers were moved by the same Spirit and everything they wrote, including such details as lists of names, must be regarded as inspired, reliable, and profitable. As Jerome says, every word, syllable, accent, and point is "packed with meaning" (*On Eph.* 2).

In the earliest period, when the NT canon was still in process of formation, the importance of the inspiration of the OT was appreciated, as one sees from Justin Martyr. Both in small points and in its totality the OT is a prophecy of Jesus Christ. Only in the light of its fulfillment in the gospel can one understand its true meaning. The unity of the OT and NT, rejected by Marcion, is obviously based on their inspiration by the same Spirit. As He who inspired the OT the Spirit is often called "the prophetic Spirit." When Christ comes, the Spirit, who is the Spirit of Christ, imparts His gift to the Church instead of Israel. In this instance the gift is supremely that of understanding the prophetic writings (*Dial.* 82.7ff.). Irenaeus speaks similarly. Through the Spirit the prophets prophesied and at the end of the age he was poured out in a new way, renewing man to God. The emphasis on the Spirit's role in the composition of the OT finds an echo in the Nicene affirmation: Who spake by the prophets.

How did the Spirit work in the writing of Scripture? An early writer like the apologist Athenagoras suggested that the prophets spoke and wrote in an ecstatic state and that the Spirit played on them like a flute player (*Legatio* 7, 9). This view, which was parallel to that of Philo, found support in Tertullian (*Adv. Marc.* iv.22) and is still heard in Chrysostom when he compares the apostolic authors to instruments on whom the Spirit played (*Hom. 1 in Jn.*). If it was ever a majority view, however, it came into discredit through Montanus and his associate prophetesses, who issued strange babblings, spoke as though they were the direct mouthpiece of God, and fell into a trance as they spoke. The Montanists, of course, are said to have laid claim to new revelations by the Spirit (Hippolytus *Ref.* vii.12), but the very mode of their prophesying scandalized the churches. Since Montanus himself used the figure of a lyre — "man is as a lyre and I fly over it like a plectrum" (Epiphanius *Haer.* 48) — it is not unnatural that the movement should promote a rethinking of the relation of the Spirit to the inspired prophetic and apostolic authors.

The third-century fathers and their successors still found a special ministry of the Holy Spirit in the composition of Scripture but they now defined inspiration in such a way as normally to give the authors an active and conscious role. Hippolytus, e.g., defined inspiration primarily as a clarifying of the mind, Origen as an apprehending of truth, Augustine as a stimulation and control that would rule out

mistakes. In all this the authors would ordinarily engage in their own thinking, exercise freedom of will, rely on their memories and research, and display their individualities in style and expression. Augustine and Theodore even distinguished types or levels of inspiration, although not, of course, to the point of a differentiation between inspired and uninspired portions of Scripture.

As the Holy Spirit inspired Scripture, so He brought the illumination without which it could not be properly understood. The fathers differed in their procedures of interpretation. The Alexandrians, for example, favored allegorizing, whereas the Antiochenes stood for a more natural exegesis. All agreed, however, that a Christian understanding of the OT, and of its unity with the NT, involves the typological or christological exposition which rests on a total perception of the theme of Scripture that only the Holy Spirit can give. This is why illumination figures so persistently in the baptismal descriptions of the Spirit's work.

IV. The Spirit and the Trinity.–A. The Early Period. If the idea of a doctrinal neglect of the Spirit has merit, it can be only in the trinitarian sphere, where the dominant theme tends to be that of the relation of God and Christ. Even here, however, the Holy Spirit has a place in the discussions from the very first. Thus 1 Clement speaks of one Spirit as well as one God and one Christ (46:6). Ignatius of Antioch uses a fanciful image in which the Father builds up Christians as stones in His temple, Christ's cross is the derrick, and the Holy Spirit is the rope. Hermas tends to confuse the Son and the Spirit (Sim. 9:1), but if anything he is happier with the deity of the preexistent Spirit than with that of Christ, who seems to be adopted because the Spirit dwells in Him. Justin, too, shows some confusion, although in his case the focus is on God and the Logos. To be sure, Justin refers frequently to the holy prophetic Spirit, and he has a third person in view, but he seems to have difficulty in distinguishing between the Spirit and the Logos. Athenagoras could speak of the Spirit as a divine effluence and Theophilus identified Him with Wisdom (as distinct from Word). The prophetic ministry of the Spirit, however, was the main thing to capture the interest of the Apologists. Irenaeus, like Theophilus, equated Spirit and Wisdom as he equated Son and Word. Word and Wisdom were with God before the world was, and both were used by God in creation and self-revelation.

B. The Third Century. Thinking about the Spirit shared in the advances and problems of general trinitarian thinking during the period from the Apologists to Nicea. Concern for the divine unity led modalists to see in the Spirit, as in the Father and the Son, only a temporal mode of the one God for the purpose of His external works. A similar concern lay behind the adoptionist view that the man Jesus was deified when the Spirit, or Christ, came upon Him, the Spirit, of course, having no distinctive being in God. Meeting the two forms of monarchianism, Tertullian and Hippolytus contended for the otherness of the Spirit (and the Son) even within the oneness of the deity. As Tertullian saw it, the Spirit as the vicar of the Son proceeds from the Father through the Son (*Adv. Prax.* 4). The term *persona* commended itself as a suitable one to express the element of individuality within the one essential being. Origen had much the same in mind when he used the Gk. *hypóstasis*. As *hypóstasis* the Spirit derives from the Father through the mediation of the Son. Origen, of course, could used extremely subordinationist terms, as when he said that the power of the Father is greater than that of the Son, and that of the Son greater than that of the Spirit (*De prin.* i.3). Against this, however, should be set his concept of essential consubstantiality (iv.1.1).

C. The Nicene Theology. Arianism so focused attention on the status of the Son that little attention was paid at first to the Spirit. The creed of Nicea (A.D. 325) simply repeated the affirmation: I believe in the Holy Spirit. Nevertheless, Arians saw that if the Son is not truly God, neither is the Spirit. Indeed, Eunomius could regard the Spirit as the supreme creation of the Son. By the middle of the 4th cent., then, the deity of the Spirit emerged as an issue of its own. Cyril of Jerusalem described the Spirit as eternal, subsistent, and present with the Father (*Catecheses* xvii.5). Athanasius insisted that the Spirit comes from the Father, not from nothingness, is consubstantial with the Father and the Son (*Ad Serap.*1), and works with the Father in creation, inspiration, and incarnation (3). Semi-Arians, however, resisted this view, and a group named the Pneumatomachians (later the Macedonians) contended for a likeness, not a oneness, of substance, and gave to the Spirit the position of neither God nor creature. The Cappadocians finally corrected this aberration. Basil in his work *On the Holy Spirit* (375) ranked the Spirit with the Father and the Son, although not specifically calling him God. Gregory of Nyssa argued for a oneness of nature shared by the divine persons (*Oratio catechetica* 3). Gregory of Nazianzus plainly accepted the consubstantiality and deity of the Spirit (*Oratio* 31). As regards the relation of the Spirit to the Father and the Son, Gregory of Nyssa spoke of procession from the Father and reception from the Son, from whom He is not to be separated. This underlies the common formula: "From the Father through the Son." Meanwhile, Hilary, Ambrose, and Augustine completed the doctrine of the trinity in the West. Augustine strongly supported the equality of the divine persons. The whole trinity acts externally, although with specific "appropriations." The true distinction is in the inner relations. The Spirit is the bond of union and is thus the Spirit of the Father and also of the Son. How His procession differs from the Son's generation, Augustine cannot explain, but it is procession from the Father and the Son, although the Father is still the source of deity, since it is He who begets the Son from whom the Spirit also proceeds.

D. The Filioque. Augustine's phrase "from the Father and the Son [*filioque*]" was later to prove a source of friction between the eastern and western churches. These shared the Nicene Creed, which in its 381 version described the Spirit as simply "proceeding from the Father," with whom, as with the Son, He is worshiped and glorified together. In 447, however, a council at Toledo in Spain espoused the phrase "and from the Son [*filioque*]" and a further council at Toledo recited it in the creed in 589. In spite of its popularity in the West, Rome at first refused to accept the addition, but by 867 Constantinople excommunicated Rome for including the new clause. A main reason for the rift would seem to have been the ecclesiastical one of a credal alteration without consultation, but quickly theological arguments for and against the filioque were developed. Since the Reformation churches sided with Rome on the issue, the disagreement between East and West has continued to the present day, although Anglicans have shown some readiness to return to the original statement. The divergence can hardly be regarded as a crucial one, however, and a formula like "proceeding from the Father through the Son" would seem to provide an acceptable basis of theological reconciliation. Ruffled ecclesiastical feelings might be harder to settle, even after a thousand years and more.

V. The Spirit and the Word.–A. Inner Witness of the Spirit. The fathers, as we have seen, can only in ignorance be accused of ignoring the Holy Spirit. The same applies to the Reformers. Indeed, Calvin could be appropriately

described as the theologian, not of election, but of the Holy Spirit, or of the Spirit and the Word. In this regard he is representative of many others. The Reformation doctrine of the inner testimony of the Holy Spirit points clearly in this direction. For the Reformers Scripture as God's Word has ultimate authority in the Church. But how can we be sure that it is God's Word? Because the Church says so? Because it has features (indicia or criteria) which prove it to be so? At most these can be only secondary grounds and can never give the certainty required. Does Scripture, then, bear witness to itself? It does, but not in isolation. To the self-witness of the Word is added the inner testimony of the Spirit who alone can provide us with the necessary assurance as to the divine nature and authority of the written Word.

B. Illumination. Nor does the Holy Spirit merely give assurance that Scripture is God's Word. In so doing, He speaks God's Word through Scripture in such a way that it is understood. The Spirit who inspired the authors also illumines the readers and hearers. Biblical hermeneutics involves many activities ranging from textual or lexical study to prayer. For a proper understanding, however, the expository work of the Spirit is needed too. This work of the Spirit is not mystical, of course, for it relates strictly to the Word, which is also its own interpreter. Yet the Word must be read in the Spirit if its real sense is to be apprehended, its saving truth appropriated, and its authority put into effect.

C. Effectual Calling. In and with the Word, the Spirit issues the divine call which not only gives enlightenment but at the same time brings sinners to repentance and faith. Hence the Christian life cannot even begin without the Spirit's work. Differences arise in relation to the human activity at this point. Yet all the main Reformation groups, Arminians as well as Dortians, recognize that without this prior ministry of the Spirit the possibility of human activity does not exist. In its own way the calling of the Spirit through the Word is no less vital to salvation than the reconciling work of Christ in His death and resurrection.

D. Renewal. As the Holy Spirit bears witness to the Word, brings its meaning to light, and through it issues the call that leads to personal faith, so through the Word the Spirit does the work of regeneration and renewal that includes mortification and sanctification as well as the beginning of the new life in Christ. As Calvin says, we are washed in Christ's blood by the Spirit and through the same indwelling Spirit we are mortified and sanctified. If the Christian life cannot begin, it cannot continue either without the ongoing ministry of the Spirit and the Word.

E. Faith. A special role is played in the Christian life by faith. Yet faith, by which alone we are justified before God, is the principal work of the Spirit, by whom Christ unites us to Himself. The Spirit is, in Calvin's phrase, the "inner teacher" by whom the promise of salvation penetrates the mind. Faith depends on the Word, yet on account of human blindness and obstinacy the Word cannot engender faith without the Spirit's enlightening of the mind and strengthening of the heart. Nor does the Spirit merely initiate faith; he also increases it. To come to faith in Christ, and to grow in Him, we have to be lifted above our own understanding. This can take place only as the Spirit does not let the Word flit about in the brain but pours it into the mind and confirms it in the heart, Himself serving as a seal and guarantee of the divine promises.

F. The Sacraments. In the strengthening of faith the Spirit works not only through the written and spoken Word but also through the visible Word of the sacraments. What the sacraments promise, the Spirit reveals and fulfils. By the Word and sacraments the Spirit ministers in us so that they do not merely strike our ears or eyes but enter into our hearts. Without the Spirit, baptism and the eucharist can do nothing. They can serve, but the Spirit alone has the power to act. It is because this power can be put forth in infants too that baptism may be extended to them. Similarly it is by the Spirit that Christ grants fellowship with His body, and one may thus speak of feeding on Him at the eucharist. Christ Himself is truly present at His table; He is present in the mode of the Holy Spirit.

G. Charisms. In Reformation theology the Holy Spirit gives graces (or charisms) to the Church, but only some of those listed in Romans and 1 Corinthians, namely, government and almsgiving, are thought to be permanent. In apostolic days the Spirit visibly gave additional wonderful gifts through the laying on of hands, but these served the special purpose of magnifying the new preaching and they have now ceased. The Spirit Himself remains. He still endows the Church. Yet He does His present work by less spectacular means. As they saw it, the historical fact of the cessation of the gifts — even when the laying on of hands continued — demonstrates their temporary nature.

H. Sin Against the Spirit. The sin against the Spirit is to be seen in the light of His preeminent role in bringing people to understanding and faith. When unbelievers attack God's truth in ignorance they sin against the Father and the Son, and this may be forgiven them. But when they continue this attack even though they know that what they reject is indeed God's Word, they sin against the Spirit, resisting the illumination which is His work, and for this there neither is nor can be any forgiveness. When knowledge, not ignorance, is joined with unbelief, forgiveness has no place.

I. General Grace. While the Holy Spirit brings salvation only by the Word and sacraments, He also does a work of general grace by which the human race is preserved from destruction and receives many real if not eternal blessings. For believers and unbelievers alike achievements are thus possible in the arts and the sciences. The Spirit is the Spirit of all truth, and knowledge of everything good in life is given us through Him. Special or individual graces may indeed be given to certain people within the common grace; hence their outstanding contributions in the various spheres of human life. Nevertheless, in spite of the common grace or individual graces, even those who most excel can have no knowledge of God apart from the saving grace of the Spirit that frees the ears to hear and the heart to understand. From the time of the Reformation the concept of general or common grace has had a fixed place in the doctrine of the Holy Spirit, especially among Dutch theologians. It is not to be confused, however, with the grace of salvation that is the Spirit's proper work.

VI. The Spirit and Immanence. *–A. Unitarianism.* The various unitarian views of God that arose in the 17th cent. all tended to depersonalize the Spirit. Instead of seeing the Spirit as the third person of the trinity, Himself God, they identified Him directly with God — God is Spirit — or depicted Him as the power of God at work in the world. Indeed pantheism, equating God and the world soul, could even find in the Spirit the self-consciousness of the universe. Along these lines Hegelian Idealism is basically pantheistic. The Spirit for Hegel, whether as finite Spirit or eternal Spirit, has nothing to do with the Holy Spirit of Scripture. Nor indeed does the marching and smilingly triumphant Spirit of Schleiermacher's *Speeches on Religion.*

B. The Spirit and the Church. In his *Christian Faith,* of course, Schleiermacher attempted a more biblical ap-

proach. Here again, however, he swallowed up the Spirit of historical teaching, this time in the collective consciousness of the Church, which gave rise to Scripture in the form of the apostolic writings but whose work continued, and still continues, in all the activities of the Church. In line with his consistent reconstruction of theology as Christian anthropology, Schleiermacher saw in the Spirit simply a term for the common life and spirit of the believing community.

C. The Spirit and Immediacy. The concept of the Spirit became an even more tenuous one in Harnack's *What is Christianity?* Harnack related the Spirit very closely to religious experience. Receiving and acting by the Spirit denote immediacy of religious feeling without external constraints. Obedience to Christ and freedom in the Spirit characterize the primitive Church. Unusual phenomena may mark this at first, but the indispensable workings of the Spirit are holiness and love. From another angle the Church is by its very nature a community of the Spirit.

D. The Cosmic Spirit. Liberal Catholicism, represented by Charles Gore, followed the middle course of merging the general and special workings of the Spirit in a cosmic view. In his essay on "The Holy Spirit and Inspiration" in *Lux Mundi* Gore found in Christian experience the freest work of the Spirit. The Spirit works in all nature, but especially in rational creatures. Through his ministry He consecrates the natural but only gradually by a reuniting of spirit and flesh. Gore, of course, identified the Spirit as the third person of the trinity even if he could also use impersonal terms like "the Divine Energy." He seemed to postulate no ultimate distinction between the cosmic and the redemptive work. Even in illumination he recognized Holy Scripture only as the most conspicuous of the Spirit's works. Nevertheless, the Spirit was not for him a world soul, nor did he expect the fulfillment of the Spirit's ministry except by His special activity in Christ and His people.

VII. The Spirit and a Second Work. *–A. Sanctification.* The relation of the Spirit to sanctification took a new turn with the emphasis on Christian perfection deriving from the teaching of John Wesley. Theologians had consistently linked the Spirit to sanctification both in its first beginning and also in its progress. Wesley accepted this link, but he discerned a new possibility of entire sanctification resulting from the outpouring of the Holy Spirit at Pentecost. He also believed that ordinarily this perfection can be secured in an instantaneous experience which even in his day could be referred to as "the second blessing." Wesley himself did not specifically identify this experience with the Holy Spirit, but he undoubtedly implied this by associating it with Pentecost. Hence many of the holiness movements which have followed Wesley in different ways have seen in instantaneous sanctification a blessing of the Spirit that might be called the filling of the Spirit, the baptism of the Spirit, or the second work of the Spirit.

B. Confirmation. Paralleling in some sense the holiness movements, certain Anglo-Catholic writers, especially Mason, Dix, and Thornton, revived the patristic concept of a post-baptismal giving of the Holy Spirit. In this development confirmation took on a new importance as the "sacrament" of the Spirit's outpouring. What this second work entailed, they did not state with any precision. The older idea of strengthening or perfecting was still a common one. Equipment for Christian service offered an alternative. This could quickly merge into charismatic endowment in pentecostal Anglicanism and Roman Catholicism. Thornton found a typological basis for the second work of the Spirit in the sequence of Israel's deliverance. It was saved from Egypt at the crossing of the Red Sea (baptism) but had then to cross the Jordan to enter the Promised Land (confirmation).

C. Charismatic Endowment. Modern pentecostal movements share with the holiness and confirmation schools the general concept of a work of the Holy Spirit subsequent to regeneration. Their distinctive contribution is to relate this work to the imparting of spiritual gifts, more especially the gift of tongues, and to find in it, as an ongoing pentecostal experience, the true baptism of the Holy Spirit. Naturally the sanctifying ministry of the Spirit is not neglected, but the emphasis tends to fall on the charismatic distribution. The pentecostal groups reject the idea that the extraordinary gifts were imparted only for the apostolic period and that the modern Church can have nothing comparable to the experience of the Spirit that once came with the laying on of hands. They believe that across the centuries, though not always with appropriate strength or recognition, all the charisms have in fact been present in the Church, as Roman Catholics are, of course, more swift to acknowledge than many Protestants who too easily presume their absence. Their teaching undoubtedly needs to be set in the total context of the person and ministry of the Holy Spirit. When this is done, and the obvious overemphases are corrected, it can perhaps recapture for the Church a special feature of the Spirit's work, namely, the equipping of all Christians in different ways, for the fulfillment of their priesthood in the common ministry of evangelism and edification.

HOMAGE [Aram. *s^{e}gid*] (Dnl. 2:46); AV, NEB, WORSHIPPED; [Gk. *proskynéō*] (Mk. 15:19); AV WORSHIPPED; NEB MOCK HOMAGE. The Aramaic (and its Hebrew cognate *sāgaḏ*) mean "do homage by prostration." These terms, by referring to the physical act of prostration, describe not only worship of God, or gods, but also the obeisance shown to human dignitaries. *See* picture in JEHU. Thus while the RSV has "worship" for *s^{e}giḏ* ten times in Dnl. 3, it appropriately has "homage" in Dnl. 2:46. It is not necessary to suggest that Nebuchadrezzar acted improperly in "worshiping" Daniel or that Daniel erred in accepting that "worship."

In Mk. 15:19, the pagan soldiers bow in "mock homage" (NEB) to the convicted Jesus. While *proskynéō* usually means "worship" in the NT (*see* WORSHIP), it is doubtful that this is meant here, unless the soldiers were parodying Caesar worship or some oriental idea of king worship.

H. VAN BROEKHOVEN, JR.

HOMAM hō'mam [Heb. *ḥômām*–'destruction']. A Horite descendant of Esau (1 Ch. 1:39). The name appears in Gen. 36:22 as Heman.

HOME substantives: [Heb. *bayiṯ*]; AV also HOUSE, FAMILIES (Ps. 68:6 [MT 7]); NEB also HOUSE, "in the family" (Lev. 18:9), STALL (1 S. 6:7, 10), PALACE (2 S. 13:7), HOMEWARD (Job 38:20), TENTS (Ps. 68:12 [MT 13]), etc.; [*'ōhel*]; AV, NEB, also TENT; [*māqôm*]; AV

also PLACE; NEB also COUNTRY (2 S. 15:19); [*mānô(a)ḥ*] (Ruth 3:1); AV REST; NEB "happily settled"; [*reḇeṣ*] (Prov. 24:15); AV "resting place"; NEB FARM; [*mizzᵉḇul*] (Ps. 49:14 [MT 15]); AV DWELLING; NEB HONOR; [Gk. *oíkos*]; AV also HOUSE; NEB also HOUSE, INDOORS (Mt. 17:25), "private houses" (Acts 5:42); [*oikía*] (Mt. 8:6); [*ídios*]; AV also "own," "all" (Lk. 18:28); NEB also "own realm" (Jn. 1:11a), BELONGINGS (Lk. 18:28); [*moné*] (Jn. 14:23); AV ABODE; NEB DWELLING; verbs: [Heb. *šûḇ*]; AV also RETURN, BRING Zec. 10:10); NEB also "is brought" (2 S. 17:3), "went back," etc.; [*bô'*]; AV also "come," "come again" (Ps. 126:6), BRING; NEB also RESTORE, "come back" (Ps. 126:6); [*šālaḥ*] (1 S. 13:2); AV, NEB, SENT; [*sûr*] (1 Ch. 13:13); AV "brought home"; NEB "take with him"; [*sāḇaḇ*] (1 Ch. 16:43); AV, NEB, RETURN; [*lûn*] (Job 39:28); AV ABIDE; NEB LODGE; [*'āsap*] (Dt. 22:2); AV BRING; NEB TAKE; [Gk. *endēméō*] (2 Cor. 5:6, 8f.); AV also "be present"; NEB also "go to live," "here"; [*analýō*] (Lk. 12:36); AV, NEB, RETURN; [*hypostréphō*] (Lk. 23:48); AV RETURN; NEB "went home"; [*apérchomai*] (Lk. 24:12); AV DEPART.

I. In the OT
  A. Substantives
    1. *Bayiṯ*
    2. *'Ōhel*
    3. *Māqôm*
    4. *Mānô(a)ḥ* and *Mᵉnûḥâ*
    5. *Reḇeṣ* and *Mizzᵉḇul*
  B. Verbal Expressions

II. In the NT
  A. Substantives
    1. *Oíkos*
    2. *Oikía*
    3. *Ídia*
    4. *Moné*
  B. Verbal Expressions

I. In the OT.–A. Substantives. 1. Bayiṯ. Although the Hebrew noun *bayiṯ*, "house, domicile, home," is one of the most common words in the OT, and the proto-Semitic **bayt* is widely diffused among the cognate Semitic languages (Akk. *bītu;* Ugar. and Phoen. *bt;* Aram. *byt;* Eth. *bēt;* Arab. *bayt*), there is no obvious verb from which the noun may be derived. An etymology has been sought by some scholars in the Aramaic root *bwt*, "go in, spend the night," but this is dubious. Even if such a connection were granted it is more likely that the verb is a denominative from the noun (see BDB, p. 108).

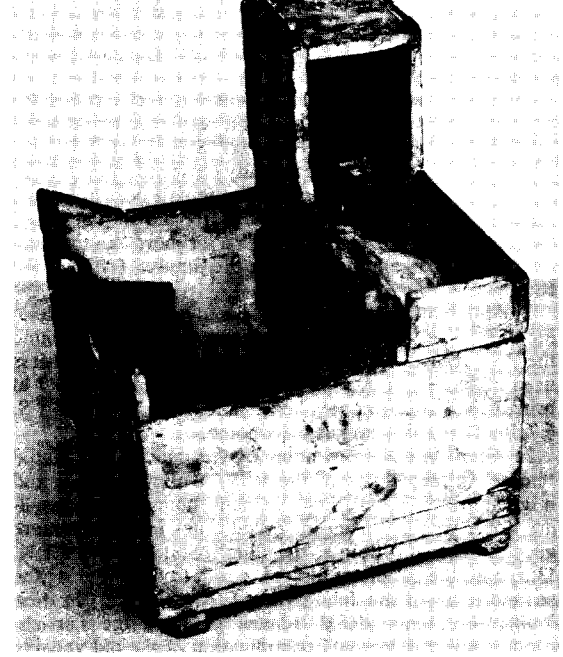
While "house" is by far the most common RSV translation for *bayiṯ* (*see* HOUSE), "home" is used more than fifty times. *Bayiṯ* in the OT reveals an extremely wide and varied range of meaning, and its manifold connotations cannot be captured merely by "house" or "home." It may refer to a "shelter" or "stable" for animals (1 S. 6:7, 10; cf. NEB "stall"). It sometimes refers to a tent (usually *'ōhel*), i.e., a temporary or nomadic dwelling (Gen. 27:15; 33:17; *see* TENT, and *TDOT*, I, *s.v.* "'ōhel" [Koch]). But essentially and most frequently it has reference to an edifice, something that has been built (Heb. *bānâ;* cf. Gen. 33:17; Dt. 20:5; 22:8; 28:30). If proto-Semitic **bayt* had any earlier meaning among the Semites in the prehistoric period of cave habitation, the OT has no trace of such a meaning. Indeed, the OT regularly uses *mᵉ'ārâ* (Gen. 19:30) for "cave" (*see* CAVE, and *TDOT*, II, *s.v.* "bayith" [Hoffner], 108).

Bayiṯ, then, represents many kinds of buildings that are made of various materials — stone, lumber, and plaster (Lev. 14:45; 1 K. 5:8, 15, 18 [MT 22, 29, 32]; 7:11f.; Hab. 2:11), or hewn stone (1 K. 5:17; 6:7; 7:9f.; Ps. 118:22; Am. 5:11). Most frequently *bayiṯ* denotes a building used as a dwelling or home by a family (Dt. 6:7; 19:1; etc.). In the biblical period such homes were erected within the protective walls of fortified cities, usually according to no discernible plan and in a heavily impacted, small area. City planning was apparently not practiced in any systematic way until Hellenistic times.

Such family living quarters were generally of two stories, with a door opening onto a street. They were usually attached to adjacent homes and/or the city wall itself (cf. Josh. 2:15-21; 2 Cor. 11:33). Interior room was provided for cooking on a centrally located hearth, for sleeping, and for quartering the domestic animals. Smoke escaped either through windows or open courtyards. The lower walls were usually of undressed stone and, as a result, often thick. Where stone was in short supply, sun-dried mud brick was employed for walls, but in these cases it was still important that at least the foundation be sturdily constructed of stone (especially because of the cumulative erosive effect of rain runoff and flooding at the ground level, and as a safeguard against earthquake).

Archeological excavations have revealed that these stone walls were not usually mortared, but were plastered on the interior surface. The floors of such homes were of clay (the use of flagstones in the floors and courtyards of homes was a feature of only the more luxurious dwellings). Ceilings consisted of a plaster surface over wooden beams. The rooftop was constructed of a thick layer of clay over reed matting, all supported by the wooden beams. This rooftop area usually received heavy use in warm weather (cf. 2 S. 11:2). To combat cracking of the clay, the roof surface had to be rolled periodically. In the springtime a short-lived growth of grass on the rooftop was commonplace (cf. Ps. 129:6; 2 K. 19:26; Isa. 37:27). The

Wooden model (12th Dynasty, 20th-19th cents. B.C.) of an Egyptian farm-steward's house. The lower floor was the kitchen and storage area and the upper floor the bedroom (Trustees of the British Museum)



roof was usually made accessible either by an external stairway or a ladder.

With the exception of the more luxurious homes, rooms in these dwellings were tiny, with ceilings about 2 m. (6 ft.) in height. The doors were of wood, set into sockets in the stone sill and wooden or stone lintel; the doorjambs were also of wood.

Independently or in combination, *bayiṯ* may also designate particular kinds of buildings or homes. *Bēṯ hammeleḵ* (lit. "house of the king") is thus the royal "PALACE" in 1 K. 9:1; but so is *habbayiṯ* (lit. "the house") in 1 K. 4:6. *Bēṯ hā'ᵉlōhîm* (lit. "house of God") is the "temple" in Dnl. 1:2 ("shrine" in Jgs. 17:5), but so is *habbayiṯ* in 1 K. 6:12. *Bēṯ YHWH* is the "temple of the Lord" in Ex. 23:19; etc. This same combination has recently appeared in the Arad ostraca (see Y. Aharoni, *BA*, 31 [1968], 16f., and cf. the similar combination, *bēṯ dāgôn*, "temple of Dagon," in 1 S. 5:2).

In Jer. 37:15 both *bēṯ hā'ēsûr* (lit. "house of binding") and *bēṯ hakkele'* (lit. "house of confinement") mean simply "prison." Also notable among numerous other such combinations is *bēṯ hannāšîm* (lit. "house of the women"), which means simply "the harem."

The great flexibility of the term may be seen through its less common and more remote extensions of meaning — e.g., the netherworld (Job 17:13), the grave (Ps. 49:11 [MT 12]; Eccl. 12:5), the human body (Job 4:19; Eccl. 12:3), a spider's web (Job 8:14), a bird's nest (Ps. 84:3 [MT 4]; 104:17), a badger's den (Prov. 30:26), and property (1 K. 13:8).

Apart from the literal sense of "dwelling, home" the most common connotation of *bayiṯ* is that of "household, family." This natural extension of the essential meaning occurs almost six hundred times in the OT, referring to an immediate FAMILY or HOUSEHOLD (i.e., the occupants of a *bayiṯ*; cf. Gen 7:1), a family of descendants or clan (Ruth 4:12), a tribe (Ex. 2:1), a family or guild of craftsmen (1 Ch. 4:21), a dynasty (2 S. 9:1; 1 K. 12:16; 2 K. 8:18; etc.; in 2 S. 7:11 *'āśâ bayiṯ* means "found a dynasty"), or even a political entity or nation (e.g., *bēṯ yiśrā'ēl* in 1 S. 7:2f.). The combination "house of the Torah" (*byt htwrh*) in CD 20:11-13 appears to have the sense of "community" and to be related to the NT conception of the community as the "house of God" (cf. He. 3:1-6; see *TDNT*, V, *s.v.* οἶκος, οἰκία [Michel], 121).

In the great majority of cases where the RSV translates *bayiṯ* by "home" the meaning is a residence or personal dwelling (cf., e.g., Gen. 39:16; Jgs. 18:26; Lam. 5:2). In a few instances the meaning is really closer to "family." In the incest legislation of Lev. 18:9 a "female born at home" (*môleḏeṯ bayiṯ*) is contrasted with a "female born outside" (*môleḏeṯ ḥûṣ*). This simply means a girl born "in the family" vis-à-vis one born "outside the family" (cf. also Ps. 68:6; 113:9).

The idiomatic use of the directional *h* with *bayiṯ*, yielding the sense "to the home" or "homeward," lies behind the RSV translation in several instances. In 2 S. 13:7 it is used of sending a message "homeward"; in 1 K. 13:7 of bringing a visitor to one's home; and in Ex. 9:19 and 1 S. 6:7, 10 of bringing animals back home.

2. 'Ōhel. The Hebrew noun *'ōhel*, "tent," is translated "home" fifteen times in the RSV. While its literal and original meaning is the impermanent, nomadic tent dwelling, *'ōhel* was still used in settled times in a much more general sense as "home, dwelling, habitation." In 2 K. 13:5, e.g., the people of Israel are said to dwell during the second reign of the Jehu dynasty (*ca.* 800 B.C.) in their *'ᵒhālîm* (lit. "tents"; RSV "homes"). Such usage is anachronous, but it represents reapplication of the old vocable to the new realities of urban or sedentary life. In all of these examples the term simply means "residence," and the literal sense, "tent," is of no particular import. In six instances (1 S. 4:10; 2 S. 18:17; 19:8; 2 K. 8:21; 14:12; 2 Ch. 25:22) the immediate context is a variation of the idiomatic expression "each person fled to his home/tent" (cf. 2 S. 20:1, RSV; see *TDOT*, I, *s.v.* "'ōhel" [Koch]).

3. Māqôm. Eleven times in the OT the RSV renders *māqôm* (lit. "place, standing-place") as "home." In most instances its use is comparable to that of the above terms: it refers to a person's "place of residence" or "home." But in Gen. 30:25 and 2 S. 15:19 it has the wider, geographical sense of "homeland" (*see* PLACE).

4. Mānô(a)ḥ *and* Mᵉnûḥâ. Both the cognate synonyms *mānô(a)ḥ* (Ruth 3:1) and *mᵉnûḥâ* (1:9) have the literal and original sense of "resting place." By logical extension they are each used once in Ruth with the sense of "home," i.e., that place where one can rest securely (*see* REST). The original sense of these terms is illustrated in Gen. 8:9, where Noah's dove could find no *mānô(a)ḥ*, and Nu. 10:33, where *mᵉnûḥâ* denotes a campsite on the wilderness journey from Sinai.

5. Reḇeṣ *and* Mizzᵉḇul. The use of *reḇeṣ* (lit. "a place of lying down, crouching place") to mean "home" is borrowed from the animal world (e.g., Isa. 65:10, the place where the flocks lie down to rest) and is applied to human beings only in Prov. 24:15. The RSV has rendered the very uncertain *mizzᵉḇul* in Ps. 49:14 as "home" (cf. *zᵉḇul*, "habitation," in Isa. 63:15) but this is at best a guess (cf. NEB "honor," from *zᵉḇûl*, "elevation"). A. Weiser (p. 385) states that "the restoration of the seriously corrupt text is hopeless," and attempts no translation for the end of the verse.

B. Verbal Expressions. The RSV also uses "home" in English verbal expressions translating a number of Hebrew verbs: *šûḇ*, "return home" (Jgs. 7:3); *šûḇ* (hiphil), "bring home" (Jgs. 11:9); *bô'*, "come home" (Ps. 126:6); *bô'* (hiphil), "bring home" (1 Ch. 13:12); *šālaḥ* (piel), "send home" (1 S. 13:2); *sûr* (hiphil), "take home" (1 Ch. 13:13); *sāḇaḇ*, "go home" (1 Ch. 16:43); *lûn* (hithpael), "make a home" (lit. "lodge oneself," Job 39:28); and *'āsap*, "bring home" (lit. "gather up," Dt. 22:2).

II. In the NT.–A. Substantives. 1. Oíkos. The Greek noun *oíkos*, "house, dwelling, home," is regularly used in the LXX to render Heb. *bayiṯ* and thus reflects in the NT a similar range of meaning as that possessed by its normal OT equivalent. Like *bayiṯ*, *oíkos* most often represents a building in which a family dwells. But it may refer to a palace (Mt. 11:8) or temple (21:13), or even a city or populace (23:38); also to the human body (Lk. 11:24 and Mt. 12:44, where the sick person is said to be the "house" of the evil spirit or demon), to the property of a house (Acts 7:10), and by extension to the household or family (Lk. 10:5) or clan (Lk. 1:27).

In the LXX *oíkos toú theoú* (lit. "house of God") is the regular translation for the Heb. *bēṯ (hā)'ᵉlōhîm*. In NT usage it has reference to no other sacred building than the earthly temple of Israel (cf. also Josephus *BJ* iv.4.4 [281]). A few times in the NT, however, the Christian community itself is designated as the *oíkos toú theoú*, the "household of God" (1 Tim. 3:15; 1 Pet. 4:17; He. 3:6; cf. Eph. 2:19; and see *TDNT*, V, 125-28). In the apocryphal book of Baruch (3:24) the phrase "house of God" means the cosmos or created universe (cf. Philo *De aeternitate mundi* 112; *De cherubim* 52). But Philo was also able to conceive of the pure human soul as an *oíkos toú theoú* (see *TDNT*, V, 123).

The RSV translates "home" for twenty NT occurrences of *oíkos*. In each of these the term specifically has refer-

ence to a personal residence or dwelling (except perhaps for Lk. 9:61, where it may have the sense "family"; cf. 10:5). Also in each of these instances *oíkos* is always in the idiom *eis (toń) oíkon* plus a verb of motion (e.g., in Mt. 9:6, "go home"; in Mk. 8:26, "send home") or *en oíkō/kat' oíkon*, "at home" (e.g., Mk. 2:1; Acts 5:42).

2. Oikía. The Greek language originally distinguished between *oíkos* and *oikía*, the former representing the whole of a deceased person's possessions and the latter simply his residence. But in the NT the two have by and large fallen together (see *TDNT*, V, 131-34), and *oikía*, though less frequent in occurrence, displays much the same variety of meaning as does *oíkos*. In three of its NT occurrences the RSV translates "home." Occurring in the same idioms as does *oíkos*, it also refers in each case to a personal residence.

3. Ídia. The Greek adjective *ídios*, "one's own," has reference to what properly belongs to an individual (private property), vis-à-vis what is public property or another's. Used as a substantive it may refer to persons such as "relatives" or "fellow citizens" (cf. Jn. 1:11b; Sir. 11:34); or it may refer to one's own "home" (*tá ídia*) as in Jn. 1:11a; 16:32; 19:27; Acts 21:6. It may also mean simply "home" in Lk. 18:28, but it seems here to connote more precisely "property, possessions" (cf. NEB "belongings").

4. Monḗ. The noun *monḗ*, "staying, tarrying" (derived from *ménō*, "stay, wait, abide"), in one NT instance has the connotation "home" (Jn. 14:23; cf. also v. 2, "room").

B. Verbal Expressions. As in a number of OT passages, the RSV incorporates "home" into its translation of several verbs: *endēméō*, "be at home" (2 Cor. 5:6, 8f., employed figuratively); *apérchomai*, "go, depart (for home)" in Lk. 24:12; Jn. 20:10; *hypostréphō*, "turn back, turn around, return (home)," in Lk. 23:48; and *analýō*, "depart, return (home)," in Lk. 12:36.

D. G. BURKE

HOMEBORN [Heb. *'ezrāḥ*]. A native-born Hebrew, as contrasted with a foreigner of different blood (Josh. 8:33, AV "he that was born among them"; NEB "native"). The same Hebrew word is found in Lev. 16:29; 18:26; and elsewhere, but is translated differently. "Homeborn servant" in Jer. 2:14 translates Heb. *yᵉlîḏ bayiṯ* (NEB "born in slavery"), which indicates a free-born person in contrast to a slave.

HOMER hō'mər [Heb. *ḥōmer*] (Lev. 27:16; Nu. 11:32; Isa. 5:10; Ezk. 45:11, 13f.; etc.). A dry measure equal to the cor, containing about 394 liters, or approximately 11 bushels. It was equal to ten ephahs. *See* WEIGHTS AND MEASURES.

HOMICIDE. The only occurrence of this term in the RSV is in Dt. 17:8, where Heb. *dām* ("blood") is employed in the absence of a specific Hebrew term for "murder." The narrative is endeavoring to distinguish between homicide proper, an act of physical violence against a person that culminates in his death, and an unpremeditated killing in which the death of the victim is accidental. Murder is definitely forbidden in the sixth commandment (Ex. 20:13; 21:12; cf. Gen. 9:5f.; Lev. 24:17, 21; Nu. 35:16-21; Dt. 19:11-13). It was always to be punished by death, as a crime against the image of God; the penalty of death, however, was not inflicted when the killing was unintentional or unpremeditated (Ex. 21:13; Nu. 35:22-25; Josh. 20:3-5). Refuge cities were founded to which the manslayer could escape from the "avenger of blood." There he had to abide until after the death of the officiating high priest. If he left the city before that event, the AVENGER who killed him was free from punishment (Ex. 21:13; Nu. 35:10-15, 25-28, 32; Dt. 19:1-13; Josh. 20:2-6; *see* REFUGE, CITIES OF).

Killing a thief who broke in during the night was not accounted murder (Ex. 22:2), although one who killed a thief in the daytime incurred bloodguilt (Ex. 22:3). If a man failed to build a parapet for his roof, and anyone fell over and was killed, bloodguiltiness also came upon that man's house (Dt. 22:8). Unintentional killing of a pregnant woman in a fray was punished according to the *lex talionis*, i.e., the husband of the woman killed could kill the wife of the man who committed the offence without being punished (Ex. 21:22f.). This was not usually carried out, but it gave the judge a standard by which to fine the offender. Where a body was found, but the murderer was unknown, the elders of the city nearest to the place where it was found were ordered by a prescribed ceremony to declare that they were not guilty of neglecting their duties, and were therefore innocent of the man's blood (Dt. 21:1-9). Two witnesses were necessary for a conviction of murder (Nu. 35:30). If a slave died under chastisement, the master was to be punished according to the principle that "whosoever strikes a man so that he dies shall be put to death" (Ex. 21:12; cf. v. 20).

See KILL; MURDER.

HOMOEOTELEUTON. *See* TEXT AND MSS OF THE NT II.A.1.

HOMOSEXUALITY. *See* SEX; CRIMES.

HONEST [Heb. *kēn*] (Gen. 42:11, 19, 31, 33f.); AV TRUE; [*yāšār*] (1 S. 29:6); AV, NEB, UPRIGHT; [*yōšer*] (Job 6:25); AV RIGHT; NEB UPRIGHT; [*ṣeḏeq*] (Prov. 12:17); AV RIGHTEOUSNESS; [Gk. *agathós*] (Eph. 4:28; Tit. 2:1); AV GOOD; NEB HONESTLY, HONORABLE; [*kálos*] (Lk. 8:15); **HONESTLY** [Heb. *bᵉʾĕmûnâ*] (2 K. 12:15 [MT 16]; 22:7; Isa. 59:4); AV FAITHFULLY, TRUTH; NEB TRUST; **HONESTY** [Heb. *ṣᵉḏāqâ*] (Gen. 30:33); AV RIGHTEOUSNESS.

The majority of Hebrew words translated by "honest" and "honestly" are derived from roots denoting firmness, straightness, steadfastness, and supportiveness (*kwn, yšr, 'mn*). Thus "honest" has to do with adhering to a particular standard, often with legalistic nuances (cf. Isa. 59:4). The two occurrences of Heb. *ṣeḏeq* and *ṣᵉḏāqâ* also indicate a correctness, an evaluative judgment based on legal practice, though the precise legal traditions are difficult to determine (esp. for Gen. 30:33).

The Gk. *kálos kaí agathós* was a well-known combination in Greek literature (cf. *TDNT*, pp. 538-540) and came to mean the ideal of life, with ethical and spiritual connotations. In Lk. 8:15 it probably connotes "morally good" (cf. Bauer, rev., p. 400). The "honest work" in Eph. 4:28 and Tit. 3:1 probably has a similar ethical or religious connotation (cf. *TDNT*, II, 649; Bauer, rev. p. 3).

See also GOOD.

D. F. MORGAN

HONEY [Heb. *dᵉḇaš*; Gk. *méli*]. The honey referred to in the OT was in most cases wild honey (Dt. 32:13; Jgs. 14:8f.; 1 S. 14:25f., 29, 43), although the offering of honey with the first fruits would seem to indicate that the bees

were also domesticated (2 Ch. 31:5). The bees constructed their honeycomb and deposited their honey in holes in the ground (1 S. 14:25), under rocks, or in crevices between the rocks (Dt. 32:13; Ps. 81:16 [MT 17]).

In OT times, as at present, honey was rare enough to be considered a luxury (Gen. 43:11; 1 K. 14:3). Honey was used in baking sweets (Ex. 16:31). It was forbidden to be offered with the meal offering (Lev. 2:11), perhaps because it was fermentable, but was presented with the fruit offering (2 Ch. 31:5). Honey was offered to David's army (2 S. 17:29). It was sometimes stored in the fields (Jer. 41:8). It was also exchanged as merchandise (Ezk. 27:17). In NT times wild honey was an article of food among the lowly (Mt. 3:4; Mk. 1:6).

The OT uses "honey" in several figurative expressions. "A land flowing with milk and honey" suggested a land filled with abundance of good things (Ex. 3:8, 17; Lev. 20:24; Nu. 13:27; Dt. 6:3; Josh. 5:6; Jer. 11:5; Ezk. 20:6, 15). "A land of olive trees and honey" had the same meaning (Dt. 8:8; 2 K. 18:32), and similarly "streams flowing with honey and curds" (Job 20:17). Honey was a standard of sweetness (Cant. 4:11; Ezk. 3:3; Rev. 10:9f.). It typified sumptuous fare (Cant. 5:1; Isa. 7:15, 22; Ezk. 16:13, 19). The ordinances of Yahweh are "sweeter than honey and the drippings of the honeycomb" (Ps. 19:10 [MT 11]; 119:103); *see* picture of *Leipzig Mahzor* in EDUCATION. "You ate . . . honey" (Ezk. 16:13) expresses Yahweh's goodness to Jerusalem. J. A. PATCH

HONOR [primarily Heb. *kāḇēḏ* (e.g., Ex. 20:12) and the derivative noun *kāḇôḏ* (e.g., Nu. 24:11), also *hôḏ* (1 Ch. 16:27), *yᵉqār* (Est. 1:20), *yāqār* (Ps. 45:9 [MT 10]), *tāmîm* (Jgs. 9:16), *šēm* (Ezk. 39:13), *tip'ārâ* (Dt. 26:19), *nᵉḏîḇâ* (Job 30:15), *gᵉḏûllâ* (Est. 10:2), *'aḏ-lim'ōḏ* (2 Ch. 16:14), *nāśā'* (Isa. 9:15 [MT 14]), *zāḇal* (Gen. 30:20), *hāḏar* (Lev. 19:32); Aram. *hᵃḏar* (Dnl. 4:34 [MT 31]), *rᵉḇâ* (Dnl. 2:48); Gk. *timḗ* (Jn. 4:44), *timáō* (Mt. 15:4), *tímios* (Acts 5:34), *éntimos* (Phil. 2:29), *átimos* (Mt. 13:57), *dóxa* (2 Cor. 6:8), *doxáxō* (Rom. 1:21), *éndoxos* (1 Cor. 4:10), *megalýnō* (Acts 5:13), *prōtoklisía* (e.g., Mt. 23:6)]; AV MAGNIFY, GLORIFY, MAKE GREAT, etc.; NEB SHOW FAVOR, "have great reputation," GLORIFY, etc.; **HONORABLE** [Heb. *kāḇēḏ* (Nu. 22:15; 1 Ch. 4:9; Isa. 3:5; 58:13), *šô(a)ʿ* (Isa. 32:5); Gk. *kalós* (2 Cor. 8:21; Jas. 2:7), *átimos* (1 Cor. 12:23), *semnós* (Phil. 4:8)]; AV also BOUNTIFUL, HONEST, TRUE, WORTHY; NEB OF HIGHER RANK, MEN OF SUBSTANCE, PRINCE; **HONORABLY** [Gk. *kalṓs* (He. 13:18)]; AV HONESTLY; NEB "what is right."

The following difficult or unusual readings should be noted. On Heb. *yizbᵉlēnî* (Gen. 30:20), see E. A. Speiser, *Genesis* (*AB*, 1964), p. 231; the AV "dwell with" reflects the older understanding derived from *zᵉḇûl*, "dwelling"; cf. *CHAL*, p. 86. The RSV and NEB "in his honor" (Heb. *'aḏ-lim'ôḏ*) in 2 Ch. 21:19 is an interpolation (omitted by the AV) on the basis of 2 Ch. 16:14. In Job 30:15 the NEB "resolution" is based on the LXX *elpís*, while the AV "soul" reflects Vulg. *desiderium* (cf. Syr. *nᵉṯîḇâ*, "path [of life]"). Ps. 45:9 has several problems (see the comms.); *bᵉyiqqᵉrôṯeḵā* in v. 9 is often emended to *liqrā'ṯᵉḵā*. "to meet you" (cf. *BHS*; KoB, p. 399). Isa. 5:13 uses *kāḇôḏ* as a substantive, hence the RSV and AV "honored men" and the NEB "nobles." The Gk. *prōtoklisía* (Mt. 23:6 par. Mk. 12:39 par. Lk. 20:46; Lk. 14:7f.) means "place of honor" (so RSV, NEB); as A. Plummer (comm. on Matthew [1953], p. 315 n. 1) points out, the AV "uppermost rooms" is misleading now, although in Elizabethan English it corresponded fairly closely to the meaning of *prōtoklisía*. In Rom. 14:6 the RSV three times translates *kyríǭ* as "in honor of the Lord" (dative of advantage; cf. BDF § 188); the AV "to the Lord" is woodenly literal, but the NEB "has the Lord in mind" effectively communicates the meaning.

The Hebrew root *kbd* and its derivatives, more often translated "glorify, glory," denote weight or heaviness (cf. Assyr. *kabâdu* and Ugar. *kbd* [sometimes used in reference to money]). The root *yqr* has a similar denotation (cf. Assyr. *akâru* and Ugar. *yqr*) as well as *hdr*, "to adorn" (cf. Ugar. *hdrt*). The most frequent roots used in the NT stress the action of honoring (Gk. *timáō*, *megalýnō*, *doxázō*).

Honor usually results in people being elevated in the eyes of the community. This anthropocentric use of honor in the Bible has often been observed, and is easily understandable in view of the characteristics usually associated with final achievement of honor, namely, rank (Nu. 22:15), reputation (1 S. 9:6; Acts 5:34), status (1 Tim. 5:3), wealth (1 K. 3:13; Prov. 3:16; Dnl. 2:6), and character (Isa. 3:5). All of these are worthy of honor. What is sometimes blurred, however, is the issue of whether these characteristics are prerequisites for being an honorable person or the results of being such a person. It is probably safe to assume that the causal relationship will sometimes change its sequence (e.g., honor leading to wealth, or wealth leading to honor), but in the majority of cases most of these characteristics will be present. To the extent that honor is attributed to God and therefore interpreted as a sign of His favor, the prophets and other critics of Israelite society had real objections to the simple equation of honor with wealth and fame. There were real criteria for achieving honor (see below) and they were usually behavioral characteristics rather than economic achievements.

Sometimes the references focus upon honor as an object, on that which is given to a person, and therefore on those aspects and actions of man that are deserving of such honor. In Proverbs, e.g., wisdom, graciousness (Heb. *ḥēn*), humility (*ʿᵃnāwâ*), a lack of contentiousness, righteousness (*ṣᵉḏāqâ*), kindness (*ḥeseḏ*), lowliness of spirit (*šᵉpal-rû(a)ḥ*), and fear of the Lord — all these are characteristics of the honorable person. Honor here is seen as the result of doing the right things (cf. Rom 2:7-11). It is clear that honor is often found in contexts presenting a retributive theology, equating honor and good works with right action.

Sometimes the *action* of giving honor is stressed, emphasizing not only the merits of the receiver (Dnl. 2:48), but the merits of the giver as well. The best example of this use of honor is the well-known imperative to honor parents (Ex. 20:12; Mt. 15:4; Eph. 6:2), focusing on both the implicit attributes of the parents and the efficaciousness of the action for the children.

Though a study of honor in its many biblical occurrences will necessarily concentrate upon the human being, it must be remembered that a biblical anthropology begins and ends with theological assumptions. The honor that a person earns or is given by others is ultimately dependent upon God (2 Ch. 26:18; Ps. 62:7 [MT 8]; 84:11; Rom. 2:7-11). Moreover, God Himself is clothed with honor (Ps. 104:1), and His saving works, the necessary constituent for Israel's existence, are worthy of honor (Ps. 111:3). Thus, behind all the biblical references to honor can be found the assumption that without God as the giver of honor all is inconsequential (Rom. 2:6ff.). And the necessary prerequisite for such an understanding of honor is that ultimately God alone is not only the source and giver, but the most appropriate recipient of honor, as reflected in Rev. 4:11: "Splendor and honor and kingly power are yours by right, O Lord our God, for you created everything that is, and by your will they were created and

have their being" (*Authorized Services* [1973], Protestant Episcopal Church of the USA).

D. F. MORGAN

HOOD [Heb. *ṣānîp*] (Isa. 3:23, AV). *See* TURBAN.

HOOF. *See* CLEAN AND UNCLEAN, II.A.; CLOVEN.

HOOK [Heb. *wāw*] (Ex. 26:32, 37; 27:10f.; 36:36, 38; 38:10-12, 17, 19, 28); [*qeres*] (Ex. 35:11; 39:33); AV TACHE; NEB FASTENER; [*ḥakkâ*–'fishhook'] (Job 41:1 [MT 40:25]; Isa. 19:8; Hab. 1:15); RSV, NEB, also FISHHOOK; AV also ANGLE; [*ḥāḥ*] (2 K. 19:28 par. Isa. 37:29; Ezk. 19:4, 9; 29:4; 38:4); AV also CHAIN; NEB also RING; [*ḥô(a)ḥ*] (2 Ch. 33:11; Job 41:2 [MT 40:26]); AV THORN; NEB also "spiked weapon"; [*ṣēn* (pl. *ṣinnôṯ*) "hook(s)," and *sîrôṯ dûgâ*, "fishhooks"] (Am. 4:2); NEB "shields and . . . fish-baskets"; [*mazmērâ*, "pruning hook"] (Isa. 2:4; 18:5; Joel 3:10 [MT 4:10]; Mic. 4:3); NEB also KNIVES, PRUNING KNIVES; [Gk. *ánkistron*] (Mt. 17:27); NEB LINE.

The book of Exodus conceives the tabernacle court as enclosed by a portable wall; posts were set up at regular intervals with curtains attached by "hooks" or pegs (Ex. 27:10; 38:10). Similar constructions (the "screen" and the "veil") are described in Ex. 26:32, 37; 36:35-38. The Hebrew word for these objects, *wāw*, is also the name of the sixth letter of the Hebrew alphabet; it is not clear whether the letter was so named because it looked like a "hook," or vice versa.

The "hooks" of Ex. 35:11; 39:33 (*qeres*) were used to join together the two great sets of curtains for the tabernacle (Ex. 36:10-13), and also those for the tent (36:14-18).

The Israelites, like the Egyptians and Assyrians, fished with hook and line (*ḥakkâ*); fishing rods, however, are not mentioned in the Bible. The monster crocodile (?) Leviathan cannot be caught with a *ḥakkâ* (Job 41:1; but cf. Herodotus ii.70). Jewish law knows the *ḥakkâ* as simple fishing equipment (T.P. *Moed Katan* ii.5; Tosefta *Baba Kamma* viii.17); it was apparently the hook used by Peter in Mt. 17:27 (Gk. *ánkistron*, used by the LXX to translate *ḥakkâ*).

The *ḥaḥ* or *ḥō(a)ḥ* was used for the capture of crocodiles (Ezk. 29:4; Job 41:2), wild beasts (Ezk. 19:4, 9), and human beings (2 Ch. 33:11; cf. 2 K. 19:28 par. Isa. 37:29; Ezk. 38:4). It was inserted in the victim's nose (2 K. 19:28) or jaw (Job 41:2; Ezk. 29:4; 38:4). It is sometimes thought of as a pointed stick or harpoon, but the passages referring to human beings suggest Assyrian illustrations of captives held by a ring in the lip attached to a cord (see *ANEP*, nos. 447, 524). Something similar may be intended in the obscure passage Am. 4:2, where the women of Samaria are led away with "hooks" (*ṣinnôṯ*) and "fishhooks" (*sîrôṯ dûgâ*). The RSV's "hooks" in Job 40:24 is based on the emendation *ṣinnîm* for *ʿênāw* (AV, NEB, "eyes"; AV mg. "sight"; see the comms.).

The "pruning hook" (*mazmērâ*) consisted of a sickle-shaped metal blade, its inner edge sharpened, attached to a wooden handle. It could be converted into a spear (possibly "scimitar") and vice versa (Joel 3:10; Isa. 2:4; Mic. 4:3). Isa. 18:5 describes its use.

"Hooks" (Ezk. 40:43) is a guess, from the context, at the meaning of Heb. *šᵉpattayim* (AV mg. "endiron"; NEB "ledges").

D. J. HALPERIN

The hoopoe bird (Trustees of the British Museum)

HOOPOE hōō'pō, -pōō [Heb. *dûḵîp̱aṯ*; Gk. *épops*; Lat. *Upupa epops*] (Lev. 11:19; Dt. 14:18); AV LAPWING. One of the peculiar and famous birds of Palestine, having a curved bill and beautiful plumage. It is about the size of a thrush. Its back is a rich cinnamon color, its head golden buff with a crest of feathers of gold, banded with white and tipped with black, that gradually lengthen as they cover the head until, when folded, they lie in lines of black and white, and, when erect, each feather shows its exquisite marking. Its wings and tail are black banded with white and buff. It nests in holes and hollow trees. All ornithologists agree that it is a nasty, filthy bird in its feeding and breeding habits. The nest, never cleaned by the elders, soon becomes soiled and evil smelling. The bird is mentioned only in the lists of abominations (Lev. 11:19; Dt. 14:18), perhaps because it has bad habits, and undoubtedly because it was one of the sacred birds of Egypt.

G. STRATTON-PORTER

HOPE [Heb. *bāṭaḥ*–'trust,' *yāḥal*–'wait for,' *qāwâ*–'expect,' *tiqwâ*–'expectation'; Gk. *elpízō*, *elpís*, "hope," also "expect" (2 Cor. 8:5)]. A concept involving trustful anticipation, particularly with reference to the fulfillment of the promises of God.

V. The "Larger" Hope

I. General Considerations.–Hope is one of the finest responses of which the human spirit is capable. It has kept people alive and buoyant when the conditions of life were almost unbearable. Men of letters have saluted it with language that has become axiomatic, such as "hope springs eternal in the human heart" and "where there is life there is hope." Scripture speaks similarly: "Anyone who is among the living has hope" (Eccl. 9:4, NIV).

Hope is also a mark of human limitation. Granted that

it owes much to the promises of God, yet those promises are especially welcome because of our lack of knowledge of the future and our inability to effect radical change. Hope is a testimony to man's humility in the face of his finiteness. It amounts to a protest against any assumption that the present contains the ideal situation for mankind.

We may assume that hope has no place in the being of God. True Paul can refer to Him as the God of hope (Rom. 15:13), but probably only in the sense that He is the one who inspires hope in His people, unless we are to suppose that Paul is suggesting that God Himself lives in an aura of anticipation, pondering His plans for the future.

It is hardly adequate to define hope as expectation, for someone could expect judgment and on that account be utterly without hope. Expectation must be yoked with confidence and desire in order to qualify as hope. Frequently in our culture the familiar "I hope so" is really only an admission of a thinly veiled pessimism.

Hope sometimes appears in Scripture as a subjective entity, something that one possesses and exercises. Especially is this true of the OT, but in the NT this usage is less frequent, being overshadowed by the objective reality that draws the human response like a magnet. Paul can speak of Christ Jesus as the believer's hope (1 Tim. 1:1) and of the hope laid up in heaven for the child of God (Col. 1:5). The hope generated in one's heart (1 Pet. 3:15) is the echo of this heavenly reality. To exert hope would be futile apart from the person and pledges of the Almighty.

II. OT.–The Exodus from Egypt followed by the Sinaitic covenant, the preservation of the nation in the wilderness, and the successful occupation of Canaan, provided a firm basis for Israel's confidence in God's continuing provision and aid. By virtue of their largely agricultural economy, the people were dependent on God's faithfulness in respect to weather patterns. In time, competition from Baal worship seriously imperilled the nation's fidelity and also its Godward expectation. Yet even in the darkest days of apostasy hope was not extinguished among the godly. On the basis of God's covenant mercy, the remnant continued to look to Him for intervention, including deliverance from Israel's enemies (Jer. 14:8f.). Later, when the returnees from Babylonian captivity evidenced their repentance by putting away their foreign wives, they took fresh hope on the ground of God's forgiveness (Ezr. 10:2). Those who did not return from captivity were consoled by being addressed as prisoners of hope (Zec. 9:12).

A corollary of placing one's hope in God is refusing to put one's ultimate reliance on man, whether neighbor or friend (Mic. 7:5), princes (Ps. 118:9), or resources such as wealth (Ps. 52:7 [MT 9]) or horses (Ps. 33:17).

Hope is sometimes expressed by other terms, especially "wait" and "look." For the Hebrew, waiting on the Lord was not primarily a matter of spending time but was rather an attitude of trust and expectation. It could bring the reward of exchanging one's own weakness for divine strength (Isa. 40:31). God is represented as one who works for those who wait for Him (Isa. 64:4).

Hope is often present without specific mention of it. Abraham's attitude of faith in God's promise of a son stimulated within him a confidence that defied all human calculation (Rom. 4:18). When David and his men returned to Ziklag and found their homes burned and their wives carried off by marauders, all of them lamented, but David strengthened himself in the Lord his God (1 S. 30:6). He was exercising hope.

Hope may sometimes suffer partial eclipse or alternate with depression. The psalmist admits to being in low spirits, but this very condition prods him to hope in God (Ps. 42:11 [MT 12]). Unable to understand the affliction that has deprived him of possessions, family, and health, Job laments, "My days are swifter than a weaver's shuttle, and come to their end without hope" (Job 7:6). Yet resurgent hope enables him to triumph over these moments of near despair. "For I know that my Redeemer lives . . . I shall see God" (Job 19:25).

In the writings of the OT hope relates largely to one's earthly existence. Hezekiah, in the grip of serious illness, longs for restored health and pleads with God, "For Sheol cannot thank thee; those who go down to the pit cannot hope for thy faithfulness" (Isa. 38:18). Revelation was incomplete; Christ had not come, and the definite hope of eternal life, based on His resurrection, was lacking (2 Tim. 1:10).

One must turn to the OT prophets for the principal development of the concept of hope on a national and even universal scale. This element of hope is not predicated on the improvement of the character of the covenant people. The prophets lament the unfaithfulness, the disobedience of the nation, echoing the disappointment and pain of Yahweh. But they also voice His determination not to inflict such a sweeping judgment as to destroy the nation He has chosen. "How can I give you up, O Ephraim! How can I hand you over, O Israel! . . . I will not execute my fierce anger . . . for I am God and not man" (Hos. 11:8f.; cf. 2:15 [MT 17]). This mingling of judgment and promise in the prophets provides the stamp of authenticity for their utterances, since only God could make valid by His own decision and action the pattern of judgment followed by restoration. The crowning feature of the prophetic message of hope was the promise of a messianic king (Isa. 11:1, etc.).

III. Intertestamental Period.–A. Normative Piety. This era reflected the expectations of OT days in that hope was fixed on God rather than on mankind or favorable circumstances. "The spirit of those who fear the Lord will live, for their hope is in him who saves them. He who fears the Lord will not be timid, nor play the coward, for he is his hope" (Sir. 34:13f.). Hope for the life to come included resurrection at times (e.g., 2 Macc. 7:14), but where Greek influence was strong the prevailing expectation was immortality of the soul (e.g., 1 En. 103:4).

B. Apocalypticism. The intertestamental literature testifies to a growing preoccupation with apocalyptic, a feature readily understandable in the light of the political situation. Israel was under continuous domination by foreign powers, a condition relieved only during the era of independence under the Maccabees. Divine intervention from without was perceived as the only hope of the nation. It would occur through the inbreaking of the Messiah, who is given additional titles in 1 Enoch such as the Righteous and Elect One (53:6) and the Son of Man (69:27).

C. Rabbinic Judaism. With few exceptions the rabbis found their solace in the study and application of the Mosaic law rather than in the adoption of forcible measures designed to effect political freedom. Theoretically this spiritual concern should have stimulated hope in God and in His promises, but paradoxically this was not the result. The reason was the growth of legalism. No one could be confident of having observed fully the ramifications of the law that were extended into every area of human life and activity. The more conscientious one sought to be the more his assurance of salvation tended to become clouded (*TDNT*, I, 527-29).

D. Qumrân. This group was eschatologically oriented, living in the belief that its lot was cast in the end of the days. It anticipated a final conflict between the forces of righteousness and the forces of wickedness, involving both men and angels. The faithful could anticipate eternal salvation in the presence of God.

IV. NT.–A. Gospels and Acts. Regarding the Gospel

corpus, if one were to judge from terminology alone, there would be little to discuss, because the noun does not occur at all and the verb appears in only a few instances. Other terms are used, however, e.g., *prosdéchomai* (Lk. 2:38; 7:19f.; 23:51) and *prosdokáō* (Mt. 11:3).

Certainly when one appraises the atmosphere and the spirit generated by the coming of a new age, there was eager anticipation. The impact of the Baptist's preaching was felt throughout the land as he proclaimed the imminent arrival of the kingdom of God. Moreover, his proclamation of one greater than himself who would shortly appear was electrifying.

Jesus proclaimed His own mission basically in terms of the kingdom. It had come in His own person and was due to experience both growth and opposition, resulting in a glorious consummation. To His disciples He intimated that before the setting in of the age to come an era of gospel proclamation based on His forthcoming death and resurrection would intervene. The Master had much to say also about His return and the necessity that His followers be found serving and waiting, looking for the coming of their Lord (Mt. 24–25).

Since the disciples did not understand this perspective due to their preoccupation with a temporal kingdom, their hopes were dashed by the death of Jesus (Lk. 24:21); but His resurrection revived and intensified those hopes. This glorious event became the focus of gospel preaching as recorded in the early chapters of Acts. It meant that the rejection of Jesus as Israel's Messiah was a human blunder (Acts 4:10-12), and the chief value of the event was to awaken saving faith in the risen Lord. At Pentecost thousands became convinced by the Spirit-empowered preaching of Peter that Jesus had indeed fulfilled the prophecies of the OT regarding the Messiah. In the latter half of Acts, Paul's witness to his countrymen centered in Jesus the risen Lord as the hope of Israel (Acts 23:6; 26:6-8; 28:20).

B. Epistles. 1. In Relation to Believers. Here, as in Acts, the resurrection of the Lord Jesus provides the catalyst not only for the present enjoyment of Christian experience but also for the expectation of heavenly inheritance (1 Pet. 1:3). Peter was able to call it a living hope, due to its constant and unfading character. This prospect is confirmed by the dwelling of the living Christ in the hearts of believers, where He abides as the hope of glory (Col. 1:27). He provides introduction to the Father and access to the throne of grace for the saints (Rom. 5:2; He. 7:19), stimulating hope of eternal fellowship in the divine presence. This ultimate reality comes to God's people through the corridor of death (2 Cor. 5:8), but those who remain alive until the coming of the Lord will be spared the ordeal of death and will be translated to His heavenly kingdom (1 Thess. 4:15-17), exchanging the present body for one that resembles Christ's (Phil. 3:21). Small wonder that believers are encouraged to think of the return of the Lord as their blessed hope (Tit. 2:13)! It is a purifying hope as well, since it weans the people of God from the tempting allurements of a godless world (1 Jn. 3:3). Christian hope involves also the anticipation of seeing and enjoying once again the loved ones who have died in the faith (1 Thess. 4:17) as well as meeting the saints of all the bygone ages. This is part of the gain that death brings (Phil. 1:21). Another aspect of the hope is the prospect of receiving a reward for faithful service rendered to the Lord. Paul looked forward to this (2 Tim. 4:8) and encouraged his converts to make whatever sacrifice was necessary in order to enable them to receive their imperishable crown (1 Cor. 9:24-27).

Salvation relates to the future no less than to the past and the present (Rom. 13:11). To those already justified by faith Paul can speak of waiting for the hope of righteousness (Gal. 5:5; cf. Rom. 8:10f.). This final phase of salvation involves the redemption of the body (Rom. 8:23) but also complete deliverance from the sinful nature that has plagued them during their earthly pilgrimage. Only on this basis can it be said that we shall be like Christ (1 Jn. 3:2; cf. Rom. 8:29). Yet it should be noted that the Christian's hope of experiencing the glory of God (Rom. 5:2) rests on his justification (Rom. 5:1) rather than on his sanctification (even though the development of Christian character adds an element of expectancy), since what God does in His own rests on what He has done for them. All believers are called to one hope (Eph. 1:18; 4:4); this is understandable in light of the fact that salvation, including its final, eschatological aspect, is a matter of grace rather than human attainment (1 Pet. 1:13). This gives a strength and constancy to the hope of believers that it could not have if it were conditioned on some element of human achievement.

In passing, it should be noted that hope respecting the future was not a characteristic of the pagan world. The word itself was seldom used. Often enough, when it was employed, it denoted something illusory. Burial inscriptions reveal no confidence regarding an afterlife. The best one could do was to face death without fear or regret. "I am of good courage, I who was not, and became, and now am not. I do not grieve" (*Inscriptiones Graece Siciliae et Italiae,* No. 1879, line 11). This inscription no doubt expresses the Stoic outlook. Paul assessed the situation accurately when he referred to such people as having no hope and without God in the world (Eph. 2:12; cf. 1 Thess. 4:13).

Christian hope, whether related to the return of Christ or to the heavenly inheritance, should not be regarded as a form of escapism. It relates to the fulfillment of the divine promise and is confirmed by the witness of the Spirit (Rom. 15:13).

The central feature of Christian worship is the Lord's Supper. As believers gratefully remember the Savior's sacrificial death on their behalf, it is their privilege to look forward to the marriage supper of the Lamb (1 Cor. 11:26).

The heavenly hope is reflected in the depiction of believers as already possessing a heavenly citizenship (Phil. 3:20), with the result that they are sojourners in this world (1 Pet. 2:11) awaiting their summons to a better land. A similar outlook characterized the OT saints whose faith gave them assurance of things hoped for (He. 11:1, 13). Christ's followers are in the world but not of it (Jn. 17:14). This does not imply isolation from unsaved society, making witness impossible, but only a determination not to be conformed to its ideals and manner of life. Believers belong to the (coming) day, so they are challenged to live a life of sobriety and alertness, ready for participation in eschatological salvation (1 Thess. 5:4-11; Rom. 13:11-14). They are expected as well to be sufficiently informed about the implications of their faith to be able to explain their hope to those who inquire about it (1 Pet. 3:15).

One may legitimately raise the question as to whether the passing of time without the return of the Savior led to the diminishing of expectation on the part of the Church. It is natural to suppose that this was the case, at least to a degree. Apparently the writer of the Epistle to the Hebrews detected such a tendency among his prospective readers and tried to counteract it. Whatever may be conjectured about the rank and file of believers, clearly the apostles and leaders of the Church continued to emphasize the promised return and to urge alertness and expectancy. Toward the end of his life, roughly a generation after Jesus' death and resurrection, Paul could affirm that the Christian community eagerly awaited a Savior from heaven (Phil. 3:20). Peter treats the promised revelation of Jesus Christ as imminent (1 Pet. 1:13; 4:13; 5:4). John

writes as though the coming could well be within his lifetime (1 Jr. 3:2f.). James pleads for patience in view of the apparent delay in the Lord's return, but holds fast to its factuality (5:7; cf. He. 9:28; 10:23-25, 37).

When the Gospels were published, a generation or more after the conclusion of our Lord's ministry, the Church received in these writings a reminder that the Master Himself promised to return, urging upon His followers the necessity of alertness and fidelity in view of that coming event (Mt. 24:42-44; 25:1-13; Jn. 21:22).

So hope was nourished despite the passing of the years. The Church apparently did not at this stage yield to complacency and begin to look on itself as a permanent institution with an indefinite tenure in the world.

2. In Relation to the Creation. In the notable passage Rom. 8:18-22 Paul draws a comparison between nature and man. As a consequence of the fall, man's environment was made subject to futility, being unable to realize the potential given to it originally by the Creator. Personifying the creation, the apostle pictures it as hoping and groaning, an experience similar to that of the believer as he awaits the coming transformation. Creation waits with eager longing for the revealing of the sons of God in their glorification, for that event will bring release from creation's present limitation (Rom. 8:19). Paul's teaching has affinity to that of Our Lord when He spoke of the regeneration or renewal of the world (Mt. 19:28).

3. Coordinates of Hope. The most noteworthy of these are faith and love (1 Thess. 1:3; 1 Cor. 13:13). In the former passage hope is put last because of its future reference. In the latter passage hope occupies the medial position and love is placed last for the reason that a final statement is to be made about love. The superiority of love is not due to its eternal character, since all three abide, but because it believes all things and hopes all things, and even more because it belongs to the essential nature of God. Since the chapter has love for its theme, no compulsion rested on the apostle to refer to faith and hope. Their close affinity to love made it natural for him to do so.

The absence of hope from Paul's list of the fruit of the Spirit (Gal. 5:22f.) is not strange, since the enumeration is representative rather than complete ("such" is used rather than "these"). Furthermore, "patience" implies hope.

In another setting the apostle asserts that hope does not disappoint for the reason that God's love has been poured into our hearts through the Holy Spirit (Rom. 5:5). This constant ministration of love assures us that the hope of experiencing it in glory is no illusion.

Hope and love are mutually and intimately involved in the expectation of the Lord's return. Paul looks forward to receiving the crown of righteousness that the Lord will award to him and to all who have loved His appearing (2 Tim. 4:8).

The connection between hope and faith is especially close. Hope depends on faith and is its forward-looking aspect. This is made clear by the definition of faith in He. 11:1 and by numerous examples from the lives of OT figures (vv. 10-23). With reference to Christ we read, "Through him you have confidence in God, who raised him from the dead and gave him glory, so that your faith and hope are in God" (1 Pet. 1:21).

Hope's linkage with steadfastness (or endurance) in 1 Thess. 1:3 is significant (cf. 2 Thess. 1:3f.). Endurance takes account of the length of the journey to be made and the obstacles along the way, but it gains its inspiration and strength from the vitality of hope.

Joy is an accompaniment of hope (Rom. 5:2). In the same letter Paul prays, "May the God of hope fill you with all joy and peace in believing, so that by the power of the Holy Spirit you may abound in hope" (15:13). This amounts to saying that hope is not only the inspiration for joy and peace but also the end result. It is both cause and consequence.

4. Symbols of Hope. First, it is described as an anchor of the soul (He. 6:19). Using the pattern of the tabernacle for the structuring of his thought, the writer pictures Christ as having passed through the inner veil by His ascension so that He is now in the presence of God. Whereas in human experience the anchor rope reaches down into the watery depths to where the anchor holds fast at the bottom, giving security to the ship from stormy winds, Christ has entered the unseen realm by proceeding to heaven. There He constitutes our hope, both sure and steadfast. This is explained in terms of His high-priestly ministry.

Excavations of the catacombs in the area around ancient Rome have disclosed that along with other symbols of the Christian faith such as the fish and the shepherd, the anchor was widely used. It expressed confidence that despite all the adverse winds of ill fortune and persecution, the believer would be preserved for the heavenly kingdom and would meet the Savior face to face.

A second symbol of hope is the helmet (1 Thess. 5:8; Eph. 6:17). In both passages Paul links it with (eschatological) salvation. In Ephesians the setting is one of conflict with the powers of darkness in the spiritual realm. However strong the foe, the Christian need not fear, since the hope of completed salvation provides a sure defense against all attacks of the evil one.

C. Book of Revelation. Superficially the absence of the word hope from this book may seem strange and disappointing, for it is so replete with victory and glory. But one should take into account that the writer is "seeing" the eschatological glory in the unveiling of Christ's victory over evil powers both human and superhuman. He is caught up in the assurance of prophetic fulfillment. He is standing for the time being amid the realities of the golden age, so there is no need for an expression of hope. This does not mean that the concept of hope is excluded, for it appears under the guise of endurance (e.g., 13:10; 14:12).

V. The "Larger" Hope.—This caption is sometimes given to the view that ultimately all mankind will be saved, not only those who have not heard the gospel but also those who have rejected it. Advocates of this position could argue that God withholds any plain indication of His purpose to do this lest people be content to rest in confidence that their eternal welfare is secure and therefore plan to enjoy the best of both worlds, self-satisfaction here and eternal life with God hereafter. But it is hazardous to posit any such reticence on the part of God in view of the clear teaching of Scripture that some "shall suffer the punishment of eternal destruction and exclusion from the presence of the Lord" (2 Thess. 1:9). If this sounds harsh, one should reflect on the fact that God's Son, the embodiment as well as the messenger of the love of God, addressed Himself to the theme of judgment without any vagueness or equivocation (e.g., Mt. 25:46). One could argue that "eternal" means age-long, something short of endless duration, and on this basis suppose that after punishment had run its course God would welcome the offenders by pardoning their transgressions. But this line of reasoning would cast doubt on the duration of eternal life for the saved, since the word "eternal" is the same in both situations. Furthermore, we know that God does not force His salvation on anyone. We have no evidence that punishment endured by sinners prepares them to accept God's forgiveness in case it should be offered. The linking of gnashing of teeth with weeping may well suggest continuing anger and rebellion as well as pain (Mt. 13:42, 50).

Appeal to Christ's preaching to the spirits in prison

(1 Pet. 3:19) is also dubious, because those who are indicated as the objects of the preaching, namely, those who were disobedient in Noah's time, can hardly be thought of as human, since the word "spirits" when used without further description (contrast He. 12:23) is not used of human beings in the NT but rather of evil spirits (e.g., Lk. 9:39). So 1 Pet. 3:19 should probably be linked to Gen. 6:2 (cf. 2 Pet. 2:4; Jude 6). Furthermore, the word rendered "preached" does not strictly mean that Christ preached the gospel (good news) to the spirits in prison, since it literally means "to proclaim." It could indicate an announcement of His triumph over all the hosts of darkness (cf. 1 Pet. 3:22; Col. 2:15).

Some would ground the hope of universal salvation on Paul's statement, "Then as one man's [Adam's] trespass led to condemnation for all men, so one man's [Jesus Christ's] act of righteousness leads to acquittal and life for all men" (Rom. 5:18). One needs to take into account the full sweep of Paul's teaching on sin and righteousness. All men do in fact share the consequences of Adam's disobedience, namely, sin and death, but a person comes to share in the benefits of Christ's saving work only on the basis of faith in Him. This limitation of the second statement about "all men" (v. 18) to the believing portion of mankind is not arbitrary exegesis. A parallel exists in the apostle's teaching on resurrection. "For as in Adam all die, so also in Christ shall all be made alive" (1 Cor. 15:22). The following sentence limits those who will be made alive to those "who belong to Christ." Nothing is said in the chapter about the resurrection of the unsaved. Nothing is said elsewhere in the NT to the effect that the resurrection of the unsaved will lead to eternal life (Jn. 5:28f.).

The consensus of Scripture is that life on earth is the theater wherein one's eternal destiny is determined (2 Cor. 6:2; He. 9:27). It is not kindness to raise false hopes by holding before people the possibility that despite their refusal to put their faith in Christ during this life they can count on God's love to set aside the verdict against them, enabling them ultimately to share in salvation. To glorify such an opinion by putting on it the label of hope is unfortunate and misleading. *See also* PAROUSIA; GLORY; ESCHATOLOGY.

HOPHNI hof'nī, hof'nē, and **PHINEHAS** fin'ē-əs [Heb. *ḥopnî* < Egyp. *ḥfn(r)*, "tadpole"; Heb. *pinḥās* (1 S. 1:3), *pîn^{e}ḥās* < Egyp. *p' nḥsy*, "the Negro/Nubian"]. Sons of Eli, priests of the sanctuary at Shiloh. Their character was wicked enough to merit the designation "worthless men" (AV "sons of Belial," 1 S. 2:12). Their evil practices are described in vv. 12-17. Twice Eli was warned concerning them, once by an unknown prophet (vv. 27-36) and again by the lips of the young Samuel (3:11-18). The curse fell at the battle of Aphek (4:1-18) at which the brothers were slain and the ark was taken; these events caused Eli's death. Phinehas was father of the posthumous ICHABOD, whose name marks the calamity. A remoter sequel to the prophetic warnings is seen in the deposition of Eli's descendant Abiathar from the priestly office (1 K. 2:26f., 35).

HOPHRA hof'rə [Heb. *ḥopra'*; Gk. *Houaphrē*; Egyp. *Ḥa'a'ibrē'*; *Waḥibrē'*]. The Apries of the Greeks (e.g., Herodotus ii.169), the fourth king of the 26th Dynasty, who ruled 589-570 B.C. Heb. *Ḥopra'* is derived from Egyp. *(Wa)ḥibrē'*, the king's personal name.

In 589 B.C., Zedekiah of Judah broke his solemn oath of loyalty to Babylon and sent for troops to Egypt (Ezk. 17:11-21), heedless of what had befallen Jehoiachin in 597 B.C. Nebuchadrezzar II of Babylon promptly laid siege to Jerusalem, and Hophra in turn invaded Palestine in support of Zedekiah (Jer. 37:5; cf. 47:1?), possibly with his fleet (cf. Herodotus ii.161). The Babylonian army then left Jerusalem to fight Hophra, but Hophra appears to have retired, leaving the Jews in the lurch as prophesied by Jeremiah (cf. Jer. 37:5-11). At this time (*ca.* 588 B.C.) Ezekiel (29:1-16) added his voice in condemnation of Egypt.

Hophra appears only once more in the OT, and this time by name; at some time after the final fall of Jerusalem (587/586 B.C.), Jeremiah prophesied that God would "give Pharaoh Hophra king of Egypt into the hand of his enemies and into the hand of those who seek his life" (44:30). This was fulfilled in 570 B.C., after Hophra had sent an army to help the Libyans against the Greek colony of Cyrene. The Egyptian force was overwhelmingly defeated, and the Egyptians accused Hophra of having sent their countrymen to their deaths and of unduly favoring the Greeks. Revolt broke out, and Amasis became its leader, defeating and capturing Hophra. Hophra was then probably put to death; at any rate, soon afterward he was buried as befitted a pharaoh by Amasis his successor.

Several monuments of Hophra are known (e.g., a palace-fort at Memphis; see W. M. F. Petrie, *Palace of Apries [Memphis II]* [1909]), but they add very little to our knowledge of his foreign adventures.

HOPPER. *See* LOCUST.

HOR hôr [Heb. *hōr hāhār*–'Hor the mountain'].

1. An elevation on the border of Edom where Aaron died and was buried (Nu. 20:22; Dt. 32:50; etc.). The name always appears with the definite article, suggesting that it was a prominent mountain ridge. It is sometimes alleged that two traditions conflict regarding the place where Aaron died and was buried, Dt. 10:6 stating that these events occurred at Moserah. There is, however, neither conflict nor a double tradition, for the name Moserah (Moseroth), meaning "chastisement(s)," was applied to the event, not the location, of Aaron's death. As punishment for the Meribah incident (Nu. 20:24; Dt. 32:51) he died in Edom on Mt. Hor, while the people were encamped below. To mark the occasion, the incident and the campsite were called Moseroth (Nu. 33:30f.).

Josephus (*Ant.* iv.4.7) identified Mt. Hor with one of the heights in the vicinity of Petra, localized traditionally in Jebel Nebī Harun, the "mountain of Aaron," a lofty, twin-crested sandstone peak some 1460 m. (4800 ft.) high. It lies to the west of Edom, and is by far the most rugged of the Edomite mountains. Its summit holds a tomb allegedly belonging to Aaron, the upper part of which is a Moslem mosque. The tomb itself, however, is probably a reconstructed Christian church from the time of Justinian (A.D. 527-565). Any tradition that places Mt. Hor in the middle of Edomite territory and not on the border (Nu. 20:22) is open to serious objections. Since the Edomites were able to deny the Israelites access to their territory, and could implement their decision with a powerful border force (Nu. 20:17-21), Israel could not have reached Jebel Nebī Harun without crossing Edom, which was clearly impossible. Furthermore, such a location is too far

from Kadesh, and the mountain itself would be too lofty and inaccessible for the Hebrews to witness the ceremony by which high office was transferred from father to son (Nu. 20:22-29).

Jebel Madurah, a site about 24 km. (15 mi.) NE of Kadesh, has been suggested as a more likely location for Mt. Hor. This height stood at the extreme northwest boundary of Edom, though strictly outside Edomite territory. Topographically it is more suitable, since Israel began the detour around Edom at Mt. Hor (Nu. 21:4), and the entire area was more accessible for witnessing the ceremony involving transfer of religious office. Insufficient evidence, however, makes the identification of Mt. Hor uncertain.

2. A mountain peak (Nu. 34:7f.) marking the northern limit of Israel. Both Mt. Hermon and Jebel Akkar, a spur of Lebanon, have been suggested. R. K. H.

HORAM hō'ram, hôr'əm [Heb. *hōrām*–'height']. A king of Gezer who tried to help Lachish, which Joshua was besieging (Josh. 10:32), but was himself defeated by Joshua (v. 33).

HOREB hō'reb, hôr'əb. *See* SINAI.

HOREM hō'rem, hôr'əm [Heb. *ḥorēm*–'consecrated']. One of the fenced cities in the territory of Naphtali (Josh. 19:38), named with Yiron, Migdal-el, Beth-anath, and Beth-shemesh. Thus it was probably in northern Galilee, though its precise location remains unknown.

HORESH hō'resh, hôr'əsh [Heb. *hōreš*–'wood, forest'] (1 S. 23:15-19); AV WOOD. The name evidently referred to a location in the Wilderness of Ziph (although it is doubtful that this land was ever wooded) where David was hiding from Saul. It was in this area that David and Jonathan entered into a solemn agreement. Khirbet Khoreisa, a ruined site some 3.2 km. (2 mi.) from Tell Zîf (9.6 km. [6 mi.] SE of Hebron) has been associated with David's exploits at this time, although this association is speculative. Note that the LXX *tḗ Kainē* presupposes Heb. *ḥ^{a}dāšâ* or *ḥāḏāš*, "new," which could be confused with *hōreš*.

HOR-HAGGIDGAD hôr hə-gid'gad [Heb. *ḥōr haggidgāḏ*]. A place of encampment in the wilderness journeyings, listed between Bene-jaakan and Jotbatah (Nu. 33:32f.). In a parallel account in Dt. 10:6f., the campsite is called GUDGODAH, and is listed between Moserah and Jotbatah. In the account in Numbers, Moserah appears as Moseroth (plural form of the same word), and Bene-jaakan is placed between Moseroth and Hor-haggidgad. The LXX in both passages reads *Gadgad*. The attempted identification of either form of the name with *Wâdī Ghadhaghedh* or *Khadhâḥed* (cf. *GP*, II, 216) is phonemically improbable. W. S. L. S.

HORI hôr'ī [Heb. *ḥôrî, ḥōrî*–'cave-dweller'].

1. A Horite descendant of Esau (Gen. 36:22; 1 Ch. 1:39).

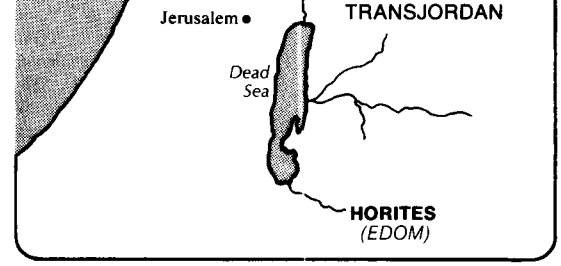
2. A Simeonite, father of Shaphat one of the twelve spies (Nu. 13:5).

HORITES hō'rīts [*ḥōrî*, pl. *ḥōrîm*; LXX *Chorraioi*]. The original inhabitants of Edom (Gen. 36:20-30) before the area was occupied by the Edomites, the descendants of Esau, who displaced them (Dt. 2:12, 22). They are also included among the peoples defeated by Chedorlaomer (Gen. 14:6). Their ancestor is given as Seir, the Horite (Gen. 36:20).

The identification of the biblical Horites with the extra-biblical HURRIANS is one that has frequently been made and has much at first glance to commend it. The Hebrew name *ḥōrî* is the equivalent of cuneiform *Ḫurru* (Ugar. *ḥry*), and the Hurrians are known to have been present in Palestine prior to the entry of the Israelites. A closer examination of the evidence, however, shows that the identification is fraught with difficulties. Hurrians first appear in the ancient Near East *ca.* 2300 B.C., entering northwestern Mesopotamia from the general region of the Armenian mountains around Lake Van. Prior to 2000 B.C. they are limited to the northern part of the east Tigris region, but in succeeding centuries their penetration continues with ever increasing speed and numbers into Mesopotamia. By 1500 B.C. they had inundated northwestern Mesopotamia and northern Syria and created the empire of Mitanni, whose brief hegemony controlled states from the Mediterranean to E of the Tigris River. Although their political control was short-lived, Hurrian immigration continued into southern Syria, reaching Palestine itself in the 15th cent. B.C., as sporadic references to Palestine as "Ḫurru-land" in texts of the pharaohs of the 18th Dynasty reveal. The more frequent use of this name in texts of the 19th Dynasty and the presence of a number of Mitanno-Hurrian names in the Amarna Tablets show that they reached Palestine in significant numbers by the 14th cent. B.C. The extent and depth of this penetration into Palestine remains difficult to assess, however, due to the paucity of the evidence. It is probable, nonetheless, that their presence and influence in Palestine were minimal, consisting mainly of a military aristocracy imposed at the upper levels on some of the city-states. The Hurrian substratum which appeared by this period everywhere N of the Beqa^{c} in central Syria left no trace in the contemporary texts from Palestine. From documentation we know that the cities that were ruled by Mitanno-Hurrian overlords, or had such elements in their population, were all in Cisjordan and primarily in the north and the coastal region: Jerusalem, Shechem, Taanach, Megiddo, Acco, Achshaph, and in the south Ashkelon and possibly Hebron.

This evidence for the minimal presence of Hurrians in Palestine, and only in northern and coastal Cisjordan, presents difficult problems for identifying them with the biblical Horites. The Horites are confined to Edom in southern Transjordan and the names given in Gen. 36 are all Semitic. Further, the Bible locates Hivites in the areas where the extrabiblical evidence documents the presence of Hurrians: HIVITES dwell at Shechem (Gen. 34:2), Gibeon (Josh. 9:7; 11:19), the mountains of Lebanon (Jgs. 3:3), and the valley below Hermon (Josh. 11:3, 8). The matter is further complicated by textual problems: in Gen. 36:2 the Hebrew text identifies Zibeon, son of Seir the Horite (Gen. 36:20, 29), as a Hivite, and some LXX texts read Horites for Hivites in Gen. 34:2 and Josh. 9:7.

The resolution of this conflicting evidence is not appar-



ent, although several different hypotheses have been advanced. Some scholars suggest that the two very similar names "Hivites" and "Horites" have been exchanged and simply reverse them. But such a desperate expedient is hardly satisfactory. Others, accepting the LXX reading of Horites for Hivites in Gen. 34:2 and Josh. 9:7 as correct, regard the two as synonyms, or hypothesize two homophonous names of different origin, the Semitic "Horites" of Edom and the non-Semitic "Horites" (i.e., "Hurrians") of north-central Cisjordan. The biblical writers, attempting to make a distinction, replaced the "Horites" (i.e., Hurrians) of Cisjordan with "Hivites," a name of local origin. Although preferable to the first hypothesis, this view is weakened by its reliance on textual variants that are most probably mistaken readings. Thus, the Bible uses the names Hivites and Horites in a consistent manner to designate two peoples, and, apart from Gen. 34:2 and Josh. 9:7, the LXX agrees with the MT in the more than twenty other places where the two names occur. Further, several versions support the MT (Aquila and Symmachus in Gen. 34:2; the Old Latin, the Syriac, the Ethiopic translations, and several MSS of the LXX in Josh. 9:7). It is also important to note that the Shechemites in Gen. 34 have Semitic names and are identified as Canaanites in v. 30; and the Gibeonites are identified as Amorites in 2 S. 21:2.

One more recent hypothesis views "Hivite" as a spelling variant or confusion for "Horite." The evidence for this view is that "Hivites," an ethnic term unknown elsewhere, occurs in twenty of the twenty-two lists of conquered peoples, while "Horites" (Hurrians), known to have been present in Cisjordan, never occurs in the lists, and that the names Hivite and Horite are close in biblical Hebrew (*ḥwy* and *ḥry*). This last point, however, is weak, since the *w* and *r* were never easily confused in Hebrew.

The most recent (and most likely) hypothesis to date treats the question as a special case of the general problem of the use made by the Israelites of the nomenclature they met in Palestine when they occupied it. For Cisjordan they adopted the Egyptian administrative term for that region, "Canaan," and they applied the term "Amorite" to northern and central Transjordan (as well as using it as a general term for all of Palestine, as they also used "Canaan"). Since the received nomenclature had no term for southern Transjordan (prior to the arrival of the Edomites), the Israelites used the term "Horite," i.e., *Ḥurru*, another general and imprecise term in Egyptian usage for the whole region.

HORMAH hôr'mə [Heb. *ḥormâ*–'devotion,' 'destruction']. A city first mentioned in connection with the defeat of the Israelites by the Amalekites and the Canaanites after the Israelites decided that they had made a mistake in not accepting the report of Joshua and Caleb that favored entering the land. Attempting to reverse their decision, the Israelites persisted against the will of Moses in going "up to the place which the Lord has promised," but were defeated (Nu. 14:40-45; Dt. 1:44). Later during the wilderness experience, Israel, at war with the king of Arad, took the place and utterly destroyed it and thus named it Hormah (Nu. 21:3). It was apparently rebuilt and is listed as one of the places conquered by Joshua (Josh. 12:14). Hormah was in the territory assigned to Judah (15:30); but it was reassigned to Simeon (19:4). Jgs. 1:17 relates that Judah and Simeon together once more subdued the Canaanites and destroyed Hormah. To Hormah David sent a share of the spoil taken from the Amalekites who had raided Ziklag (1 S. 30:30). It was reckoned as one of the cities of Simeon until the days of David (1 Ch. 4:30). Its location has been variously conjectured. W. F. Albright (*BASOR*, 15 [Oct. 1924], 6f.) suggested Tell esh-Sheri'ah, about 19 km. (12 mi.) NW of Beer-sheba; B. Mazar (*JNES*, 24 [1965], 297-303) identified it with Tell el-Milḥ, about 13 km. (8 mi.) SW of Tell 'Arâd; and most recently, Y. Aharoni (*EAEHL*, I, 88f.) has argued for Tell Meshash, about 6 km. (3.7 mi.) W of Tell el-Milḥ.

HORN [Heb. and Aram. *qeren*]; AV also CORNET; NEB also "mountain fastness" (2 S. 22:3 par. Ps. 18:2 [MT 3]), HEAD (e.g., Ps. 89:17 [MT 18]), TRUMPET, etc.; [Heb. *qāran*–'have horns'] (Ps. 69:31 [MT 32]); [*šôpār*] (Josh. 6:4, 6, 8, 13; 2 S. 6:15); AV, NEB, also TRUMPET; [*tô'āpôt*] (Nu. 23:22; 24:8); AV STRENGTH; NEB CURVING HORNS; [Gk. *kéras*] (Lk. 1:69; Rev. 5:6; 9:13; 12:3; 13:1, 11; 17:3, 7, 12, 16); NEB also "victorious power." *Qeren* is the general term for "horn," whether on the animal, as a musical instrument or noisemaker, as a container for liquids, as part of the whole offering and incense altars, or as a symbol of power associated with men.

Portrayal of gods with horns was common throughout the ancient Near East. The horns may have symbolized the power of the deity of the holy place, but it is not known if Yahweh was depicted with horns. *See also* ALTAR; HORNS OF THE ALTAR.

"Horn" is used figuratively to suggest aggressive power, e.g., in robbing one of power ("Moab's horn is cut off," Jer. 48:25; Ps. 75:10 [MT 11]) or bestowing power ("exalt the horn," Ps. 92:10 [MT 11]). Likewise "horn" symbolizes the power of kingship (Dnl. 7:7f., 11f., etc. where the succession of horns means the succession of kings; Ps. 132:17). The power can be abused ("thrust at the weak with your horns," Ex. 34:21), or called to use for the people (2 Ch. 18:10; 1 K. 22:11), or used to destroy (Zec. 1:19, 21). The horn is also used to represent two aspects of the divine: salvation (Ps. 18:2; 2 S. 22:3) and power (Hab. 3:4).

The horns used for musical instruments and noise makers (1 Ch. 15:28; Ps. 98:6) are traditionally ram's horns (T.B. *Rosh ha-Shanah* 26a). Cow's horns were forbidden for ritual (military or religious) purposes. *See also* MUSIC.

Bibliography.–R. de Vaux, *Ancient Israel* (Eng. tr. 1961), II, 414; H. Obbink, *JBL*, 68 (1949), 43-49. A. L. PERLMAN

HORNET [Heb. *ṣir'â*; Arab. *ḍar'a*]; NEB PANIC. Hornets, like wasps (which are smaller in size), belong to the family *Vespidae* of the order *Hymenoptera*. In Palestine, the commonest hornet species is the *Vespa orientalis*, a large yellow or reddish-brown insect which will sting anyone who molests it. As is frequently the case in the western world, hornets live in clusters in roundish, multicelled nests made from a type of cellulose which the hornets produce by chewing the bark of trees. Hornets are mentioned only in Ex. 23:28; Dt. 7:20; and Josh. 24:12, all of which refer to God's miraculous intervention on His people's behalf in dispossessing the indigenous inhabitants of the Promised Land. In these passages the hornet seems to be used in a dramatic metaphorical sense to show how God's onslaught would render the Canaanites immobile, just as the hornet's sting paralyzed its victim. An analogous usage occurs in Isa. 7:18, where the fly and the bee symbolize the military might of Egypt and Assyria.

R. K. H.

HORNS OF THE ALTAR [Heb. *qarnōṯ* (or *qarnôṯ*) *hammizbē(a)ḥ*]. Projections at each of the four corners of the altar of burnt offering (Ex. 27:2; 38:2; Ezk. 43:15) and of the altar of incense (Ex. 30:2f.; 37:25f.). In both cases they were to be of one piece with the altar. Blood was smeared on the horns of the altar of burnt offering at the consecration of Aaron and his sons (Ex. 29:12), in the sin offering for a ruler (Heb. *nāśî'*) or for one of the people (Lev. 4:25, 30, 34), and on the Day of Atonement (Lev. 16:18). The horns of the altar of incense were smeared with blood in the case of sin offerings for the high priest and the congregation of Israel (Lev. 4:7, 18). Fugitives seeking asylum could cling to the horns, thus putting themselves under the divine protection (cf. 1 K. 1:50-53; 2:28; an addition in the LXX [2:29] reads, "I fled to the Lord"), though not in the case of wilful murder (1 K. 2:31-34; cf. Ex. 21:14); the horns appear to epitomize the holiness of the altar. The cutting off of the horns in Am. 3:14 signifies the removal of Israel's last refuge from God's judgment. *See also* ALTAR.

The most significant suggestions concerning the nature of the horns are: (1) that they represent the horns of beasts actually offered in sacrifice (W. R. Smith, *Religion of the Semites* [3rd ed. 1927], p. 436 n.); (2) that they are stylized representations of Heb. *maṣṣēḇôṯ*, or pillars representing deity in Canaanite religion (H. Gressmann, *Die Ausgraben in Palästina und das AT* [1908], p. 28; J. R. Porter, *Leviticus* [1976], p. 38; against this view, see H. T. Obbink, *JBL*, 56 [1937], 43-49); (3) that the animal to be sacrificed was tied to them with cords; the only support for this view is found in Ps. 118:27, which is textually uncertain; it is also unclear why such binding would be necessary, and why the incense altar was also horned, unless Aharoni is correct (see below); (4) that they are the extremities which stress the holiness of the altar, being smeared with blood in the same way as the extremities of priests' bodies were (R. de Vaux, *Ancient Israel* [Eng. tr. 1961], II, 414); yet this does not explain the existence of the "horns" as such; (5) that the altar itself was symbolic of the deity who was often portrayed with horns (Obbink, *op. cit.*); in this case, Israel would have shared the form of the altar with her neighbors, but not its religious implications.

Altars with horns (i.e., vertical corner projections) have been discovered at such sites as Gezer (H. Gressmann, *Altorientalische Bilder* [1927], fig. 444), and Megiddo (H. G. May, *Material Remains of the Megiddo Cult* [1935], pp. 6-8 and illustration, pp. 12f. and plate xii; *AP*, plate 19), and more recently at Beer-sheba (Y. Aharoni, *BA*, 37 [1974], 2-6; Y. Yadin, *BASOR*, 222 [Apr. 1976], 11-17) and Dan (A. Biran, *BA*, 37, 106f.). These are of different sizes and dates; some are incense altars. Aharoni regards the latter as imitations of the altars of burnt offering. An Ugaritic sacrificial text perhaps speaks of "the horns of the table" (*qrnt ṯlḥn*, C. Virolleaud, *Ugaritica*, V [1968], 592f.), but the text is read differently by J. C. de Moor (*Ugarit-Forschungen*, 2 [1970], 323). According to Josephus, the altar of Herod's temple had "horn-like corner projections" (*BJ* v.5.6 [225]). For later representations of horned altars, see the references in S. A. Cook, *The Religion of Ancient Palestine in the Light of Archaeology* (1930), pp. 29-31, 160, 177 n.; see also O. Keel, *Symbolism of the Biblical World* (Eng. tr. 1978), p. 146. E. BALL

HORNS, RAMS'. *See* MUSIC.

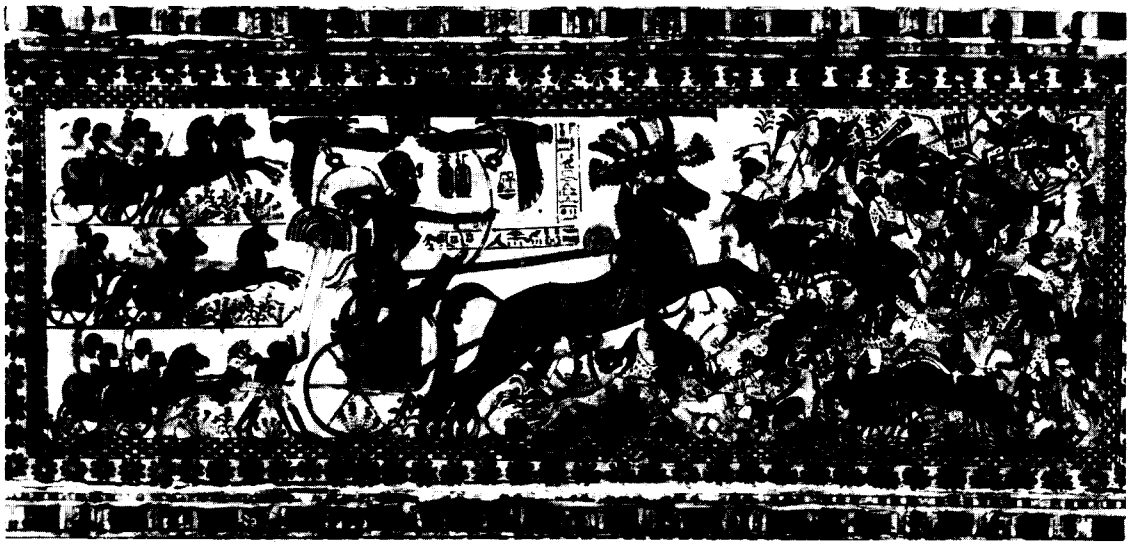
HORONAIM hôr-ə-nā'əm [Heb. *ḥôrōnayim*–'two hollows']. A place in the south of Moab, close to Zoar, lying at the foot of a plateau (2 S. 13:34). It is mentioned on the Moabite Stone (line 32) as a city to which one descends. Isa. 15:5 speaks of "the way to Horonaim," and Jer. 48:5 of the "descent" or "going down" of Horonaim. Mesha says he was bidden by Chemosh to "go down" and fight against *Ḥwrnn* (Moabite Stone, lines 31f.). Probably, therefore, it lay on one of the roads leading down from the Moabite plateau to the Arabah. It is mentioned by Josephus as having been taken by Alexander Janneus (*Ant.* xiii.15.4 [395-97]). Hyrcanus promised to restore it, along with eleven other cities his father had taken from the Arabians, to Aretas (*Ant.* xiv.1.4 [14-18]). There is no indication that in early times it was ever possessed by Israel. It is probably to be identified with el-ʿAraq. D. B. PECOTA

HORONITE hor'ə-nīt [Heb. *ḥōrōnî*]. An appellation given to Sanballat, one of those who opposed Nehemiah (Neh. 2:10, 19; 13:28). It probably denotes that he was an inhabitant of BETH-HORON.

HORROR [Heb. *šammâ* (Dt. 28:37; Jer. 18:16; 19:18; 25:9; 42:18; Ezk. 23:33; etc.), *mᵉšammâ* (Ezk. 5:15), *zᵉwāʿâ* (Dt. 28:25; 2 Ch. 29:8; Jer. 15:4; 24:9 [*Q zaʿᵃwâ*]; 29:18; 34:17), *pallāṣûṯ* (Ps. 55:5 [MT 6]; Isa. 24:4; Ezk. 7:18), *tôʿēḇâ* (Ps. 88:8 [MT 9]), *mᵉḥittâ* (Jer. 48:39), *tipleṣeṯ* (Jer. 49:16), *śaʿar* (Job 18:20)]; AV also ASTONISHMENT, DISMAYING, DESOLATION, etc.; NEB also REPUGNANT, LOATHSOME, RUIN, SHUDDER, etc.; **HORRIBLE** [Heb. *šaʿᵃrûr* (Jer. 5:30; 23:14), *šaʿᵃrûrî* (Jer. 18:13; Hos. 6:10)]; NEB also OUTRAGE (Jer. 5:30); **HORRIBLY** [Heb. *śaʿar*] (Ezk. 27:35); AV SORE AFRAID; **HORRIFY; HORRIFIED** [Heb. *šāmēm* (Jer. 18:16; 19:8; 49:17; Ezk. 20:26)]; AV also ASTONISHED, MAKE DESOLATE; NEB also LAY WASTE.

A people or territory punished by God may become a "horror" in that observers are horror-struck by the enormity of its devastation. This sense is frequent in the book of Jeremiah.

The Heb. *pallāṣûṯ* and *tipleṣeṯ* are derived from *pālaṣ*, "shudder," and hence denote a shaking of the body due to fear or amazement. Similar is Heb. *zᵉwāʿâ*, "a trembling," "object of trembling," from *zûʿ*, "tremble, quake" (cf. Hab. 2:7; Eccl. 12:3; Est. 5:9). Heb. *śaʿar* means a bristling of one's hair (Heb. *śēʿār*) in horror. Heb. *tôʿēḇâ*, "abomination," comes from the verb *tāʿaḇ*, "be abhorred." The nouns *šammâ* and *mᵉšammâ*, from *šāmēm*, "shudder," "be deserted," or niphal, "be made to shudder," "be desolate," can designate the ruin and lifelessness of a devastated territory, as well as the analogous bodily manifestations of horror. The context is the criterion for the meaning, and it is sometimes ambiguous (e.g.,



Box from the tomb of Tutankhamen (1361-1352 B.C.). The pharaoh in his chariot leads an attack against Asiatics (Service des musées, Cairo)

Jer. 25:9; 51:37, 43; Ezk. 23:33; 2 K. 22:19; Mic. 6:16; etc.).

The RSV's "horror" in Ps. 31:11 (MT 12) is based on an emendation of the difficult Heb. *mᵉ'ōḏ* (usually "very"; cf. AV "especially"), presumably to *māgôr*, "terror" (cf. Jer. 20:3, 10), or *mōrā'*, "fear." The NEB's "burden" requires only a revocalization to **mā'ōḏ*, but this word is otherwise unattested (cf. G. R. Driver, *JTS*, 32 [1931], 256; KD *in loc.*).

See N. Lohfink, *VT*, 12 (1962), 267-69.

HORSE [Heb. *sûs*; Ugar. *ssw*; Akk. *sisû*; Egyp. *ssmt*] (Ex. 15:1; etc.); [Heb. *'abbîr*; Egyp. *ibr*]; RSV "steeds" (Jgs. 5:22), "stallions" (Jer. 8:16); AV "mighty ones," "strong ones," "bulls" (Jer. 50:11); NEB "chargers"; [Heb. *reḵeš*]; RSV "steeds" (Mic. 1:13), "swift horses" (Est. 8:14), "swift steeds"; AV "swift beasts"; [Gk. *hippos*] (Jas. 3:3; Rev. 9:9; 14:20; 18:13; 19:18). The most common is Heb. *sûs*, often occurring in parallelism with *'abbîr*. Heb. *rakkāḇ* usually refers to the rider or charioteer (e.g., 1 K. 22:34) and not to the animal being ridden. The RSV translates Heb. *pārāš* as "horsemen" (2 S. 8:4), or "war horses" (Ezk. 27:14; Joel 2:4); the AV has "horsemen"; the NEB "cavalry." *Rōḵēḇ hassûs* (2 K. 9:18) and *'al-hassûs* (Est. 6:9) are translated "horseback" by the AV and RSV and "horseman," "mounted" by the NEB.

Canticles 1:9 has textual difficulties; the RSV translates *sûsâ* as "mare," and the AV and NEB as "horses." Also difficult is Est. 8:10, where the RSV renders *rammāḵâ* as "royal stud," the AV "young dromedaries," and the NEB "royal stables."

In two instances the meaning of city names has retained etymological associations with horses: Hazarsusah (Heb. *ḥᵃṣar sûsâ*, "village of a mare," Josh. 19:5), and Hazarsusim (Heb. *ḥᵃṣar sûsîm*, "village of horses," 1 Ch. 4:31).

I. Horses in the Ancient Near East.—The original home of the horse appears to have been the steppes of Central Asia. References to horses are found in Cappadocian and Mitanni records at the beginning of the 2nd millennium B.C. in northern Mesopotamia. The Kassites in Babylonia also used the horse. The first reference to the horse in the eastern Mediterranean region occurred during the Hyksos rule in Egypt (18th-16th cent. B.C.). It is assumed that the horse was introduced to Egypt at that time. The Amarna Letters (14th cent. B.C.) mention horses in Palestine, although it seems clear that Israel did not rely upon the horse in warfare until the time of Solomon (see II.A below). Horses were trained to carry horsemen or pull chariots and represented a great advance over the foot soldiers. The Egyptians bred horses especially for war and sold them to other countries unable to raise enough horses for their armies (1 K. 10:29). Because of its military use the horse was associated primarily with the ruler and the state army (cf. Eccl. 10:7). Eventually cavalry systems developed as the use of horses in battle became regularized.

II. Biblical Uses of Horses.—Certainly the primary contextual connotations for horses in the Bible are dependent upon their use in war. Nevertheless, a few instances suggest a less glamorous domestic role. In addition, in a variety of contexts the horse is used to convey a broader figurative or symbolical meaning.

A. Military Use. Many passages refer to the characteristics of the horse in battle. He is swift (Jer. 12:5) and sure-footed (Isa. 63:13); he is determined, and oblivious to others when charging in battle (Jer. 8:6). Horses are, nevertheless, capable of being panicked by Yahweh (Zec. 12:4). The most magnificent description of the war-horse occurs in Job 39:19-25, where the might, leaping ability, terrible snorting, fearlessness, ability to carry many weapons, fierceness, and desire for battle are all mentioned. It is clear from these references that the horse was a valuable and fearsome resource for the armies of the Near East. Horses were, as noted above, usually described as the property of the king (Est. 6:8f.; 1 K. 4:26, 28 [MT 5:6, 8]; 10:25; etc.).

The majority of references to horses in the Bible are concerned with them as the specific property of one nation or another. In the Mosaic period the horses of the Egyptians are mentioned frequently as illustrative of the might of Egypt and the greater power of God (Ex. 15:1, 21; Dt. 11:4; etc.). In the periods of the occupation and of the judges it was the enemies of Israel, the Canaanite city-states, that possessed horses (Josh. 11:4; Jgs. 5:22). For a variety of practical and theological reasons (Dt. 20:1; Josh. 11:6, 9) the tribes did not employ horses in their battles at this time.

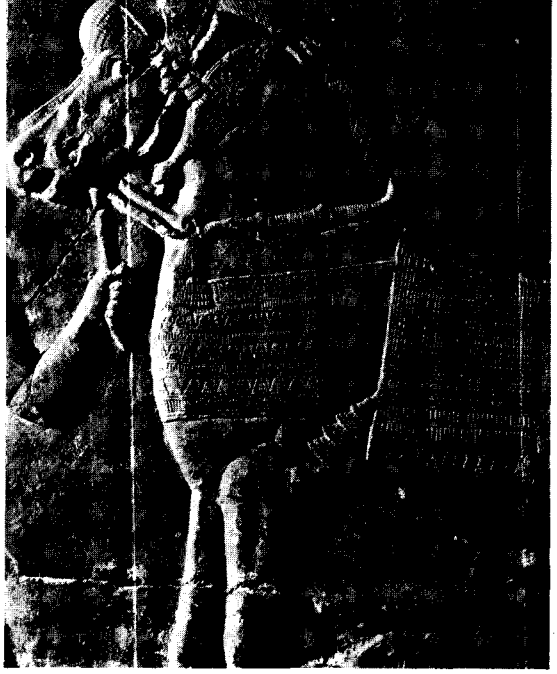
With the increasing threat posed by the Philistines and the necessity for a unified effort against such enemies, it became clear that the army needed horses in order to fight successfully. David did not rely heavily upon horses (2 S. 8:4), but the way of the future was seen in the actions of Absalom and Adonijah, both of whom attempted to seize royal power with the aid of horses and horsemen (2 S. 15:1; 1 K. 1:5). The regular use of horses as an integral part of the army began on a large scale with Solomon. He was dependent upon Egypt for his horses (1 K. 10:28), with which he developed a sizable and powerful army.

The history of the divided kingdoms is interspersed with descriptions of the horses of Israel (1 K. 18:5; Isa. 2:7; Am. 4:10; etc.), Judah (Isa. 30:16; 31:1; Jer. 17:25; etc.), Syria (2 K. 5:9; 6:14), Egypt (Isa. 31:3), the "north" (Jer. 4:13; 6:23), Babylon (Jer. 50:37), and others. Sometimes reference is made to the horses of Yahweh (2 K. 2:11; 6:17; Hab. 3:8, 15). In each case the horse is seen as a determinant and symbol of military strength and its use is primarily for war.

The identification of the horse with royal authority explains the necessity for an entrance to the palace designated for horses (2 K. 11:16; 2 Ch. 23:15; Neh. 3:28; Jer. 31:40). The horse statues in the temple, connected with worship of the sun in Josiah's time, should also be noted (*see* HORSES OF THE SUN).

B. Nonmilitary Uses. Little attention is given to the nonmilitary uses of the horse, since these were clearly not its main use. In Gen. 47:17 and Ex. 9:3, however, horses are found in lists of possessions and appear to be referred to as ordinary livestock. In Isa. 28:28 (reading uncertain) reference may be made to the pulling of a cart by a horse. In Isa. 66:20 horses are one of many means of transport for the exiles. The horse is sometimes described as an animal which needs discipline in the form of a whip (Prov. 26:3): it is without understanding and "must be curbed by bit and bridle" (Ps. 32:9; cf. Jas. 3:3). Although these references cannot demonstrate the widespread use of the horse outside a military context, they offer some evidence to justify a nonmilitary use of the horse and a concern with characteristics not particularly pertinent to warfare. *See* picture of horse and chariot in HUNTING.

One of King Ashurbanipal's horses. Notice the fine trappings. Detail of an a abaster relief of a lion hunt from Nineveh (ca. 650 B.C.) (Staatlichie Museen, Berlin)



C. Figurative and Symbolic Uses. Biblical literature affords many instances in which the horse is intended to represent more than just an animal carrying a rider. The best example of this is the famous Song of the Sea, which begins "Sing to the Lord, for he has triumphed gloriously; the horse and his rider he has thrown into the sea" (Ex. 15:20). Clearly the "horse and his rider" are meant to symbolize the entire Egyptian army on one level, and perhaps a more cosmological force on another level (cf. 15:1-18).

As the influence and military power of the state increased, so also did the importance of the horse as an integral part of the army. The horse, indeed, became a symbol of the strength of the nation. It is not surprising that those opposed to the growing ideology of state self-sufficiency would attack the horse as one example, a symbol, of the state's power. Thus the war-horse is described as a vain hope (Ps. 33:17), and the Lord's delight is not in the strength of a horse (Ps. 147:10). Akin to this judgment are the pronouncements of the prophets, who deny the horse's ability to save its rider's life (Am. 2:15) or provide military deliverance (Hos. 1:7).

Finally, the use of horse in apocalyptic contexts — both OT and NT — must be mentioned. The imagery accompanying the use of horse is vivid. In Joel, horses are used to describe locusts (2:4; cf. Rev. 9:7); the horses in Zechariah (1:8; 6:2, 3, 6) are patrolling the earth, signalling the beginning of the messianic age. A similar and parallel image appears in Revelation (6:2, 4, 5, 8; cf. 19:11, 19, 21, etc.; cf. R. H. Mounce, *Revelation* [*NICNT*, 1977], pp. 152-57, 342-350).

The horse, then, was an important part of the military life of Israel. It became a symbol of the power of the state, attacked by the prophets. Later it was used by other visionaries to help describe the final victory of God.

HORSES OF THE SUN (2 K. 23:11). In connection with the sun-worship practiced by idolatrous kings in the temple at Jerusalem (2 K. 23:5; cf. Ezk. 8:16), horses dedicated to the sun, with chariots, had been placed at the entrance of the sacred edifice. Josiah removed these in his

great reformation, and burned the chariots. In Babylonian mythology Šamaš, the sun-deity, had his own charioteer, while a sculpture of Helios, the Greek sun-god, found in the Parthenon, showed him riding in a chariot pulled by horses.

HOSAH hō'sə [Heb. *ḥōsâ*]. One of the sons of Merari. He, his sons, and his brothers became responsible for the posting of guards at the west gate of Shallecheth (1 Ch. 26:10-19). He had previously been one of the gatekeepers in the tent of the ark when David brought the ark to Jerusalem (1 Ch. 16:37f.).

See also GATEKEEPER.

HOSAH hō'sə [Heb. *ḥōsâ*; Gk. B *Iasi(e)ph*]. A city on the border of Asher, in the neighborhood of Tyre (Josh. 19:29). The LXX B reading may suggest identification with Kefr Yasîf, NE of Acre. It is possible that Hosah represents the Assyrian Usu. Some scholars think that Usu was the Assyrian name for Palaetyrus. If "the fenced city of Tyre" were that on the island, while the city on the mainland lay at Râs el-'Ain, 30 stadia to the south (Strabo *Geog.* xvi.2.24), this identification is not improbable.

B. E. HOVEY

HOSANNA hō-zan'nə [Gk. *hōsanná*]. "Hosanna" occurs six times in the NT, all in the story of Jesus' triumphal entry into Jerusalem. Twice this word is used absolutely (Mk. 11:9; Jn. 12:13), twice followed by the phrase "to the Son of David" (Mt. 21:9, 15), and twice followed by the words, "in the highest" (Mt. 21:9; Mk. 11:10). It was shouted at Jesus by the crowds of pilgrims in the street who acclaimed His arrival in the Holy City (Mt. 21:9), and later by the children who met Him in the temple (Mt. 21:15).

The origin and meaning of *hōsanná* are not certain. Some scholars suggest that it is derived from Gk. *hōs* (=*eis*, "into"), *aná* ("up"), an expression equal to *tḗn doxologían anapémpein*, "to send up the word of praise" (the doxology). Others consider the possibility that its origin lies in the Aramaic word *'ûš"nā'* ("power"), and that it really means "praise." Most scholars, however, see it as a transliteration of Heb. *hôšî'â(-n)nā'*, an emphatic expression which appears in Ps. 118:25 as a cry to the Lord for salvation — "Save, we pray!" (RSV "save us, we beseech thee") or "Save now!" (LXX *ṓ kýrie, sṓson dḗ*). This last derivation is favored by Mark's use of a definite quotation from Ps. 118:26 following the crowd's "hosanna" (used absolutely): "Blessed is he who comes in the name of the Lord!" (11:9). Hence, C. C. Torrey (*Our Translated Gospels* (1936), p. 22) translates rather than transliterates *hōsanná* as "God save him!" (Mk. 11:9), and "God in heaven save him!" (11:10).

Although *hōsanná* originally may have been a cry for help addressed to God (or to a king for mercy; cf. 2 S. 14:4; 2 K. 6:26), it is quite likely that through liturgical usage (the Hallel Psalms, 113–118, were chanted both at the Feast of Tabernacles and at Passover, and the branches carried and waved then were known as "hosannahs") the original significance was lost, so that by NT times *hōsanná* may have become simply an expression of intense joy or a shout of welcome (cf. what happened through religious usage to the meaning of "hallelujah"). The phrase "to the Son of David," attached immediately to *hōsanná* (Mt. 21:9, 15), seems to confirm this understanding. Luke's translation of *hōsanná* by *dóxa* (19:38) does the same. The Greek-speaking church, no longer certain of the meaning of *hōsanná*, interpreted it to include the ideas of "light, and glory, and praise, with supplications to the Lord" (cf. Clement of Alexandria *Paed.* i.5).

"Hosanna" was associated with Jewish eschatological hopes in postbiblical times, and Judaism thought of the "one who comes in the name of the Lord" (Ps. 118:26) as the Messiah (T.B. *Pesahim* 119a; Midr. *Ps.* to Ps. 118:22; cf. SB, I, 849f.). Possibly this interpretation was very old, older than the rabbinic writings cited above. Thus it may also have been that of the crowd which hailed the coming of Jesus.

Mark seems to understand their hosannas in this way, for immediately upon quoting the substance of Ps. 118:25f. — "Hosanna! Blessed is he who comes in the name of the Lord!" (11:9) — he offers a commentary on the Psalm by including these additional words of the crowd: "Blessed is the kingdom of our father David that is coming! Hosanna in the highest!" (11:10). Matthew's "Hosanna to the Son of David" (21:9), which now precedes the quotation from Ps. 118:25f., strengthens this interpretation. Clearly praise is here being ascribed to Jesus, who, as the son of David, has fulfilled the promise to Israel (*TDNT*, IX, *s.v.* ὡσαννά 2 [Lohse]). Further, John's reference to the King of Israel — "Blessed is he who comes in the name of the Lord . . . even the King of Israel!" (12:13) — emphasizes this idea even more.

Thus the use of the familiar "hosanna" shouted to Jesus by pilgrims and children seems to indicate that for them every Jewish messianic expectation had now been fulfilled in Jesus. And the positioning of this story here in the outline of the life of Jesus, along with its modifications of the basic narrative, implies that the Evangelists also understood this ejaculation of praise and salvation in the same way.

  B. Historical and Religious Context
  C. Marriage
II. The Book
  A. Form and Content
  B. Message
  C. Hosea and OT Traditions
  D. Text and Redaction
  E. Canonical Context

I. The Prophet.—*A. Name and Ministry.* The name Hosea, which occurs elsewhere in the OT (Nu. 13:8, 16, Joshua; 2 K. 15:30, the last ruler of the northern kingdom; etc.), is derived from the Hebrew root *yš'* ("help," "save"), and is probably to be understood simply as a 3rd masc. sing. pf. hiphil formation: "he [Yahweh] has helped, delivered" (cf. the name *hôša'yâ* [Jer. 42:1; 43:2; Neh. 12:32], a partially contracted form). Very little is known of Hosea's background, except the name of his father Beeri. While it is not explicitly stated, his ministry was certainly in, and chiefly to, the northern kingdom, and most probably Hosea was also (unlike his near contemporary Amos) a native of Israel, as is suggested by his intimate acquaintance with it. Note his mention and knowledge of the northern locations of Gilead (6:8; 12:11 [MT 12]), Tabor (5:1), Shechem (6:9), Gilgal (4:15; 9:15; 12:11), and Bethel ("Beth-aven," 4:15; 5:8; 10:5). Attempts to connect Hosea closely with the cult (cf. Brueggemann) lack conviction.

The only direct evidence for dating Hosea's ministry comes from the heading in 1:1 (in its present form a later editorial addition), which accurately matches the contents

of the book — though it does not mention the last kings of Israel under whom Hosea was active. Jeroboam II of Israel died in 747/6 B.C., so the prophet must have begun his work before this; in 1:4 the house of Jehu, which came to an end with Jeroboam's short-lived son Zechariah, is still in power. If, as is suggested by the internal evidence of the book, Hosea's ministry continued till just a few years before the fall of Samaria in 722 B.C., this period would cover the Judean reigns mentioned in whole or in part. Hosea was thus the prophet of the final years of the northern kingdom, and his book represents, in skillful and impassioned language, the troubles of these years.

B. Historical and Religious Context. Israel's prosperity during the long reign of Jeroboam II (*ca.* 786-746 B.C.) is reflected in passages that probably come from the earliest period of Hosea's ministry (e.g., 2:2-15 [MT 4-17]). But the corruption and religious decay of Israel's last years, already apparent in the book of Amos, are also clearly reflected. After a reign of six months, Jeroboam's son Zechariah was murdered by Shallum, who after one month was in turn assassinated by Menahem (2 K. 15:8-15). Assyria, whose concentration on its own internal problems had been at least one factor that enabled the expansion of Israel under Jeroboam II, was resurgent under Tiglath-pileser III (745-727 B.C.), who was bent on expansion in the west; Menahem was forced to pay him heavy tribute (2 K. 15:19). Menahem was succeeded by his son Pekahiah who was slain by his officer Pekah (2 K. 15:25). The northern monarchy was in the throes of a bloody dissolution, as is apparent also in Hosea's portrayal of it (7:7; 8:4). Along with political anarchy went social chaos and a collapse of the moral fabric of society (4:2; 6:8f.; 7:1) which was condoned and shared by the ruling classes (7:3-7).

When Pekah and Rezin of Syria formed a coalition against Assyria and tried to force Jotham of Judah and his successor Ahaz to join them (2 K. 15:37; 16:5-9; Isa. 7), Ahaz' appeal to Tiglath-pileser precipitated Assyrian intervention to crush the rebels (733-732 B.C.). The events of the Syro-Ephraimite crisis of 735-732 B.C. are probably reflected in the details of Hos. 5:8–6:6 (cf. *KS*, II [1953], 163-187; for a different view see E. M. Good, *JBL*, 85 [1966], 273-286). In 733 B.C. the Assyrians overran Israelite territory, deporting large numbers of the population and carving up the occupied land into three provinces. Another bloody coup followed when Pekah was murdered by Hoshea (2 K. 15:30), who paid tribute to Assyria for a time during the reign of Shalmaneser V (727-722 B.C.) (2 K. 17:3). The political vacillation in this period between obedience to Assyria and rebellion with Egyptian support is reflected in Hos. 5:13; 7:11; 8:9f.; 12:1 (MT 2). When Hoshea withheld tribute from Shalmaneser and sought Egyptian aid (cf. 9:3 and 11:5), Israel was overrun by the Assyrians again, Hoshea was arrested, and Samaria besieged. The city fell in 722/1 B.C., and the northern kingdom came to an end. No prophecy of Hosea appears to come from so late a period as this (13:16 [MT 14:1] still looks to the fall of Samaria), though 13:10 may allude to the capture of Hoshea in 724 B.C. His work therefore takes us down to about the time of the siege, though it is conceivable that some of the hopeful prophecies come from a later period, after 722 B.C. (see below).

Along with the corrupt political situation, a central target of Hosea's invective is the prevalence of Baal worship, or a baalized form of Yahweh worship, in Israel. In the Ugaritic texts from Râs Shamrah, Baal (Hadad) is the great storm-god, the giver of rain and fertility, who, in one group of myths, dies at the hands of the god Mot, then comes back to life — just as the fertilizing autumn rains follow the drought and death of the summer. Thus these Canaanite deities were essentially mythological personifications of the forces of nature (see A. S. Kapelrud, *The Ras Shamra Discoveries and the OT* [1965], and N. C. Habel, *Yahweh Versus Baal* [1964]). Hosea shows clearly the increasing dominance in Israel of the Canaanite fertility cult associated with Baal and the sexual rites which belonged with it (as a means of insuring the fertility of the land), including sacred prostitution and bacchanalian orgies (4:11-13), and witnesses to the multiplication of altars and sacrifices in his day (8:11, 13; 9:4; 10:1). The Israelites tended increasingly to identify Yahweh with Baal, and to attribute Yahweh's good gifts of land and fertility to Baal (2:5-13). Probably the tendency was fostered by the apparently innocuous application of the epithet *ba'al* to Yahweh in the generic sense "master," "lord" (cf. 2:16 [MT 18]; note the occurrence of the name Bealiah, "Yahweh is baal," in 1 Ch. 12:5 [MT 6]). While it should not be supposed that the thought of Yahweh as controller of nature did not early play a part in the historically oriented faith of Israel, it is quite clear that Israel was increasingly attracted to the native Canaanite fertility deities after the settlement. The conflict had been fought and won for Yahwism at one level with Elijah (1 K. 18), and in the rebellion of Jehu with its prophetic support (2 K. 9–10), but the paganized cults did not die out. Hosea is concerned, probably, with this battle between the Mosaic faith and Baal worship at the level of both the local sanctuaries — hence his use of the Hebrew plural *be'ālîm* (2:13, 17 [MT 15, 19]; 11:2), suggesting a variety of local Baal cults — and the official bull cult introduced into the northern kingdom by Jeroboam I, which — whatever its original intention — must certainly have fostered syncretism (1 K. 12:26-33; Hos. 8:5f.; 10:5f.). Furthermore, the priests had failed in their duty of instructing the people; they were themselves greedy and corrupt (4:4-9; 5:1; 6:9). The situation, as Hosea saw it, was a total departure from faithfulness to Yahweh.

C. Marriage. Particular problems attach to the interpretation of the personal events of Hosea's life, recorded in chs. 1–3, which have a direct bearing on his message. Chapter 1 gives a third-person account of how Hosea, at Yahweh's command, married Gomer bath-Diblaim and had three children by her, to whom he gave symbolic names. Chapter 3, on the other hand, is couched in the first person, and tells how Hosea was instructed by God to go after an adulterous woman, whom he bought from her lover or from slavery, and brought to his own home, where she was to live for a time under disciplinary restriction; again this action symbolically expressed a divine message. It is clear that Hosea's prophetic word is here integrally linked with details of his personal life, and interpreters have long sought to clarify these details, though without attaining any consensus. (For a fuller discussion of older interpretations, see Harper, 208-210; S. Bitter, *Die Ehe des Propheten Hosea* [1975]; for a survey of more recent discussion, see Rowley.)

In trying to reach a decision on these matters, it should be stressed that (1) questions of historical reconstruction are here intimately related to questions concerning the literary composition of chs. 1–3; (2) there is a danger of arguing in a circle, i.e., building up a picture of the marriage relationship by analogy with Yahweh's relationship to Israel, and then using the former to interpret the latter (in particular, the issue arises as to how far we may use the prophetic oracles of ch. 2 as a key to the interpretation of chs. 1 and 3); and (3) these chapters are in no sense intended to give us material for a psychological study of the prophet. As with other apparently biographical passages in the prophetic books, Hosea does not want to tell

us about himself, except insofar as it expresses his function as the messenger of Yahweh. It is necessary to beware, therefore, of the temptation to construct a romantic novel from chs. 1–3 and to use this as the interpretative key to the book. We have to start from the prophet's message and not from a reconstruction of his experience. This does not mean, of course, that the two are unrelated, but we must begin from what is clearly known, and what the prophet himself wishes to convey. It is customary to say that Hosea saw in his broken marriage and his enduring love for his wife (that is, taking chs. 1 and 3 as chronologically consecutive) a paradigm of Israel's apostasy from Yahweh, and of Yahweh's continuing love for Israel. But, while Hosea does indeed picture the relationship between God and His people as a marriage bond, this does not necessarily mean that a reconstruction of Hosea's married life would provide us with an overarching interpretative key for the prophecy.

Three questions call for clarification here. (1) Do chs. 1 and 3 give a record of actual events, or is this portrayal simply an oral or literary device? (It is better to avoid the term "symbolic," since the events in either case do have symbolic meaning.) The view that the account is allegorical is found, e.g., in Jerome, in medieval Jewish interpreters like Kimchi and Ibn Ezra, and more recently in Calvin, Hengstenberg, Keil, and Gressmann. E. J. Young argues that "the entire message was revealed to the prophet, and the prophet related this revelation to the people" (*Intro. to the OT* [1964], p. 253). This view was propounded largely because of the moral difficulty involved in supposing that God commanded Hosea to marry a prostitute. (A variant of this view takes ch. 1 to be historical, and ch. 3 as allegorical, but such an opinion seems unfounded.) A *prima facie* reading suggests that real events are in view in both cases, and some of the details do not seem to lend themselves easily to allegorizing (e.g., the name Gomer). Furthermore, serious exegetical evidence is lacking for the allegorical or visionary interpretation, which in any case does not have the desired effect of saving the morality of the divine command, but merely pushes the problem one stage further back. Everything favors, then, a literal interpretation of chs. 1 and 3, a view now generally accepted and found already in Irenaeus, Theodore of Mopsuestia, and Augustine. To the objection that God could not have commanded Hosea to do such a terrible thing as marry a prostitute, it may be replied that Israel's adultery with Baal was also a terrible thing.

(2) What, then, was Gomer's state at the time of the marriage? Some suggest that Gomer was not originally immoral, but only became so later (Hosea's growing suspicions perhaps being seen in the names given to the second and third children). While the views that Gomer was not an actual adulteress, but was only inclined toward adultery (Eichrodt, Soggin), or was so named simply as a member of the adulterous people of Israel, are unlikely (Rowley), many have argued that 1:2 is a proleptic view of Gomer's unfaithfulness, and that Hosea was commanded to marry a woman who only later turned out to be false to him (e.g., W. R. Smith, G. A. Smith, H. W. Robinson, Rowley, Ellison). This is not impossible, but the most natural reading of 1:2 is that Hosea actually was told to marry a woman known as a prostitute. It cannot be objected against this view that Gomer must originally have been pure, to parallel Israel's former relationship with Yahweh, since this is not the point of the marriage — which is concerned with the present situation existing between God and His people (1:2). An opinion commonly favored is that Gomer was in fact a ritual prostitute who took part in the Canaanite fertility cult (Mays, Fohrer, Wolff). Rowley's counterargument that Hosea would have had only condemnation for such an institution is no doubt true; but again it may be suggested that the whole point lies in the repulsiveness of the act, just as Israel's harlotry was repulsive to Yahweh.

(3) What is the relationship between chs. 1 and 3? Here a variety of interpretations have been proposed: (a) ch. 3 is in some sense parallel to ch. 1, but dwelling on different aspects of the marriage experience (Ackroyd, Clements, McKeating). In this case, "again" (*ʿôḏ*) in 3:1 may be an editorial addition, or it may be taken with "Yahweh said" (resumptive of 1:2a) rather than with "go." The interpretation of the chapters as being in some way parallel does justice to the different forms of chs. 1 and 3, but at the same time this need not be decisive against a consecutive view; (b) chs. 1 and 3 concern different women, a second marriage being understood in ch. 3 (Keil, Fohrer, Rudolph); (c) both chapters concern the same woman and ch. 3 is a chronological sequel to ch. 1 (W. R. Smith, G. A. Smith, H. W. Robinson, Rowley, von Rad, Wolff). In this view, Gomer left Hosea some time after the birth of Lo-ammi, but in his undying love he bought her back from (probably) slavery.

Historically, the choice lies between regarding chs. 1 and 3 as chronologically sequential, and filling in the intervening events, or as in some sense parallel and describing the same marriage experience from different points of view. Perhaps a little more may be said for the former alternative (though the different options have their own problems), but it must be stressed again that the messages conveyed by the two chapters do not depend primarily on their chronological relationship. Chapter 1 is essentially concerned, not with the relationship between Hosea and Gomer as such, but with the symbolic names of the children (Rudolph) as signs of the judgment on Israel (cf. Isa. 7–8), while ch. 3 is concerned with God's continued love for His people and with the chastening punishment and hope of renewal which follows it. While it may be true that the second and third children were not Hosea's own (in fact, the message in the name of the first child is no less severe; and Jezreel is explicitly attributed to him) this is not said in the text, and as such is not part of the message of ch. 1. Much in the whole description (perhaps intentionally) relates only indirectly to the prophet's own experience. Views of Hosea's message that depend largely on a biographical reconstruction of his life as hinted at in chs. 1–3 should be eschewed (e.g., the opinion that Hosea heard his call from God in the very experience of his broken marriage, and that just as he continued to love his erring wife, so God continued to love His faithless people, particularly since 1:2 read in its most natural sense puts Hosea's call prior to his marriage). The "traditional" view is not necessarily wrong historically, but the text itself should not be interpreted in the light of this particular reconstruction. In addition, while the idea of Israel's adultery certainly occurs frequently, the text of chs. 4–14 does not directly indicate that the theme of God's continuing love for faithless Israel was based on Hosea's marriage experience; the marriage image is not the only one used by Hosea to express the relationship between Yahweh and His people (e.g., in ch. 11, where the theme of wrath wrestling with mercy is strongest, the father-son image is used). If we take 1:2 seriously, the significance of the marriage for the prophetic message is essentially that of prophetic symbolism (cf. Isa. 20; Ezk. 5). And, while Hosea appears to have been the first to express the relationship between Yahweh and Israel in terms of a marriage, it is not necessarily the case that he first drew the parallel from his own experience, since the husband-wife motif is

already found in Canaanite religion (von Rad). Here 1:2 must be given full weight again, for this places Hosea's knowledge of the analogy prior to his own marriage. Possibly Hosea here, as elsewhere, was drawing on imagery used by those he was opposing, to give his message all the more force. At the same time, it is surely true that his own experience did deepen his understanding of Israel's faithless breach with Yahweh, even if it was not the source of that understanding.

II. The Book.–A. Form and Content. Most interpreters divide the prophecy into two unequal sections: chs. 1–3, which expound Hosea's message as conveyed through his family experiences, and chs. 4–14, a more loosely connected series of oracles conveying God's word to Israel. (There is no satisfactory reason to suppose, however, that chs. 1–3 ever circulated as an independent collection of prophetic material; cf. J. Lindblom, *Prophecy in Ancient Israel* [1962], p. 242.)

The prophecies of ch. 2 function quite clearly as a link between chs. 1 and 3. On the one hand, the mention of the children in ch. 2 is to be understood in the light of Hosea's children in ch. 1; ch. 2 clearly links the faithlessness of the wife with the birth of the children. Rudolph suggests that 1:2b should be regarded as a gloss, but in fact it forms the necessary background to the interpretation of the children's names, with their message of judgment on Israel. Judgment is coming because of Israel's faithlessness to Yahweh, symbolized in the marriage. On the other hand, ch. 2 also has close links with ch. 3 (Wolff, p. 59), so that chs. 1–3 belong together as a unit. Whether they were put in their present order by Hosea himself, or by later editors of the Hosea tradition, is uncertain. (An alternative suggestion is that if chs. 1 and 3 are parallel, then "perhaps the book should be divided into i+ii and iii+iv-xiv, the duplicate narratives each introducing a collection of sayings" [G. W. Anderson, *A Critical Intro. to the OT* (1959), p. 143]; but this is less likely.) In any case, it should be noted that chs. 1–3 are roughly parallel to each other in that prophecies of hope and restoration follow upon oracles of divine judgment. Many scholars argue that the hopeful prophecies are not from Hosea himself, but from later editors who arranged the material in its present form (see II.D below).

In chs. 4–14 we have a variety of oracles, from different periods of Hosea's ministry, whose exact delimitation is often difficult. The prophet's own deep sorrow about Israel's sin and the coming judgment is clearly evident in his language; but, at the same time, the words are not his own, but God's, whose messenger Hosea is (note the frequent use of the first-person divine-speech form). Hosea's threats of judgment are supported by invectives explaining why judgment is coming (for detailed studies of the speech forms used, see Wolff, pp. xxiii-xxv; Buss). Within these chapters, it is usually supposed, the units of material are grouped mainly according to similarity of subject matter (e.g., 4:1-11 and 12-19) and use of catchwords (e.g., "devour" in 8:7f., linking vv. 1-7 and 8-10), though questions of arrangement and structure here, as in other prophetic books, need fuller treatment. The prophecy has some movement, however, in that a roughly chronological arrangement is observable, and in that 9:10–14:9 (MT 10) look back more to Israel's past history and have a greater stress on the element of promise than 4:1–9:9.

We may outline the contents of the book thus:

Superscription (1:1)

I. Hosea's Marriage (Chs. 1–3)
  - A. Hosea's Marriage to Gomer and the Birth of the Three Children (1:2–2:1 [MT 1:2–2:3])
    Words of Hope (1:7, 10–2:1 [MT 2:1-3])
  - B. Yahweh's Legal Dispute with His Faithless Wife Israel (2:2-23 [MT 2:4-25])
    Words of Hope (2:16-23 [MT 18-25])
  - C. Divine Command to Hosea to Bring Home a Woman (Perhaps Gomer) and Hosea's Disciplining of Her (3:1-5)
    Words of Hope (3:5)

II. Oracles Concerning Israel (Chs. 4–14)
  - A. Israel's Sin and the Culpability of the Priests (4:1-10)
  - B. Israel's Licentiousness and Idolatry; Participation in the Canaanite Fertility Cult (4:11-19)
  - C. Israel's Defilement — Priests, King, and People (5:1-7)
  - D. Threats Against Israel and Judah; Need for True Repentance (5:8–6:6)
  - E. Israel's Breach with Yahweh; Bloodshed and Idolatry (6:7-11a)
  - F. Israel's Wickedness (6:11b–7:7)
  - G. Israel's Turning from God to the Nations and to Baal (7:8-16)
  - H. False Worship and False Kings (8:1-14)
  - I. Israel's Immoral and Idolatrous Worship (9:1-9)
  - J. Israel's Apostasy at Baal-peor (9:10-14)
  - K. Israel's Wickedness, Beginning at Gilgal (9:15-17)
  - L. Growing Prosperity and Growing Sin: Fall of Calf and King (10:1-8)
  - M. Israel's Wickedness, Beginning at Gibeah (10:9-15)
  - N. Yahweh's Fatherly Love and His Sinful Son (11:1-11)
  - O. Yahweh's Case Against Israel, Beginning with Jacob (11:12–12:14 [MT 12:1-15])
  - P. Israel's Death-Bringing Departure from Yahweh, Past and Present (13:1-11)
  - Q. Final Announcement of Coming Punishment (13:12-16 [MT 13:12–14:1])
  - R. Plea for Israel to Return in Penitence to Yahweh; Promise of His Grace (14:1-8 [MT 14:2-9])
  - S. Epilogue: "True Wisdom" (14:9 [MT 14:10])

B. Message. The great presupposition behind Hosea's message is the intimate relationship existing between Yahweh and His people Israel. Yahweh is Israel's God, who had entered into a covenant relationship with Israel (6:7; 8:1). This is pictured through a variety of images alongside that of the husband and wife (e.g., father and son [11:1-4], physician and patient [7:1; 11:3]). Hosea stresses God's tender care and compassion for His people, from the time that in grace He had brought them out from Egyptian bondage (11:1; 12:9 [MT 10]; 13:4), led them in the wilderness (9:10; 13:5), brought them into His good land, and gave them His good gifts (2:8 [MT 10]). He is the exalted Lord, the Holy One (11:9), who is not remote, but in a love relationship with Israel. This is clear throughout the prophecy. Hosea can vividly picture Yahweh's heart in turmoil, wavering between judgment and mercy (11:1-9). God's gracious acts of salvation are not just of antiquarian interest, but are relevant to Israel's present plight. Hosea can look back and see the present in the light of the past: "Wherever Israel's beginnings are examined, her present immediately appears" (Wolff, p. xxvii).

It is because of the relationship between Yahweh and Israel that Hosea and his God grieve deeply over Israel's sin. That sin is essentially a revolt against love, a breach of personal relationship — this is what breaking the covenant means for Hosea. Hence sin can be pictured as adultery or harlotry (1:2; 2:2, 4 [MT 4, 6]; 4:10-12; 5:3f.; 6:10; 9:1), manifested in social wickedness, but all the more in Israel's adultery with Baal, both individually (4:14) and corporately. Even this goes back to early days (9:10). It means making Yahweh into Baal (2:16 [MT 18]) and attributing Yahweh's gifts to him (2:5f. [MT 7f.]). Multi-

plying sacrifices and altars will prove useless (10:1f., 8), since the religion behind them is fundamentally corrupt. Thus the intended channels of grace have become channels of sin. The official northern bull cult is condemned (8:5f.; 10:5f.). Essentially the Baals are idols (4:17; 8:4; 11:2; 13:2) which God cannot tolerate (cf. Ex. 20:3-5).

In society Hosea singles out Israel's kings and priests for special condemnation (5:1). The kings are illegitimate because Yahweh did not choose them (8:4); at best they are "gifts" of His anger (13:10f.). They rejoice in Israel's wickedness and share it (7:1-7), they are proud and lack trust in Yahweh (7:7, 16) — the product of merely human machinations, taking no account of God's will and ways. Israel vacillates between Assyria and Egypt, neither of which can provide the necessary aid (5:13; 7:11; 8:9f.). The priests, too, are corrupt (4:4-9; 6:9), and because of them Israel lacks "knowledge of God" (4:1, 6; 5:4). While such knowledge undoubtedly has an intellectual element (note the parallel between lack of knowledge and forgetfulness of the divine Torah in 4:6; cf. 8:12), it is far more than this, embracing the whole personality. To know God means to be in an intimate relationship of cognition, love, and obedience (6:6; cf. 8:13; 12:6 [MT 7]; Jer. 22:16); it is Israel's highest good, which is now conspicuously lacking, even though it is claimed to be in evidence (8:2). (A covenantal basis for "know" in this sense has been suggested by H. B. Huffmon, *BASOR*, 181 [Feb. 1966], 131-37.) Linked with this is Hosea's frequent use of the term *ḥeseḏ* (RSV "steadfast love"), which, while difficult to translate, means for Hosea essentially warm and loving devotion to the relationship here created by the covenant (4:1; 6:4, 6; 10:12; 12:6 [MT 7]). In Israel, God's steadfast love contrasts to His people's lack of it. The ideal relationship (2:19f. [MT 21f.]) simply does not exist at present. Because of all this, and in the light of the way in which, though Yahweh desires to save His people, they will have none of it (7:1, 10, 13f.), judgment is coming.

Hosea stresses this judgment as vehemently as Amos ever did. More than Amos, however, he stresses that it is the judgment of love. This message of judgment is expressed clearly in the symbolic names given to the prophet's children (1:4-8): Jezreel, signifying that God would end the bloody kingship of Jehu's family; Lo-ruḥamah, "not pitied"; and Lo-ammi, "not my people," signifying a dissolution of the present covenant relationship (cf. Ex. 19:3-6). Like an adulterous wife, Israel would be punished. Prosperity and revelry would end (2:2-13 [MT 4-15]). Similarly, ch. 3 conveys a message of judgment, as is made clear by v. 4. At the same time, this is a disciplinary punishment inflicted by love (cf. v. 1), but terrible nonetheless. The prophecies that follow indicate the nature of the judgment as well as the reasons for it. It is pictured as a return to Egypt or exile in Assyria (8:13; 9:3, 6; 11:5); it means being cast out among the nations (8:8; 9:17). It involves the coming of the Assyrian enemy (8:3; 10:6), bringing war and barrenness, desolation and terrible atrocities (5:9; 9:11-16; 10:14; 11:6; 13:16 [MT 14:1]). In all this, Yahweh is the personal mover; He is bringing the end on Israel (1:4), the judgment of holy love.

Yet because it is the judgment of love, this is not the end of the story. The question of hope for the future in Hosea's prophecies has been widely discussed, and few would now accept the view that Hosea has no hope at all (Harper). Yet beyond this, scholars still disagree considerably. The whole problem of the redaction of the book arises here. To summarize in advance suggestions offered below (II.D), it is clear that Hosea does look beyond the coming judgment to restoration, salvation, and a renewal of the broken relationship (cf. 2:14-23 [MT 16-25]). Because God is holy love, mercy does not detract from judgment, but goes through and looks beyond it. Hosea proclaims a God whose free grace, not the sin of His people, has the last word.

C. Hosea and OT Traditions. Hosea's message, as indicated above, is firmly rooted in Israelite tradition, though he is never simply a mouthpiece for tradition but shows how past and present (and future) belong together as an indissoluble whole. For one thing, Hosea realizes that he stands in a tradition of Israelite prophecy (6:5; 9:7; 12:10 [MT 11]), which goes back to Moses (12:13 [MT 14]). Wolff argues that he belonged to a northern levitical-prophetic movement which stood firmly in the old Exodus traditions of Mosaic Yahwism, in opposition to the current Canaanization of Israel's faith. While this is possible, it does not seem necessary to tie Hosea down specifically to such a group, since we can assume "that all such circles as had a serious interest in the Israelite religion would also be acquainted with its traditions" (R. Rendtorff, *Journal for Theology and the Church*, 4 [1967], 19). Certainly Hosea does take up and use the old traditions of the Exodus and wilderness wandering (cf. R. E. Clements, *Prophecy and Covenant* [1965], pp. 45-49), and of the covenant between Yahweh and Israel (for a different view cf. J. Vollmer, *Geschichtliche Rückblicke und Motive in der Prophetie des Amos, Hosea, und Jesaja* [1971]). It has been argued that the idea of the relationship specifically as a *covenant* (though not the idea of a relationship in itself) is a view later than the eighth-century prophets, and that 8:1 must be seen as a later addition (L. Perlitt, *Bundestheologie im AT* [1969], pp. 146-49), but this view appears unnecessary. Hosea refers, further, to a number of other ancient traditions (e.g., Jacob in 12:2-6 [MT 3-7]), standing firmly within the stream of Israel's history. His links with Deuteronomy are particularly striking. For example, both see love as the link between God and Israel (3:1; 11:1, 4; 14:4 [MT 5]; Dt. 6:5; 7:8); both regard Moses as a prophet (12:13 [MT 14]; Dt. 18:15); both stress the dangers of satisfaction with God's gifts which leads to forgetting the Giver (13:5f.; Dt. 8:11-20). Such links are to be accounted for, not by supposing that Deuteronomy was written in dependence on Hosea (the older critical view), but by seeing Hosea as drawing on the particular streams of Israelite tradition represented in Deuteronomy. This does not prove an early date for Deuteronomy as such, but it does indicate that many traditions within that book are certainly very ancient.

Hosea's view of Israelite kingship shows his stance toward a newer aspect of tradition. The prophet was uniformly critical of the northern monarchy of his day, which was illegitimate because it was not chosen by God (8:4). Whether, as frequently supposed, Hosea was critical of kingship as such is more debatable (9:9, 15 are probably not to be regarded as alluding to the beginning of the monarchy under Saul). It is at least doubtful whether we should sharply distinguish between a "charismatic" view of kingship in the north, continuing the tradition of leadership of the judges period, and the southern "dynastic" view associated with the house of David. The OT distinguishes, rather, between kings who are chosen by God and those who are not, and Hosea seems to be in line with this view. Did he then regard the Davidic kingship of Judah as the only legitimate rule for "all Israel"? This will depend on the view taken of such verses as 1:11 [MT 2:2] and 3:5, but it is not impossible that this view does go back to Hosea himself. (On this topic, see the balanced and cautious discussion by A. Gelston, *Oudtestamentische Studiën*, 19 [1974], 71-85.)

D. Text and Redaction. The Hebrew text of Hosea appears badly preserved in places (more so in chs. 4–14 than in chs. 1–3), and in any case presents numerous transla-

tion difficulties (cf. the RSV mg.). The LXX is of some use in restoring corrupt passages, though in no sense superior as a whole to the MT. Some of the problems are caused by simple scribal errors; others may be caused by the difficulty that those who transmitted the prophecy after the fall of Samaria had with the language, which bears marks of a northern dialect of Hebrew influenced by Aramaic (cf., e.g., G. R. Driver, *JTS*, 36 [1935], 294ff.; A. Szabó, *VT*, 25 [1975], 522-24). Most probably the prophet himself had a share in writing down his oracles after their oral delivery (note the first-person narrative in 3:1-3), contrary to the views of Scandinavian scholars like Nyberg and Engnell that the prophetic oracles originally underwent a long period of oral transmission, being handed down in the circles of the followers of the various prophets, and constantly remolded according to contemporary needs. These scholars have overstressed the importance of oral, as opposed to written, transmission in the ancient Near East (cf. K. A. Kitchen, *Ancient Orient and OT* [1966], pp. 135-37). Furthermore, that certain prophets actually did have their oracles committed to writing appears to be attested to by the books themselves (cf. Isa. 8:16; Jer. 36; Hab. 2:2). Hosea himself most probably began the process of committing his own words to writing, so that they might live for the future as a witness to the truth of Yahweh's word (cf. Isa. 30:8). At a later time it was seen that the word had been fulfilled in the judgment which had come upon Israel in 722 B.C. (and on Judah in 587). So far as we can judge, then, Hosea's prophecies existed in written form not long after their oral proclamation, and were probably brought south to Judah after the fall of Samaria. (Whether Hosea himself came with them is impossible to say.)

In discussing possible editorial work in the book, we need not rule out in advance the possibility that editorial additions have been made, while we may wish to doubt whether these have been as extensive as often supposed. In Hosea's case, the chief question concerns the prophecies of hope beyond judgment which the book contains. Central to this issue is the status of the references to Judah (as opposed to the northern kingdom of Israel). A number of references which suggest that Judah will be punished alongside Israel are integral to the prophecy (5:10, 12, 13, 14; 6:4), and others may well be, though this is less clearly the case (e.g., 5:5c; 6:11a); in any event the latter merely highlight a theme found elsewhere in the book. Along with these, other verses indicate a much more positive attitude toward Judah (cf. 1:7; 11:12 [MT 12:1]). Critical scholars have tended to regard all or some of these references as secondary, along with others in the book (e.g., Fohrer sees the following as later additions: 1:10–2:1 [2:1-3]; 2:4f., 6f., 10, 12 [MT 6f., 8f., 12, 14]; 4:15; 5:5; 7:13b-14; 11:11f.). This goes too far. It is at least possible that some of the hopeful references to Judah were spoken by Hosea himself — perhaps in the period after the fall of Samaria (e.g., the hopeful reinterpretation of the names of the children in 1:10–2:1 [MT 2:1-3]). These do not give a detailed program of restoration, but they do affirm that God's grace must finally triumph. Such an attitude is already Hosea's own (cf. 11:8f.), and the reinterpretation can take place "not because judgment is escaped, but because the activity of God towards man is two-sided" (Ackroyd, p. 604).

At the same time, it seems clear that the book of Hosea has been subject to some editing at a later time, to draw out more clearly themes already implicit in the prophet's own preaching, and (with a basis in the convictions that God's word to Israel is also His word to Judah [since His people are in reality one] and that God's royal promises were given to the house of David [cf. 2 S. 7]) to apply the words of Hosea to Judah's situation. Hos. 1:1 is certainly redactional in its present form. It is important to stress that such editing was not a haphazard or arbitrary procedure, but was based on a theological understanding of the nature of Israel and its kingship deeply rooted in the OT, so that Hosea's book as we have it is oriented not simply toward the historical northern kingdom but toward the people of God as a whole. By this means it was affirmed that the prophetic word had continuing validity as God's word; Hosea's message was not simply preserved, but proclaimed afresh. A good case can be made for the view that other preexilic prophetic books have been subject to such editing. This is probably best attributed to the Deuteronomic school, active in the late preexilic and the exilic periods (contrast I. Willi-Plein, *Vorformen der Schriftexegese innerhalb des AT* [1971], pp. 115ff.). This group also (most probably) edited or compiled the historical books from Joshua to 2 Kings, showing how, in the light of the law of Deuteronomy, God's judgment on His people had been just, and yet pointing beyond present judgment to future hope (such a view does not, in itself, necessarily imply a late date for Deuteronomy). Thus the messages of the "writing" prophets and of the history of Israel stood alongside each other as witnesses to the rationale behind the events of 722 and 587/6 B.C., but also as witnesses to a hope of salvation. In this, and not least with Hosea, the Deuteronomists have not artificially tried to make the prophet say what he did not say, but have simply drawn out the real implications of what he did say. Their most important task was to let the prophet's own words speak, words which had already seen fulfillment in their threats of judgment. Now they proclaim the grace of God, who could not relinquish His hold on His people (cf. Dt. 4:29-31; 30:1-6).

E. Canonical Context. It is important to note that it is the book of Hosea in its final form which stands as canonical Scripture. Though Hosea himself was a northern prophet with a primary mission to the northern kingdom, in its present form the book is distinctly oriented toward Judah and the concept of "all Israel," and toward the Davidic kingship as exercising legitimate sovereignty over "all Israel" (1:11 [MT 2:1]; 3:5) in accordance with God's promises made to the house of David. A further stage of "redimensioning" is seen in the NT, where Hosea is quoted or distinctly alluded to in several important passages; it has been claimed that the whole book "was influential in early Christian thought" insofar as it stresses "the theme of judgement on a sinful people as the inevitable and indispensable, but also the certain, prelude to redemption, renewal, or resurrection" (C. H. Dodd, *According to the Scriptures* [1952], pp. 75-78).

Jesus Himself quoted Hos. 6:6 against His Pharisaic opponents (Mt. 9:13; 12:7), and in both cases the context is christologically oriented, i.e., it is not merely an inculcation of an ethical principle, but is integrally connected with Jesus' own work and claims. In Mt. 2:15, the Evangelist quotes Hos. 11:1 as fulfilled in Jesus' return from Egypt, or perhaps rather in His preservation from harm in Egypt, just as long before God had preserved and delivered His son Israel from Egypt (cf. R. H. Gundry, *Use of the OT in St. Matthew's Gospel* [1967], pp. 93f.). The messianic son, here viewed as the embodiment of the true people of God, recapitulates the experience of Israel. In a similar way, the idea of a resurrection of Israel "on the third day" (Hos. 6:2) lies behind the theme of Jesus' resurrection "in accordance with the scriptures" (1 Cor. 15:4; cf. B. Lindars, *NT Apologetic* [1961], pp. 60-66; H. K. McArthur, *NTS*, 18 [1971/72], 81-86). Indeed, the sugges-

tion has been made that Hos. 11:1 may have been used as a pointer to the saving death and resurrection of Jesus (in His deliverance by God from the land of death), so that Matthew sees the last events of His earthly life as already prefigured in the events of His birth (Dodd, p. 103; Lindars, p. 217; D. Hill, *Matthew [New Century Bible,* 1972], p. 85). It is evident that we have in these references a further reinterpretation of Hosea's oracles within the setting of the total Christian canon: Jesus the Messiah embodies and represents the people of God. In His death and resurrection, He is the true Israel.

Furthermore, both Paul (Rom. 9:25f.), and Peter (1 Pet. 2:10) use the reversed "no people" prophecies of Hos. 1:10 and 2:23 (MT 2:1 and 25), applying them to the gentile mission (cf. J. H. Elliott, *The Elect and the Holy* [1966], pp. 44-48; F. F. Bruce, *NT Development of OT Themes* [1968], pp. 62-67) and no longer to the old Israel (though C. K. Barrett, *Romans* [1957], p. 191, suggests that there may be a secondary reference to Israel's temporary failure and subsequent return). Here again we see an extension of Hosea's prophecy within its overall canonical context, and it is not fanciful to link this with the applications of Hosea to Jesus as the embodiment of God's people. Thus Hosea directs us to Christ. With his insistence that divine grace does not remove divine judgment but goes through and beyond it to a future filled with hope, the book as Christian Scripture points to the gospel of the cross and says, "God loves like that!"

HOSEN hō'zən [Aram. *paṭṭîš*] (Dnl. 3:21, AV); RSV TUNIC; NEB SHIRTS. An archaic term for "hose," "leggings." The precise meaning of the Aramaic word is unknown. *See* GARMENTS III.

HOSHAIAH hō-shā'yə [Heb. *hôšaʿyâ*—'Yah(weh) has saved'].

1. Father of Azariah (LXX Jer. 42:1; AV, following MT, has "Jezaniah"), who with other leaders antagonized the policy and counsel of Jeremiah after the fall of Jerusalem (Jer. 42:1–43:7).

2. A man, probably of Judah, who led half of the princes of Judah in procession at the dedication of the wall of Jerusalem (Neh. 12:32).

HOSHAMA hosh'ə-mə, hō-shā'mə [Heb. *hôšāmāʿ,* abbr. from *yᵉhôšāmāʿ*—'Yahweh has heard']. One of the descendants of Jeconiah, the captive king of Judah (1 Ch. 3:18).

HOSHEA hō-shē'ə [Heb. *hôšē(a)ʿ*—'little Joshua' or 'may Yahweh save']; AV OSHEA (Nu. 13:8, 16).

1. The early name of Joshua son of Nun, before Moses changed it (Nu. 13:8, 16). According to Dt. 32:44, the original form persisted for some time.

2. The son of Azaziah. An officer in David's army, he was set over the tribe of Ephraim (1 Ch. 27:20).

3. An eighth-century B.C. Israelite prophet, the son of Beeri, whose writings and oracles form part of the material known as the Minor Prophets (Hosea).

4. A signatory to the covenant in the time of Ezra and Nehemiah (Neh. 10:23 [MT 24]).

5. Son of Elah. He was Israel's nineteenth and final king, who reigned for nine years (*ca.* 732-722 B.C.), and was known in Assyrian records as *A-ú-si-*ʾ. Hoshea succeeded to the throne of Israel at the end of a long period of social turmoil, political intrigue, and spiritual corruption. All this was reflected in the way Hoshea gained the throne — conspiring against and murdering his predecessor Pekah (*ca.* 740-732 B.C.).

Hoshea's action may have been prompted by Pekah's utter failure to contain the westward advance of Assyria under Tiglath-pileser III (*ca.* 745-727 B.C.), who had incorporated almost all of Israel into the Assyrian empire. Tiglath-pileser was apparently determined to annex the rest of Israel, and when Hoshea became king in Samaria the Assyrian monarch promptly put him under heavy tribute (2 K. 17:3). At the same time Tiglath-pileser boasted in his annals that he had put Hoshea on the throne over the Israelites (*ARAB,* I, § 816; *ANET,* pp. 283f.). Hoshea evidently did nothing to reverse the moral and spiritual corruption of the northern kingdom, although the compiler of Kings regarded him as somewhat less offensive than his precursors (2 K. 17:2). Apart from this brief evaluation, very little is known about the reign of Hoshea. He seems to have been an ardent patriot, however, and when Tiglath-pileser III died in 727 B.C. Hoshea probably thought that the time was opportune for him to revolt against Assyria by withholding the tribute.

Unquestionably his small realm could not afford the many talents of silver that the Assyrians demanded, but by refusing to pay the price of peace Hoshea placed his tiny kingdom in jeopardy. While Shalmaneser V was still in the process of succeeding his father Tiglath-pileser III, Hoshea made political overtures to Egypt by sending ambassadors to the pharaoh requesting assistance (2 K. 17:4). This ruler, named So (*sw*ʾ), was probably Osorkon IV of Tanis (Zoan) (K. Kitchen, *The Bible in Its World* [1977], p. 113; but cf. Goedicke). He offered no help to Hoshea, however, and in 724 B.C. Shalmaneser launched an attack upon Israel.

Hoshea submitted to the Assyrians and paid tribute, but Shalmaneser suspected his professed loyalties and imprisoned him. There is no further information about the life or activities of Hoshea. Samaria withstood the enemy attacks for three years before falling in 722 B.C. About that time Shalmaneser V died and was succeeded by Sargon II (*ca.* 722-705 B.C.), who described in his annals how he captured the city (*ARAB,* II, § 55; *ANET,* pp. 284f.).

There is some doubt as to whether the city actually fell to Sargon, since, despite Sargon's repeated claims to have

overthrown Samaria, the Assyrian ruler alluded to in 2 K. 17:6; 18:9f. appears to be Shalmaneser V. The fall of Samaria marked the end of the northern kingdom, since most members of the various tribes were taken as captives to Assyria. The prophet Hosea condemned the Israelites for their perfidy in attempting to deal with Egypt while still bargaining with Assyria (Hos. 7:11; 12:1 [MT 2]).

HOSPITABLE; HOSPITALITY. *See* ENTERTAIN.

HOST. *See* ENTERTAIN.

HOST OF HEAVEN [Heb. *ṣᵉḇā' haššāmayim*]. The expression is employed in the OT to denote (1) the stars, frequently as objects of idolatry (Dt. 4:19; 17:3; 2 K. 17:16; 21:3, 5; 23:4f.; Jer. 8:2; 19:13; Zeph. 1:5), but also as witnesses, in their number, order, and splendor, to the majesty and providential rule and care of Yahweh (Isa. 34:4; 40:26, "calling them all by name"; 45:12; Jer. 33:22); and (2) the angels (1 K. 22:19; 2 Ch. 18:18).

(1) Star worship seems to have been an enticement to Israel from the first (Dt. 4:19; 17:3; Am. 5:26; cf. Acts 7:42f.), but attained special prominence in the days of the later kings of Judah. The name of Manasseh is particularly connected with it. This king built altars for "all the host of heaven" in the courts of the temple (2 K. 21:3, 5). Josiah destroyed these altars, and cleansed the temple from the idolatry by deposing the priests and burning the vessels associated with it (2 K. 23:4f., 12).

(2) In the other meaning of the expression, the angels are regarded as forming Yahweh's army, and He Himself is the leader of them — "the Lord of hosts" (Isa. 31:4; etc.) — though this designation has a much wider reference. *See also* ANGEL; GOD, NAMES OF II.C. J. ORR

HOSTAGE. *See* WAR.

HOSTILE; HOSTILITY [Heb. *ra'*] (Dt. 15:9); AV EVIL; NEB "look askance"; [Gk. *échthra*] (Rom. 8:7; Eph. 2:14, 16); AV, NEB, ENMITY; [*echthrós*] (Col. 1:21); AV, NEB, ENEMIES; [*antilogía*] (He. 12:3); AV CONTRADICTION; NEB OPPOSITION. The most frequently used Greek word describing the disposition or nature of the enemy is *échthra*, which appears in the NT six times. With the AV and NEB, the RSV translates *échthra* as "enmity" in Lk. 23:12; Gal. 5:20; Jas. 4:4, but in the other three instances it has "hostile/hostility." Perhaps the distinction between the two English words is that "hostility" more clearly reflects the active sense of *échthra*. Explicitly in Rom. 8:7, but also in Eph. 2:14, 16, man, more than merely being at odds with God, is the hostile party (*see also* HOSTILITY, DIVIDING WALL OF). So it is in Col. 1:21, where the RSV departs from the usual "enemy" for *echthrós* (cf. AV and NEB). "Enemy" is ambiguous, meaning either "hated (by God)" or "hostile (to God)." The RSV seems correct with "hostile." "It is the mind of man, not the mind of God, which must undergo change, that a reunion may be effected" (Lightfoot, comm. on Colossians [1879], *in loc.*).

Although the sense of active "opposition" (NEB) in *antilogía* was formerly disputed, so that the AV reads the more literal sense of "contradiction," the meaning "hostility" (RSV) or "rebellion" (cf. Jude 11) has been adequately attested (cf. MM). H. VAN BROEKHOVEN, JR.

HOSTILITY, DIVIDING WALL OF [Gk. *tó mesótoichon toú phragmoú*] (Eph. 2:14), AV, ASV, MIDDLE WALL OF PARTITION; NEB DIVIDING WALL BETWEEN THEM. The Greek expression *tó mesótoichon toú phragmoú* joins two words for wall. Gk. *mesótoichon*, which occurs only here in the NT, refers to a partition within a house. The other word for wall, Gk. *phragmós*, refers to a fence for protection and is so used in Mk. 12:1; Lk. 14:23. If the phrase is not merely a pleonasm, the joining of these words achieves the sense of a wall erected for both separation and protection.

Many have identified this wall with the stone wall of the Jerusalem temple, 1.5 m. (5 ft.) high, beyond which no Gentile was permitted to go. Inscribed on the pillars of the wall were warnings to Gentiles that trespassing was a capital offense. The destruction of this wall would be a particularly vivid metaphor for the new unity and equality between Jew and Gentile in the Christian Church.

Others have suggested that Gk. *tó mesótoichon toú phragmoú* be identified as the thick curtains that separated the holiest section of the temple from the rest. Only the high priest entered this holiest section and only on the Day of Atonement, when he performed the expiation for Israel's sins (cf. Mk. 15:38 par.; He. 10:19f.).

H. Schlier (pp. 125-133) suggested that the wall is a cosmic boundary that is broken through. He presupposed a mythological background for the passage, specifically Jewish Gnosticism, which gave to the principalities and powers a mediating position between God and mankind and made the law their instrument.

M. Barth took the wall to refer to "the fence around the law" created by the rabbis. This "fence," with its scribal interpretation, applications, and additions, protected God's law from being broken and effectively separated Jew from Gentile. Barth's interpretation takes "has broken down the dividing wall" as a synonymous parallel with "abolishing the law of commandments and ordinances." Barth also appealed to Gal. 2:18f., where Paul spoke of just such laws and statutes as having been torn down.

Each of these suggestions is plausible, but the "holy temple" image, which culminates the theological argument of Eph. 2:11-21, seems to favor the first suggestion. There is sustained contrast between the temple of Jerusalem and the new "holy temple" as well as between the restrictions on "access" (v. 18, Gk. *prosagōgḗ*; the verb *proságō* has cultic associations) in the old temple and the unrestricted "access in one Spirit" in the new temple. Just as the temple and cultic access are "spiritualized" (see Wenschkewitz), so are the holiness of the temple, the distinction between clean and unclean, and "the law of commandments and ordinances." Jesus Christ has created a "holiness" unrelated to race or nation. Thus Gentiles are no longer just "strangers and sojourners" vis-à-vis the temple but "built into it [the 'holy temple in the Lord"] for a dwelling place of God in the Spirit" (v. 22). In view of this sustained contrast, the "dividing wall of hostility" seems to refer to the wall of the old temple separating Jews and Gentiles and restricting gentile access.

HOSTS, LORD OF. *See* GOD, NAMES OF II.C.

HOTHAM hō'thəm, **HOTHAN** hō'thən [Heb. *ḥôṯām*–'seal'].

1. An Asherite, son of Heber, family of Beriah (1 Ch. 7:32).

2. An Aroerite, father of two of the mighty men of David (1 Ch. 11:44). The AV, following the LXX *Chōthan,* has, incorrectly, "Hothan."

HOTHIR hō'thər [Heb. *hôṯîr*–'abundance']. Mentioned in 1 Ch. 25:4, 28 among the sons of Heman, and one of those set apart by David for the musical service of the house of God (cf. v. 6). *See also* JOSHBEKASHAH.

HOUGH. *See* HAMSTRING.

HOUR [Heb. *mô'ēḏ* (1 S. 9:24; Jer. 46:17); Gk. *hṓra* (Mt. 10:19; Rev. 3:3; etc.)]; AV also TIME (1 S. 9:24; Jer. 46:17; Mk. 6:35; Lk. 1:10; Jn. 16:2, 4, 25; Rom. 13:11; 1 Jn. 2:18; Rev. 14:15), INSTANT (Lk. 2:38); NEB also MOMENT, TIME, THEN, INSTANTLY (Acts 22:13), etc. Only the NEB uses "hour" to help translate the Greek terms *kairós* (Lk. 12:56; 2 Cor. 6:2; 11:25; 2 Tim. 4:6; Rev. 1:3; 22:10), *peirasmós* (Lk. 22:40), *krísis* (Jn. 12:31), and *árti* (Rev. 12:10). The term indicates either a point in time or a period of time, whether inexact or specified, and whether quantitatively measured or qualitatively assessed.

A point in time of no exact length is designated by Aram. *šā'â* in Dnl. 3:6, 15, etc. (which the AV often translates as "the same hour"; RSV "immediately"; NEB "suddenly," "at that very moment," "forthwith") and by Heb. *mô'ēḏ* (< *yā'aḏ,* "appoint"), "the time appointed" (Jer. 46:17, AV). Since in Greek the shortest length of time was expressed by *hṓra,* that word frequently meant "in a second," "without a moment's delay," "instantly," etc., as the NEB acknowledges more frequently than the AV or RSV (LXX Dnl. 3:6, 15; 4:19 [MT 16]; Mt. 9:22; 15:28; 17:18; Lk. 2:38; 24:33; Acts 16:18; 22:13; Gal. 2:5; Rev. 17:12; 18:10, 17, 19; see Bauer, rev., p. 896; MM, p. 702). "At that very moment" in Mt. 8:13b refers to the time of 8:13a.

The kind of time, its nature or quality, is often more important than its quantity or length. For instance, in the Fourth Gospel "hour" refers to the appointed time for either Jesus' sufferings in the Passion week or His glorification in the resurrection (Jn. 2:4; 7:30; 8:20; 12:23; 17:1). "Hour" is here a critical moment, marked for its meaning rather than its length. Whatever its duration, the "hour" of Jesus' betrayal (Mk. 14:41; cf. Lk. 22:53) or of His parousia (Mt. 25:13) or of His final judgment (Jn. 5:28f.) is different, in each case, from any other hour.

Frequently a temporal period is meant. Indefinite periods of time are indicated by: "as it was already late" (Mk. 11:11; cf. 6:35), "to the present hour" (1 Cor. 4:11), "hour by hour" (1 Cor. 15:30, NEB). Preexilic OT literature did not divide the day into hours, but after the Exile time was measured by sundials from sunrise to sunset. Since these were inaccurate chronometers that varied from one solstice to another, "hour" designated simply one twelfth of either day or night (Mt. 20:1-12; Jn. 11:9). Accordingly, "the third hour" was approximately 9:00 A.M. (Mk. 15:25), "the sixth hour" about noon (Mk. 15:33), "the ninth hour" about 3:00 P.M. (Mk. 15:33f.). There were three hours of prayer (Ps. 55:17 [MT 18]; Dnl. 6:10 [MT 11]), which could be designated more exactly by this sundial measurement: at morning sacrifice about 9:00 A.M. (Acts 2:15), at thanksgiving for the day's largest meal about noon (Mt. 15:36; Acts 27:35), and at afternoon sacrifice about 3:00 P.M. (Acts 3:1; 10:30). The most reliable MSS read *hēméra,* "day" (RSV, NEB), rather than *hṓra,* "hour" (AV), in Mt. 24:42.

Whatever the length of a period of time, the nature of that period is often most important. The silence of "half an hour" (Rev. 8:1) that followed the breaking of the seventh seal was a period of ecstatic suspense during which, unexpectedly, nothing happens — except almost unendurably tense expectation of judgment.The whole Christian era is "the last hour" (1 Jn. 2:18), a time known by the "many antichrists" that come during its duration. "The eleventh hour" (Mt. 20:6, 9), because of its context in a parable of the kingdom, accents the crisis of decision before impending judgment. "The hour to reap" (Rev. 14:15) is likewise quantitatively indefinite but qualitatively decisive.

Bibliography.–J. Barr, *Biblical Words For Time* (2nd ed., *SBT,* 1/33, 1969); O. Cullmann, *Christ and Time* (Eng. tr., rev. ed. 1964); C. Sandegren, *EQ,* 24 (1952), 241ff. J. G. GIBBS

HOUR(S) OF PRAYER [Gk. *hṓra tḗs proseuchḗs*]. The phrase "hour of prayer" occurs only in Acts 3:1: Peter and John went up to the temple "at the hour of prayer, the ninth hour" (but see also Lk. 1:10; Acts 10:3, 9[?], 30). This narrative reflects the Jewish custom in NT times of regular hours of prayer three times a day.

The Jewish tradition of thrice-daily hours of prayer is already expressed in the OT (cf. Ps. 55:17 [MT 18]; Dnl. 6:10 [MT 11]; though 1 Ch. 23:30 reflects a twice-daily pattern). The exact times of the three hours, however, and the religious or cultic reasons for them are not easy to determine. The reference to morning, noon, and evening in Ps. 55:17 led some to regard the 3rd, 6th, and 9th hours of the day as the hours of prayer. But the more common and perhaps more important Jewish tradition was to regard the three hours of prayer as morning (3rd hour), afternoon (9th hour), and evening (12th hour). The morning and afternoon (sometimes translated "evening") sacrifices (Ex. 29:38-42; 2 K. 16:15) became the occasions for the morning (Ps. 5:3 [MT 4]) and afternoon (Ps. 141:2; Ezr. 9:5) hours of prayer. Another hour of prayer at sunset was then added.

Although the NT does not directly advocate regular hours of prayer (whether twice or thrice daily), the post-apostolic Church soon came to call the 3rd, 6th, and 9th hours of the day the "apostolic hours" of prayer (based on the apostolic precedents in Acts 3:1; 10:3, 9, 30). These hours of prayer were connected generally with the trinity and specifically with two stages of Christ's passion (the 6th and 9th hours) and the descent of the Spirit at Pentecost (the 3rd hour). At first these were times for purely private devotions by all Christians, but later the stated hours of prayer became so extended and so regulated that they could be kept only by the religious orders under vows. Support for the monastic regulations was also found in the OT. The Benedictine Rule (xvi) calls for seven daytime hours of prayer and the night office. Warrant for this is found in Ps. 119:164, "Seven times a day I praise thee . . ." and Ps. 119:62, "At midnight I rise to praise thee. . . ."

That the NT does not specifically stipulate set hours of prayer suggests that the Christian has the freedom to regulate this for himself. Some will find regular hours of prayer a very helpful practice (e.g., grace before and after meals, Mt. 15:36; Acts 27:35; and prayer coupled with Bible reading, 1 Tim. 4:5); others may not find it helpful. In either case, each Christian will attempt to respond positively to the apostolic exhortation: "Pray constantly" (1 Thess. 5:17).

HOUSE [Heb. and Aram. *bayiṯ*; Gk. *oíkos, oikía*]. Hebrew *bayiṯ*, "house," occurs over 1750 times in the OT and embraces all dwellings, from the simplest (even a tent, Gen. 27:15) up to the king's palace (1 K. 7:1) or God's temple (1 K. 6:1). The term stems, presumably, from a root meaning "to get a night's shelter" (KoB, p. 122a; but cf. *TDOT*, II, 108).

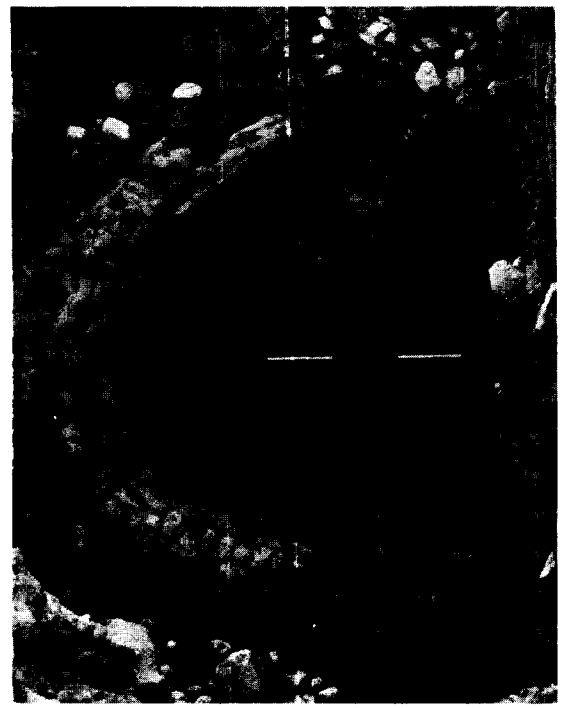
VI. Extended Meanings

I. Cave Dwellings.–The earliest permanent habitations of the prehistoric inhabitants of Palestine were the natural caves that abound throughout the country. The OT refers frequently to reversions to the use of cave dwellings, particularly as refuges in distress (1 S. 22:1; Ezk. 33:27). Thus Lot dwelt with his two daughters in a cave (Gen. 19:30), and Elijah stayed in a cave when hiding from Jezebel (1 K. 19:9). As the people increased and grouped themselves into communities, these abodes were supplemented by systems of artificial caves. Such systems of burrowings, though of low headroom, might develop extensively into a series of adjoining compartments having several entrances. The latter were usually cut through the roof, with descent made by a few steps or simply a drop to the floor. During the rainy season caves were faulty dwellings, for when protection was most needed they might be flooded through the surface openings that formed their entrances.

II. Surface Houses.–A. Materials. The natural successor to the cave was a cavelike hut. For designed structures, the materials used were determined by local availability. Houses in most areas of the ancient Near East were therefore constructed of mud-dried bricks (Gen. 11:3; cf. Job 4:19). Thus some of the earliest known Palestinian houses, dating from 6800 B.C. in the silt-laden Jordan Valley at Jericho, were constructed of flattened cigar-shaped bricks, indented with thumb marks for more effective bonding (K. M. Kenyon, *Digging Up Jericho* [1957], pp. 54f.). Across the river from Jericho at Teleilât el-Ghassûl have appeared well-constructed houses of sun-dried brick roofed with wood, dating from Middle Chalcolithic (3500 B.C.). For most of Palestine, however, stone is the predominant material. Just as loose stones, and later quarried stones, could be carried out of Palestine's caves and used to erect extended fortifications, so these, together with the limitless field stones, constituted the natural materials for houses made in the hill country. Even for mud-brick buildings, foundations of unhewn stones were necessary to keep the bricks above the water that might collect (sometimes suddenly, Mt. 7:24-27); for protection against weathering, the walls were covered with a clay plaster or sometimes with a casing of stone slabs, as at Tell el-Ḥesī (F. J. Bliss, *Mound of Many Cities* [2nd ed. 1898]). Yet stone houses, in turn, seem frequently to have used mud brick for their upper story.



Excavated remains of a beehive-shaped house at Jericho. From the Pre-pottery Neolithic A Period, ca. 7000 B.C. (Jericho Excavation Fund, University of London; picture K. M. Kenyon)

A house from the Pre-pottery Neolithic B level at Jericho. Note the significant change to large, rectangular rooms (Jericho Excavation Fund, University of London; picture K. M. Kenyon)

B. Plans. Except in such rare periods of national security as the mid-8th cent. B.C., permanent houses were erected only within the fortified "cities that stood on mounds" (Josh. 11:13). Even those who worked on distant farms would make the long walk back to be within the walls at night (cf. Ps. 121:8, "Yahweh shall preserve thy going out and thy coming in"). Areas for dwellings were accordingly very crowded. The first houses of Jericho, built of oval "hogbacked" bricks which preceded even the indented mud bricks described above, were roughly circular, with floors sunk below the ground level and walls that inclined inward, forming a beehive shape. The upper part seems to have been of branches plastered with mud, the whole being suggestive of people only recently removed from cave dwellings, or from the circular tents or

brushwood shelters of nomads (Kenyon, pp. 70-72). Plans of several apartments, allowing one to enter from what may be called a living room, followed as a matter of course; and these huddled together constituted the homes of the people. The more valuable animals would be stabled in a forecourt; the total enclosure provided storage for the entire property of a family. There is little sign of progress until the period of Hellenistic influence; and even then the improvement was slight, so far as the homes of the common people were concerned. Builders, of course, varied the plans to suit the requirements of cramped sites, and modifications were common. When members of a family married, extra accommodations or compartmentalizations would be necessary. In consequence, plans often became so jumbled that it is impossible to identify the respective limits of adjoining houses.

III. Details of Construction.–*A. Foundation.* The combined threat of Palestine's all-too-frequent earthquakes and winter cloudbursts necessitated the laying of secure foundations, composed of rocks, and anchored to a cornerstone (Heb. *pinnâ,* Isa. 28:16; Jer. 51:26; Gk. *líthos akrogōniaíos,* 1 Pet. 2:6). In the construction of rude boulder walls, a large projecting boulder was built into the lower angle course. It tied together the return angles and was one of the few bondstones used in the building. This most necessary support claimed chief importance and as such frequently assumed a figurative meaning (Isa. 28:16; 1 Pet. 2:6; *see* CORNERSTONE). The importance given to the laying of a sure foundation is further emphasized by the dedication rites in common practice, evidence of which has been found on various sites in Palestine. The discovery of human remains placed diagonally below the foundations of the returning angle of the house gives proof of the practice of dedication rites both before and after the Conquest. Hiel sacrificed his firstborn to the foundations of Jericho and his youngest son to its gates (1 K. 16:34). But this was in a great cause compared with a similar sacrifice to a private dwelling. The latter manifests a respect scarcely borne out by the miserable nature of the houses so dedicated. At the same time, it gives proof of the frequent collapse of structures that the winter rains made inevitable and at which superstition trembled. The fear of impending disaster to the man who failed to make his sacrifice is recorded in Dt. 20:5: "What man is there that has built a new house, and has not dedicated it? Let him go and return to his house, lest he die in the battle."

B. Floor. When houses were built on rocky outcrops, the floor (Heb. *qarqaʿ*) could be roughly leveled on the rock surface; but it is more common to find floors of beaten clay, layer upon layer. Indeed, burnished plaster for both floors and walls characterized even the earliest houses of prehistoric Jericho. Flagstones were more sparingly used, primarily in courtyards and in the houses of the great. Wood was too precious to be employed extensively for flooring, although Solomon used it for his temple floor (1 K. 6:15). By Iron I and II (Israelite) times, with the invention of waterproof lime plaster, almost every house had its own cistern, sunk in the floor and supplied in winter by relatively pure rainwater from the roof (*AP,* pp. 113, 210). Channels for this purpose have been found, made of stones set in clay, sometimes leading through a silt pit into the cistern.

C. Doorway. The doorway (Heb. *peṯaḥ,* "opening") was a simple square entrance in the wall with a stone or wood lintel (Heb. *mašqôp*) and side posts (Heb. *mᵉzûzâ* [Ex. 12:7, 22] or *ʾayil* [1 K. 6:31]). A stone sill, or threshold (*sap* [1 K. 14:17] or *miptān* [1 S. 5:4f.]), raised above the floor, was necessary to prevent flooding. Along with the cornerstone, this threshold was especially sacred, and in many instances foundation sacrifices have been found buried under the threshold. In later times, when the Hebrews had freed themselves from this unholy Canaanite practice, the rite remained with the substitution of a lamp enclosed between two bowls as a symbol of life. The doorposts were set into the stone at top and bottom, though when no wood was used the stone jambs of the opening simply constituted the doorposts. In either event, they were conspicuous as the points between which all those belonging to the house had continually to pass; hence the Mosaic injunction to inscribe God's commandments "on the doorposts of your house" (Dt. 6:9; 11:20). Judaism later took this command literally by attaching a small case at the doorway in which was placed a parchment containing the exhortation. The earliest wooden door (Heb. *deleṯ;* Gk. *thýra*) seems not to have been a permanent part of the house at all but to have consisted simply of a boarded cover, fixed vertically by a movable bar that slipped into sockets in the stone jambs. Later, true swinging doors were produced by the addition of the hinge (Heb. *ṣîr*), actually a pole attached vertically to one of the side edges of the door, projecting both above and below the door itself, and introduced permanently into sockets carved into the lintel and threshold. A more advanced form of construction was necessary to this type of door than in the previous instance, and skill was required to brace it, hold it together, and prevent sagging. In Israelite times a primitive "lock," or bolt (Heb. *manʿûl* [Neh. 3:3; Cant. 5:5]), and key (Heb. *maptē[a]ḥ* [Jgs. 3:25; Isa. 22:22]; Gk. *kleís* [Mt. 16:19]) made its appearance. (*See also* LOCKS AND KEYS.)

D. Windows. The window (Heb. *ḥallôn* [Josh. 2:15], *ʾᵃrubbâ* [Eccl. 12:2]; Gk. *thyrís* [Acts 20:9; 2 Cor. 11:33]) was often simply an opening in the wall, though furnished with some method of closing which, it may be conjectured, was somewhat the same as the primitive door previously mentioned. The window of the ark (*ḥallôn,* Gen. 8:6), the windows in Gen. 26:8; Josh. 2:15, and the window from which Jezebel looked (2 K. 9:30) were presumably of the casement class. Ahaziah fell through a lattice (*śᵉḇāḵâ,* 2 K. 1:2) in the same palace, and the same word is used for the "networks" (1 K. 7:41) "covering the two bowls of the capitals." In Cant. 2:9 the beloved is "gazing in the windows [*ḥallōnôṯ*], looking through the lattice [*ḥᵃrakkîm*]." It would appear, therefore, that some variety of treatment existed, and that the simple window opening with casement and the opening filled in with a lattice or grill were distinct. The door was a house's primary source of light. Windows were small, both for protection and for keeping the house cool. The lattice was open, without glass filling, a product that became available only in NT times, and only for the most wealthy. Heaven is spoken of figuratively as having "windows" (*ʾᵃrubbâ*) for rain (Gen. 7:11; 8:2; 2 K. 7:2, etc.).

E. Roof. Contrary to the vaulted housetops seen in Palestine today, the roof (Heb. *gāg;* Gk. *stégē, dṓma*) of the biblical period was flat and usually not much over 1.8 m. (6 ft.) above the floor. Cf. "The beams of our house are cedar, our rafters are pine" (Cant. 1:17). To get over the difficulty of the larger spans, a common practice was to introduce a main beam (*qôrâ*) carried on the walls and strengthened by one or more intermediate posts let into stone sockets laid on the floor. Smaller timbers as joists ("rafters," *rāhîṭ*) were spaced out and covered in turn with brushwood; the final covering, being of mud mixed with chopped straw, was beaten and rolled. A tiny stone roller is found on every modern native roof, and is used to roll the mud into greater solidity every year on the advent of the first rains. Similar rollers have been found among

the ancient remains throughout the country. Grass might grow temporarily on such roofs (Ps. 129:6; Isa. 37:27). "They let him down through the tiles [Gk. *kéramos*] with his couch into the midst before Jesus" (Lk. 5:19) refers to the breaking through of a roof similar to this. The roof ("housetop," Heb. *gāg;* Gk. *dōma*) was an important part of every house and was subjected to many uses. It was used for worship (2 K. 23:12; Jer. 19:13; 32:29; Zeph. 1:5; Acts 10:9). Absalom spread his tent on the "top of the house" (2 S. 16:22). In the Feast of Tabernacles temporary booths (*sukkôt*) were erected on the housetops. The Mosaic law required a parapet or railing for protection (Dt. 22:8). The people, as is their habit today, gathered together on the roof on high days and holidays (Jgs. 16:27). The wild wranglings which can be heard in any modern native village, resulting in vile accusations and exposure of family secrets hurled from the housetops of the conflicting parties, illustrate the passage, "And what you have whispered in private rooms shall be proclaimed upon the housetops" (Lk. 12:3).

IV. Interiors.–A. Walls. Life in a Palestinian village consisted primarily of outdoor activities; houses seem, therefore, to have functioned more for storage than for dwelling. Except for the rich, austerity was the rule. As previously noted, walls were plastered (Lev. 14:43, 48), and small fragments of painted plaster (Jer. 22:14) discovered from time to time show that some attempt at mural decoration was made, usually in the form of crudely painted line ornament. An exception exists in the polychrome fresco paintings recovered from Chalcolithic (3500 B.C.) Ghassul. As Albright has remarked, art here reached a higher level of achievement in Palestine than it did for thousands of years thereafter (*AP,* pp. 67f.). House walls were recessed here and there into various forms of cupboards at different levels. The smaller cuttings were probably for lamps, and in the larger and deeper recesses bedmats may have been kept and garments stored.

B. Fixtures. The OT references to the "hearth" (Heb. *'āḥ* [Jer. 36:22f.], *kîyôr* [Zec. 12:6], lit. "brazier") have been supplemented by archeological indications of fire pits in ordinary homes. It is unlikely that chimneys were provided (AV "chimney," Hos. 13:3, renders Heb. *'arubbâ,* RSV "window"): the smoke from the wood or charcoal fuel was allowed to find its way through the door and windows and cracks in the rough stone workmanship. Most cooking was done in the outdoor court when possible; but during the cold season the people had to huddle around and warm their hands at tiny interior fires (cf. Jer. 36:22). The use of cow or camel dung for cooking fires appears to have continued from the earliest time to the present day (Ezk. 4:15). A clay baking oven (Heb. *tannûr* [Gen. 15:17; Ex. 8:3]), approximately 0.6 m. (2 ft.) in diameter and 0.3 m. (1 ft.) in height, was located in the court. Household equipment was, for the poor, limited to bedding and kitchen utensils, storage bins of stone or pottery, water jars, clay cooking pots and serving bowls, and a stone mortar for grinding grain. Better homes could afford the furniture mentioned in the room of Elisha: a bed, table, seat, and lamp (2 K. 4:10), but not much more.

V. Elaborated Structures.–From Palestine's Early Bronze Age (3000-2000 B.C.) have appeared private houses of substantial construction, e.g., the thick-walled homes found in Early Bronze Ai. Thus Lot's house in Sodom provided a refuge against mob violence (Gen. 19:1-11). The Late Bronze (1575-1200) patrician establishments of the Canaanites were succeeded by relatively poor Israelite houses in Iron I. But in Iron II, accompanying the rise of wealth and commerce under Solomon, came a corresponding improvement in house building, though primarily in areas occupied by the rich. The northern capital of Tirzah, e.g., demonstrates a marked shift from homes of approximately uniform quality and arrangement in the 10th cent., to mansions on the one hand and hovels with thin walls and small rooms on the other in the 8th (R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 72f.). Both Scripture and archeology attest to the spacious dwellings and ivory-inlay furniture of the nobles of Samaria (Am. 3:15; 6:4).

Most families, however, by this time located their living quarters in upstairs rooms (Heb. *'alîyâ* [2. K. 4:10]; Gk. *hyperôon* [Acts 9:37], "upper chambers"; cf. *AP,* p. 210). Ahaziah was fatally injured by falling from the window of his palace, and a somewhat similar fate befell his mother, Jezebel (2 K. 1:2; 9:33). The escape of the spies from the house on the wall at Jericho (Josh. 2:15) and that of Paul from Damascus (2 Cor. 11:33) give substantial evidence of window openings at a considerable height. Elijah carried the son of the widow of Zarephath "up into the chamber." The Last Supper was held in an upper chamber (Mk. 14:15). Some sort of stairs (Heb. *ma'ᵃlâ*) on the outsides of the houses (cf. Mk. 13:15) must have existed; and the paucity of the remains of stone steps suggests that they were wooden, probably in the form of ladders in poorer homes.

Palaces (Heb. *'armôn, bîrâ* [1 K. 16:18; Ezr. 6:2; etc.]) were part of every city and were more elaborate in plan, raised in all probability to some considerable height. The Canaanite castle discovered by Macalister at Gezer shows a building of enormously thick walls and small rooms. Reisner has unearthed Ahab's palace at Samaria, revealing a plan of considerable area. Solomon's palace is detailed in 1 K. 7 (*see* TEMPLE). In this class may also be included the megalithic fortified residences with the beehive guard towers of an earlier date, described by Dr. Mackenzie (*PEF,* I).

Luxurious structures come into particular prominence with the Persian period; witness for example the residence of the provincial official in Lachish, which covered an area 36 m. by 52 m. (120 ft. by 170 ft.), and was equipped with bathrooms, and even underground pipes. In Greco-Roman times came the first truly planned cities. Their Herodian palaces and other structures, however, belong more to classical than to Palestinian architecture.

VI. Extended Meanings.–"House" often carries the expanded sense of "household," and this term is frequently substituted in the RSV for AV "house" (e.g., Ex. 12:4; 2 K. 7:11; 15:5; Isa. 36:3; 1 Tim. 5:14); in certain cases for phrases with "house" RSV has "at home" (Acts 5:42). *See* HOME; HOUSE OF GOD; HOUSEHOLD.

HOUSE, FATHER'S. *See* FATHER'S HOUSE.

HOUSE, GARDEN. *See* BETH-HAGGAN.

HOUSE OF GOD [Heb. *bêṯ (hā)'ᵉlōhîm;* Gk. *oíkos theoú*]. In Judges, 1 and 2 Chronicles, Ezra, Nehemiah, Psalms, etc., *bêṯ (hā)'ᵉlōhîm* designates the sanctuary of the tabernacle (Josh. 9:23; Jgs. 18:31), the temple (1 Ch. 6:48 [MT 33]; 9:11, 26f.; 2 Ch. 3:3; Ps. 42:4 [MT 5]; etc.), and the second temple (Ezr. 2:68; 3:9; Neh. 6:10; etc.; cf. Mt. 12:4 par.). The designation "house of the Lord" is used synonymously. On Gen. 28:17, 22, *see* BETHEL.

In the NT *oíkos theoú* is used spiritually of the church

or community of believers (1 Tim. 3:15; He. 10:21; 1 Pet. 4:17; cf. 1 Cor. 3:9, 16f.; 1 Pet. 2:5).

HOUSEHOLD [Heb. *bayiṯ*; Gk. *oikía, oíkos*]. A term that signifies the members of a family and others living together as a social unit, often under the same roof. It is used interchangeably with "house" and "family," and the translations vary considerably in their use of these terms, the AV frequently retaining the translation "house."

Households could include husbands, wives, concubines, children, close relatives, slaves, and even strangers. For example, Noah's household (Gen. 7:1; AV "house") consisted not only of himself and his wife, but also of his three sons and their wives. Gen. 14:14 says that 318 trained men who had been born into Abraham's household tried to rescue Lot. Later Abraham was commanded to put the sign of the covenant on all the male members of his household: "every male throughout your generations, whether born in your house, or bought with your money from a foreigner who is not your offspring" (Gen. 17:12; cf. 17:27). The *bayiṯ* (house or household) of Jacob (Gen. 46:27) included all his offspring — his unmarried daughters, his sons, their wives, and his sons' sons and daughters — seventy in all (46:1-27).

Yet a *bayiṯ* (household, family, or house) must not be thought of as being too large. It is not to be identified with a clan (*mišpāḥâ*), which is a subdivision of a tribe; rather, it is a subdivision of the clan (Josh. 7:14).

The Scriptures are much more corporate minded than we are today, and the OT use of "household" reflects that difference. God does not deal with each believer in a merely atomistic fashion. Once Abraham believed, then his whole household was considered to be in the covenant and the males were required to receive the covenant sign, circumcision. God gave a charge of holiness not only to Abraham, but also to his whole household (Gen. 18:19). He commanded various religious ceremonies to be observed by the household as a unit: the Passover (Ex. 12:3f.; 2 Ch. 35:6), the sin offering on the Day of Atonement (Lev. 16:17), the sacrifice of the firstborn of the flocks (Dt. 15:20), tithing (Dt. 14:26; 12:7), and eating of the Levitical tithe (Nu. 18:31). God punished not only Korah, Dathan, and Abiram, but also their households (Nu. 16:32; Dt. 11:6). Conversely, when God blessed Obed-edom for taking care of the ark, He also blessed "all his household" (2 S. 6:11).

On the human level, Jacob treated his whole household as a religious unit, commanding them to put away their foreign gods and to accompany him to Bethel, where he would set up an altar (Gen. 35:2f.). When Jacob was in danger of famine, Joseph invited him and his household to Egypt (Gen. 45:11). When Joshua saved Rahab for her act of faithfulness, he also saved her father's household and all who belonged to her (Josh. 2:18; 6:23-25). When he punished Achan for his sin, he also punished his household — "his sons and daughters, and his oxen and asses and sheep, and his tent, and all that he had" (Josh. 7:24).

The NT is likewise corporate minded. When Jesus healed the son of a royal official, not only did the official believe, but also all his household (Jn. 4:53). And when Jesus saved Zacchaeus, salvation came to his household also (Lk. 19:9). So closely are the members of a household related that Jesus observed that if its master is called Beelzebul, how much more its members (Mt. 10:25). In Acts we read that households were saved and baptized along with their heads: the household of Cornelius (10:2; 11:14), Lydia (16:15), the Philippian jailer (16:31-34), and Crispus (18:8). Paul tells of baptizing the household of Stephanus (1 Cor. 1:16; 16:15). He prayed that God would show mercy to the household of Onesiphorus (2 Tim. 1:16), and he sent his greetings to them (2 Tim. 4:19). The Christians in Caesar's household, i.e., the people in and about the emperor's palace, sent their greetings to the church in Philippi (Phil. 4:22; Rom. 16). *See also* CAESAR'S HOUSEHOLD.

In harmony with this pattern, the Bible figuratively calls the entire Church the household of God (Eph. 2:19; 1 Tim. 3:15; 1 Pet. 4:17) and the household of faith (Gal. 6:10).

See FAMILY. E. H. PALMER

HOUSEHOLD, CAESAR'S. *See* CAESAR'S HOUSEHOLD.

HOUSEHOLDER [Gk. *oikodespótēs*] (Mt. 13:27, 52; 20:1, 11; 21:33; 24:43; Mk. 14:14; Lk. 12:39; 13:25; 14:21; 22:11); AV also "goodman of the house," "master of the house"; NEB also "master (of the house)," LANDOWNER, EMPLOYER. The word denotes the master or owner of a "household," i.e., of servants. The Greek term emphasizes the authority of the master.

HOUSETOP. *See* HOUSE III.E.

HOWLING CREATURES [Heb. *ʾō(a)ḥ*, only in the pl. *ʾōḥîm*] (Isa. 13:21); AV DOLEFUL CREATURES; NEB PORCUPINES. The animal referred to by this word is not known, although the eagle-owl and the hyena are possible identifications (*CHAL*, p. 9). The context describes the animal inhabitants of the destroyed and abandoned city of Babylon. It is inhabited by scavenger birds, wild beasts, and "satyrs" (*see* DEMON I) instead of people. The hyena is likely because of its habit of digging up graves in order to eat the bones. Its howling cry adds to the eerie desolation of the landscape. For similar prophetic oracles describing a destroyed city or country, see Isa. 34:13f. (Edom) and Jer. 50:39f. (Babylon).

"Hyenas" in v. 22 translates a different word, Heb. *ʾiyîm* (AV "wild beasts"; NEB "jackals").

See also HYENA. H. W. LAY

HOZAI hō'zī [Heb. *ḥôzay*, or as it stands at the close of the verse in question, 2 Ch. 33:19, *ḥôzāy;* LXX *tōn horōntōn;* Vulg. "Hozai"; AV, RSV, NEB, "the seers"; AV mg. HOSAI; RSV mg. HOZAI. LXX not improbably reads (Heb.) *haḥōzîm* as in v. 18, an easy error, since there we find *wᵉḏiḇrê haḥōzîm*, "the words of the seers," and here *diḇrê ḥôzāy*, "the words of Hozai." Kittel, following Budde, conjectures as the original reading *ḥôzāyw*, "his (Manasseh's) seers"]. A historiographer of Manasseh king of Judah. Thought by many of the Jews, incorrectly, to be the prophet Isaiah, who, as we learn from 2 Ch. 26:22, was historiographer of a preceding king, Uzziah. This "History of Hozai" has not come down to us. The prayer of Manasseh, mentioned in 33:12f., 18f., and included in this history, suggested the apocryphal book, "The Prayer of Manasseh," written, probably, in the 1st cent. B.C. J. G. MCALLISTER

HUBS [Heb. *ḥiššurîm*] (1 K. 7:33); AV SPOKES. The term appears in a description of the ten bronze stands constructed for Solomon by Hiram from Tyre. KoB (p. 342) supports the RSV rendering. If, as it seems, the NEB rearranges the parts of the wheel in a progression outward from the axle, that version would also agree.

G. WYPER

HUKKOK huk'ok [Heb. *ḥûqōq*] (Josh. 19:34). A town on the border of Naphtali named with Aznoth-tabor. It is

usually identified with the village of Yāqûq, which is about 5 km. (3 mi.) W of Chinnereth (cf. *GTTOT*, §§ 334, 337).

HUKOK hōō'kok. *See* HELKATH.

HUL hul [Heb. *ḥûl*]. One of the "sons" of Aram in the list of nations descended from Noah, but a people of uncertain identity and location (Gen. 10:23; 1 Ch. 1:17).

HULDAH hul'də [Heb. *ḥuldâ*–'weasel'; Gk. *Holda*]. A prophetess who lived in Jerusalem during the reign of Josiah. She was the wife of Shallum, keeper of the wardrobe, and resided in the "Mishneh" or second part or quarter of Jerusalem (location unknown; *see* JERUSALEM III.D.5.d). The standing and reputation of Huldah in the city are attested by the fact that she was consulted when the Book of the Law was discovered. The king, high priest, counselors, etc., appealed to her rather than to Jeremiah, and her word was accepted by all as the word of Yahweh (2 K. 22:14-20; 2 Ch. 34:22-29). Her prophecy relating to God's judgment on the nation began to be fulfilled with the death of Josiah at Megiddo in 609 B.C. While it was unusual for a woman to act in such a prophetic capacity, there is no doubt that her utterances were genuine in nature, as were the words of Anna when Christ was presented in the temple. J. J. REEVE R. K. H.

HULEH hōō'lə. *See* GALILEE III.E; JORDAN IV.

HUMAN [Heb. *'āḏām*, *'îš* (Isa. 52:14; cf. 53:2, NEB), *nepeš* (Ezk. 22:25); Gk. *ánthrōpos*, *anthrōpinos*, *sárx*, *sárkinos*]; AV also "of man," "souls" (Ezk. 22:25), "flesh," etc.; NEB also "in a man" (Lev. 5:3), "men" (Ezk. 22:25), "living thing," "man-made" (Col. 2:8), etc.; **HUMANKIND** [Gk. *anthrōpinos*] (Jas. 3:7); AV, NEB, MANKIND; **HUMANLY (SPEAKING)** [Gk. *katá ánthrōpon*] (1 Cor. 15:32); AV "of men"; NEB "as the saying is."

I. OT.–The Heb. *'āḏām* can denote an individual, "someone," or "man" in the generic sense, "mankind" (cf. Lev. 13:2; Gen. 6:2). Heb. *'āḏām* also functions as the proper name for Adam (Gen. 4:1), who was formed from the earth, *'ᵃḏāmâ* (2:7). The precise derivation of the word is debated (cf. *TDOT*, I, *s.v.* "'ādhām" [Maass]).

"Human" designates what is peculiar to mankind in distinction from other creatures (e.g., "cow," Ezk. 4:15; "cherub," 10:8), or what is characteristic of mankind (e.g., "semblance," Isa. 52:14; "hands," Ezk. 1:8). In Job 34:20; Dnl. 2:34, 45; 8:25, the RSV supplies "human" to emphasize the distinction between divine and human action.

II. NT.–A. Common Uses. As in the OT, "human" is used to distinguish mankind both from other creatures (Jas. 3:7; 2 Pet. 2:16; Rev. 9:7; 18:13) and from God (Acts 17:25; Rom. 3:5; 6:19; 1 Cor. 2:13; 9:8; Gal. 3:15; Phil. 2:8). In 2 Cor. 3:3 the *kardíai sárkinai* (lit. "hearts of flesh") are the new tablets on which Christ has written, in contrast to the old tablets of stone (cf. Ex. 24:12). The phrase "human being" occurs several times (Mt. 24:22; Mk. 13:20; Rom. 2:9; 3:20; 1 Cor. 1:29; Jas. 3:8), and there are frequent references to human practices or institutions (1 Cor. 4:3; Col. 2:8, 22; 1 Pet. 2:13; 4:2; Rev. 13:18).

B. Katá Sárka *in 2 Cor. 5:16.* Paul's usage here has sparked widespread and continuing discussion (cf., e.g., Allo, Fraser, Windisch). One's understanding of "human" or "worldly" (*katá sárka*) in 2 Cor. 5:16 depends on solutions to the following problems.

1. The Nature of the Phrase. Fraser has argued persuasively that since Paul's use of *katá sárka* to modify a noun has in all other cases placed the phrase immediately after the noun, the phrase in 5:16a and b, preceding *Christón* in 16b and separated by a verb from *oudéna* in 16a, must be used adverbially to modify *oídamen* in 16a and *egnókamen* in 16b.

2. The Nature of Paul's Knowledge of the Historical Jesus. The issue in 5:16 is not Christology but epistemology. Thus 5:16 tells us nothing about Paul's attitude toward the Jesus of history, and certainly it does not contrast the Jesus of history and Paul's Christ of faith (so Barrett contra Bultmann, *Primitive Christianity*, p. 197).

3. The Temporal Terms apó toú nýn *and* allá nýn. If 5:16 and 17, each introduced by *hóste*, are taken as parallel (so Allo, Barrett, Fraser, Martyn), the contrast in 5:16 is between *katá sárka*, the "old" way of knowing before one becomes a Christian, and *en Christō*, the "new" way of knowing "in Christ." Since the person in Christ remains human (e.g., 2 Cor. 3:18; 4:6; Col. 1:28), the phrase *katá sárka* cannot mean that Christian knowledge is antihuman; the NEB "worldly standards" communicates the idea more effectively.

4. The Context. Far from being a gnostic gloss that denies the crucified Jesus (i.e., *katá sárka Christón*), as Schmithals argues, 5:16 is Paul's own statement of the contrast between the knowing that is empowered by Christ and the knowing that is empowered by *sárx* (for the contrast here between weakness and power, cf. Schütz, pp. 240f.). The contrast is not between exalted and crucified Christ. Rather, the contrast, evident also in Gal. 4:21-31, is the apocalyptic one between old and new aeons (Jewett, pp. 453ff.), or between old and new environments, old and new orders and powers.

Accordingly, *sárx* is not used by Paul to express dualism between man's body and mind or soul; rather it refers to "the whole man wrongly directed" (Barrett, p. 72; cf. Rom. 8:4f.; 1 Cor. 3:3, jealousy and strife as behavior originating in *sárx*, synonymous with *katá ánthrōpon*, RSV "behaving like ordinary men"; 2 Cor. 1:17, plans being made *katá sárka*; 2 Cor. 11:18, boasting that is *katá sárka* in contrast to speaking *katá kýrion*; Col. 2:11, "the body of the flesh"; Col. 2:18, "the mind of the flesh").

C. Other Uses of Katá Sárka. Knowledge "according to the flesh" is perverted by its self-serving character. "What Paul projects is man's habit (which affects Christians as well as Jews) of making a Messiah in his own image" (Barrett, p. 171). Thus *katá sárka* thinking is not guided by the Holy Spirit (Rom. 8:5), not controlled by the love of Christ (2 Cor. 5:14; cf. Mk. 10:35-45), whether one is considering other people (2 Cor. 5:16a) or Christ (16b). In the theological sense this is subhuman thought, less than that for which humanity was created, and contrary to thinking that is captivated by Christ (cf. 1 Cor. 9:19-23; 2 Cor. 1:12f.; 5:11; 10:5b; Gal. 1:10). Truly human thought is eschatologically determined, destined by the *kainḗ ktísis* (2 Cor. 5:17; cf. Schütz, 177f.)

Readers of the Greek NT will observe that Paul sometimes uses *katá sárka* nonpejoratively to designate kinship (RSV "according to the flesh" in Rom. 1:3; 4:1; 9:3, 5; 1 Cor. 10:18). Elsewhere (Rom. 8:3-5, 12f.; 1 Cor. 1:26; 2 Cor. 1:17; 5:16; 10:2f.; 11:18; Gal. 4:23, 29; 5:17; Eph. 6:5) the phrase carries the negative meaning found in 2 Cor. 5:16.

HUMAN SACRIFICE. *See* SACRIFICE, HUMAN.

HUMBLE [(verb) Heb. *'ānâ* (Gen. 34:2; Ex. 10:3; Dt. 8:2f., 16; Ezr. 8:21; Job 30:11; Ps. 55:19 [MT 20]; 89:22 [MT 23]; Isa. 58:3, 5; Ezk. 22:10; Dnl. 10:12), *kāna'* (Lev. 26:41; 1 K. 21:29; 2 K. 22:19; 2 Ch. 7:14; 12:6f., 12; 30:11; 32:26; 33:12, 19, 23; 34:27; 36:12), *šāpēl* (Isa. 5:15), *šāḥaḥ* (Isa. 2:9, 11, 17), *bāḵâ* (Ps. 69:10 [MT 11]), *dāḵā'* (Jer. 44:10), *qālâ* (Prov. 12:9); Aram. *šᵉpēl* (Dnl. 5:22); Gk. *tapeinóō* (Job 22:23, LXX; Mt. 18:4; 23:12; Lk. 14:11; 18:14; 2 Cor. 12:21; Phil. 2:8; Jas. 4:10; 1 Pet. 5:6)]; AV also ANSWER, AFFLICT, "bowed down," "wept and chastened" (Ps. 69:10), "lightly esteemed" (Prov. 12:9), etc.; NEB also DISHONOURED; MORTIFY (Ezr. 8:21; etc.), MORTIFICATION (Isa. 58:5), BRING LOW, SPOKEN, SUBMIT, DEFER, SHOW REMORSE, HUMILIATE, etc.; [(noun or adjective) Heb. *'ānî* (2 S. 22:28 par. Ps. 18:27 [MT 28]; Prov. 3:34; Isa. 66:2; Zeph. 3:12; Zec. 9:9), *'ānāw* (Ps. 25:9; 149:4; Zeph. 2:3), *ṣānû(a)'* (Prov. 11:2), *šāpāl* (Isa. 57:15; Ezk. 17:14), *tᵉḥinnâ* (Jer. 37:20; 38:26); Gk. *tapeinós* (2 Cor. 10:1; Jas. 4:6; 1 Pet. 5:5), *praûs* (Mt. 21:5), *tapeinóphrōn* (1 Pet. 3:8)]; AV also AFFLICTED, LOWLY, POOR, MEEK, SUPPLICATION; NEB also MEEK, DOWN-TRODDEN, AFFLICTED, PETITION, FEEBLE, GENTLENESS, etc.; **WALK HUMBLY** [Heb. *ṣāna'*] (Mic. 6:8); NEB WALK WISELY; **HUMBLEST** [Heb. *ṣā'îr*] (1 S. 9:21); AV LEAST; NEB LEAST IMPORTANT; **HUMILITY** [Heb. *'ᵃnāwâ*] (Prov. 15:33; 18:12; 22:4; Zeph. 2:3); AV also MEEKNESS; NEB also "a humble heart"; [Gk. *tapeinophrosýnē*] (Acts 20:19; Phil. 2:3; 1 Pet. 5:5); AV also "lowliness of mind"; NEB also HUMBLY. "Humble" has a range of meanings that extends from vile acts to Christian virtue.

I. OT
  A. As a Verb
    1. Sexual Intercourse
    2. God's Sovereignty and Its Recognition
    3. Fasting
  B. As a Noun or Adjective
    1. "Afflicted" and/or "Submissive"
    2. Wisdom
    3. *Šāpāl* and *Tᵉḥinnâ*

II. NT
  A. The Transformation of Vocabulary
  B. The Transformation of Values

I. OT.–A. As a Verb. 1. Sexual Intercourse. Heb. *'ānâ* is used in Gen. 34:2 of Shechem's rape of Dinah. Ezekiel condemns the men of Jerusalem who "humble" (*'ānâ*) women "unclean in their impurity" (22:10). The verb is thus a euphemism for sexual intercourse (cf. Dt. 21:14; 22:24, 29) and is frequently equivalent to rape (Jgs. 19:24; 20:5; 2 S. 13:12, 14, 22, 32; Lam. 5:11). The broader meaning which renders the word usable in such contexts is "make submissive."

2. God's Sovereignty and Its Recognition. The term *'ānâ* is related to the presence and use of power and coercion, of sovereignty and authority. It makes no distinction between *de jure* and *de facto* power, between legitimate and illegitimate authority; thus the verb has two main referents: "make submissive" and "afflict." Similarly, the cognate noun and adjective may denote either "the submissive" or "the afflicted."

Both meanings are present in Dt. 8. The first verse exhorts the people of God to keep His commandments, to be submissive to His will. The ground for that exhortation is the memory of the wilderness wanderings and how God humbled His people there (vv. 2f.). He afflicted them surely, but as discipline (v. 5). He "humbled" them, but to do them "good in the end" (v. 6). God's authority and power are legitimate as well as actual. Then follows the significant contrast by which the virtue of being humble suddenly bursts into view: "Beware lest you say in your heart, '*My* power and the might of *my* hand have gotten me this wealth'" (v. 17, italics added). The attitude of pride is not fitting for a people whose life and prosperity are due to the kindness and power of Yahweh.

That passage is paradigmatic for the Hebrew people's interpretation of their own history: when they exalted themselves God humbled them, and when they humbled themselves God exalted them. Undergirding such an interpretation of history is the conviction of the sovereignty of God: that His power and authority may not be ignored and cannot be escaped. From such an interpretation of history issues the appeal that people submit to Yahweh. Such is one of the themes of the historical books (which prefer Heb. *kāna'* to *'ānâ*). The king who humbles himself before God, who submits to God, is exalted (Ahab, 1 K. 21:29; Josiah, 2 K. 22:19; 2 Ch. 34:27; Rehoboam and princes, 2 Ch. 12:6f., 12; Hezekiah, 2 Ch. 32:26; Manasseh, 2 Ch. 33:12, 19, 23; cf. Daniel, Dnl. 10:12). The king who does not humble himself, who does not submit, is afflicted (Amon, 2 Ch. 33:23; Zedekiah, 2 Ch. 36:12; even the Babylonian kings, Nebuchadnezzar and Belshazzar, Dnl. 5:22 [Aram. *šᵉpēl*], and the Egyptian pharaoh, Ex. 10:3 [Heb. *'ānâ*]). Not only the king, however, but the whole people must submit to Yahweh (2 Ch. 7:14; cf. Jer. 44:10, Heb. *dāḵā'*). And the conviction of God's authority and power that undergirds such appeals explains the connection of "humbling" oneself with loyalty to God and performance of His commands (Lev. 26:41; 2 Ch. 7:14; 30:11; Jer. 44:10).

The conviction that God is sovereign also provided the background for the psalmists' appeals for deliverance. In Ps. 55 the people of God plead for deliverance from "the oppression of the wicked" (v. 2 [MT 3]). They voice their confidence that God will "humble" their enemies, and they give expression to the ground of their confidence, viz., that God is sovereign ("is enthroned from of old") and that their enemies have not acknowledged that sovereignty ("they keep no law and do not fear God," v. 19). Their confidence, then, is that God will humble the exalted, will make submissive the unsubmissive. God's authority and power may not be ignored and cannot be escaped. Ps. 89:22 speaks to this latter point straightforwardly: the wicked shall not humble God.

The situation is not really different with Heb. *šāpēl* and *šāḥaḥ* in Isa. 2:9, 11, 17 and 5:15. These words do approach "humiliate," but they do not — at least in these contexts — surrender the connection with the sovereignty of God. Indeed, these threats that the proud will be humiliated occur in the context of Isaiah's vision of the Lord's universal reign: "For the Lord of hosts has a day against all that is proud and lofty, against all that is lifted up and high" (2:12). Moreover, Isaiah's vision itself constitutes an appeal to Judah and Jerusalem to submit to the Lord's authority; "O house of Jacob, come, let us walk in the light of the Lord" (2:5).

It is clearly a presupposition of the foregoing discussion that the sovereignty of God is both *de facto* and *de jure*. That presupposition, however, seems to have been questioned in Job. Eliphaz tells Job to humble himself before

God, to submit to God's sovereignty (22:23, LXX *tapeinóō*; MT *bānî*). The implicit judgment in this is rejected by Job, who complains that God has "humbled" or afflicted him (30:11). The presence and use of power are clearly part of the question of Job. That God is sovereign is undenied, but the questions with which Job struggles are his own righteousness and the righteousness of God's exercise of power. He will let go of neither, but is it possible to hold to both? Job finally realizes that not even a genuinely righteous man can make any claims against Yahweh (chs. 40–42).

3. Fasting. *ʿĀnâ* sometimes means "fast" (cf. Lev. 16:29, 31; 23:27, 32; Nu. 29:7; Ps. 35:13; Isa. 58:3, 5; Ezr. 8:21; Dnl. 10:12; the RSV sometimes translates "afflict." Cf. also Ps. 69:10, where *bāḵâ* is rendered "humbled," probably on account of the following word *baṣṣôm* ["in fasting"] although it might also be a selection of the textual variant, a form of *dāḵâ*). The use of this word, however, discloses that the intention of the fast is not simply asceticism but submission to God's judgment. Ezr. 8:21 reports that the people fasted in order to humble themselves before God and to seek His will. Indeed, Isaiah issues a prophetic denunciation of the external observance when it is torn loose from its intention of submission to God and His judgment (58:3ff.). The fast God demands is submission to His will, "to loose the bonds of wickedness," "to share your bread with the hungry" (vv. 6f.). In Mic. 6:8 the contrast is with sacrifice rather than with fasting, but it is equally clear that the demand of God is not outward religious observances. The demand of God is rather to do justice, to love kindness, and to walk humbly (*ṣāna*ʿ) with God.

B. As a Noun or Adjective. 1. "Afflicted" and/or "Submissive." The noun and adjective forms, Heb. *ʿānāw* and *ʿānî*, are also capable of meaning either "afflicted" or "submissive." The suggestion of S. R. Driver in *HDB* that *ʿānāw* refers to "the submissive" and *ʿānî* to "the afflicted" seems less likely than that these were virtual synonyms, each with both connotations. Driver's suggestion has some plausibility when, e.g., Zephaniah instructs "the humble" [*ʿānāw*] of the land, who do his commands," to seek righteousness and humility (2:3) and then promises to preserve a remnant "humble [*ʿānî*] and lowly" (3:12). But the plausibility vanishes when this remnant is contrasted with the unsubmissive "proudly exultant ones" who "have rebelled against me" (3:11), and when it is described as a people who "seek refuge" in God and do His will (v. 13). It seems here that *ʿānî* at least includes the idea of submission. Isa. 66:2 also counts against a clear distinction, for it uses *ʿānî* in a phrase that clearly refers to a man who is submissive to the authority of God, a man who "is humble and contrite in spirit and trembles at my word." Such a man stands in obvious contrast to those who fasted without submitting themselves to God's reign and purposes (Isa. 58:3ff.). These — in their religious pride — thought themselves to have earned God's blessing. The humble man is he who acknowledges that he has no claim on God but that God has a total claim on him. If religious observances, whose meaning is the acknowledgment of that claim of God, can tempt a man away from that acknowledgment, it is understandable that power and riches too can tempt a man to pride. And thus the connection of affliction with humility, of the poor and the powerless man with the humble man, can also be seen. Because of that connection it is very often difficult to discern whether "the humble" refers to "the afflicted," to "the submissive," or to both.

To the humble (*ʿānāw*) is promised victory in war (Ps. 149:4). David praises God for giving the victory to the humble (*ʿānî*) while He afflicts the haughty (Ps. 18:27 par. 2 S. 22:28, David's song of victory over Saul).

2. Wisdom. Of the conviction that God exalts the humble and humbles the exalted, Proverbs makes a general prudential rule, a piece of wisdom: "Toward the scorners he is scornful, but to the humble [*ʿānî*] he shows favor [*ḥēn*]" (3:34). Similarly, 11:2 teaches that the effect of arrogance is disgrace, "but with the humble [*ṣānûʿ*] is wisdom [*ḥoḵmâ*]." *Ṣānûʿ* is a hapax legomenon derived from *ṣānaʿ* (cf. Mic. 6:8); but given the antithesis and the wisdom context, it is probably to be understood as "not thinking of oneself more highly than one ought to think." Such a characteristic is not likely to bring the kind of disgrace which arrogance effects. (The wisdom of Prov. 12:9 is even more difficult to understand. The AV "lightly esteemed" [*qālâ* in contrast to *kāḇēḏ*], however, is probably a better rendering than RSV "humble.")

The same general rule is expressed elsewhere in Proverbs in terms of "humility" (Heb. *ʿănāwâ*). As the fear of the Lord is the way to wisdom, so humility is the way to honor (15:33). As the result of pride is destruction, so honor is the result of humility (18:12). And 22:4 expresses forthrightly that "the reward for humility and the fear of the Lord is riches and honor and life."

These proverbs all point to the fact that the sovereignty of God cannot be ignored without consequence. A danger, however, is that subtlety of pride can use even humility as a claim upon God. The best remedy for this is the instruction of Zeph. 2:3 to the humble that they should seek humility (*ʿănāwâ*) and righteousness. Similarly, in Ps. 25:9 the humble are taught what is right. Their humility makes no claims upon God but listens to His claims upon them.

3. Šāpāl and Tᵉḥinnâ. The Heb. *šāpāl*, a cognate of the verb *šāpēl*, approaches the meaning "humiliated," and maintains the connection with the sovereignty of God. Indeed, this connection is a presupposition of the comfort Isaiah offers the afflicted people: God dwells in the high and holy place *and* with the humble (Isa. 57:15; cf. Ezk. 17:14).

The "humble plea," Heb. *tᵉḥinnâ*, of Jer. 37:20; 38:26 is derived from the verb *ḥānan* and is thus related to *ḥēn* ("favor"). *Tᵉḥinnâ* usually refers to supplication for God's favor. Here it refers to Jeremiah's supplication to Zedekiah. In either case it is a recognition of the presence of authority and power and represents a plea rather than a claim. The request is based on the generosity and favor, the *ḥēn*, of the one who is asked rather than on the rights or merits of the one who is asking.

In summary, the OT calls people to submit themselves to the God who is sovereign and demands righteousness, who humbles the proud and blesses the humble.

II. NT.–A. The Transformation of Vocabulary. As is well known, the Greek moralists used the term *tapeinós* disparagingly. It was used in the sense of "groveling" and "mean-spirited" (*DNTT*, II, 259f.). Epictetus placed this quality at the very head of those he found censurable (*Discourses* iii.2.14). But because the Christian gospel and the Christian community did not lose touch with their Jewish heritage, they were able to change the status of this word in the Greek vocabulary. This transformation is represented within the NT itself. Paul iterates the charge of his Corinthian opponents: "I who am humble when face to face with you, but bold to you when I am away" (2 Cor. 10:1; cf. 10:10). "Humble" is meant disparagingly here. But Paul's response first appeals to the "meekness and gentleness of Christ" and finally vindicates humility and convicts his opponents: "For it is not the man who com-

mends himself that is accepted, but the man whom the Lord commends" (2 Cor. 10:18; cf. 12:21).

Tapeinophrosýnē occurs in a bad sense in Col. 2:18, 23. "Self-abasement" (RSV) and severity with oneself is not to be demanded. That is part of the old aeon. But the Greek term soon recurs in a list of virtues with which the Christian is to clothe himself; the person who dies and was raised with Jesus Christ is to put on "lowliness" (RSV, *tapeinophrosýnē*, Col. 3:12; cf. Eph. 4:2). It is part of the new aeon. The possibility of a wrong kind of humility clearly exists and is condemned by the Christian community. The "humility" of the old aeon is to be distinguished from the humility of the new aeon in that it is really a device of pride; it lets go of the head, Christ, and destroys the unity of the new community (Col. 2:18f.). The self-abasement whose end is some claim upon God or some favorable comparison with the neighbor is condemned. That kind of humility is at bottom religious pride. The Christian virtue makes no claim on God but submits to the reign of God; it makes no claim over against the brother but serves, forgives, and loves the brother and thus serves the harmony and peace of the new community.

B. The Transformation of Values. The Magnificat of Mary stands at the beginning of the NT story and indicates both the continuation of the OT heritage and a radical revision of values. Mary praises the God who puts down the mighty and exalts the humble (Gk. *hýpsōsen tapeinoús*, RSV "exalted those of low degree," Lk. 1:52). In Mary's understanding, God's blessing upon her is a part of the decisive episode of God's activity of humbling the proud and exalting the humble.

The same theme is present in the preaching of Jesus Himself. Mt. 23:12 and Lk. 14:11; 18:14 all attribute to Jesus the saying, "For everyone who exalts himself will be humbled, and he who humbles himself will be exalted." Moreover, the same thought is expressed in Mt. 20:16; Mk. 10:31; Lk. 13:30, "Some are last who will be first, and some are first who will be last"; also in Mk. 9:35 and Mt. 20:27, "If any one would be first, he must be last of all and servant of all," and in Mt. 18:4, "Whoever humbles himself like this child, he is greatest in the kingdom of heaven." The profusion of this teaching — occurring in each of the Synoptic Gospels and at least nine times in the Synoptics altogether — is an indication both that the teaching is from Jesus Himself and also that it was very important in the early Church (cf. Minear, pp. 83-97).

In Mt. 23:12 the saying occurs in the context of Jesus' denunciation of the scribes and Pharisees. They taught humility (cf. SB, I, 191ff.), but they did not practice it. Here Christ prophetically announces the kingdom, with its promise to the humble, its judgment on pride — even moral and spiritual pride — and its radical demand to submit to the rule of God.

In Luke the saying appears twice in the central section (9:51–19:10): once as the conclusion to the parable about the places of honor at a marriage feast (14:11) and once as the conclusion to the parable about the Pharisee and the publican (18:14). The publican made no claim on God; he humbly made his plea for God's mercy; and "this man went down to his home justified rather than the other" (18:14). We do the parable no injustice if we take its lesson to be the doctrine of justification by grace through faith; but injustice is done to the parable — and that doctrine — if we take it to be teaching merely a theological abstraction or a purely individualistic and introspective reality. The lesson of justification by grace through faith speaks to a social reality. The Pharisee's lack of humility before God entails arrogance toward others. The publican's humility establishes solidarity and unity with all people.

Such a social reality is a matter of direct instruction in Lk. 14:11 and Mt. 18:4. Arrogance in social relations does not belong in the eschatological community. The people who know their salvation to be of grace do not act presumptuously toward their neighbors. The reign of God constitutes a realm in which all previous ideas of prestige, privilege, and protocol are transformed. To submit to God's kingship is to participate in a new social reality. "Who is the greatest in the kingdom of heaven?" (Mt. 18:1). The one who submits to the rule of God.

Jesus could not be accused of the error of the Pharisees; He practiced humility as well as taught it. His life is an even more eloquent testimony to the meaning of humility than His teachings. He was submissive to the purposes and will of God, and although He was master and lord of His disciples, yet He lived among them as one who served (Lk. 22:27; Jn. 13:13). The prophecy of Zechariah, fulfilled in Christ, gives eloquent expression to this theme: "Lo, your king comes to you . . . humble and riding on an ass" (9:9).

Paul, referring to the life of Jesus, appealed to the members of the Christian community to give up their pride of place, to seek unity, equality, and service, "in humility [to] count others better than yourself" (Phil. 2:3). He instructed them to "have this mind among yourselves, which you have in Christ Jesus," who made no claim on God but humbled Himself, submitting to the purposes and will of God (vv. 5-8). Therefore God exalted Him (v. 9), for God exalts the humble. Jesus' life, death, and resurrection are thus the decisive episode in God's historical activity of exalting the humble.

James and 1 Peter refer directly to the OT heritage (Jas. 4:6 and 1 Pet. 5:5 quote Prov. 3:34). Both preserve the connection of humility with the sovereignty of God and obedient submission to His will. On the basis of the proverb James issues the call to "submit yourself therefore to God" (Jas. 4:6); or as he puts it later, "Humble [*tapeinóō*] yourselves before the Lord and he will exalt you" (v. 10). Similarly Peter concludes, "Humble [*tapeinóō*] yourselves therefore under the mighty hand of God, that in due time he may exalt you" (1 Pet. 5:6). What James joins simply by the coordinating conjunction "and" (*kaí*, probably parataxis), Peter joins by the subordinating "(in order) that" (*hína*). While Peter's expression can be taken as result rather than purpose, there is nevertheless in his advice the same subtle danger we noted in the proverb itself: that humility be sought with a view to the consequent exaltation, that self-abasement be made a means to self-exaltation.

Both James and Peter are alert to the social consequences of submission to the reign of God. Peter introduces his quotation of the proverb to back his appeal that all members of the community clothe themselves with humility (*tapeinophrosýnē*) toward one another (1 Pet. 5:5; cf. *tapeinophrōn*, "humble-minded," in 3:8). Members of the Christian community ought to have a readiness to serve and to forgive.

James 2 recalls Jesus' parable of places of honor at the wedding banquet. Submission to the reign of God places one in an eschatological community in which there can be no partiality, for the pride of position and protocol is part of the old aeon. This conviction is already present in Jas. 1:9f. The RSV translates *tapeinós* as "lowly" and *tapeinōsis* as "humiliation"; nevertheless, the meaning is clear: God exalts the humble and humbles the exalted.

In conclusion, then, the heritage is important, but its fulfillment in Jesus Christ and the radical transformation of values God wrought in Him are decisive. From different angles of vision, different authors, genres, and bases,

the NT speaks with one voice the conviction that the God who reigns is also the God who raises the humble, and that His reign establishes a new social reality. With one voice the NT calls people to accept that reign and its social consequences.

HUMOR IN THE BIBLE.

I. The Source and Appropriateness of Biblical Humor
II. The Nature of Humor
  A. The Role of the Incongruous
  B. "Laughter" and "Joy"
III. Types of Biblical Humor
  A. Human Personality
  B. Situation
  C. Wit
IV. Conclusion

I. The Source and Appropriateness of Biblical Humor.—Our God is the God of laughter, merriment, and joy, as well as the God of righteousness, judgment, and love. When He created mankind in His own image, God imparted that mysterious capability called "a sense of humor." Those of His servants who recorded the words of the Bible by the inspiration of the Holy Spirit were in no degree diminished in their rich human personalities. Hence, it is not surprising that the Bible, despite its austerity, high seriousness, and urgency, should display many humorous events, personalities, and instances of wit. Indeed, it undoubtedly contains more humor than we realize, for it is both an ancient and a largely oriental book, and a sense of fun is often dependent on cultural and linguistic features peculiar to certain times and regions. A notoriously poor traveler from one language to another is wit, or verbal humor, arising from such things as paronomasia, alliteration, onomatopoeia, double meanings, clever rhythms, and the like.

II. The Nature of Humor.—Questions about what humor is and why it should stimulate that strange paroxysm called laughter have bewildered people through the ages. They need not detain us here. Two general characteristics of humor, however, are germane to our purpose, and must be mentioned.

A. The Role of the Incongruous. First, as to the nature of humor, its taproot seems to lie close to a recognition of the incongruous, the sense of difference from what normally is to be expected. It is, e.g., normal for people to speak intelligibly; so, when the unfortunate laborers on the Tower of Babel lapse involuntarily into gibberish (Gen. 11:7), and when (we may imagine) their shouts for more bricks produce only angry bewilderment from their fellows, we laugh at the incongruity. The original author underlines the fun with a pun: "Therefore its name was called Babel [*bāḇel*], because there the Lord confused [*bālal*] the languages of all the earth" (Gen. 11:9).

To be amused by the incongruous, it is important to realize, requires that one have a sense of the congruous. Confusion is funny only to the unconfused. Laughter is the judgment of order upon disorder. As George Meredith points out in his *Idea of Comedy and the Uses of the Comic Spirit* (1877), only an orderly society can recognize the incongruity of folly and laugh it off the stage. Even evil, if considered apart from the horror of its consequences, is laughably absurd, as Milton's unfallen angels discover when they view the arrogant posturings of Satan and his fellow rebels, and rejoice in their sprawling defeat at the hands of the Son (*Paradise Lost*, Book vi). There is much similarly exultant laughter in the Bible.

B. "Laughter" and "Joy." The second general point to be made about humor, as we treat the term in this writing, is that it is distinguishable from simple joy, though the outward manifestations of the two may be similar. "A glad heart makes a cheerful countenance" (Prov. 15:13). The Bible has much to say about the joy, the sheer happiness, of the redeemed; but these passages are not to be touched on here.

III. Types of Biblical Humor.—Humor arises most commonly from three sources: (1) individual personality; (2) events and situations; (3) wit (essentially wordplay, as defined above). In most instances, at least two of these categories operate at the same time.

A. Human Personality. We start with humor arising from personality, for the word "humor" itself starts with it. At least from the time of Hippocrates (*ca.* 400 B.C.), the term has related to the imagined four chief "humors" (or fluids — Latin *umor*) of the body which were anciently believed to determine the distinctive personality of every individual. To medieval interpreters Jonah, e.g., was a "choleric" man, owing to an excess of yellow bile. An excess of black bile bred melancholy, as in Jeremiah. An excess of phlegm produced phlegmatic Lot. And an excess of blood produced the warlike Joab. Needless to say, neither the Bible nor we view matters in this naive way; but from of old laughter has been caused by the quirks, foibles, and excesses of human personality.

Very early in the biblical story we find a deplorable but wryly amusing human trait: the tendency to blame someone else — anyone else — for one's own follies. "Rightly viewed," Adam in effect tells the Lord after Adam's sin, "it's not really my fault at all. The woman (whom, I must remind you, you gave me) made me do it." "Don't look at me," responds Eve, "the serpent tempted me to eat the fruit" (cf. Gen. 3:12f.). More endearing is the amusement we both share with, and aim at, Sarah, that lively, strong-willed woman, when the Lord promises her and Abraham a son in their old age (Gen. 18:10). Sarah, listening at the tent door, cannot refrain from laughing to herself (at the incongruous, incidentally), and is abashed when the Lord asks Abraham: " 'Why did Sarah laugh . . . ?' But Sarah denied, saying, 'I did not laugh'; for she was afraid. He said, 'No, but you did laugh' " (Gen. 18:13-15). Our kindly amusement at Sarah's discomfiture blends into a lovely culmination; for Sarah, after the birth of the promised son, says: "God has brought me laughter, and everyone who hears about this will laugh with me" (Gen. 21:6, NIV). So they name their son Isaac (Heb. *yiṣḥāq*, "laughter" or "he laughs"), from whose line comes the Savior, bringing joy and laughter not only to Sarah, but to all the company of the redeemed.

Jacob is one of the most fascinatingly complex personalities of the Bible, keeping us in a whirlwind of varying emotions, ranging from admiration for his persistence and energy to amusement triggered by his irrepressible trickery. To read of Jacob's long battle of wits with Laban over wives and sheep (Gen. 29–31), including Jacob's employment of primitive eugenics in the latter case, is to enjoy the kind of laughter accessible at once to the most primitive and the most sophisticated cultures. The narrative is capped with a delightful instance of litotes: "And Jacob noticed that Laban's attitude toward him was not what it had been" (Gen. 31:2, NIV). Even Jacob's wrestling match with the Lord (32:24-28) bears a kind of glowing corona of amusement around the luminous spiritual center, for the arrogant Jacob (whose name signifies

HUMOR IN THE BIBLE

"supplanter" or "heel-grabber"), now walking with a limp, is renamed "Israel," to be variously translated "God persists" or "rules," but permissibly to be colloquially rendered "God won the match!"

From the scores of delectably quirky personalities of the OT, our last illustration is Jonah. This taciturn, irascible character delights from beginning to end. His story starts abruptly, when God commands Jonah to go to Nineveh and pronounce judgment upon it (Jonah 1:1f.). Jonah's response is equally abrupt. Without a word (so far as the record shows), Jonah departs at top speed — in the opposite direction, not stopping until he comes to the port of Joppa where he takes ship for Tarshish (1:3)! When the great sea storm arises and lots have been cast, fixing Jonah as the cause, his advice to the sailors is typically dour and artless: "Take me up and throw me into the sea" (v. 12). His face, as he was swung by reluctant hands (for the sailors had tried to save him by reaching shore) arching him into the tumultuous waves, was no doubt expressionless. Rescued from the great fish God had provided, Jonah finally, and with the dark misgiving that in the end God would graciously withhold His hand from Nineveh, goes to the great city and pronounces its doom forty days hence. But his forebodings are realized. God, seeing Nineveh's repentance, spares the city; whereupon Jonah cries, in effect: "I knew it! Didn't I say so when I was back home — that you are a gracious God, merciful and slow to anger? I knew you'd never go through with it. That's why I headed for Tarshish. I want to die!" (cf. 4:2f.). And so he sits grumpily down and waits to see what will happen, making a booth to protect himself from the sun, aided by God's providential provision of a fast-growing vine — which promptly dies, to Jonah's intense anger. "Do you do well to be angry for the plant?" the Lord asks him. "I do," Jonah replies, "angry enough to die" (4:9). Whereupon the Lord teaches His gentle lesson (4:10f.), and one hopes, without great confidence, that Jonah's heart was touched. (An added fillip of pleasure may have been available to the ancient reader, for one etymology of the name "Nineveh" relates it to Akk. *nūnu,* "fish," and it was ideographically indicated by the drawing of a fish within a line denoting city walls. If Jonah would not go to the city-enclosed fish, he would himself become a fish-enclosed Jonah!)

The NT is not so richly sown with various kinds of humor as the OT, but it has its share. The personality of Peter, e.g., draws our admiration and laughter in full measure — Peter feeling it incumbent upon him to make a speech and take charge of the arrangements at the Transfiguration (Mt. 17:4); Peter drawing his sword, ready to take on the entire temple guard (Jn. 18:10); Peter undertaking to correct the Lord Himself, and to set Him on the right path (Mt. 16:22); Peter, told that the risen Lord stands on the shore in the dawn, leaping overboard to get to Him (Jn. 21:7). Often in error, but never in doubt; and when right, gloriously right!

B. Situation. Turning to our second category of humor — that arising from situations — we confront another embarrassment of riches; but we cannot do better than to turn first to the life and adventures of Samson, as recorded in Jgs. 14–16. Every age delights in the adventures, usually extravagant and sometimes farcical, of the prankster, the trickster, whose cleverness and physical strength reduce the enemy to laughable impotence. As usual, incongruous juxtapositions lie at the root of the fun — Samson burning the grain fields of the Philistines by tying torches to the tails of foxes; Samson carrying off the gates of the enemy's city, gates which were both the symbol and the reality of its security; Samson slaying a thousand men with the "fresh jawbone of an ass" (Jgs. 15:15); Samson paying his gambling debts by slaying thirty men of Ashkelon, turning the tables on those who had tricked the secret of his riddle from him by "plowing with his heifer" (Jgs. 14:18). Even his last great "labor" (to use a term legitimately reminding us of Hercules, another hero sometimes given to brutal fun), though it ended his life, was a great national victory, bringing exultant laughter to his countrymen and "calm of mind, all passion spent" (Milton, *Samson Agonistes,* line 1758). In quite a different vein is Balaam's controversy with his clear-seeing ass (Nu. 22:21-30). Three times the poor little donkey tries to avoid the fearful spectacle of the angel of the Lord, once dashing into a field, and being struck for her pains (v. 23); once, "in a narrow path between the vineyards, with a wall on either side" (vv. 24f.), bumping Balaam's foot against the wall, and being beaten again; and lastly, in another narrow path "where there was no way to turn either to the right or to the left" (vv. 26f.), just lying down, in pathetic distress — and of course being beaten again. We are ready to enjoy Balaam's ultimate discomfiture. Tacking again, we find that the life of the great David provides frequent occasion for the pleasure we always enjoy with the "comeuppance" of the boastful and the powerful. One such situation is David's victory over Goliath (1 S. 17:1-54), and another his conflict with Nabal, whose name means "fool" (1 S. 25:1-38). The final scene of the Nabal episode is particularly skillful in mingling incongruous contrasts for humorous effect: the gentle and beautiful Abigail; the noble David; and the gross Nabal, who, after a drunken night, wakes up sober (with a hangover) just in time to die of fright. Humorous for the same reason (the discomfiture of the haughty) are: the defeat of the Midianites by a handful of men under Gideon (Jgs. 7:19-23); the ironic jeers of Elijah at the priests of Baal (1 K. 18:27); and the terror of the wicked Haman, begging for his life from Queen Esther, whom he had tried to destroy ("falling on the couch where Esther was," Est. 7:8), and being hanged on the very gallows he had built for Mordecai (vv. 9f.). A brilliant instance of such exulting laughter (admittedly cruel, but very human) occurs in the victory song of Deborah and Barak, after the defeat of Sisera (Jgs. 5:1-31). Sisera's mother peers out of the window, wondering why her son's victorious chariot is delayed: "She gives answer to herself, 'Are they not finding and dividing the spoil? — A maiden or two for every man. . . ?'" (Jgs. 5:29f.). The word *raḥam* here euphemistically translated "maiden" is, in context, sexually crude, and intensely ironic, since the reader knows that Sisera lies dead of a tent peg driven clean through his head and into the ground, *by a woman,* Jael, wife of Heber the Kenite (Jgs. 4:21).

In the NT, Peter is again the central figure in two situations in which wickedness is frustrated to amusing effect, both of them involving supernatural rescues from prison. In the first, he and John, having been imprisoned in Jerusalem to prevent them from preaching, are summoned before "the council and all the senate of Israel" (Acts 5:21) sitting in solemn authority. Everyone is there — except the prisoners, who, according to the officers, seem to have disappeared. But not entirely: they are back in the temple preaching again (vv. 22-25)! In the second episode, Peter, having been led from Herod's prison by an angel, knocks for admission at the door of the house of Mary, mother of John Mark, causing such dismay to the maid Rhoda, who recognizes his voice but cannot believe he is real, that she leaves him pounding on the still unopened door while she runs to report to her mistress (Acts 12:6-16).

C. Wit. Instances of humor arising from our third cate-

gory are the most numerous in the Bible, and the least translatable. From scores of examples we can mention only a few. A striking example of onomatopoeia (a word which imitates the sound of its referent) occurs in Isa. 28:10, where is culminated the condemnation of the "proud crown of the drunkards of Ephraim," and the "priest and the prophet reeling with strong drink," staggering and incoherent (vv. 1,3,7). With them, writes Isaiah, it is "precept upon precept, precept upon precept, line upon line, line upon line, here a little, there a little." This sounds innocent enough in English; but the Hebrew words translated "precept" and "line" repeat themselves in witless rhyme: *"ṣav lāṣāw ṣaw lāṣāw qaw lāqāw qaw lāqāw zᵉʿêr šām zᵉʿêr šām."* A notable instance of paronomasia occurs in Am. 8:1f., wherein the prophet is shown a "basket of summer fruit" (*qāyiṣ*), and the Lord declares that the "end" (*qēṣ*) is come upon His people Israel. Similar is Jer. 1:11: " 'Jeremiah, what do you see?' And I said, 'I see a rod of almond [*šāqēḏ*].' Then the Lord said to me, 'You have seen well, for I am watching [*šōqēḏ*] over my word to perform it.' " A grim double meaning is used by Joseph in Gen. 40:13, 19 when he interprets the dreams of Pharaoh's chief butler ("Pharaoh will lift up your head, and restore you to your office") and chief baker ("Pharaoh will lift up your head — from you!"). The similarity in sound between certain common and frequently used words (such as "sun" and "son" in English) generates the same pun a number of times in the Bible, as in the case of the Hebrew for "see" and "fear"; e.g., "Ashkelon shall see [*tēre'*] it, and be afraid [*tîrā'*]" (Zec. 9:5).

In the NT, verbal humor is to be found in several of the utterances of Jesus, including hyperbole (the "speck" and the "log" of Mt. 7:3; the "straining out a gnat and swallowing a camel" of 23:24; and the passing of a camel through the eye of a needle of 19:24). Parallelism is used to good effect as he entangles the Pharisees and the Sadducees in their own wiles (22:15-46), and paronomasia in his naming of Peter (16:18). In the writings of Paul, instances of humor are infrequent, though he effectively employs irony, notably in his defense of himself in 2 Cor. 10:1f. and 11:1, 16-21; and perhaps against Ananias in Acts 23:2-5.

IV. Conclusion.–After examining a preponderance of rather satiric, often bitter, examples of humor, it may be appropriate to conclude with instances of gentle laughter in the NT. One thinks, e.g., of earnest little Zacchaeus, suffering not only from being "small of stature" (Lk. 19:3) but from the scorn of his neighbors, since he was not only a tax collector but the chief of that hated trade in Jericho and its environs. One can see him running ahead of the crowd, not welcome within it, for "he sought to see who Jesus was" (v. 4). Climbing the sycamore, he sits in imagined unobtrusive security, until Jesus Himself calls to him before the whole company: "Zacchaeus, make haste and come down; for I must stay at your house today" (v. 5). Oblivious now to the hostile upward stares of the crowd, Zacchaeus suits action to the command, scrambling down and rushing home to meet Jesus "joyfully" at the door, tumbling over himself to declare his integrity as a Jew, whatever his despised occupation may be. "Behold, Lord, the half of my goods I give to the poor; and if I have defrauded anyone of anything, I restore it fourfold" (v. 8). Jesus' gracious words in response (vv. 9f.) complete Zacchaeus's joy, and our own participation in it.

Two other episodes touch on that lovely thread woven into the NT, namely, Jesus' response to the women who came to Him. In one, He meets the Samaritan woman at the well, answers her blunt and perceptive questions, and approves her cautious statement that she has no husband at the moment, but adds that she has had five husbands, and the man she is now living with is not her husband (Jn. 4:16-18). After further conversation, the woman, with amusing exuberance and a disposition for exaggeration that comments on the breadth of her amatory and connubial history, runs back to the city and cries out to the people: "Come, see a man who told me all that I ever did!" (v. 29). The second episode concerns a Greek woman, Syrophoenician by birth, who begs Jesus to cast the demon out of her daughter (Mk. 7:25f.). Jesus tells her that His mission is only to the lost sheep of the house of Israel. "Let the children first be fed," He says, "for it is not right to take the children's bread and throw it to the dogs" (v. 27). Her reply reveals a smiling whimsy even in the midst of her distress for her daughter: "Yes, Lord; yet even the dogs ["little puppy dogs" — Gk. *kynárion*] under the table eat the children's crumbs." And He said to her, "For this saying you may go your way; the demon has left your daughter" (v. 29).

God's incomparable Book is addressed to a fallen world, where, truly, "even in laughter the heart is sad" (Prov. 14:13a); but the urgent proclamation of salvation is lightened by smiling, and Our Lord Himself has promised: "Blessed are you that weep now, for you shall laugh" (Lk. 6:21b).

C. D. LINTON

HUMPS [Heb. *dabbešeṯ*] (Isa. 30:6); AV BUNCHES. This is the only RSV reference to a camel's hump. While its meaning is clear from the context, its etymology has long been disputed. Some (e.g., Gesenius, *Hebrew-Chaldee Lexicon*, S. Tragelles, trans. and ed. [repr. 1976], p. 189) suggest that it orginally meant "bee hive" (cf. *dᵉḇaš*, "honey"), and developed the meaning "(camel's) hump" because of the similar shape. Others (e.g., KoB, p. 203) relate it to Akk. *gupšu*, "mass, lump," and Ugar. *gbṯt*, which refers to an animal's hump (cf. H. Cohen, *Biblical Hapax Legomena in the Light of Akkadian and Ugaritic* [1978], p. 132 n. 64).

G. A. L.

HUMTAH hoom'tə [Heb. *ḥumtâ*]. An unidentified place mentioned between Aphekah and Hebron in the hill country of Judah (Josh. 15:54).

HUNCHBACK [Heb. *gibbēn*]; AV CROOKBACKT; NEB "mis-shapen brows." One of the disqualifications for the priesthood listed in Lev. 21:20. The affliction was probably Pott's disease, an angular curvature of the spine resulting from tubercular caries of the vertebrae. Its presence has been demonstrated in mummies, and it was also portrayed unmistakably in models of humans and on basreliefs in Egypt. The NEB rendering is based on postbiblical Heb. (and Aram.) *gᵉḇîn(â')*, "eyebrow," but the traditional rendering has the support of all the versions.

R. K. H.

HUNDRED [Heb. *mē'â*; Gk. *hekatón*]. *See* NUMBER II.

HUNDRED, TOWER OF THE [Heb. *migdal hammē'â*–'tower of the hundred'; Gk. *pýrgos tôn hekatón*] (Neh. 3:1; 12:39); AV TOWER OF MEAH. A tower of the wall of Jerusalem, possibly the eastern tower of a fortress that lay between the Sheep Gate and the Fish Gate, at the northernmost part of the walls restored by Nehemiah, approximately where Herod the Great later built Antonia. Alternately, it may have been the eastern tower of the

Sheep Gate, or an independent tower on the north wall.

The number may refer to 100 cubits in height, or to a hundred steps, or to a garrison of a hundred, or to the headquarters of a centurion in charge of a hundred men, or less likely to the distance from the Sheep Gate to the Tower of Hananel.

See JERUSALEM III.F.2.x. D. J. WIEAND

HUNGER, HUNGRY verbs: [Heb. *rā'ēḇ*]; AV "suffer to famish" (Prov. 10:3); NEB STARVE (Prov. 19:15; Isa. 65:13; Jer. 42:14), "afraid" (Isa. 8:21); [*ḥāḏal*] (1 S. 2:5); AV "have ceased"; NEB "grow strong"; [Gk. *peináō*]; AV "an hungred" (Mt. 4:2; 12:1, 3; 25:35, 37, 42, 44; Mk. 2:25; Lk. 6:3); NEB FAMISHED (Mt. 4:2 par. Lk. 4:2), "go hungry" (Lk. 6:21, 25; 1 Cor. 4:11); substantives: [Heb. *rā'āḇ*]; AV FAMISHED (Isa. 5:13); NEB FAMINE (Ezk. 34:29), "starve," "starving to death" (Ex. 16:3; Isa. 5:13); [*rā'ēḇ*]; AV, RSV, HUNGER-BITTEN (Job 18:12); NEB STARVING (2 K. 7:12; Isa. 29:8), HUNGRILY (Job 5:5), "fear" (Isa. 8:21), "paralyzed with fear" (Job 18:12); [*kāpān*] (Job 30:3); AV FAMINE; [*nepeš*]; AV "soul(s)" (Isa. 29:8; Ezk. 7:19; Hos. 9:4); NEB "himself" (Isa. 29:8); [*yešaḥ*] (Mic. 6:14); AV "(thy) casting down"; NEB "(your) food shall lie heavy"; [Gk. *limós*] (Lk. 15:17; 2 Cor. 11:27); NEB STARVING (Lk. 15:17); [*nēsteía*] (2 Cor. 6:5); AV FASTINGS; NEB STARVING; [*nēstis*] (Mt. 15:32 par. Mk. 8:3); AV FASTING; NEB UNFED; [*próspeinos*] (Acts 10:10).

In the OT "hunger" is most frequently expressed by the root *r'b* (vb., *rā'ēḇ*; noun, *rā'āḇ*; adj., *rā'ēḇ*). The verb *rā'ēḇ* denotes "be hungry, suffer hunger." With the exception of Isa. 44:12, where the ironsmith is said to weaken from not eating, *rā'ēḇ* refers to the deprivation or lack of the normal fruits of work (cf., e.g., Ex. 16:3; Jer. 38:9; Ezk. 34:29), rather than the recurrent appetite for food. In Prov. 6:30 it represents the desperate lack that spurs a man to thievery. Thus it often may refer to FAMINE, whether as the result of fire (Isa. 9:20), as a national phenomenon (Gen. 41:55), or as the result of war (Dt. 28:48; 32:24; Jer. 42:14).

Famine was a common phenomenon in OT times, largely because a successful harvest in Palestine was dependent on an adequate winter rainfall. Timing was the crucial factor — a late winter rain brought crop failure and the hunger of famine. The OT references to famines lasting over a period of years probably reflect periods of deficient rainfall. A total lack of rainfall in any given year is unusual in Palestine and highly improbable over a span of several years (see Dalman, pp. 195-99).

The threat of the painful hunger of famine, and thus the need to ensure the earth's fertility and yield of nourishment, underlies the powerful attraction that the Canaanite fertility gods had for Israel, in particular the Baal cult. Indeed, throughout the religions of antiquity, the desire to ensure the constant fertility and productivity of the earth was of paramount importance in worship (particularly in the early stages), and crop failure and famine were universally interpreted as signs of divine anger. Thus from early times in Palestine, and throughout the ancient Near East, it was incumbent upon the king as one of his primary socio-political responsibilities to ensure for all subjects at the least a subsistence level of nourishment to avoid hunger. Ps. 72 exemplifies this royal obligation to provide justice for the disadvantaged, to be an exemplar of compassion for those of the society who suffer deprivation of any sort, and an active vindicator of their cause. The negative counterpart of this appears in the Ugaritic epic *Krt*, usually but inaccurately called "Keret" (*UT* 127:45-50; cf. *ANET*, p. 149; *TDNT*, VI, 13).

It was thus a matter of individual ethics also, especially incumbent upon the prosperous, to share food with the hungry (Job 22:7; Isa. 32:6), a more significant form of devotion to God than fasting (Isa. 58:7, 10; cf. Ps. 50:12). This obligation extended even to the enemy who was hungry (Prov. 25:21; cf. Rom. 12:20). The pattern for such compassion is set by Yahweh Himself, who "fills the hungry with good things" (Ps. 107:9), "gives food to the hungry" (Ps. 146:7), and "does not let the righteous go hungry" (Prov. 10:3). The stark contrast between the "hungry" and the "full" does not go unnoticed (Isa. 65:13; 1 S. 2:5; Prov. 27:7). It avails nothing for people to be full, mighty, prosperous, etc., for Yahweh at will can exalt the hungry, the poor, and the needy into their place.

The OT manifests several theological perspectives on hunger. It is proclaimed as a future judgment in the prophetic demand for repentance (cf. Isa. 5:13; 8:21, where "hunger" is said to accompany the enemy's conquest), and as one of the signs of abandonment by God because of stubborn disobedience (Isa. 8:21; 65:13; cf. Dt. 28:48). Another perspective is that hunger is a saving abasement. The hunger on the wilderness wandering is understood in Dt. 8:3 as having a significance beyond the physical need for bread; it was a historical means of testing and training. In contrast, Isa. 49:10 offers an eschatological perspective on the people's current abasement by declaring that on the return through the desert "they shall not hunger or thirst" (cf. Ezk. 34:29). Hunger as saving abasement is also a feature of the promises of salvation to the hungry "poor," a theme often parallel to judgment against the "full." In 1 S. 2:5; Ps. 107:36-43; 146:7, e.g., the satisfying of the hungry already in history is considered a saving revelation of the One who abases only to exalt.

Three other Hebrew substantives appear five times as "hunger" in the RSV. In Job 30:3 *kāpān* is an Aramaic loanword meaning "hunger, famine, acute lack of food." Elsewhere in the OT it appears only in Job 5:22. The common noun *nepeš*, "soul, being, person, breath, appetite, etc." (lit. "that which breathes") occasionally is used in the OT to designate appetite in general, and hunger (or thirst) in particular (Isa. 29:8; Ezk. 7:19; Hos. 9:4). The meaning of the hapax legomenon *yešaḥ* in Mic. 6:14 has usually been conjectured from context to mean "emptiness (of hunger)." In 1 S. 2:5 the Hebrew verb *ḥāḏal*, while literally meaning simply "ceased," is translated by the RSV in context as "ceased to hunger."

In the RSV NT the translation "hunger" or "hungry" occurs twenty-nine times. In twenty-three of these it represents the Greek verb *peináō*, "be hungry, hunger." As in the classical literature, this verb has an extended meaning beyond its literal sense — "to desire (something) strongly (as necessary to life)" (cf. Mt. 5:6; Jn. 6:35). In addition are four substantives. Gk. *limós* is twice rendered "hunger" (2 Cor. 11:27; Lk. 15:17; cf. also Isa. 5:13 LXX and Josephus *BJ* iii.7.13 [189]). This term primarily means "famine," referring to an acute lack of food (in the LXX *limós* is regularly the equivalent of Hebrew *rā'āḇ*). As used in the NT it usually denotes circumstances of deprivation or lack (i.e., famine), rather than desire. Only in the above two passages is it used to connote appetite. In only one instance does the RSV translate *nēsteía*, "fasting, abstention from food," as "hunger." This term is usually used with regard to fasting as a religious rite or act of private piety, but in 2 Cor. 6:5 it refers to "hunger" in the sense of forced or necessitated abstention from food. The cognate *nēstis* (lit. "not eating") is translated "hungry" twice in the NT (Mt. 15:32 par. Mk. 8:3; cf. AV "fasting," NEB "unfed"). *Próspeinos*, related to the verb *peináō*, is a NT hapax legomenon translated "hungry" in Acts 10:10.

In Mt. 5:6 par. Lk. 6:21 Jesus calls the hungry blessed. In so doing he refers not to any social or religious group,

but simply to those persons who (externally and internally) are lacking in the things essential to life as God meant it to be. They are believers who seek Jesus' help because of their own helplessness. The hungry are thus an object lesson of utter dependence on God.

The conception of "hungering after righteousness" is a feature of Matthew's Gospel. In Mt. 25:34-40 Jesus mentions the surprising reward given to those who are merciful to the hungry (thirsty, imprisoned, etc.). The rationale is that such mercy is actually given to Jesus Himself in the person of the less fortunate (i.e., all who are in need of mercy). Jesus deliberately identified Himself with the humiliation of hunger (Mt. 4:1-4) and in the course of everyday life was merciful to the hungry (Mt. 12:1-7), and thus He was able to invest the old command for mercy with the authority of a "new commandment." In Mt. 4:1-4 Jesus' temptation was the result of hunger, but He upheld the faith which Israel learned in the desert (Dt. 8:3). In Mt. 12:1, 3 Jesus refers to the scriptural record regarding David's eating of consecrated bread when he was desperately hungry. Jesus' point is not that the hungry have a right to help themselves, but that discipleship carries with it freedom -- everything is at the disposal of the person who offers himself to God. Since it is Jesus who provides what is really essential to life, mundane bread is put in proper perspective and the hunger for life's essentials finds its true satisfaction in Him.

In Lk. 1:53 the OT promise is reflected in the Magnificat's praise of the God who in His mercy fills the hungry with good things (cf. Ps. 107:9) and sends the rich away empty. Luke also stresses the contrast between that hunger which brings salvation and that which signifies damnation: "Blessed are you that hunger now, for you shall be satisfied" (6:21), and "Woe to you that are full now, for you shall hunger" (v. 25; cf. the parable of the rich man and Lazarus, 16:19-31).

For Paul, his own hunger (and thirst) was an indication that he still awaited the consummation of salvation, even though it had already begun in Christ; it was an authenticating sign (among many others) to him that he was a "minister" of Christ (2 Cor. 11:27). In 1 Cor. 4:11 (and its context) Paul applied the beatitude of the blessed hungry to his own time, understanding life to be by faith rather than sight. In Phil. 4:12, however, hunger and fulness are simply understood as two vicissitudes of life. But in the light of Jesus' crucifixion and resurrection Paul accepted both as related aspects of the way of life he followed.

In 1 Cor. 11:21 Paul described the attitude of one part of the Corinthian community as a misconception of the meaning of redemption that allowed some to remain hungry at the fellowship meal while others became drunk. Paul concluded that hunger was better appeased at home, and he demanded, not equality of concern for all, but that everything (and especially the communal meal) should be under the rule of love, the kind of love that accepts as a new commandment even the obligation to feed a hungry enemy (Rom. 12:20).

The content of the beatitude is presented in yet a different manner in Jn. 6:35 as a self-witness by Jesus — "I am the bread of life; he who comes to me shall not hunger. . . ." What was originally promised for the age of salvation (cf. Isa. 49:10) is to be the experience of the believer in Jesus — the satisfying of hunger and thirst is here presented as feeding on the bread of life. John modified the OT language — this hunger is not an acute state of hunger, but rather the regularly recurring need for nourishment. This is a craving that cannot be satisfied by mundane bread (not even by manna, cf. Jn. 6:31-58). It is only commitment to Jesus that will really satisfy the appetite for "bread" in that it directs the craving to its true goal. Being free from hunger means that the insistent desire encompassed in the need for "bread" is both removed and satisfied.

Revelation 7:16 reflects more concretely the Hebraic concept (cf. Isa. 49:10) than do the more hellenized expressions in the Gospel of John. The promise of the Beatitude and the offer of the bread of life is experienced now in the earthly tribulation only in the context of that harsh dissonance to which Paul testified. In the new world it will be experienced in physical totality.

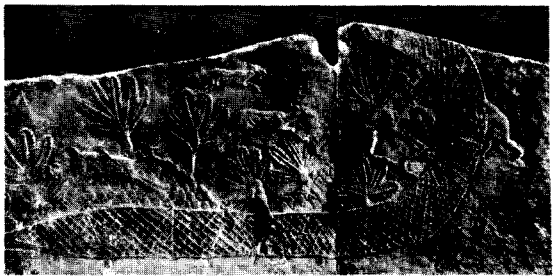
HUNTING [Heb. *ṣayiḏ*]. One should distinguish hunting for protection (of self, flocks, or crops), hunting for sport, and hunting for sustenance.

Hunting wild animals for self-protection was important in ancient days when the scarcity of human population left most of the land to nature. Many nations tell in their sagas of ancient heroes who delivered their peoples from the attacks of lions, bears, or wild swine. Gen. 10:8f. describes Nimrod as such a hero; his name is related to Babylonian and Assyrian king names composed with the name of the Sumerian-Babylonian god of war and the hunt, Ninurta. In historical times, even in the early centuries of the Christian era, lions, bears, and panthers were a real threat, and shepherds had to protect their flocks against them (1 S. 17:34-36). When the inhabitants of a certain region were exiled, wild animals could take possession again of the desolated country (e.g., Jer. 10:22; 2 K. 17:25). The Madeba Map shows a lion in the jungle at the shores of the Jordan River. Samson encountered a lion in the neighborhood of Timnah (Jgs. 14:5f.), a region where one would not expect one, as it was well cultivated and rather densely populated. Near Bethel, on the fringe of the desert descending to the Jordan Valley, bears sometimes appeared (2 K. 2:24), and a lion slew the disobedient man of God on his way from Bethel to Judah (1 K. 13:24). Wolves and jackals have always been a danger for the flocks.

The Assyrian and Egyptian kings were great hunters of lions and wild oxen, as we know from their boasting in inscriptions and reliefs. With them we can observe the transition from hunting for self-protection to hunting for sport; the later Assyrian kings kept lions in cages from which they were let free when the king wanted to indulge in his favorite sport (cf. Ezk. 19:9). A trace of this custom is to be found in Dnl. 6:7-24 (MT 8-25), which mentions the lions' den, a pit where lions were kept and fed until the king (in this case Darius the Mede) wanted to hunt. *See* pictures in ASHURBANIPAL; CALAH; DARIUS. The only example of hunting for sport in the OT is Benaiah's slaying of a lion in a pit (2 S. 23:20).

Hunting for sustenance did not play an important role in the economic life of Israel. From Sinuhe's description of his life in Palestine-Syria it appears that in the first centuries of the 2nd millennium B.C. gazelles and deer were plentiful, and a few centuries later men like Ishmael and Esau made hunting their trade (Gen. 21:20; 25:27ff.); but no professional hunters are mentioned after Israel's settlement in Canaan (Jer. 16:16 is figurative speech). Nevertheless, the "harts, gazelles, and roebucks" mentioned in the list of Solomon's daily provision (1 K. 4:23 [MT 5:3]) point to the existence of at least a group of hunters connected with the royal household. The name Pochereth-hazzebaim ("catcher of gazelles") as a family



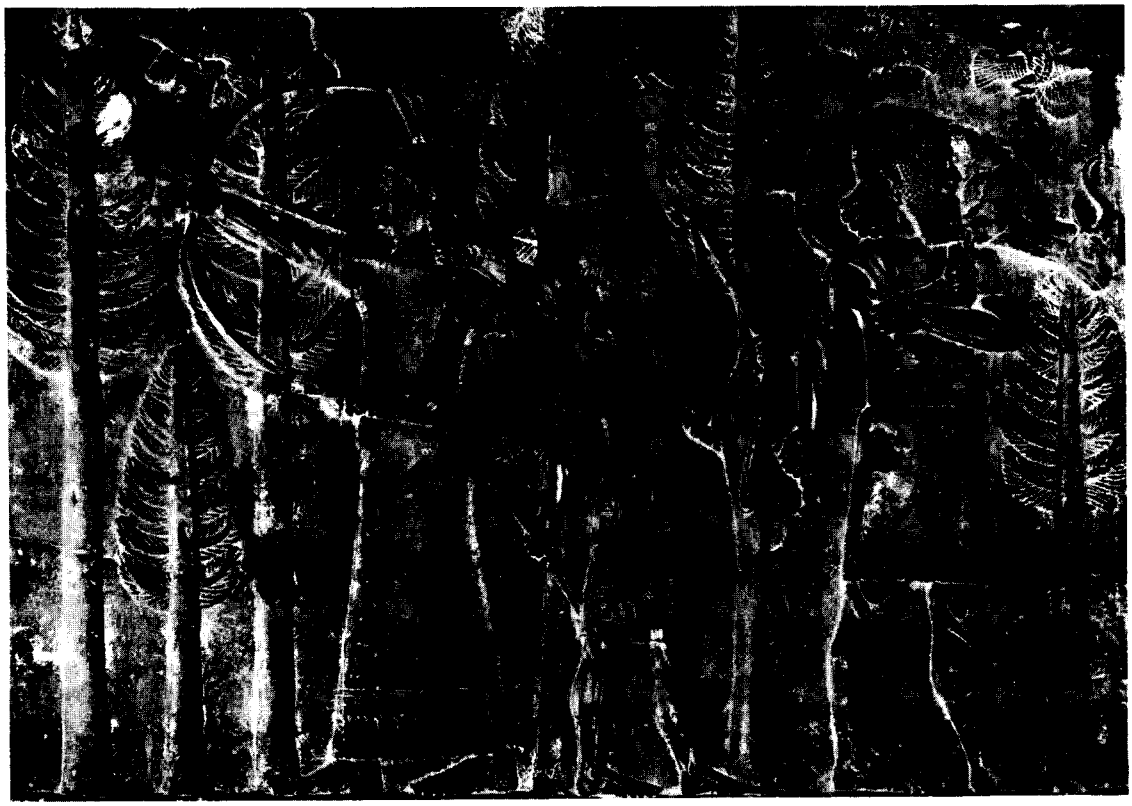
Relief from Nineveh (ca. 650 B.C.) showing men trapping deer in a net (Trustees of the British Museum)

belonging to "the children of Solomon's servants" (Ezr. 2:57; Neh. 7:59) might be quoted as a corroboration of this assumption. In general, however, hunting was done only occasionally and by people who in their daily life were shepherds or farmers. Lev. 17:13 prescribes that the hunter should pour out the blood of his victims and cover it with dust; unlike the Canaanites, the Hebrews did not think game fit for sacrifice.

Partridges and other birds were hunted on the mountains (cf. 1 S. 26:20; Prov. 12:27) simply by following them till they were tired and could be caught or stunned by throwing a stone. Tired birds of passage like quails could sometimes be caught in large numbers (Ex. 16:13; Nu. 11:31f.). All kinds of weapons and means were used: arrows, lances, swords, slings, clubs (cf. Job 41:26-29 [MT 18-21]). Larger animals were often caught in a pit (Isa. 24:17f.; Jer. 48:43f.; Ezk. 19:4, 8; Ps. 7:15 [MT 16]; etc.). In order to manage the trapped beast a net was often spread over it after it had fallen into the pit (e.g., Ezk. 19:8). In other cases a net was spread over some place where animals were likely to pass by (Isa. 51:20; Ps. 140:5 [MT 6]). Snares were used in the same way.

Different kinds of nets and snares were also used for catching birds. Job 18:8-10 mentions six different names of devices used for catching game or birds. Heb. *rešeṭ* is a net both for large animals and smaller mammals or birds; it was stretched out on the ground and drawn together by the hunter when he observed that the feet of the animal were entangled in it. According to Hölscher (comm. on Job [*HAT*, rev. ed. 1952]), Heb. *śᵉḇāḵâ* ("grate") is the light cover of branches laid over the pit; most scholars think it is a kind of net, as indicated by the related word in Arabic. Heb. *paḥ* denotes a bird trap; some scholars describe it as a pair of wooden frames (cf. Ps. 124:7) each spanned with a net. They were laid flat on the ground, and if a bird touched one of them they automatically sprang up (Am. 3:5) and clapped together. It was thus a rather intricate instrument, as it depended on the working of one or more springs. In connection with the *paḥ* the verb *yāqaš (nāqaš, qôš)* is used in Ps. 124:7; 141:9; a *môqēš* might be the part on which the bait was placed, and a *yāqûš* or *yāqôš* was a man who made use of a *paḥ* (Hos. 9:8; Ps. 91:3) with a *môqēš*, probably a semiprofessional bird catcher, whose bag could be sold in the market (Mt. 10:29; Lk. 12:6). When caught, the birds might have been placed in a cage woven from branches or reeds like a basket (Jer. 5:26f.). Job 5:5; 18:9 have also the word *ṣammîm* (AV "robber"), perhaps a very fine mesh (cf. *ṣammâ*, "veil"). A *ḥeḇel* is a snare; the word itself means simply "rope"; it was laid on

Assyrian archers hunt birds and other game in a wooded area. Relief from the palace of Sargon II (721-705 B.C.) at Khorsabad (Trustees of the British Museum)



Neo-Hittite orthostat of archers hunting from a chariot. From Malatia in Anatolia, 9th cent. B.C. (Louvre)

the ground and was therefore not a specific instrument of the bird catcher. Finally, Heb. *malkōḏeṯ* is a general word for an instrument to catch mammals (Jgs. 15:4) or birds (Jer. 5:26). *See* FOWLER.

Josephus (*Ant.* iv.8.9 [206]) supposes that dogs were used in hunting; Egyptian and Assyrian monuments confirm this, but in the Bible neither hunting with hounds nor hunting with hawks or falcons is mentioned. The Greek text of Sir. 11:30 speaks of a "decoy partridge in a cage," but the Hebrew text has simply "a bird caught in a cage." Hunting on horseback or from chariots, frequently pictured in Assyrian and Egyptian works of art, is neither mentioned nor pictured in Israel.

The abundant use of imagery taken from hunting, in both the OT and NT, is remarkable in view of the comparative rarity of literal references and the small importance of hunting from an economic standpoint. Probably many of the OT similes borrowed from hunting belonged to the accepted literary language of Canaan as fixed in the centuries preceding the Israelite Conquest.

From the OT, the imagery was taken over in the NT. Mt. 22:15 uses the Greek vb. *pagideúō*, which occurs in Jewish Hellenistic literature only; it is derived from Gk. *pagís*, the word the LXX uses for rendering Heb. *paḥ*. In the NT *pagís* occurs in Lk. 21:34; Rom. 11:9; 1 Tim. 3:7; 6:9; 2 Tim. 2:26. Heb. *môqēš* is rendered *thēra* ("trap," but generally "hunt") in Rom. 11:9; but the general rendering of *môqēš* in the LXX is *skandálēthron*, a word which does not occur in the NT, but which is closely allied to the frequent biblical word *skándalon*, "cause of stumbling." In some instances an allusion to the hunter's trap (or snare) is still recognizable. In 1 Cor. 7:35 *bróchos*, "noose" (Heb. *ḥeḇel*), is used. Two words for "hunt, catch," *agreúō* and *thēreúō*, occur in Mk. 12:13 and Lk. 11:54 respectively. The general idea of the imagery is the sudden action of the trap resulting in loss of freedom and power.

See A. G. Barrois, *Manuel d'archéologie biblique* (1939), I, 343-47. A. VAN SELMS

HUPHAM hū'fəm, hōō'fəm [Heb. *ḥûp̄ām*–'coast inhabitant']. One of Benjamin's sons and head of the "Huphamite" family (Nu. 26:39). *See* HUPPIM.

HUPPAH hup'ə [Heb. *ḥuppâ*–'protection']. The priest in charge of the thirteenth course as prescribed under David (1 Ch. 24:13).

HUPPIM hup'im [Heb. *ḥuppîm*–'coast people']. Probably a variant form of HUPHAM. From the only mention made of him (Gen. 46:21; 1 Ch. 7:12, 15), his direct descent is difficult to establish.

HUR hûr [Heb. *ḥûr*].

1. A prominent official in Israel. With Aaron he held up Moses' hands during the battle against the Amalekites (Ex. 17:10, 12) and assisted Aaron as judicial head of the people during Moses' stay on the mount (Ex. 24:14).

2. Grandfather of Bezalel, the head artificer in the construction of the tabernacle (Ex. 31:2; 35:20; 38:22; 2 Ch. 1:5). He is here assigned to the tribe of Judah, and in 1 Chronicles is connected with the same by descent through Caleb (2:19f., 50; 4:1, 4). Josephus (*Ant.* iii.2.4; 6.1 [54, 105]) makes him identical with 1 and the husband of Miriam.

3. One of the five kings of Midian slain along with Balaam when Israel avenged the "matter of Peor" upon this people (Nu. 31:8; cf. vv. 1f., 16). In Josh. 13:21 these kings are spoken of as "leaders of Midian" and "princes of Sihon" king of the Amorites.

4. According to 1 K. 4:8 (AV), the father of one of Solomon's twelve officers who provided food for the king's household, and whose district was the hill country of Ephraim. Here the RSV and NEB have "Ben-hur," taking the Heb. *ben*, "son of," as part of the proper name; and the same is true in reference to the names of four others of these officers (cf. vv. 9-11, 13).

5. Father of Rephaiah, who was one of the builders of the wall under Nehemiah, and ruler of half the district of Jerusalem (Neh. 3:9). B. R. DOWNER

HURAI hūr'ī, hûr'î [Heb. *ḥúray*]. One of David's thirty mighty men mentioned in 1 Ch. 11:32 as "of the brooks of Gaash," i.e., from Mt. Gaash. In the par. 2 S. 23:30 he appears as Hiddai.

HURAM hūr'əm, hōō'rəm; **HIRAM** hī'rəm [Heb. *ḥûrām, ḥîrām*; Gk. *Chiram, Hōim, Hiwim, Houram*].

1. A skillful worker in all kinds of metals and furnishings whom Hiram king of Tyre lent to Solomon for work on the temple (1 K. 7:13f.; 2 Ch. 2:13). His father was a Tyrian brassworker and his mother an Israelite of the tribe of Naphtali (1 K. 7:14), "a woman of the daughters of Dan" (2 Ch. 2:14), for Dan lay in the territory of Naphtali. It may be that he was chosen because of his half-Hebrew blood, which would make him more acceptable in Jerusalem.

He is also called Huram-abi (2 Ch. 2:13; 4:16); the addition "-abi" here probably means "master," a title of respect and distinction (so NEB, "master Huram").

2. Huram son of Bela (1 Ch. 8:5) and grandson of Benjamin.

3. *See* HIRAM **1.** J. A. BALCHIN

HURAM-ABI hūr'əm-ā-bī, hōōr'əm-ə-bē [Heb. *ḥûrām 'ăḇî*–'Huram my father'; Gk. *ho Chiram ho patḗr mou*]; AV "Huram my father" (2 Ch. 2:13), "Huram his father" (4:16); NEB "master Huram." *See* HURAM **1.**

HURI hūr'ī, hōōr'ē [Heb. *ḥûrî*]. One of the immediate descendants of Gad and father of Abihail; a chief man of his family (1 Ch. 5:14).

HURRIANS hûr'ē-ənz. A people who entered Mesopotamia toward the end of the 3rd millennium B.C. By the middle of the 2nd millennium they had created the powerful empire of Mitanni in northwestern Mesopotamia. They played an important role in the spread of Sumero-Akkadian culture westward to Syria, Anatolia, and possibly Palestine.

I. Origin and Language.–The Hurrians were a non-Semitic people who entered Mesopotamia from the Armenian mountain mass to the northeast, the area in which

the Urartians, a related people known from the 1st millennium, were located. The Hurrians spoke a language related to Urartian that has some distant relationship to the modern northeastern Caucasian family of languages.

II. History and Geographical Distribution.–Before *ca.* 2000 B.C., the Hurrians were located in the region E of the Tigris and N of the Upper Zab, although a few Hurrian names appear in texts from Babylonia. One major and important exception to this limit of early Hurrian influence was the kingdom of Urkish in the hilly region of Upper Mesopotamia, the region which remained the center of Hurrian penetration of Mesopotamia throughout their history. An interesting text from this site has demonstrated that in this early period the Hurrians had borrowed the cuneiform syllabary, while other finds document a high level of cultural attainment.

During the centuries following 2000 B.C., after the fall of Ur III, Hurrians moved in ever increasing numbers into Upper Mesopotamia from the northeast, although our documentation of this migration is sporadic and incomplete. In the south at Mari the Hurrian pressure was minimal, although Hurrian religious texts occur in the Mari archives. In the north the Hurrian numbers were much larger; e.g., about one-third of the population of Chagar Bazar was Hurrian. The Hurrian presence gradually grew and moved southward. Thus, the Hurrians formed more than a third of the population of Alalakh (*ca.* 1700), and it is likely that Hurrian was the language of the scribes, if not of the court. By the 15th cent., however, the vast majority of Alalakh's population was Hurrian, and its society was thoroughly Hurrianized. Hurrian influence further south at Ugarit (15th cent.) was significant, although West Semites predominated. Southern Syria and Palestine, however, show no trace of Hurrians throughout the first half of the 2nd millennium.

The Hittite archives from Anatolia document the same expansion. In the early years of the rise of the Hittite Old Kingdom, the Hurrians were virtually an unknown people in the east. Toward the end of the dynasty in the 16th cent., however, the Hittites struggled for their very existence against Hurrian states in north Syria. Because of this limited Hurrian penetration into Syria before the 16th cent., it is most unlikely that they, and the Indo-Aryans associated with them in the later kingdom of Mitanni, could have been part of the peoples called Hyksos who gained control of Egypt *ca.* 1750.

The next evidence available from the central area of Hurrian penetration, northwestern Mesopotamia, is from *ca.* 1500, when the Hurrians created the Mitannian empire, which controlled territory from Alalakh on the Mediterranean to Nuzi E of the Tigris. Of the development of this state we know almost nothing, except for the names of several of its early kings. These names are Indo-Aryan, rather than Hurrian, and it appears that the formation of Mitanni is linked with their arrival, the first significant appearance of Indo-Aryans in the ancient Near East. In actuality the Indo-Aryans formed a small ruling aristocracy at the head of the Mitannian state and of a number of others that fell under Hurrian influence after 1500 B.C. Their contribution to the Mitannian civilization has often been pictured as major, but the evidence clearly suggests that this view is greatly exaggerated. They were never more than a political veneer; the language and dominant culture of Mitanni was Hurrian. It is quite improper to speak of a Hurro-Indo-Aryan "symbiosis," as has sometimes been done.

The state of Mitanni soon fell before the rising might of Šuppiluliuma and the Hittite New Kingdom. Nonetheless, the wave of Hurrian immigration that created Mitanni spread Hurrian influence further and more deeply through the Near East. Hurrians formed the vast majority of the population of Nuzi in the 15th cent., and they deeply influenced the Hittite New Kingdom, the dynasty of which seems to have been of Hurrian extraction. They were now present in southwestern Syria at Qatna and Tunip, where the official language was Hurrian.

Their penetration into Palestine is indicated by the appearance of a few Hurrian and a larger number of Indo-Aryan names in the Amarna Tablets (14th cent. B.C.). A close examination of the evidence, however, suggests that they represented only a ruling class, a military aristocracy imposed in feudal style on the city-state system. Certainly Palestine shows no trace of the Hurrian substratum that appears in the 14th cent. throughout the area N of the Beqa' in central Syria. This Hurro-Indo-Aryan presence explains why the Egyptians in the 19th Dynasty increasingly called Syria-Palestine "Ḫurru-land."

When the Israelites entered Palestine in the Conquest, it is reasonable to suppose that they would have encountered the descendants of the Hurro-Indo-Aryans whom we find there in the texts of the 14th cent. B.C. On the vexed question of biblical evidence for this, *see* HORITES.

After it fell to the Hittites, the state of Mitanni continued for a time in a much abbreviated form as a tributary state of the Hittite empire, only to fall in the course of the 13th cent. to the rising power of Assyria. After this period, Hurrian names became increasingly infrequent, eventually disappearing altogether during the early centuries of the 1st millennium. In this last period Hurrian names are associated exclusively with the mountain region between northwestern Mesopotamia and Lake Van, the region from which they originally came. With the sparseness of the evidence one can only assume that, given the end of Hurrian political rule, the apparent cessation of Hurrian immigration from the northeast, and the radical transformation in the ethnic and political status of the whole area brought about by the incursions of new peoples (particularly the sea-peoples in the 12th cent. B.C.), the Hurrian population was slowly assimilated through intermarriage and cultural amalgamation.

III. Cultural Influence.–As mentioned above, the Hurrians came into contact with the Sumero-Akkadian civilization of Mesopotamia early in their penetration into the Near East. Here the cultural relationship was markedly one-sided: the Hurrians, far less culturally sophisticated than their Mesopotamian contemporaries, were deeply influenced by that society and borrowed from it in the areas of religion, law, literature, art, economics, and language.

In their movement to the west, however, the situation was reversed. Here the Hurrians played an important role in the transmission of Sumero-Akkadian culture, imprinted with their own indigenous contribution, to Anatolia and Syria. The dynasty of Šuppiluliuma in the Hittite New Kingdom period was Hurrian by race, each king bearing a Hurrian personal name as well as a Hittite throne name. The Hurrians made a major contribution to the religious sphere, with many Hurrian deities included in the Hittite pantheon and frequent passages in the Hurrian language appearing in Hittite religious texts. Hurrian contributions can also be documented in the area of writing, literature, law, and art; and the Hittite language teems with Hurrian loanwords. At Ugarit in Syria a large number of Hurrian religious texts have been found, together with one Akkado-Hurrian bilingual text and a quadrilingual vocabulary, one column of which was Hurrian.

The Hurrian cultural impact on Palestine, once assumed by some scholars to have been extensive, can now be seen to have been minimal. The detailed comparisons

made between the so-called Hurrian socio-juridical customs from Nuzi and certain features of the patriarchal texts in Gen. 12–50 have now been largely discredited and the relation between the Hurrians and the "Horites" of the OT is highly problematical (*see* HORITES).

Other Hurrian contributions to the ancient world can be documented. It has often been alleged that the Mitanno-Hurrians introduced the horse and chariot to the ancient world. Although there is good evidence that the horse and chariot were known previously, there is little doubt that the Mitannians developed them into very effective weapons of war and that they particularly pioneered in the breeding of horses.

It also seems highly probable that they introduced the composite bow and the defense for it, a type of armor with metal scales used on men and horses, the Hurrian name of which appears in Egyptian, Akkadian, Hittite, Ugaritic, and Hebrew. These weapons created a new warrior class, termed *Maryannu*, and became decisive in battle from the 15th cent. B.C. on.

HURRICANE [Heb. *sûpâ*] (Ps. 83:15 [MT 16]); AV STORM; NEB STORM-WIND. Elsewhere the RSV has STORM or WHIRLWIND. The commencement of the rainy season in October or November frequently brought severe thunderstorms. Hurricanes, however, were unusual. When they did come, usually along the coast, they appeared like a huge wall, were terrifyingly destructive, and ceased abruptly. G. WYPER

HURT. The term (noun and vb.) represents a large number of Hebrew words, of which the chief are *raʿ* (vb. *rāʿaʿ*, "evil" (Gen. 26:29; 1 S. 24:9; etc.), and *šeḇer* or *śeḇer* (from *šāḇar*), a "fracture" or "breaking" (Jer. 10:19; cf. Ex. 22:10, 14). In the NT a principal verb is *adikéō*, "do injustice" (Lk. 10:19; Rev. 2:11; 9:10). Such references illustrate adequately the meaning of the term as alluding to general harm, bruising, breaking, and the like, whether literal or figurative.

HUSBAND. *See* FAMILY; MARRIAGE; RELATIONSHIPS, FAMILY.

HUSBANDMAN hus'bənd-mən. The Hebrew *'ikkar*, translated by the AV as "husbandman," is rendered by the RSV "plowman" (Isa. 61:5), "farmer" (2 Ch. 26:10), or "tiller of the soil" (Joel 1:11); the phrases *'îš hāʾᵃḏāmâ* (Gen. 9:20) and *'îš ʿōḇēḏ ʾᵃḏāmâ* (Zec. 13:5) are rendered "tiller of the soil." The Gk. *geōrgós* is translated as "farmer" (e.g., 2 Tim. 2:6), "vinedresser" (Jn. 15:1), and "tenant" (Mk. 12:7), and the Gk. *oikodespótēs* as "householder."

In the OT the term "husbandman" refers to someone connected with the soil. In the NT it can mean the owner of a vineyard (Gk. *oikodespótēs* [Mt. 21:33]), or the tenant (Gk. *geōrgós* [Mk. 12:7]). In some cases Gk. *oikodespótēs* is connected with the soil (Mt. 21:33; Mk. 12:1; and Lk. 20:9 have "a man who planted"), in other cases with the house; it is properly rendered "householder" (cf. Mt. 24:43; Lk. 12:39), its more original meaning. The Bible does not use the term "animal husbandry," though the idea is present in the OT (cf. Gen. 30:31-43).

Usually the term "husbandman" is applied to people, but at least twice to God, who is the vinedresser (Gk. *geōrgós* [Jn. 15:1]) or the householder (Gk. *oikodespótēs* [Mt. 20:1]). In 1 Cor. 3:9 the church is said to be the "field" (Gk. *geōrgion*) of God.

See *TDNT*, II, *s.v.* οἰκοδεσπότης (Rengstorf).

R. W. V.

HUSBAND'S BROTHER [Heb. *yāḇām*–'brother-in-law'; Gk. *epigambreúō;* Late Lat. *levir*]. He was required (Dt. 25:5-10; Mt. 22:24) "to perform the duty of a husband's brother" (*yibbᵉmâ*); that is, if his brother, living with him on the paternal estate, died without male issue, he should take the widow to wife, and "perpetuate his brother's name," the firstborn of the new marriage inheriting the deceased brother's estate. Refusal of the duty was possible, but entailed public ceremonial disgrace and lasting reproach. This provision for a specific case modified the general law which forbade the marriage of a sister-in-law (Lev. 18:16, 18). It was a patriarchal custom (Gen. 38, Judah and Tamar), and is alluded to in Ruth 1:11-13. A related custom is found in Ruth 4:1, Boaz playing, however, the part, not of *levir* ("brother-in-law"), but of *gōʾēl* ("redeemer"). It was at least theoretically in force in Our Lord's time (Mt. 22:23-28, the question of the Sadducees concerning the resurrection) For the origin and object of this custom *see* MARRIAGE IV.A.2; RELATIONSHIPS, FAMILY. P. W. CRANNELL

HUSHAH hōōsh'ə [Heb. *ḥûšâ*]. In 1 Ch. 4:4, the home of one of David's heroes (2 S. 23:27; cf. 1 Ch. 27:11). It was probably located in the Judean uplands, and has been identified by some scholars with Husan, a site SW of Bethlehem.

HUSHAI hōōsh'ī [Heb. *ḥûšay*; Gk. *Chousei*, Josephus *Chousi*]. An Archite, native of Archi, SW of Bethel on the northern border of Benjamin and southern border of Joseph (Josh. 16:2). Hushai was one of David's most faithful and wise counselors. When David was fleeing from Jerusalem and Absalom, Hushai met him, having his coat rent and earth on his head. The king persuaded him to return to Jerusalem, feign submission to Absalom, and try to defeat the counsel of Ahithophel (2 S. 15:32f.). Whatever Absalom decided on, Hushai was to send word to David through two young men, sons of the priests Zadok and Abiathar (15:34-36). Hushai obeyed, and succeeded in persuading Absalom to adopt his counsel rather than that of Ahithophel (2 S. 16:16–17:14). He sent word to David of the nature of Ahithophel's counsel, and the king made good his escape that night across the Jordan. The result was the suicide of Ahithophel and the ultimate defeat and death of Absalom.

J. J. REEVE

HUSHAM hōōsh'əm [Heb. *ḥušām*, Gen. 36:34; *ḥûšām*, 1 Ch. 1:45f.]. According to the former reference, Husham was one of the kings of Edom, and according to the latter he was "of the land of the Temanites" and (1 Ch. 1:35f.) descended from Esau.

HUSHATHITE hōōsh'ə-thīt [Heb. *ḥûšāṯî*, "a dweller in

Hushah"]. The patronymic given in two forms, but probably of the same man, Sibbecai (AV, NEB, also SIBBECHAI), one of David's thirty mighty men (2 S. 21:18; 1 Ch. 11:29; 20:4; 27:11), or Mebunnai as named in the par. passage (2 S. 23:27).

HUSHIM hōōsh'im [Heb. *ḥûšîm, ḥušîm, ḥušim*].

1. Family name of the children of Dan (Gen. 46:23), but cf. the form "Shuham," by interchange of consonants, in Nu. 26:42.

2. The sons of Aher, of the lineage of Benjamin (1 Ch. 7:12).

3. One of the wives of Shaharaim, of the family of Benjamin (1 Ch. 8:8, 11; NEB MAHASHAM).

HUSKS (Lk. 15:16, AV). *See* PODS.

HUT [Heb. *mᵉlûnâ*] (Isa. 24:20); AV COTTAGE; NEB WATCHMEN'S SHELTER. The term *mᵉlûnâ* refers to a temporary structure from which watchmen could guard the fields during the night (translated "lodge" in Isa. 1:8).

HUZ huz (Gen. 22:21, AV). *See* Uz.

HUZZAB huz'əb (Nah. 2:7, AV). *See* MISTRESS.

HYDASPES hī-das'pēz [Gk. *Hydaspēs*]. A river mentioned in Jth. 1:6 in connection with the Euphrates and Tigris, but otherwise unknown. It is possible there may be a confusion with the Hydaspes of India. Some have conjectured an identification with the Choaspes (modern Kerkha, also called Ulai; cf. Jth. 1:6 [Syr.]; Dnl. 8:2 [Heb. *'ûlay*]), which flows from the Zagros mountains to the delta at the Persian Gulf where the Tigris and Euphrates meet.

HYENA [Heb. *'îyîm*; Gk. *hýaina*; cf. Arab. *ḍabu'*] (Isa. 13:22; 34:14; Sir. 13:18); AV "wild beasts of the islands"; NEB JACKALS.

The Palestinian hyena is the striped hyena (*Hyaena striata*) which ranges from India to North Africa. The striped, the spotted, and the brown hyenas constitute a distinct family of the order of Carnivora, having certain peculiarities of dentition and having four toes on each foot, instead of four behind and five in front, as in most of the order. The hyena is a nocturnal animal, rarely seen though fairly abundant, powerful but cowardly, a feeder on carrion and addicted to grave-robbing. The last habit in particular has won it the abhorrence of the natives of the countries which it inhabits. In the passage cited in Sirach, it is to be noted that it is to the hyena that the rich man is compared. The jaws and teeth of the hyena are exceedingly strong and fitted for crushing bones which have resisted the efforts of dogs and jackals. Its dens are in desolate places and are littered with fragments of skeletons.

The name ZEBOIM (Neh. 11:34) means "hyenas," and the "hyena valley" of 1 S. 13:17f. is most probably the Wâdī Abū Dabā', a tributary of the Wâdī Qelt.

The name of Zibeon the Hivite (Gen. 36:2; etc.) is more doubtfully connected with "hyena."

See HOWLING CREATURES. A. E. DAY

HYKSOS hik'sos. A people associated with OT history, although not mentioned by name in the Bible. The Egyptian priest Manetho, cited by the Jewish historian Josephus (*CAp* i.14 [75-82]), speaks of them as "Shepherd Kings" but the term "Hyksos" is derived from the Egyp. *ḥq3w ḫ3swt*, "rulers of foreign countries." Manetho (3rd cent. B.C.) compiled a history of Egypt and ascribed Dynasties 15-16 to them. Josephus attributed to the Hyksos a rule in Egypt of some five hundred years, but recent chronologies assign them about 100-150 years, e.g., *ca.* 1700-1550 B.C. *See* EGYPT VIII.F.

In attempting to correlate secular history with the biblical data, some scholars have tried to equate the expulsion of the Hyksos from Egypt with the Israelite Exodus, but the chronology rules out this identification, and other factors as well make this hypothesis untenable. Others have associated the Hyksos rule with the Israelite sojourn in Egypt, seeing in Joseph's meteoric rise to the vizierate some favoritism based on common Semitic background. In support of this synchronism is the apparent singling out of Potiphar as "an Egyptian," in apparent contrast to others in Egypt (Gen. 39:1f.), and the mention of chariots (41:43), which were a Hyksos introduction into Egypt. On the other hand, a reference to Egyptian discrimination against foreigners (43:32) shows that persons in Egyptian officialdom were generally Egyptians.

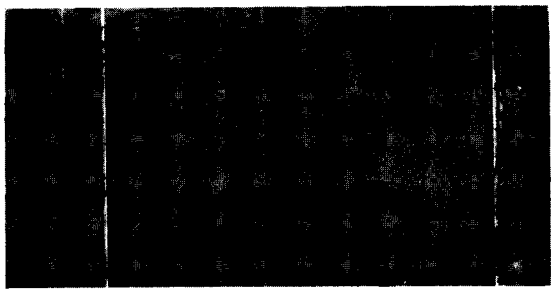
There are chronological difficulties in placing Joseph in the Hyksos period, for the biblical figures indicate that Joseph lived some time before the current dates of the 15th and 16th Dynasties. But the Israelites must have been in Egypt throughout the Hyksos domination, although many matters of chronology hinge on the date of the Exodus. There can be little doubt that the reference to "a new king over Egypt, who did not know Joseph" (Ex. 1:8) refers to the appearance of a native Egyptian dynasty that followed the expulsion of the Hyksos.

The origin of the Hyksos is uncertain; they came from somewhere in Asia and bore Semitic names for the most part. Arriving in Egypt during the time of political weakness and confusion known as the Second Intermediate Period, they were in Egypt some years before their rise to power; their usurpation of rule was the result of gradual infiltration rather than of concentrated military activity. Their capital was located at Avaris (biblical Zoan, modern Ṣân el-Ḥagar; *see* ZOAN), in the northeast Delta. Their influence was widespread in the Mediterranean world and their monuments have been found as far abroad as Baghdad and Crete. Among their most famous kings were Khayan and Apophis.

The Kamose stele shows that late in their period of supremacy the Hyksos were allied with the Nubians against an Egyptian line of princes centered in Thebes (17th Dynasty). Theban rulers, Sekenenre and Kamose, initiated military action against the Hyksos and it is probable that the wounds which caused Sekenenre's death were incurred in such a battle. According to the autobiographical inscription of Ahmose son of Ebana, the Theban Ahmose (founder of the 18th Dynasty) successfully besieged Avaris and pursued the fleeing Hyksos to Sharuhen (Tell el-Fâr'ah) in southern Palestine.

In typical Egyptian fashion, later Egyptian records mention the Hyksos rarely. Hatshepsut claims to have restored temples which the Hyksos had desecrated, and Thutmose III seemed to regard his military campaigns in Palestine-Syria as punitive expeditions against the Hyksos.

By the time the Hyksos attained political rule in Egypt they were largely Egyptianized, but they are credited with the introduction of numerous elements into Egyptian culture. Among these were military innovations that were adopted by the Egyptians: the horse and chariot, the composite bow, new types of dagger and sword, and a different kind of battle-ax. Other contributions may be the shaduf (a water-lifting device), an improved loom, and a lyre. The Hyksos made wide use of scarabs and developed



Blue faience tile (18th Dynasty, 16th-14th cents. B.C.) with a drawing of a typical Hyksos chariot. The Hyksos introduced horses and chariots into Egypt (Metropolitan Museum of Art, gift of J. Pierpont Morgan, 1917)

a scarab style that is a useful chronological criterion for archeologists.

C. E. DEVRIES

HYMENAEUS hī-men'ē-əs [Gk. *Hymenaios,* from Hymen, the god of marriage in classical mythology] (1 Tim. 1:20; 2 Tim. 2:17). A heretical teacher at Ephesus and opponent of the apostle Paul, associated in the former reference with Alexander, and in the latter with Philetus.

In 1 Tim. 1:19f. Hymenaeus is included with certain persons who had made shipwreck of their faith by "rejecting conscience." For this he and Alexander were to be "delivered" to Satan, "that they might learn not to blaspheme." Here, as in 1 Cor. 5:5, the purpose of the separation from the fellowship of the Church was remedial. By their being given over to the powers of evil it was hoped that repentance and a change of conduct would ensue. Since Satan functions as the destroyer of the body and life, many have thought that the infliction of bodily suffering or disease was involved.

Paul does not describe the blasphemy, but in 2 Tim. 2:16f. he admonishes Timothy to avoid "godless chatter" which leads people into ungodliness and "eats its way like gangrene." Hymenaeus and Philetus are examples of this activity in their teaching that the resurrection had already taken place with the implicit denial of the resurrection of the body. It appears probable that Paul was dealing with some form of Gnosticism, which, due to its idea of the necessarily evil nature of all material substance, taught that the resurrection was to be understood in only a spiritual sense and was realized in the present blessings of the Church — thus removing any place for eschatology.

HYMNS IN THE NT. ***I. Encouragements for This Study.***— The Church that meets us in the pages of the NT is a worshiping community of believing men and women. This is clear from the descriptions in the Acts (1:14; 2:42, 46; 4:31; 5:12, 42; 13:1-3; 20:7-12) and from the statements of Paul in his letters (notably 1 Cor. 10–14). It is therefore only to be expected that these chapters and references will contain some allusion to a specific part of the Christian cultus, namely, the worship of God in religious song.

The data lie mostly beneath the surface of the text, however, and have to be explored by the biblical discipline of form criticism as applied to the NT Epistles. But there are, in addition to some explicit references to Christian hymns (in 1 Cor. 14:26; Col. 3:16; Eph. 5:19), some encouragements of an inferential character, to which attention should be drawn. We may list these with a brief comment appended.

First, the origin of the Church in the womb of the Jewish faith made it inevitable that the first followers of the risen Lord Jesus, themselves Jews by birth and tradition, who formed the nucleus of the Jerusalem community, would wish to express their religious devotion in a way to which they were accustomed, and this would include the use of religious song. It is this background which leads to the suggestion that the Lukan canticles (Lk. 1–2; see below) had their first use as canonical Scripture in the context of the worship of the Jewish Christianity which cherished and preserved these messianic psalms.

Then, as the message spread to confront the world of Hellenism, gentile converts entered the Church from a religious world which sang hymns to the deities of Greco-Roman religion. There are some superficial correspondences between the literary form and language used in both pagan and Christian hymnody (see the definitive work of E. Norden, *Agnostos Theos* [2nd ed. 1923]), but on the more serious levels of theological content and human aspiration (noted by Karl Keyssner in another authoritative study, *Gottesvorstellung und Lebensauffassung im griechischen Hymnus* [1932], esp. pp. 166ff.) there are fundamental differences. These differences center in the way in which Christian compositions appeal to God whose nature is known in Jesus Christ as a loving and faithful Father (the nearest we come to this conviction is Cleanthes' Hymn to Zeus, but that trails off in a sad identification of the father of the gods and men with impersonal Fate) and the clear declaration that the God and Father of Jesus Christ is the God who acts in history. Much of the NT hymnology stands in the OT tradition of confessional statements (e.g., Dt. 26:5ff.; Ps. 105) which celebrate the mighty acts of God in salvation-history. Pagan prayer as expressed in personal hymns is largely self-centered and does not break out of the circle of egocentricity (see for a good example the suppliant's appeal to Serapis in Aristides' Hymn to Serapis, which manages to contain some lofty thoughts but without the involvement of personal religion: so G. Delling, *Worship in the NT* [Eng. tr. 1962], p. 114; A. J. Festugière, *Personal Religion Among the Greeks* [1960 ed.], p. 99). NT examples of hymnic prayer are quite different as they focus on objective realities which are at the same time intimately related to the believer's experience in the Christian community — the coming of God's kingdom, the progress of the gospel in the world, and the upbuilding of the Church.

In sum, Christian hymns in the NT Church stand in relation to both Jewish antecedents and pagan examples of Greco-Roman religion as the fulfillment stands to the longing which precedes it. That which explains the transition is the gospel of God's grace in Jesus Christ. This good news of man's salvation brought to Christians an awareness of living in days of eschatological fulfillment; and it was only to be expected that Christian lips should be opened in praise of the mighty deeds of God and in tribute to His goodness. Much closer to the ethos of the apostolic hymns are the confessions of the community at Qumrân (e.g., in 1QS 10:9 and in the Hymn scroll, 1QH 11:3f.). These fine expressions offer examples of personal faith and a desire to give glory to God for His saving acts. But even these tributes lack the note that is characteristic of the NT hymns. Though parts of the NT data are simply creation hymns (Rev. 15:3f.), the most distinctive feature is seen in those hymnic confessions of faith which praise the redeeming power of God in the gospel and share in the element which is taken from the OT and given a richer

HYMNS IN THE NT

connotation in the incarnation and redemption of Israel's Messiah. As R. Deichgräber (in his *Gotteshymnus and Christushymnus in der frühen Christenheit* [1967], p. 201) puts it, "The praise of the community is the response to God's saving act," thus making Christian hymns reflexive and expressive of gratitude to God for all that He has done for the world's reconciliation. Encouragements like this give added depth to our study, for Christian hymns expose the nerve ends of the gospel itself.

II. Presence of Hymns in the NT.–The detection of hymnic forms in the literature of the NT is a product of comparatively recent scholarly work, and includes the results of an analysis of the literary features which are present in the documents. For some further discussion of these features *see* POETRY IN THE NT.

The line that divides poetry from hymnody is finely drawn, and indeed the terms overlap. What distinguishes the latter as such is the subject matter that is expressed in poetic form. Invariably the hymn is focused on God or Christ and praises some aspect of the divine nature or activity.

It is just as difficult and delicate a task to separate out a species of Christian hymn from an early confession of faith, but the chief test (offered by R. Bultmann in his essay in *ConNT,* 11 [1947], 9) is simply one of length. The creed in early times was short and was used as a baptismal confession of faith (e.g., Rom. 10:9). As the credal statement became lengthened in definition of the person and work of Christ and the character of God — both enlargements even in NT times arose as a result of pressure exerted by false teaching and polemics — so the hymnic forms were drawn into use. Adaptations of Jewish hymns (seen in Lk. 1–2 and Rev. 15) were insufficient to ward off the strange teachings which threatened the apostolic gospel; and the distinctive Christian hymn was born out of a need to assert (1) the centrality of Christ in God's saving plan and His unique relationship to God; (2) the true meaning of the Christian life as one of moral excellence; and (3) the freedom of the believer from all forms of bad religion and superstition which would hold him prey to fears and doubts. We can sum up the chief enemy as a gnosticizing teaching which quickly challenged the apostolic message and imposed its presence in the churches of the Pauline mission. The tenets are seen in a denial of the lordship of Christ as the sole intermediary between God and the world (Colossians), the insidious relaxing of the moral fiber which leads Christians to be indifferent to bodily lusts and sins (Ephesians), and the uncertainty that underlies the meaning of life since the star-gods still hold sway and need to be placated. It is not accidental that the main examples of NT hymns address the various situations in which the presence of Gnostic ideas is suspected and form the polemic counterthrust to heretical teaching in the areas of both doctrine and morals. For an elaboration of this thesis see J. T. Sanders, *NT Christological Hymns* (1970).

III. Classification of the Hymns.–In the light of the above discussions, we may attempt to classify the material which is germane.

(1) The Nativity Canticles (Lk. 1:46-55 — the Magnificat; vv. 68-79 — the Benedictus; 2:14 — the Gloria in Excelsis; vv. 29-32 — the Nunc Dimittis) all share common features in their OT coloring and reminder of God's covenant faithfulness. They show that Jesus came as the climax of the OT's hope and longing, and that the God of the Jews is the same as the true God whom Christians know and worship. Contrast Marcion's denial of this and the Gnostic idea of Israel's God as inferior to the high God.

(2) Hymns in the Apocalypse stress the same truth, taken from the synagogues of Hellenistic Judaism (Rev. 4:11; 11:17f.; 14:7; 15:3f.). Into the same category we should place the fragments of Rom. 11:33-35; 1 Tim. 1:17; 6:15f.

(3) Distinctively Christian compositions may in turn be subdivided as follows.

(a) Sacramental. Here parts of Ephesians (2:19-22) and the Pastoral Epistles (Tit. 3:4-7) have been placed; Eph. 5:14, the clearest illustration of a NT hymn, also falls in this grouping. It divides naturally into three lines on grounds of style and finds its obvious *Sitz im Leben* in a baptismal setting. The convert is summoned to moral endeavor, and promised divine aid to live a life worthy of his profession. In the context of the letter it challenges the view of an indifferent moral attitude — a wrong-headed notion which was plaguing the Asia Minor churches (so Eph. 4:17ff.; 5:3ff.; see R. P. Martin, *Expos.T.,* 79 [1968], 296ff.).

(b) Meditative. Eph. 1:3-14 is a good example of a Christian rhapsody on the themes of trinitarian faith and redemption. Possibly a Jewish pattern drawn from the synagogue in which God is blessed (hence the term Berakah) lies in the background, but if so it has been dramatically christianized by impressive Christian concepts of election, salvation, and adoption.

(c) Confessional. The nature of the Christian life comes to vivid expression when believers are called upon to attest their faith in time of trial. Passages of the Pastorals (e.g., 2 Tim. 2:11-13) read like hymns of the martyrs' confession, and illustrate the strenuous quality of Christian living which was expected in the early Church in its incipient conflict with the persecuting state.

(d) Christological. Here we touch the heart of the matter, for as we have seen, the NT teaching on the person of Christ is virtually contained in its hymns. Outstanding specimens are: Jn. 1:1-18; Phil. 2:6-11; Col. 1:15-20; 1 Tim. 3:16; He. 1:1f. All these passages have been the subject of in-depth studies in recent times and collectively are discussed in detail by Sanders and by Deichgräber. Let it suffice to extract a modicum of common teaching. The Christians' Lord is depicted in a cosmological role in the double sense of that adjective. First, His preexistence and pre-temporal activity in creation are made the frontispiece of the hymns, and from the divine order in which He eternally is He "comes down" as the incarnate one in an epiphany. Second, at the conclusion of His earthly life He takes His place in God's presence by receiving the universal homage and acclamation of the cosmic spirit-powers, which confess His lordship and so are forced to abandon their title to control over human destiny. His saving work is seen as that of bringing together the two orders of existence (the celestial and the terrestrial), and His reconciliation is described in a cosmic setting. The hymns are essentially soteriological in their purpose, and set forth the person of Christ in relation to His work as reconciler and world ruler. But inasmuch as He accomplishes what God alone can do — the pacification of the hostile powers of the universe and the enthronement of a true lordship, in particular — and has received from the Father's hands the right to rule human life and to be the judge of history, it was but a short step for the early Christians to set Him on a level with God in their cultic worship. Hymnology and Christology thus merge in praise of the one Lord, soon to be hailed after the close of the NT canon as worthy of hymns "as to God" (Pliny's report of Bithynian Christians' worship, A.D. 112). And it was this close drawing together of the Father and the Son which laid the foundation for the trinitarian creeds and raised a bulwark against classical Gnosticism, the incipi-

ent presence of which in NT times impelled, we may believe, the creation of these inspired hymns.

Boismard, *St. John's Prologue* (Eng. tr. 1957); and R. H. Gundry, "Form, Meaning and Background of the Hymn Quoted in 1 Tim. 3:16," in W. W. Gasque and R. P. Martin, eds., *Apostolic History and the Gospel* (1970), pp. 203-222.

On the Christology of the hymns see D. M. Stanley, *Studies in Salvation History*, ed. C. L. Salm (1964). R. P. MARTIN

HYPOCRISY [Gk. *hypókrisis*] (Mt. 23:28; Mk. 12:15; Lk. 12:1); NEB also "crafty" (Mk. 12:15); **HYPOCRITE** [Gk. *hypokritḗs*] (Mt. 6:2, 5, 16; 7:5; 15:7; etc.); NEB also HYPOCRISY.

I. OT Use.—In the OT the AV translates Heb. *ḥōnēp* as "hypocrisy" (Isa. 32:6) and *ḥānēp* as "hypocrite" or "hypocritical" (Job 8:13; 13:16; 15:34; 17:8; 20:5; 27:8; 34:30; 36:13; Ps. 35:16; Prov. 11:9; Isa. 9:17 [MT 16]; 10:6; 33:14). The verb *ḥānēp*, however, means "be polluted, profane, godless." Thus, the Eng. "hypocrisy" and related words do not correctly represent the Hebrew terms. In the LXX the Gk. *hypokritḗs* was used to translate *ḥānēp* and is therefore to be understood as meaning "a godless man" rather then one who pretends to be what he is not. This usage of *hypokritḗs* to refer to evil in general is found in much of the Jewish dispersion literature (*TDNT*, VIII, 563-65). It may be that NT usage is occasionally influenced by this meaning.

II. NT Use.—For the most part, however, the NT meanings of *hypókrisis* and *hypokritḗs* reflect the classical and Hellenistic use of the words to refer to "acting" and "actor." In Greek literature the *hypokritḗs* was a person who played a part on the stage. He usually wore a mask, and in speech and action imitated the character whom he represented in the stage production. There was no necessary connotation of evil or deception involved in the early use of the terms. Context always made it clear whether the action was to be viewed as evil or not. In the NT the terms are invariably evil in sense, and it was this use that gave our English transliterations of the terms ("hypocrisy," "hypocrite") the persistent meaning of "pretending to be what one is not," especially in the areas of religion and morality.

A. In the Synoptic Gospels. The majority of the NT occurrences of the words are found in the Synoptic Gospels (*hypókrisis* three times; *hypokritḗs* eighteen times). In the Sermon on the Mount Christ described as hypocrites those whose giving, praying, and fasting are paraded in public (Mt. 6:2, 5, 16). These are people who with ulterior motives openly play the part of righteous persons. One who criticizes another for that of which he himself is guilty is also a hypocrite (Mt. 7:5; Lk. 6:42). The Pharisees belonged in this category because they performed the external actions of religion without an inner devotion to God (Mt. 15:7f.; Mk. 7:6f.). They are also accused of pretense in Lk. 12:1, where Christ speaks of hypocrisy as "the leaven of the Pharisees." Here He seemed to refer to the pervasive character of hypocrisy. On another occasion Christ spoke of the people in general as hypocrites because they could interpret and predict the weather but pretended not to understand the meaning of the times (Lk. 12:56). Lk. 13:15 was addressed to religious leaders who covered their hatred for Christ with the cloak of meticulous concern for the sabbath. They were exposed by Christ's reminder that they even took care of their animals on the sabbath day Again the religious leaders were designated as hypocrites when they posed as sincere men asking if it was right to pay Roman taxes (Mt. 22:18; Mk. 12:15). Seven times in Mt. 23 (vv. 13-15, 23, 25, 27, 29) Jesus pronounced woe on the scribes and Pharisees because they were hypocrites. Their hypocrisy is most explicitly set forth in vv. 23, 25, 27, and 29. In v. 28 hypocrisy is listed as one of the sins they attempted to hide. In Mt. 24:51 hypocrites are apparently classed among the worst of sinners.

B. In the Pauline Epistles. Paul employs *hypókrisis* only twice, and *hypokritḗs* not at all. Peter's act of withdrawing from table fellowship with gentile Christians when Jews from Jerusalem came to Antioch is called hypocrisy (RSV "insincerity," Gal. 2:13). In 1 Tim. 4:2 false teachers are said to be characterized by hypocrisy (RSV "pretensions") because they pose as teaching the truth.

C. In the Petrine Epistles. Peter's only use of either of the terms is found in his inclusion of *hypókrisis* (RSV "insincerity") in a list of sins to be avoided (1 Pet. 2:1).

See *TDNT*, VIII, *s.v.* ὑποκρίνομαι (U. Wilckens); *DNTT*, II, 468-470. D. W. BURDICK

HYRCANUS hûr-kā'nəs [Gk. *Hyrkanos*]; AV HIRCANUS. "Son of Tobias, a man of very high standing," who had a large sum of money deposited in the temple of Jerusalem when Heliodorus was sent to confiscate it in 187 B.C. (2 Macc. 3:11ff.). Opinions differ about whether to identify this Hyrcanus with Tobias's grandson, whose birth and history are related at considerable length by Josephus (*Ant.* xii.4.6-11 [186-236]), or with another Hyrcanus mentioned in *Ant.* xiii.8.4 (249-253). *See* HASMONEANS; MACCABEES.

HYSSOP [Heb. *'ēzôḇ*; Gk. *hýssōpos*] (Ex. 12:22; Lev. 14:4, 6, 49ff.; Ps. 51:7 [MT 9]; etc.); NEB also MARJORAM. A plant, the identity of which has been a subject of prolonged and inconclusive discussion. It is not the labiate that Linnaeus named *Hyssopus officinalis*, since that species is indigenous only to southern Europe. Probably "hyssop" refers to several plants, as does Arab. *za'tār*, a name given to a group of plants like marjoram and thyme. The hairy stems of marjoram would serve excellently as an aspergillum when bunched together. In addition, these species are widely distributed, growing even in desert areas. On this basis, OT references to hyssop may well be to *Origanum syriacum* L., and the Egyptian marjoram *O. maru* var. *aegyptiacum* (L.) Dinsm., both of which favor terrace walls and rock crevices (cf. 1 K. 4:33).

Attempts to identify hyssop with the *Capparis spinosa* or caper (Arab. *'aṣaf*) are fanciful philologically as well as botanically. The caper bears flat leaves on stiff prickly stems, and would furnish neither a satisfactory aspergillum nor a "sponge" (Jn. 19:29; cf. Mt. 27:48; Mk. 15:36). For the latter purpose the *Origanum* would also be entirely unsuitable. Some authorities maintain that the hyssop, sponge, and vinegar were lifted up to the dying Jesus on a stalk of Indian millet (*Sorghum vulgare* var. *durra*), while others have argued that Gk. *hyssṓpō* is a corruption of *hýssō*, "javelin," and that the passage should read, "they put a sponge full of vinegar upon a javelin" (cf. NEB). R. K. H.

I AM; I WILL BE. *See* GOD, NAMES OF.

IACIMUS. *See* ALCIMUS.

IBEX ī'beks [Heb. *dîšōn*] (Dt. 14:5); AV PYGARG; NEB WHITE-RUMPED DEER. A kind of antelope or mountain goat (BDB, p. 190). Heb. *dîšōn* is derived from *dûš*, "to tread, thresh" (cf. Hos. 10:11; cf. also Assyr. *daššu*, "mountain goat"). The ibex must be similar to the other "clean" animals with which it is listed in Dt. 14:5. The LXX *pýgargos* (from *pygé*, "rump," and *argós*, "white") also occurs in Herodotus iv.192 as the name of an antelope. It has been used as a specific name of *Cervus pygargus*, the Tartarian roe, and *Bubalis pygargus*, a small South African antelope. Both the AV and NEB derive their translations from the LXX: the NEB by paraphrase and the AV by transliteration. A. E. DAY

IBHAR ib'här [Heb. *yiḇḥār*–'He (God) chooses'; Gk. *Ebear, Baar, Iebaar*]. One of David's sons, born at Jerusalem; he was the son of a wife, not of a concubine (2 S. 5:15; 1 Ch. 3:6), but is otherwise unknown. His name in all three lists follows Solomon's.

IBIS ī'bəs [Heb. *yanšûp*; Gk. *eíbis*] (Lev. 11:17); AV GREAT OWL; NEB SCREECH-OWL. This is the only instance where the ibis is mentioned in the RSV, which here follows the LXX and Vulgate. In Dt. 14:16 and Isa. 34:11 the RSV retains the "owl" of the AV and RV, so the rendering *yanšûp* as "ibis" in Lev. 11:17 seems unjustified. Instead, the eagle-owl (*Bubo ascalaphus*) or the long-eared owl (*Asio otus*) would seem to be indicated. The ibis (*Threskiornis aethiopica*) was familiar in antiquity as the sacred bird of the Egyptian deity Thoth.

IBLEAM ib'lə-am, ib'lē-əm [Heb. *yiḇlᵉʿām*; Gk. *Ieblaam*]. A fortified city with its villages, apparently located in or near the territory of Issachar, but included in the northern part of the territory assigned to the half-tribe of Manasseh that settled W of the Jordan, when Canaan was divided among the tribes of Israel after the conquest under Joshua (Josh. 17:11). It may be the Levitical city Bileam of 1 Ch. 6:70 (MT 55) and also the Belmain of Jth. 4:4. Ibleam occurs as Ybʿm in Egyptian lists. The site is represented by Khirbet Belʿameh, about 16 km. (10 mi.) SE of Megiddo.

Manasseh failed to drive the Canaanites from Ibleam but forced them into the tribe's service (Jgs. 1:27f.). When Jehu was destroying the family of Ahab, he mortally wounded Ahaziah king of Judah as he fled in his chariot "at the ascent of Gur, which is by Ibleam" (2 K. 9:27). According to the Lucian text, Zechariah king of Israel was killed there by Shallum (2 K. 15:10).

R. J. HUGHES, III

IBNEIAH ib-nē'yə [Heb. *yiḇnᵉyâ*–'Yahweh builds up']. A Benjaminite, son of Jeroham (1 Ch. 9:8).

Winged ibex, silver with partial gilding, originally used as a handle on a vessel. Susa, 4th cent. B.C. (Louvre)

IBNIJAH ib-nī'jə [Heb. *yiḇnîyâ*–'may Yahweh enlarge']; NEB IBNIAH. A Benjaminite, father of Reuel (1 Ch. 9:8).

IBRI ib'rē [Heb. *'iḇrî*–'a Hebrew']. A Merarite Levite, son of Jaaziah (1 Ch. 24:27).

IBSAM ib'sam [Heb. *yiḇśām*–'fragrant']; AV, NEB. JIBSAM. Descendant of Issachar, family of Tolah (1 Ch. 7:2).

IBZAN ib'zan [Heb. *'iḇṣān*]. The tenth judge of Israel. His city is given as Bethlehem (whether of Judah or Zebulun is not stated). He judged Israel seven years, and when he died he was buried in his native land. The only personal details given about him in the biblical narrative are that he had thirty sons and a like number of daughters. He sent all of his sons "outside" for wives and brought husbands from "outside" for all his daughters. The exact meaning of Heb. *haḥûṣ*, "outside," is a matter of speculation, but the great social importance of the man and possibly alliances among tribes are suggested in the brief narrative (Jgs. 12:8–10). Jewish tradition identifies Ibzan with Boaz of Bethlehem in Judah (T.B. *Baba Bathra* 91a).

E. D. ISAACS

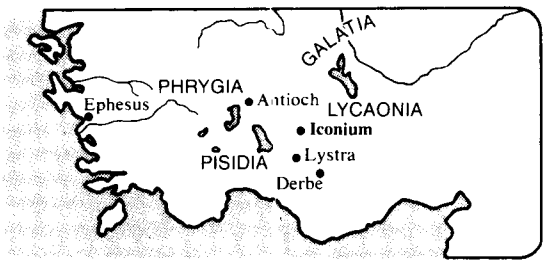
ICE [Heb. *qeraḥ*]. Ice is almost unknown in Palestine and Syria except on the highest mountains. At moderate heights of less than 1200 m. (4000 ft.) some ice may form during the night in winter, but the warm rays of the sun melt it the next day. A great quantity of snow collects in caves in the mountains during the winter and is thus preserved for use in the summer months. The OT uses the word in three descriptions of God's power: "From whose womb did the ice come forth, and . . . the hoarfrost" (Job 38:29); "By the breath of God ice is given" (37:10); "He casts forth his ice like morsels" (Ps. 147:17).

Figuratively, untrue friends are compared to streams "which are dark with ice" (Job 6:16). A. H. JOY

ICHABOD ik'ə-bod, ī'kə-bod [Heb. *'î-ḵāḇôḏ*–'inglorious'; LXX B *ouai barchabôth*, A *ouaí chabôth, Atimos*]. Son of Phinehas, Eli's son, slain at the battle of Aphek when the ark was taken. Ichabod was born after his father's death. His mother named him on her deathbed to indicate that the "glory [had] departed from Israel" (1 S. 4:19–22). He was thus important as a symbol, though little is recorded of him as an individual. His nephew Ahijah was one of those who waited with Saul and the six hundred at Gibeah just before Jonathan's brave attack upon the Philistines (1 S. 14:2f.). H. WALLACE

ICONIUM ī-kō'nē-əm [Gk. *Ikonion* (Acts 13:51; 14:1, 19, 21; 16:2; 2 Tim. 3:11), *Eikonion* (Acts 14:21 B D)]. A city of south-central Asia Minor in which Paul proclaimed the gospel on his first missionary journey (Acts 14:1-6) and which he apparently revisited on the second and third missionary journeys.

I. Topography and History.–In what remains the definitive essay (in *Cities of St. Paul*), Sir William Ramsay likened Iconium to Damascus. The physical setting is similar: Iconium is close to the mountains on a high, fertile plateau that is well watered by large streams. Again, Iconium is not suited to military defense, and it thus became a prosperous city of peace and commerce as well as a center of agriculture. Furthermore, Iconium was on a major trade route (between Ephesus and Syria) and was an important crossroads of the Roman empire, with no less than five roads radiating from it. Another point is that the origins of Iconium are lost in antiquity. Two legends, one Phrygian and the other Greek, exist as explanations of the beginning



of Iconium, each playing in a different way on Gk. *eikṓn* ("image") as the source of the name Iconium. Between the 11th and 14th cents., Iconium (Konya) was similar to Damascus in that it became the capital of the Seljuk empire of Roum and the possessor of so many beautiful buildings that the Turks spread the epigram: "See all the world; but see Konya." Modern Konya remains known for its plum and apricot orchards.

Iconium lies close to the border between Phrygia and Lycaonia, and thus it has been associated with both regions. So far as topography is concerned, Iconium is naturally suited to be the capital of the region of Lycaonia. Yet the city was regarded in earliest times as Phrygian; its inhabitants were of Phrygian (not Lycaonian) descent, although in later times the educated classes took pride above all in their Hellenism. Archeological evidence verifies the persistence of the Phrygian language. The religion of the area was the native Phrygian Cybele worship, which, however, took on Greek dress in the Hellenistic period. In this period Iconium was governed successively by the Seleucids, Galatians, and the kings of Pontus. This period was followed by the Roman conquest under Mithradates VI. Mark Antony gave Iconium to Polemon of Cilicia and shortly thereafter it came under the rule of Amyntas of Galatia. Iconium was commonly regarded as a city of Lycaonia from 100 B.C. to A.D. 100, despite the existence of references (both before and after this period) to the city as Phrygian. When Amyntas died in 25 B.C., the city was given back to the Romans and belonged to the Roman province of Galatia until the end of the 3rd century.

Ramsay regarded Acts 14:6 as a "striking instance of local accuracy" when it says that Paul and Barnabas fled from Iconium to Lystra and Derbe, "cities of Lycaonia." This phrase implies that Iconium was a city of Phrygia and agrees with Xenophon (4th cent. B.C.) that Iconium was "the last city of Phrygia" on Cyrus' eastward march (*Anabasis* i.2.19). From the perspective of the author of Acts, Iconium probably belonged with the Phrygia of 16:6 and 18:23.

After becoming a part of the Roman empire, the city retained its Hellenistic character: only in reference to Iconium, of all the cities of Asia Minor, does Acts mention "Hellenes" (Acts 14:1; 16:1,3). Nearby Lystra and Antioch were utilized as military outposts and were more subject to Romanization. Nevertheless, Iconium was honored by Rome for loyalty, receiving from Claudius the imperial name Claudiconium (*ca.* A.D. 41) and achieving the favored status of a Roman colony from Hadrian (*ca.* A.D. 135). The later history of Iconium includes an ecclesiastical council held there in 235; numerous inscriptions point to a thriving Christian population in the early centuries. Iconium became a secondary city in the new province of Pisidia (with its capital Antioch) created by Diocletian in 295. Less than a century later (372) Iconium was made the capital of the province of Lycaonia. Iconium fell to the Moslems in 708 and was part of the

Byzantine empire until it was made capital of the Seljuk empire in 1097. Today Konya continues to be a provincial capital in Turkey.

II. The Mission of Paul.–According to the narrative of Acts (14:1-6), Paul and Barnabas came to Iconium after having been driven out of Pisidian Antioch by the Jews, following their success in preaching the word among the Gentiles. In the synagogue at Iconium "a great company believed, both of Jews and Greeks [*Hellēnōn*]." The unbelieving Jews poisoned the minds of the Gentiles, but Paul and Barnabas were able "for a long time [*hikanón chrónon*]" to continue their preaching and to perform "signs and wonders." The populace were divided in their response; the opposition stirred up by the unbelieving Jews culminated in a plot by Jews and Gentiles "with their rulers" to assault and stone the apostles. The reference to the rulers may suggest some formal authorization of the Jewish penalty of death by stoning. The whole context, however, suggests the precipitant action of a mob, with no concern for legality. When Paul and Barnabas heard of the plan they escaped to the Lycaonian cities of Lystra and Derbe. Undaunted by Paul's escape, Jews of Iconium (and Antioch) turned the people of Lystra against him and accomplished their purpose of stoning Paul (to death, as they supposed). In an autobiographical reminiscence at the end of his life (2 Tim. 3:11), Paul mentions his persecution at Iconium (as at Antioch and Lystra) to Timothy, who was from Lystra, but known and well spoken of by the brethren in Iconium (Acts 16:2).

After preaching at Derbe, Paul and Barnabas returned to Iconium (as to the other cities) to strengthen new disciples and to appoint elders for the church (14:21-23). Although Iconium is not mentioned by name, Paul very probably visited the city on his second (16:6) and third (18:23) missionary journeys. According to the so-called South Galatian theory, Iconium (with Antioch, Lystra, and Derbe) was one of the churches addressed by Paul's Epistle to the Galatians (*see* GALATIANS, EPISTLE TO THE). This church may also have been among those addressed by 1 Peter (1:1).

III. Thecla.–The apocryphal Acts of Paul and Thecla, a book dating from the late 2nd cent. but well known in the early Church, tells the story of Thecla, a young woman of Iconium who overheard Paul's preaching from her window. Thecla became a convert, renounced marriage, and engaged in preaching following Paul's example. She suffered many trials and eventually became the most famous virgin martyr and the source of a growing legend — especially among the Christians at Iconium, where much evidence of her influence has been discovered. Ramsay reconstructed a putative first-century version of the story, but the extent to which the romance rests upon a historical kernel (if at all) cannot be established. A conical hill near Konya bears the name of St. Thecla to this day.

D. A. HAGNER

IDALAH id'ə-lä, īd'ə-lə [Heb. *yiḏ'ᵊlâ*] (Josh. 19:15). One of the towns allotted to Zebulun. It is named immediately before Bethlehem, and thus it is generally identified with Khirbet el-Ḥawârah (cf. Ḥuryēh in T.P. *Megillah* i.1), about 10 km. (6 mi.) NW of Nazareth, just S of BETHLEHEM **2.**

IDBASH id'bash [Heb. *yiḏbāš*–'honey-sweet'(?)]. A man of Judah, one of the sons of the father of Etam (1 Ch. 4:3; LXX "sons of Etam").

IDDO id'ō.

1. [Heb. *'iddô*] (Ezr. 8:17). The "leading man at the place Casiphia," who provided Ezra with Levites and temple servants; the head of the Levitical body or school, said to be one of the temple servants, but perhaps an "and" has slipped out, and it should read: "his brethren *and* the temple servants." In 1 Esd. 8:45f., the AV has "Saddeus" and "Daddeus," while the NEB has "Doldaeus."

2. [*yiddô*] (1 Ch. 27:21). Son of Zechariah, and captain of the half-tribe of Manasseh in Gilead, under David.

3. [*yiddô*] (Ezr. 10:43). One of those who had taken foreign wives. Another reading is "Jaddai" (AV "Jadau"). In 1 Esd. 9:35 the AV has "Edes," the NEB "Edaes."

4. [*'iddô*] (1 K. 4:14). Father of Abinadab, Solomon's commissary in Mahanaim in Gilead.

5. [*yaddô*] (1 Ch. 6:21). A Gershomite Levite, son of Joah, called Adaiah in v. 41; ancestor of Asaph.

6. [*K ye'dî, Q ye'dô*, also *'iddô* (2 Ch. 12:15; 13:22)]. A seer and prophet who provided one of the Chronicler's sources for the reigns of Solomon (2 Ch. 9:29), Rehoboam (12:15), and Abijah (13:22). He may have been the prophet who denounced Jeroboam (1 K. 13), whom Josephus and Jerome call Jadon or Jaddo. Jerome makes Iddo and Oded the same.

7. [*'iddô*] (Zec. 1:1). Grandfather (father, according to Ezra) of the prophet Zechariah. See also Zec. 1:7; Ezr. 5:1; 6:14 (*'iddô'*). In 1 Esd. 6:1 the AV and NEB have "Addo."

8. [*'iddô'*] (Neh. 12:4, 16). A priest who went up with Zerubbabel (v. 4); one of the priestly clans which went up (v. 16); perhaps same as **7.**

P. W. CRANNELL

IDLE [Heb. *rāpâ*] (Ex. 5:8, 17); NEB LAZY; [*rᵉmîyâ*] (Prov. 19:15); NEB IDLERS; [*pāraṭ*] ("sing idle songs," Am. 6:5); AV CHANT; NEB "pluck the strings"; [Gk. *argós*] (Mt. 20:3, 6); NEB also "nothing to do"; [*lēros*] (Lk. 24:11); NEB NONSENSE; [*átaktos*] (1 Thess. 5:14); AV UNRULY; NEB CARELESS; [*ataktéō*] (2 Thess. 3:7); AV DISORDERLY; NEB IDLERS; [*argéō*] (2 Pet. 2:3); AV LINGER; **IDLENESS** [Heb. *'aṣlût*] (Prov. 31:27); [Gk. *atáktōs*] (2 Thess. 3:6, 11); AV DISORDERLY; **IDLER** [Gk. *argós*] (1 Tim. 5:13); (SPEAKING) **IDLY** [Heb. *dabbēr dāḇār*] (Isa. 58:13); AV "speaking thir own words"; NEB "attending to your own affairs."

To be idle is to neglect one's own responsibilities so that one becomes dependent on the generosity of others for the necessities of life. Hebrew Wisdom said that idleness led to poverty and want (Prov. 19:15; Eccl. 10:18; Tob. 4:13). A mark of a good wife is that she will "not eat the bread of idleness" (Prov. 31:27); i.e., she will not sit by while others work and then enjoy the fruits of their labor.

The NT description of "idlers" is found primarily in Paul's letters to the Thessalonians. The verb *ataktéō* was used originally of "soldiers marching out of order or quitting the ranks, hence 'to be neglectful of duty, to be lawless, to lead a disorderly life'" (Thayer, p. 83). Hence when Paul exhorts his readers to "admonish the *atáktous*" (1 Thess. 5:14), it may be inferred that he is referring to those who have committed some moral wrong or deviated from a prescribed rule (so Chrysostom; AV "unruly"). A contemporary papyrus from Egypt (Oxy. P. II, 275, 24), however, shows the word to mean "a loafer," or "not being at one's post"; thus the reference is to absenteeism from work, hence being "idle" or "lazy." Such laziness seems to have been a long-standing problem in Thessalonica, where in the general excitement surrounding the anticipation of an imminent Parousia some Christians had quit working and had begun to live off the generosity of

their fellow Christians. This refusal to work directly violated the tradition Paul had passed on (2 Thess. 3:6) and his own example (v. 7). These "idlers" were severely rebuked not only because they failed to work but also because they interfered with the work of others of the community (2 Thess. 4:11), being "mere busybodies," instead of attending to their own affairs (1 Thess. 4:11).

The problem of "busybodies" in connection with idleness is also found in 1 Tim. 5:13. In this case, widows who were not engaged in doing good deeds tended to "gad about from house to house" and became "not only idlers but gossips and busybodies, saying what they should not." It is well known that a definite office of widow emerged in the early Church (1 Tim. 5:3, 9; Ign. *Smyrn.* 13:1; Polyc. *Phil.* 4:3), and it seems that these women especially were expected to perform good works (1 Tim. 5:10). House-to-house visitations were evidently a part of these duties, and the very real danger was that these "pastoral calls" would degenerate into opportunities for prying into neighbors' affairs.

The men in the marketplace in Jesus' parable of the laborers and the vineyard (Mt. 20:3, 6) were "standing idle." These men were not "lazy" but rather unemployed and looking for work (v. 7). The "idle" (*léros*—occurring only here in the NT) tale of the women returning from the empty tomb on Easter morning seemed to the disciples to be "pure nonsense," so they did not initially believe that Christ had risen from the dead (Lk. 24:11).

Bibliography.—MM, p. 89; M. Dibelius, *Pastoral Epistles* (Eng. tr. 1972), p. 75; J. E. Frame, *Thessalonians* (*ICC*, 1912), p. 197.

D. K. MCKIM

IDOL [Heb. *ṣemel* (2 Ch. 33:7, 15), *pesel* (Isa. 40:19; 44:17; Jer. 10:14; etc.), *'āwen* (Isa. 66:3), *'āṣāḇ* (1 Ch. 10:9; 2 Ch. 24:18; Hos. 10:6; Ps. 106:36; 115:4; Isa. 10:11; etc.), *'ĕlîl* (Lev. 19:4; 26:1; 1 Ch. 16:26; Ps. 96:5; 97:7; Isa. 2:8; etc.), *gillûlîm* (Lev. 26:30; 1 K. 15:12; Ezk. 6:4-6, 9, 13; etc.), *heḇel* (Dt. 32:21; 1 K. 16:13; 2 K. 17:15; etc.), *šiqqûṣ* (2 Ch. 15:8; Jer. 16:18), *ṣîr* (Isa. 45:16), *'êmâ* (Jer. 50:38); Gk. *eidōlon* (Acts 7:41; 15:20; Rom. 2:22; Rev. 9:20; etc.), *eidōlóthytos* (Acts 15:29; 21:25; 1 Cor. 8:1, 4; 10:19; Rev. 2:14, 20; etc.), *eidōlolatría* ("worship of idols," 1 Cor. 10:14; cf. 1 Pet. 4:3), *kateídōlos* (Acts 17:16)]; AV also GRAVEN IMAGE (Isa. 40:19; Hab. 2:18; etc.), A GOD (Isa. 44:17), "vanities" (Dt. 32:21; 1 K. 16:13; etc.), "detestable things" (Jer. 16:18), etc.; NEB also IMAGE (2 Ch. 33:7; Isa. 40:19; etc.), FALSE GOD (1 Cor. 8:4), WORTHLESS IDOLS (1 K. 16:13, 26; etc.), "heathen consecration" (1 Cor. 8:7), etc.; **IMAGE** [Heb. *ṣelem* (Gen. 1:26f.; 5:3; 9:6), *t'rāpîm* (1 S. 19:13, 16), *'ĕlîl* (Isa. 10:11), *mipleṣeṯ* (1 K. 15:13; 2 Ch. 15:16), *taḇnîṯ* (Ps. 106:20), *'āṣāḇ* (Jer. 44:19), *neseḳ* (Jer. 10:14; 51:17); Aram. *ṣ'lēm* (Dnl. 2:31f.; etc.); Gk. *eikón* (Rom. 8:29; 1 Cor. 11:7; 15:49; Col. 1:15; Rev. 14:9, 11; etc.)]; AV also IDOL (1 K. 15:13; 2 Ch. 15:16), "similitude" (Ps. 106:20); NEB also HOUSEHOLD GODS (1 S. 19:13, 16), "obscene object" (1 K. 15:13; 2 Ch. 15:16), LIKENESS (Rom. 8:29; 1 Cor. 15:49), etc.; **GRAVEN IMAGE** [Heb. *pesel*] (Ex. 20:4; Lev. 26:1; Dt. 4:16, 23, 25; Jgs. 18:18; 2 K. 21:7; etc.); NEB also FIGURE (Dt. 4:16), CARVED FIGURE (Dt. 4:23, 25; 5:8; etc.), IDOL (Jgs. 18:30f.; Isa. 44:15), etc.; **MOLTEN IMAGE** [Heb. *messēḳâ* (Dt. 9:12; 27:15; Jgs. 18:17f.; Ps. 106:19; etc.), *neseḳ* (Isa. 41:29), *nāsîḳ* Dnl. 11:8)]; NEB also IMAGE OF METAL (Dt. 9:12), EFFIGIES (Isa. 41:29); etc. A material object representing a deity to which religious worship is directed. "Idol" is a transliteration of the Gk. *eidōlon*, "image." The prohibition of idol worship and manufacture occurred early in Israel's history and remained an important concern, often occupying a central place in the prophetic literature. These prohibitions were continued in the primitive Church, and after the conversion of large numbers of Gentiles, the APOSTOLIC COUNCIL issued a written admonition to the gentile churches prohibiting any association with idols and idolatry (Acts 15:20-29).

I. Vocabulary.—The Heb. *semel* denotes a figure of anything (Dt. 4:16) as well as the image of a particular deity (BDB, p. 702). Heb. *pesel* is derived from *pāsal*, "hew," "cut," hence, something carved or cut from wood or stone (BDB, pp. 820f.). The *t'rāpîm* (Gen. 31:19, 34f.; 2 K. 23:24) were probably small statues of household gods (*see* TERAPHIM). Heb. *massēḳâ* designates a molten image (KoB, pp. 541f.).

Canaanite graven image of silver (c.a. 1600 B.C.) from Nahariyah on the northwestern coast of Israel (Israel Department of Antiquities and Museums)

IDOL

In addition to terms for objects of worship, the Hebrew OT contains derogatory epithets that denote idols, expressing the contempt of the Hebrews for foreign deities. Thus, Heb. *'ĕlîlîm*, the plural of *'ĕlîl*, "nothing," "vain," means "nonentities" (KoB, pp. 53f.). Heb. *'āṣāḇ* is derived from the verb *'āṣaḇ*, "form," "fashion," hence, something made by hand, but a double meaning is intended because of the similarity to Heb. *'āṣaḇ*, "hurt," "grieve." Heb. *mipleṣeṯ*, "object of trembling," is derived from *pālaṣ*, "shudder." Heb. *'āwen* can mean "sorrow," "trouble" (e.g., Gen. 35:18; Nu. 23:21), but also is a term for "idol" (Isa. 66:3). The verb *hāḇal*, "be vain, empty," is a cognate of *heḇel*, "vanity." Thus the AV translates "vanities" and the NEB "worthless idols." The plural noun *gillûlîm*, found most frequently in the books of Kings and in Ezekiel, is possibly derived from *gālal*, "roll." Hence, idols are "those rolled about"; they must be carried and have no life of their own. Another derivation is possible from *gēl*, "dung" (KoB, pp. 181, 183f.). Heb. *'ēmîm*, literally "objects of fright," is a cognate of *'êmâ*, "fright," "horror." The verb *šāqaṣ*, "be unclean, detestable," gives the noun *šeqeṣ*, "detestable thing," thus "loathsome idols" in the NEB (2 Ch. 15:8) and "detestable things" in the AV (Jer. 16:18).

Frequently two words are combined to form a compound expression denoting an idol. Thus Heb. *'ēṣ pislām* literally means "wooden idols" and is so translated in the NEB (Isa. 45:20). Heb. *haḇlê nēḵār*, "foreign vanities," is rendered "strange vanities" in the AV, "foreign gods" in the NEB, and "idols" in the RSV (Jer. 8:19). Similar translations are followed for Heb. *haḇlê šāw'*, "worthless vanities"; the NEB renders "useless idols," the AV has "lying vanities," and the RSV translates simply "idols." The expression *sēmel haqqin'â*, "image of jealousy" (Ezk. 8:3, 5), is obscure. W. Eichrodt interprets the expression to mean "image of passionate love," since Heb. *qin'â* can mean the ardor of love as well as jealousy (KoB, pp. 842f.). Thus, Eichrodt understands the image to be that of the deity ASHERAH, a goddess of love. This suggestion accords with 2 K. 21:7, which states that King Manasseh set up an image of Asherah in the temple. The image was destroyed by Josiah (2 K. 23:6), but may have been restored later (W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], p. 122).

The NT terms for "idol" include Gk. *eídōlon*, used most frequently, and several of its cognates. Gk. *eidōlóthyton* specifically refers to meat sacrificed to idols. In 1 Cor. 10:14, the NEB renders Gk. *eidōlolotría*, "idolatry," literally; the RSV reads "worship of idols." Gk. *kateídōlos* appears only in Acts 17:16 and means "full of idols." The phrase *homoiṓmati eikónos* in Rom. 1:23 literally means "likeness, image" (Bauer, rev., pp. 221, 421, 567).

II. Form.–The familiarity of the Hebrews with the forms of foreign deities is due not only to the geography of Palestine in OT times, but also to the pagan background from which the Israelite nation emerged. Israel was in close political, social, and economic contact with Syria, Phoenicia, Philistia, and Canaan, and thus was widely exposed to foreign gods. Also, Israel was situated on the main route between Egypt and the rest of the Near East, so that the Hittites, Assyrians, Babylonians, and Egyptians had frequent contact with Israel. The Mesopotamian background of the patriarchs is well known, and coupled with Israel's sojourn in Egypt, it exposed the early Israelites to a variety of idolatries.

Jeroboam I had golden bulls built for his sanctuaries of Bethel and Dan (1 K. 12:28-30), an event reminiscent of the golden calf of Aaron (Ex. 32:1-6). The bulls were probably wooden statues covered with gold plate. Although Jeroboam was not advocating a departure from Yahweh the God of Israel, the images of the bull had idolatrous connotations (R. de Vaux, *Ancient Israel* [Eng. tr. 1961], II, 333-35). The Egyptian gods Apis and Hathor were both represented by a bull (*ANEP*, nos. 570, 573), as was 'El, the head of the Canaanite pantheon. Ahab built a temple to BAAL, the Canaanite storm god. A stone stele found at Ugarit depicts Baal as a mighty warrior, wielding a club and a lightning bolt (*ANEP*, no. 490). Ahab's temple undoubtedly made use of similar images. The worship of the goddess Asherah was widespread in Syria, Canaan, and throughout Israel in different periods. The exact form and construction of the Asherim are uncertain; whether they were phallic pillars or stele inscribed with an image is not known. Several stone pillars (Heb. *maṣṣēḇâ*, "pillar") manufactured for the worship of Egyptian deities were unearthed at Timnah in 1969 (*see* PILLAR). Other findings there included the remains of a sanctuary dedicated to the goddess Hathor, incense altars, and smelting equipment (*EAEHL*, IV, 1186-1197). The Israeli archeologist Y. Aharoni directed the excavation of a solar shrine at Lachish in 1966 and 1968 (cf. Ezk. 8:16). The date of the shrine has been fixed in the Hellenistic period, but there is evidence that the solar shrine was preceded by other kinds of cults at the same site; a stone pillar, the remains of a buried olive tree, possibly an Asherah, and various cult vessels and incense burners have been recovered (*EAEHL*, III, 747-49).

Bronze statuette, covered with gold leaf, of a god, possibly Baal. From Megiddo, *ca.* 1200 B.C. (Oriental Institute, University of Chicago)

Besides the upright pillars, engraved stelae, and gold- and silver-covered idols, much smaller objects served as representations of deity. A small seal from Bethel depicts the goddess Astarte (*see* ASHTORETH), along with an unnamed deity. Small bronze figurines of the Egyptian deities Horus and Osiris have been recovered at Ashkelon (*EAEHL*, I, 122, 124). Findings at Beth-shean include a small stele of the goddess Anat, consort and sister of Baal, and temple cult objects covered with birds and serpents (cf. Ezk. 8:10). Earlier strata contain objects of Egyptian origin, including a stele erected to the honor of Mekal (*ANEP*, no. 487), the god of Beth-shean (*EAEHL*, I, 213-17). Nude figurines of female goddesses, some with exaggerated features, are common among artifacts from various Palestinian sites (*ANEP*, nos. 464-473).

Cylindrical pottery cult object from Beth-shean (11th cent. B.C.). Four serpents writhe up its sides, and birds perch on handles and in triangular openings (University Museum, University of Pennsylvania)

Though idols and images as objects of worship were prohibited, a few images were permitted in Israel. The "bronze serpent" erected by Moses was not intended to be an object of worship, but a device for healing (Nu. 21:8; cf. Jn. 3:14). Later Jewish tradition, found in the Palestinian Targum to the Pentateuch and Wisd. 16:7, made it clear that the healing was from God, not the brazen serpent (see M. McNamara, *Targum and Testament* [1972], pp. 147f.). Hezekiah destroyed the bronze serpent because the people had been burning incense to it (2 K. 18:4). The ARK OF THE COVENANT was constructed with figures of CHERUBIM facing each other over the mercy seat (Ex. 26:18-20). Apparently their purpose was to symbolize the glory of God. The EPHOD, an outer garment worn during certain religious ceremonies, often aroused superstitious reverence among those who viewed it (Jgs. 8:27; 17:5), though it could be used to determine God's will in certain situations (1 S. 23:9-12; 30:7f.).

Idols occupied an important place in the life of Gentiles in the NT world. During his second missionary journey, Paul visited Athens, which was "full of idols" (Acts 17:16). The Athenians had even erected an altar with an inscription "to an unknown god." A similar altar with the inscription "unknown god" has been discovered at Pergamum (*LAP*, rev. ed., plate 126). Demetrius and other silversmiths rioted in protest against Paul when he preached at Ephesus; profits from their manufacture of silver shrines of Artemis had been reduced (Acts 19:23-39). Artemis was a fertility goddess and patron deity of the city. Statues of her depict a woman whose chest is covered with multiple oval shapes, either breasts or eggs, apparently symbols of fertility. Excavations at Ephesus have identified shops of silversmiths (C. H. Pfeiffer, ed., *The Biblical World* [1966], p. 230).

Jewish monotheism and antipathy to idols were affirmed in the primitive Church (1 Cor. 8:4). Paul taught that pagan sacrifices were an offering "to demons" (1 Cor. 10:20; cf. Dt. 32:17). John likewise urged Christians to "keep yourselves from idols" (1 Jn. 5:20).

P. L. GARBER R. J. W.

IDOLATRY [Heb. *t^erāpîm* (1 S. 15:23), *gillûlîm* (Ezk. 23:49), *z^enût* (Ezk. 43:9); Gk. *eidōlolatría* (Gal. 5:20; Col. 3:5; 1 Pet. 4:3); AV also IDOLS (Ezk. 23:49), "whoredom" (Ezk. 43:9); NEB also "wanton disloyalty" (Ezk. 43:9), WORSHIP OF IDOLS (1 Pet. 4:3). The TERAPHIM were apparently "household idols" (Gen. 31:19, 34f.), although no text states that they were worshiped. In 1 S. 15:23 Heb. *t^erāpîm* may be used as a general word for idols (P. K. McCarter, *I Samuel* [*AB*, 1980], p. 268). Heb. *gillûlîm* is perhaps another general word for idols (cf. 2 K. 23:24, where both *gillûlîm* and *t^erāpîm* occur), although its etymology is uncertain; it may be related to Heb. *gēl*, "dung," and may have been coined by Ezekiel (cf. *TDOT*, III, 2). Heb. *z^enût* is derived from *zānâ*, "have illicit intercourse"; its sexual connotations suggest the involvement of cultic prostitutes, who were a regular feature of Canaanite pagan worship.

I. Ancient Near East.—Deities of the non-Hebrew religions of the ancient Near East were commonly associated with animal forms. It is generally held today that this theriomorphic representation of deity was either a concrete expression of the attributes of the god (e.g., in *UT* 49:IV:34, 'El, the chief god of the Canaanite pantheon, is called *tr* [Heb. *šôr*], "bull," which connotes his power), or a localization of the spiritual presence of the deity, similar to the presence of Yahweh over the cherubim. Yet a stele from Râs Shamrah depicts 'El as a human figure (*ANEP*, no. 493), and the portrayal of the deities in the Ugaritic

epic material makes it highly unlikely that they were thought to have an essential animal form. W. F. Albright observes that in the Canaanite, Aramean, and Hittite cultures, a god was almost always depicted standing on the back of an animal. He also observes, "The storm-god of Mesopotamia is actually represented on seal-cylinders of the second millennium B.C. as a schematic bolt of lightning set upright on the back of a bull, and this iconographic device may go back to Sumerian seals showing the bull who was the central figure in the ritual of consecration of a sacred drum with the winged shrine of music (so labelled!) on his back" (*FSAC*, p. 300).

This conception of the nature of idolatry seems to be consonant with the cult of the golden calf, which manifested itself early in Israelite history at Sinai (Ex. 32:1-6), and which resurfaced in the state cultus of the northern kingdom of Israel (1 K. 12:25-30). The worship of the golden calf was evidently a syncretistic form of Yahwism and not an outright rejection of Yahweh. This is clear from the attribution of the deliverance from Egypt to the image of the bull (Ex. 32:4), and from the fact that the worship associated with the image was directed to Yahweh (vv. 5f.). Evidently the image of the golden calf was understood as a visual representation of the spiritual presence of Yahweh. The plural verbs associated with the word "god" (*ʾĕlōhîm*) need not indicate a plurality of gods (only one image was constructed); they may have been used by the writer to emphasize that the golden calf was not the true god. The word *ʾĕlōhîm* ("God, gods") is plural, but when used of God it is always construed with singular verbs. (For a viewpoint opposing this concept of the golden calf see Bailey.)

This concretization of the presence and attributes of deity could easily have degenerated in the popular religion to the point where the image was regarded as the deity itself. It is likely that this occurred in many ancient cultures. The use of the image of a bull was inherently dangerous in the Israelite cultus because of the close associations of that symbol with the pagan fertility cults.

See RELIGIONS OF THE BIBLICAL WORLD: ASSYRIA AND BABYLONIA, CANAANITE, EGYPT.

II. Relation to Israel.—*A. Patriarchal Period.* The nature of the patriarchal religion has been the subject of much scholarly research. One of the most influential contributions to this field of study is that of Albrecht Alt. In his essay "The God of the Fathers" (in *Essays in OT History and Religion* [Eng. tr. 1966], pp. 1-100), Alt contends that much of the material in the patriarchal narratives is secondary and only the most archaic strands are trustworthy. On this supposition Alt concludes that the individual patriarchs worshiped distinct numina which were identified with Yahweh by later writers. Thus Yahwistic monotheism developed long after the patriarchal times.

This view, as well as others of a similar nature, regards the patriarchal traditions as an idealistic representation of what was in reality a somewhat primitive religion, vestiges of which are observable in the narratives. It is asserted by some that the patriarchal religion involved the worship of deities other than Yahweh. Some scholars appeal to Josh. 24:2 to support this assertion. This verse states nothing more, however, than that Terah, Abraham's father, worshiped other deities. Abraham may have been involved with these deities before his call, but there is no reason to assume that he was an idolator after his call by Yahweh. It is difficult to understand why this verse would follow the prohibition against worship of other gods in Josh. 23:16 if that were its implication.

Rachel's theft of the household gods (*tᵉrāpîm*) in Gen. 31:19, 25-35, has been illuminated by archeological finds at the site of ancient NUZI. While Rachel may still have had an affinity for the religion of her youth, it is more probable that the household gods had a legal or monetary value for her, rather than simply a religious one. The Nuzi material indicates that one who possessed the household gods stood to inherit the family estate; e.g., one tablet indicates, "Should Nashwi beget a son, [the latter] shall divide equally with Wullu but [only] Nashwi's son shall take Nashwi's gods . . ." (C. Gordon, pp. 24ff.). If Laban had natural sons during Jacob's sojourn with him, the *tᵉrāpîm* would have been rightfully theirs. Rachel wished the advantage for Jacob her husband.

The pillar (*maṣṣēḇâ*) erected by Jacob (Gen. 28:18, 22; 35:14) need not be regarded as a concrete representation of Yahweh, although such pillars were certainly common to the Canaanite religion (Ex. 23:24; 34:13; Dt. 7:5; 12:3). The term *maṣṣēḇâ* is used in the OT of a memorial (2 S. 18:18), a grave marker (Gen. 35:20), representations of the Israelite tribes (Ex. 24:4), and the visible sign of an agreement (Gen. 31:45, 51f.).

The most common function of the *maṣṣēḇâ* was that of memorializing individuals or solemn events. The pillar set up by Jacob seems to be best understood as a memorial of the extraordinary encounter that Jacob had with God at Bethel. The erection of the pillar would not only distinguish the area where the divine encounter occurred, but also serve as a token of the vow Jacob made to the Lord at that place (Gen. 31:13).

The command Jacob gave to his household to give up their foreign gods (Gen. 35:2-4) does not indicate that idolatry was an essential part of patriarchal religion. Rather, it demonstrates that Jacob recognized the inconsistency of idolatry with his Yahwistic faith.

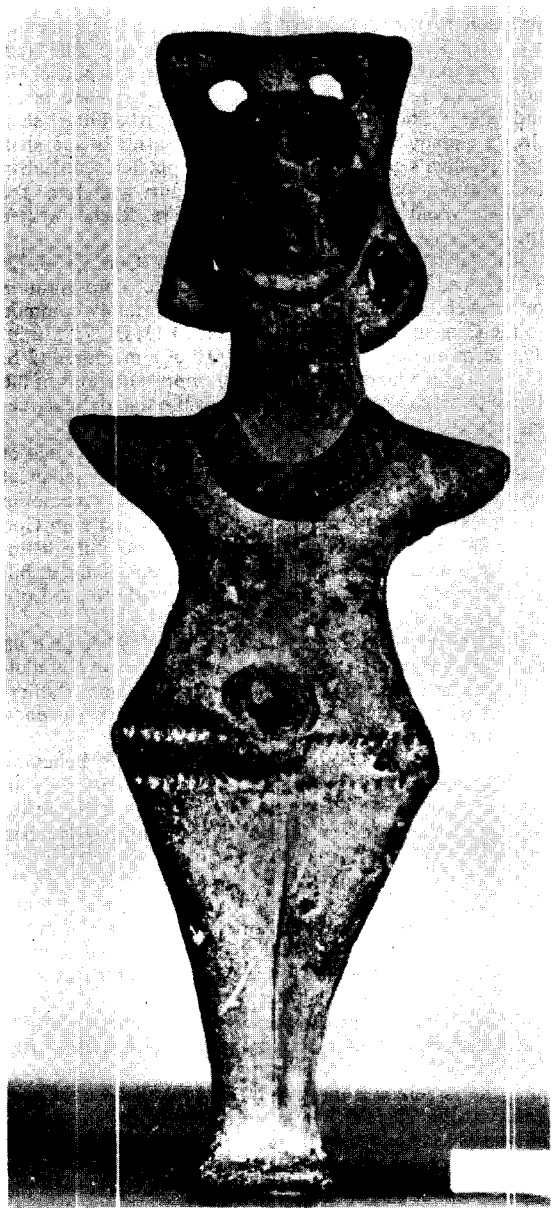
There seems to be no compelling reason for believing that the use of representational forms of deity was an essential part of pre-Mosaic religion among the Hebrews. Still less is there reason for positing a primitive animism in ancient Hebrew religion because of the theophany that occurred to Abraham at the oaks of Mamre (Gen. 18:1). The reference to the oaks may be understood as a topographical reference similar to other such references in the Pentateuch (Gen. 13:10; Ex. 15:27). Any essential connection between the theophanic appearance and the oak trees is purely conjectural.

B. Mosaic Era. The Mosaic covenant expressly forbids the practice of idolatry in its opening statements (Ex. 20:3-5 par. Dt. 5:7-9). Not only does the Decalogue prohibit the Israelites from having any gods that would rival Yahweh (Ex. 20:3; Dt. 5:7), but it forbids the fashioning of images as objects of worship. The words "you shall not bow down to them or serve them" (Ex. 20:5; Dt. 5:9) make it clear that the command does not preclude the pursuit of art, nor the use of certain representations in worship, such as the cherubim on the ark of the covenant, but that one is not to worship an image or venerate it by bowing before it. Thus the Israelites were to make no symbolic representations of Yahweh in any form (Dt. 4:15-18). This commandment made Israel's faith unique among the nations of the ancient world.

This prohibition of idol worship may not have encouraged advancement in the visual arts, but it served to make the concept of God intensely spiritual. Efforts to concretize the spiritual nature of God were made in the realm of bold literary anthropomorphism. It may be that this verbalizing of the divine attributes caused Israelite religion to find its greatest expression in word rather than in artistic depiction.

The first major defection to idolatry on the part of the Israelites took place in the Mosaic era in the worship of the golden calf (Ex. 32:1-6). The representation of deity in the form of a bull calf may have had its origin in the worship of the Egyptian god Apis, who was so depicted. As mentioned above the bull was also a representation of

IDOLATRY



Canaanite bronze and pottery idol from the Middle Bronze Age (Israel Department of Antiquities and Museums)

Statue of Baal (Service des musées, Cairo; picture W. S. LaSor)

the Canaanite god 'El. The institution of the bull cult in Israelite history was the first expression of a religious syncretism that was never entirely suppressed.

C. Historical Books. Several passages in the historical books indicate that images continued to be made in Israel long after Moses' time (Jgs. 3:19; 8:27; 17:3-6; 2 K. 21:7). These instances do not mean that idolatry had a legitimacy in early Yahwism. The period of the judges was one of blatant lawlessness, and much that cannot be considered normative for Israelite faith and practice occurred then. Solomon's lapse into idolatry (1 K. 11:4-8) was clearly denounced (vv. 9-13). The syncretistic religion of Manasseh cited in 2 K. 21:7 is depicted by the historian as contrary to the spirit of Israelite faith (vv. 6-9). Even the bronze serpent that Moses fashioned in the wilderness (Nu. 21:9) became an object of worship (2 K. 18:4). In his reform Josiah removed both the high place at Topheth (2 K. 23:10) and the "horses . . . dedicated to the sun" that had been installed in the temple (v. 11).

These accounts testify that the desire for a visual representation of deity had not been completely expunged from the hearts of many generations of Israelites. The tendency toward syncretism that manifested itself during Moses' absence at Sinai (Ex. 32:1) continued to steal back into the Israelite cultus, creating a tension that ultimately led to a rending of the social fabric of Israel.

The tension between idolatry and the essential spirit of Israelite religion is reflected in the early prophetic protest of Samuel: "For rebellion is as the sin of divination, and stubbornness is as iniquity and idolatry" (1 S. 15:23). In this statement Samuel places disobedience to God and idolatry in the same category. In the final analysis idolatry was rebellion, for it constituted a violation of God's commands.

IDOLATRY

The syncretistic expressions of religion that run like a thread through the early history of Israel were ultimately given legitimacy by Jeroboam I, king of the northern kingdom of Israel. The division of the nation into the northern and southern kingdoms posed a serious theological crisis for the northern kingdom. The geopolitical rift brought to the fore the question of access to the cultic center at Jerusalem. Jeroboam understood that if he was to bring stability to his fledgling kingdom, he could allow nothing that would foster the loyalties to the Davidic dynasty that were so deeply ingrained in the minds of the people (1 K. 12:26f.). The temple had been built by Solomon the son of David, and Jerusalem was rich with Davidic traditions. Clearly, a new form of religious expression distinct from any association with David would have to be instituted. This was done in a revival of the cult of the golden calf (1 K. 12:28).

Once again the historian expresses displeasure with the use of concrete forms of deity, for he says, "And this thing became a sin, for the people went to the one at Bethel and to the other as far as Dan" (1 K. 12:30). The displeasure seems to be because the law of the central sanctuary had been broken. The placement of sanctuaries in different locations was dangerous because it could lead to the fractionalizing of the concept of Yahweh in the minds of the people, similar to the geographical localizations of the Canaanite god Baal.

The reference to *t^erāpîm* in 1 S. 19:13 ("image") seems best understood according to the suggestion of W. F. Albright as "old rags." He points out that no images "of comparable size have ever been found in Palestinian excavations" (*ARI*, pp. 110f., 206f. n. 63).

D. Classical Prophets. The 8th cent. B.C. witnessed a resurgence of Israel and Judah. Economic prosperity, unparalleled in their history except for the golden age of David and Solomon, fostered a growing class of wealthy, influential people whose loyalty to the covenant stipulations of Yahweh was at best questionable. The erosion of the strong core of covenant obligation marked the 8th cent. and led to the dissolution of the nation. One of the most obvious violations of the covenant standards was the popular religion of the day, a strange syncretism of Yahwism and the symbols and mind-set of pagan idolatry.

The situation in the northern kingdom seems to have been particularly dismal. Rites associated with the fertility cults of Canaan were practiced at a number of shrines in Israel (Hos. 4:11-19; Mic. 1:7) and may even have been widespread.

The internal sickness affected the southern kingdom of Judah as well, although probably to a lesser degree. Isaiah presents a picture of Judahite syncretism that is remarkably similar to that of Israel (2:8; 57:4-10).

The prophets engaged in a bitter polemic against idolatry. They observed the incongruity of worshiping that which one fashions with one's own hands (Isa. 2:8; 44:12-20; Hab. 2:18), and pointed out that idols are impotent and therefore a delusion to those who worship them (Isa. 42:17; 44:9; 45:20; Jer. 10:14f.; 51:17f.). Idols provoke Yahweh to anger (Jer. 8:19) and they are a form of spiritual fornication (Mic. 1:7). The practice of idolatry will lead to Israel's downfall (Isa. 2:8f.). The prophetic condemnation of idolatry had a more positive side, however. God will abolish the images that vie with Him for supremacy (Isa. 2:18; 10:10f.; 31:6f.).

Isaiah's denunciation of idols is the most theologically based of all the prophets. He finds the source of the inclination for the worship of idols in spiritual blindness (44:18) and self-delusion (44:20). Idolatry is thus the external manifestation of a spiritually impoverished mind.

Isaiah points to the impossibility of likening anything on earth to God (40:18-20) and thus roots his polemic against idolatry in the spiritual nature of the deity. At the heart of Isaiah's theological polemic is the fact that God cannot be likened to anything that is finite or temporal (cf. Dt. 4:15). Because God is pure spirit, any attempt to represent Him in symbolic form is a distortion of His person and hence a falsification of truth.

Isaiah also points his hearers to the attributes of Yahweh and then contrasts Yahweh and His glorious attributes with the brooding idol of stone or wood, incapable of thought, speech, or action. He speaks of the Lord's ability to declare future events, and denounces the idol as "empty wind" (41:26, 29; 44:7). The idol cannot stand before the inexorable progress of God's will in history (41:5-7; cf. vv. 8-16). The Lord is the creator of the worlds, controlling the destinies of nations (40:21-23); an idol cannot compare with Him (40:25).

The later prophets also denounced idolatry. Jeremiah foresaw judgment on those who defiled the temple (7:30) and built high places (to Baal) where child sacrifice was practiced (7:31; 19:5). Ezekiel also was faced with idolatrous practices in the temple (8:3-18), where apparently the sun and the Babylonian god Tammuz (Dumuzi) were being worshiped (vv. 14, 16).

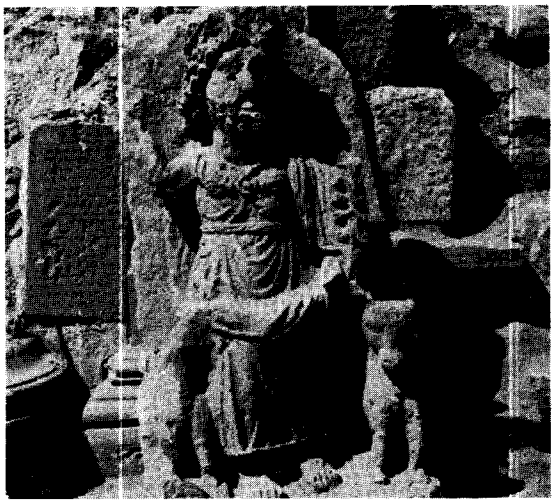
T. E. MCCOMISKEY

III. Intertestamental Period.–What finally established the Jewish people in immovable opposition to idolatry is told in the Apocrypha (1 Macc. 2:1-48) and in Josephus (*Ant.* xii.5.4 [248-256]). The issue between Antiochus Epiphanes and the Jewish people in the time of the early Maccabees was idolatry. Antiochus demanded that as a pledge of political allegiance to his sovereignty, Jews make a sacrifice at an altar dedicated to the Olympian Zeus, perhaps before his statue (2 Macc. 6:2). Refusal resulted in execution. The HASMONEANS, Mattathias and his sons, and their followers, the HASIDEANS, defied the king's decree. They raised a guerilla army and fought a three-year civil war. With much heroism, they succeeded in obtaining from the state freedom to follow their own religious practices. Never again were Jews to take idolatry seriously. Rather, idol worship became for them a matter of semi-humorous satire and ridicule (cf. Bel and the Dragon).

IV. NT.–Idolatry was prevalent in the NT world. Idols were venerated in temples dedicated to the traditional gentile gods, in popular magic and superstition, as well as in the mystery religions and in emperor worship (Mk. 12:16 par.; Rev. 13:14f.). The subject is scarcely mentioned in the Gospels but receives attention in Paul's letters due to the circumstances of his mission (cf. Luke's comment that Athens was a "city full of idols," Acts 17:16; AV "wholly given to idolatry").

Reflecting his Jewish background, Paul stated plainly, "We [Christians] know that an idol has no real existence" (1 Cor. 8:4). Idolatry is "earthly" (Col. 3:5; Phil. 3:19). The idolaters are "immoral men," with whom Christians are not to associate (1 Cor. 5:10f.), who will not inherit the kingdom of God (1 Cor. 6:10; Gal. 5:21; Eph. 5:5). Cf. "Little children, keep yourselves from idols," 1 Jn. 5:21; "abstain from the pollution of idols," Acts 15:20. Rev. 21:8 states that idolaters are doomed to be destroyed by fire; the new Jerusalem has no place for idolaters who love and practice falsehood (Rev. 22:15).

In Rom. 1:18-32, Paul taught that sexual laxness and social disorder among Gentiles were ultimately traceable



Relief of a god, probably Zeus-Hadad, with thunderbolt and a young bull on each side, from Khirbet et-Tannur SE of the Dead Sea. The relief shows Hellenistic-Parthian influences (E. K. Vogel; picture American Schools of Oriental Research)

to their idolatry, which he described as exchanging "the glory of the immortal God for images." The wrath of God is against all such ungodliness and wickedness (v. 18). God's decree is that idolaters deserve to die (v. 32). At Ephesus Paul was accused of successfully persuading a considerable company of people "that gods made with hands are no gods" (Acts 19:26).

In their dealings with gentile converts from Greco-Roman religious backgrounds, the early Christian evangelists encountered a new problem related to idolatry — eating food, especially meat, that had been offered to idols (Acts 15:29; 1 Cor. 8; Rev. 2:14, 20). Although to the enlightened Christian such food had not been contaminated by idolatrous rites, his eating it could possibly cause a weak brother to fall. To preserve the solidarity of the Christian community, the well-informed Christian was to choose voluntarily to avoid customary social engagements where eating food offered to idols was involved (1 Cor. 8:1-13; 10:14-30).

Idolatry in the NT is also used figuratively. This was an interiorizing extension of the commandment against idolatry (Ex. 20:3). Especially in Paul's letters, idolatry is used of a person's commitment to any value other than to Jesus Christ as Lord. In Rom. 1:18-32, it is evident that the ultimate idolatry for Paul is putting love of self before honoring and serving God (cf. "You cannot serve God and mammon," Mk. 6:24). For Paul, "the works of the flesh" — sexual immorality, impurity, licentiousness, sorcery, enmity, strife, jealousy, anger, selfishness, dissension, party spirit, and envy — were all, like idolatry, products of putting self before God (Gal. 5:19-21). In Col. 3:5 is a similar list of "what is earthly in you" — sexual immorality, impurity, passion, evil desire — to which is added "covetousness," which, Paul says, "is idolatry." What is suggested again is that at the root of sinful actions is the idolizing of self, the pursuit, regardless of all else, of that which seems to offer self-gratification. The opposite of idolatry is self-giving, as in agape love (1 Cor. 13).

P. L. GARBER

IDUEL id'yo͞o-əl [Gk. *Idouēlos*] (1 Esd. 8:43); NEB IDUELUS. *See* ARIEL **1.**

IDUMEA id-ū-mē'ə [Gk. *Idoumaia, Idoumea*–'(land) of the Edomites']. The Greek name for EDOM as found in the LXX and sometimes used interchangeably with Edom in the AV. The name was eventually attached to the region S of Judea occupied by Edomites (Idumeans) who moved there after the fall of Jerusalem in 586 B.C. and who were later joined by compatriots pressed out of their homeland by Nabatean Arabs. Diodorus, writing of fourth-century-B.C. events, once called Idumea a satrapy and once an eparchy, possibly a corruption of hyparchy, the official designation of a district in Ptolemaic times (xix.95.2; 98.1). For a short period during the Maccabean wars the Seleucids controlled parts of the region under Gorgias, "the governor [*stratēgós*] of Idumea" (2 Macc. 12:32).

In general the region extended as far N as Beth-zur, 24 km. (15 mi.) S of Jerusalem, and reached Beer-sheba to the south. Neither the territories E of the Dead Sea nor those surrounding the coastal cities to the west were part of Idumea. In describing the region, Josephus speaks broadly of Upper Idumea, "extending in length to Jerusalem and in breadth reaching down to the lake of Sodom"; and Lower Idumea "bordering on Egypt and Arabia" (*Ant.* v.1.22 [81f.]). It would be more accurate, however, to speak of East Idumea, with its capital at Adoraim in the Hellenistic period and En-gedi in the Herodian period; and West Idumea, with its capital at Marisa in the Hellenistic period (transferred from Lachish) and Betogabris in the Herodian period (*P. Zenon,* Cairo 59006; Josephus *BJ* i.2.6 [63]; i.8.4 [166]; iii.3.5 [55]; iv.8.1 [447]).

Judas Maccabeus in 164 B.C. fortified Beth-zur against the encroaching Idumeans and ravaged their territory (1 Macc. 4:61; 5:3, 65). In 125 B.C. another Maccabean, John Hyrcanus I, subjugated the Idumeans, forced them to accept Judaism, and annexed their territory to the Hasmonean state (Josephus *Ant.* xiii.9.1; 15.4 [257f., 396]). Still another Maccabean, Alexander Janneus, in *ca.* 80 B.C. appointed an Idumean chief, Antipater the Elder, as governor (*stratēgós*) of the region (*Ant.* xiv.1.3 [10]). With the coming of the Romans in 63 B.C., Idumea was detached from Judea and was entrusted to local rule (*BJ* i.7.7 [155-57]; *Ant.* xiv.4.4 [74-76]). Through careful handling of opportunities during the feuds between Hyrcanus II and Aristobulus II and by benefiting from Roman endeavors in the East, Antipater the Younger in 47 B.C. became "procurator [*epítropos*] of Judea" and thus paved the way to the throne for his son Herod the Great (*Ant.* xiv. *passim,* esp. 8.1, 5 [127, 143]). In 37 B.C. Idumea was reannexed as part of Herod's kingdom (xv.7.9f. [254-59]). After Herod's death, Idumea, with Judea and Samaria, was part of Archelaus' ethnarchy (*BJ* ii.6.3 [96]; *Ant.* xvii.11.4 [319]) and after him shared the fate of Judea, of which it had become an integral part.

In the NT Idumea is mentioned only once, in a description of the wide area from which people came to hear Jesus (Mk. 3:8).

A. TERIAN

IEZER ī-ē'zûr, **IEZERITES** ī-ē'zûr-īts [Heb. *'î'ezer*] (Nu. 26:30); AV, NEB, JEEZER, JEEZERITES. Contracted from ABIEZER **1** (Josh. 17:2; etc.).

IGAL ī'gal [Heb. *yig'āl*–'he [God] redeems'; LXX Gk. *Igal, Gaal, Iōēl*].

1. One of the twelve spies sent by Moses from the wilderness of Paran; son of Joseph, tribe of Issachar (Nu. 13:7).

2. One of David's thirty mighty men, son of Nathan of Zobah (2 S. 23:36). In 1 Ch. 11:38 he is "Joel [Heb. *yô'ēl*] the brother of Nathan."

3. Son of Shemaiah of the royal house of David, descendant of Zerubbabel (1 Ch. 3:22, AV, NEB, IGEAL).

IGDALIAH ig-də-lī'ə [Heb. *yigdalyāhû*–'Yahweh is great']. Ancestor of certain persons who had a "chamber" in the temple in Jeremiah's time (Jer. 35:4).

IGEAL ī'gē-əl, ī'jē-əl. *See* IGAL 3.

IGNATIUS. *See* APOSTOLIC FATHERS.

IGNORANCE [Heb. *pᵉṯî* (Ezk. 45:20); Gk. *ágnoia* (Acts 3:17; 17:30; Eph. 4:18; 1 Pet. 1:14), *agnōsía* (1 Pet. 2:15)]; AV also SIMPLE; NEB also FOOLISH (Ezk. 45:20); **IGNORANT** [Heb. *lō' yāḏaʿ* (Ps. 73:22); Gk. *agnoéō* (Rom. 10:3; 2 Cor. 1:8; 2:11; 1 Thess. 4:13; 1 Tim. 1:13; He. 5:2; 2 Pet. 2:12), *amathḗs* (2 Pet. 3:16)]; AV also UNDERSTAND NOT (2 Pet. 2:12), UNLEARNED (2 Pet. 3:16); NEB also IGNORE (Rom. 10:3), "should like you to know" (2 Cor. 1:8), "know too well" (2 Cor. 2:11), DO NOT UNDERSTAND (2 Pet. 2:12), etc.

In the RSV the terms "ignorance" and "ignorant" occur only twice in the OT; however, the general concept that these terms imply is found throughout the OT and is often translated in the RSV as "error" or "sin."

Asaph confesses his guilt by admitting he was "stupid and ignorant," without perception or understanding of God in his heart (Ps. 73:21f.). Ignorance as sin is set within a ritual context in Ezk. 45:20, where the priest is to bring before God the sins of those who "sinned through error and ignorance." This practice had its roots in the Levitical legislative passages which describe sins committed "inadvertently" or "unwittingly" (Lev. 4:2; 22:14; 5:18; cf. Nu. 15:24ff.; 35:11, 15; Josh. 20:3, 9; He. 5:20) that could be forgiven on the great Day of Atonement (Nu. 15:28; Lev. 16:16-34). These are set in contrast to sins committed "with a high hand" (*bᵉyāḏ rāmâ*), i.e., deliberately or "presumptuously" (Nu. 15:30; cf. Ps. 19:13; Dt. 17:12), for which there is no cultic atonement (Nu. 15:30; cf. Mish. *Yoma* v. 6-9; viii.9; SB, I, 636-38). Thus, it is clear that in the OT a sin committed in ignorance is not excusable, but incurs guilt and must be atoned for.

In the NT the chief words used to describe "ignorance" are *agnoéō* ("not know") and *ágnoia*. They were used originally in the Greek for "not knowing" something specific, and then for a general ignorance in the sense of not being "civilized" (see *TDNT*, I, 116). Thus it became parallel to or was linked with "lack of education" (*apaideusía*), and for the Stoics this was the basis of wickedness. This Stoic thought had a partial influence on the LXX. In some of the later apocryphal books, "ignorance" describes the state of the heathen who "err in their knowledge of God" (Wisd. 14:22). Along with this is the LXX's expansion of the Hebrew root *šgg*, which basically means "erring" or "going astray," to describe as *ágnoia* inadvertent or unintentional sin (Lev. 22:14; 5:18; cf. 2 Ch. 28:13; Josephus *Ant.* vi.5.6 [92]; xi.5.1 [130]). Here the sin is "ignorance" of the Law. Judaism, with its heavy emphasis on the Law, could make use of such a designation and among the rabbis knowledge of the Torah came to be seen as the basis of piety (see *TDNT*, I, 117f.).

This understanding of "ignorance" reflects the OT view of knowledge. In the OT knowledge is not intellectual alone, but is connected with experience (Heb. *yāḏaʿ*, "learn to know") and means "insight into the will of God in command and blessing. It is primarily acknowledgment, and obedient or grateful submission to what is known" (*TDNT*, I, 704). *See* KNOW.

While ignorance as lack of intellectual knowledge is found in the NT in the Pauline formula "I would not have you to be ignorant" (AV 1 Thess. 4:13; cf. 2 Cor. 1:8), and though the term is used in other cases to denote the absence of awareness or understanding (2 Cor. 2:11; 2 Pet. 2:12), "ignorance" is used predominantly in a religious sense. Paul contrasts his life as a Pharisee "in which I had acted ignorantly in unbelief" (e.g., his blaspheming, persecuting, and insulting of Jesus Christ) with his conversion, when he received mercy (1 Tim. 1:13). Pagans are seen as ones who do not know God (1 Thess. 4:5), and thus also the former lives of believers are seen as "times of ignorance" (Acts 17:30; Eph. 4:18; 1 Pet. 1:14; cf. Justin *Apol.* i.12.11). "To know God" is to be converted (1 Clem. 59:3; 2 Clem. 17:1), and to speak of living "ignorantly in unbelief" is to speak of "the dark night of unknowing that preceded Jesus Christ" (Berkouwer, p. 291). This is true to the OT sense in which "knowledge means election and ignorance rejection" (*TDNT*, I, 116).

Ignorance is rejection in that it is disobedience. Paul speaks of the unenlightened zeal of the Jews who "being ignorant of the righteousness that comes from God, and seeking to establish their own, . . . did not submit to God's righteousness" (Rom. 10:3). Berkouwer notes that for this ignorance "there is no hint of self-excuse, for through this very ignorance they came to seek their own righteousness" (p. 292). "Ignorance" led to the crucifixion of Christ (Acts 3:17). According to Haenchen, the guilt of the Jews lies precisely in their ignorance (*ágnoia*): "if men had not hardened their hearts against God, they would have recognized Jesus. Only so does it become plain that in the Cross our guilt is revealed" (p. 207). Thus "ignorance did not eliminate their guilt, but it did describe the *situation* in which they committed their sin" (Berkouwer, p. 292). This is reflected in Jesus' prayer for those who "know not what they do" (Lk. 23:34). As the great High Priest, this same Christ can also "deal gently with the ignorant and the wayward" (He. 5:2; cf. Bruce, p. 91). In Christian thought, then, the only "knowledge" which can remove *ágnoia* is that which comes not from "human reflection or enquiry, but from the proclamation which demands faith" (*TDNT*, I, 116). Now, because of what has happened in Jesus Christ, God has "overlooked" the "times of ignorance" (Acts 17:30) and "commands all men everywhere to repent" (1 Pet. 1:14). Ignorance and error are now sin against the One who has made Himself known in Jesus Christ.

Agnōsía, used to describe the "ignorance of foolish men" (1 Pet. 2:15), has the same force as *ágnoia* in the sense that it refers not primarily to an intellectual ignorance but to "a lack of religious experience or *lack of spiritual discernment*" (Bauer, rev., p. 12; cf. 1 Cor. 15:34; Job 35:16; and Wisd. 13, where it describes the state of the gentile world). In 2 Pet. 3:16 the heretics who are "uninstructed and unwilling to learn the traditional teaching" (Kelly, p. 373) are called *amathḗs* ("ignorant").

D. K. MCKIM

IIM ī'im [Heb. *ʿîyîm* (Josh. 15:29)]; NEB IYIM. (The NEB rendering is preferable, since it better reflects the Hebrew.) An unidentified town in the extreme south of the territory of Judah, toward the border of Edom.

IJE-ABARIM. *See* IYE-ABARIM.

IJON ī'jon [Heb. *ʿîyôn*; Gk. *Ain, Nain, Aian, Iō, Aiōn*]; NEB IYYON. A store-city in the northern frontier hill area of Naphtali. It was captured from Baasha king of Israel by Ben-hadad king of Syria, in response to a request by Asa king of Judah (1 K. 15:20; 2 Ch. 16:4). In the days of Pekah king of Israel, Tiglath-pileser of Assyria

captured the city along with others and deported the people to Assyria (2 K. 15:29).

Ijon is probably represented by Tell ed-Dibbîn at the north end of Merj-ʿAyûn ("meadow of springs"), a fertile oval plain about 9.5 km. (6 mi.) long, 3 km. (2 mi.) wide, located about 29 km. (18 mi.) N of Lake Huleh, about 39 km. (24 mi.) ENE of Tyre, between the Leontes and Jordan rivers.

The NEB reads IYYON also at 2 S. 24:6 (*see* DAN-JAAN).

R. J. HUGHES, III

IKKESH ik'esh [Heb. *ʿiqqēš*–'crooked']. A man of Tekoa and father of Ira, one of David's thirty mighty men (2 S. 23:26; 1 Ch. 11:28; 27:9).

ILAI ī'lə-ī, ī'lī [Heb. *ʾîlay*]. An Ahohite, one of David's thirty mighty men (1 Ch. 11:29), called Zalmon in 2 S. 23:28.

ILEX ī'leks [Heb. *tirzâ*] (Isa. 44:14, NEB). *See* HOLM TREE.

ILIADUN i-lī'ə-dun, il'ē-ə-dun [Gk. *Iliadoun*] (1 Esd. 5:58 [LXX 56]); AV ELIADUN. An ancestor of some of the Levites who oversaw the rebuilding of the temple. Possibly corresponding to Henadad in Ezr. 3:9.

ILL REPORT; ILL REPUTE [Heb. *dibbâ rāʿâ* (Gen. 37:2), *dibbâ* (Prov. 25:10); Gk. *dysphēmías* (2 Cor. 6:8)]; AV also EVIL REPORT (Gen. 37:2), INFAMY (Prov. 25:10); NEB also BAD REPORT, BLAME; **TREAT ILL; GO ILL; BE ILL; DO ILL** [from the Hebrew root *rʿʿ*, qal–'be evil, bad' (Ps. 106:32), hiphil–'do evil, hurt, injure' (Gen. 43:6; Zeph. 1:12)]; AV also "dealt . . . ill," "do evil," "shall be ill"; NEB also "treated so badly," "suffered," "goes ill," "do nothing good or bad"; **ILL** [Heb. *ʾāwen*] (Prov. 12:21); AV EVIL; NEB MISCHIEF; **ILL-BEHAVED** [Heb. *raʿ maʿᵃlālîm*–'evil of practices'] (1 S. 25:3); AV "evil in his doings"; NEB MEAN; **ILL-CLAD** [Gk. *gymnitéuō* (1 Cor. 4:11). *gymnoí* (Jas. 2:15)]; AV NAKED; NEB IN RAGS; **ILL-NATURED** [Heb. *ben-bᵉlîyaʿal* (1 S. 25:17), *ʾîš habbᵉlîyaʿal* (1 S. 25:25)]; AV also "son of Belial" (1 S. 25:17), "man of Belial" (1 S. 25:25); NEB "good for nothing"; **ILL-TREAT** [piel of Heb. *ʿānâ*–'afflict' (Gen. 31:50); Gk. *kakóō* (Acts 7:6, 34; He. 11:37; 13:3), *synkakouchéomai*–'suffer with others' (He. 11:25)]; AV also AFFLICT (Gen. 31:50; Acts 7:34), "tormented" (He. 11:37), "suffer adversity" (He. 13:3), "entreat . . . evil" (Acts 7:6), "suffer affliction" (He. 11:25); NEB also "oppression" (Acts 7:6, 34), "misery" (He. 11:37), "mal-treated" (He. 13:3), "hardship" (He. 11:25). A group of expressions denoting a reputation as an evildoer, suffering due to persecution or one's sins, or rude behavior and speech.

Joseph's ill report of his brothers was probably a true report of their evil doings rather than slander (BDB, p. 179). The ill repute of Paul and his companions was undeserved (2 Cor. 6:8). A talebearer, however, brings ill repute upon himself (Prov. 25:10).

"Ill" denoting unfortunate or adverse circumstances is found in several OT passages. Israel felt he had been purposely ill-treated when his sons revealed to Joseph that they had another brother, Benjamin (Gen. 43:6). Circumstances "went ill" with Moses due to the sins of the Israelites (Ps. 106:32). Problems will plague the wicked person (Isa. 3:11), but "no ill will befall the righteous" (Prov. 12:21). God promised that He would punish those who claimed He had ceased to act: "The Lord will not do good nor will he do ill" (Zeph. 1:12).

In the NT, ill-treatment is synonymous with persecution, but all references except one (He. 13:3) are to the sufferings of Israel and its leaders during the OT period, rather than Jewish or Roman persecution of the Church. Stephen recounted the four hundred years of affliction suffered by the Israelites in Egypt (Acts 7:6, 34). The writer to the Hebrews used Moses as an example of one who was willing to suffer with others (11:25) and also referred to an anonymous group of OT martyrs who underwent terrible sufferings (11:37). Paul and his companions were ill-clad and homeless as they traveled from place to place (1 Cor. 4:11). James also mentioned the ill-clad members of a church who were discriminated against by their more affluent brethren (2:15).

Three disparaging terms are applied to Nabal, the "fool" (Heb. *nābāl*) in 1 S. 25:3-38. In v. 3, "ill-behaved" (Heb. *raʿ maʿᵃlālîm*) literally means "evil [in his] doings." Nabal is termed ill-natured in v. 17, but the Heb. *ben-bᵉlîyaʿal* is literally translated "son of Belial" (AV). Verse 25 has a slight variation: the Hebrew is *ʾîš habbᵉlîyaʿal*, "man of Belial" (cf. 1 S. 1:16; Dt. 13:14 [MT 13]; Prov. 16:27). The precise meaning of *bᵉlîyaʿal* is debated, but the word does seem related to Hebrew conceptions of the underworld, chaos, and spiritual evil (*TDOT*, II, *s.v.* "bᵉliyyaʿal" [Otzen]). *See* BELIAL.

R. J. W.

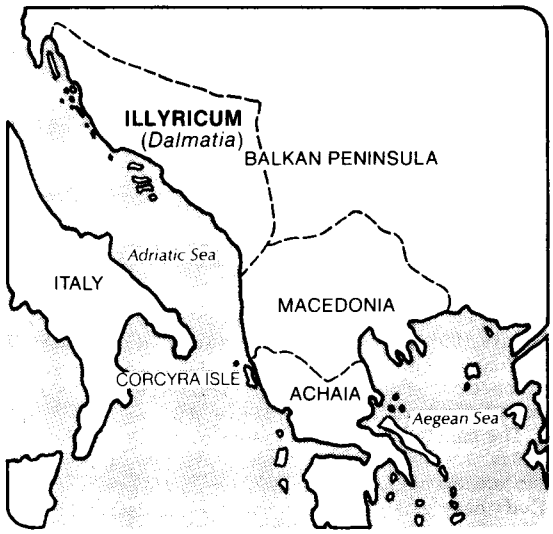
ILLNESS. *See* DISEASE.

ILLUMINATION. *See* ENLIGHTENED.

ILLUSTRIOUS, THE [Gk. *thaumastós*]; AV THE ADMIRABLE; NEB THE FAMOUS. A title of rank and merit attached to the name of Bartacus, the father of Apame (1 Esd. 4:29). Instead of "the illustrious" we should possibly read "colonel" (cf. Josephus *Ant.* xi.3.5 [54]; *EB*, *s.v.*). *See* BARTACUS; APAME.

ILLYRICUM i-lir'i-kəm [Gk. *Illyrikon*] (Rom. 15:19). A Roman province in the northwest part of the Balkan peninsula, along the east coast of the Adriatic Sea, NW of Macedonia. The province corresponds approximately to modern Yugoslavia, although its borders varied, at times including part of what is now Albania.

At the end of his letter to the church in Rome, Paul describes the vast extent of his missionary labors in the following terms: "so that from Jerusalem and as far round as Illyricum I have fully preached the gospel" (Rom. 15:19). Whether Paul intended to include Illyricum as part of the area in which he had evangelized or to say simply "as far west as the border of Illyricum" is not clear. The words "as far as" (Gk. *méchri*) can be interpreted either way. If Jerusalem were the eastern limit of Paul's preaching, it might be clear that he intended to say that he went through Macedonia to the border of Illyricum as the western limit; but we know that Paul preached further east in Damascus (Acts 9:19f.). In describing the Egnatian Way, Strabo (vii.7.4) indicated that in going from the coast of the Adriatic to Macedonia it passed through a portion of Illyria. Perhaps Paul worked his way west along this road and actually entered a part of Illyricum. On the other hand, Illyricum, like the term "Galatia," could designate the Roman province or the entire area inhabited by Illyrians. It is possible, though not likely, that Paul meant to indicate that he had preached to Illyrians in western Macedonia. The statement in Acts 20:1f., "when he had gone through these parts," indicates considerable activity in Macedonia at the end of Paul's third missionary journey, but does not specify the precise area he covered. In some sense Paul must have considered that he had gone as far east as possible, since he explained to the Christians in Rome that he was now ready to come to them (on his way to Spain) because he had no other place



to work (Rom. 15:23f.). In 2 Tim. 4:10 Paul states that he had sent Titus to DALMATIA. Dalmatia was one of two major divisions of Illyricum. It was known as "Illyria Superior" and the other, Pannonia, as "Illyria Inferior."

Illyricum had many favorable harbors along the coast as well as on the nearby islands. The land was described by Strabo (vii.317) as sunny and fertile along the coast, but cold and mountainous in the inland area. The Illyrians, an Indo-European people, settled in the area *ca.* 1000 B.C.

The first known contact with Greece was in the 8th cent. B.C. when Chersikrates of Corinth settled on the island of Corcyra. In the centuries following, the Greeks established colonies in Illyricum and a significant amount of trade developed. After a long period of conflict with Macedonia the Illyrians were defeated by Philip II in 359/8 B.C. Before they were constituted as a Roman province the Illyrians were divided into many separate tribes. In the south a rather strong kingdom developed whose raids on the Greek colonies and piracy on Greek and Roman shipping provoked the wars with Rome in 229/8 and 219 B.C. This southern area was finally subjugated by Rome in 168 B.C. Then uprisings broke out in the north (Dalmatia), resulting in the burning of the capital, Delminium, in 156 B.C. The province was made subject to Caesar in 46 B.C., and then in 27 B.C. when the provinces were divided between Augustus and the senate Illyricum was assigned to the latter. Renewed disturbances led, however, to its transference to the emperor in 11 B.C. The severity of Roman taxes caused a new outbreak among the Pannonians and Dalmatians in A.D. 6. After three years of vicious fighting the uprising was crushed and Pannonia and Moesia were organized as separate provinces. The Romanizing of this area proceeded rapidly and thoroughly due to the numerous cities, army camps, and good roads.

IMAGE. *See* IDOL.

IMAGE OF GOD [Lat. *imago Dei*].

I. Man as Made in the Image of God
  A. Image and Likeness
  B. Meaning of the Image
  C. The Image and the Fall
  D. The Image and the Christian
II. Christ the Image of God
  A. Eternal Son
  B. Prototype of Man
  C. The God-Man
  D. The Servant Form
  E. Prototype of the New Man

I. Man as Made in the Image of God.—Genesis 1:26 (cf. 5:3) says that God resolved to make man in His own image (Heb. *ṣelem*) and likeness (*dᵉmûṯ*), and in Gen. 1:27 we read that He did create man in His own image. The word "image" is used alone in 1:27 and also in 9:6, while "likeness" occurs alone in 5:1. It is only here that the terminology occurs in the OT, though the thought is present in Ps. 8:5-8 (MT 6-9); and cf. Sir. 17:3; Wisd. 2:23 in the Apocrypha. The relevant NT passages are 1 Cor. 11:7; Col. 3:10; Jas. 3:9.

A. Image and Likeness. The exact significance of the terms is the subject of considerable discussion. A first question is whether any distinction is to be seen between image and likeness. When such distinction has been attempted, it has usually been along the lines of theological interpretation. Thus Irenaeus and Tertullian refer the image to man's bodily nature and the likeness to his spiritual. The Alexandrians think in terms of mental and moral perfections as compared with divine perfections. In the Middle Ages this interpretation led to a distinction between the natural gifts of rationality and freedom on the one side and the supernatural endowments of grace on the other; this distinction gave rise to an explanation of the fall in terms of a loss of grace and an impairment of rationality and freedom. Yet the basic premise is open to serious question, for elsewhere in Scripture the terms appear to be used more or less interchangeably; and it seems more likely that Gen. 1:26 is simply an example of synonymous parallelism, or of what Driver has called a duplication of synonyms.

B. Meaning of the Image. The problem of meaning and interpretation remains. A first point to be noted is that man is said to be made in the image of God, not to be the image of God. This wording seems to indicate that the image here is fundamentally the original or example rather than the copy, and that man is the copy. But too much stress should not be laid on this distinction, for usage is not always clear and strict at this point, and 1 Cor. 11:7 also has to be taken into account. Certainly, metaphysical speculation along the lines of patterns and shadows is to be avoided. On the other hand, even when it is said that man is the image of God it is realized that God is the true original and that "image" is here given the sense of "copy." This statement has three important implications: (1) that man is not to create God in his own image, (2) that he is to learn his true nature from God and not vice versa, and (3) that Christ, who is the express image of God, is the true original of man, so that even apart from the fall and restoration man would still have borne the image of Christ.

In what respect, however, is man a copy or reflection of God? Physical resemblance is ruled out, for God is not represented as having a human form, or any other material form, except in theophany or incarnation. The most that might be said along these lines is that the incarnate Christ is the prototype of man; but physical form is not as such essential to deity, and it hardly seems possible to make much sense of Gen. 1:26f. in terms of a physical interpretation.

A second possibility of a very different kind is to see in man's dominion over nature a reflection of the lordship of God. This possibility has the merit of construing the divine resolve of 1:26 with a divinely imposed task in 1:28, in terms of the immediate context. No doubt man as God's vicegerent does, as it were, stand in the place of God (as Moses later did for Aaron, Ex. 4:16), so that a representa-

tion is thereby given of God. While there is an element of truth here, it is surely too narrow to be the whole truth. For man also has the endowment with which to exercise lordship, e.g., rationality, volition, and moral responsibility; and this, too, has called for notice as the true reference of the *imago*. That similar qualities are also revealed with reference to God is a strong argument in favor of this widely accepted interpretation, and perhaps the only argument against it is that it does not actually belong to the context of Gen. 1 but has to be imported in the light of other considerations.

Finally, the image has been interpreted in terms of relationship. Karl Barth (*CD*, III/1f.) makes a strong plea for this interesting view. His main argument is that in Gen. 1:27 "male and female created he them" is not an odd and detached bit of information but stands in strict relation to "in the image of God created he him." This does not mean, of course, that there is sexual distinction in God. It does mean, however, that within God there is a relationship in unity (the plural *ʾĕlōhîm*, later more fully revealed as the trinity), which finds reflection in the indestructible relationship in unity of man as essentially man-and-woman. In other words, intrapersonal relationship is the essential mark of man as it is also of God. To be created in the divine image is to be created in this relationship.

Two or three objections may be made to this interpretation. First, it is not wholly certain that 1:27b does stand in this stricter parallelism to 1:27a. Second, the doctrine of the trinity has to be read back into the plural of 1:26, though the plural itself is undoubtedly in the text. Third, the beasts, too, are created male and female; and therefore the endowment of rationality, volition, and ethical sense is still necessary for human intrapersonal relationship in the image of the divine. Barth has to assume this traditional aspect of the *imago* even though he may be right in giving the interpretation a slightly different emphasis or focus.

C. The Image and the Fall. How far does man still bear the image in his fallen state? This problem has constantly exercised theology, and the paucity of biblical data and the paradoxical nature of fallen man make it difficult to give any very sure or convincing answer. In fact, many different solutions have been proposed, and the differences in the interpretation of the image itself naturally affect these. Where a distinction is seen between image and likeness, it is often argued that the one is weakened and the other effaced. Where emphasis is thrown on the ordinary endowment of man, it is agreed that the formal aspects remain but that an element of distortion arises at the material level. Thus man is still rational, but his rationality no longer imparts true knowledge of God. The same holds true in respect of relationship. Nothing man does can alter the fact that he stands in relation to the fellow man, specifically in the form of woman; but the actual outworking of the relationship is in no sense a reflection of the true relationship within the Godhead.

A similar distinction arises in respect of man's dominion over the cosmos. Man is still the lord of creation and in this formal sense he represents God, the ultimate Lord. But now man is to a very large degree a selfish tyrant who rules over nature for his own ends, and in this sense he is the very opposite of God. It will be noted that all these answers to the question realize that fallen man is basically paradoxical. He cannot cease to be man. Hence he cannot cease to be made in the image of God. But the actual content of his life is at odds with its underlying reality. God is reflected only in the structure, not in the material content of his being. The *imago* is not now partial or blurred; it is on the one hand intact from the standpoint of basic structure and on the other unrecognizable from the standpoint of outworking or content.

This continuity and discontinuity seem to lie behind the presentation in the NT. Thus true relationship between man and woman is established on the basis of the *imago Dei* in 1 Cor. 11:7. Incidentally it is worth noting that in this passage only man is said to be created directly in the divine image (woman indirectly), though Paul does not say that woman is created in the image of man. Perhaps the true point of the introduction of the image here is that the relation between man and woman should reflect the relation between Father and Son within the Godhead. Insofar as this relationship is demanded by the very structure of human life, the image is inescapably present. Insofar as it is perverted in practice, the intertrinitarian relationship is no longer perceived. The true course is to remodel the practice on the divine original, so that this will be reflected not only in structure but in practice, too.

The paradoxical nature of fallen man may also be seen in Jas. 3:9. Here the fact remains that man is made after the likeness of God. Hence it is self-contradictory to bless God (the original) and curse man (the likeness) at the same time. That man is sinful does not remove the element of contradiction, for, even though he is sinful, he is still made in the divine image and it is thus fundamentally natural for him to bless God. On the other hand, that he can be guilty of contradiction is evidence that the content of the *imago* is lost, for contradiction exists only because (1) men do not in fact reflect the divine nature in their character and conduct, and (2) their thinking and utterance are at odds with their creation in the divine image.

D. The Image and the Christian. Yet the NT also advances a further consideration, namely, that in and by God's saving work in Christ the content of the image is brought back into harmony with the structure. Thus in Col. 3:10 the believer is said to be renewed unto knowledge after the image of Him who created him (cf. Eph. 4:24, "after God"). But this is now equivalent to being conformed to the image of God's Son (Rom. 8:29). As we now bear the image of Adam (cf. Gen. 5:3), the earthly man, so we shall bear the image of Christ, the heavenly man (1 Cor. 15:49). Beholding as in a glass the glory of the Lord, we are changed into the same image from glory to glory (2 Cor. 3:18). The NT, then, is not content merely to state the doctrine of the *imago* in terms of the fall. In keeping with its true character as the message of salvation, the NT adds a soteriological and eschatological element. The message of salvation is the message of salvation in Christ. Hence the soteriological and eschatological dimension is the christological. The *imago Dei* is redefined in terms of Christ as Himself the true image.

II. Christ the Image of God.—In three NT passages Christ is called the image of God. The first is 2 Cor. 4:4, which refers to "the light of the gospel of the glory of Christ, who is the image of God." Then in Col. 1:15 it is said that Christ is "the image of the invisible God, the firstborn of every creature." Finally, He. 1:3 speaks of the Son as "the very image of his substance." Two different words are used in these passages. In 2 Corinthians and Colossians we find the familiar Gk. *eikṓn*, the LXX rendering of Heb. *ṣelem* (Vulg. *imago*). In Hebrews the term is Gk. *charaktḗr*, which derives from *charássō*, "engrave," and which bears the sense of engraved stamp, image, or impression (Lat. *figura*).

A. Eternal Son. The *imago Dei* as applied to Christ is capable of many different interpretations, though we need not be forced to choose among them. So long as proper balance is kept, the reality of Christ should be big and rich enough to embrace many different aspects. In this field

perhaps the main danger is to seize on one factor and to press it to the exclusion of others. Certainly, a place must be found for Christ's being in His essential deity the exact image of the Father in the sense that He is Himself equally God. He is not just a copy, an impression from the original fount. He is Himself also the original. He does not merely give a representation of God. As Paul says, in Him dwells all the fulness of the Godhead bodily (Col. 1:19; 2:9). If there is real distinction between the Father and the Son, as the term "image" suggests, Christ is the *imago substantialis,* whereas man is the *imago accidentalis*. The term *imago* is here designed to express what is implied in the word *lógos* in Jn. 1:1 and the phrase "in the form of God" in Phil. 2:6.

B. Prototype of Man. In His preexistent life as the Son, Christ is also the prototype of man, even in respect of the first creation. Colossians makes this clear by equating the "image of God" with the "firstborn of every creature." Similarly Jn. 1:4,9 indicates that man is in some sense the mirror of the Logos. While there is a danger of speculation in this field, whether in terms of a necessary incarnation or in the direction of an ultimate universalism, the christological aspect of creation is so plainly established in Scripture that it is not to be evaded. According to God's eternal counsel the Son has always been the prototype and goal of humanity, so that even if man had never sinned — a mere hypothesis — he would still have come to the fulfillment of his destiny in relation to Christ. This does not mean, of course, that Adam is created in the divine image only by anticipatory promise. It means that at his creation Adam is already fashioned according to the prototype, i.e., Christ. In Himself Christ already sums up all that humanity is to be. In this respect Christ is not, of course, to be abstracted from the Father and the Holy Spirit. To be made in the image of Christ is to be made in the image of God, for Christ is God, not alone, but in the eternal triunity of Father, Son, and Holy Spirit.

C. The God-Man. In His incarnate life as true God and true Man, Christ is again the image of God. He is a perfect representation of God to man. The word "image" is not actually used of Christ in this connection but the thought is present throughout the NT. Thus it is said of the incarnate Word: "We beheld his glory, the glory as of the only begotten of the Father, full of grace and truth" (Jn. 1:14). Paul tells believers that they are changed into the same image as they behold "as in a glass the glory of the Lord" (2 Cor. 3:18). Jesus Himself says plainly: "He that hath seen me hath seen the Father" (Jn. 14:9). What ought to be true of every man, namely, that he is a representation of God, is supremely true of the man Jesus, whose whole life, character, and work bear the stamp of the divine approval (Mt. 3:17; Mk. 9:7; Acts 2:22) and who is finally declared to be the Son of God with power by His resurrection from the dead (Rom. 1:4).

D. The Servant Form. Yet, as in the case of the fallen Adam, so in that of the incarnate Jesus, though in a very different way, there is a paradoxical element. For in fulfillment of the work of salvation Christ, who is the image of God, was sent in the likeness of sinful flesh and condemned sin in the flesh (Rom. 8:3): "taking the form of a servant, being born in the likeness of men" (Phil. 2:7). "Therefore, he had to be made like His brethren in every respect" (He. 2:17). The paradoxical element in this is twofold. First, it is paradoxical that the original should be made in the likeness of the likeness, though it will also be seen that just because Adam was made in the divine image, and Christ was thus the prototype, the incarnation does not in fact involve any self-alienation on the part of the divine Son. Second, and more profoundly, it is paradoxical that as Adam bears the image of God and yet lives a sinful life, so Christ bears the image of man and yet lives a sinless life (He. 4:15).

It is to be noted, however, that there is here no inherent paradox as in the case of Adam, for only what is sinful can be really paradoxical. For even fallen Adam still bears the divine image, and the sinless Christ is simply bringing the content back into line with the structure. In other words, Christ is true man whereas fallen Adam is perverted man. It is also to be noted that Christ bears the likeness of sinful flesh only that He may do the work of salvation. He becomes man in order to die for man. He takes the likeness of the sinner, not to be a sinner, but to live the life the sinner ought to live, to offer Himself the righteous offering for the sinner's sin, and to effect the restoration of the sinner to the likeness of God. It is part of the substitutionary ministry of Christ that He, the express image of God, should be made in the likeness of men that man may be wholly and truly refashioned in the likeness of God.

A final point is that His bearing the likeness of sinful flesh prevents the *direct* recognition that would impede the sifting of the heart and true repentance and faith by the Holy Spirit. At the end of the age, when He comes again in His glorified humanity (cf. Rev. 1:13-16), Christ will be manifested directly as the express image of God. In the days of His earthly life, however, He bore the servant form, which is no less truly the image of God, which is related directly to His work for the restoration of the image, but which conceals His glory from the impenitent and unbelieving who resist the illumination of the Holy Spirit (cf. Mt. 16:13-17).

E. Prototype of the New Man. As the God-Man, Christ is the prototype of the new, redeemed humanity. The Christian is the person who in repentance and faith, by the Holy Spirit, is identified with the Christ who died and rose again for him. He is dead, and the life he now lives is that of Christ in him (Gal. 2:20). He is a new creature (or creation); the old things have passed and new things have come (2 Cor. 5:17). This redemption has an ethical implication. He is born again in Christ, and hence the whole movement of his life is to be one of being made conformable to Christ. Every thought is to be brought captive to Christ's obedience (2 Cor. 10:5). The mind of Christ is to be his mind (Phil. 2:5). As the mind is renewed, so conduct should be transformed. The old man is to be put off with his wicked works, the new man put on, which after God is created in righteousness and true holiness (Eph. 4:22ff.; Col. 3:9ff.). The process of the Christian life is that of the fashioning of the image of Christ in His people. But there is also an eschatological implication. As Paul says in 1 Cor. 15:49, at the last day we shall finally bear the image of the heavenly. The Lord Jesus "will change our lowly body to be like his glorious body" (Phil. 3:21). "We shall be like him, for we shall see him as he is" (1 Jn. 3:2). The original purpose of God, that man be created in His own image and after His likeness, will thus be brought to perfect and glorious fulfillment in the new creation, when the redeemed people of God bear the image of their Lord and Head, who bore the image of sinful man for them, and who is Himself the express image of God.

IMAGERY, CHAMBERS OF (Ezk. 8:12, AV). *See* PICTURES, ROOM OF.

IMAGES. *See* IDOL.

IMAGINE [Heb. *ḥāšaḇ*] (Ps. 41:7 [MT 8]); AV DEVISE; NEB "love to make"; [Gk. *meletáō*] (Acts 4:25); NEB LAY PLOTS; [*dokéō*] (1 Cor. 8:2); AV THINK; NEB FANCY; [*nomízō*] (1 Tim. 6:5); AV SUPPOSE; NEB THINK; **IMAGINATION** [Heb. *yēṣer*] (Gen. 6:5; 8:21); NEB INCLINATION; [Gk. *diánoia*] (Lk. 1:51); NEB MIND; [Gk. *enthýmēsis*] (Acts 17:29); AV DEVICE; NEB DESIGN.

The Hebrew verb *ḥāšaḇ* means "plot" or "devise," as does Gk. *meletáō*. *Dokéō* and *nomízō*, on the other hand, mean to "think, believe, consider." Heb. *yēṣer* may denote the "plan" or "purpose" which a person proposes to enact. It is not the organ of reasoning but the product of that organ. The "plan" may be evil (so Gen. 6:5; 8:21; Dt. 31:21) or acceptable to God (so 1 Ch. 28:9; 29:18; Isa. 26:3). The AV sometimes uses "imagination" in the obsolete sense of "stubbornness" to render Heb. *šᵉrirût* (Dt. 29:19 [MT 18]; Jer. 3:17; 7:24; etc.).

The usual meaning of Gk. *diánoia* is either "mind," i.e., the organ of thinking (cf. Bauer, rev., p. 187) or "thoughts," i.e., the ideas, conceptions, or chains of reasoning which thinking produces (cf. Col. 1:21; 2 Pet. 3:1). *Enthýmēsis* represents an idea that arises in the mind and is given mental consideration (cf. Mt. 9:4; 12:25; He. 4:12).

J. A. HEWETT

IMALKUE ī-mal-kū'ē [Gk. *Imalkouē*]; AV SIMALCUE; NEB IMALCUE. An Arabian prince to whom Alexander Balas entrusted the upbringing of his young son Antiochus. Trypho, who had formerly been on the side of Alexander, persuaded Imalkue to set up the young Antiochus (Antiochus VI) against Demetrius, who had incurred the enmity of his men of war (1 Macc. 11:39f.). Antiochus confirmed Jonathan in the highpriesthood and appointed him to be one of the king's friends (v. 57). In Josephus (*Ant.* xiii.5.1 [131]) the name is given as Malchus.

J. HUTCHISON

IMITATE [Gk. *miméomai*] (2 Thess. 3:7, 9; He. 13:7; 3 Jn. 11); AV FOLLOW; NEB also COPY-, FOLLOW THE EXAMPLE OF; **BE(COME) IMITATORS** [Gk. *mimētaí gínesthai*] (1 Cor. 4:16; 11:1; Eph. 5:1; 1 Thess. 1:6; 2:14; He. 6:12; 1 Pet. 3:13 var.); AV BE(COME) FOLLOWERS; NEB also IMITATE, FOLLOW THE EXAMPLE OF, "try to be like" (Eph. 5:1), "fare like" (1 Thess. 2:14); **JOIN IN IMITATING** [Gk. *symmimētaí gínesthe*] (Phil. 3:17); AV BE FOLLOWERS TOGETHER; NEB "agree together to follow my example."

The noun *(sym)mimētḗs* is always in the NT joined with the verb *gínomai*, "be," "become," usages equivalent to those of the simple verb *miméomai*. The word-group may thus be treated as a unit. These words, absent from Homer, are common in most later Greek literature in the sense "imitate," "follow a pattern (*týpos*)," as distinct from the literal *akolouthéō*, "follow." *Týpos* as "pattern," "example," recurs in several of these passages (Phil. 3:17; 1 Thess. 1:7; 2 Thess. 3:9). Timothy was to be a *týpos* to the believers (1 Tim. 4:12). Most of the occurrences are in the present imperative, or an equivalent, as exhortations to a habitual standard of conduct.

There are, however, difficulties. The basic meaning is not quite appropriate in all cases, and we may question in what sense believers are to be "imitators" of God (Eph. 5:1) or Paul an "example" to them. Michaelis distinguished three nuances in Paul. (1) Simple comparison is intended in 1 Thess. 2:14, where the Christians in Thessalonica are imitators of the churches in Judea only in that they have suffered alike at the hands of their fellows. They may imitate the conduct of their model, but scarcely their fate (cf. the NEB rendering). (2) The idea of imitation is dominant in passages in which Paul presented himself as the *týpos* (2 Thess. 3:7, 9; Phil. 3:17). (3) In other passages Michaelis found the connotation of obedience prominent: he regarded this as exclusively the sense of 1 Cor. 4:16, where the relationship pictured is that of a son to his father. In this case Paul was again the object, but in Eph. 5:1 the readers were called to be imitators of their Father God in terms of forgiveness (4:32). 1 Cor. 11:1 notes a double relationship: "be imitators of me as I am of Christ." The believer is to follow in obedience the pattern that his model represents.

He. 13:7 is probably to be linked with the thought of 6:12, urging the readers to "imitate" their first leaders, who are now dead (cf. 11:4ff.; 12:1f.), a view supported by the immediate context. It is possible, however, that the living are in mind here, since *hēgoúmenoi* ("leaders") in 13:17, 24 clearly refers to the living (cf. Bauer, rev., p. 237; G. E. Ladd, *Theology of the NT* [1974], pp. 586f.).

The whole word-group is absent from the canonical books of the LXX, though the concept was applied by Philo to mankind's relationship to God (e.g., *De opificio mundi* xxvi.79), perhaps under the influence of philosophical concepts of the correspondence of the heavenly and earthly realms. The NT thought is different. Paul did not hold himself up as an ideal of mature perfection (cf. 1 Cor. 9:27; Phil. 3:12): the believer is to follow him in spirit and purpose rather than in performance. Christ Himself was the supreme example; He ran in advance the course His disciples are called to follow (cf. He. 12:1f.). The Christian life involves a measure of identification with the sufferings of Christ. That is very different from the notion of justifying oneself by seeking to emulate His works.

IMLAH im'lə [Heb. *yimlâ*–'fulness'(?)]; AV, NEB, IMLA (2 Ch. 18:7f.). Father of the prophet Micaiah (1 K. 22:8f.; 2 Ch. 18:7f.).

IMMACULATE CONCEPTION. *See* MARY 6.

IMMANUEL i-man'ū-el [Heb. *'immānû 'ēl*–'with us (is) God']. A symbolic name or title given at birth to one or more male infants in the OT (Isa. 7:14; 8:8; see also 8:10) and NT (**EMMANUEL** [Gk. *Emmanouēl*], Mt. 1:23). The phrase is two words in all three Isaiah references in the MT; in 1QIsaᵃ from Qumrân, however, it is combined into one word in all three places. The LXX transliterates as *Emmanouēl* in Isa. 7:14 but translates as *meth' hēmṓn ho theós* in 8:8 and *meth' hēmṓn kýrios ho theós* in 8:10. The NT quotation of Isa. 7:14 in Mt. 1:23 adds the LXX Isa. 8:8 translation: (*hó estin methermēneuómenon*) *meth' hēmṓn ho theós*. Names similar to Immanuel have been found on an early Hebrew seal (*'Immadiyahu*, "with me [is] the Lord") and in an Elephantine papyrus from the 5th cent. B.C. (*'Immanuyah*, "with us [is] the Lord").

I. Historical Background
II. Exegetical Issues
III. Identification of Immanuel and His Mother
IV. Relationship to NT
V. God with His People

I. Historical Background.–Isaiah 7:1–12:6, a section often called "The Book of Immanuel," begins by stating that Rezin king of Aram and Pekah king of Israel marched out against Ahaz king of Judah with the intention of capturing

Jerusalem and replacing Ahaz with a certain "son of Tabeel" (perhaps an Aramean; cf. Ezr. 4:7). In 735/4 B.C. they slaughtered large numbers of people in Judah and took captive even larger numbers (2 Ch. 28:5-8). The ferocity of the attack may have been prompted by the posited refusal of Ahaz to join Rezin and Pekah in a western alliance against Tiglath-pileser III of Assyria. In any event Ahaz appealed to the Assyrian king for help, sending him tribute and becoming his vassal in the bargain (2 K. 16:7f.; 2 Ch. 28:16-21). The Assyrians were only too willing to oblige; they destroyed Damascus the capital of Aram (2 K. 16:9) in 732 and Samaria the capital of Israel in 722. It was probably shortly before the Aramean-Israelite invasion of Judah in 735/4 that Isaiah uttered his famous Immanuel oracle to Ahaz (Isa. 7:10-17).

II. Exegetical Issues.–Although "The Book of Immanuel" abounds with interpretative difficulties, we shall focus our attention on Isa. 7:14. The heart of the verse, *hinnēh hā'almâ hārâ w'yōleḏeṯ bēn* ("Behold, the virgin shall conceive and bear a son"), reflects an ancient annunciation formula, found elsewhere not only in the OT itself in the form *hinnāḵ hārâ w'yōlaḏt bēn* (Gen. 16:11; Jgs. 13:5, 7) but also earlier in Ugaritic: *hl ǵlmt tld b*[*n*] (*UT* 77:7). The use of so solemn a phrase underscores the significance of the child to be born. "The virgin" in Isa. 7:14 can also be read "a virgin" (i.e., indefinitely) or "virgins" (i.e., generically), but a specific mother seems intended in the context.

It is not self-evident that Heb. *'almâ* means "virgin" since most of the ancient Semitic languages had no word for *virgo intacta,* a concept that could be expressed only by means of circumlocution. Contrary to common opinion, *b'ṯûlâ* does not always or even necessarily mean "virgin"—nor does Gk. *parthénos* (the LXX rendering of *'almâ* in Isa. 7:14, quoted in Mt. 1:23; cf. Acts 21:9, NIV). The most that can be said of *'almâ* is that in all of its OT occurrences it seems to be used of an unmarried woman, a "damsel"—which, in situations such as the one before us, carries with it a strong presumption in favor of virginity. The verbal adjective *hārâ* in our text could be either present or future, but to render it as future seems safest in the context.

Proceeding to the next clause in Isa. 7:14, we observe that the Masoretes vocalized *wqr'ṯ* as an archaic third person feminine singular perfect form with *wāw* conversive (*w'qārā'ṯ*; "and she will call"). They were following the tradition represented by LXX Sinaiticus and the Targum. Although LXX A B, Aquila, Symmachus, Theodotion, and Old Latin read "you [sing.] will call," it is perhaps best to stay with the MT in the light of Gen. 16:11, where the same vocalization is found (without variants). The Syriac and Vulgate have a passive form in Isa. 7:14, probably reflecting the reading *wqr'* in 1QIsa[a] (to be vocalized as a pual passive; see especially Isa. 62:2, and note *kalésousin,* "they will call" his name = his name "will be called," in Mt. 1:23).

III. Identification of Immanuel and His Mother.–This is the most vexing question of all. Three basic approaches have been suggested: the nonfulfillment view, which asserts that the *'almâ* and Immanuel were people living in Ahaz' time only; the one-fulfillment view, which understands Isa. 7:14 as only a prediction of the virgin birth of Christ; and the double-fulfillment view, which sees a near fulfillment in the days of Ahaz and a remote fulfillment in the NT period. The first theory is unsatisfactory because of its refusal to take Mt. 1:23 seriously, and the second is unsatisfactory because it fails to do justice to the context of which Isa. 7:14 is an integral part. Only the third, which provides contemporary fulfillment as a sign to Ahaz and fulfillment centuries later as a sign to the "house of David" as a whole, is worthy of our consideration here.

Numerous suggestions have been made concerning the contemporary identification of Immanuel, the two most popular being a son of Ahaz or a son of Isaiah. The former, however, flounders in a sea of difficulties both theological and chronological. Arguments favoring the latter proposal are much stronger. We begin by noting that many have observed the similarity of form between Isa. 7:10-17 and 8:1-4. So similar are they that Immanuel and Maher-shalal-hash-baz may be two names for the same child, the former given by his mother, the latter by his father. Just as Shear-jashub (7:3), the name of Isaiah's other son, has a double significance ("a remnant will return" and "only a remnant will return"), so also Immanuel ("God is with us") and Maher-shalal-hash-baz ("the plunder hastens, the prey speeds") represent salvation and judgment respectively. Alternate names are common in both the OT (cf. Isa. 62:4; Jer. 20:3; and esp. Ruth 1:20) and the NT. The interplay between promise and threat in Isa. 7–8 corresponds to the alternation between Immanuel and Maher-shalal-hash-baz in the same section. Isa. 7:15f. and 8:4 complement each other and refer to the same period of time (approximately two years; in 732 B.C. Assyria destroyed Damascus and replaced Pekah with the puppet king Hoshea, thereby setting Samaria on its irreversible path to ruin). The term "sign," referring to Immanuel in Isa. 7:14, is echoed in the summary statement of 8:18 where Isaiah refers to himself and his children as signs and portents in Israel. All the contextual evidence indicates that Immanuel is to be regarded as one of Isaiah's sons.

Though some have claimed that Isaiah would not use *'almâ* in 7:14 to refer to his own wife, this is not a valid objection. Here is a plausible reconstruction: His first wife, the mother of Shear-jashub (7:3), had died. He predicts that the girl who is to become his second wife — a virgin at the time of the prediction — will become pregnant and give birth to a son (7:14), whom she will name "Immanuel." The wedding ceremony is alluded to in 8:1f. Isaiah takes his new bride and in due course she bears the predicted son (8:3f.), whom Isaiah names Maher-shalal-hash-baz. It is not surprising or unprecedented that she is called both a "virgin" and a "prophetess" (8:3); cf. the description of Miriam in Ex. 2:8; 15:20.

IV. Relationship to NT.–Understanding the *'almâ* of Isa. 7:14 as Isaiah's second wife, and Immanuel as their son, does not exhaust the meaning of that text. Isaiah and his children are viewed typologically in He. 2:13, which quotes Isa. 8:18 and applies it in a bold figure to Christ as the father of His adopted children. And the Immanuel of Isa. 7:14 cannot be separated, ultimately, from the child/son whose story is embedded in 9:1-7 (MT 8:23–9:6) or the Branch/Root described in 11:1-10. Both of these passages are integral to "The Book of Immanuel" and are quoted in part in Mt. 4:15f. (cf. Isa. 9:1f.) and Mt. 2:23 (cf. Isa. 11:1, where Heb. *nēṣer,* "branch," corresponds to Greek *Nazōraios,* "Nazarene," in Matthew). Matthew quotes yet a third time from "The Book of Immanuel" when he applies Isa. 7:14 to the virginal conception of Jesus Christ in Mt. 1:23. The "Mighty God" of Isa. 9:6 (MT 7) is the "God with us" of Matthew's Gospel. The relationship of the "virgin" in Isa. 7:14 and the Virgin Mary in Mt. 1:23 is that of type and antitype. Matthew's "God with us," reflecting as it almost surely does deity incarnate, lifts the Immanuel of Isa. 7:14 to an infinitely higher plane.

V. God with His People.–In a sense, "God with us"

is the story of Scripture in summary. The key covenant statement of relationship, "I will be their God, and they will be my people," is sometimes called the "Immanuel theme" in covenant theology. From the fellowship with God that mankind enjoyed in Eden to "the grace of the Lord Jesus . . . with all" God's people in Rev. 22:21, the concept of God's search for His children and His dwelling with them (cf. Jn. 1:14) is prominent throughout the Bible. As "God with us" was the sign (*'ôṯ*) to Ahaz and his people in Isa. 7:14, so also "I will be with you" (rather than "you will serve me on this mountain"; cf. the MT accentuation) was the sign (*'ôṯ*) to God's people at the beginning of their pilgrimage as a nation (Ex. 3:12). God's relationship "with us" distinguishes us "from all other people that are upon the face of the earth" (Ex. 33:16). It is "with us" that God enters into covenant (Dt. 5:2f.); it is "with us" that God speaks (AV Hos. 12:4 [MT 5]); it is "with us" that God walks as He gives help and guidance and protection (Jgs. 6:12-18; 1 K. 8:57; 2 Ch. 13:12; 32:7f.).

IMMER im'ər [Heb. *'immēr*—'lamb'; LXX Gk. *Emmērouth* (1 Esd. 5:24, A), *Amar* (1 Esd. 5:36; *Alar*, A; *Aalar*), *Emmēr* (1 Esd. 9:21)]; AV also AALAR (1 Esd. 5:36), EMMER (9:21), MERUTH (5:24); NEB also ALAR (5:36), EMMER (9:21), EMMERUTH (5:24).

1. A priest of David's time (1 Ch. 24:14), whose descendants are mentioned in Ezr. 2:37; 10:20; Neh. 3:29; 7:40; 11:13 (cf. 1 Esd. 5:24; 9:21).

2. A priest in Jeremiah's time (Jer. 20:1).

3. A place in Babylonia from which Jewish exiles returned (Ezr. 2:59; Neh. 7:61; 1 Esd. 5:36).

IMMORAL [Gk. *pórnos* (1 Cor. 5:9f.; 6:9; Eph. 5:5; 1 Tim. 1:10; He. 12:16; 13:4), *porneúō* (1 Cor. 6:18)]; AV also FORNICATION (1 Cor. 6:18), WHOREMONGER (Eph. 5:5; He. 13:4); NEB also FORNICATOR (1 Cor. 6:9; etc.), LOOSE LIVERS (1 Cor. 5:9), "pagans who lead loose lives" (1 Cor. 5:10); **IMMORALITY** [Gk. *porneía* (1 Cor. 5:1; 6:13, 18; 7:2; 2 Cor. 12:21; Gal. 5:19; Eph. 5:3; Col. 3:5; 1 Thess. 4:3; Rev. 2:21; 9:21), *pórnos* (1 Cor. 5:11), *porneúō* (1 Cor. 10:8; Rev. 2:14, 20)]; AV FORNICATION (1 Cor. 5:1; 6:13; etc.); NEB also SEXUAL IMMORALITY (1 Cor. 5:1), LOOSE LIFE (1 Cor. 5:11), LUST (1 Cor. 6:13); **IMMORALLY** [Gk. *ekporneúō* (Jude 7)]; AV, NEB, FORNICATION. The RSV uses these three words (only in the NT) to denote sexual behavior that is not in accord with OT regulations and the teaching of the apostles and other leaders in the primitive Church.

The word *porneúō* is derived from Gk. *pórnēmi*, "sell, prostitute oneself." Several cognates are derived from *porneúō*. A *pórnē* is a female prostitute. A man who fornicates with prostitutes is a *pórnos*, but the word is also used of male prostitutes. *Porneía* means fornication, harlotry, and other illicit sexual activities in general, including those of a homosexual nature. In the LXX, *porneúō* and its cognates almost always translate Heb. *zânâ*, "have intercourse with another," "be unfaithful," "play the harlot" (*DNTT*, I, 497; *TDNT*, VI, 581f., 584).

The Pauline Epistles are highly illustrative of the use of the word group *pórnē*, with the bulk of occurrences found in 1 Corinthians. Although "any kind of illegitimate sexual intercourse" is an adequate definition of the terms (*DNTT*, I, 500), the various contexts in which these terms occur show their application to specific situations. According to 1 Cor. 5:1, *porneía* refers to the incestuous relationship between a man and "his father's wife" (*gynaíka toú patrós*). Paul's phrase is similar to that of Lev. 18:8 (LXX), "you shall not uncover the nakedness of your father's wife" (*gynaikós patrós sou*). This command forbids sexual relations with one's stepmother, as distinguished from one's mother (v. 7). Whether the man's father had died or divorced his wife is not clear (see comms.), but the present relationship is forbidden (cf. Lev. 20:11; Mish. *Sanhedrin* vii.4). In 5:9-11 Paul addressed a more widespread problem among the Corinthians: sexual intercourse with prostitutes (cf. 6:12-20). Paul emphasized the seriousness of *porneía*. The person who commits *porneía* with a prostitute "sins against his own body" (v. 18), i.e., defiles his body, which is the temple of the Holy Spirit (cf. 1 Thess. 4:4-8).

In ch. 7 Paul responded to various questions raised by the Corinthians concerning marriage. He advocated marriage as a preventative measure against *porneía* and rejected any idea of sexual asceticism within marriage (vv. 1-7). Paul combined the example of the death of the Israelites who "yoked themselves" to Baal-peor (Nu. 25) with a warning to avoid idol worship in 10:8-22. It is possible that the immorality in the Corinthian church included prostitution, which involved participation in temple meals. The warning in v. 8 is followed by teaching concerning food offered to idols (vv. 14-30). Paul's comment in v. 20, "they offer to demons and not to God," indicates the influence of Lev. 17:7 and Dt. 32:17. If Paul already referred to Lev. 18:8 in 1 Cor. 5:1, he might have alluded to Lev. 17:7 in 10:20. Lev. 17:7 combines the ideas of immorality and participation in pagan sacrifice: "So they shall no more slay their sacrifices for satyrs [AV "devils," NEB "demons"] after whom they play the harlot" (LXX *ekporneúō*).

It is clear that Paul regarded immorality in all its forms as a serious breach of God's will. The offender in 1 Cor. 5:1 is to be cut off from all fellowship with other believers. This was initiated in an announcement at the next assembly of the congregation. Such a separation had the effect of handing the offender over to Satan, with the possibility of death (5:5). Immorality is not only a sin against oneself (1 Cor. 6:18), but also against God, for He has given His Holy Spirit to dwell in the believer, whose body is thus called "the temple of the Holy Spirit" (1 Cor. 3:16f.; 1 Thess. 4:3-8). Whoever persists in such behavior will bring severe judgment upon himself, possibly death (1 Cor. 3:17; 5:5; cf. 10:29f.; 1 Thess. 4:6). Those who pursue an immoral life-style will not enter the kingdom of God (Eph. 5:3).

"Immoral" occurs twice in Hebrews. Esau is termed "immoral" in 12:16. Some commentators construe v. 16a to mean "let no one among you be immoral or, like Esau, irreligious" (Bruce, pp. 366f.). Postbiblical tradition, however, portrays Esau as a licentious character who was interested only in satisfying his physical needs. The Palestinian Targum to Gen. 25:29 explains Esau's exhaustion as the result of his having committed five

transgressions on that day, including adultery with a betrothed maiden (cf. Jub. 25:1; Philo *Legum allegoriae* iii.2). Such traditions were probably familiar to the Epistle's Jewish audience (Hughes, p. 540). Immorality (*pórnos*), meaning nonmarital sexual intercourse, is distinguished from adultery (*moichós*), or extramarital sexual intercourse, in 13:4. The writer was countering both promiscuity and an antimarriage asceticism (Hughes, p. 365).

The author of Revelation refers to immorality four times. In 2:14, 20f. the churches of Pergamum and Thyatira are rebuked because they committed immorality and ate food sacrificed to idols. As in 1 Cor. 10:8-22, fornication was apparently part of the pagan festivities (Mounce, p. 98). The meaning of *porneía* in 9:21 is more general. It occurs with murder, sorcery, and theft, and together they form a catalog of vices (Lohmeyer, p. 83).

"Immorally" (*ekpornéuō*) occurs in Jude 7, which refers to the sexual excesses of Sodom and Gomorrah as an example of God's judgment on licentious behavior.

See also FORNICATION; MARRIAGE; UNCHASTITY.

Malina, *Nov.Test.*, 14 (1972), 10-17; J. Jensen, *Nov.Test.*, 20 (1978), 161-184. R. J. WYATT

IMMORTAL i-môr'təl; **IMMORTALITY** im-ôr-tal'ə-tē [Heb. *'al-māweṯ*] (Prov. 12:28); [Gk. *athanasía*] (1 Cor. 15:53f.; 1 Tim. 6:16); [Gk. *aphtharsía*] (Rom. 2:7; 2 Tim. 1:10); [Gk. *áphthartos*] (Rom. 1:23; 1 Tim. 1:17); AV also UNCORRUPTIBLE (Rom. 1:23). The noun *athanasía*, "deathlessness," denotes the immunity from death enjoyed by God (1 Tim. 6:16) and by resurrected believers (1 Cor. 15:53f.). The noun *aphtharsía*, "incorruptibility," "imperishability," signifies the immunity from decay that characterizes the divine state (Eph. 6:24) and the resurrection state (1 Cor. 15:42, 50, 53f.). It was "brought to light" by Christ as indicated in the gospel (2 Tim. 1:10) and is the divine gift granted to the righteous (Rom. 2:7). Finally, the adjective *áphthartos*, "imperishable," describes the quality of the divine nature (Rom. 1:23; 1 Tim. 1:17; 1 Pet. 1:23), the gentle and quiet disposition of the Christian woman (1 Pet. 3:4), the Christian's reward (1 Cor. 9:25) or inheritance (1 Pet. 1:4), and the future state of resurrected believers (1 Cor. 15:52).

Several points are noteworthy: (1) All uses of the nouns are Pauline. (2) All three terms are associated with Paul's description of the spiritual body (seven instances, all in 1 Cor. 15), but never with the "soul." Immortality and resurrection are inseparable ideas (see IV.A below). (3) Although the three terms are formed with "alpha privative," a negative prefix comparable to the English *in-* or *un-*, each takes on positive overtones relating to "(eternal) life." For example, just as God is "never-dying" (Rom. 1:23; 1 Tim. 1:17; 6:16) because he is "ever-living" (Jer. 10:10; Jn. 5:26), so believers are destined to become free from decay and death because they will participate fully and immediately in the eternal divine life (2 Pet. 1:4). Moreover, the ideas of immortality and life are closely related in Rom. 2:7; 2 Tim. 1:10, so that inheriting immortality (1 Cor. 15:50) is equivalent to reaping eternal life (Gal. 6:8). (4) Immortality may therefore be defined as the immunity from decay and death that results from sharing the divine life in the resurrected state.

  B. As Complementary Ideas
V. Platonic and Biblical Immortality

I. Immortality in the Pre-Christian Era.—*A. Greek World.* An essential ingredient of Orphic religion was belief in the essential divinity of the soul and in embodiment as the soul's exile from its true heavenly home. Hence the celebrated Orphic pun *sôma sēma*, "the body is the tomb (of the soul)." This belief in the eternal survival of the soul gained intellectual respectability in the writings of Plato. According to Plato, in its rational or divine function the soul is preexistent and apparently eternal and has relations with both the phenomenal world and the unchanging ideal world. He adduces five arguments for the immortality of the rational soul: the argument from opposites (*Phaedo* 70c-72e) and the complementary argument from reminiscence (*Phaedo* 72e-77d); the argument from affinity (or from the simplicity of the soul) (*Phaedo* 78b-84b); the argument from "forms" (*Phaedo* 102a-107b) which he regarded as the most conclusive proof; the argument from destructibility (*Respublica* 608d-611a); the argument from motion (*Phaedrus* 245c-246a). Aristotle reserves divinity, eternality, and immortality for "active intellect" (*De an.* 415a; *De generatione animalium* 738b), the highest phase of soul. Since the faculty of memory belongs to the passive and perishable part of the intellect (*De an.* 408b), the discarnate active intellect will lack continuity with earlier bodily existence. All that survives the death of the individual is the impersonal reason or divine *noús* (intellect).

B. OT. The OT has no distinct term for immortality, although the coinage "not-death" (*'al-māweṯ*) occurs once (Prov. 12:28): "In the way of righteousness is [eternal] life; the treading of her path is not-death [= immortality]." The RSV, however, follows the LXX (*eis thánaton*) in reading *'el-māweṯ* ("to death") in the second line: "the way of error leads to death." Adducing an instance of the synonymous parallelism of "[eternal] life" and "immortality" in an Ugaritic poem (2 Aqht vi. 27-29), M. Dahood claims to have found ten instances in the Psalms (e.g., 16:11; 133:3) and four in Proverbs (e.g., 12:28; 15:24) where the Heb. *ḥayyîm* ("life") signifies "life eternal" (*Psalms*, III [*AB*, 1970], xlvi-xlvii).

The common OT phrase "for ever(more)" sometimes denotes eternality and immortality, as when it refers to Yahweh's existence and character (Ps. 9:7 [MT 8]; 111:3), but generally it points to unlimited duration, "as long as life lasts" (e.g., Ex. 21:6, of slavery in perpetuity). Note also the customary royal greeting, "O king, live for ever!" (Dnl. 2:4). Even "living for ever" in Gen. 3:22 denotes merely a permanent continuation of man's earthly, corporeal existence, not direct participation in the eternal, divine life brought about by a somatic transformation. Only in Dnl. 12:2 is immortality related to resurrection: some of those who sleep in the dust of the earth "shall awake . . . to everlasting life," the positive corollary of immortality. As to man's original state, we may say that he was created neither immortal (Gen. 3:22-24) nor mortal (Gen. 2:17) but with the potentiality to become either, depending on his obedience or disobedience to God. If not created *with* immortality, he was certainly created *for* immortality.

C. Intertestamental Judaism. During the period 200 B.C. to A.D. 100 the concept of immortality gained a new prominence in Jewish texts. Some emphasize or refer exclusively to immortality (Palestinian Judaism: Jubilees [e.g., 23:31]; Testament of Moses [e.g., 10:8-10]; Testament of Abraham [e.g., Recension A, 1, 7]; Diaspora Judaism: 4 Maccabees [e.g., 16:13; 18:23]; Wisdom [e.g., 2:23; 3:1-4]; Philo [e.g., *De opificio mundi* 135]). Other texts juxtapose the ideas of resurrection and immortality without attempting to interrelate them (Palestinian Judaism: 1 En. 91–104 [e.g., 92:3f.; 103:3f.]; XII P. [e.g., T. Jud. 25:1, 4; T. Ash. 6:5f.]; Diaspora Judaism: Testament of Job [e.g., 4:9; 52:2-9]). But some texts do interrelate the two ideas, often through recourse to the notion of an intermediate state occurring between a person's gaining of immortality at death and his resurrection at the last day (Palestinian Judaism: 1 En. 1–36 [e.g., 22:1-12]; 37–71 [e.g., 51:1f.; 58:3f.]; 2 Esd. 3–14 [e.g., 7:88-101]; 2 Baruch [e.g., 30:2-4; 51:9]; Diaspora Judaism: 2 Maccabees [e.g., 7:9-11, 14]; Josephus [e.g., *BJ* iii.8.5 (372-78)]).

II. Immortality of God in the NT.–1 Tim. 6:16 asserts the uniqueness of God's immortality. He is "the blessed and only Sovereign . . . who alone has immortality." This means not simply that decay and death have no place in His existence but that He is the sole and eternal source of life and holiness. Significantly, the same Greek sentence that includes the phrase "who alone has immortality" affirms that He perpetually "gives life to all things" (1 Tim. 6:13) and "dwells in unapproachable light" (1 Tim. 6:16). On the principle that behind each explicit negative definition of God's character (such as immortality) there lies some implicit positive assertion, immortality may be said to imply that creative energy (Ps. 36:9 [MT 10]; Jn. 5:26; 6:57) and purity (Ex. 15:11; Isa. 6:3; He. 12:29) are constantly present in God as well as that death and sin are permanently absent.

III. Immortality of Man in the NT.–*A. As a Divine Gift to the Righteous.* If only God is inherently immortal, man may gain immortality only as a gracious gift of the divine will (cf. Rom. 2:7; 6:23). Man's immortality is not essential or intrinsic but derived or extrinsic. The acquisition of immortality is a privilege reserved for the righteous rather than the prerogative of all mankind. This is clear from Rom. 2:7f., where eternal life is promised to "those who by patience in well-doing seek for glory and honor and immortality" but wrath and fury to "those who . . . do not obey the truth but obey wickedness"; and from 1 Cor. 15, where investiture with imperishability and immortality (vv. 53f.) is pledged to "those who have fallen asleep in Christ" (v. 18). There is a resurrection that leads to eternal life, the positive aspect of immortality, and a resurrection that leads to judgment (Jn. 5:29). Sharing the divine nature is a future experience reserved for those who belong to Christ (1 Cor. 15:23, 49, 53f.; 2 Pet. 1:4). Potentially immortal by nature, man actually becomes immortal through grace. Immortality is conditional in the sense that there is no eternal life except in Christ. But this does not imply, of course, that existence beyond death is conditional. Because, in its NT sense, immortality has positive content, being more than mere survival beyond death, its opposite is not nonexistence but the "second death" (Rev. 20:6, 14; 21:8), "the punishment of eternal destruction and exclusion from the presence of the Lord" (2 Thess. 1:9).

B. As a Future Acquisition. It was suggested above (I.B) that man was not created unable to die (*non posse mori*) but able not to die (*posse non mori*). If, then, man was not created immortal and since the fall has been subject to death, when is this gift of immortality received? Although immortality was "brought to light" and made available by the death and resurrection of Jesus (2 Tim. 1:10) and is gained *potentially* at the time of regeneration when a person comes to be in Christ (1 Cor. 15:22; 2 Cor. 5:17; 1 Pet. 1:23), it is not until the believer experiences a resurrection transformation that immortality becomes an *actual* possession. For those who die this may occur at the moment of death (if indeed that marks the receipt of the spiritual body) or at the Parousia; for the living it occurs at the Parousia. But more in accord with the NT use of the terms "immortal" and "immortality" than this "potential-actual" distinction, is the conclusion that the NT simply portrays immortality as a divine gift gained through somatic resurrection at or after the death of the believer (Lk. 20:35f; Jn. 11:25f.; 1 Cor. 15:51-54; 2 Cor. 5:1-4). Whereas resurrection occurs in two stages, a spiritual resurrection at baptism (Rom. 6:4; Col. 2:12) and a somatic resurrection in the future (1 Cor. 15:23, 49, 52), immortality lies totally in the future, since as long as the believer is alive he remains subject to physical death.

C. Immortality and Eternal Life. Both expressions describe conditional divine gifts (Acts 11:18; 13:48; Rom. 2:7; 6:23; Gal. 6:8; 1 Cor. 15:52-54) that are inseparably related to the resurrection transformation (compare Rom. 6:22f. with 8:11, 23, for eternal life; 1 Cor. 15:35-57, for immortality). Both depict the final state of blessedness or the heavenly mode of existence. But they are not identical concepts: (1) Formally, one is a positive expression, referring to life; the other negative, relating to death. Each implies the other, however, for to have eternal life is to be ultimately free from death (Jn. 5:24) and to be immortal is to live forever (Jn. 6:51, 58). (2) In the Fourth Gospel, eternal life is both a present reality (Jn. 3:36; 5:24; 17:3) and a future blessing (Jn. 4:14, 36; 5:29; 6:27), whereas for Paul both eternal life (Rom. 2:7; 5:21; 6:22f.; Gal. 6:8) and immortality are future acquisitions. This distinction may perhaps best be explained by observing that in John eternal life (or life) signifies (negatively) an immunity from spiritual death (Jn. 5:24) but not from physical death (Jn. 11:25), while immortality (and eternal life) in Paul involves immunity from both spiritual and physical death. (3) Eternal life is the positive aspect of immortality (viz., participation in the divine life), and immortality is the future aspect of eternal life.

IV. Immortality and Resurrection.–It is sometimes thought that the idea of immortality may be safely jettisoned without losing an essential ingredient of Christian doctrine. There is a distinction between a Platonic belief in the immortality of the soul alone and biblical teaching regarding the resurrection of the dead. The NT data, however, point to the complementarity of the ideas of resurrection and immortality.

A. As Inseparable Ideas. First, a resurrection transformation is the only means of gaining immortality (Lk. 20:35f.; Acts 13:34f.; Rom. 6:9; 1 Cor. 15:42, 52-54). Although those alive at the Parousia will not be "raised from the dead," they will experience a transformation into the image of Christ comparable to the change effected in the dead (1 Cor. 15:49-54). Second, immortality is the inevitable outcome of a resurrection transformation (Lk. 20:36; Jn. 11:25f.; Rom. 6:9; 1 Cor. 15:53f.; Rev. 1:18; 20:6). From a Christian perspective, the two ideas stand or fall together. To deny resurrection is to deny immortality, since the embodiment guaranteed by resurrection is (from a Jewish or Christian outlook) necessary for meaningful existence. To deny immortality is to deny resurrection, since the divine life pledged by immortality is necessary to sustain transformed persons.

B. As Complementary Ideas. First, NT teaching about resurrection insures that immortality is regarded as personal rather than racial, ideal, or pantheistic; as corporate rather than individualistic; and as somatic rather than merely spiritual. Resurrection involves dead persons who are raised in spiritual bodies to enjoy the corporate life of the redeemed. Second, NT teaching about immortality guarantees that resurrection is seen as a continuing state rather than simply as a single event. It is a permanent rather than a temporary condition, a transformed state sustained by divine life and power. Immortality involves entrance upon a state of freedom from decay and death that is permanent because it has the constant invigoration of God's endless power.

V. Platonic and Biblical Immortality.–The biblical doctrine of immortality differs from the Platonic doctrine in several important ways. First, in the NT immortality is not an inherent characteristic of the rational part of the human soul but a natural attribute of God alone (1 Tim. 6:16). Second, the NT depicts immortality as a future acquisition gained by the righteous through a resurrection transformation effected by God, not as a natural property of every rational soul. Third, whereas Platonic anthropology is dichotomistic so that only release from corporeality achieved at death enables the soul to reenter its true abode in the world of Forms, NT anthropology is basically monistic so that the destiny of the Christian is somatic immortality, with the spiritual body being the organ of resurrection life. Fourth, according to the NT, possession of immortality depends on one's relationship to the second Adam, not the first Adam. It is death or a propensity to death, not immortality, that man inherits from Adam (Rom. 5:12; 1 Cor. 15:22). Deathlessness and imperishability result from union with Christ (1 Cor. 15:22f., 42, 52-54). Fifth, for Plato assurance of immortality was grounded in belief in the soul's divinity, but for Paul it was based on the fact that God gives all believers His Spirit as a pledge of a resurrection transformation that will result in immortality (2 Cor. 5:4f.). Sixth, although both Plato and NT writers understand immortality as involving "becoming like God," for the Christian this means conformity to the image of Christ (Rom. 8:29; Col. 3:10), rather than "a never-ending union with true Reality" (Rohde, *Psyche*, p. 475).

M. J. HARRIS

IMMUTABILITY, IMMUTABLE (He. 6:17f., AV). *See* UNCHANGEABLE.

IMNA im'nə [Heb. *yimnā'*]. A descendant of Asher (1 Ch. 7:35).

IMNAH im'nə [Heb. *yimnâ*].

1. Eldest son of Asher (Gen. 46:17 [AV JIMNAH]; Nu. 26:44 [AV JIMNA; NEB IMNA]; 1 Ch. 7:30).
2. A Levite of Hezekiah's time (2 Ch. 31:14).

IMNITES im'nīts [Heb. *yimnî*] (Nu. 26:44); AV JIMNITES. Descendants of Imnah (*see* IMNAH 1).

IMPART [Gk. *dídōmi* (Eph. 4:29), *metadídōmi* (Rom. 1:11), *laléō* (1 Cor. 2:6f., 13)]; AV also MINISTER (Eph. 4:29), SPEAK (1 Cor. 2:6f., 13); NEB also BRING A BLESSING (Eph. 4:29), SPEAK (1 Cor. 2:6f., 13). The term can mean either "give a share of" (Eph. 4:29; Rom. 1:11) or "communicate," "disclose" (1 Cor. 2:6f., 13).

IMPEDIMENT [Gk. *mogilálos*] (Mk. 7:32). The Gk. *mogilálos* is composed of *mógis*, "with difficulty," and *lálos*, "speech," i.e., one who speaks with difficulty. In the LXX the word is used as a translation of Heb. *'illēm*, "dumb" (Isa. 35:6).

IMPERISHABLE. *See* IMMORTAL.

IMPIOUS. *See* PIETY.

IMPLANTED WORD [Gk. *émphyton lógon*] (Jas. 1:21); AV ENGRAFTED WORD; NEB MESSAGE PLANTED IN. *Émphytos*, appearing only here in the NT, may mean "inborn," "innate," or "natural" (cf. MM; e.g., Wisd. 12:10). In Jas. 1:21, however, the "Word" is to be "received"; thus *émphytos* here may mean "implanted (from without)" (cf. 1 Cor. 3:6). The word is "sown," not "engrafted" (cf. Mt. 13:18-23 par. Mk. 4:13-20).

H. VAN BROEKHOVEN, JR.

IMPLEAD [Gk. *enkaléō*] (Acts 19:38, AV). Archaic term for "bring charges" (RSV).

IMPLEMENTS [Heb. *kᵉlî*] (1 S. 8:12; Zec. 11:15); AV INSTRUMENTS; NEB WEAPONS, "equip yourself." The Heb. *kᵉlî* is a general term for various items. In 1 S. 8:12, it refers to weaponry, and in Zec. 11:15 to a shepherd's equipment.

See also INSTRUMENT.

IMPORT [Heb. *môṣā'*] (1 K. 10:28f.; 2 Ch. 1:16f.; 9:28). *See* COMMERCE I.A.

IMPORTUNITY [Gk. *anaídeia*]; NEB VERY SHAMELESSNESS. Occurring only in Lk. 11:8, this Greek word implies an element of impudent insistence to the point of shamelessness that the English "importunity" does not fully express. This weakens the parable's argument, which is that if by shameless insistence a favor may be won, even from one unwilling and ungracious, still more surely will God answer the earnest prayer of His people. God's

willingness to give exceeds our ability to ask. The parable teaches by way of contrast, not by parallel.

D. F. ESTES

IMPOSITION OF HANDS. *See* HANDS, LAYING ON OF.

IMPOSSIBLE [Heb. *bāṣar* (Gen. 11:6), *pālā'*–'be too hard' (2 S. 13:2); Gk. *adynatéō* (Mt. 17:20; Lk. 1:37), *adýnatos* (Mt. 19:26; Mk. 10:27; Lk. 18:27; He. 6:4, 18; 10:4; 11:6)]; AV also NOT POSSIBLE, HARD, "be restrained"; NEB also "beyond their reach," "can never fail," NOT POSSIBLY. The verb *adynatéō* and adjective *adýnatos* are both cognates of *dýnamai,* "be powerful," "be able," and hence they mean "powerless" (adj.) and "be powerless" (vb.). In several of these passages it is affirmed that "nothing is impossible with God," but, of course, this means nothing that is consistent with the divine nature, e.g., it is not possible for God to lie (cf. He. 6:18). So, when it is said that nothing is impossible to faith, the same limitation applies, as well as that of the mind or will of God for the believer (cf. 1 Jn. 5:14).

W. L. WALKER

IMPOSTOR [Gk. *plános*] (Mt. 27:63; 2 Cor. 6:8); AV DECEIVER; [*góēs*] (2 Tim. 3:13); AV SEDUCER; NEB CHARLATAN. *Plános* appears in the NT only four times as a substantive. The RSV has "deceiver" in 2 Jn. 7, but "impostor" in Mt. 27:63 and 2 Cor. 6:8. The Jews regarded Christ's resurrection as the second deception and thought of Christ Himself as the first fraud (Mt. 27:63f.); already they may have feared a fraudulent messiah (cf. *TDNT,* VI, *s.v.* πλανάω κτλ. [Braun]). The apostles were regarded as "impostors" although they were in fact *alētheís* — "true" in the sense of "genuine" and not merely "truthful" (2 Cor. 6:8). The focus here is upon the person's character rather than activity.

In 2 Tim. 3:13 "charlatan" (NEB) perhaps captures the nuance of Gk. *góētes* better than "impostor" (RSV). The *góēs* was a cheap, even a false and slick magician, a quack, who was regarded by the educated as despicable or ludicrous. The apostle, interested in correct doctrine, painted a rather humorous picture of these hustlers (3:6-13), whom he described as not only "deceiving but themselves deceived."

H. VAN BROEKHOVEN, JR.

IMPOTENT. Used by the AV for Gk. *adýnatos,* "powerless" ("could not use," Acts 14:8), *asthenḗs,* "without strength" ("cripple," Acts 4:9), and *asthenéō,* "be without strength" ("invalid," Jn. 5:3; "sick man," v. 7). The English term is used to characterize those who are paralyzed or crippled. In this sense the word is used by Shakespeare (*Love's Labour's Lost* V, 2, line 864; *Hamlet* I, 2, line 29). The impotent folk referred to in the Letter of Jeremiah (6:28) were those weak and feeble from age and want; cf. "impotent and snail-paced beggary" (*Richard III,* IV, 3, line 53).

IMPUTATION im-pū-tā'shən.

I. Meaning and Use of the Term
II. The Threefold Use of the Term in Theology
III. The Scriptural Basis of These Doctrines
  A. Imputation of Adam's Sin to His Posterity
  B. Imputation of the Sins of His People to Christ
  C. Imputation of the Righteousness of Christ to His People

I. Meaning and Use of the Term.–The word "imputation," according to the scriptural usage, denotes an attributing of something to a person, or a charging of one with anything, or a setting of something to one's account. This takes place sometimes in a judicial manner, so that the thing imputed becomes a ground of reward or punishment. Impute is used three times in the RSV. In 1 S. 22:15, it translates Heb. *'al-yāśēm* (lit. "do not put"; NEB "not accuse"). In Ps. 32:2 and Lev. 17:4, "impute" translates Heb. *ḥāšaḇ,* "think," "account," "reckon" (BDB, pp. 362f.). Lev. 17:4 teaches that bloodguilt was imputed to a man who killed a sacrificial animal without bringing it to the tent of meeting for sacrifice. Ps. 32:2 called the man blessed to whom the Lord did not impute sin. The RSV uses "reckon" for Gk. *logízomai* when Paul quotes Ps. 32:2 in Rom. 4:8 (*see* RECKON). The RSV does not use "impute" for any word in the NT. The AV uses "impute" for both *ḥāšaḇ* (Lev. 17:4; Ps. 32:2) and *logízomai* (Rom. 4:6, 8; etc.) (cf. "count" in Gen. 15:6; Rom. 4:3; etc.). The NEB has "count" (Gen. 15:6; Rom. 4:3f., 6; etc.), "held guilty" (Lev. 17:4), and "account" (Ps. 32:2).

These synonyms of the verb "impute" bring out the idea of reckoning or charging to one's account. It makes no difference, so far as the meaning of imputation is concerned, who it is that imputes, whether man (1 S. 22:15) or God (Ps. 32:2); it makes no difference what is imputed, whether a good deed for reward (Ps. 106:30f.) or a bad deed for punishment (Lev. 17:4); and it makes no difference whether that which is imputed is something which is personally one's own prior to the imputation, as in the case above cited, where his own good deed was imputed to Phinehas (Ps. 106:30f.), or something which is not personally one's own prior to the imputation, as where Paul asks that a debt not personally his own be charged to him (Philem. 18). In all these cases the act of imputation is simply the charging of one with something. It denotes just what we mean by our ordinary use of the term. It does not change the inward state or character of the person to whom something is imputed. When, for example, we say that we impute bad motives to anyone, we do not mean that we make such a one bad; and just so in the Scripture the phrase "to impute iniquity" does not mean to make one personally bad, but simply to lay iniquity to his charge. Hence when God is said "to impute sin" to anyone, the meaning is that God accounts such a one to be a sinner, and consequently guilty and liable to punishment. Similarly, the non-imputation of sin means simply not to lay it to one's charge as a ground of punishment (Ps. 32:2). In the same manner, when God is said "to impute righteousness" to a person, the meaning is that He judicially accounts such a one to be righteous and entitled to all the rewards of a righteous person (Rom. 4:6, 11).

II. The Threefold Use of the Term in Theology.–Three acts of imputation are given special prominence in the Scripture, and are implicated in the scriptural doctrines of original sin, atonement, and justification, though not usually expressed by the words *ḥāšaḇ* and *logízomai.* Because, however, of its "forensic" or "judicial" meaning, and possibly through its use in the Vulg. to translate *logízomai* in Rom. 4:8, the term "imputation" has been used in theology in a threefold sense to denote the judicial acts of God by which the guilt of Adam's sin is imputed to his posterity; by which the sins of Christ's people are imputed to Him; and by which the righteousness of Christ is imputed to His people. The act of imputation is precisely the same in each case. It is not meant that Adam's sin was personally the sin of his descendants, but that it was set to their account, so that they share its guilt and penalty. It is not meant that Christ shares personally in people's

sins, but that the guilt of His people's sin was set to His account, so that He bore its penalty. It is not meant that Christ's people are made personally holy or inwardly righteous by the imputation of His righteousness to them, but that His righteousness is set to their account, so that they are entitled to all the rewards of that perfect righteousness.

These doctrines have had a place in the theology of the Christian Church from the earliest Christian cents., though the doctrine of the imputation of the righteousness of Christ was first fully and clearly stated at the time of and following the Reformation. The first two of these doctrines have been the possession of the entire Christian Church, while the third one of them is affirmed by both the Reformed and Lutheran branches of Protestantism.

III. The Scriptural Basis of These Doctrines.–These three doctrines have a basis in the Scripture, and underlie the Scripture doctrines of original sin, atonement, and justification.

A. Imputation of Adam's Sin to His Posterity. The doctrine of the imputation of Adam's sin to his posterity is implied in the account of the fall in Gen. 2 and 3, taken in connection with the subsequent history of the human race as recorded in Genesis and in the rest of the OT. Many ancient and modern interpreters regard this narrative as an allegorical, mythical, or symbolical representation in historical form, either of a psychological fact, i.e., of something which takes place in every individual, or of certain general truths concerning sin. By some exegetes, following Kant, it has been held to depict an advance of the race in culture or ethical knowledge (but see Clemen); by others it has been regarded as a symbolical representation of certain truths concerning sin (Oehler, Schultz); by others it has been regarded as historical (KD, I, 28-32). This latter view is the one which accords with the narrative itself. It is evidently intended as historical by its author, and is so regarded by the NT writers. It is, moreover, introduced to explain, not an advance of the race, but the entrance of sin into the world, and the connection of certain penal evils with sin. It does this by showing how these evils came upon Adam as a punishment for his disobedience, and the subsequent history shows that his posterity were subjected to the same evils. It is true that the threat of punishment to Adam in case of disobedience was made to him alone, and that the penalties threatened are said to have come only upon him and Eve (Gen. 3:16-19). Nevertheless, it is clear from the account of the subsequent history of the race that it actually shared in the punishments inflicted upon Adam, and that this was in consequence of his sin. This implies that in Gen. 2:16f. are contained the terms of a covenant in which Adam acted as the representative of the race. If, therefore, the race shares in the penalty of Adam's sin, it must also share in his guilt or the judicial obligation to suffer punishment. And this is precisely what the theology of the entire Christian Church has meant by saying that the guilt of Adam's sin was imputed to his posterity. This is in accordance with God's method of dealing with people in other recorded instances (Gen. 19:15; Ex. 20:5; Dt. 1:37; 3:26); and the assertion of the principle of personal responsibility by Ezekiel and Jeremiah against an abuse of the principle of representative responsibility implies a recognition of the latter (Ezk. 18:2, 4; 33:12; Jer. 31:29).

The universality of sin and death is not brought into connection with the fall of Adam by the other OT writers. This is done, however, by Paul. In 1 Cor. 15:21f., Paul says that the death of all people has its cause in the man Adam in the same way in which the resurrection from the dead has its cause in the man Christ. The death of all people, accordingly, is not brought about by their personal sins, but has come upon all through the disobedience of Adam. Upon what ground this takes place, Paul states in the passage Rom. 5:12-21. He introduces the subject of Adam's relation to the race to illustrate his doctrine of the justification of sinners on the ground of a righteousness which is not personally their own. In order to do this he takes the truth, well known to his readers, that all people are under condemnation on account of Adam's sin. The comparison is between Adam and Christ, and the specific point of the comparison is imputed sin and imputed righteousness. Hence in v. 12 Paul does not mean simply to affirm that as Adam sinned and consequently died, so people sin and die. Nor can he mean to say that just as God established a precedent in Adam's case that death should follow sin, so He acts upon this precedent in the case of all people because all people sin, the real ground of the reign of death being the fact that all people sin, and the formal ground being this precedent (B. Weiss); nor that the real ground is this precedent and the subordinate ground the fact that all people sin (Hünefeld). Neither can Paul intend to say that all people are subject to death because they derive a corrupt nature from Adam (Fritzsche); nor that people are condemned to die because all have sinned (Pfleiderer). Paul's purpose is to illustrate his doctrine of the way in which people are delivered from sin and death by the way in which they are brought into condemnation. The main thought of the passage is that, just as people are condemned on account of the imputation to them of the guilt of Adam's sin, so they are justified on account of the imputation to them of the righteousness of Christ. Paul says that it was by one man that sin and death entered into the world, and it was by one man that death passed to all, because all were implicated in the guilt of that one man's sin (v. 12). In proof of this the apostle cites the fact that death as a punishment was reigning during a period in which the only possible judicial ground of this fact must have been the imputation of the guilt of that one man's sin (vv. 13f.). Hence there is a precise parallel between Adam and Christ. Just as people are condemned on account of Adam's disobedience, so they are justified on account of the obedience of Christ (vv. 18f.). The thought of the passage is imputed sin and imputed righteousness as the ground of condemnation and of justification respectively.

B. Imputation of the Sins of His People to Christ. That our sins are imputed to Christ is not expressly stated in the Scripture, but is implied in those passages which affirm that Christ "bore our sins," and that our iniquities were "laid upon him" by the Lord. To bear iniquity or sin, though it may sometimes mean to bear it away or remove it, is an expression often applied in Scripture to persons charged with guilt and subjected to the punishment of their own sin (Lev. 5:17; 7:18; 19:8; 22:9). That the Heb. verb *nāśā'* has this meaning is also indicated by its being interchanged with the verb *sāḇal,* which means "to bear as a burden" and is used to denote the bearing of the punishment of sin (Isa. 53:11). In the OT sacrificial system, which according to the NT is typical of the sacrifice of Christ, the imposition of hands on the head of the victim signified the substitution of it for the offender and the transfer of his guilt to it. This idea is brought out clearly in the case of the two goats on the great Day of Atonement (Lev. 16). When, therefore, the Servant of the Lord in Isa. 53 is said "to bear iniquity" (v. 11), or that "the chastisement of our peace was upon him" (v. 5, AV), or that "the Lord has laid [lit. "caused to fall"] on him the iniquity of us all" (v. 6), the idea expressed is that Christ bore the punishment of our sin vicariously, its guilt having been imputed to Him. The thought of the prophecy is, as Delitzsch says, that of vicarious punishment, which

implies the idea of the imputation of the guilt of our sins to Christ.

The same idea underlies these expressions when they occur in the NT. When Peter wishes to hold up Christ as an example of patience in suffering, he takes up the thought of Isaiah, and adduces the fact that Christ "himself bore our sins in his body upon the tree" (1 Pet. 2:24). The context indicates that Peter had the prophecy of Isa. 53 in mind, so that his meaning is, not that Christ carried our sins even up to the cross, but that in His death on the cross Christ bore the punishment of our sin, its guilt having been imputed to Him. The same thought is expressed by the writer of Hebrews, where the contrast between the first and second advents of Christ is made to hinge upon the fact that in the first He came to be sacrificed as a sin-bearer, burdened with the guilt of the sin of others, whereas in His second coming He will appear without this burden of imputed or vicarious guilt (He. 9:28). Paul also gives expression to the same thought when he says that God made Christ "to be sin" (2 Cor. 5:21), and that He became "a curse for us" (Gal. 3:13). In the former passage the idea of substitution, although not expressed by the preposition *hypér* which indicates that Christ's work was for our benefit, is nevertheless clearly implied in the thought that Christ, whose sinlessness is emphasized in the verse, is made sin, and that we sinners become righteous in Him. Paul means that Christ was made to bear the penalty of our sin and that its guilt was imputed to Him in precisely the same way in which we sinners become the righteousness of God in Him, i.e., by the imputation of His righteousness to us. The same thought is expressed in Gal. 3:13, where the statement that Christ was made a curse for us means that He was made to endure the curse or penalty of the broken law. In all these passages the underlying thought is that the guilt of our sin was imputed to Christ.

C. Imputation of the Righteousness of Christ to His People. The righteousness upon the ground of which God justifies the ungodly is, according to Paul, witnessed to in the OT (Rom. 3:21). In order to obtain the blessedness which comes from a right relation to God, the pardon or nonimputation of sin is necessary, and this takes place through the "covering" of sin (Ps. 32:1f.). The nature of this covering by the vicarious bearing of the penalty of sin is made clear in Isa. 53. It is, moreover, the teaching of the OT that the righteousness which God demands is not to be found among people (Ps. 130:3; 143:2; Isa. 64:6). Accordingly, the prophets speak of a righteousness which is not from human works, but which is said to be in the Lord or to come from Him to His people (Isa. 32:16f.; 45:23f.; 54:17; 58:8; 61:3; Jer. 51:10; Hos. 10:12). This idea finds its clearest expression in connection with the work of the Messiah in Jer. 33:16, where Jerusalem is called "the Lord is our righteousness" because of the coming of the messianic king, and in Jer. 23:6 where the same name is given to the Messiah to express His significance for Israel. Although the idea of the imputation of righteousness is not explicitly asserted in these passages, the idea is not merely that the righteousness spoken of is recognized by the Lord (Cremer), but that it comes from Him, so that the Lord, through the work of the Messiah, is the source of His people's righteousness.

This idea is taken up by Paul, who makes explicit the way in which this righteousness comes to sinners, and who puts the idea of imputed righteousness at the basis of his doctrine of justification. By the righteousness of Christ Paul means Christ's legal status, or the merit acquired by all that He did in satisfying the demands of God's law, including what has been called His active and passive obedience. Notwithstanding the fact that some of the modern expositors of Paul's doctrine have denied that he teaches the imputation of Christ's obedience, this doctrine has a basis in the apostle's teaching. Justification leads to life and final glorification (Rom. 5:18; 8:30); and Paul always conceives the obtaining of life as dependent on the fulfillment of the law. If, therefore, Christ secures life for us, it can only be in accordance with this principle. Accordingly, the apostle emphasizes the element of obedience in the death of Christ, and places this act of obedience at the basis of the sinner's justification (Rom. 5:18). He also represents the obedience of the cross as the culminating point of a life of obedience on Christ's part (Phil. 2:8). Moreover, Paul affirms that our redemption from all the demands of the law is secured by the fact that Christ was born under law (Gal. 4:4). This cannot be restricted to the fact that Christ was under the curse of the law, for He was born under law and the result of this is that we are free from all of its demands. This doctrine is also implied in the apostle's teaching that justification is absolutely gracious, taken in connection with the fact that it leads to a complete salvation.

The importance in Paul's thought of the doctrine of the imputation of the righteousness of Christ to the believer can be seen from the fact that the question how righteousness was to be obtained occupied a central place in his religious consciousness, both before and after his conversion. The apostle's conversion by the appearance of the risen Christ determined his conception of the true way of obtaining righteousness, since the resurrection of Christ meant for Paul the condemnation of his entire past search for righteousness by works of the law.

That the imputation of the righteousness of Christ to the believer does lie at the basis of Paul's doctrine of justification can be further seen from the fact that justification is absolutely free and unmerited so far as the sinner is concerned (Rom. 3:24; 5:15; Gal. 5:4; Tit. 3:7); its object being one who is ungodly (Rom. 4:5); so that it is not by works (Rom. 3:20, 28; Gal. 2:16; 3:11; 5:4; Phil. 3:9); and yet that it is not a mere pardon of sin, but is a strictly "forensic" or judicial judgment, freeing the sinner from all the claims of the law, and granting him the right to eternal life. This last truth is plain because God's retributive righteousness lies at the basis of Paul's doctrine of justification (Rom. 2); is manifested in it (Rom. 3:25f.); because Christ's expiatory work is its ground (Rom. 3:25); and because our redemption from the curse of the law rests upon Christ's having borne it for us, and our redemption from all the demands of the law depends upon their fulfillment by Christ (Gal. 3:13; 4:4). Hence the gracious character of justification, according to Paul, does not consist in its being merely a gracious pardon without any judicial basis (Ritschl); or in God's acceptance of a subjective righteousness produced by Him in the sinner (Tobac); or in the acceptance of faith instead of a perfect righteousness (Cremer). The gracious character of justification consists for Paul in the fact that the righteousness on the ground of which God justifies the ungodly is a righteousness which is graciously provided by God, and which Paul contrasts with his own righteousness which comes from works of the law (Phil. 3:9). The sinner, therefore, is pardoned and accepted as a righteous person, not on account of anything in himself, but only on account of what Christ has done for him, which means that the merits of Christ's suffering and obedience are imputed to the sinner as the ground of his justification.

This truth is explicitly affirmed by Paul, who speaks of God's imputing righteousness without works, and of righteousness being imputed (Rom. 4:6, 11). The idea of the imputation of righteousness here is made clear by the context. The one who is declared righteous is said to be "un-

godly" (4:5). Hence he is righteous only by God's imputation of righteousness to him. This is also clear from the contrast between imputation according to grace and according to debt (4:4). He who seeks righteousness by works would be justified as a reward for his works, in antithesis to which, imputation according to grace would be the charging one with a righteousness which he does not possess. Accordingly, at the basis of justification there is a reckoning to the sinner of an objective righteousness. This same idea is also implied and asserted by Paul in the parallel which he draws between Adam and Christ (Rom. 5:18f.). The apostle says that just as people are condemned on account of a sin not their own, so they are justified on account of a righteousness which is not their own. The idea of imputed sin and imputed righteousness, as was said, is the precise point of the parallelism between condemnation in Adam and justification in Christ. This is also the idea which underlies the apostle's contrast of the Old and New Covenants (2 Cor. 3:9). The New Covenant is described as a "dispensation of righteousness," and contrasted with the Old Covenant, which is described as a "dispensation of condemnation." If, therefore, this last expression does not denote a subjective condition of people under the old dispensation, but their relation to God as objects of His condemnation, righteousness must denote the opposite of this relation to the law, and must depend on God's judicial acquittal. The same truth is expressed by Paul more concretely by saying that Christ has been "made unto us righteousness from God" (1 Cor. 1:30). Here the concrete mode of expression is chosen because Paul speaks also of Christ being our sanctification and redemption, so that an expression had to be chosen which would cover all of these ideas. One of the clearest statements concerning this objective righteousness is Phil. 3:9. The apostle here affirms that the righteousness which the believer in Christ obtains is directly opposite to his own righteousness. This latter comes from works of the law, whereas the former comes from God and through faith in Christ. It is, therefore, objective to mankind, comes to him from God, is connected with the work of Christ, and is mediated by faith in Christ.

The idea clearly stated in this last passage of a righteousness which is objective to the sinner and which comes to him from God, i.e., the idea of a new legal standing given to the believer by God, explains the meaning, in most cases, of the Pauline phrase "righteousness of God." This phrase is used by Paul nine times: Rom. 1:17; 3:5, 21-26; 10:3 (twice); 2 Cor. 5:21. It denotes the divine attribute of righteousness in Rom. 3:5, 25f. The customary exegesis was to regard the other instances as denoting the righteousness of a sinner that comes to him from God, in accordance with Phil. 3:9. Häring, following Kölbing in general, interpreted all these instances as denoting God's justifying action. But this interpretation is most strained in 2 Cor. 5:21, where we are said to "become the righteousness of God," and in Rom. 10:3-6, where the righteousness of God is identified with the righteousness which comes from faith, this latter being contrasted with a person's own inward righteousness. That a righteousness of man which he receives from God is here referred to, is confirmed by the fact that the reason given for the error of the Jews in seeking a righteousness from law works is the fact that the work of Christ has made an end of this method of obtaining righteousness (Rom. 10:4). This righteousness, therefore, is one of which man is the possessor. The phrase, however, cannot mean a righteousness which is valid in God's sight (Luther), although this thought is elsewhere expressed by Paul (Rom. 3:20; Gal. 3:11). It means a righteousness which comes from God and of which He is the author. This is not, however, by making man inwardly righteous, since all the above passages show the purely objective character of this righteousness. It is the righteousness of Phil. 3:9; the righteousness which God imputes to the believer in Christ. Thus we "become the righteousness of God" in precisely the same sense in which God made Christ to be sin (2 Cor. 5:21). Since Christ was made sin by having the guilt of our sin imputed to Him so that He bore its penalty, Paul must mean that we "become the righteousness of God" in this same objective sense through the imputation to us of the righteousness of Christ. In the same way, in Rom. 10:3, the contrast between God's righteousness and the Jew's righteousness by works of the law shows that in each case righteousness denotes a legal status which comes from God by imputation. It is this same imputed righteousness which makes the gospel the power of God unto salvation (Rom. 1:17), which has been revealed by the law and the prophets, which is received by faith in Christ by whose expiatory death God's retributive righteousness has been made manifest (Rom. 3:21f., 25f.), and which is represented by Peter as the object of Christian faith (2 Pet. 1:1).

In two passages Paul affirms that Abraham believed God and "it was reckoned to him for righteousness" (Rom. 4:3; Gal. 3:6). The old Arminian theologians, and some modern exegetes (H. Cremer) assert that Paul means that Abraham's faith was accepted by God instead of a perfect righteousness as the meritorious ground of his justification. This, however, cannot be the apostle's meaning. It is diametrically opposed to the context where Paul introduces the case of Abraham for the very purpose of proving that he was justified without any merit on his part; it is opposed to Paul's idea of the nature of faith which involves the renunciation of all claim to merit, and is a simple resting on Christ from whom all its saving efficacy is derived; and this interpretation is also opposed to Paul's doctrine of the absolutely gracious character of justification. The apostle in these passages wishes to illustrate from the case of Abraham the gracious character of justification, and quotes the untechnical language of Gen. 15:6. His meaning is simply that Abraham was justified as a believer in God, and not as one who sought righteousness by works. *See* SIN; ATONE; JUSTIFICATION; RECKON.

IMRAH im'ra [Heb. *yimrâ*]. A descendant of Asher (1 Ch. 7:36).

IMRI im'rī [Heb. *'imrî*].

1. A Judahite (1 Ch. 9:4).

Thutmose III offering incense to Amon. Relief from the temple of Hatshepsut at Deir el-Baḥri (early 15th cent. B.C.) (Royal Ontario Museum, Toronto; picture A. C. Myers)

2. Father of Zaccur who helped to rebuild the walls of Jerusalem under Nehemiah (Neh. 3:2).

IN THE LORD [Gk. *en Kyriō*]. A favorite Pauline expression, denoting intimate union and fellowship of the Christian with the Lord Jesus Christ that supplies the basis of all Christian relations and conduct, and the distinctive element that gives the Christian life its specific character. Cf. the synonymous Pauline phrases "in Christ," "in Christ Jesus," and the Johannine expressions "being in Christ," "abiding in Christ." "In the Lord" denotes: (1) the motive, quality, or character of a Christian duty or virtue, as based on union with Christ, e.g., "Free to be married to whom she wishes, only in the Lord" (1 Cor. 7:39), i.e., provided the marriage is consistent with the Christian life (cf. 1 Cor. 15:58; Phil. 3:1; 4:1f., 4, 10; Eph. 6:1, 10; Col. 3:18; etc.); (2) the ground of Christian unity, fellowship, and brotherly salutation, e.g., Rom. 16:2, 8, 22; 1 Cor. 16:19; Col. 4:7; (3) by implication "Christian" (noun or adj.), "as Christians," or "as a Christian," e.g., "Greet those in the Lord who belong to the family of Narcissus" (Rom. 16:13); 1 Cor. 9:1f.; Eph. 6:21 ("faithful minister in the Lord" = faithful Christian minister); Col. 4:17 (see Bauer, rev., pp. 259f.). D. M. EDWARDS

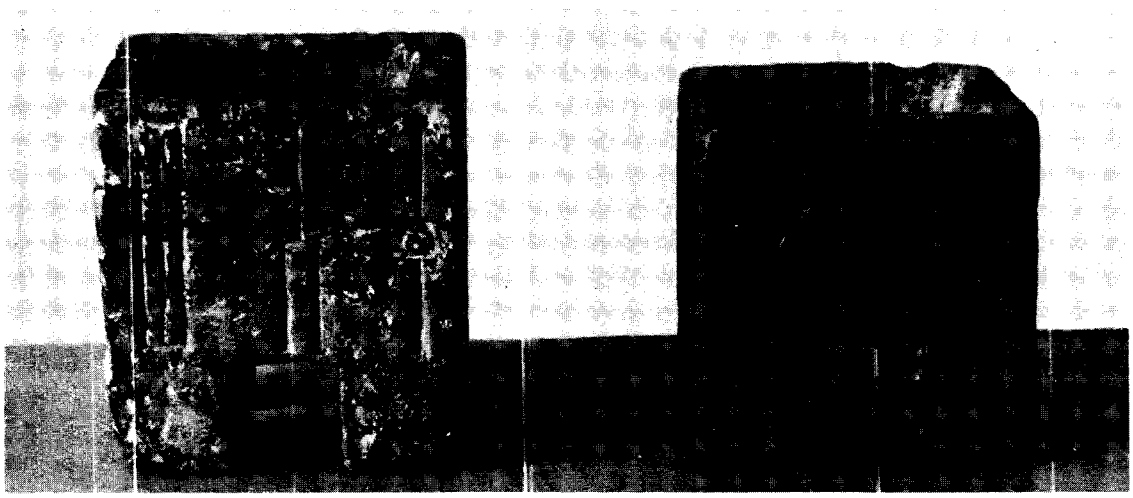
Limestone incense burners (3rd-1st cents. B.C.) with South Arabic inscriptions (University Museum, University of Pennsylvania)



I. In the Ancient Near East.–Egyptian use of incense can be traced back to the 5th Dynasty (2494-2345 B.C.). The Egyptians imported some aromatics from Nubia; others — myrrh, and the still more popular frankincense — came from south Arabia and north Somaliland.

With the establishment of overland trading routes toward the end of the 2nd millennium, south Arabia became the incense land par excellence. The Queen of Sheba brought "spices" (*bᵉśāmîm*) to Solomon (1 K. 10:2, 10); Isa. 60:6 and Jer. 6:20 speak of the frankincense of Sheba; Abraham's Arabian concubine is appropriately named Keturah, "incense" (*qᵉṭûrâ*) in Gen. 25:1-6. Cuneiform sources suggest that the Mesopotamians normally burned aromatic woods (cypress, cedar) rather than incense; yet Herodotus (i.183) claims that "the Chaldeans offer something like two and a half tons of frankincense every year at the festival of Bel." The earliest Greek allusion to incense (frankincense, *libanōtós*) dates from the 6th cent. (Xenophanes 1.7).

The south Arabian states grew rich on the enormous popularity of frankincense and myrrh in the Greco-Roman world (cf. Rev. 18:13). Transportation costs increased the price; G. Van Beek has calculated that in the 1st cent. A.D. frankincense cost the equivalent of $87.50 to $175.00 (1964 values) per pound, depending on its quality. Mt. 2:11 considers frankincense and myrrh, like gold, gifts fit for an infant king.

II. In the Priestly Code.–Most of the biblical passages dealing with incense occur in the priestly stratum (P) of the Pentateuch, which regards it as an important element of the Mosaic cult. Its recipe, in which frankincense is the chief ingredient, is revealed by God Himself (Ex. 30:34-36; cf. 37:29; 1 Ch. 9:30); no secular use may be made of it (vv. 37f.). Conversely, no other compound may be burned upon the incense altar (Ex. 30:9; see below). Incense may be offered only by a descendant of Aaron (Nu. 16:35, 40; cf. 2 Ch. 26:16-21), and only the proper fire may be used for it (presumably, fire from the altar of whole offering; Lev. 10:1f.; cf. 16:12; Nu. 16:46); violation of these restrictions brings the most drastic punishment (Nu. 16:35; cf. 2 Ch. 26:19).

P specifies two fixed incense offerings: (1) the *tāmîḏ* ("perpetual") incense, burned every morning and evening upon the altar of incense (Ex. 30:7f.); (2) the censer offering, performed by the high priest in the holy of holies once every year, on the Day of Atonement (Lev. 16:2, 12f.). We may mention also the burning of frankincense (Heb. *lᵉḇônâ*) with vegetable offerings (Lev. 2:1f., 15f.; 6:15 [MT 8]; 24:7; expressly omitted in Lev. 5:11; Nu. 5:15). Elsewhere, incense is offered *ad hoc*: to test the legitimacy of priestly claimants (Nu. 16:5-7, 16-18); to halt a plague (vv. 46-48); even — if this may be gathered from Lev. 10:1f. — as a spontaneous expression of joy and devotion.

One might suppose that the purpose of the incense was to offer the deity the aromas enjoyed by His worshipers — or, perhaps, to mitigate the stench of the burning sacrifices. But neither assumption finds support in P. Incense is never mentioned in connection with animal sacrifices; P's recurring phrase, "a soothing odor for the Lord" (*rê(a)ḥ nîḥô(a)ḥ lᵉYHWH*), is normally applied to the smoke of animal sacrifice, never to incense. Two passages (Lev. 16:13; cf. v. 2; Nu. 16:46-48) suggest that the cloud of incense smoke serves to protect people from the dangers inherent in contact with the holy.

Exodus 30:1-10 prescribes a gold-plated incense ALTAR to be set up in the tabernacle for the burning of the *tāmîḏ* incense (cf. Lev. 4:7, 18; it is called "the golden altar" in Ex. 40:5, 26). Literary critics argue that the passages referring to the incense altar belong to a secondary stratum of P — note the silence of Ex. 26:35; Lev. 16:11-20. (This *literary* question is not the same as the *historical* question of the existence of such an altar; see below.) In the main stratum, incense is offered in censers (*maḥtâ*, Lev. 16:12; cf. *miqṭereṭ*, Ezk. 8:11), assumed to be in the possession of priests (Lev. 10:1) and laymen (Nu. 16:6, 17, 38); they may have been shaped like coal shovels or even cups. The "dishes for incense" (Ex. 25:29, etc.; Heb. *kap*, lit. "palm"; AV "spoons"; NEB "saucers") seem to have been containers for incense, rather than instruments for burning it (Nu. 7:14, 20, etc.; *see* INCENSE, DISH FOR).

III. In the First Temple.–As the view became widespread that P was the latest of the pentateuchal documents, hardly to be dated before the early second temple period, the history of incense in the Israelite cult underwent a radical revision. From the silence of such passages as Am. 4:4f.; 5:21f.; Isa. 1:11-13; Mic. 6:6f., J. Wellhausen argued that incense was unknown in Israel before the late 7th cent. B.C., when it began to figure in the polemics of Jeremiah (6:20; cf. 41:5) as "a rare and far-fetched offering." Not until after the Exile did it acquire the importance attributed to it by P.

Wellhausen did not deny that nouns and verbs from the root *qṭr* occur frequently in preexilic literature; but he held that they refer to the burning of animal or vegetable offerings, not incense. The first meaning is in fact clear in 1 S. 2:15f.; 1 K. 12:33; 13:1f.; 2 K. 16:13, 15; Ps. 66:15; the second in Am. 4:5; Jer. 33:18; 44:19 (cf. 7:18). We do not find an unambiguous use of *qṭr* for incense before Ezekiel (8:11; 16:18; 23:41; but cf. Prov. 27:9; Cant. 3:6; and the name Keturah). In such important passages as Dt. 33:10; 1 S. 2:28; Isa. 1:13, *qᵉṭōreṭ*/*qᵉṭôrâ* may thus be translated, according to predilection, either "incense" or "smoke of sacrifice." (Wellhausen's "argument from silence" is surely somewhat circular: it requires the assumption that *qᵉṭōreṭ* in Isa. 1:13 refers to animal or vegetable offerings, an assumption which in turn rests on the premise that incense was not a part of the contemporary cult.)

Wellhausen's hypothesis is not without influence today (it evidently underlies the NEB's renderings of *qṭr* — "incense" in the Pentateuch [except Dt. 33:10], Chronicles [sometimes], Ps. 141:2; Isa. 40–66; Ezekiel; but "sacrifice," "offering," etc. in Dt. 33:10; Samuel-Kings, Chronicles [sometimes], Isa. 1–39, Jeremiah, Hosea, Habakkuk, and Malachi), but it is generally out of favor. Most scholars accept the late dating of P (Y. Kaufmann is a notable exception), but do not believe that P's *material* must therefore be late. Indeed, it is hardly likely that incense was a novelty in Jeremiah's time: early Israelite trade with south Arabia is indicated by the story of Solomon and the Queen of Sheba, and confirmed by a south Arabian clay stamp discovered in the ruins of Bethel.

Archeologists have unearthed a number of small, stone altars in Palestine, generally dating from the 8th to the 6th century. The top is square, flat (or with a shallow depression), and often has a "horn" at each corner (cf. Ex. 30:2). *See* pictures in ALTAR; HORNS OF THE ALTAR. On the basis of Nabatean parallels, many scholars identify these altars with the mysterious *ḥammānîm*, which are mentioned disapprovingly in several biblical passages (Lev. 26:30; Ezk. 6:4; etc.; RSV, NEB, "incense altars"; AV "images," "idols"). It is generally agreed that they were used for burning incense. This does not quite prove that incense was part of any official Israelite cult; the objects may have been used for secular incense burning or as part of a pagan (or at least unauthorized) cult — as the biblical condemnation of *ḥammānîm* may indicate. But these discoveries have led scholars to question the view

Side panel of an incense altar from Khirbet et-Tannur SE of the Dead Sea. Winged Tyche holds a palm branch and wreath (E. K. Vogel; picture American Schools of Oriental Research)

that the priestly incense altar is a baseless fabrication, and that the allusions to a gold-plated altar (presumably for incense) standing inside Solomon's temple (1 K. 6:20f.; 7:48; cf. 2 Ch. 26:16, 19) are interpolations based on P. Isa. 6:6 seems to assume an altar *inside* the temple, therefore *not* the altar of whole offering (and cf. the "smoke," v. 4). W. F. Albright has conjectured that Jachin and Boaz, the pillars flanking the entrance to the temple, were gigantic incense burners patterned after Canaanite models.

A letter written by the Jews of Elephantine (408 B.C.) speaks of frankincense (Aram. *lᵉḇônṯâ*) as an element of the temple cult, alongside whole offerings and vegetable offerings; this may reflect preexilic Israelite practice (cf. Jer. 41:5).

IV. In the Second Temple.–Use of incense in the second temple is attested by postexilic writings (Neh. 13:5, 9; 1 Ch. 9:29f.; cf. Isa. 66:3), the Apocrypha (1 Macc. 4:49f.; 2 Macc. 10:3; Song Three 15), and the NT (Lk. 1:8-11). The Mishnah gives vivid and circumstantial descriptions of the *tāmîḏ* incense offering (*Tamid* ii.5; v.2–vi.3), and that of the Day of Atonement (*Yoma* v.1; vii.4). These accounts presumably reflect second temple practice; yet the anachronistic reference to the ark in *Yoma* v.1 (cf. T.B. *Yoma* 52b) suggests that some details may derive from biblical exegesis rather than historical recollection (compare Mish. *Menahoth* xi.5 to Josephus *Ant.* iii.10.7 [255-57]).

Even if Ex. 30:7f. intends that only the high priest may offer the *tāmîḏ* incense, no such provision was in force in NT times. The Mishnah provides that he may perform the ritual whenever he desires but is required to do so only on the Day of Atonement and the seven days preceding it (*Yoma* i.2; iii.4f.; vii.4; cf. Josephus *Ant.* xiii.10.3 [282]). Normally, the office was assigned by lot (Lk. 1:9; *Tamid* v.2; *Yoma* ii.4); it was highly desirable (later rabbis explained that it brought prosperity) and could not be performed more than once by any one priest (T.B. *Yoma* 26a). Stories in Josephus (*Ant.* xiii.10.3 [282]) and the NT (Lk. 1:8-23) suggest that the solitary officiant might be favored with a divine revelation. Both Josephus and Luke (1:10, 21f.) have a crowd of people waiting "outside" for the priest. The Mishnah confirms that the priest must be alone (*Tamid* vi.3; *Kelim* i.9; cf. Lev. 16:17); when the ritual is completed, his fellow priests enter the temple to worship, then emerge and bless the people (*Tamid* vii.1f.).

The censer offering of the Day of Atonement was the focus of a controversy between the Pharisees and the Sadducees: the former held that the high priest must enter the holy of holies before he puts the incense on the coals, the latter the reverse (T.B. *Yoma* 53a). Terrifying stories were told of a high priest who flouted the Pharisaic norm: he was found dead in the temple (according to one version), his face to the ground, the imprint of a calf's foot (Ezk. 1:7) between his shoulders (T.B. *Yoma* 19b; cf. T.P. *Yoma* i.5; *Sukkah* iv.6). The root of the controversy remains obscure; J. Z. Lauterbach suggests that the Sadducees, against the Pharisees, believed that the deity made Himself visible in the holy of holies on the Day of Atonement (Lev. 16:2).

Exodus 30:34 specifies four ingredients for the incense; Josephus (*BJ* v.5.5 [218]) speaks of "thirteen spices from sea and land"; T.B. *Kerithoth* 6a lists eleven major and five minor components, all indispensable (6b). One ingredient, the "smoke-raiser," is said to have been the secret of the Abtinas family, who thereby had a monopoly on incense (*Yoma* iii.11; T.B. *Yoma* 38a; T.P. *Yoma* iii.9; *Shekalim* v.1). The incense was compounded in the temple area, but it was so pungent that (the Mishnah claims) "people could smell it in Jericho. R. Eliezer b. Daglai said, 'When they compounded the incense my father's goats on Mt. Machwar [on the other side of the Jordan] used to sneeze'" (*Tamid* iii.8).

INCENSE ALTAR. *See* INCENSE; ALTAR I.A.2; III.B.

INCENSE, DISH FOR [Heb. *kap*–'palm (of the hand)']. A golden dish or shallow bowl which held incense in the Israelite tabernacle and temple. Heb. *kap* usually denotes

the "hand," or more specifically the "palm." Therefore when this word is used for a vessel of the sanctuary, it suggests a dish (RSV Ex. 25:29; 37:16; etc.) somewhat like a cupped hand and so moderately shallow, or possibly a "spoon" (AV Ex. 25:29; etc.). The use of the word in certain verses (e.g., Ex. 25:29; Nu. 7:14) seems to imply that it was a dish-like container, or perhaps an incense burner, rather than a utensil for pouring. The tabernacle ritual used twelve of these dishes, each weighing ten shekels (Nu. 7:84-86). Solomon had a duplicate set of vessels made for the temple; Nebuchadrezzar later carried this set to Babylon (2 K. 25:14; Jer. 52:18f.).

Suggestive parallels from archeology include the following:

(1) An ornately decorated incense dish in the form of a lion's mouth, having the lower jaw extended as a bowl, was found at Tell Beit Mirsim and is dated about the 8th cent. B.C. It was carved from steatite and had a hollow handle through which air could be gently blown (through a wooden extension) to aid the burning of the incense. Similar objects were found at Megiddo and in northern Syria, some of them having a human hand carved in relief on the bottom, apparently indicating that they were hand held. The problem with interpreting these objects as incense burners is that they do not show convincing evidence of burning. They may have been simply reservoirs of incense, receiving their supply through the hollow tube. One additional example from Megiddo was made of ivory and so could hardly have been for burning incense.

(2) A small zoomorphic libation bowl found at Beth-shemesh had an animal head mounted on the rim, and the long neck of another animal extended into the bowl as a handle. Likewise, at Tell Qasile a cultic bowl in the shape of a bird, dating to the last period of Philistine occupation (11th-10th cents.), was found.

Many other simple bowls with and without handles from various sites and periods may be similar to the biblical *kap*.

INCENTIVE [Gk. *paramýthion agápēs*] (Phil. 2:1); AV COMFORT OF LOVE; NEB LOVING CONSOLATION. *Paramýthion* appears only in Phil. 2:1, although its cognates appear five times elsewhere in the NT (fem. noun, 1 Cor. 14:3; vb., Jn. 11:19, 31; 1 Thess. 2:11; 5:14). The neuter noun suggests the content of "friendly address" and may mean either "consolation" (for what *has* happened; cf. the cognate, Jn. 11:19, 31) or "persuasion" (to what *may* happen; see 1 Thess. 2:11; 5:14).

The translations of Phil. 2:1 reflect these two possibilities. Here Paul based his exhortation to like-mindedness upon four conditional statements. If this verse looks to a future condition, it is appropriate that *paramýthion* be read "incentive" rather than "comfort." Further, the genitive *agápēs* seems to be subjective (rather than qualifying as in the NEB) so that we may understand that love ought to provide incentive to unity, as in the JB: "If love can persuade at all." H. VAN BROEKHOVEN, JR.

INCEST. *See* CRIME.

INCONTINENCY. Used by the AV in 1 Cor. 7:5 for Gk. *akrasía* (RSV "lack of self-control") and in 2 Tim. 3:3 for *akratḗs* (RSV "profligate"). In both references the meaning is a lack of self-control which leads to licentiousness and dissipation.

INCORRUPTION; INCORRUPTIBLE. Used by the AV for Gk. *aphtharsía* (1 Cor. 15:42, 50, 53f.) and *áphthartos* (1 Cor. 9:25; 15:52; 1 Pet. 1:4, 23) in reference to the believer's inheritance and resurrection body. Both words are translated as "imperishable" in the RSV.

See IMMORTAL; IMMORTALITY.

INCREASE [Heb. *rāḇâ* (Gen. 7:17f.; 30:30; Ex. 1:7; Lev. 25:16; Ezk. 23:19; Dnl. 12:4; etc.), *yᵉḇûlâ* (Lev. 26:4; Nu. 32:22; Ps. 85:2 [MT 3]; etc.), *yāsap* (Nu. 32:14; Ps. 115:14; Prov. 1:5; 9:9; Eccl. 1:18; etc.), *tarbîṯ* (Lev. 25:36; Ezk. 18:8, 13, 17; 22:12), *šeger* (Dt. 7:13; 28:4, 18, 51), *nûḇ* (Ps. 62:10 [MT 11]; Ezk. 36:30), *pāraṣ* (1 Ch. 4:38; Job 1:10), *tᵉḇû'â* (Job 31:12), *śāgâ* (Ps. 73:12), *marbîṯ* (1 S. 2:33); Gk. *pleonázō* (Rom. 5:20; 2 Cor. 4:15; 1 Thess. 3:12; etc.), *auxáno* (Jn. 3:30; Acts 6:7; 2 Cor. 9:10; etc.), *prostíthēmi* (Lk. 17:5), *prokóptō* (Lk. 2:52), *endynamóō* (Acts 9:22), *perisseúō* (Acts 16:5), *epathroizō* (Lk. 11:29), *plēthýnō* (Acts 6:1)]; AV also STRENGTHENEDST (Ps. 138:3), MULTITUDE (Eccl. 5:7), MULTIPLIED (Ezk. 23:19; Nah. 3:16; Acts 6:1), ABOUND (Rom. 5:20; Phil. 4:17; 2 Thess. 1:3), REDOUND (2 Cor. 4:15), "gathered thick" (Lk. 11:29); NEB also SWELLED (Gen. 7:17), PROLIFIC (Ex. 1:7), ADDED (Ezr. 10:10; Job 1:10), ENLARGED (Isa. 26:15), PRODUCE (Lev. 26:4, 20), ADVANCED (Lk. 2:52), MULTIPLY (Rom. 5:20), GROW GREATER (Jn. 3:30), "wealth breeds wealth" (Ps. 62:10), "more and more" (Hos. 10:1), "the more . . . the more" (Eccl. 1:18), etc. To grow in number, amount, or stature. The idea of increase is used with physical objects, abstract ideas, and the stature of persons.

The most common use involves physical objects. The increase of water lifted up Noah's ark (Gen. 7:17f.). The Israelites increased in number prior to the pharaoh "who did not know Joseph" (Ex. 1:7f.). Receiving an increase in monetary interest on loans to fellow Israelites was forbidden (Lev. 25:36; Ezk. 18:8, 13, 17; *see* INTEREST). Heb. *yᵉḇûlâ* and *šeger* denote an increase in crops and cattle, respectively (Lev. 26:4; Ezk. 34:7; Dt. 7:13; 28:4, 18, 51). God will increase the population of Israel in the time of restoration (Ezk. 36:37). Absalom attracted increasing numbers of men to his revolt against David (2 S. 15:12).

Material prosperity was often seen to have a spiritual dimension. Thus, the favor of God was necessary for material prosperity: "may the Lord give you increase" (Ps. 115:14), although the wicked sometimes increased their riches with little or no effort (Ps. 73:12). God could destroy material blessings on account of iniquity (Job 31:12). Hosea saw a direct relationship between the physical well-being of Israel and their subsequent decline into apostasy: "The more they increased, the more they sinned against me" (4:7), "The more his fruit increased, the more altars he built" (10:1; cf. Dt. 32:15).

Learning can be increased by the study of proverbs (Prov. 1:5). Knowledge shall increase in "the time of the end" (Dnl. 12:4). The rule of the messianic king will increase to worldwide proportions and endure forever (Isa. 9:7 [MT 6]). The disciples asked Jesus to increase their faith (Lk. 17:5). The sins of men are "increased," i.e., made to look more despicable, by the introduction of the Mosaic law (Rom. 5:20). Those Jews who married foreign wives in Israel after the captivity "increased the guilt of Israel" (Ezr. 10:10).

As a youth, Jesus "increased in wisdom and in stature" (Lk. 2:52). John the Baptist foresaw the rising popularity

of Jesus and the eclipse of his own ministry and exclaimed, "He must increase but I must decrease" (Jn. 3:30). R. J. W.

INDESTRUCTIBLE LIFE [Gk. *zōēs akatalýtou*] (He. 7:16); AV ENDLESS LIFE; NEB "a life that cannot be destroyed." This expression appears only here in the RSV. The author of Hebrews argues that the priesthood of Jesus is superior to that of Aaron, for Jesus is "a priest forever after the order of Melchizedek" (7:17 = Ps. 110:4). Since Melchizedek was not subject to an end of life (7:3), neither was Jesus. R. J. W.

INDIA [Heb. *hōddû*; Gk. *hē Indikē*]. The name occurs in canonical Scripture only in Est. 1:1; 8:9, of the country which marked the eastern boundary of the territory of Ahasuerus. The Hebrew word comes from the name of the Indus, *Hondu*, and denotes, not the peninsula of Hindustan, but the country drained by that great river. This is the meaning also in 1 Esd. 3:2; Ad. Est. 13:1; 16:1. The drivers of the elephants (1 Macc. 6:37) were doubtless natives of this land. The name in 1 Macc. 8:8 is certainly an error. India never formed part of the dominions of Antiochus the Great. It may possibly be a clerical error for "Ionia," as Media is possibly a mistake for Mysia. If the Israelites in early times had no direct relations with India, many characteristic Indian products seem to have found their way into Palestinian markets by way of the Arabian and Syrian trade routes, or by means of the Red Sea fleets (1 K. 10:11, 15; Ezk. 27:15-36; etc.). Among these may be noted "ivory tusks and ebony," "cassia, and calamus," almug (sandalwood), apes, and peacocks. W. EWING

INDIAN DRIVER (1 Macc. 6:37). *See* ELEPHANT; INDIA.

INDICTMENT [Heb. *sēper*] (Job 31:35); AV BOOK; [*rîḇ*] (Jer. 25:31; Hos. 12:2 [MT 3]); AV CONTROVERSY; NEB CHARGE. The term *sēper* refers to a written charge brought against someone. *Rîḇ* refers to a legal case brought by Yahweh against the nations which had offended Him.

INDIGNANT; INDIGNATION [Heb. *zā'am* (Ps. 7:11 [MT 12]; Isa. 66:14; Zec. 1:12), *za'am* (Ps. 38:3 [MT 4]; 69:24 [MT 25]; Isa. 10:25; etc.), hithpael of *'āṣaḇ* (Gen. 34:7), *qāṣar napšô* (Jgs. 10:16; cf. 16:16), *ka'as* (Ps. 85:4 [MT 5]), *zal'āpâ* (Ps. 119:53), *qeṣer gāḏôl* (Jer. 32:37), *qin'â* (Ezk. 23:25), *'eḇrâ* (Hab. 3:8); Gk. *aganaktéō* (Mt. 20:24; 21:15; 26:8; Mk. 10:14, 41; 14:4; etc.), *aganáktēsis* (2 Cor. 7:11), *pyróō* (2 Cor. 11:29)]; AV also ANGRY, ANGER (Ps. 7:11; 38:3), WRATH (Ps. 78:49; Hab. 3:8), JEALOUSY (Ezk. 23:25), GRIEVED (Gen. 34:7; Jgs. 10:16), DISPLEASED (Mt. 21:15; Mk. 10:14; 10:41), BURN (2 Cor. 11:29); NEB also WRATH (Ps. 78:49; 102:10, etc.), ANGER (Isa. 10:25; Mic. 7:9; etc.), JEALOUS WRATH (Ezk. 23:25), FURY (Jer. 10:10), DISPLEASURE (Ps. 85:4), GUSTS OF ANGER (Ps. 119:53), ANGRILY (Mk. 14:4), BLAZE WITH INDIGNATION (2 Cor. 11:29). Emotion of extreme displeasure expressed by God toward people (e.g., Ps. 7:11; Lam. 2:6; Ezk. 21:31; etc.), people toward each other (e.g., Gen. 34:7; Ps. 119:53; Mk. 10:41; etc.), the religious leaders of Judaism toward Jesus (Mt. 21:15; Lk. 13:14), and Jesus toward the disciples (Mk. 10:14). Heb. *za'am* as used in Dnl. 8:19; 11:36 does not refer to an emotion but designates the reprehensible acts of the ruler who is to arise in the last days in Israel (Dnl. 8:11-14, 18-26, etc.).

The Heb. *za'am* is predominant in the OT in depicting God's indignation, which is provoked on account of unrighteousness and iniquity, whether it be that of Israel (Lam. 2:6), the psalmist (Ps. 38:3), or the gentile nations (Jer. 10:10). This word is always reserved for the indignation of God, with the exception of Dnl. 11:30. There the ruler of the last days becomes "enraged" (RSV) against the covenant. *Za'am* is found in the Qumrân scrolls in both the Manual of Discipline (1QS) and the War Scroll (1QM). The word means to curse or to damn: the expression of indignation is depicted. Whoever casts his lot with Belial will be damned (*w'ze'ûm*) to the gloom of eternal fire (1QS 2:7) and Belial himself is "cursed in the dominion of his guilt" (1QM 13:4; cf. 13:1, 5).

Hebrew *zal'āpâ*, "hot indignation" (Ps. 119:53), is a metaphoric usage. The literal use is found in Ps. 11:6 of a burning wind and in Lam. 5:10 of the fever of famished persons. Heb. *qin'â* can also mean jealousy or ardor (cf. Cant. 8:6), hence the NEB translation "jealous wrath" in Ezk. 23:25. In Jgs. 10:16, God's indignation is aroused, not by Israel's iniquities, but by Israel's bondage to the Ammonites. The Heb. *wattiqṣar napšô* literally means "his [God's] soul was shortened." All versions have a more idiomatic translation: "he became indignant" (RSV), "he could endure no longer" (NEB), "his soul was grieved" (AV). The AV translates the Heb. *'im-yišmōr lāneṣaḥ* of Jer. 3:5 literally: "Will he keep it to the end?" The RSV supplies "indignant" on the basis of the immediate context (cf. 3:12): "Will he be indignant to the end?" The NEB paraphrases similarly: "Will he rage eternally?"

The use of *aganaktéō* in the NT remains on the human level of provocations among the disciples (Mt. 20:24; Mk. 10:41), Jesus and the religious leaders of the Jews (Lk. 13:14), and the Corinthians (2 Cor. 7:11). *Pyróō*, always occurring in the passive in the NT and literally meaning to burn up (cf. 2 Pet. 3:12), is used by Paul metaphorically of anger in 2 Cor. 11:29. He also uses the word of sexual desire (1 Cor. 7:9). R. J. W.

INDIGNITIES. *See* PUNISHMENTS IV.

INDITE [Heb. *rāḥaš*]. An archaism of the AV in Ps. 45:1 (MT 2), "My heart is inditing a good matter." Here *rāḥaš* means "be stirred up" (*CHAL*, p. 338), "keep moving, stir" (BDB, p. 935). Thus the excited psalmist pours out praise for the king. The RSV renders, "My heart overflows with a goodly theme," and the NEB, "My heart is stirred up by a noble theme."

INERRANCY. *See* INFALLIBILITY.

INFALLIBILITY. Belief in an infallible, authoritative, reliable Scripture has always been a part of the faith of the Church. Faith, by biblical definition, requires a sure Word of God. The very reality of faith as a sure knowledge and hearty confidence depends upon a Scripture whose truth is certain and unfailing.

While such concepts as infallibility, inerrancy, and reliability have commonly been predicated of the Scriptures, they are theological rather than biblical terms. Because they arose within the Church's theological reflection upon its Scriptures, their validity cannot be deduced from biblical usage. Their validity and justification, therefore, depend on their serviceability in expressing the Bible's own thought about itself. For only what the Bible thinks about itself belongs to the truth of the Bible and to that faith which must be surely believed. Everything else lacks those qualities of infallibility, inerrancy, authority, and trustworthiness that adhere alone in the nature of the Church's sacred writings. The very uniqueness of Holy

Scripture determines that such predications as can properly be attributed to Scripture also have their own unique meaning.

While the term "inerrancy" does not appear in any of the creeds of the Church, the term "infallibility" appears frequently. Those who speak of inerrancy usually mean freedom from any kind of error — scientific, historical, chronological, etc. As used within the Church's credal formulas, infallibility expresses the thought of *unfailing certainty,* and does so especially on two matters. First, it expresses the faith that the Scriptures are unfailingly and certainly true as regards all those matters of doctrine and life that are necessary for mankind's salvation. Second, the gracious saving actions of God that are recorded and interpreted in the Scriptures are confessed to be such actions as will certainly bring the believing sinner to salvation.

This usage of "infallibility" reflects the most distinctive religious motif of Reformation faith. Against the claims the Roman Church made for itself and its tradition, the Reformers confessed that the Scriptures alone are normative and wholly trustworthy since they alone infallibly present all matters of doctrine and life necessary for salvation. Alongside this *sola Scriptura,* the *sola gratia, sola fide* of Reformation thought expressed the Reformation faith in the efficacious and triumphant power of divine grace that alone — and unfailingly — brings sinners to a full and final salvation.

Thus the Canons of Dort employ the term "infallible" in their discussion of God's gift of faith to the elect and declare that God through the gift of faith will "bring them infallibly to salvation" (Second Head, art. 8). The Canons also speak of "the infallible fruits of election" (First Head, art. 12). Describing God's renewal of the sinner, the Canons declare "that all in whose heart God works in this marvelous manner are certainly, infallibly, and effectively regenerated, and do actually believe" (Third and Fourth Heads, art. 12), and the Canons use the term in their rejection of those who deny that believers "infallibly continue in faith" (Fifth Head, Rejection of Errors, para. 9).

This usage of "infallibility" to express certainty concerning the efficacy of God's gracious actions was not, however, peculiar to the Reformers. Thomas Aquinas, discussing the grace of regeneration, declared that although God does not coerce men, they to whom God gives such grace will "infallibly attain" to regeneration (*Summa Theol.* ii/1.112.3).

The term "infallibility" is also frequently applied in Reformation and post-Reformation thought to the Bible. The Belgic Confession speaks of the Bible as "this infallible rule" (art. 7); the Westminster Confession declares that Scripture is the "infallible rule of interpretation of Scripture" (chs. 1, 7); the Confession of the Free-Will Baptists asserts that the Scriptures "are a sufficient and infallible guide in religious faith and practice" (ch. 1); and the Confession of the Evangelical Free Church of Geneva claims that the Scriptures "are the only and infallible Rule of Faith" (art. 1).

Thus the term infallibility was widely used in credal statements to express the deep religious motif that God in His gracious redemptive action and the Bible in its truth are unerringly reliable and certain, a sure foundation for the certain knowledge and hearty confidence of faith.

Does the Bible think of itself in such a way as gives warrant to the predications of infallibility and reliability? Unless this question can be answered affirmatively, these terms lose their validity and serviceability, no matter how desirable it might seem for the Bible to possess such qualities. The task of the Church is not to enhance the Scriptures, even for what might seem the best of reasons. Its task is to listen to the Scriptures and in its theological reflections upon what it hears to echo and confess about Scripture only what Scripture says about itself.

Moreover, if the nature of Scripture by its own claim gives sanction to these theological predications, great care must be taken to ensure that the definitions given these concepts be themselves derived from the Scriptures, and not from common usage or from dictionary definition. The meaning, e.g., of that perspicuity which the Reformers, contra the Roman Church, attributed to the Bible was itself derived from the Bible. Clearly, any definition of perspicuity derived from common usage or a dictionary would never include that biblical understanding of itself reflected in Paul's statement that "now we see through a mirror darkly." If indeed the Bible is infallible in all matters of doctrine and life, it is also its own infallible and unique guide as to the truth of its own nature. We may neither add to nor subtract from the words of the Bible; by the same token we may not add to or subtract from the Bible's teaching about its nature. If it is a basic principle of theology and hermeneutics that the Scriptures must themselves define such biblical concepts as election, grace, faith, justification, and righteousness, it is no less essential that such concepts as we adopt and predicate of the Bible derive their unique definition from the unique character of the Bible. A more expansive procedure would be to bring strange fires to the altar.

That the Scriptures regard themselves as a sure, unfailing, certain, and trustworthy Word of God cannot be doubted. While specific proof texts are of limited number, the Scriptures in their entirety present themselves as the true and, therefore, reliable Word of God. It is true, and it should be recognized, that the Scriptures, for reasons that derive from their very nature as the Word of God, do not indulge in an apologetic effort to demonstrate their reality and truth as God's Word by reference to something other than themselves. The Scriptures no more attempt to prove the existence of God apart from His Word than they attempt to prove the authority, infallibility, and reliability of His Word apart from His Word. For this very reason, the Word of God in the Scriptures presents itself throughout as possessing these qualities without any special, introductory, self-conscious demonstration that it is what it asserts itself to be, namely, the Word of God. It merely speaks in terms of what it is: the Word of God. The Bible has no introductory or prefatory word by which it would commend its peculiar quality to its reader or special texts to prove what the rest of the Bible asserts. When the Scriptures do explicitly and self-consciously urge their certainty, infallibility, authority, and reliability, they do so only to induce acceptance and belief by doubtful and unbelieving sinners. Thus the Word of prophecy is said to be a sure word (2 Pet. 1:19); a word worthy of all acceptance (1 Tim. 1:15, etc.); a word that, unlike all flesh which is grass, abides forever; a word that should induce people to turn from their evil ways to God because it is an efficacious word of the God whose ways and thoughts are not like those of people (Isa. 55:6-9); a word of God that men should not doubt, because it is the word of Him who has built for them a city, because He is not ashamed to be called their God (He. 11:16). Similarly, Jesus urged the infallibility of the Scriptures upon the disputatious Sadducees when He said, "You are wrong, because you know neither the scriptures nor the power of God" (Mt. 22:29).

But for the rest, the Scriptures present the Word of God as being authoritative, infallible, and true just because it is what it is, the Word of God, quite independent of human acknowledgment. God is faithful to His Word, even though Israel is unfaithful; indeed the latter cannot undo

the former, and God's Word is true even though every person is a liar (Rom. 3:3f.). The OT prophet has no higher credential than "Thus saith the Lord." Jesus has need of no higher appeal than "I am the way, and the truth, and the life" (Jn. 14:6). For the Word of God uttered in the Scriptures is the Word by which the world was created, which wrought life from the dead (Rom. 4:17), which caused light to shine out of darkness in creation and to shine in the face of Jesus Christ in redemption (2 Cor. 4:6), the word which both in creation and redemption "calls into existence the things that do not exist" (Rom. 4:17).

This is the nature of the Word of God as it appears in Scripture. It is a Word that carries its authority, truth, and infallibility in its own reality and precisely for this reason can neither itself appeal to something other than itself, namely, to that which it has created and redemptively recreated, nor allow what it has created and recreated (the believer, the Church) to step outside the context of its faith to seek proof of the authority and truth of that in which it believes and to which it owes its own reality.

The limited purpose and the specific scope within which the Bible claims to be infallible, authoritative, a wholly trustworthy object of faith, are clearly indicated by the Scriptures. They declare "that the testimony of the Lord is sure, making wise the simple" (Ps. 19:7 [MT 8]). This wisdom imparted by the Scriptures is that which instructs people for salvation (2 Tim. 3:15), which in its beginnings is the fear of the Lord (Prov. 9:10), and in its fulfillment is the Christ whom God has made to be that wisdom which is for us (1 Cor. 1:30), i.e., which is salvific. Paul tells the church at Rome that the Scriptures were written "for our instruction, that by steadfastness and by the encouragement of the Scriptures we might have hope" (Rom. 15:4). He tells Timothy that "these sacred writings" are indeed "able to instruct you for salvation through faith in Jesus Christ" (2 Tim. 3:15), and are "profitable for teaching, for reproof, for correction and for training in righteousness" (2 Tim. 3:16). Here the specific nature and the limited purpose of the Holy Scriptures are clearly indicated. Jesus says plainly concerning the Scriptures that "these are they which witness of me" (Jn. 5:39); and concerning the writings of Moses, "he wrote of me" (Jn. 5:46). Jesus adds that if the Jews whom He was addressing believed what Moses wrote, they would believe in Him (Jn. 5:47).

The Scriptures clearly indicate that their specific limited purpose, within which their claims of infallibility, authority, and trustworthiness coincide, is to utter that sure Word of God that alone contains all that mankind needs to know about doctrine and life in order to be saved. If the Scriptures were something other and less than this they could not be the sufficient and sure ground for that faith to which they summon people, and which they portray as a sure knowledge and hearty confidence.

The Holy Scriptures meet the test of every claim which they make for themselves. They are infallible, authoritative, and trustworthy in terms of their own stated nature, purpose, and demands. This has always been confessed by the Church. Some claim that the Scriptures are either fallible or infallible, reliable or unreliable, according to the demands of extraneous, extrabiblical norms derived from rationalism, natural science, or modern historiography, that leave no room for the unique truth of Scripture that is above all that mankind knows, and on account of which Scripture employs symbol, image, parable, poetry, and its own peculiar kind of historical writing. But these people import human notions into the Word of God. Nor is the importation any less real when done by those whose intentions are on the side of the sacred Scriptures but who nonetheless surrender to speculative rationalism and modern science the right to dictate the nature of biblical infallibility, authority, and trustworthiness, and who thus forfeit the true certainty and supreme authority of Scripture in their very attempt to establish it.

The great need of the Church today is not to try to prove an infallibility extraneously defined. It is to learn from the Bible, as a real norm, what the Bible has to say about its own infallibility. It is to take this infallibility seriously from the very outset, so that Scripture is indeed the infallible basis of a faith that is not an uncertain grasping at straws of human verification, but a sure and unquestioned knowledge.

Scripture as God's own word attests to its own truthfulness within our hearts through the function of the Holy Spirit, for as Paul says, the ministry of the Word is itself a "ministration of the Spirit" (2 Cor. 3:8). *See* HOLY SPIRIT: HISTORY OF THE DOCTRINE V.A. J. DAANE

INFANCY, GOSPEL OF THE. *See* APOCRYPHAL GOSPELS II.

INFANT BAPTISM. *See* BAPTISM.

INFANTICIDE. *See* CRIME.

INFIDEL. The AV uses this word twice to translate Gk. *ápistos*, "unbelieving": "What part hath he that believeth with an infidel?" (2 Cor. 6:15); "If any provide not for his own, [he] . . . is worse than an infidel" (1 Tim. 5:8). In both passages the RSV has "unbeliever" in harmony with numerous other instances of *ápistos* in the NT. The word nowhere corresponds to the modern conception of an infidel as one who denies the existence of God or repudiates the Christian faith, but always signifies one who has not become a believer in Christ. It was formerly so used in English, and some of the older versions have it in other passages besides these two.

W. O. CARVER

INFINITE in'fə-nət. The word "infinite" does not occur in the RSV. The AV uses it only three times: Ps. 147:5, "his understanding is infinite" (Heb. *'ên mispār*, lit. "no number"; RSV "beyond measure"; NEB "beyond all telling"); Job 22:5, "[are not] thine iniquities infinite?" (Heb. *'ên-kēṣ*, lit. "no end"; RSV "no end to"; NEB "passes all bounds"); Nah. 3:9, the strength of Ethiopia and Egypt is "infinite" (Heb. *'ên qēṣeh*, lit. "no end"; RSV "without limit"; NEB "boundless"). The RV retains "infinite" in Nah. 3:9 and Ps. 147:5. Both the AV and the RV apply "infinite" to God in Ps. 147:5.

The Hebrew OT and the LXX do not contain the word "infinite," but Scripture does employ the concept. Concerning God, we read that His years have "no end" (Ps. 102:27 [MT 28]), that we cannot find out "the limit [Heb. *taklît*–'completeness,' 'end'] of the Almighty" (Job 11:7), and that there is no end to His promises (Ps. 77:8 [MT 9]). In sharp distinction, man has an end (Ps. 90:9; Job 32:22), even his boasting (2 Cor. 10:13, 15).

The Bible teaches that people by virtue of their creation in the *imago Dei* have within their minds the idea of infinity. Without this ability, the human mind could have no idea of God. Indeed, it is the inclusion of the idea of infinity that makes it difficult for the human mind to conceive of a finite space-time universe beyond which is nothing. Because the human mind can exhaustively comprehend neither finitude nor infinity, it tends to define each in reference to the other.

As stated above, the Bible at times conveys the idea of infinity by "no end" and "no number," for "end" and "number" are expressions of limitation. Infinity is defined as that which is not finite.

Such thought and expression is unavoidable; indeed, it has biblical precedence. Yet care should be observed so as not to confuse infinity with quantity. God's infinity is a matter of quality, not quantity.

God's infinity, which applies to all His perfections, means that God's perfect omniscience conveys, not merely that God knows all that can be known, but that nothing can exist beyond the reach of His knowing. Similarly God's omnipotence is not an infinite quantity of power but that potentiality of God to accomplish without limit everything that is possible for power to accomplish. A quantity cannot be infinite, for it is subject to limits and boundaries, to measurement and enumeration. All God's perfections have the quality of infinitude and, therefore, none of His perfections is subject to any form of measurement or limitation.

The infinity of God must be "defined" and understood, as best we can, in terms of God Himself, and not in terms of those created realities that are not God. God's infinity is not comprised or constituted by the finitude of the created universe. Being circumscribed by His own internal qualities, God's infinity is not limited by any aspect of the finite creation — neither by mankind's logical, conceptual thought as rationalism is prone to forget, nor by mankind's free will as Arminian theology tends to ignore. The finite cannot contain or delimit the infinite.

God can become human without in any sense qualifying His own infinitude. In the shorthand of theology, God became man in Jesus Christ without in any sense ceasing to be God. In the mystery of the Incarnation, God can in Jesus Christ enter into finite time and space and thus subject Himself to the finitude of His own creation. He is born at a specific place and time (Lk. 2:4-7) and at no point in time or space ceases to be the infinite Lord of time and space and of all things in them. Hence, God in Christ at the moments of His greatest weakness can assert His infinite lordship. When about to be seized by Judas and the mob, He speaks and His enemies fall backward upon the ground (Jn. 18:6), and on the cross, in the moment of death, Christ Himself commends His spirit into the hands of His Father (Lk. 23:46).

Only God is infinite; infinity is a divine quality. It must therefore not be defined with reference to finitude, which is a quantity, as though infinity were an infinite amount of finitude. In biblical thought the question is not whether the infinite can tolerate or allow, or have room for the finite, for one can no more comprehend creation than that other truth which one can know but not comprehend — the infinity of God. Nor is it a question, in biblical thought, whether the infinite can become finite, for God can, according to Scripture, become man, exist in time and space, as He does in Christ, precisely because God is the infinite who creates the finite and therefore is not subject to it, but can in it remain infinite. The life of Christ on earth reflects that enduring insistence of the Church that God can become man and be numbered among them, without ceasing to be God. That is the revelation of infinity.

J. DAANE

INFIRMITY. *See* DISEASE.

INFLAME [Heb. *dālaq*–'kindle' (hiphil, Isa. 5:11); *hāmam*–'be hot' (Jer. 51:39)]; AV "in their heat," NEB "to end in fever." Both terms are used figuratively, although the precise sense is disputed in each text because of enigmatic contexts. The former may speak of the desire or passion often accompanying drunkenness, or of the consuming effects of such drunkenness. The latter might refer to anger (cf. v. 38) or to appetite (see comms.).

INFLAMMATION [Heb. *dalleqet*; Gk. *rhígos*]; NEB AGUE. Occurs only in Dt. 28:22 and was considered by Jewish writers as "burning fever," by the LXX as a form of ague. Both this and typhoid fever are now, and probably were, among the commonest of the diseases of Palestine. *See* DISEASE III.H. In Lev. 13:28 AV has "inflammation" as the rendering of Heb. *ṣāreḇeṯ*, where the LXX has Gk. *charaktér*, and for which the proper English equivalent is "scar," as in the RSV and NEB.

INFLUENCES (Job 38:31, AV). *See* CHAIN.

INGATHERING, FEAST OF. *See* BOOTHS, FEAST OF.

INHABIT [Heb. *yāšaḇ*, *šāḵan*; Gk. *katoikéō*]; AV also DWELL, REMAIN (Jer. 17:25), SETTLE (hiphil of *yāšaḇ*, Ezk. 36:11); NEB also LIVE, DWELL, MAKE POPULOUS (hiphil of *yāšaḇ*, Ezk. 36:11), LIE; **INHABITANT** [Heb. part. *yōšēḇ*, *šāḵēn*; Aram. construct part. of *dûr* (*Q* Dnl. 4:35 [MT 32]); Gk. part. *katoikṓn*]; NEB also NATIVE, CITIZEN, TOWNSMAN, PEOPLE.

The Hebrew term most frequently rendered "inhabit" by the RSV is *yāšaḇ*, which elsewhere in the OT has the meanings "sit" (e.g., Gen. 18:1) and "remain" (e.g., Gen. 24:55). Six times the term *šāḵan* is rendered "inhabit" (Job 26:5; Prov. 2:21; Isa. 33:24; 57:15; Jer. 46:26; Hos. 10:5), while elsewhere it may mean "remain" (Jgs. 5:17; Prov. 7:11). Both uses of "inhabitants" in Dnl. 4:35 render Aram. *dāyᵉrê* (< *dûr*). In the NT the Gk. *katoikṓn*, which frequently renders *yāšaḇ* and *šāḵan* in the LXX, is rendered "inhabitant" three times (Acts 1:19; 4:16; 13:12). There appears to be no appreciable semantic difference among these terms in the passages where they are rendered "inhabit(ant)." *See* DWELL; HABITATION.

J. E. H.

INHERIT [Heb. *nāḥal*] (Ex. 32:13; Nu. 26:55; Jer. 12:14; etc.); NEB also POSSESS, PATRIMONY, POSSESSION, etc.; [*yāraš*] (Lev. 20:24; Dt. 16:20; Isa. 65:9; etc.); AV also POSSESS; NEB POSSESSION, OCCUPY, HEIR, POSSESS; [ʾᵃḥuzzâ] (Lev. 27:28); AV POSSESSION; NEB ANCESTRAL; [*naḥᵃlâ*] (Prov. 19:14); AV INHERITANCE; NEB "come down"; [Gk. *klēronoméō*] (Mt. 5:5; Mk. 10:17; 1 Cor. 6:9; etc.); AV also BE HEIR; NEB also GAIN, WIN, CLAIM, etc.; [*klēronómos*] (Rom. 4:13); AV BE HEIR; NEB INHERITANCE; [*patroparádotos*] (1 Pet. 1:18); AV RECEIVED; NEB BOUGHT; **INHERITANCE** [Heb. *naḥᵃlâ*] (Gen. 31:14; Nu. 16:14; Josh. 11:23; etc.); AV also HERITAGE; NEB also PATRIMONY, POSSESSION, PROPERTY, DOMAIN, etc.; [*nāḥal*] (Ex. 34:9; 1 Ch. 28:8; Prov. 13:22; etc.); AV, NEB, also POSSESSION; [ʾᵃḥuzzâ] (Lev. 27:16, 22, 24); AV also POSSESSION; NEB LAND, PATRIMONY; [*gôrāl*] (Nu. 26:56); AV LOT; NEB LAND; [*yᵉruššâ*] (Jgs. 21:17); NEB HEIRS; [*yāraš*] (Ezr. 9:12); NEB POSSESSION; [Gk. *klēronomía*] (Mt. 21:38; Acts 20:32; Col. 3:24; etc.); NEB also PROPERTY, HERITAGE, SHARE; [*kataklēronoméō*] (Acts 13:19); AV LOT; NEB HERITAGE; [*klḗros*] (Col. 1:12); NEB HERITAGE; **INHERITOR** [Heb. *yāraš*] (Isa. 65:9); NEB HEIR.

The concept of "inheritance" played an important role for the Israelites. The chief terms used are the verb *nāḥal*

and the noun *naḥ^{a}lâ*. In their widest application these terms refer not only to an estate received by a child from his parents but also the the land received by the children of Israel as a gift from Yahweh.

This latter theological use of "inheritance" has its beginnings in the promise God made to Abraham when he entered the land of Canaan. In Gen. 12:7 God said, "To your descendants I will give this land." This promise was passed down through Abraham's descendants and reaffirmed to Moses: "I will bring you into the land which I swore to give to Abraham, to Isaac, and to Jacob; I will give it to you for a possession. I am the Lord" (Ex. 6:8; cf. 3:7f.; 32:13; *TDNT*, III, 770). In Deuteronomy Moses repeatedly reminds the people of the promise of the land as made to Abraham, always with the recognition that the land is Yahweh's and that He is giving it to His people (Dt. 4:21,38; 12:9; 15:4; 19:10; etc.; see *TDNT*, III, 769-776).

With the entrance of Israel into Canaan after Moses' death, a new focus comes into view. As the nation holds the entire land as an inheritance, so it is now distributed among the people for an inheritance (see Nu. 32:18f.; 34:14-18; 36:2-12; etc.). Here again, as throughout the OT, a clear distinction is made between real and personal property, the fundamental idea regarding the former being that the land is Yahweh's, and the people hold it as an "inheritance" only through His favor — not by right; therefore the Israelites are still called "strangers and sojourners" in the land, and the portion allotted to them could not be sold into perpetuity (Lev. 25:23-28). The terms *nāḥal* and *naḥ^{a}lâ* are used most frequently in this sense, to denote the possession of a portion of the land by a tribe or family.

Joshua was the one chosen by Yahweh to lead the people into the land (Josh. 1:1f.), and when with God's help the land had been successfully taken, Joshua was commanded to apportion the land (13:7). This was done by casting lots to determine the specific piece of land to be owned by each family head (18:6; cf. Nu. 26:53-56; 33:54).

Israel's social legislation was designed to protect a family's inheritance. In case, through necessity of circumstances, a homestead was sold, the title could pass only temporarily; for in the year of Jubilee every homestead had to return again to the original owner or heir (Lev. 25:25-34). Priests were to receive no inheritance (Ezk. 44:28). Real estate given to the priesthood had to be appraised and could be redeemed by the payment of the appraised valuation, thus preventing the transfer of real property even in this case (Lev. 27:14-25). A father's possessions were all to be passed on to his sons (Prov. 13:22; Lev. 25:46), who had preeminent rights (though Job's three daughters shared the inheritance with their brothers [42:15]). The right to inheritance was not affected by the status of the mother, and "a slave who acts wisely will rule over a son who acts shamefully" (Prov. 17:2). A father's firstborn son received a "double portion of all that he has," twice as much as was given to the other sons (Dt. 21:15-17). If there were no sons but only daughters, the inheritance went to them. If there were neither sons nor daughters, a man's possessions would go to his brothers, and if he had no brothers, they would go to his father's brothers. if his father had no brothers the possessions would go to his next of kin (Nu. 27:1-11). In order to keep the inheritance from going to another tribe, daughters were prohibited from marrying outside the tribe of their father (Nu. 36:6-9).

Naboth's vineyard (1 K. 21:1, 3) was a part of his family's inheritance; thus, he was right in refusing to sell the property. Ahab's illegal seizure of the vineyard was severely condemned by Elijah and brought grievous punishment upon the family of Ahab (vv. 20-24). The prophet Micah later warns that the Lord will devise evil against those who "covet fields, and seize them; and houses, and take them away; they oppress . . . a man and his inheritance" (2:2).

The psalmist found comfort in the thought that God remembers His covenant promise for inheritance (105:11). The land is called the inheritance of God in Ps. 79:1, but in 69:36 (MT 37) it is the inheritance of Israel over which God had set David as shepherd (78:71).

The prophet Jeremiah speaks of Israel as "the tribe of his [Yahweh's] inheritance" (10:16). He cries that the people have polluted the land with idols and "have filled my [Yahweh's] inheritance with their abominations" (16:18), so Yahweh has forsaken His house and given up His heritage to its enemies (12:7-10). In Ezekiel, however, comes the promise that after the Exile the land will be resettled and inhabited as an "inheritance" forever (36:12). As in the days of Joshua, the land will again be divided and each will receive his inheritance by lot (Ezk. 47:13f.; 48:29; etc.), a prince being allowed neither to take inheritance away from the people nor to give away any of his own (46:16-18).

In the NT inheritance as the ordinary transmission of property from father to son is found in the parables of Jesus (Mt. 21:38; Mk. 12:1-8; Lk. 15:11-13; cf. Lk. 12:13; 20:14). In these instances sonship is firmly linked with inheritance, reflecting the common Greek and Oriental view. But the NT also uses the verb *klēronoméō* and noun *klēronomía* in a theological sense as an eschatological concept. In such cases these terms refer to the kingdom of God (see Lk. 10:25; 18:18) as the inheritance now to be claimed by the heirs, the sons of God (Mt. 19:29; 25:34; Mk. 10:17; 1 Cor. 6:9ff.). This sonship is based "not . . . on physical descent . . . but on the divine call and appointment" (*TDNT*, III, 782; see 1 Cor. 15:50). Christ as Son is heir, and His people set in sonship are *synklēronómoi* ("fellow heirs," Rom. 8:17). While the "inheritance" of the kingdom (Gal. 5:21; Eph. 5:5) is eschatological (Eph. 1:14,18; Col. 3:24) and imperishable (1 Pet. 1:4), the promise to the meek of inheriting the *earth* (Mt. 5:5) gives it also a distinctly this-worldly element.

This metaphor of inheritance used by Christ (here from Ps. 37:11; cf. 1 En. 5:7; Ps. Sol. 14:5), "speaks of the meek and their ultimate prosperity in this life and triumph over the wicked" (McNeile, p. 51). Similar is 1QM 11:7-18: the *kittîyîm* are defeated by the Messiah and become His inheritance. He vindicates the poor. This idea has its roots in the promise to Abraham and his descendants (cf. Acts 13:19). Paul faces the question of who now are the true descendants (Gk. *spérma*) of Abraham, in light of the Judaizer concept that the sons of Abraham were the physical descendants who kept the law. Paul declares that the promise of inheritance to Abraham and his descendants "did not come through the law but through the righteousness of faith" (Rom. 4:13; Gal. 3:18; cf. 4:30). This promise was fulfilled with the coming of Christ as Messiah; to His sons now go the promised blessings (Col. 1:12; *klēros*, meaning "lot" or "portion," is used in the LXX for Heb. *gôrāl, yâraš*, and *naḥ^{a}lâ* in the apportioning of the land of Canaan; see *TDNT*, III, 759; cf. Acts 20:32).

In He. 12:17 the ordinary, father-to-son type of inheritance is mentioned in reference to Esau, who "desired to inherit the blessing" but was rejected. Generally, though, in the book of Hebrews "inheritance" is linked with the content of the OT promise to Abraham (9:15), who went out "not knowing where he was to go" (11:8); and it is that same "faith and patience" which Christians now are exhorted to have, that they may "imitate" those who

"through faith and patience inherit the promises" (6:12).

D. K. MCKIM

INIQUITY [Heb. *'āwôn*]; AV also PUNISHMENT (Gen. 4:13), MISCHIEF (2 K. 7:9), etc.; NEB also PUNISHMENT, RESPONSIBILITY, GUILT, PENALTY OF GUILT, etc.; [*'āwen*]; AV also WICKEDNESS (Job 11:11); NEB also MISCHIEF, TROUBLE, WRONG (Ps. 119:133), etc.; [*'āwâ*]; NEB DOES WRONG (2 S. 7:14), HAVE ERRED (Ps. 106:6), DEEP IN THEIR SIN (Jer. 9:5 [MT 4]); [*'āwel,* fem. *'awlâ*]; NEB also WRONG, EVIL (Job 15:16), EVIL WAYS (Ezk. 18:26, twice), LOATHSOME (Ps. 53:1), INJUSTICE (Ezk. 18:8), FRAUD (Hab. 2:12), MISCHIEF (Hos. 10:13); [Gk. *anomía*]; AV also UNRIGHTEOUSNESS (2 Cor. 6:14); NEB LAWLESS DEEDS (Rom. 4:7), CRIME (Mt. 23:28), LAWLESSNESS (Rom. 6:19), WICKEDNESS (2 Cor. 6:14, Tit. 2:14); [*adikía*]: NEB WICKED DEEDS (He. 8:12), WICKED WAYS (Lk. 13:27), SIN (Acts 8:23), WICKEDNESS (2 Tim. 2:19); [*adíkēma*]; NEB CRIMES (Rev. 18:5). A variety of connotations is conveyed by these words.

In the OT, the term *'āwôn* occurs more frequently (over 200 times) than any other Hebrew word translated "iniquity." It conveys three ideas: (1) the iniquitous act itself; (2) the guilt accompanying the act; (3) the punishment for the act. These ideas are so closely related that they are not always clearly distinguishable, hence the differences in translation. In Job 7:21 the RSV has "Why dost thou not pardon my transgression and take away my iniquity?" (NEB "guilt"); in Isa. 53:11 the RSV has "he shall bear their iniquities" (NEB "penalty of their guilt"). A frequently occurring expression is *nāśā' 'āwón.* The AV and RSV translate as "bear iniquity" while the NEB usually has "accept responsibility." It may have moral or theological implications as in Lev. 5:17 where it refers to sins of omission. Or it may refer to the breaking of ritual laws as in Lev. 17:16 where the washing of clothes and body are necessary after being mauled by wild animals or eating an animal which died a natural death.

Several times the OT refers to God as "visiting the iniquity (*'āwôn*) of the fathers upon the children and the children's children to the third and fourth generation" (Ex. 34:7; cf. 20:5; etc.). It is extremely difficult for the modern western mind to accept the fact that God would punish children for the iniquity of their ancestors. The solution is to be found in differing conceptions of the basic unit in society. In the modern West the emphasis is on the individual and individual accountability, while in ancient Israel the emphasis was on the group or the community. This concept of "corporate solidarity" was reflected in an unbroken genealogical relationship of families (witness all the genealogies in the OT), and in the idea that God punished children for the deeds of their ancestors or blessed them for the righteousness of their ancestors (Gen. 17:6-8). (Cf. R. Shedd, *Man in Community* [1964], pp. 3-41.)

The Heb. *'āwôn* occurs in several passages that are difficult to interpret. In 1 S. 3:13, punishment is predicted for Eli's house "for the iniquity which he knew, because his sons were blaspheming God" (RSV) or "because he knew of his sons' blasphemies against God" (NEB). The NEB translation has omitted "for the iniquity" (or "in guilt") although the resulting translation achieves the sense of the passage very well. In Ps. 36:2 (MT 3) the RSV reads "that his iniquity cannot be found out and hated," while the NEB considers the Hebrew unintelligible and translates "when he is found out he does not mend his ways." In Ps. 106:43 the NEB deletes the last phrase "and were brought low through their iniquity" without justification. In Ezk. 18:17 the RSV follows the Greek in reading "(withholds his hand from) iniquity" where the Hebrew reads "the poor." The NEB translates "he shuns injustice."

The verb *'āwâ* is translated "commit iniquity" on three occasions (2 S. 7:14; Ps. 106:6; Jer. 9:5). It also has the idea of "do wrong" as reflected in the NEB translations.

The nouns *'āwel* (masc.) and *'awlâ* (fem.) convey the idea of "injustice" or "unrighteousness." The masculine form is used frequently in Ezekiel; it often occurs with the verb *'āśâ* to mean "commit iniquity" (RSV) or "do wrong" (NEB), e.g., Ezk. 33:13. In Ezk. 18:8 *'āwel* occurs in an extensive list of things which do not characterize the righteous person. Similarly God is not characterized by *'āwel* but by *'ĕmûnâ,* "faithfulness." Job 36:33 is variously translated because of the difficulties. The MT has *'ôleh,* literally "one who rises," AV "vapor," RSV "iniquity," NEB "in his anger he calls up the tempest, and thunder is the herald of its coming" (cf. M. Pope, *Job* [*AB,* 3rd ed. 1973], pp. 276f.).

Another term, *'āwen,* is translated "iniquity" most of the time by the AV, only some of the time by the RSV, and almost never by the NEB. It means "trouble, sorrow, wickedness" as is reflected in the NEB translations. The usage of the term is concentrated in Job, Psalms, Proverbs, and Isaiah, never appearing in legal portions of the OT and rarely in narrative texts (1 S. 15:23). The expression *pō'ălê 'āwen* (RSV, AV "workers of iniquity," NEB "wrongdoers, evildoers") is frequent. It refers to evildoers in both the political (Isa. 31:2) and moral spheres (Job 31:3). In 1 S. 15:23 the NEB emends the first half to read "Defiance of him is sinful as witchcraft, yielding to men as evil as idolatry." Although the precise meaning is debated, the RSV translation is preferable: "For rebellion is as the sin of divination, and stubbornness is as iniquity and idolatry." Another difficult passage is the first part of Hos. 12:11 where NEB takes *'āwen* to refer to idolatry (RSV and AV "iniquity"). It is more likely in the light of Hos. 6:8 that bloody transgressions characterize Gilead, and therefore "iniquity" is the correct translation. (See H. W. Wolff, *Hosea* [Eng. tr., *Hermeneia,* 1974], p. 215.) In Ps. 141:4 the NEB unnecessarily emends to "the evildoers appal me." The RSV translation makes very good sense, however: "in company with men who work iniquity."

In the NT, three Greek terms are translated "iniquity." The first, *anomía,* means "lawlessness," either as a frame of mind (Mt. 23:28) or the lawless deeds themselves (Rom. 4:7). It is also most frequently used in the LXX to translate *'āwôn.* The second term, *adikía,* means "unrighteousness" (Lk. 13:27) or misdeeds (He. 8:12). The third term, *adíkēma,* refers to the crimes of Babylon in Rev. 18:5 where it is parallel to *hamartía,* "sin."

INJURIOUS. *See* INSULT.

INJURY. *See* CRIME.

INK [Heb. *dᵉyô,* from a root meaning "slowly flowing" (see BDB, p. 188); Gk. *mélan*–'black']. Any fluid sub-

stance used with pen or brush to form written characters. In this sense ink is mentioned once in the OT (Jer. 36:18) and three times in the NT (2 Cor. 3:3; 2 Jn. 12; 3 Jn. 13), and it is implied in all references to writing on papyrus or leather. Hebrew ink was a fluid made from lampblack or soot mixed with gum arabic or gum acacia to form a nonmetallic writing mixture. It could be washed off (cf. Ex. 32:33; Nu. 5:23). A red metallic ink was made by replacing the soot or lampblack with a red ocher or iron oxide. The Dead Sea Scrolls show that both types of ink were in use in Palestine in the pre-Christian period. Egyptian scribes wrote with moistened pens dipped on pellets of dried ink; this practice may also have been followed in Palestine as early as the preexilic period. The Samarian ostraca and the Lachish Letters provide specimens of writing in ink from the times of Ahab (873-853 B.C.) and Zedekiah (597-587 B.C.), respectively. When the scriptorium at Qumrân was excavated (*see* DEAD SEA SCROLLS), inkwells were recovered containing dried flakes of the ink in which some of the scrolls had actually been written.

INK-HORN. *See* WRITING CASE.

INLAY [Heb. *qaršēḳ ʿāśû-šēn*] ("made your deck . . . inlaid with ivory," Ezk. 27:6); AV "have made thy benches of ivory"; NEB "made your deck strong." The RSV has seen the verse as referring to ivory inlays, which have been used decoratively in the Near East from Sumerian times. *See also* IVORY.

INMOST SELF (Rom. 7:22). *See* INNER MAN.

INN; LODGE; LODGING PLACE [Heb. *mālôn*–'night resting place,' *mᵉlûnâ* < *lûn*–'pass the night'; Gk. *katályma, pandocheíon, xenía*].

Among the Semitic people of ancient times, as among Arabs today, hospitality to strangers was a recognized duty. The ordinary traveler would be cared for in private homes (houses or tents). The Heb. *mālôn* might be applied to any spot where caravans (Gen. 42:27; 43:21), individuals (Ex. 4:24; Jer. 9:2), or even armies (Josh. 4:3, 8; 2 K. 19:23; Isa. 10:29) encamped for the night (cf. NEB). The slightly altered form *mᵉlûnâ* is used of a night watchman's lodge in a garden (Isa. 1:8; in 24:20 RSV has "hut," AV "cottage"). The word *mālôn* in itself does not imply the presence of any building, and in the case of caravans and travelers was doubtless originally, as very often at the present day, only a convenient level bit of ground near a spring, where baggage might be unloaded and animals watered and tethered, and where people could sleep on the bare ground.

In NT times the case was quite different, due to the influence of Greek and Roman culture and the wide travel that went with it. The Gk. *katályma* comes from the verb *katalýō*, which literally means "unloose" or "unyoke." Hence the noun suggests a stopping place for travelers, where the horses are unharnessed or unsaddled, and baggage is unpacked.

Generally speaking, inns had a bad reputation. In Mish. *Yebamoth* xvi.7, the word of an innkeeper was doubted, and Mish. *Abodah Zarah* ii.1 places them lowest on the scale of degradation. The NT specifically mentions Rahab as "the harlot" (He. 11:31; Jas. 2:25). The Tg. designates her an "innkeeper," and Rashi translates *zōnâ* as "a seller of kinds of food." Kimchi, however, accepts both meanings. This ill repute of public inns, together with the Semitic spirit of hospitality, led the Jews and the early Christians to recommend the keeping of open house for the benefit of strangers. In the Jewish Morning Prayers, even to this day, such action is linked with great promises, and the NT repeatedly commends hospitality (He. 13:2; 1 Pet. 4:9; 3 Jn. 5); both the Talmud (T.B. *Shabbath* 127a) and the NT (He. 13:2) cite the same passage (Gen. 18:3) in recommending it.

The Gk. *katályma* is used in Mk. 14:14 and Lk. 22:11 for the "guest chamber" in a private home where Jesus and His disciples ate the Last Supper. This circumstance raises the question of the term's significance in its only other occurrence in the NT (Lk. 2:7). Was the "inn" at Bethlehem, where Joseph and Mary sought a night's lodging, an upper guest room in a private home or some kind of public place for travelers? The question cannot be answered with certainty. It is thought by some that it may have been a guest chamber provided by the community. We know that visitors to the annual feasts in Jerusalem

were entertained in the guest rooms of private homes (*Aboth de Rabbi Nathan* 34). It may be that Joseph and Mary hoped to be received into the home of some relative in Bethlehem, but found the guest chamber already taken, and so had to sleep in the stable. Dalman thinks the "inn" may have been a guest room in a private home (cf. NEB "house") — but without adequate privacy for the birth of a baby — or a more public place of hospitality provided by the villagers (*SSW*, pp. 41-44).

A different word is used for "inn" in Lk. 10:34. Here it is Gk. *pandocheíon*, which rather clearly means a public khan or caravanserai. It was a place where a wounded traveler could be taken care of for the night. Not only rooms, but food for man and beast were evidently provided. It would seem that there was a set charge for these, or at least a payment was expected. The present Good Samaritan Inn, located about halfway between Jerusalem and Jericho (just off the new Jericho Road), marks the traditional site of the inn of Jesus' parable. The place is now used for a police post. At the back of the building, with its high arched door, is a spacious courtyard surrounded by a wall. In the center of the courtyard is a well. Parts of the back wall are made of immense stones which may well go back to Roman times. It is probable that Khan Hathrur, as it is called, is on the same site as the inn of Jesus' day. By a strange coincidence, the Mishnah (*Yebamoth* xvi.7) states that some Levites going along the Jericho Road left a sick companion at an inn in the care of an innkeeper — very possibly the same place.

Greek *xenía* occurs in Acts 28:23 as the word for Paul's quarters in Rome, when he was under house arrest. For AV "into his lodging" and RSV "at his lodging," the NEB has "as his guests." The same word occurs in Philem. 22, where the AV has "lodging," the RSV "guest room," and the NEB "room," and in Sir. 29:27. Usage of the word outside the NT points more in the direction of "hospitality" than of a place of lodging.

R. EARLE

INNER MAN; INNER NATURE; INMOST SELF [Gk. *ho ésō ánthrōpos*]. An expression used by Paul (Rom. 7:22; 2 Cor. 4:16; Eph. 3:16) for the true self in contrast with the "outward self" (*ho éxō ánthrōpos*, 2 Cor. 4:16) that is visible to others, and the outward "members" that are subject to the law of sin (Rom. 7:23). It corresponds to the "hidden person of the heart" (*ho kryptós tḗs kardías ánthrōpos*) spoken of by Peter as that part of a person that is visible only to God (1 Pet. 3:4). Thus the "inner man" is practically synonymous with the "heart" (cf. 1 S. 16:7c, "man looks on the outward appearance, but the Lord looks on the heart"). The domain of the Spirit's transforming power is the heart (Eph. 3:16); however, the strengthening of the inner self should issue into a transformation of the outward behavior as well (4:1-3). Paul confesses that his outward nature (or his "members") is still at war with his inward nature, which delights in the law of God (Rom. 7:22f.); but he is confident that one day the outward nature will also be redeemed (cf. 8:19-23).

INNER NATURE. *See* INNER MAN.

INNER ROOM.

1. [Heb. *qubbâ*, a hapax legomenon (unless *qᵉbāṯāh* in this verse is the same word incorrectly vocalized in the MT)] (Nu. 25:8). Views of the meaning of this term have varied since ancient times. No doubt influenced by early rabbinic exegesis, Aq., Symm., and Vulg. render this term "brothel" (respectively Gk. *tégos, porneíon*; Lat. *lupanar*), i.e., a tent used for immoral relations with the Midianite woman (S. C. Reif, *JBL*, 90 [1971], 202). The LXX has "oven" (Gk. *káminos*); perhaps this, like postbiblical Heb. *kûr* that it frequently translates, is a euphemism for "womb," and thus by extension "place of [Zimri's] immoral activities" (Reif, p. 202). Reif also notes the possibility that *káminon* is corrupt for an original *kamáran*, "vault, arched structure." The Pesh. has *qelāyṯā'*, "alcove," i.e., a recessed room in Zimri's tent.

The medieval Jewish grammarians Rashi, Ibn Ezra, and Ibn Jannach related Heb. *qubbâ* to Arab. *qubbatun*, "tent," and Ibn Ezra interpreted the present reference as a "tent-brothel" for Zimri and his brothers (Reif, p. 203).

Modern commentators have added to the possibilities. J. Morgenstern, also comparing the Arabic term, suggests "marriage-tent," i.e., a prototype of the tent used by the modern bedouin in which marriage is consummated (*HUCA*, 17 [1942/43], 260f.). F. M. Cross relates the term to the tabernacle, or at least to the sacred enclosure (*Biblical Archaeologist Reader*, 1 [1975], 218f.). Perhaps most attractive is Reif's suggestion that this was a tent shrine in which the Midianite woman practiced divination or was consulted regarding the origin and reason for the plague (pp. 204f.).

2. [Heb. *pānîm*] (1 K. 6:29); AV WITHIN; NEB INNER CHAMBER; [*pᵉnîmâ*] (1 K. 6:30; Ezk. 41:3); AV INWARD; [*pᵉnîmî*] (Ezk. 41:15); [*habbayiṯ happᵉnîmî*] (Ezk. 41:17a); AV INNER HOUSE; NEB INNER CHAMBER (41:17b); AV WITHIN; NEB INSIDE. Some of these are difficult to identify (Ezk. 41:15, 17; perhaps 1 K. 6:29f.), but in most the referent is probably the *dᵉḇîr*, the "most holy place" of the TEMPLE.

3. [Heb. *'îr*] (2 K. 10:25). The RSV rendering is based on A. Klostermann's old and quite popular emendation of *'îr* to *dᵉḇîr*, "most holy place" (*Die Bücher Samuelis und der Könige* [*Kurzgefasste Kommentäre*, 1887], *ad loc.*). More recent interpretations include "citadel" (F. Frick, *The City in Ancient Israel* [1977], p. 33), "temple quarter" (L. Fisher, *JSS*, 8 [1963], 37, cites parallels in Nuzi texts), "altar" (N. H. Snaith, *IB*, III, 242), and "inmost shrine" (J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 562, compares Ugar. *ġr*).

4. [Gk. *tameíon*] (Mt. 24:26); AV SECRET CHAMBERS. The word can mean "innermost, hidden, (or) secret room" (of a house) or "storeroom" (Bauer, rev., p. 803). In this passage "in the inner rooms" probably means "in a residence somewhere" (cf. Lk. 17:23).

J. E. H.

INNOCENT; INNOCENCE [Heb. *nāqî, nāqî', nāqâ, niqqāyôn*]; AV INNOCENCY; [*ṣaddîq*]; AV RIGHTEOUS; NEB also "those in the right" (Isa. 5:23); FAIR JUDGES (2 K. 10:9); [*ṣāḏaq*]; AV also BE RIGHTEOUS, JUSTIFY (Job 9:20); NEB RIGHT; [Gk. *akéraios*]; AV HARMLESS; NEB ABOVE REPROACH (Phil. 2:15); [*díkaios*]; AV RIGHTEOUS; [*athóos*]; NEB CLEAN (Mt. 27:24); [*katharós*]; AV also CLEAN (Acts 18:6), PURE (Acts 20:26); NEB PURE (Acts 18:6), "no man's fate can be laid at my door" (Acts 20:26). The condition of being free from sin and guilt.

In the OT, two Hebrew roots are translated innocence — *nqh* and *ṣdq*. The Hebrew verb *nāqâ* means "be clean" or "innocent" in the sense of "free from guilt," e.g., Jer. 2:35, where the people claim they are innocent despite the fact that they have killed the poor unjustly. The psalmist requests God to keep him from presumptuous sins so he will be innocent (Ps. 19:13 [MT 14]). It also means to "count as innocent" or "acquit," e.g., Job 9:28 and 10:14.

The noun *niqqāyôn* from the same root is used rarely. Twice it is used of washing the hands in innocence (Ps. 26:6; 73:13) and once of Abimelech's protest to God that he took Sarah in all innocence (Gen. 20:5). More common is the adjective *nāqî*. It means "clean, exempt, free from guilt" and therefore is often translated "innocent." The majority of occurrences are coupled with *dām*, "blood," and translated by the RSV as "innocent blood." Occasionally the NEB translates this expression "innocent man," e.g., Jonah 1:14, "do not charge us with the death of an innocent man." The expression clearly refers to blood that has been shed unjustly and cruelly. Jeremiah uses it several times to characterize the social sins of Judah (e.g., Jer. 7:6). The other occurrences refer to innocent people, either in a negative or positive context. The interpretation of Job 22:30 is difficult; both the RSV and NEB understand the sense to be God delivering the innocent (person). However, the Hebrew has "not innocent," which is probably correct in light of the second half of the verse (M. Pope, *Job* [*AB*, 3rd ed. 1973], pp. 168f.).

The verb *ṣāḏaq* means to "be just" or "righteous." On a few occasions the RSV translates it "be innocent" where the meaning is to "be in the right" or "have a just cause" (Job 9:15, 20; 34:5). The adjective *ṣaddîq* means "just, righteous." It can mean "just in one's cause" or "right" in a legal sense. Dt. 25:1 is a good example of this legal aspect, where the innocent are acquitted and the guilty are condemned.

In the NT, the RSV renders four different adjectives as "innocent." The first term *akéraios* means "pure" in the sense of unmixed and is used figuratively in Mt. 10:16 where the twelve disciples are to be as innocent as doves. It occurs elsewhere in Phil. 2:15 where the command is to be blameless (*ámemptos*) and innocent, and in Rom. 16:19 (RSV "guileless"). A second term, *athṓos*, means "innocent" or "to be innocent of something." Judas recognizes his sin in betraying the innocent Jesus (Mt. 27:4), and Pilate washes his hands to be innocent of Jesus' blood (Mt. 27:24). Both of these terms tend to emphasize the negative, while the next two terms stress the positive. The first of these is *díkaios*, which translates *ṣaddîq* in the LXX and means "just, righteous, upright." On two occasions the RSV translates it as "innocent" — once of innocent martyrs of the OT (Mt. 23:35) and once when the centurion observes the innocence of Jesus after His death (Lk. 23:47). Finally, *katharós* — "clean" or "pure" — can convey both a ceremonial sense and a moral or religious sense of freedom from sin or guilt. The latter meaning is in view in Acts 18:6 and 20:26 where Paul's conscience is pure because he has carried out his obligation to preach the gospel. *See* JUSTIFICATION.

J. C. MOYER

INNOCENTS, MASSACRE OF THE. The conventional, ecclesiastical name given to the slaughter by HEROD I of male children two years old and under in Bethlehem and its environs at the time of the birth of Jesus (Mt. 2:16).

I. Meaning and History of the Term
II. Analysis of Narrative with Special Reference to Motive
  A. Focus of Narrative — Residence at Nazareth
  B. Corollaries from Above Facts
  C. Marks of Historicity

I. Meaning and History of the Term.–The accepted title for this event may be traced through Augustine to Cyprian. Irenaeus (d. A.D. 202) called these children "martyrs," and interprets the tragedy as a gracious and tender "sending before" into His kingdom by the Lord Himself. Cyprian (d. A.D. 258) said: "That it might be manifest that they who are slain for Christ's sake are innocent, innocent infancy was put to death for his name's sake" (*Epistula* 55.6). Augustine (b. A.D. 354), following Cyprian, speaks of the children, formally, as "the Innocents" (Comm. on Ps. 43:5).

The ecclesiastical treatment of the incident is remarkable because of the exaggerations about the extent of the massacre and the number of victims. At an early date the Greek church canonized 14,000, and afterward, by a curious misinterpretation of Rev. 14:1, 3, the number was increased to 144,000.

According to H. H. Milman the liturgy of the Church of England retains a reminiscence of this ancient error in the use of Rev. 14 on Holy Innocents' Day (*History of Latin Christianity*, I, 107 n. e). This exaggeration, of which there is no hint in the NT, is worthy of note because the most serious general argument against the historicity of the narrative is drawn from the silence of Josephus. As in all probability there could not have been more than twenty children involved (cf. F. W. Farrar, *Life of Christ*, I, 45 n.), the incident could not have seemed very significant among the series of horrors perpetrated or planned by Herod in the last months of his life (cf. Farrar, *The Herods*, pp. 144f.).

II. Analysis of Narrative with Special Reference to Motive.–In estimating the value of such a narrative from the viewpoint of historicity, the first and most important step is to determine the motive. Why was the story told? This question is not easy to answer, but in the present instance a very simple and effective test is at hand.

A. Focus of Narrative — Residence at Nazareth. In Matthew's infancy section (chs. 1–2) five quotations from the OT are set into the narrative of events. These five quotations represent the outstanding points of interest. The quotations are placed (1) at the announcement of the Virgin Birth (1:23); (2) at the birth at Bethlehem (2:6); (3) at the visit to Egypt (2:15); (4) at the murder of the children (2:18); (5) at the Nazareth residence (2:23). It is significant that no quotation is attached to the visit of the Magi. This omission is the more noteworthy because Nu. 24:7; Ps. 72:15; Isa. 60:6, and numerous references to the ingathering of the Gentiles have such appropriate passages to link the birth with the visit of the strangers from the Far East. This peculiar omission, on the part of a writer so deeply interested in prophecy and its fulfillment, can be explained only on the ground that the visit of the Magi did not, in the writer's view, occupy a point of special interest. Their visit is told, not for its own sake, but because of its connection with the murder of the children and the journey to Egypt. The murder of the children is of interest because it discloses the character of Herod and the perils surrounding the newborn Messiah. It also explains the visit to Egypt and the subsequent residence at Nazareth. The latter is evidently the objective point, because it is given a place by itself and marked by a quotation. Moreover, the one evidence of overstrain in the narrative is in the ambiguous and obscure statement by which the OT is brought into relationship with the Nazareth residence. The center of interest in the entire section which is concerned with Herod and the Magi is the Nazareth residence. The story is told for the express purpose of explaining why the heir of David, who was born at Bethlehem, lived at Nazareth.

This brings the narrative of Matthew into striking relationship with Luke. The latter's concern is to show how it was that the Messiah who lived at Nazareth was born at Bethlehem. We have here an undesigned unity that binds together these two narratives, which are seemingly so di-

vergent. That Matthew says nothing about a previous residence at Nazareth and that Luke says nothing about a forced return there may be explained, in accordance with the balance of probabilities, on the ground either that each evangelist was ignorant of the fact omitted by himself, or that in his condensed and rapid statement he did not see fit to mention it. In any case the harmony immeasurably outweighs the discrepancy.

B. Corollaries from Above Facts. The fact that the focus of the entire narrative lies in the residence of Jesus at Nazareth effectually disposes of a number of current hypotheses as to its origin.

(1) The idea that it is merely legend told for literary embellishment. The dovetailing of what would be the main item into the rest of the narrative and its subordination to secondary features cannot be explained on this hypothesis. The absence of adornment by available passages from the OT alone is conclusive on this point (W. C. Allen, comm. on Matthew [*ICC*, 1907], pp. 14f.).

(2) The idea that the story is told for the purpose of illustrating the scope of the Messiah's influence beyond Israel. Here again the subordinate position assigned to the story of the Magi, together with the absence of OT material, is conclusive. Moreover, the story of the Magi is abruptly dropped with the statement of their return home. Interest in them disappears as soon as their brief connection with the movement of the history through Herod ceases. Also, the intensely Hebraic character of Matthew's infancy section as a whole is incidental evidence pointing in the same direction.

(3) The idea that the story is told to emphasize the miraculous element in connection with the birth of Christ. The facts contradict this. In addition to the primary consideration (the Magi's subordinate position in the narrative), there are others of great value. That the Magi were providentially guided to the feet of the Messiah is evidently the firm conviction of the narrator.

The striking feature of the story is that with this belief in mind the narrator keeps so strictly within the limits of the natural order. In vv. 9, 12 only is there apparent exception. Of these the statement in v. 9 is the only one peculiar to this part of the narrative. Two things are to be remembered concerning it. It is clear that the verse cannot be interpreted apart from a clear understanding of the whole astronomical occurrence of which it forms a part. It is also evident that v. 9 must not be interpreted apart from the context. From the viewpoint of a wonder-tale the writer makes a fatal blunder at the most critical point of his story. The popular notion that the Magi were miraculously led to the Messiah finds no support in the text. The Magi did not come to Bethlehem, but to Jerusalem, asking: "Where is he that is born King of the Jews?" Verse 9 comes after this statement and after the conclave called by Herod in which Bethlehem was specified. In view of all this it seems clear that the Magi were led, not miraculously, but in accordance with the genius of their own system, and that the providential element lay in the striking coincidence of their visit and the birth of Jesus. The interest of the writer was not in heightening the miraculous element; otherwise, he would have sharpened its outlines and expurgated all ambiguity about the nature of the occurrence.

C. Marks of Historicity. 1. The centering of the narrative upon the residence at Nazareth not only brings Luke's Gospel in support of the center, but groups the story around a point of known interest to the first generation of believers. It is interesting to note that the residence in Egypt has independent backing of a sort. There are in existence two stories, one traced by Origen through Jews of his own day to earlier times, and the other in the Talmud, which connect Jesus with Egypt and attempt to account for His miracles by reference to Egyptian magic (F. F. Bruce, *Jesus and Christian Origins Outside the NT* [1974], pp. 54-65).

2. Another mark of historicity is the telling of the story of the Magi so objectively and with such personal detachment. Both Jews and early Christians had strong views about astrology and magic in general, but the author of this Gospel tells the story without emphasis and without comment and from the viewpoint of the Magi. His interest is purely historical and matter-of-fact.

3. The portrait of Herod the Great supports historicity. So far as Herod is concerned, the incident is usually discussed with reference to the savagery involved. Many affirm that we have here a hostile and unfair portrait. This contention could hardly be sustained even if the question turned entirely upon the point of savagery. But there is far more than savagery in the incident. First there is this undeniable element of inherent probability in the story. Practically all of Herod's murders, including those of his beloved wife and his sons, were perpetrated under the sway of one emotion and in obedience to a single motive. They were in practically every instance for the purpose of consolidating or perpetuating his power. He nearly destroyed his own immediate family in the half-mad jealousy that on occasion drove him to the very limits of ferocity, simply because they were accused of plotting against him. The accusations were largely false, but the suspicion doomed those accused. The murder of the Innocents was another crime of the same sort. The old king was obsessed by the fear of a claimant to his petty throne; the messianic hope of the Jews was a perpetual secret torment, and the murder of the children, in the attempt to reach the child whose advent threatened him, was so original in method and so characteristic in purpose as to give verisimilitude to the whole narrative. Also, Herod's prompt discovery of the visit of the Magi and their questions is in harmony with what we know of the old ruler's watchfulness and his elaborate system of espionage. Third, the subtlety with which Herod deals with the whole situation is characteristic of him. How striking and vivid, with all its rugged simplicity, is the story of the king's pretended interest in the quest of the strangers, the solemn conclave of Jewish leaders with himself in the role of earnest inquirer, his urgent request for information that he may worship also, followed by his swift anger (note that *ethymṓthē*, "be enraged" [v. 16], is not used elsewhere in the NT) at being deceived, and the blind but terrible stroke of his questing vengeance.

All this was so true of Herod, of the atmosphere that always surrounded him, and of the historic situation, that we are forced to conclude, either that we have veracious history more or less directly received from one who was an observer of the events described, or the work of an incomparably clever romancer.

Bibliography.–R. E. Brown, *The Birth of the Messiah* (1977), pp. 104-119, 202-230; D. Hill, comm. on Matthew (*New Century Bible*, 1972), pp. 84-86. L. M. SWEET

INORDINATE. A term derived from Lat. *in*, "not," and *ordinatus*, "set in order," hence "immoderate," "excessive." In the two AV occurrences the original has no corresponding adjective, but the word is inserted by the translators as being implied by the noun. The term does not occur at all in the RSV. For "inordinate love" (Heb. *ʿagāḇâ*, Ezk. 23:11) the RSV has "doting"; for "inordinate affection" (Gk. *páthos*, Col. 3:5), the RSV gives

"passion." In classical Greek *páthos* denotes any affection or emotion of the mind, whether good or bad. In the NT, however, it occurs only in a negative sense.

D. M. EDWARDS

INQUIRE [Heb. *dāraš* (1 K. 22:5; Am. 5:14; etc.), *šā'al* (1 S. 10:22; etc.), *bāqar* (Lev. 27:33; 2 K. 16:15), *bā'â* (Isa. 21:12), *bāqaš* (Est. 2:23; Ps. 27:4; Dnl. 1:20); Gk. *pynthánomai* (Jn. 4:54; etc.), *zētéō* (Acts 9:11), *ereunaō, exereunaō* (1 Pet. 1:10f.)]; **INQUIRY** [Heb. *biqqōreṭ* (Lev. 19:20), *pāqaḏ* (Job 31:14); Aram. *bᵉqar* (Ezr. 7:14); Gk. *dierōtáō* (Acts 10:17)]; AV also ASK, ENQUIRE, SEARCH, MAKE INQUISITION, etc.; NEB also SEEK GUIDANCE or COUNSEL, MAKE CAREFUL or DILIGENT EXAMINATION, CONSULT, FIND OUT, INVESTIGATE. Of the Hebrew words, *šā'al, bāqar,* and *bā'â* have the direct sense of "inquire" or "ask," while *dāraš, bāqaš,* and *pāqaḏ* mean "seek" or "search" and so "inquire" and "investigate" (cf. Est. 2:23). There is not, however, much distinction between the words, and they may be found together in a single verse in synonymous parallelism (Zeph. 1:6), sometimes to intensify the sense (Dt. 13:14: "You shall inquire and make search and ask diligently"; cf. NEB "careful examination").

While the OT speaks of normal human inquiry — whether informal (e.g., Gen. 43:27, into the health of Joseph's family; 2 S. 11:3, into the identity of Bathsheba) or formal investigation (e.g., Dt. 13:14; Est. 2:23; on Ps. 9:12 [MT 13], *see* AVENGE) — it is largely concerned with approach to God, especially for specific purposes. For example, when the Israelites had disputes with their neighbors, they came to Moses to "inquire of the Lord" for judgment (Ex. 18:15); the tribe of Dan "inquired of the Lord" whether they should move north (Jgs. 18:5); Hazael went to Elijah to inquire of God whether he would recover from his illness (2 K. 8:8); Jehoshaphat desired to inquire of the Lord before going into battle with Ahab against Syria (1 K. 22:5-8; cf. 2 Ch. 18:4-7) and with Jehoram against Moab and its allies (2 K. 3:11). In fact the question of doing battle is the most frequent inquiry made of God, especially in the historical books and particularly by David (e.g., Jgs. 20:18, 23, 27; 1 S. 14:37; 23:2, 4; 2 S. 2:1; 5:19, 23; cf. 1 Ch. 14:10-14).

Israelites made this inquiry in specific ways. Generally, in the earlier history of Israel, "inquiry" was made through the priest (e.g., Nu. 27:21; cf. Jgs. 18:5; 1 S. 22:9-15; 2 K. 22:13, 18) by the use of the URIM AND THUMMIM. Although the method is not certain, from 1 S. 14:36-42 especially it would seem that the Urim and Thummim involved casting lots.

According to 1 S. 9:9 the priestly inquiry was replaced by inquiry through the prophets in the early days of the monarchy (cf. 1 K. 14:5; 22:5, 7f.; 2 K. 3:11; 8:8; 2 Ch. 11:2-4; Jer. 21:2; 37:7; Ezk. 14:3, 7, 10; 20:1-3). With the apparent exception of David, most inquiry of God was made through the priest or the prophet. David's seemingly direct inquiry of God (cf. 1 S. 23:2, 4; 2 S. 2:1; 5:19, 23) may be instructive. Perhaps such inquiry was made possible when Abiathar — the son of Ahimelech, the priest through whom David had earlier inquired of the Lord (1 S. 22:9f.) — brought to David the ephod. Presumably, the ephod contained the Urim and Thummim, and thus enabled David to inquire of the Lord for himself.

"Inquiry of the Lord" was not always rewarded with a response. In contrast with the specific direction which David received, Saul's inquiry of the Lord met with no response on at least two occasions (1 S. 14:37; 28:6), due to sin (cf. 1 S. 14:41f.). That sin prevents the Lord from responding is the message of the prophets, especially of Ezekiel, through whom the Lord refuses "to be inquired of at all" by idolaters and sinners (Ezk. 14:1-5; 20:1-3). Apparently, God speaks only to those who have a proper attitude of heart.

Nowhere do these elements come together more clearly than in 1 S. 28:6. There Saul inquires of the Lord concerning a battle with the Philistines but receives no response, whether by dreams, or by Urim (through the priest?), or by prophets. In desperation, Saul resorts to the witch of Endor in direct violation of the Mosaic law (cf. Ex. 22:18; Lev. 19:26; 20:27; Dt. 18:10-14). This sin, following the transgressions that had already stilled the voice of God, was the last straw: the next day Saul and all his successors were killed in battle.

Israel was constantly tempted to inquire of other gods (2 K. 1:2-16), or of idols (Hos. 4:12), as well as of false priests (Jgs. 18:5) and false prophets (1 K. 22:5-23).

In the NT the sense is predictable. While *pynthánomai* always means "ask" (cf. *erōtáō* and its compounds), *eraunáō* or *ereunáō* means "search." *Zētéō* means "strive for," "follow after" (Mt. 6:33; Rom. 10:3; etc.) rather than "ask," and implies an act of the will (cf. *DNTT,* III, 531f.). Most of these NT uses are found in narrative sections in normal human dialogue. *Ereunáō (exereunáō)* suggests the idea of research, study, or investigation. Sometimes it is God who searches the hearts of men (cf. Rom. 8:27; 1 Cor. 2:10; Rev. 2:23) and sometimes it is people who search or inquire into Scripture, specifically for evidence of the Messiah (cf. 1 Pet. 1:10f.; Jn. 5:39; 7:52). The OT sense of "inquiry of the Lord" is not apparent in the NT.

H. VAN BROEKHOVEN, JR.

INSCRIPTION [Heb. *miḵtāḇ*] (Ex. 39:30); AV WRITING; NEB ENGRAVING; [*pittû(a)ḥ*] (Zec. 3:9); AV GRAVING; NEB "meaning"; [Gk. *epigraphḗ*] (Mt. 22:20; Mk. 12:16; 15:26; Lk. 20:24; 23:38); AV SUPERSCRIPTION; [*epigráphō*] (Acts 17:23); **INSCRIBE** [Heb. *ḥāqaq*] (Job 19:23; Isa. 30:8); NEB also ENGRAVE; [*rāšam*] Dnl. 10:21); AV NOTED; NEB WRITTEN; [Aram. *rᵉšam*] (Dnl. 5:24f.); AV WRITING; [Gk. *gráphomai*] (Rev. 19:12, 16); AV, NEB, WRITTEN; [*epigráphō*] (Rev. 21:12); AV WRITTEN. In Zec. 14:20 the RSV and NEB supply "inscribed," while the AV translates literally, "shall be upon."

The Heb. *kāṯaḇ,* of which *miḵtāḇ* is a cognate, means simply "write," while *pittû(a)ḥ* refers more specifically to an engraving. The context, however, indicates that the inscription in Ex. 39:30 was also engraved (cf. 28:36). The inscription "Holy to the Lord" signified that the priest was set apart for special service to Yahweh. Zechariah prophesied that in the last days, after the annihilation of all the forces of evil, this same phrase would be inscribed on the bells of the horses (Zec. 14:20).

One way of preserving testimony for succeeding generations was to inscribe it in a book. Isaiah was told to write his oracles in a book "that it may be for the time to come as a witness for ever" (30:8). Job desired to have his words written down so that he might be vindicated by posterity (19:23). On Dnl. 10:21, *see* BOOK OF TRUTH.

In the NT the term *epigraphḗ* is used by each of the Synoptics for the legend on a coin designating the person in whose honor or by whose authority the coin was issued (Mt. 22:20; Mk. 12:16; Lk. 20:24). It is also used for the charge against Jesus that was fixed to the cross in accordance with Roman custom (Mk. 15:26; Lk. 23:38; cf. Mt. 27:37; Jn. 19:19).

Archeology has not uncovered an altar with the inscription "To an Unknown God" in Athens, but such altars have been found in other cities, and ancient writers re-

ported seeing them in Athens (cf. Pausanias i.1.4; Philostratus *Life of Apollonius* vi.3.5).

N. J. O.

INSCRIPTIONS. Documents written or engraved on hard surfaces and intended for public display as lasting records. They may be distinguished on the one hand from writings on perishable materials, such as PAPYRUS, and on the other from those intended for private use, including LETTERS and seals; to the latter category also belong many graffiti and most OSTRACA (*see also* SEAL).

I. Form and Content.–Several kinds of information were communicated by inscription in the ancient world, and the variety of uses to which public documents were put seems to have transcended cultural boundaries; but the materials and techniques involved in the production of inscriptions in the earliest centers of civilization differed.

A. Writing Systems and Materials. The great majority of inscriptions that bear upon biblical history are in Egyptian hieroglyphic, cuneiform, or the alphabet, the three great writing systems which arose in Egypt, Mesopotamia, and Syria-Palestine respectively. In the cases of both cuneiform and alphabetic writing special developments carried the systems beyond the boundaries of their lands of origin.

1. Egyptian Hieroglyphic. Public documents in Egypt were usually written in the complex pictographic script known as hieroglyphic, less often in its cursive derivatives, hieratic and demotic. The discovery in 1799 of the ROSETTA STONE, a trilingual inscription of 196 B.C. honoring Ptolemy V Epiphanes in equivalent texts of hieroglyphic, demotic, and Greek, led eventually to the decipherment of the hieroglyphic writing system as well as the ancient Egyptian language, itself almost unknown previously. An enormous number of hieroglyphic texts are now known and understood, many with direct or indirect relevance to biblical studies. *See also* ARCHEOLOGY OF EGYPT II.A; IV.D.

2. Cuneiform. CUNEIFORM was a type of wedge-shaped writing developed in Mesopotamia for use on clay tablets, but for the execution of public documents the system was transferred to stone. The language of most cuneiform inscriptions of direct relevance to biblical studies is Akkadian, the Semitic language of Mesopotamia, in its dialectal subdivisions, Assyrian and Babylonian. A large number of Assyrian and Babylonian inscriptions from the 2nd and 1st millennia B.C. shed important light on biblical history. Among the several peoples who adapted Mesopotamian cuneiform to their own needs were the early inhabitants of Syria, Asia Minor (the Hurrians, the Hittites), and Persia, and it was the simplified system of Old Persian that provided modern scholars with clues for the decipherment of cuneiform. The key inscription in this regard was the accession memorial of DARIUS the Great (522-486 B.C.) at BEHISTUN (modern Bisitun, Iran) with its trilingual (Old Persian, Babylonian, and Elamite) text. *See also* ARCHEOLOGY OF MESOPOTAMIA II; BABYLONIA V.C.

3. The Alphabet. The alphabet probably was invented sometime in the first half of the 2nd millennium B.C. The oldest known writing that is indisputably alphabetic in character is that of the so-called Proto-Sinaitic inscriptions, rock-cut graffiti from an ancient turquoise-mining community at Serābîṭ el-Khâdim in the Sinai Peninsula. These texts, still incompletely understood, seem to be votive in character, engraved to accompany offerings made by Asiatic slaves in the Egyptian mines of the region; Egyptian monuments from the same period also survive (cf. *ANET,* pp. 29-30). Linear alphabetic inscriptions do not become plentiful, however, until after the beginning of the Iron Age (*ca.* 1200 B.C.), when documents in the various local branches of the parent Canaanite script — viz., Phoenician, Hebrew, Aramaic, Ammonite, Moabite, and Edomite — begin to appear. Most of the inscriptions that survive from this period are incised in stone, but there is reason to believe that at least among the Israelites and their Transjordanian neighbors public documents were written frequently with ink on surfaces prepared with plaster (cf. Dt. 27:2f., 8), as discoveries from Tell Deir ʿallā in southern Transjordan and Kuntillet ʿAjrūd in the wilderness of northern Sinai suggest (see II.E, F below). Such materials may have seemed sufficiently durable to those who employed them, but plaster inscriptions are permanent only under exceptional conditions of climate and archeological context. This is probably a chief reason that the corpus of public documents that survive from the period of the Israelite monarchy is quite small.

The economy and utility of alphabetic writing prompted a rapid extension of its use beyond the boundaries of Syria and Palestine during the 1st millennium B.C. The Aramaic script and language were adopted for official use in the chancellery affairs of the Assyrian empire, a role they maintained during the later period of Persian ascendancy. The transmission of the alphabet from Phoenicia to Greece led to its further expansion and refinement. Inscriptions of relevance to NT studies are predominantly in the Greek and Roman alphabets, less often in the indigenous systems of the Levant, such as Aramaic and Paleo-Hebrew, an archaizing Jewish script that survived in limited use after the general spread of Aramaic in the Persian Age to be revived briefly in the Hasmonean and Herodian periods.

B. Purposes of Inscriptions. Committing information to an inscription was believed to accomplish two things. First, it placed the information officially before the public. A decree or edict went into effect formally upon its publication as an inscription; it became generally obligatory or effective. Second, information so published could be thought of as permanently enshrined; it would endure, carrying its message to future generations. Public monuments were believed to accord a kind of permanency to the glory of particular human achievements, and this belief must have been an important part of the motivation

for making inscriptions, underlying most of the purposes to which they were put, as listed below.

1. Commemorations of Military Victories. Success at war was routinely memorialized in stone, and victory stelae are uniquely valuable to modern scholars because of their relative abundance and the specific historical information they supply. As detailed below, much of our knowledge of the peoples and places of second-millennium Palestine comes from the monuments made by Egyptian pharaohs to commemorate their conquests in Asia. Similarly, the biblical picture of the history of the Israelite and Judean monarchies and their neighbors in Iron Age Syria-Palestine is considerably filled out by information culled from the annalistic accounts of the triumphs of the Assyrian kings that appear on the monuments they left behind in the west or erected at home.

2. Commemorations of Other Public Events. Other achievements were also recorded for posterity in inscriptions. To this category belong especially those documents which celebrate the completion of buildings or other public works, many examples of which are cited below.

3. Proclamations and Decrees. As noted above, royal edicts were often published as inscriptions in order to place them formally in public view and, therefore, to make them generally binding or effective. So it is, for example, that copies of the decrees of Xerxes mentioned in Est. 3:12f. and 8:9-12 are said to have been promulgated to the people (Est. 3:14; 8:13) so that they would "be ready" for the execution of the king's instructions.

4. Treaties. Treaties between nations were often recorded in inscriptions and publicly displayed. Such documents shed invaluable light on the political relationships of involved parties and frequently on the general history of a particular period as well. Treaties have survived in gratifying numbers from some of the politically most complex ages in Syria-Palestinian antiquity, such as the period of independence and realignment in eighth-century Syria that preceded the arrival of Tiglath-pileser III (see II.D below).

5. Law Codes. The existence of a common legal tradition spread throughout ancient western Asia is demonstrated by a number of surviving collections of law, especially from Middle Bronze Age Mesopotamia. Such legal "codes," as they are somewhat improperly called, were preserved in inscriptions for the purpose of honoring the kings responsible for promulgating them. Anonymous collections of law, on the other hand, sometimes survive on clay tablets, but they tend not to have been incorporated into public inscriptions. All of these materials are useful to students of the legal parts of the OT.

6. Epitaphs. Tomb inscriptions identifying and sometimes eulogizing the dead survive from all parts of the ancient Near East. Such texts frequently contain deterrents to grave robbers in the form of grievous curses invoked upon anyone who disturbs the rest of the deceased or, alternatively, assurances of the absence of valuable grave goods.

7. Religious Texts. On occasion written monuments were set up for specifically religious purposes. Sacred texts of special importance might be publicly displayed (cf. Dt. 27:2f.; Josh. 8:30-32). Hymns and prayers were sometimes included in inscriptions. Amulets or plaques bearing apotropaic incantations were worn or attached to doorposts as insurance against demons.

II. Ancient Israel: Inscriptional Evidence.–In the following synopsis the principal inscriptions from Egypt, Mesopotamia, and Syria-Palestine that bear directly or indirectly on the study of the OT are listed by historical periods.

A. Pre-Israelite Syria and Palestine. The illumination of the history and civilization of Syria-Palestine by articulate records begins long before the arrival of the Israelites in Canaan. Biblical scholars study the earlier periods as background to the later history and as the arena of the patriarchal sojourns described in Genesis.

1. Early Bronze Age (*ca.* 3100-2200 B.C.). Much of our knowledge of the political history of Bronze Age Syria-Palestine comes from the information provided in the military records of Mesopotamian and Egyptian kings, whose interest in the area was already active in the 3rd millennium B.C. The kings of Akkad erected monuments describing their campaigns in the west; and although the stelae themselves have not survivied, copies of the texts on clay tablets (*ANET,* pp. 267f.) refer to victories over major Syrian cities, including Mari and Ebla, by the first and fourth dynasts, Sargon (2371-2316) and Naram-Sin (2291-2255), who are said to have marched as far as "the Cedar Mountain" (the Amanus) and "the Upper Sea" (the Mediterranean).

Egyptian activity to the south in Palestine during this period is illustrated by the cenotaph inscription of Uni, military commander in Asia under Pepi I (2332-2283), found at Abydos (*ANET,* pp. 227f.). Uni speaks of his successes against the "Sand-Dwellers," as he contemptuously calls the Asiatics, in five separate campaigns.

2. Middle Bronze Age (*ca.* 2200-1550). Another cenotaph inscription from Abydos, that of a nobleman called Djaa (*ANET,* p. 230), provides information about an Asiatic campaign undertaken during the Middle Kingdom by Sen-Usert III (1878-1843), who is said to have won a great victory over "the wretched Retenu," as the peoples of Syria and Palestine are collectively described, including in particular "a foreign country of which the name was Sekmem," probably Shechem

Shechem is also among the enemies of Egypt listed in the Execration Texts from the time of Sen-Usert and later (*ANET,* pp. 328f.). These are ceramic bowls and figurines inscribed with the names of enemies and ritually smashed. In addition to Shechem, later Israelite cities such as Hazor, Beth-shemesh, and Jerusalem are also mentioned, as well as Iy-ʿanaq, a name which has been compared to that of the biblical "sons of Anak" (*ʿănāq*), aboriginal inhabitants of the Hebron area (Josh. 15:14; Jgs. 1:20), and Shutu, possibly equivalent to Moab (cf. Nu. 24:17), one of whose princes was named Ayyabum, that is, Job (Heb. *ʾiyōḇ*).

The Middle Bronze Age is the time from which the great Mesopotamian collections of law derive (cf. I.B.5 above). These include not only the famous Code of Hammurabi (1792-1750), the sixth and greatest king of the 1st Dynasty of Babylon (*ANET,* pp. 163-180; *see also* HAMMURABI, CODE OF), but also the earlier Sumerian law codes of Ur-Nammu (2112-2095), founder of the 3rd Dynasty of Ur (*ANET,* pp. 523-25), and Lipit-Ishtar (1934-1924), a ruler of the 1st Dynasty of Isin (*ANET,* pp. 159-161); in neither of the latter two cases does the original stele survive, but the texts can be largely restored from later copies. In all three collections the laws themselves are introduced by a prologue, in which the king responsible for them identifies himself and speaks of a divine commission he has received to promote justice and equity in his land.

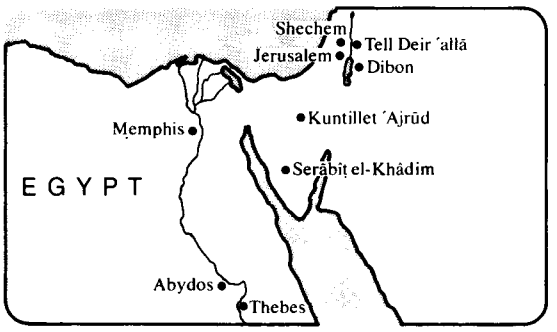
The great cuneiform archives from Alalakh and especially Mari provide extensive information about the history of Syria and western Mesopotamia in the Middle Bronze Age as well as about the economic, legal, and social customs of the region, but public monuments from these sites are relatively rare. An important exception is a brick inscription from Mari in which King Yaḫdun-

Lim (*ca.* 1800) dedicates a temple to Šamaš, the sun-god, with whose help he claims to have campaigned westward as far as the Mediterranean, quelled an uprising of nomadic kings, and erected the Šamaš temple within a single year (*ANET*, pp. 556f.).

3. Late Bronze Age (*ca.* 1550-1200). Another exception is a statue of Idrimi, a king of Alalakh early in the Late Bronze Age, inscribed with a first-person account of his early life as a political refugee from Syria living in Canaan among the *ḫapiru* and his subsequent return to Syria, where he became king of the district of Mukiš, the capital of which was Alalakh (*ANET*, pp. 557f.). The story, which is reminiscent in many ways of the biblical account of David's rise to power (1 S. 16–2 S. 5), is valuable for its high literary quality as well as the light it throws on the civilization of contemporary Canaan and north Syria.

Statue of King Idrimi (*ca.* 1450 B.C.) of Alalakh in northern Syria. The cuneiform text is inscribed across the front of his garment (Trustees of the British Museum)

The reassertion of Egyptian power in Palestine and Syria after the 2nd Intermediate Period, the Hyksos interlude, is well documented by the inscriptions of the kings of the 18th Dynasty. Greatest of these was Thutmose III (1483-1450), who conducted seventeen Asiatic campaigns in his first twenty years of independent rule and recorded most of them on the walls of the temple of Amon-Re at Karnak (*ANET*, pp. 234-241). These Annals of Karnak provide considerable information about the situation encountered in Asia during the campaigns, of which the most important were probably the first, when Thutmose won a dramatic victory at Megiddo over a coalition that had been organized at Kadesh on the Orontes, and the eighth, when he marched as far as the Euphrates, breaking the power of the Hurrian state of Mitanni, which had become Egypt's chief rival for control of Syria. Another inscription from the same temple contains a roster of enemy states in "Upper Retjenu" (i.e., the mountains of Syria-Palestine) and "the mysterious lands of the marshes of Asia," from which Thutmose took prisoners (*ANET*, pp. 242f.); this text represents an invaluable topographical resource and is important not only in its own right but also because it established a precedent followed by subsequent kings, who expanded the roster. Thutmose's successors, Amenhotep II (1450-1425) and Thutmose IV (1425-1417), also made incursions into the land of "Retjenu," Syria-Palestine, and recorded them in inscriptions at Memphis, Karnak, and elsewhere (for Amenhotep's, see *ANET*, pp. 245-48); but these were little more than punitive raids — hardly campaigns — and Egypt's Asiatic empire, especially in its northern reaches, was eroding.



The public documents of the Amarna period show little interest in Egypt's territories in Asia and, therefore, provide scant information about contemporary Syria-Palestine, especially in contrast to the riches of the cuneiform archive of the famous AMARNA TABLETS. On the other hand, the religious pronouncements in the inscriptions of Amenhotep IV, Akhenaten (1379-1362), are of great interest to biblical scholars and students of religion in general for the light they cast on the heretical "Aten monotheism" of the period. Of particular interest is the "long hymn" to the Aten from the tomb of an official of the Amarna court named Ay (*ANET*, pp. 369-371), which has been compared in its general spirit and in some particulars to Ps. 104.

The reassertion of Egyptian power in Asia after the Amarna interlude is illustrated by the inscriptions of the great warrior-kings of the 19th Dynasty, Seti I (1318-1304), Ramses II (1304-1237), and Merneptah (1236-1223). Seti's inscriptions at Karnak (*ANET*, pp. 254f.) describe his campaigns in the Sinai and Palestine and as far north as Kadesh on the Orontes, where he confronted the power of the new Hittite Empire. He won a major victory over insurgents from Hamath at BETH-SHEAN (Tell el-Ḥuṣn) and recorded the event in two basalt stelae (*ANET*, pp. 253-55); Beth-shean was a city in "Upper Retjenu" that had been captured by Thutmose III after his victory at Megiddo (cf. *ANET*, p. 242) and where Ramses II subsequently campaigned, leaving behind his own stele (*ANET*, p. 255). Ramses, rebuilder of the old Hyksos capital Avaris as "the House of Ramses" (cf. Ex. 1:11) and generally regarded as the pharaoh of the Exodus, campaigned extensively in Asia during his long reign and left

Victory stelae of Seti I (left) and Ramses II (right) from Beth-shean (University Museum, University of Pennsylvania)

monuments to his accomplishments at several sites in Syria and Palestine as well as at home at Karnak and other Egyptian cities. The texts of these inscriptions (*ANET*, pp. 255-58) document the resolution of the conflict with the Hittites and, after initial difficulties, the establishment of Egyptian control of Palestine and the Phoenician coast as far north as Byblos.

B. Conquest and Settlement. A *terminus ante quem* for the arrival of Israel in Canaan is established by the so-called Israel Stele of Ramses II's son and successor Merneptah (1236-1223). The text (*ANET*, pp. 376-78) contains a series of victory hymns listing conquered enemies, including "Israel," of whom it is said that he "is laid waste, his seed is no more." The stele designates settled peoples with the hieroglyphic determinative for foreign countries, but Israel is marked only as a people, a detail that has been taken to mean that the Israelites, though they had arrived in Canaan by the time of Merneptah, were not yet settled there. *See also* ARCHEOLOGY OF EGYPT IV.D.

The arrival of the Israelites was roughly contempora-

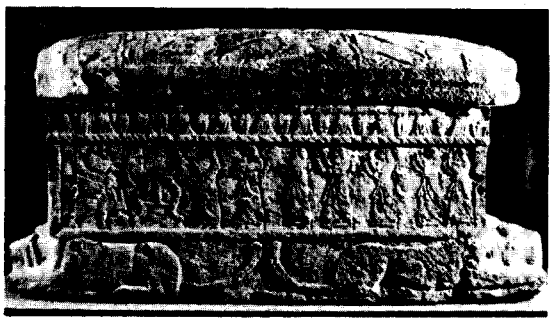
neous with the arrival of a number of other peoples, among them the Arameans and the "Peoples of the Sea," including in particular the Philistines, who would rival Israel for control of Palestine. The problems the sea-peoples created for Syria-Palestine as well as Egypt are illustrated by Egyptian inscriptions of the period. Merneptah lists several of the sea-peoples among the conquered enemies of the Israel Stele (see above), but he gave them only a temporary check. The inundation came in the time of Ramses III (1198-1166), the ablest king of the 20th Dynasty, who left an inscription in his temple at Medinet Habu (Thebes) recounting his partly successful war against the Philistines and other sea-peoples.

The earliest unambiguous references to Arameans in Syria are in the inscriptions of the Assyrian conqueror Tiglath-pileser I (1115-1077) (*ANET*, pp. 274f.), who found it necessary to cross the Euphrates twenty-eight times during his reign to keep the Arameans under control.

No Israelite inscriptions from the time of the Conquest and the period of the judges have survived. Even in the absence of extant monuments (such as the one described in Josh. 8:30-35), however, we are assured that there was literacy in the premonarchial period by the discovery of a number of ostraca, seals, inscribed arrowheads, etc., as well as a scribal practice tablet from 'Izbet Ṣarṭah, near biblical Aphek, dating to the early 12th cent. B.C. (see M. Kochavi, *Tel Aviv*, 4 [1977], 1-13).

C. Early Monarchy. The time of Israel's united monarchy is not represented by surviving public monuments, though at least two such inscriptions are mentioned in the Bible. We are told in 1 S. 15:12 that Saul erected a monument to himself at the village of Carmel (modern Kermel, S of Hebron) after his victory over the Amalekites, and David, when his march of conquest reached the Euphrates, is said to have set up a monument there (1 Ch. 18:13; cf. 2 S. 8:3), just as the Egyptian kings Thutmose I and Thutmose III (see II.A, B above) had done before him.

From contemporary Phoenicia comes a series of sepulchral inscriptions from the tombs of five tenth-century kings of Byblos. The earliest of these is incised on the rim of the sarcophagus of Ahiram of Byblos, who died early in the 10th cent. (*ANET*, p. 661). Another, that of Abibaal, was incised on a seated statue of the founder of the 22nd



Sarcophagus of King Ahiram of Byblos (Gebal). This side shows him seated on a throne and attendants approaching him. The inscription is on the edge of the lid (Direction générale des antiquités, Republic of Lebanon)

(Bubastite) Dynasty of Egypt, Sheshonq I (*ca.* 947-927), and may be dated *ca.* 940 B.C. (cf. McCarter, *Antiquity*, pp. 31-34).

Sheshonq, biblical SHISHAK, campaigned in Palestine and commemorated his successes in an inscription on the Bubastite Portal at Karnak (cf. B. Mazar, "The Campaign of Pharaoh Shishak to Palestine," in *SVT*, 4 [1957], 57-66); the campaign is also described in 1 K. 14:25-28, though the widespread devastation Sheshonq inflicted on both Israel and Judah, as indicated in the Karnak inscription and supported by archeological data, is not hinted at in the biblical account. A fragment of a stele of Sheshonq has been found at Megiddo.

In the 9th cent. B.C., Phoenician westward expansion into the Mediterranean basin reached its zenith. Earlier Phoenician visits to Mediterranean ports are attested by a fragment of an eleventh-century stele from Pula, ancient Nora, in Sardinia (see F. M. Cross, *CBQ*, 36 [1974], 490-93) and an inscribed bronze bowl of the 10th cent. from Tekke, near Knossos, Crete (see M. Sznycer, *Kadmos*, 18 [1979], 89-93). From Cyprus comes the so-called Honeyman inscription, a weathered gravestone of the early part of the 9th cent., and a painted ceramic bowl from the temple of Astarte at Kition dated archeologically to *ca.* 800 B.C. The famous Nora Stone from ninth-century Sardinia has long

been supposed to contain a dedication to the god Pummay, but Cross (*BASOR*, 208 [Dec. 1972], 13-19) interprets it as a military inscription referring to King Pummayyaton (Pygmalion) of Tyre. Other Phoenician maritime inscriptions include (1) fragments of a bronze bowl from Cyprus dedicated by a provincial governor in the service of Hiram II of Tyre to a god called Baal ("lord of") Lebanon and roughly datable to the middle of the 8th cent., (2) the inscribed base of a small statue of a goddess, evidently the Hurrian Ishtar (F. M. Cross, *HTR*, 64 [1971], 189-195), found near Seville in southwestern Spain and deriving from the middle or second half of the 8th cent., and (3) a votive stele from Malta of the late 8th century. See further McCarter, *Antiquity*, pp. 39-50; M. G. Guzzo Amadasi, *Le iscrizioni fenici e puniche delle colonie in occidente* (1967).

D. Age of Assyrian Invasions. In the 9th cent., with the beginning of Assyrian expansion, the annals of the Neo-Assyrian kings become an important resource for the history of Palestine and Syria. Ashurnasirpal II (884-860), a contemporary of Omri of Israel, campaigned in northern Syria and the Lebanon and recorded his exploits in the temple of the war-god Ninurta in Calah (Nimrûd) (*ANET*, pp. 275f.). But of more interest to biblical scholars are the several inscriptions of Shalmaneser III (859-825), whose ambitions in the west were challenged by a large coalition of Syria-Palestinian states led by Irḫuleni of Hamath, Hadadezer (Ben-hadad II) of Damascus, and Ahab of Israel, Hadadezer's erstwhile enemy (1 K. 20; cf. BEN-HADAD 2). In Shalmaneser's Monolith Inscriptions from Kurkh (*ANET*, pp. 277-79 *passim*), Ahab is said to have contributed two thousand chariots and ten thousand foot-soldiers to the coalition for an indecisive battle at Qarqar on the Orontes in 853. In 841 he achieved a decisive victory over Damascus, whose king was now Hazael (1 K. 19:15f.; 2 K. 8:13-15), and its allies, as recorded on the famous Black Obelisk found at Nimrûd (*ANET*, pp. 278-281 *passim*). Among the tributaries of that year this obelisk lists Tyre, Sidon, Byblos, and Israel, whose king, "Yaw [Jehoram or Jehu], son of Omri," is depicted in a relief on the obelisk kneeling before the Assyrian monarch.

After the accession of Jehu the Transjordanian state of Moab, which during the Omri dynasty had been under Israelite sway, was able to assert its independence. Mesha king of Moab is said in 2 K. 3:4 to have paid Ahab an annual tribute of 100,000 lambs and the wool of 100,000 sheep. After gaining his independence Mesha erected a stele at Dibon (modern Dhībân) commemorating his victories and praising Chemosh the god of Moab (*ANET*, pp. 320f.; *see* MOABITE STONE). A second Transjordanian inscription of the same period is the Amman citadel inscription, a fragment of a limestone slab on which a mid-ninth-century Ammonite king inscribed the dedication of a temple or other sacred precinct to the god Milcom.

To this same period belongs the inscription of Kilamuwa, king of the northern Syrian state of Ya'udi or Sam'al (modern Zenjirli), near which Shalmaneser III had fought his first battle. The text, which is in the local dialect and the Aramaic script, recounts Kilamuwa's achievements (*ANET* pp. 654f.).

The Aramean kings of the time of Shalmaneser III left their own inscriptions. A stele found near Aleppo bears a votive inscription to the Tyrian god Melqart from a certain Ben-hadad (*ANET*, p. 655; cf. BEN-HADAD 1); it has long been assumed that this is an inscription of Ben-hadad II, i.e., Hadadezer, of Damascus (see above), but another proposal argues that the king's name is given as Ben-hadad, *son of Ezer*, and that he should be considered Ben-hadad III, perhaps Hadadezer's son and co-regent at the end of his reign (see F. M. Cross, *BASOR*, 205 [Feb. 1972], 36-42; cf. W. H. Shea, *Maarav*, I/2 [1979], 159-176). Fragments of ivory inlay, parts of a bed (cf. Am. 6:4) found at Arslan Tash, were inscribed by the craftsmen "to our lord, Hazael," evidently the Damascene king. His succession by Ben-hadad III (or, if the proposal cited above is correct, IV) (2 K. 13:24) is illustrated by another Aramaic inscription, a stele from Apish (modern Āfis 45 km. [28 mi.] SW of Aleppo), erected by a certain Zakkur (formerly known as Zakir) king of Hamath in honor of the god Ilu-wer. Zakkur speaks of the same kind of hostilities and successes against Damascus that Jehoash of Israel was experiencing at this time (cf. 2 K. 13:14-25); *see also* BEN-HADAD 3.

A stele found in 1967 at Tell er-Rimah in northern Mesopotamia identifies Jehoash (Joash) of Israel as a tributary of Adadnirari III (811-784) Shalmaneser's successor, Šamši-Adad V (824-812), had not been strong enough to maintain a firm hand on his father's western dominions, but Adadnirari reasserted Assyrian control at least temporarily, campaigning to the Mediterranean in 805-802. His slab inscriptions from Nimrûd (*ANET*, pp. 281f.) describe his victories at that time. The Rimah stele probably commemorates a later campaign to northern Syria that he is known to have made in 796.

The oldest known public documents in the Hebrew language come from Kuntillet 'Ajrūd, a remote outpost in the northern Sinai which flourished in the late 9th or early 8th cent. B.C. In addition to a number of inscribed pithoi and other objects the site has yielded ink-on-plaster inscriptions with religious themes *in situ* on the walls of the single building. When published this material will provide scholars with unique evidence of the religious situation in Israel and Judah during the divided monarchy (see provisionally Z. Meshel, *Biblical Archaeology Review*, 5/2 [1979], 24-34).

From later in the 8th cent. comes the crude inscription of a man named Uriah on the entrance to a rock-cut tomb in the Judean hills at modern Khirbet el-Qom. The text invokes the help of Yahweh.

The several states of eighth-century Syria are represented by a number of extant inscriptions. The Aramaic Sfire treaties record the pact made by Mati'el (Mati'-ilu) king of Arpad with a Mesopotamian suzerain (*ANET*, pp. 659-661) sometime before the fall of Arpad to Tiglath-pileser III in 740 B.C.; they are an invaluable source of information about covenant forms in the Iron Age. Three inscriptions from Ya'udi or Sam'al (Zenjirli) in the strange Ya'udic dialect shed further light on northern Syria in this period. The oldest, dating to the middle of the 8th cent., is that of King Panammu I; the others, dating *ca.* 730 B.C., belonged to Panammu II and his son Barrakib (*ANET*, p. 655), both of whom were vassals of Tiglath-pileser. A group of long Phoenician-Hittite bilinguals, engraved on a leonine gate, its orthostats, and a statue of a god, comes from Karatepe in southern Turkey. They are the inscriptions of a King Azitawadda of Que, the little state that controlled the area, and are to be dated *ca.* 725. Like Arpad and Sam'al, Que was a tributary of Tiglath-pileser III (744-727).

Tiglath-pileser's own inscriptions (*ANET*, pp. 282-84) describe his consolidation of Assyrian power in Mesopotamia, his rigorous reorganization of the empire, and his two great western campaigns. In the records of his first campaign (743-738), on which he reasserted Assyrian control of northern Syria, he lists among his tributaries Menahem of Israel (cf. 2 K. 15:19). In an inscription of an unknown year he claims credit for the replacement of Pekah of Israel by Hoshea (cf. 2 K. 15:29-30). His second

campaign (734-732) was directed principally against an insurgent coalition led by Rezin of Damascus, a city that fell in 732; the relevant biblical material, involving Ahaz of Judah — Tiglath-pileser's records give us a longer form of his name, viz., Jehoahaz (*ia-ú-ḫa-zi*) — is found in 2 K. 16 (cf. Isa. 7).

Both the Assyrian chronicles and the biblical account (2 K. 17:3) assign the fall of Samaria to Shalmaneser V (726-722), of whose own inscriptions almost nothing survives. Shalmaneser's successor, Sargon II (721-705), claimed credit for the achievement, which is described in detail in his own inscriptions from Nimrûd, Khorsabad (ancient Dūr-Šarrukin, "Sargon City," his new capital), and elsewhere (*ANET*, pp. 284-87). Among the spoil from Samaria was a votive plaque expertly incised with a Hebrew inscription including an invocation of divine retribution on anyone who defaced it; fragments of this text were recovered at Nimrûd in 1961.

The siege of Jerusalem in 701 by Sargon's successor Sennacherib (704-681) is described in great detail in the Taylor and Oriental Institute Prisms of Sennacherib's annals (*ANET*, pp. 287f.). His destruction of Lachish at the same time is graphically illustrated by reliefs from his palace at Nineveh and their accompanying epigraph. The corresponding biblical material is found in 2 K. 18:13–19:37=Isa. 36–37; 2 Ch. 32:1-23. The completion of the underground water system HEZEKIAH devised for the siege (cf. 2 Ch. 32:2-4) was commemorated by the engraving of an inscription on the wall at the outer entrance to the tunnel (*ANET*, p. 321); it describes the excavation of the

Two funerary stelae with Aramaic texts from Nerab in northern Syria (7th cent. B.C.), both by priests of Shahr the moon-god. The stele of Agbar (left) mentions Shahr and the Babylonian deities Nikkal and Nusku, and the stele of Sin-zera-ibni mentions Šamaš as well (Louvre)

shaft by two teams of workers, who cut their way through the rock from both directions until they met in the middle (*see also* SILCAM).

From approximately this same period comes the Royal Steward inscription from the necropolis at Silwan, Jerusalem. Inscribed above the entrance to a large tomb, it identifies the deceased as "[ ]yahu, who is over the house"; the title has been compared to that of Shebna, Hezekiah's majordomo (Isa. 22:15). *See* picture in ARCHEOLOGY OF PALESTINE AND SYRIA.

Sennacherib's successor, Esarhaddon (680-669), in two baked clay prisms designated A and B, described his one significant western campaign (*ANET,* pp. 290f.), which was directed principally against an insurgent king of Sidon; mention is made of tribute received from Manasseh of Israel, a loyal Assyrian vassal (cf. 2 K. 21; 2 Ch. 33), Baal of Tyre, and others. There is no Assyrian reference to Manasseh's visit to Babylon (2 Ch. 33:10f.). The treaty Esarhaddon made with Baal of Tyre (*ANET,* pp. 533f.) survives as an important illustration of the treaty forms of this period and, because of the divine names listed in the curses that conclude the text, is a valuable witness to the Tyrian pantheon. Esarhaddon's successor, Ashurbanipal (668-633), also includes among the accounts of his western campaigns (*ANET,* pp. 294-97) reference to tribute received from both Manasseh and Baal in "Cylinder C," a text made up of fragments of a number of prisms. *See* picture in ESARHADDON.

An alphabetic inscription of *ca.* 700 B.C. from Tell Deir ʿallā in southern Transjordan is of special interest to biblical scholars as containing the earliest extrabiblical reference to a named pentateuchal figure. The ink-on-plaster text, originally attached to a wall or stele in a sanctuary, relates a story involving Balaam son of Beor in phrases strikingly reminiscent of the material in Nu. 22–24. The language of the inscription displays affinities with both Old Aramaic and South Canaanite (Hebrew and Moabite). See J. Hoftijzer and G. van der Kooij, *Aramaic Texts from Deir ʿAllā* (1976).

From Nerab, modern Nayrab near Aleppo, come two basic basalt gravestones inscribed with the seventh-century Aramaic epitaphs of two priests of Shahr, the Aramaic form of the name of the Assyrian moon-god Sin. For the second, that of a certain Agbar, see *ANET,* p. 661.

E. Exile. The siege and conquest of Jerusalem by Nebuchadrezzar II of Babylon (604-562), though included in the Babylonian chronicles (*ANET,* pp. 536f.), are not described in surviving public inscriptions. Hebrew inscriptions, found in 1961 and paleographically datable to the early 6th cent. B.C., have been interpreted as providing moving evidence of the plight of the refugees in Judah (cf. F. M. Cross in J. A. Sanders, ed., *Near Eastern Archaeology in the 20th Cent.* [1970], pp. 299-306). They are crude graffiti incised on the walls of a cave at Khirbet Beit Lei in the Judean hills near Lachish. The difficult texts seem to invoke Yahweh's help in phrases reminiscent of many of the prayers in the book of Psalms.

To the 6th cent. belong two Aramaic incantations on limestone plaques found at Arslan Tash in northern Mesopotamia. Both seem to be apotropaic devices to be hung on doorposts to ward off demons. For the first, see *ANET,* p. 658.

F. Persian Age. The fall of Babylon to CYRUS (557-529) is described in the Cyrus Cylinder, a clay barrel bearing a cuneiform text composed by a Babylonian devotee of the god Marduk. The inscription describes the liberation of Babylon by Cyrus as an achievement inspired and abetted by Marduk; its general spirit has been compared to that of Isa. 40–55, where Cyrus's victories and the liberation of the Jews are said to have been made possible by the involvement of Yahweh, the god of Israel.

Evidence that the Arabian tribes who were pressing into southern Palestine in the postexilic period were also in the eastern Egyptian Delta comes from Tell Maskhuta near Ismailia, where a number of silver bowls inscribed with fifth-century Aramaic legends have been discovered. One (*ANET,* p. 657) is identified as having belonged to a son of Geshem the Arab, Nehemiah's nemesis (Neh. 2:19; 6:1f., 6), called "king of Kedar" in the inscription.

To the Persian Age also belong the Sidonian inscriptions of the Eshmunʿazar dynasty (cf. Peckham, pp. 78-86). We have inscribed sarcophagi of Tabnit, son of Eshmunʿazar I (*ca.* 470-465), who describes himself as "priest of [the goddess] Aštart" as well as "king of Sidon," and Eshmunʿazar II (*ca.* 465-451), especially valuable for its description of the Sidonian temple district (*ANET,* p. 662), and the building inscriptions of Bodʿaštart (*ca.* 451-?) from the temple of the god Eshmun. *See* picture in BURIAL.

III. The Early Church: Inscriptional Evidence.–Inscriptions from Palestine, Syria, and the Mediterranean basin in the Roman period illuminate the NT background in a general way. Several items of specific relevance are listed below.

A. Jerusalem. Among the best-known inscriptions from Herodian Jerusalem is the so-called Balustrade Inscription, a Greek text with two extant copies, forbidding foreigners to enter the temple precinct, "the balustrade and enclosure," on penalty of death. This brings to mind the charge against Paul that he had defiled the temple by bringing in Trophimus the Ephesian (Acts 21:28f.).

Greek inscription from the Jerusalem temple (*ca.* A.D. 30) forbidding Gentiles to enter the temple court (Israel Department of Antiquities and Museums)

Several interesting tomb inscriptions have been recovered from Herodian Jerusalem. An ossuary inscription from Givʿat ha-Mivtar, e.g., identifies the deceased as "Simon, builder of the temple." Another tomb from the same cemetery bears a long Aramaic inscription, notable for its use of the archaizing Paleo-Hebrew script (see I.A.3 above); the unusual text begins by identifying not the deceased but the man who buried him, a certain Abba.

An inscription of the emperor Vespasian and his son Titus, discovered in 1970, is a reminder of the destruction of Jerusalem in A.D. 70.

A Greek building inscription from the Ophel identifies the builder of a synagogue as a certain Theodotus, apparently a freed Roman captive. This brings to mind the "synagogue of the Freedmen [Libertini]" mentioned in Acts 6:9.

See also ARCHEOLOGY OF PALESTINE AND SYRIA II.L.

B. Scythopolis. Another important synagogue text, in

this case a Hebrew inscription on a mosaic floor, comes from Tell el-Ḥuṣn (OT Beth-shean, NT Scythopolis). The text reviews the Halakic agricultural regulations incumbent upon Jews living in border districts like Scythopolis.

C. Caesarea. Among important discoveries from Caesarea Maritima is a stone inscription from the period when the city was the administrative capital of Palestine; it mentions Pontius Pilate.

D. Delphi. A fragment of an inscription from Delphi publishing the text of a letter from the emperor Claudius makes reference to Gallio, the proconsul of Achaia mentioned in Acts 18:12-17. The reference is important for the chronology of Paul's journeys. *See* CHRONOLOGY OF THE NT II.F.

INSECTS [Heb. *šereṣ hā'ôp*] (Lev. 11:20f., 23; Dt. 14:19); AV FOWLS THAT CREEP, CREEPING THING THAT FLIETH, FLYING CREEPING THINGS; NEB TEEMING WINGED CREATURES. The prescription in Dt. 14:19 prohibited for food "all winged insects" as unclean, but the more detailed regulations of Lev. 11:20f. made a distinction between winged insects going on all fours, i.e., that move like quadrupeds, and those having "legs above their feet." This latter presumably referred to bending rear legs which were larger and higher than the corresponding forelegs. Such insects were regarded as suitable for food, and included species of locust, of which the order *Orthoptera* is divided into more than forty.

The different species of Lev. 11 cannot be identified by means of the Hebrew words given, so that the nature of the "bald locust" (NEB "long-headed locust"), the cricket (NEB "green locust"), and the grasshopper (NEB "desert locust") must remain indeterminate. Terms such as cricket or grasshopper may merely denote the locust at various stages of its development and may not allude to separate insects.

See also LOCUST, and the articles under the names of the various insects. R. K. H.

INSIGHT [Heb. *haśkêl*–'prudence, sense' (Job 34:35), *bînâ* < *bîn*–'have discernment' (cf. *bên*, "between") (Prov. 1:2; 9:10, etc.), *m'ḇînîm*–'they who give (or possess?) understanding' (Ezr. 8:16); Gk. *phrónēsis* (Eph. 1:9), *sýnesis* (Eph. 3:4)]; AV UNDERSTANDING, PRUDENCE (Eph. 1:9), KNOWLEDGE (Eph. 3:4); NEB also DISCERNMENT, DISCRETION, UNDERSTANDING.

The hiphil part. *m'ḇînîm*, which the RSV renders "men of insight" in Ezr. 8:16 (cf. the similar use of the hiphil part. in Neh. 8:3; 10:29), could alternatively mean "they who cause (the people) to have insight," i.e., "teachers" (cf. 1 Ch. 10:22; 25:8; Neh. 8:7, 9; *TDOT,* II, 103). The noun *bînâ*, a favorite word of wisdom authors, occurs several times in Proverbs, often denoting the discernment and understanding that results from heeding wisdom teaching (2:3 [cf. vv. 1f.]; 4:1, 5, 7; 7:4 [cf. vv. 1-3]). In 3:5, however, it refers to one's natural perception, which is inadequate without Yahweh's guidance. In 8:14 personified Wisdom (Heb. *ḥokmâ*) says that she is, or perhaps has (cf. W. McKane, *Proverbs* [*OTL,* 1970], pp. 347f.), insight, and in 9:6 insight is contrasted with simpleness (LXX; Pesh.; MT "simple ones"; cf. also v. 4).

Greek *phrónēsis*, collocated with *sophía*, "wisdom," in Eph. 1:9, probably differs little in meaning from the latter, and like the latter denotes "knowledge of how to do something — i.e., the right handling of the right thing at the right moment" (M. Barth, *Ephesians 1–3* [*AB,* 1974], pp. 84f.). Thus the phrase "in all wisdom and insight" probably indicates the source of God's decision to lavish His grace upon us (vv. 7-8a). Greek *sýnesis* in 3:4 means "understanding, grasp."

See also UNDERSTANDING; WISDOM. J. E. H.

INSOLENCE; INSOLENT [Heb. *zāḏôn, zēḏ, zîḏ*] (Prov. 13:10; Ps. 54:3 [MT 5]; 86:14; 119:21; Jer. 43:2; Neh. 9:10); AV PRIDE, PROUD, PROUDLY; NEB PRESUMPTION, PROUD, EFFRONTERY, ARROGANTLY; [*'eḇrâ*] (Isa. 16:6; Jer. 48:30); AV WRATH; NEB ARROGANCE; [*ḥerpâ*] (Job 16:10; Dnl. 11:18); AV REPROACHFULLY; NEB CHALLENGE, "with knives"; [*za'am*] (Hos. 7:16); AV RAGE; NEB "lies"; [*'āṭāq*] (Ps. 31:18 [MT 19]; 75:5 [MT 6]); AV STIFF, "grievous things"; NEB ARROGANTLY, WITH CONTEMPT; [*rāhaḇ*] (Isa. 3:5); AV BEHAVE PROUDLY; NEB BREAK OUT; [*maḏhēḇâ*] ("insolent fury," Isa. 14:4); AV "golden city"; NEB FRENZY; [*'āzaz*] (Isa. 33:19); AV FIERCE; NEB BARBAROUS; [hiphil of *gāḏal*] (Ps. 55:12 [MT 13]); AV MAGNIFY HIMSELF; NEB "treat with scorn"; [Gk. *hybristḗs*] (Rom. 1:30); AV DESPITEFUL.

The AV rendering of Isa. 14:4 assumes a Hebrew derivation from the Aram. *d'haḇ*, "gold." 1QIsa^a, however, would appear to indicate that *maḏhēḇâ* has been a misreading of *marhēḇâ*, "turmoil." A similar confusion may account for the two readings of Ps. 54:3; the AV used MSS reading *zār*, "stranger," while the RSV and NEB used others, including the Targum, which read *zēḏ*, "insolent." The term *ḥerpâ*, "reproach," is based on the verb *ḥārap*, "be sharp," or "say sharp things against." This may account for the NEB rendering "with knives." G. WYPER

INSPECTORS (Ezr. 5:6; 6:6, NEB). *See* APHARSACHITES.

INSPIRATION. A term used in the discussion of the nature of the canon of Scripture that concerns the influence of the Spirit of God upon the biblical writers to produce a divinely authoritative Scripture. If God is viewed as the author of Scripture, a natural corollary of a doctrine of inspiration is the concept of the INFALLIBILITY of Scripture.

I. Meaning of Terms
II. Relevant Passages
III. Christ and Scripture
IV. Scripture in the Primitive Church
V. Human and Divine Aspects

I. Meaning of Terms.—The use of "inspire" in a technical, theological sense is derived from the usage of the word *inspiro* in the Vulg. (Gen. 2:7; Wisd. 15:11; Sir. 4:12; 2 Tim. 3:16; 2 Pet. 1:21), and the noun *inspiratio* (2 S. 22:16; Job 32:8; Ps. 18:15; Acts 17:25). In the RSV, "inspired" occurs in three passages relevant to the discussion. In Mt. 22:43, Jesus speaks of David writing Psalm 110 "inspired by the Spirit" (*en pneúmati*). The parallel passage in Mk. 12:36 has "inspired by the Holy Spirit" (*en tō̧ pneúmati tō̧ hagíō̧*). Luke (20:42) makes the reference more specific by substituting "in the Book of Psalms" (*en biblō̧ psalmōn*). The AV translates Mt. 22:43 literally, "in Spirit," and for Mk. 12:36 has the

archaic "by the Holy Ghost." The NEB has "by inspiration" for Mt. 22:43 and "inspired by the Holy Spirit" in Mk. 12:36.

II. Relevant Passages.—The most important verse, however, is 2 Tim. 3:16: "All scripture is inspired by God" (*pāsa graphē theópneustos*). The AV translates, "All Scripture is given by inspiration of God." The NEB, less correctly, has "every inspired Scripture." The important Greek word in this passage, however, is not correctly translated "inspired by God." This phrase is the rendering of the Latin *divinitus inspirata*, restored from the Wyclif ("Al Scripture of God ynspyrid is. . . .") and Rhemish ("All Scripture inspired of God is. . . .") versions of the Vulg. The Greek word does not even mean, as AV translated it, "given by inspiration of God," although that rendering (inherited from Tyndale: "All Scripture given by inspiration of God is. . . ." and its successors; cf. Geneva: "The whole Scripture is given by inspiration of God and is. . . .") is a somewhat clumsy, perhaps, but not misleading, paraphrase of the Greek term in the theological language of the day. The Greek term has, however, nothing to say of *in*spiring or of *in*spiration: it speaks only of "aspiring" or "aspiration." What it says of Scripture is, not that it is "breathed into by God" or is the product of the divine "inbreathing" into its human authors, but that it is breathed out by God, "God-breathed," the product of the creative breath of God. In a word, what is declared by this fundamental passage is simply that the Scriptures are a divine product, without any indication of how God has operated in producing them. No term could have been chosen, however, which would have more emphatically asserted the divine production of Scripture than that which is here employed. The "breath of God" is in Scripture just the symbol of His almighty power, the bearer of His creative word. "By the word of the Lord" we read in the significant parallel of Ps. 33:6, "were the heavens made, and all their host by the breath of his mouth." And it is particularly where the operations of God are energetic that this term (whether *rû(a)ḥ* or *nᵉšāmâ*) is employed to designate them — God's breath is the irresistible outflow of His power. When Paul declares, then, that "every scripture" or "all scripture" is the product of the divine breath, "is God-breathed," he asserts that Scripture is the product of a specifically divine operation.

(1) 2 Tim. 3:16: In the passage in which Paul makes this energetic assertion of the divine origin of Scripture he is engaged in explaining the greatness of the advantages which Timothy had enjoyed for learning the saving truth of God. He had had good teachers; and from his very infancy he had been, by his knowledge of the Scriptures, made wise unto salvation through faith in Jesus Christ. The expression, "sacred writings," used here (v. 15), is a technical one, not found elsewhere in the NT, it is true, but it occurs in Philo and Josephus designating that body of authoritative books which constituted the Jewish "law." It appears here anarthrously because it is set in contrast with the oral teaching which Timothy had enjoyed, as something still better. To enhance further the great advantage of the possession of these sacred Scriptures the apostle adds now a sentence throwing their nature strongly up to view. They are of divine origin and therefore of the highest value for all holy purposes (3:16bf.).

There is room for some difference of opinion as to the exact construction of this declaration. Shall we render "Every scripture" or "All scripture"? Shall we render "Every [or all] scripture is God-breathed and [therefore] profitable," or "Every [or all] scripture, being God-breathed, is as well profitable"? No doubt both questions are interesting, but for the main matter now engaging our attention they are both indifferent. Whether Paul, looking back at the sacred Scriptures he had just mentioned, makes the assertion he is about to add, of them distributively, of all their parts, or collectively, of their entire mass, is not important: to say that every part of these sacred Scriptures is God-breathed and to say that the whole of these sacred Scriptures is God-breathed, is, for the main matter, all one. Nor is the difference great between saying that they are in all their parts, or in their whole extent, God-breathed and therefore profitable, and saying that they are in all their parts, or in their whole extent, because God-breathed as well profitable. In both cases these sacred Scriptures are declared to owe their value to their divine origin; and in both cases this their divine origin is asserted of their entirety. On the whole, the preferable construction would seem to be, "Every scripture, seeing that it is God-breathed, is as well profitable." In that case, what the apostle asserts is that the canon of Scripture in every passage — for it is just "passage of scripture" which "scripture" in this distributive use of it signifies — is the product of the creative breath of God, and, because of this divine origination, is of supreme value for all holy purposes.

The apostle does not stop here to tell us either what particular books enter into the collection which he calls sacred Scriptures, or by what precise operations God has produced them. It was the value of the Scriptures, and the source of that value in their divine origin, which he asserts leaving to other occasions any further facts concerning them. The apostle does not tell us here everything for which the Scriptures are made valuable by their divine origination. He reminds Timothy of the value which these Scriptures, by virtue of their divine origin, have for the "man of God." Their spiritual power, as God-breathed, is all that he had occasion here to refer to. Whatever other qualities may accrue to them from their divine origin, he leaves to other occasions to speak of.

(2) 2 Pet. 1:19-21: What Paul tells us about the divine origin of the Scriptures is enforced and extended by 2 Pet. 1:19-21. Peter is assuring his readers that what had been made known to them of "the power and coming of our Lord Jesus Christ" did not rest on "cunningly devised fables." He offers them the testimony of eyewitnesses of Christ's glory. Then he intimates that they have better testimony than even that of eyewitnesses. "We have," says he, "the prophetic word" (AV, unhappily, "the word of prophecy"); and this, he says, is "more sure," and therefore should certainly be heeded. He refers, of course, to the Scriptures. Of what other "prophetic word" could he, over against the testimony of the eyewitnesses of Christ's Majestic Glory (v. 17), say that "we have" it, that is, it is in our hands? And he proceeds at once to speak of it plainly as "scriptural prophecy." You do well, he says, to pay heed to the prophetic word, because we know this first, that "every prophecy of scripture. . . ." It is questionable, however, whether by this phrase he means the whole of Scripture, designated according to its character, as prophetic, that is, of divine origin; or only that portion of Scripture which we discriminate as particularly prophetic, the immediate revelations contained in Scripture. The former is the more likely view, inasmuch as the entirety of Scripture is elsewhere conceived and spoken of as prophetic. In that case, what Peter has to say of this "every prophecy of scripture" — the exact equivalent, it will be observed, in this case of Paul's "every scripture" (2 Tim. 3:16) — applies to the whole of Scripture in all its parts. What he says of it is that it does not come

"by the impulse of man"; that is, it is not the result of human investigation into the nature of things, the product of its writers' own thinking. This is as much as to say it is of divine gift. Accordingly, he proceeds at once to make this plain in a supporting clause which contains both the negative and the positive declaration: "because no prophecy ever came by the impulse of man, but men moved by the Holy Spirit spoke from God." In this singularly precise and pregnant statement there are several things which should be carefully observed. First, there is the emphatic denial that prophecy owes its origin to human initiative. Then, there is the equally emphatic assertion that its source lies in God: it was spoken by men, indeed, but the men who spoke it "spoke from God." And a remarkable clause is here inserted, and thrown forward in the sentence that stress may fall on it, which tells us how it could be that men, in speaking, should speak not from themselves, but from God: it was as they were "moved by the Holy Spirit" that they spoke. Speaking thus under the determining influence of the Holy Spirit, the things they spoke were not from themselves, but from God.

Here is as direct an assertion of the divine origin of Scripture as that of 2 Tim. 3:16. But there is more here than a simple assertion of the divine origin of Scripture. We are advanced somewhat in our understanding of how God has produced the Scriptures. It was through the instrumentality of men who spoke from Him. More specifically, it was through an operation of the Holy Spirit on these men which is described as "moving" them. The term here used is a very specific one. It is not to be confounded with guiding, or directing, or controlling, or even leading in the full sense of that word. It goes beyond such terms, in assigning the effect produced specifically to the active agent. What is "moved" is taken up by the "mover" and conveyed by the "mover's" power, not its own, to the "mover's" goal, not its own. The men who spoke from God are here declared, therefore, to have been moved by the Holy Spirit and brought by His power to the goal of His choosing. The things which they spoke under this operation of the Spirit were therefore His things, not theirs. And that is why "the prophetic word" is so sure. Though spoken through the instrumentality of men, it is, by virtue of the fact that these men spoke as "moved by the Holy Spirit," an immediately divine word. The stress is laid here, not on the spiritual value of Scripture (though that, too, is seen in the background), but on the divine trustworthiness of Scripture. Because that is the way every prophecy of Scripture came it affords a more sure basis of confidence than even the testimony of human eyewitnesses. Of course, if we do not understand by "the prophetic word" here the entirety of Scripture described, according to its character, as revelation, but only that element in Scripture which we call specifically prophecy, then it is directly only of that element in Scripture that these great declarations are made. In any event, however, they are made of the prophetic element in Scripture as written, which was the only form in which the readers of this Epistle possessed it, and which is the thing specifically intimated in the phrase "every prophecy *of scripture*." These great declarations are made, therefore, at least of large tracts of Scripture; and if the entirety of Scripture is intended by the phrase "the prophetic word," they are made of the whole of Scripture.

(3) Jn. 10:34-36: How far the supreme trustworthiness of Scripture, thus asserted, extends may be conveyed to us by a passage in one of Our Lord's discourses recorded by John (Jn.10:34-36). The Jews, offended by Jesus' "making himself God," were ready to stone Him, when He defended Himself thus: "Is it not written in your law, 'I said, you are gods'? If he called them gods, to whom the word of God came (and scripture cannot be broken), do you say of him whom the Father consecrated and sent unto the world, 'You are blaspheming,' because I said, 'I am the Son of God'?" It may be thought that this defense is inadequate. It certainly is incomplete: Jesus made Himself God (Jn. 10:31) in a far higher sense than that in which "You are gods" was said of those "to whom the word of God came": He had just declared in unmistakable terms, "I and the Father are one." But it was quite sufficient for the immediate end in view — to repel the technical charge of blasphemy based on His making Himself God: it is not blasphemy to call someone God in any sense in which he may fitly receive that designation; and certainly if it is not blasphemy to call such men as those spoken of in the passage of Scripture adduced gods, because of their official functions, it cannot be blasphemy to call Him God whom the Father consecrated and sent into the world. The point for us to note, however, is merely that Jesus' defense takes the form of an appeal to Scripture; and it is important to observe how He makes this appeal. In the first place, He adduces the Scriptures as law: "Is it not written in your law...?" The passage of Scripture which He adduces is not written in that portion of Scripture which was more specifically called "the Law," i.e., the Pentateuch; nor in any portion of Scripture of formally legal contents. It is written in the book of Psalms and in a particular psalm which is as far as possible from presenting the external characteristics of legal enactment (Ps. 82:6). When Jesus adduces this passage, then, as written in the "law" of the Jews, He does it, not because it stands in this psalm, but because it is a part of Scripture at large. In other words, He here ascribes legal authority to the entirety of Scripture, in accordance with a conception common enough among the Jews (cf. Jn. 12:34), and finding expression in the NT occasionally, both on the lips of Jesus Himself, and in the writings of the apostles. Thus, on a later occasion (Jn. 15:25), Jesus declares that it is written in the "law" of the Jews, "They hated me without a cause," a clause found in Ps. 35:19. And Paul assigns passages both from the Psalms and from Isaiah to "the law" (1 Cor. 14:21; Rom. 3:19), and can write such a sentence as this (Gal. 4:21f.): "Tell me, you who desire to be under law, do you not hear the law? For it is written. . . ," quoting from the narrative of Genesis.

We have seen that the entirety of Scripture was conceived as "prophecy"; we now see that the entirety of Scripture was also conceived as "law": these three terms, the law, prophecy, Scripture, were indeed, materially, strict synonyms. Our present passage demonstrates this by using the terms "law" and "scripture" in contiguous verses. And what is thus implied in the manner in which Scripture is adduced, is immediately afterward spoken out in the most explicit language, because it forms an essential element in Our Lord's defense. It might have been enough to say simply, "Is it not written in your law?" But Our Lord, determined to drive His appeal to Scripture home, sharpens the point to the utmost by adding with the highest emphasis: "and scripture cannot be broken." This is the reason why it is worthwhile to appeal to what is "written in the law," because "scripture cannot be broken." The word "broken" here is the common one for breaking the law, or the sabbath, or the like (Jn. 5:18; 7:23; Mt. 5:19), and the meaning of the declaration is that it is impossible for the Scripture to be annulled, its authority to be withstood, or denied. The movement of thought is to the effect that, because it is impossible for the Scripture — the term is perfectly

general and witnesses to the unitary character of Scripture (it is all, for the purpose in hand, of a piece) — to be withstood, therefore this particular Scripture which is cited must be taken as of irrefragable authority. What we have here is, therefore, the strongest possible assertion of the indefectible authority of Scripture; precisely what is true of Scripture is that it "cannot be broken." Now, what is the particular thing in Scripture, for the confirmation of which the indefectible authority of Scripture is thus invoked? It is one of its most casual clauses — more than that, the very form of its expression in one of its most casual clauses. This means, of course, that in the Savior's view the indefectible authority of Scripture attaches to the very form of expression of its most casual clauses. It belongs to Scripture through and through, down to its most minute particulars, that is of indefectible authority.

III. Christ and Scripture.–It is sometimes suggested, it is true, that Our Lord's argument in Jn. 10:34-36 is an *argumentum ad hominem,* and that His words, therefore, express not His own view of the authority of Scripture, but that of His Jewish opponents. It will scarcely be denied that there is a vein of satire running through Our Lord's defense: that the Jews so readily allowed that corrupt judges might properly be called "gods," but could not endure that He whom the Father had consecrated and sent into the world should call Himself Son of God, was a somewhat striking fact to set in such a high light. But the argument from Scripture is not *ad hominem* but *e concessu;* Scripture was common ground with Jesus and His opponents. If proof were needed for so obvious a fact, it would be supplied by the circumstance that this is not an isolated but a representative passage. The conception of Scripture thrown up into such clear view here supplies the ground of all Jesus' appeals to Scripture, and of all the appeals of the NT writers as well. Everywhere, to Him and to them alike, an appeal to Scripture is an appeal to an indefectible authority whose determination is final; both He and they make their appeal indifferently to every part of Scripture, to every element in Scripture, to its most incidental clauses as well as to its most fundamental principles, and to the very form of its expression. This attitude toward Scripture as an authoritative document is, indeed, already intimated by their constant designation of it by the name of Scripture, and by their customary citation of it with the simple formula "It is written." What is written in this document admits so little of questioning that its authoritativeness required no asserting, but might safely be taken for granted. Both modes of expression belong to the constantly illustrated habits of Our Lord's speech. The first words He is recorded as uttering after His manifestation to Israel were an appeal to the unquestionable authority of Scripture; to Satan's temptations He opposed no other weapon than the final "It is written" (Mt. 4:4, 7, 10; Lk. 4:4, 8)! And among the last words which He spoke to His disciples before He was received up was a rebuke to them for not understanding that all things "written . . . in the law of Moses and the prophets and psalms" concerning Him — that is in the entire "Scriptures" — 'must be" (very emphatic) "fulfilled" (Lk. 24:44f.). "Thus it is written," says He (v. 46), as rendering all doubt absurd. For, as He had explained earlier upon the same day (v. 25), it argues only that one is "foolish" and "slow of heart" if he does not "believe" (if his faith does not rest securely on, as on a firm foundation) "all" (without limit of subject matter here) "that the prophets" (explained in v. 27 as equivalent to "all the scriptures") "have spoken."

The necessity of the fulfillment of all that is written in Scripture, strongly asserted in these last instructions to His disciples, is frequently referred to by Our Lord. He repeatedly explains that occurrences have come to pass "that the scripture might be fulfilled" (Mk. 14:49; Jn. 13:18; 17:12; cf. 12:14; Mk. 9:12f.). On the basis of scriptural declarations, therefore, He announces with confidence that given events will certainly occur: "You all will fall away because of me this night; for it is written. . . ." (Mt. 26:31; Mk. 14:27; cf. Lk. 20:17). Although holding at His command ample means of escape, He bows before oncoming calamities, for, He asks, how otherwise "should the scriptures be fulfilled, that it must be so?" (Mt. 26:54). It is not merely the two disciples with whom He talked on the way to Emmaus (Lk. 24:25) whom He rebukes for not trusting themselves to the teaching of Scripture. "You search the scriptures," he says to the Jews, in the classical passage (Jn. 5:39f.), "because you think that in them you have eternal life; and it is they which bear witness to me; yet you refuse to come to me, that you may have life!" These words surely were spoken more in sorrow than in scorn: there is no blame implied either for searching the Scriptures or for thinking that eternal life is to be found in Scripture. What the Jews are blamed for is reading with a veil lying upon their hearts which He could take away (2 Cor. 3:15f.). "You search the scriptures" — that is right — and "even you" (emphatic) "think that in them you have eternal life" — that is right, too. But "it is these very Scriptures" (very emphatic) "which are bearing witness" (continuous process) "of me; and" (here is the irony) "you refuse to come to me that you may have life!" — that you may, that is, reach the very end you have so properly in view in searching the Scriptures. Their failure is due, not to the Scriptures but to themselves, who read the Scriptures to such little purpose.

Quite similarly Our Lord often finds occasion to express wonder at the little effect to which Scripture had been read, not because it had been looked into too curiously, but because it had not been looked into earnestly enough, with sufficiently simple and robust trust in its every declaration. "Have you not read this scripture?" He demands, as he adduces Ps. 118 to show that the rejection of the Messiah was already intimated in Scripture (Mk. 12:10; Mt. 21:42 varies the expression to the equivalent: "Have you never read in the scriptures?"). And when the indignant Jews came to Him complaining of the Hosannas with which the children in the temple were acclaiming Him, and demanding, "Do you hear what these are saying?" He met them (Mt. 21:16) with, "Yes; have you never read, 'Out of the mouths of babes and sucklings thou hast brought perfect praise'?" The underlying thought of these passages is spoken out when He intimates that the source of all error in divine things is just ignorance of the Scriptures: "You are wrong," He declares to His questioners, on an important occasion, "you neither know the scriptures nor the power of God" (Mt. 22:29); or, as it is put, perhaps more forcibly, in interrogative form, "Is not this why you are wrong, that you know neither the scriptures nor the power of God?" (Mk. 12:24). Clearly, he who rightly knows the Scriptures does not err.

The confidence with which Jesus rested on Scripture, in its every declaration, is further illustrated in a passage like Mt. 19:4f. Certain Pharisees had come to Him with a question on divorce and He met them thus: "Have you not read that he who made them from the beginning made them male and female, and said, 'For this reason a man shall leave his father and mother and be joined to his wife, and the two shall become one'? . . . What therefore God has joined together, let no man put asunder." The point to be noted is the explicit reference of Gen. 2:24 to God as its author: "*He who made them* . . . said"; "what therefore *God* has joined together." Yet this pas-

sage does not give us a saying of God recorded in Scripture, but just the word of Scripture itself, and can be treated as a declaration of God only on the hypothesis that all Scripture is a declaration of God. The passage in Mk. 10:5ff. just as truly, though not as explicitly, assigns the passage to God as its author, citing it as authoritative law and speaking of its enactment as an act of God. It is interesting to observe that Paul, having occasion to quote the same passage, also explicitly quotes it as a divine word: "For two, saith he [Gk. *phēsín*], shall be one flesh" (1 Cor. 6:16, AV) — the "he" here, in accordance with a usage to be noted later, meaning "God."

Thus it is clear that Jesus' occasional adduction of Scripture as an authoritative document rests on an ascription of it to God as its author. His testimony is that whatever stands written in Scripture is a word of God. Nor can we evacuate this testimony of its force on the plea that it represents Jesus only in the days of His flesh, when He may be supposed to have reflected merely the opinions of His day and generation. The view of Scripture He announces was, no doubt, the view of His day and generation as well as His own view. But there is no reason to doubt that it was held by Him, not because it was the current view, but because, in His divine-human knowledge, He knew it to be true; for, even in His humiliation, He is the faithful and true witness. And in any event we should bear in mind that this was the view of the resurrected as well as of the humiliated Christ. It was after He had suffered and had risen again in the power of His divine life that He pronounced those foolish and slow of heart who do not believe all that stands written in all the Scriptures (Lk. 24:25); and that He laid down the simple "Thus it is written" as the sufficient ground of confident belief (Lk. 24:46). Nor can we explain away Jesus' testimony to the divine trustworthiness of Scripture by interpreting it as not His own, but that of His followers, placed on His lips in their reports of His words. Not only is it too constant, minute, intimate and in part incidental, and therefore, as it were hidden to admit of this interpretation; but it so pervades all our channels of information concerning Jesus' teaching as to make it certain that it comes actually from Him. It belongs not only to the Jesus of our evangelical records but as well to the Jesus of the earlier sources which underlie our evangelical records, as anyone may assure himself by observing the instances in which Jesus adduces the Scriptures as divinely authoritative that are recorded in more than one of the Gospels (e.g., "It is written," Mt. 4:4, 7, 10 par. Lk. 4:4, 8, 10; Mt. 11:10 par. Lk. 7:27; Mt. 21:13 par. Lk. 19:46; Mk. 11:17; Mt. 26:31 par. Mk. 14:21; "the scripture" or "the scriptures," Mt. 19:4 par. Mk. 10:9; Mt. 21:42 par. Mk. 12:10; Lk. 20:17; Mt. 22:29 par. Mk. 12:24; Lk. 20:37; Mt. 26:56; Mk. 14:49; Lk. 24:44). These passages alone would suffice to make clear to us the testimony of Jesus to Scripture as in all its parts and declarations divinely authoritative.

IV. Scripture in the Primitive Church.–The attempt to attribute the testimony of Jesus to His followers has in its favor only the undeniable fact that the testimony of the writers of the NT is to precisely the same effect as His. They, too, cursorily speak of Scripture by that pregnant name and adduce it with the simple "It is written," with the implication that whatever stands written in it is divinely authoritative. As Jesus' official life begins with this "It is written" (Mt. 4:4), so the evangelical proclamation begins with an "As it is written" (Mk. 1:2); and as Jesus sought the justification of His work in a solemn "Thus it is written, that the Christ should suffer, and on the third day rise from the dead" (Lk. 24:46), so the apostles solemnly justified the gospel which they preached, detail after detail, by appeal to the Scriptures, "That Christ died for our sins in accordance with the scriptures" and "That he was raised on the third day in accordance with the scriptures" (1 Cor. 15:3f.; cf. Acts 8:35; 17:3; 26:22; and also Rom. 1:17; 3:4, 10; 4:17; 11:26; 14:11; 1 Cor. 1:19; 2:9; 3:19; 15:45; Gal. 3:10, 13; 4:22, 27). Wherever they carried the gospel it was as a gospel resting on Scripture that they proclaimed it (Acts 17:2; 18:24, 28), and they encouraged themselves to test its truth by the Scriptures (Acts 17:11). The holiness of life that they inculcated, they based on scriptural requirement (1 Pet. 1:16), and they commended the royal law of love which they taught by scriptural sanction (Jas. 2:8). Every detail of duty was supported by them by an appeal to Scripture (Acts 23:5; Rom. 12:19). The circumstances of their lives and the events occasionally occurring about them are referred to Scripture for their significance (Rom. 2:26; 8:36; 9:33; 11:8; 15:9, 21; 2 Cor. 4:13). As Our Lord declared that whatever was written in Scripture must be fulfilled (Mt. 26:54; Lk. 22:37; 24:44), so His followers explained one of the most startling facts which had occurred in their experience by pointing out that "the scripture had to be fulfilled, which the Holy Spirit spoke beforehand by the mouth of David" (Acts 1:16).

Here the ground of this constant appeal to Scripture, so that it is enough that a thing "stands in scripture" (1 Pet. 2:6) for it to be of indefectible authority, is plainly enough declared: Scripture must be fulfilled, for what is contained in it is the declaration of the Holy Spirit through the human author. What Scripture says, God says; and accordingly we read such remarkable declarations as these: "For the scripture says to Pharaoh, 'I have raised you up for the very purpose . . .'" (Rom. 9:17); "And the scripture, forseeing that God would justify the Gentiles by faith, preached the gospel beforehand to Abraham, saying, 'In you shall all the nations be blessed'" (Gal. 3:8). These are not instances of simple personification of Scripture, which is itself a sufficiently remarkable usage (Mk. 15:28; Jn. 7:38, 42; 19:37; Rom. 4:3; 10:11; 11:2; Gal. 4:30; 1 Tim. 5:18; Jas. 2:23; 4:5f.), vocal with the conviction expressed by James (4:5) that Scripture cannot speak in vain. They indicate a certain confusion in contemporary speech between "Scripture" and "God," the outgrowth of a deep-seated conviction that the word of Scripture is the word of God. It was not "Scripture" that spoke to Pharaoh, or gave the great promise to Abraham, but God. But "Scripture" and "God" lay so close together in the minds of the writers of the NT that they could naturally speak of "Scripture" doing what Scripture records God as doing. It was, however, even more natural to them to speak casually of God saying what the Scriptures say; and accordingly we meet with forms of speech such as these: "Therefore, as the Holy Spirit says, 'Today when you hear His voice'" (He. 3:7, quoting Ps. 95:7); ". . . who by the mouth of our father David, thy servant, didst say by the Holy Spirit, 'Why did the Gentiles rage . . . ?'" (Acts 4:25 quoting Ps. 2:1); "that He raised him from the dead . . . he spoke in this way, 'I will give you . . .' Therefore he says also in another psalm. . . ." (Acts 13:34f., quoting Isa. 55:3 and Ps. 16:10), and the like. The words put into God's mouth in each case are not words of God recorded in the Scriptures, but just Scripture words in themselves. When we take the two classes of passages together, in the one of which the Scriptures are spoken of as God, while in the other God is spoken of as if He were the Scriptures, we may perceive how close the identification of the two was in the minds of the writers of the NT.

This identification is strikingly observable in certain catenae of quotations, in which there are brought together a number of passages of Scripture closely connected with

one another. The first chapter of the Epistle to the Hebrews supplies an example. We may begin with v. 5: "For to what angel did God ever say, 'Thou art my Son, today I have begotten thee'?" — the citation being from Ps. 2:7 and very appropriate in the mouth of God — "or again, 'I will be to him a father, and he shall be to me a son'?" — from 2 S. 7:14, again a declaration of God's own — "And again, when he brings the first-born into the world, he says, 'Let all God's angels worship him'" — from Dt. 32:43 (LXX) or Ps. 97:7, in neither of which is God the speaker — "Of the angels he says, 'Who makes his angels winds, and his servants flames of fire'" — from Ps. 104:4, where again God is not the speaker but is spoken of in the third person — "But of the Son he says, 'Thy throne, O God . . .'" — from Ps. 45:6f. [MT 7f.] where again God is not the speaker, but is addressed — "Thou, Lord. . . ," — from Ps. 102:25-27 [MT 26-28], where again God is not the speaker but is addressed — "But to what angel has he ever said, 'Sit at my right hand . . .'?" — from Ps. 110:1, in which God is the speaker. Here not only passages in which God is the speaker but also passages in which God is not the speaker (but is addressed or spoken of) are indiscriminately assigned to God, because they all have in common that they are words of Scripture, and as words of Scripture are words of God. Similarly in Rom. 15:9-12 we have a series of citations the first of which is introduced by "As it is written," and the next two by "again it is said," and "again," and the last by "and further Isaiah says," the first being from Ps. 18:49 [MT 50]; the second from Dt. 32:43; the third from Ps. 117:1; and the last from Isa. 11:10. Only the last (the only one here assigned to the human author) is a word of God in the text of the OT.

This view of the Scriptures as a compact mass of words of God occasioned the formation of a designation for them by which this their character was explicitly expressed. This designation is "the sacred oracles," "the oracles of God." It occurs with extraordinary frequency in Philo, who very commonly refers to Scripture as "the sacred oracles" and cites its several passages as each an "oracle." Sharing, as they do, Philo's conception of the Scriptures as, in all their parts, a word of God, the NT writers naturally also speak of them under this designation. The classical passage is Rom. 3:1f. (cf. He. 5:12; Acts 7:38). Here Paul begins an enumeration of the advantages which belonged to the chosen people above other nations. Declaring these advantages to have been great and numerous, he places first among them all their possession of the Scriptures: "Then what advantage has the Jew? Or what is the value of circumcision? Much in every way. To begin with, the Jews are entrusted with the oracles of God." That by "the oracles of God" here are meant just the Holy Scriptures in their entirety, conceived as a direct divine revelation, and not any portions of them, or elements in them more especially thought of as revelatory, is perfectly clear from the wide contemporary use of this designation in this sense by Philo, and is put beyond question by the presence in the NT of habits of speech which rest on and grow out of the conception of Scripture embodied in this term. From the point of view of this designation, Scripture is thought of as the living voice of God speaking in all its parts directly to the reader. Accordingly, it is cited by some such formula as "it is said," and this mode of citing Scripture duly occurs as an alternative to "it is written" (Lk. 4:12, replacing "it is written" in Matthew; He. 3:15; cf. Rom. 4:18). It is due also to this point of view that Scripture is cited, not as what God or the Holy Spirit "said," but what He "says," the present tense emphasizing the living voice of God speaking in Scriptures to the individual soul (He. 3:7; Acts 13:35; He. 1:7-10; Rom. 15:10). And especially there is due to it the peculiar usage by which Scripture is cited by the simple "says," without expressed subject, the subject being too well understood, when Scripture is adduced, to require stating; for who could be the speaker of the words of Scripture but God only (Rom. 15:10; 1 Cor. 6:16; 2 Cor. 6:2; Gal. 3:16; Eph. 4:8; 5:14)? The analogies of this pregnant subjectless "says" are very widespread. It was with it that the ancient Pythagoreans and Platonists and the medieval Aristotelians adduced each their master's teaching; it was with it that, in certain circles, the judgments of Hadrian's great jurist Salvius Julianus were cited; African stylists were even accustomed to refer by it to Sallust, their great model.

There is a tendency, cropping out occasionally, in the OT, to omit the name of God as superfluous, when He, as the great logical subject always in mind, would be easily understood (cf. Job 20:23; 21:17; Ps. 114:2; Lam. 4:22). So, too, when the NT writers quoted Scripture there was no need to say whose word it was: that lay beyond question in every mind. This usage, accordingly, is a specially striking intimation of the vivid sense which the NT writers had of the divine origin of the Scriptures, and means that in citing them they were acutely conscious that they were citing immediate words of God. How completely the Scriptures were to them just the word of God may be illustrated by a passage like Gal. 3:16: "It does not say, 'And to offsprings,' referring to many; but, referring to one, 'And to your offspring,' which is Christ." We have seen Our Lord hanging an argument on the very words of Scripture (Jn. 10:34); elsewhere His reasoning depends on the particular tense (Mt. 22:32) or word (Mt. 22:43) used in Scripture. Here Paul's argument rests similarly on a grammatical form. No doubt it is the grammatical form of the word which God is recorded as having spoken to Abraham that is in question. But Paul knows what grammatical form God employed in speaking to Abraham only as the Scriptures have transmitted it to him; and, as we have seen, in citing the words of God and the words of Scripture he was not accustomed to make any distinction between them. It is probably the Scriptural word as a Scriptural word, therefore, which he has here in mind: though, of course, it is possible that what he here witnesses to is rather the detailed trustworthiness of the Scriptural record than its direct divinity — if we can separate two things which apparently were not separated in Paul's mind. This much we can at least say without straining, that the designation of Scripture as "scripture" and its citation by the formula "It is written" attest primarily its indefectible authority; the designation of it as "oracles" and the adduction of it by the formula "It says" attest primarily its immediate divinity. Its authority rests on its divinity and its divinity expresses itself in its trustworthiness; and the NT writers in all their use of it treat it as what they declare it to be — a God-breathed document, which, because God-breathed, is through and through trustworthy in all its assertions, authoritative in all its declarations, and down to its last particular, the very word of God, His "oracles."

V. Human and Divine Aspects.–That the Scriptures are throughout a divine book, created by the divine energy and speaking in every part with divine authority directly to the heart of the readers, is the fundamental fact concerning them which is witnessed by Christ and the sacred writers to whom we owe the NT. But the strength and constancy with which they bear witness to this primary fact do not prevent their recognizing by the side of it that the Scriptures have come into being by human agency. It would be inexact to say that they recognize a human

element in Scripture: they do not parcel Scripture out, assigning portions of it, or elements in it, respectively to God and man. In their view the whole of Scripture in all its parts and in all its elements, down to the least minutiae, in form of expression as well as in substance of teaching, is from God; but the whole of it has been given by God through the instrumentality of men. There is, therefore, in their view, not, indeed, a human element or ingredient in Scripture, and much less human divisions or sections of Scripture, but a human side or aspect to Scripture; and they do not fail to give full recognition to this human side or aspect. In one of the primary passages which has already been before us, their conception is given, if somewhat broad and very succinct, yet clear expression. No "prophecy," Peter tells us (2 Pet. 1:21), "ever came by human impulse but men moved by the Holy Spirit spoke from God." Here the whole initiative is assigned to God, and such complete control of the human agents that the product is truly God's work. The men who speak in this "prophecy of scripture" speak not of themselves or out of themselves, but from "God": they speak only as they are "moved by the Holy Spirit." But it is they, after all, who speak. Scripture is the product of man, but only of man speaking from God and under such control of the Holy Spirit as that in their speaking they are "moved" by Him. The conception obviously is that the Scriptures have been given by human instrumentality; and this conception finds repeated incidental expression throughout the NT.

It is this conception, for example, which is expressed when Our Lord, quoting Ps. 110, declares of its words that "David himself, inspired by the Holy Spirit, declared" (Mk. 12:36). There is a certain emphasis here on the words being David's own words, which is due to the requirements of the argument Our Lord was conducting, but which nonetheless sincerely represents Our Lord's conception of their origin. They are David's own words which we find in Ps. 110, therefore; but they are David's own words, spoken not of his own motion merely, but "in the Holy Spirit," that is to say — we could not better paraphrase it — "as moved by the Holy Spirit." In other words, they are "God-breathed" words and therefore authoritative in a sense above what any words of David, not spoken in the Holy Spirit, could possibly be. Generalizing the matter, we may say that the words of Scripture are conceived by Our Lord and the NT writers as the words of their human authors when speaking "in the Holy Spirit," that is to say, by His initiative and under His controlling direction. The conception finds even more precise expression, perhaps, in such a statement as we find — it is Peter who is speaking and it is again a Psalm which is cited — in Acts 1:16, "the Holy Spirit spoke beforehand by the mouth of David." Here the Holy Spirit is adduced, of course, as the real author of what is said (and hence Peter's certainty that what is said will be fulfilled); but David's mouth is expressly designated as the instrument (it is the instrumental preposition that is used) by means of which the Holy Spirit speaks the Scripture in question. He does not speak except through David's mouth. Accordingly, in Acts 4:24f., the "Lord, who didst make the heaven and the earth," acting by His Holy Spirit, is declared to have spoken another Psalm "by the mouth of our father David," His "servant"; and in Mt. 13:35 still another Psalm is adduced as "spoken by the prophet" (cf. Mt. 2:5). In the very act of energetically asserting the divine origin of Scripture the human instrumentality through which it is given is constantly recognized. The NT writers have, therefore, no difficulty in assigning Scripture to its human authors, or in discovering in Scripture traits due to its human authorship. They freely quote it by such simple formulas as these: "Moses says" (Rom. 10:19); "Moses said" (Mt. 22:24; Mk. 7:10; Acts 3:22); "Moses writes" (Rom. 10:5); "Moses wrote" (Mk. 12:19; Lk. 20:28); "Isaiah . . . to say" (Rom. 10:20); "Isaiah said" (Jn. 12:39); "Isaiah cries" (Rom. 9:27); "as Isaiah predicted" (Rom. 9:29); "said Isaiah the prophet" (Jn. 1:23); "did Isaiah prophesy" (Mk. 7:6; Mt. 15:7); "David says" (Lk. 20:42; Acts 2:25; Rom. 11:9); "David said" (Mk. 12:36). It is to be noted that when thus Scripture is adduced by the names of its human authors, it is a matter of complete indifference whether the words adduced are comments of these authors or direct words of God recorded by them. As the plainest words of the human authors are assigned to God as their real author, so the most express words of God, repeated by the scriptural writers, are cited by the names of these human writers (Mt. 15:7; Mk. 7:6; Rom. 10:5, 19f.; cf. Mk. 7:10 from the Decalogue). "Moses says" or "David says" is evidently thus only a way of saying that "Scripture says," which is the same as to say that "God says."

Such modes of citing Scripture, accordingly, carry us little beyond merely connecting the name, or perhaps we may say the individuality, of the several writers with the portions of Scripture given through each. How it was given through them is left meanwhile, if not without suggestion, yet without specific explanation. We seem safe only in inferring this much: that the gift of Scripture through its human authors took place by a process much more intimate than can be expressed by the term "dictation," and that it took place in a process in which the control of the Holy Spirit was too complete and pervasive to permit the human qualities of the secondary authors in any way to condition the purity of the product as the word of God. The Scriptures, in other words, are conceived by the writers of the NT as through and through God's book, in every part expressive of His mind, given through people after a fashion which does no violence to their human nature and constitutes the book also mankind's book as well as God's, in every part expressive of the mind of its human authors.

If we attempt to get behind this broad statement and to obtain a more detailed conception of the activities by which God has given the Scriptures, we are thrown back upon somewhat general representations, supported by the analogy of the modes of God's working in other spheres of His operation. It is very desirable that we should free ourselves at the outset from influences arising from the common employment of the term "inspiration" to designate this process. This term is not a biblical term and its etymological implications are not perfectly accordant with the biblical conception of the modes of the divine operation in giving the Scriptures. The biblical writers do not conceive of the Scriptures as a human product breathed into by the divine Spirit, and thus heightened in its qualities or endowed with new qualities, but as a divine product produced through human instrumentality. They do not conceive of these people, by whose instrumentality Scripture is produced, as working upon their own initiative, though energized by God to greater effort and higher achievement, but as moved by the divine initiative and borne by the irresistible power of the Spirit of God along ways of His choosing to ends of His appointment. The difference between the two conceptions may not appear great when the mind is fixed exclusively upon the nature of the resulting product. But they are differing conceptions, and look at the production of Scripture from distinct points of view — the human and the divine; and the involved mental attitudes toward the origin of Scrip-

ture are very diverse. The term "inspiration" is too firmly fixed, in both theological and popular usage, as the technical designation of the action of God in giving the Scriptures, to be replaced; and we may be thankful that its native implications lie as close as they do to the biblical conceptions. Meanwhile, however, it may be justly insisted that it shall receive its definition from the representations of Scripture, and not be permitted to impose upon our thought ideas of the origin of Scripture derived from an analysis of its own implications, etymological or historical. The scriptural conception of the relation of the divine Spirit to the human authors in the production of Scripture is better expressed by the figure of being "moved" than by the figure of "inbreathing"; and when our biblical writers speak of the action of the Spirit of God in this relation as a breathing, they represent it as a "breathing out" of the Scriptures by the Spirit, and not a "breathing into" the Scriptures by Him.

So soon, however, as we seriously endeavor to form for ourselves a clear conception of the precise nature of the divine action in this "breathing out" of the Scriptures — this "moving" of the writers of the Scriptures to their appointed goal of the production of a book of divine trustworthiness and indefectible authority — we become acutely aware of a more deeply lying and much wider problem, apart from which this one of inspiration, technically so called, cannot be profitably considered. This is the general problem of the origin of the Scriptures and the part of God in all that complex of processes by the interaction of which these books, which we call the sacred Scriptures, with all their peculiarities, and all their qualities of whatever sort, have been brought into being. For, of course, these books were not produced suddenly, by some miraculous act — handed down complete out of heaven, as the phrase goes; but, like all other products of time, are the ultimate result of many processes through long periods. There is to be considered, for instance, the preparation of the material which forms the subject matter of these books: in a sacred history, say, for example, to be narrated; or in a religious experience which may serve as a norm for record; or in a logical elaboration of the contents of revelation which may be placed at the service of God's people; or in the progressive revelation of divine truth itself, supplying their culminating contents. And there is the preparation of the men to write these books to be considered, a preparation physical, intellectual, spiritual, which must have attended them throughout their whole lives, and, indeed, must have had its beginning in their remote ancestors, and the effect of which was to bring the right men to the right places at the right times, with the right endowments, impulses, acquirements, to write just the books which were designed for them. When "inspiration," technically so called, is superinduced on lines of preparation like these, it takes on quite a different aspect from that which it bears when it is thought of as an isolated action of the divine Spirit operating out of all relation to historical processes. Representations are sometimes made as if, when God wished to produce sacred books which would incorporate His will — a series of letters like those of Paul, for example — He was reduced to the necessity of going down to earth and painfully scrutinizing the men He found there, seeking anxiously for the one who, on the whole, promised best for His purpose; and then violently forcing the material He wished expressed through him, against his natural bent, and with as little loss from his recalcitrant characteristics as possible. Of course, nothing of the sort took place. If God wished to give His people a series of letters like Paul's, He prepared a Paul to write them, and the Paul He brought to the task was a Paul who spontaneously would write just such letters.

If we bear this in mind, we shall know what estimate to place upon the common representation to the effect that the human characteristics of the writers must, and in point of fact do, condition and qualify the writings produced by them, the implication being that, therefore, we cannot get from man a pure word of God. As light that passes through the colored glass of a cathedral window, we are told, is light from heaven, but is stained by the tints of the glass through which it passes; so any word of God that is passed through the mind and soul of a man must come out discolored by the personality through which it is given, and just to that degree ceases to be the pure word of God. But what if this personality has itself been formed by God into precisely the personality it is, for the express purpose of communicating to the word given through it just the coloring which it gives it? What if the colors of the stained glass window have been designed by the architect for the express purpose of giving to the light that floods the cathedral precisely the tone and quality it receives from them? What if the word of God that comes to His people is framed by God into the word of God it is, precisely by means of the qualities of the men formed by Him for the purpose, through which it is given? When we think of God giving by His Spirit a body of authoritative Scriptures to His people, we must remember that He is the God of providence and of grace as well as of revelation and inspiration, and that He holds all the lines of preparation as fully under His direction as He does the specific operation which we call technically, in the narrow sense, by the name of "inspiration."

The production of the Scriptures is, in point of fact, a long process, in the course of which numerous and very varied divine activities are involved, providential, gracious, miraculous, all of which must be taken into account in any attempt to explain the relation of God to the production of Scripture. When they are all taken into account we can no longer wonder that the resultant Scriptures are constantly spoken of as the pure word of God. We wonder, rather, that an additional operation of God — what we call specifically "inspiration," in its technical sense — was thought necessary. Consider, for example, how a piece of sacred history — say the book of Chronicles, or the great historical work, Gospel and Acts, of Luke — is brought to the writing. There is first of all the preparation of the history which will be the theme: God leads the sequence of occurrences through the development He has designed for them that they may convey their lessons to His people: a "teleological" or "aetiological" character is inherent in the very course of events. Then He prepares a man, by birth, training, experience, gifts of grace, and, if need be, of revelation, capable of appreciating this historical development and eager to search it out, deeply interested in its lessons and bent upon making them clear and effective to others. When by His providence, God sets this man to work on the writing of this history, will there not be spontaneously written by him the history which it was divinely intended should be written? Or consider how a psalmist would be prepared to put into verse a piece of normative religious experience: how he would be born with just the right quality of religious sensibility, of parents through whom he should receive just the right hereditary inclination, and from whom he should get precisely the right religious example and training, in circumstances of life in which his religious tendencies should be developed precisely on right lines; how he would be brought through just the right experiences to quicken in him the precise emotions he would be called upon to express, and

finally would be placed in precisely the exigencies which would call out their expression. Or consider the providential preparation of a writer of a didactic epistle — by means of which he should be given the intellectual breadth and acuteness, and be trained in habits of reasoning, and placed in the situations which would call out precisely the argumentative presentation of Christian truth that was required of him. When we give due place in our thoughts to the universality of the providential government of God, to the minuteness and completeness of its sway, and to its invariable efficacy, we may be inclined to ask what is needed beyond this mere providential government to secure the production of sacred books which should be in every detail absolutely accordant with the divine will.

The answer is that nothing is needed beyond mere providence to secure such books — provided only that it does not lie in the divine purpose that these books should possess qualities which rise above the powers of men to produce, even under the most complete divine guidance. For providence is guidance; and guidance can bring one only so far as his own power can carry him. If heights are to be scaled above man's native power to achieve, then something more than guidance, however effective, is necessary. This is the reason for the superinduction, at the end of the long process of the production of Scripture, of the additional divine operation which we call technically "inspiration." By it, the Spirit of God, flowing confluently in with the providentially and graciously determined work of men, spontaneously producing under the divine directions the writings appointed to them, gives the product a divine quality unattainable by human powers alone. Thus these books become not merely the word of godly men, but the immediate word of God Himself, speaking directly as such to the minds and hearts of every reader. The value of "inspiration" emerges, thus, as twofold. It gives to the books written under its "moving" a quality which is truly superhuman; a trustworthiness, an authority, a searchingness, a profundity, a profitableness which is altogether divine. And it speaks this divine word immediately to each reader's heart and conscience; so that he does not require to make his way to God, painfully, perhaps even uncertainly, through the words of His servants, the human instruments in writing the Scriptures, but can listen directly to the divine voice itself speaking immediately in the scriptural word to him.

That the writers of the NT themselves conceive the Scriptures to have been produced thus by divine operations extending through the increasing ages and involving a multitude of varied activities, can be made clear by simply attending to the occasional references they make to this or that step in the process. It lies, for example, on the face of their expositions, that they looked upon the biblical history as teleological. Not only do they tell us that "whatever was written in former days was written for our instruction, that by steadfastness and by the encouragement of the scriptures we might have hope" (Rom. 15:4; cf. Rom. 4:23f.); they speak also of the course of the historical events themselves as guided for our benefit: "Now these things happened to them as a warning" — in a typical fashion, in such a way that, as they occurred, a typical character, or predictive reference impressed itself upon them; that is to say, briefly, the history occurred as it did in order to bear a message to us — "but they were written down for our instruction, upon whom the end of the ages has come" (1 Cor. 10:11; cf. v. 6). Accordingly, it has become a commonplace of biblical exposition that "the history of redemption itself is a typically progressive one" (Küper), and is "in a manner impregnated with the prophetic element," so as to form a "part of a great plan which stretches from the fall of man to the first consummation of all things in glory; and, in so far as it reveals the mind of God toward man, carries a respect to the future not less than to the present" (P. Fairbairn).

It lies equally on the face of the NT allusions to the subject that its writers understood that the preparation of men to become vehicles of God's message to mankind was not recent, but had its beginnings in the very origin of their being. The call by which Paul, for example, was made an apostle of Jesus Christ was sudden and apparently without antecedents; but it is precisely this Paul who reckons this call as only one step in a long process, the beginnings of which antedated his own existence: "But when he who had set me apart before I was born, and had called me through his grace, was pleased to reveal his Son to me" (Gal. 1:15f.; cf. Jer. 1:5; Isa. 49:1, 5). The recognition by the writers of the NT of the experiences of God's grace, which had been vouchsafed to them as an integral element in their fitting to be the bearers of His gospel to others, finds such pervasive expression that the only difficulty is to select from the mass the most illustrative passages. Such a statement as Paul gives in the opening verses of 2 Corinthians is thoroughly typical. There he represents that he has been afflicted and comforted to the end that he might "be able to comfort those who are in any affliction, through the comfort with which" he had himself been "comforted by God." For, he explains, "If we are afflicted, it is for your comfort and salvation; and if we are comforted, it is for your comfort, which you experience when you patiently endure the same sufferings that we suffer" (2 Cor. 1:4–6). It is beyond question, therefore, that the NT writers, when they declare the Scriptures to be the product of the divine breath, and explain this as meaning that the writers of these Scriptures wrote them only as moved by the Holy Spirit in such a fashion that they spoke, not out of themselves, but "from God," are thinking of this operation of the Spirit only as the final act of God in the production of the Scriptures, superinduced upon a long series of processes, providential, gracious, miraculous, by which the matter of Scripture had been prepared for writing, and the men for writing it, and the writing of it had been actually brought to pass. It is this final act in the production of Scripture which is technically called "inspiration"; and inspiration is thus brought before us as, in the minds of the writers of the NT, that particular operation of God in the production of Scripture which takes effect at the very point of the writing of Scripture — understanding the term "writing" here as inclusive of all the processes of the actual composition of Scripture, the investigation of documents, the collection of facts, the formation of conclusions, the adaptation of exhortations as means to ends and the like — with the effect of giving to the resultant Scripture a specifically supernatural character, and constituting it a divine, as well as human, book. Obviously the mode of operation of this divine activity moving to this result is conceived, in full accord with the analogy of the divine operations in other spheres of its activity, in providence and in grace alike, as confluent with the human activities operative in the case; as in a word, of the nature of what has come to be known as "immanent action."

It will not escape observation that thus "inspiration" is made a mode of "revelation." We are often exhorted, to be sure, to distinguish sharply between "inspiration" and "revelation"; and the exhortation is just when "revelation" is taken in one of its narrower senses, of, say, an external manifestation of God, or of an immediate communication from God in words. But "inspiration"

does not differ from "revelation" in these narrowed senses as genus from genus, but as a species of one genus differs from another. That operation of God which we call "inspiration," the operation of the Spirit of God by which He "moves" men in the process of composing Scripture, so that they write not of themselves, but "from God," is one of the modes in which God makes known to us His being, His will, His operations, His purposes. It is as distinctly a mode of revelation as any mode of revelation can be, and therefore it performs the same office which all revelation performs. In the words of Paul, it makes people wise, and makes them wise unto salvation. All "special" or "supernatural" revelation (which is redemptive in its very idea, and occupies a place as a substantial element in God's redemptive processes) has precisely this for its end; and Scripture, as a mode of the redemptive revelation of God, finds its fundamental purpose just in this: if the "inspiration" by which Scripture is produced renders it trustworthy and authoritative, it renders it trustworthy and authoritative only that it may the better serve to make us wise unto salvation. Scripture is conceived, from the point of view of the writers of the NT, not merely as the record of revelations, but as itself a part of the redemptive revelation of God; not merely as the record of the redemptive acts by which God is saving the world, but as itself one of these redemptive acts, having its own part to play in the great work of establishing and building up the kingdom of God. What gives it a place among the redemptive acts of God is its divine origination, taken in its widest sense, as inclusive of all the divine operations, providential, gracious, and expressly supernatural, by which it has been made just what it is — a body of writings able to make wise unto salvation, and profitable for making the child of God perfect. What gives it its place among the modes of revelation is, however, specifically the culminating one of these divine operations, which we call "inspiration"; that is to say, the action of the Spirit of God in so "moving" its human authors in their work of producing Scripture, that in these Scriptures they speak, not out of themselves, but "from God." It is this act by virtue of which the Scriptures may properly be called "God-breathed."

It has been customary among a certain school of writers to speak of the Scriptures, because thus "inspired," as a divine-human book, and to appeal to the analogy of Our Lord's divine-human personality to explain their peculiar qualities as such. The expression calls attention to an important fact, and the analogy is true to a degree. There are human and divine sides to Scripture, and, as we examine it, we may perceive in it, alternately, traits which suggest first the one, then the other factor in its origin. But the analogy with Our Lord's divine-human personality may easily be pressed beyond reason. There is no hypostatic union between the divine and the human in Scripture; we cannot parallel the "inscripturation" of the Holy Spirit and the incarnation of the Son of God. The Scriptures are merely the product of human forces working under the initiation and prevalent direction of the divine; the person of Our Lord unites in itself divine and human natures, each of which retains its distinctness while operating only in relation to the other. Between such diverse things there can exist only a remote analogy; and, in point of fact, the analogy in the present instance amounts to no more than that in both cases divine and human factors are involved, though very differently. In the one they unite to constitute a divine-human person; in the other they cooperate to perform a divine-human work. Even so distant an analogy may enable us, however, to recognize that as in the case of Our Lord's person, the human nature remains truly human and can never fall into sin or error because it can never act out of relation with the divine nature into conjunction with which it has been brought; so in the case of the production of Scripture by the joint action of human and divine factors, the human factors have acted as human factors and have left their mark on the product as such, and yet cannot have fallen into that error which we say it is human to fall into, because they have not acted apart from the divine factors, by themselves, but only under their unerring guidance.

The NT testimony is to the divine origin and qualities of "Scripture"; and "Scripture" to the writers of the NT was fundamentally, of course, the OT. In the primary passage, in which we are told that "every" or "all Scripture" is "God-breathed," the direct reference is to the "sacred writings" which Timothy had known since his infancy, and these were, of course, just the sacred books of the Jews (2 Tim. 3:16). What is explicit here is implicit in all the allusions to inspired Scriptures in the NT. Accordingly, it is frequently said that our entire testimony to the inspiration of Scripture concerns the OT alone. In many ways, however, this is overstated. Our present concern is not with the extent of "Scripture" but with the nature of "Scripture"; and we cannot present here the considerations which justify extending to the NT the inspiration which the NT writers attribute to the OT. It will not be out of place, however, to point out simply that the NT writers obviously themselves made this extension. They do not for an instant imagine themselves, as ministers of a new covenant, less in possession of the Spirit of God than the ministers of the old covenant: they freely recognize, indeed, that they have no sufficiency of themselves, but they know that God has made them sufficient (2 Cor. 3:5f.). They perform their work of proclaiming the gospel, therefore, in full confidence that they speak "by the Holy Spirit" (1 Pet. 1:12), to whom they attribute both the matter and form of their teaching (1 Cor. 2:13). They, therefore, speak with the utmost assurance of their teaching (Gal. 1:7f.); and they issue commands with the completest authority (1 Thess. 4:2, 14; 2 Thess. 3:6, 12), making it, indeed, the test of whether one has the Spirit that he should recognize what they demand as commandments of God (1 Cor. 14:37). It would be strange, indeed, if these high claims were made for their oral teaching and commandments exclusively. In point of fact, they are made explicitly also for their written injunctions. It was "the things" which Paul was "writing," the recognition of which as commands of the Lord he makes the test of a Spirit-led person (1 Cor. 14:37). It is his obedience to "what we say in this letter" that makes the condition of Christian communion (2 Thess. 3:14). There seems involved in such an attitude toward their own teaching, oral and written, a claim on the part of the NT writers to something very much like the "inspiration" which they attribute to the writers of the OT.

And all doubt is dispelled when we observe the NT writers placing the writings of one another in the same category of "Scripture" with the books of the OT. The same Paul who, in 2 Tim. 3:16, declared that "every [or "all"] scripture is God-breathed" had already written in 1 Tim. 5:18, "for the scripture says, 'You shall not muzzle an ox when it is treading out the grain,' and 'The laborer deserves his wages.'" The first clause here is derived from Deuteronomy and the second from the Gospel of Luke, though both are cited as together constituting, or better, forming part of the "scripture" which Paul adduces as so authoritative as by its mere citation to end all strife. Who shall say that, in the declaration of the later epistle that "all" or "every" Scripture is God-

breathed, Paul did not have Luke and, along with Luke, whatever other new books he classed with the old under the name of Scripture, in the back of his mind, along with those old books which Timothy had had in his hands from infancy? And the same Peter who declared that every "prophecy of scripture" was the product of men who spoke "from God," being "moved" by the Holy Spirit (2 Pet. 1:21), in this same epistle (3:16), places Paul's epistles in the category of Scripture along with whatever other books deserve that name. For Paul, says he, wrote these epistles, not out of his own wisdom, but "according to the wisdom given him," and though there are some things in them difficult to understand, yet it is only "the ignorant and unstable" who wrest these difficult passages — as what else could be expected of men who wrest "the other scriptures" (obviously the OT is meant) — "to their own destruction"? Is it possible to say that Peter could not have had these Epistles of Paul also lurking somewhere in the back of his mind, along with "the other scriptures," when he told his readers that every "prophecy of scripture" owes its origin to the prevailing operation of the Holy Spirit? What must be understood in estimating the testimony of the NT writers to the inspiration of Scripture is that "Scripture" stood in their minds as the title of a unitary body of books, throughout the gift of God through His Spirit to His people; but that this body of writings was at the same time understood to be a growing aggregate, so that what is said of it applies to the new books which were being added to it as the Spirit gave them, as fully as to the old books which had been previously received. It is a mere matter of detail to determine precisely what new books were thus included by them in the category "Scripture." They tell us some of them themselves. Those who received them from their hands tell us of others. And when we put the two bodies of testimony together we find that they constitute just our NT. It is no distortion of the witness of the writers of the NT to the inspiration of the Scripture, therefore, to look upon it as covering the entire body of "Scriptures," the new books which they were themselves adding to this aggregate, as well as the old books which they had received as Scripture from the fathers. Whatever can lay claim to the appellation of "Scripture," as employed in its eminent sense by those writers, can by the same just right lay claim to the "inspiration" which they ascribe to this "Scripture."

INSPIRATION, HISTORY OF THE DOCTRINE OF.

I. Early Church
II. Patristic Period
III. Medieval Church
IV. Reformation
V. Post-Reformation Period
VI. Eighteenth-Century Rationalism
VII. Conclusion

The starting point of the Church's doctrine of inspiration is obviously to be found in the self-witness of the Bible itself. As far as the OT is concerned, both the Law and the prophetic writings purport to come from God; and in specific cases the NT links the giving of messages through human speakers or writers with the activity of the Holy Spirit. Inspiration thus arises naturally and necessarily from the divine source and authority. Nor does it refer only to an ecstatic upsurge of the human spirit; the reference is plainly to the inworking of the Holy Spirit. In the NT it is made clear that divine authority extends to the whole of the OT; for example, Our Lord shows His disciples "in all the scriptures the things concerning himself" (Lk. 24:27). Again, the activity of the Holy Spirit is given a general reference. We read that the psalmist speaks in the Spirit in Ps. 110 (Mt. 22:43). And finally, the two primary verses in 2 Tim. 3:16 and 2 Pet. 1:21 tell us that "all scripture is given by inspiration of God," and that "holy men of God spake as they were moved by the Holy Ghost" (AV).

It is to be noted that the linking of the biblical writings with the Holy Spirit means that they are brought into direct relationship with the work of the Spirit, namely, to bear witness to Jesus Christ. This is true of the OT with its prophetic testimony, for we read that Jesus Himself said of these writings: "They are they which testify of me" (Jn. 5:39). But it is also true of the NT, and gives the backward-looking apostolic testimony an assured place alongside the prophetic. For in Jn. 14:26 we are told that the Holy Spirit would bring all things to the remembrance of the apostles; in Acts (e.g., 2:4; 4:8; *et passim*) we find that the Holy Spirit is their coworker, and in 2 Pet. 3:16 there is a classification of the Epistles of Paul with the Scriptures which certifies the divine authority of this written testimony.

A derivative point specifically developed in 2 Cor. 3 (cf. 1 Cor. 1 and 2) is that the Holy Spirit who gave the Scriptures is the living Lord, whose voice must be heard in and through Scripture if its message is to be understood and received. This continuing work of the Spirit does not seem to be described by the Bible as the proper work of inspiration. But it is an unavoidable implication. If the message is really from the Holy Spirit, it cannot be received merely by the natural understanding. Without the Holy Spirit it can be read only on the level of the human letter. What is given by the Spirit must be read in the Spirit. To the objective inspiration of Scripture there corresponds the subjective illumination of the understanding, which safeguards the doctrine against the constant threat of an "Apollinarian" interpretation and the consequent notion of *ex opere operato* (automatic operation).

I. Early Church.—It is as well to mention this derivative point at once because one of the alien influences to which the early Church was also exposed tended to press it in the direction of this distorted interpretation. This was the Jewish or Judaistic understanding to which there is an oblique allusion in Jn. 5:39f., and to which Paul is specifically referring in 2 Cor. 3. To be sure, the Jews stood for a high doctrine of inspiration, particularly in relation to the Law. To the extent that their teaching helped to safeguard the Church against the equation of the Bible with "inspired" religious literature we may describe it as salutary. For after all, it had its roots in the Bible itself. But it carried with it a threefold danger. In the first place, it tended to abstract the divine nature and authority of the Bible from the human authors and situations, i.e., from the whole movement of God's saving work in and through the history of Israel and the persons concerned. Second, it clearly abstracted the Bible from the object of its witness when it failed or refused to see in Jesus Christ the object of its witness, thus being left with a mere textbook of doctrine, ethics, and ceremonies. Third, in rejecting Jesus Christ it refused the witness of the Holy Spirit, so that in its reading the OT was deprived of its living power. The result of this threefold abstraction is the contradiction that the human element in the Bible is almost completely subsumed into the divine on the one side, whereas in practice the divine and authoritative text falls victim to only too human exegesis and schematization on the other.

The Judaistic was not, of course, the only danger threatening the infant Church. Gentile Christians especially were perhaps even more vulnerable to pagan notions. For the heathen religions also had their inspiration, whether in the ecstatic utterances and movements of devotees, the pronouncements of the oracles, the writings of the Sybillines, or literature generally. A writer like Philo had already succumbed to the temptation to bring together the prophetic inspiration of the OT and these pagan phenomena. After all, had not the early prophets given evidence of this type of ecstatic possession? The statement of Plato: "And for this reason God takes away the mind of these men and uses them as his ministers, just as he does soothsayers and godly seers, in order that we who hear them may know... that it is God Himself who speaks and addresses us through them" (*Ion* 533), thus finds a clear parallel in Philo's interpretation of the OT: "For a prophet has no utterances of his own, but all his utterances come from elsewhere, the echoes of another's voice... he is the vocal instrument of God smitten and played by His invisible hand" (*Quis rerum divinarum heres* 259). In some sense, this is no less a high view than that of Judaism, and it has the advantage of emphasizing the living movement. But apart from its pagan associations, it has the same twofold and apparently contradictory disadvantage of destroying the human element on the one side, yet in so doing, of reducing inspiration to a familiar and psychologically explicable human phenomenon on the other.

II. Patristic Period.–When we turn to the patristic period we are struck at once by the way in which all writers accepted the inspiration and authority of Holy Scripture as self-evident. The actual writings of the OT and NT are seen to derive from the Holy Spirit and therefore carry the divine message. Nor is this merely a general inspiration; it extends to the detailed phraseology of the Bible in accordance with the saying of Christ in Mt. 5:18. Thus Clement of Alexandria tells us that not one jot nor tittle can pass because all has been spoken by the mouth of the Lord (*Protrepticus* ix.82.1); and Gregory Nazianzus writes that even the smallest lines in Scripture are due to the minute care of the Holy Spirit, so that we must pay careful attention to every slightest shade of meaning (*Oratio* 2.105). In order to emphasize the perfection and authority of the Scriptures, Irenaeus can say that its words are actually spoken by God Himself through His Word and Spirit (*Adv. haer.* ii.28.2). What the authors say is really said by God Himself, and must be received and studied not merely or primarily as the word of man but as the Word of God. This emphasis on the divine inspiration of the Bible is obviously reflected again in the many statements in the fathers which refer to the supreme authority of the Bible in the Church, as in the dictum of Augustine quoted in Cranmer's *Confutation of Unwritten Verities:* "For I do not account Cyprian's writings as canonical, but weigh them by the canonical scriptures; and that in them which agreeth with canonical I allow to his praise; but that that agreeth not, by his favour I refuse" (Parker Society ed., II, p. 33).

There can be little doubt that a sound and scriptural doctrine of inspiration was for the most part maintained and developed in the patristic period. The primary fact of inspiration was never in doubt. There was no temptation to restrict its range to favored passages of the Bible. It was not abstracted from the true theme of the Bible in Jesus Christ, the temptation in most writers being to find rather fanciful and extravagant allusions to Christ and His work in the most unlikely ways and places (cf. especially the Epistle of Barnabas). And no attempt was made to work out a systematic understanding of inspiration along lines which might replace its true miracle and mystery by a false.

At the same time there are elements in the patristic teaching which show that the pressure of Judaistic and pagan doctrine was not without its effect. This is reflected in the typical attempt by the Apologists to commend the Bible by comparing it with the Sibyllines (cf. Theophilus of Antioch, *Ad Autolycum* ii.9), and more seriously perhaps by the doubtful suggestions of Athenagoras that the Holy Spirit uses the prophets as a flautist uses his flute (*Supplicatio* 7, 9); or of Hippolytus that He plays on them as on a zither or harp (*Demonstratio de Christo et antichristo* 2). Fortunately, perhaps, the excesses of Montanism served as a decisive check to thinking in terms of pagan ecstacism. But the impulse to depreciate the human element found no less serious expression in another form. Augustine, for example, approached the thought of a dictation of the Holy Scriptures when he stated that the Christ used the Evangelists "as if they were his own hands" (*Harmony of the Gospels* i.35), although in the context this does not mean more than that the members of Christ's body act on behalf of Christ Himself as the head. This was pressed almost unbearably (though with an element of truth) by Gregory the Great when he said of Job: "He Himself wrote them, who dictated the things that should be written. He did Himself write them, who both was present in the saint's work, and by the mouth of the writer," the identity of the author being of no consequence (*Magna moralia praef.* i.2). This tendency was the more dangerous because the reaction against Montanism entailed a concentration upon the given letter at the expense of the free movement of the Holy Spirit, not in divorce from the letter as in Montanism, but in His disposal of it.

We must not exaggerate these weaknesses in relation to the real strength of the patristic doctrine and its avoidance of cruder errors especially in relation to pagan ecstaticism. Indeed, even the human element is not altogether lost in the divine, for Augustine can find a place for this side by side with his doctrine of dictation (*Harmony of the Gospels* ii.12); and it was realized that the unpolished style of some of the authors could not be attributed to the Spirit except by way of condescension. Indeed, some writers like Origen and Theodore of Mopsuestia were prepared to go further and speak of various levels of inspiration, although fortunately this opposite extreme did not find general acceptance in the early Church. On the other hand, it has to be conceded that there were dangerous tendencies in this primitive period. The phrase "dictation" can be understood, and was probably intended, in a true sense; but it opens the way to a mechanical view which makes it difficult to appreciate the original setting of the messages, and at the same time eliminates the present work of the Holy Spirit in the illumination of the reader. In addition, there is involved a possible relativization of the Bible which in the long run jeopardizes rather than secures its true authority, placing it side by side with other historically demonstrable phenomena such as extrabiblical tradition, the Church, and at a later date the Papacy.

III. Medieval Church.–The incipient dangers in the patristic doctrine come to fruition in the medieval Church, which presents us with the paradox of a high doctrine of inspiration accompanied by a muzzling of its authority and in the later stages a virtual elimination of its living power. In point of fact the Scholastic period is particularly sterile in the matter of inspiration, being far more interested in defining the status of the Bible in relation to that of other authorities in the Church. Abelard, as might be expected, makes a plea for a more human understanding, and ex-

presses doubt as to the inerrancy of Scripture from a historical standpoint. Aquinas has a full and careful discussion of the relation of the human authors and readers to the Holy Spirit as the true author, and with his usual acuteness he finds a real place for the ordinary element (cf. *Summa Theol.* ii.2.171ff.). But the whole discussion relates to a Bible Judaistically understood as a textbook of divine truth, divinely given and therefore to be approached with respect, but accessible to human study like any other textbook (i.e., in virtual abstraction from the Holy Spirit as its necessary interpreter), and accompanied by other and hardly less important authorities. In these circumstances it is not surprising that over large tracts of medieval life the Bible could not do its vivifying and reforming work, although its inspiration was so fully accepted. It is not surprising that the human element excluded from the understanding of the Bible should rise up the more strongly in other spheres and successfully challenge and subjugate the divinely dictated Scriptures. It is not surprising that the Bible should become a mere source book for dogmatic disputation, ossified in an alien tongue, instead of the living Word of Jesus Christ to the churches. This is not to say that the medieval doctrine was wrong in basic substance. It is not to say that a less high doctrine of inspiration is demanded. It is not to say that the Bible should be understood in terms of religious philosophy or poetry. But it is a warning that even a materially impeccable doctrine may be held and taught and applied in such a way that the true insights of the Bible are suppressed, and the result is a distortion which achieves the very opposite of what is intended, and is almost worse than naked error.

IV. Reformation.–This was the kind of situation which the Reformers had to remedy in their understanding of the Bible, and it is against this background that we must try to understand their doctrine of inspiration. In the first place, we can hardly fail to note that this doctrine does not play any decisive part in their theology. Their concern is primarily with other matters. Yet this does not mean that it is unimportant, let alone that it is absent. It simply means that they can almost afford to take it for granted. The high inspiration of the Bible; the fact that God Himself is the true author of Scripture; the divine origin of even the detailed wording — these are matters which are not disputed. Luther makes it plain that the whole of the Bible must be accepted as the inspired Word of God (cf. *WA* liv,158,28). Zwingli appeals consistently to the divinely inspired record of the OT and NT in assertion and defense of pure Christian doctrine. Calvin is perhaps the clearest and firmest on this point. He describes the Scriptures as the "only record in which God has been pleased to consign his truth to perpetual remembrance," and says that we cannot have an established faith in doctrine "until we have a perfect conviction that God is its author," i.e., through Scripture (*Inst.* i.7.2, 4). In his sermon on 2 Tim. 3:16, he constantly refers to God as the author of the Bible, and in his commentary on this passage he can even speak in terms of "dictation" (*Corpus Reformatorum*, LIV, 283f.). Among the Anglicans, Whitaker has a similar passage in answer to the Romanist contention that the Bible is only mediately the voice of God: "We confess that God hath not spoken of himself, but by others. Yet this does not diminish the authority of scripture. For God inspired the prophets with what they said, and made use of their mouths, tongues, and hands: the scripture, therefore, is even immediately the voice of God. The prophets and apostles were only the organs of God" (Parker Society ed., p. 296). In view of the controversy regarding Reformation teaching, and the suggestion in some quarters

that the Reformers more or less abandoned the traditional doctrine of inspiration, it is as well to emphasize this primary element in their thinking. Nowhere, perhaps, is it more authoritatively summed up than in Barth's *Church Dogmatics:* "The Reformers took over unquestioningly and unreservedly the statement on the inspiration, and indeed the verbal inspiration, of the Bible, as it is explicitly and implicitly contained in those Pauline passages which we have taken as our basis, even including the formula that God is the author of the Bible, and occasionally making use of the idea of a dictation through the biblical writers" (I/2, 520).

Yet even a cursory examination of the Reformation literature makes it plain that in three important respects the Reformers moved back from the traditional teaching and its Judaistic basis to a more genuinely scriptural understanding. In the first place, they had a clear realization that Christ is the true theme of the Bible. The Bible is not a mere source book of Christian teaching to be handled with legalistic rationalism (i.e., for attainment of self-righteousness and self-wisdom) by scholars, ecclesiastics, and canonists. It is the book to lead us to Christ, not merely to a mystical Christ, but to Christ prepared and prophesied in the OT, and incarnate, crucified, risen, and ascended in the NT. Luther makes this point with greatest clarity: "But Holy Scripture refuses to know or put before us anything but Christ. And whoso therefore goes to Scripture or is led by Scripture to Christ, it is well with him and he is on the right path" (*WA* xvi,113,22). But Zwingli has it, too: in the Bible "Christ stands before you with open arms, inviting you and saying, 'Come unto me...'" (*LCC*, XXIV, 84). And although Calvin does not make it quite so explicitly, it is the theme of his whole understanding of the biblical story as developed in the main part of the *Institutes* (ii.6f.; and cf. his comm. on Jn. 5:39, "We ought to read the Scriptures with the express design of finding Christ in them").

Second, and in consequence, there is a better appreciation of the human aspects of the Bible, not in isolation from the divine work but in conjunction with it. The Bible tells us the story of God's dealings in salvation and judgment. It treats of a people, of the men of this people, and of the One to whom they led and in whom they found fulfillment. The authors have their own place in the development or outworking or recounting of this story. God uses them in their own place and time, and according to their own capacity and endowment. The fact that the Bible is fully inspired does not mean that we have to look for a hidden or allegorical sense, but that the divine message is given in and through the human. It is for this reason that the Reformers dismiss the complicated exegesis of the Middle Ages and insist upon straightforward exposition (cf. Whitaker, pp. 405f.), relating the various passages primarily to their human setting. But they are also aware that in this respect the Bible conforms to a christological pattern. As the Word became flesh, and was very man no less than very God, so the written Word is no less fully a human word than a divine. To allow the human word to be minimized or even swallowed up in the divine is not to do true honor to the Bible, but to miss its true miracle and message.

Third, the Reformers all have a vivid sense that, although the meaning of the Bible is for the most part clear and simple in itself, its message cannot be received merely by human reading or scholarship or historical research. There is needed in the reader the work of the same Spirit who gave the writings. This is one of the most widely and firmly attested of all the points made by the Reformers, for it was of crucial importance in their attack on the medieval

INSPIRATION, HISTORY OF THE DOCTRINE OF

doctrine and their whole resistance to the traditional view of authority. Luther puts it in this way: "The Bible cannot be mastered by study or talent; you must rely solely on the influx of the Spirit" (*Briefwechsel*, ed. Enders and Kawerau, I, 141). Zwingli bases his appeal to the nuns of Oetenbach upon it: "Even if you hear the gospel of Jesus Christ from an apostle, you cannot act upon it unless the heavenly Father teach and draw you by the Spirit" (*op. cit.*, p. 79, and cf. the whole context, pp. 75-95). Calvin gives us the forceful statement: "For as God alone can properly bear witness to his own words, so these words will not obtain full credit in the hearts of men, until they are sealed by the inward testimony of the Spirit. The same Spirit, therefore, who spoke by the mouth of the prophets, must penetrate our hearts, in order to convince us that they faithfully delivered the message with which they were divinely entrusted" (*Inst.* i.7.4, and see esp. comms. on 1 Cor. 20ff.; 2 Cor. 3:6). The same emphasis is to be found in Whitaker: "We say that the Holy Spirit is the supreme interpreter of scripture, because we must be illuminated by the Holy Spirit to be certainly persuaded of the true sense of scripture," and again: "For no saving truth can be known without the Holy Ghost" (p. 415).

Two subsidiary points are to be noted in passing. The first is that, since Christian understanding rests upon the work of the Spirit, the Bible cannot be treated as a Euclid of Christian faith and conduct to be learned, schematized, and applied by the ordinary ways of reason and scholarship. On the basis of a sound doctrine of inspiration, biblical theology is always a venture of prayer, humility, and obedience in the Spirit; and nowhere is this better illustrated than in the works of the Reformers themselves. But second, since the Holy Spirit Himself attests the word He has given, there can be a relative unconcern regarding its human qualifications. It does not have to be proved that the Bible is the oldest of books, or the best literature, or of superior majesty, though some of these points may well be made by way of confirmation. Again, it need not be *demonstrated with absolute finality* that all the predictions of the OT are fulfilled to the letter, although Christians taught by the Spirit will rejoice as the Reformers did if this is the case. Finally, the credibility of Scripture does not stand or fall with the *ability to prove* that all the events recorded took place exactly as reported, although for all their freedom in face of apparent contradictions the Reformers have obviously not the slightest doubt that this is the case. As Calvin judiciously points out, these proofs are "not so strong as to produce and rivet a full conviction in our minds," but when the necessary foundation of a higher assurance is laid "they become most appropriate helps" (*Inst.* i.8.1).

V. Post-Reformation Period.—The post-Reformation period presents us with a multiplicity of material on the theme of inspiration which makes it impossible to do more than pick out the leading tendencies. As in Reformation doctrine, it was commonly accepted that God is the true author, not merely of the doctrine of Scripture but of the writings themselves (J. Gerhard, *Loci communes theologici*, II, 17; J. Cocceius, *Summa theologiae*, IV [Amsterdam, 1665], 39). Inspiration applies to the whole Scripture, and not merely to particular parts (Hollaz, *ETA*, p. 90). It does not rule out a concomitant action on the part of the human authors (*ibid.*, p. 91; *Leiden Synopsis*, III, 7). Yet it is more than a mere guidance of the authors in their human action, and is not equivalent to ordinary artistic "inspiration" (J. Quenstedt, *Theologia didactico-polemica*, I, 69). It extends to the very words in which the statements are clothed (*ibid.*, I, 72; Cocceius, IV, 41), and includes passages which deal with historical and scientific as well as doctrinal and ethical matters (Hollaz, p. 89). It is supported both by the witness of Scripture itself and by the inner witness of the Holy Spirit through the word (Quenstedt, I, 87).

In all these matters it is evident that the Lutheran and Reformed dogmaticians of the 17th cent. are in line with the main teaching of the Reformers themselves. But certain features call for notice which pose the question whether their full and careful codification of doctrine has not involved certain shifts of emphasis, slight in themselves but serious in their historical consequences. In the first place, there is a tendency to return to the patristic overwhelming of the human author by the divine. This must not be exaggerated, for most theologians agree that the authors write intelligently and voluntarily, and are certainly not to be regarded as mere machines (H. Heidegger, *ST*, II, 36; Scherzer, *Systema theologiae*, p. 8). But there is a distinct development of the theory of dictation, not merely in the use of the rather ambiguous *dicto* (Calov, *Systema*, I, 555), but also in the employment of such phrases as "assistants and amanuenses" (Gerhard, II, 26ff.; Bucan, *Institutiones theologicae* . . . [Geneva, 1609], 1.4.2), and even in the revival by Heidegger of the dubious image of the flautist (H. Heidegger, *Corpus theologiae*, II [Zurich, 1700], 34). Second, there is a tendency to press to an unnecessary extreme the intrinsically true doctrine of verbal inspiration, as in the insistence that even the Hebrew vowel points must be regarded as inspired (Gerhard, 265). Third, there is a tendency to give a false importance to the doctrine of inerrancy, as if the inspiration of Scripture were finally suspended upon the ability to prove it correct in every detail. To be sure, inspiration is itself the basis of inerrancy, and there is no obligation to prove the latter (Quenstedt, I, 77). But in face of attacks upon the inerrancy of the Bible, whether by those who do not regard it as essential to inspiration or by those who deny both, it is only too easy to reverse the true relationship and to come to think of inerrancy as the basis of inspiration (Calov, I, 552). Fourth, and in consequence, there is a tendency to subordinate the inner witness of the Holy Spirit, still forcefully maintained, to the external and internal criteria of the authenticity and authority of the Bible. If final assurance comes only with the Holy Spirit, the criteria are of great importance in engendering intellectual conviction and even giving spiritual certainty (Hollaz, p. 121), so that even a careful and sympathetic student like Preus is forced to see in the Lutherans "a certain concession to rationalism" at this point (R. Preus, *The Inspiration of Scripture*, p. 114). Finally, and underlying the whole conception, there is a tendency to subject genuinely scriptural material to alien Aristotelian or Cartesian principles and modes of presentation which result in a measure of distortion from the standpoint of true biblical and Reformation doctrine, which give an ambiguity still reflected in scholarly assessments of the period, and which, contrary to the intentions of the dogmaticians, expose the doctrine of inspiration to the violent reactions of the period of the Enlightenment and theological liberalism.

Whether the post-Reformation orthodox could have contended for the truth of inspiration along other lines is a point worth considering before we rush on to the sweeping and exaggerated condemnations which mark some dogmatic scholars. After all, they were faced by very real difficulties: the demand of the Romanists that they should produce as evident an authority as that of the Church and papacy (Preus, pp. 93ff.); the attacks of Socinians upon the historical reliability of Scripture (pp. 81f.); and the revived Montanism of the sectaries with their appeal to inward illuminations of the Spirit apart from the letter of the Bible (p. 46). It is also to be recalled that in the matters referred

to we are dealing for the most part only with tendencies within a general loyalty, or intention of loyalty, to the Reformation position. Yet the fact can hardly be disputed that a new and nonbiblical rationalism of presupposition, method, and approach threatens the Protestant doctrine with these dogmaticians (pp. 210f.), that they clearly repeat in some degree the same kind of Judaizing movement as that of the early and medieval Church, and that in so doing they incur a measure of both positive and negative responsibility for the disasters which follow.

VI. Eighteenth-Century Rationalism.–By the inversion characteristic of theological history, the application of inspiration to the minutiae of the biblical text led to a concentration of interest on the actual documents and history. Hence the 18th cent. saw a rapid and intensive development (e.g., by Michaelis and Semler) of the linguistic and textual studies which had commenced with the Renaissance (cf. K. Aner, *Die Theologie der Lessingzeit,* pp. 202ff.). Much of this work had no direct bearing upon the doctrine of inspiration. But the case was different when literary and historical questions were raised, for rationalistic attacks upon the reliability and even the authenticity of the records implied a rejection of its inspiration. The calumnies of Voltaire and the Encyclopedists were too outrageous to be seriously effective; but the *Wolffenbüttel Fragmente* constituted a direct challenge with their discussion of the resurrection narratives, and theologians who had already committed themselves to rationalist presuppositions found it difficult to avoid some kind of compromise solution. After all, it was argued, "historical truths cannot be demonstrated," as Lessing maintained (*Werke,* ed. Gosche, VI, 241). To try to defend inspiration in terms of inerrancy is thus to commit it to inevitable relativization. Surely the better course is to intellectualize the concept. Irrespective of its historical reliability, the Bible contains general truths which are inspired, not in a special or supernatural sense, but insofar as they conform to the teaching of pure reason. This was the new version of inspiration in theological circles (Aner, p. 296), and the tragedy was that orthodox apologists like Schumann, Riss, and Goeze, attempting to meet the attackers on their own ground, accepted the basic presuppositions instead of challenging the real enemy in the name of a genuinely biblical and Reformation understanding.

In its own way, rationalism was no less an evasion of the historical element than pure supernaturalism. But many forces were making for a study of the Bible, not merely as an ancient text, nor as a repository of abstract divine or human truth, but as divine truth in the form of a human product. This was the contention of Herder, first expressed in his Riga *Sermon on the Bible,* and then worked out in the *Theological Letters* and *The Spirit of Hebrew Poetry.* As Herder saw it, the human element in the Bible must be taken quite seriously. The Bible is a work of literature, written at a particular time, by a particular people, in particular situations, and conditioned by race, language, thought-forms, and historical and geographical milieu (*Werke,* ed. Müller, II, X, 257). Its inspiration is not to be denied, but it is not to be absolutized. It is that of great religious thinkers and poets through whom God is speaking as He speaks elsewhere through nature, philosophy, and the arts (*ibid.,* p. 271). It is simply a heightened form of true conviction, of religious enthusiasm in the purer and deeper sense (XVIII, 53f.). As such, it commends itself to the sincere and seeking reader, not by its outward singularity but by the direct message which it carries to the soul (p. 275). Herder can thus unite a conception of the inward testimony of the Spirit with his basic reduction of inspiration to the aesthetic level. The gain in this understanding is that it does take the human element in the Bible with a sympathetic seriousness hardly attained before in the whole history of the doctrine. But this gain does not offset the failure to see that on its own terms the biblical literature and history cannot be classified as merely one manifestation of the divine Spirit among others, nor its inspiration regarded as one particular species in a common genus. And it is no real compensation that a place is found for the direct speech of the Bible to the heart; for although this contains an element of truth it is a highly emotionalized and subjectivized version of the authentic witness of the Holy Spirit, and no less exposed than the biblical history to empirical criticism and interpretation in the form of psychological analysis.

With this program of historical biblical study, Herder initiated the intensive research of the modern period and its more-or-less sustained polemic against the inerrancy and therefore the special inspiration of the Bible. But theologically his subjectivization of inspiration was no less important, for it combined with Empiricism, Pietism and Kantian Idealism to produce the thoroughgoing subjectivization of Christianity by Schleiermacher, which has dominated the whole movement of liberal Protestantism. As Schleiermacher sees it, all religions are relative formulations or descriptions of the basic religious feeling of dependence (*Reden,* p. 21). Of these Christianity is the best because in it this feeling finds perfect expression (p. 212). The doctrines of Christianity are all true and important as the more detailed expressions of emotional states (pp. 84ff.), the Holy Spirit being the common spirit of the Church (*Der Christliche Glaube,* II, 372ff.), the Scriptures the first of a series of attempts to express the Christian faith, and inspiration the working of the common spirit of believers no less evident in any great doctrinal or devotional work than in the apostolic literature. The almost complete supernaturalizing of the 17th cent. is thus completely reversed and avenged by a no less thorough absorption of the divine element into the human; and the stage is set for the long tragedy of an anthropocentric understanding with all its vanities and vulnerabilities, with its illusory hopes and eventual disillusionment and despair.

VII. Conclusion.–Why is it that, for all the tenacity displayed and scholarship deployed, orthodoxy has proved so feeble and ineffective in claiming the Bible and its inspiration for itself in face of this upsurge of the human spirit? The answer to this question is undoubtedly to be found in the approximation of orthodoxy itself to an abstract, schematized, and basically Judaistic understanding of inspiration instead of a genuinely biblical and Reformed. The attack on the historical reliability of the Bible was damaging just because orthodoxy no longer had full confidence in the witness of the Spirit but had to find for it rationalistic support by a reversal of the relationship between inspiration and inerrancy, suspending the former on the latter. The neological compromise was tempting and misleading just because orthodoxy was already finding in the Bible a mere textbook of dogmatic truth rather than a concrete and living attestation of Jesus Christ. The historical program was convincing and dangerous just because orthodoxy found so little place for the human and historical element, and could not contend for the genuinely historical understanding of the Bible in terms of itself to which biblical scholarship is finding its way after so much debate and confusion. The subjectivization of the Bible and its inspiration was so powerful just because orthodoxy was guilty of all these unfortunate tendencies, suppressing man in his proper place yet exalting him in his rationality, losing sight of Jesus Christ as the true theme

and center of the Bible, and showing so little genuine appreciation for the illumination of the Holy Spirit and His work.

In this as in so many matters, the way forward is the way back, namely, to the Reformers, and through them to the Bible and its self-witness, by which all our views of inspiration must be tested, corrected, strengthened, and empowered. This certainly does not mean that the doctrine of inspiration must be weakened, or a compromise arranged. It means that it must be genuinely asserted, not only in face of error, but also in face of distortions or dilutions of the truth. The prophetic and apostolic word is the word of divine wisdom by which all the rationalism of man is summoned to repentance and renewal. The historical record of the Bible is the account of the divine dealings with man which alone give meaning and direction to all other history. The theme of the Bible is the incarnate Word in whom alone we find truth, freedom, and salvation, and to whom the written Word conforms in divine and human structure. The inspiration of Scripture is genuinely the work of the sovereign Spirit, whose operation cannot finally be subjected to human analysis, repudiation, or control, but who remains the internal Master of that which He Himself has given, guaranteeing its authenticity, and declaring its message with quickening and compelling power.

INSTANT; INSTANTLY [Heb. *peṭa'* (Hab. 2:7; Nu. 6:9), *piṭ'ōm, piṭ'om* (Prov. 3:25; Nu. 12:4), *l^epeṭa' piṭ'ōm*—'in an instant, suddenly' (Isa. 29:5), *piṭ'ōm l^epeṭa'*—'suddenly, in an instant' (Isa. 30:13); Gk. *apó tēs hōras ekeínēs* (lit. 'from that hour,' Mt. 9:22; 15:28; 17:18), *euthéōs* (Acts 22:29)]; AV also SUDDENLY, STRAIGHTWAY (Acts 22:29); NEB also SUDDENLY, HASTILY (Acts 22:29). As used in the RSV, the phrase "in an instant" and the adverb "instantly" have the usual sense of "immediately," of an event occurring in an infinitesimal space of time (Isa. 29:5; 30:13; Mt. 9:22; 15:28; 17:18; Acts 22:29). The AV uses these terms in this sense, but it also uses the phrases "to be instant" (Lk. 23:23; 2 Tim. 4:2) and "to continue instant" (Rom. 12:12) in the sense of "persevere," "be urgent, pressing," and "instantly" in the sense of "earnestly, intently" (Lk. 7:4; Acts 26:7).

INSTINCT [Gk. *physikós*] (2 Pet. 2:12); AV NATURAL; NEB "in the course of nature"; [Gk. *physikōs*] (Jude 10); AV NATURALLY. In these parallel passages 2 Peter and Jude are both concerned to contend against antinomianism. Jude succinctly describes the people under attack as "ungodly persons who pervert the grace of our God into licentiousness" (v. 4). Both 2 Peter and Jude compare such people to Gk. *tá áloga zṓa*, "irrational animals." It is in that comparison that 2 Peter and Jude use "instinct," and it is in terms of that comparison that "instinct" is to be understood: as the appetitive drives unbridled by reason. This definition is confirmed by the fact that in writings of antiquity Gk. *physikṓs* was often paralleled by Gk. *chōrís lógou* ("apart from reason") as in Diogenes Laertius X.137. That it need not always be contrasted to rationality, however, is clear from Rom. 1:26, where Gk. *physikós* is properly rendered "natural" by the RSV because it stands in contrast to Gk. *parà phýsin*, "unnatural." 2 Peter and Jude accuse their opponents of living like irrational animals, according to instinct, i.e., according to the dictates of their appetites and drives rather than their reason. Such a way of life leads men to the same end as the brutes: to death. "The instinct of nature alone rules in brute animals; but reason ought to govern men and to bridle their appetites" (Calvin, comm. on Jude).

A. D. VERHEY

INSTRUCT [Heb. *yārâ* (1 S. 12:23; 2 K. 12:2 [MT 3]; Ps. 25:8, 12), *zāhar* (2 Ch. 19:10), *śāḵal* (Neh. 9:20; Ps. 32:8; Prov. 21:11), *ṣāwâ* (Gen. 32:4 [MT 5], 17 [MT 18], 19 [MT 20]; Ruth 2:15; 2 S. 11:19; Jer. 38:27), *bîn* (2 Ch. 26:5), *yāsar* (Job 4:3; Isa. 28:26; Ps. 105:22), *yāḏa'* (Isa. 40:13; Jer. 31:19)]; AV also TEACH, WARN (2 Ch. 19:10), "bind" (Ps. 105:22), COMMAND, CHARGE, "have understanding" (2 Ch. 26:5); NEB also TEACH, WARN, ADVISE, etc.; [Gk. *nouthetéō* (Rom. 15:14), *symbibázō* (1 Cor. 2:16), *katēchéō* (Acts 18:25; Rom. 2:18; 1 Cor. 14:19), *sophízō* (2 Tim. 3:15), *paideúō* (Acts 7:22), *chrēmatízō* (He. 8:5), *diatássō* (Mt. 11:1)]; AV also ADMONISH, TEACH, "make wise" (2 Tim. 3:15), LEARN, COMMAND; NEB also ADVISE, TRAINED, "make wise," "give instructions," "benefit" (1 Cor. 14:19); **INSTRUCTION** [Heb. *yārâ* (Ex. 24:12), *tôrâ* (Dt. 17:11; Job 22:22; Isa. 30:9; Mal. 2:6-9), *mûsār* (Job 36:10; Prov. 1:2ff.; 4:1, 13; 8:10, 33; etc.), *leqaḥ* (Isa. 29:24)]; AV also TEACH, LAW, DISCIPLINE, DOCTRINE; NEB also CORRECTION, LESSON, etc.; [Gk. *didaskalía* (Rom. 15:4), *nouthesía* (1 Cor. 10:11; Eph. 6:4), *parakaléō* (Tit. 1:9), *didachḗ* (He. 6:2), *diastéllomai* (Acts 15:24), *diatássō* (Acts 23:31), *parangéllō* (1 Cor. 11:17), *entolḗ* (Col. 4:10), *parangelía* (1 Thess. 4:2), *taúta* (1 Tim. 3:14; 4:6)]; AV also LEARNING, ADMONITION, DOCTRINE, etc.; NEB also ORDERS, INJUNCTIONS, etc.; **INSTRUCTOR** [piel part. of Heb. *lāmaḏ*] (Prov. 5:13); AV "them that instruct"; NEB MASTERS.

I. OT.—A basic OT meaning of Eng. "instruction" has to do with education in the broader sense. The Heb. *yāsar* and its derivative *mûsār* have this denotation. (In Ps. 105:22 the RSV and NEB emend MT *'āsar*, "bind," to read *yāsar*, following the LXX, Vulgate, and Syriac versions.)

For the people of Israel God's law served as an "educative force." The law regulated life for the Hebrew and was passed on from generation to generation by the fathers, whose responsibility it was to guard the tradition (Ex. 12:26; Dt. 6:7, 20). Thus education is very "intrapersonal," and *yāsar/mûsār* includes the whole process of "rearing" or "moral correction," "but can also take on a more intellectual sense and stand for 'culture' in the sense of possession of wisdom, knowledge, and discernment" (*TDNT*, V, 604). Both for the individual Israelite and for his nation, "chastisement" and "discipline" were an important part of "instruction" by the fathers and by God (Prov. 13:24; 29:15; Jer. 2:19; Hos. 10:10).

This theme is common in the wisdom literature, which goes beyond the parent-child relationship to point to the marks of the "wise person." The beginning of knowledge is the "fear of the Lord," while "fools despise wisdom and instruction" (Prov. 1:7; 15:33). The goal of "instruction" (1:2) is that people might learn "righteousness, justice, and equity" (1:3). "Instruction" makes a wise person "still wiser" (9:9; cf. 19:20; 4:1; 8:33). It is better than silver and gold (8:10). "He who heeds instruction is on the path to life" (10:17; 4:13), while "poverty and disgrace" come to him who ignores it (13:18), since by doing

so he really "despises himself" (15:32). It is the parents' responsibility to instruct their children, but the education one receives from one's father comes from undergoing discipline voluntarily (1:8; 13:1; 19:27; 23:12); only a fool rejects his father's "instruction" (15:5). Children are urged to buy "wisdom, instruction, and understanding" (23:23), while the lazy man who has neglected his property is depicted as a warning example to others (24:32). Thus the picture is of a God who corrects and chastises His children, but who does so as a Father.

God is often seen as the "corrector" or "chastiser" and hence the "educator" of His people. Yahweh has persistently sought to teach His people, but they have stubbornly refused to accept any discipline or instruction (Jer. 17:23; 32:33; 35:13). Jeremiah declares that the "instruction of idols is but wood" compared to the greatness and power of the Lord (10:8). Isaiah maintains parabolically (28:26) that as God teaches the farmer what to do, his actions varying from plowing to sowing, so also God's educating or guiding (*CHAL*, p. 137) of His people does not always follow the same pattern.

The verb *yārâ*, meaning "teach," expresses the purpose of the law and commandments given to Moses on Sinai (Ex. 24:12). It is also used by Samuel, who tells the people that he will "instruct [them] in the good and the right way" (1 S. 12:23; cf. 2 K. 12:2). The psalmist confesses that Yahweh will instruct sinners (25:8) and those who fear Him (25:12) in the way they should go (cf. 32:8).

Derived from *yārâ* is the term *tôrâ*, which can mean "direction" and can in ordinary usage refer to parents teaching their children or to Job's comforters putting forth their theological views. In most places, however, *tôrâ* is used for cultic or ritual practices and for the instruction of the prophets and priests regarding the will of Yahweh (Mal. 2:6f.). In Isaiah's day the rebellious people of Israel would not hear the *tôrâ* of the Lord, which warned them of the folly of trusting in Egypt (Isa. 30:9). Job 22:22 uses the term in the sense of "Divine guidance inwardly received" (Dodd, p. 32). This is one of the few places where the LXX (*ezēgoría*–"utterance") deviates from the strict legal use of *tôrâ* as "law" (cf. Dt. 17:11).

The educative aspect of both divine and human "instruction" is further seen in the use of the hiphil of *bîn* in 2 Ch. 26:5, where Zechariah is said to have instructed the young King Uzziah in "the way of the Lord," while a piel form of the verb *lāmaḏ* describes the instructors of Prov. 5:13 (cf. *ḥāḵam* in Ps. 105:22). *Sāḵal* is used in the sense of instruction in Neh. 9:20 and Prov. 21:11, while God is the One who will give instruction *(leqaḥ)* to those who murmur in Isa. 29:24. Yet there is no one wise enough to give advice to Him or tell God's Spirit that He should have acted differently (*yāḏa'*, Isa. 40:13; cf. Jer. 31:19).

"Instructing" in the sense of "warning" is found with the use of *zāhar* (2 Ch. 19:10), while examples of its use in the sense of "command" or "give an order" are found with *ṣāwâ* (e.g., Jer. 38:27).

In the LXX, the Heb. *yāsar/mûsār* was most often translated by the Gk. *paideúō*. The oldest use of the Greek term (Aeschylus in the 5th cent. B.C.) stressed the "nourishing" and "chastising" elements of bringing up a child, but by the time of Plato and Isocrates (4th cent. B.C.) the term was no longer limited to the teaching done by fathers and pedagogues. By this time "instruction" had come to mean "culture, the formation of the human soul" (Jaeger, III, 314). The stress was laid on philosophy as the main element of education, and the ideal became "the philosophical man, the Hellenistic cosmopolitan" (*TDNT*, V, 598). The effect of this on the LXX translation was that the Hebrew root meanings of "correction" and "chastisement" were in many cases subsumed under the Greek notion of "culture." In the wisdom literature, e.g., the use of *paideía patrós* ("father's instruction," Prov. 1:8; 4:1, 13; 15:5; 19:20, 27; etc.), which is praised as "wisdom," shows that "the interest of the Greek translators was not in discipline or chastisement, but in intellectual instruction" (*TDNT*, V, 609). This same tendency is found in the Psalms and some of the prophetic writings. The LXX sees the content of the prophetic revelation as being concerned with God's education of His people. "Fundamentally, however, the concept of education presupposes in the OT the belief in election. Education by God is a gift of grace allotted only to God's people" (*TDNT*, V, 611).

II. NT.–In the NT, Acts 7:22 describes Moses as having been "instructed [*paideúō*] in all the wisdom of the Egyptians." Moses' instruction included the elements of a foreign pagan culture and secular learning. Josephus speaks of his superior "understanding" (*Ant.* ii.9.6) as does Philo, who credits him with proficiency in all branches of education (*Vita Mosis* i.20ff.; cf. Sir. 45:3; Bruce, p. 168).

Other NT expressions of "instruction" include *didaskalía*, which Paul uses in Rom. 15:4 to designate the "teaching" which comes from Scripture (in this case Ps. 69:9 [MT 10]). Related to this is the term *didachḗ*, of prime importance in early Christianity, which is used in an exceptional NT sense in He. 6:2, where it refers to an already established doctrine rather than the usual "teaching." In close relationship with these terms is *katēchéō* (lit. to "sound from above"). This term, from which we derive "catechism" and "catechumen," is used for the act of "instructing" someone, particularly in religious matters. Paul uses it usually in reference to instruction in Christian doctrine, but in Rom. 2:18 he speaks of the Jews as *katēchoúmenos* in the law. In the congregation Paul says he would prefer to speak five words understandably to instruct others in the faith than ten thousand words in tongues (1 Cor. 14:19). Thus is seen the high importance he attaches to the preaching and teaching offices. The specifically Christian content of the teaching that was passed on, originally as oral information, is summed up in the description of Apollos as one who had been "instructed in the way of the Lord" and who spoke and taught [*didáskō*] accurately the things concerning Jesus" (Acts 18:25). Beyer notes that already *katēchéō* seems to denote "elementary instruction in the Christian faith" while *didáskō* refers to "the teaching constantly given to believers" (*TDNT*, III, 639 n. 8).

Less formal and more in line with Hebrew thought is the term *nouthetéō* (from *noús*), the usual LXX rendering of Heb. *bîn*, with the sense of imparting understanding or having a corrective influence on someone, hence to "teach." The teaching referred to here, however, concerns not so much the intellect as the will, the mind set, or the attitude. It involves an attempt to discipline the will and disposition through teaching and exhortation (see *TDNT*, IV, 1019). The corresponding noun *nouthesía* ("admonition") is used in Eph. 6:4, where fathers are urged to bring up their children "in the discipline and instruction of the Lord," meaning that nurture which is designed to educate and correct without arousing bitterness or resentment in the child. Paul uses this same term in 1 Cor. 10:11, where he reminds his readers that the judgments of God recorded in the OT serve as warning examples, and in Rom. 15:14, where he acknowledges that the Roman Christians are able to exercise a ministry of pastoral admonition toward each other so that his own instruction need only be by way of reminder.

Another traditional Jewish usage is seen in 2 Tim. 3:15 where Timothy is told that the sacred writings are "able

to instruct [*sophízō*–'make wise'] you for salvation." Here the OT concept that knowledge of the law can make people wise is transferred to a setting in the primitive Church without change. This wisdom brings salvation through "faith in Jesus Christ." The use of *symbibázō* ("bring together") in 1 Cor. 2:16 is based on the LXX rendering of Isa. 40:13 (cf. Justin *Dial. with Trypho* 50.5); Paul asks, "Who has known the mind of the Lord so as to instruct him?" His point is that only those who have the mind of Christ are able to understand and instruct others concerning the gifts of the Spirit. One of the responsibilities of a bishop, Paul tells Titus (1:9), is to "give instruction [*parakaléō*–'exhort'] in sound doctrine."

"Instruction" in the sense of a revelation of God given to mankind is expressed by *chrēmatízō* in He. 8:5, where Moses was "advised" or "warned solemnly" by God to follow the specified pattern for the tabernacle. Giving precise commands or injunctions is the meaning of both *entolḗ* in Col. 4:10 and *diatássō* in Mt. 11:1 and Acts 23:31. *Parangelía* has a related meaning stemming from military usage for "passing on an announcement" (among the ranks). It is used in 1 Thess. 4:2 to express apostolic "orders," in this case ethical precepts which have their basis in the authority of the Lord Jesus Himself.

D. K. MCKIM

INSTRUMENT. In Gen. 4:22 the participle of Heb. *ḥāraš* denotes a craftsman (*CHAL*, p. 118). *K*^{e}*lî* is used in the OT for many kinds of implements (e.g., NEB "anything made of iron," Nu. 35:16). The RSV translates it "instruments" when it refers to the musical instruments used in cultic practice (e.g., 1 Ch. 15:16; 16:42; 2 Ch. 5:13; Neh. 12:36). The AV often uses "instruments" when denoting other items connected with the sanctuary and weapons of war. Some of the "instruments of music" (1 S. 18:6) specifically mentioned are the *šālîš* (NEB "tambourine"), *mēn* (RSV "stringed instrument," Ps. 45:8 [MT 9]), and *n*^{e}*gînâ* (RSV "stringed instrument," Isa. 38:20). The verb *nāgan* means "play a stringed instrument" (Ezk. 33:32). *See also* MUSIC.

In the NT, the Gk. *skeúos* of Acts 9:15 (AV "vessel") is something especially chosen (a "chosen instrument") *by* God for His use; the *hópla* of Rom. 6:13 are the members of the human body which are yielded *to* God. Both terms are used in the sense of an implement (Rom. 6:13, NEB), something that is usable. The RSV also translates *tá ápsycha phōnḗn didónta* (1 Cor. 14:7) as "lifeless instruments."

INSTRUMENTS OF MUSIC. *See* MUSIC.

INSULT [Heb. *ḥārap*, *ḥerpâ*] (1 S. 25:39; Ps. 69:9, 20 [MT 10, 21]; Prov. 14:31; 17:5; Lam. 3:30); AV REPROACH; NEB REPROACH, ABUSE, SNEER AT; [*ṣāḥaq*] (Gen. 39:14, 17); AV MOCK; NEB "make a mockery of"; [*qālôn*] (Prov. 12:16); AV SHAME; NEB "slighted" [*k*^{e}*limmâ*] (Job 20:3); AV "putteth (me) to shame"; NEB "is a reproach"; [Gk. *hýbris*, *hybrízō*] (2 Cor. 12:10; 1 Tim. 1:13); AV INJURIES, INJURIOUS; NEB CONTEMPT, OUTRAGE; [*eípon raká*] (Mt. 5:22); AV "say . . . Raca," NEB "sneer at." In Ps. 89:50 (MT 51), the RSV emends the MT *kol-rabbîm*, "all of many," to either *kol-ribê*, "all the disputes of" (cf. NEB), or *k*^{e}*limmaṯ*, "disgrace of," in order to complete the parallelism. The AV supplies "reproach" from the first part of the verse; this solution seems at least as satisfactory as the above emendations (but cf. KD *in loc.*).

I. Insulting God.–The wisdom of Prov. 14:31 and 17:5 declares that to oppress or mock the poor is to insult the Maker of mankind. This correlation of respect for the poor and respect for the Creator is pervasive in the Wisdom literature of the OT and elsewhere in the Scriptures (cf. Job 31:13-15; Jas. 3:9). The reason for the correlation is that God created both rich and poor (Prov. 22:2). Every person, whether rich or poor, bears the image of God. To mock a poor person, therefore, is to mock God, and to be kind to a poor person is to honor God. If Jesus was the first to join Dt. 6:5 (the love of God) to Lev. 19:18 (the love of mankind) as a summary of the law (Mt. 22:37-40), He was following the Hebrew tradition of correlating relations to God with relations to people. 1 Tim. 1:13 speaks on the same order, where Paul's former persecution of the Church is described as blaspheming, persecuting, and insulting Jesus Christ: to treat people without respect and care is to insult God. Indeed, although Gk. *hýbris* and its derivatives are used infrequently in the NT, the term seems particularly apt to express the arrogance in human relations that is a result of insolence before God (*TDNT*, VIII, 306).

II. Insulting People.–The correlation of relations to God with relations to people must be kept in mind when insults against people are considered. Because of that correlation, the insult invites Yahweh's displeasure against the insulter. This is the case in 1 S. 25:39, e.g., where David blesses Yahweh for having avenged the insult he received from Nabal. Nabal had responded to the polite solicitation of David's men with an insolent refusal. David was intending to avenge himself, but Abigail, Nabal's wife (and later David's), successfully appealed to him not to take vengeance with his own hands. When that decision was made, "the Lord smote Nabal, and he died" (1 S. 25:38).

Numerous passages in the Psalms call upon Yahweh to act against the psalmists' insulters. In Ps. 69 the psalmist says, "the insults of those who insult thee fall upon me" (v. 9). Here the correlation is between insults to God and insults to the people of God. It is on the basis of this correlation that, after eloquent expression of the insults that have been given him (v. 20), the psalmist appeals to God to pour out His indignation upon those who have insulted him (vv. 22-28).

This correlation, however, does not warrant vengeance by the insulted person. This is clear in David's case against Nabal. Indeed, Lam. 3:30 tells us that it is good for a young man to "give his cheek to the smiter, and be filled with insults" (cf. Mt. 5:39). The principle of reciprocity is clear here (cf. Lam. 3:61-66), but it is balanced by the recognition that we also have sinned (v. 42), by appeals for modesty and educability (v. 40), and especially by the assurance of the compassion of God (vv. 31-33). Similarly, one is a fool who reacts passionately to insult (Prov. 12:16); a wise person stays calm when insulted. Passionate retaliation for insult is always wrong. This advice concerning reaction to insult is both followed and developed by Paul, who endured insults "for the sake of Christ" (2 Cor. 12:10).

Jesus' explication of the true meaning of the law in Mt. 5:21ff. moves from the prohibition of murder to the prohibition of insult. Both the murderer and the person calling another "Raca" count the object of their act, a person made in the image of God, as of little worth. That the

correlation of relationships to people with the relationship to God is operative here too is clear from the subsequent saying about leaving the altar to make peace with an offended brother. Gk. *rakά* is a transcription of the Aram. *rêqā'*. This Aramaic insult, in turn, is related to Heb. *rêq*, an adjective meaning "empty," to which the vocative ending is added (*TDNT*, VI, 974). It very likely meant "empty-headed one" and thus something like our "blockhead." Like "blockhead," *rakά* was thought a harmless insult even though it expressed disparagement and sometimes contempt. By putting such an insult on the same level as murder, Jesus clearly demands that insults, even "harmless" insults, be avoided.

Two instances of "insult" remain in which the correlation motif is not involved. In Job 20:3 Zophar accuses Job of having insulted him. Job had argued that even his friends (including Zophar) failed to understand and support him. Joseph is accused by Potiphar's wife of insult in Gen. 39:14,17 when she charges him with having made an illicit sexual advance. Heb. *ṣāḥaq*, which only here is translated "insulted," means to "laugh at," "make sport of," "toy with."

Bibliography.–*TDNT*, VI, *s.v.* ῥακά (J. Jeremias); VIII, *s.v.* ὕβρις (G. Bertram). A. D. VERHEY

INSURRECTION. Used by the RSV only in the NT for Gk. *stásis* in Mk. 15:7 and Lk. 23:19,25. In both passages *stásis* is used in the sense of a rebellion against civil authority. The revolt in which Barabbas participated was only one of many that took place in Judea during that period, being preceded by the revolts of a certain Theudas (cf. Josephus *Ant.* xx.5.1) and Judas the Galilean (cf. Josephus *BJ* ii.7.1; Acts 5:36f.; 21:38).

INTEGRITY [Heb. *tōm*] (Gen. 20:5f.; 1 K. 9:4; Job 4:6; Ps. 25:21; 101:2; Prov. 2:7; 10:9); AV also PERFECT, UPRIGHTLY, UPRIGHTNESS; NEB also BLAMELESS LIFE, CLEAR CONSCIENCE, PURITY; [*tummâ*] (Job. 2:3,9; 27:5; 31:6; Ps. 7:8 [MT 9]; 26:1,11; 41:12 [MT 13]; Prov. 11:3; 19:1; 20:7; 28:6); AV also UPRIGHTNESS; NEB also "without reproach," "claim to innocence," INNOCENT, HONESTY, etc.; [*tāmîm*] (Prov. 2:21; 28:18); AV PERFECT, UPRIGHTLY; NEB BLAMELESS, HONEST; [Gk. *aphthoría*] (Tit. 2:7); AV UNCORRUPTNESS. In Prov. 14:32 the RSV and NEB follow the LXX in amending the MT to read *bᵉṯummô*, "in his integrity (honesty)," to develop the antithesis of the verse between the fate of the wicked and the righteous, whereas the AV follows the MT in reading *bᵉmôṯô*, "in his death."

The basic meaning of "integrity" in the OT is "soundness of character and adherence to moral principle," i.e., uprightness and honesty, whether referring to Abraham (Gen. 20:5f.), David (1 K. 9:4), Job (Job 2:3,9; 4:6; 27:5; 31:6), or the psalmist (Ps. 7:8; 25:21; 26:1,11; 41:12; 101:2). A common expression is "to walk in integrity," indicating an habitual manner of life. In Proverbs integrity is seen as an essential characteristic of the upright life: Yahweh will protect those who walk in it (2:7); their security is assured (2:21; 10:9; 20:7; 28:18); it is a trustworthy guide for living (11:3), and better than wealth (19:1; 28:6).

Titus 2:7 specifies integrity as an indispensable ingredient in Christian teaching. The meaning is essentially the same as that in the OT. J. R. PRICE

INTELLIGENCE [Heb. *ḥokmâ*] (Ex. 31:3; 35:31; 36:1); AV WISDOM; NEB "skilful"; [Gk. *synetós*] (Acts 13:7); AV PRUDENT. The Hebrew term designates various facets of ability, whether technical skill (Ex. 36:1), shrewdness of different kinds (2 S. 20:22; 1 K. 2:6), spiritual insight (Ps. 90:12), or a personified concept of wisdom (Prov. 8:1ff.). Ancient Near Eastern cognates (Akk. *ḫakamu*; Ugar. *ḥkmt*) denote perception or understanding.

The AV translates Heb. *bîn* ("discern, understand") in Dnl. 11:30 (RSV "give heed"; NEB "take note") as "(he shall) have intelligence." In 2 Macc. 3:9 the AV translates Gk. *gegonótos* as "intelligence" (RSV "disclosure"; NEB "allegations"), in the sense of information.

See also WISDOM. R. K. H.

INTEND [Heb. *'āmar*] (2 Ch. 28:10; Jer. 18:10); AV PURPOSE, SAY; NEB PROPOSE, "have in mind"; [*ḥāšaḇ*] (Neh. 6:2, 6; Jer. 18:8; 26:3; 36:3); AV THINK, PURPOSE, etc.; NEB PLOTTING, PURPOSE, PLANNING, etc.; [*dāmâ*] (Isa. 10:7); AV MEAN; NEB THINK; [*pāneh*] (2 Ch. 32:2); AV PURPOSE; NEB DETERMINE; [*hālaḵ*] (Jer. 41:17); AV "to go"; [Gk. *méllō*] (Jn. 7:35; Acts 20:7, 13; 25:4; 2 Pet. 1:12); AV also WILL, READY; [*boúlomai*] (Acts 5:28; 12:4); NEB "meaning to," "trying to"; [*protíthēmi*] (Rom. 1:13); AV PURPOSE; NEB PLAN; **INTENT** [Heb. *rā'â*–'evil (intent)'] (Ex. 32:12); AV MISCHIEF; NEB MEANT; [*bišᵉgāgâ*] ("without intent," Nu. 35:11, 15; Josh. 20:3, 9); AV UNAWARES; NEB BY ACCIDENT, INADVERTENTLY; [*lēḇ*] (1 Ch. 12:38 [MT 39]); AV "one heart"; NEB THOUGHT; [*zāmam*] (Prov. 21:27); AV MIND; NEB "at heart"; [*mᵉzimmâ*] (Jer. 23:20; 30:24); AV also THOUGHTS; NEB DESIGNS, DESIRES; [Gk. *epínoia*] (Acts 8:22); AV THOUGHT; NEB IMAGINING; **INTENTIONS** [Gk. *énnoia*] (He. 4:12); AV INTENTS; NEB PURPOSES; **INTENTLY** [Gk. *diablépō*] (Mk. 8:25) AV LOOK UP; NEB LOOK HARD; [*atenízō*] (Acts 13:9; 14:9; 23:1); AV "set his eyes," STEADFASTLY, EARNESTLY; NEB "fix his eyes." In 2 Ch. 11:22 the AV, RSV, and NEB insert Heb. *ḥāšaḇ*, "plan" or "intend," following the LXX and Vulgate. In Gen. 31:20; 1 Cor. 16:5; and 2 Cor. 8:20 the RSV supplies "intend" where there is no single word it translates.

The inner thoughts, plans, and purposes of the will are expressed by the concept of "intention." The most significant OT designations occur in Jeremiah and refer to the purposes of God. God tells Jeremiah that if a nation turns from its evil, "I will repent of the evil I intended to do to it" (18:8). But if it does not listen to His voice, "I will repent of the good which I intended to do to it" (18:10). Jeremiah was to stand in the court of the Lord's house and pronounce God's words with the hope that the cities of Judah might listen, "that I may repent of the evil which I intend to do to them because of their evil doings" (26:3; cf. 36:3). Nonetheless, "the anger of the Lord will not turn back until he has executed and accomplished the intents of his mind" (23:20; cf. 30:24).

Another important OT usage is the provision in Hebrew law for those who kill someone "without intent." Those who accidentally kill another can find asylum in any one of six cities designated for that purpose (Nu. 35:11, 15; Josh. 20:3, 9).

In the NT several words are used to denote human planning or proposing (Acts 20:7; Rom. 1:13). *Boúlomai* usually means the "decision of the will after previous deliberations," stressing the meditative aspects of the plan (Acts 12:4), though it may also mean "wishing" or "desiring" (Acts 5:28; Bauer, rev., p. 146).

All the secret "intentions of the heart" *(énnoia)* are unerringly discerned by the Word of God, which is "living and active, sharper than any two-edged sword, piercing to the division of soul and spirit, of joint and marrow" (He. 4:12; cf. *TDNT*, IV, 971). God is the One who knows

what is in the heart ("For he is a searcher of designs and intentions." 1 Clem. 21:9; cf. v. 3); as 2 Bar. 83:3 says, the Most High will "carefully scrutinize the deep thoughts" *(cogitationes)*, and prayer must be directed to Him that the "evil or hostile schemes" therein might be forgiven (Acts 8:22).

It is not certain in the story of the healing of the blind man whether *diablépō* means "he looked fixedly" — as "staring" — or he "saw clearly" (Mk. 8:25). *Atenízō*, a medical term denoting a certain "fixed" look (Bruce, p. 71) and frequently found in miracle stories, is used to describe Paul's gaze on the crippled man whom he healed (Acts 14:9) and also his "looking steadily" without anxiety at his judges in Jerusalem (Acts 23:1). According to Haenchen, the use of this term in Acts 13:9 to describe Paul's intense look at Elymas the magician "does not mean that Paul possessed the withering glance that Jewish legend attributed to the rabbis" (p. 400). This was the belief in the power of the rabbi's eye for good or evil, and according to one rabbi "ninety-nine die of the evil eye" for every one who dies a natural death (see SB, II, 713f.).

INTERCESSION [Heb. vb. *pāga'*—'assail with petitions' (Isa. 53:12); Gk. *énteuxis*, vbs. *entynchánō*, *hyperentynchánō*]. A pleading with one party on behalf of another, usually with a view to obtaining help for that other. In the Bible, intercession normally is in the form of prayer on behalf of another.

I. In the OT
- A. Official Intercession
- B. As a Personal Burden
- C. Arising out of Natural Affection
- D. In the Psalms
- E. Its Effect

II. In the NT

I. In the OT.—Throughout the Bible, prayer is a deeply important aspect of the activity of the people of God. Those who live by prayer express in their prayers concern not only for their own needs but also for those with whom they are bound up by natural affection, and for other members of the community.

A. Official Intercession. Intercession sometimes appears as primarily an official duty, though often it arises also from deep personal concern. Some examples in the OT are: (1) king interceding for people: David (2 S. 24:17; 1 Ch. 21:17; 1 Ch. 29:10-19); Asa (2 Ch. 14:11); Solomon (1 Ch. 6:14-42); Jehoshaphat (2 Ch. 20:5-12); Hezekiah (2 Ch. 30:18; Isa. 37:15-20); (2) prophet for people: Elijah (1 K. 18:36f.); Samuel (1 S. 7:5f.); Amos (7:1-6); Joel (2:17); Malachi (1:9); Ezekiel (9:8; 11:13); Jeremiah (10:23ff.; 14:7-9; 42:4); Isaiah (63:7–64:12); cf. Lam. 5:1-22; (3) prophet for king: Samuel (1 S. 9:6–10:8); (4) priest for king and nation: Hilkiah (2 Ch. 34:20-28); Ezra (9:5-15); cf. Joel 2:17; Mal. 1:9.

B. As a Personal Burden. Intercession often arises as the distinct burden of the individual who has been called to serve God among His people. It becomes the inevitable accompaniment of his work for God, especially in the midst of crisis and failure. Intercession becomes more prominent as the servant of God increasingly identifies himself with the guilt of the people to whose service he has been called.

Moses is the supreme illustration of such intercession in the OT. His prayers are always vivid and passionate utterances, especially his intercession for Israel after the episode of the golden calf (Ex. 32:11-14, 31f.; 34:9; cf. Dt. 9:18-21, 25-29). Equally illustrative are a series of prayers recorded in Numbers (11:2; 11:11-15; 12:13; 14:13-19; 21:7; 27:5; 27:15-17). For other prayers of Moses, cf. Ex. 15:25; 17:4; 17:8-13; Nu. 10:35; Dt. 10:10; 33.

Other prayers of intercession arising from the burden of special concern are found in Josh. 7:6-15; Jgs. 6:13; 2 S. 24:17; 1 K. 18:36f.; Neh. 1:5-11; Ezr. 9:5-15; Isa. 63:14–64:12; Jer. 14:19-22; Ezk. 9:8; 11:13; cf. also Joel 2:17; Isa. 53:6, 12.

C. Arising out of Natural Affection. Frequently natural affection and kinship play a large part in intercession, e.g., in Abraham's prayers for Ishmael and Lot (Gen. 17:18; 18:23-33), in those of David for his children and house (2 S. 12:16; 1 Ch. 17:16-27; 1 Ch. 29:10-19), of Manoah for Samson (Jgs. 13:8-20), and of Job for his children (Job 1:5).

Intercession may be inspired also by gratitude and friendship: cf. 1 K. 17:20; 2 K. 4:33; 6:17; Dnl. 2:18.

D. In the Psalms. A lack of intercession is sometimes noted in the Psalms. But many of the prayers for the common salvation of Israel, while they appear simply as petitionary prayers, undoubtedly contain a large element of intercession. The individual identifies himself with the community, and intercessions take the form of public prayers of the people of God for the common welfare; cf. Pss. 74, 79, 122. Occasionally the element of intercession is more clearly expressed: cf. Ps. 20; 25:22; 28:9; 35:13; 51:18 (MT 20). Ps. 67 is a prayer of intercession for all nations.

E. Its Effect. The incident of Israel prevailing over Amalek as long as Moses lifted up his hands (Ex. 17:8-16) could be taken (allegorically perhaps) as a sign to Israel that God answers intercession. Cf. also Gen. 20:17; Ex. 9:27f.; Nu. 12:11-13; Job 42:8. But intercession is not always so successful (cf. Gen. 18:17–19:23; Ex. 32:30-35; Am. 7:2-9).

II. In the NT.—In the Gospels, the works of Jesus are constantly inspiring ordinary people to come to Him on behalf of others. Parents plead with Him in desperation for sick children (Mk. 5:22-43; Mt. 15:22-28; Jn. 4:47-53; Mk. 9:21-29). Mothers bring Him their infants (Mk. 10:13). Friend pleads on behalf of friend (Lk. 7:3-10; Mk. 2:3-12). A man pleads for his servant (Mt. 8:6-13). The mother of James and John displays her ambitions for her sons (Mt. 20:20f.).

Jesus commands intercession (Mt. 5:44; 9:38). He also encourages intercession by promising an answer to prayers made "in my name" (Jn. 14:3; 15:16; 16:23-26), especially if two or three persons agree in making the request (Mt. 18:18-20). To pray "in Jesus' name" seems to mean to pray emboldened and inspired by the word that He has spoken (Jn. 15:7), by the grace He has shown, and out of the difficulties and problems of the situation into which His service has led (cf. Mk. 11:22-24). The petitions of the Lord's prayer involve a large element of prayer for others. It is significant that the importunate praying described in the parable of the man at midnight (Lk. 11:5-13) involves intercession on behalf of another.

In the rest of the NT, the ordinary member of the community is able to pray confidently to God. The Church is understood as a royal priesthood (cf. 1 Pet. 2:9) which is required to make intercession for all mankind (cf. 1 Tim. 2:1) and engage spontaneously in prayer for others in a way that is different from OT practice.

The prayers of the Church are part of the wide vision and scope of the book of Acts. Signs are given of the effectiveness of intercession. Men are healed through it (Acts 3:16; 9:40; 28:8). Peter is delivered from prison by it

(Acts 12:8, 12). It forms the basis of the missionary enterprise of the Church (Acts 13:1-3 implies intercession and Acts 14:27 is a report of missionary success to a praying Church). The intercession of the Church is behind the advance of the word of God (cf., e.g., Acts 1:14; 2:2; 4:31; 16:25).

In the Epistles intercession is less a dramatic experience than an act of faith that Jesus is indeed Lord and has promised to hear and answer. Intercession is made in concrete and particular terms: "I appeal to you, brethren, by our Lord Jesus Christ, and by the love of the Spirit, to strive together with me in your prayers to God on my behalf; that I may be delivered . . ." (Rom. 15:30). Paul mentions his own intercession for the churches with whom he communicates (Rom. 1:9; 2 Cor. 13:7; Eph. 1:16-23; 3:14-21; Phil. 1:3-11; Col. 1:3, 9; 1 Thess. 1:2; 5:23); cf. also his personal prayers for individuals in 2 Tim. 1:3; Philem. 4. He mentions intercession "for all saints" as a necessary aspect of the healthy Christian life (Eph. 6:18). He seeks the prayers of others (Rom. 15:30; Col. 4:3; 1 Thess. 5:25), and expresses confidence in their efficacy (Phil. 1:19). The same confidence is expressed in other Epistles with reference to prayers for the sick (Jas. 5:14-18), and "for those whose sin is not mortal" (1 Jn. 5:16f.). The writer of Hebrews expects that the intercession of the Church can hasten the working of God's providence (He. 13:18f.).

In the life of NT Christians a free and confident outburst of intercessory prayer is a result of certain basic convictions. Their intercession arises out of confidence in the supreme sovereignty and love of God. J. M. Campbell points out (*Nature of the Atonement* [1873], p. 238) that "it is the tendency to deal with God as a fate, and with the accomplishment of the high designs of His grace for man simply as the coming to pass of predetermined events, that is the real source of our difficulty with respect to prayer." In the NT there is no trace of this fatalistic outlook. God is the living God, as loving as He is sovereign; and prayer is an expression of confidence in His goodness. This goodness inspired the prayer of Jesus Himself, and it inspires constant and confident praying in those who come to God through Him. In facing God they are facing a loving heart who desires to be asked, and they are responding to the promises and challenges of His Word that they should "ask" (Lk. 11:9).

The intercession of the NT Church arose from its sense of the service it owed the world. The Church was conscious of being elected to share the prophetic ministry of Christ toward the world — to speak the word of witness to Him as Lord and Christ, crucified and risen from the dead. It was equally conscious of being called to share the priestly ministry of Christ on behalf of the world that as yet did not know Him and could not pray for itself. Though Christ's intercessory bearing of the burdens of all people had been unique and redemptive, the Church could nevertheless in its own way, according to His example, take upon its heart a loving burden of intercession that He would now make effective, according to His promises, in the fulfillment of His redemptive purposes. For the early Christians, the love of God for all men, "shed abroad in their hearts" by the Spirit (Rom. 5:5), enabled them to participate in the effective bearing of others' burdens (cf. Rom. 10:1; 9:1-3).

The intercession of the NT Church arose, further, out of the belief that God had called the Church to fulfil before Him not only a priestly ministry on behalf of others, but also a kingly ministry (Rev. 1:6). It is precisely in the sphere of prayer and intercession that God gives a person real freedom in His presence to influence the course His providence is going to take, and perhaps, can take. In its ministry of intercession the Church is given a share in the universal Lordship of God. "The will of God," says Karl Barth, "is not to preserve and accompany and rule the world . . . in such a way that He is not affected and moved by it, that He does not allow Himself to converse with it. . . . God is not the prisoner of His own resolve and will and action. . . . His sovereignty is so great that it embraces the possibility . . . and the actuality that the creature can actually be present and cooperate in His overruling" (*CD*, III/3, 285; cf. p. 287).

The intercession of the Church in the NT is linked with Christ's heavenly intercession, in the understanding that the inspiration of the Holy Spirit enables the Church to imitate within its own earthly life the intercession of its High Priest. The love, prayers, and faith that give rise to intercession are the work of the Holy Spirit. "Likewise the Spirit helps us in our weakness; for we do not know how to pray as we ought: but the Spirit himself intercedes for us with sighs too deep for words" (Rom. 8:26; cf. 8:14-16). The Church prays "in the Spirit" (Eph. 6:8; Jude 20). In such intercessory prayer the Church is not engaging in a fresh work of redemption, but is furthering the effects in this present age of the redemption that Christ has provided.

INTERCESSION OF CHRIST.

I. During His Earthly Life.—Intercession for others was a basic element in Our Lord's earthly life of prayer, as is implied, e.g., in His groaning as He approached the grave of Lazarus (Jn. 11:33), and His sighing as He looked up to heaven in curing the deaf man (Mk. 7:34). His assurance to Peter that He had constantly prayed for him (Lk. 22:32) reminds us of the night of prayer He spent before choosing His disciples (Lk. 6:12f.), and of the great high-priestly prayer in Jn. 17, in which the apostles themselves, and all who will believe through their word, are His special concern. This prayer, in which Christ's intercession for His disciples rises to its supreme height of expression, reveals a basic element in His relationship with His disciples all through His life. Jn. 17 is also the revelation, in an earthly form, of the mediating prayer relationship between God and His people that Christ will eternally assume in the life to come.

The intercession Jesus made during His earthly life for sinners, on whose behalf He was suffering and offering His perfect obedience, must be regarded as an important element in His achievement of the atonement. The Suffering Servant of God "made intercession for the transgressors" whose sins He bears (Isa. 53:12). His resurrection and exaltation, as an answer to the prayers of One who perfectly trusted His Father, are the pledge also of God's answer to those intercessions. Such intercession is involved in Jesus' fulfillment of the office of His high-priesthood, and it is when we preserve the real intercessory character of His fulfillment of this role that we can avoid conceptions of His atoning work that show Him merely as acting a part in some divine drama.

II. His Heavenly Intercession.—In the NT, when the state and activity of the exalted Christ are pictured, He is shown not simply to be fulfilling eternally the role of King, seated and reigning on the heavenly throne, but also as fulfilling eternally the role of high priest. "He holds his priesthood permanently because he continues for ever" (He. 7:24). He has entered into heaven itself "now to appear in the presence of God on our behalf" (He. 9:24). Rom. 8:34 explicitly states that making intercession for

His people is one aspect of His heavenly activity as high priest. In 1 Jn. 2:1 He is described as an advocate (Gk. *paráklētos*) with the Father. Since in the midst of the fulfillment of this heavenly office He still retains a feeling for our infirmities (He. 4:15), this heavenly intercession on our behalf is pointed to as a source of encouragement and comfort.

The heavenly intercession of Christ has been variously interpreted within the Church. (1) On the one hand His intercession has been spoken of as if it were the means by which He carries on eternally the mystery of propitiation before the throne of God. On this view, the resurrection, ascension, and intercession of Christ are all integral parts of Christ's one sacrifice, and His intercession implies a continuation and consummation of what He did on the cross — a perpetual pleading of His sacrifice at the heavenly altar. (2) On the other hand writers like Westcott insist that "the modern conception of Christ pleading in Heaven His passion, and offering His blood on behalf of men" has no foundation in Scripture. He pleads simply by His presence on the Father's throne. The first view does not seem to allow for Christ's "sitting down" at the right hand of God after a completed work (He. 10:12). The second view seems to forget the sympathy of the exalted Lord for the present condition of His people.

The Church has discussed at various times whether the heavenly intercession of Christ is to be understood simply as a symbol of the eternal self-identification of Christ with the cause and needs of His people, or whether it must also be understood as actual prayer "vocal and real." Lutheran theology has tended to think of it as the literal offering of petition. Reformed theology has tended to think of the continual self-offering of Christ at the hand of the Father as a pledge and guarantee of His people's salvation.

In thinking of the relationship of His intercession to His sacrifice, Our Lord's own word in Jn. 17:4 must be remembered: "I glorified thee on the earth, having accomplished the work which thou gavest me to do" (cf. He. 7:27; 10:12-14). The intercession must rest on the complete sacrifice, and can be thought of only as proclaiming the completed atonement, or as actualizing and giving effect to whatever is already included within this completed atonement.

In the face of Arian suggestions that Christ's intercession signified His inferiority to the Father, the church fathers asserted that the intercession was a proof "not of inferiority but of love" (Chrysostom). In His intercession, Christ is not to be thought of as casting Himself at the Father's feet in abjection, but as presenting His people in Himself.

The ascension of Christ in no way separates Him from His people. In He. 7:24f. we are reminded that His intercession is an aspect of His unchangeable priesthood on behalf of those who came unto God by Him. "As Messiah, Christ cannot be thought of as existing without His people, neither can the heavenly high priest without His church. When He enters the heavenly realm, He enters not alone. He comes in fellowship with those who belong to the New Covenant established in His blood, and the fellowship expresses itself in intercession for them" (Aulen, p. 152).

III. The Intercession of Christ and the Prayer of the Church.—The intercession of Christ for the Church and for the world should be the source and inspiration of the Church's prayer for itself and for the world. To live by prayer means to live by grace, by asking and receiving from a gracious Father. When Christ was on earth He not only taught that people should live this way, but also sought to draw them into the fellowship of His own prayer life. The Church that understands this and is caught up into the grace of God "will not allow the Lord to be alone in prayer, but will be at his side with its own asking, however impotent its petitions enclosed in his asking" (*CD*, III/3, p. 277). Since Christ prays for the Church and for all mankind, the Church, in union with Him, will learn to pray truly for itself and for all mankind. This intercession will not be an amplification of completion of Christ's intercession, but an echoing of it and a witness to it. All human intercession is thus the fruit of Christ's intercession, and must indeed itself be basically the pleading of Christ's sacrifice. In Rev. 5 it is after the Lamb, who has been slain, ascends to the throne that the praises and prayers of the Church become heard there; and the ascent of the Lamb to the throne is followed by the vision (Rev. 8:3-5) of the prayers of the saints ascending before God and becoming an effective factor in fulfilling His purposes.

R. S. WALLACE

INTERDICT [Aram. *ʾĕsār*] (Dnl. 6:7-9, 12f., 15 [MT 8-10, 13f., 16]); AV DECREE; NEB ORDINANCE. A written prohibition, in this instance the banning of prayer to any god or man for thirty days, except to King Darius.

INTEREST [Heb. *nešeḵ* (Ex. 22:25 [MT 24]; Lev. 25:36f.; Dt. 23:19 [MT 20]; Ps. 15:5; Prov. 28:8; Ezk. 18:8, 13, 17; 22:12), *nāšaḵ*–'bite' (Dt. 23:20 [MT 21]), *maśśā'* (Neh. 5:7, 10); Gk. *tōkos* (Mt. 25:27 par. Lk. 19:23)]; AV USURY; NEB also USURY (Ps. 15:5), "holding as pledges" (Neh. 5:7), "taking . . . as pledges" (Neh. 5:10); **INCREASE** [Heb. *tarbîṯ*] (Lev. 25:36; Ezk. 18:8, 13, 17; 22:12), NEB "adding on repayment" (Lev. 25:36); **PROFIT** [Heb. *marbîṯ*] (Lev. 25:37); AV INCREASE; NEB "add interest." A sum paid to a creditor in money or goods at a fixed percentage rate for the use of borrowed money or goods. Although Heb. *nešeḵ* and *marbîṯ* or *tarbîṯ* have sometimes been equated in meaning (T.B. *Baba Metzia* 60b) because they occur together in some passages, *nešeḵ* probably denotes interest on money, and *marbîṯ* and *tarbîṯ* denote interest on grain or other produce. Akkadian documents make a similar distinction (Loewenstamm, p. 79).

Collection of interest from fellow Israelites was forbidden (Ex. 22:25; Dt. 23:19; Ezk. 18:18; etc.). Foreigners, however, were subject to interest on borrowed money and goods (Dt. 23:20; cf. 15:6). Specific interest rates in Israel are unknown. They may have been 20 percent on silver and 33⅓ percent on produce, the standard rate found in the law codes of Eshnunna and Hammurabi (Maloney, pp. 3, 7), but some rates exceeded this amount (de Vaux, p. 171). Although some of the codes had safeguards against manipulation of interest in favor of the creditor (see Maloney, pp. 5-11), other repeated abuses may have led to the ban on interest-taking among Israelites.

The prohibitions against receiving interest reflect the seriousness of this particular transgression. Lev. 25:36-38 closes with the solemn assertion, "I am the Lord your God who brought you forth out of the land of Egypt." Dt. 23:19 adds a promise to the prohibition, "that the Lord your God may bless you in all that you undertake." Ezekiel's condemnation is severe: taking interest is grouped with adultery, robbery, and idolatry (18:10-13). The one who lends at interest will, in the end, give his ill-gotten gain to the poor (Prov. 28:8).

Nehemiah 5:1-13 provides an example of the violation of these prohibitions and its result — poverty for the lower classes. As a result of famine (v. 3), some families

had been forced to mortgage (Heb. *'araḇ*, "pledge") their land and vineyards to buy grain. Others could not afford to pay their taxes and were selling their sons and daughters into slavery (cf. Lev. 25:39; Dt. 15:12-14), having already lost their fields and vineyards to creditors who were fellow Jews. After Nehemiah confronted the rulers with their illegal practices, lands were returned and payment of interest was immediately suspended.

The RSV has only two occurrences of "interest" in the NT, both in Q's parable of the talents (Mt. 25:27 par. Lk. 19:23). The Gk. *tōkos* is a cognate of *tíktō*, "bear," "give birth." Hence *tōkos* is a metaphoric usage for interest or usury because it "breeds" or multiplies money (MM, p. 637).

INTERLACING [Heb. *śāraḳ*] (Jer. 2:23); AV TRAVERSING; NEB TWISTING AND TURNING. The figure is that of a young camel, possibly in heat, running about aimlessly; it represents the life of one who has forsaken the direction of God.

INTERMARRIAGE [Heb. hithpael of *ḥāṯan*–'become each other's son-in-law'] ("intermarry," Ezr. 9:14); AV JOIN IN AFFINITY; NEB JOIN IN MARRIAGE. Intermarriage of the returned exiles with the surrounding pagans would lead Israel back into the idolatry and abomination for which God's judgment had fallen upon them in the form of the captivity. This explains the severity of Ezra's stricture. G. WYPER

INTERMEDIARY [Gk. *mesítēs*] (Gal. 3:19f.); AV MEDIATOR. The role which Moses fulfilled by receiving the law on Sinai and delivering it to Israel. Well-attested in classical and Hellenistic Greek, the noun *mesítēs* is derived from the adj. *mésos*, "middle." Thus *mesítēs* means one who functions as a mediator between two parties or bodies in conflict. The corresponding verb *mesiteúō* means "function as a mediator" (*DNTT*, pp. 372f.; Bauer, rev., p. 506). In the papyri *mesítēs* often denotes an arbiter in legal transactions (MM, p. 399). The RSV translates *mesítēs* as "mediator" where it refers to Christ (1 Tim. 2:5; He. 9:15; 12:24).

In Gal. 3:19f. the giving of the law involves angels — an early Jewish tradition reflected also in Acts 7:35, 52 and He. 2:2 (cf. Dt. 33:2; Job 1:29; T. Dan 6:1). Burton (*Galatians* [*ICC*, 1920], p. 189) refers to Josephus *Ant.* xv.5.3 (136) as another example of this tradition, but in that passage Gk. *ángeloi* is better understood as "messengers," i.e., the OT prophets rather than angels.

Paul uses this tradition to argue for the superiority of the promise over the law. The law did not come to mankind directly as did the promise: both Moses and the angels had a part in its transmission to Israel. R. J. W.

INTERMEDIATE STATE. *See* ESCHATOLOGY VII.

INTERPRET; INTERPRETATION [Heb. *pāṯar* (Gen. 40:8), *piṯrôn* (Gen. 40:12), *pēšer* (Eccl. 8:1), *šeḇer* (Jgs. 7:15), *mēlîṣ* (Gen. 42:23); Aram. *pᵉšar* (Dnl. 2:4; 5:12); Gk. *diermēneúō* (1 Cor. 12:30), *diakrínō* (Mt. 16:3), *dokimázō* (Lk. 12:56), *synkrínō* (1 Cor. 2:13), *hermēneía* (1 Cor. 12:10), *epílysis* (2 Pet. 1:20), *diermēneutḗs* (1 Cor. 14:28)]; AV also "discern" (Mt. 16:3; Lk. 12:56); NEB also "meaning" (Eccl. 8:1). In the biblical world, the act or process of explaining dreams (e.g., Gen. 40:12), languages (e.g., 1 Cor. 12:10), circumstances (Lk. 12:56; Mt. 16:3), and biblical texts (e.g., 2 Pet. 1:20). In the modern sense, interpretation is the concern of hermeneutics, the discipline or the methodology of expounding all kinds of texts, including the Bible, poetry, and other literature. The word "interpret" has come into English from the Latin *interpres*, "go-between, agent, interpreter," and its deponent verb *interpretari*, "expound, explain, interpret."

I. OT–A. Hebrew. In the Hebrew portion of the OT the RSV uses "interpret" and "interpretation" almost without exception to translate the Hebrew verb *pāṯar* and its cognate noun *piṯrôn*. Use of these terms is confined to the Joseph narrative in Gen. 40–41, where the meaning has to do exclusively with the interpreting of dreams. In these chapters Joseph demonstrates his gift for the interpretation of dreams, first to the royal butler and baker, and then, dramatically, to the pharaoh himself. In each instance he is very careful to attribute to *Yahweh* the interpretations that he is able to expound (Gen. 40:8; 41:16; cf. 41:39). Heb. *pāṯar* is generally understood to be cognate with Aram. *pᵉšar*, "dissolve," and thus figuratively, "solve, interpret." In two instances (Gen. 40:5; 41:11) the RSV translates *piṯrôn* as "meaning" in the formulaic expression "a dream with its own meaning."

In Eccl. 8:1, within a context of seeking and finding wisdom, Heb. *pēšer*, "interpretation," makes its lone OT appearance, perhaps as a loanword from Aram. *pᵉšar*, "solution, interpretation" (see KoB, p. 785). This Aramaic term appears quite frequently in the Aramaic portion of Daniel.

The Heb. noun *šeḇer*, which ordinarily conveys the literal sense of "shattering, fracture," or the like (e.g., of pottery, Isa. 30:14; of a wall, Isa. 30:13; of a bone, Lev. 24:20), in one instance in the OT (Jgs. 7:15) is used figuratively. Again, in this instance the application is that of interpreting dreams. Heb. *šeḇer* is used to refer to the interpretation of a dream in the sense that an interpretation is figuratively a "shattering" or "breaking up" of the overwhelming whole of a dream into its constituent pieces and thus into clarity of meaning.

In the Joseph narrative Heb. *mēlîṣ* occurs with the meaning "interpreter." While the verbal root *lîṣ* appears to have the sense of "scorn, deride," the hiphil participle *mēlîṣ* nevertheless clearly means "interpreter" in Gen. 42:23 (Joseph's brothers assume that he cannot understand them because "there was an interpreter [*mēlîṣ*] between them"). The LXX here translates *mēlîṣ* with *hermēneutḗs*, "interpreter" (cf. Phoen. *mlṣ*, "interpreter"; see H. Donner and W. Röllig, *Kanaanäische und Aramäische Inschriften* [1968], II, 40). In the other three OT occurrences of *mēlîṣ* the RSV translates "mediator" (Job 33:23; Isa. 43:27) and "envoy" (2 Ch. 32:31). The rare cognate noun *mᵉlîṣâ*, "figure, enigma" (Prov. 1:6; Aquila and Theodotion have *hermēneía*, "interpretation"), may actually refer to the speech of a *mēlîṣ* (i.e., the artistically crafted and fluent articulation that enables an interpreter or envoy to bridge language barriers; see W. McKane, *Proverbs* [*OTL*, 1970], pp. 266f.), but it occurs only twice in the OT and in each case is understood more by context (cf. Sir. 47:17 where *mᵉlîṣâ* = *hermēneía*).

B. Aramaic. The Aramaic noun *pᵉšar*, "interpretation," occurs 31 times, exclusively in the Aramaic portion of Daniel. The cognate verb *pᵉšar* also appears twice in Daniel with the meaning "interpret." The noun appears repetitively in relation to the interpretation of a dream (*ḥĕlem;* 2:4-7, etc.), usually in the formula *ḥelmâ' ûpišrēh*, "the dream and its interpretation"). Both noun and verb are used in reference to a cryptic writing (*kᵉṯaḇ;* 5:7f., 15f., etc.), and the noun is used once (7:16) in Daniel's reference to "the visions of my head" (*ḥezwê rē'šî*). The LXX

uses the nouns *synkrísis, krísis,* and *kríma* to render *pᵉšar* as "interpretation." Daniel, as Joseph before him, attributes all interpretative ability to God, the revealer of mysteries (2:18ff., 28ff., 45ff.). It is assumed here, as in the Joseph story, that dreams remain an impenetrable mystery to humans even though they may have been given by God Himself. But it is for this reason that interpretation of dreams can come only as God's gift.

II. Qumrân.–The Habakkuk Comm. from Qumrân best illustrates the use of the term *pšr* as applied to scriptural texts in that community. In a thoroughgoing attempt to apply the prophet's words to contemporary history, the Qumrân interpreter of Habakkuk relentlessly quotes verse by verse, and in each instance applies the exposition with the formula *pšrw 'l,* "its (hidden) interpretation is thus...." This example is illustrative of the origin of the literary form of the pesher. It incorporates not only interpretation, but also application and commentary, and endeavors to elucidate hidden meanings in the words of the prophet, the import of which are known only in the inner circle of the chosen (cf. 1QpHab 2:5, 8, 12; 3:4, 7, etc.).

III. Classical and Hellenistic Greek.–The Gk. verb *hermēneúō* usually has the meaning "explain, interpret" in the classical authors, but it can also simply mean "speak plainly" or "be spokesman for" (see J. M. Robinson, "Hermeneutic Since Barth," pp. 2f.). Thus *hermēneía,* "interpretation," may also simply be "plain speaking" (e.g., Plato *Respublica* vii.7 [524]). A related meaning in the classical sources, not found in the biblical examples, is "articulate, express thoughts in words." A third sense is that of "translate," the meaning *hermēneúō* most frequently has in the LXX (e.g., Est. 10:3). Ezra 4:7 refers to an official letter "written in Aramaic and translated" (RSV; Gk *hērmēneukénai* = Heb. *mᵉṯurgām*). In the second ending of Job (42:18, LXX only) *hermēneúō* has the sense "described as" in a phrase referring to a translation: "described in the Aramaic book as...." In the prologue to Sirach both *hermēneía* and *methermēneúō,* "translate," are used in the translator's apologetic for the shortcomings of the translation from Hebrew into Greek.

The Gk. *hermēneía* is also used in the LXX in the first sense listed above, e.g., in Sir. 47:17, where "interpretations" are itemized among songs, proverbs, and parables as one category among the many marvels that made Solomon the wonder of the world in his day ("illuminations" are suggested as the sense of *hermēneía* in this passage by J. M. Robinson ["Hermeneutic Since Barth," p. 2]; cf. Prov. 1:6 [Aquila and Theodotion]). The function of the official interpreter in the Joseph narrative (Gen. 42:23) would also have been to translate foreign languages into the familiar Egyptian (cf. also *Letter of Aristeas* 3). Gk. *diermēneúō,* "explain, interpret, translate," appears in 2 Macc. 1:36, where it refers to translation of a foreign term, yet is best rendered into English simply as "means" (cf. Acts 9:36 where *diermēneúō* is used in exactly the same way to translate the word Tabitha or show what it means).

Josephus uses *methermēneúō* in his assertion that he was "translating" his *Antiquities* from the holy Scriptures (*ek tôn hierôn grammátōn, CAp* i.10 [54]; cf. also *Ant.* xii.2.2 [20] for the sense "translate," but also *Ant.* ii.5.3 [72] for *hermēneutḗs* as an interpreter of dreams). Philo of Alexandria usually used these terms in the second general sense, that of putting thought into words (e.g., *De vita contemplativa* 28-31). It is not entirely clear in his portrayal of Aaron's role as Moses' "spokesman" (*De migratione Abrahami* 81) whether this role is one of conveying the thoughts of Moses or of interpreting his words. Josephus also uses the closely related term *hermēneús* (not used in biblical texts) to describe Moses' role as the "interpreter" or "spokesman" for God (*Ant.* iii.5.3 [87]).

The use of *hermēneutḗs* by Papias, an early Christian bishop in Asia Minor, to describe the role played by Mark the Evangelist in relation to the apostle Peter (Eusebius *HE* iii.39.15: *Márkos hermēneutḗs Pétrou genómenos*) has most often been understood to mean "translator." It may, however, mean simply "spokesman" — the middleman who conveys the apostle's thought (*TDNT,* II, *s.v.* ἑρμηνεύω [Behm], p. 663 n.3) — or perhaps "private secretary" (see R. P. Martin, *Mark: Evangelist and Theologian* [1972], p. 52). The main concern of Papias was, after all, to authenticate the Gospel of Mark, suspect in some circles, by tracing its authority directly to Peter himself.

IV. NT.–The Gk. *diermēneúō* has the meaning "interpret, expound" in Lk. 24:27, where along the Emmaus road the risen Jesus expounds the OT as it relates to Himself: "beginning with the law and the prophets, he interpreted to them in all the scriptures the things concerning himself" (cf. the parallel "opened" [*diḗnoigen*] the Scriptures in Lk. 24:32). The messianic interpretation of the OT, cherished and developed in the early NT Church, is here founded by Jesus Himself. This interpretation understands the OT in terms of promise and fulfillment, a pattern of divine preparation and deeds that reach their climax in the life, death, and resurrection of the Christ (cf., e.g., the handling of the Suffering Servant of Isa. 53 in Acts 8:32f. and Lk. 22:37; cf. also Mk. 14:27; *et al.*).

In several passages in 1 Corinthians (12:10, 30; 14:5, 13, 26-28) the related Gk. terms *diermēneúō, hermēneía,* and *diermēneutḗs* all have to do with the interpretation of tongues or glossolalia (e.g., *hermēneía glōssôn* in 1 Cor. 12:10). This sort of interpretation is clearly not to be understood in the sense of "translation." The phenomenon of *glossolalia* is not speech that can be "translated" into a familiar language, but the ecstatic (or "angelic," 1 Cor. 13:1) utterance of praise directed to God (see *TDNT,* I, *s.v.* γλῶσσα κτλ. [Behm]). The gift of "interpretation" under consideration in these verses of 1 Cor. 12 and 14 is that of rendering intelligible the pre-conceptual spiritual ecstasy of the tongues-speaker. Paul's orientation in these verses is not toward the dramatic phenomena of the Spirit as ends in themselves, but toward the holistic upbuilding of the community (1 Cor. 14:5, 26-28). So *hermēneía* properly functions for the edification of the whole community of faith as it serves to explain or interpret the Spirit-filled experience of the ecstatic person who is addressing God (1 Cor. 14:2, 26-28). Paul indicates in these verses that it is possible for the gift of *hermēneía* to be given to the person already possessing the gift of tongues (1 Cor. 14:13), but also that the one who interprets is usually a different person (1 Cor. 12:10; 14:5, 27f.). Because the gift of tongues is essentially an inner experience between the individual ecstatic person and God (1 Cor. 14:2ff., 16-19, 23, 26ff.), Paul argues on the principle of the upbuilding the whole that if the *chárisma* of interpretation is not also present in someone, then speaking in tongues should not occur in the worshiping assembly (1 Cor. 14:27f.). Paul's concern in this portion of this Corinthian letter is that the dramatic, ecstatic gift of tongues not become exaggerated in importance beyond that of other more ordinary gifts that the one and same Spirit has distributed among the varied members of the body of Christ. Because his orientation is toward the community of believers as the goal of the Spirit's working rather than the phenomenon itself, Paul can reverse the Corinthians' priorities and place tongues near the end of his catalog of gifts (e.g., in 1 Cor. 12:4-10), so that ordinary deeds of loving service may be seen as equally the gifts of the same Spirit. Since there was at

Corinth a tendency to rank spiritual gifts according to the degree of intensity of the ecstatic element and the degree of unintelligibility of the experience (unintelligibility in Corinth being considered preeminently an indicator of authentic connection to the Spirit), Paul underscores the role of intelligibility in worship as essential to the upbuilding of the whole (see H. Conzelmann, *1 Corinthians* [*KEK*, 1969; Eng. tr., *Hermeneia*, 1975], pp. 209, 232ff.).

The Gk. *synkrínein* is translated "interpreting" in 1 Cor. 2:13 ("interpreting spiritual truths to those who possess the Spirit"), although its two other meanings, "combining" and "comparing," are possible. The Gk. *epílysis*, "explanation, interpretation" (lit. "a releasing"), occurs only once in the NT, in 2 Pet. 1:20, "no prophecy of scripture is a matter of one's own interpretation." This term occurs frequently in the similitudes of Hermas with reference to the interpretation of a parable. Its literal sense has to do with releasing what is bound or hidden. Gk. *diakrínō*, "judge, distinguish," is translated "interpret" twice in Mt. 16:3, "you know how to interpret the appearance of the sky, but you cannot interpret the signs of the times." The parallel account in Luke (12:56) uses Gk. *dokimázō*, "examine, test out."

The Gk. verbs *hermēneúō* (Jn. 1:38, 42; 9:7; He. 7:2), *diermēneúō* (Acts 9:36), and *methermēneúō* (Mt. 1:23; Mk. 5:41; 15:22, 34; Jn. 1:41; Acts 4:36) may also have the sense "translate" in the NT. This usage appears typically in parenthetical explanations (e.g., Jn. 1:42 where it is explained parenthetically that Cephas "means" Peter). In all the above instances the RSV translates "[which] means" (AV usually has "[which] being interpreted").

V. Hermeneutics.–The Gk. verb *hermēneúō* has given the name to that aspect of theological study known as hermeneutics. In brief, hermeneutics has traditionally been understood to be the working out of rules and methodologies for interpreting scriptural texts. Already in the time of Aristotle rules were derived for the interpretation of literary texts; a number of these are still in effect. Biblical critical scholarship has made increasingly clear in recent years the difficulty involved in applying general hermeneutical rules or principles uniformly to all types of biblical literature. Methodology must differ according to the peculiarities of the varied kinds of literary material under study. Universal principles are thus few in number: interpretation must first come to grips with the language used, the historical context, the literary genre, the identity of the author and his addressees, the aim of the author, and the process of the work toward canonical shape.

Hermeneutics traditionally has been understood as part of a triangular relationship with exegesis and interpretation, although the distinctions once made are no longer always so clearly drawn. Exegesis was that part of the process of the study of biblical texts that had to do with determining the meaning of the text for its author and addressees. Interpretation had to do with determining the text's meaning for the present age, and hermeneutics then referred to the rules and methodology applied in the movement from exegesis to interpretation. This distinction among three interrelated disciplines neither was nor is always easily made. There is a degree of overlap and synonymity that can be detected already in the ancient use of the Gk. terms *hermēneía* and *exḗgēsis*. This also carried over into their Latin counterparts, *interpretatio* and *expositio*, and it persists in English.

I. Definition.–Interpretation is an activity in which a reader or hearer seeks to gain the shareable verbal meanings that an author or speaker has sought to transmit by linguistic signs. Not every meaning in an author's mind can be conveyed by language. Matters concerning his unique individuality that draw on a complex of private experiences in his past cannot be shared. Certain experiences, such as the taste of apricots, also cannot be represented by words. Likewise, the visual images that often accompany the matters we wish to transmit cannot be represented verbally. But over and above these limits much is shareable. As E. D. Hirsch has put it, "An author's verbal meaning is limited by linguistic possibilities but is determined by his actualizing and specifying some of those possibilities. Correspondingly, the verbal meaning that an interpreter construes is determined by *his* act of will, limited by those same possibilities" (*Validity*, p. 47).

II. Validity in Interpretation.–The chance that an interpreter will succeed in grasping an author's verbal meaning is greatly enhanced by the limitations of possible meanings that have been imposed upon words by cultural norms and conventions. A linguistic symbol can represent an identical meaning for two persons because the range of what it can mean has been limited by convention. Of course words often have several meanings, as any dictionary makes evident. But the association a word has with other words in its context does much to indicate the unambiguous meaning which the author intended it to have at a certain place in his writing. Nevertheless, the interpreter always has to guess at the meaning of a commu-

INTERPRETATION, HISTORY OF

nication he wants to grasp. He tries out several possible meanings which certain crucial words or phrases can have until coherency with all such crucial terms and the text as a whole is reached. Virtually absolute certainty that one person has understood another can be achieved when the two are in direct conversation with each other, for then it is possible to ask questions to see if the meanings guessed at were correct. But in construing a text whose author cannot be consulted, a claim to validity in interpretation can never have more than a high probability.

Yet the more willingly an interpreter submits his proposed construction of a text to the scrutiny of others who have also worked hard to understand it, the higher will be the probability of achieving a consensus regarding the meaning its author wanted to transmit. The greatest difficulty to be overcome in the interpretation of texts is the famous "hermeneutical circle." (One's mind is so delighted with all the "evidence" and "coherency" its construction draws from the text that anger is easily generated against different constructions of that text, which also claim coherency and cite much "evidence" in their support.) But the interpreter who is aware of the alluring power of the hermeneutical circle and who desires truth more than the ego satisfaction of hanging onto his pet ways of construing a text will want to consider seriously the objections another interpreter brings against his way of gaining a supposedly coherent view of a text.

To be sure, if all facets of a text were equally capable of being made into "evidence" to support several different ways of construing a text, then the hermeneutical circle could never be broken, and interpreters would waste their time discussing which view was correct. But as Hirsch points out, ". . . not all traits are genre-dependent . . . and not everything in verbal understanding is variable. Understanding is difficult, but not impossible, and the hermeneutical circle is less mysterious and paradoxical than many in the German hermeneutical tradition have made it out to be" (p. 77). So discussion with a fellow interpreter about how a text should be construed is indispensable precisely because another mind is able to bring one to see some of those relatively few invariable traits in a text which will fit only one interpretation of it. Therefore validity in interpretation is possible as a matter of high probability, albeit not absolute certainty, and this makes the interpretation of texts to be as worthy a pursuit of knowledge as that of many other fields where only high probability rather than absolute certainty is attained.

III. Literary-Historical Method.–Two particular barriers arise in construing texts coming from another culture and time such as those in the Bible. The first consists of the language conventions the authors have used. Translations of the Bible are indispensable for imparting a great many of its meanings to vast numbers of people, but in each generation a certain number of serious interpreters are needed who will expend the time and energy necessary for grasping the linguistic world of the Bible's various books. "Verbal meaning," says Hirsch, "can be construed only on the basis of its own presuppositions, which are not given from some other realm, but must be learned and guessed at — a process that is obviously intrinsic to a particular social and linguistic system" (p. 134).

Hirsch's reference to "a particular social . . . system" indicates the second barrier to be overcome in interpreting texts outside our culture: one must seek to think in terms of the culture of biblical times. Much help in learning of this culture comes from the allusions biblical writers make to their customs and outlook. For example, in OT times instituting a covenant was spoken of as "cutting a covenant" (Jer. 34:18 [Heb. *habbᵉrîṯ ʾᵃšer kārᵉṯû*, "the covenant which they cut"]), and this explains why God, when entering into a covenant with Abraham, moved between the divided carcasses of animals (Gen. 15:10, 17). Though one depends on the associations that surround a word in its immediate context in order to determine its unambiguous meaning, one may go to any source that promises knowledge of the culture alluded to in a biblical passage. In Mt. 3:9, e.g., John the Baptist says, "Do not presume to say to yourselves, 'We have Abraham as our father,' for I tell you, God is able from these stones to raise up children to Abraham." Justin Martyr shows that Jews in his day regarded physical descent from Abraham as a guarantee of their salvation: "[The Jews] beguile themselves . . . supposing that the everlasting kingdom will be assuredly given to those of the dispersion who are of Abraham after the flesh . . " (*Dial.* 140). Whereas in the literary aspect of interpretation one works from the immediate context, in the historical aspect any source which casts light on the world in which an author was writing is greatly valued because it helps the interpreter to escape from his own culture and make progress toward thinking in the alien terms of the text's culture.

Thus one thesis of this article is that even though the Bible is the verbally inspired Word of God, it is nevertheless to be interpreted like any other book, i.e., by recourse to the literary-historical method. As the ensuing survey of the history of biblical interpretation will show, however, many schools of interpretation from the early centuries down to the present argue that because the Bible was written under the inspiration of the Holy Spirit, it should be interpreted by means of a special hermeneutic.

A second thesis of this article is that the task of interpretation is not completed simply when an interpreter regards it as highly probable that he has understood what the author intended to communicate. The interpreter must still determine to what extent the author has succeeded in giving a true picture of his subject matter. If the only reason for grasping what another mind is trying to communicate is to be entertained, there would be no need to ask whether the message the author sought to impart truly represents some aspect of the world. M. Adler and C. Van Doren affirm that "the reader must do more than make judgments of agreement or disagreement. He must give reasons for them. . . . Otherwise he is treating a matter of knowledge as if it were an opinion" (*How to Read a Book* [rev. ed. 1972], p. 150). So asking how one may know that the Bible is true after he has grasped the intended meaning of its authors is certainly not an act of irreverence. On the contrary, not to give reasons for agreeing with the Bible's teachings but just to accept them by a leap of faith would be blasphemous, for it would be implying that the teachings of the biblical writings were no more worth bothering with than mere opinions. We honor God, therefore, as we, like the Bereans, examine the Scriptures "to see if these things [are] so" (Acts 17:11).

IV. History of Biblical Interpretation.–*A. Origen.* Origen (d. 254) expounded the first theory of biblical interpretation. He not only wrote voluminously, interpreting many biblical books, but also worked out a complete hermeneutical theory (*De prin.* iv). According to this theory, the Bible must be interpreted in a very special way because of its inspiration. For Origen, inspiration did not mean that the biblical books' own sequence of words and historical events set forth, by themselves, a true message from God. Rather, it meant that behind the words and details of the text was a deeper meaning, which was the unblemished Word of God. Thus in interpreting the triumphal entry into Jerusalem, Origen asserted that Jesus would have acted unworthily as the Son of God if he had had need of an ass and a colt, that He would have been stupid if He had been pleased by the placing of garments on the animals, and

that the strewing of branches in His way could only hinder His progress (*Comm. on John* x.17f.). The account, therefore, is to be allegorized: Jesus as the Word of God enters into the soul. The ass is the literal sense of the OT, the colt is the literal sense of the NT, and these become a vehicle for the Word of God as it is loosed by the two disciples, whom Origen makes representatives of the two phases of the deeper meaning, namely, the moral and the spiritual sense (x.18). Origen's allegorical method derives directly from Philo of Alexandria, who used the Greek method of allegorizing myths to fit philosophy in order to make the OT accord with Platonism (R. P. C. Hanson, *Allegory and Event* [1959], p. 249). Likewise, Platonism is the presupposition dominating all of Origen's thinking (*ibid.*, p. 361).

B. Antiochean School. The Antiochean School arose in opposition to Origen, and it included such men as Theodore of Mopsuestia (d. 429), the greatest exegete of the early Church, and Chrysostom (d. 407), the greatest preacher of the early Church. Instead of approaching the Bible with Hellenistic preconceptions, these men interpreted the Bible from the vantage point of its own Semitic thought. Theodore stressed the necessity of studying a passage's phraseology, separate clauses, and sequence of thought until the whole is seen as a sum of its parts. He was adamant in his rejection of Origen's allegorical interpretation and insisted that the biblical books be understood in their historical setting. He saw that when these books were interpreted literally and historically, they set forth a unified record of God's redemptive work in time (cf. the prologue to his comm. on Amos). Hence he acknowledged the validity of prophetical and typological passages in the OT, whose complete meaning did not become clear until the NT. This objective approach to the Bible is reflected in Chrysostom's sermons and comms., which even today make a valuable contribution to exegesis.

C. Middle Ages. The Antiochean School, however, had no lasting effect on the subsequent history of interpretation. Its influence vanished when it was included under the anathema on Nestorius at the Council of Ephesus in 431. Some form of Origen's allegorism, in which the Bible was expounded in at least two senses and sometimes as many as seven, prevailed for the next thousand years. The fourfold sense was most common: the literal-historical; the allegorical, to which faith gives assent; the moral, which governs conduct; and the anagogical, which tells something of the goal at which the faithful will arrive. As long as the Bible was thought to have more than one sense, it could easily be regarded as an "authority" alongside of, but not over, church tradition.

In the years between Origen and the Reformation, however, there were a few influences toward giving priority to the literal sense. Aquinas made the other meanings of Scripture dependent upon the literal meaning and thus elevated it above them. He said, ". . . all the senses [of Scripture] are founded on one — the literal — from which alone can any argument be drawn, and not from those intended in allegory . . ." (*Summa Theol.* i.1.10).

The prominent Jewish exegete Rashi (Rabbi Shelomo ben Isaac, d. 1105) and his followers influenced the teachers of the school of St. Victor in Paris to seek the meaning in OT books that their writers had in mind when they wrote. In the 14th cent. Nicholas of Lyra, the first author of a printed commentary, gives evidence of dependence on the leading teachers of the school of St. Victor. He in turn seems to have had some influence on Martin Luther, whose enemies composed the jingle, "If Nicholas had not played on his lyre, Luther would not have danced" (Farrar, p. 277).

D. Reformation. The impulse for the Reformation came as the Bible was given more freedom to speak for itself. Luther remarked, "When I was a monk, I was an expert at allegorizing Scripture, but now my best skill is only to give the literal, simple sense of Scripture, from which comes power, life, comfort, and instruction" (*Tischreden*, 5285, Oct. 1540). Whereas Romanism had considered the Bible to be so abstruse that it could be properly interpreted only by the clergy, who with the help of allegory kept the Scriptures submissive to church tradition, the Reformation advanced the principle of the Bible's perspicuity. This did not deny its inexhaustible profundity, but rather asserted that the Bible was understandable to all insofar as it was interpreted historically and grammatically. Thus the Reformers stressed both the study of the Bible in the original languages and the translation of it into the language of the people.

Unfortunately, however, Luther did not grant the literary-historical method exclusive rights in the interpretation of Scripture. He once quoted Paul's warning in 1 Cor. 3:10ff. that others should be careful to build upon the foundation of Jesus Christ, and commented, "All this is spoken of the ministry, so that he who would treat Scripture and explain it well may be sure so to treat it as to teach nothing but what agrees with the doctrine of faith, which alone stands firm and is founded on Christ" (*WA*, XXIV, 549). Luther never explained why his understanding of justification by faith alone was the "doctrine of faith" by which all the Bible should be interpreted. Some parts of Scripture fared badly as Luther applied his rule to them. In his disputation thesis, *De fide*, September 11, 1535, he affirmed that "Scripture is to be understood not contrary to, but in accordance with Christ.... If adversaries urge Scripture against Christ, we will urge Christ against Scripture.... If it is to be a question of whether Christ or the Law is to be dismissed, we say, Law is to be dismissed, not Christ." Some of the NT books urged Christ more than others, according to Luther. In the last paragraph of his *Preface to the NT* (1522) Luther said, "In a word St. John's Gospel [not the Synoptics!] and his first epistle, St. Paul's epistles, especially Romans, Galatians, and Ephesians, and St. Peter's first epistle are the books that show you Christ and teach all that is necessary and salvatory for you to know, even if you were never to see or hear any other book or doctrine. Therefore St. James' epistle is really an epistle of straw, compared to these others, for it has nothing of the nature of the Gospel about it" (quoted by E. Reuss, *History of the Canon* [2nd ed. 1884], p. 329).

Like Luther, Calvin also urged a literary-historical interpretation of the Bible. In the preface to his commentary on Romans Calvin said, "It is the first business of an interpreter to let the author say what he does, instead of attributing to him what we think he ought to say." But Calvin also set certain books of the NT above others. In the preface to his commentary on John's Gospel he said, "The doctrine which points out to us the power and fruit of Christ's coming appears far more clearly in [John] than in [Matthew, Mark, and Luke].... For this reason I am accustomed to say that this Gospel is the key to open the door to the understanding of the others." Calvin was troubled by the parable of the sheep and the goats (Mt. 25:31-46). Here Christ taught that the blessed will inherit the Kingdom of God and eternal life because they have done such things for "Jesus' brethren" as feeding them when they were hungry. To keep this passage from teaching salvation by works, Calvin felt he must go to Eph. 1:5f., which teaches that people become children of God through His grace, and to Eph. 1:18 and Gal. 4:7, which teach that God's children receive the inheritance by grace. Calvin concluded, "Even in these very passages [e.g., Mt. 25:31-46] where the Holy Spirit promises everlasting

glory as a reward for works, [yet] by expressly terming it an 'inheritance' he is showing that it comes to us from another source [than works]" (*Inst.* iii.18.2). In allowing passages so remote from Mt. 25 as Eph. 1 and Gal. 4 to control the author's meaning, Calvin was certainly not letting "the author say what he does, instead of attributing to him what we think he ought to say."

But the problem of gospel and law, or faith and works, which analogy-of-faith hermeneutics is called on most often to solve, evaporates as one probes more deeply into biblical theology. As Luther and Calvin perceived, a good starting-point for solving this problem is an understanding of what Paul meant by a "work of faith" (1 Thess. 1:3; 2 Thess. 1:11) and the "law of faith" (Rom. 3:27; cf. 9:31f.). Works done from the motivation of faith preclude the possibility of boasting and instead give all glory to God. These works are so vital to a saving faith that those lacking them are not saved. To be saved people must render the obedience of faith (Rom. 1:5) — less than perfectly! — to the law of faith (Rom. 3:27; 9:31f.). (See D. P. Fuller, *Gospel and Law: Contrast or Continuum?* [1980], p. 110 *et passim.*)

E. 16th and 17th Centuries. Reacting against the Reformation, Roman Catholicism became more adamant about the primacy of church tradition. At the fourth session of the Council of Trent (Apr. 8, 1546), it decreed, "No one shall presume to interpret the said sacred Scripture contrary to that sense which the holy mother Church hath held and doth hold." In seeking to establish their hermeneutic as over against that of Rome, the Reformers adopted as their motto, "The Bible is its own interpreter." This motto was good as long as it meant that no competing voice should interfere with the Bible's message. But in reaction against the Council of Trent, M. Flacius in his *Clavis scripturae sacrae* (1567) implied that the catechisms and creeds of the Reformation were the controlling norm for interpretation (W. G. Kümmel, p. 30). Following this trend, Protestant interpretation in the 17th cent. concerned itself not so much with literary-historical interpretation as with the support of its creeds through deductions gained from disconnected proof texts.

F. Bengel. As a revolt against Protestantism's polemicism and dry scholasticism in the post-Reformation era, a movement called Pietism arose; its greatest biblical expositor was J. A. Bengel. In his early years he was troubled by the textual variations in the few Greek MSS of the NT that were available to him. He wanted to follow Chrysostom's example of basing all exposition on the text alone, and so, to the collection of sermons by a famous preacher that he was publishing (1725), he attached a preface in which he outlined the strategy for his life work: first, to determine as nearly as possible from all available MSS the NT author's original wording, and then to write a commentary based on this text. He appealed to others to send him NT MSS. The readings selected for his Greek NT published nine years later were based on the division of MSS into "families" and on the principle that ever since has been employed in textual criticism: "The more difficult reading is to be preferred." But this strict scientific effort was for a practical purpose, as the rule laid down in the preface of his NT shows: *Te totum applica ad textum, rem totam applica ad te* ("Apply yourself fully to the text, and then apply all its subject matter to yourself").

As planned, his NT comm. *Gnomon* appeared eight years later (1742). The hermeneutical ideal toward which Bengel strove in this monumental work of exegesis is summed up in the preface to his comm. on Revelation (1740), where he says, "I desire to transmit to others nothing of myself, but simply what is found in the Scriptures. . . . An interpreter is to be compared with a fountain builder. He may not pour any water into the spring, but may work only to cause the fountain to run freely, sufficiently, and without impurity." His *Ordo temporum* (1741) indicates that as Bengel allowed the individual words, assured by textual criticism, to have their say, he came to see that the Bible is an organic unity centered on a redemption unfolding in history.

G. Rise of Historicism. Bengel's textual and historical efforts are both a reflection of and a contribution toward the rise of historicism, which was to have a decisive influence on subsequent biblical interpretation. Men like Theodore of Mopsuestia, Chrysostom, and the Reformers to some extent had sought to interpret the Bible historically, but as man's understanding of what constitutes a precise historical science increased, the Bible was subjected to a more rigorous historical investigation than ever before.

1. Beginnings. a. Textual Criticism. When the new study of ancient texts begun during the Renaissance was applied to the Bible, it became evident that the biblical text had been affected by the same historical forces that affect other documents. Thus J. Buxtorf's (d. 1664) insistence that the very vowel points of the MT were inspired had to give way before the labors of L. Capellus (d. 1658), J. Morinus (d. 1659), and R. Simon (d. 1712), who demonstrated the variations between the LXX and the MT. Likewise, Protestantism's virtual canonization of the Greek "Textus Receptus" in 1633 had finally to yield before the more thoroughgoing labors of such men as Bengel and J. A. Wettstein (d. 1754). Since it was discovered that historical procedure could bring about a more accurate knowledge of the original biblical texts, it was only natural to seek also for a more precise understanding of biblical content through historical investigation.

b. Secular Philosophy. Repulsed by the deadness and intolerance of organized religion, Hugo Grotius (d. 1645), René Descartes (d. 1650), Baruch Spinoza (d. 1677), and John Locke (d. 1704) shucked away what they considered the theological "husk" of the Bible and sought, by means of a historical investigation, to find the simple "kernel" of biblical truth. An investigation of secular parallels to the Bible, a historical testing of all traditional views of the authorship and purpose of the biblical books, and a reconsideration of their claim to canonicity were elements in the programs upon which these men embarked. Though the results of their investigations were controlled by their philosophical presuppositions, their methods became the foundation upon which future historical investigations were carried out with greater profit.

2. Turretini's Ground Rules. At the dawn of the rise of historicism, J. A. Turretini, a Reformed theologian from Geneva, set forth in *De Sacrae Scripturae interpretandae methodo* (1728) the basic hermeneutic that should control the literary, and especially the historical, interpretation of the Bible (Kümmel, pp. 58-60). This hermeneutic can be summarized in four propositions. (1) Since the God who gave revelation in the Bible also endowed people with the rational faculty necessary for receiving communication, the Bible's communication is to be grasped in the same way as other communications. (2) Since the Bible presumes the validity of the law of contradiction, which states that a thing cannot be both true and not true at the same time, no biblical interpretation can be accepted as true that clashes with what is already known to be true. Otherwise we could not live in relation to the world about us (for if yes could be no, how could we be sure of any fact?) or think coherently about God and His revelation. (3) Since it is a historical book, the Bible must be under-

stood from the vantage point of its own writers as they lived in their own times and places, rather than from any modern vantage point. (4) Since the Bible is to speak for itself like any other book, the mind, subject to the law of contradiction, must come to the Bible as a *tabula rasa,* emptied of all cherished concepts derived from our modern view of life. Such ideals are more easily stated than carried out in practice. Thus the history of biblical interpretation had to go through several phases before any influential interpreter came close to realizing them. Even the first full proposal for producing a biblical theology left the door open for the popular philosophy of the time to exercise a prevailing influence.

3. Concept of Biblical Theology. It was J. P. Gabler, in his inaugural speech as professor of theology at the University of Altdorf in 1787, who first outlined the theory of how a biblical theology was to be differentiated from dogmatic theology (Kümmel, pp. 98-104). He declared that the individual biblical authors and writings must be understood in terms of their own historical settings, and that in comparing these writings with each other, their differences must be forthrightly acknowledged. But then he transgressed Turretini's third rule, for instead of allowing biblical writers to explain these differences in their own way as God's different administrations in a progressive history of redemption, he insisted that the only kernels of truth that could finally be extracted from the Bible were the timeless truths that did not reflect historical conditioning. Then he transgressed the fourth rule by explaining miracles in a mythological, rationalistic way.

4. Hegelian Historicism. Hegel's concept of history as an evolutionary, dialectical process inspired the attempt to trace this process in biblical history. Beginning in 1833, F. C. Baur outlined apostolic history as being controlled at first by the Jewish party dominated by Peter. Against this arose the gentile antithesis under Paul's leadership. Then came the conciliatory, synthetic movement reflected by Acts and the supposedly non-Pauline Epistles, Ephesians and Colossians. J. Wellhausen attempted to show the same dialectic for the OT in his *Geschichte Israels* (1878). Proceeding on the basis of what he felt were documents (JE, D, and P) which could be discerned as underlying the Pentateuch, he declared that first (*ca.* 800 B.C.) there was the preprophetic religion (JE), in which God was regarded as a local tribal deity countenancing revenge on enemies and ritual sacrifice. In antithesis to this arose (*ca.* 623 B.C.) the prophetic religion (D), whose God exemplifies love and which considers a high ethical life to be more important than sacrifice. The synthesis came (*ca.* 500 B.C.) in the priestly religion (P), with its codification of laws and ritual.

Subsequent investigations, however, showed that these reconstructions of biblical history were neater than the facts warranted. Even the Jerusalem church had its Hellenistic side, and Paul's churches had their Jewish members. As for the Graf-Wellhausen theory of the development of the Pentateuch, R. K. Harrison has chronicled the serious objections against this theory that were raised by people scrutinizing the Pentateuch through various avenues of historical research (*Intro. to the OT* [1969], pp. 27-61). J. Dahse (1910), e.g., showed that the supposedly more primitive parts of the Pentateuch actually reflected a far more advanced degree of maturity than Wellhausen and his followers were willing to concede. But all this historical research, stimulated by Hegel's philosophy of history, enabled scholarship to come to a clearer understanding of biblical history.

5. Liberalism and the "Historical" Jesus. Through K. Lachmann (d. 1851) and C. H. Weisse (d. 1866), the argument gained ground that Matthew and Luke were composed on the basis of Mark and a hypothetical document called Q, whose existence in Matthew and Luke could be perceived. Consequently, H. J. Holtzmann in *Die synoptischen Evangelien* (1863) sought, by working from these two sources, to set forth a more accurate picture of Jesus "as He actually was." The resulting picture, however, was controlled by the presuppositions of liberalism, whose ideology stemmed from Kant, Hegel, and Schleiermacher. In accordance with liberalism's tenets of God's universal fatherhood and ethical idealism, the resulting "historical" Jesus did not announce the kingdom of God as an impending, apocalyptic intervention into history, but merely as that ethical reign of God which should exist in human hearts. Only after Albert Schweitzer (*QHJ*) pointed out liberalism's unwillingness to do justice to Jesus' eschatological views did the would-be champions of the historical method take account of this most basic aspect of Jesus' teaching.

6. History of Religions. This more recently developed historical approach poses the question of the significance of certain similarities that exist between some biblical vocabulary and thought forms and those found in the ancient Semitic religions, Jewish apocalypticism, and the Hellenistic mystery religions. When carried to an extreme, this method has sought to explain the Bible simply by reference to these religions, e.g., R. Reitzenstein's attempt (*Die hellenistischen Mysterienreligionen* [1910]) to represent Paul as a proponent of a Hellenistic mystery cult. But such an extreme application of this method fails to explain why, if the biblical religion is a duplication of other religions, it was able to prevail against them. As E. von Dobschütz put it in his *Probleme des Apostolischen Zeitalters* (1904), "If Christianity from the beginning had been nothing more than such a syncretistic religious structure of an ecstatic, magical, ascetic sort, it would not have been worth outliving those sects of the Ophites, etc. And in accordance with the brazen laws of history, it would have had to perish instead of finally emerging as victor . . . in the gigantic struggle with all the powers of the ancient world. There must have been something in Christianity which was different from that religiosity, a power that raised it above all those formations. This distinctive element is the Gospel and the impression it conveyed of the person of Jesus Christ" (quoted by Kümmel, p. 314).

7. Form Criticism. This approach investigates the function and history of certain biblical literary forms as they were used in the life of the religious community prior to their becoming fixed in their present scriptural sequence. The method was applied to the OT by H. Gunkel (though from a confessed naturalistic premise) in his *Genesis* (1901) and *Ausgewählte Psalmen* (1904), and to the Gospels by K. L. Schmidt in his *RGJ* (1919). Schmidt argued that before the Gospels were written and while their events were still being transmitted orally, the stress naturally fell on those aspects of gospel tradition that were useful for edification and evangelism. These aspects became fixed while such incidental matters as chronological and geographical settings (except in the case of the Passion narratives) became a thing of indifference. Consequently, when the Gospels were written the various pericopes concerning Jesus' ministry could be put into settings and sequences that suited the Gospel writers' particular purpose. Thus form criticism points out that each of the Gospels is an interpretation of the life of Jesus, and the expositor therefore does well to make his first task that of seeing each Gospel as an independent literary unity before trying to work out harmonies among them.

Form criticism is carried to an extreme, however, when

it is argued that the interpretational element in the Gospels so discredits their historicity that "we can now know almost nothing concerning the life and personality of Jesus" (R. Bultmann, *Jesus and the Word* [repr. Eng. tr. 1958], p. 8). All historical reports reflect the interpretation their writers ascribe to the events recorded, but no one concludes from this that Julius Caesar does not tell us actual history about Gaul *ca.* 50 B.C., or that Josephus does not give us actual history about the fortunes of the Jews in the Roman empire of the 1st century. Likewise, each of the Gospel writers arranges and edits his knowledge about Jesus' ministry, suffering, death, and resurrection, in order to set forth his particular interpretation of these matters. But the respective interpretations complement each other, and the historically valid basis for their interpretations is vouchsafed by (1) a general agreement regarding the fundamental historic framework of Jesus' life, (2) the express effort to be historically accurate (Lk. 1:1-4; 3:1-3), and (3) the greater ease in explaining the apostles' faith and understanding of Jesus from Jesus as He actually was than from their own imagination.

H. Revolt Against Historicism. During historicism's rise there were many biblical scholars, e.g., F. Delitzsch, G. F. Oehler, T. Zahn, J. B. Lightfoot, and B. F. Westcott, who, avoiding its extremes and biases, welcomed its development and were themselves among the greatest contributors to our present exegetical and historical knowledge of the Bible. Others, however, have felt that at best, historical exegesis could have only a limited value, because it tended to remove the Bible from the solid ground of revelation and inspiration to the flux and uncertainty that accompany history. In the preface to his commentary on Romans (Eng. tr., 2nd ed. 1933), K. Barth related how burdensome it had been for him as a pastor to climb the pulpit Sunday after Sunday with a desire to give his people the word of God, but unable to do so because from his university training he had learned to have such an awe before the verdicts of history that a reverent understanding of the Bible had become impossible (p. 9). Revolting from this, Barth attempted an interpretation of Romans controlled by Paul's concern (*Sache*) in writing it, namely, God's revelation in Jesus Christ, which at the time, however, Barth understood in terms of Kierkegaard's concept of the infinite qualitative difference between time and eternity (p. 10). In such an interpretation, historical and philological considerations could have their place, but if exegesis concerned itself only with these, it would be "preliminary" (p. 7). As a result, this commentary was more of a theological treatise than an exegesis, and Adolf Jülicher charged in a review that by this "theological" interpretation Barth, rather than explaining Paul, had succeeded only in putting himself and his own ideas in front of Paul (*Die Christliche Welt* [1920], p. 468). Nevertheless, Barth's approach has found such sympathetic response that some have claimed that, whereas the 19th cent. is known as the century of historical interpretation, the 20th cent. will be known as the century of theological interpretation.

1. Demythologizing the Bible. R. Bultmann joined with Barth and argued (*Zwischen den Zeiten,* 3 [1925], 334-357) for the inadequacy of the historical method because: first, it inevitably assumed a view of history and human possibilities that limited in advance what a historical document could say, and second, it encouraged the interpreter to be so detached in striving for objectivity that he was immune to any claim history might make upon him. To remedy the problem, Bultmann borrowed from the philosophy of existentialism by insisting that the interpreter must consider a historical document not as a specific instance of a general category that he already understands, but rather as a special and concrete instance in itself that cannot be subsumed under any generalization. He must be ready to have an encounter with the new possibilities of human existence that it may set forth. Since the NT was written by those for whom the possibility of faith in Jesus Christ had become a reality, it can be understood properly only by an interpreter who has such faith. The interpreter is made ready for this decisive event of faith by coming to the NT with a readiness to believe made possible by the Church's witness. Hence, according to Bultmann, decision is the requisite for understanding. The literary-historical method has no final control. While it can clarify NT faith, faith in turn supplements what can be learned by historical exegesis.

In Bultmann's subsequent expositions of this hermeneutic, he frankly admitted his indebtedness to the existentialism of M. Heidegger (in H. W. Bartsch, ed., *Kerygma and Myth* [rev. Eng. tr. 1961], p. 25). Consequently, he saw NT faith as pointing toward an "authentic existence" in which a person, freed from all regrets for the past, fears of the future, fixed systems of thought, and dependence on things of the world, takes full responsibility for his actions and lives fully in the moment. The NT, in its proclamation of the death and resurrection of Christ, asserts that God works graciously to bring people out from the old into this new and authentic existence.

Since NT proclamation is accompanied by concepts and ways of thinking that pertain to inauthentic existence, however, these must be "demythologized" so that the NT's central purpose of bringing about authentic existence may be enhanced. Thus one must acknowledge the invalidity of such NT features as (1) the evidences cited to support Christ's resurrection (*ibid.,* pp. 39f.), for all "proofs" militate against authentic faith; (2) the assertion that regeneration means receiving a new nature (p. 21), for this encourages one to depend on a "thing"; and (3) the thought of a future coming of Christ (p. 20), for this hinders an openness for the future. The NT concept of grounding all God's redemptive work in the historical, once-for-all event of Christ's death and resurrection must not, according to Bultmann, be understood as a datable event of the past but as one in which God acts in the decisive present in church proclamation (p. 209). Modern man's scientific world view is one argument Bultmann used for this demythologizing, but his main argument for it was existentialism (pp. 210f.). Bultmann would demythologize even if he were living in the Stone Age. Hence it is apparent that his presuppositions controlled his interpretation of history as fully as was the case with nineteenth-century liberalism. Not the witness of the apostles, which was for him intermixed with concepts leading to inauthentic living, but the "faith" purified by existentialism had the final say.

A small modification in the Bultmannian hermeneutic appeared in the writings of two of Bultmann's pupils, G. Ebeling and E. Fuchs. These men continued to demythologize the NT so that it would aid authentic living, but unlike Bultmann they stressed (in accordance with the supposed philosophy of the later Heidegger) that language, rather than being an obstacle that must be demythologized before it can convey the truth, is really the means for bringing people to authenticity, for language itself confronts people with authenticity. Hence while the NT language must be demythologized with Ebeling and Fuchs just as much as with Bultmann, the emphasis is upon the positive benefit of language rather than on the need to purge out the mythological elements.

2. Barth's Revised Hermeneutic. In the years directly

after the publication of *Römerbrief*, when Barth and Bultmann considered themselves as allies in a new cause, Barth revised his hermeneutic to such an extent that he came to oppose Bultmann. In the preface to his *Kirchliche Dogmatik* I, 1 (Eng. tr. *CD*), he expressly renounced the existentialist presuppositions that controlled his thinking for his *Christliche Dogmatik* (1927) because he felt they dethroned God by making Him conformable to our prior knowledge of existence. Over against any generalization, only Christ, the concrete and specific revelation of God, is to be the source for understanding the Bible.

The full expression of Barth's hermeneutic appears in *CD*, I/2, pp. 457-472 and 722-740. Decision is a requisite for understanding; biblical interpretation can be carried out properly only by one who has come to know God in Christ through church proclamation. Such a one, instead of sinfully evading the biblical message by endless historical and literary consideration of its details, grasps the center of the biblical message and thus has the proper perspective for letting literary and historical data make pertinent contributions.

Barth's novel ways of interpreting Scripture become understandable from this hermeneutic. Regarding his exposition of election, Barth declared that his "hermeneutical decision" not to depart one step from the Word of God, which calls us and exhausts our knowledge of God, must control the entire interpretational process (*CD*, II/2, p. 152). Christ is this Word of God, who not only elects but who Himself is God's elect, and who, by having become reprobate for us, shows us that now only God's blessings are to be enjoyed. But as the Church concerns itself simply with proclaiming this gospel, it must not wonder whether there will be a final universalism or whether some will not believe, for such questions are themselves a turning aside from the concrete Word of God to abstractions (pp. 417f.).

Barth's hermeneutic also controls his doctrine of Scripture. Since God is known only in Christ, the Bible is not an inscripturation of propositional revelation but rather is God's word as witness to Christ (I/2, p. 463). The OT witnesses to Christ by looking forward to His coming, the NT by recollecting His coming (pp. 70-121). Christ did not fully reveal God during His earthly ministry but only during His resurrection appearances, when He manifested God's pure presence in the triumph of life over death (p. 114). Yet even the Resurrection accounts cannot mediate this high moment of revelation; in describing it, human language can only stammer and grope for words (p. 115).

3. The New Hermeneutic. Despite their differences, Bultmann and Barth both proposed a theory of interpretation that regarded *die Sache* ("the subject matter") about which a text spoke as the basis for understanding its statements. Barth's method of interpretation in the 20th cent. was very similar to that of Luther and Calvin, who in their application of the rule of faith forced the Bible to be interpreted by a subjectively chosen subject matter. Nevertheless, J. M. Robinson has attached to Barth's method of interpretation the name "New Hermeneutic."

Robinson climaxed his essay "Hermeneutic Since Barth" by referring to the hermeneutic advocated by Heidelberg philosophy professor Hans-Georg Gadamer in his *Truth and Method* (Eng. tr., 2nd ed. [1975]). Like Barth, Gadamer regards "the subject matter" (*die Sache*) as the key for understanding what another human mind has sought to express. He says, e.g., ". . . The hermeneutical problem is not one of the correct mastery of language, but of the proper understanding of that which takes place [*der rechten Verständigung über die Sache*] through the medium of language" (Eng. tr., pp. 346f.). For Gadamer, "that which takes place [*die Sache*]" is the force which grips an interpreter when the horizon of the text (the author's intended meaning modified by subsequent history) fuses with the horizon of the interpreter — a horizon that is shaped by his individuality as it carries on a friendly conversation with the text under consideration.

Gadamer has written a very penetrating advocacy for subject-matter exegesis. We can see his influence both in some Protestant exegesis and in Roman Catholic exegesis since Vatican II.

a. Gadamer's Influence on Protestantism. Perhaps the most articulate spokesman in Protestant hermeneutics in the later 20th cent. is P. Stuhlmacher. According to Stuhlmacher, "Gadamer's hermeneutic which is based on a sympathetic grappling [*Einverständnis*] with the great history of the humanities set forth in a written tradition, and on reflecting on this tradition in which the interpreter is aware that both he and the text are a product of ongoing history [*Wirkungsgeschichte*] — this hermeneutic has such a great significance for theology because it spurs us on to view in a new light aspects of the church's consideration of its texts which have been virtually ignored. Gadamer's hermeneutic also holds us back from following only a critically-oriented, scientific understanding of the text which keeps us from a dialogue with the peculiar biblical language and its historical setting" (p. 200). As Stuhlmacher sees it, Gadamer has helped keep the Protestant theologian from being so committed to the historical method that the Church's own confessions can play no role in the development of a biblical theology.

Stuhlmacher is also convinced that Gadamer has made evident the great defect in Bultmann's hermeneutic. He cites in support the criticism that the French hermeneutical theorist P. Ricoeur has made of Bultmann's hermeneutical approach in Ricoeur's foreword to the French edition (1973) of Bultmann's *Jesus and the Word* (1926) and Bultmann's essay *Jesus Christ and Mythology* (1941). Stuhlmacher quotes with approval (p. 201) Ricoeur's critique: "A theory of interpretation which at the outset runs straight to the moment of decision is running too fast. It leaps over the moment of meaning, which is the objective stage. . . . There is no exegesis without a 'bearer [*teneur*] of meaning', which belongs to the text and not to the author of the text" ("Preface to Bultmann," *Conflict of Interpretations* [Eng. tr. 1974], p. 397). In putting meaning in the text rather than in the intention of the author who wrote it, Ricoeur's hermeneutic is very much like that of Gadamer. As Stuhlmacher states, "Ricoeur has given utterance to the classical statement that a true understanding of the text completes itself not behind [in authorial intention], but before the texts, and indeed in a dialogue which goes on with the tradition regarding matters of truth that are vital to life" (p. 208).

So Stuhlmacher believes that the hermeneutic of Gadamer and Ricoeur provides the way in which biblical studies can be free from the "agony" caused by the historical method in that it denies the very essence of biblical theology by insisting that all happenings in the world have only immanent, non-supernatural causes. As an example of this "agony" Stuhlmacher says, "It is more than bewildering to hear from one and the same Bible critic the view represented that Jesus from Nazareth [and] his messianic work and word are the peculiar content and basis of Christian faith, and at the same time see him affirm that according to norms of the historical critical method nothing reliable about this Jesus can be learned. . . . Here indeed one detects a sigh of agony" (p. 210).

Two steps must be taken, according to Stuhlmacher, to be relieved of this "agony." First, biblical exegesis must

reflect on the limited ability of the critical method to handle the basic Bible documents. In 1898 E. Troeltsch laid down the supposed ground rules of the historical critical method ("Über die historische und dogmatische Methode in der Theologie," *Gesammelte Schriften* [4 vols., 1919-1925], II, 729-753). One rule is that a historical report is doubtful until a verdict regarding its authenticity is rendered by the historical method and its use of "control." This "control" is that events cannot have occurred without analogous causes already existent in the world. But Stuhlmacher objects that such a rule is unsuited for biblical interpretation, because the central message of the Bible is how God has entered history and reconciled humanity to Himself in Christ — a matter which the principle of analogy cannot handle (p. 23).

To the question of how anyone, then, is to know the truth of this biblical message, Stuhlmacher answers that "biblical exegesis must establish an obligation backwards to church dogmatics. . . . Only then will biblical exegesis become aware of her subjectivity and understand herself as a part of the hermeneutical circle which draws the historical critical point of view into the context of a faith responsibility established by the church [*kirchliche Glaubensverantwortung*]. This hermeneutical circle also gives to exegesis a steadying support [*Hilfestellung*], and relieves the exegete of the task of having to establish, by the historical method, what is the normative body of Christian teaching [*massgebliche Glaubenswahrheit*]" (p. 210).

According to Stuhlmacher, if the exegete understood Gadamer's (and Ricoeur's) insight that no one is a neutral observer who stands, as it were, on the bank of the flowing river of history, but is himself borne along by that flow, then he would acknowledge that the Church's tradition regarding the meaning of the various biblical texts inescapably affects his work with those texts. Stuhlmacher insists that only this understanding of the exegete's historicity allows him to have "an open dialogue with the truth. . . . This dialogue is not only open because the interpreter is free to examine the textual tradition [of the Bible] for himself, but also because, according to Protestantism, the great confessional traditions of the church are the residue of the church's past interpretation of scripture, whose validity must, from time to time, be verified and, if necessary, be made more precise by reworking the primal witness of the Bible" (p. 221).

b. Gadamer's Influence on Roman Catholicism. We saw how the Council of Trent (1545-1563) forbade anyone from interpreting Scripture contrary to church tradition. But the power of the historico-critical method that prevailed for Protestant biblical interpretation in the 19th cent. made it necessary for the encyclical letter, *Providentissimus Deus* (1893), to affirm that expositors, while continuing to uphold the teachings of the Fathers, are nevertheless permitted "in those passages of Holy Scripture which have not as yet received a certain and definite interpretation, such labors [of the private student possessed of exegetical skill] [as] may, in the benignant providence of God, prepare for and bring to maturity the judgment of the Church" (*Rome and the Study of Scripture* [7th ed. 1964], § 109). Fifty years later in the *Divino Afflante Spiritu* (1943) the Catholic exegetes were told that their greatest task was that "of discovering and expounding the genuine meaning of the Sacred Books. . . . Aided by context and by comparison with similar passages, let them therefore by means of their knowledge of languages search out with all diligence the literal meaning of the words . . . so that the mind of the author may be made abundantly clear" (*ibid.*, § 550).

Church tradition, nevertheless, must continue to play a decisive role in Roman Catholicism, but just how it would fit in with the diligent search for "the mind of the [biblical] author" remains ambiguous in Vatican II's dogmatic constitution *De Revelatione* (Nov. 28, 1965). According to 2:9, "Sacred Tradition and sacred Scripture . . . are bound closely together and communicate one with the other. For both of them, flowing out from the same divine wellspring, come together in some fashion to form one thing. . . . Thus . . . the Church does not draw her certainty about all revealed truths from the holy Scriptures alone. . . . Both Scripture and Tradition must be accepted and honored with equal feelings of devotion and reverence."

R. Brown ("Hermeneutics") tries to describe clearly how biblical exegesis will always mesh with church tradition. He declares that Roman Catholicism wants the interpreter of Scripture to go beyond the author's intended meaning of a text to the deeper meaning (*Sensus Plenior*) which has been "sponsored by writings to which Christians give authority, e.g., the NT, the Fathers, [and] Church Pronouncements" (§ 59). He argues that the NT on a number of occasions gives a deeper meaning to the OT. For example, Mt. 1:23 interprets Isa. 7:14 to apply to the Virgin Birth of Christ when the immediate context of the Isaianic passage speaks only of a child that is soon to be born. Likewise, "Even after the end of the biblical era and the close of the public revelation . . . God guides the Church and Christians in the understanding of revelation" (§ 58). "The surest guide to [the fuller interpretation] is an authoritative interpretation of the words of Scripture in a more-than-literal way — authoritative in the sense that it comes from one of the guides to revelation, e.g., the NT, the Church Fathers, Church Pronouncements, etc. . . . If there are real meanings of Scripture that . . . are of importance to the divine plan for man's salvation, the most likely matrix for their emergence to clarity and acceptance is the context of Church life" (§ 63).

For Brown the probability of *Sensus Plenior* arises from the fact that the Bible is a divinely inspired book. "Since it is God who reveals and who inspires, God can tell man through revelation what he intended in inspiring earlier passages of Scripture" (§ 58). For biblical scholars who do not hold Catholicism's view of biblical inspiration, Brown suggests that "perhaps the solution is to take the emphasis off the mechanics of the divine and human intentions and to concentrate rather on the close relationship between the idea of [*Sensus Plenior*] and the modern interest in the hermeneutical value of language" (§ 68). Earlier Brown had invoked Gadamer and the "new hermeneutic" as favoring the idea of *Sensus Plenior*: "H. G. Gadamer has written on hermeneutic from a philosophical viewpoint, and he insists that one *always* understands the text differently from the way in which the author himself understood it. . . . The new hermeneutic is a modern tendency in favor of a more-than-literal exegesis" (§ 50).

4. Structuralism. Mention should also be made of "structural exegesis," or "structuralism," as another contemporary instance of the revolt against historicism. Instead of placing texts so fully under the control of the historical method, structuralism emphasizes the reading of biblical books as literature. This means that rather than trying to catch on to what the author wanted to say to the original readers, one simply regards the text as it stands as the "author," and oneself as the intended reader. Structuralism is advocated by a group of biblical scholars from diverse traditions, and, quite possibly, even more by teachers in secular schools who have no specifically religious or theological interest in the Bible. Following the lead of the linguist Ferdinand de Saussure and the an-

thropologist Claude Lévi-Strauss, who claim to have observed similar structures among the most diverse cultures at the deep levels of both language and behavior, these literary structuralists believe they can find recurrent patterns in the many different literary units of the Bible. Although no consensus has emerged about any book's structure and forthcoming meaning, the practitioners of structuralism argue that in diverse narratives, for instance, one nevertheless finds such recurrent themes as subject, object, ordainer, recipient, opponent, and helper. So R. Spivey observes that "at the heart of structuralism is the assumption that the 'uninvited guest' for all cultural phenomena is the human brain" (*Interp.*, 28 [1974], 133). But if this means that all human activity (both speaking and doing) is, at root, a repetition of the structure by which the brain operates, then all study of the humanities would soon become monotonous. Perhaps this is why in the editorial at the beginning of that 1974 issue of *Interp.* the remark is made that "there is at present nothing like a unanimous and hearty welcome for the uninvited guest, even among the scholarly initiates" (p. 131).

1. Cullmann's Revelational History. In contrast to the new hermeneutic, which scoffs at seeking an "objective" interpretation of the text, a minority of reputable biblical scholars, in accordance with classical hermeneutics, insist on discovering the consciously intended meaning which the author or redactor of a text wanted to share with his readers. K. Stendahl affirmed that the textual and historical material of the Bible "itself gives us means to check whether our interpretation is correct or not. . . . Our only concern is to find out what these words meant when uttered or written by the prophet, the priest, the evangelist, or the apostle — and regardless of their meaning in later stages of religious history, our own included. Such a program is by and large a new feature in biblical studies, a mature fruit of the historical method. . . . This descriptive task can be carried out by the believer and agnostic alike. The believer has the advantage of automatic empathy with the believers in the text — but his faith constantly threatens to have him modernize the material, if he does not exercise the canons of descriptive scholarship rigorously" (*IDB*, I, 422).

B. Childs objected that Stendahl, by sharply dividing the task of biblical theology first into the "descriptive task" — indicated by the quotation above — after which homiletical applications could be made for the world of today, had "struck a blow at the very heart of the [biblical theology] movement, as it was originally conceived" (p. 79). Like Stuhlmacher, Childs wants a biblical theology that will revitalize the Church by letting faith and church confessions temper the results of the historical method, which, he feels, can never support the central affirmations of the Bible because they bear no analogy to ordinary history. Childs also complained that Stendahl's insistence that we carry out first the "descriptive" task and only then the "hermeneutical" task of applying the results of biblical theology in some real-life, present-day situation was "not widely held by American Biblical theologians" (p. 26).

Stendahl cites O. Cullmann as one who insists on first engaging oneself in the descriptive task before proceeding to the all-important work of applying the results of descriptive interpretation to the needs of the particular life situations faced by various individuals and groups. In his early years Cullmann became disenchanted with liberalism and then with dialectical theology because he saw how both tried to make the facts of Scripture fit a modern philosophical point of view. Then he espoused the methodology of form criticism as the best way to rediscover the faith of the early Church. "As I prepared my lectures," he relates, "I sought to hold every modern or personally cherished idea regarding the nature of Christianity at a distance. Through this purely *scientific* approach, I came gradually to a deeper theological understanding of those concepts in the NT, which at the outset had been foreign to my ways of thinking" ("Autobiographische Skizze," in *Vorträge und Aufsätze, 1925–1962* [1966], p. 685).

The results of this interpretational procedure can be seen clearly in his *Christ and Time* (Eng. tr., 3rd ed. 1962), *Christology of the NT* (Eng. tr. 1960), and *Salvation in History* (Eng. tr. 1967). Cullmann affirms that the "legitimate limits . . . by which we seek to make the NT relevant to modern thought . . . are overstepped when, for example, in the story of the Fall [Gen. 3], as one finds it used in the NT, the sin of man is seen psychologically as the timeless condition of all men rather than the original rebellion against God. To interpret the story in this way is to fail to understand sin in the light of the 'second Adam' who comes *after* the first. Here too the sequence of events must be allowed to stand" ("The Connection of Primal Events and End Events with the NT Redemptive History," in B. Anderson, ed., *The OT and Christian Faith* [1969], p. 123). Cullmann insists that faith is "a decision to align my existence with that concrete [redemptive] history revealed to me, with that sequence of events" (*Salvation in History*, p. 69). In his view, a substantial part of "the central portion of salvation history [is] open to historical investigation. . ." (*ibid.*, p. 139). The rest of redemptive history, especially what lies back in the early chapters of Genesis (and of course forward, in the redemptive events yet to transpire), is not open to historical investigation. Yet "both are prophecy [i.e., revealed truth]; but the stories of the beginning and the end are only prophecy, while the middle section [of redemptive history], which is open in part to historical testing, is prophecy of a kind that refers to facts that can be historically established, and [the middle section] makes these facts [also] an object of faith" (*Christ and Time*, p. 97).

Unlike R. Brown (see IV.H.3.b above), Cullmann affirms that while the NT does place events of the OT in a new light, it does not do this by negating or giving an entirely new meaning to the OT events. Cullmann says, to be sure, that as the kerygma is taken up from the OT and goes into the NT it "passes through new interpretations more radical than all those undertaken within the sphere of the OT . . ." (*Salvation in History*, p. 113). But earlier he had declared that this radical transformation of meaning "never happens in such a way that an earlier account is disputed. Rather, aspects formerly unnoticed are by virtue of the new revelation now placed in the foreground, creating a correspondingly wider horizon" (*ibid.*, p. 88). So the revelation connected with the earlier events in redemptive history retains its integrity, although certain aspects of them (e.g., that Abraham received circumcision *after* he believed God in Gen. 15:6) are, in the larger perspective provided by later revelation, given an importance and significance which they did not originally have. Like pieces of a jigsaw puzzle, elements of earlier redemptive history continue to make their individual contributions, but as the later pieces of redemptive history are fitted in, the significance of those earlier pieces undergoes a radical change. In that all parts of the Bible therefore retain their integrity even though later revelation changes their significance, Cullmann is able to affirm that "a dogmatics . . . of salvation history . . . ought to be written some day" (*ibid.*, p. 292).

Unlike Stuhlmacher, Cullmann does not want church confessions to play a decisive role, along with the histori-

cal method, in finally ascertaining the meaning of a text. "When I approach the text as an exegete," Cullmann says, "I may not consider it to be certain that my Church's faith in Christ is in its essence really that of the writers of the NT. . . In the same way, my personal self-understanding [contra Bultmann], and my personal experience of faith must not only be seen as exegetical aids, but also as possible sources of error" (*ibid.*, pp. 68f.). Pertinent philological and historical data alone are determinative for arriving at the meaning that the author or redactor intended to impart in the text he was composing.

V. Adequacy of the Literary-Historical Method for Biblical Interpretation.–We argue that the method of interpretation advocated by K. Stendahl and O. Cullmann, which echoes that of Theodore, Turretini, and Bengel, is the proper one for interpreting the Bible. The foregoing history of biblical interpretation teaches us that only as biblical spokesmen are allowed to speak for themselves about the meaning of events occurring in history does the consequent message of the Bible concern a revelation from God. This message became so much a part of the stuff of history that, corresponding to God's revelation in Christ, the message the apostles and prophets proclaimed was, to use their words, "that which we have heard, which we have seen with our eyes, which we have looked upon and touched with our hands" (1 Jn. 1:1).

A. The Bible and the Historical Method. We have seen how Stuhlmacher (and others) argue that the nature of the historical method is unsuited for handling the message of the Bible, whose essence is that God has, in events of redemptive history and most especially in the Incarnation, produced happenings within time and space whose cause lies outside the immanental world. This view would be valid if Bultmann's description of historiography were correct. He said, "The historical method includes the presupposition that history is a unity in the sense of a closed continuum of effects in which individual events are connected by the succession of cause and effect. . . . This closedness means that the continuum of historical happenings cannot be rent by the interference of supernatural, transcendent powers and that therefore there is no 'miracle' in this sense of the word" ("Is Exegesis Without Presuppositions Possible?" in *Existence and Faith* [Eng. tr. 1960], pp. 291f.). J. M. Robinson has gone a step farther and argued that the possibility of miracles must be excluded from positivistic historiography not because of certain dogmatic presuppositions but because of the demands of the historical method itself (*Kerygma und historischer Jesus* [2nd ed. 1966], pp. 24f. n.).

Just what are these demands which are supposed to make it necessary to exclude the possibility of the supernatural in pursuing the historical method? In the book entitled *The Historian's Craft* (Eng. tr. 1954), written by the late French historian Marc Bloch, we find a typical example of how the historical method works. From this illustration it can be seen how the admission of the possibility of miracles might seem to make it impossible to gain any historical knowledge. Bloch cites the example of a certain Marbot, an officer in Napoleon's army, who in his memoirs relates how on the night of May 7, 1809, he crossed the raging torrents of the Danube in order to free some French prisoners from the Austrians. But a petition for promotion drawn up by Marbot himself on June 30, 1809, contains no mention of this daring exploit during the preceding month. There is no conceivable reason why Marbot would have kept silent about such a feat especially when applying for an advancement in rank. On the basis that everything is happening according to regularity, the historian easily concludes that Marbot was lying when he recorded this exploit in his memoirs. Though a braggart, he would not fabricate a tale about some deed of bravery when his superiors would all know that no such heroic deed had taken place less than two months earlier. But later, when writing for an audience most of whom would not question his story, Marbot's desire to depict himself in the most praiseworthy light would perfectly explain this lie.

Robinson's argument is that if the historian had to acknowledge that miracles, or irregularities, can happen in the immanental, then it would be impossible to conclude that Marbot was lying. If the world can be so irregular that Marbot the braggart becomes modest in not recounting his exploit at the very time when it would be to his advantage to recount it and his superiors would expect it of him, then it becomes impossible to check the veracity of his or any other reported occurrence.

Going back to Bultmann's statement of how the historical method operates, we observe that he makes two separate affirmations. First, he insists that "individual events are connected by the succession of cause and effect." Second, he insists that this succession of cause and effect is closed. "This closedness," Bultmann declared, "means that the continuum of historical happenings cannot be rent by the interference of supernatural transcendent powers." But we should observe how completely separate the two parts of this presupposition of the historical method are. The affirmation that every effect has a cause does not have to limit the source of that cause to what is immanental. The possibility that an event could have a supernatural cause without destroying the integrity of the historical method could be accomplished by never postulating the supernatural until all attempts to find immanental explanations have been exhausted.

The report of Paul's conversion provides an illustration of how the historical method retains its integrity while affirming that the explanation for Paul's radical change of behavior arises neither from his own inclinations nor from the circumstances of his life as an up-and-coming leader in Pharisaism. There is virtually universal consensus that Paul wrote Galatians. In 1:13f. of that Epistle he described the kind of person he was before his conversion. The all-important historical control for verifying his description is provided by the introductory words, "You have heard. . . ." Since it was generally known what kind of person Paul was before his conversion, the Judaizers at Galatia, who were attempting to turn the Galatian believers away from Paul's teachings, could not deny that Paul had once zealously insisted on circumcision and conformity to the Jewish dietary regulations in order to claim the blessings God had promised to Abraham's seed. We know that Paul could not have affirmed that he was once such a person if that were not general knowledge, for the Judaizers then could easily have discounted that Paul ever had undergone the radical change that made him the person he now was. Thus, relying upon a view of history in which individual *reports* of happenings can be verified by assuming that all effects in history result from appropriate causes, but denying the possibility that supernatural causes ever happen to affect the *reportage* of events, we are able to admit the possibility of supernatural events without destroying the possibility of all historical knowledge.

For example, there is universal consensus that Paul spearheaded the gentile mission and announced to Gentiles far and near that the great blessings which God had promised to Abraham and his seed (e.g., "I will be your God") could be enjoyed by all those who would simply repent and believe by banking their hope upon such promises. In order to be saved they did not have to submit to

circumcision or dietary restrictions. In carrying out the Gentile mission Paul himself repudiated the strong Jewish disinclination to dine with Gentiles (cf. Acts 10:12-14, 28), and so he must often have eaten so-called unclean foods himself.

The historical method wants to discover adequate causes to explain the effect of how Paul, a promising young Pharisee, renounced his adherence to Jewish distinctives. This adherence had given him the confidence that God approved of him (Phil. 3:4-6). Only factors which would have caused Paul to flee from a gentile dining table can be found in his motives and circumstances before his conversion. But since there must be an appropriate cause or set of causes to explain Paul's spearheading the Gentile mission — or else all possibility for gaining historical knowledge vanishes — we honor the explanation Paul himself gave for the change, namely, that the risen Jesus, whose followers he had been relentlessly persecuting, appeared to Paul as one possessing the power of the supreme deity and commissioned him henceforth to be His apostle, His spokesman on earth. (See D. P. Fuller, *Easter Faith and History* [1965], pp. 224-29.)

Paul's conviction that he is Jesus' apostle is expressed often enough in connection with his assurance that Jesus had commanded him to head up the Gentile mission (Rom. 1:5-7; 15:15ff.; Gal. 1:15-17; Eph. 3:2ff.; 1 Thess. 2:13-16) to make it difficult to think of his carrying on that mission apart from this conviction. So, starting with the controllable historical phenomenon of Paul's radical change of behavior, we can argue to his being the spokesman for Jesus Christ. Since he occupied such a position, it is not surprising to find him claiming that he and other apostles uttered words given them by the Holy Spirit (1 Cor. 2:13). Working outward from Paul it would be possible to show (if we had sufficient space) that the "we" of 1 Cor. 2:6-13 indicates that Paul regarded another apostle like Peter and a close associate of apostles like Apollos likewise as spokesmen for Jesus Christ. Thus in the centuries following the close of the apostolic age (*ca.* A.D. 100) when many were claiming to speak and write as Jesus' spokesmen, the churches instinctively fell back upon the writings of the apostles and their close associates as the authority to keep them from following false teachers. Working outward from the controllable history of Paul and the gentile mission, it is possible therefore to establish the validity of the twenty-seven books of the NT canon. Then, because Paul and the other apostles regarded the OT as inspired (cf. 2 Tim. 3:16f.), and because two Jewish sources definitively state the composition of the OT canon (2 Esd. 14:19-48 [117 B.C.]; Josephus *CAp* i.8 [39-46] [A.D. 90]) and omit the apocryphal and pseudepigraphical books, we accept the thirty-nine books of the OT as the extent of the rest of the Scriptures.

This use of the historical method — a use that insists that every effect in history must have a sufficient cause but does (unlike Troeltsch and Bultmann) allow transcendent causes when immanental causes are insufficient — does not go contrary to the peculiar nature of Scripture, as Stuhlmacher would have us believe. This method should be used not only to find the intended meanings of the authors and redactors of the sixty-six books of the canon, but also to gain knowledge of the truth and extent of the canon. Surely if redemptive history is inextricably interwoven with ordinary history, and if Jesus Christ, the culmination of revelation, became a part of history by becoming flesh (Jn. 1:14; 1 Jn. 4:2), then it is the historical method that should be used to interpret and validate the sixty-six books of the canon. Docetism becomes a threat in the hermeneutics of those who regard knowledge of divine things as something gained in ways other than through the literary-historical method. An attempt to understand a part of revelatory truth as being known in a manner that bypasses history and the way historical happenings and utterances are known, necessarily implies that that part of revelation was not history but was somehow transmitted immediately to the believer.

B. The Holy Spirit and Biblical Interpretation. Although the literary-historical method is adequate for determining and verifying the intentional meanings of authors and redactors, people in their totally depraved condition have no inclination to welcome the message of the Bible. Scripture gives God all the credit for the benefits and blessings that people enjoy and for the redemptive acts that finally mark an end to sin and death and bring in the reign of God in a condition completely free from all evil and infirmity. Inclined as people are to boasting in themselves and seeking the praise of others, they rebel against this message. A person's inability to "receive" (Gk. *déchomai*) spiritual things in 1 Cor. 2:14 means his unwillingness to welcome them (Bauer, rev., p. 177).

An unregenerate person can be cognizant of the spiritual things taught in Scripture, but since he accounts them to be foolishness, he does not "know" them in the sense of accepting them as true. If, however, his being a minister or Bible teacher in a Christian school prohibits him from denying the essential truthfulness of the Bible, he will, in defiance of the literary-historical method, appear to uphold the truth of Scripture by a process of distortion. Consequently he does not expound "the whole counsel of God" (Acts 20:27). A. H. Francke, one of the founders of the pietistic revival in Germany in the 18th cent., affirmed that "to the extent that you are crucified to the world you will be able to grasp what the holy Scriptures are saying" (E. Peschke, *TLZ*, 89 [1964], 103).

Regenerated people, too, must realize how the power of sin can gain the ascendancy in their lives, so that they will distort the intended meaning of some important statement in Scripture or even omit it altogether. In addition, therefore, to being skilled exegetes, they must spend time seeking fellowship with God. Only by fulfilling these two requirements will they succeed in declaring "the whole counsel of God."

C. Unity of the Bible. If our argument above (see V.A) regarding the canonicity and divine inspiration of the sixty-six books constituting the Bible is valid, a necessary corollary is that the Bible sets forth a coherent message. We have seen how, according to Cullmann, later revelatory spokesmen, in addition to providing new material, reemphasize facets of earlier revelation as part of the whole counsel of God. It is significant that Paul, as one of the last revelatory spokesmen, regards as worthy of hell anyone who teaches a message contrary to what has already been given (Gal. 1:8f.). As one of the revelatory spokesmen, Paul considered the teaching which he gave as being so in concert with the message of the earlier spokesmen that he used quotations from these earlier sources of revelation to affirm his point (Rom. 3:9) that all the peoples of earth are under sin (Rom. 3:10-18). Later revelatory spokesmen also regarded their interpretation of contemporary revelatory events to reflect so accurately God's moving of redemptive history toward its final climax that they could regard an event whose occurrence and meaning they reported to be a partial or typological fulfillment of prophecy uttered by an earlier revelatory spokesman (e.g., Acts 2:16-21; cf. Joel 2:28-32 [MT 3:1-5]). In establishing the unity of the Bible, each literary unit of the Bible must be allowed to contribute its teaching equally with every other literary unit.

Thus by letting only the literary-historical method operate in the handling of Scripture, we come to a knowledge of divine revelation in the same way we come to knowledge about everything else in our experience, namely, by a process of trying out various possibilities until coherency is attained. E. D. Hirsch calls this method the "hypothetico-deductive process" (p. 264), and those familiar with M. Polanyi's *Personal Knowledge* (1958) will see how similar the pathway to knowledge indicated in this article has been to his.

Bibliography.–Since the field of interpretation (hermeneutics) covers many diverse aspects, the following bibliography cites several important works on a number of hermeneutical subjects.

Bibliographies: N. Heinrichs, *Bibliographie der Hermeneutik* (1968), 430 pages of aspects of secular and theological hermeneutics from Schleiermacher to 1968; I. H. Marshall, ed., *NT Interpretation* (1977), helpful bibliographies on pp. 368f. for each of the eighteen essayists; P. Stuhlmacher, *Vom Verstehen des NTs* (1979), bibliography for history of interpretation on pp. 248-255.

Theory of Interpretation: D. E. Fuchs, *Hermeneutik* (2nd ed. 1958); H. G. Gadamer, *Truth and Method* (Eng. tr. 1975), the basic philosophy behind the "new hermeneutic"; E. D. Hirsch, Jr., *Aims of Interpretation* (1976), and *Validity in Interpretation* (1967), best thinking for classical hermeneutics instead of the "new hermeneutic"; D. Ihde, *Hermeneutic Phenomenology* (1971), the American interpreter of P. Ricoeur; R. E. Palmer, *Interpretation* (1969), the American spokesman for the "new hermeneutic" in secular usage; P. Ricoeur, *Conflict of Interpretation* (1974), a hermeneutical theorist for secular and biblical hermeneutics.

Histories of Biblical Hermeneutics: F. W. Farrar, *History of Interpretation* (1885; repr. 1961), excellent work up until the Reformation; R. M. Grant, *Short History of the Interpretation of the Bible* (rev ed. 1965); W. G. Kümmel, *The NT: The History of the Investigation of Its Problems* (Eng. tr. 1972); J. M. Robinson, "Hermeneutic Since Barth," in J. Robinson and J. Cobb, eds., *The New Hermeneutic* (1964), pp. 1-77, the best orientation to the "new hermeneutic"; B. Smalley, *Study of the Bible in the Middle Ages* (1952); P. Stuhlmacher, *Vom Verstehen des NTs* (1979), a consistently fine history of interpretation from the early Church down to 1979.

Hermeneutical Books on the Bible: L. Berkhof, *Principles of Biblical Interpretation* (1952); K. Froer, *Biblische Hermeneutik* (1961); B. Ramm, *Protestant Biblical Interpretation* (rev. ed. 1956); M. S. Terry, *Biblical Hermeneutics* (2nd ed. 1890; repr. 1952).

Special Areas of Hermeneutics: The OT: C. Westermann, ed., *Essays in OT Hermeneutics* (Eng. tr. 1963); NT and OT: F. F. Bruce, *NT Development of OT Themes* (1968); D. P. Fuller, *Gospel and Law: Contrast or Continuum?* (1980); R. V. G. Tasker, *OT in the NT* (1957).

INTERPRETATION OF TONGUES. *See* TONGUES, INTERPRETATION OF.

INTERPRETER [Heb. *mēlîṣ*]. In Gen. 42:23 the term denotes one who translates languages for another; but it can also be used in the sense of a mediator (Job 33:23) or ambassador (Isa. 43:27).

INTERTESTAMENTAL PERIOD.

I. Definition
II. World History
III. Jewish History
IV. MSS Discoveries
V. Theological Concepts

I. Definition.–The intertestamental period denotes here the history of postexilic Judaism from the time of the completion of the book of Malachi to the destruction of the temple of Jerusalem (A.D. 70). The period is characterized by the struggle of the Jews in Palestine to attain political and religious autonomy from a series of dominant foreign powers, by the emergence of different movements within Judaism (*see* DISPERSION; ESSENES; SADDUCEES; ZEALOT), by the process of hellenization carried on by the Macedonians and Romans, and finally by the emergence of Christianity.

Intertestamental Judaism was characterized, not by a continuing stream of OT prophecy, but by the interpretation of prophecy and revelation already given — the correct exposition and application of the OT to all areas of life. The Jews were aware of the cessation of prophecy. Josephus postulated the reign of Artaxerxes I — the Ahasuerus of the book of Esther (465-424 B.C.) — as the time when prophecy ceased (*CAp* i.8 [41]). This date concurs with the Mishnah (*Aboth* i.1), which names the men of the Great Synagogue — the scribes of Ezra's time — as the successors of the prophets (cf. 1 Macc. 4:46; 9:27; 14:41).

The OT canon probably closed before 400 B.C., though some scholars reject this position, postulating later dates for Joel, Jonah, and other OT books. In particular, Daniel is often considered a pseudepigraphon written after 167 B.C. But the appearance of fragments of the book of Daniel at Qumrân that are related paleographically to 1QIsa[a] argues for a date earlier than the Maccabean period (*see* ARAMAIC III; CANON OF THE OT; DANIEL, BOOK OF VI). By A.D. 70 the formation of the NT canon was well underway and Judaism and Christianity had parted company.

II. World History.–Persia and Greece were the dominant powers at the beginning of this period. Cyrus had founded the Persian dynasty (559-530 B.C.) and was succeeded in turn by Cambyses (530-522), Darius I (522-486), Xerxes I (486-465), and Artaxerxes I (465-424). Cambyses conquered Egypt in 525, but later attempts to extend rule over the Greek world failed when the Persians were defeated at Marathon (490), Salamis (480), and Plataea. Artaxerxes I was assassinated in 424 and Darius II ascended the throne.

A situation developed in which Persia attempted to play off the Greek city-states, especially Athens and Sparta, against each other. Infighting and intrigue, however, were also characteristic of Persian politics. Darius II sent his son Cyrus II to Sardis with instructions to give increased help to Sparta. While on this mission, however, Cyrus began collecting Greek mercenaries to further his own plans. In 403 Artaxerxes II, brother of Cyrus, ascended the throne. Cyrus soon attacked his brother's forces at Cunaxa and was defeated (401). The retreat of Cyrus's Greek mercenaries is described in Xenophon's *Anabasis;* most of them eventually joined the Spartans.

Egypt threw off Persian control and began its 30th Dynasty (380). The forces of Artaxerxes II, with the help of Greek mercenaries, attempted to reassert Persian rule in 373, but with mixed success. Artaxerxes III led a second attack in 343 that was victorious, terminating the rule of the pharaohs. The Persian Empire, however, was in a state of disintegration, with continual rebellions in the various satrapies. Artaxerxes III attempted to reorganize the Persian government when he came to the throne (358).

The rise of Macedonia was on the horizon. Philip II of Macedon (359-336), father of Alexander, first conquered the Greek cities of Pydna, Methone, and Amphipolis. He then incorporated into his alliance Thrace, Chalcidice, and Thessaly. The economy of this alliance, supplemented by mines at Pangaeum, enabled him to support a large standing army, which became the army of his son Alexander.

While attending the wedding feast of his daughter, Philip was murdered (336), and Alexander, age twenty, was elected as his father's successor. He crushed a revolt by Thebes (335) and began his assault against the Persians, defeating them first at the battle of Granicus (334). He met Darius III in battle at the river Issus (333) and defeated him, capturing his family. Alexander then moved to the south, conquering Tyre after a long siege (333/2) and arriving in Egypt in 332. He began the process of hellenization in the Near East by founding ALEXANDRIA, his largest colony. After leaving Egypt, Alexander defeated a vast army led by Darius, and thus became master of the Persian Empire. He penetrated as far east as India and then returned to Babylon, where he developed a fever and died (323).

Alexander's empire was divided among his generals, the *Diadochoi* ("successors"): Ptolemy (Egypt); Seleucus (Babylon and Syria); Antipater and his son Cassander (Macedonia and Greece); Antigonus (Phrygia and parts of Asia Minor), Lysimachus (Thrace and Pergamum); Eumanes (Pontus). A power struggle developed among them as they attempted to develop their own dynasties.
