Palestine assumed the role of a buffer state between the domains of Ptolemy and Antigonus as it had centuries earlier between Egypt and Assyria. First Palestine was under Ptolemaic rule (320-198), but a Seleucid victory at Panion (200) began the period of Seleucid rule which lasted until the end of the Maccabean revolt when the Seleucid king Demetrius II granted Jewish independence and freedom from tribute (142). Antiochus IV tried unsuccessfully to reimpose tribute but his death in 128 brought a final end to the Seleucid dynasty.

The Jews enjoyed relative independence until 64, when Pompey annexed Syria as a province of Rome. Pompey proceeded to Jerusalem in 63 and the Jews came under Roman rule, losing their political independence until modern times. Pompey was killed in a civil clash with Julius Caesar (48), and shortly thereafter Caesar was assassinated (44). Octavian succeeded Caesar and defeated the rival forces of Mark Antony and Cleopatra at Actium (31). Tiberius succeeded Augustus (Octavian), and Caligula, Claudius, and Nero were emperors in turn. Nero, reigning from A.D. 54 to 68, initiated the persecution of Christians by the Roman state. Vespasian (69-79) succeeded Nero, and under his direction Titus conquered Jerusalem (70) and crushed Jewish resistance at Masada, ending the First Jewish Revolt. The final attempt by the Jews to throw off Roman rule was the Bar Cochba revolt during the reign of Hadrian (117-138), also unsuccessful (see H. E. L. Mellersh, *Chronology of the Ancient World* [1976], pp. 96-326).

The process of hellenization initiated by Alexander and continued later by the Romans was of central importance in this period. Its basis was the Greek practice of colonization, already current in classical times. In the Hellenistic period, soldiers were needed in distant areas under Greek control. Land was given to soldiers in return for military service, and this obligation passed to the occupant of the property in succeeding generations. By this method, a Greek population was attracted to cities of strategic or economic importance. Alexandria was Alexander's first and greatest colony, a trading and administrative center. Other cities developed by colonization included EPHESUS, founded by Ionian colonists in the classical period; CORINTH, refounded by the Romans as a colony in 44 B.C. after its destruction in 146; and PHILIPPI, subject to colonization by Alexander's father Philip in 356 and later by Antony and Augustus.

Such colonization brought with it the Greek language, Greek standards of weights and measures, coinage, and the gymnasium (Gk. *gymnásion*), which was a public facility for sports that also provided instruction in philosophy, literature, and music (see Hengel, I, 6-88; *Oxford Classical Dictionary, s.v.* "Colonization, Hellenistic" [A. T. Griffith], "Education" [F. A. G. Beck]).

III. Jewish History.–The rebuilding of the temple, completed in 516 B.C., was followed in the next century by the reforms of Ezra and Nehemiah. It is generally agreed that Nehemiah restored the walls of Jerusalem (444), stayed for twelve years, and then returned from Susa after a brief absence (*ca.* 430; Neh. 13:6f.). Ezra came to Jerusalem in 457, the seventh year of Artaxerxes I (Ezr. 7:1, 8), and collaborated with Nehemiah in 444 (Neh. 8:1). (For another view *see* EZRA; JERUSALEM III.F.1.) During this period, Malachi condemned the sins of an unrepentant nation and a corrupt priesthood, though a small remnant continued to follow in the footsteps of Ezra and Nehemiah (Mal. 3:16f.).

In Palestine during this obscure period the Jews and Samaritans became religiously and ethnically separated, a fact reflected in the Gospel narrative and still quaintly perpetuated by the contemporary Samaritan high priest at Nâblus. Earlier, Aramaic began to replace Hebrew as the vernacular. This development is discernible even within the canon, notably in the book of Daniel. From Alexander the Great onward, Judaism became increasingly threatened by the cultural forces of a highly intellectual Hellenism, both in Palestine and the Diaspora. Jewish resistance to such hellenization often explains the vast bulk of intertestamental literature, much of it valuable and fine, none of it canonical. The discerning reader perceives that divine guidance kept the right books within the compass of Scripture. Eventually, and gradually, Judaism manifested itself in the "Three Pillars of Judaism": the tripartite OT canon of Law, Prophets, and Writings; the synagogue, with its new, liturgical, and entirely nonsacrificial worship; and Rabbinism, which culminated in the Talmud and Midrash.

The Jerusalem temple and priesthood were corrupt in Malachi's day, but when Antiochus IV Epiphanes came to the Syrian throne in 175 B.C. their apostasy and deliberate policy of hellenization were even more notorious. The new monarch (nicknamed Epimanes, "the madman"), in a policy of forced hellenization, overestimated the extent to which he could insult the seemingly decadent Jewish religion; and in view of its official representatives, one cannot entirely blame him. From the still faithful remnant was sparked off the celebrated Maccabean revolt, led in turn by Mattathias, Judas Maccabeus, Jonathan, and Simon (168-135 B.C.) (*see* MACCABEES). Daniel's "abomination of desolation" was proximately and typically fulfilled in the erection by Antiochus Epiphanes (168) of an altar to the Olympian Zeus in the very temple of God, an action that fired the immediate revolt of Mattathias.

By their revolt, God's chosen people slowly regained a

precious if transitory freedom. This liberation culminated under Simon in 142 B.C., when they gained exemption from the taxes, virtually from the overlordship, of the Seleucids (1 Macc. 13:41f.). In gratitude to the deliverer, but in violation of the scriptural requirements of direct hereditary succession, the high priesthood, now Hasmonean, became invested and ratified in the person of Simon in 140. This break with tradition, however, was never wholly acceptable to the pious and orthodox, and it was a cause of later frictions. Simon's life ended tragically; he was murdered in 134 by his son-in-law, an ambitious hellenizer. But his son John Hyrcanus, another intended victim, escaped and became his successor (*see* HASIDEANS; HASMONEANS).

During the long dominion of John Hyrcanus (134-104), who was virtually king as well as high priest, the Pharisaic and Sadducean parties became clearly differentiated, with their respective legal and priestly emphases. John abruptly transferred his allegiance from the first to the second. We have seen already that his high priesthood was not entirely satisfactory to the orthodox; neither was his kingship, so far as monarchy could be acceptable at all in a theocratic and covenant community, for he was not of the house and lineage of David. The quarrel with the Pharisees probably flared up on these grounds. There followed the brief reign of Aristobulus I, and the lengthy one of Alexander Janneus (102-76). Alexander, able and successful in many political respects, entirely alienated the Pharisees by his obvious personal unfitness for the high priesthood. Pelted with citrons by the common people for a technical and ritual mistake, he retaliated with defiance and massacre (Josephus *Ant.* xiii.13.5 [372-76]). At the close of his life, he counseled his queen and successor Alexandra Salome to make peace with the Pharisees. This she did, according them increased powers in the Sanhedrin, which they retained right into NT days (*Ant.* xiii.16.1 [405]). Her son Aristobulus usurped the place and power of his older brother Hyrcanus and reigned till 63 B.C. Then Pompey intervened, and Palestine, shorn of its recent conquests, was integrated into the Roman province of Syria.

The first phase of Roman domination in Palestine extended from 63 till 37, and then as later the Jews were uneasy under the yoke. Pompey entered the holy of holies in 63, though he seems merely to have looked around, and Crassus, proconsul of Syria, plundered the temple treasury in 54 (*Ant.* xiv.4.4 [72]; 7.1 [105-109]). During most of this period Hyrcanus II, a pitifully ineffective puppet, held nominal rule, civil and ecclesiastical. Freed from his younger brother, yet now subject to the Roman governor, he tended to delegate such real power as he possessed to the Idumean Antipater, whose Edomite origins gave the deepest offense to Jewish sentiment. The incumbency of Hyrcanus ended pathetically after more than twenty years, when his intending successor Antigonus confined him in bonds and then bit deeply into his ears, thereby rendering him ritually unfit for office (Josephus *BJ* i.13.9 [270]). Antigonus himself did not last very long, and with him the Hasmonean line came to its end. HEROD, a son of Antipater and therefore also of Edomite blood, secured the backing of Rome in 40 B.C., and was able three years later to consolidate his kingship over a torn and troubled Palestine. During his rivalry with Antigonus he had used and equipped the fortress of Masada W of the Dead Sea.

Herod, rightly or wrongly styled "the Great," was capable, loyal to Rome, and reasonably successful in his control of Palestine. But his political leanings, his Idumean blood, and his ten wives did not commend him to Jewish subjects. He rebuilt in lavish manner the Jerusalem temple, but the heathen sanctuaries that were also indebted to his munificence suggest religious views mixed or skeptical. Filson (p. 22) sums him up by remarking trenchantly, "He preserved order almost everywhere except in his polygamous palace." Since Herod features prominently in the Matthaean Infancy narratives, his death in 4 B.C. gives a date before which Jesus must have been born. The domains granted to his sons, the various Roman procuratorships in Palestine, in short, the general affairs of relevant history down to about the mid-60's A.D., are well known and need not be recapitulated here.

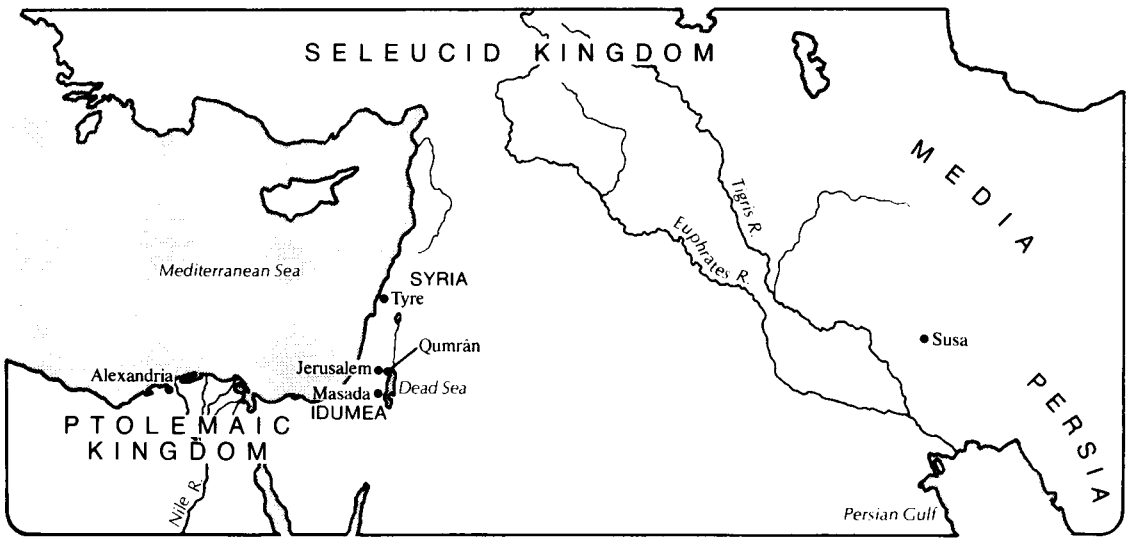
About A.D. 66, warned by such predictions as Mk. 13:14, the Christians in Jerusalem fled to Pella. This was the beginning — perhaps effectively the end — of the split between Church and synagogue. The prolonged siege of Jerusalem by Titus followed, culminating in A.D. 70 in the butchery of Jews in the Holy City, and in the total ruin of the cherished temple, even as Christ had predicted (Mk. 13:2).

The conquest of Titus was virtually final, but there were pockets of resistance. Nine hundred sixty Jewish men, women, and children gathered on the summit of the old Herodian fortress of Masada; on the east side was a sheer drop of about 400 m. (1300 ft.) to the Dead Sea. From here they defied, almost successfully, the embattled might of Rome. Flavius Silva and his men nearly retired in frustration and defeat. But wind, fire, and catapult stones at last smashed the Jewish defenses; and the conquering legions proudly mounted the high platform, only to find that the defenders had committed suicide. Yigael Yadin, with others, uncovered the skeletons of these people in the 1960's; he aptly calls them an "undying symbol of desperate courage" (*EAEHL*, III, 806, 810f.).

Outside of Jerusalem, Judaism assumed slightly different forms. The Qumrân community, associated by some scholars with the Essenes, carried on its own kind of scriptural exegesis and religious practice with the belief that they were a righteous remnant living in the last days. Large numbers of Jews made up the Dispersion (Gk. *diasporá*), i.e., those who were scattered throughout the countries outside Palestine. Such a group lived on the island of Elephantine in the Nile, close to modern Aswân. Their recovered documents, the famous Aramaic papyri edited by Cowley, reflect their affairs for the quarter century ending in 399 B.C. Thereafter, they disappear from recorded history. Other important Jewish communities existed in Alexandria, Rome, Antioch, and numerous cities in Asia Minor (see Safrai and Stern, I, 117-215; Smallwood, pp. 120-143, 201-255).

IV. MSS Discoveries.–Discoveries of MSS fragments at various locations in Palestine have made a great contribution to the study of this period. The scrolls found at Qumrân consist of Scripture texts and commentaries; Hebrew and Aramaic portions or transcripts of apocryphal, targumic, and pseudepigraphical literature, some of it previously known only in Greek; sectarian documents that had long disappeared; etc. This recovered Essene library is filling many gaps in intertestamental history and Christian antecedents and forms an immensely valuable area of biblical study (*see* DEAD SEA SCROLLS).

Other Judean caves have yielded fragmentary MSS, letters, and coins. Remains of Greek, Hebrew, and Aramaic MSS from the Cave of Horror (Naḥal Heber) include a fragmentary Greek translation of the Minor Prophets closer to the MT than the LXX. The caves at Naḥal Ṣe'elim yielded a small parchment containing Ex. 13:1-16 in a form almost identical to the MT. More impressive are the discoveries from the Cave of Letters: small fragments of Pss. 15–16, Nu. 20:7f., and letters written by Simon Bar Cochba to his cohorts. The cave at Wâdī Murabba'ât con-



tained a scroll of the Minor Prophets, other biblical books, and papyri in Greek, Latin, and Arabic. The excavations carried on at Masada (1963-65) under the direction of Y. Yadin discovered fragments of biblical scrolls including Genesis, Leviticus, Deuteronomy, and Ezekiel. Nonbiblical fragments included a small portion of the book of Jubilees in Hebrew and large fragments of chs. 39–44 of the Hebrew original of Sirach. A Hebrew text of Sirach was found in the Cairo Genizah in 1910, and some scholars hotly disputed its genuineness, stigmatizing it as a late translation from the Greek; but this MS from Masada has proved them wrong. Some argue that this book would have been included in the canon had its original been known at the right time (see *EAEHL*, III, 665-694, 812-14).

V. Theological Concepts.–Intertestamental Judaism in Palestine particularly included quiet orthodoxy, fierce Zealot nationalism, subconscious assimilation, and decadent hellenization. OT theology advanced in certain respects, with important NT consequences, partly by internal development, partly by naturalization of Zoroastrian and other elements. Diaspora Jews, devout if less strictly orthodox, attempted allegorically and otherwise to blend Greek philosophy with Hebraic tradition — the extreme example is the Alexandrian Philo. Usually the amalgam was recognizably Jewish. In 1909 Schürer exhaustively examined the Palestinian (*HJP*, II/3, 1-155) and the Hellenistic (II/3, 156-381) literature. To the Apocrypha, Pseudepigrapha, Josephus, and Diaspora literature must now be added the Dead Sea Scrolls. (These topics are discussed elsewhere in this encyclopedia under their separate titles. On rabbinic Judaism, oral and secondary at this state, supremely important later, *see* COMMENTARIES, HEBREW; TALMUD; TARGUM.)

Loyalty to external Judaism reached its pinnacle in the Masada martyrs (see III above); in the butchered thousand who would not break the sabbath by resisting attack (1 Macc. 2:29-38; cf. 2 Macc. 6:11); and in those who endured torture and death, rather than break the law by eating pork (1 Macc. 2:61f.; 2 Macc. 6:18-31; 7:1-42). The same spirit sent the Qumrân covenanters to the stricter life of the desert. Aristobulus (104-103 B.C.) exercised on Galileans and neighboring Ituraeans a policy of forcible Judaizing by circumcision, though this was somewhat rare (cf. Mt. 4:15). At the opposite extreme were skeptical hellenizers such as those sporting youths under Antiochus Epiphanes, naked runners so apostate from Judaism as to submit to surgical uncircumcision — Gk. *akrobystía* means foreskin, hence by metonymy the artificial restoration thereof (1 Macc. 1:15; Asm.Mos. 8).

Intertestamental Jewish literature, historically and theologically important, often differs in content from the books that Protestantism considers inspired. Protestantism excludes all of it from the canon, and thus rejects prayers for the dead (2 Macc. 12:43-45) and a doctrine of salvation by works (2 Esd. 7:77; Tob. 4:9-11; etc.), concepts found in the Roman Catholic Church, which regards these books as canonical. That humanistic commonplace of rabbinic Judaism, the good and evil impulse in man, is found in germ. The *cor malignum* of 2 Esd. 3:20 (NEB "wicked heart") foreshadows the evil impulse (cf. vv. 48, 92; Gen. 8:21); for the so-called good impulse, cf. Sir. 1:14.

Noncanonical apocalyptic, child of OT prophecy, emphasizes national and individual judgment, eternal rewards and punishments, usually postulating imminent eschatological climax. These apocryphal apocalypses — symbolic, dualistic, esoteric, usually pseudonymous, and "history in the guise of prediction" — claimed that they had been written by Moses, Enoch, or some ancient worthy, and hidden since that author's time for this very emergency — a claim intolerable within the inspired canon and to modern believers yet widely accepted at that time. Such writers of such works, feeling deep spiritual affinity with their prototypes, possessed a unitary Hebraic time sense, with a weakened apprehension of chronological separation. They believed themselves to be God's chosen instruments to build up the people in dark days. Within Judaism, apocalyptic lost its place to Rabbinism after A.D. 70, yet profoundly influenced Christian theology, where it reached its high-water mark in the book of Revelation. For apocalyptists and time, see Thorleif Boman, *Hebrew Thought Compared with Greek* (Eng. tr. 1960); D. S. Russell, *Apocalyptic*, pp. 205-223.

Intertestamental Jewry sought to approach the transcendent God through intermediaries; thus angelology became elaborated. In the Ezra Apocalypse (2 Esd. 3–10) the prophet is instructed by the archangel Uriel (cf. canonical Zechariah), and also by Tobit and Enoch. Evil, rebellious angels, including Satan under his various designations, also came to prominence. In certain sources (cf. 1 Enoch; Jubilees) the fallen angels who united themselves to human females are designated "watchers." They, not God, are the source of evil, which has an extent much wider

than this terrestrial globe. In other sources evil is explained by Adam's original transgression, or by the evil impulse in mankind.

A conception resembling the doctrine of original sin, consistently bypassed by later rabbinic Judaism, is found in 2 Esd. 4:30-32; 7:11, 48, 118; these passages should be compared with key phrases in 1 Cor. 15. Individual responsibility is also stressed, in the spirit of Ezk. 18 (2 Esd. 7:102-106; cf. vv. 112-15). Into this doctrine the idea of the treasury of merits inconsistently intrudes (7:77). Comparable with Mt. 7:13f. is the stern doctrine of majority damnation; some apocryphal devices to justify the ways of God to man are not appealing (7:49-61; 8:1-3, 40f.). The writer also stresses (8:55-60) that most people have abused their free will, spurned God's law, and brought condemnation upon themselves. Original sin is implied clearly in Sir. 8:5; 25:24; cf. also Wisd. 10:1. The possibility of avoiding direct transgression, or sin with a high hand, is stressed in Tob. 4:5.

Vitally important are the interconnected concepts of Word and Wisdom. The creative Word goes back by implication to the repeated "and God said" of Gen. 1, but assumes firmer contours in the constantly recurring paraphrastic *Memra* of the Targums — cf. sample passages translated in TARGUM. The Greek form *lógos* began probably with the pagan Heraclitus (*ca.* 500 B.C.), passed through the hands of the Stoics several centuries later, reappeared in theological form in Philo of Alexandria (d. A.D. 40), then found its highest expression in Jn. 1:1-14. In classical Greek philosophy, logos meant roughly the rational principle undergirding the universe and its lifestream; for Philo, who intermingled metaphysics with revealed religion, the concept, still impersonal, came to mean the rational thought of God, the impress of His creative power on the scheme of things. John ascribes all this and infinitely more to the incarnate Son. The analogous concept of Wisdom, created by God and personified, begins canonically with Prov. 8:22-31, becoming more sharply etched in Sir. 1:1-10; Wisd. 7:22-26. The latter passage makes Wisdom "a pure effluence from the glory of the Almighty... the flawless mirror of the active power of God and the image of his goodness" (NEB). The creative Word is found in Wisd. 9:1f., the decreeing Word in 18:15.

There are three levels of Jewish future expectation — a revived, extended "Golden Age" Davidic kingdom in Palestine; a catastrophic, destructive climax to this world (cf. 2 Pet. 3:5-11), with an eternal age supervening; and the two combined, the first reappearing as some kind of millennium. The popular first view falls below ESCHATOLOGY proper, but explains some reactions to the ministry of Jesus (cf. Jn. 6:15; Acts 1:6). Bultmann describes apocalyptic eschatology as "a pessimistic-dualistic view of the Satanic corruption of the total world-complex" — but this tabloid statement must not be too blindly generalized.

Outstanding in Christian interest is the eschatology of 2 Esdras. The age to come is first delineated as succeeding this one without pause or interval (6:7-10). Messiah is to appear, inaugurating a reduced "millennium" of four hundred years, after which he, and all living beings, will die. Then after seven days of the silence of death will come a general resurrection, followed by divine judgment (7:28-36). The bliss of paradise is briefly described (8:52-54). These passages should be compared with Dnl. 12; Rev. 20–21; etc. Chapter 6 must mean that there is no interval between the present age and Messiah's glorious earthly reign — otherwise it would contradict ch. 7. A thousand-year millennium is found in the Slavonic Enoch, one of indefinite length in 2 Baruch. Angelology, the precosmic angelic fall, final judgment, the destruction of the world, and eternal bliss and woe are more fully portrayed in the Ethiopic and Slavonic versions of Enoch; the latter incorporates the celestial architecture of the seven heavens (cf. 2 Cor. 12:2-4). The Assumption of Moses (*ca.* 4 B.C.) has probable Qumrânic links. Its lost ending is, according to some scholars, quoted in Jude 9.

Apocalyptic writers frequently recognized two Messiahs, one associated with the priestly tribe of Levi, the other with the royal Davidic tribe of Judah. This is carried over (with variations) into the Dead Sea Scrolls (cf. 1QS 9:11) and into Talmud and Midrash (see R. A. Stewart, *Rabbinic Theology* [1961], pp. 46-53). Under the new covenant the Messiah is, of course, one and unique. There is, however, a dual strain in the OT, the Suffering Servant, who reflects the passion, atonement, and substitution of Christ's first advent (Isa. 42:1-4; 49:4-9; 50:4-9; 52:13–53:12) and the Son of man, who will come with power and judgment at the end of the age (Dnl. 7:13f.), reflecting His second advent (cf. Isa. 63:1-6; Rev. 19:11-16; and innumerable parallels).

R. J. W.

INTREAT. Archaic term used in the AV for ENTREAT.

INVESTIGATE; INVESTIGATION [Heb. piel of *bāqaš* (Est. 2:23), *ḥēqer* (Job 34:24); Gk. *zētéō* (Acts 25:20)]; AV INQUISITION (Est. 2:23), "without number" (Job 34:24), "such a manner of questions" (Acts 25:20); NEB also INQUIRY (Job 34:24), "discussions" (Acts 25:20). *See* INQUIRE.

INVISIBLE [Gk. *aóratos*–'unseen' (Rom. 1:20; Col. 1:15f.; 1 Tim. 1:17; He. 11:27)]. This term is used as an attribute of God in every biblical occurrence except Col. 1:16, where it refers to ranks of unseen angels and other spiritual powers. That no one had seen God at Sinai is stated in the OT (Ex. 34:20; Dt. 4:12), and, in spite of God's special self-disclosure to Moses (Ex. 33:18-23; Nu. 14:14), it became axiomatic in Judaism that no one had seen or could see God in this present age (SB, II, 362f.; cf. Mt. 5:8). The influence of this concept is reflected in the Johannine writings, with their emphasis that "no one has seen God" (Jn. 1:18; 5:37; 6:46; 14:9; 1 Jn. 4:12), and in the Pauline tradition as well (Rom. 1:20; Col. 1:15f.; 1 Tim. 1:17; 3:16). The use of *aóratos* in the context of a doxology (1 Tim.

1:17) and in an adjectival clause with the pronoun "who" ("who is invisible"; He. 11:27) shows that "invisible" was one of the ascriptions to God used in early Christian liturgy (*see* GOD, ASCRIPTIONS TO). R. J. W.

INVITE [Heb. *qārā'* (Nu. 25:2; Josh. 24:9; 1 K. 1:9; etc.); Gk. *kaléō* (Lk. 7:39; 14:8; 1 Cor. 10:27; etc.), *hoi keklēménoi* (Mt. 22:4; Lk. 14:7; etc.), *parakaléō* (Acts 8:31; 28:14), *antikaléō* (Lk. 14:12), *phonéō* (Lk. 14:12; cf. Mt. 20:32)]; AV also CALL (Isa. 13:3; Lam. 2:22; Lk. 14:12; etc.), BID (Mt. 22:9; Lk. 14:12, 17; etc.), DESIRED (Acts 8:31; 28:14); NEB also SUMMON (Lam. 2:22), ASK (Lk. 14:12f.), THOSE WHO WERE INVITED (Lk. 14:24), GUESTS (Lk. 14:17; Jn. 2:2), COMPANY (1 S. 9:13, 22). The Heb. *qārā'* can mean call or summon, hence invite, especially in cultic contexts (e.g., 1 S. 9:13, 22). The Gk. *kaléō* with the passive participle *keklēménoi* corresponds to the Hebrew usage: "call," "invited guests." The compound form *antikaléō*, occurring in the NT only in Lk. 14:12, means "be invited again," and *parakaléō* literally means "call to one's side," hence summon or invite (Acts 8:31; 28:14; cf. Mt. 20:28).

Israel is cautioned in Ex. 34:15 against accepting invitations (LXX *kaléō*) to the sacrificial worship of other nations in which the sacrifices are eaten by the participants. Paul may be alluding to this passage, among others (cf. Dt. 32:17), as he admonishes the Corinthians concerning participation in the meals and worship of unbelievers (1 Cor. 10:20-29). Sometimes an invitation is quoted (e.g., Gen. 18:3-5; 19:2; Jgs. 19:9; Lk. 24:29; Acts 16:15) or a visit is announced (e.g., Lk. 19:5). Often servants were used to convey the invitation (Mt. 22:3f., 8). Ancient invitations written on papyri have been studied by C.-H. Kim (*JBL*, 94 [1975], 391-402).

See also ENTERTAIN. R. J. W.

INWARD MAN (AV Rom. 7:22; 2 Cor. 4:16). *See* INNER MAN.

INWARD PART. An expression in the OT, occurring only in Ps. 139:13 (Heb. *kilyâ;* AV REINS) and Mic. 6:14 (Heb. *qereḇ;* AV MIDST; NEB STOMACH). The former term occurred only in the plural, and denoted either the kidneys as such (cf. Ex. 29:13, 22) or the interior of the abdomen in general, in which the most secret part of man was held to be located (Ps. 7:10; Jer. 11:20; etc.). *Qereḇ* (Akk. *qirbu*) also referred in a broad sense to the contents of the abdominal cavity, and was regarded symbolically as the seat of laughter (Gen. 18:12) or thought (Jer. 4:14). It was clearly an area of emotional sensitivity and reaction (cf. AV "bowels of mercies," Col. 3:12), whose receptive functions were the gift of the Creator. R. K. H.

IOB yōb [Heb. *yôḇ*]; AV JOB. Third son of Issachar (Gen. 46:13). In parallel passages (Nu. 26:24; 1 Ch. 7:1) the name is Jashub (Heb. *yāšûḇ*), which the versions in Genesis also support as the correct form.

IOTA ī-ōt'ə [Gk. *iōta*] (Mt. 5:18); AV JOT; NEB LETTER. The English transliteration of the Gk. *iōta* (ι), the ninth (originally the tenth) letter of the Greek alphabet. *Iōta* is the nearest equivalent of the Heb. *yōḏ* (י), the tenth letter of the Hebrew alphabet. The DOT also mentioned here (Gk. *keraía*, "horn") is the smallest projection of any part of a letter, or an accent or breathing mark of a text (cf. Lk. 16:17). The sense, therefore, of Mt. 5:18 is "not the smallest letter or even the smallest part of a letter will be abolished in the law or the prophets until all things are accomplished." The statement is based on the practice, well known at the time, of the copying of Hebrew and Aramaic texts by scribes.

See Bauer, rev., pp. 386, 428. B. S. EASTON
R. J. W.

IPHDEIAH if-dē'yə [Heb. *yipdᵉyâ*–'Yah(weh) redeems']; AV, NEB, IPHEDEIAH. A descendant of Benjamin (1 Ch. 8:25).

IPHTAH if'tə [Heb. *yiptaḥ*]; AV JIPHTAH. An unidentified town in the Shephelah of Judah, named with Libnah, Ether, and Ashan (Josh. 15:43). It may be modern Tarqūmīya, about 10 km. (6 mi.) NW of Hebron.

IPHTAHEL if'tə-el [Heb. *yiptaḥ-'ēl*–'God shall open' or 'may God open']; AV JIPHTHAH-EL; NEB JIPHTAH-EL. A valley in Galilee, described as the western boundary of the tribal allotment of Zebulun (Josh. 19:14) and as the place where the allotment of Asher touches Zebulun (v. 27). F.-M. Abel (*GP*, I, 398) rejects the identification with Wâdī el-Qurein as too far north and Wâdī 'Abellin as unimportant. He finds the reasons on which Dalman selected Wâdī el-Melek unconvincing and opts for *Sahl el-Baṭṭôf*, "which moreover is traversed by the upper course of Wâdī el-Malik." Sahl el-Baṭṭôf (Biq'ath Beth Neṭôphah) is a broad valley running NE-SW, 11 km. (7 mi.) N of Nazareth, but the meeting point of Asher and Zebulun would probably be located NW of Nazareth. The modern 1:100,000 map of the State of Israel marks *H. Yiptaḥ'ēl* 1 km. (0.6 mi.) SW of where Biq'ath Beth Neṭôphah and the highway northwest from Nazareth intersect (coordinates 171.240). *See* ASHER. W. S. L. S.

IR ir [Heb. *'îr*]. A descendant of Benjamin (1 Ch. 7:12), called Iri in v. 7.

IRA ī'rə [Heb. *'îrā'*; Gk. *Eiras*].

1. A person referred to in 2 S. 20:26 as a priest (AV "a chief ruler") of David. The RSV translation is the only possible one; but, according to the text, Ira was "a Jairite," and thus of the tribe of Manasseh (Nu. 32:41) and not eligible to the priesthood. On the basis of the Peshitta some would correct "Jairite" of 2 S. 20:26 into "Jattirite," referring to Jattir, a priestly city within the territory of Judah (Josh. 21:14). Others point to 2 S. 8:18, "David's sons were priests," as an indication that in David's time some non-Levites were permitted to serve — in some sense — as priests.

2. An Ithrite, or (with a different pointing of the text) a Jattirite, one of David's thirty mighty men (2 S. 23:38 par. 1 Ch. 11:40); possibly identical with **1.**

3. Another of David's thirty mighty men, son of Ikkesh of Tekoa (2 S. 23:26; 1 Ch. 11:28) and a captain of the temple guard (1 Ch. 27:9). F. K. FARR

IRAD ī'rad [Heb. *'îrāḏ*]. Grandson of Cain and son of Enoch (Gen. 4:18).

IRAM ī'ram [Heb. *'îrām*]. A "clan chief" of Edom (Gen. 36:43 par. 1 Ch. 1:54).

IR-HA-HERES. *See* CITY OF THE SUN.

IRI ī'rī [Heb. *'îrî*]. *See* IR; URIAH **5.**

IRIJAH i-rī'jə [Heb. *yir'îyāyh*–'Yahweh sees']. A captain at the gate of Benjamin in Jerusalem, who arrested Jeremiah the prophet on suspicion of intending to desert to the Chaldeans (Jer. 37:13f.).

IR-MELACH (Josh. 15:62, NEB). *See* SALT, CITY OF.

IRNAHASH ir-nā'hash [Heb. *'îr nāḥāš*–'city of (the) serpent(-god)'; Gk. *póleōs naas*–'city of Na(h)as'] (1 Ch. 4:12). A person or a city. The passage in 1 Chronicles is a genealogy of the descendants of Judah, and Tehinnah is named as the father of Irnahash. This statement, taken alone, could mean that Tehinnah founded the city of Nahash, but the preceding context deals only with fathers and their offspring. The LXX, however, whether from an ancient tradition or from misunderstanding of the Hebrew (i.e., taking *'îr nāḥāš* literally), translates "city of Naas" and thus raises the problem of identifying such a city.

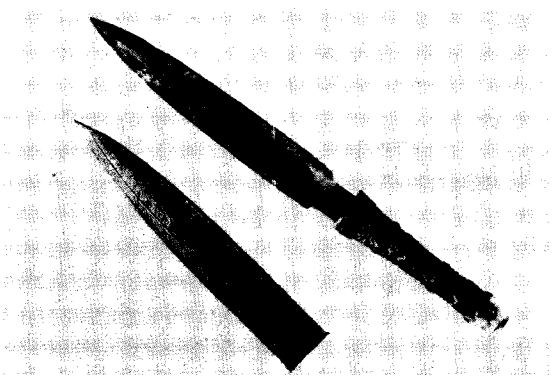
The reading in 1 Ch. 4:14, "Joab [was] the father of Ge-harashim ["valley of craftsmen"], so called because they were craftsmen," lends support to the interpretation that Irnahash, like Ge-harashim, is not a personal name. Heb. *nāḥāš* is cognate with *neḥōšeṯ*, "copper" (Dt. 8:9, etc.), and with *neḥuštān*, "bronze serpent" (2 K. 18:4), although BDB derives them from separate roots (with no supporting evidence); hence it is possible to translate Irnahash as "copper city" or Cypropolis. Aharoni (*LBHG*, p. 224) describes it as an Edomite city, in the northeastern part of the Arabah (p. 33). Until it is determined whether Irnahash is a person or a place, attempts to locate a place are academic. W. S. LASOR

IRON [Heb. *barzel*; Aram. *parzel* (Dnl. 2:33ff.; 4:15 [MT 12], 23 [MT 20]; 5:4, 23; 7:7, 19); Akk. *parzillu*; Ugar. *brḏl*; Phoen. *brzl*; Hitt. *barzillu*; all loanwords deriving from Sum. BAR.GAL; Gk. *sídēros*, adj. *sidḗreos*].

I. Beginning of Ironworking
   A. Egypt
   B. Mesopotamia
   C. Anatolia
   D. Syria-Palestine
II. Iron in the Pentateuch
   A. Tubal-cain
   B. Og's Iron Bed
   C. Palestine's Iron Ore
III. Iron as a Symbol

I. Beginning of Ironworking.–A. Egypt. Modern archeology has brought to light iron objects in the form of tools, implements, weapons, and jewelry from as far back as predynastic and early dynastic Egypt. Jewelry in the form of iron beads from the predynastic period came from Gerzah. Iron tools and an iron plate were found embedded in the masonry of the pyramid of Cheops and the pyramid temple of Mendure (Mycerinos), both of the 4th Dynasty (*ca.* 2500 B.C.). A lump of iron from Abydos dated to the 6th Dynasty (*ca.* 2200 B.C.) differs from the meteoric iron used by primitive man. The low nickel content has led A. Lucas to conclude that it is made of nonmeteoric iron and R. Forbes suggests that it may have been manufactured as a by-product of the process of refining gold. Other iron objects come from the 11th (*ca.* 2000 B.C.) and the 18th dynasties (*ca.* 1500 B.C.). The meteoric origin of early iron in Egypt is directly implied by its Egyptian name, "metal of heaven," but iron was originally also produced as a by-product of gold. Literary evidence for the early use of iron comes from various Egyptian texts and the Amarna Letters (14th cent. B.C.).

B. Mesopotamia. In Mesopotamia chance survivals of iron objects have been found primarily from the ruins of Ur, Tell Chagar Bazar, Tell Asmar, and Mari from the first half of the 3rd millennium B.C. An iron dagger of Ur from the 3rd millennium B.C. is made of meteoric iron. The Sumerian ideogram for iron and the later derivative cuneiform signs point again to the celestial (meteoric) origin of iron. However, an iron dagger blade from Tell Asmar in Iraq (*ca.* 2800 B.C.) is shown to be of man-smelted iron (Maryon, p. 173). Thus there is evidence that iron in small quantities was produced from terrestrial ores. There is also a considerable amount of literary evidence for iron in early times in documents many of which are from the time of Hammurabi (18th cent. B.C.).



Dagger with iron blade, gold and glass handle, rock-crystal knob, and gold sheath, from the tomb of Tutankhamen (Egyptian Museum, Cairo; picture Lehnert and Landrock)

C. Anatolia. The earliest evidence is an iron sword from Alaca Hüyük, near Ankara, from *ca.* 2400-2100 B.C. The reason for the scarcity of iron objects, even from the time of the Hittites (*ca.* 1400-1200 B.C.), may be explained by the oxidation of iron in wet climates. It is quite certain that the art of iron smelting was discovered by the Hittites of Anatolia at *ca.* 1400 B.C. Thus iron was in the ancient Near East both a newcomer and a metal known of old. There is literary evidence from the time of the Hittite king Hattusilis III (1289-1265 B.C.) which indicates that the Hittite territory was the source of iron for Assyria in the 13th cent. B.C. (Gurney, p. 83). It seems that the Hittites maintained a monopoly on iron until their final destruction *ca.* 1200 B.C. Then Hittite ironsmiths settled here and there in the ancient Near East, taking with them their trade secrets.

D. Syria-Palestine. An iron inset in a gold ring from Byblos comes from as early as *ca.* 1825 B.C. At Ugarit an iron battle-axe was discovered from the 15th-14th cent. B.C., but in the 14th cent. B.C. iron in Ugarit was apparently more expensive than silver (*Syria*, 30 [1953], 194). It is generally believed that the Philistines introduced iron into Syria-Palestine, but if the Philistines came from Crete rather than from the north (Anatolia), this hypothesis is difficult to maintain (see Winnett).

The OT literary evidence contributes significantly to a more complete understanding of the availability and use of iron in Syria-Palestine. On one occasion Israelite soldiers under the leadership of Moses returned from combat against the combined Midianite forces and brought with them rich spoils among which was iron (Nu. 31:22). The iron and other metal objects captured at the destruction of Jericho were dedicated to Yahweh (Josh. 6:24). On another occasion the Israelites were allowed to divide among themselves the iron and other spoils taken from their Canaanite enemies (Josh. 22:8). The possession of "iron chariots" (*see* IRONSMITH) by the Canaanites proved to be a major obstacle in Joshua's conquest of Beth-shean, the Valley of Jezreel, and the coastal plain (Josh. 17:16, 18; Jgs. 1:19). During the time of the judges Israel was sorely oppressed by the "iron chariots" of the Canaanite king Jabin of Hazor (Jgs. 4:2f.). The early references to iron from the time of the Conquest clearly indicate that the Canaanites were in possession of iron before the invasion of the sea-peoples (Philistines) *ca.* 1200 B.C. Later passages show indisputably, however, that the Philistines were able to establish and enjoy a local monopoly on the

production and sale of iron which gave them an unusual advantage that they knew how to exploit (1 S. 17). The Philistines prevented Israel from the manufacture of iron weapons and tools in order to protect their own monopoly on iron and made Israel dependent on Philistine ironsmiths for all services (1 S. 13:19-22). Iron was still not plentiful in Israel at that time.

The first material evidence for iron in Palestine in well-authenticated associations consists of an iron dagger, an iron knife, and iron jewelry from Late Bronze tombs (late 12th or early 11th cent. B.C.) of Tell el-Fâr'ah (Sharuhen). Also from twelfth- and eleventh-century-B.C. tombs (nos. 58, 84, 85) at Gezer came various iron implements. At Megiddo the Canaanite city of stratum VI yielded an iron dagger and an iron knife from about 1150 B.C. At Beth-shemesh iron objects in the form of weapons, jewelry, ornaments, and tools date from the late 11th cent. B.C. (stratum III). The excavations at Gerar yielded a number of iron objects (dagger, lance-head, knife) from the 11th cent. B.C. An iron plough-tip was found at Saul's Gibeah (11th cent. B.C.). Iron was introduced at Tell el-Ḥesī and at Lachish before the 10th cent. B.C.

An authentic ancient iron mine on the soil of Palestine is the one at Mugharet el-Wardeh not far from Tulûl edh-Dhahab, the ancient Penuel. The reference to the bed of iron of Og, king of Bashan (Dt. 3:11), points to the working of this mine, or some other in that part of Transjordan, as early as the time of Moses, or earlier. Tell Deir 'allā (Succoth?) has revealed an advanced metallurgical industry for smelting and casting of iron and copper both prior to and after the time of Solomon (cf. 1 K. 7:45; 2 Ch. 4:17). The presence of iron slag at the mining and smelting camps along the Wâdī el-'Arabah is evidence that iron ore was mined and smelted there during the Iron Age. In Cisjordan an iron foundry was excavated at Tell el-Qasîleh. Iron ores were also found near Mt. Carmel, Mt. Hermon, southwest Midian, and the Lebanon Mountains.

This extrabiblical evidence coincides with the biblical records which indicate that a change took place with the establishment of the Hebrew monarchy. Iron became plentiful in Israel during the reign of David. The Chronicler reports that David laid up "great stores of iron" (1 Ch. 22:3) which were later employed for the construction of the temple (1 Ch. 29:7). There is evidence that in the Davidic period the iron-tipped plow was employed on a large scale (Wright, p. 95), which led to increased productivity of the soil and permitted the Israelite population to increase significantly. In David's day almost every farmer was able to own iron axes, mattocks, plowpoints, pruning hooks, and sickles (2 S. 12:31 = 1 Ch. 20:3). The recovery of the iron axe-head from the Jordan by Elisha (2 K. 6:5) adds evidence for the use of iron implements in the 9th cent. B.C. The expression "iron from the north" in Jer. 15:12 may suggest that the Hebrews got their iron from the Phoenicians in the north, who probably brought it from Anatolia (Ezk. 27:12, 19).

Iron hoe (left) and plowshare, 10th cent. B.C., found at Tell Jemmeh, 10 km. (6 mi.) S of Gaza (Israel Department of Antiquities and Museums)

II. Iron in the Pentateuch.–Scholars have often taken exception to the mention of iron in certain parts of the Pentateuch (cf. Gen. 4:22; Dt. 3:11; 8:9). The finds of iron objects in the ancient Near East from prehistoric and historic times provide conclusive archeological evidence that iron was known and used long before the time of Moses, and that statements in the Pentateuch about the early use of iron are in harmony with known facts.

A. Tubal-cain. According to ancient Hebrew tradition Tubal-cain is associated with the beginning of ironworking in that he produced various implements of bronze and iron (Gen. 4:22). This is no anachronism. The author of this passage traces in summary fashion the origin of bronze-working and ironworking to the ancestor of all metallurgical experts. The "hammering" (*ḥṯš*) of iron does not imply the complex art of mining, smelting, casting, and forging of iron as developed later. Archeology has shown that early iron was hammered.

B. Og's Iron Bed. In Dt. 3:11 Og king of Bashan is said to have had a "bedstead of iron" (NEB "sarcophagus of basalt"). The iron for this "bedstead" (*'ereś*) may have come from the rich iron ores and smelting area of Mugharet el-Wardeh. The entire bed may not have been of solid iron. It probably had iron fittings or trimmings like the "beds of ivory" (Am. 6:4) which were inlaid with ivory, or the bronze bed from Tell el-Fâr'ah which was a bed with bronze fittings. Sometimes the word "iron" in this passage has been translated as "basalt," and correspondingly the word for "bed" as "sarcophagus." These suggestions lack contemporary literary support, as does the suggestion that the bed refers to a dolmen (*see* DOLMENS).

C. Palestine's Iron Ore. Palestine is described as a land "whose stones are iron-ore and from whose hills you will dig copper" (Dt. 8:9, NEB). The discussion above (I.A) has shown that Palestine is a country of iron ore. The fact that both iron and copper were mined and smelted within the confines of Solomon's realm was a literal fulfillment of this passage.

III. Iron as a Symbol.–In many instances iron is a colorful biblical symbol. The strength of iron is contrasted with that of straw in Job 41:27 (MT 19). The strength of life is like bolts of iron and bronze (Dt. 33:25). The stump and roots of a tree are as strong as iron and bronze fetters (Dnl. 4:15, 23). The iron sky and the bronze earth are symbols for drought and infertility (Lev. 26:19; Dt. 28:23). Bronze and iron as compared with gold and silver refer to Israel's corruption (Jer. 6:28; cf. Ezk. 22:18). The smelting of iron in the furnace is a symbol of testing, cleansing, and suffering (Dt. 4:20; 1 K. 8:51; Jer. 11:4; Ezk. 22:18). The "pillar of iron" (Jer. 1:18) is a symbol of strength; the "iron sinew" is a symbol of stubbornness (Isa. 48:4); the "iron rods" are a figure of speech for strength (Job 40:18); the "rod of iron" of rulership is symbolic of harshness (Ps. 2:9; Rev. 2:27; 12:5; 19:15). The sharpening process of iron with iron symbolizes the sharpening of one man's wits with that of another so that his capacity of perception becomes as keen as a razor blade (Prov. 27:17).

The comparative valuation of metals plays an important role in the symbolism of the four world empires of Dnl. 2: gold = Babylon, silver = Medo-Persia, bronze = Greece, and iron = Rome. Iron is the least valued metal in this scale (cf. Hesiod's five ages in *Works and Days* 106-201). Though inferior in value as compared with the other metals, iron is superior in strength. The powerful iron teeth of the fourth beast in Dnl. 7:7, which symbolize the same power that is portrayed by the iron legs of Dnl. 2:40, speak of the superior strength and intense power of destruction of this beast as it devours and subdues other nations. From these examples it is apparent that iron is a symbol of unsubdued power, unusual force, and firm persistence while it is at the same time inferior in value to gold, silver, and bronze on the symbolic scale.

IRON. *See* YIRON.

IRONS. *See* CHAINS; PRISON V.

IRONSMITH [Heb. *ḥāraš barzel*] (Isa. 44:12); AV SMITH; NEB BLACKSMITH. A metalworker who works with iron. The first "forger" (*lōṭēš*) of bronze and iron is said to have been Tubal-cain (Gen. 4:22). Iron objects were used in early times (*see* IRON; cf. Nu. 35:16; Dt. 3:11; Josh. 6:19, 24). The Canaanite "chariots of iron" (Josh. 17:16; Jgs. 1:19; 4:3, 13) probably were not made completely of iron. They were war vehicles on which some fittings or trimmings were of iron. This is illustrated by the reference of Thutmose III to Canaanite "chariots of gold," which he mentions in another place as having gold decorations.

From the time of David onward iron objects made by ironsmiths became more plentiful (cf. 1 S. 17:7; 13:19-22), consisting of harrows and axes (1 Ch. 20:3; cf. Dt. 19:5), nails and tools for builders (1 K. 6:7; 1 Ch. 22:3; cf. Job 19:24), bars, chains, sheets to cover city gates (Ps. 105:18; 107:10, 16; 149:8; Isa. 45:2; Acts 12:10), and idols (Dnl. 5:4).

IRPEEL ir'pi-əl [Heb. *yirpᵉ'ēl*–'God heals'] (Josh. 18:27). An unidentified city allotted to the tribe of Benjamin. It may have been located in the hill country NW of Jerusalem. Rafat, N of Gibeon and 10.5 km. (6.5 mi.) NW of Jerusalem, has been suggested as the site.

IRRIGATION. The artificial supplying of water to crops or gardens where rainfall is insufficient or irregular. A pivotal invention in the history of civilization, it is attested in eastern Iraq (Choga Mami) *ca.* 5500 B.C. and inferred at Jericho *ca.* 7000 B.C. The earliest flowering of civilization, in the Tigris-Euphrates basin before 3000 B.C., is defined by a group of developments associated with irrigation: social specialization, laws, a working judiciary, art (from a leisure class). Without it urban life in the great centers of Mesopotamia and Egypt would have been impossible.

In the past irrigation was uncommon in Palestine because (1) unlike Egypt (Dt. 11:10) and Mesopotamia, Palestine had enough rain for agriculture (minimum 25 cm. [10 in.] per year) — "The rain," the Talmud says, "is the husband of the soil" (*Taanith* 6b); (2) much of the country is mountainous, unsuited for large-scale farming and for canal networks; (3) cisterns conserve, and springs (Dt. 8:7) and wells augment the rainfall; (4) there is no large river system from which a continuing water supply might be drawn (the Jordan lies below sea level at every point, posing formidable technical problems).

At the same time, peculiarities of the Palestinian climate make irrigation desirable: rainfall is badly distributed, coming (except for rare showers) entirely during the rainy season of October to April; and the desert borders directly on cropland and grazing land, especially in the Jordan Valley and the Negeb, where archeology provides some evidence for irrigation.

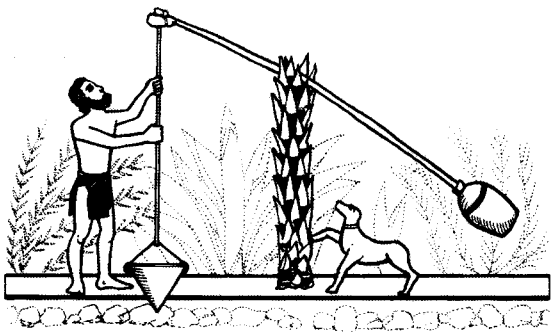
At Jericho monumental walls dating *ca.* 7000 B.C. enclosed a settlement of two to three thousand people. Food for so many could have been grown in the Jordan Valley only by irrigation, with canals carrying water from Jericho's flowing springs.

In the Buqei'ah (the Valley of Achor, Hos. 2:15; Isa. 65:10), about 19 km. (12 mi.) E of Jerusalem near Qumrân, farmers of the 8th or 7th cent. B.C. built terraces to hold the soil and dams to catch and distribute water coming down from the mountains of southern Judea. Irrigation here made possible three settlements (perhaps the Middin, Secacah, and Nibshan of Josh. 15:61f.) composing an eastern zone of defense. At Khirbet Abu Ṭabaq the system included a massive wall 250 m. long across the wadi and a series of seven terraces which are still effective in holding moisture for several weeks after the rains.

In the Bible specific references to irrigation are infrequent (as the practice itself is in Palestine), and do not show a specialized vocabulary. "Irrigate" is a nuance of Heb. *hiškâ,* "to water" (BDB, p. 1052), and is used of a vineyard (Isa. 27:3), a grove (Eccl. 2:6), and an Egyptian vegetable garden (Dt. 11:10). The last refers to opening and closing irrigation runnels with the gardener's foot. Nu. 24:7 may refer to the *šaduf* or sweep, a water-lift still (sometimes) used today. In Prov. 17:14 the releasing (*pāṭar*) of water from an irrigation sluice is a simile for the beginning of a quarrel. The "wheel" (*galgal*) of Eccl. 12:6 is an axle-and-rope device to draw water from a well.

The Heb. *peleg,* "channel, stream" (cognate with Akk. *palgum,* the commonest word for Mesopotamian canals), sometimes implies artificial conduct of water (Ps. 46:4 [MT 5], "canals" bring water from the "river"; Isa. 32:2). In Ps. 1:3 the plural implies irrigation and suggests an ornamental garden where the tree's prosperity is guaranteed by a gardener's oversight (cf. Jer. 17:8). In Prov. 21:1 the Lord's direction of the king is symbolized by the ease with which a gardener may direct the flow of water in irrigation runnels. The piel of the denominative verb *pālag* means "split, divide," thus "cleave a channel" (Job 38:25).

A "pool" (*bᵉrēḵâ*) is mentioned at Gibeon (2 S. 2:13), Hebron (2 S. 4:12), and Jerusalem (Neh. 3:16, Heb. *habbᵉrēḵâ hā'ᵃśûyâ,* "the pool, the one made," hence "artificial"; cf. Eccl. 2:6), serving as a collecting basin for domestic use and probably for gardens and light agriculture. Ornamental gardens required special sources of water (Is. 1:30; 58:11), and the Jordan Valley is once described as "well watered everywhere like the garden of the Lord" (Gen. 13:10). Egyptian canals and Nile branches are frequently mentioned (Heb. *yᵉ'ōrîm*: Ex. 7:19; 8:5; 2 K. 19:24 par. Isa. 37:25; Isa. 7:18; 19:6; Ezk. 29:3f.; and Nah. 3:8, which refers to Thebes as "sitting on the canals, surrounded by water").



Reconstruction of the impression of a cylinder seal from Mesopotamia (ca. 2300 B.C.). It shows a *šaduf* or water lift. The man holds the rope and basket, which he has raised from the water by the lever and counterweight; the upright pole is a date palm.

Modern Egyptians still employ the ancient *šaduf* for irrigation (Lehnert and Landrock)

Watercourses were used metaphorically for spiritual prosperity (Isa. 58:11), the blessings of the king's rule (Isa. 32:2), wisdom herself (Sir. 24:30), and God's favor (Nu. 24:6f.; Isa. 30:25), although it is not always certain that artificial channels are meant. Babylonian dependence on irrigation underlies Jeremiah's apostrophe, "You who dwell on many waters, rich in treasures" (51:13). The reference is to the network of canals, and the Talmud explains that Babylon was rich because she could "harvest without rain" (*Taanith* 10a). A Babylonian allusion is probable in the name of Peleg ("canal"), who is associated with the beginning of irrigation, for "in his days the earth was canalized" (*nipl^{e}gâ*, Gen. 10:25). Several verbs of the OT flood story reflect the technical language of Babylonian irrigation (*kālā'*, "hold back," and *sāḵar*, "stop up," Gen. 8:2; *pāṯaḥ*, "open," Gen. 7:11).

A large irrigation system has social drawbacks as well as benefits. It requires slave labor, is baroque in its complexity, and breeds perpetual conflict among users (the word "rival" derives from Roman law where it denotes a person who shares the water of a *rivus*, "watercourse"). Since the physical life of the state depended on irrigation, an autocratic agro-managerial bureaucracy developed, with religious personnel frequently given official roles. One might argue that in Palestine the rise of the prophetic criticism of king and state was facilitated by the absence there of the totalitarian and despotic control that irrigation cultures seem to require.

S. D. WALTERS

IR-SHEMESH ir-she'məsh [Heb. *ʿîr-šemeš*—'city of the sun'] (Josh. 19:41). A city originally allocated to Dan but later designated as a city of Judah (2 K. 14:11). *See* BETH-SHEMESH.

IRU ī'rōō [Heb. *ʿîrû*] (1 Ch. 4:15). The oldest son of Caleb. The word should probably be read Ir, the final vowel being the conjunction "and" belonging to the following word (cf. the LXX).

ISAAC ī'zək [Heb. *yiṣḥāq, yiśḥāq*—either 'laughing,' 'he laughs,' or 'he laughed'; Gk. *Isaak*]. An OT patriarch, son of Abraham and father of Jacob and Esau.

I. Significance of the Name.—Whether *yiṣḥāq* is to be taken as an imperfect or as a past tense, it is necessary to consider the subject of the verb. The most common solution is to supply *ʾēl*, "God," as the subject. It might then be understood as indicating divine benevolence, or else the fearful laughter of God's scorn for His enemies (Ps. 2:4). A strong objection to this analysis is that the name is never so written in the text preserved; cf. Albright (*FSAC*, p. 245), who translates Heb. *yiṣḥāq-ʾēl* "May 'El smile favorably upon me in my distress." The narratives concerning the promise and the birth of Isaac suggest that some person may be the subject: his father (Gen. 17:17); his mother (Gen. 18:12-15; separation from the specific subject might result in the name taking the simple masculine form *yiṣḥāq* and not the feminine *tiṣḥaq*); or "everyone who hears" (Gen. 21:6). Other occurrences of the root in the Isaac stories cannot be connected with his naming since they followed that event (Gen. 21:9; 26:8). The name may well be understood as indefinite, "one laughs," or, since Abraham named his son, it may refer back to his own incredulous laughter, "he laughed."

II. Family.—The two events of Isaac's life that Genesis treats in detail emphasize his significance as the heir of the covenant first made with his father and as the one whose son was to become the nation Israel.

A. Birth and Position. The birth of Isaac was peculiar in several respects: the age of his parents, the purity of his lineage, the special divine promises. In the birth of Isaac (when his mother was ninety and his father one hundred years old [Gen. 17:17]) may be seen the faithfulness of Yahweh, who had promised an heir twenty-five years before (Gen. 12:1-4). His mother was not only Abraham's wife but also his half sister, so Isaac was a member of the family of Terah on both sides. As son of Sarah, Isaac had legal precedence over Ishmael; but Hagar's son could be excluded from inheriting along with Isaac only by the explicit command to expel him from the family (Gen. 21:11-14; *see* ABRAHAM II).

B. Relation to the Religious Birthright. The removal of Ishmael and of Abraham's other sons (Gen. 25:1-6) avoided a division of Abraham's material wealth at his death and ensured that Isaac alone would inherit the blessings associated with the Promised Land. It also avoided the possibility of disagreement and difficulties arising from subjection to Isaac. Some sense of the importance of the spiritual inheritance is evident in Isaac's relationship to

Interior capital of San Pedro de la Nave, near Zamora, Spain, late 7th cent. A.D. God stops Abraham from sacrificing Isaac and provides a ram as a substitute offering (Rosenthal Art Slides)

his sons. Although he favored the elder, he could not withdraw the blessing he had bestowed upon the younger son, but rather recognized that this was in accordance with the divine plan and confirmed it (Gen. 28:3f.).

III. Biography.–Prior to his marriage, Isaac's life is a part of the story of Abraham; after his marriage it merges into that of his children, emphasizing his role as an intermediary.

As he was the first child of God's promise, Isaac was the first to receive the sign of circumcision at the prescribed age of eight days; and his survival to the end of weaning (perhaps at the age of two) was marked by a great feast. These indications of the important position he held underline the enormous sacrifice later demanded of Abraham. Isaac was probably fully grown at the time and evidently familiar with the act of sacrifice (Gen. 22:7). The divine interposition to save the one who was thus devoted to God constituted him afresh the heir of the promise, confirmed by its renewal on that occasion.

The account of the central event of Isaac's life is prefaced by the genealogies of Abraham's brother in Haran (Gen. 22:20-24) and the death of Sarah, an event that caused Abraham, an old man, to think of his duty to obtain a wife for his son (Gen. 24:3, 67). The wife could be found only among the cousins at Haran if the purity of descent was to be maintained and the family distinguished from surrounding clans. Eliezer was sent there and found Rebekah, whose hand he sought in the approved way (*see* MARRIAGE IV.B.2). The match was accomplished under divine guidance. The first meeting of Isaac and Rebekah is described at the close of Gen. 24 with the tender interest natural to blood descendants.

If the phrase "these are the generations of" is taken as marking the end of a section of Genesis, the history of Isaac finishes at Gen. 25:19 (see P. J. Wiseman, *New Discoveries in Babylonia about Genesis* [1936], pp. 54f.). The next paragraphs describe the birth of the twin sons Esau and Jacob, and continue into their stories. Like Abraham, Isaac learned of the faithfulness of God in this matter, for it was not until twenty years after his marriage that his sons were born.

Life in Palestine followed an unchanging pattern for several generations, so that similarity of the events in the life of one person with events in the life of another need not be explained as duplication of tradition. When there was famine in the land the natural reaction of inhabitants of the south was to look to Egypt for food. Abraham and Joseph's brothers went there for corn, and Isaac intended to do so (Gen. 26:2). At this time of distress the covenant promises were reiterated and confirmed to Isaac. Although he was prevented from going to Egypt, he copied his father in telling the men of Gerar that Rebekah was his sister. Although ancient customs (*see* MARRIAGE II.B.2) may make this move understandable and Heb. *'āḥôṯ* may have had a wider connotation than "sister," Isaac clearly intended to deceive. His status, wealth, and the size of his household served to protect him from attack by the local peoples, especially in disputes over watering rights (Gen. 26).

The favoritism Isaac showed for Esau and Rebekah showed for Jacob culminated in the deceit by which the younger son received the elder's share and led to his flight to the relatives at Haran. Esau also left his father and settled in Transjordan. About twenty years later Jacob returned with his family and soon thereafter Isaac died. Just as his sons Isaac and Ishmael together buried Abraham, so also Esau and Jacob together laid their father in the family tomb at Hebron (Gen. 35:27-29).

IV. Biblical References.–Although Isaac is often mentioned in the formula "Abraham, Isaac, and Jacob [or Israel]" (so 23 times in the OT, 7 times in the NT), he is otherwise far less prominent than either his father or his son. Jacob calls Yahweh the "Fear" of Isaac (Gen. 31:42), perhaps simply referring to the God whom Isaac reverenced; possibly it is a name of deeper, unexplained significance. Isaac is called the "gift" of God to Abraham, just as Esau and Jacob are called God's "gifts" to Isaac (Josh. 24:3f.; cf. Koran 6:84). Amos uses Isaac in poetic parallel with Israel (Am. 7:9, 16, but the LXX reads Jacob in v. 16).

In the NT are noted Isaac's importance as the first to be circumcised on the eighth day (Acts 7:8), his position as first of the elect seed (Rom. 9:7), and his begetting two sons so dissimilar in their relation to the promise as were Esau and Jacob (Rom. 9:13). That Isaac was heir to the promise, a child of old age, and the father of an innumerable progeny are emphasized in He. 11:9-12, where the deeper significance of the sacrifice in Moriah is also discovered (He. 11:17-19; cf. Jas. 2:21); in the same context is noted the faith in God implicit in Isaac's blessing of his sons. Paul uses Isaac and his mother as allegorical representations of Christians, who are justified by faith in the promise of God and who are freeborn heirs of all its spiritual inheritance (Gal. 4:21-31).

V. Views Other Than Historical.–Philo, the chief allegorizer of the scriptural narratives among ancient authors, has little to say of Isaac, whom he calls "the self-instructed nature." More recent critics have taken the view that together with Edom he is a personification of an ethnic group (J. Wellhausen, *Prolegomenon to the History of Israel* [repr. 1959], p. 316) or that Isaac was a deity at Beersheba, with the suggestion also that the name of a god might be applied to the intended victim of sacrifice (cf. E. Meyer, *Israeliten und ihre Nachbarstämme* [1906], p. 255). H. Gunkel (*Schriften des AT* [1910], p. 41) allows that the patriarchs were actual persons, but have survived only as names around which cycles of folk stories have crystallized. The position of M. Noth is somewhat similar; he sees Isaac and Abraham as names that were associated with the religion of the southern tribes in Palestine and around which various traditions collected (*NHI*, pp. 122f.). Increasing knowledge of the history of the early centuries of the 2nd millennium B.C. has resulted in the recognition of factual material in the narratives by many historians. J. Bright concludes that, when account is taken of the oral transmission through which they are assumed to have passed, "although the essential historicity of the traditions cannot be impeached, detailed reconstructions are impossible" (*BHI*, p. 68). Of all the prophets of Israel, Isaiah stands out as incomparably the greatest. Writing with majestic grandeur, this gifted eighth-century B.C. author exalts the grace of God in salvation. For this, if for no other reason, he has well been called "the evangelical prophet."

I. Name.–The Heb. *yᵉšaʿyāhû* was the form current in the 8th cent. B.C., the shorter variant *yᵉšaʿyâ* becoming more popular subsequently, and occurring in the fifth-century-B.C. Elephantine papyri. Greek and Latin equivalents were *Ēsaias* and *Isaiae* respectively. Thus the AV uses "Esay" in 2 Esd. 2:18; Sir. 48:22, and "Esaias" in the NT (Mt. 3:3; 4:14; etc.). The name means "Yahweh is salvation," and is thus similar to names such as Joshua, Elisha, and Jesus.

II. Personal History.–Little is known about the man himself. He is said to have been the son of Amoz (not the contemporary prophet Amos), and he exercised his ministry in and around Jerusalem. Inasmuch as he had ready access to kings (cf. 7:3), it has been thought that he was of royal descent. By tradition he was the cousin of King Uzziah (791/90-740/39 B.C.). Whether this was actually the case or not, it must be remembered that it was the custom in ancient times for prophets to move freely in court circles and to associate with monarchs, sometimes on a friendly basis (cf. 1 K. 19:15f.) and sometimes not (cf. 2 Ch. 18:4-27). In the same way some prophets exhibited a decided interest in temple worship and its implications for national destiny, and thus it would not have been unusual for Isaiah to have had the kind of contact with the Jerusalem temple implied in the vision that resulted in his call, or the personal friendship with a priest that 8:2 seems to indicate.

As appears from 8:3 he was married, and designated his wife "the prophetess," perhaps because she also prophesied. He had two sons, who each bore a symbolic name. One of these, Shear-jashub ("a remnant shall return"), held out the promise that a faithful minority would survive the collapse of national life (7:3), while the other, Maher-shalal-hash-baz ("hasten booty, speed spoil"), symbolized Assyria's mad desire for conquest (8:3). Like Elijah before him, Isaiah normally would have been clad in a garment of sackcloth, and would have worn sandals. This customary prophetic garb was discarded for three years, however, when in obedience to God's command and as a means of reinforcing his statements about the pointlessness of Judah's reliance on Egypt against Assyria, Isaiah walked about Jerusalem wearing only a loincloth (Isa. 20:2-6). No doubt his behavior must have appeared somewhat bizarre in the eyes of his fellow Judeans, and may have led some of them to describe him in terms of the "mad fellow" epithet used in 2 K. 9:11 of the young prophet sent to anoint Jehu. Precisely how long Isaiah functioned as prophet, evangelist, and adviser to the royal court is unknown. His last appearance that can be dated with reasonable certainty was at the time of Sennacherib's campaign in 701 B.C. If there was factual evidence to show that Sennacherib had launched a second attack against Jerusalem, this date could be lowered to *ca.* 688 B.C. There is no a priori reason why Isaiah should not have survived into Manasseh's reign, since the absence of that king's name from the superscription of the prophecy (1:1) need only mean that Isaiah played a modest public role at the end of his life. The date of his death, however, must remain entirely conjectural.

III. Call.–From the superscription it is legitimate to conclude that Isaiah's ministry must have involved at least a portion of the reign of Uzziah, perhaps during the time of his leprosy when Jotham acted as co-regent and subsequently as king (2 K. 15:5), since he received visions at that time. Such an indication that Isaiah was already active as a prophet challenges the popular view that he received his call in connection with the events mentioned in ch. 6. Instead, it would seem to indicate that Isaiah experienced on that occasion a reconsecration or rededication to his prophetic task, which was in effect to warn his contemporaries of impending disaster and divine judgment (6:9-13), and at the same time to promise that redemption would be the lot of a repentant remnant (6:13). (Or ch. 6 may describe a calling to speak to the people, whereas formerly he had spoken to the king.) Isaiah in his vision found himself in the temple, where he received the symbolical assurance of the forgiveness of his sins and a commission to preach to his own people for the Lord. His remarkable readiness to serve in this capacity appeared in his eager response to the commission, which proved to be one whose discharge resulted in the hardening of the will of the nation to which he had been sent. The entire ministry of Isaiah was one of faithful fulfillment of his responsibilities as a prophet of God. His horizons, both political and spiritual, were virtually unbounded, and he was in every sense of the term the universal prophet of Israel.

IV. Literary Genius and Style.–For versatility of expression and brilliance of imagery Isaiah had no superior, not even a rival. His style marks the climax of Hebrew literary art. Epigrams and metaphors, particularly of flood, storm, and sound (1:13; 5:18, 22; 8:8; 10:22; 28:17, 20; 30:28, 30), interrogation and dialogue (6:8; 10:8f.), antithesis and alliteration (1:18; 3:24; 17:10, 12), hyperbole and parable (2:7; 5:1-7; 28:23-29), even paronomasia, or play upon words (5:7; 7:9), characterize Isaiah's book as the great masterpiece of Hebrew literature. He is also famous for his richness of vocabulary and synonyms. For example, Ezekiel uses 1535 words; Jeremiah, 1653; the psalmists 2170; while Isaiah uses 2186. Isaiah was also an orator: Jerome likened him to Demosthenes; and a poet: he frequently elaborates his messages in rhythmic or poetic style (12:1-6; 25:1-5; 26:1-12; 38:10-20; 42:1-4; 49:1-9; 50:4-9; 52:13–53:12; 60–62; 66:5-24); and in several instances slips into elegiac rhythm, e.g., in 37:22-29 there is a fine taunting poem on Sennacherib, and in 14:4-23 another on the king of Babylon.

V. Traditions Concerning His Martyrdom.–Nothing definite or historical is known concerning the prophet's end. Toward the close of the 2nd cent. A.D., however, there was a tradition to the effect that he suffered martyrdom in the heathen reaction that occurred under King Manasseh, because of certain speeches concerning God and the Holy City that his contemporaries alleged were contrary to the law. Indeed the Mishnah explicitly states that Manasseh slew him. Justin Martyr also (A.D. 150), in his

controversial dialogue with the Jew Trypho, reproaches the Jews with this accusation, "whom ye sawed asunder with a wooden saw"; this tradition is further confirmed by a Jewish apocalypse of the 2nd cent. A.D., Ascension of Isaiah, and mentioned by Epiphanius in the 4th century. It is barely possible that there is an allusion to his martyrdom in He. 11:37, which reads, "They were stoned, they were sawn in two," but this is by no means certain. In any case Isaiah probably survived the great catastrophe of the siege of Jerusalem by Sennacherib in 701 B.C., and possibly also the death of Hezekiah in 699 B.C., for in 2 Ch. 32:32 it is stated that Isaiah wrote a biography of King Hezekiah. If so, his prophetic activity extended over a period of more than forty years, ending presumably in the early part of Manasseh's reign (687/6-642/1 B.C.), and certainly during the period of his co-regency (696/5-687/6 B.C.).

VI. Historical Background.—According to the title of his book (1:1f.), Isaiah prophesied during the reigns of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah. He dates his inaugural vision (6:1) in the year of Uzziah's death, which was approximately 740 B.C. This marks, therefore, the beginning of his prophetic ministry. And we know that he was still active as late as the siege of Jerusalem by Sennacherib in 701 B.C. Hence the minimum period of his activity as a prophet was from 740 to 701 B.C. As a young man Isaiah witnessed the rapid development of Judah into a strong commercial and military state; for under Uzziah Judah attained a degree of prosperity and strength not enjoyed since the days of Solomon. Walls, towers, fortifications, a large standing army, a port for commerce on the Red Sea, increased inland trade, tribute from the Ammonites, success in war with the Philistines and the Arabians — all these became Judah's during Uzziah's long and prosperous reign of approximately fifty-two years, this period of time including his co-regency from 791/90 B.C. with his father Amaziah (796-767 B.C.). But along with power and wealth came also avarice, oppression, religious formality, and corruption. The temple revenues indeed were greatly increased, but religion and life were too frequently dissociated; the nation's progress was altogether material. During the reign of Jotham (740/39-732/1 B.C.), who for several years was probably associated with his father as co-regent, a new power began to appear over the eastern horizon. The Assyrians, with whom Ahab had come in contact at the Battle of Qarqar in 853 B.C., and to whom Jehu had paid tribute in 841 B.C., began to manifest anew their characteristic lust of conquest. Tiglath-pileser III (called "Pul" in 2 K. 15:19), who reigned over Assyria from 745 to 727 B.C., turned his attention westward, and *ca.* 740 B.C. reduced Arpad, Calno, Carchemish, Hamath, and Damascus, causing them to pay tribute. His presence in the West led Pekah king of Israel and Rezin king of Damascus to form an alliance in order to resist further encroachment on the part of Assyria. When Ahaz refused to join their confederacy they resolved to dethrone him and set in his stead the son of Tabeel upon the throne of David (2 K. 16:5; Isa. 7:6). The struggle that ensued is commonly known as the Syro-Ephraimitic war (734 B.C.) — one of the great events in Isaiah's period. Ahaz in panic sent to Tiglath-pileser for help (2 K. 16:7), who of course responded with alacrity. The result was that the great Assyrian warrior sacked Gaza, carried all of Galilee and Gilead into captivity (734), and finally took Damascus (732 B.C.). Ahaz was forced to pay dearly for his protection and Judah was brought very low (2 K. 15:29; 16:7-9; 2 Ch. 28:19; Isa. 7:1). The religious as well as the political effect of Ahaz' policy was decidedly baneful. To please Tiglath-pileser, Ahaz went to Damascus to join in the celebration of his victories, and while there saw a Syrian altar, a pattern of which he sent to Jerusalem and had a copy set up in the temple in place of the brazen altar of Solomon. Thus Ahaz, with all the influence of a king, sponsored idolatry in Jerusalem, even causing his sons to pass through the fire (2 K. 16:10-16; 2 Ch. 28:3).

Hezekiah succeeded Ahaz, beginning to rule at the age of twenty-five as co-regent (729 B.C.) and reigning until his death in 687/6 B.C. Isaiah was at least fifteen years his senior. The young king inherited from his father a heavy burden. The splendor of the reigns of Uzziah and Jotham was rapidly fading before the ever menacing and avaricious Assyrians. Hezekiah began his reign with many reforms. "He removed the high places, and broke the pillars, and cut down the Asherah" (2 K. 18:4, 22). He even invited the surviving remnant of Israel to join in celebrating the Passover (2 Ch. 30:1). But Israel's end was drawing near. Hoshea, the vacillating puppet-king of Israel (732/1-723/2 B.C.), encouraged by Egypt, refused to continue to pay Assyria his annual tribute (2 K. 17:4); whereupon Shalmaneser IV, who had succeeded Tiglath-pileser, promptly appeared before the gates of Samaria in 724 B.C., and for nearly three years besieged the city (2 K. 17:5). Finally, the city was captured by Sargon II (or by Shalmaneser, but claimed by Sargon), who succeeded Shalmaneser IV in 722 B.C., 27,292 of Israel's choicest people (according to Sargon's own description) were deported to Assyria, and colonists were brought from Babylon and other adjacent districts and placed in the cities of Samaria (2 K. 17:6, 24). Thus the kingdom of Israel passed into oblivion, and Judah was left exposed to the direct ravages, political and religious, of her Assyro-Babylonian neighbors. In fact Judah itself barely escaped destruction by promising heavy tribute. This was the second great political crisis during Isaiah's ministry.

Other crises were soon to follow. One was the desperate illness of King Hezekiah, who faced certain death *ca.* 714 B.C., though the chronology presents some difficulties. Being childless, he was seriously concerned for the future of the Davidic dynasty. He resorted to prayer, however, and God graciously extended his life fifteen years (2 K. 20; Isa. 38). His illness occurred during the period of Babylon's independence under Merodach-baladan, the ever ambitious, irresistible, and uncompromising enemy of Assyria, who for twelve years (722-710 B.C.) maintained independent supremacy over Babylon. Taking advantage of Hezekiah's wonderful cure, Merodach seized the opportunity, sending an embassy to Jerusalem to congratulate him on his recovery (712 B.C.), and at the same time probably sought to form an alliance with Judah to resist Assyrian supremacy (2 K. 20:12-15; Isa. 39). Nothing, however, came of the alliance, for the following year Sargon's army reappeared in Philistia in order to discipline Ashdod for conspiracy with the king of Egypt (711 B.C.).

The greatest crisis was yet to come. Its story is as follows: Judah and her neighbors groaned more and more under the heavy exactions of Assyria. Accordingly, when Sargon was assassinated and Sennacherib came to the throne in 705 B.C., rebellion broke out on all sides. Merodach-baladan, who had been expelled by Sargon in 709 B.C., again took Babylon and held it for at least six months in 703 B.C. Hezekiah, who was encouraged by Egypt and all Philistia, except Padi of Ekron, the puppet-king of Sargon, refused to continue to pay Assyria tribute (2 K. 18:7). Meanwhile a strong pro-Egypt party had sprung up in Jerusalem. In view of all these circumstances, Sennacherib in 701 B.C. marched westward with a vast army, sweeping everything before him. Tyre was invested though not taken; on the other hand, Joppa, Eltekeh, Ekron, Ashkelon, Ammon, Moab, and Edom all promptly yielded

to his demands. Hezekiah was panic stricken and hastened to bring rich tribute, stripping even the temple and the palace of their treasures to do so (2 K. 18:13-16). But Sennacherib was not satisfied. He overran Judah, capturing, as he tells us in his inscription, forty-six walled towns and smaller villages without number, carrying 200,150 of Judah's population into captivity to Assyria, and demanding as tribute eight hundred talents of silver and thirty talents of gold (a talent equaled about 30 kilograms, or 65 pounds); he took also, he claims, Hezekiah's daughters and palace women, seized his male and female singers, and carried away enormous spoil.

But the end was not yet. Sennacherib himself, with the bulk of the army, halted in Philistia to reduce Lachish; thence he sent a strong detachment under his commander-in-chief, the Rabshakeh, to besiege Jerusalem (2 K. 18:17–19:8; Isa. 36:2–37:8). He describes this blockade in his own inscription: "I shut up Hezekiah in Jerusalem like a bird in a cage." The Rabshakeh, however, failed to capture the city and returned to Sennacherib, who meanwhile had completely conquered Lachish, and was now warring against Libnah. A second expedition against Jerusalem was planned, but hearing that Tirhakah (at that time the commander-in-chief of Egypt's forces and only afterward "king of Ethiopia") was approaching, Sennacherib was forced to content himself with sending messengers with a letter to Hezekiah, demanding immediate surrender of the city (2 K. 19:9ff.; Isa. 37:9ff.). Hezekiah, however, through Isaiah's influence held out; and in due time, though Sennacherib disposed of Tirhakah's army without difficulty, his immense host in some mysterious way — by plague or otherwise — was suddenly smitten, and the great Assyrian conqueror was forced to return to Nineveh, possibly because Merodach-baladan had again appeared in Babylonia. Sennacherib never again returned to Palestine, so far as we know, during the subsequent twenty years of his reign, though he did make an independent expedition into north Arabia (691-689 B.C.). This invasion of Judah by Sennacherib in 701 B.C. was the great political event in Isaiah's ministry. Had it not been for the prophet's statesmanship, Jerusalem might have capitulated. Isaiah had at this time been preaching forty years. How much longer he labored is not known.

VII. Analysis and Contents.—There are six general divisions of the book: (1) chs. 1–12, prophecies concerning Judah and Jerusalem, closing with promises of restoration and a psalm of thanksgiving; (2) chs. 13–23, oracles of judgment and salvation, for the most part concerning those foreign nations whose fortunes affected Judah and Jerusalem; (3) chs. 24–27, the Lord's world-judgment in the redemption of Israel; (4) chs. 28–35, a cycle of prophetic warnings against alliance with Egypt, closing with a prophecy concerning Edom and a promise of Israel's ransom; (5) chs. 36–39, history, prophecy, and song intermingled, serving both as an appendix to chs. 1–35 and as an introduction to chs. 40–66; (6) chs. 40–66, prophecies of comfort and salvation, and also of the future glory awaiting Israel.

By examining in detail these several divisions we can trace better the prophet's thought. Thus, chs. 1–12 reveal Judah's social sins (chs. 1–6) and its political entanglements (chs. 7–12); ch. 1 is an introduction, in which the prophet strikes the chief notes of his entire book: thoughtlessness (vv. 2-9), formalism in worship (vv. 10-17), pardon (vv. 18-23), and judgment (vv. 24-31). Chapters 2–4 contain three distinct pictures of Zion: (a) its exaltation (2:2-4), (b) its present idolatry (2:5–4:1), and (c) its eventual purification (4:2-6). Chapter 5 contains an arraignment of Judah and Jerusalem, composed of three parts: (a) a parable of the Lord's vineyard (vv. 1-7); (b) a series of six woes pronounced against insatiable greed (vv. 8-10), dissipation (vv. 11-17), daring defiance against the Lord (vv. 18f.), confusion of moral distinctions (v. 20), political self-conceit (v. 21), and misdirected heroism (vv. 22f.); and (c) an announcement of imminent judgment. The Assyrian is on the way and there will be no escape (vv. 24-30). Chapter 6 recounts the prophet's inaugural vision and commission. It is really an apologetic, standing as it does after the prophet's denunciations of his contemporaries. When they tacitly object to his message of threatening and disaster, he is able to reply that, having pronounced "woe" upon himself in the year that King Uzziah died, he had the authority to pronounce woe upon them (6:5). Plainly Isaiah tells them that Judah's sins are hopeless. They are becoming spiritually insensible. They have eyes but they cannot see. Only judgment can avail: "the righteous judgment of a forgotten God" awaits them. A "holy seed," however, still existed in Israel's stock (6:13).

In chs. 7–12, Isaiah appears in the role of a practical statesman. He warns Ahaz against political entanglements with Assyria. The section 7:1–9:7 (MT 6) is a prophecy of Immanuel, history and prediction being intermingled. It describes the Syro-Ephraimitic uprising *ca.* 734 B.C. when Pekah of Israel and Rezin of Damascus, in attempting to defend themselves against the Assyrians, demanded that Ahaz of Jerusalem should become their ally. But Ahaz preferred the friendship of Assyria, and refused to enter into alliance with them. In order to defend himself, he applied to Assyria for assistance, sending ambassadors with many precious treasures, both royal and sacred, to bribe Tiglath-pileser. It was at this juncture that Isaiah, at the Lord's bidding, expostulated with Ahaz concerning the fatal step he was about to take, and as a practical statesman warned Ahaz, "the king of No-Faith," that the only path of safety lay in loyalty to the Lord and avoidance of foreign alliances; that "God is with us" for salvation; and that no "conspiracy" could possibly be successful unless God too was against them. When, however, the prophet's message of promise and salvation found no welcome, he committed it to his disciples, bound up and sealed for future use, assuring his hearers that to them a child was born and a son was given, in whose day the empire of David would be established upon a basis of justice and righteousness. The messianic scion was the ground of the prophet's hope. This hope, though unprecedented, he thus early in his ministry committed, written and sealed, to his inner circle of "disciples." *See* IMMANUEL.

The section 9:8 (MT 7)–10:4 contains an announcement to Israel of accumulated wrath and impending ruin, with a refrain (9:12, 17, 21 [MT 11, 16, 20]; 10:4). Here, in an artistic poem composed of four strophes, the prophet describes the great calamities that the Lord has sent down upon Israel but that have gone unheeded: foreign invasion (9:8-12), defeat in battle (9:13-17), anarchy (9:18-21), and impending captivity (10:1-4). Yet the Lord's judgments have been ignored: "For all this his anger is not turned away, and his hand is stretched out still." Divine discipline has failed; only judgment remains.

In 10:5-34, Assyria is declared to be an instrument of the Lord, the rod of the Lord's anger. Chapters 11–12 predict Israel's return from exile, including a vision of the Messiah's reign of ideal peace. For Isaiah's vision of the nation's future reached far beyond mere exile. To him the downfall of Assyria was the signal for the commencement of a new era in Israel's history. Assyria has no future, its downfall is fatal; Judah has a future, its calamities are only disciplinary. An ideal Prince will be raised up in whose advent all nature will rejoice, even dumb animals

(11:1-10). A second great exodus will take place, for the Lord will set His hand again "a second time" to recover the remnant of His people "from the four corners of the earth" (11:11f.). In that day, "Ephraim shall not be jealous of Judah, and Judah shall not harass Ephraim" (11:13). On the contrary, the reunited nation, redeemed and occupying their rightful territory (11:14-16), shall sing a hymn of thanksgiving, proclaiming the salvation of the Lord to all the earth (ch. 12).

Chapters 13–23 contain oracles of judgment and salvation, for the most part concerning those foreign nations whose fortunes affected Judah and Jerusalem. They are grouped together by the editor, as similar foreign oracles are in Jer. 46–51 and Ezk. 25–32. Isaiah's horizon was worldwide. First among the foreign prophecies stands the oracle concerning Babylon (13:1–14:23), in which he predicts the utter destruction of the city (13:2-22), and sings a dirge or taunt-song over its fallen king (14:4-23). The king alluded to is almost beyond doubt an Assyrian (not a Babylonian) monarch of the 8th cent.; the brief prophecy immediately following in 14:24-27 concerning Assyria tacitly confirms this interpretation. Another brief oracle concerning Babylon (21:1-10) describes the city's fall as imminent. Both oracles stand or fall together as genuine prophecies of Isaiah. Both seem to have been written in Jerusalem (13:2; 21:9, 10). It cannot be said that either is unrelated in thought and language to Isaiah's age (14:13; 21:2); each foretells the doom to fall on Babylon (13:19; 21:9) at the hands of the Medes (13:17; 21:2); and each describes the Israelites as already in exile — but not necessarily *all* Israel.

The section 14:24-27 tells of the certain destruction of the Assyrian.

The passage 14:28-32 is an oracle concerning Philistia.

Chapters 15–16 are ancient oracles against Moab, whose dirgelike meter resembles that of chs. 13–14. These oracles consist of two separate prophecies belonging to two different periods in Isaiah's ministry (16:13f.). The three points of particular interest in the oracles are: (1) the prophet's tender sympathy for Moab in her affliction (15:5; 16:11). As Delitzsch says, "There is no prophecy in the book of Isaiah in which the heart of the prophet is so painfully affected by what his mind sees, and his mouth is obliged to prophesy." (2) Moab's pathetic appeal for shelter from her foes; particularly the ground on which she urges it, namely, the messianic hope that the Davidic dynasty shall always stand and be able to repulse its foes (16:5). The prophecy is an echo of 9:5-7. (3) The promise that a remnant of Moab, though small, shall be saved (16:14). The prophet predicts that Moab, wearied of prayer to CHEMOSH in the high places, will seek the living God (v. 12).

The passage 17:1-11 is an oracle concerning Damascus and Israel, in which Isaiah predicts the fate of the two allies — Syria and Ephraim — in the Syro-Ephraimitic war of 734 B.C., with a promise that only a scanty remnant will survive (17:6). In 17:12-14, the prophet boldly announces the complete annihilation of Judah's unnamed foes — the Assyrians.

Chapter 18 describes ETHIOPIA as in great excitement, sending ambassadors here and there — possibly all the way to Jerusalem — ostensibly seeking aid in making preparations for war. Assyria had already taken Damascus (732 B.C.) and Samaria (722 B.C.), and consequently Egypt and Ethiopia were in fear of invasion. Isaiah bids the ambassadors to return home and quietly watch the Lord thwart Assyria's confident attempt to subjugate Judah; and he adds that when the Ethiopians have seen God's hand in the coming deliverance of Judah and Jerusalem (701 B.C.), they will bring a present to the Lord to His abode in Mt. Zion.

Chapter 19, which is an oracle concerning Egypt, contains both a threat (vv. 1-17) and a promise (vv. 18-25), and is one of Isaiah's most remarkable foreign messages. Egypt is smitten and thereby led to abandon its idols for the worship of the Lord (vv. 19-22). Still more remarkable, it is prophesied that in that day Egypt and Assyria will join with Judah in a triple alliance of common worship to the Lord and of blessing to others (vv. 23-25). Isaiah's missionary outlook here is remarkable.

Chapter 20 describes Sargon's march against Egypt and Ethiopia, containing a brief symbolic prediction of Assyria's victory over Egypt and Ethiopia. By donning a captive's garb for three years, Isaiah attempts to teach the citizens of Jerusalem that the siege of Ashdod was but a means to an end in Sargon's plan of campaign, and that it was sheer folly for the Egyptian party in Jerusalem, who were ever urging reliance upon Egypt, to look in that direction for help. In 21:11f. is a brief oracle concerning Seir or Edom, "the only gentle utterance in the OT upon Israel's hereditary foe." Edom is in great anxiety. The prophet's answer is disappointing, though its tone is sympathetic. In 21:13-17 is a brief oracle concerning Arabia. It contains a sympathetic appeal to the Temanites to give bread and water to the caravans of Dedan, who have been driven by war from their usual route of travel.

Chapter 22 concerns the foreign temper within the theocracy. It is composed of two parts: (1) an oracle "of the valley of vision," i.e., Jerusalem (vv. 1-14); and (2) a tirade against Shebna, the steward of the palace. Isaiah pauses, as it were, in his series of warnings to foreign nations to rebuke the foreign temper of the frivolous inhabitants of Jerusalem, and in particular Shebna, a high official in the government. The reckless and God-ignoring citizens of the capital are pictured as indulging themselves in hilarious eating and drinking, when the enemy is at that very moment standing before the gates of the city. Shebna, on the other hand, seems to have been an ostentatious foreigner, perhaps a Syrian by birth, quite possibly one of the Egyptian party, whose policy was antagonistic to that of Isaiah and the king. Isaiah's prediction of Shebna's fall was evidently fulfilled (36:3; 37:2).

Chapter 23 concerns Tyre. In this oracle Isaiah predicts that Tyre shall be laid waste (v. 1), its commercial glory humbled (v. 9), its colonies made independent (v. 10), and Tyre itself forgotten for "seventy years" (v. 15); but "after the end of seventy years," its trade will revive, its business prosperity will return, and it will dedicate its gains in merchandise as holy to the Lord (v. 18).

The third great section of the book of Isaiah embraces chs. 24–27, which tell of the Lord's world-judgment, issuing in the redemption of Israel. These prophecies are closely related to chs. 13–23. They express the same tender emotion as that already observed in 15:5; 16:11, and sum up as in one grand finale the prophet's oracles to Israel's neighbors. For religious importance they stand second to none in the book of Isaiah, teaching the necessity of divine discipline and the glorious redemption awaiting the faithful in Israel. They are a spiritual commentary on the great Assyrian crisis of the 8th cent.; they are messages of salvation intended not for declamation but for meditation, and were probably addressed more particularly to the prophet's inner circle of "disciples" (8:16). These chapters partake of the nature of apocalypse. Strictly speaking, however, they are prophecy, not apocalypse. No one ascends into heaven or talks with an angel, as in Dnl. 7 and Rev. 4. They are apocalypse only in the sense that certain things are predicted as sure to come to pass. Isaiah was fond of this kind of prophecy. He frequently lifts his reader out of the sphere of mere history to paint pictures of the distant future (2:2-4; 4:2-6; 11:6-16; 30:27-33).

In ch. 24 the prophet announces a general judgment of the earth (i.e., the land of Judah), and of "the city" (collective for Judah's towns), after which will dawn a better day (vv. 1-15). The prophet fancies he hears songs of deliverance, but alas! they are premature; more judgment must follow. In ch. 25 the prophet transports himself to the period after the Assyrian catastrophe and, identifying himself with the redeemed, puts into their mouths songs of praise and thanksgiving for their deliverance. Verses 6-8 describe the Lord's bountiful banquet on Mt. Zion to all nations, who, in keeping with 2:2-4, come up to Jerusalem to celebrate "a feast of fat things," rich and marrowy. While the people are present at the banquet, the Lord graciously removes their spiritual blindness so that they behold Him as the true dispenser of life and grace. He also abolishes war (cf. 2:4), and its sad accompaniment, "tears," so that "the earth" (i.e., the land of Judah) is no longer the battlefield of the nations, but the blessed abode of the redeemed, living in peace and happiness. The prophet's aim is not political but religious.

In 26:1-19 Judah sings a song over Jerusalem, the impregnable city of God. The prophet, taking again his stand with the redeemed remnant of the nation, vividly portrays their thankful trust in the Lord, who has been to them a veritable "everlasting rock" (26:4). With hope he joyfully exclaims, Let the Lord's dead ones live! Let Israel's dead bodies arise! The Lord will bring life from the dead! (v. 19). This is the first clear statement of the resurrection in the OT. But it is national and restricted to Israel (cf. v. 14), and is merely Isaiah's method of expressing a hope of the return of Israel's faithful ones from captivity (cf. Hos. 6:2; Ezk. 37:1-14; Dnl. 12:2).

In 26:20–27:13 the prophet shows that Israel's chastisements are temporary. He begins by exhorting his own people, his disciples, to continue a little longer in the solitude of prayer, till God's wrath has shattered the world-powers (26:20–27:1). He next predicts that the true vineyard of the Lord will henceforth be safely guarded against the briers and thorns of foreign invasion (27:2-6). And then, after showing that the Lord's chastisements of Israel were light compared with His judgments upon other nations (27:7-11), he promises that if Israel will only repent, the Lord will spare no pains to gather "one by one" the remnant of His people from Assyria and Egypt (cf. 11:11); and together they shall once more worship the Lord in the holy mountain at Jerusalem (27:12f.).

The prophet's fundamental standpoint in chs. 24–27 is the same as that of 2:2-4 and chs. 13–23. Yet the prophet not infrequently throws himself forward into the remote future, oscillating between his own times and those of Israel's restoration. It is especially noteworthy how he sustains himself in a long and continued transportation of himself to the period of Israel's redemption. He even studies to identify himself with the new Israel that will emerge out of the present chaos of political events. His visions of Israel's redemption carry him in ecstasy far away into the remote future, to a time when the nation's sufferings are all over; so that when he writes down what he saw in vision he describes it as a discipline that is past. For example, in 25:1-8 the prophet, transported to the end of time, celebrates in song what he saw, and describes how the fall of the world-empire is followed by the conversion of the heathen. In 26:8f. he looks back into the past from the standpoint of the redeemed in the last days, and tells how Israel longingly waited for the manifestation of God's righteousness which has now taken place, while in 27:7-9 he places himself in the midst of the nation's sufferings, in full view of its glorious future, and portrays how the Lord's dealings with Israel have not been the punishment of wrath, but the discipline of love. This kind of apocalypse, or prophecy, was indeed to be expected from the very beginning of the group of prophecies, which are introduced with the word "Behold!" Such a manner of introduction is peculiar to Isaiah, and of itself leads us to expect a message that is unique.

The practical religious value of these prophecies to Isaiah's own age would be very great. In a period of war and repeated foreign invasion, when but few people were left in the land (24:6, 13; 26:18), and Judah's cities were laid waste and desolate (24:10,12; 25:2; 26:5; 27:10), and music and gladness were wanting (24:8), when the nation still clung to its idols (27:9), and the Assyrians' work of destruction was still incomplete, other calamities were sure to follow (24:16). It would certainly be comforting to know that forgiveness was still possible (27:9), that the Lord was still the keeper of His vineyard (27:3f.), that His judgments were to last but for a little moment (26:20), that though His people should be scattered, He would soon carefully gather them "one by one" (27:12f.), that in company with other nations they would feast together on Mt. Zion as the Lord's guests (25:6-10), and that Jerusalem should henceforth become the center of life and religion to all nations (24:23; 25:6; 27:13). Such faith in the Lord, such exhortations and such songs and confessions of the redeemed, seen in vision, would be a source of rich spiritual comfort to the few suffering saints in Judah and Jerusalem, and a guiding star to the faithful disciples of the prophet's most inner circle.

Chapters 28–35 contain a cycle of prophetic warnings against alliance with Egypt, closing with a prophecy concerning Edom and a promise of Israel's ransom. As in 5:8-23, the prophet indulges in a series of six woes.

(1) Woe to drunken, scoffing politicians (ch. 28). This is one of the great chapters of Isaiah's book. In the opening section (vv. 1-6) the prophet points in warning to the proud drunkards of Ephraim whose crown (Samaria) is rapidly fading. He next turns to the scoffing politicians of Jerusalem, rebuking especially the bibulous priests who stumble in judgment, and the staggering prophets who err in vision (vv. 7-22). He closes with a most instructive parable from agriculture, teaching that God's judgments are not arbitrary; that as the husbandman does not plow and harrow his fields the whole year round, so God will not punish His people forever; and as the husbandman does not thresh all kinds of grain with equal severity, no more will God discipline His people beyond their deserts (vv. 23-29).

(2) Woe to formalists in religion (29:1-14). Isaiah's second woe is pronounced upon Ariel, the altar-hearth of God, i.e., Jerusalem, the sacrificial center of Israel's worship of the Lord in Zion. But now Zion's worship has become wholly conventional, formal, and therefore insincere; it is learned by rote (v. 13; cf. 1:10-15; Mic. 6:6-8). Therefore, says Isaiah, the Lord is forced to do an extraordinary work among them, in order to bring them back to a true knowledge of Himself (v. 14).

(3) Woe to those who hide their plans from God (29:15-24). What their plans are, which they are devising in secret, the prophet does not yet disclose; but he doubtless alludes to their intrigues with the Egyptians and their purpose to break faith with the Assyrians, to whom they were bound by treaty to pay annual tribute. Isaiah bravely remonstrates with them for supposing that any policy will succeed that excludes the counsel and wisdom of the Holy One. They are but clay; He is the potter. At this point, though somewhat abruptly, Isaiah turns his face toward the messianic future. In a very little while, he says, Lebanon, which is now overrun by Assyria's army, shall become a fruitful field, and the blind and deaf and spiritually weak shall rejoice in the Holy One of Israel.

(4) Woe to the pro-Egyptian party (ch. 30). Isaiah's

fourth woe is directed against the rebellious politicians who stubbornly, and now openly, advocate making a league with Egypt. They have at length succeeded apparently in winning over the king to their side, and an embassy is already on its way to Egypt, bearing across the desert of the Exodus rich treasures with which to purchase the friendship of their former oppressors. Isaiah now condemns what he can no longer prevent. Egypt is a Rahab "who sits still," i.e., a mythological sea monster, menacing in appearance but slow to act. When the crisis comes, Egypt will do nothing, causing Israel only shame and confusion.

(5) Woe to those who trust in horses and chariots (chs. 31–32). Isaiah's fifth woe is a still more vehement denunciation of those who trust in Egypt's horses and chariots, and disregard the Holy One of Israel. Those who do so forget that the Egyptians are but men and their horses flesh, and that mere flesh cannot avail in a conflict with spirit. Eventually the Lord means to deliver Jerusalem, if the children of Israel will but turn from their idolatries to Him; and in that day Assyria will be vanquished. A new era will dawn upon Judah. Society will be regenerated. The renovation will begin at the top. Conscience also will be sharpened, and moral distinctions will no longer be confused (32:1-8). As Delitzsch puts it, "The aristocracy of birth and wealth will be replaced by an aristocracy of character." The careless and indifferent women, too, in that day will no longer menace the social welfare of the state (32:9-14); with the outpouring of the Lord's spirit an ideal commonwealth will emerge, in which social righteousness, peace, plenty, and security will abound (32:15-20).

(6) Woe to the Assyrian destroyer (ch. 33). Isaiah's last woe is directed against the treacherous spoiler himself, who has already laid waste the cities of Judah, and is now beginning to lay siege to Jerusalem (701 B.C.). The prophet prays, and while he prays, behold! the mighty hosts of the Assyrians are routed and the long-besieged but now triumphant inhabitants of Jerusalem rush out like locusts upon the spoil that the vanishing adversary has been forced to leave behind. The destroyer's plan to reduce Jerusalem has come to naught. The whole earth beholds the spectacle of Assyria's defeat and is filled with awe and amazement at the mighty work of the Lord. Only the righteous may henceforth dwell in Jerusalem. Their eyes shall behold the Messiah-king in his beauty, reigning no longer like Hezekiah over a limited and restricted territory, but over a land unbounded, whose inhabitants enjoy the Lord's peace and protection, and are free from all sin, and therefore from all sickness (vv. 17-24). With this beautiful picture of the messianic future, the prophet's woes find an appropriate conclusion. Isaiah never pronounced a woe without adding a corresponding promise.

In chs. 34–35, the prophet utters a fierce cry for justice against "all the nations," but against Edom in particular. His tone is that of judgment. Edom is guilty of high crimes against Zion (34:8f.); therefore it is doomed to destruction. On the other hand, the scattered ones of Israel shall return from exile and "obtain joy and gladness, and sorrow and sighing shall flee away" (ch. 35).

Chapters 36–39 have history, prophecy, and song intermingled. These chapters serve both as an appendix to chs. 1–35 and as an introduction to chs. 40–66. In them three important historical events are narrated, in which Isaiah was a prominent factor: (1) the double attempt of Sennacherib to obtain possession of Jerusalem (chs. 36–37); (2) Hezekiah's sickness and recovery (ch. 38); (3) the coming of the embassy from Merodach-baladan (ch. 39). With certain important omissions and insertions these chapters are duplicated almost verbatim in 2 K. 18:13–20:19. They are introduced with the chronological note, "In the fourteenth year of King Hezekiah." Various attempts have been made to solve the mystery of this date. If the author is alluding to the siege of 701 B.C., difficulty arises, because that event occurred not in Hezekiah's "fourteenth" but in his twenty-sixth year, according to the biblical chronology of his life; or, if with some we date Hezekiah's accession to the throne of Judah as 729 B.C., then the siege of 701 B.C. occurred, as is evident, in Hezekiah's twenty-eighth year. It is barely possible of course that "the fourteenth year of King Hezekiah" was the fourteenth of the "fifteen years" which were *added* to his life, but more probably it alludes to the fourteenth year of his reign. On the whole it is better to take the phrase as a general chronological caption for the entire section, with special reference to ch. 38, the story of Hezekiah's sickness, which actually fell in his fourteenth year (714 B.C.), and which, coupled with Sargon's expected presence at Ashdod, was *the* great personal crisis of the king's life. *See also* CHRONOLOGY OF THE OT V.B.

Sennacherib made two attempts in 701 B.C. to reduce Jerusalem: one from Lachish, with an army headed by the Rabshakeh (36:2–37:8), and another from Libnah with a threat conveyed by messengers (37:9-13). The brief section contained in 2 K. 18:14-16 is omitted from between vv. 1 and 2 of Isa. 36, because it was not the prophet's aim at this time to recount the nation's humiliation. Isaiah's last "word" concerning Assyria (37:21-35) is one of the prophet's grandest predictions. It is composed of three parts: (1) a taunt-song, in elegiac rhythm, on the inevitable humiliation of Sennacherib (vv. 22-29); (2) a short poem in different rhythm, directed to Hezekiah, in order to encourage his faith (vv. 30-32); (3) a definite prediction, in less elevated style, of the sure deliverance of Jerusalem (vv. 33-35). Isaiah's prediction was literally fulfilled.

The section 38:9-20 contains Hezekiah's Song of Thanksgiving, in which he celebrates his recovery from some mortal sickness. It is a beautiful, plaintive "writing," omitted altogether by the author of the book of Kings (cf. 2 K. 20). Hezekiah was sick in 714 B.C. Two years later Merodach-baladan, the veteran archenemy of Assyria, having heard of his wonderful recovery, sent letters and a present to congratulate him. Doubtless, also, political motives prompted the recalcitrant Babylonian. But be that as it may, Hezekiah was greatly flattered by the visit of Merodach-baladan's envoys, and, in a moment of weakness, showed them all his royal treasures. This was an inexcusable blunder, as the sight of his many precious possessions would naturally excite Babylonian cupidity to possess Jerusalem. Isaiah not only solemnly condemned the king's conduct, but he announced with more than ordinary insight that the days were coming when all the accumulated resources of Jerusalem would be carried away to Babylon (39:3-6; cf. Mic. 4:10). This final prediction of judgment is the most marvelous of all Isaiah's minatory utterances, because he distinctly asserts that not the Assyrians, who were then at the height of their power, but the Babylonians would be the instruments of the divine vengeance in consummating the destruction of Jerusalem. There seems to be no real reason to doubt the genuineness of this prediction. In it, indeed, we have a prophetic basis for chs. 40–66, which follow.

Coming now to chs. 40–66, we have prophecies of comfort, salvation, and of the future glory awaiting Israel. These chapters naturally fall into three sections: (1) chs. 40–48, announcing deliverance from captivity through Cyrus; (2) chs. 49–57, describing the sufferings of the "Servant" of the Lord, this section ending like the former with the refrain, "There is no peace, says my God, for the wicked" (57:21; cf. 48:22); (3) chs. 58–66, announcing the

final abolition of all national distinctions and the future glory of the people of God. Chapter 60 is the characteristic chapter of this section, as ch. 53 is of the second, and ch. 40 of the first.

In greater detail, the first section (chs. 40–48) demonstrates the deity of the Lord through His unique power to predict. The basis of the comfort that the prophet announces is Israel's incomparable God (ch. 40). Israel's all-powerful Lord is incomparable. In the prologue (40:1-11) he hears the four voices: (1) of grace (vv. 1f.); (2) of prophecy (vv. 3-5); (3) of faith (vv. 6-8), and (4) of evangelism (vv. 9-11). Then, after exalting the unique character of Israel's all-but-forgotten God (vv. 12-26), he exhorts the people not to suppose that the Lord is ignorant of, or indifferent to, Israel's misery. Israel must wait for salvation. They are clamoring for deliverance prematurely. Only wait, he repeats; for with such a God, Israel has no reason to despair (vv. 27-31).

In ch. 41 he declares that the supreme proof of the Lord's sole deity is His power to predict. He inquires, "Who stirred up one from the east?" Though the hero is left unnamed, Cyrus is doubtless in the prophet's mind (cf. 44:28; 45:1). He is not, however, already appearing upon the horizon of history as some fancy, but rather *predicted* as sure to come. The verb tenses that express completed action are perfects of certainty, and are used in precisely the same manner as those in 3:8; 5:13; 21:9. The answer to the inquiry is, "I, the Lord, the first, and with the last; I am He" (41:4). Israel is the Lord's servant. The dialogue continues; but it is no longer between the Lord and the nations, as in vv. 1-7, but between the Lord and the idols (vv. 21-29). Addressing the dumb idols, the Lord is represented as saying, Predict something, if you are real deities. As for myself, I am going to raise up a hero from the north who will subdue all who oppose him. And I announce my purpose now in advance "from the beginning," "beforetime," before there is the slightest ground for thinking that such a hero exists or ever will exist (v. 26), in order that the future may verify my prediction, and prove my sole deity. I, the Lord, alone know the future. In vv. 25-29, the prophet even projects himself into the future and speaks from the standpoint of the fulfillment of his prediction. This, as we saw above, was a characteristic of Isaiah in chs. 24-27.

In 42:1–43:13 the prophet announces also a spiritual agent of redemption, namely, the Lord's "Servant." Not only a temporal agent (Cyrus) shall be raised up to mediate Israel's redemption, which is the first step in the process of the universal salvation contemplated, but a spiritual factor. The Lord's "Servant" shall be employed in bringing the good tidings of salvation to the exiles and to the Gentiles also. In 42:1-9 the prophet describes this ideal figure and the work he will execute. The glorious future evokes a brief hymn of thanksgiving for the redemption that the prophet beholds in prospect (42:10-17). Israel has long been blind and deaf to the Lord's instructions (42:18f.), but now the Lord is determined to redeem them even at the cost of the most opulent nations of the world, that they may publish His law to all peoples (42:18–43:13).

In 43:14–44:23 forgiveness is made the pledge of deliverance. The Lord's determination to redeem Israel is all of grace. Salvation is a gift. The Lord has blotted out their transgressions for His own sake (43:25). "This passage," Dillmann observes, "marks the highest point of grace in the OT." Gods of wood and stone are nonentities. Those who manufacture idols are blind and dull of heart, and are "feeding on ashes." The section 44:9-20 is a most remorseless exposure of the folly of idolatry.

In 44:24–45:25 the prophet at length names the hero of Israel's salvation and describes his mission. He is Cyrus. He shall build Jerusalem and lay the foundations of the temple (44:28); he shall also subdue nations and let the exiles go free (45:1, 13). He speaks of Cyrus in the most extraordinary, almost extravagant terms. He is the Lord's "shepherd" (44:28); he is also the Lord's "anointed," i.e., Messiah (45:1), "the man of my counsel" (46:11), whom the Lord has called by name, and surnamed without his ever knowing Him (45:3f.); the one "whom the Lord loves" (48:14), whose right hand the Lord grasps (45:1), and who will perform all the Lord's purposes (44:28); though but "a bird of prey from the east" (46:11). The vividness with which the prophet speaks of Cyrus leads some to suppose that the latter is already upon the horizon. This, however, is a mistake. Scarcely would a contemporary have spoken in such terms of the real Cyrus of 538 B.C. The prophet regards him (i.e., the Cyrus of his own prediction, not the Cyrus of history) as the fulfillment of predictions spoken long before. That is to say, in one and the same context, Cyrus is both predicted and treated as a proof that prediction is being fulfilled (44:24-28; 45:21). Such a phenomenon in prophecy can best be explained by supposing that the prophet projected himself into the future from an earlier age. Most extraordinary of all, in 45:14-17 the prophet soars in imagination until he sees, as a result of Cyrus' victories, the conquered nations renouncing their idols, and attracted to the Lord as the Savior of all mankind (45:22). On any theory of origin, the predictive element in these prophecies is written large.

Chapters 46–47 describe further the distinctive work of Cyrus, though Cyrus himself is but once referred to. Particular emphasis is laid on the complete collapse of the Babylonian religion, the prophet being apparently more concerned with the humiliation of Babylon's idols than with the fall of the city itself. Of course the destruction of the city would imply the defeat of its gods, as also the emancipation of Israel. But here again all is in the future; in fact, the Lord's incomparable superiority and unique deity are proven by His power to predict "the end from the beginning" and bring His prediction to pass (46:10f.).

Chapter 47 is a dirge over the downfall of the imperial city, strongly resembling the taunt-song over the king of Babylon in 14:4-21.

Chapter 48 is a hortatory summary and recapitulation of the argument contained in chs. 40–47, the prophet again emphasizing the following points: (1) the Lord's unique power to predict; (2) that salvation is of grace; (3) that Cyrus' advent will be the crowning proof of the Lord's abiding presence among His people; (4) that God's chastisements were only disciplinary; and (5) that even now there is hope, if they will but accept the Lord's proffered salvation. Alas! that there is no peace or salvation for the godless (48:20-22). Thus ends the first division of Isaiah's remarkable vision of Israel's deliverance from captivity through Cyrus.

The second section (chs. 49–57) deals with the spiritual agent of salvation, the Lord's Suffering Servant. With ch. 49 the prophet leaves off attempting further to prove the sole deity of the Lord by means of prediction, and drops entirely his description of Cyrus' victories and the overthrow of Babylon, in order to set forth in greater detail the character and mission of the suffering Servant of the Lord. In chs. 40–48 he had alluded several times to this unique and somewhat enigmatical personage, speaking of him both collectively and as an individual (41:8-10; 42:1-9, 18-22; 43:10; 44:1-5, 21-28; 45:4; 48:20-22); but now he defines with greater precision both his prophetic and priestly functions, his equipment for his task, his sufferings and

humiliation, and also his final exaltation. Altogether in these prophecies he mentions the Servant some twenty times. But there are four distinctive servant passages in which the prophet seems to rise above the collective masses of all Israel to at least a personification of the pious within Israel or, better, to a unique person embodying within himself all that is best in the Israel within Israel. They are the following: (1) 42:1-9, a poem descriptive of the Servant's gentle manner and worldwide mission; (2) 49:1-13, describing the Servant's mission and spiritual success; (3) 50:4-11, the Servant's soliloquy concerning His perfection through suffering; and (4) 52:13–53:12, the Servant's vicarious suffering and ultimate exaltation. In this last of the four servant passages we reach the climax of the prophet's inspired symphony, the acme of Israel's messianic hope. The profoundest thoughts in the OT revelation are to be found in this section. It is a vindication of the Servant, so clear and so true, and wrought out with such pathos and potency, that it holds first place among messianic predictions. Polycarp called it "the golden passional of the OT." According to the NT (cf. Acts 8:32f.) it has been realized in Jesus Christ.

Chapters 58–66 describe the future glory of the people of God. Having described in chs. 40–48 the temporal agent of Israel's salvation, Cyrus, and in chs. 49–57 the spiritual agent of their salvation, the Servant of the Lord, the prophet proceeds in this last section to define the conditions on which salvation may be enjoyed. He begins, as before, with a double imperative, "Cry aloud, spare not" (cf. 40:1; 49:1).

In ch. 58 he discusses true fasting and faithful sabbath observance.

In ch. 59 he beseeches Israel to forsake their sins. It is their sins, he urges, that have hidden the Lord's face and retarded the nation's salvation. In vv. 9-12 the prophet identifies himself with the people and leads them in their devotions. The Lord is grieved over Israel's forlorn condition, and, seeing their helplessness, He arms himself like a warrior to interfere judicially (vv. 15-19). Israel shall be redeemed. With them as the nucleus of a new nation, the Lord will enter anew into covenant relation, and put His spirit upon them, which will abide with them henceforth and forever (vv. 20f.).

Chapters 60–61 describe the future blessedness of Zion. The long-looked-for "light" (cf. 59:9) begins to dawn: "Arise, shine; for your light has come, and the glory of the Lord has risen upon you" (60:1). The prophet pauses at this point to paint a picture of the redeemed community. As in 2:3f. the Gentiles are seen flocking to Zion, which becomes the mistress of the nations. Foreigners build its walls, and its gates are kept open continually without fear of siege. The Gentiles acknowledge that Zion is the spiritual center of the world. Even Israel's oppressors regard it as "the city of the Lord," as "majestic for ever," in which the Lord sits as its everlasting light (60:10-22).

In ch. 61, which Drummond has called "the program of Christianity," the Servant of the Lord is again introduced, though anonymously, as the herald of salvation (vv. 1-3). The gospel monologue of the Servant is followed by a promise of the restoration and blessedness of Jerusalem (vv. 4-11). Thus the prophecy moves steadily forward toward its goal in Jesus Christ (cf. Lk. 4:18-21).

In 62:1–63:6 Zion's salvation is described as drawing near. The nations will be spectators of the great event. A new name that will better symbolize its true character shall be given to Zion, Heb. *hepṣî-bāh*, "My delight is in her"; for Jerusalem shall no more be called desolate. On the other hand, Zion's enemies will all be vanquished. In a brief poem of peculiar dramatic beauty (63:1-6), the prophet portrays the Lord's vengeance, as a victorious warrior, upon all those who retard Israel's deliverance. Edom in particular was Israel's insatiate foe. Hence the prophet represents the Lord's judgment of the nations as taking place on Edom's unhallowed soil. The Lord, whose mighty arm has wrought salvation, returns as victor, having slain all of Israel's foes.

In 63:7–64:12, the Lord's "servants" resort to prayer. They appeal to the Lord as the Begetter and Father of the nations (63:16; 64:8). With this thought of the Fatherhood of God imbedded in his language, Isaiah had opened his very first oracle to Judah and Jerusalem (cf. 1:2). As the prayer proceeds, the language becomes increasingly tumultuous. The people are thrown into despair because the Lord seems to have abandoned them altogether (63:19). They recognize that the condition of Jerusalem is desperate. "Our holy and beautiful house, where our fathers praised thee, has been burned by fire, and all our pleasant places have become ruins" (64:11). Such language, however, is the language of fervent prayer and must not be taken with rigid literalness, as 63:18 and 3:8 plainly show.

Finally, in chs. 65–66, the Lord answers His people's supplications, distinguishing sharply between His own servants and Israel's apostates. Only His chosen seed shall be delivered (65:9). Those who have obdurately provoked the Lord by sacrificing in gardens (65:3; 66:17), offering libations to Fortune and Destiny (65:11), sitting among the graves to obtain oracles from the dead, and, like the Egyptians, eating swine's flesh and broth of abominable things that were supposed to possess magical properties, lodging in vaults or crypts in which heathen mysteries were celebrated (65:4), and at the same time fancying that by celebrating such heathen mysteries they are holier than others and thereby disqualified to discharge the ordinary duties of life (65:5) — such the Lord designs to punish, measuring their work into their bosom and destroying them utterly with the sword (65:7, 12). On the other hand, the servants of the Lord shall inherit His holy mountains. They shall rejoice and sing for joy of heart, and bless themselves in the God of amen, i.e., in the God of truth (65:9, 14, 16). The Lord will create new heavens and a new earth, people will live and grow old like the patriarchs; they will possess houses and vineyards and enjoy them; for an era of idyllic peace will be ushered in with the coming of the messianic age, in which even the natures of wild animals will be changed and the most rapacious of wild animals will live together in harmony (65:17-25). Religion will become spiritual and decentralized, mystic cults will disappear, and incredulous scoffers will be silenced. Zion's population will be marvelously multiplied, and the people will be comforted and rejoice (66:1-14). Furthermore, all nations will flock to Zion to behold the Lord's glory, and from one new moon to another, and from one sabbath to another, all flesh will come up to worship in Jerusalem (66:15-23).

It is evident that the book of Isaiah closes, practically as it begins, with a polemic against false worship, and the alternate reward of the righteous and punishment of the wicked. The only essential difference between the prophet's earlier and later oracles is this: Isaiah, in his riper years, on the basis of nearly half a century's experience as a preacher, paints a much brighter eschatological picture than was possible in his early ministry. His picture of the messianic age not only transcends those of his contemporaries in the 8th cent. B.C., but he penetrates regions beyond the spiritual horizon of any and all OT seers. Such language as that contained in 66:1f., in particular, anticipates the great principle enunciated by Jesus in Jn. 4:24,

namely, that "God is spirit, and those who worship him must worship in spirit and truth."

VIII. The Critical Problem.—*A. History of Criticism.* The Isaianic authorship of the entire prophecy was never questioned either in the OT period or that of early Christendom. The frequency with which the NT referred to Isaiah, who was cited more than all the other OT prophets combined, confirmed the view in the minds of early Christians that the composition was an integer, consciously composed by a single person. The NT references are as follows: Mt. 3:3; 8:17; 12:17-21; 13:14f.; 15:7-9; Mk. 1:2f.; 7:6f.; Lk. 3:4-6; 4:17-19; Jn. 1:23; 12:38-41; Acts 8:28-33; 28:25-29; Rom. 9:27-29; 10:16, 20f. If these quotations are examined, it will be seen that they refer to all parts of the prophecy, with citations from the first thirty-nine chapters being about the same in number as those from the last twenty-seven chapters. Many of these do not refer to the book as such, but rather attribute the utterance quoted to the man Isaiah himself. Hence we meet such phrases as "Isaiah the prophet," "the prophet Isaiah," "Isaiah prophesied," "Isaiah said again," "Isaiah said . . . saw . . . spoke," "Isaiah cries," "Isaiah says," "As Isaiah said before," "Isaiah becomes bold and says," "Well spoke the Holy Ghost through Isaiah the prophet." Thus it appears that the NT attributes various sections of the prophecy to the man Isaiah himself.

The unity of Isaiah was maintained in Christendom without question until the late 18th cent., though this degree of unanimity was not as evident in certain Jewish circles. It may have been that the talmudic tradition (T.B. *Baba Bathra* 15a) furnished some freedom for speculation in this respect, affirming that "Hezekiah and his company wrote Isaiah, Proverbs, the Song of Songs and Ecclesiastes," even though the verb "wrote" was being employed technically in the sense of "edited" or "compiled." The allusion to the "company" of Hezekiah was evidently to his eighth-century B.C. contemporaries who were responsible, under his direction, for the compilation and arranging of certain literary products (cf. Prov. 25:1). Be this as it may, the Talmud clearly set the writings of Isaiah against an eighth-century B.C. Palestinian milieu and credited Hezekiah's "company" with their arrangement in extant form. Some medieval Jewish commentators, however, began to question this tradition; e.g., Ibn Ezra (A.D. 1092-1167) denied that Isaiah was the author of the last twenty-seven chapters. In the following century a Spanish Jew, Moses Ibn Gekatilla, also wrote a commentary on Isaiah in which he denied that chs. 40–66 were the work of the eighth-century prophet, and attributed them instead to the postexilic period. These tendencies exerted no influence upon contemporary Christian opinion, however, and it was not until the 18th cent. that the impact of European rationalistic thought began to be felt on the prophecy of Isaiah.

Modern literary criticism of the book can be said to have begun with Döderlein's *Esaias* (1775), in which the author suggested, without any compelling evidence, that the book comprised two distinct works. In the German edition (1779-81) of the commentary on Isaiah by R. Lowth, J. B. Koppe advanced the view that ch. 50 might have come from an exilic writer, perhaps Ezekiel, but again nothing was adduced in the nature of historical evidence. Almost immediately this trend attracted the attention of German scholars, and in his OT introduction Eichhorn adopted the position held by the medieval Jewish commentators, regarding chs. 40–66 as the work of some person other than Isaiah ben Amoz. With the commentary by Gesenius (1821) there emerged the view that, while chs. 40–66 were non-Isaianic in character, they were still an essential literary unity. This opinion was supported by scholars such as Knobel, G. A. Smith, König, and Torrey, though not all critics who reviewed the problem were convinced that these chapters were the work of a single author, an unknown exilic prophet who by this time had become known for convenience as Second or Deutero-Isaiah. Thus Stade, in his *Geschichte des Volkes Israel* (1888), stoutly refuted the possibility that the last five chapters of the prophecy in their extant form could have been written by Isaiah at all. Budde enlarged this number in 1891 to include at least chs. 56–59, but Duhm and Marti found that even this suggestion was inadequate. Instead, in 1892, they advanced the opinion that chs. 40–55 had been composed by a Second Isaiah in Babylon somewhat before the liberating decree of Cyrus in 538 B.C., while a third or Trito-Isaiah was credited with having written chs. 56–66, probably in Palestine and subsequent to 538 B.C.

The opinions of Duhm and Marti found quick acceptance and were soon adopted as the official literary-critical view of the composition of Isaiah. Not all liberal scholars were attracted to it, however, because some of them, caught up in the fervor of source-fragmentation, were already challenging the postulated unity of chs. 40–55. In this the way had been opened up by Rückert, who as early as 1831 had used the pronouncement "there is no peace, says the Lord, to the wicked" (48:22), which occurred in similar form in 57:21, to divide chs. 40–55 into two subsections consisting of chs. 40–48 and 49–55. Kuenen in 1889 maintained that the bulk of chs. 50–55 had come from a period later than 536 B.C., and that Second Isaiah could conceivably have had a hand in composing the material. Kosters, however, denied any section of chs. 40–55 to a Second Isaiah, and this view was adopted by Cheyne in the *Polychrome Bible* (1898). The pervasive influence of Duhm was seen in the writings of Skinner, especially his *Cambridge Bible* commentary on Isaiah (1896–98), and he, along with A. B. Davidson and G. A. Smith, was responsible for promoting German literary-critical views relating to the composition of Isaiah among English-speaking peoples.

When the form-critical procedures of Gunkel began to be applied to Isaiah, some scholars regarded chs. 40–55 as an anthology of poetic material composed by Second Isaiah and arranged without regard to particular order. Those who supported such a position included Gressmann, Mowinckel, Eissfeldt, and Volz. The speculations of Duhm regarding the possibility of a Trito or Third Isaiah who had supposedly been the author of chs. 56–66 also found advocates in Europe, among whom were Kosters, Littmann, Box, Elliger, and Sellin. Other liberal critics wondered if chs. 56–66 could in fact be assigned with confidence to a single author, and the results of their speculations, which attributed various sections of these chapters to the work of anonymous individual writers, tended to increase still further the fragmentation of the prophecy and carry the process to all sorts of subjective extremes. Writers who pursued this line of approach included Cheyne, Budde, Buttenwieser, Marti, Levy, and Lods.

As part of the general literary criticism of Isaiah, some sections of the prophecy that became known as the servant passages (42:1-4, or perhaps 1-9; 49:1-6, or perhaps 1-9; 50:4-9, or perhaps 4-11; 52:13–53:12) fell under scholarly scrutiny, and provoked wide divergences of opinion in consequence. For the first three hundred years of its existence, the Church commonly identified the Servant of Isaiah with the righteous, whether on an individual or collective basis, while at the same time interpreting ch. 53 as a messianic prophecy. Subsequently the messianic interpretation became the standard way of regarding the

Servant of the Lord, but when European scholars began to reject Isaianic authorship of the prophecy, the Davidic messiah was gradually abandoned in favor of seeing the Servant in terms of the whole nation of Israel. In the 18th cent. this was begun by Semler (1771), Koppe (1779), and Eichhorn (1794), and continued in the following century with some variations by Vatke (1835), Ewald (1840), Davidson (1863), Cheyne (1870), and Driver (1888) among others, most of whom thought of an ideal and spiritual Israel rather than an actual historical people.

While these attempts at interpretation were taking place, the significance of which will be considered subsequently, scholars were attempting to relate the composition of the servant passages to the work of one or more of the "Isaiahs" allegedly involved in the writing of chs. 40–66. Fullkrug, Ley, and Blank thought that the poems were composed by Second Isaiah during the Exile as part of the section of the prophecy attributed to him, while Condamin, Sellin, Levy, and others maintained that, while Second Isaiah was the author, the material was late rather than early, and was incorporated into the prophecy in the postexilic period. Some European scholars, including Fischer, Rudolph, and Hempel, thought that the servant passages had been written by Second Isaiah after the bulk of his work had been completed, and as a result had been interpolated into the Hebrew text. Wellhausen offered a variant form of this hypothesis in suggesting that the poems had been composed by an earlier unknown author and had been taken over by Second Isaiah, who incorporated them later into his own work. Yet another view, supported by Duhm, Kittel, Kennett, and others, suggested that the oracles were the work of an anonymous composer who wrote at a later time than Second Isaiah and whose compositions were added subsequently to the prophecy by an equally unknown editor. In all of these speculations the appeal to ignorance was a marked feature, and none of the scholars involved apparently thought it either desirable or necessary to attempt to adduce objective data by which their conclusions could be tested, preferring instead to follow the highly subjective a priori procedures employed by the Graf-Wellhausen school.

These attempts to fragment the prophecy of Isaiah were more than essays in literary criticism. They were in fact a microcosm of the age, and one expression of the evolutionary *Zeitgeist* that could be found both in the humanities and in the descriptive sciences in the 19th century. The philosophical speculations of Hegel had encouraged the European savants to think in terms of a social and intellectual environment in which progress and development were assured. Consequently it was confidently imagined that the ratiocinative processes of the nineteenth-century European intelligentsia could, by their essential superiority, challenge definitively the cogitations and the literature of earlier ages, expose the fallacies and frailties of non-European thought as never before, strip away firmly the mythological accretions which were thought to have accumulated over the millennia, and reveal for the first time the true nature and content of the material under consideration. The confidence which the nineteenth-century literary critics had in their ability to unravel the mysteries of the authorship and date of OT books seemed boundless; even when they were based on only the flimsiest evidence, or as often happened on no evidence at all, the pronouncements of liberal scholars were made with a breathtaking degree of assurance and finality. Consequently it is not surprising to read in the literature of the day that the division of Isaiah among several authors represented "one of the most assured results of modern literary criticism."

Needless to say, the approaches and conclusions espoused by the Graf-Wellhausen school were not by any means shared by more conservative scholars, and the emotional fervor engendered by the fragmenting of Isaiah provoked an equally vigorous reaction among those who viewed the prophecy as a literary unity. While there were undoubted diatribes and denunciations on both sides, there were also discussions of an extremely high academic order, and in some respects the erudition of late nineteenth-century OT scholarship reached its apogee in the controversy about the literary and historical criticism of Isaiah. One of the earliest, and perhaps the most outstanding conservative study of Isaiah, and one which anticipated many later objections to the literary unity of the book, was made in 1846 by J. A. Alexander. He began by attacking the basic weaknesses in the a priori approach of contemporary liberal scholarship (*see* PENTATEUCH; CRITICISM), and went on to uphold the Isaianic authorship of chs. 40–66. In this connection he stated that it would be unparalleled in all literary history for a brilliant and erudite author such as Isaiah to have produced a series of prophecies of such vital importance for the Babylonian exiles, and then to have disappeared both from the local scene and from human memory without leaving any trace of his own personality upon them. He also asked how it was possible for this anonymous material to have been attached to the writings of Isaiah ben Amoz when, according to liberal critics, they had little or nothing in common. In addition he pointed out how comparatively few references to Babylon and the Exile occurred in chs. 40–66, a matter that C. C. Torrey was to take up with perception and insight many years later.

In a commentary on Isaiah begun in 1845 by Drechsler and completed in 1857 by Delitzsch and Hahn, the literary unity of chs. 40–66 and their Isaianic authorship were again maintained. Delitzsch held that chs. 36–39 formed a link between the Assyrian and Babylonian periods, and suggested that chs. 1–39 served as a preparation for chs. 40–66. From the same period came a brilliant commentary on Isaiah by Rudolph Stier, in which the literary integrity of the prophecy was emphasized. Five years later, in 1855, a Jewish-Italian commentary on Isaiah was published by Luzzatto. In this book the author advanced the view that the last twenty-seven chapters had been written by Isaiah ben Amoz, and that they differed from some other sections of the book in comprising prophecies concerning the future.

In 1866 the first edition of Franz Delitzsch's commentary on Isaiah appeared, and at once was recognized as an outstanding combination of philological expertise and spiritual insight. By the time the fourth edition was translated into English (1889) and furnished with an introduction by S. R. Driver, it became apparent that Delitzsch had accommodated his views throughout the work to those of most contemporary liberal scholars. He never capitulated completely, however, to the current critical speculations regarding the authorship of Isaiah, for he chose to think of chs. 40–66 as "testamentary discourses of the one Isaiah, and the entire prophetic collection as the progressive development of his incomparable charism" (*Biblical Comm. on the Prophecies of Isaiah* [1880], II, pp. 125f.). Elsewhere he thought that the author of chs. 40–66 was "in any case a prophet of the Isaianic type, but of an Isaianic type peculiarly developed," and of the material itself as being attributable ultimately to Isaiah, if, in fact, he was not the immediate author (pp. 129, 133).

Despite unremitting opposition from conservative scholars, the divisive theories of Duhm held the field in liberal circles, and conveyed the general impression that the

literary-critical problems of Isaiah were settled to all intents and purposes. Impressive though this show of critical unanimity appeared, it was not destined to survive more than the first four decades of the 20th century. Unmistakable fissures in the facade began to appear by about 1940, and became evident in 1944 when Sidney Smith delivered a series of lectures on what he deemed to be the historical material illustrative of chs. 40–55. Instead of employing the type-analytical (*Gattungsforschung*) techniques of Gunkel and Gressmann, Smith related the historical events of the period between 547 and 538 B.C. to the section of Isaiah that he was studying. Having achieved this objective, he then set out the material in the original structure of speeches composed by the prophet that had then been circulated, according to Smith, in the form of approximately twenty-two pamphlets. These included all of the servant passages, the last of which (52:13–53:12) Smith connected with the death of Isaiah himself.

A barrage of criticism greeted the publication of the book, and there can be no question but that some of the strictures were richly deserved. Smith's treatment of the servant passages, the fourth one in particular, was very unsatisfactory, and much of the historical material that he had adduced to support his thesis was extremely tenuous. His treatment of the problem was outstanding, however, in the way in which he proposed serious historical links between the period of 547-538 B.C. and the material in chs. 40–55 of Isaiah. It is difficult to resist the conclusion that the criticisms of his position were aroused in no small measure by a fear of what the future might hold for the entire scheme of liberal criticism of Isaiah.

In 1962, Mauchline published a commentary on chs. 1–39 of the prophecy, and a notable feature of the work was the conservative position adopted toward sections that had been regarded previously as interpolations by later editors. The results of his study enabled him to see Isaiah as the substantial author of chs. 13–27, and in this conclusion he diverged considerably from many liberal scholars, who had commonly assigned certain sections of that material to a postexilic period. There were certain contradictions in his method, however, and they seemed to be of a kind that would beset anyone writing from a general liberal background. Thus he saw no inconsistency, as other critics had done, between the references to Babylon in ch. 39 and Isaianic authorship of that section; at the same time he utilized the mention of the Medes and Babylon in Isa. 13:17-19 as a reason for adhering to an exilic date for the passage. Had he allowed room for a genuinely predictive element in the narrative, however, the apparent problem would have been resolved immediately.

The literary-critical position was reemphasized by the publication of J. L. McKenzie's commentary on Second Isaiah (*AB*, 1968). He studiously ignored any position other than his own, and seemed blissfully unaware of the effect that certain evidence from Qumrân (see below) has had upon the literary-critical problem of Isaiah. Meanwhile, conservative scholars were continuing to argue for the integrity and Isaianic authorship of the prophecy, and their writings included works by Allis (1950), Young (1965-74), and Buksbazen (1971-74).

B. Arguments for Divided Authorship. From the preceding survey it will have become apparent that, as long as only internal evidence is considered, the polarization of views concerning the authorship and date of the prophecy is much the same now as it was a century ago. Before any attempt is made to resolve this situation, it would seem desirable to subject the arguments for a divided authorship of the prophecy to careful examination so as to test their validity. According to S. R. Driver (*Intro. to the Literature of the OT* [9th ed. 1913], pp. 236ff.), these fell into three broad categories. First, chs. 40–66 seemed to point to a period of composition toward the close of the Babylonian Exile rather than to a time in the 8th cent. B.C. According to this view the Exile was presupposed, not predicted, and those addressed were thought to be already exiled and awaiting a return to Palestine. In consonance with their general disavowal of a predictive element in prophecy, liberal literary critics held that it was impossible for Isaiah to have sustained so lengthy a futuristic standpoint and to have addressed persons who were more than a century in the future.

The second argument for separating chs. 40–66 and assigning them to some author other than Isaiah ben Amoz rested upon stylistic considerations. Accordingly it was argued that new imagery and phraseology occurred to replace (to some degree at least) the ideas and terminology of chs. 1–39, with phenomena such as the duplication of words occurring more prominently in chs. 40–66. The literary style of this latter section was held to be marked by a personification of cities and nature alike, a dramatic depicting of the fortunes of individuals and nations, and an impassioned lyricism that made the section one of outstanding literary quality. By contrast, the style of Isaiah ben Amoz in chs. 1–39 was described as terse and compact, and the thought and ideas as moving in a measured, unexceptional manner.

The third criterion for the division of the prophecy involved the theological concepts of chs. 40–66. Thus it was alleged that, whereas earlier chapters spoke of God's majesty, later ones described His uniqueness and eternity. In the first part of the prophecy it was maintained that the remnant constituted the faithful left behind in Jerusalem, whereas in later chapters the remnant consisted of the exiled Judeans about to be brought back to Palestine. A third supposition was that the messianic king of chs. 1–39 was replaced by the servant concept of chs. 40–66.

C. Arguments Against Divided Authorship. Conservative scholars met the first of these objections by recognizing that the difference in the time-perspective between the first and second supposed divisions of the prophecy was of an ideal rather than a real nature. Taking their cue from remarks such as those made by Driver (*Intro.*, p. 237) to the effect that there were instances where Isaiah ben Amoz projected himself into the future and then described certain events yet to take place as though they had already occurred (cf. 5:13-17; 9:1-7; 23:1, 14), they asked why it would not have been possible for a prophet as great as the author of chs. 40–66 to have maintained exactly the same kind of ideal standpoint for some prolonged period also. In addition it was pointed out that the Exile was not an event that was still very much in the future for Isaiah, but a process that had for long been initiated by God's people, and whose culmination was in fact a commonplace of prophetic observation and prediction.

Issue was also taken with the way in which critical scholars either minimized or else rejected completely the predictive element in prophecy, and in particular their allegation that it would be unprecedented for the name of Cyrus to have been mentioned more than a century and a half before his birth. Conservative writers then cited the prophetic utterance that foretold the name of Josiah more than three hundred years before he was born (1 K. 13:1f.), the mention of Bethlehem by Micah, Isaiah's contemporary, as the birthplace of the Messiah (Mic. 5:2; Mt. 2:6) some six hundred years before the event, and the subjugation of Tyre by the Babylonians as predicted both by Ezekiel (26:2-21) and Zechariah (9:1-4). The first of these prophecies proved particularly embarrassing to liberal

scholars, since there was absolutely no possibility whatever of the Hebrew text being corrupt at that point, and in the end they quietly gave up the task of attempting to meet this devastating criticism of their position, other than insisting that there could be no predictive element in prophecy.

Equally difficult for liberal scholarship was the task of furnishing convincing evidence for the theory that chs. 40–66 were written in Babylonia. Duhm and others followed the general tradition of the Graf-Wellhausen school by formulating speculative accounts of the way in which this eventuality could have happened, but no amount of critical ingenuity could furnish any actual proof. C. C. Torrey, one of the more extreme critics of his day, was so skeptical of this kind of approach that he asserted flatly that the few references to Babylon and Cyrus in chs. 40–66 were bungling editorial insertions, and that the bulk of the material could be assigned without question to a Palestinian milieu. Some liberal scholars made a determined attempt to see a Babylonian background in the description of religion, buildings, and local scenery, but when pressed they were forced to concede that nothing of a cultural, geographical, or topographical nature suggested any locale other than Palestine as the place of origin of the prophecy. That no place other than Judah or Jerusalem was mentioned in chs. 40–66 as the actual home of the Judeans supported this Palestinian provenance. From the foregoing discussion it would therefore appear that the Babylonian Exile was in fact being predicted rather than being presupposed in chs. 40–66, and that those addressed were still living in Palestine and had not yet been transported as captives to Babylonia.

Arguments from literary style have always been rather tenuous and highly subjective in nature, though this fact was unfortunately not recognized by the members of the Graf-Wellhausen school. Curiously enough, the adherents of this approach to OT study saw no inconsistency whatever in investigating material ascribed to some biblical author, and then denying to his literary activity certain parts of that corpus simply because the literary form and vocabulary of each chapter did not happen to correspond in minute detail. Conservative scholars were not slow to point out the anomalies involved, and this, along with the much wider knowledge of ancient Near Eastern languages that scholars now possess, has resulted in far less reliance being placed upon this form of argument than was the case previously. It is now conceded openly that arguments based on style can prove to be extremely precarious in nature, and not infrequently to be resting upon a complete misunderstanding of the literary situation, as the following example will show. Liberal scholars have commonly argued that, because a Mesopotamian literary idiom occurs in Isa. 45:7, an exilic date and a Babylonian provenance must obviously be indicated for the chapter in question, and by implication, for chs. 40–55 at the least. The idiom referred to is known to modern scholars as *merismus*, in which antonyms used in pairs are employed to designate the totality of a given situation. This particular form originated with the Sumerians, and is one of the oldest literary idioms known. At an early period its usage diffused northward into the subsequent Babylonian culture, and westward into the language and thought of Egypt. On prima facie grounds, the incidence of *merismus* in Isa. 45:7 could equally well imply an Egyptian or a Mesopotamian origin for the material. Yet because purely speculative considerations demanded for liberal scholars a Babylonian provenance, the possibility that the chapter could have come (at least on the grounds of this particular piece of linguistic evidence) from Egypt was never even considered, let alone dismissed. If the incidence of *merismus* were to be in fact the deciding criterion, however, the very first chapter of the prophecy would have to be attributed to someone other than Isaiah ben Amoz, and to a period other than the 8th cent. B.C., since the second verse contains an obvious *merismus* ("heavens . . . earth"). Yet not even the most radical literary critic has been presumptuous enough to make this suggestion. Obviously Isaiah's use of *merismus*, which of course is not restricted to the two verses mentioned above, cannot possibly determine the date of any section of any composition, prophetic or otherwise. Certain *merismus* expressions do have another extremely important function in the prophecy of Isaiah, the significance of which will be examined subsequently.

Even with the information that was then at their disposal, nineteenth-century scholars were clearly wrong in suggesting the kind of wide stylistic divergences that they did, because a close study of the prophecy shows that chs. 1–39 and 40–66 have close verbal agreement in specific instances. For example, emphatic reduplication occurs in 2:7, 8; 6:3; 8:9; 24:16, 23; 40:1; 43:11, 25; 48:15; 51:12; 57:19; and 62:10. The agonies of a woman in labor are mentioned in 13:8; 21:3; 26:17, 18; 42:14; 54:1; 66:7, while the position occupied by Zion in the prophet's thoughts can be seen in 2:3; 4:4; 18:7; 24:23; 28:16; 29:8; 30:19; 31:9; 33:5, 20; 34:8; 46:13; 49:14; 51:3, 16; 52:1; 59:20; 60:14; 62:1, 11; 66:8. It is rather interesting from a stylistic standpoint that the expression "the mouth of the Lord has spoken" should occur in 1:20; 40:5; 58:14, and be found nowhere else in the OT, and that the phrase translated "running with water" (30:25) and "flowing streams" (44:4) should not be found anywhere else in the Hebrew scriptures. The terseness of literary style allegedly confined to chs. 1–39 occurs also in chs. 40–66, with ch. 53 being a case in point. Chs. 40–66 contain both verbal agreements with 1–39 and similarities in thought or figure, as the following chart indicates.

Verbal Agreements

40:5; 58:14 . . . . . 1:20	56:8 . . . . . 11:12
43:13 . . . . . 14:27	61:2; 63:4 . . . . . 34:8
45:11; 60:21 . . . . 19:25; 29:23	65:25 . . . . . 11:9
51:11 . . . . . 35:10	

Similarities in Thought or Figure

40:3f.; 49:11 . . . . . 35:8-10	54:7f. 26:20
41:17f.; 43:19 . . . . . 35:6f.	55:12 . . 14:8; 32:15; 35:1f.
42:1; 61:1 . . . . . 11:2	56:7 . . . . . 2:2
42:7 . . . . . 9:2 (MT 1)	56:8 . . . . . 11:12
42:13 . . . . . 31:4	56:12 . . . . . 22:13
42:18-20; 43:8 . . . . . 6:9	59:3 . . . . . 1:15
43:13 . . . . . 14:27	59:11 . . . . . 38:14
43:24 . . . . . 1:14	60:13 . . . . . 35:2
43:26 . . . . . 1:14-19	60:18 . . . . . 26:1
45:9; 64:8 (MT 7) 29:16	60:21 . . . . . 11:1
45:15 . . . . . 8:17	61:8 . . . . . 1:11, 13
47:3 . . . . . 3:17; 20:4	62:10 . . . . . 11:12
47:10 . . . . . 29:15; 30:1	63:17 . . . . . 6:10
49:2 . . . . . 11:4	65:3; 66:17 . . . . . 1:29
49:26 . . . . . 9:20 (MT 19)	65:19 . . . . . 35:10
51:4 . . . . . 2:3	65:25 . . . . . 11:6
51:9 . . . . . 27:1	66:16 . . . . . 27:1
53:2 . . . . . 11:1, 10	

An examination of the foregoing shows that so far from diverging midway through the extant prophecy, the literary style of the book exhibits an amazing consistency. It also makes clear that Isaiah's literary style differed significantly from that of every other OT prophet, and in particular shows that it diverged widely from that employed by Ezekiel and the postexilic prophets.

The same considerations hold good for the theological

differences alleged for chs. 1–39 and 40–66. In this connection notice should be taken of a characteristic name for God, "the Holy One of Israel." It occurs twenty-six times in the prophecy, and only six times elsewhere in the OT, one of which is in a parallel passage in Kings (2 K. 19:22; cf. Ps. 71:22; 78:41; 89:18 [MT 19]; Jer. 50:29; 51:5). This unique description unifies the various sections in which it appears, and stamps them with the personal imprimatur of the one who saw the vision of the most high God seated on His throne, and heard the angelic choir singing His praise and glory (6:3). Against the unproven assertion that the two supposed divisions of the prophecy exhibit substantial theological differences, the presence of this concept of God as the Holy One of Israel is a strong argument for the theological unity of the work, distributed as it is twelve times in chs. 1–39 (1:4; 5:19, 24; 10:20; 12:6; 17:7; 29:19; 30:11f., 15; 31:1; 37:23) and thirteen times in chs. 40–66 (41:14, 16, 20; 43:3, 14; 45:11; 47:4; 48:17; 49:7; 54:5; 55:5; 60:9, 14). Such an even and consistent distribution would have been impossible had the prophecy as a whole arisen from such diverse historical circumstances as the liberal critics claimed. Another concept which occurs with some frequency in the prophecy is that of a highway (11:16; 35:8; 40:3; 43:19; 49:11; 57:14; 62:10). References to the temple and its worship also presuppose a uniform preexilic Palestinian milieu throughout. Thus 1:11-15 reflects a situation when all was flourishing in the land, whereas the attack of Sennacherib has brought about different conditions in 43:23f. In 66:1-3, 6, 20, not only is the existence of the temple and its ritual presupposed, but the prophet is active in condemning those very features that were to occupy Jeremiah's thoughts so much in the following century.

One of the most important unifying theological concepts has to do with the strictures of Isaiah concerning idolatry. Such references, especially as they occur in chs. 40–66, present a uniform picture of preexilic veneration of Canaanite deities and indulgence in the sensual rituals now illustrated by archeological discoveries at Ugarit (Râs Shamrah). Critical scholars have failed to observe that, apart from the description of Babylonian idolatry in 47:13, all other references to such practices in chs. 40–66 are specifically to the preexilic Canaanite variety mentioned in 1:13, 29; 2:8; 8:19, and elsewhere. Such allusions in later chapters of the extant prophecy include 40:19; 41:7, 29; 42:17; 44:9, 25; 45:16; 46:6f.; 48:5; 57:5f.; 66:3, 17. Of the preceding, it is impossible to interpret 44:9, 25 and 57:5 in any terms other than those of the familiar preexilic Canaanite idolatry. If this material had in fact come from the Exile and had been written by an unknown prophet, it is most strange that the author was so actively concerned with something that was meaningless to his compatriots in Babylonia, and which in fact, both socially and religiously, was a completely dead issue. But since the ancient Hebrew prophets were not given to answering questions that their hearers were not asking, it can only be concluded that those who interpret the material of chs. 40–66 in terms of an exilic or postexilic standpoint are construing incorrectly such evidence as they purport to possess. There can be no doubt that, in reality, the social and religious background of the content of chs. 40–66 is that of the preexilic period, as Kissane showed so competently (E. J. Kissane, *Book of Isaiah* [1943], II, xlvi ff.). If nineteenth-century literary critics had made an honest attempt to relate chs. 40–66 to Hebrew history, it would have become clear to them immediately that certain portions of that section could not be relegated to any point within the exilic period. Thus in 40:9 the stronghold of Zion and the cities of Judah are still in existence, a situation vastly different from the known conditions at the time of the Exile. Again, in 62:6 the walls of Jerusalem were mentioned explicitly in a context of well-being and prosperity, and it is impossible to interpret this state of affairs either in terms of the Exile or the early postexilic period. By contrast, against an obvious background of eighth-century-B.C. life in the southern kingdom, Isaiah regards the Exile as an already accomplished fact, as in 1:7-9; 5:13; and 14:1-4. Theology, religion, and history thus combine to emphasize the unity of background and provenance of the extant work.

The later chapters of the prophecy of Isaiah have a far greater degree of consonance with the statements of the eighth-century B.C. prophets about current religious and moral conditions than most liberal critics have been prepared to concede. Such reflections can be seen in 44:23f.; 45:8; 50:1; 55:12f.; 56:1; 57:1; 59:3; 61:8; 63:3-5. Especially striking are the similarities between the doctrines of Isa. 40–66 and the teachings of Micah. The following resemblances should be noted: Isa. 41:15f. and Mic. 4:13; Isa. 47:2f. and Mic. 1:11; Isa. 48:2 and Mic. 3:11; Isa. 49:23 and Mic. 7:17; Isa. 52:12 and Mic. 2:13; Isa. 58:1 and Mic. 3:8. Quite obviously the same confident expectation of the future under God's providence, the same overall conception of the ancient Near Eastern nations, and the joyous hope that a remnant would return from exile to perpetuate the ancestral faith, were characteristic of both prophets.

Conservative scholars generally answered the arguments relating to supposed differences in theological standpoint and perspective by demonstrating that the concepts elaborated in later sections of the prophecy were broader and more extended in scope than their counterparts in chs. 1–39. Thus the messiah, who had been described in earlier parts of the prophecy in terms of a king who would be of Davidic stock, was subsequently thought of as the Servant of the Lord. But even here the mention of David in 55:3 makes it evident that the earlier concept of a royal Davidic descendant had not by any means been abandoned in favor of the servant ideal. As will be shown subsequently, the extant prophecy exhibits a remarkable parallelism of both structure and thought so that specific theological emphases occur in a context that makes it extremely difficult to argue against the integrity of the work and an eighth-century-B.C. Palestinian provenance. There is no evidence for the assertion that in chs. 1–39 the remnant comprised the faithful left behind in Jerusalem, but in chs. 40–66 it was understood as the exiled group of Judeans preparing to return to Palestine. As observed above, it is impossible to show that any locale other than Judean soil was the place from which chs. 40–66 emerged. The topography, the references to Canaanite idolatry, and the significance of the temple and the house of David all point to a distinctively Palestinian background and refute any suggestion of a Babylonian provenance.

One other strong argument against a divided authorship should be noted in passing, and this has to do with the predictive element in the prophecy. Prediction was of the essence of prophetic activity (cf. Dt. 18:22), and Isaiah was particularly gifted in this direction. Without any warning he repeatedly leaped from despair to hope, from threat to promise, and from the actual to the ideal. While he spoke of his own age, of course, he also addressed himself to the days that would follow, as shown by the fact that his verb tenses are typically futures and prophetic perfects. The following historical situations in the prophecy are worthy of note. Before the Syro-Ephraimitic war (734 B.C.), he predicted that within sixty-five years Ephraim should be broken to pieces (7:8); and that before the child

Maher-shalal-hashbaz should have knowledge to cry, "My father," or ' My mother," the riches of Damascus and the spoil of Samaria should be carried away (8:4; cf. 7:16). These are, however, but two of numerous predictions, as shown above, among his earlier prophecies (cf. 1:27f.; 2:2-4; 6:13; 10:20-23; 11:6-16; 17:14). Shortly before the downfall of Samaria in 722 B.C. Isaiah predicted that Tyre should be forgotten seventy years, and that after the end of seventy years its merchandise should be dedicated to the Lord (23:15, 18). In like manner, prior to the siege of Ashdod in 711 B.C., he proclaimed that within three years Moab should be brought into contempt (16:14), and that within a year all the glory of Kedar should fail (21:16). And not long prior to the siege of Jerusalem by Sennacherib in 701 B.C. he predicted that in an instant, suddenly, a multitude of Jerusalem's foes should be as dust (29:5); that yet a very little while and Lebanon should be turned into a fruitful field (29:17); and that Assyria should be dismayed and fall by the sword, but not of men (30:17, 31; 31:8). And more, that for days beyond a year, the careless women of Jerusalem should be troubled (32:10, 16-20); and that the righteous in Zion should see Jerusalem a quiet habitation, and return and come with singing (33:17ff.; 35:4, 10); but that Sennacherib, on the contrary, should hear tidings and return without shooting an arrow into the city (37:7, 26-29, 33-35).

In like manner, *after* the siege of Jerusalem by Sennacherib in 701 B.C. was over, the prophet seems to have continued to predict; and, in order to demonstrate to the suffering and unbelieving remnant about him the deity of the Lord and the folly of idolatry, pointed to the predictions which he had already made in the earlier years of his ministry, and to the fact that they had been fulfilled. These references include 41:21-23, 26; 42:9, 23; 43:9, 12; 44:7f., 27f.; 45:3f., 11, 13; 46:10f.; 48:3, 5; 48:6-8, 14-16. There can be no doubt that these predictions are as consistent throughout the extant prophecy as they are explicit and emphatic.

D. The Prophecy as an Anthology. As W. F. Albright pointed out (*FSAC*, p. 275), scholars are becoming increasingly aware that most OT prophecies are really anthologies of oracular and sermonic material, since their contents are seldom in chronological order. The Hebrew prophets did not set out to elaborate a system of theology in their teachings, but instead spoke the divine word as they received it in spiritual fellowship with God. They addressed themselves to the needs of their age, and were infinitely more concerned about speaking to the contemporary situation than in correlating specific utterances to a given phase or epoch of history, in the manner that a chronicler might have done. Thus it is not surprising, even in fairly short prophecies, to encounter chronologically different sections in juxtaposition. It would seem that, in most instances, the aim of the written prophecy was to afford permanence for the spoken word in that and subsequent generations, mindful of the fact that, in the ancient Near East, anything of importance was committed to writing either when it happened or shortly afterward.

By definition, an anthology of written work can, and most frequently does, emerge from an extended period of the author's literary activity, and thus can be expected not only to reflect specific differences of literary style, but an equal diversity of social, historical, or religious circumstances, many of which would have prompted the composition of various items of the collection in the first instance. Again, an anthology normally comprises selections from the author's works, where a single individual is involved, and not his entire production of literature. While some of the Minor Prophets may have written or spoken little else beyond what is attributed to them in extant works, major writers such as Jeremiah or Isaiah probably produced far more than has actually survived. Certainly it is correct to regard Isaiah as an anthology in the sense described above because of the evidence furnished by the superscription of 1:1. This verse comprises a heading for the prophecy and speaks specifically of the revelatory material received by Isaiah in visions in the reigns of Uzziah, Jotham, Ahaz, and Hezekiah. The nature of the prophecy as an anthology is further indicated by the presence of superscriptions in 2:1 and 13:1; these may well have pointed to the presence of earlier collections of prophetic pronouncements.

Although Isaiah may be regarded properly as an anthology, it must not be imagined that the book is a rather arbitrary selection of discourses compiled haphazardly. That the work received its extant form from the specific application of a special type of literary structure familiar to the ancient Near Eastern peoples will be made evident below. For the moment it should be noted that the extant composition manifests a certain degree of chronological order as it stands. In chs. 1–39, the utterances in chs. 2–5 seem to have emerged from the earliest stages of Isaiah's ministry, while 7:1–9:7 probably came from a period about 734 B.C., during the Syro-Ephraimite conflict. While some doubt remains, it may well be that chs. 18–20 were the product of the period between 715 and 711 B.C. The historical material of chs. 36–39, which varies only slightly from 2 K. 18:13–20:19, has been held to be later than Isaiah since it mentioned Sennacherib's death (681 B.C.). This would be later than Isaiah unless he survived to the early years of Manasseh (687/6-642/1 B.C.), as Jewish tradition has long maintained. It may be that this historical material was arranged by the disciples of Isaiah after his death. It is exceedingly difficult, however, to maintain as liberal scholars have done that chs. 36–39, in which Isaiah himself played such an important part, were in fact extraneous and specifically non-Isaianic in origin. There seem to be good grounds for thinking that this material comprised an Isaiah source upon which the compiler of Kings drew. The existence of a separate Isaianic source dealing with the life of Hezekiah appears to be indicated by 2 Ch. 32:32, which suggests that the excerpt from the Book of the Kings of Israel and Judah might have been taken from the vision of Isaiah. Furthermore, that the song of Hezekiah (Isa. 39:9-20) occurred in the prophecy but not in the section in Kings indicates that the editor of the latter apparently thought the material unsuitable for his purposes. That the preservation of strict chronological sequences was not the overriding concern of the author is plain from Isa. 9:8-21, which may well comprise the earliest pronouncements of Isaiah. Again, the utterances concerning Damascus (17:1-14) may be dated somewhat before 735 B.C., a period that is probably very close to the events narrated in ch. 7.

Evidence of some sort of chronological arrangement appears in chs. 40–55, which predict the return from Exile and the time of restoration of national life. These include sections dealing with the work of Cyrus (41–45), predictions concerning the downfall of Babylon (46–47), and utterances describing the glories of the new Jerusalem (49–54). Nor should one ignore the suggestion that the compiler(s) arranged the material of chs. 56–66 in a way that presented in alternate form prophecies whose standpoints were preexilic (56:1–57:12; 59:1–60:22; 62:1–63:19; 65:1-25) and exilic (58:1-14; 61:1-11; 64:1-12; 66:1-14), with 57:14-21 and 66:15-24 perhaps comprising fragments of such oracles.

Another suggestion regarding the manner in which the

The great Isaiah Scroll from Qumrân (1QIsa[a]) open to 2:21–3:22 (Israel Museum)

Isaianic anthology was compiled relates to the arrangement of material according to subject matter. Some scholars have seen the opening chapters (1–35) as a series of oracles emerging from Isaiah's contemporary situation, followed by a section of historical material (36–39). The next group of utterances (40–55) presupposed the Exile in Babylon, as some earlier references had done, while the remainder of the extant prophecy (56–66) comprised a diverse group of oracles that picked up themes already prominent in earlier chapters. The presence of three superscriptions in the prophecy (1:1; 2:1; 13:1) was seen as perhaps representing three separate written compilations by Isaiah, upon which the editor(s) drew subsequently. Although an approach of this sort partially explains the parallelism between different portions of the book, it does so from a purely occidental standpoint, and therefore does not offer a satisfactory explanation of the mechanics involved in the compilation of the prophecy. Quite clearly, then, the questions associated with the way in which the anthology reached its present form are much more involved than has been imagined by anyone, whether liberal or conservative, who has been approaching this piece of oriental literature on the basis of occidental theoretical presuppositions.

E. Evidence from Qumrân. A new approach to the problem of the authorship and compilation of Isaiah became possible as the result of the recovery from Qumrân of the celebrated Dead Sea Scrolls. From Cave 1 came a complete copy of the book of Isaiah, known to scholars as 1QIsa[a]. Surprisingly well preserved, it comprised fifty-four columns of clearly written Hebrew script inscribed on seventeen sheets of leather that had been stitched end to end. When unrolled it measured about 7.3 m. (24 ft.) in length, and was approximately 30 cm. (1 ft.) in width. The text averaged twenty-nine lines to each column, and instead of being set out in chapter-and-verse form, as in

the more modern style, it was divided up into clearly marked sections and paragraphs. Although the scroll had obviously been used a great deal in antiquity, the manuscript had only ten lacunae and about one dozen small holes, a circumstance that made restoration of the text a comparatively easy matter. Copyists' errors were evident in the text, as were the corrections of such mistakes, and the work of several different hands is apparent in a few instances in the manuscript. Aside from differences in orthography and the use of certain consonants as vowel letters, the text of Isaiah in 1QIsa[a] was identical with that in the much later editions of the MT.

When the scholarly world learned of the existence of an ancient Isaiah scroll among the Qumrân writings, many hoped that at long last it would be possible to say something of a positive nature about the number of Isaiahs who were responsible for the extant prophecy. A photographic edition of the scroll showed that no gap occurred between the end of ch. 39 and the beginning of ch. 40, as is the case in some modern translations of the prophecy. Since ch. 40 began on the bottom line of a column, it would have been very easy for a copyist to have followed a division in the Hebrew text if such had actually existed in the manuscript from which he was working. But it was noticed that a break in the text occurred at the end of ch. 33, where a space of three lines occurred before the commencement of ch. 34. If at that stage of investigation the scholars attributed any significance to this phenomenon, it was merely to suggest that the change of authorship occurred some six chapters earlier than the literary analysts had supposed. Indeed, at least one nineteenth-century scholar, W. Robertson Smith (*Prophets of Israel* [1895], p. 355) had actually raised that possibility, but had been ignored by those who were acclaiming an "unknown prophet of the exile" as the author of at least some of the material from ch. 40 onward.

Paul Kahle (*Die Hebraïschen Handschriften aus der Höhle* [1951], pp. 72f.) was the first to comment on the incidence of a gap in the text after ch. 33; he claimed that it substantiated C. C. Torrey's notion that chs. 34 and 35, along with chs. 40–66, belonged to the activities of a Deutero-Isaiah. Unfortunately this observation afforded no explanation whatever of the reason why chs. 36–39 came to form part of the work of this Second Isaiah. The matter remained unresolved until W. H. Brownlee published a treatise (*Meaning of the Qumrân Scrolls for the Bible* [1964]) that for the first time attempted to visualize the composition of the book from the standpoint of an ancient Near Eastern, rather than an occidental, author. Brownlee noted that in antiquity it was not unusual for books to be produced in two parts (cf. H. St. John Thackeray, *Septuagint and Jewish Worship* [1923], pp. 130ff.), perhaps for convenience in handling bulky writings. Furthermore, there are good reasons for believing that literary works of high quality were often planned with a natural division in the middle of the composition. Josephus obviously attributed this sort of activity to certain of the Hebrew literary prophets in observing that Ezekiel, Daniel, and Isaiah had left their writings behind in "books" (*Ant.* x.5.1; x.2.2; x.11.7). The plural form would thus describe quite properly a work produced in two halves, or in bifid form, to use a more modern term. In the extant Isaiah, such a structure would encompass two sections of thirty-three chapters each, and thus it is now possible, as Brownlee has shown, to regard the break in the text of 1QIsa[a] that occurs at the end of ch. 33 as indicating that the ancient practice of bisecting an important literary work was being followed. For Brownlee, the extant prophecy comprised the outcome of effort by an Isaianic school, whose major achievement was the publication in two volumes of the utterances of the master.

Brownlee analyzed the structure and contents of the prophecy to show the way in which chs. 1–33 were parallel to chs. 34–66. The results can be set out in tabular form as follows:

Subject	1–33	34–66
Ruin and Restoration	1–5	34–35
Biographical Material	6–8	36–40
Agents of Divine Blessing and Judgment	9–12	41–45
Oracles Against Foreign Powers	13–23	46–48
Universal Redemption and the Deliverance of Israel	24–27	49–55
Ethical Sermons	28–31	56–59
Restoration of the Nation	32–33	60–66

This arrangement for Brownlee was not so much an analysis of the literary units from which the book was derived as a way of viewing the complete composition from the standpoint of the original editors, whose primary interest was in literary balance and parallelism, not in literary origins.

Such an analysis constitutes the best attempt on the part of liberal scholarship to come to grips with the book's real problems, which involve method rather than history or theology. Literary criticism in the past has been far too subjective and speculative in nature, and has failed to face the implications of objective data. The grave methodological weakness of past literary criticism was that it examined oriental literature from an occidental point of view, an error that was compounded by the application of an overriding a priori approach. Modern literary research will have to reexamine the problems upon which the nineteenth-century scholars pronounced with such authority and finality, using all of the pertinent data and applying a scientific, a posteriori method of investigation in order to interpret correctly the significance of the material under consideration. In the case of Isaiah, the evidence relating to the structure of the prophecy as furnished by 1QIsa[a] indicates clearly that the extant canonical work was one of the most elaborate and artistically constructed anthologies ever to have emerged from the ancient Near East. Brownlee is correct in stating that it was written as a two-volume work, and on closer examination it can be actually seen to have been linked in series in the typical Mesopotamian scribal fashion by means of the ancient Sumerian literary figure known as *merismus*. This device, already described above, involved the use of antonymic pairs to denote totality, and in the case of Isaiah such pairs were used to comprise markers at the beginning of volumes one and two. They occur in 1:2 ("O heavens . . . O earth"), introducing the first section of the scroll, and again in 34:1 ("O nations . . . O peoples . . . the earth . . . the world"), which introduces the second section of the two-part composition.

With this kind of notation there can be no possible doubt that the balance of sections and themes as outlined by Brownlee was deliberate rather than accidental. The prophecy obviously was assembled in bifid form so that each half could circulate independently if necessary, and owing to the size of the composition there can be little question but that this would have actually taken place. It is equally clear that this arrangement was carefully planned, claimed a high degree of literary and functional artistry, and was constructed in full accord with certain accepted compilatory techniques familiar to the scribes of antiquity. All of this the large Qumrân Isaiah scroll has now

made evident. Whatever may have been the history of independent circulation of the two units forming the extant Isaiah, the prophecy had evidently been known as a unity long before the copyists of the Qumrân settlement commenced their labors.

F. Composition and Date of Isaiah. On the basis of the foregoing information it is possible to make a new and responsible approach to the problems involving the compilation and date of the prophecy. Taking the latter first, the cumulative evidence from Qumrân demands a much closer look at the tradition of eighth-century-B.C. authorship for Isaiah. The Qumrân fellowship is now known to have originated as a schismatic group during or perhaps a little prior to the Maccabean period. All of its scriptural manuscripts were copies, and not originals; thus it is obvious that none of them could have originated in the Maccabean period, since an adequate amount of time would not have elapsed between the original autograph and the general acceptance of the composition as canonical scripture. One criterion for canonical status of material in the second and third divisions of the Hebrew canon was a comparison with the ethos of the Mosaic Law. Because of the need for manuscripts to circulate among both the religious authorities and the devout, a certain interval of time between the compilation of potentially canonical material and its final recognition as such was obviously inevitable, even if that same material, or something approximating it, had already been proclaimed orally.

If Burrows and others were correct in dating 1QIsa^a *ca.* 100 B.C. (cf. M. Burrows, *Dead Sea Scrolls* [1955], p. 118), it is clear that the extant prophecy was in its final form at least by the beginning of the 2nd cent. B.C. That it evidently came from a considerably earlier period was made plain by Burrows: "The book of Isaiah certainly comes from a time several centuries before the earliest date to which this manuscript can be assigned on any grounds" (Burrows, p. 109). How early, then, was the original bifid Isaiah set? Here again the Qumrân manuscripts throw important light on the situation. From Cave 4 a fragmentary copy of the Psalter (4QPsa^a) dated to the 2nd cent. B.C. showed incontrovertibly that the collection of canonical Psalms had already been fixed by the time of the Maccabees (F. M. Cross, *Ancient Library of Qumran and Modern Biblical Studies* [1961], p. 165). This evidence alone has persuaded scholars to abandon the once popular concept of "Maccabean psalms" and instead to date the latest canonical psalms, not in the Greek period (331-65 B.C.), but in the even earlier Persian period (539-331 B.C.). The evidence from this fragmentary copy of the Psalter thus indicates that no part of the canonical OT was put in written form later than 330 B.C., and in the case of Isaiah it would seem to advance the date of composition to the middle of the Persian period at the latest.

This factual evidence immediately challenges the critical theories concerning the authorship of the prophecy. For one thing, it repudiates unequivocally the view of Volz (*Jesaja* [1932], II, 200) that chs. 65–66 were written after 331 B.C. For another, it demonstrates the fallacy of the view of Kennett and others that the concept of the Suffering Servant arose as the result of the persecution of pious Jews under Antiochus IV Epiphanes (R. H. Kennett, *Composition of the Book of Isaiah* [1909], p. 85; *OT Essays* [1928], p. 146). In the same way, Duhm's theory (*Das Buch Jesaia* [1892], pp. 9f.) that chs. 24–27 belonged to the time of John Hyrcanus is shown to be untenable, as is any suggestion of a Third Isaiah or additional Isaiahs, credited from time to time with having had a hand in writing parts of chs. 50–66 (cf. J. L. McKenzie, *Second Isaiah* [*AB*, 1968], pp. lxvii-lxxi). Suppositions of this kind are entirely a product of critical speculation, without factual basis, as the evidence from Qumrân now makes clear.

Although the theory of a Trito-Isaiah can now be dismissed without further consideration, that which involved the so-called Second Isaiah must be refuted on somewhat different grounds. Almost all liberal scholars regarded the assumption of the existence of a Second Isaiah as constituting "one of the most assured results of modern literary criticism." But liberal scholars have never demonstrated the existence of this unknown prophet of the exile, and it would appear from a perusal of writings in this area that no demonstration seems to be thought necessary by proponents of the Second Isaiah theory, since to mention the unknown prophet is to preclude automatically any further need to prove his alleged existence. Liberal orthodoxy in this matter has permeated even the otherwise admirable researches of Brownlee, as noted above, where he supposed that the exilic prophet had arisen from the group of Isaiah's disciples credited with having produced the Isaianic anthology.

This concept of an alleged exilic Second Isaiah is by far the weakest point in Brownlee's argument, and obviously vitiates some of his conclusions. As in other instances, it was not examined critically by the author because it was a fundamentally important element of orthodox theory, inadequate though it may be. Taken at face value, the assertion that a Second Isaiah was active during the exilic period has important implications for history as well as literature and spirituality. It could be held to indicate that up to 150 years after the death of the master, members of an Isaianic school were busily perpetuating the traditions of the prophet in what can only be described as a theological vacuum. A vacuum indeed, because the work of Isaiah had long given place to the lengthy and immensely significant ministry of Jeremiah and its theology of calamity, and this in turn had been followed by the tribulations of captivity in Babylonia and the ministry of Ezekiel as prophet, priest, and pastor to the exiled Jewish community. In addition there was the work of Daniel as a Jewish statesman in a heathen court, setting for the Neo-Babylonian regime a model of Hebrew piety and gaining such stature by his spiritual deportment and wisdom as to succeed ultimately to membership in a triad that governed the kingdom. Yet the work of the supposed school shows no recognition whatever of the work or thought of Jeremiah, the witness and teachings of Ezekiel, whose activities marked a decisive turning point in Hebrew religious life, or the life and example of Daniel, the gifted Hebrew seer and saint.

Despite the fact that chs. 40–66 afford no basis for thinking that they were composed in Babylonia, those who have postulated the existence of the so-called school have placed this group of Isaianic supporters in Babylonia itself, where, if sheer historical circumstances have any meaning at all for the situation, they could not have failed to come into contact with other Judean exiles and their outstanding leaders. Nor could they possibly have avoided reflecting (to some extent at least) the teachings and traditions of Jeremiah and Ezekiel as fostered by the deported Judeans. Furthermore, the assertions concerning the existence of Deutero-Isaiah would have the credulous reader believe that the Palestinian Isaianic tradition received a new lease of quite independent life in Babylonia during the time of the Exile as the result of the work of this unknown prophet, who added to the already existing compositions of the deceased master in language that for beauty of expression and literary elegance has seldom been surpassed; but that this work bore almost no relationship to the crucial theological issues of the day as

expressed particularly in the writings of Ezekiel. Had this unknown prophet actually had any existence other than in the fervid imaginations of nineteenth-century European scholars, and had he in fact been teaching and writing during the Exile, he would hardly have reflected a preexilic Palestinian background such as occurs in chs. 40–55, but would instead have been in accord with Ezekiel and Daniel in depicting contemporary Mesopotamian environmental, social, moral, and religious conditions. A careful reading of chs. 40–55 reveals only the most general allusions to the coming Exile, and nothing whatever pertaining to the details of life as it was ultimately experienced by the deported Judeans at *Til Abūbi,* probably located near Nippur.

Perhaps the most important repudiation of the fallacy entertained by postulating the existence of a so-called Second Isaiah is to be seen in the ignorance that he exhibited in the matter of the theological continuity between Jeremiah and Ezekiel with respect to the new covenant. Jeremiah (31:31-34) had predicted a time when the older corporate concept of covenantal relationship would be replaced by an individual one. Ezekiel went further (18:1-24) and emphasized that the individual in his dealings with God would have to bear personal responsibility for his own wrongdoings. By contrast, the postulated unknown prophet of the Exile knew nothing of the new covenant and its spiritual implications. On two occasions where the concept of covenant was introduced (Isa. 42:6; 49:8), it was related to the work of the Servant as a "covenant of the people," while Isa. 54:10 referred to it in a general manner as "my peaceful covenant" and embraced ideas of divine compassion. So formidable is this particular objection to the liberal supposition of a Second Isaiah that it has almost invariably tended to be evaded, and to date no liberal scholar has even begun to resolve the problem posed by the relationship of the historical ministry and writings of Ezekiel to that of the wholly hypothetical Deutero-Isaiah. This failure is hardly surprising in the light of a passage such as Ezk. 2:5, which suggests that there was no other prophet living in the community who was issuing the same warnings as Ezekiel. Again, in Ezk. 22:30, God was represented as telling the prophet that He had looked for a man to fill the breach, but that He had found no one. This situation would not have existed had the celebrated unknown prophet of the Exile been living and ministering in the Judean community of exiles at the time of Ezekiel, and by his utterances and example bringing his dejected hearers out of despair to new heights of creative spirituality, as is popularly supposed to have happened by those who for so long have been advocating the existence of a Second Isaiah. Surely under such conditions a man of his outstanding gifts would have been ideally suited for whatever ministry God had for him to perform on behalf of the dispirited exiles.

The evidence furnished by the book of Ezekiel, however, knows nothing of an unknown prophet of the Exile. Any ministering that was undertaken to the exiled community was the sole responsibility of Ezekiel, since Daniel was functioning at an entirely different level in Babylonian affairs; also there is no doubt that Ezekiel was a genuine historical figure, as opposed to the imaginary Deutero-Isaiah. It would be without parallel in Hebrew history for one of the greatest, if not the greatest of the Hebrew prophets, to lavish on his contemporaries, at a time when they were experiencing one of the most serious spiritual crises of their history, some of the most exalted language and lofty spirituality in the whole of divine revelation, and having done all this to pass so completely from Hebrew tradition that not even his name managed to survive. It is even more incredible to suppose that his incomparable literary work could ever have become a mere appendix to that of a much inferior and less renowned Palestinian prophet, however much the latter might have commended himself to the former, and that for two millennia his writings should have been uniformly regarded by Jewish tradition as comprising the work of this inferior prophet. Liberal scholarship has yet to establish the degree of probability by which sections of literature emerging from a later period should have become intermingled with the writings of Isaiah ben Amoz by an inexperienced or incompetent editor in such a way that it has become virtually impossible for anyone to extract the work of the eighth-century B.C. prophet and arrange it in something like chronological order. Were any further objection needed, it can only be regarded as totally incredible that the Jews, with their almost superstitious veneration of sacred Scripture, could ever have permitted it to be mutilated in such a manner.

If this supposedly unknown individual is to be regarded as anything other than an imaginative creation of nineteenth-century critical scholarship, it will be mandatory for his place in the history of Hebrew thought and religious institutions to be established firmly. As noted above, however, he was evidently totally unknown to both Ezekiel and Daniel, despite the outstanding talents and abilities credited to him. In the postexilic period, neither his name nor his teachings seem to have exerted the slightest influence over Haggai and Zechariah on the one hand, or over Ezra and Nehemiah on the other. By contrast, however, it is known that the thought of Ezekiel exercised a profound effect upon both temple and synagogue worship in the postexilic theocracy. In the same way it was the wholehearted application of the law of Moses, not the teachings of an unknown prophet of the Exile, that furnished Judaism with its characteristic stamp of legalism. The preoccupations of Deutero-Isaiah with the kind of idolatry typical of preexilic Canaan would have been as out of place in Babylonia, where the conditions for indulgence in Canaanite religious rites simply did not exist, as they would have been in the postexilic theocracy, if only because the Exile had made Canaanite Baal worship a completely dead issue.

That the Jews of the exilic or postexilic periods never had a tradition of a Second Isaiah or a Third Isaiah makes the supposition of his (or their) existence not merely hypothetical but extremely suspect. On purely objective grounds no evidence supports the contention of liberal scholars that there was more than one author of the extant prophecy. As with the Pentateuch, the liberal studies of the book of Isaiah are littered with undemonstrated assumptions, tendentious arguments, and unwarranted conclusions for which there is no factual evidence, and this despite the confidence with which they were promulgated. It is because such research was so far removed from accredited scientific method that it will need to be undertaken afresh, this time against a background of a posteriori scientific method and the full use of all objective data, before credible conclusions can be reached.

On the basis of the foregoing survey of hypotheses concerning the authorship of Isaiah, the present writer can only reject in all honesty any hypothesis adduced in favor of establishing the existence of a Second or Third Isaiah on the ground that such a hypothesis has been shown to be totally lacking in anything that the modern scientific approach would recognize as evidence. It seems difficult to avoid the further conclusion that Second and Third Isaiahs constitute some of the most successful myths ever foisted upon a gullible scholarly world by nineteenth-

century liberal thinkers. In view of the data presented by 1QIsa[a], it appears that the prophecy was the work of the one attributive author, Isaiah ben Amoz, with some possibility of assistance from his disciples. It seems to have been compiled as an anthology of this Isaiah's writings, and may well have been circulated in bifid form from the very beginning of its literary history. Its sophisticated and artistic structure would make it highly probable that the master prophet himself played a large part in shaping the final form of the work. In that event it appears likely that the prophecy was closely approaching its extant state within fifty years after the death of the prophet, and thus may be assigned with reasonable confidence to a date *ca.* 630 B.C.

G. Servant Oracles. Few subjects have evoked more discussion in OT theology than the problems raised by the passages relating to the work of the Servant of the Lord. As already noted, the servant passages have generally been held to comprise, as a minimum, 42:1-4; 49:1-6; 50:4-9 or 50:1-11; and 52:13–53:12. For the first three centuries of its existence the Church identified the Servant with the righteous, sometimes on an individual basis but at other times on a collective basis. This was then replaced by a general messianic interpretation, which lasted until the 19th century. For liberal scholars such as Semler, Koppe, and Eichhorn, the messiah was no longer to be regarded as a scion of the house of David, but rather as a picture of the entire nation of Israel. Under Vatke and Ewald this view was basic to the expectation that the spiritual Israel would somehow be the means of restoring the moribund physical Israel. Though others such as Cheyne, A. B. Davidson, and S. R. Driver took up this view with enthusiasm, they failed to show how an ideal Israel could suffer and die vicariously or representatively in order to redeem the actual nation. A variation of this theory envisaged the Servant as the faithful minority within the larger corpus of unrepentant Israel. This involved one portion of the nation dying to atone for and redeem the rest of the people, but the theory simply did not match the known historical facts when it was transferred to the exilic situation as depicted in Ezekiel and Daniel. Other equally unsuccessful attempts to identify the Servant related him in some way to the prophetic order, or to some specific individual such as Hezekiah, Isaiah, or Jeremiah. Delitzsch (p. 236) suggested that at its lowest level the servant concept was rooted in the entire nation of Israel. In a more developed form it was concerned with a spiritual rather than with a physical Israel, and at the highest level it represented the personage of the Redeemer-Messiah.

The view that the Servant was in fact Second Isaiah was advanced by S. Mowinckel (*Der Knecht Jahwäs* [1921]) as a reaction against the collective interpretation favored by many liberal scholars. He held that in material contiguous to the oracles, the Servant was the actual nation, whereas in the oracles themselves the missionary vocation of the Servant indicated his individuality. This theory ran into trouble in connection with the fourth oracle (52:13–53:12), to say nothing of all the problems associated with the assumption that there actually was such a person as the unknown prophet of the Exile, as noted above. Mowinckel subsequently modified his position (cf. *He That Cometh* [1956], pp. 228f.) by stating that the Servant had been killed before the completion of the oracles, which had been assembled by the disciples of Deutero-Isaiah (*ZAW*, 49 [1931], 87ff., 242ff.).

Another Scandinavian scholar, Nyberg, thought of the Servant as a supra-individual personage belonging alike to the past, present, and future (*Svensk Exegetisk Årsbok*, 7 [1942], pp. 5ff.). Not merely did this concept thus enshrine the best of all possible worlds, but it also drew upon religious and mythological elements from other beliefs. This latter element reflected to some extent the mythological view of the Servant espoused by Gressmann and Gunkel (cf. H. Gressmann, *Der Ursprung der israelitisch-jüdischen Eschatologie* [1905]; H. Gunkel, *RGG* [1912], III, cols. 1540ff.), a theory which encountered lasting difficulties because of its inability to demonstrate a positive link between the nature myths and the biblical sources.

The problems that scholars had to confront are immediately evident upon reading the oracles themselves. The personage of the Servant and the scope of his work make possible the simultaneous recognition of individual, collective, actual, and ideal elements. If a purely collective interpretation is advanced, it immediately faces the fact that the Servant of Isaiah is very different in character from Israel as depicted in the OT. Since the description of the Servant was most probably never intended to be the portrait of any specific individual, attempted identifications with known historical figures such as Uzziah, Jeremiah, or Cyrus can only be regarded as highly speculative at the best. The same conclusion must be leveled against the kind of messianic interpretation that saw the Servant in the role of some preexilic king who was thought to have undergone certain ritual punishments as part of an annual "enthronement liturgy." Redemption and atonement ceremonies were matters for the priests, not the preexilic kings, and in any event there is absolutely no factual evidence produced to date that could be cited in support of an annual enthronement ceremony in Israel such as was represented by the Babylonian *akîtu* rituals.

Certain scholars have felt that those who were satisfied with the classical liberal delineation of the servant oracles took a rather restricted view of the available textual material. Thus Brownlee (pp. 193ff.) suggested that additional servant songs can be found in Isa. 51:4-6, or perhaps 1-8; 61:1ff., and 62:10-12. Similarly, Harrison (*Intro. to the OT* [1969], p. 797) has pointed out that, probably because of liberal preoccupations with theories of divided authorship, a prose oracle in the earlier chapters has been overlooked completely. Occurring in 22:20-25, it described the function of the divine servant, whose name was given as Eliakim, son of Hilkiah. He would have authority over Jerusalem and the house of Judah, but ultimately he would be removed from office and his powers would disappear. This oracle is of some interest historically because archeologists have found both at Tell Beit Mirsim and Beth-shemesh three stamped jar handles of the 6th cent. B.C. inscribed, "belonging to Eliakim, attendant of Yaukin [Jehoiachin]" (cf. 2 K. 18:18, 26, 37 par. Isa. 36:3, 11, 22; cf. also 37:2).

Of the various identifications proposed for the Servant, the one that seems to suit all the data most adequately is the traditional messianic approach. In its overall construction the picture of the divine Servant is sufficiently fluid to admit of differences between the Servant and Christ the Messiah. It needs to be remembered that the Servant is not the only messianic figure in Isaiah, but this impression has been conveyed by an entirely unwarranted and arbitrary dissection of the prophecy into portions alleged by the literary critics to have come from widely separated historical periods. It is extremely difficult to believe that Isaiah was not aware, at least in part, of the historical and spiritual significance of the servant oracles, even though his eighth-century-B.C. contemporaries may have been so immersed in pagan ways as to have remained completely indifferent to any meaning, eschatological or otherwise, that the material may have had. Certainly there were those in the time of Christ who were unable to interpret such

passages in terms of His status as Messiah. C. R. North is undoubtedly correct in stating that, regardless of the original of the Servant, Christ alone furnished its fulfillment (*IDB*, IV, 294).

H. Cyrus. The appearance of this renowned Persian ruler's name in Isa. 44:28 and 45:1 has supplied many liberal scholars with what they regarded as valid reason for attributing chs. 40–55 to the exilic period and a specific Babylonian background. The problems posed by the incidence of the name of Cyrus (539-530 B.C.) have been met by conservative scholars in three principal ways. The first has been to reject the liberal view of an exilic date for the material as being based on a disregard for a genuinely predictive element in OT prophecy, and to assert that, in any event, Cyrus was represented by Isaiah as the subject of prediction. This latter element of the argument, which obviously would preclude anything later than an early exilic date was even accepted by some liberal scholars, e.g., G. A. Smith (*HDB*, II, 493). The second approach to the problem, adopted by some modern conservative scholars such as Allis (*Unity of Isaiah* [1950], pp. 51ff.) and Young (*Intro. to the OT* [2nd ed. 1960], pp. 237f.), has been to see the references as comprising prophetic previsions of the work of Cyrus that occurred 150 years later. Allis accepted somewhat uncritically the view of Josephus (*Ant.* xi.1.1) that Cyrus, having read of his destiny in Isaiah, made serious attempts to fulfil all that had been written about him. Young and Allis, however, insisted upon the predictive element in OT prophecy, and thus saw Cyrus as the subject of foretelling by Isaiah.

A third way of viewing the references to Cyrus has been to see them as explanatory glosses, inserted by a post-exilic copyist who may well have felt that Cyrus was discharging the functions of the Servant about whom Isaiah had spoken. The references in 44:28 and 45:1 are actually the only places in the prophecy where Cyrus was mentioned by name, and if the word *l^e^ḵôreš* ("of Cyrus") is removed from the Hebrew text, it not only makes for greater smoothness in the verses involved, but focuses attention upon Jerusalem and gives promise of future restoration and glory, in consonance with other sections of chs. 40–66. C. C. Torrey (*Second Isaiah: A New Interpretation* [1928], pp. vii-viii) was one of the first scholars to recognize the possibility that the references to Cyrus were later glosses by maintaining that if the few direct and indirect allusions to him could be eliminated, almost all of chs. 40–66 could be relegated to a Palestinian origin. The suggestion that *l^e^ḵôreš* has been miscopied from *ḥôreš*, "workman," is improbable, if only as a totally inadequate description of the "anointed one" of 45:1.

Bibliography.—*Commentaries:* Among the early church fathers, Eusebius, Basil the Great, Chrysostom, Theodoret, Procopius of Gaza, Ephraim Syrus, and Jerome wrote comments on parts or the whole of the prophecy. Among the Jewish expositors Ibn Ezra, David Kimchi, Abarbanel, and the Tanchum Jerushalmi should be noted. Of the Reformers see comms. by both Luther and Calvin. The work of Campegius Vitringa (1732) is particularly valuable. Among the later commentaries on the entire prophecy may be mentioned E. F. Rosenmüller's *Scholia* (1826); Wilhelm Gesenius' *Jesaja* (1821); J. A. Alexander (1865); Moritz Drechsler (1845), completed by Hahn and Delitzsch; S. D. Luzzatto (1855); Franz Delitzsch (repr. 1949); G. A. Smith (1888-90); Bernhard Duhm (1892); A. Dillmann (rev. ed. 1898); G. H. Box (1908); J. Ridderbos (1922); F. Feldmann (1925-26); J. Fischer (1939); E. J. Kissane (1941-43); A. Bentzen (1944); A. Penna (1958); I. W. Slotki (*Soncino*, 1959); E. J. Young (1961); V. Buksbazen (1971-74).

Commentaries on Chs. 1–39: G. B. Gray (*ICC*, 1912); O. Procksch (*KAT*, 1930); R. B. Y. Scott (*IB*, 1956); J. Mauchline (1962); A. S. Herbert (1973); O. Kaiser (*OTL*, 1973).

Commentaries on Chs. 40–55 or 40–66: R. Levy (1925); C. C. Torrey (1928); P. Volz (1932); J. Muilenburg (*IB*, 1956); C. R. North (1964); J. L. McKenzie (*AB*, 1968); C. Westermann (*OTL*, 1969).

G. L. ROBINSON
R. K. HARRISON

ISAIAH, ASCENSION OF. *See* APOCRYPHAL APOCALYPSES II.A.

ISCAH iz'kə, is'kə [Heb. *yiskâ*]. Daughter of Haran and sister of Milcah the wife of Nahor (Gen. 11:29). Tradition identifies her with Sarai, Abram's wife, but without sufficient reason.

ISCARIOT. *See* JUDAS ISCARIOT.

ISDAEL iz'dā-əl [Gk. *Isdaēl*]. *See* GIDDEL.

ISH [Heb. *'îš*]. In the following Hebrew proper names, a prefix meaning "man of," or, collectively, "men of"; Ish-bosheth, Ishhod, etc. *See also* JUDAS ISCARIOT.

ISHBAAL ish'bā-əl. *See* ISH-BOSHETH.

ISHBAH ish'bə [Heb. *yišbaḥ*]. A member of the tribe of Judah, father of Eshtemoa (1 Ch. 4:17).

ISHBAK ish'bak [Heb. *yišbāq*]. A name in the list of sons of Abraham by Keturah (Gen. 25:2; 1 Ch. 1:32). Cf. the personal name Shobek in Neh. 10:24 (MT 25).

ISHBI-BENOB ish-bī-bē'nob [Heb. *yišbî b^e^nōḇ*]. A descendant of the giants of Gath who sought to take advantage of David's weariness and kill him (2 S. 21:15-22). However, Ishbi-benob was killed by Abishai, and David's life was saved. There is some problem with the text, and the name can be pointed to read "they dwelt in Nob." Hence v. 15 could have ended with a note about where the exhausted David stayed. Perhaps Nob is a miscopying for "Gob," as in v. 19, but this is uncertain. If the above emendation is adopted, the name of the giant (NEB "Benob") would disappear.

ISH-BOSHETH ish-bō'sheth [Heb. *'îš-bōšeṯ*–'man of shame'; Gk. *Iebosthe*]. Called *'ešba'al*–'man of Baal' (1 Ch. 8:33). The original form of the name seems to have been Ishbaal, but because of the reluctance of the post-seventh-century-B.C. Hebrews to use the name Baal, the form Ish-bosheth was substituted. The reflection of "shame" was as much on the name itself as on the licentious rites of Baal worship.

Ish-bosheth was one of the sons of Saul (1 Ch. 8:33; 9:39) who, when his father and brothers were slain in the battle of Gilboa (1 S. 31:1-6), was proclaimed king over Israel by Abner, the captain of Saul's host, at Mahanaim (2 S. 2:8-10). Ish-bosheth was forty years old at this time and reigned over Israel two years (2 S. 2:10). Judah, however, proclaimed David its king. The consequence was war (2 S. 2:12ff.). The house of David prevailed against the house of Saul (2 S. 3:1), but the war did not come to a close until Abner, angry on account of the rebuke he suffered from Ish-bosheth for unlawful intimacy with Saul's concubine Rizpah, joined David (2 S. 3:6ff.). David's condition, that Michal his wife be returned to him before peace could be made, was fulfilled by Ish-bosheth (2 S. 3:14-16); but it was not until after Abner's death that Ish-bosheth seems to have given up hopes of retaining his power (2 S. 4:1). The shameful murder of Ish-bosheth by his own captains is recorded in 2 S. 4:5-7. David punished the murderers, who had expected reward, and buried Ish-bosheth in the grave of Abner at Hebron (2 S. 4:12).

A. L. BRESLICH

ISHHOD ish'hod [Heb. *'îš^{e}hôḏ*–'vitality']. A man of the tribe of Manasseh (1 Ch. 7:18; AV ISHOD).

ISHI ish'ī, ish'ē [Heb. *yiš^{e}î*–'salutary'].

1. A Jerahmeelite (1 Ch. 2:31); the genealogy may denote his membership by blood, or only by adoption, in the tribe of Judah.

2. A Judahite (1 Ch. 4:20).

3. A Simeonite, whose sons led five hundred of their tribe against the Amalekites in Mt. Seir (1 Ch. 4:42).

4. One of the chiefs of Manasseh E of the Jordan (1 Ch. 5:24).

ISHI ish'ī, ish'ē [Heb. *'îšî*–'my husband']. The name symbolic of Yahweh's relation to Israel which Hosea (2:16) declares shall be used when Heb. *Baali*, "my lord," has become hateful on account of its associations with the worship of the Baals.

ISHIAH i-shī'yə. *See* ISSHIAH.

ISHIJAH i-shī'jə. *See* ISSHIJAH.

ISHMA ish'mə [Heb. *yišmā'*–'may God listen']. A brother of Jezreel and Idbash (1 Ch. 4:3).

ISHMAEL ish'mā-əl [Heb. *yišmā'ē'l*–'may God hear,' 'God hears,' 'God will hear'; Gk. *Ismaēl*].

1. The son of Abraham by Hagar, Sarah's Egyptian servant; thus Isaac's older half brother (Gen. 25:12).

The circumstances connected with his birth, once thought bizarre, have been clarified by Middle Bronze Age discoveries in Mesopotamia. In ancient Sumer and such Babylonian cultures as Mari and Nuzi, the primary purpose of marriage was procreation rather than companionship. Marriage was by contract, which often obliged a wife who subsequently proved to be infertile to supply her husband with a concubine through whom he could obtain an heir. One clause of such a marriage tablet states, "If Gilimninu (the bride) will not bear children, Gilimninu shall procure a woman of N/Lullu-land (the source of choice slaves) as a wife for Shennima (the bridegroom)." The wife's position in the household was safeguarded by making it clear that the concubine was inferior to her in status. At Nuzi, it was illegal to expel either the concubine or her offspring, since survival was impossible outside a family community. In the light of this situation, the provision in the ancient Sumerian law code of Lipit-Ishtar (*ca.* 1850 B.C.) that the freedom received by the dispossessed slave was adequate recompense for the act of expulsion is a masterpiece of ancient casuistry.

In view of these discoveries it is clear that the childless Sarah was obliged to give her Egyptian slave to Abraham in order to provide an heir (Gen. 16:2). The pregnant Hagar behaved indiscreetly by looking "with contempt on her mistress" (16:4), so infuriating the already very frustrated Sarah that she abused Hagar, whereupon Hagar fled to a wilderness oasis on the way to Shur. A divine messenger instructed her to return and submit to her mistress's demands. In return, Hagar's descendants through Ishmael would be without number (16:10) and Ishmael himself would be a "wild ass of a man" (16:12). Although this description seems to connote a revolutionary and a fugitive, it was actually highly complimentary, since in the Middle Bronze Age the wild ass of the steppes was the preferred animal of the chase, and anyone who could catch and kill one was a hunter of obvious prowess.

The child was born when Abraham was eighty-six years old (17:24f.) and at the age of thirteen Ishmael was circumcised in accordance with the divine command received by Abraham: "Every male among you shall be circumcised" (17:10). The adolescent Ishmael thus became party to the covenant which God had established with his father. The fact that Abraham, Ishmael, and all the males of Abraham's household were circumcised on the same day indicates the importance of the rite.

Abraham might then have entertained the hope that from Ishmael would come the innumerable offspring promised (Gen. 13:16; 17:7f.; 18:18), but this was changed abruptly when Sarah herself conceived and bore a son (21:1-7). The infant Isaac was nursed for two years, in accordance with contemporary practices, and then weaned at a ceremonial banquet, a custom still followed in certain parts of the Near East. In the midst of the festivities Sarah's fury was aroused by the sight of Ishmael playing. (The RSV adds "with her son Isaac" [21:9], following the LXX and the Vulgate, but omitted by the MT. The NEB reads "laughing at him" [cf. AV "mocking"], which seems to be the sense of the participle of Heb. *ṣāhaq* [cf. Paul's interpretation in Gal. 4:29].) Sarah demanded the banishment of Hagar and Ishmael from Abraham's dwellings, whether or not local law was broken. The adolescent Ishmael, without visible means of support, had nothing more than some bread and a skin containing water. With these spent, the prospect of death was imminent, and the narrative describes with great pathos the last tender acts of a grieving mother toward her languishing son (21:15f.). When all seemed lost, God intervened again in her life (21:17-20), renewing His earlier promise concerning Ishmael and giving them water. Ishmael grew up in the wilderness of Paran and became an archer. He was subsequently married by his mother to an Egyptian wife (21:21).

Following Abraham's death, his exiled son Ishmael returned to assist in the task of burial (25:9). The names of Ishmael's twelve sons are listed in 25:13-16, and 25:17 has a brief report of his death at the age of 137 years. According to Gen. 28:9 he also had a daughter named Mahalath, whom Esau married; in Gen. 36:3 her name was given as Basemath. Ishmael is regarded as the progenitor of the Arabs, who trace their ancestry back to Abraham, as do the Jews through Isaac. The character of Ishmael as represented in the Genesis narratives is amply illustrated by his descendants, the bedouin Arabs.

The person and the history of Ishmael, the son of Abra-

ham, "born according to the flesh," is of special interest to the student of the NT because Paul uses him, in the Epistle to the Galatians, as a type of those Jews who cling to the paternal religion in such a manner as to be unable to discern the transient character of the OT institutions, and especially those of the Mosaic law. By doing so they could not be made to see the true meaning of the law, and instead of embracing the grace of God as the only means of fulfilling the law, they most bitterly fought the central doctrine of Christianity and even persecuted its advocates. Like Ishmael, they were born of Hagar, the handmaid or slave woman; like him, they were Abraham's sons only "according to the flesh," and their ultimate fate is foreshadowed in the casting out of Hagar and her son. They could not expect to maintain the connection with the true Israel, and even in case they should acclaim Christ their Messiah they were not to be the leaders of the Church or the expounders of its teaching (Gal. 4:21-28).

2. The son of Nethaniah (Jer. 40:8–41:18; cf. 2 K. 25:23-25). It is a dreary story of jealousy and treachery that Jeremiah has recorded in chs. 40–41 of his book. After the destruction of Jerusalem and the deportation of the better class of Jewish citizens, it was necessary to provide for a government in the depopulated country. Public order had to be restored and maintained; the crops of the fields were endangered and had to be taken care of. It was thus only common political prudence that dictated to the king of Babylon the setting up of a governor for the remnant of Judah. He chose Gedaliah the son of Ahikam for the difficult position. The new officer selected for his place of residence the city of Mizpah, where he was soon joined by Jeremiah. All the captains of the Jewish country forces came to Mizpah with their men and put themselves under Gedaliah's orders (Jer. 40:13). Ishmael the son of Nethaniah, the son of Elishama "of the royal family" (2 K. 25:25) was among their number — all of which must have been rather gratifying to the new governor. But he was destined to be cruelly disappointed. A traitor was among the captains that had gathered around him. Yet the governor might have prevented subversion. Johanan the son of Kareah and other loyal captains warned him of the treachery of Ishmael, telling him he was induced by Baalis the Ammonite king to assassinate the governor. But the governor's faith in Ishmael was not to be shaken; he even looked upon Johanan's report as false and calumnious (Jer. 40:16).

About two months after the destruction of Jerusalem, Ishmael was ready to strike the mortal blow. With ten men he came to Mizpah, and there, at a banquet given in his honor, he killed Gedaliah and all the Jews and Chaldeans that were with him. He succeeded in keeping the matter secret, for, two days after the horrible deed, he persuaded a party of eighty pious Jews to enter the city and killed all but ten of them, throwing their bodies into a pit. These men were coming from the ruins of the temple with the offerings which they had intended to leave at Jerusalem. Now they had found out, to their great distraction, that the city was laid waste and the temple destroyed. So they passed by Mizpah, their beards shaven, their clothes rent, and with cuts about their persons (Jer. 41:5). We may, indeed, ask indignantly, Why this new atrocity? The answer may be found in the fact that Ishmael did not kill all of the men. He spared ten of them because they promised him some hidden treasures. This shows his motive. He was a desperate man and just then carrying out a desperate undertaking. He killed those peaceful citizens because of their money, which he needed to realize his plans. They were those of a traitor to his country, inasmuch as he intended to deport the inhabitants of Mizpah to the land of his high confederate, the king of the Ammonites. Among the captives were Jeremiah and the daughters of the Jewish king. But his efforts came to nothing. When Johanan and the other captains were told of Ishmael's unheard-of actions, they immediately pursued the desperate adventurer and overtook him by "the great pool which is in Gibeon." Unfortunately, they failed to capture Ishmael, for he managed to escape with eight men to the Ammonites. *See* GEDALIAH.

3. A descendant of Benjamin and the son of Azel (1 Ch. 8:38; cf. 9:44).

4. The father of Zebadiah who was "the governor of the house of Judah, in all the king's [Jehoshaphat, 2 Ch. 19:8] matters" (2 Ch. 19:11).

5. The son of Jehohanan, and a "commander of hundreds," who lived at the time of Jehoiada and Joash (2 Ch. 23:1).

6. One of the sons of Pashhur the priest. He was one of those men who had married foreign women and were compelled to "put away their wives" (Ezr. 10:22; cf. 1 Esd. 9:22). W. BAUR R. K. H.

ISHMAELITES ish'mā-el-īts, ish'mē-el-īts [Heb. *yišmᵉʿē'lî*]. The descendants of Ishmael, the son of Abraham and Hagar, whom Abraham sent away from him after the birth of Isaac (Gen. 21:14-21). The sons of Ishmael are given in Gen. 25:13f.; they were twelve in number and gave rise to as many tribes, but the term Ishmaelite has a broader signification, as appears from Gen. 37:28, 36, where it is identified with Midianite. From Gen. 16:12 it may be inferred that it was applied to the bedouin of the desert region E of the Jordan generally, for the character there assigned to Ishmael, "his hand against every man, and every man's hand against him," fits the habits of bedouin in all ages. Such was the character of the Midianites as described in Jgs. 7, who are again identified with the Ishmaelites (8:24). These references show that the Ishmaelites were not confined to the descendants of the son of Abraham and Hagar, but refer to the desert tribes in general, like "the children of the East" (Jgs. 7:12).

H. PORTER

ISHMAIAH ish-mā'ya [Heb. *yišmaʿyāh, yišmaʿyāhû*– 'Yahweh hears'].

1. A man of Gibeon, chief of David's thirty great warriors, who came to him at Ziklag (1 Ch. 12:4).

2. Chief of the armed contingent of the tribe of Zebulun, which served David in the monthly order of the tribes (1 Ch. 27:19).

ISHMEELITES ish'mē-el-īts [Heb. *yišmᵉʿē'lî*]. AV variant of ISHMAELITES (Gen. 37:25, 27f., 39:1; 1 Ch. 2:17).

ISHMERAI ish'mə-rī [Heb. *yišmᵉray*, from *šāmar*– 'hedge about,' i.e., 'guard,' and therefore 'guard,' 'protector'] (1 Ch. 8:18). A descendant of Benjamin, son of Epaal, resident of Jerusalem, one of the "heads of fathers' houses, according to their generations, chief men" (1 Ch. 8:28).

ISHOD. *See* ISHHOD.

ISHPAH ish'pə [Heb. *yišpâ*]; AV, NEB, ISPAH. A man of the tribe of Benjamin, of the house of Beriah (1 Ch. 8:16).

ISHPAN ish'pan [Heb. *yišpān*]. Descendant of Benjamin, son of Shashak; he lived at Jerusalem (1 Ch. 8:22, 29).

ISHTAR. *See* RELIGIONS OF THE BIBLICAL WORLD: ASSYRIA AND BABYLONIA.

ISH-TOB (2 S. 10:6, 8, AV). *See* TOB.

ISHUAH. *See* ISHVAH.

ISHUAI. *See* ISHVI.

ISHVAH ish'və [Heb. *yišwâ*]; AV ISHUAH, ISUAH. Second son of Asher (Gen. 46:17; 1 Ch. 7:30). As only the families of his brothers Ishvi, etc., are mentioned in Nu. 26:44, the supposition is that he left no descendants.

ISHVI ish'vī [Heb. *yišwî*].

1. The third son of Asher (Gen. 46:17; 1 Ch. 7:30), and founder of the family of Ishvites (Nu. 26:44); AV "Isui," "Jesui," and "Ishui."

2. One of the sons of Saul (1 S. 14:49); AV "Ishui."

ISIS. *See* RELIGIONS OF THE BIBLICAL WORLD: EGYPT.

ISLAND [Gk. *nēsíon* (Acts 27:16); *nēsos* (Acts 13:6; 27:26; 28:1, 7, 9, 11; Rev. 1:9; 6:14; 16:20)]; **ISLES; ISLANDS** [Heb. *'îyîm*] (Ps. 72:60; Isa. 40:15; 42:15; Ezk. 28:16); NEB also "coast-lands," "islands of the sea" (Ezk. 28:16); **ISLES OF THE GENTILES** [Heb. *'îyê haggôyim*] (Gen. 10:5, AV); RSV "coastland peoples"; NEB "peoples of the coasts and islands." Depending upon the context, either the islands of the Aegean and eastern Mediterranean, or the coastal area of the same region, particularly Egypt, Philistia, and Phoenicia. The NT refers to the islands of CAUDA, CYPRUS, MALTA, and PATMOS.

The NEB translation of *'îyîm* as "desert wastes" in Isa. 42:15 is a conjecture based on the context, but without any textual support. The AV expression "isles of the Gentiles" (Gen. 10:5) refers to the region and the inhabitants of the eastern Mediterranean coastal areas. Thus the RSV translates "coastal peoples." The NEB uses both meanings of *'îyîm*: "the peoples of the coasts and islands." *See* TABLE OF NATIONS.

See also COAST. R. J. W.

ISMACHIAH iz-mə-kī'ə [Heb. *yišmaḵyāhû*–'Yahweh sustains']. A temple official who assisted Coniah and Shimei, appointed by King Hezekiah and Azariah the high priest (2 Ch. 31:13).

ISMAEL. AV Apoc. for ISHMAEL **1** (Jth. 2:23) and **6** (Esd. 9:22).

ISMAERUS (1 Esd. 9:34, NEB). *See* AMRAM.

ISMAIAH (1 Ch. 12:4; AV). *See* ISHMAIAH **1.**

ISPAH. *See* ISHPAH.

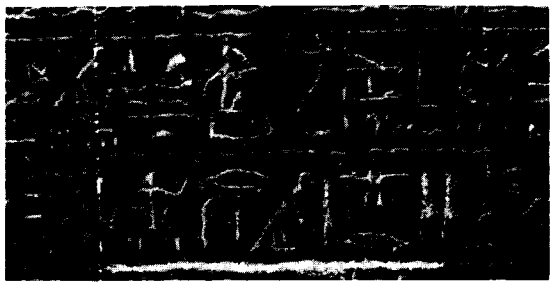
ISRAEL iz'rē-əl [Heb. *yiśrā'ēl*; Gk. *Israēl*]. The name given to Jacob and later adopted by his descendants as their political-religious title.

I. Etymology.–Gen. 32:28 (MT 29) implies a connection between "Israel" and the verb *śārâ*, "strive." This popular explanation has several problems, however, some of which seem insurmountable. First, as Albright (p. 159) and others have pointed out, in personal names the divine element is (as a rule) always the subject. Thus the name apparently cannot refer to Jacob's striving with God. Second, that *śārâ* means "strive" is uncertain, since it occurs only here and in Hos. 12:3f. (MT 4f.), which apparently used the Genesis text as an illustration. Third, the Masoretic vocalization of the name is not what one would expect (cf. Albright, pp. 161-65).

In view of these problems, scholars have offered a number of alternative explanations of the name's origin (see Albright, Danell, and Sachsse for summaries and evaluations of the various proposals). Three of the more popular explanations are: S. R. Driver's proposal that Heb. *śārâ* is related to Arab. *šariya*, "persevere, persist"; the ancient derivation from *śrr*, "rule" (cf. Symm., Aq., Onk.), espoused by Noth among others; and the more radical view that the root is *yšr*/*'šr*, "reliable, successful, happy," held by Sachsse and somewhat modified by Naor and Danell. Driver's suggestion seems to fit the biblical context best, though it is not without problems. One of the main problems with the second proposal is that it is difficult to understand why or how the proper origin and meaning of the name came to be forgotten, since *śrr* continued in use throughout the biblical period. The third option is more radical in that it supposes a shift from *š* to *ś*, and in Naor's modification (followed by Danell) a shift from *'* to *y* as well. This last conjecture also posits that the name originally meant "Asher is god ['El]," and thus identifies 'El with a Canaanite deity Asher, perhaps the male counterpart of Asherah. Aside from the incredibility that the people of Yahweh got their national name from a lesser Canaanite deity, this theory confuses two distinct roots, *yšr*, "upright, just," and *'ṯr*, "happy." It also does not account for the Ugaritic personal name *yšril*, which many (e.g., C. Gordon, *UT*, p. 415, and KoB [3rd ed. 1974], p. 422) think is equivalent to Israel, and which therefore rules out a deity Asher here on two counts: the spelling with *y* (not *'*) and with *š* (not *ṯ*, which is required by Ugar. *aṯrt*).

II. The People of Israel.–As a designation for the entire people of Israel, the name derives from the idea of Jacob/Israel as the ancestor of the nation, since he was the father of twelve sons from whom the twelve tribes descended (thus the more common designation for the whole nation is "children/people/men of Israel," *bᵉnê yiśrā'ēl*; cf. the similar expressions that denote various peoples supposedly descended from other ancient figures, e.g., "sons of Ammon," Dt. 2:19; "sons of Edom," Ps. 137:7; Gen. 25:30; 36:1, 8). Although some passages differ as to whether the twelve tribes were the twelve sons of Jacob (Gen. 49; note that vv. 16, 28 call them "tribes," not individuals) or whether Ephraim and Manasseh were substituted for Joseph (and Simeon?) (Dt. 33; cf. 3:13f.; Jgs. 5:4), it is quite possible that the original twelve sons of Jacob founded these clans or tribes, which in the course of time were altered somewhat. Many scholars who reject the historicity of the text conjecture that the patriarchs were legendary figures, perhaps representing tribes and associated with cult centers (e.g., Abraham with Hebron, Isaac with Beer-sheba, and Jacob with Bethel, Peniel, or Shechem; some would even see another patriarch named "Israel" who was associated with Shechem; cf. H. Seebass, *Der Erzvater Israel* [*BZAW*, 98, 1966]). Thus the twelve-tribe system is relegated to a later era, and is said to have originated in Palestine.

Aside from Gen. 34:7, which is commonly regarded as an anachronism or later gloss (see comms.), the first use of "Israel" as a nation is in Gen. 49:7 (note that it is parallel to "Jacob," as also in v. 2, where the two names are used personally). That this "Blessing [Testament] of Jacob" is one of the oldest pieces of Hebrew literature is well known, and since the name "Israel" occurs in other very early Hebrew poetry (Nu. 23:7, 10, 23; Dt. 33:10; etc.), it seems that the name must have been known and used for the nation/people at least in the time of the judges. The well-known occurrence of "Israel" in the Merneptah stele (*ca.* 1225 B.C.) obviously establishes the people of Israel in



The name Israel on a detail of the Merneptah stele (ca. 1220 B.C.) (Service des musées, Cairo)

Palestine and shows that they were known by that name in the 13th century. (Though some see here instead a reference to Jezreel, rather than Israel, the reading *ya-si-r-'i-ra* seems clearly to indicate Israel; see W. F. Albright, *Vocalization of the Egyptian Syllabic Orthography* [1934], p. 34.)

As a designation for all Israelites, "Israel" was used throughout the biblical period, though it developed more specialized uses as well.

III. The Northern Kingdom.–When the kingdom split, the northern ten tribes kept the name Israel (1 K. 11:37; 12:1-3, 16, 19f.; etc.), as they had earlier used it (e.g., 2 S. 2:9; 3:10, 17-21; 20:1f.), and the southern kingdom became Judah, an appropriate name since that tribe was the dominant one in the south (cf. 2 S. 2:10f.; 3:10; 20:2; 1 K. 12:17, 20).

IV. Other Uses.–Even after the kingdom split, the southern kingdom was occasionally called Israel (Isa. 5:7; 8:18; Jer. 10:1), especially after the fall of the northern kingdom. This is no doubt a reflex of the general use of Israel to refer to the people of God. In postexilic times Israel was again used to designate the whole people (e.g., Ezr. 2:2), though its use as a national name was obviously secondary to its function indicating the people of God, since the nation was no longer autonomous. This religious or cultic use is apparent throughout the Psalms and is strikingly lacking in the wisdom literature (the only references there being political, not religious), which is perhaps to be expected in view of the special interests of that genre in contrast to the more cultic literature (which, however, was very often tied up with a nation's politics in the ancient Near East).

V. Intertestamental Period.–The Apocrypha and the Pseudepigrapha use "Israel" in ways similar to the OT, though naturally the predominant use is for the people of God and/or those of Jewish descent (Sir. 17:17; 24:8; Jth. 4:1, 8; 1 Macc. 1:11, 20; Jub. 1:29; T. Reub. 6:8; Ps. Sol. 2:24; etc.). At Qumrân the name Israel was adopted by the covenanters to indicate that they were the people of God (see F. F. Bruce, *Second Thoughts on the Dead Sea Scrolls* [2nd ed. 1961], p. 147; M. Burrows, *Dead Sea Scrolls* [1955], pp. 231, 263). The name also had other significances, however. Especially in connection with the two messiahs (of Aaron and Israel), Israel seems to refer to the laity, whereas Aaron refers to the clergy (cf. Burrows, p. 265; G. Vermes, *Dead Sea Scrolls in English* [1965], p. 17; cf. also K. G. Kuhn, "The Two Messiahs of Aaron and Israel," in K. Stendahl, ed., *The Scrolls and the NT* [1957], pp. 54-64 [repr. with some revisions of *NTS*, 1 (1954/55), 168-180]).

VI. NT.–The NT continues the usages found in the OT and intertestamental periods. Usually the name is used of the nation, i.e., those of Jewish descent (e.g., Mt. 10:6; Jn. 3:10; Acts 2:22; Phil. 3:5). Paul uses the term Israel predominantly for the historic people of the covenant, but also for the whole nation as represented in the last times. His thought seems to emphasize the spiritual nature of Israel, although some theological issues arise in his use of Israel and lead to various interpretations. Reformed thinkers identify Israel with the Church, i.e., the community of true believers, whereas dispensationalists argue that the terms "Israel" and "church" are always distinct. Bauer (rev. ed., p. 381) lists three different uses: the patriarch Jacob (Rom. 9:6; Phil. 3:5; etc.), the nation of Israel, and the "figurative" sense of Christians as "the true nation of Israel in contrast to . . . *Israel in the physical sense*" (1 Cor. 10:18; cf. *TDNT*, III, 383-88).

The incarnate Christ, being God's Anointed, is thoroughly representative in His person of the chosen people of God. On Calvary, Jesus the Jew partook of the sufferings of Israel, but transcended any purely local or national concepts of vicarious representation by atoning for the sins of the whole world. The realization by the primitive church that Jesus was indeed the Messiah that had been long promised to the nation was a factor underlying the urge to evangelize Palestinian Jews (cf. Mt. 15:24), and under the guidance of the Spirit to take the message throughout the Levant. The comparative lack of success that Paul experienced in persuading the Jews to acknowledge Christ as Messiah did not shake his pride in being a member of the people of Israel (2 Cor. 11:22), but at the same time he saw Israel as an obstinate nation after a fashion that was in complete harmony with the thought of the Hebrew prophets. This stubborn attitude, however, also worked for the benefit of the Gentiles, whose evangelization enabled them to share in the blessings of the covenant people (Gen. 12:3). Paul refused to entertain the idea that God had cast off His people (Rom. 11:1), and instead envisaged a time at the end of the age when all Israel would be saved (Rom. 11:26). He was able to do this with some assurance by regarding himself and other Jewish converts as the first fruits of such an act of salvation.

I. Introduction.–A. Name. The Israelites are named for their patronymic ancestor Jacob (Israel), whose story is recorded in Gen. 25–49. Although Abraham is accounted the father of the nation, the Israelite tribes traced their lineage from Abraham through Isaac to Jacob. The promises to Abraham were conveyed through Isaac (not Ishmael his half-brother) and Jacob (not Esau his twin). With Jacob, however, the line separates into twelve parts — the twelve sons or tribes of Jacob — each of which has a part in subsequent Israelite history. The blessings of Jacob (Gen. 49) indicate specific callings. Judah was to be the governing tribe (49:10; David was of the tribe of Judah), but all are reckoned as heirs to the covenant promises. In this sense Israelite history is the history of the *bᵉnê yiśrā'ēl,* the sons of Israel (*see also* TRIBE).

B. Sources. 1. The OT. The OT provides two accounts of Israelite history. One begins with the Pentateuch and continues through Joshua, Judges, Samuel, and Kings. It traces history from creation to the Exile of Judah (587 B.C.). A second, in part parallel, includes Chronicles, Ezra, and Nehemiah. This also traces its genealogies back to Adam, but it stresses the history of the Davidic family in the southern kingdom and the temple rites. Its history extends beyond the Exile to the return following the decree of Cyrus and to the reforms of Nehemiah (445 B.C.).

2. Archeology. Within the past century archeological discoveries in Palestine and neighboring lands have illuminated Israelite history. Key Palestinian towns, including Hazor, Megiddo, Jericho, Lachish, and Samaria, have been excavated. Fortifications have been traced, buildings unearthed, and written materials collected and edited. The discovery of the MOABITE STONE has given a contemporary account of the conflict between Moab and Israel during the period of the divided kingdom. The Lachish Letters provide a view of life in the provinces during the time of Nebuchadrezzar's invasion of Judah. The DEAD SEA SCROLLS have given us source material for the study of sectarian Jewish life in the last two centuries before the Christian era. Discoveries in Egypt, Babylonia, and Assyria have helped us to understand Israelite history in the light of its contemporary Near Eastern setting. Discoveries from Nuzi and Mari have thrown much light on life during the patriarchal age. The Amarna Letters illustrate life in Canaan during the 15th and 14th cents. B.C.; and the epics discovered at Ugarit describe Canaanite religion at the same period. Annals of Assyrian and Babylonian kings illustrate the problems faced by Israel and Judah during the time of the divided kingdom. Sennacherib actually describes his siege of Jerusalem. We learn from the Cyrus Cylinder the goals of the Persian empire and the circumstances that permitted the Jews to return from exile. The Elephantine papyri show something of the life of a Jewish colony in Egypt during the period of Persian rule, and the letters of the Murašu family at Nippur show how Jews prospered in Babylon during postexilic times (*see also* ARCHEOLOGY; ARCHEOLOGY OF MESOPOTAMIA; ARCHEOLOGY OF PALESTINE AND SYRIA).

3. Ancient Historians. The sources of Israelite history after Nehemiah are scanty. The apocryphal 1 Maccabees gives a reliable account of the conflict with Hellenism in the days of Antiochus Epiphanes and the rule of Judas and his successors of the Hasmonean period (174-135 B.C.). The Jewish historian Flavius Josephus (*ca.* A.D. 37-100) wrote a history of the Jewish wars *(BJ)* in which he surveyed the history of his people from the time of the MACCABEES to the suppression of the Jews following the fall of Jerusalem to Rome (A.D. 70). Since he was an eyewitness to the Jewish wars his work is a valuable historical document. A second work, *Antiquities of the Jews,* traced the history of Israel from creation to the outbreak of the revolt against Rome (A.D. 66). It is based largely on the LXX, but also contains legendary material and quotations from other sources available to Josephus, including the Egyptian historian Manetho, Philo of Alexandria, Dius the Phoenician, Menander of Ephesus, and Nicolas of Damascus. These quotations, more than the work of Josephus himself, make his work a valuable source for the history of the Jews during the centuries immediately preceding the fall of Jerusalem (A.D. 70).

II. Pre-Mosaic Israel.–A. Homeland. According to the biblical records, Israelite history began with the call of Abraham while he was resident in Ur of the Chaldees, usually identified with the mound el-Muqaiyar in lower Mesopotamia. The Israelites of patriarchal times had close relations with the city of Haran on the Habor River in upper Mesopotamia and with the surrounding area known as Paddan-aram ("the fields of Aram") or Aram-naharaim ("Aram of the two rivers," AV "Mesopotamia"). It is to this district that Abraham's servant went to find a bride for Isaac (Gen. 24). Years later, Jacob fled there to escape the wrath of his brother Esau and to get a wife for himself. Since upper Mesopotamia is uniformly presented in Scripture as the ancestral homeland of the Israelites, a northern Ur has been posited as the possible site of Abraham's birthplace instead of the now famous el-Muqaiyar. Cyrus Gordon suggests that the biblical Ur of the Chaldees was a commercial colony founded in the far north by the 3rd Dynasty of Ur (*ca.* 2000 B.C.) and named after the capital city (p. 132).

Both Isaac and Jacob made their home in Canaan, although Jacob subsequently went to Egypt. During a time of famine Jacob's sons sought food in Egypt, and found

that their brother Joseph, who had been sold into slavery, was vizier of the country. Joseph encouraged his father and brothers to migrate to Egypt, where they remained until the time of Moses. The eastern Delta region, known as Goshen, became the temporary home of the Israelites. In the Exodus, Israel left Egypt and, after a generation in the wilderness, entered Canaan from the east.

B. Genealogy. The Israelites formed a part of two larger ethnic groups: Semites and Hebrews. The Semites of the Table of Nations (Gen. 10:21ff.) comprise Assyrians, Arameans, and a number of Arabian tribes, as well as the ancestors of the Israelites. A descendant of Shem was named Eber (11:14), a name that gives us our word "Hebrew." Abraham was a descendant of Eber, making the term "Hebrew" more inclusive than the later "Israelite." Groups known as Ḫabiru (Ḫapiru) or ʿApiru are described in the literature of Mari, Nuzi, Ugarit, and Amarna, which regarded them as beyond the pale of the organized urban communities of the 2nd millennium B.C. The term is not equivalent to Israelite, but the Israelites were probably included in that category by the inhabitants of the city-states of Canaan before the conquest of that land by Joshua and its subsequent Israelite settlement (*see* MARI IV; HABIRU).

C. Patriarchal Origins. The family is the earliest unit in biblical history. Abraham with his family and retainers comprised a sizable company — so large that he could organize an army of men to rescue his nephew from a powerful coalition of foreign invaders (Gen. 14). There is no reason to doubt that servants and others who voluntarily associated themselves with the patriarchal family were regarded as Israelites, regardless of their own genealogy. The later Israelites contained numerous racial strains — Amorite, Hurrian, Hittite, and Aramean.

According to Gen. 11:31, Terah the father of Abraham migrated from the territory of Ur to the region of Haran in northwestern Mesopotamia. Although exact dates for the patriarchal period are debatable, a date *ca.* 2000 B.C. for Abraham is acceptable (*see* ABRAHAM III). Following the migration from Ur, Terah and his family settled in Haran, which, like Ur, was a center for the worship of the moon-god. Terah was content to remain in Haran; but Abraham, mindful of the call of God, moved on to the land of Canaan.

The region around Haran continued to be recognized as the ancestral home of the family of Abraham. Haran, or Harran as it is spelled in the cuneiform literature (cf. LXX *Charran*), was an important trading center. Its name is similar, although not identical in the original, to Haran, a brother of Abraham. The city of Haran is mentioned in contemporary letters and documents as an important trading center during the 19th and 18th cents. B.C. Other towns in the neighborhood of Haran, mentioned in the Mari Letters, which date from the patriarchal age, include Nahor (also the name of a brother of Abraham), Til-Turakhi (Terah), and Sarugi (Serug). When Abraham sent his servant to find a bride for Isaac, it was to the city of Nahor that the servant went (Gen. 24:10).

The Mari Letters illustrate the freedom of movement that characterized the Amorite world in the late 18th century. The king of Assyria, from his capital at Asshur on the Tigris, negotiated with the king of Qatna in central Syria for the marriage of his son with the latter's daughter. Assyrian merchants had established trading communities in Cappadocia, where they maintained trading relations with the homeland. The records of this commerce are preserved in the Cappadocian Tablets. The movement of the patriarchs is thus seen as part of a manner of life in which mobility formed an important element.

The term "Amorite" or "westerner" was originally used of all the peoples who spoke dialects that grammarians call Northwest Semitic. This included the people whom we know as the Arameans and the Hebrews. In later use, however, the name was applied to groups of inhabitants of Palestine with which the Israelites came into conflict. All of northern Palestine is called "the land of the Amorites" in Egyptian records dating *ca.* 1300 B.C.

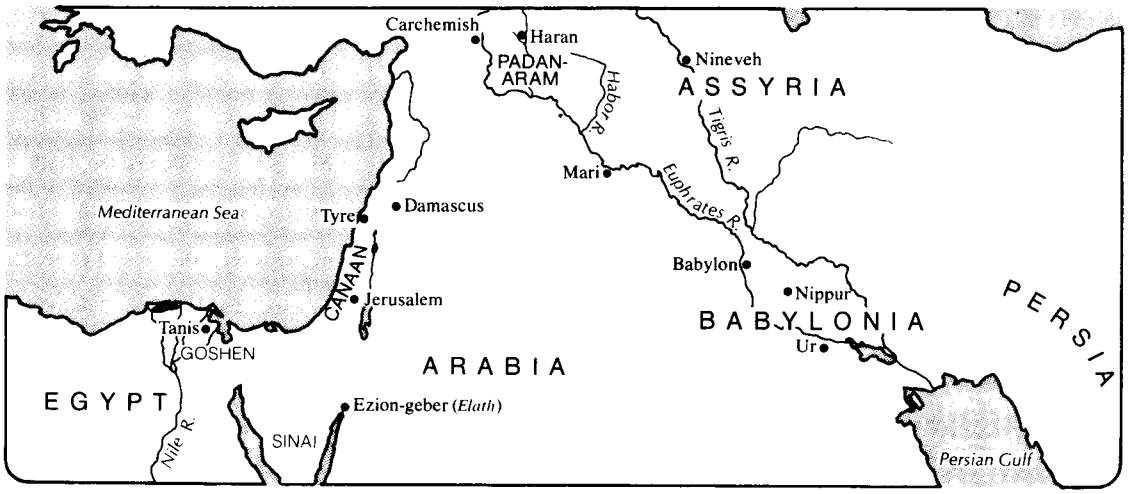
The Mari Letters mention names that form interesting parallels to those of the Bible. The name Abram has a close parallel in *Abam-ram* and Jacob in *Jacob-el.* An Amorite tribe of Benjamites is frequently mentioned, although it has no relation to the biblical tribe of the same name. The Ḫabiru were a troublesome group at Mari. They are also met in many parts of Mesopotamia, Anatolia, Canaan, and Egypt, where they appear as raiders, mercenary soldiers, captives, government employees, rebels, and slaves. The term seems to be one of social or legal status, rather than nationality. It was used of the unsettled, nomadic peoples who harassed the civilized communities around the Arabian Desert. The name Ḫabiru may have been applied to the biblical Hebrews, or Israelites, in that sense. Abraham is specifically termed *hāʿibrî* (Gen. 14:13). (*See also* TELL MARDIKH.)

III. Moses and the Exodus. *–A. Israel in Egypt.* The Israelites voluntarily entered Egypt under Joseph, but later unfriendly pharaohs reduced them to slaves. According to Gen. 15:13 their entire sojourn was 400 years in duration, or according to Ex. 12:40, 430 years. The LXX of Ex. 12:40 interprets the 430 years as the time of sojourn both in Canaan and in Egypt — a period of 215 years in Canaan and 215 in Egypt. This reckoning is followed also by the Samaritan Pentateuch, Josephus (*Ant.* ii.15.2 [318]), and the NT (Gal. 3:17).

B. The Exodus. Suffering in Egypt, the Israelites cried to God for deliverance, which came in the person of Moses. After a series of plagues that came upon the land of Egypt, Moses led the people across the Sea of Reeds (N of the Red Sea) into the Sinai Peninsula.

According to 1 K. 6:1 Solomon dedicated the Jerusalem temple in the 480th year after the Exodus from Egypt. The first year of Solomon's reign is known to have been *ca.* 970 B.C. By adding the two figures together we would have a date of *ca.* 1450 B.C. for the Exodus. This would fall during the reign of Thutmose III (1490-1435 B.C.), who is known to have employed Asiatic captives in his extensive building projects. On the basis of this chronology, Ahmose (or Amosis), who expelled the Hyksos and founded the New Kingdom (*ca.* 1570 B.C.), may have been the "new king over Egypt who did not know Joseph" (Ex. 1:8) and Hatshepsut may have been the pharaoh's daughter of Ex. 2:5-10. If the Exodus took place *ca.* 1440, the Israelites would have attacked Jericho forty years later, *ca.* 1400 B.C.

Other evidence, however, points to a later date for the Exodus. The building operations of Thutmose III were, as far as we know, in Upper Egypt, and the Israelites labored in the Delta, where they "built for Pharaoh store-cities, Pithom and Raamses" (Ex. 1:11). Raamses appears definitely to have been Per-Ramses, the "House of Ramses (II)," which has been identified with the Delta city of Tanis-Avaris-Qantir. Those who hold to a 1440 date for the Exodus suggest that the use of the name "Raamses" is an example of scribal emendation whereby an older name is replaced in the text by a contemporary name for the same place. Those who hold the so-called late date for the Exodus suggest that Ramses II (1290-1224 B.C.) was the pharaoh of the Exodus, which may have taken place *ca.* 1280 B.C. Ramses II had his court at Tanis, a location that agrees with the biblical statement that the Israelites



lived nearby "in the land of Egypt, in the field of Zoan" (i.e., Tanis) (cf. Ps. 78:12,43).

The first actual mention of Israel in any Egyptian document is in the Israel stele of Merneptah (1224-1216 B.C.). Pharaoh Merneptah professes to have gained a decisive victory over "the people of Israel." We thus have a *terminus ad quem* for the Exodus — Israel was definitely in Palestine by *ca.* 1220 B.C.

The chief argument against the 1280 B.C. date for the Exodus is the 480 years of 1 K. 6:1. This figure may represent twelve generations, conventionally figured at forty years each, and it need not represent an exact number. Actual generations may be less than forty years apart, leaving us no fixed chronology. With our present state of knowledge it is best not to be dogmatic, but to leave the exact date an open question.

See EXODUS, DATE OF THE.

C. Wilderness Wandering. The most important event of the forty years of wandering near Kadesh was the giving of the law at Mt. Sinai. There the Decalogue was received by Moses and the tabernacle was constructed according to instructions received by revelation. Within the tabernacle was a chamber known as the holy of holies (or most holy place), which served as the throne room of Israel's God. The sacred ark of the covenant was located there and the glory cloud hovered over the ark between two cherubim. The two tablets of the Decalogue were placed within the ark.

Having resisted Moses' leadership, faithless Israel refused to enter Canaan and a whole generation perished in the wilderness. It was only after the death of Moses that Joshua led Israel into Canaan.

IV. Conquest of Canaan.–A. Entrance into Canaan. Victories in Transjordan formed a prelude to victories in the Promised Land itself. Sihon and Og, powerful kings ruling the area of Ammon and Bashan, had been defeated by the Israelites before Joshua led his people into western Palestine.

After crossing the Jordan, Joshua established his camp at Gilgal. Here twelve symbolic stones taken from the Jordan were erected as a monument to God's faithfulness (Josh. 4:1-9, 20). The encampment at Gilgal formed a period of transition for the Israelites, who recognized Joshua as the successor to Moses. The miraculous manna ceased, and Israel began to eat from the produce of the land of Canaan. The rite of circumcision, which appears to have been neglected during the wilderness period, was reestablished, and the Passover was celebrated.

B. Joshua's Campaigns. Joshua's military strategy was designed to divide the Canaanite forces. Victories at Jericho and Ai in central Palestine would divide the land and provide a wedge from which the Israelites might gain effective control. Jericho was the walled and fortified city that was the key to the Canaanite defense of central Palestine. Joshua laid siege to the city, which fell into Israelite hands following an earthquake that destroyed its walls. The city was burned and only Rahab, who had received Israelite spies into her house, was spared.

The book of Joshua states that the conquest of a place named Ai (lit. "the ruin") took place shortly after the conquest of Jericho (Josh. 7:2–8:28). A mound known as et-Tell (lit. "the mound," a synonym for Ai) was excavated in 1933-1934 by Mme. Judith Marquet-Kraus. The remains indicate that the city located at et-Tell flourished 3300-2400 B.C. It was destroyed, however, *ca.* 2400 B.C., and never again became a city of any consequence. It was occupied by a few Israelites during the period 1200-1000 B.C. The absence of an account of the conquest of Bethel, only 2½ km. (1½ mi.) from Ai, has caused some scholars to conclude that the account of the battle of Ai refers actually to a battle at Bethel. L. H. Vincent has suggested that Ai may have served as a military outpost for Bethel. It may have seemed wise for the Canaanites to meet the Israelite threat at Ai to prevent the disaster of a battle at Bethel itself. It is, of course, possible that the identification of et-Tell with Ai is incorrect and that subsequent discoveries will provide a solution to the problem.

Now fearful of the Israelites, the inhabitants of Canaan prepared to defend themselves, although the Gibeonites determined to make an alliance with Israel as a means of self-preservation. Feigning themselves travelers from a distant country, they tricked Joshua into making an alliance, which he honored even after the deceit was detected. Unwilling to see their land absorbed by the armies of Joshua, Adoni-zedek of Jerusalem and the kings of Hebron, Jarmuth, Lachish, and Eglon marched against Gibeon. Joshua staged a night march, rushed up the pass, and at daybreak came upon the kings from southern Canaan in their encampment near Gibeon. The armies of the southern coalition were forced to flee down the western slope of the hill, past Beth-horon. Many of the fleeing Canaanites were killed in a hailstorm. The rest continued their flight down the Valley of Aijalon as far as Makkedah, where the five kings were trapped and slain.

Jabin, the king of the city-state of Hazor in northern Canaan, led another resistance movement. The threat was

so great that Jabin had no difficulty enlisting the help of the other city-states and ethnic groups of northern Canaan. The Hazor confederacy grouped its forces in the vicinity of the waters of Merom. (Older maps identify the waters of Merom with Lake Huleh, N of the Sea of Galilee; subsequent studies indicate a location SW of Hazor.) Joshua took the offensive and launched a surprise attack. The armies of the Hazor confederacy fled, with Joshua pursuing them as far as the city of Sidon on the Phoenician coast. Although pockets of resistance were to continue throughout Canaan, large-scale organized resistance ended with the defeat of the Hazor confederacy. Hazor itself was completely destroyed. The smaller cities "that stood on their mounds" (Josh. 11:13) were not burned. These could be readily defended by Joshua and could be used by the Israelites who were about to settle throughout the land of Canaan.

Joshua's victories were decisive, yet much of Canaan was still in enemy hands at the time of his death. The Philistines occupied the land along the Mediterranean from the Brook of Egypt (Wâdī el-ʿArîsh) to Joppa. They remained a foe of Israel until David's reign, and did not finally disappear as a potential threat until Judas Maccabeus inflicted a crushing defeat on them (Josephus *Ant.* xii.8.6 [353]). The Phoenician cities of Tyre, Sidon, and Gebal (Byblos) did not fall before the armies of Joshua and never were a part of Israelite territory. David and Solomon found it profitable to make commercial treaties with the Phoenicians. Hiram of Tyre provided valuable building materials and architects for Solomon's building projects.

C. Division of the Land. Although the land was not wholly occupied by Israelites during Joshua's lifetime, it was divided among the tribes both as a recognition of victory and as an encouragement to the tribes to go in and possess the territory assigned to them. Judah was assigned the territory of southern Canaan, E and SE of the Dead Sea. A part of this land was later assigned to Simeon (Josh. 19:1-9) because "the part of the children of Judah was too much for them."

The important central part of Canaan was assigned to the Joseph tribes, Ephraim and Manasseh. This was a rich and fertile region; but Canaanite fortresses at Beth-shean, Ibleam, Dor, Taanach, and Megiddo proved a barrier to the occupation of the area. When complaints were received about the inadequacy of their territory, Joshua assured Ephraim and Manasseh that they would conquer the Canaanites "though they have chariots of iron, and though they are strong" (Josh. 17:11-18). Between Judah and the "Joseph tribes" territory was assigned to Benjamin (Josh. 18:11-28) and Dan (19:40-48). Jerusalem was located at the border between Judah and Benjamin. The tribe of Dan had difficulty maintaining itself in the coastal area and later migrated to the far north (Jgs. 1:34f.). It is with respect to northern Dan that the borders of Israel are said to be "from Dan to Beer-sheba." Asher, Zebulun, Issachar, and Naphtali received their inheritance in the northern part of the country (Josh. 19:10-39). Reuben, Gad, and the half-tribe of Manasseh had already taken their territory on the east of the Jordan (Nu. 32:1-42; Josh. 13:8-33).

The Levites, whose concern was public worship, were not given tribal inheritance. They were assigned forty-eight cities with the pasture land or "suburbs" of each. These cities were scattered among the tribes. They included the six "cities of refuge," which were set apart as an asylum for those who had committed unintentional homicide. The fugitive had to convince the elders of the city that he had had no murderous intent. He then stood trial before the entire congregation. If declared innocent he remained within the city of refuge until the death of the high priest, after which he could return home without fear of the "avenger of blood."

V. Period of the Judges.—A period of spiritual decline that was characterized by the licentious worship of Baal and the Asherim (Jgs. 2:11-13) and combined with weakness and defeat on the field of battle followed the death of Joshua. A succession of oppressions is recorded in the book of Judges, during each of which Israel cried to God for deliverance. When Israel turned to God in repentance, He raised up a judge, or deliverer, who served as leader of the tribes until his death.

A. Political Life of the Period. The Israelite tribes formed a loose confederation during the period of the judges. The tribes settled in their respective territories and had to defend themselves against marauding tribes from a distance and against the local Canaanites who had not been dispossessed. During the 12th cent. B.C. a migration of Philistines from Crete and the Aegean region settled along the coastal regions of southern Palestine and became the greatest threat to Israelite independence. The Philistine threat continued through the period of the judges and was resolved only during the reign of King David. The presence of Philistines along the coastal regions of southern Canaan made it impossible for the tribe of Dan to secure adequate territory for its population. Thus a large portion of the tribe migrated to the extreme north of the country, where they took the city of Laish (Leshem) and renamed it Dan (Jgs. 18).

The lack of a strong central government was keenly felt during the period of the judges. In southern Canaan Judah and Simeon fought their own battles (Jgs. 1:3), as did the tribes in the territory E of the Jordan known as Gilead (11:5-11). The northern tribes of Zebulun and Naphtali united to repulse Canaanite attacks upon their territory (4:6). Men from Naphtali, Asher, and Manasseh supported Gideon in his attack on the Midianites (7:23). The Ephraimites were unhappy with Gideon's attitude toward them (8:1) and they threatened to avenge a fancied slight that they attributed to Jephthah (12:1). Jephthah met their challenge by marshaling his Gileadite forces and defeating Ephraim in battle (12:4-6).

Civil war broke out when a Levite's concubine died as the result of mistreatment by Benjaminites of Gibeah (Jgs. 19:22-26). The Benjaminites would not deliver the murderers into the hands of the other Israelites for punishment, with the result that the other tribes were arrayed against Benjamin. After several unsuccessful attempts to take Gibeah by frontal attack, the other Israelites captured the city by a ruse (Jgs. 20:18-48). So great was the slaughter that the tribe was almost annihilated, and wives had to be provided from the other tribes for the surviving Benjaminites (Jgs. 21). The author of the book of Judges characterizes the period as one in which "every man did that which was right in his own eyes" (Jgs. 21:25). Although theoretically the tribes were a theocracy, it was practically a time of anarchy.

B. The Judges. Israel's first oppression came from Cushan-rishathaim, a king of Aram-naharaim (Mesopotamia), and lasted eight years (Jgs. 3:8). This may be a king from Mitanni who attacked Israel during his campaigns against Egypt. Since the Hebrew word "Edom" is similar to "Aram," and since all Israel's oppressors were neighbors of Israel, some scholars identify Cushan-rishathaim as an Edomite ruler. Othniel, a Kenizite, delivered Judah from Cushan. After a time of peace, Eglon of Moab oppressed Israel until he was killed by a Benjaminite named Ehud (3:12ff.). Then the Canaanites of northern Palestine formed an alliance under Jabin of Hazor and afflicted Is-

rael for twenty years. Deborah, a prophetess, encouraged Barak to marshal the forces of Israel to fight the Canaanites in the Valley of Esdraelon. In the plain of the Kishon River Barak defeated the forces of the Canaanite general Sisera, whose chariots had to be abandoned when the Kishon overflowed its banks. Sisera himself was killed by Jael, the wife of Heber the Kenite (Jgs. 4–5). In the same region bands of Midianites oppressed the Israelite tribes until Gideon marshaled his small but loyal band to drive out the oppressor (Jgs. 6–8). Abimelech, a son of Gideon, established a kingdom at Shechem and attempted to rule Israel (Jgs. 9). His brother Jotham expressed contempt for the concept of monarchy (9:7-20), and Abimelech's kingdom was soon ended.

The minor judges Tola of Issachar and Jair of Gilead (Jgs. 10:1ff.) judged Israel for twenty-three and twenty-two years, respectively. Details of their work are not recorded. When Ammonites crossed the Jordan from the east and attacked Israel, the Israelites sent for Jephthah, an illegitimate youth who had been an outcast from society before being recalled to lead the armies against Ammon (Jgs. 11). After the victory over the Ammonites, Jephthah had to settle a civil war brought about by the jealousy of the Ephraimites (Jgs. 12), who had not taken part in the expedition against Ammon.

The most detailed account of the book of Judges concerns Samson, a Nazirite of the tribe of Dan who lived during the time when the Philistines were making serious inroads against Israel. Samson's exploits show that friendly relations were possible between Philistines and Israelites on a personal basis even when the peoples were national enemies.

C. Chronology of the Judges. The chronological data given in the record of the judges (Jgs. 3:8–16:31) add up to a total of 410 years for the periods of oppression and the rule of the judges themselves. This figure is too large to harmonize even with the 480 years of 1 K. 6:1, and archeological considerations argue for a much shorter period. Jewish tradition eliminates the years of oppression, incorporating them into the periods of the individual judges (cf. *Seder Olam Rabbah*). Many biblical scholars note the prevalence of forty-year periods (or fractions or multiples thereof) and suggest that some of the figures are part of an epic frame of reference and should not be taken literally. It is also highly probable that some of the oppressions and judgeships were contemporary in Jgs. 10:7, and it is likely that this was true of others. For this reason it is not possible to establish an absolute chronology for the period of the judges (*see also* JUDGES, BOOK OF).

VI. United Kingdom. *–A. International Scene.* The books of Samuel record the beginning of Israel's golden age, the one period of history during which Israel was a world power. Palestine usually served as a buffer state between Egypt and the empires of the Tigris-Euphrates Valley, Assyria and Babylonia. The world situation of the 11th and 10th cents. B.C., however, produced a power vacuum. The empire period of Egyptian history had come to an inglorious end. Following the death of Ramses III (1144 B.C.) Egypt was ruled by a succession of weak pharaohs. Aggressive foreign policies were resumed by Shesonq I (biblical Shishak), who came to the Egyptian throne (935 B.C.) while Solomon was reigning in Jerusalem.

In the east Tiglath-pileser I (1115-1077 B.C.) laid the groundwork for the Assyrian empire, which became the scourge of Syria and Palestine. The Assyrian nation remained quiescent, however, from the death of Tiglath-pileser until the accession of Ashurnasirpal II (885 B.C.), about forty years after Solomon's death. It is precisely during the period between Tiglath-pileser and Ashurnasirpal that Israel experienced its golden age under Saul, David, and Solomon.

Although not confronted with armies from the Euphrates or the Nile, Israel faced formidable foes nearer home. During the time of the judges there were battles with the Arameans, Moabites, Canaanites, Midianities, Ammonites, and Philistines. Difficulties with most of these tribes were sporadic, but the Philistines continued as an active threat. The uncircumcised Philistines were a non-Semitic people who had come to Canaan (to which they later gave the name of "Palestine") from Caphtor, an ancient name for Crete (Jer. 47:4; Am. 9:7). Although some Philistines settled in patriarchal Canaan (Gen. 26:1, 14, 18), a large influx occurred following an unsuccessful Cretan attempt to invade Egypt during the 12th cent. B.C. The Philistines settled in the southwestern part of the land. A clash was inevitable. One result of the struggle was the establishment of the Israelite monarchy.

B. Samuel. Samuel was a transitional figure. He was the last of the judges (1 S. 7:15), a priest (1 S. 2:18; 7:9), and a prophet (2 Ch. 35:18). Under his leadership Israel passed from a group of more or less independent tribes with common traditions and a common loyalty to the Lord, to a limited monarchy under Saul and, subsequently, David.

Dedicated from birth to God's service, Samuel was trained by Eli the priest at the house of God in Shiloh (1 S. 2:11, 18-21; 3:1-10). The ark of the covenant was kept in this structure, which seems to have been more permanent than the tabernacle used during the period of wilderness wandering. Samuel in his youth acted as the mouthpiece of God in condemning the immoral practices (1 S. 2:22) and greed (2:12-17) that marred the usefulness of Eli's sons in the service of the Shiloh shrine. Eli himself appears as a moral but weak individual, unwilling or unable to cope with the situation. God, through Samuel, declared that the family of Eli would not continue in the sacred office (3:11-18).

The Philistine victory at Aphek marks the low point of Israelite power at this period. It also serves as a commentary on the spiritual condition of the days before the establishment of the monarchy. Experiencing the bitterness of defeat, Israel determined to bring the sacred ark to the field of battle as a kind of fetish (1 S. 4:3). The momentary sense of relief at the sight of the ark changed to sorrow when the Philistines fought victoriously, captured the ark, and slew Hophni and Phinehas, the sons of Eli (4:11). At the tidings of the loss of the ark and the death of his sons, the aged Eli died.

God would not allow the Israelites to make a fetish of the ark, but neither would he allow the Philistines to prosper through its presence in their camp. It became a source of embarrassment in the Dagon temple (5:2-5). When "tumors" afflicted the men of Ashdod (5:6-12), they determined to rid themselves of the ark, which had brought evil instead of good. Thus they put it on a new cart with unyoked oxen and sent it to Beth-shemesh, along with golden jewels (6:1-16). The men of Beth-shemesh "gazed" at the ark, perhaps opening it and examining its contents. As a result of this irreverence, they too were smitten (6:19). Thereupon the men of Beth-shemesh sent to Kiriath-jearim, in the hill country of Judah, asking that the men of Kiriath-jearim come and take the ark (6:21). The Philistines had evidently destroyed the sanctuary at Shiloh (cf. Jer. 7:12). The ark was placed in the house of Abinadab at Kiriath-jearim (7:1), where it remained until the time of David (2 S. 6:3f.).

With the ark in Israel once more, the nation experienced a time of spiritual revival which began in "yearning after the Lord" (1 Sam. 7:2). The Philistine oppression

quickened a sense of spiritual need in Israel. Samuel urged the necessity of putting away the Baalim and the Ashtaroth (7:3), the Canaanite deities that had such a grip on Israel during much of its preexilic history. At Mizpah (7:5-9), Samuel called together the people of Israel, and in repentance they acknowledged their sin (7:6). The Philistines, learning of the Mizpah convocation, attacked (7:7-17), but God enabled the Israelites to achieve a great victory. Here they set up a monument, which they called Ebenezer, "stone of help," with the testimony: "Hitherto hath the Lord helped us" (7:12).

During the wise judgeship of Samuel, Israel had no cause for complaint. With his advancing years, however, fear of the future became a paramount concern. Samuel's sons were not following the godly paths of their father. The Philistines constituted a continuing threat. Israel desired to have a king to lead them in battle as was the custom among other peoples (8:1-9).

C. Saul. Samuel was disheartened when the people requested a king. It seemed to be a rejection of the theocracy, and of Samuel himself. Assured that it was God's will to anoint a king over Israel, Samuel sought the one who should reign as the first king.

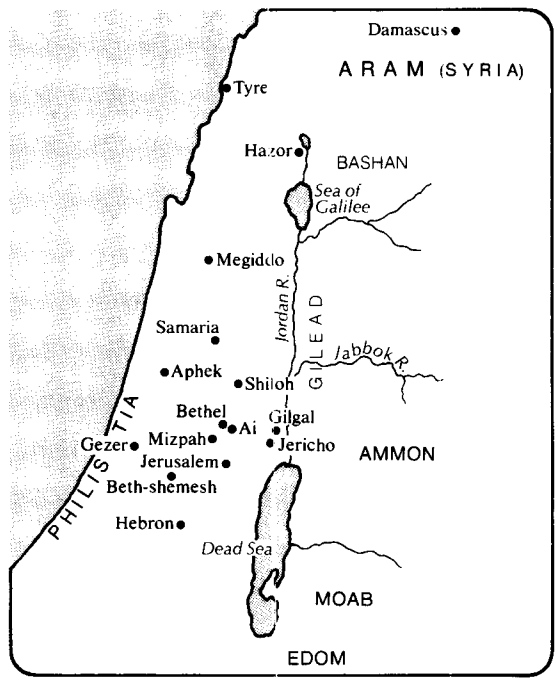
Benjamin, Saul's tribe, was very small. The choice of a Benjaminite as Israel's first king was a conciliatory gesture to Ephraim to the north and Judah to the south. Tribal rivalries were thus held in abeyance while Israel passed from a loose federation of tribes to a centralized monarchy. Saul was anointed as king by Samuel, but it was his prowess on the field of battle that brought him the enthusiastic support of his people. Israel had requested a king who could lead his people in battle, and Saul was not a disappointment in that respect.

The Ammonites, living E of Moab and Gilead, were a roving, predatory people. Under their king Nahash they invaded the Israelite territory E of the Jordan and besieged Jabesh-gilead. When Saul learned of the threat to Jabesh-gilead, he summoned the Israelite warriors to Bezek, S of the mountains of Gilboa, and put the Ammonites to flight. This decisive victory gave Saul prestige as a king who had proved himself successful on the field of battle (11:1-11).

Since the time of the judges, the Philistines had occupied strategic Israelite cities. Geba of Benjamin, 9.6 km. (6 mi.) N of Jerusalem, and Bethel, 19 km. (12 mi.) N of Jerusalem on the Shechem road, were among the important cities in Philistine hands. Saul sought to lead Israel against the Philistines. His son Jonathan struck the first blow by attacking them at Geba, and soon followed it with a second victory at Michmash, across the valley from Geba. The Israelites then pursued the Philistines to their own borders. The Philistines, however, continued to hold fortresses in Israel throughout the reign of Saul, and there were constant wars between the two peoples.

The Aramean state of Zobah, N of Damascus, had frontiers extending as far as the Euphrates. The chariotry of Zobah proved a serious obstacle to Israelite military power (1 Ch. 19:6). Saul's campaign there was very likely defensive, protecting his borders against Aramean raids.

The marauding nomads who attacked the Israelites during their migration from Goshen (Dt. 25:17-19) had been defeated by Joshua at Rephidim (Ex. 17:8-16). They continued to be Israel's inveterate foes. Saul defeated them in battle but incurred the wrath of Samuel when he spared Agag, the Amalekite ruler, and refrained from killing the cattle. Although Saul expressed a desire to sacrifice the best of the cattle to the Lord, Samuel insisted that obedience was better than sacrifice. The beginning of the rift between Samuel and Saul may be traced to the Amalekite war.



There were doubtless many conflicts between Israelites and Philistines during the reign of Saul. The second war was notable in that David, who had been anointed privately by Samuel, appeared on the field of battle for the first time. In the Valley of Elah, David met and slew the Philistine hero, Goliath of Gath. The Israelite victory that followed made David a national hero. Saul, however, was enraged, and determined to rid himself of a rival.

The last years of Saul's life were filled with tragedy. Literally insane with jealousy over David, Saul was in no position to lead his people. The Philistines were a growing threat, and they prepared for a complete victory over Israel. They assembled at Aphek in Benjamin, and marched northward to the Israelite encampment on the plain of Esdraelon at the foot of Mt. Gilboa. Saul, fearing for his life, left the Israelite camp by night and sought out a "woman having a familiar spirit" at Endor, S of Mt. Tabor. During this clandestine interview, the deceased Samuel warned Saul that he would die on the morrow. The next day a battle was fought between Israel and the Philistines at Mt. Gilboa. Saul and three of his sons, including Jonathan, were killed. Saul's body was fastened to the wall of the Canaanite fortress city of Beth-shean, overlooking the Esdraelon Valley. It was retrieved, however, by the warriors of Jabesh-gilead, who remembered Saul's deliverance of their city when it had been attacked by the Ammonites. The Philistine victory at Gilboa was one of the darkest episodes of OT history.

D. David. After the death of Saul, David left his place of refuge, the Philistine city of Ziklag, and went to Hebron where he was proclaimed king over Judah. In the meantime Saul's son Ish-bosheth ruled over the northern tribes, although Abner, who had been Saul's general, exercised the real power. The forces of Joab, David's general, and Abner, commander of Ish-bosheth's army, met at Gibeon. The ensuing battle resulted in victory for the partisans of David. In the retreat, however, Joab's brother Asahel was slain by Abner. After a stormy career, during which Abner changed allegiance to David, Ish-bosheth was murdered by two of his own henchmen, who took his head to

David at Hebron, expecting a reward. David hanged the criminals and gave the head of Ish-bosheth an honorable burial at Hebron. Jealous of his position, David's general Joab slew his potential rival Abner, ostensibly to avenge the death of Asahel. King David mourned Abner as "a prince and a great man" (2 S. 3:38). With the death of Ish-bosheth, opposition to the kingship of David over the northern tribes was removed. He was subsequently anointed king over all Israel.

When David became heir to the kingdom of Saul he ruled the hill country of Ephraim and Judah; Philistines and Canaanites still occupied strategic cities on the coastal plain, the Shephelah, and the Esdraelon Valley. The Jebusites, a Canaanite tribe (Gen. 10:16; cf. 1 Ch. 1:14), occupied the ancient city of Jerusalem, which they called Jebus. In the Amarna Tablets (*ca.* 1400 B.C.) the city was called Urusalim, meaning "city of peace" or "city of Salim," an ancient Canaanite deity. Although the Jebusites felt their fortress city high in the Judean mountains to be impregnable, Joab, David's general, risked his life to conquer it for the king. Jebus bordered Judah and Benjamin, but had not been incorporated into the territory of either tribe during the period of Jebusite occupation. After capture by Joab, Jerusalem became "the city of David."

The Philistines became apprehensive at the growing power of David and entered the Judean mountain region with their armies. In the Valley of Rephaim, running about 5 km. (3 mi.) SW of Jerusalem toward Bethlehem, David utterly routed his Philistine foes (2 S. 5:20). Following up his victory in the Judean highlands, David pursued the Philistines to the Shephelah and the maritime plain. He took the stronghold of Gath (1 Ch. 18:1) and so completely subjugated the Philistine confederacy that they could not trouble Israel again until after the division of the kingdom.

Although not permitted to build the temple, David made the initial plan for it. He centralized worship in Jerusalem by bringing the ark from Kiriath-jearim, on the western border of Benjamin, to the new capital (1 Ch. 13:3-14). The ark was installed in Jerusalem, where it remained until the Exile (587 B.C.).

The reign of David marks — politically speaking — Israel's golden age. A power vacuum in both Egypt and Mesopotamia made it possible for the tribes that had entered Canaan under Joshua a few centuries earlier to become a mighty nation. The lands conquered by David included Moab (2 S. 8:2), Zobah (vv. 3-5), Damascus (vv. 5f.), Edom (vv. 13f.), and Ammon (2 S. 10–11). The Ammonite war was the longest in David's career. Aided by fighting men from Zobah, Maacah (Aram-maacah), Beth-rehob, and Tob, the Ammonites were able to offer stiff resistance to David. The first battle was fought near Medeba, an old Moabite town about 26 km. (16 mi.) SE of where the Jordan enters the Dead Sea. The Arameans were routed and the Ammonites took refuge within a fortress. Joab met the army of Hadadezer of Zobah, led by his chief Shobach, at an unidentified place named Helam (10:16) in the east Jordan country. After peace was concluded with the Arameans, David turned his attention to the extended siege of Rabbah, or Rabbath-ammon, modern ʿAmmân. While back in Jerusalem, David ordered the death of Uriah the Hittite, in order to cover his sin with Bathsheba, Uriah's wife, and marry her (1 S. 11:15-17). When victory was assured, David went to Rabbah and put the crown of Milcom, the god of Ammon, on his own head, thus taking to himself the title "king of the Ammonites" (1 S. 12:30).

With the successful conclusion of the Ammonite war, David was king of an area extending from the Red Sea to the Euphrates. He was at the pinnacle of success, but already the seeds of future trouble were evident. From the death of Saul to the siege of Rabbah, David was successful in all his major undertakings, but during his declining years he experienced a series of personal and national tragedies.

Absalom, David's son, killed his half brother, David's oldest son Amnon, who had defiled and mistreated Tamar, Absalom's full sister. Fearing the anger of David, Absalom fled to the small Aramean state of Geshur, E of the Sea of Galilee, the home of his maternal grandparents. Through a stratagem of "the wise woman of Tekoa," David was reconciled to Absalom and the youth returned home (1 S. 14). Difficulties continued, however, when Absalom took advantage of a sacrificial ceremony at Hebron to have himself declared king of Israel. David with his foreign mercenaries, Cherethites (probably Cretans) and Pelethites (from southern Philistia), fled from Jerusalem and made his way to the east Jordan territory (2 S. 8:18). He and his retinue reached Mahanaim, N of the Jabbok, before Absalom and his army crossed the Jabbok (2 S. 17:24). In the Forest of Ephraim nearby, the battle took place and Absalom was killed.

Soon after Absalom's rebellion, a Benjaminite, Sheba, led a revolt against David (1 S. 20:1f.). Since Saul had been a Benjaminite, this may be interpreted as an effort to bring the throne back to the tribe of Benjamin. Joab pursued Sheba and his followers to Abel-beth-maachah, in northern Palestine W of Dan. There Sheba was decapitated by a "wise woman" in order to save her city from destruction by Joab's army (1 S. 20:19-22).

Toward the end of his reign, David took a census, and a severe pestilence fell upon the people (2 S. 24). David also purchased the stone threshing floor from Araunah, or Ornan, which was used as the base for an altar dedicated by David to the Lord (24:16-25). This became the site of Solomon's temple, and is thought to be the rugged natural scarp preserved under the mosque known as the Dome of the Rock in the old city of Jerusalem.

David's last days were comparatively uneventful. When his son Adonijah attempted to secure his own succession to the throne, David heeded the warning of Bathsheba and Nathan, and had Solomon anointed at the Spring Gihon outside the east wall of Jerusalem.

E. Solomon. Solomon fell heir to an empire formed largely through the leadership of David. Early in his reign Solomon reorganized the government of his kingdom, dividing it into twelve provinces or administrative districts (1 K. 4:7-19). Judah is not mentioned among the provinces. It may have been ruled directly from Jerusalem. Solomon is said to have ruled from the Euphrates to the border of Egypt (1 K. 4:21). The Aramean states as well as the people of Edom and Moab regularly presented their tribute to Solomon at Jerusalem. As a commercial outpost he built "Tadmor in the wilderness" (2 Ch. 8:3f.), about 225 km. (140 mi.) NE of Damascus. In Roman times Tadmor was known as Palmyra.

By a trade alliance with Hiram, king of the Phoenician seaport Tyre, Solomon was able to promote Israel's commercial interests. He personally developed Ezion-geber, on the Gulf of Aqabah, as a port through which Israelite trade with Arabia and Africa could pass (1 K. 9:26-28). Hiram of Tyre also helped Solomon by providing building materials and skilled labor for the palace and temple that he built in Jerusalem. Solomon was able to supply farm products to the Tyrians as a partial payment for their assistance. Ten thousand men are said to have been employed to cut down the cedars and transport them to the sea. Stone for Solomon's building operations was quarried in the mountain country adjacent to Jerusalem.

The financial difficulties of Solomon are noted in the account of his ceding a tract of land in Galilee containing twenty towns as partial payment for his debt (1 K. 9:11-24). One of these towns was Cabul, a border city in the tribe of Asher. The territory was evidently not desirable, for Hiram expressed dissatisfaction over the payment. Solomon's control of Zobah, Damascus, Ammon, Moab, and Edom gave him a monopoly of the caravan routes between Arabia and the north. Horses from Cilicia (1 K. 10:28f.) and chariots from Egypt were handled at a fixed price by Solomon's merchants.

The building of chariot cities was an important defensive measure of Solomon. The great Canaanite stronghold of Hazor in upper Galilee had important chariot installations. (Similar installations at Megiddo, previously thought to be Solomonic, have been dated to the time of Omri; cf. *EAEHL*, III, 853f.) Other chariot cities included Accho (Acre), N of Mt. Carmel; Achshaph, 8 km. (5 mi.) SE of Accho; and Tell el-Ḥesī (perhaps Eglon), W of Lachish. There were also Solomonic chariot installations at the towns at the border of Cilicia, from which horses were imported. The city of Gezer W of Jerusalem was given by the Egyptian pharaoh to his daughter on the occasion of her marriage to Solomon (1 K. 9:16). Important chariot installations were subsequently placed there.

Copper mining and smelting was developed in the Jordan Valley in the region between Succoth, near the Jabbok, and Zarethan, 19 km. (12 mi.) NE of Adamah. The whole region between Succoth and Zarethan provided suitable clay for the molds in which the copper was cast. Metal objects produced here later adorned and equipped the temple in Jerusalem. (The ruins at Ezion-geber that were first identified as a copper smelting industry have now been identified as a storehouse and granary. *See* TELL EL-KHELEIFEH.)

International alliances were made not only with Egypt and Tyre but also with other states. Solomon's harem of a thousand wives and concubines represented many alliances sealed by marriage (1 K. 11:1-3). The visit of the queen of Sheba (probably from Saba in southwestern Arabia) probably was concerned at least partially with commercial matters. Important caravan roads led from Saba northward along the western borders of Arabia (Job 6:19; Isa. 60:6; Jer. 6:20; Ezk. 27:22f.). Solomon carried on trade with Ophir, from which he imported "almug wood" and precious stone. Ophir was probably located in southwestern Arabia in the area now called Yemen. From distant lands ships brought gold, silver, ivory, apes, and peacocks (or baboons, RSV mg.) to Solomonic Israel (1 K. 10:22). Egypt and Kue, a part of Cilicia, provided horses for Solomon's extensive chariot installations (10:28, RSV).

The latter years of Solomon marked the beginning of Israel's economic and political decline. A change in dynasties in Egypt brought to the throne a pharoah unfriendly to Solomon. Hadad, an Edomite who had been in Egypt, returned to his native country to spark a rebellion against Solomon (1 K. 11:14-22). Rezon, an Aramean chief, seized Damascus and severed its ties with Israel. The loss of these territories resulted in a serious decline of revenue to the government of Solomon.

Further troubles came, however, from within Israel. Jeroboam, Solomon's high official who had the responsibility for the labor conscriptions in the "tribe of Joseph" (i.e., Ephraim and Manasseh), became the leader of a revolt against the king. Although forced to flee to Egypt, he remained in readiness to return when called upon by his countrymen.

VII. Divided Kingdom. *—A. Disruption.* After the death of Solomon, Rehoboam his son refused to come to grips with the economic chaos of the nation. Jeroboam, a former officer of Solomon, returned from exile in Egypt to lead a revolt that resulted in the establishment of an independent northern kingdom. This included the larger portion of Palestine proper, an area of about 24,300 sq. km. (9400 sq. mi.) as over against 8800 (3400) for the rival kingdom of Judah. The boundary between Israel and Judah ran S of Jericho, Bethel, and Joppa. The line was variable, however, being moved northward or southward depending on the relative strength of the two nations. The capital of Israel was first at the historic city of Shechem, then at Tirzah. Omri, the founder of the third dynasty, chose Samaria as the site of his permanent capital and it remained there until the kingdom was destroyed by the Assyrians. Religious sanctuaries were maintained at Dan in northern Israel and at Bethel near the southern border.

The kingdom of Judah included the tribe of that name, a portion of Benjamin, and Simeon, which had been incorporated earlier into Judah. The Shephelah and the coastal plain were nominally a part of Judah, but actually they seem to have been controlled by the Philistines. Kings of the Davidic line reigned over Judah until the fall of Jerusalem to Nebuchadrezzar king of Babylon (587 B.C.).

Solomon had retained control over Moab (1 K. 11:1, 7), but the land E of the Dead Sea subsequently gained its independence from the northern kingdom. On the Moabite Stone, discovered at Dibon in Jordan in 1868, Mesha king of Moab recorded that his land had been subdued by Omri of Israel, and held by Omri's son Ahab until Mesha freed his country during the latter part of Ahab's reign. Israel's counterattack failed (2 K. 3:21-27). According to Assyrian records Moab paid tribute to Tiglath-pileser III after his invasion of the West (733-732 B.C.), and subsequently to Sennacherib (701 B.C.). Moab disappeared as a political power when Nebuchadrezzar subjugated the country (605-562 B.C.).

South of the Dead Sea was the kingdom of Edom, which had been conquered by David and remained tributary during the reign of Solomon. It held about the same relationship to Judah that Moab held to Israel. During the reign of Jehoram son of Jehoshaphat (*ca.* 849-842 B.C.) the Edomites gained their independence (2 K. 8:20-22). Like its neighbors, Edom fell to Nebuchadrezzar.

B. Period of Warfare. The three kingdoms that developed from Solomon's kingdom in western Palestine — Syria, Israel, and Judah — strove for supremacy. They waged intermittent warfare from the reign of Jeroboam to that of Jehu in the northern kingdom, and from Rehoboam to Joash in Judah. During the early part of this period wars between Israel and Judah were continual. With the rise to power of the Syrian state of Damascus, Israel and Judah tended to draw closer together.

Shortly after the division of the kingdom, Jeroboam of Israel called upon Sheshonq of Egypt (biblical Shishak) to invade Judah. Thus Judah was confronted with a war on two fronts, Israel to the north and Egypt to the south. Sheshonq despoiled the temple and palace of treasures accumulated by David and Solomon (2 Ch. 12:2-12). It is noteworthy that Sheshonq did not limit his Palestinian campaign to Judean cities, for the Egyptian inscriptions at Karnak depicting his successful Palestinian campaign show captives from the northern kingdom as well as from Judah.

During the reign of Asa, Judah was invaded by a large force of chariotry under Zerah, an Ethiopian or Cushite. This Zerah, who may be one of the Osorkons of the 22nd Dynasty of Egyptian history, was defeated at the Judean city of Mareshah on the old road from Gaza to Hebron (2 Ch. 14:8-15).

Under Ahab and his Phoenician wife Jezebel, the worship of the Tyrian Baal became a serious challenge to the faith of Israel (1 K. 16:28–19:21), but the ministry of the

prophet Elijah helped stem the tide of Baalism. Meanwhile, Ahab was faced with danger from Syria. After an initial defeat by Israel, Ben-hadad's Syrian forces concluded that Israel's God was "a god of the hills" (20:23), and that victory for Syria would be achieved if Israel could be brought down from its mountain strongholds. This proved to be wishful thinking, however. At Aphek, a town about 6.5 km. (4 mi.) E of the Sea of Galilee on the highway between Damascus and Esdraelon, Ben-hadad was decisively defeated. Cities earlier taken from Israel by the Syrians were restored and the northern kingdom was given commercial privileges in Damascus (1 K. 20:26-34).

In 853 B.C., Ahab was numbered among the allies of Ben-hadad against the Assyrian ruler, Shalmaneser III, at Qarqar on the Orontes River. The major threat from Assyria made it necessary for the smaller states of Syria-Palestine to reconcile their differences. Assyrian records tell us that Ahab placed in the field of battle two thousand chariots and ten thousand foot soldiers (probably an exaggeration). Although Shalmaneser III claimed a great victory, it was not a decisive one. When the Assyrian armies returned home, conditions returned to normal in Syria and Palestine — war again broke out between Ben-hadad and Ahab. In a battle to regain Ramoth-gilead, E of the Jordan, Ahab was struck with an arrow. He bled to death and was buried in the Israelite capital, Samaria.

Contemporary with the reigns of Omri, Ahab, and Jehoram in Israel, Jehoshaphat reigned as Judah's fourth king. Early in his reign, Jehoshaphat sought to cement relations with Israel by marrying his son, the crown prince Jehoram, to Athaliah the daughter of Ahab and Jezebel. This act, while politically expedient, gave Baal worship a foothold in the southern kingdom comparable to its hold upon the north. Jehoshaphat was allied with Ahab against the Syrians at the battle of Ramoth-gilead, near the Syrian border (2 Ch. 18:18). During his reign a strong confederacy of Edomites, Moabites, and Ammonites invaded Judah. Due to a misunderstanding, however, the invading peoples began fighting among themselves and Jehoshaphat won the day without drawing a sword.

During the reign of Joram (Jehoram) of Judah, Edom revolted. Joram encamped at Zair, about 8 km. (5 mi.) NE of Hebron, before successfully attacking the Edomites. Judah was unable to retain supremacy over Edom, however.

C. Period of Aramean Dominance. The dynasty of Omri in Israel was brought to a violent end by Jehu, who was as zealous for the worship of Israel's God as Ahab and Jezebel had been for Baal worship. A countermovement took place in the south, when Athaliah the daughter of Ahab and Jezebel seized the throne of Judah and attempted to force Baalism on her people. While both Israel and Judah were going through these periods of trial, Hazael succeeded Ben-hadad II as king of Syria (2 K. 8:7-15). Hazael was so powerful that during a period of Assyrian weakness he was able to dominate both Israel and Judah. He seized Israel's land E of the Jordan (10:32f.; cf. Am. 1:3) and spared Jerusalem only after plundering the city and temple (2 K. 12:17f.). During this period the usurpation of Athaliah was ended through the activity of the high priest Jehoiada, who had rescued the infant Joash of the Davidic line from the murderous plans of Athaliah. Joash was instrumental, in cooperation with Jehoiada, in a program of renovation and repair of the temple (2 K. 12:1-16). During the latter part of his reign, however, he lapsed into idolatry. It was during Joash's reign that Hazael conquered the Judean city of Gath and plundered Jerusalem itself.

D. Period of Prosperity. With the death of Hazael, Syrian power waned. Jeroboam (II) son of Joash (Jehoash) was a powerful and able king of Israel. Lost territory was regained and nearly all of Syria was reconquered; Samaria was now the capital of a nation that approached in size the empire over which Solomon had ruled. The period of Joash of Israel and his son Jeroboam II has been called Israel's "Indian summer," a brief time of prosperity before its fall.

This prosperous period in Israel is paralleled in Judah during the reigns of Amaziah and Uzziah (otherwise rendered Azariah). After a victorious campaign against Edom in which he took Sela, the capital, Amaziah of Judah fought Jehoash of Israel at Beth-shemesh. Amaziah's Judean army was defeated and Israel proceeded to attack Jerusalem itself. For the only time in history, an army from the northern kingdom entered Jerusalem as victor, plundered its treasures, and made Judah virtually subject to Israel.

The reign of Uzziah of Judah was more successful. He raised a large, well-equipped army and provided for the defense of Jerusalem (2 Ch. 26:11-15). Successful military campaigns were carried on against the Philistines, and Ammon was made tributary to Judah (2 Ch. 26:6-8). Eziongeber (Elath) was recovered for the southern kingdom (2 K. 14:22).

The prosperity during the reigns of Jeroboam II of Israel and Uzziah of Judah was not matched with spiritual progress. The prophets of the day, particularly Hosea and Amos in the north and Isaiah in the south, underscored the externalism and hypocrisy that characterized much of religious life. Sacrifices were brought to the altars and sacred seasons of the year were punctiliously observed. At the same time oppression, bloodshed, and greed were commonplace. The prophets declared the imminent judgment of God upon a nation that had forgotten its Maker and Protector.

E. Fall of Samaria. Israel's prosperity under Jeroboam II was short-lived. Assyrian power was on the increase, and the entire Syria-Palestine area was considered suitable prey. In the reign of Menahem, Israel became tributary to Assyria. Northern Israel, including Naphtali, was carried into captivity by Tiglath-pileser (733 B.C.). His son Shalmaneser V besieged Samaria, which fell to Shalmaneser's successor, Sargon II (722 B.C.). Israel had placed confidence in Egypt for assistance against Assyria, but the days of Egyptian might were past.

The Assyrian policy of transportation had an important effect upon subsequent history. Captive peoples were transported to various new areas in an attempt to break up any possible national resistance. Israelites were taken to Halah and Gozan on the banks of the river Habor in northern Mesopotamia. Similarly, peoples from Babylonia, Syria, Elam, and elsewhere were settled in Samaria (2 K. 17:24). The subsequent intermarriage of these peoples with the Israelites who were left in the land produced the people known as Samaritans (v. 29). It was precisely this policy of transportation that made impossible the return of the people of the northern kingdom in a way comparable to the return of the Judeans after the decree of Cyrus.

F. Judah Alone. Judah continued for almost a century and a half after the fall of Samaria. During much of this period, however, it was tributary to Assyria. Ahaz and most of his successors maintained their throne by the payment of tribute. An influential party in the Judean court was active in seeking an alliance with Egypt as an alternative to this payment of Assyrian tribute.

During the reign of Hezekiah (715-687 B.C.), the Assyrian king Sennacherib, a son of Sargon II, invaded western Palestine and occupied the principal Philistine, Phoenician, and Judean cities. Hezekiah paid tribute to Sennach-

erib (2 K. 18:13-16), but refused to surrender the besieged city of Jerusalem (19:9-34). Assyrian annals tell how Sennacherib shut up Hezekiah "like a bird in a cage." The siege of Jerusalem was lifted, however, when the Assyrian armies were smitten by the "angel of the Lord" (19:35). Secular history suggests that bubonic plague broke out in the Assyrian camp (Josephus *Ant.* x.1.5 [21]).

Following the godly reign of Hezekiah two idolatrous kings, Manasseh and Amon, ruled over Judah. Manasseh had a policy of religious syncretism, adopting the worship of Baal and Astarte, and encouraging the worship of the sun and "all the host of heaven" (2 K. 21:1-18 par. 2 Ch. 33:1-20). The worship of Molech in the Hinnom Valley included the rite of passing living children through the fire. Tradition suggests that the prophet Isaiah was "sawn asunder" during the reign of Manasseh (He. 11:37; cf. the pseudepigraphic Martyrdom of Isaiah, *APOT,* II, 155-162).

The last spiritual revival of preexilic Israel occurred during the reign of Josiah, who succeeded to the throne after courtiers murdered his father Amon because they resented his idolatrous policy. The discovery of the "book of the law of the Lord" during Josiah's program of temple renovation was the chief element in this revival. Religion was centralized in the Jerusalem temple to the exclusion of the notorious "high places." Josiah died at the fortress of Megiddo in an attempt to prevent Pharaoh Neco of Egypt from joining forces with the Assyrians, who were now fighting for their national existence against the Neo-Babylonian empire. In this act, Josiah was doubtless honoring commitments to Babylon.

G. Fall of Jerusalem. The rise of the Neo-Babylonian (Chaldean) empire was one of the important factors during the last days of Judah's history. Nabopolassar the Chaldean revolted against his Assyrian lords and established one of the great empires of antiquity. The city of Babylon was reconstructed during his reign. With Cyaxeres the Mede and the Scythian king, he captured the Assyrian capital of Nineveh (612 B.C.). In concert with his son Nebuchadrezzar II, Nabopolassar took part in the Battle of Carchemish (605 B.C.) in which the Egyptian Pharaoh Neco received a crushing defeat. Syria and Palestine, earlier considered parts of the Assyrian empire, were now theoretically subject to Babylon.

Judah's pro-Egyptian king Jehoiakim, the second son of Josiah, was permitted to reign until he rebelled against Babylon (2 K. 24:1-6). Jehoiakim was succeeded by his eighteen-year-old son Jehoiachin, who reigned only three months before being taken into captivity with ten thousand other men of Judah (24:11-16). After looting the temple treasury, Nebuchadrezzar appointed Jehoiachin's twenty-one-year-old uncle Mattaniah king under the name of Zedekiah. In spite of the counsel of Jeremiah, Zedekiah favored the pro-Egyptian party and rebelled against Nebuchadrezzar, precipitating the eighteen-month siege of Jerusalem. This ended with the destruction of the city and its temple and the deportation of the citizens to Babylon (587 B.C.).

VIII. Babylonian Exile.—The Jews who were deported from Jerusalem were permitted to settle in their own communities in Babylon. The prophet Ezekiel prophesied to such a community located at Tel-abib on the river Chebar (Ezk. 1:1) near Nippur. Although unwilling exiles in a foreign land, the Israelites did not find life in Babylon intolerable. Jeremiah urged the exiles taken at the time of Jehoiachin's captivity (597 B.C.) to build houses, marry, and live normal lives (Jer. 29:5-7).

A. Changes in Israelite Life. During the years of exile, Israel became a religious community unrelated to any political entity or cultic center. This caused changes in its thinking and in its political institutions that have continued to the present. Although some Jews would later return to Jerusalem, the majority continued to live at a distance from the Holy Land. Their ties were cultural and religious, but not political.

The term "Israel" is frequently used to describe the earlier period of Hebrew life, when the tribes dwelt in proximity to one another and religious life could conveniently center in one sanctuary. As a political unit Israel was a power to be reckoned with in the days of David and Solomon, and even after the division of the kingdom it maintained a semblance of autonomy until the Exile. On the other hand, postexilic Judah, except for the Maccabean interlude, was dependent upon the great powers among whom it lived: Persia, Macedonia, the Ptolemies of Egypt, the Syrian Seleucids, and the Romans. The people lived not only in Palestine, but also in Egypt, Persia, Babylon, Syria, Asia Minor, Greece, and Rome. These Jews might visit Jerusalem on the occasion of the religious festivals (cf. Acts 2:8-11), but they had found their livelihood in a wider world and made some adaptations to a wider culture.

1. Place of Scripture. Exilic and postexilic Judaism was the heir to the Law and the prophetic writings of preexilic Israel. The Exile itself had underscored the need for faithfulness to Israel's God. Idolatry had been the besetting sin of the preexilic period, and those who had suffered the loss of home and temple could be expected to turn in horror from the sins that had brought on the Exile. The rejection of idolatry had, as its positive side, a deepening appreciation of Israel's historic monotheistic faith as enunciated in the body of sacred writings known as the Torah, or Law. The Torah — our Pentateuch — includes much more than rules for conduct. Exodus, Leviticus, and Deuteronomy contain codified law, but much of the Torah instructs by example. Biographies of godly people — Abraham, Joseph, Noah, Moses, and a host of others — provide instruction. The evil deeds of people so realistically described provide instruction also. Bad examples as well as good examples are necessary if we are to understand life in its totality. The evil must be shunned and the good followed; both are illustrated and described in the Torah of Israel.

Not only the Law, but preexilic prophetic writings were studied by faithful Jews in Babylon. Daniel tells us that it was his study of the prophecies of Jeremiah that caused him to humble himself before God in anticipation of the day when the Exile would come to an end (Dnl. 9:1-19). In contemplating the time when a new temple would be built in Jerusalem, the priests and their descendants concerned themselves with the minutiae of the Levitical laws. Those whose hearts were still in Zion occupied themselves with the Scriptures. There they learned both the reason for the Exile and the manner of life proper to the people of God in the land of their captivity and, at a later time, in a restored Zion.

2. Synagogue. The synagogue, the characteristic institution of postexilic Judaism, had its roots in the religious needs of those who could not attend the temple worship to which they were accustomed. Orthodox Judaism reckoned but one sanctuary, that which had first been built by Solomon in Jerusalem. The temple was the successor to the older tabernacle, a movable structure that had been built during the period of the wilderness wandering before Joshua led Israel into Canaan. The sacred ark, the most important element in the tabernacle, had later been located at Shiloh where "the temple of Yahweh" (1 S. 1:9) was located in the days of Samuel. Shiloh was destroyed during the battles between the Israelites and Philistines, and the ark had no permanent abode until David brought it to Jerusalem (2 S. 6:1-19). From that time to the present,

Jerusalem was considered the religious center of Jewish life and the only appropriate place for the holy temple.

No temple was built in the Jewish settlements of Babylon. The exiles needed to have occasions of fellowship in prayer and Bible study to augment their personal devotional times. Out of this very real need the institution known as the synagogue gradually developed. The synagogue became the community center for Jewish life.

3. Aramaic Language. During the Exile the linguistic habits of the Jews changed. In the days of Hezekiah, the common language of the Jews was Hebrew, although ARAMAIC was understood as a language of diplomacy (cf. 2 K. 18:26). Hebrew was never totally displaced, but the Aramaic language became the common tongue during the exilic period, and it was the spoken language of most of the Jews who returned to Palestine. Jews who spoke only Aramaic would not be able to understand the Hebrew Scriptures without an interpreter. The custom arose in the synagogue service of first reading the Hebrew Bible and then giving an explanation in the vernacular Aramaic. This oral explanation in time became a discourse, interpreting and applying the biblical message. Generations later these explanations or "Targums" were themselves written down, but in their early history they were simple explanations of the biblical text, ranging from word-by-word translations to quite free paraphrases. More liberties were permitted with the prophetic literature than with the Torah, which was accorded the highest degree of inspiration in Jewish thought.

4. Worship. The reading of Scripture was probably preceded by a prayer. In later Jewish practice the reading from the Torah was preceded by the recitation of the Shema (Dt. 6:4-9; 11:13-21; Nu. 15:37-41), which gets its name from the Hebrew for "hear," the first word of Dt. 6:4-9 ("Hear, O Israel!").

The institution of the sabbath, poorly observed in the preexilic communities, became the hallmark of Judaism during the exilic period. From sundown on Friday to sundown on Saturday the Jew refrained from all work. The sabbath became a day of rest and worship. In addition to the sacred festivals of the Levitical calendar, the Jews of the Exile observed fasts in memory of the national calamities attending the fall of Jerusalem (Zec. 7:3, 5; 8:19). Later the Feast of Purim was observed to commemorate the victory of the Jews over their foes in Persian times (Est. 9:27-32).

Corporate worship did not take the place of personal devotion for the godly Jew. Daniel made it a practice to pray three times daily with his face turned toward Jerusalem (Dnl. 6:11 [MT 10]). Confession of sin and prayers for divine compassion were certainly stimulated by the Exile. Those who had presumed upon God's goodness during preexilic times now saw their predicament in the light of God's holiness. The author of Lamentations cried out, "Restore us to thyself, O Lord, that we may be restored! Renew our days as of old!" (Lam. 5:21).

5. Relations with Non-Jews. It is impossible to generalize on the attitude of Babylonian Jews to their idolatrous neighbors. Some had little contact with non-Jews, but we know of many Jews who rose to important positions in the political and business world of the time. Daniel in the courts of Babylon and Persia, Nehemiah the cupbearer to Artaxerxes Longimanus, and Esther the queen serve as notable examples of Jews who were in no sense isolated. We also know that some Jews made a name and fortune for themselves in the world of commerce. The business archives of the Murašu family of Nippur provide an early example of Jews who became successful in business.

One result of this new chapter in Jewish life was the Jews' impact on their non-Jewish associates. Prior to the Exile, conversion was largely a matter of living in the land of Israel and assimilating Israelite culture. Ruth the Moabitess determined to serve Naomi's God when she returned with her to Bethlehem, whereas Orpah, Ruth's sister-in-law, returned to Moab and served the gods of Moab (Ruth 1:14-16). During and after the Exile, however, Judaism became a missionary religion. The Jews looked with scorn on the idolatry that once had been so great a temptation to their fathers. They saw idolatry as something evil not only for themselves as Jews, but for all people. A significant and growing number of converts or "God-fearers" looked upon Judaism as the true religion and turned their backs on paganism. The early Church found a ready audience that had been providentially prepared by postexilic Judaism for the preaching of the Christian gospel.

B. Judah During the Exile. With the destruction of Jerusalem, Judah ceased to exist as a sovereign state. Zedekiah died shortly after being taken to Babylon. Jehoiachin, although looked upon as the legitimate king, had no reasonable hope of returning to his land.

1. Rule of Gedaliah. The Babylonians established a military government for Judah with headquarters at Mizpah, about 13 km. (8 mi.) N of Jerusalem. Gedaliah, a Judean, was named governor. He was the son of Ahikam, who had protected Jeremiah from the wrath of Jehoiakim and his nobles (Jer. 26:24). Gedaliah was considered pro-Babylonian and thus suitable for an appointment that would be sympathetic to Babylonian rule. After Jerusalem fell to Nebuchadrezzar, the Babylonian military officers asked Gedaliah to look after the safety of Jeremiah (39:11-14).

Gedaliah formed a center around which the Judeans who had not been taken into exile might gather. Those who had fled to Edom, Moab, and Ammon trickled back. Gedaliah advocated loyalty to Nebuchadrezzar: "Dwell in the land, and serve the king of Babylon, and it shall be well with you" (Jer. 40:9). Evidently a degree of prosperity ensued, for "they gathered wine and summer fruits in great abundance" (40:12).

In the ruins of Tell en-Naṣbeh (Mizpah?) a seal was found bearing the identifying inscription "To Jaazaniah, servant of the king." Jaazaniah was one of the officials associated with Gedaliah (2 K. 25:23; Jer. 40:8). A seal impression found among the ruins of Lachish (thus antedating its destruction) bears the inscription, "Gedaliah who is over the house." Thus G. Ernest Wright (*WBA*, p. 181) suggests that Gedaliah had served as one of the last prime ministers of Judah, because the words "who is over the house" refer to the office of prime minister. Not only was Gedaliah's father a high official in his own right (Jer. 26:24), but his grandfather Shaphan had served Josiah as scribe, or secretary of state (2 K. 22:3, 8-12).

The rule of Gedaliah at Mizpah came to a violent end. Ishmael, a man of royal blood who sought the throne for himself (Jer. 41:1; 2 K. 25:25), had fled to Ammon during the siege of Jerusalem. He found a ready ally in Baalis king of Ammon. Learning that Gedaliah was governor of the remnant of the Judeans at Mizpah, Ishmael went there with a band of ten men and treacherously killed Gedaliah. Gedaliah had been warned about the plot, but he refused to believe the evil report concerning Ishmael (Jer. 40:16).

In addition to Gedaliah, Ishmael killed eighty men who had come to worship at the shrine at Mizpah (Jer. 41:4-7), and took captive the others who had settled at Mizpah, intending to take them to Ammon (41:10). At Gibeon, Ishmael was challenged by the forces of the loyal Judean, Johanan the son of Kareah. Although Ishmael escaped, his captives were freed and subsequently, contrary to the counsel of Jeremiah, fled southward to Egypt.

2. Silent Years. The history of Judah between the destruction of Jerusalem (587 B.C.) and the return of the first

group of exiles following the decree of Cyrus (536 B.C.) is largely a blank. The province of Judah that Gedaliah had ruled was probably abolished, and its territory incorporated into the neighboring province of Samaria. Although the land was not repopulated, as the northern kingdom had been following its fall to Assyria in 722 B.C., the Samaritans doubtless occupied much of the territory that had been vacated. Other groups — Ammonites, Arabians, and Edomites, in particular — must also have profited from the exile of the Judeans. In the years after 536 B.C. these peoples became adversaries of the group of Jews that returned from exile, and by political intrigue and limited warfare they sought to hinder the rebuilding activities.

The Babylonians, like the Assyrians before them, made it a matter of policy to burn and raze captured cities. Treasures would be pillaged and city walls reduced to rubble. Archeologists note that no town in Judah was continuously occupied throughout the exilic period. There was a complete break in the history of Judah. This is not true, however, of the cities N of the Judean border. Bethel and the Samaritan cities were not destroyed. Similarly the towns of the Negeb, S of Judah, were undisturbed. Among the towns of Judea that were destroyed and never rebuilt were Beth-shemesh and what is now known as Tell Beit Mirsim (Debir?). Excavators have found that there were periods when sites were not used prior to the 6th cent. B.C., but it was only after the Babylonian conquest of Judah that large numbers of sites permanently ceased to be occupied.

Unlike the Assyrians, who repopulated the northern kingdom after its fall in 722 B.C. (2 K. 17:24), the Babylonians did not make it a policy to repopulate areas from which captives had been taken. Instead the land was gradually occupied by neighboring tribes: Edomites and Arabians pressed in from the south, and Ammonites and other tribes from E of the Jordan crossed the river to occupy such territory as they could claim. Before the return of exiles from Babylonia, Judah was dominated by alien peoples along with descendants of the former Jewish population who had not been deported. The area occupied by the Jews who returned following the decree of Cyrus was little more than Jerusalem and its suburbs.

The Jews who were in Palestine during the period of the Exile had much in common with their Samaritan neighbors to the north. Both groups worshiped the same God, Yahweh, and both accepted the Torah as Holy Writ. The syncretism that marked the earliest Samaritans (2 K. 17:33) seems to have disappeared in later Samaritan history. Their distinctive faith was in the sanctity of Mt. Gerizim as the temple site (Jn. 4:20). This, however, was not implemented until a sanctuary was built on Mt. Gerizim in postexilic times.

Judging by the problems faced by reformers of a later day, e.g., Ezra and Nehemiah, the Jews and Samaritans of Palestine must have had friendly relations. Intermarriage must have been common, for it became the great problem of the later reformers (cf. Ezr. 10:18-44; Neh. 13:23-28). Sanballat the governor of Samaria gave his daughter to a grandson of the high priest Eliashib in the days of Nehemiah (Neh. 13:28). But the Jews who returned from exile insisted on strict separation from the Samaritans and other non-Jewish peoples of Palestine.

For fifty years after the destruction of Jerusalem, Judah was left to its own devices. While exiles in Babylon dreamed of returning to their Palestinian homes, the inhabitants of Judah, Jews and non-Jews, had adjusted to a new mode of life. It is understandable that Samaritans should resent the return of exiles from Babylon and that some Jews would desire to keep ties of friendship with them.

C. The Last Kings of Babylon. Nebuchadrezzar reigned over Babylon for more than forty years. He did not, however, prepare successors who would be ready to rise to the needs of a succeeding generation. In the first year of the reign of his son Amēl-Marduk (Evil-merodach of Scripture), Jehoiachin king of Judah was released from prison in Babylon and given a position of honor among the vassal kings. After a reign of only two years Evil-merodach was assassinated by his brother-in-law Neriglissar, who usurped the throne. After a nine-month reign, Neriglissar's son Labāši-Marduk was in turn assassinated by Nabonidus, who had no ability as a king. Nabonidus was more interested in religion and the study of antiquities than in the details of government. He was consequently unpopular with the priests, who wished to restrict his interest to the established religion, and with the populace, who cared little for his unorthodox ways. Belshazzar the son of Nabonidus served as prince regent in the place of his father and is best known as the "king" under whom Babylon fell to the Persians.

IX. Return from Exile and Restoration. *—A. Career of Cyrus.* The Persian empire came into being as the result of the efforts of Cyrus, who first appeared in history in 559 B.C. when he inherited the small kingdom of Anshan. This territory was tributary to the Median empire, one of the eastern rivals of Babylon. After revolting against his Median overlord, Cyrus sought to build a world empire. He marched his armies into Asia Minor and subdued Croessus of Lydia. Then he turned toward Babylon, where the weak rule of Nabonidus and his son Belshazzar was resented by both priests and populace. In October, 539 B.C., Gobryas the governor of Elam (whom some identify with the DARIUS of Dnl. 6) conquered the city of Babylon in the name of Cyrus. When Cyrus became lord of Babylonia, the dependencies of Babylon also came under his control. He adopted a benevolent policy toward the former Babylonian provinces, expecting thereby to secure their cooperation for his own policies. Phoenicia pledged its loyalty and its fleet, which was the match of any in the Mediterranean.

Cyrus' avowed policy of restoration of captive deities and captive peoples had special application to the Jews, whose religious ideals were respected by Cyrus and his successors. Cyrus restored the gods of other nations and authorized the return of the vessels used in the worship of the God of Israel (cf. Dnl. 5).

Many Jews were happy in Babylon, and had no desire to leave. They were permitted to remain, and many prospered in business and government during the Persian period. Daniel, who had earned a place of respect in the courts of Babylon and Persia, was among those who remained. Nehemiah and Esther subsequently rose to positions of influence in the Persian court.

B. First Return. The temple utensils were taken from Esagila, the temple of Babylon, and entrusted to a Jewish prince who had been appointed governor of Judah, Sheshbazzar (perhaps Šamaš-apal-uṣur). About fifty thousand Jews availed themselves of the opportunity to return to their homeland with the blessing and help of Cyrus. Aside from the assertion that he "laid the foundation of the house of God which is in Jerusalem" in 537 B.C., we read no more of the activity of Sheshbazzar (Ezr. 5:16).

The leadership of the band of returned exiles passed to Zerubbabel (Zer-babili, "seed of Babylon") and Jeshua (or Joshua) the priest. Consonant with the edict of Cyrus, they built the altar of burnt offerings and began the offering of daily morning and evening sacrifices on the site of their former temple (Ezr. 3:3). In the second year of the return, the foundations of the temple were laid amid scenes of great rejoicing (3:12), although nothing more was ac-

complished in the work of rebuilding the temple during the lifetime of Cyrus (4:5). The joyful enthusiasm of the early days of the return gave way to the gloomy frustration that resulted from the activities of "the adversaries of Judah and Benjamin" (Ezr. 4:1) who attempted to hinder the Jews from making effective use of their homeland. These peoples had profited from the expulsion of the Jews in the days of Nebuchadrezzar, and they resented their return to Palestine.

Due to pressures from Judah's foes, the work of rebuilding the temple came to a halt. The last days of Cyrus and the reign of Cambyses were times of disillusionment and adjustment for the returned exiles. Harassed by unfriendly neighbors, they found they had all they could do to provide for the necessities of life. The people were agreed on one thing: "The time is not come, the time that the Lord's house should be built" (Hag. 1:2).

This spirit of defeat was not shared by Haggai and Zechariah, who began to prophesy to Judah during the second year of Darius. They were aware of the problems the Jews faced, but they urged the people to trust God and take heart (Hag. 2:4f.). The work of rebuilding began in earnest. Perhaps at the instigation of "the adversaries of Judah and Benjamin," the Persian governor "beyond the river," Tattenai (perhaps "Thithinaia" in Persian), made a visit to investigate the activities of the Jews. Tattenai asked who had authorized the building of the temple and the Jews told him of the decree of Cyrus (Ezr. 5:3), suggesting that a search be made in the royal archives. The decree was found in the royal archives at Ecbatana. Darius determined to honor it and issued an order to that effect (Ezr. 6:7). He further decreed that an endowment be given the Jews from the royal treasury to expedite the work (6:8). Darius honored the decree and encouraged the Jews in their labors. In the sixth year of Darius (516 B.C.) the temple was completed. Special dedicatory sacrifices were offered, and the priests and Levites were assigned their respective tasks (6:15-18).

Over fifty years pass in silence between the dedication of the second temple (515 B.C.) and the arrival of Ezra in Palestine in the seventh year of Artaxerxes (457 B.C.). Although successful in building the temple, the Palestinian Jews were certainly not prosperous during this period. Their city had no walls and it was open to attack from their numerous enemies. The people had become dispirited. Earlier resolves to live in separation from their neighbors had been quietly forgotten, and mixed marriage was common.

C. Return under Ezra. In Babylon and other parts of the Persian empire numerous Jews still looked with fond associations upon Jerusalem as the center of their religious life and their spiritual hopes. One of these was Ezra, a pious Levite who devoted his life to the study of the law. As a lover of Zion, Ezra appealed to Artaxerxes for help in making it possible for a fresh company of exiles to return to Palestine. The king complied (Ezr. 7:11-26) and authorized Ezra to assemble such Jews as would volunteer to join him, and to take offerings for the temple. Sacrificial animals were to be purchased, and the rest of the money used as he saw fit. Ezra was also authorized to appoint magistrates and judges and to enforce the law of God and of the Persian king. Thus Ezra was not merely a pious pilgrim but a representative of the Persian empire. Provincial rulers were ordered to provide Ezra and his company with food and money for their journey.

In all, about eighteen hundred men and their families responded to Ezra's appeal. Forty Levites and 220 temple servants joined the party after a special appeal was made. After praying for divine protection they journeyed almost 1600 km. (1000 mi.) to Jerusalem, a trip that took about three and a half months. The temple treasures were returned to the temple in Jerusalem and special sacrifices were made on the altar in the temple court.

Ezra's mission in Jerusalem is conveyed in his title, "scribe of the law of the God of heaven" (Ezr. 7:12), which had the significance of "Minister of State for Jewish Affairs." The Persians were tolerant of the many religions in their empire, but they did wish them to be regularized under responsible authority. Armed with his official rescript, Ezra was responsible for Jewish affairs in the province of Abar-nahara ("beyond the river"), i.e., Syria and Palestine (7:25).

One of the first practical problems Ezra faced was that of mixed marriages. The reformer took an uncompromising attitude and insisted that such marriages be dissolved (Ezr. 9–10). While insuring the purity of Jewish faith against heathen dilution, this action most certainly stirred up the non-Jewish population of the province to renewed hostility against the Jews.

Ezra brought with him from Babylon the "book of the law of Moses" (Neh. 8:1), which he publicly read from a wooden pulpit. Along with the reading there was an explanation, probably in Aramaic, which had become the popular language of the Jews during the exilic period (8:7f.). When the people learned that it was time for the Feast of Tabernacles, which through ignorance they had not observed, they built booths for themselves and observed the ancient feast. Each day during the week of the observance they listened to the reading of God's law.

D. Nehemiah. A Persian Jew named Nehemiah had risen to the post of cupbearer to Artaxerxes Longimanus (465-424 B.C.). This was a position of honor, for it involved an intimate relationship with the king. When his brother Hanani and others from Judah came to visit Nehemiah at the Persian court, they told him of the difficulties of the Jews in Palestine (Neh. 1:1-3). Jerusalem had no walls to protect it from its many enemies. Although it was reckoned as the Holy City because the temple of the Lord had been built there, few people dared live among its ruins.

The report grieved Nehemiah, who sought an opportunity to tell the king. Artaxerxes readily granted him a leave of absence to visit Jerusalem and do the work that was on his heart. The length of the leave was agreed upon (Neh. 2:6), and Artaxerxes issued a royal rescript authorizing the building of the city walls. Letters were sent to the governors of the provinces W of the Euphrates and to Asaph, the keeper of the royal forest, directing that Nehemiah be provided with the materials he would need for the gates of the citadel, for the wall of the city, and for the temple itself (2:7f.). Nehemiah was appointed governor of Judah (5:14), thus making it a province separate from Samaria. This was to be one factor in the rivalry that developed between Nehemiah and Sanballat governor of Samaria.

The generosity of Artaxerxes was not without political implications and possible benefit to Persia. Egypt had been perennially restive, and Persia wanted its Palestinian provinces that bordered Egypt to be in loyal hands. The Jews, moreover, had smarted under Samaritan officialdom and were generally demoralized.

After making necessary preparations, Nehemiah and a group of companions made the long journey from Susa to Jerusalem. His first concern was for building the walls of the city. In the company of a few associates he inspected the ruins by night (Neh. 2:12-15). His heart was heavy, for he looked upon the ruined walls as a reproach both to Judah and to Judah's God (2:17). After inspecting the ruins, Nehemiah sought out the leaders of the Jerusalem community (2:16f.) and explained his mission. They caught

something of Nehemiah's enthusiasm and determined to build the walls (2:18).

The opposition found its peak in three non-Jews: Tobiah, an Ammonite slave; Sanballat, the governor of Samaria; and Geshem, probably the chief of a tribe in northwestern Arabia. These men mocked the Jews for their efforts and insinuated that this rebuilding was an act of rebellion against Persia (2:19f.).

Nehemiah pressed on with his plans. The people responded to his appeal for help, and soon labor battalions were assigned to the various sections into which the wall had been divided. Workers came from outside villages — Jericho, Gibeon, Mizpah, Beth-haccerem, Beth-zur, Keilah, and Tekoa. Priests, Levites, goldsmiths, and merchants all labored together (Neh. 3). In less than two months (6:15) the wall was completed. Josephus tells us that it was further strengthened with battlements and gates over an additional two years and four months (cf. *Ant.* xi.5.8 [179]).

Nehemiah appointed his brother Hanani and a man named Hananiah, the governor of the castle, to assume responsibility for the welfare of Jerusalem. He charged them to keep the city gates closed until the sun was well up in the heavens, and to keep a guard posted (Neh. 7:2f.). The inhabitants of Jerusalem were few, for houses were still in ruins. It was necessary to encourage people to settle within the city, for life was more pleasant in other parts of Judah. Those who volunteered to live in Jerusalem were esteemed patriots, and a forced draft brought one-tenth of the country people into the Holy City (11:1).

The completion of the walls was an occasion of celebration and spiritual dedication. After ceremonies of purification (12:30), Ezra and Nehemiah each led a procession around the walls in opposite directions. They met near the temple area, where they gave expression to their joy and offered appropriate sacrifices (12:31-43).

When the wall was completed and adequate provision was made for the observance of the sacrifices and holy days prescribed in the Mosaic law (12:27-30), Nehemiah was free to end his leave of absence and return to the Persian court (13:6). The problems in Judah were not over, however. Within a short time — perhaps one to three years — he was granted a second leave of absence to return to Jerusalem.

During Nehemiah's stay at the Persian court, the situation in Jerusalem deteriorated. Although freed from the threat of enemies from without, the Jews themselves grew careless and internal dissension and infidelity brought on a new crisis. The wine presses were in operation on the sabbath day, and Tyrian merchants brought their fish and other merchandise into Jerusalem contrary to the sabbath law (Neh. 13:15f.). The perennial problem of intermarriage came to the fore again (13:23). Nehemiah made a second journey to Jerusalem in order to call his people back to the sacred law and their spiritual responsibilities.

For about a century after Nehemiah's time the Persian empire exercised control over Judea. The period was relatively uneventful, for the Jews were permitted to observe their religious institutions without molestation. Judea was ruled by high priests who were responsible to the Persian government, a fact that insured the Jews a large measure of autonomy but degraded the priesthood into a political office. Jealousy, intrigue, and even murder are reported in the contests for the office of high priest. Johanan son of Joiada (Neh. 12:22) is reported to have slain his brother Joshua in the temple itself.

Johanan was succeeded as high priest by his son Jaddua, whose brother Manasseh, according to Josephus (*Ant.* xi.7.2 [302f.]), married the daughter of Sanballat governor

of Samaria, and established a sanctuary on Mt. Gerizim that was to vie with the Jerusalem temple as the true place of worship (cf. Jn. 4:20). Although this temple was destroyed during the reign of John Hyrcanus (134-104 B.C.), Mt. Gerizim continued to be regarded as the Samaritan holy mount, as it is today. The Sanballat in the histories of Josephus cannot have been the man of the same name mentioned by Nehemiah (Neh. 4:1 [MT 3:33]), but the establishment of a rival temple about this time is known to have taken place.

Persia and Egypt were engaged in constant struggles during this period; and Judea, situated between the two powers, could not escape involvement. During the reign of Artaxerxes III (Ochus) many Jews were implicated in a revolt against Persia, and they were deported to Babylonia and the shores of the Caspian.

During the 5th cent. B.C. a Jewish colony was located on Elephantine, an island at the First Cataract of the Nile River near modern Aswân. Contrary to the Mosaic law, these colonists built a temple for themselves and worshiped other divine beings (e.g., Eshem-bethel, Herembethel, Anath-bethel) along with Yahweh. These names may have been identified with Yahweh, but their very existence shows tendencies toward syncretism. The Elephantine Jews had dealings with the Samaritans as well as with the Judeans, and were not a part of the mainstream of Israel's religious life.

X. The Jews under Alexander and His Successors.—*A. Alexander.* The defeat of Persian armies in Asia Minor (333 B.C.) brought Alexander the Great into Syria and Palestine. After stubborn resistance, Tyre was taken and Alexander marched south toward Egypt. Legend states that he was met by Jaddua the high priest, who told him of Daniel's prophecies that the Greek army would be victorious (Dnl. 8). The story is not taken seriously by historians, but it is true that Alexander dealt kindly with the Jews. He permitted them to observe their laws, granted exemption from tribute during sabbatical years, and, when he built Alexandria in Egypt (331 B.C.), he encouraged the Jews to settle there and gave them privileges comparable to those of his Greek subjects.

B. The Ptolemies. Following the death of Alexander (323 B.C.), Judea was first subject to Antigonus, one of his generals; but it ultimately fell to another general, Ptolemy I, surnamed Soter or "Deliverer," who seized Jerusalem on a sabbath day in 320 B.C. Ptolemy followed Alexander's liberal attitude toward the Jews. Many of them settled in Alexandria, which continued as an important center of Jewish thinking for many centuries. Under Ptolemy II (Philadelphus) the Jews of Alexandria translated their Torah (the Pentateuch) into Greek. This translation was known later as the Septuagint, from the legend that seventy (more correctly seventy-two — six from each of the twelve tribes) translators were supernaturally inspired to produce an infallible translation (cf. the Letter of Aristeas, *APOT*, II, 83-122).

The Jews in Palestine enjoyed a period of prosperity in the days of Simon the Just, the ruling high priest whose character is described in the apocryphal book of Sirach (50:1-21). He is reputed to have repaired the walls and fortified the city of Jerusalem and to have built a spacious reservoir to provide water for the city. Tradition links his name with the completion of the OT canon. In his time the books of Ezra, Haggai, Zechariah, Nehemiah, Esther, and Malachi are said to have been canonized.

C. The Seleucids. After about a century during which the Jews were subject to the Ptolemies, Antiochus III (the Great) wrested Syria and Palestine from Egyptian control (198 B.C.). The Syrian rulers are known as Seleucids be-

cause their kingdom, built on the ruins of Alexander's empire, was founded by Seleucus (Nicator). Most of the earlier rulers bore the names of Seleucus or Antiochus. The seat of government was in Antioch on the Orontes River. During the early years of Syrian rule the Seleucids allowed the high priest to continue to govern the Jews according to their law. Strife broke out, however, between the Hellenistic party and the orthodox Jews. Antiochus IV (Epiphanes) allied himself with the hellenizing group, and appointed to the priesthood a man who had changed his name from Joshua to Jason and who encouraged the worship of the Tyrian Hercules. Jason was displaced in two years, however, by another Hellenist, a rebel named Menahem (Gk. Menelaus). When the partisans of Jason contended with those of Menelaus, Antiochus marched on Jerusalem, plundered the temple, and killed many of the Jews (170 B.C.). Civil and religious liberties were suspended, the daily sacrifices were prohibited, and an altar to Jupiter was erected on the old altar of burnt offering. Copies of the Scriptures were burned and the Jews were forced to eat swine's flesh, contrary to their law. A sow was offered on the altar of burnt offering in contempt for the Jewish religious conscience (Josephus *BJ* i.1.2 [34f.]; *Ant.* xii.5.4 [253]).

D. Maccabean Revolt. The oppressed Jews were not long in finding a champion. When the emissaries of Antiochus arrived at the small town of Modin, about 25 km. (15 mi.) W of Jerusalem, they expected the aged priest Mattathias to set a good example for his people by offering a pagan sacrifice. He not only refused, but he also killed an apostate Jew at the heathen altar as well as the Syrian officer who was presiding at the ceremony. Mattathias fled to the Judean highlands and with his sons waged guerrilla warfare on the Syrians. Although the aged priest did not live to see his people freed from the Syrian yoke, he commissioned his sons to complete the task. Judas, surnamed Maccabeus, took the leadership at the death of his father. By 164 B.C. Judas had gained possession of Jerusalem. He purified the temple and reconstituted the daily offerings. Soon after the victories of Judas, Antiochus died in Persia. Struggles continued between the Maccabees and the Seleucid rulers for about twenty years. Following the death of Judas, his brother Jonathan, who was already high priest, became leader. When Jonathan was murdered (143 B.C.) the last of the sons of Mattathias, Simon, became ruler. He was able to gain full independence from Syria, but he too was murdered (135 B.C.), by a son-in-law, Ptolemy. The surviving son of Simon, John Hyrcanus, succeeded his father and thereby established a dynasty. Hyrcanus determined to build Judea into a powerful, independent state. He conquered Samaria and destroyed the schismatic temple on Mt. Gerizim. The borders of Judea were also extended in the directions of Syria, Phoenicia, Arabia, and Idumea. During the reign of Hyrcanus the pro-Hellenistic Sadducean party gained control and the orthodox principles of the older Maccabees tended to be neglected.

E. The Hasmoneans. Aristobolus I, the son of Hyrcanus, was the first of the Maccabean rulers to take the title "king of the Jews." After a short reign he was succeeded by the tyrannical Alexander Janneus, who in turn left the kingdom to his mother Alexandra. Alexandra's reign was relatively quiet. The Pharisees assumed control, but they persecuted the Sadducees as they themselves had been persecuted in the days of Janneus. Alexandra's older son Hyrcanus II served as high priest. At Alexandra's death a younger son Aristobulus (II) dispossessed his brother. The governor of Idumea, Antipater (see XI.A below), espoused the cause of Hyrcanus, and civil war threatened

until Pompey appeared with his Roman legions to settle matters and further the aims of Rome. Aristobulus sought to defend Jerusalem from Pompey, but the Romans took the city and entered the temple. Pompey left the temple treasures untouched, however.

XI. The Jews under the Romans.—With the defeat of Aristobulus, Judea was made a part of the Roman province of Syria. Hyrcanus was rewarded for his loyalty to Pompey by being named ethnarch of Judea and high priest of the Jews. He paid an annual tribute to Rome.

A. Antipater. An Idumean named Antipater gained considerable power in Judean affairs during the reign of Hyrcanus II. He was loyal to the Romans and used his office to seek positions of influence for his two sons Phasael and Herod. Antipater was loyal to Cassius after the death of Julius Caesar, but he espoused the cause of Anthony when he defeated Brutus and Cassius at Philippi. Herod, a son of Antipater, was named procurator of Judea with the promise that he would later be named king.

B. Herod. The Parthians, eastern foes of Rome, attacked and subdued Jerusalem in 41 B.C., installing Antigonus, a son of Aristobulus II, as king and high priest. Herod fled to Rome, where Anthony made him king of the Jews and sent a Roman army to Palestine to drive out the Parthians and back up Herod's right to the throne. From 37 to 4 B.C. Herod ruled as king. He did much to enhance the prestige of Judea. An immense building plan included the rebuilding of the temple on a magnificent scale. His Idumean background and his personal cruelties, however, made him highly unpopular with the Jews.

C. Herod's Successors. After the death of Herod (4 B.C.) the kingdom was divided among his three sons: Archelaus was tetrarch of Judea, Samaria, and Idumea; Herod Antipas was tetrarch of Galilee and Perea (4 B.C.–A.D. 39), and Philip was tetrarch of Gaulanitis, Trachonitis, Batanea, Auranitis, and Panias (4 B.C.–A.D. 34). In A.D. 6 Archelaus was deposed by the Romans and Judea became a part of the province of Syria under a resident Roman proconsul with headquarters at Caesarea; the best-known proconsul was Pontius Pilate (A.D. 26-36). The proconsuls were opportunists whose policies impoverished the people.

Pontius Pilate, the Roman proconsul at the time of Jesus' crucifixion, was deposed in A.D. 36 following an attack he made upon the Samaritans. Agrippa, a grandson of Herod the Great, became ruler of Judea and most of the territory earlier ruled by his grandfather. At his death the Romans appointed a series of rulers who were generally unprincipled. One of these was Felix, procurator of Judea A.D. 52-60, whose injustices and cruelties caused the outbreak of the Jewish war, according to Josephus (*Ant.* xx.8.5-8 [160-181]).

D. The Zealots. The Zealots, who opposed paying taxes to Rome and attempted to follow the older Maccabees in seeking political independence, gained many adherents. In A.D. 65 a group of Jews captured the Roman fortress at Masada overlooking the Dead Sea, and killed the Roman garrison there. Revolts sparked by the Zealots broke out in many cities of Judea and Galilee. After a series of Roman defeats, Nero sent Vespasian to command the forces of Syria and lead the battle against the Jews. Between A.D. 67 and 70 a series of battles was fought. Vespasian was made emperor and returned to Rome, but Titus marched against Jerusalem and in A.D. 70 destroyed the city after a long siege. The temple was burned to the ground, the walls of the city were leveled, and more than a million lives were lost. Jerusalem became a heap of ruins in the charge of the tenth Roman legion.

Although the Jews made another attempt at independence under Bar Cochba (A.D. 132-135), Rome maintained

its hold on Palestine and the Jewish dispersion continued. In the years after the destruction of Jerusalem many Jews lived in Palestine, but it was not until 1948 that an independent Jewish state was again established, using the ancient name of Israel.

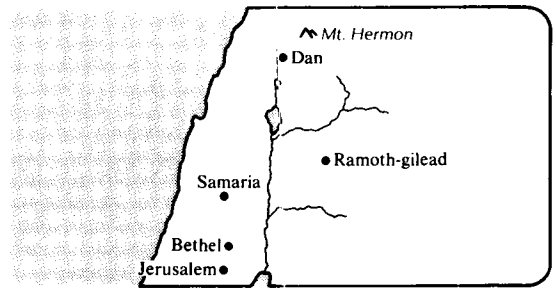
  B. Political Instability and Turmoil
  C. Syro-Ephraimite War
  D. Fall of Samaria and Its Aftermath

I. First Half-Century.—A. Origin of the Divided Kingdom. The collapse of the united kingdom is a sad tale quickly told. Though the northern and southern tribes had united under David and Solomon, the arrogant refusal of Rehoboam, Solomon's son, to relieve them of his father's harsh policies of taxation and forced labor resurrected long-buried divisions between north and south (2 S. 2:4; 5:1-5; 20:1f.). The elders of the northern tribes crowned Jeroboam, a former appointee of Solomon, as king over the new nation "Israel." For further details, *see* ISRAEL, HISTORY OF THE PEOPLE OF; JUDAH, KINGDOM OF.

B. Struggles of the Fledgling State. Rehoboam's desire for a buffer zone between the new nation Israel and his own capital, Jerusalem, spawned two generations of warfare in Benjaminite territory over their common border (1 K. 14:30; 15:16; 2 Ch. 13:3-20). Only the devastating invasion by the Egyptian Shishak (Sheshonq I; 1 K. 14:25f.) interrupted the warfare. Such warfare certainly disrupted the economic life of the state and brought hardship on many.

Jeroboam (930-909) is remembered for two things. First, he established his capital successively at Shechem, Penuel (1 K. 12:25), and Tirzah (1 K. 14:17) — an oddity reflecting



either an official policy of rotating capitals or his attempts to elude Shishak. Second, he provided two royal shrines at the ends of his realm (Dan in the north, Bethel in the south) to discourage pilgrimages to Jerusalem that might tempt his people to shift their loyalty to Rehoboam (1 K. 12:26-33). Unfortunately, he fitted those shrines with golden bulls, perhaps as pedestals over which the invisible Yahweh was presumably enthroned. This act not only earned the condemnation of Ahijah of Shiloh, the prophet who had designated him to be king (1 K. 11:29-39; 13–14), but was long thereafter remembered as "the sin of Jeroboam," the classic act of apostasy from which Israel never recovered.

In tune with the instability of this period, the reign of Jeroboam's son Nadab (909-908) was abruptly ended by the conspiracy of Baasha amid warfare with Philistia (1 K. 15:25-27; cf. Ahijah's prophecy, 1 K. 15:29f.). Of Baasha's long reign (908-886) little is known except his retreat from a fortress at Ramah, which Ben-hadad I of Syria attacked at the behest of Asa of Judah (1 K. 15:16-21). That retreat probably signaled the end of the border dispute.

II. Zenith under the House of Omri.—A. Stabilization and Progress. Baasha did not bequeath political stability to Israel. His son Elah (886-885) was assassinated, after a two-year rule, by Zimri, a chariotry officer (1 K. 16:8-10). Seven days later, however, Zimri perished in a palace fire which he himself had set while under attack by Omri, commander of the army, whom the army had just crowned king (1 K. 16:15-19). The ensuing four-year civil war between factions supporting Omri and Tibni finally ended with the death of Tibni and Omri's accession to the throne (1 K. 16:21f.). Thus, Israel received its first dynasty and a thirty-year period of stability that lifted it to the zenith of its power.

Omri (885-874) and Ahab (874-853) were remarkably able rulers. Through royal marriages they established friendships with neighboring Phoenicia and Judah (1 K. 16:31; 2 K. 8:26; 2 Ch. 21:6; 22:2). Their subjection of Moab enabled them to reacquire territory in Transjordan once part of the Davidic empire and to settle Israelites there (2 K. 3:4; cf. the testimony of Moab's King Mesha, *ANET*, pp. 320f.). By dominating city-states in Transjordan (notably Aphek and Ramoth-gilead; cf. 1 K. 20:26, 30; 22:3-36), they successfully kept the powerful Arameans at bay — often in military league with Judah (1 K. 22:2-36; 2 K. 3:4-27). They even participated in a coalition that fought the Assyrian monarch Shalmaneser III (859-825) to a draw at the Battle of Qarqar (853; *ANET*, pp. 278f.).

Prosperity accompanied that military might. The Omrides not only maintained a royal residence at Jezreel (1 K. 21) but also constructed a new one called "Samaria," the dynasty's one lasting legacy (1 K. 16:24; 22:39). Excavations there have unearthed fortifications and luxurious ivory inlays that illustrate the wealth of the dynasty (cf. Am. 3:15). On the other hand, the lot of the common folk worsened. A lengthy drought hurt many (1 K. 17), and the poor were at the mercy of the rich (2 K. 4:1).

B. Elijah and the Religious Crisis. The period's political stability and material prosperity could not hide its severe religious crisis. Ahab's Phoenician wife Jezebel established the worship of the Tyrian god Baal Melqart. Prophets of Baal enjoyed royal status (1 K. 18:19), altars of Yahweh were torn down (19:10, 14), and prophets who protested were either killed or driven underground (18:4). As he was only a nominal Yahwist, Ahab had a temple for Baal built at Samaria (16:32f.). While many stood for Yahweh (18:3-13; 19:18; 22:8-28), the majority seemed undecided (18:21). Elijah, the awesome "troubler of Israel" (v. 17), stood against this tide of apostasy. He called for Israel to choose between Baal and Yahweh (v. 21), condemned Ahab for his complicity in the apostasy and predicted Ahab's downfall (21:17-24), and made plans to rid Israel of the Omrides altogether (19:15-21).

C. End of the Omri Dynasty. Elijah's prediction soon was fulfilled. Ahab died in battle against Aram (1 K. 22), his son Ahaziah (853-852) died a few months after a fall (2 K. 1:2-17), and another son, Jehoram (Joram) (852-841), suffered the loss of Transjordan under Mesha's rebellion (2 K. 1:1; 3:4f.; cf. Moabite Stone, *ANET,* pp. 320f.) and battled Damascus (2 K. 6–7; 8:28; 9:14). Although he removed a highly offensive pillar of Baal from Samaria (2 K. 3:2) and enjoyed the support of Elisha and the prophets in his war efforts (2 K. 3:11-19; 6:11f.), Jehoram fell victim to Yahweh's intervention and probably to popular resentment as well.

While Jehoram nursed battle wounds in Jezreel (2 K. 9:15), Elisha dispatched a prophet to Ramoth-gilead to anoint as king a military officer named Jehu — much to the delight of the army's officers (2 K. 9:1-13). Jehu immediately carried out his mandate by hastening toward Jezreel, killing Jehoram on its outskirts, and later wounding his visitor, King Ahaziah of Judah, who fled to Megiddo and died (2 K. 9:27f.). Jehu had Jezebel thrown to her death from the palace window (2 K. 9:30-37) and, by an exchange of diplomatic correspondence, persuaded leaders in Samaria to execute Ahab's seventy sons (2 K. 10:1-7). He then went to Samaria himself, exterminated the remains of Ahab's retinue (2 K. 10:17) as well as the land's Baal worshipers, and converted the temple there into a latrine (2 K. 10:18-27). The house of Omri was gone forever.

III. Fortunes under the House of Jehu. *–A. Period of Aramean Supremacy.* Though Jehu (841-814) gave Israel its longest dynasty, the first half-century of that house was an unhappy one. His actions against the house of Ahab and the Baal worshipers cost him the friendship of Phoenicia and Judah. At the same time, Hazael, one of Israel's most dreaded foes (2 K. 8:12f.; Am. 1:3-5; cf. Isa. 9:11f. [MT 10f.]), led a resurgent Damascus to deprive Jehu of all territory in Transjordan (2 K. 10:32f.; cf. Am. 1:3) and to reduce the army of his son Jehoahaz (814-798) to a nominal force (2 K. 13:7). Moab also attacked a weakened Israel (2 K. 13:20). While Jehoahaz enjoyed some military successes (2 K. 13:4f.), only Yahweh's compassion enabled the helpless state to survive during Hazael's oppressive campaigns (2 K. 13:22f.).

B. Resurgence under Jehoash and Jeroboam II. The four western campaigns of the ambitious Assyrian ruler Adadnirari III at the dawn of the 8th cent. crippled Damascus and gave Israel new political freedom. Jehoash (798-782) recaptured from Ben-hadad II, Hazael's son, all the cities that his father Jehoahaz had lost to the Arameans in Transjordan (2 K. 13:25). When King Amaziah of Judah, intoxicated with his recent victory over Edom, demanded war, Jehoash reluctantly obliged. He prevailed, even damaging Jerusalem itself (2 K. 14:7-14; 2 Ch. 25:5-24).

This resurgence crested during the reign of Jeroboam II (793-753). He extended Israel's borders to their location during Solomon's day (2 K. 14:25; cf. 1 K. 8:65), possibly even subduing Damascus, Hamath (2 K. 14:28?), and Moab (Am. 6:14?). His control of the lucrative trade routes crossing Israel blessed the state — particularly the upper classes — with a prosperity unknown since Solomon's empire. It was an era so great that only Yahweh Himself could be credited with responsibility for it (2 K. 14:26f.).

C. Prophetic Diagnosis of Terminal Illness. Unfortunately, behind the glitter of the "golden age" lay cancerous social and religious decay. The prophets Amos and Hosea listed the symptoms: shocking oppression of the poor by the rich (Am. 2:6f.; 5:10-12; 8:4-6), unbridled self-indulgence (4:1-3; 6:1-7), a presumptuous sense of security in Israel's election (3:1f.; 9:7) and in busy cultic activity (5:21-24), and adulterous pursuit of Baal's fertility cult (Hos. 4:7-19; 6:8-10; 8:5f.).

Such symptoms demanded a terminal prognosis. They pronounced the nation's doom (Am. 5:2; 7:7-9; Hos. 7:13; 9:11-17); Yahweh would divorce His adulterous people and abandon them to destruction (Hos. 2:2-13 [MT 4-15]). Contrary to popular expectations, the "day of Yahweh" would bring them disaster, not victory (Am. 5:18-20).

IV. Catastrophic End. *–A. Rise of Assyria.* The reign of Tiglath-pileser III in Assyria (745-727) launched all of Syro-Palestine toward its destiny. Whereas his predecessors had contented themselves with merely taking tribute from there, he sought permanent conquest of the area and its rich timber, mineral deposits, access to Egypt, and lucrative Mediterranean commerce. His climactic conquest and incorporation of Hamath into the Assyrian provincial system (738) served notice that henceforth history in the West would be guided by the "Great King" of Assyria.

B. Political Instability and Turmoil. The death of Jeroboam II (753) plunged Israel into chaos. Within twenty years, Israel had five kings, three of whom seized the throne by violence. Jeroboam's son Zechariah was murdered by the usurper Shallum ben Jabesh after a six-month rule (2 K. 15:10) — thus fulfilling the earlier promise to Jehu's house (2 K. 15:12; cf. 2 K. 10:30; Hos. 1:4f.). He in turn fell a month later to Menahem ben Gadi in a brutal civil war (2 K. 15:14-16). To prop up his shaky regime, Menahem paid tribute to Tiglath-pileser III (Pul) by taxing his wealthy citizens (2 K. 15:19f.).

Menahem's lengthy reign (752-742) proved to be only the calm before the storm. His son Pekahiah was assassinated after only two years by one of his officers, Pekah ben Remaliah (740-732), in a coup that may have had Aramean and Philistine backing (Isa. 9:8-12 [MT 7-11]). On the problem of the length of Pekah's reign, *see* CHRONOLOGY OF THE OT V.

C. Syro-Ephraimite War. The vassals of Assyria soon became restive. In 734 Rezin of Damascus and Pekah of Israel formed a coalition to resist Assyria along with Edom and Philistia (2 Ch. 28:17f.). Judah, well aware of Assyria's expedition into Philistia earlier that year, refused to join. When Rezin and Pekah attacked Jerusalem to enthrone the son of Tabeel, an Aramean sympathetic to their cause (Isa. 7:6), Ahaz rejected Isaiah's advice (Isa. 7) and sent a sizable present to Tiglath-pileser himself with an appeal for military intervention (2 K. 15:37; 16:5-8). The Great King gladly obliged (2 K. 16:9), thereby forcing the coalition to suspend its attack and face the Assyrians. The next year (733) the Assyrians overran Transjordan and Galilee, destroyed many cities (cf. the archeological evidence from Megiddo and Hazor), parceled the territory

into three new Assyrian provinces, deported the ruling classes, and imported their own officials (2 K. 15:29). In 732 Tiglath-pileser took Damascus, executed Rezin, and made it an Assyrian province. A large part of Syro-Palestine was now under his control.

With its territory virtually reduced to the mountains of Ephraim and the city of Samaria, Israel escaped total destruction when Hoshea ben Elah (731-722), possibly a member of a pro-Assyrian faction, murdered Pekah (2 K. 15:30) and submitted to Assyria (cf. *ANET*, p. 284).

D. Fall of Samaria and Its Aftermath. For some unknown reason, the accession of Shalmaneser V (726-722) in Assyria tempted Hoshea to shatter a five-year peace with rebellion. He foolishly solicited aid from one So, King of Egypt — aid which never came — and withheld tribute from Assyria (2 K. 17:4). These proved to be suicidal steps, probably taken, however, to prevent a coup by an anti-Assyrian party in Samaria.

Shalmaneser responded quickly. In 724 he took Hoshea prisoner and occupied everything but the capital city. Two years later (722) he overcame its resistance; 27,290 captives were later taken to Mesopotamia and Media (cf. Sargon's account, *ANET*, pp. 284f.; 2 K. 17:3-6), where they vanished from history. The two-hundred-year-old state of Israel had come to an end.

The territory was organized as the Assyrian province of Samerina (cf. the NT term "Samaria") under the administration of peoples imported by Shalmaneser's successor, Sargon II (721-705), the ancestors of the NT Samaritans (2 K. 17:24f.). The immigrants added Yahweh to their list of gods and established local religious customs (2 K. 17:29-33). To end a plague of lions, Sargon returned a deported priest to Bethel to instruct the new residents in the "law of the god of the land" (2 K. 17:25-28). Over the next four decades, more foreign colonists immigrated and mixed with the population of Samaria (Ezr. 4:2, 10).

ISRAEL, RELIGION OF. This article describes the development of the faith and religious practices held within that circle of the patriarchal seed from which the normative OT canon emerged. Thus no attempt is made here to present the pagan religious convictions occasionally embraced by the mass of the patriarchal stock except to the extent that they influenced the religious persuasions of so-called spiritual Israel. Archeological evidence and, to a much lesser extent, form-critical studies have essentially verified the biblical witness to the progressive development of this religion, and therefore the Bible's own outline of the development of this religion is followed here.

  C. Rise of Personal Religion

It will become obvious through this study that Israel wore the garments and behaved in the manner of its age, but it always remained distinctive in its religious convictions.

I. Patriarchal Religion. —*A. Identity of Their God.* Many OT scholars agree that the stories about the patriarchs cannot be used just as they stand in order to present the religion of Israel's fathers. According to their consensus, the text of Genesis contains at least three earlier narratives — J, E, P (to be discussed below) — each of which was separated from the time of the patriarchs by many centuries, during which time the stories contained in them were transmitted orally, more or less uncontrolled by written sources, and were reformulated time and again in order to meet the changing needs of the people transmitting these stories. In the opinion of these scholars E (Ex. 3:13-15) and P (Ex. 6:2f.), although claiming an identity between the God of the patriarchs and Yahweh, who for the first time revealed himself to Moses, in fact betray a vast cleavage between the god of the fathers and Yahweh. J, by contrast, simply assumed the use of Yahweh in pre-Mosaic times (cf. esp. Gen. 4:26) and reshaped his material in this light.

Older critics, e.g., J. Wellhausen and W. Robertson Smith, attempted to reconstruct the patriarchal religion by assuming that this religion existed in an early and primitive form. Imposing upon Genesis a model that assumed the progressive evolution in mankind's religious ideas, they sifted the sources for primitive religious features such as animism, fetishism, and totemism and credited these features to the patriarchs. Moreover, they tried to validate their reconstruction by appealing to customs and ideas of the pre-Islamic Arabs.

This idealistic reconstruction, however, was demolished by the hard historical fact established from archeological sources that the religious ideas of the ancient Near East at the time of the patriarchs were much more sophisticated than was assumed by these critics.

Instead of imposing an arbitrary idealistic model on the text, modern critics use the form-critical tools forged by H. Gunkel ("Fundamental") at the turn of the century. Using these tools A. Alt began the modern discussion of patriarchal religion by noting two groups of epithets for the gods of the patriarchs. One set, characterized by an *'ēl* element followed by a substantival form, included *'ēl ʿôlām* (Gen. 21:33), *'ēl ʿelyôn* (Gen. 14:18-22), *'ēl rō'î* (Gen. 16:13), etc. Alt understood the *'ēl* element as an appellative, "god," and the second as a proper name; thus he rendered them as "the god ʿŌlām," "the god ʿElyōn," etc., and he thought of them as local deities tied to Pales-

tinian shrines encountered by that element of Israel that entered the land.

In Alt's second group of epithets, the god is identified by the name of a patriarch; thus, "the Fear of Isaac" (Gen. 31:42, 53), "the Mighty One of Jacob" (Gen. 49:24), "the God of Abraham" (Gen. 31:42), etc. He thought that these gods were originally separate deities, but that in the development of Israel's traditions they were assimilated into a single family god by artificially linking the patriarchs together into a common genealogy. This was done at the same time they were associated with Yahweh. According to Alt these tutelary deities were nameless and were not attached to a local shrine but to clans with whom they entered into a covenantal relationship. These deities assumed the responsibility to guide the clan's destiny, lead them in battle, and establish justice for them. Such, he contended, was the true nature of the patriarchal religion.

Later critical research has modified his concept about the clan deities and has radically altered his view about the meaning and nature of the god(s) with the *'ēl* element.

J. Lewy demonstrated from parallels in the Old Assyrian Cappadocian texts of the early 2nd millennium B.C. that the Amorites called on their ancestral god as "the god of your [our, etc.] father," and that this god had the personal name Ilabrat, just as the patriarchs called 'El Shaddai the "god of your father" (*RHR*, 110 [1934], 29-65; cf. Gen. 49:25). Cappadocian texts published later included the god Amurru, who also was called "the god of my father." F. M. Cross (pp. 9-11) collected additional evidence corroborating Lewy's modification of Alt's view and modified it further by noting that "the Amorite gods of the Father are neither anonymous gods nor minor genii," but are commonly the high gods in the cult at Ugarit, namely, 'El, Haddad, and Dagan. Moreover, most modern critics, e.g., O. Eissfeldt (*JSS*, 1 [1956], 34), U. Oldenburg (*Conflict Between El and Ba'al in Canaanite Religion* [1969]), and Cross (pp. 46-60), regard the first element as the proper name of the high god in the Ugaritic pantheon, 'El, whose cult flourished no later than 1400 B.C., and the second element as an attributive modifier; thus, "'El, the Everlasting One," "'El, the Most High," etc. In favor of taking *'ēl* as a proper name, it is argued, are the facts that this is its most common usage in the oldest strata of the Semitic languages, that this must be its meaning in Gen. 33:20 and 35:7, and that Alt's suggestion would attribute to an 'Elyon the function of creator, a function ascribed to 'El in the Ugaritic mythologies.

If one accedes to this plausible suggestion that *'ēl* is a proper name, then a strong case can be made for merging or identifying Canaanite 'El with the 'El of the patriarchs. First, 'El was probably the dominant figure in this pantheon at the time of the patriarchs, and significantly his role among the gods reflects a patriarchal society. Second, to judge from the proto-Sinaitic inscriptions (cf. W. F. Albright, *Proto-Sinaitic Inscriptions and Their Decipherment* [1966]), his cult was widespread in south Canaan, even as the epithets with *'ēl* in Genesis are associated with southern sanctuaries (cf. 14:18; 16:13f.; 17:1; 21:33; etc.). Third, 'El shares the same attributes as those ascribed to *'ēl* in Genesis: both are called "the ancient/eternal one" and "creator of all creatures." Fourth, Canaanite 'El's characteristic mode of manifestation appears to be through visions, spoken messages, and dreams (cf. 15:1, 12; 17:1; etc.). Fifth, according to Cross (p. 44), it is extraordinary that "*'Ēl* is rarely if ever used in the Bible as the proper name of a non-Israelite, Canaanite deity in the full consciousness of a distinction between 'Ēl and Yahweh, god of Israel."

But there are even stronger reasons against merging or equating Canaanite 'El with the God of the Fathers. First, one should note not only the similarities between Canaanite 'El and the God of the Fathers, but also the striking differences between them. In *UT* 51:iv:27-30, e.g., we are told of 'El's reception of 'Asherah: "As soon as 'El spied her he unfastened his scabbard and laughed; he put his feet on his footstool and wiggled his toes" (translation by Cross, p. 37). He thereupon offered her food, drink, and his conjugal bed. In another text his lackeys made him so drunk he passed out, and in yet another he took his sisters to wife and emasculated his father. There is no evidence that the patriarchs worshiped such a god. To argue that earlier crude features have been purged from the texts begs the issue. Second, the Bible ingenuously admits that Israel's forefathers worshiped pagan gods on the other side of the Euphrates and in Egypt (Josh. 24:14), that Israel emerged out of the nations of the earth (Gen. 10), and that Jerusalem originated as a pagan cult center (Ezk. 16:3). Why, then, should we discredit its claim that the patriarchs worshiped the one true God? Third, *'ēl* is both a proper name and a generic appellative in the earliest strata of the Semitic languages; thus there is no good reason to deny that the patriarchs understood *'ēl* as designating the one true God — it must have been understood in this way in the canonical text. In Gen. 31:13 the identification of *'ēl* with the true God is safeguarded by the addition of the article: "I am *the* God of Bethel." The construction in Gen. 33:20 finds parallels in Nu. 16:22 and Josh. 22:22. Fourth, the temple of El-berith in Jgs. 9:46 is named after Canaanite 'El in contrast to Yahweh. Thus the Bible consciously distinguishes Canaanite 'El from Israel's God. Fifth, it seems highly tenuous to base an equation on similar attributes when these attributes are consistent with Israel's faith. Sixth, there is no warrant for replacing the presentation of the patriarchal religion in Genesis, a book whose historicity has been validated many times by archeology, with a reconstruction of that religion deduced from archeology and comparative religion.

The similarities among the clan god of the Amorites, Canaanite 'El, and the God of the fathers show two things: the antiquity of the stories in Genesis and the revelation of God in forms common to the age. J. van Seters (*Abraham in History and Tradition* [1975]) challenged the antiquity of the patriarchal stories, but his work serves to criticize scholarly interpretation of the biblical text and not the antiquity of the stories themselves.

B. Names of God and His Character. These epithets reveal to us in part what the patriarchs believed about God: He is "God Most High, Maker of heaven and earth" (Gen. 14:18f.), "God of seeing" (16:13), "the Everlasting God" (21:33), and above all "God Almighty" (*'ēl šadday*, Gen. 17:1; Ex. 6:3; etc.), which is now understood to mean "the Ruling God" on the basis of the Deir 'allā texts (so P. K. McCarter, *"ēl šadday,"* a paper read at the Nov. 1979 meeting of the Society of Biblical Literature in New York). This transcendent God is the "God of Abraham" (24:27; cf. 31:42, 53), "God, the God of Israel" (33:20), the God of the Fathers (31:5, 29, 42; 46:3; 50:17). He is "the Fear of Isaac" (31:42), "the Mighty One of Jacob . . . the Shepherd, the Rock of Israel" (49:24). (In many of these texts He is called Yahweh, which we shall discuss below.) He became their God by calling them and entering into covenant with them with promises to bless them (12:2), to make them fertile (17:5), to give them the land of Canaan (12:7, etc.), and to protect them (15:1).

C. Cult of the Patriarchs. As a sign that this God had so favored them, the patriarchs circumcised themselves (Gen. 17:9-14), a fertility rite performed on marriageable males in the ancient Near East and transposed in the pa-

ISRAEL, RELIGION OF

triarchal rites to the eighth day after birth as an initiatory rite into the blessed stock.

They filled other cultic practices borrowed from their pagan neighbors with their new faith. In ancient Canaan the pagans performed fertility rites under green trees that served as symbols of fertility. The patriarchs also worshiped under green trees where their God, who abhorred Canaanite practices (15:16), appeared to them with His covenant promises to bless them (12:1) and make them fertile (17:5; cf. 12:6f.; 18:1). Abraham planted a tamarisk tree at Beer-sheba and called on God (Gen. 21:33). Thus God appeared to them at sites where they might expect to see Him, but the texts do not suggest that they adopted the Canaanite practices. They also built altars and offered sacrifices at these sites; the forms of these practices probably resembled those in the neighboring religions, but their meaning was filled with the patriarchs' unique faith. God credited this faith to them as righteousness (15:6) and rewarded it with innumerable offspring.

It is sometimes said that stones also played a vital part in Jacob's religious practices. But the stones mentioned in Gen. 31:45-49 are clearly commemorative and functioned in the same way as in modern Israel. In 28:18-22 and 35:14, however, the stone is called a *maṣṣēḇâ* and anointed with oil. A *maṣṣēḇâ* in the Canaanite religion was a stone smeared with blood or fat, moistened with drink offerings, and kissed by the worshiper as an idol. Jacob, however, set up his *maṣṣēḇâ* not as an idol but as a consecrated memorial of the mercy shown him.

Finally, we note that whereas the patriarchs adopted and adapted Canaanite practices such as circumcision and worship under trees, their God made it clear to them by His substitution of a ram for Isaac that He repudiated child sacrifice (Gen. 22:1-18), an aspect of the Canaanite 'El cult (cf. Albright, *Yahweh*, pp. 234-244).

II. Religion of Moses.*—*A. Sources. One's understanding of the development of Israelite religion is related to one's view of the date and historical credibility of these sources. Source critics accept most of the classic division of the Pentateuch into a Yahwistic tradition (J), an Elohistic tradition (E), a Deuteronomistic tradition (D), and a Priestly tradition (P), but they disagree on how the material within these sources was transmitted, on how they were edited, and on how much actual history they contain.

Wellhausen began his study with the persuasion that the Pentateuch consisted of these four sources and with W. M. L. de Wette's conclusion that D, the law that figured in Josiah's reform (2 K. 22–23), was in fact a pious forgery composed at that time (*ca.* 625 B.C.). Whereas earlier scholars had tended to regard P as the oldest and most fundamental source, he immediately leaped upon the suggestion of E. Reuss and H. Graf that P was the latest source. According to Wellhausen, P set forth the ceremonial law with the underlying assumption that Israel was a priestly theocracy, a situation that prevailed either at the time of the second temple (*ca.* 500 B.C. onward) and not during the monarchy, or at the nation's primitive beginnings presented in the more reliable historical evidence of the books of Judges and Samuel. Thus the idea that Moses founded the theocracy on "ethical monotheism" was a postexilic creation. In Wellhausen's view the prophets, in order to explain Israel's fall into gentile hands, interpreted Israel's history by elevating Yahweh from a national god unequal to the crisis posed by the imperial powers of Assyria, Babylon, and Persia to a universal God over all the nations who directed history by rewarding the righteous and by punishing the wicked. Moreover, in his scheme the earliest hexateuchal source had not been composed before the middle of the 9th cent., and it reflected the historical situation at the time of its composition.

H. Gunkel (*Schöpfung*) radically altered Wellhausen's entrenched views by two new insights: (1) an awareness of the continuity between the religion of the OT and the religions of Mesopotamia and Egypt, and (2) his introduction of the methods of form criticism to the analysis of the four documentary sources. Instead of regarding these literary strands as original compositions, he saw them as a relatively late phase in the history of the oral traditions embedded in them. According to Gunkel these earlier, oral sources had original "settings in life" (*Sitze im Leben*) and these settings gave them fixed forms (*Gattungen*). In order to obtain a picture of Israel's religious life centuries earlier than the literary strands, the scholar must trace the history of these independent, originally oral units (*Gattungsgeschichte*). Modern scholarship almost universally adopts this practice, but as the following survey will show, it has yielded no consensus on the identification of these units or on their historical credibility.

On the setting of the Decalogue, H. Gressman (*Mose und seine Zeit* [1913]) argued that it originated in the worship which Israel's ancestors had brought with them from the desert because it bore no evidence of the influence of Canaan. Gunkel's student S. Mowinckel (*Le Décalogue* [1927]) ascribed the Decalogue to the cultic setting of a great autumnal celebration in the first temple that he entitled "the festival of Yahweh's enthronement." This proposed setting of the cult for the transmission of pentateuchal materials substantially modified Gunkel's picture, which emphasized the popular folk settings. A. Alt contended that the distinctively Israelite apodictic law (best exemplified in Ex. 20:2-17) was transmitted in the cult, and the case law represented in the book of the covenant (Ex. 20:22–23:19) may have circulated at the city gate. But G. E. Mendenhall (*BA* 17 [1954], 26-46) argued that the Decalogue was formulated according to the pattern of Hittite suzerainty treaties that were couched in a style resembling Alt's apodictic laws.

Regarding the confessions of Yahweh's mighty acts, G. von Rad ("The Form-Critical Problem of the Hexateuch," in *Problem of the Hexateuch and Other Essays* [1965], pp. 1-78) found short historical credos in the Hexateuch (esp. Dt. 6:20-24; 26:5b-9; Josh. 24:2b-13) whereby early Israel, possibly at the Feast of Weeks in Gilgal, affirmed its faith in Yahweh's saving acts. Since these confessions do not mention the giving of the law at Sinai, von Rad argued that this later element of the tradition had been woven into it by J. Some argued that the Sinai story was just as primary as the Exodus tradition, but they thought it was handed down at the covenant renewal ceremonies at the fall festival. By contrast M. Noth (*History of Pentateuchal Traditions* [Eng. tr. 1972]) detected five great themes — the promise to the patriarchs, the Exodus from Egypt, the wanderings in the wilderness, the revelation at Sinai, and the entry into the land — which, he contended, were originally isolated traditions later creatively linked together to construct one unified history of Israel. But F. M. Cross (pp. 83-90) disagreed with both von Rad and Noth in their separation of Israel's confession of the *Magnalia Dei* from the stipulations of the law. Following Mendenhall, Cross argued that the discovery of the covenant forms from the ancient Near East shows that the recital of the suzerain's mighty acts was followed by covenant stipulations; thus these elements belong together. He suggested, therefore, that the confessions of Yahweh's mighty acts belonged to the first movement of a covenant renewal festival and the recitation of the law was the consequent act in the ritual drama. Cross's reconstruction, more plausible than that of von Rad or Noth,

underscores the inability of form critics to identify authoritatively original, primitive units.

The same sort of confusion prevails with respect to the identity and date of the literary sources. For example, Y. Kaufmann (pp. 175-200) demonstrated the preexilic date for many of the cultic prescriptions contained in P, and on this account dated P to the preexilic era before D. Noth (*op. cit.*) thought P was primarily a historical narrative into which various collections of priestly instructional material were incorporated in progressive stages. B. A. Levine (*IDB Supp.*, pp. 683-87) preferred to see a chronological overlapping of code and narrative with a mutual influence of one on the other. According to I. Engnell ("Pentateuch," in *Rigid Scrutiny* [Eng. tr. 1969], pp. 50-67), no literary narrative source "P" ever existed. For him P was the "circle" that last handled the complex of traditions called the Tetrateuch. R. Rendtorff (*Das überlieferungsgeschichtliche Problem des Pentateuch* [*BZAW*, 147, 1977]) sought to undermine a basic tenet of source criticism by denying P's existence as a complete and continuous strand in the Pentateuch. Cross (pp. 295-325) argued that P was never an independent code but a systemizing expansion of the JE epic tradition completed in the 6th cent. B.C. B. Childs (*Intro. to the OT as Scripture* [1979], p. 132) supposed that a hiatus remains between the older sources including P and the final editing of the Pentateuch.

In sum, form-critical research has left us with the conclusion that much of the material in the Pentateuch is ancient but with no agreement about the development of the pentateuchal sources that present Israel's faith and with little prospect of adjudicating between rival theories.

Form critics also cannot speak authoritatively on the amount of real history preserved in the allegedly earlier oral traditions. I. Engnell (*op. cit.*) presented the strange picture that Israel's cultus grew out of a progressive historicizing of mythological elements found in the liturgies and hymns employed at the cultus during the monarchy. M. Noth (*NHI* [2nd. ed. 1960], pp. 42-50) held that there is historical memory in the traditions, but he thought that the national entity we call Israel first took shape on Palestinian soil. W. F. Albright (*FSAC*, pp. 64-81) and most American scholars view these traditions as historically valuable.

Apart from a few exceptions, however, there is general agreement that Moses founded the Israelite religion. Most scholars accept N. Söderblom's dictum that if Moses did not exist, then some other figure must be invented to explain the existence of the nation and its religion (*Das Werden des Gottesglaubens* [1916], p. 310). The new consensus is highly significant, for against the older criticism it corroborates the biblical picture that Moses founded Israel's unique religion and that the prophets were reformers, not innovators (Jer. 2:5-8; Mal. 3:6).

Good evidence supports the persuasion that the Pentateuch is historically accurate and that the religion it credits to Moses is not anachronistic. Ringgren argued: "A nation is unlikely to invent a period of slavery in its past" (*Israelite Religion*, p. 29). Furthermore, it has long been noted that several Egyptian personal names are found in the genealogies, especially in the tribe of Levi: Phinehas, Pashhur, Moses (from an Egyptian root meaning "to bear" or "to beget"), etc. Then, too, the Israelite covenant form has a remarkable similarity to that of the Hittite treaties (mid 2nd millennium B.C.), consisting of a preamble, historical prologue, stipulations, a provision that the document be deposited in a temple and regularly read in public, a calling of witnesses, and formulas of curses and blessing (cf. M. G. Kline, *Treaty of the Great King* [1963]). Moreover, stipulations in the book of the covenant have striking analogies in earlier Mesopotamian law codes, and E. Gerstenberger (*JBL*, 84 [1965], p. 44) has convincingly shown that these casuistic laws "are expressions of a former agreement." The Mosaic legislation calling for a portable tent-shrine finds analogies among the pre-Islamic Arabs, in a bas relief from the period of Ramses II (*ca.* 1285 B.C.), in earlier prefabricated structures in Egypt that resemble the one called for by Moses, in analogous religious structures known from the earliest times in Egypt's history, and in a Ugaritic text calling for King Krt to practice certain rituals in a tent despite the fact that his was an age of roofed houses (C. H. Gordon, *Ugaritic Literature* [1949], pp. 5f.). Finally, religions with a highly organized priesthood and sacrificial system existed in Mesopotamia, Egypt, and Canaan at the time of Moses.

We conclude then that one need not be skeptical regarding the biblical claim that when Israel entered into the land of Canaan its religion had already assumed its basic beliefs. Cundall (comm. on Judges [*Tyndale OT Comms.*, 1968], p. 37) noted: "It was a near-miracle that this religion survived the searching test of the crucial centuries in Canaan. It would have been more than a miracle had such a religion developed after the settlement, with all the forces making for disintegration and deterioration pressing in upon it."

B. God's Name, Yahweh. 1. Form. God's personal name occurs in the Pentateuch in three forms: usually in a long form *YHWH* (Ex. 6:3), rarely in the short independent form *Yāh* (Ex. 15:2) and in personal names as the element *Yô* or *Yᵉhô* (presumably from **Yā*, **Yaw*, or **Yhw* (Ex. 6:20; 17:9; etc.). The full form is probably a nominal formation with a prefixed *yodh* from the root *hwh* ("to be"; cf. L. Koehler, "Vom hebräischen Lexikon," in *Oudtestamentische Studiën*, 8 [1950], 153-55). It is most instructive to note that *Yô-* (< **Yā* or **Yaw*) occurs in the name of Moses' mother, Jochebed ("*Yaw* is glorious"), and we have no reason to doubt the antiquity of the name.

In extrabiblical, preexilic literature only the forms *YHWH* and *Yw* occur. *YHWH* is found in the Moabite Stone (*ca.* 850 B.C.), on a seal from the 8th cent. B.C., in the Arad Letters (late 7th cent. B.C.), and in the Lachish Letters (587 B.C.). The element *-yw* (= *yaw*) occurs in seals and in the Samaria ostraca. The form *Yhw* occurs in postexilic Aramaic texts (*THAT*, I, *s.v.* יהיה [E. Jenni]).

From postexilic times Jews substituted in their reading of the Bible the title *ʾᵃḏōnāy* ("lord") for the tetragrammaton *YHWH*, and the Masoretes reflected this practice by imposing the vowels of this word into the tetragrammaton, eventually resulting in the hybrid reading *Jᵉhōvāh*. Because the Jews ceased to pronounce the name, its original vocalization is uncertain, but on the basis of philological considerations and some Greek transcriptions of the name in the Church Fathers it is generally agreed that it should be pronounced "Yahweh."

2. Meaning. Numerous conjectures have been made about the meaning of "Yahweh." We shall limit ourselves here to a consideration of those meanings proposed on the basis of Ex. 3:14f., where its authoritative meaning for the religion of Israel is given in the sentence *ʾehyeh ʾᵃšer ʾehyeh* ("I am the one who I am"). The variations between *ʾehyeh* and *yahweh* need not trouble us because divine titles in the Near East can be derived from the first person (here *ʾehyeh*) and the third person (here *yahweh*), and the alternation between *hwh* and *hyh* can be expected in Biblical Hebrew. In any case, the text makes clear that *ʾehyeh* and *yahweh* are acceptable alternate forms of the divine name by paralleling "*ʾehyeh* has sent me" (v. 14) with "*yahweh* ... has sent me" (v. 15).

Unfortunately, the sentence is grammatically enigmatic.

Some suggest that it is deliberately evasive. "We are left with the impression that this god does not want to surrender his name to men. The widespread conception that whoever knows a person's name has power over that person makes this evasion intelligible" (Ringgren, *Israelite Religion*, p. 33). Against this interpretation weighs the fact that all other divine names carry significance, and, as we shall see, such a response is unlikely in this context. The LXX rendered the sentence, "I am the Being," and many have understood it to be an ontological statement about God's eternal or pure being. But such an interpretation is too abstract a concept for Hebraic thought and ill suits the context. Others think it expresses God's independence and sovereignty. "He is from-within-determined not moved by outside influences" (Vos, pp. 118f.). This suggestion fits the grammar but not the context.

The suggestion that most readily meets the contextual requirement is that of W. Robertson Smith, G. von Rad, B. Childs, etc., who argue that it means, "I am present, the one truly present." Yahweh stated His name in this full-sentence form in response to Moses' second of four objections against his accepting the divine call to lead Israel out of Egypt. His first objection, framed in the form of a question, was: "Who am I" (3:11), to which God responded, "*'ehyeh 'immāk* ("I will be with you," v. 12). His second objection, also phrased in the form of a question begging for reassurance, was: "What is [your] name?" (v. 13). The most likely response of those meanings proposed is: "I am present, count on me!" (For the other two questions and responses see 4:1-9, 10-16.) Vriezen (p. 181) further noted: "More important than the correctness of the etymology is the fact that in the faith of Israel . . . the name Yahweh had this meaning."

3. Origin. The name Yahweh may be attested outside of the Bible at or before the time of Moses in Egyptian place names (14th-13th cents. B.C.; cf. R. Giveon, *VT*, 14 [1964], 239-255, esp. p. 244) and in the Ebla texts (*ca.* 2300 B.C.; Kitchen, p. 47), but the evidence is flimsy. Other suggested occurrences in Akkadian proper names and in the Ugaritic texts have not been able to withstand close linguistic scrutiny. A popular theory is that Yahweh was a god of the Kenites, a tribe in the district of Sinai to which Moses' father-in-law belonged, and this fact, it is suggested, explains Yahweh's association with that mountain. But this theory ignores the Yahweh element in the name of Moses' mother, and has no textual or artifactual support. Cross (p. 72) thinks that Yahweh is a south Canaanite cultic name of the Canaanite 'El and that the god Yahweh later split off from 'El. But this speculation is based on the faulty assumption that the patriarchs worshiped Canaanite 'El (see I.A. above), and fails to take Yahweh's holiness seriously.

According to Genesis people began to call on the name of Yahweh both before and during the time of the patriarchs (Gen. 4:25; 12:8; etc.). But how can we reconcile this claim with the account in Ex. 6:3 that the name Yahweh was not known to the patriarchs? It is highly unlikely that the author of the unified Pentateuch thought he was contradicting himself. These epic narratives can be reconciled by correctly understanding the crucial terms "name" and "know" in Ex. 6:3. It is generally recognized that among the Semites a name was not so much a label as a revelation of a person's character, nature, and role. J. A. Motyer (*Revelation of the Divine Name* [1959], pp. 11f.) helpfully paraphrased Ex. 6:3: "in the character expressed by my name Yahweh I did not make myself known to them." Furthermore, unlike Greek and Western thought, in Hebrew "to know" does not connote cognitive knowledge as much as effective, existential knowledge. For example, when a man married the Hebrew expression says that he "knew" his wife. Though the patriarchs worshiped God as 'El Shaddai, the Ruling God, they had not yet "known" him. God had committed Himself to them with promises to protect them, to guide them, to give them the land, etc., but still they in fact remained guests in alien lands, depending on the goodwill and hospitality of the indigenous populations wherever they migrated (cf. Gen. 26). Eventually they lost favor with the host nation, Egypt, and were reduced from guests to slaves. Now after four hundred years of slavery and facing a hopeless future with the pharaonic edict that their male babies be put to death to control their numbers, they were turning to pagan gods (cf. Josh. 24:14; Ezk. 23:8, 19, 21; Lev. 17:7) and were calling God's being and presence into question (Ex. 3:12). Under Moses, however, they would experience in a way heretofore unknown to them the dynamic presence of God. Now for the first time in their history they would shatter a mighty nation and its gods and in so doing they would "know" the "I am."

C. God. For practical reasons the discussion regarding Israel's convictions about God at the time of Moses is limited to those stated in the first four commandments of the Decalogue.

Because the first commandment tacitly assumed the existence of other gods, most scholars contend that at the time of Moses, Israel had not yet arrived in its religious development to a doctrine of monotheism but only to a belief in henotheism, the worship of one god that admits the existence of other gods. This formulation distorts the picture. The first commandment offers religious instruction and not theological statement. In the OT there is an ambivalence about the existence of pagan gods: *de facto* they were served with practices that debased mankind (cf. Dt. 32:12, 16; Jgs. 11:24; 1 S. 26:19), but *de jure* they were not gods (Dt. 32:21, 39; Isa. 41:24). In religious commandment Israel was forbidden to serve them (Dt. 6:40), but in religious statement their reality was denied (Dt. 32:17). The same tension exists in Paul's letter to the Corinthians (1 Cor. 8:1-13).

The word for God, *'ĕlōhîm*, from a root meaning either "be first, foremost" or "be powerful, strong," is morphologically a plural form, and this feature has suggested to some that the word preserves an earlier Israelite polytheism, and to others that it expresses the conviction that the one God exists as a plurality. It seems more likely, however, that since its modifiers are normally singular in form and since the word is used for Yahweh, we are dealing with a form that often elsewhere in the Hebrew language expresses intensification or majesty.

This belief in one God profoundly influenced Israelite thought and radically distinguished Israel from its neighbors. J. Bright commented: "Here is the sharpest break with paganism imaginable. The ancient paganisms were all polytheistic, with dozens of gods arranged in complex pantheons. These gods were for the most part personifications of the forces of nature or other cosmic functions; they were in and of nature and, like nature, without any particular moral character. Their will could be manipulated in the ritual (which re-enacted the myth) so that they would bestow on the worshiper the desired tangible benefits. In such religions no moral interpretation of events, nor indeed any consistent interpretation, was possible, for no one god ruled history" (*Kingdom of God* [1953], pp. 25f.).

In addition, Israel's religion proscribed idolatry (Ex. 20:4). This universal prohibition against images expressed the conviction that God is a spiritual being (cf. Dt. 4:12f.), dissimilar in kind to any and every material form. In contrast to the hundreds of unearthed pagan fertility figurines

that crudely emphasize the sexual organs, no image of Yahweh has ever been found.

Another characteristic feature of Israel is its belief that God is jealous, an attribute connected with His uniqueness. The sublime, incomparable, and only God will not tolerate any other god or human to usurp the glory that rightfully belongs to Him alone (Ex. 34:14; Isa. 42:8; 48:11). He is a consuming fire against the intransigent rebel that, despising his elect privilege to serve the only God, gives his life instead in the service of gods and images made in the likeness of fallen creation.

On the other hand, God exercises an unfailing love (Heb. *ḥesed*) for those loyal to him (Ex. 20:6). This word *ḥesed* denotes both God's loyalty to His covenant commitment to Israel and His sentiment of love informing that loyalty (cf. also K. Sakenfeld, *Meaning of* Hesed *in the Hebrew Bible* [1978], p. 233). Israel's history confirmed the truthfulness of this revealed quality in God, and consequently it was singled out for celebration in Israel's hymns (1 Ch. 16:41).

God's ability to punish those that reject Him and reward those that choose Him for a thousand generations clearly implies that He is the eternal, living, and sovereign Lord over history.

God forbids Israel to appropriate His name to anything false (Ex. 20:7), a proscription that gives a firm basis for Israel's demand for truthfulness in all areas of life, especially at court. Moreover, in contrast to pagan practices, no place is allowed for the magical manipulation of His name.

Finally, by observing the sabbath (Ex. 20:8-11) Israel bore testimony to its faith that Yahweh is the Creator of all things, a truth that implies He is the universal God. Paradoxically Yahweh stands apart from His creation and above it, and at the same time He was immanently present on a mountain in the Sinai, expressing His righteous will for Israel.

D. Covenant. Foundational to Israel's religion is its commitment made at Sinai (Ex. 19–24) to enter into covenant with Yahweh, who had centuries earlier committed Himself with promises to bless the obedient patriarchs. Now, prompted by gratitude for Yahweh's gracious deliverance of them from grievous Egyptian servitude, the clans of Israel ratified the covenant drawn up by Yahweh, their Great King, and gave promise of becoming Yahweh's prized possession, a kingdom of priests among the nations, and a mirror of His holiness on earth (Ex. 19:4-6). Thus Israel's relationship to Yahweh was based on His election of them and His grace and love for them. Consequently the covenant relation is less legal than familial; its demands are less legal justice than unfailing loyalty (*ḥesed*). The covenant served both Yahweh's interests (Dt. 10:1-13; etc.) and Israel's interests (Dt. 4:40; etc.) by guiding them toward the fullest enjoyment of life (R. Clements, *God's Chosen People* [1968], p. 58).

Deuteronomy, a covenant renewal document (Dt. 5:2; 29:1 [MT 28:69]), expanded the Decalogue and gave a complete expression of God's will for the people. For this reason it is called "the Law" not only in the book itself, but also in the prophets and the Psalms (cf. B. Lindars, "Torah in Deuteronomy," in P. Ackroyd and B. Lindars, eds., *Words and Meanings* [1968], pp. 128-132). Its basic stipulation, like that of the parallel Hittite treaties, is that Israel love the Great King with all its heart (Dt. 6:5; cf. K. Baltzer, *Covenant Formulary* [Eng. tr. 1971]). From this "circumcised heart" (Dt. 10:16) was to issue obedience to the other commands that had in view life in the land from which the Canaanites were dispossessed (Dt. 12:1).

The covenant called for Yahweh's blessings and curses in response to Israel's obedience and disobedience, respectively (Dt. 28). According to this religion, history is the arena for the interplay between Yahweh and Israel. In this arena it will be demonstrated that ethics, not magic or chance, determines Israel's future. Moreover, the rewarding of righteousness and the punishment of evil is not due to some ineluctible force in the order of creation but is brought about through divine intervention in history. On this stage Israel will prove that its heart is naturally uncircumcised (30:6; 31:29), and Yahweh will prove that He is both righteous and faithful (30:1–32:43). Of utmost importance for understanding the Israelite religion is the conviction that in spite of Israel's sins God's promises to the patriarchs remain unchanged and in force. The point is made dramatically at Horeb. At precisely that moment when the Israelites reneged on their promise to serve Yahweh alone by making a golden bull around which they gathered in a pagan religious orgy, Yahweh revealed that He is merciful, gracious, longsuffering, and abounding in love and faithfulness (Ex. 34:6). To be sure, the guilty are punished, but the promise stands firm. For this reason Israel constantly and robustly affirmed the future, even though it included harsh judgment for infidelity.

E. Cultus. Israel's beliefs found their visible and audible expression in regulated holy sites, objects, seasons, actions, personnel, and diet. The *sacred site* at first was a nomad's tent, the tent of meeting, and wherever Yahweh moved His tent, that site became sanctified by His presence (Ex. 40:34f.).

Sacred objects included: Moses' rod, an appanage that signaled Yahweh's presence with Israel, especially in battle (Ex. 4:2-5; 7:8; 14:16); the ark, the seat where Yahweh sat enthroned between the cherubim and from which He ruled Israel (Nu. 10:35); the tent of meeting where Yahweh met with Israel's officially appointed representatives and mediated His will to Israel (Ex. 33:7); and the sacred lot that served to mediate His will to the priests (Dt. 33:8).

The *three pilgrimage festivals,* when all the men of Israel gathered at the central sanctuary, included: (1) the Passover, in March-April, the time of barley harvest and the end of the rainy season; in sacred ritual Israel dramatically reenacted its exodus out of Egypt, and offered the first fruits of the barley harvest; (2) Pentecost, in May-June, fifty days after Passover, at which time Israel presented to Yahweh the new grain of the wheat harvest as an expression of gratitude for the gift of the land; and (3) the Feast of Tabernacles, in September-October, at the time the olive oil and wine were pressed and just before the rainy season. This feast had three aspects: on the first day Israel blew trumpets, on the tenth day the Israelites purified themselves in a day of atonement, and from the fifteenth to the twenty-first of the month the Israelites lived in booths to remind themselves that Yahweh had them live in booths when He brought them out of Egypt (Ex. 23:14-19; Nu. 28:1–29:40; Dt. 16:1-10).

Sacred actions included the offering of many kinds of sacrifices that served many different purposes: to bring a gift expressing dependence upon Yahweh (Lev. 1–2), to express appreciation mostly for answered prayer (Lev. 3), to make a covenant (Ex. 24:1-8); to effect ritual cleansing (Lev. 14; Nu. 19), to provide a substitute for the first-born child (Ex. 34:19f.); to appease God's wrath against sin (Lev. 4, 16), and to compensate for the damage done to the sanctuary (Lev. 5). Like many aspects of the cultus it appears likely that these sacrifices were adopted from the religions around Israel and adapted to its beliefs. Thus, e.g., the sacrificial meal included a full diet of meat, bread, cereal, wine, and salt, and is even called "the food of

God" in Lev. 21:6, but in contrast to the pagan religions, where the gods had to be fed or the demons placated, there is no suggestion that Yahweh actually ate the food to sustain His life or that they had an apotropaic intent. Other sacred acts included the sacerdotal blessing (Nu. 6:22-27), prayer (Ex. 32:32, etc.), an initiatory consecration by circumcision (Ex. 4:26; Josh. 5:8), and purity rites, mostly rituals to effect ceremonial cleansing in connection with sexual emissions, leprosy, and death (Lev. 12–15, Nu. 19).

Sacred personnel included priests from the house of Aaron (Ex. 29; Lev. 9–10), his ministers from the tribe of Levi, called priests in Deuteronomy (Nu. 3:9; Dt. 18:1-6), and the Nazirite who, regardless of his clan, separated himself to Yahweh by abstaining from strong drink, from having his hair cut, and from coming into contact with the deceased (Nu. 6:1-21). See Eichrodt, I, 98-177.

Israel's *sacred diet* (Lev. 11:1-47; Dt. 14:3-21) consisted of agricultural and dairy produce and of animals "pure" with respect to their forms and habits (in contrast to animals "unclean" in either of these areas). By this practical measure the Law inculcated in Israel the mind to be a pure and holy people to Yahweh (cf. G. Wenham, *Book of Leviticus* [*NICOT*, 1979], p. 169).

III. From Moses to Monarchy. *–A. Gift of the Land.* M. Noth has pointed out that three factors are typically prerequisite for a nation's existence: a common people, a common constitution, and a common homeland. Yahweh's promises to the patriarchs, that their offspring would be His nation to bring universal salvation (Gen. 12:1-3; 22:16f.) focused on these three themes: the gift of an innumerable progeny (Gen. 15:5; 22:17; 26:4; 28:14), the gift of Himself as their God and their descendants' God forever (17:7; 28:15), and the gift of the land extending from the river of Egypt to the Great River, Euphrates (12:7; 13:15-17; 15:7-21; 28:15). He began to give the land to Israel under the leadership of Joshua and fulfilled the promise in the time of David. He delayed in giving the land until the time of Joshua that the iniquity of the Amorite might become full (Gen. 15:16) and to prove His faithfulness to keep promises made centuries earlier.

The land is also important in the Israelite religion because of its sacramental value. Throughout the Mosaic covenant, Israel's possession and retention of the good land was made contingent upon obedience to the Mosaic covenant (Dt. 4:25; etc.). The conquest of the land was made contingent upon obedience (Dt. 28:7, 36). Moreover, the rainfall and consequent harvest depended on Israel's adherence to Yahweh. Indeed, God chose this land precisely to discipline the people. In contrast to Egypt and Mesopotamia where a person could irrigate his land "with his feet" (Dt. 11:10), Canaan depended on rain from heaven. Thus Israel could be made to turn back to God by drought (Dt. 11:10-15). This persuasion that possession of the land depended on obedience to the divine will also sharply differentiated Israelite thought from pagan mythical notions of an inherent bond, or even blood kinship, among the people, the land, and its god.

This theology posed a tension, however. According to the patriarchal covenants Yahweh had promised to give Israel the land, but according to the conditions of the Mosaic covenant it was apparent that God still owned the land. The tension is made explicit in Lev. 26:23 where Israel's possession of the land is likened to that of a tenant farmer. The tension can be relieved somewhat, however, by thinking of the land as a usufruct. Israel had a right to all the enjoyment and advantages of the land as long as it fulfilled Yahweh's intention to sanctify it. Furthermore, since Yahweh had given the land as an everlasting possession (Gen. 17:8), Israel could be confident that one day all Israel would have a circumcised heart in order that God's faithfulness and righteous purpose might be brought into harmony (Dt. 30:1-10).

B. Holy War. Israel's wars were religious wars, as is attested alike by the historical narratives and the ancient poetry preserved in them (Gen. 49:22-26; Ex. 15:1-18; Dt. 33; Jgs. 5). Von Rad (*Der heilige Kriege im alten Israel* [1958]) showed that Israel destroyed the Canaanites and occupied their land by strict adherence to the religious rules of what he labeled "holy war." This kind of war dictated that Yahweh begin the battle and consummate it, and thus the true glory was His (Josh. 3:10; 4:23; etc.). Israel, on its part, need only trust and obey (1:6-8). Throughout the book of Joshua one can note a pattern of divine command followed by the obedience of His faithful nations (1:1f., 10f.; 8:1f., 3-9; 11:6f., 9). In two incidents the Israelites failed to look to Yahweh and in both instances they went down in defeat (Josh. 7:2-5; 9:14, 18). This kind of war also called on occasion for *hērem*, an institution by which persons (and their possessions) hostile to the deity were given over to the deity, often by totally destroying them. This "ban" served to bring God's righteous judgment on flagrant and incorrigible sin, to protect Israel from defaulting on its commitment to Yahweh by intermarriage with the Canaanites (Dt. 7:2f.), to keep Israel from engaging in war for personal gain (Josh. 6:14; 7:1-26), and to encourage the enemy's wholehearted submission (Josh 6:24f.). When the elect nation later in its history embraced the Canaanite religion, "the ban" was pronounced against it (Isa. 43:28). In short, it had a moral purpose (cf. O. T. Allis, *Five Books of Moses* [1964], pp. 156f.).

C. Gifts and Charisma. Yahweh, Israel's king (Dt. 33:5), gave gifts to elect individuals both indirectly and directly by the conferral of His Spirit on them in order to perform various tasks in the theocracy. Thus for the building of His sanctuary Yahweh gave "wisdom," i.e., all sorts of skills in designing and craftsmanship, to people who distinguished themselves from the masses by their obvious capability (Ex. 28:3; 35:35–36:1). Then too, for the local administration of the clans he gave "wisdom," i.e., the right temperament and mind for judging Israel (cf. Ex. 18:13-27; Nu. 11:30; Dt. 1:9f.). Israel attributed these gifts to Yahweh (cf. Job 12:13-25; Ezk. 7:26; Prov. 2:6) and as a result it could be said "judgment belongs to Yahweh" (Dt. 1:17).

In the case of Moses, however, this leadership ability was attributed to a direct conferral of the divine Spirit upon him. So great and so powerful was this Spirit that when only a portion of it was taken from him and distributed to seventy elders they all prophesied (Nu. 11:24-30).

Yahweh's rule by means of placing His Spirit upon elect individuals was a prominent feature of the time of the judges. During this disturbed period when the legacy inherited from Joshua broke down due to Israel's repeated sin, Yahweh raised up individuals gifted with military prowess (the judges) whenever Israel repented and cried out to Him for relief from the oppressor. At those times Israel's Great Judge and Warrior (Ex. 15:3) settled the dispute not by arbitrating but by empowering people for battle (Jgs. 11:27).

D. Angels and the Angel of Yahweh. Although the OT writers inveigh against consorting with the spirits of nature or of the dead, throughout the history of the Israelite religion we encounter spiritual beings created by Yahweh to serve in His heavenly court and to accomplish His will on earth (cf. Gen. 28:12; Dnl. 10:11). These beings are called "sons of God," "angels," "hosts of heaven/of the

heights," "council of the holy ones." Some, e.g., the cherubim and seraphim, worship Him, but others, e.g., "evil spirits" and Satan, do not share God's character or design. But occasionally all must appear in Yahweh's heavenly court to wait upon Him (Job 1:6; 1 K. 22). None compares to God (Ps. 89:6), and the psalmist calls upon them to praise Him (Ps. 29:1). In the ancient Near East the stars were considered among the highest gods, but in the OT they are God's servants. As King over all these heavenly beings Yahweh is called Yahweh of hosts, a title we encounter for the first time during the period of the judges when His tent was at Shiloh (1 S. 1:3).

The angel of Yahweh, however, is not one of these creatures. Rather, he appears to be a manifestation of Yahweh Himself in Israel's epic narratives (Gen. 16:9-13; 22:9-14; Jgs. 6:11-27). This hypostatic manifestation of God bore witness in yet another way to the Israelites that God was with them.

IV. From Monarchy to Exile.—Israel's kings, who reigned from *ca.* 1000 B.C. to 587 B.C., are religious figures like their pagan counterparts. In Mesopotamia, e.g., it was believed that kingship was lowered from heaven, and each king sought divine legitimation for his claim to the throne. These kings interpreted the will of the gods, took responsibility for building the temple, and were the subject of many of the prayers offered at these sanctuaries. In Egypt, the king was held to be the son of god, an incarnation of Horus and Seth. In Israel similar features were found, as we shall see, but they were transformed and pressed into the service of the incomparable Yahweh.

A. Israel's Attitude Toward the Monarchy. The OT reflects an ambivalence toward the monarchy. Samuel, Israel's last judge, both condemned Israel for demanding the institution and promoted it. The classic critical solution to this tension is to suppose that there are two contradictory sources in the books of Samuel: an earlier source promonarchial in sentiment (1 S. 9:1–10:16; 11:1-15) and a later antimonarchial source (8:1-22; 10:17-27; 12:1-25). In spite of the protests by some scholars (H. Wildberger, *Theologische Zeitschrift,* 13 [1957], 442-469) that this formulation is overly simplistic, it still remains the standard starting point in most critical discussions about Israel's attitude toward the monarchy. It seems unlikely, however, that a good writer, like the one we meet in this book, illogically incorporated two contradictory viewpoints. Rather, it appears that he consciously confronts his reader with the theological tension between God's good and sovereign will and human sin. On the one hand, Yahweh brings Israel to the acme of its history in the OT by installing David as king. By this act He fulfilled the patriarchal vision (Gen. 49:10), provided the answer to Hannah's hope (1 S. 2:10), and consummated the promises to the fathers regarding the land (Gen. 15:18-21; 2 S. 8). On the other hand, he punished them with kings who abused their office because they demanded a king out of a spirit of unbelief. A similar tension can be observed in Yahweh's use of the proud Assyrian to discipline Israel and His later breaking of that insolent rod (Isa. 10:1-19), and in His offering of His Servant for the sins of His people and His punishment of those that killed Him (cf. Lk. 22:22).

B. Davidic Covenant and Son of God. R. A. Carlson (*David, the Chosen King* [1964]) argued persuasively that the author of the books of Samuel arranged his material so as to present "David under the Blessing" (2 S. 2–8) and then "David under the Curse" (9–24), with the Bathsheba incident constituting the turning point between these two poles. The blessings on David climaxed with the Davidic covenant, wherein Yahweh promised among other things to make David's son the son of God forever (2 S. 7:14f.; 1 Ch. 17:13-15; Ps. 2:7; 89:19-37). The OT makes it clear that (in contrast to Egypt) this promise must not be understood in a mythical sense. Solomon, whose lineage is well known, is explicitly designated by David as God's son (1 Ch. 22:8-10; 28:6). The reference to "today" in Ps. 2:7 precludes a mythical sense, and the verb "beget" used there is used elsewhere figuratively (Dt. 32:18; Isa. 1:2 (LXX); Jer. 2:27). For these and other reasons, scholars speak of Israel's king as being adopted by Yahweh (cf. G. Cooke, *ZAW,* 43 [1961], 202-205). In any case, in the unfolding drama of Israel's religion the earlier naming of the nation of Israel as Yahweh's first-born (Ex. 4:22) and son (4:23) is now applied to the king. Thus the king becomes the nation's representative head. From now on all that concerned the son of God also concerned the people "in him"; nothing that happened to him was a purely private affair. Israel's fortunes now rested on "the anointed."

This promise constituted the basis for the messianic expectation in Israel. Israel's hymns celebrating the king gave clear expression that it understood this promise to include both the everlasting duration of David's house (Ps. 72:5-7) and the universal extension of that rule over all the earth (Ps. 2:8; 72:8-14). In the course of Israel's history it became clear that none of the kings associated with the first temple had shoulders broad enough to fill this magnificent purple robe, and with the certainty of the Exile looming ominously on the horizon the prophets projected this yearning for an ideal king to a future king who would emerge from the line of David after Israel's return from the strange land (Isa. 7:10-17; 9:2-7; Mic. 4:14–5:3; Hos. 3:5; Am. 9:1-12; etc.).

C. Davidic Covenant and Earlier Covenants. The Davidic covenant provided yet another step in the fulfillment of the promises made to the fathers and did not in any way replace the Mosaic covenant made between Israel and Yahweh (cf. R. Clements, *Abraham and David* [*SBT,* 2/5, 1967]). As the people's representative the king was responsible to the law and for it (cf. 1 S. 10:25; 1 K. 2:2; 11:11; 2 K. 21:8; 23:25). He had to copy it under priestly tutelage upon his inauguration and to read it daily (Dt. 17:18f.). His success or failure was understood to be contingent upon his loyalty or dissaffection to the Author of the covenant (1 S. 12:25; 1 K. 2:2). Though he sat on God's throne (1 Ch. 17:14, 24; 29:23), nevertheless he was a man under the "law" of the priests, and, as we shall see, under the "word" of the prophet. The law's demand that he not multiply wealth, military resources, or political alliances (Dt. 17:16f.) aimed at inculcating in him a spirit of dependence upon Yahweh.

But failure on the part of the Davidic scion to keep the law could not negate Yahweh's promise to the house of David. Again, to be sure, sin had to be judged, but God's promise to the house of David stood firm forever. The writer of the book of Samuel drove this conviction home by recording David's sin with Bathsheba, a debacle in which he broke the law almost immediately after Nathan's oracle communicating the divine and eternal promises to him. David passed immediately from "under blessing" to "under curse," but the messianic promise remained unchanged and in force (cf. B. Childs, *Intro. to the OT as Scripture* [1979], p. 276).

D. King and Cult. Ideally the king's roles included his behaving as "the Servant of Yahweh," as "the Shepherd of Israel," and as the patron of the cult. Like other oriental monarchs he demonstrated his fidelity to the deity by selecting the site for the temple, building it, making arrangements for the worship in it, and offering gifts (1 Ch. 15–16, 22–29). In contrast to Saul, David would allow himself no sleep until he had found a resting place for God

(Ps. 132:5; 2 S. 6). With David's choice of Jerusalem as that resting place for the ark and with Solomon's building of the temple there, Mt. Zion became God's final throne on earth and His central sanctuary forever (Ps. 87). Sanctuaries similar to Solomon's temple have been excavated in northern Syria, particularly at Tell Ta'yinat, both corroborating the Bible and showing in yet another way that Israel's faith developed in forms common to the times (*WBA*, pp. 137f.).

H. Gunkel (*Einleitung*) demonstrated that Israel's hymnic forms closely paralleled those of Egypt and Mesopotamia. Parallel Sumerian hymns contain musical notations as unintelligible to Sumerologists as the musical notations in the Psalms are unintelligible to Hebraists (cf. S. N. Kramer, *The Sumerians* [1963], p. 207). Mowinckel (*Psalms*) demonstrated from internal evidence in the psalms that they were sung in the cultus connected with the first temple, and Dahood (*Psalms I-III* [*AB*, 1965-1970]) backed up this conclusion with linguistic evidence from the Ugaritic texts, though he marred his work by overextending the argument. John Eaton (*Kingship in the Psalms* [1976]) argued convincingly that the Scandinavian scholars are right in their contention that the bulk of prayers had the king as their subject. Gunkel (*Einleitung*, p. 161) had already noticed that the prayers for the king in Mesopotamia are "extraordinarily numerous." These studies have driven from the field the older critical view that the spiritual content of the psalms is so advanced that they must have been composed during the time of Israel's second temple.

But Mowinckel went too far in his contention that approximately forty-four of the psalms were sung as a libretto accompaniment to a ritual drama in which Yahweh was enthroned annually at the great fall festival. According to him (*Psalms*, p. 118), through this cultic event "the bond made with the deity in the harvest festival causes the rain to return so that the curse of drought and death is overcome, dormant nature revives and life awakens for the benefit of mankind." Other scholars belonging to the myth-and-ritual school went even further, and against Mowinckel's protestations, they argued that the psalms accompanied a ceremony in which Israel's king, representing Yahweh, went through a ceremony wherein he died and was raised again and whereby the recreative forces of life were released (cf. A. R. Johnson, *Sacral Kingship in Ancient Israel* [2nd. ed. 1967]; S. H. Hooke, ed., *Myth and Ritual* [1933]). Now admittedly such rites led by the king were carried out both in Mesopotamia at a new year's (*akītu*) festival in order to reenact and mythically recreate Marduk's victory over Tiâmat, the goddess of chaos, and in Egypt at a Sed festival and at a new year and harvest festival for the god Min. (For a thorough treatment of the relationship between the king and the cult in the ancient Near East, see H. Frankfort, *Kingship and the Gods* [1948, 1978]; I. Engnell, *Studies in Divine Kingship in the Ancient Near East* [2nd. ed. 1967].) Moreover, it appears highly likely that in the Israelite Feast of Tabernacles the king figured prominently and psalms were sung and composed for it. But it is incorrect to take the next step and conjecture that Israel filled this ritual with mythical convictions borrowed from its pagan neighbors. The superscriptions in fourteen of the psalms bear witness that these psalms originated out of David's historical experiences, and there is no compelling reason for brushing these notices aside. Furthermore, Mowinckel's argument is based on the persuasion that the phrase *ʾᵃḏōnāy mālaḵ* must be translated "Yahweh has become king," but many scholars (e.g., N. Ridderbos, *VT*, 4 [1954], 87-89; D. Michel, *VT*, 6 [1956], 40-68) have argued persuasively on philological and literary evidence that the traditional rendering "Yahweh reigns" is to be preferred.

Then too, it is possible that David and the other poets who gave us the psalms belonged to that circle within Israel that gave us the canon, and it is unthinkable that this school of thought would have replaced the conviction that obedience to Yahweh's will constituted the only basis for future blessings with cultic activity procuring benefits for mankind. To be sure, Zechariah (14:16f.) speaks of an age in which rain will fall on the nations in accordance with whether they have gone up to Jerusalem at the Feast of Tabernacles to worship Yahweh as their King. But we must not think of "worship" here as a mythical act recreating the bond between Yahweh and the forces of life latent in the creation. Rather, it means that they will have submitted their lives to the King, and the test of their submission is whether they observe the Feast demanded in the law. The psalms repeatedly call for fidelity to Yahweh and His law (Ps. 1:2; 2:3; 4:5; etc.) and the very psalms to which Mowinckel appeals affirm that Israel's future and the earth's future depend on Yahweh conforming to His righteous statutes and character (Ps. 93:5; 96:10; 97:10f.; 98:9; 99:6-9). The psalms themselves do not lead the reader to the mythical interpretations of these Scandinavian and English scholars, and it is exegetically unsound to impose pagan notions on the text.

Worship on Mt. Zion did not originate in pagan myth but in Yahweh's work in moving history towards its destiny. At the Exodus, Moses foresaw the day when Yahweh would rule from His mountain sanctuary (Ex. 15:17). Centuries later David fulfilled the vision.

E. King and Wisdom. Scholarship confirms the biblical claim that Solomon (Prov. 1:1; 10:1; 1 K. 4:29f.) and other kings (Prov. 25:1; 31:1) coined and collected sayings consistent with the notion of ethical monotheism. G. Pettinato (*BA*, 39 [1976], 45) alerted the world that he had uncovered thousands of tablets in the royal archives at Tell Mardikh (Ebla) from 2350 B.C., and that some of these tablets contained collections of proverbs. E. I. Gordon (*Sumerian Proverbs* [1969]) published two collections of Sumerian proverbs pieced together from the hundreds of clay tablets dug up at Nippur, Susa, and Ur and dated them to the Old Babylonian period (*ca.* 1700 B.C.). Instructional literature in Egypt dates back to the Old Kingdom period and onward (cf. L. Perdue, *Wisdom and Cult* [1977], pp. 28-61), and C. Kayatz (*Studien zu Proverbien 1–9* [1966]) carefully documented the remarkable parallelism in syntactical constructions between these texts and Prov. 1–9. In short, wisdom literature existed around the Fertile Crescent not only before Solomon but even before the Hebrews appeared in history! Moreover, this kind of literature appears to have had its original setting in the home of the courtier (cf. H. Frankfort, *Ancient Egyptian Religion* [1961]; W. G. Lambert, *Babylonian Wisdom Literature* [1960]). In sum, Moses gave the law; the king gave wisdom.

F. Prophetic Movement. Israel's prophets also had their counterparts in the surrounding pagan nations and religions. Thus, e.g., Kitchen states (p. 54) that at Ebla the *nabi'utum* (cf. Heb. *nāḇîʾ*, "prophet") occurs as a class of "prophet" alongside the better known *maḫḫu*. The knowledge of the function of such people, however, must await publication of the Ebla tablets. In both Babylon and Assyria the king sought prophetic sanction to validate his claim to kingship. In a Mari Letter (*ca.* 1750 B.C.) we are told of a certain *maḫḫu*, "seer," who threatened the king of Mari that if he did not satisfy the demands of the gods Hadad and Dagan, his kingship would be withdrawn. In Moab King Balak hired the prophet Balaam to pronounce a curse on Israel (Nu. 24), and centuries later Moab's King Mesha (*ca.* 850 B.C.) commemorated his victory over Israel by erecting a stele on which he boasted that his god Chemosh had encouraged him in his campaign.

The Aramean king Zakir of Hamath (8th cent. B.C.) speaks of a *ḥāzîn,* "seer," who delivered an oracle promising him victory (cf. *ANET,* pp. 655f.).

But in spite of these obvious similarities with Yahweh's prophets, who likewise appointed kings (1 K. 12:29), assisted them in battle (2 K. 6:8–8:6), and deposed them when they fell into disfavor (1 K. 16:1-4), Yahweh's prophets were imbued with the conviction that their message came directly from God. They contrasted their own experience in receiving Yahweh's words with that of prophets who served dumb idols (Isa. 41:22-26; 43:4; Jer. 30:5; Hab. 2:10) and with false prophets of Yahweh who spoke out of "their own hearts" (Jer. 14:14; 23:16, 25). So real was their experience in hearing God's word that they confounded the words from Yahweh's mouth with the human voice, if we may universalize Samuel's experience (1 S. 3:8).

In the early period of the monarchy they "prophesied" with such extraordinary manifestations caused by the overwhelming and irresistible influence of Yahweh's Spirit falling upon them, that they could not continue their normal functions (Nu. 24:4; 1 S. 10:6-10). Yet Elijah scoffed at the frenzied practices of his pagan peers and at their impotency in prayer (1 K. 18:27f.). It is also instructive to note that a king who shared the faith of the true prophet of Yahweh could distinguish him from false ones who prophesied in Yahweh's name (1 K. 22:7).

But above all they distinguished themselves from pagan prophets by their legacy of prophecies that are remarkable for their specificity and continuity over centuries. No movement in the history of religions can be compared with prophecy in Israel (Isa. 41:21-29).

Yahweh's true prophets were bound together by their common experience with Yahweh and by their common conviction about Yahweh's sovereign will for Israel as proclaimed by Moses, the prophet par excellence. Both the Former Prophets (i.e., the authors of Joshua to Kings) and the Latter Prophets (Isaiah to Malachi) interpreted the nation's fortunes and predicted its future on the basis of the threats and promises contained in the Mosaic covenant. Thus, e.g., the writer of Kings framed each of Israel's kings within a very strict literary form (cf. 1 K. 14:21f., 29-31) and evaluated his heart and his reign in terms of the first stipulation of the law, i.e., Israel was to have but one central sanctuary, which, as it turned out, was Jerusalem. As impracticable as it might appear to human judgment, the prophets of both the north and the south called for a political division of Yahweh's kingdom between the northern tribes and the southern tribes and at the same time attempted to preserve the religious unity of the kingdoms by insisting that all the people continue to worship at Jerusalem. None of the kings of the north had the faith to accept this arrangement, and hence all of them failed the test of loyalty to Yahweh's covenant. According to our prophet-historian the doom of the northern kingdom was sealed when Jeroboam I set up his rival cult centers at Bethel and Dan. Likewise, our writer found guilty those sons of David who tolerated or set up cultic centers to other gods around about Jerusalem, and this travesty against the law brought about the collapse of the southern kingdom.

It is sometimes argued that this historian distorted Israel's history in order to support his fabricated interpretation of history, but it may be noted that, although like all historians he carefully edited his material, he did not oversimplify historical reality. It is this prophet-historian who tells us, e.g., of the prosperity of the "evil" Jeroboam II and of the untimely death of "good" king Josiah (cf. 1 K. 14:24-27; 2 K. 23:26-29). Jacques Ellul (*The Politics of God and the Politics of Man* [Eng. tr. 1972], p. 91) said: "Historians who think the history told in the Bible is pious and distorted ought to ask themselves why it is that these biblical historians who supposedly want to prove something always tell us about the disasters under good kings and victories under idolatrous kings" (cf. 1 K. 19, 21).

The author of Kings not only interpreted Israel's past history on the basis of the Mosaic covenant's demand for cultic purity, but also hinted at a future messianic expectation based on his belief in the immutability of God's promise to David that his line would never be extinguished. Thus he concluded his work with the hope that a son of David still lived and that even though he was in captivity his throne was set above the thrones of all the other captive kings (2 K. 25:27-30). This conviction about Yahweh's judgment upon sin along with a sure confidence that God's promises were irrevocable informed all the prophets.

Yahweh's prophets not only interpreted and predicted history in the light of the covenants binding Israel and Yahweh together; they also directed its progress through their dynamic words. The book of Kings might better be labeled the book of prophets, for in truth they planted nations and uprooted them with their powerful oracles. Von Rad (*Studies in Deuteronomy* [1953], pp. 78ff.), taking note of a series of prophecy-fulfillment patterns in the books of Kings (e.g., 2 S. 7:13 par. 1 K. 8:20; 1 K. 11:29 par. 12:15; 13:2 par. 2 K. 23:16-18; etc.), concluded that the prophetic word should be conceived of as "a history creating force" that is unleashed in the world and accomplishes its purpose (cf. also Jer. 1:9f.; Isa. 55:10f.).

Yahweh favored Israel with prophets throughout its history, though at times His words were scarce (1 S. 3:1). Even the patriarchs were called prophets (Ps. 105:15) because the word of God came to them in dreams, visions, and spoken messages and proceeded from them. Moses, however, stands singularly above all the prophets because only he saw God face to face, and unlike his successors spoke plainly and not in riddles. Moreover, all subsequent prophecy must be tested by whether it conformed with Moses' revelation. The word of God came to those who succeeded him without respect to class or sex. Thus it came to men of royal degree (Zephaniah), priests (Ezekiel), common men (Amos), and women (Miriam, Deborah, Huldah).

Prophets assumed a most important place in Israel's religion with the coming of the monarchy. They were never a mere appendage to it, but, as noted above, elected Israel's kings and stood over them. In the earlier period (Samuel to Elisha) they were usually friendly toward Israel's kings, displaying a fostering and protective attitude toward them, and when the kings sinned they called them back to repentance. Later on, however (Amos to Jeremiah), they arraigned the kings before the law, and finding them guilty of having broken the covenant, they sentenced them to judgment at the hands of the great imperial powers of Assyria, Babylonia, and Persia and predicted the birth of a new nation out of the ashes.

The prophets' teaching nowhere opposes any of the priestly Torah of the Mosaic law. Their minimizing of its cultic provisions did not constitute a rejection of it but a subordination of it to the more important moral and social concerns found in their heritage (Hos. 4:6; 5:1f.; Mic. 3:11; 6:8). They did not reject the priesthood or the sacrificial system, but they did rebuke dereliction in the priesthood and the substitution of ritual for heartfelt commitment to Yahweh.

V. Exilic and Postexilic Periods.–The fall of Jerusalem in 587 B.C. had a decisive effect upon the development of the Israelite religion. Israel's unique religious identity was now constantly threatened by the changing attitudes toward Israel on the part of their capricious oriental overlords

and by the unchanging fickleness of the human heart. Nebuchadrezzar deported them, Cyrus restored them, and Xerxes first ordered their annihilation and then armed them to slay their adversaries. Rival states in their homeland offered first to help them rebuild the temple, and then, when refused, opposed them. Some of the people returned to the homeland and others did not, and of those that did return many sought their own comforts and intermarried with the foreigners now living in the land. Israel's survival through these changing fortunes, which the people likened to wandering in desert wastes, sitting in dungeons, and becoming seasick on stormy seas, caused the Israelites to give thanks to Yahweh who protected and preserved them (Ps. 107). At the same time Israel's spiritual leaders sought to preserve their precious and unique spiritual trust by recreating ancient religious institutions, by pointing the people beyond the present to their glorious future, and by calling upon them individually to make a decision in the present to serve Yahweh.

A. Institutions for Preserving the Israelite Religion. 1. Cultus. Encouraged by the preaching of Isaiah (Isa. 40–55) and taking advantage of Cyrus' edict to return from Babylon and to rebuild the temple, many Israelites returned to Jerusalem in 539 B.C. and recreated the Mosaic cultus, but without the ark. At the first Feast of Tabernacles they rebuilt the altar on its original site and offered the sacrifices prescribed in the law. In the second year they laid the foundations for the second temple with the accompaniment of the liturgy instituted by David, but they soon became discouraged by opposition from without and abandoned the work to pursue personal gain (Ezr. 3; Haggai). In 520 B.C., however, under the provocative preaching of Haggai and Zechariah they resumed the work and finished it in 516 B.C. (Ezr. 4). But the nation continued to be plagued by weary priests perfunctorily performing their duties and by people who did not share the prophetic zeal.

2. Law. For the apostates from Yahweh, Judah's state god had shown himself impotent before the imperial might of Babylon, and consequently, facing the threat of deportation, they clung to all conceivable deities and cults (Jer. 7:18; 44:17-25; Ezk. 8:7-16). For true Israel, however, it was apparent that the privileged nation had fallen because of its failure to keep the covenant and to heed the prophetic warnings of judgment (2 K. 17:7-23). History confirmed them in the conviction that the nation's hope for a blessed future lay in knowing the law and in keeping it. Moreover, its laws originally intended to keep Israel separate from the Canaanites were needed as much now as at the beginning. At *ca.* 450 B.C. Ezra and Nehemiah (Neh. 8–9), along with Malachi (cf. Mal. 4:4), founded the Second Jewish Commonwealth squarely on the law and terminated the mixed marriages. The language and ideas of Deuteronomy clearly influenced the literature of the period (cf. Neh. 1:5 and Dt. 7:9, 21; Neh. 1:8 and 20:1-4; Neh. 1:10 and Dt. 9:29; etc.).

3. Canon. Sometime after these reforms and before 132 B.C., the spiritual leaders of Israel gave the canon its final shape. This written document, taught and studied both at the temple and in local synagogues, uniquely conserved Israel's heritage and preserved them as a spiritual community (cf. Sir. 39:1-4, 7f.).

B. Eschatology. 1. New Covenant. The first Hebrew nation failed because it depended on people to keep God's law. History had confirmed the Israelite belief that mankind was at heart rebellious against God and lawless. Accordingly, amid the nation's wreckage, Israel's prophets became convinced that one day Yahweh would make a new covenant with all the patriarchal stock (Jer. 31:31-34; Ezk. 36:25-27; etc.). This new covenant would contain the same stipulations as the earlier one, but in addition to providing for Israel's cleansing, it would depend on God's promise to put His law into Israel's heart to be an everlasting covenant of peace. Isaiah foresaw, moreover, that the Servant of Yahweh, by taking away the sins of His people through death, would mediate this covenant (Isa. 42:6; 49:6).

2. Messiah. The preexilic expectation of an ideal son of David who would restore the fortunes of David's house was picked up by the postexilic prophets associated with the rebuilding of the second temple (Hag. 2:21-23; Zec. 6:9-14). But this son did not emerge during the time that the OT canon achieved its final form. Accordingly, those who gave us the canon must have interpreted the ancient promises regarding Israel's glorious future under the Messiah as referring to one yet to come. Thus, e.g., the psalms sung at the first temple to celebrate the coronation of the king (Pss. 2, 110, etc.), his marriage (Ps. 45), his victories over the enemy (Pss. 18, 30, etc.), were reinterpreted as references to the coming Christ.

3. Apocalyptic. It is impossible to make a sharp distinction between prophecy and apocalyptic because apocalyptic literature builds upon the prophetic vision that one day the ideal son of David will come with righteousness, victory, and dominion over the nation. In the apocalyptic literature, however, the dynamic tension between God's plan and mankind's responsibility is severed and only the divine side of history is presented. Here we encounter angels and spiritual forces shaping history from without, and we are given the divine plan and timetable behind history. The plan is revealed to the favored person in a vision, and the revelation is presented in the form of fantastic and arresting images that often require an angel to interpret them. Thus, e.g., Daniel, who putatively served in Nebuchadrezzar's court, received a vision in which the four imperial empires that subjugated Israel between the Captivity and the advent of Jesus Christ are represented by a lion (Babylon), a bear raised on one side with three ribs in its mouth (Medo-Persia with its conquests of Babylon, Lydia, and Egypt), a leopard with four heads (Greece and its subsequent fourfold division) and a dreadful beast with iron teeth (Rome). He then saw the Ancient of Days (God) sitting in His heavenly court and a son of man (Messiah) presented to Him to whom He bequeathed the eternal, universal kingdom.

C. Rise of Personal Religion. When the nation existed as a political entity under a king, the individual member of the state tended to think of himself as a leaf upon a tree. But when the tree was cut down, the historical reality dictated that he think of himself more individualistically. Without the hermetical seal of the political entity, and exposed constantly to foreign influences, the individual was forced to choose his own identity. The exilic prophets Ezekiel (18:2-30) and Jeremiah (31:29f.) began this emphasis with their doctrine that each individual was responsible for his own sin. The substitution of the local synagogue for the central temple reinforced the new emphasis. The Chronicler not only sought to show the links of the postexilic community with its past through genealogies and Israel's glorious royal heritage by not dwelling on the kings' sins, but he also elected, in contrast to the writer of Kings, to include in his history the personal choices of Rehoboam when he confronted Shishak (2 Ch. 12:1-12), of Asa when he faced Zerah the Ethiopian (14:9f.), and of Manasseh who repented when held captive in Assyria (33:10-13). All of these men found God's salvation when they humbled themselves and sought the Lord.

B. K. WALTKE

ISRAEL STELE. *See* MERNEPTAH.

ISSACHAR [Heb. *Q yiśśāḵār*].

1. The ninth son of Jacob, the fifth born to him by Leah (Gen. 30:17f.); also the tribe named for him. His birth is, in this passage, connected with the strange story of Reuben and his mandrakes; and the name given him is apparently conceived as derived from Heb. *'îš śāḵār*, "a hired workman." There is a play upon the name in this sense in Gen. 49:15. Wellhausen (*Text der Bücher Samuelis* [1871], p. 95) thinks that the second element of the name may denote a deity; Sokar, an Egyptian god, has been suggested. The name in that case would mean "worshiper of Sokar."

Practically nothing is preserved of the personal history of this patriarch beyond his share in the common actions of the sons of Jacob. Four sons were born to him before Jacob's family removed to Egypt (Gen. 46:13). In that land he died and was buried.

At Sinai the tribe of Issachar numbered 54,400 men of war over twenty years of age (Nu. 1:29). At the end of the wanderings the numbers had grown to 64,300 (Nu. 26:25). In the days of David, the Chronicler puts the figure at 87,000 (1 Ch. 7:5). The place of Issachar in the desert march was with the standard of the tribe of Judah (along with Zebulun) on the east side of the tabernacle (Nu. 2:5), this group forming the wing of the host (10:14f.). The captain of the tribe was Nethanel the son of Zuar (Nu. 1:8, etc.). Later this place was held by Igal the son of Joseph, the tribal representative among the spies (Nu. 13:7). The prince chosen from Issachar to assist in the division of the land was Paltiel son of Azzan (34:26). The position of Issachar at the ceremony near Shechem was on Mt. Gerizim, "to bless the people" (Dt. 27:12).

According to Yeivin this tribe belonged to the second wave of settlement, which took place in the middle of the 14th cent. B.C., and which included the majority of the sons of Leah: Reuben, Judah, and Simeon (Jgs. 1:3ff.). Yeivin bases his theory on the completed reading of an Egyptian stele from the time of Sethis I (1310 B.C.) found in Beth-shean, which gives an account of a military campaign into the territory of Issachar. According to Yeivin the campaign was against the family of Tola, which belonged to the tribe of Issachar. It seems that the sons of Issachar and the sons of Zebulun were more closely connected with each other than with other tribes. Possibly they had a common sanctuary on Mt. Tabor (Dt. 33:18f.). With the strengthening of the Egyptians and the Canaanites, soon after their settlement they became subjected to them. This is reflected in the Blessing of Jacob: "He saw a resting-place that it was good, and the land that it was pleasant; and he bowed his shoulder to bear, and became a servant under task-work" (Gen. 49:15).

When the Egyptian rule weakened and the third wave of settlement took place, the southern area of the territory of Issachar was captured by families of the tribe of Manasseh. Issachar took part in the battle with Sisera (Jgs. 5:15). To Israel Issachar gave one judge, Tola (Jgs. 10:1), and two kings, Baasha and his son (1 K. 15:27, etc.). The genealogical lists of this tribe are concentrated in Gen. 46:13; 1 Ch. 7:1-5.

Of the two hundred "heads" of the men of Issachar who came to David at Hebron it is said that they were "men that had understanding of the times, to know what Israel ought to do" (1 Ch. 12:32). According to the Targum, this meant that they knew how to ascertain the periods of the sun and moon, the intercalation of months, and the dates of solemn feasts, and could interpret the signs of the times. A company from Issachar came to the celebration of the Passover when it was restored by Hezekiah (2 Ch. 30:18). Issachar has a portion assigned to him in Ezekiel's ideal division of the land (48:25); he appears also in the list in Rev. 7:7.

Into the description of the tribe's territory mentioned in the book of Joshua (19:17-22), as in those of the territories of the other northern tribes, two lists have been worked. One is the description of the borders, the other a list of the cities. In the process of combining the two lists they may have been shortened. According to Yeivin the beginning of v. 18 and two parts of v. 12 belong to the list of the boundaries; they deal with the northern and western boundaries. It is possible to reconstruct the northern border in its entirety by comparing it with that of the tribe of Naphtali. Thus it ran from Mt. Tabor NE to the upper Brook of Jabneel, and from there eastward to the Jordan near Lakum. The eastern border followed without doubt the course of the Jordan River. The southern border cannot be reconstructed because the description of the territory of Manasseh's northern border is not mentioned in detail. It can be assumed, however, that the southern border of the territory of Issachar passed between the mountains of Gilboa and the central hills of Ephraim. Thus the territory included the mountains of Gilboa, the northeastern part of the plain of Dothan, and the eastern part of the plain of Esdraelon. The western border ran in a more or less straight line S-N; from Ibleam it passed by the city of Jezreel to Mt. Tabor.

The cities of the plain fell into the hands of the Israelites only in a comparatively late period, and the strip of independent Canaanite cities separated the southern from the northern part of the territory. Because of the lack of contact the southern area was held by families belonging to the tribe of Manasseh. Fifteen towns are mentioned in the list of towns; they are subdivided in a manner not yet clear, as most of them have not been satisfactorily identified.

2. A Korahite doorkeeper, the seventh son of Obed-edom (1 Ch. 26:5).

A. A. SAARISALO

ISSHIAH ish-shī'ə [Heb. *yiššîyāhû*]; AV also ISHIAH (1 Ch. 7:3), JESIAH (12:6; 23:20).

1. Mentioned among David's heroes, a great grandson of Tola (1 Ch. 7:3).
2. Mentioned among the men who came to David at Ziklag (1 Ch. 12:6).
3. A member of the priesthood of the house of Rehabiah (1 Ch. 24:21).
4. Another Levitical priest of the house of Uzziel (1 Ch. 23:20; 24:25).

ISSHIJAH ish-shī'jə [Heb. *yiššîyâ*]; AV ISHIJAH. A man of the household of Harim, named among those who, at Ezra's command, were induced to put away their "foreign wives" (Ezr. 10:31). Also called ASAIAS in 1 Esd. 9:32 (AV ASEAS, NEB ASAEAS).

ISSUE. Occurs with a variety of meanings:

(1) [Heb. *śîm, śûm* (Ezr. 5:17; 6:3), *nāṯan* (Est. 3:14f.; etc.), *yāṣā'* (Ezk. 47:1); Aram. *nᵉgaḏ* (Dnl. 7:10); Gk. *ekporeúomai* (Rev. 1:16; 4:5; 9:17f.; 19:15, 21), *ek* (1 Tim. 1:5; Rev. 16:13)]; AV also MAKE, GIVE, GO, PROCEED, etc.; NEB also "stream out," SPRING, "come out," etc. As a verb "issue" can mean "publish" a decree (Ezr. 5:17; 6:3; Est. 3:14f.; 4:8; 8:13f.; 9:14); it can also refer to the emission of water (Ezk. 47:1), fire and smoke (Dnl. 7:10; Rev. 9:17), lightning (Rev. 4:5), a sword (Rev. 1:16; 19:15, 21), spirits (Rev. 16:13), or love (1 Tim. 1:5) from a source.

(2) [Heb. *rē'šîṯ* (Dt. 21:17; Ps. 78:51; 105:36), *ṣᵉpî'ôṯ* (Isa. 22:24), *zîrmâ* (Ezk. 23:20), *'aḥᵃrîṯ* (Dnl. 12:8)]; AV also BEGINNING, CHIEF, END; NEB FIRST-BORN, SEED, etc. As a noun "issue" generally occurs in the sense of "offspring" or "semen" (Ezk. 23:20). In Dnl. 12:8, however, it means "final outcome" or "end."

(3) The AV frequently uses "issue" for a bodily DISCHARGE or HEMORRHAGE (e.g., Lev. 15:2ff.; Nu. 5:2; Mt. 9:20; Mk. 5:25; Lk. 8:43). N. J. O.

ISTALCURUS is-täl'kŏŏr-əs [Gk. *Istalkouros*]. A name in 1 Esd. 8:40 corresponding to ZACCUR in Ezr. 8:14. LXX B has Istaxalkos.

ISUAH. *See* ISHVAH.

ISUI. *See* ISHVI.

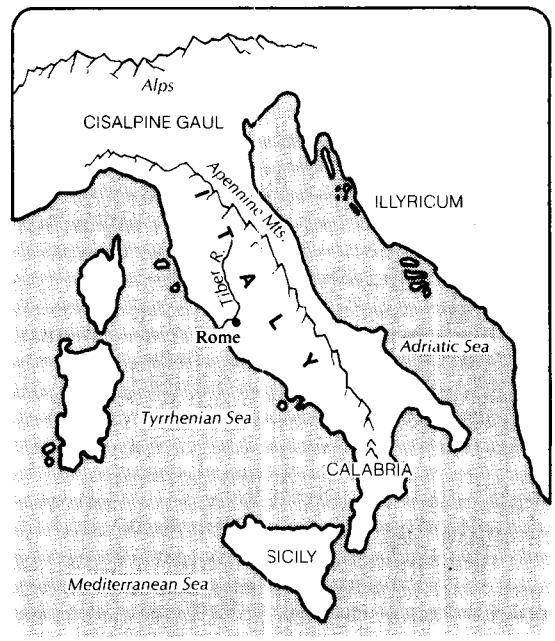
ITALA VERSION. *See* VERSIONS.

ITALIAN COHORT (AV ITALIAN BAND). *See* ARMY, ROMAN II.B; COHORT.

ITALY [Gk. *Italia*]. The name Italy appears four times in the NT: Acts 18:2; 27:1, 6; He. 13:24. The adjectival form is found in the appellation "Italian band" (*kalouménēs Italikēs*, Acts 10:1). Originally the name Italy was restricted to the extreme southern part of the Italian peninsula, the area now called Calabria. As early as Polybius, Italy was sometimes considered an appellation for all the country between the Tyrrhenian and Adriatic seas, and stretching from the Alps in the north all the way S to Sicily. The Italians (Lat. *Itali*), after whom the country is named, derive their name from a legendary ruler Italus (Dionysius 1.12.35; Vergil *Aen.* i.533).

Like a fishback the Apennines run down the middle of Italy from modern Lombardy (once part of Cisalpine Gaul) to Sicily. The only navigable river is the Tiber, which slants across the upper middle section of the peninsula and flows through Rome.

Very little information is available about life from antiquity. The oldest inhabitants were the Ligurians and Iberians, closely related to the aborigines of Spain and Gaul. In the Late Bronze Age some Indo-European clans came with more advanced weapons and drove the early settlers, who were lake dwellers, into the background. They divided into three groups — the Latins, Samnites, and Umbrians — as they penetrated the peninsula. The Illyrian clans of the Apulian valleys and the Venetian plains gave them resistance. The Celts (Gauls) were the last invaders, and began to drive out the Etruscans on the west coast of central Italy (M. I. Rostovtzeff, *Rome* [Eng. tr. 1960], pp. 8f.).



Archeological excavations have uncovered the most valid source of historical information about the culture and characteristics of the people. Pottery, art, and jewelry tell us that Greece influenced the culture through commerce and military training. No serious construction of the economic history from the 7th to the 4th cents. B.C. has been developed.

From a tendency toward democracy in the 4th cent. B.C., Rome through the threat of wars realized a need for a centralized government, and gave the senate governmental authority. From the Knights (class of businessmen), who were rivals to the senate, Octavian arose to be recognized as supreme ruler over Italy and Rome. The office was given the title of emperor, and later Octavian's name was changed to Augustus; he was in power when Paul was taken to Rome (Acts 27:1).

ITCH [Heb. *neṯeq* (Lev. 13:30-37); Gk. *thraúsma*; Heb. *gārāḇ*, Gk. *lichēn* (Lev. 22:22; AV "scurvy"; NEB "scab"); Heb. *ḥāres*, Gk. *psṓra* (Dt. 28:27)]. In Lev. 13:30-37, *neṯeq* was part of a diseased condition affecting the scalp (AV "dry scall"; NEB "scurf"). Its presence indicated that the skin disease was malignant, and if after a fourteen-day period of isolation the ailment had spread, the sufferer was pronounced unclean. The "itch" seems to have been that of a fungus infestation such as ringworm (*favus*), a vegetable parasitic disease of the skin. *Alopecia areata*, a disease resulting in circumscribed bald patches, may also be indicated. In Lev. 22:22 the Hebrew refers to

a skin disease affecting animals and marked by eczema and inflammation of the affected area. Most probably mange was indicated by the text. The reference in Dt. 28:27 was to some parasitic skin ailment that disqualified persons from membership in the priesthood. The disease in question was probably scabies, caused by a small organism, *Sarcoptes scabiei,* which burrows beneath the skin, especially that of the fingers, and is readily communicated.

See also DISEASE III.I. R. K. H.

ITHAI ith'ī. *See* ITTAI 2.

ITHAMAR ith'ə-mär [Heb. *'îṯāmār*–'oasis of palms'(?)]. The fourth son of Aaron (Ex. 6:23; 28:1; 1 Ch. 6:3), Eleazar being the third, Nadab and Abihu the first and second. While Nadab and Abihu were prematurely cut off for offering strange fire before the Lord (Lev. 10:1f.; Nu. 3:4; 26:61), and Eleazar was appointed chief of the tribe of Levi (Ex. 6:23, 25) and ultimately succeeded Aaron (Ex. 28:1), Ithamar was made the treasurer of the offerings for the tabernacle (Ex. 38:21), and superintendent of the Gershonites and Merarites in the service of the tabernacle (Nu. 4:28, 33). A descendant of Ithamar, Daniel, is mentioned among the exiles who returned from Babylon (Ezr. 8:2). T. WHITELAW

ITHIEL ith'i-el [Heb. *'îṯî'ēl*–'God is with me'(?)].

1. A son of Jeshaiah of the tribe of Benjamin, mentioned among the inhabitants of Jerusalem in Nehemiah's day (Neh. 11:7).

2. The name is perhaps also found in the oracle of Agur (Prov. 30:1). *See* ITHIEL AND UCAL.

ITHIEL AND UCAL i'thē-əl, o͞o'kal [Heb. *'îṯî'ēl wᵉ'uḵāl*] (Prov. 30:1). The names of two persons to whom Agur addressed his words. The text is obscure, however; such an introduction seems strange — nowhere else in Proverbs is the audience named. Although T. Mauch (*IDB, s.v.* "Ucal") points to "Surely you know" in v. 4 as evidence for retaining the proper names, several factors weaken the force of this observation. First, the LXX and Vulg. did not render the Hebrew words as proper names; rather, they translated them. Second, the verb is in the sing. in v. 4, and one might expect the pl. if the two persons of v. 1 are being addressed. Third, addresses like that of v. 4 need not have any specific previous referent; cf., e.g., 22:20f., 27; 26:12; 29:20. Thus several modern versions and many commentators prefer to repoint and redivide the Hebrew words to make sense of the consonantal text. For example, the prep. *lᵉ,* "to," is combined with *'îṯî,* and the phrase is revocalized *lā'îṯî* ("I am weary") *'ēl* ("O God") *wā'ēḵel* ("and worn out") (cf. NEB; NIV mg.; KD *in loc.*). As D. Kidner (*Proverbs* [*Tyndale OT Comms.,* 1964], p. 178) notes, this rendering introduces the theme of vv. 2-4 well. Less likely is the NAB's rendering, "I am not God, I am not God, that I should prevail" (cf. *BH*), though this at least fits the context better than M. Dahood's "I, El, prevail" or "I am strong, O El" (*Proverbs and Northwest Semitic Philology* [1963], p. 57). Although the comms. by C. H. Toy (*ICC,* 1899, pp. 519f., 526) and W. McKane (*OTL,* 1970, pp. 643-47) discuss the problem in some detail, they offer no satisfactory solution, and no consensus has yet been reached. G. A. L.

ITHLAH ith'lə [Heb. *yiṯlâ*]; AV JETHLAH. An unidentified town in the territory of Dan, named with Aijalon and Elon (Josh. 19:42).

ITHMAH ith'mä [Heb. *yiṯmâ*]. A citizen of the country of the Moabites, David's deadly enemies, yet mentioned as one of the king's thirty mighty men (1 Ch. 11:46).

ITHNAN ith'nan [Heb. *yiṯnān*]. A town in southern Judah mentioned along with Hazor and Ziph (Josh. 15:23), apparently the Ethnan of Jerome (*Onom.* 118.13). It has not been identified.

ITHRA ith'rə [Heb. *yiṯrā'*]. The father of Amasa, commanding general in the rebel army of Absalom. It seems that his wife was Abigail, a sister or half sister of King David (1 Ch. 2:17). She is called the sister of Zeruiah, Joab's mother (2 S. 17:25). In this passage Ithra is called an Israelite, but "Jether the Ishmaelite" in 1 Ch. 2:17. *See* JETHER.

ITHRAN ith'ran [Heb. *yiṯrān*].

1. A descendant of Seir the Horite, son of Dishon (Gen. 36:26; 1 Ch. 1:41).

2. One of the sons of Zophah of the tribe of Asher (1 Ch. 7:37).

ITHREAM ith'rē-əm [Heb. *yiṯrᵉ'ām*]. The sixth son born to David at Hebron. His mother's name was Eglah (2 S. 3:5; 1 Ch. 3:3).

ITHRITE ith'rīt [Heb. *yiṯrî*]. A family in Israel whose home was Kiriath-jearim (1 Ch. 2:53). Among the heroes of David, two are mentioned who belonged to this family, Ira and Gareb (2 S. 23:38; 1 Ch. 11:40).

ITTAH-KAZIN it-ə-kā'zin. *See* ETH-KAZIN.

ITTAI it'ī [Heb. *'ittay, 'îṯay*].

1. A Gittite or native of Gath, one of David's chief captains and most faithful friends during the rebellion of Absalom (2 S. 15:11-22; 18:2, 4, 12). The narrative reveals David's chivalrous and unselfish spirit in time of trouble, as well as the most self-sacrificing loyalty on the part of Ittai. He seems to have left his native city recently and joined David's army through personal attachment to the king. David rapidly promoted him. Hearing of Absalom's rebellion and approach to Jerusalem, he fled with David. The latter remonstrated and urged him to go back and join Absalom, as he was a foreigner and in exile. His interests were in the capital and with the king; there was no reason why he should be a fugitive and perhaps suffer the loss of everything; it was better for him, with his band of men, to put himself and them at the service of Absalom, the new king. Ittai, with a double oath, absolutely refused to go back, but would stand by David until the last. Remonstrance being useless, the monarch ordered him across the river, doubtless glad that he had such a valiant warrior and faithful friend by his side. On mustering his hosts to meet Absalom, David made Ittai a chief captain with the intrepid Joab and Abishai. He doubtless did his part in the battle, and as nothing more is said of him it is possible that he fell in the fight.

2. A Benjaminite, one of David's thirty mighty men (2 S. 23:29; called Ithai in 1 Ch. 11:31). J. J. REEVE

ITURAEA i-tūr-ē'ə, it-oor-ē'ə [Gk. *Itouraioi, Ityraioi, Itouraia* (*xṓra*)–'(land) of the Ituraeans']. A region along the Lebanon and Anti-Lebanon Ranges deriving its name from the Jetureans, an Arab tribe descended from Ishmael through JETUR (Gen. 25:15; 1 Ch. 1:31), who had formerly lived in Transjordan but had moved NE of Galilee either when overthrown by the Israelite tribes in Transjordan:

Reuben, Gad, and Manasseh (1 Ch. 5:18f.; Eupolemus attributes the conquest to David, Eusebius *Praep. ev.* ix.30) or, more likely, for better pastures if not because of the Nabateans. The Ituraeans were formidable archers according to Vergil (*Georgics* ii.448) and Lucan (*De bello civili* viii.514), notorious robbers according to Strabo (*Geog.* xvi.2.18, 20), and "of all tribes the most barbarous" according to Cicero (*Philippicae* ii.112; cf. 19; v.18).

By the end of the 2nd cent. B.C., the Ituraeans had apparently spread southward to upper Galilee. When the Hasmonean Judas Aristobulus (or rather his brother Antigonus at his command) set out to complete the conquest and Judaization of Galilee in 104 B.C., "he fought against the Ituraeans, annexed a large part of their land to Judea, and forced the inhabitants, if they wished to remain in their country, to submit to circumcision and live according to the laws of the Jews" (Josephus *Ant.* xiii.11.3 [318]), just as his father, John Hyrcanus, had earlier forced the Idumeans in the south (*Ant.* xiii.9.1; 15.4 [257f., 396]).

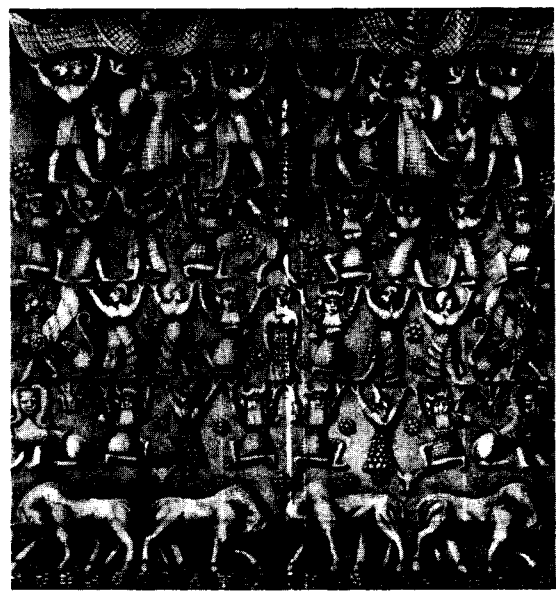
The subsequent, still fragmentary history of the remaining part(s) of the region may be summed up as follows. At the height of the Syrian civil wars culminating with the fall of the Seleucid kingdom and the coming of the Romans, the son of a certain Mennaeus, Ptolemy (*ca.* 85-40 B.C.), controlled among vast territories in the Lebanon "the mountainous country of the Ituraeans" with its capital at Chalcis, from where he terrorized Damascus (Strabo *Geog.* xvi.2.10; Josephus *BJ* i.4.8; 5.3; 9.2 [103, 115, 185f.]; *Ant.* xiii.15.2; 16.3 [392, 418]; xiv.7.4 [126]). He continued to rule the region after submitting to Pompey in 64 B.C. and paying an indemnity of 1000 talents (*Ant.* xiv.3.1f. [34-39]). His son Lysanias (40-36 B.C.), called king of the Ituraeans by Dio Cassius (*Hist.* xlix.32.5; cf. *Ant.* xiv.13.3 [330]), was killed at the instigation of Antony, who gave the domain with other territories to Cleopatra (*Ant.* xv.4.1 [91f.]; Plutarch *Antony* xxxvi.2). Following her death in 30 B.C., a certain Zenodorus (23-20 B.C.) leased the former domain of Lysanias and controlled harshly a number of principalities between Trachonitis and Galilee, leading Augustus to add certain of these principalities to the kingdom of Herod the Great; and upon the death of Zenodorus, the rest of his principalities were added (*BJ* i.20.4 [398-400]; ii.6.3 [95]; *Ant.* xv.10.1-3 [344f., 349-352, 359f.]). Herod in turn bequeathed the region to his son Philip (*Ant.* xvii.11.4 [319]), whose tetrarchy later became the initial kingdom of Herod Agrippa I, given to him by Gaius Caligula in A.D. 38 (*BJ* ii.9.6 [181]; *Ant.* xviii.6.10 [237]).

Another part of the region, the tetrarchy of ABILENE, which received its name from the city of Abila and was ruled for a time by another LYSANIAS (Lk. 3:1; cf. *CIG*, 4521, 4523), was added to the kingdom of Agrippa I in A.D. 41 by Claudius (*Ant.* xviii.6.10 [237]; xix.5.1 [275]; Dio Cassius *Hist.* lix.8.2), who also gave the central Ituraean city of Chalcis and its surroundings to a brother (later son-in-law) of Agrippa I, known as Herod of Chalcis (*BJ* ii.11.5 [217]) The kingdom of Chalcis passed in A.D. 50 to Herod Agrippa II (*BJ* ii.12.1 [223]; *Ant.* xx.5.2 [104]). In A.D. 53 Claudius deprived the young Agrippa of Chalcis and granted him instead the former tetrarchy of Philip and Lysanias' former tetrarchy of Abilene, along with Batanea and Trachonitis (*Ant.* xx.7.1 [138]). Upon the death of Agrippa II in A.D. 93, his kingdom was once more incorporated into the vast province of Syria, just as the Ituraean tetrarchy of Arca, which Gaius Caligula had granted to a certain Sohaemus in A.D. 38 (Dio Cassius *Hist.* lix.12.2), was incorporated earlier (Tacitus *Ann.* xii.23).

The dividing of the region by the Romans into various tetrarchies and principalities, and their occasional annexation to neighboring provinces, add to the difficulty of defining its boundaries. A. TERIAN

IVAH ī'və. *See* IVVAH.

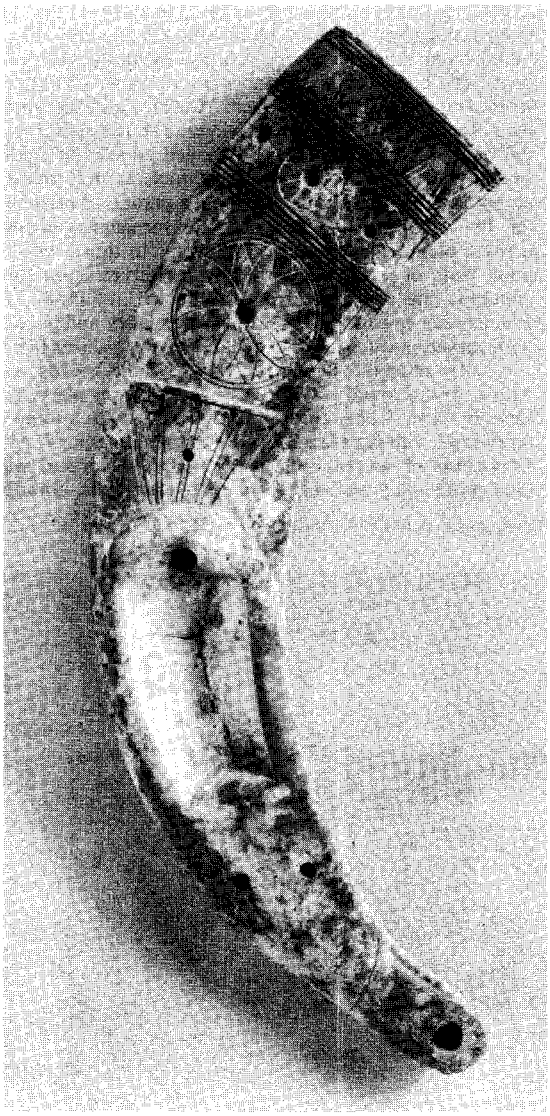
IVORY [Heb. *šēn*] (1 K. 10:18; 22:39; 2 Ch. 9:17; Ps. 45:8 [MT 9]; Cant. 5:14; 7:4 [MT 5]; Ezk. 27:6, 15; Am. 3:15; 6:4); NEB also "strong" (Ezk. 27:6); [*šenhabbîm*] (1 K. 10:22; 2 Ch. 9:21); [Gk. *elephántinos*] (Rev. 18:12). The Hebrew term *šēn* is a specialized use of the common noun for tooth. This is an appropriate designation for ivory, which is a kind of dentin constituting the tusks of some large mammals, most familiarly elephants, as the Greek term reflects. The biblical references to ivory are part of a large body of textual and archeological evidence illustrating the extent of highly skilled ivory carving in the ancient Near East during the first two millennia B.C.

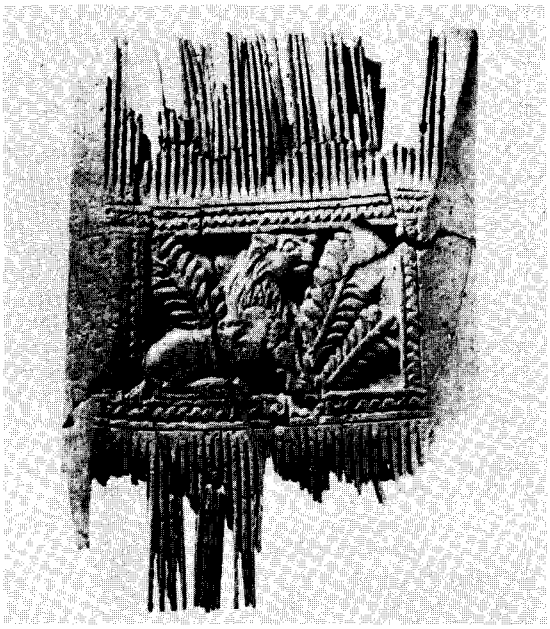


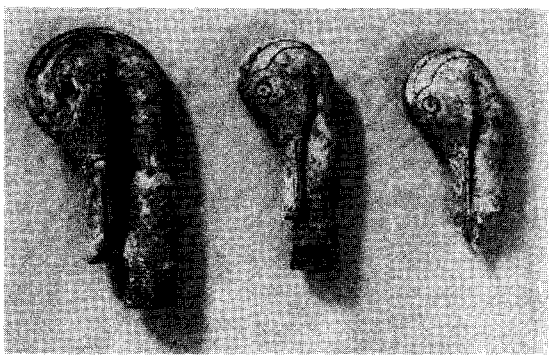
Drawing of ivory plaque from Megiddo with Hittite figures (Oriental Institute, University of Chicago)

The single NT reference (Rev. 18:12) places ivory among special woods in the cargo for the symbolic Babylon; it occupies the same place in Assyrian and Babylonian royal tribute lists and building inscriptions. The hardness and grain of ivory required carving techniques similar to those of woodworking, and the two materials were used together, the ivory applied as inlay to wooden articles or attached to wooden foundations. The Canaanites, Phoenicians, and their neighbors in northern Syria were particularly adept in these skills, perhaps because they had access to local timber and to raw ivory from native elephant herds in the upper Euphrates region (until Assyrians hunted them to extinction about the 7th cent. B.C.) as well as from African and Indian sources through maritime trade. This concentration of materials, expertise, and sea commerce explains why most of the excavated second-millennium sites where Syro-Phoenician ivories have been found are in a narrow band along the eastern Mediterranean coast. Only under the Assyrians did the products of the Levantine ivory industry reach the interior in significant quantities.

The parallel passages in 1 K. 10:22 and 2 Ch. 9:21 use *šenhabbîm* to designate the raw ivory tusks imported by Hiram of Tyre and Solomon in their overseas commercial ventures (cf. 1 K. 9:26-28, joint voyages from Ezion-geber to Ophir through the Red Sea). The Hebrew term has been explained as a contraction derived either from *šēn*







Ivory objects from Megiddo (Late Bronze II). Clockwise from left: incised tusk, double comb ornamented with a lion among trees, carved ivory bird heads, and griffin (Oriental Institute, University of Chicago)

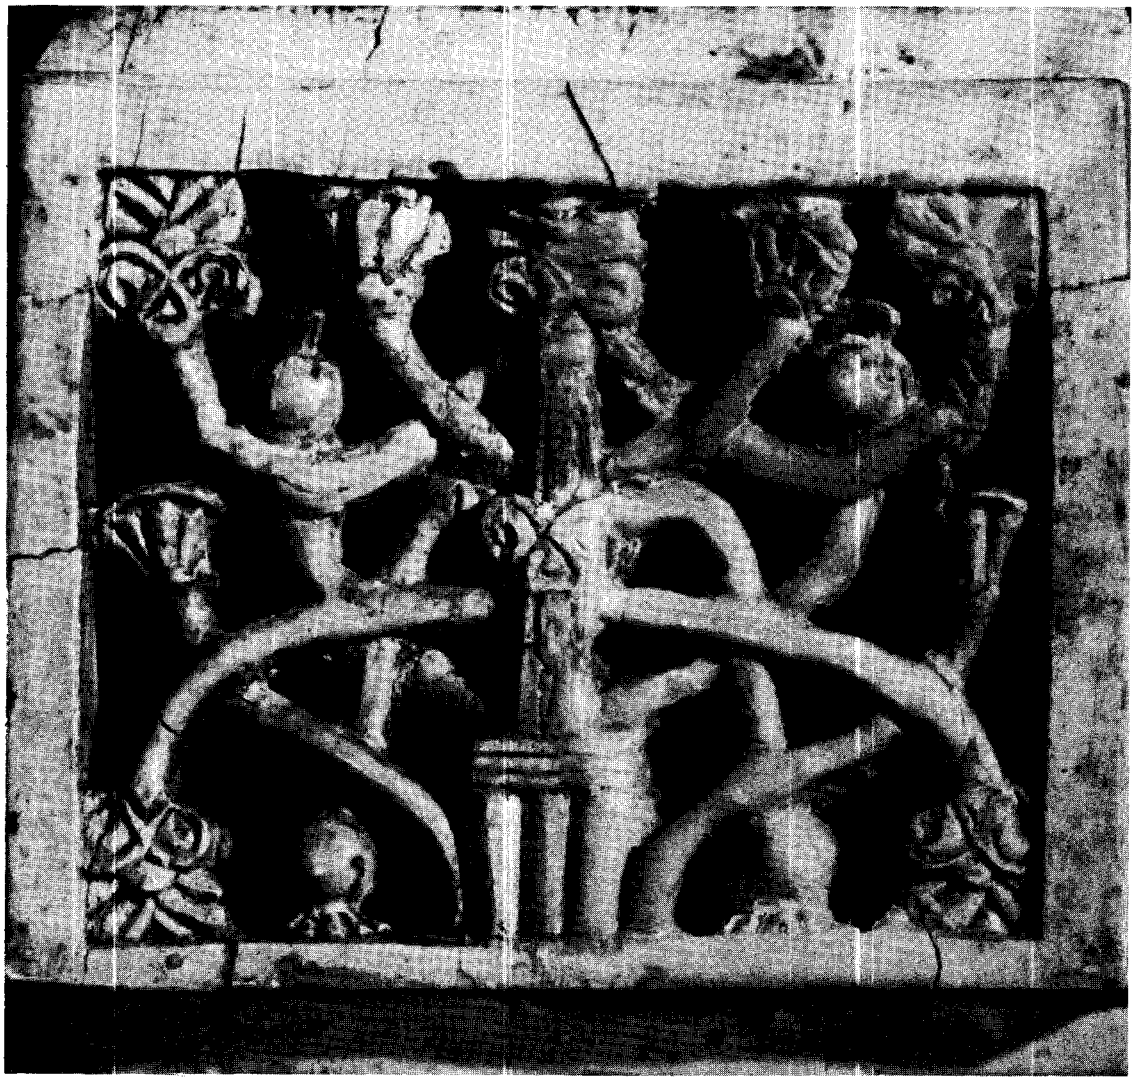
habbîm, "elephants' tooth" (*habbîm* understood as an otherwise unattested Hebrew form for elephants; cf. the LXX here [1 K. 10:22; 2 Ch. 9:21], *odóntes elephantínoi*, "elephants' teeth"), or from *šēn (w^e)hoḫnîm*, "ivory and ebony" (cf. Ezk. 27:15, *qarnôṯ šēn w^ehoḫnîm*, "horns of ivory and ebony").

More than half of the OT references to ivory use *šēn*, the common noun without an article, suggesting a general reference to ivory. The lamentation over Tyre in Ezk. 27 twice mentions that Phoenician port's ivory interests, first as the inlaid decking of the metaphorical ship (v. 6), second as a payment from its coastal markets (v. 15). Solomon not only imported ivory but had a magnificent throne of it, overlaid with gold (1 K. 10:18-20; 2 Ch. 9:17-19). Although the text does not specify that Phoenician craftsmen were employed for making the throne (as they were for the temple, 1 K. 5), the design suggests that they were responsible for it. Ivory lions in the round, which could have stood at the armrests or steps of a throne, have been found at Samaria and Nimrûd, and the calf motif is familiar among Syro-Phoenician carvings of the period.

Ivory plaques detached from their original frames and even recognizable pieces of furniture have been excavated from other royal collections, including the footboard of a bed and a round table from Ugarit, a bedframe from Arslan Tash, screens from Nimrûd, and footstools from Zenjirli. A stone relief at Nineveh shows Ashurbanipal reclining on an elaborately carved couch, his queen seated nearby on a chair with footstool, as they share a ceremonial garden feast and review a parade of prisoners (cf. Ps. 149:5-9). Amos alludes to the furnishings of such a royal banquet in the oracle of woe "to those who lie upon beds of ivory, and stretch themselves upon their couches, and eat lambs from the flock . . ." (6:4). The Psalms refer to royal suites, furnished in ivory and paneled with carved plaques inlaid in cedar, as ivory palaces (45:8).

Smaller objects — cosmetic boxes, game boards, and figures in the round — were also carved from ivory. The lover in Cant. 5:14 is compared to a statue with a torso of ivory inset with lapis lazuli (NEB) or sapphires (RSV, AV). Fragments of several male ivory figures decorated with blue paste inlay and gilt were recovered from Nimrûd.

Ivory plaque, 7.5 cm. (2.9 in.) square, from the palace of Shalmaneser III at Nimrûd, 9th cent. B.C.: trellis work with floral designs (Royal Ontario Museum, Toronto)



Ivory female head used as a furniture or spoon ornament. From Megiddo, Late Bronze II (Oriental Institute, University of Chicago)

Some of the ivories buried in Mesopotamian sites may have come originally from the Hebrew courts: Menahem of Samaria is listed among the western tributaries who provided elephants' hides and ivory to Tiglath-pileser III, while Sennacherib boasts of having exacted "ivory beds, house chairs of ivory, elephants' hides, ivory (elephants' teeth)" from Hezekiah of Jerusalem (*ARAB*, II, § 284).

The remaining OT references to ivory use the definite article with the noun, *haššēn*, and all describe buildings. In the formulaic report of the close of Ahab's reign, "the ivory house which he built" receives special notice (1 K. 22:39). The fragmentary remains of its carvings have been excavated at Samaria, and they show the Syro-Phoenician style one might expect in the palace of the son-in-law of a a Sidonian king (1 K. 16:31). Similarly, the building inscriptions of Tiglath-pileser III, Sargon, Sennacherib, and Esarhaddon conventionally designate their royal houses by their materials: e.g., "Palaces of ivory, maple, boxwood, mulberry, cedar, cypress, juniper, pine and pistachio-wood, I erected herein for my royal dwelling" (Sargon, *ARAB*, II, § 102). The features of a queenly maiden are compared to recognizable landmarks (Cant. 7:4): the ivory tower, pools of Heshbon, the tower of Lebanon. In Amos' prophecy that "the houses of ivory shall perish" (3:15), the royal house in its literal and figurative senses is clearly the target. The historical counterpart to this literary practice of using the destruction of ivory to symbolize the monarch's downfall may have been the deliberate gathering and burning of royal ivory furnishings from the sacked palace, as reported by excavators of Megiddo, Alalakh, Ugarit, and Nimrûd.

In their participation in the international ivory trade, the Hebrew monarchs evidently favored the popular Phoenician motifs, which were religious at least in their origins. Stylized sacred trees, guardian sphinxes (cherubim), adapted Egyptian deities, cow and calf, the woman at the window, stags drinking, lions in the round — these characteristic designs brought the iconography of the Canaanite and Phoenician cultures into Israelite temple and palace.

E. B. JOHNSTON

IVORY TOWER [Heb. *migdal haššēn*]. In Cant. 7:4 (MT 5) the neck of Shulammite is compared in whiteness and stateliness to a (or the) tower of ivory. The definite article may suggest that the comparison is with some actual tower in or near Jerusalem, but probably the language is simply figurative (cf. M. Pope, *Song of Songs* [*AB*, 1977], pp. 624f.).

IVVAH iv′ə [Heb. *ʿiwwâ*; Gk. *Aba*]; AV IVAH; also **AVVA** av′ə [Heb. *ʿawwā*; Gk. *Aia*] (2 K. 17:24); AV AVA. A city-state in Syria captured by the Assyrians in the 8th cent. (2 K. 18:34; 19:13) along with Hamath, Arpad, Sepharvaim, and Hena. Of these, only Arpad and Hamath have been identified. Ivvah could be related to the modern site of ʿImm (older form Emma) between Aleppo and Antioch (cf. Isa. 37:13).

Ivvites were among the displaced persons who were brought into Palestine by the Assyrians after the deportation of the northern tribes of Israel (2 K. 17:24). Later they became infamous for making the pagan idols of "Nibhas and Tartak" (2 K. 17:31). Arguments against the historicity of the state of Ivvah (*see* HENA) are weakened

by these concrete facts of captured city and king, deported people, and national gods. A. H. LEWIS

IVY [Gk. *kissós*]. The only mention of the word in all the sacred writings is in 2 Macc. 6:7 in connection with the oppression of the Jews by Antiochus Epiphanes. The plant referred to was the *Hedera helix*, which was sacred to Bacchus (Dionysus), the Greek god of wine and of the culture of the vine (cf. Euripides, *Bacchae, passim*). It was of ivy or of pine that the "perishable wreath" of the famous Isthmian games was made (1 Cor. 9:25)

J. HUTCHISON

IYE-ABARIM ī-yə-ab'-ə-rim [Heb. *'iyê hā'ᵃḇārîm*–'mounds of the Abarim']; AV IJE-ABARIM. A place occupied by the Israelites in their wanderings, located somewhere between Oboth and the Wâdī Zered (Nu. 21:11f.) on the border of Moab (Nu. 33:44). A site on the southeastern edge of Moab seems to be indicated, but no certain identification has yet been made. In Nu. 33:45 it is called IYIM.

IYIM ī'yim [Heb. *'iyîm*–'heaps, mounds' (Nu. 33:45)]; AV IIM. A short form of IYE-ABARIM.

IYYAR ē'yär [Heb. *'iyār*; Gk. *Iar*]. The second month of the Jewish year, corresponding to May. It is not mentioned in the Bible. *See* CALENDAR.

IYYON. *See* IJON.

IZEHAR iz'ə-här (Nu. 3:19, AV). *See* IZHAR.

IZHAR iz'här [Heb. *yiṣhār*].

1. The father of Korah (Nu. 16:1), descended from a Kohathite Levite of this name, whose descendants formed a family in the tribe of Levi (Ex. 6:18, 21; Nu. 3:19, 27; 1 Ch. 6:18, 38). AV also IZEHAR (Nu. 3:19).

2. A descendant of Judah whose mother's name was Helah (1 Ch. 4:7; AV, NEB JEZOAR).

IZHARITES iz'hə-rīts [Heb. *yiṣhārî*]. The descendants of Izhar son of Kohath and grandson of Levi (Nu. 3:19, 27; 1 Ch. 26:23).

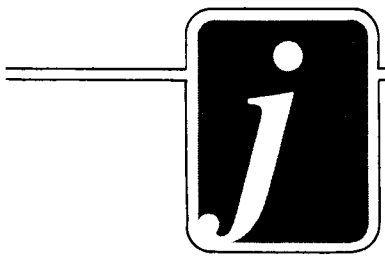
IZLIAH iz-lī'ə [Heb. *yizlî'â*]; AV, NEB JEZLIAH. A son of Elpaal, of the tribe of Benjamin (1 Ch. 8:18).

IZRAHIAH iz-rə-hī'ə [Heb. *yizraḥyâ*–'Yahweh appears,' or 'Yahweh shines']. A descendant of Issachar, grandson of Tola, only son of Uzzi (1 Ch. 7:3); same as Jezrahiah (Neh. 12:42, RSV, AV), leader of the temple singers.

IZRAHITE iz'rə-hīt [Heb. *yizrāḥ*–'rising, shining']. Shamhuth the captain of the fifth monthly course (1 Ch. 27:8) is called an "Izrahite." The name may be derived from the town or family of Izrah, but more likely is a corruption of the word "Zerahite," descendant of Zerah of Judah.

IZRI iz'rī [Heb. *yiṣrî*]. A man of the "sons of Jeduthun," leader of the fourth band of musicians, who served in the sanctuary (1 Ch. 25:11). He may be the Zeri mentioned in v. 3.

IZZIAH iz-ī'ə [Heb. *yizzîyâ*–'Yahweh purifies']; AV JEZIAH, EDDIAS. One of the faithful Jews who put away their foreign wives. He belonged to the family of Parosh (Ezr. 10:25; 1 Esd. 9:26; NEB JEDDIAS).



J. *See* CRITICISM II.D.

JAAKAN jā'ə-kən [Heb. *ya'qān*] (1 Ch. 1:42); AV JAKAN. The third son of Ezer, a Horite. The text is uncertain, however, and seems to lack the necessary conjunction *w^e*, "and." Thus *BH* and *BHS* suggest reading *w^eya'qān* or *wa'qān* (so NEB, "and Akan") on the basis of some MS evidence and the parallel Gen. 36:27. *W^eya'qān* seems preferable in both texts, since this form also occurs in Nu. 33:31f. (Bene-jaakan) and Dt. 10:6 (Beeroth Bene-jaakan). That Gen. 36:27 is not without problems is clear from the LXX, which has *kaí Iōukam kaí Oukan*, perhaps the result of a conflation of variants or a marginal gloss that has crept into the text. G. A. L.

JAAKOBAH jā-ə-kō'bə [Heb. *ya'qōḇâ*–for meaning *see* JACOB 1]. A Simeonite prince (1 Ch. 4:36).

JAALA jā'ə-lə [Heb. *ya'lā'*] (Neh. 7:58); **JAALAH** [Heb. *ya'lâ* (Ezr. 2:56); Gk. *Ieēli* (1 Esd. 5:33)]; AV also JEELI. The name of a family of returned exiles.

JAALAM jā'ə-ləm. *See* JALAM.

JAANAI jā'ə-nī. *See* JANAI.

JAAR jā'ər [Heb. *ya'ar*–'forest' or 'wood']. Only once taken as a proper name: "We found it in the fields of Jaar" (Ps. 132:6). It may be a shortened form of the name KIRIATH-JEARIM, where the ark had rested twenty years.

JAARE-OREGIM jā'ə-rə-ôr'ə-jim [Heb. *ya'rê 'ōr^egîm*]. In 2 S. 21:19, given as the name of a Bethlehemite, father of the ELHANAN who is said to have slain Goliath the Gittite (cf. 1 S. 17). The name is an evident scribal error in which the term *'ōr^egîm*, "weavers," was copied accidentally from the end of the verse. The name Jaare should be modified to correspond with the textual variant of 1 Ch. 20:5, Jair. *See* JAIR 4.

JAARESHIAH jar-ə-shī'ə [Heb. *ya'rešyâ*]; AV JARESIAH. In 1 Ch. 8:27 a Benjaminite, son of Jeroham.

JAASAU jā'ə-sô. *See* JAASU.

JAASIEL jā'ā-zə-əl [Heb. *ya'śî'ēl*–'God makes'(?)]; AV JASIEL. In 1 Ch. 11:47, a Mezobaite, one of David's mighty men, probably the same as "the son of Abner" in 1 Ch. 27:21, a Benjaminite tribal prince of David.

JAASU jā'ə-sōō [Heb. *K ya'śô*; Q *ya'śāy*]; AV JAASAU. In Ezr. 10:37, one of those who had married foreign wives. The LXX translates the consonantal text as a verb, *kaí epoíēsan*, "and they did."

JAAZANIAH jā-az'ə-nī'ə [Heb. *ya'zanyāhû* (2 K. 25:23; Ezk. 8:11); *ya'zanyâ*–'Yahweh hears' (Jer. 35:3; Ezk. 11:1)].

1. In 2 K. 25:23, "son of the Maacathite," and one of the Judean "captains of the forces" who joined Gedaliah, the Babylonian governor appointed by Nebuchadrezzar over Judah, at Mizpah. He is the Jezaniah of Jer. 40:8; 42:1. Though not mentioned by name, he was presumably one of those captains who joined Johanan in his attack on Ishmael after the latter had slain Gedaliah (Jer. 41:11-18). He is also the Azariah of Jer. 43:2, a name also found in LXX B in 42:1. Jer. 43:5 relates how Johanan and his allies, Jaazaniah (= Azariah) among them, left Judah with the remnant and took up their abode in Egypt.

2. In Jer. 35:3, son of Jeremiah (not the prophet), and a chief of the Rechabite clansmen. Jeremiah used their loyalty to their ancestral tradition as an example as he preached to his own people.

3. In Ezk. 8:11, son of Shaphan, and one of the seventy men of the elders of Israel whom Ezekiel saw in a vision of Jerusalem offering incense to idols.

4. In Ezk. 11:1, son of Azzur, and one of the twenty-five men whom Ezekiel saw in his vision of Jerusalem, at the eastern door of the Lord's house, and against whose iniquity he was commanded to prophesy (11:1-13).

Excavations at Lachish have uncovered several letters dating from the 6th cent. B.C., one of which contained the name "Jaazaniah, son of Tob-Shillem." Obviously the name was fairly common in Palestine in the preexilic period. D. F. ROBERTS
R. K. H.

JAAZER jā'ə-zər. *See* JAZER.

JAAZIAH jā-ə-zī'ə [Heb. *ya'zîyāhû*–'Yahweh strengthens']. In 1 Ch. 24:26f., a Levite, "son" of Merari. But the MT is corrupt. LXX B reads Gk. *Ozeia*, which some take to suggest Uzziah (cf. 27:25). (See E. L. Curtis, comm. on the books of Chronicles [*ICC*, 1910], pp. 274f.)

JAAZIEL jā-ə-zī'əl [Heb. *ya'zî'ēl*–'God strengthens']. In 1 Ch. 15:18, a Levite, one of the musicians appointed to

play upon instruments at the bringing up of the ark by David. Jaaziel should probably replace "Jeiel" in 1 Ch. 16:5, which seems to have been a transcriptional error.

JABAL jā'bəl [Heb. *yāḇāl*]. In Gen. 4:20, a son of Lamech by Adah. He was the earliest nomadic shepherd mentioned in the OT.

JABBOK jab'ək [Heb. *yabbōq*]. One of the main streams of Transjordan. Now known as the Wâdī Zerqâ, from the blueness of its water, it rises near ʿAmmân, the biblical Rabbath-ammon, and flows north and then northwest; finally about due E of Shechem it turns west in an ever deepening gorge until it enters the Jordan Valley and flows into the Jordan just N of Adam. If we ignore its meanderings, the length of the Jabbok is about 100 km. (60 mi.).

In Nu. 21:24 it is given as the boundary of Sihon's kingdom; i.e., the upper course separated it from that of the Ammonites and the lower from the area claimed by Og king of Bashan. Under Israel the lower course ceased to form a boundary, except as part of the border between Gad and half Manasseh, though only in the hill country. On its course lay the important settlements of Succoth, Zarethan, Penuel, and Mahanaim.

Only in the story of Jacob does the Jabbok play any part (Gen. 32:22), but it is in the background of other events. Gideon's pursuit of the Midianites (Jgs. 7–8) must have passed that way, and somewhere near it Absalom met defeat and death (2 S. 18). Jephthah's defeat of Ephraim (Jgs. 12) was probably also in its vicinity.

H. L. ELLISON

River Jabbok in Transjordan (W. S. LaSor)

JABESH jā'besh [Heb. *yāḇēš*]. The father of Israel's King Shallum (2 K. 15:10, 13f.). Noth (*IP*, p. 244) suggests that this may be a place name, i.e., Shallum of Jabesh, an interpretation that the grammar allows (cf. Isa. 7:6, where "son of Tabeel" means a person from the land of Tabeel). Gray (*I & II Kings* [*OTL*, 2nd ed. 1970], pp. 620-23) modifies this idea by suggesting that Yasib be read for Jabesh (basically a simple transposition of the last two consonants in Hebrew). According to Gray, Yasib was located near Tappuah, which Menahem brutally destroyed (v. 16); Gray sees Menahem's only possible motivation for this unprecedented brutality as a retaliation against Shallum's hometown. Evidence for a town in this vicinity comes from the Samaria Ostraca (cf. J. Gibson, *Textbook of Syrian Semitic Inscriptions*, I [1971; repr. 1973], 12); Aharoni (*LBHG*, p. 325 n. 101) concludes that this town is to be identified with Yasuf near Tappuah, and may be intended in Josh. 17:7 (LXX *Iassib*; MT *yōšᵉḇê*, "inhabitants of"), where a place name does improve the sense (cf. the NEB and JB).

G. A. L.

JABESH jā'besh [Heb. *yāḇēš*]. A short form of JABESH-GILEAD.

JABESH-GILEAD jā'besh-gil'i-əd [Heb. *yāḇêš gilʿāḏ*–'dry place of Gilead']; also Jabesh. A city belonging to the half-tribe of Manasseh in the highlands E of the Jordan about 16 km. (10 mi.) SE of Beth-shan. It is situated beside the Wâdī Yâbis (Jabesh), which flows into the Jordan about 30 km. (20 mi.) S of the Sea of Galilee. Several OT passages refer to Jabesh-gilead.

The city was destroyed for its refusal to appear at the Mizpah assembly called by Israel to deal with Benjamin (Jgs. 21:8). Four hundred maidens were spared — to be given to Benjaminites for wives (Jgs. 21:14), lest Benjamin become extinct.

When Nahash king of Ammon threatened to put out the right eye of the men of Jabesh-gilead, Saul came to their rescue (1 S. 11:1-11). His act of mercy was not forgotten. When Saul was defeated on the slopes of Mt. Gilboa by the Philistines, and he and his sons were slain, the men of Jabesh-gilead trekked about 30 km. (20 mi.) by night to recover the decapitated bodies of Saul and his sons from the walls of Beth-shean (1 S. 31:12). They cremated the bodies and buried them with honor in Jabesh-gilead, where they remained until David ordered them exhumed and reinterred in the tomb of Saul's father Kish, at Zela in Benjaminite territory (2 S. 21:1-14; 1 Ch. 10:11f.).

When David learned of the courage of the men of Jabesh-gilead he commended them and promised them compensation (2 S. 2:5-7).

F. E. YOUNG

JABEZ jā'bez [Heb. *yaʿbēṣ*] (1 Ch. 4:9f.). The head of a family of Judah, noted for his honorable character. The popular explanation of his name is that his mother bore him in pain (Heb. *ʿōṣeḇ*); this play on words is continued in Jabez' prayer that God would keep him from pain (Heb. *ʿāṣaḇ*; cf. the NEB). J. Myers (*I Chronicles* [*AB*, 1965], p. 28) points out that this pericope, which rather abruptly appears in a somewhat continuous genealogy (but cf. vv. 14, 27), "may have been intended as a comment on ii 55 where Jabez is a place name."

JABEZ jā'bez [Heb. *yaʿbēṣ*] (1 Ch. 2:55). An unidentified town probably in the territory of Judah near Bethlehem, occupied by scribes.

JABIN jā'bin [Heb. *yāḇîn*–'one who is intelligent,' 'discerning'(?)]. The word may have been a hereditary royal title among the northern Canaanites (cf. the familiar usage of Heb. *parʿôh meleḵ-miṣrayim*).

1. The king of Hazor, the leading city in northern Palestine, who led an alliance against Joshua. He was defeated at the waters of Merom, his city was taken, and he was slain (Josh. 11:1-12).

2. The king of Canaan, who reigned (or had reigned) in Hazor. It is not clear whether he dwelt in Hazor or Harosheth, the home of Sisera the captain of his host at the time of the story narrated in Judges. He oppressed Israel in the days preceding the victory of Deborah and Barak. To the Israelites he must have been but a shadowy figure as compared with his powerful captain Sisera, for the song makes no mention of him and there is nothing to indicate that he even took part in the battle that freed Israel (Jgs. 4:2, 7, 17, 23f.; Ps. 83:9f. [MT 10f.]).

E. D. ISAACS

JABNEEL jab'nə-əl [Heb. *yaḇnᵉʾēl*–'God causes to build'; Gk. *Iabnēl*].

1. Also **JABNEH** jab'nə [Heb. *yaḇneh*–'he causes to

build'; Gk. *Iabnē*]; Josephus, Apoc., **JAMNIA** jam'ni-ə [Gk. *Iamneia*]; AV Apoc., NEB Apoc., also JEMNAAN (Jth. 2:28). A town on the northern border of Judah, about 6 km. (4 mi.) from the Mediterranean Sea on the Nahr Rubin. It had a port a short distance S of the river's mouth. In early times it was a Philistine city, but King Uzziah captured it for Judah and demolished its wall in his war against the Philistines (2 Ch. 26:6).

During the Hellenistic period its name was changed to Jamnia. It served as a Syrian stronghold against the Maccabees and was occupied by the Seleucid generals Georgias (1 Macc. 4:15; 5:58), Apollonius (10:69), and Cendebeus (15:40). Judas Maccabeus burned its harbor and fleet (2 Macc. 12:9); in his battles he found "consecrated tokens of the idols of Jamnia" under the clothing of the dead (2 Macc. 12:40). It was Simon, however, who finally conquered the town in 142 B.C. (Josephus *Ant.* xiii.6.7 [215]). Later Jamnia was under the jurisdiction of Alexander Janneus (*Ant.* xiii.15.4 [395]).

In 62 B.C. Pompey joined Jamnia to the province of Syria (*Ant.* xiv.4.4 [75]), after which Gabinius ordered the city to be rebuilt (*BJ* i.8.4 [166]). Caesar Augustus restored Jamnia to Herod, who presented it to his sister Salome with 5000 drachmas of silver (*Ant.* xvii.8.1 [189]); she bequeathed it to Julia the wife of Augustus (*Ant.* xviii.2.2 [31]; *BJ* ii.9.1 [167]).

Before the fall of Jerusalem, according to talmudic tradition, Vespasian gave Rabban Johanan ben Zakkai permission to found a *Yeshiva* (academy) at Jamnia. (The title "Rabban" ["our master"] was reserved for the rabbinic patriarch or head of the academy [Baron].) After Titus sacked Jerusalem (A.D. 70), the Sanhedrin was replaced by the Beth Din in Jamnia, where it remained until the Bar Cochba revolt in A.D. 132. Jamnia became the hub of Jewish spiritual and intellectual life, leading to significant internal reforms. Under Johanan's leadership an assembly of Jewish scholars met there in A.D. 90 to make consequential decisions relating to the canon of the OT (*see* CANON OF THE OT II.D.3).

The Crusaders conquered the city, giving it the name Ibelin. It remained a commercial center of some importance during the Middle Ages.

The site is represented by the modern city of Yebnā, belonging to the state of Israel; in 1948 it was colonized by Jewish immigrants. Its population is about 2500.

2. A town of Naphtali (Josh. 19:33). The site is likely modern Yemmā, about 6 km. (4 mi.) SW of the Sea of Galilee.

Bibliography.—S. W. Baron, *Social and Religious History of the Jews* (8 vols., 2nd ed. 1952); M. I. Dimont, *Jews, God, and History* (1962); S. Landman and B. Efron, *Story Without End* (1949).

K. G. JUNG

JABNEH (2 Ch. 26:6). *See* JABNEEL **1.**

JACAN jā'kən [Heb. *ya'kān*] (1 Ch. 5:13); AV JACHAN. A chief of a family from Gad.

JACHIN jā'kən [Heb. *yāḵîn*–'he will establish'].

1. The fourth son of Simeon (Gen. 46:10; Ex. 6:15; Nu. 26:12). In 1 Ch. 4:24 his name is given as "Jarib" (cf. AV mg.). "Jachinites," the patronymic of the family, occurs in Nu. 26:12

2. Head of the twenty-first course of priests at the time of David (1 Ch. 24:17). It is used as a family name in 1 Ch. 9:10 and Neh. 11:10, where some of the course are included in the list of those who, having returned from Babylon, willingly accepted the decision of the lot, and abandoned their rural retreats to become citizens and guardians of Jerusalem (Neh. 11:1f.). J. CRICHTON

JACHIN jā'kən **AND BOAZ** bō'az [Heb. *yāḵîn*–'he will establish'; *bō'az*–'in it is strength' (1 K. 7:15-22; 2 Ch. 3:15-17)]. These were the names of the two bronze pillars that stood before the temple of Solomon. The precise purpose of the pillars is uncertain, since there is no explicit biblical statement about their function. They were probably not used to support the building. They may have been the metal equivalents of the sacred wooden poles among the cultic equipment of Canaanite shrines. Albright suggested that they functioned as cressets or giant incense stands, after the fashion of those depicted on some Roman coins. Such pillars were often inscribed, and since 2 K. 11:14; 23:3 mention the king standing by the pillars, a dynastic use similar to the inscribed pillar of the Sumerian ruler Gudea at Lagash may be reflected.

A difficulty arises concerning the height of the pillars. The writers in Kings and Jeremiah affirm that the pillars before the porch were each 18 cubits (8.2 m., 27 ft.) high (1 K. 7:15; Jer. 52:21), while the Chronicler states that they were 35 cubits (16 m., 52.5 ft.) (2 Ch. 3:15). Various methods have been suggested to reconcile this discrepancy, but it is more probable that there is a corruption in the Chronicler's number.

On the construction of the pillars and their capitals, *see* TEMPLE. At the final capture of Jerusalem they were destroyed, and the metal of which they were composed was sent to Babylon (2 K. 25:13). The two pillars are represented in Ezekiel's ideal temple (Ezk. 40:49).

Similar columns have been excavated in front of temples at Tyre, Khorsabad, and elsewhere. At Khorsabad, a cylindrical bronze pillar nearly 9 m. (30 ft.) in length was unearthed, very close to the dimensions of the Jachin and Boaz pillars. At Hazor, two basalt pillars were recovered from each side of a temple entrance, but these were integrated into the total structure.

JACINTH jā'sinth. *See* STONES, PRECIOUS.

JACKAL [Heb. *tannîm* (cf. Arab. *tînân*–'wolf,' *tinnîn*–'sea monster')]; AV DRAGONS; NEB also WOLF, SEA SERPENT; [*tannîn*] (Lam. 4:3); AV "sea monsters"; NEB "whales"; [*šû'āl*] (Ps. 63:10 [MT 11]; Lam. 5:18); AV FOX. In Mal. 1:3 the NEB follows the LXX *dómata* ("dwellings"), and the RSV follows the MT. A member of the carnivorous *Canidae* family.

The jackal (from Pers. *shaghal*), *Canis aureus*, is found throughout the Mediterranean except in western Europe. It ranges southward to Abyssinia, and eastward, in southern Asia, to India. It is smaller than a large dog, has a moderately bushy tail, and is reddish brown with dark shadings above. It is cowardly and nocturnal. Like the fox, it is destructive to poultry, grapes, and vegetables, but is less fastidious and readily devours the remains of others' feasts. Jackals generally go about in small companies. Their peculiar howl may frequently be heard in the evening and at any time during the night. It begins with a high-pitched, long-drawn-out cry, which is repeated two or three times, each time in a higher key than before. Finally there are several short, loud, yelping barks. When one raises the cry others often join in. Jackals are not infrequently confused with foxes. They breed freely with dogs. In Ps. 63:10; Lam. 5:18, the reference appears to be to the fox, whether the northern Palestinian *Vulpus flavescens* or the *Vulpus niloticus* found in southern Palestine.

See also WOLF; ZOOLOGY. R. K. H.

JACKAL'S WELL [Heb. *'ên hattannîn*; LXX Gk. *pēgḗ tṓn sykṓn*–'fountain of the figs']; AV DRAGON WELL.

Wooden funerary chest from the tomb of Tutankhamen with the Egyptian god Anubis as a jackal (Service des musées, Cairo)

A well or spring in the valley of Hinnom between the Valley Gate and the Dung Gate (Neh. 2:13). No such source exists in the Wâdī er-Rabâbi (*see* HINNOM, VALLEY OF) today, though it is very probable that a well sunk to the rock in the lower parts of this valley might strike a certain amount of water trickling down the valley bottom. It probably received its name from the jackals which frequented the locality, much as the pariah dogs did in later times. *See* JERUSALEM III.F.2.b.

JACOB jā'kəb [Heb. *ya'ᵃqōḇ*–(see below); Gk. *Iakōb*].

  D. Summary

The history of Jacob's life has been preserved in Gen. 25–50. There are many opinions about the form and compilation of these stories (see V below), but for the purposes of this study they will be considered as authentic records of historical events. A century of archeological exploration combined with the study of documents from the period in which the patriarchs must have lived, has shown that Genesis reflects accurately the social conditions of the time. This information enables parts of the biography of Jacob to be better understood. Evidence quoted as contemporary with Jacob is taken from material of the 18th and 17th cents. B.C.

I. Significance of the Name.–Two other names from the same root are found in the OT, Akkub and Jaakobah. It has long been known that a similar name was also in use in ancient Babylonia. Further discoveries of many more contemporary documents indicate that it is one of a large group of names borne by the West Semites who gained control of Mesopotamia at the beginning of the 2nd millennium B.C. "Jacob-el" (*ya'ᵃqub-il*) occurs not only in Babylonia (e.g., Kish and Khafadje) but also on the mid-Euphrates at 'Ana and in the north at Chagar-Bazar. Several other names with the same root are recorded from Mari and other sites. Egyptian sources provide contemporary examples of Asiatic slaves with Semitic names, including some formed from *'āqaḇ*. An inscription of Thutmose III (*ca.* 1450 B.C.) mentions a place in Palestine named *ya'ᵃqub-el*. One of the major rulers of the Hyksos period was named *ya'ᵃqub-her*. At a later period such names are found in the Palmyrene inscriptions.

The root *'qb*, meaning "heel," is found in Arabic and Assyrian as well as in Hebrew. From this basic noun was derived a simple verb "follow closely," with various nuances. In Jer. 9:4 it has the connotation of "overtaking" (cf. 17:9; Ps. 49:6 [MT 7]). Yet it may equally have a more favorable significance, "follow closely" and then "guard, protect," as in Sabean (cf. Job 37:4, "restrain").

There can be little doubt that the name *ya'ᵃqub-il* had the sense of "protection," perhaps as a prayer uttered at the birth of the child, "May God protect (him)" (so *FSAC*, p. 245). "Jacob" would be an abbreviated form of the name. According to G. R. Driver (*Problems of the Hebrew Verbal System* [1936]), however, *ya'ᵃquḇ* can be interpreted as a past tense as well as an imperfect (future). "God has protected" is a plausible translation of the name, one especially suitable if the birth had been difficult (cf. Gen. 25:22). In Jacob's case the circumstances of his birth were likely to give rise to an allusive wordplay upon a current name, for he "grasped the heel" of his brother (25:26).

II. Life of Jacob.–"A wandering Aramean was my father" (Dt. 26:5). This is an apt description of Jacob's history, which may be considered in four sections according to his place of residence.

A. Early Life in Canaan. The conception of Isaac's sons is remarkable in that it did not occur until twenty years after his marriage to Rebekah. As Abraham had been required to exercise faith in the promise of an heir, so was Isaac. The peculiar nature of his birth may have given Jacob his name, but even earlier he was designated as the chosen son through whom the promise given to Abraham should pass. Although born in Canaan, he was racially distinct, being the grandson of a man from Ur of the Chaldees, a Semite among the descendants of Ham.

The relationship of Esau and Jacob, twin brothers and full-born sons of Isaac, could not be eased by such a separation as divided Isaac and Ishmael. Later teachings (e.g., Mal. 1:2f.) show that it was by the sovereign will of God that one was chosen over the other. The supremacy of God over human customs was exemplified by the choice of Jacob, the younger son. The contrast between the two brothers may be seen as the contrast between the agriculturalist and the nomad-hunter who lives "from hand to mouth." These were the characteristics of the later nations of Israel and Edom. Esau's thoughtlessness lost him his birthright (the privilege of the firstborn son to inherit a double share of the paternal estate), thus allowing

Jacob the material superiority. His equally heedless marriage to local women of Hittite stock (Gen. 26:34) rendered him unsuitable to become the father of the chosen people. Nevertheless, Isaac intended to bestow the blessing of the firstborn upon Esau. The oracle given to Rebekah before the birth of her sons (25:23) probably encouraged her to counter Isaac's will and to gain the blessing for her favorite son by a fraud. The blessing that was given to Jacob conveyed the status of head of the family, apparently apart from the status of heir. Esau had disposed of this many years before, an action comparable to the sale of a birthright recorded at Nuzi. The blessing, once pronounced, was irrevocable; and so Jacob was sent to the safety of Rebekah's home until Esau should forgive him.

B. To Paddan-aram. Jacob was well over forty years old when he left home, for Esau had already married at the age of forty (Gen. 26:34; 27:46). The journey from Beersheba may be reckoned, however, as the commencement of his life as an individual. He had received the paternal blessing, and doubtless knew of the God who had made great promises to his father and to his grandfather; yet it was not until he slept at Luz that he realized that he was required to participate in the fulfillment of these promises. He was following the road to the north along the central hills when night fell, and he lay down with a convenient stone as his pillow. The text does not indicate that he had arrived at a recognized shrine, although Abraham had built an altar in that region (12:8) and archeological evidence suggests that it was an ancient holy place (*see* BETHEL 1). In the dream God revealed Himself to Jacob and renewed the promise to him by His name Yahweh, the name in which the promise had first been given. The traveler was given reassurance for his journey and of his eventual return. The erection of a stone pillar, in this case only a small boulder, was a common practice for the commemoration of some notable event. For Jacob this place was henceforth sanctified as "the gate of heaven" where God first communicated with him. It was for him Beth-el, "the dwelling of God."

Jacob moved northward to the "fields of Aram" (*see* PADDAN-ARAM). The relatives of Bethuel were evidently prosperous citizens of Haran who cultivated the land surrounding the town in the valley of the Jullab and pastured their flocks on the hills. Jacob was welcomed into his mother's family. An agreement was made that he should give seven years of service and then take as his wife his cousin Rachel, whom he had first met at the well outside the town. A partially comparable transaction is known from NUZI, where a man entered into servitude for seven years in return for a wife; but there the marriage probably took place at the beginning of the time. When the day of Jacob's marriage arrived, Rachel's father Laban substituted his elder daughter Leah, on the plea of a local custom that the elder was always wed first. Perhaps the narrator knew of another reason: Leah had "weak eyes" (Gen. 29:17), i.e., she was not beautiful, so it might have been more difficult to find a suitable husband for her (cf. E. Speiser, comm. on Genesis [*AB*, 1964], p. 225). After the week of celebration had passed, Rachel also was given to Jacob. He had to promise another seven years of service in return. Jacob remained in Laban's employ for six years after he had worked out his contract in order to earn sufficient capital for the support of his family.

Leah bore his first four sons (Reuben, Simeon, Levi, and Judah). Rachel, jealous of her sister since she herself was barren and eager to remove that reproach, gave her maid Bilhah to her husband. By this means, which was an accepted practice at the time (cf. Abraham and Hagar), any child born would be counted as Rachel's (note 30:3). The two sons borne by Bilhah were named by Rachel, as if they were her own, Dan and Naphtali. Leah then did likewise with her maid Zilpah, who bore two sons, named by her mistress Gad and Asher. At this juncture Reuben, Leah's firstborn and now about twelve years old, found mandrakes, which he brought to his mother. Rachel purchased this herb from her sister for its supposed aphrodisiac qualities. As a result of the bargain, Leah bore two more sons to Jacob, Issachar and Zebulun, and at some time a daughter Dinah. Then at last Rachel gave birth to her first son Joseph.

Now Jacob pressed for permission to return to Canaan. Laban could not afford to lose so good a herdsman and offered him any wage he cared to name. Yet even when Jacob had suggested his reward, Laban tried to avoid payment. The evasion was overcome by Jacob's experience with the flocks. He succeeded in breeding fine sheep of the type he had asked from Laban, while his father-in-law was left with inferior stock. This prosperity aroused the jealousy of Laban's own sons and of Laban himself. Rachel and Leah supported their husband when he related to them the divine command to return to his father's home. They claimed that their father had not given them any dowry but had spent it instead, treating them as foreigners.

C. Return to Canaan. Jacob departed while Laban and his sons were away shearing sheep in the hills. Thereby he gained a two-day head start, and it was not until he reached the highlands of Gilead that Laban overtook him. The seven days indicated as the time taken by Laban's party to cover about 650 km. (400 mi) from Haran to Gilead are within the capabilities of good riding camels (*see* CAMEL). Jacob, with his family and his flocks, took a little longer. Laban complained that he had had no opportunity to bid farewell to his daughters with the accustomed feasting. More important, he wanted to find the "gods" that had been stolen (31:30, 32). These "gods" (Heb. *t^{e}rāpîm*, 31:19, 34) were almost certainly small metal or terra-cotta figures of deities such as are commonly found in the ruins of ancient towns. Possession of these images was vested in the head of the family, according to evidence from Nuzi. Certain texts specify that they are to pass to the son of the owner upon the latter's decease, rather than to an adopted son, even if he has been made principal heir. Rachel's theft can now be seen as an attempt to obtain for her husband the status of head of the household. Laban's anxiety arose partly from this consideration and partly from the loss of the magical protection they were thought to afford. This value may well have been in Rachel's mind, too, as she took them with her at the outset of a long journey. Divine command prevented Laban from using force against Jacob, and his daughter's ingenuity deprived him of his gods.

No fault could be found in Jacob's conduct in Haran either. In his own defense (31:36-42) he mentioned that he had not eaten any of Laban's rams and had himself replaced those animals seized by wild beasts. Records from Nuzi describe the prosecution of shepherds who had made their own use of their masters' flocks. The Babylonian laws of Hammurabi (*ca.* 1750 B.C.) impose a fine of ten times the value of the animal taken on a shepherd convicted of such an offense. By the same laws, however, the loss of an animal killed by a marauding lion is to be borne not by the herdsman but by the owner (§§ 265-67).

Laban could do little but suggest a pact of friendship with his son-in-law. He proposed as terms of the treaty that Jacob should neither ill-treat his wives nor marry any other women, a clause often found in marriage records of this time. Moreover, the site of the covenant was to be a boundary which neither party should cross with evil intent. Ancient treaties frequently stipulate that rulers of states should not permit raids from their territory into the neighboring country and that they should be responsible

for the punishment of any of their subjects who did so raid. Such treaties were solemnized by the naming of various important deities as witnesses and the deposit of a copy in a temple (*see* COVENANT [OT] II). The covenant of Jacob and Laban was ratified solely by the invocation of the God of Abraham and of their common ancestor Terah. If either Jacob or Laban broke the terms of the agreement, the curse of God would fall upon him. The cairn and the pillar were visible expressions of the treaty, reminding them of it if ever they passed that way again. Stone slabs, simple boulders, rough-hewn monoliths, and carefully carved stelae have been discovered throughout the ancient Near East. Some are isolated on a hillside; some are grouped in a shrine or temple; all originally commemorated a notable event or person. When a treaty was to be recorded, a picture was carved, on some occasions, representing the contracting parties sharing a meal to indicate their unanimity and good faith, as Jacob and his kin ate together in Gilead (31:54).

The parting from Laban marked another stage in Jacob's development. He was now head of his own household. He also climbed to a higher plane of spiritual experience. An encounter with angels at Mahanaim impressed upon him the might of the God who protected him, encouraging him for the journey southward to meet Esau. His brother's seemingly hostile advance prompted a call for clear evidence of God's guarding. Shrewdly, he sent a handsome gift to his brother and strategically divided his retinue into two parts; so large had his following become that each would be able to defend itself, or to escape if the other was captured. When all had crossed the stream of the Jabbok, Jacob was hindered by a stranger. The two struggled without one gaining advantage on the other, until the adversary dislocated Jacob's hip. The disabled man still refused to release his antagonist, but, clinging to him, demanded his blessing. This could not be given until the stranger knew Jacob's name. By telling it, Jacob acknowledged his defeat. His opponent, himself incognito, could command him as an individual. He emphasized his superiority by renaming the patriarch. No longer was he the man whose name had an unfavorable connotation.

A ford in the Jabbok River near the traditional scene of Jacob's wrestling with the angel (W. S. LaSor)

He became Israel, the one on whose behalf "God strove" or "God strives" and with whom "God strove." The withholding of the adversary's name, perhaps, caused Jacob to realize whom he had met. So Jacob called the place Peniel (Heb. *pᵉnî'ēl*, "face of God"), "For I have seen God face to face, and yet my life is preserved" (32:30 [MT 31]).

Jacob's fear of meeting his brother proved groundless. Esau was content to forget the wrongs of the past and to share his life with his brother. The juncture of their two households would bring them greater security and standing among the alien peoples around them. As two men of so contrary natures were unlikely to live together long in harmony, Jacob chose the better course in turning westward, leaving the road to Edom.

Succoth was the first halting place before the Jordan was crossed. The length of his stay there is not indicated. It may be that the cattle were breeding and it was necessary to stop and provide shelter (the "booths") for them.

Now Jacob entered the Promised Land. It was a natural course for him to follow the valley of the Wâdī Fâr'ah, which joins the Jordan almost opposite Succoth, and so penetrate into the hill country. In Canaan the patriarch was landless, a wanderer, the type of person called Ḥabiru, or 'Apiru, in ancient texts (*see* HABIRU). He traveled until he reached a place of good pasture where he might settle for a time. The town of Shechem was well established in the center of the area, and it was from the rulers of this place that Jacob purchased a plot of land on which he pitched his tent and built an altar. Inevitably the family chosen by God was brought into contact with the local population, of which the ruling class at least were apparently of non-Semitic, Hurrian stock (*see* HURRIANS). The son of the city's ruler was attracted to Jacob's daughter and took her by force. Although the prince, Shechem, afterward made an honorable proposal of marriage, this act alone could not restore amity between the clans. Jacob's sons demanded that the Shechemites be circumcised before intermarriage could be permitted. The narrator comments that the brothers "replied deceitfully" (34:13); therefore it may be supposed that they understood that more than a physical sign was required to distinguish the inheritors of the promise from their neighbors. The leading citizens of Shechem all followed their lord in submitting to circumcision, motivated, no doubt, by the possibility of absorbing the "Hebrews" and adding their property to their own. While recovering from this surgery, they were incapable of defending themselves against Simeon and Levi, who killed them to avenge their sister. This treacherous deed, however effective in overcoming the evil that caused it and in preventing the adulteration of the tribe, was roundly condemned by Jacob (34:30; 49:5-7; cf. 34:31).

For safety's sake, Jacob had to leave the domain of Shechem. He was instructed by God to return to Bethel and to sacrifice there. All danger of evil influence from Canaanites, Arameans, or other pagan peoples was left behind at Shechem. The journey was accomplished in peace; Bethel itself was outside the jurisdiction of Shechem. The promise given to Jacob fleeing to Paddan-aram was confirmed to Israel returning to the land of the promise. As he had done previously, Jacob set up a memorial stone, making a libation and anointing it with oil.

A brief note records the death of Rebekah's nurse at Bethel. Evidently she was going with Jacob in the hope of meeting his mother at Hebron. A greater sorrow befell Jacob at Ephrath, for there Rachel died while giving birth to her second son. To call him "son of my pain" (Benoni), as she did, would have stigmatized the child all his life. Jacob changed his name to the honorable "son of the right hand" (Benjamin).

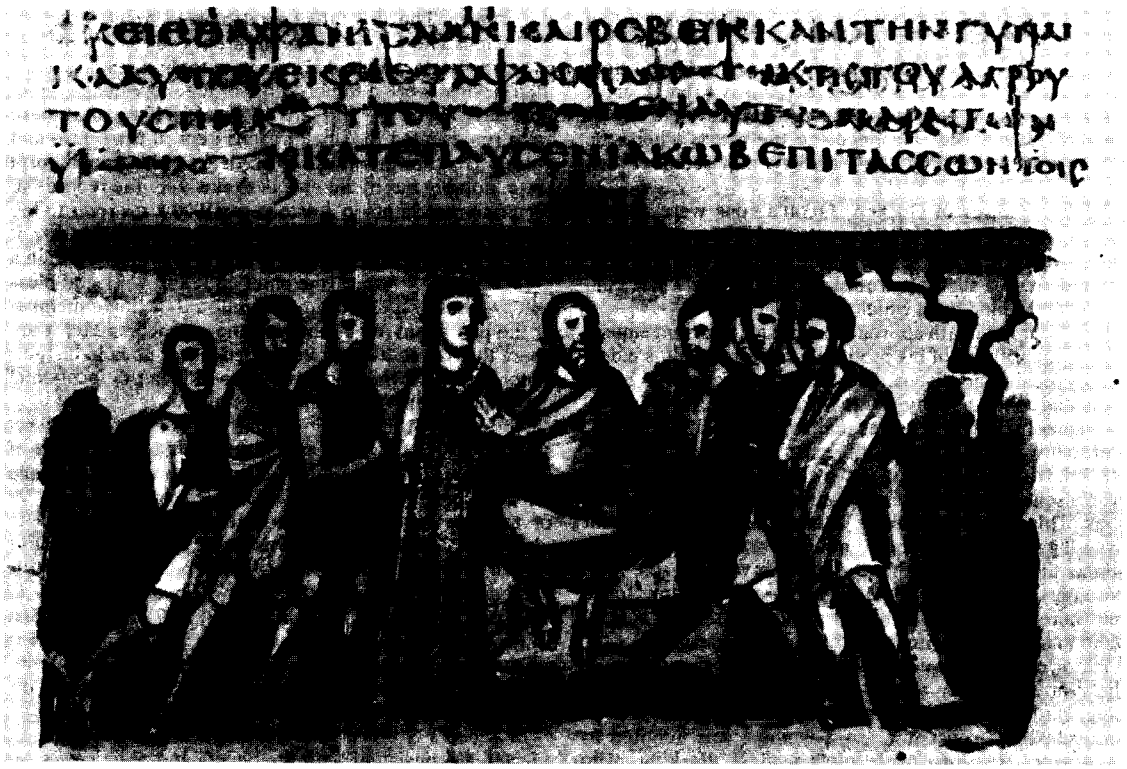

Illustration of Jacob blessing his sons in the *Vienna Genesis* Codex (6th cent. A.D.). The text is Gen. 49:31-33a (LXX) (Bild-Archiv des Österreichischen Nationalbibliothek, Vienna)

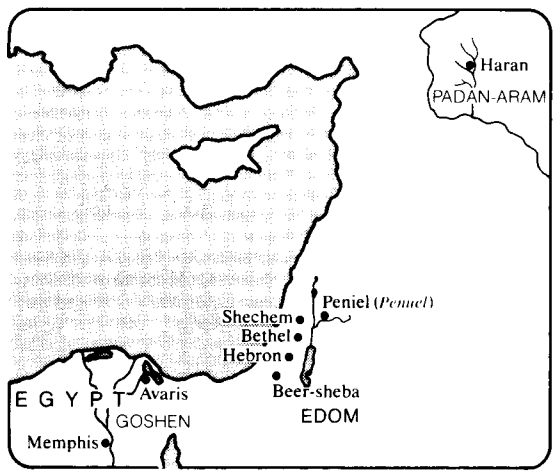
At last the caravan reached Hebron. This was the family "home," for it contained the cave Abraham had purchased to serve as his sepulchre. Together, Jacob and Esau buried their father. Esau returned to his Edomite hills, while Jacob took his place as head of the family in Canaan. In Gen. 37–50 the writer narrates events in the lives of various members of Jacob's family, the children of Israel. Their father's biography can still be traced through theirs, however, for they were still dependent on him.

In Hebron Jacob lived as he had in Haran, sowing crops each year and pasturing his flocks wherever there was good grazing, even as far away as Dothan. His sons grew up, married, and begot children of their own. The favorite son was, naturally enough, Rachel's firstborn, Joseph. His sale into Egypt (*see* JOSEPH II.A) was the consequence of the treatment his father lavished on him. After Joseph's disappearance from home, his brother Benjamin became his father's dearly loved son.

Famine had driven Abraham to Egypt, and Isaac had intended to make the same journey. Similarly, Jacob sent to the Egyptian granaries for corn when he was in want and presently left Canaan with all his immediate family to settle in Goshen. Every major change of Jacob's life had been marked with God's approval. On this occasion Jacob sought reassurance when he reached Beer-sheba, the place near the border of Canaan where both Abraham and Isaac had met with God (21:33; 26:23-25). The promise given to Jacob reiterated the promises of Bethel, that he would be the ancestor of a great nation which would return and possess the land, even as he himself had returned from Paddan-aram.

D. To Egypt. The caravan passed from Gerar along the main route to Egypt until it came to Goshen, the fertile area E of the Nile Delta. Here Joseph had arranged for his father's family to settle. As Israel arrived in Egypt they



must have appeared like the figures painted in a noble's tomb at Beni-hasan *ca.* 1800 B.C. (see *ANEP*, no. 3), their curly black hair and beards and their long, colored tunics contrasting with the shaven heads and linen kilts of the Egyptians. Visitors and settlers from Palestine were no novelty. A list of slaves in an Egyptian household of *ca.* 1740 B.C. included a number of Asiatics bearing Semitic names. Among them are some formed from the same verbal roots as the names of the family of Israel (e.g., *škr*, cf. Issachar; *'šr*, cf. Asher; cf. W. F. Albright, *JAOS*, 74 [1954], 222-233). At the close of the 18th cent. B.C. the native rulers in Lower Egypt had been ousted by the Hyksos invaders from Palestine and Syria. These people dominated the whole country until their expulsion *ca.* 1567

B.C. Evidence suggests that Jacob entered Egypt during the earlier phase of Hyksos rule, roughly *ca.* 1700 B.C.; but this cannot be established with certainty. At that time the royal residence was either at Avaris (Tanis) or at Memphis, within easy reach of Goshen, as Gen. 46–47 suggests. Jacob was introduced to the court, where the pharaoh, with true Egyptian courtesy, inquired about his age.

In the pastures of Goshen, Jacob's sons were able to live as they had in Canaan, with the extra security afforded by Joseph's high position at the court. They inhabited an area separate from Egypt proper, in close contact with the land from which they had come.

As Jacob felt death approaching, he made arrangements for the inheritance of his property. Reuben, Jacob's eldest son by Leah, had disqualified himself, as far as his birthright was concerned, by his sin (35:22). Rachel's son stood far higher in his father's eyes than any of the sons of Leah, and so it was to Joseph that the extra portion was assigned (48:22). In addition Joseph's two eldest sons, Ephraim and Manasseh, were adopted by their grandfather as his own sons. This action may find a later parallel in a document from Ugarit recording the adoption by a man of his grandson as his heir, but in that instance he was the sole heir. Numbers of ancient wills have survived in written form, but there is evidence that oral dispositions were equally valid in law if duly witnessed. The complete control of the testator over his bequests and his ability to show favor or disfavor are clearly shown in the testament of a Hittite king, Ḫattusilis I (*ca.* 1650 B.C.). Several of the king's sons had rebelled against him, so a nephew was adopted as successor. He, too, made plots against the king, who eventually designated his grandson(?) Mursilis as his "son" while he, the king, lay dying.

The poetic form of the Blessing of Jacob doubtless enabled each of its hearers to remember the pertinent passage easily. The subsequent history of the several tribes is lucidly, and by divine inspiration, contained within the few lines of each section. There are no good grounds for doubting its authenticity, although the language may have been "modernized" by a later editor (as was done on occasion in Egypt). Through Jacob's blessing the promise and covenant of God were no longer borne by one man in each generation. With the death of Jacob commences the history of the nation of Israel.

Jacob's final injunction concerned his burial. His sons accordingly made their way back to Hebron and there placed his embalmed body in the cave Abraham had purchased as an earnest of his inheritance. All the pomp Egypt could muster was provided for the vizier's father. The size and lamentations of this cortege so impressed the Canaanites that they named a place after it. So the "wandering Aramean" rested in his homeland.

III. Jacob's Religion.–Any attempt to study the beliefs of individuals apart from their life story is apt to become unbalanced. The stages on the road of Jacob's experience of God have already been noted. As the religion of Israel and thus the roots of Christianity claim to derive from the patriarchs, it is necessary to attempt to understand Jacob's spiritual life.

A. Background. The religious thought of the common people of western Asia at the time of Jacob can be discovered only from chance references in letters and other documents, and from material remains. Each city had its patron god associated with various minor attendant deities. Citizens could go to the major shrine or to smaller chapels to offer sacrifice or to join in the festivals connected with the particular cult. To what extent private persons could participate in the services of these temples is unknown. The life of the king depended largely upon the commands and wishes of the different gods as interpreted by their priests, who did not hesitate to threaten disaster if their desires were not met. Most of the individual's devotion was paid to his "private" gods. It is likely that these were represented by small images kept in the house and passed from father to son (cf. II.C). Many cuneiform texts, notably but by no means exclusively the records of Assyrian merchants in Anatolia *ca.* 1900 B.C., refer to the god of such a man or the god of his father. This is not evidence of monotheism — the same letter may contain a greeting, "May Ashur [the chief god] and your god bless you" — but of a choice and devotion to a single member of the pantheon. While the evidence is incomplete, it appears that the individual venerated lesser gods in his personal devotion while honoring as a citizen the local chief deity and naming his children after him.

Abraham left the multitudinous gods of Ur for the worship of the God who revealed Himself by the name of Yahweh. He was no minor god or even a leader among others; He alone was God. The simple term God (Heb. *ʾēl*) or the emphatic plural form (Heb. *ʾĕlōhîm*) sufficed to identify Him. Perhaps it was because the Canaanites placed a god 'El at the head of their pantheon that this title seldom appears alone. In the story of Jacob the names 'El Shaddai (43:14) and 'El Bethel (31:13; 35:7) occur together with Yahweh. They do not point to an underlying polytheism or a syncretism of local deities or clan totems. Each name has its own significance in the place it occupies.

B. Jacob's Growth; First Crisis. Jacob's religion can be viewed as consistent with the beliefs and practices of his fathers. No doubt he received some instruction from Isaac in the faith of the family, the history of Abraham, of the covenant, and of the promise. He first encountered God at Bethel, at the moment of greatest need in his life, fleeing from home to distant and unknown relatives. He received a vision of majesty, glorious and terrifying. Jacob saw the God of Abraham, the God of Isaac, Yahweh Himself. God repeated to him the promise given to Abraham in Ur. His immediate reaction was to think that he had rested in a notable holy place (28:17). In the morning, however, he consecrated it by erecting and anointing the stone pillow. The name given expresses the significance of this place for Jacob. Above all else it was "the house of God." It is not to be deduced that Jacob believed God to be confined to the stone or to reside therein, although such ideas are not unknown in the ancient world. Jacob returned to the place, but he also sacrificed and worshiped elsewhere. He vowed to take Yahweh as his God, if he should journey in safety and eventually return home. Moreover, he would devote a tenth of his income to God (cf. Abraham, Gen. 14:20).

C. Second Crisis. After twenty years in Paddan-aram came the command to return to Canaan. There could be no doubt of its authenticity, for it came in the name of the God of Bethel. The following events shed light on the beliefs of Jacob's wives and their father. Already in the naming of their children Leah and Rachel had shown that they acknowledged Yahweh as God (Gen. 29:31, 33, 35; 30:24). Upon the announcement of the vision and of the order to leave home, they recognized it as God's guidance (31:16). Their life and education among the pagans of Haran, however, had imbued them and their father with pagan superstitions. The family was thought to be protected by the presence of images of gods, the teraphim. Rachel's theft of these laid the household in Haran open to the mischief of demons of disease and workers of black magic. Laban's eagerness to regain possession of the

figurines implied confidence in their power and apprehension at the disasters their loss might entail. The servants in Jacob's train also brought images of their own. These were buried at Shechem before the visit to Bethel, together with earrings, no doubt decorated with heathen symbols (35:2-5). Yet Laban was not an apostate from the family religion. He attributed Jacob's successes as a herdsman to the blessing of Yahweh (30:27), and he knew who it was that warned him not to harm Jacob (31:24, 29). Most significant is the oath he swore at Mizpah, invoking God as witness, the God of Abraham (Jacob's grandfather), the God of Nahor (his own grandfather), and the God of their father Terah (31:50-53). The identity of the God of each generation in both branches of the family is proclaimed here. In this way the covenant was guaranteed by the witness of the Power proved constant by the ancestors of either party. Jacob added an oath by the "Fear" of Isaac. This epithet (31:42, 53) seemed to have been part of the personal relationship between God and Isaac. A different translation, "Kinsman," has been proposed (*FSAC*, p. 248; but *see* FEAR II.C). A single reference might admit of Jacob's using a similar private epithet for God, "the Mighty One of Jacob" (49:24).

D. Third Crisis. The third crisis was the encounter at Peniel. Before Jacob met Esau he had seen the strength of his "Mighty One" in the angelic host at Mahanaim. Fear of his brother brought him to pray humbly for the protection of his father's God. The plan he conceived for palliating Esau's anger and for safeguarding his property was not allowed to supplant trust in God. The wrestling at the ford showed Jacob how weak he was before his God. It taught him the value of the continued prayer of one who is helpless. The awe that was aroused by the revelation at Bethel recurred as Jacob named the place, awe that a mortal should survive a meeting with God "face to face."

E. Fourth Crisis. When Jacob setled at Shechem he built an altar to 'El, with whom the local inhabitants might possibly identify their chief god. To emphasize the distinction Jacob called the name 'El, God of Israel. There is no record of his erecting an altar and making a sacrifice — a natural sequel — before this time, apart from the sacrifice that solemnized his treaty with Laban (31:54). Here at Shechem he had become an independent man, head of his own family. The problem of Esau had been circumvented and Isaac was a very old man at Mamre. As the leader of the chosen race Jacob could offer sacrifices to God. He constructed another altar at Bethel when he went there the second time (35:1, 7) with all his household to worship. The promise given as he left Canaan a solitary fugitive was renewed now to Israel, father of eleven sons, head of his own family. All the experiences of the past had their culmination at this moment. The new name, plus the promise of nationhood and of the land, were confirmed by the God in whom Jacob had been taught to trust. Remembrance of this occasion was insured by the erection of another pillar and reiteration of the name Bethel, not in solitude but before many witnesses, notably his sons, who would remember its meaning.

F. Fifth Crisis and Triumph. The altar at Beer-sheba marked the final crisis. Here the patriarch worshiped for the last time in the land promised to him. This was the great test of his faith in God. As a counter to it he had the joyful anticipation of reunion with his favorite son. The piety of the elderly Hebrew is seen in his interview with the pharaoh. In the blessings of his sons is shown the mature expression of the patriarch's trust in God, a confidence resulting from trying experiences. The immediate concern was the continuance of his name and that of his father (48:16), but he looked farther ahead to his children's return to Canaan and to the part of each son's family in the life of the clan. When viewed from the NT perspective, the blessing of Judah assumes greater import in its mention of the coming ruler. As the writer to the Hebrew church says, "By faith Jacob . . . blessed" (He. 11:21). What Jacob expected after his death is not revealed. He spoke of himself as "going down to Sheol" (37:35; 42:38), but this was no gloomy prospect after he had met Joseph and his two sons (48:11). The concluding phrase of the blessing of Dan (49:18, "I await thy salvation, O Lord!") may hint at a deeper belief; it certainly implies great faith in God. Throughout his life his faith had grown, strengthened by the visions at Bethel. This was the faith he passed on to his sons, the outcome of his experience of the God who did not change, "before whom . . . Abraham . . . walked, . . . who has led me all my life long" (48:15). No wonder that a later Israelite could sing, "Happy is the man whose help is the God of Jacob!" (Ps. 146:5).

G. Israel: Man and Nation. The narratives of Genesis paint a vivid picture of Jacob's character. His failings are recounted as much as his triumphs; he has a personality of his own, distinct from his relatives, distinct from any other ancient hero. Parallels may be found in folklore, legend, or history to one incident in his life or another, but they should all be recognized as common experience rather than cultural borrowings. The story of the patriarch's progress is a consistent whole. The many incidental details and dissimilarities discredit theories that the stories are retrojections of events in the history of Israel the people.

That some similarities exist is obvious. Indeed, the ancient prophets realized this. Hosea applied to Israel the story of Jacob, for it was their story too (Hos. 12:2-4, 12 [MT 3-5, 13]). Less precise resemblance occurs between Jacob's story and the teachings of Isaiah, Jeremiah, and Habakkuk concerning the faithful among the Israelites and the stages through which Jacob passed. Further exploration for "types" in Jacob's sojourn in Haran or his "exile" in Egypt exceed the limits of reasonable exegesis. Malachi stressed the most important typical relation, the possession of the covenant, the distinction of the choice of God (Mal. 1:2). Later Jacob became an illustration and a type of the Church (Rom. 9:10-13).

IV. References Outside Genesis.—"Jacob" and "Israel" are the two names most frequently met with in the OT. In most cases these denote the children of Israel, particularly in the parallelism of poetic compositions. To this day the name of the patriarch is thus perpetuated. There remain, however, biblical passages that refer to Jacob himself.

A. In the OT. A considerable group of verses associate him with Abraham and Isaac in naming God as the God of the fathers, underlining the continuity and the identity of the God of the past with the God of the present (e.g., Ex. 3:13-15). The collection of a small number of passages about the patriarch himself permits the reconstruction of a fairly complete epitome of his life. His birth as the younger twin, clutching his brother's heel, is recounted by Hosea (12:3 [MT 4]). God's choice of Jacob over Esau is mentioned in Malachi (1:2f.), together with the inheritance of the covenant and all that it contained (Ps. 105:10f.). Hosea tells specifically of the flight to Aram and the servitude by which Jacob gained his wife (12:12 [MT 13]). He is mentioned as the father of the twelve tribes (1 S. 12:8; 1 K. 18:31). His escape from Laban is probably referred to in Dt. 26:5, where a "Syrian ready to perish" (AV, RV) may be better translated "a fugitive Syrian" (RSV "a wandering Aramean"; NEB "a homeless Aramaean"; see A. R. Millard, *JNES*, 39 [1980], 153-55). The hand of God protected the small clan as it moved from place to

place among hostile neighbors (Ps. 105:12-15), for the only land Jacob owned was the plot he had purchased near Shechem (Josh. 24:32). Hosea again summarizes the encounter at Peniel and the communion with God at Bethel (12:4 [MT 5]). The sale of Joseph as a slave to Egypt was God's preparation for the future need of Jacob and his family when famine struck Canaan. So he was enabled to travel to Egypt and prosper there (Dt. 26:5; Josh. 24:4; Ps. 105:16-24). He died there, bequeathing the land at Shechem to Joseph's sons (Josh. 24:32), who are counted as two of the tribes as if they had been Jacob's own sons (Josh. 16–17). Here is evidence for the antiquity of the Jacob story and its diffusion, and it is noteworthy that all is consistent with the Genesis presentation. If the latter had been lost, it would still have been possible to write a biography of the father of the children of Israel.

B. In the NT. Four NT passages recall events in the life of Jacob. The conversation of Jesus (a descendant of the patriarch, Mt. 1:2; Lk. 3:33f.) and the woman at the well of Sychar includes a declaration by the woman that Jacob provided the well (Jn. 4:12), besides the author's note that this was the ground given by Jacob to Joseph (5:6). Samaritan pride can be felt in the woman's words "our father Jacob." Stephen mentions the famine and Jacob's journey to Egypt in the course of his defense before the Sanhedrin (Acts 7:8-16). When the patriarch and his sons died in Egypt they were carried to Shechem and buried in the tomb Abraham bought from the sons of Hamor (vv. 15f.). This is one of the curious discrepancies in Stephen's speech — the result, it is conjectured, of his endeavor to include all he could of Jewish history in his argument. For the apostle Paul, Jacob is an outstanding example of the sovereign choice of God, of the predestination of the elect (Rom. 9:10-13). The writer of Hebrews takes Jacob as one of his examples of active faith, a faith that acknowledges the present protection and worship of God and that can look forward fearlessly into the future (He. 11:9, 20-22).

V. Modern Interpretations of Jacob.—Evolutionary theories, and the critical spirit engendered by them, were largely responsible for the analyses and reinterpretations of Genesis published in considerable number at the end of the last century. (See *ISBE, s.v.* "Genesis" [W. Möller].)

A. Documentary Theories. The most widely taught reconstructions of patriarchal history stemmed directly from the analysis of the Hexateuch into four main documents coming from different sources and dates and compiled in the 5th cent. B.C. This hypothesis was supported by noting variations of style and by observing religious development. Its parallel was the approach to Israelite religion that sought to trace the advance from animism or demonism to henotheism and then to the monotheism found in the later prophets. The effect of such views upon the stories of Jacob may be seen, e.g., in *ORHI,* I, ch. 4. The Jacob stories describe for the most part events "affecting whole clans and not merely isolated persons" (p. 58). So Jacob's relations with Esau depict Israel's political contacts with Edom, and the treaty of Jacob and Laban reflect a border agreement between neighboring tribes. Other stories are attached to local shrines, notably Bethel, where there were two, one perhaps from the northern tribes and one from the southern. The incident at Peniel is considered a myth, to be compared with other stories of a hero fighting a god, used to explain a food taboo. It is not denied, however, that Jacob was a historical person and the account of the vision at Bethel a personal story.

B. Views of Alt and Noth. The documentary theories have undergone many revisions and alterations at the hands of various scholars over the past forty years. The work of two German scholars, A. Alt and M. Noth, has commanded considerable attention. This view followed the documentary analysis, but at the same time made use of the form-critical approach, examining the types of narrative, and also made use of archeological discoveries. The study of the Pentateuch and its sources has led to the view that there was no nation of Israel before the settlement in Canaan. Consequently events described as happening before that time are to be connected with the individual tribes, whose traditions have been mixed together. Alt ("God of the Fathers," in *Essays on OT History and Religion* [Eng. tr. 1967]) drew a comparison between worship of "the gods of the fathers" in Hellenistic and Roman Transjordan and the Israelite conception of the God of Abraham, Isaac, and Jacob. He reached the conclusion that such persons must have existed to give rise to such a creed. This study and one on the connection of Shechem with Bethel are utilized by M. Noth in *NHI,* section 10, and in his more detailed *Überlieferungsgeschichte des Pentateuch* (1948).

The theories of Alt and Noth were well summarized by J. Bright in *Early Israel in Recent History Writing* (1960). Jacob is considered the original and most important patriarch, associated with a shrine at a tree near Shechem in the territory of Ephraim. His vision of the ladder was located there until the transference of the shrine of the ark to Bethel during the time of the judges caused the scene of the dream to be changed also. A separate group of traditions, placed in Gilead, relates the association of Jacob and Esau. The stories reflect encounters of Ephraimite settlers (Jacob) with native woodsmen (Esau). The Jacob-Laban affair constitutes a third group, in "saga" style, and later than the others. This, too, is of Transjordanian origin, yet linked with the central Palestine group by the Ephraimitic settlers. The strong influence of the central shrine at Shechem led to the recognition of Jacob as the ancestor of all the tribes when they formed their confederacy. The patriarchs of the other tribes were then incorporated into Jacob's family tree. Little more can be said than that Jacob was a wandering shepherd on the desert fringe, for almost all the narratives now linked with his name are the speculations of later Israelites about the origins of their customs and beliefs or the accretions of local etiological tales.

C. View of Albright. The third school of thought was dominated by the American scholar W. F. Albright. While adhering to the documentary analysis, he placed far greater reliance on the correctness of the traditions preserved in the Pentateuch. These were handed on, mainly in oral form, from the time of the patriarchs. Some anachronisms have been added in the process, notably the mention of camels. Albright's more constructive approach is due to his insistence upon the primacy of archeology. His views can best be illustrated by quoting from *FSAC,* p. 241:

> So many corroborations of details have been discovered in recent years that most competent scholars have given up the old critical theory according to which the stories of the Patriarchs are mostly retrojections from the time of the Dual Monarchy (9th-8th centuries B.C.). Conflicting versions of a given episode in the J and E documents warn us against depending too slavishly on the present form of the tradition. On the other hand they are altogether too close in form and content to be of distinct origin, especially when we remember that much closer parallelism between them has presumably been eliminated by the redactor, who saw no purpose in unnecessary repetition. The most reasonable view is that of R. Kittel, that they reflect different recensions of an old national epic, based on poems which came down . . . from the Patriarchal Age. . . . A unitary background for J and E is also suggested by their remarkably homo-

geneous characterizations of the Patriarchs. The figures of Abraham, Isaac, Jacob, and Joseph appear before us as real personalities, each one of whom shows traits and qualities which would suit his character but would not harmonize with the characters of the others. This is particularly true of Jacob and Joseph.

This approach was taken up by Albright's pupils. Among the most widely known is J. Bright. In his study of the patriarchs (*BHI*, ch. 2) he suggested that they were "chieftains of sizeable clans" reaching Palestine "in various waves over a period of time" from Mesopotamia. (For a good summary of this position, see *BANE*, chs. 1–2.)

In reaction to Albright's attitude, attacks have been made on this use of archeological and textual evidence from the ancient Near East. In some cases these attacks are justified, for too much weight has been put upon isolated discoveries or events; in other cases, however, attempts to discount the witness of antiquity clearly result from predetermined views. Most who are critical in this way adhere firmly to the documentary theory that empties the stories of their apparent historical meaning. The major works in this vein are J. Van Seters, *Abraham in History and Tradition* (1975), and T. L. Thompson, *Historicity of the Patriarchal Narratives* (*BZAW*, 133, 1974), while W. McKane, *Studies in the Patriarchal Narratives* (1979), reasserts the primacy of literary study. It is impossible, however, to treat the patriarchal narratives justly without setting them in their ancient context, and that context is found best in the world of the early 2nd millennium. Arguments for this positive view are found in K. A. Kitchen, *Bible in Its World* (1977), ch. 4; D. J. Wiseman and A. R. Millard, eds., *Patriarchal Narratives and Their Study* (1980); M. J. Selman, *Tyndale Bulletin*, 27 (1976), 114-136.

D. Summary. Archeological discoveries and the studies of the Albright school acted as a stimulus to conservative scholarship. Despite the many attractive ideas to be found in these studies — and their conclusions must frequently command assent — the basic attitude of doubting whatever cannot be supported by extrabiblical evidence is unacceptable. Acquiescence in the documentary theory carries with it this hypercritical approach, easily leading to groundless assumptions. The emphasis on the role of oral tradition (a contribution of some Scandinavian scholars; see E. Nielsen, *Oral Tradition* [*SBT*, 1/11, 1954]) allows as much freedom for the introduction of anachronisms of material detail and of thought as the old documentary analysis. So long as there are envisaged "editors" or "redactors" who collected old stories and wrote them down, rewrote, and expanded them as they thought fit, little confidence can be placed in the resultant work as a true representation of events long before their age. No doubt the stories were told orally; yet it is unlikely that no written record existed at the same time and from an early date. Comparison with the place of oral tradition in later Islam is misleading. The study of Babylonian or Egyptian practice of the 2nd and 1st millennia B.C. is far more profitable. In those societies the "classics" were written in ancient days, copied out, and then memorized by boys at school even when Jacob was a youth. Cuneiform texts were often signed by the copyist and checked against the exemplar by another scribe. Respect for the written word in all civilizations of the ancient Near East and the careful preservation of documents are arguments against the primacy of oral tradition. Occasional examples of scribal fraud exist, but early writers were not in the habit of "composing" history or of altering it, however biased they may have been. Editors worked over the old books. Many Egyptian and Babylonian manuscripts attest this, a natural action in any culture of which the language developed. Their work was not necessarily to modernize the story or its thought; they were only editors.

Thus it is likely that the life history of Jacob was written at an early date, perhaps during his own last days in Egypt. It was written for our learning, and we have no conclusive reason for disbelief in any part. A. R. MILLARD

2. The father of Joseph the husband of Mary (Mt. 1:15f.).

3. Patronymic denoting the Israelites (Isa. 10:21; 14:1; Jer. 10:16).

JACOB'S WELL [Gk. *pēgḗ toú Iakōb*]. In John we read that Jesus "came to a city of Samaria, called Sychar, near the field which Jacob gave to his son Joseph. Jacob's well was there" (4:5f.). When Jacob came to SHECHEM on his return from Paddan-aram, he camped "before" the city, presumably to the east of it, and bought the land on which he had pitched his tent (Gen. 33:18f.). This may well be the "mountain slope" (Heb. *šeḵem*) spoken of in Gen. 48:22, although there the text states, "I took it from . . . the Amorites with my sword and my bow." Where the pass of Shechem opens to the east, on the south, close to the base of Gerizim, is the well known as Bîr Yaʿqûb, "the well of Jacob." The main road from Beer-sheba, Hebron, Bethlehem, and Jerusalem divides S of the well, one arm leading westward to Nâblus, about 3.4 km. (1.5 mi.) distant, the other more directly to the north toward Jenîn and east to the Jordan Valley. The well is about 76 m. (250 ft.) from Tell Balâṭah, ancient Shechem.

Although the OT does not refer to it, Jewish, Samaritan, Moslem, and Christian traditions associate this well with the patriarch Jacob. It is mentioned *ca.* A.D. 333 by the Bordeaux pilgrim. Since water apparently filters through its soft limestone sides as well as through a superimposed thick bed of soil, it may be considered, as Jn. 4 suggests, both a *pēgḗ*, "spring," and in the main a *phréar*, "rain pit" or CISTERN. The water is said to last until the end of May and to return with the fall rains.

Major Anderson, who in 1866 descended into it, described it as having "a narrow opening, just wide enough to allow the body of a man to pass through with arms uplifted, and this narrow neck, which is about 4 ft. long, opens into the well itself, which is cylindrically shaped, and about 7 ft., 6 in. in diameter. The mouth and upper part of the well are built of masonry, and the well appears to have been sunk through a mixture of alluvial soil and limestone fragments, till a compact bed of mountain limestone was reached, having horizontal strata which could be easily worked; and the interior of the well presents the appearance of having been lined throughout with rough masonry." The depth to the accumulated debris has been measured at 23 m. (75 ft.). In 1935 the total depth was measured at 41 m. (135 ft.).

From the narratives of the pilgrims, we learn that at different times churches were built over the well. The first was probably a cruciform church of the 4th century. The Crusader Church was destroyed after the Moslem victory of 1187. Now the Greek Orthodox own the walled enclosure and an unfinished church. Stairs to the crypt lead to the well, the top of which is now above the floor. The text of p^{66} suggests that in ancient times the top of the well was at ground level and that Jesus sat on the ground or *at* the well rather than *on* it.

A stone found in 1881 may have been an old cover of the well. It measured 1.1 m. (3.8 ft.) by 0.7 m. (2.6 ft.) by 0.4 m. (1.5 ft.). The aperture in the center measured 0.3 m. (13 in.) in diameter. In its sides were grooves worn by the ropes used in drawing up the water.

W. EWING
D. J. WIEAND

JACUBUS jə-kū'bəs [LXX *Iakoubos*, B *Iarsouboos*]. *See* AKKUB 4.

JADA jā'də [Heb. *yāḏā'*–'the caring one']. Son of Onam and grandson of Jerahmeel by his wife Atarah (1 Ch. 2:26, 28, 32).

JADAU jā'dä, jā'dou [Heb. *K yiddô*; *Q yadday*]. *See* IDDO 3.

JADDAI jad'ī, jad'ə-ī. *See* IDDO 3.

JADDUA jad'o͞o-ə [Heb. *yaddû(a)'*–'known'].

1. One of the "chiefs of the people" who with Nehemiah sealed the covenant, thus signifying their voluntary acceptance of the law and their solemn promise to submit to its yoke (Neh. 10:21 [MT 22]).

2. Son of Jonathan or Johanan, and great-grandson of Eliashib, the high priest in Nehemiah's time (Neh. 12:11, 22). He is the last of the high priests mentioned in the OT and held office during the reign of Darius the Persian, i.e., Darius III Codomannus, the last king of Persia (336-332 B.C.), who was overthrown by Alexander the Great (*see* DARIUS 3). It is doubtless to him that Josephus refers in his romantic account of Alexander's entrance into Jerusalem (*Ant.* xi.8.4f. [326-339]). J. CRICHTON

JADDUS jad'əs [Gk. LXX B *Iaddous*, A *Ioddous*]; AV ADDUS. Jaddus was removed from the office of the priesthood because he could not prove his right to it after the return to Jerusalem under Zerubbabel (1 Esd. 5:38). He is called Barzillai in the OT (Ezr. 2:61; Neh. 7:63), because he married Agia, the daughter of Zorzelleus (OT Barzillai the Gileadite), and adopted his father-in-law's name. *See* BARZILLAI 2.

JADINUS jə-dī'nəs [Gk. *Iadinos*] (1 Esd. 9:48, NEB). *See* JAMIN 3.

JADON jā'dən [Heb. *yāḏôn*]. One who helped to rebuild the wall of Jerusalem in company with the men of Gibeon and of Mizpah (Neh. 3:7). He is called the "Meronothite," and another Meronothite is referred to in 1 Ch. 27:30, but there is no mention of a place Meronoth. Perhaps the reference was to a site about 5 km. (3 mi.) NW of Gibeon, now known as Beit-Unia, but this is uncertain.

JAEL jā'əl [Heb. *yā'ēl*–'a wild or mountain goat,' as in Ps. 104:18]. The wife of Heber the Kenite and the slayer of SISERA (Jgs. 4:17-22; 5:2-31). Jael obtained fame by a single act. For years Jabin king of the Canaanites had oppressed Israel with iron chariots led by his general Sisera. Deborah, the prophetess of Israel, was seized with a passion for freedom and roused the Israelites to do battle against Sisera. They defeated him at "Taanach by the waters of Megiddo," but Sisera fled for his life. When he came to the "oaks of the wanderers," where the tribe of Heber lived, he was invited to turn aside into the tent of Jael (4:17f.). The subsequent events are depicted in two accounts: one in prose (4:19-22), and the other in poetry (in Deborah's song of victory, 5:24-27).

The tribe of Heber was probably neutral in the struggle; but they were descendants of Jethro and had the confidence of the Israelites. Even though they no doubt suffered at the hands of the Canaanites, they made a peace pact with Jabin. Because of this, as well as the current law of hospitality, Sisera entered the tent of Jael with confidence. Whether Jael met Sisera and invited him to enter the tent and rest (4:18), or he requested the sanctuary of her home, is not clear.

She gave him buttermilk ("butter in a lordly dish") to drink and a blanket for covering, and heeded his request that she stand guard at the door of the tent to foil any pursuers. When sleep came to the tired general, she took a tent-pin and a hammer in her hands, went quietly to him, and drove the pin through his temples, so that he died (cf. 4:21). With blood dripping from her hands, she went forth to meet Barak the Israelite general, to collect the reward. There is no evidence that Sisera insulted or mistreated her. Jael's motive may have been a mixed one. She could have been in sympathy with Israel and with the religion of Israel. But perhaps she was merely prudent. Sisera was in flight, Barak in pursuit. Since Sisera would be killed anyway, why should she not kill him and cement a friendship with the conqueror?

Deborah (5:24) immortalized Jael's deed, because anyone who would kill her country's enemy was a friend of Israel. The method of his death mattered little to her, for all things were fair in war; therefore Jael was blessed among women by all who loved Israel.

See also DEBORAH 2. D. W. DEERE

JAGUR jā'gər [Heb. *yāgûr*]. An unidentified town on the Edomite frontier of Judah in the south (Josh. 15:21), perhaps Tell Gur, 16 km. (10 mi.) E of Beer-sheba.

JAH jä, alternate spelling of YAH yä. An abbreviated form of the name Yahweh (*see* GOD, NAMES OF II.C). It occurs, e.g., in the Hebrew text of Ex. 15:2, in personal names like Adonijah ("Yah is my master"), and in the liturgical expression "hallelujah" ("praise Yah").

JAHATH jā'hath [Heb. *yaḥaṯ*, perhaps a shortened form of *yaḥteh*, *yaḥ'ṯeh*–'he [God] will snatch up'].

1. Son of Reaiah, son of Shobal, a descendant of Judah and father of Ahumai and Lahad, the families of the Zorathites (1 Ch. 4:2).

A frequent name for a descendant of Levi:

2. Son of Libni, son of Gershom, the oldest son of Levi (1 Ch. 6:20 [MT 5]; in v. 43 [MT 28] "son of Libni" is omitted).

3. Son of Shimei, son of Gershom (1 Ch. 23:10f.).

4. One of the "sons" of Shelomoth, a descendant of Izhar, son of Kohath, the second son of Levi (1 Ch. 24:22).

5. A descendant of Merari, the third son of Levi, and an overseer in the repairing of the temple during the reign of Josiah (2 Ch. 34:12). J. CRICHTON

JAHAZ jā'haz [Heb. *yahaṣ* (Isa. 15:4; Jer. 48:34); *yāhᵉṣâ* or *yahᵉṣâ* (Nu. 21:23; Dt. 2:32; Josh. 13:18; 21:36; Jgs. 11:20; 1 Ch. 6:78 (MT 63)]; AV also JAHAZAH (Jer. 48:21; RSV JAHZAH), JAHAZA. This is the place where in a great battle Israel overwhelmed Sihon king of the Amorites and then took possession of all his territory (Nu. 21:23f.). It is named along with Beth-baal-meon and Kedemoth (Josh. 13:17f.), with Kedemoth (21:37) pointing to a location in the southeast of the Amorite territory. It was given to Reuben by Moses and was one of the cities in the portion of that tribe assigned to the Merarite Levites. Mesha (Moabite Stone, lines 18-21) states that the king of Israel lived in Jahaz when at war with him. Mesha drove him out, and the city passed into the hands of Moab. It is referred to as a city of Moab in Isa. 15:4; Jer. 48:21, 34. Khirbet et-Teim, 0.5 km. (1 mi.) SW of Medeba, Umm el-Walid, 11 km. (7 mi.) SE of Medeba, and Jālûl, 5.6 km. (3.5 mi.) E of Medeba, have all been suggested as possible locations. A. C. M.
R. K. H.

JAHAZIAH jā-ha-zī'ə (Ezr. 10:15, AV). *See* JAHZEIAH.

JAHAZIEL jə-hā'zē-əl [Heb. *yaḥᵃzî'ēl*–'God sees'; LXX *Oziēl*].

1. In 1 Ch. 12:4 (MT 5), one of David's recruits at Ziklag, a Benjaminite or maybe a Judean.

2. In 1 Ch. 16:6, one of two priests appointed by David to sound trumpets before the ark on its journey to Jerusalem.

3. In 1 Ch. 23:19; 24:23, a Levite, "son" of Hebron, a Kohathite.

4. In 2 Ch. 20:14, an Asaphite, son of Zechariah. He encouraged King Jehoshaphat of Judah and his subjects to fight against the Moabite and Ammonite invaders.

5. In Ezr. 8:5, an ancestor of one of the families of the Restoration. Read probably "of the sons of Zattu, Sheconiah the son of Jahaziel," following 1 Esd. 8:32 (AV, NEB, Jezelus). D. F. ROBERTS

JAHDAI jä'dī [Heb. *yāhdāy*–'may God guide']. A descendant of Judah mentioned in 1 Ch. 2:47.

JAHDIEL jä'dē-əl [Heb. *yaḥdî'ēl*]. In 1 Ch. 5:24, head of a Manassite family.

JAHDO jä'dō [Heb. *yaḥdô*–'may God rejoice']. The head of a Manassite tribe mentioned in 1 Ch. 5:14.

JAHLEEL jä'lē-əl [Heb. *yaḥlᵉ'ēl*–'wait for God' or possibly 'may God show Himself friendly']. The third son of Zebulun and ancestor of the Jahleelites (Nu. 26:26).

JAHLEELITES jä'lē-əl-īts [Heb. *hayyaḥlᵉ'ēlî*; collective]. In Nu. 26:26, the descendants of the clan of Jahleel.

JAHMAI jä'mī [Heb. *yaḥmay*; perhaps the same as Heb. *yaḥmᵉyâ*–'may Yahweh protect']. In 1 Ch. 7:2, head of a clan of Issachar.

JAHWEH yä'wā, alternate spelling of **YAHWEH** yä'wā. *See* GOD, NAMES OF II.C.

JAHZAH jä'zə. *See* JAHAZ.

JAHZEEL jä'zē-əl [Heb. *yaḥṣᵉ'ēl*–'God divides, apportions' (Gen. 46:24; Nu. 26:48; 23 MSS in 1 Ch. 7:13)] and **JAHZIEL** [Heb. *yaḥᵃṣî'ēl* (1 Ch. 7:13)]. A descendant of Naphtali and ancestor of a clan.

JAHZEELITES jä'zē-əl-īts [Heb. *hayyaḥṣᵉ'ēlî*; collective]. In Nu. 26:48, descendants of the clan of Jahzeel.

JAHZEIAH jä-zē'yə [Heb. *yaḥzᵉyâ*–'Yahweh sees']; AV JAHAZIAH. In Ezr. 10:15, son of Tikvah and a contemporary of Ezra. Along with Jonathan he opposed Ezra's action in prosecuting those who had married foreign women (but cf. 1 Esd. 9:14; AV Ezechias; NEB Hezekias).

JAHZERAH jä'zə-rə [Heb. *yaḥzērâ*]. In 1 Ch. 9:12, an ancestor of Maasai and apparently the same as Ahzai of Neh. 11:13 (AV Ahasai).

JAHZIEL jä'zē-əl. *See* JAHZEEL.

JAILER. *See* PRISON.

JAIR jā'ər [Heb. *yā'îr*–'may he shine'; (4) *Q yā'îr*–'may he arouse,' *K yā'ûr*].

1. Son, i.e., descendant, of Manasseh (Nu. 32:41; Dt. 3:14; Josh. 13:30; 1 K. 4:13; 1 Ch. 2:22). According to 1 Ch. 2:21f. he was the son of Segub, son of Hezron, a descendant of Judah, who married the daughter of Machir, son of Manasseh. He was thus descended both from Judah and Manasseh. At the time of the Conquest he distinguished himself by taking the tent-villages HAVVOTH-JAIR.

2. One of the judges. He is said to have had thirty sons, who rode on thirty ass colts, and who had as many cities, known as Havvoth-jair (Jgs. 10:3f.). He was probably a descendant of the person mentioned above (1).

3. The father of Mordecai (Est. 2:5; Ad. Est. 11:2 [AV Jairus]).

4. The father of Elhanan, the giantslayer (1 Ch. 20:5). In the parallel passage (2 S. 21:19) his name is given as Jaare-oregim, but the text should be corrected to Jair, "oregim" (Heb. *'ôrᵉgîm*) having crept in from the line below through a copyist's error.

See also ELHANAN. J. CRICHTON

JAIRITE jā'ə-rīt [Heb. *yā'irî*–'of Jair']. In 2 S. 20:26, Ira the Jairite is "David's priest." He was a descendant of Jair who was a Manassite (Nu. 32:41, etc.) and whose territory was in Gilead. LXX, Lucian, and Syr. suggest Heb. *yattirî*, "Jattirite," a native of Jattir mentioned in 1 S. 30:27 as one of the towns friendly to David when he was in Ziklag. It is not improbable that a native of Jattir would be given such a post by David. *See* IRA 1 (cf. 2 S. 23:38).

JAIRUS jā'ə-rəs, jī'rəs [Gk. *Iaïros*].

1. (Ad. Est. 11:2, AV). *See* JAIR 3; REAIAH.

2. A ruler in a synagogue near Capernaum whose only daughter, about twelve years of age, was raised from the dead by Jesus (Mt. 9:18-26 par. Mk. 5:22-43; Lk. 8:41-56).

The accounts of the miracle are substantially the same, but vary in detail. According to Mark and Luke the arrival of Jairus in Capernaum fell immediately after the return of Jesus from Gadara; but according to Matthew the sequence of events was that Jesus had returned to Capernaum, had called Matthew, had joined the feast of the publicans, and had just finished His discourse on fasting when Jairus came to Him. Matthew and Mark both testify to the great faith of Jairus, who begged Jesus merely to lay His hand upon the girl so that she would live. According to Matthew she was already dead when Jairus came to Capernaum; according to the others she was at the point of death; but all agree on her death before the arrival of Jesus and His followers at her home. Matthew implies that Jesus alone was present at the actual raising; Mark and Luke state that Peter, James, John, and the parents were also there. All three Synoptists record Jesus' healing along the way of the woman with the hemorrhage.

C. M. KERR

JAKAN jā'kən. *See* JAAKAN.

JAKEH jā'kə [Heb. *yāqeh*–'discerning']. The father of AGUR, the author of the sayings recorded in Prov. 30. No other information is available about either Agur or Jakeh. The Hebrew text is rather uncertain at this point, and consequently has been interpreted in various ways. One attempt to give Jakeh a pedigree suggests emending Heb. *hammaśśā'*, "the prophecy," to *hammaśśā'î*, "the Massite"; Massa is the land of an Ishmaelite tribe (cf. Gen. 25:14; 1 Ch. 1:30; Prov. 31:1). J. CRICHTON

JAKIM jā'kim [Heb. *yāqîm*–'may (God) establish'; cf. ELIAKIM].

1. A Benjaminite, a son of Shimei (1 Ch. 8:19).

2. A priest, the head of the twelfth of the twenty-four courses into which the priests were divided (1 Ch. 24:12).

JALAM jā'ləm [Heb. *ya'lām*]; AV JAALAM. In Gen.

36:5, 14, 18; 1 Ch. 1:35, a son of Esau, mentioned as the second son by Oholibamah; probably an Edomite clan.

JALON jā'lən [Heb. *yālôn*]. In 1 Ch. 4:17, a son of Ezrah, a Judahite.

JAMB [Heb. *'ayil*] (Ezk. 40–41); AV POST; NEB PILASTER. The "jambs" of the temple gates in Ezekiel's vision were an ornamental feature at the opening of the vestibule into the court. *See also* HOUSE III.C.

JAMBRES jam'brēz. *See* JANNES AND JAMBRES.

JAMBRI jam'brī [Gk. *hoi huioí Iambri*; 1 Macc. 9:36f.]. The sons of Jambri are said to have come from Medeba, a city of the Moabites and subsequently a possession of the Amorites, and to have carried off John, the brother of Jonathan, who succeeded Judas Maccabeus as leader of the Jews. The Israelites took possession of the place and assigned it to the tribe of Reuben. No mention is made elsewhere of the Jambri. In Josephus (*Ant.* xiii.1.2 [11]) they are called "sons of Amaraius."

JAMES. The name of two or more persons who were active in the early Church. James is the English equivalent of Gk. *Iakōbos*, which in turn is derived from Heb. *ya'aqōḇ* (Jacob).

The forty-one instances of this name in the NT seem to refer to two or three persons. Nineteen clearly refer to James the brother of John and son of Zebedee. Four more refer to a son of Alphaeus. Three others refer to a son of a Mary, two to a half brother (or cousin?) of Jesus, and eight to an unspecified James, a pillar of the Jerusalem Church. Finally, two refer to the father of Jude (Lk. 6:16; Acts 1:13). Most scholars narrow down these references to two or three persons.

1. James the son of Zebedee. This was one of the first disciples who were called in Galilee (Mt. 4:21 par. Mk. 1:19). He is mentioned before his brother John in every instance but one (Lk. 9:28), possibly because he was older (or because he was the preeminent member of the family). Customarily John has been given the larger place because of his extensive writings, but these all came after the death of James, the first martyr of the apostolic circle. The two men were named BOANERGES by Christ (Mk. 3:17), which is Aramaic for "sons of thunder" and which may refer to their impetuosity or their power in their later ministry. With their mother they sought a privileged position for themselves from Jesus, but were told that they should drink of the cup of His suffering and serve as He came to serve (Mt. 20:20-23; Mk. 10:35-38). Their mother's name seems to have been SALOME (Mt. 27:56; cf. Mk. 15:40). It is not certain whether the sister of Jesus' mother in Jn. 19:25 is this Salome or Mary the wife of Clopas. From the wording of the related passages it seems more likely that the sister of Jesus' mother was Mary, the mother of James the younger and Joses (or Justus). One objection to this view is the oddity of having two Marys in the same family. But some Egyptian parallels suggest that this was common practice and the two children were distinguished by some epithet — the other Mary, e.g., or James the younger. If this conclusion is adopted, then Salome was the mother of Zebedee's children, but was not the sister of Jesus' mother.

James, John, and their father were partners with Peter and Andrew in the fishing trade (Lk. 5:10; Mt. 4:18-21). Fishing in Galilee was an important business and some have thought that through such business connections John was able to gain entrance to the high priest's house (Jn. 18:15). James, however, is not mentioned as entering with his brother.

Neither James nor John is specifically mentioned as a disciple of John the Baptist, as Peter and Andrew are (Jn. 1:35-40). But the unnamed disciple here was likely John. James apparently was not there, though with John he heeded Jesus' call in Galilee to leave the nets and become fishers of men (Mt. 4:21f. par. Mk. 1:19f.; Lk. 5:3-11).

James was one of the early disciples (Mk. 1:29) and was also, with Peter and John, one of the inner circle of three. Only these were taken into the house at the raising of Jairus' daughter (Mk. 5:37; Lk. 8:51). They were also witnesses of the Transfiguration (Mt. 17:1 par. Mk. 9:2; Lk. 9:28) and of the agony in Gethsemane (Mt. 26:37; Mk. 14:33). These three with Andrew asked Jesus privately the questions about eschatology that elicited the Olivet discourse (Mk. 13:3).

James and John not only took it upon themselves to request the highest place in the Kingdom, but also asked that fire be brought down on Jesus' opposition. He rebuked them for their ignorance of His true mission (Lk. 9:52-56).

In the lists of the apostles James always occupies a place of prominence (Mt. 10:2; Mk. 3:17; Lk. 6:14; and Acts 1:13). It was possibly this prominence, together with James' forthrightness, that led Herod Agrippa I to kill "James the brother of John with the sword" (Acts 12:2). And so one of the two brothers became the first apostolic martyr; the other brother, John, became, according to tradition, the only apostle to escape martyrdom — living on till nearly the close of the century.

2. James the son of Alphaeus. In the four lists of the apostles (Mt. 10:3; Mk. 3:18; Lk. 6:15; Acts 1:13), a James is always mentioned as the son of Alphaeus. It seems probable that James the son of Alphaeus is the one called the son of Mary or "the other Mary" (see 1 above). Mk. 15:40 clearly speaks of a Mary the mother of James the younger (AV "the less") and of Joses (*see* JOSES 2). This Mary seems clearly to be the wife of CLEOPHAS (or CLOPAS) according to Jn. 19:25, and therefore the equation is often given of Cleophas with ALPHAEUS. A Cleopas was one who met Jesus on the road to Emmaus. Again, if this Mary is indeed the sister of Mary the mother of Jesus, as argued above, then James the apostle was the cousin of Jesus.

Whether James the apostle was the brother of Jude the apostle or his father depends on the interpretation of the genitive (Gk. *Ioudas Iakōbou*) in Lk. 6:16 and Acts 1:13. Modern versions tend to take the view that Jude was the son of James (RSV, NEB, JB), but it is a bit strange to have father and son apostles and possibly the grandfather (Lk. 24:18) a disciple as well. Nothing of special import is said of this James in the Gospels. He is always identified by his father or mother. It must be noted that Mary the mother of James the younger is never said to have had a son Jude. Quite possibly this Jude the apostle was indeed the grandson of Mary and Alphaeus (*see* JUDAS 7).

3. The alleged half brother of Christ. This James is mentioned twice by name in the Gospels (Mt. 13:55 par. Mk. 6:3). The brothers of Jesus are named by the people of Nazareth as "James and Joseph [or Joses or Justus] and Simon and Judas." Another reference to Jesus' brothers is in Jn. 7:3-5, where they are said not to believe. The brothers of the Lord are also mentioned in 1 Cor. 9:5. Gal. 1:19 speaks of James the Lord's brother.

The usual Protestant view has been that there was a third James, the half brother of Christ. The usual Roman Catholic view has been that the so-called half brother of Christ was really by a Semitic idiom the cousin of Christ

and was identical with the son of Alphaeus. (Cf. *New Catholic Encyclopedia*, II, *s.v.* "Brothers of Jesus" [G. H. Guyot].)

Whether this James was a cousin of Christ and one of the twelve, or the half brother of Christ and later counted as an apostle, has been much discussed. Further questions are whether the Epistle of James was written by this man if he were not of the twelve, and whether the Epistle of Jude written by "Jude the brother of James" was likewise by one of the twelve, or by one of the Lord's half brothers, or by the apostle Jude, brother of a totally different James? The various possible combinations of these views are obviously numerous.

It should be admitted that the word "brother" is in Semitic expression broad enough to include "cousin." Nonetheless, the disbelief of Jesus' "brothers" in Jn. 7:5 is emphasized. Actually, the circle of "cousins" would be rather broad. The incident of Lk. 2:44 shows a closely knit clan grouping where a twelve-year-old boy might feel quite at home with several cousins. Conceivably, some cousins did not believe in Jesus and others did. Jn. 7:5, however, is probably the strongest point against the cousin theory.

It is nevertheless strange that James the son of Alphaeus and of Mary is regularly referred to with this qualification in the Gospels, but after the death of James the son of Zebedee, the Epistles and Acts regularly refer simply to "James" without qualification, as if there were only one (Acts 12:17; 15:13; 21:18; 1 Cor. 15:7; Gal. 2:9, 12; Jas. 1:1). An apparent exception is Gal. 1:19, but it should be remembered that James the Son of Zebedee was still alive on that first visit of Paul to Jerusalem. This peculiar fact could support the cousin theory and argue that the James, Joses, Jude, and Simon of Mk. 6:3 were really children of the other Mary and Alphaeus. This strange silence with regard to another James may be explained, however, by the eminence of the Lord's brother over the son of Alphaeus. Luke does not always distinguish his characters. There are several Simons! Yet it is a point against the third James theory.

The reference of Gal. 1:19 to James, the Lord's brother, is of special interest, for some would hold that he is here designated an apostle. Does the verse include James among the other apostles besides Peter? Not necessarily; yet in a very similar situation in 1 Cor. 1:14 Paul gives an exception for Crispus and Gaius, who were of the number spoken of there. By the same token, James would be one of the apostles, or at least had an eminence calling for similar recognition.

The other references to this unspecified James certainly give him a considerable eminence: after his deliverance Peter says, "Tell this to James and to the brethren" (Acts 12:17). At the Apostolic Council in Jerusalem James gave the deciding argument concerning the relation between Jews and Gentiles (*see* APOSTOLIC COUNCIL IV, V). It does not say, however, that James presided in any capacity of "bishop of the Jerusalem Church" (Jerome *De vir. ill.* 2). James did appear to be the leader among the elders referred to in Acts 21:18, however, though the decisions are given in the name of the whole company of elders. In the list of resurrection appearances in 1 Cor. 15, James is mentioned apart from the twelve as singled out for special honor. Then (v. 7), it says, "[Christ] appeared to all the apostles" as if James were indeed not among the Twelve, but counted as one of the apostles, who by this time officially included Matthias and Paul, in addition to the original twelve. In Gal. 2:9, James, Cephas, and John are spoken of as "pillars" in Jerusalem. Later the emissaries who came from Jerusalem to Antioch are referred to as "from James" (Gal. 2:12). These facts would seem to imply a sufficient eminence to account for the lack of extra designation for a third James. There is here, however, more than a hint that this James was classified as apostolic, doubtless by virtue of his relation to Christ and the special resurrection appearance to him.

In view of all these facts, it is probably most reasonable to hold that there were indeed three men named James and that James the younger, like most of the other Twelve, achieved no position occasioning special mention. What is left then is the surprising but not impossible situation that Jesus had half brothers, James, Joseph (or Joses or Justus), Simon, and Judas, and that his mother Mary had a sister Mary, the wife of Alphaeus, with James the younger and Justus (or Joses) as sons. Still, the two-James theory is a possibility.

This James, the half brother of the Lord, is mentioned prominently in Christian tradition and even by the Jewish historian Josephus. Josephus says that the high priest Ananus had James stoned to death, but that the people revolted against him as a result (*Ant.* xx.9.1 [200f.]). Eusebius (*HE* ii.23.3-18) quotes Hegesippus to the effect that James was noted for his piety and constant prayers in the temple. He was called "camel-knees" and was respected by Christians and Jews alike, especially as he was (like Jesus) of David's line. Eventually the Jews cast him down from a pinnacle (or corner) of the temple and, as he still lived, they stoned him to death. The major points of this tradition agree with the NT picture.

The question of the authorship of the Epistles of James and Jude is not easily answered. Jude calls himself the brother of James, but again, we cannot be sure of which James he spoke. Tertullian says this Epistle was written by the apostle Jude. We cannot tell whether this means (1) that the Judas who wrote the Epistle was one of the Twelve and brother of James the younger (assuming that Jude was the brother and not the son of James the younger), or (2) that this Judas, one of the Twelve, was a son of James and had a brother also by that name, or (3) that this Judas was another half brother of the Lord and like his full brother James was recognized as an apostle. The possibilities are numerous and, of course, other men by the name of James or Jude may be thought of, but it would seem that one of the above possibilities is the more likely. 17. Prayer (5:13-18)
18. Reclaiming the Sinning Brother (5:19f.)

B. Main Theological Themes. The Epistle of James is the least dogmatic book of the NT. Scarcely a trace of the great theological themes that dominate the Pauline Epistles and the rest of the NT books is to be found. James, e.g., makes no mention of the Incarnation. The name of Christ appears only twice (1:1; 2:1). There is no mention, directly or by implication, of His sufferings, death, or resurrection.

A second feature of the Epistle is the great emphasis on the practical aspects of Christianity. Herder admirably summarized this emphasis:

> What a noble man speaks in this Epistle! Deep unbroken patience in suffering! Greatness in poverty! Joy in sorrow! Simplicity, sincerity, firm direct confidence in prayer! . . . How he wants action! Action! not words, not dead faith! (Quoted in F. W. Farrar, *Early Days of Christianity* [1883], II, 324.)

A third feature of the content of the Epistle is its evident Judaistic flavor. Ropes well remarked that the "religious attitudes of rabbinical Judaism would in most respects sum up the fundamental ideas of the Epistle of James" (p. 31). The distinctive Christian features of course remain; James has baptized these rabbinical ideas into Christ. The outstanding theological themes of the Epistle are:

1. Temptation (Trials). The typically Jewish teachings, namely, (1) joy in trial and (2) the use of trial for the building and perfecting of character, are both found in the Epistle (1:2-4). More significant is the teaching in 1:13-15 concerning the origin of temptation. Here the author reflects contemporary Jewish theology. The rabbinical solution to the problem of the origin of sin was the doctrine of the *yēṣer hārā'*, the evil tendency in man, whose function it was to lure him to sin. Jas. 1:13-15 looks very much like a refutation of the Jewish idea that since God created everything, including the evil tendency in people, people are not responsible for their sin. Not so, according to James, for ' each person is tempted when he is lured and enticed by his own desire. Then desire when it has conceived gives birth to sin; and sin when it is full-grown brings forth death" (1:14f.).

2. Law. The transitional nature of the Epistle is clearly seen in the treatment of the concept of law. The entire Epistle is concerned with ethics (*didachē*), not proclamation (*kērygma*). Thus Christianity is presented with great emphasis on its ethical teachings as a perfect law, a law of freedom and a royal or kingly law. James seems to be reassuring his Jewish Christian readers that for them there is still the law (the priceless possession of every Jew), though by "law" he does not mean the same thing as a non-Christian might understand by that term. He has baptized this concept into Christ.

The law is a perfect law (1:25, not a strange expression from a Palestinian Jew; cf. Ps. 19:7 [MT 8]). James seems to be deliberately ascribing to *didachē* the attributes of the law. For James, the Christian, it is perfect because it was perfected by Jesus Christ.

It is also "a law of freedom" (1:25), a seemingly contradictory phrase since law implies commandments and they in turn imply restrictions. Dibelius suggested that the concept of law as freedom is Stoic and came into Judaism through Philo (pp. 111f.). James, however, does not seem to be describing the *results* of law, ethically speaking, on the individual. It is a law of freedom, i.e., a law that applies to those who have the status of freedom, not from law but from sin and self, through the "word of truth." Thus "law of freedom" is a Palestinian Jew's way of describing the Christian standard of conduct found in the *didachē*.

This tendency to describe *didachē* as law is found in 2:8-13, a paragraph that arises out of a rebuke for the partiality James's readers were showing toward the rich. This partiality was condoned by an appeal to the law of love to one's neighbor. So James writes, "If you really fulfil the royal law . . . you do well." (The intimation is that they are not fulfilling it.) The "royal law" is connected with the statement in v. 5 where James reminds his readers that God has chosen the poor in the world to be rich in faith and heirs of the Kingdom He has promised to those that love Him. The "royal law," then, is for those who are of God's kingdom; it is the rule of faith for those who have volitionally subjected themselves to the rule of God. This identification of law with the ethical side of Christianity runs through the entire Epistle (cf. 2:8-13; 4:11f.).

3. Faith, and Faith v. Works. Faith, for James, is the basic element of piety (1:3; cf. 2:5), the belief in God — not merely in the existence of God, but in His character as being good and benevolent in His relations with people (1:6, 13). Faith includes belief in the power of God, in His ability to perform miraculous acts; and it is closely associated with prayer (5:15f.; cf. 1:6). These passages illustrate James's dynamic concept of faith and together clearly show his contact with Judaism. James, of course, goes beyond the bounds of Judaism by speaking of faith directed toward the Lord Jesus Christ (2:1).

Similarities exist between the concept of faith in James and that in the teachings of Jesus. For Jesus, too, faith meant access to the divine power and was often associated with healing. Such statements as: "All things are possible to him who believes" (Mk. 9:23); "Therefore I tell you, whatever you ask in prayer, believe that you received it, and it will be yours" (11:24); and "Daughter, your faith has made you well; go in peace" (5:34) reveal a dynamic concept of faith strikingly similar to that of James.

The best-known passage in which faith is mentioned is

2:14-26, and here faith and works are contrasted. A study of this passage reveals that the author is not attempting to refute Paul. The two stand basically in agreement. For both James and Paul faith finds its object in the Lord Jesus Christ, and both are agreed that the first thing to do with faith is to live by it. The "faith" of which James speaks in 2:14-26 is really not faith at all, in the true Hebraic sense of confidence and trust in God that elicits appropriate action. It is not recognized as true faith by James (cf. "if one *says* he has faith") and would not be considered such by Paul.

James's use of the word "works" differs significantly from Paul's. For James, "works" are works of faith, the ethical outworking of true piety and include especially the "work of love" (2:8). (Paul would probably call these the fruit of the Spirit.) When Paul speaks of works, he has in mind primarily the works of the law, i.e., works righteousness. And it is against these that he directs his strongest polemic in Galatians and Romans. (*See* PAULINE THEOLOGY VI.B, C.)

It is best then to understand 2:14-26 as a refutation, not of Paul, but of a misunderstanding of Paul's doctrine of justification by faith.

4. Wisdom. James's treatment of wisdom also reveals the basic Jewish tone of the Epistle. Wisdom is primarily practical, not philosophical. It is not to be identified with reasoning power or the ability to apprehend intellectual problems. It has nothing to do with the questions why or how. It is to be sought by earnest prayer, and it is a gift from God (1:5). Both of these ideas find their roots in the wisdom literature (cf. Wisd. 7:7; Prov. 2:6; Sir. 1:1).

Another more extensive passage (3:13-18) on wisdom has given rise to some difficult problems. Schammberger, Schoeps, and Preisker see in this passage, with its contrast between the wisdom from above and the earthly, devilish wisdom, a refutation of the Gnostics. This may well be, since an incipient type of GNOSTICISM was present among both Jews and Christians long before the full flowering of this heresy in the 2nd century. Such anti-Gnostic sentiments, however, are not a reliable guide for dating the Epistle, particularly for insisting on a late date.

5. Eschatology. Three distinct eschatological themes are found in the Epistle.

a. Kingdom of God. Mention of the kingdom of God grows out of the discussion of partiality (2:1-7). No partiality is to be shown to the rich, for "has not God chosen those who are poor in the world to be rich in faith and heirs of the kingdom which he has promised to those who love him?" This echoes Christ's teaching in Lk. 6:20: "Blessed are you poor, for yours is the kingdom of God." The Kingdom is the reign of God partially realized in this life, but fully realized in the future (cf. Jas. 2:5, "promised"). It is almost synonymous with salvation or eternal life.

b. Judgment. This is the dominant eschatological theme of the Epistle. In 2:12 Christians are admonished to "so speak and so act as those who are to be judged under the law of liberty" and they are reminded that "judgment is without mercy to one who has shown no mercy" (v. 13). Judgment, in other words, will be administered on the basis of works. In 3:1 the author addresses teachers and reminds them that privilege is another basis for judgment.

The judgment of the non-Christian rich is also emphasized in the Epistle. Thus 1:10f. depicts judgment on the wicked rich, whose destruction is likened to the swift withering of the grass due to the burning heat of the sun. In the midst of his pursuits the rich person will fade away. The theme of judgment reappears in 5:1-6. Here the author reaches prophetic heights. The wealthy landowners have indulged themselves and defrauded the poor farm laborers. They have even condemned and killed the righteous. All this has made them ripe for certain judgment (5:5, "you have fattened your hearts in a day of slaughter").

The final passage on judgment (5:9) is addressed to James's Christian readers who have become somewhat frustrated and impatient with the difficult situation in which they find themselves. His word of exhortation is: "Do not grumble, brethren, against one another, that you may not be judged; behold, the Judge is standing at the doors." Judgment is to be based on character, and the imminency of the judgment is paralleled by the imminency of the Parousia, because the same Person is involved in both.

c. Parousia. The hope of the Parousia is presented as the great stimulus for the kind of Christian living advocated in the Epistle. Every kind of suffering and trial must be endured because the Parousia is at hand (5:8). This expectancy of the Parousia is powerful and immediate, and reminds one of the eschatological tenor of the Thessalonian letters.

See ESCHATOLOGY IV, VIII, X.

II. Literary Character.–The importance of the literary character for understanding the Epistle is seen in the fact that some of the best commentators deal with this question first and in considerable detail (e.g., Ropes and Dibelius). To understand the literary form of the Epistle is to solve one of its most baffling problems and to come into possession of a valuable key toward the solution of other problems.

James purports to be an epistle. The opening statement, "James, a servant of God and of the Lord Jesus Christ, To the twelve tribes in the Dispersion: Greeting," is a typical epistolary address. Hundreds of papyrus letters have been uncovered from the sands of Egypt that bear similar opening addresses. But the apparent or purported literary character of the Epistle does not explain the literary forms that underlie it. These are discovered by a careful study of the Epistle itself, and by a comparison with the commonly employed literary forms of the period.

A. Diatribe Theory. From a study of its literary forms J. H. Ropes concluded that the Epistle reveals many of the characteristics of the diatribe — the short moral or ethical address developed initially by the Stoics and Cynics.

Certain stylistic features of the Epistle are similar to the peculiar style of the diatribe: dialogue (2:20); brief questions and answers (5:13f.); rhetorical questions (2:14); harsh speech (2:20; 4:4); the introduction of an opposing speaker with "but someone will say" (2:18); etc. The choice of illustrations, especially in 3:2-12, is significant. This passage with its *ho trochós tês genéseōs* reveals some connection, either directly or indirectly, with Hellenistic thought and culture. The author certainly is familiar with Hellenistic literary forms, as is evidenced by the diatribelike character of 2:1-13; 2:14-26; 4:1-10; but his basic circle of ideas is Semitic, not Hellenistic, and Jewish, not Greek. W. L. Knox suggested that the "lively dialogue form had penetrated into the Greek-speaking synagogues of Jerusalem and even into the general usage of the synagogue sermon" (*JTS*, 46 [1945], 10).

B. Parenesis Theory. This theory, rejected by Ropes, was extensively developed by Dibelius. The chief literary characteristics of the parenetic tract are to be found in the Epistle of James. Dibelius lists four in particular: (1) a manifest eclecticism; (2) a lack of real coherence (artificial coherence is attained by means of catchwords, e.g., *leípomai . . . leípetai*, 1:4f.); (3) the repetition of the same theme in different places; (4) the lack of a definite situation to which the exhortations are addressed.

There is much in Dibelius' view of the literary character

of the Epistle of James that commends itself. The presence, e.g., of traditional exhortative material, especially in 4:1-10, is evident. On the other hand, the strong personality of the author is clearly seen through most of the Epistle. Again, the Epistle is not without some coherence of thought. Indeed, some commentators have argued with great force for the complete coherence of the Epistle. Furthermore the Epistle has some indications of being addressed to a definite situation (e.g., 2:1-7; 2:14-26; 3:1-12; 5:1-6).

C. Homily Theory. The theory that identifies the Epistle with a sermon (especially a synagogue sermon), or perhaps excerpts from a number of sermons, accounts best for all the facts. Martin Luther first hinted at this theory in one of his pronouncements on the Epistle. Attempting to explain its origin, he said, "I imagine it was some good pious man or other who took up a few statements from the disciples or the apostles and so threw them on paper, or perhaps it was composed by another from his sermons" (*WA*, lxiii, 157). J. S. Stevenson expresses a similar idea (*Expos.T.*, 24 [1912-1913], 44).

An examination of the literary character of the Haggadah as preserved in the homiletical and expositional midrashim reveals striking similarities to the literary forms found in the Epistle of James. Of special significance are:

1. Dialogue. The author of the Epistle of James is especially adept at using dialogue (see II.A above) along with the introduction of an alleged or real objector, as in 2:18, using the formula *all' ereí tis*. The Jewish homilists had at least four formulae with which they introduced an alleged or real objection or objector. The one most similar to James's *all' ereí tis* is *'m 'mr lk 'dm*, "but if someone tells you [so reply to him]." This formula is found in the Haggadah of the Tannaim as early as the 2nd cent. (A. Marmorstein, *HUCA*, 6 [1929], 192).

2. Method of Address. Another striking similarity between the Epistle of James and the Jewish homilies is the method of addressing the audience. Fifteen times James addresses his hearers as "brethren." This method of address is common in the OT (Jgs. 19:23; 1 S. 30:23; 1 Ch. 28:2) and is often used in the NT (Rom. 7:4; 1 Cor. 1:10; 1 Thess. 1:4; 1 Jn. 3:13). The Gk. *adelphoí* as an address occurs most frequently in the speeches in Acts, e.g., 1:16; 2:29; 3:17; 6:3; 7:2; 13:15, 26, 38; etc. Its occurrence in Acts 13:15 is especially important because there it is used by Paul in the synagogue sermon preached at Antioch in Pisidia. Ropes suggested that this method of address may have "belonged to the homiletical style of the synagogue and was brought thence into the Christian hortatory language" (p. 132). Marmorstein cited impressive evidence that "brethren" or "our brethren" was a principal method of address used by the Jewish preachers of the first three centuries A.D. (*London Quarterly Review* [Oct. 1916], p. 238).

3. Variability of Subject Matter. The Epistle of James in a very short space deals with a large number of seemingly isolated subjects. If the Epistle is in reality a collection of sermonic materials used by James in the synagogue, then the variability of subject matter can be explained by assuming that the material is collected from a number of sermons on different subjects. (It does not follow, however, that the collection was arbitrarily made without a thought given to the needs of the readers.)

The variety of the material in the Epistle is paralleled by that found in the Jewish synagogue sermons. One would have to list all the themes of Jewish theology in order to include the multiplicity of subjects dealt with in the synagogue sermons (cf. L. Zunz, *Die Gottesdienstliche Vorträge der Juden historisch entwickelt* [2nd ed. 1892], pp. 329-360).

Of special interest is the closing section of the synagogue sermons, since they usually conclude with an eschatological passage — a prophecy of the glorious future of Israel. A typical example is found in a homily from the *Pesikta de Rab Kahana* (p. 213 in Wünsche's translation). The Epistle of James likewise contains a strong eschatological passage, and it appears in the final chapter.

These and other similarities (e.g., use of alliteration) between the literary characteristics of the Epistle and the homiletical and expositional midrashim at least open up the possibility that the Epistle consists of excerpts from numbers of synagogue sermons which have been brought together (not without a definite purpose in mind) and given an epistolary address.

It is highly probable that a Jewish-Christian teacher of Pharisaic background and training would be familiar with the literary style and form of the synagogue sermon. By the 1st cent. A.D. the homily was a regular part of the synagogue service in both Palestine and the Diaspora. The book of Acts records how the freedom that was afforded anyone of competence to deliver the sermon in the synagogue was used by the apostle Paul as a means of evangelism. This freedom existed in the synagogues of Jerusalem as well as those of the Diaspora. It seems unlikely that, with such a splendid opportunity as the synagogues afforded James in Jerusalem to reach his own people, he would have overlooked or neglected this opportunity for evangelism and teaching any more than would the apostle Paul.

D. Other Sources for the Literary Forms. Although the basic orientation of the Epistle is probably to be found in the Jewish synagogue sermon, this does not exclude the use of other materials that were in common use in the Christian community. The most important of these is catechesis. The research of Selwyn and Carrington has shown that common catechetical material underlies many of the NT Epistles. The Epistle of James contains some of this material, and this has to some degree affected its literary form. The high frequency of the use of the imperative (see III.B below) may be due to the presence of catechetical material in the Epistle.

Another source is the *verba Christi*. No other NT book so echoes Christ's words as does the Epistle of James. The early catechetical forms undoubtedly drew from collections of the *verba Christi*, and James seems to have had contact with this tradition while it was still in a plastic form. The author's aphoristic style may be attributable in part to this influence.

III. Language.–The Greek of the Epistle ranks with the best to be found in the NT. This is not, however, to say that the author was a classicist. There are only three periodic sentences in the Epistle (2:2-4; 2:15f.; 4:13-15), and only two of these exceed four lines. The use of Greek particles is very sparse; and although participles are numerous, there is not a single instance of a genitive absolute. No optative occurs and there is no accusative with an infinitive. Nevertheless, the author is obviously at home in the Greek language, a fact revealed by the vocabulary and style of the Epistle.

A. Vocabulary. There are 570 different words in the Epistle. Of these about seventy (this figure varies according to decisions made on variant readings) do not occur elsewhere in the NT. All but twenty-five of the seventy occur in the Greek OT. Only six words in the Epistle (*brýō, enálios, eupeithḗs, euphḗmeros, thrḗskos, katépheia*) are found neither in the NT nor in the LXX.

The author uses words and phrases in good literary

koine style, e.g., *deleázomai* (1:14), *apokyéō* (1:15, 18), *epitēdeia toú sṓmatos* (2:16), *katépheia* (4:9). He seems to be fond of compounds, e.g., *adiákritos, chrysodaktýlios, prosōpolēmpsía*, etc., and picturesque words, e.g., *ololýzō, deleázomai, dípsychos*. He employs technical terms, e.g., *pēdálion, psychikós*, and phrases, e.g., *trochós tḗs genéseōs* and *émphytos lógos*, without using them in their strict technical sense.

Deissmann stated that "the Epistle of James will be best understood in the open air beside the piled sheaves of a harvest field" (Deiss.*LAE*, p. 232). Its vocabulary reflects the local color of the countryside. Numerous words are drawn from agriculture (*amáō, ámpelos, bréchō, bryō, geōrgós, elaía, maraínō, ópsimos, próimos, sḗpō, sýkon, sykḗ*). Words used in fishing are also employed, e.g., *alykón, anemízō, enálios, exélkō*, and *rhipízō*.

An outstanding feature of the Epistle is the use of rare words. There are about twelve words that have their first known occurrence (assuming the precedence of the Epistle of James to Hermas, Clement, and the Pauline Epistles) in James.

B. Style. The author exhibits a remarkable active literary susceptibility to, and feeling for, a good Greek style. He may be favorably compared to the writer of Hebrews.

1. Evidences of Good Greek Style. The following examples may be cited:

a. Paronomasia (Assonance). This literary device of linking together clauses or sentences by the repetition of the leading word or a cognate permeates the entire Epistle (cf. 1:1f., 3f., 5f., 13f., etc.).

b. Alliteration. This is obviously deliberate (cf. 1:1f., 21; 3:8).

c. Rhyme (Homoeoteleuta). (Cf. 1:6, 14; 2:12; 4:8.)

d. Frequent Use of the Imperative. There are fifty-nine of these (thirty-one in the present tense, twenty-eight in the aorist). A terseness and forcefulness is given to the Epistle by the presence of such a large number of imperatives.

2. Semitic Influences. Despite the good Greek of the Epistle, Semitic influences are evident. It is somewhat precarious to offer a list of Hebraisms or Semitisms, since so many of these constructions have been shown to be a part of a large number of "international vulgarisms," and since experts differ among themselves as to what is or is not a Semitism in the NT. Despite these difficulties there are several indications of possible Semitisms in the Epistle: the use of the attributive genitive for the adjective (1:23, 25; 2:1, 4; 3:6, 13; 5:15); periphrastic tenses (1:17; 3:15); use of the dative for the Hebrew infinitive absolute (5:17, *proseuchḗ prosēúxato*); pleonasms (1:7f., 12, 19, 23; 2:22); parallelism (1:15, 17, 22; 3:11f.).

C. Aramaic-Original Theory. This theory arose from (1) the recognition of Hebraic turns of expression in the Epistle, and (2) the refusal to concede such good Greek to James, the Lord's brother. Toward the close of the 19th cent. Bishop Wordsworth (*Studia Biblica*) proposed this theory on an entirely different basis from previous attempts. His study of the Epistle of James in the Latin Codex Corbeiensis convinced him that a text different from our present Greek text of the Epistle underlay it. He explained the differences between the readings in Corbeiensis and in our Greek text by postulating two independent Greek versions of the supposed Aramaic original of the Epistle, the one corresponding to our present Greek text, and the other underlying the Latin Codex Corbeiensis.

Mayor has shown that the variations in Codex Corbeiensis can be explained by the usual principles of textual criticism, without necessitating the theory of an Aramaic original. Fatal to the theory of an Aramaic original is the literary style of the Greek text. It is difficult, if not impossible, to account for James's alliterations, homoeoteleuta, plays on words, etc., on the basis of an Aramaic original.

F. C. Burkitt (*Christian Beginnings* [1924], pp. 25-71) attempted to revive the Aramaic-original theory. His view is that the original of the Epistle was in Aramaic and was translated by a member of the gentile Greek-speaking church of Aelia. The arguments fatal to Wordsworth's theory are likewise fatal to Burkitt's. It can be affirmed with great confidence that Greek was the original language of the Epistle.

IV. Authorship.—According to the superscription, the Epistle was written by "James, a servant of God and of the Lord Jesus Christ." The traditional view has identified this James with the brother of the Lord and the head of the Jerusalem church (Acts 12:17; 15:13; 21:28; 1 Cor. 15:7; Gal. 2:9, 12).

A. Evidences for the Traditional Authorship. There are three main evidences. First, the language of the Epistle is similar to that of the circular letter of Acts 15 and to James's speech. The most important of these similarities are: the use of Gk. *chaírein* in the salutation (Jas. 1:1; Acts 15:23); the close parallel between the phrase *tó kalón ónoma tó epiklēthén eph' hymás* (Jas. 2:7) and *eph' hoús epikéklētai tó ónoma mou ep' autoús* (Acts 15:17); the close relationship between *akoúsate, adelphoí mou* (Jas. 2:5) and *ándres adelphoí, akoúsaté mou* (Acts 15:13). Other verbal coincidences and similarities are *agapētós* (Jas. 1:16, 19; 2:5; Acts 15:25); *tēreín* (Jas. 1:27) and *diatēreín* (Acts 15:29); *episképtesthai* (Jas. 1:27; Acts 15:14); *epistrépheín* (Jas. 5:19f.; Acts 15:19).

Although caution should be exercised in ascribing too much significance to these parallels, they remain an important factor in determining authorship.

Second, the historical reports concerning the life and character of the Lord's brother are consistent with the contents of the Epistle. The NT reveals that the brothers of the Lord were not believers before His resurrection (Jn. 7:5). A special postresurrection appearance of Our Lord was made to James (1 Cor. 15:7). This no doubt was the means of his conversion, and subsequently he and his brothers are numbered with the believers (Acts 1:14). James immediately took his place in the Christian community at Jerusalem. Here he associated himself with Peter, John, and other apostles. How he became head of the Jerusalem church is not told, but it is likely that it was prior to the famine of *ca.* A.D. 43, for when Paul named the three "pillars," James is mentioned first (Gal. 2:9). His relations with Paul show that no basic antagonism existed between the two men. Indeed, on at least two occasions James defended Paul's mission among the Gentiles (Acts 15:13-18; Gal. 2). After Paul's return to Jerusalem at the close of his third missionary journey, the NT tells nothing more of James. The popular portrait of James as a strong advocate of the law, an ascetic, and a martyr is derived largely from an account of his death by Hegesippus (see Eusebius *HE* ii.23; but cf. Jerome *De vir. ill.* 2). This account is obviously legendary and unreliable (cf. Lightfoot's evaluation in his comm. on Galatians [1900], pp. 366f.). The NT record and additional information from Josephus (*Ant.* xx.9.1 [200]) are our only reliable sources, and nothing is revealed in either about the character of James the Lord's brother that is inconsistent with what is written in the Epistle.

Third, the Epistle shows the author's knowledge of and dependence upon the Jewish tradition. Several examples will be found in the section on contents (see I.B above). One further example is cited here, namely, the author's

use of the tradition concerning Elijah in 5:17f. In this passage, prayer for the return of rain is specifically mentioned, while the OT has no reference to prayer at all. Later Jewish tradition, however, does mention Elijah's prayer in connection with the cessation of rain (cf. Sir. 48:3); and apparently it is this tradition that James is following.

The same is true relative to the duration of the drought. The OT is not explicit. It simply states that the rain came in the third year (1 K. 18:1). This would mean that the drought lasted less than three years. The rabbinic tradition of the drought's precise length is not uniform (cf. SB, III, 760f.), but it is clear from the researches of Kittel (*Die Probleme des palästinischen Spätjudentums* [1926], p. 43; and *ZNW*, 41 [1948], 81) that three-and-a-half in the rabbinic tradition was used as a round number (one-half of seven — very much like our half dozen). Thus James here is again dependent on the Jewish tradition, a tradition one would expect James the Lord's brother to know.

B. Objections to the Traditional Authorship. 1. Good Greek of the Epistle. No objection to the traditional authorship has as much force as this one. How was it possible for one reared at Nazareth in a pious peasant Jewish home to possess a command of the Greek language such as is revealed in the Epistle? The answer to this question may be found first in that the Greek of the Epistle, although good, has evidences of Semitic influences (see III above); and second in that such a knowledge of Greek was required by James's position as head of the Jerusalem church. A large segment of the church in Jerusalem was made up of Hellenists who had lived in the lands of the Dispersion and to whom Greek was the native tongue. James certainly would have associations with these people, and the prestige of the Jerusalem church would demand that its leader be able to speak with them in a manner appropriate to his position. We do not know what linguistic aptitudes the Lord's brother possessed, but it is not too much to assume, in view of the widespread diffusion of Greek in Jewish Palestine (cf. S. Lieberman, *Greek in Jewish Palestine* [1942]) and the need for James to possess a mastery of the language, that the Greek of the Epistle was penned by him.

2. Late Acceptance of the Epistle. Origen (3rd cent.) is the first to cite it as Scripture and to name the author as James, even though passages in noncanonical authors before Origen seem to reveal acquaintance with the Epistle. (For a listing and discussion of these cf. M. Meinertz, *Der Jakobusbrief und sein Verfasser in Schrift und Überlieferung* [1905].) What prevented its earlier recognition if written by James, the head of the Jerusalem Church? The nontheological character of the Epistle, the Jewish nature of its contents, the supposed refutation of the Pauline doctrine of justification by faith, and particularly its lack of claim to apostolic authorship — all may have proved to be hindrances to its universal acceptance in the Church.

C. Other Theories of Authorship. 1. Pseudonymous. The chief problem with this view is that the author is not likely to have used the name James without further identification.

2. Another James. James son of Zebedee is an unlikely candidate, since there is no evidence that he attained a position of leadership in the Church that would warrant a letter addressed to the Church generally. Another objection is his early death (A.D. 44). An unknown James has been suggested by some. This appears to be too easy a solution to a difficult problem.

3. Jewish-Original Theory. F. Spitta and L. Massebieau arrived at the conclusion independently that the Epistle is a Jewish document Christianized by the interpolation of the words *Iēsoú Christoú* in 1:1 and *hēmôn Iēsoú Christoú* in 2:1. This hypothesis has failed to gain the general support of scholars because it overlooks the basic Christian element in the Epistle. It has, however, helped to emphasize that the writer of the Epistle was intimately acquainted with the OT Scriptures and the wisdom literature of the Jews of the Dispersion.

A. Meyer developed a unique theory built on Spitta and Massebieau. He viewed the Epistle as a Jewish document of a special type: an allegorical treatise that utilizes the more-or-less stereotyped allegorical interpretations of the names of Scripture for the purpose of edification. *Jakobus* is Jacob, and he writes a letter to the twelve tribes in the Dispersion through their eponymous founders. The names of the characters in the story of Jacob are played upon throughout the Epistle. Simeon, e.g., is derived from the Hebrew word "to hear." James 1:19-24, then, with its recurrent references to "hearing" and "hearers," is a play on the name Simeon. In like fashion Dan is associated with "judgment," Asher with "riches," etc. The Christian editor, according to Meyer, did his work *ca.* A.D. 80-90, and the Jewish *Grundschrift* dates back to the time of Philo. Although Meyer's theory has been adopted to a degree by Windisch and Easton, it is too ingenious and subtle to warrant general acceptance.

V. Readers and Their Circumstances.—The only direct hint in the Epistle that might help discover who the readers are is found in the superscription, "To the twelve tribes in the Dispersion." This is generally taken to mean the Jews living outside of Palestine, and then, on the basis of the contents of the Epistle, to Christian Jews, at least primarily. The basic objection to this position is that the phrase "the twelve tribes" is a term that traditionally meant the entirety of the Jewish nation (cf. Sir. 44:23; Asm. M. 2:4f.; Bar. 1:2; 62:5; 63:3; 64:3; Acts 26:7) which, no matter how widely it may have been scattered in the Diaspora, could not be considered to have had its entire existence outside of Palestine. Furthermore, if James were writing to the part of the Jewish nation that had taken up its abode in the Diaspora, he could easily have made it clear by such a phrase as "to those out of (*ek*) the twelve tribes that are in the diaspora."

It therefore seems best to take "to the twelve tribes" in a symbolic sense. The phrase would then refer to the Christian Church, conceived of as the new Israel, which inherits the spiritual privileges of the people of God.

Now if "to the twelve tribes" is taken figuratively to mean the Christian Church, it seems best to give a figurative meaning to "in the Dispersion" also. Thus, taken as a whole, the superscription would mean "to the Christian Church, the new Israel, which in reality has its home in heaven but which for the present is resident in a hostile and alien world." This is as far as the superscription can take us in determining the readers of the Epistle. Further indications can be derived from the Epistle itself.

An examination of the contents reveals nevertheless that the Epistle was written primarily for Jews. Some of the most obvious evidences for this are: (1) the tendency of the readers to blame God for their sin — a tendency that sprang from the Jewish doctrine of the evil *yēṣer* (1:13-15); (2) the use of *tēs dóxēs* in 2:1, a reference to the Shekinah, which would be unintelligible to non-Jewish readers; (3) the evident pride in a monotheistic faith (2:19); (4) the use of the feminine *moichalídes*, "ye adulteresses" (4:4 [RSV "unfaithful creatures"]) in a passage addressed to both men and women, recalling the OT figure of the Lord as the faithful husband and Israel as His unfaithful wife, which also would hardly be intelligible to gentile readers (cf. Cadoux, pp. 10-18, for a formidable list of indications of Jewish readers).

The Jews addressed are primarily Christians (cf. 2:1), but one passage (5:1-6) seems clearly to be addressed to non-Christians. This passage may represent a prophetic attempt to reach non-Christians who were frequenting Christian assemblies (cf. 1 Cor. 14:23f.) just as non-Jews (the God-fearers of Acts 13:26) were often in attendance at Jewish synagogues.

In the shorter disconnected passages of the Epistle it is impossible to discover anything about the readers' circumstances. Most of these exhortations are general and relate to social and spiritual conditions to be found among any group of Christians in any age. This does not apply, however, to the more extended passages in the Epistle that treat social conditions (2:1-12; 5:1-11). In these the author's knowledge of the situation is more evident. James is addressing poor Christians who are employed as farm laborers for wealthy landowners. A few rich may be included among his Christian readers (cf. 4:13-17), but James is primarily concerned with the poor. His statements denouncing the rich (especially 5:1-6) are among the strongest in the NT.

VI. Date.–A wide range of opinion exists on the date of the Epistle. The various dates suggested fall into three groups: (1) pre-Christian (Spitta, Massebieau, Meyer); (2) during the lifetime of the Lord's brother (A.D. mid-40's to 62); (3) late date (*ca.* A.D. 70-150). Admittedly the dating of the Epistle is difficult. Since there is no mention of historical events or personages that might help to fix a date, dogmatic assertions are not possible. Internal evidence, however, favors an early date.

(1) The social conditions revealed in the Epistle suggest a date before the destruction of Jerusalem. The Hasmonean nobility was superseded by a new aristocracy, which oppressed the poor as did its predecessors. The new aristocracy, however, disappeared during the war of A.D. 66-70. G. F. Moore pointed out that subsequent to the Jewish War and the wars under Trajan and Hadrian, the old social cleavage between rich and poor had noticeably diminished (*Judaism in the First Centuries of the Christian Era*, II [1932], 157). The new social cleavage was between those who were instructed in their religion and those who were not. In the Epistle of James the social cleavage was still between the pious poor and the wicked rich.

(2) The concept of faith in the Epistle suggests an early date. Faith, which is associated with prayer, healing, and the miraculous intervention of God, strongly resembles the concept in the Synoptic Gospels. "If James is a late work, it provides us with an example of faith connected with bodily healing (5:15) which is quite without parallel in the Pastorals and any other late book of the NT" (C. Powell, *Expos.T.*, 13 [1901-1902], 314). Indeed, the general similarity of tone and teaching that the Epistle displays with the Synoptic tradition is strong evidence for an early date.

(3) The eschatology of the Epistle points to an early date. The Parousia expectation rates in intensity with that found in the Thessalonian Epistles. There is no indication of a delayed Parousia as we find in some of the late books of the NT, and there are no apocalyptic visions or similar developments as found in later Christian apocalyptic literature. James's readers are living in the active and powerful expectation of an imminent Parousia. Nothing in the Christian literature of the 2nd cent. matches the simple and powerful eschatological teaching of the Epistle of James.

(4) The organization of the churches of the Epistle also points to an early date. The elders alone seem to be regarded as possessing pastoral authority. The office of bishop is not mentioned as it almost certainly would have been in the 2nd century. The only other church officers referred to in the Epistle are the teachers (ch. 3), who seem to be loosely organized.

(5) The debate concerning the Gentiles is wholly absent. This, of course, can be explained by assuming a late date, i.e., at a time when the argument had cooled off and had largely been forgotten. But it also can be explained by assuming an early date, before the contention had become bitter. If James wrote *ca.* A.D. 44, the problem would already have arisen (cf. the discussion in Gal. 2:1-20, which arose primarily out of Paul's preaching to Gentiles at Antioch, Acts 11:26), but would not as yet have assumed great importance. The mission to the Gentiles brought it into clear focus.

(6) The superscription is addressed to the entire Church (see V above), but the contents reveal that the hearers are primarily Jews. The only time in the history of the Christian Church that one could address the entire Church and be speaking primarily to Jews was before the mission to the Gentiles *ca.* A.D. 47.

(7) A crucial passage for dating the Epistle is the well-known one on faith and works (2:14-26). These verses are inexplicable without presupposing a knowledge of certain Pauline formulae; yet it is hard to believe that the author of 2:14-26 is refuting Paul. This would involve an almost inconceivable miscomprehension of the Pauline doctrine of justification by faith. The passage is best explained as having been occasioned by a misunderstanding of Paul, not by the author, but by the readers. Such a misunderstanding would have been more likely at the very outset of Paul's public preaching than later on. The book of Acts records his first extended public preaching as taking place at Antioch (11:26). This yearlong ministry preceded the famine visit to Jerusalem of *ca.* A.D. 46 (cf. Acts 11:27-29; Gal. 2:1-10) and the Herodian persecution of A.D. 44. How long it was before the misunderstanding and misapplication of Paul's doctrine of justification by faith came to the attention of James is not known. Since Jews, including Christian Jews, from all over the Mediterranean world were constantly moving in and out of Jerusalem, it probably was not long. A date *ca.* A.D. 44, during or immediately following the Herodian persecution, would best fit all the known factors.

(8) The most serious objection to the early date is that the churches addressed show signs of apathy, which seems to indicate that they are past the early stages of their life. But is this a valid argument against an early date? Time is not the only factor involved in apathy; the people themselves, their background and circumstances, are also important considerations. In periods of general intense enthusiasm and zeal there are always some who are not carried along on the wave of excitement. And even if it is insisted that time is needed for a state of apathy to set in, about ten years had elapsed in which this could have taken place.

VII. Place.–Although a number of opposing suggestions have been made from time to time, there can be little doubt that the Epistle was written in Palestine. The author draws pictures that are Near Eastern generally and Palestinian particularly (cf. "the early and the late rain" [5:7]; the spring of brackish water [3:11]; the fig, olive, and vine [3:12]; and the "scorching heat" [1:11]).

JAMIN jā'min [Heb. *yāmîn*].

1. A "son" (clan) of Simeon (Gen. 46:10; Ex. 6:15; Nu. 26:12; 1 Ch. 4:24).
2. A Judahite, son of Ram and grandson of Jerahmeel (1 Ch. 2:27).
3. A Levite, one of those who "helped the people to understand" the Torah when Ezra enforced it (Neh. 8:7; 1 Esd. 9:48; AV Adinus; NEB Jadinus).

JAMINITES jā'min-īts [Heb. *hayyāmînî*]. Descendants of Jamin (Nu. 26:12). *See* JAMIN **1.**

JAMLECH jam'lek [Heb. *yamlēḵ*–'may he (God) cause to reign']. A prince or chief of the tribe of Simeon (1 Ch. 4:34). If v. 41 refers to the preceding list, he lived at the time of Hezekiah.

JAMNIA jam'ni-ə. *See* JABNEEL **1.**

JAMNITES jam'nīts [Gk. *Iamnitais*] (2 Macc. 12:9, AV). The inhabitants of Jamnia, the ancient Jabneel, a town on the northern border of Judah near the sea. Its port and navy were burned by Judas Maccabeus.

JANAI jā'nī [Heb. *ya'nay*–'may he answer']. A chief of a family descended from Gad (1 Ch. 5:12; AV Jaanai).

JANGLING. An obsolete term used in 1 Tim. 1:6, AV, for Gk. *mataiología* (RSV "vain discussion"). Cf. *mataiológoi*, "empty talkers," in Tit. 1:10.

JANIM jā'nim [Heb. *yānîm*]; AV JANUM. A place in the Hebron uplands named with Eshan and Beth-tappuah (Josh. 15:53), possibly Beni Na'im, about 6 km. (4 mi.) E of Hebron.

JANNAI jan'ī [Gk. *Iannai*]; AV JANNA. An ancestor of Jesus in Luke's genealogy, the fifth before Joseph the husband of Mary (Lk. 3:24).

JANNES AND JAMBRES jan'əz, jam'brēz [Gk. *Iannēs kaí Iambrēs*]. Two Egyptian magicians or soothsayer priests who withstood Moses before Pharaoh. The names occur in the Bible only in 2 Tim. 3:8, although the incident referred to is undoubtedly that described in Ex. 7:11, 22, in which Pharaoh "called for the wise men and the sorcerers, and they also, the magicians of Egypt, did the same [as Moses and Aaron] with their secret arts." In both Jewish and Greek traditions the names Jannes and Jambres are given to two of these magicians.

I. Function.–The word "magicians" (Heb. *ḥarṭummîm*) occurs also in Gen. 41:8, 24 (grouped in v. 8 with *ḥ^{a}ḵāmîm*, "wise men"); Ex. 8:7, 18f. (MT 3, 14f.); and Dnl. 1:20 and 2:2 (grouped with *'aššāpîm*, "conjurers" or "enchanters," and *m^{e}ḵaššᵉpîm*, "sorcerers"). The root idea, although obscure in Hebrew, is probably to be connected with some aspect of occult knowledge, or scripts used in magical practices. The alternate translation, "soothsayer priest," probably best expresses the sense of the word in the Egyptian context.

II. Orthography.–The names Jannes and Jambres occur in a variety of Greek and Aramaic forms. Jannes, which is possibly a Grecized form of the Aram. *Yôḥānā'*, is reflected as *ynys* or *ywnys* (Tg. Ps. Jon.), *ywnws* (Yalkut Shimeoni), *ywḥn'* (T.B. *Menahoth*), *yḥnh* (CD 5:17-19), and *ywḥny* (Midr. *Ex. Rabba*). Jambres, the original of which is in doubt, occurs as *ymrys* or *ymbrys* (Tg. Ps. Jon.), *ywmbrys* (Midr. *Tanḥuma*), *mmr'* (T.B. *Menahoth*, Midr. *Ex. Rabba*), *Mambrēs* (Origen on Mt. 27:9), and the Latin *Mambre* (*Decretum* of Gelasium).

III. Rabbinic References.–Although the names do not occur in the OT, Philo, or Josephus, they are common in late Jewish rabbinical traditions. Tg. Ps. Jon. on Ex. 1:15 and 7:11 names both as the chief magicians who opposed Moses and Aaron. The tractate T.B. *Menahoth* 85a quotes Jannes' and Jambres' mocking Moses' and Aaron's attempt to do magic in Egypt, the home of such arts. Tg. Ps. Jon. on Nu. 22:22 considers the magicians servants of Balaam, while *Yalkut Shimeoni* on Ex. 2:15 makes them the sons of that soothsayer. In the Jerusalem Targum to Nu. 22:22 they escape with Balaam to Ethiopia, eventually fleeing that country to Egypt, where they become the chief of Pharaoh's magicians. *Yalkut Shimeoni* on Ex. 14:25 also attributes to Jannes and Jambres an attempt to destroy Israel during its passage through the Red Sea by restricting the power of the angelic beings who were holding back the waters. Another Jewish tradition (Midr. *Tanḥuma*) has them accompanying Israel's Exodus as part of the "mixed multitude" and makes them responsible for the instigation of the golden calf incident. Without doubt some of these confused legends, possibly collected in a now-lost book, were known and reflected in 2 Tim. 3:8.

IV. Non-Jewish References.–Jannes and Jambres, one or both, are mentioned by Pliny (*Nat. hist.* xxx.2.11; 1st cent. A.D.), Apuleius (*Apology* 90; 2nd cent. A.D.), and the Pythagorean philosopher Numenius (2nd cent. A.D. cited in Eusebius *Praep.ev.* ix.8), who refers to them as Egyptian *hierogrammateís*, "sacred scribes." In early Christian circles Origen (*Contra Celsum* iv.51) speaks of a history concerning Moses, Jannes, and Jambres, and elsewhere (on Mt. 27:9) cites the tradition of a "secret book which was written by Iamnes and Mambres." The sixth-century *Decretum Gelasianum* not only alludes to an apocryphal *Book of Jannes and Jambres (Mambre)*, but reinforces the legend that they eventually became penitents and joined the community of Israel. These traditions, like those of the Jews, are confused and no evidence of such a book remains.

JANNEUS jə-nē'əs [Gk. *Iannaios*]. The Hasmonean king and high priest of Judea (*ca.* 103-76 B.C.), also named Alexander, under whose imperialistic policies that kingdom enjoyed its greatest expansion. Although during his lifetime he ruthlessly crushed the bitter opposition of the Pharisees to his rule, after his death his wife and successor, Salome Alexandra, at Janneus's request, was friendly toward that sect and introduced Pharisaic rule.

See HASMONEANS; PHARISEES.

JANOAH jə-nō'ə [Heb. *yānô(a)ḥ* (with *hê* directive *yānôḥâ*)–'resting-place'] (Josh. 16:6f.); AV JANOHAH.

1. A town on the northern boundary of the tribal terri-

tory of Ephraim, between Taanath-shiloh and Ataroth. It has been identified with Khirbet Yānûn, 11 km. (7 mi.) SE of Shechem (*LBHG*, p. 236; *GTTOT*, p. 166) — but no explanation is offered for the identification. The form *yānôḥâ* in v. 6 is clearly with *hê* directive, but it cannot be in v. 7 (*miyyānôḥâ*, "from Janoah"), although the accent is penultimate.

2. A town in upper Galilee captured by Tiglath-pileser in 733/32 B.C. (2 K. 15:29). If the order of names is significant, Janoah was located between Abel-beth-maacah and Kedesh. Simons (*GTTOT*, § 932) rejects the suggestion of Janûḥ E of Tyre, which would mean "an impossible break in the line of cities enumerated," and identifies Janoah instead with Tell en-Nâ'imeh, 8 km. (5 mi.) NE of Kedesh. Tiglath-pileser's account mentions the conquest of Abel<ma>akka on the borderland of Bit-Ḫumri (Beth-Omri = Israel) (D. J. Wiseman, *Iraq*, 18 [1956], 117ff.; cf. *ANET*, pp. 283f.). W. S. L. S.

JANUM jā'nəm. *See* JANIM.

JAPHETH jā'fəth [Heb. *yepeṯ*, *yāpeṯ*; Gk. *Iapheth*] (Gen. 9:27). This name is the hiphil jussive of Heb. *pāṯâ*, "to open," and means "may God enlarge." Japheth had seven immediate descendants (Gen. 10:2; 1 Ch. 1:5-7), represented by the nations designated GOMER (perhaps the ancient Cimmerians who conquered Urartu before the 8th cent. B.C.), MAGOG (Asia Minor?), Madai (the MEDES), JAVAN (the Ionians and their descendants), TUBAL (most probably the Tabal in Cappadocia mentioned in ninth- and eighth-century-B.C. Assyrian sources), MESHECH (the Mushki, who came to the ancient Near East from the Russian steppes), and TIRAS (identification uncertain, but perhaps the Tursha, mentioned in the 13th cent. B.C. by Merneptah as a warlike northern people). The sons of Gomer were Ashkenaz (represented by the Scythians), Riphath (identified with a region in Anatolia), and Togarmah (probably the area surrounding the Anatolian city known in eighth-century-B.C. Assyrian sources as Til-Garimmu). The sons of Javan (Elishah, Tarshish, Kittim, and Dodanim) were the western division of the family that passed through Ionia and settled in the islands and coastlands of the Aegean (cf. Gen. 10:5). Elishah has been identified with Alashia in Cyprus, while Dodanim, which may be a corruption of Rodanim, can be identified with Rhodes.

In Gen. 9:27, as in other passages, Japheth is third in the enumeration of Noah's sons, but he is really regarded as the second son, Ham being the youngest. In the genealogical table (Gen. 10), however, the descendants of Japheth are given first, and those of Shem last, in order to set forth Semitic affinities at greater length. This ordering seems to indicate that the Jews knew the fair races and moreover were well disposed toward them, for Japheth was (ultimately) to dwell in the tents of Shem and therefore to take part in Shem's spiritual privileges.

Some connection between the Hebrew Japheth and the Greek giant-hero, Iapetos, father of Prometheus, who was regarded by the Greeks as the father of the human race, may exist, but is far from easy to establish. The original Hebrew record is much too early to permit any form of borrowing from Greek mythological sources, even if such were thought desirable. Yet the closeness of linguistic form between Heb. *yepeṯ*/*yāpeṯ* and Gk. *Iapetos* might indicate that the early Greeks borrowed the name from Near Eastern traditions regarding the existence of ancient peoples, since they adopted other elements of culture from Near Eastern sources.

See also HAM; SHEM; TABLE OF NATIONS.

T. G. PINCHES
R. K. H.

JAPHETH jā'fəth [Gk. *Iapheth*]. A region mentioned only in Jth. 2:25, where its southern borders are described as "fronting toward Arabia." We should not think of this area as being too far south, however, for Holofernes had just seized Cilicia (in southeastern Asia Minor) and had not yet attacked Damascus (v. 27).

JAPHIA jə-fī'ə [Heb. *yāpî(a)ʿ*; Gk. *Iephtha*].

1. King of Lachish, one of the five "kings of the Amorites" who formed an alliance in an expedition against Gibeon on account of its treaty with the Israelites (Josh. 10:3-5). After their rout by Joshua in the battle of Bethhoron (v. 10; *see* BETH-HORON, BATTLE OF), they fled and hid themselves in the cave at Makkedah (v. 16). As Joshua passed, he was informed of this, but, unwilling to delay his pursuit of the fugitives, he ordered great stones to be rolled into the mouth of the cave, leaving a guard in charge (vv. 17f.). On the completion of his victory, Joshua returned to Makkedah, commanded the Israelites to bring forth the imprisoned kings, and summoned the chiefs of his army to plant their feet upon their necks. Then he put them to death; and after he had hung their bodies on five trees, he ordered the Israelites in the evening to take them down and cast them into the cave (vv. 22-27).

2. [Gk. LXX *Iephies*, *Iaphie*]. One of the sons of David who were born to him at Jerusalem (2 S. 5:15; 1 Ch. 3:7; 14:6). J. CRICHTON

JAPHIA jə-fī'ə [Heb. *yāpî(a)ʿ*]. A town on the southern boundary of Zebulun named with Chisloth-tabor and Daberath (Josh. 19:12). It is represented by the modern Yâfā, about 2½ km. (1½ mi.) SW of Nazareth, near the foot of the hills. It was one of the places fortified by Josephus (*Vita* 45 [230]; 52 [270]; *BJ* ii.20.6 [573]).

See *EAEHL*, II, *s.v.* (D. Barag).

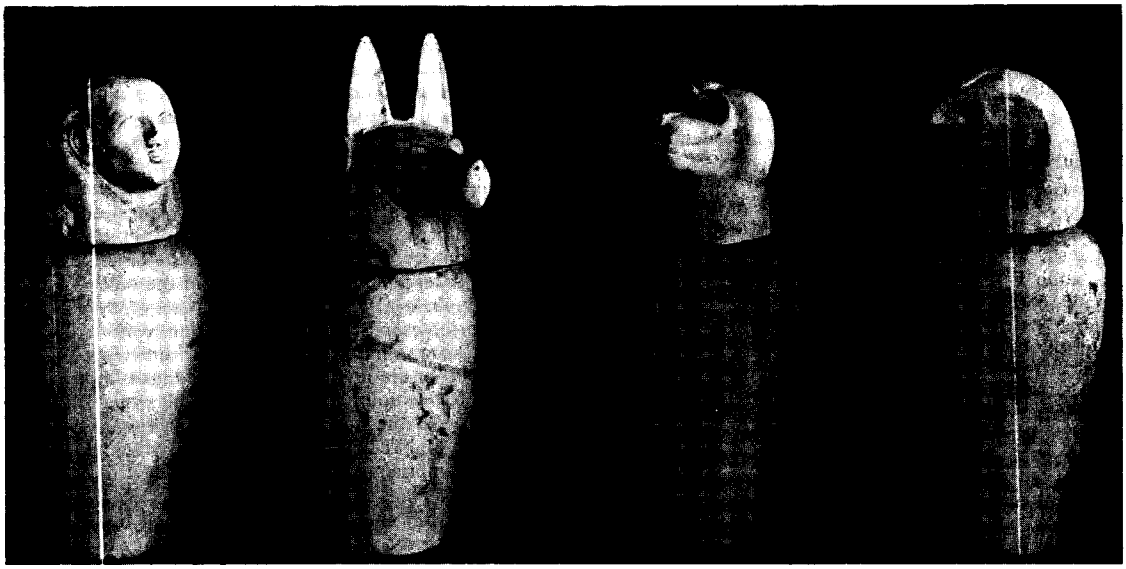
JAPHLET jaf'lit [Heb. *yaplēṭ*]. In 1 Ch. 7:32f., a son of Heber, an Asherite.

JAPHLETITE jaf'lə-tīt, jaf-lē'tīt [Heb. *yaplēṭî*] (Josh. 16:3); AV JAPHLETI. A clan said to border on the territory of Joseph.

JAPHO jā'fō (Josh. 19:46, AV). *See* JOPPA.

JAR. Most of the vessels in antiquity were made of fired clay, and the jars mentioned in the Bible are no exception. Only rarely was stone, metal, glass, or alabaster used.

I. In the OT.–There are several Hebrew terms that refer to jars of different sizes, shapes, and uses. Not all of these terms can be connected with archeological finds. Heb. *nēḇel* refers to a large storage jar (Jer. 13:12; AV "bottle"; NEB "wine-jars") about 0.6 m. (2 ft.) high that held about 29 l. (5½ gals.). Only about half as large as the *nēḇel* was the *kaḏ*, which served as a water jar (Gen. 24:14-46; NEB "water-jug," "[water-] jar") or a storage jar for flour (1 K. 17:12). The mouth was big enough to allow removal of a handful of flour but small enough to be covered with a large potsherd, stone, small bowl, or lid. Thus the *kaḏ* was smaller than a "barrel" (AV, 17:14, 16; 18:33 [MT 34]). Heb. *ṣappaḥaṯ* apparently denotes two different vessels. One was a water canteen or pilgrim flask made for travelers or soldiers. The mouth of the canteen allowed for quick and easy drinking and could be easily stoppered for traveling. This is probably the meaning of 1 S. 26:11f., 16 (NEB "water-jar"); here David takes the *ṣappaḥaṯ* from Saul, who is chasing him (cf. 1 K. 19:6; NEB "pitcher"). On the other hand, the *ṣappaḥaṯ* in 1 K. 17:12 (RSV "cruse") was most likely an oil juglet (*see* CRUSE). These juglets ranged from 7.5 to 15 cm. (3-6 in.) in height. The *baqbuq*



Set of limestone canopic jars (7th-6th cents. B.C.) from Medinet Habu, used to hold the viscera of the mummy with whom they were buried (Royal Ontario Museum, Toronto)

Polychrome glazed pottery jar (ca. 800 B.C.) showing a kneeling bull, from Zawiyeh, about 240 km. (150 mi.) E of Nineveh (Royal Ontario Museum, Toronto)

was an expensive decanter with a narrow neck that aerated the water as it was poured for drinking. This produced a gurgling sound that may have led to the name *baqbuq*. The vessel was also used for honey and water (1 K. 14:3; NEB "flask"). Two terms occur only once each in the OT. The first, *'āsûḳ*, refers to a jar used to store oil (2 K. 4:2; NEB "flask"). This jar had a special spout with a small hole, making it easy to fill all kinds of jars, especially small oil juglets. The other term, *ṣinṣenet*, indicates a container for manna (Ex. 16:33); the size and shape are uncertain.

In Jgs. 7:8 the term *ṣēḏâ* means "provisions," but the RSV and NEB read *kaddê* and translate "jars." The support of the versions for "provisions," however, makes it improbable that "jars" is correct (R. G. Boling, *Judges* [*AB*, 1975], p. 146).

II. In the NT.–The Gk. term *hydría*, a cognate of *hýdōr*, "water," denotes a water jar. In Jn. 2:6f. the term refers to large stone jars holding 75 or 115 l. (20 or 30 gals.) each. In Jn. 4:28, however, the jar is probably smaller since it was most likely carried. The term *kerámion* is qualified as a jar of water (*hýdōr*) (Mk. 14:13 par. Lk. 22:10). The term *alábastros* refers to a small alabaster juglet (Mt. 26:7 par. Mk. 14:3; NEB "small bottle"). Alabaster was reserved for expensive perfumes (*see* ALABASTER).

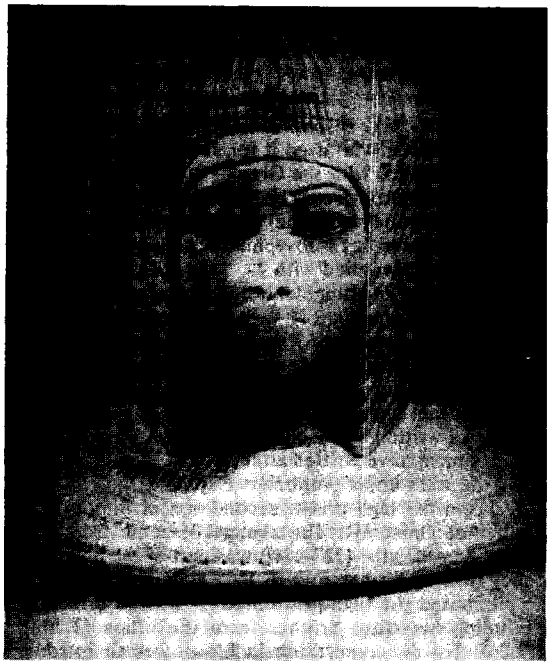
Bibliography.–R. Amiran, *Ancient Pottery of the Holy Land* (1970); J. L. Kelso, *Ceramic Vocabulary of the OT* (*BASOR Supp. Studies*, 5–6, 1948).

J. C. MOYER

JARAH jā'rə [Heb. *ya'râ*–'honeycomb'(?); Gk. *Iada* (= Heb. *ya'dâ*)]. A descendant of King Saul (1 Ch. 9:42). Some Hebrew MSS have *ya'dâ*, and it should probably be accepted as the correct reading, for *ya'dâ* is linguistically the same as *y'hô'addâ* (Jehoaddah, 1 Ch. 8:36; Gk. *Iada*).

JAREB jā'rəb, jär'əb [Heb. *yārēḇ*–'let him contend'; Gk. *Iareim*]. The name given to an Assyrian king who received tribute from Israel (AV Hos. 5:13; 10:6).

A. H. Sayce (*Higher Criticism and the Monuments* [1895], pp. 416f.) thinks it was the original name of Sargon II, the usurper who succeeded Shalmaneser V after his death in 723/722 B.C., and who took the name of "one of the most



Alabaster lid of a canopic jar in the shape of a queen's head, from the Valley of the Kings near Thebes, *ca.* 1350 B.C. (Egyptian Museum, Cairo)

illustrious of Babylonian monarchs." But it seems likely that Hosea's prophecies were delivered earlier than 722. A more probable suggestion is that Jareb is simply a scornful nickname for a king who would prove a scourge rather than an ally, e.g., "king Combat" (Farrar), "king Fighting-cock" (Guthe), "king Contentious" (American-Jewish version), or "king Pick-Quarrel" (G. A. Smith). Another suggestion is "the great king," reading Heb. *mlky rb* instead of *mlk yrb* (W. M. Müller, *ZAW*, 17 [1897], 334; cf. Moffatt, RSV, NEB), or "high king," reading *mlk rm* (following LXX). Cheyne would amend to read "king of Arabia." (For other suggestions see W. R. Harper in *ICC*.)

The historical reference may be to the attempt by Menahem of Israel to win over Tiglath-pileser in 738 B.C. (2 K. 15:19). Wellhausen, however, inserted the name "Judah" in Hos. 5:13 to complete the parallelism; and if this is accepted the reference would probably be to the bribe offered to Tiglath-pileser by Ahaz of Judah in 734 B.C. (2 K. 16:7f.). On the other hand, the reference may simply be to the general tendency of Israel and Judah to seek foreign aid instead of relying on Yahweh.

J. G. G. NORMAN

JARED jā'rəd, jär'əd [Heb. *yereḏ*–'descent'; pausal form *yāreḏ* (Gen. 5:15; 1 Ch. 1:2); Gk. *Iared*]; AV JERED (1 Ch. 1:2). In Gen. 5:15-20; 1 Ch. 1:2; Lk. 3:37, son of Mahalaleel and father of Enoch.

JARESIAH jär-ə-sī'ə (1 Ch. 8:27, AV). *See* JAARESHIAH.

JARHA jär'hə [Heb. *yarḥā'*]. An Egyptian slave of Sheshan, about Eli's time, who married his master's daughter and became the founder of a house of the Jerahmeelites (1 Ch. 2:34f.).

JARIB jā'rib, jär'ib [Heb. *yārîḇ*–'he contends,' or 'takes [our] part,' or 'conducts [our] case'].

1. In 1 Ch. 4:24, a son (clan) of Simeon, the same as Jachin of Gen. 46:10; Ex. 6:15; Nu. 26:12.

2. In Ezr. 8:16, one of the "chief men" for whom Ezra sent, and dispatched by him to Casiphia to fetch ministers for God's house (1 Esd. 8:44; AV Joribas; NEB Joribus).

3. In Ezr. 10:18, a priest who had married a foreign wife (1 Esd. 9:19; AV, NEB, Joribus).

JARIMOTH jär'ə-moth (1 Esd. 9:28, AV, NEB). *See* JEREMOTH 7.

JARMUTH jär'muth [Heb. *yarmûṯ*].

1. A city of the Canaanites in the Shephelah of Judah (Josh. 15:35) whose king Piram joined the league of the five kings in an attempt to stop Joshua's invasion (Josh. 10:3-5). They were defeated at Gibeon and executed at Makkedah (Josh. 10:3-5, 22-27; 12:11). After the Exile, Jarmuth was occupied by remnant Jews (Neh. 11:29). The site of this once important place is Khirbet Yarmûk, about 13 km. (8 mi.) NNE of Eleutheropolis (Beit Jibrîn).

2. [Heb. *yarmûṯ*; LXX B *Remmath*, A *Iermōth* (Josh. 21:29); in the duplicate list (1 Ch. 6:73 [MT 58]) Heb. *rā'môṯ*; Gk. *Ramōth* (6:65); in Josh. 19:21 Heb. *remeṯ* occurs in the list of the cities of Issachar; Gk. B *Remmas*, A *Ramath*]. A town of Issachar, probably to be identified with REMETH of Josh. 19:21 and RAMOTH of 1 Ch. 6:73.

See *EAEHL*, II, *s.v.* "Jarmuth, Tel" (A. Ben-Tor).

K. G. JUNG

JAROAH jə-rō'ə [Heb. *yārô(a)ḥ*]. A Gadite chief (1 Ch. 5:14).

JASAEL jā'sə-əl (1 Esd. 9:30, AV). *See* SHEAL.

JASHAR, BOOK OF [Heb. *sēper hayyāšār*]; AV BOOK OF JASHER, mg. THE BOOK OF THE UPRIGHT. The title of an ancient collection of Hebrew literary material, referred to as though it were a familiar source. Two quotations were made from it in the OT: (1) Josh. 10:12-14, in which the sun and moon were commanded to stand still; (2) 2 S. 1:18-27, the "song of the bow" or lament of David over Saul and Jonathan. Some scholars have suggested a third extract in 1 K. 8:12, "Then Solomon said, 'The Lord has set the sun in the heavens, but has said that he would dwell in thick darkness.'" The LXX quotes Yahweh's words (LXX v. 53) as "written in the book of the song" (Gk. *en biblíǭ tḗs ōdḗs*), and scholars have suggested that the words "the song" (Heb. *haššîr*) might easily be a corruption of Heb. *hayyāšār*. A similar confusion ("song" for "righteous") may explain the fact that the Syriac Peshitta of Joshua has for a title "the book of praises or hymns."

The book seems to have been a collection of poetry which probably included epics and religious songs. In 2 S. 1:18 the RSV "it" and the NEB "this dirge" unfortunately replace the MT "the bow," the title of the lament composed by David on the occasion of Saul's death and taken from the body of the poem. The AV mg. reading, "the ode of the bow," while nearer to the sense of the MT, still failed to see the use of "bow" as the title. The use of a word in the body of a poem as the title of the composition is a familiar Arabic poetic convention, as illustrated by the suras of the Koran. The term "Jashar," which is the Hebrew adjective "upright," has led some scholars to suppose that the collection either honored individual heroes or reflected the character of Israel as the upright nation in the ancient Near East.

The provenance of the work has been the topic of considerable discussion. The comparatively poor state of preservation of the OT quotations indicates the antiquity of

the material itself. There can be no doubt about the authenticity of the extracts from the work. Their linguistic affinities suggest that the book originated in the late Amarna period; additions were made at least until the time of Solomon. It seems to have had some affinity with the Book of the Wars of the Lord (Nu. 21:14), and both compositions may have commenced at approximately the same time. Some scholars have conjectured that the Book of Jashar contained such poems as the Song of Deborah (Jgs. 5) and the Song of Miriam (Ex. 15:21), but this cannot be proved.

See J. A. Montgomery, comm. on Kings (*ICC*, 1951), pp. 189ff. J. ORR R. K. H.

JASHEN jā'shən [Heb. *yāšēn*]. Seemingly the father of some of David's thirty mighty men (2 S. 23:32f.). The MT reads "Eliahba of Shaalbon, the sons of Jashen, Jonathan, Shammah the Hararite. . . ." 1 Ch. 11:33f. has "Eliahba of Shaalbon, the sons of Hashem the Gizonite, Jonathan the son of Shagee the Hararite. . . ." It is clear that "sons of" is a dittography of the last three consonants of the previous word. The LXX Lucian in 2 Samuel and 1 Chronicles has Gk. *ho Gouni*, "the Gunite," for "the Gizonite," perhaps correctly (cf. Gen. 46:24; Nu. 26:48 for "Guni," "Gunite"). 2 S. 23:32 may be corrected thus: "Eliahba of Shaalbon, Jashen the Gunite, Jonathan the son of Shammah the Hararite." Jashen thus becomes one of the thirty, the same as Hashem of 1 Ch. 11:34. D. F. ROBERTS

JASHER jā'shər, **BOOK OF** (AV Josh. 10:14; 2 S. 1:18). *See* JASHAR, BOOK OF.

JASHOBEAM jə-shō'bē-əm [Heb. *yāšoḇ'ām*]. Jashobeam is mentioned in three passages (1 Ch. 11:11; 12:6 [MT 7]; 27:2f.), but opinions vary about the number of persons referred to. In 1 Ch. 11:11 he is called "a Hachmonite" (reference unknown) and "chief of the three" ("three," the best reading, RSV, NEB; AV, "captains"), mighty men of David. He is said to have slain three hundred (eight hundred in 2 S. 23:8) at one time, i.e., one after another. In the parallel passage (2 S. 23:8) he is called, "Josheb-basshebeth, a Tah-chemonite." This verse, however, is probably corrupt, and the text should be corrected in accordance with 1 Chronicles to "Ishbaal, the Hachmonite." In 1 Ch. 27:2f. Jashobeam is said to have been "the son of Zabdiel," of the family of Perez, and the commander-in-chief of the division of David's army which did duty the first month. The army consisted of twelve divisions of 24,000 each, each division serving a month in turn. In 1 Ch. 12:6 (MT 7) Jashobeam is mentioned among those who joined David at Ziklag in the time of Saul, and is described as a Korahite, probably one belonging to a family of Judah (cf. 2:43). J. CRICHTON

JASHUB jā'shəb [Heb. *yāšûḇ*, *yāšîḇ* in 1 Chronicles, but *Q yāšûḇ*–'may he return'].

1. In Nu. 26:24; 1 Ch. 7:1, a son of Issachar. Gen. 46:13 has incorrectly Iob (cf. LXX *Iasoub*).

2. In Ezr. 10:29; 1 Esd. 9:30 (AV, NEB, Jasubus), one of those who had married foreign wives.

3. In Isa. 7:3, part of the name SHEAR-JASHUB.

JASHUBI-LEHEM jə-shōō'bī-lē'hem [Heb. *yāšuḇî-leḥem*]. A name in 1 Ch. 4:22 read as such by AV, but changed in the RSV to "and returned to Lehem," based upon a slight difference in the pointing of the first word. The NEB, following some commentators, inserted *bêṯ* between the two words and rendered the phrase "came back to Bethlehem."

JASHUBITES jā'shə-bīts [Heb. *hayyāšuḇî*; collective]. In Nu. 26:24, descendants of JASHUB.

JASIEL jā'zə-əl (1 Ch. 11:47, AV, NEB). *See* JAASIEL.

JASON jā'sən [Gk. *Iasōn*]. A common name among the Hellenistic Jews, who used it for Jesus or Joshua, probably connecting it with the Greek vb. *iásthai* ("heal").

1. Son of Eleazar, sent (161 B.C.) by Judas Maccabeus with other deputies to Rome "to establish friendship and alliance" (1 Macc. 8:17; Josephus *Ant.* xii.10.6 [417]), and perhaps to be identified with **2.**

2. The father of Antipater who went as ambassador of Jonathan to Rome in 144 B.C. (1 Macc. 12:16; 14:22; Josephus *Ant.* xiii.5.8 [169]).

3. Jason of Cyrene, a Jewish historian, who is known only from what is told of him in 2 Macc. 2:19-23. 2 Maccabees is in fact simply an abridgment in one book of the five books written by Jason on the Jewish wars of liberation. He must have written after 162 B.C., as his books include the wars under Antiochus Eupator.

4. Jason the high priest, second son of Simon II and brother of Onias III. The change of name from Jesus (Josephus *Ant.* xii.5 [237-264]) was part of the hellenizing policy favored by ANTIOCHUS IV EPIPHANES from whom he purchased the high-priesthood by a large bribe, thus excluding his elder brother from the office (2 Macc. 4:7-26). He did everything in his power to introduce Greek customs and Greek life among the Jews. He established a gymnasium in Jerusalem, so that even the priests neglected the altars and the sacrifices, and hastened to be partakers of the "unlawful proceedings" in the palaestra. The writer of 2 Maccabees calls him "ungodly" and "vile." He even sent deputies from Jerusalem to Tyre to take part in the worship of Hercules; but what he sent for sacrifices, the deputies expended on the "construction of triremes." After three years of this hellenizing work he was replaced in 172 B.C. by MENELAUS, who gave a large bribe for the high priest's office. Jason took refuge with the Ammonites; on hearing that Antiochus was dead he tried with some success to drive out Menelaus, but ultimately failed (2 Macc. 5:5-10). He took refuge with the Ammonites again, and then with Aretas, the Arabian, and finally with the Lacedaemonians, where he hoped for protection "because of their kinship," but there "he met a miserable end."

J. HUTCHISON

5. The host of the apostle Paul during his stay in Thessalonica (Acts 17:5-9). During the uproar organized by the Jews, who were jealous of the success of Paul and Silas, Jason and several other "brethren" were severely attacked by the mob. When the mob failed to find Paul and Silas, they dragged Jason and "some of the brethren" before the politarchs, accusing Jason of treason in receiving into his house those who said "there is another king, Jesus." The magistrates, being disturbed at this charge, took security from them and let them go.

The immediate departure of Paul and Silas seems to show that security was given so that the strangers would leave the city and remain absent (*see* PLEDGE).

6. Jason was one of the companions of Paul who united with him in sending greetings to the Roman Christians (Rom. 16:21). He is probably the same person as **5.** Paul called him a kinsman, which means a Jew (cf. Rom. 9:3; 16:11, 21). S. F. HUNTER

JASPER. *See* STONES, PRECIOUS.

JASUBUS jə-sōō'bəs (1 Esd. 9:30, AV, NEB). *See* JASHUB **2.**

JATAL jā'təl (1 Esd. 5:28, AV). *See* ATER.

JATHAN jā'thən [Gk. *Iathan*; LXX A *Nathan*]; NEB NATHAN. For "Jonathas" (AV), which is the Latin form for the Heb. "Jonathan." Jonathan was brother of Ananias and "son of the great Shemaiah" (Tob. 5:13 [LXX 14]).

JATHNIEL jath'ni-əl [Heb. *yaṯnî'ēl*]. Fourth son of Meshelemiah, a Korahite (1 Ch. 26:2), who was one of the gatekeepers of the sanctuary.

JATTIR jat'ər [Heb. *yattîr*]. A Levitical town (Josh. 21:14; 1 Ch. 6:57 [MT 42]) in the hill country of Judah midway between Hebron and Beer-sheba, mentioned with Shamir and Socoh (Josh. 15:48). After his victory over the Amalekites David sent a present from the booty to the inhabitants of Jattir (1 S. 30:27). The site is now known as Khirbet ʿAttîr, about 21 km. (13 mi.) SW of Hebron.

D. J. WIEAND

JAUDI jə-ōō'dē, jou'dē [Heb. *yᵉhûḏâ*] (2 K. 14:28, NEB); AV, RSV, JUDAH. The phrase in the MT, *lîhûḏâ bᵉyiśrā'ēl*, literally "to Judah in Israel," poses a twofold problem, namely, the meaning of the prepositions, and the variance from known history. The Syriac version, sensing the difficulties, omits "to Judah" and reads instead *lᵉyiśrā'ēl*, "to Israel." Both the AV and RSV emend the text to read that Jeroboam recovered "for Israel" what had belonged "to Judah." Keil sees *lîhûḏâ* as a periphrastic form of the genitive, "of Judah," so that the meaning of the clause is "whatever in the two kingdoms of Damascus and Hamath had formerly belonged to Judah in the times of David and Solomon" (cf. RSV). As the text stands, a cooperative dominance of Judah and Israel over Damascus and Hamath may be indicated, in which case, Gray thinks, it is strange that Chronicles would be silent about such a resurgence of Judah's power (*I & II Kings* [*OTL*, 2nd ed. 1970], pp. 616f.). The NEB emendation, "Jaudi," refers to a small city-state in north Syria that, in alliance with Hamath, rebelled against Tiglath-pileser III in 738 B.C. (*see* YA'UDI).

G. WYPER

JAVAN jā'vən [Heb. *yāwān*; Gk. *Iōvan, Iaōn, Hellas, hoi Hellēnes*]. A son of Japheth son of Noah (Gen. 10:2; 1 Ch. 1:5), and father of Elishah, Tarshish, Kittim, and Rodanim (Rhodes or Dodanim, Gen. 10:4; 1 Ch. 1:7). The name is listed among the Ionian islands, probably referring to Javan's "descendants" Cyprus (Isa. 66:19; Ezk. 27:13; cf. the pl. in Joel 3:6 [MT 4:6]); and the Hebrew refers to the Greeks or Macedonians in Dnl. 8:21; 10:20; and 11:2. The term appears in the MT of Ezk. 27:19, followed by the AV; but the LXX reads "and wine" (end of v. 18), which is adopted by the RSV and NEB (*see* DAN AND JAVAN). The Javanites are viewed as enemies of Judah, particularly because of their involvements in slave trading (Joel 3:6; Ezk. 27:13); and in Zec. 9:13 their judgment is announced ("Greece"; NEB omits).

The term is known in other ancient literature. The *Yevana* or Ionians were aligned with the Hittites against Ramses II. In the Amarna Letters *yivana* seems to equal Tyre, while in the Persian records from the time of Darius *yauna* equals the Ionians of Asia Minor. *See also* GREECE.

See J. Skinner, comm. on Genesis (*ICC*, 2nd ed. 1930), pp. 196-98.

G. L. BORCHERT

JAVELIN. *See* WEAPONS OF WAR.

JAW [Heb. *lᵉḥî, malqô(a)ḥ*]. The term *lᵉḥî* designated one of the two osseous structures from which the teeth grow and which constitute the framework of the mouth. The dual form *malqôḥayim* denoted both upper and lower maxillae (Ps. 22:15 [MT 16]). In Job 41:2 (MT 40:26) God asked Job if he were able to pierce the jaws of Leviathan (Heb. "the crocodile") with a fishhook, implying that he could not. The expression "to place on the jaws of the people" (Isa. 30:28) was used figuratively to describe the ultimate check of the Assyrian military power at Jerusalem. The taming of an adversary was alluded to metaphorically in Ezk. 29:4 (of Pharaoh) and 38:4 (of Gog). God's gentleness with regard to human trials and difficulties was the subject of the reference in Hos. 11:4. In Jgs. 15:15-17, Samson used the fresh (NEB "all raw") jawbone of an ass as a weapon against his Philistine opponents; the place name Ramath-lehi, "the hill of the jawbone," commemorated this event.

R. K. H.

JAZER jā'zər [Heb. *yaʿzēr, yaʿᵃzêr*]; AV also JAAZER. The RSV follows the LXX in reading Jazer (Gk. *Iazēr*) in Nu. 21:24 (AV "strong" [Heb. *ʿaz*]; NEB "difficult"). A fortified Amorite city N of Heshbon, not far from ʿAmmân in the land of Moab. Eusebius (*Onom.*) and Jerome speak of an Azer or Iazer about 16 km. (10 mi.) W of ʿAmmân. It may be Khirbet Jazzir, near es-Salt. The Amorites, Israelites, Moabites, and Ammonites all contested for possession of it.

After the defeat of Sihon king of the Amorites, Moses sent spies to scout Jazer and subsequently captured the town (Nu. 21:32). The region surrounding Jazer was so well suited for cattle grazing that the tribes of Reuben and Gad requested it (Nu. 32:1-5). Gad received it and the men of Gad fortified it. Later it was assigned to the Merarite levitical family (Josh. 21:39; 1 Ch. 6:81 [MT 66]). It lay in a district that was noted for its luxuriant grapevines and fruit trees (Isa. 16:8f.; Jer. 48:32).

During the reign of David, troops from Hebron (1 Ch. 26:31) were stationed in Jazer to protect the area against an attack from the Ammonites. After the death of Ahab (853 B.C.) Mesha king of Moab conquered the whole area, and Jazer is referred to in Isaiah and Jeremiah as a Moabite city. Later the Ammonites took it, and finally it was retaken for Israel in the Maccabean era by Judas Maccabeus (1 Macc. 5:8).

F. E. YOUNG

JAZIZ jā'ziz [Heb. *yāzîz*]. The Hagrite who was over David's flocks (1 Ch. 27:30 [MT 31]).

JEALOUS [Heb. *qannā'* (Ex. 20:5; 34:14; Dt. 4:24; 5:9; 6:15), *qannô'* (Josh. 24:19; Nah. 1:2)]; **JEALOUS WRATH** [Heb. *qin'â*] (Ps. 79:5; Ezk. 36:6; Zeph. 1:18; 3:8); AV JEALOUSY; NEB JEALOUSY, ANGER; **BE JEALOUS** [Heb. piel of *qānā'* (Gen. 37:11; Nu. 11:29; 1 K. 19:10, 14; etc.); Gk. *zēlóō* (Acts 7:9; 17:5; 1 Cor. 13:4)]; AV also ENVY, ZEALOUS (Nu. 25:11, 13); NEB also SUSPECT (Nu. 5:14, 30), ZEAL, etc.; **MAKE JEALOUS** [Gk. *parazēlóō*] (Rom. 10:19; 11:11, 14); AV PROVOKE TO JEALOUSY; NEB also STIR ENVY; **JEALOUSY** [Heb. *qin'â* (Nu. 25:11; Job 5:2; Prov. 6:34; 27:4; Ezk. 8:3, 5; etc.); Gk. *zēlos* (Acts 5:17; 13:45; Rom. 13:13; 1 Cor. 3:3; 2 Cor. 11:2; 12:20; Gal. 5:20; Jas. 3:14, 16)]; AV also ZEAL (Ezk. 5:13), ENVY, ENVYING; NEB also RESENTMENT (Dt. 29:20), etc.; **JEALOUSLY** [Gk. *prós phthónon*] (Jas. 4:5); AV UNTO ENVYING; NEB TOWARDS EVIL DESIRES. Jealousy is the intense emotion aroused by the infringement of one's right (or presumed right) to exclusive possession or loyalty.

I. Terminology
   A. In the OT
   B. In the NT

II. Varieties of Usage
  A. In the OT
    1. God's Jealousy
    2. Human Jealousy
  B. In the NT
    1. Pauline Literature
    2. Acts
    3. James

I. Terminology.–The Eng. "jealousy" derives from Gk. *zēlos*, the same root from which Eng. "zeal" derives. The Hebrew and Greek vocabularies do not distinguish, as modern English does, between these two intense emotions. In the English versions, only the context determines whether Heb. *qin'â* and Gk. *zēlos* are to be translated as "zeal" or "jealousy." *See also* ZEAL.

A. In the OT. All the Hebrew terms translated by "jealous" or "jealousy" come from the root *qn'*, which ranges in meaning from "be zealous for" to "be envious of." Frequently the Hebrew terms refer to a righteous or godly jealousy (e.g., the intensive nominal forms *qannā'* and *qannô'* are used only in reference to God's jealousy); both the noun *qin'â* and the verb *qānā'*, however, are also used of sinful human jealousy.

B. In the NT. The NT derived its vocabulary for "jealousy" from the LXX, which generally translated Heb. *qn'* by Gk. *zēlóō* and cognates. Thus *zēlos*, like *qin'â*, etc., can refer to a "divine jealousy" (2 Cor. 11:2). More often, however, it refers to a sinful emotion that is linked with other sins such as *éris* (quarreling), *thýmos* (hostility), and *phthónos* (envy) (cf. 2 Cor. 12:20; Gal. 5:20f.).

In Jas. 4:5 the RSV renders Gk. *prós phthónon* as "jealousy." The text is problematic, because elsewhere *phthónos* always designates the negative emotion of envy — never the divine jealousy sometimes designated by *zēlos*. The NEB attempts to resolve this problem by taking *tó pneúma* ("spirit") as the subject — rather than the object — of the verb, and rendering *phthónos* with its usual negative sense.

II. Varieties of Usage.–A. In the OT. 1. God's Jealousy. Repeatedly in the OT, Yahweh is described as a "jealous God" (e.g., "I the Lord your God am a jealous God," Ex. 20:5; cf. Dt. 4:24; 5:9; 6:15; Josh. 24:19; etc.). In addition, there are numerous references to Yahweh's jealous wrath (e.g., Ps. 79:5) and to His being provoked to jealousy (e.g., Ps. 78:58). Several things about this prominent OT theme deserve notice.

(1) It is important to recognize that the description of Yahweh as jealous is an anthropomorphism, i.e., it is the attribution to God of a human emotion. It should therefore not be assumed that Yahweh's jealousy is identical with the human emotion of jealousy. The analogy between divine and human jealousy lies in the demand for exclusive possession or devotion.

(2) The term is used in the context of the covenantal relationship between Yahweh and Israel (*see* COVENANT [OT]). As Israel's sovereign, Yahweh had a right to demand His people's exclusive loyalty. This was the first and most basic stipulation of the covenant (cf. the first commandment: "You shall have no other gods before me," Ex. 20:3). Nonetheless, the OT records Israel's perpetual lapses into idolatry, and it was this unfaithfulness that provoked Yahweh's jealous wrath (cf. Nu. 25:3, 11; Dt. 29:18-20; 32:16, 21; 1 K. 14:22f.; Zeph. 1:18; 3:8; cf. also Ezk. 8:3, 5, where the idol in Ezekiel's vision is called "the image of jealousy" because it provoked Yahweh to jealousy). Frequently the metaphor of a marriage was used to describe the relationship between Yahweh and His people, with Yahweh depicted as the jealous husband and Israel as the adulterous wife (cf. Ezk. 36:41f.). There is another side, however, to Yahweh's *qin'â*, namely, His jealousy *for* His covenant people, which is expressed in pity and zeal for Israel's renewal and results in judgment upon Israel's enemies and the restoration of Jerusalem (e.g., Ezk. 36:5-7; 38:18f.; 39:25; Joel 2:18f.; Zec. 1:14-17; 8:2f.).

(3) Yahweh's claim to the exclusive allegiance of His people arises out of His unique nature as the only true God, the sovereign Lord of all creation. No other gods can rival Him; thus Yahweh alone is deserving of His creatures' exclusive and wholehearted devotion (cf. Pss. 95–97, etc.; Dt. 6:4f.). Yahweh's jealousy is an expression of His holiness (cf. Josh. 24:19; Ezk. 39:25). His very name is Jealous (Ex. 34:14).

2. Human Jealousy. In the OT human jealousy may be either a positive or a sinful emotion, depending upon whether it represents a selfless concern for another's due, or a selfish demand for exclusive possession of something to which one has no exclusive right.

Jealousy as a positive emotion is illustrated by the priest Phinehas, described by Yahweh as "jealous with my jealousy" (Nu. 25:11-13). Similarly, Elijah, after his confrontation with the priests of Baal on Mt. Carmel, described himself as having been "very jealous for the Lord" (1 K. 19:10, 14). A selfless — though misguided — jealousy is also displayed by Joshua in his devotion to Moses (Nu. 11:29). This type of jealousy is practically synonymous with zeal. (*See also* ZEALOTS.)

The husband's exclusive right to his wife's sexual faithfulness was recognized by Mosaic law. Thus, a wife who was suspected of adultery was required to undergo an ordeal in which she drank "water of bitterness" (i.e., holy water mixed with dust from the floor of the tabernacle) while holding the "cereal offering of jealousy" (Nu. 5:11-31). *See* ADULTERY II.

The OT contains many examples of sinful jealousy. In only a few instances does the term "jealousy" appear. The sons of Jacob were jealous of their brother Joseph because of his dreams (Gen. 37:11; also vv. 19f.; cf. Acts 7:9). Dathan and Abiram rebelled against Moses because they were jealous of his position of leadership (Ps. 106:16-18; cf. Nu. 16:1-40). Bitter jealousy divided the northern kingdom (Ephraim) from the southern kingdom (Judah); but Isaiah prophesied of a time when this jealousy would be broken down and the two kingdoms reunited (Isa. 11:13). Wisdom literature warned of the destructiveness of jealousy, both for the one possessed by the emotion (e.g., Job 5:2) and for the one who provoked it (e.g., Prov. 6:34; 27:4; Cant. 8:6).

B. In the NT. The use of jealousy in the NT, as in the OT, denotes both a godly and a sinful emotion.

1. Pauline Literature. Most occurrences of *zēlóō* and cognates in the NT are found in Paul's letters. In Rom. 10:19; 11:11, 14, jealousy is mentioned as Paul describes God's inclusion of the Gentiles in His redemptive plan. The jealousy of Israel at the sight of gentile redemption has the intended purpose of leading some Jews to faith in the gospel (11:14). Thus, God is seen to be using human jealousy for a divine purpose — the expansion of redemption to worldwide proportions. In the catechetical section of Rom. 13:8-14, jealousy is listed with other vices to be avoided. Jealousy is likewise termed a "work of the flesh" in Gal. 5:20. The sinful manifestation of "jealousy and strife" among the Corinthians was a result of their divisive attitude (1 Cor. 3:3; cf. 1:12). In condemning the participation of the Corinthians in meals sacrificed to idols, Paul asks the rhetorical question, "Shall we provoke the Lord to jealousy?" (10:22), a question based on the many statements of God's divine jealousy for His people in the OT

(cf. Dt. 32:16f.). Love, the paragon of Christian virtues, "is not jealous" (1 Cor. 13:4). Paul feared finding jealousy and other sinful attitudes when he returned to Corinth (2 Cor. 12:20), and he described his concern for the Corinthians (11:2) as a "divine jealousy" (*theoú zḗlō*).

2. Acts. In several instances in Acts, the jealousy of the Jewish religious leaders was aroused when early Christian preaching threatened to make converts of numerous Jewish laymen and proselytes (5:12-18; 17:1-15). In 7:9, Stephen recounted the jealousy of Joseph's brothers.

3. James. James uses *zḗlos* twice: in 3:14f. "bitter jealousy" (*zḗlon pikrón*) is termed an "earthly wisdom," and in 3:16, the presence of "jealousy and selfish ambition" is said to lead to "disorder and every vile practice." As was noted above, the phrase *prós phthónon* in 4:5 is one of several ambiguities in this verse, which may be best rendered by the NEB, "the spirit which God implanted in man turns towards envious desires" (see comms. by J. Adamson [*NICNT*, 1976], pp. 170-73; C. L. Mitton, *Epistle of James* [1966], pp. 153-56; M. Dibelius [Eng. tr., *Hermeneia*, 1976], pp. 220-24).

JEALOUSY, IMAGE OF. *See* IDOL.

JEARIM jē'ə-rim, **MOUNT** [Heb. *har yᵉʿārîm*–'mountain of forests'; LXX *pólin Iarim*–'city of Jarim']. A mountain or hill on the northern border of the area given to Judah after the Conquest (Josh. 15:10). It is identified with the city of CHESALON and mentioned with Mt. Ephron (v. 9) and Mt. Seir (v. 10), both of which were probably hilltops in the forested regions between Jerusalem and Beth-shemesh (*LBHG*, p. 235).

J. E. H.

JEATHERAI jē-ath'ə-rī [Heb. *yᵉʾāṯray*]; AV JEATERAI. A descendant of Gershom son of Levi (1 Ch. 6:21 [MT 6]), and probably an ancestor of Asaph. In 1 Ch. 6:41 (MT 26) the form ETHNI appears to be a scribal variation.

JEBEL jeb'əl [Arab. *ǧabal*–'mountain']. A word often used with the names of mountains or mountain ranges (e.g., Jebel eṭ-Ṭûr [Mt. Tabor]). In Egyptian Arabic the first letter is pronounced like *g* in "get"; the *a* in Arabic is often quite flat (like *a* in hat, indeed often pronounced as short *e*), so frequently transliterated by *e*.

JEBERECHIAH jə-ber'ə-kī-ə [Heb. *yᵉḇereḵyāhû*–'Yahweh blesses']. The father of the Zechariah whom Isaiah (8:2) took as a witness for his prophecy against Syria and Ephraim (*ca.* 734 B.C.).

JEBUS jē'bəs; **JEBUSITE** jeb'yə-sīt [Heb. *yᵉḇûs*; *hayᵉḇûsî*]; AV JEBUSI (Josh. 18:16, 28). The name "Jebusite" described an ethnic group living in the uplands of Canaan (Nu. 13:29; Josh. 11:3) near Jerusalem (Josh. 15:8; 18:16). A comparatively small clan, they claimed descent from the third son of Canaan (Gen. 10:16), and lived among the Amorites, Canaanites, and Girgashites (Gen. 15:21), though always separate from them. Their principal city was known as Jebus (Jgs. 19:10f.; 1 Ch. 11:4f.), which led to their becoming known as Jebusites (Gen. 15:21; Ex. 3:8). In exilic and postexilic writers the term Jebusite was used of the former inhabitants of the city (Zec. 9:7). In Josh. 18:28; Jgs. 19:10 a scribal gloss explained that Jebus meant "Jerusalem," while a similar gloss in 1 Ch. 11:4 gave its converse. Apparently these attempts at explanation are comparatively late and show that the name Jebus, by which Jerusalem was known, designated the pre-Israelite occupation of the region. *See* JERUSALEM I.C.

Archeological excavations in the general area of Mt. Zion have shown that its earliest occupational levels date from the 3rd millennium B.C., representing a significant advance on the Neolithic flint scrapers and crude pottery found to the south and west of the site of later Jerusalem. In the nineteenth-century-B.C. Egyptian Execration Texts from Luxor, the fortified settlement was known as *Urushalim* ("foundation [shrine] of [the deity] Shalim"); in the fourteenth-century-B.C. Amarna Letters as *Urusalim*; and in later Assyrian texts as *Urusilimmu* — all of which relate the site to the deity worshiped there. The Jebusites seem to have moved into the area early in the Middle Bronze Age (*ca.* 1950-1550 B.C.), perhaps as part of a migration of Hurrians (HORITES). Once in control they enlarged the defenses of the city and constructed underground tunnels to divert the waters of the spring of Gihon and bring them within their city walls.

The first mention of a king of Jebus is in Josh. 10:1, during the Hebrew Settlement period. Earlier scholars frequently identified the Salem of which Melchizedek was king (Gen. 14:18) with Jerusalem, following Josephus (*Ant.* i.10.2 [180f.]). Since the Genesis narrative speaks of the king of Sodom going out to meet Abraham in the Jordan Valley, however, a location for Salem better than Jerusalem would seem to be somewhere in the area known in NT times as Perea, a well-watered district where John the Baptist was active (Jn. 3:23), and where the name "Salim" was preserved many centuries later. Nevertheless, the Amarna Tablets indicate that in the 15th cent. B.C. a man named Abdu-Ḫeba ruled *Urusalimmu*, and like the later Jebusite king Araunah (2 S. 24:24) or Ornan (1 Ch. 21:15) was of non-Semitic origin.

When the soldiers of Judah raided Jebus (Jgs. 1:8) they set it on fire, but apparently the devastation did not prevent the Jebusites from reoccupying the site. Although assigned to Benjamin at the division of Canaan, the Jebusite stronghold was independent of any form of Hebrew rule during the judges period, as illustrated by the incident of the Levite of Mt. Ephraim (Jgs. 19:10-12). David was the first Hebrew to mount a successful campaign against Jebus (2 S. 5:6-8; 1 Ch. 11:4f.), but precisely how it was accomplished is not made clear by the narratives. Earlier scholars thought that he had gained access to the fortress by means of the underground water conduits, but W. F. Albright (in H. C. Alleman and E. E. Flack, eds., *OT Comm.* [1954], p. 149) showed that Heb. *ṣinnôr* (2 Sam. 5:8; AV "gutter"; RSV "water shaft") was a Canaanite word for a "hook" (NEB "grappling-iron"), implying that David's men went over the walls by means of grappling hooks (but *see* JERUSALEM III.C.1.a). The surviving Jebusites yielded to David, who later purchased part of the land from ARAUNAH to house the ark of the covenant (2 S. 24:24 par.). From that time the Jebusites were absorbed by the Judeans.

Excavations at the site of the limestone promontory known as Ophel have uncovered very old fortifications consisting of massive walls, bastions, and gates, which were evidently Jebusite in origin. An underground tunnel made by the Jebusites to bring water from the spring of Gihon in the Kidron Valley SE of Ophel was also discovered, as was the deep cistern some 12 m. (40 ft.) below ground level into which the tunnel emptied. Another aqueduct designed to divert the spring of Gihon emptied into the "old pool" (Isa. 22:11) just outside the city walls (cf. F. Kenyon, *The Bible and Archaeology* [1940], p. 176). From the Ophel region archeologists have uncovered sev-

eral links with the Davidic period, including the corner of a Jebusite or Davidic wall and the probable location of the royal necropolis at the south end of Ophel.

JECONIAH jek-ə-nī'ə [Gk. *Iechonias*]; AV NT JECHONIAS, AV also JECONIAS (1 Esd. 1:9), JOACHAZ (1 Esd. 1:34); NEB also JECHONIAS (1 Esd. 1:9), JOACHAZ (1 Esd. 1:34).

1. The alternative designation of JEHOIACHIN king of Judah.

2. In 1 Esd. 1:9, a Levite in the time of Josiah, equivalent to Conaniah in 2 Ch. 35:9.

3. In 1 Esd. 1:34, an alternate designation of Jehoahaz king of Judah. *See* JEHOAHAZ **3.**

JECONIAS jek-ə-nī'əs (1 Esd. 1:9, AV). *See* JECONIAH **2.**

JEDAIAH jə-dā'yə, jə-dī'ə [Heb. *yᵉḏaʿyâ*–'Yahweh knows'; **(6, 7)** *yᵉḏāyâ*–'Yahweh has favored'].

1. A priest in Jerusalem (1 Ch. 9:10; 24:7).

2. Ezr. 2:36; Neh. 7:39, where "sons of Jedaiah" are mentioned (1 Esd. 5:24; AV, NEB, Jeddu).

3. Jedaiah is among "the priests and the Levites" who returned with Zerubbabel (Neh. 11:10; 12:6, 19).

4. Another priest of the same name (Neh. 12:7, 21).

5. One of the exiles whom Zechariah was commanded to send with silver and gold to Jerusalem (Zec. 6:10, 14).

6. Father of a Simeonite prince (1 Ch. 4:37).

7. One of the repairers of the wall of Jerusalem (Neh. 3:10). D. F. ROBERTS

JEDDIAS jed-dī'əs (1 Esd. 9:26, NEB). *See* IZZIAH.

JEDDU jed'o͞o (1 Esd. 5:24, AV, NEB). *See* JEDAIAH **2.**

JEDEUS jə-dē'əs (1 Esd. 9:30, AV). *See* ADAIAH **6.**

JEDIAEL jə-dī'əl [Heb. *yᵉḏîʿᵃʾēl*–'known by God'].

1. A son of Benjamin or probably of Zebulun (1 Ch. 7:6, 10f.).

2. One of David's mighty men (1 Ch. 11:45), probably the same as the Manassite who deserted to David at Ziklag (1 Ch. 12:20 [MT 21]).

3. A Korahite doorkeeper in David's reign (1 Ch. 26:2).

JEDIDAH jə-dī'də [Heb. *yᵉḏîḏâ*–'beloved']. Mother of King Josiah of Judah, daughter of Adaiah of Bozkath (2 K. 22:1).

JEDIDIAH jed-ə-dī'ə [Heb. *yᵉḏîḏyâ*–'the beloved of Yahweh']. The name conferred by God through Nathan upon Solomon at his birth (2 S. 12:25).

JEDUTHUN jə-do͞o'thən [Heb. *yᵉḏûṯûn, yᵉḏuṯûn, yᵉḏîṯûn*–'praise'(?); Gk. *Ideithoun*].

1. A Merari Levite of the Davidic period who with Asaph and Heman was responsible for the music in temple worship (1 Ch. 25:1; 2 Ch. 5:12). In 1 Ch. 25:1, 3; 2 Ch. 35:15; 1 Esd. 1:15 (assuming Eddinus [LXX *Eddinous*] = Jeduthun), his music was linked with prophecy, not an uncommon link in Israel (cf. 1 S. 10:5f.; 2 K. 3:15). In 1 Ch. 6:44 (MT 29); 15:17, 19, Asaph and Heman were mentioned with Ethan, perhaps Jeduthun's family name before he was appointed to his temple duties (cf. 1 Ch. 16:41). Jeduthun occurs in the titles of Pss. 39, 62, and 77, indicating either that he directed their composition or that "Jeduthun" was the name of a melody to which they were sung. Jeduthun's descendants carried on his ministry in the times of Hezekiah (2 Ch. 29:14), Josiah (2 Ch. 35:15), and Nehemiah (Neh. 11:17).

See also ASAPH **2.**

2. A Korahite, father of Obed-edom (1 Ch. 16:38; cf. 26:1, 4). G. A. L.

JEELI jə-ē'lī (1 Esd. 5:33, AV, NEB). *See* JAALA, JAALAH.

JEELUS jə-ē'ləs (1 Esd. 8:92, AV). *See* JEHIEL **8.**

JEEZERITES jə-ē'zər-īts (Nu. 26:30, AV). *See* ABIEZER **1.**

JEGAR-SAHADUTHA jē'gər-sā'ə-do͞o'thə [Aram. *yᵉgar śāhᵘḏûṯā*'; LXX Gk. *bounós tḗs martyrías*–'(the) mound of witness']. The name given by the Aramean Laban to the heap of stones called by Jacob GALEED and set up to commemorate their agreement (Gen. 31:47). The cairn was located in northern Transjordan, but the Hebrew name Galeed was the one ultimately given to the site.

JEHALLELEL jə-hal'ə-lel [Heb. *yᵉhallel'ēl*–'may God shine forth']; AV JEHALELEEL.

1. A Judahite (1 Ch. 4:16).

2. A Levite, a descendant of Merari (2 Ch. 29:12).

JEHDEIAH jə-dē'yə, jə-dī'yə [Heb. *yeḥdᵉyāhû*–'may Yahweh rejoice'].

1. A Levite, head of the family of Shubael (1 Ch. 24:20).

2. An officer of David "over the she-asses" (1 Ch. 27:30).

JEHEZKEL jə-hez'kel [Heb *yᵉḥezqē'l*–'God strengthens']; AV JEHEZEKEL. A priest of the twentieth priestly order in David's time (1 Ch. 24:16).

JEHIAH jə-hī'ə [Heb. *yᵉḥîyâ*–'may Yahweh live']. Keeper of the ark with Obed-edom (1 Ch. 15:24).

JEHIEL jə-hī'əl [Heb. *yᵉḥî'ēl*–'may God give life'].

1. A Levite, one of the musicians appointed to play upon instruments at the bringing up of the ark by David (1 Ch. 15:18, 20; 16:5).

2. A Gershonite, head of a Levitical house (1 Ch. 23:8; 29:8), who supervised the treasury of the temple in the early monarchy. He was the father of a priestly family known as Jehieli (1 Ch. 26:21f.).

3. Son of a Hachmonite; he attended the king's sons, i.e., as the tutor of David's boys (1 Ch. 27:32).

4. A son of King Jehoshaphat (2 Ch. 21:2).

5. A Hemanite Levite who took part in cleansing the temple in Hezekiah's reign (AV, NEB 2 Ch. 29:14; *K yᵉḥû'ēl*; RSV Jehuel) and later became a temple overseer (2 Ch. 31:13).

6. One of the three "rulers" of the temple during Josiah's reign (2 Ch. 35:8; 1 Esd. 1:8 [Gk. *Esyelus*; NEB, RSV mg., Esyelus; AV Syelus]).

7. Father of Obadiah, a returned exile (Ezr. 8:9; cf. 1 Esd. 8:35 [AV, NEB, Jezelus]).

8. Father of Shecaniah (Ezr. 10:2; cf. 1 Esd. 8:92; NEB Jeel) who assisted Ezra in promoting marriage reforms in postexilic Judea. He was probably the Jehiel of Ezr. 10:26 (cf. NEB 1 Esd. 9:27; AV Hierielus) who divorced his foreign-born wife.

9. A priest who obeyed Ezra's injunction about divorcing foreign-born wives (Ezr. 10:21; cf. 1 Esd. 9:21 [AV Hiereel]).

JEHIELI jə-hī'ə-lī [Heb. *yᵉḥî'ēlî*] (1 Ch. 26:21f.). The gentilic of Jehiel. *See* JEHIEL **2.**

JEHIZKIAH jə-hiz-kī'ə [Heb. *yᵉḥizqîyāhû*–'may Yahweh strengthen']. One of the Ephraimite chiefs (2 Ch. 28:12) who with Obed is said to have opposed the enslavement of the Judahites taken captive by Pekah in his war against Ahaz (*ca.* 724 B.C.).

JEHOADDAH jə-hō'ə-də [Heb. *yᵉhô'addâ*]; AV JEHOADAH. A descendant of King Saul (1 Ch. 8:36), known as JARAH in 1 Ch. 9:42, where the LXX reads Gk. *Iada*.

JEHOADDAN jə-hō'ə-dən [Heb. *yᵉhô'addān*–'Yahweh is delight'(?)]. The mother of King Amaziah (2 Ch. 25:1), known in the *kethibh* of 2 K. 14:2 as Jehoaddin, and so rendered by the RSV, NEB.

JEHOADDIN jə-hō'ə-dən (2 K. 14:2). *See* JEHOADDAN.

JEHOAHAZ jə-hō'ə-haz [Heb. *yᵉhô'āḥāz*–'Yahweh will hold fast,' lit. 'Yahweh has taken hold'].

1. King of Judah (2 Ch. 21:17). *See* AHAZIAH **2.**

2. The son of Jehu and the eleventh king of Israel (814-800 B.C.). He reigned for fourteen years but ruled for seventeen, sharing with his father the governing of the kingdom when the latter was incapacitated by extreme old age (cf. 2 K. 13:1, 10).

The political situation had evidently deteriorated since Jehu's death. Israelite territories E of the Jordan were even then under constant attack from Hazael's forces, who inflicted blow after blow on them (2 K. 10:32f.). During Ahaziah's reign, Hazael or his son captured several cities (13:25) and destroyed Israel's military power, which was now reduced to the size of a police force, so much so that although Ahab was able to send two thousand chariots into battle, Ahaziah had no more than ten chariots altogether (2 K. 13:7). It is highly probable that the temporary relief from Syrian attacks during this reign (13:4f.) came in the wake of a crushing defeat inflicted on the Arameans by Adadnirari III (810-783) in the course of his campaigns (*ANET*, pp. 281f.).

Jehoahaz patronized the fertility cult, which was introduced by Jeroboam, for political reasons. But he was not on that account entirely lacking in true religion. When hard pressed he turned to God for help, and help came; Assyria, the Lord's "rod of anger" (Isa. 10:5), was on this occasion the deliverer of His sinful and wayward people: "Then Jehoahaz besought the Lord, and . . . the Lord gave Israel a savior" (2 K. 13:4f.). M. S. SEALE

3. King of Judah, son of King Josiah, enthroned immediately after his father's sudden death in 609 B.C. (2 K. 23:30-34; 2 Ch. 36:1-4). He is named SHALLUM in 1 Ch. 3:15; Jer. 22:11 and Jeconiah in 1 Esd. 1:34. He was the choice of the people in spite of his being younger than Jehoiakim. His enthronement, however, did not meet the approval of Pharaoh Neco of Egypt, whom Josiah attempted to stop at Megiddo.

Pharaoh Neco marched his forces N to Carchemish, where he temporarily halted the westward advance of the Babylonians in the Fertile Crescent. After three months Neco removed Jehoahaz from his throne in Jerusalem, took him captive to Riblah, which was the occupational headquarters for the Egyptians, and ultimately transferred him to Egypt. Neco exacted a heavy tribute from Judah and enthroned Jehoiakim in Jerusalem.

Jeremiah offered his people no hope for Jehoahaz. According to the prophet's word, Jehoahaz did not return but died in Egypt (Jer. 22:10-12). S. J. SCHULTZ

JEHOASH jə-hō'-ash. *See* JOASH **1, 2.**

JEHOHANAN jə-hō-hā'nən [Heb. *yᵉhôḥānān*–'Yahweh is (or has been) gracious'].

1. A Korahite doorkeeper in David's reign, son of Meshelemiah (1 Ch. 26:3). The LXX Lucian has Jehonathan.

2. One of the five captains over King Jehoshaphat's army (2 Ch. 17:15), probably the father of Ishmael, son of Jehohanan (2 Ch. 23:1).

3. Ezr. 10:6 (AV Johanan), the same as Johanan (Neh. 12:22f.) and Jonathan (Neh. 12:11), son of Eliashib (Ezr. 10:6; but "grandson" in Neh. 12:11). He was high priest in Ezra's time (cf. 1 Esd. 9:1; AV, NEB, Joanan).

4. One of those who had married foreign wives (Ezr. 10:28; 1 Esd. 9:29, AV Johannes, NEB Joannes).

5. Son of Tobiah the Ammonite, Nehemiah's opponent (Neh. 6:18; AV Johanan).

6. Head of the priestly family of Amariah (Neh. 12:13).

7. A priest present at the dedication of the walls of Jerusalem (Neh. 12:42). D. F. ROBERTS

JEHOIACHIN jə-hōi'ə-kin [Heb. *yᵉhôyāḵîn*–'Yahweh will uphold']; also **JECONIAH** jek-ō-nī'ə [Heb. *yᵉḵonyâ, yᵉḵonyāhû*]; **CONIAH** kō-ni'ə [Heb. *konyāhû*] (Jer. 22:24, 28; 37:1); NT **JECHONIAH** jə-kō-nī'ə [Gk. *Iechonias*] (Mt. 1:11f.); AV NT JECHONIAS; NEB NT JECONIAH; Apoc. [Gk. *Iōakim*] (1 Esd. 1:43 [LXX 41]; AV JOACIM; NEB JOAKIM. The son of Jehoiakim, and his successor to the Davidic throne in 598 B.C. (2 K. 24:8-17; 2 Ch. 36:9f.; 1 Esd. 1:43 [the LXX reading here is an obvious scribal error]). He ruled only three months in Jerusalem.

Apparently Jehoiakim precipitated Babylonian aggression, so Jehoiachin was suddenly faced with the invading Babylonians after his father's death. (*See* BABYLONIA IV.J.) Realizing the futility of resisting so strong a power, the young king surrendered. Consequently, the Babylonians stripped the temple and the royal treasures. Jehoiachin and his queen mother were taken prisoners. Accompanying them into captivity were palace officials, executives, artisans, and the leading citizens of Jerusalem. Not least among them was Ezekiel (but *see* EZEKIEL III). Whereas previously (605) the Babylonians had merely taken hostages, this was a massive exile from the kingdom of Judah.

Jeremiah (22:24-28) not only indicated that Jehoiachin would be taken into captivity, but also predicted that he would not have his throne reestablished. In Babylon, Jehoiachin received favorable treatment. In all likelihood, he is the Yaukin, "king of the land of Yahud," who is listed in cuneiform tablets with persons from Egypt, Philistia, Phoenicia, Asia Minor, Elam, Media, Persia, and Judah. The reference to his five sons immediately after his name in these tablets, unearthed near the Ishtar

Gate in Babylon and dating between 595 and 570 B.C., may indicate that Jehoiachin was living with his family in Babylon and received rations such as barley and oil (cf. 1 Ch. 3:17f.).

Jehoiachin apparently was regarded as the legitimate claimant to the throne of Judah by the Babylonians as well as by the Jewish exiles. Ezekiel dates events by the years of captivity beginning in 597 when Jehoiachin was taken captive. Since Jehoiachin received such favorable treatment in 592 B.C., the date of one of these cuneiform tablets from Babylon, it seems quite probable that subsequent Judeo-Babylonian relationships resulted in the imprisonment of Jehoiachin. In 562, after Nebuchadrezzar's death, when Jehoiachin was restored to more preferential treatment, the city of Jerusalem had long since been reduced to ruins. S. J. SCHULTZ

JEHOIADA jə-hoi'ə-də [Heb. *yᵉhôyāḏāʿ*–'Yahweh knows'; Gk. *Iōdae*].

1. Father of Benaiah, captain of David's bodyguard (2 S. 8:18; 20:23; 23:20-22; 1 K. 1:8; etc.). Jehoiada was "the son of a valiant man of Kabzeel" (AV, 2 S. 23:20); the RSV and NEB omit with the LXX and Ewald the second (Heb.) *ben* as an accidental repetition, the reference then being understood as to "Benaiah, a valiant man" (see S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [rev. ed. 1913]; H. P. Smith, comm. on Samuel [*ICC*, 1899]). In 1 Ch. 27:5 Jehoiada is called a priest (AV, NEB, "chief priest"), which may find support in 1 Ch. 12:27, where among those who supported David in Hebron was "the prince Jehoiada, of the house of Aaron." The reference in 1 Ch. 27:5, however, may be to Benaiah (as LXX, Vulg., Josephus *Ant.* vii.5.4 [110]), though some, e.g., H. L. Ellison, discount this. In 1 Ch. 27:34 there is named among David's counselors "Jehoiada the son of Benaiah." Some commentators, and two MSS, would reverse the names; E. L. Curtis, however (comm. on Chronicles [*ICC*, 1910]), retains the MT. *See* BENAIAH **1.**

2. A priest during the reigns of Ahaziah, Queen Athaliah, and Joash of Judah (2 K. 11:4–12:16 [MT 17] par. 2 Ch. 23:1–24:14; 2 Ch. 22:11; 24:14-25). In 2 K. 12:10 (MT 11) he is called "high priest," the first to receive the title; but as the priest lived in the temple, it is meaningless to say that he "came up," so most commentators omit the words "and the chief priest" as being a later addition.

I. Revolt Against Athaliah.–He was the leader of the revolt against the queen mother ATHALIAH, who had assumed full authority in Judah after the death of her son Ahaziah. Jehoiada's wife Jehosheba, sister of Ahaziah, had protected her brother's youngest son Joash when Athaliah had slain all the others. Jehoiada planned the revolt carefully and with the aid of the royal guard proclaimed Joash king and slew Athaliah (2 K. 11:4-20; 2 Ch. 23:1-21).

There are several textual problems in these accounts. (1) Stade (*ZAW*, 5 [1885], 280ff.) suggested that there were two main sources in 2 K. 11:4-20, namely, the original narrative (vv. 4-12, 18b-20) and an interpolation (vv. 13-18a). This has been widely accepted, and the historicity of the interpolation doubted. J. A. Montgomery (*ICC*), however, prefers to see here an amalgamation of contemporary accounts, holding that "the alleged interpolation... tells true history" that gives information otherwise unknown, e.g., the reference to the temple of Baal and the priest Mattan. (2) According to some v. 6 is difficult and ought to be omitted because of confusion concerning the numbers of the companies involved in the operation (e.g., Wellhausen, Skinner). Montgomery says that the omission of the whole verse with its exact local details is arbitrary, the point being that all the troops were kept on duty for the intended coup.

(3) The account in 2 Ch. 23:1-21 follows that of 2 Kings in the main, with the important modification that the leading part in the revolt was played by the Levites, and that only they were permitted in the temple. Whether the Chronicler was reading back into the past customs contemporary to him, or whether he deliberately altered his sources "in the interests of the ecclesiastical order to which he belonged" (W. A. L. Elmslie, *CBSC* on 2 Chronicles), is a matter of conjecture. H. L. Ellison suggested that the writer of Kings omitted to mention the Levitical guard because he "considered them ornamental rather than useful." (On all these and other critical questions see comms.)

II. Restoration of the Temple.–Joash determined to repair the temple, but when the money came in so slowly that nothing was done, he called in Jehoiada and rebuked him for his lethargy. A chest was then prepared as a collection box for the offerings ("the first collection box in history," Montgomery), and the work was speedily accomplished (2 K. 11:21–12:16 [MT 17]; 2 Ch. 24:1-14). The Chronicler seems to have followed a different tradition in some details, notably when he recorded that the surplus money was used to supply vessels for the sanctuary, whereas Kings seems expressly to deny this. A. Van Hoonacker (*Le Sacerdoce lévitique dans la loi et dans l'histoire des Hébreux* [1899], pp. 101-114) defends the account in Chronicles.

III. Death and Significance.–Jehoiada died at a good age and was held in such high esteem that he was buried among the kings. It appears that he was the predominating force for good in the kingdom, and after his death the piety and character of Joash noticeably declined (2 Ch. 24:15-18; cf. 2 K. 12:2).

3. (Neh. 3:6, AV). *See* JOIADA **1.**

4. The priest referred to in Jer. 29:26 is taken by some, e.g., Giesebrecht, to be the priest of Athaliah's time (see **2** above). H. Freedman saw a reference to 2 K. 11:18. Others, e.g., Duhm, simply said that nothing is known of him. J. G. G. NORMAN

JEHOIAKIM jə-hoi'ə-kim [Heb. *yᵉhôyāqîm*–'Yahweh will establish']; originally **ELIAKIM** ē-li'ə-kim [Heb. *ʾelyāqîm*–'God will establish']; AV Apoc. JOACIM [Gk. *Iōakim*] (1 Esd. 1:37-39; Bar. 1:3); NEB also JOAKIM (1 Esd. 1:37-39).

1. The son of Josiah, and king of Judah enthroned by Pharaoh Neco of Egypt in 609 B.C. to replace Jehoahaz his brother, whom the people had chosen to succeed Josiah (2 K. 23:34; 2 Ch. 36:4). Judah paid a heavy tribute to Egypt, to whom Jehoiakim remained subservient until 605 B.C. when the crucial Battle of Carchemish caused Neco to retreat to the borders of Egypt. From 605 until the end of his reign in 598 B.C., Jehoiakim encountered problems with the Babylonians.

Jehoiakim was not in sympathy with the reforms promoted by his father Josiah. His attitude and antagonism toward the prophets is significantly reflected in the book of Jeremiah. Undoubtedly, Judah reverted to idolatry during his reign.

During the early years of Jehoiakim's reign, Jeremiah boldly declared in the temple court that the temple would be reduced to ruins. The mob reacted violently (Jer. 26). Probably Jeremiah had proclaimed this message previously during the reign of Josiah without any serious difficulties (cf. Jer. 7). When the princes from the palace came, the prophets and priests demanded the execution of Jeremiah; but apparently Ahikam was effective in defending him. About this time, however, Jehoiakim was re-

sponsible for the arrest and execution of a prophet named Uriah, who proclaimed the same judgment announced by Jeremiah.

The fourth year of Jehoiakim's reign (605) was crucial in many respects. During this year Jeremiah's scroll was read in the presence of Jehoiakim, who defiantly cut it up and threw the pieces into the fire (Jer. 36). It was during this year that Jeremiah boldly declared that Nebuchadrezzar would subdue Judah and many surrounding nations (Jer. 25). In his denunciation (22:13-19) the prophet reflects some of the selfish policies Jehoiakim followed in his administration, causing oppression and injustice. Unlike Josiah, who provided pious leadership, Jehoiakim showed no signs of repentance or response to the divine warnings.

In 605 Jehoiakim was confronted with a Babylonian invasion. In the decisive battle at Carchemish in early summer the Egyptians were routed by the Babylonians. By August, Nebuchadrezzar had advanced far enough into southern Palestine to claim treasures and hostages in Jerusalem — Daniel and his friends being the most noteworthy among the Judean captives (Dnl. 1:1). Although Jehoiakim retained his throne, the return of the Babylonians into Syria in 604 and to Ashkelon in 603, and their clash with Neco on the borders of Egypt in 601, frustrated any attempts to terminate Babylonian vassalage. Since this Egyptian encounter was indecisive, with both armies retreating after heavy losses, Jehoiakim may have taken this opportunity to withhold tribute (Wiseman, *CCK*, pp. 26-28). Although Nebuchadrezzar did not send his conquering army to Jerusalem for several years, he incited raids on Judah by marauding Chaldean bands supported by Moabites, Ammonites, and Syrians. During this warfare Jehoiakim's reign was abruptly terminated by death, leaving a precarious anti-Babylonian policy to his young son Jehoiachin. (*See also* BABYLONIA IV.J.)

The way in which Jehoiakim met death is not reported in Kings or Chronicles. The burning of Jeremiah's scroll precipitated divine judgment upon Jehoiakim — his body would be exposed to the heat by day and the frost by night, indicating that he would not have a royal burial (Jer. 36:27-32). On another occasion Jeremiah predicted that Jehoiakim would have the burial of an ass — his body would be cast out beyond the gates of Jerusalem (22:18-19). Since neither of the historical accounts reports the circumstances of Jehoiakim's death, nor mentions even his burial, the conclusion that this defiant king was killed in battle seems warranted. In wartime it was impossible to provide an honorable burial.

2. (Bar. 1:7; AV JOACHIM). A priest (Gk. *hiereús*) to whom the Babylonian exiles sent a collection of money.

S. J. SCHULTZ

JEHOIARIB jə-hoi'ə-rib. *See* JOARIB.

JEHONADAB jə-hō'nə-dab = **JONADAB** jō'nə-dab [Heb. *yᵉhônāḏāḇ, yônāḏāḇ*–'Yahweh is noble, liberal,' or 'Yahweh has impelled'].

1. Son of Shimeah, the brother of King David (2 S. 13:3, 5, 32, 35; RSV, NEB Jonadab), who helped Amnon seduce his sister. This scheme was probably intended to assist Amnon in claiming the throne, according to the principles of matriarchal succession which are reflected elsewhere in the narratives of the early monarchy (cf. 1 S. 25:43; 2 S. 3:3). Two years later when Absalom murdered Amnon, and David heard that all the king's sons were assassinated, Jehonadab assured him that only Amnon was killed; and his reassuring tone was justified (v. 35); possibly he knew of Absalom's intentions. The LXX Lucian has "Jonathan" in 13:3ff.; and in 2 S. 21:21 par. 1 Ch. 20:7, there is mentioned a son of Shimei (= Shammah, 1 S. 16:9), whose name is Jonathan.

2. Jehonadab in 2 K. 10:15, 23 and in the MT of Jer. 35:8, 14, 16, 18 = Jonadab in the MT of Jer. 35:6, 10, 19 and in the RSV of vv. 8, 14, 16, 18. "Son" of Rechab, of the Kenite clan (1 Ch. 2:55). Jehonadab is described in 2 K. 10 as an ally of Jehu in the abolition of Baal worship in Samaria. Jehu met him after slaying the son of Ahab (10:15). In Jer. 35 (where the RSV has Jonadab throughout), he is called the "father" of the Rechabites, who derived from him their ordinances for their nomadic life and abstention from wine.

See RECHAB.

D. F. ROBERTS

JEHONATHAN jə-hon'ə-thən [Heb. *yᵉhônāṯān*–'Yahweh has given'].

1. A Levite who took part in teaching the Torah in the cities of Judah under Jehoshaphat (2 Ch. 17:8).

2. Head of the priestly family of Shemaiah (Neh. 12:18).

3. AV and MT in 1 Ch. 27:25; *see* JONATHAN.

JEHORAM jə-hôr'əm, contracted form: **JORAM** jôr'əm [Heb. *yᵉhôrām, yôrām*–'Yahweh is exalted'].

1. The son of Ahab and Jezebel, and the ninth king of Israel (852-841 B.C.). He succeeded his brother Ahaziah, who had died prematurely as a result of a fall; and he reigned twelve years (2 K. 3:1–9:26).

I. His Religious Character.–The sacred historian clears him of the idolatrous excesses of his royal parents. He put away Baal's image which his father had made, although he did not destroy it; that was left for Jehu to do (2 K. 10:26f.). He had, however, a poor idea of the God of Israel, thinking of Him as a malevolent deity. Thus when the allied armies marching against Moab were suffering from a serious lack of water, he thought that it was God who was thus deliberately delivering them into the hands of the Moabites (2 K. 3:13). Again, when the country was suffering from famine, at a time when the capital was besieged by the Arameans, he thought that these evils, too, had come from God, in whom one trusted in vain and from whom no good could be expected (2 K. 6:33).

II. Moabite War.–Mesha king of Moab was paying a yearly tribute to Ahab of 100,000 lambs and the wool of 100,000 rams; finally he revolted (2 K. 3:4). The biblical account agrees with what is recorded on the Moabite Stone, that the revolt took place after many years of oppression by Omri and his sons, or rather his son and grandson. In the war with Moab that followed, Jehoram was aided by the king of Judah as well as by the vicegerent of Edom, Judah's vassal. The allied armies miraculously escaped perishing from thirst on their long march into Moab around the southern end of the Dead Sea. After making some gains they besieged Kir-hareseth. In desperation, King Mesha offered up his eldest son as a holocaust on the city wall in sight of the besiegers, who were so affected that they gave up the siege and withdrew.

III. Conflict with the Arameans.–The Arameans, who were no less hostile, sent out raiding parties (2 K. 5:2), laid ambushes (6:8), and once, as already noted, besieged the capital (6:24). The most serious clash seems to have taken place at Ramoth-gilead E of the Jordan. This was no new battlefield, since Ahab had fought here and lost his life. Jehoram, wounded in battle, went down to Jezreel to recuperate.

IV. Jehoram's Death.–Jehu was the instrument of Jehoram's death. Jehu, who was secretly anointed by a young prophet sent to him by Elisha, was charged with avenging the blood of the prophets and the blood of the Yahweh worshipers killed by Jezebel. Acclaimed king by

his fellow officers, Jehu made a dash for Jezreel; and when Jehoram went out to meet him he was shot down by an arrow from Jehu's bow. Jezebel, the queen mother, was ignominiously killed; and all the members of Ahab's house were exterminated, together with the entire pro-Baal party. M. S. SEALE

2. [Gk. *Iōram* (Mt. 1:8)]. King of Judah, and son of Jehoshaphat (2 K. 8:16-24; 2 Ch. 21). He began to rule *ca.* 849 B.C. and reigned eight years. It is not easy to reconcile the synchronism of 2 K. 1:17 with that of 8:16, but it may be that Jehoram of Judah was co-regent with his father Jehoshaphat for some years before he became sole ruler in 849 B.C. The commencement of his sole reign must then be referred to in 8:16. But *see* JEHORAM 1.

I. His Marriage.–In the beginning of the reigns of Ahab and Jehoshaphat, an attempt was made to end the old feud between Israel and Judah. At the suggestion of Ahab, the two kingdoms for the first time joined forces against the common foe from the north, the Syrians. To seal the alliance, Athaliah daughter of Ahab was married to Jehoram son of Jehoshaphat. Thus Jehoram was brother-in-law to Jehoram son of Ahab. No doubt this was considered as a master stroke of conciliatory policy by the interested parties. It proved disastrous for Judah, however. Beyond a doubt, the unholy zeal of Jezebel included the baalizing of Judah as well as of Israel. This marriage was a step in that direction.

II. His Idolatry.–"A man shall leave his father and mother, and shall cleave unto his wife." Jehoram did so. "He walked in the ways of the kings of Israel, as did the house of Ahab" (2 K. 8:18). According to 2 Ch. 21:11, 13 Jehoram not only accepted the religion of Athaliah, but he became a persecutor, compelling the inhabitants of Jerusalem to become apostates.

Because of his gross idolatry and his wickedness, he is said (2 Ch. 21:12ff.) to have received a denunciatory letter from the prophet Elijah, which, however, had no effect on him. This leads to a chronological difficulty. Was Elijah still alive? The inference from 2 K. 3:11 is that he was not. A possible explanation is that the strictures applied to Ahab by Elijah were now reapplied by somebody to Jehoram almost word for word, so that the document could be called Elijah's. The simplest solution, however, is to read "Elisha" instead of "Elijah." On the other hand, it is just possible that Elijah was still alive.

A person's religion cannot be divorced from his character. Baal worship had in it the elements of tyranny and civic unrighteousness. In keeping with his religion and in true oriental fashion Jehoram began his reign by murdering his brothers and other princes of the land, to whom Jehoshaphat had given valuable gifts and responsible positions.

III. Edomite Revolt.–The only event of his reign recorded in Kings is the revolt of Edom. Edom was subdued by David, and it had remained subject to the united kingdom and then to Judah until the revolt under Jehoram. The text is somewhat obscure, but both accounts indicate that the expedition of Jehoram against Edom ended in failure. It appears that the army of Jehoram was surrounded, and that it managed to fight its way out, inflicting heavy casualties on the Edomites. But it was the Edomites who won the battle.

IV. Raid into Judah.–Perhaps the revolt of Libnah (2 K. 8:22) should be taken in connection with the invasion of the Philistines and of the Arabians, mentioned in 2 Ch. 21. Libnah was located on the southwestern border of Judah. Since it was a border city, it is possible that the compiler of Kings considered it as belonging to Philistia. In the account in Chronicles, Jehoram is represented as having lost all his possessions and his family, except for Jehoahaz his youngest son, when the town was sacked and the palace plundered by the invading force of Philistines and Arabians. The account appears to be based on reliable sources.

V. His Death.–In his last days, he was afflicted with a disease in the bowels (*see* DISEASE III.J). His death was unregretted, and his burial without honor (cf. 2 K. 8:24; 2 Ch. 21:20). Ahaziah, also called Jehoahaz, his youngest and only surviving son, succeeded him. Athaliah (who must have escaped capture by the raiders) retained her influence, now occupying the powerful position of queen mother. S. K. MOSIMAN
D. F. PAYNE

JEHOSHABEATH jə-hō-shab'ē-əth [Heb. *yᵉhôšaḇ'aṯ*]. In 2 Ch. 22:11, the same as JEHOSHEBA of 2 K. 11:2.

JEHOSHAPHAT jə-hosh'ə-fat [Heb. *yᵉhôšāpāṭ*–'Yahweh has judged'].

1. King of Judah. See separate article below.

2. Son of Ahilud. He was recorder under David (2 S. 8:16; 20:24; 1 Ch. 18:15) and Solomon (1 K. 4:3).

3. Son of Paruah, and Solomon's overseer in Issachar to provide victuals for the royal household for one month of the year (1 K. 4:17).

4. Son of Nimshi, and father of Jehu, king of northern Israel (2 K. 9:2, 14). His name is omitted in 9:20 and 1 K. 19:16, where Jehu is called "son of Nimshi."
D. F. ROBERTS

JEHOSHAPHAT jə-hosh'ə-fat [Heb. *yᵉhôšāpāṭ*–'Yahweh has judged'; Gk. *Iōsaphat* (Mt. 1:8)]. The fourth king of Judah, and son of Asa. His mother was Azubah the daughter of Shilhi. He was thirty-five years of age at his accession, and reigned twenty-five years, *ca.* 873-849 B.C. The history of his reign is contained in 1 K. 22:41-50 and in 2 Ch. 17:1–21:1. The narrative in 1 K. 22:1-35a and in 2 K. 3:4ff. belongs to the history of the northern kingdom. The absence from Kings of the details contained in 2 Chronicles affords no presumption against their truth. Neither do high numbers, embellished statements, and the coloring of the writer's own age destroy the historical perspective.

I. His Religious Policy.–The reign of Jehoshaphat appears to have been one of unusual religious activity. It was characterized, however, not so much by striking religious measures as it was by the religious spirit that pervaded every act of the king, who sought the favor of Yahweh in every detail of his life (2 Ch. 17:3f.). He evidently felt that a nation's character is determined by its religion. Accordingly, he made it his duty to purify the national worship. The "sodomites," the male cult prostitutes of Canaanite worship, were banished from the land (1 K. 22:46). The Asherim were taken out of Judah (2 Ch. 17:6; 19:3), and "the people from Beer-sheba to the hill country of Ephraim were brought back unto the Lord, the God of their fathers" (19:4). Because of his zeal for Yahweh, Jehoshaphat was rewarded with power and "riches and honor in abundance" (17:5).

II. Domestic Programs.–Believing that religion and morals, the foundation and bulwarks of civilization, suffer from ignorance, Jehoshaphat introduced a system of public instruction for the whole land (2 Ch. 17:7ff.). He appointed a commission, composed of princes, Levites, and priests, to go from city to city to instruct the people. Their instruction was to be based on the one true foundation of sound morals and healthy religious life, "the book of the law of the Lord" (17:7-9).

Next in importance to his system of public instruction was his provision for the better administration of justice. He appointed judges to preside over courts of common pleas, which he established in all the fortified cities of Judah. In addition to these local courts, two courts of appeal, an ecclesiastical and a civil court, were established at Jerusalem to be presided over by priests, Levites, and leading nobles as judges. At the head of the ecclesiastical court of appeal was the high priest; a layman, "the ruler of the house of Judah," headed the civil court of appeal (2 Ch. 19:4-11). The insistence that a judge was to be in character like Yahweh, with whom there is "no iniquity . . . nor respect of persons, nor taking of bribes" (19:7), is worthy of note.

III. His Military Defenses.–According to 2 Ch. 17:2, Jehoshaphat began his reign with defensive measures against Israel. Furthermore, he built castles and store-cities in the land of Judah, "and he had many works," probably military supplies, "in the cities of Judah" (17:13). He appears to have had a large standing army, including cavalry (1 K. 22:4; 2 Ch. 17:14ff.). However, the numbers in Chronicles seem to be impossibly high.

IV. His Foreign Policy.–Godliness and security at home were followed by respect and peace abroad. That the Philistines and the Arabians brought tribute (2 Ch. 17:11) and that Edom had no king (1 K. 22:47), but a deputy instead who was probably appointed by Jehoshaphat, indicate that he held the suzerainty over the nations and tribes bordering on Judah to the south and west. Holding the suzerainty over the weaker nations, and being allied with the stronger, Jehoshaphat for the greater part of his reign secured the peace that fostered the internal development of the kingdom (1 Ch. 17:10).

In contrast to the former kings of Judah, Jehoshaphat saw greater benefit in an alliance with Israel than in civil war. Accordingly, the old feud between the two kingdoms (1 K. 14:30; 15:6) was dropped, and Jehoshaphat made peace with Israel (22:44). The political union was cemented by the marriage of his son Jehoram to Athaliah daughter of Ahab. Shortly after the marriage, Jehoshaphat joined Ahab in a campaign against Syria (2 Ch. 18:1-3). It is clear from the narrative that he had a subordinate position in this campaign (1 K. 22:4, 30), and many historians have deduced from this that Judah must have become a dependency of Israel. It was only natural that Israel should take the lead, however, since it was not only the larger nation but also the claimant to Ramoth-gilead, which lay in Gadite territory. It is not easy to prove that Judah was Israel's vassal, in view of Jehoshaphat's own military prowess and resources (2 Ch. 17:2; 20:27-30); moreover, the marriage between Athaliah and Jehoram probably implies that their fathers ranked as equals.

It is evident that the union and cooperation of Israel and Judah gave them the necessary strength to defy Syria and to subjugate other neighboring states. But the introduction of an Israelite princess to the court of Judah was ultimately disastrous. Her propagation of the Tyrian Baal cult in Judah outweighed any political and material advantages gained through the alliance, and in the succeeding reigns it led indirectly to the almost total extinction of the royal family of Judah (2 K. 11:1ff.).

In spite of the denunciation by the prophet Jehu for his expedition with Ahab, thus "help[ing] the wicked" (2 Ch. 19:2), Jehoshaphat entered into a similar alliance with Jehoram of Israel (2 K. 3:4ff.). On the invitation of Jehoram to join him in an expedition against Moab, Jehoshaphat was ready with the same set speech of acceptance as in the case of Ahab (2 K. 3:7; cf. 1 K. 22:4). For the details of the expedition *see* JEHORAM **1.II.**

V. Victory over the Moabites and Ammonites.–The Chronicler has given us a very remarkable account of a victory gained by Jehoshaphat over the Moabites and Ammonites. No doubt he made use of a current historical midrash. Many find the historical basis of the midrash in the events recorded in 2 K. 3:4ff. The localities are different, however, and there a defeat is recorded, while in this case we have a victory. The story in outline bears the stamp of authenticity. 1 K. 22:45 seems to suggest wars of Jehoshaphat that are not mentioned in Kings. The tribes mentioned in the account are represented as trying to make a permanent settlement in Judah (2 Ch. 20:11). In their advance through the south of Judah, they were doubtless harassed by the shepherd population of the country. Jehoshaphat, according to his custom, sought the help of Yahweh. The invading forces fell to quarreling among themselves (2 Ch. 20:23), and destroyed one another. The spoil was great because the invaders had brought with them all their goods, expecting to remain in the land.

VI. Destruction of Jehoshaphat's Fleet.–The destruction of Jehoshaphat's fleet is recorded in 1 K. 22:48f. and in 2 Ch. 20:35-37. The two accounts are quite different, however. According to Kings, Jehoshaphat built ships of Tarshish to sail to Ophir for gold, but the vessels were wrecked at Ezion-geber. Thereupon Ahaziah of Israel offered to assist him with seamen, but Jehoshaphat refused to enter into the alliance. According to Chronicles, the alliance had been formed, and together they built ships at Ezion-geber, which were destroyed because Jehoshaphat had made an alliance with the wicked king of Israel. The two accounts may well be describing two separate events, of which the Chronicles episode was the earlier. The text of the passage in Kings is somewhat corrupt, and, taking the LXX into consideration, some scholars conclude that there was only one ship, and that it was built by the "deputy" of v. 47. If this is so, then without doubt Chronicles must be describing a different event — an event that must have damaged the economy of Judah considerably.

VII. His Death.–Jehoshaphat died at the age of sixty. Josephus says (*Ant.* ix.3.2 [44]) that he was buried in a magnificent manner, for he had imitated the actions of David. The kingdom was left to his son Jehoram. E. R. Thiele (*MNHK*) contends on chronological grounds that Jehoshaphat figured in two co-regencies, at the start of his reign with his father Asa, and with his son Jehoram at the end of it (*see also* CHRONOLOGY OF THE OT V.B). If so, the Bible gives no specific indication of it.

JEHOSHAPHAT jə-hosh'ə-fat, **VALLEY OF** [Heb. *ʿēmeq yᵉhôšāpāṭ*–the second element means "Yahweh shall judge"; Gk. *koiláda Yosaphat*]; NEB VALLEY OF THE LORD'S JUDGEMENT. The scene of the judgment of the nations (Joel 3:2, 12 [MT 4:2, 12]). No location is given in Scripture for this final assize of the nations that were hostile to God's people, but it is clear both from the contexts of 3:2, 12 and from the term used twice in 3:14, "the valley of decision" (cf. Zeph. 3:8), that the name is to be interpreted as the scene of judgment, and not taken from the king of the same name. Ezk. 39:11 and Rev. 16:16 seem to locate it in the plain of Esdraelon (Armageddon).

By a curious process Jews, Christians, and Moslems have come to associate the last judgment with a portion of the Kidron Valley E of Jerusalem including the slopes on either side. As a result, a great number of tombs can be seen there, Moslem for the large part on the western side and Jewish on the eastern. Eusebius in the *Onomasticon*

Traditional Valley of Jehoshaphat E of Jerusalem (W. S. LaSor)

(ed. Klostermann, p. 70) located the valley of Jehoshaphat in the Valley of Hinnom, possibly because of the judgments that were associated with that place in connection with the idolatrous kings of Judah (cf. Jer. 7:31f.; 19:5f., where it is called "the valley of Slaughter"). Since the time of the Pilgrim of Bordeaux (A.D. 333), however, the Kidron has become increasingly the site popularly accepted. (For a sketch of the development, cf. *HDB*, II [1899], 562.) According to Jewish tradition, that portion of the Kidron that lies between the temple mount and the Mt. of Olives is the valley of Jehoshaphat, hence the large number of Jewish burial sites there. Some rabbis taught that it was necessary to be buried in the Holy Land in order to have a share in the resurrection, and the tradition developed that the bodies of those buried elsewhere would roll underground "like bottles" until they reached Palestine (T.P. *Ketuboth* xii.3, quoted in C. G. Montefiore and H. Loewe, eds., *Rabbinic Anthology* [repr. 1974], p. 600). In Moslem tradition, the angel Israfel on the day of resurrection will stand on es-Sakhra (the rock under the Dome of the Rock) to blow his trumpet. The multitude of the faithful then will follow Muhammad across *al-Sirât*, a bridge as narrow as a finely honed scimitar. One end of this bridge begins at Jerusalem and is marked by a column set horizontally in the wall of Ḥaram esh-Sherîf (*see* JERUSALEM II.B), and it crosses the gulf of Jahannum (obviously drawn from "Gehenna," but whether from a Christian or a Jewish source is not clear). Christians look for the return of Jesus to take place on the Mt. of Olives, based in part on Acts 1:9, 11, and in part on Ezk. 14:1 and Zec. 14:4. The Christian tradition, that the triumphal entry was made through the Golden Gate and that the return would be by that same gate, and a Moslem tradition that attempts to thwart any such occurrence, have given rise to the inclusion of the Golden Gate in the Moslem concept of the last day. Christian monks and nuns in the Middle Ages lived in caves in the Kidron and later a monastery, St. Mary of Josaphat, was built there. The Lion Gate ("St. Stephen's Gate") was formerly known as the Gate of the Valley of Josaphat. It was probably from the association of this area with the name "valley of Jehoshaphat" that a prominent tomb near "Absalom's Pillar" came to be called "the tomb of Jehoshaphat."

W. S. LASOR

JEHOSHEBA jə-hosh'ə-bə, jē-hə-shē'bə [Heb. *yᵉhôšeḇaʿ*–'Yahweh is opulence']. Called "Jehoshabeath" in 2 Ch. 22:11; daughter of Jehoram king of Judah, possibly by a wife other than Athaliah (2 K. 11:2). According to 2 Ch. 22:11, she was the wife of Jehoiada, the priest. She hid Jehoash, the young son of King Ahaziah, and so saved his life from Queen Athaliah.

JEHOSHUA jə-hōsh'o͞o-ə [Heb. *yᵉhôšu(a)ʿ*] (AV Nu. 13:16; 1 Ch. 7:27). *See* JOSHUA 5.

JEHOVAH jə-hō'və. *See* GOD, NAMES OF II.C.

JEHOVAH-JIREH jə-hō'və-jī'rə [Heb. *YHWH yir'eh*–'Yahweh will find']. The AV and NEB transliteration of Abraham's name for the place where Yahweh provided him a lamb as a substitute sacrifice for Isaac (Gen. 22:14). Abraham's choice of name was no doubt based on his response to Isaac's question (v. 7) regarding the whereabouts of the lamb needed for a sacrifice: "God will find [*yir'eh*; cf. 1 S. 16:1] for Himself the lamb" (v. 8). The meaning of the related popular saying in v. 14b is not immediately discernible because the narrator, communicating with an audience familiar with the saying, did not feel compelled to provide any further explanation for later audiences (see comms.).

Jehovah-jireh has been traditionally identified with the site of Solomon's temple, but later scholars have suggested the sanctuary of the oak of Moreh at Shechem (cf. O. Procksch, comm. on Genesis [*KZAT*, 3rd ed. 1924], *in loc.*). Neither identification is certain. J. E. H.

JEHOVAH-NISSI jə-hō'və-ni'sī [Heb. *YHWH nissî*–'Yahweh is my banner']. The AV and NEB transliteration of Moses' name for the altar that he erected to commemorate the Israelites' defeat of the Amalekites at Rephidim (Ex. 17:15). The BANNER was frequently used to rally an army for battle (cf. Ps. 60:4 [MT 6]); thus the altar would witness to all who saw it that Yahweh was responsible for the Israelites' victory over the Amalekites. For discussion of the problems involved in interpreting the related saying in v. 16, see B. S. Childs, comm. on Exodus (*OTL*, 1974), pp. 311f., 315.

JEHOVAH, SERVANT OF. *See* SERVANT OF THE LORD.

JEHOVAH-SHALOM jə-hō'və-shă-lōm [Heb. *YHWH šālôm*–'Yahweh is peace'] (Jgs. 6:24); RSV "The Lord is peace." The AV transliteration of the name that Gideon gave to the altar he built at Ophrah, in allusion to the word spoken to him by the Lord, "Peace be to you" (Jgs. 6:23).

JEHOZABAD jə-hō'zə-bad [Heb. *yᵉhôzāḇāḏ*–'Yahweh has bestowed'].

1. A servant of King Jehoash of Judah. According to 2 K. 12:21 (MT 22), he was a son of Shomer, but 2 Ch. 24:26 makes him "son of Shimrith the Moabitess."

2. A Korahite doorkeeper, son of Obed-edom (1 Ch. 26:4).

3. A Benjaminite, one of King Jehoshaphat's warriors (2 Ch. 17:18).

JEHOZADAK jə-hō'zə-dak [Heb. *yᵉhôṣāḏāq*] (1 Ch. 6:14f. [MT 5:40f.]; Hag. 1:1, 12, 14; 2:2, 4; Zec. 6:11); **JOZADAK** jō'zə-dak [Heb. *yôṣāḏāq*] (Ezr. 3:2, 8; 5:2; 10:18; Neh. 12:26); AV also JOSEDECH (Hag. 1:1, 12, 14; 2:2, 4; Zec. 6:11), JOSEDEC (1 Esd. 5:5, 48, 56; 6:2; 9:19); NEB also JOSEDEK (1 Esd. 5:5, 48, 56; 6:2; 9:19). The father of Joshua the priest and a priest himself at the time of the captivity under Nebuchadrezzar (1 Ch. 6:14f.; Hag. 1:1; etc.).

JEHU jē'ho͞o [Heb. *yēhû*'–'he is Yahweh'; 1 K. 19:16f.; 2 K. 9–10; Gk. *Eiou*].

1. Son of Jehoshaphat and descendant of Nimshi, hence commonly called "the son of Nimshi"; tenth king of Israel and founder of its fourteenth dynasty. He reigned for twenty-eight years, *ca.* 842-814 B.C.

I. Officer of Ahab.–A soldier of fortune, Jehu appears first as an officer in the bodyguard of Ahab. He saw the judicial murder of Naboth and Naboth's sons (2 K. 9:26). He was there when Ahab drove from Samaria to inspect his new possession, Naboth's vineyard, in Jezreel and witnessed the dramatic encounter between the king and the prophet Elijah (cf. 1 K. 21:16-24). Years after, Jehu reminded Bidkar his aide (lit. "third [officer]") of the doom they had heard pronounced there upon Ahab and his house (2 K. 9:25f.). In fulfillment of this doom Jehu ordered the body of the slain Jehoram to be thrown into the enclosure that had once been Naboth's. Ahab's temporary repentance averted the punishment from himself for a few years (1 K. 21:27-29), but the blow fell at the battle of Ramoth-gilead, and Jehu remembered the prophet's words as he beheld the dogs licking Ahab's blood "by the pool of Samaria" (22:38).

II. Jehoram at Ramoth-gilead and Jezreel.–Ahab's elder son, Ahaziah, after a short reign died from the effects of an accident (2 K. 1). He was succeeded by his brother Jehoram, who toward the close of his twelve-year reign (2 K. 3:1) decided to recover Ramoth-gilead, where his father had been fatally stricken, from Hazael of Syria. He succeeded (2 K. 9:14) but in the attack was severely wounded and was taken to Jezreel to recover (v. 15). The city meanwhile was left under the supervision of Jehu and his fellow commanders. At Jezreel his ally Ahaziah of Judah visited him (8:28f.; 9:16).

III. The Anointing of Jehu.–Elisha the prophet, the successor of Elijah, took the decisive step that precipitated the predicted vengeance on the house of Ahab. Hazael and Jehu had already been named to Elijah as the persons who were to execute the divine judgment, the one as king of Syria, the other as king of Israel (1 K. 19:15-17). Elisha, doubtless aware of this commission, quickly dispatched to Ramoth-gilead a messenger, who took Jehu aside, anointed him king of Israel in Yahweh's name, and charged him to strike down the house of Ahab to avenge the righteous blood shed by Ahab and Jezebel. The messenger, as instructed, then fled (2 K. 9:1-10).

IV. The Revolution and Death of Jehoram.–Events now moved rapidly. Jehu's companions, learning that Jehu had been anointed king, at once improvised a throne by throwing their garments on the top of some steps, blew the trumpet, and proclaimed "Jehu is king." Not a moment was lost. No one was permitted to leave the city to carry news, and Jehu himself, with characteristic impetuosity, set out in his chariot with Bidkar as charioteer and a small body of horsemen to Jezreel (2 K. 9:25). As they came within sight of the city, a watchman reported their advance, and messengers were sent to inquire about their errand. These were ordered to fall into the rear. This conduct awakened suspicion, and Jehoram and Ahaziah — who was still with his invalided kinsman — proceeded in person to meet Jehu. At the ill-omened field of Naboth, their anxious query "Is it peace?" was answered by a storm of denunciation from Jehu, and when Jehoram turned to flee, an arrow from Jehu's powerful bow pierced him through the heart, and he sank dead in his chariot. Ahaziah likewise was pursued and wounded "at the ascent of Gur, which is by Ibleam." He died at Megiddo and was buried in Jerusalem in the sepulchre of the kings (9:11-28). A somewhat variant account of Ahaziah's death is given in 2 Ch. 22:9. It is possible that Jehu came to Megiddo or its neighborhood and killed him there.

V. Death of Jezebel.–The slaughter of Jehoram was quickly followed by that of the main instigator of all the crimes for which the house of Ahab suffered — the queen mother Jezebel. Returning from the pursuit of Ahaziah, Jehu arrived at Jezreel. Jezebel, now an aged woman, but still defiant, had painted and attired herself and, looking from her window, met him as he drove into the palace court with the insulting question, "Is it peace, you Zimri, murderer of your master?" (cf. 1 K. 16:9-12). Jehu's answer was an appeal for aid from those inside. Two or three eunuchs of the palace gave signs of their concurrence and at Jehu's bidding threw Jezebel down into the courtyard, where, lying in her blood, she was trampled by the chariot horses. A little later, when her remains were sought for burial, she was found to have been almost completely devoured by dogs — a lurid commentary on Elijah's earlier threat which was now remembered (2 K. 9:30-37). Jehu was a fearless executor of judgment, but the pitiless zeal, needless cruelty, and deceit with which he accomplished his mission withdraw one's sympathy from him, as it did that of a later prophet (Hos. 1:4).

VI. Slaughter of Ahab's Descendants.–The next deeds of Jehu even more clearly reveal his thoroughness of purpose, promptness of action, ruthlessness, and lack of principle. Samaria was the capital of the kingdom and headquarters of the Baal worship introduced by Jezebel, though it is recorded of Jehoram that he had removed, at least temporarily, an obelisk of Baal that his father had set up (2 K. 3:2; cf. 10:26). The city was still held for the house of Ahab, and seventy of Ahab's "sons" — to be taken here in the sense of male descendants — resided in it (10:1, 6). Jehu here adopted a bold and astute policy. He sent letters to Samaria challenging those in authority to set up one of their master's sons as king and fight for the city and the kingdom. The leaders knew well that they could make no effective resistance to Jehu and at once humbly offered their submission. Jehu, in a second message, challenged them to prove their sincerity by delivering to him the heads of the seventy princes in baskets. Their compliance irrevocably committed them to Jehu's cause (v. 9). The ghastly relics were piled up in two heaps at the gate of Jezreel — a horrible object lesson to any still inclined to hesitate in their allegiance. Friends and partisans of the royal house shared the fate of its members (v. 11).

VII. Slaughter of Ahaziah's Brethren.–Apart from the faultiness in the agent's motive, the deeds recounted up to this point fell within the letter of Jehu's commission. As much cannot be said of the bloody deeds that follow. Jehu had killed Ahaziah, king of Judah. Now, on his way to Samaria, he met forty-two persons described as "kinsmen of Ahaziah" — evidently blood relations of various degrees, as Ahaziah's own brothers had been earlier killed by the Arabians (2 Ch. 21:17; 22:1) — and, on learning their identity and their purpose to visit their kinsmen at Jezreel, gave orders that they be killed on the spot and their bodies disgracefully thrown into the pit (or "cistern") of the shearing house where he had encountered them. It was a cruel excess for which there was no justification (2 K. 10:12-14).

VIII. Massacre of the Worshipers of Baal.–Still less can the deceit and violence be condoned by which, when he reached Samaria, Jehu displayed his "zeal for Yahweh" (2 K. 10:16) by exterminating the worshipers of Baal. Jehu had secured the support of a notable man — Jehonadab the son of Rechab (vv. 15f.; cf. Jer. 35:6-19) — and his entrance into Samaria was marked by further slaying of all adherents of Ahab. Then, doubtless to the amazement of many, Jehu proclaimed himself an enthusiastic follower of Baal. A great festival was organized, to which all proph-

Panel of the Black Obelisk from Nimrûd showing Jehu (or his emissary) bowing before Shalmaneser III (859-824 B.C.). This is the only contemporary representation of an Israelite king (Trustees of the British Museum)

ets, worshipers, and priests of Baal were invited from every part of Israel. Jehu himself took the leading part in the sacrifice (2 K. 10:25). Vestments were distributed to distinguish the true worshipers of Baal from others. Then, when all were safely gathered into "the house of Baal," the gates were closed, and Jehu sent in eighty soldiers to massacre the whole deluded company. The temple of Baal was destroyed. Thus Jehu indeed "wiped out Baal from Israel" (v. 28), but at a terrible cost of falsehood and treacherous dealing (vv. 18-28).

IX. Wars with Hazael.–The history of Jehu in the Bible is mainly the history of his revolution. His reign itself is summed up in a few verses, which mostly tell of the attacks made by Hazael king of Syria on the Transjordanian territories of Israel (10:32f.). These districts were overrun and remained lost to Israel till the reign of Jehu's great-grandson, Jeroboam II (14:28).

X. Latter Years.–There are some indications that in his latter years, which were clouded with misfortune, Jehu involved his son Jehoahaz in the government (cf. 2 K. 13:1, 10 where Jehoahaz comes to the throne in the 23rd and dies in the 37th year of Jehoash of Judah — fourteen years — yet has a total reign of seventeen years). Jehu is not mentioned in Chronicles, except incidentally in connection with the death of Ahaziah (2 Ch. 22:9), and as the grandfather of Jehoash (25:17).

XI. Character.–The character of Jehu is apparent from the deeds recorded of him. His energy, determination, promptness, and zeal equipped him for the work he had to do. It was rough work and was executed with relentless thoroughness. Gentler measures probably would have failed to eradicate Baal worship from Israel. His impetuosity was demonstrated in his furious driving (2 K. 9:20). He was bold, daring, unprincipled, masterful, and astute in his policy. But one seeks in vain in his character for any touch of magnanimity or of the finer qualities of the ruler. His "zeal for Yahweh" was too much a cloak for merely worldly ambition. The bloodshed in which his rule was founded early provoked a reaction, and his closing years were dark with trouble. He is especially condemned for tolerating the worship of the golden calves (2 K. 10:29-31). Nevertheless the throne was secured to his dynasty for four generations (10:30; cf. 15:12). W. S. CALDECOTT

XII. Assyrian Records.–Further information about Jehu's reign comes from two inscriptions of Shalmaneser III of Assyria (859-824 B.C.). The first is a fragment of an annal recording the eighteenth year of Shalmaneser's reign (841/40), describing his campaign westward. After an exaggerated account of his victories he says, "At that time I received the tribute of the people of Tyre, Sidon, and of Jehu, son of Omri" (Akk. *Ia-u-a mar Ḫu-um-ri-i*; *ANET*, p. 280). In the well-known Black Obelisk of Shalmaneser, set up by

him in the main square of Nimrûd, this act of submission is depicted. The superscription below the relevant panel reads: "The tribute of Jehu, son of Omri. Silver, gold, a golden bowl, a golden vase, golden cups, golden buckets, tin, a staff for the royal hand[?], *puruchati*-fruits" (*DOTT*, p. 48). *See* ASSYRIA III.E.2. J. E. H.

2. The son of Hanani, who prophesied the downfall of Baasha's line (1 K. 16:1, 7, 12). This may be the same person who rebuked Jehoshaphat of Judah for allying with Ahab of Israel against the Syrians at Ramoth-gilead (2 Ch. 19:2f.). The "chronicles of Jehu the son of Hanani, which are recorded in the Book of the Kings of Israel" (2 Ch. 20:34) may have been written by this prophet.

3. One of David's heroes, a Benjaminite from Anathoth (1 Ch. 12:3).

4. Son of Obed of the family of Jerahmeel (1 Ch. 2:38).

5. Son of Joshibiah, of the tribe of Simeon (1 Ch. 4:35). R. K. H.

JEHUBBAH jə-hub'ə [Heb. *yᵉḥubbâ*]. A descendant of Asher mentioned in 1 Ch. 7:34, where *Q* (followed by LXX B) is *wᵉḥubbâ*, "and Hubbah," but *K* is *yaḥbâ*.

JEHUCAL jə-hōō'kəl [Heb. *yᵉhûḳal*–prob. 'Yahweh is powerful']. A courtier sent by King Zedekiah to Jeremiah to ask the prophet to pray for the king and the people (Jer. 37:3). Most versions except LXX have "Jucal" (Heb. *yûḳal*), as in 38:1.

JEHUD jē'hud [Heb. *yᵉhûḏ*]. A town in the lot of Dan named between Baalath and Bene-berak (Josh. 19:45). The only possible identification seems to be with el-Yehudīeh, which lies about 13 km. (8 mi.) E of Joppa, although *WHAB* (p. 14) prefers to follow LXX B *Azōr* and read "Jazar" (modern Yazur), a town about 6 km. (4 mi.) SE of Joppa.

JEHUDI jə-hōō'dī [Heb. *yᵉhûḏî*–'a Jew']. An officer of King Jehoiakim (Jer. 36:14, 21, 23). He was sent by the princes to summon Baruch to read the roll containing Jeremiah's prophecies to them; he afterward read them to the king, who destroyed the roll. His name, along with that of his great-grandfather Cushi (i.e., "Ethiopian"), is noteworthy, indicating foreign origin of the family and the possible naturalization of Jehudi.

JEHUDIJAH jə-hōō-dī'jə [Heb. *hayᵉhuḏîyâ*] (1 Ch. 4:18, AV). The proper name of the wife of Eshtemoa in the AV. The word literally means "the Jewish (one)" and is translated "his Jewish wife" in the RSV and NEB.

JEHUEL jə-hōō'əl [Heb. *K yᵉḥû'ēl*; *Q yᵉḥî'ēl*; AV, NEB, JEHIEL (2 Ch. 29:14)]. A Levite; *see* JEHIEL **5.**

JEHUSH jē'hush (1 Ch. 8:39, AV). *See* JEUSH **3.**

JEIEL jə-ī'əl [Heb. *yᵉʿî'ēl*–'God has kept'(?)].

1. A Reubenite (1 Ch. 5:7).

2. In 1 Ch. 8:29, added in the RSV from 9:35, where *K* is "Jeuel," an ancestor of King Saul; AV Jehiel.

3. One of David's mighty men, son of Hotham the Aroerite (1 Ch. 11:44; *K* Heb. *yeʿû'ēl*; AV Jehiel).

4. A Levite, keeper of the ark with Obed-edom (1 Ch. 15:18, 21; 16:5; 2 Ch. 20:14), called "Jehiah" in 1 Ch. 15:24.

5. A Levite (1 Ch. 16:5), the JAAZIEL of 1 Ch. 15:18.

6. A scribe under King Uzziah (2 Ch. 26:11).

7. A chief of the Levites, present at King Josiah's great Passover feast (2 Ch. 35:9).

8. One of those who had married foreign wives (Ezr. 10:43).

JEKABZEEL jə-kab'zē-əl [Heb. *yᵉqaḇṣᵉ'ēl*–'God gathers'] (Neh. 11:25). *See* KABZEEL.

JEKAMEAM jek-ə-mē'əm [Heb. *yᵉqamʿām*– prob. 'may kinsman establish']. Head of a Levitical house (1 Ch. 23:19; 24:23).

JEKAMIAH jek-ə-mī'ə [Heb. *yᵉqamyâ*–'may Yahweh establish'].

1. A Judahite, son of Shallum (1 Ch. 2:41).

2. A son of King Jeconiah (Jehoiachin) in 1 Ch. 3:18; AV Jecamiah.

JEKUTHIEL jə-kōō'thi-əl [Heb. *yᵉqûṯî'ēl*–'may God sustain'(?)]. A Judahite who was descended from Mered (1 Ch. 4:18).

JEMIMAH jə-mī'mə [Heb. *yᵉmîmâ*–perhaps a diminutive meaning 'little dove']. The first daughter of Job (42:14) born after his restoration from affliction.

JEMNAAN jem'nə-ən [Gk. *Iemnaan*] (Jth. 2:28, AV, NEB); RSV JAMNIA. A coastal city in Palestine terrorized by the Holofernes. *See* JABNEEL **2.**

JEMUEL jə-mōō'əl, jem'yōō-əl [Heb. *yᵉmû'ēl*]. A son of Simeon (Gen. 46:10; Ex. 6:15), the same as Nemuel in Nu. 26:12; 1 Ch. 4:24.

The Pesh. has "Jemuel" in the four passages, but Gray (*Studies in Hebrew Proper Names*, p. 307 n. 6) thinks it more likely that "Jemuel" is a correction in Genesis than that "Nemuel" is a correction in Numbers.

JEOPARD jep'ərd. The verbal form of an English word that referred originally to a game in which the chances were even (from Old French *jeu parti*), now used to designate any great risk. In the RSV it occurs once only, in Jgs. 5:18 for a Hebrew idiom, "despise the soul," i.e., they placed a small value upon their lives (Vulg. "offered their souls to death").

JEPHTHAH jef'thə [Heb. *yiptāḥ*–'opened', or 'opener,' prob. signifying "Yahweh will open"; Gk. *Iephthae*]; AV NT JEPHTHAE (He. 11:32). The designation also appears as a place name, Iphtah (Josh. 15:43). Jephthah was the ninth judge of Israel, who gave charismatic leadership for six years (Jgs. 11:1–12:7). He was the son of a harlot and a man named Gilead and appears to have been the only illegitimate child in the household. The name "Gilead" was in use among the Canaanites of the late Amarna Age, as indicated by its occurrence in Ugaritic texts from *ca.* 1300 B.C. Because of his origin he was denied a share in the family inheritance by the legitimate offspring of Gilead (Jgs. 11:2) and subsequently became leader of a band of robbers in the area known as Tob. This place was located NE of Ramoth-gilead and has been identified with eṭ-Ṭaibiyeh, a site about 24 km. (15 mi.) ENE of Ramoth-gilead. The marauding band under Jephthah's leadership would survive by making periodic raids on merchant caravans and settled communities in the Tob district.

These exploits must have become known to the Israelites in the north, for it was to Jephthah that the elders or leaders (Heb. *śārîm*) of Gilead turned when the Ammonites declared war on the Hebrews during a time of religious apostasy in Israel. In bargaining with the elders, Jephthah

agreed to fight the Ammonites provided that he became the official leader of all the Gileadite clans once victory had been assured. A lengthy section (Jgs. 11:12-28) described Jephthah's preliminary negotiations with the Ammonites, in which the Hebrew leader rejected the claim that both Ammon and Moab had been deprived of some ancestral holdings when the Israelites left Egypt under Moses.

This passage recounted accurately the events described in Nu. 20–22 and pointed out that a victory had been won over the Amorites, resulting in the occupation of their land and not Moabite or Ammonite territory. It is incorrect to regard this section as an interpolation of much later date, based upon alleged pentateuchal sources, as some literary critics have done, if only because the practice of issuing charges and countercharges before battle was joined was a feature of the Mediterranean Heroic Age (12th and 11th cents. B.C.) and later periods (cf. 1 S. 17:41-47; 2 K. 14:8-10; etc.). Nor is there any real confusion of Ammonite and Moabite history in the mention of Chemosh, the national god of Moab, as though he were an Ammonite deity, because at that period Ammon and Moab worshiped each other's gods. When the text is read carefully within the context of Heroic Age traditions, the account appears as a contemporary description of Hebrew attempts to ward off a marauding Transjordanian people who were posing a threat to the security of the chosen people in the pre-monarchy period.

Jephthah endeavored to secure victory by promising God that he would sacrifice whoever came out of his house first to greet him on his return home. Human sacrifices of this and other kinds were not unknown then, either in Israel (cf. 2 K. 16:3; 17:17; Jer. 7:31; etc.) or in Greek tradition, as with the account by Aeschylus of the sacrifice of Iphigenia daughter of Agamemnon (Aeschylus *Agamemnon* 228-247). When Jephthah defeated the Ammonites (Jgs. 11:32f.), he was shocked on his return to be greeted by his only daughter. Because of his vow he had no option but to offer her in sacrifice, perhaps feeling that God would intervene at the last moment, as He had done with Abraham (Gen. 22:11f.). The death of the young woman initiated the tradition of a four-day annual pilgrimage of lamentation by Israelite females (Jgs. 11:39f.), perhaps as a protest against human sacrifice. The view, formerly espoused by liberal scholarship, that the procession was part of a pagan mourning ceremony for the dead vegetation-gods Tammuz or Baal cannot be upheld any longer, since the time of year when the Hebrew ritual was conducted is unknown and thus cannot be associated with pagan Canaanite ceremonies of cultic mourning.

Shortly after his victory over the Ammonites, Jephthah was accused by the Ephraimites of neglecting them when calling for assistance against Ammon. He defended himself by saying that he had in fact appealed to the Ephraimites, but also pointed out that he and his followers had their own feud with the Ammonites (Jgs. 12:2). Scholars are probably correct in suggesting that there was long-standing hostility between Ephraim and Gilead, since some people from the latter group had been derided at one point as "fugitives of Ephraim" (Jgs. 12:4). Jephthah's answer to the Ephraimites was apparently unsatisfactory, and war broke out between the two groups. The Gileadite guards at the Jordan fords adopted an unusual pronunciation test to detect fleeing Ephraimites that resulted in 42,000 of them being killed (Jgs. 12:6).

Although Jephthah never claimed the title of "judge," he was one of the most illustrious leaders of that period of Hebrew history. A man of energy and conviction who was used by the Spirit of God, he fought valiantly against the pagan Ammonites. He was faithful in his vow to God, even though it cost him dearly, and in the NT was included in the category of great people of faith (He. 11:32).

Bibliography.–R. G. Boling, *Judges* (*AB*, 1975); *IP*, pp. 28f., 179, 200; C. A. Simpson, *Composition of the Book of Judges* (1957).

R. K. HARRISON

JEPHUNNEH jə-fun'ə [Heb. *yᵉpunneh*].

1. Father of Caleb (Nu. 13:6; 14:6, 30; etc.). According to Nu. 13:6 he was of the tribe of Judah; according to 32:12 and Josh. 14:6 a Kenizzite; the Kenizzites were incorporated in Judah (cf. 1 Ch. 4:15).

2. A son of Jether, an Asherite (1 Ch. 7:38).

JERAH jē'rə, jer'ə [Heb. *yeraḥ*–'moon']. A descendant of Joktan (Gen. 10:26; 1 Ch. 1:20). The others named include Hazarmaveth (Hadramaut), Sheba, and Ophir, all of whom are considered eponymous founders of places in South Arabia (and possibly in the case of Ophir, eastern Africa, e.g., Somaliland). A place named Jerah has not been identified; the preponderance of words for "moon" and their compounds in South Arabic further complicates the situation.

W. S. L. S.

JERAHMEEL jə-rā'mē-əl [Heb. *yᵉraḥmᵉ'ēl*–'may God have compassion'].

1. In 1 Ch. 2:9, 25-27, 33, 42, he is described as the son of Hezron, the son of Perez, the son of Judah by Tamar his daughter-in-law (Gen. 38). 1 S. 27:10 mentions the Negeb of the Jerahmeelites. This tribe was first alluded to in the early days of David (cf. 1 S. 30:29), and in postexilic writings was regarded as a clan of the tribe of Judah. Historians have assumed that the Jerahmeelites, like the Calebites (cf. 1 Ch. 2:9, 18), felt the pressure of Edomite expansion after the Exile and moved from their cities to the areas around Jerusalem (cf. *ORHI*, I, 101, 135).

2. A Merarite Levite, son of Kish (1 Ch. 24:29).

3. A contemporary of Jeremiah (cf. Jer. 36:26) who served as an official under King Jehoiakim (609-598 B.C.). The king of whom he was a "son" could hardly have been Jehoiakim, who would only have been about thirty at the time (cf. Jer. 36:9), but perhaps the term "son" merely meant "descendant," implying royal birth. The AV took the MT "the king" as a proper name, Hammelech.

R. K. H.

JERECHUS jer'ə-kəs (1 Esd. 5:22, AV, NEB). *See* JERICHO.

JERED jer'əd [Heb. *yereḏ*]. A Judahite, father of Gedor (1 Ch. 4:18). *See also* JARED.

JEREMAI jer'ə-mī [Heb. *yᵉrēmay*]. One of those who had married foreign wives in the time of Ezra (Ezr. 10:33); AV, NEB, JEREMIAS (1 Esd. 9:34).

JEREMIAH jer-ə-mī'ə [Heb. *yirmᵉyāhû, yirmᵉyâ;* Gk. *Ieremias;* Latin *Jeremias*]. A name of uncertain meaning, suggestions being "Yahweh founds," "Yahweh exults," "Yahweh loosens," or "Yahweh throws." The OT mentions nine different people by this name:

1. The prophet, son of Hilkiah (*see* JEREMIAH, BOOK OF).

2, 3, 4. A Benjaminite and two Gadites who, with other warriors, joined David at Ziklag (1 Ch. 12:4, 10, 13 [MT 5, 11, 14]).

5. Head of a Manassite family (1 Ch. 5:24).

6. Father of King Josiah's wife Hamutal, hence grandfather of King Jehoahaz (2 K. 23:31) and King Zedekiah (2 K. 24:18; Jer. 52:1).

7. Father of Jaazaniah, the head of the Rechabites in the time of Jeremiah the prophet (Jer. 35:3).

8. A priest who, with Zerubbabel, went up to Jerusalem from exile and became head of a priestly family (Neh. 12:1, 12).

9. A priest who, with Nehemiah, set his seal to the covenant (Neh. 10:2 [MT 3]) and took part in the dedication of the wall of Jerusalem (Neh. 12:34).

S. K. SODERLUND

JEREMIAH, BOOK OF. The book which goes by the name of one of Israel's greatest prophets, who was active in the last years of the kingdom of Judah (*ca.* 645-575 B.C.); Jeremiah stands second among the Major Prophets, following Isaiah and preceding Ezekiel (except in one rabbinic tradition, preserved in T.B. *Baba Bathra* 14b, where it stands first, followed by Ezekiel and Isaiah).

I. Historical Background
II. Jeremiah's Message and Character
III. The Book
  A. Structure
  B. Sources
  C. Texts

I. Historical Background.–Our sources for reconstructing the life and times of Jeremiah the prophet are principally (1) the book of Jeremiah; (2) the historical narratives in 2 K. 21–25 and 2 Ch. 33–36; (3) the books of other prophets active around his time (Zephaniah, Nahum, Habakkuk, Ezekiel); and (4) archeological discoveries of extrabiblical records (e.g., D. J. Wiseman, *CCK; ANET,* pp. 321f.; *DOTT,* pp. 212-17; and W. F. Albright, *JBL,* 51 [1932], 77-106).

According to Jer. 1:1f. (henceforth references are always to the book of Jeremiah unless stated otherwise), Jeremiah was born in the village of Anathoth, which was located at or near the present-day village of 'Anâtâ, some 5 km. (3 mi.) N of Jerusalem. His father was Hilkiah the priest, possibly a descendant of the priest Abiathar banished to that village by Solomon (1 K. 2:26), but probably not the high priest of that name who discovered "the book of the law" in Josiah's reign (2 K. 22:8). While still a youth, in the thirteenth year of the reign of King Josiah, 627/6 B.C., Jeremiah was called to be a prophet. Some scholars discount this chronology and reinterpret 1:1-3, claiming that Jeremiah did not begin his ministry till considerably later (cf. J. P. Hyatt, *IB,* V [1956], 779f.; for a reply, cf. T. W. Overholt, *CBQ,* 33 [1971], 165-184).

According to the traditional date, the time of his call coincided approximately with the death of the last great Assyrian ruler, Ashurbanipal, an event which signaled the disintegration of the Assyrian empire under whose yoke Judah had served for nearly a century. Against the waning power and influence of the Assyrians, Judah asserted its independence under Josiah, and for a time the prospects for a secure national future appeared promising. But the next generation was destined to experience the most catastrophic reversal of fortune in the nation's history, leading to ultimate destruction and captivity in 586 B.C. at the hands of the Neo-Babylonians, who by that time had emerged as the undisputed rulers of the ancient Near East. Into these turbulent and tragic times Jeremiah was called to be God's spokesman. Since his career spanned the reigns of the last five kings of Judah and the first years of the Captivity, the principal events of his life and times may be summarized under the following chronological headings.

A. Under Josiah (639-609 B.C.). King Josiah was a pious man who, in marked contrast to his immediate predecessors Manasseh and Amon, early in his reign "began to seek the God of David his father" and institute religious reforms (2 Ch. 34:3). This reforming spirit was greatly accelerated in the eighteenth year of his reign (622/1 B.C.) upon the discovery in the temple precincts of the Book of the Law which, when read to Josiah, brought a sudden realization of the seriousness of the nation's backsliding, motivating king and people to make a new covenant with Yahweh, their God (2 K. 22:3–23:23; 2 Ch. 34:8–35:19). There can be little doubt that this national repentance warmed the heart of the young prophet, and for a time at least he may have actively supported the reformation by speaking on behalf of its ideals (cf. the "Covenant Sermon" [11:1-8], which may be derived from this period).

It seems certain, however, that with the passing of years, Jeremiah became increasingly disillusioned with the superficiality of the reformation and his preaching became more critical (cf. the "Sabbath Sermon" [17:19-27], which possibly reflects this stage). In fact, from the earliest days of his ministry Jeremiah had been convinced of the ultimate fate of his people and had not hesitated to describe it (cf. the bulk of the judgment oracles of chs. 2–6). This kind of preaching made him the object of much hostility, especially in his native town of Anathoth where his brethren or close relatives planned a conspiracy against him (11:21; 12:6). Nevertheless, the condition of Jeremiah under Josiah was probably the happiest of his career. When the popular king was tragically killed at Megiddo in vain pursuit of the Egyptians who were hurrying to the aid of the beleaguered Assyrians, Jeremiah uttered a sad lament on his untimely death (2 Ch. 35:25).

B. Under Jehoahaz (609 B.C.) *and Jehoiakim* (609-598 B.C.). With the death of Josiah, his son Jehoahaz (called Shallum in the book of Jeremiah) was immediately proclaimed king, but after a short rule of three months he was summarily deposed by Pharaoh Neco (then master of Palestine) and deported to Egypt. The first leader of Judah to die in exile, Jehoahaz received the announcement of his judgment from Jeremiah (22:10-12). In his place, Neco put another of Josiah's sons, Jehoiakim, on the throne of Judah. This was an unhappy choice, both for the nation and for Jeremiah. Jehoiakim was not inclined to follow the godly example of his father Josiah, but reverted to idolatry, self-indulgence, and rebellion. Surrounded by a circle of ambitious nobles and self-appointed prophets, Jehoiakim and his party lived under the illusion that their future was guaranteed by the presence of the Solomonic temple in their midst and by eternal divine favor to David's royal lineage. Their corrupt behavior and false sense of security elicited the most vigorous protests from Jeremiah (cf. 22:13-19 and the "Temple Sermon," 7:1-15; 26:1-6), an outspokenness which nearly cost the prophet his life (26:7-24).

In the critical fourth year of Jehoiakim's reign, 605 B.C., the armies of Babylon under the leadership of Nebuchadrezzar defeated the forces of Pharaoh Neco at Carchemish, and thus gained control of the upper Euphrates and Syro-Palestine (46:2). Jeremiah clearly foresaw the course of events from there: Nebuchadrezzar would advance into Palestine, take Judah captive, and send the people into exile for seventy years (25:1-14). It was in that year, too, that Jeremiah was commissioned to write his oracles on a scroll which was later burned by the king. In reply, Jeremiah uttered a prophetic judgment concerning Jehoiakim's ignominious death and proceeded to dictate a second scroll (ch. 36). For three years Jehoiakim served Nebuchadrezzar as his vassal but then rebelled (2 K. 24:1), possibly due to a temporary Babylonian setback at the hands of the Egyptians in 601 B.C. When Nebuchadrezzar had reequipped his army, retaliation by the Babylonians was a foregone conclusion, and in 598 B.C. they marched on Palestine, capturing Jerusalem in March of the following year, 597 B.C. Jehoiakim had died three months before the fall of the city, perhaps assassinated by pro-Babylonian parties

in Jerusalem or slain in battle. In his stead, his son Jehoiachin (in the book of Jeremiah called Jeconiah or simply Coniah) was made king.

C. Under Jehoiachin (597 B.C.) *and Zedekiah* (597-586 B.C.). When the armies of Babylon entered Jerusalem they carried off the temple treasures and took Jehoiachin captive together with a large number of his nobles and the best part of the people (2 K. 24:10-16; Jer. 24:1), as Jeremiah had predicted (22:24-30). As local ruler in Jerusalem the conquerors installed the exiled king's uncle, Zedekiah. But this signified no improvement in the quality of the city's leadership. Although he seems not to have been personally hostile to Jeremiah, Zedekiah was completely under the sway of his pro-Egyptian advisers, who continually plotted evil against Jeremiah and urged rebellion against Babylon (e.g., 28:1-4). Jeremiah insisted that the only sane course was submission to Babylon, but for this counsel he was branded unpatriotic and apprehended as a traitor. At one point he would have died in a murky cistern but for the intervention of a benevolent foreigner, Ebed-melech (38:1-13). In the end, Jeremiah's worst predictions were fulfilled when, in response to another rebellion in Judah, the Babylonians again marched on Palestine and after a long siege — temporarily lifted by the approach of the Egyptians (37:5) — breached the walls of Jerusalem and set the city to the torch, this time being content with nothing less than total destruction. Zedekiah himself was taken in flight, blinded, and transported to Babylon. The year was 586 B.C. (for the date 587 cf. *BHI* [2nd ed. 1972], p. 329, and literature cited there), and it terminated for many generations the nationhood of Judah.

D. After the Fall of Jerusalem (586-*ca.* 575 B.C.). At the time of the capture of the city, Jeremiah was under arrest in the court of the guard, but because of his pro-Babylonian pronouncements he was given preferential treatment by the invaders (39:11-14). Presented with the choice of either going to Babylon under royal protection or staying in Judah, Jeremiah decided to cast his lot with the poor remnant that was left in the land. But his troubles were by no means over. When conspirators murdered the Babylonian-appointed governor Gedaliah, the Jews became alarmed; fearing retaliation by their overlords, they fled to Egypt, unheedful of Jeremiah's warnings and protestations (42:7-22). They even forced the aged prophet to go with them, but they could not silence him; at Tahpanhes, where they settled, Jeremiah continued to the end of his days to prophesy against his people and other nations, including Egypt (43:8–44:30). The circumstances of his death are unknown. The church fathers report that he was stoned by Jews in Tahpanhes, but according to a rabbinic tradition (*Seder Olam Rabbah* 26) he was eventually taken to Babylon with Baruch and died there; however, neither story is well founded.

II. Jeremiah's Message and Character.–The account of Jeremiah's call in ch. 1 serves as a convenient introduction to the main elements of his message. In this passage, Jeremiah relates how he was commissioned "to pluck up and to break down, to destroy and to overthrow, to build and to plant" (v. 10). At the outset, therefore, we learn that his preaching was to be both destructive and constructive, reproving as well as edifying. The call pericope, moreover, recounts the international scope of Jeremiah's message: he was appointed "a prophet to the nations" (v. 5), these nations being in the first instance Israel and Judah, but also "all the kingdoms of the world" (25:26).

In the continuation of the narrative Jeremiah is presented with two ominous visions. The first is that of an almond rod (Heb. *šāqēḏ*), which is a reminder that God is watching (Heb. *šōqēḏ*) over His word to perform it, i.e., He will keep His promise of judgment (1:11f.). The second vision, that of the boiling pot facing away from the north, serves notice that the agents of the divine judgment will be a people from the north, unspecified here (1:13-16), but later (25:8-14) identified with the Babylonians (for the view that in his early ministry Jeremiah identified the foe from the north with the Scythian raiders see the comment and bibliography in R. K. Harrison, *Intro. to the OT* [1969], pp. 803f.). Next the causes of the impending judgment are specified, these being chiefly apostasy and idolatry (1:16). Taken together these two sins constitute a fundamental breach of the covenant between the chosen people and their God.

This theme of the broken covenant was destined to become one of Jeremiah's major preoccupations in his subsequent ministry. In the covenant enacted between God and His people at Mt. Sinai, the Israelites promised to render total loyalty and obedience to Yahweh their God in return for His everlasting care and protection. According to the book of Deuteronomy, this covenant was renewed on the plains of Moab prior to entry into Canaan, and it was the Deuteronomic version of the covenant (for the view that the book itself is a covenant-renewal document, cf. P. C. Craigie, *Book of Deuteronomy* [*NICOT*, 1976], pp. 36-45) which most profoundly influenced Jeremiah — not surprisingly, if it was this book, or some portion of it, that was rediscovered at the time of Josiah's reformation.

Modern archeological discoveries and scholarly discussions have illuminated the significance that the covenant motif had for Jeremiah and his contemporaries. In 1954, G. E. Mendenhall pointed out the resemblance in structure between Hittite suzerainty treaties of the late 2nd millennium and the biblical Sinaitic covenant (*BA*, 17 [1954], 26-46 and 50-76), the implication being that Israel conceived of itself as a vassal nation to Yahweh, the Great King. Since Jeremiah more than any other prophet employs the vocabulary of the covenant, the relevance of these comparisons for an understanding of his message is immediately obvious. Although scholarly discussion has probably gone too far in making the treaty model the determining principle in the interpretation of the prophetic message (cf. R. E. Clements, *Prophecy and Tradition* [1975], pp. 14-23), it seems fairly established that in his use of the covenant theme the prophet was deliberately referring to a concept familiar to many of his hearers.

Of particular significance in this connection is Jeremiah's appeal to the curses that would attend the nation's rebellion against Yahweh. Like the suzerainty treaties, the book of Deuteronomy provided for a set of curses to be invoked upon the violation of the covenant (Dt. 28:15-68), and it may be that Jeremiah had these in mind when he announced Yahweh's message, "Cursed be the man who does not heed the words of this covenant" (Jer. 11:3). Jeremiah's stern indictment against Judah was that by idolatry and apostasy the people had violated their agreement with Yahweh to the point that judgment was inevitable. Under various images, e.g., the unfaithful wife, the ox that breaks its yoke, the vine that bears strange fruit, the stain that will not wash — some of which he learned from previous prophets, notably Hosea and Isaiah — Jeremiah reinforced his message of the broken relationship between Yahweh and His people as well as the catastrophic consequences of their faithlessness.

But Jeremiah had a difficult -- nay, impossible — time convincing his countrymen of the seriousness of their action. Essentially the problem was one of different views of the covenant, for the religious hierarchy of Jerusalem had a covenant theology too, but of a different sort. Whereas Jeremiah insisted that Yahweh's protection was condi-

tional upon the faithful performance of the terms of the covenant, the popular theology sponsored by the temple priests and prophets taught that Yahweh was irrevocably committed to the preservation of Jerusalem, the temple, and the Davidic line. This theology could accommodate the prospects of intermittent divine discipline, but never of total destruction.

Such diametrically opposed views of Israel's election were inevitably on a collision course, and the issue came to a head in Jeremiah's famous "Temple Sermon" (7:1-15; 26:1-6). In this address, Jeremiah unconditionally rejected the official theology of trust in an inviolable temple. The temple of Jerusalem was no more sacrosanct, he declared, than the sanctuary at Shiloh which God had destroyed. This kind of language raised passions to a feverish pitch, and Jeremiah barely escaped being lynched on the spot. In response to Jeremiah's charges the promoters of the official religion could point to a flourishing temple cult, in their opinion surely evidence of true worship. But to Jeremiah this cult was utterly reprehensible (cf. 6:20f.). Not that he seems to have condemned the system as such, but Jeremiah could not stomach the hypocrisy that attended it. For even while the people were bringing their oblations and professing their innocence their hands were full of blood with oppression of the guiltless poor (2:34f.). For Jeremiah, ceremonial worship had no validity apart from the attitude of the heart. The external observances of an apostate people were the final insult that would culminate in the outpouring of divine wrath.

In spite of Jeremiah's gloomy predictions, he also was able to see beyond the immediate tragedy of his people to a brighter future. Occasionally, even in the earliest chapters, the gloom of a procession of judgment oracles is punctured by a message of promise and restoration (cf. 3:15-18), but the fullest expression of this aspect of Jeremiah's message is found in the consolation oracles and narratives of chs. 31–34. According to the core of this section (31:31-34, quoted twice by the author of Hebrews [He. 8:8-12; 10:16f.], and alluded to by Paul [2 Cor. 3:3]), the old covenant which was being abrogated would be replaced by a new covenant. Whereas the old had been written on tables of stone, the new would be engraved on hearts of flesh.

Included in Jeremiah's vision of a new future for Judah and Israel was also a restored line of David, embodied in the person of the Messiah (33:14-26). It is remarkable that even as Jeremiah's worst predictions were being fulfilled and the Babylonian army surrounding Jerusalem was preparing for the coup de grace, Jeremiah set out for Anathoth to invest in a piece of real estate in his native village — a powerful symbolic action demonstrating his faith in a restored future. Such action was consistent with Jeremiah's message of judgment, because in the final analysis his faith was grounded in a view of God as the supreme Lord of history whose purpose for the good of His people could not finally be frustrated.

Thanks to the preservation of several autobiographical poems (principally 11:18-20; 15:10-18; 17:9-18; 18:18-23; 20:7-18) and many narrative passages by a sympathetic observer, we are unusually well informed about the person and character of Jeremiah. The biographical narratives provide the dramatic background for his life, while the personal poems (sometimes rather inappropriately called the "Confessions") reveal the prophet's inner struggles. In the biographical narratives we are presented with the picture of a man of action and fortitude who, in spite of tremendous opposition and physical persecution, fearlessly proclaimed God's word and boldly denounced the evils of his day, especially corruption in high places and religious idolatry among the populace. The picture thus drawn is a true one, for only a man of great personal courage could persist in the proclamation of an unpopular message in defiance of the politico-religious establishment of his day. But this is only half the story; the other half is told in the autobiographical meditations.

In these moving compositions we meet a very human prophet, indeed, one plagued by a sense of inadequacy, given to moods of depression, doubt, and despair. At the root of Jeremiah's problem was the tension between his naturally tender disposition and the hard message of judgment he was called to proclaim. Deeply involved emotionally in his message and the fate of his people, his sensitive soul recoiled at the thought of the impending destruction of Jerusalem and the inevitable suffering of the people he loved. Their rejection of his message he took as a personal affront, while their scorn and plots of physical violence frequently demoralized his spirit. This led him to a love/hate relationship with his countrymen: sometimes he wanted to intercede and weep for them; other times he was tempted to abandon them altogether and condemn his personal enemies to Sheol.

Besides being at odds with himself and with his brethren, Jeremiah carried on an agonizing quarrel with God. Pleading immaturity and inability, Jeremiah felt called to the prophetic office against his will and complained of having been overpowered by One stronger than himself. For a time he had rejoiced when God spoke to him, but later he felt betrayed. The prophecies spoken in God's name did not immediately materialize and Jeremiah became the laughingstock of his peers. Instead of the vindication of divine justice on wrongdoers, the wicked seemed to prosper and Jeremiah's opponents flourished — apparently protected by God Himself! Thus humiliated, Jeremiah wanted to quit, but could not; he cursed the day of his birth, but had to go on living. In the light of these spiritual and emotional crises it is remarkable that he did not collapse under the pressure. But his weaknesses also revealed his strengths; for underneath his frustration and disquieting meditations, Jeremiah was a man of extraordinary faith, confidence, and above all prayer. This is highlighted dramatically when, in one of his depressed moments, he was nevertheless able to say, "Heal me, O Lord, and I shall be healed; save me, and I shall be saved; *for thou art my praise*" (17:14; italics mine). Such demonstration of personal faith has been an inspiration for generations of believers.

A challenge to the traditional way of understanding the character of Jeremiah has come in the form-critical study by H. G. Reventlow, *Liturgie und prophetisches Ich bei Jeremia* (1963). According to this work, Jeremiah was the holder of a cultic office who submerged his individuality in his role as public spokesman. The first-person mode of speech was simply a convention for giving expression to communal feelings, hence it may not be used to sketch the personality of the prophet. Reventlow's theory, however, has not met with widespread acceptance (for critiques cf. J. Bright, "Jeremiah's Complaints: Liturgy or Expression of Personal Distress?" in J. I. Durham and J. R. Porter, eds., *Proclamation and Presence* [1970], pp. 189-214, and J. M. Berridge, *Prophet, People, and the Word of Yahweh* [1970]).

III. The Book.–*A. Structure.* A person approaching the book of Jeremiah for the first time is likely to be disconcerted. If he comes with modern notions regarding coherent structure, logical development, and chronological sequence, he is sure to be disappointed. But then Jeremiah is not a modern book and must not be judged by those standards. In fact, it is not a book at all, according to the

usual sense of the word. A more apt comparison might be the anthology, but the great variety of material included (oracles, sermons, autobiographical poems, and historical narratives) makes it doubtful that even this category is wholly adequate. Probably no modern term exists which adequately describes the nature of this ancient document, and we are thrown back to the Bible itself for the only valid frame of reference.

In this context — specifically, the prophetic corpus of the OT — the book finds its natural setting as a record of the words and deeds of the prophet Jeremiah, similar to some other prophetic books. But even so, the problem of structure will not go away; of all the prophetic books, this is the most complex. Particularly acute is the problem of chronology, examples of which abound, e.g., episodes dated during the reign of Jehoiakim (609-598 B.C.) are found dispersed in chs. 25, 26, 36, and 45, while passages from the time of Zedekiah (597-586 B.C.) occur in chs. 21, 24, 27 (MT 27:1 "Jehoiakim" is probably a scribal error), 32, and 39. Additional problems such as the apparently random juxtaposition of oracles of judgment with those of blessing, and prose sermons with autobiographical poems, have led some scholars to adopt a counsel of despair and abandon the MT altogether in their expositions of the book (cf. the comms. of Leslie and Bright). Other scholars, however, claim to have discovered structural principles underlying the present arrangement and have accordingly proposed various outlines by which to survey the contents of the book. The fact that these outlines are as numerous and as varied as the commentators who have proposed them ought to say something about the difficulty — perhaps impossibility — of the task. Nevertheless, the situation is not altogether desperate. Within limits, it is possible to identify certain blocks of material in the book, some of which, at least, are determined by chronological considerations.

For the purpose of this article it will be most convenient to begin at the end of the book. Ch. 52 is obviously a unit by itself, forming what can best be described as a historical appendix to the book. It is, in fact, a near duplicate passage of 2 K. 24:18–25:30, the latter part of which carries the history of the period down to the thirty-seventh year of Jehoiachin's captivity and his ultimate restoration at the hands of Evil-merodach, king of Babylon. In chs. 46–51 is found another clearly defined unit: the "Oracles Against the Nations" (for similar collections in the prophetic books, cf. Isa. 13–23; Ezk. 25–32; Am. 1–2:4). Preceding this section comes a long, almost unbroken narrative (chs. 37–45) dealing with events immediately prior to and following the fall of Jerusalem. This section preserves chronological continuity throughout, except for ch. 45, which is a private message from Jeremiah to Baruch in Jehoiakim's fourth year.

Working back from ch. 36, division markers become more diffuse, notwithstanding that traditionally the most popular approach has been to see a pivotal dividing point in the book at ch. 25. The main reason for this is the finale-like sentence found in 25:13, "I will bring upon that land all the words which I have uttered against it, everything written in this book," at which point the LXX (see III.C below) inserts the section of the "Oracles Against the Nations." Although the witness of the LXX gives a certain plausibility to this scheme, and although it conveniently divides the book into two nearly equal halves, other considerations make ch. 25 a less convincing division point. There appears to be no obvious difference between the material contained in the chapters immediately preceding ch. 25 and those immediately following it. They all relate miscellaneous incidents from the life of Jeremiah during the reigns of Jehoiakim and Zedekiah (an exception being the "book of consolation," chs. 30–31). Since these miscellaneous incidents from the life of Jeremiah commence with ch. 21, it seems better to take chs. 21–36 as a loose historical section by itself.

We are thus left with chs. 1–20 as the remaining unit. This section appears to contain a collection of Jeremiah's oracles, sermons, and personal meditations from the first half of the prophet's ministry, i.e., from the time of his call to the early part of Jehoiakim's reign, perhaps the critical fourth year of his reign, 605 B.C. With one exception (3:1), this section is characterized by an absence of the type of chronological formula so common in later chapters, e.g., "the word which came to Jeremiah from the Lord, when King Zedekiah sent to him Pashhur . . ." (21:1). The one exception, 3:1, is the only dated oracle from the time of Josiah. New support for the isolation of chs. 1–20 as a self-contained unit comes from the studies on rhetorical structure by J. Lundbom, pp. 28-30, and W. L. Holladay, *Architecture of Jeremiah 1–20* (1976).

On the basis of the preceding discussion, we may propose the following basic outline for the book of Jeremiah:

I. Prophecies and Poems of Jeremiah (627/6–605 B.C.), chs. 1–20
II. Historical Narratives from the Time of Jehoiakim and Zedekiah (605-587 B.C.), chs. 21–36
III. Events Immediately Prior to and Following the Fall of Jerusalem (587-*ca.* 570 B.C.), chs. 37–45
IV. Oracles Against the Nations, chs. 46–51
V. Historical Appendix, ch. 52

B. Sources. In ch. 36 we are given a unique insight into the circumstances that brought part of this book into being. The chapter relates how, in the crucial fourth year of King Jehoiakim's reign, Jeremiah dictated to his secretary Baruch all the words that God had spoken to him since the beginning of his ministry twenty-three years earlier (cf. 25:1-3). When in the fifth year of Jehoiakim's reign the king in utter contempt of Jeremiah's message burned the scroll column by column as it was being read to him, Jeremiah resolutely dictated a second scroll, to which "many similar words were added" (36:32). This suggestive narrative has not failed to attract the attention of scholars, for it would be most instructive to know what material was contained in Baruch's scroll (*Urrolle*) and whether it is possible to isolate its contents within the present Jeremianic corpus.

If the contents of the scroll are retrievable at all, they must be found within certain limits imposed by the narrative itself. One such limit is the divine command that the oracles deal with messages spoken "against Israel and Judah and all the nations" (v. 2). Another limit is the chronological one of Jehoiakim's fourth year for the first scroll and his fifth year for the second scroll. A third consideration is the fact that it must not be longer than what could be read publicly three times in one day. These limits have led scholars to focus their search for the *Urrolle* on the first half of the book, usually within chs. 1–25. The reference in 25:13 to "everything written in this book" may suggest the original scroll, but the appearance in chs. 21 and 24 of episodes from the time of Zedekiah eliminates the totality of chs. 1–25 as constituting the *Urrolle*. On the basis of rhetorical structures in chs. 1–10, J. Lundbom has proposed those chapters as designating the limits of the *Urrolle* (pp. 28-30). Most commentators, however, think a smaller unit, e.g., chs. 1–6, or a collection of smaller units within chs. 1–25 serves as a more likely size for a scroll that was read three times in one day. Probably we shall never be able to reconstruct the contents of Jeremiah's scroll, and it must be admitted that the search for the

Urrolle can become something like chasing a will-o'-the-wisp. But this is not to doubt that the formation of the book of Jeremiah had its beginnings in the events related in ch. 36, particularly in Baruch's secretarial activity.

To the same Baruch, however, has been attributed much more than just a secretarial role in the formation of this book. The question arises whether he may not also have been Jeremiah's "biographer." A basic observation with regard to the book is that it uses both the first person and the third person. The characteristic formula introducing the former is: "The word of the Lord came to me, saying . . ." (2:1), found mostly in the first half of the book, while the typical heading introducing the latter is: "The word that came to Jeremiah from the Lord" (7:1). Some third-person narratives are without any such formula altogether and simply relate episodes from the prophet's life and times, e.g., "Now when the Chaldean army had withdrawn from Jerusalem at the approach of Pharaoh's army, Jeremiah set out from Jerusalem . . ." (37:11-21). Such passages were obviously not written by Jeremiah himself but by someone else. The suggestion lies near at hand that this person was Baruch the son of Neriah, Jeremiah's friend and secretary.

While this "Baruch hypothesis" is not amenable to proof, it is the most reasonable proposition in the light of the limited information at our disposal (but cf. G. Wanke, *Untersuchungen zur sogenannten Baruchschrift* [*BZAW*, 122, 1971]). Whether he wrote a separate book which was later combined with Jeremiah's oracles or whether he simply expanded on Jeremiah's collection is, of course, impossible to say. Probably he should not be thought of as a "biographer" in the modern understanding of the term, though some have found it convenient to speak of the third-person material as Baruch's "memoirs." But whether from Baruch or somebody else, there appears to be no convincing reason for doubting that this material preserves authentic highlights from the life of Jeremiah.

Thus far, the book of Jeremiah is composed of a minimum of two sources. Many scholars, however, discern at least a third source for much of its material. Delineation of this third source proceeds from a further basic observation concerning the nature of the book, namely, that there exist side by side in the prophecy both poetry and prose, the prose in turn being of two types, narrative and sermonic. The rediscovery of poetry in the Hebrew Bible is a relatively modern, yet well-established, phenomenon. The pioneering work was done by R. Lowth in the 18th cent., and the first Hebrew Bible to print poetry as poetry was Kittel's edition of 1906. Although perfect unanimity does not exist among scholars on what distinguishes poetry from prose (cf., e.g., 3:14, which is printed as poetry in the RSV and as prose in Bright's comm., while the reverse is true of 3:24f.; see also W. L. Holladay, *JBL*, 85 [1966], 401-435), the distinction is nevertheless secure in the great majority of passages. The poetry is concentrated in 1–20, the prose in the historical narratives of the following chapters.

The first scholar to make the poetry/prose dichotomy a determining principle in his analysis of the book was B. Duhm, who, following certain critical fashions of his time, believed that Jeremiah wrote only in verse, and only in verse of a certain meter (the dirge or qinah). On this basis Duhm assigned 280 verses to Jeremiah; the rest he apportioned between Baruch (220 verses) and later redactors (580 verses). He made the distinction between the Baruch source and the later redactors on the basis of differences in style between the narrative and sermonic prose. This three-source theory, which slowly crystallized in the 19th cent., was given classic and fresh expression by S. Mowinckel in his book *Zur Komposition des Buches Jeremia* (1914). Avoiding Duhm's extreme views on prophetic meter, Mowinckel outlined the three sources as follows: Source A consists of poetry and represents Jeremiah's words; Source B consists of historical narratives, perhaps from a contemporary observer; Source C consists of prose sermons in the first person scattered throughout the book, e.g., 7:1–8:3; 11:1-5, 9-14; 18:1-12; 21:1-10, originating from the exilic or postexilic era (Mowinckel excluded from his consideration the "Oracles Against the Nations"; he also proposed a small D Source of minimal significance). In this form, Mowinckel's study has had a profound effect on the source analysis of the book of Jeremiah; with relatively few modifications his study has formed the basis for the comms. of Volz, Rudolph, and Hyatt.

As a description of the main types of material found in the book of Jeremiah, Mowinckel's contribution is very helpful; problems attach themselves to the interpretation and significance of the results. The center of this controversy has undoubtedly been Mowinckel's C Source, the prose sermons. Impressed by the stylistic similarities of these sermons and discourses to many passages and stereotyped expressions in the book of Deuteronomy, both Duhm and Mowinckel regarded these passages as composed (or edited) in the Exile under Deuteronomic influence with correspondingly negative historical worth for the time of Jeremiah. Many have followed this approach, though with various modifications (cf. E. Nicholson, *Preaching to the Exiles* [1970], and W. Thiel, *Die deuteronomistische Redaktion von Jeremia 1–25* [1973]). However, counter arguments defending the essential authenticity of the prose sermons have not been wanting. Of these, the most persuasive viewpoint has consistently been that of the existence of a contemporary rhetorical style employed by Jeremiah. In various ways this argument has been advanced by W. O. E. Oesterley and T. H. Robinson (*Intro. to the Books of the OT* [1934], pp. 298f.), J. Bright (*JBL*, 70 [1951], 15-35), W. L. Holladay (*JBL*, 79 [1960], 351-367; *JBL*, 81 [1962], 44-54), and H. Weippert (*Die Prosareden des Jeremiabuches* [1973]). In the attacks on the authenticity of the prose sermons and discourses, two arguments appear particularly vulnerable, namely, (1) the suggestion that poetry and prose are such radically different functions of the human mind that the same person could not regularly have employed both, and (2) the contention that certain things could not have been said by Jeremiah because they do not fit his message (e.g., the "Sabbath Sermon," 17:19-27). The first is plainly an overstatement, while the second is too arbitrary and subjective a judgment to carry the weight put upon it. It is methodologically objectionable to set up criteria for the limits of preexilic and exilic theology and then proceed to divide the contents of a book like Jeremiah accordingly.

A radical challenge to the literary analysis of the prose tradition has come from a different quarter altogether, namely, the traditio-historical school associated with certain Scandinavian scholars, notably I. Engnell. Emphasizing the role of oral tradition in the transmission and shaping of the prophetic material, this school rejects as totally inadequate the almost exclusive preoccupation with literary sources that has tended to characterize the study of Jeremiah (as well as other books of the OT). Instead of literary sources, these scholars prefer to think of the coalescence of large blocks of "tradition complexes," e.g., 1–24; 25; 46–51; 26–35; 36–45 (for a demonstration of the method at work, cf. E. Nielsen, *Oral Tradition* [*SBT*, 1/11, 1954], pp. 64-79). While much of this hypothesis is untenable (general critiques may be found in G. W. Anderson, *HTR*, 43 [1950], 239-256; C. R. North, in H. H. Rowley, ed., *OTMS*, pp. 76-81), the point is well taken

JEREMIAH, BOOK OF

that an exclusive interest in literary sources at the expense of oral factors does not do justice to the complexities of the origins of this book.

C. Texts. The text of Jeremiah has been preserved in two different forms: the Hebrew Masoretic Text (MT) and the Greek Septuagint Text (LXX). The principal differences between these texts are length (the LXX has about 2700 fewer words and thus is seven-eighths the length of the MT) and arrangement (the LXX has the section of the "Oracles Against the Nations" [MT chs. 46–51] in the middle of the book following 25:13). The relationship between these two texts has intrigued scholars ever since Origen in the 3rd cent. A.D. first found evidence for "much transposition and variation in the prophecies" of this book (*Ad Africanus* 4). Although most of the quantitative differences between the two texts concern such minor things as shorter forms of the divine name (the LXX frequently omits "of Hosts" in the phrase "Lord of Hosts"), the omission of prophetic formulas like "says the Lord," and the second occurrence of some duplicate passages (cf. the omission in the LXX of 8:10b-12, which in the MT parallels 6:13-15), some larger sections are also missing in the LXX, most notably the messianic passage (33:14-26). Transpositions occur not only in the "Oracles Against the Nations" but also in a few other places (e.g., 10:9 in the LXX comes in the middle of 10:5, while 23:7f. in the LXX comes at the end of the chapter). In addition, there are the usual qualitative differences between the two texts where one text gives a different reading from the other (e.g., in 36:2 the MT reads "Israel" where the LXX [43:2] reads "Jerusalem").

In the history of the problem, four different theories, broadly speaking, have been proposed to account for the divergences of the two texts: (1) The "editorial" theory. This theory holds that the two texts are derived from different editions of the book produced either by Jeremiah himself (J. G. Eichhorn, *Einl. in das AT,* IV [1824], 170-220) or by Jeremiah and Baruch respectively (A. van Selms, *VT,* 26 [1976], 99-112). (2) The "abbreviation" theory. According to this view, the MT is the best witness to the text of Jeremiah, the LXX being an abbreviated account with many accidental and deliberate omissions blamed on the translator (e.g., M. G. L. Spohn, *Ieremias vates e versione Iudaeorum Alexandrinorum* [1824], pp. 1-21, and the comms. by K. H. Graf [1862], C. F. Keil [1880], and C. von Orelli [1905]). (3) The "expansion" theory. On this view the LXX is the best witness to the text of Jeremiah, the Hebrew having suffered greatly from expansion and interpolation in the course of transmission (e.g., F. C. Movers, *De utriusque recensionis vaticinorum Ieremiae* [1837]; A. Scholz, *Der masorethische Text und die LXX-Uebersetzung des Buches Jeremias* [1875]; G. C. Workman, *The Text of Jeremiah* [1889]; A. W. Streane, *The Double Text of Jeremiah* [1896]; J. G. Janzen). (4) The "mediating" theory. This theory holds that it is impossible to generalize on the relative merits of the two texts; instead, each reading has to be evaluated on its own merits, resulting sometimes in a preference for the Hebrew, sometimes for the Greek (e.g., the comms. of F. Hitzig [1866], B. Duhm [1901], F. Giesebrecht [1907], P. Volz [1922], W. Rudolph [3rd ed. 1968], J. Bright [1965]).

At mid-century, the mediating position seemed firmly entrenched as the consensus view, particularly as expressed in the comms. of Rudolph and Bright. As a result of the Qumrân discoveries, however, some of which contain fragments from the text of Jeremiah, the whole problem of the Hebrew-Greek relationship has been reopened. Fragments from three different MSS of Jeremiah — 4QJer^{a}, 4QJer^{b}, and 4QJer^{c}— have been identified among these finds. For a preliminary transcription of most of the extant fragments of 4QJer^{a} and 4QJer^{b}, see Janzen (pp. 173-184). Whereas the texts of 4QJer^{a} and 4QJer^{c} follow that of the MT quite closely, 4QJer^{b} is more independent of the MT and shows instead several correspondences with the LXX.

A portion that has been singled out for special notice is one containing ends of lines from 9:22–10:18. In his book *Ancient Library of Qumran* (1958; repr. 1980), F. M. Cross showed that in matters of omission and dislocation of verses, this fragment corresponds to the order of verses found in the LXX. Here is positive proof, therefore, that, at least for this passage, a text similar to that of the LXX already existed in Hebrew, and it was presumably from one such MS that the LXX was translated. Taking the Qumrân discoveries as his cue, Janzen has restudied other internal phenomena of the book of Jeremiah where the Greek differs quantitatively from the Hebrew (e.g., double readings, parallel and related contexts, and stereotyped formulas) and has argued convincingly that the LXX was translated from a Hebrew text already shorter than the MT.

For Cross and Janzen these findings fit into a larger scheme that seeks to explain the development of the Hebrew text of the entire OT in the pre-Masoretic period. As elaborated by Cross, the theory of "local texts" postulates the development of distinct varieties of texts in three centers of Jewish learning in the era of the Second Temple: Babylon, Palestine, and Egypt. In this scheme, the Babylonian text represents a pure tradition, the Palestinian text is characterized by heavy expansion and editing, while the Egyptian text is an early off-shoot from the Palestinian branch, hence less conflated than the latter. Applied to the book of Jeremiah, the MT represents the Palestinian tradition while the Hebrew archetype behind the LXX corresponds to the Egyptian text, there being no third or Babylonian text for the book of Jeremiah. Both implicitly and explicitly this hypothesis favors the LXX tradition as representing the more original form of the book of Jeremiah (cf. Janzen, pp. 127-135; Cross, "The Evolution of a Theory of Local Texts," in F. M. Cross and S. Talmon, eds., *Qumran and the History of the Biblical Text* [1975], pp. 308f.).

It is by no means certain, however, that we can settle the Hebrew/Greek priority issue on the basis of this theory (for a general critique see the remarks by S. Talmon in *Cambridge History of the Bible,* I [1970], 193-99, and in *Qumran and the History of the Biblical Text* [1975], pp. 321-400). Certainly it would be misleading to suggest that the mere existence at one time of a shorter Hebrew text weighs the scales in favor of the LXX as the better text. Moreover, Janzen's study was limited to one aspect of the Hebrew/Greek relationship, namely, the Greek "omissions" (or "zero variants" as he calls them). Further work needs to be done on the qualitative or content variants. As for 4QJer^{b}, all that this MS can do is corroborate the actual existence of an LXX-type text; it cannot decide between the two texts. It must be remembered, furthermore, that the extant portions of 4QJer^{b} are extremely fragmentary and even where the MS has been preserved it is by no means consistent in its agreement with the LXX. Sometimes it follows the MT; sometimes it goes its own way.

In connection with the critical portion from 10:1-16, R. Davidson has shown that in this passage the MT has superior literary merit and hence a better claim to originality than the LXX (*Transactions of the Glasgow University Oriental Society,* 25 [1973-74], 41ff.). Other studies suggest that in certain LXX omissions it is possible to discern patterns that go back to the translators rather than to Hebrew copies (e.g., Z. Zevit on the translation of *'ebed,*

"servant," in the LXX of Jeremiah, *JBL*, 88 [1969], 74-77; and *Bulletin of the International Organization for Septuagint and Cognate Studies*, 8 [1975], 17f.). At the same time, if and where it can be shown that the LXX has a better reading or order than the MT, the wise Bible student rejoices in the preservation of a text that more accurately reflects the wording and/or position of the original documents.

JEREMIAH, LAMENTATIONS OF. *See* LAMENTATIONS, BOOK OF.

JEREMIAH, LETTER OF [Gk. *Epistolē Ieremiou*; AV EPISTLE OF JEREMY]. A letter of the Apocrypha purporting to be written by Jeremiah the prophet to the exiles of Judea who were being deported to Babylon. It warns the captives of the dangers of idolatry and apostasy.

I. Name.–In LXX MSS B and A the title is simply "An Epistle of Jeremiah." These MSS also have a superscription introducing the letter: "Copy of a letter which Jeremiah sent to the captives about to be led to Babylon by [Pesh. adds "Nebuchadnezzar"] the king of the Babylonians, to make known to them what had been commanded him by God." What follows is a satirical exposure of the folly of idolatry and not a letter. The idea of introducing this as a letter from Jeremiah was probably suggested by Jer. 29.

II. Canonicity and Position.–The early Greek Fathers were on the whole favorably disposed toward this tract, recognizing it as part of the canon. It is therefore included in the lists of canonical writings of Origen, Epiphanius, Cyril of Jerusalem, and Athanasius, and it was recognized as authoritative by the Council of Laodicea (300 A.D.).

In most Greek MSS of the LXX (B A Codex Marchalianus, Syrohexapla), it follows Lamentations as an independent piece, closing the supposed writings of Jeremiah. In the best-known printed editions of the LXX (Tischendorf, Swete, etc.), the order is Jeremiah, Baruch, Lamentations, Letter of Jeremiah. But in Latin MSS, including those of the Vulgate, it is appended to Baruch, of which it forms ch. 6, though it really has nothing to do with that book. This last is the arrangement in the AV Apocrypha. In the RSV and NEB Apocrypha it follows Baruch.

III. Contents.–In the so-called letter, the author shows the absurdity and wickedness of heathen worship. The Jews, for their sins, will be removed to Babylon, where they will remain seven generations. In that land, they will be tempted to worship the gods of the people. The writer's aim is ostensibly to warn them beforehand by showing how helpless and useless the idols worshiped are, and how immoral as well as silly the rites of the Babylonian religion are. For similar polemics against idolatry, see Isa. 44:9-20 (which in its earnestness closely resembles the Letter of Jeremiah); Jer. 10:3-9; Ps. 115:4-8; 135:15-18; Wisd. 13:10-19; 15:13-17.

IV. Original Language.–From traces of translation in the Greek text some scholars have argued for a Hebrew original. This is by no means impossible, since as the Qumrân materials show, letters were written in Hebrew at the beginning of the Christian era. R. H. Pfeiffer and C. C. Torrey proposed an Aramaic original on the ground that the instructions mentioned in 2 Macc. 2:1f. actually alluded to this letter, but this must be regarded at best as conjectural. Since Hellenistic Greek contained certain Semitisms, it is difficult if not actually impossible to determine the original language from a study of the text.

V. Authorship, Date, and Aim.–The letter has every appearance of being a typical Hellenistic-Jewish attack upon contemporary idolatry. Its author was almost certainly a resident in Alexandria toward the close of the last century B.C. The Greek of the book, with references to Egyptian religion (v. 19, where the Feast of Lights at Saia [Herodotus ii.62] is referred to), and the allusion to the Letter of Jeremiah in 2 Macc. 2:2 make this conclusion very probable. The author had in mind the dangers to his countrymen's religion presented by the fascinating forms of idolatry existing at Alexandria. Certainly Jeremiah is not the author, for the book was written in Greek and never formed part of the Hebrew canon. Besides, the treatment is far below the level of the genuine writings of that prophet.

VI. Text and Versions.–This letter occurs in the principal Greek MSS of the LXX uncials (B A Q Γ contain vv. 7b-24a, etc.) and cursives (except 70, 96, 229). The Syriac Peshitta follows the Greek in a free rendering, but the Syrohexapla follows the text of B closely, often at the expense of Syriac idioms. The Latin Vulgate is translated directly from the Greek. A different Latin version with a freer rendering than the Vulgate was published by Sabatier in his *Bib. Sacr. Lat. Versiones Antiquas*, II, 734ff. There are also an Arabic version, which follows LXX A, and Coptic (ed. Quatremère, 1810) and Ethiopic (ed. Dillmann, 1894) versions. T. W. DAVIES
R. K. H.

JEREMIAS jer-ə-mī'əs [Gk. *Ieremias*].

1. Named among the sons of Baani as one of those who had married foreign wives (1 Esd. 9:34). In Ezr. 10:33 Jeremai is listed among the sons of Hashum. In 1 Esdras the name should come in 9:33 before Manasses.

2. *See* JEREMIAH.

JEREMIEL jer-ə-mī'əl [Lat. *Hieremihel*, prob. for Heb. *yᵉraḥmᵉ'ēl*–'may God have compassion']. AV mg., RSV, NEB in 2 Esd. 4:36 for AV Uriel. He is here called the "archangel" who answers the questions raised by the souls of the righteous dead. He is probably identical with the Ramiel of 2 Bar. 55:3 or Remiel of 1 En. 20:8.

JEREMOTH jer'ə-mŏth [Heb. *yᵉrēmôṯ, yᵉrîmôṯ* (1 Ch. 27:19)–'swollen']; AV also JERIMOTH (1 Ch. 7:8; 27:19); NEB also JERIMOTH (1 Ch. 27:19).

1, 2. Benjaminites (1 Ch. 7:8; 8:14). *See* JEHORAM **2.**

3. A son of Mushi (1 Ch. 23:23), the same as Jerimoth in 1 Ch. 24:30.

4. The head of a Levitical house (1 Ch. 25:22), the same as JERIMOTH **4.**

5. A Naphtalite, one of David's tribal princes (1 Ch. 27:19; AV, NEB, Jerimoth).

6. A Jew married to a foreign wife in the time of Ezra (Ezr. 10:26; 1 Esd. 9:27, AV Hieremoth).

7. Another Jew married to a foreign woman in Ezra's day (Ezr. 10:27; 1 Esd. 9:28, AV, NEB, Jarimoth).

8. Another Jew married to a non-Jewish wife in Ezra's period (Ezr. 10:29, *K; Q*, AV, Ramoth; 1 Esd. 9:30, AV Hieremoth).

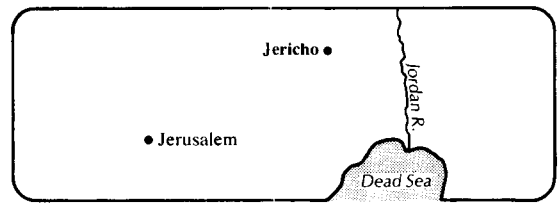
JEREMY, EPISTLE OF. *See* JEREMIAH, LETTER OF.

JERIAH jə-rī'ə [Heb. *yᵉrîyāhû*–'may Yahweh see']. In 1 Ch. 23:19; 24:23 the same as Jerijah (Heb. *yᵉrîyâ*) in 26:31 (NEB Jeriah), head of a Levitical house; called chief of the Hebronites in 24:23 (cf. v. 30).

JERIBAI jer'ə-bī [Heb. *yᵉrîḇay*]. One of David's mighty men (1 Ch. 11:46) whose name is among those not found in the list in 2 S. 23:24-39.

JERICHO jer'ə-kō [Heb. *yᵉrēḥô, yᵉrîḥô, yᵉriḥô, yᵉrîḥōh*; Gk. (LXX) *Iierichō*, (NT) *Hierichō*]; AV, NEB, also JERECHUS (1 Esd. 5:22). A city just N of the Dead Sea, mentioned sixty times (54 OT; 6 NT) in the Bible.

I. Biblical References
  A. Geographical and Topographical
  B. The Ancient City and Its King
  C. Substantive Accounts of Historical and Traditional Events
II. Archeology of Bronze and Iron Age Jericho
III. Hasmonean and Herodian Jericho

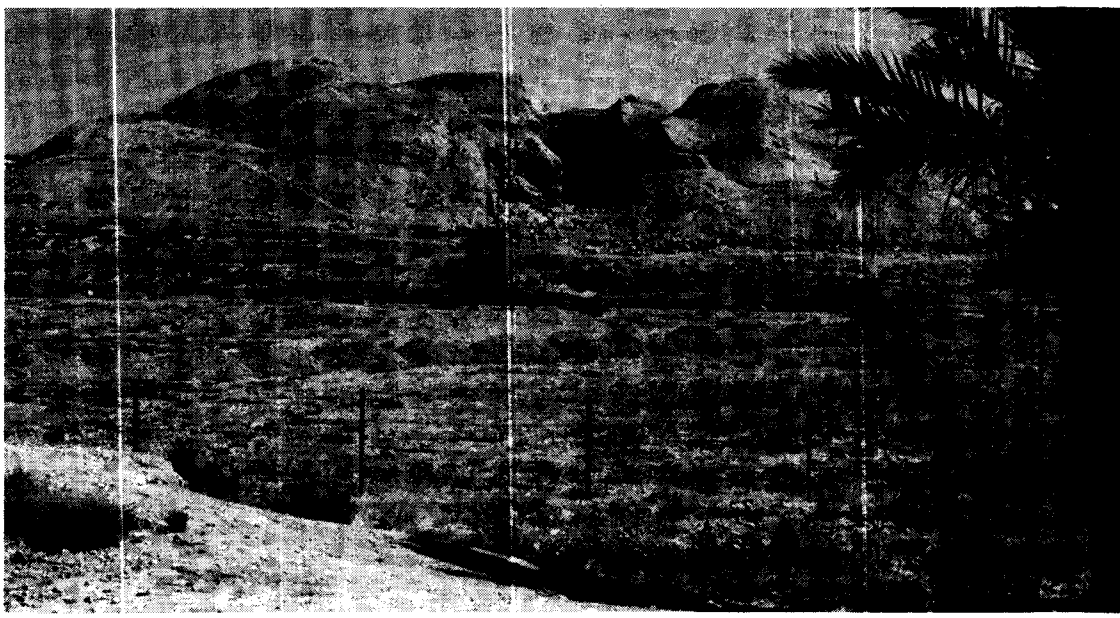


*I. **Biblical References.**–A. Geographical and Topographical.* Jericho was situated in the southern portion of the Jordan Valley about 16 km. (10 mi.) NW of the mouth of the Dead Sea, at one of the largest freshwater springs in all of Palestine, 'Ain es-Sulṭân, and near the E-W roadway that connected Transjordan with the hill country of Palestine. Thus the city has been prominent from its earliest occupation.

The first mention of Jericho in the Bible uses the city as a reference point to describe the location of the Israelite tribes moving toward the Promised Land. The characteristic phrase found in many verses is "in the plains of Moab by the Jordan at [opposite] Jericho" (Nu. 22:1; 26:3, 63; 31:12; 33:48, 50; 34:15; 35:1; 36:13; Dt. 32:49; Josh. 13:32). A second general designation refers to the area "in the plains of Jericho," the place where the Israelite army under Joshua encamped after crossing the Jordan (Josh. 4:13; 5:10). Twice the oasis fed by the great spring of 'Ain es-Sulṭân is indicated by the phrase "Jericho the city of palm trees" (Dt. 34:3; 2 Ch. 28:15).

The city of Jericho was also used as a boundary marker for the tribal allotments (Josh. 16: lf., 7; 1 Ch. 6:78 [MT 63]) while the city itself was allotted to the tribe of Benjamin (Josh. 18:12, 21). Some scholars have seen a relationship of the name Jericho to the clan name *Yariḥû*, one of the subtribes of the *Banū-yamīna* mentioned in the Mari correspondence (*ca.* 1750 B.C.). Despite the similarity in names, the evidence for a relation between this northern Mesopotamian tribe and the biblical Benjaminites is not conclusive. Further, the city and its boundaries are referred to in locating the cities of refuge (Josh. 20:8).

View north toward the Kenyon excavations at Tell es-Sulṭân (ancient Jericho) (J. C. Trever)



Finally, most of the NT references (Mt. 20:29; Mk. 10:46; Lk. 10:30; 18:35; 19:1) show Jericho as a first-century city on a major route from Galilee down the Jordan Valley to Jericho and then up (WSW) through the Judean hills to Jerusalem.

B. The Ancient City and Its King. All the references in this classification are found in the book of Joshua (6:2; 8:2; 10:28, 30; 12:9; 18:21) and refer to the Canaanite period of occupation (*ca.* 1350 B.C.). The names of the kings are never given. "Jericho with its king" (Josh. 6:2) appears most often in lists naming those cities conquered by Joshua and his troops when claiming the land of Canaan as the Promised Land.

C. Substantive Accounts of Historical and Traditional Events. In addition to its mention as a geographical point of reference in the Mosaic period, Jericho is included in the Canaanite land that Moses is permitted to see from Mt. Nebo, E of the Jordan (Dt. 32:49; 34:1, 3).

The story of Joshua's conquest of Jericho reports many items of significance for Israel's history and subsequent Jewish and Christian theology. From the narrative of the spies at Rahab's house one learns that Jericho was a walled city with houses, gates, and windows, and that some houses were built into the walls of the city (Josh. 2:1). The account of the stoppage of the Jordan's water at Adamah reports the crossing "opposite Jericho" (Josh. 3:16). Earth slides and the shutting off of the water of the serpentine Jordan have been reported periodically (1267, 1907, 1927). At the east border of Jericho after the crossing twelve stones were erected to serve as a memorial of the event and as a teaching aid for later generations (Josh. 4:19-24). In an event reminiscent of Moses' call, Joshua had a vision before Jericho of the "commander of the Lord's army." Joshua was told, "Put off your shoes from your feet; for the place where you stand is holy" (Josh. 5:13). The familiar story of Jericho's fall is reported in Josh. 6, including a curse uttered against anyone who would rebuild the city (Josh. 6:26). The final reference in Joshua lists Jericho among those cities which fought against Israel (Josh. 24:11).

The Davidic period yields only one reference to Jericho (2 S. 10:5 par. 1 Ch. 19:5). David's delegates to the Ammonites were shamed by having their beards cut off. David sent word for them to remain at Jericho until the beards were grown again. Nothing is learned of the city's size or influence, but presumably, though occupation continued at the site after Joshua's conquest, no walled city existed until Jericho was rebuilt in the period of the divided kingdom.

During the days of Ahab and Jezebel, when Baalism was a threat to Israel's religious life, one named Hiel of Bethel undertook the rebuilding of Jericho. The narrator reports that laying the foundation cost him his first-born son Abiram, and laying the gates cost him his youngest son Segub, in fulfillment of Joshua's curse (1 K. 16:34; cf. Josh. 6:26). It is unclear whether child sacrifice as practiced in Baalism is intended in this report. Later, the Qumrân community interpreted the violent death of Simon Maccabeus at the hand of Ptolemy in 134 B.C. as a fulfillment of Josh. 6:26. The reference is found in a Cave IV fragment of a work called the Psalms of Joshua, which bears witness to the Hellenistic-Hasmonean rebuilding of Jericho (at Tulûl Abū el-'Alâyiq) by "a cursed man, a man of Belial" and his two sons.

Elijah's translation occurred at the Jordan near Jericho. He was accompanied by Elisha, who succeeded the great prophet. The account includes a reference to fifty "sons of the prophets" believed to be from a "school of the prophets" in existence at Jericho at this time (2 K. 2:4f., 15, 18). Also reported at Jericho is the freshening of the spring by Elisha (2 K. 2:19-22). During Ahaz's reign in Israel a group of captives were spared, clothed, and cared for at Jericho (2 Ch. 28:15).

The final references to Jericho in the period of the divided kingdom tell of the Chaldean army pursuing King Zedekiah. He was overtaken in the plains of Jericho and was forced to watch the slaughter of his sons; then he was blinded by his captors and carried off to Babylon (2 K. 25:2-7; Jer. 39:1-7 par. 52:4-11).

On return from the Exile under Zerubbabel, Jericho's inhabitants, listed as "sons of Jericho, three hundred and forty-five," had a role in rebuilding the walls of Jerusalem (Ezr. 2:34 par. Neh. 3:2; 7:36).

The NT references to Jericho include an event outside the city on the road to Jerusalem in which two blind men were healed (Mt. 20:29; cf. Mk. 10:46, the healing of Bartimaeus; cf. also Lk. 18:35). In two of Luke's narratives Jericho is prominent. The parable of the Good Samaritan (Lk. 10:30) refers to the Jerusalem-Jericho road, and the story of Zacchaeus (19:1) has its setting in Jericho. The last NT reference to the city recalls the active faith of God's people that was illustrated by the collapse of Jericho's walls and by Rahab's salvation (He. 11:30).

R. A. COUGHENOUR

II. Archeology of Bronze and Iron Age Jericho. *–The* identification of remains that could be associated with the account in Josh. 6 has for long been the objective of archeologists. If precise evidence could be obtained of a destruction that could definitely be ascribed to the Israelites, it would be of great help in determining the date of the entry of the Israelites into Canaan.

J. Garstang, in his excavations of 1930-1936, believed that he had found the evidence of the collapse of the town walls by earthquake (the most probable explanation of the episode) at a date of *ca.* 1400 B.C. More precise evidence concerning pottery (the main basis for dating evidence in Palestine) accumulated after Garstang's excavations and suggested the need for further examination, which was carried out between 1952 and 1958.

Garstang traced a succession of four town walls encircling the mound of Tell es-Sultân. The wall that he considered (in fact erroneously) to be the latest was heavily burned and showed evidence of collapse, probably from earthquake. Excavation methods in Palestine at that time were not sufficiently precise for the rather complex process of dating a town wall by the levels belonging to it. Garstang, considering this wall to be the latest, associated it with the latest buildings he found. He correctly ascribed these and some tombs to the Late Bronze Age (*ca.* 1550-1200 B.C.), but was misled by incorrect dating of comparable pottery from Beth-shean into suggesting that the terminal date was *ca.* 1400 B.C.

The 1952-1958 excavations at Jericho showed that the history of the Bronze Age town walls of Jericho is extremely complex. Those of the Early Bronze Age (covering most of the 3rd millennium) were of mud brick and were very frequently repaired; in one area investigated as many as seventeen builds and rebuilds could be identified. It was one of the latest of these E.B. walls that was ascribed by Garstang to the L.B. All these E.B. walls were in fact buried by the great earth bank belonging to the Middle Bronze Age. The upper part of this bank has for the most part been destroyed by erosion, and only in one place do the foundations of the wall on its summit survive. Erosion during centuries of abandonment has in fact removed almost all the remains of the M.B. town, and therefore to a still greater extent those of the overlying L.B. town.

Enough, however, did exist to prove that there had been a L.B. town, built on top of the eroded ruins of

the M.B. town after a century and a half of abandonment. Since the remains of the L.B. town survive over such a limited area, and no part of the town wall survives, nothing can be said of its plan. The pottery evidence, including that from the tombs discovered by Garstang, suggests that it was destroyed in the last quarter of the 14th century. Excavation has thus recovered enough evidence to prove that a L.B. town had existed at Jericho and was abandoned after a destruction. This destruction could have been the work of one of the groups of infiltrating Israelites and thus could be reflected in the account of the book of Joshua, though the date is rather earlier than that which most scholars would prefer.

The excavations showed clearly that a long period of abandonment followed this destruction. The site was not reoccupied until Iron Age II. Most of the material found belongs to the 7th cent. B.C. There is some material — including one tomb (Kenyon, *Jericho*, II, 482ff.) — that may be associated with the rebuilding of the town by Hiel the Bethelite (1 K. 16:34) early in the 9th cent. B.C. The final abandonment of the site of Tell es-Sulṭân came in the 6th cent. B.C., probably as a result of the Babylonian destruction of the kingdom of Judah in 587 B.C.

Although excavations have produced such meager remains of the OT period at Jericho, they have made a considerable contribution to OT studies by the light they have thrown on the Canaanite Palestine which the Israelites penetrated and its culture which they absorbed. New groups entering Palestine *ca.* 1900 B.C. introduced the urban culture that developed on the Phoenician coast (K. Kenyon, *Amorites and Canaanites* [1966]). This culture of fairly small-scale city-states lasted till 1200 B.C. and later, with no significant break. The great wealth of evidence recovered by excavations at Jericho concerning M.B. life is therefore very relevant to the identification of the material culture that the Israelites found and absorbed to a considerable extent when they entered Palestine.

As already stated, most of the M.B. town had disappeared in successive phases of erosion. In one area, however, a group of houses survives. They show cobbled streets, with draining beneath, ascending from the spring to the east up the slope of the mound, which was by that date steep. Relatively small houses — certainly two-storied, and probably with single-roomed shops at street level (Kenyon, *Digging Up Jericho* [1957], p. 229) — opened onto the streets. The last of a long succession of M.B. buildings in the area were violently destroyed by fire in the first half of the 16th cent. B.C. The ruins provided good evidence of the domestic equipment of the period.

Reconstruction of a room at Jericho (*ca.* 1650 B.C.) (Royal Ontario Museum, Toronto)

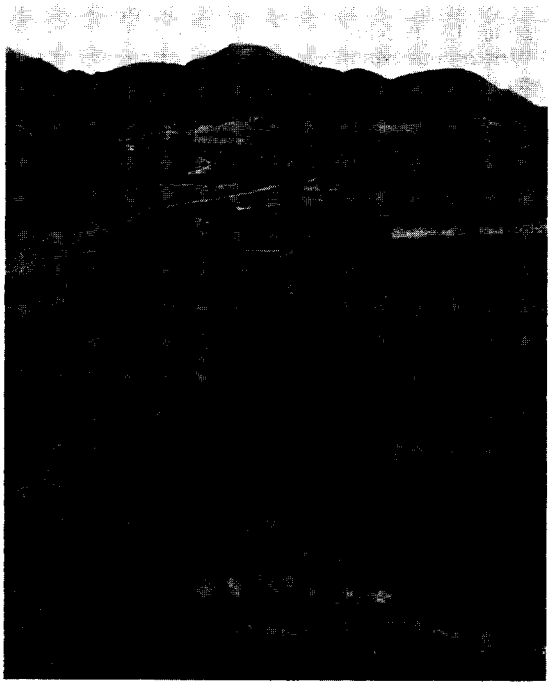
Still greater evidence came from the tombs (of which details are given in Kenyon, *Jericho*, I and II). The dead of Jericho were provided with purely material equipment for the afterlife. The absence of any evidence for the provision of spiritual needs is in very striking contrast with contemporary Egypt. The dead person was buried with what was obviously the normal furnishings of his home. He had a basket containing toilet requisites, combs, small boxes, perfume or oil containers, and in one case a wig. The standard article of furniture was a table, usually about 1 m. (3 ft.) long, the largest example being 1.5 m. (5 ft.) long and about 35 cm. (14 in.) wide, standing on legs about 40 cm. (16 in.) high, of which there were invariably two at one end and one at the other as an aid to stability on an uneven floor. This must have been the sole article of furniture in most households, and the inhabitants must have slept and sat on rush mats, on which many of the bodies were laid. In one case the principal burial lay on a narrow bed with a wooden frame while the rest of his family lay on the floor of the tomb chamber. Wood-framed stools were also provided; and in all cases where stools were found, there were indications of the special importance of the person buried, e.g., that he was placed on a brick platform. There was usually a generous provision of food, with parts or whole carcasses of sheep or goats, and jars containing liquid. The skin left in these jars as the liquid evaporated was often intact, but analysis has not shown what the liquid was. In the mouth of these jars were suspended dipper flasks to ladle it out. Dishes of pottery and wood and drinking vessels were provided.

Fragments of the clothing of the dead persons survived and were sufficient to show that the material was usually flax or some form of leaf bast. The surviving fragments were inadequate to indicate the shape of the garments; it could, however, be deduced from the position of the bronze toggle pins which must have held them in position that some individuals had a loose garment which was draped over one shoulder and under the other and secured there by a toggle pin, while others wore a kiltlike garment secured at the waist. The general burial practice was certainly that of successive burials in what were presumably family tombs. As space was required for a later burial, a place was cleared in the front of the tomb by unceremoniously pushing back the bones and associated offerings of earlier burials to the walls of the tomb chamber. This process inevitably damaged the earlier burials and their offerings. From the archeological point of view it is fortunate that just before the final destruction of M.B. Jericho there had been a number of burials of many members of (presumably) the same family that were not thereafter disturbed, and the evidence from these tombs is the main basis for the conclusions described here.

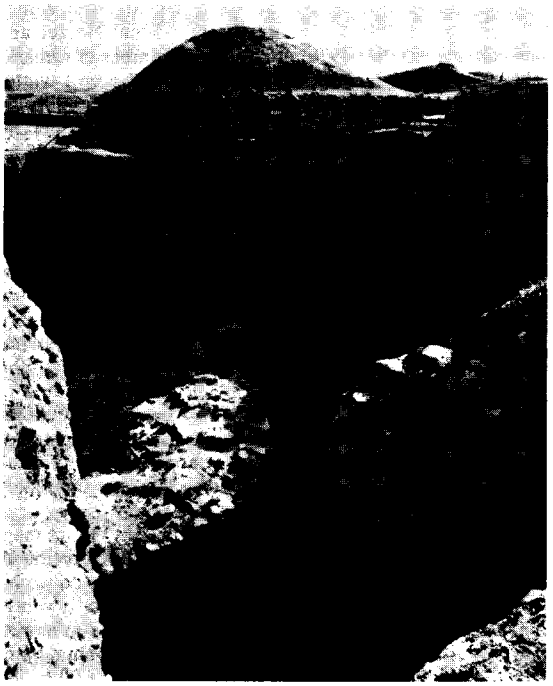
The town of Jericho destroyed in the early 16th cent. B.C. and the accompanying tombs provide evidence for the culture of Palestine in the period of the biblical patriarchs. The patriarchs were not town dwellers, but this was the culture with which they would have been in contact. More importantly, it was the culture found and absorbed by the infiltrating Israelite tribes of the 14th and 13th cents. B.C.

At the time when Jericho impinged on the Joshua story and the preceding period of the patriarchs it was already a very old town. The major contribution of the excavations of the site to the history of the development of civilization has been to show that Palestine was one of the centers of the change from a wandering, food-collecting way of life to a settled way of life based on agriculture and the domestication of animals — one from which villages, towns, and cities could emerge.

JERICHO



Trench I at Jericho at the Pre-pottery Neolithic B level (Jericho Excavation Fund, University of London; picture K. M. Kenyon)



Excavations at Jericho showing Neolithic tower (lower left), *ca.* 7000 B.C. (Israel Government Tourist Office)

Plastered skull from Jericho (*ca.* 7000 B.C.) (Royal Ontario Museum, Toronto)

Early Jericho shows the full range. The first stage is the arrival of the hunters of the final food-collecting stage (the Mesolithic), who built a structure that can be interpreted as a shrine associated with the life-giving properties of the spring of ʿAin es-Sulṭân, *ca.* 9000 B.C. The descendants of these hunters gradually settled down at Jericho, and by *ca.* 8000 B.C. they were building permanent houses, successors to the slight structures of which the intervening strata provide evidence. The climax of this development was the construction of an imposing town wall, enclosing an area of about 4 ha. (10 acres), associated with at least one massive stone tower. By 8000 B.C., therefore, the inhabitants of Jericho had achieved a coherence and organization very far removed from that of the Mesolithic nomads who had appeared on the site a thousand years before.

The first Neolithic culture of Jericho was indigenous, derived from the flourishing Mesolithic culture of Palestine. It provides the only sequence so far traced for this crucial stage in the development of civilization. The second culture was not indigenous. It superseded the original one *ca.* 7000 B.C., and probably provides evidence of the arrival of a new group from some area to the north where a parallel development had taken place. Town life was again highly organized. After *ca.* 6000 B.C. there was a recession, and a town reappears at Jericho only in the E.B. period of the 3rd millennium B.C. Between that town and the one ascribed to the period of the patriarchs there was a break, which may be ascribed to the arrival of the nomadic Amorites *ca.* 2300 B.C.

K. M. KENYON

III. Hasmonean and Herodian Jericho.–The modern site of Tulûl Abū el-ʿAlâyiq is the ruin of ancient Hasmonean and Herodian Jericho (formerly designated as NT Jericho [Kelso] and Herodian Jericho [Pritchard]). It was built in the days of the late Maccabean (Hasmonean) period, possibly as early as 134 B.C., by Simon Maccabeus. The city lies on the two banks of the Wâdī Qelt about 1½ km. (1 mi.) W of the modern city of Jericho and about 27 km. (17 mi.) ENE of Jerusalem.

The Hasmoneans rediscovered the great agricultural and economic potential of Jericho with its mild winter climate, abundance of water, and availability of land in the valley. Harnessing the water sources by means of aqueducts from ʿAin es-Sulṭân, ʿAin Dûq, ʿAin Nuʿeima, the three springs of Wâdī Qelt, and the spring of ʿAuja NW of the valley, the Hasmoneans and especially Herod turned Jericho into a garden city and royal estate which from 134 B.C. to A.D. 70 covered hundreds of acres and was inhabited by tens of thousands of Jews. After A.D. 70 the Roman procurators paid less attention to the site, which declined rapidly to a very small settlement.

Excavations at the site by James L. Kelso (1950), James B. Pritchard (1951), and more recently Ehud Netzer and his colleagues (1973-1979) uncovered a number of remarkable features of Jericho. A large (1.2-ha. [3-acre]) winter palace complex of the Hasmonean kings built possibly by Alexander Janneus (103-76 B.C.) consisted of a central building, a huge swimming pool (32 by 18 by 4 m. [105 by 59 by 13 ft.]), a large reception hall facing east and giving a breathtaking view of the Wâdī Qelt and the Jericho valley, and paved promenades around the pool (more than 2000 sq. m. [½ acre]), bathing and ritual bath installations, a storage hall with several rooms, and aqueducts. Most of the coins found in the palace area belong to the period of Alexander Janneus, but a cache of twenty rare Mattathias Antigonus coins was found west of the swimming pool. In Jericho Herod overcame Mattathias, the last of the Hasmonean kings, and became, according to Josephus, the ruler of the valley in 37 B.C. Shortly thereafter Anthony gave the fertile oasis to Cleopatra queen of Egypt, but Herod, recognizing the economic worth of the area, rented it back and continued to develop the valley (*BJ* i.18.5 [362]; see Netzer, pp. 1, 6, 9).

Herod's expansion of the complex was even more magnificent. Choosing a 300-m. (1000-ft.) straight portion of the wadi, Herod built a well-planned coordinated architectural complex straddling the Wâdī Qelt. Herod's winter palace included four wings with such features as courtyards surrounded by columns, an ornate Roman bath, small rooms, and two halls. One of the halls is 29 m. by 19 m. wide (95 by 62 ft.) with three rows of columns surrounding it. The wide opening to the west faced the Wâdī Qelt. The hall was paved with imported marble and local colored stones. Its center had a mosaic panel. A large sunken garden and an exotic formal garden elaborately constructed in mirror image and symmetry with niches were included. The buildings were crafted in *opus reticulatum*, a peculiar use of small, uniform, rectangular stones set in mortar. This feature is Roman in origin from the time of Augustus and dates most likely to a period between 18 B.C. and A.D. 6. Herod's successor Archelaus rebuilt some of the buildings (Josephus *Ant.* xvii.13.1 [340]), though excavation has not yet revealed the extent of the rebuilding.

The most recent discoveries at Jericho are inscriptions from a first-century A.D. Jewish monumental tomb revealing three generations of a family. The tomb shows great wealth, having been plastered, decorated with a brightly colored fresco depicting a vine with leaves, trellis, ripe grapes, and birds perched on the branches (Hachlili, p.31).

A total of thirty-two inscriptions, many of them in both Greek and Aramaic, reveal much about the occupants of the tomb. The most important inscription reads, "Theodotos, freedman of Queen Agrippina." "This is the first time that a non-literary source mentions a Judean Jew who was most likely taken slave as a result of the political turmoil in Judea at this time and who was manumitted by a Roman Empress" (Hachlili, p. 62). This Queen Agrippina, empress of Rome A.D. 50-54, should be identified with Agrippina the younger (A.D. 15-59) who in A.D. 49 married the emperor Claudius, her uncle (Tacitus *Ann.* xii.1-8). She was co-regent with her son Nero (Tacitus *Ann.* xii.64; xiii.21f.). She was in close contact with the Jewish King Agrippa II interceding on behalf of Jews during the Samaritan-Jewish riots of A.D. 52 (Josephus *Ant.* xx.6.3 [134f.]).

These recent findings with anthropological, inscriptional, archeological, and historical data demonstrate a large, wealthy, sophisticated city during NT times. Thus, when Jesus visited Jericho and was invited to the home of the tax collector Zacchaeus, he entered a remarkably rich setting (Lk. 19:2-10).

Jericho was captured by Vespasian's troops *ca.* A.D. 68 and the city declined but was not destroyed. A brief revival of its glory came at the time of Bar Cochba's rebellion against Rome in A.D. 132-135. Later a Byzantine Jericho was built about 1½ km. (1 mi.) E of Herodian Jericho. The present city of Jericho is built on the Byzantine site.

JERIEL jer'i-əl [Heb. *yᵉrî'ēl*–'may God observe']. A chief of Issachar (1 Ch. 7:2).

JERIJAH jə-rī'jə [Heb. *yᵉrîyâ*–'may Yahweh notice']. In 1 Ch. 26:31 the chief of the Hebronites in the days of David. *See* JERIAH.

JERIMOTH jer'i-moth [Heb. *yᵉrîmôṯ*–'swollen'].

1. A Benjaminite (1 Ch. 7:7).
2. A Benjaminite who joined David at Ziklag, or perhaps a Judean (1 Ch. 12:5 [MT 6]).
3. In 1 Ch. 24:30 the same as JEREMOTH 3.
4. A Levite musician in David's time (1 Ch. 25:4), the same as JEREMOTH 4.
5. Son of David and father of Mahalath, Rehoboam's wife (2 Ch. 11:18). He is not mentioned (2 S. 3:2-5; 5:14-16; 1 Ch. 3:1-9; 14:4-7) among the sons of David's wives.
6. A Levite overseer in Hezekiah's time (2 Ch. 31:13).

D. F. ROBERTS

JERIOTH jer'i-oth, jer'i-ōth [Heb. *yᵉrî'ôṯ*–'(tent-)curtains']. The MT presents certain problems in 1 Ch. 2:18, reflected by the English versions in making Jerioth appear to be the second wife of Caleb son of Hezron. It is possible to regard Azubah as the former wife of a man named Jerioth, but it is more probable that Jerioth was an alternative name for Azubah. In the latter case the "and" of the RSV should be rendered "even." The NEB reads "had Jerioth by Azubah his wife."

JEROBOAM jer-ə-bō'əm [Heb. *yārobʿām*–'(may God) increase the nation'; Gk. *Hieroboam*]. The name of two kings of the northern kingdom.

1. Jeroboam I, the first king of Israel (931-910 B.C.) and son of Nebat.

I. Sources.–The writer of the book of Kings derives his information from the history of Solomon (1 K. 11:41), the history of the kings of Judah, and the history of the kings of Israel; the Chronicler refers to certain prophetic writings and genealogies (2 Ch. 9:29; 12:15; 13:22), none of which is extant. The last work is called midrash, but it would be presumptuous to assume that it was a work of imaginative homiletics; the word "midrash" did not have this meaning in those early days, and the midrashic works we have are postbiblical and rabbinical.

There is no real ground for supposing that the writer of Kings displays any animus toward Jeroboam or is in any way prejudiced in favor of some of the kings belonging to David's house. If the writer tells the story of Jeroboam's apostasy and failure he does not fail to mention his valor and vigor, or the nobility of his son who died young, although these qualities are not detailed (1 K. 14:13). The

text of the story of Jeroboam in the MT is to be preferred to that of the LXX, which even a cursory reading will show to be a clumsy attempt to straighten things out in the Hebrew text, which in places is admittedly difficult.

II. Jeroboam's Revolt.–While engaged on one of Solomon's vast building projects, Jeroboam displayed such ability that he was put in control of the porterage allotted to Joseph or the Israelitish clans (1 K. 11:27f.), and was sub-overseer under Adoniram, or Adoram (4:6; 11:28). Jeroboam revolted, or "lifted up his hand against the king." The juxtaposition of the corvée and the revolt warrants the supposition that Jeroboam's people revolted because of the forced labor exacted from them, not because of intrigue or their leader's personal ambition as has been suggested (J. Montgomery, *ICC* on Kings); Jeroboam's prophetic backing would otherwise be hard to explain.

The story of Jeroboam's encounter with the prophet Ahijah is told in 1 K. 11:29. The prophet tells him that, provoked by Judah's idolatrous practices, God was going to split the kingdom and give him ten of its twelve parts. The prophet corroborated the oral message by tearing his upper garment into twelve pieces and giving Jeroboam ten of them. But Jeroboam's plot, if it was ever a full-blown plot and not merely the airing of a grievance, was discovered by the authorities; Jeroboam fled to Egypt to find asylum with the famous Shishak (Sheshonq).

III. Secession of the Ten Tribes.–The protest against the corvée gathered force at Solomon's death and embraced all the northern tribes; Jeroboam, who had returned from Egypt, became his people's spokesman (1 K. 12:2; see J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 301; cf. N. Sarna, *JBL*, 78 [1959], 313). When Rehoboam came to Shechem to be confirmed as king over all Israel, the protesting tribesmen said that they were willing to serve him on condition that he reduce the forced labor and taxation, which were so burdensome and galling. But Rehoboam allowed himself to be influenced by his young courtiers and spoke roughly to them; so the cry went up:

"What portion have we in David?
We have no inheritance in the son of Jesse:
To your tents, O Israel:
Look now to your own house, David." (1 K. 12:16)

Events followed in rapid succession. Adoniram, whom Rehoboam sent as chief of the corvée, presumably to force people to submit, was stoned by "all Israel," i.e., the representatives of all the tribes, an act that sealed the secession for good. Rehoboam mounted his chariot in haste and fled to Jerusalem. Once safely among his people, he summoned his Judean and Benjaminite troops and prepared to fight for his lost provinces. But the king's intention to fight was opposed immediately by the prophet Shemaiah (1 K. 12:21-24).

IV. Jeroboam Becomes King of Israel.–Jeroboam, who first aired the grievance against the forced labor, and who led the aggrieved Ephraimites when Rehoboam sought election, was then called to the throne. He first fortified Shechem, which became the capital of the kingdom. He later built up Penuel E of the Jordan, no doubt as a war measure. Later still, Tirzah seems to have become the capital, since it housed the palace (1 K. 14:17; cf. *WHAB*, p. 50b). But if prophetic interference prevented the war over the secession, intermittent fighting took place later between the two parts of the now irreparably divided kingdom, and in one battle Jeroboam fared badly (1 K. 14:30; 2 Ch. 13:2-20). When Shishak (*ca.* 935-914) attacked Palestine, Israel suffered as well as Judah, as is shown by the inscriptions in the temple of Karnak, though Judah must have suffered more than Ephraim (1 K. 14:25).

V. His Apostasy.–Prophetic support notwithstanding, Jeroboam failed miserably because he became involved in Baal worship (cf. Hos. 13:1). Anxious to keep his throne, Jeroboam adopted a disastrous religious policy. He feared that the periodic pilgrimages to the temple at Jerusalem would make his people transfer their allegiance to the heirs of David and Solomon and destroy the dynastic hopes he had entertained as a result of the prophetic oracle (1 K. 11:38). He therefore set up two official shrines for the pilgrimage, one at Bethel and the other at Dan, which were situated south and north at the ends of the realm. Bethel was associated in the public mind with the patriarchs, and with Jacob in particular, who recognized the place as "the house of God and . . . the gate of heaven" (Gen. 28:17). Dan may have been associated with some local cult.

The charges leveled against Jeroboam are many. He set up high places. He enrolled into the priesthood people who did not belong to Levitical families. He altered the religious calendar. He set up two golden calves, or young bulls, symbols of fertility, which were part and parcel of Canaanite Baal worship (1 K. 12:28-32). This was not only wrong in itself but it also opened the way for the abominations associated with Canaanite Baal worship.

(*See also* DISEASE III.C.)

VI. End of the Dynasty.–The same Ahijah, the prophet from Shiloh, who brought Jeroboam the promise of a "sure house" or a stable dynasty (1 K. 11:38), brought him on a second occasion a message of doom: "Therefore behold, I will bring evil upon the house of Jeroboam and will cut off from Jeroboam every male . . . because of the sins of Jeroboam which he sinned and which he made Israel to sin" (1 K. 14:10, 16). Jeroboam died in the twenty-second year of his reign and was succeeded by his son Nadab, who was cut down by a usurper after a short reign of two years, when the whole royal family was massacred.

2. Jeroboam II, the tenth king of Israel, a son of King Jehoash and a great-grandson of Jehu (2 K. 14:23-29).

I. His Wars.–His long reign of forty-one years was truly an Indian summer. It began not long after the nation's deliverance from the atrocious oppression of the Arameans, when the Israelites were "like the dust of threshing" (2 K. 13:7). Helped by Aramean internecine wars, as well as Assyria's temporary incapacity, Jeroboam was able to regain lost territory, or territories, and was rightly called the savior of his people (14:27). "He restored the border of Israel from the entrance of Hamath," i.e., from the pass between Lebanon and Anti-Lebanon in the valley of the Beqa', "to the Sea of the Arabah," at the southern end of the Dead Sea (14:25).

Some have flatly denied the biblical statement of 14:28 that Jeroboam took Damascus and Hamath (see Montgomery, *ICC* on Kings, p. 444), but this is to deny what the Bible does not assert. The meaning of the passage is clear only when the Semitic word order is understood correctly. The passage says that Jeroboam did two things: he fought against Damascus and Hamath, and also recovered territory. What he recovered or restored, the verse does not name; it does say, however, that the beneficiary was not his own northern kingdom but Judah. The place recovered was Elath. The verse may be read: "Now the rest of the acts of Jeroboam . . . how he warred against Damascus and Hamath, and restored (what he restored) to Judah by the hand of Israel, are they not written in the book of the Chronicles of the kings of Israel?" (cf. Montgomery's criticism, *ICC* on Kings, p. 444).

The same passage relates that Jonah, who prophesied against Nineveh and threatened it with quick destruction, also prophesied during Jeroboam's reign, and that Israel

like Nineveh was reprieved, at least for a time, because of God's mercy and long-suffering.

II. Spiritual Decay and Prophetic Condemnation.–Amos, one of the prophets who lived during Jeroboam's reign (Am. 1:1), has left us a picture, or rather a series of pictures, of the moral and spiritual decay that was fast leading the nation to destruction. The people bragged about their military victories (6:13) and suffered from a false sense of security (6:1). They were inordinately proud of their great houses of dressed stone decorated with inlaid ivory work and of their pleasant vineyards with their trailing grape vines and luscious fruit; but they were not concerned that it all came from exactions from the depressed poor and needy (5:11).

They were shamelessly immoral (Am. 2:7). They ate and drank and sang; they perfumed themselves and listened to music lying about on fine couches; but the woes of the common folk and their grinding poverty did not concern them at all (6:4-6). They celebrated their religious festivals with many blood offerings and with an elaborate choral worship, but there was flagrant injustice everywhere, and a judge could be bribed with a piece of silver or the gift of a pair of shoes (2:6).

> "I hate, I despise your feasts. . . .
> Take away from me the noise of your songs;
> to the melody of your harps I will not listen.
> But let justice roll down like waters,
> and righteousness like an everflowing stream."
> (Am. 5:21-24)

Amos' powerful pleading did not change the nation; he was insulted for his pains, and when he prophesied the speedy end of the dynasty he was accused of plotting against Jeroboam and was asked to leave the country (Am. 7:12). M. S. SEALE

JEROHAM jə-rō'həm [Heb. *yᵉrōḥām*–'may he be tender'(?)].

1. An Ephraimite, the father of Elkanah and grandfather of Samuel (1 S. 1:1; 1 Ch. 6:27, 34 [MT 12, 19]). Jerahmeel is the name in LXX B in 1 Samuel and in LXX L and MSS in 1 Chronicles.

2. A Benjaminite (1 Ch. 8:27), apparently the same as JEREMOTH (cf. v. 14), and probably the same as the Jeroham of 1 Ch. 9:8.

3. Ancestor of a priest in Jerusalem (1 Ch. 9:12, the same as Neh. 11:12).

4. A man of Gedor, father of two of David's Benjaminite recruits at Ziklag, though Gedor might be a town in southern Judah (1 Ch. 12:7 [MT 8]).

5. Father of Azarel, David's tribal chief over Dan (1 Ch. 27:22).

6. Father of Azariah, one of the captains who supported Jehoiada in overthrowing Queen Athaliah (2 Ch. 23:1).
D. F. ROBERTS

JERUBBAAL jer'ə-bāl, jə-rub'bā-əl [Heb. *yᵉrubbaʿal*–'let Baal contend'(?)]. The name given to Gideon by his father Joash and the people in recognition of his destruction of the altar of Baal at Ophrah (Jgs. 6:32). For this name the form "Jerubbesheth" (2 S. 11:21) was substituted after the analogy of "Ishbosheth" and "Mephibosheth," in which *bōšeṯ*, the Hebrew word for "shame," displaced the word *baʿal*, no doubt because the name resembled one given in honor of Baal. *See* GIDEON.

JERUBBESHETH jer-ub-bē'sheth, jə-rub'ə-sheth [Heb. *yᵉrubbāšeṯ*–'let shame contend']. It is found once (2 S. 11:21) for JERUBBAAL.

The Hebrew word *bōšeṯ*, "shameful thing," was substituted by later editors of the text for *baʿal*, "lord," in the text of Jer. 3:24; Hos. 9:10; in 2 S. 2:8, etc., we find Ishbosheth, the same as Eshbaal (Ishbaal) in 1 Ch. 8:33; 9:39. The reason for this was reluctance to pronounce the word *baʿal*, which had by their time been associated with Canaanite forms of worship. In 2 S. 11:21, LXX Lucian has "Jeroboal," which LXX B has corrupted to "Jeroboam." Cf. MERIBBAAL; MEPHIBOSHETH. For a NT case cf. Rom. 11:4 and see Sanday and Headlam, comm. on Romans (*ICC*, 1902), *in loc.* *See* JERUBBAAL. D. F. ROBERTS

JERUEL jə-rōō'əl, jer'ōō-əl [Heb. *yᵉrûʾēl*–'founded by El']. Jahaziel prophesied that King Jehoshaphat should meet the hordes of Moabites and Ammonites, after they had come up by the "ascent of Ziz," "at the end of the valley [i.e., *wâdī*], before the wilderness of Jeruel" (2 Ch. 20:16). The particular part of the wilderness intended seems to have been between En-gedi and Tekoa.

JERUSALEM jə-rōō'sə-ləm [Heb. *yᵉrûšālayim*, *yᵉrûšālēm* –'city of wholeness'; Gk. *Ierosalēm, Hierosolyma*]. The principal city of ancient Israel, location of the temple, capital of the kingdom of Judah, chief city of nascent Judaism, the city where Jesus Christ was tried and crucified, the place visited (according to tradition) by the prophet Muhammad on his way to heaven, and hence the holiest city of Jews and Christians and (after Mecca and Medina) the third holiest city of the Moslems.

I. Names.–A. Jerusalem. The name "Jerusalem" has traditionally been interpreted to mean "city of peace," from the component parts (as found, e.g., in the Amarna Tablets) *uru*, "city," and *salim*, "peace." This etymology has been challenged and even rejected by some (e.g., M. Burrows, *IDB*, II, 843). The accuracy of the etymology depends on whether the original name was Hebrew or another language.

The earliest appearance of the name is in the Egyptian Execration Texts of the 12th Dynasty, where the city is named *Aushamem* and its ruler is called Setj-ʿanu. The name appears in the Amarna Letters (14th cent. B.C.) as $^{al}u\text{-}ru\text{-}sa\text{-}lim$ and $^{al}u\text{-}ru\text{-}sa\text{-}lim^{ki}$ (Am.Tab. 287:25, 46; *ANET*, p. 488); ^{al} is a determinative for a city and ^{ki} a postpositive determinative for a place. Early discussions

of the Ebla discoveries reported that the name occurred in an Ebla tablet as *urusalima* (*Los Angeles Times*, June 7, 1976). Later reports gave the name as *Salim* (G. Pettinato, *BA*, 39 [1976], p. 46). Pettinato's *Catalogo dei testi cuneiformi di Tell Mardikh-Ebla* (1979) lists neither form, however; *sal-lim*^{ki} and *u₉-ru*$_x^{ki}$ do appear in tablet 6522 r.IV, but there is no indication in the catalog of their geographical location or their relationship to one another. In Sennacherib's account of his siege of Jerusalem (Taylor Prism) the name occurs as ^{al}*ur-sa-li-im-mu* (or *-ma*). It may be worth noting that the determinative ^{al} is the Sumerian sign uru, meaning "city." It is possible that the original name was something like ^{*uru}*sa-lim*, which came to be read as *urusalim*, to which a new determinative was added pleonastically (but see B below).

The suggestion that the name is a Hebrew derivative must also be considered. Burrows traced the first part of the word to the Hebrew root *yrh*, which regularly means "throw, shoot," and in a derived sense "teach." But Burrows appealed to Job 38:6, where the root occurs in the context of laying a cornerstone, and analyzed "Jerusalem" as meaning "foundation of Shalem." He found the same root in the names Jeruel, Jeriel, and Jeriah, which are theophoric names and therefore would be close parallels to "Jerushalem." Further support for this etymology is found in the name Salem (see B below). But the appearance of the name in fourteenth-century texts, or possibly even in eighteenth-century texts, raises the question of how far back Hebrew etymologies can be traced. The names Jeruel, Jeriel, and Jeriah are quite late (only in Chronicles), and therefore are hardly valid for the study of a word that occurs many centuries earlier. The name of the city could, of course, be "proto-Hebrew" or "early Canaanite." If so, the shift of initial *w* to *y* probably had not yet occurred, and the root *yrh* would have been **wry*. This could account for the form *uru* (from **wuru*), found in the Amarna Tablets.

The biblical form *y^{e}rûšālayim*, as vocalized in the perpetual *Q* of the MT, was formerly taken as a dual form and explained as referring to the two parts of the early city, Lower and Upper Jerusalem. It is now generally recognized that the early form of the name was *y^{e}rûšālēm*, as found in the Aramaic of Daniel and Ezra. This form has the support of the Akkadian forms and the Greek of the LXX. The so-called dual ending of the Masoretic vocalization is probably a back-formation, similar to that of *šāmayim* < **šāmēm*, "heaven." The ending *-ê(n)*, however, is an oblique dual form in Akkadian, and thus this explanation must not be too carelessly rejected.

The two Greek forms of the name, *Hierosolyma* and *Ieroysalēm*, are somewhat interchangeable (note that both forms occur in Acts 1:4, 8). The LXX, Josephus, Luke, and Paul seem to prefer the second form, but textual variants make such conclusions uncertain. Two Latin forms, *Hierosolym* and *Ierusalem*, are found, generally corresponding to the Greek forms, but again, textual variants complicate the problem.

B. Salem. The city is called "Salem" (Heb. *šālēm*, Gk. *salēm*) in Gen. 14:18 and Ps. 76:2 (MT 3); in the LXX (75:3) the latter is translated *eirḗnē* (cf. also He. 7:1f.). Salem has been taken as an abbreviation of *y^{e}rûšālēm*, but this view has now generally been abandoned. In fact, in spite of the parallelism with "Zion" in Ps. 76:2 (MT 3), the identification of Salem with Jerusalem has been questioned, and other locations have been suggested, such as the Salim of Jn. 3:23 in the Jordan Valley S of Beth-shean, or the Shalem of the ancient versions (Gen. 33:18) not far from Shechem.

Whether "Salem" is to be associated with the deity "Shalem" is a question that needs further study. It is well known that *ś* and *š* have developed from phonetic shifts, and that this was recognized in biblical times in the Shibboleth-Sibboleth password (Jgs. 12:6). But the alternation of *ś/š* is not a haphazard phenomenon that can be called on at will by philologists and commentators to make the equations they would establish (cf. W. S. LaSor, "Semitic Phonemes," Ph.D. diss., Dropsie, 1949; *JQR*, 48 [1957], 161-173). The god *šlm* is found in Ugaritic literature, where the births of Shaḥar and Shalem are mentioned (*UT* 52:53). Shaḥar and Shalem have been described as the morning and evening stars (Heb. *šaḥar* is "dawn" [Ps. 22, title (MT 1)]), and Shalem has been identified as Venus (cf. *IDB*, IV, 304) and as Saturn (*IDB Supp.*, p. 821). The names Solomon and Shulamit have been interpreted as coming from the worship of Shalem. But the initial identification of Salem with Shalem has not been confirmed. The *š* in Ugar. *šlm* and Heb. *šlm* is regularly also *š* in Akkadian (*šalâmu*). This same *š* occurs in the word Salem (Heb. *šālēm*) in Gen. 14:18. But in the Akkadian form *urusalim(mu)*, it is *s* and not *š*. Complicating the identification further is the fact that proper nouns were often borrowed after a phonetic shift had occurred and therefore do not reflect that shift. (The Akkadian syllabogram *sa* is also read as *ša*$_{10}$, but this is rare and does not occur with this value in the periods of the Amarna texts or the Assyrian royal inscriptions.)

C. Jebus. In Jgs. 19:10, in what could be a scribal gloss, Jerusalem is identified with Jebus. (The same identification occurs in explanatory phrases in Josh. 18:28; 1 Ch. 11:4.) The Jebusites were one of the tribes or groups included in the larger term "Canaanites," and are regularly listed with other such tribes or groups (cf. Gen. 10:15-18 and many other passages where the various "-ites" are named [e.g., Josh. 3:10]). See III.B below.

D. City of David. With the conquest of Jebus, the name City of David came to be used for Jerusalem (2 S. 5:9; cf. Lk. 2:4, 9). The City of David was but a part of Jerusalem, although the term could be used in synecdoche for Jerusalem (see III.C.2.a below).

E. Zion. "The stronghold of Zion" occurs in connection with the capture of Jebus (2 S. 5:7), and the name ZION became a synonym for the City of David and for the city of Jerusalem. The name does not occur often in historical passages, but it is quite common in poetical and figurative language, and therefore is used with reference to the heavenly Jerusalem (cf. Isa. 60:14; He. 12:22; Rev. 14:1). The term is also applied to the temple and to the people. No satisfactory etymology or explanation of the name has been given. The expression "stronghold of Zion" does not necessarily imply that a portion of Zion was the stronghold; it is more likely that the terms are used in apposition and that Zion itself was the stronghold (see III.C.1.b below).

F. Moriah. In 2 Ch. 3:1 we read that Solomon began to build the house of the Lord "in Jerusalem on Mount Moriah." Josephus identified this with "the very place that Abraham brought his son Isaac, to sacrifice him as a burnt-offering" (*Ant.* vii.13.4 [333]), a belief found also in Jub. 18:13 and in Moslem tradition. The term Moriah occurs in the Bible only in Gen. 22:2, where Abraham is instructed to go to "the land of Moriah" and offer Isaac on "one of the mountains," and in 2 Ch. 3:1; hence there is little biblical basis for the traditions that have grown up about this term. It might be worth noting that the LXX of 2 Ch. 3:1 reads *toú Amoria* (or *Amoreia*), a form found in 2 Esd. 9:1 for "Amorite," suggesting that a variant reading of the Hebrew word is possible.

G. The City. "The city" and several modifications of

the term frequently stand for Jerusalem: "the city," Jer. 32:24; Ezk. 7:23; "the city of God," Ps. 46:4 (MT 5); 87:3; "the city of our God," Ps. 48:1, 8 (MT 2, 9); "the city of the Lord [Yahweh]," Ps. 101:8; Isa. 60:14; "the city of the Lord [Yahweh] of hosts," Ps. 48:8 (MT 9); "the city of righteousness," Isa. 1:26; "the holy city," Isa. 48:2; 52:1; Neh. 11:1, 18; cf. "your holy city," Dnl. 9:24; "the faithful city," Zec. 8:3; "the city of Judah," 2 Ch. 25:28; Babylonian Chronicle (*CCK*, pp. 33, 73). There are also derogatory modifications of the term, such as "the oppressing city," Zeph. 3:1, and "the bloody city," Ezk. 22:2; 24:6, 9.

H. Ariel. "Ariel," *'ᵃrî'ēl*, occurs five times in Isa. 29. The meaning of the term is disputed; some scholars take it to mean "lion of God" (*'ᵃrî*, "lion"), and others "hearth of God," i.e., His home (cf. Ezk. 43:15f., *'ᵃrî'ēl*, "altar-hearth"). R. Youngblood's suggestion that "Ariel" means "city of God" deserves careful consideration ("Ariel, 'City of God,'" in A. I. Katsch and L. Nemoy, eds., *Essays on the Occasion of the Seventieth Anniversary of Dropsie University, 1909-1979* [1980], pp. 457-462).

I. Yahweh Is There. "Yahweh Is There," *YHWH šāmmâ* (Ezk. 48:35), is the name given to the eschatological city (cf. Rev. 21:22; see IV below).

J. New Jerusalem. "New Jerusalem," Gk. *Ierousalēm kainēn* (Rev. 21:2), is the name given to the city that John saw in his vision of the new heaven and the new earth. It is also called "the above Jerusalem," *hē áno Ierousalēm* (Gal. 4:26) — contrasted with "the now Jerusalem," *tē nýn Ierousalēm* (v. 25) — and "the heavenly Jerusalem," *Ierousalēm epouraníō* (He. 12:22), where it is also called "Mount Zion" and "the city of the living God."

K. Aelia Capitolina. "AELIA CAPITOLINA" is the name given to the city built by the Romans after Jerusalem was destroyed in A.D. 135. See III.J below.

L. El-Quds. El-Quds (pronounced locally *el-'uds*) is the common Arabic term today, meaning "the holy (city)." A more classical term with the same meaning is *el-Muqaddes*.

II. Physical Features.—*A. Location.* Jerusalem is situated on the central mountain ridge of Palestine, almost exactly opposite the north tip of the Dead Sea, 58 km. (36 mi.) E of the Mediterranean and 26 km. (16 mi.) W of the Dead Sea (direct measurements). On the Palestine Survey grid the location is 1723.1316 (Dome of the Rock), or 31°46′45″ N Lat. and 35°13′25″ E Long. (dome of the Holy Sepulchre). The city's altitude is between 640 and 770 m. (2100 and 2526 ft.) above sea level. Just N of the city Mt. Scopus (Râs el-Mešârif) rises to about 820 m. (2690 ft.), and just S of the city Jebel Mukabbir (Hill of Evil Counsel) rises to 895 m. (2936 ft.). East of Jerusalem, across the Kidron Valley, the Mt. of Olives reaches an elevation of 818 m. (2684 ft.). West of Jerusalem are heights of 848 m. (2782 ft.) and 842 m. (2762 ft.). In other words, Jerusalem, "to which the tribes go up" (Ps. 122:4), is not the highest point; on the contrary, from whatever direction the city is approached it cannot be seen until one of the surrounding heights is reached. In antiquity it lay just E of the infrequently traveled N-S route and just S of an E-W route of no great importance.

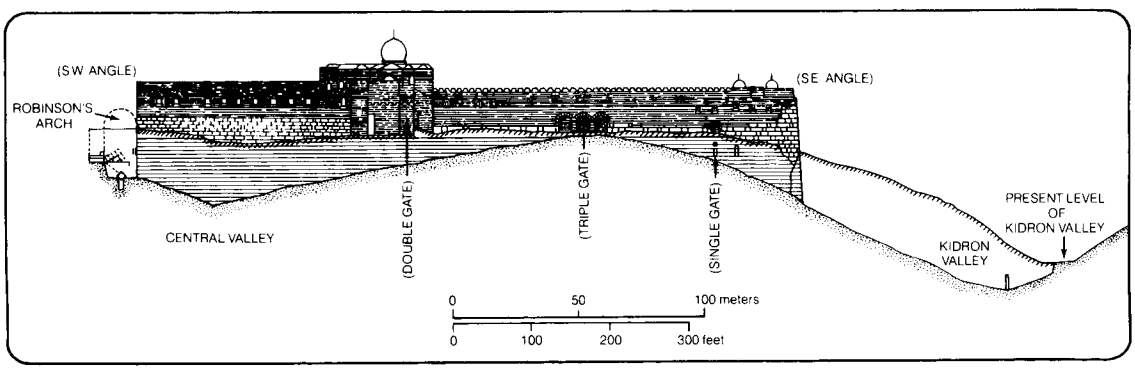
B. Topography. Understanding the defenses of Jerusalem as well as its growth and development requires a thorough knowledge of its peculiar situation. Unfortunately, more than twenty sieges (cf. J. Simons, p. 27) have altered the topography of the city considerably since it was first occupied by King David. This description attempts to picture the situation as it was from 2000 B.C. to the beginning of the Christian era.

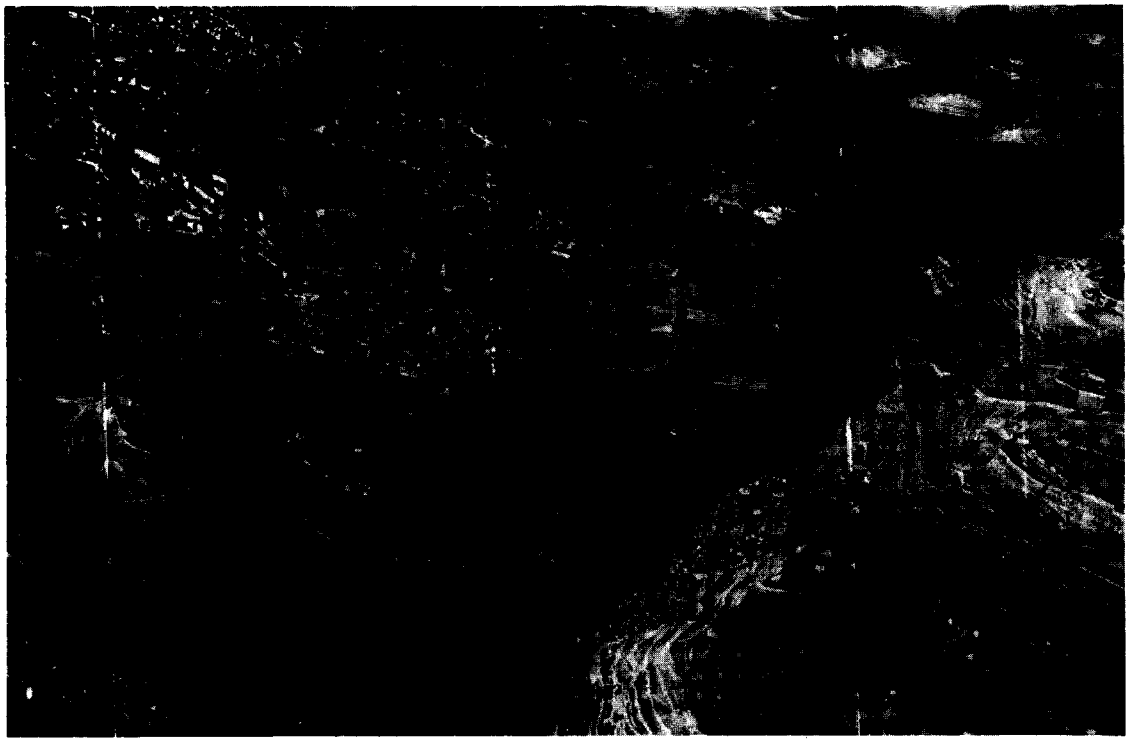
The basic area of the city resembles a square with no definite top line. The eastern side is marked by the ravine of the Kidron (Heb. *naḥal qiḏrôn* [2 S. 15:23]; Gk. *kedrōn* [Jn. 18:1]), "the ravine [*cheímarros*] to the east of the city" (1 Macc. 12:37). In the region NE of Jerusalem, beyond the junction of Wâdī ej-Jōz, the Kidron cuts its way from an elevation of about 720 m. (2360 ft.) to about 610 m. (2000 ft.) in a distance of about 1600 m. (1 mi.). The present Kidron (known today as Wâdī Sitti Maryam, farther south as Wâdī Ṭanṭur Far'ûn, then Wâdī Silwān) is 12 m. (39 ft.) higher and 27 m. (89 ft.) farther east than it was in Jebusite times, according to soundings.

The western and southern sides of the square are formed by the Valley of Hinnom, *gê hinnōm* (Josh. 15:8), more often *gê ben hinnōm*, "Valley of the son of Hinnom" or "sons of Hinnom" (also in Josh. 15:8), from which is derived Gk. *géenna*, "Gehenna" (Mt. 23:33). The Valley of Hinnom descends from the northwest, where it is known as Wâdī el-Mês, turns toward the south, where it is known as Wâdī er-Rabâbeh, at an altitude of 750 m. (2362 ft.) above sea level, bends rather sharply toward the east at an altitude of 710 m. (2329 ft.), and then joins the Kidron ravine at the southeastern corner of the city, where they become Wâdī en-Nâr. The rectangular area between the valleys is therefore decidedly marked by these deep ravines on the east and south, and shallower ones on the west. It thus becomes apparent that any attacks on the city would be normally from the north, and any growth of the city had to be toward the north and northwest.

This basic area of the city was further cut by two interior valleys, one running approximately N-S, the other E-W. The former is by far the more significant. Since it is unnamed in Scripture, it has come to be known simply as the Central Valley. Beginning approximately midway between the Hinnom and the Kidron N of what is today known as the Damascus Gate, the Central Valley, to which

Cross section showing the Central Valley between the northwest hill (left) and the northeast hill, the Ḥaram esh-Sherîf (right). On the far right is the Kidron Valley.





Aerial view of Jerusalem from the south. In the center is the Ḥaram esh-Sherîf (the temple mount). To its left, running through the center of the city, is the Tyropoeon (Central) Valley. To the right of the Ḥaram is the Kidron Valley, which joins the Hinnom Valley just SW of the Ḥaram (Matson Photo Service)

Josephus gave the name "valley of the cheesemakers" (*tōn tyropoiōn,* whence Tyropoeon, cf. *BJ* v.4.1 [140]), but more commonly known today as simply *el-Wâd,* cuts a deep gash until it joins the Kidron just before its confluence with the Hinnom. The Central Valley has become filled with rubble as the result of many destructions of the city, so that the present valley bottom (at the southwest corner of the temple mount) is 35 m. (115 ft.) higher than and 30 m. (98 ft.) W of its location prior to the Herodian period.

The east-west valley, which Simons (p. 21) called the "Cross-Valley" (also called the "Transverse Valley"), is a branch of the Tyropoeon Valley, coming from the west about where the Hinnom turns to the south (the modern Citadel and Tower of David), and joining the Central Valley about where the Plaza of the Western Wall is located today (near Wilson's Arch). A similar depression along the same line flows westward to join the Hinnom, so that these two depressions appear to form a division of the basic area into northern and southern quarters.

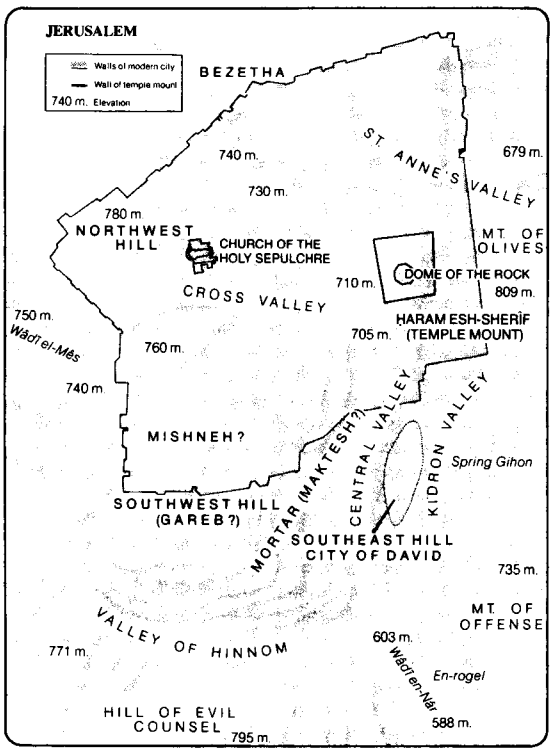
The basic city, then, can be divided into an eastern (smaller) part, tapering to a point in the south, and a western part, and each of these can be divided into northern and southern parts. Josephus called the southwest hill the "first," on which was the "upper city," which he mistakenly believed to be David's City (*BJ* v.4.1 [137]). His "second" hill or "lower city" he called the Acra, which is David's City (see III.C.1 below; *BJ* v.4.1 [138]). The "third hill" was the temple mount (*BJ* v.4.1 [139]). Josephus did not mention the northwest hill — a point that should be considered when discussing his "third wall." He did refer to a "fourth hill," which he associated with Bezetha (*BJ* v.4.2 [149-151]), the region N of the Ḥaram esh-Sherîf in the modern city.

The northeast hill (the temple mount, Ḥaram esh-Sherîf) rises to an altitude of 744 m. (2441 ft.). Originally it sloped off rather sharply to east and west, but the sides were built up in the Herodian period. It would seem that at one time a depression separated the northeast from the southeast hills, and Josephus indicated that the southeast hill was formerly higher (cf. *Ant.* xiii.6.7 [217]; *BJ* v.4.1 [139]). The southeast hill, often called Ophel, was somewhat broader in the Jebusite period than it is today; destruction of the walls and erosion have cut away the eastern slope. The southwest hill (the Upper City, the southern portion of which is today called Mt. Zion) rose to 768 m. (2519 ft.). The northwestern portion rises gradually from the Central Valley, reaching an elevation of 770 m. (2526 ft.) at the northwestern corner of the present walls. The Old City, within the present walls, occupies the northwest, Bezetha, the Ḥaram, and the northern part of the southwest hills.

From the Hinnom on the west to the Kidron on the east, the basic city is about 750 m. (2460 ft.) across its southern dimension, and about 875 m. (2871 ft.) across its northern dimension, while from "St. Anne's Valley" (N of the present Golden Gate) to the junction of the Kidron and the Hinnom the distance is about 1000 m. (3200 ft.). As already noted, however, the northern boundary was indefinite and continued to move outward as the city grew.

C. Hydrography. A major determining factor in the location of cities in antiquity was the available water supply. For Jerusalem there was only one spring. To meet the needs of the growing city, water had to be collected during the rainy season or brought in by aqueducts and stored in pools and underground cisterns.

1. Spring Gihon. The one spring was the Gihon (1 K. 1:33), known today as ʿAin Umm ed-Darāj ("spring of the



mother of the steps"), 'Ain Sittī Maryam ("spring of our Lady Mary"), and the Virgin's Fountain. It is located in the Kidron Valley about 250 m. (820 ft.) S of the present south wall of the Ḥaram, approximately at the northeastern end of the ancient City of David. "Gihon" very likely comes from the root *gyḥ*, "gush," with the elative ending *-ôn*, hence "the great gusher," so named from the fact that it gushes for a period of about forty minutes, at intervals of six to eight hours, depending on the season. Its flow is about 1200 cu. m. (42,400 cu. ft. = 317,000 U. S. gals.), less in the dry season. As a result, some provision had to be made to conserve or use the water as it became available. To that end aqueducts were built, and the water from them was used for watering gardens or collected in a pool (see III.C.2.g; D.2.f below). Because of the peculiar gushing property of the Gihon it was formerly incorrectly identified as the pool of Bethesda (cf. Jn. 5:2). The pool of Bethesda has been excavated near the Church of St. Anne.

2. En-rogel. Because of its name (*'ên* = "spring"), EN-ROGEL (Josh. 15:7) was formerly thought to be a second source of water for Jerusalem. It is generally identified with Bîr Ayyûb ("Job's well" — a *bîr* is not a spring), on the right bank of Wâdī en-Nâr, about 210 m. (690 ft.) beyond the confluence of the Kidron and the Hinnom. The source of the water is at the bottom of a shaft 30 m. (100 ft.) deep. According to one report, this source had been lost and was rediscovered by the Crusaders in A.D. 1184, when they cleared the tunnel. It is possible that the original En-rogel was covered as the result of an earthquake (cf. Josephus *Ant.* ix.10.4 [225], who took *Erōgē* to mean En-rogel). Whether or not the present well is the location of the ancient "spring," En-rogel was certainly in this vicinity (Josh. 15:7f.). Modern studies in the area suggest that the water that supplies Gihon is carried by the hard limestone strata to feed En-rogel also.

3. Jackal's Well. Also known as the Dragon's Well (*'ên hattannîn*, Neh. 2:13), the Jackal's Well has not been identified, but the suggestion of G. A. Smith (I, ch. 4) that it may have been formed by an earthquake around the time of Nehemiah and later dried up offers one possibility. The location is in the Valley of Hinnom between the Valley Gate and the Dung Gate, i.e., S of the southwest hill. There is no indication that this was a significant source of water in any other period of the city's history (see III.F.2.b below).

D. Geology. The watershed of the region is principally the product of the Cretaceous period. To the west it is Turonian, to the east Senonian, but the immediate vicinity of Jerusalem is a Cenomanian outcropping, the result, according to Baly (*GB* [2nd ed. 1974], p. 36), of erosion caused by the rains from the west. This Cenomanian limestone is of major importance for the history and development of the city. It is found in regular strata, of which three may be mentioned.

The superior mizzi (Arab. *mizzi ḥelû*, "sweet mizzi"), found in a stratum 21 m. (70 ft.) or more thick, is hard, reddish grey, fine-grained with bands of flint, and capable of taking a polish. It is well adapted for stairs, cornices, and the framing of doors and windows. The Sakhra or Stone under the Dome of the Rock is an outcropping of *mizzi ḥelû*.

Royal mizzi (*mizzi melekeh*) is found in a stratum often 11 m. (35 ft.) thick, and is characterized by its softness while in the ground, and its gradual hardening when it is exposed to the air. It is therefore easy to cut and shape. A large number of caverns, cisterns, tombs, and several aqueducts are cut into this rock. The "royal caverns" (Josephus *BJ* v.4.2 [147]), popularly called Solomon's Quarries, are cut in the royal mizzi stratum.

Jewish mizzi (*mizzi yahûdi*) is hard and highly valued as a building material, but it is difficult to work. Red mizzi (*mizzi 'aḥmâr*), a variety of *mizzi yahûdi* (which is yellowish grey, sometimes described as flame color), is found in red, pink, and shades of brown, takes a polish, and is known locally as "marble." This stratum forms a deep layer under the entire city and surfaces only in the Kidron Valley. Water from the rains percolate into the ground and are held by this stratum, which drains them toward the Kidron. The water of the Spring Gihon is probably a result of the *mizzi yahûdi* stratum (*GP*, I, 181-84).

E. Climate. Jerusalem has the same general climate as the rest of Palestine, namely, that dominated by the Etesian winds, resulting in a two-season year, the rainy season ("winter") and the dry season ("summer"). However, since Jerusalem is situated at an altitude of about 750 m. (2460 ft.), almost astride the central mountain range, its weather is somewhat different from either that of the western slopes or that of the Jordan Valley (Ghor).

The wind is prevailingly from the west: from the northwest in the rainy season and from the southwest in the dry season. The temperature therefore is generally moderate, 8°-14°C (46°-56°F) in January, 18°-28°C (64°-82°F) in June and September, 19°-29°C (66°-84°F) in July, and 20°-30°C (68°-86°F) in August. Summer days are warm, but a cool breeze usually springs up in the late afternoon, and the evenings are cool. When the wind shifts to the southeast (the khamsîn or sirocco), the air becomes sultry, and the temperature may climb to 36°C (98°F) and has been known to reach 40°C (104°F). This usually occurs in May and September-October. The day in Jerusalem at its longest is 14 hours 10 minutes, and at its shortest, 9 hours 50 minutes.

Precipitation at Jerusalem averages 63 cm. (25 in.) annually, with an average of fifty-seven days of rain, including six days of steady rain. The rainy season is divided into three parts: (1) the "early rain" (*yôreh*, Dt. 11:14; Jer. 5:25),

which, in a good year, begins around Sukkoth (Tabernacles, 15 Tishri), approximately the beginning of October; (2) the "rain in its season" (*māṭār bᵉʿittô*, Ex. 9:33; 1 K. 8:33), usually coming in Kislev (late November or early December) and continuing into Nisan; and (3) the "latter rain" (*malqôš*, Hos. 6:3; Jer. 5:24), which normally comes in Nisan (late March or April) and may extend to about fifteen days before Shabûʿôt (Pentecost, i.e., around the middle of May). There is an average of 5 cm. (2 in.) or more in January-March, 2 cm. (¾ in.) or less in April-May and September-October, and none in June-August. In January the temperature may drop below freezing, possibly bringing snow (snow falls about once in five years). This is similar to the climate of the southern California coastal region, e.g., Los Angeles.

F. Sources of Information. The Bible is a major source of information for the biblical period, even though it contains no systematic presentation of the data, with the sole exception of Nehemiah's observations. Details in Sirach and in the two books of Maccabees must be added to the material in the Hebrew Bible, and additional details can be added from the Greek Bible (both Testaments).

Josephus must be considered a primary source, in spite of constant denigration of his historical reliability, for he lived in Jerusalem in the 1st cent. A.D., and when he speaks as an eyewitness (particularly in *BJ*) his witness should not be too quickly dismissed. Other details may be picked up from the Mishnah (completed *ca.* A.D. 200) and the Jerusalem and Babylonian Talmuds (to *ca.* A.D. 500), from visitors such as the Pilgrim of Bordeaux (early 4th cent. A.D.), Eusebius (*ca.* 260-340), Chrysostom (A.D. 354-407), and from the Madeba mosaic map (6th cent. A.D.). All such data must be carefully checked whenever possible, because measurements, locations, local names, etc., are often inaccurate or suspect.

For a survey of modern exploration and excavation, cf. Simons, pp. 27-34; B. Mazar, pp. 11-39; Yadin, pp. 131, 133, 135, 137; *see also* ARCHEOLOGY OF PALESTINE AND SYRIA.

III. History of Jerusalem.–A. Before 2000 B.C. At the present, scholars are entirely dependent on archeological discoveries for the earlier history of Jerusalem. If reports on the Ebla tablets from Tell Mardikh are confirmed by the publication of the pertinent texts, this may be somewhat altered.

In 1877 Germer-Durand found hand axes in the plain of el-Buqeiʿa, SW of the city. In 1933 an entire settlement dated to the Acheulo-Levalloisian culture was found. It therefore appears that there was a Paleolithic settlement in the Jerusalem area (I. Anati, *Palestine Before the Hebrews* [1963], p. 69; Anati preferred to call the artifacts Early Bifacial; cf. M. Stekelis, *JPOS*, 21 [1947], 80-87). Mesolithic sites have also been found in the region around Jerusalem (Anati, p. 146).

The earliest settlement in Jerusalem, by general consensus, was on the southeast hill, which had steep slopes on both sides (the Kidron and the Central valleys) for defense, and the necessary spring (Gihon) for water supply. Objects found in rock-cut tombs included pottery that K. Kenyon classified as Proto-Urban, more commonly called late Chalcolithic. The development of the city may be connected with the advent of newcomers, probably Semites, *ca.* 3300 B.C., but just who the previous inhabitants were is still not clear (cf. *CAH*, I/2 [3rd ed. 1971], 233f.; R. de Vaux, *Early History of Israel* [Eng. tr. 1978], p. 52, simply called them "Canaanites"). The suggestion has been made that they were HORITES (Hivites) or Hittites, but these terms are rather loosely used. Attempts to equate the Horites with the HURRIANS and the Hittites of Genesis with the Hittites of Anatolia are unsatisfactory, and the rendering of the terms in the versions further complicates the problem. In the Table of Nations (Gen. 10:15-18), Heth (usually taken as the progenitor of the Hittites by biblical interpreters) and the Hivites are, along with the Jebusites, descendants of Canaan. On this basis we would have to conclude that they were non-Semites — but the Canaanites spoke a Semitic language! Obviously no one is yet in a position to make definitive statements about either the earlier inhabitants or the more recent invaders.

B. Between 2000 and 1000 B.C. There was a cultural break between what J. H. Iliffe has called the Intermediate Early Bronze-Middle Bronze (the former M.B. IA) and Middle Bronze I (formerly M.B. IIB), which can be dated *ca.* 1850 B.C. (cf. *CAH*, II/1 [1973], 77-116). Egyptian Execration Texts found in 1926, of about the same date (late 12th or early 13th Dynasty), may contain the earliest references to Jerusalem. The names of enemies were inscribed on bowls or on figurines, which were then smashed. According to popular superstition, the smashing would accomplish the destruction of the enemy. One of these has the following inscription: "the ruler of Aushamem, Iyqa-ʾammu, and all the retainers(?) who are with him; the ruler of Aushamem, Setj-ʿanu, and all the retainers who are with him. . . ." On another, "all the Asiatics" are mentioned, and in the list of names that follows, "Aushamem" is given again (cf. *ANET*, p. 329). "Aushamem" is generally taken to mean Jerusalem, some scholars reading the hieroglyphic *ꜣw.w* as *uru*. Since Egyptian has no sign for *l* (*m* sometimes, but more often *n* or *r*, being used for *l*), *sꜣ.nw.m* could be read as *šāmēm* (=*sālēm*). But the reading is problematic. The names Iyqa-ʾammu and Setj-ʿanu appear to be a mixture of non-Semitic and Semitic elements. B. Mazar read these names as "Yqrʿm" and "Shasʿan" and classified them as "West Semitic" (*Mountain*, p. 45).

Although the date of Abraham is far from settled, the account in Gen. 14:18-20 is relevant here. Kings invaded the cities of the plain (vv. 1-12) and captured Lot, who was rescued by Abram (Abraham). The mysterious Melchizedek king of Salem blessed Abram, and Abram gave him "a tenth of everything" (vv. 17-20). In He. 7:2 "king of Salem" is interpreted to mean "king of peace." (It does no violence to the doctrine of inspiration to allow a popular etymology to become a vehicle of divine revelation, and even the king's name [*Malkî ṣeḏeq*, "my king is Sadqu"] is given the meaning "king of righteousness.") It was previously noted that "Salem" has been considered a synonym of Jerusalem (see I.B above), but this is far from certain. The location of Salem is given in Gen. 14:17f. as near "the Valley of Shaveh (that is, the King's Valley)," and in 2 S. 18:18 the King's Valley is near Jerusalem. But it is well known that over a period of time place names are transferred from one location to another (e.g., Mt. Olympus, which was originally in Asia Minor, was transferred to northern Greece).

In Gen. 22:2, Yahweh tells Abraham to take Isaac to "the land of Moriah" and sacrifice him "upon one of the mountains." In 2 Ch. 3:1 the location of Solomon's temple is given as "in Jerusalem on Mount Moriah" (see I.F above).

We move toward firm historical ground with the references to Jerusalem in the Amarna Tablets (14th cent. B.C.). Abdu-Ḫeba of Jerusalem wrote a number of letters (six of which are included in the published material) to the pharaoh of Egypt requesting aid against his enemies, who were being supplied by Gazri (Gezer), Ašqaluna (Ashkelon), and Lakisi (Lachish). Abdu-Ḫeba refers to his city as

mat ^{al}*u-ru-sa-lim*, "the land of (city) Jerusalem" (Am.Tab. 287:25). The name Jerusalem occurs also in lines 46, 61, and 63 of the same tablet, written *mat* ^{al}*u-ru-sa-lim*^{ki}, *mat u-ru-sa-lim*^{ki}, and *matât* (pl. "lands") ^{al}*u-ru-sa-lim*^{ki}. The variants are of little consequence. The name is found also in Am.Tab. 289:14, 29 and in 290:15 where it occurs as *âl mat u-ru-sa-lim*^{ki}, "a city of the land of Jerusalem." (See I.A above.)

The name Abdu-Ḫeba is written with a logogram meaning "servant," and syllabograms for *ḫe* and *ba*. The logogram is often given the value ARAD, based on the Akkadian value; the Sumerian value, according to bilingual lists, may have been arda, erum, erad, or arad (*CAD*, I/2, 243; R. Labat, *Manuel d'épigraphie akkadienne* [1948], reads ÈR, ÈRI, ERUM). The rendering "Abdu-Ḫeba" presupposes that the Canaanite or West Semitic value was used at Jerusalem; many scholars have taken up the practice of leaving the question open by writing the name as ARAD-Ḫeba, as W. F. Albright suggested (cf. *JBL*, 45 [1924], 384; he read the name as ARAD-Gepa, thus inserting a second a priori while removing the first). The second sign can be read either *ḫi* or *ḫe*, and the third can be read *ba* or *pá*. The rendering Ḫeba (Ḫepa, Khepa) assumes (quite reasonably) that the name is theophoric, the deity being the Hurrian goddess Ḫebat. As a matter of fact, the whole name could be read as (Hittite) Puti-ḫeba, "servant of Ḫebat." Several scholars have pointed out that the expression "land of the city of" (reading *al* as "city" and not as a determinative) is a Hittite expression.

Abdu-Ḫeba (or Puti-Ḫeba) was king of the city-state of Jerusalem, although he does not call himself by that title. In some other Amarna Letters the authors slip (perhaps deliberately) and call themselves "king." Thus the ruler of Hazor opens his letter with the words "thus says the king of Hazor" (*šar* ^{al}*ḫa-zu-ri*^{ki}, Am.Tab. 227:3). The official title of these kings, who reigned under Egyptian protection, was *awêlu*, "freeman" or *ḫaziânu*, "inspector, overseer." Abdu-Ḫeba in one letter says, "I am not an inspector; I am only a petty-officer [^{awel}*ú-e-ú*] to the king my lord" (Am.Tab. 288:9f.). The term *ú-e-ú* is perhaps an Egyptian term (cf. Egyp. *w'w*, "soldier"). He recognizes that the king of Egypt has given him the throne of Jerusalem when he says, "I said, 'Not my father and not my mother established me in this place'" (Am.Tab. 286:9-11), but it appears that he had indeed inherited the throne when he goes on to say, "The strong hand of the king has caused me to enter unto the house of my father," i.e., the palace (Am.Tab. 286:12f.).

From a study of the Amarna Letters the following picture emerges. Egypt had long maintained hegemony over Palestine, with administrative centers at Gaza and Joppa. There were petty kings over the several city-states, all under Egyptian control. But Egypt had declined in strength, the Hittites and the Mitanni were having their own problems, and a group called the Ḫa-BI-ri was causing trouble (BI can be read either *bi* or *pí*; to avoid prejudging the value, *Ḫa-BI-ri* will be used). The petty kings were slandering one another. Abdu-Ḫeba complains to Pharaoh that Lab'aya and his sons gave [aid] to the Ḫa-BI-ri (Am.Tab. 289:24). Milkili of Gazri (Gezer) and Lab'aya of Šikmi (Shechem) are often accused (cf. Am.Tab. 287:29-31), but so is Šuwardata of Ki-el-te (cf. Heb. *qᵉʿîlâ*, near Hebron) (Am.Tab. 290:6f.). On the other hand, Šuwardata writes to Pharaoh, "Verily Abdu-Ḫeba is another Labaya and he takes our cities" (Am.Tab. 280:33-35). Ašqaluna (Ashkelon) and Lakisi (Lachish), along with Gezer, have given food, oil, etc., to the Ḫa-BI-ri (Am.Tab. 287:14f.). Abdu-Ḫeba is asking for "archers," probably a general term for infantry, much as "cavalry" is still used for tank corps.

Because some works still equate the Habiru (Hapiru, ʿApiru) with the Hebrews and the conquest of Canaan (*see* HABIRU), it is necessary to note several facts in connection with the history of Jerusalem. The ideogram SA.GAZ — the pronunciation of which is unknown, but which in the Amarna Letters is equated with the ḫa-BI-ri — has a long history in cuneiform records. In Sumerian-Akkadian bilingual lexical lists, specifically ḪA.ra = *ḫubullu* II.330 (cf. *CAD*, VI, 13), SA.GAZ is translated as *ḫab-ba-tum*, "robber." The term SA.GAZ is found ten or eleven centuries before the Amarna Letters. The equation of SA.GAZ with *ʿapiru* is based on parallel cuneiform alphabetic and syllabic lists of towns found at Ugarit, where URU *ḫal-bi* LU.SA.GAZ ("city Aleppo of the SA.GAZ," probably meaning the SA.GAZ quarter of Aleppo) is parallel with *ḥlb ʿprm* ("Aleppo of the ʿApiru"; cf. C. Virolleaud, *Syria*, 21 [1940], 143; Nougayrol in J. Bottéro, ed., *Le Problème des Ḫabiru* [1954], p. 178). This equation proves, according to some scholars, that Akkadian *ḫ* is found in Northwest Semitic as *ʿ*— but this is not true. I have shown, with many illustrations, that the *ayin* and the *ghayin* phonemes occur in Akkadian as *aleph*, frequently influencing a vocalic shift of *a* to *e* in the words in which they occur. The exception, which could hold true here, is in foreign words which were borrowed after the phonetic shift had taken place ("Semitic Phonemes," Ph.D. diss., Dropsie, 1949). The suggestion that *ʿapiru* is derived from the root for dust and means something like "dusty ones" (cf. W. F. Albright, *Yahweh and the Gods of Canaan* [1969], pp. 73-78) presents another difficulty that seems to have gone unrecognized. The word occurs in Akkadian as *epêru* and derived forms (all spelled with *aleph*, not *ḫ*; the *e*-vowel indicates an original *ḫ*, *ʿ*, or *ǵ*,), and therefore it is not to be equated with Akk. *ḫa-BI-ru* (cf. *CAD*, IV, 184ff.). The same is true of the attempt to equate *ḫa-BI-ru* with *epêru*, "provide food" (*CAD*, IV, 190, 238). Albright's suggestion that *ʿapiru* shifted to *ʿabiru* (cf. *Yahweh and the Gods of Canaan*, p. 86 n. 84) will not stand up under scientific investigation of the phonetic shift of Semitic phonemes. The whole problem of the relationship of SA.GAZ-*ḫa-BI-ru-ʿapiru*-Hebrews still needs refining, but there seems to be little justification for trying to make the ḫa BI-ru of the Amarna Letters the Hebrews of the conquest of Canaan.

At a date not definitely determined the Israelites invaded Canaan under the leadership of Joshua. Adonizedek king of Jerusalem led a federation of five Amorite kings against the Gibeonites (Josh. 10:1, 3-5). The Gibeonites, who by a ruse had involved Joshua in a mutual-assistance pact (9:3-15), called on him for aid against the Amorites. Joshua defeated the Amorites in the valley of Aijalon, and the five kings were slain (10:26). Some scholars have thought that the account of the battle with Adonibezek (cf. Jgs. 1:4-7) is another version of the one recorded in Joshua. F.-M. Abel (*GP*, II, 24) and J. Simons (*GTTOT*, § 511), however, located Bezek much farther north. Jgs. 1:7f. locates the death of Adoni-bezek at Jerusalem and continues with an account of the capture and burning of Jerusalem. The Jebusites (the inhabitants of Jerusalem), however, were not driven out (Josh. 15:63).

In the tribal allotments, the portion given to Judah included En-rogel and the Valley of the son of Hinnom as boundary marks, but the mention of "the southern shoulder of the Jebusite" (Josh. 15:8) suggests that Judah's border did not include the southeast hill. Later, when the conquests are summarized, it is specifically stated that Judah could not drive out the Jebusites (15:63). The portion of the tribe of Benjamin seems to have followed the same boundaries as that of Judah, which suggests that the portion of the region that did not belong to Judah, namely,

that E of the boundary line, was the lot of Benjamin (18:16). The cities of Benjamin included Jebus/Jerusalem (v. 28).

Obviously these accounts present a few problems, which scholars have attempted to solve by various means. According to one view, the Israelite tribes invaded Canaan twice, earlier when the Joseph tribes entered the land (probably from the north) and later under Joshua, or earlier under Joshua and later under Moses (cf. W. F. Albright, *BASOR*, 74 [Apr. 1939], 11-23). According to yet another view, only some of the Israelites went into Egypt, perhaps in the Amarna age, and returned under Moses (cf. H. H. Rowley, *From Joseph to Joshua* [1950], pp. 109-163). The variations are almost innumerable. The problem of the apportionment among the tribes and the possession of Jerusalem is a part of a larger problem: was the Benjamin allotment earlier than the Judah allotment? Was Jerusalem captured? What was the name of the king of Jerusalem — Adoni-zedek or Adoni-bezek? A solution that satisfies everyone and handles all the problems may never be found in this age. But two facts stand out: the Jebusites were an enclave in Israel (cf. Josh. 15:53; Jgs. 3:5), and Jebus was not taken until David took it (2 S. 5:6-9).

It is possible, as Simons observed (p. 245), that the geography of Jerusalem yields a clue to the answer. The southeast hill, standing on steep slopes above the Kidron and Central valleys, was fortified in the early 2nd millennium, shafts and tunnels were drilled to maintain the supply of water from the Gihon spring, and the first aqueduct was probably built at that time (cf. K. Kenyon, *Jerusalem*, ch. II). As we shall see, this was "the stronghold of Zion" (2 S. 5:6), which David captured only with great difficulty. Was this the impregnable fortress that the Jebusites were able to hold, even though the surrounding parts of Jerusalem, particularly the southwest hill, fell to the Israelites?

C. Israelite Monarchy. 1. David. In the eighth year of his reign, David moved against the Jebusites. They were confident that their city was impregnable (2 S. 5:6), but David was apparently aware of a chink in their armor, the *ṣinnôr*. (The expression "to attack the lame and the blind" [v. 8] must be taken as a bit of sarcasm, turning the Jebusites' own taunt back on them; obviously David was interested not in attacking the lame and blind but rather the defenders of the city.)

a. Ṣinnôr. The meaning of *ṣinnôr* in 2 S. 5:8 is uncertain. The LXX translators apparently did not understand the word, for they translated it by *en paraxiphídi*, "with a dagger, dirk," which makes little sense. W. F. Albright suggested "hooks," i.e., using a device to scale the walls (*JPOS*, 2 [1922], 286-290). In Ps. 42:7 (MT 8), what appears to be the plural of the same word is translated "cataracts" (RSV), "waterspouts," or "sluices." In Josephus's account, the Davidic forces capture the Lower City first, and then David offers rewards to those who can take the citadel by climbing up from the valley beneath (*Ant.* vii.3.1 [63]). English versions translate *ṣinnôr* as "water shaft" (RSV, NIV), "water tunnel" (NASB), "grappling-iron" (NEB), "gutters of the roofs" (Knox), etc.

But as Simons pointed out (pp. 171f.; cf. S. R. Driver, *Notes on the Hebrew Text and the Topography of the Books of Samuel* [2nd ed. 1913], p. 259), the basic problem is not the meaning of *ṣinnôr*, but the force of *nāgaʿ b-*. With this preposition, the verb usually means "reach, touch, arrive at" (cf. BDB, p. 619). The *ṣinnôr*, then, is not a weapon or an instrument, but a goal. Mazar may give us the clue, although it appears that he missed the force of the verb. He pointed out that climbing up the shaft, which had been dug inside the walls for the purpose of reaching Spring Gihon, would have been impossible and unnecessary. The shaft led to a tunnel, and the tunnel brought the water from the spring (*Mountain*, pp. 43, 168f.; for a modern study of "Warren's Shaft," discovered 1867-1870, see K. Kenyon, *Jerusalem*, pp. 19-22). Now, if a person or a small force could get through the tunnel and reach the "shaft" (*ṣinnôr*), the water supply would be cut off and the city would have to surrender. Mazar's solution, however, is somewhat different. He translated and interpreted the passage as "'and he struck (and damaged)' the horizontal conduit which led the water of the spring below to the mouth of the spring shaft" (*Mountain*, p. 168). In the account in 1 Ch. 11:4-6, where the *ṣinnôr* is not mentioned, Joab is the first to achieve the goal and is made commander-in-chief.

b. Zion. Having taken the city, David dwelt in the "stronghold of Zion" (*mᵉṣuḏaṯ ṣîyôn*, 1 Ch. 11:5; simply "the stronghold" in 2 S. 5:8), and called it "the city of David." The etymology of *ṣîyôn*, "Zion," is uncertain. If the word is Semitic, its meaning may be related to Arab. *ṣahî*, "ascend to the top," *ṣuhhay*, "tower, or the top of a mountain." But it has been suggested that the word is Hurrian, related to *šeya*, "river, brook," and that "the stronghold of the river" would then refer to the location at Spring Gihon. Neither suggestion is convincing, and "the stronghold of Zion" may be an appositional genitive meaning "the stronghold Zion," if "Zion" is taken as the Jebusite name of the place. Whatever the etymology of the word, "Zion" came to be synonymous with "City of David," and developed into a term for the people of God and for the idealized city to be established in an age to come (see IV below).

c. Millo. "David built the city round about from the Millo inward" (2 S. 5:9). The exact meaning is not clear, and the word translated "inward" (*wāḇaytâ*), although being used in this sense, literally means "toward the house." The expression (lit. tr.) "round about, from the Millo and inward" gives the impression of building from the outside toward the inner part, suggesting that the Millo was something on the outer part. The root of the word *millô'* conveys the meaning "be full," in the piel "fill," and the word may mean "that which fills." K. Kenyon understood the word to mean "tower," so named because it was solid, i.e., constructed of stone and filled with earth (*HDB* [rev. one-vol. ed. 1963], p. 473; cf. Jgs. 9:6, located near Shechem). Mazar thought that the Millo may have been "the terraces on the eastern slope of the southeastern spur, forming supporting walls for the structures above" (in *Jerusalem Revealed*, p. 6). It is not stated that David "built" the Millo; rather, both 2 S. 5:9 and 1 Ch. 11:8 give the site as a landmark. It is clearly stated, however, that Solomon built the Millo (1 K. 9:15, 24; 11:27; 2 K. 12:20 [MT 21]); hence we could take the reference in David's time as proleptic, a use of the name by which it was later known. 1 K. 11:27, "Solomon built the Millo, and closed up the breach of the city of David his father," seems to imply that David had left a breach (in the wall? — hardly likely!) and that the Millo filled this breach.

A suggestion made in various forms by several scholars, particularly by L.-H. Vincent (*Jérusalem antique*, pp. 172ff.), is that the Millo was a fill in the low area between the southeast hill (David's citadel) and what later became the south wall of the temple mount. The view has gained very little support — but it would be the kind of project that could be "built" by David, further "built" (or filled) by Solomon, and still further strengthened by Hezekiah (cf. 2 Ch. 32:5).

Two or three points should be emphasized. (1) The word *millô'* is regularly translated in LXX by *ákra*, "citadel." While this equivalence is inconclusive because of the length of time between the use of the word in the Hebrew Scrip-

tures and the translation into Greek, it may preserve an ancient understanding of the word. (2) The word *millô'* occurs only in the earlier writings (and Chronicles, but presumably the Chronicler was using an earlier account) and is replaced in later writings by the word *'ōpel* (Ophel), which also is translated "citadel" (see III.F.2.t below). (3) The term, used frequently and without further explanation, must have been thoroughly familiar at the time of writing and thus cannot be much later than the monarchy. See III.C.2.e; III.D.5.s below.

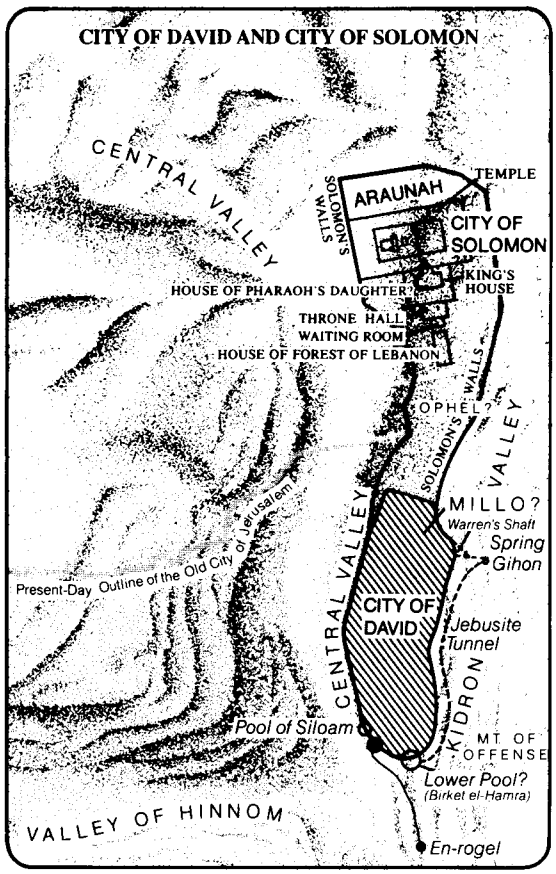
d. Cult Center. David not only made Jebus his capital, but he also proceeded to make it the cultic center of the nation. First he moved the ark to Jerusalem (2 S. 6:15), locating it in a tent. Then he set about collecting the materials to build a temple (lit. "house"). Just when this idea first came to him is not clear, and the account in 2 S. 7 does not give many details. The passage in 1 Ch. 22 is much more detailed, but scholars often question its reliability and suggest that the Chronicler was influenced by a desire to make David rather than Solomon the originator of the plans. Josephus went still farther than Chronicles by giving elaborate details of the amounts of materials collected by David (*Ant.* vii.14.1 [335]).

The selection of the temple site seems to have come late in David's reign, following his census of the nation (2 S. 24). The prophet Gad instructed David to build an altar to Yahweh on the threshing floor of Araunah the Jebusite (24:16; in 1 Ch. 21:15 the name is given as Ornan). We may assume that he purchased the threshing floor of Araunah (Ornan) some time prior to his decision to build a temple, since it was to be the place of an altar (2 S. 24:18). Araunah is called "the king" (*'ªrawnâ hammélek*) in the MT of 2 S. 24:23; the *kethibh* of 24:16 is *hā'ªwarnâ hayᵉbusî*, "the Jebusite *'ªwarnâ*." B. Mazar suggested that this is a Hurrian title, *ewrine*, "lord," found in Hittite as a title and in Ugaritic as a personal name (in *Jerusalem Revealed*, p. 4). If the text and these suggestions are accepted, Araunah, or whatever his personal name may have been, was the last king of the Jebusites, the "lord" of the city.

The location of the threshing floor of Araunah is reasonably identified with the site of Solomon's temple, N of David's City (Josephus's "third hill"), where the Dome of the Rock now stands. According to tradition, the Rock (Arab. *eṣ-Ṣakhra*) over which the Dome stands is the surface of the threshing floor and the location of the altar in front of Solomon's temple.

e. Capital. David also had other building projects in Jerusalem. His own house is known as "the house of cedars" (2 S. 5:11), built by Tyrian workmen, carpenters, and masons using cedars sent by Hiram king of Tyre (*ca.* 979-945 B.C.). "The house of the mighty men" (Neh. 3:16) is probably the name of a building of David's time (cf. 2 S. 10:7; 15:17; 17:8; 23:8-39; 1 K. 1:10, 38). "The tower of David" (Cant. 4:4) is also attributed to David. Of the walls and gates no clear picture emerges due to the almost complete destruction of the structures on the southeast hill. The king's house was probably in the lower part of the city, with stairs that went down to the lower gate (the Fountain Gate?; cf. Neh. 3:15). David was buried in the city (Neh. 3:16; cf. B. Mazar, *Mountain*, p. 316). The lower aqueduct and the lower pool (see III.C.2.g below), as well as the king's garden (see III.D.5.t below), were almost certainly there in David's day.

2. Solomon. Toward the end of David's reign, his son Adonijah staged a coup and had himself crowned king at "the Serpent's Stone," near En-rogel (1 K. 1:5-10). Nathan the prophet heard of it and took steps to have Solomon crowned the legitimate heir, although Adonijah was certainly senior. David had Solomon anointed as king near



Spring Gihon, not far from En-rogel, and those who had joined Adonijah could hear the noise of the ceremony at Gihon (cf. vv. 40f.). The coup collapsed and Solomon became David's successor.

a. "City of David" and "Jerusalem." At the time of Solomon's marriage alliance with Pharaoh's daughter, there was a distinction between "the city of David" and "Jerusalem"(cf. 1 K. 3:1). A similar distinction between "Zion" and "Jerusalem" is reflected in a number of poetic passages in the Prophets and Psalms. There can be no doubt that the city was expanding. The only questions are in which direction and how far. David was doubtless building toward the future temple site. Some have thought that the "breach" mentioned in 1 K. 11:27 was in the north wall and that the Millo was a fill N of that area. But the text does not say that the "breach" was in the wall (*'eṭ-pereṣ 'îr dāwîḏ*, "the breach [or "bursting-out"] of the city of David"), and a king of David's military experience would hardly leave a breach in the most vulnerable wall. In any event, Solomon "closed" it, possibly the result of building the Millo (note the absence of a conjunction: "he built the Millo; he closed the breach"). Had the city also expanded to the southwest hill? (See III.C.2.f; III.D.2.g below.)

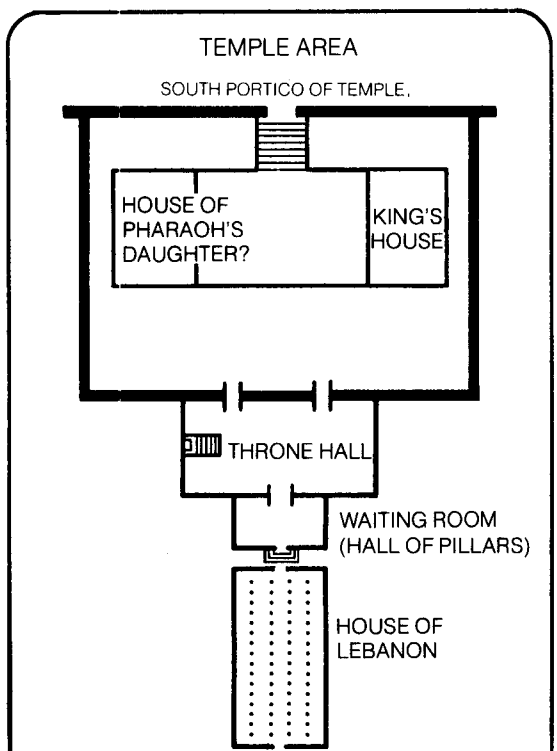
b. House of Yahweh. In the fourth year of his reign Solomon began construction of the house of the Lord (1 K. 6:1). Details of the arrangements with Hiram are given (1 K. 5:1-18 [MT 15-32]; 7:13f.; 2 Ch. 2:1, 3-16 [MT 1:18; 2:2-15]; for details, *see* SOLOMON'S TEMPLE). There can be little doubt that the location was approximately where the Dome of the Rock is today, although archeological excavation around and under a sacred building like the Dome of the Rock is impossible. The temple hill was

considerably narrower, the Central Valley farther east, and the Kidron farther west than they are today (see II.C above). "Solomon's stables" are Herodian and Umayyad construction (see III.G below), built to support the expanded platform of the second temple. A tradition that the stone for the temple was quarried in the area near the modern Damascus Gate, known as Solomon's Quarries, Royal Quarries, Royal Caves, King Solomon's Mines, and the cave of Zedekiah, is without archeological support, but the tradition is not unreasonable (cf. 1 K. 6:7).

c. House of the Forest of Lebanon. This building was so named because of the use of cedar beams made from trees imported from Lebanon. The port at which these huge tree trunks were landed is the modern Tell el-Qasîleh, N of Tel Aviv, by the Yarkon River. The site was excavated by B. Maisler (Mazar). Cedar was used for pillars, beams, roofing, ceilings, and paneling (1 K. 6:15, 18; 7:2-5). It is a reasonable assumption that this house was part of the royal palace ("his entire house," 7:1-5). The most probable location of the royal house was S of the temple area.

d. Hall of Pillars. The term should perhaps be emended to "Audience Hall," reading *h'wmdym* instead of *h'mwdym* (1 K. 7:6). It was part of the royal palace, as was "the Hall of the Throne," or "the Hall of Judgment" (v. 7). The king's private quarters were "in the outer court back of the wall" (v. 8), and Pharaoh's daughter had a similar house. Some idea of the size and splendor of the royal palace complex may be seen in the fact that it took seven years to build the Lord's house, and thirteen to build Solomon's (1 K. 6:38–7:1).

e. Temple-Palace Complex. The accounts in Kings and Chronicles are probably not always in chronological order, and rearrangements are somewhat arbitrary. It is possible, e.g., to take the "twenty years" of 1 K. 9:10 (2 Ch. 8:1) as applying to regnal years rather than to the time of the building program, and to assume that there was some overlap of the building of the temple and the building of the palace. It is even possible that the dedication of the temple took place before the palace complex was completed — in fact, this would almost seem to be the necessary course of events. From the data in the books of Kings a tightly interwoven chronology of the kings of Judah may be constructed (cf. *NBC* [rev. ed. 1970], p. 323), which almost certainly establishes 931 B.C. as the date of the accession of Rehoboam. If the figure of forty years for Solomon's reign is accepted, then his accession, or possibly his co-regency with David, took place in 971 or 970, and the beginning of the building of the temple in 968 or 967. The dedication of the temple, then, could have taken place *ca.* 960, and the completion of the building program in Jerusalem *ca.* 951. This would have allowed the remaining twenty years for Solomon to establish his royal navy at Ezion-geber and to build Hazor, Megiddo, Gezer, and many other places (1 K. 9:15, 17-19, 22).



Based on the reconstruction by L. H. Vincent, in Vincent and A.-M. Steve, *Jerusalem de l'AT*, II, 428, fig. 134

According to Josephus (*Ant.* viii.3.1 [61f.]), the beginning of the construction of the temple was in the eleventh year of Hiram of Tyre. Using the dates 979-945 for Hiram's reign, the eleventh year would be 969 B.C. — reasonably close to the figure 968/7 given above. Josephus also dated this event 592 years after the Exodus, differing from both the MT (480 years) and the LXX (440 years) of 1 K. 6:1. *See* CHRONOLOGY OF THE OT; EXODUS, DATE OF THE.

The temple was surrounded by an inner court (1 K. 6:36; 7:12), also called the "upper court" (Jer. 36:10), and characterized as "the court of the priests" (2 Ch. 4:9). A gateway faced north (Ezk. 8:3), and no doubt others faced east, south, and possibly west. No size is given for the inner court, and the speculations that it was twice the size of the temple or that its dimensions can be figured on the basis of Ezekiel's temple are without solid basis.

The outer court (1 K. 7:9, 12), was called "the great court" (2 Ch. 4:9). Since the inner court is termed "the upper court" (Jer. 36:10), the outer court was by implication on a lower level than the temple and the inner court. Again, no size is given, and calculations cannot be based on the size of the modern Ḥaram, for the original area was increased by Herodian constructions. According to Josephus (*BJ* i.21.1 [401]), Herod doubled the size of the courts of Zerubbabel's temple. If these courts were approximately equal to those of Solomon's temple — a view admittedly not established but not completely unreasonable — we might work back from these data. But precisely what does Josephus's statement ("he enlarged the surrounding area to double its former extent") mean? Did Herod double each dimension (giving it four times the area), or did he double the area? If he doubled the area, did he do it by multiplying each dimension by 1.4, or did he double its width?

Likewise, the relationship of the location of the palace complex to the temple is not clear. Ezekiel indicated that the king's house was separated from the Lord's house by only a wall, and the two houses were connected by an entrance (Ezk. 43:7f.), but this could be effected by placing the entire palace complex immediately S of the outer court. A number of scholars have looked upon the temple as the king's chapel. There was an "outer entrance for the king" (2 K. 16:18), possibly the same as "the king's gate on the east side" (1 Ch. 9:18). We know that Solomon, as also his father David, performed priestly functions on occasion (1 K. 8:62f.; 9:25) — unless we are to understand that this means that the king ordered the priest to perform the actual sacrificial ritual. Nor would it be surprising to

find that later kings, under the strong influence of surrounding religious practices, arrogated to themselves the use of the temple as a royal chapel. But the OT nowhere indicates that this was part of the religion of Israel as given by Moses or as maintained by the prophets.

Solomon also built the Millo (see III.C.1.c above). If the sequence in 1 K. 9:24 is significant, the building of the Millo took place after Solomon had moved Pharaoh's daughter to her house in the palace complex. The Millo might have been a landfill on the west, or more likely the east, of the saddle between the city and the palace, or it may have been fill behind retaining walls on the Kidron side of the area between the city and the palace.

f. Walls. Solomon also built the walls of the city (1 K. 3:1). It is reasonable to assume that the walls of David's City were maintained, and that they were extended toward the north to enclose the palace-temple complex. But how far to the north did these walls run? Did they encompass any part of the Central Valley and southwest hill? Excavations on the Ḥaram are impossible, but it seems reasonable to assume that the temple was the northern limit. Excavations in the Tyropoeon Valley (the Central Valley) indicate that the northern part was uninhabited until the time of the Maccabees. That Israelites lived on the southwest hill is a most reasonable assumption, for this area was inhabited before the Conquest; there is no evidence, however, that Davidic or Solomonic walls enclosed any part of the area. An argument frequently made against including the southwest hill in Solomon's Jerusalem is that it would make the city much too large in comparison with other cities of the period. This line of reasoning is questionable. Solomon had a large kingdom, very well organized administratively. This required a large number of retainers. At Ebla, e.g., according to G. Pettinato's reading of a text, there were fourteen governors under the king, each with between three hundred and eight hundred functionaries, and in addition there were 4700 palace functionaries, each with a support group of twenty persons (cf. G. Pettinato, *Ebla, Un impero inciso nell'argilla* [1979], p. 135). Some indication of the size of Solomon's royal house and its retinue is given in the provisions listed in 1 K. 4:8-19, 22-28 (MT 5:2-8). Moreover, the size of Jerusalem, including the southwest hill, is approximately 64 ha. (160 acres), compared with 72 ha. (182 acres) for Hazor (which Solomon built), and 56 ha. (140 acres) for Ebla (which was built *ca.* 1500 years earlier). It is not unreasonable to assume that Solomon's capital was as large as his fortress in Galilee — but such an assumption admittedly lacks archeological support.

g. Water Supply. The water supply in Solomon's day was no doubt similar to that of David's time. The single source known to us was Spring Gihon. The tunnel and shaft, discovered by Warren and fully excavated and studied in 1961-1967, are earlier than Hezekiah's tunnel. Since the shaft was definitely shown to be *inside* the Jebusite and Davidic walls (cf. R. Amiran, "The Water Supply of Israelite Jerusalem," in *Jerusalem Revealed,* pp. 75f.), it is reasonable to assume that it served the city of those periods. Two aqueducts were discovered, the first of undetermined age but clearly earlier than the second, and the second lower than and therefore earlier than Hezekiah's tunnel. These carried water from the spring, the first perhaps to the "king's garden" supposedly at the junction of the Kidron and Central valleys (but without substantiating evidence), and the second to the lower pool, known as Birket el-Ḥamra, now a garden but formerly SE of the pool of Siloam. The aqueduct was constructed partly underground, and partly in the open, with openings or sluices in its walls, apparently for the purpose of watering gardens

Possible location of the King's Garden (foreground) at the junction of the Kidron and Hinnom valleys (W. S. LaSor)

along the slope of the city outside its east wall. It is believed that 2 Ch. 32:2-4 refers to this system, particularly in the words "he planned . . . to stop the water of the springs that were outside the city. . . ." Isaiah may also refer to this system when speaking of "the waters of Shiloah which flow gently" (Isa. 8:6) and "the channel between the walls for the water of the old pool" (22:11). Warren's Shaft is made up of three parts: (1) a tunnel from within the walls, probably starting at a complex of public buildings on the east side of the city (see III.F.2.m below), hewn in the rock, 39 m. (128 ft.) long, descending 12.7 m. (41.7 ft.); (2) a vertical shaft 11 m. (36 ft.) deep; and (3) a horizontal channel 20 m. (66 ft.) long, bringing the water from Gihon to the foot of the shaft (possibly the *ṣinnôr;* see III.C.1.a above; cf. R. Amiran, in *Jerusalem Revealed,* p. 76).

According to tradition, Solomon constructed "Solomon's Pools" 4 km. (2.5 mi.) SW of Bethlehem (cf. Eccl. 2:4-6, esp. "I made myself pools from which to water the forest of growing trees"). The present pools and the aqueduct leading from them to Jerusalem are of later construction (see III.G below). The reference in Ecclesiastes, if indeed it is Solomonic in origin, probably refers to the king's gardens at the confluence of the Kidron and Central (or Hinnom) valleys, watered by Spring Gihon and the aqueduct mentioned above.

Solomon built a high place for Chemosh and for Molech "on the mountain east of Jerusalem" — probably on Baṭn el-Hawa (the Mt. of Offense), just S of the Mt. of Olives, and he built religious places "for all his foreign wives" (1 K. 11:7f.).

D. Divided Kingdom. For most of this period (*ca.* 931-586 B.C.) no detailed accounts of the building and expansion of the city are available. Yet it is known from many explicit and implicit statements that the city was considerably larger at the end of the period. We can only record the details and, for the most part, leave their interrelationships to speculation.

The prophet Jeremiah gave a description of the future rebuilding of the city. Since the passage is bracketed by dated passages, the first in 597 B.C. (Jer. 28:1) and the second between April and October, 587 B.C. (32:1), and since it appears to be the end of a message to the elders of the exiles in Babylon (29:1, 27), it cannot be dated before the early 6th century. It obviously deals with the future rebuilding of the city, but since Jeremiah included place names, some of which are undeniably historic, the assumption is reasonable that he was using terms that would have been meaningful to his readers. The passage reads: "Behold, the days are coming . . . when the city shall be

rebuilt from the tower of Hananel to the Corner Gate . . . straight to the hill Gareb, and shall then turn to Goah, the whole valley of the dead bodies and the ashes, and all the fields as far as the brook Kidron, to the corner of the Horse Gate toward the east . . ." (31:38-40).

There can be little question that this forms a circuit of the city, counterclockwise, starting in the northeastern part of the city. The "Corner Gate" has been identified by many as in the vicinity of the present Jaffa Gate. "The whole valley of the dead bodies and the ashes" is almost certainly the Hinnom Valley, and there is no question about the Kidron. "The corner of the Horse Gate toward the east" must be somewhere near the starting point in the northeastern part of the city.

Here we shall not impose this plan on Jerusalem, but use it merely to check details given in other passages. If this description is indeed based on the Jerusalem of Jeremiah's day it indicates that Jerusalem occupied some or all of the southwest hill as well as the City of David and the temple hill. Other evidence of this is suggested in Mic. 3:12:

Zion shall be plowed as a field;
Jerusalem shall become a heap of ruins,
and the mountain of the house a wooded height.

Admittedly this is poetry. "Zion," "Jerusalem," and "the mountain of the house" are synonymous terms — but are they identical, or are they parts of the whole? The question deserves further study than can be made here. It seems very probable, however, that they are supplementary terms. One should note that the Israelites under Joshua captured Jerusalem, but they did not take Jebus (Zion) (see III.B above).

When the northern tribes separated from Rehoboam's kingdom, Jeroboam of Israel (931-910 B.C.) took steps to keep his subjects from going to Jerusalem to worship (1 K. 12:27-29). This account certainly must be accepted as historical; therefore centralized religion at Jerusalem was already established in the monarchy and was not a product of the "Deuteronomic" reforms of the 7th century. There would have been no reason to include these statements about Jeroboam if the events had not occurred. And if it is assumed that the Deuteronomist was responsible for the final writing of Kings, this way of making his point would be sophisticated beyond credibility. There is something basically wrong with critical theories that require on the one hand such sophistication, while presuming on the other hand that the final editors overlooked obvious contradictions.

In the fifth year of Rehoboam (*ca.* 927 B.C.) Shishak (Sheshonq) of Egypt invaded Judah and Jerusalem and took away the treasures of the temple (1 K. 14:25). During the reign of Asa (910-870 B.C.), in the face of aggression by Israel, the southern king took the remaining temple treasures and sent them to Ben-hadad of Damascus to cause him to break his alliance with the north (15:18). These and similar events in subsequent reigns indicate a constant flow of wealth into the temple at Jerusalem — which certainly requires Jerusalem to have been the cult center of the nation.

1. Ninth Century. Little is recorded about Jerusalem during the 9th century. A full record exists of the kings of Judah who ruled from Jerusalem, but the religious problems mostly stemmed from Israel. The abominable sins of the southern kings are recorded, but it is certain that the invasion of Baal worship in Israel was the more serious problem. Ahab of Israel (874-853 B.C.) and his Phoenician queen Jezebel were Elijah's chief enemies (and Yahweh's). Their daughter Athaliah was married to Jehoram of Judah (853-841; cf. 2 K. 8:18), and after the death of their son Ahaziah, who reigned briefly (841), Athaliah seized the throne and attempted to replace Yahweh worship with Baal worship. Her sons plundered the temple for the Baals (2 Ch. 24:7), and she attempted to exterminate the Davidic line (2 K. 11:1). Joash, however, was hidden by his aunt, and when Athaliah was assassinated after a seven-year reign (841-835), Joash, age seven, became king (835-796).

The account of the coup against Athaliah gives a few details of the temple-palace complex. One-third of the guards were at the gate Sur (1 K. 11:6) or Sud ("foundation," 2 Ch. 23:15), and another third at the gate behind the guards (2 K. 11:6), called "gatekeepers" (2 Ch. 23:15; see III.D.5.p below). Apparently the king's house was directly connected to the temple, with, it would seem, outer and inner guardposts. Athaliah fled to the temple, but the priest objected to an assassination in the house of the Lord (2 K. 11:15), and she was taken "through the horses' entrance to the king's house," where she was slain (2 K. 11:16, called "the horse gate" in 2 Ch. 23:15).

Joash made repairs on the temple (2 K. 12:4-16 [MT 5-17]), completing them in his twenty-third year (*ca.* 813 B.C.). Thereafter, Hazael of Syria (843-796 B.C.) attacked Gath and then planned to move against Jerusalem (v. 17 [MT 18]). Joash plundered the temple to buy his way out of this predicament, but he was later slain in a palace coup (vv. 18, 20 [MT 19, 21]). According to the account in Chronicles, the Syrians actually attacked Jerusalem, wounding Joash during the battle (2 Ch. 24:23-25). The detail that he was slain "in the house of Millo, on the way that goes down to Silla" (2 K. 12:20 [MT 21]) adds little if anything to our knowledge of the city. "Beth Millo" may have been a city quarter in Jerusalem.

2. Eighth Century. a. Amaziah of Judah (796-767 B.C.). Amaziah "mustered" the men of Judah twenty years old and older, numbering 200,000 fit for war (2 Ch. 25:5). He also hired 100,000 mighty men from Israel (v. 6). Such numbers seem to be highly inflated, from what is known about the size of armies at that time. Yet the figures found in the OT are remarkably consistent, and some reevaluation of the evidence — biblical as well as archeological — is in order.

b. Amaziah of Judah and Joash of Israel. Amaziah and Joash (798-782 B.C.) engaged in battle at Beth-shemesh (2 Ch. 25:21), and Joash was victorious. He took Amaziah back to Jerusalem, "broke down the wall of Jerusalem for four hundred cubits, from the Ephraim Gate to the Corner Gate" (24:23), and plundered the temple and the palace. He then returned to Samaria. (For discussion of these gates, see III.D.5.g, h below.)

c. Uzziah of Judah. Uzziah (Azariah, co-regent 790-782, king 782-740) built towers "at the Corner Gate, and at the Valley Gate, and at the Angle" (2 Ch. 26:9). Uzziah undertook several other building operations throughout the land. The "many cisterns" he hewed out (v. 10) probably included some in Jerusalem. Also, the "engines" for shooting arrows and hurling great stones were placed "on the towers and the corners" in Jerusalem (v. 15). The rise of the Assyrian empire under Tiglath-pileser III (747-727 B.C.) was quite likely the cause of Uzziah's extensive fortification. Uzziah's attempt to usurp the priestly prerogative of burning incense in the sanctuary resulted in leprosy, "because the Lord had smitten him" (v. 20). This may have led to a co-regency with Jotham (co-regent 751-740; king 740-732), and probably was the reason that Uzziah was not buried in the sepulchre of David (26:23). A stone found in 1931 on the grounds of the Russian Church at the foot of the Mt. of Olives has an Aramaic inscription reading, "To this place were brought the bones of Uzziah king of Judah; do not open" (cf. B. Mazar, *Mountain*, figure on p. 188). The carved stone is dated to Maccabean times and is the result, it is believed, of a transhumation.

d. Jotham and Ahaz of Judah. Jotham built "the upper

gate of the house of the Lord, and did much building on the wall of Ophel" (2 Ch. 27:3; cf. 2 K. 15:35). He also built cities in the hill country of Judah and erected forts and towers on wooded hills (cf. 2 Ch. 27:4). The test of the fortifications came sooner than expected, for in the days of Ahaz (735-716 B.C.) the Syro-Ephraimite coalition, under Rezin of Damascus and Pekah of Israel, attacked Jerusalem, but the attack failed (2 K. 16:5). According to the account in Chronicles, Rezin took many captives to Damascus, and Pekah slew 120,000 men of valor in Judah in one day (2 Ch. 28:5f.) and took 200,000 of the inhabitants captive — but at a word from a prophet of Yahweh, he returned the captives (2 Ch. 28:8-15).

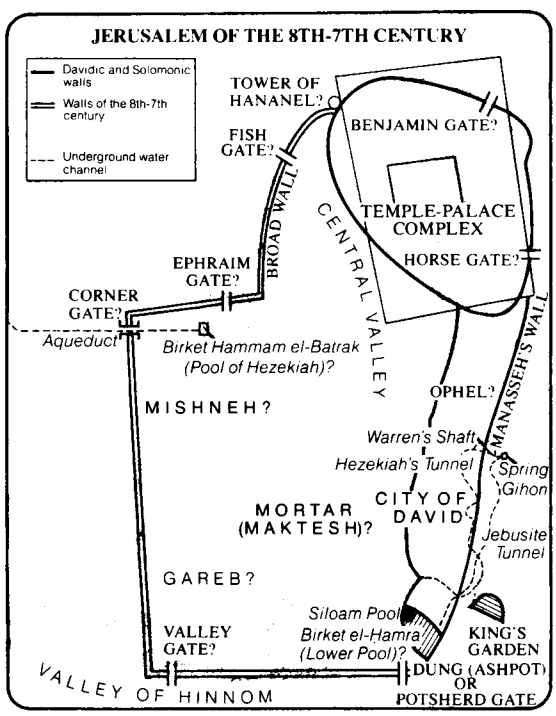
e. Hezekiah of Judah (co-regent 728-716, king 716-687 B.C.). Hezekiah was one of Judah's greatest kings, and his reign covered one of the critical periods in Judah's history. It was also the time of one of the greatest prophets, if not *the* greatest — Isaiah. From Isaiah comes much of the local color of the city. There was a very wealthy class, the result of foreign trade arrangements (Isa. 2:6) that brought in silver and gold and endless treasures, so that the land was filled with horses and chariots (2:7), not to mention idols (2:8). Their formal religion was meaningless (1:11-15). They lived in large and beautiful houses (5:9), and at their feasts there was music and drinking (5:12). Their women were haughty, walking with outstretched necks, glancing wantonly as they walked with mincing steps and tinkling feet (3:16). Men's and women's finery included anklets, headbands, crescents, pendants, bracelets, scarves, headdresses, armlets, sashes, perfume boxes, amulets, signet rings, and nose rings. They were dressed in mantles, festal robes, cloaks, garments of gauze, and garments of linen, and wore turbans and veils (3:18-23). All of this was seen as evil, because there was no true faith in Yahweh; it would all be stripped away.

Hezekiah began his reign in 716 B.C., after a co-regency of twelve years. His first act was to undertake extensive religious reforms. It took sixteen days to clean the accumulation of material from the temple, and the debris was thrown into the Kidron Valley (2 Ch. 29:3-19). Then he sanctified the place with the prescribed offerings (vv. 20-36). He next made preparations to hold the Passover — apparently it had not been observed for many years — and he invited Israelites of the northern tribes, including the Transjordanian tribes, to come to Jerusalem for the celebration. This was, it seems, after the fall of the northern kingdom (722 B.C.). Most scorned the invitation (30:1-10); some, however, did come. The temple was not ready in time for the fixed date (14 Nisan; cf. 30:2-4, 15), so the Passover was held in the second month (Iyar). "Since the time of Solomon . . . there had been nothing like this in Jerusalem" (30:26).

Hezekiah, sensing growing danger from Assyria, was concerned about his water system. Spring Gihon was indeed vulnerable. It was located outside the east wall, and could easily be cut by an enemy. Hezekiah "planned with his officers and his mighty men to stop the water of the springs that were outside the city . . . and they stopped all the springs and the brook that flowed through the land . . ." (Ch. 32:2-4). One interpretation is that the "brook" (Heb. *nāḥāl*) here refers to the aqueduct, and the "springs" are the openings through which the gardens were watered — a reasonable view, but an unusual use of the words. Hezekiah further "closed the upper outlet of the waters of Gihon and directed them down to the west side of the city of David" (32:30). This is interpreted to mean that he cut the tunnel that brought the waters of the Gihon inside the walls.

f. Siloam Tunnel. According to 2 K. 20:20 Hezekiah "made the pool and the conduit and brought water into the city," and Isaiah says, "You made a reservoir between the two walls for the water of the old pool" (Isa. 22:10). Sir. 48:17 reads, "Hezekiah fortified his city, and brought water into the midst of it; he tunneled the sheer rock with iron and built pools for water." The Siloam tunnel was known to early explorers, but it was only in 1880 that the inscription was found at the point where the workmen joined the two bores. The tunnel is quite tortuous, including a large S-bend. At one time it was suggested that this bend was made in order to avoid tombs, possibly the royal sepulchres, but this is now known to be false. The suggestion made by H. Sulley (*PEQ* [1929], p. 124), that the tunnel follows the course of a natural underground stream running from Spring Gihon to the southern end of the southeast hill, was revived by R. Amiran (in *Jerusalem Revealed*, p. 77). Such a route would have provided ventilation from a natural flow of air and would account for the assurance that the project could be carried out successfully by digging from each end. Amiran also suggested that this water course, with its "upper Gihon" source and "lower Gihon" exit, would explain the phrase "the brook that ran through the midst of the land" (2 Ch. 32:4). The tunnel is 533 m. (1749 ft.) long, although the straight-line distance is only 320 m. (1050 ft.). According to the wall inscription, its length was 1200 cubits. *See* HEZEKIAH; SILOAM.

g. Hezekiah's Walls. If the southwest hill had not been previously enclosed, it was certainly walled by Hezekiah. B. Mazar, following Avigad, identified Hezekiah's wall with Josephus's First Wall: "It encircled the present-day Mount Zion [i.e., the southwest hill] and was linked with the segment of the great wall discovered by Professor Avigad in the present Jewish Quarter of the Old City. The same wall also encompassed the new quarter called the *Mishneh* (Second) Quarter, on the Western hill in the latter days of the Judean Kingdom" (*Mountain*, p. 176). He associated with this wall the statement in 2 Ch. 32:5. The wall discovered by Avigad is 7 m. (23 ft.) thick, built of large, unhewn stones, and the portion that remains is of two to seven courses, extending for 40 m. (131 ft.; cf. N.



Avigad, "Excavations in the Jewish Quarter of the Old City, 1969-1971," in *Jerusalem Revealed*, pp. 41-51).

h. Sennacherib's Siege. Sennacherib king of Assyria (705-681) began his reign peaceably enough, but in a short time he had problems with Babylon, and while he was attending to those, the western regions began to withhold the payment of tribute. So in his "third campaign" (701) he moved into Hatti-land (i.e., Syria and Palestine). His story is recorded in the Taylor Prism, ii.37–iii.49 (*DOTT*, pp. 66f.; *ARAB*, II, §§ 239f.; cf. *ANET*, pp. 287f., which is from another text, not the Taylor Prism). Hezekiah was one of those who had rebelled (2 K. 18:7), and in a campaign against the Philistines Hezekiah had seized Padi, the pro-Assyrian governor of Ekron (cf. 18:8; *ARAB*, II, § 240). When Sennacherib invaded Judah, Hezekiah hastened to offer restitution, and was forced to strip the temple and the palace to pay the tribute (18:14-16). According to Sennacherib's record, Padi was also handed over at that time (*ARAB*, II, § 240). The tribute paid was thirty talents of gold and three hundred talents of silver (2 K. 18:14; Sennacherib records thirty talents of gold and eight hundred talents of silver; a talent was three thousand shekels, 34.27 kg. or 1209 Troy oz.).

Sennacherib thereupon sent the Tartan (second-in-command) and two other officials with an armed contingent to demand surrender of the land (2 K. 18:17-25; Isa. 36:1-10). The scene took place "by the conduit of the upper pool" (see III.D.5.j below). When Hezekiah's officers reported the Assyrian message, Hezekiah sent to Isaiah, who told the king not to fear, for Yahweh would defend the city (2 K. 19:1-34; Isa. 37:33-35). Sennacherib tells in glowing terms how he had shut Hezekiah in Jerusalem "like a bird in a cage" (*ARAB*, II, § 240), but he does not claim to have captured Jerusalem. The biblical account, on the other hand, tells of the destruction of the Assyrian army (2 K. 19:35f.; Isa. 37:36f.), of which no Assyrian record exists. A. L. Oppenheim (*IDB*, IV, 271) made the point that if there had been such a large destruction of Assyrian forces, there would have been widespread rebellion of the vassal states. He recognized that the incident is curiously reported in Herodotus (ii.174) — which appears to be strong evidence that an event like the one recorded in the biblical account did indeed happen.

Sennacherib's prism indicates that Hezekiah had called on Egypt for help, and this may be implied in 2 K. 19:9, for when the Assyrian king heard that Tirhakah was advancing, he sent a message of warning to Hezekiah. The mention of TIRHAKAH (Taharqa, 690-664 B.C.) creates a problem, for he was not pharaoh in 701; according to some scholars he was not even old enough to lead a campaign at that time. This fact and the apparently close linking of Sennacherib's catastrophe at Jerusalem and his assassination in Nineveh (2 K. 19:36f.; Isa. 37:37f.) have led some scholars to advance the theory that SENNACHERIB made a second invasion *ca.* 687 B.C.

3. Eighth-Century Prophets. The prophecy of Amos was delivered to the northern kingdom, but there can be little doubt that it was intended for all of the people of God. Judah is addressed (Am. 6:1). Amos is concerned for Jacob, "for he is so little" (7:4). The word is spoken to "the whole family which I brought out of the land of Egypt" (3:1). Amos has his closing vision with Yahweh in the temple, "beside the altar" (9:1), and he sees the "booth of David that is falling" (9:11). (The Heb. *hannôpelet* is a participle, which may mean "that which is in the process of falling"; cf. W. S. LaSor, *Handbook of Biblical Hebrew* [1979], § 32.3711; W. Gesenius, E. Kautzsch, and A. Cowley, *Hebrew Grammar* [2nd ed. 1910], § 116d.)

In Micah the sin of Judah is Jerusalem (Mic. 1:5); the wound has reached Jerusalem (1:9). But the days are coming when the exaltation of "the mountain of the house of Yahweh" (the temple mount) shall be the occasion of the Torah going to all the world (4:1f.; cf. Isa. 2:2f.).

Hosea, the northern prophet, in contrast to Amos who was a Judean sent to preach to the north, does not direct his message to Jerusalem. Since the message was preserved and ultimately canonized by Judeans, its relevance to all the people of God must have been recognized before the original scrolls were lost.

The prophecy of Isaiah furnishes a number of details for the reigns of Ahaz and Hezekiah. The Syro-Ephraimite siege of Jerusalem is the background of Isa. 7 (cf. vv. 7-9). To deliver this message Isaiah took his son Shear-jashub ("a remnant shall return") to meet Ahaz "at the end of the conduit of the upper pool on the highway to the Fuller's Field" (v. 3). The same location is mentioned in 2 K. 18:17 (see III.D.2.h above). Several explanations have been given. Two cisterns were located on the northwest side of the city — Birket Mamilla, at some distance beyond the Jaffa Gate, and Birket Hammam el-Batrak, also known as the Pool of Hezekiah (Amygdalon in Josephus *BJ* v.11.4 [568]), inside the walls, NE of the Jaffa Gate. An aqueduct leads from the first to the second. G. Dalman claimed that Birket Mamilla came from the 8th cent. B.C. (*Jerusalem*, p. 203; cited by Simons, p. 49 n. 1), but scholars have not been convinced. The location would be the most likely for the Rabshakeh of Sennacherib and his army to confront the officials of Hezekiah's kingdom. A second location is on the northern side of the city, where the remains of a conduit from the north have been found. According to Josephus (*BJ* v.4.2 [147]) a "so-called Fuller's Tomb" was near the northeast corner of the wall. Josephus's knowledge of the days of the first temple, however, is at many points erroneous or questionable. The location preferred by most scholars is in the Kidron Valley; however improbable a place it may seem for a highway, it would be a likely place for Ahaz to meet with Isaiah, particularly in the king's garden (not mentioned in the account).

Disregarding Isaiah's word, Ahaz turned to Tiglath-pileser for aid against Israel and Syria, i.e., he became a vassal of Assyria (2 K. 16:7f.). The Assyrian was quick to seize this opportunity, conquering Damascus and taking a large part of Israel. Ahaz was summoned to Damascus to meet with Tiglath-pileser, and while there "he sacrificed to the gods of Damascus" (2 Ch. 28:23). He also had plans made for a copy of an altar that he saw at Damascus, and replaced Solomon's bronze altar with the copy of the Damascene altar (2 K. 16:10-16). Ahaz also removed the twelve bronze oxen that supported the large sea, and set it on a pediment of stone (v. 17). He made other alterations in the temple-palace complex (v. 18), and erected altars on every corner (2 Ch. 28:24). It was in connection with these events that Isaiah, realizing that there was no hope for reform, wrote chs. 8–10, foretelling the Assyrian attack (cf. Isa. 10:5-12).

4. Seventh Century. Hezekiah (see III.D.2.e-h above) was succeeded by his son, Manasseh, who probably served as co-regent 696-687 B.C. because of Hezekiah's illness and the prediction of his death, and as king 687-642 B.C. The Bible records that Manasseh returned to the idolatries of Ahaz, added soothsaying, auguries, and sorcery, and even offered his sons as burnt offerings in the Valley of Hinnom (2 Ch. 33:3-7, 11). It is possible that Manasseh built Topheth as a high place for such immolations (cf. 2 K. 23:10), and scholars have suggested that the Ashpot Gate (also translated "Dung Gate") of Neh. 2:13; etc. was so named because it was the gate used by worshipers taking sacrifices to Topheth (see III.D.5.l; III.F.2.c below).

According to Chronicles, Manasseh was taken to Babylon as a prisoner, and when he humbled himself before God he was returned to Jerusalem (2 Ch. 33:10-13). Babylonian documents record no such captivity; nor is there any indication in Kings of his subsequent acts of repentance (cf. 2 K. 21:16f. with 2 Ch. 33:14-19). Instead, the acts of Manasseh are presented as the last trying of God's patience, resulting in His decision to destroy Jerusalem as He had destroyed Samaria (2 K. 21:10-15).

According to the Chronicles account, Manasseh built an outer wall to the City of David, "west of Gihon, in the valley [= Kidron], to the entrance by the Fish Gate, and carried it round Ophel, and raised it to a very great height" (2 Ch. 33:14). This may be the wall discovered by K. Kenyon, W of the ancient wall (Jebusite or Davidic). B. Mazar connected this narrowing of Ophel with the westward expansion into the Tyropoeon Valley and the western hill (*Mountain*, p. 57).

Josiah (639-609 B.C.) became king at the age of eight upon the assassination of his father Amon. He undertook to purge Jerusalem of the pagan places of worship when he was about twenty (2 Ch. 34:3f.). In the course of repairing the temple, the "book of the law" was discovered (2 K. 22:8; 2 Ch. 34:14). According to a widely held view, this was part or all of the book of Deuteronomy, and by one version of this view, it was a "pious fraud," a recently composed work that was "discovered" to give it credibility (cf. *NBC* [rev. ed. 1970], p. 320). The accepted date of the discovery is 621 B.C., and it led to reforms that, regrettably, had no great depth (cf. 2 K. 23:4-20). Josiah was slain at Megiddo, trying to prevent Pharaoh Neco from going to the aid of Assyria (2 K. 23:29f.). In Josiah's day we find the first reference to the Mishneh ("second" [quarter]), part of the western development of Jerusalem (2 K. 22:14; 2 Ch. 34:22). (See III.D.5.d below.)

In considering Jerusalem of the 7th cent. we must not overlook the evidence of the prophets who lived there at that time, i.e., Jeremiah and Zephaniah. Zephaniah's contributions are few: he mentions the Fish Gate and the Mishneh (Zeph. 1:10), and the Maktesh ("Mortar," v. 11).

Since Jeremiah foretold that "the city shall be rebuilt upon its tell, and the palace shall stand where it used to be" (Jer. 20:18), it seems reasonable to infer that the terms he used to describe this restoration are the names of places in existence in his day (see III.D above). Jeremiah mentions the high place of Topheth in the Valley of the son of Hinnom, which shall be called the valley of Slaughter (7:32), and locates the Potsherd Gate there (19:2, 6). Jeremiah also mentions the Benjamin Gate (37:13; 38:7), more closely defined as the "upper Benjamin Gate of the house of the Lord" (20:2) where he was put in stocks. Burrows, however, conjectured that the "upper Benjamin Gate" implies a lower Benjamin Gate, the latter a gate of the city and the former a gate of the temple (*IDB*, II, 853). Twice Jeremiah refers to "the gate between the two walls" (39:4; 52:7; cf. 2 K. 25:4); it led "to the Arabah" (39:4) and was the way that Zedekiah fled, probably via Wâdī en-Nâr toward the Jordan Ghor. This gate was "by the king's garden" (52:7), located in the Kidron Valley near the confluence with the Hinnom, doubtless watered by the overflow from Spring Gihon.

On one occasion Jeremiah was commanded to "stand in the gate of the Lord's house" and proclaim his message to those who entered to worship (Jer. 7:2). The temple itself was not available to the ordinary worshiper; hence this gate was one of the entrances to the court. There was also a "New Gate of the house of the Lord" (26:10), which was in the upper court (36:10). There was a Benjamin Gate (20:2) and a "third entrance of the temple of the Lord" (38:14). Since this was the place of a clandestine meeting between Jeremiah and the king, it was probably on the palace side of the temple, possibly "the outer entrance for the king" (2 K. 16:18). Jeremiah also mentions a court of the guard, bakers' street (37:21), the king's garden, and the gate between the two walls (39:4; 52:7; see III.D.5.u below). Some inhabitants of Jerusalem were poor (5:4) and some great (5:5); some rode in chariots or on horses (17:25); they gathered wood or kneaded dough (7:18). The city received silver from Tarshish and gold from Uphaz (10:9).

Some idea of the kaleidoscopic character of the day can be seen in the fact that Jeremiah lived under seven kings of Judah and his ministry extended through the reign of five kings (627-586 B.C., 1:2f.). He witnessed the revival under Josiah and three invasions of the city. Egypt and Assyria fell during his lifetime and Babylonia became dominant. Josiah was killed trying to halt Neco and the Egyptian forces at Megiddo (2 K. 23:29f.). Jehoahaz (Shallum) was deposed by Neco after a reign of three months (v. 33). Jehoiakim (Eliakim) was put on the throne by Neco (v. 34); he was opposed to Jeremiah, and was cruel and oppressive. During his reign (608-597 B.C.), Babylon, which had overcome the Assyrians at Nineveh in 612 B.C., defeated the Egyptians at Carchemish and conquered all of Hatti (605 B.C.; cf. 24:1; *CCK*, pp. 66f.). Jehoiakim, who had been a vassal of Egypt (23:35), transferred his loyalty to Nebuchadrezzar of Babylon for three years, and then rebelled (24:1). He was to be taken to Babylon, but he died and was succeeded by Jehoiachin (Coniah; 2 Ch. 36:6, 9). Jehoiachin was removed by Nebuchadrezzar and taken to Babylon, and Zedekiah was made a puppet king of Judah (597-586 B.C.).

5. Before the Exile: A Synthesis. This survey permits an attempted synthesis, although with the recognition that many points are still unclear and are subjects of scholarly disagreement. There are three basic guides for this synthesis: (1) the topography, which is reasonably certain; (2) the outline in Jeremiah (see III.D above); and (3) the outline based on Nehemiah's three descriptions (see III.F.2 below).

a. Southwest Hill. The most severely debated region is the southwest hill. Two questions need to be answered. When was the southwest hill incorporated into the walled city? Certainly it was not within David's walled city, although it may have been the "Jerusalem" taken by the Israelites when Jebus was left as a Jebusite enclave (see III.B above). Did Solomon extend the walls to include part or all the southwest hill? Simons, and others whom he cited, believed that he did (p. 242). K. Kenyon rejected the idea, stating succinctly, "The western ridge, or at least its southern end, was not incorporated into the city until the first century A.D." (*Jerusalem*, p. 70).

The second question grows out of the first: how much of the southwest hill, if any, was walled? Kenyon pointed out that the rebuilding of Jerusalem's walls in Nehemiah's time was completed in fifty-two days (Neh. 6:15). The only way that a 4000-meter (2½-mile) wall (which Simons and others postulated) could have been completed in such a short time would have been if the earlier walls had survived "to a very substantial extent" (*Jerusalem*, p. 110). This is not a strong objection, for after breaching the walls, an enemy did not spend time tearing them down. There would have been some destruction in the course of time, due to natural causes, goats running on walls, men robbing the stones for other building, etc., but most of the material (field stone for the walls, some ashlar at the gates) and the foundations would have been in place. Newer excavations, however, place the wall much earlier than

Kenyon's estimate. (Cf. H. Geva, *IEJ*, 29 [1979], 84-91: ". . . this longstanding controversy is now an anachronism; the westward expansion of the city prior to the second century B.C.E. has been proven, in recent excavations on the southwestern hill, by the discovery of pottery deposits and building remains dating from the eighth-seventh centuries B.C.E." [p. 84].) Caution must be exercised in accepting this view, for there is the concomitant problem of population.

b. Population Explosion. M. Broshi said, "Jerusalem at about 700 B.C. had mushroomed, historically speaking, overnight" (*IEJ*, 24 [1974], 23). He estimated that it had grown from the 44 dunams (4.4 ha. or 11 acres) of David's city, to 130-180 dunams (13-18 ha. or 32.5-45 acres) in the 8th cent., to 500-600 dunams (50-60 ha. or 125-150 acres) in the 7th century. Using an accepted figure of 40-50 inhabitants per dunam, Broshi arrived at an estimated population of 24,000 (*IEJ*, p. 24 n. 20; cf. *Biblical Archaeology Review*, 4/2 [1978], 10-15). The figures from Ebla (Tell Mardikh) work out to 446 persons per dunam (250,000 in 56 ha.), and comparable density would have given Jerusalem of the 7th cent. a population about the same as that of Ebla. Incidentally, Broshi's seventh-century size of Jerusalem is very close to the area of present-day Jerusalem within the walls (i.e., the Old City) — 77 ha. or 192.5 acres.

Two methods of estimating population are common, each with serious weaknesses. One is to work from density, as Broshi has done. But the disparity between his 40 to 50 per dunam and Ebla's density ten times as great raises questions about the validity of the "accepted" figure. The figures from Ebla are not simply a round number (250,000), but a detailed breakdown of various officials and retainers adding up to 249,716. The consistently "large" figures in biblical and other ancient records suggest that density-population estimates are in need of restudy. The second method is to work on a straight-line basis. If the population of a given city-state was only one thousand in 800 B.C., it could not have been 75,000 in 400 B.C. — the same holds true for whatever figures and dates are used. This reasoning can easily be shown to be false. The population of Israel, e.g., tripled between 1948 and 1962. Extrapolating from these figures we would get a population of only around 3200 seventy years earlier — which we know to be completely wrong. Or working from the world's population, which is supposed to have doubled in the past fifty years, we would be back to Adam and Eve in less than 1600 years! Population explodes, holds steady for a time, is decimated by war or pestilence, undergoes both immigration and emigration, and does many other unpredictable things. Figures from ancient records, incredible as they seem, are often no more erroneous than scholarly estimates.

c. Walls. Hezekiah's wall enclosed the southwest hill (a conclusion from evidence presented in 5.a above), forming a "second" city.

d. Mishneh. This "second" city was probably the Mishneh ("second quarter," 2 K. 22:14), first mentioned in Josiah's day (many scholars take it to be a northern addition to the southwest hill).

e. Mortar. Zephaniah 1:11 mentions the Mortar (*maḵtēš*) with the Fish Gate, the Mishneh, and the hills. The Mortar would be named from its shape, and the most likely location would be in the Central Valley, either in the vicinity of the cross valley, or perhaps the lower slopes of the southwest hill descending to the Central Valley (identified as "the Lower City" in Avi-Yonah's model of Jerusalem).

f. Tower of Hananel. The north wall extended from the tower of Hananel to the Corner Gate (Jer. 31:38-40). Hananel, according to scholarly consensus, was at the northwest corner of the temple area (cf. Neh. 3:1; 12:39; Zec. 14:10). Perhaps it is erroneous to locate this where the Antonia was later built, for the temple area may not have extended that far north in the 7th cent. or the 5th century. A topographical location for the north wall would be along the cross valley, from the citadel on the west to Wilson's Arch on the east. It must be borne in mind that St. Anne's Valley, prior to the Herodian enlargement of the temple platform, cut off a sizable portion of the northeast end of the temple mount.

g. Corner Gate. This gate must now be located in the vicinity of the citadel near the Jaffa Gate. Scholars formerly held that the west wall (if it did exist at that time) was considerably farther east, but Avigad's discoveries indicated that the wall was toward the west (N. Avigad, *IEJ*, 22 [1972], 194), on the summit of the hill.

h. Ephraim Gate. This gate must be located in the north wall, if for no other reason than that Ephraim was to the north. Joash broke down the wall for 400 cubits from the Ephraim Gate to the Corner Gate (2 Ch. 24:23); hence the Ephraim Gate was about 200 m. (650 ft.) E of the Corner Gate. The distance from the Corner Gate to the temple mount is about 600 m. (1950 ft.). The Middle Gate (Jer. 39:3) is possibly the Gate of Ephraim, as is Josephus's Gennath Gate (Garden Gate; *BJ* v.4.2 [146]).

i. Hill Gareb and Goah. The hill Gareb is possibly the top of the southwest hill, at which point the wall turned toward Goah (Jer. 31:39), neither place being positively identified. The "whole valley of the dead bodies" indicates that Jeremiah is moving toward the Hinnom.

j. Upper Pool, the Highway, Fuller's Field. The "upper pool" may be in the area of the west wall (see III.D.3 above). The "pool of Hezekiah" (Birket Hammam el-Batrak) at least preserves a tradition that Hezekiah built a pool on that side of the city, and since the population explosion had moved to the southwest hill by Hezekiah's day, some provision for water was of vital necessity. The northwest side of the city would be an appropriate place for the highway, but there is no indication of where "Fuller's Field" (Isa. 7:3) was located. Josephus's reference to a "so-called 'Fuller's tomb'" near the northeast corner of the wall (*BJ* v.4.2 [147]) is apparently of no help. Scholars are inclined to locate the Fuller's Field near En-rogel in Wâdī en-Nâr.

k. Valley Gate. This gate has often been identified with the ruins discovered by Crowfoot on the west side of David's City, opposite the Water Gate. But the name in Hebrew is *ša'ar haggay'*, "gate of the valley." The Kidron is always called *naḥal*, and the Central Valley (Tyropoeon) is not mentioned in either the OT or the NT. Of the valleys around Jerusalem, only the Hinnom is called *gay'*. Hence some scholars locate the Valley Gate in a wall above the Hinnom, generally in the south wall. M. Burrows put it, cautiously, at the southwest corner, where the Hinnom turns toward the east (*IDB*, II, 850), which would be, in this reconstruction, on the hill Gareb, or between Gareb and Goah (see III.F.2.a below).

l. Topheth. Jeremiah 7:32 locates this place in the Valley of the son of Hinnom; it will be called the valley of Slaughter, doubtless the valley of dead bodies (31:40; cf. 7:33). It is possible that Manasseh built Topheth (cf. 2 K. 23:10; see III.D.4 above). See III.F.2.c below.

m. Potsherd Gate (Jer. 19:2, *Q*). Also located in the Valley of Hinnom, the Potsherd Gate (*ša'ar haḥarsîṯ*, *Q* 19:2) has been identified with the Dung Gate (Neh. 2:13; see III.F.2.c below). The suggestion that this is where broken pottery was thrown away (BDB, p. 360) is not necessarily valid; broken pottery was often left where it was broken, as any archeologist knows. Simons suggested that the Potsherd Gate was where pottery was sold (p. 230). Possi-

bly Jeremiah used the term to conform to his action and message.

n. Uzziah's Towers. This survey, following Jeremiah's outline, brings us to the Kidron (Jer. 31:40), and we have completed a circuit of the southwest hill. A few details remain to be fitted into this reconstruction. Uzziah built towers "at the Corner Gate, and at the Valley Gate, and at the Angle" (2 Ch. 26:9). The first two would be at the northwest and southwest corners of the wall, in this synthesis. But where (and what) is "the Angle"?

The "Angle" (Heb. *hammiqṣō[a]*, possibly "place of cutting off, corner where one wall intersects another") is mentioned by Nehemiah four times (Neh. 3:19f., 24f.) as though it were a well-known place in the city. Once he speaks of the "ascent to the armory at the Angle" (v. 19; see III.F.2.n below). For the present it will be identified as a tower in a location not previously protected, possibly where the north wall of the southwest hill joined the west wall of Solomon's palace-temple complex.

An attempt to synthesize the information about the temple mount (the "mountain of the house," Jer. 26:18) has fewer difficulties textually but receives very little archeological help. The eastern, western and southern limits of the mount are topographically determined. The north is not established, but since Josephus spoke of Bezetha as a "recently built quarter" (*BJ* v.4.2 [151]), one can assume that there had been little expansion N of the temple mount before his time.

o. Horse Gate and Benjamin Gate. The tower of Hananel (see III.D.5.f above) was at the northwest corner of the temple mount. The Horse Gate (Jer. 31:40; see III.F.2.u below) was the end of the circuit sketched by Jeremiah, but this gate had to be nearer the palace; hence the southeast corner of the temple area would be its extreme northern limit. The Benjamin Gate (37:13; 38:7) is a better candidate for the northeast gate, since the road to Benjamin lies in that direction. Moreover, Jeremiah speaks of the "upper Benjamin Gate of the house of the Lord" (20:2), where he was put in stocks; hence this was a temple gate. Burrow's conjecture, however, that "upper" (*'elyôn*) implies a "lower Benjamin Gate," probably in the city (*IDB*, II, 853), does not necessarily follow ('El 'Elyon does not imply the existence of a lower god).

p. Court of the Guard, Gate of the Foundation, Gate of the House. The location of the "court of the guard"(Jer. 37:21) is not specified. There were also a "gate behind the guards" (lit. "the gatekeepers of the threshold," 2 Ch. 23:4) and a gate of the foundation (v. 5 par. 2 K. 11:6, if *swr* is emended to *swd* in the latter reference), both connected with the palace. "The horse gate of the king's house" (2 Ch. 23:15) was also at the palace. There was an "upper gate of the house of the Lord" built by Jotham (2 Ch. 27:3; see III.D.2.d above) and a "new gate of the house of the Lord" (Jer. 26:10), which was in the upper court (36:10). Since gates are the weakest part of a city's defense, it is probable that some duplication occurs in the names, and some gates may be located in the wall that Manasseh built. It would be reasonable to assume that if a "lower" Benjamin Gate existed it would be in Manasseh's wall, below the "upper" Benjamin Gate.

q. Fish Gate (2 Ch. 33:14; Zeph. 1:10). This gate is generally located in the north wall — an unlikely place to sell or deliver fish, if the north wall only extended the width of the temple! Because it is located between Gihon and Ophel in the description of Manasseh's wall, one hesitates to locate it in the north wall, but the most logical place would be between the Ephraim Gate and the temple mount, probably in the Central Valley area of the north wall of the Mishneh. See III.F.2.z below.

r. Ophel. On the southeast hill (David's City) are several landmarks. The Ophel (2 Ch. 27:3; see III.F.2.t below) can almost certainly be located between David's City and the temple mount, approximately at the southeast corner of the modern Ḥaram. This "swelling" (the meaning of *'ōpel*) was protected by a wall, on which Jotham "did much building." In the time of Nehemiah, the Nethinim (temple servants) lived on Ophel (Neh. 3:26).

s. Millo. This is still very much of a problem. It seems likely that it was a fill in the depression between the City of David and the palace, preferably on the west side, although the preponderance of scholarly opinion has taken it to be the walls and back-filling on the east side of the city on the Kidron slopes.

t. Waters of Shiloah, Lower Pool, King's Garden. Spring Gihon (see II.C.1 above) is positively located, even to the present. The second aqueduct ("the waters of Shiloah") conducted the water of Gihon to the lower pool (Birket el-Ḥamra or the pool of Siloam, not necessarily the same) and watered the king's garden (see III.F.2.f). Hezekiah's tunnel offers no problem; it is still in existence (see III.D.2.f above).

u. Gate Between the Walls. This gate was at the lower end of Zion, "by the king's garden" (Jer. 52:7), and since it was the way "to the Arabah," Zedekiah fled by that route (39:4; 2 K. 5:24), probably going by Wâdī en-Nâr toward the Jordan Ghor.

v. Manasseh's Wall. This wall presents a problem, chiefly because of the order of landmarks. Clearly it was on the east side of the Lower City and "west of Gihon" (2 Ch. 33:14) and thus inside the ancient Jebusite or Davidic wall and the opening of Warren's Shaft. This may be the wall discovered by K. Kenyon, who reported that the original wall on Ophel was about 50 m. (160 ft.) further east and 25 m. (83 ft.) lower on the slope, dating from *ca.* 1800 B.C. to the 8th century. B. Mazar connected this narrowing of the Lower City with the westward expansion into the Tyropoeon Valley and the west hill (*Mountain*, p. 57).

Very few details of the water system are available other than those listed above. Every house and public building had its cistern to collect rain water (plastered cisterns were an invention of the Late Bronze Age; G. A. Barrois, *Manuel d'archéologie biblique*, I [1939], p. 226), and the large cisterns under the temple, some of which have been explored, indicate that Solomon and his successors made such provision. There must have been open pools also but we do not have sufficient data to describe them.

E. Destruction of Jerusalem (586 B.C.). The publication of the Babylonian Chronicle should resolve the question of the dates of the capture and the destruction of Jerusalem. A fourfold record is available, calculated according to the years of Nebuchadrezzar's reign, of the Exile, of Zedekiah's reign, and of the captivity of Jehoiachin; these are found in 2 Kings, Jeremiah, Ezekiel, and the Babylonian Chronicle. Part of the past confusion about the date resulted from a misunderstanding of how months were named. According to 2 K. 25:2f. the siege of Jerusalem lasted from the tenth day of the tenth month of the ninth year of Zedekiah's reign to the ninth day of the fourth month of the eleventh year. As we reckon months, this is about 1½ years. But it is beyond argument that, whether the year began in Nisan or Tishri, Nisan was always considered the first month. Thus in Jer. 36, the reading and burning of the scroll took place in the ninth month (v. 9), which was in the winter (v. 22). At that time Judah was on a Tishri year; hence the first month of the calendar (by our reckoning) would have been Tishri, and the ninth month would have been in May/June. "Month 9," however, is always Kislev (Dec./Jan.). This is similar to the use of ancient names for our ninth to twelfth months, which are literally months 7 (*septem*), 8 (*octo*), 9 (*novem*),

and 10 (*decem*). The siege of Jerusalem lasted from Jan., 588, to July, 586, and the city was burned in Aug., 586 (dates are calculated from R. A. Parker and W. H. Dubberstein, *Babylonian Chronology 626 B.C.–A.D. 75* [1956], pp. 27f.; cf. *DOTT*, pp. 80f.; see detailed chronology below).

Nebuchadrezzar (Nebuchadnezzar) ascended to the throne of Babylon on the death of his father Nabopolassar, which was 8 Abu of Nabopolassar's twenty-first regnal year (Aug. 15/16, 605 B.C.). Nebuchadrezzar did not return to Babylon until 1 Elul (Sept. 6/7, i.e., the day that began at sundown on the 6th) of that year. Nebuchadrezzar calls this his "accession" year (British Museum 21946, line 12; *CCK*, pp. 68f.). His "first year" began in Nisanu 604, when he had taken the hand of Bel (line 14), and the Chronicle records events of years 1-11 (*CCK*, pp. 68-75).

It is possible to make the following reconstruction.

608 Sept. 10 = 1 Tishri, Jehoiakim's first regnal year, 2 K. 23:34; 2 Ch. 36:5; Jer. 45:1
605 Apr. 12 = 1 Nisan, Nabopolassar's twenty-first regnal year (Parker and Dubberstein, p. 27)
May-June Nebuchadrezzar defeated Egyptians at Carchemish (Jer. 46:2; *CCK*, p. 67)
Aug. Nebuchadrezzar reached Egypt; Aug. 16, Nabopolassar died; Nebuchadrezzar hurried home (*CCK*, p. 69)
Sept. 6 Nebuchadrezzar ascended throne, accession year (British Museum 21946, line 12; *CCK*, p. 69)
Oct. 7 = 1 Tishri, Jehoiakim began fourth regnal year (2 K. 24:7; *Ant.* x.6.1 [86])
Cf. Berossus's account in Josephus *CAp* i.19 (132-39); *Ant.* x.11.1 (219-223)
604 Apr. 2 = 1 Nisan, Nebuchadrezzar's first regnal year (British Museum 21946, line 14; *CCK*, p. 69)
Jeremiah's prophecy, Jer. 25:1; cf. 25:3 with 1:2
June-Nov. Nebuchadrezzar against Hatti-land (Dnl. 1:1?) (British Museum 21946, line 16), defeated Ashkelon (cf. Jer. 47:1?)
Sept. 26 = 1 Tishri, Jehoiakim's fifth regnal year; he served Nebuchadrezzar three years (2 K. 24:1)
603 Mar. 22 = 1 Nisan, Nebuchadrezzar's second regnal year; he assembled a large army; possibly a revolt at home
Oct. 15 = 1 Tishri, Jehoiakim's sixth regnal year
Dec. Jeremiah's scroll read and burned (Jer. 36:9)
601 Mar. 30 = 1 Nisan, Nebuchadrezzar's fourth regnal year; marched against Egypt (British Museum 21946, rev. 5-7); the battle a standoff, both sides weakened
Sept. 22 = 1 Tishri, Jehoiakim's eighth regnal year; revolt against Babylonia (*Ant.* x.6.1 [87]; 2 K. 24:1)
600 Mar. 19 = 1 Nisan, Nebuchadrezzar rebuilt his army (British Museum 21946, rev. 8)
599 Oct. 1 = 1 Tishri; Jehoiakim's tenth regnal year
Nov. Nebuchadrezzar marched on Hatti-land
598 Feb./Mar. Nebuchadrezzar returned to Babylon
Mar. 27 = 1 Nisan; Nebuchadrezzar's seventh regnal year (cf. Jer. 52:28)
Oct. 20 = 1 Tishri; Jehoiakim's eleventh regnal year
Dec. Nebuchadrezzar went to Hatti-land
Dec. 6 Jehoiakim died (2 Ch. 36:9; *Ant.* x.6.1 [88]; Jer. 37:7); Jehoiachin became king
597 Mar. 16 = 2 Adar; Jerusalem captured, Jehoiachin taken to Babylon (2 K. 24:12; 2 Ch. 36:10; Ezk. 40:1); accession year of Zedekiah
Apr. 13 = 1 Nisan; Nebuchadrezzar's eighth regnal year
593 Jan. Nebuchadrezzar went to Hatti-land
Apr. 30 = 1 Nisan; Nebuchadrezzar's twelfth regnal year
July 31 = 5 Tammuz (Ezk. 1:1)
Aug./Sept. = Ab; Hananiah's false prophecy? (Jer. 28:1-4)
592 Sept. 17 = 5 Elul; Ezekiel's temple vision (Ezk. 8:1)
591 Aug. 14 = 10 Ab; Ezekiel's address to the elders (Ezk. 20:1)
589 Oct. 10 = 1 Tishri; Zedekiah's ninth regnal year
588 Jan. 15 = 10 Tebet; siege of Jerusalem began (2 K. 25:1; Jer. 39:1; 52:4; Ezk. 24:1f., "this very day")
587 Jan. Zedekiah rebelled against Babylon (Jer. 52:4)
Jan. 7 = 10 Kislev; Ezekiel's prophecy against Egypt (Ezk. 29:1); siege lifted briefly (Jer. 37:5); Jeremiah attempted to go to Benjamin (37:12); Jeremiah put in prison (32:1)
June 21 = 1 Sivan; Ezekiel's message to Egypt (Ezk. 31:1)
Oct. 18 = 1 Tishri; Zedekiah's eleventh regnal year
586 Apr. 13 = 1 Nisan; Nebuchadrezzar's nineteenth regnal year
July 18 = 9 Tammuz; famine in the city; breach in the walls; the king and his men fled, were captured (2 K. 25:3f.; Jer. 39:2; 52:6)
Aug. 12 = 7 Ab (2 K. 25:8) or 15 Aug. = 10 Ab (Jer. 52:12); Jerusalem destroyed and burned (52:13f.); people taken captive (52:28-30); Gedaliah made governor over Judah, located at Mizpeh (2 K. 25:22-26; Jer. 40:5f.)
585 Mar. 3 = 5 Tebet; news reached Ezekiel of fall of Jerusalem (Ezk. 33:21)
Sept. = Tishri (or 586?); Gedaliah slain (Jer. 41:2)
562 Oct. 7 = 26 Elul; Awel-Marduk (Evil-Merodach) succeeded Nebuchadrezzar
561 Apr. 2 = 25 Adar; Evil-Merodach's accession year; Jehoiachin released from prison in thirty-seventh year of captivity (Jer. 52:31; *DOTT*, p. 86)

F. From the Return until Herod. For the period from the destruction of Jerusalem to the return from Exile we have no information of any kind. Those left in the ruined city were the unfit and the misfits, under foreign rulers. The period of the second temple in reality includes Herod's reconstructed temple, which was never known as a "third temple." Practically, however, one must consider Herodian Jerusalem separately because of the great changes that were made in the city, especially in the temple and its platform.

1. Persian Period. The Jews were permitted to return to Jerusalem in the first year of the reign of Cyrus (2 Ch. 36:22f.; Ezr. 1:1f.). Although Cyrus had been king of the Medes since 559 B.C., he dated his reign from the conquest of Babylon. His accession year began *ca.* Oct. 12, 539, and his first regnal year was dated from 1 Nisan = Mar. 24, 538 B.C. (cf. W. H. Dubberstein, *AJSL*, 55 [1938], 417). The rebuilding of the temple commenced in Iyyar (Apr./May), 537 (Ezr. 3:8), was halted by the objections of adversaries, and was resumed only in the second year of Darius (520 B.C.; Ezr. 4:24; Hag. 1:1f.). Work was completed on 3 Adar (= Mar. 10), 516 B.C. (Ezr. 6:15). Passover was observed on 14 Nisan (= May 1) of that year (Ezr. 6:19). Next to nothing is known about the details but it is reasonably certain that the second temple was located

on the site of Solomon's temple, since some were present who had seen the former temple (Hag. 2:3), and no protest was raised against the location of Zerubbabel's temple.

Jerusalem in the Persian period was in the satrapy of Beyond-the-River (*ʿabar nahʿarā'*, Transeuphrates), which included Syria and Palestine. According to Herodotus there were twenty satrapies ("protectors of the kingdom"), of which Beyond-the-River was the fifth, extending from the border of Cilicia to the border of Egypt (iii.88, 91). The governor of a satrapy was very powerful, and he had a staff of subordinates. One can assume that Tattenai was the satrap of Beyond-the-River (Ezr. 5:3, etc.), that Sanballat was his lieutenant governor in Samaria (Neh. 2:10, etc.; cf. *DOTT*, pp. 260-64; A. Cowley, *Aramaic Papyri of the Fifth Century B.C.* [1923], pp. 108-119), that Tobiah the Ammonite (Neh. 2:10) was a similar official in part or all of Transjordan, and that Geshem the Arab (2:19) was an important person over the province of Arabia, which according to Herodotus included Edom and southern Judah and was exempt from the taxes levied on Beyond-the-River.

Nehemiah was cupbearer in the court of Artaxerxes, undoubtedly Artaxerxes I Longimanus (464-425 B.C.). Because of his concern for Jerusalem, Nehemiah asked permission to visit the city and was appointed "governor" of Judah (Neh. 5:14; cf. 2:1, 9). The sequence of dates in 1:1 and 2:1 is not necessarily an error; if Nehemiah was using a Tishri year for Artaxerxes, Kislev (month 9, but the second month in the Tishri calendar) would precede Nisan (month 1, but the seventh month in the Tishri calendar).

The date of Ezra's journey to Jerusalem is a problem, due in part to uncertainty about which Artaxerxes is meant and in part to details in Ezra and Nehemiah that do not harmonize well. If Artaxerxes is the first (Longimanus, 464-425 B.C.), the seventh year (Ezr. 7:7) would be 458 B.C. But if it was Artaxerxes II Mnemon (404-359 B.C.), Ezra's journey would have been in 398 B.C. In the latter case, Ezra and Nehemiah could not have been contemporary, for according to Elephantine Papyrus 30, Bigvai (Bagohi) was governor of Jerusalem at that time. On the other hand, if Ezra reached Jerusalem in 458 B.C., a number of details do not fit: walls were already built, but Nehemiah found them in ruins; Nehemiah did not mention the previous work of Ezra; Nehemiah found people abusing the law, although Ezra had corrected them; etc. As a result, some scholars suggest emending the text of Ezr. 7:7 to read "in the thirty-seventh year," making his arrival in Jerusalem in 428 B.C., sixteen years after Nehemiah's first visit (*BHI* [rev. ed. 1972], pp. 392-403). This is not the place to try to solve the problem, but any solution that fails to take into consideration all of the biblical data is less than satisfactory as an exegetical work (J. S. Wright, *The Date of Ezra's Coming to Jerusalem* [1958]; H. H. Rowley, "The Chronological Order of Ezra and Nehemiah," in *The Servant of the Lord and Other Essays* [1952], 129-159).

The numbers of exiles and returnees are also significant — but no satisfactory data exist. The figures in 2 K. 24:14-16 (ten thousand either including or in addition to the eight thousand in the following verses) and Jer. 52:28-30 (4600) are far too small, in the light of the biblical picture. Likewise the number of 42,360 who returned with Sheshbazzar, plus the servants and the singers (7537, a total of around fifty thousand), while reasonable, does not seem to fit in with Nehemiah's method of selecting ten percent to live in Jerusalem (Neh. 11:1) — unless we are willing to settle for an extremely small Jerusalem — and again is not consistent with the biblical data. W. F. Albright suggested that the population of Judah was more than 250,000 in the 8th cent., possibly half that figure after the first deportation in 597 B.C., and around twenty thousand after the first exiles had returned (*Biblical Period from Abraham to Ezra* [rev. ed. 1963], pp. 87, 105f., 110f.). It is extremely difficult to believe that the very small number of twenty thousand Jews in all Judah could have survived the years that followed.

The Babylonians had damaged the city extensively, particularly the palace-temple complex. K. Kenyon's excavations revealed terrible destruction of the east side of David's City, due in part to the steepness of the slope, which had been retained by walls with back-filling. Once these walls had been broken, houses, fill, and upper walls had tumbled down the side of the Kidron ravine, making archeological excavation extremely difficult and somewhat hazardous. Nehemiah recognized the need for sound walls if the city was to be safe.

The book of Nehemiah describes the city walls three times: first, in a record of Nehemiah's night inspection (Neh. 2:11-16), which began at the Valley Gate and ended at the Kidron because he could not go further; then, in an account of the work gangs on the wall (ch. 3); and finally, in an account of the processional around the walls for the dedication (12:31-43). The walls were finished in fifty-two days (6:15) — a point used by the minimalists to support the view that Jerusalem at that time was confined to the east hill. The question is now moot. But even apart from the evidence of archeology, the biblical text contains the record of other work besides that of the fifty-two days. Those who had returned with Zerubbabel in 538 B.C. had obviously made some effort to rebuild the walls and thus caused the complaint to the Persian ruler (Ezr. 4:12). Moreover, the rebuilding under Nehemiah was principally on the east hill, specifically on the eastern side of that hill, as the text indicates, because that is where the palace complex and official buildings were located. An enemy had little reason to do more than destroy the gates and towers on the rest of the city walls — and it was on these that Nehemiah's workers labored. The stones, as excavations have shown, were not dressed; hence there was no involved masonry except around the gates. The walls were finished to half their height (Neh. 4:6) and were not notably strong walls at that, for Sanballat made sarcastic remarks about the material and the structure (vv. 2f.). One other point should be noted: Josephus reported that the rebuilding of the wall took two years and four months (*Ant.* xi.5.8 [179]) — a figure which he must have found in some record.

2. Nehemiah's Jerusalem. Because of their importance for reconstructing both the city of the preexilic period and that of the subsequent period, Nehemiah's descriptions will be examined in detail.

In Nehemiah's night inspection (Neh. 2:3f.) he mentions the Valley Gate, the Jackal's Well (or Dragon's Well), the Dung Gate, the Fountain Gate, and the King's Pool (discussed below).

In ch. 12 Nehemiah describes the procession to the temple for the dedication. The two groups apparently started from the southwestern part of Jerusalem, where Nehemiah himself had started his tour of the walls. Group A moved counterclockwise and Group B clockwise. Their goal was the same; hence one may suppose that their respective routes would take about the same amount of time, even though the B itinerary lists more landmarks. It will be assumed, merely so that we can visualize the situation, that the groups started somewhere in the vicinity of the modern Zion Gate, in the southwest corner of the walled city. We shall trace the first group and then continue with the second group in reverse order, hence completing a circuit of the city in a counterclockwise direction. The places mentioned in this sequence are: the Dung Gate (12:31), the Fountain Gate (v. 37), the Stairs of the City of

David, the Water Gate on the east (v. 37), the Gate of the Guard (v. 39), the Sheep Gate, the Tower of the Hundred (v. 39), the Tower of Hananel, the Fish Gate, the Old Gate, the Gate of Ephraim (v. 39), the Broad Wall, the Tower of the Furnaces (v. 38). These will be discussed in order, and other locations or places will be inserted where they seem most appropriate.

a. Valley Gate (*ša'ar haggay'*, Neh. 2:13, 15; 3:13; 2 Ch. 26:9). This gate has often been located in the west wall of David's City, i.e., leading to the Central Valley. As seen above (III.D.2.k), only the Hinnom was known as the *gay'* (*haggay'* Jer. 2:23); thus some scholars have identified the Hinnom of David's day with the Central Valley (e.g., L.-H. Vincent, *Jérusalem antique,* pp. 124ff.), but this is an argument of desperation totally at variance with all other biblical data. The Valley Gate was located 1000 cubits W of the Dung Gate (a reasonable inference from Neh. 3:13). Three different cubits were known to the Jews: the small cubit of 465 mm. (1.5 ft.), the cubit of Moses, 525 mm. (1.7 ft.), and the large cubit of 560 mm. (1.8 ft.) (A. Ben-David, *IEJ,* 20 [1970], 235). One will not be far wrong if he figures roughly that 2 cu. = 1 m.; thus the two gates were about 500 m. (1640 ft.) apart. This would locate the Valley Gate approximately on a line with the west wall as proposed by N. Avigad, based on the excavations of 1971 (see map, *IEJ,* 22 [1972], 195), or roughly S of the Zion Gate in the modern wall.

b. Jackal's Well (Dragon's Well, *'ên hattannîn,* Neh. 2:13). This well is usually identified as En-rogel (see II.C.2, 3 above), but this does not fit the general direction of the journey, for the spring was between the Valley Gate and the Dung Gate. No spring is known in the Hinnom, but this does not preclude the possibility that at one time there was a source of water (cf. II.C.3 above). It should also be noted that *'ên hattannîn* could be translated "dragon's eye"; hence it might refer to a local landmark other than a spring.

c. Dung (Ashpot) Gate (Neh. 2:13; 3:14; 12:31; cf. *ša'ar hāšᵉpôṭ,* 3:13. "gate of the ash heap, refuse pile, dung hill"). This gate would obviously be on the side of the city where it would be least offensive. This certainly was in the Valley of Hinnom at some distance from the king's garden. It is probably to be identified with Jeremiah's Potsherd Gate (see III.D.5.m above). The suggestion has been made that the word *'ašpōṭ* or **šāpôṭ* is etymologically related to "Topheth," based on a hypothetical root **tpy,* which became *tp'* in Aramaic and *špy* in Hebrew (cf. BDB, p. 1046). This would require Topheth to be an Aramaic loanword — a possibility, since Ahaz had imported pagan elements from Damascus.

d. Fountain Gate (Gate of the Spring; Neh. 2:14; 3:15; 12:37). This gate is probably the one at the lower end of David's City (see III.D.5.u above) that led to En-rogel, for it was near "the stairs that go down from the City of David" (3:15; 12:37), and it is distinguished from the Water Gate on the east.

e. En-rogel. See II.C.2 above.

f. King's Garden (Neh. 3:15). This was probably a fertile area watered by the overflow of the Gihon, but whether it was in the valley at the confluence of the Kidron and the Hinnom, or along the lower slopes of the City of David, where the second aqueduct had openings providing for the watering of the adjacent land, cannot be positively determined. See III.D.5.t above.

g. King's Pool (Neh. 2:14). This is possibly the pool made by Hezekiah (2 K. 20:20; Isa. 22:11), perhaps the Pool of Shelah of the king's garden (Neh. 3:15).

h. Pool of Shelah (Neh. 3:15). As previously noted, there were two older aqueducts in the Kidron Valley, antedating Hezekiah's tunnel. To the later of these Isaiah may have been referring when he spoke of "the waters of Shiloah" (Isa. 8:6), which may have led to the Pool of Shelah, since the words are derived from the same root.

i. Stairs That Go Down from the City (Neh. 3:15; 12:37). These were located in the lower part of David's City, near the Fountain Gate (see III.F.2.d above).

j. Sepulchres of David (Neh. 3:16). These were doubtless in the Lower City, but their exact location may never be known, due to the extensive quarries of the Roman period (cf. S. Yeivin, *JNES,* 7 [1948], 40-43). According to the biblical accounts, fifteen kings of the Davidic line were buried in the City of David: David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Joram, Ahaziah, Joash, Amaziah, Azariah (Uzziah), Jotham, Ahaz, Hezekiah, and Josiah. David's tomb was known in the time of John Hyrcanus (Josephus *Ant.* vii.15.3 [393]) and Herod (*Ant.* xvi.7.1 [179-187]), and even into the early Christian era (Acts 2:29). The location of the "tomb of David" on the southwest hill (modern "Zion") is without biblical or archeological foundation; it dates no earlier than the 9th cent. A.D. (Mazar, *Mountain,* p. 185). The argument that the southwest hill was not inhabited in Israelite times because burial places were found there is based on a later stricture of Judaism; it was obviously not in force in the preexilic period.

k. House of David (Neh. 12:37). This was probably not standing in Nehemiah's day, but its location may have been traditionally marked. It was not in the palace complex, for that was built by Solomon (see III.C.2.e above), but in the Lower City, near the stairs also mentioned in the procession (12:37).

l. House of the Mighty Men (Neh. 3:16). This was near David's palace; again, it may have been a historical site by Nehemiah's time.

m. Water Gate on the East (*ša'ar hammayim mizrāḥ,* Neh. 12:37, or *lammizrāḥ,* 3:26). This is possibly to be distinguished from another water gate (west), but if so we have no direct reference to it. There was a Water Gate (lit. "gate of the waters," Neh. 8:1, 3, 16) that had a plaza or town square before it, as did the Gate of Ephraim (3:16). Above Spring Gihon, where the Water Gate on the east is generally located, there would have been little room for a town square due to the topography, but no other location suggests itself. The Water Gate on the east appears to be the same as the East Gate (3:29).

n. Ascent to the Armory at the Angle (Neh. 3:19). This is very difficult to locate because the words "ascent," "armory," and "angle" may not be correctly translated. The word *ᵓᵃlōṭ* can be read as an infinitive construct meaning "the going up" or "ascending of," but it is usually emended to *ᵓᵃlîyâ,* "upward, northward" (cf. 3:31f.) or to *maᶜᵃlôṭ,* "stairs" (cf. 3:15). The word *nešeq* means "equipment, weapons"; "armory" is a translational facilitation here (cf. BDB, p. 676). It can be made to mean "armory" by emending the text to read *bêṭ nešeq.* But the versions are against this reading. The root *nšq* also gives rise to the word for "kiss," and an Arabic cognate means "fasten together." The LXX reads "the tower of the ascent where it meets the corner." The word *miqṣô(a)ᶜ,* translated "angle, place of corner-structure, corner-buttress" (BDB, p. 893), occurs ten times (Ex. 26:24; 36:29; 2 Ch. 26:9; Neh. 3:19f., 24f.; Ezk. 41:22; 46:21f.). The root seems to mean "cut off, break off, end abruptly." Avi-Yonah said that both *pinnâ* and *miqṣô(a)ᶜ* mean "angle," the former the outer angle and the latter the inner angle (*IEJ,* p. 243 n. 4). But one place in Jerusalem was known specifically as the *miqṣô(a)ᶜ.* Since every corner of a wall has both an outer and an inner angle, it is unreasonable to suppose that

only one of these would be called without further qualification "the inner angle." Moreover, both words are used in the phrase "to the Angle and to the corner" (Neh. 3:24f. [MT 24]).

Furthermore, neither the LXX nor the Vulgate so understood it. The "ascent" could hardly meet an inner corner of an angle (LXX), and the Vulgate has an entirely different idea in *contra ascensum firmissimi anguli* ("opposite the ascent of the strongest angle"). In the Exodus passages some kind of a join or joint is meant. In the Ezekiel passages, the meaning is simply "corners." In 2 Ch. 26:9, the Angle is one of the three places where Uzziah built towers (see III.D.2.6 above). Perhaps the *miqṣô(a)ʿ* was a particular location where the wall was strengthened or buttressed (hence the Vulg. *firmissimi*) at a corner and joined by another wall. The context of Neh. 3:19 seems to locate the Angle on the temple mount near the houses of the high priest and other prominent persons (cf. 3:20-25), possibly on the west side where the wall that extended from the Gate of the Corner to the temple mount joined the wall of the temple court.

o. House of Eliashib (Neh. 3:20). This seems to have been a large building, befitting the high priest, for work on the wall at that area was divided into two parts (3:20f.). It was located near the priests' house (interpreting 3:22).

p. House of Azariah (Neh. 3:23). Since many persons were named Azariah, the meaning of "the house of Azariah" (3:23) is obscure. From the location of his house one should assume that he was an important person, possibly a priest, perhaps one of those who joined in attaching their seals to the covenant (10:10), as well as the priest (?) who marched with the princes and with Ezra in the procession (12:33).

q. Projecting Tower (*hammigdāl hayyôṣēʾ*, Neh. 3:25-27). This is also difficult to locate — or even to define. Heb. *yôṣēʾ* means "the (one) coming/going out"; but what, exactly, is a "tower that comes out"? The RSV translates "projecting tower," which is accurate but not satisfyingly descriptive. Did the tower project outward from the line of the wall, or inward, or in both directions? In v. 25 the tower projects "from the upper house of the king," meaning the palace built on Solomon's palace location, rather than on David's, which was in the Lower City. But was the tower built on the palace and was the palace built against the outer wall? In v. 26 the Nethinim ("temple servants" who lived on Ophel) "repaired to a point opposite [*ʿad neged*] Water Gate on the east and the projecting tower." Certainly the Water Gate on the east was on the east wall; was the projecting tower there also? Was it the tower that Uzziah built at the *miqṣô(a)ʿ* (2 Ch. 26:9)? Was it the tower of David (Cant. 4:4)? Warren thought that he found the remains of a tower where the Ophel wall assumes the direction of the modern Ḥaram wall (cf. Simons, p. 119), but the remains of that tower do not come from Nehemiah's day (cf. K. Kenyon, *Jerusalem*, pp. 114f.). Kenyon pointed out that the excavations of 1961 show that Nehemiah did not (probably could not) follow the line of the earlier wall on the eastern slope of Ophel, because of the tumble of stones, but rather constructed a wall higher up on the ridge, reducing the width of the city at that point (*HDB* [rev. one-vol. ed. 1963], p. 474).

r. House of the King (Neh. 3:25). This was almost certainly located in the general area of Solomon's palace, near the court of the guard (see III.D.5.p above); it had a projecting tower (see III.F.2.q above).

s. Gate of the Guard (*šaʿar hammaṭṭārâ*, Neh. 12:39). This gate, probably close to the court of the guard near the king's house, was perhaps in Manasseh's second wall, further down on the slope and slightly E of the temple mount (cf. Simons, p. 342). The word *maṭṭārâ*, from the root *nṭr*, "to watch," sometimes means "prison" as well as "warden," and thus this has been referred to as the Prison Gate; but it is unclear why a prison would be located near the temple, and why the procession, planning to hold a dedication service, would station itself by the prison. It is a peculiar feature of this word that it can be developed either from the qal or the piel, and if the latter, it would mean "watchman" (cf. Heb. *ṣôpēh*; Gk. *skópos*). Could there be a connection between this gate and the nearby hill that came to be known as *har haṣṣôpēh*, Mt. Scopus? There was, of course, a prison or "court of the guard" located in the palace complex (Jer. 32:2), well away from the outer wall, as prisons should be.

t. Ophel (Neh. 3:27). This name is often given to the entire City of David, but no scriptural basis exists for this practice. Josephus referred to Ophel as "a certain place" (*chōrou tinós*, *BJ* v.4.2 [145]). The Ophel was between the northern end of David's City and the southern end of the temple mount, with its own portion of wall. The Nethinim (temple servants) lived on Ophel (3:26).

u. Horse Gate (*šaʿar hassûsîm*, Neh. 3:28; Jer. 31:40; see III.D.5.o above). This gate was located N of the Water Gate, the projecting tower, and the wall of Ophel, if the details in Neh. 3:28 are intended to be sequential. It therefore was probably a gate in the outer wall at the southeast end of the temple complex (but see Simons, pp. 338f.).

v. Muster Gate (*šaʿar hammipqāḏ*, "gate of the muster/appointment," Neh. 3:31). This gate was probably, from the name, the place for mustering the guard and was located near the northeastern corner of the city wall (cf. Neh. 3:31f.). Most likely it was in the eastern wall just S of the "upper chamber of the corner," since the Sheep Gate was in the northern wall. Simons stated that the Horse Gate and the Muster Gate (which he called "Inspection Gate") were the only two gates in the eastern side of Manasseh's outer (second) wall (p. 342).

w. Sheep Gate (*šaʿar haṣṣôʾn*, Neh. 3:1, 32; 12:39; Jn. 5:2). This gate was on the northern or northeastern side of the city. Because of its location it can hardly be the gate by which the inhabitants of the city led their flocks out to pasture. More likely it was the gate used for bringing sheep for sacrificial offerings to the temple. Since merchants were located in that region (Neh. 3:32), one could assume that animals were sold here for the sacrifices. The Sheep Gate of Jn. 5:2 would have been located in the Herodian wall, which was somewhat farther north.

x. Tower of the Hundred (Tower of Me'ah, Neh. 3:1; 12:39). This tower was also on the northern wall, if indeed it was a separate tower. It is possible to read the phrase as an appositive defining Hananel (note the wording of 3:1) and to take "hundred" as either a measurement or as the number of persons connected with an event no longer understood (cf. the Israeli Kiryat Shemoneh, "the village of Eight").

y. Tower of Hananel (Neh. 3:1; 12:39; Jer. 31:37-39; Zec. 14:10). This tower was a landmark serving as the northern extremity of the city (Zec. 14:10) and as the eastern extremity (Jer. 31:38). It is generally located at the northwestern corner of the Ḥaram, being replaced by the Hasmonean Baris and the Herodian Antonia, but one must keep in mind that the northern end of the temple area in earlier times was probably not as far north as the Ḥaram extends today. One must also bear in mind that the depression known as "St. Anne's Valley" was deeper and provided a natural location for a city wall.

z. Fish Gate (2 Ch. 33:14; Neh. 3:3; 12:39; Zeph. 1:10). This gate was located in the northern wall, perhaps where it crossed the Central Valley (see III.D.5.g above). It

would be the location of the fish markets, or at least the gate by which catches were brought from Galilee and from the Mediterranean. If the Mishneh was near Ephraim Gate (see III.D.5.h), then the juxtaposition of "Fish Gate," "Mishneh," and "the Mortar" in Zeph. 1:10 becomes more meaningful. If the Mishneh was the "second" quarter of the city, on the southwest hill, and the Maktesh (Mortar) was a new addition northward along the Central Valley, this would fit the details well — but at present this is no more than a hypothesis, not agreeing with the more generally accepted view that the Mishneh was a northern addition to the settlement on the southwest hill.

a'. Old Gate (*haššaʿar hayᵉšānâ*; this cannot be translated "old gate," for *šaʿar* is masc. and *yᵉšānâ* is fem.; hence "Gate of the Old [Wall]" or, with a minor emendation, "Gate of the Mishneh," Neh. 3:6; 12:39). If formerly a wall extended westward from the Central Valley to the ridge above the Hinnom (now generally accepted), to which a later wall was added that embraced the more northerly part of the Central Valley (the two probabilities on Avigad's map), this may have been a gate opening between these two parts of the city.

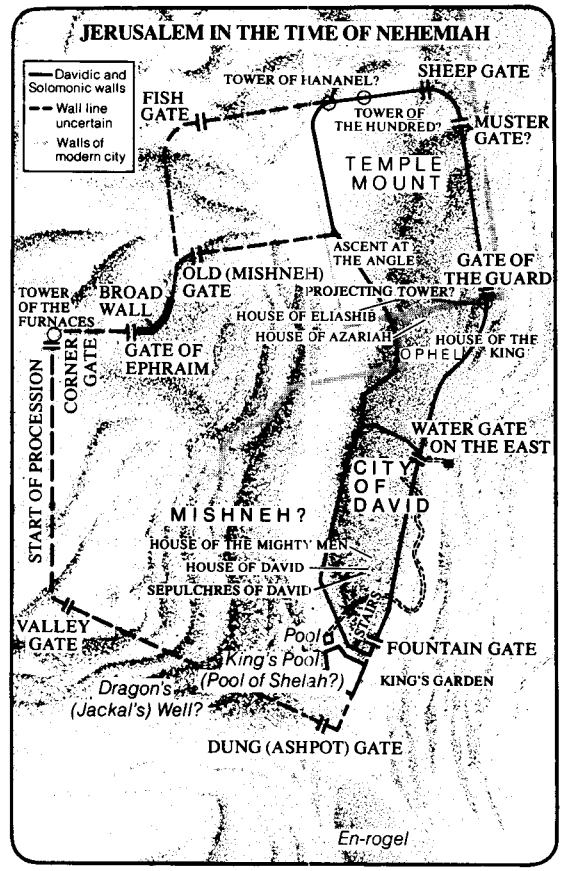
b'. Gate of Ephraim (2 K. 14:13; 2 Ch. 25:23; Neh. 8:16; 12:39). This gate was 400 cubits (about 200 m., 656 ft.) from the Corner Gate (2 Ch. 25:23; see III.D.5.g above). It has been identified with the "Old Gate," but the presence of the preposition (*wᵉʿal*) in Neh. 12:39 makes it impossible to read "even the Old Gate." The two were in the same vicinity; it is possible that the addition of the "Mishneh wall" necessitated the opening of a new Ephraim Gate in order to give access to the road north to Ephraim or Samaria.

c'. Broad Wall (*haḥômâ hārᵉḥābâ*, Neh. 3:8; 12:38). This may be the wall of which part was discovered in the excavations of 1969-1971 (N. Avigad, *IEJ*, 20, 1-8, 129-140; 22, 193-200). The suggestion that it be translated "wall of the plaza/city square," while enticing, is impossible without emending the text. (The LXX can be translated either way, but at least it supports the MT.) Avigad described a broad wall, 6.4 to 7.2 m. (21 to 24 ft.) wide.

d'. Tower of the Furnaces (Tower of the Ovens, Neh. 3:11; 12:38). This was in the northwestern part of the city, probably near the Corner Gate (see III.D.5.g above; 2 K. 14:13; 2 Ch. 26:9; Jer. 31:38; cf. 2 Ch. 25:23 and Zec. 14:10, both with slight emendations), and was possibly one of the towers built by Uzziah (2 Ch. 26:9; see III.D.2.c above).

e'. Corner Gate (2 K. 14:13). This gate was located at the northwestern corner of the city of that period, 400 cubits from the Ephraim Gate (see III.D.5.h above). The Tower of the Ovens (Furnaces) may have been built on or by the Corner Gate.

This completes a circuit of the city of Nehemiah, using the material in Nehemiah and the sequence found in Neh. 2:11-15; 3:1-32; and 12:31-43. It is clear that the city of Nehemiah's day could in no way have been limited to the eastern hills (the temple mount and David's City), as has been widely held. While it is true that no archeological discoveries from the Persian period have been found on the southwest hill — at several sites, Hellenistic or Hasmonean remains are immediately above Israelite, allowing no place for a Persian interval — the following facts still cannot be ignored. (1) Nehemiah describes the city as an eyewitness, and the Persian-period date of his work cannot be challenged. (2) In his description he uses names and locations that we now know were in existence in the preexilic period, and which, as has long been recognized, continued in use into the Hellenistic and Roman periods, some of these locations being on or related to the southwest hill. (3) The walls of Nehemiah's Jerusalem, as described in this synthesis, are quite similar to Josephus's First Wall (see III.G below).



3. Religious Situation. Since Jerusalem (Yahweh's holy city) and the temple (Yahweh's house) had been destroyed and the people decimated by wars (from *ca.* 742 to 586 B.C.) and finally exiled, since some had lived in Babylonia for a generation and others for three or four generations, and since those who had returned were thrown in with those who had remained in the land, many of them non-Israelites, one can readily see that the religion of Yahweh's Torah needed something to keep it from vanishing completely. Ezra and Nehemiah were given that task.

Building the walls to protect the city and the temple was only incidental. The time would come when another Prophet would point out, as Jeremiah had done, that God does not need temples and sacred cities. But meanwhile, the preservation of God's law, both in the lives of the people and in the form of Scripture for future generations, was of primary importance.

Ezra gathered the people in the city square before the Water Gate (Neh. 8:1, 3) and read the law. Since it was the time for the Festival of Booths (15-22 Tishri), the people built their "tabernacles" in the city square. Ezra read the law daily from early morning until midday (vv. 3, 18). He is also given credit for the formation of the Great Synagogue, becoming the "father" of Judaism (G. F. Moore, *Judaism*, I [1927], 29-47). The men of the Great Synagogue collected the Scriptures (T.B. *Baba Bathra* 15a), and Ezra copied them in the "Assyrian" (square) letters (T.B. *Sanhedrin* 21b-22a). According to some scholars, Ezra wrote the "P" document, 1 and 2 Chronicles, Ezra-Nehemiah, and Malachi, or various combinations. However these state-

ments are interpreted, they lead to the conclusion that Ezra was an essential link between the religion of Israel and the religion of Judaic and Christian origins.

Ezra is sometimes seen as a legalist. He and Nehemiah put great stress on rigid sabbatarianism and were strongly opposed to mixed marriages. But it is a fact of sociology, as Nehemiah recognized (Neh. 13:23f.), that children grow up to speak the language of their mother; in other words, the more influential of the parents in the early training of the child is the mother. If Jewish men had been permitted freely to marry gentile women, within two or three generations the religion of the Jews probably would have disappeared entirely. Legalism had to be given its proper balance, and Jesus and Paul did so; but for the intervening period, a strong dedication to the law was necessary, if revealed religion were to survive.

4. Hellenistic and Hasmonean Periods. Information about Jerusalem from *ca.* 400 to 200 B.C. is almost nonexistent. There was, according to Josephus, some persecution by the Persians, although as a general rule they left the Jews alone. Josephus quoted Hecateus of Abdera, who said that "many ten-thousands" of Jews were taken to Babylon (*CAp* i.22 [194]; Thackeray said in a note [*LCL*, I, 241 n. b] that Hecateus was in error and confused the Persians with the Babylonians — yet some historical background for the Esther story exists). Alexander conquered the Persian empire in stages (334-326 B.C.) and the age of hellenization had come. The story of Alexander's visit to Jerusalem (Josephus *Ant.* xi.8.5 [329-339]) is branded by scholars as fictitious.

The Jew-Samaritan schism had its roots at an earlier time, but the break came toward the middle of the 4th cent. B.C., when the Samaritans built a temple on Mt. Gerizim. It was destroyed by John Hyrcanus in 128 B.C. (Josephus *Ant.* xiii.11.1 [254-58]; *BJ* i.2.6 [62f.]; cf. H. H. Rowley, *BJRL*, 38 [1955], 166-198, with full bibliography).

Alexander left no heir and his empire dissolved in struggles among the Diadochoi, the principal ones for our purpose being the Lagides (Ptolemies) of Egypt and the Seleucids of Syria (Josephus *Ant.* xii.1.1 [1f.]). The Ptolemies controlled Palestine until 198 B.C., when the Seleucids took over. Ptolemy I Soter (satrap 323-305, king 305-283 B.C.), son of Lagos, entered Jerusalem on a Sabbath and took many Jews from Judah to Egypt (*Ant.* xii.1.1 [4-7]), among them a number of soldiers (Josephus drew material from the Letter of Aristeas 12f.). The date is not known but one suggestion is 312 B.C., following the battle of Gaza (R. Marcus, note to *Ant.* xii.i.1 [5] in *LCL*, VIII, 5 n. d). Ptolemy II Philadelphus (283-245 B.C.) released "some hundred and twenty thousand natives of Jerusalem who were slaves in Egypt" (*Ant.* xii.2.1 [11]) as partial payment for the privilege of copying the Hebrew Scriptures for the library at Alexandria (*Ant.* xii.2.1-3 [11-33]). Josephus, using the Letter of Aristeas, told in detail the story of the version known as the Septuagint (*Ant.* xii.2.4f., 7, 11 [39, 49, 57, 85-93], and particularly the translating, in xii.2.13 [101-109]).

Of particular interest is the material quoted by Josephus from Hecateus of Abdera "who rose to fame under King Alexander, and was afterward associated with Ptolemy, son of Lagos" (*CAp* i.22 [183]). There were many cities and forts in Judah, but only one fortified city, Jerusalem, which had a circumference of 50 stades (9250 m., 5¾ mi.; in *BJ* v.4.3 (158) Josephus gave the circumference of the city in the 1st cent. A.D. as 33 furlongs, about two-thirds the size given by Hecateus) and a population of 120,000 inhabitants (*CAp* i.22 [198]). Near the center of the city a stone wall enclosed an area which is clearly the temple. The wall was 5 plethra long (149 m., 490 ft.) and 100 cubits broad (about 50 m., 164 ft.) with a pair of gates (i.22 [198]). Inside the wall was an altar of unhewn stones, 20 by 20 cubits and 10 cubits high (about 10 x 10 x 5 m., 32 x 32 x 16 ft.), and a great edifice with a golden altar and lampstand, but not a single statue or votive offering (199). The chief priest was Hezekiah (178), a statement often disputed, but apparently substantiated by Seller's discovery of a coin at Beth-zur that contained the names of Jehohanan and Hezekiah in Hebrew (O. R. Sellers, *Citadel of Beth Zur* [1933], pp. 73ff.). Jehohanan was Honnai (Onias I), the high priest, and Hezekiah (Ezechias) was his chief priest. Hecateus remarked on the high status of the priesthood, which consisted of fifteen hundred men, and the august position of the high priest. In the Birah (cf. Neh. 2:8) there was a garrison of five hundred soldiers.

Even allowing for some exaggeration in the various numbers quoted, a reasonable portrayal of Jerusalem is given, one not greatly different from that which has been established by the excavations of the 1970's in the Old City.

Onias I was high priest from 320 to 290 B.C. His son, Simon I, is often identified as Simon (Simeon) the Just (Josephus *Ant.* xii.2.5 [131ff.]), but the panegyric of Simon in Sir. 50:1-24 and the confusion of later events and persons in Josephus's accounts have led scholars to suggest that Simon II was the Just. Repairs to the temple, strengthening of the fortifications of temple and city, and other details would fit the time after Jerusalem had been ravaged by Antiochus III (*ca.* 198 B.C.; *Ant.* xii.4.10 [224]). A well-known saying attributed to Simon is "On three things the world rests, on Torah, on worship, and on works of charity" (*Pirqe Aboth* i.2). He is considered the last leader of the Great Synagogue. After Simon the high priesthood deteriorated through secularization (cf. G. F. Moore, *Judaism*, III (1930), 8f.).

The highly complex and confused accounts of the struggles between the houses of Onias and Tobias, of the pro-Egyptian and pro-Syrian parties, and of intrigues to gain positions lie beyond this article. The process of hellenization had been at work in Judaism for some time. Hecateus (306-283 B.C.) refers to it (*ORHI*, II [1932], 217 n. 1; scholars are inclined to doubt statements by Hecateus relating to the time before Alexander), and history gives evidence of its effects (cf. 1 Macc. 1:43). Alongside the struggle in Judah was the constant struggle between the Seleucids and Ptolemies. This ended in 198 B.C. when the Seleucid Antiochus III took over all of Coelesyria (Syria and Palestine) with a victory at Paneas (later Caesarea Philippi). The hellenizers among the Jews were thus given more authority. Antiochus IV Epiphanes (175-164 B.C.) succeeded his elder brother Seleucus Philopator and at once set in motion his plan to hellenize ("civilize" was his term) his entire realm. Greek altars were set up at many places and the worship of Greek gods was required. He made Jason (who had hellenized his name from Joshua/Jesus) high priest on Jason's promise that he would vigorously pursue the program of hellenization. When a false report reached Jerusalem that Antiochus had been killed in battle with Egypt, Jason, who had been replaced by Menelaus, staged a revolt. Antiochus retaliated savagely, leaving his general Apollonius to occupy Jerusalem. The city walls were razed to the ground. A new fortress, the Akra, was erected on the citadel of David. A gymnasium was built and Greek names were to be used. No kind of separatism was to be tolerated; all were to be fused into one people with one religion. An image of Jupiter was set up on the altar (the "desolating sacrilege," Mt. 24:15 par. Mk. 13:14), and the courts of the temple were filled with Greek soldiers, hierodules, and the performance of licen-

tious pagan rites. The sacred Scriptures were defiled or destroyed.

Resistance to hellenization came under the leadership of the MACCABEES or HASMONEANS. It began in 167 B.C. when Mattathias, a priest of the house of Hashmon in the town of Modin (Modein), near Lydda (modern Lud), was ordered to perform a pagan sacrifice at a pagan altar. He refused, and when another would have done so, he slew the apostate and the Syrian soldier, destroyed the altar, and called for an uprising (1 Macc. 2:1-28; Josephus *Ant.* xii.6.2 [268-278]). Mattathias had five sons: Simon, the second oldest, whom Mattathias designated as "father" because of his excellent understanding; Judas the "Maccabee" (spelled with either *k*, meaning "extinguisher," or *q*, meaning "hammer"), whom the father designated as commander of the army; John, the oldest; Jonathan, the youngest; and Eleazar. The revolt started slowly, but with the addition of the Hasidim and others who opposed hellenization the Hasmoneans finally gained a peace treaty. Judas took over Jerusalem, cleansed the temple, and on 25 Kislev (Dec. 13) 164 B.C. the temple was rededicated. The eight-day celebration is known as Hanukkah ("dedication," hence *tá enkaínia*, Jn. 10:22), also as "Lights" (*phôta* in Josephus) and "the feast of the Asmoneans."

Jonathan was appointed high priest, and after him Simon became high priest and ethnarch (141-135 B.C.). Fortifications were built and the Second Commonwealth was established. John Hyrcanus (135-105) suffered a siege of Jerusalem, when the walls were broken down, but then his fortunes changed and his reign became perhaps the high point of the Commonwealth.

Among those who resisted hellenization, the Hasidim were perhaps the "right wing," and from them probably developed the Pharisees, who were more centrist (possibly the Hasidim moved to the right and the Pharisees broke away). Another "sect" was the Sadducees, who were more sympathetic with hellenization. We first hear of the Pharisees and Sadducees in the days of Jonathan (*Ant.* xiii.5.9 [171]). When John Hyrcanus shifted his support from the Pharisees to the Sadducees, bitterness between the parties developed and continued into NT times. Somewhere in the same period the Essenes emerged, possibly as a group more to the right than the Pharisees, and perhaps from the Essenes the Qumrânians developed (cf. W. S. LaSor, "A Preliminary Reconstruction of Judaism in the Time of the Second Temple in the Light of the Published Qumran Materials," Th.D. diss., University of Southern California, 1956; *Amazing Dead Sea Scrolls* [rev. ed. 1962], pp. 222-239).

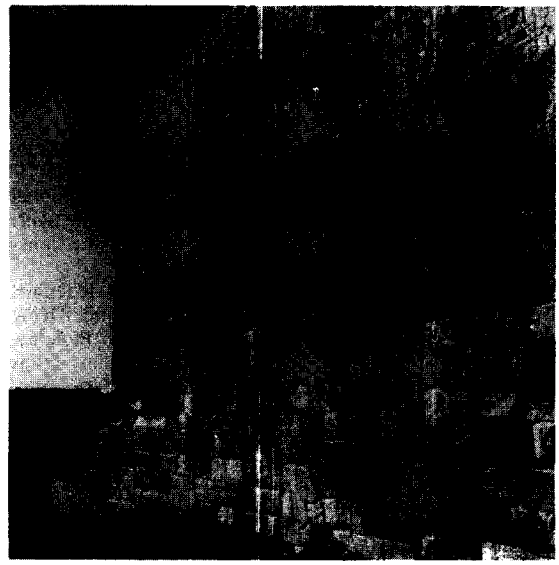
Later Hasmoneans seemed to forget the original struggle against hellenization. Judas Aristobulus I (104 B.C.) extended his kingdom northward, forcing Galilean Gentiles to become proselytes, while encouraging hellenization. He may have called himself Philhellene ("friend of the Greek"). Alexander Janneus (104-78 B.C.) extended the kingdom to its greatest limits. Possibly the inclusion of so many Gentiles contributed greatly to the spread of Hellenism among the Jews. Alexandra (78-69 B.C.) went to excesses in trying to make peace with the Pharisees. Aristobulus II (69-63 B.C.) gained the throne in victory over his older brother Hyrcanus, and when Antipater (father of the Herod to be known as "the Great") sought to undermine Aristobulus and put Hyrcanus on the throne, both sides appealed to the Roman commander Pompey, who had taken Damascus. In a swift move to put down a threatened revolt Pompey attacked Jerusalem, battered down the walls of the temple enclosure, and with some soldiers entered not only the temple but even the holy of holies. He permitted the Jews to continue their worship, however, and for a while under the Romans the Jewish people enjoyed better times.

Scholars have generally agreed that it was in this period, beginning *ca.* 200 B.C., that Jerusalem was greatly enlarged and many buildings were constructed on the southwest hill. Although the excavations of the 1970's require considerable revision of theories, it is true that there was much building just before the Herodian period. Some Herodian walls rest on Hasmonean foundations. The Citadel was fortified. Wilson's Arch, which supported a causeway between the southwest hill and the temple mount, was built in the Hellenistic period and reconstructed in the Herodian period. Likewise the eastern supporting wall of the temple mount is partly of pre-Herodian construction. The Hasmonean palace was built on the eastern slope of the southwest hill with a view over the temple mount. According to B. Mazar, it, too, was linked with the temple mount by a causeway (*Mountain*, p. 204). The capital of a column in the Ionic order was discovered in excavations of the Old City, indicating that hellenization had influenced even the architecture. Simon the Just is credited with the building of a great city pool to augment the water supply (cf. Sir. 50:1-3), identified as the Pool of Bethesda (cf. Jn. 5:2-4).

G. Herodian Jerusalem. For the complex story of the Herodian family, *see* HEROD. In this article only his building activities in Jerusalem are relevant.

1. General Observations. It is exceedingly difficult for the visitor to Jerusalem today to visualize what it was like just before and during the Herodian period (or at the time of Jesus). First, the walls of the Old City are not where they were then; at least the south wall is much farther north, and the north wall likewise is probably partly or entirely much farther north. As a result, the Old City has shifted anywhere from 300 to 600 m. (1000 to 2000 ft.) N of the site of the Herodian city. Especially the portion S of the present wall, which slopes down to the Hinnom, is unlike the Herodian city, for this is where many of the houses, as well as some of the important buildings (e.g., the palace of the high priest and the Hippodrome) were

The southeastern corner of the Haram esh-Sherîf showing the vertical junction of the Herodian wall and Nehemiah's wall (right). The smaller bricks in the upper portion of the wall are later additions (D. Baly)



located. In the second place, the Ḥaram does not give a true picture of the temple area. It is larger, occupying the enlarged temple platform built by Herod, and much more open than it was when Herod began his building. Third, the Central Valley (which Josephus called Tyropoeon, "Cheesemakers'") has almost disappeared, having been gradually filled with debris. Its location is still identified as *el-Wâd*, the street with the shops, running through the city from the Damascus Gate to the Dung Gate. But even this has been interrupted by buildings and later by the worship area (plaza) in front of the western wall. Fourth, the modern level is considerably higher than it was in the 1st century. At the southwest corner of the Ḥaram, for example, the modern ground level is about 20 m. (66 ft.) above the level of the Roman street, and the original bed of the Central Valley (about where the wall of the Old City abuts the south wall of the Ḥaram), was about 30 m. (100 ft.) lower. As a result, no clear picture emerges of the Upper City on the west and the deep ravine that separated it from the Lower City (David's City) on the east. Moreover, the leveling of the temple platform to coincide with its highest point has raised it markedly above the Ophel S of it. Fifth, the filling of St. Anne's Valley (done to complete the rectangular shape of the temple platform), the alteration of the topography around the Antonia, the cutting of a fosse, and the quarrying of stone have all changed the northeast end of the Old City. The best way to get a clear idea of what the Herodian city was like is to visit Avi-Yonah's scale model of Jerusalem on the grounds of the Holy Land Hotel in a western suburb of Jerusalem.

2. Josephus's Account. Josephus gave a detailed account of the three walls of Jerusalem and the towers (*BJ* v.4.1-4 [136-183]) and of the temple (v.5.1-8 [184-247]). Simons discussed these structures extensively (pp. 35-59). His basic conclusions are sound and many of them, formerly rejected by some scholars, have been confirmed by the excavations of the 1970's.

Josephus's First Wall started at the tower Hippicus and extended to the Xystus, joined the Council Chamber, and terminated at the western portico of the temple (*BJ* v.4.2 [144]). Hippicus was located at the Citadel, near the present Jaffa Gate; hence this northern wall ran west-east. The Xystus was a gymnasium, apparently in the open with polished flagstones (= Gk. *xystós*) (cf. *BJ* ii.16.3 [344]), close to the Hasmonean palace (*Ant.* xx.8.11 [189-190]), near the bridge that crossed the Central Valley. The remains of the bridge are known as Wilson's Arch (*BJ* vi.3.2 [199]; vi.6.2 [325]; vi.8.1 [377]). It would not be far from the modern Plaza of the Western Wall. The Council Chamber has been identified as the place where the Sanhedrin usually met, called in the Mishnah (*Middoth* v.4) *Lishkath ha-Gazith* ("Chamber of Hewn Stone," but possibly "Chamber of the Xystos," since *xystós* in the LXX translates *gāzîṯ* [1 Ch. 22:2; Am. 5:11]). The first northern wall approximately paralleled the cross valley (see II.B above).

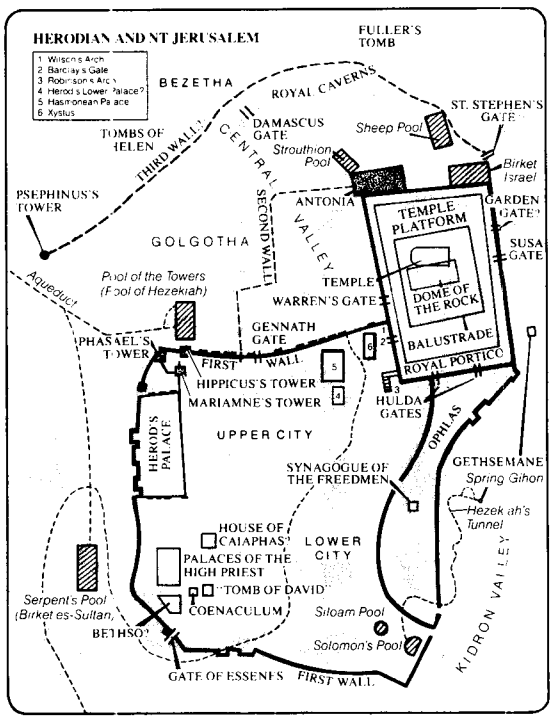
The balance of the first wall is more difficult to trace. It began "at the same point" (generally taken to mean the Hippicus), "in the other direction, westward," past "Bethso," to the gate of the Essenes. It turned south above the "fountain of Siloam," east again toward "Solomon's pool," past Ophel, and finally joined the eastern portico of the temple (*BJ* v.4.2 [545]). Yadin (apparently alone) takes the first part literally, on the basis of his translation of the Temple Scroll from Qumrân, and locates Bethso (*bêṯ ṣô(a)*ᵏ, the latrines) NW of the city (Y. Yadin, "The Gate of the Essenes and the Temple Scroll," in *Jerusalem Revealed*, pp. 90f.; cf. Josephus *BJ* ii.8.9 [147-49]). But this raises two objections. First, the northwestern side of the city, with wind generally from the west and particularly with the palace located there, is no place for latrines. Second, to extend the wall west — with no way to join it to the rest of the wall as described — makes little sense. The wall is generally described as enclosing the western and southern sides of the southwest hill (the Upper City), although the locations of Bethso and the Gate of the Essenes are not identified. The directions in the following portion of Josephus seem to be confused ("then [the wall] turned southward above the fountain of Siloam; thence it again inclined to the east toward Solomon's pool, and after passing a spot which they call Ophlas, finally joined the eastern portico of the temple") — but Josephus was certainly describing a wall that passed the southern part of David's City and then ran north along the Kidron Valley.

The tower Hippicus, named for a friend of Herod, is described in detail (*BJ* v.4.3 [163-65]). It was one of three towers built close together on the crest of a hill at the northwestern side of the Upper City (v.4.3 [161]; v.4.4 [173]), the others being Phasael, named for his brother (166), and Mariamne, named for his wife (170). Within the area was a cistern with provision for collecting rainwater from the roofs (164). Hippicus was 25 by 25 cubits, 30 cubits high; Phasael was 40 by 40 cubits, 90 cubits high, and Mariamne was 20 by 20 cubits, 55 cubits high, according to Josephus (the cubit = about ½ m. or 1½ ft.). Since the foundations of one of these, now identified as Phasael, are at the base of the Tower of David on the citadel, and since the general location and topography fit Josephus's numerous statements, there can be no doubt that the citadel is where these three towers were built (cf. R. Amiran and A. Eitan, "Excavations in the Jerusalem Citadel," in *Jerusalem Revealed*, pp. 52-54).

Josephus's second wall started from a gate in the first wall called Gennath, and enclosed the northern district of the town, going as far as Antonia (*BJ* v.4.2 [146]). Gennath may be the Ephraim Gate (see III.D.5.h above). Theories about the wall vary from taking it to be a rather small enclosure of the northern part of the Central Valley adjacent to the temple mount, to understanding it as part or all of the present north wall of the Old City.

Beginning at Hippicus the third wall went north to the tower Psephinus, which is described as "where the circuit of the wall bends back from the north to the west" (v.3.5 [133]), and N of Hippicus (v.4.2 [147]). Then it descended "opposite [*antikrý*] the tombs of Helen" (147), i.e., Helen of Adiabene. This site is now identified as "the Tombs of the Kings," located on the edge of Wâdī el-Jôz beyond St. George's Cathedral on Nablus Road, and provides a strong argument for those who have accepted the Sukenik-Mayer wall as the third wall (cf., e.g., E. L. Sukenik and L. A. Mayer, *Third Wall*; Simons, pp. 470-481; S. Ben-Arieh and E. Netzer, *IEJ*, 24 [1974], 97-107; M. Avi-Yonah, *IEJ*, 18 [1968], 98-125). The wall proceeded past the royal caverns, identified with the caves or quarries E of the Damascus Gate; this seems to be a strong point against the Sukenik-Mayer wall. The third wall then bent round a corner tower across from the so-called Fuller's tomb (location not identified) and joined the ancient rampart ending at the Kidron; this description could fit the present north wall from the quarries to the northeastern corner (*BJ* v.4.2 [147]).

In spite of a number of problems, it seems clear that the city of Josephus's time extended at least from the present north wall to the junction of the Kidron and Hinnom valleys, and from the citadel (Jaffa Gate) to the east wall of Ḥaram esh-Sherîf (the temple platform). It seems best to understand Josephus's first wall as the approximate location of the wall in the 7th cent. (B.C.), his second wall as that which enclosed the Mishneh, and the third as roughly



equivalent to the north wall of the present Old City — yet this view must remain tentative.

Herod built a palace "adjoining and on the inner side" of the three towers (*BJ* v.4.4 [176]), i.e., on the inner side of the region now known as the citadel. Josephus described it in some detail (176-183). He referred to the Upper City as the "upper market [*agorá*]," leading to the inference that there was a market or bazaar there. On the basis of Mishnaic references, J. Jeremias located such markets in both parts of the city: "The Upper and Lower Cities thus contained the two principal market streets" (p. 19). The house of Caiaphas is now identified with excavated remains on the southwest hill (modern Mt. Zion), just outside the Zion Gate of the Old City, but the identification is not certain. Some scholars are still inclined to locate it in one of the Hasmonean palaces near the Xystus.

The theater was built on the eastern slope of the southwest hill, opposite the southern end of the temple platform. The hippodrome, if indeed one existed in that period, was located in the Central Valley S of the temple platform.

Herod's greatest project was his rebuilding of the temple and enlarging of the temple platform. The size and shape of the previous platform are not known and probably will never be known while the present Ḥaram stands. The east hill (Josephus's "third hill") was arched, sloping down on the east to the Kidron, on the west to the Central Valley (Josephus's Tyropoeon Valley), and on the northeast to St. Anne's Valley, which ran diagonally (NW-SE), joining the Kidron somewhere around the Golden Gate of the present wall. Between the third hill and the City of David there was apparently a shallow depression or valley. Herod filled the area on the northeast (St. Anne's Valley) and on the southwest (the Tyropoeon) and raised the level of the temple platform to that of its highest point, "the Rock" under the Dome of the Rock. This enlarged platform was about twice the area of the preceding, and the filled areas were supported by retaining walls built of huge "Herodian" blocks of limestone.

The southern width was 900 *pódes*, the western length 1550 *pódes*, the northern width 1000 *pódes*, and the eastern length 1500 *pódes*, with the Herodian *poús* ("foot") equal to 0.31 m. (1.017 ft.). These figures were obtained by calculating the *poús* from a known measurement and applying the result to the entire platform; since the figures are all integers in multiples of 50 or 100, it is reasonable to assume that this is the original plan (cf. R. Grafmann, *IEJ*, 20 [1970], 60-66). Converting these figures to more familiar forms yields the following: 279 m., 480.5 m., 310 m., and 465 m. The Herodian foot is approximately equal to the Greek foot of the period as well as the later Byzantine foot of 30.8 cm. found beneath an inscription near Bethlehem (cf. F.-M. Abel, *RB*, 35 [1926], 284-88) and two-thirds of the small cubit of 46.5 cm. (18.3 in.).

Excavations carried out along the south wall and the southern part of the west wall have uncovered the Herodian masonry to bedrock. Robinson's Arch, which before the excavations stood only a few feet above ground level, springs from the eighteenth course above the foundation, and the street level in the 1st cent. was at the seventh course of stones. Under the street was a huge drain. The first seven courses had large protruding bosses, but above ground the bosses were finely combed, and only a little higher than the drafted margins.

If we assume that the Dome of the Rock stands over the original site of the altar (which obviously cannot be proved), the temple was located W of that point, facing east and surrounded by courts or enclosures. "Temple" in the NT translates two Greek words. The *hierón* was the entire sacred area, and the *naós* was the temple itself. Priests, Israelite men, Israelite women, and Gentiles approached the *naós* in their respective courts (the Court of the Gentiles being outermost), but only the high priest could enter it. Thus, e.g., when Matthew says that Jesus "entered the temple of God and drove out all who sold and bought in the temple" (21:12), it means that He entered the *hierón*, the sacred area, but not the *naós*, the temple itself. The Mishnah distinguishes between "the Temple Mount" and "the Temple Court" (Mish. *Middoth* i.1-4; ii.1-6). For further description, *see* TEMPLE.

At the northwest corner of the temple area, where the Hasmoneans had built the Baris, Herod rebuilt it and named it Antonia (cf. Josephus *BJ* i.3.3 [75]; i.5.4 [118]). Formerly it was portrayed as having four huge towers and extending over an area that included the northwest part of the Ḥaram and the convent of Notre Dame de Sion on the opposite side of the Via Dolorosa. The excavations of P. Benoit have severely restricted this to a portion adjoining the Ḥaram, probably having four small corner towers and a larger central tower (cf. P. Benoit, *HTR*, 64 [1971], 135-167; "The Archaeological Reconstruction of the Antonia Fortress," in *Jerusalem Revealed*, pp. 87-89). Mazar's excavations on the south wall have uncovered the Hulda Gates: a double gate toward the west and a triple gate toward the east. These led to tunnels under the southern basilica that opened in the Court of the Gentiles.

Herod also enlarged the water supply of Jerusalem. Since it is inconceivable that the city could have existed with only one spring, considerable development must have occurred at earlier times. At any rate, Herod and the Romans developed systems of aqueducts, built pools and cisterns, and made other improvements. These include the sheep pools in Bezetha, the area N of the temple mount, Strouthion Pool near Antonia, Birket Israel at the northeast end of the Ḥaram, the Pool of the Towers (called Amygdalon by Josephus, possibly corrupted from Heb. *hammigdālîm*), which was fed by an aqueduct from the Mamilla pool to the northwest, the Serpent's Pool (Birket

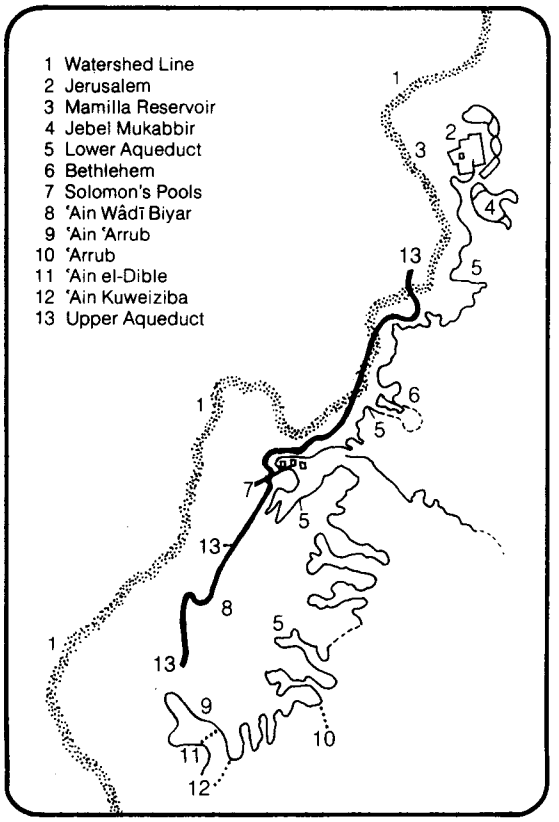
es-Sultan), also fed by aqueduct from Mamilla, and repair of Solomon's Pools and the aqueduct from S of Bethlehem to the temple area. The aqueduct to the temple area, which fed a number of underground cisterns, was repaired by Pilate.

The 1969 study of the aqueducts presented by A. Mazar ("The Aqueducts of Jerusalem," in *Jerusalem Revealed*, pp. 79-84) gives some idea of the extent of the system. Three areas are of concern here: Wâdī 'Arrub, 20 km. (12 mi.) SSW of Jerusalem; the Pools of Solomon, 4 km. (2.5 mi.) SW of Bethlehem and 12 km. (7.5 mi.) SSW of Jerusalem; and Jerusalem. For the waters to flow by gravity to the temple mount, all sources had to lie above that altitude — a fact known to the rabbis and incorporated into the Babylonian Talmud: "The spring of Etam is higher than the floor of the court [of the temple] 23 cubits" (*Yoma* 31a) — and the aquifer had to maintain a continuous descent. The temple mount is 735 m. (2411 ft.) above sea level. The springs in Wâdī 'Arrub ('Ain 'Arrub, 'Ain el-Dible, 'Ain Kuweiziba) are at 810 m. (2657 ft.). 'Ain Wâdī Biyar lies at 870 m. (2854 ft.). Solomon's Pools (three at slightly different levels) are around 780 m. (2559 ft.).

The 'Arrub aqueduct carries water from 'Ain Kuweiziba, 'Ain el-Dible, and 'Ain 'Arrub to the middle of Solomon's Pools, a direct distance of 8 km. (5 mi.), by a very tortuous route measuring 40 km. (25 mi.). The Biyar aqueduct is much straighter, carrying the waters of springs in Wâdī Biyar to Solomon's Pools, a distance of 4.7 km. (2.9 mi.). From 'Ain ed-Daraj this is one long tunnel, built by digging tens of shafts and connecting their bottoms, similar to the construction of the Persian *qanât*, an engineering method that the Romans put to good use. These shafts were dug into the soft limestone and, according to A. Flexer, the geologist who examined the tunnel, the principle combined an aquifer and an aquiclud, so that all of the ground waters along the route were gathered. The method is so effective that when the British undertook the Mandate (1918), they provided water for Jerusalem by refurbishing Solomon's Pools and clearing and repairing the Biyar aqueduct. The system is still in use. From Solomon's Pools to Jerusalem there were two aqueducts, the lower aqueduct leading to the temple mount, 21 km. (13 mi.) long, and the upper aqueduct, which generally follows the Bethlehem-Jerusalem road leading to Hezekiah's pools. The lower aqueduct tunneled beneath Bethlehem (400 m., 1312 ft.) and beneath Jebel Mukabbir (370 m., 1214 ft.) and entered the temple mount over Wilson's Arch. Some of the construction of this elaborate system can be dated to Herodian times or earlier, and some was accomplished under the Mamelukes.

Herod the Great died in 4 B.C., at most two years after the birth of Jesus (cf. Mt. 2:16). He was followed by Archelaus (4 B.C.-A.D. 6), and then Jerusalem was placed under a Roman procurator. The succeeding Herodians, with the exception of Agrippa I (A.D. 41-44), were not



rulers of Judea, but rather ethnarchs of various outlying regions. Agrippa II ruled over Chalcis, portions of Galilee and Perea, and a part of Judea. With his death *ca.* A.D. 100, the Herodian period ended.

H. Jerusalem in the Time of Christ and the Apostles. The NT data can be fitted into what is known of Herodian Jerusalem.

1. First Years. The life of Jesus as presented in the Gospels had little contact with Jerusalem. The baby Jesus was presented in the temple (Lk. 2:22-40), but He spent the subsequent years in Egypt and Nazareth. At the age of twelve, possibly for a bar-mitzvah ceremony (if, indeed, this custom was already observed at that date), He was again in the temple (vv. 41-50), and possibly made annual visits, of which we have no record, to the city. Until He was about thirty no other data exist except that He grew up in Nazareth and was known there as "the carpenter's son" and "the carpenter."

2. Early Ministry. After Jesus was baptized by John the Baptizer, He was tempted by Satan; one of these temptations took place in the Holy City "on the pinnacle of the temple" (Mt. 4:5; Lk. 4:9). It was generally held that this was the southeast corner of the temple platform overlooking the Kidron, but it is now believed to have been the southwest corner, because of the discovery of an inscribed stone marking the place of the blowing of the shofar. The Synoptics give no other information about Jesus in Jerusalem until the end of His earthly ministry. The Fourth Gospel, however, records an "early Judean" ministry, located in the temple (2:13-25; possibly 3:1-21). Later Jesus performed a miracle at the pool of Bethesda (Bethzatha) by the Sheep Gate (5:1-18). This site is now occupied by the Church of Saint Anne. The discourse that followed (5:19-47) may have taken place in the temple (i.e., the *hierón;* see III.A above). On the occasion of the Feast of Tabernacles, possibly in the second year of His ministry, He again went to Jerusalem (7:1-15) and taught in the temple. The Gospel account continues without any indication of a break through 10:40, and a time reference is given in 10:22, the Feast of Dedication. Tabernacles was observed in Tishri (Sept./Oct.) and Dedication in Kislev (Nov./Dec.). Between these two indicators, the healing of the blind man took place at the pool of Siloam (9:7). Hence it seems that John intended to show that Jesus continued in the Jerusalem area for two months or more, to set the stage, as it were, for His final appearance.

3. Approach to Jerusalem. The Gospels agree that the closing portion of Jesus' ministry took place in and around Jerusalem. In the long Lukan account (Lk. 9:56–18:14), Jesus is presented as approaching Jerusalem. This was the intention (9:51), but just when He reached the city is not clear. Was the parable of the Good Samaritan (10:25-37), e.g., told in the Jerusalem area? The visit to the home of Martha and Mary (10:38-42) certainly was, but what of the following teachings? The reference to the tower of Siloam (13:4) and the warning about Herod (v. 31) may have been uttered in the Jerusalem area, but v. 22 is set elsewhere. It is clear that Luke was working toward Jerusalem (v. 33), but he certainly was not attempting to give a detailed itinerary (cf. also 17:11; 18:31). The final approach was from Jericho (Lk. 18:35; 19:1, 11), and the raising of Lazarus must be placed in this period (Jn. 11:6, 18; cf. 11:46-53).

4. Passion Ministry. The triumphal entry (Mt. 21:1-11 par.; Jn. 12:12-19) proceeded from Bethany (just E of the Mt. of Olives) to Jerusalem. According to modern tradition, the procession wound its way down the mount between the Armenian Gethsemane and the Franciscan Gethsemane, but this cannot be proved. From there, it went up the west bank of the Kidron and through the Golden Gate (now walled up). Scholars, however, are inclined to trace the journey along the north wall, which would join the old Roman road from Jerusalem to Jericho. If so, the procession would have moved north from Bethany to pick up the Roman road, and then descended the Mt. of Olives just S of Mt. Scopus, entering the city by a gate in the north wall, possibly the gate called Tadi Gate. But this view is not convincing. The southern end of the temple enclosure was the larger, the portion by the royal portico where the merchants and the money changers were located. It is more reasonable to suppose that the procession wound round the temple mount, possibly by the Kidron but more likely by way of the Tyropoeon Valley, gathering a crowd all the way, and finally reaching the Huldah Gates. In the Synoptics the cleansing of the temple occurred the next day. Each night was spent at Bethany (cf. Mk. 11:12, 19; Lk. 21:37).

The Dominus Flevit Chapel traditionally marks where Jesus lamented over Jerusalem (Lk. 19:41-44), but the Gospel account is quite vague: "When he drew near and saw the city" (v. 41). Likewise it is not possible to locate the site of the cursing of the fig tree — in fact, one must wonder why such identifications are sought. Jesus taught daily in the temple (the *hierón*, the sacred area around the temple itself). Since the early Christians chose to meet in Solomon's Portico (Acts 3:11; see III.H.22 below), possibly they had an emotional bond to the place; was it there that Jesus taught and disputed with the Pharisees and Sadducees?

Jesus discoursed on the destruction of Jerusalem and the end of the age while He and His disciples were sitting on the Mt. of Olives opposite the temple (Mk. 13:3). It is not necessary to demand absolute conformity with the words "There will not be left here one stone upon another" (Mt. 24:2). The utter frustration of explorers and archeologists who have tried to reconstruct the temple from the ruins is sufficient testimony to the essential truth of the prophecy. Was Jesus talking of the destruction in A.D. 70, or of the end of the present age, or of the end of the Satan-dominated world? Just as the prophets did of old, He telescoped near and distant fulfillment into a single prophecy. For further discussion, see the commentaries.

5. Palace of Caiaphas (Mt. 26:3). Traditionally this has been located on the southwest hill, outside Zion Gate. Modern archeologists have found remains that could be the palace (cf. M. Broshi, "Excavations in the House of Caiaphas, Mount Zion," in *Jerusalem Revealed,* pp. 57-60), but the identification remains conjectural. The palace of Ananias (cf. Acts 23:2) is generally located near the Hasmonean palace on the eastern part of the southwest hill (*BJ* ii.17.6 [426]).

6. Upper Room (Mk. 14:15 par.). The traditional location is at the Coenaculum (Cenacle) near the tomb of David on Mt. Zion, S of the house of Caiaphas. All of these terms are questionable. Mt. Zion, as previously shown, was on the southeast hill (see III.C.1.b above). David's tomb, likewise, was in the City of David (see III.F.2.j above). Both identifications presently given are from the Middle Ages. The building in which the upper room is located is, architecturally, from Crusader times, with later reconstructions. From the Gospel narrative, however, we can locate the Last Supper on the west of the Kidron (cf. Mk. 14:13, 26), and, since security was a problem (Judas having already agreed to deliver Jesus to the authorities), a remote spot on the southwest hill would not be incredible. To locate it so close to the palace of Caiaphas, however, may raise a question of credibility.

7. Gethsemane (Mt. 26:36 par.). Gethsemane was located across the Kidron on the Mt. of Olives (Lk. 22:39;

Jn. 18:1). Tradition has identified three sites: the grotto of Gethsemane E of the Basilica of the Assumption, the Franciscan Garden of Gethsemane somewhat to the south, and the Russian Garden near the church of St. Mary Magdalen, somewhat higher on the mount SE of the garden. The grotto best preserves original features, but this does nothing to prove or disprove the location. The old, gnarled olive trees in the Franciscan Garden are presented to the tourist as the trees that were there when Jesus prayed, "Let this cup pass from me" (Mt. 26:39 par.), but since the Romans cut down every tree for hundreds of meters in the siege of Jerusalem, it is highly unlikely that these survived. A modified theory claims that newer trees were grafted on the ancient roots — but even this is hard to accept. *See* Plate 42.

8. Peter's Denial (Mt. 26:69-75 par.; Jn. 18:25-27). Jesus was taken by the guard from Gethsemane to Caiaphas the high priest (Mt. 26:57; Jn. 18:13 says "to Annas," the father-in-law of Caiaphas), "where the scribes and the elders had gathered" (Mt. 26:57). Was this an official meeting of the Sanhedrin in the Chamber of Hewn Stone (see III.G above)? The reference to the courtyard (Mt. 26:58 par.; Jn. 18:15) seems to indicate that it was the house of the high priest (see III.H.5 above). According to the Mishnah a trial of such nature could not be held at night, but the Sanhedrin ceased to exist after A.D. 70, and the laws of the Mishnah, whenever they do not reflect earlier laws, do not bind the earlier Sanhedrin. G. F. Moore's comment is worth noting: "The inquiry whether the trial of Jesus was 'legal,' i.e. whether it conformed to the rules in the Mishnah, is futile because it assumes that those rules represent the judicial procedure of the old Sanhedrin" (*Judaism,* II [1927], 187 n. 5). It is better to consider this a preliminary hearing to prepare the grounds for a trial, and not a trial. The denial of Peter, which occurred in connection with the event, is traditionally located at the Church of St. Peter in Gallicantu, on the southeastern slopes of the southwest hill. Leading down from the church to the valley is an old flight of stone steps, which some authorities consider Roman and suggest as the route by which Jesus and the disciples journeyed from the upper room to Gethsemane.

9. Before the Sanhedrin. The following morning (which was but a few hours later) "all the chief priests and the elders of the people took counsel against Jesus to put him to death" (Mt. 27:1). The language suggests that this group was the Sanhedrin. According to J. Jeremias, the Sanhedrin was an aristocratic senate, a "small close circle composed of the heads of Jerusalem families" (pp. 223, 225), and every description of them points to the conclusion that they were more concerned about their status and power than about their spiritual leadership. Their meeting place was the Chamber of Hewn Stone (see III.G above), which according to Mish. *Middoth* (v.4) was on the south side of the temple, but according to Josephus (*BJ* v.4.2 [144]) it was near the Xystus, which could still adjoin the southwest retaining wall of the temple. In vi.6.3 [354] it is said to be between the Akra and the Ophel, which according to some studies would place it on the southeast hill S of the temple platform, but according to others in the Tyropoeon or on the slope of the southwest hill.

10. Before Pilate: The Praetorium. (Mt. 27:2 par.; "the praetorium," Jn. 18:28). According to tradition, the governor (procurator), whose official residence was in Caesarea-by-the-Sea, made his headquarters in the Antonia when in Jerusalem. This view has been challenged by some scholars, partly because the trips from the hearing before the chief priests to the hearing before Pilate would require too much travel through crowded city streets and therefore provide opportunity for rioting. A number of scholars, therefore, incline to the view that when in Jerusalem the Roman procurator made his official residence in the Herodian palace (cf. P. Benoit, "The Archaeological Reconstruction of the Antonia Fortress," in *Jerusalem Revealed,* p. 87; cf. Philo *De legatione ad Gaium* 38). This change also involves the location of the "Pavement" (Gk. *lithóstrōtos* [Gabbatha], where Pilate pronounced judgment on Jesus [Jn. 19:13]; part under the convent of the Dames de Sion), the Ecce Homo Arch, and the Via Dolorosa, for the journey to Calvary would have been on the northwest side of the city.

The theory of P. Benoit raises a few questions. The biblical account, whether one uses the Synoptic or the Johannine record, involves a crowd. No biblical basis exists for supposing that either the high priests or the Romans were avoiding the people. The release of Barabbas was a token gesture to the crowd (Mt. 27:15). Pilate's scourging of Jesus was a weakling's way of trying to satisfy the crowd's thirst for blood, and then an attempt to evade personal responsibility (Jn. 19:1-16). At Passover the entire city was crowded, but the one place in the city where crowds would have been most susceptible to psychological manipulation was in the shadow of the temple — which is precisely where Antonia was located. This observation does not, of course, constitute proof. It is simply a factor that must be taken into consideration. P. Benoit stated, "Josephus and Philo both testify that the Roman governors stayed there [Herod's palace] while in Jerusalem, and the Gospel's description would suit this site better than any other" (in *Jerusalem Revealed,* p. 87). The statements of Josephus and Philo will not bear that much weight, and the support that the Gospel accounts give to the Herodian palace location are questionable. It must be admitted, however, that the arch inside the convent of the Dames de Sion is to be attributed to Hadrian in the 2nd cent. (A.D.), and the pavement in the same area is also most likely of the same period.

11. Akeldama (Mt. 27:3-10; Acts 1:18f.). Traditionally "Akeldama" or "the Field of Blood" is located in the southern part of the Hinnom Valley, on the southern slopes, where the Crusaders built a Church of St. Mary in 1143, which the Greeks rebuilt in 1874 and named for St. Onophrius. One tradition locates the conversation between the representatives of Sennacherib and Eliakim (2 K. 18:17f.; see III.D.3 above) on this spot (cf. E. Hoade, *Guide to the Holy Land* [7th ed. 1973], p. 303). (J. Jeremias, pp. 138-140, took the account of Judas as spurious, but brought out the point that by returning the money to the temple Judas was complying with a provision for revoking a sale that appears in Mish. *Arakhin* ix.4.)

12. Location of Herod Antipas (Lk. 23:6-12). In an effort to dodge responsibility, Pilate sent Jesus to Herod. At that time there was no Jewish king over Judea. Herod Antipas was tetrarch of Galilee (Lk. 3:1; Josephus *BJ* ii.6.3 [94f.]; *Ant.* xii.11.4 [188]) and was in Jerusalem only for Passover (Lk. 23:7). He should have had no jurisdiction in the case — but Pilate was obviously desperate. The concern here is the location of Herod in Jerusalem. If the high priest was occupying the Hasmonean palace (not proved), Herod would not have been there. If Pilate was occupying the Herodian palace (also not proved), Herod Antipas would not have been there, for Pilate "sent him [Jesus] over to Herod" (23:7). On one map there is a "Lower Palace" of Herod next to the Hasmonean palace, as well as "Herod's Upper Palace" near the citadel (*Student Map Manual* [1979], 14-2), but there appears to be no confirmation of this. Since Herod was accompanied by soldiers (v. 11), the location must have been one of the pal-

aces, but identification of the site is at present not possible.

13. Stations of the Cross (Mk. 15:21; etc.). The pilgrim to Jerusalem is shown fourteen Stations of the Cross, traditional locations of places where Jesus stopped or was stationed as He moved from the judgment to Calvary (cf. Hoade, *Guide*, pp. 195-212). At present, there is no objective support for any of these locations. Some of them are quite attractive and can produce an emotional or spiritual effect.

14. Golgotha (Calvary) (Mt. 27:33 par.; Jn. 19:17). For many decades the discussion of the location of Calvary has been heated and often bitter. Emotionalism has too often replaced scholarly objectivity. According to a Roman Catholic theologian, the identification of the Church of the Holy Sepulchre with the place of the crucifixion is not *de fide*, i.e., it is not required as an item of faith. But Catholic scholars have sometimes given the appearance of defending the faith when defending the site. Protestants, on the other hand, have often opposed this site simply because it is supported by Catholics.

The argument of primary consideration involved the location of the wall, for Calvary was outside the city (He. 13:12; cf. Mt. 28:11; Jn. 19:20), and if the site of the Church of the Holy Sepulchre was then inside the wall, that church cannot mark the authentic site. K. Kenyon's excavations demonstrated, on the basis of a quarry (which, in her view, must have been outside the city), that the church's site was outside the city (*Jerusalem*, pp. 153f.; this supersedes her article in *HDB* [rev. one-vol. ed. 1963], p. 475, where she came to a different conclusion). The history of the site must be considered. When Hadrian sought to wipe out every trace of Jerusalem and establish a new city, Aelia Capitolina (see III.H.32 below), he built a temple of Venus on the place where Christians marked the sepulchre (Eusebius *Vita Constantini* 3.26). When Constantine declared Jerusalem a Christian city (A.D. 325), the temple was destroyed and a basilica was erected on the site (A.D. 335, Eusebius *op.cit.* 3.26-32). The Bordeaux Pilgrim (A.D. 333) also described the church (quoted in *LAP* [2nd ed. 1959], p. 528). Excavations in and around the church confirm the location of Constantine's building (cf. B. Mazar, *Mountain*, pp. 245f.; C. Coüasnon, *The Church of the Holy Sepulchre in Jerusalem* [1974]).

15. Gordon's Calvary and Garden Tomb. A hill near the modern bus terminal close to Damascus Gate was identified as "the place of the skull" (Mt. 27:33 par.) by O. Thenius in 1842. His sole reason, it seems, was that the hill looked like a skull. When General C. Gordon, later of Khartoum fame, visited Jerusalem in 1883-1884, he declared this to be Calvary. His reasons are curious, indeed (originally published in *PEQ* [1885], reprinted in J. Wilkinson, *Jerusalem as Jesus Knew It* [1978], pp. 198-200; for an interesting discussion, see J. Simons, pp. 287-290). Near Gordon's Calvary is a garden with a tomb which had been discovered earlier, but which came to be known as "Gordon's Tomb," later "the Garden Tomb." The tomb may be from the 2nd cent. or later; it certainly has no ancient tradition. Nevertheless, it has become a touchstone of faith to many sincere Protestants. (Cf. L.-H. Vincent, *RB*, 34 [1925], 401f.; E. T. Richmond, *Sites of the Crucifixion and the Resurrection* [1934].)

16. "Galilee." After the Resurrection, an angel told the women who visited the tomb, "He is going before you to Galilee" (Mt. 28:7 par.). Since the Gospel record has no place for a visit to Galilee at that time, some have sought a site of this name near Jerusalem. According to one view, visitors to Jerusalem on the occasion of the feasts, having traveled together, often made their temporary residence together. Those from Galilee, it is suggested, stayed on the Mt. of Olives, near Bethany, and this was called "Galilee." No historical support for the suggestion has been offered. Jeremias simply said, "We may presume that the quarters for Galilean pilgrims were to the east of the city" (p. 62). Hoade located the site at Viri Galilee, the residence of the Greek Orthodox Patriarch (*Guide*, p. 306).

17. Place of Appearance to the Eleven (Jn. 20:19-25). Tradition locates the appearance to the Eleven in the upper room, but this does not have scriptural support, although some claim to find such in Acts 1:13.

18. Place of the Ascension (cf. Lk. 24:50f.; Acts 1:9-12). Tradition locates the Ascension at the Chapel of the Ascension on the top of the Mt. of Olives. The building is Crusader with a cupola added by Moslems, and inside is a stone slab imprinted with the reputed footprints of Jesus. Luke, however, records that "he led them out as far as Bethany" (24:50), and Acts indicates that it was a sabbath day's journey (2000 cubits, approximately 1 km. or 2/3 mi.) away.

19. Upper Room of Disciples (Acts 1:13). The room where the disciples stayed after the Ascension is called "the upper room," but whether it is the same as the room where the Last Supper was held is not specified. In addition to the Eleven there were "the women and Mary the mother of Jesus, and . . . his brothers" (1:14). If the next verse is to be considered part of the same account, "about a hundred and twenty" were present (1:15).

20. Pentecost (Acts 2:1). No location is given. The disciples were "in one place" (2:1), and after the glossolalial phenomenon Peter addressed the crowd that had assembled. Speculation sometimes locates the event in the temple court, possibly at Solomon's Portico. Where the baptism of the three thousand (2:41) took place is entirely a matter of speculation.

21. Gate Beautiful (Acts 3:2). The followers of Jesus attended the temple together daily (2:46). A miracle took place at "that gate of the temple which is called Beautiful" (3:2), the ornate gate on the east of the Court of the Women, separating it from the Court of the Gentiles; in effect, it was the main entrance for those wishing to approach the temple.

22. Solomon's Portico (Acts 3:11; 5:12; Jn. 10:23). The four sides of the temple platform (the *hierón* or "mountain of the house") were surrounded by colonnaded stoas, of which the eastern was known as "Solomon's" and the southern as "Royal" (*Ant.* xv.11.5 [411]; xx.9.7 [220f.]). Josephus apparently believed that the east portico remained from Solomon's temple, but this is contradicted not only by the structure itself but also by Josephus's own testimony concerning the Herodian expansion of the temple platform. It would seem, from the several Scripture references, that Jesus and later His disciples made the east portico their place of worship and teaching (cf. Acts 5:12f.).

23. Synagogue of the Freedmen (Acts 6:9). According to one tradition there were 480 synagogues in Jerusalem when it was destroyed in A.D. 70 (T.P. *Megillah* 73d). The "freedmen" were Jews whom Pompey had taken captive to Rome and later freed. Those who returned to Jerusalem established a synagogue. Weill discovered the ruins of a synagogue at the southern end of the southeast hill (Ophel); among the remains was a stone inscribed by Theodotus, who had restored the synagogue. It was built or rebuilt *ca.* A.D. 65, possibly on the location of the Synagogue of the Freedmen, as indicated on some maps. The connection lacks solid proof (cf. Simons, pp. 75f.). *See* FREEDMEN, SYNAGOGUE OF THE.

24. St. Stephen's Gate (cf. Acts 7:58–8:1). The gate in the east wall, known as St. Stephen's Gate, St. Mary's Gate, and Lions' Gate, is shown to tourists as the place

where Stephen was stoned to death. The identification as St. Stephen's Gate is late, however, for when the Basilica of St. Stephen was erected on the north side of the city, the Nablus Gate, now known as the Damascus Gate, was the traditional site (cf. Simons, p. 14 n. 4).

25. House of Mary the Mother of Mark (Acts 12:12). Since this was the location of "many" who were gathered for prayer, some have identified it with the location of the "upper room" (see III.H.6 above). The site is unknown but is shown on some maps on the southwest hill not far from the Hasmonean palace. "Herod the king" of 12:1 was Herod Agrippa I, who was given the title of "king" by Caligula and ruled A.D. 41-44. Passover (14 Nisan) in A.D. 44 was May 1. Peter had probably been imprisoned in Antonia. For a fuller account see W. S. LaSor, *Church Alive! An Exposition of Acts* (1972), pp. 174-183.

26. Paul's Arrest in the Temple (Acts 21:17-36). Paul and Luke, returning from the third mission, were lodged in the house of Mnason of Cyprus (v. 16), location unknown. Paul's meeting with James and all the elders likewise was at an unspecified location. It is unlikely that at that date the Christians were still meeting in Solomon's Portico. Paul was to sponsor some men who had taken a vow, and for this he went into the temple (v. 26) — meaning, of course, the *hierón*, the enclosure, clearly beyond the balustrade with the signs forbidding Gentiles to go any closer to the temple, since he was accused of taking "Greeks" into the temple (vv. 28f.). The mob dragged Paul out of the temple, and the tribune of the cohort was informed of the ensuing riot. The charge that Paul had taken Gentiles into the "Court of Israel" was a capital offense; hence Paul was arrested and taken to Antonia. Two of the notices that were attached to the barricade surrounding the Court of Israel have been found, one in p. 378; Josephus *Ant.* xx.9.2 [205]). Gamaliel (22:3), under whom Paul studied, was the Rabban Gamliel I, who was prominent in the first generation of the Tanna'im (cf. C. G. Montefiore and H. Loewe, *A Rabbinic Anthology* [repr. 1974], pp. 695f.), probably *ca.* A.D. 30-60.

29. James the Bishop of Jerusalem (Acts 15:13; Gal. 2:9; cf. Jas. 1:1; Jude 1). The leadership of James in the Jerusalem church is indicated by his position in the Jerusalem Conference (Acts 15) and by his priority over Peter and John (Gal. 2:9). He came to be known as "James the Just," and his death in A.D. 62 by stoning is recorded in Josephus (*Ant.* xx.9.1 [200]). Both Josephus and Paul (Gal. 1:19) refer to him as "James the brother of Jesus" (cf. Mt. 13:55; *see* BROTHERS OF THE LORD). Ananus, the high priest responsible for James's death, was deposed after a tenure of only three months (*Ant.* xx.9.1 [203]). According to Hegesippus (quoted in Eusebius, *HE* ii.23.11-18), James was thrown from the pinnacle of the temple, stoned, and clubbed to death with a fuller's club.

30. Population of Jerusalem. Estimates of the population of Jerusalem in the 1st cent. A.D. vary. The extreme figure, taken from Talmudic sources, is about twelve million (cf. Jeremias, p. 78). Josephus gave three million (*BJ* ii.14.3 [280]) or 2,700,000 (vi.9.3 [425]). These figures are based on the number of sacrificial animals at the time of Passover, averaging ten persons per animal. Josephus also gave the figures of those taken prisoner (97,000) and those killed (1,100,000) during the siege (vi.9.3 [420]). Jeremias, working from the available area in the temple for those offering sacrifices, arrived at a figure of 180,000, of which about 55,000 were inhabitants of Jerusalem and 125,000 were pilgrims (pp. 79-83). Or again, working from the area of the city and a density of 160 persons per acre, he arrived at a figure of 55,000 to 95,000 for the population of

the offensive was launched. The Jewish forces were under Simon bar-Giora and Yohanan of Gush-Halab (John of Gischala). The Romans breached the third wall on the west and then the second wall, but their attempt to take Antonia failed. Titus thereupon decided on a siege, and a circumvallation was thrown up, according to Josephus almost 8 km. (5 mi.) long, built in three days (*BJ* v.12.1f. [491-511]). According to some scholars, the "third wall" of Sukenik and Mayer was part of this circumvallation (but see S. Ben-Arieh, "The 'Third Wall' of Jerusalem," in *Jerusalem Revealed*, pp. 60-62). The horrors of the six-month siege are graphically told by Josephus (*BJ* v.12.3 [512-18]). Antonia was taken, and the Jews barricaded themselves in the temple. On 9 Ab (Aug. 5, A.D. 70) the temple was burned and the Roman soldiers carried out a campaign of slaughter along the entire east ridge. The Jews made their last stand in Herod's palace but the end was inevitable. Titus ordered the entire city razed to the ground except for the three large towers at the northwest corner. Many Jews were executed, others were carried off as slaves, the Tenth Legion was quartered in Jerusalem, and Titus held a triumphal procession in Rome in which he displayed the golden candelabra from the temple. The Arch of Titus in Rome was built to commemorate the triumph and on one of its panels is carved in high relief the scene of his soldiers carrying the candlestand.

J. Destruction of Jerusalem (A.D. 135). The Christians had fled from Jerusalem in 66, basing their action, it is said, on the Lord's words in Mt. 24:15f. They located at Pella and returned to Jerusalem later. A Jewish center of learning was established at Yavneh (Jamnia) under the leadership of Rabban Johanan ben Zakkai. The next sixty years were rather uneventful. But when the emperor Hadrian visited the province in A.D. 130 and sensed the feeling of revolt still strong in the hearts of the Jews, he decided to crush it once for all. The rigid demands he imposed touched off the War of Freedom led by Ben-Koziba (Bar Cochba) in 132. Once again Jewish coinage was minted, with years 1 2, and 3 of the Liberation appearing on the coins. The Roman troops, led by Julius Severus, triumphed in 135. This time Hadrian made good his plan to wipe out Jewish resistance in Jerusalem by destroying the city completely, pulling down every wall and plowing the entire area. Then he built a new city named Aelia Capitolina, with a main north-south street from the location of the Damascus Gate southward, a main east-west street about where David Street is today, and a forum at the intersection of the two. Streets were laid out on a grid, not following contours as previously. Walls were built, approximately where they are located today. A temple of Jupiter was built on the site of the temple and a temple of Venus on the site of Golgotha. The city had the usual Roman structures such as a theater, a hippodrome, public baths, and an aqueduct. No Jews were allowed in the city, or even within sight of it — a condition that prevailed until the 4th cent., and even then they were allowed to visit the city only on 9 Ab to bewail the destruction of the temple. Jesus' prophecy had become stark reality: Jerusalem was trodden down by the Gentiles (Lk. 21:22-24).

K. Subsequent History of Jerusalem. 1. Byzantine Period (A.D. 324-638). Constantine made Christianity the religion of the empire. His mother Queen Helena visited Jerusalem, located many sites, and erected buildings, including the Anastasia (later the Church of the Holy Sepulchre). The Madeba Map of Jerusalem was made toward the end of the 6th century. A brief Persian conquest lasted from 614 to 629.

2. Moslem Period (A.D. 638-1099). Caliph Omar entered Jerusalem in 638. The Dome of the Rock ("Mosque of Omar") was built by Caliph Abd el-Malik, 687-705, using Byzantine architects and craftsmen. The walls of the city had been rebuilt, following the earlier line along the Hinnom in the south. In 975 Caliph el-Aziz rebuilt the walls, reverting to the lines of Aelia Capitolina, approximately where they are today.

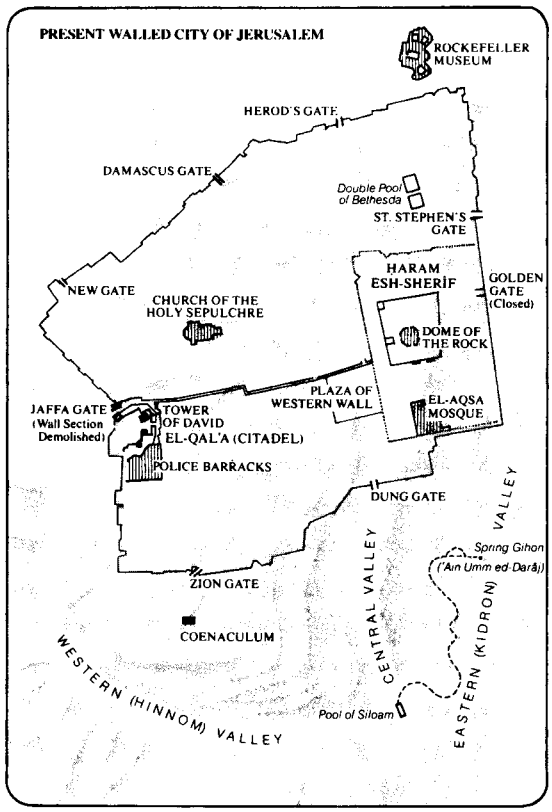
3. Crusader Period (A.D. 1099-1187). When Caliph Hakim ordered the destruction of Christian shrines in 1010, particularly when the Church of the Holy Sepulchre was destroyed, a major incentive for the Crusades was provided. This curious kind of Christianity left a mark on the religious world that has never been completely erased. Jews in the Holy Land suffered more from Crusaders than they had in 450 years of Moslem rule. Christian Arabs were slaughtered by Christian Crusaders as "infidels." The Latin (Christian) Kingdom of Jerusalem came to an end with the conquest by Salaḥ ed-Dîn (Saladin) in 1187. The unbelievable number of crusader fortresses, walls, and towers that spread across the Middle East is mute evidence of the power and wealth that was poured into this effort to wrest the Holy Land from the "infidels."

4. Mameluke Period (A.D. 1250-1517). Jerusalem was in Christian hands for brief periods (1229-1239 and 1243-1244). In 1244 Jerusalem was sacked by Khwarizmian Tatars, and in 1247 the city fell to Egypt under the Ayyubids. But in 1249, Aybak, a *mamluk* ("owned," i.e., a former slave), began a rule that was to last for nearly three centuries. The Mamelukes were peoples brought from Russia, the Caucasus, and central Asia by the caliphs of Baghdad to serve as soldier-slaves. They had gained great power, and Jerusalem came under that power. They rebuilt the walls, built *madrasas* (school-mosque compounds), and beautified the Dome of the Rock, the Ḥaram esh-Sherîf, and the city. Christians and Jews were tolerated, but taxation was excessive.

5. Ottoman-Turk Period (A.D. 1517-1917). In 1517 Selim I took Jerusalem. Suleiman I (the Magnificent) ruled from Constantinople (1520-1566) and established a well-organized empire. He erected the present walls of Jerusalem. The Damascus Gate was the pride of his structures in Jerusalem. He built or repaired aqueducts, pools, and fountains. Christians and Jews were given full freedom but had to pay a high head tax imposed on all non-Moslems, in return for which they were exempt from military service.

6. British Mandate (A.D. 1917-1948). When the Turks became allies of Germany in World War I, the British, under Allenby, occupied Palestine and it became a British Mandate. Constant strife between Jews and Arabs, aggravated by the influx of Jews driven from Europe by persecution and finally by the Nazi efforts at a "final solution" (the Holocaust), caused Britain to terminate the Mandate. On November 29, 1947, the United Nations established two separate states, one Jewish and the other Arab. When the Mandate ended on May 14, 1948, the State of Israel was proclaimed and Arab opposition broke out in a war in which Lebanon, Syria, Iraq, Transjordan, Egypt, and Saudi Arabia were allied against Israel. Armistice agreements were signed in the early months of 1949, leaving Jerusalem divided between the Jews and the Arabs, with the newly formed Hashemite Kingdom of Jordan controlling the Old City and Israel controlling the western part of the city outside the walls.

7. State of Israel (A.D. 1948–). The State of Israel was proclaimed on May 14, 1948, and on Dec. 13, 1949, Jerusalem was declared its capital -- a claim not recognized by a number of nations. On June 5, 1967, Jordan shelled the new city and the Six Day War began. When it ended, all of Jerusalem was in Israeli control. The area in front of the Western Wall (the Wailing Wall) was cleared and excavated to create a worship area. The old Jewish Quarter in the Old City was cleared of rubble and reconstruction



began. Archeological excavations were conducted in and around the Old City. The Dome of the Rock and the Ḥaram are open to all, including Arabs of all Arab states, but pilgrims from Arab nations are rarely present, due to political and emotional forces. Christian antiquities, particularly the Church of the Holy Sepulchre, are undergoing extensive repair and beautification.

IV. Jerusalem in Eschatology.–ESCHATOLOGY is a complex subject, beset with many difficulties of interpretation that are best considered elsewhere. Here the concern is simply to note certain truths in the main outline, without attempting to fit them into a system or to use them to preview history.

A. Location of the Throne of God's Great King. From the time that it was taken by David for his throne, Jerusalem has been both a reality and an ideal. As a reality, it can be sinful, apostate, abominable, subject to God's wrath, besieged by enemies, and finally destroyed. "I will send a fire upon Judah, and it shall devour the strongholds of Jerusalem," says the Lord (Am. 2:5). "Zion shall be plowed as a field; Jerusalem shall become a heap of ruins, and the mountain of the house a wooded height" (Mic. 4:1; cf. Isa. 2:2). "And when your people say, 'Why has the Lord our God done all these things to us?' you shall say to them, 'As you have forsaken me and served foreign gods in your land, so you shall serve strangers in a land that is not yours'" (Jer. 5:19). "They will fall by the edge of the sword, and be led captive among all nations; and Jerusalem will be trodden down by the Gentiles, until the times of the Gentiles are fulfilled" (Lk. 21:24).

Nevertheless, Jerusalem remains the hope of the world. "I have set my king on Zion, my holy hill," says the Lord (Ps. 2:6). "Great is the Lord and greatly to be praised in the city of our God! His holy mountain, beautiful in elevation, is the joy of all the earth, Mount Zion, in the far north, the city of the great King" (48:1f.). "Come, let us go up to the mountain of the Lord, to the house of the God of Jacob; that he may teach us his ways and that we may walk in his paths. For out of Zion shall go forth the law, and the word of the Lord from Jerusalem" (Isa. 2:3; cf. Mic. 4:1-3). Jerusalem is to be the seat of government of the wonderful counselor, the prince of peace, of whom alone it could be said, "Of the increase of his government and of peace there will be no end, upon the throne of David, and over his kingdom, to establish it, and to uphold it with justice and with righteousness from this time forth and for evermore" (Isa. 9:7). "Rejoice greatly, O daughter of Zion! Shout aloud, O daughter of Jerusalem! Lo, your king comes to you; triumphant and victorious is he" (Zec. 9:9). *See* Plate 35.

No matter how evil the king, no matter how sinful the people, the word of the Lord to His prophets was never a word of despair, never a message that He had given up His original plan. Through His chosen people He will work out His redemptive plan. Through His chosen king He will rule the nations in righteousness and peace.

B. Center of a Cosmic Struggle. Jerusalem is not simply the capital of a kingdom that must fight against other kingdoms of the world for survival. It is the city of God, and there is a cosmic, satanic opposition against God and against His redemptive purpose. A clear doctrine about the satanic is rarely expressed although greatly needed in the present age. Paul said it well: "For we are not contending against flesh and blood, but against the principalities, against the powers, against the world rulers of this present darkness, against the spiritual hosts of wickedness in the heavenly places" (Eph. 6:12). Ezekiel foretold the days when the Lord will restore His people to their own land (Ezk. 36:28), when by His spirit He will make His dead people live again (37:11), take them from the nations and bring them to the mountains of Israel, and place one king, His servant David, over them (vv. 21f., 24).

But these restorations will not ultimately solve the problem, for opposition to God's plan and His people remains. Ezekiel portrays the opposition as Gog of the land of Magog (Ezk. 38:1) who will go against these regathered people on the mountains of Israel (v. 8). Ezekiel makes clear that this will be no ordinary war, for this time God will not call upon Egyptians or Assyrians or Babylonians to do His work. He Himself will destroy Gog and his satanic forces (vv. 21-23). "I will set my glory among the nations; and all the nations shall see my judgment which I have executed, and my hand which I have laid on them," says the Lord (39:21). The author of the book of Revelation uses the same figure. After portraying war in heaven (Rev. 12:7) and the defeat of the deceiver of the whole world (v. 9), the revelator sees a struggle on earth (v. 13), but on Mt. Zion stands the Lamb with myriads of His own (14:1). Even after the song of triumph (19:1-10), however, there is still a satanic opponent to be destroyed. Satan is loosed from prison and enlists by deception the forces of Gog and Magog (20:7f.). "But fire came down from heaven and consumed them" (v. 9), and the devil and Death and Hades were thrown into the lake of fire (vv. 10, 14).

C. Perfect and Eternal Dwelling Place of God. In Ezekiel's temple vision, which he carefully dated, 10 Nisan of the fourteenth year after Jerusalem was captured (= Apr. 28, 575 B.C.), the prophet saw the new temple (cf. Ezk. 40:1-4). Much of the imagery is difficult to understand, but the message is clear: "The name of the city henceforth shall be, The Lord is there" (48:35).

The book of Revelation closes with a vision of the new Jerusalem, set in the new heaven and the new earth, "coming down out of heaven from God" (Rev. 21:2). The

writer heard a great voice from the throne saying, "Behold, the dwelling of God is with men" (v. 3). Death, sorrow, and pain are no more, as the prophets of old foretold, "for the former things have passed away" (v. 4). The holy city hanging down from heaven like a splendid satellite has the glory of God, which is radiant like a rare jasper, clear as crystal (vv. 10f.). It has walls and gates; the gates bear the names of the twelve tribes of Israel and the foundations bear the names of the twelve apostles, for there is no longer any division of the people of God (vv. 22, 24). The gates shall never be shut (21:25; 22:5), either to keep out the enemy — for the last enemy has been destroyed and nothing unclean shall enter it, nor anyone who practices abomination or falsehood (21:23-27) — or to keep in the citizens, for the Ruler is not of this world. John saw no temple in the new Jerusalem, "for its temple is the Lord God the Almighty and the Lamb" (21:22). The temple made with hands was only a symbol of God's presence and could not, as Solomon recognized from the beginning, contain the eternal God (1 K. 8:27). What need is there for a symbol when God Himself dwells in the city? There is no need of the light of the sun or the moon, for the glory of the One who created the luminaries is the light and in that light shall the nations walk. The river of the water of life flows from the throne of God, and the tree of life grows on its banks, "and the leaves of the tree were for the healing of the nations" (22:1f.).

W. S. LASOR

JERUSALEM COUNCIL. *See* APOSTOLIC COUNCIL.

JERUSALEM, NEW. *See* JERUSALEM IV.C.

JERUSHA jə-rōō'shə [Heb. *y'rûšā'*–'possession']. In 2 K. 15:33, the same as Jerushah (Heb. *y'rûšâ*) of 2 Ch. 27:1, the mother of King Jotham of Judah. Zadok was her father's name; he may be the priest of 1 Ch. 6:12 (MT 5:38).

JESHAIAH jə-shā'yə, jə-shī'ə [Heb. *y'ša'yāhû* (**2, 3**), *y'ša'yâ* (**1, 4-6**)–'deliverance of Yahweh']; NEB ISAIAH.

1. AV JESAIAH. Son of Hananiah, and grandson of Zerubbabel, according to 1 Ch. 3:21.

2. A son of Jeduthun, and like him a temple musician; head of the family of that name (1 Ch. 25:3, 15).

3. A Levite, ancestor of Shelemoth, one of David's treasurers (1 Ch. 26:25).

4. [Gk. Apoc. *Iessias*]; AV JOSIAS; NEB JESSIAS. A descendant of Elam; he went with Ezra from Babylon to Jerusalem (Ezr. 8:7; 1 Esd. 8:33).

5. [Gk. Apoc. *Ôsaias*]; AV OSAIAS; NEB HOSAEAS. A descendant of Merari and contemporary of Ezra (Ezr. 8:19; 1 Esd. 8:48).

6. AV JESAIAH. A Benjaminite (Neh. 11:7).

D. F. ROBERTS

JESHANAH jesh'ə-nə, jə-shā'nə [Heb. *y'šānâ*–'old (city)'? (2 Ch. 13:19); *šēn* (1 S. 7:12)]. A city named with Bethel and Ephron (variant Ephrain) among the places taken by Abijah from Jeroboam (2 Ch. 13:19). Most authorities agree that this name should be read for *šēn* in 1 S. 7:12, as evidence from the versions (LXX *tēs palaías* < **hay'šānā*; Pesh. *yāšān*) and the geographical relation to Mizpah suggest. It is probably identical with the Isana of Josephus (*Ant.* xiv.15.12 [458]), where Antigonus's general Pappus had his headquarters. It is also probably to be identified with modern Burj el-Isaneh, about 5 km. (3 mi.) N of Jifneh (W. F. Albright, *BASOR*, 9 [Feb. 1923], 7).

On "Jeshanah Gate" (NEB Neh. 3:6; 12:39; RSV "Old Gate") *see* JERUSALEM III.F.2.a'.

J. E. H.

JESHARELAH jesh-ə-rē'lə [Heb. *y'šar'ēlâ*]; NEB ASARELAH. One of the group of Levitical musicians appointed to serve in temple worship in the time of David (1 Ch. 25:14). A variant form of the same name (Asharelah; AV, NEB, Asarelah) appears in 1 Ch. 25:2.

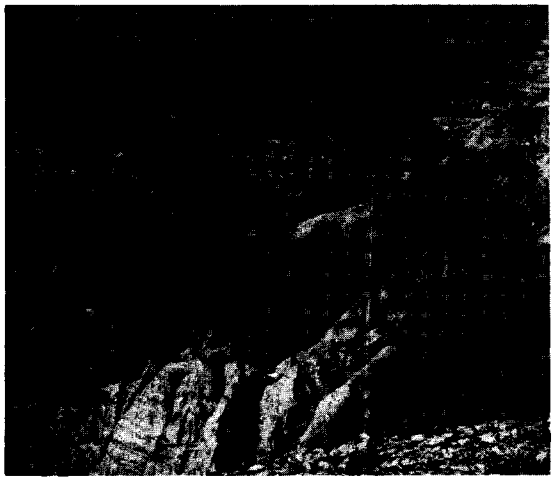
JESHEBEAB jə-sheb'ē-ab [Heb. *yešeb'āb*–meaning uncertain]. A Levite of the fourteenth course (1 Ch. 24:13). LXX A reads "Ishbaal" while LXX B omits it. If *ba'al* was an original element of the name, the change of form in the MT and the omission from LXX B are understandable.

JESHER jē'shûr [Heb. *yēšer* or *yešer*–'uprightness'(?)]. A son of Caleb (1 Ch. 2:18).

JESHIMON jə-shē'mən, jə-shī'mən [Heb. *hayy'šîmôn*–'the desert'].

1. In the AV of Nu. 21:20; 23:28, and the NEB of 23:28, the desert N of the Dead Sea and E of the Jordan River. Pisgah overlooked this area, a bare and sterile land, saturated with salt and very little vegetation. In the RSV, and the NEB of 21:20, the word is translated "the desert."

2. The barren eastern part of the Judean mountains stretching toward the Dead Sea. The Hill of Hachilah was on the edge of this desert (1 S. 23:19; 26:1, 3), and the Arabah was to its south (1 S. 23:24). This desolate region of waterless land and soft chalky hills with numerous caves has been throughout history a refuge for fugitives, outlaws, and those who withdrew from society. David was forced to hide himself in this area to escape the wrath of Saul and took refuge at the oasis of En-gedi. Centuries later, the people of Qumrân built their community at Wâdī



Precipitous valley cut by a wadi in the rugged area known as Jeshimon, W of the Dead Sea (D. Baly)

Qumrân and the oasis of ʿAin Feshkha. The followers of Bar Cochba found refuge in the Jeshimon and later the Christian monastics of Mar Saba retired to this area.

The word is often used as a common noun in referring to the desert of Sinai (Dt. 32:10; Ps. 78:40; 106:14; Isa. 43:19; etc.). J. F. PREWITT

JESHISHAI jə-shish'ī [Heb. *yᵉšîšay*]. A Gadite chief (1 Ch. 5:14).

JESHOHAIAH jesh-ə-hī'ə [Heb. *yᵉšôḥāyâ*]. A prince in Simeon (1 Ch. 4:36).

JESHUA, JESHUAH jesh'o͞o-ə, je-sho͞o'ə [Heb. *yēšû(a)ʿ*–'Yahweh is deliverance'; *see* JOSHUA].

1. Head of the ninth course of priests, and possibly of "the house of Jeshua" (1 Ch. 24:11, AV Jeshuah; Ezr. 2:36; Neh. 7:39; 1 Esd. 5:24).

2. A Levite of Hezekiah's time (2 Ch. 31:15).

3. The son of Jozadak who returned as high priest to Jerusalem after the Exile and supervised, with Zerubbabel the civil leader, the rebuilding of the temple and the restoration of worship (Ezr. 3:2, 8f.; 4:3; 5:2; Hag. 1:1, 12, 14; 2:2, 4; Sir. 49:11f. [his name appears as Joshua in Haggai and Zechariah]). He was a contemporary of the prophets Haggai and Zechariah, and the latter makes him the subject of two of his apocalyptic visions (3:1-10; 6:9-14). Some of his sons were among those who married "foreign women" after the return from captivity (Ezr. 10:18).

4. A man of Pahath-moab, some of whose descendants returned from Babylon to Jerusalem with Zerubbabel (Ezr. 2:6; Neh. 7:11), the same as Jesus in 1 Esd. 5:8.

5. Head of a Levitical house that had oversight of the workmen in the temple (Ezr. 2:40; 3:9; Neh. 7:43). He is mentioned again in Neh. 8:7 as taking part in explaining the Torah to the people, in 9:4f. (cf. 12:8) as leading in the worship, and in 10:9 (MT 10) as sealing the covenant; this Jeshua is called son of Azaniah (Neh. 10:9). To these references should be added probably Neh. 12:24 (NEB "Jeshua, Binnui, Kadmiel"). Perhaps Jozabad (Ezr. 8:33) is a "son" of this same Jeshua; cf. 1 Esd. 8:63, where the AV has Jesu. He is the same as Jessue (AV; NEB Jesue) in 1 Esd. 5:26.

6. Father of Ezer, a repairer of the wall (Neh. 3:19).

7. JOSHUA, son of Nun (Neh. 8:17).

D. F. ROBERTS J. E. H.

JESHUA jesh'o͞o-ə, je-sho͞o'ə [Heb. *yēšû(a)ʿ*]. A place occupied by the children of Judah after their return from captivity (Neh. 11:26), evidently, from the places named with it, in the extreme S of Judah. It may correspond to the Shema of Josh. 15:26, and possibly to the Sheba of 19:2. The site may be Khirbet Saʿwī, a ruin upon a prominent hill, Tell es-Saʿwī, 19 km. (12 mi.) ENE of Beer-sheba. The hill is surrounded by a wall of large blocks of stone.

JESHURUN jə-sho͞o'rən, jesh'ə-rən [Heb. *yᵉšurûn*–'upright one'; Dt. 32:15; 33:5, 26; Isa. 44:2]. The LXX translates it "the beloved one" (Gk. *ēgapēménos*, the pf. pass. part. of *agapáō*), and in Isa. 44:2 adds "Israel"; Vulg. has Lat. *dilectus* in Dt. 32:15, elsewhere *rectissimus*; Aq., Symm., Theod. have "upright." Most modern scholars regard it as a hypocorism from the name Israel (Heb. *yiśrāʾēl*), of which the first three consonants are almost the same. In Nu. 23:10 the term "the righteous" (*yᵉšārîm*) is supposed to contain a similar reference. The name occurs only in poetry. The poems in Deuteronomy in which it occurs belong properly to the 2nd millennium B.C. In 32:15 Jeshurun, the chosen of God, became apostate and was promised divine retribution for abandoning the covenant ideals (vv. 23-25). The latter are reflected in 33:5, 26, where at Sinai the Israelite tribes had acknowledged in a pledge of obedience the lordship of the covenant (cf. Ex. 24:3). Divine election is indicated in Isa. 44:2, where the LXX renders the name "beloved Israel." In the NT the term "beloved" was used both of Christ (Mt. 3:17; Mk. 1:11; Eph. 1:6, etc.) and of the primitive church (Col. 3:12; 1 Thess. 1:4; Jude 1; etc.), again implying divine election to spiritual mission in the world. D. F. ROBERTS

JESIAH jə-sī'ə (1 Ch. 23:20, AV). *See* ISSHIAH **2, 4.**

JESIMIEL jə-sim'i-əl [Heb. *yᵉšîmiʾēl*–'God establishes']. A prince of Simeon (1 Ch. 4:36).

JESSE jes'ē [Heb. *yišay*; Gk. *Iessai*]. Grandson of Boaz, son of Obed, and father of King David. A member of the tribe of Judah, he owned land S of Jerusalem. Later his principal significance was as David's father; the phrase "son of Jesse," applied to David by his opponents (cf. 1 S. 20:27ff.; 22:7-9; 25:10; 1 K. 12:16) carried ridicule and scorn, as though Jesse were of no account in Hebrew society.

In 1 S. 16:1-13 Jesse is described as "the Bethlehemite" to whom Samuel was sent in his search for a successor to King Saul, who already was becoming mentally deranged. Jesse does not seem to have been wealthy, for he was apparently unable to have all his sons present at one time, thus leaving unattended his herds and flocks. On the occasion of Samuel's visit, David, the youngest son, was responsible for tending the flocks; when finally he was summoned into Samuel's presence he was anointed as Saul's successor.

When Saul's mental condition deteriorated further, Jesse's youngest son was recommended as a skillful harpist whose playing would help to soothe the deranged king; 1 S. 16:18 describes David as embodying the qualities of the ideal Hebrew aristocrat. Although Jesse sent with David a gift for King Saul — a donkey load of bread, a skin of wine, and a kid (v. 20) — and permitted David to reside at the court, Saul's and others' references to Jesse from this period seem to have been mostly contemptuous (20:27ff.). Jesse's three oldest sons served under Saul against the Philistines; when Jesse sent David with supplies for them the boy became involved with the giant Goliath (17:12ff.).

When David was harassed by Saul he took his parents

to Moab for safety (1 S. 22:3f.); Jesse was an aged man at the time (cf. 1 S. 17:12). At his death Jesse had fathered eight sons — Eliab, Abinadab, Shimea (Shammah), Nethanel, Raddai, Ozem, Elihu, and David — and two daughters, Zeruiah and Abigail. In contrast with his contemporaries' reproach, the prophets honored Jesse as the "stump" from which the Messiah would come (Isa. 11:1; AV "stem"). For Paul (Rom. 15:12) the "root [NEB "Scion"] of Jesse" was a synonym for the Messiah. R. K. H.

JESTING. Used once in the RSV for the piel of *ṣāḥaq* (Gen. 19:14). Here it refers merely to playful joking. "Jesting" also occurs once in the AV for Gk. *eutrapelia* (Eph. 5:4; RSV "levity"). Aristotle uses the original in his *Ethics* iv.14 as an equivalent of "quick-witted," from its root meaning "something easily turned," adding that, since the majority of people love excessive jesting, the word is apt to be degraded. This is the case in Eph. 5:4, where it clearly has a flavor of the coarse or licentious.

JESUI jē'zōō-ī (Nu. 26:44, AV). *See* ISHVI.

JESUITES jē'zōō-īts (Nu. 26:44, AV). *See* ISHVI.

JESUS jē'zəs [Gk. *Iēsous* < Heb. *yᵉhôšu(a)ʿ*].

1. Joshua, the son of Nun (AV Acts 7:45; He. 4:8; cf. 1 Macc. 2:55; 2 Esd. 7:37).
2 and 3. High priest and Levite. *See* JESHUA 2 and 5.
4. Son of Sirach. *See* SIRACH I.
5. An ancestor of Jesus Christ (Lk. 3:29, AV Jose).
6. Jesus Christ. See the next two articles.
7. Jesus "called Justus" (Col. 4:11). *See* JESUS JUSTUS.

JESUS CHRIST [Gk. *Iēsous* < Heb. *yēšû(a)ʿ*–'savior'; Gk. *ho Christos*–'the anointed'].

I. Did Jesus Ever Live?
  A. Roman Witness
  B. Jewish Witness
II. Gospel History in the Light of Recent Study
III. Birth of Jesus
IV. An Outline of the Public Ministry of Jesus
V. Theological Significance of Jesus' Life

I. Did Jesus Ever Live?–The natural tendency may be to assume quite confidently that of course Jesus lived, for we have the witness of the Gospels and the continuing existence and influence of the Church that bears His name in the world. Nonetheless, now and again doubts have been cast upon the historical life of Jesus. This skepticism has taken various forms.

Over the last two hundred years or so, some skeptics have sought to explain the NT witness to Jesus and the rise of Christianity in terms of the Christ-myth theory. This view states that the story of Jesus is a piece of mythology, possessing no more substantial claims to historical fact than the old Greek or Norse stories of gods and heroes, and its basis is sought in the parallels, actual or legendary, to the Gospel records concerning Jesus. Sometimes these parallels are supposed to be comparable to the broad outline of the Gospel story; sometimes they refer to small details and isolated incidents. Thus, for instance, the account of His birth (it is claimed) may be paralleled from the traditions attached to the Buddha, Krishna, and Mithras. His miracles are set in comparison with those of Hellenistic "divine men," like the famous Apollonius of Tyana — an argument against the originality of Christianity that goes back to the first centuries of the Church, when the early skeptic Lucian tried to show that Jesus was but a pale reflection of Apollonius (see V. Taylor, *Formation of the Gospel Tradition* [2nd ed. 1935], pp. 127f.). His death and resurrection suggest to some minds a variant of the myth of the dying-and-rising god, so popular in the world of ancient pagan religion and represented in the cults of Attis, Adonis, Osiris, and Mithras.

Since these alleged analogies seem farfetched — and there is hardly a reputable scholar today who supports the legitimacy of these so-called parallels (G. A. Wells, *The Jesus of the Early Christians* [1971], being a solitary exception; see review in *Christian Graduate*, 25 [1972], 19) — recourse is made to some other possibilities. The most sensational of these is the reconstructed figure of the Teacher of Righteousness of the Qumrân community of the Dead Sea Scrolls. But the figure of the Teacher is altogether too shadowy and bloodless to have been the inspiration of the later followers. His ethical teachings as codified in the beliefs of the sect are scarcely up to the level of the Gospel records (*see* DEAD SEA SCROLLS II.I). That he was hung upon a tree — if indeed he died this way, at the hands of the Lion of Wrath — says nothing about the meaning of that death, while the supposition that he was raised in triumph is based on a dubious reading of the text (see G. Graystone, *The Scrolls and the Originality of Christ* [1958], pp. 73ff.).

These examples of the Christ-myth idea appeal to those who imagine that the origins of Christianity are obscure. They overlook the fact to which Acts 26:26 pays tribute, as Paul makes the public evidence of Christian origins the ground for the skeptic's acceptance: "These things were not done in a corner." And Peter adds his witness: "We have not followed cunningly devised fables" (2 Pet. 1:16). Those who doubt the historical validity of the Gospel records approach the documents with preconceived ideas, as a short list of some of the wilder specimens of speculation will show. Full details are given in F. C. Conybeare, *The Historical Christ* (1914) and Bruce, *Jesus and Christian Origins*.

Bertrand Russell leaves open the question of whether there was such a figure as Jesus of Nazareth as the Gospels portray Him. This negative attitude is shared by P. Graham, *The Jesus Hoax* (1974). But the question presses. Is it an open question about which reasonable doubt may be entertained? What is the verdict of history outside the Christian literature? Have we any independent testimony, uninfluenced by Christians, on which the unbiased historian may draw with certitude? A little independent evidence does exist. But a mass of data is unimportant here. Rather, the vital matter is evidence that is trustworthy and illuminating. It is the quality that counts.

Considering the contempt in which Roman society held the Jews and also the obscurity of Judea in the empire, it is not surprising that voluminous testimony to Our Lord's person is lacking. Yet some detail is given, and this must be accorded an important place.

A. Roman Witness. (1) Of Thallus the Samaritan, Julius Africanus writes, "Thallus, in the third book of his history, calls this darkness an eclipse of the sun, but in my opinion he is wrong." The allusion in question is to the preternatural darkness that accompanied the crucifixion of Jesus (Mk. 15:33 par.). A significant comment on this testimony is given by M. Goguel in his *Life of Jesus* (Eng. tr. 1933), p. 93: "This shows that this detail [of the darkness] was known in Rome, in the middle of the first century, in a circle near to the Imperial House. A small detail like this could not have been preserved and transmitted save within the setting of a narrative of the Passion." And thus a fragmentary allusion becomes sufficient to dispel the idea that Christ's story grew like a legend over the decades and centuries. Within twenty years or so of the actual event in the Gospels a secular writer is aware that a

phenomenal happening was reported in connection with the event of the Cross.

(2) Suetonius' famous words (*Claudius* 25) are an indirect witness: "Claudius expelled the Jews from Rome because of their continual quarrelling at the instigation of *Chrestus*." The last word is doubtful of interpretation, but it is likely that the name intended is *Christus* and that Jewish-Christian controversies are in mind. Compare Acts 18:2 for this edict of the emperor Claudius, which is a further piece of evidence of the historical setting of the Christian gospel.

(3) In his description of the fire of Rome in A.D. 64 in the reign of Nero Caesar, the historian Tacitus (*Ann.* XV.44) adds this note: "Christ from whom they [the Christians whom Nero accused of arson] took their name had been put to death as a punishment during the reign of Tiberius at the hands of one of our procurators, Pontius Pilate, and a most mischievous superstition thus checked for the moment, again broke out not only in Judaea, the first source of the evil, but even in Rome, where all things hideous and shameful from every part of the world find their centre and become popular." This testimony speaks for itself and by linking the names of Pilate and Tiberius (as in Lk. 3:1) firmly anchors Christianity in the historical stream.

(4) The Roman official Pliny was governor of the province Bithynia-Pontus in Asia Minor in A.D. 111-112. In one extant piece of his correspondence with the emperor Trajan (*Ep.* X.96) he relates some information about the church's worship and witness in that area. In particular, he describes how the Christian believers were in the habit of meeting "before dawn on a set day and singing alternate verses to Christ as to a God." This evidence sheds light on early Christian worship. We note simply the plain allusion to the practice of the cultic adoration of Christ (see further R. P. Martin, *Carmen Christi* [1967], pp. 1-9).

B. Jewish Witness. The fall of Jerusalem in A.D. 70 destroyed most of the Jewish writings that bear upon our theme; and after that date, with a bitter cleavage between Church and synagogue now established, the revived Judaism apparently kept a deliberate silence concerning the practices of Christians, now regarded as apostates. Occasional innuendoes are made, however. An example is the twelfth of the "Eighteen Benedictions," a set of synagogue prayers, petitions: "To slanderers let there be no hope, and let all workers of wickedness perish in a moment." For the first term in this extra prayer the authentic reading seems to be not "slanderers" — a general term for the synagogues' opponents — but the *Minim*, i.e., the heretics. If so, this would be a reference to the Jewish believers in the Messiah. The prayer may have been an effective means of detecting in the synagogue service such believers, who would not use the prayer lest they call down condemnation on their own heads.

From the mass of rabbinic allusions to Jesus in the Talmud J. Klausner (*Jesus of Nazareth* [1926], p. 46) compiles the following summary: "There are reliable statements to the effect that his name was Yeshua (Yeshu) of Nazareth; that he 'practiced sorcery' (i.e., performed miracles) and beguiled and led Israel astray; that he mocked at the words of the wise; that he expounded Scripture in the same manner as the Pharisees; that he had five disciples; that he said that he was not come to take aught away from the Law or to add to it; that he was hanged (crucified) as a false teacher and beguiler on the eve of the Passover which happened on a Sabbath; and that his disciples healed the sick in his name."

Much more interesting and controversial is this description by the Jewish historian Josephus (*Ant.* XVIII.3.3 [63f.]): "Now about this time arises Jesus, a wise man, if indeed he should be called a man. For he was a doer of marvellous deeds, a teacher of men who receive the truth with pleasure; and he won over to himself many Jews and many also of the Greek(s). He was the Christ. And when, on the indictment of the principal men among us, Pilate had sentenced him to the cross, those who had loved [or perhaps 'been content with'] him at the first did not cease; for he appeared to them on the third day alive again, the divine prophets having (fore)told these and ten thousand other wonderful things concerning him. And even now the tribe [or 'race'] of Christians, named after him, is not extinct." *See* JOSEPHUS, FLAVIUS.

It is true that this account in Josephus has been suspected as a Christian interpolation, although "it is difficult to imagine what sort of Christian could have deemed it worth his while to interpolate this cool, objective, patronizing, and faintly contemptuous paragraph into the text of Josephus" (T. W. Manson, *Studies in the Gospels and Epistles* [1962], pp. 18f.). Yet some textual doubts remain, and it is far from certain that Josephus penned a full confession of Jesus' messiahship. Nevertheless, we may grant that this *testimonium* is at least a witness that Jesus existed, was a wonder-worker who gathered followers, and paid the price for His novelties by death on a cross.

In fact, the common residuum of factual witness from the sources of Roman writers, rabbinic authorities, and Josephus, agrees in this simple, unvarnished summary. All our evidence adds up to the description, "a crucified false teacher." However inadequate this summary may be from a Christian standpoint, it at least focuses on the basic element in the gospel story, is not contradictory of it, and affirms the historical reality of Jesus as a first-century figure in Palestine.

II. Gospel History in the Light of Recent Study.—The modern study of the Gospels makes three widely shared assumptions.

(1) Source criticism, since the time of B. H. Streeter (*The Four Gospels* [1924]), has evaluated the chief literary sources of the Synoptic Gospels as "Mark, a hypothetical sayings-source labeled Q, special material in Matthew and special material in Luke." Recently doubt has been cast on the existence of Q as a written document (*see* Q article), and thus even more uncertainty is shown about complicated theories involving imponderables like Q, e.g., the proto-Luke hypothesis. The priority of Mark, although assailed, commands a wide acceptance, and recent challenges to the preliterary history of the Gospels as classically stated by Streeter have produced no substantial dislocation of the critical position.

(2) Form criticism, an attempt to probe beneath the surface of the canonical Gospels to discover the literary forms of the narratives and sayings of the individual sections that make up the records, is now an established tool in biblical research. The burning question is how far its (often) negative judgments on the historical worth of the material may be taken.

(3) Current debate on the "new quest of the historical Jesus" has highlighted the importance of historiography, and the consensus is that the Evangelists were not biographers or historians like von Ranke who describe "what exactly happened" in a disinterested and impartial way. They were not biographers, but evangelists, telling of the incursion of the divine into human life in the person of Jesus of Nazareth. By relating His life to His work, and that work to God's saving purposes in the hope of Israel, they were showing the achievement of the world's salvation. At heart, then, the Gospels are theological documents; they incorporate history, but it is interpreted his-

tory, which sets forth the fulfillment of God's redeeming motive and activity in Jesus, the Messiah and Lord.

Because these modern presuppositions lie at the center of the contemporary discussion of the life of Jesus, a survey of historical background is required. The place to begin is the work and influence of the European Life of Jesus School in the middle of the 19th century.

The aim of the Life of Jesus movement was clearly defined: it was to press back from the credal Christ to the Jesus of history. Albert Schweitzer, whose monumental book *The Quest of the Historical Jesus* chronicled the chief contributions of the *Leben-Jesu-Forschung*, expresses it thus: "They were eager to picture Him as truly and purely human, to strip from Him the robes of splendour with which he had been apparelled, and clothe him once more with the coarse garments in which He had walked in Galilee" (*Quest*, p. 4). This quotation shows that there were many motives that inspired the members of the Life of Jesus School. They had a genuine devotion to the humanity of Jesus, which they felt was obscured and overlaid by the Church's credal forms and by metaphysical doctrine. The Byzantine Christ in His transcendent majesty seemed remote and inhuman, and they were concerned lest this tendency to separate Jesus the man from the Christ of glory should result in Docetism. But they were equally alive to the danger of a revived Monarchianism which would exclude Jesus from the Godhead in the interest of stressing the unity of God. Precisely this peril appeared in the Harnackian theology, for which the quintessence of Christianity lies in the dictum: "The Gospel, as Jesus proclaimed it, has to do with the Father only and not with the Son" (*What is Christianity?* [Eng. tr. rev. ed. 1950], pp. 68f.).

Other motives may be detected. Strauss and the Mythical School had sought to show that Jesus was a legendary figure whose historicity was a debatable issue. The various "Lives of Jesus" asserted that He was, on the contrary, to be placed within the historical frame of the first-century world. Yet this insistence upon the historical Jesus invited the philosophical criticism that (as Lessing put it in his *Theological Writings*, III, 12) "accidental historical truths can never become proofs for the necessary truths of reason." Thus the historians of the life of Jesus were driven into the arms of "historicism," which admits of no unique cases.

Furthermore, biblical criticism in the mid-19th cent. was hospitable to the writings of these lives. Since the work of H. J. Holtzmann (*Die synoptischen Evangelien* [1863]) a high evaluation had been placed on Mark's Gospel as the first of the canonical Gospels; and it was assumed that this Gospel describes a purely human Jesus for whom no claims to divinity are made. There is no doubt, as Albert Schweitzer noted (*Quest*, pp. 204ff.), that Holtzmann's statement of the Markan hypothesis, i.e., that Mark's Gospel is the foundation document underlying the other Synoptics and contains a clear, factual, unembellished record of the life and public career of Jesus, had a tremendous influence in the second half of the 19th century. Holtzmann's vindication of Mark's priority and historicity held the field until the turn of the century, when powerful forces already at work assailed and destroyed it, at least for German scholarship.

Already in the 19th cent. the ground was being prepared for an assault on the Holtzmann doctrine, and more specifically on the generally accepted notion that a portrait of Jesus as He lived in Galilee and Jerusalem could be sketched by a careful and sympathetic drawing together of the Gospel data. Martin Kähler's *The So-called Historical Jesus and the Historic, Biblical Christ* (1892; Eng. tr. 1964) is a heated polemic against the historicism of his day that had produced the vagaries of the Life of Jesus portraits. Kähler objected that inevitably such an attempt at portraiture obscured the transcendental qualities of the biblical Christ. The living Christ is essentially the Christ of apostolic proclamation, accessible to us today in a spiritual encounter and not to be ferreted out of historical documents by psychological inquiry.

Many reasons (carefully noted by Carl E. Braaten in the introduction to his translation of Kähler's book) may be supplied for Kähler's about-face and antagonism to the historiographical methods and theological presuppositions of his day. Of central importance, however, was his conviction that the Gospels do not provide biographical data, giving us a window of access into the inner life of Jesus. They are "passion narratives with extended introductions" (to use Kähler's now celebrated phrase), containing the content of early Christian preaching and intended to awaken faith in Christ as Redeemer. The Gospels are, by design, theological documents, written from "faith to faith" (another now well-known sentence, which derives from Johannes Weiss), and serving an exclusively religious interest. The Christ they portray is the Christ of faith, the proclaimed Lord, whose encounter with His people is not at the mercy of historical investigation and systematic doubt. Only by insisting on the exact nature of our access to the "historic, biblical Christ" can we be delivered from the clutches of historical relativism (for which nothing in the past is absolutely certain) and be given an "invulnerable area" (Ger. *sturmfreies Gebiet*), unassailed and unassailable by historical inquiry. Kähler's discussion seriously questioned the current doctrine that Mark records plain, uninterpreted history which is capable of treatment by the methods of historical science and reveals to the impartial investigator Jesus as He was and is.

Influences at work in the early part of the 20th cent. developed the historical radicalism of Kähler.

(1) Wilhelm Wrede's book on the messianic secret in the Gospels (which first appeared in 1901) concluded that Mark's Gospel is not a record of unvarnished history, portraying Jesus as He really was, but a dogmatic treatise in which the doctrine of the messianic secret was imposed upon the materials by the Evangelist (*see* MARK, GOSPEL ACCORDING TO IV).

(2) K. L. Schmidt considered the "framework of the story of Jesus," to translate the title of his work, *Der Rahmen der Geschichte Jesu*; and by a form-critical analysis of the sections of the Gospel material he came to a startling verdict: "As a whole there is no life of Jesus in the sense of a developing biography, no chronological sketch of Jesus' history, but only pericopes [isolated paragraphs], which are put into a framework" (p. 317).

(3) The doctrine of *Sitz im Leben* (i.e., the principle that each section of the Gospel narrative may be suggestively placed in its historical context on the basis of its literary form and theological content) was taken by the early practitioners of the form-critical method a step beyond a purely literary exercise. From an analysis of the "types" or "forms" (Ger. *Gattungen*) of the literary materials of the Gospels into such categories as "miracle stories," "conflict stories," and biographical "tales," the form critics (or at least some of them) moved on to appraise the historical worth of the data. Thus, the historical value of the Synoptic incidents that appear as straightforward events of factual, episodic history is evaporated into whatever worth such hypothetical idealized reconstructions had for the post-Easter Church. The *Sitz im Leben Jesu* was transformed into the *Sitz im Leben der alten*

Kirche by a stroke of the form critics' pen, and Gospel history was subsumed under the ominous category of the theology of the community (*Gemeindetheologie*).

The name of Rudolf Bultmann occurs in this discussion as the author of the study *Jesus* (1926; Eng. tr. *Jesus and the Word,* 1934), based on his form-critical work *History of the Synoptic Tradition* (Eng. tr. 1963). These works may be taken as indicative of the effect of a radical form-critical approach to the Gospels' historical data. Emerging from Bultmann's literary analysis is the conclusion that the Jesus of the Gospels is the Christ of the apostolic experience. No historical foundation may legitimately be sought in the Synoptics — a judgment based on a twofold premise.

(1) Form-critically, it is impossible, Bultmann avers, to recapture Jesus as He moved in Galilee and Jerusalem and to know precisely what took place A.D. 30-33. The Gospels do not give us scientific biography, show any interest in Jesus' personality, nor offer a psychological study. There is no fascination with His charm, no window into His inner life. In Schweitzer's phrase, there is no estimate of the "inner and outward course of development in the life of Jesus." The Gospels accentuate not Jesus' personality, but His work, and that work is seen through the eyes of the later Church.

(2) From a theological point of view, the question "Can we know the Jesus of history as a figure of the past?" is answered in the negative. Even if it were possible to learn of the Jesus of history, it is illegitimate so to inquire, for faith can never be at the mercy of historical criticism and suspend its activity while the historians debate the issue, "Did it happen?" The person in whom the Christian faith confides is the risen Christ, living in the Church and present supremely in the ministry of preaching the kerygma. The Gospels perform the necessary function, not of directing faith to a past figure of whom certain historical values may be predicated, but of certifying that Jesus of Nazareth once embodied the Word of God in His existence in time. About this "Christ-event," i.e., the appearance of Jesus as an eschatological prophet of God who announced the imminent reign of God, nothing of *theological* significance is required to be known except that He once lived, taught, and died. The mere *Thatness* (That — Ger. *Dass* — He once existed) is sufficient; the character of Jesus (How — Ger. *Wie* — He acted) and the content of His message (What — Ger. *Was* — He said, in words that ruffled the air in Palestine long ago) are both beyond recovery and unnecessary to faith. The real importance of the Gospel testimony lies in its endorsement of Jesus' bare facticity, about which, to be sure, certain features may be predicated (stated clearly in Bultmann's *Jesus* in 1926 and repeated in 1960 in his essay translated in C. E. Braaten and R. A. Harrisville, eds., *The Historical Jesus and the Kerygmatic Christ* [1964], pp. 22ff.). Both the early and later Bultmann make much of a distinction (traceable also in E. Brunner, *The Mediator* [Eng. tr. 1934], pp. 265ff., 318ff., 345ff.) between Jesus' person (including His existence and certain features that belong to His activity and mission as healer and prophetic teacher, announcing the impending in-breaking of the divine rule) and His personality (i.e., the traits of His character and our knowledge of the inner working of His mind).

Bultmann is willing to affirm cautiously the facticity of Jesus' person, although he goes on immediately to deny to it any real theological value (pp. 24f.), because the Gospels are, by definition, not concerned with "objective historicity." Yet he stoutly denies any hint that Jesus' personality may be seen in the Gospels. Thus he is led to say that we have no sure knowledge of His understanding of His death. Mk. 10:45 is a "prophecy after the event," read back into the lifetime of Jesus. It is conceivable, he says, that He died in utter bewilderment and abject despair, a frustrated and rejected prophet of God.

Accepting, therefore, J. M. Robinson's revised estimate of Bultmann's skepticism concerning the historical Jesus, we may use his words to summarize the situation that led to the "New Quest" debate: "Bultmann's form-critical analyses corroborated the view that a Life of Jesus research after the style of the nineteenth century is impossible, and his existential interpretation undermined the thesis that such a Life of Jesus research was legitimate" (*Kerygma und historischer Jesus* [2nd ed. 1967], pp. 16f.). "Therefore it is not surprising that the critical restudy of his [Bultmann's] position by his pupils should begin here" (*A New Quest of the Historical Jesus* [1959], p. 12).

The central issues of the debate — how may we know the person of Jesus Christ, the preached Word of God, and what is His relation to history — may be read in some detail in the present writer's essay contributed to *Jesus of Nazareth: Savior and Lord,* ed. C. F. H. Henry (1966). That contribution may be supplemented by a summary of the writer's conclusions:

(1) In any sound approach to the Gospels — and we are dependent upon the canonical Gospels for our historical knowledge of Jesus — the first question is what these books purport to be. R. H. Lightfoot (in his books *Locality and Doctrine in the Gospels* [1938] and *History and Interpretation in the Gospels* [1935]) pinpointed this issue of methodology. In considering what sorts of questions we ought to ask of the Gospels, we must realize that the Gospels do not offer us biography in the modern sense of that term by tracing the Lord's career from His antecedents, the formative influences upon His character, and a day-to-day chronicle of His doings. Nor do they profess to supply objective history by telling a story in an impartial and disinterested way. And they are certainly not mythological accounts of a legendary figure, the cult-hero of a first-century religion.

The Gospels are theological documents, setting forth the interpreted history of the person in whom God visited and redeemed His people (Lk. 1:68). In the phrase "interpreted history," both aspects are to be given equal prominence. "History" is of vital importance because the Gospels record what actually took place in time and space. They are a standing denial of the Docetism that early afflicted the Church, i.e., the notion that Jesus was an appearance only and did not assume a true human nature (explicitly countered in the Johannine literature). Hans Conzelmann has sought to find an explanation of the source and origin of the canonical Gospels in the early appearance of a docetizing tendency, which denied a veritable incarnation; and it is still debated whether his attempt to detect Gnostic influences in centers of early Christianity (such as Corinth, as in W. Schmithals, *Gnosticism in Corinth* [Eng. tr. 1971], and R. M. Grant, *Historical Intro. to the NT* [1963], which call attention to 1 Cor. 12:3 as evidence of an attempt to separate the heavenly aeon Christ from the earthly Jesus, who is anathematized) can be sustained. But the Gospels do deny any docetic Christology in advance.

"Interpreted" or, perhaps better, "kerygmatic" draws attention to the purpose for which the Gospels were composed, stated in Jn. 20:31. The Gospels report history not for its own sake, but as the vehicle of God's redeeming grace in His Son. They declare that in this segment of history certain disclosure situations were created which reveal to faith that Jesus was God's messianic agent and is now the Church's exalted Lord.

(2) The axiom stated succinctly by T. W. Manson (*The*

Servant-Messiah, p. 67) — "a single story or saying may contain the whole Gospel in miniature" — fits the above proposition. Each Gospel pericope may be approached with the anticipation that it will disclose something of God's activity in Jesus. In Him God laid Himself bare to the eye of faith, and to examine the Gospel stories in this way and in the attitude of expectant faith means to anticipate discovering there what God is like. Having disclosed Himself once in Jesus, He has given a once-for-all revelation (represented in Gk. *eph' hápax*) that is accessible to the modern reader. This distinction, made by E. Käsemann in his celebrated address on the problem of the historical Jesus (Eng. tr. "The Problem of the Historical Jesus," in *Essays on NT Themes* [*SBT*, 41, 1964], pp. 15-47), between what happened once (upon a time — Ger. *einmal*) and what took place once and for all (*ein für alle Mal*) is one of the most fruitful suggestions to come out of the current New Quest controversy (pp. 30f.). In the life and death of Jesus certain patterns of life were displayed once upon a time. This anchors the Gospel in a historical stream. From this pattern (and one of the chief features is the tension "humiliation/exaltation," on which J. M. Robinson has written in W. Klassen and G. F. Snyder, eds., *Current Issues in NT Interpretation* [1962], pp. 91-110) once enacted in a human life, we can learn what is the eternal nature of God.

(3) The historian's task then is severely limited. By "indirect" research — of which E. Stauffer's *Jesus and His Story* is the best example — the historian can place Jesus in His setting of first-century Palestinian Judaism with its religious and cultural milieu. He can show that the historical evidence implies strongly that God is present and active in the man Jesus. But nothing except faith can grasp the implication "Jesus is Lord" and confess that God's presence is here mightily at work. History as a science operates with the category of "once" — "so it occurred." Faith alone perceives a transcendental significance in the historical event, giving it *Einmaligkeit* value, i.e., its uniqueness as revelation.

(4) In answer to the urgent summons "How then is Jesus known today?" the Christian historian with the Gospels before him will reply: "Not simply by inspection of these records." Then a knowledge of Jesus as the Christ and Lord of all would depend upon (a) human cleverness and (b) scholarly aptitude in handling ancient texts. The disclosure is made through the apostolic testimony in the Gospels within the context of the Church's life, faith, worship, and service, i.e., the revelation works only in the atmosphere of faith. The media of revelation include the *consensus fidelium* ("agreement of the faithful") of the past, making us debtors to all Christians who have led us in the way of Christ by their example, prayer, writing, and influence. Other media are the ministry of the preaching office by which the words of Christ are read, expounded, and applied to the concrete situations of modern life; the Gospel sacraments, instituted by dominical authority and pledges of the presence of the living Christ according to His express word; and the road of life, where we meet Him in the face of our neighbor and in situations of human need (Mt. 25:31-46). Thus the cup of water offered in His name becomes sacramental of His presence and grace, and the knowledge of Jesus Christ is mediated in the context of doing His will (Jn. 7:17) and serving one another as He did (Lk. 22:27).

III. Birth of Jesus.—The event of the Messiah's entry into the world is variously anticipated in the OT and in Judaism (see D. Edwards, *Virgin Birth in History and Faith* [1943]; R. E. Brown, *The Birth of the Messiah* [1977]) and described in full detail in the Infancy narratives (Mt. 1–2; Lk. 1–2), whose chief apologetic value lies in their opposition to Docetism (cf. 2 Jn. 7, and O. Cullmann's illuminating comments in *Christ and Time* [Eng. tr. 1951], pp. 125-130).

The scriptural data of the VIRGIN BIRTH are these. (1) Mary was betrothed to Joseph, a descendant of David, and was a virgin at that time (Mt. 1:18ff.). (2) The conception of the baby was due to the action of the Holy Spirit (Lk. 1:35). (3) An angelic messenger instructed the parents to name Him Jesus, a name with intense significance (Mt. 1:21). (4) Jesus was born in Bethlehem in the reign of Herod I, who died in 4 B.C. A suggestive discussion of the chronological problems connected with the Birth stories and the massacre of the innocents in Mt. 2:16-23 is given by H. E. W. Turner, in D. E. Nineham, *et al.*, eds., *History and Chronology in the NT* (1965), pp. 60ff. His conclusions are (1) that the massacre of the children by Herod, although otherwise unattested, is in keeping with the known character of Herod, especially if he was at that time under pressure from Rome; and the same circumstance may well account for a census under Sentius Saturninus, governor of Syria 9-6 B.C., which Tertullian (*Adv. Marc.* iv.9) speaks of as a "fact" (*constat*); and (2) that the star in Mt. 2 may be a conjunction of Jupiter and Saturn, visible in Palestine *ca.* 7 B.C. according to Kepler's computation. *See* ASTROLOGY V.B.

Turner has also treated the theological difficulties of the Birth narratives (*Expos.T.*, 68 [Oct. 1956]). The issues concern (1) the supposed parallels of Jesus' birth with stories of the births of Greek "holy men," such as Apollonius of Tyana (the strong Semitic coloring of the Lukan chapters is a cogent argument against the view that the Christian Gospels are indebted to a pagan source for this material; see J. G. Machen, *The Virgin Birth* [1930], pp. 317-379), and (2) the alleged silence of the rest of the NT about this doctrine. Admittedly the NT shows a marked reserve and does not blazon this teaching on every subsequent page. The evidence points to the conclusion that the Virgin Birth did not belong to the public kerygmatic message of the Church. But this same token suggests that the reserve was intentional because the facts came into circulation among believers through the mother herself (so J. K. S. Reid, in *RTWB*, pp. 275-77); or else, as Jeremias' conclusions (*Eucharistic Words*, pp. 72ff.) have shown, the Virgin Birth belonged to the so-called *disciplina arcani* or esoteric teaching of the Church, intended for those within the fellowship of the Christian fold and not for public debate.

The values of the Birth stories are manifold. Historically they show that early Christology developed the belief that the divinely given heir of the house of David was qualified for true messiahship as the "stem of Jesse's rod." They also emphasize the atmosphere of the supernatural and the miraculous in which the gospel, no less than the Lord Himself, was cradled; and they find no incompatibility between this assertion of His miraculous birth and His true incarnation. Jn. 1:14 is the classic statement of this.

Hints of the universality of the Christian gospel are seen in the visit of the Magi, who are identified by W. K. L. Clarke (*Divine Humanity* [1936], pp. 41-51) as Babylonian magicians and representatives of astral religion, bowing down in submission before the infant King.

Above all, Lk. 2:11 stands as a Christmas text which is complementary to the important passage in Ps. Sol. 17:36, "and their king shall be the Lord's Christ." The militant warrior-prince is hailed in language closely parallel with the Lukan verse, but the picture of the Savior is quite distinctive in the Christian writing. Jesus' messiahship is

to be declared and acknowledged by His lowliness and obedience unto death, not by armed might. The cradle at Bethlehem is thus an epitome of His entire ministry.

IV. An Outline of the Public Ministry of Jesus (Based Chiefly on Mark).–The record in Mark's Gospel falls into some fairly obvious sections. After a brief introduction (1:1-13; for this division see R. H. Lightfoot, *Gospel Message of St. Mark* [1950], ch. 2), the first phase of the public career of Jesus — the call of the Twelve and the growing popularity of the Galilean ministry — is described in 1:14–7:31. Then 7:31–10:52 includes a period of withdrawal from Galilee and a more intensive training of the Twelve once they have confessed Jesus as Messiah (8:27ff.). The final period (11:1–15:47) carries the story to its climax in the last journey to Jerusalem, the final appeal to the nation, and the preparation for the betrayal, the arrest, the trial, and the crucifixion of the Messiah, to be followed by the denouement, which reveals that the last word is not one of tragedy and loss, but of victory and vindication (16:1-8a, at which point the authentic text of Mark ends).

A. Introduction. The appearance of John the Baptist marks the historical setting of Jesus' public ministry. It is possible that the exordium of the entire Gospel in this paragraph (1:1-8) should read: "The beginning of the Good News of Jesus . . . was John the Baptist's preaching of a baptism of repentance." This view, adopted by some Greek church fathers and in modern times by C. H. Turner (in C. Gore, *et al.*, eds., *A New Comm. on Holy Scripture* [1928], *in loc.*), would find confirmation in Acts 1:22; 10:37; and 13:24f., all of which see John's baptizing ministry as preceding the public appearance of Him in whom the gospel was actualized. Verses 1-8 focus attention upon John's distinctive practice, for of the many features of this messianic herald's work (see T. W. Manson, *Servant-Messiah* [1953], pp. 36-49) none is more important than his baptizing his fellow Jews in preparation for the coming of God's rule; and in that record of his baptisms no single baptism is more significant than his receiving and baptizing his cousin, Jesus of Nazareth (1:9-11). Cf. Mt. 3:13-17; Lk. 3:21-23; Jn. 1:24-34. This event provided a fixed starting-point for the public ministry.

At His baptism Jesus received an anointing of the Holy Spirit (cf. Acts 10:38) and a summons to His messianic service. The pattern of that service is clearly shown in the Father's announcement, "Thou art my Son, the Beloved; with thee I am greatly pleased" (1:11). This verse, in combining two OT passages (Ps. 2:7 and Isa. 42:1), strikingly links together a coronation formula for the messianic Son and a portrayal of the suffering Servant of God. There is also a possible underlying motif in the wording that recalls Gen. 22, where Isaac is depicted as Abraham's beloved child. This chapter received a targumic interpretation in the light of Isa. 53 (so G. Vermes, *Scripture and Tradition in Judaism* [1961], pp. 202ff.), so the various backgrounds may very well merge together. Thus the messianic Servant-Son begins a ministry of service and obedience that will culminate in His atonement for His people's sins (cf. O. Cullmann, *Christology of the NT*, pp. 66f.).

Jesus' baptism and temptation are inextricably joined (1:12f.). In the Jordan the call came marking the commencement of His public work. What that call meant and involved was made clear in His weeks of solitude in the wilderness. Mark simply notes the fact; the other Synoptics give a dramatic and revealing account in which the lines of temptation are clearly drawn, and the significance for Jesus and His future ministry carefully spelled out. William Manson (*Gospel of Luke* [1930], p. 36) rightly observes: "In the background of the experience there undoubtedly lie the Messianic ideas of Jesus' race and

The second temptation of Christ (Mt. 4:5-7). Relief, Cathedral of St. Lazarus, Autun, France, 12th cent. A.D.

time." To Him "these traditional Messianic ideas of his people [to be a political deliverer or an apocalyptic savior] appear not as divine inspirations but as Satanic perversions of the truth." The importance of this background cannot be overrated. Jesus, the temptations tell us, will not use any of the possible methods by which success can be achieved or accept any contemporary role open to Him. To use the apt description of H. E. W. Turner (*Jesus, Master and Lord*, pp. 98ff.), He will not be an economic Messiah, ministering solely to the bodily and social needs of people, nor a sign-giving Messiah, compelling belief by a theatrical display of supernatural ability, nor a political leader, ambitious to captivate the kingdoms of the world by Caesar's methods.

Instead, He began His ministry with the clear intention of being God's Servant in God's way. His first announcement (1:14f.) of the in-breaking of God's rule into human life picks up an earlier promise (in Psalms of Solomon 17:21: "Behold, O Lord, and raise up for them their king at the decisive hour [Gk. *kairós*, as in Mk. 1:15] which Thou didst choose"), but His subsequent activity will show how He was to purify and disinfect the current notion of the kingdom from all misconceptions and political associations and give it a content in terms of service and suffering unto death (Mk. 10:45).

B. Ministry in Galilee. Jesus' activity, following the initial declaration of 1:14f., began with a call to the masses in Galilee, accompanied by a call to individuals (1:16-20). This latter call is important because it shows that Jesus purposed from the beginning to create a new society. He was not simply teaching people in a vague, amorphous group; He intended to collect disciples (as the fine study by R. N. Flew, *Jesus and His Church* [2nd ed. 1943], shows convincingly) who should later be His messengers (3:14; for the concept of "discipleship" cf. E. Schweizer, *Lordship and Discipleship* [Eng. tr. 1960]). These disciples were learners of a practical craft, and in the company of their Master they were to catch His spirit.

A sabbath day's teaching in the synagogue (1:21-34) makes an impression not only on the human bystanders but also on the spirit world, now stirred to violent resistance. A summary paragraph (1:32-34) speaks of His heal-

ing ministry, directed to both physically sick and mentally disordered people. Both afflictions were thought to be caused by demonic influence; He must first "expel the demon."

Jesus' fame was spreading (1:28), and He sought retirement and renewal, responding to an insistent request to meet the crowds with a quiet determination not to get too caught up in a growing popular movement (1:35-39).

At some unspecified place (1:40) He was confronted by a leper, who doubted more His willingness than His ability to help (cf. 9:14-27). Jesus was moved with anger (so v. 41 in a good MS tradition, and to be preferred as the more difficult reading), for reasons at which we can only guess; and He cleansed the leprous man, bidding him comply with the law (which had proved powerless to aid him in his extremity) and cautioning him to keep a secrecy that would conceal the identity of the healer. D. E. Nineham (comm., *in loc.*) comments on the point of the story in Mark: the account and its sequel are placed here because they depict Jesus as fully obedient to the law of ritual cleansing (based on Lev. 14), as an earlier verse had shown His respect for the sabbath (1:32). Jesus' loyalty is illustrative of what follows because it shows that Jesus is no ruthless iconoclastic reformer, but breaks with rabbinic Judaism only when it comes into fundamental collision with the will of God expressed in His ministry.

In the healing of the paralytic (2:1-12) that controversy with official Judaism becomes apparent. The question of the debate in this story turns on v. 9: "Which is easier?" The declaration of healing and that of forgiveness are easy to say — and equally difficult to accomplish. Jesus then criticized His adversaries who raised objection to His ministry: "You have nothing to say to either his moral or physical condition: I have both the solving word and the effective help!" But the really criminal offense in the eyes of the rabbis was that Jesus pronounced forgiveness Himself, thus usurping a prerogative belonging exclusively to God (see Jn. 5:18 in the context of Jn. 5:1-16).

The call to Levi the tax official (2:13-17) is inserted into a group of stories that show the developing controversy between Jesus and His opponents. These narratives, first isolated and examined by M. Albertz in *Die synoptischen Streitgespräche* (1921) and more recently discussed by A. J. Hultgren, *Jesus and His Adversaries* (1979), indicate the nature of the disagreement between Jesus and scribal orthodoxy and orthopraxis in His day. The way the conflict would be resolved is not in doubt (3:6). They would destroy Him, for He had made claims that shocked His rabbinic audience:

(1) He claimed to forgive sins, and drew out the murmured comment, Why does this man talk like this? Who can forgive sins except God Himself?

(2) He chose to consort with tax-collectors and other bad company, treated by the Pharisees as beyond the pale of true religion, as "people of the land" (Heb. *'am hā'āreṣ*) for whom no hope of salvation is possible (Lk. 15:1; Jn. 7:49). Further, He even called one of them to be His disciple. The position of *publicanus* in Roman-occupied Palestine was particularly obnoxious to the loyal Jews, smacking of compromise with the hated invaders and affording an opportunity for extortion and fraud.

(3) That His disciples did not fast occasioned serious questioning (2:18-22). The immediate background here is the Jewish picture of the messianic "good time coming," which is likened to a wedding feast. Jesus, in refusing to fast and to commit His followers to this practice, was tacitly announcing that the messianic age had begun. The feast is now to be enjoyed and everyone is to be happy. But He is under no illusion that everyone shares that joy, and darkly hints that an ominous future will await Him and His followers (2:20) because God's kingdom in Him and official Judaism are scarcely compatible, and must affect each other either by way of Jesus' revitalizing Judaism or (more probably) by a distinct break and a new beginning. "New wine calls for fresh wineskins" (v. 22).

(4) Jesus' sabbath violations offended the Jews, who treated His disciples' practice of plucking the ears of corn as falling within the category of "reaping and threshing," one of the thirty-nine schedules of work forbidden on the holy day. Jesus countered this objection with the assertion that the claims of the ministry override the sabbath rules, and even the venerable sabbath day (believed by the rabbis to antedate creation) is to give place to the Son of man, i.e., Him and His followers, in the work of the kingdom (see T. W. Manson, *ConNT*, 11 [1947], 138-146, on this meaning of Son of man). Later He was to turn this claim to priority into a prayer: "Give us today bread for the coming day" (of service in the interests of the kingdom).

(5) A further case of sabbath breaking — healing the man with the withered hand (3:1-6) — brings this series of conflict stories to a close; yet the notice of v. 6 points unmistakably to the way in which the future will be shaped.

A generalizing summary (3:7-12) epitomizes the first phase of the ministry. The Lord's immense popularity is attested, calling forth reactions of gratitude and more importantly hope that here may be the new leader of God's people, the heaven-sent Messiah. Yet official Judaism was shocked by His unconventional ways and annoyed by the carefree attitude He showed to the law whenever the claims of the ministry cut across the law's authority. As He fulfilled the messianic program enunciated in Lk. 4:16-39, the Jewish leaders grew alarmed and suspicious at His mounting success and influence.

The appointment of the Twelve (3:13-19) served a double purpose. They were to learn the secrets of the kingdom by personal acquaintance as learner-apprentices (for the underlying Aramaic of "disciple" in direct contrast to the rabbinic idea, see T. W. Manson, *Teaching of Jesus*, pp. 237-243); and they were then to become missionary-apostles to the world. In both ways they form the nucleus of the Church.

The reader is thereafter introduced to Jesus' immediate family ("And He came home," 3:20) and relatives (this is the sense of the Greek in 3:21). This section reminds us that Jesus encountered misunderstanding and opposition from those who were His own kinsfolk and friends as well as from those who took up an attitude of official animosity (cf. E. Trocmé, *Formation of the Gospel According to Mark* [1975]). Judaism failed to perceive that His power was a sign of His divine credentials. His wonders they attributed to an alliance with Satan. The family, on the other hand, credited Him with madness because of the strange behavior He showed and His obstinacy vis-à-vis the authorities. Both charges are frankly rebutted as blasphemy against the Spirit, a deliberate ridiculing of what is God-given; the rebuttals are invested with solemn warnings.

Up to this point the public ministry had been conducted either in the network of Galilean synagogues or in private conversation. With the mounting hostility of the synagogue leaders He turned to open-air preaching (4:1) and to a new type of teaching: instruction by parables. Parables are vivid observations (said T. W. Manson) of nature and human nature. They speak of commonplace things, events, and situations. Having gained our interest and sympathy, they bid us take a further step: to consider the best in life as a hint of, or a stepping-stone toward, what God is like.

Thus they set out a standard by which we can measure what we ought to be. "The parables show us what kind of God we must believe in and what kind of persons we must be" (T. W. Manson). Jesus taught by parables to make clear the nature and genius of God's kingdom in direct contrast to misconceptions and perversions of the nature of God current in popular and official teaching. This designation of the parabolic method is one of the chief contributions of J. Jeremias (*Parables of Jesus* [Eng. tr. 1955], p. 19), who describes them as Jesus' "weapons of warfare." By these powerful words Satan's realm is invaded and his "house robbed" (3:27).

The sower and the seeds speak of the effectiveness of Jesus' own teaching and form a parable about parables. In the explanation appended to the simple tale (4:14-20) we learn that despite wastage, failure due to human unresponsiveness, and Satanic countermeasures, there is a crop that crowns the preacher's task (likened to the farmer's work) with success, and gives him encouragement to go on. Jesus' own ministry is illumined by this piece of self-revelation, and its application in this parable to early Christian preaching in Mark's day is obvious.

Further parabolic warnings and encouragements indicate more about the kingdom's nature and outward growth. This may be summed up simply: speed and tardiness of growth are human standards not always applicable to farming. The farmer is known for his patience (Jas. 5:7), and is not overanxious concerning the seed he buries in the ground. Preachers may similarly leave the issue with God whose word they sow. God will take care of His own kingdom and fervid nationalist calls to arms are misplaced.

In the mustard seed simile (4:30-32) the accent falls on the inclusiveness of the rule of God, embracing the Gentiles, who are pictured as "birds of the air" (as in Ezk. 17:23; 31:6; Dnl. 4:9, 11, 18, and in rabbinic usage; cf. the evidence in J. Jeremias, *Jesus' Promise*, pp. 68f.).

Three examples of Jesus' acts of power follow in 4:35–5:43. First, the storm on the lake (4:35-41) recalls parallel OT passages which teach that ability to control the sea and subdue tempests is a characteristic sign of divine power (Ps. 89:8f.; 93:3f.; 106:8f.; Isa. 51:9f.). The nearest parallel is Ps. 107:23-30. In the background of these OT texts lies the imagery of the monster "chaos" (Akk. *Tiâmat*, Ugar. *thm*, Heb. *t^{e}hôm*) subdued by the powerful god in Near Eastern thought (for this background cf. G. von Rad, *OT Theology*, I [Eng. tr. 1962], 150-52, 360f.). Of more significant interest to Mark's first readers would be the OT picture of sleep in the midst of upheaval as a token of perfect trust in the sustaining and protective power of God, exemplified in such cases as Ps. 4:8 (MT 9); Prov. 3:23f.; Job 11:18f.; Lev. 26:6. And when Yahweh seemed to be "asleep," i.e., inactive, in the face of His people's danger, He would be invoked to "awake" (Ps. 44:23f. [MT 24f.]; 35:23; 59:4 [MT 5]; Isa. 51:9). To the Church in Mark's day, threatened by persecution and fearful of the outcome, the reassuring and commanding word of its unseen Lord, "Peace! Be still," would come home with special relevance.

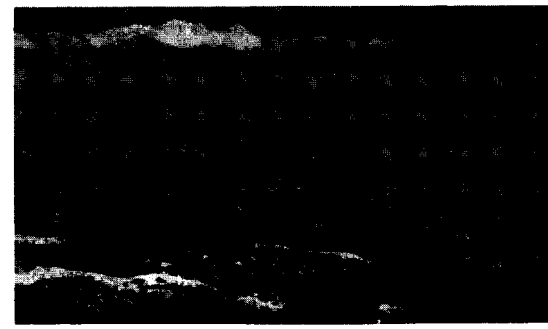
The second act of divine power — the cure of the Gerasene madman — is notable for its wealth of personal detail involving a reported conversation between Jesus and the demoniac (5:6-10, 18-20). (For a tradition-historical study of the story see R. Pesch, *Ecumenical Review*, 23 [1971], 349-376.) The incident is set in gentile territory, although the exact location is hard to determine. The "Gerasenes" were Gentiles who lived in the ten-town federation on the east of the Sea of Galilee (see v. 20), and there is some plausibility in the suggestion of Hoskyns and Davey (*Riddle of the NT* [1931], pp. 92-94) that this incident directly follows the preceding one to parallel the activity of God in Ps. 65. God stills the roaring of the sea and the tumult of the peoples (Ps. 65:7 [MT 8]). The Lord's power over disease and death (5:21-43) is shown in the third narrative; in fact, two stories are here merged into a unit of Gospel tradition. The raising of Jairus' daughter is obviously the chief event, and the finale receives an extra dramatic effect by the intercalation of the other account of the woman with the hemorrhage (vv. 25-34), which interrupted Jesus' movement to the scene of need and hopelessness. Early Christian confidence in the face of man's last enemy (1 Cor. 15:26) is well illustrated by the report of Jesus' explanation, "The child has not died, she is only asleep" (cf. *RTWB*, pp. 60f., for a discussion of NT passages that use this verb, "to sleep," of death). The skeptical reaction that greeted this sentence ("They only laughed Him to scorn") may portray pagan derision at the claim of eternal life made by Mark's church (see A. Richardson, *Miracle-Stories of the Gospels* [1956], p. 74).

After these impressive accounts of the Lord's wonder-working power and the human response of faith and devotion, the next pericope by way of stark contrast picks up the unsympathetic attitude of His family in ch. 3. Not surprisingly in such a hostile atmosphere of rejection and disbelief at Nazareth, Mark appends the realistic comment (compare Matthew and Luke, who modify this statement): "He could not perform any miracle there, except that He put His hands on a few sick people and healed them. And He was astonished at their unbelief." This is a quiet reminder that the Markan Jesus was not a Hellenistic thaumaturge, a *theíos anḗr* ("divine man"), bestowing his favors to build up his reputation, but worked in a congenial atmosphere where hope, expectancy, faith, and spiritual sensitivity were present, at least in germ. The plain declaration of His inability to perform miracles as though they were akin to conjuring tricks may be a sign of Mark's antidocetic strain, as well as a sad commentary on the rejection of the apostolic message by the Messiah's own people in the later decades.

Nor is it fortuitous that the success of the Twelve, whose mission is placed in the next section (6:7-13), also points in the direction of the subsequent mission to the Gentiles in the apostolic Church, as R. H. Lightfoot notes (*History and Interpretation*, p. 113).

Such a "sending forth" (v. 7 has the important Greek verb *apostéllō*) completes the purpose hinted at in ch. 3. "Their task is an extension of the Ministry of Jesus" (T. W. Manson, *Church's Ministry* [1948]), coupling a call to repentance with a ministry of healing. From all indications (e.g., in Lk. 10:1-20) this mission met with some success, and as an indirect proof of such a response from the people, Herod's reaction of alarm is noted (7:14-16). The

The traditional Mt. of Precipitation, from which the enraged people of Nazareth would have cast Jesus down (Lk. 4:29f.) (W. S. LaSor)



interesting comparison of Jesus with John *redivivus* (returned to life) leads on to the narrating of John's death, also reported in Josephus (*Ant.* xviii.5.2f. [116-19]).

The popularity of Jesus, assisted by the measure of success granted to the apostles' mission, provoked a crisis. The climax is reached at the conclusion of the following two pericopes (6:30-56). Various motives seem to have entered into Mark's placing of these stories side by side. Both accounts illustrate the disciples' dullness (vv. 51f.) in the face of the manifest evidence of Jesus' power, first, to provide a messianic banquet (on which see A. Schweitzer, *Mystery of the Kingdom of God* [Eng. tr. 1950], pp. 103ff.), and second, to assert His control of natural forces (as earlier at 4:35-41). But the historical context of v. 44 has been perceptively noted by T. W. Manson (*Servant-Messiah*, p. 71), namely, that Jesus was confronted here with an ugly situation which dangerously foreboded a messianic uprising (cf. H. Montefiore, *NTS*, 8 [1961/62], 135-141). The crowd comprised five thousand *men* (Gk. *ándres*, which may be significant; Mt. 14:21 adds "not counting women and children," perhaps to stress that these were strong men, colloquially "he-men"), and they are described as "sheep without a shepherd." It is true that Mt. 14:13f. tends to moralize this incident by observing the compassion of Jesus shown to a hapless crowd. But Mark's use of the sheep-shepherd metaphor points in a different direction. They are likened to a leaderless mob, an army without a general (1 K. 22:17) — a danger to all if they were stirred to a violent anti-Roman demonstration. Jn. 6:15 states this possibility expressly. So Jesus faced the real problem, not simply of feeding the crowd, but of quieting it and persuading it to go home in peace. Shortly after this incident, on which the Fourth Gospel's commentary is most revealing (Jn. 6:66-71), Jesus retired from Galilee; and it is possible that the dangerous enthusiasm of His professed followers urged Him to this course of action (7:24-30). F. C. Burkitt's suggestion that the northern journey was virtually a flight from the long arm of the police of Herod Antipas is also compatible with this reconstruction. H. E. W. Turner (*Jesus, Master and Lord*, p. 110) adds a further note with the reminder that He withdrew partly to prepare His disciples more thoroughly for the true understanding of His messianic vocation. Recent events had shown how little they had imbibed this teaching and how greatly they needed fresh insight into the meaning of His ministry, if they were to be His "apostles" (6:30, i.e., His accredited representatives or *šᵉlûḥîm*, the rabbinic term underlying Gk. *apóstoloi*).

Opposition to His ministry was felt not simply from Herod and the Romans. Jewish leaders were mounting an attack, and the discussion of ritual washings (7:1-23) focuses attention upon the gravamen of the charge the scribes brought against Him: He was disregarding "the tradition of the elders" (7:5, 8f.) because of His sovereign freedom and tacit assumption (Mark's account does not draw out its implications) that He, as Messiah, brought in the new age in which the authority of the Torah is rendered invalid. On the surface, the conflict gathered round the scribal interpretation of the Mosaic law, particularly in the matter of solemn vows, which, if taken deliberately as distinct from rash vows undertaken in error, were treated as irrevocable, and had the effect of making property "offered to God" (Heb. *qorbān*) sacrosanct, even though the plainest human obligations were neglected. Jesus recalled the discussion of the legitimacy of such vows from the realm of the academic to that of the practical and the immediate. He placed the emphasis on a consideration of simple human rights and duties, in the light of the will of God for the family. In a similar vein, ritual lustrations cannot displace the prime importance of a clean inner life (7:15, 20-23). A more calculated blow to the authority of scribal tradition could hardly be imagined, and by overturning the regime of the tradition of the elders, invested by the Pharisees with great dignity, Jesus declared the irreconcilable opposition of God's kingdom to their religious code.

C. An Extension of the Ministry in Scope and Depth. The journey beyond the northern bounds of the Galilean territory brought Him into quasi-gentile country for an indefinite period of time; but certainly the withdrawal cannot have been long after the springtime feeding of the multitude, dated by Mk. 6:39 (cf. Jn. 6:64). Encounter with the gentile people, with their varying needs, occupies the next and new section of the Gospel (7:24–8:26), although Jeremias (*Jesus' Promise*, p. 36) observes that the territory of Tyre and the region lying between Galilee and Caesarea Philippi were then still inhabited by descendants of the northern Israelite tribes. "It would have been," he comments, "to these outposts of Israelite population and Jewish religion that the mind of Jesus first turned when he extended his activity so far to the north," although the precise geographical data are uncertain (e.g., in 7:31 Sidon may be a misreading of Saidan, a variant form of Bethsaida). (*See* GALILEE VI.)

The incidents recorded in this section include: (1) blessing a Syrophoenician woman, explicitly named as a Gentile (7:26); (2) curing a deaf-mute (7:31-37), in which the technique of performing a miracle is unusual and has points of contact, at least in form, with Hellenistic magical cures (so M. Dibelius, *From Tradition to Gospel* [Eng. tr. 1934], pp. 83ff.; cf. J. H. Hull, *Hellenistic Magic and the Synoptic Tradition* [1974]); the rarity of this kind of narrative argues strongly for the essentially Jewish setting of the rest of the miracles in the historical career of Jesus; (3) feeding a crowd, numbered at "about four thousand" (8:9). This last story is sometimes taken as a "doublet" of the earlier pericope (6:30-44), but more probably it is to be regarded as an intentional insertion of a story, set in a non-Jewish milieu, designed to portray Jesus as the bread of life to the Gentiles (this suggestion goes back to Augustine; see Richardson, *Miracle-Stories of the Gospels* [1958], p. 98, who notes the striking vocabulary differences between the two accounts). And it cannot be accidental that in each chapter the miraculous provision of food sets in motion a cycle of events having a similar pattern (feeding; crossing the lake, 6:45-56 and 8:10; controversy with the Pharisees, 7:1-23 and 8:11-13; incidents in which there is "bread," 7:24-30 and 8:14-21; a healing miracle, 7:31-37 and 8:22-26). In the incidents of healing the parallels are especially precise. Vincent Taylor (*Gospel According to St. Mark* [1952], pp. 368f.) has set down the evidence in some detail. Both stories are also in a class apart in relation to the other healing miracles in the Gospels, e.g., no reference is made to human faith, a condition paralleled in certain Hellenistic healing accounts. R. H. Lightfoot offers an elaborate explanation for the peculiar nature of these stories. He goes on to account for the placing of the Bethsaida healing at this juncture on the ground that it forms a bridge connecting the blindness of the disciples in the earlier part of the Gospel with the illumination that came to them in the second part of the narrative, beginning with the turning point of the revelation at Caesarea Philippi (*History and Interpretation*, pp. 90ff.).

At all events, the subsequent pericope (8:27–9:1) marks a major crisis in the ministry, precipitated by Jesus Himself, who took the initiative in both the preliminary (8:27) and leading questions (v. 29). Peter, spokesman for the

Twelve, gave a direct answer to the momentous issue, "Who do you say that I am?" — "You are the Messiah." Jesus here, in contrast to the Matthaean parallel version of this incident (Mt. 16:12-28), accepted the title with little enthusiasm, for it is clear that Peter had no idea of the kind of Messiah Jesus was and would be. For that reason, the accompanying explanation in terms of a humiliated and suffering Son of man was warmly repudiated by the apostle, and Jesus, for good measure and with equal animation, rejected all that Peter's rebuke implied. Peter's thought was filled with notions of an all-conquering messianic prince, whose qualities are delineated in Ps. Sol. 17f.; and Jesus' disclosure of a pathway of suffering was totally unexpected. Moreover, "if it is the will of God that the Messiah should suffer, it might well be his will that the Messiah's disciples should suffer a similar fate; from that . . . the natural man shrinks" (Nineham, comm., *in loc.*).

The retort of Jesus takes up these two issues: His destiny required, as a divine necessity, accepting a cup of suffering and woe (8:31), and discipleship equally required a close identification with Him as corporate Son of man and Servant of God in a similar fate (vv. 34-38; v. 38 should probably read, "Whoever is ashamed of me and mine [i.e., the disciples]").

Mark 9:1 is a *crux interpretum*. C. H. Dodd (*Parables*, p. 35) gives full force to the perfect participle: "until they have seen that the kingdom of God has come with power." The disciples (he interprets) would soon be aware that the kingdom had already come, i.e., that it was a present reality in Jesus' ministry. But this view seems to strain the exegesis (cf. W. G. Kümmel, *Promise and Fulfilment* [Eng. tr., *SBT*, 23, 1957], pp. 25-28, on this verse; and on the whole question of "realized eschatology" note the significant footnote in J. M. Robinson, *Problem of History in Mark* [*SBT*, 21, 1957], p. 24); it is better to translate with the RSV. Later the disciples would be aware that the kingdom had come, but no indication is given of the duration of the interval that is envisaged elsewhere in His eschatological instruction (ch. 13).

The Transfiguration is dated with reference to the confession at Caesarea Philippi, and is the natural sequel to it. As the disciples have confessed Him to be the Messiah, they (or their representatives, the chosen three) are permitted to see His true stature and to share the secret of His filial relationship with the Father. The heavenly voice (9:7), "This is my Son, the beloved," combines two messianic titles and is coupled with an approbation that, even if men may reject and despise Him, He is to be followed by His own. "Hear Him" carries the thought "Obey Him" as in Dt. 6:4.

The ensuing snatch of conversation (9:9-13) as the disciples come down from the hill seems to have suffered some disorder in transmission, and C. H. Turner's emendation placing v. 12b after v. 10 has much to commend it (see C. Gore, *et al.*, eds., *A New Comm. on Holy Scripture* [1928], *in loc.*). The disciples are engaged in resolving a genuine perplexity. Current expectation of a Messiah associated Him with a triumphant reign, and awaited a returning Elijah (Mal. 4:5) to herald His arrival. Jesus had spoken about a rising of the Son of man, but why was this required? It seemed to imply a defeat and a death. Yet the OT (they would reason) knows nothing of such a defeat. Jesus points to what has already occurred: Elijah has come back in the person of John the Baptist, and has met a strange fate (unlike the prophet, who escaped the wrath of his enemies). The Son of man can expect no less.

The cure of the epileptic lad directs attention to the central place occupied by faith, defined by J. A. Findlay (*Jesus As They Saw Him* [1920], p. 107) as "a painstaking and concentrated effort to obtain blessing for oneself or for others, material or spiritual, inspired by a confident belief that God in Jesus can supply all human need." In this regard the present miracle story contrasts with the two earlier accounts from which the emphasis on faith is absent. Jesus' evaluation of the high place of faith in His miracles is classically recorded in 9:23: "Do you say 'ability'? Everything is within the ability of him who has faith" (cf. R. P. Martin, *Mark: Evangelist and Theologian* [1972], pp. 108f.).

A second announcement of the forthcoming rejection and death of the Son of man (9:30-32) is set within a stereotyped framework, observed by R. H. Lightfoot (*History and Interpretation*, pp. 117ff.), namely, in a scene in which the disciples have failed to perceive His ultimate destiny. This setting is clearest at the third prediction of the Passion (10:32-34), when "they were on the road going up to Jerusalem, with Jesus at the lead; and they were bewildered, and as they followed they were frightened." At no point in the Gospel story is there more vividly portrayed the gulf between Jesus' understanding of His messianic vocation and the disciples' hopes and fears of what they might expect — a vast distinction well described by H. E. W. Turner as the "Messianic cross-purpose" (*Jesus, Master and Lord*, p. 115). And in both the second and third predictions of the cross, the teaching of Jesus that follows each announcement was occasioned by the disciples' false ambitions and worldly aspirations (9:33-37; 10:35-45).

Chapter 10 removes the public ministry of Jesus from Galilee to Judea and Transjordan. At this point (10:1) the stage is being prepared for the final drama of Jesus' crucifixion, although it is likely that some considerable time elapsed between the events of chs. 10 and 15. The journey from Galilee may be dated in the late summer of A.D. 32, thereby allowing nine months or so before the events of the following year's Passover and permitting the five episodes recorded by John's Gospel (namely, a visit to the Feast of Tabernacles, an autumn and a winter in Jerusalem, an interval beyond the Jordan, a visit to Bethany, and a retreat to Ephraim).

Mark relates the breaking out of a fresh conflict as soon (apparently) as He set foot in Judea. The point at issue was the vexed question of marriage and divorce (10:2-12). Jewish law at that time gave the husband the sole right to divorce his wife in a most arbitrary way, by serving a written notice of the marriage's dissolution. No redress was possible for the wife, nor did she enjoy any corresponding right. Her sole method of obtaining a divorce was to persuade her husband to take the initiative and offer her release from the marriage vow. Jesus was concerned to issue a challenge to this obviously unfair situation, to uphold the ideal of the indissolubility of marriage, and to base His teaching on God's intention, declared in Gen. 2:24, that marriage is an equal partnership for all time (10:6f., 9). Divorce, therefore, followed by remarriage with another, runs counter to the divine purpose (vv. 10-12).

The following set of conversations and interviews is designed to show how clearly the demands of the kingdom of God are based upon its character. The kingdom is offered to (and understood by) the childlike spirit which takes it with simplicity, gratitude, and trustfulness (10:13-16); yet it also requires a priority and a fullhearted acceptance which brooks no rival. The riches of the man who was "very wealthy" (v. 22) proved to be a tragic stumbling block, not because they were evil per se but because they came to hold a place that God alone must have. In wealth Jesus found a terrible obstacle to human reliance on God Himself, and not surprisingly Paul characterizes "possessiveness" as idolatry (Col. 3:5). A trust in material pos-

sessions virtually excludes a trust in God and therefore entry into His realm (10:25).

An even greater tragedy, however, is that the professed followers of Jesus had still to learn the lesson of the kingdom's true nature. They were momentarily startled by the third reminder of what the journey to Jerusalem would entail (10:32); but the deep impression on their minds was clear from their actions and their words in these sections. They brushed aside the children as though their Master had more important business on hand (10:13); and they dealt just as summarily with blind Bartimaeus' request for healing (10:48), possibly on the same score that the Messiah was too busy at that time to attend to such trivia as the cure of a wayside beggar. Moreover, when two of their number, James and John, managed to get in a plea for special places at His heavenly court, the rest were incensed (10:41), because these two had sought preferential treatment and had jumped out of turn. Their minds, no less than the crude, vaulting ambition of James and John, were full of thoughts of earthly prestige to be enjoyed when Jesus entered upon "His glory" (v. 37), i.e., as messianic prince in Jerusalem in the soon-to-be-established kingdom.

They still needed to receive the solemn instruction of 10:42-45, with its climactic prophecy that the Son of man's title to lordship was to be gained along a road of self-denying service to mankind and the full and final offering of His life to God as a ransom for His people (v. 45), as the obedient and humiliated Servant of Yahweh (Isa. 53) and martyr figure (of 2 Macc. 7 and 4 Macc. 6:29; 17:22; these texts are discussed by C. K. Barrett in A. J. B. Higgins, ed., *NT Essays* [1959], pp. 12f.). And if verbal teaching failed to convince them, as it evidently did, they had a second chance to get the message from the acted symbolism of His entry into the holy city, according to the usual interpretation of 11:1-11.

D. Final Journey to Jerusalem. He came into the city as a king. So the narrative makes plain, with an undertone drawn from a passage in 2 K. 9:13 and more explicitly in the later Synoptics and in John, the arrival of the lowly king of Zec. 9:9. Yet, in Mark's account, to insist that He marched upon Jerusalem as a king goes beyond the evidence. The acclamation of the entourage (in 11:9f.) may be no more than an outburst from enthusiastic pilgrims bound for the festival, and a decisive point against the popular view that He stage-managed an entry to make a messianic claim apparent is that neither the Jews nor the Romans were compelled to act immediately against what had transpired. It could be argued, as E. Lohmeyer does in his *Lord of the Temple* (Eng. tr. 1961), pp. 34f., that He entered the city as Messiah incognito with a chief motive to claim the temple as His rightful possession as the sanctuary of God (so Lohmeyer understands v. 11); but this too remains doubtful.

The barren fig tree incident (11:12-14, 20-25) poses certain problems resulting from its obvious intent to make two points (so Nineham, comm., *in loc.*): to give an example of faith and prayer and to provide a didactic point, the fate of the fig tree symbolizing the fate that awaited Jerusalem and the Jewish people and religion. (For other reasons implicit in the story see L. A. Losie, *Studia Biblica et Theologica*, 7/2 [1977], 3-18.) This fate overtook them in A.D. 70 at the fall of Jerusalem. There are two chief problems. (1) This "miracle" involves a judgment on an inanimate object and is thus akin to the wonders related in the apocryphal gospels (cf. *ANT*, pp. 49ff. for examples). (2) If the event occurred after the traditional date of Palm Sunday, i.e., in March or April, no figs would be expected in any case — hence the editorial note added in v. 13: "for it was not the season of figs."

T. W. Manson (*BJRL*, 33 [1951], 271-282) offers some explanation of these two difficulties. The sentence "May no one eat . . ." (11:14) may be construed as a statement more than a curse, the tone of voice alone deciding which the speaker originally intended. A hypothetical Aramaic behind the Greek would allow of either, the imperfect and jussive in that language being consonantally identical. Thus what we have (apparently) as a curse may conceivably have been uttered as a statement of fact: "No one will ever again eat . . . ," couched in the form of a prophecy and implying various possibilities. For instance, it may be that the tree was dead already and could not yield fruit, or was in the process of dying, or that Jesus expected the end of the age or the fall of Jerusalem before the next harvest — or perchance the indefinite "no one" (in v. 14) veils an allusion to the speaker Himself, in which case it is a prophecy of His impending death, like Mk. 14:25 par.

The second difficulty — dating — involves the question of Gospel chronology. Manson (*BJRL*) suggests that this event (and what follows in the later parts of the Gospel) is to be dated at the time of an earlier festival, the Feast of Tabernacles, six months before Passover. Church calendar sequences are responsible for telescoping the events between the triumphal entry and the crucifixion into one week — a foreshortening explicitly denied in Mk. 14:49: "I was daily in the temple teaching." The advantage of this reconstruction is that it permits the story of the fig tree to be placed at a season when figs were possible, and so adds likelihood to Jesus' prophetic word and later appeal to the nation.

The sad condition of Judaism is illustrated by His visit to the temple (11:15-19). The outer court was a part of the temple precinct to which everyone, Jew and Gentile alike, was entitled to come for worship. Yet its facilities were being effectively denied to the Gentiles by the temple authorities, who were using the area as a marketplace and a money exchange. Consequently the area was a convenient thoroughfare for pedestrians (v. 16). Jesus' reform was designed to restore gentile privileges and to purify the temple of all that denied its importance as a house of prayer. (See further Jeremias, *Jesus' Promise*, pp. 65ff.)

Not surprisingly this action called forth a violent reaction (11:27-33), centering upon His authority to interfere in what was a priestly (i.e., Sadducean) preserve. Jesus' retort takes up the broad principle of the legitimacy of all decisions in religious affairs, citing the case of John as a test issue. The temple leaders, faced with an unenviable choice — to deny John's authority as an accredited prophet of God whose martyrdom was of recent memory in the minds of the people, or to admit that they had been wrong in refusing him — preferred to keep silence. To such men Jesus would not declare Himself.

But the question of his authority was not completely evaded. He did declare Himself by a parable, the point of which was taken by those who heard it (12:12). Based on Isa. 5:1-7, the story in 12:1-12 builds on a common feature of Palestinian economic life in the 1st cent., the existence of *latifundia*, which were rented out to the local peasants to be farmed in return for a share of the produce. This system was much resented, especially by those tenants who had strong nationalist feelings. Moreover, the story, as told by Jesus, has allegorical features intended to show the identity of the chief actors, and in particular the character of His enemies who would shortly encompass His death (cf. Dodd, *Parables* pp. 93-98). In spite of His realistically assessing of the situation and His being under no illusion about how his fate would be decided (v. 7), Jesus looked beyond rejection to a vindication scene, borrowed from Ps. 118:22f. There is no valid reason why Jesus should not have quoted this Scripture, which was to

figure prominently in the later Church's apologetic vis-à-vis Judaism (Acts 4:11; Eph. 2:20; 1 Pet. 2:7).

The following pericopes exemplify the various efforts made by His enemies to discredit Him in public debate, and may follow naturally from the embarrassment they suffered after the initial encounter of 12:12. The subtle and disingenuous questions challenged Him at different levels. On a political plane, the issue of tribute money was calculated to expose Him as either a pro-Roman sympathizer (and so turn the crowds against Him as a traitor to Israel's hopes, expressed in the Pharisaic Psalms of Solomon) or an anti-imperial nationalist, too dangerous to have His freedom. Either way He seemed to be caught in a trap. But Jesus refused to legislate as though Roman rule and Jewish freedom were mutually exclusive. Both political power and religious freedom are right in their respective spheres (cf. Rom. 13:1ff.; 1 Pet. 2:13-17) and must not be pitted against each other. "They marveled at Him" for this "simple" solution to a vexed question of state and church. When in later centuries the state turned persecutor and the church strove for territorial power, no such simple directive was possible.

Theologically, the question of post-resurrection marital status posed by the Sadducees (12:18-27) was in character, as the Evangelist notes (v. 18). See Acts 23:6-8 for a further indication that the Sadducees rejected the doctrine of the resurrection as novel. The question they formulated was an imaginary one, almost absurd, yet just possible (cf. a similar situation in Tob. 3). And it tried to show the ludicrous eventuality of what might happen in direct consequence of the levirate rubric of Dt. 25:5ff. Jesus replied that, if the only hope a person has is in vicariously surviving in his descendants, then his hope is illfounded. But, once grant a personal God who cares for His own in life and death — and the Hebrew patriarchs illustrate this par excellence; hence Moses is told that Yahweh is God of these men after their death — and life beyond the grave becomes transformed into personal existence in the love of God, and is not simply a prolonging of earthly conditions. The Scriptures thus speak of an eternal God who enters into a communion with His people that death cannot sever, and (for good measure) the synagogue prayers (one of the Eighteen Benedictions was called the "Power") confirm this hope of life and immortality.

A further query, ostensibly and almost certainly sincere, touched upon a matter debated at that time in Judaism. "Which commandment is first of all?" recalls the many attempts that had been made in Judaism to reduce religion to its essentials. Rabbi Simlai sought to reduce all the commandments to the one requirement of Hab. 2:4 (cited by Montefiore and Loewe, *A Rabbinic Anthology* [1938], p. 199). Jesus concentrated on the prior claims of love, in the order "love to God" issuing in "love to men" (Dt. 6:4f.; Lev. 19:18). Yet a theoretical acceptance of truth never suffices; it brings a person only in sight of the kingdom (12:34). Personal attachment to Jesus and the demands of discipleship are needed to bring a person, however well-meaning and sincere, into the kingdom (cf. Lk. 9:57-62). In other words, character comes before actions in both senses: it is more important and it explains why a person acts as he does.

After a series of interrogations, it was Jesus' turn to raise a question — "How can the scribes maintain that the Messiah is a descendant of David?" (12:35) — which apparently was of current interest in rabbinic circles (see T. W. Manson's pertinent comment [*Teaching of Jesus*, p. 266 n. 2]). The question is cast in the form of a so-called Haggadah question, i.e., one that indicates an apparent contradiction in Scripture, to which the answer is given that both passages are right, but they refer to different points (cf. D. Daube, *NT and Rabbinic Judaism* 1956], pp. 158-163). The point at issue is the precise relation of David, the traditional author of Ps. 110, and the Messiah. In Jewish expectation the messianic hope spoke of a coming nationalist leader who would revive the political fortunes and prestige of David's empire (cf. 2 S. 7:12; Jer. 30:9; Ezk. 34:23; and Ps. Sol. 17). Yet — and herein is the embarrassing difficulty to the Pharisaic notion — David not only looked forward to his illustrious successor, the Messiah, but looked up to Him as someone infinitely higher than any "second David" could be. David himself called Him Lord; how could He also be David's descendant (12:37)? A solution was eventually reached in Rom. 1:3f. (cf. 2 Tim. 2:8), where the qualification "in power" attached to "marked out as Son of God" in reference to David's Son implies that Christ in His post-Easter glory exercised the functions that belong to the OT Yahweh (for which the LXX uses the Gk. *kýrios*, "Lord"), as in Phil. 2:9-11.

The brief condemnation of the scribes (12:38-40) summarizes the philippic of Mt. 23, and is directed against the worst members of the Pharisee party. Not all Pharisees deserved this verdict, but it is ever a danger with a religious outlook such as Pharisaism that it is more deadly when it succeeds (conducing to pride) than when it fails (calling down on it the traditional judgment of "hypocrites"). In any case, with such a noble principle and high idealism, the maxim *corruptio optimi pessima* (the corruption of the best is the worst of all) is bound to apply.

The Pharisees' "love of money" (12:40; cf. Josephus *Ant.* xvii.2.4 [44]; I. Abrahams, *Studies in Pharisaism and the Gospels*, I [1917], ch. 10) serves as a background for the lovely story of 12:41-44, as Montefiore observes: "In contrast to the bad scribes, who 'eat' widows' property, we have now the tale of the good widow and her sacrifice" (*Synoptic Gospels*, I [1927], *in loc.*).

The apocalypse of ch. 13 is placed at this point to mark the closing stages of the Lord's activity and to give a hint of the final days. It thus forms a species of farewell discourse, patterned on the OT examples of farewell speeches delivered by Jacob (Gen. 48–49), Moses (Dt. 31–32), Joshua (Josh. 23–24), Samuel (1 S. 12), and David (1 Ch. 28–29). (On such literary genres, see J. Munck, in *Aux Sources de la tradition chrétienne. Mélanges offerts à M. M. Goguel* [1950], pp. 155-170.) But it has a more important function, namely, to invest the subsequent Passion narrative with an aura of glory and to suffuse it with the light of the ultimate triumph beyond the darkness of defeat, treachery, and death (see Nineham, comm., p. 341).

Whether the section existed before its incorporation into Mark's Gospel (the Little Apocalypse theory), and whether it represents the substance of Jesus' prophetic teaching or is the work of some Jewish-Christian apocalyptist, expanded by the insertion of dominical sayings by the Evangelist, are matters for debate. G. R. Beasley-Murray examines and is critical of the Little Apocalypse theory (in *Jesus and the Future* [1954], updated by his essay in *Southwestern Journal of Theology*, 21 [1978], 37-53) and champions the basic integrity of the chapter; D. E. Nineham supports the theory, arguing that a clear distinction should be made between what Jesus could have foreseen (e.g., 13:9-13; cf. 8:34ff.) and the use He is reported to have made of an apocalyptic, cosmically oriented genre of language and ideas (13:24-27), common in such treatises as Enoch, the Sibylline Oracles, and the Assumption of Moses, which are pseudonymous. Verses such as 14ff., which speak of "the desolating sacrilege set up where it [or he] ought not to be," clearly have the fall of Jerusalem in view (Lk. 21:10). It is possible, as many scholars hold, that Mark's recasting of this narrative —

assuming the Lukan priority of this apocalyptic section — has taken a prophetic utterance of Jesus, in the spirit of the Hebrew prophets who foretold the destruction of Zion (Mic. 3:12; Jer. 26), and turned it into an apocalyptic prediction-schema, based partly on a reminiscence of events in A.D. 40 when the mad emperor Caligula ordered his statue to be set up in the temple (Josephus *BJ* ii.10 [184-203]), as Antiochus Epiphanes had earlier done with the altar of Zeus in the Maccabean period (1 Macc. 1:54; cf. Dnl. 9:27; 11:31; 12:11). But this hypothesis of the origin of Mk. 13 has some doubtful features, and seems to credit Mark with overmuch ingenuity and creative skill at the expense of the historical truth of the discourse as delivered by the Lord Himself.

A time of fierce testing lay ahead of the disciples or their future representatives, according to 13:19. But beyond the cosmic upheaval and distress of vv. 24f. the ultimate vindication of the Son of man (as in Dnl. 7:13ff.) was assured — a note struck later when the conflict seemed to enter its darkest phase in Mk. 14:62 — and the final salvation of the elect is promised. The outbreak of the struggle was imminent (13:28f.), even though the time of the final denouement was a secret locked in the mind of the Father, to which even the Son has no access (vv. 30-32). Yet the disciples' duty was at least clear: faithfulness when bogus messiahs were on the rampage (vv. 5-8, 21-23) and the ruling authority was implacably hostile (vv. 9-13), added to watchfulness (vv. 33-37) lest His coming should find them ill prepared and irresponsible. So, "what I say to you, I say to all: be watchful" (v. 37 — a motif and a technical term, common in early Christianity: 1 Cor. 16:13; 1 Thess. 5:6; 1 Pet. 5:8; Rev. 3:2f.; 16:15).

The last three chapters of Mark cover a period between the plot to arrest Jesus (14:1f.) and the events of the crucifixion, the burial, and the visit of the women to the tomb in 16:1-8. As it stands, the record appears to compress all the happenings into a few days, set around the observance of the Jewish festival of Passover (cf. Jn. 12:1, where the anointing occurs six days earlier than Passover). Unfortunately it is not clear which day of the week coincided with the actual Passover observed in Judaism as Nisan 14 (sunset) or 15 (daylight hours). The preceding two days (14:1) were filled with the incidents of ch. 14, including the anointing at Bethany (14:3-9) by an unnamed woman (not Mary Magdalene nor the woman of Lk. 7), who wished, in her costly demonstration, to show her love and possibly to acknowledge His messianic status by supplying the consecrating oil (cf. 1 K. 19:16; 2 K. 9:3) for His kingly office. Perhaps, too, she glimpsed something of His destiny as one fated to die — at least this is how Jesus is reported to have received the action (v. 8). R. H. Lightfoot's comment is apposite here: "The Passion is the supreme act of the Messiah, and conversely the Messiahship of Jesus is the explanation of the Passion" (*History and Interpretation*, p. 141). The woman with the anointing oil perceived, as in a mystery, the interrelation between messiahship and Passion.

In stark contrast to such a "lovely deed" (14:6), the next incident reveals something of the hardness and callousness of the human heart. In exchange for money JUDAS ISCARIOT (probably "man of Kerioth" and therefore, unlike the other disciples, a southerner) agreed to betray the Lord by revealing something of His movements, so that the authorities could seize Him quietly (cf. Lk. 22:6).

The intention of the chief priests and scribes, reported in 14:2, was to apprehend Jesus before the festal season; but 14:12-16 seems to be at odds with the earlier chronological notice, and contains a difficult statement, apparently equating the first day of the unleavened bread with the time when the Passover lambs were slain in the temple. In fact, the lambs were killed during the hours from 2:30 p.m. to sunset on Nisan 14, and the "first day of unleavened bread" began at 6 p.m., the commencement of the next day, Nisan 15. Possibly, with W. C. Allen (comm. [1907], *in loc.*), we should accept that the text originally read (at 14:12) *pró tḗs hēméras*, "before the day of unleavened bread"; or perhaps Chwolson (*Das letzte Passamahl Christi* [1908], pp. 133ff.) is correct in arguing that the Aramaic underlying this verse has been misunderstood, and that the *Urschrift* read: "on the day before the feast of unleavened bread," i.e., Nisan 14 (cf. Jeremias, *Eucharistic Words*, pp. 2-4).

The following paragraphs represent the last meal of Jesus with His disciples as the Passover celebration (to be dated, from Mk. 14:17ff. onward, Nisan 15, according to the usual view of 14:12). This scheme contrasts with John, who dates the supper one day earlier and therefore regards it as an "anticipatory" Passover (or some other meal, such as sabbath kiddush or rabbinic *ḥ*^{a}*bûrâ*), and makes the official Jewish Passover celebration on Nisan 14 coincide in time with the death of Jesus, God's paschal lamb (Jn. 1:29), on the cross (cf. Jn. 18:28, 39; 19:31, 42; etc.).

Whether the last meal was a regular (Jeremias, *Eucharistic Words*) or an anticipated (V. Taylor, *Gospel According to St. Mark* [1952], pp. 664ff.) Passover, it is clear that it must be understood against the background of the Passover ritual and Haggadah as a special example of Jewish table fellowship. From the latter come the notions of blessing God as the giver of food and drink (14:22) and the common life which binds the participants at the table. The paschal liturgy, drawn from Ex. 12 and interpreted in the Haggadah for Passover, explains the use of the bread and the cup as "interpretive symbols," recalling the events of the Exodus and enabling the Jewish families to relive the redemptive experience their fathers had known at first hand in Egypt (see A. J. B. Higgins, *Lord's Supper in the NT* [1952], and R. P. Martin, *Worship in the Early Church* [1974], pp. 110-19).

After singing the Hallel hymns (taken from Pss. 113–118) the band went out into the night, warned by the solemn announcement of impending desertion, betrayal, and death (14:26-31, 42). The failure of the disciples is typified (and aggravated) by the complete insensibility of the chosen three in Gethsemane (vv. 32-52); Peter's lack of vigilance received special rebuke (v. 37), and no exoneration (nor, it may be noted, explicit censure) was given to Judas' infamy. Jesus greeted his arrival with "He's got his money" (*apéchei*, a commercial term, used in the papyri for a receipt), and placed Himself in the hands of His foes. An attempt was made to defend Him, and an unnamed bystander lost his ear (possibly by accident). Jesus curtly rejected any such armed defense, which would have made Him appear a (Zealot?) brigand whose cause needed to be bolstered by violence and hatred. Up to the last, He was seen to be refusing all unworthy notions by which His destiny may be averted.

The tantalizing pericope (14:51f.) has been taken as an autobiographical insertion made by John Mark (so, e.g., Zahn); but had Mark been an eyewitness of these events, it is hard to explain why the dating of the last meal is so imprecise and uncertain. And the "awkward connexion" with the foregoing narrative "proves that he [the Evangelist] is dependent on a source for the story" (Nineham, comm., *in loc.*).

The trial scenes are divided into two parts (*see* JESUS CHRIST, ARREST AND TRIAL OF; and see *NBD*, pp. 1295f.).

JESUS CHRIST

Judas's betrayal of Jesus. Frieze (12th cent. A.D.) attributed to Michael Master, St.-Gilles-du-Gard Church, Provence, France (Rosenthal Art Slides)

First, the arraignment before the Sanhedrin appears to have had its object in fastening some accusation upon Jesus that would have made remission to Pilate a necessary next step. It is doubtful, then, if we should speak of the first hearing as a judicial "trial." More likely it was a preliminary investigation, of an informal character and somewhat careless about strict legal procedures. Hence the oft repeated discussions about the illegality and irregularity in this section: e.g., that witnesses were suborned (vv. 55-59); that Jesus' claims to be able to overthrow the temple (vv. 58ff.) and to be the Messiah (v. 61) were not per se tantamount to blasphemy; and that the session was at night and during the Passover season (see Jeremias, *Eucharistic Words*, pp. 52f.). All these points show that the nocturnal "trial" was more in the nature of a preparatory inquiry. Moreover, if the Jewish "trial" were self-contained, why did not the authorities, once the sentence had been passed (v. 64: "And they all gave their judgment against him as deserving of death"), carry out the prescribed penalty for blasphemy or heresy according to the law, stoning (Lev. 24)? (See Jn. 19:7.) The answer may be found in Jn. 18:31f., which records the Jews' inability to kill anyone (see C. K. Barrett's full note in his comm. on John, *in loc.*). G. D. Kilpatrick, in his pamphlet *The Trial of Jesus* (1953), has endeavored to show that the earlier investigation was an effort by the Sadducean aristocracy to prove to the Pharisees that Jesus was a public danger, while the Sadducees reserved the charge of treason, the crime of lese majesty, for Pilate's court, thereby intending to implicate the Romans with the major share of responsibility for His death. In keeping with this charge, the question presented to Pilate was one of politics. Jesus claimed to be a king and thus was guilty of anti-Roman activities (amplified in Lk. 23:2). Pilate was faced with an unenviable set of choices: either to release Jesus at the expense of incurring the increased enmity of the Jewish leaders, whose tender susceptibilities he had already aroused (Lk. 13:1ff.), or to bow to the claims of expediency and condemn Jesus in order to quiet the clamor of His enemies. He tried to escape the dilemma by offering the freedom of Jesus in exchange for another Jesus, surnamed Barabbas (given in some MSS in Mt. 27:16f.; see Deissmann, in Bell and Deissmann, eds., *Mysterium Christi* [1930], pp. 19-21). But the crowd, incited by the priests, opted for Barabbas, a Zealot leader.

In Mark's account the Roman authorities are presented in a neutral light, and Pilate in particular is viewed as a man caught in a very difficult position. The Jews, on the other hand, are the instigators (vv. 11, 13, 15) and are the pressure group, exerting a baneful influence on the procurator, who knows full well how they are motivated (vv. 10, 14). In the Matthaean version (27:24f.) this placing of the onus on the Jews is clearly emphasized, as P. Winter, *On the Trial of Jesus* (1961), remarks. But Winter's reconstruction is not free from difficulty, as A. N. Sherwin-White shows (*Roman Society and Roman Law in the NT* [1963]).

The tragedy moves now to its close, with the chief theme — that Jesus is the Messiah, incriminated by the Jewish leaders and so branded as a rebel against the empire by the Roman officials — picked up in the soldiers' mockery (15:16-20). Along the *Via Dolorosa* He stumbled and needed the help of a passerby, Simon, identified (perhaps because well known to the Christian community at Rome in Mark's day; cf. Rom. 16:13) as the father of Alexander and Rufus, to carry the *patibulum* or crosspiece of this "most cruel and hideous of punishments" (*crudelissimum taeterrimumque supplicium* in Cicero's onomatopoeic description, *In Verrem* v.64).

At the scene of the cross, the same charge as at the trial was leveled at Him as a mocking taunt: "Let the Messiah the king of Israel come down from the cross, that we may see and believe" (15:32). The Jews were hostile to the last as the Romans maintained a reserved impartiality, passively accepting an ugly situation. In fact, passivity turned to a more positive attitude when a Roman centurion announced the early Christian confession: "Truly this man was a (the) Son of God" (15:39; the absence of the definite article in the Greek is no proof that this statement should be understood in an indefinite sense; see E. C. Colwell, *JBL*, 52 [1933], pp. 12-21). Mark evidently intended that this confession should represent the firstfruits of gentile Christianity, as the earlier mention of a kindly deed (v. 36, where the "vinegar" means the soldiers' *posca*, a mixture of sour wine and egg with water, drunk by Roman soldiers on duty) seemed to follow the same tradition, namely, to present the Romans in a good light.

Early Christian understanding of Christ's death evidently included an overt reference to His burial (in 1 Cor. 15:4, which is usually taken to be a pre-Pauline credo, emanating from an Aramaic-speaking community [so A. M. Hunter, *Paul and His Predecessors* (2nd ed. 1961), pp. 117f.], and in Acts 2:29; 13:29). The pericope (15:42-47) that relates how Joseph of Arimathea made himself responsible for this office serves an evidential purpose. It certifies that He who was crucified really died, and tasted the bitterness of mortality. Included here may be the beginnings of Christian speculation about the *triduum mortis* (the three days of death), also tackled in 1 Pet. 3:18ff.; 4:6 to throw light on what the Lord did between Good Friday and Easter morn.

In primitive Christianity the validity of the assertion "Christ is alive" rested upon the personal appearances of the living Lord; the fulfillment of the prophetic Scriptures, notably (apparently) Hos. 6; and the conviction, of which Mk. 16:1-8 is a witness, that the tomb was open, with the great stone removed, when the women (who had been last at the cross, 15:40f.) were the first to visit it on Nisan 17 (16:4). It was open, but not exactly empty, for "a youth sitting on the right side, wearing a white robe," was inside and passed on the message: "He has risen, he is not here; here is the place where they laid him. But go and give this message to his disciples and Peter."

With the women's reaction in startled amazement to this news, the Gospel suddenly breaks off: "for they were afraid" (16:8a). This abrupt ending may be explained either as accidental (perhaps the last section was lost or destroyed) or intentional (perhaps the writer was caught in a pogrom and hurriedly concluded his work or intended in

any case to end his Gospel at that exact point). No one knows. But whether by mishap or interruption or deliberate intention, the Evangelist expects his readers to be able to complete the story for themselves; in v. 7 he records the promise of an appearance in Galilee whither the risen Christ as shepherd will lead His scattered and bewildered sheep (cf. 14:28). In what is the final metaphor of the Gospel, Mark has pointed forward to the Parousia, for 14:27 ("I will strike the Shepherd, and the sheep shall be dispersed") uses the eschatological technical term (Gk.) *diaskorpizō* to indicate a time of tribulation before the end of the age (see Jeremias, *Jesus' Promise*, p. 64). Hence the promised gathering of the scattered flock is a symbol of the approaching redemption for all the Gentiles (Mt. 25:31f.; Jn. 11:51f.).

V. Theological Significance of Jesus' Life.–At this point we leave the area of historical inquiry and enter the field of Christian faith. The record of the Lord's earthly life and ministry inevitably raises the fundamental issue of what manner of man this is, and what is the Christian estimate of that life which, once lived out under a Palestinian sky long ago, was described by an early disciple as "the light of men" (Jn. 1:4). And the answer to this question lies at the very heart of what is called Christianity.

> From beginning to end, in all its various phases and aspects and elements, the Christian faith and life is determined by the person and work of Jesus Christ. It owes its life and character at every point to Him. Its convictions are convictions about Him. Its hopes are hopes which He has inspired, and which it is for Him to fulfil. Its ideals are born of His teaching and His life. Its strength is the strength of His spirit.
>
> (J. Denney, *Jesus and the Gospel* [1908], p. 1)

The simplest answer to the question posed above — and this is the classic statement of historic Christianity — is that He is true God and true Man. The discussion will follow this pattern, in the inverse order.

A. His Manhood. "The evangelists nowhere seek to prove Jesus' manhood; it is for them a tacit and self-evident assumption" (H. R. Mackintosh, *Person of Jesus Christ* [1913], p. 10). The evidence may be displayed in a number of complementary ways. The Jesus of the Gospels possessed a human body, which grew in the normal processes of development (Lk. 2:40, 46, 51f.). He was subjected to the ordinary human experiences of hunger and thirst, weariness and fatigue, pain and suffering; and at length He underwent a truly human death and burial (Mt. 21:8; Jn. 4:6; Mt. 8:24; Jn. 11:35; 19:28; and the Passion narratives).

He also shared our emotional life, entering into human joy and sympathy, and expressing affection and a desire for human companionship and support (Lk. 10:21; Mt. 9:36; Mk. 10:21; Mt. 26:37-40). At the other end of the emotional scale, He rose against the ravages of disease and sin with anger (Mk. 1:41 var.; 3:5; 11:15ff.). He. 4:15 sums up this twin aspect of the Lord's emotional life in a memorable sentence.

He possessed a true human mind, so that we find Him asking questions for information (Lk. 8:45; Jn. 11:34; Mk. 6:35; 9:21; but cf. Jn. 6:5f.). Mk. 13:32 poses something of a problem, with its apparent instance of Jesus' ignorance. Of this problem we may say: (1) it is not a confession of error but an admission of lack of knowledge; (2) as the church father Hilary of Poitiers realized (*De trinitate* ix.71, 75, cited by C. E. Raven, *Apollinarianism* [1923], p. 96), this admission is really an indirect witness to His greater-than-human power, for He knows that no one else knows except God, and that fits Jesus into a unique category.

He is described as sharing spiritual experiences, e.g., prayer. "No Christology is true which makes a Christ for whom prayer is either unnatural or impossible" (Mackintosh, p. 399). The record of His temptations (Mt. 4:1-11 par. Lk. 4:1-3; 22:44; cf. He. 4:15; 5:7) raises the question of how, if Jesus was sinless and divine, temptation could be a meaningful experience for Him. The minimal comment will include the following: (1) The temptations are convincing evidence of a real manhood, not a piece of play-acting. (2) The temptation in the wilderness came to Him from outside sources, not through inward depravity or a fallen nature. (3) The temptation was genuine, yet the victory was inevitable — a paradox on which the wise words of William Temple (*Christus Veritas* [1924], p. 217) throw some illumination. (4) Victory, therefore, required the personal exercise of His will to overcome the solicitation to evil. "He overcame . . . exactly as every man who does so overcomes a temptation — by the constancy of the Will" (Temple, p. 147). (5) Against the objection that if Jesus was sinless He could not have experienced real temptation, we may doubt the assumption that if a man does not commit certain sins, it must be because he has never felt the appeal of them. The man who yields to a specific temptation's pull has not felt its full power. He has given way to it while the temptation had yet (so to speak) something in reserve. Only the man who does not yield to a temptation knows the full force of the enticement. The entirely sinless one must therefore be the only one who really knows the full extent of temptation's power, because He has endured its utmost strength and never yielded (He. 2:18; cf. L. Morris, *Lord from Heaven* [1957], pp. 49-52).

The true humanity of Jesus Christ has important theological consequences, clearly exposed by H. R. Mackintosh, pp. 404f.; for the modern debate on the "impersonal manhood" of Christ and Barth's doctrine of His human nature, the books of D. M. Baillie, *God Was in Christ* (1948), and H. Johnson, *Humanity of the Saviour* (1962), may be mentioned.

B. His Deity. Confining our immediate attention to the Gospels, we may seek the data that portray the deity of Jesus; but first a caveat must be entered. The lines of evidence are more indirect and inferential than forthright and declarative. Jesus did not parade His divine relationship nor bludgeon His hearers into submission by a display of His deity, nor make (at least in the Synoptics) overt claims to divinity. The nearest there is to the last-mentioned feature is the Fourth Gospel's record of His use of the magisterial formula I AM (on which see E. Stauffer, *Jesus and His Story*, pp. 142ff.).

Jesus in His public and private teaching and in His recorded prayer life reveals something of His unique relationship to God. God is called by the tender name of *Abba* ("my dear Father," in itself a summary of Christology, as J. Jeremias, *Central Message of the NT* [Eng. tr. 1965], pp. 9-30, has shown), and Jesus knows Himself to be uniquely the Son of the Father (decisively in Mt. 11:25-30, on which the study of A. M. Hunter, reprinted in his *Teaching and Preaching the NT* [1963], pp. 41ff., should be consulted). Mackintosh sums up: "[Sonship] is the constitutive factor of His being. The life of the Father and the Son is one life; and either can be known only in the other" (p. 28).

The Lord's sense of authority shines through many of His deeds and words. As an interpreter of the OT (Mt. 5–7; 19:3-9), as the founder and head of the Church (Mt. 16:18f.; cf. O. Cullmann, *Peter* [Eng. tr. 1953], pp. 155ff.), as conveyer par excellence of the revelation of God (Jn. 8:12; 14:6-9), as the object of faith and the source of life (Mk. 8:34-38; Jn. 5:40; 6:29, 40; on which T. W. Manson

comments, "in the last degree exacting, without being in the least degree arrogant," *Teaching of Jesus*, p. 211), in the exercise of divine prerogatives (such as declaring sins to be forgiven in His own name, Mk. 2:10; asserting His role as future judge of man, Mt. 7:21-23; 25:31-46; Jn. 5:22-30; and coupling His name with that of the Father and the Spirit, Mt. 28:18ff.; for the authenticity of this passage see R. P. Martin, *Worship in the Early Church* [1974], pp. 94-97), and in the names and titles He tacitly accepted (esp. the enigmatic "Son of man," which Stauffer declares to be "just about the most pretentious piece of self-description that any man in the ancient East could possibly have used" [*NT Theology* (1955), p. 108]) — in all these ways He shows Himself to be a unique figure in God's economy of salvation. The Scriptures point to Him, and are fulfilled in His ministry (Lk. 4:16-27). John the Baptist is His herald but is to be sharply distinguished from Him, for he prepared the way and bore witness to one greater than himself — Jesus, the inaugurator of a new age, the messianic era for which the OT prophets yearned.

Perfect manhood, seen at its highest and holiest; unique relationship to the Father, whose character is embodied in Jesus of Nazareth, in His life, death, and resurrection — these are the two facts that emerge from a reading of all the Gospels. They lay the foundation on which the Apostolic Fathers built their superstructure of Christology, and on which later the church fathers erected their doctrines and dogmas of the Incarnation and the trinity. But whether in embryo or in full growth, the truth to be discerned is nothing less than the ringing tones of the *Te Deum:* "Thou art the King of glory, O Christ; Thou art the everlasting Son of the Father."

See Plates 31-37.

JESUS CHRIST, ARREST AND TRIAL OF.

I. Introduction
II. Narratives
  A. Synoptic Tradition
  B. Johannine Tradition
III. Proposed Solutions to the Problems
IV. Role of the Sanhedrin
V. Roman Trial
VI. Significance of the Trials
VII. Conclusion

I. Introduction.—The arrest, trial, and crucifixion of Jesus of Nazareth are facts of history. As events, their historicity is undoubted, and supported in both biblical and extrabiblical literature of the first Christian centuries. The theological significance of these events, on the other hand, admits the possibility of debate; and to this we shall return in due course. Moreover, the precise details of the *trial* of Jesus, as these appear in the four Gospels, need to be clarified as well as harmonized. In particular it will be necessary to decide what part is played in the whole episode by the SANHEDRIN on the one hand, and PONTIUS PILATE on the other.

That inquiries into the trial of Jesus have in the past been undertaken in the interests of anti-Semitic polemic is a matter for regret, and indicates the importance of elucidating the historical details of the incident so far as possible, and also of conducting this kind of investigation in a spirit of Christian devotion and humility.

II. Narratives.—The accounts of the arrest and trial of Jesus that we are given by the Synoptists and the fourth Evangelist apparently differ in some respects.

A. Synoptic Tradition. 1. Arrest. At the time of His arrest Jesus was in Gethsemane with the disciples. Mark and Matthew record that Jesus took Peter, James, and John, and withdrew with them from the main body of the disciples; Mark alone suggests that at the moment when Judas Iscariot arrived with the crowd, Jesus spoke the word about the Son of man being betrayed (14:41) to those three, and not to the disciples in general. All three Synoptic Gospels mention that the kiss of Judas was the signal for the actual arrest. It is likely that what Judas really betrayed was the whereabouts of Jesus, rather than His identity. In the darkness, however, the kiss would no doubt have assisted the recognition of Jesus by the authorities (Mk. 14:44); and probably Judas also hoped by this means to allay suspicion on the part of the Lord Himself.

Again, all the Synoptists record the defensive reaction of a disciple (Matthew and possibly Luke) or a bystander (Mark), who cut off the ear of the high priest's servant. Matthew alone adds the saying of Jesus at this point, "All who take the sword will perish by the sword" (26:52), followed by the claim that divine deliverance ("twelve legions of angels," v. 53) is available if needed, without recourse to arms. Luke alone preserves the tradition that Jesus healed the servant's ear (22:51). All three Gospels, finally, contain the dignified response of Jesus to His captors.

Both Mark and Matthew see this event as the fulfillment of Scripture (Mk. 14:49; Mt. 26:56), but Matthew alone says that Jesus Himself spoke of it in these terms (Mt. 26:54, 56); Luke has instead the dominical saying, "This is your hour, and the power of darkness" (22:53). Only in Mark appears the tradition of the young man, possibly the Evangelist himself, who then escaped capture by fleeing naked (14:51f.); and both Mark and Matthew record the desertion of Jesus by all the disciples.

That the arrest of Jesus took place during the Passover period does not necessarily contradict the decision of the authorities not to apprehend their prisoner "during the feast" in case of riot. The Greek (*mḗ en tḗ heortḗ*, Mk. 14:2; Mt. 26:5) is notoriously ambiguous in any case; but it is more than likely that the Jews regarded the subsequent offer of Judas as too good to miss, and allowing of no delay.

2. Jewish Trial. There follow in the Synoptic account two trials of Jesus in Jerusalem, the first before Caiaphas the high priest, named only by Matthew, and the second before Pilate. Luke's version differs from that of Mark and Matthew in placing the chief examination of Jesus by the Jewish authorities before the council (Sanhedrin), early on the day after the arrest and immediately before the Roman trial (22:66-71). According to him a plot had already been arranged to trick Jesus into treasonable speech, so that He could be delivered to the governor's jurisdiction (20:20). This duly happened the following morning; during

the intervening hours of the night the mocking of Christ took place. In Luke also, the leading questions were asked and judgment was given by the council at large.

In Mark and Matthew, however, the Jewish trial took place immediately. The first action of the chief priests and the whole council was to look unsuccessfully for evidence ("false testimony," Mt. 26:59) on which to prosecute Jesus. Having failed to agree among themselves, false witnesses (Mt. 26:60; Mk. 14:56) eventually accused Jesus of blasphemy under the Jewish law, for threatening to destroy the temple and rebuild it in three days. (No exact statement of this kind is attributed to Jesus in either Mark or Matthew; but cf. Mk. 13:2; Mt. 24:2.) Also, it was the high priest himself in Mark and Matthew who interrogated Jesus about His identity; although when the assembly as a whole was asked for a verdict, as in Luke's account, Jesus was declared by *them* to be "worthy of death" (Mk. 14:64; Mt. 26:66). Mark and Matthew report the reluctance of Jesus to answer His accusers, but in all three Gospels He claimed, explicitly (Mark) or implicitly (Matthew, Luke), the titles of Christ and Son (Mark "Son of the Blessed"; Matthew, Luke "Son of God"). The explicit claim of Jesus at Mk. 14:62, "I am [the Christ, the Son of the Blessed]," became in some unimportant witnesses, no doubt under the influence of the version in the other Evangelists, the more hesitant "You say that I am."

According to all three Evangelists this claim of Jesus, with its accompanying eschatological statement and (in Mark and Matthew) prediction of the Parousia, was regarded as the ultimate blasphemy, and sufficient reason by itself for condemning the prisoner to death.

The interlude of Peter's denial occurs at the same point in all the Synoptic accounts, i.e., on the night of the arrest. Mark and Matthew then report a second meeting of the chief priests and elders (and scribes, with the whole Sanhedrin, Mk. 15:1) the following morning, for the purpose of a joint consultation. (This is the point at which Luke places the actual trial of Jesus before Caiaphas.) The subject according to Matthew is how to secure the death of Jesus; but the debate is not reported by either Matthew or Mark in any detail, and Jesus was hurried off seemingly at once to Pilate.

3. Trial Before Pilate. Before the Roman governor, the charge against Jesus shifted from that of blasphemy in terms of the Jewish law to that of treason against the Roman state. Luke alone gives us the precise wording of the accusation (23:2); the general charge of "perverting our nation" is specified under the two subsidiary heads of "forbidding us to give tribute to Caesar" and "saying that he himself is Christ a king." A similar accusation is implied in Mark and Matthew by Pilate's opening question, "Are you the King of the Jews?" (Mk. 15:2; Mt. 27:11), which also appears in the Lukan narrative (23:3). In all three Synoptists the reply of Jesus is, "You have said so."

At this point Luke's tradition departs from the other Synoptists. According to Luke, Pilate protested the innocence of Jesus, at which the accusers became more insistent. They claimed that He had caused disturbance as far north as Galilee (23:4f.). Learning that Jesus was in fact a Galilean who belonged to the jurisdiction of Herod, Pilate (under the terms of the emerging legal practice of *forum domicilii*) sent the prisoner off to Herod, who happened to be in Jerusalem at the time. But the trial before Herod was an abortive affair, in spite of "vehement accusation" by the religious authorities (23:10). This is partly because Jesus maintained a dignified silence, and partly because Herod was interested only in gratifying his personal desire to see some "sign" performed. After a second mocking of Jesus, therefore, in which Herod himself participated, the prisoner was returned to Pilate for a second trial.

The Synoptic account thereafter follows a similar pattern in all three Gospels, except that Matthew alone includes the incident of the warning sent to Pilate by his wife (27:19). Pilate marveled at the silence of Jesus in the face of prosecution (Mark, Matthew), and finding Him not guilty, offered to scourge and release Him (Luke). At this point the *privilegium paschale* (the existence of which is questioned by some) was invoked, and Pilate asked whether the prisoner Barabbas (whose full name was probably Jesus Barabbas) or Jesus "who is called Christ" should be released under its terms (Mark, Matthew). In Luke the people themselves took the initiative in asking for the release of Barabbas. All three Synoptists represent Pilate as being in fact anxious to release Jesus; but under pressure from a crowd incited by the authorities (Mark, Matthew), he yielded to the demand for the crucifixion of Jesus in order to avoid further trouble, in spite of being unable to find any evil of which He could be justly accused. It is Matthew, not surprisingly, who records the incident of Pilate's washing his hands in public, and the willingness of the Jewish people to assume responsibility for the judgment (27:24f.). Pilate released Barabbas, and after scourging Jesus (Mark, Matthew), delivered Him to be crucified. It is at this point, after the trial before Pilate and before the crucifixion, that Mark and Matthew mention the mocking of Christ which Luke has already described.

Although the accounts in the Synoptic Gospels differ in a number of details, they agree on the general character of the trial of Jesus. In this tradition Jesus was arraigned before the Jewish tribunal, and judged worthy of death, on a charge of blasphemy. But the narratives appear to suggest that although the Sanhedrin could sentence a prisoner to death, the execution could not be carried out apart from reference to Roman authority, and indeed (although this is never stated in so many words) that only Pilate could actually cause Jesus to be put to death. Accordingly Pilate gave the final sentence, but on the grounds of what had by now been turned into a political charge.

B. Johannine Tradition. 1. Arrest. The account of the arrest and trial in the Passion narrative of the Fourth Gospel includes some notable but not necessarily conflict-

ing variations from the Synoptic record. According to John the arrest of Jesus took place in a garden, otherwise unnamed, "across the Kidron Valley" (18:1); it was apparently a familiar meeting place for Jesus and His disciples, and one therefore well known to Judas the betrayer. There is no mention of the kiss of Judas, since in this Gospel Jesus, portrayed as in complete command of the situation throughout, took the initiative in giving Himself up to the soldiers.

The effect of the self-identification of Jesus (using the theologically significant words *egō eimi*, Jn. 18:5f., 8) was to cause the virtual collapse of the opposition (v. 6); John specifies the character of the arresting crowd as partly military. Still in control, Jesus then ordered the release of His disciples (vv. 8f.). The fourth Evangelist identifies the supporter of Jesus who cut off the ear (Mk., Mt.; Lk., Jn., "right ear") of the high priest's servant as Simon Peter; and, no doubt following his own tradition, the writer further gives the name of the servant as Malchus. The rebuke of Jesus to Peter, "Put your sword into its sheath" (v. 11), also contains a typically Johannine reference to the Son's voluntary acceptance of the Father's will.

The Synoptic and Johannine narratives of the arrest, therefore, can be said to preserve a basically similar pattern. The chief divergences are most easily accounted for by the probable independence of the apostolic tradition lying behind the Fourth Gospel.

2. Jewish Trial. In John the trial of Jesus by the Jewish authorities is recounted briefly, and interwoven with the narrative of Peter's denial. According to the Textus Receptus the examination was apparently conducted before Annas (18:13), the father-in-law of Caiaphas; mention of Caiaphas himself does not occur until v. 24 (so, e.g., p^{66}, *ca.* A.D. 200). It is possible that the TR of Jn. 18:13-24 retains an early scribal error, and that following the Sinaitic Syriac version (4th-5th cents.), v. 24 should be read immediately after v. 13; or (so the twelfth-century minuscule 225) that its proper placing is between vv. 13a and 13b (see R. V. G. Tasker, comm. on John [*Tyndale*, 1960], p. 198). In this case the visit to Annas is extremely brief, and the Johannine tradition coincides with the Synoptic by making Caiaphas the president of the tribunal. But if Annas was indeed the president, there is no necessary error in the reference to him as "high priest," although he was deposed from that office in A.D. 15. The high-priesthood was regarded by the Jews as an office for life (cf. Mish. *Horayoth* iii.4); and in any case the influence of Annas on his successors seems to have been lasting (cf. also Lk. 3:2).

In the course of the Jewish "trial" Jesus was questioned about His disciples and His teaching (18:19), but not (except by implication) about His identity. There is no mention of either a charge or a sentence, and Jesus was sent off without delay to the residence of the procurator.

3. Trial Before Pilate. The second trial of Jesus in John is more extended in form than its Synoptic parallel. It is conducted almost dramatically on an "inner stage," the praetorium itself, and an "outer stage" before the crowds. The opening of the trial is *coram publico*, but when Pilate asked for the charge it was not specified; instead there was a vague reference to Jesus as an "evildoer" (18:30). Pilate's order, "Take him yourselves and judge him by your own law," was countered by a statement from the Jews, "It is not lawful for us to put any man to death" (v. 31), which seems to reflect the state of affairs implied in the Synoptic version.

The scene shifted to the inner stage, and a private discussion ensued between Pilate and Jesus on the subject of kingship. The sequence of remarks in 18:33-38 becomes even more intelligible if the words of Pilate, *Sý ei ho basileús tōn Ioudaiōn* (v. 33), which are also found in the three Synoptic accounts, are taken not as a question but as a statement. Pilate then returned to the populace and protested the innocence of Jesus; but when he invoked the *privilegium paschale* in the hope of releasing his prisoner, the crowd cried instead for Barabbas.

The scourging and mocking follow at this point in the Fourth Gospel (19:1-3), after which Pilate brought Jesus out to the people, who demanded His death. Pilate tried again to transfer the responsibility for the execution to the Jews ("Take him yourselves and crucify him," 19:6), and only then did the gravamen of the charge against Jesus by the Jews emerge. It is the definitely theological accusation of blasphemy: "We have a law, and by that law he ought to die, because he has made himself the Son of God" (v. 7). The responsibility for the death of Jesus, as Matthew makes clear, rested from this point onward with the Jews, even if Pilate, afraid of being himself accused of treason against Rome, gave the final sentence of death (19:12-16).

We are now in a position to conclude that the Synoptic and Johannine versions of the trial of Jesus contain some interesting divergences. The chief variation is in the nature of the accusation preferred against the Lord. In the Synoptic Gospels He is charged with blasphemy before Caiaphas but with anti-Roman activity before Pontius Pilate, and sentence is given by the Roman governor on political grounds. In John the charge before the high priest is not explicitly stated, while before Pilate Jesus is accused of offenses against both the Roman and Jewish law (in that order). The title "King of the Jews" could be construed either politically or theologically, and no doubt provided the bridge between the double charge; but now Pilate's verdict, surprisingly enough, is apparently given on the basis of the charge of blasphemy. In neither tradition is the reason for the transfer of the trial of Jesus from the Jewish to the Roman authorities made really clear, although both contain the suggestion (especially strong in John) that Pilate was able to authorize an execution which the Jews could only recommend.

III. Proposed Solutions to the Problems.—Hans Lietzmann, followed by Paul Winter, resolved the apparent conflict between the Synoptic and Johannine traditions by simply denying the historicity of the trial before the Sanhedrin, and asserting that Pilate's sentence was given, and can only have been given, on political grounds. This runs counter to the appearance in all four Gospels of an examination by the Jewish authorities, and to the Johannine representation of Pilate's verdict against Jesus as one given on a theological charge.

Winter regarded the account of the trial of Jesus in the Gospels as "religious" rather than "historical" in its aim (p. 3). The idea that the Jews needed Pilate's authority to endorse their sentence of death is false, according to him, since the Sanhedrin was already in a position, at least before A.D. 70, to order execution (pp. 74, 87f.). As a result only certain features of the arrest and trial of Christ belong to what Winter called the stratum of "primary tradition." They are: the arrest itself, the transfer of Jesus to the high priest's residence, the brief Jewish council held the morning after the arrest and the dispatch to Pilate, the trial before Pilate, the Barabbas episode (already in Mark an editorial adaptation), the sentence of death passed on Jesus by Pilate on a charge of sedition, and the scourging and mockery (pp. 136f.). All the other incidents and details, in Winter's view, must be attributed either to "secondary tradition" or to "editorial accretion." The assumption made by both Lietzmann and Winter (who

both follow Jean Juster) is that the Sanhedrin was able both to sentence prisoners to death *and* to carry out the execution. According to the truth of this premise their thesis stands or falls, since it is on the belief that the Sanhedrin possessed this power that the double trial, Jewish as well as Roman, is denied. The general critical position, to summarize, is that the Jewish law court had the authority to pass and carry out capital sentences, but that Jesus was in fact condemned to death by Pilate for political reasons, even though He Himself was without revolutionary ambitions (cf. Winter, pp. 10, 148).

Matthew Black (pp. 19-33) did not support the contention that the trial of Jesus by the Sanhedrin is unhistorical. Instead he restated the hypothesis (first put forward by John Hawkins) that the passion narrative in Luke is based on a non-Markan tradition into which material from the Second Gospel has been inserted. This would account for the notable addition in the Lukan version of a trial before Herod, and also for minor agreements in the trial narratives between Luke and Matthew against Mark. (Cf. also Catchpole, pp. 153-220.)

But Black also assumed that the Markan narrative telescopes the sequence of events between the arrest and crucifixion of Jesus, which resulted in an impression of undue if not impossible haste. It is noteworthy, however, that on the evidence of Dt. 17:12f. and Mish. *Sanhedrin* xi.4 the death penalty was prescribed for the man who disobeyed the Jerusalem high court; further, those accused of crimes specified under this head by the Torah (including false prophecy) were to be tried and sentence given before "all the people" during one of the feasts (Passover, Pentecost, or Tabernacles). The rushed assembly of the Sanhedrin at night, followed by the speedy trial and, after due reference to Rome, immediate execution of one who was accused of undermining Jewish authority and acting as a false prophet (Mk. 11:28; 14:58, 61), is perfectly consonant with this legal state of affairs. (See further J. Jeremias, *Eucharistic Words of Jesus* [Eng. tr. 1955], p. 53.)

Black suggested that the period occupied by the arrest and trial was "longer than our Gospels make it out to be" (p. 32), and that this accordingly affects the dating of the arrest and crucifixion, as well as of the Last Supper. Traces of a tradition that the arrest took place earlier in the Passion week than the eve of the crucifixion, which is the Synoptic date, are to be found in the Fourth Gospel, which almost certainly follows an independent and historically reliable tradition. There the arrest apparently occurred "before the feast of the Passover" (Jn. 13:1), immediately after the foot washing; and the crucifixion took place on the day of Preparation for the Passover (19:14), 14 Nisan, rather than as in the Synoptic version on 15 Nisan, the day of the Passover itself.

Black's conclusion was that the divergences between the Synoptic and Johannine chronologies reflect a dispute about the date of the Passover in the year of the crucifixion; and he noted that the patristic tradition that (as in John) the Last Supper and the arrest of Jesus took place early in the Passion week is possibly supported by a festival calendar of the Qumrân sectarians (pp. 30ff.). In spite of the degree of radical argumentation involved in Black's study, therefore, it provides a measure of support for the historicity of the Gospel records of the trial as a whole.

Winter (pp. 24f.), in denying the reliability of the Evangelists' report of the trial of Jesus before the Sanhedrin, was particularly skeptical about the claim in Mk. 14:53b, 55-64 that Jesus was tried by the Jewish authorities *at night*; although if the nocturnal hearing reported in Mark (Matthew and John) was purely informal, it would not necessarily have been illegal. Legal status was then formally conferred in the morning on the decisions of the night. But in light of the morning assembly, mentioned at Mk. 15:1, Winter regarded the night examination as a secondary importation into an earlier tradition (p. 25), although he was prepared to accept as factual the suggestion of all the Evangelists that Jesus spent the nocturnal interval between His arrest and the trial before Pilate in the residence of the Jewish high priest.

It is worth noting, however, that with the exception of Luke, who reports the single Jewish trial of Jesus as taking place in the morning, the Synoptists do not specify the purpose of the morning assembly of the Sanhedrin, except in general terms (they "held a consultation," Mk. 15:1; they "took counsel against Jesus to put him to death," Mt. 27:1). There is no reason to suppose that this refers to an actual trial in Mark and Matthew, which would then provide us with a curious doublet. In these accounts, as Sherwin-White pointed out (pp. 44-46), the Jewish authorities timed their proceedings so as to be in a position to arrive at the praetorium at precisely the right moment in the aristocratic working day. There were also legal reasons, as we have seen, for this particular timetable. The lighting of a fire similarly suggests that people were active rather than asleep (Mk. 14:54; Lk. 22:55f.; Jn. 18:18). The Lukan version makes the sequence of events smoother; but while there is every likelihood that the tradition underlying the Passion narrative of the Third Gospel is at least partly independent of the other Gospels, and not necessarily secondary, it is difficult to reconcile this point in Luke with the accounts in Mark and Matthew if they are correct.

G. D. Kilpatrick queried the overall position taken by Lietzmann and Winter, and argued convincingly that we are not compelled to dismiss the Sanhedrin trial as without historical basis. A case can be made out, he claimed, for the view that behind Mk. 14:55-65 "lies a tradition which need not be a fiction of the Early Church" (p. 20). One of his chief concerns in reaching this conclusion was to examine the actual role of the Sanhedrin in the incident of the trial of Jesus; and to this we now turn.

IV. Role of the Sanhedrin.—It has already been pointed out that the case of those who deny the historical nature of the initial trial of Jesus by the Jewish authorities rests on the assumption that the Sanhedrin was able to pronounce and carry out capital sentences. What is the evidence for their contention?

The details of Jewish and Roman legal procedure at this period are not as full or as certain as might be wished, but a number of conclusions are nonetheless possible. The Sanhedrin was the supreme Jewish judicial body in Roman Judea, and clearly possessed considerable authority. The execution of James in A.D. 62, according to Josephus (*Ant.* xx.9.1 [200]), followed trial by the Sanhedrin. The death of Stephen by the non-Roman method of stoning (Acts 7:54-60) was also preceded immediately by his trial before this council; and Peter and John were arrested and threatened with death by the same authority (Acts 5:21-33). Again, the Mishnah (*Sanhedrin* vii.1ff.) refers to the four kinds of death penalty (stoning, burning, beheading, and strangling) that the Sanhedrin was empowered to inflict, and records the execution by burning of a priest's daughter who was condemned by the Jewish court.

Even so, it is also certain that the power of capital jurisdiction was at this time reserved for leading provincial officials, and denied to local or even minor Roman authorities. In the 1st cent. A.D. the power of the Roman provincial ruler was considerable; only in the 2nd cent. was proconsular authority severely limited by the emperor himself. From Tacitus (*Ann.* xii.60) and Josephus

(*BJ* ii.8.1 [117f.]; *Ant.* xviii.1.1 [1f.]), we know that in the middle of the 1st cent. A.D. there were in Judea Roman equestrian "governors" called "prefects" ("procurators" from the time of Claudius onward), who exercised a power equivalent to the normal *imperium* held by any legate or proconsul; they wielded in fact the *ius gladii* (*see* ROMAN LAW III.F).

Control of this kind may be confidently claimed for Pontius Pilate (designated by the more military title of *hēgemōn* in Matthew and Luke, rather than by the Greek equivalent of *procurator*, which is *epítropos*; Mark and John use only the proper name), even if the evidence in Josephus refers to legislation for the abnormal circumstances of insurrection. It was this authority then that limited the powers of the Jewish Sanhedrin, and governed the relationship between the Roman and Jewish authorities of the 1st cent. A.D.

This situation is not necessarily called in doubt by the four examples cited above, since in none of them is it certainly established that the Sanhedrin was actually responsible for an execution. In the case of James, the evidence of Josephus, supported by that of the Palestinian Talmud as well as John, makes it clear that the Roman powers usually controlled the decisions and even the summoning of the Sanhedrin. The stoning of James was brought about by the Sadducean high priest Ananus, in the intervening period between the death of the procurator Festus and the arrival of his successor Albinus. This illegal exercise of authority displeased the people, who appealed first to Agrippa and then to Albinus, on the grounds that "it was not lawful for Ananus to assemble a Sanhedrin without [Albinus's] consent." When the new procurator arrived, therefore, he secured the dismissal of Ananus from the high priesthood for this action (*Ant.* xx.9.1 [199-203]).

The incident of the stoning of Stephen, secondly, admits the possibility that he died under the terms of lynch law, and not as the direct result of formal sentence by a Jewish tribunal. The third example is inconclusive, since the members of the Sanhedrin are described as eager to bring about the deaths of Peter and John, but no indication is given of the intended method of achieving this aim. The bearing of the Mishnah episode is similarly doubtful, since there is no certainty that it relates to first-century Jewish legal practice.

The conclusion must be that normally the Sanhedrin could not and did not inflict the death penalty without consent of the Roman government. And yet isolated instances of capital sentences being passed and administered by the Sanhedrin do exist. One example is the manifestly irregular execution of James to which reference has just been made. We also know from Josephus (*BJ* vi.2.4) that the Romans allowed one exception to their rule about capital sentences; the Jewish authorities were able to arrest and put to death any non-Jewish and even Roman violator of the temple. (Cf. Acts 21:27-31. The wall inscription in question, however, is ambiguous regarding the actual manner of death permitted.) If this was the single exception, it becomes all the more likely that the norm was the one suggested, and that Jn. 18:31 is correct; it was not lawful for the Jews to put any man to death.

So far, then, the accuracy of the trial structure in all four Gospels need not be doubted. Jesus was sentenced by the Sanhedrin on the charge of blasphemy against the Jewish law, and then brought before Pilate for the sentence to be endorsed and carried out. But at the Roman trials the charge is altered, or at least made ambiguous (except possibly in Luke), in order to strengthen the case of the opposition and bring about the death of Jesus.

This conclusion cannot be regarded as certain, however, without a consideration of two further points. One concerns the precise grounds for the sentence of death passed on Jesus by the Sanhedrin, and the other the manner of His execution. The summary of the rabbinic law relating to capital sentences, which is contained in Mish. (*Sanhedrin* vii–ix), does not indicate that words spoken against the temple were regarded as either blasphemous or meriting death. Yet the Mishnah was finally codified long after the destruction of the temple, so that the omission of any reference to this kind of legislation is understandable. Moreover, at the trial of Stephen (Acts 6–7) the charge preferred is that of blasphemy "against Moses and God" (6:11), and when the accusation is specified in council, it concerns the alleged fact that Stephen spoke words "against this holy place" as well as against the law (v. 13), and had claimed that Jesus of Nazareth would "destroy this place" (v. 14). Evidently the enemies of Jesus were prosecuting Stephen before the Sanhedrin on grounds they regarded as likely to impress the Jewish authorities, hoping thereby to secure his removal. This supports the likelihood that speaking against the temple was regarded by the Jews of the 1st cent. as blasphemy and worthy of the death penalty, and that Jesus was condemned on these grounds.

In fact, it is only Mark and Matthew who mention this particular "blasphemy" as forming part of the Jewish charge; and as we have seen, only Mark represents the words of Jesus spoken against the temple as a *false* allegation. In view of the saying of Jesus prophesying the downfall of the temple (Mk. 13:2, 14; cf. Lk. 19:43f.), it is difficult to see what was "false" about this charge, unless the accusers' formulation of the saying is a deliberate attempt to misrepresent the teaching of Jesus by combining two different ideas (cf. the apparent confusion on this topic reflected at Jn. 2:19-21). It is also interesting to notice what may be regarded as almost an anticipation of this charge: the reference by Jesus at the time of the arrest to His having been until now daily exercising a ministry *in the temple* (Mk. 14:49 par.). But all the Synoptic Gospels, and indirectly the Fourth Gospel, suggest that blasphemy was the real reason for the Sanhedrin's verdict, even if the nature of that blasphemy was ultimately held to be the claims Jesus made for Himself rather than His words against the temple.

The second point of difficulty, and an important one in Lietzmann's discussion of this subject, is the manner of Jesus' execution. In Jewish law the penalty for blasphemy was death by stoning (cf. Lev. 24:16); but Jesus died by the Roman method of crucifixion. Must we therefore conclude with Lietzmann (and Winter) that the only sentence delivered and carried out against Jesus was Roman in character, and that the Jewish trial was therefore unnecessary and indeed fictional, invented to increase the responsibility of the Jews for the death of Christ? This is surely an unwarranted deduction, achieved only by the desperate device of first excluding the possibility that Jesus was examined by the Sanhedrin. If the records of the Gospels are at all accurate, and Jesus was tried and sentenced by the Roman authorities on the basis of an initial Jewish prosecution, the Roman form of death penalty is precisely what might be expected. There is therefore no reason to regard the trial of Jesus by the Sanhedrin and Pilate as out of accord with either Jewish or Roman legal procedure existing in the province of Judea during the 1st century. (For the legal position of the procurator, see further Sherwin-White, pp. 1ff.)

V. Roman Trial.—We have noticed that in the trial (Lk., trials) before Pilate, the charge shifts from blasphemy to sedition, and that except in the Fourth Gospel it is on

political grounds that Jesus is sentenced. What justification is there, we may ask, for accepting this representation as historically reliable? What precisely was the nature of the Roman trial?

The Roman governor of the 1st cent. A.D. was in a position to try the cases of accused provincials without referring to any other authority (unless the prisoners were also Roman citizens). Advice could be sought from a *consilium* of friends and officials, but the trial itself followed the system of *cognitio* and was conducted without a jury. This accords with the extent of a Roman governor's powers at this period, already discussed (under IV above), which also typified, as again we have seen, the administration of a governor of the province of Judea.

Such a trial followed a regular pattern. The charge was specifically formulated and the accusation brought by the prosecutors concerned. The procurator heard the case in person, seated on the *bēma* (judgment seat). If the verdict of "guilty" was passed, as normally happened in the absence of defense, a particular penalty was inflicted. (See the evidence in Pliny *Ep.* ii.11, the case of Marius Priscus, the proconsul of Africa who was convicted in A.D. 100 of accepting bribes from prosecutors in order to sentence innocent persons to death; and *Ep.* x.96, the famous letter to Trajan, which indicates Pliny's readiness to punish Christians with death, although *extra ordinem*; see further Sherwin-White, pp. 13ff.)

These details agree very closely with the descriptions of the Roman trial of Jesus that appear in the Gospels. Pilate acted autonomously in decisions he made about his prisoner (Mk. 15:15 par.); there was no jury, although Pilate was considerably influenced by the Jewish leaders, and took their advice (Lk. 23:13-18). The charge against Jesus was formulated and brought by spokesmen from the Jews, although it is expressly stated only in the Lukan account (23:2). Pilate is described in Matthew and John as actually seated on the judgment seat (Mt. 27:19; Jn. 19:13, using *bēma*). There was no defense, so Pilate was forced to convict, and when sentence of death was given, crucifixion was specified (Mk. 15:15; Mt. 27:26; Jn. 19:16).

Three accounts also mention the scourging of Jesus that was administered by Pilate (Mk. 15:15; Mt. 27:26; Jn. 19:1); in Luke Pilate offered to beat his prisoner in lieu of further punishment. In both cases the details are correct, and correspond to actual Roman judicial procedure. Severe beating accompanied but never replaced other punishment (in this case, death); while lighter whipping could be used, and perhaps according to Luke was volunteered, as a means of admonishing the prisoner (although the verb in Lk. 23:16, *paideúsas*, is in fact ambiguous). Similarly, the repeated questioning of Jesus by Pilate or His accusers, in the face of both the silence of the prisoner and His evident innocence in the governor's eyes, agrees with a normative technique in Roman trials, whereby prisoners without defense were given the opportunity of recanting before sentence was passed. The younger Pliny's letter to the emperor Trajan, already cited, mentions this policy; his custom was to ask those accused of being Christians if they were such; "and if they admit it, I repeat the question a second and third time, with a warning of the punishment awaiting them" (x.96.3; cf. Acts 25:16).

We are left with a consideration of the apparent conflict between the Synoptists and the Fourth Evangelist over the grounds on which Jesus was sentenced to death in the Roman trial. We can account for the shift of the charge before Pilate from the theological to the political; almost certainly this was regarded as a surer way of securing the death of Christ. But how is it to be explained that in John Pilate sentences Jesus for blasphemy, while in the other Gospels the charge is evidently sedition?

It may well be asked whether in fact the differences between the charges brought against Jesus according to the Synoptic and Johannine reports are as clear-cut as they are often taken to be. We have already seen that a considerable degree of ambiguity surrounded the formulation of the charges in both trials, Jewish and Roman. Mark and Matthew reflect the confusion of the Sanhedrin prosecution, and the failure even to agree on a charge. Luke is equally unspecific, although the opening words of the Jewish company, "If you are the Christ, tell us" (22:67), point to a theological charge. In John no charge is formulated at all. The same is true in the reports of the trial before Pilate. No charge appears in Mark or Matthew. The Lukan account clarifies the allegation in language that is predominantly political; but the charge could also be said to contain a veiled accusation of blasphemy ("saying that he himself is Christ a king," 23:2). In John the prosecution is couched in notably vague terms, and Jesus is described merely as an "evildoer" (18:30).

All four Gospels agree, however, that Pilate asked Jesus whether He was the King of the Jews, and tried to release Him from a sentence on political grounds; but when in the end pressure from the opposition to Jesus forced his hand, the Roman governor agreed to the capital sentence. The conflict of interests between the Romans and the Jews at this period is well known and easily accounts for the tense and confused situation in which Pilate became involved. Whatever precise charge was formulated in the Roman trial, in all the Gospels the issue turns on the identity of Jesus as "King." The question of Caiaphas according to the Markan account, "Are you the Christ, the Son of the Blessed?" (Mk. 14:61; Mt., Lk., "Son of God"), is not the same as Pilate's question, "Are you the King of the Jews?" But with this form of the charge, the reason for which we have already noted, there is perhaps introduced a deliberate ambiguity.

The political and religious situation of first-century Judea was such that the phrase "King of the Jews" would carry a number of different overtones. It is therefore possible to conclude that when the Jews made the charge before Pilate they did so (at least by implication) on two counts. The predominant charge was political (as in Luke). Similarly, when Pilate condemned Jesus, there was possibly a doubt in his mind as to the precise significance of the charge brought, and even an intentional obscurity about the grounds on which he was sentencing the prisoner. If this duality exists and is in fact faithfully reflected in the Gospel accounts, to varying degrees, the apparent conflict among them in the matter of the actual grounds of sentence is resolved.

VI. Significance of the Trials.—Those who question the genuineness of the Sanhedrin trial of Jesus are forced to supply a motive for the inclusion of it in the records of the Evangelists. The usual explanation is that the Gospel writers are concerned to transfer the guilt for the death of Christ from the Romans to the Jews. Winter, for example (pp. 59-61), maintained that Pilate is represented as more and more sympathetic toward Jesus the later the Gospel accounts are written. These then become a powerful piece of apologetic in the face of an increasingly harsh imperial persecution of the Christian Church, and also reflect the normative first-century tension between Christianity and Judaism.

It is possible to see how the last point, the Jewish-Christian hostility of this period, *might* have influenced the Gospel writers in their accounts. But it remains difficult to understand any real reason for deliberately inventing the portrait of a friendly Pilate in order to gain favor with Rome. Even if they were flattered by this protestation of Roman innocence, would emperors who were in-

tent upon the extermination or at best limitation of Christianity have been impressed by the action of a procurator who did his utmost to spare its founder? Further, how true is it that at this time the Gospels were written for the imperial court, let alone used in it, as apologetic documents? It is just possible to make out such a case for Luke-Acts; but even if it is established there, it does not seem arguable for the rest.

VII. Conclusion.–We may conclude that the Gospel records of the trial of Jesus preserve this piece of the tradition accurately. Certainly we have no reason to doubt that the main outline is correct. Jesus was tried by the Jewish authorities, and of necessity referred by them to the Roman procurator. Pilate, acting perfectly within his competence, endorsed the sentence against Christ, which by then, like the charge itself, had become intentionally balanced between political and theological motivation.

JESUS, GENEALOGY OF. *See* GENEALOGY OF JESUS.

JESUS JUSTUS jē'zəs jus'təs [Gk. *Iēsous ho legómenos Ioustos*–'Jesus who is called Justus'] (Col. 4:11). One of three friends of Paul — the others being Aristarchus and Mark — whom he associates with himself in sending salutations from Rome to the church at Colossae. Jesus Justus is not mentioned elsewhere in the NT, and there is nothing more known about him than is given in this passage in Colossians, viz., that he was by birth a Jew — "of the circumcision" — that he had been converted to Christ, and that he was one of the inner circle of intimate friends and associates of the apostle during his first Roman captivity. J. RUTHERFURD

JETHER jē'thər [Heb. *yeṯer*–'abundance'].

1. Gideon's eldest son (Jgs. 8:20), who was called upon by his father to slay Zebah and Zalmunnah, but felt unable to execute them because of his youth. As a result Gideon himself put them to death.

2. Father of Amasa (1 K. 2:5,32); he was an Ishmaelite according to 1 Ch. 2:17, identical to "Ithra, the Israelite" of 2 S. 17:25.

3. A Jerahmeelite (1 Ch. 2:32).

4. A Judahite (1 Ch. 4:17).

5. A man of Asher (1 Ch. 7:38), the same as Ithran in v. 37. D. F. ROBERTS

JETHETH jē'theth [Heb. *yᵉṯēṯ*– meaning unknown]. A chief (or clan) of Edom (Gen. 36:40 par. 1 Ch. 1:51).

JETHLAH jeth'la [Heb. *yiṯlâ*]. *See* ITHLAH.

JETHRO jeth'rō, jē'thrō [Heb. *yiṯrô*–'pre-eminence'(?); Ex. 3:1; 4:18; 18:1f., 5f., 9f., 12; LXX Gk. *Iothor*]. Priest of Midian and father-in-law of Moses, also known as Reuel ("friend of God"[?]) in Ex. 2:18. Nu. 10:29 refers to a certain Hobab "the son of Reuel the Midianite, Moses' father-in-law," but by the period of the judges (cf. Jgs. 4:11) one generation represented by the phrase "the son of Reuel the Midianite" had dropped out of the genealogy, yielding a prima facie identification of Hobab with Reuel, which the earlier traditions did not support.

When Moses fled from Egypt he found refuge in Midian, where he received a hearty welcome into the household of Jethro on account of the courtesy and kindness he had shown to the priest's seven daughters in helping them to water their flock. This friendship resulted in Jethro's giving Moses his daughter Zipporah to wed (Ex. 2:15-21). After Moses had been for about forty years in the service of his father-in-law, the angel of the Lord appeared to him in the burning bush as he was keeping the flock at Horeb and commanded him to return to Egypt and deliver his enslaved brethren out of the hands of Pharaoh (ch. 3). With Jethro's consent Moses left Midian to carry out the divine commission (4:18).

When Jethro learned that Moses and the Israelites had been delivered from bondage to the Egyptians, he set out with his daughter Zipporah and her two sons to visit him in the wilderness (Ex. 18:1-6). A time of cordial fellowship ensued in which Jethro's own faith was strengthened by learning of Israel's deliverance through God's power (Ex. 18:7-12). It is noteworthy that in the religious service in which Jethro and Moses afterward engaged, when Jethro, as priest, offered a burnt offering, and Aaron with all the elders of Israel partook of the sacrificial feast, prominence was given to Jethro over Aaron, and thus a priesthood was recognized beyond the limits of Israel.

This visit of Jethro to Moses had important consequences for the future government of Israel (Ex. 18:13-27). The priest of Midian became concerned about his son-in-law when he saw him occupied from morning to night in deciding the disputes that had arisen among the people. The labor this entailed, Jethro said, was far too heavy a burden for one man to bear. Moses himself would soon be worn out, and the people, too, would become weary and dissatisfied, owing to the inability of one judge to decide all the cases that were brought before him. Jethro, therefore, urged Moses to make use of the talents of others and adopt a plan of gradation of judges who would dispose of all cases of minor importance, leaving only the most difficult for him to settle by a direct appeal to the will of God. Moses, recognizing the wisdom of his father-in-law's advice, readily acted upon his suggestion and appointed "able men from all the people" and placed them "over the people as rulers of thousands, of hundreds, of fifties, and of tens" (v. 21). Thereafter, Jethro returned to his own country.

The story of Jethro reveals him as a man of singular attractiveness and strength, in whom a kind, considerate disposition, a deeply religious spirit, and a wise judgment all met in happy combination. This ancient priest of Midian made Israel and all nations his debtors when he taught the distinction between the legislative and the judicial function, and the importance of securing that all law be the expression of the divine will, and that its application be entrusted only to men of ability, piety, integrity, and truth (Ex. 18:21). J. CRICHTON

JETUR jē'tər [Heb. *yᵉṭûr*–meaning uncertain]. A "son" of Ishmael (Gen. 25:15 par. 1 Ch. 1:31); against this clan the two and one-half tribes warred (1 Ch. 5:18f.). They are the Ituraeans of NT times. *See* ITURAEA.

JEUEL jə-ū'əl, jōō'əl [Heb. *yᵉʿû'ēl*–'God has saved'(?)].

1. A man of Judah (1 Ch. 9:6); the name is not found in the parallel passage, Neh. 11:24.

2. A Levite, AV, NEB, Jeiel (2 Ch. 29:13).
3. A companion of Ezra (Ezr. 8:13, AV, NEB, Jeiel; 1 Esd. 8:39).

JEUSH jē'ush [Heb. *yᵉʿûš*–'may he protect'(?); *K yᵉʿîš*, in Gen. 36:5, 14; 1 Ch. 7:10].

1. A son of Esau (Gen. 36:5, 14, 18) who subsequently became an Edomite chieftain (cf. 1 Ch. 1:35).
2. A Benjaminite (1 Ch. 7:10), descended from Bilhan.
3. Another Benjaminite (1 Ch. 8:39), descended from King Saul; AV Jehush.
4. A Gershonite Levite (1 Ch. 23:10f.).
5. A son of King Rehoboam (2 Ch. 11:19).

D. F. ROBERTS

JEUZ jē'uz [Heb. *yᵉʿûṣ*]. A Benjaminite, son of Shaharaim by Hodesh and among the "heads of fathers' houses" (1 Ch. 8:10).

JEW [Heb. *yᵉhûḏî*; Aram. *yᵉhûḏāy*; Gk. *Ioudaios, ioudaízō* ("live like a Jew," Gal. 2:14), *Ioudaikōs* ("like a Jew," Gal. 2:14)]; **JEWESS** [Gk. *Ioudaia* (Acts 24:24)]; **JEWISH** [Heb. *yᵉhûḏî*]; AV JEWS (1 Ch. 4:18; Neh. 5:1, 8; Est. 6:13), "Jehudijah" (a transliteration based on a misunderstanding of the text, 1 Ch. 4:18); NEB also JEWS (Neh. 5:1, 8); [Gk. *Ioudaikos* (Tit. 1:14), *Ioudaios*]; AV also JEWS (Jn. 19:42; Acts 13:6; 19:13f.), JEWESS (Acts 16:1), OF THE JEWS (Lk. 23:51; Jn. 2:6; Acts 10:22; 12:11; 14:1; 17:10; 25:24); NEB also JEW (Acts 13:6), OF THE JEWS (Acts 25:24), JUDAEAN (Lk. 23:51). "Jew" originally denoted one of the inhabitants of the southern kingdom of Judah (2 K. 16:6; 25:25; Neh. 1:2; 2:16; Jer. 32:12), or one of the postexilic Israelites in general as distinct from Gentiles (so in Jeremiah, Ezra, Nehemiah, Esther, Zechariah, Daniel, and the NT); strictly speaking, it is anachronistic to use the term with reference to Hebrews or Israelites of an earlier period. The word came into our language via French and Latin from the Greek transliteration of the Aramaic (Hebrew).

I. OT Usage.–Although Heb. *yᵉhûḏî* means "person belonging to [the tribe of] Judah," it is never used this way in the OT. It comes into prominence only after the destruction of the northern kingdom and, more specifically, after the Babylonian Captivity. Thus it is used of an Israelite living in the province of Judea (Judah) during the Babylonian, Persian, Greek, and Roman periods. It is most frequent in Esther, where it denotes all Israelites (cf. the application of the term to Mordecai, who was of the tribe of Benjamin: 2:5; 3:5; 5:13; etc.); the same usage is found in Daniel (3:8, 12). Hence the term takes on a decidedly religious connotation, referring to adherents of the Hebrew religion (*see* JUDAISM), though there often remains a close connection with the land of Judah.

II. Intertestamental and Early Jewish Usage.–The term "Jew(s)" was only rarely used by Hebrew-speaking Jews in the land of Palestine, who tended to prefer the designation "Israel" (cf. the apocryphal books originally written in Hebrew, the Dead Sea Scrolls, the Mishnah, the Hebrew part of the Talmud, and the coins minted during the A.D. 70 and Bar Cochba rebellions). Thus among Hebrew-speaking Jews *yᵉhûḏî* continued to have the connotation of an inhabitant of Judea rather than an Israelite in general. A striking illustration of this usage occurs in the reference of the Jewish leaders to Jesus as "King of Israel" (Mk. 15:32) in contrast to the Roman governor and the soldiers, who call him "King of the Jews" (Mk. 15:2, 9, 12, 18, 26; cf. also the question of the wise men, Mt. 2:2). It is interesting to compare this with Matthew's preference (*contra* John) for the term "Israel" rather than "Jews" for Palestinian Israelites.

III. NT Usage.–In the NT "Jew(s)" is used, with the exceptions mentioned above and a few other references (Mt. 28:15; Mk. 7:3; Lk. 7:3; Rev. 2:9; 3:9), primarily in the Fourth Gospel (68 times), Acts (79 times, but rarely in Luke) and the Epistles of Paul (35 times). A Jew is one who is not a Gentile (Gal. 2:14; 3:28; Acts 14:1, 5), a Samaritan (Jn. 4:9), or a proselyte (Acts 2:10). The term denotes not just one who is Jewish by religion, since proselytes are not "Jews" and Jewish Christians are (Acts 21:39; Gal. 2:13f.). In addition, from the NT point of view, it is possible to be a "Jew" by faith without having been born a Jew by race, nationality, or religion (Rom. 2:28f.; cf. Rev. 2:9; 3:9).

John's Gospel uses the term "Jews" not for all Israelites, or even all Israelites living in the province of Judea, but for those Israelite inhabitants of Judea, especially their religious and political leaders, who steadfastly opposed Jesus (though there are some positive references: 3:1; 11:33-36; 12:9-11; etc.). This should not be interpreted as Christian anti-Semitism (any more than similar references to "Israel" in the OT prophets), since it is clear that all the chief actors in the Gospel story, and probably also the author, are "Jews" in the broader sense (including Jesus!). Paul's reference to "the Jews, who killed both the Lord Jesus and the prophets" (1 Thess. 2:14-16; cf. 2 Cor. 11:24) should be interpreted along similar lines, since he himself was proud to be a Jew (Phil. 3:4f.; cf. Acts 21:39) and continued to believe that the Jewish people had a special place in God's plan (Rom. 11).

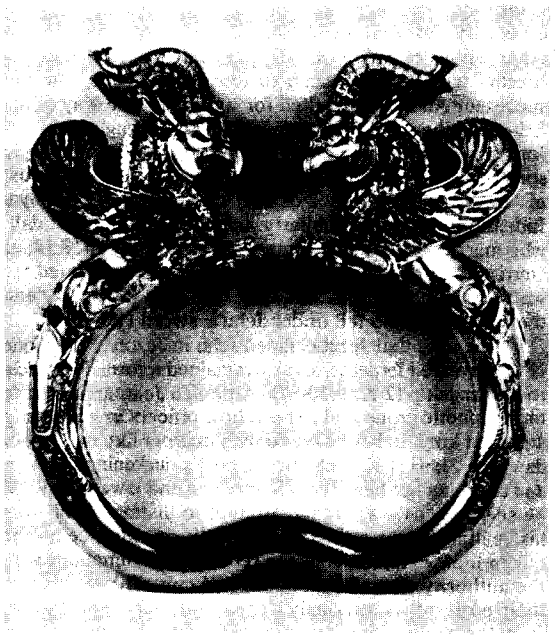
IV. Modern Usage.–There is no general agreement today concerning the use of the term. The question "Who is a Jew?" is being hotly debated in the context of the modern state of Israel. Orthodox Judaism accepts one as a Jew who has been born to a Jewish mother and who has not apostatized (e.g., converted to Christianity), while others would include also one who has a Jewish father or who has converted to Judaism (i.e., a proselyte). There is a clear preference among many Jewish leaders for the term "Israel" rather than "Jew" as a contemporary designation of the Hebrew people.

Bibliography.–*Encyclopedia Judaica* (1971), X, 22f.; M. Lowe, *Nov.Test.*, 18 (1976), 101-130. W. W. GASQUE

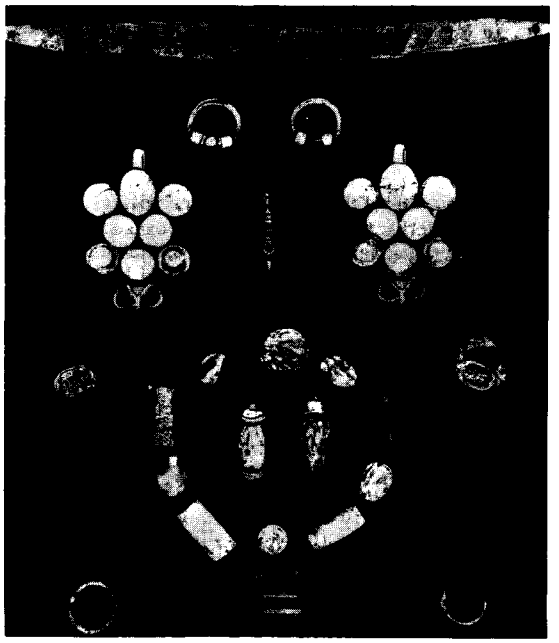
JEWEL; JEWELRY. An ornament of gold, silver, or semiprecious stones in the form of an amulet, bracelet, headdress, anklet, or the like. Near Eastern archeological excavations have revealed many examples of such ornaments, demonstrating the widespread use of semiprecious stones in settings of precious metal. Accordingly, the MT frequently refers to jewels (Heb. *kᵉlî*, "something manufactured") in connection with gold and silver (Gen. 24:53; Ex. 3:22; 11:2; etc.). In Cant. 7:1 (MT 2) Heb. *ḥᵃlî* ("necklace, ornament"; cf. Prov. 25:12) describes any kind of ornamentation. Jewels were part of the high priest's regalia (Ex. 28:15-21; 39:8-14) and appeared similarly on the crowns (2 S. 12:20; 1 Ch. 20:2) and garments (Ezk. 28:13) of kings and queens. Wealthy people emulated these practices, and among articles of personal adornment the signet was popular in OT times (cf. Gen. 38:18; 41:42). Before coined money was introduced into the Near East in about the 6th cent. B.C., jewels were a highly negotiable form of wealth and during the monarchy constituted part of the royal treasury (1 K. 10:11; 1 Ch. 29:2, etc.).

See also ORNAMENT; GARMENTS; SIGNET; STONES, PRECIOUS. R. K. H.

JEWELER [Heb. *ḥārāš ʾeḇen*] (Ex. 28:11); AV ENGRAVER IN STONE; NEB CRAFTSMAN. The art of making jewelry was known in Palestine from prehistoric times. Artifacts reveal a considerable artistic sense and



Gold armlet (5th-4th cents. B.C.) showing Achaemenian influences from the Oxus Treasure of ancient Bactria. The hollows in the winged and horned griffins originally held inlays (Victoria and Albert Museum, London)



Jewelry found in a burial at Megiddo (from top to bottom): gold headband; gold rings; gold earrings; pins; scarabs and beads of gold, silver, amethyst, and crystal from a necklace; and two gold bands (ca. 1400 B.C.) (Oriental Institute, University of Chicago)

manual dexterity on the part of the craftsmen. The jewels of Ex. 28:11 were to be worn by the high priest.

JEWRY jo͞o′rē. Used by the AV three times: once in the OT for Aram. *yᵉhûḏ* (Dnl. 5:13; RSV Judah); and twice in the NT for Gk. *Ioudaia* (Lk. 23:5; Jn. 7:1; RSV Judea).

JEZANIAH jez-ə-nī′ə [Heb. *yᵉzanyāhû*–probably 'Yahweh hears'; cf. JAAZANIAH]. In Jer. 40:8 the name of a Judean leader who accompanied Johanan when he visited Gedaliah at Mizpah (cf. 2 K. 25:23). In Jer. 42:1 the RSV reads Azariah (cf. 43:2), following the LXX. The name seems to have been fairly common in sixth-century-B.C. Judah, occurring in one of the Lachish ostraca and on a contemporary seal inscription. Whether either is the biblical personage is unknown.

JEZEBEL jez′ə-bel [Heb. *'îzeḇel*; Gk. *Iezabel*]. The base of this Phoenician name is *zbl*, "prince," usually vocalized *zᵉḇûl*. Proposals for an original sentence name include *'y-zbl*, "where is the prince?" and *'ṯ-zbl*, "the prince exists." Both exclamations occur in passages concerning Baal's demise and return in the Ugaritic literature (*UT*, 49:III:20-21; IV:28-29, 39-40; *ANET*, pp. 140f.). The vowels of the MT, however, change the sense to *zeḇel*, "dung," thereby creating a wordplay in 2 K. 9:37, "the corpse of Jezebel shall be as dung" (*dōmen*). A seal from the 9th-8th cent. B.C. bears the Phoenician inscription *yzbl*, a form of the name which may have influenced the LXX spelling. Ahab's wife is the only person with this name in the OT.

The name of Jezebel usually evokes for us the image of a painted woman who is sexually alluring or trying to be, a manipulator of men, a political meddler, an idolatress. The Bible's condemnations of her, however, concern her role in public religious and political affairs, not her private (im)morality. Examination of the texts and related evidence shows that more was at stake for the biblical writers than the frivolous elements in her modern stereotype.

Jezebel is introduced in the listing of the evils of her husband Ahab's reign (869-850 B.C., 1 K. 16:31). Her father, Ethbaal king of the Sidonians, appears as Ithobalos in Josephus' account of Tyre (*Ant.* viii.13.1 [317]). A priest of Astarte, he killed his royal predecessor at Tyre to gain kingship over all the Phoenician cities, including the older Sidon, which were under the hegemony of Tyre (Josephus *CAp* i.18 [123]). Ahab's marriage probably sealed an alliance between Israel and Tyre just when the Aramean powers of Syria were threatening the small coastal states. Building a house and altar for Baal and an Asherah would have been required for alliance protocol as well as for Jezebel's devotions (cf. the shrines for Solomon's foreign wives, 1 K. 11:1-8), and they stood as Samaria's monuments to the religious heritage of its sister-city Tyre, whose landmark temples were dedicated to Baal Melqart (Lord of the City) and Astarte.

That the Phoenician temples in the capital of Israel were more than token shrines is evident from the events surrounding Elijah's confrontation with the prophets of Baal on Mt. Carmel (1 K. 18). Official royal support had shifted away from Yahwism, for Jezebel was able to cut off and kill the prophets of Yahweh (1 K. 18:4, 13) while maintaining the prophets of Baal (and of Asherah, according to a gloss) from the royal provisions, even in the drought and famine (1 K. 18:19). Josephus reported that Ithobalos was credited with having broken the same drought by his supplication to the gods, presumably Baal and Astarte whom he served (Josephus citing Menander, *Ant.* viii.13.2 [324]). Elijah used the occasion at Carmel to demonstrate Yahweh's power against such claims and to execute the prophets of Baal as a prelude to the end of the drought, but even he fled before Jezebel's wrath (1 K. 19:1-3).

The clash of religions is epitomized in the threatening message Jezebel sent to Elijah upon learning of the Carmel executions. The LXX and Latin versions preserve a variant wordplay that gives the passage a more forceful reading: "If you are Elijah, I am Jezebel! So may god(s)

do to me, and more also, if I do not make your life as the life of one of them by this time tomorrow" (1 K. 19:2). Putting the names in opposition puts the respective deities in opposition as well, for Elijah's name means "Yahweh is my god," while Jezebel's invokes Baal "the prince." The RSV makes Jezebel speak here of "gods," translating all the plurals of the MT: *'ĕlōhîm*, "gods," and the verbs, "do" and "do more" (*see* GOD, NAMES OF II.A.2). In Codex Vaticanus of the LXX, however, *'ĕlōhîm* is matched to singular verbs, the common Israelite usage when referring to their singular God (cf. 2 K. 6:31: the king of Israel swears the same oath in the singular; and 1 K. 18:24: "the *'ĕlōhîm* who answers by fire, that one is the *'ĕlōhîm*"). The intensity of the cultic conflict and such verbal evidence suggest that Jezebel was promoting Baal as the *'ĕlōhîm* to replace Yahweh, not as an additional god in a pantheon.

Further theological and legal tensions arose in the affair of Naboth's vineyard (1 K. 21). Ahab first appeared unhappy but bound by Naboth's refusal to sell or exchange his vineyard, a refusal "before Yahweh to give the inheritance of my fathers" to Ahab (1 K. 21:3). Similar concern for keeping property within the family is found in legal texts from Mari and Ugarit, and it brings to mind the theologically motivated statute in Lev. 25:23 regarding Hebrew property: "The land shall not be sold in perpetuity, for the land is mine" (cf. Lev. 25:29-31). Naboth's refusal to cede Hebrew land would be all the more understandable if the house of Omri was a family of Canaanite descent, as some have suggested on the basis of family names, the eagerness for Phoenician alliance and religion, the affinity for JEZREEL, and the purchase of the non-Israelite Samaria for its capital.

Jezebel circumvented all Naboth's possible objections by arranging a charge against him for cursing (piel of Heb. *bārak*, lit. "bless"; cf. KoB, p. 154) God and king, with false witnesses and a sure guilty verdict and death sentence (1 K. 21:9f.). The legal details of the charge and consequences are unclear. Naboth may have been accused of blasphemy or of perjury regarding the sale; Ahab may have had royal rights to the property of a criminal or may have been judged the legal owner. Jezebel's manipulation of Hebrew law obtained what was the usual right of a Phoenician monarch over subjects' lives and property. In Israelite eyes, however, the crown had falsely condemned an innocent man to gain his property, and Elijah was sent to bear God's judgment (1 K. 21:19-24; cf. 2 S. 11–12: David had Uriah killed to gain Bathsheba and Nathan brought the judgment). Included in Elijah's message was the word of Jezebel's fate. Verse 19 is probably the original core of the judgment, the direct response to the royal outrage; this judgment is amplified with standard formulations about annihilating the male line (vv. 21f.; cf. 1 K. 14:10) and leaving the bodies unburied for animals to desecrate (v. 24; cf. 14:11; 16:4; Jer. 16:4). The opening and closing references to dogs in vv. 19 and 24 supply catchwords for interrupting Ahab's judgment with another introductory clause and the judgment against Jezebel (v. 23), a judgment echoed and expanded in 2 K. 9:10, 36f.

In the editorial remarks about the house of Ahab, Jezebel is blamed for the religious shortcomings of her royal spouse, sons, and extended family. This picture may be due partly to the Deuteronomic historian's tendency to use her as a model of Canaanite pollution, but it may also reflect the Phoenician practice of installing a royal woman as priestess of Astarte, thereby making her considerably more active in the close relations of temple and palace than was customary in the Hebrew monarchy. Amo'ashtart, who was daughter of Eshmun'azar I, Tabnit's consort, and queen mother of Eshmun'azar II, filled this role; she is inscribed with her son as builder of houses for the gods, especially for Astarte, Eshmun (the holy prince), and other deities of Sidon (*ANET*, p. 662). 1 K. 21:25 charges Jezebel with inciting Ahab to idolatry, and his son and successor Ahaziah is faulted for walking in the way of his father and the way of his mother (22:52). Although Jehoram/Joram avoids the associations with Jezebel and Ahab in some passages (2 K. 3:2, 13), he received the fatal thrust of Jehu's righteous attack on her account (9:22). The royal Judean in-laws were similarly judged. Jehoram of Judah, who married Athaliah of Israel (daughter of Ahab, 8:18; of Omri, 8:26), and their son Ahaziah were condemned for walking in the way of the house of Ahab (8:18, 27), and their kinsmen also fell under Jehu's sword (10:12-14).

By the time that Jezebel faced Jehu in Jezreel, she alone of the invested Israelite royalty remained a formal obstacle to his kingship (2 K. 9:30-37). Although Jehu appeared to the prophetic group and to his fellow officers as a properly anointed king, to her he was only a usurper like the seven-day king Zimri (1 K. 16:8-20). Jezebel's darkening her eyes and adorning her head (with formal wig and jewelry) should be seen less as a seductive attempt to distract Jehu from his zealous purpose than as the public appearance by the queen mother to confront the rebellious commander with the authority of the royal house and cult. The reversal of their positions is strikingly depicted in her being thrown from the window and in his entrance into the palace of his masters for a meal.

One can say, then, that the historical Jezebel was a princess and perhaps priestess of Tyre who used her role as wife and queen mother in the house of Ahab to promote Canaanite practices in the monarchy and cult of Israel. The biblical Jezebel, however, is a much more dramatic figure than her historical biography suggests because the literary presentation of her actions and speeches gives her unforgettable animation. One can almost feel the knife in her voice in the threat to Elijah, in her jab at Ahab's despondency over the vineyard, in her challenge to Jehu (1 K. 19:2; 21:5-7; 2 K. 9:31). Others speak of her in the strongest terms, in Obadiah's reports of her persecutions, in prophetic oracles of judgment, and in Jehu's scorching rebuke to Jehoram (1 K. 18:13; 2 K. 9:10, 22). Even the briefest assessments of her family's reigns cannot ignore her. She was probably impossible to ignore in life as well, but the text's portrait of her as the incarnation of the Canaanite cultic and political practices, detested by Israelite prophets and loyalists, has given her a literary life far beyond the existence of a ninth-century Tyrian princess. This is, ironically, the opposite of what was intended in the mutilation of her body and in Jehu's final observation "that they will not say, 'This is Jezebel'" (2 K. 9:37).

The NT was the first to say, "This is [a] Jezebel." The letter to the church of Thyatira warns against tolerating "the woman Jezebel, who calls herself a prophetess and is teaching and beguiling my servants to practice immorality and to eat food sacrificed to idols" (Rev. 2:20). As in the preceding letter's reference to Balaam and Balak (Rev. 2:14), the name typifies the errant Christian by an allusion to her OT counterpart. Here she is an influential woman within the congregation, whose teaching encourages members to depart from the preferred Christian practice of avoiding public festivities of city or trade guild that required feasting on dedicated food and sharing its accompanying entertainments.

The figure of Jezebel has remained a powerful literary referent. The combination of suspect political authority and religious antipathy that characterized the OT Jezebel also made several Roman Catholic queens her namesake in the attacks of their critics: Isabella I was called "the

Catholic Jezebel" by Spanish Jews (F. W. Farrar, *Second Book of Kings* [1900], p. 124 n. 2), Mary Tudor and Mary Stuart received the name from John Knox ("He hath raised up these Jezebels [our mischievous Marys] to be the uttermost of his plagues," *First Blast of the Trumpet Against the Monstrous Regiment of Women* [1558]), and Titus Oates railed against *The Witch of Endor or the Witchcraft of the Roman Jezebel*. More recently, however, the heretical and political emphases of the allusion have faded in literary and slang references, leaving only the "harlotries and sorceries" of a manipulative and cosmetically carnal woman trying to control the men in her private life. If Jezebel had been only that, she would not have mattered in the biblical record of prophets and kings.

JEZELUS jə-zē′ləs [Gk. *Iezēlys*].

1. 1 Esd. 8:32, AV, NEB; RSV Jahaziel as in Ezr. 8:5 (*see* JAHAZIEL **5**).

2. 1 Esd. 8:35, AV, NEB; RSV Jehiel as in Ezr. 8:9 (*see* JEHIEL **7**).

JEZER jē′zər [Heb. *yeṣer*]; **JEZERITES** jē′zər-īts [Heb. *hayyiṣrî*]. Jezer was the third son of Naphtali (Gen. 46:24; Nu. 26:49; 1 Ch. 7:13), eponymous ancestor of the Jezerites (Nu. 26:49).

JEZIAH jə-zī′ə. *See* IZZIAH.

JEZIEL jē′zi-əl, jē-zī′əl [Heb. *K yᵉzû'ēl* or *yᵉzô'ēl*; *Q yᵉzî'ēl*–'God gathers'(?)]. One of David's Benjaminite recruits at Ziklag (1 Ch. 12:3).

JEZLIAH jez-lī′ə. *See* IZLIAH.

JEZOAR jə-zō′ar. *See* IZHAR.

JEZRAHIAH jez-rə-hī′ə. *See* IZRAHIAH.

JEZREEL jez′rē-əl, jez′rēl [Heb. *yizrᵉ'e'l*–'God saves,' 'may God save'].

1. Hosea's first child, a son (Hos. 1:4), named at God's command. The name has a double meaning. As pointed out in 1:4f., it refers to events in the city of Jezreel (*see* JEZREEL **1**), where Jehu bloodily destroyed the rule of Ahab, and to the valley of Jezreel, where God would destroy Jehu's dynasty. But the hopefulness of the name's literal meaning is expressed in the prediction of future peace (v. 11) and fruitfulness (2:22) in the places called Jezreel.

2. A descendant of Judah listed only in 1 Ch. 4:3, probably associated with the settlement named Jezreel (*see* JEZREEL **2**).

E. W. S.

JEZREEL jez′rē-əl, jez′rēl [Heb. *yizrᵉ'e'l*–'God sows'; LXX usually *Iezrael*].

1. A city in northern Israel.

I. Identification.–Concerning *Iezrael*, Eusebius says, "Even now there is a very well known town, *Esdraēla* in the Great Plain between Scythopolis [=Beth-shean] and Legio [beside Megiddo]" (*Onom.* 108.12-14). The Bordeaux Pilgrim referred to it as *Stradela*, 16 km. (10 mi.) from Maximianupolis [=Legio] and 19 km. (12 mi.) from Scythopolis (*Itinerarium Burdigalense* 19.20). The Jewish scholar R. Eshtori Haparhi (between A.D. 1313-1322) recognized that the biblical name had been modified in Arabic to *Zer'în*. Edward Robinson, in 1838, was the first modern scholar to identify Jezreel with the Arab village of Zer'în, 11 km. ($6^5/_8$ mi.) N of Jenîn. The site is perched on the edge of a shelf that forms the southeast border of the great valley to which Jezreel has given its name. From this point the ground drops off steeply to the east to form the narrow valley of Beth-shean (Wâdī el-Jālûd).

II. History.–Jezreel is not mentioned in any of the Egyptian or cuneiform sources from the 2nd millennium B.C. Therefore, there are grounds for assuming that it was actually founded by the Israelites. Along with nearby Shunem (Sôlem), it is mentioned as a border town of the tribe of Issachar (Josh. 19:18) and must have shared the fortunes of that tribe, first submitting to servile status among the Canaanites (Gen. 49:15) and then rising in rebellion against them (Jgs. 5:15).

At the end of Saul's reign he and the Israelite troops marched out for a confrontation with the Philistines and encamped by "the fountain which is in Jezreel" (1 S. 29:1), evidently 'Ain el-Meiyiteh (now 'En Yizre'el) rather than 'Ain Jālûd (now 'En Ḥarod). Meanwhile, the Philistines had mustered at Aphek on the Sharon Plain (1 S. 29:1) and then marched up to the Jezreel Valley (v. 11) and encamped at Shunem (1 S. 28:4). The battle must have taken place on the level ground around Jezreel (2 S. 4:4) until Saul and his forces retreated up the slope that runs along the Gilboa ridge SW of the town (1 S. 31:1).

Saul's son Esh-baal (Ishbosheth) was crowned king over the northern tribal areas formerly loyal to his father; these included (along with regions like Gilead, Ephraim, and Benjamin) Jezreel (2 S. 2:9), which must refer to more than just the town itself. Since Jezreel was evidently one of the earliest Israelite settlements in the "Great Plain" (contrast Jgs. 1:27, 30), its name came to be applied by them to the entire valley W of it. A comparison of Josh. 17:16, the earliest allusion to the Valley of Jezreel, with Jgs. 1:27 shows that the valley (or plain) refers to the territory of such towns as Taanach, Ibleam, and Megiddo in contrast to Beth-shean and its villages (cf. also Jgs. 6:33 and Ps. 83:9f. [MT 10f.]). The same situation prevailed in the Greco-Roman period; the "Great Plain" was Esdraelon (Jth. 1:8; cf. Eusebius *Onom.* 108.12-24 [see I above]).

During Solomon's reign, Jezreel (comprised of Taanach and Megiddo, i.e., most of the Great Plain) was governed by Baana son of Ahilud, the fifth district commissioner (1 K. 4:12). Under the Omride dynasty, Jezreel became a secondary capital of the Israelite kingdom (1 K. 18:44-46); Ahab's palace there (1 K. 21:1) was probably the "winter house" (Am. 3:15). The city was fortified, as evidenced by allusions to its gate (2 K. 9:31; 10:8) and tower (2 K. 9:17). Though the king and all his entourage — namely, high officials, familiar friends, and priests — might be in residence at Jezreel during certain periods of the year (2 K. 10:11), the affairs of the city were in the hands of the elders and free men (1 K. 21:8-14). One citizen, Naboth, was executed on a false charge of treason and his property confiscated by Ahab (ch. 21); otherwise, there was no legal means to force the landholder to relinquish his patrimony. The assassination of Joram, Jezebel, all the sons (members) of Ahab's family, and also of Ahaziah king of Judah took place during the coup d'etat of Jehu at Jezreel (2 K. 8:29; 9f.; 2 Ch. 22:5-9). The Jehu dynasty was to suffer defeat in the Valley of Jezreel as retribution for his excessive cruelty during his rise to power (Hos. 1:4f., 11 [MT 2:2]); but this scene of disaster would afterward become once again the center of agricultural productivity (Hos. 2:22 [MT 24]).

III. Archeology.–A brief sounding made on the site by Macalister early this century was ineffectual. More recent

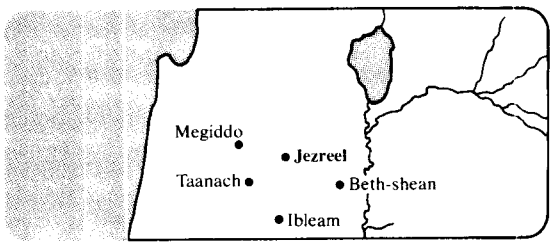
surveys have produced sherds of the Israelite, Roman, and Byzantine periods, as well as the remains of a medieval vaulted building and other structures.

Bibliography.–E. Robinson, *Biblical Researches*, II (1856), 318-325; *SWP*, II, 88, 130f.; R. A. S. Macalister, *PEQ*, 41 (1909), 175; A. Alt, *PJ*, 23 (1927), 48; A. Saarisalo, *Boundary Between Issachar and Naphtali* (1927), pp. 48ff.; W. Borée, *Die alten Ortsnamen Palästinas* (1930), p. 99; *HGHL*, cf. Index pp. 481f.; S. Yeivin, *Bulletin of the Israel Exploration Society*, 14 (1948), 89 (=*BIES Reader* B [1955], p. 113); I. Press, *Topographical-Historical Encyclopaedia of Palestine* (1948), II, 390; A. Alt, *Der Stadtstaat Samaria, Berichte der Sächsischen Akademie der Wissenschaften*, 101/5 (1954), 9-21 (=*KS*, III [1959], 260-270).

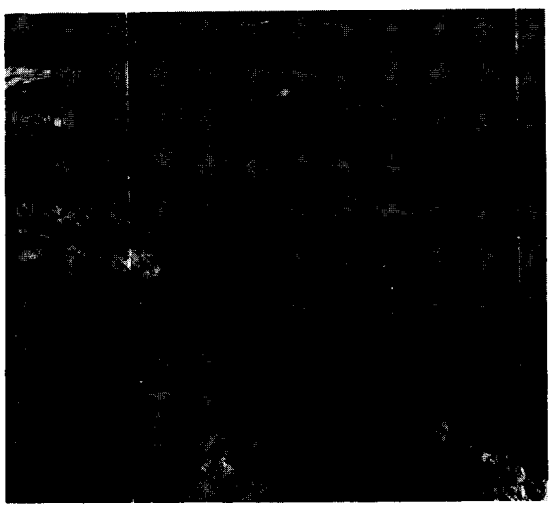
2. A settlement in the eighth district of Judah mentioned alongside Maon, Carmel, Ziph, and Juttah (Josh. 15:55f.). It is usually associated with Jezreel, a descendant of Hur in the genealogy of Judah (1 Ch. 4:3). David's wife Ahinoam, the mother of Amnon (2 S. 3:2; 1 Ch. 3:1), was undoubtedly from there (1 S. 25:43; 27:3; 2 S. 2:2). Abel's proposed identification with Khirbet Ṭarrâmâ is impossible, since that site is not in the same topographical district as the other towns associated with Jezreel.

See *GP*, II, 365. A. F. RAINEY

JEZREEL, VALLEY OF jez-rēl′ [Heb. *ʿēmeq yizrᵉʿe'l*]; NEB VALE OF JEZREEL. The vitally important lowland corridor extending southeastward from the Bay of Acco (modern Haifa Bay) area to the edge of the Jordan Valley at Beth-shean. It is known today as *Emek Yizreel*, or more simply the *Emek* (Arab. *Merj Ibn ʿAmir*). The whole valley is enclosed by steep scarps caused by geological faulting. On the southwest are the high limestone slopes of Mt. Carmel and Mt. Gilboa, and on the northeast the limestone Allonim hills near Nazareth, the isolated dome of Mt. Tabor (apparently the collapsed keystone of an arch) and Mt. Moreh (limestone with a thin covering of basalt). There are two subregions: the central plain of Megiddo and the eastern Beth-shean corridor, with the town of Jezreel at the junction of the two.



The plain of Jezreel as seen from Mt. Carmel (D. Baly)



The plain of Megiddo is triangular, with its base of 32 km. (20 mi.) along the foot of the Carmel range and its apex just N of Mt. Tabor. It is drained by the tiny and sluggish river Kishon, whose course northwestward to the Bay of Acco is twice blocked, once by a narrow volcanic outcrop, extending northeastward from Megiddo, and again by a constricted defile between Mt. Carmel and the hills of lower Galilee, through which it enters the coastal region. The plain is floored with rich alluvium, about 100 m. (330 ft.) deep, brought down from the surrounding hills. It produced abundant wheat harvests in the early summer and well deserved the designation "rich valley" (Isa. 28:1). In winter, however, heavy rains could transform the whole valley into a sea of mud, and movement across it became almost impossible. Elijah advised King Ahab to make all haste to reach Jezreel before the rain began (1 K. 18:44), and Barak defeated Sisera in this plain because the Canaanite chariots could not move in the mud (Jgs. 4:15; 5:4). Both roads and villages clung to the lower slopes of the hills, the main road from Acco to Beth-shean following the base of the triangle.

The plain of Megiddo has five gates. One is the defile leading to the Bay of Acco, and another the threefold gate to the plain of Sharon, formed by narrow valleys across Carmel and guarded by the three fortresses of Jokneam, Megiddo, and Taanach. Of these Megiddo was by far the most important, because it controlled also the narrow volcanic causeway leading across the easily flooded plain. The third gate is the ascent of Gur (2 K. 9:27) leading southward through Dothan toward Samaria. Here Joseph came in search of his brothers (Gen. 37:17), and the king of Syria vainly tried to arrest Elisha (2 K. 6:13). Fourth is the passage on either side of Mt. Tabor, traditionally, though probably incorrectly, identified with the mount of transfiguration (Mt. 17:1; Mk. 9:2; Lk. 9:28). Here Barak mustered the warriors of Naphtali and Zebulun before the battle against Sisera (Jgs. 4:6). The great "Way of the Sea" from Damascus to Egypt ran N of Tabor and across the volcanic causeway to Megiddo. The other gate is the entrance to the Beth-shean corridor.

This corridor, guarded at its entrance by Jezreel (Zirʿîn), with its rich springs, and Shunem (Sôlem), slopes down toward the Jordan Valley between Mt. Gilboa on the south and Mt. Moreh on the north. Never more than 3 km. (2 mi.) wide, it is drained by the short river Harod (Arab. *Jālûd*) and is normally protected from the winter cold. It was the scene of the victory of Gideon over the Midianites (Jgs. 7) and later of the tragic defeat of Saul by the Philistines (1 S. 29:1; 31:1-7).

The plain of Megiddo was the territory of Zebulun and the Beth-shean corridor that of Issachar (Josh. 19:10-23), both of whom were said to "suck the affluence of the seas and the hidden treasures of the sand" (Dt. 33:19), because of their position on the great trade routes, but they were easily invaded and compelled to become "a slave at forced labor" (Gen. 49:15). Although the town of Jezreel was apparently a royal city in the kingdom of Israel and may have served as the king's winter residence, it could not withstand a siege, as could Samaria. With the collapse of the Syro-Israelite alliance against Assyria after the revolution against the dynasty of Omri in 842 B.C., Jehu was forced to submit to Shalmaneser III on Mt. Carmel in 841, and the southern edge of Jezreel became temporarily the northern frontier of Israel, marking, as it did, the northern edge of the better defended "heartland" of the country.

D. BALY

JEZREELITE jez'ri-ə-līt [Heb. *hayyizrᵉʿēʾlî*]. A man of Jezreel, collectively the people of Jezreel. The term is always used of Naboth (1 K. 21:1ff.; 2 K. 9:21, 25), and refers to JEZREEL in the plain of Jezreel.

JEZREELITESS jez'ri-ə-līt'es [Heb. *yizrᵉʿēʾlît*]. A woman of Jezreel. The term is always used of Ahinoam the Jezreelitess (RSV also "of Jezreel"), one of David's wives (1 S. 27:3; 30:5; 2 S. 2:2; 3:2; 1 Ch. 3:1), and refers to Jezreel in Judah.

JEZRIELUS jez-ri-ē'lus [Gk. *Iezrielos*] (1 Esd. 9:27, NEB). *See* JEHIEL **8.**

JIBSAM jib'sam (1 Ch. 7:2, AV). *See* IBSAM.

JIDLAPH jid'laf [Heb. *yiḏlap*–'he weeps'(?)]. The seventh son of Nahor and Milcah (Gen. 22:22).

JIMNA, JIMNAH jim'na. *See* IMNAH **1.**

JIMNITES jim'nīts (Nu. 26:44, AV). *See* IMNITES.

JIPHTAH jif'tə [Heb. *yiptāḥ*] (Josh. 15:43, AV). *See* IPHTAH.

JIPHTHAHEL jif'tha-el (AV Josh. 19:14, 27). *See* IPHTAH-EL.

JOAB jō'ab [Heb. *yôʾāḇ*–'Yahweh is father'; Gk. *Iōab*].

1. Son of Zeruiah, David's sister. He was "commander of the army" (cf. 2 S. 19:13 [MT 14]) under David. He is first introduced in the narrative of the war with Abner, who supported the claims of Ishbosheth to the throne against those of David (2 S. 2:8–3:1). The two armies met, and on Abner's suggestion a contest took place between twelve men from each side; a general engagement followed, and in this Joab's army was victorious. Asahel, Joab's brother, was killed in his pursuit of Abner, but Abner's army was closely pursued, and he appealed to Joab for a cessation of hostilities. Joab halted but declared that he would not have ceased if Abner had not made his plea.

In 2 S. 3:12-29 Abner visited David at Hebron, and made an alliance with him. He then left the town, apparently under royal protection. Joab was absent at the time, but returned immediately after Abner's departure, and protested to David for not avenging Asahel's death, and at the same time attributed a bad motive to Abner's visit. He sent a message, no doubt in the form of a royal command, for Abner to return; Abner did so and was taken aside "into the midst of the gate" (or as the LXX and some commentators read, "into the side of the gate" [3:27]), and slain there by Joab. David proclaimed his own innocence in the matter, commanded Joab as well as the people to mourn publicly for the dead hero (3:31), composed a lament for Abner, and pronounced a curse upon Joab and his descendants.

In 2 S. 10:1-14 (par. 1 Ch. 19:1-15) David sent ambassadors with his good wishes to Hanun on his ascending the throne of the Ammonites; the ambassadors were ill-treated, and war followed, David's troops being commanded by Joab. On finding himself placed between the Ammonites on the one hand, and their Syrian allies on the other, Joab divided his army, and himself led one division against the Syrians, leaving his brother Abishai to fight the Ammonites; the defeat of the Syrians was followed by the rout of the Ammonites.

2 S. 10:15-19 (par. 1 Ch. 19:16-19) describes a second war between Hadadezer and David. Joab is not mentioned here.

2 S. 11:1 narrates the resumption of the war against the Ammonites; Joab was in command, and the town of Rabbah was besieged. Here occurs the account of David's sin with Bathsheba, omitted by the Chronicler. David told Joab to send Uriah, her husband, to Jerusalem, and when Uriah refused to break the soldier's vow (11:6-13), Joab was used to procure his death in the siege, and the general then sent news of it to David (11:14-27). After capturing the "water-city" of Rabbah, Joab sent for David to complete the capture and lead the triumph himself (12:26-29).

The next scene depicts Joab succeeding in his attempt to have Absalom restored to royal favor. Noticing that "the king's heart went out to Absalom" (14:1), he arranged for "a wise woman" of Tekoa to bring a supposed complaint of her own before the king and then rebuke him for his treatment of Absalom. The plan succeeded. David saw Joab's hand in it and gave him permission to bring Absalom to Jerusalem. But the rebel had to remain in his own house, and was not allowed to see his father (14:1-24).

Absalom then attempted to secure Joab's intercession for a complete restoration to his father's confidence. Joab turned a deaf ear to the request until his field was set on fire at Absalom's command. He then saw Absalom and persuaded David to receive his prodigal son back into the royal home (14:28-33).

Afterward Absalom revolted, and made Amasa, another nephew of David, general instead of Joab (17:24f.). David fled to Mahanaim, followed by Absalom. Joab was given a third of the army, the other divisions being led by Abishai and Ittai. He was informed that Absalom had been caught in a tree (or thicket), and rebuked the informer for not having killed him. Although he was reminded of David's tender plea that Absalom be dealt with kindly, he killed the rebel himself, and afterward called for a general halt of the army. When David gave vent to his feelings of grief, he was sternly rebuked by Joab, and the rebuke had its effect (17:1–19:8a [MT 9a]).

On David's return to Jerusalem, Amasa was made commander of the army in place of Joab (19:13 [MT 14]). Sheba then revolted, Amasa lost time in making preparation for suppressing it, and Abishai was given command of the army (20:6; the Pesh. reads "Joab" for "Abishai" in this verse, and some commentators follow it, but the LXX supports the MT). Joab seems to have accompanied Abishai; and when Amasa met them at Gibeon, Joab, on pretense of kissing his rival, killed him. He then assumed command, was followed by Amasa's men, and arranged with a woman of Abel-beth-maacah to deliver to him Sheba's head. The revolt was then at an end.

Joab subsequently opposed David's suggestion of a census, but eventually carried it out (2 S. 24:1-9; 1 Ch. 21:1-6), yet 1 Ch. 21:6 and 27:24 relate that he did not carry it out fully. He was one of Adonijah's supporters in his claim to the throne (1 K. 1:7, 19, 41). For this he had to pay with his life, being slain at the altar in the "tent of the Lord" (1 K. 2:28-34) by Benaiah, who acted upon Solomon's orders. His murderer became his successor as head of the army. 1 K. 2:5 makes David advise Solomon not to forget that Joab slew Abner and Amasa, and 1 K. 11:14-22 contains a reference to the dread of his name in Edom. 1 Ch. 11:6 makes him gain the commander's position first at the capture of Jerusalem, but 2 S. 2–3 refers to a time before this event (cf. 2 S. 5:6-10; for a proposed solution of this difficulty, see KD, *in loc.*); 1 Ch. 11:8 makes him repair the city, and 1 Ch. 26:28 refers to a dedication of armor by him.

In summing up Joab's character, one should remember the stirring times in which he lived. That he was a most able general, there is no doubt. He was, however, very jealous of his position, and this accounts for Amasa's murder, if not partially for that of Abner too; if he was afraid that Abner would supplant him, that fear may be held to be justified, for Amasa, who had not been too loyal to David, did take Joab's place for a time. But blood revenge for Asahel's death was perhaps the main cause. Yet even when judged in the light of those rough times, and in the light of the blood-revenge custom (see R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 11), the murder of Abner was a foul, treacherous deed.

Joab opposed the census probably because it was an innovation. His rebuke of David's great grief over Absalom's death can only be characterized as just; he is the stern warrior who, after being once merciful and forgiving, will not again spare a deceitful rebel; and yet David shows how a father's conduct toward a prodigal, rebellious son is not regulated by stern justice. Joab's unswerving loyalty to David leads one to believe that no disloyalty was meant by his support of Adonijah, who was really the rightful heir to the throne. But their plans were defeated by those of the harem.

Taken as a whole, his life, as depicted in the very reliable narrative of 2 Samuel and 1 Kings, may be said to be as characteristic of the times as that of David himself, with a truly Homeric ring about it. He was a great man, great in military ability and also in personal revenge, in his loyalty to the king as well as in his stern rebuke of his royal master. He was the greatest of David's generals, and the latter's success and glory owed much to this noblest of that noble trio whom Zeruiah bore.

2. A Judahite, father or founder of Ge-harashim (lit. "valley of craftsmen"; 1 Ch. 4:14), which is possibly to be identified with the Wâdī el-ʿArabah. *See* GE-HARASHIM.

3. A family of returned exiles (Ezr. 2:6 par. Neh. 7:11; Ezr. 8:9; 1 Esd. 8:35). D. F. ROBERTS

JOACHAZ (1 Esd. 1:34, AV, NEB). *See* JEHOAHAZ 3.

JOACHIM jō ə-kim (Bar. 1:7, AV). *See* JEHOIAKIM 2.

JOACIM jō'ə-kim.

2. (1 Esd. 1:43, AV). *See* JEHOIACHIN.
3. (1 Esd. 5:5, AV). *See* JOAKIM 1.
4. (AV Jth. 4:6, 8, 14; 15:8). *See* JOAKIM 2.
5. (AV Sus. 1, 4, 6, 28f., 63). *See* JOAKIM 3.

JOADANUS (1 Esd. 9:19, AV, NEB). *See* JODAN.

JOAH jō'ə [Heb. *yôʾāḥ*–'Yahweh is brother'].

1. Son of Asaph and recorder under King Hezekiah (2 K. 18:18, 26; Isa. 36:3, 11, 22); he was one of the three officers sent by the king to speak to the Assyrian envoys at the siege of Jerusalem (*ca.* 701 B.C.).

2. In 1 Ch. 6:21 (MT 6); 2 Ch. 29:12, a Levite (son of Zimmah) = Ethan of 1 Ch. 6:42 (MT 27).

3. A son of Obed-edom (1 Ch. 26:4).

4. Son of Joahaz and recorder under King Josiah (2 Ch. 34:8).

JOAHAZ jō'ə-haz [Heb. *yôʾāḥāz*–'Yahweh has grasped']; (2 Ch. 34:8). Alternate form of JEHOAHAZ 1.

JOAKIM jō'ə-kim [Gk. *Iōakeim*].

1. (1 Esd. 5:5); AV JOACIM. Son of Zerubbabel and leader of one of the groups of returning exiles.

2. (Jth. 4:6, 8, 14; 15:8); AV JOACIM. High priest in Jerusalem who, along with the "senate of the people of Israel," welcomed the heroine Judith back to the city after the death of Holofernes (Jth. 15:8).

3. (Sus. 1, 4, 6, 28f., 63); AV JOACIM. The husband of Susanna.

4. (1 Esd. 1:37-39, NEB). *See* JEHOIAKIM 1.

5. (1 Esd. 1:43, NEB). *See* JEHOIACHIN.

JOANAN jō-ā'nan [Gk. *Iōanan*].

1. A grandson of Zerubbabel in the genealogy of Jesus according to Luke (3:27; AV JOANNA; NEB JOHANAN).

2. (1 Esd. 9:1, AV, NEB). *See* JEHOHANAN 3.

JOANNA jō-an'ə [Gk. *Iōanan* or *Iōanna*]. The wife of Chuza, Herod's steward. She was one of the "women who had been healed of evil spirits and infirmities" and who "provided for them [i.e., Jesus and His disciples] of their means" on the occasion of Jesus' tour through Galilee (Lk. 8:2f.). Along with other women she accompanied Jesus on His last journey from Galilee to Jerusalem, and was present when His body was laid in the sepulchre (Lk. 23:55). She was thus among those who prepared spices and ointments, who found the grave empty, and who "told this to the apostles" (Lk. 23:56–24:10). C. M. KERR

JOANNES jō-an'ēz [Gk. *Iōnnēs*]. An NEB variant of Johanan (1 Esd. 8:38; *see* JOHANAN 8) and Jehohanan (1 Esd. 9:29; *see* JEHOHANAN 4).

JOARIB jō'ə-rib [Gk. *Iōarib*]; AV also JARIB. Ancestor of Mattathias (1 Macc. 2:1; 14:29), called Jehoiarib or Joiarib in the OT, the chief of the first of the twenty-four courses of priests in the reign of David.

JOASH jō'ash [Heb. *yᵉhôʾāš, yôʾāš*–'Yahweh has bestowed' (cf. 2 K. 11:2, 21; 12:1-19; 2 Ch. 24:1; etc.)].

1. Also **JEHOASH** jə-hō'ash, the ninth king of Judah, and son of Ahaziah and Zibiah, a woman of Beer-sheba (2 K. 11–12; 2 Ch. 22:10–24:27). Joash was seven years old when he became king, and he is said to have reigned for forty years, though this figure may not be exact. The dates of his reign are given as 837-800 B.C. by W. F. Albright (*BASOR*, 100 [Dec. 1945], 16-22) and as 835-796 B.C. by Thiele (*MNHK*).

I. His Early Preservation.–When Athaliah usurped the throne and massacred the royal princes, Joash was saved from her fury by the action of his aunt Jehosheba, the wife of Jehoiada the high priest (2 K. 11:1f.; 2 Ch. 22:10f.). For six years he was concealed in the house of Jehoiada, which adjoined the temple; hence he is said to have been "hid in the house of Yahweh" — a perfectly legitimate use of the phrase according to the idiom of the time.

II. Counterrevolution.–During these formative years of Joash's early life, he was under the moral and spiritual influence of Jehoiada, a man of lofty character and devout spirit. At the end of the six years a counterrevolution was planned by Jehoiada, and was successfully carried out on a sabbath, at one of the great festivals. The accounts of this revolution in Kings and Chronicles supplement each other, and although the Levitical interest of the Chronicler is apparent in the details to which he gives prominence, the narratives do not necessarily collide, as has often been represented. The event was prepared for by the private exhibition of the young king to the five captains of the Carites and guards (2 K. 11:4; 2 Ch. 23:1); obviously the royal bodyguard had to be won over from its allegiance to

Athaliah to support the legitimate heir to the throne. These entered into covenant with Jehoiada, and by his direction summoned the Levites from Judah (2 Ch. 23:2) and made the necessary arrangements for guarding the palace and the person of the king. In these dispositions both the royal bodyguard and the Levites seem to have had their parts. Joash next appeared standing on a platform in front of the temple, the law of the testimony in his hand and the crown on his head. Amid acclamations, he was anointed king. ATHALIAH, rushing on the scene with cries of "treason," was driven out and slain. A new covenant was made between Yahweh and the king and people; and at the conclusion of the ceremony a great procession was formed, and the king was conducted with honor to the royal house (2 K. 11:19; 1 Ch. 23:20). The boy king had full popular support, and his reign began auspiciously.

III. Repair of the Temple.–In early manhood Joash married two wives, and by them had sons and daughters (2 Ch. 24:3). His great concern at this time was the repair of the temple, which in the reign of Athaliah had been neglected, broken up, and plundered (2 K. 12:5, 12; 2 Ch. 24:7). To meet the expense of its restoration, the king ordered that all monies coming into the temple, whether dues or voluntary offerings, should be appropriated for this purpose (2 K. 12:4), and from the account in Chronicles he would seem to have contemplated a revival of the half-shekel tax appointed by Moses for the construction of the tabernacle (2 Ch. 24:5f.; cf. Ex. 30:11-16; 38:25). To enforce this impost would have involved a new census, and the memory of the judgments which attended David's former attempt of this kind may well have had a deterrent effect on Jehoiada and the priesthood. "The Levites did not hasten it," it is declared (2 Ch. 24:5).

Time passed, and in the twenty-third year of the king's reign (his thirtieth year) it was found that the breaches of the house had still not been repaired. A new plan was adopted. It was arranged that a chest with a hole bored in its lid should be set up on the right side of the altar in the temple court, under the care of two persons, one the king's scribe, the other an officer of the high priest, and that the people should be invited to bring voluntarily their half-shekel tax or other offerings, and put it in this box (2 K. 12:9; 2 Ch. 24:8f.). Gifts from worshipers who did not visit the altar were received by priests at the gate, and brought to the box. The expedient was a brilliant success. The people cheerfully responded, large sums were contributed, the money was honestly expended, and the temple was thoroughly renovated. There remained even a surplus, with which gold and silver vessels were made, or replaced, for the use of the temple. Jehoiada's long and useful life seems to have ended soon after.

IV. The King's Decline.–After Jehoiada died it soon became evident that the strongest pillar of the state was removed. It is recorded, "Jehoash [Joash] did what was right in the eyes of the Lord all his days, because Jehoiada the priest instructed him" (2 K. 12:2), but after Jehoiada had been honorably interred in the sepulchres of the kings (2 Ch. 24:16), a sad decline became manifest. The princes of Judah came to Joash and expressed their wish for greater freedom in worship than had been permitted them by the aged priest. With weak complaisance, the king "hearkened to them" (v. 17). Soon idols and Asherim were set up in Jerusalem and the other cities of Judah. Unnamed prophets raised their protests in vain. The high priest Zechariah, a worthy son of Jehoiada, testified in his place that as the nation had forsaken Yahweh, He also would forsake it, and that disaster would follow (v. 20). Wrathful at the rebuke, the king gave orders that Zechariah should be stoned at the temple court (v. 21). This was the act of sacrilege, murder, and ingratitude to which Jesus referred in Mt. 23:35; Lk. 11:51.

V. Disaster and Assassination.–The high priest's dying words, "May the Lord see and avenge!" soon found an answer. Both Hebrew kingdoms were weak at this time, because they were disunited (for Jehu's wanton killing of King Ahaziah of Judah, the father of Joash, must have severed political relations), and more particularly because of the ascendancy of Damascus (due in turn to the temporary weakness of Assyria). So Hazael of Syria was able to overrun Israel, conquer the Philistine city of Gath, and advance on Jerusalem (2 K. 12:17; 2 Ch. 24:23f.). To save the capital from the indignity of foreign occupation, Joash, then in dire sickness, collected all the hallowed things of the temple and all the gold of the palace, and sent them to Hazael (2 K. 12:17f.). This failure of his policy excited such popular feeling against Joash that a conspiracy was formed to assassinate him. His physical sufferings won him no sympathy, and two of his own officers slew him while he slept in the fortress of Millo, where he was paying a visit (v. 20). He was buried in the city of David, but not in the royal sepulchres as Jehoiada had been (2 Ch. 24:25).

Joash is mentioned as the father of Amaziah (2 K. 14:1; 2 Ch. 25:25), his successor. His contemporaries in Israel were Jehu, Jehoahaz, and Joash.

2. Also **JEHOASH.** The son of Jehoahaz, and twelfth king of Israel (2 K. 13:10-25; 14:8-16; 2 Ch. 25:17-24). Joash reigned for sixteen years, 801-786 B.C. (W. F. Albright, *BASOR*, 100 [Dec. 1945], 16-22; Thiele (*MNHK*) places him approximately three years later; cf. also A. Cody, *CBQ*, 32 [1970], 325-340). His reign marks the beginning of a resurgence of prosperity for Israel, which came to full fruition in the reign of his successor. This recovery was due to the total defeat of Syria by the Assyrian king Adadnirari III (811-783 B.C.); Damascus, under Ben-hadad II, was crushed in 802 B.C.

I. Elisha and Joash.–During the three previous reigns, for half a century, Elisha had been the prophet of Yahweh to Israel. He was now aged and on his deathbed. Hearing of his illness, the young king came and had a touching interview with him. His affectionate exclamation, "My father, my father, the chariots of Israel and the horsemen thereof" (2 K. 13:14; cf. 2:12), casts a pleasing light upon his character. Not only had Elisha repeatedly saved the armies of Israel from the ambushes prepared for them by the Syrians (2 K. 6:8-23), but he had given assurance of the relief of the capital when it was at its worst extremity (6:24ff.). To Joash, Elisha's presence was indeed in place of chariots and horses. The truth was demonstrated afresh by the promise the dying prophet now made to him. Directing Joash in the symbolical action of the shooting of certain arrows, he predicted three victories over the Syrians, and more would have been granted him had the faith of the king risen to the opportunity then afforded him.

II. Military Successes.–Now that Syria had been so weakened by Adadnirari III, Joash was able to recover the losses of the previous reign. He wrested from Ben-hadad the cities he had taken from Jehoahaz of Israel. The account of Joash's reign is very brief, but the favorable impression of him formed from the acts of Elisha is strengthened by another gained from the history of Amaziah of Judah (2 Ch. 25:17-24). For the purpose of a southern campaign, Amaziah had hired a large contingent of troops from Samaria. Being sent back unemployed, these mercenaries committed ravages on their way home, for which, apparently, no redress was given. On the first challenge of the king of Judah, Joash magnanimously refused the call to arms. Amaziah persisted, however, and the peace estab-

lished nearly eighty years before by Jehoshaphat (1 K. 22:44) was broken at the battle of Beth-shemesh, in which Amaziah was defeated and captured. Jerusalem opened its gates to the victor, who looted its palace and temple, broke down part of the city wall, and took hostages to Samaria to ensure Israel's obedience (2 K. 14:13f.).

III. Character.–Joash did not long survive his crowning victory, but left a resuscitated state, and laid the foundation for a subsequent rule which raised Israel to the zenith of its power. Josephus gives Joash a high character for godliness; but like each of his predecessors, he followed in the footsteps of Jeroboam in permitting, if not encouraging, the worship of the golden calves. Hence his conduct is pronounced "evil" by the historian (2 K. 13:11). He was succeeded by his son Jeroboam II.

3. A descendant of Judah, son of Shelah (1 Ch. 4:22).

4. The father of the "judge" Gideon (Jgs. 6:11, 25-32). He was of the tribe of Manasseh, of the clan of Abiezer, and had property at Ophrah. On his land stood an altar to Baal and an Asherah, until Gideon destroyed them. Gideon's action incensed the citizens of Ophrah, who urged Joash to put his son to death; but he declined, remarking, "If [Baal] is a god, let him contend for himself" (v. 31).

5. One of the warriors who joined David at Ziklag (1 Ch. 12:3). He was a Benjaminite from Gibeah, and was related to Saul, David's bitter enemy.

6. A son of King Ahab. Evidently he was in charge of the prison at Samaria (1 K. 22:26f.; 2 Ch. 18:25f.).

W. S. CALDECOTT
D. F. PAYNE

JOASH [Heb. *yō'āš*–'Yahweh has aided'].

1. A Benjaminite, one of the descendants of Becher (1 Ch. 7:8).

2. One of David's commissary officers supervising supplies of oil (1 Ch. 27:28).

JOATHAM jō'ə-thəm (Mt. 1:9, AV). *See* JOTHAM **3.**

JOB jōb. This book is named after its leading character, as are the books of Ruth, Ezra, and Nehemiah. It describes Job's trial and his struggle to be vindicated by God.

IX. Message

I. Name.–The central character's name is Job, Heb. *'iyôḇ* (Gk. *Iōb*). The precise meaning and origin of this name are debated. It is similar to the Hebrew word for "enemy," *'ôyēḇ*. If this root is the basis for the name, the etymology implies that Job is treated as God's enemy, or possibly that he is the object of enmity. In 13:24 (cf. 33:10) there is a play on this similarity; Job accuses God of treating him like His enemy. The form of this name, however, is that which designates a profession or habitual characteristic, and the root is not attested in this form. Another explanation turns to the Arabic root *'wb*, "return, repent," which suggests "the penitent one." If this were the meaning, only a small part of the whole drama would be reflected in the name.

Akkadian documents of the 2nd millennium B.C. from Mari, Alalakh, and Tell el-Amarna show a frequent use of this name. In the Execration Texts from Egypt (*ca.* 2000 B.C.) a Palestinian chief has the name *'ybm*. In a letter from Tell el-Amarna (no. 256) a prince of Ashtaroth in Bashar is named *Ay(y)âb*. W. F. Albright (*JAOS*, 74 [1954], 223-233) suggests that the name means "where is (my) Father?" This etymology fits in well with Job's longing for God, who is hiding His face from His servant. It also suggests that the name belonged to a patriarch prior to his testing.

II. Place in the Canon.–The canonicity of Job has never been seriously questioned. Its position, however, has fluctuated. In Protestant Bibles it falls after the historical works, which end with Esther, and thus heads the poetical books: Job, Psalms, Proverbs. This tradition is attested by Cyril of Jerusalem and Epiphanius, among others. Jerome preferred this order, and the Council of Trent established it for the Vulgate. In the Hebrew Bible it appears in the third division, the writings or Kethubhim; the order is Psalms, Job, Proverbs. The oldest tradition lists the books thus: Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Solomon, etc. The Syriac Bible places Job after the Pentateuch in honor of the tradition that Moses was its author.

III. Text and Language.–The text of Job is frequently disturbed; many passages are obscure, either because of a rare word or because of a corrupt text. The versions testify to the difficulties of interpreting this poetical book even in ancient times. They offer variant readings, some of which help restore the correct Hebrew reading, but most of which are not very helpful.

The LXX is, for the most part, a literal, faithful translation of the Hebrew. Although it has many variant readings, the translators endeavored to be true to the Hebrew. Some variants bear witness to a different textual tradition, while many are paraphrases that attempt to handle an obscure text. The most unusual feature of the oldest Greek version is that it is shorter than the MT by some four hundred lines. One explanation of this brevity is that this book was translated into Greek before its growth process had ceased. A more likely position is that the LXX translators intentionally abridged the poem. This possibility is evident in the increasing number of omissions in the latter portions of the book and in the omission of many redundant passages. In a few places the translators made changes based on their theological perspectives, but such changes are infrequent. In his textual work Origen restored the missing lines to the LXX from Theodotion's Greek translation and marked them with an asterisk in his Hexapla. A Coptic version of the LXX attests the pre-Origen form.

The Targum follows the MT quite closely but with some

of its own idiosyncrasies; for example, it interprets some texts in light of Israel's history and sometimes adds theological explanations. Thus the Targum tends to expand the text.

A Targum of Job from Cave 11 of Qumrân (11QtgJob) is the oldest Targum known. The paleography of the MS led van der Ploeg and van der Woude to date it in the 1st cent. A.D., but Pope claims that the style of the language pushes its origin back to the 2nd cent. B.C. The text is extant from the middle of ch. 17 through 42:11, but unfortunately it is quite fragmentary; from ch. 32 on more of the text is preserved, including some extensive passages between 37:10 and 42:11. Interestingly this Targum ends at 42:11. On the whole the Qumrân Targum supports the MT, including the present status of chs. 24–27; however, there are numerous differences, and at times it sides with the LXX against the MT. Thus some evidence suggests that this book has had a diverse textual tradition.

The Peshitta is translated from the Hebrew and offers insight into some of the obscure passages. As the textual tradition of the MT is more fully understood, the Peshitta will most likely increase in value.

Soon after he translated Job into Latin from the LXX at the end of the 4th cent. A.D., Jerome decided to improve the translation by working directly from the Hebrew; he apparently continued to be influenced by the LXX Hexapla. A rabbi of Lydda was a resource who influenced him with the traditional rabbinic interpretation. The result of his labor was a fluid, smooth translation. Thus the Vulgate affords some assistance to understanding the text of Job.

Even with all these aids, plus the insights gained from recent discoveries of the Ugaritic texts and other inscriptions, numerous passages still require some emendation just to be translated. The more emendations increase, however, the further the interpretation moves from the original, so it is better to live with the difficulties and obscurities than to create a new work. Job remains the OT book with the most difficult text.

The language of the book, too, is most unusual. It is characterized by numerous rare words and unique examples of morphology and syntax; as a result numerous suggestions have been made to account for its singular nature. Since a most probable setting of the story is EDOM, it has been suggested that the poet was an Edomite. Although the Israelites detested Edomites, there was frequent interchange between the two countries. Also, Edom was famous for its wisdom; perhaps Job is an example from that wisdom tradition. Along with Ammonite and Moabite, the Edomite language is a dialect close to Hebrew. Since scant linguistic material from this region has come to light, the Edomite setting for this book remains hypothetical.

From the time of Ibn Ezra (12th cent. A.D.) some scholars have gone so far as to argue that Job was translated into Hebrew from another language. Arabic and Aramaic have been taken as the original languages. Guillaume places its origin in Teman from a poet whose language was permeated by Arabic. Tur-Sinai argues that the poem came from a partial Aramaic translation; many Aramaic words and phrases were left untranslated because of their similarity to the Hebrew while others were misunderstood and hence mistranslated. The Aramaic was the Babylonian Aramaic of the 6th cent. B.C. In addition, he thinks that many portions of the book became dislocated in the process. Tur-Sinai thus offers many new and different interpretations of Job, but his ingenious insights are buried amidst too many untenable speculations.

All interpreters dip into Arabic to explain numerous obscure words, since that language has a vast literature that offers many possible cognates. On the other hand, as our knowledge of Canaanite dialects increases, the importance of Arabic diminishes. The abundance, though, of Aramaic influence is beyond dispute.

The discoveries of the Ugaritic texts have greatly enhanced the linguistic knowledge of Northwest Semitic, and particularly the style of Semitic poetry. Articles by numerous scholars, especially the work of Gordon and Dahood, have applied the results of Ugaritic studies to improve the interpretation of many OT passages. Much insight into Job has resulted; Pope's commentary may be cited as the most noteworthy example.

The style of the book of Job suggests that the poet probably came from a region outside of Jerusalem; therefore his Hebrew was a dialect different from Jerusalem Hebrew and may have been very close to Aramaic. Further, the poet most likely had traveled much and was multilingual. As an artist he no doubt enriched the vocabulary of his poem to capture special nuances and to communicate subtle tones as he sought to grapple with the gravest human question, suffering. Since there were multiple dialects of these Northwest Semitic languages in a close geographical area, most people would know more than one dialect and thus would have little trouble understanding a presentation of this work.

IV. Date.–The date of composition is difficult to establish. The prose portions reflect the epic style of the patriarchal period. Numerous details bear witness to the patriarchal age and suggest the antiquity of the prose account. Job's wealth consists of flocks, slaves, and abundant offspring. The numbers three, seven, and ten dominate, in epic style, the accounting of his goods. His faith is simple and as head of the household he offers sacrifice for his household at a local shrine; he too may intercede for others. The Sabeans and the Chaldeans are still marauding tribes, rather than settled city dwellers. The unit of money (*qᵉśîṭâ*, 42:11) appears elsewhere only in Gen. 33:19 and Josh. 24:32. The description of Job's blessing contains ancient features: the naming of his three daughters without giving the names of his sons, his age of 140 years, his seeing his children's children to four generations, the report that he died an old man full of days. Conversely, the style of poetry has many characteristics of late Hebrew that lead many to date the work in the postexilic period.

The final form of the book was certainly reached by the 3rd cent. B.C., for it was known to Ben Sira and fragments of a manuscript from Qumrân are written in paleo-Hebrew script, suggesting further evidence that the work was viewed as coming from the patriarchal period. The lack of historical allusions suggests that the work was not written to address a particular national problem. Thus it is doubtful that this book was composed during the exilic period, for it has no specific allusions to the Exile. Also, the international flavor of the work and its primary concern with an individual's response to tragedy deny any connection with that issue. The greatest contrast between Job's suffering and Israel's is that his is undeserved whereas the entire OT tradition witnesses that the Babylonian Captivity is the result of Israel's disobedience of God's law.

Since the issue is the suffering of an individual, the work could have arisen in any period. Tragedy knows no time boundaries; it may strike during times of national prosperity or during times of adversity. Thus it is hard to reconstruct the social setting that would be the matrix which provided the impetus for such a masterpiece. The poet is searching for insight into the suffering of the righteous and at the same time is strongly resisting an easy application of the doctrine of retribution that condemns all who are in dire situation and blesses all the rich. Since the poet is taking up a polemic against various inadequate interpretations of suffering, one could suggest a date if

more were known about the issues of concern in the wisdom school in the different periods. Another clue is the close affinity between the books of Job and Isaiah, most particularly their concepts of the righteous sufferer who bears his trial in faithful obedience to God. If the direction of literary influence could be unquestionably established, a reference point would be established, for the date of Isaiah's work is quite firm: an early seventh-century date for those who hold to the unity of Isaiah and a mid-fifth-century date for the scholars who accept the prophetic activity of Deutero-Isaiah. Job may be one of the prototypes for the figure of the Suffering Servant. Since Isaiah develops the vicarious virtue earned by the righteous sufferer, he may be influenced by the Jobian poet. Certainly the thesis of the atonement of mankind's sins by the suffering of an obedient, righteous servant would find a much greater acceptance among a people who had already wrestled with the concept that an innocent, righteous person might have to endure excruciating agony in a test of his faith as it is expressed in Job. Therefore if Job was prior to Isaiah, the work may come from the preexilic community. Thus a date in either the late 10th cent. during the energetic activity of the wisdom school or at the beginning of the 7th cent. under the revitalized activity of the wise under King Hezekiah may be seriously considered.

Although a seventh-century date should not be too readily dismissed, the majority of critical scholars date the work to the 4th cent. B.C. A definitive position, however, is not possible, and thus the question of date should not be a divisive issue.

V. Background and Literary Parallels.–The book of Job stands alone in the OT, but it forms a part of the class of literature of the ancient Near East that struggles with the issues of suffering and turmoil in society. Various works challenge traditional ideas that have been reduced to simplistic laws: many of these works come out of the wisdom schools. In the OT the wisdom literature has close affinities with its Near Eastern counterparts, e.g., the same ideas and language are found in Prov. 22:17–24:22 and in the Egyptian *Wisdom of Amenemope*. The universal scope of the work, along with the wide knowledge of customs and nature from various parts of the Near East, indicates that the poet had traveled widely, or, if not, that he certainly belonged to a social class in which he had international contacts. Thus he most certainly was aware of the rich literature from surrounding countries.

In format the book of Job is comparable to *The Protests of the Eloquent Peasant* (*ANET*, pp. 407-410), which was written in Egypt in the 21st cent. B.C. It too consists of nine semipoetical speeches set between a prose prologue and epilogue; this A-B-A style appears in many ancient works. The greater point of contact is the use of long speeches to discuss matters of concern from a wisdom perspective. The peasant appeals to the pharaoh for redress of a violation of his justice. At first the peasant presents his case politely, but he becomes more irate and provoking as his case wears on. He would rather accept death than compromise his appeal for justice. In contrast, Job becomes more confident as his case drags out and his accusation of injustice focuses on God's governing the universe.

The book of Job may also be compared with *The Admonitions of Ipu-Wer* (*ANET*, pp. 441-44). In this work the sage protests the upheaval in Egyptian society and is distressed at the decline of morality. The emphasis, though, is more on a stable social order than on the issue of moral justice.

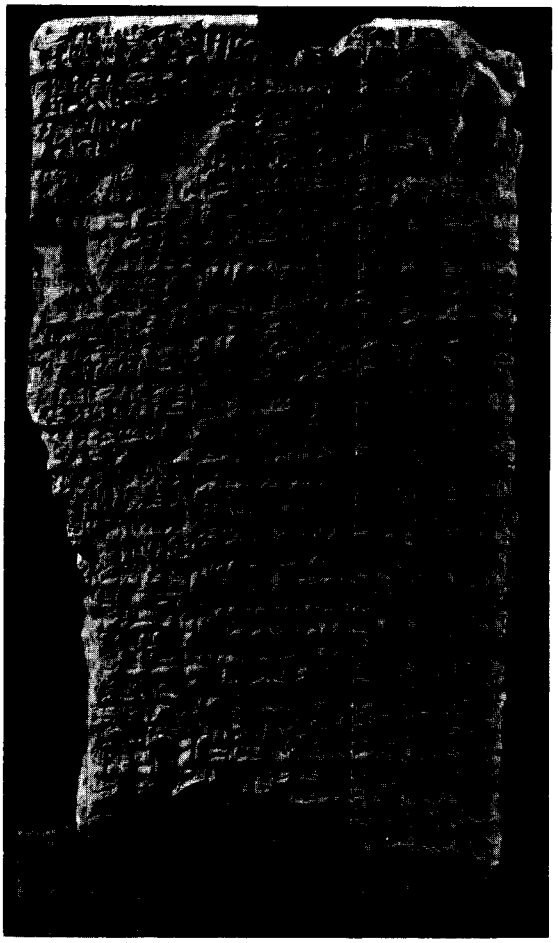
Other literature that addresses despondency over difficult circumstances may be compared with Job. *A Dispute over Suicide* (*ANET*, pp. 405-407), from the second half of the 3rd millennium B.C. and in A-B-A style, is cast in the form of a despondent man's debate with his soul. His contemplation of the values of death and suicide is similar to Job's longing for the rest of Sheol. Job, however, finds greater meaning in life, and his view of God and the worth of mankind causes him to reject any consideration of suicide. Although some of Job's speeches approach soliloquy form, particularly ch. 3, the bulk of the speeches are in disputation style, addressed to his companions or to God. Regarding a lyrical contemplation of death, there is similarity in *A Song of the Harper* (*ANET*, p. 467); its tone, however, is far more sentimental that that found in Job.

Numerous pieces of literature from Mesopotamia also treat the issue of suffering. The most famous one is entitled *I Will Praise the Lord of Wisdom* (*ANET*, pp. 434-37) and is known as *The Poem of the Righteous Sufferer* or *The Babylonian Job*. A man of high rank is reduced to inscrutable suffering. He laments his plight with a vivid description of the loathsome condition caused by his illness. He searches for an explanation, since he knows of no sin in his life. His disease stubbornly resists all efforts of the healing arts or exorcism. At last the god Marduk brings healing; thus the work concludes with a hymn of thanksgiving to Marduk. In contrast to Job, the Babylonian work contains no debate, and the victim recites his ritual acts but is willing to concede having sinned unknowingly.

Points of contact are also found with the Akkadian work known as *The Babylonian Ecclesiastes* or *A Dialogue about Human Misery* (*ANET*, pp. 438-440). A sufferer named Shagil-kinam-ubbib ("May Esagil [the name of Marduk's temple] declare the righteous pure") has a dialogue with a group of friends about divine justice and human suffering. The work contains twenty-seven speeches. The hero begins the discussion and answers each respondent in turn. Presenting his tale of woe to the friends, the sufferer complains, in contrast to Job, that he has endured trouble from his youth even though he has sought the help of the gods. The friends reply that his only hope is to pray for pardon and to avoid such windy talk. As the debate lengthens, the friends accuse him of despising the ordinances of the gods. At the end he pleads for mercy from Ninurta, Ishtar, and the king. The conclusion is missing, but most likely the gods responded to his petition. The speeches are shorter than those in Job and the nature of the hero's suffering and his approach to its solution differ extensively from those of Job. Yet it is possible that the poet of Job knew of this work.

The Akkadian poem *A Pessimistic Dialogue Between Master and Servant* (*ANET*, pp. 437f.) takes up the theme of the meaninglessness of human endeavors. A master discusses with his servant various possible activities to take up, e.g., dining, hunting, building a home, rebelling, loving a woman. The servant heartily agrees with his master; then when the master changes his mind the servant agrees and expresses the futility of the action. Since nothing has significance, death seems to be the only value. The master offers to send the servant on ahead, to which the servant responds that his master would live three days after him. Frustration with the sameness of life is evident. The book of Job, however, deals more with real losses than with mere pessimism, and for Job death is not the solution to his trial.

From the Hittite world comes the tale of Appu. Appu suffers much for lack of children. In his search for a solution, he bears reproach from a chiding wife. Except for this similarity, the accounts have little in common.



Tablet of the so-called Sumerian Job ("Man and His God") from Nippur (18th cent. B.C.). This poem, originating from the late 3rd millennium B.C., tells of an innocent man who, like Job, meets misfortune, prays for deliverance, is finally saved from his afflictions, and then praises his god (University Museum, University of Pennsylvania)

A Sumerian poem from the early 2nd millennium B.C. treats the theme of a wealthy, wise man who undergoes severe illness. The victim laments his plight without attacking his god. Nevertheless, he confesses his sin and receives divine deliverance.

Those who search for points of contact move to more distant lands. In India parallels are found in the story of Hariscandra, a wealthy ruler who was tested as the result of a wager between the gods Vasishta and Shiva. Hariscandra lost all but endured and was restored to his former estate.

The Greeks, too, treated the theme of suffering; particularly important are the tragedies. The one most often cited in comparison with Job is Aeschylus's *Prometheus Bound.* Prometheus aroused Zeus' anger by giving mankind the knowledge of fire. In punishment he was chained to a rock. His companions sought to have him confess his wrong, but he held on to his justice and pushed Zeus to relent. Prometheus, however, was sent to the netherworld. The broad framework is vastly different from Job. Prometheus is a Titan, consoled by his friends, while the fault of his plight resides squarely with a fickle deity. Indeed, the further away from the Semitic world parallels to the book of Job are sought, the fewer are the insights gained from the comparison.

The poet of Job has composed a singular masterpiece. The uniqueness of this work is vividly evident in comparison with all of these compositions. Job never yields to any pressure, be it pain or argumentation, that would have him abandon the certainty of his innocence. Job stands alone as the righteous sufferer; no other man ever showed such personal moral resolution. A comparison with these other texts shows that the poet was influenced by the rich literary tradition of the ancient Near East, but his poetic skill has produced a work which is marked by its originality.

In the context of the canon this book paved the way for the central message of the NT that a righteous person can suffer and be righteous, and that when he has triumphed his victory allows him to intercede for others. Numerous literary masterpieces through the centuries have been influenced by the book of Job in treating the vexing issue of unexplained suffering, e.g., Kafka's *The Trial,* Milton's *Samson,* Dostoevsky's *The Brothers Karamazov.* Even the psychologist Jung entered the debate with his *Answer to Job* (1963). The book of Job continues to speak profoundly. It is mentioned in nearly every serious discussion of suffering and theodicy. The power of this work is evident in its continuous impact on thinking minds and literary artists through the centuries.

VI. Content.–The book of Job consists of three basic parts: the prologue (1–2), the dialogue (3:1–42:6), the epilogue (42:7-17). The dialogue contains six sections: Job's opening lament-curse (ch. 3), a threefold cycle of dialogues between each of the three friends and Job (4–27), a hymn to wisdom (ch. 28), Job's declaration of innocence (29–31), the Elihu speeches (32–37), and the theophany and discourses of Yahweh (38:1–42:6). There are two Yahweh speeches (38:1–40:2; 40:6–41:34), each followed by a response from Job (40:3-5; 42:1-6).

The speeches, the bulk of the work, are composed in beautiful poetry that uses the richest variety of vocabulary and style found in the OT. The prologue (1–2) and the epilogue (42:7-17) are prose, as are the introductions to Job's first speech (3:1) and to the Elihu speeches (32:1-5) and the headings to the other speeches.

A. Prologue (1–2). The prologue presents an opening scene (1:1-5), an account of Job's trial set in duplicate stages (1:6–2:10), and the arrival of the three comforters (2:11-13).

1. Setting (1:1-5). The opening scene introduces Job, an upright, wealthy, wise nobleman. His wealth comprises a large family, abundance of flocks and servants, and a large estate. He has seven sons and three daughters who enjoy their family's wealth in a series of feasts. At the end of each feast Job scrupulously makes sacrifices to atone for any sins that might have been committed inadvertently by his children's frivolity. In all his ways Job has attained the stature of the most righteous and famous man of his day.

2. Job's Trial (1:6–2:10). The next scenes introduce the testing that Job must endure: each of two sessions of the heavenly council (1:6-12; 2:1-6) is followed by a stage in Job's testing (1:13-22; 2:7-10). In the first council scene Yahweh praises the genuine uprightness of His servant Job to the court's adversary, Satan. Satan acknowledges Job's pure character but argues that Job does not serve God out of genuine love, but rather for rewards that God bestows on him. Therefore he challenges Yahweh to let him afflict Job to determine the purity of Job's righteousness. Yahweh accepts the challenge and grants Satan permission to attack Job's possessions but not his body. In a series of four reports Job learns that all of his possessions and his children have been destroyed by marauding

tribes and natural catastrophes. He dons mourning clothes and weeps before God without sinning.

At the next session of the heavenly council Satan acknowledges Job's faithful response, but argues that Job will not maintain his righteous character if his own body is abused. Again Yahweh, confident in His servant, makes a concession to Satan, granting him permission to afflict Job but not to kill him. Satan immediately curses Job with a disease that sorely distresses Job's body from the soles of his feet to the top of his head. In response Job's wife urges him to curse God so that he might die. Job resists the temptation, rebukes her, and mourns his plight in silence. In everything his attitude vindicates Yahweh's confidence; he does not sin at all.

3. Arrival of the Three Comforters (2:11-13). In the final scene of the prologue three comforters, Eliphaz, Bildad, and Zophar, friends of Job, come from distant lands to share in his suffering. So appalled are they at the sight of Job that they rend their garments and mourn in silence for seven days.

B. Job's Curse-Lament (Ch. 3). At the end of seven days Job breaks the silence with a long, bitter lament (3:2-26). This speech, which curses the day of his birth, is not a part of the dialogue since it is addressed not to the three friends but to God — here more an impersonal force than the personal God of his faith. In this curse-lament Job longs for peaceful rest; therefore, if he can remove the day of his origin from the calendar, he would be free from all trouble, for it would be as though he had never been. His words testify that his despair is total; only his righteous character forbids taking his own life. If rest is to be found in Sheol, death must come from the hand of God.

C. Dialogue Between the Three Friends and Job (4–27). Such scathing words provoke a response from Job's three friends, a dialogue in three cycles of speeches and responses. In each cycle Eliphaz, Zophar, and Bildad speak in order and each speech is followed by a response from Job.

The first two cycles are complete but the third cycle is broken, having suffered severely in its early stage of transmission (22–27). Only Eliphaz's homily is preserved intact (ch. 22). Job's reply is almost complete (23–24), but there are some severe difficulties in ch. 24. Bildad's address is far too short (26:1-6) and there is no word from Zophar. Numerous reconstructions have been offered. A moderate suggestion is to make Bildad's third speech out of 25:1-6; 27:13-22, and view Job's response as consisting of 26:1–27:12. Thus it is assumed that there never was a third speech for Zophar, the poet having intentionally truncated the third cycle. As the cycles progress, each comforter's speech becomes shorter, except for Bildad's, and throughout the dialogue Job's response is longer than the friend's presentation. Thus the emphasis falls on the words of Job, and a subtle negative connotation is cast on the friends' speeches.

1. First Cycle of Speeches (4–14). a. Eliphaz's Speech (4–5). Eliphaz, the highest ranking friend, is the first to speak. He commends Job for his past devout deeds (4:2-6) but is surprised by Job's words, for he thought that Job's reverence for God would be his confidence during misfortune (4:6). Afraid that Job has spoken too abrasively, Eliphaz instructs him in the doctrine of retribution (4:7-11). He supports his position by quoting from patterns he has observed in the course of nature. The kernel of his thinking — namely, that no one can be innocent before God — was a message received from a heavenly being in a nocturnal vision (4:12-21). Therefore it is impossible that Job's claim to innocence is correct, and there is no one who is qualified to serve as his defense attorney before God (5:1-8). In a more encouraging tone he alludes to a hymn that lauds God's majesty (5:9-16) and a wisdom saying that affirms God's protective care of His own (5:17-26). With this note of hope he concludes, confident that he personally knows the truth of his words (5:27).

b. Job's Response (6–7). Job responds with his first speech within the dialogue. In the first half he addresses the friends (ch. 6) and in the second half he laments before God. He defends his right to lament; anyone would groan under such a heavy burden (6:2-7). Thus he reiterates his wish that God would finish the suffering He has brought on Job by crushing him totally (6:8-13). Job turns to charge the friends with acting treacherously toward him in failing to help him overcome his suffering (6:14-23). If they would show some understanding of the uniqueness of his dilemma, he would gladly open himself to their teaching (6:24). Therefore he pleads with them to adopt a more congenial, accepting attitude toward him (6:24-30).

In the second portion Job takes up his lament again. He describes in vivid detail his present pain (7:1-6) and entreats God to act in a healing way toward him before it is too late (7:7-10). He defends his right to complain (7:11) and then charges God with unleashing His most powerful weapons against His servant as though he were His primordial enemy (7:12-18). In his final plea he asks God to leave him alone, even if it means passing over any sin, so that he might enjoy his few remaining days (7:19-21). Although Job is still despondent, his words are now calmer and more open to rational debate than in his opening curse-lament; he is beginning to cope with his affliction and he is forming the basis on which his trust in God will be built.

c. Bildad's Speech (Ch. 8). Bildad takes up Job's challenge. He fears that Job's words are a reproach against God. Thus he defends the justice of God's manner of acting (8:2-7). God does not pervert justice; whatever evil happens on earth is just retribution for some wrong. God's justice is defended by a referral to the testimony of past generations (8:8-10) and by vivid illustrations from nature — the growth of papyrus (8:11-13), a spider's web (8:14f.), the growth characteristics of a plant in a garden (8:16-19). Bildad concludes with a presentation of double retribution (8:20-22), with a word of hope to Job that his joy might return (8:21). Before Job's challenge Bildad strives to defend the "old-time" religion.

d. Job's Response (9–10). In his second speech Job pays little attention to the comforters, with the singular concession that no one is just before God (9:2). The point of this speech is Job's struggling with the possibility of arguing his case legally with God. A recitation of lines from hymns praising God's wisdom and power overwhelms Job with risks of taking on such a wise and powerful opponent (9:2-13). Even if God should appear to hear his concern, he does not know how to answer Him and fears that his own mouth would condemn him (9:14-20). Nevertheless, Job knows he is innocent (9:21). Thus he accuses God of failing to discriminate between the wicked and the righteous in His governance of the world (9:22-24). Abruptly Job turns to lament the meaninglessness of his plight (9:25-29). If his case could be decided by an ordeal, he feels that he would come out of it under greater condemnation (9:30f.). Next he longs for an arbiter to bring reconciliation between God and himself, but there is no one powerful enough to mediate the dispute (9:32f.). Therefore in desperation he pleads for God to remove His afflicting rod so that he might argue his case without fear.

In the next section Job accuses God of smiting him far beyond any wrong he could have committed, unmindful of the frail human constitution (10:1-17). Returning to his

opening lament, he concludes with a wish that he had never been born and with a petition for God to give him some moments of peace before he descends to the darkness of Sheol (10:18-22).

e. Zophar's Speech (Ch. 11). Zophar takes up the issue and charges Job with idle, foolish talk (11:2-4). He wishes that God would reveal to Job true wisdom (11:5f.). He lauds the greatness of God (11:7-12) and concludes with an exhortation for Job to repent (11:13-20). The positive note in this speech is the vivid description of the blessing that attends the repentant person; otherwise Zophar has little to offer Job in encouragement.

f. Job's Response (12–14). Job brings the first cycle to an end with a long speech. He rejects the acclaimed wisdom of his friends and affirms his equality with them (12:2f.). He laments his having become a laughingstock and the prosperity of the wicked (12:4-6). These charges God must bear, for He is sovereign Lord over this world (12:7-25).

Since Job is not inferior to his friends and since their arguments are worthless and unable to stand the divine scrutiny, he resolves to make his plea to God alone (13:1-12). He will prepare his case to be heard in the heavenly court (13:13-19). He is beginning to realize fully that his only hope for vindication rests with God; therefore, he must defend his case before Him (13:15). So he asks for a reprieve in order that he may argue his case undisturbed and he laments the inhospitable treatment he is receiving from God (13:20-28).

Job turns to lament his plight (14:1-6). Since he can find no comfort in a doctrine of resurrection, he pleads for God to hide him until His wrath has passed (14:7-17). He concludes with a charge that God treats mankind far too harshly (14:18-22).

2. Second Cycle of Speeches (15–21). a. Eliphaz's Speech (Ch. 15). The second cycle opens with Eliphaz's second speech. He has become more disturbed at Job because of the nature of his arguments. He accuses Job of lacking wisdom and faith, regardless of his high claims to insight (15:15f.). In an effort to move Job to repentance, he teaches Job the doctrine of the certain, horrible fate of the wicked, including the most prosperous (15:17-35). His hope is that this description alone will move Job to adopt a new posture, for he adds no application.

b. Job's Response (16–17). Job responds with a defense of his right to speak and a charge that the friends are all miserable comforters (16:2-6). He then takes up his lament in vivid description of his pain with particular reference to God as his powerful attacker (16:7-14). Job's only response has been mourning and weeping as he holds to his innocence (16:15-17). Thus he petitions God to intervene and come to his defense (16:18–17:16). God could defeat his mockers by restoring his honor (17:1-10). He concludes with a struggle before the harsh realities of death that will destroy his last thread of hope (17:11-16).

c. Bildad's Speech (Ch. 18). Bildad rejects Job's accusations and counters by taunting Job for being so tormented (18:2-4). The bulk of his speech is a detailed description of the harsh punishment that the wicked must bear (18:5-21). They have no lasting benefits; not even a memory of them survives. Although he concludes without application, he is clearly warning Job that a worse fate awaits his blatant, angry words if he does not change.

d. Job's Response (Ch. 19). Job reproaches his friends for tormenting him and exalting themselves above him (19:2-6). In attacking Job they attack God, for He is the One who has made Job look guilty. Job again laments in detail his plight (19:7-22). God has attacked him mercilessly, stripping him of all his honor (19:7-12); thus he has been alienated from everybody, from his wife to his servants (19:13-19). His body has been reduced to skin and bones (19:20). He pleads for his friends to pity him and not to persecute him (19:21f.). In desperation his mind looks for a way of escape (19:23-27). He requests that his words be inscribed on a stone as a perpetual witness to his side of the case (19:23f.). In bold confidence he asserts that he knows his Redeemer (Kinsman, Helper) will vindicate him before all on earth even if it requires his rising from the dead (19:25-27). In conclusion he warns his friends against the dangers of pursuing a matter falsely (19:28f.).

e. Zophar's Speech (Ch. 20). Troubled by these words, Zophar feels compelled to defend his honor (20:2-4). Then he develops the thesis that the joy of the wicked is momentary, for hard punishment will begin on earth and continue in the darkness of Sheol (20:5-29). He cannot escape; his iniquity will certainly be revealed. This speech, like Bildad's last speech, stands as a pungent warning to Job to forsake his claim of innocence.

f. Job's Response (Ch. 21). Job directs his last speech of the second cycle solely to the friends. He pleads with them to attend more carefully to his words (21:2f.) and then asks them why such a troubled man should not give expression to his terror in lament (21:4-6). In direct opposition to Bildad's and Zophar's last speeches, he describes the success that attends the wicked (21:7-16). The curse against sinful deeds takes its effect too infrequently. If evil befalls a wicked man's children, what does he care since he has already enjoyed his own pleasure (21:17-21)? Since all people die and go to the same grave, what difference does morality make anyway (21:22-26)? He thus moves on to charge the friends with wronging him and having limited knowledge (21:27-33). Job comes to the conclusion that it is impossible for the friends to console him (21:34).

3. Third Cycle of Speeches (22–27). The third cycle begins in good form with a complete speech from Eliphaz (ch. 22), but the remaining speeches have suffered severely in their early transmission.

a. Eliphaz's Speech (Ch. 22). Eliphaz has lost patience with Job. The moderate, conciliatory manner evident in his first speech has turned to cold accusations of wickedness against Job. Holding to his thesis that no one can benefit God (22:2f.), he charges Job with having violated the standards of patriarchal generosity to the unfortunate (22:4-9). Therefore Job's peril is his just dessert (22:10f.). He defends his conclusions with a description of God's manner of governing the world (22:12-20). His more gentle side emerges with a powerful exhortation encouraging Job to repent (22:21-30). The motive to repent is based on the joy that attends the forgiven sinner.

b. Job's Response (23–24). Apparently ignoring Eliphaz, Job offers up a bitter complaint (23:2). He longs to present his case before God, for a judgment from God would be the only way to silence his critics (23:3-7). In despair Job returns to lament God's attitude toward him. God is distant and inattentive to His faithful servant (23:8-12), and God acts capriciously beyond control so that Job is filled with terror (23:13-17). Then in direct opposition to Eliphaz's counsel, Job ponders many situations that give evidence that God fails to determine the times of just judgment (ch. 24). In his position he remains unmoved by the rhetoric of the three friends.

c. Bildad's Speech (25:1-6; 27:13-23). Bildad's third speech is reconstructed from 25:1-6 and 27:13-23. Bildad opens with a hymn extolling God's dominion and sovereign, orderly rule (25:1-6). He develops in detail the aspect of God's governance that secures exact punishment for even the wicked who are the most powerful and wealthy (27:13-23). In his system none of the exceptions that Job has

pointed out is allowed. Thus neither Job nor the friends are able to change each other's opinions.

d. Job's Response (26:1–27:12). Job concludes his retorts to the comforters by underscoring his conviction that their wisdom has failed to cope with his situation (26:1-4). He too can praise God; in using hymnic language he focuses on God's great power and shrewd wisdom that defeat every foe (26:5-14). Unmoved by the friends, he makes firm his commitment not to yield to their easy answers and to maintain the justice of his case without speaking wickedness (27:1-6). He finishes with a prayer requesting that his enemies be judged (27:7-12). In all his speaking Job holds tenaciously to his innocence.

D. Hymn to Wisdom (Ch. 28). Chapter 28 is a magnificent hymn praising the ultimate value of wisdom. Whether it belongs in the mouth of Job or is Zophar's third speech or is a hymn sung by a chorus is debated. It appears to be an interlude that forms a bridge between the dialogue with the friends and the series of speeches in the latter portion of the book, in which Job probes deeper for an answer to his trial. Therefore it seems best to assign the words to a neutral speaker, a chorus, or the poet himself.

The hymn has three major divisions. The first extols the great technological achievement by which mankind can extract the most precious minerals from the earth (28:1-11). Nevertheless, in all human searching one cannot find wisdom nor can one purchase her with the precious jewels he has gained (28:12-19). Where then is wisdom? She abides only with God, and she served as His architect in creating the world (28:20-27). Since wisdom is beyond human reach, one discovers her in personal experience only by shunning evil and fearing the Lord (28:28). This beautiful hymn ties together the two parts of the book and points beyond itself to the Yahweh speeches.

E. Job's Declaration of Innocence (29–31). After a pause Job takes up his case for the final time. He addresses God alone. In masterful style he argues the correctness of his stand throughout the debate and his trial. He formulates his declaration of innocence in order to compel God to respond. The declaration consists of three distinct parts: a description of his former state of mobility (ch. 29), a detailed account of his present suffering (ch. 30), and the declaration of innocence proper in which he enumerates the standards he has not violated (ch. 31).

The one who had championed the cause of the oppressed has become the object of rebuke even to the lowest levels of humanity. Nevertheless, Job remains so confident of his innocence that he places himself under a curse if he has ever committed any of a list of crimes. He has not lusted after a young lady, nor used deceit in business, nor committed adultery with a neighbor's wife, nor treated his servants harshly, nor withheld mercy from the poor and afflicted, nor trusted in wealth, nor worshiped the heavenly bodies, nor gloated over his enemies' misfortune, nor abused his land or its tenant. He signs his defense and demands a response from God (31:35-37). The lines are clearly drawn. Job has placed the resolution of his case squarely in God's hands; if God remains silent, Job must be righteous.

F. Elihu Speeches (32–37). The friends do not answer; they have conceded the argument to Job. Only God can answer Job's oath. The period of silence affords the opportunity for a young bystander to express his insight. Elihu, the son of Barachel the Buzite, apologetically but with great enthusiasm enters the debate.

1. Introduction and First Speech (32–33). Elihu is greatly disturbed that Job defends his own righteousness rather than God's and that the friends cannot refute Job but merely condemn him (32:1-5). His first speech is a long defense of his right to speak before such elders despite his youth (32:6-22). Since God gives wisdom to mankind, wisdom is not confined to the aged. Compelled to speak by agitation deep within him, he will answer Job directly with different arguments.

Elihu takes an open stance, inviting Job to debate with him as a fellow human (33:1-7). In debating style he quotes Job's position and then responds. He takes as the heart of his position Job's claim to innocence and his accusation that God has treated him like an enemy (33:8-11). His rebuttal is that God disciplines people through dreams and illness, hoping to preserve their lives from destruction (33:12-22). An angel may intervene to restore such a one to health and to lead him to repentance before he dies (35:23-28). God acts in this way many times to turn a person back to Himself (33:29f.). Elihu concludes his first speech with an exhortation for Job to listen carefully to his words (33:31-33).

2. Second Speech (Ch. 34). Since Job remains silent, Elihu takes up his second discourse. This time he addresses Job more harshly, rebuking Job for going too far in his questioning of God's justice (34:1-9). God is just and governs all in justice (34:10-20). God observes every action, nothing escapes His attention, and He speedily executes punishment on the wicked (34:21-30). In the light of this truth Job must humbly yield to being taught, for he presently adds rebellion to his sin (34:31-37).

3. Third Speech (Ch. 35). In this third speech Elihu answers Job's inquiry into the lack of benefits for righteous behavior. Elihu believes that God is too high to be injured by human sins or benefited by human righteousness. Since God does not answer the pleas of an empty cry, Job is guilty of uttering long, meaningless speeches.

4. Fourth Speech (36–37). In his last speech Elihu defends God's just governance of the world (36:1-4). He punishes the wicked and elevates the righteous (36:5-12). Although the godless relish God's anger, God still afflicts those who will amend their ways in order to activate their repentance (36:13-16). Job, however, must beware lest his trial harden his heart and cause him to scoff (36:17-23). Job needs to realize that God is wooing him back to Himself; therefore Job is exhorted to praise the God who manifests His greatness in the wonders of nature (36:24–37:13). Indeed mankind is far too ignorant and too weak to argue with such a Creator; therefore Job must submit to the divine superiority (37:14-20). Whenever the Almighty appears in a storm, His power and justice are manifest (37:21-24). The close of Elihu's speech thus prepares for the theophany.

G. Yahweh Speeches (38:1–42:6). Out of a whirlwind Yahweh answers Job. He addresses Job with a barrage of imponderable questions seeking to convince Job that his words have darkened counsel. Adopting this style, Yahweh chooses to enter into a wisdom debate with Job over His manner of judging the earth rather than into a legal dispute over the justness of Job's case. This last section comprises two speeches by Yahweh and two responses from Job.

1. Yahweh's First Speech (38:1–40:2). Yahweh accuses Job of speaking without knowledge (38:2f.) and turns to contemplate the wonders of the world He has created (38:4–39:30). First He asks Job about the origin of the world (38:4-15). He queries Job to discover if he knows how the world was constructed: how the foundations of the earth were laid, how the sea was confined behind doors, or how the morning was commanded to appear. Yahweh then shifts emphasis and questions Job about control of creation (38:16-38). Has Job traveled to the sources of the sea, or does he know the way to the dwelling place of light, or has he entered the storehouse of the rain? Can Job command the constellations or muster

natural catastrophes? The obvious answer to all these questions is a loud "No!" God next concentrates on the specific qualities of selected animals that reveal God's wisdom, care, and sense of humorous wonder (38:39–39:30). God sets the time for the mountain goat to bear (39:1-4) and gives the wild ass the desert in which to roam freely (37:5-8). The wild ox cannot be tamed by man (39:9-12) nor can the horse outrun the strange-looking ostrich (39:13-18). The strength and splendor of the horse are also displayed in his lack of fear in battle (39:19-25). The eagle, which soars so high, at great distance detects food for its young and preys on corpses slain in battle (39:26-30). The entire order of creation is beyond the ability of mankind to manage, improve, or alter, and it bears witness to God's majestic wisdom and might.

After finishing His discourse on creation, God questions Job directly (40:1f.). He demands an answer from his litigant.

2. Job's Response (40:3-5). Job, however, strongly feels his own unworthiness in the divine presence and disclaims any ability to answer God (40:3-5). Therefore God resumes His discourse.

3. Yahweh's Second Speech (40:6–41:34 [MT 26]). God asks Job whether he will discredit God's justice to put himself in a favorable position (40:6-9). If he can, God will concede his ability to win his own victory. Then he will be able to adorn himself in majestic apparel and subjugate the proud wicked (40:10-14). God proceeds to defend His sovereign power by describing in detail two mighty creatures that He has made and that are subject to His word: Behemoth (40:15-24) and Leviathan (41:1-34 [MT 40:25–41:26]). Whether these are natural animals or mythical monsters is disputed. In the OT Leviathan usually symbolizes the primordial monster that embodies the essence of hostility against God (cf. Isa. 27:1). In these two poems, however, these creatures appear to be naturalized. Although their identity is also disputed, the most frequent identification equates them with the hippopotamus and the crocodile respectively. The vivid description of these creatures reveals God's masterful art in creation and His supreme lordship in controlling them. Mankind, conversely, cannot capture or master them, but is reduced to terror in their presence. Through this picture Yahweh demonstrates that no evil force is beyond His control. Yahweh stands supreme, unchallenged, sovereign.

4. Job's Response (42:1-6). This last Yahweh speech evokes from Job a confession of contrition and confidence in God (42:1-6). Job acknowledges God's authority over everything in the world; in contrast, his own speaking has been without understanding. The most amazing wonder of Yahweh's speaking is that Job has encountered God. Under the warmth and awe that attend the divine presence all of Job's complaints fade into insignificance, for his ear has heard God and his eye has seen Him. The personal vision of God has revitalized Job's faith, adding a new, rich, fuller dimension. In contrast to the Holy God, Job confesses his own depraved humanity; thus he despises himself and entreats God's compassion. He does not acknowledge any specific sin; rather he confesses his unworthy creatureliness before God. In his pride he had charged God with acting unjustly; now his contrite self bows willingly before God's superior wisdom and justice. His suffering is brought into perspective. Although his integrity would not permit him to repent of conjectured sins, his subordinate attitude in God's presence resonates with his deepest attitudes of trust and reverence before God. From this broad perspective his suffering no longer is a barrier between himself and his Creator. At last God and Job are reconciled. The distant, silent, unmoved God has reached out to His servant and spoken great insight into the wonders of the world. The stubborn, persistent Job has melted into eager submission before the dynamic love realized in God's appearing. God's love reaches out to, restores, and uplifts the resigned worshiper.

H. Epilogue (42:7-17). The epilogue details Job's restoration. God expresses His anger with the three comforters for misrepresenting Him (42:7-9). He instructs them to bring seven bulls and seven rams as a sacrifice for Job to offer on their behalf. They obey Yahweh's instructions; as a result, the faith of all four is affirmed; Job gladly intercedes for his friends and secures their acceptance by Yahweh.

God then vindicates Job by restoring him twofold for all his losses. His kinsmen and friends arrive to sympathize with him and assist in his recovery. Seven sons and three daughters are also born to him (42:10-17). The daughters, but not the sons, are named in epic style: Jemimah ("dove"), Keziah ("cinnamon"), and Kerenhappuch ("horn of eyepaint"); their beauty becomes legendary and they share with their brothers in the family inheritance. Since his deceased children still have existence even in the grave, Job is the father of twenty children. Job's life reaches the highest patriarchal standards of richness; he lives to the ripe old age of 140 years and sees his children to four generations. He dies "full of days." Job's vindication is complete.

The epilogue returns to the values of the patriarchal age to affirm Job's righteousness and his victory over the most gruesome trial. The restoration of Job testifies that God will vindicate His own faithful servants. Although He may allow them to endure austere trials, He will restore them and generously compensate them for the burdens they bear.

VII. Literary Form.–Scholars disagree on the precise literary classification of Job. The traditional opinion has been that the book contains a factual account of Job's experiences. A few, however, have considered the story to be a parable of the righteous sufferer — an idea that appears as early as the Talmud (T.B. *Baba Bathra* 15a). A less likely suggestion is that the story is an allegory of Israel's suffering during the Babylonian Captivity. This last interpretation may be discounted because of the complete lack of historical allusion and the absence of issues of national concern.

More likely the book is a wisdom discussion of the issue of suffering based on the epic account of an ancient hero. Many scholars argue that much of ancient epic literature was based on real people and events; thus there is little reason not to think of the book of Job along these lines. The impact of an idea is vastly multiplied in the human social consciousness when it becomes incarnate in human experience. Thus the truth that a righteous man actually endured so much excruciating pain provides the impetus for other righteous sufferers to hold to their integrity and endure their plight, confident of a just resolution.

Other classifications for this work include drama, epic, and tragedy. In many ways it resembles a drama, even having a chorus to sing the anonymous parts like ch. 28. The forms of the play and the tragedy, however, developed in Greece, and these forms seem not to have influenced Jewish writers before the 2nd cent. B.C. Although the story of Job as it stands could easily be adapted to the stage, the book has no stage directions for production and little dramatic movement in the speeches. Furthermore, the plot of Job differs radically from tragedy in the technical sense, development of the onerous consequences that flow from a flaw in character or an error in judgment.

Form-critical studies have uncovered the rich variety of forms from which the poet draws for development of the speeches. He employs proverbs, numerical sayings,

hymns, laments, wisdom disputations, lawsuits, and lyrical nature poems. A few scholars have tried to define the form of the entire work. Richter has attempted to explain it as a lawsuit: the first section (4–14) constitutes the procedure to reach a settlement through a pretrial hearing, and a formal trial follows in 15–31; since Job appears to win by reason of the friends' silence, Elihu enters to appeal the decision (32–37); finally God appears as a litigant in a secular lawsuit, and under His questioning Job withdraws his complaint. In another direction C. Westermann has argued that Job is a dramatized lament: the dominant form throughout the work is the lament, and the legal language is used to develop the complaint and the accusation against God.

The last two efforts have offered fine insights into this work, but they fail in trying to level into one mold the rich variety of form and language in this artistic work. The poet has drawn heavily on four genres: the lament, the wisdom disputation, the lawsuit, and the hymn of praise. The lament form has influenced deeply the formation of the majority of Job's speeches as he gives expression to the real, persistent pain that he must constantly bear. Through this form he seeks to move God to act to relieve his suffering. The wisdom disputation provides the foundation for the dialogue between Job and friends who refuse to respond to his lament. Thus this genre provides the poet the opportunity to argue against superficial ideas current in the wisdom circles. Also woven through the speeches of Job is legal language. Since Job's illness is accepted by the friends and the community as incriminating evidence against his moral character, Job's deepest need is to be vindicated and to have his honor restored. He turns, therefore, to legal language in order to demand a hearing, which will result in an acquittal by the divine court. The lament form dominates Job's first speeches. As his confidence grows, he draws more heavily on legal language. Consequently his final speech, a declaration of innocence, serves mainly a legal function. Lines from hymns of praise appear as a part of numerous speeches. The focus in these beautiful lyrics is on God's majesty, His wisdom, and His power. They provide a touchstone between Job and his friends, and their recitation helps to encourage Job to pursue his case until God answers him. For the poet they disclose the vital relationship between God and the world He has created; they pave the way for the long Yahweh speeches. Consequently, the greatest insights into the issue of human suffering are to be found in the manner of God's creating and governing the world. As the poet employs these genres, he molds them to his overall purpose and thus they develop new nuances. Each pericope, then, must be interpreted more by its setting in the book than by its original life setting. Certainly the poet was influenced by numerous literary categories and genres from his environs, but his artistic skills have created a work that is *sui generis*.

VIII. Unity and Integrity.– The complexity of this book and its vastly different divisions have led many investigators to explain its growth and development in numerous ways. The most radical work was done by Baumgärtel. He found only the first cycle of speeches, though they too have received some embellishments, to be the core of the original work. On the other side a few, e.g., Budde and Gordis, have argued for the essential unity of the work. If the work is *sui generis*, the latter position appears to be the more likely. At least the bulk of the present work comes from a single author. Some obscure passages are most likely the result of difficulties in transmission. Probably the poet was dependent on an earlier epic work, which he reworked slightly to provide the framework for the dialogue. In composing the speeches he may have borrowed heavily from other sources, especially for the mouths of the different speakers, in his effort to articulate a position held with conviction during his day. In addition, this work may have been a lifetime project that went through many revisions. In the last analysis as interpreters we have only the final product. The analysis of stages of its growth gives insight into the whole, and work of this nature is most helpful. Nevertheless, the task of interpretation must move to treat the work in its final form as it has become a part of the sacred Scriptures. Two movements in interpretation have opened new avenues of discussion: the work of the structuralists, e.g., Polzin, and current efforts under the label of canon criticism, especially the work of Childs.

The first place of tension comes between the prose account and the poetic dialogue. The silent, enduring Job of the epic narrative is countered by the bitter, verbose, agonizing Job of the dialogue. The personal God Yahweh in the prose material becomes the distant God under the names El, Eloah, and Shaddai of the speeches. The epic nature of the prose account suggests that it is earlier than the dialogue. Most agree that the poet took over an old epic tradition that told of a righteous patriarchal hero who ranked with Noah and Daniel (Ezk. 14:14, 20). The exact nature of the epic tale and the amount the poet reworked it are debated. Although the epic portion is very old, some of the linguistic forms reflect a much later date and may be the work of the poet. The style of the epilogue strongly suggests that a response from Yahweh was an integral part of the earliest work; a portion of that work may stand at 38:1. The oldest narrative presents scenes in duplicate. Thus in its drama Job probably faced two temptations: one from his wife (2:9f.) and a second from his relatives (now mentioned in 42:11). At this juncture the poet reworked the epic and inserted the account of the friends (2:11-13) as the background for the dialogue.

The scenes regarding Satan are problematic. Satan never returns, and this name is usually considered to be a late form. The council scene, though, appears to be an integral part of the epic tradition; perhaps the name Satan is a later insertion, or quite possibly this name and the role of the antagonist in the divine court are older than present research has discovered.

Although the prose portions are considerably older, the poet accepted them as integral to his work and to the theology he wished to communicate. Thus the tensions between the two portions are intentional and must be treated in any attempt to discover the meaning of the book.

The core of the dialogue (chs. 3–31) is generally accepted as genuine with only a few additions and alterations. The biggest problem is chs. 24–28. The third cycle is incomplete, with far too short a speech from Bildad (ch. 25) and none from Zophar. This section has suffered great dislocation in the earliest period of its textual transmission, for the Qumrân Targum witnesses to the same order as the present MT. Another possible explanation suggests that the poet left the third cycle incomplete as an additional way of saying that the friends had nothing more to add and thus had failed both Job and God.

Many reconstructions of this cycle have been offered. A simple suggestion, as already noted, is to take 27:13-23, which is completely out of character in Job's mouth, with 25:1-6 as the remaining portions of Bildad's third speech and to form Job's reply out of 26:1–27:12. Obviously some lines have been lost from both of these speeches. It may be assumed also that there never was a third speech for Zophar.

The beautiful poem on wisdom (ch. 28) appears foreign in the mouth of any of the four speakers. It also seems to lack context, and some feel that it anticipates the Yahweh speeches so closely that it renders them redundant. The latter position, though, may be using the wrong principles of criticism for an ancient work. Some authors like to reverberate a theme throughout the entire piece, crescendoing to its final and full development. Thus the reader is prepared for its full presentation, for the concept has been imprinted indelibly on the audience's thinking. Recent critics recognize the stylistic similarities of this hymn to the rest of the poem. They attribute its origin, therefore, to the poet and its present location to a faithful student of the poet who wished to preserve this masterful poem. Nevertheless, this piece serves as a break between the dialogue and Job's final defense (29–31) and points the way to the Yahweh speeches. Its lack of context may be the result of the textual difficulties associated with the third cycle.

The Elihu speeches (32–37) are regarded by most critics as secondary. The lack of mention of Elihu elsewhere in the book is strange. The long, apparently redundant prose introduction is problematic. These speeches differ in style from those of the dialogue; the pompous, verbose nature, the quoting of Job followed by refutation, and the addressing of Job by his personal name are some of the differences. Although Elihu claims to take a different, more open stance toward Job, he seems offended by Job's words and feels a need to defend God's honor before Job's attack. As his speech progresses his position appears to be almost identical to that of the three friends he has condemned. Therefore some argue that these Elihu speeches were inserted to make this abrasive work more palatable to the established religious community. But to work from the position that these speeches make no significant contribution to the work fails to give any rationale for their inclusion, especially since they are not regarded as from the hand of the poet. In their present position they delay the divine response to Job's challenging oath. Thus they serve a good artistic function, especially for ancient Near Eastern literature, i.e., they create suspense. A space is needed between Job's final words and the appearing of Yahweh to set a tone and to convey the important theme of Yahweh's freedom; that is, Yahweh is not compelled by an oath to answer but rather chooses to respond because of His personal bond with His faithful servant.

Gordis's study has offered some new options regarding the origin and position of the Elihu speeches. Recognizing the differences in style, though he does not consider them as different as do other critics, he argues that these speeches came from the poet in later years as he continued to struggle with the issue of unjust suffering. In these speeches the poet wished to develop the concept that suffering is disciplinary. Since this is a partial truth, it would not belong in the Yahweh speeches, and since the poet wanted this idea to receive serious consideration, it must be developed outside the speeches of the three comforters. So Elihu was created. As these speeches were developed, the fourth one, describing God's power in the storm, was composed to prepare the way for the theophany from the storm. At best the Elihu speeches are problematic, but they stand in the final work and thus should never be lightly dismissed.

A response from Yahweh appears to belong to the oldest epic stratum. The poet took the opportunity to compose a most elegant speech addressing the issue of suffering against the backdrop of the wonders of creation. Although a few have rejected the first speech (38:1–40:5), the real problem rises with the long, detailed descriptions of the hippopotamus and the crocodile (40:7–41:34). Although their style is not as elegant as that of the first speech — perhaps partially due to textual problems and misunderstandings — they form a second speech from Yahweh that follows the integral twofold pattern evident in the prologue. Further, Yahweh appears to be pressing a point in order to move Job to a different disposition. Overall, the poet reaches his highest skill in these speeches, and his greatest insights into suffering are found here.

The epilogue (43:7-17) appears to many to be anticlimactic and inconsistent with the refutation of the doctrine of retribution in the dialogue. Although there are some rough seams where the poem joins the epic narrative again in 42:10-12, the epilogue belongs to the oldest form of the epic account. If Job has suffered innocently, his vindication must be evident at the conclusion. Since the author wished to resolve Job's case in this life, not in the next, Job's restoration must take place in a tangible form. On the other hand, it must be emphasized that the author did not reject the concept of retribution. Rather, he did not believe in immediate retribution for every matter. Events counter to a scheme of retribution could transpire for a long time before God settled accounts. Thus the wicked prospered, and conversely, many righteous had to bear suffering. One day, however, God will settle accounts justly, and those who have endured loss and maintained their integrity and faith in God will be justly and generously exalted by Him. The author sought to give insight into the ways of God and to correct misapplications of the doctrine of retribution rather than to create a new system of God's working with mankind. As a result, his insights strengthen the faith of those who endure suffering, giving a sense of freedom from a rigid application of theological principle, while at the same time the poet exalts one's confidence in the lordship of God, both in His justice and in His merciful concern for each of His followers.

In conclusion, the essential framework of this wisdom discussion has basically survived. Although the work is beset by textual difficulties, its essential integrity is established. As the knowledge of Near Eastern languages and literature increases, the interpretation of this great work will also become more exact.

IX. Message.–The book of Job seeks to demonstrate that a righteous person can suffer the most excruciating pain and maintain his integrity. Job was the most upright man that ever lived; no one was ever so rich, generous, and conscientious. Neither had anyone suffered so intensely. His suffering was experienced to the greatest extent on all levels — physical, emotional, social, and spiritual. The loss of his wealth was total, including houses, flocks, and children. His bodily pain was most severe, for he endured an illness with compounded complications from which he could not gain any repose. Emotionally he was torn between his love for God and God's apparent hostility toward him that aroused a deep sense of terror. Furthermore, his longing for an escape from his pain pulled against his absorbing desire to be vindicated. Socially, the most respected elder in the ancient Near East was plummeted from the respect he commanded to become a laughingstock, a taunt and object of reproach with no one willing to share his isolation from the community. Since no one else ever had so much or commanded such respect, Job stands alone as the one who has borne the greatest suffering. His agony was increased by God's silence. Job wished for some explanation, some word of perspective, but God failed to speak. He was willing to confess any wrong if it could be proved, but no insight came. Job was left completely alone to discover a way out of his dark abyss.

The poem especially attacks a simplistic application of the doctrine of retribution — only the righteous are blessed and the wicked suffer a just punishment. The corollary, that whoever experiences loss is surely guilty, falls under the poet's direct criticism. Although the OT certainly teaches that one's deeds are either rewarded or punished according to their nature (cf. Lev. 26; Dt. 28; Ps. 1; Isa. 58:6-14; Jer. 17:5-8; Hos. 10:11-14), it never succumbs to a deterministic application of this doctrine. The OT is aware that in this life some of the wicked enjoy a long life to the fullest and some of the righteous experience hardship and loss (Ps. 37:1-3; 49:5-12 [MT 6-13]; 73:1-9; Jer. 12:1-2; Hab. 1:5-11). Consequently the words of the friends that unequivocally accuse Job of heinous crimes become a grave violation of the intention that undergirds this doctrine. Their defensive attitude leads them to twist the redemptive nature of this divine truth into a damning force. Such a perversion of spiritual truth demands a most skillful repudiation, and one is found in this book. Thus the epilogue is not a leftover appendage to keep the older form of the epic intact; rather it makes an essential contribution to the message of the book. It reaffirms the doctrine that God rewards the righteous, with the implication that He just as certainly punishes the wicked. Although God does not execute immediate rewards for every action, a time will come when God will judge each person and render a just recompense. Therefore God can be both just and sovereign in allowing the righteous to suffer, for He will ultimately vindicate His own. On the human side, it is affirmed that one who endures great pain can challenge God to know why this is his lot and simultaneously hold on to his faith and be confident that the attack against him is not a proof that he has failed; one may endure the sharpest trials confident of his innocence before God. In this manner the poet presents a high view of mankind; mankind can transcend its present predicament for good.

The poem looks at the issue of suffering from many sides. Pain comes as a direct attack of a hostile force whose design is to coerce man into rebellion against God, according to the prologue. The friends argue that suffering is punishment for sins. Elihu develops in more detail the thesis that suffering is disciplinary, with the potential of leading to closer fellowship with God. The Yahweh speeches indicate that suffering is a mystery. It is not beyond God's sovereign rule nor does it indelibly mar the beauty and wonders in the world of God's handiwork. Out of the strangest and most obscure aspects of His creation God brings order and wonder. God faithfully maintains His creation and cares for all the animals He has made. Furthermore, no place nor creature is beyond His authority. In the final scene of the poem Job discovers that the agony of suffering dissolves in the affirming warmth of the divine presence. A vision of God absorbs his being and uplifts him to a complete sense of worth. The book fails to give a definitive answer to the question of suffering and rightly so, for it lies beyond the purview of any mortal. Great perspective, however, is extended by offering these different vantage points from which pain may be viewed. The greater purpose of the poem is to challenge mankind to endure its lot with an unadulterated confidence in God, for in so doing humanity attains to the noblest qualities inherent in its character. Each person's victory over suffering offers solace to others and gains for him the privilege of interceding for others, as is evident in the divine instruction to victorious Job to offer sacrifice for his wayward companions and thereby restore their relationship with God.

This work offers a model of the victorious value of endurance and unflinching confidence in God's justice during the most difficult trials. The greatest movement in the book is seen in the confidence that Job builds on the conviction of his own innocence and God's justice. Job moves from the deepest despair (ch. 3) to a bold challenge presented to God (ch. 31). In this development he is compelled to reject completely the simplistic positions articulated by his friends. Consequently, in his own thinking he must venture into new categories of possibility. His thinking is bound by three principal ideas: God is justice; he himself is innocent, undeserving of such affliction; and death will not vindicate him. Motivated by the burning desire to be vindicated with the restoration of his honor, he calls for a trial in which his case may be argued by God and himself.

After his curse-lament Job responds in chs. 6–7 to the first speech offered by one of his friends. Although he continues to lament his tormenting pain his words are more concrete; thus he is beginning to cope with the real situation that confronts him. It is not until his second speech in the dialogue, however, that he begins to formulate the possibility of entering into a lawsuit with God to gain a just verdict on his innocence. Since God appears to be treating him like an archenemy, Job longs for an umpire who might be able to arbitrate his case and bring reconciliation between the two of them (9:33f.). This wish is unrealistic, for the umpire by definition would be greater than God, an impossibility.

In his next speech Job pleads for two things: that God might remove his illness and that they together might dispute his case. Job expresses his firm confidence in God in a verse with some textual difficulties:

> Behold, he will slay me; I have no hope;
> yet I will defend my ways to his face. (13:15)

Another possible rendering is:

> If he slays me, I would have no hope;
> nevertheless, I will defend my ways to his face.

Job will not relinquish his right to a fair trial under any circumstances.

Afraid that death will take his life before he is acquitted, Job entertains the thought that he might be able to return to life and receive a just reward in his restored life. He observes that for a tree which has been cut down there is hope that it may send forth new shoots and grow again into a tree (14:7-9). This natural phenomenon, however, is without analogy in human experience; death is final (14:10-12). Thus Job fails to find any hope in a doctrine of resurrection (14:18-22). For justice to prevail, vindication must come for him in this life.

In the next speech Job prays that if he should die without vindication, the earth may not receive his blood until his case has been tried (16:18f.). The earth's refusal to cover his blood will mean that he has not been accepted by the grave and therefore can find no rest in Sheol. Thus God will have to overcome the injustice of an unavenged death before Job can take his place in the grave. In this context Job makes a strong affirmation of confidence in God:

> Even now, behold, my witness is in heaven,
> and he that vouches for me is on high. (16:19)

He believes that ultimately God will testify to his innocence.

Job continues to build his confidence in God's coming to his assistance. In a moment of insight he voices the most famous lines in the book:

> For I know that my Redeemer lives,
> and at last he will stand upon the earth;
> and after my skin has been thus destroyed,
> then from my flesh I shall see God,

whom I shall see on my side,
and my eyes shall behold, and not another. (19:25-27b)

These verses unfortunately are fraught with textual problems and with difficult syntax in crucial points. Thus translations of them differ markedly, e.g.:

But in my heart I know that my vindicator lives
and that he will rise last to speak in court;
and I shall discern my witness standing at my side
and see my defending counsel, even God himself,
whom I shall see with my own eyes,
I myself and no other. (NEB)

This I know: that my Avenger lives,
and he, the Last, will take his stand on earth.
After my awaking, he will set me close to him,
and from my flesh I shall look on God.
He whom I shall see will take my part:
these eyes will gaze on him and find
him not aloof. (JB)

In the broader context, Job expresses the wish that his words were engraved in a rock or a stele as an eternal witness to his righteousness. In order for him not to bear the eternal reproach of an ignominious reputation, there will have to be a counter-witness on earth to offset the incriminating evidence of his misfortune. An eternal record of his defense, however, is far inferior to a resolution of his case by a divine judgment. His deep-seated reverence for God, therefore, inspires the conviction that God will become his Advocate or Redeemer (*gô'ēl*) and that Job himself will witness his vindication with his own physical eyes even if he should die before the trial. That is to say, Job affirms his complete confidence in his ultimate vindication by God, who will act as his Redeemer. To be just, since Job has borne the shame of his suffering on earth, this acquittal must take place on earth before witnesses. Thus at his trial God must be visibly present and so, too, must Job. If, therefore, he should die before this trial takes place, it will be necessary to have his spirit reunited with his body for his vindication to be valid. These are powerful words evidencing Job's profound faith in God ultimately to rescue His own servants in a just way. God will act as his Redeemer even if the resurrection of Job would be required. Job is not defending a doctrine of resurrection that he had earlier rejected, but he is pushing the inner logic of his belief in God's vindicating justice. In the NT this inner logic will come to the foreground in a fully developed doctrine of resurrection as the seal of proof to the teaching that God's love for mankind is both just and redemptive. In a bold venture Job is pointing the way to that position, but he glimpses it only vaguely. Thus the emphasis of this great assertion must be kept on Job's faith in God as the final, sure Source of his redemption.

Job's confidence in God and the justice of his own ways continues to build even though God remains hidden. He affirms that he has held to God's ways firmly without any deviation (23:11-13). He is certain, therefore, that he will come through his trial an even better person:

But he knows the way that I take;
when he has tried me, I shall
come forth as gold. (23:10)

Job has prepared the way to make his final affirmation of innocence (29–31). He compares his former noble estate (ch. 29) with his present humbling affliction (ch. 30). Nevertheless, he knows he has not sinned and offers an oath of innocence (ch. 31). Thus he concludes with the challenge that God answer his pleas and his affirmation:

Oh, that I had one to hear me!
(Here is my signature! let the Almighty answer me!)
Oh, that I had the indictment
written by my adversary!
Surely I would carry it on my shoulder;
I would bind it on me as a crown;
I would give him an account of all my steps;
like a prince I would approach him. (31:35-37)

Job has conquered the confusion and distress created by his grievous losses and intense physical discomfort. By verbalizing details of his suffering, he has gained the means to cope with his affliction. As his body deteriorates, his mental resolve and moral conviction become stronger, for his thinking focuses on God in confidence that this God is his witness and and his Redeemer. Job has thus honored God's assurance, expressed in the prologue, that Job serves Him out of a genuine love and reverence, not for the gain he may receive. Consequently Job becomes the great example of a person's ability to suffer the gravest difficulties and severest shame yet preserve his faith in God. During such a trial a person may directly challenge God's ways of acting without tarnishing his moral integrity or destroying the basis of his faith. Indeed, by verbalizing his sorrow in deeply felt laments, he buttresses his mental attitude to avoid the pitfall of remorse and gains the moral strength to endure until God answers. The NT believer can be strengthened beyond Job's example by reason of the conquering love of Jesus Christ, for both His suffering and His righteousness surpassed Job's. Moreover, by rising from the dead, Jesus' righteousness has been proved and His death has been accepted as possessing vicarious virtue for anyone who will accept its merits. Inspired by the examples of Job and Jesus and drawing on their spiritual power, the believer can endure suffering in the confidence that "in all these things we are more than conquerors through him who loved us" (Rom. 8:37).

JOB, TESTAMENT OF. *See* PSEUDEPIGRAPHA.

JOBAB jō'bab [Heb. *yôḇāḇ*; Gk. *Iōbab*].

1. Youngest son of Joktan (Gen. 10:29; 1 Ch. 1:23) and progenitor of an Arab tribe.

2. An Edomite king (Gen. 36:33f.; 1 Ch. 1:44f.).

3. King of Madon (Josh. 11:1).

4. 1 Ch. 8:9; and **5.** 1 Ch. 8:18, Benjaminites.

The name is confused with that of Job in the LXX of Job 42:17.

JOCHEBED jok'ə-bed [Heb. *yôḵeḇeḏ*–'Yahweh is glory' (?)]. Daughter of Levi, wife of Amram, and mother of Moses (Ex. 6:20; Nu. 26:59). According to Ex. 6:20, she was a sister of Kohath, Amram's father.

JODA jō'də [Gk. *Iōda, Iouda*].

1. A Levite, whose sons were to have charge "over the works of the Lord," corresponding to Sudias (1 Esd. 5:26), Hodaviah (Ezr. 2:40), Judah (Ezr. 3:9), Hodevah (Neh. 7:43).

2. An ancestor of Jesus in Luke's genealogy (Lk. 3:26; AV Juda).

JODAN jō'dən [Gk. *Iōdanos, Iōadanos*] (1 Esd. 9:19): AV, NEB, JOADANUS. A son of Jozadak and grandson of Jeshua; one of the priests who had a foreign wife. He is called Gedaliah in Ezr. 10:18 (*see* GEDALIAH 3).

JOED jō'ed [Heb. *yô'ēḏ*–'Yahweh is witness']. A descendant of Benjamin (Neh. 11:7), missing in 1 Ch. 9:7.

JOEL jō'əl [*yô'ēl*–'Yahweh is God'; cf. *IP*, p. 140, but contrast BDB, p. 222]. A name of wide distribution in Israel, though attested mainly in postexilic texts.

1. The prophet (see the next article).

2. Samuel's elder son (1 S. 8:2; 1 Ch. 6:33 [MT 18]; 15:17). In 1 Ch. 6:28 (MT 13), the RV and RSV correctly restore the name. The AV follows the MT with "the firstborn Vashni"; here "Joel" must have fallen out by homoeoteleuton after "Samuel," the word following (*wᵉhaššēnî*, "and the second") being then misread as a proper name, "Vashni."

3. A Simeonite prince (1 Ch. 4:35).

4. A man of the tribe of Reuben (1 Ch. 5:4, 8).

5. A Gadite chief (5:12).

6. A Kohathite Levite (6:36 [MT 21]), apparently the same as Shaul in v. 24 (MT 9).

7. A man of the tribe of Issachar (7:3).

8. One of David's mighty men (11:38), brother of Nathan. 2 S. 23:36 has "Igal the son of Nathan." The difference between the two names in the Hebrew script is very slight, and the parallel lists in which the names occur show a large number of such variations. The Chronicler's account of the relationship with Nathan is defended by W. Rudolph, *Chronikbücher* (1955), p. 102, because of its more unusual nature.

9. A Levite (1 Ch. 15:7,11). Many scholars further identify him with the Joel of 1 Ch. 23:8 and 26:22.

10. David's chief officer over the half-tribe of Manasseh (1 Ch. 27:20).

11. A Kohathite Levite of Hezekiah's time (2 Ch. 29:12).

12. (1 Esd. 9:34); AV, NEB JUEL. *See* UEL.

13. A layman listed among those who married foreign wives (Ezr. 10:43; 1 Esd. 9:35 [AV, NEB JUEL]).

14. An overseer in postexilic Jerusalem (Neh. 11:9).

It is possible that some of these are identical (e.g., **4** and **5**, **8** and **10**, and cf. **9**), but the evidence is insufficient to advance beyond speculation. H. G. M. WILLIAMSON

JOEL. The second of the twelve Minor Prophets. The MT consists of four chapters, but the English versions, following the LXX and Vulgate, have combined chs. 2 and 3 (=English 2:1-27 and 28-32) to give a total of three chapters.

    1. The Locusts and the Day of the Lord
    2. The Cult
    3. NT References

I. The Prophet.–Joel is introduced as "the son of Pethuel" (1:1; LXX Bethuel). Apart from this reference, no details concerning his life and person are supplied from either the book that bears his name or elsewhere. Even his date is still a subject of considerable controversy. His writing strongly suggests that he lived in the vicinity of Jerusalem; his interests seldom ranged further afield. He appears to have a detailed knowledge of temple procedures (e.g., 1:13f.; 2:12-17), and sympathetic concern for the cult is one of the features that distinguishes this book from some of the other prophetic books. Moreover, the formal structure of parts of chs. 1 and 2 may reflect contemporary liturgical practice. On the other hand, he does not seem to identify himself with the priests (1:9, 13; 2:17), even though on occasion he may pray representatively on behalf of the people (1:19f.). These facts have led many scholars to believe that Joel may have been a cultic prophet attached to the temple. This is a most attractive suggestion, although the understanding and the interpretation of his book are in no way dependent upon it.

II. The Book.–Since the only evidence we have for the setting and interpretation of Joel's ministry is the book itself, it will be helpful to start with a summary of its contents. The following paragraphs contain an outline of the prophet's message, without prejudice at this stage to the question of a more intricate literary structure (see B.4 below).

A. Outline of Contents. The book consists of two nearly equal parts. In the first (1:2–2:17) the prophet summons the people to lamentation and repentance because of drought and a devastating plague of locusts. In the second part (2:18–3:21), he promises salvation from the immedate effects of the disaster (2:18-27), eschatological blessing on Judah and Jerusalem, and judgment on the oppressing nations.

A general introductory statement claims that such complete and utter devastation had not struck within living memory, and was unlikely to recur within the foreseeable future (1:2-4). The stripping of vines and fig trees had left drunkards without wine (vv. 5-7), while the laying waste of the fields at large had brought an end to the regular temple offerings (vv. 8-10) and had ruined the farmers (vv. 11f.). This was sufficient cause for the priests to summon a penitential assembly (vv. 13-18). The section concludes with a prayer by the prophet which indicates that a severe drought had also affected the country (vv. 19f.).

Already in 1:15 it has been indicated that the plague of locusts is a harbinger of the Day of the Lord, and this theme is developed in ch. 2 (cf. vv. 1, 11). The description shifts to the locusts themselves as the advancing army of the Lord (vv. 1-11) in a manner that occasionally resembles a theophany. The only appropriate response by Israel is repentance (vv. 12-17), which, though expressed through the cult, must give evidence of a genuine and individual change of heart.

We must assume that the people responded to Joel's preaching, for we next find him mediating God's promise that the locusts are to be driven off (v. 20), the drought ended (v. 23), and fertility restored to the land with abundant harvests that exceed the previous loss. This section is closely tied to the two that precede both in concept and phraseology (e.g., compare 2:17 with 27). Though it deals more directly with the problem of the locusts that has dominated the book up to this point than the sections which follow, 2:18 marks the decisive turning point in the book as the content moves from negative to positive (cf. Driver, p. 58; Wolff, pp. 6f., 67; Ahlström, p. 132; Allen, pp. 39-42).

Spiritual renewal will follow the physical restoration. Social and cultic barriers within Israel will be broken through by God. He will deal directly with all those in Jerusalem who have turned to Him for salvation (2:28-32).

The reversal in Israel's fortunes is highlighted by the summons to judgment of those nations who were former oppressors (3:1-3). Their own evil deeds will be turned against them in punishment (vv. 4-8), and the whole process is brought to a climax in a description of the Day of the Lord which resembles apocalyptic thought (vv. 9-16). (*See also* ESCHATOLOGY II.) The Lord Himself will then dwell in a secure and sanctified Jerusalem, which will become the center of fertility, blessing, and justice (vv. 17-21).

B. Problems of Composition. 1. Date. No issue raised by the book of Joel is more controversial than its date. Despite intense and protracted discussion, there is still no consensus of opinion, as the following survey will indicate.

a. Survey of Opinion. A more detailed survey may be found in Thompson ("The Date of Joel"). The main possibilities which various scholars have held in recent times are:

(1) Early Preexilic. Popular in the 19th cent. after the publication of Credner's comm. in 1831, this position has been upheld more recently by Bič as well as a number of conservative writers (e.g., the intros. to the OT of E. J. Young [rev. ed. 1964], pp. 254-57, and G. L. Archer [rev. ed. 1974], pp. 303-307). It is argued, for instance, that the position of Joel in the canon points to an early date, and that the conditions reflected in the book suit the rule of Joash while he was still underage (*ca.* 870-860 B.C.). Political allusions are explained by reference to 1 K. 14:25-28, 2 K. 8:20-22, and 2 Ch. 21:16f. In addition, Bič cites a number of Ugaritic parallels in order to interpret Joel as an early polemic against Baalism.

(2) Late Preexilic. Kapelrud, Keller, and Rudolph are notable proponents of a date for Joel immediately before the Exile. Rudolph, taking seriously the allusions of 3:2, gives a date between the first and second Babylonian sieges of Jerusalem (597 and 587 B.C.). Joel's origin within the cult is considered an adequate explanation for its allusions to other prophetic books, whereas its many close parallels with Jeremiah suggest that they were contemporaries. Many of the weaker arguments for a postexilic date are rightly rejected.

(3) Exilic. Reicke is among a few scholars who date Joel during the period before the building of the second temple. His main argument is that 2:17 ("between the vestibule and the altar") indicates that no full temple was standing at the time.

(4) Early Postexilic. A proposal which has gained a good deal of support (Myers, Ahlström, Allen) is to date Joel immediately after the rebuilding of the second temple (*ca.* 515-500 B.C.), thus making him a contemporary of Haggai and Zechariah. In addition to the general arguments in favor of a postexilic date (see 1.c below), precision is added by the reference in 3:8 to the Sabeans, who, it is claimed, lost control of the eastern trade routes after the 6th century.

(5) About 400 B.C. This is probably the position held by the majority of scholars, although, as we noted, another trend has been to favor a somewhat earlier date. Precision is given to the general indications of the postexilic period by the reference to the wall in 2:7, 9, said to be the one built by Nehemiah in 445 B.C., and by the citations from many other prophets (see B.2 below), which suggest that Joel is one of the latest books to have been written. On the other hand, the reference to Sidon's judgment as yet future (3:4 [MT 4:4]) suggests a date before 345 B.C. when that city was destroyed by Artaxerxes III and its inhabitants were sold into slavery.

(6) Late Postexilic. Those who find various layers of composition in Joel (see B.3 below) often date the secondary sections to the 4th or 3rd cent. B.C. This later date has further been upheld for the whole book by a few scholars. Earlier commentators pointed in particular to the mention of Greeks (3:6 [MT 4:6]) as a late element, while more recently Treves has suggested that 3:2f., 19 refer to Ptolemy I Soter's capture of Jerusalem in 312 B.C., and Stephenson, finding a reference to the firsthand experience of a total eclipse of the sun in 2:31 (MT 3:4), is obliged to date Joel later than 357 or 336 B.C., the dates of the only two total eclipses in the period under consideration.

b. Some Inconclusive Arguments. In view of such a wide diversity of opinion, few would dare to claim certainty for their position. Ibn Ezra and Calvin are only two of those who, even in the pre-critical period, expressed real uncertainty over the issue. Nevertheless, some of the arguments which have been adduced are far from convincing, and should therefore be dropped from the discussion. Those that have played a significant role in the debate may be mentioned here.

(1) Place in the Canon. Although it is true that generally the compilers of the "Book of the Twelve" appear to have been guided by chronological considerations, in the case of Joel uncertainty in this regard is shown because in the LXX Joel stands fourth, after Micah, not second. Moreover, Wolff has developed the argument that, since the book of Joel is in itself undated, its position in the canon may rest not on a tradition concerning its date, but on some close verbal parallels in its closing verses with Amos, which it immediately precedes (compare 3:16 with Am. 1:2, and 3:18 with Am. 9:13). As a result, its position in the canon cannot be determinative for us.

(2) The Greeks. The older argument that reference to the Greeks (Heb. *bᵉnê hayyᵉwānîm*) in 3:6 demands a date after the Hellenistic expansion (late 4th cent. B.C.) is un-

founded. Evidence for Greek contact with Palestine from much earlier times continues to accumulate (Myers, pp. 178-185; D. Auscher, *VT*, 17 [1967], 8-30), and it has been suggested that the reference in Joel is to the Greeks as a still somewhat remote people to whom the inhabitants of Judah and Jerusalem might be sold as slaves; this better suits a date before their conquests of 333 B.C.

(3) Lack of Reference to the King. This argument has been adduced in support of both a postexilic date and a date in which Joash was still a minor. This sufficiently demonstrates its ambiguity, but in any case the dangers of an argument from silence are such that little weight should be placed upon it.

(4) Reference to the Wall. A number of scholars have argued that the wall in 2:7, 9 is complete and that therefore, if the date of the book is postexilic, it cannot precede Nehemiah's time. It is unlikely, however, that no wall at all was in existence before Nehemiah, for Neh. 2:13 and 4:7 suggest that he needed only to repair certain sections, and the implication of Neh. 1:3 is that a wall surrounding postexilic Jerusalem had only recently been destroyed.

(5) Total eclipse of the sun. Stephenson's argument that 2:31 presupposes firsthand experience of a total eclipse of both moon and sun is striking, but ultimately not conclusive. In 2:10 and 3:15 (MT 4:15) similar phenomena are mentioned, and the statement is added that "the stars withdraw their shining," which cannot be explained on so natural a basis. It seems more probable, therefore, that the passage refers to elements drawn from the Day of the Lord traditions that were later associated with theophanic eschatological descriptions (cf. J. Jeremias, *Theophanie* [1965], pp. 97-100).

c. More Certain Indications. The following arguments, which all favor a postexilic date for Joel, seem to carry greater weight, particularly since they all point in the same direction. It should be stressed again, however, that a number of scholars propose alternative explanations, so that, though the following represents a majority opinion, it does not command full agreement.

(1) Reference to the Exile. The prophecy in 3:2f. seems most naturally to refer to the fall of Jerusalem, dispersion of the people, and foreign settlement of the land as past events. It is doubtful whether any situation prior to the final fall of Jerusalem in 587 B.C. can do justice to this description. In connection with this, 3:5 seems to refer to the destruction of the temple (contra Rudolph).

(2) Existence of the Temple. Despite Reicke's argument from 2:17, 1:2–2:17 clearly presupposes the existence of a temple in which the priests might expect in normal times to officiate over a full round of cultic ceremonies. Though we know little about conditions in Jerusalem during the Exile, it would be surprising if Joel could be fitted into that period. Taken with the first point, this would establish 515 B.C. (when the second temple was completed, cf. Ezr. 6:15) as a *terminus a quo*.

(3) Language. The argument from language and style has undoubtedly been overplayed in the past (cf. H. Holzinger, *ZAW*, 9 [1899], 89-131). Nevertheless, Ahlström (pp. 1-22) has surveyed the whole issue again with commendable caution in the light of the questions that have been raised about it and suggested that, although most of the evidence which has been advanced cannot be used to determine the date of Joel, a confluence of evidence from a limited number of items (e.g., "Judah and Jerusalem" in 3:1, 6, 20 and "sons of Zion" in 2:23) points to a period no earlier than Jeremiah. These findings would thus allow a late preexilic date, and would fit well with a postexilic one, but are an embarrassment to an early preexilic date.

(4) Names and Nature of the Community. Joel addresses his audience as "Judah and Jerusalem," and applies to them the title "Israel" (2:27; 3:16). The impression is of a small community, focused on the city of Jerusalem and its cult. These features are strikingly similar to those portrayed in the narratives of Ezra and Nehemiah (cf. H. C. M. Vogt, *Studie zur nachexilischen Gemeinde in Esra-Nehemia* [1966]), but appear quite out of place before the Exile.

(5) Quotations. These will be dealt with below (B.2) as a separate problem of composition. It is sufficient to say here that the evidence can be most naturally explained if Joel features among the later written prophets.

(6) References to Other Peoples. A *terminus ad quem* of 345 B.C. seems to be demanded by the manner in which Sidon is introduced in 3:4 (cf. B.1.a [5] above) and fits with the implication of 3:6 that the Greek expansion has not yet begun.

d. Conclusions. A date somewhere between 515 and 345 B.C. is the most likely on the basis of the evidence presented above, and this view presents fewer difficulties to the general outlook of the prophet as concerns both the cult and eschatology. It is difficult to specify further with any degree of certainty; Myers's argument from the decline of the Sabeans (3:8) at the end of the 6th cent. is questionable, since it is now known that the Sabean kingdom continued to flourish long after (cf. W. F. Albright, *BASOR*, 129 [Feb. 1953], 20-24; A. Jamme, *Sabaean Inscriptions from Maḥram Bilqîs [Mârib]* [1962]; A. K. Irvine, "The Arabs and Ethiopians," in D. J. Wiseman, ed., *Peoples of OT Times* [1973], p. 300). The evidence of the quotations perhaps brings us toward the latter part of the specified period, but the evidence on that basis alone is inconclusive in the final analysis.

2. Quotations. The book of Joel contains a striking number of verbal parallels with the writings of other prophets. The main examples are:

(1) 1:15=Ezk. 30:2f.; Isa. 13:6; Zeph. 1:7
(2) 2:2=Zeph. 1:14f.
(3) 2:3 reverses Isa. 51:3; Ezk. 36:35
(4) 2:6=Nah. 2:10
(5) 2:17=Ps. 79:10
(6) 2:27=Ezk. 36:11 (and frequently); Isa. 45:5f., 18
(7) 2:28=Ezk. 39:29
(8) 2:31=Mal. 4:5 (MT 3:23)
(9) 2:32=Ob. 17
(10) 3:4=Ob. 15
(11) 3:10 reverses Isa. 2:4; Mic. 4:3
(12) 3:16=Am. 1:2; Isa. 13:13
(13) 3:17=Ezk. 36:11
(14) 3:18=Am. 9:13

Many briefer parallels and allusions are also to be found.

Kapelrud in particular has argued that all this may be explained as a reflection of widely known cultic phraseology. Joel did not borrow directly from other prophets; all drew on a common stream of tradition. While this may well be so in some cases (e.g., 5), it does not, however, satisfy all the evidence. Kapelrud cannot account for the frequency of occurrence in Joel alone as opposed, for instance, to Nahum, Habakkuk, or Malachi, all of whom seem to have had equally close associations with the cult. Further, some of the arguments listed immediately below are also an embarrassment to his position.

Proponents of an early date for Joel are obliged to argue that it is from Joel that the other prophets quote. For the following reasons (cf. Gray), however, it seems more likely that it is Joel who is dependent: (a) at no. 9, Joel adds the words "as the Lord has said," indicating that it is a quotation; (b) some of the phrases (e.g., 6 and 13) are very characteristic of the prophets cited, but not of Joel; (c)

several of the citations (e.g., 2, 4, 6) seem better suited to the wider context of the passages in the other prophets than in Joel; (d) sometimes Joel combines phrases from two or more other passages (e.g., 1, 3, 6, 12); to reverse the dependence in these cases would be much more unlikely; (e) twice (3, 11), Joel reverses sayings elsewhere. This is more probably the feature of a single writer than the result of coincidence in two other independent ones.

3. Unity. In a thesis of 1872, M. Vernes (*Le peuple d'Israël et ses espérances,* pp. 46-54) first challenged the unity of the book of Joel on the basis that the Day of the Lord in the first part was contemporary with the prophet, but future in the second part. A number of scholars, notably Duhm, Bewer, and Robinson, have adopted a comparable position. Duhm, e.g., argued that the apocalyptic sections were added to an original oracle about a locust plague in 1:1–2:17, though 1:15; 2:1b-2a, 11b also have to be attributed to the later writer. More recently, O. Plöger (pp. 96-105) has suggested later expansion as part of his influential theory on the early history of apocalyptic thought. He argues that 1:1–2:27 contains a record of Joel's oral preaching, ch. 3 a supplement to guarantee the eschatological interpretation of the Day of the Lord, and 2:28-32 a later, sectarian addition to apply the promises to a narrower group within Israel.

Nearly all modern commentators now accept the unity of the work, however, preferring to study in more detail the relationships between the two parts of the book. The Day of the Lord is a significant element in the first half (note especially its use as an *inclusio* in 2:1, 11), and this leads naturally to its development in the second part, for which the locust plague was a harbinger. Moreover, several characteristic features of Joel's style are evident in both parts: quotations from other prophetic books are distributed equally in both, and there are a number of verbal links between the two as well, e.g., 1:14 and 3:9; 1:15, 2:1f., and 3:14; 2:1b and 2:31b; 2:10a and 3:16a; 2:10b and 3:15; 2:11a and 3:16a; 2:11b and 2:31b, etc. (cf. Wolff, p. 7). Progress along this line shows itself to be exegetically more fruitful, and has led to a deeper appreciation of the structure of the book as a whole.

4. Composition and Structure. In recent years substantial attempts to explain the structure of the book on the presupposition of its unity include Bourke, Wolff, and Allen. The latter two argue for the main division at 2:18, and thus are able to balance the description of the plague and the lament of the first part with the change of fortune and promises of the second.

Wolff's analysis is simple, and restricts itself to a general outline. He finds the natural disaster of ch. 1 answered by the restoration described in 2:17-27; the eschatological disaster (as he interprets it) of 2:1-11 is answered in the final reversal of Israel's destiny promised in ch. 3, while the demand for repentance in 2:12-17 is matched by the oracle concerning the outpouring of the Spirit and salvation in 2:28-32.

Whereas this is of value in pointing to a general balance between the two sections of the book, it rests in part on an eschatological interpretation of 2:1-11 that not all scholars would accept. An alternative (and much more elaborate) series of correspondences is advanced by Allen (pp. 39-42). His theory incorporates detail of vocabulary parallels and other phenomena running throughout his commentary which cannot be dealt with here, but his overall analysis of parallel strophes within the various poetic units may be set out in tabular form as follows:

	Part I. 1:2–2:17	
A. 1:2-20	parallel with	B. 2:1-17
1. 1:2-12		1. 2:1-11
2-4		1f.
5-7		3-5
8-10		6-9
11f.		11f.
2. 1:13-20		2. 2:12-17
13f.		12-14
15-18		15f.
19f.		17
	Part II. 2:18–3:21	
A. 2:18-32	parallel with	B. 3:1-21
1. 2:18-27		1. 3:1-12
18-20		1-3
21-23		4-8
24-27		9-12
2. 2:28-32		2. 3:13-21
28f.		13f.
30f.		15-17
32		18-21

Like Wolff, Allen argues in addition that "the second half of the book takes up and reverses the destruction and deprivation characteristic of the laments of the first half," and he concludes: "the whole composition has been constructed as an intricate literary mosaic with remarkable skill and care" (p. 42).

Not all will agree with Allen's analysis in every detail, and some of the correspondences he finds are less striking than others. Nevertheless, it is hard to escape the impression that the various sections of the book are composed with conscious reference to the others in order to present a unified message. This factor, coupled with what has already been noted about citations from other prophets and phraseological repetition within the book, provides a strong indication that, though the prophet's ministry doubtless began in a concrete historical situation, the book as we now have it is the product of intensive literary activity. There is no reason to doubt that this was undertaken by the prophet himself.

C. Problems of Interpretation. In the light of what has been established about the nature and composition of the book, a few questions relating to its interpretation may finally be briefly treated.

1. The Locusts and the Day of the Lord. Since early times, there have been differences of opinion concerning the correct interpretation of the locusts in chs. 1–2. For instance, an allegorical-historical interpretation, in which the plague is seen as an allegory for historical human invaders, is found already in the Targum and early Christian writers. A. Merx (1877) went further, arguing that they represented the supernatural creatures of an apocalyptically described eschatological invasion. But in the present century, nearly all commentators have understood at least ch. 1 as a description of a literal plague of locusts. The accuracy of Joel's portrayal in this regard has been noted by some (cf. Thompson, 1955), and certainly the effects he lists, as well as the corresponding restoration in 2:18-27, suit this interpretation best.

The interpretation of 2:1-11 is less certain. Wolff, for instance, has drawn renewed attention to the differences between this section and ch. 1. It is certainly true that the description switches to the invaders themselves. The language becomes highly colorful, God's initiative in the affair is heightened, and the description is more closely related to the Day of the Lord (2:1, 11; but cf. 1:15). Nevertheless, these elements need not rule out a literal understanding — the invaders are compared to an attacking army, which would seem to suggest that they are not one in fact; 2:18 implies that the invasion is now past; and

further elements of the description (especially 2:7-9) are still admirably suited to locusts, while none is incompatible with it. It is probably best, therefore, to understand our text in its final form as descriptive writing designed to draw warnings concerning the approach of the eschatological Day of the Lord from the impressions of this historical plague. Israel's repentance, presupposed by 2:18, means that judgment is averted, while in the future (2:28 — "afterward" may involve quite a long gap in view of 1:3) "all who call on the name of the Lord" (2:32) will similarly be kept safe. But the Day, prefigured in the plague, will come (note how the language of 1:15 and 2:1 is echoed in 3:14), bringing vindication to God's people, and judgment to those who have oppressed them.

2. The Cult. It is evident that Joel's outlook is very much dominated by a commitment to the postexilic cult of Jerusalem. He sees one of the major effects of the locusts to be the cessation of regular offerings; the response he demands is a solemn cultic assembly for penitential rites (1:13f.; 2:12-17); the message of assurance which comes to him (2:18-27) seems to have taken the form of an oracle of salvation familiar in the liturgy and imitated on occasions by the prophets (cf. C. Westermann, *Isaiah 40-66* [Eng. tr., *OTL*, 1966], pp. 11-13); and many of his hopes for the future are expressed in cultic terms familiar in particular from Ezekiel (e.g., 2:28f.; 3:16-18).

Yet Joel shows himself more than just a child of his time in this emphasis. At the heart of his exhortation lies a call to repentance (2:12-14), which, though taking cultic expression, is explicitly emphasized as requiring a moral change of will if it is to be effective ("rend your hearts and not your garments"), and at the same time is concerned to defend the ultimate freedom of God from cultic coercion ("Who knows whether he will not turn. . . ?"). Moreover, it is noteworthy that much of the concern for ritual holiness and detailed cultic prescription, familiar, e.g., in Ezekiel and Malachi, is here lacking. If the prophet was to communicate effectively, he had to speak through the forms that had meaning for his hearers, and in this he evidently succeeded; at the same time, he was unable to hide that he regarded these ultimately as forms only, the validity of which lay entirely in the essential message they were required to convey.

3. NT References. The book of Joel seems to have had a considerable impact on the preaching of Jesus and His first followers. The parable of the sheep and the goats (Mt. 25:31-46) probably bases its imagery in part on the trial of the nations in Joel 3; and C. H. Dodd, *According to the Scriptures* (1952), pp. 46-48 and 62-64, argued that Joel 2:28-32 and chs. 2–3 were parts of prophetic testimonies used more widely in the early Church.

Most interest centers on 2:28-32, which in its context in Joel makes promises of the Spirit and salvation to those in "Mount Zion and in Jerusalem." This passage is quoted in Acts 2:17-21, Peter claiming fulfillment of the prophecy in the events of Pentecost. Though the citation appears to be cut off in such a way as to open the promise to all without distinction, his continuation ("Men of Israel," 2:22), his allusion to Joel 2:32b in Acts 2:39, and the fact that his audience is presented as Jews from Jerusalem and the dispersion alone (2:5), suggest that at this stage the wider implications of the prophecy were not yet appreciated. A move toward a broader outlook, however, is evident in that the geographical limitation of Joel 2:32 gives way to the address to Jews from "every nation under heaven" (Acts 2:5). With Paul this progression is completed; in Rom. 10:12f. he applies Joel 2:32 to Jew and Greek with "no distinction." The Israel to whom Joel's words now apply is limited neither geographically nor ethnically, but rather, as he says, "the same Lord is Lord of all and bestows his riches upon all who call upon him."

H. G. M. WILLIAMSON

JOELAH jō-ē'lə [Heb. *yôʿēʾlâ*]. A son of Jeroham of Gedor, one of David's recruits at Ziklag (1 Ch. 12:7 [MT 8]).

JOEZER jō-ē'zər [Heb. *yôʿezer*–'Yahweh is help']. One of David's Benjaminite recruits at Ziklag, though perhaps a Judean (1 Ch. 12:6 [MT 7]).

JOGBEHAH jog'bə-hə [Heb. *yogbᵉḥâ*]. A city in Gilead assigned to Gad and fortified by that tribe (Nu. 32:35). It lay on the line along which Gideon chased the Midianites (Jgs. 8:11), and the indication there leaves no doubt that it is represented today by Ajbeihât. The name attaches to three groups of ruins which date from Roman times. The position is about 11 km. (7 mi.) NW of ʿAmmân, and about midway between that city and the town of es-Salṭ. It stands 1057 m. (3468 ft.) above the level of the Mediterranean.

JOGLI jog'lī [Heb. *yoglî*]. Father of Bukki, a Danite chief (Nu. 34:22).

JOHA jō'ə [Heb. *yôḥāʾ*].

1. A Benjaminite (1 Ch. 8:16).
2. One of David's mighty men (1 Ch. 11:45).

JOHANAN jō-ha'nən [Heb. *yôḥānān*–'Yahweh has been gracious'; Gk. *Iōanan*]; AV Apoc. JOHANNES.

1. Son of Kareah, and one of "the captains of the forces in the open country" (i.e., probably guerilla bands), who allied with Gedaliah governor of Judah after the fall of Jerusalem in 586 B.C. (2 K. 25:23; Jer. 40:7–43:7). He warned Gedaliah of the plot of Ishmael ben Nethaniah, who was incited by the Ammonite king Baalis, to murder the governor; but the latter refused to believe him nor would he grant Johanan permission to slay Ishmael (40:8-16). After Ishmael had murdered Gedaliah and also seventy northern pilgrims Johanan went in pursuit. He was joined by the unwilling followers of Ishmael, but the murderer escaped. Thereupon Johanan settled at Geruth Chimham near Bethlehem (ch. 41). As Ishmael's plan was to take the remnant to the land of Ammon, so that of Johanan and

his fellow-chiefs was to go to Egypt. They consulted the divine oracle through Jeremiah, and received the answer that they should remain in Judah (ch. 42). But the prophet was accused of giving false counsel and of being influenced by Baruch. The chiefs then resolved to go to Egypt, and forced Jeremiah and Baruch to accompany them (ch. 43).

2. The eldest son of King Josiah (1 Ch. 3:15), apparently = Jehoahaz (2 K. 23:30-33). *See* JEHOAHAZ **3.**

3. Son of Elioenai, and a Davidic postexilic prince (1 Ch. 3:24).

4. Father of the Azariah who was priest in Solomon's time (1 Ch. 6:9f. [MT 5:35f.]).

5. A Benjaminite recruit of David at Ziklag, but perhaps a Judean (1 Ch. 12:4 [MT 5]).

6. A Gadite recruit of David at Ziklag (1 Ch. 12:12 [MT 13]).

7. The MT has Jehohanan, an Ephraimite chief (2 Ch. 28:12).

8. A returned exile (Ezr. 8:12) = Joannes (1 Esd. 8:38; AV Johannes; NEB Joannes).

9. A postexilic high priest descended from the high priest Eliashib (Neh. 12:22f.) and probably the person with whom Ezra consorted (Ezr. 10:6). He was a younger contemporary of Nehemiah, and was called Jonathan in Neh. 12:11, this perhaps being a transcriptional error.

D. F. ROBERTS

JOHANNES jō-han'əz. An AV variant of Gk. *Iōanēs* (1 Esd. 8:38; *see* JOHANAN **8**) and Gk. *Iōnnēs* (1 Esd. 9:29; *see* JEHOHANAN **4**).

X. Eschatology

I. Introduction.–It is assumed from the outset that such an entity as Johannine theology exists and deserves study. For it could conceivably be the case that a Johannine theology is as illusory a concept as a "theology of the Catholic Epistles" is. There must be a certain unity within the Johannine writings that expresses itself in a common theology.

The five Johannine writings in the NT are generally agreed to have a common background and origin (E. Stauffer, *NT Theology* [1955], pp. 39-43; Barrett, pp. 49-52, 113f.). A common theological outlook also characterizes these five books, marking them off as a distinctive group within the NT, so that at first sight it is tempting to use them all as the source for Johannine theology. One book, however, Revelation, stands on its own, whether or not identity of authorship for it and the other writings in the Johannine corpus is assumed; it is of a distinct literary genre and pursues a sufficiently individualistic course to make it wiser for us not to use it as a theological source on a level with the other four writings. The remaining four writings, two of which are of comparatively minor theological importance due to their brevity, have a sufficiently close bond among them to make discussion of their theology a real and profitable possibility. Elsewhere reasons have been offered for assuming the common authorship of the Gospel and Epistles (*see* JOHN, EPISTLES OF), and the following exposition will attempt to demonstrate that they expound a unified theology, and that, with all their evidence of variety and development, they reflect a single theological outlook.

We assume that it is the Gospel and Epistles in their present form that are the objects of study. Theories of rearrangement and redaction, especially of the Gospel, have not commended themselves to many scholars (esp. British), and the theology of the Gospel can be satisfactorily interpreted without recourse to such theories (Barrett, *passim*; Dodd, *passim*). Theories that the author used and adapted sources reflecting a theology different from his own are too hypothetical to be made the basis of secure argument.

Our interest here and proper subject is the theology of the author of the literature and not that of Jesus Himself, whose words the author purports to record in the Gospel. The question as to how far the Gospel may be used as a source for the teaching of the earthly Jesus is not our present concern; it belongs to a study of the historical Jesus. But it may be taken for granted that what the author records as the teaching of Jesus can be used without scruple as a source for his own teaching. In our opinion the Fourth Gospel is based on reliable traditions of the words of Jesus, but John has made these words his own and wishes us to understand that he agrees with the teaching he attributes to his Master. His teaching is a true understanding of the words of Jesus and a legitimate development from them (cf. Hunter, p. 129).

A further preliminary concern is with the kind of background against which Johannine theology must be understood. Despite much detailed study (see esp. Dodd, pp. 3-130) there is as yet no unanimity concerning the results of this exploration, although certain facts are tolerably clear.

It is safe to say that a purely Greek approach is now ruled out (see Schnackenburg, *Gospel*, I, 119-152), and that the background of John is basically Hebraic and Christian. The sources of non-Christian influence upon John will be found to lie principally in the OT (F.-M. Braun, II) and in the Judaism of his day. On the Palestinian side the DSS provide the most recent addition to a rich range of background material which includes the rabbinic writings (see SB; A. Schlatter, *Der Evangelist Johannes* [1930]) and the apocalyptic literature (H. Odeberg, *The Fourth Gospel* [1929]); but opinions differ about the closeness of the parallels they present (F.-M. Braun, *RB*, 62 [1955], 5-44; Schnackenburg, *Gospel*, I, 120 n. 9, 128-135). On the Hellenistic side the writings of Philo show certain conceptual similarities, although the philosophical tone of Philo is far removed from the religious ethos of John (see Dodd, pp. 54-73; Feine, pp. 327-337). Increasing attention is being paid to the influence of the wisdom literature (Brown, I, cxxii-cxxv).

There is much dispute over the possibility of oriental influences, particularly of Gnosticism (W. G. Kümmel, *Intro. to the NT* [rev. ed., Eng. tr. 1975], pp. 217-228).

That a species of Gnosticism existed in the 1st cent. (in a rudimentary form) and that John was well aware of it are facts demonstrated by the polemic in his Epistles. But this very polemic speaks against the likelihood that John's thought was fundamentally based on Gnosticism (as advocated with varied emphasis by Bultmann, Käsemann, and L. Schottroff, *Der Glaubende und die feindliche Welt* [1971]), although he may have made some use of its concepts. It remains a problem, however, which documents may legitimately be used to reconstruct Gnostic thought in the 1st century. Attention has been drawn to the *Corpus Hermeticum* (Dodd, pp. 10-53; on the other side, G. D. Kilpatrick, "Religious Background of the Fourth Gospel," in F. L. Cross, ed., *Studies in the Fourth Gospel* [1957], pp. 36-44), to the Odes of Solomon (Bultmann, *Gospel*) and to the Mandean writings (Bultmann, *ZNW*, 24 [1925], 100-146; for a powerful criticism by E. Percy and Bultmann's reply, see *Orientalische Literaturzeitung*, 43 [1940], cols. 150-175). These documents (apart from one or two possible exceptions) are all later in date than the Johannine literature, and both the Odes and the Mandean writings are obviously dependent on Christian writings, so that they can be used only with the greatest caution. The same caveat must be issued with regard to recent attempts to find pre-Christian Gnosticism in the Nag Hammadi texts (L. Schottroff). In any case, the Gnostic concepts which John is supposed to have utilized are often so much altered and demythologized (as Bultmann himself admits) that it is worth asking whether John really used them at all, and whether other influences are not adequate to account for his language.

In the end, the most significant influence upon John remains that of the teaching of Jesus and of early Christianity. The theological statements made by John can be abundantly paralleled by other NT sources. What John expresses is the fundamental teaching of the early Church as molded by his own profound understanding and experience to meet the needs of his readers. There is room for difference of opinion as to his precise place in early Christian theology. His writings are not so much the coping stone of NT theology, erected on the foundation of the Pauline Epistles and the Synoptic Gospels (Scott, pp. 29-53), as an independent growth parallel to other developments in the same period (Bultmann, *Theology*, II, 2). John is probably independent of the written Synoptic Gospels, and his theology fits into the Palestinian milieu attested in the DSS.

The conclusions reached in the preceding paragraphs affect our understanding of what John was trying to do in his writings. It is impossible here to list in any detail the variety of modern interpretations of the general character of Johannine theology. Much recent thought is influenced positively or negatively by Bultmann, who holds that John made use of Gnostic language to present an existential message concerning the Revealer who reveals solely that He is the Revealer (*Theology*, II, 66). His deeds are empty symbols of a timeless message that calls people to "eschatological existence." Bultmann's pupil Käsemann argues somewhat differently; Jesus is viewed as a glorious divine being manifested in the earthly sphere, and the Johannine church that accepted this view was in fact heretical in outlook. A much more traditional interpretation from the fairly orthodox (but critical) Roman Catholic perspective is given by Brown and Schnackenburg. The influential British scholar C. H. Dodd has argued that John presents a message based on early tradition about Jesus but expressed in a manner intelligible to Hellenistic readers.

In the present article it is impossible to develop and justify at length a conservative view of John over against these various interpretations. (Such an attempt has been made by K. Haacker, who argues that John presents Jesus as the historical Founder of Christianity, who establishes the Church and appoints its way of life, and who is divinely authenticated for this task by His heavenly origin.) The most that can be done is to outline the key themes in Johannine theology and to show that they do not represent a deviation from primitive Christianity in the directions of Gnosticism, existentialism, or Hellenism.

II. Theme of Johannine Theology.—Both the Gospel and 1 John begin with a prologue, which sets the theme for Johannine theology. According to Jn. 1:1-18 the Gospel is about the Logos or Word of God, who from the beginning was with God and was Himself God. He created the universe, and through receiving Him, the only source of light and life, people receive the right to become children of God. This fact presupposes that people are actually in darkness, and John states that the light was not welcome to them, although there were some who believed and received the light.

It is difficult to be certain about the time and character of the manifestation of the light described in Jn. 1:1-13. From 1:14 onward it is clear that the Logos is a person who becomes incarnate in Jesus Christ, and that He is the theme of the book. The earlier verses of the chapter can then be regarded as an accurate summary of what took place in the life of Jesus, but it is also possible that they refer to the similar results of earlier manifestations of the light.

Although the subject of the Fourth Gospel is thus Jesus, the Word made flesh and the true light of humanity, this does not mean that the revelation of God came through Him alone. Two contrasts are drawn. The first is with John the Baptist, who appears in the role of a witness to the light. With him may be linked the disciples, who believe in Jesus and bear witness that they have seen His glory; they are witnesses to the Word in order that others too may believe. The second contrast is with the revelation of the law through Moses, and, although it will be shown later that Moses is also a witness to Jesus (Jn. 5:39, 46), the point emphasized here is that the law by itself is powerless to give life; grace and truth come only through Jesus, and in Him alone is the glory of His Father to be seen.

When we now glance back over this prologue, we see that most of the fundamental ideas of the Gospel are unfolded in it. It resembles the opening theme of a symphony. The rest of the Gospel is an elucidation and defense of what has been stated here. There will certainly be new ideas presented — e.g., the doctrine of the Spirit — but here we have Johannine theology in miniature. It is a theology that is centered on Jesus Christ and the eternal life He bestows on people. Confirmation of this is provided by comparison with 1 Jn. 1:1-4 and with the careful statements of purpose in Jn. 20:31 and 1 Jn. 5:13.

We can therefore say that the theology of John is a Christology, with which is clearly linked a soteriology. It is not primarily an anthropology (in effect the view of Bultmann), nor an ecclesiology (A. Corell, *Consummatum Est* [Eng. tr. 1958]), nor even an eschatology (Barrett) except insofar as this means that its subject is the eschatological person, Jesus. Our task, therefore, must be to "set forth the Meaning which the author of the Gospel has himself heard and seen in the concrete, historical life and death of Jesus of Nazareth, in His separate actions and in His audible words" (Hoskyns, p. 132).

III. Revelation of God in Jesus.—A basic contrast has often been drawn between the theology of Paul and that of John, in some such words as those of A. M. Hunter:

"Certainly Paul is more at home in the category of reconciliation, as John is in that of revelation" (p. 131). As Hunter himself goes on to affirm, such generalizations can be misleading if pressed too far (cf. J. Denney, *Death of Christ* [1951], pp. 139-148), but there is little doubt that the word "revelation" most adequately characterizes Johannine theology. Eternal life, which is for John the *summum bonum*, is defined as knowing God through Jesus Christ whom He has sent (Jn. 17:3). The Gospel is, therefore, a manifestation of the source of life (1 Jn. 1:2; 3:5, 8; 4:9) to mankind (Jn. 1:31; 2:11; 7:4; cf. 21:1, 14). It is thus a saving revelation, and it reveals God and His powerful name to those who are ignorant (Jn. 1:18; 9:3; 17:6).

The content of this revelation of God through Jesus Christ may be summed up in the words of John 1:14 as glory, grace, and truth.

A. Glory. Glory (*TDNT*, II, *s.v.* δόξα [Kittel, von Rad]; Bultmann, *Gospel*, p. 67 n. 2; Dodd, pp. 206-208) is the visible manifestation of the majesty and splendor of God. The purpose of Jesus was to reveal the glory of the Father (Jn. 11:4, 40), so that people would worship Him (i.e., give Him the glory which is His due, Jn. 9:24; 13:31f.; 15:8; 17:4; 21:19) instead of seeking glory from one another (5:41, 44; 8:50, 54; 12:43). At the same time Jesus Himself possessed glory; He shared the glory of His Father before His incarnation (17:5, 24; cf. 12:41), and was to resume it after His return to heaven (17:24). During His earthly life His glory was revealed (1:14; 2:11), and after His resurrection the Spirit continued to glorify Him (16:14). There is also a sense in which His disciples share in His glory (17:22).

It will be clear from these references that the word "glory" has a wide range of meaning in John, and that John's understanding of the manifestation of the majesty and splendor of God has two important characteristics. First, the splendor of divinity is to be seen — by those who have eyes to see it — in the love of God revealed in Jesus. Second, the divine glory is seen in Jesus when He seeks not His own but the Father's glory in His life of service, and supremely in His sacrificial death. For John the humiliation of Jesus is the supreme moment of His earthly glorification (7:39; 12:16, 23; 13:31f.; 17:1); He is lifted up in order to die (3:14; 8:28; 12:32, 34; W. Thüsing; Schnackenburg, *Gospel*, II, 398-410).

From this point of view we obtain the most satisfactory division of the Gospel into its various parts. In chs. 1–12 Jesus manifests His glory to the world; in chs. 13–17 He manifests His glory to the disciples; and in chs. 18–21 His glory is fully revealed at the cross.

B. Grace and Love. The revelation of Jesus to mankind is also one of grace (Jn. 1:14). Although the actual word is found only in this context (1:14-17; cf. 2 Jn. 3), the concept rules in the thought of John. Divine, unmerited favor is meant. The idea is developed in terms of love (*TDNT*, I, *s.v.* ἀγαπάω [Stauffer], esp. pp. 52f.; Schnackenburg, *Johannesbriefe*, pp. 231-39; C. Spicq, *Agapé dans le NT*, III [1959]).

The character of God is love (1 Jn. 4:8, 16). This fact is known to mankind from the revelation which has taken place in Jesus; His self-giving is the supreme testimony to both the fact and the character of divine love (1 Jn. 4:9). We may explore the meaning of this love in three directions.

First, love is the essential relationship between the Father and the Son; the Father loves the Son (Jn. 3:35; 5:20; 17:23-26) and the Son loves the Father (14:31).

Second, this love is shown by God to humanity. The greatest affirmation of John is that God so loved the world that He gave His Son (Jn. 3:16). This is a text of crucial importance because elsewhere in John it might appear that the love of God is solely for the disciples of Jesus; the truth is that God loves the world, but only those who respond to His love enjoy the fruits of it and enter into a loving relationship with Him (Schnackenburg, *Johannesbriefe*, p. 233). Both the Father and the Son love the disciples (13:1; 14:21, 23; 15:9-15; 1 Jn. 3:1; 4:9f., 16), and the disciples are to respond to that love by loving God (1 Jn. 2:5; 4:20f.) and Jesus (Jn. 14:15, 21; 21:15-17). Such love for God is expressed in the same way as it was by Jesus, namely, by keeping the commandments of God.

Third, the kind of love God has for His Son and for mankind is to be shown by people toward each other. This attitude is in fact the reverse of that which people naturally have for each other. Those who are still in the darkness hate not only God and His Son (Jn. 7:7; 8:42; 15:23-25) but also each other (1 Jn. 3:10-15). Believers who have known the love of God for themselves must love each other (e.g., Jn. 13:34f.; 1 Jn. 3:11; cf. Schnackenburg, *Johannesbriefe*, pp. 117-121). In this way the love of God continues to be revealed to the world.

C. Truth. The third characteristic of the revelation of God in Jesus is truth (*TDNT*, I, *s.v.* ἀλήθεια [Bultmann]; Dodd, pp. 170-78; I. de la Potterie, *La Vérité dans St. Jean* [1977]; S. Aalen, "'Truth,' a Key Word in St. John's Gospel," *SE*, II [1964], 3-24; Schnackenburg, *Gospel*, II, 225-237). The OT and Jewish background to this word links it to God's trustworthiness and righteousness and also to His wisdom. Thus the word refers to heavenly reality. For John the world to which Jesus came was a world that had lost contact with God and was characterized by error and lies (Jn. 8:44). Jesus brought to it a revelation of the true God (7:28). He bore witness to the truth and was Himself the truth (18:37; 14:6), and His activity was continued by the Spirit of truth (14:17). Thus the message of Jesus and of His followers can be called simply "the truth" (8:32, 40; 17:17; 2 Jn. 1f.). Through knowledge of it people are able to live and worship truly (Jn. 3:21; 4:23; 2 Jn. 4; 3 Jn. 3f.).

D. Signs and Works. John defines two ways in which this revelation is brought to mankind. The first of these is by means of the signs and works wrought by Jesus (*TDNT*, VII, *s.v.* σημεῖον [Rengstorf], esp. pp. 243-257; Dodd, pp. 141-43; Barrett, pp. 62-65; Schnackenburg, *Gospel*, I, 515-528; Wilkens; Brown, I, 525-532). The ministry of Jesus consisted of a series of signs (Jn. 2:11; 4:54; 20:30) and mighty works (6:30; 17:4). These were not meant merely to provide evidence of a miraculous, supernatural power (4:48); Jesus is not the wonder-working "divine man" of Hellenism (Bultmann, *Gospel*, p. 102 n. 1, makes too much of this, although he admits that the motif is not of decisive importance). Rather, the mighty works were meant to point beyond themselves to the character of Jesus as the Son of God and Savior of the world (Jn. 3:2; 6:14; 7:31; 9:16). They are not empty symbols, but themselves contain saving power and point to the saving significance of Jesus — as is often brought out in the accompanying discourses; their purpose was to lead people to faith (2:23; 12:37). Although faith ought to be possible apart from miraculous signs (20:29), Jesus did not refrain from signs, especially since through them the grace of God brought healing and salvation to men (9:3).

E. Witnesses. The second way in which the revelation comes to mankind is by means of witnesses (*TDNT*, IV, *s.v.* μάρτυς [Strathmann], esp. pp. 495-99). To witness is to give evidence of what one has seen and heard of a person in order to lead other people to belief in him. Jesus bore witness to the truth (Jn. 18:27), and could even say that He bore witness to Himself (8:13f., 18; there is no contradiction here with Jn. 5:31, since the kind of witness

Jesus refuses to give is that which would be for His own glory; cf. Bultmann, *Gospel,* p. 279). By their character His works bore witness to who He was (5:36; 10:25). Although He came to reveal the Father, it was also possible for the Father to bear witness to His Son (5:37; 8:18; 1 Jn. 5:9-11), so that those who claimed to know God must go on to recognize His Son. Even before Jesus appeared, testimony had been given to Him in the Scriptures (Jn. 5:39) and by John the Baptist (1:7-34; 3:26-30; 5:33), and during His ministry a variety of people substantiated His claims (4:39; 12:17; 19:35; 21:24). After His glorification the Spirit continued to testify to Him both in and through His disciples (15:26f.; 1 Jn. 1:2; 4:14; 5:7f.). Thus the revelation in Jesus was attested and continues to be affirmed to mankind.

IV. Person of Jesus.–From the manner of the revelation we now turn to a consideration of the person in whom the revelation was embodied. Various titles given to Jesus require examination.

A. Messiah. We are moving on thoroughly Jewish ground when we examine the presentation in John of Jesus as the Messiah (Dodd, pp. 87-93, 228-240; Schnackenburg, "Die Messiasfrage im Johannesevangelium," in J. Blinzler, *et al., NT Aufsätze für J. Schmid* [1963], pp. 240-264). First-century longings for the coming of a deliverer are reflected when John the Baptist answers the questions of the Jews by affirming that he is not the Christ (Jn. 1:20; 3:28), and when the Samaritan woman says that she looks forward to the coming of the Messiah (4:25). Throughout the first half of the Gospel there occur statements reflecting common Jewish traditions about the coming of the Messiah (7:27, 41f.; 12:34); the great question in controversy with the Jews is whether Jesus is the Messiah (4:29; 7:26, 31, 41; 9:22; 10:24ff.). The purpose of the Fourth Gospel is to lead people to see that this is the case (20:31) and thus to reecho the confession of the first disciples (1:41; 4:29; 11:27).

Various facets of Jewish messianic expectation are fulfilled in Jesus. He is the coming One (Jn. 11:27; 12:13), an idea that receives a characteristic Johannine nuance (1:9; 3:31; Barrett, p. 330). He is called the Holy One of God (6:69), the Savior (4:42; 1 Jn. 4:14), and the Lamb of God (Jn. 1:29, 36; Rev. 5:6; etc.). The people wonder whether He is the promised prophet (Jn. 6:14; 7:40). He is also spoken of as the King of Israel (1:49; 12:13; 18:33-38; 19:3, 14-22), an idea which receives new definition in John; the former of these ideas (and possibly also the latter) may be connected with the expectation of a prophet like Moses (W. A. Meeks).

Despite the rarity of its use in the Synoptic Gospels, in John the title of Messiah is given to Jesus during His lifetime. This does not mean, however, that the so-called messianic secrecy of the Synoptics is given up: although Jesus is willing to confess His identity to the true seeker, He refuses to do so to the unbelieving Jews (Jn. 4:26; 10:24-26).

B. Son of Man. The most common self-designation of Jesus in the Synoptic Gospels is the expression "Son of man." There the usage is derived principally from Dnl. 7 and other OT sources (the question of a background in Jewish apocalyptic is still not wholly clear), and the title appears in three main contexts: (1) the hidden messiahship of Jesus, (2) the necessity of His suffering (since the Son of man is also the Servant of Yahweh), and (3) His functions as judge and ruler at the Parousia. The problem is whether the title has the same significance in John (see *TDNT,* VIII, *s.v.* ὁ υἱὸς τοῦ ἀνθρώπου (Colpe), esp. pp. 464-470; Dodd, pp. 241-49; Schulz, *Untersuchungen*; Cullmann, pp. 182-87; A. J. B. Higgins, *Jesus and the Son of Man* [1964], pp. 153-184; Schnackenburg, *Gospel,* I, 529-542; F. J. Moloney, *The Johannine Son of Man* [1976]).

Although the title is overshadowed in importance by that of Son of God, it occupies a prominent place in John's Gospel with thirteen occurrences. Passages may readily be found in which the title bears a meaning corresponding to the Synoptic usage (e.g., Jn. 3:14; 5:27; 12:34). There is, however, an emphasis on the heavenly origin of the Son of man (3:13; 6:62) that has led many scholars to question whether the title can be adequately understood against the Synoptic background.

According to Bultmann two ideas are present (*Gospel, passim,* esp. pp. 107, 149 n. 4, 634; *Theology,* II, 37). The first is derived from Gnosticism, in which the totality of preexistent souls comprise the Son of man or *Urmensch,* who fell out of the world of light into the darkness and whose redemption and exaltation is fulfilled in the redemption of the individual souls. John, however, "degnosticizes" the title and makes it refer to Jesus, who came down from heaven and must ascend thither; whether the title still has a corporate reference is uncertain. This means that Jesus is the Son of man in His earthly life, and the Son of man is not merely a figure expected in the future (as in the Synoptic Gospels, on Bultmann's evaluation of their teaching). As Son of man, Jesus must ascend and be exalted, and in the end those who have not recognized Him during His earthly sojourn will be confronted by Him as their judge — which is the second idea present in the Johannine use of the title and stands closest to the apocalyptic teaching found in the Synoptics. Consequently, Jesus does not speak of His resurrection but of His ascent or departure to the Father. In brief, "Jesus is the Son of man, not, as understood by Jewish and early Christian apocalyptic, as he who one day will come on the clouds of heaven, but in his earthly presence; for in this earthly presence in which he enjoys continual communion with the Father, he shows to faith the miracle of his *doxa*" (Bultmann, *Gospel,* p. 107).

This view that the Johannine Son of man is related to the *Urmensch* of oriental and Gnostic speculation is found in several writers. Dodd (pp. 241-49, cf. 31f., 41-43, 69-71, 109-112) gives the theory a more philosophical presentation. According to this view the idea used by John is that of a Being who is the archetype of the human race, the real man (cf. the Platonic Idea of Man), and the inclusive representative of ideal or redeemed humanity. This philosophical understanding of the title seems most unlikely in the general context of Johannine thought, but Dodd is on surer ground when he proceeds to draw the idea of the exaltation of the Son of man from a use of the Servant passages in Second Isaiah.

Barrett (pp. 60f., 302f.) also finds that John's teaching is in line with speculations about the primal or archetypal Man; he stresses that the Son of man is essentially the heavenly Man, the ontological mediator between God and humanity and the sole means of union between heaven and earth (Jn. 1:51; cf. 6:27, 53). Cullmann stresses the element of majesty which characterizes the Johannine references and regards this as a pointer to the use of the idea of the preexistent divine Heavenly Man.

We should probably be very skeptical about the degree of influence of *Urmensch* speculation upon John. It is admitted by Bultmann that the idea has been to a certain extent modified by John himself, and that the characteristic apocalyptic usage is not absent from John. (Schulz, *Stunde* [pp. 96-124], thinks that the Son-of-man theme in John is derived ultimately from late Jewish apocalyptic, although the tradition has undergone considerable reinterpretation before being incorporated in John.) In the present state of study on the Son of man in the Synoptic Gospels, one dare not be dogmatic; but there would ap-

pear to be good grounds for criticizing Bultmann's failure to recognize the authenticity of the nonapocalyptic sayings in the Synoptics (cf. I. H. Marshall, *NTS*, 12 [1965-66], 327-351; *EQ*, 42 [1970], 67-87), and, more especially, his failure to reckon with their possible influence (whether or not as authentic sayings of Jesus) upon John. Further, John's equating of the Messiah and the Son of man (Jn. 12:34) indicates that the two terms are to be understood alongside each other. The following must be kept in mind: (1) "Son of man" is a title of majesty in Dnl. 7 and the Synoptics; (2) the idea of a descent by the Son of man (Jn. 3:13; cf. 6:62) is probably to be traced in Dnl. 7 and behind Daniel in Ezekiel; (3) the exaltation of the Son of man (Jn. 3:14; 8:28; 12:23, 34; 13:31) is presented in terms of the Servant traditions and in the light of His resurrection; and (4) John characteristically emphasizes the present anticipations of eschatological expectation. These characteristics indicate that an adequate background for the Johannine teaching about the Son of man is possible without going far beyond the bounds of Hebraic and early Christian thought (cf. S. S. Smalley, *NTS*, 15 [1968/69], 278-301).

C. Son of God. There can be little doubt that the title of Son or Son of God is fundamental in John's Christology; it occurs from twenty-seven to twenty-nine times in the Gospel (the text is uncertain at Jn. 1:18, 34) and twenty-four times in the Epistles. A number of ideas are linked together in the concept (*TDNT*, VIII, *s.v.* υἱός [Schweizer, *et al.*], esp. pp. 385-388; Dodd, pp. 250-262; Cullmann, pp. 297-303; Schnackenburg, *Gospel*, II, 172-186).

First, the metaphysical or essential relationship between Jesus and His Father is indicated. So close is the link between them that to deny the Son is to deny the Father (1 Jn. 2:22f.; 2 Jn. 9), and Father and Son are named together in such a way that the conclusion is irresistible that they belong inseparably to each other (Jn. 1:18; 5:23; 1 Jn. 1:3; 5:20). The Son is plainly described as preexistent (Jn. 3:17; 11:27; 1 Jn. 3:8; 4:9f., 14; Schnackenburg, *Gospel*, I, 494-506), and His relationship to God is designated by the adjective "only" (RSV, NEB), which indicates the special regard in which He is held by His Father (Jn. 1:14, 18; 3:16, 18; 1 Jn. 4:9; cf. Barrett, p. 180; Bultmann, *Gospel*, pp. 71 n. 2, 81f.).

This leads to the second idea contained in the title, that of the nature of the relationship between Father and Son. The NT is not as interested in the origin of the Son as Arius was, but prefers to draw out the meaning of Sonship in terms of the relationship to which it gives rise, namely, mutual love between Father and Son (Jn. 3:35; 5:20), expressed on the Son's side by obedience to His Father (5:19; cf. 4:34; 5:30; 6:38; 7:16-18; 8:28).

Third, the Son shares the functions of the Father, especially as the judge and the bringer of life (Jn. 5:17-30; see Dodd, pp. 255-57; Schulz, *Untersuchungen*, pp. 124-142).

Fourth, the Son is the mediator between God and mankind. This office stems from His incarnation. He was sent by the Father into the world (Jn. 3:17; etc.) and was given by Him that the world might be saved (3:16). But even while in the world He remains in constant communion with the Father (1:18; 3:13; 8:29; 16:32; cf. W. H. Cadman, *The Opened Heaven* [1969]). Consequently, He is able to reveal the Father to people (1:18), He lays down His life for them, and He is the source of life for those who believe in Him.

In this way the title of Son of God may be said to have been partly molded on a prophetic model (Dodd, pp. 254f.), but above all it expresses the fact that Jesus is the Savior; "Son of God" had messianic associations both in Judaism and Hellenism (Bultmann, *Gospel*, p. 93 n. 1), and the titles "Son of God" and "Christ" tend to have the same meaning in 1 John (Schnackenburg, *Johannesbriefe*, p. 157). But above all for John, Jesus is the Savior because of His metaphysical relationship with God, expressed in His filial consciousness (Jn. 11:41; 12:27f.; 17:1; etc.); this is why John is so concerned to stress that Jesus truly is the Son of God in a real and lasting incarnation (1 John; 2 Jn. 7-11).

D. Logos. Although the title of Logos or Word occurs only in Jn. 1:1-18 and 1 Jn. 1:1-4 (where it is a title, despite RSV and NEB), the character of Jesus as the Logos is determinative throughout John (see II above), and it is not surprising that much attention has been devoted to the background and meaning of the term (*TDNT*, IV, *s.v.* λέγω κτλ. [Kittel, *et al.*], esp. pp. 124-136; Bultmann, *Gospel*, pp. 20-31; Hoskyns, pp. 154-163; Dodd, pp 27-41, 65-73, 75-86, 263-285; Cullmann, pp. 249-269; Manson, pp. 136-159; Brown, I, 519-524).

(1) In the OT the creation of the world is explicitly attributed to the Word of God (Ps. 33:6; cf. Gen. 1; Jn. 1:3). What God says comes to pass, so that His word can be regarded in a sense as His deed (Ps. 145:13). Elsewhere in the OT the Word is God's means of self-revelation to people, the vehicle of His promises and commands. There is no personification or even hypostatization of the word of God here, although the Semitic tendency to regard sayings (such as blessings and curses) as having an independent existence once spoken may have prepared the way for the latter possibility.

(2) Hoskyns (pp. 159-163) drew attention to the way that early Christian thought tended to equate the word proclaimed with Christ Himself: cf. Col. 3:16, "Let the *word* of Christ dwell in you richly," with the parallel in Eph. 3:17, "That *Christ* may dwell in your hearts [cf. Col. 3:15] through faith." "Word" became a technical term for the Christian gospel, and the content of that word was Jesus Himself. John draws the identification elsewhere. He quotes the affirmations of Jesus that He is the way (Jn. 14:6; cf. the use of "the Way" in Acts 19:23; etc.) and that He is the Resurrection (Jn. 11:25; cf. Acts 17:18 — Paul "preached Jesus and the resurrection"). Alongside "If you continue in my *word*" (Jn. 8:31) can be placed "If you abide in *me* and my words abide in you" (15:7). It is a short step from here to the direct statement that Jesus is the Word.

(3) In the OT and Judaism God's wisdom is a concept closely parallel to His word. According to the vivid metaphor in Prov. 8, Wisdom was created by God before the world and stood by Him like a master workman at creation. In the later wisdom literature (esp. Wisd. 7) it occupies a prominent place and is described as sitting by the throne of God (Wisd. 9:4). A stoic element is present when it is spoken of as pervading the universe. There are very considerable parallels between the OT and Jewish description of wisdom and the Johannine description of the Word (tabulated in Dodd, pp. 274f.), and already in Judaism the identification of God's wisdom and word was beginning to be made (Wisd. 9:1f.), a fact that makes it easier to see how the description of wisdom has been transferred by John to the Word.

(4) The description of the Word in John is also parallel to that of the Torah or Law in Judaism. In several passages the Torah, especially in its concrete form in the Pentateuch, and wisdom are identified (Sir. 24; Bar. 3–4). Rabbinic Judaism assigned to the Torah a role of great importance; it was spoken of in personal terms, regarded as preexistent and an agent in creation, and described as the giver of light and life to men. The parallelism and contrast with the Torah is readily apparent in John (see esp. Jn. 1:17; cf. Dodd, pp. 75-86).

In the opinion of many scholars the material so far pre-

sented is an adequate background for the Johannine usage, but other suggestions have also been made.

(5) In Greek philosophy, particularly in Stoicism, the idea of the logos as the principle of rationality and order in the universe, and hence as the principle by which people ought to live, played an important part. But although this may have been important for other writers who formed a part of John's environment, this is not the obvious clue to the meaning of logos in John (cf. Bultmann, *Gospel*, p. 24). At the same time, however, by the use of the Logos terminology John secured a point of contact with those who were acquainted with its use in philosophy.

(6) The Jewish philosopher Philo attempted to express Jewish ideas in the terminology and thought forms of Platonism and Stoicism. His use of the term logos was extensive and varied. He identified the Platonic heavenly pattern of the visible world with the Stoic logos which gives structure and order to the visible world, and then equated both with the word which he described in the wisdom terminology as the preexistent, divine agent in creation and also as the intermediary between God and man. He also regarded it as the heavenly archetype of man and as the reason which indwells man; this gives a more personal nuance to what is in any case a highly fluid concept in his thought.

Several writers find in the Philonic logos the nearest parallel to the Johannine logos (Scott, pp. 145-175; Dodd; *NBD*, *s.v.* "Logos" [Birdsall]). But there is a vast difference in ethos between John and Philo, and the linguistic parallels between Philo and John are not as close as those between the wisdom literature and John.

(7) Bultmann (*Gospel*, pp. 24-31; cf. Schulz, *Untersuchungen*, p. 181 and n. 6) has raised the objections that in none of the Jewish sources mentioned above is logos used as a title — it is merely the name of a concept — and that the mythological personification in the wisdom and Torah speculation is not sufficiently living to have been the source of the Johannine personification of the Logos. The similarities between the wisdom literature and John are due to their common source in the Gnostic myth, according to which the figure of Logos or Nous (other names are also used) is conceived as descending into the world in human form as a disguise from the evil powers; in Christian thought this figure is identified with Jesus. Consequently Bultmann has ready-made answers to the questions posed by Hoskyns (p. 156): how did the description of wisdom come to be applied to the "word," and how has the "word" become a name for a clearly defined person?

This neat solution faces very considerable difficulties. It has already been mentioned that the sources from which the Gnostic myth is reconstructed are fragmentary and often of later date than John, and there is still no proof that the redeemer myth itself is of pre-Christian origin (R. M. Wilson, *The Gnostic Problem* [1958]; Schnackenburg, however, is more hospitable to the possibility, *Gospel*, I, 481-493, 543-557). Further, John preserves the more philosophical meaning of Logos which the name itself proves to have been original, whereas the Gnostic concept is much more mythological. Above all, the closeness of the parallels between John and the wisdom literature is such as to make any other *basic* source for John quite superfluous.

Thus, John teaches that Jesus is identified with the Logos of God, the creative and revealing Word who existed from the beginning with God and became a man. Despite the claims of E. Käsemann (p. 26 *et passim*), John does not fall into a naive docetism; the real manhood of Jesus is a cardinal point of Johannine Christology. Not only does the Gospel describe a real man who could be hungry and thirsty, but in 1 John the utmost importance is attached to the coming of Jesus by water and by blood, i.e., in a true and lasting incarnation (Jn. 4:6f.; 1 Jn. 5:6). Men were able to see, hear, and touch Him (1 Jn. 1:1f.). John thus emphasizes both the coming of the Savior from beyond space and time and the reality of His coming into this world as a man. History is of crucial importance for him (see esp. Hoskyns, pp. 107-135).

E. God. It is not a great step from saying that the Logos was God (this *must* be the translation of Jn. 1:1; see esp. Bultmann, *Gospel*, pp. 33f.; V. Perry, *EQ*, 35 [1963], 15-22) to saying that Jesus Himself was God. This step is taken in Jn. 20:28, which must be regarded as the christological climax of the Gospel. The textual evidence is strongly in favor of the reading "God" instead of "Son" in Jn. 1:18, but the contextual evidence here casts doubts upon the evidence of the MSS, and few scholars have accepted it. It is very likely that Jesus is designated as God in 1 Jn. 5:20 also.

Various writers (Dodd, pp. 93-96; E. Stauffer, *Jesus and His Story* [Eng. tr. 1960], pp. 142-160; cf. *TDNT*, II, *s.v.* ἐγώ; Schnackenburg, *Gospel*, II, 79-89; Brown, I, 533-38) have drawn attention to the significance of the formula "I am he" on the lips of Jesus (Jn. 4:26; 6:20; 8:24, 28, 58; 13:19; cf. Mk. 6:50; 13:6; 14:62); this formula is found in Second Isaiah as a self-affirmation of God (Isa. 43:10; 48:12), and the use of it by Jesus is consequently deeply significant.

Thus Johannine Christology culminates in the affirmation that the man Jesus is God come among men as their Lord and Savior. He receives from believing men and women this appellation of Lord, which is also the name given to God the Father (Jn. 1:23; 12:13, 38). This is clearly the case at Jn. 20:28 (cf. 20:2, 13, 18ff.; 21:7, 12), i.e., in the postresurrection narrative. Earlier in the Gospel the vocative form is used as the normal polite form of address, and is not restricted in application to Jesus alone (12:21; 20:15), but there are occasions when a deeper meaning may be intended (6:68; 9:38), and Jesus claimed to be the Lord of the disciples (13:13-16; 15:15, 20). There would, therefore, appear to be no reason (despite Bultmann, *Gospel*, p. 176 n. 2) for denying the possibility of the use of the title for Jesus by the Evangelist in 4:1; 6:23; 11:2 (see Cullmann, pp. 232f.).

V. The World and Sin.—The sphere of Jesus' activity in John is regarded as the lower realm in contrast to the upper realm, which is where God is (Jn. 8:23; cf. 3:3, 7, RSV mg.; 3:31; 19:11). More commonly it is spoken of as the world or "this world" in contrast to heaven as the divine sphere. The idea of God being above in heaven is one that is common to most religions, and there is no need to call it a Gnostic idea.

Although "world" is an ethically neutral concept in itself, it takes on a specifically moral and spiritual meaning in John (Schnackenburg, *Johannesbriefe*, pp. 133-37). It is the world of people who are separated from God. We may single out four main characteristics. First, the world is characterized by darkness or the absence of light (Jn. 1:5; 12:46; 1 Jn. 2:8-11; *TDNT*, VII, *s.v.* σκότος [Conzelmann]; IX, *s.v.* φῶς; Dodd, pp. 201-205; Schnackenburg, *Johannesbriefe*, pp. 76-79). When the true light did shine in it, it was not welcomed (Jn. 1:9), and people refused it because their deeds were evil (3:19); they were wilfully blind to the light (9:39-41), and consequently the judgment which came upon them was simply blindness from which they could not recover (12:37-40). It requires no proof that light and darkness are here moral and spiritual terms; light signifies both the revelation of God and the holy character of God.

Second, the state of the world is one of falsehood. It has cut itself off from the truth of God (see III above). The importance of this description is that it shows that what is primarily wrong with the world is not lack of true self-knowledge (so R. Bultmann, *Gospel,* pp. 40-48, etc.) but lack of knowledge of God.

Third, the world can also be spoken of as a place of bondage in which people lack freedom (Jn. 8:34). They are under a ruler whom they must obey, and that ruler is the prince of this world, the devil (Jn. 12:31; 14:30).

Fourth, the basic fact about the world is that it is characterized by sin; blindness or darkness, falsehood, and slavery are all ways of expressing this basic fact. Sin is incompatible with living in the light (1 Jn. 1:5-10), for in essence it is refusal to obey the law and commandments of God (3:4); it is expressed in lack of love for others, even to the point of murder (3:11-15). It is the mark of the children of the devil, and has no place in the life of the children of God (3:6, 8). Its most heinous expression is rejection of Jesus (Jn. 16:9).

Because of its sinful character the world stands under divine judgment. The coming of Jesus into the world is an act of divine judgment (Jn. 9:39), in which people have the opportunity of accepting salvation or passing judgment upon themselves. It can, therefore, be said that the purpose of Jesus was not to judge (i.e., condemn) the world but to save it, and that people judge themselves (3:17-19; 8:15; 12:47f.). But at the same time it can definitely be said that Jesus is the Judge who carries out the judgment of God upon the world; although His primary purpose was to save the world, judgment is the inevitable consequence of His coming (5:22, 27, 30; 8:16, 26, 50; cf. 16:8, 11 for the continuation of this work by the Spirit). Hence, although the final judgment is still future (Jn. 5:24, 29; 12:48), the world can be said to have been judged already (Jn. 3:18; 16:11) and is destined to pass away (1 Jn. 2:17). The verdict passed in the judgment is the sentence of death (Jn. 8:24; 1 Jn. 5:16), but the state of the world can be spoken of as already one of death, since it is separated from God who is the source of life; the wrath of God rests upon it (Jn. 3:36; 5:24f.; 1 Jn. 3:14).

Thus, John's description of the world is controlled by a basic dualism expressed in several pairs of opposites. That a similar dualism is to be found in Gnosticism is well known. But it remains questionable whether Gnosticism must be regarded as the source of Johannine dualism (as by L. Schottroff). The ethical dualism in John is thoroughly in line with the light and darkness terminology of the OT and Judaism, and need not be regarded as specifically Gnostic, although the presence of Gnostic heresy among his readers may have helped to influence John's formulations (Percy, pp. 63-76; Schnackenburg, *Johannesbriefe,* pp. 30-32; Böcher; Brown, I, lxii-lxiii).

That people are actually in the darkness does not prevent them from thinking they are in the light and possess the means of salvation. Since John is writing especially for people of Jewish background, he concentrates his attention on Jewish claims to possession of the light. The Jews thought that in the OT Scriptures they possessed eternal life (Jn. 5:39). But although the Scriptures possessed the highest religious authority for John (and for Jesus) — as is demonstrated both by his direct quotations and allusive use and by such statements as 5:45-47; 10:35 (Barrett, pp. 22-25) — the Jews' claim that they had found life in them was ill founded because they refused to come to the One to whom the Scriptures, rightly interpreted, bore witness (5:39f.). Those who have learned from the Father must come to the Son (6:44f.).

Nor is it sufficient to appeal to membership in the Jewish race. Descent from Abraham is all very well, but not if Abraham's children fall into sin and refuse to accept the One who is greater than Abraham (8:31ff.). If salvation is from the Jews (4:22), it is only because Jesus was a Jew.

The world, therefore, is bankrupt as far as eternal life is concerned; it is dead and cannot raise itself to life. It needs the Savior (Bultmann, *Theology,* II, 26-32).

VI. Savior of the World.—In the coming of Jesus the need of the world is fully met. To a world in darkness He appears as the light of the world (Jn. 8:12). In place of falsehood He brings the truth that He Himself embodies (14:6) and the knowledge of God the Father (17:3). Instead of slavery He offers freedom (8:32-36), and instead of sin and death He gives eternal life.

This last expression is John's favorite one for the blessing brought by Jesus (*TDNT,* II, *s.v.* ζάω κτλ. [von Rad, Bertram, Bultmann], esp. pp. 870-72; Dodd, pp. 144-150; Manson, pp. 110-19; Schnackenburg, *Gospel,* II, 352-361). Eternal life is originally life that does not end, i.e., life that continues beyond the grave and is thus a future possession. Such life is, however, of a divine quality, so that "eternal" has both a quantitative and a qualitative sense: life or eternal life (the terms are synonymous) means an everlasting life which is the life of God Himself. John emphasizes both these points. Those who possess eternal life shall never perish (Jn. 3:16; 6:27; 10:28), but will be raised from the dead (5:21-29; 6:40, 51, 54, 58). Further, that life is more abundant than the so-called life of this dead world (10:10). It is a life of fellowship with God (17:3), and it is received only from Jesus. He is the source of life (1:4; 11:25; 14:6; 1 Jn. 1:1f.). In metaphorical language He is the giver of living, i.e., life-bestowing, water (Jn. 4:10-14; cf. 7:38) and of living bread (6:27ff.; P. Borgen, *Bread from Heaven* [1965]). Jesus Himself can be called the bread of life, since it is by receiving Him that people receive His gifts (on this and similar "I am" statements, see E. Schweizer, *EGO EIMI* [2nd ed. 1965]; Bultmann, *Gospel,* p. 225 n. 3; Schnackenburg, *Gospel,* II, 79-89). He who has Jesus has life (1 Jn. 5:11f.).

What is new in John's teaching is implicit in the statements already made: eternal life is not merely a future possession for which believers hope, but also a present possession which they already enjoy (Jn. 3:36; 5:24; 6:47). The believer really has eternal life *now,* and not merely in the form of a promise (as Hartingsveld, p. 60; rightly Dodd, pp. 144-150).

We must now ask whether Jesus does anything in order that people may have eternal life. Is it sufficient that He appears among people to reveal God to them? Does Jesus save people primarily by coming to them and challenging them to decision? This, it would appear, is the view of Bultmann, who ascribes a monumental insignificance to what is at the center of the NT as a whole: the redemptive death of Jesus (*Theology,* II, 52-55; followed by E. Lohse, *Märtyrer und Gottesknecht* [1955], pp. 191f.). In order to achieve this conclusion a number of statements have to be emptied of their obvious meaning, and others have to be ascribed to a series of redactors. On this view, the death has significance only as the culmination of the whole life, which is said to be a sacrifice, but not an atoning sacrifice for sin.

In fact John's doctrine of the death of Jesus is not dissimilar from that of the NT as a whole (J. Denney, *Death of Christ* [1951], pp. 139-155; V. Taylor, *The Atonement in NT Teaching* [2nd ed. 1945]). The death of Jesus is the supreme demonstration of the love of God (Jn. 3:14-16; 13:1; 1 Jn. 4:9f.). He is presented as the Good Shepherd who lays down His life for the sheep (Jn. 10:11, 15, 17f.; cf. 1 Jn. 3:16), and His death is said to be a saving death

on behalf of mankind (Jn. 11:50-52) by which they are drawn to God (12:32). As regards the manner of its efficacy, the death is a victory over Satan (Jn. 12:31; 1 Jn. 4:8), but the main category of understanding is undoubtedly that of sacrifice. Jesus is presented at the very outset of the Gospel as the Lamb of God who takes away the sin of the world (Jn. 1:29, 36) — an image that is definitely sacrificial, whatever be its precise force (cf. *TDNT*, I, *s.v.* ἀμνός κτλ. [J. Jeremias]). He was manifested to take away sin (1 Jn. 3:5), and His death is conceived as a propitiation for the sins of the whole world (2:2; 4:10; L. Morris, *Apostolic Preaching of the Cross* [3rd ed. 1965], pp. 205-208). It is through His blood that sin is cleansed (1:7), and He is said to be an advocate with the Father for sinners (2:1). Through His work the sins of believers are forgiven (2:12).

These citations show clearly not merely that the death of Christ is regarded by John as an objective act of atonement, but also that it lies at the center of his message (cf. R. V. G. Tasker, comm. on John [*Tyndale NT Comms.*, 1960], pp. 31f., *et passim*; F.-M. Braun, III, 137-182).

VII. Entry to Eternal Life.–The coming of Jesus into the world does not automatically result in the salvation of individual men and women. Rather, it creates a moment of crisis for everyone who comes into personal contact with Him; they are presented with the possibilities of receiving eternal life from the only One who can offer it, or of remaining in sin and darkness and thus confirming the judgment under which they already stand (Jn. 5:24; 12:46-48).

When this crisis leads to eternal life it is spoken of as a new birth or a birth from above (either translation is possible at Jn. 3:3, 7); without such a birth it is impossible to enter the kingdom of God. There has been considerable debate about the origin of this terminology (*TDNT*, I, *s.v.* γεννάω κτλ. [Büchsel, Rengstorf]; Barrett, pp. 172f.; Schnackenburg, *Johannesbriefe*, pp. 175-183). It was certainly common in the mystery religions and Gnosticism, and these are often regarded as the sources for John's usage; it is likely in any case that he knew of this language. But his teaching is more probably rooted in the teaching of Jesus (Mt. 18:3), and it may have a Jewish background: the Jewish saying about a proselyte, when newly baptized, being like a newly born child was originally not legal (Barrett, p. 172) but religious in its significance (J. Jeremias, *Jerusalem in the Time of Jesus* [Eng. tr. 1969], pp. 324f.; *Infant Baptism in the First Four Centuries* [Eng. tr. 1960], pp. 32-34).

Two sets of expressions are used to define how this crisis takes place. On the one hand, it is a birth from God (Jn. 1:13; 1 Jn. 2:29; 3:9; 4:7; 5:1, 4, 18) or from the Spirit of God (Jn. 3:6, 8). Its result is to make people children of God (1 Jn. 3:1; etc.); this is a relationship that is not simply moral (1 Jn. 2:29; 3:9; 4:7) but at the same time not physical (in 5:18b the slightly different Greek construction may indicate a reference to the unique begetting of Jesus by the Father; note also that whereas Jesus is called the Son, John never uses this word to describe believers). When we remember that the Spirit of God is His divine, superhuman power, working miraculously in human lives, it becomes clear that the new birth is an act of God Himself through which people are initiated into a life of divine quality.

On the other hand, the possibility of the new birth is dependent upon the fact that Jesus was lifted up to die (see J. Denney, *Jesus and the Gospel* [3rd ed. 1909], pp. 97-99); and the experience comes to those who believe in Jesus and receive Him (Jn. 1:12; 3:16).

The question now arises of the relationship between the act of God and the faith of people (Schnackenburg, *Gospel*, II, 259-274). John does not say that the work of the Spirit is dependent upon the faith of the individual. Nor does he say that the existence of faith is dependent upon the work of the Spirit; the doctrine of an inward regeneration of the individual prior to conscious faith is hardly to be deduced from Jn. 1:12f. (Barrett, pp. 136f.), although this does not mean that the activity of the Holy Spirit does not precede faith.

A number of passages teach plainly that nobody can come to Jesus and believe in Him without being drawn by the Father (Jn. 6:37, 44, 65; 10:29; 15:16, 19; 17:2, 6, etc.), and in one place at least (8:47) the impression is given that the world is divided, as in Gnostic thought, into two fixed groups — those destined to believe and those destined to perish. But the predestinarian inferences which may be drawn from these texts must be carefully qualified. There are other passages which teach a universal offer of salvation (Jn. 3:16f.; 6:45; 12:32; 1 Jn. 2:2), and besides that, the predestinarian language is not always applied rigorously (Jn. 12:37ff.; see Hoskyns, p. 429). When these facts are kept in mind, it appears that the predestinarian statements are intended to emphasize that the gift of eternal life is from start to finish the gift of God and is not something that man can grasp by his own endeavors; to go beyond this and find in John individual election (and reprobation) is distinctly precarious.

VIII. Characteristics of Eternal Life.–A. Faith, Perseverance, and Assurance. The new life to which entry is given by the new birth is preeminently a life of faith (*TDNT*, VI, *s.v.* πιστεύω κτλ. [Bultmann, Weiser], esp. pp. 222-28; Dodd, pp. 179-186; Schnackenburg, *Gospel*, I, 558-575). Although John uses the noun "faith" only once (1 Jn. 5:4), he uses the verb "to believe" 107 times; it has two distinct constructions: with the dative case or a noun clause to indicate credence in a person or acceptance of a statement as true, and with the preposition *eis* and the accusative case to indicate trust in and commitment to a person. (This is not an exhaustive analysis of the usage; there is, among other uses, a use of the verb absolutely with no object, where the meaning must be determined from the general context.) This usage is sufficiently consistent linguistically (despite Bultmann, *Gospel*, p. 252 n. 2) to be made the basis of a theological distinction between two levels of faith. The "lower" level is that of intellectual acceptance of the claims made by Jesus (Jn. 6:69; 8:24; 11:26f., 42, etc.); that this kind of faith is utterly indispensable is shown by the emphasis laid on right belief in the Epistles (1 Jn. 5:10; cf. 2 Jn. 7-9). But such faith is insufficient; it must culminate in the "higher" level of commitment of oneself to the person whose claims one has accepted intellectually (Jn. 1:12; 2:11, 23; 3:16, 18, 36, etc.; 1 Jn. 5:10, 13). No doubt intellectual faith is not truly intellectual faith unless it is accompanied by such commitment, but there can be an intellectual faith that falls short of the commitment that alone leads to eternal life.

The object of the believer's faith and trust is sometimes said to be God (Jn. 5:24; 14:1; 1 Jn. 5:10) or the revelation He has made (1 Jn. 5:10; cf. 4:16 and also Jn. 5:46f. of believing in the words of Moses), but usually it is Jesus Himself or the name of Jesus.

Faith is not merely a momentary act associated with the new birth. It is an attitude that is characteristic of the believer throughout his life, without which he would cease to be a partaker in eternal life. This aspect of faith is developed in John by the concept of abiding (J. Heise, *Bleiben. Menein in den Johanneischen Schriften* [1967]), which expresses both the close union between believers and their Lord (see below) and the continuing nature of the relationship between them. The disciples are commanded to abide in Jesus (Jn. 15:4-10; 1 Jn. 2:24, 28; 3:6),

and are warned about the danger of failing to abide in Him (Jn. 15:6).

John thus emphasizes the need to abide in Jesus and warns against the danger of falling away (Jn. 16:1). Beside this teaching must be placed the statements that express the protection given by Jesus to His disciples (Jn. 6:39f., 44, 54; 10:28f.; 17:11ff.); it will then be apparent that we have in John the paradox of the possibility of falling away from faith and the promise of a divine protection that preserves the disciples from perishing. This paradox is no more to be explained away, whether from a Calvinist or an Arminian standpoint, than the paradox of faith and the Holy Spirit encountered previously. The believer needs to be warned against falling away, but at the same time he can be fully assured of his salvation (I. H. Marshall, *Kept by the Power of God* [1969]).

John stresses that the believer can know that he possesses eternal life (1 Jn. 5:13). The truth of the saving message is attested by witnesses (see above), including God Himself (Schnackenburg, *Johannesbriefe,* pp. 267-271). Further, the possession of the Spirit is a sign that a person is born of God (1 Jn. 3:24; 4:13). The believer is thus a person who is filled with joy (Jn. 15:11; 17:13; 1 Jn. 1:4).

B. Knowledge. A second main characteristic of the new life is knowledge (*TDNT,* I, *s.v.* γινώσκω κτλ. [Bultmann]; Dodd, pp. 151-169; Schnackenburg, *Johannesbriefe,* pp. 95-101). Eternal life can indeed be defined as knowing the Father and the Son (Jn. 17:3). What is distinctive in Johannine teaching is that the knowledge of believers is similar to the mutual knowledge of the Father and the Son (10:14f.). Believers know the Father (8:19; 14:7; 17:3; 1 Jn. 2:3, 13; 4:6; 5:20), they know the Son (Jn. 10:14; 1 Jn. 2:13f.; cf. 3:6) and are known by Him (Jn. 10:14), and they know the Spirit (14:17; cf. 1 Jn. 4:2, 6). Such knowledge is not a higher stage in Christian experience than faith (this is clear from the parallelism between the two concepts), but is the expression of the cognitive element in faith. The person who believes has personal fellowship with God (cf. 1 Jn. 1:3-7). This, and not knowledge of the mysteries of cosmogony or esoteric revelations, is the content of knowledge, according to John. Finally, it is worth noting that this knowledge is something present, and not merely future (Jn. 10:14; cf. the use of the perfect tense in 1 John).

C. Union with God. The third characteristic of the new life is union with God (Dodd, pp. 187-200). This is expressed in terms of fellowship with God (Schnackenburg, *Johannesbriefe,* pp. 66-72) and of abiding in Him. This last phrase has already been mentioned briefly; to what was said earlier must now be added that the abiding of the believer in Jesus (Jn. 15:4-10; 1 Jn. 2:24, 28; 3:6) is paralleled by the abiding of Jesus in the believer (Jn. 15:4f.), and that this mutual indwelling is patterned on the relationship of the Father and the Son with each other (14:10). The Father is also said to abide in believers and they in Him (1 Jn. 2:24; 3:24; 4:13f., 15f.), and the Spirit abides in believers (Jn. 14:17; see Bultmann, *Gospel,* p. 535 n. 1; Schnackenburg, *Johannesbriefe,* pp. 105-110).

These same relationships are also expressed by the use of the preposition "in" without the use of the verb "abide." The Father is in the Son (Jn. 14:11; 17:21, 23) and the Son in the Father (14:11, 20; 17:21). Following this archetypal relationship, the Son is in people (14:20, 23; 17:23, 26) and people are in the Son (14:20; 17:21; 1 Jn. 5:20). The Father is in people (Jn. 14:23; 1 Jn. 4:4) and people are in the Father (Jn. 17:21; 1 Jn. 5:20). There is no suggestion of any loss of identity in this relationship; it is one of loving communion (see esp. Dodd, pp. 187-200).

The concrete expression of communion with God is prayer. Just as Jesus was able to ask His Father for anything in prayer (Jn. 11:22), so the disciples may come to the Father and make known their requests (15:7; 16:23). Such prayer, however, must be made in the name of Jesus (14:13f.; 15:16; 16:24, 26) and must be in accordance with the will of the Father (1 Jn. 5:14) if it is to be sure of receiving an answer (3:22; 5:15).

D. Holy Spirit. The fourth characteristic of the new life is the presence of the Holy Spirit in the believer (*TDNT,* VI, *s.v.* πνεῦμα κτλ. [Schweizer, *et al.*], esp. 437-444). Jesus Himself possessed the Spirit (Jn. 1:32f.), and He passed on the gift to His disciples. He is the One who baptized with the Spirit (1:33; cf. 20:22), but, although the life-giving power of the Spirit was already present in the words of Jesus (6:63), the gift of the Spirit was fully given to people only after the glorification of Jesus (7:39). The Spirit is variously described as the Spirit of truth (14:17; 15:26; 16:13), the Holy Spirit (1:33, etc.), and the giver of life (6:63; cf. the verses associating the Spirit with the new birth). But the most characteristic description of Him in John is "another Paraclete" (14:16, 26; 15:26; 16:7; cf. 1 Jn. 2:1 of Jesus). The functions ascribed to the Spirit in this context are, first, that He will come and abide in the disciples after the departure of Jesus, to teach them, remind them of His words, and guide them into the truth; and, second, that He will bear witness to Jesus through the disciples before the world, and will convict the world of sin, righteousness, and judgment. These functions can be paralleled from the activities of Jesus Himself.

Recent studies suggest that the idea of the Paraclete has a complex background (*TDNT,* V, *s.v.* παράκλητος [Behm]; Bultmann, *Gospel,* pp. 566-572; O. Betz, *Der Paraklet* [1963]; Brown, II, 1135-1144; *NTS,* 13 [1966/67], 113-132; G. E. Johnston, *The Spirit-Paraclete in the Gospel of John* [1970]). The older view gave the term a forensic background (B. F. Westcott, comm. on John [1882], pp. 211-13); another traditional view assigns the meaning of "comforter" on the basis of the meaning of the cognate verb (cf. Hoskyns, pp. 465-470; Barrett, pp. 385f.). More recently attention has been directed to the ideas of intercession and heavenly intercessors in Jewish literature (cf. Job 16:19; 33:23, 26).

E. Obedience and Love. The fifth characteristic of the new life is that it is ethically conditioned. Not only is confession of sin a condition for walking in the light (1 Jn. 1:8-10); the new life is one of holiness, in which further sin is eschewed. The believer must follow the truth and do good (2 Jn. 4; 3 Jn. 3f., 11f.). Above all, he is to keep the commandments of God, since this is what love for God implies (Jn. 14:15, 21; 15:10; 1 Jn. 5:3; 2 Jn. 6) and is the proof that he knows God (1 Jn. 2:3f.). In particular, John draws attention to the new commandment given by Jesus that believers should love each other (Jn. 13:34; 15:12; 1 Jn. 2:9; 4:21; 2 Jn. 5f.). The whole matter is summed up by saying that the commandment is to love God (and, therefore, to keep His commandments) and one another (1 Jn. 3:23).

Such a life of obedience may also be described as one of sanctification in the truth. To be sanctified is to be set apart and dedicated for God's service (Jn. 10:36), and this thought is certainly present in Jn. 17:17, 19 also, but the full meaning of these verses is missed, if it is not remembered that this process of dedication includes the spiritual and ethical transformation of people to be suitable instruments for divine service. This means that believers are to eschew the sinfulness of the world (1 Jn. 2:15-17), even though they remain in the world (Jn. 17:15-18), and therefore Jesus prays that they may be kept from the evil one (17:15). The kind of life they are to live is thus a life that is

free from sin (1 Jn. 3:4-10; on the problem of sinlessness, *see* JOHN, EPISTLES OF III; Schnackenburg, *Johannesbriefe*, pp. 281-88).

IX. Life in the Church.—The theology of John lays strong emphasis on the place of the individual and his faith in the divine purpose of salvation (C. F. D. Moule, *Nov.Test.*, 5 [1962], 171-190). This is not something for which the expositor need apologize; the modern stress on the corporate nature of Christianity can easily be carried too far. Nevertheless, this does not mean that John is deficient in teaching on the communal character of the Christian faith (E. Schweizer, "The Concept of the Church in the Gospel and Epistles of St. John," in A. J. B. Higgins, ed., *NT Essays* [1959], pp. 230-245; *Church Order in the NT* [1961], pp. 117-130; Brown, I, civ-cxi).

It is true that the word "church" is rare in John (3 Jn. 6, 9f., of the local church; cf. the "elect lady," 2 Jn. 1, 13), but the reality is there. A disciple is a member of the flock of Jesus; no doubt this metaphor is developed primarily in terms of the relation of the individual sheep to the shepherd, but there is also present the thought of the gathering together of other sheep to constitute one flock (Jn. 10:16). Similarly, while the imagery of the vine is primarily concerned with the relation of the individual branches to Jesus, there is teaching in the immediate context on the need for the disciples to love each other (15:12). This means that the disciples are constituted by their allegiance to Jesus into a group whose most noteworthy characteristic is mutual love. They form a fellowship (1 Jn. 1:3f.) in which the members show great love for each other; this concept is developed in 1 John to such an extent that love for those who are not in the fellowship tends to retreat into the background (see, however, Schnackenburg, *Johannesbriefe*, pp. 117-121). The outcome of such love is that the Church should manifest a oneness or unity, and the achievement of this unity is one of the chief objects for which Jesus prays (Jn. 17).

All this means that the Church forms a definite group over against the world, although it is possible for the visible Church to contain those who are not truly believers in Jesus and are eventually seen for what they are in reality (1 Jn. 2:19). It has a task of mission to the world, being sent by Jesus in the same way as He was sent by the Father (Jn. 20:21) in order to bear fruit, i.e., win converts (15:16); through seeing its love and unity the world may be led to believe (17:23). Jesus, therefore, prays not only for the world but also for the disciples through whose words and witness the world may be won (17:9,20).

The world, for its part, indicates its separation from the Church by setting itself up in opposition to the Church and persecuting it. It hates believers, just as it hated Jesus, and persecutes them in order to force them to give up their faith; it can even do this under the false impression that it is thereby glorifying God (Jn. 15:18–16:4; 17:14; 1 Jn. 3:13).

Little is said in John about the inner life of the Church. Jesus speaks of the time which is already at hand when true worshipers will worship the Father in spirit and in truth without being tied to such places as Mt. Gerizim or Jerusalem (Jn. 4:19-24), but nothing is said about the manner of such worship. It is clear, however, that the task of witnessing to Jesus by means of words is an essential part of the activity of the Church, and the fact of pastoral care is hinted at in Jn. 21:15-19.

The place of the sacraments in Johannine teaching is disputed. The view of Cullmann (*Early Christian Worship* [1953]) that sacramental allusions are to be found in great abundance in John is far from convincing; even more unconvincing is the view of Bultmann (*Theology*, II, 9) and E. Lohse (*NTS*, 7 [1960/61], 101-125) that the sacramental references are all due to a redactor, although one can agree with Lohse that John puts the word above the sacraments in importance. In every case in the Gospel the references to the Lord's Supper are no more than allusive, and there is no narrative of its institution. The reason for this may lie in a *disciplina arcani* (J. Jeremias, *Eucharistic Words of Jesus* [Eng. tr. 1966], pp. 125-137; see, however, J. D. G. Dunn, *NTS*, 17 [1970/71], 328-338). It is, however, clear that John knows of baptism as a rite of initiation associated with the gift of the Spirit (Jn. 1:33; 3:5) and of the need for disciples to be nourished by the flesh and blood of the Son of man — language that almost certainly alludes to the Lord's Supper (6:53-58; the significance of 19:34 is obscure; on 1 Jn. 5:6-8 see W. Nauck, *Die Tradition und Charakter des ersten Johannesbriefes* [1957]).

John says little about the ministry. The Gospel teaches that Peter was entrusted with the task of a shepherd (21:15-19), and that the disciples collectively received authority to forgive and retain (i.e., not forgive) sins (20:23). There is no indication whether the group of disciples thus authorized was limited in number; this is in fact unlikely, since the group of twelve disciples or apostles is not significant in John. In the Epistles the Church situation is somewhat hazy, but there are indications that John himself exercised a general supervision over a number of churches and that a local leadership was beginning to develop. That a church discipline was operating is seen not only from Jn. 20:23 but also from the details recorded in the Epistles (1 Jn. 5:16; 2 Jn. 9-11; 3 Jn. 9-12).

X. Eschatology.—The temporal framework that conditions Johannine theology is a subject of lively debate among contemporary scholars (Schnackenburg, *Johannesevangelium*, II, 530-544; Brown, I, cxvi-cxxi). Elsewhere in the NT it is taught that the present evil era is destined to be succeeded by the new era of the kingdom of God, which will be inaugurated at the Parousia; but the saving intervention of God that will bring about this new era has already taken place decisively in the first coming of Jesus, so that the new era is already enjoyed proleptically by believers. In other words, there is an interim period between the first coming of Jesus and the Parousia during which the future era is partially realized; Christians already possess the earnest of future glory, and what is yet to come is merely the full manifestation of what has already been fully revealed in principle. The first coming of Jesus is the center of history, the decisive eschatological event, which nevertheless needs to be consummated at the Parousia.

According to Dodd (pp. 403-406, *et passim*) John teaches that the future era fully came at the first advent of Jesus, so that no decisive future event is still awaited. The place of the Parousia in early Christian expectation is taken by the coming of the Spirit. So far as believers are concerned, the return of Jesus is His spiritual return after His glorification; so far as the world is concerned, the visible Parousia of Jesus is replaced by the revelation of the loving unity of the Church. Thus John has decisively reinterpreted early Christian eschatology into a realized eschatology. A similar treatment of John is provided by J. A. T. Robinson (*Jesus and His Coming* [1957], pp. 160-185), but he differs from Dodd in believing that the Johannine nonapocalyptic and nonfuturistic eschatology was in fact the original Christian faith and was succeeded by the apocalyptic, futuristic hope of the Parousia. Bultmann (*Theology*, II, 57f.) reaches a somewhat similar conclusion by a different route: having removed all that savors of apocalyptic from John by the hypothesis of a redactor, he proceeds to regard Easter, Pentecost, and the Parousia as different expressions of the one existential event that is "the victory which Jesus wins when faith arises in man by the over-

coming of the offense that Jesus is to him"; consequently, there is no impending cosmic drama to be awaited.

Something more akin to the traditional view is upheld by such scholars as Barrett, van Hartingsveld, and C. F. D. Moule (*op. cit.*). Barrett states that John has not abandoned the common NT eschatology, although he has emphasized its problems, and that according to John the promises (especially that of the resurrection of the dead) are already being fulfilled but in such a way as to leave over something for a future fulfillment also (p. 57).

The clue to the right answer lies in the formula, "The hour is coming and now is" (Jn. 4:23; 5:25; 16:32; cf. 16:25). This formula emphasizes both the presence and the futurity of certain events; the argument of Bultmann that the emphasis is placed entirely on the present time as the eschatological hour (*Gospel,* pp. 189f., esp. p. 190 n. 1) is not convincing and does not take into account the fact of statements with a purely future reference (e.g., Jn. 16:25). Moreover, what the formula shows is that certain future events are already taking place in the present time; what is taking place now is an anticipation of what will take place in the future. Thus already a number of people worship in spirit and in truth, and already a few dead are raised, but these are only partial anticipations of the worship and resurrection to take place in the future. Consequently, what takes place now is a foreshadowing of future events, and the emphasis is misplaced when it is suggested that John sees the future events as the finalizing of present realities and the visible unfolding of what now is (Hunter, p. 144).

This means that for all his immense stress on the present realization of eternal life, John looks forward to the fulness of life that is only partially realized by anticipation in the present time. To map out his expectations in detail is by no means easy, and according to van Hartingsveld (pp. 137-154) they cannot be fitted into a neat pattern; rather, John's expectations fall into three groups associated with the resurrection, the day of homecall for the disciples to their heavenly mansions, and the setting up of the messianic kingdom.

We may now briefly summarize the content of Johannine expectation regarding the future. We have already seen that John looked forward to the continuing life of the Church after the glorification of Jesus and to the presence of Jesus with His disciples through the Holy Spirit. During this time a period of woes and persecution is envisaged (Jn. 15:18–16:4; 16:32f.; 21:18f.); indeed it is already begun (16:32). It is the period of the revelation of antichrist, or rather of the antichrists, for John sees the spirit of antichrist as operative in all those who, though professing to be believers, deny that Jesus is the Christ. That they are already manifested indicates that the end time has begun (1 Jn. 2:18f.; 4:1-6).

After this comes the last day (Jn. 6:39f., 44, 54; 11:24; 12:48), which is associated with two events: the resurrection of the dead and the judgment. The resurrection is strictly of believers to eternal life, but John can also speak of a resurrection of judgment (5:25-29). There is also the possibility that a person may remain alive until the parousia of Jesus (21:22f.), when He comes again to take His people to be with Himself (14:3). But the relationship between living and dead believers at the time of the Parousia is not explicitly discussed; it would appear to be reasonable to assume that the voice that raises the dead is that of the Son of man at His coming. When Jesus comes again and His disciples see Him they will be transformed to become like Him (1 Jn. 3:2f.), and they will see His glory (Jn. 17:24). Their dwelling place will be the place Jesus has gone to prepare for them (14:3).

The center of Johannine eschatology is thus Jesus Himself. It is He who will gather together His people (Jn. 10:16; 11:52), and their expectations are directed toward Him. In the end, therefore, it is Jesus Himself who is the theme of Johannine theology.

JOHN (APOCRYPHA) [Gk. *Iōannēs*].

1. Father of Mattathias, grandfather of Judas Maccabeus and his brothers (1 Macc. 2:1).

2. Eldest son of Mattathias, surnamed Gaddi or Coddi in some MSS.

3. Father of Eupolemus, one of the envoys sent to Rome by Judas Maccabeus (1 Macc. 8:17; 2 Macc. 4:11).

4. John Hyrcanus, son of Simon and nephew of Judas Maccabeus (1 Macc. 13:53; 16:1). *See* HASMONEANS; MACCABEES.

5. One of the envoys sent to treat with Lysias (2 Macc. 11:17).

JOHN (NT) [Gk. *Iōannēs*].

1. JOHN THE BAPTIST.

2. The apostle, the son of Zebedee and brother of James (*see* JOHN THE APOSTLE).

3. A relative of Annas the high priest who sat in the Sanhedrin when Peter and John were tried (Acts 4:6). He may have been a son and the successor of Annas the high priest.

4. John Mark. *See* MARK, JOHN.

5. Father of Simon Peter (Jn. 1:42 [AV JONA]; 21:15-17 [AV JONAS]). The best MS witnesses have Gk. *Iōannēs,* instead of the *Iōna* of the MSS available to the AV translators. *Iōna* is probably scribal assimilation to Gk. *Bariōna* (from the Aramaic for "son of Jona") in Mt. 16:17.

JOHN, ACTS OF. *See* APOCRYPHAL ACTS: THE "LEUCIAN" ACTS III.

JOHN, EPISTLES OF.

The NT contains five books traditionally ascribed to John, and three of these are headed as epistles or letters. But only 2 and 3 John are strictly to be regarded as letters. Each is the length of an ordinary private letter, which

could be written on a standard-size piece of papyrus (25 cm. by 20 cm. = 10 in. by 8 in.), and each has the typical form of a letter with a more or less stereotyped introduction and conclusion. The form of 3 John resembles that of the following letter on papyrus discovered in Egypt and dated in the 2nd or 3rd cent. A.D.:

> Irenaeus to Apollinarius his dearest brother many greetings. I pray continually for your health, and I myself am well. I wish you to know that I reached land on the sixth of the month Epeiph and we unloaded our cargo on the eighteenth of the same month. . . . Many salutations to your wife and to Serenus and to all who love you, each by name. Goodbye. Mesore 9. [Addressed] To Apollinarius from his brother Irenaeus (C. K. Barrett, *The NT Background: Selected Documents* [1956], no. 22, p. 29).

By contrast, 1 John lacks the typical stylistic features of a letter. It is not, however, to be regarded as a literary "epistle," for it bears all the marks of being addressed to a specific situation in some church or group of churches known to the author. It is probably best to regard it as a tract written to deal with a definite problem; we may perhaps think of it as a written sermon or pastoral address.

IX. Authorship of the Epistles

I. Situation of 1 John.–1 John was called forth by a crisis in the Church due to the rise of false teachers; the point had been reached at which they had seceded from the Church (2:19), but their influence was still upsetting the faithful (2:26). The author of the tract considered it necessary to write a careful statement of the apostolic faith for his friends, showing them where it was being distorted by the false teachers.

The false teachers appear to have been forerunners of the heretics who were responsible for the developed Gnostic systems of the 2nd century. The seeds of Gnosticism were already to be found in the NT period, although it is a confusing use of terminology if we apply the actual term "Gnosticism" to the incipient Gnosticism or pre-Gnosticism of this period (cf. R. M. Wilson, *The Gnostic Problem* [1958]). Three characteristics of the form of teaching combatted by John may be distinguished:

(1) The false teachers regarded themselves as an esoteric group, superior to ordinary Christians. They believed that they had a deeper knowledge than other Christians (cf 2:20, 27; 2 Jn. 9), and they showed little brotherly feeling toward them (cf. 4:20, which may have the false teachers particularly in mind).

(2) The precise content of this deep knowledge is uncertain. As far as doctrine was concerned, they denied that Jesus was the Christ (2:22), i.e., that He was the preexistent Son of God (1:1; 4:15; 5:5, 10) who had come in the flesh (4:2; 2 Jn. 7) to be the Savior of the world (4:9f., 14). Thus they rejected the basic Christian doctrine of the Incarnation and apparently also the doctrine of the Atonement. These views have generally been regarded as bearing some affinity to those of Cerinthus, a heretical teacher in Asia Minor at the close of the 1st century. According to Irenaeus, John was an opponent of Cerinthus and would not even bathe in the same bath-house at Ephesus with that "enemy of the truth" (*Adv. haer.* iii.3.4). Cerinthus taught that "the world was not made by the primary God, but by a certain power far separated from him, and at a distance from that Authority who is supreme over the universe, and ignorant of the God who is above all. He represented Jesus as having not been born of a virgin, but as being the son of Joseph and Mary according to the ordinary course of human generation, while he nevertheless was more righteous, prudent and wise than other men. Moreover, after his baptism, Christ descended upon him in the form of a dove from the Supreme Ruler, and that then he proclaimed the unknown Father, and performed miracles. But at last Christ departed from Jesus, and that then Jesus suffered and rose again, while Christ remained impassible, inasmuch as he was a spiritual being" (*Adv. haer.* i.26.1).

From this quotation it will be evident that the false teaching discussed in 1 John was by no means fully identical with that of Cerinthus, but it resembled it in distinguishing Jesus from the Christ who temporarily dwelt in Him; cf. especially 5:6, where John emphasizes that Jesus *Christ* came by the water (of baptism) and the blood (of the cross), and the repeated statement that Jesus *is* the Christ, the Son of God (2:22; 5:1, 5; cf. 4:2). It may be significant that the present tense is used; does it mean that Jesus remains the Christ? In 2 Jn. 7 the present participle "coming" may refer to the Incarnation as a continuous fact (C. H. Dodd). But the teaching of Cerinthus was more fully developed in a Gnostic direction, and R. Schnackenburg (pp. 17f.) denies any real connection between it and the false teaching in 1 John. (On the other side, see J. A. T. Robinson, "The Destination and Purpose of the Johannine Epistles," in *Twelve NT Studies* [1962], p. 134.)

In any case the teaching in 1 John appears to reflect the well-known distinction made by the Gnostics between spirit and matter. The spiritual was regarded as divine and good, and the material as created and evil; no lasting union was possible between them, and consequently a real incarnation of God in human flesh was impossible and could only be either apparent (the heresy known as Docetism) or temporary (Cerinthianism).

(3) These doctrinal views led to equally strange teaching about the life of the Christian. The false teachers claimed that they were "sinless" (1:8, 10), and it is probable that they felt they did not need cleansing by the blood of Jesus Christ. At the same time they were to some extent morally indifferent: they appear to have followed the ways of the world (cf. 2:15), they did not regard the commandments of Jesus as binding upon them (2:4), and they made little attempt to practice Christian love and generosity, although there is no indication that they fell into gross sin.

Perhaps this paradoxical behavior arose from their failure to regard sin as a moral category, namely, lawlessness (3:4, 7f.). They may have thought of sin as a spiritual matter, and hence saw no inconsistency in claiming sinlessness while at the same time indulging in selfishness and lovelessness. A Gnostic would have argued that, since the body (composed of matter) was evil and only the spiritual part of man was ultimately important, bodily behavior was irrelevant to Christian belief. Gnostic theology was more concerned with ignorance than with sin.

II. Structure of 1 John.–The argument of 1 John is best understood as an antidote to this false teaching, designed as a warning to those who had not yet succumbed to it (cf. K. Weiss, *ZNW*, 58 [1967], 247-255). Its structure is undeniably difficult.

Some commentators have adopted the view that the thought of the Epistle proceeds in spiral form, so that although the same ideas are repeated, the thought keeps

ascending to higher levels. This view is especially associated with R. Law (*ISBE* [1939]). It yields the following analysis of the Epistle:

Prologue. 1:1-4.

(1) First Cycle. 1:5–2:28. The Christian life as fellowship with God (walking in the Light), tested by righteousness (1:8–2:6), love (2:7-17), and belief (2:18-28).

(2) Second Cycle. 2:29–4:6. Divine sonship tested by righteousness (2:29–3:10a), love (3:10b-24a), and belief (3:24b–4:6).

(3) Third Cycle. 4:7–5:21. Closer correlation of righteousness, love, and belief.

The weakness of this scheme is that the three themes common to the first and second cycles do not occur in the same manner in the third cycle.

A more elaborate scheme was adopted by A. E. Brooke (cf. W. G. Kümmel, *Intro. to the NT* [1966], pp. 306f.), which may be abbreviated as follows:

Introduction. 1:1-4.

(A) (1) Ethical Thesis. Walking in the light as the true sign of fellowship with God (1:5–2:17).

(2) Christological Thesis. Faith in Jesus as the Christ as the test of fellowship with God (2:18-27).

(B) (1) Ethical Thesis. Doing of righteousness as the sign that we are born of God (2:28–3:24).

(2) Christological Thesis. The Spirit which is of God confesses Jesus Christ come in the flesh.

(C) Combination of the two Theses:

(1) Love as the basis of faith (4:7-21).

(2) Faith as the basis of love (5:1-12).

Conclusion. 5:13-21.

This scheme also seems somewhat artificial.

If we must attempt to divide up the Epistle in a logical fashion, preference should be given to the divisions proposed by R. Schnackenburg:

Preface. 1:1-4.

(1) Fellowship with God as walking in the light, and its realization in the world (1:5–2:17).

(2) The present situation of the Christian Church: its defense against the antichrists, its expectation of salvation, and its religio-ethical task (2:18–3:24).

(3) The separation of those who belong to God from the "world" by true faith in Christ and love (4:1–5:12).

Conclusion. 5:13-21.

But even this scheme is not altogether free from difficulty. It seems best to regard the Epistle as composed of a series of connected paragraphs whose relation to each other is governed by "catch-words" as well as by logic. This does not mean that John is illogical, but simply that his Epistle is not adapted to division into large sections on a logical basis. The outline of contents below will show the flow of its thought.

It will not be surprising that various scholars have attempted to explain the difficulties in the structure of the Epistle by hypotheses of rearrangement, use of sources, and editorial revision.

(1) The simplest rearrangement is that proposed by K. Tomoi (*Expos.T.*, 52 [1940-41], 117-19), who wishes to place 4:1-6 between 4:21 and 5:1. In its present position 4:1-6 gives the impression of being a digression; but this is by no means impossible in John, and there is no objective evidence for the proposed reconstruction.

(2) The view that 1 John is an editorial revision of an earlier document was held by E. von Dobschütz (*ZNW*, 8 [1907], 1-8) and accepted by H. Windisch (p. 136). It was developed by R. Bultmann in two articles ("Analyse des ersten Johannesbriefes," in *Festgabe für A. Jülicher* [1927], pp. 138-158; "Die kirchliche Redaktion des ersten Johannesbriefes," in W. Schmauch, ed., *In Memoriam E. Lohmeyer* [1951], pp. 189-201). According to Bultmann, the original document consisted of 1:5-10; 2:4f., 9-11, 29; 3:4, 6-10, 14f., (24); 4:7, (8), 12, 16; 5:1, 4; 4:5, 6 (?); 2:23; 5:10, 12; (2 Jn. 9). Later the completed work was subjected to an "ecclesiastical" revision which added 5:14-21 and various small interpolations in order to bring the thought more into line with orthodox theology. These theories reappeared with minor modifications in Bultmann's commentary, where the author suggested that the original Epistle extended only to 2:27, the remainder being loosely attached discussions of the themes already treated.

(3) H. Preisker (in H. Windisch, *Die Katholischen Briefe* [*HZNT*, 3rd ed. 1951], ed. H. Preisker, pp. 168-171) holds that two source documents were combined: a "revelatory address" roughly identical with the original document isolated by Bultmann, and an "eschatological text" containing verses or parts of verses from 2:28; 3:2, 13f., 19-21; 4:17; 5:18f.

These views have not met with much acceptance, and have been effectively criticized by various scholars (W. Nauck, *Die Tradition und Charakter des ersten Johannesbriefes* [1957]; R. Schnackenburg, pp. 11-15).

(4) A more conservative line is taken by W. Nauck, who isolates a number of sets of antithetical statements in the Epistle. He thinks we can see traces of a previous work by John himself which he later wrote up in its present form. It may well be true that John used material which had already begun to assume a definite form through use in teaching and which was cast in a shape suitable for easy memorization (see F. F. Bruce in *EQ*, 30 [1958], 115f.), but the theory as a whole has not found favor.

(5) A novel analysis is offered by J. C. O'Neill (*The Puzzle of 1 John* [1966]), who argues that the author took up twelve poetic admonitions of Jewish provenance and adapted them in order to form a Christian document whose purpose is to show the fulfillment of Judaism in Christ. The theory is unconvincing, but at least the author has shown the Jewish affinities of the Epistle.

(6) On the basis of an analysis of numbers of syllables, J. S. Sibinga (in *Studies in John Presented to Professor Dr. J. N. Sevenster* [1970], pp. 194-208) has argued that the Epistle as we have it is a carefully balanced, rhetorical construction.

The variety of conclusions offered shows that the skepticism of such scholars as E. Haenchen (pp. 8-12, 15-20, *et passim*) and W. G. Kümmel (*op. cit.*, pp. 308f.) toward such theories is abundantly justified.

III. Contents of 1 John.–The Epistle begins with a statement of its purpose. John wishes to explain to his readers more about the word of life which was manifested in Jesus, so that there may be a true communion between them, himself, and God (1:1-4).

He then announces his starting point, that God is light; He is holy and He illuminates people who live in His presence. From this proposition, which would presumably be acceptable to his opponents, he now proceeds to quote and criticize various slogans which crystallized their teaching (1:6a, 8a, 10a; 2:41; cf. 4:20). Against them he asserts that it is impossible to claim fellowship with God while walking (i.e., living) in the darkness of sin; only those who walk in the light have fellowship with God through continual cleansing by the blood of Christ. Those who protest that they have no sin from which to be cleansed deceive themselves and deny the truth of God's verdict upon them. But those who confess their sin to God will find that He faithfully forgives them through the sacrifice provided by the righteous advocate, Jesus Christ. The practical test as to whether a person is a sinner in

need of cleansing or truly knows God is whether or not he keeps God's commandments and lives as Jesus lived (1:5–2:6).

From the thought of God's commandments, John turns to the new commandment that Jesus gave. It is really an old commandment, but is now given afresh to Christians as the rule of life in the era of light that has already begun to shine in the darkness of the old, sinful world. We have here the typical NT idea of two eras or worlds, the old era of sin and the new era of salvation. But, whereas Jews looked forward to the coming of this new, messianic era in the future, Christians believed that it had already dawned in the midst of the old world and would one day (at the parousia of Jesus) entirely replace the old era; thus during the present time the two eras run side by side, and only the believer can see that the new age has already begun. In this new era people must live by the commandment of brotherly love. (The new commandment has two main aspects — faith and love (3:23) — and it finds expression in various commandments which John does not list in detail.) John is able to give his readers this new commandment because they belong to the new era and no longer walk in the darkness that blinds them and makes them a stumbling block; they enjoy the privileges of forgiveness, knowledge of the Son and of the Father, and victory over the devil. As citizens of the new world, they are not to cling to the sinful world with its temptations to lust and pride in material possessions, for it is doomed to pass away (2:7-17).

One of the signs that Christians live in the last hour before the old era passes away is the rise of false teachers. It was common knowledge that the Parousia would be preceded by the coming of antichrist; in the anti-Christian teaching of his opponents John saw part at least of the fulfillment of this prophecy. Through their secession from the Church the false teachers stood revealed as what they really were. They denied that Jesus was the Son of God, and since John thought of God as being the Father of believers only because He is the Father of Jesus Christ, this meant that they were denying the Fatherhood of God. (Jn. 20:17 is the only unambiguous reference in the Johannine corpus to God as the Father of believers.) To be sure, the false teachers based their claims on special knowledge, but John asserts that all Christians (RV mg., RSV, NEB), in virtue of their anointing by God (i.e., with the Spirit; perhaps, as Dodd suggests, with the Word of God), have true knowledge. Let them, therefore, keep to what they were originally taught (2:18-27).

John has spoken of the way in which their anointing abides in his readers. He now bids them for their part to abide in the Son, who is righteous, so that they will not shrink away from Him in shame at His parousia through being themselves unrighteous. Let them test themselves (and their teachers) by their likeness to Christ. For since Jesus is righteous, it follows that all who claim to be born of God, as He was, must be righteous also. This leads on to the thoughts of God's great love in making people His children and also of the prospect that when they see Him (probably Christ rather than God) they will be altogether like Him — all of which is a strong inducement to a holy life (2:28–3:3).

What, then, is the character of this holy life which God's children must lead? John begins by defining his terminology. Sin means failure to keep God's law. Since Jesus appeared on earth to remove sin, Christians do not sin by breaking God's law. Indeed they cannot sin, because they are born of God and His seed remains in them; on the other hand, the children of the devil, i.e., unbelievers, neither do what is right nor show love, and thus are clearly differentiated from believers. John's statement that believers cannot sin is strong and uncompromising. But it must be understood in the light of 1:8 and 2:1. The most probable explanation is that John is depicting the ideal character of the Christian; insofar as he really is a Christian and abides in Christ ("abide in him" is an imperative), he will not sin, and he will make it his purpose not to sin, in contrast with the false teachers who did not make it their aim to keep God's law despite all their professions of sinlessness (3:4-10). (On the theological problem, cf. the survey of various interpretations in Haenchen, pp. 30-35.)

While Christians have received the command to love each other, the false teachers, as has already been said, lack love. Consequently, Christians can expect to be hated by them, just as Abel was murdered by Cain. But the mark of the Christian must be love, demonstrated in the same spirit of sacrifice as was shown by Jesus and in practical charity (3:11-18).

Such acts help a person to be sure that he belongs to the truth and free him from the inward accusation that he is not really a child of God; for he can have perfect confidence in his judge, the God who knows his desire to love and serve Him (cf. Jn. 21:17). Freed from such accusations he can boldly approach the throne of grace in prayer, because he knows that he pleases God by keeping His commandments. Thus he really does abide in God, and God in him, as the Spirit of God inwardly assures him (3:19-24).

But how can a person be sure that it is the Spirit of God that abides in him? Do not the false teachers also claim to possess the Spirit? John answers that the sign of true inspiration is correct belief that Jesus Christ has come in the flesh. Anybody who does not confess this is inspired by antichrist (for "does not confess" some textual witnesses have "annuls" [Gk. *lýei*], i.e., repudiates the true doctrine about Jesus). Thus, there are two spirits, one of truth and the other of error, and it is not surprising that the world, inspired by antichrist, does not accept the witness of believers. Yet, although their opponents are many, believers may have confidence, because God is greater than their adversary and because believers have in reality already overcome the false prophets (4:1-6).

From this digression John returns to the theme of love, since love as well as faith is characteristic of those who possess the Spirit. Love is the sign that a person is born of God, for, as was supremely demonstrated in the sacrifice of Christ, God is love, and loved us before we began to love Him. (This is the second of John's great declarations about the nature of God. Cf. 1:5 and Jn. 4:24.) Even if people cannot see God, yet He abides in them if they show love (4:7-12).

A section now follows in which John gathers together much of what he has already said. He summarizes the grounds on which a person may be sure that he is a Christian: he possesses the Spirit of God; he confesses that Jesus is the Son of God; he abides in love. Consequently, God abides in him, and he may have complete confidence for the Day of Judgment because he shares in the character of God, and because there can be no cringing fear in a relationship of love. But to avoid any antinomian or spiritualistic misunderstanding, John reemphasizes that such love for God must be expressed by love for one's brethren. How, indeed, can those who love the Father fail to love His children also? It might be objected that it is not easy to love God and to keep His commandments, but John points out that through faith those who are born of God can overcome the world and all its temptations (4:13–5:4).

JOHN, EPISTLES OF

Thus John has returned to the theme of faith, and in a doctrinal section he now defines closely the content of true faith. It must be a faith that Jesus is the Son of God, and this is closely related to the fact that Jesus not only submitted to the water of baptism but also shed His blood on the cross, i.e., that the Son of God really became man and died for our sins, a fact which is corroborated by the witness of the Spirit to Jesus (cf. Jn. 15:26). It may be said, then, that there are three witnesses to Jesus — the Spirit, water, and blood — and they bring God's sure testimony about His Son to mankind. (For the text of 5:7f. see any modern translation or comm.; the AV contains a trinitarian interpolation, "in heaven . . . in earth," which is not part of the original text.) John possibly also means that the saving activity of the Spirit and the sacraments of baptism and the Lord's Supper continue this testimony in the Church (see the important discussion of this by W. Nauck, *op. cit.*). To disbelieve this testimony from God is to make Him a liar and to refuse His gift of eternal life in His Son (5:5-12).

The Epistle closes with a restatement of its purpose, which is to assure believers that, whatever false teachers may say and however strong the world may seem, they do possess eternal life and can be confident of a divine answer to their prayers. Thus they may pray for any erring brethren with confidence that they will be restored to fulness of life. In the case of mortal sin, however, prayer is apparently useless. (However, no one has ever established what John meant by "mortal sin." He probably meant apostasy, but we cannot be sure.) Next comes a reiteration of the great truths of the Epistle — that God's children have power not to sin and can overcome the devil, that the readers are in fact God's children, and that the Son of God has in very truth come in the person of Jesus to give them true understanding and eternal life. A final admonition warns against idolatry, and comes as something of a surprise (5:13-21).

IV. Contents of 2 John.–The situation and contents of 2 John are closely related to those of 1 John, but the tone is much more personal and practical. The letter is addressed from "the elder" (see IX below) to "the elect lady and her children." Although some scholars still think that an actual family is thus addressed, there can be little doubt that this is a cryptic manner of addressing a church (cf. 1 Pet. 5:13), and the whole manner of address is perhaps intended to baffle any hostile persons who might intercept the letter. W. Foerster (*TDNT,* III, 1095) thinks that the elder is respectfully addressing a church which he himself had not founded.

After expressing his joy that his readers are walking in the truth and exhorting them to love and to obey God's commandments, John comes to the main point of his letter. False teachers holding the doctrines attacked in 1 John have been going from church to church with their propaganda. John warns his readers lest they be led astray and lose their reward from God; those who "go on" (AV "transgresseth" is based on inferior MSS) to accept this "higher teaching" (as its proponents no doubt described it) are really abandoning true doctrine and with it their faith in God, the Father of Jesus Christ. False teachers should not be encouraged in any way, e.g., by offering them hospitality. John says that he would gladly write more, but he hopes to see his readers soon, and concludes his letter with greetings from his own church.

Since the false teachers are here apparently still within the church, it may be that 2 John was written earlier than 1 John, or else to a different church. In any case, it is clear that the two writings belong together.

V. Contents of 3 John.–The situation is somewhat different in 3 John, which is a private letter to an individual and deals more with ecclesiastical problems. It is addressed from the elder to his friend Gaius, who was a leading member in another church. Gaius is warmly commended for his loyalty to the truth, seen in the quality of his character. In particular, in an age when many Christian preachers traveled from church to church and were very much dependent on local hospitality, he is commended for looking after such preachers; by helping those who went out trusting in God, he has shown himself a fellow worker in (or with) the truth.

His attitude is contrasted with that of Diotrephes, whom John criticizes on two grounds. He refused to welcome traveling preachers and attempted to keep them out of the church. He also wished to have a place at the head of the church and refused to accept the authority of John; he was so successful in suppressing a letter of John that no trace of it has survived beyond the mention of it here. John, therefore, warns that he will come and deal personally with Diotrephes if necessary. Finally, he adds a word of commendation for Demetrius, who may have been one of the traveling preachers or the bearer of this letter, and concludes with cordial greetings.

The situation reflected here is not easy to reconstruct. Probably we are to see in it the troubles of a new system of church organization. At first the various churches were to a considerable extent under the guidance and leadership of apostles and similar people who traveled from place to place, and the authority of local leaders was correspondingly restricted. With the passage of time and the growth of the churches a new situation developed. The apostles died, leaving no defined system of succession, and local churches tended to develop more powerful leadership of their own. In various places there was a tendency for one person to become bishop and preside over the church and its other leaders. It looks as though Diotrephes was trying to hasten this process; he was seeking autonomy for his own church with freedom from the influence of the elder, and he himself wished to occupy the leading position in it. Possibly Gaius was a member of a neighboring church, for otherwise it would be strange for John to tell him what he must already have known.

It does not necessarily follow from this that Diotrephes had already become bishop in his own church (as is held by B. H. Streeter, *The Primitive Church* [1928], pp. 83-97; G. Bornkamm, *TDNT,*VI, 670-72; E. Schweizer, *Church Order in the NT* [1961], 12c, 14a), but simply that he was desirous of this position; thus the situation had not yet reached the stage of development reflected in the Epistles of Ignatius (cf. Dodd, pp. 161-65; Schnackenburg, p. 329).

It is also important to notice that no heretical views are attributed to him (despite W. Bauer, *Rechtgläubigkeit und Ketzerei im ältesten Christentum* [1934], pp. 96f.). Nor is there any reason whatever to assume that the elder was a heretic. This, however, is the assumption made by E. Käsemann (*ZTK,* 48 [1951], 292-311; similarly Bultmann, pp. 99f.); he holds that the elder was a teacher with sympathies toward Gnosticism. Although he opposed docetic views of Christ, he had the boldness to write a Gospel in which his own unorthodox opinions were expressed and was opposed by Diotrephes as the champion of orthodoxy. This hypothesis is entirely improbable; the Johannine writings are in fact a powerful defense against Gnosticism (for criticism of Käsemann, see G. Bornkamm, *TDNT,* VI, 671 n. 121; Schnackenburg, pp. 299f.; Haenchen, pp. 267-291).

VI. External Attestation of the Epistles.–The external attestation for 1 John is excellent, and certainly better than that for the Gospel of John. According to Eusebius (*HE*

iii.39.17) it was used by Papias (*ca.* 130-140). It was quoted by Polycarp in *Phil.* 7 (*ca.* 110-140) and by Justin in *Dial.* 123.9 (*ca.* 150-160). Irenaeus (*Adv. haer.* iii.16.5, 8) accepted it as the work of John the disciple of the Lord, and this view was shared by Tertullian, Clement of Alexandria, Origen, and the Muratorian Canon. Eusebius states that its authenticity was never questioned (*HE* iii.24.17; 25.2).

The case of 2 and 3 John is less certain. It is uncertain whether the Muratorian Canon refers to all three Epistles or only to the first two (for the former view see J. Moffatt, *Intro. to the Literature of the NT* [3rd ed. 1918], pp. 478f.; P. Katz, *JTS*, N.S. 8 [1957], 273f.; for the latter see T. W. Manson, *JTS*, 48 [1947], 25-33). The Second Epistle was quoted by Irenaeus (2 Jn. 11 in *Adv. haer.* i.16.3; 2 Jn. 7f., wrongly ascribed to 1 John in iii.16.8) and by Aurelius a Chullabi (Council of Carthage, 256, Brooke, p. lix). According to Eusebius (*HE* vi.14.1), Clement of Alexandria commented on all the canonical Scriptures, but the fragments of his *Adumbrationes* that have survived do not include 3 John. Origen reflected current doubts about their status (comm. on John, v.3), and Eusebius reckoned them among the books that were disputed by some but generally recognized in the Church (*HE* iii.24.17; 25.2f.). On the basis of this and other evidence, T. W. Manson (*op. cit.*) concluded that 1 and 2 John were known in the Latin-speaking church in the West before 3 John, which was translated separately into Latin. In the East the Syrian church, which was slow in accepting the Catholic Epistles, took 1 John into the Peshitta, but 2 and 3 were only accepted much later in the Philoxenian Version. Undoubtedly the brevity and comparative unimportance of 2 and 3 John were responsible for their poor circulation and for the doubts expressed about them. There was some doubt about their apostolic authorship.

VII. Provenance and Date.—On the whole it is still most probable that the Epistles are to be connected with Asia Minor. If the teaching opposed in 1 John is linked with Cerinthus, this strengthens a case firmly based on the traditions that connect the author with Asia Minor. The claims of Syria have been urged by W. Nauck (*op. cit.*, p. 165); but this depends very much upon his interpretation of 1 Jn. 5:6f., which has not won general acceptance.

The date of composition cannot be determined with certainty. Resemblances to ideas found in the Qumrân literature indicate that the time required for the development of Johannine theology need not have been so long as formerly thought. On the other hand, the growth of heresy and the development of the ecclesiastical situation prevent an early date. Thus, a date between the 60's and 90's of the 1st cent. is probable.

VIII. Relationships among the Five Johannine Writings.—Before the question of authorship can be discussed it is necessary to consider the literary relations of the Epistles to each other and to the rest of the Johannine writings.

Some doubt was expressed in the early Church as to the common authorship of the three Epistles; Eusebius (*HE* iii.25.3) mentions the possibility that 2 and 3 John may not be the work of the Evangelist who was the author of 1 John, and similar doubts are mentioned in later writers, including Jerome (*De vir. ill.* 9, 18), Ambrose (*Ep.* 11.4), and the *Decretum Gelasianum*. This view was adopted by J. Moffatt (*op. cit.*, pp. 479-481), who cites a number of other scholars in support of his opinion. More recent scholarship affirms that all three Epistles are from the same hand (Brooke, pp. lxxiii-lxxix; R. H. Charles, *ICC* on Revelation [1920], I, xxxiv-xxxvii; Dodd, pp. lx-lxvi; Schnackenburg, pp. 297f.). Although 1 John is anonymous, we may now assume that its author was "the elder."

More serious doubts have been raised in recent years about the common authorship of the Gospel of John and 1 John. J. Moffatt, who himself was inclined to accept a difference in authorship, gave a lengthy list of supporters for his view (*op. cit.*, pp. 589-593); and the position has been popularized by C. H. Dodd (*BJRL*, 21 [1937], 129-156; summarized in his comm., pp. xlvii-lvi), who is followed by C. K. Barrett (comm. on John [1955], pp. 49-52; cf. also Windisch, pp. 109-111 and Haenchen, pp. 4-8). But convincing proof of common authorship is given by Brooke (pp. i-xix), W. G. Wilson (*JTS*, 49 [1948], 147-156), and W. F. Howard (*The Fourth Gospel in Recent Criticism and Interpretation* [4th ed. 1955], pp. 281-296; see also Law, pp. 339-363; Schnackenburg, pp. 34-39; Kümmel, *op. cit.*, pp. 310-12).

The relevant arguments may be summed up as follows:

(1) A number of linguistic differences between the Gospel of John and 1 John have been discovered. These include the absence of Gk. *oún* from 1 John (194 times in the Gospel), the much rarer use of *gár* and *dé*, and the substitution of *apó* (19 times in 1 John; 40 times in the Gospel) for *pará* (only 3 times in 1 John; 33 times in the Gospel); there is also a considerable diminution in the number of compound verbs used.

It is doubtful whether these stylistic differences can be regarded as very significant. R. Morgenthaler has pointed out that even if statistical investigations of this kind can produce fruitful results, they must always be carried out with very great caution; taken by themselves statistics can be deceptive (*Statistik des neutestamentlichen Wortschatzes* [1958], p. 65). That similar differences may be easily established between books whose common authorship is generally accepted should make us wary of attaching too much significance to these findings for the Johannine literature. (E.g., Gk. *mén* occurs only 10 times in Luke but 47 times in the slightly shorter book of Acts.) Inquiry must be made as to the possible causes of stylistic differences. In addition to difference of authorship the possibilities of use of sources and different amanuenses should be taken into account. Literary genre should also be noticed; *oún* is a historical rather than a consecutive particle in the Gospel. Finally, in this particular case it must be remembered that the Epistles stand closer in style and content to the Gospel than to any other writing. The very close stylistic similarities between the two groups may well be entirely adequate to outweigh the differences.

(2) Various words and word-groups found in the Gospel do not appear in 1 John, including: salvation and destruction, Scripture, glory, send and seek, above and below, judgment. These are carefully discussed by W. F. Howard, who finds reasonable explanations for their absence. In general it may be said that there are differences of emphasis between the Gospel and Epistles due to their having been written in different situations and with different purposes, and that it would be foolish to expect different books to have identical contents. Howard lists some similar omissions in and differences among the various writings of Paul: we may add to his examples the complete omission of the word "church" in Rom. 1–15.

(3) The crucial argument depends on a number of theological differences; the list that follows is based mainly on that given by J. Moffatt:

(a) In 1 John there is a transference to God of functions that in the Gospel are reserved for Christ; e.g., Christians are said to be "in God" directly, while in the Gospel this relationship is mediated through Christ.

(b) In 1 John eternal life depends on correct belief about the person of Christ rather than on faith in Him. Thus faith tends to be more intellectual

(c) Christ is identified with Life rather than with the Logos.

(d) There is more emphasis upon sin and the need for propitiation.

(e) The signs that authenticate the messiahship of Jesus are not mentioned.

(f) There is more stress on the Parousia.

(g) The Holy Spirit is less personal, and is simply a witness to orthodox belief rather than an indwelling presence in believers.

(h) The Epistle stands nearer to Gnosticism than the Gospel does.

Of these arguments Moffatt himself regards (f) as weak. It is difficult not to believe that some of the others are equally weak. Point (e) does not seem important, and W. F. Howard deals adequately with (d) and (g). (See also Schnackenburg's criticism [pp. 37f.] of Dodd's interpretation of 2:20, 27; 3:9.) In view of the identification of Christ with Life in Jn. 1:4 it is doubtful whether much importance can be attached to (c); there is a difference of expression, but hardly a basic theological difference. As for (b), this point is adequately accounted for by the need to stress the importance of true belief against the false teachers; the same reason, the exigencies of polemic, will also account for (h). (That the Epistle stands nearer to primitive Christianity in certain points, as C. K. Barrett holds, may well be due to the use of traditional material.) Finally, it may be questioned whether Moffatt's references for (a) really prove his point.

When this evidence is fairly considered, it does not seem sufficient to overthrow belief in common authorship. Rather, we are seeing the same mind at work in two different situations in the production of two different kinds of literary work. The Gospel is, at least in part, an apologetic to the non-Christian, designed to lead him to faith in the incarnate Son of God; the Epistles are pastoral tracts called forth by particular situations in the Church.

To some extent the author's development of thought may also have contributed to these differences, if, as many scholars hold, the Gospel was written before the Epistles. But this argument can be used only with great hesitation, since it seems impossible to determine the order of composition. Although the Gospel is logically prior to 1 John, this does not necessarily mean that it was written first. It may be that 1 John was composed during the long period of meditation that went into the composition of the Gospel.

To complete the picture, some attention must be paid to the relation of the book of Revelation to the other Johannine literature. There is no doubt that Revelation is closely related to both the Gospel and the Epistles by a wealth of common theological concepts which mark the five Johannine books as a distinct group. The theory of common authorship of all five books has found some powerful support (E. Lohmeyer, *Die Offenbarung des Johannes* [2nd ed. 1953], pp. 198f., 202f.; P. Feine and J. Behm, *Einl. in das NT* [10th ed. 1954]; W. Michaelis, *Einl. in das NT* [2nd ed. 1954]), but the very considerable linguistic peculiarities of Revelation are such that the consensus of opinion is strongly against attributing it to the author of the other four books. J. Moffatt (*op. cit.*, p. 481) held that 2 and 3 John and Revelation had a common author. In any case, some connection between all five books must be posited, and it should be remembered that the external evidence for the apostolic authorship of Revelation is strong. (*See* REVELATION, BOOK OF.)

IX. Authorship of the Epistles.–The problems discussed in the last section show that the question of authorship is an intricate one, and a full treatment of it would require attention to the Gospel. The particular contribution of the Epistles to the general problem of the Johannine literature is found in their references to the elder who is named as the author of 2 and 3 John. It is generally agreed that this term does not mean here simply an elderly man or an elder in a local church (Haenchen, however, thinks that a leader of a local church is meant, pp. 288f.). The author claims an authority that is more than local, and this indefinite range of authority seems to be reflected in the title. There may have been a quasi-technical use of the term for the apostles and for those who formed the link between them and the next generation.

Was this elder the apostle John? Light on this problem is often sought from a well-known passage from Papias (cited in Eusebius *HE* iii.39.4): "And if anyone chanced to come who had actually been a follower of the elders, I would inquire as to the discourses of the elders, what Andrew or what Peter said, or what Philip, or what Thomas or James, or what John or Matthew or any other of the Lord's disciples; and the things which Aristion and John the elder, disciples of the Lord, say."

Here Papias refers to certain of the disciples of the Lord, including John, under the name of "elders" in the past tense, which presumably signifies that they were dead, and then speaks of two living disciples, Aristion and John the elder. Eusebius adds the comment that clearly two Johns are to be distinguished, and for his part he regards the former as the Evangelist and the latter as the probable author of Revelation.

These statements have given rise to considerable and inconclusive discussion (see G. Bornkamm, *TDNT*, VI, 676-680; J. Munck, *HTR*, 52 [1959], 223-243). Some scholars have held that this "John the elder" was a disciple of the apostle and was the author of the Gospel and the Epistles (B. H. Streeter, *The Four Gospels* [4th ed. 1930], pp. 430-461). But this cannot be more than a hypothesis, for it is still not finally settled whether Papias refers to two Johns or mentions the same person twice (because he alone of the apostles remained alive), although the former view commands greater support than the latter. If the former view is accepted, it is to be noted that Papias says nothing about any links between John the elder and John the apostle. Again, we cannot be sure that Papias used the term "elder" in the same sense as in 2 and 3 John, but it should be noted that he could use the term of apostles, and in this connection Peter's reference to himself as a "fellow-elder" may not be irrelevant (1 Pet. 5:1).

The evidence of Papias thus allows the possibility that John the apostle was the elder of the Epistles, although this is difficult if there was another "John the elder" alongside him. Haenchen holds that the opposition of Diotrephes to the elder is inconceivable if directed against an apostle (pp. 268f.), but the evidence of opposition to Paul in Corinth and elsewhere may be regarded as weakening the force of this argument. We are thrown back upon the evidence concerning the authorship of the Gospel, and our conclusions about the Epistles must rest upon our conclusions about the Gospel. Despite frequent assertions to the contrary, sufficient evidence connects the apostle John with the Gospel, and two possibilities thus arise. Either John the apostle was the author of the Epistles (doubtless with the aid of an amanuensis), or else the author was a close disciple of his, writing in his own name but incorporating his master's teaching. The tendency of modern scholars has been to think of a Johannine "school" in which various pupils transmitted the spiritual heritage of the apostle (C. K. Barrett, *op. cit.*, pp. 51f.); in this way E. Stauffer can say that all the Johannine writings are to be ascribed to the apostle or his influence (*NT Theology*

JOHN, GOSPEL ACCORDING TO

[1955], pp. 39-43). In the present state of scholarship it is thus still possible to associate the Epistles with John the apostle, although it would be rash to assert dogmatically the precise relationship which he bears toward them.

  C. Theories of Sources
  D. The "School" of John
  E. The Place of Preaching
V. Date
VI. Relation to the Synoptists
VII. Historicity
VIII. Purpose

I. Characteristics.–John's Gospel differs markedly from the other three. Though they have their differences and each has a character of its own, Matthew, Mark, and Luke all give us recognizably the same picture (as the name "Synoptic" indicates). But John does not fit into their scheme of things even though his book is sufficiently like theirs to be included in the class of writings known as "Gospels."

It has often been pointed out that there is not much movement in John. He does not give us a picture of the development either of the teaching of Jesus or of the growth of the opposition. The Synoptists do not do this as fully or as clearly as modern scholars would like, but at least there are some indications of development. Thus Peter's confession at Caesarea Philippi is a significant turning point, Jesus' later predictions of the Passion mark an advance on His earlier teaching, etc. In John there are fewer indications of the way the history developed (though it would not be true to say that there is none; John does have his hints at the way the events unfolded). He prefers to concentrate on the significance of what happened and of what Jesus taught. It matters more to him to convey meaning than to give precise indications of how Jesus' teaching progressed and how the Jewish opposition to Him grew.

John begins with a prologue that is unlike anything in the Synoptics. There is dispute about whether John wrote it, or found it and incorporated it, and even whether it should be understood as prose or as poetry. There is a good deal of subjective reasoning in all such discussions. As it stands the prologue introduces in impressive fashion some of the great thoughts that will be developed as the story unfolds.

John has a short section on Christian beginnings (1:19-51) in which he tells us something of the witness of John the Baptist and of the call of Jesus' first disciples. Then he has a long section in which he deals with some of the things Jesus said and did during His public ministry (2:1–12:50). This includes accounts of seven miracles, which John calls "signs" (Gk. *sēmeía*), and seven discourses, i.e., discussions with individuals (Nicodemus, the woman at the well) and groups (in the synagogue at Capernaum or the temple in Jerusalem). He proceeds to tell what happened in the upper room on the night before the crucifixion (13:1–17:26). The Synoptists, of course, give information about this evening, but John's account is for the most part unparalleled. Though his account is clearly the most detailed, he has puzzled all subsequent generations by omitting anything about the Last Supper. He proceeds to a narrative of the crucifixion and resurrection (18:1–20:31), where his account has its distinctives, notably in giving a good deal of information about the Roman trial of Jesus and some beautiful resurrection stories. Chapter 21 is an epilogue, which some think was appended by the original author, others by someone else. All this adds up to a Gospel that has had a wide appeal to Christians throughout the world and throughout the centuries. It is perhaps the most influential book that has ever been written.

It is written very simply. Not uncommonly the beginner in Greek starts with this Gospel and finds it no great problem. In translation the humble and unlearned have always known how to listen to these words and they have testified that in them they have found their deep needs met. But at the same time the simple language is profound. This Gospel presents the scholar with some of the most difficult problems in NT study. Perhaps it is the combination of simplicity and profundity that makes it so great.

The discourses present a particular problem because there is nothing like them in the other Gospels. There Jesus teaches mostly by parables and aphorisms. It would not be true to say that either is completely lacking in John, but it is certainly the case that the overall impression left is quite different. It is possible that here we have an aspect of Jesus' teaching which the Synoptists have not recorded. After all, any great teacher has different styles for different audiences, and it is not easy to think that the mind of Jesus was such that it could not encompass the Johannine discourses as well as the Synoptic teaching. It also must be remembered that, while in all probability Jesus spoke in Aramaic, what He said is reported in Greek. The Evangelist has translated what Jesus said, so that the final choice of words is his and not that of the Master. This does not mean that he has not faithfully reproduced the teaching, for it is possible for a translator to be accurate. But it does mean that we must allow for John's preference for various idioms and expressions.

Some find a problem with the ideas rather than the language. Here we should notice that John has a good deal to say about a variety of topics which receive little attention in the Synoptics. Thus he tells us a good deal more than they do about the Holy Spirit, particularly in the farewell discourse. He has much to say about light and life and love, about abiding in Christ, about believing in Him, about the world. But especially important under this heading is what he has to say about the Son and about the Father. The person of the Son looms large for John, and indeed he states that he writes that his readers may believe that Jesus is the Christ, God's Son, and thus enter into life (20:31). It is integral to this Gospel that in Jesus we see God incarnate ("the Word was made flesh"), that it is only through Him that we know God as He is, and that it is in Jesus that God has worked out the salvation of mankind. John sees eternal life as closely bound up with the mission of Jesus and specifically as something accomplished by His death (3:16).

II. Authorship.–Throughout most of its history the Church accepted without question the view that this Gospel was written by John the apostle. This view has been

strongly criticized in modern times; indeed it has been abandoned and regarded as quite impossible by a great number of scholars. But there are still good grounds for accepting the traditional view.

The Gospel itself contains the claim that it was written by "the disciple whom Jesus loved" (21:20, 24). This attestation appears to be that of people who wished the facts of the case to be known. It seems impossible to hold that the author of the Gospel wrote this claim, but no known manuscripts omit it, so it appears to be contemporary with the original writing. An attestation as early as this by people who must have known the facts of the case must be regarded as weighty evidence. Some scholars hold that ch. 21 formed no part of the original Gospel and that the words refer only to this chapter. Whatever be the truth of the hypothesis that ch. 21 is an addition, it is preposterous to hold that there would be a solemn attestation of the authorship of this last chapter while the preceding chapters were left anonymous. There can be no doubt but that the words are intended to apply to the whole Gospel.

But the attestation does not reveal the identity of "the disciple whom Jesus loved." This expression appears in 13:23; 19:26; 20:2; 21:7, 20. He seems to be one of the unnamed disciples or one of the sons of Zebedee (21:2). He is close to Peter (13:24; 20:2; 21:7), which makes us think of the frequent linking of Peter, James, and John and of their being especially close to Jesus in the Synoptics. But James was martyred quite early (Acts 12:2), which leaves John. It is objected that it would be strange for a man to call himself "the disciple whom Jesus loved." But it would also be strange to use the title of someone else. It might conceivably be used by John in modesty. On this view, he does not even mention his own name but uses an oblique form of speech which emphasizes that he owes everything to the love of Jesus.

We should not pass over the curious fact that in this Gospel John and his brother James are never mentioned. The Synoptists make it clear that they were prominent in the apostolic band. We can understand John omitting reference to himself and his brother, but why should anyone else do this? With that we should notice the fact that the author habitually speaks of John the Baptist simply as John, though he takes care to differentiate people in other cases, e.g., Judas Iscariot in 12:4, Judas not Iscariot in 14:22. To refer to the Baptist in this way is natural if the writer himself was called John, but it would have been very confusing for anyone else.

This is not conclusive proof but it is the most natural way of taking the evidence, and it can be supported. As we shall see later, there is good reason for seeing in the author a Jew, more specifically a Jew of Palestine. He gives evidence of Jewish thinking and interests and he is at home in the customs and topography of Palestine. He is such a person as we would expect John to be.

Those who uphold the traditional authorship usually draw attention to indications that the writer was an eyewitness of the things of which he writes. Such touches are found throughout the Gospel; as an example notice the lively story of the giving of sight to the man born blind in Jn. 9 (cf. Morris, *Studies in the Fourth Gospel,* pp. 139-215). Unfortunately this kind of thing comes short of definitive proof. What seems to one set of critics nothing less than clear indication of an eyewitness seems to another nothing more than evidence of the author's power as a dramatist, little touches inserted to give the appearance of verisimilitude. They must be noted, for they are part of the evidence, but their force as proof must be qualified.

The controversies in this Gospel should be noted, for they are the kind of disputes that went on in Jesus' lifetime; they are not the sort of thing in which the later Church found itself involved. Thus there are disputes about the Messiah, when and where he would come, and what he would do. There are discussions about the manna, the right use of the sabbath, the importance of relationship to Abraham, true and false Judaism. There are no discussions of the Church as a body separate from Judaism, the place of bishops, the correct date for the observance of Easter, the existence of the aeons that meant so much to the Gnostics. The topics of the Gospel are those of Jesus' day and accord with authorship by someone who was there at the time and knew what happened. They do not accord with what we expect from someone from a later period and a different area who was simply concerned to produce a theological treatment of topics that would help the church of his day.

But there are some weighty arguments against Johannine authorship. It is pointed out that whereas John the son of Zebedee was a Galilean, this Gospel is concerned for the most part with happenings in and around Jerusalem. It may be countered that the author's theological interest dictated his choice of topics and that the question of messiahship had to be settled in Jerusalem. A further objection is that this Gospel omits some striking incidents at which we know from the Synoptists that John was present, e.g., the Transfiguration and the agony in Gethsemane. We might indeed have expected John to notice these, but we have to accept the fact that every author makes his own selection and these may not have appeared to John in quite the same light as they do to us. The story of the Transfiguration concentrates the glory into one story, but John sees it as pervasive. The whole incarnate life of Jesus shows God's glory, and the writer may well have felt it difficult to include a story which seems to concentrate it in one spot.

Similarly it has been pointed out that the whole Gospel shows Jesus' lowliness and dependence on God (the paradoxical combination of glory and lowliness is one of the features of John's portrait of Jesus). This is suggested as a reason for the omission of the story of Gethsemane. C. H. Dodd suggests that the omission is from motives of reverence, a veil being drawn over this intimate experience. In any case we must bear in mind that there are some extraordinary omissions from this Gospel. No one seems ever to have given a satisfactory reason for the absence of any account of the institution of the Lord's Supper. John has none of the great parables that are such a feature of Synoptic teaching, nor has he any equivalent of the Sermon on the Mount. In the light of these and other omissions we cannot say that he must include the Transfiguration or the agony of Gethsemane. He wrote what he wished to write and these omissions are no real indication that the son of Zebedee was not the author.

The biggest objections to apostolic authorship seem to be other than these. One is the difference from the Synoptists. If the Synoptic Gospels give us a reliable picture of Jesus, it is argued, then John's picture, which is so different, cannot be accurate and thus it cannot have been drawn by John the apostle. Here everything depends on what one thinks of the nature of the differences between the two portraits. If they are incompatible, then Johannine authorship is excluded. If Jesus was a large enough figure to inspire the two portraits, then the objection is not valid.

The other argument which convinces many scholars is that this Gospel gives every indication of being indebted to Gnosticism. This rules out the son of Zebedee on two counts: the Gospel is probably too late for him to have written it, and the ideas are not those of an early Palestin-

ian but of a Hellenist of quite different outlook from that of the Galilean fisherman. If the premise be granted the objection is a strong one. But as we shall see in a later section, there are strong objections to seeing Gnosticism behind this Gospel. It seems that the objection is based on a too limited view of the range of thought available in first-century Palestine, to say nothing of the originality of Our Lord.

When we turn to external evidence, the Gospel is ascribed to John by Theophilus of Antioch (*ca.* A.D. 180), then by Irenaeus (*Adv. haer.* iii.11.1f.), and it seems by all others. There were objections by a few like the Alogi who appear to have disliked the doctrine of the Logos and accordingly ascribed the Gospel to the heretic Cerinthus. But there is no evidence that such views were ever held by other than a tiny group of dissenters (some think by only one dissenter, a certain Gaius). The tradition really knows of one name only, John son of Zebedee. It is worth adding that the Gospel was popular among the Gnostics when in due time they appeared. That the Church accepted it despite these heretical associations seems to show that it was known to come from the apostle. It could not be rejected, even though the heretics found it so congenial.

Probably there will never be full agreement about authorship. But where absolute certainty is unattainable we must choose on the basis of the probabilities. In this case the evidence is much more in favor of John the apostle than against him, and there is no other candidate with even a show of probability. We should accordingly accept John as the author.

III. Background.–For a long time the affinities of the Gospel with Greek thought were stressed and it could be described as "the Gospel of the Hellenists." More recently the Jewish affinities of the writing have received emphasis. But the Greek idea received a new impetus with the publication of R. Bultmann's comm. in 1941. Bultmann interpreted the Gospel in terms of the Gnostic redeemer myth. He discerned a signs source (the miracles), a discourse source (which he thought derived from non-Christian Gnosticism), and a Passion narrative. Some smaller units, such as the cleansing of the temple, were combined with these three by the Evangelist, who added his own contributions. Bultmann thought the manuscript somehow got into disorder and that a redactor rearranged it, putting in some comments of his own. This is a complicated analysis and it has not won very wide acceptance, but the thesis that at least part of the Gospel comes from Gnosticism has been looked on with favor by some scholars. Another way of seeing Gnosticism is to view the portrait of Jesus as an expression of "naive Docetism" as E. Käsemann holds (*Testament of Jesus* [Eng. tr. 1968], p. 70). Many scholars who reject the positions of Bultmann and Käsemann still find something Gnostic about John's language. They hold that many of John's ideas scarcely find a place within Palestinian Judaism and are convinced that we must see this Gospel against a Gnostic background. Whether or not John himself was a Gnostic, they think that he was using Gnostic tools.

The first objection to seeing Gnosticism behind this Gospel is that all the known Gnosticism is too late. Despite the confident assertions of some, there is as yet no evidence that Gnosticism was in existence early enough to be an influence on the NT (Yamauchi, pp. 184-86). Gnosticism was a system that gathered ideas from many sources as well as contributing its own, but it is the gathering of the sources into one system and not their existence separately that constitutes Gnosticism. Some of the ideas were early but that does not mean that Gnosticism was equally early. Characteristic Gnostic ideas are absent from John. He knows nothing of the idea that matter is evil. Nor does he have the concept of the *Demiourgos*, the being whom the Gnostics postulated as the creator of this evil material universe (which the Gnostics held the high good God would not have done). He makes no mention of the aeons or of many other important Gnostic concepts. Again, none of the known Gnosticism is early enough for John to have derived his portrait of the redeemer from it. Rather, Gnosticism seems to have taken the Christian picture of Jesus and combined it with features derived from other sources to make its redeemers. Bultmann puts emphasis on Mandaism, a specific form of Gnosticism, but Mandaism cannot be proved to have existed before Christianity, and some even doubt that its Gnosticism was there from its beginning. Some scholars hold that it was at first a baptist movement which somewhere along the way picked up some Gnostic ideas. This whole area is nothing but confusion and speculation. We cannot find a firm basis for the Gospel anywhere in Gnosticism as it is known to us. Indeed a quite fundamental divergence must be kept in mind. Where he is found the Gnostic redeemer is essentially a revealer: he brings mankind knowledge. But in John the Savior is more than a revealer. In John the Redeemer brings mankind salvation: He is the Lamb of God who takes away the sins of the world.

Gnosticism then can scarcely be held to be the milieu out of which this Gospel sprang. We have glanced at the idea that it might be from Hellenism, and such ideas have been put forward from time to time. But again, not too much can be made of this. Obviously a writing in Greek, probably published in a center of Greek culture, must have some Greek ideas in it. But it is not this that is characteristic of the Fourth Gospel. There can be found coincidences of language or thought with Philo or other Greek writers, but that is about as far as we can go. C. H. Dodd gave considerable attention to this aspect of the Fourth Gospel and noted affinities with the Hermetic literature, with Philo, and with other Greek writers. But not many have been persuaded that John should rightly be seen as a representative of this kind of writing, and even Dodd recognizes a Semitic basis.

There is considerable agreement that this Gospel must be seen as essentially Semitic. Some have held that it was written in Aramaic (C. F. Burney, *Aramaic Origin of the Fourth Gospel* [1922]; C. C. Torrey, *Our Translated Gospels* [n.d.]), but this has not convinced most scholars. More influential is the position of M. Black, who holds that there is Aramaic thinking behind a Gospel written in Greek (cf. *Aramaic Approach to the Gospels and Acts* [3rd ed. 1967]). W. G. Kümmel (*Intro. to the NT* [Eng. tr., rev. ed. 1975], p. 217) holds that either this must be the case or the author is from a bilingual environment. The Aramaic element is to be discerned especially in the sayings of Jesus.

This Gospel shows an accurate knowledge of Jewish customs. There are more references to the Jewish feasts than in any other Gospel, and clearly the writer is familiar with the Jewish liturgical year. He knows about Jewish purification rites (2:6), the inferior status of women (4:27), the sabbath regulations (5:10; 7:22f.), and much more of the same kind. He is aware of the time spent on building the temple (2:20). He knows the attitude of the Jews to the Samaritans (4:9).

The discoveries at Qumrân have given us a great deal of new information about Judaism in the time of Jesus (*see* DEAD SEA SCROLLS). One of the more unexpected results of the study of these documents is that they have more links with John than with any other writing in the NT. There are similarities in language and sometimes

similarities in thought. Interestingly, quite often where the language is similar the ideas are different. Thus John speaks of "doing" the truth (Jn. 3:21), as does the Manual of Discipline (1QS 1:5; 8:2). But in John truth is connected with the person of Jesus who is the truth (14:6), whereas the covenanters connect it with keeping the law (for them Hab. 2:4 means "the men of truth, the doers of the law"). The fundamental difference is that for the people of Qumrân the wonderful days of the Messiah lie in the future, whereas for John the Messiah has come. But this does not prevent them from using a good deal of the same language and thought forms. The Scrolls help us to see that this Gospel is properly to be located in Palestine.

So does its accurate topography. John mentions a number of places, some of which, such as Cana, are not mentioned in any previous writing known to us. He has convinced experts like W. F. Albright ("Recent Discoveries in Palestine and the Gospel of St. John," in W. D. Davies and D. Daube, eds., *Background of the NT and Its Eschatology* [1964], pp. 153-171) and R. D. Potter (*SE*, I [1959], 329-337) of his accuracy. It cannot be shown that he has wrongly located any place he mentions. This would be almost impossible for a writer who did not know Palestine, particularly if, as many who object to the Johannine authorship hold, he was writing many years after the destruction of Jerusalem (when many landmarks were significantly affected).

A minor point is that John never refers to "the Gentiles," *tá éthnē*. When he uses the word *éthnos* he means the nation, i.e., the Jewish nation. He writes from the standpoint of someone within Judaism and does not reproduce the idea found elsewhere in the NT that the Jews' rejection of Jesus is followed by the Gentiles' acceptance of Him. There must have been effective Christian work among the Gentiles at the time John wrote. His interest, however, is not there but in the way Jesus came to Israel.

More important is the way the Gospel constantly reflects Judaism of the time of Jesus and not the environment of the Church at the time it was written. As we noted in the section on authorship, the controversies are not those of the second-century church but those of Palestine in the time of Jesus. How could a late, non-Palestinian writing so faithfully reflect conditions in the time and place of which it tells?

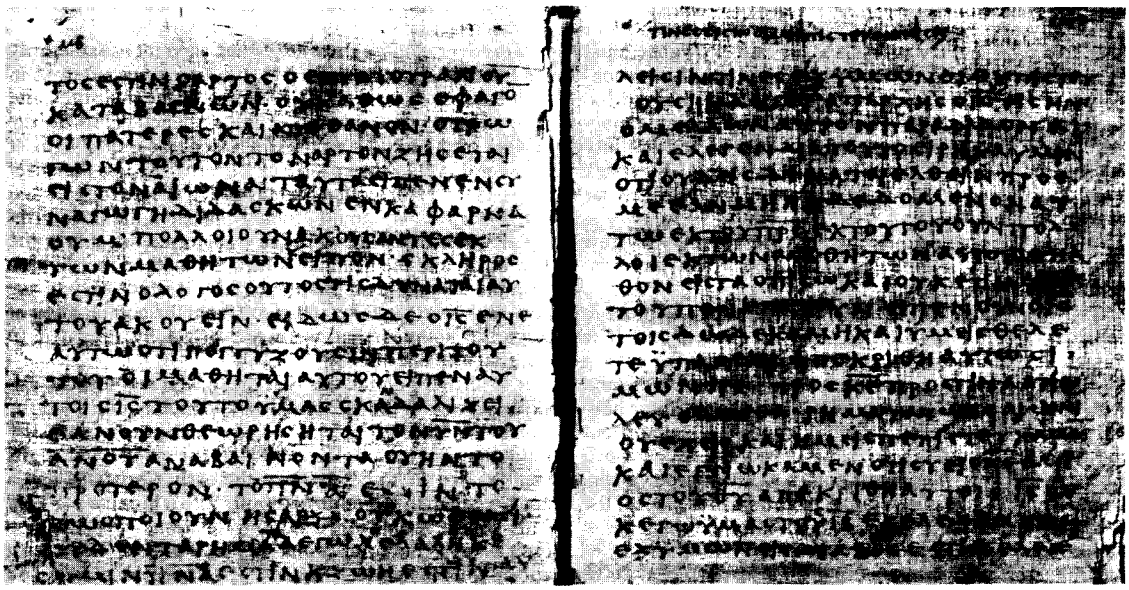
For these and other reasons most scholars are now convinced that the Fourth Gospel must be understood against an early Palestinian background. Whoever wrote it and whenever he wrote it, he had good and accurate knowledge of conditions in Palestine in Jesus' day.

IV. Method of Composition.–How was this Gospel written? Without actually saying so, most seem to have assumed that a writer sat down and wrote the book as it is, or dictated it to someone who did the scribal work for him. But some phenomena make such views difficult and to them we must turn our attention. In the process some of the important problems in Johannine studies will come under our notice.

A. The Aporiai. This Greek term refers to the "perplexities" which crop up in a close examination of this Gospel. Thus Jesus did "signs" in Jerusalem (2:23) but later we read of his having done his "second sign" (4:54). John the Baptist pointed Jesus out to his followers and told them who He was (1:29-34), but at a later time they do not know this (3:26-30). At the end of ch. 5 Jesus is in Jerusalem, but in 6:1 He went to the other side of the Sea of Galilee. Peter asks Jesus where He is going (13:36; cf. 14:5), but subsequently Jesus says that nobody has asked Him this (16:5). The Gospel appears to end at 20:31, but then comes another chapter. Quite a few such points can be adduced. Perhaps none of them is very serious, but they do raise questions. Why would anyone write a manuscript like this? A variety of answers has been given.

B. Theories of Dislocation. A view which has often been put forward is that the leaves of the manuscript were somehow disarranged and whoever put them together did so in the wrong order. It is felt by many that ch. 5 should follow ch. 6, this being a typical case of disruption of the natural order. As already noted, ch. 6 begins with Jesus going to the other side of the Sea of Galilee; this event follows strangely on ch. 5 where He is in Jerusalem. But it would follow ch. 4 quite naturally, for this ends with Jesus healing a boy in Galilee. There would be a better sequence

Text of Jn. 6:59-70 from the Bodmer Papyrus II (p^{66}), the oldest (2nd cent. A.D.) considerable portion of John's Gospel now extant (Bodmer Library, Geneva)



JOHN, GOSPEL ACCORDING TO

also with ch. 7, which begins, "After these things Jesus was walking in Galilee; for he would not walk in Judea because the Jews were trying to kill him." This would follow more naturally on ch. 5 which has Him in Jerusalem than on ch. 6 where He is in Galilee. The Passover is said to be near in 6:4, and a feast, which might be the Passover, is present in 5:1. All this adds up to such a strong case that many are convinced by it.

But there are objections. There is no manuscript evidence for any order other than the one we have. To many it seems that the teaching on the divine Son in ch. 5 is the necessary basis for that on Jesus as the bread of life in ch. 6. The conflict in ch. 5 would quite naturally be followed by a move to Galilee. To some students the crisis point at 6:67 comes too early if it is before ch. 5.

Thus there are some considerable objections to this transposition, and we should bear in mind that this is probably the most plausible of all the transpositions that have been suggested. In the case of the others, as of this, good reasons may be urged against, as well as for, the suggested rearrangement.

Even if the rearrangements were accepted as on the whole giving better sequences, we would be faced with the problem of how the disruption came about. We would have to assume that the original of this Gospel was written in codex form rather than on a roll, and this is far from certain. And we have no reason for thinking that John would wish to use this form instead of the time-honored scroll. Granted that the leaves of a codex somehow became scattered, there are further problems. We must immediately ask whether we at this distance in time can arrive at the original order better than the first-century Christian who actually had the pieces in his hands. He must have seen the difficulties in the present order just as clearly as we do. The hypothesis moreover demands that all the pages out of order should conveniently begin and end with complete sentences. The chances are that at least some of the breaks would be in the middle of sentences and then there would be grammatical problems.

Some have tried to give a note of objectivity to the dislocation theory by calculating the lengths of the displaced sheets. Bernard thinks of each leaf (two pages) as having about 750 letters (thirty-four lines each of eleven letters). He tries to show that each of his major dislocations consists of multiples of this length. But the objectivity is only apparent. Scribes varied in their numbers of lines to a page and of letters to a line and allowance must be made for variation. When Bernard has one section consisting of 598 letters we must feel that he has strayed too far from his average. If variations of this magnitude must be allowed, then almost any length could be brought into the scheme and the objectivity vanishes. Again, if a codex were disarranged there would be units of two leaves (four pages), not single leaves.

All in all the objections are formidable and very few now accept this hypothesis. The theory has more ingenuity than probability.

C. Theories of Sources. There is a greater readiness to consider theories of sources than of dislocations. The thought is that the *aporiai* may be explained by the putting together of sections taken from a variety of sources (and with some editorial assistance) without the redactor having gone over the result carefully enough to smooth out the resulting rough places. We have already noticed Bultmann's view that there was a signs source, a discourse source, a Passion source, some smaller pieces, the contributions of the Evangelist, and, after the manuscript had in some unexplained fashion fallen into disorder, of the redactor who produced the final order. Few have completely agreed with Bultmann, but the signs source has appealed to many. The references to the first and second signs (2:11; 4:54) and to the many signs from which a selection has been made (20:30) seem to many to point irresistibly to a collection of miracle stories. They suggest that the Evangelist has made use of such a collection and has incorporated parts or all of it without bothering to correct the first two numerical references (though he has apparently tidied up the later ones). The reference to the many signs (20:30) is said to follow oddly on the Passion story (which is not called a "sign") while it would be the natural conclusion to a book consisting only of signs.

If there is a signs source the discourses are naturally taken together as evidence of another source. Most who work with the sources hypothesis think of the Passion narrative as a third main source, though some attach it to the signs source. There is always something left over, and this is ascribed to the redactor.

It must be agreed that such hypotheses would give an explanation of the unevennesses of the narrative as we have it. But before we can accept any such view we must reflect that a first-century author might not be as interested in producing a smooth-flowing writing as we are. He may have felt that his object would be attained without sifting carefully through what he had written to remove anything that would offend such susceptibilities as ours. In other words we must ask ourselves whether we are justified in looking for our modern standards of consistency in a first-century writer.

There are other objections. Probably the greatest difficulty in the way of all hypotheses of sources is the uniformity of style that marks this Gospel. From start to finish it is written in the same style, as a number of detailed examinations have shown. Some scholars have attempted to dispute this, drawing attention to grammatical minutiae and the localized presence of certain ideas, but they have not convinced very many. The unity of style remains an impressive fact. And, despite Bultmannn, most agree that the discourses show every sign of having been written by the Evangelist, not incorporated into his Gospel by someone who came across them. It is improbable that anyone who could write this kind of prose would simply take some other source, be it the "signs" or anything else, and add it to what he has composed. In any case the postulated signs source has many of the same characteristics as the discourses.

Moreover, source theories do not account satisfactorily for the fact that the signs and the discourses often fit in with each other so well. The feeding of the multitude and the discourse on the bread of life go together, as do the healing of the blind man and the discourse on the light of the world, while the raising of Lazarus fits the theme of Jesus as the resurrection and the life, a theme found often in the Gospel. We should probably also link the transforming of water into wine with the transformation that is the new birth, and the healing of the lame man on the sabbath with the discourse on the divine Son. It is not easy to see how such relatedness could result from the combination of disparate sources that were not originally intended to dovetail into one another.

It is further pointed out that those who see sources ask us to believe in the existence of documents of a kind for which we have no evidence and which are intrinsically unlikely. For example, consider the suggested signs source. Are we to believe that the early Christians had a source which in effect turned Jesus into a miracle worker? This source would have nothing of Jesus' teaching, no eschatology, no predictions of the Passion, no use of apocalyptic language. We know of no such document, and

from what we do know of early Christian literature it seems most unlikely.

Some prefer to think of a series of editions. Thus it has been suggested that the author produced first a Gospel in which he outlined Jesus' ministry in Judea and later supplemented this with a Galilean edition. Others see him as writing first a narrative of Jesus' words and deeds and adding to that a Passion narrative. Or again it is possible that John took certain incidents and made a Gospel out of them, later adding other incidents without sufficiently smooth transitions.

R. E. Brown has enunciated a hypothesis with which many would be in substantial agreement. He sees five stages, beginning with a pool of traditional matter not dissimilar to what we see in the Synoptic tradition, but quite independent of it. Then came the preaching of the Evangelist and others (Brown thinks of some sections like Jn. 9 as being developed into "superb dramas" in this process). The third stage is the writing of a Gospel out of this matter, and the fourth a reediting of it (possibly a number of times). The final stage he sees as coming after the Evangelist's death when a redactor produced the Gospel we now have. Such views are not easy to refute, but it must be recognized that there is a good deal of speculative material here. And it is hard to see why the product of all this should be attributed to the apostle John. There have been many hands in it and the final shape is not in any way his, the hypothesis being that he was dead when it was produced. While this view takes account of some of the phenomena it overlooks others.

D. The "School" of John. Since the hypotheses of sources and editions are fraught with so much difficulty it seems better to look for some other solution to the problem of the *aporiai.* Many find it in the hypothesis of a Johannine "school," which would also account for the three epistles and the apocalypse associated with the name of John. Most agree that it is not easy to see how the same man could have written both the Gospel and the book of Revelation. There is more of a problem with the epistles. Here opinion is divided, with many holding that they must be ascribed to a writer (or writers) other than the author of the Gospel and others seeing enough evidence to support the traditional view that they come from the same pen. Those who see divergent authorship agree that there are links between all these writings, some linguistic and some conceptual. Add the persistent association of the name of John with these writings and the tradition that the apostle John lived to a great age and the scene is set for the hypothesis of a school. The idea now is that the apostle John had his own way of stating the Christian faith. He gathered disciples around him as he taught, and these in due time gave expression to much the same kind of thinking as that which characterizes the apostle. Their discussions enabled them to exchange ideas, and when in due course they began to write there turned out to be quite strong links among their writings. And in the Gospel are contributions from different members of the school that help account for the awkwardnesses.

Sometimes attention is drawn to the quotation by Eusebius of some words of Papias which have been taken to show that there was another John, who is usually referred to as "John the Presbyter" (*HE* iii.39.6). This is supported by a report Eusebius quotes from Dionysius that "it is said" there were two tombs in Ephesus, each bearing the name John. This is a very slender foundation on which to erect a hypothesis, but some hold that John the Presbyter existed and that he wrote the Gospel. They contend that confusion of the names caused the Church to ascribe it to the apostle. Despite the great names that have espoused this thesis it is difficult to see how it can stand. It is quite possible to take Papias's words as referring to only one John, John the apostle. The very existence of John the Presbyter is far from having been established. If he did exist there is no reason for linking him with the Gospel. There is no evidence that he wrote anything, let alone that he was of such a caliber as to be able to produce a writing like our Gospel. If the later Church could have been confused about apostles and elders it is equally possible for Papias, and if he was the one who was confused the theory has no basis.

The hypothesis of a school is difficult to refute, but it is also difficult to establish. The only evidence for it is the Johannine writings themselves, and for centuries the Church has managed to live with these documents without demanding a school to account for them. Other explanations are possible and throughout most of the history of the Church have been accepted without question. Further, there are great difficulties in the way of the school hypothesis. To take but one, what has happened to the apostle? It is a well-known fact, as noted in II above, that John the son of Zebedee is never mentioned in the Fourth Gospel. In this writing people of a similar name are usually distinguished, as when Judas is qualified by "Iscariot" (12:4) or "not Iscariot" (14:22), or when Thomas is described as "the Twin" (*dídymos,* 11:16), an epithet not found in the other Gospels. But in this Gospel the Baptist is habitually referred to only as "John" while John the son of Zebedee, whom we know from the other Gospels to have been a prominent figure in the apostolic circle, is never mentioned. But the school hypothesis asks us to believe that the revered founder of the school, the one to whose inspiration the school owed its very existence, the man who in the opinion of the school had the most significant insights into the Christian way, could be totally overlooked in the writing of a Gospel.

E. The Place of Preaching. Many students of this Gospel find indications of preaching behind it, as in the view of Brown noted earlier. There was obviously a good deal of preaching in the early Church. All the indications are that it was the most usual way of conveying the message of the Christian faith to the world outside (cf. Rom. 10:14). Unfortunately we know little about the mechanics of sermon preparation and the like in the early Church, though Acts does give accounts of some of the sermons preached by the first Christians. But there seems no reason why some sermons or at least sermon summaries might not have been written down.

Luke tells us that "many" had in fact written accounts of what had been fulfilled among the Christians (Lk. 1:1), and this should be taken seriously. Clearly much that the early Church wrote has perished. It is not unlikely that much of this material expressed "the gospel." It is worth bearing in mind that the canonical Gospels are not Mark's Gospel or Matthew's Gospel and so on. They are the gospel further described as according to Mark or Luke or one of the others. There was only one "gospel," though it might be given written form by more than one person.

What I am suggesting is that the apostle John, like other early Christians, preached the gospel. He may have written down some of the "gospel" he preached and made it available to other people. Like every preacher, he would have used some sermons more often than others (which may account for those phenomena that cause some students to discern much rehandling of the material in some sections of this Gospel). In due course he worked up some of the signs and discourses and other material which seemed to him important and thus produced a fuller account of the "gospel." In some such way he made the

writing that has meant so much throughout the history of the Church. I do not mean that the Gospel is a record of his sermons and not of what Jesus said and did. That does not follow. Indeed, some scholars have held that the apostle may have made notes on Jesus' addresses not long after he heard them (e.g., D. Guthrie, *NT Intro.* [3rd ed. 1970], p. 286). I do not think the evidence for this is strong, though the theory is not improbable. If this was in fact the case, it would be quite in accordance with the above view for John to have included such notes in his Gospel. He must often have preached about what Jesus said and did, and the Gospel probably echoes some of his sermon material.

If there is enough evidence to justify this theory, we may allow for some intermediate composition, using only part of the material in the Gospel as some have held. But the main contention here is that most of the phenomena which puzzle us about the Fourth Gospel can be satisfactorily accounted for if we bear in mind that the apostle preached before he wrote. The *aporiai* are then evidence not that many sources or divergent writers were behind this Gospel but rather that the records of the apostle's preaching were put together in such a way that all difficulties were not smoothed out. Even if we date the Gospel in the 60's we must allow for thirty or so years of preaching, and it seems that this is quite long enough to account for what we have. At any rate, the idea that the apostle preached a good deal and wrote his Gospel out of his experience as a preacher seems to have much more to be said for it than views of sources or editions and redactors.

V. Date.–Traditionally this Gospel has been seen as the latest of the four. This has been accepted by liberal and conservative alike, and few have been found to date it earlier than the last decade of the 1st century. Some of course put it into the 2nd cent., but there has been a most unusual measure of agreement on the 90's or shortly thereafter. The conservatives thought John wrote to supplement the Synoptics, and the liberals thought that his concern was to correct them. But common to both has been the thought that he wrote last.

In recent years, however, it has been emphasized that the evidence for dependence on the Synoptists is thin. Since 1938 when P. Gardner-Smith's book *Saint John and the Synoptic Gospels* appeared, scholars have increasingly tended to see John as independent of the Synoptics. It is remarkable, if he knew them, that he has omitted so much that they contain and that he has worded what he has in just the way he has. On this last point, e.g., he records the Baptist as denying that he was Elijah (1:21), whereas in Mt. 11:14; 17:11-13; Mk. 9:11-13 Jesus said that he was that prophet. If John knew Matthew or Mark, it is difficult to think he would have left his statement quite as it is without showing how it relates to the other. It would have taken only a few words to show in what sense John was Elijah or in what sense he was not. But if this kind of thing shows that John is independent of the Synoptics the question of date is again raised. Perhaps the reason he does not refer to them is that he had not seen them, and perhaps the reason he had not seen them is that he wrote too early. At least the possibility must be considered.

It is worth noticing that there are several early locutions in John. Thus he does not speak of "apostles" but "disciples," and he often uses the expression "his disciples" rather than "the disciples." At a later time the Christians had no doubt as to whose disciples they were, but in the earlier period it was recognized that many rabbis had disciples. There had to be some way of differentiating Jesus' disciples from those of other teachers. Again the use of the present tense for the existence of the pool in Jn. 5:2 is most naturally taken as indicating that the pool was still in existence, i.e., it points to a date before A.D. 70. The affinities with Qumrân are also important, for the monastery was destroyed in the war of A.D. 66-70, so that contacts must be earlier. Such considerations fall short of proof but they indicate that a date in the 60's accounts for more of the phenomena than one in the 90's. Some would go further. F. Lamar Cribbs has assembled a mass of evidence to back up his contention that the date should be seen as in the late 50's or early 60's (*JBL*, 89 [1970], 38-55; see also J. A. T. Robinson, *Redating the NT* [1976], pp. 254-311). All in all it seems that we should accept a date in the 60's.

VI. Relation to the Synoptists.–As already noticed, until recently it has been almost universally accepted that John wrote with the Synoptists either before him or in his mind. Some have held that he wished to fill out what they had to say with other matter in his possession; others saw him as trying to replace them or correct them. There have been doubts about the extent of his acquaintance with the Synoptists, but a common position is that of C. K. Barrett who thinks that John made use of Mark and possibly Luke, though his use of Matthew is much more problematic (Barrett does not think that any of these Gospels necessarily lay before John as he wrote; rather he had read Mark and been influenced by its contents and so probably with Luke).

Barrett's case rests heavily on the order in which certain key passages occur, for he feels that since John has the same order as Mark in ten incidents it is very likely that he knew Mark. But the order seems largely determined by the events themselves. The ministry of John the Baptist had to come first, and Jesus' departure for Galilee must follow that. The feeding of the multitude, which took place in Galilee, must come later than the departure for that region. Barrett next cites the walking on the lake, and this is the kind of sequence that would prove his point if there were enough examples. He goes on to Peter's confession, but it seems that Mk. 8:29 does not refer to the same incident as Jn. 6:68f. Jesus' departure for Jerusalem had to follow the Galilean ministry, and the entry to Jerusalem could scarcely come anywhere else in the sequence. Actually Barrett here links two events, the anointing and the entry, but has to note that they are in the reverse order in the two Gospels, so this is not very convincing. The Last Supper, arrest, Passion, and Resurrection follow, and there is nothing remarkable in their being in the same order in the two Gospels. Thus this argument is not a strong one. Nor is the argument from linguistic dependence, despite some interesting resemblances. Barrett lists twelve passages, which usually do not agree very closely; in any case Mark has about 12,000 words, so this is not a very convincing demonstration.

The case for dependence on Luke is, of course, less impressive and that for Matthew less still. It seems that there are no strong arguments for holding that John made use of any of the Synoptic Gospels, and there are some considerations on the other side. The bulk of the Fourth Gospel finds no parallel in the other three and even those incidents which are common to John and one or more of the others are treated so differently that it is difficult to postulate dependence. For example, both have a cleansing of the temple. But in John it comes at the beginning of Jesus' ministry and in the others at the end. When the accounts are compared closely it becomes evident that the two are as different as they could be and still speak of a temple cleansing. The common language is the barest minimum (there are really only five significant words in common, and without them it would be very difficult to

JOHN, GOSPEL ACCORDING TO

tell a story of temple cleansing at all). John's references to the sheep and oxen and to the scourge of cords are not paralleled, nor his word for "money-changers" (Gk. *kermatistēs*), nor his reference to the pouring out of money, nor the command "Take these things away." Contrariwise the Synoptists mention a command not to carry anything through the temple, a command John does not have. The Scripture passages cited are different in the two (Isa. 56:7; Jer. 7:11 in the Synoptists, and Ps. 69:9 [MT 10] in John). In the Synoptists objection is made to the dishonesty practiced (cf. "den of thieves"); in John it is to the practice in itself ("do not make my Father's house a shop"). This will be found typical. Most incidents in the Fourth Gospel differ from those in the Synoptics, and even where it is said there are links close examination usually reduces them to negligible proportions.

It seems that such resemblances are better explained in ways other than literary dependence. There can be no doubt that much of the story in the Gospels was carried on in oral tradition for quite some time, and there is no reason why John and the Synoptists should not have received stories in this way with similar wording. This point has its importance, for we should not think of any of the Gospels as descending on an astonished Church like lightning striking from the sky. The Church knew stories of Jesus, and told and retold them. The Gospels doubtless set out more than most early Christians would know, but it was essentially what the Church as a whole knew that found its place in these books.

This common knowledge has a further consequence. I have been arguing that the Fourth Gospel is independent of the Synoptists. But this does not mean that they are talking about something different. It is the same Jesus who is behind all four. The stories they tell are not the same stories but they are not in contradiction. In fact one can go further and assert that we need all four to get the complete picture. Again and again John can be shown to be necessary if we are properly to understand what the Synoptists wrote. For example, the Synoptists refer to a Galilean ministry that might be estimated to have lasted a year or less. Then Jesus went up to Jerusalem and was killed by the authorities in less than a week. This is all very astonishing. It is not so surprising when we learn from John that the ministry lasted three years or so, that during this period Jesus was in Jerusalem from time to time, and that on these visits He came into conflict with the religious leaders. This enables us also to make sense of Synoptic statements like "Day after day I was with you in the temple" (Mk. 14:49); "How often would I have gathered your children together" (Mt. 23:37).

All the Synoptists tell us that Peter was in the high priest's courtyard at the time of the denials. How did he get there? It is John who tells us that there was a disciple who was known to the high priest and who secured Peter's entrance. And at Jesus' trial people claimed that Jesus had said that He would destroy the temple and build it again in three days (Mt. 26:60f.; Mk. 14:58). Mockers said the same at Calvary (Mt. 27:39f.; Mk. 15:29) and the charge did not die, for Stephen's accusers said something of the sort (Acts 6:14). These people did not get the saying right (Mk. 14:59), but clearly Jesus said something that they were trying to reproduce. Once more we cannot find it in the Synoptists but John records it (Jn. 2:19). It is in an enigmatic form, and it is not surprising that the false witnesses did not agree when they tried to recall it.

Much more could be written along this line. The Johannine narrative interlocks with that of the Synoptists. The differences are such that it is more than difficult to think that the one was written in the light of a knowledge of the other. But there is no conflict. The two illuminate one another and help us get the complete picture.

VII. Historicity.–The great difference between the Synoptists on the one hand and John on the other, together with the evident concern of the fourth Evangelist with theology, has led many scholars to conclude that John is not very interested in historical accuracy. The thought is that he is trying to convey great theological truths rather than history. These scholars think that when John felt the Spirit of God was leading him to affirm some spiritual truth he expressed his certainty that this was what the teaching of Jesus meant by saying that Jesus said it. There is no conscious attempt to deceive but a way of stating things different from the way that we would naturally accept today. The Gospel of John is seen as something like the parables of Jesus rather than as a historical narrative. John's history is taken as very incidental: the Evangelist may have included some correct historical matter from time to time but this was not his aim. His aim was to teach theological truth; thus some scholars will refuse to accept any historical detail in John unless it is confirmed from some other source.

Now it is obvious that this Gospel has a profound interest in theology. That is an important part of its value to generations of Christians. But that does not mean that its history can be taken lightly. In fact, in this matter it does not differ significantly from the other Gospels. Redaction critics insist that the Synoptists were all theologians and that their writings cannot be properly understood unless their theological tendency is taken into account. Nobody today wants to affirm that any of the four is a straight historical narrative. All our Gospels were written by believers and all were written with a theological purpose. The problem may be more complex in John than in the others, but it is essentially the same problem.

That John has a theological interpretation of his history does not make what he writes void as history. It is widely recognized that we cannot have good history without interpretation. Interpretation is one of the important functions of the historian. The question is not whether John has an interpretation, but whether his interpretation is a good and helpful one. An interpretation may obscure the events or it may clarify them. It is contended here that John's interpretation is a clarifying and helpful one.

Such an interpretation is necessary when we are facing the Incarnation. For while the historical method is immensely valuable in dealing with the ordinary events of history it is lacking when it comes to what is more than history. It has no tools with which to evaluate the claim that in Jesus of Nazareth is One who is not less than God incarnate, God become man for mankind's salvation. As D. E. Nineham reminds us, "It is of the essence of the modern historian's method and criteria that they are applicable only to purely human phenomena, and to human phenomena of a normal, that is non-miraculous, non-unique, character" (*S.P.C.K. Theological Collections,* no. 6 [1965], 3). If then God has acted in history, the purely secular historian has no way of determining the fact. Such an interpretation as John's is essential if the real meaning of what happened is to be conveyed. Had Pilate or Caiaphas left an account they might well have conveyed something of the facts. But it is certain that their interpretation would have been erroneous. They did not understand the events in which they played such key roles. John did.

But that does not mean that John distorted the facts to bring out his interpretation. If all he wanted to do was convey theological teaching then why did he write a Gospel? An epistle is a very effective way of conveying teach-

ing as 1 John, to name no other, clearly shows. That our author chose to write a Gospel shows that he was interested in the historical. He brings out his theological meaning by recounting what Jesus said and did, and he gives the impression that there is good history behind his theological teaching. We should notice that there are also some notable Johannine accuracies. We have already had occasion to notice John's topographical information and to see that this has convinced many that John knew Palestine well. To that we should add his habit of mentioning times of day at which things happened. Most students of the Gospel believe that this is because John had knowledge of those events and that his notices of time reflect accuracy of knowledge.

Perhaps the most important part of the Gospel from this point of view is the treatment of John the Baptist. It is interesting that in the Fourth Gospel this man of God is depicted in one capacity only, that of bearing witness to Jesus. Right at the beginning the Evangelist tells us that this is the case: the Baptist "came for witness, that he might bear witness of the light . . . he was not the light but came to bear witness of the light" (Jn. 1:7f.). There is not the slightest doubt about this. The Evangelist tells us little about the Baptist's teaching and not much about what he did. He does not even tell us that John baptized Jesus, though there can be no doubt that he refers to the occasion when this was done. Single-mindedly he brings out the point that the Baptist witnessed to Jesus. There can be not the slightest doubt that John's portrait of the Baptist is from a strong theological perspective.

Now one of the unexpected results of the study of the Qumrân scrolls is that they have many points of contact with what the Baptist says. In fact there is practically no element in the Baptist's teaching in this Gospel that does not have some point of contact in the Scrolls. This has convinced some critics that the fourth Evangelist's portrait of the Baptist corresponds to reality (e.g., J. H. Brownlee, *Interp.*, 9 [1955], 71-90; J. A. T. Robinson, "The New Look on the Fourth Gospel," *SE*, I, 345; A. Wikgren, "Biography and Christology in the Gospels," *SE*, I, 124). If John can be accurate when he is demonstrably concerned to make a theological point, this creates a presumption that he is accurate elsewhere. Specifically, if his portrait of John is a good one why should we think anything else about his portrait of Jesus?

John's stress on witness should also be considered here. He uses the noun *martyría* fourteen times (three times in Mark, once in Luke, not in Matthew) and the verb *martyréō* thirty-three times (Matthew and Luke once each, not in Mark). In both cases this is more often than in any other NT book. Clearly he puts unusual emphasis on witness. Now witness is a legal term. It refers to what goes on in a court of law to establish the truth. There is no point in talking about witness if one is concerned simply with theological romance. The use of the term shows that John's intention was to give facts and that he was confident that the facts would stand up. There was adequate testimony behind what he said.

Again, we should not overlook the fact that John has a good deal to say about truth. He uses the noun *alētheia*, "truth," twenty-five times, more than in any other book in the NT. The same can be said about his use of *alēthḗs*, "true" (fourteen times), and *alēthṓs*, "truly" (seven times), while his nine uses of *alēthinós*, "true," are just one below the highest (ten in Revelation). These statistics show that John is uncommonly interested in what is true. Perhaps it would not be impossible for a writer to put emphasis on the importance of the truth while himself conveying what is "true" by means of that which is not historically factual. But it would be unusual, so unusual that most of us would reject it. If a writer keeps talking about the truth and what is true, then it is incumbent on him to tell the truth. The counter to this is to affirm that John did not have an idea of truth like the modern scientific one and that he was quite able to promote the cause of truth by using what is not in full correspondence with historic fact. But this is conjecture. It must be proved; it is not enough to assert it. And it seems that the evidence is against it. John seems to be telling us the truth, in the sense of that for which there is adequate evidence.

It is usually held that one of John's aims was to combat heresy of a docetic type, the heresy that Jesus had no contact with matter but only seemed to have such contact. This ruled out a real incarnation and made nonsense of the Christian claim that in Jesus God had wrought salvation for mankind. Over against such ideas John insists that "the Word was made flesh" (Jn. 1:14). Now if John was in fact manufacturing stories with no historical basis (or using other people's stories of this kind), he was cutting the ground from under his own feet. The docetic heretics could easily allow an incarnation of this kind. It was the facts of the life of Jesus that bothered them. If John was to oppose them successfully it was very important that he did not make use of stories without factual basis.

Thus we have various reasons for holding that John is telling us what happened. He is not giving us a merely factual account. He has some theological points he wants to make, and he makes them. But he does not make them at the expense of historical accuracy. Thus a number of modern critics have come to respect at least some of John's history. To cite but one, C. H. Dodd argues that there is an early tradition behind this Gospel and that its historical judgments must be treated with respect (*Historical Tradition*). Dodd finds much that he cannot accept in John, but it is important that this great scholar is impressed with the amount of history he finds in this Gospel.

VIII. Purpose.–Various suggestions have been made concerning the purpose of this gospel. We have already noted one, namely, to combat Docetism. Put in this form it must be rejected, for Docetism as a developed heresy was known only from a much later time. But tendencies of a docetic type would later grow into Docetism, and it seems that John's emphasis on the reality of Jesus' humanity was in part aimed at such tendencies. But this can be no more than a side issue; it is not the main aim of the work.

A view with an honorable ancestry is that the author wrote to supplement the Synoptists. Clement of Alexandria thought that as far as the "bodily facts" were concerned John was content with what the Synoptists had written, but he wrote in addition "a spiritual Gospel" (Eusebius *HE* vi.14.7). The great objection to all such theories is that the evidence seems to show that John wrote independently of the Synoptists, as we have already noted. The same objection applies to other theories, e.g., that John wrote to correct or supersede the Synoptics.

There is more to be said for the view that John is concerned to oppose some continuing followers of John the Baptist. There is evidence that some who heard the Baptist did not heed his message that Jesus was the Christ, but preferred to carry on with the teachings and practices of John (cf. Acts 19:3). The Fourth Gospel makes it very plain that the place of the Baptist was a subordinate one, and it emphasizes the way John bore his witness to Jesus. But this occupies only a part of the Gospel, and it cannot be held to be John's main aim. As with the docetic tendencies, he was not averse to making some telling points in passing, but a polemic against the Baptist is not pervasive enough to be the purpose of the writing.

The same can be said about the two opposite views that John was written to oppose people who gave too much place to the sacraments or those who gave too little place to them. There is dispute as to whether chs. 3 and 6 refer to baptism and holy communion. But there can scarcely be dispute that any sacramental reference is too subdued to be thought the Evangelist's main thrust.

It seems that in determining the purpose of this Gospel we cannot do better than listen to the Evangelist's own words, "these are written that you may believe that Jesus is the Christ, the Son of God, and that believing you may have life in his name" (20:31). That is what the Gospel is all about. Throughout there is a determined attempt to show that Jesus was in fact the Christ of God, the One foretold through prophecy and the One through whom God would work His work of salvation. The whole Gospel bears on this theme in one way or another, and it makes it clear that life comes through believing in Him. Some feel that the Gospel has so much relevance to the building up of believers in their most holy faith that it ought not to be seen as primarily evangelistic. It is fair to retort that what has an evangelistic aim may well be of value also in building up the saints. We are not at liberty to ignore the Evangelist's own statement of purpose.

JOHN MARK. *See* MARK, JOHN.

JOHN, REVELATION OF. *See* REVELATION, BOOK OF.

JOHN THE APOSTLE. It is difficult to get a clear picture of John, for he is generally associated with other people. In the Synoptic Gospels he is usually mentioned along with his brother James and frequently with Peter also. In Acts he is linked with Peter on every occasion except in the expression "James the brother of John" (Acts 12:2). His father was Zebedee, apparently a successful fisherman (Mk. 1:20), and a comparison of Mt. 27:56 with Mk. 15:40 implies that his mother was Salome, who may be Jesus' "mother's sister" in Jn. 19:25. If so, John was a maternal cousin of Jesus. But this cannot be insisted upon, for it is not certain that the fourth Evangelist is making the same selection from the women by the cross (of whom there were many, Mt. 27:55) as the other Evangelists. The identification has much to be said for it, however.

John was one of the disciples called from their work by Jesus (Mt. 4:21 par.) and he appears, of course, in the lists of the Twelve (Mt. 10:2 par.). He was astonished at the miraculous catch of fish (Lk. 5:10), and at a later time, along with Peter, James, and Andrew, he asked Jesus when the end would be (Mk. 13:3f.).

More significant are some incidents in which he is singled out to be with Jesus on special occasions. Thus he was chosen, along with his brother James and with Peter, to be on the mountain when Jesus was transfigured (Mt. 17:1 par.). These three were the only ones whom Jesus allowed to go with Him into the house of Jairus when He raised Jairus's daughter from the dead (Mk. 5:37 par.), and at the close of Jesus' ministry it was these three again that Jesus asked to pray with Him in Gethsemane (Mt. 26:37 par.). On that occasion the weakness of the flesh was too much for them and they slept instead of praying. But it is noteworthy that in the hour of supreme crisis these were the men to whom Jesus looked for fellowship in prayer. We probably see something of the same attitude when Jesus entrusted to Peter and John the preparations for His last meal with His disciples (Lk. 22:8).

Thus it is plain that John was an important member of the Twelve. But there are indications that in those days he had much to learn about the spirit of Jesus and the cause to which he was so ready to commit himself. Thus James and John came to Jesus seeking the privilege of sitting on His right and His left in His glory (Mk. 10:35-45; in Mt. 20:20f. their mother made the actual request, but it is clear that the two sons were associated with her). In response to Jesus' question they affirmed their ability to "drink the cup" which He would drink and to be "baptized with the baptism" with which He would be baptized, evidently metaphors for suffering in the service of God. He assured them that they would indeed do this, but the places they sought were for those for whom the Father had prepared them. Not unnaturally the incident aroused the indignation of the other disciples.

A similar incident occurred when John spoke of encountering an exorcist who was casting out demons in Jesus' name. "We forbade him," John said, "because he does not follow with us" (Lk. 9:49 par.). Jesus, of course, told them not to forbid the man. An aggressive attitude toward their enemies surfaces when James and John wanted to call down fire from heaven on a Samaritan village which refused to receive the Twelve (Lk. 9:54). It is interesting that they thought this could be done. While they were clearly out of harmony with what Jesus stood for, equally clearly they were moved by a fiery zeal for His cause and the firm conviction that God in heaven would vindicate in the most striking manner those who called for vengeance on Jesus' opponents. Jesus gave the two brothers the name "Boanerges," which Mark translates as "sons of thunder" (Mk. 3:17). No explanation is given of the significance of this epithet, but the incidents just mentioned probably give us the clue. Thunder would point to noise and sudden disturbance and clearly anyone with such a nickname would not be expected to be gentle and considerate. The picture the Synoptists give us then is that the brothers were zealous and loyal but scarcely loving and helpful.

In Acts John appears in a list of the Twelve (Acts 1:13), and when James was killed it is noted that he was John's brother (Acts 12:2). Otherwise he appears only in company with Peter. These two went up to the temple at the ninth hour for prayer and were the means of bringing healing to the lame man (Acts 3:1-10). They were brought before the council on account of their teaching about Jesus and the resurrection (Acts 4:1f.). They were released but told to keep quiet, to which they retorted in the notable words: "Whether it is right in the sight of God to listen to you rather than to God, you must judge; for we cannot but speak of what we have seen and heard" (vv. 19f.). It was on this occasion that they were called "uneducated, common men" (v. 13), which probably means that they had not had the kind of formal education that the rabbis prized. John probably was included in the arrest of "the apostles" in Acts 5:18, which was followed by their release from prison by an angel. Finally John was sent with Peter to Samaria on the occasion when they laid hands on

those whom Philip had evangelized and baptized (Acts 8:14).

In the Epistles John is mentioned only when Paul links him with Peter and James as "pillars" of the Church (Gal. 2:9). This indicates that he was an important ecclesiastical figure, but the interesting thing is that, here as elsewhere, there is nothing to show him taking a place of leadership. Except for his discussion with Jesus about the strange exorcist (Mk. 9:38 par.) he always appears in company with someone else, generally Peter, who is the one who speaks.

"The sons of Zebedee" are mentioned without the individual names in connection with the fishing expedition in Jn. 21:2. If we are correct in seeing John the son of Zebedee as the author of the Fourth Gospel we have some more important information about him. He was "the disciple whom Jesus loved." This should not be understood in an exclusive sense, for Jesus loved them all; nevertheless it does tell us something about the man. This beloved disciple was close to Jesus: he leaned on Jesus' breast at the Last Supper (Jn. 13:23), and he was the one who recognized Jesus on the occasion of the miraculous catch of fish (Jn. 21:7). It was to him that Jesus confided the care of His mother as He hung on the cross (Jn. 19:26f.). But the Gospel as a whole tells us more than do isolated expressions. It tells us that its author possessed an unparalleled insight into the message of Jesus and a powerful way of expressing it to others.

It is uncertain whether he was also responsible for the book of Revelation. This book claims John as its author, but does not specify which John. If it was the same John, we learn that he was "on the island called Patmos on account of the word of God and the testimony of Jesus" (Rev. 1:9), which presumably means that he was exiled for his faith. This book reveals its author to have been a fiery spirit and a man of vision. He apparently classes himself among the prophets (Rev. 22:9), and he repeatedly calls his book a prophecy (Rev. 1:3; 22:7, 10, 18f.).

It may seem curious that a man of whom we know so little, who habitually comes before us in company with someone else, and whose only recorded utterance is so much out of harmony with the spirit of Christ, should have such a high place in Christian regard and be seen as such a significant author. We should bear in mind that in fact we know little of the apostolic band, and further, that the positive achievements we can ascribe to any individual early Christian, apart from Paul, Peter, and Philip, are few.

Tradition has it that John lived at Ephesus to an old age (for refs. cf. Brown, pp. LXXXVIII-XCII). We can neither prove nor disprove this. Sometimes it is said that John was martyred quite early (cf. Morris, pp. 280-83). If true this would rule him out as the author of any of our NT books. But the reasons are scarcely sufficient. A seventh-century summary of a fifth-century writer, Philip of Side, reports that Papias said that John and James were killed by the Jews But Philip was a careless writer and nobody else seems to have found the reference in Papias. The ninth-century George the Sinner repeats the statement about Papias, or at least one manuscript says he does. But there is no evidence that he has any authority for this other than Philip of Side or his summarizer. To this is added the evidence of some church calendars (i.e., calendars which indicate the days on which the saints were commemorated) where James and John are commemorated together (cf. Morris, p. 281). But it is scarcely necessary to point out that commemoration together does not mean that both were martyrs, and even if they were it does not mean that they were martyred at roughly the same time. Those who favor the early martyrdom take Mk. 10:39 as a prophecy after the event, and say it indicates that John had already been martyred when Mark's Gospel was written. This is surely an argument without weight.

All in all the evidence brought forward for early martyrdom is very scanty and it is better to reject the whole idea. There is no solid argument against the tradition that John lived to a great age and was active in the service of his Lord. Tradition says that in his old age he was known as the apostle of love, so greatly had the love that is at the heart of the Christian faith possessed him. It was clearly of the utmost significance to the writer of 1 John.

II. Parentage
III. Early Life
IV. Ministry
V. Baptism
A. Origin
B. Significance
C. Baptism of Jesus
VI. Imprisonment and Death
VII. His Disciples
VIII. John and Jesus

I. Sources.–For trustworthy information concerning the life and work of John the Baptist we must go to the NT and Josephus. The Synoptic Gospels tell of his origin, ministry, message, and death. The Fourth Gospel focuses on his relation to Jesus. Josephus (*Ant.* xviii.5.2 [116-19]) reports his popularity, relation to Herod Antipas, and death.

II. Parentage.–Although in his ministry John was widely recognized as "a real prophet" (Mk. 11:32), he was of priestly descent (as were Jeremiah and Ezekiel). His mother Elizabeth was one "of the daughters of Aaron" and his father was a priest "of the division of Abijah" (Lk. 1:5), one of twenty-four divisions that took turns serving in the temple at Jerusalem (1 Ch. 24:10). "They were both righteous before God . . . had no child . . . and both were advanced in years" (Lk. 1:6f.). Their home was in "the hill country of Judea" (Lk. 1:65).

III. Early Life.–Lk. 1:36 indicates that John was born about six months before Jesus, whose birth cannot be dated later than early in 4 B.C. This suggests that John, like Jesus, began his ministry when he was about thirty years old (cf. Lk. 3:23). His father, an upright priest, lived in the hill country of Judea near the Qumrân sect, which was located in the wilderness of Judea near the northwest shore of the Dead Sea. This community had as its nucleus earnest priests who expected God to act soon to establish His rule. It has been suggested that Zechariah was in sympathy with the Qumrân group, and that when he and his wife died — both were already old when John was born — John was brought up at Qumrân and there was taught that the Scriptures promised God's early action to judge and redeem His people. This cannot be proved (cf. F. F. Bruce, *Second Thoughts on the Dead Sea Scrolls* [2nd ed. 1961], pp. 140-44; W. S. LaSor, *Dead Sea Scrolls and the NT* [1972], pp. 145f.). What is clear is that "the child grew and became strong in spirit, and he was in the wilderness [of Judea] till the day of his manifestation to Israel" (Lk. 1:80). It was a period of silence, study, thought, and preparation.

IV. Ministry.–John was still in the wilderness of Judea when "the word of God" called him to preach (Lk. 3:2), and there in the wilderness he began his ministry (Mt.

JOHN THE BAPTIST

Traditional site of John's baptizing in the Jordan (W. S. LaSor)

3:1). This wilderness included not only the wild rocky region W of the Dead Sea but also the lower region of the Jordan Valley. At first John preached in the Jordan Valley just N of the Dead Sea; Jn. 1:28 places part of this ministry at Bethany beyond Jordan, which may be located E of Jericho on the east bank of the Jordan River, perhaps in the Wâdī el-Kharrâr. But John moved about; Jn. 3:23 speaks of a later ministry at Aenon near Salim, which may have been in Samaria, a few miles E of Jacob's Well, or further N, a few miles S of Scythopolis. At the end of his ministry he must have been either in Galilee or (probably) Perea, for Herod Antipas, who arrested him, ruled only these regions.

Luke 3:1f. gives an elaborate dating for the beginning of John's ministry. For Luke this event was important not only because John's prophetic ministry was influential but also because it heralded the new decisive action of God. The date cannot have been before A.D. 26, when Pilate became governor of Judea (cf. also Jn. 2:20), nor later than A.D. 28, for Jesus' ministry must have begun by then.

John dressed in rough garb, and ate the simple food available in the wilderness (Mk. 1:6); the leather girdle recalls the dress of Elijah (2 K. 1:8), and may suggest that John was conscious of a call to a ministry like that of Elijah. He did not go to Jerusalem or any city, but stayed in the wilderness and preached in the open. For his baptism he wanted running water, which was one factor in determining where he preached, and Jn. 1:28; 3:23 indicate that he preached where people passed by and he could easily be found. To fulfil his God-given mission he lived a life of stern hardship. That "John came neither eating nor drinking" (Mt. 11:18) is a dramatic way of describing his simple, self-denying way of life.

His preaching made no mention of ceremonial or priestly requirements. He addressed it to Jews (Mt. 3:9; Lk. 3:8), and announced the imminent coming of the messianic age, "the kingdom of heaven" (Mt. 3:2). He made no claim to be the Messiah, and even denied being Elijah (Mal. 4:5) or the prophet (Dt. 18:15); he was simply the warning "voice of one crying in the wilderness" (Mk. 1:3; Lk. 3:15f.; Jn. 1:20-23). The warning was urgent, for preliminary to the coming of God's final kingdom would be stern judgment, carried out by One mightier than John; it would bring blessing to those ready, but the fire of devastating judgment to the wicked (Mt. 3:11f.; Lk. 3:16f.). And instead of delivering the Jews from the foreign oppressor and honoring them, it would strike Israel first of all. Descent from Abraham would be no protection; Jews as well as Gentiles were sinners. The only escape was to repent, turn from sin, and change one's entire attitude and way of life. Those who did this and were baptized received forgiveness. But the repentance had to be real and thorough; the repentant person had to "bear fruits that befit repentance" (Lk. 3:8). All must share their goods and food, tax collectors must be honest, and soldiers must refrain from extortion and be content with their pay (Lk. 3:10-14).

John's method and message were urgent. He had no time for long discussions. Whether he addressed his warning of imminent judgment to "the multitudes" generally (Lk. 3:7), or particularly to "the Pharisees and Sadducees" (Mt. 3:7), it was a stern, fiery, fearless warning of imminent doom from which escape was possible only by prompt and genuine repentance matched by thorough obedience to God's will.

*V. **Baptism.***—Though John was a prophet and gave no teaching requiring ceremonial priestly practices, he gave such prominence to baptism that his distinguishing title was "the Baptist" (*ho baptistēs,* Mt. 3:1; etc.) or "the Baptizer" (*ho baptizōn,* only in Mk. 1:4; 6:14, 24), and his message was called "a baptism of repentance" (Mk. 1:4). This distinctive rite, evidently administered in the running water of the Jordan River (Mk. 1:5) or at springs (Jn. 3:23), was a symbolic expression of John's message.

A. Origin. The practice of ceremonial baths and washings was common throughout the ancient world, and persistent search has been made for the background that best explains why John gave baptism so prominent a place. Various washings were prescribed in the Mosaic law to remove defilement and infection and restore the normal clean state (Lev. 11–15). The messianic promises of the OT mention "a fountain opened for the house of Israel and the inhabitants of Jerusalem to cleanse them from sin and uncleanness" (Zec. 13:1); God was to "sprinkle clean water upon you, and you shall be clean from all your uncleannesses" and receive "a new heart" and "a new spirit" (Ezk. 36:25f.). Undoubtedly the cleansing promised included more than physical cleansing of the body.

By the time John began to preach, the Jews were requiring of proselytes from the gentile world not only circumcision but also baptism. This proselyte baptism was regarded as a cleansing from the ceremonial defilement that in Jewish eyes affected every Gentile. Frequent washings also were known among Jews. Josephus went into the wilderness and spent some time with Banus, an ascetic who "bathed himself in cold water frequently" (*Vita* 2). Josephus also reported that the Essenes "bathe their bodies in cold water" (*BJ* ii.8.5 [129]). The Qumrân Scrolls contain references to ritual lustrations, and some think that the reservoirs found at Qumrân attest frequent lustrations. The Jewish community at Qumrân probably was an Essene or Essene-type community, but it is doubtful that there was repeated ritual washing in such rather small reservoirs. In any case, a single initiatory baptism or bath is not attested at Qumrân, though no doubt some ritual washings were carried out there by this Jewish sect.

None of these ancient practices really explains the origins of John's baptism. They show that such a baptism would not have seemed strange in the ancient Near Eastern world, and they give clues to what John's baptism meant to the Jews; but his baptism was something new.

B. Significance. This baptism was administered but once to a person, and thus differed from the repeated washings so widely practiced. It was administered to Jews and so differed from proselyte baptism of Gentiles. It was not accompanied or immediately followed by the gift of the Holy Spirit, and so was not a full parallel to Christian baptism; John only promised the gift of the Spirit at some future time.

John's baptism had an eschatological focus. God's decisive action was imminent; judgment would strike all sinners, including unprepared Jews. Earnest repentance, divine forgiveness, and complete change of life were urgently necessary to escape judgment and enter the coming kingdom (Mt. 3:10; Lk. 3:9). Baptism was for penitent Jews, who thereby confessed their sins, renounced their old way of life, received forgiveness, dedicated themselves to a loyal and upright life, and looked expectantly for the coming of God's Mightier One to establish the divine kingdom. Contrary to Josephus (*Ant.* xviii.5.2 [117f.]), it was not merely for physical cleansing; it symbolized the spiritual cleansing and renewal of the repentant and reformed sinner.

C. Baptism of Jesus. It is historical fact that Jesus was baptized by John. Matthew, Mark, and Luke say so, and Jn. 1:31-33 implies it. But John baptized repentant sinners. Did Jesus confess personal sin? The NT rejects such an idea. Mt. 3:13-15 explains why He asked to be baptized: "to fulfil all righteousness." This means not that it was a hollow form to Him, but that He was so loyal a member of His people and so identified with them that He had to join with them in their confession and dedication (cf. 2 Cor. 5:21).

VI. Imprisonment and Death.–The exact date of John's imprisonment cannot be determined, but it occurred before Jesus returned to Galilee to open His ministry there (Mk. 1:14), and so *ca.* A.D. 28. The length of imprisonment is likewise uncertain. Since John died before Jesus' ministry ended (Mk. 6:14-29), it occurred not later than A.D. 29. Josephus reports a defeat of Herod Antipas in A.D. 36 which people thought was divine retribution on Herod for executing John (*Ant.* xviii.5.2 [116f.]). This might suggest a date later than A.D. 29. But John clearly died before Jesus did, and the story Josephus tells simply shows how deeply John impressed the people and how vividly they remembered him seven years after his death.

According to Josephus, Herod Antipas feared that John by his fiery preaching might stir up a revolt, so he seized him, imprisoned him at Machaerus E of the Dead Sea, and had him put to death. In the Gospels John's rebuke of Herod for marrying his brother's wife Herodias caused Herod to arrest him (Mk. 6:17f.; Mt. 14:3f.; Lk. 3:19f.). Quite possibly both explanations contain truth. Herod's fear of political results from John's preaching would explain the imprisonment; the scheming of Herodias explains best the extreme step of executing John by beheading him.

VII. His Disciples.–Most hearers of John, even those baptized, returned home after a time; but some became his disciples and lived as a group under his leadership. Even after his imprisonment they kept in touch with him; once a group of them came to Jesus with a question from him (Mt. 11:2; Lk. 7:19). Later, when John was executed, they buried his body and reported his death to Jesus. As during his ministry, they followed his teaching, fasted regularly (Mk. 2:18), and prayed as he had taught them (Lk. 11:1).

Little is known of their continuing work. Their loyalty to him during his imprisonment shows that they continued to live as his disciples. About twenty-five years later, when Apollos, a native of Alexandria, came to Ephesus, "he knew only the baptism of John," though he knew the OT prophecies of Jesus or some facts about Jesus' earthly life (Acts 18:25). Did he learn of John's message and baptism in Alexandria or in Jerusalem? At least the incident shows that John's movement continued and spread. The twelve men at Ephesus who had not heard of the Holy Spirit but had been baptized into John's baptism (Acts 19:1-7) are further evidence of this. The pointed insistence in Jn. 1:20; 3:28 that John was not the Messiah but had directed men to Jesus indicates that when the Fourth Gospel was written, probably late in the 1st cent. A.D., John's movement still continued, especially in Asia Minor, and some of his followers were claiming that John was the promised messianic leader. Some but by no means all of John's followers became followers of Jesus (Mt. 14:12?; Jn. 1:35-42).

VIII. John and Jesus.–Though many of John's followers gave John a rank superior to Jesus, John himself clearly claimed a preparatory and secondary role. He was sent by God but was subordinate to the Mightier One to come, and so could only hold the center of the stage for a limited time. His task was to proclaim the imminent coming of God's righteous kingdom and to call his hearers to repent and be baptized to escape the impending judgment and find a place in that kingdom. He announced the coming of the Mightier One, who would execute God's judgment, establish God's perfect order, and bestow the Holy Spirit on God's loyal people.

Matthew 3:14 suggests that John knew clearly that Jesus was the Greater One, and in Jn. 1:29, 33, 36 John explicitly identifies Jesus as the Greater One, the Lamb of God, and the Son of God. But in Mt. 11:2f. and Lk. 7:19 John sends from prison to ask Jesus if He is the Coming One, and Peter is said to have expressed a new, God-given revelation when at the end of the Galilean ministry he identifies Jesus as the Messiah (Mt. 16:17). These two groups of evidence are not contradictory. John sensed the greatness in Jesus without explicitly and immediately grasping and stating the full Christian gospel; the Fourth Gospel, in which men ascribe explicitly to Jesus in the first week of His ministry every great title the gospel story will contain, legitimately dramatizes the essential meaning of John's message and relation to Jesus without waiting for it to become clear, as it does in the other Gospels, in the ongoing development of His ministry. The Synoptic Gospels and the Fourth Gospel are in essential agreement. The latter's concern is always to bring out the full meaning of the story; John the Baptist had really pointed to Jesus without fully understanding what God was doing through him. Hence John's followers could think that they were true to him by continuing his independent movement, while the disciples of Jesus could rightly claim that they had grasped the final meaning of John's preaching and attitude.

Jesus' estimate of John was both positive and reserved. By coming to hear John preach and by being baptized Jesus recognized John's God-given mission. To Jesus, John was a true prophet of God, and more; he was Elijah who had come to prepare for God's final judgment and redemption (Mal. 4:5; Mt. 11:9-14). No greater man had lived. John's message and baptism, Jesus held, were as surely prompted by God as was His own ministry (Mk. 11:27-33). "Yet he who is least in the kingdom of heaven is greater than he" (Mt. 11:11), for John did not fully grasp the whole gospel and did not disband his followers when Jesus appeared, but continued to preach independently about the coming crisis, divine judgment, and the need of repentance and baptism. John prepared the way; the kingdom began to come in the ministry and work of Jesus. John had been divinely sent and was not repudiated, but once Jesus appeared John had to decrease while Jesus increased (Jn. 3:30).

The prohibition "you shall not join hands with a wicked man, to be a malicious witness" in Ex. 23:1 probably refers to collaborating with the unjust party in a suit by giving false testimony against his opponent. Job's claim in Job 16:4 that he could "join words together against" his friends is perhaps better translated "be noisy with words against" (relating Heb. *ḥāḇar* to Akk. *ḫabāru*, "be noisy" [O. Loretz, *CBQ*, 23 (1961), 293f.]; for alternative views see H. H. Rowley, *Book of Job* [*New Century Bible Commentary*, repr. 1980], pp. 116f.). The condemnation of those who "join house to house" in Isa. 5:8a refers to the buying up of the homes (and property, v. 8b) of the poor by wealthy landowners, thus leaving the poor homeless. Leah's hopeful statement in Gen. 29:34 that Jacob would "be joined" to her means that he would feel an emotional attachment to her because she had borne him three sons. "He who is joined [*Q*; read also by the LXX and Pesh.] with all the living" in Eccl. 9:4 simply refers to the living person, organically joined to all living persons. Hosea's lament that "Ephraim [i.e., Israel] is joined to idols" means that they are in confederation with false gods (cf. 4:12; 8:4f.; 13:2). In Mt. 19:5 (par. Mk. 10:7 according to some MSS), a quotation of Gen. 2:24 LXX, the phrase "be joined to his wife" probably refers generally to all aspects of the marital union, but Paul used the same verb (*kollάō*) in 1 Cor. 6:16 to refer specifically to sexual intercourse. In the familiar passage Mt. 19:6 (par. Mk. 10:9), "what God has joined together," the verb is *syzeúgnymi*, which originally meant "bring animals together in the yoke."

In the RSV the word "join" also renders the prefixed Greek preposition *syn-* in the words *symmimētḗs*, "fellow-imitator" (Phil. 3:17), and *synephístēmi*, "join in an attack" (Acts 16:22). J. E. H.

JOINTS (1 K. 22:34 par., AV). *See* SCALE ARMOR.

JOKDEAM jok'dē-əm [Heb. *yoqḏᵉʿām* (< *yāqaḏ*–'burn'?); LXX A *Iarikam*; LXX B *Iekdaam*; LXX L *Ieknaam*; Pesh. *nᵉqēmʿam*]. A city inherited by the tribe of Judah during the Conquest (Josh. 15:56), located by the biblical source near the cities of Maon, Carmel, Ziph, Juttah, Kain, etc. in "the hill country" (15:48) S of Hebron. It is perhaps to be identified with Khirbet Raqaʿ near Ziph. J. E. H.

JOKIM jō'kim [Heb. *yôqîm*–'Yahweh raises up']. A Judahite, descendant of Shelah (1 Ch. 4:22).

JOKMEAM jok'mē-əm [Heb. *yoqmᵉʿām*]. A town in Mt. Ephraim assigned to the Kohathite Levites (1 Ch. 6:68 [MT 53]), named along with Gezer and Beth-horon. The name Kibzaim in Josh. 21:22 may be another name for the same place (cf. *LBHG*, pp. 270f.). In 1 K. 4:12 the AV wrongly reads JOKNEAM, although this seems to be equated with Jokmeam in location. Identification is not yet possible. R. P. DUGAN

JOKNEAM jok'nē-əm [Heb. *yoqnᵉʿām*]. The LXX has many variants for this word; the closest to the MT is *Iek(o)nam*, while some (e.g., *Iekman* and *Iekommam*) show confusion in the labials, which has led some scholars to equate JOKMEAM with this place.

As a royal Canaanite city it was known as Jokneam in Carmel (Josh. 12:22). It also appears in the topographical list of Thutmose III as *ʿen-q-n-ʿa-mu*, "the spring of Q." The boundary of Zebulon touched the stream in front of Jokneam (Josh. 19:11). According to Josh. 21:34, Jokneam was a Levitical city in the territory of Zebulon occupied by the members of the Merari clan. In the parallel passage, 1 Ch. 6:62, the MT (v. 47) does not have Jokneam, but LXX A and some other MSS add *Iekoman*. Later sources do not mention Jokneam.

Eusebius was unaware of the location of the site. The name had evidently been modified by the Hellenistic Age as demonstrated by Jth. 7:3, which refers to it as Gk. *Kyamōn*. Eusebius, therefore, gives no identification for Jokneam (*Onom.* 106.17f.; 108.27f.), though he is aware of the presence of Gk. *Kammōna*, "a village on the Great Plain, six miles from Legio to the north, on the way to Ptolemais (Acco)" (*Onom.* 116.21). During the Crusades a settlement existed there called Caïmont. This accounts for the name Tell Qeimûn (today Tel Yoqneam) beside the spring ʿAin Qeimûn, near the point where the Wâdī el-Milḥ (today Nahal Yoqneam) enters the plain of Jezreel.

The Wâdī el-Milḥ runs through the pass that separates the Carmel Range from the low-lying zone of hills that stands between the Valley of Jezreel and the Sharon Plain. (The name of this "low country" is Belâd er-Rûḥah [today Ramat Menashe]; it was called "shephelah" [Heb. *šᵉpēlâ*] in Josh. 11:2, 16b.) Thus ancient Jokneam occupied a strategic position guarding one of the passes leading to the Jezreel Plain.

Bibliography.–E. Robinson, *Later Biblical Researches* (1856), pp. 114f.; *SWP*, II, 69; W. F. Albright, *AASOR*, 2–3 (1921-1922), 24; *GP*, II, 365f.; A. Alt, *ZDPV*, 62 (1939), 3; W. F. Albright, *JBL*, 58 (1939) 184. A. F. RAINEY

JOKSHAN jok'shən [Heb. *yoqšān*, meaning unknown]. Son of Abraham and Keturah (Gen. 25:2f. par. 1 Ch. 1:32).

JOKTAN jok'tən [Heb. *yoqṭān*–'younger [son]?']. Son of Eber, and ancestor of thirteen tribes (Gen. 10:25f., 29; 1 Ch. 1:19f., 23) distributed throughout Arabia.

JOKTHEEL jok'thē-əl [Heb. *yoqtᵉ'ēl*].

1. (Josh. 15:38). A town of Judah in the coastal lowlands. The site is unknown.

2. (2 K. 14:7). The city of SELA, capital of the Edomites, which Amaziah renamed Joktheel after he had captured it. It is possibly to be identified with Petra.

JONA jō'nə (Jn. 1:42, AV). *See* JOHN (NT) 5; BAR-JONAH.

JONADAB jō'nə-dab. *See* JEHONADAB.

JONAH jō'nə [Heb. *yônâ*–'dove'; Gk. *Iōnas*].

1. According to 2 K. 14:25 Jonah the son of Amittai, of Gath-hepher, was the prophet of Yahweh who predicted the restoration of the land of Israel to its ancient boundaries through the efforts of Jeroboam II (793-753 B.C.). The life and ministry of the prophet may thus be placed in the early 8th century. His native village of Gath-hepher was in the territory of Zebulun (Josh. 19:13), and is commonly identified with Khirbet ez-Zurrâ', near Mashhad, about 5 km. (3 mi.) NE of Nazareth.

2. (1 Esd. 9:23). A Levite, the same as ELIEZER 9.

W. C. WILLIAMS

JONAH, BOOK OF. The fifth book of the Minor Prophets. Only four chapters long, it has so many serious problems that a brief article can treat them only by generalizing. Since the book is so well known and so short, a knowledge of it will be presupposed in the following article.

I. Structure and Unity
  A. Chapters 1–2
  B. The Psalm
  C. The Book as a Whole
II. Authorship and Date
  A. Language
  B. Parallels with Joel
  C. Nineveh as a Great City
III. Interpretation
  A. As Mythology
  B. As Midrash
  C. As Allegory
  D. As Symbol
  E. As History
IV. Message
  A. As a Postexilic Reaction
  B. As a Supplement to Nahum
  C. As a Prophetic Proclamation of Grace

I. Structure and Unity.–Early attempts to explain the book along traditional lines of source analysis (W. Böhme, *ZAW*, 7 [1887], 224-284, followed by H. Schmidt, *ZAW*, 25 [1905], 285-310) met with almost instantaneous rejection and were already discarded by König and Bewer as too artificial. Indeed, the resistance of the book to analysis by these means calls into question the method itself and cries for further investigation, using Jonah as the test case. Most modern scholars are inclined to regard the book as a unity, or as a compilation from two sources (chs. 1–3, and 4), or as a unity with the psalm added later.

A. Chapters 1–2. R. Pesch, following the pioneering work of N. Lohfink, argues for a concentric symmetry in the first section of the book, whereby the prophetic proclamation of faith is made the center of the pericope for reasons of stress. The analysis in Table 1 owes its stimulus to Pesch.

By this mode of analysis, whereby the proclamation of faith in Yahweh comes precisely in the center of the pericope (1:9, 10aα), three things may be shown: (1) the unity of the section; (2) the central position of Jonah's proclamation of faith in Yahweh; and (3) the climax of the section (2:10b [MT 11a]), in which Jonah's salvation from drowning follows Yahweh's word to the fish, that word itself paralleling God's word to Jonah (1:1). The motif of fear is developed in a similar pattern throughout the peri-

TABLE 1

Beginning of Pericope		Conclusion of Pericope	
1:1	Narrative: word of God to Jonah	2:10a	Narrative: word of God to the fish
1:2	Speech: Yahweh commissions Jonah to preach to Nineveh	2:2-9	Speech: Jonah's prayer from the belly of the fish
1:3	Narrative: Jonah's flight to Tarshish to avoid his prophetic mission	1:17	Narrative: for Jonah's deliverance God has appointed a great fish that swallows him
1:4,5aα	Narration and fear motif: the storm and the seamen's fear of it	1:15-16a	Narration and fear motif: the sea is stilled; the seamen fear Yahweh
1:5aβ	Prayers of the seamen: each man prays to his own god	1:14	Prayer of the seamen: to Yahweh
1:5cd,6aα	Narrative: Jonah goes to sleep in the ship's hold and the captain comes to him	1:13	Narrative: the seamen attempt to return the ship to land
1:6aβ,b	Speech: the sea captain to Jonah	1:12	Speech: Jonah to the seamen
1:7a	Speech of the seamen: to one another	1:11	Speech of the seamen: to Jonah
1:7b	Narrative: casting of lots	1:10c	Narrative: Jonah's past
1:8	Speech of the seamen: to Jonah	1:10aβ,b	Speech of the seamen: to Jonah

1:9, 10aα Proclamation of faith in Yahweh

TABLE 2

	Focus on the Seamen		Focus on Jonah
1:4	Crisis: destruction threatened by the storm	2:3	Crisis: drowning in the sea threatened
1:14	Seamen's response: prayer, finally to Yahweh	2:2	Jonah's response: prayer to Yahweh
1:15b	Reaction of Yahweh to prayer of the seamen: deliverance from the storm	1:17; 2:6b	Reaction of Yahweh to prayer of Jonah: deliverance from death in the sea
1:16	Concluding response of seamen to Yahweh's salvation: worship in cultic acts (sacrifice and vows)	2:9	Concluding response of Jonah to Yahweh's salvation: worship through praise, resolution to perform cultic acts (sacrifice and vows)

cope (1:5, 10, 16), documenting the progression of the faith of the seamen from a recognition of their own gods (5aβ) to the recognition of Yahweh as the God who has made heaven and earth (10a), where the central member is again primary.

B. The Psalm. The psalm (2:2-9 [MT 3-10]) has its own set of problems. (1) Is it earlier than, contemporary with, or later than the prose sections? (2) Is its location proper, or has it suffered a transposition? (3) What is its nature and how does this bear on the unity and meaning of the book?

First of all, it should be observed that the psalm is a song of thanksgiving for a deliverance already accomplished, as all commentators recognize. As such, it exhibits distinct parallels with other canonical psalms, although the details of these comparisons vary somewhat for each critic (cf. Feuillet, p. 181; Smart, *IB*, VI, 874; Scott, p. 22). Contrary to Feuillet, most hold these parallels to indicate the genre of the Jonah psalm, rather than sources on which the author drew.

While many moderns (e.g., T. H. Robinson, *Die zwölf kleinen Propheten: Hosea bis Micha* [*HAT*, 1954], p. 117) regard the psalm as a late composition and thus an even later insertion, Landes (*Interp.*, 21 [1967], 3-31) has argued (1) for its antiquity on the basis of its linguistic affinities with the poetry of the Bronze Age, and (2) for its traditional place in the book. Not only is this Letter witnessed by the earliest textual evidence (the LXX and the Qumrân scroll of the prophets), but there are real reasons for its present position: (1) it shows Jonah's anguish while drowning in the sea, and (2) it commemorates his deliverance. The parallels that Landes observes between chs. 1 and 2 are shown in Table 2.

See Table 3 for the parallels between the psalm and ch. 4.

The psalm, moreover, functions to slow the rapid pace of action in ch. 1, with the resulting suspense drawing the reader's attention to the act of deliverance in 2:10. The greater length of the psalm, when compared with its parallel in 4:2f., creates an admitted quantitative imbalance. But its omission would create an even more severe tilt in the other direction. In light of its important role in the structure of the book, it may be assumed that Landes is correct in regarding the psalm as older than the narrative portion of the book (as is the ancient cultic credo in 4:2cd), and that it was an integral part of the book's composition.

C. The Book as a Whole. Thanks to the labors of Lohfink, Pesch, Landes, and Ben Menahem (p. 3), the schema shown in Table 4 emerges for the entire book.

Thus although the book of Jonah appears at first glance to be a straightforward narrative, when examined in greater detail it reveals a remarkably formal structure that clearly indicates the compiler's intent to mark the contrast between the two major sections of the book, with the first section subordinated to the second section (Feuillet, p. 342). In 1:1–2:10, Jonah receives his command to preach to the Ninevites. But he attempts to escape his prophetic commission (cf. S. D. F. Goitein, *JPOS*, 17 [1937], 67) by fleeing to Tarshish aboard a Phoenician ship, only to wind up in the belly of a great fish. The second section (3:1–4:11) tells how Jonah receives Yahweh's command a second time and how he converts Nineveh by his forceful preaching, only to wind up in despair at the city's deliverance. The pattern A:B::A′:B′ emerges with such clarity and force that any argument for composite authorship or for a later insertion of the psalm seems merely to grope for the vestiges of legitimacy.

II. Authorship and Date.–A. Language. The language of the book of Jonah, once thought to point conclusively to a postexilic date (cf. S. R. Driver, *Intro. to the Literature of the OT* [9th ed. 1913], p. 322; Budde, p. 228, considers only Esther, Chronicles, and Daniel as later), can no longer be considered as pointing to some specific period in Israel's history. An Aramaic influence on the language of the book is not at all surprising in view of the Galilean origin of the prophet and, presumably, of the compiler. A

TABLE 3

	Focus on the Ninevites		Focus on Jonah
1:17	Focus shifts to Jonah	4:1-11	Focus shifts to Jonah
2:10	Jonah is spared	4:1	Jonah is angry that Nineveh is spared
2:1	Jonah prays	4:2a	Jonah prays
2:2-6a	Refers to his distress in the deep	4:2a	Refers to his distress in Palestine
2:6b-7	Asserts God's merciful deliverance	4:2bc	Draws the inference that God may save Nineveh; he must flee to Tarshish
2:8	Draws insight from his deliverance: idolaters forsake the One that loves them	4:2d	Asserts the mercy of God that leads to deliverance
2:9	Jonah's response to Yahweh: worship with sacrifices and vows	4:3	Jonah's response to Yahweh: a plea for death
2:10	Yahweh's response to Jonah: he acts so that the prophet may respond properly to the divine mission (yet to be accomplished)	4:4	Yahweh's response to Jonah: he acts so that the prophet may respond properly to the divine mission (already accomplished)

TABLE 4

Section I (Chapters 1–2)		Section II (Chapters 3–4)	
1:1f.	Word of Yahweh to Jonah	3:1f.	Word of Yahweh to Jonah
1:3	Jonah's flight to Tarshish	3:3-4a	Jonah's journey to Nineveh
1:4	Yahweh sends a storm on the sea	3:4b	Jonah's preaching in Nineveh
1:5	The fear of the seamen	3:5	The repentance and faith of the Ninevites
1:6	The captain comes to Jonah and speaks to him	3:6	The report reaches the king
1:7f.	Efforts of the seamen to learn why the storm had come upon them	3:7f.	Proclamation of the royal decree
1:9	Jonah's proclamation of faith	3:9	The king's hope in Yahweh
1:10a	The seamen recognize Yahweh	3:10	The Ninevites are delivered
1:11f.	Jonah willingly gives himself to spare the seamen	4:1	Jonah is angry because God has spared Nineveh
1:14	The seamen pray to Yahweh	4:2f.	Jonah's prayer of complaint to Yahweh
1:17	Yahweh appoints a fish to bring about Jonah's deliverance	4:6-8	Yahweh appoints a plant, a worm, and an east wind to bring about Jonah's repentance
2:10	Yahweh speaks and Jonah is delivered	4:9-11	Yahweh reasons with Jonah about Nineveh's deliverance

heavy Aramean presence could be felt in the territories of the northern kingdom throughout its brief history. Syria and Israel were rival powers, changing and exchanging the same tracts of land several times. Moreover, it is documented fact (2 K. 18:26 par. Isa. 36:11) that even educated Judeans and Assyrian army officers could converse in Aramaic during the reign of Hezekiah (late 8th-early 7th cent. B.C.).

Furthermore, many of the words formerly submitted as Aramaisms have themselves been called into question:

(1) The usage of the relative particle *še* in place of *ʾᵃšer* (4:10) and in the compound forms *bᵉšellî* (1:12) and *bᵉšellᵉmî* (1:7) is not Aramaic (the Aramaic equivalent is *dî*), but Canaanite. It occurs as early as the Song of Deborah (Jgs. 5:7; cf. 6:17; 7:12; 8:26) and appears in Phoenician inscriptions (for the Phoenician influence in Jonah, see Loretz, *BZ*, N.F. 5 [1961], 19-24).

(2) Bewer (p. 12) cautions that *sᵉpînâ*, "ship" (1:5), often considered a word borrowed from Aramaic or Arabic, comes from the Hebrew root *spn*, meaning "to cover," and thus means either a decked vessel or the lower deck. Moreover, he warns that *mallāḥ*, "mariner" (1:5), often regarded as late because of its use by Ezekiel (27:9, 27, 29), is inconclusive because of the paucity of OT sea stories. The word *qᵉriʾâ*, "preaching" (3:2), is a hapax legomenon in the OT and common only in later literature, but is derived from the common Hebrew verb *qārāʾ*, "to call or preach," using a common Hebrew noun pattern. The word *ṭaʿam* (3:7) in the sense of "edict" may be derived from Aramaic (cf. Ezr. 6:14; Dnl. 3:10), or it may have been influenced directly by Akk. *ṭēmu*. Aside from the dubious Jer. 5:28, the verb *yiṯʿaššēṯ*, "will give a thought" (1:6), appears in the OT only in Dnl. 6:3 (MT 4), yet nouns from the same root appear in Job 12:5 and Ps. 146:4, leaving some room for doubting its Aramaic origin (Aalders, pp. 11f.).

B. Parallels with Joel. Oesterley and Robinson (pp. 372f.) observe the parallels with Joel (Jonah 3:9 par. Joel 2:14; Jonah 4:2d par. Joel 2:13c), but correctly warn that these are not to be overworked. Not only is it difficult to determine which writer influenced the other (the same may be said of the parallels found by Feuillet between Jeremiah and Ezekiel), but the date of the composition of Joel itself is hotly debated. Moreover, Jonah 4:2d par. Joel 2:13c reflects an old cultic credo, of a much earlier origin than either book.

C. Nineveh as a Great City. What appears at first glance to be the decisive indicator of a time for the book's composition is the clause *wᵉnînᵉwēh hāyᵉṯâ ʿîr gᵉḏôlâ lēʾlōhîm* (3:3b). Those who argue for the use of the verb as a narrative tense have not adequately considered its syntactical relationships. The meaning of the construction may be seen by means of contrasts with alternate forms that the writer rejected: *wattᵉhî nînᵉwēh ʿîr gᵉḏôlâ*, "and Nineveh became a great city"; and *wᵉnînᵉwēh ʿîr gᵉḏôlâ*, "and Nineveh was a great city." The former, with *wāw* consecutive and the imperfect, would most naturally make the growth of Nineveh subsequent to the last narrative tense (*wayyēlēḵ*, 3a), which makes no sense. The latter, with *wāw* disjunctive and the verbless clause, would mean that, at the time of Jonah's arrival, Nineveh was (already) a great city. But the extant text, utilizing *wāw* disjunctive and the perfect tense, would most naturally mean that at the time of Jonah's visit (viewed from a perspective some time in the future), Nineveh was a great city. If so, this clause would date the writing of the book as sometime subsequent to the fall of the Assyrian empire (*ca.* 612 B.C.). The clause is almost certainly a gloss, however (cf. J. H. Raven, *OT Intro.* [1910], p. 225); its intrusive nature may be recognized in the way it artificially disjoins v. 3 from v. 4a, whereas these elements are combined in one verse (1:3) in the first section.

Accordingly, there is no clear indication of when, or by whom, the book was written. Conservative scholarship has often identified the author as Jonah himself or one of his disciples (Young, *Intro. to the OT* [1960], p. 254). The argument (e.g., König, pp. 747f.) that the narration of the story in the third person suggests someone other than Jonah as the author seems vitiated when it is noted that Xenophon speaks of himself in *Anabasis* or Caesar of himself in *Gallic Wars* (Archer, p. 308) in a similar fashion. On the other hand, to indicate the possibility of a source near to Jonah for the story is not to demonstrate the probability, much less advocate such a conclusion. It should be kept in mind that nowhere does Jonah claim to have written the book, or any part of it.

In the light of the analysis given in the opening section of this article and the demonstrably formal character of the book, it seems better to regard the psalm as a cultic confession that was very early in its origins, yet had at some time acquired an association with Jonah and thus carried with it the substance of the narrative as it was transmitted (cf. the Psalms associated with David). The material would have been reworked subsequently by a single compiler, whose date is quite uncertain, into the formal structure that the book now manifests.

III. Interpretation. *–A. As Mythology.* Although it was once popular to dismiss the book of Jonah as a myth, such views have become increasingly difficult to defend. As the revelatory nature of biblical literature has become

better understood, it has become evident that the materials are not mythical or legendary in the common sense of those words. Even though the Scriptures may, on occasion, borrow mythical motifs in a fashion reminiscent of Milton's *Paradise Lost* (cf. Weiser on Ps. 19:4 [MT 5]), the meaning extracted from these motifs is quite distinct from that ascribed to them by Israel's pagan contemporaries. Furthermore, if the fish be construed as representing the dragon of the deep (*tannîn* or *liwyāṯān*, a vital element for this interpretation), confusion results, for the fish is not the means of Jonah's destruction, but of his salvation (cf. Oesterley and Robinson, pp. 377-79).

B. As Midrash. One particularly difficult explanation of the book (advanced by Budde, p. 228 and followed by Schedl, p. 328) regards it as a midrash. This interpretation understands the ancient confession in 4:2d as the point of the book, developed as a story to illustrate Ex. 34:6 and its parallels (Nu. 14:18; Neh. 9:17c; Ps. 86:15; 103:8; 145:8; Joel 2:13c; Nah. 1:3). Although it is known that a literary genre called midrash existed in the early postexilic period (2 Ch. 13:22; 24:27), the form and content of these works seem so uncertain that the category may be somewhat meaningless (cf. Landes, *IDB, Supp.*, p. 489). Nor is J. Soggin's "prophetic novel" more useful, for he has invented a genre to contain a single piece of literature (*Intro. to the OT* [1974], p. 355).

C. As Allegory. The allegorical interpretation of Jonah was popularized by Cheyne. Most exegetes of this persuasion depend heavily on the meaning of Jonah's name ("dove") and conclude thereby that Hosea's use of the dove to symbolize mindless Israel (cf. Hos. 7:11; 11:11; Ps. 74:19), a people incapable of recognizing Yahweh's goodness to them, justifies the interpretation that Jonah represents Israel. The fish, then, represents the Babylonian captivity, which swallows Israel (cf. Jer. 51:34, 44) but preserves them from destruction and ejects them after three days (cf. Hos. 6:2) with a mission to the nations. While this theory appears tempting at first glance, at a closer inspection it not only suffers from a lack of consistency in terms (the word for "dove" in Ps. 74:19 is *tôr*, not *yônâ*), but there is no hint of any sort that the compiler intended the book to be so construed. This is not the case with other biblical allegories, particularly the longer ones (e.g., Jgs. 9:7-16; Isa. 5:1-7).

D. As Symbol. The symbolic or parabolic interpretation of Jonah avoids the problems posed by allegory in that meaning is sought for the story as a whole and not necessarily for each of its component parts. As such, a parable constitutes a compact, rapidly developing story that is not necessarily factual but is realistic enough for its hearers to form analogies with their own individual situations. Burrows's "satire" and Miles's "parody" are particular varieties of symbolic interpretation. Kleinert, recently echoed by Berlin, while refusing to forfeit the historicity of the book, argues for a "symbolic prophecy" wherein the sense, not the history, of Jonah's story constitutes the reason for its inclusion in the prophetic canon and therefore is the element of the book which must be considered prophetic. This is a powerful argument and is not to be set aside easily.

E. As History. The historical interpretation of the book has come under attack from many quarters, and, in order to consider it, the objections to it must first be weighed.

First, an assumption that the book of Jonah reflects a late date of writing cannot be adduced as evidence of nonhistoricity. Not only is the date of writing uncertain, but an understanding of the function of writing itself plays a role. It is widely accepted that the bulk of material from the ancient Near East was first transmitted orally, frequently as liturgy, and reduced to writing only when its existence was threatened (cf. E. Nielsen, *Oral Tradition* [*SBT*, 1/11, 1954], pp. 32f.). The tenacity of oral tradition, together with its demonstrably high degree of accuracy, robs this objection of much of its weight.

Second, appeal cannot be made to the fish story as evidence of nonhistoricity. While the throats of most whales are too narrow to swallow a man, the *cachalot* or sperm whale can (Harrison, p. 907). Moreover, G. Macloskie (*Bibliotheca Sacra*, 72 [1915], 334-38) has suggested that even other species of whales could preserve a man alive, were the man able to reach the great laryngeal pouch. This structure, with its thick, elastic walls, is large enough to contain a man and to supply him with air for breathing. A. J. Wilson (*Princeton Theological Review*, 25 [1941], 636) records the case of a man swept overboard by a harpooned sperm whale in the vicinity of the Falkland Islands. The whale was eventually killed and cut apart. After three days, the missing sailor was found in the animal's stomach, unconscious. He was successfully revived, although the skin of his face, neck, and hands was bleached white by the whale's gastric juices.

A third objection is frequently raised because Nineveh is called *'îr g^{e}ḏôlâ lē'lōhîm mah^{a}laḵ š^{e}lōšeṯ yāmîm* (3:3b; cf. 1:2; 3:2). Claus Schedl (p. 327) has argued that Nineveh could not be called a great city if the author wrote in the 8th cent. B.C. Moreover, the inner wall of historical Nineveh had a circumference of only about 13.5 km. (7¾ mi.), yielding a diameter that could in no way be construed as a three days' journey. While it is true that it was Sennacherib who extensively rebuilt the city, it had already become a royal residence by the time of Tiglath-pileser I (12th cent. B.C.) and both Ashurbanipal II (883-859 B.C.) and Sargon II (722-705 B.C.) had palaces there. Furthermore, D. J. Wiseman (*NBD, s.v.* "Nineveh") suggests that the Hebrew translation of *nînᵉwēh* does not distinguish between the *ninua(ki)*, or city district, and the *(al)-ninua*, or metropolis. Accordingly, Jonah 3:3b would refer to the entire administrative district of Nineveh, which was about 50 to 90 km. (30 to 60 mi.) across. Wiseman finds a remarkable agreement between Jonah 4:11 and the survey made by Felix Jones (1834), in which the population of Nineveh was estimated to have been about 175,000 persons.

The remaining objections are far less serious than those mentioned above. R. H. Pfeiffer's comment (*PIOT*, p. 588) that calling the Assyrian regent "the king of Nineveh" was tantamount to addressing the king of England as "king of London" can no longer be taken seriously, for subsequent investigation has revealed that this style of designation for a ruler was not uncommon among Israelite writers. Thus Ahab is occasionally designated the "king of Samaria" (1 K. 21:1; 2 K. 1:3). Moreover, it is always possible that the "king of Nineveh" was just that — a city governor — and not the Assyrian monarch.

Those who stress the improbability of a heathen city converting at the preaching of a foreign prophet have not adequately considered the tendency among polytheists in the ancient Near East to absorb whatever god seems most powerful into one's own pantheon and to nationalize him. It is possible to identify the revival at Nineveh with the religious reforms brought about by Adadnirari III *ca.* 800 B.C. that elevated Nabû to prominence. Archer (pp. 299f.), following Steinmueller, suggests that if Jonah had arrived in Nineveh during the reign of Aššur-dân III, he would have found the city psychologically prepared for a total catastrophe, since a plague had swept the city in 765, an eclipse of the sun had occurred in 763, and a second plague had followed in 759 B.C.

The mourning of the animals (3:8) may be explained as

a poetic description of their bawling for food and water. The miraculous growth of the *qîqāyôn* plant (4:10) may be taken as hyperbole, simply indicating extremely rapid growth.

With these objections answered, it should be concluded that there is no insurmountable obstacle to a historical approach to the book of Jonah. On the other hand, to demonstrate that it *could* be considered history is not the same thing as proving that it is, indeed, historical. The common appeal to the words of Jesus (Mt. 12:38-41 par. Lk. 11:29-32) must be tempered with considerable caution, for it may be argued that a typology is satisfied by the appearance of the type in the OT and does not demand real existence as well (C. Stuhlmueller, *Books of Aggai, Zacharia, Malachia, Jona, Joel, Abdia* [Pamphlet Bible, 1961], p. 48). No interpretation is without its problems, although it would seem that the symbolic and historical explanations are least objectionable.

IV. Message.–A. As a Postexilic Reaction. Because of its sweeping universalism, the popular trend has been to classify Jonah, like Ruth, as a polemic reacting against the excessive separatist zeal manifested by some of the followers of Ezra and Nehemiah (Oesterley and Robinson, Burrows). However, this constitutes a specimen of circular reasoning of classic proportions. Not only is there real reason to question a late date for the book of Ruth, but there is no hint of polemic in either composition (cf. R. E. Clements, "Purpose of the Book of Jonah," in *SVT*, 28 [1975], 18f.) or even the need for one in the books of Ezra and Nehemiah! Instead, the book of Jonah finds its nearest analogue in the traditions about Elijah and Elisha.

B. As a Supplement to Nahum. A more helpful suggestion has come from T. F. Glasson (*Expos.T.*, 81 [1969], 54f.). In comparing Jonah with Nahum — the other prophetic oracle to Nineveh — he observed that both books conclude with a question. Nahum's question implies judgment for Nineveh (3:19c, "For upon whom has not come your unceasing evil?"), whereas the conclusion of Jonah implies salvation and deliverance (4:11a, "and should not I pity Nineveh. . . ?"). The function of Jonah would then be to soften the harshness of Nahum and preclude the assumption that God had forever cast off the Assyrians. If it is incorrect to construe 3:3b as a gloss, this interpretation has much to commend it. Since the book of Jonah has proved so difficult to date conclusively, however, it would appear preferable to adopt an interpretation that does not automatically force the writing of the book later than 612 B.C.

C. As a Prophetic Proclamation of Grace. That the book of Jonah has a single didactic aim has been strongly suggested by the foregoing analysis of its literary structure. Moreover, the formal structure of the book would suggest that clues to its meaning are especially prominent in 2:10 (Jonah's deliverance), which prepares the way for the climax of the book, and in 4:9-11, the climax itself (God's justification of Nineveh's deliverance). Further insight is gained by the recognition of the central position enjoyed by 1:9, 10a (Jonah's confession of faith followed by the recognition of Yahweh by the seamen) and 3:9, 10 (the king's hope in Yahweh followed by God's deliverance of Nineveh) in their respective pericopes. Jonah's personal deliverance from the fish constitutes the grounds for God's justification of the collective salvation of Nineveh. The reader is led to this by Jonah's own confession of faith resulting in the deliverance of the seamen and by the king's confession of hope followed by the deliverance of Nineveh.

The message would seem to be, then, that faith in God leads to deliverance and salvation. The seamen confess their faith in Yahweh and are saved from the sea (ch. 1), Jonah confesses his faith in Yahweh and is saved from drowning (ch. 2), the Ninevites confess their faith in Yahweh and are saved from destruction (ch. 3), and at the conclusion of the book, God is reasoning with Jonah in an effort to bring him to a place of repentance and renewed faith that would bring about his final salvation.

In its abrupt end, the reader is suddenly addressed by the word of God: it is no longer a simple story about Jonah, but one about the reader himself (B. S. Childs, *SJT*, 11 [1958], 61). In the final analysis, "it is the prophet himself who is judged and, through him, those who read his story" (Scott, p. 19). The brutal Assyrians have been seen more ready to repent and to accept God's grace than one Israelite who has already been shown grace. The tale of Jonah, then, instead of a "fish story" that proves a perennial embarrassment, develops a theme (together with the other universalist passages of the prophets, e.g., Isa. 2:2-4 par. Mic. 4:1-3; Isa. 19:21; 60:1-9) that constitutes the grandest of the entire OT and prepares the way for the institution of the new covenant.

Bibliography.–Among the older commentaries, KD and Lange (Kleinert) are still useful. Among the more recent works listed below, Harrison's *Intro.* is invaluable for a survey of the critical problems.

W. C. WILLIAMS

JONAM jō′nəm [Gk. *Iōnam*]; AV JONAN (TR *Iōnan*). An ancestor of Jesus in Luke's genealogy (3:30).

JONAN jō′nən. *See* JONAM.

JONAS jō′nəs [Gk. *Iōnas* < Heb. *yônâ*].

1. (1 Esd. 9:23, AV, NEB). *See* JONAH **2.**

2. The name given in the AV Apoc. and NT to the OT prophet Jonah (2 Esd. 1:39; Tob. 14:4, 8; Mt. 12:39-41; 16:4; Lk. 11:29-32).

3. The AV name for Simon Peter's father (Jn. 21:15f.). *See* JOHN (NT) **5.**

JONATH-ELEM-RECHOKIM jō′nəth ē′lem rə-hō′kim [Heb. *yônaṯ ʾēlem rᵉḥōqîm*]. Title of Ps. 56 in the AV. Literally "the dove of the distant terebinths," perhaps the name of a popular melody to which the psalm was to be sung. *See* MUSIC; PSALMS.

JONATHAN jon′ə-thən [Heb. *yᵉhônāṯān, yônāṯan*–'Yahweh has given'; Gk. *Iōnathan*].

1. The young Levite of Jgs. 17–18, referred to by name in 18:30, where he is called "the son of Gershom, son of Moses," and where AV has Manasseh for Moses, following the MT in which the letter *nūn* of Manasseh is suspended. Rashi states the reason thus: "Because of the honor of Moses was the *nūn* written so as to alter the name." The original word was Moses, but it was thought undesirable that a descendant of his should have anything

to do with images; and so Jonathan was made to have affinity (metaphorically) with Manasseh.

Jonathan was a Levitical Judahite of Bethlehem in Judah, who came to the house of Micah, in the hill country of Ephraim, and hired himself as a priest in Micah's sanctuary (17:1-13). The Danites sent five men north to spy for new territory, and on their way the spies came to the house of Micah, where they found Jonathan and consulted the oracle through him (18:1-5). Having received a favorable answer, they set out and came to Laish, and on their return south they advised that an expedition be sent there (18:6-10). Their clansmen accordingly sent out a band of warriors who on their way passed by Micah's house. The spies informed their comrades of the ephod and teraphim and images there, and they seized them, inducing Jonathan at the same time to accompany them as their priest (18:11-20). At Laish he founded a priesthood which was thus descended from Moses (18:30).

2. Son of King Saul. See the next article.

3. (2 S. 15:27, 36; 17:17, 20; 1 K. 1:42f.). Son of Abiathar the priest. He acted with Ahimaaz as courier to inform David of events at Jerusalem during Absalom's revolt. It was he who also brought to Adonijah the news of Solomon's accession.

4. (2 S. 21:21 par. 1 Ch. 20:7). Son of Shimei or Shimea, David's brother. He is said to have been the slayer of Goliath. *See* JEHONADAB **1.**

5. (2 S. 23:32; 1 Ch. 11:34). One of David's mighty men. *See* JASHEN.

6. (1 Ch. 2:32f.). A Jerahmeelite.

7. (1 Ch. 27:25, AV JEHONATHAN). Son of Uzziah, and one of David's treasurers.

8. (1 Ch. 27:32). A *dôḏ* or uncle (NEB "nephew") of King David. If the NEB rendering is correct, he would be identified with **4** above. He was a royal scribe and counselor to the king.

9. (Ezr. 8:6; 1 Esd. 8:32). Father of Ebed, a returned exile.

10. (Ezr. 10:15; 1 Esd. 9:14). One who either supported (RV) or opposed (RV mg., AV, RSV, NEB) Ezra in the matter of foreign marriages. *See* JAHZEIAH.

11. (Neh. 12:11). A priest, descendant of Jeshua (Joshua) = Johanan (12:22f.). *See* JEHOHANAN **3.**

12. (Neh. 12:14). A priest.

13. (Neh. 12:35). A priest, father of Zechariah.

14. (Jer. 37:15, 20; 38:26). A scribe in whose house Jeremiah was imprisoned.

15. (Jer. 40:8). Son of Kareah; a Judahite captain who joined Gedaliah after the fall of Jerusalem.

16. [Gk. *Iōnathēs,* 1 Macc. 2:5; 9:19; etc.; 2 Macc. 8:22]. The Maccabee surnamed Apphus in 1 Macc. 2:5, son of Mattathias.

17. Son of Absalom (1 Macc. 13:11). He was sent by Simon the Maccabee to capture Joppa (cf. 11:70, where a Mattathias son of Absalom is mentioned).

18. A priest who led in prayer at the first sacrifice after the return from exile (2 Macc. 1:23). D. F. ROBERTS

JONATHAN [Heb. *yᵉhônāṯān, yônāṯān*–'Yahweh has given'; Gk. *Iōnathan*]. The eldest son of Saul, the first king of Israel, of the tribe of Benjamin.

I. Three Periods.–The life of Jonathan, as far as we are told about him, falls naturally into three periods.

A. First Period. He came on the scene as the right hand and lieutenant of his father in his early struggles to beat off the hostile tribes, especially the Ammonites (1 S. 11), who beset the territory of Israel on all sides. As soon as Saul had gained his first decisive victory, the people rallied to him in great numbers, so that he was able to count upon three thousand men whenever they took the field. These were divided into two small armies, Saul retaining two thousand and making Michmash his headquarters, the rest being stationed at Gibeah under Jonathan, about 8 km. (5 mi.) distant. Jonathan thus commanded the base, while his father led the fighting force. Midway between the two camps was a Philistine outpost at Geba, facing Michmash across the pass of that name, a valley with steep sides, now the Wâdī Ṣuweinīṯ. Saul does not seem to have felt himself strong enough to commence hostilities against the Philistines, and took means to increase the forces at his disposal. The Philistines heard that the Israelites had cast off their yoke (1 S. 13:3b: for "Let the Hebrews hear," read "The Hebrews have revolted"; cf. the LXX), and came out in great numbers (13:5). They seem to have compelled Saul to evacuate Michmash, which they occupied. Saul fell back on Gibeah (13:16) and Gilgal with a greatly reduced following. In spite of this, Jonathan accompanied only by his armor-bearer surprised the Philistine outpost at Geba, who were killed to a man. This feat precipitated a general engagement, in which the Israelites, whose only weapons appear to have been their farming implements (Saul and Jonathan alone being armed with iron swords and spears), routed their enemies (13:20). The completeness of the victory was impaired by the superstitious action of Saul in refusing to allow the people to eat until the day was over (14:24). As this order was unwittingly broken by Jonathan, Saul wished to have him executed, but this the people refused to allow, as they clearly recognized that the credit for the victory was due to the energetic action of Jonathan in striking before the enemy had time to concentrate.

B. Second Period. The second period of the life of Jonathan was that of his friendship with David. The narrative is too well known to need recapitulating, and the simple tale would only be spoiled by telling it in other words. Jonathan's devotion to David was such that he not only supported him against Saul, his father (chs. 18–19), but was willing to surrender to him his undoubted claim to become Saul's successor (ch. 20). Their last meeting took place in the wilderness of Ziph, S of Hebron, some time after David had been driven into hiding (23:16-18).

C. Third Period. The third phase of Jonathan's life was that of the exile of David, when Saul was directing his energies to combat what he considered the rebellion of the son of Jesse. During this civil war, if that can be called war in which one of the two sides refuses to take the offensive against the other, Jonathan remained entirely passive. He could not take part in proceedings which were directed against his friend whom he believed to be destined to occupy the place which he himself should in the ordinary course of events have filled. We therefore hear no more of Jonathan until the encroachments of the Philistines once more compelled Saul to leave the pursuit of the lesser enemy in order to defend himself against the greater. Saul's last campaign against the Philistines was short and decisive: it ended in the defeat at Gilboa and the death of himself and his sons. The men of Jabesh-gilead, out of gratitude for Saul's rescue of their town at the beginning of his reign, crossed over to Beth-shan, on the walls of which town the Philistines had hung in chains the bodies of Saul and Jonathan, and took them down under cover of darkness and carried them to Jabesh. There they burned the bodies after the manner of the primitive inhabitants of the land, and buried the bones.

II. His Character.–Jonathan was a man of fine character, whose moral probity was matched by resolution and endurance. He was athletic and brave (1 S. 14:13; 2 S. 1:22f.). He could keep his plans secret when secrecy was

necessary in order to carry them to a successful issue (14:1), and could decide on what course of action to follow and act upon it in an instant. His attack upon the Philistine garrison at Geba (or Gibeah, if we adopt the reading of the LXX and the Tg. of 13:3; cf. 10:5) was delivered at the right moment, and was as wise as it was daring. If he had a fault, from a military point of view, it may have been an inability to follow up an advantage. The pursuit of the Philistines on the occasion referred to ended with nightfall. In this respect, however, he perhaps cannot be justly censured, since he never had an entirely free hand.

III. Filial Piety.–Jonathan's independence and capacity for acting on his own responsibility were combined with devotion to his father. While holding his own opinion and taking his own course, he conformed as far as possible to his father's views and wishes. Filial duty could not have been more severely tested than was that of Jonathan, but his conduct toward both his father and his friend is above criticism. Only on one occasion did his anger get the better of him (1 S. 20:34) under gross provocation; Saul had impugned the honor of Jonathan's mother (20:30, LXX) Ahinoam (14:50), and made an attempt on Jonathan's life. The estrangement was momentary; Saul and Jonathan were undivided in life and in death (2 S. 1:23).

IV. Friendship with David.–But it is as the befriender of David that Jonathan will always be remembered. His devotion to David was altogether human; had it been dictated by a superstitious belief in David's destiny as the future ruler of his people (23:17), that belief would have been shared by Saul, which was not the case (20:31). In disinterestedness and willingness to efface his own claims and give up his own titles the conduct of Jonathan is unsurpassed, and presents a pleasing contrast to some of the characters we meet in the Bible. Jonathan and David stand for the highest ideal of Hebrew friendship, as do Damon and Pythias in Greek literature.

V. Inspired Affection.–We may be sure that Jonathan won the affection of the people. His armor-bearer was ready to follow him anywhere (14:7). David's devotion to him seems to have been sincere, although it also happened to coincide with his own self-interest. Jonathan appears to have inspired as great an affection as he himself felt (1 S. 20:41; 2 S. 1:26). His quarrel with his father was largely due to the solicitude of the latter for his son's interests (1 S. 18:29; 20:31).

VI. His Descendants.–Jonathan's sons were, in common with his brother's, killed in the wars. One alone — Merib-baal (Mephibosheth) — survived. Jonathan's posterity through him lasted several generations. A table of them is given in 1 Ch. 8:33-40 par. 9:40-44 (cf. 2 S. 9:12). They were famous soldiers and were, like their ancestors, distinguished in the use of the bow (1 Ch. 8:40).

T. H. WEIR

JOPPA jop'ə [Heb. *yāp̄ô, yāp̄ô'*–'beautify, beautiful'; Akk. *Ia-pu* (Am.Tab. 138:85; 294:20; 296:33), *Ia-a-pu* (Am. Tab. 138:6), etc.; Egyp. *Ya-pu* (e.g., list of Thutmose III, no. 62 [*ANET*, p. 242]); Phoen. *ypy*; Gk. *Ioppē*]; AV also JAPHO (Josh. 19:46). The ancient name is preserved in Arab. Yafa, modern Jaffa, just S of Tel Aviv. A small harbor town on the Palestinian coast, situated on a rocky promontory about midway between Mt. Carmel and Gaza (Strabo *Geog.* xvi.2.28; Pliny *Nat. hist.* v.14 [69]), 56 km. (35 mi.) NW of Jerusalem.

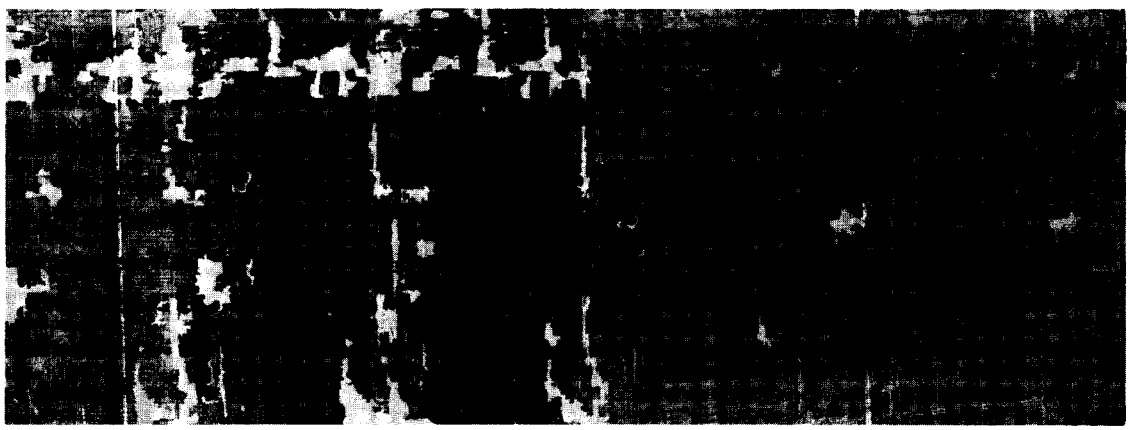
I. Description.–Though Joppa never became a major seaport, it was of some importance as a logistical base and an outlet to the Mediterranean. The entrance to the small cove is from the north and is not very safe. The cove is formed by a natural breakwater of rocks parallel to the shore and about 100 m. (330 ft.) from it. The Hellenes said that Andromeda was bound to a rock of this chain to be devoured by a sea monster to appease Poseidon, but Perseus rescued her in time (Josephus *BJ* iii.9.3. [419ff.]).

South of Joppa the coastal sands have penetrated inland, forming a barrier to access from the sea. To the north sandstone ridges also made the shore uninviting to seafarers; the next landing place was 6 km. (3 mi.) distant at the mouth of the Yarkon (Josh. 19:46; RSV ME-JARKON).

II. History.–A. Late Bronze Age. Though the site was fortified in the Middle Bronze Age, Joppa is first mentioned in historical sources in the topographical list of Thutmose III as one of the towns conquered during his first campaign (mid-15th cent. B.C.). There is also a legendary account of the conquest of Joppa by one of his generals (also called Thutmose) who used a ruse, smuggling troops into the city in baskets while he enjoyed a banquet with the local ruler (*ANET*, pp. 23f.).

From the Amarna Letters (14th cent. B.C.) it is clear that a royal granary (*shunuti*) was established there (294:22). A certain Ya'tiru affirmed his responsibility for guarding both Gaza and Joppa (296:31-33). During the Ramesside period the "Satirical Scribe" depicted the beauty of the gardens at Joppa; more importantly, he detailed the work done there at the Egyptian ordnance center, where chariots were brought for repairs (*ANET*, p. 478). The gate of the city was ornamented with the cartouche of Ramses II.

Papyrus Anastasi I (cols. 24-25). This hieratic text describes the Syro-Palestinian geography of the 13th cent. B.C., including the area of Joppa (Trustees of the British Museum)



B. Israelite Period. Joppa does not appear often in the Bible, but it must have served as a seaport during the monarchal period (Jonah 1:3). It may have been included in the inheritance of Dan, though one can understand the passage differently (Josh. 19:46). Even if the Danites did not occupy their assigned place (19:47f.), the description of their inheritance seems to correspond to the second commissioner's district under Solomon (1 K. 4:9), and Joppa was the port to which timber was shipped for the Solomonic building projects in Jerusalem (2 Ch. 2:16 [MT 15]).

By the 8th cent. B.C. Joppa was not under Israelite control, but part of the dominion of Ṣidqia king of Ashkelon. Sennacherib occupied it, along with other towns in the immediate hinterland, during his march southward to quell the rebellion headed by Hezekiah and some Philistine city-states (*ANET*, p. 287b).

C. Persian Period. Those who returned to Jerusalem after the decree of Cyrus (*ca.* 538 B.C.) again hired Tyrians to ship lumber to Jerusalem via Joppa (Ezr. 3:7; 1 Esd. 5:55). It is not clear to whom the town belonged — perhaps the Phoenicians. During the 5th cent. B.C. the area called "Dor and Joppa, the mighty grain lands, which are in the territory of Sharon" was ceded to Eshmun'azar king of Sidon by the Persian "Lord of Kings" (*ANET*, p. 505b), possibly Artaxerxes I.

D. Greco-Roman Period. Along with the rest of the Syrian coast, Joppa was taken by Alexander on his march from Tyre to Gaza (332 B.C.). He established a mint there. The hellenized name of the town was made to derive from that of Iope, a daughter of Aeolos the wind-god, and the wife of Kepheus, the alleged founder and first ruler of the town (Stephanus Byzantius 220.13ff.). After Alexander's death, Ptolemy I of Egypt occupied all of the Phoenician coast including Joppa (320 B.C.) and put garrisons there (Diodorus xviii.43; xix.59), but five years later Antigonus (of Phrygia) took the town for himself and stationed his own troops there. Ptolemy soon recaptured it, but razed the town, along with Acco, Samaria, and Gaza (312 B.C.), on his retreat to Egypt (Diodorus xix.93). The entire country returned to Egyptian hands after the battle of Ipsus (301 B.C.) and remained so until the battle of Paneion gave it to Antiochus III of Syria. (Ptolemaic control is reflected in the Zenon Papyri.)

During the Maccabean war against Antiochus IV the Jews of Joppa suffered at the hands of their neighbors (163 B.C.); two hundred were drowned in the harbor. For revenge Judas Maccabeus destroyed the harbor installations by fire, but could not take the city (2 Macc. 12:3-9). Jonathan later took it (147 B.C.), but was unable to hold it (1 Macc. 10:69-85; 11:1-6; Josephus *Ant.* xiii.4.4 [88-101]). Simon finally gained control over Joppa (1 Macc. 12:33f.; 13:11; 14:5, 34).

When the Romans took control, Pompey joined Joppa to the province of Syria (Josephus *Ant.* xiv.4.4 [74-76]; *BJ* i.7.7 [156-166, 169f.]). Caesar restored it to the Jews (*Ant.* xiv.10.6 [127-143]), Anthony gave it to Cleopatra (xv.4.1 [95]), and Caesar transferred it back to Herod (xv.7.3 [217]; *BJ* i.20.3 [396]).

The apostle Peter came to Joppa to raise Dorcas (Acts 9:36f.), and while he was there he had his vision of the ministry to the Gentiles (Acts. 10; 11:5-17).

During the war against Rome (A.D. 66-70) the Jews used Joppa as a sea base, but it was soon captured and destroyed by Vespasian (Josephus *BJ* iii.9.2 [414ff.]).

III. Excavations.—The site has most recently been investigated by J. Kaplan of the Tel Aviv Museum. Several seasons of excavations have illumined many facets of the city's history. Seven main strata, with some substrata, have been discerned, representing M.B., L.B., Iron Age, and the Persian and Hellenistic periods. Most noteworthy among the finds are the city gate from Ramesside times and a pre-Philistine temple.

Bibliography.—S. Tolkowsky, *Gateway of Palestine: A History of Jaffa* (1924); A. Alt, *KS*, I, 224 n. 2; *EAEHL*, II, *s.v.* "Jaffa" (H. and J. Kaplan); Y. Aharoni, *Tel Aviv*, 3 (1976), 5-15.

A. F. RAINEY

JORAH jō'rə [Heb. *yôrâ*–'early rain'(?)]; AV Apoc. AZEPHURITH; NEB Apoc. ARSIPHURITH. A family that returned with Zerubbabel (Ezr. 2:18; 1 Esd. 5:16), called HARIPH in Neh. 7:24.

JORAI jôr'ī [Heb. *yôray*–'Yahweh teaches'(?)]. A Gadite chief, but possibly the name of a clan (1 Ch. 5:13).

JORAM jôr'əm. *See* JEHORAM.

JORDAN jôr'dən [Heb. *yardēn*; Gk. *Iordanēs*]. The most important river in Palestine and the valley or rift in which it flows.

I. Name
II. Prehistoric Times
III. Sources
  A. Nahr Bâniyâs
  B. Nahr Leddan
  C. Nahr Ḥasbânī
  D. Nahr Bereighith
IV. Huleh Valley
V. Sea of Galilee
VI. Jordan Valley
  A. Western Tributaries
  B. Eastern Tributaries

I. Name.—The name superficially means the "river that goes down." All rivers, however, flow downward, although some, like the Jordan, flow more precipitately than others. The root of the word "Jordan" may more correctly be related to the Arabic root *wrd*, "to come to," conveying the idea of people and animals seeking out a source of water. This idea is suggested in the term sometimes used by the Arabs for the Jordan, namely, esh-Sherī'ah, "the drinking place."

II. Prehistoric Times.—The Jordan River is situated in part of the Great Rift Valley, or geological fault, a series of depressions in the earth's crust, extending from Syria, in Western Asia, to the Gulf of Aqabah and continuing to southeast Africa.

During the Upper Pleistocene period a single body of water called the Lisan Lake stretched from the Beqa' Valley, between the Lebanon and Anti-Lebanon mountains, to the Wâdī el-'Arabah. Evidences of early people and tools were found by D. A. E. Garrod and T. D. McCown in the Mt. Carmel caves, Mughâret el-Wâd, es-Sukul, and et-Tabun, from the Lower Paleolithic Age (before 70,000 B.C.), Middle or Mousterian (before 35,000 B.C.) and Upper (before 10,000 B.C.), as well as from the Natufian (before 7000 B.C.).

Since 1967 O. Bar-Yosef has directed excavations at another prehistoric site S of the Sea of Galilee called 'Ubeidiya. He has explained, in regard to the Lisan Lake, that "the advance and retreat of the water was repeated twice." Then the process was abruptly halted by "the very forces that had created the valley in the first place by tectonic movements." Sedimentary layers, "deposited both in the lake and on the land," and which generally "lay in horizontal strata, were suddenly folded and faulted until they became steep slopes." At the same time the "tilted formation was covered by a layer of lava" and other deposits. The final covering was the grayish-white marly sediment (Arab. *qattara*) of the salty water of the Lisan Lake, the top of which was about 392 m. (1286 ft.) below sea level, and the bottom about 783 m. (2570 ft.). The clay and gypsum sediments were similar to those found on the peninsula called el-Lisan ("tongue"), extending into the Dead Sea from its eastern shore. As the Lisan Lake finally retreated, the Huleh Valley, the Sea of Galilee, the Jordan River and Valley, and the Dead Sea (392 m. [1286 ft.] below sea level) were formed. Chunks of bitumen have been seen in the Dead Sea in modern times.

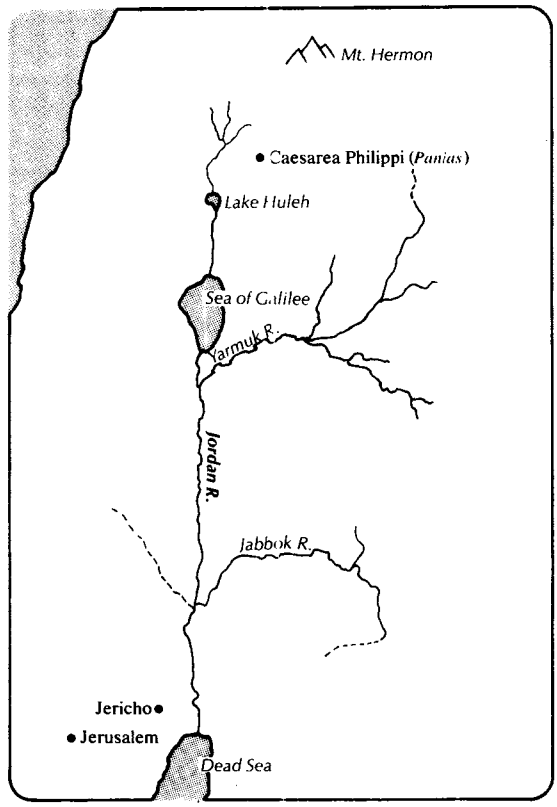
The Jordan River near prehistoric 'Ubeidiya is 70 m. (230 ft.) below sea level. Evidence of early hunters and food gatherers of four different cultural groups was found there. Lower Paleolithic stone tools, such as choppers, hand axes, and hammers were discovered, plus bones of amphibians and of numerous animals including bears, tigers, wild horses and oxen, deer, giraffes, rhinoceroses, hippopotami, and elephants.

Two main levels characterize the Jordan Valley. The upper one is called in Arabic *el-Ghôr*, "depression," in biblical Heb. *kikkār hayyardēn*, the "rift [or 'valley'] of the Jordan," a "garden of the Lord" (Gen. 13:10). The lower part is known as the *Zôr*, "thicket," equivalent to the biblical *ge'ôn hayyardēn*, "jungle [NEB 'dense thickets'] of the Jordan" (Jer. 12:5; 49:19; 50:44; Zec. 11:3). Some sections are called *'ēmeq*, "deep valley" (Ps. 60:6 [MT 8]; 108:7 [MT 6]), *biq'â*, "fissure" or "opening-out" (Dt. 34:3; Josh. 12:7), or *'ᵃrāḇâ*, "plain" (Nu. 22:1; Josh. 4:13). Between the Ghor and the Zor are the barren, strangely formed *Qattara* (Lisan) slopes of grayish-white marls and clays.

In Upper Galilee (Roman Tetracomia; M. Avi-Yonah, *Holy Land*, pp. 133f.) the Meiron Excavation Project conducted an archeological survey of many sites of importance in the Roman and Byzantine periods, and found synagogues and churches. At Khirbet Shema' (Teqo'ah of Galilee) and Meiron they excavated synagogues (E. M. Meyers, *et al.*, *AASOR*, 42 [1976], 73-98; 43 [1978], 45-118; *BASOR*, 230 [Apr. 1978], 1-24).

III. Sources.–The fairest part of the great geologic fault to which the Jordan belongs is the valley of the Lebanon, the Beqa' (Heb. *biqaṯ halleḇānôn* (Josh. 11:17; modern Hollow- or Coelesyria). Its fertile fields and streams have helped to fill it with settlements and cities from earliest antiquity. A glittering crown was the fabulous city and sanctuary of Baalbek (Heliopolis). North of it the Orontes River (Nahr el-'Aṣī) commenced its northward course to turn westward ultimately and flow through the ancient city of Antioch and into the Mediterranean. The evangelical efforts of early Christianity proved most fruitful at Antioch-on-the-Orontes, where Barnabas and Paul preached (Acts 11:19-26; 13:1-3), and the converts to the new faith "were for the first time called Christians."

South of the Lake of Homs, and several kilometers S of Baalbek, the Leontes River begins. It flows southeast around the base of the Lebanon Mountains through a deep canyon and empties into the Mediterranean N of Tyre. High in the hills commanding the sharp bend in the river



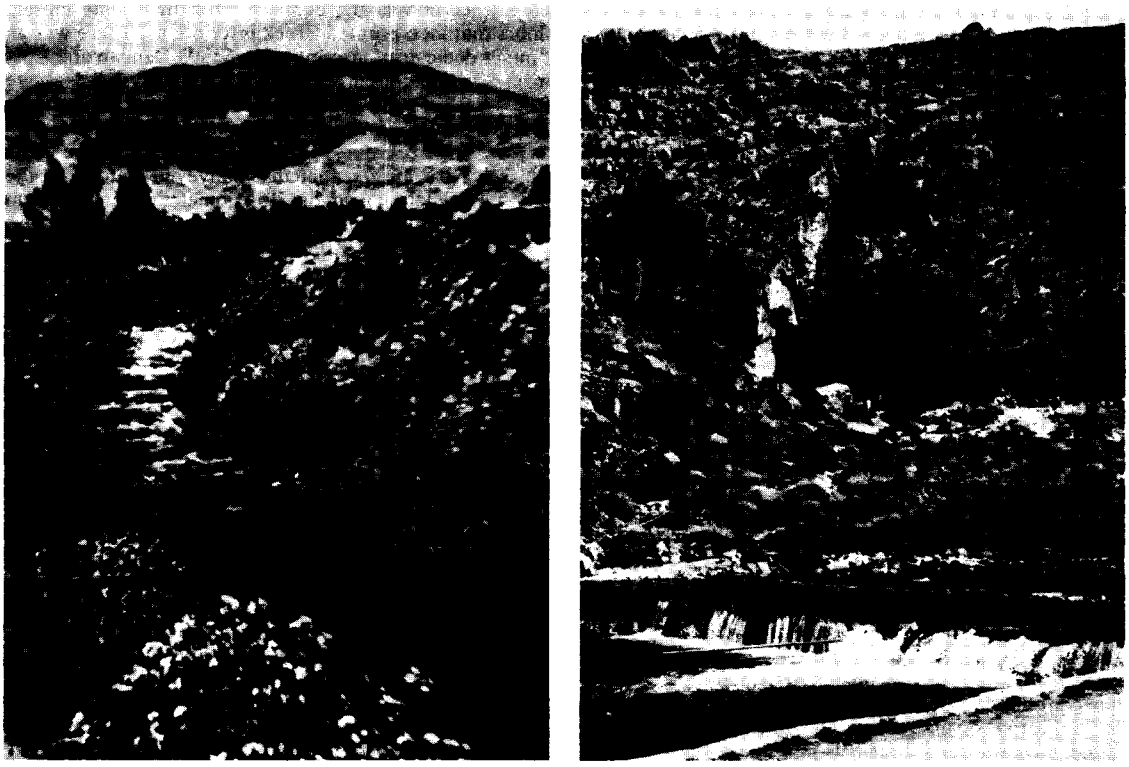
the Crusaders built the magnificent fortress of Beaufort (Belfort, Qala'at esh-Shaqif) in the late 12th century.

The union of four streams, born of springs originating from the snows of Mt. Hermon, forms the Jordan River. Also called the Jebel esh-Sheikh, the "mountain chieftain," Mt. Hermon seems to bestow grandeur and spirituality on the area (cf. Ps. 42:6 [MT 7]). The mountain range extends northeast and southwest for a distance of nearly 32 km. (20 mi.) and dominates the Jordan Valley. The principal peak is divided into three summits. The highest is 2814 m. (9232 ft.) above sea level, perpetually snow-capped, and is reflected in the waters of the Sea of Galilee; the other two are only a little lower. In later years a shrine was built there called Baal-hermon (Jgs. 3:3). Hermon was also known as "Sirion" by the Sidonians (Jer. 18:14), and "Senir" by the Amorites (Dt. 3:9).

A. Nahr Bâniyâs. The easternmost of the four sources of the Jordan is the Nahr (River) Bâniyâs, issuing forth with powerful flow from a cave (335 m. [1100 ft.] above sea level) at the base of a great limestone cliff of Mt. Hermon. It falls about 180 m. (600 ft.) in the 8 km. (5 mi.) of its course. Throughout the ages men have built shrines there. One of them was the seat of Baal-gad in the valley of Lebanon (Josh. 11:17; 12:7; 13:5). In Hellenistic times this cave was dedicated to the god Pan, and named Paneion; the town and district were known as Paneas (Arab. Bâniyâs).

Herod the Great received the whole district as a present from Augustus Caesar, for whom he built a white marble temple. When Herod Philip inherited Paneas he named the town Caesarea Philippi, to distinguish it from his father's Caesarea (Maritima) on the Mediterranean coast. Jesus and His disciples were in the district of Caesarea Philippi (Mt. 16:13-28; Mk. 8:27-33).

B. Nahr el-Leddan. The Nahr el-Leddan, "river of Dan," W of the Bâniyâs, is the shortest but strongest of



Two of the four sources of the Jordan: the Nahr Ḥasbânî (left) and the Nahr Bâniyâs (W. S. LaSor)

the sources of the Jordan. It originates in the powerful spring of ʿAin Leddan at the foot of the artificial mound of Tell el-Qâḍî ("the hill of the Judge"), known in Egyptian texts as Lus(i), and later as the Phoenician town of Laish or Leshem, before the tribe of Dan conquered it (Jgs. 18:27; Josh. 19:47) and made familiar the words "from Dan to Beer-sheba" (1 S. 3:20; 1 K. 4:25).

C. Nahr Ḥasbânî. The longest source of the Jordan, and most directly in line with it, is the Ḥasbânî, about 39 km. (24 mi.) long. It begins in an excellent spring (520 m. [1700 ft.] above sea level) at the foot of one of the western buttresses of Mt. Hermon, descends about 460 m. (1500 ft.), and parallels for a considerable distance the lower part of the southern course of the Leontes ("lion," Nahr Līṭânî). The two streams are separated less than 8 km. (5 mi.) from each other until the Leontes turns westward through a narrow deep gorge and empties into the Mediterranean Sea.

D. Nahr Bereighith. The westernmost source of the Jordan is the small mountain stream called the Nahr Bereighith, "the flea river." Through a small rocky gorge it rushes southward through the plain of Ijon (1 K. 15:20; modern Merj ʿAyûn) to enter into the Nahr Ḥasbânî about a kilometer above the junction of the Leddan and Bâniyâs streams.

All four streams lose their identities in the Jordan River, which plunges downward over 300 m. (1000 ft.) in less than 11 km. (7 mi.), as measured in a straight line from Bâniyâs, through rough basalt country to enter the Huleh Valley.

IV. Huleh Valley.—Formerly this area was called Lake Huleh, about 5 km. (3 mi.) long, over 3 km. (2 mi.) wide at its upper triangle, but narrowing to a point at the south, where the Jordan River emerged again, after meandering through malarial swamplands. Its maximum depth was almost 5 m. (15 ft.) and was known by Josephus as Lake Semechonitis.

In recent years the upper Jordan has been straightened and deepened by the state of Israel. The area has been transformed by an elaborate series of drainage canals into some 6000 hectares (15,000 acres) of lush farmland. Several hundred acres have been preserved as an indigenous habitat for papyrus, exotic plants, and wildlife.

In ancient times Huleh was guarded from the northwest by Abel of Beth-maacah (2 Sam. 20:14f., 18), the great mound of Tell Abil. It was once besieged by Joab, David's general. The fortified city of Hazor (Tell el-Qedaḥ; Josh. 11:10-12), about 8 km. (5 mi.) SW of Huleh, controlled the territory.

Emerging from the Huleh area with considerably increased volume, the Jordan flows quietly for about 3 km. (2 mi.), and then just beyond the Jisr Banât Yaʿaqub (the "Bridge of the Daughters of Jacob") it descends precipitously through a basalt gorge for about 11 km. (7 mi.) (falling from 70 m. [230 ft.] above sea level to 210 m. [690 ft.] below, almost 20 m. per km. [100 ft. per mi.]), before flowing for more than a kilometer through a plain and delta of its own deposits into the Sea of Galilee. *See* Plate 19.

V. Sea of Galilee.—Tiberias, Chinnereth, and Gennesaret are other names for the Sea of Galilee. It is 21 km. (13 mi.) long, 13 km. (8 mi.) across at its widest part, 5 km. (3 mi.) at the narrowest; at one point it is 46 m. (150 ft.) deep, and 210 m. (680 ft.) below sea level. Tell el-ʿOreimeh (Kinneret) is the site of the ancient fortified city of Chinneroth (probably from Heb. *kinnôr*, "harp"), situated just W of the Jordan River at its entrance to the Sea of Galilee. The Egyptians conquered it *ca.* 1468 B.C., and much later the Hebrews allotted it to the tribe of Naphtali (Nu. 34:11; Josh. 13:27; 19:35; 1 K. 15:20).

The clear waters come not only from the Jordan as it flows from the north, but also from numerous underground hot and cold springs. With the high, mainly volcanic hills of Galilee to the west and of Gaulanitis to the east, the Sea of Galilee has a comparatively narrow coast. This widens out for a distance of less than 6 km. (4 mi.) in el-Ghuweir (*ghôr*, "little valley") along the northwestern shore, to be identified with Gennesaret. The Jewish nobleman Josephus, who described himself as the military governor of Galilee (*BJ* ii.20.3-7 [562-582]) and who lived over a generation after the time of Jesus, wrote: "The lake of Gennesar takes its name from the adjacent territory. . . . Its water is sweet to the taste and excellent to drink . . . it is perfectly pure. . . . It has an agreeable temperature. . . . Skirting the lake of Gennesar, and also bearing that name, lies a region whose natural properties and beauty are very remarkable. There is not a plant which its fertile soil refuses to produce. . . . One might say that nature had taken pride in thus assembling . . . the most discordant species in a single spot. . . ." (*BJ* iii.10.7f. [506-521]).

Jesus chose Simon, Andrew, and the sons of Zebedee — James and John — as disciples when He "walked by the Sea of Galilee" (Mt. 4:18-22; Mk. 1:16-19). On the northwest side is the third-century synagogue of Capernaum (Tell Ḥûm), built over the original one in which Jesus preached on the Sabbath (Mk. 1:21). It was in Capernaum that He healed the centurion's servant (Mt. 8:5-13; Lk. 7:2-10). Peter had a house there (Mt. 8:14).

On the shore S of Capernaum at ʿAin et-Tabgha (Heptapegon) the fine Byzantine Church (*ca.* A.D. 400) of the Multiplication of the Loaves and Fishes has been excavated. Beautiful mosaic panels and floors were found in the basilica.

On the eastern side of the Jordan, as it enters the Sea of Galilee, is the "Fisherman's Village," Bethsaida (Julias). Outside of it Jesus healed a blind man (Mk. 8:22-26) and in a large open area miraculously fed the five thousand people who had gathered to hear Him (Lk. 9:10-17).

The Sea of Galilee was visible in wonderful perspective from the Horns of Hattin (Qarn Ḥaṭṭîn) that towered about 600 m. (2000 ft.) above it to the west and overlooked the large Roman toparchy of Tiberias. Around the western shore of the Sea of Galilee were such towns as Capernaum, Heptapegon, Gennesaret, Taricheae (Magadan, Dalmanutha, Mt. 15:39; Mk. 8:10), Arbel, Ammathus, Sennabris, and Philoteria in the south where the Jordan issues.

On the ruins of Rakkat Herod Antipas built the city of Tiberias *ca.* A.D. 20 and named it for the emperor Tiberius (A.D. 14-37). The city is mentioned in Jn. 6:23. After the destruction of Jerusalem by the Romans in A.D. 70, Tiberias was joined with Hammath (el-Hammam) about 2 km. (1 mi.) south, where there were popular hot springs. Hammath and Rakkat had been two of the fortified cities allotted to the tribe of Naphtali when the conquered land was divided (Josh. 19:35).

Over halfway down the eastern shore of the Sea of Galilee was the Roman district of Hippus. On a promontory about 2 km. (1 mi.) from the coast the Greeks built the city of Hippos (Sûsitâ, Qalʿat el-Ḥuṣn), probably to guard the road to Damascus. In 63 B.C. Pompey rebuilt some prominent Greek towns and organized them into a league of ten Roman cities, the Decapolis, to protect trade routes and military highways. Hippos (near Sussiyeh) was enlarged as a fortified city according to Roman town planning. During Christian times Hippos became the seat of the bishop, with at least three other churches besides the cathedral. In it is an inscription declaring "In the time of Procopius, Presbyter." Adjacent to the granite and marble cathedral was the baptistry with handsome mosaic floors that incorporated Greek inscriptions. There was an "intact dedicatory inscription to Saints Damian and Cosmas. . . , two Syrian brothers who, as physicians, gave free service to the poor and were martyred in the early fourth century." Another gave the date of its construction as A.D. 591. According to the latest excavator, there was a "massive basalt aqueduct that conveyed water into the city by gravitation from the 3.5 kilometer distant spring at Fiq [Aphek]" (C. Epstein, *EAEHL*, II, 521-23).

Gergesa (Chorsia, Kursī) was N of Hippos on the seashore near the northern boundary of the district of Hippos. M. Avi-Yonah (*Holy Land*, p. 174) favored it as a suitable location for the account of the demoniac in Mt. 8:28; Mk. 5:1; and Lk. 8:26, rather than Gadara, which is not close to the Sea of Galilee.

VI. Jordan Valley.—For some 21 km. (13 mi.) S of the Sea of Galilee the Jordan Valley is little more than 6 km. (4 mi.) wide in places. Where the Jâlûd stream descends through the Beisan plain to the Jordan River the valley is from 9 to 10 km. (6 to 7 mi.) across. It narrows again because of the eastward extension of the hills of Samaria. For some distance S of the Wâdī Fâr'ah the valley measures about 13 km. (8 mi.) across, and by the time it reaches the Jericho area it has achieved its maximum width of 22 km. (14 mi.). The straight distance between the Sea of Galilee and the Dead Sea is about 105 km. (65 mi.), but with all of its serpentine turns the Jordan River has a total length of about 320 km. (200 mi.). In that distance the Jordan falls about 180 m. (590 ft.), or an average of about 2 m. per km. (9 ft. per mi.). The width in its southward course is about 27-30 m. (90-100 ft.) and it is from 1 to 3 m. (3 to 10 ft.) deep, except in springtime when its waters rise to cover a much wider bed. Less than 8 m. (5 mi.) S of the Sea of Galilee, after the merger of the Yarmuk, the Jordan River becomes a muddy and turbulent stream, with a treacherous current that tears from one bank to the other as it rushes southward.

A. Western Tributaries. West of the Jordan River the tributaries are smaller and fewer in number; from N to S the chief ones are the wadis Fejjas, Bîreh, Jâlûd, Mâliḥ, Fâr'ah, ʿAujā, and Qelt.

In the peninsula formed by the southwestern shore of the Sea of Galilee and the emerging Jordan River, the ancient walled city of Beth-yerah (Khirbet Kerak, "temple of the moon") was discovered, which dates from 3000 B.C. and possessed an advanced agricultural community in 2700 B.C. It was famous for its unusual E.B. pottery (2600 B.C.), called by Albright Khirbet Kerak ware. Hellenistic remains were found in one section of the mound. In the area nearby existed the city of Philoteria built by Ptolemy II Philadelphus (285-246 B.C.). An extensive Roman town was uncovered there, including a fortress, thermal baths, and a synagogue. A large Christian church was constructed in A.D. 450 and modified several times as late as A.D. 529. M. Avi-Yonah (*Holy Land*, p. 138) explained that in this area near the Sea of Galilee the River Jordan "changed its course since antiquity." The remains of the "Crusader Bridge of Sinnabra" were found in the former river bed. Sennabris was probably near Philoteria. Just S of Beth-yerah the Neolithic site of Tell ʿEli (Khirbet esh-Sheikh ʿAli) was discovered where the Wâdī Fejjas (Naḥal Yavneel) joins a circular section of the Jordan River. On the other side of the Fejjas is prehistoric ʿUbeidiya.

Overlooking the Wâdī Bîreh (Naḥal Tabor) from the north as it approaches the Jordan, another Neolithic site, known as Munḥata (Ḥorvat Minḥa) was discovered. It was occupied *ca.* 7000 B.C. and produced decorated handmade pottery and elaborate clay figurines.

On the southern bank of the Wâdī Jālûd (Harod) is the strategic site of Beth-shan (Beth-shean, Tell el-Ḥuṣn, Beisan, Scythopolis, Nysa). The impressive tell has had a long history of occupation from the Chalcolithic period until the present day, and numerous levels have been explored. The territory of Beth-shan was conquered by the Egyptians, who called it Upper Retjenu. After three centuries of occupation they left a fortified city, rich temples and many other buildings, stelae, stone reliefs, anthropoid sarcophagi, statues, religious objects, and pottery. There was a square sanctuary from the Amarna period of Akhenaten (Amenhotep IV). Beth-shan was a cosmopolitan center with Syrian, Mesopotamian, and Hittite influences.

The Hebrews took over Beth-shan "and its villages" (Josh. 17:11; Jgs. 1:27). In the fighting with the Philistines Saul was slain and his body fastened to the wall of Beth-shan (1 S. 31:10-13). The administrative list of 1 K. 4:7-19 includes the territory of Beth-shan. During Hellenistic and Roman times the district was called Nysa-Scythopolis. Roman Scythopolis was a walled city of the Decapolis, with an acropolis, a large theater, a hippodrome, temples, bridges, and aqueducts.

During the Byzantine period Scythopolis, as the seat of the bishop, had a cathedral. Various churches and monasteries were constructed during the 5th cent. A.D. The curved walls and mosaic floors of a magnificent circular church from A.D. 435 were discovered there. Underneath it were the remains of a rectangular basilica of early Christian times. A large monastery was founded by "Christ-loving Lady Mary and her son Maximus" in A.D. 567, as recorded on the elaborate mosaic floor. Four synagogues were discovered.

The Wâdī Fâr'ah has its source in springs high in the rocky hills where the old Canaanite town of Tirzah was excavated. A little southwest is Mt. Ebal (940 m., 3084 ft. high), the ancient town of Shechem, and Mt. Gerizim (881 m., 2890 ft. high). Farther south, on top of a great hill commanding a view of much of the length of the Jordan Valley, is the towering Hasmonean fortress of Alexandrium (Qarn Sartabeh), constructed by Alexander Janneus (103-76 B.C.) and rebuilt by Pheroras at the order of his brother Herod. Farther south in the Jordan Valley, Herod erected the fortress of Phasaelis (Khirbet Faṣâ'il), in memory of his brother Phasaelus.

The hill country SW of Khirbet Faṣâ'il was found to have an amazing archeological history by P. W. Lapp. In tracing the source of the Samaria Papyri (*ca.* 375-365 B.C.) with Ta'âmireh tribesmen, he discovered labyrinthine caves in the desolate Wâdī ed-Dâliyeh gorge, and also the enormous necropolis of E.B.-M.B. shaft tombs of 'Ain es-Sâmiyeh, and Dhahr Mirzbâneh (P. W. Lapp, *The Dhahr Mirzbâneh Tombs* [1966]; P. W. and N. L. Lapp, eds., *Discoveries in the Wadi ed-Daliyeh* [*AASOR*, 41, 1974]; Z. Yeivin, *et al.*, *IEJ*, 21 [1971], 73-85).

East of Jerusalem is one of the sources of the Wâdī el-Qelt, near 'Anâtâ (Anathoth, Jer. 1:1). The ancient Roman road trailed along the top of the southern cliff of the Wâdī el-Qelt, as it cut through the deep gorge, and descended to Jericho. The Greek Orthodox Monastery of St. George Choziba is an astonishing sight, perched on the northern side of the wadi, as though it is carved out of the vertical canyon wall. It is said to be over fifteen hundred years old and is approached by a precariously steep footpath cut into the rock. Farther along the Roman road are the excavated buildings of Hellenistic and Herodian Jericho (Tulûl Abū el-'Alâyiq), on both sides of the Wâdī el-Qelt, and the Roman aqueduct that furnished water for Herod's tropical winter capital, with its date palm, olive, and pomegranate trees, rich gardens, and balsam groves. There Jesus met Zacchaeus, the wealthy chief tax collector for the Romans, and transformed him (Lk. 19:1-10).

About 2 km. (1 mi.) N of the Herodian town is the mound of ancient Jericho (Tell es-Sulṭân), overshadowed by Jebel Qarantel, the traditional Mount of Temptation (Mt. 4:1-11). The modern city of Jericho (er-Riḥa) is SE of it. In the tell of ancient Jericho, near the spring of 'Ain es-Sulṭân (Elisha's fountain, 2 K. 2:19-22), K. M. Kenyon discovered seventeen distinct settlements, a Neolithic stone tower (*ca.* 7000 B.C.) 9 m. (30 ft.) high, and an astonishing collection of ten ancestral skulls with shell eyes, realistically sculptured with plaster.

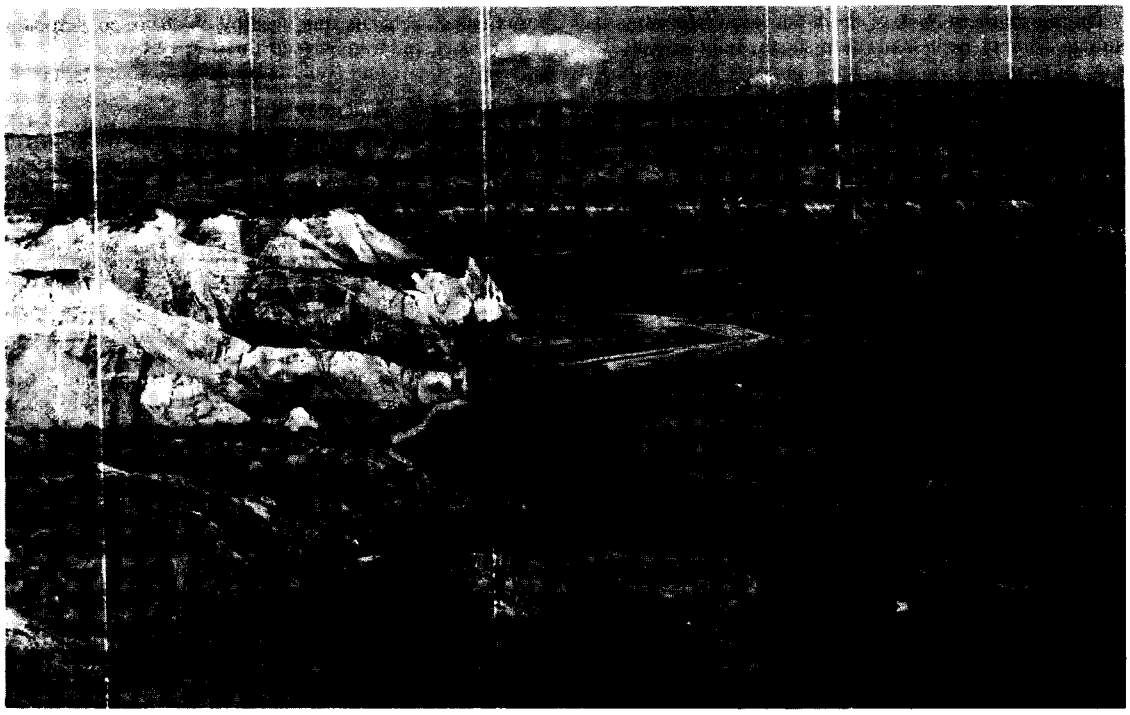
John baptized Jesus in the Jordan River, probably at the traditional site of the Hijlah Ford, S of the place where the Wâdī el-Qelt flows into the Jordan. The Madeba Map shows at this ford what may be a guard-toll house with steps, perhaps to supervise the ferry boat "passing along ropes across the river" (M. Avi-Yonah, *Madaba Mosaic Map* [1954], p. 35, plate 1).

Near the northwestern shore of the Dead Sea the Wâdī Qumrân enters it, after cutting through the high cliffs that are pierced with many hidden caves. On a high marl terrace just N of the wadi, overlooking the Dead Sea about a kilometer (half a mile) away, G. L. Harding and R. de Vaux found the deserted ruins of Khirbet Qumrân, and excavated them in 1951-1956 (Harding, p. 195). In 1947 two local Ta'âmireh shepherds had found some pottery jars containing old parchment scrolls in a cave of the desolate wilderness. Albright in 1948 pronounced this "the greatest manuscript discovery of modern times." By 1949 Harding, de Vaux, and other scholars, with the help of the Arab Legion, had located and examined numerous caves, and had found many scrolls, fragments, and pottery.

The ruined buildings and caves in the surrounding cliffs had been occupied by covenanters of the Qumrân community, dedicated pious Jewish believers in God, who collected, copied, and preserved scrolls of the OT (except Esther) and probably buried old ones with appropriate ceremony in caves. In their library they also had commentaries and secular writings. They lived simply in the wilderness during dangerous times (*ca.* 130 B.C.-A.D. 68), reminiscent of the way of the Lord described in Isa. 40:3 and Mt. 3:1-3. They had strict rules for the order of the community, written in a long Manual of Discipline. Their buildings included a scriptorium, large meeting hall and refectory, pantry with over one thousand pottery dishes, kitchen with fireplaces and ovens, laundry, dyer's shop, kiln, a *mikveh* for ritual bathing, silos, many large cisterns, and an efficient system of conduits that brought water from a dam and waterfall. At certain periods during the years of occupation most of the members of the community probably slept in caves. About 2.4 km. (1.5 mi.) S of Khirbet Qumrân is the fine spring of 'Ain Feshkha, where the covenanters engaged in agriculture and possibly had a tanning operation. The building was excavated by de Vaux.

B. Eastern Tributaries. Where the Jordan River flows swiftly from the Sea of Galilee is a valley where ancient peoples lived. East of the Jordan, on a terrace, is the Neolithic site of Sha'ar ha-Golan, excavated by M. Stekelis (1949-1953). There he found early stone and bone tools and weapons with pottery from *ca.* 5000 B.C.

The streams E of the Jordan are more numerous and generally larger in volume and longer than those on the western side. Steep, westward-descending canyons, which level out when they reach the Jordan Valley, sever the high and broken Transjordanian plateau into distinctive segments. Between the Sea of Galilee and the Dead Sea eleven perennial streams enter the Jordan from the east.



View from the southwest of the Jordan near Adam. The Dome of Gilead is in the background, and at left the valley of the Jabbok (Wâdī Zerqā) comes down to meet the Jordan. The undercutting of these marl cliffs has occasionally dammed the river (D. Baly)

From N to S they are called the wadis Yarmûk, ʿArab, Tayibeh, Ziqlâb, Jurm, Yābis, Kufrinjeh, Râjeb, and Zerqā (biblical Jabbok), followed some 26 km. (16 mi.) farther south by the Nimrîn and Kefrein-Ḥesbân-Râmeh, the latter two joining together before flowing into the Jordan. Beyond them is the small Wâdī Azeimeh that flows into the northeastern corner of the Dead Sea, close to where the Jordan enters it at a point nearly 400 m. (1300 ft.) below sea level. On the eastern side of the Dead Sea (*Baḥr Lût*, Sea of Salt, Lake Asphaltitis) are the Wâdī Zerqā-Māʿîn, the steep canyons of the Môjib (biblical Arnon) and of the Wâdī el-Ḥesā (biblical Zered).

The Yarmûk is about 9 m. (30 ft.) wide as it pours into the Jordan River about 6 km. (4 mi.) S of the Sea of Galilee. It forms a natural boundary between modern Syria and the Hashemite Kingdom of Jordan; in ancient times it separated Syria from northern Gilead. The territory of Og king of Bashan extended on both sides of it, with capitals at Ashtaroth (in Qarnaim) and Edrei (Derʿā). His sarcophagus or dolmen of black basalt was probably at Rabbath-ammon (modern Amman); Dt. 1:4; 3:11; Josh. 12:4).

In the gorge E of the confluence of the Jordan River with the Yarmuk (Hieromices) are the hot springs of Emmatha (Tell el-Ḥammeh) and the Roman baths. Elevated at the top of the cliff on the southern bank of the Yarmuk at Umm Qeis is the Hellenistic (Antiochia Seleucia) and Roman city of Gadara, once capital of the Roman territory with that name. The hot springs were then called the Springs of Gadara. The hill affords a marvelous view across the Sea of Galilee of the Jordan Valley to the south. Gadara was a city of the Decapolis on an important trade route and had a fortress, theaters, temples, a university (Harding, p. 56), and a synagogue.

Since Glueck's well-known surface explorations in Transjordan (1934-1951), other scientific, comprehensive surveys have been carried out in Jordan, with discoveries of many new sites and corrections of former dates (see bibliography). K. Prag and C.-M. Bennett have interpreted, evaluated, and placed in better perspective old and new discoveries.

North of the Wâdī Jurm and its springs, on the eastern slopes of the Jordan Valley, towers the great fortress of Tabaqat Faḥil, of importance from the Canaanite through the Byzantine periods. Early Egyptian records and Amarna Letters mentioned the site as Piḥilum. During Hellenistic and Roman times it was known as Pella, a walled city of the Decapolis. R. H. Smith found a large Christian church there from *ca.* A.D. 451.

East of the Jordan River, on the southern bank of the Wâdī Kufrinjeh, is the large Tell es-Saʿīdîyeh, excavated by J. B. Pritchard (1964-1967). Levels of occupation were established from the Late Bronze through the Roman periods but without direct evidence that it is Zarethan (1 K. 7:46; cf. N. Glueck, *River Jordan*, p. 119). East of it rises a tributary of the Wâdī Zerqā (Jabbok), where a Decapolis city of Gerasa (Jerash) was located. The Department of Antiquities of Jordan has continued to excavate and restore the beautiful Hellenistic-Roman buildings and theaters, plus the Byzantine churches of Jerash (Harding, pp. 79-105). South of it is another city of the Decapolis, Philadelphia, a site in ʿAmmân, capital of the Hashemite kingdom of Jordan, once known as Rabbath-ammon.

Below the junction of the Wâdī Zerqā (Jabbok) with the Jordan River is the small mound of Tell ed-Dâmiyeh, the biblical Adam(ah), which probably guarded the crossing there, one of the many old fords of the Jordan (Josh. 3:16f.). The AV of 2 S. 19:18 [MT 19] says: "there went over a ferry boat," perhaps a rope ferry. N. Glueck (*River Jordan*, p. 118) reported that "some years ago a decrepit rope-ferry plied its way across the swift current" of the Jordan. Earthquakes have occurred that blocked the river

for hours. Near Dâmiyeh is a large dolmen field, containing various types of ancient megalithic tombs.

About 12.5 km. (7.5 mi.) NE of Tell ed-Dâmiyeh is Tell Deir ʿallā, where additional excavations have been made by H. J. Franken and M. M. Ibrahim.

The wadis Kefrein, Râmeh, and Ḥesbân join before flowing into the Jordan. A little S of the juncture, in the plains of Moab, is the huge Chalcolithic settlement of Teleilat el-Ghassul. In some of the buildings were found unique wall paintings, fine stone ware, decorated handmade pottery, bone and flaked tools (cf. Hennessy).

East of the Wâdī Ḥesbân in Moab is the site of Tell Ḥesbân, excavated from 1968 through 1976 under the direction of S. H. Horn and L. T. Geraty. They discovered levels of occupation from Iron I through the Islamic periods. This is the location of the biblical Heshbon (Nu. 21:26). A large Christian basilica was found at Tell Hesbân, destroyed in A.D. 612 by the Persians.

Heshbon, Medeba, Nebo, and other ancient towns of Moab along the King's Highway (Nu. 21:22) are mentioned in Isa. 15. Medeba was also prominent in Roman and Nabatean history (Harding, pp. 33, 73f.). During the Byzantine period Medeba was the seat of the bishopric and possessed many Christian churches; fourteen of them have been discovered already. One Greek Orthodox church contains priceless remnants of a mosaic floor from the 6th cent. A.D. depicting the earliest Palestinian map in existence. The artists created scenes with colored tesserae showing the Christian churches and towns extending around Jerusalem, probably from Byblos and Damascus to Thebes, from the Mediterranean Sea to Philadelphia (Rabbath-ammon) and Petra, and explained them with Greek inscriptions.

To commemorate the life of Moses in Moab (Dt. 34:1-5), early Christians erected churches on the two peaks of Mt. Nebo overlooking the Jordan Valley. Since 1973 M. Piccirillo has resumed the archeological work of Franciscan Fathers S. Saller and U. Corbo, with the assistance of architects and restorers. On the peak of Khirbet el-Mukhayyet (the town of Nebo) the Church of Saints Lot and Procopius was restored and mosaics were repaired and relaid. At the monastery on top of Siyagha, in the course of excavation, new discoveries were made of a funeral chapel, a baptistry with basin, unusual floors made of colored tesserae showing rural life, a dedicatory Greek inscription of five lines from A.D. 531 and another of two lines, giving the names of the artists who created the mosaic floors (M. Piccirillo).

JOSAPHIAS jos-ə-fī'əs (1 Esd. 8:36, AV, NEB). *See* JOSIPHIAH.

JOSE jō'sə. The AV form for Joshua in Luke's genealogy (3:29). *See* JOSHUA **4.**

JOSECH jō'sek [Gk. *Iōsech*] (AV JOSEPH). An ancestor of Jesus in Luke's genealogy (3:26).

JOSEDEC jō'sə-dek (AV Apoc.), **JOSEDECH** (AV Hag. 1:1, 12, 14; 2:2, 4; Zec. 6:11), **JOSEDEK** (NEB 1 Esd. 5:5, 48, 56; 6:2; 9:19). *See* JEHOZADAK, JOZADAK.

JOSEPH jō'səf, jō'zəf [Heb. *yôsēp*–'may he add' (i.e., may God add posterity), *yᵉhôsēp* (Ps. 81:5 [MT 6]); Gk. *Iōsēph, Iōsēs* (e.g., TR Mt. 13:55; Mk. 6:3)].

1. The eleventh son of Jacob and the first of Rachel. See separate article below.

2. The father of Igal, one of the twelve spies sent from the tribe of Issachar by Moses to spy out the land of Canaan (Nu. 13:7).

3. A son of Asaph (1 Ch. 25:2, 9).

4. A son of Binnui, who married a foreign wife after the Exile (Ezr. 10:42; cf. 1 Esd. 9:34, AV Josephus).

5. A priest of the family of Shebaniah in the days of Joiakim (Neh. 12:14).

6. A son of Zechariah. As a military commander under Judas Maccabeus, he, with Azariah, was commissioned to protect Judah while Judas went to do battle in Gilead. He was instructed by Judas not to engage in battle until the latter returned, but he ignored this directive and was defeated by Gorgias *ca.* 163 B.C. (1 Macc. 5:18, 56, 60).

7. A brother of Judas Maccabeus in 2 Macc. 8:22, although this is probably a mistake for John (as also in 10:19; cf. 1 Macc. 2:1-5).

8. Great-grandfather of Judith (Jth. 8:1).

9. The husband of Mary the mother of Jesus. *See* JOSEPH HUSBAND OF MARY.

10. An ancestor of Jesus Christ (Lk. 3:24).

11. An ancestor of Jesus Christ who lived sometime between King David and Zerubbabel the governor of postexilic Judah (Lk. 3:30; cf. vv. 27, 31).

12. A brother of James the Younger (AV Joses, Mt. 27:56; cf. Mk. 15:40).

13. A Jew of Arimathea in whose tomb Jesus was buried (Mt. 27:57; Mk. 15:43; Lk. 23:50; Jn. 19:38). *See* JOSEPH OF ARIMATHEA.

14. A brother of Jesus (Mt. 13:55; AV Joses), called Joses in Mk. 6:3 (*see* JOSES **1**).

15. A member of the early Church, called Barsabbas (but not the Barsabbas of Acts 15:22) and surnamed Justus, who was a candidate for the apostleship left vacant by Judas Iscariot (Acts 1:23; cf. vv. 15-26). *See* JOSEPH BARSABBAS.

16. The companion of Paul, surnamed BARNABAS (Acts 4:36; AV Joses).

S. F. HUNTER

JOSEPH jō'səf, jō'zəf [Heb. *yōsēp*–prob. 'may he (God) add' (i.e., other sons); LXX *Iōsēph*]. (Cf. Gen. 30:24; in vv. 23f. there may well be a pun on the verbs *'āsap*, "take away," and *yāsap*, "add," but not a rival etymology of Joseph. The place name *yšp-'ir* in an Egyptian topographical list of Thutmose III [*ca.* 1470 B.C.], often read as Joseph-El and compared with the name Joseph, is quite certainly not related to the name Joseph. The sibilants [*s, š*] are entirely distinct; *yšp-'ir* in the Egyptian list is of the same type as biblical Iphtah-el [Josh. 19:14, 27]. On *yšp-'ir*, cf. W. F. Albright, *JPOS*, 8 [1928], 249.) The eleventh (and favorite, Gen. 37:3; cf. 33:2) son of Jacob, his first by Rachel (Gen. 30:24; 35:24).

I. Literary Unity of the Joseph Story
II. Background of the Joseph Story
  A. Gen. 37: Sold into Egypt
  B. Gen. 39: Service in Egypt
  C. Gen. 40: Prison and Courtiers
  D. Gen. 41: Dreams, High Office, Egyptian Names
  E. Gen. 42–44: Border Control
  F. Gen. 45–47: Keepers of Cattle, Egyptian Economics
  G. Gen. 48–50: Shades of Death
  H. Date of Joseph

I. Literary Unity of the Joseph Story.–The story of Joseph is the story of a spoiled child and dreamer, sold into Egyptian slavery by jealous brothers, subjected to ups and downs culminating in his becoming real ruler of that ancient land, and divinely placed there, to save his people and countless others in dire need from famine. In Genesis, as it stands, the story is superbly told and is an obvious unity. However, Gen. 37; 39–50 have within the last few generations been subjected to precisely the same divisive literary analyses into fragments from supposed rival sources or "hands" as has the rest of the Pentateuch. In material assigned by some scholars to the so-called J document, the Joseph narratives are held to display considerable knowledge of Egyptian customs and institutions. The author, however, has been credited with "mistakes," the most obvious being the assumptions that the ancient Egyptians used camels (Ex. 9:3) and that straw was employed for making bricks (Ex. 5:5-19). The J source also seems to have been regarded by older liberals as depending to some extent upon the *Tale of the Two Brothers* (see below). The alleged E document, when dealing with Joseph, is held to exhibit a greater sense of divine purpose and power in the life of the hero (Gen. 45:5-8; 50:20; etc.), and to introduce more emotional elements into the narrative (cf. Gen. 37:29f.) than the J source. In the main, however, double narratives and appellatives are the usual criteria alleged. And even here the only doublet with any semblance of reality is the supposed double narrative of Joseph's being sold into Egypt, (1) by his brothers to merchants going to Egypt, and (2) by merchants who stole him from a pit. But as will be seen below, this doublet is imaginary. Double terms (Yahweh and 'Elohim for God; Israel and Jacob for Joseph's father; Ishmaelites and Midianites for the merchants; etc.) are worthless as criteria; such alternations in other ancient Near Eastern literatures employing closely similar turns of phrase show this clearly. See provisionally K. A. Kitchen, *JEA*, 47 (1961), 162f.; C. H. Gordon, *Christianity Today*, 4 (1959), 131-34; *HUCA*, 26 (1955), 67, 96f.

II. Background of the Joseph Story.–The story of Joseph itself needs no detailed rehearsal here; the Genesis narrative is a gem to be read in the pages of the OT itself. In what follows, therefore, knowledge of that narrative is presupposed, and special attention has been given to Egyptian and other background and to certain debated points.

A. Gen. 37: Sold into Egypt. The mark of Jacob's partiality or affection for Joseph was the "coat of many colors" (AV, RV), or "long-sleeved robe" (cf. RV mg., RSV) that he had given him. Either rendering of the Heb. *kᵉṯōneṯ passîm* is possible archeologically, as Egyptian representations of Canaanite dress show it as often including both bright colors and long sleeves. Compare, e.g., the leader of the thirty-seven Semites shown visiting Egypt in the famous Beni-hasan tomb painting (*ca.* 1800 B.C.), D. J. Wiseman, *Illustrations from Biblical Archaeology* (1958), p. 29, fig. 25 (right); or *ANEP*, no. 3. Linguistically, *passîm* might possibly be compared with Assyr. *paspasu*, "brightly colored bird," and Arab. *fasafisa*, "mosaic" (Eisler, *Orientalische Literaturzeitung*, 11 [1908], cols. 368-371; cf. 14 [1911], col. 509), for the meaning "many-colored." "Long-sleeved" is arrived at by taking *kᵉṯōneṯ passîm* as a "tunic of (i.e., reaching to) palms and soles," *pas* being the flat of the hand or foot (cf. BDB, p. 821a).

Shechem (37:13f.) and Dothan (v. 17) were both inhabited Canaanite cities in Joseph's day (Middle Bronze Age; on date, see below) as amply shown by excavations at both sites. For those at Shechem, see G. E. Wright,

Syrian tribute bearers with long-sleeved garments perhaps like Joseph's coat. Wall painting from the tomb of Thutmose IV (1421-1413 B.C.) (Trustees of the British Museum)

Campbell, Toombs, Kee, etc., in *BA*, 20 (1957), nos. 1, 4; 23 (1960); *BASOR*, 144 (1956); 148 (1957); 161 (1961). For Dothan, see J. P. Free, *BA*, 19 (1956), 43-48; *BASOR*, 131 (1953); 135 (1954); 139 (1955); 143 (1956); 147 (1957); 152 (1958); 156 (1959); 160 (1960).

The story of how Joseph was sold into Egypt is often considered to be one of the classic passages for demonstrating the alleged composite nature of the present pentateuchal narrative: according to the J account, Judah leads his brothers in selling Joseph to the Ishmaelites, while the E narrative portrays Reuben as suggesting that Joseph be left in a pit, but he is stolen by Midianites. In point of fact, this division of the existing narrative into two is unnecessary, and ignores certain points of Hebrew and allied Near Eastern stylistic usage.

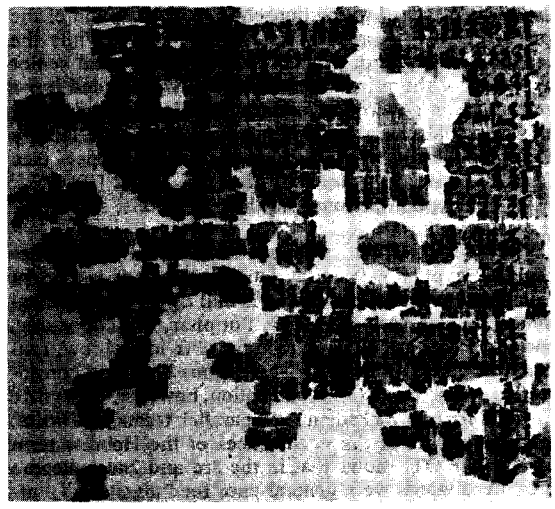
The brothers would have killed Joseph, but Reuben (hoping to rescue him later) persuaded them to put him in a pit. Presently, while the brothers were having a meal, an Ishmaelite caravan appeared. Judah then suggested that they rid themselves of Joseph by selling him to the Ishmaelites instead of killing him. So, they took Joseph from the pit and sold him to "[some] Midianites, traders" — part of the Ishmaelite caravan — and this body of Ishmaelites (= Midianites = Medanites, so MT of v. 36) sold Joseph into Egypt (37:36; 39:1). The overlap of these terms is explicitly stated in Jgs. 8:24 (Gideon's Midianites had earrings "because they were Ishmaelites"), and for the close relationship of Medan and Midian, cf. Gen. 25:2. This overlap of terms is well known in the ancient Near East: thus, the Egyptian stela of Sebekkhu (*ca.* 1800 B.C.) uses three different terms — *Aamu, Mentyu-Setet,* and *Retenu khesyt* (=Asiatics, Asian bedouin, and vile Syrians) — for one and the same Palestinian foe, within a very short space of text.

When Reuben returned to the pit, he was evidently surprised to find Joseph gone; obviously, therefore, he was not with the other brothers when they sold Joseph. The simplest reason for his absence is that when the foreign caravan was sighted, he (the most dutiful) went off to guard their sheep until the foreigners were safely past; they (and Joseph) would be on their way south before Reuben returned to the pit and the meal. That the "they" who "drew Joseph up" in v. 28 are the brothers is no difficulty: as in other parallel literatures, a pronoun in Hebrew can often be separated from its antecedent by other agent nouns (e.g., Dt. 22:18f. — "he" in "he has brought an evil name" in v. 19 refers back not to the last noun preceding, the damsel's father, but to the man of v. 18). In Gen. 45:4, Joseph plainly reminds his brothers that they sold him into slavery; they might well be dismayed as well as surprised (45:3, 5) — the penalty for stealing and selling someone into slavery was death, both in Hammurabi's Code (§ 14) and among their own people still in Moses' time (Ex. 21:16; Dt. 24:7). But Joseph deliberately veiled the fact that it was his own brothers who stole him out of the land of the Hebrews when he was earlier pleading with the butler for his good offices (Gen. 40:14f.). To have admitted that he had been sold by his own brothers, on top of his imprisonment, would have made a bad impression on the butler and thus have wrecked his plea of innocence. When points like these are given their proper due, all need to cut up the narrative into insipid rival versions simply vanishes.

Joseph was sold for "twenty pieces [i.e., shekels] of silver" (Gen. 37:28), probably the current average price for a slave in the early 2nd millennium B.C., as attested also by Hammurabi's Code in the 18th cent. B.C. (one-third of a mina = 20 shekels: §§ 116, 214, 252, *ANET*, pp. 170, 175f.), in Old Babylonian tablets (I. Mendelsohn, *Slavery in the Ancient Near East* [1949], pp. 117, 155), and other contemporary documents from Mari (G. Boyer, *Textes Juridiques: Archives Royales de Mari* [1958], VIII, no. 10, lines 1-4). In earlier times (26th-20th cents. B.C.) the price was 10 to 15 shekels (e.g., Lipit-Ishtar code, §§ 12, 13, *ANET*, p. 160; Eshnunna code, §§ 55, 57, *ANET*, p. 163), while later it rose to 30 shekels (Nuzi, 15th cent. B.C.; Ugarit, 14th cent. B.C. [also 20 and 40 shekels]; Am.Tab., 30 shekels for ransom — E. F. Campbell, *BA*, 23 [1960], 19-20; the Mosaic laws, 13th cent. B.C.: Ex. 21:32), and then 50 shekels and upward in the Assyrian and later empires in the 1st millennium B.C. The figure of 20 shekels for Joseph thus fits well into the early 2nd millennium B.C., in the pattern of gradually rising prices in the ancient Near East.

B. Gen. 39: Service in Egypt. When Joseph was sold into Egypt (Gen. 37:36; 39:1), he was but one of many such Northwest Semitic-speaking slaves in the larger households and institutions of this land in the early 2nd millennium B.C. On the reverse of Papyrus Brooklyn 35.1446 is a list of some seventy-nine servants bequeathed by a man to his wife, *ca.* 1740 B.C. More than forty of these servants are explicitly labelled "Asiatics," and must at one time have been sold into Egypt as slaves like Joseph (but perhaps less dramatically), as the 13th Dynasty then reigning is not known to have fought in Asia, and so these would not be prisoners of war. Many of these slaves in Papyrus Brooklyn bear good Northwest Semitic names like Menahem or ʿAqabtu (related to "Jacob"). Study of this list and related material shows that these and other Semitic slaves in Egypt by their ability often received better positions than the less intelligent Egyptian fellahin, were employed about the house as domestics (*ḫery-per*) like Joseph (39:2), and — also like him — could rise to positions of trust under their masters (as shown by Posener), even performing the funerary functions that normally fell to an eldest son. See W. C. Hayes, *A Papyrus of the Late Middle Kingdom in the Brooklyn Museum* (1955); W. F. Albright, *JAOS*, 74 (1954), 222-233 (on the personal names); G. Posener, *Syria*, 34 (1957), 145-163 (on names and role of Semites in Middle Kingdom Egypt). Joseph as "overseer over his house" (39:4) would be *ʾimy-r pr*, "steward," a well-known title.

Hieratic papyrus listing slaves, including several with Northwest Semitic names, in Egypt about the time of Joseph (ca. 1700 B.C.) (Brooklyn Museum)



The incident of Potiphar's wife tempting Joseph and then trying to throw the blame on him has often been compared with the Egyptian *Tale of Two Brothers* in Papyrus D'Orbiney (late 13th cent. B.C.), and some have even asserted that the Egyptian tale inspired the production of the Hebrew narrative. But in point of fact, just this one incident of temptation to lust and transferred blame is the *only* point of contact between the two works, and (unhappily) a banal one at that; Egyptian sources indicate that both in literature and in daily life some other Egyptian women were no better than Potiphar's wife. In every other respect the two stories are entirely different; the Joseph narrative deals throughout, consistently and exclusively, with real people in real-life situations, while the D'Orbiney story's two brothers are apparently thinly disguised deities and the whole tale is permeated by fantasy (at one stage, the younger brother keeps his heart on top of a conifer tree that sports fine flowers; later he turns into a prize bull, two Persea trees, a chip of wood, etc.). This is best seen in reading a full-length translation of the story (e.g., in Erman and Blackman, *Literature of the Ancient Egyptians* [1927], pp. 150-161) and not just the "Potiphar" snippet usually reproduced in anthologies like *ANET*. In point of fact, there is quite certainly no direct link between the two works at all. That Joseph was not immediately put to death but simply imprisoned may be a hint that Potiphar doubted his wife's story, or at least perhaps intended to inquire more closely into the matter at leisure.

C. Gen. 40: Prison and Courtiers. Comparing Gen. 39:1, 20ff. with 40:1ff., it would appear that Joseph's master was directly employed in the personal palace service of the pharaoh as commander of the bodyguard. In Middle Egyptian terms, Potiphar would then be a *sḫḏ-šmsw* or instructor of retainers (for which function cf. R. O. Faulkner, *JEA*, 39 [1953], 39) attached to the court. Thus the household in which Joseph had first risen in service was probably in the capital and within reach of the palace and state administration. This would at once explain how it was that court officials like the butler and baker came to be put into ward with Joseph. Their imprisonment was real but not rigorous; Joseph was appointed to attend to their needs. Later Egyptian evidence indicates that this is realistic enough; during one treason trial of court notables in the time of Ramses III (*ca.* 1170 B.C.), three of the bench of judges were in turn punished for carousing with the prisoners on trial (cf. A. de Buck, *JEA*, 23 [1937], 156; and n. 2 to Judicial Papyrus of Turin, VI, 1-7)! The prison of Joseph and the two dignitaries was apparently a place of detention attached to the household of the captain of the guard (cf. 40:3f.), in proximity to the court. While the captain of the guard (probably still Potiphar) had senior oversight of the prison and so may have included *ỉmy-r ḫnrt*, "prison governor," among his titles, he had under him in actual charge of prisoners a keeper; the latter's Egyptian title would be *s3wty n ḫnrt*, "prison keeper" (see K. A. Kitchen, *Tyndale House Bulletin*, No. 2 [1956/57], 1f.). On Egyptian prisons and their functions, see W. C. Hayes, *op. cit.*

The title (chief) butler should be rendered (royal) cupbearer, Egyptian *wdpw-nsw*, later *wb3-nsw*, as is evident from his function in Gen. 40:11-13 and Egyptian data mentioned by Vergote, pp. 35-37. Potiphar, the cupbearer, and the baker are all described as *sārîs* in Hebrew, rendered "officer" in the English versions but often considered to mean "eunuch." Examination, however, of cognate *ša-rēš(-šarri)* in Akkadian and parallel terms in Hittite, etc., as well as of the occurrences of the Hebrew term *sārîs* in the OT, shows that in the 3rd and 2nd millennia B.C. these words were general ones for "dignitary," "official," "courtier," and only later (esp. in the 1st millennium B.C.) took on the narrower meaning "eunuch." In Egyptian also, for example, the word *sr*, "official," became in Coptic *siûr*, "eunuch." And as Potiphar was married, he obviously was no eunuch, though called *sārîs*. The fact is that the Joseph narrative is true to its origin in the early 2nd millennium B.C. and so uses *sārîs* in its early, general meaning, not the later more specialized meaning (see K. A. Kitchen, *JEA*, 47 [1961], 160, for references).

D. Gen. 41: Dreams, High Office, Egyptian Names. The prominence of dreams in the story of Joseph is characteristic of all Near Eastern antiquity. Joseph the boy has dreams foreshadowing his later exaltation, the cupbearer and baker each have a dream presaging their respective restoration and extinction, and it is by dreams that God warns the king of the prosperity and famine in store for Egypt. In Egypt and Assyria special textbooks existed for the interpretation of dreams; an Egyptian one (Papyrus Chester Beatty III, written in the 13th cent. B.C., but probably originally composed about five centuries earlier) follows the pattern, "If a man sees himself in a dream doing [such and such], it is good or bad and means that [so and so will befall him]." For a brief sample of this text, see *ANET*, p. 495; for the whole topic, see A. L. Oppenheim, *Interpretation of Dreams in the Ancient Near East* (1956); also *Les Sources Orientales, II: Les Songes et leur interprétation* (1959). The Hebrew word for "magician" used in Gen. 41:8, *ḥarṭummîm*, is from Egyp. (*ḥry-ḥbt*) *ḥry-tp* (Gardiner, *JEA*, 24 [1938], 164f., and Vergote, pp. 66-94, 206, for full study and bibliography).

Joseph's practical approach to the problem of impending years of plenty and then of famine (41:33-36) commended him to Pharaoh as the God-sent man for the situation (vv. 37ff.). Joseph was given the royal seal and supreme authority under Pharaoh, ceremonial investiture with linen raiment and gold necklace, and the second chariot. Opinions differ somewhat over the precise offices that Joseph held. Most scholars consider that the MT represents him as vizier, but some prefer to hold that in fact Joseph was more strictly a *ra-ḥery*, an official specially appointed to a given task (in this case, full charge of agriculture, economy, and antifamine measures) and directly responsible to Pharaoh. See J. M. A. Janssen, *Jaarbericht Ex Oriente Lux*, 14 (1955/56), 66f.; Vergote, pp. 102ff.; W. A. Ward, *JSS*, 5 (1960), 144-150 (who would make Joseph simply minister for agriculture directly responsible to the king). The investiture of high officials with linen and gold decorations is quite well attested from the monuments. The use of the chariot (41:43) and mention of horses (47:17) does not preclude a date for Joseph of *ca.* 1700 B.C.; the skeleton of a horse was found at the fortress of Buhen in Nubia in levels dating from well before the destruction of the fortress in the 17th cent. B.C. As horses at this period were never ridden but always used for chariots, this is a strong hint of the probable use of both horse and chariot to a limited extent in the Nile Valley as early as Joseph and for some time before his day (on the date of the skeleton, see W. B. Emery, *Kush*, 8 [1960], 8f. and plate IIIb).

Among the Egyptian names in Gen. 41, Potiphera is universally admitted to be Egyptian *P3-dî-P3Rʿ* or *Pedi-Prē*, "he whom Prē (=sun-god) has given"; and Potiphar is generally considered to be a variant of this. This type of name (i.e., *P3-dî-X*, where *X* is a deity) is known from the 19th Dynasty (13th cent. B.C.) onward, and replaced an older form with the same meaning; the writer of the Joseph story may have substituted a "modern" form *PediPrē* for older and obsolete *DidiRē*. Asenath is paralleled by Egyptian names like *'Iw.s-n.t* or *-n-ỉt(ʿ.s)*: "she belongs to thee"

(fem., the mother or a goddess) or ". . . to (her) father"; such names are well known in Egypt in the early 2nd millennium B.C. Zaphenath-pa'aneah may be for Zathenaph-pa'aneah, Egyptian (*Yōsēp*) *ḏd-n.f ('I)p-'nḫ*, i.e., "(Joseph) who is called Ip-'anekh" (the latter being a common name in the early 2nd millennium). For fuller details of these names, see K. A. Kitchen, *The Joseph Narrative and Its Egyptian Background* (forthcoming). These names are certainly not anachronistic as often alleged but are fully compatible with a date for Joseph in the first half of the 2nd millennium B.C. (on date, see below).

The wealth of Egypt's grainfields and granaries (Gen. 41:49) was proverbial throughout antiquity and was often illustrated on the walls of tombs of the great dignitaries of the Middle and New Kingdoms (cf. *Illustrations from Biblical Archaeology*, p. 33, fig. 27, and p. 37). But when the annual Nile flood failed, then the threat of famine stalked the land. Several famines are mentioned in Egyptian texts of all periods. Just before or after Joseph's time, in an oft-quoted inscription, a certain Bebi remarks, "When a famine came [lasting] many years, I gave grain to my town during each [year of] famine." On Egyptian famines, see J. Vandier, *La Famine dans l'Égypte ancienne* (1936). For a starving bedouin depicted on an Egyptian relief of *ca.* 2400 B.C., see *ANEP*, no. 102 (and cf. no. 101).

E. Gen. 42–44: Border Control. In chs. 42–43 the strict Egyptian border control that is presupposed by Gen. 42:9f. (when Joseph treats his brothers as "suspects") is again true to life for more than one period of Egyptian history: *ca.* 1960 B.C., Sinuhe had to evade the frontier guards on the forts called "Wall(s) of the Ruler" (cf. *ANET*, p. 19), while papyri of the 13th cent. B.C. reflect a similar close watch on frontier crossings then (*ibid.*, pp. 183f.; and *ANET*, pp. 258f.).

F. Gen. 45–47: Keepers of Cattle, Egyptian Economics. When Joseph's father and family finally arrived in Egypt, at Joseph's instigation and the pharaoh's express command, he told them to report their occupation to the pharaoh as keepers of cattle (Gen. 46:33f.), so that they might dwell in Goshen, for "every shepherd of flocks is an abomination to the Egyptians" (v. 34). As in the case of the Egyptians and Hebrews eating separately in Gen. 43:32, so the separation of foreign herdsmen from Egyptians rested largely or partly on ritualistic usage; in different Egyptian provinces, various animals were taboo (either honored or proscribed). See P. Montet, *L'Égypte et la Bible* (1959), pp. 99-101; Vergote, pp. 188f.

Joseph's aim in getting his people settled in Goshen by professing to be keepers of cattle and sheep was probably twofold. In the first place, the delta was still largely undeveloped in the 2nd millennium B.C.; much of it had not yet been reclaimed for cultivation, and the northeast delta was in some degree a semiforeign borderland in Egyptian eyes. Jacob and his clansfolk could live there peacefully, where Asiatics traditionally came and went, without close contact with the native Egyptian population (or their taboos). In the second place, the large, undeveloped tracts of the delta included marshes and rush- and scrub-covered plains excellent for keeping cattle, where the best Egyptian cattle were pastured; cattle from Upper Egypt were even sent to the delta seasonally each year, including during the latter part of the Hyksos period (*ca.* 1600 B.C.); see H. Kees, *Ancient Egypt: A Cultural Topography* (1961), pp. 29f., 88. This also explains the pharaoh's remark (Gen. 47:6) to Joseph concerning his brothers, "If you know any able men among them, put them in charge of my cattle": the royal cattle were kept in this favorable region, certainly "the best of the land" for this purpose. The settlement of the Hebrews in Goshen, the later "land of Rameses" (47:11, an editorial term), is one more example of the progressive colonization of the delta promoted by Egypt's rulers in successive periods of its history.

During the famine, Joseph bought up all private property in Egypt (except that of the temples) in exchange for grain for food and for cultivation (47:13-26), so that the pharaoh and the priests were the only landowners. This would fit well into the Hyksos period of Egyptian history, after the Middle Kingdom when the provincial governors at least were great landed families, and before the New Empire when Pharaoh and the state (sometimes barely distinguishable) and the great temples alone owned almost all land (the few known or probable cases of New Empire private land ownership are studied in contrast to the state and temple holdings by H. W. Helck, *Materialen zur Wirtschaftsgeschichte des Neuen Reiches* [1961], II, 237-39). In theory, the king owned all Egypt as successor to the gods on earth, but actual practice oscillated from period to period, in accordance with the successive economic and political changes during Egyptian history. The priests did not have to pay Joseph's one-fifth levy on the produce of all other land (Gen. 47:20), but this does not imply that they paid no taxes at all as some have inferred (on this, the evidence is ambiguous).

G. Gen. 48–50: Shades of Death. Eventually, Jacob reached the end of his long life, but first he blessed the sons of Joseph in particular (ch. 48) and his own twelve sons in general (ch. 49), in accordance with ancient Near Eastern and patriarchal custom (cf. Gen. 27; and C. H. Gordon, *BA*, 3 [1940], 8). For some linguistic background to Gen. 49, cf. J. Coppens, "La Bénédiction de Jacob," in *SVT*, 4 (1957), 97-115; the Middle Bronze Age tombs at Jericho with their many successive burials (K. M. Kenyon, *Digging Up Jericho* [1957], pp. 233ff.) illustrate Jacob's concern about and insistence on his being buried in the family grave with his forefathers (Gen. 49:29-33; cf. 50:5-14). Both Joseph in his turn (50:26) and his father (50:2f.) were embalmed, i.e., mummified in Egyptian fashion; and Joseph was put "in a coffin in Egypt." In the 17th cent. B.C., roughly mummiform wooden coffins with conventional portrait faces carved at the head end were the custom.

The seventy days' mourning (50:3) were traditional in Egypt (Vergote, p. 200 and references); also, Joseph's age of 110 years was that recognized as "ideal" by the Egyptians (Vergote, pp. 200f.) and this attainment would be regarded as a signal mark of divine favor by his contemporaries.

H. Date of Joseph. Those who regard the Joseph narratives as comprising historicized myth will have no great concern for establishing a firm chronological picture for the time of Joseph. Other scholars, however, who see in the patriarchal narratives a developing national saga, recorded much as similar material might be written today, will treat them as having a substantial basis of historical fact, and will make serious attempts to fit them into the chronology as carefully as possible. It must be stated at once that certain of the chronological problems associated with the patriarchal period are very complex, leading some scholars to assign a date of *ca.* 2000 B.C. to Abraham while others place him in the Egyptian Amarna Age (15th and 14th cent. B.C.). The preponderance of current archeological evidence, however, indicates that the topographical pattern of the patriarchal narratives is consistent with the situation in the Middle Bronze Age rather than with life in other periods, such as that of the Egyptian empire (*ca.* 1570-1200 B.C.), when Palestine was an Egyptian dependency.

One must distinguish carefully between the epoch in

which Joseph lived and the date of the present narrative in Gen. 37–50. The present narrative is most appropriately to be attributed to about the 13th cent. B.C. and to the hand of Moses. The use of the term "land of Rameses" in Gen. 47:11 (which will refer to Ramses II, *ca.* 1290-1224 B.C.) is one good indicator of this general date; certainly with the fall of the 20th Dynasty (*ca.* 1085 B.C.), this term was obsolete, and "field(s) of Zoan (Tanis)" replaced it. Particular emphasis on the age of 110 years occurs in the Ramesside period (1300-1100 B.C.); cf. Vergote. Nor are these the only reasons that favor a Ramesside (Mosaic) date for the present Joseph narrative.

Joseph himself, on all views, lived before the Ramesside period; most authorities put him in the Hyksos period (*ca.* 1700-1550 B.C.), and a few in the 18th Dynasty (in the 14th cent. B.C.). Chronologically, Joseph is inseparable from the patriarchs. Abraham, Isaac, and Jacob are a close series, on the unanimous testimony of Genesis and later tradition, while the life stories of Jacob and Joseph are inseparably interlocked. At present, the total available evidence favors dating the patriarchs in the early part of the 2nd millennium B.C.–*ca.* 1900-1700 B.C. in round figures; the destruction of Transjordanian settlements and of the Cities of the Plain in Gen. 14 and 19 would agree with a great reduction in population density in Transjordan after *ca.* 1800 B.C. (cf. N. Glueck, *The Other Side of the Jordan* [1940]), and archeologically attested seasonal occupation of the Negeb or Southland in Middle Bronze Age I and early II (21st-19th cents. B.C.) would agree with Abraham's journeys there in Gen. 12–13 (see N. Glueck, *Rivers in the Desert* [1959]). Four centuries or more from the 18th cent. B.C. (Gen. 15:13; Ex. 12:40f.) would agree with an Exodus in the 13th cent. B.C. As genealogies tend to be selective in the Near East and Scripture alike, their apparent shortness need not militate against the 430-year figure (*see* CHRONOLOGY OF THE OT III.A.; cf. also W. F. Albright, *BASOR*, 163 [1961], 49-54). Joseph at about 1700 B.C. would then fall into the Hyksos period of Egyptian history. With this would agree the use of "Egyptian" as a distinguishing epithet in Gen. 39:1; the strict observance of Egyptian habits (41:14) and taboos (43:32), combined with Joseph's ready acceptance in an Egyptian household (cf. Papyrus Brooklyn, etc., above), his rise at court, and the change in Egyptian land economics also noted above.

JOSEPH AND ASENATH. *See* PSEUDEPIGRAPHA V.E.

JOSEPH BARNABAS. *See* BARNABAS.

JOSEPH BARSABBAS bär-sab'əs [Gk. *Barsabbas,* or *Barsabas*]; AV BARSABAS; for etymology, etc., of "Joseph," *see* JOSEPH. Joseph Barsabbas was surnamed Justus (Acts 1:23). Barsabbas was probably a patronymic, i.e., "son of Sabba or Seba." Other interpretations given are "son of an oath," "son of an old man," "son of conversion," "son of quiet." It is likely that the "Judas called Barsabbas" of Acts 15:22 was his brother.

Joseph Barsabbas was one of those who accompanied the apostles "during all the time that the Lord Jesus went in and out among us, beginning from the baptism of John until the day when he was taken up from us" (Acts 1:21f.). Therefore, when the brethren met in Jerusalem shortly after the Ascension and Peter proposed that they select someone to fill the place in the apostleship left vacant by Judas Iscariot, Joseph Barsabbas was nominated along with Matthias; Matthias, however, was the one on whom the lot fell, and he was therefore enrolled with the eleven apostles (Acts 1:15-26).

According to Eusebius (*HE* i.12), Joseph Barsabbas was one of the seventy (Lk. 10:1), and Papias records the oral tradition that he drank a cup of poison without harm (cf. Mk. 16:18). The Acts of Paul, a work belonging to the 2nd cent. and first mentioned by Origen, relates that Barsabbas, Justus the Flatfoot, and others were imprisoned by Nero for professing their faith in Christ; but when a vision of the newly martyred Paul appeared to the emperor, he ordered their immediate release. C. M. KERR

JOSEPH HUSBAND OF MARY [Gk. *Iōsēph*] (Mt. 1:16ff.; 2:13, 19; Lk. 1:27; 2:4, 16; 3:23; 4:22; Jn. 1:45; 6:42). Joseph appears only in the narratives of the infancy and boyhood of Jesus in the Gospels of Matthew and Luke. The Gospel of Mark lacks any mention of him, and the Gospel of John mentions him only in a reference to Jesus as his son. This has led many to speculate that Joseph had died before Jesus entered His public ministry and that Mary was a widow during this period of Jesus' life. Such is quite probably the case, as in those times men were normally much older than the women they married.

The Gospel of Luke pictures both Joseph and Mary as residing in Nazareth before Jesus was born. Matthew makes no mention of their residence before Jesus' birth; he only makes it plain (as Luke does also) that Jesus was born in Bethlehem. It is quite possible that the families of Mary and Joseph were a part of the Jewish migration from Judea to Galilee which began during the time of the Maccabean ruler Aristobulus. Those who migrated were zealous Jews who desired to bring their religion to the pagan Galileans and were so successful that there was no question of the Jewish character of the region after that time. Yet these families kept their ties with their native cities, and for the purposes of the Roman census they were required to return. Joseph was a part of a poor carpenter's family. He not only followed this craft himself but also taught it to Jesus (Mk. 6:3). The Judean origin of Joseph's family is further emphasized by the repeated reference to his Davidic ancestry. Not only is this clear from the genealogies in both Matthew and Luke (*see* GENEALOGY OF JESUS) and the forced journey to Bethlehem for the census, but Mt. 1:20 also refers to Joseph's Davidic lineage; here the angel Gabriel addresses Joseph as David's son.

By the time of the Annunciation to Mary by the angel Gabriel, Joseph and Mary were already engaged. Engagement was a very formal occasion, usually sealed by a small gift or a written declaration, although the occasion could involve much more. The period of engagement for a virgin was normally one year, during which time she had the rights of a wife. Divorce was required to break the engagement, and the death of her intended husband before the marriage left her a widow. Infidelity during engagement was regarded as adultery (Dt. 22:13-21). Mt. 1:18-25 describes Joseph's situation. He found that Mary was obviously expecting a child and thus determined that he should divorce her quietly. The text notes that he was a just man, meaning that he lived as a pious Jew in accordance with the law. Although the law allowed him to make her a public example and thus have both Mary and her family disgraced, Joseph determined that a quiet divorce would be better.

At this point Joseph received the first of three direct revelations from God. During a dream the angel of the Lord appeared to him and disclosed that Mary had actually been faithful to him and that the child she had conceived was by the Holy Spirit and would be the Son of God. Thus instructed by the angel, Joseph did not fear to

take Mary as his wife, although the text is explicit that he allowed her to remain a virgin until after the child Jesus was born.

Joseph's Davidic lineage required that he make the journey from Nazareth to Bethlehem for the purpose of the Roman census. It was necessary for each male to make the journey and pay a tax, but it was not necessary for women. Joseph's concern for Mary is shown in their journey. As the time of birth was close at hand, leaving her in Nazareth would have left her open to public ridicule during his absence. Luke seems to emphasize that God moved the entire Roman empire to fulfil Micah's prophecy that the Messiah would be born in Bethlehem (Mic. 5:1-4 [MT 4:14–5:3]). Upon their arrival in Bethlehem, Joseph was not able to obtain a place for them to stay in spite of Mary's condition. Thus, the child was born in a stable (probably a cave) and laid in a manger. There Joseph and Mary received the shepherds as recorded in Lk. 2:8-20.

An insight into the piety and poverty of Joseph is provided in the scenes involving the purification of Mary and the child. The law said that after a forty-day period the first-born male child and mother must be purified in the temple. Two offerings were to be given, a lamb and a turtle dove, except in the case of the poorest of people, who could offer two turtle doves. The latter was Joseph's offering. While in the temple Mary and Joseph met Simeon, who blessed them (Lk. 2:25-32); and as they marveled at Simeon's prophetic blessing they met Anna the aged prophetess, who also acknowledged their child as God's Messiah (Lk. 2:33-35).

God's second direct revelation to Joseph came immediately after the visit of the Magi. He was warned in a dream that he should not remain in Judea, as Herod was seeking to kill the young child. Joseph took Mary and the child and made his way into Egypt, where they lived until Herod's death. Joseph remained in Egypt until his third direct revelation from God, which occurred when the angel of the Lord told him to return to Israel, since those who had sought to kill Jesus were dead. Upon their return to Israel, Joseph and Mary found that Herod's son Archelaus reigned in Judea; so they returned to Nazareth and there raised their son (Mt. 2:19-23).

The final reference to Joseph shows again how he lived and raised Jesus as a pious Jew. The Scripture (Lk. 2:41) relates that Joseph and Mary made their pilgrimage to Jerusalem every year for the Passover feast. Jesus journeyed with them, apparently for the first time, when He was twelve years old. He undoubtedly was taken at this time so that He might prepare for His formal initiation into the Jewish nation the following year. After the seven days of the Passover, Jesus was inadvertently left in Jerusalem by His parents. Jesus' word concluding this passage shows His consciousness that Joseph was only His legal father and that His real father was God: "Don't you know that I must be about my father's business?" (Lk. 2:48).

The same emphasis is found in the references to Joseph in the Gospel of John. Since the formal narrative in the Gospel begins with the ministry of John the Baptist, no reference is made to Joseph's participation in the events of the story. Twice Joseph is recognized as Jesus' legal father. When Philip speaks of Jesus to Nathanael he calls Him Joseph's son (1:46). The same recognition is made by those who say that they know Jesus' father and mother and question Jesus' claim to have come down from above (6:42). Some scholars feel that the scornful question regarding Jesus' father is a reference to the presumed illegitimacy of His birth in the eyes of many Jews (Jn. 8:19). In the time of Justin Martyr (*ca.* A.D. 150) such a scandalous rumor was prevalent among the Jewish people. Throughout his Gospel, however, John is not as concerned to record the circumstances of Jesus' birth in Bethlehem as he is to indicate that the true origin of Jesus is with the Father and that He is the divine Word of God.

In the apocryphal NT literature the role of Joseph enlarges as the narratives about Jesus' childhood increase. In the Infancy Gospel of Thomas, Joseph plays a role in the story about Jesus giving life to clay sparrows He had created. He also is forced to admonish Jesus that He should not cause any more children to die by pronouncing curses on them. The Gospel of Peter and the Protevangelium of James both picture Jesus' brothers as children of Joseph by an earlier marriage. The glorification of Joseph in Egypt and the fostering of a cult around him seem to have been the source of an Arabic History of Joseph the Carpenter. This fourth- or fifth-century document is built around Joseph's life and death and includes material from the Infancy Gospel of Thomas and the Protevangelium of James, as well as a eulogy by Jesus over Joseph at his death.

D. W. WEAD

JOSEPH OF ARIMATHEA ar-i-mə-thē'ə [Gk. *Iōsēph apó Arimathaias*] (Mt. 27:57, 59; Mk. 15:43, 45; Lk. 23:50; Jn. 19:38). In all four Gospels the man who steps forth to bury Jesus' body is Joseph of Arimathea. As a member of the Sanhedrin, Joseph was undoubtedly a resident of Jerusalem at this time, but he was born and had lived previously in the Judean village of ARIMATHEA.

Joseph is described in both Mk. 15:43 and Lk. 23:50f. as being a member of the Sanhedrin, although he did not consent to their plot and action against Jesus. He was a rich man (Mt. 27:57) with good social standing (Mk. 15:43). His wealth is shown by the fact that he possessed a new tomb freshly cut out of stone. This undoubtedly indicates that he had made a permanent move from Arimathea to Jerusalem and expected to use this new tomb for his family burial plot in his new city. All four Gospels agree that Joseph became a disciple of Jesus, although John emphasizes that this was done secretly (Jn. 19:38). John seems to indicate that there were many such disciples (12:42). Mk. 15:43 and Lk. 23:51 disclose that he was "expecting the kingdom of God," thus indicating that he expected the Kingdom to come through Jesus. In addition, Luke stresses that he was a good and just man (Lk. 23:50). His desire to bury the dead despite personal risk shows that he was a pious Jew.

The four Gospels record that Joseph went to Pilate requesting that Jesus' corpse be given to him for proper burial. Although it was customary for the Romans to leave the crucified body on the cross for the birds to destroy, they seem to have respected the requirement of Dt. 21:23 that the bodies of executed criminals be taken down and buried. Normal Jewish practice allowed that such bodies be buried in a common tomb supplied by the court (Mish. *Sanhedrin* vi.5). Joseph broke this practice by stepping forth to bury Jesus in his own tomb. None of the Gospels reports that Jesus' followers had anything to do with the burial but only that they followed and observed the tomb in which he was laid (Lk. 23:55).

In the act of burial itself Joseph was accompanied by Nicodemus. Such an act brought with it the risk that neither man would be able to participate in the festivities of the Passover because of the ceremonial uncleanness caused by contact with a dead body (Nu. 19:11). It is probable that slaves performed the actual burial. According to Jew-

ish custom the body was anointed with a spiced oil, in this case myrrh and aloes, wrapped with a linen sheet, and placed in the unused tomb. It was Jewish custom to lay a body on a shelf in the tomb until it had thoroughly decomposed. Then the skeleton was broken apart and placed in an ossuary, a small box for the bones, with an inscription to identify the deceased. The time for Jesus' burial was short, as only two or three hours remained between His death and the setting of the sun (the beginning of the sabbath). *See also* BURIAL II.

NT apocryphal literature portrays Joseph as a friend of Pilate. The Assumption of Mary shows him as caring for Mary, Jesus' mother, from Christ's ascension until her death.

Legends from a later period report that Joseph of Arimathea was sent by the Apostle Philip from Gaul to England, that he built the first church in Glastonbury and became its patron saint, that he brought the Holy Grail to England, and that he freed Ireland from snakes. Many legendary details of his life are found in the fifth-century Gospel of Nicodemus (*see* APOCRYPHAL GOSPELS III.B).

JOSEPH, PRAYER OF. A pseudepigraphical writing. Of an original 1100 lines (according to Nicephorus) only two fragments can now be found in quotations by Origen (sixteen lines in *Comm. on John* ii.31; one line in *Philocalia* 23.15). The extant portion of the work portrays Jacob in exalted terms (e.g., "angel of God," "ruling spirit," "firstborn of every living thing"). The form of the work may have been a testament of Jacob. Scholars have differed about whether it is Jewish (perhaps anti-Christian), Jewish-Christian, Jewish-Gnostic, or even anti-Jewish. J. Z. Smith suggests that it is a product of mystical Hellenistic Judaism of the 1st or 2nd cent. A.D.

JOSEPH THE CARPENTER, HISTORY OF. *See* APOCRYPHAL GOSPELS II.G.

JOSEPHUS, FLAVIUS jō-sē'fəs, flā'vē-əs. Jewish historian and general in the war of the Jews against the Romans in A.D. 66-70. Josephus was born the son of a distinguished priestly family sometime between Sept. 13, A.D. 37, and March 16, 38, and died probably *ca.* A.D. 100 in Rome. His writings give some information about his life and family relationships. He was married four times and had five sons. His parents provided him an excellent rabbinic education, and at the early age of fourteen, so he boasted, he was so learned that the high priests and the leading men of the city of Jerusalem consulted him about matters of the law. Presumably he had also learned some Greek as a youth. When he was sixteen he undertook further training with the Pharisees, Sadducees, Essenes, and finally with a hermit. At nineteen he joined the Pharisees and remained for the rest of his life a faithful pharisaic Jew, perhaps of Shammaite tendency. He did not, however, take part in the new development of rabbinic Judaism after A.D. 70. In 64, when he was twenty-nine years old, he traveled to Rome to procure the release of several pious priests, his friends, who, as he said, had been arrested and sent there on insufficient grounds by the governor Felix. He was successful, thanks to a chance meeting with Nero's wife Poppaea.

When he returned to his homeland, probably impressed by the splendor and might of Rome, he tried first to extinguish the rising fires of insurrection against Rome but finally joined the rebels and became general of the Jewish forces in Galilee. His activities as regional commander, some of which were dubious, culminated in the heroic defense of the fortress Jotapata against Vespasian in 67. Taken prisoner and led before the Roman commander-in-chief, Josephus, who as a priest felt himself especially qualified to know and proclaim God's will, prophesied that Vespasian would become caesar. His prophecy was probably influenced by his insight that Rome was now called to rule the world and that the Jewish people probably could survive, independent and secure, in cooperation with Rome. Vespasian, evidently impressed with this man, spared his life and, when he actually was proclaimed caesar in 69, set Josephus free. Through this act of manumission Josephus became Josephus Flavius, i.e., Vespasian's family name (*gens Flavia*) was added to his own name. Vespasian's son Titus, whom Vespasian commissioned to end the war against the Jews, took Josephus to Judea, where Josephus was able to witness at firsthand the siege and capture of Jerusalem in the summer of 70. He returned with Titus to Rome, where he lived the life of an author as a favorite of Caesar's court. There he wrote, as a kind of court historian, his *Jewish War* (*De bello judaico* = *BJ*), a complete description of the war of 66-70, preceded by a thorough description of the events leading up to that war. After the death of Vespasian Josephus retained the favor of his successors Titus and Domitian (d. A.D. 96), but the end of his life is obscure.

Four of his works are extant: the *Jewish War* in seven books (A.D. 75-79); *Jewish Antiquities* (*Ant.*) in twenty books (completed 93/94); his autobiography (*Vita*) in one book, a kind of appendix to the *Antiquities* that contains mainly a comprehensive accounting of his activity in Galilee and relatively little about the remaining events of his life; and *Against Apion* (*Contra Apionem* = *CAp*), written certainly after 93/94 but probably before 96. This last is a thorough and convincing defense against the anti-Jewish polemic of non-Jewish authors and is at the same time a description of central Jewish religious convictions. It is uncertain whether Josephus wrote any other works. These alone make him a very important Jewish historian, perhaps the most important. His *Antiquities*, partly a free paraphrase and adaptation of the biblical books, comprise a history of the Jewish people from the creation of the world until his own time, as well as a kind of introduction to his earlier work. Not until H. Graetz, who in the 19th cent. wrote his *History of the Jews*, did anyone venture an undertaking of similarly great scope. Without the *Antiquities* and *Jewish War* little would be known about the historical events and the religious currents in Palestine in the two centuries before the destruction of Jerusalem in 70. The value of Josephus lies in his usefulness as a source for the history of Christianity as well as of Judaism; for his accounts are especially extensive precisely for those decades in which Christianity originated. Like Philo and the LXX, his writings were valued and used so much by the early Church that they were soon transmitted only by Christians and were almost forgotten in Judaism.

The way in which Josephus composed his writings is still subject to some scholarly debate. In writing *Jewish War* — which was originally in Aramaic — he did use helpers proficient in languages, because at the beginning of his writing career his command of Greek was insufficient to enable him to write with acceptable literary skill. His three other works, however, were probably written without any stylistic helpers. Any suggestion that Josephus continually rewrote his works and issued different editions is unfounded.

It is true that, very early in the transmission of Josephus's writings, Christians altered some sections and misrepresented Josephus as demonstrating some Christian beliefs. Thus the famous *testimonium Flavianum,* supposed to be the witness of the Jew Flavius Josephus to Jesus Christ, is certainly not genuine in its traditional form; at the most it contains a genuine nucleus. This *testimonium* was considered especially convincing because it had come from the enemy camp, so it was an important factor in the high honor given to Josephus by the early Church. (*See* JESUS CHRIST I.B.)

The value of Josephus for the reader and student of the OT and NT is so high that already in the Middle Ages he was often seen almost as a church father, and in more recent times his work has sometimes been regarded — half jestingly — as a "Fifth Gospel" or "Small Bible." The first half of the *Antiquities* is an especially invaluable witness to Jewish biblical exegesis, and Jewish traditions of all kinds, in the time of the origin of the NT. His works increase our knowledge of many historical and geographical details found in the Gospels. For example, Josephus's descriptions of the Jewish revolutionary parties and the Essenes are indispensable sources for the study of the Zealots and the Qumrân texts. His accounts of the fall of Jerusalem in 70 seemed to some early Christians to show the fulfillment of the NT threats of punishment for this city, which, for example, led to an old Syriac translation of his account of the destruction being taken into the Syriac canon as a "Fifth Maccabees." Parts of Josephus's works were even bound into some editions of the printed Bibles. As late as the 19th cent., especially in the English-speaking world, the reading of Josephus in many private homes was second only to the reading of the Bible.

Bibliography.–H. St.-J. Thackeray, *et al.,* eds., texts and translations in *LCL* (9 vols., 1926-1965); H. Schreckenberg, *Bibliographie zu Flavius Josephus* (1968), *Supplementband* (1979); D. M. H. SCHRECKENBERG

JOSES jō′sēz, jō′zez [Gk. *Iōsēs*].

1. One of the brothers of Jesus (Mk. 6:3), called Joseph in Mt. 13:55 (AV Joses). *See* BROTHERS OF THE LORD; JOSEPH **14.**

2. A brother of James the Younger and son of Mary, one of the women who stood by the cross of Jesus and went to His grave (Mk. 15:40, 47; cf. AV Mt. 27:56, where the RSV has Joseph). *See* MARY **3.**

3. A name of Barnabas (Acts 4:36, AV, where the RSV has Joseph). *See* BARNABAS.

JOSHAH jō′shə [Heb. *yôšâ*–'Yahweh's gift']. A descendant of Simeon, chief in his family (1 Ch. 4:34, 38).

JOSHAPHAT josh′ə-fat [Heb. *yôšāpāṭ*–'Yahweh has judged'; cf. JEHOSHAPHAT].

1. One of David's mighty men (1 Ch. 11:43), a Mithnite, but not included in the list of 2 S. 23.

2. A priest and trumpeter of David's time (1 Ch. 15:24), AV Jehoshaphat.

JOSHAVIAH josh-ə-vī′ə [Heb. *yôšawyâ*]. Son of Elnaam, one of David's mighty men (1 Ch. 11:46). He is omitted from the list of 2 S. 23, which is less complete and differs in detail.

JOSHBEKASHAH josh-bə-kä′shə, josh-bə-kash′ə [Heb. *yošbᵉqāšâ*] (1 Ch. 25:4, 24). A son of Heman appointed by David as a singer. Some commentators, by slightly modifying the MT, read the last eight or nine names as a prayer ("Be gracious to me, Yahweh, be gracious to me; You are my God; I have magnified and I will exalt [my] helper; sitting in adversity I said, 'Pour out visions in abundance' "), or as a series of incipits (cf. J. M. Myers, *I Chronicles* [*AB,* 1965], pp. 172f.). Whatever the words originally meant, clearly the Chronicler understood them as names.

JOSHEB-BASSHEBETH. *See* JASHOBEAM.

JOSHIBIAH josh-ə-bī′ə [Heb. *yôšiḇyâ*–'Yahweh sets' or 'causes to dwell']; AV, NEB, JOSIBIAH. A Simeonite (1 Ch. 4:35).

JOSHUA josh′o͞o-ə [Heb. *yᵉhôšu(a)ʿ*–'Yahweh saves'].

1. A man of Beth-shemesh. After the Philistines sent the ark away (1 S. 6:14) it stopped in Joshua's field by a stone.

2. A governor of Jerusalem during Josiah's reign (2 K. 23:8).

3. A high priest in postexilic Jerusalem. *See* JESHUA **3.**

4. [Gk. *Iēsous*]; AV JOSE (Lk. 3:29). An ancestor of Jesus in Luke's genealogy.

5. (AV also Jehoshua [Nu. 13:16; 1 Ch. 7:27]). Son of Nun, of the tribe of Ephraim. He was Moses' assistant and successor. The original form of the name was Heb. *hôšēʿ(a)*, "salvation" (Nu. 13:8; LXX *Ausē*), but was changed by Moses to *yᵉhôšu(a)ʿ*, "Yahweh saves" (Nu. 13:16; LXX *Iēsoun*), perhaps reflecting the practice of assuming a regnal name; later pronounced *yēšû(a)ʿ* (Neh. 8:17; LXX *Iēsous* [cf. Mt. 1:21]). Joshua was a "servant" (or "second-in-command," *mšrt*; Ex. 24:13; cf. 32:17) of Moses. The Bible introduces him as the military field commander under Moses in Israel's battle against Amalek, their military engagement shortly after the Exodus (Ex. 17:9-13). He is presented next as a spiritual disciple of Moses: he accompanied him up the mountain for the reception of the Torah (Ex. 24:13), would not leave the sacred tent whenever Moses returned to the camp after talking to Yahweh face to face (Ex. 33:11), and zealously defended Moses' prerogatives when Eldad and Medad prophesied in the camp (Nu. 11:26-29).

He asserted his faith in Yahweh in the matter of spying out the land by vainly seeking together with Caleb to counteract the unbelieving, defeatist attitude of the other ten spies. Yahweh rewarded their courage and faith by promising them alone entrance into the land (Nu. 14:6, 22-24).

In spite of Joshua's apprenticeship and proven military and spiritual leadership, Moses would not choose him as successor apart from divine selection (Nu. 27:16-23).

Joshua is seen to be the successor of Moses both by legal appointment and by striking parallels between his and Moses' careers. N. Lohfink showed that the appointment of Joshua as Moses' successor follows a carefully worked-out schema (*Scholastik,* 37 [1962], 32-44).

As Israel's new leader he had two functions. He was a military commander to take the land, and an administrator to allot the land. This twofold responsibility was stated at his appointment while Moses was still alive (Dt. 1:37f.; 3:28; 31:7). After the death of Moses, Yahweh repeats his military responsibility (Josh. 1:2-5) and his administrative responsibility (1:6-9). His administrative functions commence in Josh. 13:7.

Moreover, the striking parallels of his career with that of Moses prove his selection. Yahweh was with him, as He was with Moses (1:5; 3:7); the people pledged to obey him, as they did Moses (1:17); he sanctified Israel before Yahweh's miracles as Moses did (3:5; cf. Ex. 19:14); the

Lord promised to exalt him as He had exalted Moses (Josh. 3:7; 4:14); both crossed the water miraculously and in both instances the waters stood in a heap and the tribes of Israel crossed on dry ground (3:17; cf. Ex. 14:21-23, 29; 15:8). At the outset of his mission against Yahweh's enemies he encountered the commander of Yahweh's army and was told, as was Moses, "Put off your shoes from your feet, for the place where you stand is holy" (5:15; cf. Ex. 3:5). Both interceded for the sinning people (7:7; Dt. 9:25-29); both wrote the law on stones (8:32). Yahweh hardened the hearts of their enemies (11:20; Ex. 9:12). At the end of their life-work, both Moses and Joshua delivered stirring addresses of appeal and warning to the assembled Israelites; both men died at symbolic ages (Moses, 120 or 3 full generations; Joshua, 110, the ideal life span for the Egyptians; cf. Gen. 50:22, 26, which give Joseph's age also as 110).

The true character of Joshua's leadership can be best appreciated by considering the decided military advantages belonging to his enemies. The Canaanites had experienced armies (cf. the accounts of the campaigns by the pharaohs of the New Egyptian empire into Palestine-Syria in *LBHG*, pp. 138-173), chariots (e.g., Thutmose III boasts of capturing 924 chariots in his decisive battle at Megiddo [*ANET*, p. 239]; Josh. 17:18; Jgs. 1:19; 4:3, 13 [900 chariots!]), and fortified cities (Nu. 13:28, 32f.; their military armament is depicted by Y. Yadin, *The Art of Warfare in Biblical Lands*, I [1963], 182ff.). Moreover, they were accustomed to forming alliances against a common foe from outside the land; e.g., in the war against Thutmose one hundred cities participated under the leadership of the kings of Kadesh on the Orontes and Megiddo, with the assistance of the king of Mitanni (cf. Josh. 9:1f.; 10:1-5; 11:1-5).

Against these odds Joshua could succeed only by strictly obeying the rules of holy war: complete dependence on Yahweh and strict obedience to His direction. Therefore, he stirred up the faith of his army by ceremony (e.g., 4:1-7), word (10:25), and life (24:15). Furthermore, he demanded of them exact obedience to Yahweh's word (cf. 8:25; 23:6).

Joshua serves as a model for all of Israel's future kings: here is a leader possessing Yahweh's spirit and having prophetic sanction (Nu. 27:18, 22), who is both a military genius and a spiritual giant (cf. Y. Kaufmann, *Biblical Account of the Conquest of Palestine* [1953], pp. 96f.). Later tradition spoke even more expansively of Joshua. Sir. 46:1-12 delineates him as Moses' successor "in prophesying" and as "a great savior" (v. 1), who "wholly followed" God (v. 6) and thus is an example for all (v. 10). Elsewhere he is called a judge (1 Macc. 2:55) and is included in lists of significant intercessors (2 Esd. 7:107) and of those who passed on the Torah (Mish. *Aboth* i.1).

B. K. WALTKE

JOSHUA, BOOK OF. The first book of the biblical section designated in the Jewish canon "the Former Prophets," which also includes Judges, Samuel, and Kings. In Hebrew the book bears the superscription *y^ehôšu(a)^c*, after its central figure; in the LXX *Iēsous* (in some MSS with the addition of "son of Naue"); in the Peshitta it is called *"Ketaba di Yeshu bar Nun talmideh d'Mushe"* ("the book of Joshua, son of Nun, disciple of Moses"). In all but the last it immediately follows the Pentateuch, which is the natural order. The Peshitta, however, places the book of Job between the Pentateuch and Joshua, in accordance with the rabbinic view that Moses wrote Job (T.B. *Baba Bathra* 15a).

I. Outline.

I. The Book of War: Taking the Land (Chs. 1–12)
  A. Preparation for War (Chs. 1–5)
    1. Charge to War (Ch. 1)
      a. Yahweh's Charge to Joshua (1:1-9)
      b. Joshua's Charge to the People (1:10-18)
    2. Reconnaissance of Jericho: Evidence of Canaan's Spiritual Weakness (Ch. 2)
    3. Miraculous Crossing of Jordan: Assurance of Yahweh's Presence and Joshua's Leadership (3:1–5:1)
    4. Final Spiritual Preparation (5:2-15)
      a. Ceremonies at Gilgal (5:2-11)
      b. Revelation of the Captain of Yahweh's Hosts (5:12-15)
  B. The Campaigns (Chs. 6–12)
    1. Central Campaign (Chs. 6–9)
      a. Conquest of Jericho (Ch. 6)
      b. Conquest of Ai (Chs. 7–8)
        1) Failure at Ai (7:1-5)
        2) Punishment of Achan (7:6-26)
        3) Success at Ai (8:1-29)
      c. Covenant Ceremony at Shechem (8:30-35)
      d. Alliance with Gibeon (Ch. 9)
    2. Southern Campaign (Ch. 10)
    3. Northern Campaign (Ch. 11)
    4. Summary (Ch. 12)
II. The Book of Distribution: Allotting the Land (Chs. 13–21)
  A. The Doctrine that Much Land Remains (13:1-7)
  B. The Territories of Transjordan Assigned by Moses (13:8-33)
  C. The Territories Assigned to Judah and Joseph at Gilgal (Chs. 14–17)
    1. Allotment to Judah (Chs. 14–15)
    2. Allotment to Joseph (Chs. 16–17)
  D. The Territories Assigned to the Remaining Seven Tribes at Shiloh (Chs. 18–19)
  E. The Assignment of Cities of Refuge (Ch. 20)
  F. The Assignment of Levitical Cities (Ch. 21)
III. Epilogue: Staying in the Land (Chs. 22–24)
  A. Consecration and Departure of the Tribes of Transjordan (Ch. 22)
  B. Consecration of the Rest of Israel: Joshua's Farewell Address (Ch. 23)
  C. Renewal of Covenant with All the Tribes of Israel (24:1-28)
  D. Death and Burial of Joshua (24:29-31)
  E. Burial of Joseph and Eleazar (24:32-33)

II. Purpose.–The book of Joshua intends to show the

historical fulfillment of Yahweh's promise made to the patriarchs and Moses to give Israel the land of Canaan by holy war. This intent is seen in the introductory charge (1:2-6), as well as in the summarizing refrains concluding the "Book of War" (11:23) and the "Book of Distribution" (21:43). Yahweh's opening charge reads: "Go over this Jordan, you and all this people, into the land which I am giving to them.... Every place that the sole of your foot will tread upon I have given to you, as I promised to Moses.... Be strong and of good courage; for you shall cause this people to inherit the land which I swore to their fathers to give them." The refrains at the end of the two "books" are similar: "So Joshua took the whole land according to all that the Lord had spoken to Moses; and Joshua gave it for an inheritance to Israel"; "Thus the Lord gave to Israel all the land which he swore to give to their fathers, and having taken possession of it, they settled there."

III. Problems.–A. The Apparent Contradiction Between the Land Promised and the Land Possessed. While the book asserts that the promises made to the fathers were fulfilled in Joshua's conquest (11:23; cf. 21:43), the historical reality is that the land promised was only partially given. Y. Kaufmann noted that the relationship between the promise pertaining to the dimensions of the land and its historical fulfillment can be divided into three categories: (1) a portion of this land was conquered and allotted; (2) another was allotted but not conquered — all the coastal strip (13:2-4), all the Emeq (17:11f.), almost all the portion of Dan (19:47), Jerusalem, Gezer, and other cities (15:63; 16:10); and (3) another was neither allotted nor conquered — from Baal-gad in the valley of the Lebanon to the Gateway to Hamath (Nu. 34:7f.; Josh. 1:4) (*Biblical Account*, p. 52).

The harmonization of these apparently contradictory statements lies in a correct understanding of "took [*lāqaḥ*] the whole land." The writer probably understood the taking of the land to mean the gaining of control without eliminating all opposition (cf. Wenham, p. 143; Kaufmann, pp. 84f.). Both the Book of War (chs. 10–11) and the Book of Distribution (chs. 13–21) recognize that the task of driving out the Canaanite was unfinished. Gibeon made a treaty with Israel (ch. 9); of the major northern cities only Hazor was burned (11:13); some Anakim remained in Gath, Gaza, and Ashdod (11:22). But the back of the Canaanite was broken, king after king was dead (ch. 12), and apart from an uprising by the Canaanites recorded in Jgs. 4–5 and the resistance of the Jebusites (2 S. 5:6-10), Israel's enemies from then on would not be the Canaanites but the Philistines, and others from outside the land (cf. the book of Judges).

To clarify the situation further it may be helpful to note that the concept of the land is both geographic and ethnographic (cf. Gen. 15:18-20; Ex. 23:28-31; Nu. 13:21; 34:2-12; Dt. 1:7; 11:24; 20:17; Josh. 1:4; 13:1-6). Now that the land in its ethnographic sense was defeated, it could also be said that the whole land in its geographic sense had been taken.

B. The Moral Problem of Annihilating the Canaanites. To many readers Moses' mandate to Israel "you shall save alive nothing that breathes, but you shall utterly destroy them [the inhabitants of the land of Canaan]" (Dt. 20:16f.) with its historical execution by Joshua in the ban at the end of each battle (Josh. 6:21; 8:24f.; 10:10, 28, 30, 35, 37, 39f.; 11:11, 14, 21) is a part of primitive religion. Now the book makes clear that involved in the concept of "possession" (*yrš*) by Israel is the notion of "dispossessing" (*yrš*) the inhabitants. The Gibeon episode shows that the Israelites intended to kill all within the Promised Land (9:18). In Josh. 13:6f. Joshua is told to allot the land even though much remains to be possessed according to Yahweh's promise: "I will myself drive them out from before the people of Israel" (13:6). Likewise Caleb offered to drive out the Anakim, if Joshua would give him the land (14:12), and Joshua told Ephraim and Manasseh to drive out the Canaanites from their area, "though they have chariots of iron" (17:18).

Although to many modern readers these wars seem immoral, from the biblical perspective they were fought precisely for moral reasons. The moral sanction behind these wars is not stated in Joshua, but two moral reasons for this type of warfare are indicated elsewhere.

First, Yahweh destroyed the Canaanites for their gross iniquity. To Abraham He implied that Joshua's sword would arrive when the iniquity of the Amorites was full (Gen. 15:16). Now the Bible normally refers to Canaan's pre-Israelite population as either Canaanites or Amorites, although these terms properly apply to two specific groups among Canaan's heterogeneous population. But these heterogeneous groups participated in a great cultural unit extending from the Egyptian frontier northward as far as Râs Shamrah (W. F. Albright, "The Role of the Canaanites in the History of Civilization" in P. W. Long, ed., *Studies in the History of Culture* [1942], pp. 11-50; K. M. Kenyon, *Amorites and Canaanites* [1966], p. 58). Moreover, the concept of holiness in this culture was diametrically opposed to Yahweh's standards of holiness. Albright pointed out that one of their principal goddesses, Anath, is called "the holy one" as a sacred prostitute. In addition to being a patroness of sexual life, both as a mother-goddess and a divine courtesan, she was also a goddess who delighted in butchery and sadism (*ARI*, pp. 73-76). Of their religion Bright wrote: "Canaanite religion, however, presents us with no pretty picture. It was, in fact, an extraordinarily debasing form of paganism, specifically of the fertility cult" (*BHI* [2nd ed. 1972], p. 116). The holiness and righteousness of God, then, demanded this judgment.

Second, the Bible regards the Canaanite religion as particularly contaminating. The intent of the mandate is to prevent God's righteousness from being turned against His own people (cf. Lev. 18:24-29; Dt. 20:18).

C. The Conquest as Holy War. Because these wars were moral in nature, the book presents them as holy war in which Yahweh is destroying Canaanite religion (for a description of "holy war," cf. G. von Rad, *Der heilige Krieg im alten Israel* [1951], p. 68; P. C. Craigie, *Problem of War in the OT* [1978], pp. 45-54). The central idea in the presentation of these stories is that this war begins with Yahweh's initiative and depends on Him for its success (Josh. 1:6, 9; 6:2; 10:8; 11:6). Because God is fighting, Israel need only trust and be confident. (On the concept of God as warrior, see P. D. Miller, *Divine Warrior in Ancient Israel* [1973]; Craigie, esp. pp. 33-44.) The events recounted in the section entitled "the preparation for the war" (chs. 1–5) are to boost Israel's morale by assuring them that Yahweh is directing the war. The function of the spies, according to 2:24, is not so much to bring back tactical information as to encourage Israel's faith (S. Wagner, *ZAW*, 76 [1964], 268).

The pattern of divine command (cf. ch. 1) followed by the obedience of the people is central in these stories. Repetition is used to emphasize the fidelity with which the command is obeyed (1:2, 11; 6:2-8; 8:1-27; 11:6f., 9).

Then, Yahweh fought for Israel: the walls of Jericho collapsed (ch. 6) and "the Lord threw down great stones from heaven" (10:11) and "fought for Israel" (10:14). Less apparent to the modern reader but perfectly obvious to the Canaanites was the theological significance involved in the standing still of the sun and moon (10:12-14). The sun

(Heb. *šemeš*) and the moon (Heb. *yārē(a)ḥ*) were principal deities among the Canaanites as indicated by such Canaanite place names as Beth-shemesh ("temple of the sun") and Jericho ("[temple of] the moon") (cf. *LBHG*, p. 97; W. F. Albright, *Yahweh and the Gods of Canaan* [1968], p. 83; J. Gray, *The Canaanites* [1964], p. 125). At the prayer of Israel's leader, Canaan's very gods were compelled to hide their faces (cf. R. D. Wilson, *Princeton Theological Review*, 16 [1918], 48; repr. in W. Kaiser, ed., *Classical Evangelical Essays in OT Interpretation* [1972], pp. 61-65). The enemy then panicked and Israel pursued.

In two incidents, however, Israel failed to obey the divine command. In the first assault on Ai (7:1-5), Israel was defeated because Achan had transgressed the ban at Jericho. But as Wenham pointed out, "even if the narrator had not said that Yahweh was angry with Israel, it might have been expected that the attack would fail, because there is no mention of a word from Yahweh to start the battle" (Wenham, p. 142). A similar thing occurred in the case of Gibeon (9:14, 18).

IV. Date of Composition.–A. The Traditional View. The author is nowhere mentioned in Scripture, although 24:26 refers to Joshua's writing down the words of the ordinances and the covenant made at Shechem "in the book of the law of God." Perhaps this verse was the basis for the talmudic attribution of the bulk of the book to Joshua, although the rabbis did recognize the work of others for at least some verses (T.B. *Baba Bathra* 14b, 15a). R. K. Harrison (*Intro. to the OT* [1969], p. 672) discusses some internal evidence for an early (premonarchic) date; e.g., 13:6 mentions the inhabitants of Sidon, but not the later, more important city of Tyre. Many scholars have pointed out the indications of a contemporary or eyewitness account (e.g., the first-person references in the MT of 5:1, 6 [cf. the AV], although the reference in v. 1 is textually uncertain). Even the most conservative scholars, however, admit evidence of later editorial work (obviously, e.g., 24:29-31).

B. The Generally Accepted View. A number of scholars discovered duplications, contradictions, derangements of sequence, etc. at many places in the book of Joshua. On this basis they concluded that the extant book comprises disparate material given shape in later times.

Until the work of A. Alt ("Das System der Stammesgrenzen im Buche Josua," in W. F. Albright, ed., *Sellin Festschrift. Beiträge zur Religionsgeschichte und Archäologie Palastinas* [1927], pp. 13ff.; repr. in *KS*, I [1953], 193-202; cf. also *KS*, I, 176-192), scholars posited a continuation of the pentateuchal sources (J, E, D, P) throughout Joshua, thus thinking in terms of a Hexateuch rather than a Pentateuch. But since the work of Alt, Noth, and Albright, scholars increasingly think of the book as an independent work derived from source material of various dates not connected with the pentateuchal sources (Wenham, p. 140). According to M. Noth, the book is the work of a collector (*Sammler*), a recensionist (*Bearbiter*), and an editor, plus various expanders. For all that, however, scholars do agree that in the final editing the book bears the impress of P and D. In particular, many contemporary scholars share the opinion that the Former Prophets (Joshua–2 Kings) are "a Deuteronomistic historical work," whether the product of editors belonging to the Deuteronomistic school, or of a single historian who set the Deuteronomistic stamp upon the whole. Moreover, most of these scholars believe that Joshua was edited in two stages and that chs. 13–21 and 24 represent secondary additions by the Deuteronomist to an earlier Deuteronomic book of Joshua (see the comms. by Noth, Hertzberg, and Gray; cf. Wenham, p. 140). According to this view the date of its composition cannot be placed earlier than the end of the 7th cent. B.C.

This inferred late date is buttressed by internal evidences as well. First, these scholars see a fundamental contradiction between the stories of the Conquest in Joshua and Jgs. 1. According to Joshua, they allege, Canaan was conquered in a full-scale national war and subsequently divided among the tribes in Joshua's lifetime. According to Jgs. 1, however, only part of the country was conquered, and that in separate tribal wars.

Second, Alt argued that the territory of Judah-Benjamin-Dan is identical with Josiah's kingdom, principally because the northern territory of Benjamin-Dan encroaches upon the land of Ephraim, which with Manasseh lacks mention in the city list. More specifically, in 18:21f. Jericho, Bethel, and Ophrah are assigned in the city list to Benjamin, though according to the boundary list these cities belonged to Ephraim and were included in the northern kingdom (cf. Josh. 16:1f.; 18:13; 1 K. 12:29; Am. 7:10-13, *et al.*; 1 K. 16:34; 2 K. 2:4f.). The cities of Dan reach to the outskirts of Jaffa (Josh. 19:45f.), thereby occupying an area N of Gezer, which is on the southern boundary line of Ephraim (16:3). Now in 2 K. 23:15 it is related that Josiah annexed part of Ephraim to his kingdom. Accordingly, Alt reasoned that the list of cities and the districts of the kingdom of Judah belong to a single official document at the time of Josiah, which a later editor cut up and from the pieces put together the territories of Judah, Benjamin, and Dan. F. M. Cross and G. E. Wright, however, rejected Alt's explanation for the inclusion of a portion of Ephraimite territory in a Judahite province (pp. 222f.). Instead they noted that according to 2 Ch. 13:19 Abijah (*ca.* 915-913 B.C.) annexed this portion, and according to 2 Ch. 15:8 Asa (*ca.* 913-873 B.C.) also controlled Ephraimite cities in the hill country, which were then garrisoned by Jehoshaphat (2 Ch. 17:2; cf. 19:4). Furthermore, they argued that Middin, Secacah, and Nibshan (Josh. 15:61f.) can be dated by archeology only during Iron II (9th cent. to early 6th cent. B.C.). Moreover, on other archeological grounds, especially on the basis of evidence from Beth-shemesh, they could not date the list later than the 9th cent. B.C. Accordingly they dated it to the reign of Jehoshaphat (*ca.* 873-849 B.C.). Finally, they concluded that the seventh- or sixth-century editor of Josh. 15–19 used it with other materials in order to give a full delineation of the territory claimed by Judah after the conclusion of the Conquest.

Third, it is believed that many stories in Josh. 1–11 are etiologies, especially from the tribe of Benjamin, and were originally local and tribal stories that were converted into national sagas by a later redactor.

C. Kaufmann's Refutation of the Generally Accepted View. Y. Kaufmann castigated those who examine the biblical text by the rules of Latin literary criticism, which assumes that an author must have a "schema," he must have a sequence from which he does not deviate, he must not repeat himself, etc. If such things occur in the biblical text they must be, according to these scholars, the result of multiple "redactors" or "expanders," who in most cases possessed little intelligence. Kaufmann observed, however, that in reality the biblical author allowed himself the freedom to compose in just this way (pp. 2f.).

Concerning alleged inconsistencies, one example will suffice to show the superficiality of such allegations. E. M. Good states: "According to Josh. 4:8, twelve stones were carried out of the Jordan and set up at Gilgal. According to verse 9, the stones were set up in the middle of the Jordan" (*IDB*, II [1962], 989). The contradiction, however, stands only in the English text. Verse 9 should be translated: "Now Joshua had set twelve stones in the midst of the Jordan...." By inserting the noun "twelve stones" between the conjunction "and" and the verb "set," the

Hebrew writer compels the reader to interpret the perfect form of the verb as a pluperfect in sense (cf. S. R. Driver, *Treatise on the Use of the Tenses in Hebrew* [1892], p. 84). In other words, the setting up of the stones in the Jordan must be anterior to the action of taking them out of the Jordan and setting them up at Gilgal.

1. The Problem of the D and P Imprint. Some argue that the book contains literary elements related in style and subject matter to D and P and therefore was edited earlier than the late 7th cent. B.C., at the beginning of the second temple. This begs the issue, for it presumes the date of these pentateuchal sources. For Kaufmann, and now many others as well, P contains early, archaic material (*ZAW*, 48 [1930], 23-43), and the nucleus of D upon which Joshua is based is early (*Biblical Account*, pp. 4-7). Furthermore, the similarity in style and subject matter proves no more than that Joshua included material from the work of authors who wrote in the style of the Pentateuch. Affinity with the literature of the Pentateuch cannot decide the question of the book's date of composition. The date should be fixed by the internal evidence.

2. The Problem of the Contradiction with Jgs. 1. The whole conception that Jgs. 1 presents a parallel but contradictory account of the Conquest is based on the false assumption that the book of Joshua relates the conquest of all the cities of Canaan. The book contains no story about the conquest of Jerusalem and Gezer. Joshua defeated their kings but did not capture the cities. Similarly no story appears about the conquest of the five Philistine cities. In 11:22 it is explicitly stated that Anakim remained in Gaza, Gath, and Ashdod. In 12:7-24 no mention is made of Beth-shean, Jibleam, Harosheth-hagoyyim, Jezreel, Acre, Tyre, Sidon, Laish, the Philistine cities, Aijalon, Shaalbim, Jaffa, etc. That Joshua did not complete the conquest of Canaan within its borders is explicitly emphasized in chs. 13 and 23. Only 10:40-42, 11:16-23, and 21:41 speak of the conquest of all the land and the slaying of all its kings. Kaufmann (pp. 85f.), however, noted that the intent of these summaries is to show that the possession of Canaan had been decided in favor of the Israelites, rather than to present a picture of total conquest. Once this was stated, the author was able to incorporate in the Book of Distribution (chs. 12–21) passages taken from the same source as that from which Jgs. 1 is taken; these show that not all of the land was actually subjugated (cf. 14:6-15 in which Joshua gives his blessing to Caleb's plan to conquer Hebron, and 17:14-18 in which Joshua encourages the tribe of Joseph to conquer the Emeq; cf. also the necessity of a second battle by Joshua against Hebron [10:37; 11:21f.]).

Furthermore, Kaufmann noted, one must bear in mind the character of Joshua's wars as described in Josh. 1–11. They are wars of destruction and extermination, not of occupation by immediate settlement. Joshua always had the people return to camp after battle, for he knew that they were eager to possess land and could easily be diverted from the main objective of conquest if allowed to engage in "land-grabbing" (Kaufmann, p. 92). The natural consequence of conducting the war in this way was that the Canaanite survivors fortified themselves in various places as best they could. Hence the tribes had to continue their fight when they started settling in their positions. Jgs. 1, then, is the perfect continuation of Joshua. In this chapter there is no story about entering the land. On the contrary, Jgs. 1 mentions few Canaanite cities (see II.A above).

3. The Problem of the Original Form of the War Stories. The notion that the stories in Josh. 1–11 were local and tribal in their original form and were converted into national sagas by later redaction can only be maintained by question-begging techniques. On the basis of this dogma the text is erased, altered, etc., to fit the theory. Furthermore, it is held that both Joshua and Judges were subjected to a national, theocratic redaction. But concerning this Kaufmann asked: "Why has the tribal element completely disappeared from the stories in Josh and from them alone? It is clear that the 'national' redaction had no need to expunge the tribal element" (p. 70). The characteristic tradition-criticism treatment of these stories is subjective, lacks scientific controls, and introduces an unnecessarily novel theory in place of a stable, consistent, traditional text.

4. The Problem of Inconsistencies Between the Boundary Lists and the City Lists. Regarding the alleged inconsistencies between the two types of lists found in the Book of Distribution of the land, Kaufmann emphasized both that the apparent encroachment of Benjamin into the area of Ephraim is no more than a shifting of a border strip and that this fluctuation on a border is not unique. On almost every border fluctuations occur (cf. 15:10f. with 19:41-44; 15:60f. with 18:22, 28 [LXX]; 16:6 with 17:7; 16:63 with 18:28, etc.). This suggests that the boundaries mentioned in the book have no political or administrative significance at all, for such boundaries are required to be clear and unambiguous. In reality the purpose of the description of the distribution of land is historical; the author merely intends to describe the mixture of tribes that inhabited a given district or city, without intending to draw exact geographical boundaries. This description is chronologically earlier than any geographical or administrative division (cf. Kaufmann, pp. 14f.).

5. The Archaic Character of the Book of Joshua. Kaufmann also presented a forceful case for the archaic character of the book. At the time that Joshua fought his battles, the Philistines of the Pentapolis were not yet in Canaan. Joshua fought only against the Canaanites, even in the Shephelah (10:40-43; 11:16). In 11:22 it is stated explicitly that the Anakim occupy Gaza, Gath, and Ashdod, and no mention is made of the Philistines. Likewise, in Jgs. 1 there is still no mention of the Philistines (Kaufmann, pp. 50, 79). He further noted that the only mention of them is in Josh. 13, where the Israelites are promised the ability to expel them from the Shephelah. This suggests that "the real history of the Philistines is beyond the horizon of the Book of Joshua" (p. 80). Furthermore, the Gibeonites are enslaved, but continue to live in their cities; they are not yet dispersed "in all the territory of Israel" (2 S. 21:5). In addition, Dan is marked out in his unreal portion between Judah and Ephraim and W of Benjamin (Josh. 19:40-48) but not according to its real territory in the north. Dan's northward migration is mentioned (19:47), but none of its territory is marked out. Furthermore, Simeon resides in the midst of Judah (19:9) and its southward expansion to Mt. Seir (1 Ch. 4:34-43) is not mentioned (Kaufmann, pp. 22f.). Again, the Emeq is completely Canaanite (Josh. 17:16-18). What happened in the time of Deborah (*ca.* 1230 B.C.) is unknown to the book of Joshua. Jerusalem in the Book of War is an important Canaanite royal city, while in the Book of Distribution it is a city of no importance, called "Jebus," that still has no Israelite inhabitants (15:63) and is listed as a city of Benjamin. This is in accord with the fact that Hebron is called Kiriath-arbah (15:54), and Kiriath-jearim is called Kiriath-baal (15:60). Aijalon is in Dan's unreal portion, but is not yet Benjaminite. Lod, Hodid, and Ono are not mentioned (Kaufmann, pp. 79-82). The favor of the kingdom and its accouterments (temple, royal cities, priests, etc.) are unknown. The list of Levitical cities (Josh. 21:1-42) originated at a time when the heads of Levitical families rather than judges or kings

were in a position to formulate or at least to influence the development of the social organizations.

D. Conclusion. Kaufmann (p. 7) concluded that the ancient book of Joshua was presumably composed by a recorder of events at the beginning of the period of the Judges, at the time of Dan's migration to the north, the latest event explicitly mentioned. The author also used "the Book of Jashar" (10:13), a pre-monarchic national epic that originated no later than the Conquest period.

Since ancient tradition holds that Sidon was the first Phoenician city to be founded, and since Tyre is absent from the list of cities conquered by Thutmosis III (*ca.* 1485), it is probable that Tyre had not yet been founded as a colony of Sidon at the time of the writing of this passage in Joshua. Its absence from the passage therefore suggests an early date for its composition.

JOSIAH jō-sī'ə [Heb. *yō'šîyāhû*—'Yahweh supports'; Gk. *Iōsias*]; AV Apoc., NT JOSIAS (1 Esd. 1; Bar. 1:8; Mt. 1:10f.). Son of Amon and king of Judah. The biblical account of Josiah is given in 2 K. 22:1–23:30 and 2 Ch. 34:1–35:27. He is mentioned in Jer. 1:1; 3:6. Sirach includes him in his Praise of Famous Men (Sir. 49:1-4).

Josiah was suddenly elevated to the kingship at the tender age of eight when Amon was slain. From 640 to 609 B.C. Josiah provided Judah with pious political leadership. During this period the extensive Assyrian empire not only declined in power but collapsed with the fall of Nineveh in 612. Simultaneously the Babylonian nation under King Nabopolassar (625-605) became a first-rate power in Mesopotamia and threatened further advance in the Fertile Crescent by challenging Egyptian might. In 609 Josiah's ambitious reign was suddenly terminated by his death at Megiddo in a battle with the Egyptians.

The decline of Assyrian control in Palestine provided favorable conditions in Judah for the rise of a nationalism that led to complete freedom from Assyrian vassalage. Likewise this era made it possible for Josiah to lead in a religious reformation without interference from Assyria, whence some of Judah's idolatrous practices had come in the days of Ahaz.

Apparently Josiah reacted personally against the apostate conditions that surrounded him during the first eight years of his reign. It is not improbable that he had godly tutors and pious political leaders who influenced him during these early years. At the age of sixteen (*ca.* 632 B.C.) he began to take God into account instead of conforming to the idolatrous practices that were so prevalent in Jerusalem. When he reached the age of twenty (*ca.* 628 B.C.) his convictions were so firmly established that he used his royal authority to initiate a religious reformation. By this time it was politically safe for Josiah to remove any religious practices that were associated with Judah's vassalage to Assyria. By 622 the reformation had progressed to the point of observing the Passover, which apparently had been neglected for a long time.

Drastic measures were necessary to rid the kingdom of its idolatry. Pagan practices were abolished throughout Judah as well as among the northern tribes. Altars of Baal were broken down, Asherim were destroyed, and vessels dedicated to idol worship were removed. In the temple, where women wove hangings for Asherah, chambers of cult prostitution were reclaimed. Horses that had been dedicated to the sun were removed from the entrance, and chariots were destroyed by fire. The horrible practice of child sacrifice was abruptly abolished. The altars erected by Manasseh in the court of the temple were crushed and scattered in the Kidron Valley. Even some of the high places erected by Solomon must have been in current use, for Josiah razed them and desecrated them with dead men's bones.

Religious personnel were also involved. Priests dedicated to idol worship were removed from office; they had been serving by royal appointment of former kings. Consequently, the burning of incense to Baal ceased. Josiah, however, made material provision for these deposed priests from temple revenue.

At Bethel the altar that had been erected by Jeroboam I was also destroyed. For over three hundred years this had been the public high place for idolatrous practice introduced by the first ruler of the northern kingdom. This altar was pulverized, and the Asherah, which probably had replaced the golden calf, was burned. When the bones from the adjoining cemetery were collected for public defilement of this high place, Josiah noticed the monument to the prophet of Judah who had so boldly denounced Jereboam (1 K. 13). Being informed that the man of God was buried there, Josiah ordered that the tomb should not be opened.

Throughout the cities of Samaria (the northern kingdom) reformation was the order of the day. High places were removed and priests were arrested for their idolatrous ministry.

The constructive aspect of this reformation came to fruition in the restoration of the temple in Jerusalem. When contributions came from Judah and the tribes in the north, the Levites were charged with the supervision of this fund. Since the time of Joash (two centuries earlier) the temple had been subject to long periods of neglect — especially under Manasseh. When Hilkiah the high priest began to gather funds to pay the workmen he found the book of the law. Hilkiah handed it to Shaphan, secretary to the king. He examined it and immediately read it to Josiah. The king was terribly disturbed when he realized that the people of Judah had not observed the law. Immediately, Hilkiah and the government officials were ordered to secure someone who could give them advice. Huldah, the prophetess residing in Jerusalem, had a timely message for them which was clear and simple: the curses and judgments for idolatry were inevitable. Jerusalem would not be spared the wrath of God. Josiah, however, would be spared the anguish of Jerusalem's destruction since he had penitently responded to the book of the law.

Under the king's leadership the elders of Judah, priests,

Levites, and the populace of Jerusalem assembled for the public reading of the newly found book. In a solemn covenant King Josiah, supported by the people, promised that he would devote himself wholly to obeying the law.

Plans were begun at once for the observance of the Passover. Priests were appointed and the temple services were reinstated. Careful attention was given to the pattern of organization for the Levites, as ordained by David and Solomon. In the Passover ritual great care was exercised to ensure conformity to that which was "written in the book of Moses" (2 Ch. 35:13). Because of this conformity to the law, and the extent of the people's participation, this Passover observance surpassed all similar festivities since the days of Samuel (2 Ch. 35:18).

The content of the book of the law found in the temple is not specifically indicated. Numerous references in the biblical account associate its origin with Moses. On the basis of that simple fact the book of the law may have included all the Pentateuch or contained only a copy of Deuteronomy. Those who regard the Pentateuch as a composite literary production which reached its final form in the 5th cent. B.C. limit the book of the law to the bulk of Deuteronomy or less. Since the reformation had already been in progress for six years when the book was recovered, Josiah had previous knowledge concerning the true religion. When the book was read before him he was terrified because of Judah's failure to obey the law. Nothing in the biblical record indicates that this book was published at this time or even ratified by the people. It was considered authoritative, and Josiah feared the consequences of disobedience. Having been given by Moses, the book of the law had been the rule of religious practice ever since then. Joshua, the judges, and the kings, together with the whole nation, had been under obligation to conform to its requirements. What alarmed Josiah when he asked for prophetic advice was that "our fathers have not kept the word of the Lord" (2 Ch. 34:21). Ignorance of the law was no excuse, even though the book of the law had been lost for some time.

Gross idolatry had prevailed for over half a century before Josiah began to rule. In fact, Manasseh and Amon had persecuted those who advocated conformity to true religion. Since Manasseh had even shed innocent blood, it is reasonable to charge him with the destruction of all copies of the law in circulation in Judah. In the absence of written copies, Josiah very likely associated himself with priests and elders who had sufficient knowledge of the law to give him oral instruction. From this came the firm conviction, during the first twelve years of his reign, that a national reform was necessary. When the book of the law was actually read before him he vividly realized that curses and judgment were due an idolatrous people. Knowing all too well the wicked practices common to his father, he still was shocked that destruction might come in his day.

Had the book of the law actually been lost? Probably there were those during Manasseh's reign who had enough interest to preserve some copies of the law. Since every copy was handwritten, relatively few were in circulation. After the voices of Isaiah and others had been silenced, the righteous people decreased rapidly under persecution. If Joash, the royal heir, could be hidden from wicked Athaliah for six years, it is reasonable to conclude that a book of the law could have been hidden from wicked Manasseh for half a century.

Another explanation concerning the preservation of this book of the law is suggested by an archeological observation (cf. J. P. Free, *Archaeology and Bible History* [1969], pp. 215f.). Since valuable records and documents were placed in cornerstones of important buildings in ancient as well as in modern times, this book of the law may have been preserved in the cornerstone of the temple. Here Josiah's workmen found it. David, before his death, charged Solomon as king of Israel to conform to all that is "written in the law of Moses" (1 K. 2:3). In building the temple it would have been appropriate to place the whole Pentateuch, or at least the laws of Moses, in the cornerstone. Perhaps this was a providential provision by which a copy of the Pentateuch was preserved for over three centuries and then rediscovered just when Judah, having been subjected to rulers who defied God's covenant with Israel, needed it most. Taken out of the temple in the reformation days of Josiah, it became the "living word" once more in a generation that was eventually to take the book of the law with it into Babylonian captivity.

Whether the reformation under Josiah represented a genuine revival among the common people is doubtful. Since it was initiated and executed under royal orders, the opposition was restrained as long as Josiah lived. Immediately after his death the people reverted to idolatry under Jehoiakim.

Jeremiah was called to the prophetic ministry in the thirteenth year of Josiah, 627 B.C. Since Josiah had already begun his reform it is reasonable to conclude that prophet and king worked hand in hand. Jeremiah's preaching (Jer. 2–4) reflects the strained relationship between God and Israel. Like a faithless wife who breaks her marriage vows Israel had forsaken God. Jeremiah realistically warned the people that Jerusalem could expect the same fate as had befallen Samaria a century earlier. How much of Jer. 1–20 is related to Josian times is difficult to ascertain. Although it may seem strange that when the book of the law was read the prophetic word came from Huldah instead of Jeremiah, the urgency for an immediate solution to the king's problem may have involved Huldah, who resided in Jerusalem. Jeremiah lived in Anathoth, 3 mi. NE of the city.

As the news of the fall of Ashur (614) and the destruction of Nineveh (612) circulated in Jerusalem, Josiah undoubtedly turned his attention to international affairs. In a state of military preparedness he made his fatal mistake. In 609 the Assyrians were fighting a losing battle; their government was in exile at Haran. Neco king of Egypt marched his armies through Palestine to aid the Assyrians. Since Josiah had little concern for the preservation of the Assyrians, he rushed his armies up to Megiddo in an effort to stop the Egyptians. Josiah was fatally wounded when his armies were routed. Suddenly the national and religious hopes of Judah vanished as the thirty-nine-year-old king was entombed in the city of David. After eighteen years of intimate association with Josiah, the great prophet Jeremiah is singled out by name in the concluding paragraph — "and Jeremiah lamented for Josiah."

JOSIAS jō-sī'əs.

1. (AV 1 Esd. 1; Bar. 1:8; Mt. 1:10f.). *See* JOSIAH.
2. (1 Esd. 8:33, AV; NEB JESSIAS). *See* JESHAIAH 4.

JOSIBIAH jō-sib'ē-ə (1 Ch. 4:35, AV, NEB). *See* JOSHIBIAH.

JOSIPHIAH jos-i-fī'ə [Heb. *yôsipyâ*–'Yahweh adds']; AV Apoc. JOSAPHIAS. In Ezr. 8:10; 1 Esd. 8:36, the father of Shelomith, one of Ezra's companions.

JOT (Mt. 5:18, AV). *See* IOTA.

JOTBAH jot'bə [Heb. *yoṭbâ*–'pleasantness']. The home

of Meshullemeth, the mother of King Amon, daughter of Haruz (2 K. 21:19). The site cannot be identified with certainty, although some (e.g., J. Gray, comm. on Kings [*OTL*, 2nd ed. 1970], p. 711) identify it with ʿAin aṭ-Ṭaba, about 30 km. (20 mi.) N of Aqabah.

JOTBATHAH jot'bə-thə [Heb. *yoṭbāṯâ*]. A desert camp of the Israelites between Hor-haggidgad and Abronah (Nu. 33:33f.; Dt. 10:7, AV JOTBATH). It was "a land of brooks of water" (Dt. 10:7). *See* WANDERINGS OF ISRAEL.

JOTHAM jo'thəm [Heb. *yôṯām*–'Yahweh is perfect'; Gk. *Iōatham*].

1. The youngest son of Gideon-Jerubbaal, the sole survivor of the massacre of his seventy brothers by Abimelech. Although Jotham was the legitimate ruler after their death, he never gained national leadership. The people followed Abimelech, the son of Gideon's concubine at Shechem.

Jotham is best known for the fable he delivered at Mt. Gerizim to the men of Shechem (Jgs. 9:7-15). In this fable the trees request a number of useful trees to reign over them, but all decline the honor. Finally the bramble accepts. Although Jotham does not clearly delineate the application, in essence he pronounces a curse upon Abimelech, which was realized in subsequent developments (Jgs. 9:57).

After addressing the Shechemites on the summit of Mt. Gerizim, Jotham fled to Beer for safety while Abimelech continued to rule for three years.

2. A Judahite, son of Jahdai (1 Ch. 2:47).

3. King of Judah, son of Uzziah and Jerusha daughter of Zadok (2 K. 15:32-38; 2 Ch. 27:1-9). The chronological data are best interpreted by dating the beginning of Jotham's reign in 750 B.C. as co-regent with his father for ten years. After a ten-year co-regency with his father, he was sole ruler until 735 B.C. when he was replaced by Ahaz. Jotham died in 732 B.C.

Since Jotham was overshadowed by his father, who exerted such strong and forceful leadership, it is likely that he promoted the same economic and political policies. He erected citadels and towers throughout Judah. Cities were built in strategic places to strengthen the kingdom of Judah. Jotham's activity and influence at Ezion-geber are well attested. In the discovery of the eighth-century stratum a signet seal ring was found bearing Jotham's name. Although he did not remove high places maintained for idol worship, he promoted religious interest by building an upper gate at the temple in Jerusalem.

It is quite likely that the Ammonites rebelled when Uzziah died. Jotham subsequently regained supremacy and collected tribute during his second and third years (2 Ch. 27:15) but may not have been in a position to do so later because of Assyrian pressure.

With renewed Assyrian activity in the regions of Mt. Nal and Urartu in 736/735, Jotham faced difficulties maintaining an anti-Assyrian policy. Apparently the pro-Assyrian party in Jerusalem took advantage of this opportunity to elevate Ahaz, who favored friendship with the king of Assyria, to the Davidic throne as co-regent with his father, virtually placing the latter in retirement. In 732 Jotham died. He is listed in the royal genealogy in Mt. 1:9 (AV Joatham). S. J. SCHULTZ

JOURNEY. *See* DAY'S JOURNEY; SABBATH DAY'S JOURNEY.

JOY.

I. Vocabulary
  A. Words for Joy or Rejoicing
  B. OT Expression of Joy
II. Joy in the OT
  A. Personal Joy
  B. National, Cultic Joy
  C. Messianic Joy
III. Joy in the NT
  A. Joy in Christ
  B. Joy Not of This World
  C. Joy in Affliction
  D. Joy in the Church
  E. Joy at the End of the Age

I. Vocabulary.–A. Words for Joy or Rejoicing. The NT vocabulary is simple, usually *chaírō, synchaírō,* or *chará.* Occasionally we find *agallíaō, agallíasis,* or *euphraínō,* especially in eschatological contexts or OT citations, for these last two words are the most frequently used in the LXX. Other words occurring less frequently are *kauchá-omai* (Rom. 5:2f., 11; cf. NEB "exult" and AV "glory" in 5:3) and *skirtáō* (Lk. 6:23), translated by the RSV, AV, and NEB "leap for joy" (cf. Lk. 1:44). The OT vocabulary, on the other hand, is extremely varied and allows a great many possibilities in English translation (cf. esp. the NEB). The following words are translated "joy" (-ful, -fully, -fulness, -ous) and "rejoice" (-ing) in the RSV: *śimḥâ, śāmaḥ* or *śāmē(a)ḥ* (as an adj., cf. 1 K. 1:45; Est. 5:9), *rānan, rᵉnānâ* (Job 3:7; Ps. 63:5 [MT 6]), *rinnâ, śûś, śāśôn, māśôś, gîl, gîlâ* (Isa. 35:2; 65:8 [MT 9]), *ʿālaz, ʿallîz* (Isa. 32:13), *ḥāḏâ* (Job 3:6), *ḥeḏwâ* (1 Ch. 16:27; Neh. 8:10), *hêḏaḏ* (Jer. 48:33), *hēḏ* (Ezk. 7:7), *rû(a)ʿ, tᵉrûʿâ* (Job 33:26; Ps. 27:6), *ṭôḇ* (Ps. 4:7 [MT 8]; Eccl. 7:14), *ṣāhal* (Est. 8:15), *śāḥaq* (Prov. 8:30f.). Even these, however, do not exhaust the list of synonyms for joy.

B. OT Expression of Joy. The basic and most common Hebrew root for joy is *śmḥ,* which reflects not only the inner emotion or state of well-being, i.e., "joy," but also its expression, i.e., "rejoicing." In fact, the OT more often refers to the expression than the emotion, as is evident in the Psalms and Prophets. The most frequently occurring words for "joy," besides *śimḥâ* (and *śāmaḥ*), are from the root words *gîl, śûś,* and *rānan.* These convey the sense of "expressing joy" or "exultation," and the last word group (*rānan, rᵉnānâ,* and *rinnâ*) is especially instructive, for it connotes a "ringing cry," whether in distress (Lam. 2:19), proclamation (1 K. 22:36), or, most frequently, exultation (cf. BDB, p. 943).

The sound of joy, and not just the state of joy, is also apparent from less common words. Heb. *hêḏaḏ* (cf. *hēḏ* in Ezk. 7:7) signifies "shouting" or "cheering" (Isa. 16:10; Jer. 48:33). The word *rû(a)ʿ* (cf. *tᵉrûʿâ,* e.g., Ezr. 3:13, "the sound of joyful shout") means "raise a shout," "give a blast," whether as a war cry, or as an alarm for battle, or in triumph and applause, in distress, or in joy. In Ezr. 3:13, e.g., the shout of joy is hardly distinguishable from the sound of weeping. The psalmist exhorts his fellows to "make a joyful noise" (*rû(a)ʿ,* cf. Ps. 66:1; 95:1f.; 98:4, 6; 100:1) and again, joy becomes a sound and not just a state of mind. The graphic and slightly uncomplimentary word *ṣāhal* means "neigh" or "cry shrilly." The word *pāṣaḥ* means "burst forth" (cf. the piel in Mic. 3:3) and is used seven times of bursting into joyful sound (five times of the earth or mountains bursting forth in joy: Isa. 14:7; 44:23; 49:13; 52:9; 55:12). In short, OT "joy" was not bottled up!

This exuberance is suggested, in fact, by the very wealth of Hebrew words for joy. One ancient scholar enumerates ten Hebrew words for joy (Midr. *Cant. Rabbah* i.4), but more realistically, D. W. Harvey lists thirteen Hebrew roots and twenty-seven separate words for joy or joyful participation in the cult (*IDB,* II, 1000). Frequently these synonyms are used in parallelism (the usual literary paral-

lel is *śāmaḥ/gîl*). The most impressive example of this is Zeph. 3:14, 17, where in just two verses, eight different words are used for joy or joyful expression: *rānan, rû(a)ʿ, śāmaḥ, ʿālaz, śûś, śimḥâ, gîl,* and *rinnâ*.

Sing aloud, O Daughter of Zion;
shout, O Israel!
Rejoice and exult with all your heart,
O Daughter of Jerusalem!

The Lord, your God, is in your midst,
a warrior who gives victory;
he will rejoice over you with gladness . . .
he will exult over you with loud singing. . . .

The heaping of words for "joy" indicates the greatness of the cause of joy.

II. Joy in the OT.–A. Personal Joy. On the one hand, the OT recognizes the personal joys of human existence. Birthdays should be the occasion for joy (Job 3:7), and a man, whether young or old, should take joy in his years (Eccl. 11:8f.). A man should rejoice in the wife of his youth (Prov. 5:18), and a wise son will make his parents glad (Prov. 23:24f.). One may even take joy in an apt answer or a word in season (Prov. 15:23). In the Psalms, especially those of David, personal joy reaches its highest expression, a joy in God. The grounds for this are His protection (Ps. 4:7 [MT 8]; 5:11 [MT 12]; etc.), His forgiveness and restoration (Ps. 30:5 [MT 6]; 51:8, 12 [MT 10, 14]; etc.) and His fellowship (Ps. 16:11: "in thy presence is fulness of joy," etc.). In fact, the Psalms anticipate the NT kind of joy (see III below).

B. National, Cultic Joy. On the other hand, the emphasis in the OT is upon national, communal rejoicing. In a sense, nothing seems unusual about Israel's joy in military victory (Jgs. 16:23; 1 S. 18:6; 19:5; 2 Ch. 20:27), feast days (Dt. 16:11-15; 2 Ch. 30:25f.; Ezr. 6:22), coronations (1 S. 11:15; 1 K. 1:40, 45; 1 Ch. 12:40 [MT 41]), or dedication of construction projects (1 K. 8:66; 2 Ch. 6:9; 7:10; Ezr. 3:12; 6:16); these are events that people in general celebrate. But in reality it is the Lord God in whom the Israelites rejoice. It is God who brings salvation, vindication (Pss. 68 and 149), and prosperity (Pss. 68; 85; 106:4f.; 126; and 132) to His people. God Himself is the king of all the earth (cf. Ps. 47:1-9 [MT 2-10]; 96:10-13; 97:1; 98:4-6), and it is He who dwells in Zion among His chosen people (e.g., Pss. 48; 84; 132). In fact, not only what God does for His people, but what He is, i.e., His character, evokes joy and gladness. They rejoice in His steadfast love (Ps. 21:6f. [MT 7f.]; 31:7 [MT 8]; 90:14), His salvation (Ps. 21:1 [MT 2]; Isa. 25:9; Hab. 3:18), His word and statutes (Ps. 119:74, 111, 162), His faithfulness (Ps. 33:1-4; 57:10f. [MT 11f.]; 100:1, 5), His justice (Ps. 48:11 [MT 12]; 67:4 [MT 5]; 96:11-13; 97:1f.; 98:4-9), His strength and greatness (Ps. 21:1 [MT 2]; 47:1f. [MT 2f.]; 66:1-3; 95:1-3), and His goodness (Ps. 100:1, 5).

C. Messianic Joy. On the whole, then, joy is a quality of the prosperous national life in the OT. As God blesses His people, there is joy. When the prophets proclaim God's judgment and withdrawal of Himself and of His blessing, there is a loss of joy (Isa. 22:1-13; 24:11; Ezk. 7:7, 12; Joel 1:15f.); what is true of Israel is also true of the other nations (Isa. 16:10; Jer. 48:33). But the prophets look past the Exile with its weeping and sad memories (Ps. 137) and see a vision of the restored blessing and prosperity of, especially, the messianic age, and joy is a dominant characteristic of that period. This is especially true in Isaiah (9:3 [MT 2]; 12:3, 6; 25:9; 26:19; 42:10-12; 51:3, 11; 52:7-10; 60:15; 61:7; 66:10), but it is true of other prophets as well (Jer. 31:13; Joel 2:21, 23; Zec. 2:10; 9:9; 10:7). In fact, in that day even the creation will rejoice (Isa. 35:1-10; 49:13) and God Himself will take joy in His people (Isa. 62:5; 65:18; Jer. 32:41; 33:9). It is this day of great rejoicing, which God and His people will share, that occasions the numerous words for joy in Zeph. 3:14, 17.

III. Joy in the NT.–A. Joy in Christ. It is the NT insistence that these messianic expectations are fulfilled in Jesus Christ; Jn. 8:56 seems to indicate that Abraham anticipated such fulfillment (cf. L. Morris, comm. on John [*NICNT*, 1971], pp. 471f.; R. Brown, comm. on John, I [*AB*, 1966], 359f.). The joy of motherhood had special significance for Elizabeth (Lk. 1:14) and Mary (Lk. 1:47). Mary's joy is shared by the wise men (Mt. 2:10), the shepherds, the whole world (Lk. 2:10), and even by Elizabeth's unborn child, John (Lk. 1:44). As the bridegroom's friend, John rejoiced in the bridegroom's voice (Jn. 3:29).

The Gospels, especially Luke, note various occasions of joy in Jesus' ministry. The seventy return rejoicing that demons are subject to the name of Jesus, but Jesus suggests that they ought rather rejoice that their names are written in heaven (Lk. 10:17, 20). Zacchaeus rejoiced when Jesus called him down from the tree and went home with him (Lk. 19:6). When Jesus put His adversaries to shame, the crowd rejoiced at the things He did (Lk. 13:17). In fact, the crowd was generally exuberant as Jesus approached Jerusalem (Lk. 18:43) and rejoiced as He entered Jerusalem on a donkey (Lk. 19:37; cf. Zec. 9:9).

B. Joy Not of This World. In His farewell address Jesus seeks to comfort the disciples by assuring them of the Spirit's coming after He is gone (14:16-18). He acknowledges that for a little while they will not see Him (16:16) and that they will weep and lament (16:20). But He assures them that their sorrow will turn to joy, just as the woman in labor forgets her anguish for the joy of her newborn child (16:20f.). So notwithstanding their present sorrow, they will rejoice and no one will take their joy from them (16:22).

It is this joy that characterizes the kingdom of God — a kingdom, Jesus said, that is not of this world (Jn. 18:36). In this connection Paul says: "For the kingdom of God does not mean food and drink but righteousness and peace and joy in the Holy Spirit" (Rom. 14:17). It is the Holy Spirit who is the source of this joy (Gal. 5:22; 1 Thess. 1:6; cf. Acts 13:52; Rom. 15:13), and this joy is, on the one hand, joy in the hope of our inheritance (Rom. 5:2; 12:12; cf. Rom. 15:13) and, on the other hand, joy in suffering.

C. Joy in Affliction. In fact, it is this joy while suffering that most clearly distinguishes NT joy from that in the OT. First, there is joy in (or in spite of) suffering because of the great reward in heaven (Mt. 5:12; Lk. 6:23), the "inheritance" kept for us in heaven (1 Pet. 1:4, 6), the "better possession" (He. 10:34). We are to look to Jesus who, for the joy that was set before Him, endured the cross (He. 12:2). Furthermore, we should rejoice that we share the sufferings of Christ, so that we may be glad and rejoice when His glory is revealed (1 Pet. 4:13). Second, there is joy in suffering because suffering produces character (Rom. 5:3) and steadfastness (Jas. 1:2). But third, there is joy in suffering simply because it is for the sake of Christ and His body, the Church (Acts 5:41; Phil. 2:17f.; Col. 1:24; 1 Pet. 4:13). Thus Paul can write: "as sorrowful, yet always rejoicing" (2 Cor. 6:10). Here is the paradox of Christian faith, that our very human grief may be turned into and overcome by joy in the Holy Spirit (2 Cor. 7:4).

D. Joy in the Church. It follows then, that in spite of circumstances, joy should be a prominent characteristic of the Church, through which the kingdom of God is made manifest. Paul commands the Philippian church: "Rejoice in the Lord always; again I will say, Rejoice!" (Phil. 4:4; cf. 3:1; 1 Thess. 5:16). Christians should rejoice that they

have received the word and believed in Christ (1 Thess. 1:6; 1 Pet. 1:8; cf. Acts 8:39; 16:34). Even the superficial believer does this much (cf. Mt. 13:20). They should rejoice that Christ is proclaimed (cf. Phil. 1:18) and that people are being won to Christ (Mt. 18:10-14; Lk. 15:3-10; Jn. 4:36; Acts 15:3; cf. Acts 8:8). Furthermore, those responsible for the "progress and joy in the faith" of the Church (Phil. 1:25; cf. 2 Cor. 1:24) may rejoice in the various evidences of maturity in other Christians: their following the truth (2 Jn. 4; 3 Jn. 4), their repentance from wrong (2 Cor. 7:9), their obedience (Rom. 16:19), their good order and firmness of faith (Col. 2:5), their unity and harmony with the brothers (Phil. 2:2), and their partnership in the gospel mission (Phil. 1:4f.). In fact, Paul rejoices in his Christian friends; they are his joy and his crown (Phil. 4:1; 1 Thess. 2:19f.). Among believers, one person's joy should be another's joy as well (Rom. 12:15; 1 Cor. 12:26; 2 Cor. 2:3; 7:13; Phil. 2:17f.).

E. Joy at the End of the Age. The joy that was seen by the prophets in their anticipation of the messianic age and that we experience proleptically through the Holy Spirit remains to be consummated at the end of the age, when we will all be presented "before the presence of his glory with rejoicing" (Jude 24). The saints will rejoice at the downfall of the great dragon, the ancient serpent called the devil and Satan (Rev. 12:7-12). Though the kings, merchants, and seafarers of the earth will mourn the fall of "Babylon the Great" (18:9-19), the angel calls out: "Rejoice over her, O heaven, O saints and apostles and prophets, for God has given judgment for you against her!" (18:20). Then the seer hears a great multitude praising God's judgment (19:1-8) and saying: "Hallelujah! For the Lord our God the Almighty reigns. Let us rejoice and exult and give him the glory. For the marriage of the Lamb has come, and his Bride has made herself ready" (vv. 6f.).

JOYE'S BIBLE. *See* ENGLISH VERSIONS III.C.

JOZABAD joz'ə-bad [Heb. *yôzāḇāḏ*–'Yahweh has bestowed'].

1. A Gederathite, and one of David's recruits at Ziklag (1 Ch. 12:4 [MT 5]). He is named with the Benjaminites, but possibly he was a native of the town Gedara in southern Judah.

2, 3. Two Manassite captains who joined David at Ziklag (1 Ch. 12:20 [MT 21]).

4. A Levite overseer in Hezekiah's time (2 Ch. 31:13); may be the ancestor of the chief of the priests in 2 Ch. 35:9 = Joram of 1 Esd. 1:9.

5. A Levite (Ezr. 8:33), mentioned again probably in Ezr. 10:23; Neh. 8:7; 11:16; AV Josabad (1 Esd. 8:63).

6. A priest who had married a foreign wife (Ezr. 10:22). He was named Gedaliah in 1 Esd. 9:22 (AV Ocidelus).

JOZACAR joz'ə-kär, jə-zā'kär [Heb. *yôzāḵār*–'Yahweh has remembered']; AV JOZACHAR. Servant and murderer (with Jehozabad) of Joash, king of Judah (2 K. 12:21 [MT 22]); called Zabad in 2 Ch. 24:26. Some MSS have "Jozabad" in 2 Kings.

JOZADAK joz'ə-dak. *See* JEHOZADAK.

JUBAL jōō'bal [Heb. *yûḇāl*]. Son of Lamech by Adah, and inventor of musical instruments (Gen. 4:21).

JUBILEE, YEAR OF [Heb. *šᵉnaṯ hayyôḇēl* (Lev. 25:13), or simply *hayyôḇēl* (25:28) < *qeren hayyôḇēl*–'the horn of the ram,' made into a trumpet (Josh. 6:5f.)]; AV JUBILE. According to Lev. 25:9 a loud trumpet should proclaim liberty throughout Israel on the tenth day of the seventh month (the Day of Atonement), after a lapse of seven sabbaths of years, or forty-nine years. In this manner the fiftieth year was to be announced as a Jubilee Year. It possessed the function of an ordinary sabbatic year, thus allowing the land to lie fallow for two successive years (Lev. 25:11, 22; *see* SABBATICAL YEAR). But in addition, real property was automatically to revert to its original owners (25:10, 13); and those who had been compelled by poverty to sell themselves for indentured service to their brothers were to gain release (v. 39).

I. Personal Liberty.–The fiftieth year was to be a time of proclaiming liberty to all the inhabitants of the land. God had redeemed His people from bondage in Egypt (Lev. 25:42); and none of them was again to be reduced to the status of an *ʿeḇeḏ*, or slave (v. 39). Poverty could, even at its worst, reduce an Israelite to a status no less than that of a hired servant, a wage earner, and then only until the Year of Jubilee (v. 40). God's chosen child was not to be oppressed (vv. 43, 46; *see* SLAVE). Indeed, as citizens of the theocratic kingdom, masters and servants had become brothers together (cf. Philem. 16). Thus, as seen in its widest application, only through its loyalty to God could Israel as a nation ever hope to be free and independent of other masters.

II. Restitution of Property.–A second feature of the Jubilee was that of the restitution of all real property. The purpose was to demonstrate that the earth is subject basically to God's law, and not to man's desires: "for the land is mine: for you are strangers and sojourners with me" (Lev. 25:23). God's specific legislation concerned the inalienability of Israel's land titles. It required the reversion of all hereditary property to the family that originally possessed it and the reestablishment of the initial arrangement regarding God's division of the land. It did not teach either the socialistic economic theory that a person is entitled to the ownership of goods on the basis of his need (in this case, the possession of the land that produced his living), or the free-enterprise system that allows an unlimited expansion of private property. On the contrary, it established a fixed title to the property assigned by God (cf. Dt. 21:16, on inheritance), so that the implied humanitarian factor is given a deeper theological foundation. It should also be noted that the restitution of Israel's property appears to have typical significance, for the possession of the land by its individual Hebrew owners served as an acted prophecy of the blessings of the messianic age (Isa. 61:1-3). The Year of Jubilee foreshadows the restoration of all that has been perverted by mankind's sin, the establishment of the true liberty of the children of God, and the deliverance of creation from the bondage of corruption to which it has been subjected on account of human depravity (Lk. 4:17-21; Rom. 8:19-23).

III. Resulting Property Values.–Since the institution of the Jubilee Year excluded the possibility of selling any piece of land permanently (Lev. 25:23), it necessarily became the means of fixing the prices of real property (vv. 15f.; cf. 25-28). The same rule applied to dwelling houses outside the walled cities (v. 31) and also to the houses owned by Levites, although they were built within walled cities (v. 32). In the same manner the value of Hebrew bondsmen was to vary according to the proximity of the Jubilee Year (vv. 47-54), and in 27:17-25 a similar arrangement related to such lands as were "sanctified unto Yahweh." In all these cases the original owner was at

liberty to redeem his own property or to have it redeemed by some of his nearest relatives (25:25-27, 29, 48ff.; 27:19; Jer. 32:8; cf. ancient Babylonian parallels, B. Meissner, *Beiträge zum altbabylonischen Privatrecht* [1893], pp. 40ff.). He might take action at any time, at a price proportionate to the time lapse until the Jubilee.

IV. History.–After the initial revelation of the Jubilee law (Lev. 25:8-34), the Year of Jubilee is mentioned historically as a living feature within Israelite society (Nu. 36:4). Its first observance seems to have occurred after Joshua's entrance into Canaan (cf. Lev. 25:2), or midway in the judgeship of Othniel (Jgs. 3:11). No reference, however, to such a celebration appears in Scripture (apart from the idealistic anticipation of Ezk. 46:17), though this hardly justifies its usual relegation by liberal criticism to an assumed postexilic Priestly Code of arbitrary and utopian dreams (cf. R. H. Pfeiffer, *Religion in the OT* [1961], p. 187). The influence of the Jubilee law upon the culture of Israel, with the permanent property rights that it guaranteed, helps to explain the conduct of Naboth and Ahab, *ca.* 855 B.C. (1 K. 21:3f.; cf. 22:1), and such prophetic rebukes as Isa. 5:8; Mic. 2:2. These very passages, however, testify to a contemporary neglect (cf. W. Eichrodt's contention for its early date, *Theology of the OT,* I [Eng. tr. 1961], 96). Even as Israel's sabbatic years were not observed during the centuries before the Exile, so also the Jubilees were disregarded. But while the former were reinstated in the postexilic era (Neh. 10:31; 1 Macc. 6:49, 53; cf. frequent mention by Josephus), the latter are never mentioned again (cf. *Ant.* iii.12.3 [280-86]), living on only in principle and in the eschatological hope of the people of God.

JUDAH jo͞o'də [Heb. *y^{e}hûḏâ*–'praised'].

1. The 4th son of Jacob by Leah (see separate article).
2. An ancestor of Kadmiel, one of those who had the oversight of the rebuilding of the temple (Ezr. 3:9). He is the same as Hodaviah (Ezr. 2:40), Hodevah (Neh. 7:43), and Joda (1 Esd. 5:58).
3. A Levite who had taken a foreign wife (Ezr. 10:23).
4. A Levite who came up with Zerubbabel (Neh. 12:8).
5. A priest and musician who took part in the dedication of the wall of Jerusalem (Neh. 12:36).
6. A Benjaminite, the son of Hassenuah, who was second over the city of Jerusalem in the days of Nehemiah (Neh. 11:9).
7. One of the princes of Judah who took part in the dedication of the wall of Jerusalem (Neh. 12:34).
8. An ancestor of Jesus (Lk. 3:30; AV Juda).

S. F. HUNTER

JUDAH jo͞o'də [Heb. *y^{e}hûḏâ*; Gk. *Iouda, Ioudan, Ioudas*]; AV also JUDA, JUDAS. The meaning of the name is disputed. Some scholars explain it as "the child will thank God." Albright, arguing from the Arabic, suggests "the child will be led by God." J. Lewy proposes "belongs to God." All these explanations are doubtful.

Judah was the fourth son born to Jacob by Leah in Paddan-aram (Gen. 29:35, etc.). Of this patriarch's life only scanty details remain to us. He turned his brothers from their purpose to slay Joseph, persuading them to sell him to the Midianites at Dothan (37:26-28). A dark stain is left upon his memory by the story told in ch. 38. Reuben forfeited the rights of primogeniture by an act of infamy. Simeon and Levi, who came next in order, were passed over because of their cruel and treacherous conduct at Shechem. Judah, therefore, inherited the honors and responsibilities of the firstborn (ch. 34; 35:22; 49:5ff.). On the occasion of their first visit to Egypt, Reuben acted as spokesman for his brothers (42:22, 37). Then the leadership passed to Judah (43:3; 44:14-34). The sons of Joseph evidently looked askance upon Judah's promotion, and their own claims to hegemony were backed by considerable resources (49:22ff.). The rivalry between the two tribes, thus early visible, culminated in the disruption of the kingdom. To Judah, the "lion's whelp," a prolonged dominion was assured (49:9ff.). Many scholars think that the distinguished part played by Judah, the son of Jacob, reflects the important role of the tribe of Judah, which seemed to result from the prominence of certain families at the time of the patriarchs.

The tribe of Judah at the first census in the wilderness numbered 74,600 fighting men; at Sinai the number "from twenty years old and upward" was 76,500 (Nu. 1:27; 26:22; *see* NUMBERS, BOOK OF). The standard of the camp of Judah, with which were also the tribes of Zebulun and Issachar, was to the east of the tabernacle "toward the sunrising." The prince of Judah was Nahshon the son of Amminadab (Nu. 2:3). Caleb the son of Jephunneh represented Judah among the spies (13:6) and was also commanded to assist at the future allocation of the tribal portions (34:19). The Bible contains some genealogical lists of the sons of Judah; those in Genesis and Numbers are identical. But in Chronicles there are long and complicated lists, some of which do not derive directly from the eponym, and others seem to contradict each other. An additional list in the book of Ruth is the genealogy of the House of David, which repeats that of Judah. The lists of Judah are concentrated in Gen. 46:12; Nu. 26:19; 1 Ch. 2:3-52; 4:1-21.

The information given of the conquest of Judah's territory is meager and cannot be arranged in a self-consistent story. In Josh. 11:21ff. the conquest is ascribed to Joshua. Caleb is described as conquering at least a portion in Josh. 14:12; 15:13ff.; while in Jgs. 1 the tribes of Judah and Simeon play a conspicuous part; and Simeon founded a settlement in the south within the territory of Judah. The tribal organization seems to have been maintained after the occupation of the land, and Judah was so loosely related to the northern tribes that it was not expected to help them against Sisera. Deborah has no reproaches for absent Judah. It is remarkable that only one judge over Israel (Othniel, Jgs. 3:9-11) arose from the tribe of Judah. The first king of all Israel was chosen from the tribe of Benjamin. This made acquiescence by Judah easier than if Saul had sprung from the ancient rival Ephraim. But the dignity of Judah was fully vindicated by the splendid reigns of David and Solomon, from whom the Savior of the world should come in lineal descent (Lk. 3:33). The further history of the tribe is merged in that of Israel.

The boundaries of the territory of the tribe of Judah are fully described in Josh. 15:2-12; other quotations dealing with this subject are to be found in Nu. 34:1f., where the

historical boundaries are described, and in Ezekiel, where the boundaries are utopian. *See* JUDAH, TERRITORY OF.

The present article is the exposition of the history of the southern Hebrew kingdom of Judah from the death of Solomon (922 B.C.) to the destruction of Jerusalem and the beginning of the Babylonian Exile (587 B.C.). For details on the earlier Hebrew kingdom *see* SAUL; DAVID; SOLOMON.

Judah is the name of one of the tribes of the Israelite nation. This tribe traced its ancestry to Judah, the fourth son of Jacob (Gen. 29:35; 49:8-12; Dt. 33:7). Upon the conquest of the land of Canaan, the Judah tribe possessed the southern hill country, the region from Jerusalem southward to the Negeb, and became one of the strongest elements in the nation (Josh. 15; Jgs. 1:1-20).

In time the Hebrews came to recognize two basic divisions among themselves, called Judah and Israel. It is not clear whether the special use of these terms was the result of the division of the kingdom or preceded it (the occurrence in 1 S. 18:16, e.g., could be a reflection of later usage). It is clear that long before the death of Solomon a polarization of tribal loyalties had begun, from which separate southern and central-northern identities were emerging.

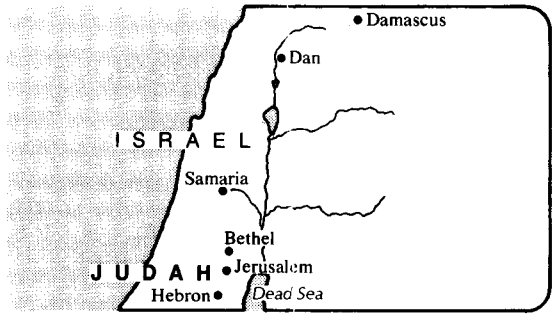
I. Origins of the Hebrew Monarchy.–The Israelite tribes, upon entering Canaan, were formed into an AMPHICTYONY, a loose union of tribes around a central sanctuary, the tabernacle (Josh. 18:1, 8-10; 21:2; Jgs. 18:31). Leadership was furnished, in theory, by the tabernacle priest. As a matter of fact, the priesthood tended to degenerate quickly (1 S. 2:12-17, 27-36; 8:1-5), and so charismatic leaders — the judges — were raised up (Jgs. 2:16-19). These men were military deliverers who came to power at times of crisis and led the Hebrews against their enemies; they seem to have given little leadership in the more normal life of the nation. The amphictyonic union with its judges was much too loose to give the solidarity and leadership the nation needed to meet the threat of the strong hostile Canaanite peoples, and especially the Philistine menace.

Thus the Hebrews called for a king to "govern us and go out before us and fight our battles" (1 S. 8:20). While one account of the inauguration of the monarchy (1 S. 8) seems to indicate that the tribes were wrong in asking for a king, the monarchy was ultimately for the best. The nation, prone to individualism and strong tribal loyalties, needed a king to give it unity. Having a king did not mean the rejection of the theocracy; God always reigns through people and in the good kings, such as David, He continued to direct the nation (cf. Ps. 72).

II. United Hebrew Kingdom.–Saul, the first king (1 S. 9–31), a Benjaminite, was a transitional figure, often acting more the part of a charismatic judge than a king (1 S. 10:9-12; 11:5f.). The Israelite tribes (except for Benjamin) were reluctant to give him allegiance (1 S. 10:26f.; 11:12-15), and it appears that toward the end of his reign the tribes reverted to the unorganized life of the judges period.

David the son of Jesse, a Judean from Bethlehem, succeeded Saul upon his death (1 S. 16; 2 S. 2–1 K. 2). At first the non-Judean tribes were reluctant to surrender their dearly won freedom to him. Indeed, for a period of some seven and one-half years, David reigned in Hebron over the tribe of Judah only, while the other Hebrew tribes (at least for part of this time) gave their allegiance to a military government headed by Abner, Saul's cousin and chief-of-staff, who ruled in the name of Saul's son Ish-bosheth (2 S. 2:1-11). Here we have already a "divided kingdom" whose boundaries and tribal constituencies are quite similar to those of the later, better-known divided kingdom.

David, by his commanding personality and certain well-devised political moves, united the nation and bound the tribes to him. Among these moves the most important was his capture of Jerusalem, to which he gave a central place in Hebrew life. Jerusalem was in the territory of Benjamin, its southern boundary being the line separating Benjamin from Judah. Benjamin was a kind of buffer tribe between the strong Judah tribe to the south and the Joseph tribes N of it. David moved his residence to neutral Jerusalem (2 S. 5:6-10), which became the national capital and which gave a unity the city of Hebron could never have afforded. When David brought the ark to Jerusalem and placed it in a new tent, emphasizing the worship of Yahweh at this center, he was not only reviving the worship of God according to the divine command, but also strengthening his own regime (2 S. 6:1-19). This Judean control of Jerusalem was so strong that when the nation divided after Solomon's death, Jerusalem, although located in a tribe probably also hostile to Judah, remained in the possession of the Davidic line and thus became the capital of the southern kingdom, of which Judah was the prominent element.



Under David, then, the Hebrews were a united nation and began to achieve national greatness. When David was old, however, the non-Judean tribes again became restive and listened to the appeals of revolutionaries. It is not clear that the Absalom revolt (2 S. 15–19) was an expression of discontent with the Judean rule over the nation, for Absalom was, of course, David's son. In the renewed submission of the tribes to David after Absalom's death, however, Judah took the lead (2 S. 19:9-15) and although the other tribes claimed an equal zeal in "bringing back the king," there was much bad feeling between Judah and the rest, as the old animosity between them reasserted itself (2 S. 19:41-43). The Sheba revolt (2 S. 20) was clearly an attempt by the non-Judeans to renounce Judean lead-

ership, and it shows the fragility of the union of the tribes accomplished by David.

Solomon, David's son and successor, ruled the united nation with an iron hand. He strengthened its religious solidarity by building the temple in Jerusalem. The hold this "house" had on the religious affections of the whole nation is evident not only from such overt statements as those in the Psalms (e.g., Pss. 42, 122, 125, 132), but also from Jeroboam's first action after breaking away from Judah and establishing his own throne in Israel — the substitution of the Dan and Bethel religious centers, lest "the kingdom turn back to the house of David; if this people go up to offer sacrifices in the house of the Lord at Jerusalem" (1 K. 12:26f.). Studies of the tax-collecting system set up by Solomon (1 K. 4:7-19) indicate that his choice of centers for the collection and storage of the taxes was not along the old tribal lines. It probably represents a deliberate attempt to break down the old tribal loyalties, the better to control the often restive Israelites. It is not clear that Judah was included in this tax system. While the king's tribe may have been taxed according to an older scheme, the possibility that Judah was tax-exempt cannot be overlooked. When the provisions needed by Solomon's court for one day (1 K. 4:22-28) are considered, the complaint of the Israelites to Rehoboam about Solomon's "heavy yoke" (1 K. 12:4) seems entirely justified.

III. Kingdom of Judah. *–A. Brief View of Judah's History.* The history of the southern Judean kingdom from the death of Solomon to the Babylonian Exile can be divided into three parts. During the first two hundred years of its history, its sister kingdom Israel existed to the north of it. The two Hebrew kingdoms were very important to each other, and the relationships between them were constant. This period itself falls into two divisions.

(1) From the death of Solomon to the middle of the 8th cent. Judah carried on its political life in comparative isolation from the great powers of the Fertile Crescent. Shishak's invasion and Jehoshaphat's military alliance with Ahab brought Judah into contact with Egypt and the Arameans; nevertheless, except for the constant relations with its immediate neighbors, the Judean hill kingdom lived a life apart from the powerful world empires.

(2) From the middle of the 8th cent. to the fall of the northern kingdom (722 B.C.), and for a little while thereafter, the advance of the great Assyrian empire was the constant cloud under which both parts of the Hebrew nation had to live. This Assyrian juggernaut finally brought to an end the northern kingdom and nearly destroyed Judah.

After the fall of Samaria Judah carried on alone for more than a century. This, its third period, saw a change in the world empires. Assyria fell, and Babylon took its place as the dominant power in the Fertile Crescent. It was this new Babylonian empire that finally destroyed Jerusalem and the Judean state in 587 B.C.

B. Origins of the Kingdom of Judah. Although both David and Solomon had managed to unify and rule all the Hebrew tribes, during their reigns tensions continued to exist, and it was only because of their strong administration that they were able to maintain at least external peace and unity. During Solomon's old age, just as during David's, the non-Judean tribes had become restive. Jeroboam the son of Nebat had been in charge of the corvée of the Joseph tribes. After an encounter with the prophet Ahijah, who gave him "ten pieces" of Israel — ten tribes — Jeroboam rebelled and fled to Egypt for protection (1 K. 11:26-40). Shishak the king of Egypt was glad to keep an Israelite government in exile at his court, for anything that would weaken Solomon's strong empire would be to Egypt's advantage. Rehoboam's accession at the death of his father Solomon (922 B.C.) brought a weak new administration into power, and Jeroboam returned with his ultimatum of more freedom from the central authority at Jerusalem (1 K. 12:1-19). Rehoboam's foolish attempt to assert an absolute authority which he did not really possess gave Jeroboam and the Israelite tribes the excuse they wanted, and they revolted. So the ten tribes (i.e., Israel), which had constituted most of the Hebrews except Judah and part of Benjamin, again became independent of Judah and of David's line.

It must not be thought that the mere ineptitude of Rehoboam caused the split in the kingdom. The many tendencies toward tribal independence, and the dislike of Judean rule felt by the central and northern tribes, have already been noted. Probably it is best to consider the "divided kingdom" as the normal condition for the Hebrews, and the Davidic-Solomonic period of unity as an exception made possible only by the strong leadership manifested by this father-and-son administration.

C. Resources and Organization. Rehoboam continued to reign over a small southern region, roughly equal to the territory of Judah. Most of Benjaminite territory appears to have gone with the northern rebels (1 K. 12:20), but Jerusalem stayed with Judah, due to the presence of Rehoboam's army there, and it remained his capital. Thus the boundary between Judah and Israel must have run several kilometers N of Jerusalem. All southern Palestine (much of it desert) was held by Rehoboam. Even so, his territory was not more than half the size of the northern kingdom. His arable land was less than one-fourth that of Israel. Judah claimed suzerainty over Edom, and asserted it when possible. Judah's population (estimated at 300,000) was about half that of Israel. The northern kingdom had the best farm land and was favored with more rainfall than the south.

In spite of its small size Judah enjoyed certain advantages over Israel. Jerusalem, with its ancient heritage of the temple and its divinely ordained worship, together with the Davidic dynasty and the buildings and traditions of the strong Solomonic empire, were Judah's. Its location in the southern hill country removed it somewhat from the ever increasing Assyrian struggle for control of the road to Egypt — a struggle that was to result in Israel's destruction. Judah tended to be a city-state (no other Judean city could begin to compete with Jerusalem) with a homogeneous population and a strong centralization of authority, thus avoiding the weakness of decentralization that characterized the northern kingdom. The continuing Davidic dynasty (Israel had nine dynasties during the reigns of nineteen kings) and the Levitic priesthood attached to the Jerusalem temple were sources of continuing strength.

D. From the Division of the Kingdom to the Middle of the Eighth Century B.C. The detailed consideration of the history of the kingdom of Judah that follows is concerned only with the nation's continuity and its relations with other nations. For the internal history, see the articles on individual kings.

1. Beginnings of the Two Hebrew Kingdoms. Rehoboam's foolish attempt to assert power that he did not have was the immediate cause of the division of the kingdom. Solomon's empire was lost at once. In fact, Damascus soon became the head of a strong Aramean state, which was a constant threat to Israel and sometimes even to Judah. The other former subject states also asserted their independence, e.g., the Philistines (1 K. 15:27; 16:15) and Moabites (2 K. 3:4-27). Rehoboam (922-915 B.C.) was left so weak that he could not attempt to force the northern revolters to return to his rule (1 K. 12:18-24, although cf. 1 K. 14:30; 15:6), restricting himself to securing and forti-

fying certain border cities in Judah and Benjamin (2 Ch. 11:5-12).

Affairs in Judah were made much worse when the Libyan noble Shishak (Sheshonq I), founder of the 22nd Dynasty of Egypt, invaded Palestine (*ca.* 918) and sacked Jerusalem (1 K. 14:25-28; 2 Ch. 12:2-12). This brief attempt by Egypt to regain its Asiatic empire was futile, but the enormous tribute Shishak took from Rehoboam meant the immediate loss of most of the Solomonic treasure and grandeur. No doubt much of this loot was used to embellish the temples at Karnak; from the inscriptions on these buildings we learn that Shishak devastated all of Palestine, Israel as well as Judah.

Rehoboam's son Abijah (915-913) was succeeded by Asa (913-873), the first of a number of kings who sought to reform life and worship according to "the law and the commandment" (2 Ch. 14:4).

Sometime in Asa's reign occurred another Egyptian invasion, led by Zerah the Ethiopian (2 Ch. 14:9-15). It was repelled, the last direct Egyptian interference in Judean affairs for several centuries. Probably later, Baasha the king of Israel invaded Benjamin and placed Jerusalem in great jeopardy by fortifying Ramah, only 8 km. (5 mi.) N of the Judean capital. Asa sent gifts to Ben-hadad of Damascus, who attacked northern Galilee, compelling Baasha to pull back from Jerusalem. Asa hastily dismantled Ramah with conscripted labor, using the materials to strengthen the defenses of Geba and Mizpah, thus moving the frontier further to the north again and securing Jerusalem (1 K. 15:16-22). An inconclusive military struggle between Judah and Israel characterized this whole period.

2. The Two Hebrew Kingdoms Stabilized. Jehoshaphat's twenty-five-year reign (873-849) was important in several respects. It was a reign of peace and prosperity. Judah was strengthened in its defenses and military power (2 Ch. 17:1-5, 10-18), but especially by the religious revival sponsored by the king. Jehoshaphat inaugurated a policy of peaceful relations with surrounding nations that contributed to the internal tranquillity. Instead of the constant hostility and military pressure that had characterized the relations of Judah with Israel until this time, Jehoshaphat made peace with Israel, thus recognizing its right to separate existence (1 K. 22:44). He arranged for his son Jehoram to marry Athaliah, the daughter of Ahab king of Israel.

The Ahab dynasty, which was in power during the reign of Jehoshaphat, is infamous for its depravity and for its adoption of the Canaanite religion of Baal, which provoked the defiant protest of Elijah. No doubt this made Jehoshaphat's relations with Israel difficult; nevertheless the Judean king actively maintained his alliance, even going to battle several times with Ahab and his sons, for which he was reproved by the prophet Jehu son of Hanani (2 Ch. 19:1-3). At any rate, the alliance strengthened both sections of the Hebrew nation and enabled them to recapture some of the lands adjacent to Palestine proper which had been lost after the death of Solomon.

Jehoshaphat continued his father's policy of religious renewal. He worshiped Yahweh and "did not seek the Baals" (2 Ch. 17:3); thus the rampant Baalism of the Ahab regime in Israel did not penetrate Judah.

The full fruit of Jehoshaphat's treaty with Israel came to Judah during the reign of his son Jehoram (849-842), whose wife Athaliah was Ahab's daughter. Jehoram "walked in the way of the kings of Israel" (2 K. 8:18), introducing Baalism to Judah. Probably Athaliah was a strong power behind the throne, as was Jezebel in Israel. During his brief reign Judah lost control of Edom and Libnah (2 K. 8:20-22) and was invaded by Philistines and Arabians, who appear to have plundered Jerusalem (2 Ch. 21:16f.).

Ahaziah the son of Jehoram (842) met a violent death at the hand of the revolutionary Jehu son of Jehoshaphat, who slew him and his uncle Jehoram the king of Israel. Upon Ahaziah's death his mother Athaliah usurped the throne (842-837). She ruthlessly killed the royal family (2 K. 11:1-3) and fostered the worship of Baal. No doubt the conservatism of the hill-country Judeans made Athaliah's baalizing of Judah a slower process than Israel's had been, but Judah in time would probably have gone the paganizing way of Israel had not Athaliah's reign been cut short.

Fortunately for Judah, a strong reaction against the Baal influence quickly set in with the coup led by the high priest Jehoiada, who placed the child Joash on the throne (837-800). Jehoiada reformed the religious life of the nation (2 K. 12:1-16), but Joash, when he came to manhood and full power, favored paganism.

At this time Israel, having just come through Jehu's bloody revolution, was very weak, and the Arameans under Hazael of Damascus were in a period of ascendancy. Transjordan and the Philistine plain fell to Hazael, and he next attacked Jerusalem, but Joash bought him off by giving him the royal and temple treasuries (2 K. 12:17f.).

3. Judah During the Jehu Dynasty of Israel. The century of the reign of the dynasty of Jehu in Israel (842-746) saw many changes in the life of both divisions of the Hebrew nation. The power of Damascus was broken by King Adadnirari III of Assyria, who made a number of campaigns against the Aramean city-states, conquering Damascus in 802. The Hebrew kingdoms could thus enter a period of freedom from Aramean oppression. Jeroboam II revived Israel until it, together with Judah in the south, encompassed a large part of the old Solomonic empire (2 K. 14:25, 28). A time of prosperity ensued in which great wealth came to both kingdoms, probably as a result of trade. Israel's splendor is eloquently testified to by the excavations at Samaria, and Judah seems to have shared it (cf., e.g., Uzziah's expansion in the Negeb, 2 Ch. 26:10).

This time of prosperity was, however, a time of social and spiritual sickness, at least for Israel. The wealthy commercial class oppressed the peasants, whose condition was deplorable. The prophets Amos and Hosea testify to the social injustices of the time. Religion in Israel, while it seemed prosperous enough, was rotten to the core. It was a religion of outward ceremony and inward emptiness, devoid of true piety and social righteousness. Israel, although wealthy and optimistic, was on the brink of disaster. To what extent Judah shared these conditions our biblical sources do not tell us. Probably the southern kingdom, always more conservative, followed the same unhealthy trend, but to a lesser degree.

It was at this time that the first of the writing prophets appeared in Judah. The prophetic movement had been active for some time, but with the eighth-century prophets it reached a high peak. Amos and Hosea in Israel, and Isaiah and Micah in Judah (a little later), were among the greatest of the prophets and the first whose sermons have been recorded for all times. Isaiah began his ministry toward the end of this period and continued into the next, announcing God's judgment and calling for repentance.

Amaziah (800-783) succeeded his father Joash. During his reign the Israelites, led by Jehoash the grandson of Jehu, invaded Judah and sacked Jerusalem (792). Since Amaziah was taken captive at this time, his son Uzziah must have been co-regent until Amaziah died (783; *see* CHRONOLOGY OF THE OT V.B). Then Uzziah began his long reign of forty-two years (793-742). He and his famous

contemporary Jeroboam II of Israel rode on the crest of the wave of the mid-eighth-century prosperity. Uzziah strengthened Judah, rebuilding Ezion-geber (2 K. 14:22) and controlling the Negeb and the Philistines (2 Ch. 26:6-8).

E. Judah During the Period of the Assyrian Empire. In the third quarter of the 8th cent. the political situation in the Fertile Crescent was alarmingly altered with the rise of the Assyrian empire. Under its vigorous king Tiglath-pileser III (745-727), the national policy became one of continuous powerful pressure westward, with Egypt as its ultimate objective. The nation of Israel, bestride the only road through Palestine to Egypt, first felt the Assyrian pressure, and finally fell before it. In time the Assyrians came even against the more isolated hill kingdom of Judah.

1. Assyrian Ascendancy: Israel's Decline and Fall. Jotham son of Uzziah (742-735) was attacked by Pekah king of Israel and Rezin king of Damascus in an attempt to force him to join them in a coalition against Assyria (2 K. 16:5-9; 2 Ch. 28:5-21; Isa. 7:1–8:15). Jotham died, leaving his son Ahaz (735-715) to face the invaders. Added to the crisis was an Edomite insurrection (2 K. 16:6) and a Philistine invasion (2 Ch. 28:17-19). Ahaz was one of Judah's most paganizing kings; he ignored Isaiah's offer of divine help and appealed to Tiglath-pileser for aid. The Assyrian king destroyed the coalition, overran Galilee and Transjordan, and reduced Israel to a small enclave in the hill country of Samaria. But Judah was now a vassal of Assyria and obliged to follow the Assyrian lead not only in politics but in religion as well. Assyria's gods must now have official recognition in Jerusalem. This is the background of Ahaz's changes in the temple, so condemned by the sacred historians. All kinds of heathen practices now flourished in Jerusalem (2 K. 16:10-18; 2 Ch. 28:22-25). Probably at this time also the nation suffered an economic decline; it had lost Ezion-geber and paid heavy tribute to Assyria. Later in the reign of Ahaz, Samaria was destroyed by the Assyrians and the Israelite kingdom ceased to be (722). Its territory became a part of the Assyrian empire. One can easily imagine the gloom Israel's fall produced in the sister nation to the south.

Hezekiah (715-686) inherited the policies of Assyrian vassalage from his father Ahaz, and his whole reign was devoted to the reversal of these and the reestablishment of Judean political and religious independence. There is every reason to believe that Hezekiah, a devout worshiper of Yahweh, was motivated by his religious convictions as much as by his desire to be free from the yoke of Assyria. The prophet Isaiah was his confidant and adviser. Early in his reign Hezekiah began to reform the religion of Judah (2 K. 18:3-6; 2 Ch. 29–31). Paganizing cults and local Yahweh shrines were prohibited, and the Passover was reinstituted. The king even tried to involve the remnant of the defunct Israelite kingdom in his reforms, but with little success.

In 705 Hezekiah rebelled against the Assyrian king Sennacherib by withholding tribute (2 K. 18:7). The succeeding events are described both in the Bible and upon the Assyrian monuments; scholars have not yet clarified all the details of the complex picture. It appears that all the Westlands were in revolt, abetted by Merodach-baladan of Babylon, who had thrown off the Assyrian yoke (2 K. 20:12-19; Isa. 39). Hezekiah appears to have been a leader, sending a delegation to Egypt for help (Isa. 30:1-7; 31:1-3). In 701 Sennacherib came to put down the revolt. One by one he conquered the rebellious allies until he came to Judah, which he overran, taking from Hezekiah a great tribute (2 K. 18:13-16). Events after this are not clear. Many scholars believe that the deliverance of Hezekiah from the Assyrians described in 2 K. 18:17–19:37 took place under a later attack by the Assyrians. At any rate, when Hezekiah died Judah was still maintaining a threatened independence, which his son soon lost.

2. Assyrian Decline: Judah Carries On Alone. The century between the death of Hezekiah and the destruction of the Judean state was a time of sudden political change; empires rose and fell almost overnight. Little could Manasseh realize how near to extinction was the fearful Assyrian power to which he paid tribute. And the Babylonian empire, which displaced the Assyrian, lasted only one human lifetime.

Manasseh, Hezekiah's son (686-642), completely reversed his father's policies, becoming a loyal vassal of Assyria. Both Esarhaddon and Ashurbanipal, his Assyrian lords, were vigorous conquerors, occupying Egypt and leaving Manasseh the choice between tribute and destruction. Once he seems to have dabbled in revolt, but a summons to appear before his Assyrian lord quickly cured him of it (2 Ch. 33:11-13). Manasseh's submission meant, of course, the reconstitution of Assyrian paganism in Jerusalem (2 K. 21:3-9). Many Judeans probably preferred the peace of wicked Manasseh's reign to the frequent crises and wars of pious Hezekiah's. Amon son of Manasseh (642-640) continued his father's policies.

Already in Manasseh's day the great Assyrian empire, overextended and full of dissensions, was slipping. Babylon, long a center of revolt, was with Median support constantly restive, and Egypt was never firmly held. Vigorous Indo-Aryan peoples infiltrated and weakened Assyria from the north. This situation was similar to that facing the Roman empire in the 4th and 5th cents. A.D. that led to its fall.

F. Decline and Fall of the Kingdom of Judah. 1. Assyria's End. After the death of Ashurbanipal (633) Assyria was fighting for its life. The Babylonians, led by Nabopolassar, were leaders in the coalition that finally destroyed the Assyrian capital Nineveh in 612. In 609 Assyria ceased to exist. It was in this period, with a brief power vacuum in the Levant, that Josiah reigned (640-609). Judah was now free for the first time in a century. Josiah is best known for his sweeping religious reforms, in which the finding of the book of the law played a prominent part (621 B.C.; 2 K. 22:1–23:25; 2 Ch. 34:1–35:19). All traces of Assyrian paganism, Canaanite rites, and magic were obliterated; and the king successfully centralized the worship of Yahweh by stamping out the local Yahweh shrines. These were days when all the world seemed to have turned upside down; a return to the old Hebrew faith would give the nation a sound foundation.

A new burst of prophetic activity characterized this period. Nahum sang for joy over Nineveh's fall. Zephaniah announced God's wrath against Judah. The young Jeremiah was unimpressed by the Josianic revival — it did not go deep enough. And Habakkuk (who probably flourished at this time) proclaimed a Chaldean invasion.

Josiah also extended Judean power by taking possession of the territory of the defunct Israel. There he died, foolishly (it seems to us) trying to stop Pharaoh Neco, as the Egyptian king was on his way to Carchemish to fight on the side of dying Assyria (2 K. 23:29f.).

2. Babylon Revived. For a brief time after Josiah's death, Judah fell under the power of Egypt. Neco, returning from Syria through Palestine, deposed and deported to Egypt Josiah's son Jehoahaz (609), setting in his place in Jerusalem his brother Eliakim (Jehoiakim, 609-598) as an Egyptian puppet (2 K. 23:31-37). Meanwhile, Nebuchadrezzar the son of Nabopolassar (605-562) had come to the throne in Babylon. During his long reign Babylon regained its ancient glory and dominion. Nebuchadrezzar was de-

termined to crush Egypt and all that stood in the way of this objective; this led him to a series of campaigns against the Westlands, including Judah, and he soon took this area away from Egypt.

It appears that already in 605 Nebuchadrezzar had attacked Jerusalem, taking Daniel and other nobles hostage to Babylon (Dnl. 1:1f.; 2 Ch. 36:6f.). Certainly from this time on Nebuchadrezzar considered Judah part of his empire. Jerusalem's failure to see the finality of this, and its tendency to lean on Egypt for help — that "broken reed" — led to revolt several times, thus bringing about its destruction. Throughout these last years (from the death of Josiah to the destruction of Jerusalem) the nation was demoralized, led by irresolute and ungodly kings, disunited, and in a decline from which it could never recover. The book of Jeremiah is eloquent witness to those troubled days.

Jehoiakim rebelled against Nebuchadrezzar; as the Babylonian armies approached, the Judean king was killed in a palace coup and his son Jehoiachin (597) succeeded him. After a three-month siege the city surrendered, and the new king and many nobles and artisans (and the priest Ezekiel) were deported to Babylon (2 K. 24:5-16). Zedekiah, an uncle of Jehoiachin, was placed upon the throne, probably more as a regent than a king. After thirty-seven years in prison in Babylon, Jehoiachin was released and pensioned there (2 K. 25:27-30).

Zedekiah (597-587) should have understood the signs of the times and submitted to Babylon as Jeremiah urged him (Jer. 27–29). Instead, he was constantly planning rebellion. With deliberate finality the Babylonians came again, reducing all Judah and besieging Jerusalem (588). For a year and a half that desperate city held out. Zedekiah's final attempt to escape failed; he was led blinded to Babylon and Jerusalem was destroyed (2 K. 24:20–25:21). The Babylonians desolated the whole land of Judah and carried off to Babylon large numbers of its people. Many of the poor of the land who remained there finally went to Egypt (Jer. 43:1-7).

Thus Jeremiah's prediction of total destruction for the nation was tragically fulfilled (Jer. 25:1-11). Never again was there an independent Hebrew nation with its own king. That the Judeans even survived the destruction of their homeland and their exile to Babylon is without doubt one of the anomalies of history.

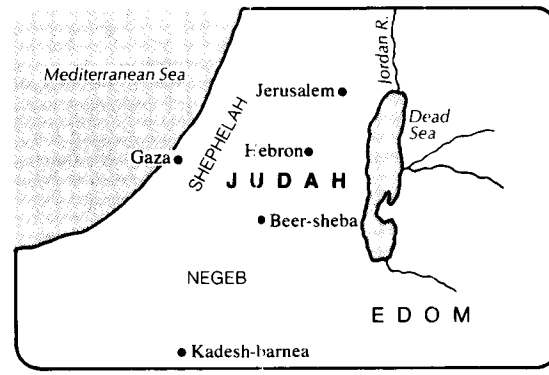
JUDAH ON THE EAST. A place marking the eastern limit of the territory of Naphtali (Josh. 19:34). It is generally thought among scholars that the text is corrupt (cf. the LXX, which omits any reference to Judah, and many modern versions, e.g., NIV, JB, NAB); but no very probable emendation has been suggested. The full phrase, "Judah on the east at the Jordan" (Heb. *bîhûḏâ hayyarděn mizraḥ naššemeš*; AV "Judah upon Jordan toward the sunrising"; NEB "low-laying land by the Jordan on the east"), obviously cannot refer to the tribal territory of Judah, and it is difficult to imagine that any locale in this area would be named Judah. W. Thomson (*The Land and the Book* [1911], II, 466), however, proposed to identify it with Seiyid Jehūda, a small white-domed sanctuary about 5 km. (3 mi.) SE of Laish (Tell el-Qâḍī).



JUDAH, TERRITORY OF [Heb. *yᵉhûḏâ*; Josh. 15:1-62]. The land allotted to the tribe of Judah; later the territory of the southern kingdom, and after the Exile the land occupied by Jews.

1. The Tribal Inheritance.—The allocation of the tribe of Judah was the land from the boundary with Benjamin on the north to the boundary with Edom on the south, and from the Dead Sea on the east to the Mediterranean on the west. It is not to be understood that the tribe of Judah actually occupied all this territory from the time of the allotment, for both Joshua and Judges make clear that there was a lot of land to be possessed, there were many enclaves of non-Israelites (or perhaps better stated, there were many Israelite enclaves in the Canaanite territory), and there was almost constant warfare with other peoples over many parts of the land. Thus, e.g., the Philistine cities included in the allotment (Josh. 15:46f.) were only "taken" at a later time (Jgs. 1:18), and warfare with the Philistines over possession of the Shephelah continued into the days of David.

The inheritance is broken into parts in the description: "in the extreme South" (the Negeb, Josh. 15:21); "in the lowland" (the Shephelah, 15:33), which in turn is subdivided into five groups and includes the coastal plain; "in the hill country" (15:48), also subdivided into five groups; and "in the wilderness" (15:61). These divisions are according to the basic geographical divisions of southern Palestine, from west to east: (1) the coastal plain, (2) the Shephelah, (3) the central mountain range, and (4) the wilderness or Jeshimon. They also indicate the geographical separation of the Negeb from the region to the north. While a number of the cities cannot be identified, it seems clear that the subdivisions also are grouped geographically.

The northern boundary (Josh. 15:5-11) extended from the north end of the Dead Sea (v. 5) to the Mediterranean (v. 11), with landmarks including the ascent of Adummim, En-shemesh, En-rogel (v. 7), the valley of Hinnom, Mt. Ephron, Mt. Seir, Mt. Jearim, Beth-shemesh, and Jabneel; it came "to an end at the sea" (vv. 9-11). This boundary line approximately follows the modern road from the Jordan River to Jerusalem, and from there follows the old back road (Nahal Rephaim to Beth-shemesh) and Wâdī Sorek to the coast. The cities listed in 15:33-36 are along the western part of this border, and the cities in 15:37-42 are in the Shephelah further to the south, while those in 15:45-47 are located in the coastal plain extending to Gaza and Wâdī ʿArîsh.

The southern boundary (Josh. 15:2-4) extended from the south end of the Dead Sea to Wâdī ʿArîsh (the brook of Egypt) at the modern town of El-arish, including Scorpion Pass (ascent of Akrabbim), Kadesh-barnea, and Azmon. It is interesting to note that the cities listed along the southern boundary do not extend far S of Beer-sheba. Those in 15:21-32 are mostly E, N, and NW of Beer-

JUDAH, TERRITORY OF

sheba; those in 15:48-51 are between Beer-sheba and Hebron; those in 15:55f. are SE of Hebron; those in 15:58f. are N of Hebron; those in 15:52-54 are in the vicinity of Hebron; and those in the Greek addition to v. 59 (LXX 15:60) are in the vicinity of Bethlehem. The MT of 15:60 seems to be misplaced. The towns in 15:61 are in the wilderness from the area near Jericho to En-gedi.

II. Physical Features.–The physical features of Palestine in general apply to the territory of Judah. On the west is the coastal plain, often sandy or swampy, with no natural harbors, and the highway from Egypt to the north was located several kilometers inland. Between the coastal plain and the central mountain range in Judah is the rich piedmont (the foothills to those who live in the plain, but in the biblical view, as seen from above, the "lowlands" or Shephelah). This region is cut by numerous wadis, is reasonably well watered in the rainy season, and produces much of the food supply for all of Judah. The western part of the Shephelah is less rugged and more adaptable for farming; the eastern part is better used for orchards. The central mountain range in Judah is stony — increasingly so as we travel toward the south. According to an Arab legend, when Allah created the world, He sent two angels with large sacks of stones for the entire world, but while they were flying over this region one of the bags burst. From Jerusalem to Hebron, the legend becomes very real. As a result there are no main highways, and modern roads have been constructed only with considerable engineering. Agriculture was more difficult, except for olives and figs, and the domestication of small cattle was largely limited to goats; flocks of sheep had to be pastured often at a great distance (cf. Jacob's flock at Dothan, about 100 km. [60 mi.] from his home).

The etesian winds, mostly from the west, water the western slopes of the central range, but the eastern side is barren. This is the wilderness of Judah. Just at the end of the rainy season there is a green fuzzlike growth on the hills, but this quickly burns off and the land — called the Jeshimon — is completely barren. Only the oases watered by springs at Jericho, 'Ain Feshkha, and En-gedi provide water for the few settlements named.

The central range lies at an elevation of approximately 900 m. (3000 ft.), with an elevation of 895 m. (2936 ft.) just S of Jerusalem (Jebel Mukabbir), 1020 m. (3346 ft.) at the highest point near Hebron, and 302 m. (994 ft.) near Beer-sheba. The range rises again in the Negeb to an elevation of 1033 m. (3389 ft.) near Kadesh-barnea.

The mountainous wilderness of Judah between Bethlehem and the Dead Sea (D. Baly)

III. Judah in the Time of the Monarchy.–At an indeterminate time, the tribal allotment of Simeon (Josh. 19:1-9), which had been part of the territory of Judah, was absorbed, and there is no further record of the tribe of Simeon. The allotment of Dan also was in the territory of Judah, since some of the cities that are named appear in both lists (cf. Josh. 19:40-46), but Dan relocated in the northern end of the Jordan rift (19:47).

Saul, the first king of the monarchy, was of the tribe of Benjamin and had his capital at Gibeah of Saul, a short distance N of Jerusalem. David, the second king, was of the tribe of Judah, and he established his capital first at Hebron and later at Jerusalem. Jebus had not been conquered by the Israelites, and a portion of what is now Jerusalem (and probably was at that time) belonged to Benjamin. David's conquest, however, brought at least the Jebusite city into the territory of Judah, and brought Judah into a position of dominance over all the tribes.

David's kingdom extended far beyond the borders of what is known as Palestine. But this was known as "Israel" and not as "Judah." Strong tribal feelings still existed, and — while the theory that history can be rewritten on the basis of Rachel- and Leah-tribes seems improbable — tribal rivalry, particularly that of Benjamin and Ephraim ("Rachel-tribes"), provided the basis for the eventual division of the monarchy. Solomon, by realizing David's intention to build a house for Yahweh, succeeded in establishing a cult center for all the tribes at Jerusalem. But when Rehoboam, Solomon's son, proved to be insensitive to the feelings of the northern tribes, Jeroboam became king of the northern kingdom, and established a rival cult center in Benjamin and his capital in Ephraim.

Solomon had developed the southern part of Judah, both with coppermining and with his fleet located at Ezion-geber. David had subjugated the Edomites (2 S. 8:13f., reading *'dm* for *'rm* with the LXX), and there had been widespread slaughter of Edomites (cf. 1 K. 11:15f.). Solomon caught some of the backlash of this attempted purge of the Edomite royal line (1 K. 11:14-22), but was able to maintain control of the routes to the copper mines and the seaport.

IV. Judah in the Time of the Divided Kingdom.–Strong kings of Judah were able to maintain the operations in the deep south, but there must have been constant trouble and much bad blood between the Edomites and the Judeans. Amos reflects something of this in his prophecy (Am. 1:11f.). In the days of Jehoshaphat (873-848 B.C.), a coalition of Edomites, Moabites, and Ammonites attempted to invade Judah and reached Hazazon-tamar, above En-gedi (2 Ch. 20:1f.), but they were repulsed. Edom rebelled against Judah in the days of Jehoram (853-841 B.C.; 2 Ch. 21:8-10). Amaziah (796-767 B.C.) invaded Edom and slaughtered many Edomites. Uzziah (790-740 B.C.) restored the seaport at Ezion-geber, but when Ahaz (735-716 B.C.) was faced by the Syro-Ephraimite coalition, Edom revolted again, this time with permanent success (2 Ch. 28:17; cf. 2 K. 16:6, emending *'rm* to read *'dm*, and deleting the name Rezin). Against this background one can easily understand why Edom rejoiced when Jerusalem fell to the Babylonians (Ps. 137:7), and the prophecy of Obadiah may seem like a bit of chauvinism. In these movements and countermovements involving Judah and Edom, it is not clear how much of the Negeb was occupied by either party, since few geographical details are given. At the very least, the route to the copper mines and the seaport was involved. From later history it would seem that possibly even more of the Negeb was occupied at times by Edom.

V. Judah in the Postexilic Period.–The northern tribes had been taken into captivity by the Assyrians and have become

known as "the lost tribes of Israel." The sole surviving identifiable tribe was Judah, and when this was conquered by Nebuchadrezzar, the captives became known as "Jews" — a word that developed from "Judeans." The returning exiles were henceforth known as Jews, and the name Judah was loosely used to refer to the region they occupied.

At first, this region was exceedingly small — not much more than Jerusalem and the surrounding region. The names of some of the towns or regions are recorded in the details of the rebuilders of Jerusalem in Neh. 3. It is obvious that some of these locations were formerly part of the northern kingdom (Y. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* [rev. ed. 1977], p. 109). Samaritans occupied the region to the north, formerly the tribal portions of Ephraim and Cisjordanian Manasseh, and Idumeans (Edomites) occupied the region to the south, including Hebron. As the Nabateans moved into the Negeb from the east, the Idumeans were pushed northward, with the result that the border was not far S of Beth-zur, about 25 km. (15 mi.) from Jerusalem.

Under the Hasmoneans (Maccabees), Judah reached its greatest extent, incorporating Samaria and Galilee to the north, the coastal plain (except Ashkelon) to the west, Idumea to the south, and all of Transjordan on the east. For the several military campaigns that stretched over about a century, and for the regions that were involved, *see* MACCABEES.

Under the Romans, Judah — now more properly "JUDEA" — was a rather indefinite term. Herod the Great was named king of Judea, meaning approximately the region included in the Maccabean kingdom at its greatest extent. On the other hand, when Archelaus was named ethnarch of Judea, the region included only Samaria, the pre-Maccabean Judah, and Idumea. The Roman procurators of Judea controlled approximately this same territory, but their gubernatorial seat was at Caesarea (Maritima), not at Jerusalem.

W. S. LASOR

JUDAISM jo͞o′di-iz-əm, jo͞o′dā-iz-əm [Gk. *Ioudaismos*]. The cultus and culture of the Jewish people, including political and social as well as strictly religious aspects. This term indicates that Judah rather than Israel figured in the reconstruction of the nation's life after the Babylonian captivity.

The word begins to appear in the intertestamental literature. 2 Macc. 2:21 relates that some in the days of Judas Maccabeus "vied with one another in manful deeds for the religion of the Jews," i.e., Judaism. In those days, when many Jews were succumbing to hellenization, the word Judaism connoted a mixture of godliness and patriotism, exemplified by one elder who "resolutely risked body and life for Judaism" (3 Macc. 14:38).

The word occurs only twice in the NT. In Gal. 1:13f. Paul cites his persecution of the Church before his conversion as the most obvious proof of his former devotion to Judaism. Incidentally, the apostle's testimony certifies that the Judaism of his time included the traditions of the fathers — the interpretations of the Mosaic law designed to help the covenant people cope with the changes in their life situation.

For a comprehensive treatment of Judaism, *see* RELIGIONS OF THE BIBLICAL WORLD: JUDAISM.

E. F. HARRISON

JUDAIZING jo͞o′di-īz-ing [Heb. hithpael of *yāhaḏ*–'become a Jew' (Est. 8:17); Gk. *Ioudaizō* (Gal. 2:14)]. The process of adopting Jewish religious and cultural practices, whether by choice or through coercion. The concept rarely occurs in Scripture. The single OT reference is Est. 8:17. A royal edict, inspired by Haman, called for the destruction of the Jews throughout the Persian empire. A second edict, issued after Queen Esther interceded for her people, permitted the Jews to destroy their assailants. This edict instilled fear in many who had planned to participate in the massacre, and they "declared themselves Jews." The LXX adds that they were circumcised. Their motivation was fear; hence their new alignment was insincere and their Judaizing doubtless temporary.

The only NT use of the term is in Gal. 2:14, where the RSV translates it as "to live like Jews." Peter had been eating with the gentile believers at Antioch, but when certain men arrived from the Jerusalem church, he discontinued this practice. Probably he recalled the rebuff he had received at Jerusalem for eating with gentile believers at Caesarea (Acts 11:2f.). Strict Jews would not do such a thing, since Gentiles who did not observe certain dietary prohibitions (Lev. 11) were "unclean." Christ, however, had instituted a change (Mk. 7:19).

Paul reproached Peter publicly because by his withdrawal Peter was compelling Gentiles in the Antioch church to adopt a strict Jewish mode of life if they wished to have table fellowship with him. If the gentile brethren were regarded as ceremonially unclean, it was questionable if they could sit down together with Peter at the Lord's Supper. In fact, the possibility of two church bodies, one Jewish and the other Gentile, would have to be faced. No wonder Paul was disturbed and asserted that Peter was not acting according to the truth of the gospel.

Early in the 2nd cent. A.D. Ignatius warned that believing in Jesus Christ and practicing Judaism were contradictory (Ign. Magn. x.3). The context does not provide any details except perhaps the remark that Christians do not live for the Sabbath but for the Lord's Day (ix.1).

For the few additional postapostolic references, see G. W. H. Lampe, ed., *Patristic Greek Lexicon* (4th ed., 1976), p. 674.

E. F. HARRISON

JUDAS jo͞o′dəs [Gk. *Ioudas* < Heb. *yᵉhûḏâ*–'Judah'].

1. Judas Maccabeus, third son of Mattathias (1 Macc. 2:4). *See* MACCABEES.

2. Judas, son of Chalphi, a Jewish officer who supported Jonathan bravely at the battle of Hazor (1 Macc. 11:70; Josephus *Ant.* xiii.5.7 [161]).

3. A person of good position in Jerusalem at the time of the mission to Aristobulus (2 Macc. 1:10); he has been identified with Judas Maccabeus and also with an Essene prophet (Josephus *Ant.* xiii.11.2 [311]; *BJ* i.3.5 [78]).

4. Son of Simon the Maccabee and brother of John Hyrcanus (1 Macc. 16:2). He was wounded in the battle that he fought with his brother against Cendebeus (1 Macc. 16:1ff.; Josephus *Ant.* xiii.7.3 [227]), and was murdered by Ptolemy the usurper, his brother-in-law, at Dok (1 Macc. 16:11ff.).

J. HUTCHISON

5. JUDAS ISCARIOT.

6. One of the brothers of Jesus (Mt. 13:55; Mk. 6:3). *See* BROTHERS OF THE LORD; JUDE, EPISTLE OF II.

7. An apostle, "not Iscariot" (Jn. 14:22). He is generally identified with Lebbaeus or Thaddaeus (Mt. 10:3; Mk. 3:18), and is also called "Judas the son of James" (Lk. 6:16; Acts 1:13; AV "Judas the brother of James"). If the RSV is accepted as the correct rendering of Lk. 6:16 and Acts 1:13, this Judas cannot be identified with the Judas of Mk. 6:3, or the Judas of Mt. 13:55, the brother of Jesus, or the author of the Epistle of Jude, who was the brother of James and possibly the same person as the Judas in Mt. 13:55. The only incident recorded of this Judas of James is

in Jn. 14:22, where during Christ's address to the disciples after the Last Supper he put the question, "Lord, how is it that you will manifest yourself to us, and not to the world?" C. M. KERR

8. Judas of Galilee [Gk. *ho Galilaios*]. Mentioned in Acts 5:37 as the leader of an insurrection occasioned by the census of QUIRINIUS in A.D. 7. It is said that he and those who obeyed him perished in that revolt. Josephus also repeatedly mentions Judas by this same name, "the Galilean," and speaks of his revolt (*Ant.* xvii.1.6 [23]; xx.5.2 [102]; *BJ* ii.8.1 [118]; vii.8.1 [253]), but in *Ant.* xvii.1.1 (4) he names him a Gaulanite of the city of Gamala. As Gamala was in Gaulanitis, not far from the eastern shore of the Sea of Galilee, it may be regarded as belonging to that province. The party of Judas seems to have been identified with the Zealots. *See* ZEALOT.

9. One with whom Paul lodged in Damascus, whose house was in "the street called Straight" (Acts 9:11). Nothing further is known of him. *See* STRAIGHT STREET.

10. JUDAS BARSABBAS. J. ORR

JUDAS BARSABBAS bär-sab'əs [Gk. *Ioudas Barasabbas*]. Judas was, with Silas, a delegate from the church in Jerusalem to the gentile Christians of Antioch, Syria, and Cilicia. They were appointed to convey the letter containing the decision of "the apostles and the elders, with the whole church" regarding the attitude to be taken by gentile Christians toward the Mosaic law, and also to explain "the same things by word of mouth" (Acts 15:22-27). They accompanied Paul and Barnabas to Antioch, and since they "were themselves prophets," i.e., preachers, they not only handed over the epistle but stayed some time in the city preaching and teaching (v. 32). They seem to have gone no farther than Antioch, for "they were sent off in peace by the brethren to those who had sent them," and it was Paul and Silas who some time later strengthened the churches in Syria and Cilicia (vv. 40f.).

According to v. 34, AV, Judas returned to Jerusalem without Silas, who remained at Antioch and afterward became Paul's companion (v. 40). The oldest MSS, however, omit v. 34, and it is therefore omitted from the RSV (but cf. mg.). It was probably a marginal note to explain v. 40, and in time it crept into the text. Judas and Silas are called "leading men among the brethren" (v. 22), probably elders and "prophets" (v. 32).

Barsabbas being a patronymic, Judas was probably the brother of Joseph Barsabbas. He cannot be identified with any other Judas, e.g., "Judas not Iscariot" (Jn. 14:22). We hear no more of Judas after his return to Jerusalem (Acts 15:22ff.). S. F. HUNTER

JUDAS, GOSPEL OF. *See* APOCRYPHAL GOSPELS V.C.

JUDAS ISCARIOT jōō'dəs is-kâr'ē-ət [Gk. *Ioudas Iskariōtēs*]. One of Jesus' twelve disciples.

I. Name
  A. Man of Kerioth
  B. Man of the Lie
  C. Dyer
  D. Dagger Bearer
II. The Story
  A. Difficulties
  B. Interpretation

I. Name.—Iscariot is probably not the name of Judas's father, who is called Simon (Jn. 6:71; 13:2, 26). Many suggestions have been given to explain the name Iscariot. The most plausible are (1) "man of Kerioth," (2) "liar" or "man of the lie," (3) "dyer," and (4) "dagger bearer."

A. Man of Kerioth. One widely accepted explanation for the name is that it identifies Judas's origin, "Kerioth" (*qrywt*). This suggestion is strengthened by some texts that have *apó Karyōtou*, "from Karyoth," instead of Gk. *Iskariōtēs* or *Iskarioth*. The Kerioth mentioned is sometimes identified with Kerioth-hezron, a location later called Hazor (Josh. 15:15). It is very unlikely, however, that a man would be identified by a name no longer given to his home town. There is also a Kerioth in Judah and another in Moab (Jer. 48:14, 41). Some NT scribes, at least, understood the name to indicate the place of Judas's origin — "from Karyoth." But this is not the only possibility. Luke describes Judas as one who was "*called* Iscariot" (Lk. 22:3), as if this were a nickname of some kind. Other disciples who were given special names like this are: Simon, called Peter (the Rock), Simon the Cananaean (*qn'n*, "zealot"; see Lk. 6:15), James and John, sons of thunder (Mk. 3:17), and Matthew, the tax collector (Mt. 10:2). Named for their fathers are: James the son of Alphaeus (Mt. 10:3), James and John, sons of Zebedee (Mt. 10:2), and Judas himself, son of Simon (Jn. 6:71; 13:2, 26). None of the other apostles is identified by his place of origin, so it seems more likely that Iscariot, also, is a descriptive name. As a descriptive noun, Iscariot could be derived either from *šqr*, "lie," "liar," or *sicarius*, "dagger bearer."

B. Man of the Lie. It is philologically possible for the name Iscariot to be derived from Aram. *šqr'* ("liar") with the prosthetic *aleph* added for ease of pronunciation, or from *'yš šqr'* ("man of the lie"). The "man of the lie," then, is a traitor belonging to a typology similar to that of Ahitophel (2 S. 16:15–17:2; Midr. *Gen. Rabbah* xxxviii.1; *Cant. Rabbah* iii.7.5), one of David's inner circle who betrayed him at night when David was weak and weary. Like Judas, Ahitophel hanged himself after his plot (2 S. 17:23; Mt. 27:3-5). *Sanhedrin* 69b relates Ahitophel to Ps. 55:23 (MT 24), "Bloody and deceitful men shall not live out half their days." The Targum to Ps. 55:3 (MT 4) translates "enemy" by "the liar" (*šqr'*).

Another OT passage important as background for the Judas story is Ps. 41, which is perhaps referred to in Acts 1:16-20. Ps. 41:9 (MT 10), "For my close friend whom I trusted, while eating my bread, raised up his heel [Heb. *'qb*] against me," is quoted in Jn. 13:18 in reference to Judas, with the possible double meaning intended for the Heb. *'āqēḇ* (heel) and *'āqaḇ* (betray) in an original Semitic language. One of the villains in the Dead Sea Scrolls was the *'yš kzb* ("man of the lie") (1QpHab 2:2; 5:11; CD 20:15).

Evidence for classifying Judas in traitor categories also points out the close dependence of the Judas narrative on the OT. The relationship between prophecy and fulfillment is clear in Acts 1:16: "Men, brethren, it was necessary that the scripture be fulfilled which the Holy Spirit prophesied through the mouth of David concerning Judas who became a guide to those who seized Jesus." Furthermore, the tradition that the money that Judas returned was used to buy the potter's field to bury strangers (Acts 1:18 says Judas bought it himself) is another echo of the Scriptures (Zec. 11:12f.; Jer. 18:2f.; 32:6-14). In fact, the potter's field and the temple treasury of Mt. 27:5-7 seem to echo the Hebrew and Syriac respectively of Zec. 11:13. The relationship of the Judas story to traitor typology, fulfillment of Scripture, and satanology prompts some scholars (see Gärtner, p. 67; Lüthi, pp. 61, 64, 106) to conclude that the NT perspective toward Judas is not historically but theologically motivated.

C. Dyer. A proposal by Ehrman, further supported and clarified by Arbeitman, argues that Iscariot means "dyer" and refers to an occupation of dyeing cloth. The proposal makes sense etymologically but gives no clue about the character of the person so named.

D. Dagger Bearer. Iscariot may also be a Semitic form of *sicarius*, to which the prosthetic *aleph*, giving the initial

vowel sound, was added for ease of pronunciation. This interpretation is supported by some texts which give *Skariōtes, Skariōth,* Syr. *S^{e}kariôtā', S^{e}kariûtā',* etc.

A *sicarius* is a "dagger [*sica*] bearer" or "assassin." In Palestine, during the lifetime of Jesus, the *sicarii* were extremely zealous Jewish nationalists, who carried daggers under their cloaks so that they could take advantage of every opportunity to kill Romans or Roman collaborators. A member of the *sicarii* would not be completely out of place among the disciples of Jesus. He would have as comrades Simon the Zealot, James and John, sons of thunder who wanted to bid fire come down from heaven and consume the Samaritans (Lk. 9:51-54), and Peter, who had a sword at Gethsemane (Jn. 18:10). Peter is also called Simon Bar-Jonah (Mt. 16:17; Jn. 1:42). Bar-Jonah is quite possibly a transliteration of Heb. *biryôn* or *baryônā',* which means "outlaw" or "zealot" (see T.B. *Gittin* 56a-b; Eisler, pp. 100, 252f., 356, 358; Hengel, pp. 55-57).

II. The Story.—A. Difficulties. The only sources dealing with Judas Iscariot are the four Gospels, Acts, and possibly 1 Cor. 11:23. The information they provide is very sketchy and unfavorable. Judas is described as the one who betrayed Jesus (Mt. 10:4; 26:25; 27:3; Mk. 8:19; Lk. 6:15f.; Jn. 6:71; 12:4; 13:2; 18:2, 5). He was under the direction of Satan (Lk. 22:3; Jn. 13:2), and his greed prompted him to steal (Jn. 12:4-6) and betray Jesus for the payment involved (Mt. 26:14; Mk. 14:10f.). Probably the amount of historical truth contained in these reports is colored by the feeling the Church had for him. But even from the reports of those who resented him, some good points are also evident. Furthermore, the Fourth Gospel indicates that Judas was the treasurer for the group (Jn. 12:4-6; 13:29), an office not usually given to one who is known to be greedy and irresponsible.

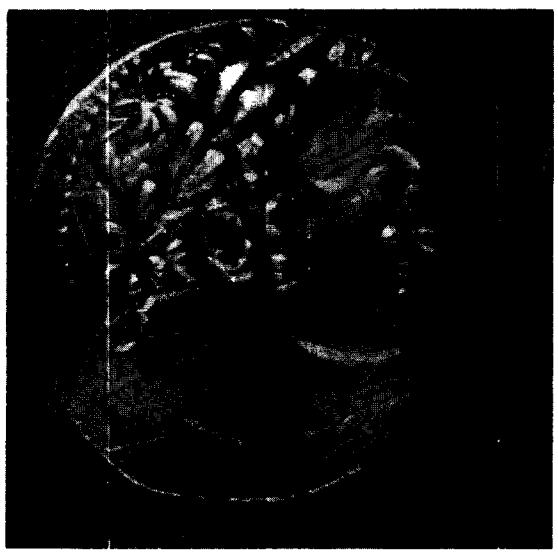
The many difficulties in the account of Judas caused Guignebert to conclude that "if the episode is founded on fact, which is doubtful, it remains unintelligible to us" (p. 457). In addition to the theological motivation, Guignebert (pp. 453-55) points out: (1) Paul does not mention Judas, although he describes some of the events that took place "on the night when he [Jesus] was betrayed" (1 Cor. 11:23); (2) Paul also described the resurrection when Jesus "appeared to Cephas, then to the twelve" (1 Cor. 15:5), as if Judas were still part of the group (see also Brandon, pp. 48f.); (3) the sum of thirty pieces of silver that Judas is reported to have been paid for betraying Jesus is a very small amount to expect for an assignment of this nature, and it is very closely related to Zec. 11:12 (see I.B above).

Although John anticipates the betrayal (6:71; 12:4) and Luke tells of previous plans (Lk. 22:3-6), the event apparently came at the Last Supper as a surprise to all except Jesus (Mt. 26:20ff.; Mk. 14:17ff.). In collaboration with the priests, Judas led the troops at night to Gethsemane to find Jesus. At that time Judas kissed Jesus in order to identify Him for those who had come to take Him captive (Mt. 26:47ff.; Mk. 14:43ff.; Lk. 22:47ff.; Jn. 18:2ff.). After the crucifixion, Judas repented and hanged himself (Mt. 27:3-6), or fell headlong and "burst open in the middle" so his "bowels gushed out" (Acts 1:18). He was replaced in the apostolic circle by a certain Matthias, not otherwise known (Acts 1:25).

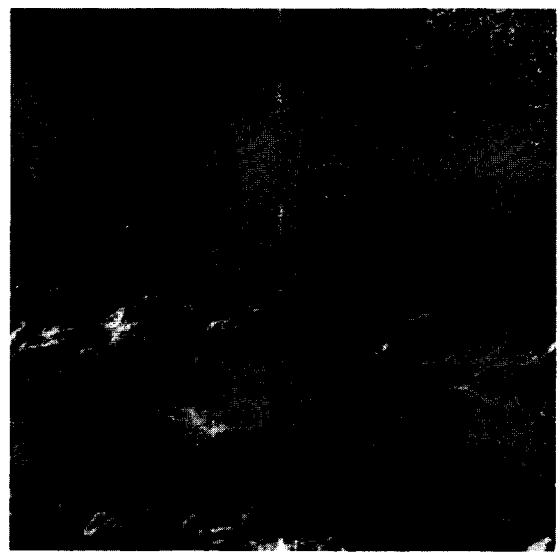
It is true that the story is brief and has certain legendary features strikingly similar to OT Scripture, but it is unlikely that the whole story is a fabrication. It would have served no advantageous purpose for Christians to have invented a story that their Master had a betrayer in His innermost circle. Paul's reference to the betrayal (1 Cor. 11:23) may also indicate an early tradition about Judas (see Jeremias, pp. 66f., esp. n. 8). Hence its report in NT documents is evidently based on factual information.

B. Interpretation. The activity of Judas should be seen in comparison with other events that took place before, during, and after the crucifixion. The disciples had expected Jesus to restore the kingdom to Israel (Lk. 24:24; Acts 1:6). Peter rebuked Jesus when He suggested that He would go up to Jerusalem to be killed (Mt. 16:21-23). James and John had asked for official positions when Jesus became king (Mt. 20:20-24; Mk. 10:35-40). The disciples had quarreled about their respective ranks and positions before the Last Supper (Lk. 22:24-26). Jesus had promised that those who left all to follow Him would be repaid amply in terms of material goods in this life (Mt. 19:28f.; Mk. 10:28-30; see also Mt. 6:33). Evidently the disciples had expected Jesus to contest the authority of the Romans when He went up to the feast at Jerusalem, just as many aspiring messianic kings had done before Him. Had He

Judas is thought to have received Tyrian shekels among his "pieces of silver" (G. L. Archer; picture W. S. LaSor)



Akeldama, the traditional site of Judas's suicide (W. S. LaSor)



led a military revolution, there were those, like Peter, who would have been willing to die with Him in battle (Mt. 26:33; Mk. 14:29-31; Lk. 22:33f.). It was only after it became clear that Jesus was not going to lead an insurrection that Peter denied Jesus (Mt. 26:69-75; Mk. 14:66-72; Lk. 22:54-62) and Judas betrayed Jesus to the chief priests.

Judas's betrayal may have been done out of genuine patriotic devotion. According to this view, Judas, as a *sicarius*, was ready to employ military strength to overthrow Rome. When he learned that Jesus was not going to lead a military revolt, he considered Jesus to be a fifth columnist or saboteur of some sort who was weakening the military strength of Israel by recruiting some of the nation's leaders and then refusing to employ them in a military rebellion. Although he had responded favorably to Jesus' teaching, he could not follow a teacher who was not prepared to lead a war. So he parted company with Jesus, and as a disillusioned disciple, he retaliated against Jesus by turning Him over to the proper authorities — not so much because he loved money but because he loved his country and thought Jesus was delaying the movement that would free Palestine from the Romans. Another interpretation is that Judas was convinced that Jesus was the Messiah, but Judas was impatient. He acted as he did, therefore, in an attempt to force Jesus to take the stand Judas anticipated. Such attempts at historical understanding are, of course, tentative. It is not possible to trace with certainty the detailed course of events, nor to distinguish with confidence the background and motivation of Judas. The NT itself offers us an important theological interpretation, and it is in terms of this interpretation that our assessment of Judas is properly to be made.

G. W. BUCHANAN

JUDE jōōd [Gk. *Ioudas*]. A man usually said to be a brother of Jesus and author of the Epistle of Jude. *See* JUDE, EPISTLE OF.

JUDE, EPISTLE OF. The Epistle of Jude belongs in popular parlance to the classification of the General Epistles. Strictly speaking this is a misnomer, for the contents of the Epistle reflect a specific circle of readers. The author states that he switched themes in view of the perils confronting his readers. Instead of writing on "The Faith of our Fathers," he issues a broadside on "Avoiding Dangerous Heretics."

II. Author and Date
III. Jude and 2 Peter
IV. Heretics
V. Apocalyptic Sources
VI. Canonical History

I. Contents.–A demoralizing faction (vv. 4, 12) has slipped into the congregations that come under the writer's concern (v. 4). They are arrogant in their theological pretensions, boast of visions, and revile angelic beings (vv. 8-10); they impose on the credulity of the unsuspecting and create divisions by their stratification of the church membership (vv. 16, 19); they are self-centered, utilize religion as a spur to their own lusts (vv. 4, 8, 15f.), and leave in their wake desolate disappointment (v. 12).

To sharpen the picture of their deadly character, the writer draws heavily on two sets, three each, of OT examples. In the first group (vv. 5-7) he places (1) the murmuring Israelites, who were left to die in the wilderness (Nu. 14); (2) the angels who mingled with the daughters of men and produced a race of giants (Gen. 6:1-4; cf. 1 En. 10:4ff.); (3) Sodom and Gomorrah (Gen. 19). In the second group (v. 11) he refers to (1) Cain, according to late Jewish tradition a type of the sensualist and skeptic who has little regard for higher things; (2) Balaam, who misled the Israelites into idolatry and adultery (Nu. 25:1ff.; 31:16; cf. Rev. 2:14), and who in rabbinic tradition is the father of libertinists, traitors, and false teachers; the emphasis on Balaam's thirst for gain suggests the greed of the false teachers; (3) Korah, the rebel who challenged Moses' authority (Nu. 16), a type of the false teachers who refuse to recognize the authority of the duly constituted leaders in the congregations.

The presence of these false teachers, says Jude, should occasion no surprise. In line with the later Jewish view that everything that happens to Israel has been anticipated long before by God (cf. Ps. 56:8 [MT 9] and Isa. 37:26), the writer affirms that the judgment of these wicked deceivers has been duly prophesied (v. 4), with an apparent allusion to pseudepigraphical passages such as 1 En. 48 and 108. God's people are not to panic, but to cling to the faith as once delivered by the apostles to the saints (vv. 4, 17, 20). In contrast to the explicit statement of v. 4 regarding a written prophecy, v. 18 takes cognizance of a unanimous oral tradition stemming from the apostolic circle concerning the coming of false teachers (for similar statements see Acts 20:29f.; 1 Tim. 4:1-3; 2 Tim. 3:1-5; 2 Pet. 3:3). Against this opposition the Christians are to stress (1) praying in the Spirit (cf. Rom. 8:15f.; Eph. 6:18); (2) keeping themselves in the love of God, presumably a directive to ponder the prior love of God (cf. Rom. 5:8), but also an encouragement to avoid immorality, which separates Christians from this love; (3) awaiting the coming of the Lord Jesus Christ. The question of the Christian's personal attitude toward the victims of the false teachers is obscured by corruptions in the text of vv. 22f., which leave unclear whether two (AV and NEB) or three (RSV) groups are meant. If the triad is accepted, the writer is saying that the Christians are to (1) show mercy to those who are in doubt (not as AV renders, "making a difference"); (2) snatch others from the brink of disaster (cf. Am. 4:11; Zec. 3:2), and (3) avoid completely those who have fallen irrevocably under the spell of the false teachers (the second part of v. 23 makes little sense as it stands, and there is much to be said for the view that a word suggesting excommunication is called for; cf. 1 Cor. 5:5).

The doxology (vv. 24f.) underscores the theme notes of the Epistle. God alone can bring believers safely through their hazardous environment. He is their Savior through Jesus Christ. The libertinistic false teachers reject Christ's authority, but for the Christian He is Lord, now and forever.

II. Author and Date.–The writer of this tract lays such emphasis on the age of the apostles as a matter of history (vv. 3, 17) that it is difficult to associate him with the apostle Judas mentioned in Lk. 6:16; Acts 1:13 (cf. Jn. 14:22), even if we were to render in these passages "Judas brother of James," an unlikely translation. He calls himself simply "Jude, slave of Jesus Christ" and "brother of James." The latter designation appears to echo Mk. 6:3, where Jesus is called the "brother" of James and Jude. Of the life of this Jude we know little except for a hint in Eusebius (*HE* iii.19, 20.1-7; 32.5f.), who records an interesting tradition from Hegesippus regarding two grandsons of Jude. According to the account, Domitian feared an

insurrection among the Jews and ordered all descendants of David to be put to death. Informers dragged Jude's grandsons before the emperor's tribunal, but they were released after the emperor noted their calloused hands and peaceful intentions. Thereafter they became leaders in the Church and died during Trajan's reign.

This story has complicated inquiry into the authorship of the tract, because it seems to suggest that Jude the grandfather must have died two to three decades before the trial took place, since the grandsons, now grown men, were the only surviving members of the family. But the argument is not conclusive, since we know next to nothing concerning the details of Jude's life and he may well have outlived his own son. If that is the case, the references to the apostolic era as a past phenomenon (v. 17) and to the "most holy faith" (v. 20) "once and for all delivered" (v. 3) would come naturally from Jude's pen, if he were writing in the closing years of his life, perhaps A.D. 70-80. On the other hand, if the words *adelphós dé Iakōbou* are a gloss, one cannot ignore the possibility that an otherwise unknown Jude held in esteem among a circumscribed group of Christians is to be held responsible for this little document. The recipients, as Streeter pointed out, would experience no difficulty in recognizing the writer of a letter sent by courier. The gloss, then, which must have been added very early, inasmuch as all MSS include it, represents either a scribe's honest mistake in identification or propaganda for canonical authority by associating the letter with a venerable link between the apostolic age and the later generations of Christians. A date anywhere in the last quarter of the 1st cent. or first decades of the 2nd cent. is feasible under this hypothesis.

Another suggestion is that a pseudonymous writer has put on the mask of Jude the Lord's brother. The words "brother of James," if they are his, would preclude any mistake regarding the writer's assumed role. If the words were added later, they suggest that the Epistle was known to be pseudonymous. The chief objection against pseudonymous authorship is the alleged obscurity of Jude. It should be noted, however, that our knowledge of Jude's activity in the Church, as was observed earlier, is extremely fragmentary, and that the little evidence we do possess in the accounts previously cited from Eusebius suggests that the family of Jude was significant in some Christian circles. Again, a pseudonymous writer who wished to call his generation back to their doctrinal senses might have utilized Jude's relative obscurity, if such it was, precisely because he required someone who was not himself an eminent apostolic voice but yet enjoyed sufficient prestige to mediate that authority to the writer's own generation. Dominical associations, together with the guarantee of "James," champion of orthodoxy, would have appeared to the author sufficient to achieve his purpose. Those who think the indications of a late date are a serious obstacle to any view that dates the letter earlier than the last decade of the 1st cent. find the hypothesis of pseudonymous authorship attractive. The *terminus ad quem* depends in some degree on the view one takes of the relation between Jude and 2 Peter.

III. Jude and 2 Peter.—Dependence of 2 Peter on Jude is suggested by the following considerations: (1) Jude is intelligible without 2 Peter, but the reader of 2 Peter requires Jude as a commentary. Thus, a knowledge of Jude 9 is presupposed by the writer of 2 Pet. 2:11, which apart from its parallel in Jude would be one of the most enigmatic sentences in the NT. Nor is the obscurity here in 2 Peter due to its alleged "prophetic character," for the story concerning Michael and the devil was current at the time of both writers. Note also how 2 Pet. 2:1 utilizes Jude 5 with its references to the "people of Israel," but eliminates the judgment pronounced on them in the wilderness; 2 Pet. 2:4 presupposed acquaintance with Jude 6; *hoútoi dé* comes rather abruptly in 2 Pet. 2:12, but fits comfortably in Jude 10; and *hymōn* (2 Pet. 3:2) is a clumsy underscoring of Jude 17.

(2) Jude's style is strikingly vigorous and clear compared with the more labored and cloudy rhetoric of 2 Peter (compare Jude 4 with 2 Pet. 2:3 and Jude 7 with 2 Pet. 2:4).

(3) It is more likely that the writer of 2 Peter would include Jude in his document than that Jude should merely reproduce in its essentials 2 Pet. 2. Moreover, if Jude had wished to accent the fulfillment of Petrine prophecy we would expect him to reproduce Peter's wording more precisely. It is often asserted in defense of the priority of 2 Peter that it would have been quite natural for Jude to copy from 2 Peter since his document indicates free use of other sources. Yet, while we do not have verbal correspondence with 2 Peter, Jude's use of apocalyptic literature is in the main much freer and more allusive than his alleged use of 2 Peter. It has also been stated that the picture painted in Jude is much darker and more sinister than in 2 Peter, but compare 2 Pet. 2:2f. with Jude 4 and the examples in 2 Pet. 2:6-8 with Jude 7, and note 2 Pet. 2:14. In fact, the picture in 2 Peter is vitriolically etched in comparison with the less bombastic prose of Jude.

Defenders of the priority of 2 Peter also stress the prophetic character of the letter, and since Jude makes allusion to "prescribed" heretics (v. 4) it is assumed that 2 Peter is the source. It is true that 2 Pet. 3:3, 17 look to the future, but 2:12-22 (esp. vv. 15, 17) assert that the heretics are already present. Moreover, it is not clear why Jude fails to make use of the reference to the scoffers mentioned in 2 Pet. 3, who must certainly have multiplied at the alleged later period. As will be seen below, Jude frequently refers to apocalyptic writings. These documents are filled with predictions of judgment for the wicked, and it is probably to these writings that Jude 4 refers.

If Jude is dependent on 2 Peter, and if 2 Peter, as most scholars hold, is to be assigned to the end of the 1st cent., a date somewhat later for Jude would take account of the survivors of the generations that had heard the apostles (v. 17).

IV. Heretics.—Identification of the heretics mentioned in the Epistle is a question of great importance for the historian of the early Christian era. The precise relationship of the heretics to the Christian community is not clearly spelled out, but they appear to have gained illegal admittance into the Christian community (v. 4) by ingratiating themselves with flattery and bombastic pretensions (v. 16). Ostensibly they identify themselves with the Christians in their most intimate gathering, the agape (v. 12), only to create divisions (v. 19) and confusion (v. 22). They refuse to accept direction, preferring to "shepherd themselves" (v. 12). They claim special visions, and speak disparagingly of angelic powers (vv. 8-10), apparently with a view to demonstrating their superior "spiritual" status. Their licentiousness (vv. 10, 16, 18), an evident outgrowth of this assumed superiority, only proves, however, that they are deficient in "spirit" (v. 19). Since Gnosticism was in the air also during the time when 1 Corinthians and Colossians were written, it would be an egregious blunder to locate the heretics mentioned by Irenaeus or other patristic writers in the generalized invectives hurled by Jude. The nature of the cosmological speculations and the christological viewpoints of Jude's heretics cannot be determined with any degree of certainty. The picture presented here rather reflects the com-

mon conflict between orthodoxy and heresy that we find depicted also in the Johannine letters, the Pastorals, and 2 Peter, and that ultimately led to solidification of the role of the bishop as theological arbiter.

V. Apocalyptic Sources.–The comparatively large percentage of references to noncanonical literature of an apocalyptic nature calls for special comment. The Ethiopic book of Enoch is one of the author's favorites. Reference has already been made to his use of 1 En. 48 and 108 (v. 4). The most obvious excerpt is found in vv. 14f., which parallels verbatim two-thirds of the Greek wording as found in the Egyptian MS discovered 1886/87 in Akhmim. The introductory phrase, "Enoch, the seventh from Adam" appears in 1 En. 60:8, "My grandfather was taken up, the seventh from Adam." 1 En. 10:4-20; 12:4f.; 54:1-5, etc., find a clear echo in the reference to the arrogant angels who mingled with the daughters of men (Jude 6). The story is reminiscent of Gen. 6:1-4, and the theme of judgment is sounded in Isa. 24:21f., "On that day the Lord will punish the host of heaven, in heaven. . . . They will be gathered together as prisoners in a pit; they will be shut up in a prison, and after many days they will be punished." From a similar reference to the fallen angels Jude derives his description of the "wandering stars, to whom is reserved the blackness of darkness forever" (Jude 13; cf. 1 En. 18:11–19:3). Augustine (*Civ. Dei* xv.23) and Chrysostom (*Hom. 22 in Gen.*) represent the few patristic voices who protest against this interpretation of Gen. 6:1-4 in Enoch, complaining that it makes of Moses' account a "baseless fable."

We have it on the authority of Clement of Alexandria, Origen, and Didymus that Jude employed for v. 9 a second apocryphal writing, the Assumption of Moses. The known fragments of this apocryphal writing do not include the account, but Jude 12-14 appear to echo Asm. Mos. 7, and Jude 16 has striking parallels to Asm. Mos. 5:5, "flatterers," and 7:9, "boastful."

VI. Canonical History.–Jude's heavy use of apocryphal writings retarded its canonical status in some quarters, but its relation to 2 Peter indicates the high prestige it enjoyed elsewhere. Did. 2:7 appears to echo Jude 22; and the distinctive greeting of Jude, as compared with Pauline letters, finds repetition in Polycarp's Epistle to the Philippians and the Martyrdom of Polycarp. The Muratorian Canon (A.D. 170-190) reflects a secure status in Rome: "Epistola sane Iudae et superscripti Iohannis duae in catholicis habentur" ("Further an epistle of Jude and two with the title [or: two of the above mentioned] John are accepted in the catholic Church" [H-S, I, 44f.]). In Alexandria, Clement refers to it in his *Paedagogus, Stromateis,* and *Hypotyposes*. Tertullian indicates that Carthage is familiar with the document, and the letter exists in the Old Latin version. After 200 the letter declined in importance, especially in Africa; and its absence in the Syriac canon marks its insecure status in some Eastern quarters. Eusebius, with some perplexity of terminology, observes that it is considered "spurious" (Gk. *notheúō*) by some and "disputed" (*antilégō*) by others (*HE* ii.23.25; 25.3; vi.13.6; 14.1). In the 4th cent. Jude overcame most of its opposition, and was listed without qualification in Athanasius's festal letter, A.D. 367.

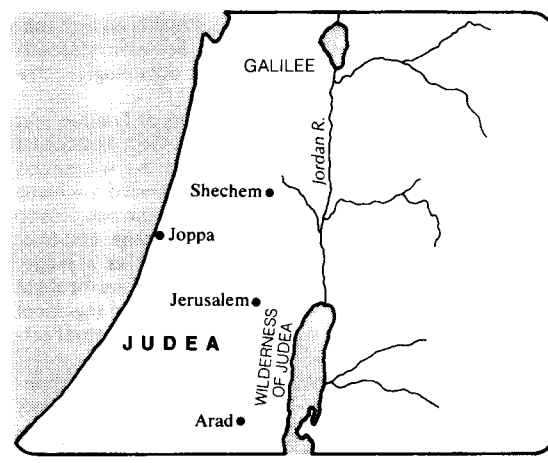
F. W. DANKER

JUDEA jo͞o-dē'ə [Gk. *Ioudaia,* for *ioudaía gē* or *ioudaía chōra,* "Judean land/region"]; AV, NEB, JUDAEA, JUDAH. The Greek and Roman equivalent of "Judah." Since the territory of Judah was approximately all that remained of the northern and southern kingdoms at the time of the Babylonian Exile, the exiles, particularly those who returned, were called "Judeans," shortened to "Jews," hence the name of the postexilic province (cf. Heb. *yᵉhûḏâ,* Ezr. 9:9).

The Greek term is found first in Tob. 1:18, "any who came fleeing from the land of Judea" (*ek tḗs Ioudaias*), referring to the time of Sennacherib, but the story is from the Babylonian or the Persian period, and the Greek is probably a translation from Hebrew, in the light of Qumrân evidence. For the extent of Judea = Judah, *see* JUDAH, TERRITORY OF V. There is evidence, however, of a larger Judea.

Strabo (*Geog.* xvi.2.21), in discussing the term "Coelesyria," defines Judea as "the interior above [i.e., inland from] Phoenicia, as far as the Arabians, between Gaza and Antilibanus," which would include Samaria and Galilee as well as Judah. Luke seems to use the term with approximately the same meaning (Lk. 4:44, where some MSS have "Galilee"; 23:5 ["throughout all Judea, from Galilee even to this place," where "from" must be inclusive and not exclusive]; Acts 2:9; 10:37 [cf. Lk. 23:5]; etc.). In Acts 1:8, however, "Judea" is distinguished from "Samaria," possibly indicating that Luke was following a tradition of the *ipsissima verba* of Jesus. Matthew (4:25), Mark (1:5), and John (4:3) appear to use "Judea" in the more restrictive sense.

Josephus (*BJ* iii.3.5 [51-58]) places the northern border of Judea at Anuath Borcaeus, identified as Berkit, 14 km. (9 mi.) S of Shechem, therefore approximately the same as the northern border of the territory of Judah. The southern border he locates at "a village on the Arabian frontier, which the local Jews call Iardan." This has been identified as Arad, 26 km. (16 mi.) S of Hebron. The width is described as "from the river Jordan to Joppa." Jerusalem is located "at its very center" — which is geographically not accurate and therefore probably to be



interpreted figuratively (cf. Jub. 8:19; T.B. *Sanhedrin* 37a). Josephus, however, continues, "[Judea] slopes down towards the coast on a ridge extending as far as Ptolemais" (§ 53), and he divides the land into "eleven districts." He names nine (including Pella) and as an afterthought says, "To these must be added Jamnia and Joppa . . . and lastly the territories of Gamala, Gaulanitis, Batanea, and Trachonitis, which form, moreover, part of Agrippa's kingdom" (§§ 55f.). Unless he has lost his train of thought, it would appear that Josephus, too, has a larger Judea, extending even beyond Galilee, equivalent to the Roman province of Judea after A.D. 44.

The wilderness of Judea (Mt. 3:1; cf. Mk. 1:4; Lk. 3:2), where John the Baptist began his preaching ministry, is probably the wilderness of Judah, i.e., the barren land between the central mountain range and the Dead Sea, approximately between the limits of Jerusalem and Hebron. For a discussion of the theory that John was raised at Qumrân, see W. S. LaSor, *The Dead Sea Scrolls and the NT* (1972), pp. 142-153. W. S. LASOR

JUDGE [Heb. *šōpēṭ* (Gen. 18:25; 19:9; Ex. 2:14; etc.), *pālîl* (Ex. 21:22; Dt. 32:31; Job 31:11), *pᵉlîlî* (Job 31:28), *dayyān* (1 S. 24:15 [MT 16]); Aram. *dînāyē'* (Ezr. 4:9), *dayyān* (Ezr. 7:25); Gk. *kritḗs, dikastḗs, krínō*]; AV also DINAITES (Ezr. 4:9); NEB also "assessment" (Ex. 21:22), "mere fools" (Dt. 32:31), "law" (Job 31:11, 28). On Ezr. 4:9, *see* DINAITES. The meaning of *pālîl* and *pᵉlîlî* is obscure (see *THAT*, II, *s.v. pll* [H.-P. Stähli]); in Dt. 32:31 the NEB apparently emends Heb. *pᵉlîlîm* to *'ᵉlîlîm*, "fools," on the basis of LXX *anoētai*, "fools" (see the comms.). By far the most common Hebrew term for "judge" is *šōpēṭ*, a participle of the verb *šāpaṭ* meaning "decide, make a judgment." It is used for persons appointed to decide matters of law or justice, for God, and for the leaders of Israel in times of need during the premonarchial period. The meanings of the words built on the root *dyn*, as used in the OT, are generally the same as those of *šōpēṭ*, although only *dyn* seems to have had specifically forensic or juridical associations in its earliest known forms. See *TDOT*, III, *s.v.* "dîn" (Hamp, Botterweck).

The most common term in the NT is Gk. *kritḗs*, which, like Heb. *šōpēṭ*, can refer to the "judges" of premonarchial Israel (Acts 13:20) and to God (He. 12:23; Jas. 4:12; 5:9; cf. also 2 Tim. 4:8; Acts 10:42), as well as to officials who decide cases of law (e.g., Mt. 5:25 par. Lk. 12:58). John (8:50; 12:48) and Paul (Rom. 2:1) use forms of the related verb *krínō*. These words originally have to do with making a decision. The term used in Acts 7:27, 35 (OT quotation); Lk. 12:24 var., *dikastḗs*, is based on a root that is more definitely related to rendering justice. Precise understanding of these terms and of the OT terms, however, depends more on their use in context than on etymologies. *See also* JUDGING.

In the early patriarchal times the heads of families and the elders of the tribes were the judges (cf. Gen. 38:24), and their authority was based on custom. In the wilderness Moses alone was the judge until Jethro suggested a scheme of devolution. On his advice Moses divided the people into groups of thousands, hundreds, fifties, and tens, and over each group a wise and good man was set as a judge. Thereafter only the most important cases were brought before Moses (Ex. 18:13-26; Dt. 1:9-17). This arrangement ceased to be practicable when the children of Israel settled down in Canaan.

Although David took counsel with the heads of thousands and hundreds (1 Ch. 13:1), it need not be assumed that this was a continuation of the plan adopted by Moses. Probably the local courts were not organized till the time of David. In the days of the judges justice was administered by those who had risen by wisdom or valor to that rank (Jgs. 4:5; *see* JUDGES, BOOK OF). An organized circuit court was established by Samuel, who judged cases himself, and also made his sons judges (1 S. 7:16; 8:1). After the monarchy was instituted, the king tried all cases, when requested to do so by the wronged person, in the palace gate (1 K. 7:7; Prov. 20:8). There was no public prosecutor (2 S. 14:4; 15:2-6; 1 Ch. 18:14; 1 K. 3:16; 2 K. 15:5). Under David and Solomon there were probably local courts (1 Ch. 23:4; 26:29). Jehoshaphat organized a high court of justice (2 Ch. 19:8). The prophets often complained bitterly that the purity of justice was corrupted by bribery and false witness (Isa. 1:23; 5:23; 10:1; Am. 5:12; 6:12; Mic. 3:11; 7:3; Prov. 6:19; 12:17; 18:5). Even kings sometimes pronounced unjust sentences, especially in criminal cases (1 S. 22:6-19; 1 K. 22:26; 2 K. 21:16; Jer. 36:26). An evil king could also bend local courts to do his will, as may be gathered from the case of Naboth's vineyard (1 K. 21:1-13).

The first duty of a judge was to execute absolute justice, showing the same impartiality to rich and poor, to Jew and foreigner. He was forbidden to accept bribes or to wrest the judgment of the poor (Ex. 23:6-8; Dt. 16:19). He must not let himself be swayed by popular opinion, or unduly favor the poor (Ex. 23:2f.).

The court was open to the public (Ex. 18:13; Ruth 4:1f.). Each party presented his view of the case to the judge (Dt. 1:16; 25:1). Possibly the accused appeared in court clad in mourning (Zec. 3:3). The accuser stood on the right hand of the accused (Zec. 3:1; Ps. 109:6). Sentence was pronounced after the hearing of the case, and the judgment was carried out (Josh. 7:24f.). The only evidence considered by the court was that given by the witnesses. In criminal cases, not fewer than two witnesses were necessary (Nu. 35:30; Dt. 17:6; 19:15; cf. Mt. 18:16; 2 Cor. 13:1; 1 Tim. 5:19). In cases other than criminal the OATH was applied (Ex. 22:11; cf. He. 6:16). The lot was sometimes used (Josh. 7:14-18), especially in private disputes (Prov. 18:18), but this was exceptional. When the law was not quite definite, recourse was made to the divine oracle (Lev. 24:12; Nu. 15:34). P. LEVERTOFF

JUDGES, BOOK OF [Heb. *šōpᵉṭîm*; Gk. *kritai*].

I. Title
II. Place in the Canon
III. Contents
IV. Chronological Problems
V. Sources and Authorship
VI. Relation to Other Biblical Books
VII. Text
VIII. Literary Importance
IX. Religious Message

I. Title.–The title is derived from the framework of the book, e.g., 2:17-19; 11:27. Even the verbal use of the root *špṭ* is, according to some scholars, mainly encountered in the framework (namely, 3:10; 4:4; 10:2f.; 11:27; 12:7-9, 11, 13f.; 15:20; 16:31). There is, however, doubt whether 4:4 should be placed in the framework. It is also uncertain whether the parts with chronological information should be regarded as framework. In spite of this, certain scholars regard the title as late and hold the opinion that the word *šōpēṭ* does not cover the activities of especially the so-called major judges. Oscar Grether proposed a better title for this group of judges, namely, *môšî(a)ʿ*, "deliverer." This is unnecessary in light of the meaning of *šāpaṭ*, as is illustrated by tablets discovered at Ugarit and Mari. From this material it is clear that the root can mean "to govern" as well as "to judge." The title can thus be applied not only to the minor judges, but also to the major military

leaders. It is also unnecessary to regard the minor judges as judicial sages only. The short notes in the book of Judges on the minor judges are too fragmentary to base far-reaching conclusions on them. Even so, the title *šōpēṭ* covers their activities as well as those of the major group. Since this stem was used in early Northwest Semitic as a title, we may assume that the title of this book is probably very old, and may even go back to the time of the judges.

II. Place in the Canon.–In the English Bible Judges is placed after Joshua as the seventh book of the OT. It takes the same place in the Hebrew Bible, where it is placed as the second book of the Former Prophets, which consist of Joshua, Judges, Samuel, and Kings; the Latter Prophets consist of Isaiah, Jeremiah, Ezekiel, and the Twelve Minor Prophets. The Greek Bible has a different division. Other historical books like Chronicles, Ezra, Nehemiah, etc., follow Kings, while one of the Megilloth, Ruth, is placed after Judges. This division is also followed by modern translations.

III. Contents.–A. First Introduction (1:1–2:5). These verses recapitulate the events of the Conquest of western Palestine. Here, however, it is emphasized that Israel did not succeed in expelling the enemy from the country (1:27-36), a failure regarded as a breach of promise and a cause of permanent weakness (2:1-3). The most common opinion among scholars is that this part of Judges stands in contrast to the narrative of the conquest of Palestine in Joshua. The difference is that the stories in Joshua refer to extermination and to the successive wars of an organized national army, while in Judges the impression is created that the country was taken by separate wars and individual tribes.

Various solutions are proposed to solve this problem. The best is that of Y. Kaufmann, who points out that in Josh. 1–11 the Hebrews fought in order to destroy and exterminate, not to occupy by immediate settlement. After certain cities were demolished and the central Canaanite forces were destroyed, the tribes went back to their allotted territories to clear the enemy from them. This is described in Jgs. 1.

B. Second Introduction (2:6–3:6). Reference is made to the apostasy of Israel and the misfortunes that befell them. They were chastised by foreign nations. If they repent and turn to Yahweh, He will save them from their oppressors. It is, in other words, a typical Deuteronomic trend.

C. General History of the Judges (3:7–16:31). A longer history is given of some of the judges, such as Deborah and Barak, Gideon, Jephthah, and Samson, and short notes on others such as Shamgar, Tola, Jair, Ibzan, Elon, and Abdon. There are also longer notes on Othniel and Ehud. In the history of Gideon is also incorporated a long chapter on the history of Abimelech and the failure of his kingship. The events are described as follows:

1. Othniel (3:7-11). He delivered Israel from the hand of the enigmatic Cushan-rishathaim.

2. Ehud (3:12-30). This Benjaminite delivered Israel from servitude to Moab by killing Eglon their king.

3. Shamgar (3:31). A very brief note on him does not even mention that he was a judge or of Israelite stock. According to some, the addition to his name "ben Anath" may suggest that he was a Canaanite, or that he was from the nomadic group of the Haneans, well known from the Mari Letters. He fought against the Philistines, which must have taken place at the beginning of the southern migration of the sea-peoples (cf. also 5:6, which suggests a very old date for the activity of Shamgar).

4. Deborah and Barak (4–5). Chapter 4 is written in prose and ch. 5 in verse. Scholars are unanimous that the so-called Song of Deborah is one of the oldest pieces of OT poetry, to be dated *ca.* 1125 B.C. A common opinion, based on certain discrepancies between ch. 4 and ch. 5, is that ch. 4 is much later. These differences exist because ch. 4 was written much later than ch. 5 and used a different strand of tradition. If the poetical form of ch. 5 is taken into consideration it must be conceded that the problem is not insoluble. Albright points out that songs of victory were used extensively in the Near East at the end of the 2nd millennium B.C. It is also very important to note that the victory of Ramses II is described both in prose and poetry. This is a clear parallel to the biblical account in Jgs. 4 and 5 (*see also* DEBORAH 2).

Mt. Tabor as seen from the plain of Esdraelon. The armies of Deborah and Barak gathered at Mt. Tabor to fight Sisera's troops (Jgs. 4) (W. S. LaSor)

5. Gideon and Abimelech (6–9). There was a severe oppression by the bedouin of various tribes including the Midianites and Amalekites. Gideon was called as judge to deliver his people. Significantly, the religious position of the family of Gideon was strongly influenced by the service of Baal, which points to a decay of the Yahwistic religion; only a direct call by the Lord saved the situation.

Chapter 9 tells the story of Abimelech, who tried unsuccessfully to start the first Israelite kingdom. He shed the blood of seventy brothers and received the curse of the only one left. After some success in overthrowing a revolt by what may have been a Canaanite group in Shechem, he was to his shame killed by a woman in Thebez.

6. Tola and Jair (10:1-5). Short notes on these two judges are given. In the case of Jair his wealth is illustrated by the number of his sons. The expression Havvoth-jair means "camps of Jair." The word *hawwôṯ* is encountered in Ugaritic as well as in an Egyptian cognate from 2000 B.C., pointing to the antiquity of this expression.

7. Jephthah (10:6–12:7). An important part of the book of Judges is devoted to the history of Jephthah. This judge was despised by his own people because he was an illegitimate son of Gilead. Later he was called on to deliver Israel from the yoke of the Ammonites and other oppressing peoples. Some scholars distinguish two strands of tradition in this narrative. Noth, e.g., holds the opinion that the larger part of the story of Jephthah is an extension of, and a later insertion based upon, the short note in 12:7. Jephthah is then actually to be regarded as a minor judge, and a later redactor is said to have expanded the short note in 12:7 to a long story. There is in the narrative itself, however, no basis for this assertion.

8. Ibzan, Elon, and Abdon (12:8-15). Three short notes are included on these judges. Two of the names are attested in Ugaritic tablets, i.e., Abdon and, probably, Elon.

9. Samson (13–16). The history of Samson the Danite must be of great antiquity, because it describes the struggle between the Philistines and the Danites and Judahites. This was before the northern migration of Dan described in chs. 17–18. It was the beginning of a struggle with the

Philistines on a larger scale than before. The Philistines arrived in Palestine with the southern movement of the sea-peoples, probably at the beginning of Early Iron I (*ca.* 1200 B.C.).

10. Micah and the Levite (17–18). This story tells of the kidnapping of the hired Levite of Micah the Ephraimite by the Danites, who were on their way north to sack Laish (which they rebuilt on the same site and called Dan). The presence of the Levite in the Danite company explains the origin of the sanctuary at Dan.

11. The Outrage by the Benjaminites (19–21). The Benjaminites of Gibeah acted outrageously against the concubine of a Levite who sojourned in their city. In so doing they overthrew all principles of decency and the laws of hospitality. A war developed between the rest of Israel and Benjamin in which almost the whole of Benjamin was exterminated. By allowing the six hundred remaining Benjaminites to marry the women of Jabesh-gilead and abduct unmarried women during a festival at Shiloh, Israel enabled the guilty tribe to survive.

Chapters 17–21 stand in marked contrast to the rest of the book. In this part no judge is named, there is no common enemy to fight, and no danger threatens from outside. These chapters give an overview of the internal situation during the period of the judges, and the perversion and corruption of the time are contrasted with the peaceful times of the later monarchy. The author of this part was probably convinced that the monarchy of either David or Solomon was the only answer to such a corrupt situation.

IV. Chronological Problems.–The period of the judges extends from the death of Joshua to the death of Samson or the beginning of the activities of Samuel. The total of all the dates given in Judges is 410 years. But 1 K. 6:1 states that the temple of Solomon was constructed in his fourth year, 480 years after the Exodus. If we take 410 years and add the 40 years spent in the desert, then the years of Joshua, Eli, Samuel, Saul, and David, then add Solomon's years, a figure of approximately 599 years emerges, which is 119 years in excess of the 480 years given in Kings. Still another problem exists, for if we add 480 years to 957 (the fourth year of Solomon's reign) we get 1437, which is too early a date for the Exodus according to archeological evidence. The problem of the 480 years is solved if it is remembered that it is the result of reckoning forty years to a generation, for twelve generations. If we take twenty-five years for a generation we get the number 280, which, added to 957, gives 1237. This is fully in accordance with archeological results. But what of the 410 years according to the count in Judges? It is clear from certain parts of Judges that events happened simultaneously. If it is accepted that certain events were contemporaneous then it becomes difficult to draw any conclusions from the chronology of the book of Judges. Archeology has shown that *ca.* 1200 B.C. certain cities in Palestine were demolished. A flowering culture of Late Bronze was obliterated. The new developments of Early Iron I were of a lower culture than the preceding. The break is thus obvious and points to seminomadic groups in process of settling down. This evidence is clearly to be connected with the invading Israelite tribes. It is also the actual starting point of the book of Judges. The date of the activities of Samson is approximately 1100 B.C. The northern migration of the Danites happened after that. Thus, the book of Judges may cover a period from *ca.* 1200 to 1050. Another possible date in this book is given to the activities of Deborah and Barak, *ca.* 1125. This is the nearest we can come to any satisfactory chronology of Judges.

V. Sources and Authorship.–The greatest part of Judges is of considerable antiquity. The oldest part of the book is probably the poem of Deborah. The style of this poem is in accordance with the common style of poetry at the end of the 2nd millennium. Other parts were probably transmitted orally within certain Israelite families and tribes. It is quite possible that certain events were originally only of local importance, but later on, by oral transmission, they assumed national significance. The importance of these narratives cannot be overestimated, because this is the only historical material we have from a time in which documentary evidence is scarce. The value of the narratives is difficult to estimate, because in some instances they have been more carefully preserved than in others. Archeology gives no assistance in this problem.

These narratives are provided with a framework, but the date and background of this framework are problematic. Modern scholarship is apt to ascribe it to the activities of the Deuteronomic school. From certain parts it is clear that the style of the framework is analogous to that of the Deuteronomist. From other parts this is not clearly discernible. Y. Kaufmann holds the opinion that we must distinguish between an ancient Deuteronomist and a later one. The framework of Judges may be ascribed to the activities of the ancient Deuteronomist, who lived close to the events he described. There is, however, some difficulty with this view, for in 18:30 reference is made to the captivity of the land, which must be placed after the conquest of Tiglath-pileser III in 733/32 B.C. Furthermore, the whole idea of an ancient Deuteronomist is hypothetical and difficult to prove. We may safely assume that the ancient material of the book of Judges was arranged and annotated later than 732. It is unnecessary to ascribe all the religious policy or the political views in the book to the person(s) who produced the framework. Old material was arranged and molded into a unity with certain typical characteristics, e.g., interest in the role played by women in the critical moments of history (Jael, Deborah, the woman of Thebez, and Delilah). W. Beyerlin's view is that the framework was composed over a long period by various persons or groups, the latest of which is to be placed after the time of the Deuteronomist. Do we know the name of anyone who played a role in the formation of the book of Judges? The talmudic tradition says that Samuel wrote the book of Judges. This tradition is, however, without any historical basis. The book itself refers to the Song of Deborah as sung by her and Barak. Since Deborah was a judge of Israel and thus a sage, it is probable that she could have composed this song. This is the nearest we can come to naming the author of any part of the book. The final author is unknown, as is the case with many other OT books.

VI. Relation to Other Biblical Books.–As we have already seen, the material of the book is of two kinds, narrative and framework. In some places we can distinguish two threads of narrative. On this basis, some scholars endeavor to find the pentateuchal "sources" in the strands of tradition. The opinion is that J and E extend from the Pentateuch into Joshua and Judges. This standpoint is difficult to accept, because no clear-cut distinction can be made between the threads of narrative and there are no characteristics that enable us to identify them with the pentateuchal sources. As we have seen, the final composition of the book was probably undertaken by a member of the Deuteronomic school or someone even later.

The narratives of the book of Judges played an important role in later Israelite history and religion. This is shown, e.g., by Isa. 9:4, where reference is made to the day of Midian.

VII. Text.–It is of great importance that we have two different types of translation of Judges into Greek. Since 1705, when Grabe pointed out that there were two groups

of text-types, this problem has been tackled by various scholars. The difference of these two types is the further problem of their relation to the MT. The following solutions have been proposed.

(1) G. F. Moore held the view that A (Alexandrinus) and B (Vaticanus) are two different translations.

(2) Soisalon-Soininen, and others in modern times, hold the opinion that both the large text-types sprang from a common original (*Grundtext*).

(3) Fritzsche, following Schulte, takes B as the original text and A as secondary.

(4) Others hold that the division into two text-types is only a broad classification. We have, according to Katz, four different text-types. This suggests a new approach to the problem, which must be left in the hands of scholars in this field.

The LXX might be a reliable translation of Judges. It may be that in this case the B text is not ancient, but of a later origin than A.

Only fragments of this book were discovered at Qumrân. Because they are not yet published, their value is difficult to assess.

VIII. Literary Importance.–From a literary standpoint this book must rank high among the books of the OT and other literatures. We have a masterly victory song in ch. 5. Its figurative language is beautiful. It is obviously composed by a literary genius and it is impossible to accept that there was no literary tradition before this song was composed. Some parts, and certain words, are difficult to interpret because our knowledge of poetry of Northwest Semitic in the latter part of the 2nd millennium is fragmentary. With the discovery and interpretation of the Ugaritic tablets a new approach to this poetry became possible that has clarified it to some degree.

The stories of Judges are of a very high standard and are fully equal to the best short stories of the world. Some of them are filled with brutal humor, e.g., the death of Sisera at the hand of a nomadic woman Jael, and the extermination of a group of Philistines by Samson, who at the same time caused his own death. In beautiful figurative speech one of the few fables of the OT is preserved, namely, Jotham's comparison of Abimelech with a thornbush (9:7ff.). These stories are beautiful in the compact expression of the original Hebrew, and even in translation they are of special quality.

IX. Religious Message.–In its final composition the book brings a message of the government of God in the history of His people. Israel abandoned the religion of the Lord and was punished by the oppression of its enemies. A judge was called by the Lord to deliver the people and as charismatic leader of the nation he brought deliverance, but with the deliverance came a new call to return to the worship of Yahweh. These judges were under the direct guidance of the Spirit of the Lord.

The book emphasizes the need for a close walk with the Lord. A person's life is to be judged by his love for, or disobedience to, the Lord. We can regard the final verse of ch. 5 as the message of the whole book: "So let all thine enemies perish, O Lord: But let them that love him be as the sun when he goeth forth in his might." Sometimes the impression is created that the enemies of the Lord are going to triumph, but in the end the enemies are punished, and righteousness and love for the Lord save the day. An example is the cunning of Delilah and her apparent triumph over the judge of the Lord, Samson; finally all her cunning is broken by the later renewal of strength granted to Samson by the Lord, to pull down the pillars of the Philistine temple (ch. 16).

This book emphasized for Israel the might of Yahweh. But to the Canaanites also who lived alongside Israel its message spoke of the almighty acts of the Lord. By reading this book, or by listening to the stories in oral transmission, they heard that Yahweh, not Baal, was king.

F. C. FENSHAM

JUDGES, PERIOD OF.

I. Problems Concerning the Conquest
II. Political Situation
III. Religious Situation
IV. Civilization

Our main sources for the reconstruction of this period are the book of Judges, 1 S. 1–12, and certain archeological results. The oldest part of the book of Judges is the Song of Deborah. The prose narrative is based on ancient material, which gives us an adequate picture of the period. It is impossible, however, to write a history of this period. It is uncertain whether the events in the book of Judges are in a strict sequence. Furthermore, it is very difficult to get a clear picture of the relationship between the invading Israelites and the Canaanites.

I. Problems Concerning the Conquest.–Modern scholars often distinguish two strands of narrative concerning the Conquest; one is present in Joshua and the other in Judges. Joshua creates the impression that Canaan was conquered by the whole Israelite nation under the direction of Joshua. In Judges the impression is that the various tribes conquered their own allotted land. Y. Kaufmann (pp. 65f.) has argued convincingly that the difference between these two books is due to two different stages in the history of Israel. The part in Joshua refers to the beginning of the Conquest when united efforts were made to subject the Canaanites. Judges refers to a later period, after the death of Joshua, when every tribe had to conquer its allotted territory. It is, therefore, difficult to pin the Conquest down to a certain period. It is true that in certain parts of the Promised Land the Conquest was completed much later, even into the times of the monarchy.

The time of the judges was mainly a period of adjustment and adaptation to new circumstances. A seminomadic people arrived in a country with its own culture and institutions. In some cases the old culture of Canaan was regarded as taboo and was completely obliterated by using the ban (Heb. *ḥērem*). In other cases a kind of compromise was made wherein the new and the old were fused together. One of the great problems of OT study is to ascertain how far this fusion took place, and whether the product of the fusion was regarded as normative or as an unholy syncretism unacceptable to the pure religion of Yahweh.

Some scholars are ready to ascribe a considerable part of the Israelite culture reflected in the OT to Canaanite influence. On this view the Canaanite material was borrowed during the so-called peaceful conquest, or even in the period before the Conquest, when certain Israelite groups were in Palestine. Almost all such hypotheses are

built on conjecture and cannot be proved. The evidence of the OT is that some fusion took place, but this was regarded as sinful and due to the backsliding of unfaithful Israelites. In almost every case this fusion or idolatry took place in the religious sphere. The possible borrowing of other things like literary forms, legal policies, etc., is left out of the picture. It is the task of the scholar to try to trace possible borrowing and fusion back to their very roots, but this is a very difficult task. One thing is certain, namely, that the religion of Yahweh was kept distinct from the Canaanitish religions. A comparison with material from Ugarit and the Amarna Tablets shows that nothing of the high ethical monotheism of the Yahwistic religion existed in Canaan and Syria. In other fields, e.g., literary forms, some fusion and even borrowing are probable.

II. Political Situation.–The period of the judges coincided with a time of great political upheaval. The Hittites, whose highly civilized culture had exercised a stabilizing influence throughout the Near East, were overthrown by the southward surge of the sea-peoples. These peoples were possibly of Indo-European stock and included the Philistines, Cretans, and Lycians. In *ca.* 1186 they encountered the fleet of Ramses III king of Egypt, and were checked. Part of the remaining army settled down in Palestine, and was destined to dominate the history of that country for a very long period. The whole narrative of Samson shows the might and cunning of these peoples. In the period of the judges no one powerful country dominated the Near East. Egypt was becoming increasingly weak as a result of continual trouble with the new enemy. Just a few years before, Merneptah could boast that "Hatti [land of the Hittites] is pacified, Israel is laid waste" (the Egyptian scribe used the determinative for people and not for country with the word Israel, which may indicate that Israel had not settled); but after the arrival of the sea-peoples there was no domination by Egypt, only a few sporadic raids. The great Assyrian empire of Tiglathpileser I was also contemporaneous with the time of the judges (1112-1074), but this king was absorbed with problems from another quarter and penetrated only into northern Syria. The great powers were thus busy with their own problems and Palestine was left to itself.

The foreign enemies of Israel mentioned in Judges are Cushan-rishathaim of Aram-naharaim, various nomadic groups of the desert, the Moabites and Ammonites, and the Philistines. Cushan-rishathaim is an enigmatic figure and might be the king of a certain nomadic or seminomadic group that was on its way to settle in Mesopotamia and made a raid into Palestine. We must not underestimate the mobility of certain groups in those days. The Mari Letters show that nomadic groups moved hundreds of kilometers over a wide area. The trouble the peoples of the desert or children of the East caused Israel was to be expected. It was the same kind of trouble they had caused the Canaanites a century before. The nomadic groups on the western fringes of the Arabian Desert looked at the cultivated land of Palestine with covetous eyes. The camel was now tamed, so they could travel faster and farther than before. Asses were in use in Palestine but they proved to be of little use in warfare against the taller and faster camel, which could move deeper into the desert.

Israel was also troubled by its eastern neighbors Moab and Ammon, who settled down just before the arrival of the Israelites. Some indication of the culture of these peoples has been discovered by Nelson Glueck. He points out that they had their own typical pottery and built cities and fortresses of large dimensions.

The western enemies of Israel, the Philistines, were under the influence of Cretan culture. Their contact with this culture is best illustrated by the parallelism between Late Helladic III, Late Minoan III, and Late Cypriote III pottery and Philistine pottery. They have the following common features: looped spirals, concentric arches, half circles, scale patterns, checkers, rhomboid patterns, net patterns, Maltese crosses, and the bird or swan pattern. These peoples were also advanced in the use of iron, and the Israelites had to go to them to sharpen their ironware. They were organized into a pentapolis of city-states that formed close ties against a common enemy.

From time to time the political situation became dark and confused and Israel was enslaved for long periods. In spite of this, the Israelite group did not always act as a unity. Intertribal differences arose, e.g., Deborah taunted the indifference of tribes like Reuben, Gilead, and Asher (5:15-17). The town of Meroz was cursed for its lack of cooperation (v. 23). After the success of Gideon in expelling the enemy, Ephraim protested their not being invited to fight against the enemy (8:1) — and their failure to get the greater part of the spoil (v. 2). The same tribe protested also against Jephthah for the same reason, but a rebellion ensued in which a great part of Ephraim was killed (12:1-6). In chs. 19–20 the story is told of the united effort of Israel to punish Benjamin for its outrage. Here again almost the whole tribe was obliterated. It is obvious from these facts, and also from the narratives on the various judges, that the tribes would not unite against their enemies. A few local tribes were moved to action, while other tribes went on with their daily business. This situation was highly unsatisfactory from a political point of view. On the western side the Philistines were rapidly developing into a formidable force. Only a king who could bind the goodwill of all the tribes to his person could succeed in saving Israel from political servitude.

III. Religious Situation.–Here it is very important to distinguish the material of the narratives from that of the framework. We can deduce from the narratives that the transition from life in the desert to the agrarian way of life in Palestine was drastic. While wandering in the desert the Israelites worshiped Yahweh. They had entered into covenant with Him there, especially at Sinai. In Palestine they suddenly found themselves in an agrarian community where gods and goddesses of fertility were honored. A highly developed cult of Baal and Asherah existed that was based on the change of seasons and appealed to primitive human instincts. In the worship of Baal women were cultic prostitutes. The charm of this form of adultery and the enticements of this cult of nature and of fertility made Baal worship tempting to the ordinary man, especially to the ordinary Israelite who stood under the severe laws of Moses. The seductive joys of a higher culture and the death of religious leaders after the death of Joshua were causes of Israel's infidelity to the religion of Yahweh.

It is exactly this situation that is reflected in the book of Judges and in the first part of 1 Samuel. God came to Gideon almost as a stranger (6:13). All the acts of Abimelech, the son of Gideon, stood in contrast to the service of Yahweh (ch. 9). Even the Nazirite Samson acted in disobedience to the vow of his parents. His contact with Philistine women showed his weakness, which contrasted sharply with the Israelite ideal not to intermingle with paganism. The moral and religious decay is best illustrated, however, by the last five chapters of Judges. A Levite was abducted by the Danites and all the gods and images were also carried away. Another Levite's concubine was violated by the inhabitants of Gibea. All these cases point to spiritual demoralization within the Israelite community.

What about the pure Yahwistic religion during this pe-

riod? The religion of the fathers was preserved in certain circles, possibly among the elite. There was a center of religious activity, namely, the tent of meeting, and the twelve tribes were annually compelled to gather around it. There were priests who maintained the worship of Yahweh. It is even possible that certain charismatic offices were established like those of judge and prophet. In these circles the Yahwistic religion was preserved and enabled to adjust itself to the new circumstances in Palestine. The tribal community and their covenant with Yahweh guaranteed their safety and the preservation of their religion. In the ferment of this period a religion was born which produced great men in the history of religion.

IV. Civilization.–The Israelites came into Palestine as seminomads. After the destruction of various towns and cities the reoccupation was slow. This reoccupation marks the change from Late Bronze to Iron I. The Israelites settled down in the hill country first, for they could not conquer the plains on account of the strong chariot force of the Canaanites. The difference between the civilization of Late Bronze and that of Iron I is made plain by archeology. In Iron I we have extraordinary simplicity and a lack of cultural sophistication, as Albright puts it. The structure of the Israelite community was different from that of the Canaanites. The result was that the Hebrews did not occupy the patrician houses of the Canaanites in the same way as the Canaanites had done. The ground floor was not used as a storehouse and a place for slaves. The houses built in these times were primitively constructed in comparison with those during Late Bronze. A new kind of pottery started, quite different from the beautiful forms of Late Bronze.

Although the Israelite tribes did not maintain such a high standard in architecture or in the construction of pottery forms, their literary and religious achievements were of immense importance. They had special talent for literature, especially poetry. This is obvious from the Song of Deborah, for example. On the other hand, the highly ethical and moral religion of Yahweh dominated the history of Israel right from its beginning. This religion stands in contrast to the sensual religion of the Canaanites. The period of the judges is to be regarded as the starting-point of new literary forms, the first steps of a nation in the direction of an organized state, and the beginning of the development of religious and judicial institutions.

JUDGING; JUDGE (verb) [Heb. *šāpaṭ* (Gen. 16:5; 31:53; Ex. 5:21; etc.), *dîn* (Gen. 49:16; 1 S. 2:10; etc.), *nāḵar* ("judge amiss," Dt. 32:27); Aram. *dîn* (Ezr. 7:25); Gk. *anakrínō* (1 Cor. 2:15; 4:3f.), *diakrínō* (1 Cor. 11:31), *dokéō* (He. 4:1), *kríma lambánō* (Jas. 3:1), *hēgéomai* (1 Tim. 1:12), *krínō* (Mt. 7:1f.; 19:28; etc.)]; AV also "seem" (He. 4:1), "counted" (1 Tim. 1:12), CONDEMN (Rom. 14:22; Jas. 5:9), etc.; NEB also "be found" (He. 4:1), "try" (Jn. 18:31), CONDEMN (Acts 13:46), etc.; **JUDGMENT** [Heb. *mišpāṭ* (Ex. 28:15, 29; Lev. 19:15; etc.), *šᵉpôṭ* (2 Ch. 20:9), *šepeṭ* (Ex. 6:6; 12:12), hiphil of *qāhal*–'assemble' ("call to judgment," Job 11:10), *ʿēṯ*–'time' ("time of judgment," Job 24:1), *pᵉlîlîyâ* ("giving judgment," Isa. 28:7), *pāqaḏ* ("execute judgment," Jer. 51:52); Gk. *dikaíōma* (Rev. 15:4), *dokéō* (Mt. 26:66), *gnṓmē* (1 Cor. 1:10; 7:40), *kríma* (Mt. 7:2; Jn. 9:39; Acts 24:25; etc.), *krísis* (Mt. 5:21f.; 10:15; etc.), *krínō* (Acts 15:19; 21:25; Rev. 16:5; "pronounce judgment," 1 Cor. 4:5; 5:3), *dikaiokrisía* ("righteous judgment," Rom. 2:5), *sōphronéō* ("sober judgment," Rom. 12:3)]; AV also "think" (Mt. 26:66), DAMNATION (Jn. 5:29; Rom. 13:2; 1 Cor. 11:29), CONDEMNATION (Jn. 3:19; 5:24), etc.; NEB also "just dealings" (Rev. 15:4), "opinion" (Mt. 26:66), "thought" (1 Cor. 1:10), etc.; **MAKE JUDICIOUS** [hiphil of Heb. *śāḵal* (Prov. 16:23)]; AV "teach"; NEB "guide." For *bḗma,* "judgment seat," *see* JUDGMENT SEAT.

I. In the OT.–In ancient Israel and the ancient Near East judging and ruling were closely connected. The king was also a judge, so that it is not surprising that the most common terms for judging and judgment include the ideas of ruling or governing. Such is the case with *šp̣ṭ,* the root most frequently used for judging or judgment. The verb *šāpaṭ,* "decide, judge, govern," is occasionally translated "render judgment" (Zec. 7:9), and when the context indicates a negative connotation the NEB translates it "condemn" (Ezk. 23:45). In the niphal the verb means "enter into controversy, bring a charge" (Jer. 25:31). The RSV also translates the word as "rule," "punish," "defend." The related noun *mišpāṭ,* "judgment," is used in several ways. It refers to the act of deciding a case (Dt. 1:17), or the place of judgment (1 K. 7:7). When used with the verb *ʿāsâ* it refers to the execution of judgment (Ezk. 39:21). It also means "justice" (e.g., Mic. 6:8) and is usually so rendered by the newer translations. Another noun, *šᵉpāṭîm* (only in the pl.), occurs less frequently, mostly in Ezekiel, of acts of judgment (Ezk. 25:11). Identical in meaning is the noun *šᵉpôṭ,* which occurs only in 2 Ch. 20:9 and Ezk. 23:10.

Another root, *dîn,* is used much less frequently than *šp̣ṭ,* though with approximately the same meaning. The verb *dîn* means both "judge" and "govern." The noun means "judgment." In Est. 1:13 the noun refers to customary law and occurs alongside *daṯ,* meaning an edict of the king. The NEB translation "religion" is imprecise, although it should be understood that law and religion were interrelated in the ancient world.

Several Hebrew terms are translated "judgment" only once or twice by the RSV. In Ps. 119:66 *ṭaʿam,* "taste, judgment," refers to the discernment granted by God. In Jer. 51:52 *pāqaḏ ʿal* means "execute judgment" or "punish" (NEB) the idols. The RSV translates the verb *rîḇ,* "strive, contend," in Am. 7:4 as "judgment [by fire]." The passage is very difficult and has occasioned numerous emendations, none certain (see J. Morgenstern, *Amos Studies* [1941], pp. 59ff.). By redividing the text it could mean "a rain of fire" (D. Hillers, *CBQ,* 26 [1964], 221ff.). The verb *pillēl* in Ezk. 16:52 means "cause a reassessment" (E. Speiser, *JBL,* 82 [1963], 304). The sense is that Jerusalem was so evil that it made Sodom and Samaria look good. The cognate noun *pᵉlîlîyâ* in Isa. 28:7 refers to the "reasoning" that the priests could not give because of their drunken state. The NEB translation "hiccuping in drunken stupor" is too much of a paraphrase. In Isa. 32:4 no term for "judgment" occurs despite the RSV translation "good judgment." Here the NEB translation "understand and know" for *yāḇîn lāḏāʿaṯ* is preferable. The RSV understands *yaqhîl,* "call an assembly," in Job 11:10 to have a negative connotation, hence "calls to judgment." The AV preserves the ambiguity with "gathers together" but the NEB's "proclaims it" is unlikely. (See M. Pope, *Job* [*AB,* 2nd ed. 1973], p. 85.) In Prov. 18:1 *tûšîyâ* is a technical term used in wisdom literature to mean "sound, efficient wisdom." The RSV has "sound judgment," the NEB "competent [people]." Finally, in Job 24:1 the Hebrew has no term for "judgment," but the RSV understands *ʿēṯ,* "time," as "time of judgment."

There are several additional difficult passages. The NEB "flood" (*šṭp*) for "judgment" (*šp̣ṭ*) in 2 Ch. 20:9 assumes that there was a transposition of consonants.

This is possible, but unnecessary since "judgment" does fit the context. In Hos. 6:5 the NEB, without good reason, has omitted the last phrase "and thy (my?) judgment goes forth as the light." The difficult term *šaddîn* in Job 19:29 is often taken to be a relative particle, *šᵉ*, plus *dîn*, "judgment" (NEB "judge"). L. R. Fisher, however, suggested that it is a divine name, a variant spelling of Shaddai (see M. Pope, *Job*, pp. 147f.). Even more difficult is Job 36:17. The MT reading, "You are full of wicked judgment; judgment and justice take hold," remains unclear. (For discussion see Pope, *Job*, pp. 270f.) In Ps. 141:6, the RSV deletes Heb. *selaʿ* from the MT (cf. *BHS*), reading "those who shall condemn them." The AV retains the word ("judges . . . in stony places"), as does the NEB ("rock of justice").

II. In the NT. The word most frequently translated "judgment" in the NT is Gk. *krísis*, which is also the usual LXX translation of Heb. *mišpāṭ*. Often it refers to divine judgment (2 Pet. 2:4), sometimes on a special day of judgment (Mt. 10:15). Frequently the judgment implied is negative so that the translation "doom," "condemnation," or "punishment" best conveys the sense (Jn. 5:24, 29). It can also refer to human judgment, as in Jn. 7:24. Less frequent is *kríma*, referring to the decision of the judge. Usually it is used in an unfavorable sense, as in 1 Cor. 11:29 (AV "damnation") or Rom. 13:2 (NEB "punishment"). The very common verb *krínō*, "separate, distinguish, judge," is occasionally translated "pass judgment" (Rom. 14:3f., 10; etc.). Related terms are *diakrínō* (1 Cor. 11:31) and *anakrínō* (2:15; 4:3f. ["call to account" in 17:24]).

Several words in the NT are translated "judgment" only once or twice by the RSV. In Rev. 15:4 *dikaíōma* refers to the righteous acts (judgments) of God, and God's righteous judgments, *dikaiokrisía*, will be revealed on the day of wrath (Rom. 2:5). The verb *dokéō* means "think," and in Mt. 26:66 the question should be translated "What do you think?" or "What is your opinion?" (NEB). Similarly, *sōphronéō* refers to intellectual capacity, i.e., "be of a sound mind" (cf. "think your way to a sober estimate," Rom. 12:3, NEB). The noun *gnṓmē* is used of an opinion in 1 Cor. 7:40 and (unity of) thought or judgment in 1 Cor. 1:10.

The terms "damn," "damnation," etc., are found only in the AV, usually in contexts where the Gk. terms *apṓleia, kríma*, etc. imply an eternal judgment (e.g., 2 Pet. 2:3; Mt. 23:33; etc.).

JUDGMENT, DAY OF. *See* JUDGMENT, LAST.

JUDGMENT HALL. The AV translation of Gk. *praitṓrion* in Jn. 18:28, 33; 19:9; Acts 23:35. Elsewhere the AV renders "Praetorium" (Mk. 15:16) and "the common hall" (Mt. 27:27). The RSV renders "praetorium" in every case except Phil. 1:13, where it reads "praetorian guard." *See* PRAETORIUM.

JUDGMENT, LAST. The biblical concept that at the end of history Jesus Christ will return in glory to earth, the dead will be raised, and they, together with all the living, will be finally judged by Christ and assigned their eternal destiny in heaven or hell. This great eschatological event will be a visible, public, and universal judgment; Christ's glory and His victory over sin, death, and Satan will be fully manifest; righteousness will be exalted; the perplexing discrepancies of history will be removed, and the mediatorial reign of Christ will reach its ultimate triumph as believers inherit the kingdom prepared for them.

The expectation of the final judgment permeates the entire Scripture. It is referred to as "the day of judgment" (Mt. 10:15; 11:22, 24; 2 Pet. 2:9; 3:7), "the day of the Lord" (Am. 5:18-20; Zeph. 1:14; 1 Thess. 5:2; 2 Pet. 2:9; 3:7), "the day of the Lord Jesus" or "the day of Christ" (1 Cor. 1:8; 2 Cor. 1:14; Phil. 1:6, 10), "the great day" (Jude 6), "the day" or "that day" (Rom. 2:16; 1 Cor. 3:13; 1 Thess. 5:4; He. 10:25), and "the day of wrath" (Zeph. 1:15, 18; 2:2f.; Rom. 2:5; Rev. 6:17; cf. 1 Thess. 1:10).

I. Earlier Judgments.—The last or final judgment implies that there were earlier judgments. Basic is the first judgment of God, which brought condemnation and death upon all people and a curse upon the creation as a result of Adam's fall in Paradise (Gen. 2:16f.; 3:14-19; Rom. 5:12-14; 1 Cor. 15:21f.). This first judgment continues in effect throughout all of history; the only way of escape from the condemnatory judgment is through faith in Jesus Christ.

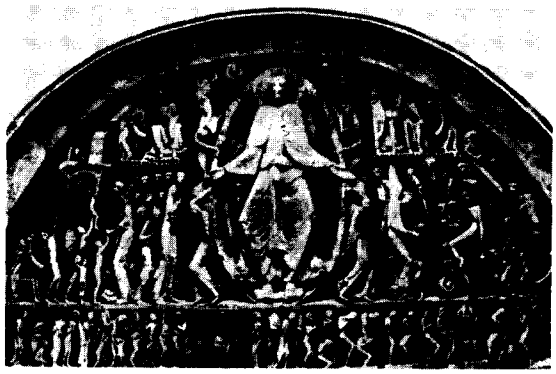
Other specific judgments upon individuals and nations have been issued by God in history, e.g., the judgment of Cain, the flood in Noah's days, the confusion of tongues at Babel, the destruction of Sodom and Gomorrah, the Babylonian captivity of Israel. Justification by faith is a pardoning judgment of God declaring the believer righteous through Christ. At death the person as a disembodied soul is admitted to heaven or hell, a judgment that anticipates the final judgment. The perplexing discrepancies observable in life where the righteous often suffer while the unrighteous prosper (Ps. 73; Mal. 2:7; 3:14f.) will be finally resolved at the last judgment.

II. OT.—Abraham appealed to "the Judge of all the earth" as one who does right (Gen. 18:25). In the Psalms God is referred to as the king who will judge the earth with righteousness (Ps. 96:10, 13; 98:9). Ecclesiastes concludes with the warning that God will judge everything done in public as well as in secret (12:4). Dnl. 12:1-3 predicts the final judgment in words paralleled in Rev. 20:11-15.

The OT references to the final judgment are sometimes interwoven with the first coming of Christ. The prophets repeatedly referred to "the day of the Lord [*YHWH*]" as a special day of judgment upon Israel's enemies as well as upon unbelieving Israel. Amos warned that only the true believers in Israel would experience this day as victory, and he warned of its terror and horror for the unbelieving (5:18-20; cf. Isa. 24-26). Malachi predicted that the great event would be preceded by the coming of the Messiah and His forerunner (3:1ff.; 4:1, 5f.).

III. NT.—NT references to the final judgment are more numerous and clearer in the light of the Messiah's presence. John the Baptist's preaching emphasized the coming judgment and urgently called for genuine repentance as the only way of escape (Mt. 3:7-10). A similar emphasis upon the approaching judgment was central in Jesus' preaching and some extensive references are given (Mt. 13:24-50; 24; 25:31-46). Faith in Jesus as the Messiah is the only way to escape the judgment of wrath. The presupposition of God's sending His Son is that people are already under condemnation (Jn. 3:17f.) and whoever rejects Christ remains under God's wrath (Jn. 3:36). Paul taught that the Gentiles as well as the unbelieving Jews are under the wrath of God's judgment (Rom. 1:18ff.; 2:1–3:20). Other references to the last judgment are found in 1 Cor. 3:10-15; 2 Thess. 1:5-12; Rev. 20:11-15.

IV. Christ the Judge.—God triune, Creator and lawgiver, is also judge of all the earth. All of God's attributes, but especially His omniscience, power, righteousness, and holiness, are displayed in judgment. While God is judge



The Last Judgment. Tympanum (ca. A.D. 1130-1135) by Gislebertus, Cathedral of St. Lazarus, Autun, France (Rosenthal Art Slides)

(Ps. 50:6; Eccl. 12:14; Rom. 2:3, 5; 6:3; He. 12:23; Jas. 4:12; 1 Pet. 1:17), the Father has given authority to judge at the last day specifically to Jesus Christ, the Mediator (Jn. 5:22, 27; Mt. 25:31ff.; Acts 10:42; 17:31; Phil. 2:10; 2 Tim. 4:1, 8). Authority to judge the nations is part of Christ's exaltation and is one of the crowning features of His kingship. The Lamb is also the judge (Rev. 6:16f.), and this contributes to the confidence and comfort of the believer on that day (1 Jn. 4:17). When Christ completes His mediatorial work, He will deliver the kingdom to the Father (1 Cor. 15:24, 28).

While Jesus' first coming was preeminently for the purpose of salvation (Jn. 3:16ff.), His judging function accounts for His claim that "for judgment I came into this world" (Jn. 9:39). Because the Father judges through the Son, "the judgment seat of God" (Rom. 14:10) and "the judgment seat of Christ" (2 Cor. 5:10) are interchangeable. Angels and believers are associated with Christ in the final judgment (Mt. 19:28; 25:31; 1 Cor. 6:2f.; Rev. 20:4).

V. Universal Judgment.–The last judgment will be absolutely universal and worldwide. All men, women, and children will be judged; the angels, both good and fallen, and also Satan will be judged. The (resurrected) dead and the living, the just and the unjust — all will stand before the judgment seat of Christ to give account of what they have done in life. The books will be opened (Rev. 20:12) and everyone will be judged by what he has done, including every idle word and secret thought (Eccl. 12:14; Mt. 12:36; Rom. 2:16; 1 Cor. 3:13; Rev. 20:12f.). The issue of judgment is sealed at death, for everyone will be judged "according to what he has done in the body" (2 Cor. 5:10). Believers shall also be judged, although Scripture states that they do not come into judgment, in the sense of the condemnatory judgment, for they have already passed from death to life (Jn. 5:24; 1 Jn. 3:14). Christ refers to the judgment as a separation of the sheep from the goats (Mt. 25:32f.) and wheat from the tares (Mt. 13:36ff.). No partiality will be shown, for God is perfectly just. What a person sows, he will also reap; God cannot be mocked (Gal. 6:7f.). Believers will inherit the kingdom and enjoy the full bliss of heaven while unbelievers "shall suffer the punishment of eternal destruction and exclusion from the presence of the Lord and from the glory of his might" (2 Thess. 1:9).

VI. Criterion of Judgment.–Christ's judgment will be just. The ultimate criterion of judgment is the revealed will of God. Since God created man perfect, all are held responsible because of Adam's sin (Rom. 5:13ff.; 1 Cor. 15:21ff.). Gentiles who have received only the revelation of God from Creation are guilty for their sinful suppression (Rom. 1:18ff.). But unbelieving Jews are doubly guilty, for they have had the additional revelation of redemption (Rom. 2–3:20). The whole world is held accountable, and all have sinned and fall short of the glory of God (Rom. 3:19-23). Although the final judgment will take account of the degree of revelation received (Rom. 2:12), acquittal comes only to those who believe in Jesus Christ. The announcement of the coming judgment is part of the gospel (Rom. 2:16) and constitutes the background for the urgency of preaching and the call to faith in Jesus Christ. The eternal destiny of the individual and the sentence in the last judgment is fixed at death and will not change during the intermediate state between death and the final judgment. Faith in Jesus Christ brings justification now and eternal life at the last judgment. For the unbeliever the appointed day of judgment is a day of wrath (Rom. 2:5), but for believers it is the day of redemption (Eph. 4:30; 1 Jn. 4:17) when they shall inherit the kingdom prepared for them by Christ their king (Mt. 25:34; 1 Cor. 6:9f.).

VII. Historical Views.–In Roman Catholicism the last judgment has often been depicted in terms of terror connected to its penitential system. Medieval art and sculpture on cathedral entrances frequently reflect this perspective. The Reformers regained the biblical perspectives and Reformed creeds reflect the comfort of the last judgment for believers (Heidelberg Catechism, qq. 1, 52; Belgic Confession, art. XXXVII; Westminster Confession, ch. 35; Westminster Larger Catechism, qq. 88-90; Westminster Shorter Catechism, q. 38). With the Enlightenment, judgment was reduced either to progressive education or to a present immanent process only, and Schiller's dictum that "the history of the world is the judgment of the world," while open to various interpretations, became axiomatic for many in this sense. Dialectical theology restricts eschatology to the present, eliminating future eschatology, and thus regards the "last judgment" as the crisis involved in the revelational encounter here and now. Evangelical Bible interpreters differ about the time of the judgment and the number of judgments.

Bibliography.–*TDNT*, III, *s.v.* κρίνω κτλ. (Büchsel, Herntrich); J. P. Martin, *The Last Judgment* (1963); L. Morris, *The Biblical Doctrine of Judgment* (1960). F. H. KLOOSTER

JUDGMENT SEAT [Gk. *bēma*–'step' < *bainō*]; (Mt. 27:19; Jn. 19:13; Rom. 14:10; 2 Cor. 5:10); **THRONE** (Acts 12:21); **TRIBUNAL** (Acts 18:12, 16f.; 25:6, 10, 17); NEB also COURT, BENCH (Acts 18:17), ROSTRUM (12:21). The Greek word is used in its literal sense only once in the NT: Acts 7:5, "not even a step of a foot," RSV "not even a foot's length" (similar expression in Dt. 2:5, LXX). The extended meaning, "raised platform," "tribunal," "judicial bench," occurs nine times literally, twice figuratively. This meaning is well attested in classical Greek and Hellenistic Greek and is found in the LXX.

In their accounts of the trial of Jesus before Pilate, Mt. 27:19 and Jn. 19:13 refer to the *bēma* of Pilate, located outside the Praetorium proper in the courtyard called the PAVEMENT (Gk. *lithóstrōton*), in Aramaic "Gabbatha." Obviously, this was a raised platform, perhaps ornately decorated (as at Corinth, see below), with possibly a chair or bench from which Pilate delivered his judicial decisions.

When Herod Agrippa I met his sudden death in Caesarea, he was seated on a *bēma* making a speech to a deputation from Tyre and Sidon after negotiating a treaty with them (Acts 12:21, 23 D).

When the Corinthian Jews accused Paul before Gallio, they brought him before the *bēma* (Acts 18:12, 16f.). Excavations at CORINTH, begun in 1896 by the American School of Classical Studies at Athens and continuing in-

termittently to the present, have revealed extensive features of the ancient city. Among the ruins are the remains of a richly decorated platform overlooking the agora, which is considered to be the *bēma* at Corinth (cf. O. Broneer, *BA*, 14 [1951], 91f.). Hence, the riot scene in which Sosthenes was beaten (Acts 18:17) took place in the agora or marketplace before the *bēma*. These impressive ruins, with the inscription using the term *rostra* (the Latin equivalent of the Gk. *bēma*), make the above identification very plausible.

When Paul appeared before Festus at Caesarea, Festus was seated upon the *bēma* (Acts 25:6, 17). Paul refers to this as the *bēma* of Caesar (Acts 25:10), suggesting that this was the official judicial bench in the praetorium at Caesarea where the Roman governor resided and functioned.

The term has a spiritual significance in Rom. 14:10 ("judgment seat of God") and 2 Cor. 5:10 ("judgment seat of Christ"); both passages refer to the appearing of all people (including Christians) before God (or Christ) to be judged. This term is an apt figure to describe this significant eschatological event. B. VANELDEREN

JUDITH jōō'dith [Heb. *y^ehûdît*–'a Jewess'] (for etymology, see next article).

1. A wife of Esau, daughter of Beeri the Hittite (Gen. 26:34).

2. The heroine of the book of Judith in the Apocrypha — a pious, wealthy, courageous, and patriotic widow who delivered Jerusalem and her countrymen from the assault of Holofernes, the general of Nebuchadnezzar who had arranged the expedition which aimed at making Nebuchadnezzar the object of universal human worship. *See* JUDITH, BOOK OF.

JUDITH, BOOK OF. A book of the OT Apocrypha.

I. Textual Evidence.–Judith probably rests on a lost Hebrew original, which the Greek translates faithfully but in Hebraic manner. Swete (*OTG*, II, 781-814) prints the B text in full, noting the variants of ℵ and A in his *apparatus criticus*. See also A. E. Brooke, N. McLean, and H. St. J. Thackeray, *The OT in Greek*, III (1906), pt. 1. The further textual evidence in Greek, Syriac, and Latin need not be detailed here, as the critical problems are not acute in this realm. See A. E. Cowley in *APOT*, I, 245f.; *HNTT*, pp. 298f. The interesting but late Hebrew midrashic versions, which are not of great critical value, are translated by C. J. Ball in Wace, I, 252-57.

II. The Story.–The story may be conveniently perused in full in Wace, I, 262-360; or *APOT*, I, 248-267; and it is minutely analyzed in *HNTT*, pp. 285-290. In historical and geographical blunders it outshines TOBIT.

Nebuchadnezzar achieves outstanding westward conquests, largely through his commander Holofernes. The book of Judith makes him king of Assyria, resident in Nineveh, whereas he was really king of Babylonia; and Nineveh had fallen in 612 B.C., several years before his reign commenced, *ca.* 605 B.C. (chs. 1–3). The churlish Jews, alone of the nations threatened, refuse immediate submission — though they are really quite afraid. They have just returned from Babylonian Captivity, and are rebuilding their temple — another glaring anachronism. Achior, leader of the Ammonites, in a fascinating lightning sketch of Jewish history, assures Holofernes that he can easily conquer this people if he catches them in sin against God; free from such sin, they are invincible. This is interpreted as a slight on the imputed deity of Nebuchadnezzar; and Achior, narrowly escaping with his life, is left to the Jewish mercies in bonds at the unidentified and probably fictitious city of Bethulia — a disastrous policy error for Holofernes! The dramatic irony of his contempt for information so vital is magnificent. Losing his golden opportunity, he decides to subjugate the Jews by the more realistic means of troop concentrations and cutting off water supplies (chs. 4–7).

The rich and pious widow Judith, armed by prayer and fasting, plans to save the city in her own way. Casting off her mourning garments, she dons her most magnificent adornments, and, simulating treachery to her own people, seeks the face of Holofernes, who is easily beguiled by her charms. She declares, giving the unheeded words of Achior a new twist, that the desperate Jews are about to sin in the matter of tithes and sacred offerings, and this has caused her to leave for conscience' sake. This sin will mark the psychological moment for the attack of Holofernes, and she will lead him to absolute victory (chs. 8–11).

Holofernes, blinded and reckless in his love or lust, grants Judith all the liberties she requests, only requiring her presence at a private banquet, which eventually reduces itself to the pair of them. (This situation would scarcely be thinkable for an Eastern lady, least of all for one of deep religious convictions.) The commander is too drunk to violate the person of his guest; but she violates his person drastically, grabbing his hair and hewing right through his neck with his own sword. Then she and her maid calmly walk out of the camp, carrying the bloody trophy of the severed head in a bag. After that, battle fortunes favor the Jews. Among other events, Achior becomes a proselyte (chs. 12–15), Judith utters a psalm of triumph, and her later years are succinctly recorded (ch. 16).

III. Selected Exegetical Notes.–3:8. The iconoclastic zeal of a reforming Josiah and the martyr-breeding pagan cult of an emperor, both familiar enough in separate contexts, make strange bedfellows in one verse. Cf. 6:2.

4:9-15. Penitential fasting and earnest prayer, little known outside periods of national crisis.

5:8. Interesting picture by a proselyte-to-be of the birth of monotheism. See note on 14:10.

5:17-19. Apostasy in religion engenders defeat in battle — an OT leitmotiv powerfully stated. The advice of Achior in vv. 20f., to base battle strategy on hamartiological observation, would, if genuine, indicate acute insight in an enemy. There is delicious irony both in the contemptuous rejection by Holofernes of something he cannot begin to understand and in the true picture of affairs on the Israelite side in 7:19-28.

8:1. Judith (Heb. *y^ehûdît*) is both a proper name and the normal term for Jewess. The subjoined genealogy, genuine or spurious, is designed for verisimilitude, and militates against any purely allegorical interpretation of the book.

8:6. Here and elsewhere, Judith is a remarkable Pharisee, a female counterpart of the unconverted Saul of Tarsus.

8:11-20. Judith rightly denounces as irreligious the attempt by the elders to circumscribe God's power by a conditional oath. The reference to idolatry as outmoded is revealing.

8:31. The conviction of the elders that Judith's godliness will bring rain in answer to their prayers recalls the talmudic Onias the Circle-drawer, who vowed to stand inside his ring till God answered his prayers with rain and then further instructed the Almighty on intensities and volumes. For a priceless example of talmudic humor, see Mish. *Taanith* iii.8 (T.B. *Taanith* 23a).

9:10. With fullest allowances for circumstances, it cannot be maintained that Judith's prayer for the success of her deceit is a pleasing one.

10:8. The prayer of the elders is somewhat secular and mundane in spirit.

10:19. A fascinating remark, probably meaning that it is not safe to spare the Israelite men, because, possessing such beautiful women, they may well employ them as deceivers and decoys. The irony of the sentiment is underlined by the complete subsequent success of Judith in all her wiles.

11:5f. Judith's deceit raises very pointedly the question as to whether the end does or does not justify the means. See below.

11:10. A skillful echo of the declaration of Achior; see 5:17f. Holofernes is singularly more open to persuasion when he hears the same thing from female lips.

11:17. For the many usages of *theosebēs,* "religious," see *TDNT,* III, *s.v.* Θεοσεβής (Bertram). There is a secondary suggestion of the mantic, reiterated in the claim to *prógnōsis* or foresight (see *TDNT,* I, *s.v.* γινώσκω κτλ.: πρόγνωσις [Bultmann]); but the primary meaning is that as a good Jewess, fervent in prayer, she expects to be heard of God.

11:19. Cf. Ezk. 34:5; Mt. 9:36; etc.

12:2. Gk. *skándalon,* offense or moral stumbling block, is another word significant in both Testaments.

13:6-10. Cf. Jael and Sisera, Jgs. 4:17-22; 5:24-27. Cf. Jgs. 9:53f.

13:16. The Eastern mind would be little inclined to receive Judith's statement at its face value.

14:10. Achior is an Ammonite; Dt. 23:3 makes his acceptance as a proselyte another glaring improbability.

16:17. An interesting statement of retributive eschatology.

IV. Historicity and Date.–Few contemporary Protestant scholars would care to fight the losing battle for the historicity of Judith; the contradictions of known facts and psychological probabilities are too numerous and too serious. Fewer still would defend its inspiration and canonicity, whatever the verdict of the Roman Church. This does not exclude a possible substratum of truth, magnified and distorted in folklore. The allegorical refuge has also been tried. Jerome equated Judith with the Christian Church, the decapitated Holofernes with the devil. The dispassionate reader is not convinced that this is altogether polite to the Church. The book is much more comprehensible as an ultranationalistic Jewish manifesto in the guise of fiction, a didactic novel, like Tobit, but patriotic rather than ethical in slant. On this interpretation there is no need to take the history or geography too seriously. Bethulia may be Shechem, the modern Nablus, as some have maintained, or it may be a mere figment of the writer's imagination.

It is generally agreed that Judith was not written in the age it professes to portray and so ludicrously distorts. A dating in Christian time is improbable; that of the Bar Cochba revolt, A.D. 132, taking Nebuchadnezzar as a cryptogram for Hadrian, is discountenanced by Christian quotation of the book at an earlier date. An approximation of 150 B.C. enjoys wide scholastic acclaim. Pfeiffer (*HNTT,* p. 295 n. 13) conveniently lists its supporters, but suggests that the psalm in ch. 16 may be earlier than the rest of the book. Wace (pp. 244-48) would advance the date to the reign of Alexandra Salome (79-70 B.C.). This could make the book, like Susanna, a pro-Pharisaic tract, applauding aspects of theology and upholding certain property rights of married women and widows. Judith has been interpreted as an indirect compliment to Alexandra, and Simeon ben Shetah has been given a place in the picture. This is hypothetical but interesting. An earlier date might not even exclude later Pharisaic adaptation.

V. Theology and Evaluation.–Reactions to Judith must inevitably be personal and subjective. On the assumption that patriotism overrides all other virtues, that duty to the state outweighs duty to God or mankind, and on the further assumption that a worthy end justifies the use of dubious or shabby means, Judith is a heroine altogether shining and admirable. She possesses incredible courage and pertinacity; her devotion to ritual Judaism under the most impossible circumstances is extraordinary. Many have objected to her lying and imposture, to the cool and calculating way she sexually entices a man she detests in her heart, to the bloodiness of the deed she commits without scruple or tremor. Her later denial of misconduct with Holofernes is almost anticlimactic. She was faithful to Jewish ritual, but what of her morals? Many modern Westerners find her duplicity detestable, and her Pharisaic righteousness unattractive. The assessment of the ancient Easterner would be entirely opposite: to him Judith was a female savior, a patriot without equal, a Jewess without reproach. Judaism, fighting against overwhelming odds for its existence, was not the aggressor; any weapons would seem justified against the monster Holofernes.

The main theological interest centers in the cardinal OT teaching of national sin and divine retribution, cleverly introduced, first through the Ammonite, an enemy, later through Judith, the female patriot.

Dubarle, *Judith* (*Analecta Biblica,* 24, 1966); E. Haag, *Studien zum Buche Judith* (1963); H. Lamparter, *Die Apokryphen,* II (1972), 135-182. R. A. STEWART

JUEL. *See* JOEL 13; UEL.

JUICE [Heb. *mišrâ* (Nu. 6:3), *'āsîs* (Cant. 8:2)]. In Nu. 6:3 the term refers to the pulp or liquid pressed from grapes, in Cant. 8:2 to the juice of pomegranates.

JULIA jo͞o'lē-ə [Gk. *Ioulia*]. The name of a Roman Christian to whom Paul sent greetings; the wife or sister of Philologus with whose name hers is coupled (Rom. 16:15). The name points to a member of the imperial household.

JULIUS jo͞o'lē-əs [Gk. *Ioulios*]. The centurion of the Augustan cohort under whose charge Paul was sent a prisoner to Rome (Acts 27:1, 3). *See* ARMY, ROMAN II.A.

JUNIAS jo͞o'nē-əs [Gk. *Iounias, Iounia*]; AV JUNIA. One to whom, with Andronicus, Paul sent greetings at the close of his letter to the Romans (Rom. 16:7). The name may be masculine, "Junias," a contraction of Junianus, or feminine, "Junia"; it is *Iounian,* the accusative form, that is given. In all probability this is the masculine, "Junias." Paul defines the two as (1) "my kinsmen, (2) "my fellow prisoners," (3) who are "of note among the apostles," and (4) have been "in Christ before me."

(1) They were Jews. Paul calls the Jews "my brethren," "my kinsmen according to the flesh" (Rom. 9:3). Because Prisca and Aquila, a Jewess and Jew, are not designated as kinsfolk, W. J. Conybeare and J. S. Howson (*Life and Epistles of St. Paul* [rev. ed. 1856], p. 535) suppose "the epithet to denote that the persons mentioned were of the tribe of Benjamin."

(2) They had been companions of Paul in some unrecorded imprisonment. The phrase denotes more than the fact that they, like Paul, had suffered imprisonment for the sake of Christ.

(3) This may mean that they were well known to the apostolic circle or distinguished as apostles. The latter is probably correct, "apostle" being used in a wide sense (cf. 1 Cor. 15:7). The prophetic ministry of the early Church consisted of apostles, prophets, and teachers (1 Cor. 12:28; Eph. 4:11), the apostles being missionaries in the modern sense (see T. M. Lindsay, *The Church and the Ministry in the Early Centuries* [1903], ch. 3). Some apostles were missionaries sent out by particular churches (Acts 13:2f.; 2 Cor. 8:23; Phil. 2:25).

(4) They were among the first converts, "early disciples" like Mnason of Cyprus (Acts 21:16).

S. F. HUNTER

JUNIPER jōō'nə-pər. *See* BROOM TREE.

JUPITER jōō'pə-tər (AV 2 Macc. 6:2; Acts 14:12f.). The AV uses the Latin name Jupiter for the Greek god Zeus because of the influence of the Vulgate. *See* ZEUS.

JURISDICTION [Heb. *kissē'*] (Neh. 3:7); AV THRONE; NEB SEAT; [Gk. *exousía*] (Lk. 20:20; 23:7); AV also AUTHORITY. The power and authority to govern or legislate. Heb. *kissē'* literally means "seat" or "throne"; *see* THRONE. Gk. *exousía* has a broad range of meaning; in the NT it means "right, authority, capability" (Rom. 9:21); "power, strength" (Mt. 9:8); "right and might" (Jn. 5:27). Thus it gets the meaning of the powers of the magistrate, which it bears in later Greek (Tit. 3:1; Rom. 13:1-3). And in this sense it is used in Lk. 20:20; 23:7, where it is translated "jurisdiction."

JURISPRUDENCE, ABUSE OF. Among the Hebrews before the conquest of Canaan, disputes in the family or clan would be settled by the natural head (Heb. *'āḇ*) of the family or clan. This custom was prevalent in nomadic or seminomadic societies. According to Ex. 18, Moses as leader of the tribes settled all disputes. But he was compelled to appoint a body of elders to act in conjunction with himself. In the more complex society after the Conquest it was necessary to alter the position. This was done by David (1 Ch. 26:29-32) and again by Jehoshaphat (2 Ch. 19:5-11). In every case the structure was adapted to new circumstances and certain abuses among the officials and judges were eliminated.

The abuse of jurisprudence and the miscarriage of justice was of such frequent occurrence that it is especially mentioned in the ancient code of Hebrew law, the Book of the Covenant (Ex. 23:1-3, 6-8). This law is taken up again in Dt. 16:19. In fact the OT abounds with allusions to the corruption and venality of the judicial bench (Lev. 19:15; Ps. 15:5; Prov. 17:23; Isa. 1:23; 5:23; Am. 5:12; Mic. 3:11; 7:3; Zeph. 3:3).

A common image used to depict such practices is that of judicial blindness. In Ex. 23:8 the blindness (Heb. *'wr*) is connected with the open-eyed (*piqᵉḥîm*), and in Dt. 16:19 with the wise (*ḥᵃkāmîm*). The meaning, however, is the same, namely, the bribe blinds the eyes of the judge (cf. also 1 S. 12:3). The related word "make blind" in Ugaritic (*'wr*) means "blind the one eye" or, as an adjective, "one-eyed" (*UT*, pp. 454f.). But this cannot be the meaning in Hebrew, where we can infer from the word "open-eyed" in Ex. 23:8 that both eyes are affected by the bribe.

The abuse of jurisprudence was very ancient. It is said in the Code of Hammurabi § 5 that if a judge should alter his decision, he must be expelled from the assembly of judges (*ina puḫrim*) and must never be allowed to act as judge again. But it is not only the bribe that may influence the judgment of a judge. All over the ancient Near East the idea existed that the judge should act impartially toward the widow, orphan, and poor. The god is regarded as protector of the poor in the ancient law code of Ur-Nammu (*ca.* 2050 B.C.), in the Code of Hammurabi, and in various other documents of the Near East. The same attitude is also to be encountered in the tablets of Ugarit. The protection of the poor thus became an obsession with certain judges, and the rights of the rich were overlooked. Against this attitude the law of Ex. 23:3 was made. A judge should be impartial in every decision and should not be influenced by any person or any gift.

In OT times bribery and the abuse of jurisprudence were well known. Job 9:24 says that God "covers the faces of its [the earth's] judges" to be blind to justice in the world. Judicial corruption was the burden of prophetic preaching (cf., e.g., Isa. 1:23; 5:23; Mic. 3:11). Prov. 17:23 defines the wicked person as one who is always prepared to take a "bribe out of the bosom, to pervert the ways of justice."

F. C. FENSHAM

JUSHAB-HESED jōō'shəb-hē'səd [Heb. *yûšaḇ ḥeseḏ*—'may steadfast love be returned']. Son of Zerubbabel. The name is probably symbolic (1 Ch. 3:20).

JUST [Heb. *mišpāṭ* (Job 35:2; Ps. 9:4 [MT 5]; 117:7; Prov. 16:11; Jer. 10:24; etc.), *šālēm* (Prov. 11:1), *ṣaddîq* (Ezr. 9:15; Job 12:4; 27:17; Ps. 145:17), *ṣeḏeq* (Lev. 19:36; Dt. 25:15; Job 31:6; Ps. 17:1; etc.); Gk. *díkaios* (Mt. 1:19; Lk. 1:17; 14:14; Jn. 5:30; Acts 22:14; 24:15; Rom. 7:12; etc.), *éndikos* (Rom. 3:8; He. 2:2)]; **JUSTICE** [Heb. *mišpāṭ* (Gen. 18:19; Ex. 23:6; Dt. 10:18; 16:19; 24:17; 1 S. 8:3; etc.), *ṣeḏeq* (Dt. 16:20); Gk. *dikaiosýne* (Acts 24:25; Rom. 3:5; He. 11:33), *díkē* (Acts 28:4), *krísis* (Mt. 12:18; Lk. 11:42; etc.)]; **JUSTLY** [Heb. *ṣaddîq* (2 S. 23:3), *ṣeḏeq* (Isa. 59:4); Gk. *dikaíōs* (Lk. 23:41; 1 Pet. 2:23), *díkaios* (Col. 4:1)]; AV also RIGHTEOUS (Ezr. 9:15; Ps. 145:17; etc.), "even" (Job 31:6), "right" (Job 35:2; Ps. 9:4 [MT 5]; 17:1), "judgment" (Ps. 111:17; 119:121; 145:17), etc.; NEB also TRUE (Lev. 19:36), "correct" (Dt. 25:15; Ps. 11:1), RIGHTEOUS (Job 27:17; Ps. 145:17; Acts 22:14), "punish you as you deserve" (Jer. 30:11; 46:28), "act without principle" (Ezk. 18:25f.; 33:17), etc. The AV translates *mišpāṭ* as "judgment" 294 times, but the RSV most frequently translates *mišpāṭ* as "justice" in distinction from *ṣeḏeq* or *ṣᵉḏāqâ* as "righteousness." In any case, the Hebrew terms are often interchangeable, as the famous parallelism of Am. 5:24 demonstrates. Moreover, the terms righteousness and justice (in either order), whether referring to God or to man, are frequently combined for emphasis (Gen. 18:19; 1 K. 10:9; 2 Ch. 9:8; Ps. 89:14 [MT 15]; 119:121; Prov. 2:9; Isa. 9:7 [MT 6]; 56:1; 59:9, 14; Jer. 22:15; 23:5; Ezk. 45:9).

I. General Usage.—In Judaism (especially Proverbs) as elsewhere, wisdom literature abounds in common definitions and descriptions of the "just" or "righteous" person. Further, what makes weights and measures "just" (Lev. 19:35f.; Dt. 25:13-16; Prov. 11:1; 16:11; Ezk. 45:9f.; Am. 8:5) is common knowledge among Israel's neighbors.

The famous list of virtues in Phil. 4:8, though used in a specifically Christian context, comes from Hellenistic popular philosophy, and presupposes common agreement about what is "just." Christians may well "have respect . . . for everything that is humanly true and good" (K. Barth, comm. on Philippians [Eng. tr. 1962], p. 124). The distinc-

tion between the just and the unjust on whom God sends rain may also be a matter of common understanding (Mt. 5:45). Pilate's wife, with no theological intention, allegedly described Jesus as "that just man" (Mt. 27:19; RSV "righteous").

II. God's Character.–The people of God not only appropriate common views of justice and righteousness, but contribute distinctive understandings based on the character of God, who is uniquely "just" (RSV "righteous"; Neh. 9:33; Ps. 7:9 [MT 10]; Isa. 45:21; Zeph. 3:5). It is unthinkable that God would pervert either justice or what is right (Job 8:3).

The major point is that God's justice is no abstraction at odds with an equally abstract mercy. To the contrary, as the description "a righteous God and a Savior" implies (Isa. 45:21), God's justice seeks concretely to express His mercy and to accomplish His salvation (Jgs. 5:11; Ps. 7:17 [MT 18]; 35:23f.; 51:14 [MT 16]; 71:15; 103:17; Isa. 46:13; 51:5f.). The expected Messiah, accordingly, will judge not by the usual criteria (empirical data perceived by his eyes and ears) but by righteousness (*ṣeḏeq*, Isa. 11:4). "Righteousness and justice [*ṣeḏeq ûmišpāṭ*] are the foundation of thy throne" (Ps. 89:14 [MT 15]). Steadfast love, faithfulness, and righteousness characterize God (Ps. 85:10-13 [MT 11-14]).

In the NT God's justice remains bound to His mercy. Paul insists, for instance, that God's justice is not shaken when the sinner, whose wickedness demonstrates "the justice of God" (AV "righteousness"), is forgiven (Rom. 3:5). This position is essential to Paul's thesis that God, who is not unjust (Rom. 9:14), has not rejected His people Israel for being disobedient and contrary (10:21–11:1; Munck, p. 57). Later writers described God as One who "judges justly" (1 Pet. 2:23), who is "faithful and just" when He forgives us (1 Jn. 1:9), and whose ways are "just and true" (Rev. 15:3).

Jesus is described as righteous, just, "the Just One" (Acts 3:14; 7:52; 22:14; 1 Jn. 2:1; 3:7; cf. Jn. 5:30). The Lukan texts may well reflect the suffering servant song of Isa. 52:13–53:12 (so I. H. Marshall, *Luke: Historian and Theologian* [1970], p. 171).

III. Consequent Expectations for Social and Economic Justice.–These characteristics of God do not appear in isolation from His people, who mature and build on the basis of God's actions on their behalf. He commands: "You shall have just balances, just weights . . ." because "I am the Lord your God, who brought you out of the land of Egypt" (Lev. 19:36). Because God gave them the land, His people "shall not pervert justice" (Dt. 16:18-20; 24:17f.). The reason, the basis, for keeping God's justice and doing His righteousness is that God's salvation and deliverance are on the way (Isa. 56:1).

Thus the kind of justice that accords with God's character is, accordingly, dynamic rather than static, creative rather than codified, realistic rather than idealistic. It is neither merely forensic, nor merely religious, for it is covenantal justice. It rightly orders the relation of people to God, and thereby to one another. What is the good? That is the same as to ask: "What does the Lord require of you?" The answer is: "To do justice, and to love kindness [*ḥesed*], and to walk humbly with your God" (Mic. 6:8). By these requirements God's goodness is structured into the social order. (Who God is, for instance, affects our daily uses of balances and weights [Prov. 11:1].) The justice that God inaugurates remains restless so long as the poor are oppressed, the needy crushed, and justice turned to wormwood (Am. 4:1; 5:7). "But let justice roll down like waters, and righteousness like an ever-flowing stream" (Am. 5:24).

It is equally true that when a people distance themselves from God, a true prophet must write of them: "Therefore justice is far from us, and righteousness does not overtake us" (Isa. 59:9; cf. 59:2). That is, God's justice already exists, and it cannot be ignored and denied with impunity (Isa. 1:17-20; Hos. 2:19; 4:1; Am. 5:15).

It is remarkable, in view of greatly changed political circumstances, that this theme of God's social and economic justice was not lost within the early Church. It is not that social justice became less important to God in NT times, but rather that the Church was in a very different situation from that of tribal amphictyony or theocratic monarchy. "Masters, treat your slaves justly" (Col. 4:1) is not merely an appeal to common sensibilities about slaves, but also a reminder "that you also have a Master in heaven" (4:1b). "Justice [*krísis*] and mercy and faith" remain more essential to the law than tithing (Mt. 23:23). Luke's commitment to "the people of the land" is in the same tradition. NT apocalyptic writings abound in this understanding of justice, even if not in the same terminology (Mt. 24–25; Mk. 13; Lk. 21:8-36).

IV. Norm for Persons in Authority.–From the Yahwist (early 10th cent. B.C.) comes a persistent norm for kings and, implicitly, others in authority (P. Ellis, *The Yahwist* [1968], pp. 203f.): the way of the Lord can be kept, and His promises received, only by actually doing "righteousness and justice" (Gen. 18:19). God made Solomon king "that you may execute justice and righteousness" (1 K. 10:9 par. 2 Ch. 9:8). Only "with justice and with righteousness" will the Davidic kingdom be upheld, according to Isaiah's ideal (9:7). Ps. 72:1 refers to the same model: "Give the king thy justice, O God, and thy righteousness to the royal son."

It is by this norm that a monarch's misconduct was measured. What makes a king, wrote Jeremiah, is not successful competition with other rulers for more luxury (a reference to Jehoiakin's use of slave labor to build a new palace), but only doing "justice and righteousness" (Jer. 22:15; cf. J. Bright, *Jeremiah* [*AB*, 1965], pp. 142, 144f.; cf. also 23:5). Micah puts to "the heads of Jacob" and "rulers of the house of Israel" the rhetorical question: "Is it not for you to know justice?" Judged by that standard they have, on the contrary, cannibalized their own subjects (Mic. 3:1-3).

Similarly, Luke emphasizes a triple woe (11:42-44) descending on Pharisees who neglected "justice and the love of God." Roman officials appear, through Luke's eyes, to have been more committed to justice than were those particular Jewish authorities who condemned "the Holy and Righteous One" (Acts 3:14; cf. Lk. 23:47; F. W. Danker, *NT Witnesses for Preaching: Luke* [*Proclamation Comms.*, 1976], pp. 64-67).

V. Just Persons.–Several persons are "just" in that they have upheld God's justice within the covenant community. Mary's husband Joseph is "a just man" in this sense (Mt. 1:19). Both the piety and actions of Joseph from Arimathea mark him off as "a good and righteous [AV "just"] man" (Lk. 23:50). Another such person is "Cornelius, a centurion, an upright and God-fearing man, who is well spoken of by the whole Jewish nation" (Acts 10:22). There is also "righteous Lot" (2 Pet. 2:7).

VI. Acts 28:4.–After Paul was shipwrecked on his journey to Rome and he and his company landed on Malta, he was bitten by a viper. The natives inferred that he must have been a murderer and that, though he escaped from the sea, "justice" (Gk. *díkē*, AV "vengeance") would not allow him to live. "Justice" here is not an abstract principle, but a goddess (cf. NEB "divine justice") who personified justice, according to Schrenk (*TDNT*, II, 181).

F. F. Bruce (comm. on Acts [2nd ed. 1952; repr. 1970], p. 471) suggests that Luke has replaced a Maltese deity by *díkē*, just as he substituted Zeus and Hermes for the Lycaonian deities in 14:12 (cf. E. Haenchen, comm. on Acts [Eng. tr. 1971], p. 713 n. 5).

J. G. GIBBS

JUSTICES [Aram. *dᵉṭāḇār* < Old Pers. *dātabara*–'lawbearers'] (Dnl. 3:2f.); AV COUNSELLORS; NEB JUDGES. Officials whose function is uncertain, although the Persian word that lies behind the Aramaic word suggests a judicial function. They are probably inferior in status to the first three officials mentioned in both uses of the list, since the conjunction *wᵉ*, "and," attached to the third term seems to distinguish the first three as a separate and superior group (L. F. Hartman and A. A. di Lella, *Book of Daniel* [*AB*, 1978], p. 156). J. E. H.

JUSTIFICATION [Heb. *ṣeḏeq*, vb. *ṣāḏēq*; Gk. *dikaíōma*, *dikaíōsis*, vb. *dikaióō*]. In a legal sense, the declaring just or righteous. In biblical literature *dikaioún*, without denying the *real* righteousness of a person, is used invariably or almost invariably in a declarative or forensic sense. (See *DNTT*, III, 352-377; *TDNT*, II, *s.v.* δίκη κτλ. [Quell, Schrenk]; Bauer, rev., pp. 195-98.)

I. Pauline Epistles.–In this article reference will first be made to the writings of Paul, where justification receives its classic expression, and from there as a center, the other NT writers, and finally the OT, will be treated.

A. Universality of Sin. According to Paul, justification rests on the presupposition of the universality of sin. All men are not only born in sin (Eph. 2:3), but they also have committed many actual transgressions, which render them liable to condemnation. Paul proves this by an appeal to the OT witnesses (Rom. 3:9-18), as well as by universal experience, both of the heathen (1:18-32) and of the Jews (2:17-28; 3:9).

B. Perfection of the Law of God. The perfection of the law of God and perfect observance of it are necessary if justification is to come by it (3:10). The modern notion of God as a good-natured and more or less nonchalant ruler to whom perfect holiness is not inexorable is not Paul's notion. If one had indeed kept the law, God could not hold him guilty (2:13), but such an obedience never existed. Paul has no trouble with the law as such. Those who have tried to find a difference here between Galatians and Romans have failed. The reminder that the law was ordained by angels (Gal. 3:19) does not mean that it was not also given by God. It might be reckoned in a sense among the elements of the world (Gk. *kósmos*, 4:3), as it is an essential part of an ordered universe, but that does not at all mean that it is not also holy, right, and good (Rom. 7:12). It was added on account of transgressions (Gal. 3:19), for it is only a world of intelligent, free spirits capable of sin that needs it, and its sanctions make sin seem all the more sinful (Rom. 7:13).

C. The Life, Work, and Death of Christ. It is fundamental in Paul's thinking that Christ died for our sins, according to the Scriptures (1 Cor. 15:3). In due season He died for the ungodly (Rom. 5:6); while we were yet sinners He died for us (v. 8); we are justified in His blood (v. 9), and it is through Him that we are saved from the wrath (v. 9). While we were enemies we were reconciled to God through the death of His Son (v. 10), being justified freely by His grace through the redemption that is in Christ Jesus whom God set forth as a propitiation (3:24f.). There is no reconciliation, no justification, except through and by Christ (cf. Gal. 5:4).

1. Paul's Own Experience. Paul's own experience cannot be left out of the account. He lived through the doctrine, as well as finding it through illumination of the Spirit in the OT. It was not that he had only outwardly kept the law. He had been zealous for it, and had been blameless in every requirement of its righteousness (Phil. 3:6). What was borne in upon him was how little such blamelessness could stand before the absolute standard of God. Just how far he was shaken with doubts of this kind we cannot say with certainty; but it seems impossible to conceive the Damascus conversion scene in the case of such an upright man and strenuous zealot without supposing that Paul had undergone a psychological preparation and had questioned whether his fulfilling of the law enabled him to stand before God. For a Pharisaically educated man like himself, there was no way to overcome these doubts except in a renewed struggle for his own righteousness shown in the fiery zeal of his Damascus journey, pressing on even in the blazing light of noonday. This conversion broke down his philosophy of life, his assurance of salvation through works of the law done ever so conscientiously and perfectly. The revelation of the glorified Christ, with the assurance that He, the God-sent Messiah, was the very one whom he was persecuting, destroyed his dependence on his own righteousness, a righteousness that had led him to such shocking consequences. Although this was for him an individual experience, it had universal applications (Gal. 3:8). It showed him that there was an inherent weakness in the law through flesh, i.e., through the whole physical, psychical, and spiritual nature of man, which is considered sinful. Paul learned that the law needed bracing and illuminating by the Son, who, though sent in the likeness of the flesh of sin, yet as an offering for sin condemned sin and cast it out (Rom. 8:3), to the end that the law might be fulfilled in those who through Him walk not after the flesh but after the Spirit (v. 4). That was the glory of the new righteousness thus revealed. If the law had been able to do that, to give life, Christ need not have come, and righteousness would have been by the law (Gal. 3:21). But the facts show that the law was not thus able — neither the law written on the heart given to all, nor the law given to Moses (Rom. 1:18–3:19; cf. Gal. 2:16f.). Therefore every

mouth is stopped, and all flesh is silent before God. On the ground of lawkeeping, what the modern man would call morality, our hope of salvation has been shattered. The law has spoken its judgment against us (Gal. 3:10). It cannot therefore lead us to righteousness and life, nor was that its supreme intention: it was a pedagogue or tutor (Gk. *paidagōgós*) to lead us to Christ that we might be justified by faith (v. 24; cf. Rom. 10:4). What made Paul differ from his companions in the faith was that his own bitter experience under the revelation of Christ had led him to these facts.

2. The Resurrection Connected with the Death. It was remarked above that the ground of justification according to Paul is the work of Christ. This means especially His death as a sacrifice, in which, as Ritschl well says (*Rechtfertigung und Versöhnung,* II [3rd ed. 1899], 157), the apostles saw exercised the whole power of His redemption. But that death cannot be separated from His resurrection, which first awakened them to a knowledge of its decisive worth for salvation and finally confirmed their faith in Jesus as the Son of God. "The objective salvation," says Ritschl (p. 158), "which was connected with the sacrificial death of Christ and which continued on for the church, was made secure by this, that it was asserted also as an attribute of the resurrected one," who was delivered up for our trespasses, and was raised for our justification (Rom. 4:25). But this last expression is not to be interpreted with literal preciseness, as though Paul intends to distinguish between the forgiveness of sins as brought about by the death and justification by the Resurrection, for both forgiveness and justification are identified in 4:6-8 (cf. 1 Cor. 6:11). It was the Resurrection that gave Christians their assurance concerning Christ (Acts 17:31); by that resurrection He has been exalted to the right hand of God, where He makes intercession for His people (Rom. 8:34). Christ's mediatorship is founded upon His death — the Lamb slain from the foundation of the world (Rev. 13:8).

B. Weiss well says: "It was from the certainty of the exaltation of Christ to Messianic sovereignty, an exaltation which was brought about by the resurrection, . . . that Paul has attained to faith in the saving significance of His death, and not conversely. Accordingly, the assurance that God cannot condemn us is owing, primarily, to the death of Christ, but still more to His resurrection and exaltation to God's right hand (Rom. viii.34), inasmuch as these first prove that His death was the death of the mediator of salvation, who has redeemed us from condemnation. . . . The objective atonement was accomplished by the death of Christ; but the appropriation of it in justification is only possible, if we believe in this saving significance of His death, and we can attain to faith in that, only if it is sealed by means of the resurrection" (*Biblical Theology of the NT,* I [Eng. tr. (of German 3rd ed.) 1882], 436f.).

3. Faith, Not Works, the Means of Justification. The means or condition of justification is faith (Rom. 3:22-28; cf. Gal. 3:11; etc.), which rests upon the pure grace of God and is itself, therefore, His gift (Eph. 2:8). The making of faith to be the only instrument of justification is not arbitrary, but rests on its receptive nature. Faith is the hand outstretched to the divine Giver, who, though He sends rain without our consent, does not give salvation except through an appropriate spiritual response. This faith is not simply belief in historical facts, though this is presupposed as to the atoning death (Rom. 3:25) and the resurrection (10:9) of Jesus, but is a real reception of the gift with the heart (v. 10), and is therefore able to bring peace in our relation to God (5:1). The object of this faith is Jesus Christ (3:22, etc.), through whom alone comes the gift of righteousness and the reigning in life (5:17) — not Mary, not angels, not doctrine, not the Church, but Jesus only. To be sure, God the Father is not thereby excluded as an object of faith, as the redeeming act of Christ is itself the work of God (2 Cor. 5:19), whose love expressed itself toward us in this way (Rom. 5:8). Faith in the one God is always presupposed (1 Cor. 8:6), but it was the apostolic custom to refer repentance to God and faith to Christ (Acts 20:21). The oneness of God the Father and Christ the Son in a work of salvation is the best guarantee of the divinity of the latter, both as an objective fact and as an inner experience of the Christian.

Since justification is by faith, it is not by works or by love, or by both in one. Justification cannot be by works, because they are lacking in time or amount or quality; nor can they be accepted in any case until they spring from a renewed heart, for which faith is the necessary presupposition. Justification cannot be by love, for love exists only where the Spirit has put it into the heart (Rom. 5:5), and the indispensable prerequisite for receiving love is faith. This statement does not deny that the crown of Christianity is love (1 Cor. 13:13); it means only that the root of love is faith. Nor can love be regarded as a partial condition of justification on the strength of the phrase often quoted for that purpose, "faith working through love" (Gal. 5:6). The apostle is speaking here only of those who are already "in Christ," and he says that over against the Galatian believers bringing in a lot of legal observances, the only availing thing is not circumcision or its lack, but faith energizing through love. Here the interest is, as Ritschl says (II, 343), in the kingdom of God, but justification proper has reference to the sinner in relation to God and Christ. At the same time this text reveals the tremendous religio-ethical force abiding in faith, according to Paul.

4. Baptism Also Eliminated. Not only are good works and love removed as conditions or means of justification of the sinner, but baptism is also eliminated. According to Paul, it is the office of baptism not to justify, but to cleanse, i.e., symbolically to set forth and seal the washing away of sin and the entrance into the new life by a dramatic act of burial, which for the subject and all witnesses would mark a never-to-be-forgotten era in the history of the believer. "Baptism," says Weiss (I, 454), "therefore presupposes faith in Him as the one whom the Christian Church designates with the name of their Lord, and also binds to an adherence to Him, which excludes every dependence upon any other, inasmuch as He has acquired a claim upon their devotion by the saving deed of His self-surrender on the cross." Baptism points to a complete parting with the old life by previous renewal through faith in Christ, which renewal baptism in its turn sealed and announced in a climax of self-dedication to Him. This act, while symbolically and in contemporary parlance of both Jew and Gentile called a new birth, was probably often actually so in the psychological experience of the baptized. But while justification is often attributed to faith, it is never to baptism.

5. Elements of Justification. What are the elements of this justification? The first is the forgiveness of sins (Rom. 4:5-8; cf. Acts 13:38f.). With this are connected peace and reconciliation (Rom. 5:1, 9f.; cf. 10:11). The second is the declaring or approving as righteous or just (3:21-30; 4:2-9, 22; 5:1, 9-11, 16-21, etc.). C. F. Schmid is perfectly right when he says that Paul (like James) always uses *dikaioún* in the sense of esteeming, pronouncing, and treating as righteous, both according to the measure of the law (Rom. 2:13; 3:20) and also according to grace (*Biblical Theology of the NT* [Eng. tr., 2nd ed. 1877], p. 497). The word is a forensic one, and Godet goes so far as to say that the word is never used in any Greek literature for making righteous

(comm. on Romans [Eng. tr. 1883], I, 157). It is the ungodly who are justified (Rom. 4:5), and the justification is a reckoning or imputation (Gk. *logizesthai*) of righteousness (vv. 6, 22), not an infusing or making righteous. The opposite of "justify" is not "be a sinner," but is "accuse" or "condemn" (8:33f.), and the opposite of "justification" is "condemnation" (5:18). Besides, it is not the infusing of a new life, of a new holiness, that is counted for righteousness, but it is faith that is so counted (4:5; Phil. 3:9). What God looks upon when He justifies is not the righteousness that He has imparted or is to impart, but the atonement that He has made in Christ. It is one of the truest paradoxes of Christianity that unless a righteous life follows, there has been no justification, while the justification itself is for the sake of Christ alone through faith alone. It is a "*status*, rather than a character," says Stevens (*Pauline Theology* [1892], p. 265); "it bears the stamp of a legal rather than of an ethical conception." Stevens refers to the elaborate and convincing proof of the forensic character of Paul's doctrine of justification (in Morison, *Exposition of Romans*, pp. 163-200). An interesting illustration of how further study may correct a wrong impression is given by Lipsius, who, in *Die Paulinische Rechtfertigungslehre* (1853), maintains that righteousness or justification mean not "exclusively an objectively given external relation to God, but always at the same time a real inner condition of righteousness" (p. 10). In his *Lehrbuch der evangelisch-protestantischen Dogmatik* (3rd ed. 1893), however, Lipsius calls the righteousness of God properly an "objective gift of grace, not simply in the sense in which the OT just one judged his position of salvation as a gift of grace, but as a righteousness specially reckoned and adjudicated by way of grace and acknowledged before the judgment [or court; German *Gericht*] of God (Rom. 4:6; cf. vv. 1-8, 11; 3:23; Gal. 3:6). This is always the meaning of *dikaioún, dikaioústhai*, or *dikaíōsis* in Paul. It consists in the not-reckoning of sins" (p. 658). Of course justification is only a part of the process of salvation, which includes regeneration and sanctification, but these are one thing and justification is another.

6. *Justification Has to Do with the Individual.* Finally it is asked whether justification in Paul's mind has to do with the individual believer or with the society or Christian congregation. Ritschl (II, 217f.) and Sanday-Headlam (comm. on Romans [*ICC*, 3rd ed. 1897], pp. 122f.) say the latter; Weiss (I, 442) says the former. It is indeed true that Paul refers to the church as purchased with Christ's blood (Acts 20:28; or God's blood, according to the two oldest MSS and ancient authorities; cf. Eph. 5:25; Rom. 8:30; Gal. 3:8), and he uses the pronoun "we" to designate the recipients of redemption (Col. 1:14; Eph. 2:18). But it is evident on the other hand that faith is an individual matter, a thing first between man and his God, and only after a person has been united to Christ by faith can he enter into a spiritual fellowship with fellow believers. The subject of justification, therefore, must be in the first place the individual and only in the second place and by consequence the society. Besides, those justified are not the cleansed and sanctified members of churches, but the ungodly (Rom. 4:5).

As to the argument from baptism urged by Sanday-Headlam, it must be said that Paul always conceives of baptism as taking place in the Christian community with believers and for believers and that for and to which they are baptized is not justification, but the death and resurrection of Christ (6:3f.). The righteousness of God has been manifested not through baptism but through faith in Jesus Christ unto all that believe (3:22), being justified freely, not through baptism, but through the redemption that is in Christ Jesus (v. 24). With Paul baptism symbolizes and externally actualizes union with the death of the Lord, and would be both impossible and inappropriate in the case of those not already believers in Christ and thus inwardly united to His society.

II. Other NT Writings.—It is a commonplace of the theology that is called "modern" or "critical," that Paul and not Jesus is the founder of Christianity as we know it, that the doctrines of the divinity of Christ, atonement, justification, etc., are Paul's work, and not his Master's. There is some truth in this. Though we may never separate Christ's teaching ministry from His redemptive commitments and accomplishments, and though it is a false contrast to say that Christ did not come to preach the gospel but to do something so that there would be a gospel to preach, yet it is the work of obedience and suffering unto death as the demand and price of redemption that is central in Christ's humiliation. It was not only Jesus' method but also the requirements of His mission to do His own work and not that of the disciples. It was His to die, to rise from the dead, to ascend to the Father, and to give the Holy Spirit to lead His disciples into all truth.

A. Synoptic Gospels. Harnack's statement (*What is Christianity?* [2nd rev. ed. 1901], p. 68) that the "whole of Jesus' message may be reduced to these two heads: God as Father, and the human soul so ennobled that it can and does unite with Him" is simply not true, for it omits an essential part of His message, namely, that salvation is bound up in His (Christ's) own person (cf. Mt. 10:37-39; 16:24-27). Confession of Him (not simply of the Father) determines acknowledgment above (10:32), where judgment is rendered according to our attitude to Him in His unfortunate ones (25:35-46). No sooner was His person rightly estimated than He began to unfold the necessity of His death and resurrection (16:21). The evening before that death occurred, He brought out its significance, perpetuated the lesson in the institution of the Supper (Mk. 14:24), and reinforced it after His resurrection (Lk. 24:26). Paul himself could hardly have expressed the fact of the atonement through Christ's death more decisively than Mt. 20:28; 26:28. With this foundation, could the Christian doctrine of salvation take any other course than that it actually did take? Instead of referring men to the Father, Christ forgives sins Himself (9:2-6), and He reckons all men as needing this forgiveness (6:12). While the time had not arrived for the Pauline doctrine of righteousness, Jesus prepared the way for it negatively, in demanding a humble sense of sin (5:3), inner fitness and perfection (vv. 6, 8, 20, 48), and positively in requiring recourse to Him by those who felt the burden of their sins (11:28) — to Him who was the rest-giver, and not simply to God the Father, a passage of which Rom. 5:1 is an echo. For it was especially to those to whom, as to the awakened Paul, the law brought condemnation that He came to heal and to save (Mk. 2:17; Mt. 9:13; Lk. 15:7). It was for sinners that He came (Lk. 15:2; 7:39; 19:7; Mt. 11:19), just as Paul understood; and the way for their salvation was not better law-keeping, but trusting prayer in the confession of sin (Lk. 18:13), the humble heart and a hunger for righteousness (= faith). See Mt. 5:3, 6. He who brings most of himself, of his own pride and works, must undergo radical transformation if he is to obtain the kingdom of heaven (18:3f.; Mk. 10:14). Not only entrance, but the final reward itself is of grace (Mt. 19:30; 20:1-16), and in anticipation of Paul's message was the promise of Paradise to the penitent robber (Lk. 23:43). At the very beginning the message sounded out, "Repent ye, and believe in the gospel" (Mk. 1:15), the gospel which was summed up in Christ, who would gather the people, not directly to God the Father,

but to Himself (Mt. 23:37). All this means justification through faith in Himself, in His divine-human manifestation (Mt. 16:13-16). This is the faith of which He expressed Himself with anxiety in Lk. 18:8, and the presence of which He greeted with joy in Mt. 8:10. Paul's proclamation was continuous with the self-witness of Jesus, which conversely pointed as a consequence to the witness of Paul.

B. Johannine Tradition. Justification by faith is not more implicit in John's Gospel than in the first three; it is only more explicit (Jn. 3:14-16). Eternal life is the blessing secured, but this of course is only possible to one not under condemnation (3:36). The new Sonship of God came also in the wake of the same faith (1:12). The Epistles of John vary from Paul in word rather than in substance. The atoning work of Jesus is still in the background; walking in the light is not conceivable in those under condemnation and without faith; and the confession of sins that leads to forgiveness seems only another name for the justification that brings peace (1 Jn. 1:9f.; cf. 2:1f.). Everything, as with Paul (Eph. 2:7; Tit. 3:4), leads back to the love of God (1 Jn. 3:1), who sent His Son to be the propitiation for our sins (4:10).

C. 1 Peter and Hebrews. Paul gave justification a full treatment which other NT writers presuppose but do not unfold. Peter's "Repent ye, and be baptized . . . in the name of Jesus Christ" (Acts 2:38) is meaningless unless faith be exercised in Christ. It is He in whom, though we see Him not, yet believing, we rejoice greatly with joy unspeakable (1 Pet. 1:8), receiving the end of our faith, the salvation of our souls (v. 9). It is only, however, through the precious blood as of a lamb without blemish, even that of Christ (v. 19); only through Him are we believers in God (v. 21). The familiar expression, "Come to Jesus," which simply means "Have faith in Jesus for justification and salvation," goes back to Peter (2:4). The Epistle to the Hebrews has other interests to look after, but it does not deny faith; rather, it exhorts us to draw near with a true heart in fulness of faith (He. 10:22), which it lays at the foundation of all true religion, thinking, and achievement (ch. 11). The writer can give no better exhortation than to look unto Jesus the author and perfecter of our faith (12:2), an exhortation in the true spirit of Paul, whose gospel of faith for justification is also summed up in 4:16.

D. Epistle of James. We come lastly to the core of the matter in regard to NT representations of justification — the famous passage in Jas. 2:14-26, which at first sight seems to be a direct blow at Paul. We cannot enter here into the interesting question of the date of James (*see* JAMES, EPISTLE OF), but a careful look at this vigorous and valuable letter will show us that contradiction on the part of James to Paul is apparent and not real.

(1) In this section James uses the word "faith" simply for intellectual belief in God, and especially in the unity of God (2:19; see also context), whereas Paul uses it for a saving trust in Christ. As Feine says (*Theologie des NT* [2nd ed. 1911], pp. 660-63), for Paul faith is the appropriation of the life-power of the heavenly Christ. Therefore he knows no faith which does not bring forth good works corresponding to it. What does not come from faith is sin. For James faith is subordination of man to the heavenly Christ (2:1), or it is the theoretic acknowledgment of one God (2:19). Justification is for James a speaking just of him who is righteous, an analytical judgment. (2) James uses the word "works" as meaning practical morality, going back behind legalism, behind Pharisaism, to the position of the OT prophets, whereas Paul uses the word as meritorious action deserving reward. (3) When James is thinking of a deeper view, faith stands central in Christianity (1:3, 6; 2:1; 5:15). (4) Paul also on his part is as anxious as James vitally to connect Christianity and good works through faith (1 Thess. 1:3; Gal. 5:6; 1 Cor. 13:2; Rom. 2:6f.). (5) The whole argument of James is bent on preserving a real practical Christianity that is not content with words merely (2:15-16), but shows itself in deeds. He is not trying to show, as Paul, how men get rid of their guilt and become Christians, but how they prove the reality of their profession *after* they receive the faith. He is not only writing to Christians, as of course Paul was, but writing to them *as* Christians ("my brethren," v. 14), as already justified and standing on the "faith of our Lord Jesus Christ" (v. 1), whereas Paul was thinking of men, Gentile and Jew, shivering in their guilt before the Eternal Justice, and asking, How can we get peace with God? "There is not," says Beyschlag (*NT Theology*, I [1895], p. 367f.), "an objective conflict between the Pauline and Jacobean doctrines; both forms of teaching exist peacefully beside each other. James thought of justification in the simple and most natural sense of *justificatio justi*, as the Divine recognition of an actually righteous man, and he thought of it as the final judgment of God upon a man who is to stand in the last judgment and become a partaker of the final *sōtēría* ["salvation"]. Paul also demands as a requisite for this last judgment and the final *sōtēría* right works, the love that fulfils the law and the perfected sanctification, but he (except in Rom. 2:13) does not apply the expression *dikaioústhai* ["to be justified"] to the final judgment of God, which recognizes this righteousness of life as actual. He applies it rather to that first sentence of God with which He graciously receives the believing sinner returning to Him, and takes him into fellowship with Himself." Beyschlag rightly insists that James undoubtedly taught with the first apostles that whoever believes in Christ and is baptized receives the forgiveness of sins (Acts 2:38; 3:19; 10:43), and that he would not have contested the Pauline idea of justification by grace through faith, insisting only that works must follow. Theologically, the chief if not the only difference is that James did not make the cross of Christ the center of his teaching, while the atonement was fundamental for Paul (*see* JAMES, EPISTLE OF).

III. OT.–All the NT writers built on the OT. That there should be a cleft or contradiction between the OT and what we call the NT would have been to them inconceivable. Abraham believed in Yahweh; and He reckoned it to him for righteousness (Gen. 15:6; Rom. 4:3). Whoever does not keep all parts of the law all the time is condemned (Dt. 27:26, LXX; Gal. 3:10; cf. Ps. 14; 143:2; Rom. 3:20; see vv. 9-20, and the references to the OT in the ASV). The prophets insisted upon the practical works of righteousness — "What does the Lord require of you but to do justice and to love kindness and to walk humbly with your God?" (Mic. 6:8). No religious attitude or services could take the place of uprightness of life. This does not mean that the OT writers understood that men were justified by their good deeds, for it was always believed that underneath all was the mercy and loving-kindness of God, whose forgiving grace was toward the broken and contrite spirit, the iniquities of whom were to be carried by the Servant of the Lord, who shall satisfy many (Ps. 103:8-13; 85:10; Isa. 57:15; 53:11, and many other passages).

IV. Later Developments.–A. Apostolic and Early Church Fathers. It is humiliating to confess that the witness immediately after the apostles (the Apostolic Fathers) did not reach the serene heights of Paul. There are passages which remind one of him, but the atmosphere is different. Christianity is conceived of as a new law rather than as a gospel of the grace of God. We cannot go into the reasons

for this: suffice it to say that in gentile Christendom the presuppositions for that gospel failed, and the NT writings were not yet in the consciousness of the church to the extent that they dominated her thinking. The fine passage in Clement of Rome (A.D. 97; 32:3f.: "All of them therefore were all renowned and magnified, not through themselves or their own works or the righteous actions which they had wrought, but through his will; and therefore, we who by his will have been called in Christ Jesus are not made righteous by ourselves, or by our wisdom or understanding or piety or the deeds which we have wrought in holiness of heart, but through faith, by which Almighty God has justified all men from the beginning of the world; to him be glory for ever and ever. Amen") is not at all on a par with his whole epistle, as he coordinates faith with other virtues in ch. 35, makes hospitality and godliness the saving virtues for Lot in ch. 11, couples hospitality and faith together as equal for Rahab in ch. 12, and represents forgiveness of sins through keeping commandments and love in ch. 1. Ignatius (about 110-15 A.D.) speaks in one place about Jesus Christ dying for us, that believing on His death we might escape death (Trall. 2:1), but with him the saving things seem to be love, concord, obedience to bishops, and the indwelling God = Christ, though he has also the excellent passage: "None of these things is hidden from you if ye be perfect in your faith and love toward Jesus Christ, for these things are the beginning and end of life — faith is the beginning and love the end, and the two being found in unity are God, while all things else follow in their train unto true nobility" (Eph. 14). The so-called Barnabas (date uncertain) puts the death of Christ Jesus at the foundation of salvation, which is expressed by the remission of sins through His blood (ch. 5), the kingdom of Jesus being on the cross, so that they who set their hope on Him shall live forever (ch. 8). At the time even believers are not yet justified (ch. 4), for which finally a whole series of works of light must be done and works of darkness avoided (ch. 19). The Shepherd of Hermas and 2 Clement are even more moralistic; whatever their praise of faith, they have the beginning of the idea of merit. The same legalistic tone is found in the Didache. This trend went forward till it was almost full-fledged as early as Tertullian (after A.D. 200) and Cyprian (A.D. 250). And thus it continued until it struck Augustine, bishop of Hippo, who united, so far as they could be united, the Pauline thoughts of sin, grace, and justification with a regular legalism. His book *De Spiritu et Littera* (A.D. 412) was largely after Paul's own heart, and the Reformers hailed it with joy. But he kept the legalistic elements, for instance, that in justification a good desire and a good will are infused, that justification grows, that our merits must be taken into the account even though they are God's merits, that the faith which justifies is a faith which works by love, that faith is the holding true of what God (and the church) says (though occasionally a deeper view of faith is seen), and that works play an important part, as in *De fide et operibus*. Augustine made a bridge by which we could go either back to Paul or forward to Aquinas. As Harnack well says, Augustine experienced, on the one hand, the last revival in the ancient church of the principle that "faith alone saves," and, on the other, he silenced that principle for a thousand years. The very Catholic theologian who stood nearest to that principle overcame it (*ZTK*, 1 [1891], 177). His misunderstanding of Paul's "faith that worketh through love" had momentous consequences.

B. Council of Trent. Those consequences are best seen in the decrees of the Council of Trent (Session 6, 1547), which are the definite and final crystallization of the medieval development. (1) Justification is a translation from a natural state to a state of grace. With this works prevenient grace, awakening and assisting, and with this in his turn man cooperates and prepares himself for justification. This cooperation has the merit of congruity, though the first call comes before any merit. (2) Faith is an element in justification. "Receiving faith by hearing, they of free will draw near to God, believing those things to be true which have been divinely revealed and promised." Faith as a living trust in a personal Savior for salvation is lacking. Among the truths believed is the mercy of God and that He wishes to justify the sinner in Christ. (3) This faith begets love to Christ and hatred to sin, which are elements also of the justifying process. (4) Now follows justification itself, "which is not a bare remission of sins, but also sanctification and renewal of the inner man through the voluntary reception of grace and of gifts." (5) But this renewal must take place through baptism, which, to the prepared adult, both gives and seals all the graces of salvation, forgiveness, cleansing, faith, hope and love. (6) Justification is preserved by obeying the commandments and by good works, which also increase it. (7) In case it is lost — and it can be lost, not by venial, but by mortal sin and by unbelief — it can be regained by the sacrament of penance. (8) To get it, to keep or regain it, it is also necessary to believe the doctrines as thus laid down and to be laid down by this Council (see Mirbt, *Quellen zur Geschichte des Papsttums* [4th ed. 1924], pp. 291-337).

C. Luther. Luther's early writings show that almost from the beginning of his earnest study of religious questions, he mounted up to Paul's view of justification by faith alone (Loofs, *Lehrbuch der Dogmageschichte* [4th ed. 1906], pp. 696-98). Faith is the trust in the mercy of God through Christ, and justification is the declaring righteous for His sake, which is followed by a real making righteous. From the beginning to the end of his life as a religious teacher these are the elements of his doctrine. Speaking of 1513-15, Loofs says (p. 697): "Upon these equations [to justify = to forgive, grace = mercy of the non-imputing God, faith = trust in His mercy] as the regulators of his religious self-judgment, Luther's piety rests, and corresponding to them his view of Christianity, and even later" (than 1513-15); and he adds that "to reckon as righteous" (*reputari justum*) must not be understood with Luther as an *opposition* "to make righteous," for his "to be justified without merits" in the sense of "to forgive" (*absolvi*) is at the same time the beginning of a new life: *remissio peccati . . . ipsa resurrectio*. "His constantly and firmly held view, even more deeply understood later than in 1513-15, that 'to be justified without merit' = 'to be resurrected [to be born again]' = 'to be sanctified' is a pregnant formulation of his Christianity." So much being said, it is not necessary to draw out Luther's doctrine further, but it will suffice to refer to the Histories of Doctrine, to Köstlin, *Luthers Theologie* (2nd ed. 1901; see Index, *s.v.* "Rechtfertigung," and I, 349), and especially to Thieme, *Die sittliche Triebkraft des Glaubens: eine Untersuchung zu Luthers Theologie* (1895), pp. 103-314.

From Luther and the other Reformers the NT doctrine went over to the Protestant churches without essential modification, and has remained their nominal testimony until the present. A classic expression of it, which may be taken as representing evangelical Christendom, is the 11th of the 39 Articles of Religion of the Church of England: "We are accounted righteous before God only for the merit of Our Lord and Saviour Jesus Christ by faith, and not for our own works or deservings: wherefore that we are justified by faith only is a most wholesome doctrine and very full of comfort, as more largely is expressed in the Homily of Justification." It is true that at one time

Wesley's opponents accused him of departing from this doctrine, especially on account of his famous Minute of 1770, but this was due to a radical misunderstanding of that Minute, for to the last he held staunchly Paul's doctrine (see *Lutheran Quarterly* [Apr. 1906], pp. 171-75).

D. Schleiermacher. A new point of view was brought into modern theology by Schleiermacher, who started from the fundamental fact of Christian experience that we have redemption and reconciliation with Christ, which fact becomes ours by union with Christ through faith. This union brings justification with other blessings, but justification is not considered as even in thought a separate act based on Christ's death, but as part of a great whole of salvation, historically realized step by step in Christ. The trend of his teaching is to break down the distinction between justification and regeneration, as they are simply different aspects of union with Christ.

Ritschl carried forward this thought by emphasizing the grace of the heavenly Father mediated in the first instance through the Son to the Christian community, "to which God imputes the position toward him of Christ its founder," and in the second instance to individuals "as by faith in the Gospel they attach themselves to this community. Faith is simply obedience to God and trust in the revelation of his grace in Christ." This brings sinners into fellowship with God which means eternal life, which is here and now realized, as the Fourth Gospel points out, in lordship over the world (cf. Franks in *DCG,* I, 922f.). The judicial or forensic aspect of justification so thoroughly in-wrought in Paul's thought is denied by Ritschl. "In whatsoever way we view the matter," he says, "the attitude of God in the act of justification cannot be conceived as that of a judge" (*Christian Doctrine of Justification and Reconciliation* [Eng. tr. 1900], p. 90). W. N. Clarke agreed with Schleiermacher in eliminating justification as a separate element in the work of salvation, and harked back to the legalistic view in making it dependent on the new life and subsequent to it (*Christian Theology* [1898], pp. 407f.). No book had as much influence in destroying the NT conception of justification among English-speaking readers as that of J. H. Newman (*Lectures on Justification* [3rd ed. 1874]), which contains some of the finest passages in religious literature (pp. 270-73, 302, 338f.), but which was so sympathetic to the Tridentine view that the author had nothing essential to retract when he joined Rome in 1845. "Whether we say we are justified by faith, or by works, or by sacraments, all these but mean this one doctrine that we are justified by grace which is given through sacraments, impetrated by faith, manifested in works" (p. 303).

E. Twentieth Century. If many nineteenth-century theologians tended to regard the biblical and evangelical doctrine of justification as artificial, several forces came together in the 20th cent. to reverse the situation. Of these the most important are as follows.

New lexical and exegetical study showed that, while the righteousness of God is certainly not an imparted righteousness, nevertheless in a verse like Rom. 10:4 it implies an element of power (cf. E. Käsemann, *Romans* [Eng. tr. 1980]) that prevents it from being a purely verbal matter. The many passages which suggest a *fait accompli* when speaking of justification (e.g., Rom. 8:30; 1 Cor. 6:11) support the view that this dimension has also to be taken into account even though it may not be the dominating aspect.

Schweitzer's eschatological reassessment of the teaching of Jesus (*Quest of the Historical Jesus* [1906]), while it found few supporters in its original form, opened up a parallel train of research in which emphasis has come to be placed on the element of eschatological realization in the work of Jesus. Hence it is no longer possible to think of a *purely* forensic justification. Certainly believers do not yet enjoy the sanctity that will be theirs at the last day. To that extent one may truly speak of a declared or imputed righteousness. The forensic aspect is not in dispute. On the other hand, there is an element of the "already" as well as the "not yet" in the justifying work of God in Christ. The righteousness which is declared to be ours is a real and not a fictional righteousness. The crucial victory has been won, the critical decision made, the turning point passed. Believers belong even now to the new age in which the true reality is that which is reckoned to be theirs because they have put their faith in Christ. The last things, being future, are also present. Justification carries a reference to the future which is present because, as God's future, it impinges already on the present.

Renewed study of the Reformation reinforced this understanding by focusing on the creative power of the Word of God. Luther, Zwingli, Calvin, and indeed all the leading Reformers found in God's Word a vital force which made it totally impossible to think of any statement of God's as merely a matter of words. As Zwingli pointed out in *The Clarity and Certainty of the Word of God* (*LCC* [XXIV], pp. 59ff.), when God says a thing it infallibly comes to pass according to His will. This finds illustration at creation. God says: "Let there be light," and at once light exists and begins to shine. The healing ministry of Jesus provides further examples of this certainty of God's Word to accomplish what it declares or commands. The leper finds instantaneous restoration when Jesus issues the creative imperative: "Be clean." Similarly God's justifying of the ungodly has the force of more than a mere declaration. On the basis of Christ's atoning work, God pronounces righteous those who believe in Him even though they are unquestionably sinful and guilty in themselves. When He does this, they do not at once become intrinsically sinless and innocent, but they do enter into the new life in Christ in which the innocence and sinlessness which will finally be theirs is already the true reality of their life and being in virtue of the divine acquittal. The words of justification are judicial but they are not on that account empty of all the force of the God who creates as well as justifies by the Word.

A fresh appreciation of the vicarious nature of the ministry of Christ cooperated with the other factors to shed a new and powerful light on justification. Emil Brunner in *The Mediator* and even more so Karl Barth in *CD,* IV/1, 211-283 ("The Just Judge Judged in our Place") and 514-642 ("The Justification of Man") (cf. also II/2, 552-781) gave prominence to this aspect. God spoke His Word of justifying power in Jesus Christ, who by His representative death and resurrection brought the old life of sinners to its end and initiated the new life of righteousness. The righteousness which is God's gift in justification has power because it is the righteousness of Jesus Christ for us. The last things have come in virtue of the work of God done in our place and on our behalf in His Son. The justifying Word accomplishes what it declares because this Word is Christ, in whom the sin of the world has in fact been carried away and the righteousness of God's believing people has in fact come. When the vicarious nature of Christ's work is ignored, forgotten, or resisted, justification unavoidably loses its reality. Conversely an understanding of this factor leads naturally and necessarily to the new facts of God which provide the rationale and the reality of the divine sentence.

These facts enable us to say, as Barth emphasized, that God justified Himself in His justification of the wicked. He did this in three ways. First, He justified His creation of beings that could bring upon themselves the misery and

ruin of the fall and temporal and eternal death. He did this by His gracious intervention on their behalf. Second, He justified His omnipotence by not allowing the rebellious will of the creature to prevail over His own righteous will as the Creator. Third, He justified His intervention by protecting it against any possible accusation of caprice, injustice, or unreality. No one can come before God and say that He is unjust in His creating, overruling, or justifying work. He spoke and acted in Jesus Christ in such a way that He is both just and justified in all His ways, not least in His justifying work.

Finally, biblical and historical investigation brought out afresh the strength of the bond between justification and sanctification. Barth again took the lead here in *CD*, IV/1, 514-642 and IV/2, 533-553 ("Justification and Sanctification"). He pointed out that Calvin himself incorporated justification in his more general teaching on the Christian life. This emphasis in turn opened the door for Roman Catholic reappraisal, as in Hans Küng's *Justification* (Eng. tr. 1964), which advanced the audacious thesis that Calvin held the Catholic doctrine that Luther had distorted on the one side and Trent (in necessary correction) had also distorted on the other. Roman Catholicism in general seems not to have been persuaded by Küng, and many scholars view with reservations the attempt to relate justification and sanctification more closely in Calvin, who undoubtedly understood justification itself very much as Luther did. Nevertheless, there is incontestable truth and value in the insight that justification in no sense stands alone but forms part of a divine sequence which begins with God's foreknowledge and predestination, includes sanctification, and concludes only with glorification (Rom. 8:30; cf. 1 Cor. 6:11). Precisely for this reason the righteousness of God that comes to expression in His justifying of the ungodly carries with it all the power of God in His eschatological work (Tit. 3:7), the work accomplished in the incarnate Word, which begins here and now with Christ's vicarious death and resurrection and concludes with His *parousia* and the death and resurrection of believers with Him.

With this twentieth-century restatement of the truth, and with the new facets that have been discovered, the older objections to the doctrine of justification have lost their cogency. The place of justification at the heart of the gospel can again be affirmed with confidence. It can be preached as well as taught with renewed vitality, urgency, and conviction as a realistic message of redemption for this and every age.

Bibliography.—In addition to the standard commentaries, dictionaries, and NT theologies, and the older books mentioned in the text, the following books may be particularly noted: *CD*, II/2; IV/1; IV/2; K. Barth, *Comm. on Romans* (Eng. tr. 1933); *Ethics of 1928-1929*, II (1978); J. Bennett, *Justification as Revealed in Scripture* (1840); H. Berkhof, *Christian Faith* (Eng. tr. 1979); G. C. Berkouwer, *Faith and Justification* (1954); E. Boehl, *Reformed Doctrine of Justification* (1946); G. Bornkamm, *Paul* (Eng. tr. 1971); J. Buchanan, *The Doctrine of Justification* (1867; repr. 1954); J. Calvin, *Inst.* iii.11-18; G. Downame, *A Treatise of Justification* (1633); H. Küng, *Justification* (Eng. tr. 1964); M. Luther, *Lectures on Romans* (*LCC*), XV; J. Owen, *The Doctrine of Justification by Faith* (*Works*, V, 1862); H. Ridderbos, *Paul* (Eng. tr. 1975); P. Schaff, *Creeds of Christendom*, III: *Evangelical Creeds* (1919); H. Thielicke, *The Evangelical Faith*, III (Eng. tr. 1982).

JUSTIFY; JUSTIFIED. These terms translate (1) various forms of Heb. *ṣāḏaq*; (2) various forms of Gk. *dikaióō*; (3) the Greek phrase *apodoúnai lógon*. (1) In Job 32:2, Elihu was angry at Job because he "justified himself rather than God" (NEB "made himself out more righteous than God"), i.e., he considered himself morally "in the right" and God "in the wrong" concerning his physical trial. Later, in 33:32, Elihu challenges Job to "speak, for I desire to justify you" (NEB "I would gladly find you proved right"). By this he means that he would gladly acknowledge Job to be "in the right" if the latter could produce sufficient evidence to convince him. In 40:8, God asks Job, "Will you condemn me that you may be justified?" (NEB "Dare you . . . put me in the wrong that you may be right?"), i.e., will you assert that I am "in the wrong" in this trial, thus leaving yourself as the one who is "in the right"? In Ps. 51:4 (MT 6), the guilt-ridden psalmist acknowledges that God is "justified in [His] sentence and blameless in [His] judgment" (NEB "proved right in [His] charge and just in passing sentence"), i.e., He is completely within the bounds of moral propriety in judging him. In Prov. 17:15 occurs the maxim "He who justifies the wicked . . . [is] an abomination to the Lord." The forensic nature of *ṣdq* is well illustrated here, since the proverb refers to those perverse judges who acquit the guilty and convict the innocent (often for a bribe; cf. Isa. 5:23). In Isa. 43:8-15, a trial speech with many interpretative difficulties, God challenges the gods of the other nations to "bring their witnesses to justify them" (v. 9c; NEB "produce witnesses to prove their case"), i.e., bring forward their people who will attest their past record of seeing into the future and thus wisely guiding their people (v. 9b; the forensic nature of *ṣdq* is also clearly demonstrated here). (2) In Mt. 11:19, which is also difficult, the Evangelist applies to Jesus the proverb "wisdom is justified by her deeds" (var. "her children"; cf. Lk. 7:35; NEB "God's wisdom is proved right by its results"), by which he probably means that Jesus, the divine Wisdom (or the One through whom the divine wisdom works), is shown to be "in the right" by the results He obtains, i.e., His miraculous healings. In Lk. 7:29, another difficult passage, Luke is probably making a parenthetical comment in his narrative with the statement that "all the people and the tax collectors justified God, having been baptized with the baptism of John" (NEB "all the people, including the tax-gatherers, praised God, for they had accepted John's baptism"), i.e., they acknowledged, by being baptized by John, that God's judgment on them as announced by John was just. In 10:29, after Jesus implies that the young lawyer is deficient in duty (v. 28), he seeks "to justify himself," i.e., to vindicate himself for not doing that duty. In 16:15, Jesus characterizes the Pharisees as those who "justify [themselves] before men" (NEB "impress [their] fellowmen with [their] righteousness"), i.e., make it a point to demonstrate publicly their righteousness by various acts of piety. In the familiar story of the Pharisee and the tax-collector in 18:14, Jesus declares that the latter "went down to his house justified rather than the other" (NEB "went home acquitted of his sins"), by which He means that he was morally "in the right" and the Pharisee was not. (3) The phrase *apodoúnai lógon* (lit. "give a reason") occurs in Acts 19:40, another difficult passage, where the town clerk of Ephesus warns an agitated crowd, "We are in danger of being charged with rioting today, there being no cause that we can give to justify this commotion," i.e., to warrant the existence of the meeting. For the theological doctrine *see* JUSTIFICATION.

J. E. H.

JUSTLE jus'əl [hithpalpel of Heb. *šāqaq*]. An archaic AV term for "rush to and fro" (cf. NEB "jostle") in Nah. 2:4 (MT 5).

JUSTUS jus'təs [Gk. *Ioustos*]. Three men of this name are mentioned in the NT.

1. JOSEPH BARSABBAS, whose Roman surname was Justus (Acts 1:23).

2. A Corinthian proselyte (Gk. *sebómenos tón theón*), whose house adjoined the synagogue and who received Paul when the Jews opposed him (Acts 18:7). He was probably a Roman citizen, one of the *coloni*, and so he would have been of assistance to the apostle in his work among the better class of Corinth. There is some disagreement among MSS regarding the name. The TR gives Justus alone. The RSV, following WH, Tisch., B, D, gives Titius Justus; but other MSS give Titus Justus. E. J. Goodspeed identifies him with the Gaius of Rom. 16:23 (*JBL*, 69 [1950], 382f.). Paul continued to lodge with Aquila and Priscilla but made the house of Justus his own synagogue.

3. A Jew, JESUS JUSTUS.

S. F. HUNTER

JUTTAH jut'ə [Heb. *yuṭṭâ* (Josh. 21:16), *yâṭṭâ* (15:55); LXX *Tany, Itan* (15:55), *Ietta* (15:55 A)]. A town in the hill country of Judah, mentioned with Maon, Carmel, and Ziph; a Levitical city (Josh. 21:16). In some versions of the LXX it occurs (Gk. *Iota*) in 1 Ch. 6:57. In Eusebius's *Onom.* (266.49; 133.10) a large village called Juttah is described as eighteen Roman miles from Eleutheropolis. This agrees with the position of Yuṭṭā, a large and prosperous Moslem village, 1140 m. (3740 ft.) above sea level, 8.5 km. (5.3 mi.) S of Hebron and 25 km. (15.5 mi.) from Beit Jibrîn (Eleutheropolis). There are many rock-cut tombs and ancient winepresses all around the village.
