B.A., M.A., Ph.D., Associate Professor and Chairman of the Department of Hebrew and Semitic Studies, University of Wisconsin, Madison, Wisconsin.

SCHRECKENBERG, HEINZ
Ph.D., Lecturer, University of Münster, West Germany.

SCHULTZ, SAMUEL J.
Th.D., Emeritus Professor of Biblical Studies and Theology, Wheaton College and Graduate School, Wheaton, Illinois.

SEALE, MORRIS S.
B.A., Ph.D., D.D., Former Professor, Near East School of Theology, Beirut, Lebanon.

SHEA, WILLIAM
Ph.D., Associate Professor of Old Testament, Andrews University Theological Seminary, Berrien Springs, Michigan.

SHELL, WILLIAM A.
B.A., M.Div., M.A., Assistant Professor of Biblical Studies, Reformed Bible College, Grand Rapids, Michigan.

SMALLEY, STEPHEN S.
M.A., B.D., Ph.D., Canon Residentiary and Precentor, Coventry Cathedral, Coventry, England.

SMEDES, LEWIS B.
A.B., B.D., Th.D., Professor of Theology and Ethics, Fuller Theological Seminary, Pasadena, California.

SMITH, EDGAR W., JR.
B.A., B.D., Ph.D., Project Editor, *ISBE* Revision.

SMITH, WILBUR M.
D.D., D.Litt., Late Professor of English Bible, Fuller Theological Seminary, Pasadena, California.

SODERLUND, SVEN K.
B.A., M.C.S., Ph.D., Assistant Professor of Biblical Languages, Regent College, Vancouver, British Columbia, Canada.

STEARNS, WALLACE NELSON*
B.D., Ph.D., Professor of Biblical History and Literature, Fargo College, Fargo, North Dakota.

STEIN, ROBERT H.
B.A., B.D., S.T.M., Ph.D., Professor of New Testament, Bethel Theological Seminary, St. Paul, Minnesota.

STEK, JOHN H.
A.B., B.D., Th.M., Associate Professor of Old Testament, Calvin Theological Seminary, Grand Rapids, Michigan.

STEWART, ROY A.
M.A., B.D., M.Litt., Retired Minister and Biblical Scholar, Church of Scotland, Edinburgh, Scotland.

STRANGE, JAMES F.
B.A., M.Div., Ph.D., Associate Professor of Religious Studies, University of South Florida, Tampa, Florida.

STRATTON-PORTER, GENE*
Author and Illustrator; Special Writer on Birds and Nature.

SWEET, LOUIS MATTHEWS*
M.A., S.T.D., Ph.D., Professor of Christian Theology and Apologetics, The Biblical Seminary, New York, New York.

TAPPEINER, DANIEL A.
B.S., B.D., Ph.D., President and Associate Professor of Theology, Center for Theological Studies, Newport Beach, California.

TERIAN, ABRAHAM
B.A., M.A., Associate Professor of Intertestamental and Early Christian Literatures, Andrews University, Berrien Springs, Michigan.

THOMPSON, JAMES W.
B.A., M.A., B.D., Ph.D., Instructor of Biblical Studies, University of Texas, Austin, Texas.

TIFFANY, FREDERICK C.
B.A., M.Div., Ph.D., Assistant Professor of Old Testament, Earlham School of Religion, Richmond, Indiana.

TOGTMAN, RAYMOND C.
A.B., Former Editorial Assistant, *ISBE* Revision Project.

TURNER, GEORGE A.
A.B., B.D., S.T.B., S.T.M., Ph.D., Professor Emeritus of Biblical Literature, Asbury Theological Seminary, Wilmore, Kentucky.

URQUHART, JOHN*
Minister, Author, Editor, Member of the Victoria Institute, Melbourne, Australia.

VAN ALSTINE, GEORGE A.
B.A., B.D., Th.M., Pastor, Altadena Baptist Church, Altadena, California.

VAN BROEKHOVEN, HAROLD, JR.
B.A., M.A., M.Div., Th.M., Pastor, Tabernacle Baptist Church, Hope, Rhode Island.

VANELDEREN, BASTIAAN
A.B., B.D., M.A., Th.D., Professor of New Testament, Calvin Theological Seminary, Grand Rapids, Michigan.

VAN SELMS, ADRIANUS
D.Th., Emeritus Professor of Semitic Languages, University of Pretoria, Republic of South Africa.

VERHEY, ALLEN D.
B.A., B.D., Ph.D., Associate Professor of Religion, Hope College, Holland, Michigan.

VOGEL, ELEANOR K.
B.A., M.Ed., Former Archeological Assistant to Nelson Glueck, Cincinnati, Ohio.

VOS, HOWARD F.
B.A., Th.M., Th.D., M.A., Ph.D., Professor of History and Archaeology, The King's College, Briarcliff Manor, New York.

VUNDERINK, RALPH W.
A.B., B.D., M.A., Ph.D., Former Editorial Associate, *ISBE* Revision Project.

WALKER, W. L.*
D.D., Congregational Minister, Glasgow, Scotland.

WALLACE, HENRY*
Pastor, Parkhead Congregational Church, Glasgow, Scotland.

WALLACE, RONALD STEWART
B.S., M.A., Ph.D., Professor Emeritus of Biblical Theology, Columbia Theological Seminary, Decatur, Georgia.

CONTRIBUTORS

WALTERS, STANLEY D.
B.A., B.D., Th.M., Ph.D., Professor of Old Testament Languages and Literature, Knox College, Toronto, Ontario, Canada.

WALTKE, BRUCE K.
A.B., Th.M., Th.D., Ph.D., Professor of Old Testament, Regent College, Vancouver, British Columbia, Canada.

WARFIELD, BENJAMIN BRECKINRIDGE*
D.D., LL.D., Litt.D., Professor of Didactic and Polemic Theology, Theological Seminary of the Presbyterian Church in the U.S.A., Princeton, New Jersey.

WATSON, D. M.
B.A., M. Div., Pastor, Aalen, West Germany.

WATTS, JOHN D. W.
B.A., Th.M., Ph.D., Professor of Old Testament, Fuller Theological Seminary, Pasadena, California.

WEAD, DAVID W.
A.B., B.Th., B.D., D.Th., Minister of Boones Creek Church of Christ, Johnson City, Tennessee.

WEDDLE, FOREST
A.B., M.S., Ph.D., Professor of Biblical Archaeology and Geography, Fort Wayne Bible College, Fort Wayne, Indiana.

WEIR, THOMAS HUNTER*
B.D., M.A., M.R.A.S., Lecturer in Arabic, University of Glasgow, Scotland.

WELCH, E. DOUGLAS
B.S., M.Div., M.A., Ph.D., Scholar in Biblical and Ancient Near Eastern Studies.

WESSEL, WALTER W.
B.A., M.A., Ph.D., Professor of New Testament and Chairman of the Department of Biblical and Theological Studies, Bethel College, St. Paul, Minnesota.

WHITELAW, THOMAS*
M.A., D.D., Minister of King Street United Free Church, Kilmarnock, Scotland.

WIEAND, DAVID JOHN
A.B., M.A., B.D., Ph.D., Professor of Biblical Literature, Bethany Theological Seminary, Oak Brook, Illinois.

WILLIAMS, CHARLES B.*
M.A., B.D., Ph.D., Professor of Greek and Ethics, Union University, Jackson, Tennessee.

WILLIAMS, WILLIAM C.
B.A., M.A., M.A.Rel., Ph.D., Professor of Old Testament, Southern California College, Costa Mesa, California.

WILLIAMSON, H. G. M.
B.A., M.A., Ph.D., Lecturer in Hebrew and Aramaic, Cambridge University, Cambridge, England.

WILLIS, LLOYD
B.A., M.A., Assistant Professor of Religion, Spicer Memorial College, Pune, India.

WOLF, HERBERT M.
B.A., Th.M., Ph.D., Associate Professor of Old Testament, Wheaton Graduate School, Wheaton, Illinois.

WOLF, HORACE J.*
B.H.L., M.A., Associate Rabbi of Berith Kodish Congregation, Rochester, New York.

WOUDSTRA, SIERD
A.B., B.D., Th.M., Th.D., Associate Professor of Religion and Theology, Calvin College, Grand Rapids, Michigan.

WRIGHT, CHRISTOPHER J. H.
M.A., Ph.D., Lecturer in Old Testament, Union Biblical Seminary, Pune, India.

WYATT, ROBERT J.
B.A., M.A., Editorial Associate, *ISBE* Revision Project.

WYPER, GLENN
B.A., B.D., Th.M., Registrar and Chairman of the Department of Biblical Studies, Ontario Bible College, Willowdale, Ontario, Canada.

YOUNG, FREDERICK E.
A.B., B.D., Ph.D., Dean of the Seminary and Professor of Old Testament, Central Baptist Theological Seminary, Kansas City, Kansas.

YOUNGBLOOD, RONALD F.
B.A., B.D., Ph.D., Professor of Old Testament, Trinity Evangelical Divinity School, Deerfield, Illinois.

PUBLISHERS' NOTES TO VOLUME TWO

As a convenience to the readers, the Abbreviations (with a few additions), the Transliteration Scheme, and the Pronunciation Key are included in this volume as well as in Volume I. Volume II also has its own list of Contributors. It does not appear necessary, however, to repeat in this volume the Introduction that appears in Volume I or to reprint the full-color map section with its index. Omission of the maps has allowed the section of full-color photographs to be doubled in size.

Completion of Volume II, as well as the work on the forthcoming Volumes III and IV, has been aided considerably by the addition of Consulting Editor Lawrence T. Geraty to the editorial team. The publishers' staff, too, has seen some changes: in addition to the persons mentioned in the Preface of Volume I, we are grateful to Gary A. Lee, Robert J. Wyatt, and James E. Hoffine for their work as Editorial Associates; to Kimberly Adams for work with the photographs and editing of English style; to Norma Garthe for typesetting; and to Louise Bauer for mapmaking and other technical help in the final stages of production.

THE PUBLISHERS

ABBREVIATIONS

GENERAL

A	Codex Alexandrinus (*See* TEXT AND MSS OF THE NT I.B)
abbr.	abbreviated, abbreviation
act.	active
Akk.	Akkadian
Amer. Tr.	J. M. P. Smith and E. J. Goodspeed, *The Complete Bible: An American Translation*

E (ELOHIST). *See* CRITICISM II.

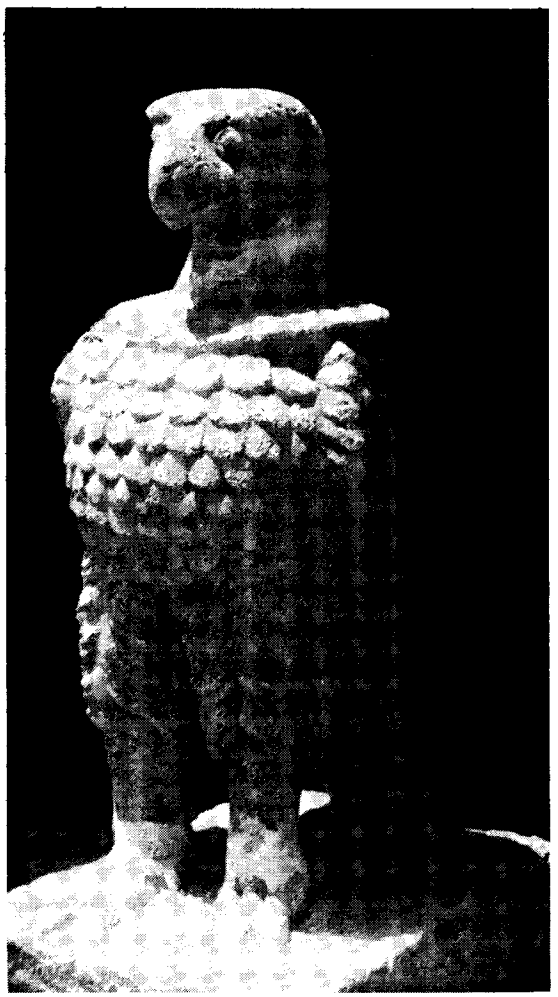
EAGLE [Heb. *nešer*; Aram. *nᵉšar* (Dnl. 4:30; 7:4); Gk. *aetós* (Mt. 24:28; Lk. 17:37; Rev. 4:7; 8:13; 12:14)]; NEB also VULTURE, GRIFFON VULTURE (15 times). Two root meanings have been suggested for *nešer*: "gleaming flash" or "rushing sound" (G. R. Driver) and "tear with the beak" (H. B. Tristram). Both apply equally well to the Old World vulture and to the eagle.

The ambiguity of the term *nešer*, which poses a problem for translators, has been explained as a result of the distance from which these great birds are seen in flight (e.g., Cansdale, p. 124). The Bible, however, gives evidence of close and accurate observation of these diurnal birds of prey, great numbers of which lived in ancient Palestine. Thus the ambiguity in *nešer* derives not so much from confusion of eagles with vultures as from interest in their similarities rather than their differences. Both birds were notably similar in: size, strength, and longevity; magnificent flight; regal appearance (often symbolizing monarchal power and authority); nesting patterns; and feeding habits — both ate carrion and prey, although the eagle was better equipped for hunting. Their differences, therefore, are rarely important in the Bible.

In fact, the Hebrews were not wholly incorrect in grouping the vulture and the eagle together. Although superficially like the New World vultures (e.g., the Andean or California Condor) of the family *Cathartidae*, the Old World vultures of the Middle East are classed with eagles in family *Accipitridae* because of their similar structure.

While *nešer* may refer to large diurnal birds of prey in general, especially in flight, it is possible to be more specific by elimination. Eight species of eagles and four of vultures appear in Palestine. Most of the eagles are passing migrants and are too small to be called *nešer* (which appears to designate the largest group of birds; cf. Driver). Of the eagles, then, the Golden (*Aquila chrysaetos*) and perhaps the Imperial (*Aquila heliaca heliaca*) are most probably in mind. Two vultures (the Lammergeier, or Great Bearded, and the Black Vulture) fit most of the qualifications but are less frequently observed in Palestine and may be more specifically designated *peres* and *ʿozniyâ*, respectively. A third, the Egyptian, is rather too small. Therefore, the fourth vulture, the Griffon, best fits all the requirements. It is a huge,

The eagle was the patron of the armies of Hatra (a city 50 km. [30 mi.] NW of Asshur). Relief, 1st cent. A.D. (State Antiquities Organization, Republic of Iraq)



handsome bird that must have been very numerous and thus a constant feature of ancient Palestine, especially in temple areas and battlefields. Its likeness appears in ancient Egyptian and Assyrian pictures. Although certainty is not important, the Griffon Vulture is probably in mind more often than the eagle in the biblical references.

Except for Lev. 11:13 and Dt. 14:12, in which *nešer* heads the list of unclean birds, all other references are metaphorical or illustrative, which may be grouped as follows:

(1) Flight (Ex. 19:4; Dt. 28:49; 2 S. 1:23; Job 9:26; Prov. 23:5; 30:19; Isa. 40:31; Jer. 4:13; 48:40; 49:22; Lam. 4:19; Ob. 4; Hab. 1:8; Rev. 4:7; 8:13; 12:14). The ancient Hebrew's fascination with the "eagle's" flight is expressed in Prov. 30:18f.: "Three things are too wonderful for me . . . the way of an eagle in the sky." Except for descriptions of the bird's carrying away its prey in flight (for which vultures' talons are too weak), the references may be to either the vulture or the eagle.

(2) Portents of death and destruction (Jer. 48:40; 49:22; Hos. 8:1; Mt. 24:28; Lk. 17:37; perhaps Lam. 4:19; Hab. 1:8). The prophetic references seem to picture carrion birds wheeling over a dying victim, Jerusalem or Israel. Jesus' reference is to vultures, for eagles do not gather. Besides these uses of *nešer* or *aetós* there are many allusions in the OT to scavenger birds (vultures) over battlefields (cf. Parmelee, pp. 125ff.).

(3) Nesting patterns (Dt. 32:11; Job 39:27-30; Jer. 49:16; Ob. 4). One of the best biblical descriptions of animal life (from a naturalist's viewpoint) is Job 39:27-30, which applies to both birds, although more completely to the vulture. The image is, on the one hand, of the bird's solicitude for its young, an illustration of God's care for Israel (Dt. 32:11). On the other hand, it is of the bird's security in its inaccessible cliff nest, although the point is made with regard to Edom's false security in Petra (Jer. 49:16; Ob. 4). *See also* NEST.

(4) Appearance (Ezk. 1:10; 10:14; Dnl. 4:33 [MT 30]; 7:4; Mic. 1:16). Mic. 1:16 is the most obvious OT allusion to the Griffon Vulture and its bald head (the RSV translation is poor). While the bird's regal bearing is usually intended, the reference in Dnl. 4:33 is hardly complimentary to the king!

(5) Youthful vigor (Ps. 103:5; Isa. 40:31). Ps. 103:5 may refer to the eagle's molting (cf. JB mg.) or to its incredible longevity (100 years); or the "youth" may be synonymous with "strength," as in Isa. 40:31 (so J. Duns, *Biblical Natural Science*, II [1863], 419f.).

Perhaps the most complete and best use of the eagle image is in the parable or riddle of Ezk. 17:1-21, where the eagle is a symbol of royal splendor and power over his prey (as explained in vv. 11-21).

EANES ē'ə-nēz (AV, 1 Esd. 9:21). *See* MAASEIAH.

EAR [Heb. *'āḇîḇ* (Ex. 9:31), *'āzan, 'ōzen, karmel* (Lev. 2:14), *mᵉlîlâ* (Dt. 23:25 [MT 26]), *šāmaʿ* (1 K. 8:52; Ps. 55:19 [MT 20]), *šibbōleṯ*; Gk. *akoḗ, akoúō* (Mt. 28:14), *enōtízomai* (Acts 2:14), *oús, stáchys, ōtíon*]; AV also AUDIENCE, HEAR, HEARING, HEARKEN; NEB also ATTEND, "by report," HEAR, HEARD, HEARING, LISTEN, "pay attention," "pay heed," TURN (Ps. 86:1), etc. The physical organ for the reception of sound in both man (Ps. 49:4 [MT 5]) and beast (Prov. 26:17). The most important function of ears was the receiving of information and thereby correctly aligning life to the realities in control of existence.

As external parts of the body, the ears were subject to beautification (Gen. 35:4; Ezk. 16:12) and, in time of war, sadistic torture (Ezk. 23:25). The ear of the slave who voluntarily commited himself to perpetual service was to be pierced with an awl by the master (Ex. 21:6; Dt. 15:17). This was a public (at "the door"), legal ceremony binding the servant to his master forever. Similarly, the marking of the priests with blood on the right toe, thumb, and ear (Lev. 8:23f.) ordained them for perpetual servitude to their master by giving their ears over to His exclusive control.

Anthropomorphically, God too has ears and can hear the petitions of those who call upon Him (1 S. 8:21; Isa. 59:1; Jas. 5:4). This is in stark contrast to the gods of other nations (Ps. 135:17) and highlights through anthropomorphic language the accessibility and personal relationship of Yahweh to man. But He also hears the arrogance of man, responds appropriately (2 K. 19:28), and may even close His ears (Ezk. 8:18).

In typical Semitic fashion, the ear also stands for the totality of its function, i.e., the whole faculty of hearing in the fullest range of its possibilities. The ear is considered the organ that both receives and understands communications of every sort (Dt. 31:30; Job 12:11; 13:1; Prov. 18:15; Isa. 33:15). The function of the ear makes it often synonymous with the "heart" or "mind" as the organ of cognition (Prov. 2:2; 18:15). This relationship between "hearing" and "understanding" leads to many idiomatic uses: "to incline" or "give" ear means to hear and be favorably disposed toward what is heard (Ps. 31:2 [MT 3]; Isa. 1:10); the opposite of a willingness to receive or accept is having "uncircumcised," "heavy," or "deaf" ears (AV, NEB, Jer. 6:10; RSV "closed"; Acts 7:51; Isa. 6:10; 43:8); "itching" ears are ears disposed to hear only what is agreeable to their understanding (2 Tim. 4:3).

God has created the ear (Prov. 20:12). Therefore, man has a great responsibility to use his ears wisely, allowing God to open them so life can be aligned with reality. There is, then, the ear that hears without comprehension or appreciation (Dt. 29:4 [MT 3]; Ps. 115:6; Isa. 48:8; Ezk. 12:2); on the other hand, if one is willing, God can open the ear to life (Job 36:10, 15; Ps. 40:6 [MT 7]). The greatest achievement of the ear is to hear as a prophet (Isa. 22:14; 50:4f.), for the ear is almost always given priority over the eye for the reception of revelation. "Hear, O Israel" is the most important challenge of Israel's faith (Dt. 5:1; 6:3f.; Jer. 2:4). The theologically troublesome charge to Isaiah (6:9), "Go, and say to this people: 'Hear and hear, but do not understand,'" which is echoed in the NT (Mt. 13:14f.; Mk. 8:18), has often been explained in terms of divine sovereignty (so *TDNT*, V, 548). If this command is an exercise of biblical irony, however, then there is no question of divine morality involved; "the command is the counterpart of the ironic quotation in ch. 5:19, where the people sarcastically express their eagerness to see and hear. And the command ironically says, 'Try to make them worse than they are! Give them more ignorance, extend their incomprehension!'" (Good, p. 137). This is not what Isaiah consciously does, of course, but it is what results from further preaching to a people who refuse to hear aright.

The NT also recognizes the importance of the ear in receiving revelation, noting that such hearing must be accompanied by a willingness to appropriate what is heard; hence the frequent challenge, "He who has ears to hear, let him hear" (Mt. 11:15; Mk. 4:9; Lk. 14:35).

The importance of this challenge is heightened by the clarification given by John: "He who has an ear, let him hear *what the Spirit says*" (Rev. 2:7, 11, 17, 29; 3:6, 13, 22). Therefore, Jesus heals the deaf (Mk. 7:31-37) in response to OT prophecy (Isa. 35:5), for the Kingdom cannot come if men cannot hear the word of God.

The OT and NT mention "ears of grain," not of corn, which was unknown, but of barley (Ex. 9:31), wheat (Dt. 23:25), and no doubt other cereals (Lev. 2:14). The first month of the Hebrew calendar took its name *'āḇîḇ* from the barley ear, which ripened at this time of year (BDB, p. 1).

Bibliography.–E. M. Good, *Irony in the OT* (1965); *TDNT*, V, *s.v.* οὖς (Horst); *THAT*, I, *s.v.* שָׁמַע (Liedke). K. H. MAAHS

EAR; EARED; EARING. The Hebrew verbs *ḥāraš* (1 S. 8:12) and *'āḇaḏ* (Dt. 21:4; Isa. 30:24) are rendered by the AV "ear," "eared," an obsolete term meaning "to plow" (cf. RSV). The participle *ḥārîš* is rendered "earing" by the AV in Gen. 45:6 and Ex. 34:21 (RSV "plowing"). *See* PLOW.

EARLY. In the OT "early" occurs most frequently to translate the Hebrew verb *šāḵam* (e.g., "rise early" in Gen. 20:8; 21:14; 22:3; 26:31; 28:18; Ex. 24:4; etc.; "rise up early" in Gen. 19:2; Ex. 8:20; 9:13; 32:6; etc.). The RSV uses "early morning" twice to translate *'ôr* (Ruth 2:7; Neh. 8:3), and renders "early rain" for *yôreh* (Dt. 11:14) and *môreh* (Ps. 84:6 [MT 7]; Joel 2:23). In Palestine the early rain is that which falls between late October and early December (cf. Jas. 5:7; *see* RAIN). In Ezk. 27:17 the RSV employs "early figs" to translate Heb. *pannag* (AV "pannag"; NEB "meal"). This is the only occurrence of the Hebrew term, so its meaning is uncertain; it represents one of the articles of commerce of Judah and Israel, probably some kind of food. The LXX reads *kasía*, which is an Arabian spice. In Ps. 46:5 (MT 6) "early" has the sense of "speedily," rendering Heb. *bōqer*.

In the NT "early" renders Gk. *órthros* and related words (Lk. 21:38; 24:1, 22; Jn. 8:2), *prōî* with related *prōîa* (Mt. 20:1; Mk. 16:2; Jn. 18:28; 20:1) and *próïmos* (Jas. 5:7), and *archaíos* (Acts 15:7, 21; 21:16). *Órthros* and *prōî*, along with their cognates, refer exclusively to the morning. *Próïmos* is derived from *pró* rather than *prōî* (cf. Bauer, p. 713; see above on Dt. 11:4; Ps. 84:6; Joel 2:23). In Acts 15:7, 21 *archaíos* denotes the ancient times, while in 21:16 it is used of a disciple "of long standing" (Bauer, p. 110).

EARNEST. *See* GUARANTEE.

EARRING [Heb. *nezem*] (Ex. 35:22; Jgs. 8:24-26); [*'āgîl*] (Nu. 31:50; Ezk. 16:12); NEB PENDANT. An ornament of some kind hanging from the ears, apparently worn by both sexes in oriental lands including Palestine from the earliest times. The Ishmaelite men were known for their golden earrings (Jgs. 8:24-26). Among the Greeks and Romans, as with Western peoples in general, its use was confined to females.

The first people known to have used earrings are the Sumerians, for whom they were magical amulets designed to protect the ear openings from infiltration by evil spirits that were thought to be the cause of disease.

Ancient earrings were usually fashioned from gold, finely wrought, and often set with precious stones, as supported by archeological discoveries. The jewels were worn for protection as well as for decoration. Various kinds of earrings have been unearthed from different levels at numerous Palestinian sites, including Gezer, Megiddo, Tell Jemmeh, Taanach, and Tell el-'Ajjûl.

Copper, gold, and silver earrings from graves at Asshur (predominantly 9th-7th cents. B.C.) (Staatliche Museen, Berlin)

EARTH [Heb. *'ereṣ*, *'ᵃḏāmâ*, also *'āpār*–'dust' (Gen. 26:15; Job 7:21; etc.), *'aḏmaṯ-'āpār* ("dust of the earth," Dnl. 12:2); Aram. *'ᵃra'* (Ezr. 5:11; Jer. 10:11; Dnl. 2–7), *'ᵃraq* (Jer. 10:11), *yabbeštā'* (Dnl. 2:10); Gk. *gḗ*, also *katachthónios*–'under the earth,' 'subterranean' (Phil. 2:10)].

While used in most of the senses of *'aḏāmâ*, *'ereṣ* often indicated the earth as a planet rather than as soil or ground. Although the Hebrews occasionally thought of the earth as spherical (Isa. 40:22), they generally imagined it to be flat (cf. Isa. 42:5; 44:24), poised in space (Job 26:7) or situated on a vast ocean (Ps. 24:2; 136:6), and established on firm foundations (Ps. 104:5) that were sometimes described in terms of pillars (1 S. 2:8; Job 9:6; Ps. 75:3 [MT 4]) or props (Prov. 8:29; cf. 2 S. 22:16). The WORLD was thought to have four edges or corners (Isa. 11:12; cf. Ezk. 7:2; Job 38:13), but apart from this there was no speculation about the physical shape of the earth. It should be remembered that many of the foregoing descriptions occur in poetic passages and must be evaluated accordingly. The Sumerian pictograph for earth (ki), comprising a sphere with shading in the middle to afford perspective, indicated an early acceptance of a round rather than a flat earth. The outlook of the ancient Near Eastern peoples was regional, and areas that extended beyond known boundaries were usually described by such vague terms as "the islands" (cf. Isa. 40:15).

The earth and its fulness were the Lord's (Ps. 24:1; 1 Cor. 10:26), and its productivity depended largely upon man's obedience to God's will. The Israelites were promised repeatedly that an increase of crops would result from following the divine precepts (cf. Dt. 28:4f.; etc.), while disobedience would be punished by failure and famine (cf. Dt. 28:16-18; etc.). This type of theological monism stood in sharp contrast to the fertility notions

of other ancient Near Eastern religions, in which the earth had to be impregnated by a deity before it could bear fruit. In general agreement with pagan thought, however, was the idea that shed blood polluted the land (cf. Gen. 4:11f.; Nu. 35:33f.; 2 S. 1:21; cf. 3 Aqht 35 [AQHT B iv 35 in *ANET*, p. 153]). Under both old and new dispensations the earth was to be given renewed life and productivity at the end of the age (Am. 9:13; Zec. 14:8; Rev. 21:1).

In the LXX and NT, *gḗ* was used as the equivalent of the MT *'ereṣ*, with *oikouménē* occurring on a few occasions as the rendering for the "inhabited earth."

R. K. H.

EARTH, CORNERS OF THE. The "corners" or "ends" of the earth are its "wings" (Heb. *kanᵉpôṯ hā'āreṣ*), i.e., its borders or extremities. Because the wing of a bird is used as a covering for its young, Heb. *kānāp* acquires the meaning of the extremity of anything stretched out. In Isa. 11:12; Job 37:3 the term means the coasts, boundaries, or extremities of the land surface of the earth. In Ezk. 7:2 the "four-corners" are the extremities of the land in the four cardinal directions. The concept of "extremities" also occurs in Rev. 7:1; 20:8 (Gk. *gonía*). R. K. H.

EARTH, ENDS OF THE. *See* EARTH, CORNERS OF THE.

EARTH, PILLARS OF THE. *See* WORLD.

EARTH, THE NEW. *See* ESCHATOLOGY III; HEAVENS, NEW.

EARTH, VAULT OF THE. In one passage it is said that God "founds his vault [Heb. *ᵃguddâ*] upon the earth" (Am. 9:6). It is not quite certain whether this dome or vault refers to the earth itself, or to the heavens arched above it. The latter is the usual interpretation, but in either case the reference is rather to the strength of the structure than to its form. The word implies something that is firmly bound together, hence an arch or dome because of its stability. *See also* WORLD.

EARTHEN VESSELS; EARTHEN FLASK; EARTHEN POT; EARTHENWARE [Heb. *ḥereś* (Prov. 26:23; Isa. 45:9), *kᵉlî-ḥereś* (Lev. 6:28 [MT 21]; 11:33; 14:5, 50; 15:12; Nu. 5:17; Jer. 32:14), *baqbuq ḥereś* (Jer. 19:1), *niḇlê-ḥereś* (Lam. 4:2), *kᵉlî-yôṣēr* (2 S. 17:28); Gk. *ostrákinos* (2 Cor. 4:7; 2 Tim. 2:20), *keramikós* (Rev. 2:27)]; AV also POTSHERD, EARTHEN BOTTLE, EARTHEN PITCHER, etc.; NEB also EARTHENWARE VESSEL, JUG, etc. These fired pottery vessels were heat-resisting and so could be used for cooking and for boiling clothes (Lev. 6:28; 11:33; 14:5, 50). Demonstrating typical Near Eastern hospitality, the generous natives brought David not only gifts of food but also the necessary vessels in which to cook it (2 S. 17:28). An earthen vessel was also used to preserve a deed for land (Jer. 32:14).

In 2 Tim. 2:20 a comparison of earthenware vessels with vessels of gold and silver is used metaphorically. Breaking of an earthen vessel is symbolic of the destruction of Jerusalem (Jer. 19:1, 10), or of the "nations" (Rev. 2:27). Earthen vessels were also used to illustrate the commonness (Lam. 4:2) and frailty (2 Cor. 4:7) of our bodies.

EARTHLY [Gk. *epígeios*] (Jn. 3:12; 2 Cor. 5:1; Phil. 3:19; Jas. 3:15); NEB also "things on earth," EARTH-BOUND; [*epí tḗs gḗs*] (Col. 3:5); AV "upon the earth"; NEB "which belong to the earth"; [*katá sárka, tḗs sarkós*] (Eph. 6:5; Col. 3:22; He. 12:9); AV "according to the flesh," "of flesh"; [*sarkikós*] (2 Cor. 1:12); AV FLESHLY; NEB WORLDLY; [*kosmikós*] (He. 9:1); AV WORLDLY; NEB MATERIAL.

As used by the RSV, "earthly" does not have a negative moral connotation, with the exceptions of Phil. 3:19 and Jas. 3:15. The term *epígeios* is from *epí*, "upon," and *gḗ*, "earth." It simply means "of or pertaining to the earth, or to the present state of existence." In Phil. 3:19 and Jas. 3:15, where earth is spoken of as the place of sin, "earthly" takes on the connotation of moral inferiority, suggesting that which is opposed to the spiritual in character. *Sárx* and adj. *sarkikós* as used in 2 Cor. 1:12; Eph. 6:5; Col. 3:22; He. 12:9 are ethically neutral terms. *Sárx* here denotes the sphere of human existence, which is limited and temporary, in contrast with the heavenly and spiritual sphere. *Kosmikós*, likewise, is used of the tabernacle in He. 9:1 not in its usual sense of "worldly" but in the sense of "belonging to this world," i.e., a transitory, now obsolete, institution. N. J. O.

EARTHQUAKE [Heb. *raʿaš*; Gk. *seismós*]; AV, NEB, also RUSHING. A shaking of the earth's crust, usually a tectonic activity of variable intensity. Egypt is relatively free from this hazard, but the area from Greece to Iran is especially vulnerable, as many catastrophes in the area indicate: a quake in Iran in the spring of 1972 took four thousand lives, and two decades earlier Greece suffered severely. Palestine is at the edge of this quake-prone area, the center of which lies in Turkey.

In the past two millennia Palestine has had seventeen recorded quakes of major proportions, an average of slightly less than one in each century. Amos alluded to one in his day (*ca.* 760 B.C.): "two years before the earthquake" (Am. 1:1). Josephus (*Ant.* XV.5.2) reported the loss of ten thousand lives in a quake in 31 B.C., the effects of which may still be seen in the steps of a cistern constructed by the Qumrân community near the Dead Sea. On Jan. 1, 1837, an earthquake centered in Safat took nearly five thousand lives. Another, centered in Nâblus, resulted in the loss of 350 lives in 1927. The Ludd-Ramla area is also subject to earthquakes.

It is believed that the source of the major quakes is the Jordan or rift-valley. Antioch in Syria has often been an epicenter. Jerusalem is relatively free from severe

Earthquake damage to steps leading to a cistern at Qumrân (D. Baly)

quakes (though it seems to have been hit more frequently by small ones). A quake in 64 B.C. damaged the temple in Jerusalem, as did another in A.D. 33. This may have coincided with the disturbance mentioned at the time of Jesus' crucifixion (Mt. 27:54; 28:2).

In addition to the major quakes reported above, seismic activity has been recorded in many places since NT times. A severe quake hit central Palestine in A.D. 130, and in 365 the fortress at Kerak in Transjordan was severely damaged. Severe shocks were experienced at Imwas in 498, at Acco in 502, in Galilee in 551, and at Jerusalem in 746. In 1016 the cupola of the Dome of the Rock in Jerusalem collapsed. The quake in 1033 was very severe and widespread. In 1546 and again in 1834 severe damage was done to the domes of both the Holy Sepulchre and the Dome of the Rock. Earthquakes dammed the Jordan River (as perhaps in the time of Joshua) at Damiya in 1546 and again in 1927; the latter shock left 860 dead.

The number of casualties normally depends not so much on the severity of the quake as on its location; when populated areas are hit, as at Safat in 1837, the loss of life is far more extensive than if the quake occurs in open country. Obviously buildings constructed of earth or stone are much more liable to damage than structures of wood, steel, or reinforced concrete.

The Bible sometimes refers to earthquakes as accompanying divine revelation (Ex. 19:18; 1 K. 19:11f.; Isa. 6:4) or demonstrating God's power (Job 9:6) and presence (Ps. 68:8 [MT 9]) or divine judgments (Ps. 18:7 [MT 8]; Nah. 1:5; Isa. 13:13; 29:6; Am. 9:1; Ezk. 38:19f.; cf. Zec. 14:5). An earth tremor sufficed to free Paul and Silas at a very opportune time (Acts 16:26). Earthquakes are predicted to precede the end of the age (Mt. 24:7; Mk. 13:8; Lk. 21:11; Rev. 6:12; 8:5; 11:13, 19; 16:18).

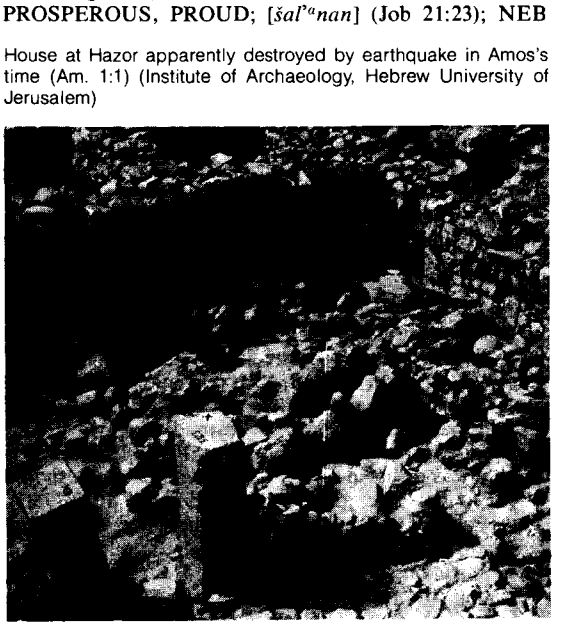
EARTHY (1 Cor. 15:47-49, AV). *See* DUST.

EASE; AT EASE; etc. [Heb. *šā'an, ša'ᵃnān*]; AV also REST, QUIET; NEB also PEACE, UNDISTURBED, PROSPEROUS, PROUD; [*šal'ᵃnan*] (Job 21:23); NEB COMFORT; [hiphil of *rāga'*] (Dt. 28:65); NEB PEACE; [*šalâ, šālēw*] (Job 3:26; 16:12; Ps. 73:12; Jer. 49:31); AV also SAFETY, PROSPER, WEALTHY; NEB also PROSPER, PEACE, etc.; [*šāqaṭ*] (Ezk. 16:49); AV IDLENESS; NEB also "peace of mind"; [*nāśā'*] (Job 7:13); NEB RELIEVE; [hiphil part. of *rûm*] (Hos. 11:4); AV "take off"; NEB LIFT; [Aram. *šᵉlēh*] (Dnl. 4:4 [MT 1]); AV REST; NEB PEACEFULLY; [Gk. *anapaúō*] ("take your ease," Lk. 12:19); NEB EASY; [*aphóbōs*] (1 Cor. 16:10); AV "without fear"; [*ánesis*] (2 Cor. 8:13); NEB RELIEVE.

House at Hazor apparently destroyed by earthquake in Amos's time (Am. 1:1) (Institute of Archaeology, Hebrew University of Jerusalem)



The OT terms most commonly rendered "ease" are the verb *šā'an* and the noun *ša'ᵃnān*, which generally express tranquility, security, or comfort of mind; in the ethical sense, however, they indicate indifference to moral or religious concerns (cf. Job 12:5; Ps. 123:4; Isa. 32:9, 11; Jer. 48:11; Am. 6:1; Zec. 1:15). This ethical sense applies also to *šāqaṭ* in Ezk. 16:49, referring to Sodom, and to *šālēw* in Ps. 73:12 and *šᵉlēw* in Jer. 49:31.

The only occurrence of "ease" in the Gospels is in the story of the rich fool, where the use of *anapaúō* reflects the common OT ethical sense. In 1 Cor. 16:10 the RSV and NEB render *aphóbōs génētai* (AV lit. "that he may be . . . without fear") by "put him at ease."

"Ease" occurs as a verb twice in the OT and once in the NT. The verbs *nāśā'* and (hiphil) *rûm* both mean "lift" or "raise." The Gk. *ánesis* denotes a "relaxing" or "relief."

N. J. O.

EAST, PEOPLE OF THE [Heb. *mizrāḥ, qeḏem, qēḏem*, and other derivatives of the same root; Gk. *anatolḗ*]. *Mizrāḥ* is the equivalent of the Arab. *meshriq*, "the orient" or "place of sunrise." *Qāḏam*, "precede" (whence *qeḏem*, "east"), and its derivatives correspond closely to the Arab. *qadam*, except that the Arabic derivatives do not include the signification "east." In the majority of cases "east" and other words of direction require no explanation, but the expressions "the people of the east" (*bᵉnê qeḏem*), "land of the people of the east" (*'ereṣ bᵉnê qeḏem*), and "the east country" (*'ereṣ qeḏem*) belong to a different category. In the story of Gideon we find several times the expression "the Midianites and the Amalekites and [all] the people of the East" (Jgs. 6:3, 33; 7:12; cf. 8:10). In Jgs. 8:24 it is said of the same host: "For they had golden earrings, because they were Ishmaelites"; in Jer. 49:28f.: "Rise up, advance against Kedar! Destroy the people of the East! Their tents and their flocks shall be taken"; in Gen. 25:6: "But to the sons of his concubines Abraham gave gifts, and while he was still living he sent them away from his son Isaac, eastward to the east country." Now Ishmael is the son of Abraham and Hagar, Midian of Abraham and Keturah, Kedar the son of Ishmael, and Amalek the grandson of Esau, dwelling in Edom. It is evident that the references are to the Syrian desert and in a general way to Arabia, especially its northern part, and to peoples like the Bedouin who kept camels and dwelt in tents, "houses of hair" (*buyût sha'r*) as they are called by modern Arabs.

A striking passage is Gen. 29:1: "Then Jacob went on his journey, and came to the land of the people of the east" in Paddan-aram. Journeying eastward from Jordan one traverses first a region of towns and villages with fields of grain, and then the wide desert where the Bedouin wander with their herds. The line is a sharp one. Within a very short time one passes from the settled part, where the rain, though scanty, is sufficient to bring the grain to maturity, to the bare desert.

Job was "the greatest of all the people of the east" (Job 1:3). These desert people were renowned for their wisdom, as attested by 1 K. 4:30: "Solomon's wisdom

surpassed the wisdom of all the people of the east, and all the wisdom of Egypt"; and Mt. 2:1: "Now when Jesus was born . . . wise men from the East came."

The biblical references make it clear that any nation living to the east of the Israelites could be included in this designation. A. E. DAY

EAST COUNTRY [Heb. *'ereṣ mizrāḥ*]. Literally "country of the sunrise" over against the "country of the sunset" (Zec. 8:7). The two together form a poetical expression (merism) indicating the whole earth. Abraham sent the sons of his concubines to the east country (*'ereṣ qeḍem*, Gen. 25:6), the area SE of Palestine.

EAST GATE. *See* GATE, EAST; POTSHERD GATE.

EAST WIND. *See* WIND.

EASTER (AV Acts 12:4). An anachronistic mistranslation of the Gk. *páscha* (RSV, NEB, "Passover"), in which the AV followed such earlier versions as Tyndale and Coverdale. The Acts passage refers to the seven-day Passover festival (including the Feast of Unleavened Bread). It is reasonably certain that the NT contains no reference to a yearly celebration of the resurrection of Christ.

I. Origin of the Term.–The term Easter was derived from the Anglo-Saxon "Eostre," the name of the goddess of spring. In her honor sacrifices were offered at the time of the vernal equinox. By the 8th cent. the term came to be applied to the anniversary of Christ's resurrection.

II. Controversy about the Time of Celebration.–The date for the celebration of the Resurrection was the subject of extensive disagreement for centuries. Among early Jewish Christians the time of the observance was determined by the date of the Hebrew Passover festival (Heb. *pesaḥ*), which began on the 14th day of Nisan. Gentile Christians, however, tended to celebrate the Resurrection on a Sunday. The result was that Christians in the East generally observed the same day of the month, regardless of the day of the week on which it fell, whereas Christians in Rome and the West observed the same day of the week (the first), regardless of the day of the month on which it came. The issue was bitterly debated, but as time passed an increasing number of people celebrated the anniversary of the Resurrection on the first day of the week.

Steps toward settlement of the disagreement were taken at the Council of Nicea (A.D. 325). Although Syrian leaders argued for dating Easter according to the Jewish Passover, the Council unanimously decided that the Resurrection was to be celebrated in all churches on the same Sunday. No fixed rule was established for deciding which Sunday was to be observed. Instead, it was left for church leaders of Alexandria to determine the date each year. Disagreement continued to surround the matter. Some, who were called "Quarto-decimans," persisted in relating Easter to the 14th of Nisan.

By the 7th cent. the practice of the Church had become reasonably uniform. The time agreed upon was the first Sunday following the full moon that comes on or after the vernal equinox. The date of the equinox was set at Mar. 21. This allowed for a variation in Easter dates from Mar. 22 to Apr. 25. The uniformity of practice which prevailed for a number of centuries was again disturbed for a time with the adoption of the Gregorian calendar in 1582.

III. Current Practice.–In the 20th cent. there is agreement on the determination of the Easter date except in the Eastern Orthodox Church, which employs a somewhat different method of calculation. The advisability of fixing the date of Easter on a set Sunday, such as the first Sunday of April, has been discussed by some church leaders in recent years.

D. W. BURDICK

EASTERN SEA (Ezk. 47:18; Joel 2:20; Zec. 14:8). *See* DEAD SEA.

EAT. *I. Word Usage.* The Hebrew verb for "eat" is *'ākal* and the corresponding Greek word is *esthíō*/*éphagon*. Both terms stand for a basic act necessary for the sustaining of life and as such are widely used in both OT and NT, often in combination with drinking (e.g., Gen. 25:34; 26:30; Jgs. 9:27; 19:4, 21; Ruth 3:3; 1 K. 13:18). In the NT Paul directed that if anyone refused to work he should not be permitted to eat, either (2 Thess. 3:10). Closely associated, directly or indirectly, with eating and drinking is the enjoyment of life (e.g., 2 S. 11:11; 1 K. 1:25; 4:20; Job 1:4; Eccl. 3:13; 5:18 [MT 17]; Lk. 15:23).

In the OT the verb is also used figuratively, e.g., Israel "devours" its enemies, meaning that it suppresses or destroys them (Dt. 7:16; Ezk. 19:3, 6; 36:13; Zec. 12:6). Similarly other nations can "devour" or "consume" Israel and its land (Ps. 79:7; Isa. 1:7; Jer. 8:16; 10:25; 50:7; cf. Nu. 13:32). "To devour the poor" is to treat them unjustly (Prov. 30:14; Hab. 3:14). Grave social disorder and injustice is an eating of the flesh of the people (Mic. 3:3). According to Isaiah (49:26) Yahweh will make Israel's oppressors "eat their own flesh," i.e., they will be reduced to utter helplessness (cf. *TDOT*, I, 238). The prophetic announcement that covenant breaking would result in severe famine, driving people to eat the flesh of their sons and daughters (Lev. 26:29; Dt. 28:53-57), became historical reality (2 K. 6:28f.; cf. Lam. 2:20).

In other figurative uses Heb. *'ākal* is conjoined with Yahweh. In battle His sword devours enemies (Dt. 32:42; Jer. 46:10), and in judgment it devours Israel (Isa. 1:20; Jer. 12:12; etc.; cf. Hos. 13:8). God is a devouring fire (Ex. 24:17; Dt. 4:24; He. 12:29). Heb. *'ākal* also is used in reference to humans. In Ps. 14:4 evildoers eat up God's people the way they eat bread (cf. Ps. 50:3; etc.); heat consumes Jacob (Gen. 31:40), and zeal for the house of God consumes the psalmist (Ps. 69:9 [MT 10]; cf. Jn. 2:17 for a later application of this verse to Jesus). To the wide range of meaning belongs also that of "using" or "enjoying" something, e.g., Eccl. 5:11 (MT 10), which speaks of the consumption of one's goods by others.

II. Regulations and Customs.–The OT and the Jewish world in general observed certain rituals with respect to food and its consumption. The Mosaic law prescribed which portion of the sacrifices was to be for the priests (Lev. 2:3; 5:13; 6:14-30; 7:9, 29-36; 10:12-15. The law also specified which foods were clean and which unclean (Lev. 11; Dt. 14:3-21; cf. Gen. 9:3). Specifically, swine's flesh was an abomination (Isa. 65:4; 66:3, 17). Daniel and his friends refused to eat from the king's table because they did not wish to violate Jewish dietary laws (Dnl. 1:8, 12; cf. 2 Macc. 5:27). Special regulations pertained to food for Nazirites and soldiers (Nu. 6:1-4). According to an editorial note in Mk. 7:19 Jesus did away with the distinction between foods (cf. He. 9:10; 13:9). The early Church was troubled by the propriety of eating flesh sacrificed to idols (Acts 15:29; Rom. 14; 1 Cor. 8; 10:19-33). The Pharisees carefully observed the prior washing of hands (Mk. 7:3f.), but Jesus regarded Himself free from such obligations (Mt. 15:16-20).

Fasting, the refraining from eating and drinking, was

prominent in biblical Israel. During the forty days that he was on the mountain with God, Moses neither ate bread nor drank water (Ex. 34:28; cf. Dt. 9:9). Jesus fasted forty days and forty nights in the wilderness (Mt. 4:2). Part of Jonah's call of repentance to Nineveh was the call to fast (Jonah 3:7). In the Babylonian Exile, and also afterwards upon their return to Palestine, the Jews observed stated fasts (Zec. 7:5; cf. also Acts 9:9). Fasting was often observed in connection with vows (Acts 23:12, 14).

Feasting was also common in the ancient Near East. The Ugaritic myths have frequent references to it (e.g., *UT*, 51:iv:35; 52:6; 67:i:24; ii:23), some of which have close parallels in the OT. In view of the cultic nature of these Ugaritic texts, the OT parallels may be further instances of "archaic demythologizing" (W. F. Albright's term in *Yahweh and the Gods of Canaan* [1968], pp. 183-193), which was an attempt by OT authors to transform pagan ideas or associations. Thus in Prov. 9:1-6 the personified Wisdom calls for people to join in a feast, which apparently will enlighten them (v. 6; cf. Isa. 55:1; on Cant. 5:1 see M. Pope, *Song of Songs* [*AB*, 1977], pp. 507-510).

Attendants bring food, whisk away flies, and make music for King Ashurbanipal (reclining) and his queen, who drink wine from bowls in their garden. Palace relief from Kuyunjik (Nineveh), 668-633 B.C. (Trustees of the British Museum)

III. Theological Use.—In the story of mankind's FALL into sin (Gen. 3), the actual fall from grace occurs in connection with Adam and Eve's eating from the tree of the knowledge of good and evil. This tree seems to represent omniscience, which is solely God's domain. The eating of the forbidden fruit represents humanity's sinful determination to set for itself the standard of right and wrong. By this act of usurping what belongs to God alone, the human race incurs God's punishment. Hard labor is now man's lot; he is subject to death and barred from the strength-renewing and healing powers of the tree of life (cf. Rev. 22:2), and must work hard for his food (cf. Gen. 3:17-19).

The Mosaic law contains detailed regulations pertaining to the preparation and eating of the PASSOVER lamb (Ex. 12:1-13). These details served as reminders of aspects of the bondage the Israelites had endured in Egypt and of Yahweh's gracious deliverance.

An agreement or reconciliation reached between parties was frequently sealed and celebrated with eating and drinking together, e.g., when Laban and Jacob covenanted not to treat each other ill (Gen. 31:54). Sharing a meal was in antiquity often an expression of mutual fellowship and trust. In contrast, turning against someone with whom one had shared table fellowship was a vile act of the lowest sort; Jesus was not betrayed by an outsider but by "one who is eating with me" (Mk. 14:18; cf. also v. 20; Lk. 22:21; Ps. 41:9 [MT 10]). After Jesus' resurrection the disciples whom He had chosen to be His witnesses ate and drank with Him (Acts 10:41). Refusal to eat with someone expressed repudiation of fellowship with that person (1 Cor. 5:11).

The covenantal meal described in Ex. 24:9-11 is particularly apt. Following the formal ratification of the covenant between Yahweh and Israel (vv. 1-8), Moses, Aaron, Nadab, Abihu, and seventy of the elders went up the mountain, where they saw the God of Israel, ate and drank in His presence, and yet were not consumed by Him. This meal symbolized the covenantal unity and trust that now existed between Yahweh and Israel. (*See also* COVENANT [OT] II; IV.A, C.)

Not surprisingly the symbolism of a meal can also be used metaphorically to describe Israel's messianic future. Thus Isa. 25:6-9 speaks of a great feast which the Lord will prepare on Mt. Zion, with the best of foods and wines, and with all the nations of the world sharing in it. Symbolically this feast expresses the prophetic hope of the golden age to come, when suffering and mourning, sin and death, will be banished forever (cf. 1 Cor. 15:54; Rev. 21:4).

In the NT much of the OT imagery of eating and drinking recurs, though updated in the light of the redemptive events of Jesus Christ and the coming of the Holy Spirit. Jesus habitually ate with tax collectors and sinners (Mt. 9:11; cf. Lk. 14:12-14), thereby signifying His solidarity with them. Banquets were a familiar theme in His parables describing aspects of His coming kingdom (Mt. 8:11; 22:1-10; Lk. 14:16-24; etc.). He also spoke of the necessity of eating His flesh and drinking His blood, thereby describing the intimate acceptance of Him that is needed for eternal life (Jn. 6:48-53; note that He also called Himself the bread of life [vv. 35, 51, 58]).

The LORD'S SUPPER combines the imagery of the OT Passover and of the great feast to be prepared by God. Jesus Himself is now the Passover lamb (cf. 1 Cor. 5:7) and the believers' eating and drinking together symbolize their sharing in Christ, their fellowship and oneness with each other, and their common expectation of the blessed future to come. The Lord's Supper, particularly its fulfillment in the consummation of the Kingdom, may also be viewed as a NT counterpart of the meal that Moses and the elders of Israel ate in the presence of the Lord; both sacramentally represent the future inherent in the present reality. The traditionally heavy theological emphasis on the Lord's Supper as a commemoration of Christ's sacrificial and atoning death should not be allowed to obscure the meal character of the Supper. As celebrated by the NT Church, the Lord's Supper foreshadowed the believers' participation in the coming marriage supper of the Lamb (Rev. 19:9; cf. Mt. 26:29 par.). In turn this image of the marriage supper of the Lamb may also be regarded as the climactic fulfillment of the meal of Israel's elders in the presence of the Lord and of the prophecy of Isaiah 25.

The tree of life in Rev. 22:1f., with its twelve kinds of fruit and its leaves for the healing of the nations, stood on either side of the river flowing through the city of God. This scene combines the imagery of the tree of life in the garden of Eden (Gen. 3) and of Ezekiel's vision of the new temple (Ezk. 47:12). In the consummation mankind will have unlimited access to the tree of life and will fully enjoy the blessings of the unbroken fellowship with God in the new Jerusalem.

Eating and drinking frequently meant participation in what the food and drink represented. Paul was convinced that an idol was nothing and thus food offered to an idol remained ordinary food. Yet in order to spare those who might be offended at the eating of such food, he counseled against eating it on the ground that one cannot partake of the table of the Lord and of the table of demons (1 Cor.

8:10). He also exhorted his readers not to cause (by their eating) the ruin of one for whom Christ died, for the kingdom of God is not a matter of food and drink but of righteousness, peace, and joy in the Holy Spirit (Rom. 14:15, 17; see the whole chapter). In the case of the Lord's Supper, the disrespectful eating of the bread and drinking of the cup is tantamount to profaning the body and blood of the Lord (1 Cor. 11:27). The writer of Hebrews speaks of an altar from which those who serve the tabernacle have no right to eat (13:10); unlike Jewish priests who were not permitted to eat of the sacrifice on the altar, Christians may eat Christ's own sacrifice on the cross, i.e., to the fullest extent share in Christ's atoning sacrifice, which is something adherents of Judaism, those who hold on to the old dispensation, cannot do.

The final thing that can be said of eating and drinking is that, like everything else, they must be done to the glory of God (1 Cor. 10:31).

See *TDOT*, I, *s.v.* "ākhal" (Ottoson).

See also BREAD V; DRINK; FEASTS; FOOD; MEALS.

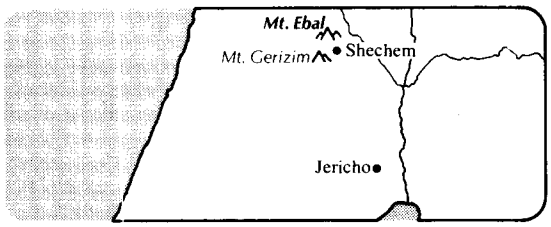
S. WOUDSTRA

EBAL ē'bəl [Heb. *'ēḇāl*–'bare'].

1. A variant reading (1 Ch. 1:22) for Obal, a son of Joktan and ancestor of an Arab tribe (Gen. 10:28). The locality where they settled, which the name designates in 1 Ch. 1:22, is of uncertain identification.

2. A son of Shobal son of Seir the Horite (Gen. 36:23; 1 Ch. 1:40).

EBAL, MOUNT ē'bəl [Heb. *har 'ēḇāl*; LXX Gk. *Gaibal*] (Dt. 11:29; 27:4, 13; Josh. 8:30, 33 [LXX 9:2]). The modern Jebel Eslāmîyeh, located N of SHECHEM and opposite Mt. Gerizim (*see* GERIZIM, MOUNT). These two mountains overlook the pass through which runs the main E-W route, and an important N-S crossroad lies just to the east; thus Ebal was strategically important. It stands 427 m. (1402 ft.) above its base (940 m. [3080 ft.] above sea level), and thus is visible from afar (Dt. 11:29f.).



Joshua led the people to Ebal to renew the covenant after the conquest of AI. As Moses had directed, Joshua erected "an altar of unhewn stones" (Josh. 8:30f.; cf. Dt. 27:4-6), which he presumably plastered (in accordance with Dt. 27:4) in order to write upon it the copy of the law (Josh. 8:32; cf. P. C. Craigie, *Book of Deuteronomy* [*NICOT*, 1976], pp. 328f.). Placing half the tribes on the slope of Gerizim, half on the slope of Ebal, and the ark with the priests and Levites between, Joshua proceeded to read the blessings and the curses of the law, probably with the two divisions of the people responding appropriately (cf. Dt. 27:13-26). It has sometimes been questioned if the reading of the law could have been heard by the people in the way here described. But the formation of the sides of the valley at the narrowest part and the acoustics, which have been tested more than once, leave no reasonable doubt about the possibility.

The religious associations of Ebal continued even in postbiblical times. The head of John the Baptist is said to be buried there, and in the Middle Ages the Moslems erected a monument over this traditional site. The ruins of a church have also been found there. G. A. L.

EBED ē'bed [Heb. *'eḇeḏ*–'servant'].

1. Father of Gaal, who rebelled against Abimelech (Jgs. 9:26, 35).

2. A companion of Ezra in his return (Ezr. 8:6). In 1 Esd. 8:32 he is called Obed (AV, NEB, "Obeth").

EBED-MELECH ē-bed-mē'lek, eb-ed-me'lek [Heb. *'eḇeḏ-meleḵ*–'servant of the king']. An Ethiopian eunuch in the service of King Zedekiah, who interceded with the king for the prophet Jeremiah and rescued him from the cistern into which he had been cast to die (Jer. 38:7-13). For this, the word of Yahweh through Jeremiah promised Ebed-melech that his life should be spared in the fall of Jerusalem (Jer. 39:15-18).

From the early monarchy the description of a court official as "slave" helped to differentiate him from those who were functioning in their capacity as tribal elders. Sometimes it was indicated that the "slave" was a paid official. The practice originated in Babylonia, and among the Assyrians "Ebed-melech" became a proper name.

EBENEZER eb-ə-nē'zər [Heb. *'eḇen hā'ezer*–'stone of the help'; Gk. *Abenezer*].

1. Here Israel was defeated by the Philistines, four thousand men falling in the battle (1 S. 4:1ff.). It appears also to have been the scene of the disaster when the ark of God was captured (vv. 3ff.). The place is not identified. It was across from Aphek; but this site also is unknown (cf. Josh. 12:18). In *Onom.* Eusebius places it between Jerusalem and Ascalon, in the neighborhood of Beth-shemesh.

2. A stone set up by Samuel to perpetuate the memory of the signal victory granted to Israel over the Philistines in answer to his prayer (1 S. 7:12). It stood between Mizpeh and "Jeshanah," an emended reading followed by the RSV and NEB (cf. 2 Ch. 13:19). The AV, following the MT, reads "Shen" (tooth). A location on the border between Israel and Judah appears likely, but proper identification has not yet been made.

W. EWING

EBER ē'bər [Heb. *'ēḇer*; LXX Gk. *Eber* in Genesis, *Ōbēd* in Chronicles].

1. Occurs in the genealogies (Gen. 10:21, 25; 11:14-17) as the great-grandson of Shem and father of Peleg and Joktan. The word means "beyond," "across." Some scholars contend the related form "Hebrew" (Heb. *'ibrî*) denotes the people or tribe who came "from the other side of the river" (i.e., the Euphrates), from Haran (Gen. 11:31), whence Abraham and his dependents migrated to Canaan. In Nu. 24:24 Eber should most probably not be read as a proper name, but rendered "region beyond," i.e., beyond the Euphrates. *See also* TELL MARDIKH.

2. A Gadite (1 Ch. 5:13).

3, 4. Two Benjaminites (1 Ch. 8:12, 22).

5. The head of a priestly family (Neh. 12:20).

A. C. GRANT

EBEZ ē'bez [Heb. *'eḇeṣ*; LXX Gk. *Rhebes*]; AV ABEZ. One of the sixteen cities in Issachar (Josh. 19:20). The name seems to be cognate to that of the judge Ibzan (Jgs. 12:8-10). The site is unknown, though *Westminster Dictionary of the Bible* (1944) conjectures 'Ain el-Ḥbuṣ, or el-'Abuṣ, between 'Aulam and Sitīn.

EBIASAPH ə-bī'ə-saf [Heb. *'eḇyāsāp*; LXX Gk. *Abiasaph*].

A descendant of Kohath the son of Levi (1 Ch. 6:37 [MT 22]). *See* ABIASAPH.

EBIONITES; EBIONISM. A Jewish-Christian heretical sect flourishing in the 2nd, 3rd, and 4th cents. A.D.

I. Origin
II. Sources
  A. Gospel of the Ebionites
  B. Pseudo-Clementine Literature
III. Theology
IV. Ebionites and Qumrân

I. Origin.–The name Ebionite seems to be derived from Heb. *'ebyôn*, "poor." It first appears in the writings of Irenaeus (*Adv. haer.* i.26.2), who gave no explanation of the term. Other writers in antiquity, however, variously explained why the Ebionites were so called. Origen in his commentary on Mt. 12:2 said that their name came from the poverty of their faith in Jesus. In *Contra Celsum* ii.1 he stated that they were named for the poverty of their interpretation of the law. Eusebius reiterated the sentiment of Origen by saying that "from these practices [observing the law, rejecting Paul, and using exclusively the Gospel according to the Hebrews] they have obtained their name, for their name means 'poor' in Hebrew" (*HE* iii.27.2). He also said they got their name from the first Christians because they held such poor and lowly opinions of Jesus Christ. None of these polemical explanations of the origin of the name is taken seriously by scholars today.

About two hundred years after Irenaeus's first mention of the Ebionites by name, Epiphanius wrote extensively of them in his *Panarion* (*Haer.*). He derived their name from Ebion, the alleged founder of the sect, and traced their history back to the period immediately following the destruction of Jerusalem in A.D. 70. This explanation, too, is highly unlikely, although there is some evidence that there was a historical person named Ebion. Some scholars think that certain fragments of *Doctrina patrum de incarnatione Verbi* are by him.

J. A. Fitzmyer suggested that the name *Ebionaioi* grew out of the practice of referring to the first Christians in Jerusalem as "the poor," especially after the destruction of the city in A.D. 70. "At some time during the first two centuries . . . this designation was restricted to those who lived in Palestine and Syria, and who continued to observe the Mosaic Law. It seems likely that the original use of the word was in no way connected with a heretical sect" (Fitzmyer, p. 210). This group of Jewish Christians is usually associated with James the brother of Jesus, the head of the Jerusalem church. "It is not unlikely that remnants of this group, after the destruction of Jerusalem, developed into the Ebionite sect, acquiring heterodox notions in time from other sources, such as Cerinthus and the Elchesaites" (p. 210). How long the Ebionites existed before Irenaeus' explicit mention of them is not known, but that there was such a group by his time is clear. He calls them heretical (*Adv. haer.* i.26.2) and classifies them among the Gnostics.

L. E. Keck proposed a similar explanation of their origin: "After the refugees [either from the Jewish War of A.D. 66-70 or the Hadrianic War in A.D. 135] from Jerusalem found themselves destitute, they cherished more than ever the words of Jesus about the poor and the threat of possessions, and so made of their poverty a virtue and probably named themselves 'the Poor.' In the region where they now lived, they came into contact with dualistic and syncretistic movements which provided a cosmological rationale of their poverty and intensified certain elements of their theology in general. The link with the practice of the primitive church in sharing wealth came much later as an apologetic device and cannot be taken at face value" (*ZNW*, 57 [1966], 65f.).

II. Sources.–A. Gospel of the Ebionites. This is an abridged and falsified Gospel of Matthew known only through the accounts and quotations of Epiphanius. Since it presupposes the Synoptics, the earliest it could have been written is the 2nd century. The Gospel begins not with the Nativity narrative but with the appearance of John the Baptist. This is followed by the Call of the Disciples and the Baptism of Jesus. It also contains parallels to Mt. 5:17; 12:46-50; 26:17ff.; and Lk. 22:15 (*SQE*). Epiphanius said that it included the story of the Last Supper, the Passion of Christ, and the Resurrection, but we have no details.

B. Pseudo-Clementine Literature. Apart from the Ebionite Gospel, there is little agreement among scholars about authentic Ebionite sources. The nineteenth-century Tübingen scholars isolated a source — *Kerygmata Petrou* (Sermons of Peter)—in the Pseudo-Clementine literature and identified it as Ebionite. This reconstruction has been followed by more recent scholars. H. J. Schoeps bases his reconstruction of the history and theology of early Jewish Christianity on the *Kerygmata Petrou*, and both O. Cullmann and J. A. Fitzmyer use the *Kerygmata* as a primary source to compare the beliefs of the Qumrân community with those of the Ebionites. Considerable doubt exists, however, about the genuineness of the *Kerygmata Petrou* as an Ebionite source. Keck points out that even though the Pseudo-Clementine literature has been subjected for more than a hundred years to discussion and analysis, "there is still little agreement on the elemental point of whether or not there is any relation whatsoever between this pot-pourri of tradition and the Ebionites" (p. 60).

III. Theology.–Origen was the first to distinguish between two types of Ebionites theologically: those who believed in the Virgin Birth and those who rejected it (*Contra Celsum* v.61). Eusebius also distinguished between two groups, describing them as follows (*HE* iii.27):

> They held him [Christ] to be a plain and ordinary man who had achieved righteousness merely by the progress of his character and had been born naturally from Mary and her husband. They insisted on the complete observation of the Law, and did not think that they would be saved by faith in Christ alone and by a life in accordance with it. But there were others besides these who have the same name. These escaped the absurd folly of the first mentioned, and did not deny that the Lord was born of a Virgin and the Holy Spirit, but nevertheless agreed with them in not confessing his pre-existence as God, being the Logos and Wisdom. Thus they shared in the impiety of the former class, especially in that they were equally zealous to insist on the literal observance of the Law. They thought that the letters of the Apostle ought to be wholly rejected and called him an apostate from the Law. They used only the Gospel called according to the Hebrews and made little account of the rest. Like the former they used to observe the sabbath and the rest of the Jewish ceremonial, but on Sundays celebrated rites like ours in commemoration of the Saviour's resurrection.

Epiphanius likewise differentiated between a more orthodox group (those who believed in the Virgin Birth) and a more heterodox group. The former he called Nazoreans and the latter Ebionites (*Haer.* 29f.). The Ebionites, he said, were influenced by the Elchasaites, an early heretical group with certain Gnostic ideas. It is also possible that the Ebionites came under the influence of the Essenes.

Although strict observance of the law was enjoined, not

all of the law of Moses was accepted as valid. They held that the true law had been adulterated by the addition of certain falsehoods, post-Mosaic in origin. These had to be purged, because they contained doctrines that were actually inimical to Moses' teaching. By means of this approach to the Pentateuch the Ebionites were able to eliminate concepts of God contrary to their own. In the *Pseudo-Clementines* (Homily 2.52) the apostle says, "Neither was Adam a transgressor, who was fashioned by the hands of God; nor was Noah drunken, who was found righteous above all the world; nor did Abraham live with three wives at once, who, on account of his sobriety, was thought worthy of a numerous posterity; nor did Jacob associate with four — of whom two were sisters — who was the father of the ten tribes, and who intimated the coming of the presence of our Master; nor was Moses a murderer, nor did he learn to judge from an idolatrous priest. . . ." Jesus was for them the great reformer of the law, whereas Paul was its distorter.

The Ebionites also believed that the grace of baptism put an end to all sacrifices. The destruction of the temple was brought about by God because of the Jews' refusal to discontinue the temple sacrificial system. The priesthood, too, was considered no longer valid, since sacrifices were at an end.

Christianity was for them not a religion of salvation. Jesus came not to save but to teach. He stood in a direct line with the great prophets — prophetism climaxed in Him. He came after Adam and Moses to reform and purify Judaism.

Ebionism's most important deviations from orthodox Christianity were in the realm of Christology. Although, as seen from the above quotations from Origen and statements in Epiphanius, there was no unanimity among them in their christological beliefs, they generally rejected the orthodox doctrine of the Virgin Birth. They also denied the Incarnation. Although they believed in Jesus (this distinguished them from the orthodox Jews), they regarded Him simply as a man chosen by God, who at His baptism received a power from God. It is generally believed that the christological tenets of the Ebionites showed Cerinthian influence.

IV. Ebionites and Qumrân.—Since the discovery of the Dead Sea Scrolls, vigorous discussions have been carried on about the relationship of the Ebionites to the people of the Scrolls. J. L. Teicher maintained that the Qumrân sect was Ebionite, that Christ was the "Teacher of Righteousness," and the apostle Paul was the "Man of Lies." Teicher's theory faces several difficulties, the most telling of which are: (1) the Ebionites appear too late to be identified with the Qumrân sect (the earliest mention of the Ebionites is *ca.* A.D. 175); and (2) the religious background of the Ebionites, though heretical, is definitely Christian, whereas that of the people of Qumrân is pre-Christian and oriented to the OT, not the NT.

Although Cullmann did not identify the Qumrân sect with the Ebionites, he argued for a connection between the two: what was left of the Qumrân sect (which he identified with the Essenes) went over to the Ebionites. This theory, of course, would necessitate the conversion of the Essenes to Christianity. While this is not impossible, there seems to be little evidence to support it.

Fitzmyer, after a careful comparison of the theological beliefs and practices of the two groups, found too great a divergence between them to accept either Teicher's or Cullmann's theories. He concluded: "It seems that the most we can say is that the sect of Qumran influenced the Ebionites in many ways; Essene tenets and practices were undoubtedly adopted or adapted into the Ebionite way of life. To try to state more than this is to overstep the limits set by the evidence we have at our disposal" (p. 231). This appears to be a more tenable view of the relationship between Qumrân and the Ebionites.

W. W. WESSEL

EBIONITES, GOSPEL OF THE. *See* APOCRYPHAL GOSPELS IV.B: EBIONITES II.A

EBLA eb'lə. The capital of a great Canaanite empire that flourished during the 3rd and 2nd millennia B.C. The significance of this major urban center of ancient Syria was not known until the early 1970's, when excavations at TELL MARDIKH in northwest Syria (67 km. [41 mi.] SW of Aleppo, just E of the highway from Aleppo to Hama and Damascus) led to its identification with Ebla. Under the great king Ibrum the kingdom of Ebla controlled all the territory between Egypt and the Persian Gulf, including Palestine and Syria, Sumer and Akkad.

EBONY [Heb. *K hôḇānîm, Q hoḇnîm*] (Ezk. 27:15). Of uncertain vocalization, this term, omitted by the LXX, doubtless refers to two species of ebony, *Diospyros ebenaster* Retz. and *D. melanoxylon* Roxb., native to India and shipped to Tyre by Phoenician merchants. The exterior sapwood is stripped off, leaving an interior portion of about 2 ft. (.6 m.) in diameter in mature trees. When old, ebony becomes black, heavy, and durable, and from antiquity has been widely used for cabinet-making and ornamental work. *See* picture of hounds-and-jackals game in GAMES.

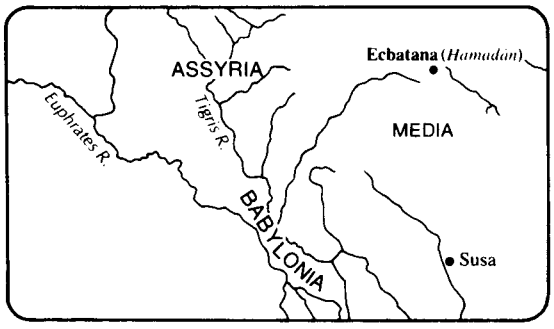
R. K. H.

EBRON ē'brən [Heb. *'eḇrōn*]; AV HEBRON; NEB ABDON. A town in the territory of Asher (Josh. 19:28), probably the same as ABDON (Josh. 21:30; 1 Ch. 6:74), conjecturing a copyist's error of *resh* (ר) for *daleth* (ד).

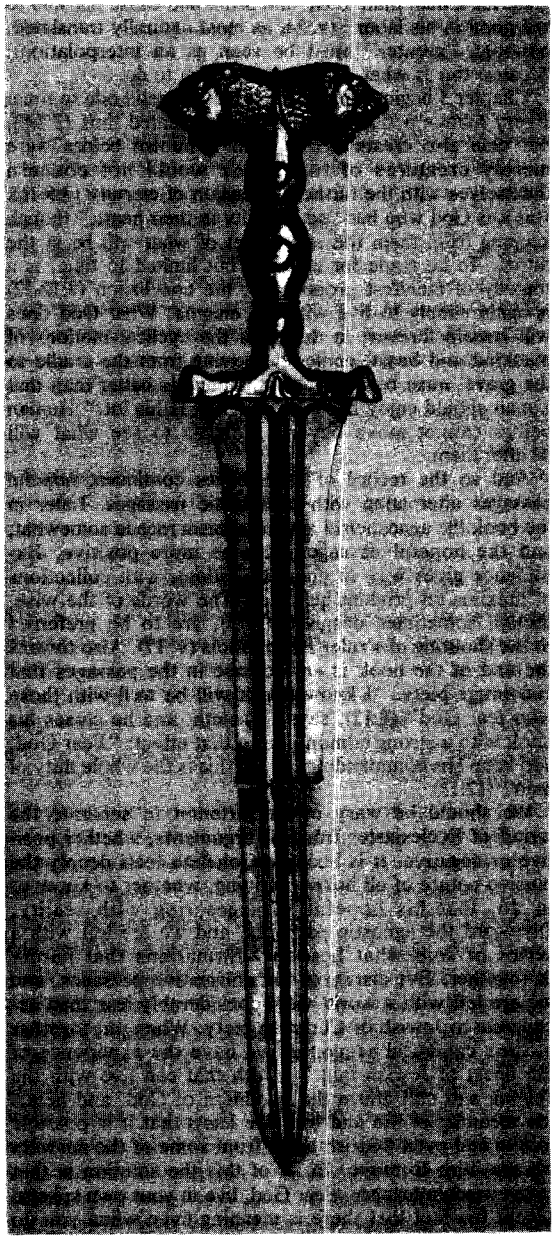
EBRONAH ə-brō'nə (AV, NEB, Nu. 33:34f.). *See* ABRONAH.

ECANUS e-kā'nəs (AV 2 Esd. 14:24). *See* ETHANUS.

ECBATANA ek-ba'tə-nə [Aram. *'aḥmᵉṯā'* (Ezr. 6:2); Gk. *Amatha*; Pesh. Syr. *'aḥmāṯān*; Tiglath-pileser's inscr. (*ca.* 1100 B.C.) *Amadāna*; Darius Behistun inscr. ii.76-78 *Haŋgmatāna*–'place of assembly'; Herodotus *Agbatana*; Xenophon *Ekbatana*; so 1 Esd. 6:23; Tob. 3:7; 6:5; 7:1; 14:12, 14; Jth. 1:1f., 14; 2 Macc. 9:3; Talm. Heb. *hamdān*; now Arab. *hamadān*]; AV ACHMETHA; AV Apoc. ECBATANE. The ancient capital of Media, now buried under modern Hamadân, 290 km. (180 mi.) WSW of Tehran at about the 1830-m. (6000-ft.) level near the foot of Mt. Orontes (Aurvant). It was situated on a strategic trade route along the Elburz (now the modern Kazvin-Kermanshah highway), which ran from Central Asia to Rhages (near Tehran), then by way of Ecbatana and Kermanshah to northwestern Mesopotamia. During the Parthian period this site was on one of the three stretches of the great "Silk Road," which passed through Merv, Hecatompylos, and Ecbatana, crossed the Euphrates, and



Achaemenian gold dagger with two lion heads at pommel (5th cent. B.C.), reputedly from Ecbatana (Hamadân) (Metropolitan Museum of Art, Harris Brisbane Dick Fund, 1954)



passed on to the Mediterranean. It is still one of the chief trade and distribution centers of Iran.

The city is mentioned in cuneiform inscriptions from Tiglath-pileser I (*ca.* 1100 B.C.) as *kar-kassi*, "Kassite town." Ctesias attributed the founding of the city to Semiramis (*ca.* 800 B.C.), who built a palace there for herself; but Herodotus (i.96ff.) claimed the city was founded or rebuilt by Deioces (Daiaukku) the Mede (*ca.* 700 B.C.) on the site of Elippi, an ancient city of the Mandâ. Cyrus captured the city from Astyages (548 B.C.), and later brought Croesus there as captive. Cyrus and other Persian kings used to spend the two summer months there yearly, owing to the comparative coolness of the climate. The winters, however, are long and severe, with much snow.

Herodotus (i.98) described it as a magnificent city fortified with seven concentric walls. Its citadel (Aram. *bîr'ṯā'*, Ezr. 6:2) is mentioned by Arrian, who says that when Alexander took the city in 324 B.C. he stored his enormous amount of booty there. In it the royal archives were kept. It stood on a hill, where later was built a temple of Mithra. Polybius (x.27) spoke of the great strength of the citadel. Diodorus indicated that the city was 250 stadia in circumference. On Mt. Aurvant (3268 m.; 10,728 ft.) have been found inscriptions of Xerxes. Doubtless Ecbatana was one of the "cities of the Medes" to which Israel was carried captive (2 K. 17:6). It should be noted that Greek writers mention several Ecbatanas. One of these, afterward called Gazaca (Takhti Sulaimān, just S of Lake Urmia), was capital of Atropatene. H. Rawlinson identified the Ecbatana of Tobit and Herodotus with this northern city. The southern and far more important Ecbatana is certainly that of 2 Macc. 9:3. It was Cyrus' Median capital, and is doubtless that of Ezr. 6:2. In 1971 Hamadân had a population of about 125,000, including some five thousand Jews and a few Armenians. Jews from other countries make pilgrimages to the alleged tombs of Esther and Mordecai in the middle of the city.

Ecbatana still awaits the spade of the archeologist. The only artifacts have come from chance findings. Among these was a gold tablet written in cuneiform, the oldest Achaemenian object known and containing the earliest Old Persian text. R. E. HAYDEN

ECCLESIASTES e-klē-zi-as'tēz [Heb. *qōheleṯ*; Gk. *Ekklēsiastēs*]. A book of the OT, part of the wisdom literature.

I. Name
II. Structure
III. Contents
IV. Date and Authorship
V. Canonicity

I. Name.–The speaker in Ecclesiastes calls himself Heb. *qōheleṯ* (1:1f., 12; 7:27; 12:8-10; twice with the article), rendered "the Preacher" in most English versions. The term occurs nowhere else in Hebrew writings, although it is from a stem that is in common use. In form it is a feminine participle of a verb *qhl*, meaning "assemble," though this form is always (with the possible exception of 7:27) rendered with a masculine verb. Various theories have attempted to explain the enigma, but it is probably best to conclude that *qōheleṯ* originally signified some kind of office, e.g., "one who collects" or "one who calls an assembly together" or "one who speaks to an assembly." The Hebrew word for assembly (*qāhāl*) is often rendered in the LXX by Gk. *ekklēsía* and its cognates (e.g., Dt. 4:10; 9:10; Jgs. 20:2; 21:5, 8), a fact that probably influenced the LXX translation of *qōheleṯ* by Gk. *ekklēsiastēs*, from which are derived the present Latin and English forms of the name.

II. Structure.–Attempts to determine a rigid structural

development within Ecclesiastes have foundered for lack of convincing evidence, but that is not to say that the book lacks unity or structure. Beginning with a title (1:1) and a prefatory section that establishes the general theme (1:2-11), the book continues with a series of autobiographical wisdom reflections followed by various admonitions and observations in the style of standard didactic wisdom, and concludes with a brief prose appendix (12:9-14) in which a definite conclusion is drawn. Although certain sections seem to conclude an argument (e.g., 2:24-26; 3:12-22; 5:18-20) in a manner that contrasts with the sections immediately preceding, it is not clear that the book is intended to be a simple presentation of the opposing sides of any issue. In the less autobiographical and more gnomic sections toward the latter part of Ecclesiastes the conclusions are an integral part of the argument (e.g., 8:17). The idea of the vanity of all things and the concomitant hope resulting from a basic belief in the goodness of God and creation characterize both the personal ("I") and the gnomic ("thou") sections.

III. Contents.–Qoheleth's thesis is set forth at the beginning, and the remainder of the treatise stands in relation to it. "Vanity of vanities! All is vanity and a striving after wind"; that is the premise. All things are empty and the results of human effort are illusive (1:2f.). Human generations, day and night, the wind, the streams, are alike the repetition of an unending cycle (1:4-7). The same holds true for human study and thought (1:8-11). Nothing is new. Every effort of nature or of man is the doing again of something that has already been done.

But the idea that all things consist of vapor, that all is momentary, profitless, and empty, is clearly set in a context of Jewish wisdom and piety. Qoheleth is a believer, and this is what creates the dynamic of his book. It is not a question of nihilism, hedonism, or determinism. These he has considered, and in some ways each system has its appeal; but in his thought are also elements of purpose, eternity, value, and individual worth. Although there are and must continue to be great unanswered questions, and their presence must function as a counter to smug assurance and unreflective belief, there is also value and meaning. Human beings must accept their own lot and not confuse that lot with what is reserved for God alone (3:11; 5:2). Despite the enigma of existence, they can enjoy life and work, sleeping the sweet sleep of those who have put their shoulders to the wheel (3:12-14; 5:12; 9:10), knowing that both the good days and the bad are made by the one God (7:14). And although there is little developed sense of the hereafter, Qoheleth has no doubt that God, who rules over all, will some day or in some manner bring every act to judgment, whether good or evil (12:14). Such judgments do not resolve the problem of existence, but they do reduce to an acceptable level the absurdity of life as it appears to a thoughtful observer.

Qoheleth's conclusions, often set over against his own sharply contrasting and pessimistic speculation, convince him that life is still worth living, even in the worst of times. It is the ultimate faith in the historical process, a faith derived from his faith in a God who is often hidden but never really doubted, that separates Ecclesiastes from all forms of agnostic speculative philosophy. Qoheleth's life may contain a host of unanswered and unanswerable questions, but his God is consistent. God's way and will may not be known; but His is not the way and will of the Babylonian deities, to whom appeal may be made but to whom no final and consistent will may ever be attributed (cf. *ANET*, pp. 438-440).

In developing these ideas, Qoheleth begins with his general observations on the order of things natural and intellectual (1:2-11). After the preface the speaker introduces himself again and recounts his own experiential search for meaning. At the outset he had a noble ambition for wisdom and discipline, but all he attained to was emptiness and perplexity of mind (1:12-18; this is equally the meaning of the text, whether we translate "vanity and vexation of spirit" [AV] or "vanity and a striving after wind" [RSV and most modern translations]).

Finding no adequate satisfaction in the pursuits of the scholar and wisdom teacher, he seeks to combine with these the pursuit of pleasure, both that which comes from external stimuli and that which arises from his own enterprise and achievement (2:1-11). Again he attains only emptiness and perplexity of spirit. A concluding paragraph puts wisdom ahead of pleasure (the pursuit of the fool), but realizes that inevitable and ubiquitous death finally reduces wise man and fool to the same end (2:12-23). There is no solution but to view the problem in the light of God's purpose for mankind (2:24-26): "There is no (greater) good for a man than to eat and drink and cause his soul to see good in his labor" (v. 24, as most naturally translated, although "greater" must be seen as an interpolation), because this is what God has given him to do.

Chapter 3 begins with a simple but majestic ode to time. Every human activity has its own appointed time (3:1-8), but time also creates a problem. If human beings were merely creatures of time, they would not concern themselves with the further dimension of eternity (3:9-11). But it is God who has "set eternity in their heart," though keeping from them the real secret of what will be in the future. To be made for eternity, but limited to time, is a tragedy of manifest proportions; the conclusion (3:12-22) is again simply to live with the enigma. What God does will remain forever; in that light the cyclical motions of mankind and beast, endlessly moving from the cradle to the grave, must be accepted. "Nothing is better than that a man should enjoy his work, for that is his lot." Human beings cannot move beyond the pale to see what will be after them.

And so the record of experiences continues, hopeful passages alternating with pessimistic passages. Later in the book the agnosticism and pessimism recede somewhat, and the hopeful passages become more positive. Experience gives way to gnomic wisdom, with collections of maxims on prudent behavior. The words of the wise, though sometimes despised (9:15), are to be preferred to the shouting of a ruler among fools (v. 17). Also toward the end of the book is an increase in the passages that encourage piety. "I know that it will be well with those who fear God" (8:12), says Qoheleth, and he closes his book with a strong admonition to that effect: "Fear God, and keep His commandments; for this is the whole duty of man" (12:13).

We should be wary of any attempt to separate the writer of Ecclesiastes from his arguments, whether positive or negative. It is because Qoheleth feels deeply the illusive nature of all human striving, whether to know or to do, that his hopeful passages ring with reality. Disregard the agnostic passages, and we are left with a series of somewhat hesitant affirmations that hardly fit together. But disregard the affirmative passages, and we are left with a world view considerably less than acceptable to Jewish or Christian piety. When put together in their canonical sequence, we have the experience of the finest of Jewish faith — faith that can live with the enigma and still affirm the goodness of God, and hence the meaning of life and toil. We learn that it is possible to live and even flourish apart from some of the answers we are born to crave. In all of this the solution is that of the wisdom teacher. Fear God, live in your own sphere, accept the fact that there is meaning even when you do

not know what it is, avoid extremes, and enter fully into those limited joys that life can supply. Although all is vanity and all will pass away, there are still degrees of value. Wisdom is better than folly, good stands out from evil. Above all, Qoheleth warns the youth, remember your Creator while it is still possible (12:1), even as you devote yourself to the sayings of the wise (v. 11).

IV. Date and Authorship.–In addition to his title "Qoheleth," the speaker is represented as "the son of David, king in Jerusalem" (1:1). So far as this clause is concerned, the king in question might be either Solomon or any other king of the dynasty, or he might be a composite or an ideal king. Two obvious anachronisms are alleged to militate against Solomonic authorship, although most arguments for a later date center on other data. In 1:12 the speaker writes, "I . . . have been [Heb. *hāyûtî*] king . . . in Jerusalem," and v. 16 favorably compares the speaker's wisdom with "all who were over Jerusalem before me." However, v. 12 can also be translated "I became king . . . ," and v. 16 may refer to wisdom teachers rather than a long line of previous monarchs. But either way, Solomonic authorship is not conclusively ruled out by such fragmentary evidence. Evidence from other sources does point to a later date; but it is probably safe to say that if the speaker is not Solomon, he is some other actual or composite or ideal king of the dynasty of David. In any case the book is not pseudepigraphical, since its reference to the role and background of the speaker does not specifically mention Solomon, but uses instead the self-designation "Qoheleth."

Evidence for dating the book comes from both its ideas and its linguistic peculiarities. A widely held opinion is that the skepticism of the book could represent only a late period in Hebrew thought, when Judaism had spent its early vigor (see O. Eissfeldt, *The OT: An Intro.* [Eng. tr. 1965], p. 496). It is true that the work reflects a time of misery and decline (Eccl. 1:2-11; 3:1-15; etc.), but given the vicissitudes of national fortune observable in any society, this is hardly as conclusive an argument as has been suggested. Among those still committed to Solomonic authorship, the tradition of a time late in that monarch's reign, as reflected in one Midrashic source (*Cant. Rabbah* i.1.10), seems equally appropriate.

Traces of both Greek and Egyptian thought have been discovered in Qoheleth, but neither has been conclusively demonstrated. If indeed the book is to be dated in the postexilic period, it would not be surprising if some affinities to Greek thought were demonstrable; but most of the attempts to link Ecclesiastes with STOICS or EPICUREANS, with the Cynics or Heraclitus, have met with stern rebuttal in the scholarly discussions (cf. Gordis, *Koheleth*, pp. 51-57). Egyptian sources present similarities both in form and content, including not only the general tone (cf. *ANET*, p. 467) but specific references to belief and custom (e.g., the sacred oath of 8:2 and the funeral customs of 8:10; cf. Eissfeldt, p. 499). Egyptian influence would not of itself establish any date for the book, as it is known to have been felt in Israel as early as Solomon and as late as the postexilic period.

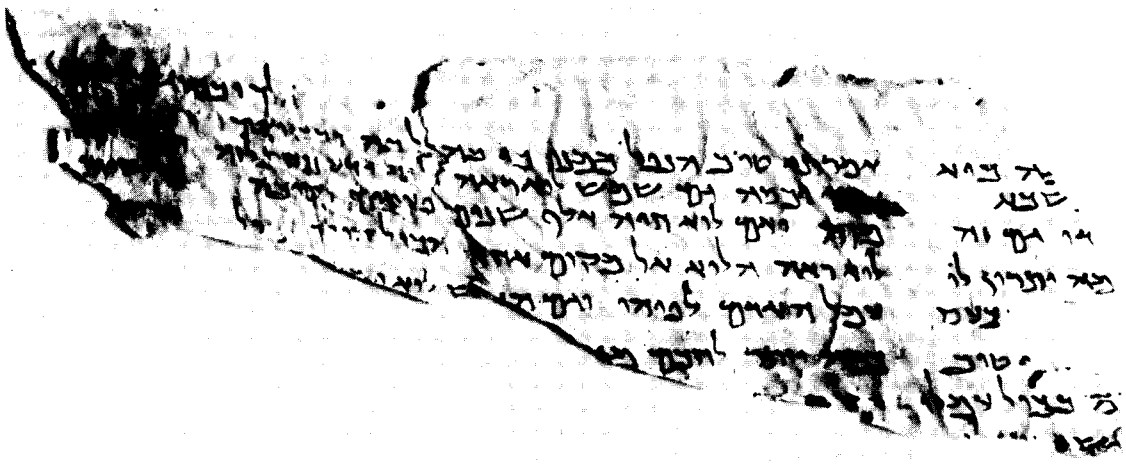
Linguistic arguments have traditionally focused on the presence of Aramaisms and Grecisms. Gordis, who contends that "the *abundance* of evidence points overwhelmingly to a period when Aramaic was becoming the dominant language of Western Asia" (*Koheleth*, p. 59), further states: "Koheleth does not really include Aramaic words, but rather their Hebrew or Hebraized parallels" (p. 61). Rejecting arguments for an Aramaic original, Gordis finds evidence rather for a language standing "midway between classical Biblical Hebrew and the Mishnaic idiom, though . . . closer to the latter" (p. 60). Gordis is representative of the majority of scholars, although there have always been a variety of opposing positions.

Along with arguments for a dependence upon Greek philosophy, many have alleged the presence of Grecisms. Although this is by no means a dead issue, there is now more agreement that evidence of Greek forms is limited to a few possible, but by no means certain, expressions. Gordis even goes so far as to claim, ". . . there are no indubitable Greek constructions or idioms in the text and not a single instance of a Greek word" (*Koheleth*, p. 62).

Much more influential has been the work of M. Dahood, whose article "Canaanite-Phoenician Influence in Qoheleth" (*Bibl.*, 33 [1952], pp. 30-52, 191-221) tries to prove considerable dependence by the author of Ecclesiastes on Phoenician orthography, grammar, and syntax. The evidence marshaled is impressive and not unlike some of the evidence set forth by the same author for Canaanite-Phoenician affinities in other biblical literature. But Dahood retains a postexilic date for the composition, in contrast to some who have used his arguments to support the more immediately appealing idea that Solomon, with his Phoenician contacts, may have employed northern scribes in compiling the work.

In truth, the language of Ecclesiastes is unique. Frag-

Fragment of Ecclesiastes Scroll from Qumrân, probably dating from the middle of the 2nd cent. B.C. (Israel Department of Antiquities and Museums)



ments of the work have been found in the corpus of texts from Qumrân Cave 4 (J. Muilenburg, *BASOR*, 135 [Oct. 1954], 20-28), dated generally to the 2nd cent. B.C.; so the book is known to predate that era. The Wisdom of Ben Sira (Sirach or Ecclesiasticus) was influenced by Ecclesiastes (although some have alleged that the influence was the other way), making it highly probable that the latter work was circulating by *ca.* 300 B.C. Any attempt to compare the language of the book to other postexilic or intertestamental works has foundered, probably because of the unique genre of Ecclesiastes. Comparisons with Aramaic forms, however, together with the evidence for a stage of Hebrew approaching Mishnaic, lead to the conclusion that Ecclesiastes as presently composed embodies a late form of the language, and the work may safely be dated in the late 5th or early 4th century. The suggestion that such a date would make the work spurious or fictional ignores the obvious fact that the book itself does not identify its author in other than general terms.

V. Canonicity.–Ecclesiastes appears in the third section of the Hebrew Bible (Kethubhim, or Writings), where it is grouped among the five Megilloth or Scrolls. Although it has been widely assumed that such a grouping itself insures the lateness of a book, and with lateness a relatively slow process of canonization, such a conclusion is by no means certain. Both the date of the rise of a threefold division of the canon and the reasons for placing a book within the third division have been hotly debated by conservative scholars within this century. Most of the books in the third division do represent the later collections of the Hebrew Bible, but this does not mean that these books could not have been received as canonical before the 1st cent. of the Christian era. When extensive discussion arose over the place of Ecclesiastes among the books that "[ritually] defiled the hands," it came not as a question of admitting a new book to the canon but as an attack on the book's traditional place among the canonical writings. The book's relative skepticism made it an offense to some of the conservative school (Shammai) within Judaism. Its eventual confirmation was probably assured because of the tradition of Solomonic authorship, reflected in its placement with Proverbs and Canticles in the LXX and certain rabbinic sources, and because of the tradition of usage dating back to Ben Sira. The book was generally accepted by the Christian Church, which took over its OT canon from the Jews. *See also* CANON OF THE OT.

  B. Biblical Occurrences
  C. Psycho-Social Approaches
  D. Controlled and Uncontrolled Possession
II. In the OT
  A. Nature of Revelatory Experience
  B. Descriptive Phrases
  C. Types of Revelatory Experience
III. In the NT
  A. Uses of the Term
  B. Behavioral Features
  C. Descriptive Phrases

I. General.–A. Definition. "Ecstasy" is a transliteration of the Greek noun *ékstasis*, derived from the verb *exístēmi* (or *existánō*), the root meaning of which is "displace," "stand apart from," or "put out of place." While the Greek words literally mean displacement or change, metaphorically they refer to at least three states of mind, each having characteristic behavioral features: (1) mental or psychological distractions such as excitement and astonishment, fear and terror; (2) the pathological mental state of madness or insanity (whether temporary or permanent); and (3) the trancelike state in which people are considered particularly susceptible to communications from supernatural beings. These types of *ékstasis* were distinguished by Philo (*Quis rerum divinarum heres* 249), who was dependent on Plato (*Phaedrus* 244a-245a), though Plato used different terms. This article will focus on the third type of *ékstasis*; but since this category exhibits such a wide variety of behavioral characteristics, and since such designations as "trancelike state" or "ecstatic state" are vague and subject to misunderstanding, we shall refer to this phenomenon as the *revelatory state* of consciousness.

B. Biblical Occurrences. The term "ecstasy" is not used in the AV, RSV, or NEB. In three NT passages (Acts 10:10; 11:5; 22:17), however, *ékstasis* is appropriately translated "trance" in all three versions. The AV also uses "trance" in Nu. 24:4, 16 in a periphrastic, though not inappropriate, interpretation of the Hebrew text, which describes Balaam's experience of a revelatory state of consciousness. In the OT there is no single Hebrew word which, like the Gk. *ékstasis*, describes the revelatory state. The LXX uses *ékstasis* thirty times to translate eleven different Hebrew words, the majority of which are synonyms for "fear" or "terror." In two passages (Gen. 2:21; 15:12) *ékstasis* represents the Hebrew noun *tardēmâ* ("deep sleep"); in 15:12 God is said to have caused a deep sleep to fall upon Abraham, during which the patriarch received a revelation in a vision. In the NT the Gk. *exístēmi* (or *existánō*) can refer to irrationality or madness (Mk. 3:21), but in most instances it refers to "amazement" or "astonishment" (Mt. 10:23; Mk. 2:12; 5:42; 6:51; Lk. 2:47; 8:56; Acts 2:7, 12; 8:13; 9:21; 10:45; 12:16). In one instance (2 Cor. 5:13, discussed below) *exístēmi* refers to the revelatory state. The LXX uses *exístēmi* and *existánō* about seventy-five times as translations for twenty-nine Hebrew words, all of which are synonyms for "fear" or "amazement."

C. Psycho-Social Approaches. From the psychological point of view the revelatory state is an abnormal state of consciousness in which intense absorption in one restricted set of feelings or ideas dominates the consciousness to the exclusion of normal external sensory impressions. The subject experiences the control and domination of his consciousness by a supernatural force or power outside of himself. From the psychological perspective the resulting visions and auditions are subjective rather than objective experiences. From the sociological perspective, the revelatory state is an experience characterized by abnormal behavioral features that are accepted as proving that the subject has received visionary and/or suggesting

communication with supernatural beings by means of contact or possession. The revelatory state, often referred to as "ecstatic experience," is a universal religious phenomenon (Lewis, *passim*). If the supernatural beings that communicate with man are regarded as affecting him in primarily an *external* manner, the experience can be referred to as "divine inspiration." If the supernatural beings are thought to enter into a man's body or personality, the experience may be referred to as "divine possession." In general the ancient Greek view up to the 1st cent. A.D. was that of "divine inspiration," while the Judeo-Christian view was that of "divine possession."

D. Controlled and Uncontrolled Possession. Two other distinctions must be made. The experience of the revelatory state in terms of inspiration or possession can occur in an *uncontrolled* or a *controlled* manner (Lewis, p. 64). Uncontrolled inspiration or possession cannot be limited by the subject to particular places and times, while controlled inspiration or possession is subject to the will of the practitioner and occurs only within scheduled situations. Frequently the initial experience of uncontrolled possession or inspiration is gradually transformed into the kind of controlled possession practiced, for example, by Siberian shamans (Lewis, p. 55). For biblical examples of uncontrolled possession we may point to the revelatory trances experienced by Peter (Acts 10:10; 11:5), Paul (Acts 22:17), and John (Rev. 1:10; 4:1), while examples of controlled possession are exhibited by Balaam (Nu. 24:4, 16) and the Corinthian prophets (1 Cor. 14:27-33). In general it may be said that controlled inspiration characterized the Greek conception of divine revelation, since oracular utterances were normally given in response to inquiries at defined times and places, and that ancients regularly consulted such oracles to minimize the risks inherent in human decisions. Prophets of the ancient Near East (Canaan, Egypt, Mari, Israel), on the other hand, knew both controlled and uncontrolled possession. Classical Israelite prophecy was frequently of the uncontrolled type, since divine revelations were spontaneously delivered in situations of extraordinary social and political crisis.

II. In the OT.–A. Nature of Revelatory Experience. In ancient Palestine, during the period of Israelite occupation until the beginning of classical Israelite prophecy with Amos and Hosea in the 8th cent. B.C., the revelatory state of consciousness was primarily achieved and practiced in controlled situations. Though it has often been claimed that Canaanite and early Israelite prophets induced the revelatory state by artificial means, it is more probable that references to the use of music (1 S. 10:5; 2 K. 3:15; 1 Ch. 25:1) and the dance (1 K. 18:26) were part of the normal ritual setting within which versified oracles were chanted. Although the band of prophets depicted in 1 S. 10:5-13; 19:8-24 appears to have experienced a controlled revelatory state, Saul and his messengers are described as falling into the revelatory state involuntarily. The revelatory state into which the band of prophets had fallen was infectious and produced a catatonic state in Saul, for whom the experience was both new and alien (19:24). The controlled nature of the revelatory state for some OT prophets is indicated by the fact that it was preceded by prayer (Jer. 33:3; 37:3, 6-10; 42:2-4; Dnl. 9:20-23), and sometimes by fasting (Dnl. 10:2-9), features that often provide a context for the onset of the revelatory state in the NT. Presumably the cult prophets, who had to respond to specific questions posed by those who came "to inquire of the Lord" (1 S. 9:9; 1 K. 22:5, 7; 2 K. 3:11; Jer. 21:2), were able to achieve the revelatory state at will.

B. Descriptive Phrases. The onset of the revelatory state is frequently described with such stereotyped phrases as "the Spirit of God came upon" a certain one (Nu. 24:2; 1 S. 10:10; 11:6; 19:20, 23; 2 Ch. 15:1; Isa. 61:1), or "the hand of the Lord came/was upon" someone (Ezk. 3:14, 22; 8:1; 33:22; 37:1), or "the word of the Lord came to" a certain prophet (1 K. 19:9; 1 S. 15:10; 2 S. 24:11; Jonah 1:1; Hag. 1:1; 2:1, 20; Zec. 7:1, 8; 8:1). These formal descriptions tell us very little about the nature of the revelatory state except that those who so described the experience (in some cases the prophets themselves) carefully distinguished the onset of the revelatory state from the normal state of consciousness.

C. Types of Revelatory Experience. The kinds of experience that characterized the revelatory state are rarely described in the OT, with the exception of the prophet Ezekiel (cf. 1:1–3:15) and some of the visions described by other prophets (Amos 7:1–8:14; Zec. 4–6). In opposing false prophets, Jeremiah affirmed that only those who had stood in the council of the Lord were true prophets (Jer. 23:18, 22). This kind of visionary experience is presented in more detail in 1 K. 22:19-23, where Micaiah ben Imlah describes an experience he had while in a revelatory state: he heard and saw the conversations and activities of the council of God in heaven regarding the imminent events on earth. Another type of revelatory experience, which is an example of uncontrolled inspiration, is the call reported by many prophets (Ex. 3:1–4:17; 1 S. 3:2-14; 2 K. 2:9-14; Jer. 1:4-10; Isa. 6:1-13). In considering the full spectrum of revelatory experiences narrated in the OT, neither the type of revelatory state nor the conditions within which it is experienced is the subject of criticism or disapproval. The distinction which some modern scholars have made between the "ecstasy of absorption" and the "ecstasy of concentration" is not found in the OT, but rather imposed on it.

III. In the NT.–A. Uses of the Term. In the NT, the Gk. *ékstasis* ("trance," AV, RSV, NEB) refers to the revelatory state in Acts 10:10; 11:15; 22:17. In the first two references Peter is said to have fallen into a revelatory state after prayer and then to have received a revelatory vision; in the third reference Paul similarly receives a vision while praying in the temple in Jerusalem. In another important passage, Paul uses the verb *exístēmi* to describe a state of revelatory ecstasy in a way not clearly communicated by the RSV or other major versions. In 2 Cor. 5:13 Paul observes: "For if we are beside ourselves [*exéstēmen*] it is for God; if we are in our right mind [*sōphronoúmen*], it is for you." Paul here contrasts two states of consciousness, not irrationality and rationality, but rather the revelatory state, i.e., the extraordinary experience of full possession of the Spirit, in contrast to the normal, rational state of consciousness (F. Pfister, p. 187). Paul makes a similar distinction in 1 Cor. 14:2, where glossolalia is specifically defined as speech directed to God, whereas comprehensible speech is addressed to man.

B. Behavioral Features. In the NT the revelatory state of consciousness has external behavioral features that allow it to be confused with drunkenness (Acts 2:13, 15; Eph. 5:18) or insanity (Mk. 3:21; 1 Cor. 14:23). A revelatory state is often exhibited by an abnormally loud voice (Mk. 1:24; 3:11; 5:7; Lk. 1:42; Acts 2:14; 16:17; cf. F. J. Dölger), or even by incomprehensible speech (1 Cor. 14:2, 9, 18). At times it is accompanied by bizarre behavior (Mk. 5:2-5; 9:22; Acts 16:17f.; 21:11). In most NT instances the onset of the revelatory state is unexpected and uncontrolled, though it is occasionally said to be preceded by prayer (Lk. 3:21; 9:28f.; Acts 10:10; 11:5; 22:17; 2 Cor. 12:8f.), and on one occasion by fasting (Acts 13:2). The revelatory experience itself is described in a number of ways. A vision may be received by one in the revelatory state (Acts 10:10; 11:5; 22:17-21) in the form of a journey to

heaven (2 Cor. 12:1-4; Rev. 4:1) or of an appearance of a supernatural being (God, Christ, or an angel) from heaven (Acts 9:3-6; 22:6-8; 26:13-18). The experience may be regarded as subjective in the sense that not all those present see or hear the same thing (compare Acts 9:7 with 22:9, and compare the various accounts of Jesus' revelatory experience at His baptism in Mt. 3:16f.; Mk. 1:10f.; Lk. 3:21f.).

C. Descriptive Phrases. The phrase "(be) in the Spirit" (Rev. 1:10; 4:1) is another way of describing the revelatory state, the opposite of which is to "be oneself" (Acts 12:11). The concept of the central role played by the Spirit of God in producing the revelatory state is derived from the OT (Nu. 24:2; 1 S. 10:10; 11:6; 19:20; Ezk. 8:3; Isa. 61:1), and early Christians emphasized the Spirit's role as the cause of the revelatory state within which OT prophets uttered their inspired oracles (Acts 1:16; 1 Pet. 1:11; 2 Pet. 1:21). Though all Christians can be described as being "in the Spirit" (Rom. 8:9-11; Gal. 3:3; 5:16), that status does not refer to the extraordinary and abnormal revelatory state, which is a temporary rather than a permanent experience. In the NT, as in the OT, the revelatory state is not always attained in an uncontrolled manner, for the very fact that prophecy and other manifestations of the Spirit occur within the framework of Christian worship (Acts 11:27f.; 13:1; 1 Cor. 14:26-33) indicates that both the time and place of the onset of the revelatory state is subject to control. Paul urges even greater control in 1 Cor. 14:27-32. It is probable that Paul himself, who claims to have had many experiences while in a revelatory state (1 Cor. 14:6, 26; 2 Cor. 12:1, 7; Gal. 1:12; 2:2), learned to control the experience and on that basis could exhort the Corinthian community to exercise control over their experiences.

ED ed [Heb. *ʿēḏ*–'witness'] (AV Josh. 22:34). *See* WITNESS. The name of the altar erected by the trans-Jordanic tribes upon finally taking possession of Gilead (Josh. 22:10f., 34).

EDAR ē'där. *See* EDER, TOWER OF.

EDDIAS ed-ī'əs (AV 1 Esd. 9:26). *See* IZZIAH.

EDDINUS ed'i-nəs [Gk. B *Eddeinous*, A *Eddinous*); AV JEDUTHUN; NEB EDDINOUS. One of the temple singers at Josiah's Passover (1 Esd. 1:15). AV reads here "Jeduthun," the corresponding name in the parallel passage (2 Ch. 35:15). *See also* JEDUTHUN.

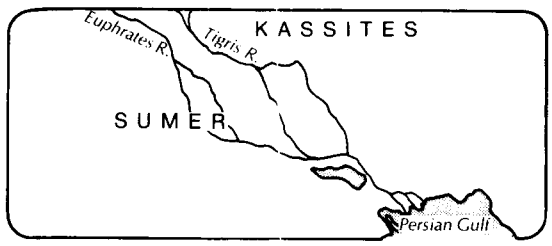
EDEN ē'dən [Heb. *ʿēḏen*] (2 Ch. 29:12; 31:15). A Levite who participated in Hezekiah's reform. It is not certain whether both passages refer to the same man or if there were two Levites by this name.

EDEN [Heb. *ʿēḏen*; Gk. *Edem*].

1. The area where God planted a garden of trees to form the first dwelling place of Adam and Eve. The etymology of the word is uncertain, although some scholars have attempted to explain it in terms of the Sum. edinu, "plain," "wilderness." The meaning "delight" conveyed by the LXX resulted from the assumed derivation of Eden from *ʿēḏen*, "loveliness," "delight," while the rendering *parádeisos tês tryphês* ("garden of delight") as the equivalent of "garden of Eden" not unnaturally led to the association of the latter with Paradise.

Aside from those in Gen. 2 and 3, other references to Eden in the OT are: Gen. 4:16; 2 K. 19:12; Isa. 37:12; 51:3; Ezk. 28:13; 31:9, 16, 18; 36:35; Joel 2:3. The name occurs thirteen times in the singular to designate a location. In Gen. 2:8 the garden was said to be "in Eden, in the east" (NEB "in Eden, away to the east"; cf. 4:16), where the vegetation was luxurious (2:9), where the fig tree, among others, was indigenous (3:7), and where irrigation canals supplied water. As distinct from a geographical locale in which a garden was situated, Gen. 2:15; 3:23f. refer to "the garden of Eden" as a separate topographical entity. In a metaphorical sense Eden paralleled "the garden of the Lord" (Isa. 51:3), an image which also appears in Ezk. 28:13; 31:9. The splendor of the trees in Eden is alluded to in Ezk. 31:16, 18; cf. 36:35; Joel 2:3. *See also* BETH-EDEN.

The location of Eden can be partially determined from the description already given. It must obviously be situated where the climate was suitable for the growth of fruit trees and where animals capable of domestication could live alongside the earliest members of the species *homo sapiens*. In particular the location of Eden must be considered by reference to the river from which the garden was watered. Before this is attempted, however, it is necessary to examine the nature of the source material containing the description of the area. Most modern scholars dismiss the passage in question as either legend or myth, having no significant basis in historical reality. However, the present writer views the bulk of Genesis as having been transmitted in a readily recognizable tablet form from a very early period of Mesopotamian history (see R. K. Harrison, *Intro. to the OT* [1969], pp. 543-553); thus this kind of material represents early attempts at the writing of history. The source in question is therefore taken as being fundamentally historical in nature, so that it is the responsibility of the exegete to interpret what the ancient author was endeavoring to describe.



While there must always be a certain amount of conjecture in any reconstruction, it seems at least possible to make the following observations. The principal river (*nāhār*) of Gen. 2:10 parted and became four "heads" (MT *rāʾšîm*; RSV "rivers"; NEB "streams"), a word that in Jgs. 7:16; Job 1:17 denotes the main detachments into which an army was divided, and therefore would more properly signify "branches" than "heads" of a river. Such branches were named respectively Pishon, which flowed round the whole land of Havilah; Gihon, which encompassed the land of Cush; Hiddekel, the river Tigris flowing E of Assyria; and the Euphrates.

The fact that two of the four branches are historic and familiar rivers suggests that, at the time of the original writer, the other two were also. Attempts to identify the latter have depended to some extent upon

the location of Havilah and Cush. Havilah is mentioned in Gen. 10:29 as the name of one of the sons of Joktan, while in Gen. 25:18 it occurs as a place, perhaps located in the area of Sinai and northwestern Arabia. In Gen. 10:7 the name Havilah is found again to describe a descendant of Ham through Cush. These could represent quite distinct persons and places or could perhaps indicate that some area of settlement in South Arabia was associated with the two persons named Havilah, along with their descendants. This, however, throws no light upon a Mesopotamian location for Havilah, unless those scholars are right who relate the name to the Heb. *ḥôl*, "sand," to designate a desert area. The mention of the presence of "gold" in the land (Gen. 2:10) is certainly a questionable translation, and the NEB margin quite properly draws attention to the alternative rendering "frankincense." Similarly the meaning of the word "bdellium" is open to some doubt, and the most satisfactory translation is "gum resin," as also in the NEB margin. Aromatic resins and gums are a typical product of Arabia, which would again suggest that Havilah was located somewhere in that area. However, the *šōham* stone (RSV "onyx stone"; NEB "cornelians") is most probably a form of onyx, which occurs primarily in South America and India, suggesting a location E rather than W of Mesopotamia. If Havilah can be placed in some part of Arabia, this need only mean that it was a western colony of an original Havilah in Mesopotamia, though certainty in this matter is lacking.

Cush, the land encircled by the river branch known as Gihon, usually signifies Ethiopia in the OT, although not uniformly so (cf. Gen. 10:8). Those who postulate an Egyptian location for Cush think of the Ethiopia mentioned by classical authors, i.e., some region S of Egypt proper, such as the northern Sudan or Nubia. In the late 3rd millennium B.C. "Kush" was a district located somewhere between the second and third cataracts of the Nile. The area encompassed by the Gihon, however, was most probably in western Asia, and as such entirely unrelated to the region in Egypt. In the 2nd millennium B.C. a district E of the Tigris bore the name "Kush," and it was from this area that the Kassites came. Since the Garden of Eden narrative clearly implies a Mesopotamian location, the original home of the Kassites would suit the topography better than some area of Egypt.

The names of the two branches mentioned above unfortunately throw little light upon their location, since the etymology of both is uncertain. Pishon has been seen as a derivation of *pûš*, "leap," "spring forth," but this is doubtful as best and in any event does not help to elucidate the problem. Gihon has been viewed as an appellative from *gû(a)ḥ*, "break forth," "burst out," though this too is far from convincing and again does not resolve the difficulty. Probably the most suitable answer concerning the actual location of the Garden of Eden is to think of the river that watered the garden and thereafter became four "branches" as actually comprising the beginning or junction of tributaries going upstream from a point in southern Mesopotamia. Less probably the word *rô'š* ("head," "beginning," "top") means the root of a branch going downstream, as in a delta formation. If the original author was in an area close to the Persian Gulf that was being watered by the confluence of the Tigris and Euphrates, the branching of the river might well have referred to the upstream bifurcation of the rivers. Since from Gen. 2:6 it appears that a river (AV, RSV, "mist"; NEB "flood") overflowed in the garden to provide irrigation, it is probable that the inhabitants of Eden were living in an irrigation culture. Thus it is very likely that Pishon and Gihon were the names, not of rivers as commonly understood, but of major irrigation canals, which because of their nature have disappeared over the millennia. The narrative makes it clear that the author regarded these two waterways as equally renowned in his day with the Tigris and Euphrates, and that he was also describing an actual geographical location in rather primitive terminology. The location of the Garden could thus be placed with considerable assurance in ancient Sumer. The phrase "in Eden, in the east" (Gen. 2:8; NEB "away to the east") is literally "in Eden from in front," and indicates that perhaps the garden was located to the east of the author or that it was in the eastern part of the general area known as Eden. Nevertheless, it is impossible in the light of current information to be absolutely specific about the area's location.

By assuming the author's ignorance of geography, numerous fanciful identifications for Eden have been proposed. When Columbus passed the mouth of the Orinoco river, he supposed that its waters came down from the Garden of Eden. At that time, however, he imagined himself to be on the east coast of Asia. Those anthropologists who support a Near Eastern, rather than an African, home for earliest man, have located Eden somewhere in central Asia. Some in particular have placed it in that area stretching E from the Pamir, from which flow four rivers — the Indus, the Tarim, the Jaxartes, and the Oxus. One nineteenth-century author, W. F. Warren, went so far as to locate the original Eden at the North Pole, adducing as evidence the contention that in northern Greenland and in Spitzbergen abundant remains of fossil plants show that during the middle of the Tertiary period the whole circumpolar region manifested a climate similar to that occurring at present in southern Europe. Unfortunately, there is absolutely no evidence whatever that Adamic man (*homo sapiens*) goes back to the middle Tertiary period. A more realistic identification of Eden is with Armenia, where the Tigris and Euphrates have their origin. The Pishon and Gihon branches have been supposed to be the Choruk (thought by some to be the Phasis) and the Aras (Araxes), which empty into the Black Sea and the Caspian Sea respectively. On this identification Havilah would represent the area around Colchis; it is impossible, however, to place Cush in that region. Furthermore, these four rivers could not possibly be regarded as branches of one parent stream.

Quite clearly no theory, ancient or modern, of the location of Eden and its celebrated garden is entirely free from difficulties. On the basis of currently available information it would appear that the one that locates Eden near the head of the Persian Gulf combines the greatest number of probabilities of every kind.

EDER ē'dər [Heb. *'ēḏer*–'flock'].

1. A Merarite Levite in the days of David (1 Ch. 23:23; 24:30); he was the son of Mushi.

2. A Benjaminite (1 Ch. 8:15; AV, NEB, Ader).

EDER ē'dər [Heb. *'ēḏer*–'flock']. One of the outlying cities of Judah in the Negeb near the border of Edom (Josh. 15:21). Identification with Khirbet el-'Adar 8 km. (5 mi.) S of Gaza has been suggested, but this is too far west. The biblical text would seem to indicate that the site is to be found E of Beer-sheba, probably in the Arabah.

J. F. PREWITT

EDER, TOWER OF [Heb. *migdal-'ēḏer*–'tower of the flock']; AV TOWER OF EDAR; NEB MIGDAL-EDER. After Rachel died and was buried near Bethlehem, Jacob continued his journey toward Hebron "and pitched his tent beyond the tower of Eder" (Gen. 35:21). This "tower of the flock" must, therefore, be looked for between Bethlehem and Hebron. Jerome says it was 1 Roman mi. (1.5 km., 0.9 mi.) from Bethlehem. It was probably not a town but simply a tower for guarding flocks against robbers (cf. "watchtower," 2 K. 18:8).

The phrase *migdal-'ēḏer* occurs in Mic. 4:8, where Jerusalem is compared to such a tower. There the AV and RSV translate "tower of the flock," while the NEB renders "rocky bastion." E. W. G. MASTERMAN

EDES ē'dēz (AV 1 Esd. 9:35). *See* IDDO 3.

EDGE [Heb. *qāṣeh* (Ex. 28:7; Nu. 20:16; 33:37; etc.), *qāṣâ* (Ex. 28:23f.; 39:16f.), *peh* (Ex. 17:13; Dt. 13:15 [MT 16]; Jgs. 3:16; etc.), *qᵉṣāṯ* (Ex. 39:4), *pē'â* (Lev. 19:27; 21:5), *śāpâ* (Ex. 26:4, 10; 36:11, 17; Ezk. 43:13; etc.), *'ēḇer* (Ex. 28:26; 39:19), *pānîm* (Eccl. 10:10; Ezk. 21:16 [MT 21]), *qāhâ* (Jer. 31:29f.; Ezk. 18:2), *ṣûr* (Ps. 89:43), *'al* (Dt. 3:12); Gk. *stóma* (Lk. 21:24; He. 11:34)]; AV also SIDE, BRINK, BANK, FACE, END, CORNER, etc.; NEB also CORNER, SIDE, FRONTIER, OUTSKIRTS, etc. Used frequently in the OT for Heb. *peh*, "mouth," in the phrase "smote with the edge of the sword" (e.g., Josh. 8:24; 10:28ff.; 11:12, 14; Jgs. 1:18, 25; cf. Josh. 6:21; Jgs. 4:15f.; etc.; NEB "put to the sword"), and similarly in the NT for Gk. *stóma*, "mouth" (Lk. 21:24; He. 11:34). Also occurring frequently in the OT is the phrase "edge of the valley" (Dt. 2:36; 4:48; Josh. 12:2; 13:9, 16; etc.) from the Heb. *śāpâ*, "lip." *Qāṣeh* and *qāṣâ* ("end," "border," "extremity") are used in reference to the wilderness (Ex. 13:20; Nu. 33:6), a curtain in the tabernacle (Ex. 26:5; 36:12), the camp (2 K. 7:5, 8), etc.

Jeremiah (31:29) and Ezekiel (18:2) quote an ancient proverb: "The fathers have eaten sour grapes, and the children's teeth are set on edge." The Hebrew term here is *qāhâ*, which means "become blunt." The proverb expresses the old covenant teaching that children are punished for the sins of their fathers (cf. Ex. 20:5). Both prophets affirm that a day is coming when each man will be responsible for his own sins (Jer. 31:30-32; Ezk. 18:3-32).

N. J. O.

EDICT. *See* DECREE.

EDIFICATION; EDIFY. The Gk. *oikodoméō*, "build," and *oikodomḗ*, "the act of building," are used both literally and figuratively in the NT (cf. literal use in Mt. 7:24, 26 par. Lk. 6:47, 49; Mt.; 16:18; 21:33; 26:61 par. Mk. 14:58; Lk. 4:29; etc.). "Edify," "edifying," "edification," are the translation of the AV in some twenty passages, all in the figurative sense of the promotion of growth in Christian character. The RSV renders these terms in this sense only seven times (Rom. 15:2; 1 Cor. 14:4f., 17, 26; Eph. 4:29); in the other instances it renders "building up" or "upbuilding" (Acts 9:31; Rom. 14:19; 1 Cor. 8:1; 10:23; 14:3, 12; 2 Cor. 10:8; 12:19; 13:10; Eph. 4:12, 16; 1 Thess. 5:11). In 1 Tim. 1:4 the Greek text followed by the RSV has *oikonomía*, "training," instead of *oikodomía*, "edifying" (AV). *See also* BUILD. F. K. FARR

EDNA ed'nə [Gk. *Edna*]. Wife of Raguel and mother of Sarah, who married Tobias (Tob. 7:2, etc., 10:12; 11:1). "Edna" in Hebrew means "pleasure" and corresponds to Lat. *Anna*.

EDOM ē'dəm; **EDOMITES** ē'dəm-īts [Heb. *'ĕḏôm*, *'ᵃḏômîm*; Gk. *Edōm*; Ugar. *'udm*; Akk. *Udumu*; Egyp. *'dm*, *Aduma*]. The country S of Moab and E and W of the Arabah, and its people. The name Edom is derived from the Semitic root meaning "red," "ruddy"; it may have been given to the land because of the reddish color of the sandstone in that district.

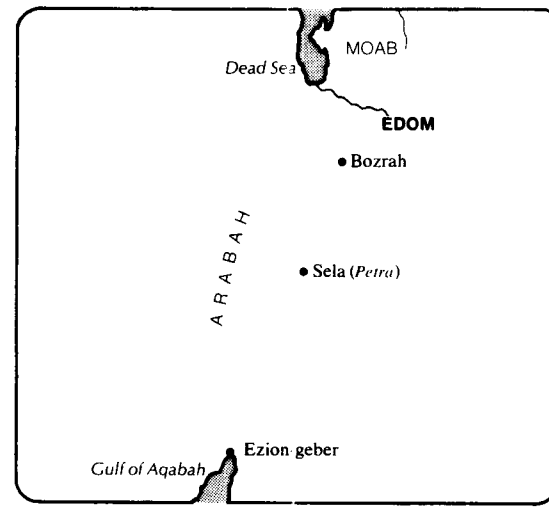
VII. Israel and Edom

I. Origins.–The Edomites are said to be the descendants of Jacob's brother ESAU (Gen. 36:9), who is sometimes called Edom (25:30; 36:1, 8, 43). Esau/Seir (36:8) is the ancestor of the Edomites in the same way that Jacob/Israel is the eponym of the Israelites. The children of Esau apparently had to drive the Horites out of the land of Seir (Dt. 2:22). Like the Israelites, the Edomites probably came originally from Aram; but they appear to have been a composite group (Gen. 36).

II. Territory.–Edom was situated S of the Dead Sea, extending from the Wâdī el-Ḥesā to the Gulf of Aqabah. Its eastern and western boundaries are indeterminate, although Nu. 20:16 places Kadesh on the edge of Edomite territory (cf. Nu. 20:23; Josh. 15:1, 21). In the OT Edom is often identified with the country or mountain of Seir (e.g., Gen. 32:3; 36:8; Jgs. 5:4).

The western and eastern sections of Edom are separated by the Wâdī el-'Arabah, the continuation of the Jordan rift between the Dead Sea and the Gulf of Aqabah, a distance of about 175 km. (110 mi.). About 95 km. (60 mi.) S of the Dead Sea it reaches a height of about 600 m. (2000 ft.) above the Dead Sea. From this point it descends



about 215 m. (700 ft.) until it reaches the shores of the Gulf of Aqabah. On both sides the mountains rise steeply from the Arabah. On the east the mountains are mainly red Nubian sandstone, reaching an altitude that exceeds 1520 m. (5000 ft.) in many instances and occasionally 1700 m. (5600 ft.) and more to the south. Because of their height the mountains enjoy an adequate rainfall in winter, but only on the western ascents and the western edge of the plateau. The eastern and southern sections are, for the most part, desert regions. On the western side of the Arabah in the north, the mountains are from 450 m. (1500 ft.) to a little over 600 m. (2000 ft.) high, and they rise gradually until they reach as high as 800 m. (2600 ft.) in the south. This is mostly desert region. The mountains on both sides of the Arabah are cut by deep gorges, which add to the forbidding character of the land. *See* Plates 1, 2.

III. History.–According to Glueck, a "Pre-Pottery Neolithic village of the first part of the seventh millennium B.C. has been excavated," and there is "clear evidence of late fourth millennium B.C. Chalcolithic settlements in Edom" (*AOTS*, pp. 444f.). Much more evidence has been found of a highly advanced Early Bronze Age agricultural civilization, which flourished from the 23rd to 20th cents. B.C. (Glueck, *AASOR*, 15 [1934/35], 138; 18-19 [1938/39], 268). But *ca.* 1900 this civilization was destroyed, perhaps by the Hyksos or some other rising power; it may even be that Gen. 14:6 refers to this destruction. For the next six centuries only bedouin inhabited the land of Edom (*AOTS*, pp. 443f.).

The earliest discovered references to the land and people of Edom/Seir come from Egyptian texts. One of the Amarna Letters (early 14th cent. B.C.) mentions the "lands of Seir" (Am.Tab. 288; *ANET*, p. 488; cf. "Udumu," Am.Tab. 256; *ANET*, p. 486). The Shasu tribes (bedouin) of Edom are mentioned as crossing the border into Egypt in the reign of Seti II (1214-1208 B.C.; *ANET*, p. 259); and Ramses III (1198-1166 B.C.) claimed to have destroyed the nomadic Shasu of Seir (*ANET*, p. 262). During this period we hear only of Shasu peoples or bedouin of Seir/Edom. No Edomite/Seirite towns or leaders are named, and nothing suggests that Edom and Seir had any real political or national significance at this time.

Although Gen. 36:31-39 suggests that an Edomite kingdom existed before there was an Israelite kingdom (cf. 1 Ch. 1:43-53), this text may refer to tribal chieftains or nondynastic leaders like the Israelite judges. Thus in Gen. 36:15-19, 40-43; Ex. 15:15, Edomite leaders are called "chiefs" (Heb. *'allupîm*).

Numbers 20:14-21 recounts Moses' request at Kadesh to pass through the land of Edom in order to reach the territory E of the Jordan as the starting-point of the conquest of the land of Canaan. The request was refused, and the Israelites were forced to make a detour to the east of Edom. This narrative indicates that the Edomites were sufficiently strong to prevent the Israelite passage along the King's Highway (vv. 17-19), but it does not mean that at this time Edom was a well-unified country.

At the time of the rise of the Israelite monarchy Saul fought successfully against Edom (1 S. 14:47). Doeg, an Edomite, was chief of Saul's herdsmen (1 S. 21:7 [MT 8]; 22:9, 18, 22).

In David's wars of expansion Edom was conquered after a decisive defeat in the Valley of Salt, where David slew eighteen thousand Edomites (2 S. 8:13f.; cf. 1 Ch. 18:12 and the superscription to Ps. 60 [MT v. 2]). David placed garrisons in Edom and all the Edomites became his subjects (2 S. 8:14). The thoroughness of the operation is underlined by 1 K. 11:15f., which states twice that every male in Edom was put to death. David's motive for the conquest of the Edomites may lie not so much in that they were a threat to him as in the prospect of wealth from the abundant copper in their territory and from control of the trade routes that passed through it.

David's victory resulted in the flight to Egypt of a young man called Hadad (1 K. 11:17f.) who "was of the royal house in Edom" (v. 14). There he married a member of the Egyptian royal family (v. 19). After David's death he returned to Edom as king and became an adversary of Solomon (vv. 14, 21, 25; in v. 25 read "Edom" with the LXX, NEB, *contra* the MT, RSV, AV). It would appear from this narrative that a monarchical form of government became a reality in Edom about the same time as the emergence of the monarchy in Israel. How widespread, successful, or lasting Hadad's rule over Edom was is uncertain. Solomon, nevertheless, seems to have had sufficient supplies of copper (7:14, 45-47) and access to his port at EZION-GEBER (9:26). It is possible that Ezion-geber was destroyed during the invasion by Sheshonq (Shishak) of Egypt in the fifth year of Rehoboam's reign (14:25f.; 2 Ch. 12:2-9). Sheshonq's invasion of Palestine and Transjordan gave Edom a chance to regain its independence.

We have no information about Edom from the end of Solomon's reign until Jehoshaphat's (873-849 B.C.). In the time of Jehoshaphat Judah expanded southward, ruled Edom (1 K. 22:47), and used the port of Ezion-geber (vv. 48f.; 2 Ch. 20:35f.). The ships of Jehoshaphat were wrecked at Ezion-geber, perhaps by Edomites (1 K. 22:48; 2 Ch. 20:36f.).

The narrative of 2 K. 3:4-27 describes an unsuccessful campaign of Jehoram king of Israel, Jehoshaphat king of Judah, and the king of Edom against Mesha king of Moab. The Lucianic version of this passage does not name Jehoshaphat as this king of Judah, however, and the Moabite campaign is best placed under the two kings Jehoram (or the coregency of Jehoshaphat and his son Jehoram).

Edom successfully revolted under Jehoram of Judah (849-842 B.C.) and set up a king of its own (2 K. 8:20-22); it probably regained control of the Wâdī el-'Arabah and seized Ezion-geber. Edom maintained its independence for about fifty or sixty years until the middle of Amaziah's reign (800-783). Amaziah achieved a partial conquest as far S as Sela, and defeated an army of ten thousand Edomites in the Valley of Salt (2 K. 14:7; cf. 2 Ch. 25:11f.). This victory assured Judah of control over northern Edom and the copper mines of the Punon area. It is unlikely, however, that Amaziah made any lasting conquest of Edom. Uzziah (= Azariah, 783-742), Amaziah's son, restored ELATH (Ezion-geber) to Judah (2 K. 14:22; 2 Ch. 26:1f.). But in the time of Ahaz (735-715), Edom defeated Judah (2 Ch. 28:17) and recovered Elath (2 K. 16:6; note that "Edom" is to be read for MT "Aram," requiring only the smallest consonantal change; also in 2 S. 8:13; 2 Ch. 20:2). Judah was never again able to exercise control over Edom. During the whole period from *ca.* 842 Judah's control over Edom could not have been very strong; for during the 8th and at least the first half of the 7th cents., Edom was usually a vassal of Assyria.

The first Assyrian contact with Edom on record occurred *ca.* 800 B.C., when Adadnirari III (810-782) conquered "the country of the Hittites, Amurru-country in its full extent, Tyre, Sidon, Israel, Edom, Palestine" and imposed "upon them tribute" (*ANET*, p. 281). When Tiglath-pileser III (745-727) appeared in the west, Qauš-Malaku of Edom paid him tribute (*ca.* 734; *ANET*, p. 282). Sargon II (722-705) listed an unnamed ruler of Edom among those involved in the rebellion of Ashdod in 713 (*ANET*, p. 287). Sennacherib (705-681) reported that

Aiarammu from Edom brought gifts (*ANET*, p. 287). Esarhaddon (680-669) mentioned Qauš-gabri king of Edom with twenty-two vassal kings whom he swore to loyalty at Nineveh (*ANET*, p. 291). Finally, Qauš-gabri king of Edom paid tribute and submitted also to Ashurbanipal (669-627; *ANET*, p. 294), who in his ninth campaign (against Uate' king of Arabia) pursued his quarry into Edom (*ANET*, p. 298). From the Assyrian records it appears that Edom was known and recognized by Assyria as a clearly identifiable and even important kingdom from the beginning of the 8th cent. B.C. onward.

This is substantiated by the archeological evidence from three sites in central Edom (Umm el-Bayyârah, Tawîlân, and Buṣeirah) excavated by C.-M. Bennett. None of these sites produced any clear evidence of sedentary occupation before the beginning of the 8th cent. B.C. The excavations at Buṣeirah — probably the site of Bozrah, the chief royal city of the Edomites (Gen. 36:33; Isa. 34:6; 63:1; Jer. 49:13, 22; Am. 1:12), which flourished mainly from the end of the 8th cent. to the end of the 7th cent. B.C. — have been especially crucial for establishing the importance of Edom during this period.

These excavations by C.-M. Bennett complement earlier excavations by N. Glueck at Tell el-Kheleifeh (probably Ezion-geber = Elath; but *see* TELL EL-KHELEIFEH) on the north shore of the Gulf of Aqabah. The pottery of Period IV (from about the end of the 8th to the end of the 6th cent. B.C.) from this site is comparable to that found in the Edomite sites excavated by Bennett. Period IV at Tell el-Kheleifeh is completely Edomite and testifies to a vigorous Edomite civilization "in the seventh–sixth centuries B.C. beginning with the end of the eighth century B.C." (N. Glueck, *BASOR*, 188 [1967], 23).

Two Hebrew ostraca discovered by Y. Aharoni at Tell Arad in southeastern Judah also testify to Edom's power *ca.* 700-600 B.C. One ostracon, which may be associated with the campaign of Sennacherib in 701, refers to some sort of negotiations between Judahite and Edomite authorities. The other deals with the urgency of gathering men in anticipation of an Edomite attack, possibly associated with one of Nebuchadrezzar's campaigns (Y. Aharoni, *BASOR*, 197 [Feb. 1970], 16-42).

While the 7th cent. B.C. saw the height of Edom's prosperity it also saw the beginning of its end. Edom, like Judah, was subject to destruction by the Babylonians in the 6th cent. B.C. (Jer. 27:2f., 6; 49:7-22; Ezk. 32:29). The oracle of Mal. 1:2-4 indicates that by the time of its writing Edom was in ruin. The archeological evidence also indicates the downfall of Edom by the end of the 6th century. Nomadic tribes infiltrated Edom and it lost the power to control and profit from the trade between Arabia and the Mediterranean coast and Egypt. In the 5th cent. an Arabian tribe, the Nabateans, forced their way into Edom and replaced the Edomites, many of whom went westward to southern Judea (later to become Idumea; cf. 1 Macc. 5:3, 65), while others were absorbed into the newcomers. By 312 B.C. the area around Petra also was inhabited by the Nabateans.

IV. Economy.–The economy of Edom was based on agriculture and commerce rather than on the control of the copper mines of the Wâdī el-'Arabah. Agriculture was possible especially in the northeastern region of the country. But Edom's prosperity depended on the caravan routes from India and south Arabia to the Mediterranean coast and Egypt. Whenever Edom lost control of these routes its civilization declined.

V. Religion.–The Edomites were devoted to the gods and goddesses of fertility. Townspeople and peasants had in their houses crude pottery figurines, representing the deities whose good will they sought. Near Buṣeirah was found a pottery figurine (9th-8th cents. B.C.) of a fertility goddess, wearing a lamp as a crown and holding in her hand some sacred object. From Tell el-Kheleifeh has come a crude pottery plaque representing the pregnant mother-goddess, a figure of the same type of fertility goddess with what may be an incense cup, and evidence of foundation offerings.

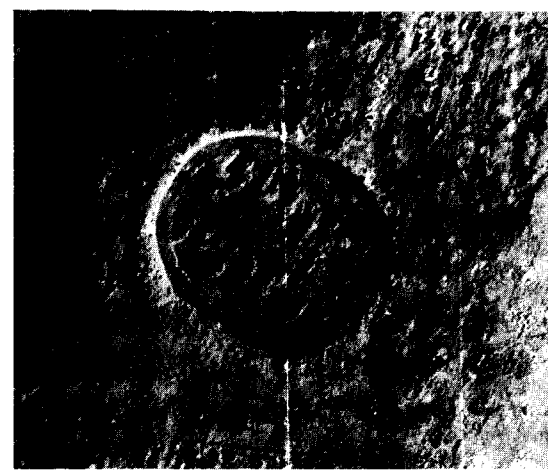
The deity peculiar to Edom was Qauš (Koze in Josephus *Ant.* xv.7.9), as is evident from personal names found in inscriptions (cf. N. Glueck, *BASOR*, 72 [Dec. 1938], pp. 2ff., 11ff.; 82 [Apr. 1941], 3-11; *RB*, 73 [1966], 372ff., 399ff.). Another divine name perhaps known in Edom was Eloah, who, according to the prophet Habakkuk, came from Teman (Hab. 3:31); this name appears most frequently in Job, which some suppose to be Edomite (cf. Pfeiffer). In the Hebrew tradition Eloah (the singular form of the more familiar Elohim) was identified with Yahweh, who was said to have marched from Edom, among other places of the south (Dt. 33:2; Jgs. 5:4).

VI. Language.–Written materials recovered from Edom are scant, being limited primarily to ostraca, seals, and stamped jar handles of the 9th to 5th cents. from the sites mentioned above. Among the most interesting discoveries are a seal bearing the name Qauš-gabri, found at Umm el-Bayyârah, the "Jotham" signet ring from Tell el-Kheleifeh, and twelve seventh- or sixth-century stamped jar handles reading "belonging to Qaus'anal, servant of the king," also from Tell el-Kheleifeh (J. R. Bartlett, "Moabites and Edomites," pp. 247f.; *see also* TELL EL-KHELEIFEH). Study of these written materials suggests that the Edomite language was not very different from Moabite and Hebrew.

VII. Israel and Edom.–According to the biblical account, the brotherly relationship between Edom and Israel stemmed from the identification of Edom with Esau, Jacob's brother (cf. Dt. 23:7 [MT 8]; see I above). A contributing factor in this identification may have been that the Israelites were conscious that they had many things in common with the Edomites. Their brotherly relationship may have been based both on racial ties and on a brotherly covenant treaty (cf. Am. 1:11).

Edom was renowned in Israel for its wisdom (Jer. 49:7; Ob. 8; Bar. 3:22f.). The book of JOB seems to reflect an

Enlarged impression of seal of *Qws'nl* in Edomite(?) lapidary script from Tell el-Kheleifeh. The actual impression is about 1.2 cm. (0.5 in.) long (E. K. Vogel; picture American Schools of Oriental Research)



Edomite setting. Probably Job's friend Eliphaz the Temanite and possibly Bildad and Zophar came from Edom (Job 2:11; cf. Gen. 36:4, 10-12). The LXX identifies Job with Jobab king of the Edomites (Gen. 36:33). Also, the land of Uz (Job 1:1) may have been in Edom (cf. Lam. 4:21).

From the time of the Israelite kings, the relationship between Edom and Israel was one of continual hostility. As foreshadowed in the blessings of Isaac (Gen. 27:27-29, 39f.), Edom was subjugated by Israel in the time of David but regained its independence in the 8th cent. B.C. The prophets of Judah were extremely bitter toward Edom for its stance in the destruction of Jerusalem by Babylon in 587/586 B.C., and they predicted Edom's desolation (e.g., Obadiah). It is not certain whether Edom simply stood aloof and rejoiced in Judah's calamity or actually assisted in Jerusalem's destruction, as seems to be implied by Ps. 137:7; Isa. 34:5-15; Jer. 49:7-22; Lam. 4:21f.; Ezk. 35:3-15 (cf. Jth. 7:8, 18; 1 Esd. 4:45). According to Jer. 40:11 Edom offered a home to some of the Judean refugees.

B. MACDONALD

EDREI ed'rə-ī [Heb. *'eḏre'î*; Gk. *Edraein*].

1. A chief metropolitan city of the Amorite kingdom of Og king of Bashan. Situated on one of the eastern tributaries of the Yarmuk and overlooking the uplands between Gilead and Hermon, it is 16 km. (10 mi.) N of Ramoth-gilead and 48 km. (30 mi.) E and slightly S of Galilee. Here the invading Israelites killed Og and defeated his armies, whereupon Edrei was assigned to Machir son of Manasseh (Josh. 13:31). Dt. 3:10 suggests that it was the western limit of Bashan as Salecah was on the east, and probably marked the northern limit of Israel's penetration to that time. Edrei appears in a list of cities ruled by Thutmose III (*ca.* 1501-1447 B.C.), which list was found in the temple of Ammon in Karnak, Egypt (*ANET*, p. 242).

It is probably modern Der'ā, a town of about five thousand people in a very fertile district. The accumulated ruins in the town cover many remains of antiquity. Most remarkable, however, is the series of subterranean dwellings cut in the rock under the town to serve as a refuge in times of siege. The average depth was 21 m. (70 ft.); the system was supported by air holes.

2. An unidentified city in Naphtali between Kedesh and En-hazor (Josh. 19:37).

D. B. PECOTA

EDUCATED [Heb. piel of *gāḏal*] (Dnl. 1:5); AV NOURISHING; NEB TRAINING; [Gk. *paideúō*] (Acts 22:3); AV TAUGHT; NEB THOROUGHLY TRAINED; **UNEDUCATED** [Gk. *agrámmatos*] (Acts 4:13); AV UNLEARNED; NEB UNTRAINED. Heb. *gāḏal* (in qal "grow up," "become great") is used in the piel also in 2 K. 10:6; Isa. 1:2; 23:4; 51:18 with the meaning "bring up." Several other Hebrew terms also refer to the process or result of education; e.g., the RSV gives "learned" for Heb. *sōpēr* in Ezr. 7:11 (AV "scribe"; NEB "scribe versed in"); the AV gives "learned" in Isa. 29:11f. for Heb. *yāḏa' hassēper* (lit. "know the book"; RSV, NEB, "one who can read") and in Isa. 50:4 for *limmûḏ* (RSV "those who are taught"; NEB "teacher"). With the piel of *gāḏal* the emphasis is on the discipline, training, and general education involved in bringing up a child. The other Hebrew terms cited refer to the knowledge of books, especially the Law.

Greek *paideúō* emphasizes the grueling discipline that would be involved in learning at the feet of one like Gamaliel "according to the strict manner of the law" (Acts 22:3); cf. 7:22, where the RSV renders *paideúō* with "instructed" (AV "learned"; NEB "trained"). *Agrámmatos* is one of several Greek terms denoting illiteracy or ignorance, rendered "unlearned" by the AV, including also *apaídeutos* (2 Tim. 2:23), *amáthēs* (2 Pet. 3:16), *idiṓtēs* (1 Cor. 14:16, 23f.).

G. A. VAN ALSTINE

EDUCATION. The chief source of information regarding education in ancient Israel is the OT. While the OT writers were not interested in education per se, they were concerned about the transmission of religious traditions, and they provided incidental information concerning other educational processes. This evidence may be supplemented and set in context by other literary sources and archeological discoveries. Although the term "school" does not occur in the OT, both Sumer and Egypt had developed schools prior to Israel's conquest of Canaan (13th cent. B.C.). These cultures may have exerted some influence on education and the development of schools in Israel. Education in ancient Israel, however, was largely informal and related to the family unit.

I. In the Ancient Near East
II. In Preexilic Israel
III. In Postexilic Israel
IV. In Hellenistic Judaism
V. In the Early Church

I. In the Ancient Near East.–Following the invention of cuneiform writing, scribal schools emerged in Sumer. The principal aim of these schools was to teach this difficult form of writing to scribes for work in the palace, temples, and administrative offices. The school system flourished between 2500 and 2000 B.C., and the variety of positions held by the scribes suggests that the schools were numerous and sizeable. Almost without exception, the students at these schools were the sons of the wealthier families; records indicate that the fathers of the students generally held responsible positions. The head of the school was the ummia ("expert," "professor," or "school father"). His assistants were "big brothers," and the students were called "school sons" or "sons of the tablet house." The curriculum included both oral and written exercises. Discipline (which appears to have been a problem) was enforced by whipping or "caning." School texts have been recovered bearing the writing of students at various stages along the way toward mastery of the script. In addition to learning to write, young scribes-to-be were taught lists of words and terms which would be needed for writing various documents; and they practiced copying sample documents. Identification of the ruins of these schools is difficult; but rooms possibly used for classes have been found in Nippur, Sippar, Ur, and Mari (destroyed shortly after 1697 B.C.). The teachers evidently were paid out of tuition fees. A "school days" essay written about 2000 B.C. by an anonymous teacher vividly describes the daily routine at the schools and a successful attempt at "apple polishing." Sumerian texts were later collected by the Assyrian king Ashurbanipal,

whose library also contained interlinear texts of Sumerian and Assyrian.

In Egypt "formal" education was established sometime during the third millennium B.C. Such education was primarily vocational in aim, teaching the skills necessary to become a priest, engineer, noble, or soldier. The priests were probably the first to use writing, which may have been taught originally in temple schools, since lives of the dead were written and buried with them. The temple schools also taught dancing and music because of their religious significance. School texts recovered from trash heaps near the temples suggest that great attention was paid to calligraphy. In addition to various letters and documents used as exercises to be copied by the students, there are writings which praise the scribe's occupation and exhort the student to diligence. Learning the staggering number of necessary characters took a great deal of time; the student's memory was taxed, and discipline was harsh. These schools also used wisdom sayings in their curriculum, since they were brief (i.e., easily copied) and generally edifying. Students in the temple schools, court schools, and military schools were males from the higher strata of Egyptian society. Writing was taught because of its necessity in various vocations; and, as in Sumerian culture, the specialties, functions, and resulting social positions among the scribes were quite diverse.

Although there were schools in Sumer and Egypt prior to the settlement of the tribes of Israel in Canaan, it would be a mistake to assume that the nomadic Israelites were influenced by these schools directly or immediately. One can only speculate about Moses' education among the Egyptians and his role as a mediator of Egyptian pedagogy to the Israelites (Acts 7:22; cf. Ex. 2:10-15). After the Conquest the Israelites probably adopted Canaanite educational practices. The relative simplicity of alphabetic writing meant that more youths could be taught to write. Hence, its impact upon Israelite education must be noted. Alphabetic writing appears to have been developed during the Hyksos period (1730-1580 B.C.), and the earliest known alphabet is the North Semitic. The early Phoenician alphabet influenced the development of early Hebrew writing.

Painted statue from Saqqârah (5th Dynasty) of an Egyptian scribe holding a papyrus roll (Egyptian Museum, Cairo; picture W. S. LaSor)

A well-written cuneiform letter dated *ca.* 1400 B.C. is vivid evidence for the kind of education enjoyed by well-to-do Canaanites in the period preceding the Israelite conquest. Found in the house of a wealthy Shechemite, the letter was written by the teacher of one of his children as a request for payment. The teacher claims that for three years no payment had been made even though he had been father and mother to the children and the children continued to learn. There is no reference to what the children were being taught, nor is there any indication of whether the teacher was male or female. A further clue to the existence of schools among the Canaanites may be seen in the name of a Canaanite city Kiriath-sepher ("City of the Book" [or "Scribe"]; Josh. 15:15f.; Jgs. 1:11f.). Moreover, the Oak of Moreh ("teaching" or "teacher," Gen. 12:6; Dt. 11:30; cf. Isa. 30:20) was probably originally a Canaanite cultic center.

II. In Preexilic Israel.–For ancient Israelites, the education of one's children was a religious duty, and much of the content of what was taught in the homes was the religious tradition of Israel: ". . . for I have chosen him [Abraham], *that he may charge his children and his household after him to keep the way of the Lord* by doing righteousness and justice; so that the Lord may bring to Abraham what he has promised him" (Gen. 18:19). This verse underscores the importance of instruction within the family, the religious content of this instruction, its purpose (that the children might live righteously and justly), and the integral relationship of this kind of instruction to the hope of the nation ("that the Lord may bring to Abraham what he has promised him").

At least from the time of Josiah, the Shema (Dt. 6:4-9) was the core of religious instruction given in the home. Within the Shema is the injunction to teach it to one's children: "Hear, O Israel: The Lord our God is one Lord . . . and you shall teach them [i.e., these words] diligently to your children, and shall talk of them when you sit in your house . . ." (Dt. 6:4,7). Along with the Shema the children were taught the commandments for righteous living (Dt. 4:9f.), and it was the father's duty to explain the meaning of the commandments by telling the story of the nation's history (Dt. 6:20-25). Since the religious teaching given in the home was the heart of the education of Hebrew children, it was the solemn duty of every parent (Dt. 11:19).

This instruction was reinforced by the celebration of the major festivals in the home and in the community. The children's participation in the preparations, excitement, and observance of the festivals created a natural context in which indelible lessons could be learned. The educational importance of these events was not overlooked: "And when your children say to you, 'What do you mean by this service?' you shall say, 'It is the sacrifice of the Lord's passover . . .'" (Ex. 12:26f.). In fact, it came to be the practice for the youngest child in the family to ask the father this question at the appropriate point in the family's observance of the Passover so that the father could then recite the story of the Lord's deliverance of His people from bondage (cf. Ex. 13:8, 14). The other festivals were also regarded as teaching opportunities (Lev. 23:42f.). Through the father's instruction in the home and his explanations of the significance of the festivals, the Hebrew children were taught how God had manifested Himself to them in the past, how they were to live in the present, and what God's promises were regarding the future of His people.

Hebrew children were also taught the skills they would need to be successful members of their community. Girls were taught baking (2 S. 13:8), spinning (Ex. 35:25), and all the skills required to run a household. Boys were taught the agricultural cycle of the year and how to work in the fields or tend sheep (1 S. 16:11). It was common for a son to enter his father's profession (cf. the proverb in Jn. 5:19), and the father's instruction involved the secrets of the trade or craft.

Craftsmen were also educators. Members of the same craft or trade often lived together in a particular district (Neh. 3:2, 15) and had a leader or chief officer (1 Ch. 4:14). Craftsmen's and merchants' guilds may have existed in Palestine as early as the Hyksos period. A man would often be designated by his profession, as "A. son of B. of the goldsmiths" or simply "A. one of the goldsmiths" (Neh. 3:8, 31; AV "the goldsmith's son"). The guilds were even referred to as families (1 Ch. 2:55). During the postexilic period they became powerful legal entities having some measure of authority over their districts (Tosefta *Baba Metzia* [ed. Zuckermandel], xi.16, 24-26). They also provided a sort of occupational insurance for their members whereby his tools, ass, boat, or other means of livelihood would be replaced if lost for reasons other than negligence. In Jerusalem, and doubtless in other cities as well, members of each trade or guild lived in separate parts of the city. It has been argued that Mic. 1:14b is clarified by 1 Ch. 4:21-23 as a reference to guild workshops or factories and should be translated "the factories of Achzib are a loss to the kings of Israel" (cf. Jer. 18:2; Cant. 2:4; Am. 3:15; Mish. *Shabbath* i.9). Wherever such guilds were organized, one might expect that they served an educational function by teaching young apprentices their craft.

An important vocation during the preexilic period was that of the scribe. As with the other vocations, one may assume that a scribe would teach his sons how to read and write, but it is unknown how widespread this ability was among the Israelites. A very early inscription, the GEZER CALENDAR, provides evidence of the teaching of writing among the Israelites. The calendar is inscribed on a writing tablet, a smooth piece of limestone with rounded edges which would fit easily into the hand of a twelve-year-old boy. W. F. Albright dated it to a brief Israelite occupation of Gezer between *ca.* 950 and 918 B.C., and identified it as a school exercise. The surface has been scraped clean several times for repeated use, and the Yahwist name of the scribe, "Abijah" (lit. "Yahweh is my father"), appears on the lower left hand corner of the stone. The text is a mnemonic ditty designed to teach the succession of agricultural activities.

Other references to writing can be found in some of the earlier books of the OT. Josh. 18:9, for example, relates how each tribe provided three men who traveled through the land writing a description of it. Jgs. 8:14 narrates the following incident during Gideon's career: "And he caught a young man of Succoth, and questioned him; and he wrote down for him the officials and elders of Succoth, seventy-seven men." This verse has been cited in the past as evidence that the ability to write was common, but no youth who knew the names (and possibly the positions) of seventy-seven men can be considered average or typical. Rather, he was probably a young scribe who had been taught the names of the officials as part of his training. Another early reference to a scribe is found in 2 S. 8:17 (RSV "secretary"). Other references to writing can be found in Dt. 24:1, 3; Job 31:35; Jer. 32:12; Isa. 10:19; but there is no compelling evidence that most Israelites could read and write prior to the Exile. On the contrary, references to signet rings (e.g. Gen. 38:18) suggest that the rings were often used instead of a signature. In preexilic Israel, at least, the ability to write was probably limited largely to officials, priests, scribes, and the upper class. The number of scribes and the variety of positions they filled increased greatly during the reign of Solomon (1 K. 4:3; 2 K. 25:19). Hence, the need to train these men probably surpassed the ability of individual families, and the court may have looked for other ways to fill this need.

As described above, the Sumerians and Egyptians had developed schools for scribes long before the time of Solomon. To the extent that the monarchy under Solomon was influenced (directly or indirectly) by Egyptian institutions and administrative structures, it is reasonable to assume that it adopted the model of Egyptian schools. The Canaanite culture may have been the mediator of this influence, and since the Amarna texts reveal that Akkadian was the language of diplomatic correspondence in Syria and Palestine during the latter part of the 2nd millennium B.C., the model of the Sumerian schools may have had some influence also. Men would have been needed who had been trained in schools that taught the Akkadian scribal art. Although there are no direct references to such schools and it is conjectural to suggest how they might have arisen, that such schools developed during Solomon's reign or shortly thereafter is likely. Moreover, such schools were probably the spawning ground for the earliest written traditions now contained in the OT. Oral traditions were written down for transmission and use in the court, temple, and local worship centers. As these writings became more numerous, the ability to read and write probably also began to spread in Israel. An echo of an ancient elementary lesson in the alphabet may be preserved in Isa. 28:9-13. Verse 10 can be understood as the quotation of a lesson teaching the Hebrew letters *ṣāḏê* and *qōp̄*. Isaiah's opponents mock his teaching: "For it is *ṣaw lāṣāw, ṣaw lāṣāw, qaw lāqāw, qaw lāqāw*" (here a little, there a little).

Alongside the schools in the temple and palace in which scribes were trained for various positions, priests for temple service (Jer. 36:10, 12-21) and princes for positions of authority, wisdom schools emerged. The relation of the latter to other schools in the preexilic period is unclear. When many activities became focused upon the second temple, some wisdom schools probably merged with the temple school. Earlier, however, they may have been independent institutions and separate bearers of written tradition. Little is known about these schools apart from what can be deduced from the writings that they produced. Proverbs, for example, was probably used both for practice in writing and grammar through the dictation of its short sayings and also for instruction in its content. Proverbs is similar to the materials found in the Egyptian schools and would have been suitable for teaching the young how to associate with peers, elders, men in authority, and children. In short, the wisdom schools taught one how to live a pleasant and successful life and avoid trouble. Although this may not have been the original or exclusive purpose of the wisdom literature, and although this literature may not have been the sole content of the curriculum in the wisdom schools, it does convey a vivid impression of what was taught at these schools.

According to Prov. 1:7 true wisdom is anchored in the fear of the Lord: "The fear of the Lord is the beginning of knowledge; fools despise wisdom and instruction." The educational intent of the book is confirmed by its proem:

> That men may know wisdom and instruction,
> understand words of insight,

receive instruction in wise dealing,
righteousness, justice, and equity;
that prudence may be given to the simple,
knowledge and discretion to the youth (Prov. 1:2-4).

Although these verses were probably written at the time that the book was compiled (3rd or 4th cent. B.C.), much of the material in Proverbs is older and may have been used for instruction during the preexilic period. The student was addressed as "my son" (Prov. 1:8, 10; 2:1; 3:1; *passim*), as in the Sumerian schools, and discipline was harsh (Prov. 13:24; 22:15). The schools were organized on the premise contained in Prov. 22:6: "Train up a child in the way he should go, and when he is old he will not depart from it." Those who were able sent their sons to receive instruction in the proper conduct of life at the wisdom schools.

One passage is particularly revealing of the way students were taught:

Incline your ear, and hear the words of the wise,
and apply your mind to my knowledge;
for it will be pleasant if you keep them with you,
if all of them are ready on your lips.
That your trust may be in the Lord,
I have made them known to you today, even to you.
Have I not written for you thirty sayings
of admonition and knowledge,
to show you what is right and true,
that you may give a true answer
to those who sent you?

(Prov. 22:17-21; cf. "Instruction of Amen-em-opet," *ANET*, pp. 421-24). The italicized words imply that the teachers (cf. Prov. 5:13) taught by reciting maxims orally and writing them for the students. These sayings were to be kept in the student's heart, or memorized (Prov. 3:3; 7:3; 13:14) and understood, so that his trust would be in the Lord and he would be able to give an acceptable answer to his parents.

Another passage (Prov. 31:10-31) may have been used as a memorandum in a school for young women. These verses form an acrostic in which the first letters of each line are the letters of the Hebrew alphabet; the form is a device to aid the memory. It has been argued that the verses provide not a picture of typical domestic life, but the resume of a course of training for young women who would shortly assume positions of responsibility as wives in well-to-do households. After completing her training in household management, horticulture, the arts of weaving and design, and the instruction of children (Prov. 31:26), the girl may have taken this passage home to keep for future guidance. Such schools, however, are not likely to have been very common, and would have been reserved for the daughters of wealthy families.

Even further removed from official control than the wisdom schools were the bands of prophets. Regardless of whether prophetic bands should be called schools, associations, or brotherhoods, the followers of the prophets were called their disciples (*limmûḏîm*) and children (*yᵉlāḏîm*): "Bind up the testimony, seal the teaching among my disciples . . . Behold, I and the children whom the Lord has given me are signs and portents in Israel . . ." (Isa. 8:16, 18). What the prophet Isaiah could not say publicly he sealed or entrusted to his disciples. The reference to "children" may be a figurative reference to his disciples, but can also be understood literally. The disciples were also called "sons (*bᵉnê*) of the prophets" (2 K. 2:3, 5; 4:38). Teaching was integral to the prophetic role. Isa. 50:4 suggests that the principal function of the disciple was to listen and remember the words of his teacher. The schools or brotherhoods which formed around the prophets regarded the prophets as teachers, memorized their sayings, and transmitted orally the tradition of the life and sayings of their prophet for some time before these traditions were collected and written down (2 K. 8:4; cf. Jer. 26:17f.). Moreover, the prophetic ideal for the future involved the religious instruction of the people: ". . . for the earth shall be full of the knowledge of the Lord as the waters cover the sea" (Isa. 11:9). Even the vision of universal education may have been seen first by the prophets: "*All* your sons shall be taught by the Lord, and great shall be the prosperity of your sons" (Isa. 54:13; cf. Jn. 6:45). As in the wisdom schools, so among the prophets, wisdom and knowledge came from the Lord (cf. Isa. 19:11; Jer. 8:8f.), and prosperity came to him who had gained a full measure of this knowledge.

In addition to their other priestly duties, the Levites also taught the people. Moses' blessing to Levi describes their position:

They shall teach Jacob thy ordinances,
and Israel thy law;
they shall put incense before thee,
and whole burnt offering upon thy altar

(Dt. 33:10; cf. Lev. 10:11). At times they seem to have been itinerant teachers (2 Ch. 17:7-9), and some were scribes as well (1 Ch. 24:6). During Josiah's reign they were regarded as teachers (2 Ch. 35:3), and they maintained this role until the time of Ezra (Neh. 8:7-9). Even the prophets recognized their role as teachers of the people and interpreters of the Law (Mal. 2:6-9) and rebuked the Levites only for accepting payment for their teaching (Mic. 3:11).

Reference should be made to the impact of the Exile on education in Israel. Dnl. 1:3-5 may preserve a historical recollection about how some Hebrew youths were provided with tutors and educated in Babylonian ways during the Exile. According to this reference, Daniel and his companions were given an instructor who was ". . . to teach them the letters and language of the Chaldeans. . . . They were to be educated for three years, and at the end of that time they were to stand before the king." Other evidence suggests that the sons of Joiachin were given a Jewish attendant. In addition to the influence of Babylonian culture, and indeed in reaction to it, the Exile was a period of prolific literary activity among the priests and prophets in exile. Much of this activity centered on the Law (Torah) which Ezra brought to the people after the return. (The term "Torah" originally meant "instruction" rather than "Law" [cf. Isa. 8:16; Prov. 4:2].)

III. In Postexilic Israel.–Ezra, who was both priest and scribe (Neh. 8:9), undertook the task of calling the people back to their religious heritage by teaching and explaining to them the Law: "This Ezra went up from Babylonia. He was a scribe skilled in the law of Moses which the Lord the God of Israel had given. . . . For Ezra had set his heart to study the law of the Lord, and to do it, and to teach his statutes and ordinances in Israel" (Ezr. 7:6, 10). In this task of teaching the Law section by section (Neh. 8:8) he was aided by the Levites, who "helped the people to understand" (Neh. 8:7, 9; Ezr. 8:16). Ezra interpreted the Law in the language of the people — Aramaic. Biblical commentaries (Midrashim) and loose translations (Targums) later developed from this form of teaching. Under the influence of Ezra's reform, teaching came to have a new prominence among the Jews, and the scribes became the leading educators of the people. The priests and Levites increasingly confined their activities to the temple, and the role of the prophets declined rapidly. Simultaneously, the scribes emerged as a professional class of men trained in the Law and its interpretation. (2 Macc. 2:13 refers

to a library established by Nehemiah, but the report is very likely fictitious.)

Information about Jewish education during the Persian period is sparse. Official documents were written in the style used by Persian officials (Ezr. 5:6-17). Wisdom schools continued to hand on their tradition (e.g., Proverbs, Ecclesiastes), but probably came to be linked with the temple. During this period the synagogue may have emerged as a place for worship and study of the Scriptures (see below).

IV. In Hellenistic Judaism.–After the illustrious career of Alexander the Great, Palestine fell under the pervasive influence of Hellenistic culture. During the centuries that followed, most Jews resisted every attempt to impose Hellenism upon them, but simultaneously absorbed many Hellenistic viewpoints and practices. The general importance of this period for the development of education in postbiblical Judaism and early Christianity can hardly be overestimated, but the particular effects of Hellenism upon Jewish education are difficult to assess. Because education had been practiced as a religious duty prior to the advent of Hellenistic culture in Palestine, to say that education or schools arose among the Jews as a result of the influence of Hellenism is a gross exaggeration. It is no exaggeration, however, to say that Hellenism had a profound effect upon the development of education among the Jews. Learning was one of the hallmarks of the Greek spirit, and education one of the primary vehicles in the spread of Hellenism. A non-Greek's "hellenization" meant primarily his learning to speak Greek and secondarily his learning to live as a Greek. It is not surprising, therefore, that the hellenizing party in Jerusalem secured permission to build a Greek gymnasium in that city in order to educate "the noblest of the young men" in Greek culture (2 Macc. 4:9, 12; 1 Macc. 1:14; cf. Dnl. 1:3-5). Knowledge of the Greek language spread quickly in Palestine, and the use of double names (Aramaic and Greek; e.g., Saul/Paul) became commonplace. Instruction in the gymnasium included not only athletic activity, but instruction in music and literary subjects (especially Homer). The continued presence of these schools in Palestine after the Maccabean period can be seen in Josephus' reference to a conversation between Herod and an Essene when Herod was a child going to school (*Ant.* xv.10.5).

In reaction against the spread of Hellenism through the education of young men in Greek culture, Hasidic Jews (who were separatistic or inclined to be zealous for national traditions) moved to make education in the Law available to a broader spectrum of Jewish young men (cf. Jub. 11:16; 19:14). This reaction to Hellenism stimulated the spread of elementary schools and synagogues in Jewish communities and lent added motivation to the regulation of Jewish life according to the Law through its study, interpretation, and application to the affairs of daily life. The earliest reference to a *bēṯ hammiḏrāš* is Sir. 51:23. Sirach was written *ca.* 180 B.C. by a wisdom teacher whose school was probably located in Jerusalem and portrays a wisdom teacher in the process of becoming a scribe (i.e., an interpreter of the Law). Another probable effect of the encounter with Hellenism was the practice of affirming the authority of one's tradition by tracing it back through a succession of teachers. Previously, one might have quoted his teacher or collected his sayings (e.g., the sayings of a prophet) or affirmed the authority of a teaching by claiming that it came from a venerable figure in antiquity such as Moses, David, or Solomon; but the practice of tracing the succession of teachers in the pattern of the Greek philosophical schools did not emerge in Judaism until after its encounter with Hellenism. It probably should not be said, however, that the movement toward universal education among the Jews reflects the influence of the Platonic concept that virtue is teachable. From the earliest days Jewish education had been primarily religious, directed at teaching the children how to live by the commandments of their God.

The origins of both the synagogue and the Jewish elementary school are obscure. Whether the origin of the synagogue is to be traced to the Exile or to Ezra is uncertain. The first inscriptional evidence for the existence of a synagogue comes from Schedia in Egypt and is dated in the 3rd cent. B.C. (R. P. Jean-Baptiste Frey, ed., *Corpus Inscriptionum Judaicarum*, II [1952], 1440). Other synagogues are attested from the 2nd cent. B.C. (V.A. Tcherikover and A. Fuks, eds., *Corpus Papyrorum Judaicarum* [1957-1964], no. 134; Josephus *BJ* vii.44; cf. *TDNT*, VII, 811f. [Schrage]). The synagogue's primary purpose was to provide a place where the Jews in every city in Palestine and the diaspora could gather to study the law. Although the synagogue had achieved a central position in most Jewish communities by A.D. 70, its importance (and the importance of the study of the Torah) was further enhanced during the reorganization of Judaism following the destruction of the temple.

Emphasis in the synagogues on the study of the Torah gave them much of the character of a school. Philo relates that Jews everywhere met every seventh day (presumably in the synagogues) for study of the Law (*De vita Mosis* ii.215f.; *De specialibus legibus* II,62). Josephus also refers to the pride the Jews took in the education of their children (*CAp* i.60; ii.204; *Ant.* iv.211; cf. also Philo *De legatione ad Gaium* 115).

One of the scrolls discovered near Qumrân contains a reference to the education of children associated with that community:

> And this is the rule for all the hosts of the Congregation, concerning every native in Israel. From [his] you[th] [he shall be in]structed in the Book of Meditation and shall be taught the precepts of the Covenant in accordance with his age, and [shall receive] his [edu]cation in their ordinances for ten years [from] the time of entry into the children's [class]. Then at the age of twenty [he shall be subject] [to] the census . . . (1QSa 1:6-9; tr. A. Dupont-Sommer and G. Vermes).

This reference predates all of the talmudic references to Jewish schools, but it cannot be used as a basis from which to generalize about the education of Jewish children apart from the community at Qumrân.

The origins of the Jewish elementary school (*bēṯ sēper*) are obscure. The Palestinian Talmud (*Ketuboth* viii.8) attributes its origin to Simeon ben Shetah (*ca.* 100 B.C.) and the Babylonian Talmud (*Baba Bathra* 21a) records a tradition from R. Judah-Rav that Joshua ben Gamla (*ca.* A.D. 64) introduced a decree that teachers should be appointed in every district and town. Neither of these traditions can be authenticated, but even if the latter is correct, it implies that at least some children received instruction in schools prior to the decree. Whether the decree was issued by Joshua ben Gamla or merely attributed to him at a later time remains highly problematic. It does appear that the elementary schools originated independently of the synagogue and were private enterprises at first (T.B. *Baba Bathra* 21b). While some schools may have met in synagogues, it was not until after A.D. 200 that the elementary school came to be firmly related to the synagogue (cf. Morris, p. 52).

When a boy entered the *bēṯ sēper* at the age of five to seven years he began to learn to read the Torah. The teaching methods were very mechanical, and the students

Illustration from the *Leipzig Maḥzor* (*ca.* A.D. 1320) showing pupils being introduced to the study of Torah. From left, a gift of honey signifies Torah's sweetness; a father carries his son, wrapped in a Torah binder, to the synagogue; children learn that people without Torah are like fish without water (facsimile Yale University Library)

read or recited passages aloud until they were able to read the Scriptures accurately. Rote memorization and repetition played major roles in the learning process. According to rabbinic tradition (*Aboth* v.21), at the age of ten a youth was ready for the study of Mishnah or oral law. The traditional interpretations of the written Torah were the primary curriculum of the *bēṯ hammiḏrāš*. Again, repetition and memorization were stressed, and various devices were employed to aid the memory. According to the same tradition, at the age of fifteen a youth was ready for the study of Talmud (the Mishnah or oral law plus the commentary on it). Our sources do not allow us to reconstruct the development of this graduated system of schools, its spread, precisely what forms the *bēṯ hammiḏrāš* took, or how it was related to the *bēṯ sēper*. Clearly, however, study of the Law preceded the study of its interpretation; in all Jewish schools the Torah was the heart of the curriculum, and memorization was emphasized.

V. In the Early Church.–The role of education in early Christianity cannot be properly assessed apart from the recognition that Jesus was a teacher and looked upon teaching as integral to His ministry. His disciples, i.e., students, later handed on and interpreted His teachings for the early Church, which itself emphasized the importance of teaching.

In view of the Christology of the NT writings, it is significant that one of the most common titles for addressing Jesus was "teacher" or "rabbi." The latter, however, meant simply "teacher" and had not yet acquired the technical meaning which it has in later Jewish writings. In addition, Jesus taught in synagogues and public places and disputed with the scribes and Pharisees (Mt. 26:55; Lk. 21:37; Jn. 18:20). The crowds showed Him the respect normally accorded to teachers, and Jesus was held accountable for the practices of His "students" (Mk. 2:18, 23f.). Like other Jewish teachers, Jesus sat while He taught (Mt. 5:1; Lk. 4:20f.). Unlike others, however, Jesus called His disciples; they did not seek Him out. He was an itinerant teacher and taught the crowds as well as His disciples. Jesus also distinguished Himself from other Jewish teachers by placing His personal authority above that of the Law. Although He did not dismiss the Law (Mt. 5:17-20), He used it to defend His actions and buttress His teachings in a way unheard of among the rabbis, and brought to it an interpretation which differed radically from theirs. In addition to His unique stance toward the Law, Jesus stood apart from other Hellenistic and Jewish teachers by claiming no teachers as His authority (Lk. 20:8). He was untrained (Jn. 7:15; cf. Mt. 13:54-56) and yet taught as one with authority which surpassed that of the scribes (Mt. 7:29). Moreover, He offered a new teaching in a milieu in which all knowledge came from the past or was revealed by God. His claim "but I say to you . . ." in Mt. 5:22-44 surpassed the form of address used by the prophets: "thus says the Lord . . . ," and identified Him with the fulfillment of the Law (Mt. 5:17; Lk. 24:27). This claim to authority should be interpreted in connection with His emphasis on the urgency of His message and the imminent eschatological crisis. Against this background, it is not surprising that the three themes which dominated the teachings of Jesus were the kingdom of God, the Son of Man, and the nature of discipleship.

Recent discussion about Jesus as teacher has polarized over the issue of whether Jesus made His disciples memorize His teaching. This polarization is unfortunate. It is wise to distinguish between "memorizing" and "remembering." The claim that the disciples memorized sayings is supported by the generally shared view that many of the sayings and parables are authentic and must have been remembered by the disciples. This does not necessarily mean that they made a systematic effort to memorize His sayings from the beginning or that He instructed them to do so. However, assuming that the role of Jesus' disciples was to participate in the proclamation of the Kingdom, it is probable that they received some instruction in the demands of the life of discipleship and the nature of the kingdom of God.

From Paul's letters and from Acts one sees that teaching was important in the life of the early Church. Acts describes the apostles as teaching both in public (4:18; 5:21, 25) and in private (2:42). Moreover, using the Greek equivalents of Hebrew verbs that had the technical meaning of "receive" and "hand on" tradition, Paul alluded to his use of traditional teachings (1 Cor. 11:2, 23; 15:3; 2 Thess. 2:15; 3:6). 1 Cor. 11:23 suggests that Paul regarded Jesus as the ultimate source of the traditions and that they had the same authority as the Lord Himself. It is therefore not surprising that teaching was an essential part of Paul's work also (see 1 Cor. 4:17; Col. 2:7; Rom. 6:17; 16:17; 2 Thess. 2:15; cf. 1 Thess. 4:6). The importance of teaching in the early Church is underscored by references to "remembering" the teachings of Paul (1 Cor. 4:17; 2 Thess. 2:5) and of the apostles (2 Pet. 3:2; Jude 17), and the words of Jesus (Lk. 24:6, 8; Acts 11:16; 20:35).

Another dimension of teaching in the early Church may be seen in its instruction of recent converts in the rudimentary Christian doctrines. Such instruction is commonly called catechesis. While its content cannot be systematically outlined, early Christian catechesis appears to have involved material from the OT and Jesus' teachings; material about Jesus, the Church, and the Christian life; and also traditional Hellenistic ethical teachings drawn from Judaism and the Greek philosophies (e.g., Jas. 1:27; 3:3-6; Phil. 4:8; Gal. 5:22f.). These hortatory and ethical materials were used by Christian teachers in much the same way they had been used in the instruction of converts to a philosophy or to Judaism: to guide the convert along the path of prudence, wisdom, and righteousness. Paul refers to the duty of the catechumens to support their teacher (Gal. 6:6). The reference in 1 Thess. 4:1f. to the teaching his readers had received may again allude to catechetical instruction, since Paul wrote 1 Thessalonians shortly after establishing the church there. The office of teacher, moreover, probably developed in the early churches largely in response to the need to instruct recent converts. Paul seems to place teachers nearest in rank and function to the apostles (1 Cor. 4:17; 2 Thess. 2:15; cf. Col. 2:7; Eph. 4:21), and the later NT writings show that "teacher" increasingly came to denote an office rather than a function (cf. 1 Cor. 12:28f.; Acts 13:1; He. 5:12; Eph. 4:11; 1 Tim. 2:7; 2 Tim. 1:11; 4:3; Jas. 3:1).

Finally, while the NT gives surprisingly little attention to the instruction of children, this instruction appears to have remained primarily the responsibility of the family, just as it was among the Jews (Eph. 6:4; 2 Tim. 3:15). If the Christian child received a formal education he did so only in pagan schools (Tertullian *De idololatria* 10), yet Tertullian prohibited Christians from teaching in these schools. Education in first-century A.D. Roman schools reflected the system of education developed in the Greek schools of the Hellenistic age, and most schools continued to be supported by private benefactors. Children between the ages of seven and eleven were taught reading, writing, and arithmetic. In this part of their education pupils learned sections of Homer selected for their moral content. By the 1st cent. Virgil and other poets were also studied; but Homer remained, as he had been for centuries, the center of the curriculum. Secondary education (for students between twelve and fifteen) consisted of further study of Homer, grammar, composition, mathematics, and science. These subjects formed the core of the ancient ideal of *enkýklios paideía* ("general education"). Higher education generally meant the study of rhetoric, since the ability to speak persuasively was essential in most public careers. Gifted students, however, might also seek further education at schools of philosophy, medicine, or law. By late in the 2nd cent. Christian schools began to emerge. Prior to this development churches probably supplemented the education of their children with instruction in the Scriptures, the teachings of Jesus, and ethical materials. That churches did not provide separate schools for the education of their children during the 1st cent. has been attributed to the following factors: they expected the Second Coming imminently, they were poor, and Christianity had no official recognition within the Roman empire. Nevertheless, both the Jewish heritage and the example of Jesus insured that Christianity was fundamentally and essentially a teaching religion, which transmitted the revelation of God it had received and the wisdom of human experience it had acquired (Col. 2:6f.).

EDUTH ē'duth [Heb. *'ēḏûṯ*–'testimony,' a technical term for the Ten Commandments or for the Law]. The term "Eduth" occurs in the title to Ps. 60 (MT v. 1), "according to Shushan Eduth" (lit. "lily of the testimony" [?]). The title of Ps. 80 (MT v. 1), Heb. *'el-šōšannîm 'ēḏûṯ lᵉ'āsāp,* is rendered by the RSV "according to Lilies. A Testimony of Asaph." These words may be intended to designate the melody to which these Psalms were usually sung. *See* PSALMS II.C.

EGG [Heb. *bêṣâ*; OT only pl.; Gk. *ōón*]. It is not likely that the egg was used by the Israelites as food until about the Persian period, when the domestic fowl was first introduced to Palestine, though by the 1st cent. A.D. it was well established (Lk. 11:12; Mt. 23:27; Lk. 13:34). The Mishnah has frequent references to eggs and how they may be cooked. In Dt. 22:6 they are mentioned in a law that allows for taking the young birds but not the mother; it is significant that the taking of the eggs is not mentioned.

In Job 6:6, the AV "white of an egg" is no doubt a mistranslation for "slime of the purslane" (RSV, BDB; NEB "juice of mallows"); purslane is a plant whose flower resolves into an insipid mucilaginous jelly.

Job 39:14 speaks of the habit of the ostrich, who stupidly wanders away from her eggs and forgets where she has left them. The verse has given rise to the popular but false belief that she leaves them to hatch in the sun. (Cf. Isa. 10:14.)

The reference in Isa. 59:5 is to the egg of a serpent and is figurative of the schemes of evil men. J. A. BALCHIN

EGLAH ɛg'lə [Heb. *'eglâ*–'heifer']. Wife of David and mother of Ithream (2 S. 3:5 par. 1 Ch. 3:3).

EGLAIM eg'lə-im [Heb. *'eglayim*] (Isa. 15:8). A town which, to judge from the poetic statement in Isaiah, was at one of the extremes of Moab. Eusebius mentions an Agallim 8 Rom. mi. S of Areopolis (Rabbah, now Amman). About 12 km. (7½ mi.) S of Rabbah, near Kerak, a pile of stones known as Rujm el-Jilîmeh preserves the Byzantine name Aegallim. About 6½ km. (4 mi.) further S Khirbet Jaljul is sometimes identified as Eglaim. Aharoni suggests that Eglaim was located at Mazra', NE of the Lisan — which would more accurately be an extremity of Moab, but the identification is uncertain.

Bibliography.–Y. Aharoni, *LBHG*, p. 32; Y. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* (1968), maps 155, 213; *EAEHL*, I, s.v. "El-'Ajjul, Tell" (O. Tufnell); *GP*, II, 310f.

W. S. L. S.

EGLATH-SHELISHIYAH eg'lath-shə-lə-shī'yə [Heb. *'eglaṯ šᵉlišîyâ*]. Found in Isa. 15:5; Jer. 48:34 in the oracles against Moab. The AV translates "an heifer of three years old"; the RSV takes it as the name of a place. In the former case strong and unconquered cities, Zoar and Horoniam, are compared to the heifer not yet broken to the yoke. Such use of "heifer" is not infrequent (cf. Jer. 46:20; Hos 10:11; etc.). The majority of scholars, however, take it as a place name. Some would read "the third Eglath," as if there were three towns of that name. The NEB omits it in Isa. 15:5 and takes it as a place name in Jer. 48:34. No probable identification has been suggested. W. EWING

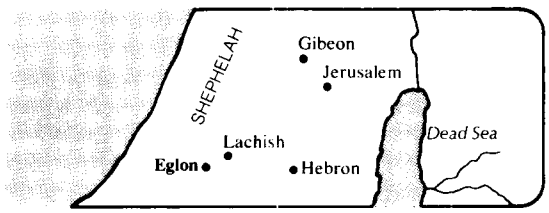
EGLON eg'lon [Heb. *'eglôn*–'circle']. A king of Moab in the period of the judges who, in alliance with Ammon and Amalek, overcame Israel and made Jericho his capital. He was presumably driven across the Jordan by the turmoil in his own kingdom, which at that time was probably being used as a battle ground by Edom and the desert tribes (cf. Gen. 36:35). After eighteen years of servitude the Israelites were delivered by Ehud the Benjaminite, who like many other Benjaminites (cf. Jgs. 20:16) was left-handed. Under the pretext of carrying a present to the tyrant, he secured a private interview and assassinated him with the two-edged sword which he had carried concealed on his right side (Jgs. 3:19-22). Ehud made his escape, rallied the Israelites about him, and returned to conquer the Moabites (Jgs. 3:30). *See also* EHUD 1.

E. D. ISAACS

EGLON eg'lon [Heb. *'eglôn*; the LXX usually confused this town with ADULLAM, thus in Josh. 10 *passim*, Gk. *Odol(l)am*; other variants, Gk. *Aglōn, Aiglōn, Ailam, Eglōm, Eglōa, Ideadalea, Odolloch*]. An Amorite city at the eastern margin of the Shephelah (Josh. 10:33ff.; 12:12; 15:39).

I. Identification.–Robinson, and later Conder and Kitchener, found the name Eglon preserved in the Arabic form Khirbet 'Ajlân. This is undoubtedly the Gk. *Agla* of Eusebius (Onom. 48.18), although, led astray by the LXX substitution of Adullam for Eglon (cf. *Onom.* 24.21f.; 84.22-24; 172.7), the church father had wrongly identified *Agla* with Beth-hoglah (Josh. 15:6). Because the nearby Khirbet Umm Lâqis, which the British surveyors took for a reflex of the biblical Lachish, was so small and insignificant, they sought the latter city at Tell el-Ḥesī, the largest ancient site in the vicinity. Petrie accepted this view and proposed to identify ancient Eglon with Tell en-Nejîleh, as did his successor Bliss. Bliss's discovery of a cuneiform tablet at Tell el-Ḥesī that mentioned Zimreddu, ruler of Lachish in the Amarna Letters, gave superficial support to this view.

Albright, however, rejected that equation and identified Tell el-Ḥesī with Eglon; Garstang concurred. Excavations at Tell ed-Duweir have established almost beyond doubt that it is the site of Lachish. Therefore the case for Eglon = Tell el-Ḥesī is strengthened. However, although the nearness of Khirbet 'Ajlân supports Albright's view, it is hard to believe that the Judean Shephelah extended that far west. The biblical references (see below) would favor a site E of Lachish. Other proposals for Eglon are Tell Beit Mirsim by Elliger, and Khirbet 'Aitûn by Noth. The latter, occupied in the Middle and Late Bronze Ages as well as the Iron Age, would more logically fit the line of march from Lachish to Hebron (Josh. 10:34-37).



II. Excavation.–Because Tell el-Ḥesī is still viewed by many as the site of Eglon, a review of the archeological finds there is in order. The work started by Petrie in 1890 and continued by Bliss from 1891 to 1893 uncovered eight "towns" built one upon the other and marked the real beginning of modern archeological excavation in Palestine. Although the methods have been refined and corrected by other scholars, the general picture of the site's history remains fairly well established.

The deepest observed stratum evidently belongs to E.B. III. During the Middle Bronze Age the city was fortified with a wall supported by a sloping stone revetment coated with hard clay or lime plaster, typical of that period in Palestine. The L.B. city produced a cuneiform tablet of the Amarna type, and, from a somewhat later stratum, an ostracon bearing an early West Semitic inscription. As were most towns of the region, the L.B. city was destroyed *ca.* 1200 B.C.

During the Iron Age the town was only a relatively minor urban center, confined to the small upper citadel, and thus characterized by a fortress from which the surrounding villages were governed. Recent excavations and surveys have shown small Iron Age farming communities in the region around Tell el-Ḥesī, including Tell Idbîs and an unnamed site above Wâdi Jemmâmeh, both on natural hills. The Iron Age settlement at Tell Idbîs had been severely eroded, but it provides a useful comparison with Tell en-Negîleh, where abundant Iron II pottery suggested a prominent Israelite or Philistine town. Because excavations showed immediately no building remains were left that could be associated with the Iron Age settlement, it was evidently only a small farming community, founded on top of a mighty Bronze Age tell in the same way as that at Tell Idbîs had been set up on a natural hill. The mother city was apparently at Tell el-Ḥesī, with daughter villages dispersed round about (cf. Josh. 15:39b, 41b).

III. History.–The earliest mention of Eglon in a historical source is evidently in the Egyptian Execration Texts (G. Posener, *Princes et pays d'Asie et de Nubie* [1940], p. 92, no. E 58). A L.B. cuneiform tablet discovered at Tell el-Ḥesī, shown by its language and general appearance

to be contemporary with the Amarna texts (included in modern editions as Am.Tab. 333), is a letter from a certain Pa'pu to the "Great One," undoubtedly the ruler of Tell el-Ḥesī; the writer describes the high treason brewing among Zimreddu, Shipti-ba'lu (i.e., the ruler of Lachish and his successor; cf. Am.Tab. 329:5f and probably 332.3), and the ruler of Yaramu against the pharaoh.

During the Israelite invasion of Canaan, Adonizedek king of Jerusalem was galvanized into action against his subjects at Gibeon, who had made a pact with Joshua. The king sought aid from Jerusalem's Amorite allies, the kings of Jarmuth, Hebron, and Lachish, as well as Debir king of Eglon (Josh. 10:3-6). The Israelites came to the defense of Gibeon, winning a decisive victory over the coalition. The five Amorite kings were captured (Josh. 10:23), and Eglon was seized in the conquest of southern Palestine (Josh. 10:34-37; 12:12). The city was included in the second district, the lowland Shephelah region, of the inheritance of Judah (Josh. 15:39).

I. Name.–The Heb. *miṣrayim* is apparently related to Ugar. *mṣrm*, "Egypt," *mṣrym*, "Egyptian"; Amarna *miṣri*, "Egyptian"; Akk. *muṣur*, *muṣri*, "Egypt/Egyptian," and also "*Muṣri*" in northern Syria (which may be intended in 1 K. 10:28). The Hebrew word was formerly taken as a dual, referring to the "two lands" of Egypt, but this view has been strongly challenged on the basis of the forms in cognate languages. The word first occurs in nonbiblical texts in the 14th cent. B.C., and seems to have been used only by outsiders, since the name has not been found in Egyptian sources.

The Gk. *Aigyptos* first occurs in Homer (*Odyssey*), with the masculine article for the Nile and with the feminine article for Egypt. The suggestion by Brugsch, adopted by Gardiner, that the Greek comes from Egyptian *ḥwt-k3-ptḥ* (cf. Amarna *ḥikuptaḥ*, "mansion of the Ka of Ptah") has been generally accepted (cf. Am.Tab. 84:37), even though Hikuptah is Memphis, capital of Lower Egypt, and not the entire land. The use of the name "Memphis" to refer to all of Egypt has support in the Hebrew Bible, where both *môp* and *nôp*, derived from Egyp. *mn-nfr* (vocalized something like *mennufe(r)*; cf. Copt. *menpi*, *mempi*), "established and goodly," stand for "Egypt" (cf. Hos. 9:6; Isa. 19:13). The name *mn-nfr* was given to the pyramid of Pepi I of the 6th Dynasty, and then transferred to the capital at Memphis (Gardiner, *Egypt of the Pharaohs*, p. 91).

The Egyptians called their land *kmt*, vocalized in Coptic as *kēme*, "black land," referring to the rich alluvial soil along the banks of the Nile, in contrast to *dašre(t)*, "red land," the desert region on either side of the fertile Nile Valley. They also called their land *t3wy*, "two lands," referring to the ancient division into Upper and Lower Egypt, and *t3-mr3ỉ*, "beloved land," usually translated "Egypt."

II. Location and Size.–Egypt is located in the northeastern part of Africa. Because its borders were not the same throughout its history, a precise definition of its boundaries cannot be stated generally. The Delta extends from about 30° to 32° East Longitude, and the Nile from the First Cataract (Aswân) to the Mediterranean lies between 24° and 31°30′ North Latitude. The Second Cataract is about 22° North Latitude, and the Fourth Cataract about 19° North Latitude. Each of these locations was at some time the southern boundary of Egypt. Modern Egypt extends from the Second Cataract to the Mediterranean, and from the border with Libya (25° East Longitude) to the Red Sea. The SINAI Peninsula, part of Asia, is included in modern Egypt, but will not be considered in this article. The total area of Egypt is about 1,000,000 sq. km. (390,000 sq. mi.), of which less than 4 percent is habitable. Perhaps more accurate than measurements based on geographical boundaries is the simple statement, "Egypt is the Nile."

III. Geography.–Since Egypt is "the gift of the Nile" (attributed to Herodotus [cf. ii.5] by Strabo *Geog.* xii.2.4) it seems relevant to begin the study of the geography of Egypt with the Nile River system, possibly the world's greatest river complex. The Nile proper is formed by tributaries, the major ones being the White Nile, the Blue Nile, and the Atbara. At a point near modern Cairo the Nile divides, having formed an alluvial fan known from ancient times as the Delta of the Nile. Although the tributaries lie outside the boundaries of Egypt, we must consider them because of their importance in the phenomenon of the annual flooding of the Nile and the part it has played throughout history in the life of Egypt.

A. White Nile. The sources of this river system are found in equatorial Africa, a few degrees S of the equator, in the region where the modern nations of Zaïre, Burundi,

Ruwanda, Uganda, Sudan, Kenya, and Tanzania are close to each other. The Lake Albert system and the Lake Victoria system join to form the Albert Nile (Baḥr ej-Jebel). This divides in a flat region, where the river is frequently blocked by vegetation (the Sudd), to form the Baḥr ej-Jebel and the Baḥr ez-Zeraf. These rejoin, along with the Baḥr el-Ghazal, to form the White Nile near Malakal in Sudan. There are also other tributaries from the east. *See* Plate 27.

B. Blue Nile. A spring in Ethiopia that flows through the Little Abbai into Lake Tana, located near Bahar Dar in Ethiopia, is considered the source of the Blue Nile. Lake Tana, about 12° North Latitude, lies at an altitude of 1785 m. (5856 ft.). (By way of comparison, Lake Victoria lies at an altitude of 1139 m. [3720 ft.], and Lake Albert at 679 m. [2030 ft.].) From Lake Tana the Abbai, called in Sudan Baḥr el-Azrâq, "the Blue River," drops rapidly in a gorge, flowing first southward, then westward, and finally northwestward, to join the White Nile at Khartoum (about 16° North Latitude). Lake Tana furnishes only a small part of the water of the Blue Nile, the balance coming from numerous tributaries that drain the mountains of Ethiopia, which rise to the height of 4500 m. (15,000 ft.). The seasonal torrential rains in the Ethiopian highlands cause the annual flooding of the Nile. *See* picture in ETHIOPIA.

C. Nile Proper. From Khartoum the Nile flows generally northward, bordered by a narrow strip of vegetation and the wide expanse of the deserts on each side. The northern direction is broken by a huge S-bend between Atbara and Dongola, a distance of about 700 km. (435 mi.). The Atbara River, the last main tributary of the Nile, joins the Nile at Atbara (around 17° North Latitude). Like the Blue Nile, it drains the highlands of Ethiopia and contributes to the flooding of the Nile.

Between Khartoum and Aswân the Nile has cut its way through six granite barriers, with resultant rapids or cataracts. Since they were numbered by explorers, their sequence is in reverse order to the river's current. The Sixth Cataract is at Wâdī Hamid, about 100 km. (60 mi.) N of Khartoum. The Fifth, Fourth, and Third Cataracts seem to have been caused by the same granite formation, as the river crosses it three times in the course of the S-bend, the Fifth Cataract N of Atbara, the Fourth Cataract N of (but upstream from) Meroë, and the Third Cataract near Kerma. The Second Cataract was near Wâdī Halfa, almost on the border between Sudan and Egypt (now covered by Lake Nasser), and the First Cataract is just N of (below) the Aswan Dam. The cataracts make navigation on the Nile above Wâdī Halfa impossible, and in recent times a railroad joined Wâdī Halfa and Khartoum, bypassing the lower portion of the great S-bend of the river. The region between the First and Sixth Cataracts was known in antiquity as Nubia — Lower Nubia from the First to the Second Cataract, and Upper Nubia from the Second to the Sixth. The Egyptians controlled part or all of Nubia only at certain periods. The High Dam at Aswân was constructed (1960-1970) to form a lake (Lake Nasser) extending to the Second Cataract.

From Aswân to Cairo (more properly, to just S of ancient Memphis) is "Upper Egypt." Except for a large bend between Luxor and Nag Hammadi, the course is almost directly northward for a distance of about 1200 km. (750 mi.). The arable land is a narrow strip of alluvial soil on each bank of the Nile, sometimes less than a kilometer (0.6 mi.) in width, and never more than about 10 km. (6 mi.) wide on each side. In predynastic times this was divided into twenty-two "nomes" or districts, numbered from south to north, each of which was ruled by a "nomarch." The principal cities of these nomes continued in

Second Cataract of the Nile (W. S. LaSor)

Egyptian history, and the local divisions also played a part in Egyptian politics. While there is no historical basis for dividing Egypt into any other parts than Upper and Lower Egypt, it is common in some modern works to refer to the region from Akhmim to Memphis as "Middle Egypt." This somewhat natural division is reflected in Sa'idic (Theban) and Akhmimic, two of the early dialects of Coptic. The capital of Upper Egypt in dynastic times was *nw.t ỉmn,* biblical *nō' 'āmûn* (Nah. 3:8) or *nō'* (Jer. 46:25), Homeric Thebes (*Il.* ix.383-85), modern Luxor and Karnak. The capital in the Amarna period was at el-Amarna in the 15th Nome, hence in Middle Egypt.

Near Cairo the Nile divides, fanning out into the Delta of the Nile. A gulf of the Mediterranean in the Pleistocene period, the Delta is the result of an accumulation of alluvial deposits brought down from Ethiopia by the Blue Nile and the Atbara over many centuries. The Delta is about 250 km. (150 mi.) in width and about 160 km. (100 mi.) from north to south, and the alluvial deposit on the average is about 20 m. (65 ft.) deep. The extremely fertile and well-watered soil has therefore been an important source of food in all periods, and was known as "the breadbasket of Rome" in Roman times. From predynastic times this region was known as "Lower Egypt," and was divided into twenty nomes. The capital of Lower Egypt in dynastic times was at Memphis. In the 19th and 20th Dynasties (the Ramesside period), there was also a capital at Avaris in the eastern Delta. The two branches of the Nile in modern times are the Rosetta (Rashid, at the west) and the Damietta (Dumyat, at the east). In antiquity there were, according to one tradition, twelve branches of the Nile. Strabo names seven: Canobic, Bolbitine, Sebennytic, Phatnitic, Mendesian, Tanitic, and Pelusiac (*Geog.* xvii.1.18). Their location and identification are not generally agreed upon.

From its most distant source to the Mediterranean the Nile measures 6670 km. (4145 mi.), making it probably the longest river in the world (the Amazon, which has not been as accurately measured, is sometimes awarded this distinction), and the Nile basin extends over about 2,850,000 sq. km. (1,100,000 sq. mi.), roughly 10 percent of the area of the continent of Africa. Approximately 58 percent of the water is supplied by the Blue Nile, 29 percent by the White Nile, and 13 percent by the Atbara.

D. Annual Flooding of the Nile. From the earliest periods of civilization the cultivation of land along the Nile depended on a unique phenomenon, the annual flooding of the Nile. The constant source of water in the Nile is largely the result of the drainage of the plateaus of equatorial Africa accomplished by the White Nile and its tributaries. This water is greatly augmented by the Blue Nile and the Atbara, which drain the seasonal rains of the Ethiopian highlands. The rains in Ethiopia begin in May, and the season of heavy rains (the *kremt*) occurs in the months of July-September. At Wâdī Halfa, on the northern border of modern Egypt, the Nile begins to rise in June and reaches its maximum height in September. At that time the flow is nearly 800,000,000 cubic m. (28,290,000,000 cubic ft.) per day. The river begins to drop until it reaches its low point in late January. At that time the flow is less than 100,000,000 cubic m. (3,530,000,000 cubic ft.) per day. While the Blue Nile is in flood, it serves to hold back some of the water of the White Nile, forming a sort of natural reservoir, and this prolongs the seasonal flood.

The flood served two major purposes for the Egyptians. First, it provided fresh alluvial deposits each year, making the use of any other fertilizer unnecessary. The silt content of the Nile at the height of flood averaged 2500 parts per million by weight, and during the flood season averaged 1600 parts per million. The building of dams, particularly the High Dam at Aswân, has seriously disturbed this deposit of alluvium and made extensive use of fertilizers necessary. At the same time, the dam has served to control excessive flooding while providing hydroelectric power. The second service the Nile flood rendered was the irrigation of the fields for the major part of the growing season. However, the flood stage of the Nile was not uniform. The difference between the maximum and minimum flood stages has been measured at 34 cm. (13.4 in.); thus in some years the level would be insufficient for satisfactory irrigation. Nilometers were used, both in antiquity and in more recent times, to record the height of the flood. One of these, described by Strabo (*Geog.* xvii.1.3, 48), can be seen today at Elephantine island near Aswân. According to J. H. Breasted (*History of Egypt* [1905], p. 191), the Nilometer shows that the Nile in antiquity rose "twenty five to thirty feet higher than the Nile rises at the present day." Strabo records (xvii.1.3) that the Nile rose to fourteen cubits *(pēcheis)* at its greatest and to eight cubits at its lowest flood stage. Taking the *pēchys* to be about 46 cm. (18 in.; the length from the point of the elbow to the tip of the middle finger; cf. LSJ, *s.v.*), this would be the equivalent of 640 cm. (252 in.) and 365 cm. (144 in.), respectively. The Egyptian calendar of 365 days was not precisely correlated with the solar year, so the rising of the Nile could not be predetermined by reference to the calendar. The Egyptians discovered, at an early date, that the rising of the Nile coincides with the heliacal rising of the Dog Star, Sothis, called "the going up of Sothis." *See* ASTRONOMY I.A.

E. Faiyûm. The only exception to the description of the Nile as a narrow valley is found in the region about 100 km. (60 mi.) S of Cairo and W of the Nile, known as the Faiyûm. Near Abydos is a small branch of the Nile called Baḥr Yûsûf ("river of Joseph"). This feeds the Faiyûm depression and empties into Lake Karûn (Qarûn), which lies 45 m. (148 ft.) below sea level. Amenemhet III either built or rebuilt a canal by which the water of the Nile in flood could be stored in this lake and used for irrigation while the Nile was at low-water stage. Strabo refers to this as "the lake of Moeris" and gives a rather full description of the locks and other buildings (*Geog.* xvii.1.37; cf. Herodotus ii.149). Because of the name "river of Joseph," local guides sometimes tell visitors that this was the location of the Hebrews in the days of Joseph and Moses. This identification is worthless. Of great significance, however, is the fact that Crocodilopolis, where the crocodile god Sebek was honored, yielded numerous mummified crocodiles wrapped or stuffed with papyri. These were the famous papyri recovered by Grenfell, Hunt, and Hogarth in 1895ff.

F. Western Desert. The region west of the Nile (the Western Desert, eṣ-Ṣaḥra el-Gharbîya, or the Libyan Desert, eṣ-Ṣaḥra el-Libîya) is almost entirely a vast desert, extending from the Mediterranean to Khartoum, described as perhaps the most arid region in the world. It is part of the great Sahara. In modern Egypt, it covers about 675,000 sq. km. (260,000 sq. mi.), roughly three-quarters of the modern country. A limestone plateau, reaching its greatest height (1934 m., 6345 ft.) at Jebel el-'Uwaynât in the extreme southwest, it is covered largely by rocks and sand. The plateau slopes gently toward the north, and is broken only by a few depressions or oases, namely, el-Wâḥât el-Dakhla, el-Wâḥât el-Farâfra, and el-Wâḥât el-Baḥarîya in the central part of the Western Desert, and the greater depressions, el-Wâḥât es-Siwa (ancient Ammonium, or Siwah, where Alexander the Great consulted the oracle of Amon), and Munkhafad el-Qaṭṭara, the Qat-

tara Depression, which lies 132 m. (435 ft.) below sea level. The plateau ends in a shelf or escarpment about 180 m. (600 ft.) high near the Mediterranean coast. The narrow strip along the shore is watered by rains and is habitable. The oases, except the Qattara Depression, are also habitable due to ground water supplies. A notable feature of the desert is the formation of parallel sand dunes 60 m. (200 ft.) or more in height in the region between Siwah in the northwest and Jifr el-Kebîr, the mountains in the southwest.

G. Eastern Desert. East of the Nile and extending to the Red Sea is the Eastern Desert (eṣ-Ṣaḥra eš-Šarqîya), also called the Arabian Desert, an area of 222,750 sq. km. (86,000 sq. mi.). This region is a striking contrast to the Western Desert, for while it is also arid, it consists partly of a mountain chain with peaks of 1977 m. (6486 ft., Jebel Ḥamâtâ), 2187 m. (7175 ft., Jebel Šâyib el-Banât), and 1751 m. (5745 ft., Jebel Ghârib), plus several lower peaks. The region is cut by numerous wadis and several larger valleys that extend from the Nile to the Red Sea. The most important is Wâdī Ḥammâmât, extending from Qift (Koptos, N of Karnak) to Quseir, a distance of 193 km. (120 mi.) on the modern map. Stone quarries were worked in Wâdī Ḥammâmât from early times. Erman records that, with the exception of granite, all the hard, dark-colored stone used by Egyptian sculptors came from the quarries in Wâdī Ḥammâmât (A. Erman and H. Ranke, *La Civilisation égyptienne* [1952], p. 38). The route through Wâdī Ḥammâmât was the shortest to Punt, and was used by pharaohs in their military and commercial ventures. More than fifty inscriptions tell of the exploitation of these quarries or expeditions through the wadi.

A more important modern route lies slightly to the north, from Qena (opposite Dendera) to Port Safaga. Other routes are located from a point opposite Edfu to Marsa Alam and from Aswân to Bit Shalatein. Although the Eastern Desert generally tapers out at the edge of the Delta, a more significant boundary is Wâdī Ṭumilât, which runs from Bubastis (near modern Zagazig) to Lake Timsâḥ (near modern Ismailia). At an early date, a canal was cut through this wadi, connecting the Nile with the Red Sea. The canal fell into ruin, and was restored by Pharaoh Neco and later by Darius. Amenemhet I built a fortress at the eastern end of Wâdī Ṭumilât, called "the Walls of the Ruler," to protect the northern border against Asiatic invaders.

IV. Climate.–Lower Egypt has Mediterranean weather, which means that the winds are prevailingly from the west, either southwest (in summer) or northwest (in winter). Rainfall in winter in the Delta ranges from 20 cm. (8 in.) per annum at Alexandria to 3.3 cm. (1.3 in.) at Cairo. From April to June there will be days when the Saharan weather dominates, resulting in much heat and excessive aridity (the *khamsîn*). The rest of Egypt rarely has any rainfall whatever. The temperature ranges between 11° and 27° C (53° and 81° F) during the day at Cairo in summer and averages between 12° and 15° C (55° and 60° F) in January. In Upper Egypt, temperatures are considerably higher, often going above 38° C (100° F). Nights are sometimes 17° C (30° F) cooler than the days. The winds generally blow up the Nile Valley, making it possible to sail upstream (i.e., from north to south).

V. People and Language.–*A. People.* Some would trace the origin of the Egyptians to Asia, others to Africa. D. Garrod speculates that survivors of a Neanderthal race, producing artifacts with Levalloisian affinities, may have been displaced by men of the modern type in Mesolithic times (*CAH* [3rd ed.], I/1 [1970], 70). This subject lies beyond the limits of our present study. On the basis of linguistic evidence, however, it seems reasonable to assume that the Egyptians of historic times were partly of Semitic stock and partly of Hamitic (or Berber) stock. The direction of the movements of these peoples and the approximate dates cannot be determined at present. On the basis of my studies of Semitic phonemes, I formulated a hypothesis that the Semites penetrated from the northeast, moved up the Nile and into what is now known as Ethiopia, thence across Bab el-Mandeb into South Arabia, and from there bifurcated, one branch migrating into North Arabia and the other into the Mesopotamian valley ("Semitic Phonemes," dissertation, Dropsie College, 1949). This movement, if it did take place in such fashion, was well before the historic period, for the languages of the specified areas had already developed in distinctly different ways by the end of the Chalcolithic Age. The Hamitic group most likely penetrated Egypt from Libya. This also must have been before the historic age, for Hamitic elements are found in Egyptian at the earliest known level of the language. On the other hand, the Hamitic penetration must have been later than the Semitic movement into Ethiopia and South Arabia, for no Hamitic elements are found in the early Semitic languages of those regions.

There are other mixtures in the Egyptian people. The peoples of sub-Saharan Africa made their way down the Nile, reaching Khartoum probably by 3200 B.C. To what extent the Nubians are Negroid is a matter of debate, for while they have dark skin pigmentation, the facial characteristics and the hair are not those generally described as Negroid. One of the chests from the tomb of Tutankhamen shows the king engaging in battle with Negroes, clearly indicated by hair and facial characteristics as well as by color. By the end of the 18th Dynasty dark-skinned people had taken over large portions of Nubia and established a capital at Napata. For the 25th Dynasty Manetho lists three "Ethiopian" kings, Sabacon, Sebichos, and Tarcos. The founder of the dynasty was Kashta, who was succeeded by Piankhy. But the first to rule all of Egypt was Shabaka (Manetho's Sabacon), who was succeeded by Shebiktu (Shabataka) and Taharqa (Tirhakah; cf. 2 K. 19:9 par. Isa. 37:9). Whether these "Ethiopians" were Negroid or not depends in part on definitions. Figures with clearly Negroid characteristics can be found in Egyptian art. Unfortunately, the Egyptian word for "Negro" [*nehes*] does not help us, for the word seems to have been used indiscriminately for other foreigners besides the Nubians or Negroes. Further complicating the problem is the fact that the terms "Hamitic," "Berber," and "Nilotic" are sometimes used by scholars for subclasses of the Negro race, whereas the Hamitic peoples in the OT are Caucasoid, the Berbers are generally considered to be a Caucasoid Mediterranean people, and "Nilotic" is sometimes used to describe the Nubians in contradistinction to the Negroes. Perhaps the most that can be said is that some Negro peoples were in Egypt from the 18th Dynasty on, if not earlier. Cf. Gardiner, *Egypt of the Pharaohs,* p. 133; T. Säve-Söderbergh, *Ägypten und Nubien* (1941), pp. 39ff.

The last great invasion of peoples in Egypt was the Moslem advance in A.D. 640. This lies beyond the limits of the present article, yet it has left influences (such as the modern place names) that need to be recognized to clarify our present understanding. The Moslem conquest brought in a new wave of Semitic peoples and a late level of the Semitic language, namely, Arabic, which today has developed into an Egyptian dialect. The Copts claim that they are the descendants of the earlier Egyptians, and certainly their liturgical language as well as the name "Copt" does preserve a late stage of the Egyptian language. The modern language of Egypt is *not* Egyptian, even though it is

called such, and has little relationship to ancient Egyptian. Coptic, on the other hand, is a direct descendant of ancient Egyptian.

B. Language. The Egyptian language, like the people, is a mixture of two or more elements, generally described as Semitic and Hamitic. The Semitic elements include characteristic triconsonantal roots, phonemic-phonetic elements (such as the diversity of guttural sounds), feminine nouns and second-person verbal forms ending in *-t*, gemination (doubling) of the middle radical (though this feature is denied by W. Till and is generally observable only in Coptic), similarities of the pronominal suffixes and the independent personal pronouns, preformative elements (such as the Ś-causative and the N-reflexive), and many similarities in etymology. Not all of these elements are clearly observable, and there is some difference of opinion among scholars. For example, W. F. Albright has maintained that all of the numerals from 1 to 9 in Egyptian are cognate with the Semitic numerals, but I have demonstrated that several of the identifications are phonemically impossible or highly improbable. Less certain, but worthy of further research, is the possible relationship between the Egyptian *wn* and the Hebrew *waw*-conversive. On the other hand there are several elements that are more closely related to Hamitic (or Libyco-Berber), including numerous etymologies, reduplication of the entire root or of part of the root (e.g., the *qalqal*, the *qatlal*, and the *q^{e}taltal* — these are also found in several Semitic languages and may therefore be either Proto-Semitic or very early Semitic borrowings from Hamitic when the first Semites moved through Egypt and Abyssinia into the Arabian peninsula, if my hypothesis is sound), and other features noted by Hamitic scholars. The Egyptian verbal system seems to be somewhat different from either of these parent groups, lacking for one thing the formation of verbal forms with preformative pronominal elements (e.g., Heb. *yiqtōl*, Arab. *yaqtulu*, and Akk. *iprus* and *iparras*). There are also later additions to Egyptian, some of which may be identified as Cushitic (Abyssinian or Nilotic from the upper Nile regions), and of course Greek elements that entered Coptic.

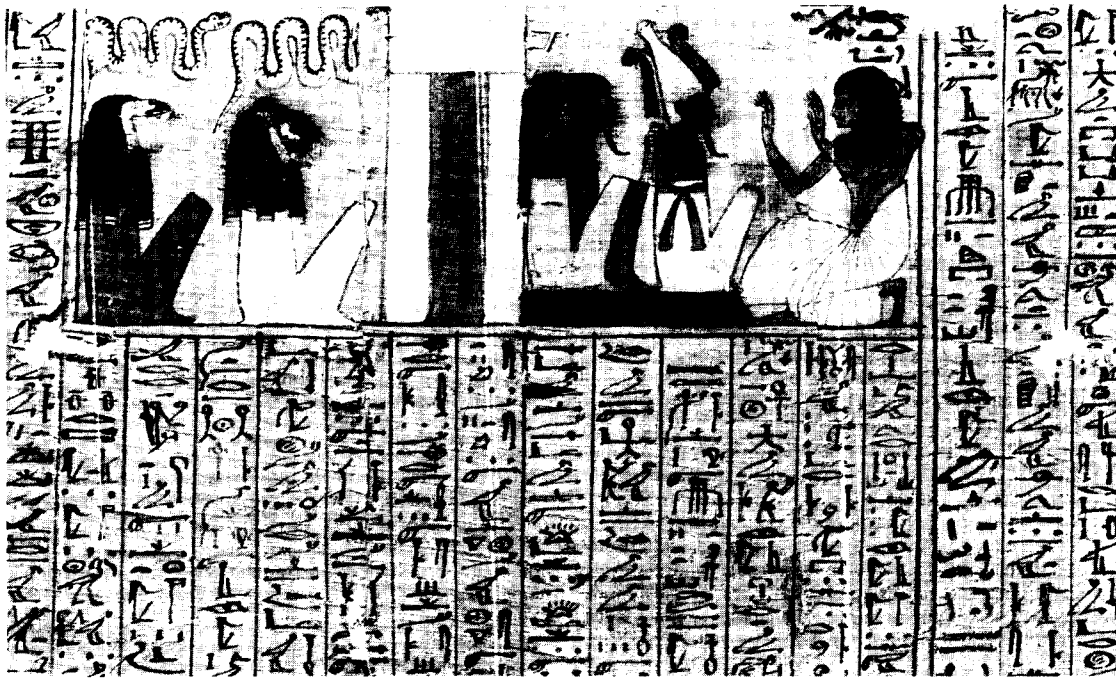
The history of the Egyptian language may be divided into several periods. We may assume (1) a Proto-Egyptian or formative period when the earliest known elements were in the process of becoming the language. This is necessary to account for the well-developed language at its earliest historical stage, commonly called (2) Old Egyptian (1st-8th Dynasties). Perhaps the most important survivals of Old Egyptian are the Pyramid Texts, largely of religious and funerary character. (3) Middle Egyptian (9th-18th Dynasties) is the classical period of the language. Many literary compositions as well as official documents have been preserved in Middle Egyptian. It is also the most familiar stage of the language, since most students begin (and usually end) their studies in Middle Egyptian. (4) Neo-Egyptian (from the Amarna age to the 24th Dynasty) is the popular language of the New Empire, preserved in correspondence, official records, stories, and other examples, as well as the official language of numerous inscriptions and literary compositions. (5) Late (or Low) Egyptian is the language of the period from the 25th Dynasty to Roman times. It is preserved in numerous documents, both private and administrative, written in demotic (see below), and in inscriptions, mostly Saite and Ptolemaic, where the scribes were attempting some sort of classical revival. (This same feature is true of the art of this period.) Finally, there is (6) Coptic, often described as the language of the Christians of Egypt. However, early evidences of Coptic are found two or three centuries before the Christian era. Coptic occurs in several dialects, including (a) Bohairic, from Alexandria and Lower Egypt, (b) Akhmimic, from "Middle Egypt" (see III.C above), (c) Sa'idic (often and less correctly spelled Sahidic; cf. Arab. *eṣ-Ṣa'id*, "Upper Egypt") from Thebes, gradually spreading through all of Upper and Middle Egypt, and (d) Faiyumic, used in the Faiyûm. The Bohairic and Sa'idic versions of the NT are significant for textual studies. The Gnostic documents from Chenoboskion (Nag Hammadi) are written in Coptic.

C. Form of Writing. Egyptian is written in hieroglyphic, hieratic, demotic, and Coptic forms or styles of writing. These terms are sometimes understood either as chronological developments or as linguistic subdivisions (and of course both elements are present), but strictly speaking the first three are forms of writing.

(1) Hieroglyphic ("priestly carving") is the most familiar, since it is the form used on wall inscriptions. The name was given to the writing before the decipherment was accomplished, when it was thought that the inscriptions were sacred and esoteric writings of the priests. It was initially pictographic (expressing the idea in pictures), hence the large number of recognizable characters such as birds, reptiles, animals, parts of the body, and flowers and plants. But by the time of the first known inscriptions, ideograms (the character suggests an idea), logograms (the character represents a word), phonograms (the character suggests a sound, an alphabetic character), and phonetic complements (suggesting the pronunciation of the word) are found. All methods may be used simultaneously. Vowels were not written (although the signs for *-w*, *3*, and *i* often indicate the vowel sound to be used). It has been customary to vocalize Egyptian words with *e*-vowels (e.g., Amenemhet and Wenes), even though the evidence of Coptic or foreign transcriptions may indicate otherwise.

(2) Hieratic is a cursive form of writing, in which the

The hieroglyphic biography (ca. 2400 B.C.) of Metjetjy, a nobleman. Painted relief from his tomb at Saqqârah (Royal Ontario Museum, Toronto)



Part of the Theban Book of the Dead in cursive hieroglyphs with some hieratic signs (University Museum, University of Pennsylvania)

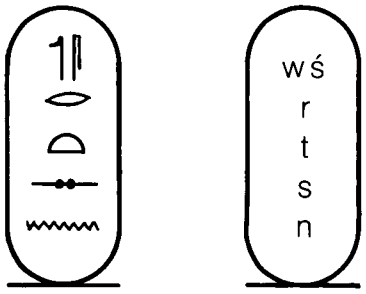
beautiful characters of hieroglyphic may still be recognized. Champollion described hieratic as "a hasty writing of hieroglyphs" (*tachygraphie des hiéroglyphes*). It is not a different language or a different stage of development of the language, but simply a different style used for a different medium, much as our hand printing is used for signs and our writing is used for documents or letters. Hieratic is written with a sharpened reed and ink on papyrus, wood, and fragments of pottery. (Hieroglyphic writing is also found on papyrus.) Hieroglyphic writing is found from the 1st Dynasty until about the 3rd cent. A.D., and hieratic writing from about the 3rd Dynasty to the same *terminus ad quem*.

(3) Demotic is a further simplification of hieratic, much more cursive and much more difficult to read. It first occurred around the 25th Dynasty, and is therefore related to Late Egyptian, which is sometimes called "Demotic," thus confusing the style of writing with the linguistic development. The latest document in demotic comes from Philae and is dated A.D. 473. It was more the "popular" writing (hence the name given by the Greeks, *dēmotikós*, "of the people"), and was used for everyday documents and profane literature.

(4) Coptic is in a completely different style of writing, borrowed almost entirely from Greek uncial letters. In order to provide for certain phonemes not found in Greek, Coptic scribes adapted certain demotic characters, namely, *šai* [š], *fai* [f], *ḫai* [h], *ḥori* [ḥ], *ǧangia* [ǧ or ž], *čima* [č], and *ti* [ti]. The phonetic nature of the *ti*, and why it was added when there was already the *tau*, is not clear, but there appears to have been a glottal element in the *ti* (Egyp. *ti3*). Since the Gk. *theta*, *phi*, and *chi* were at that period pronounced as aspirates (*th* as in hothouse, *ph* as in upholstery, and *kh* as in backhand), they were used in Coptic only for *t*+*h*, *p*+*h*, and *k*+*h*, and it was necessary to borrow signs for *f* and *ḫ*/*ḥ*. Certain phonetic shifts had taken place in Egyptian, and as a result the dentals *d* and *t* fell together as *t*, the prepalatals *ḏ* [ǧ] and *ṯ* [č] developed either to *t* or to *ǧ*, suggesting a conditioned sound-shift, and *ḫ* developed either to *š* or to *ḥ*, suggesting that it may have been an *Ichlaut* conditioned by a neighboring sound. Some final consonants have fallen away and are not written in Coptic (note especially the final *-t* in Egyptian, lacking in Coptic). Of particular importance is the presence of *l* in Coptic, which sometimes represents an Egyp. *r*, and at other times (rarely) an Egyp. *n* or *m*. The fact that *r*, *n*, and *m* usually are the same in Coptic as in Egyptian clearly indicates that there was an *l*-sound in Egyptian, preserved in the Copt. *l*. Coptic writing continues to be used in the liturgical and scriptural writings of the Coptic Church.

D. Direction of Writing. Egyptian was written either vertically or horizontally. When written vertically it is from top to bottom, but when written horizontally, it may be from left to right (dextrograde), but is more often from right to left (sinistrograde). Bustrophedon writing (each succeeding line reading in the opposite direction) is rarely if ever found. The direction is always apparent, for the characters are reversed, and we always read in the opposite direction from the way the birds are facing. (Since there are about fifty-three different bird-characters, some are always present. The same phenomenon is found for other beings, human or animal.) This description, however, is an oversimplification. From the Middle Kingdom on, hieratic is always written from right to left, as is demotic. Coptic is written from left to right. Hieroglyphic on monuments is composed to fit the monument, and may consist of two or three different directions of writing. Furthermore, certain characters fit together, either vertically or side by side, and the characters of a word may be arranged in a square-formation, with a long-and-narrow character placed alongside two or three short-and-wide characters, regardless of their order in the word. This accounts for different readings of the same name; e.g.,

wśrt-s-n is sometimes read "Usertsen" rather than "Senwosre(t)," i.e., Sesostris. The characters are faced toward the important part of the monument, so that on the left the writing may be dextrograde whereas on the right side the writing may be sinistrograde. Further complicating the description is the fact that certain words or elements, e.g., names of deities and the words *nsw* ("king") and *nṯr* ("god"), are placed first, regardless of their proper place. The names of kings (specifically the Prenomen and Nomen) are customarily written within an oval or oblong figure called a cartouche.



Cartouche of Sesostris (Sen-Wosret): "Man of [goddess] Wosret." Here the two lower signs are read first, then the other four signs, starting at the top left (the second and third signs repeat part of the first to clarify the reading).

E. Decipherment of the Language. Until the efforts by the German Jesuit A. Kircher in the mid-seventeenth cent., the hieroglyphs were considered as such: sacred and secret writings. Kircher, a Coptic scholar, failed in his efforts to decipher them, thinking they were written in alphabetic characters. But when Napoleon's expedition to Egypt discovered the Rosetta Stone in 1799, the desideratum of all who would decipher an unknown language was provided, namely, an inscription in two languages (not three, as sometimes stated; the Egyptian is written in both hieroglyphic and hieratic). *See* picture in ARCHEOLOGY OF EGYPT. The names of S. de Sacy, J. D. Åkerblad, and T. Young are connected with the first attempts to decipher the language, but credit for fully translating the stone is usually given to Jean-François Champollion (d. 1832). He subsequently prepared an Egyptian grammar and a dictionary (published posthumously). The date given for the decipherment, based on his letter to M. Dacier, is 1822, when Champollion was thirty-two years of age.

The following phonemes (indicated in Egyptian by alphabetic characters) are found: *b, p, f* (both *p* and *f* are phonemic; they are not allophones as in Hebrew and Aramaic), *m, n, r, s, ś, š, d, t, ṯ (č), g, k, ḏ (ǧ), q (k), ḫ* (perhaps an *Ichlaut*), *ḥ* (perhaps an *Achlaut*), *ḥ, h, ȝ* (like Heb. *'aleph*), *i* (also like *'aleph*, often transcribed as *i* or *y*), *ʿ* (like Heb. *'ayin*), *w, y*. No symbol for *l* occurs, either *n* or *r* being used to represent the phoneme. That there must have been an *l* is indicated by its presence in Coptic words of Egyptian origin (cf. Egyp. *ỉȝrrt*, Copt. *eloole*, "vine"; Egyp. *ns*, Copt. *las*, "tongue"). That numerous phonetic shifts must have taken place in the course of 3000 years is a linguistic certainty. Evidence of some of the shifts can be seen in Coptic words. Particularly noteworthy is the loss of final *-t* (cf. Egyp. *nw.t ỉmn*, Heb. *nō' 'āmûn*, "Thebes").

F. Writing Materials. The Egyptian scribe used a sharpened reed and usually wrote with ink on papyrus. His equipment included a palette, an ink box, and a pen or two. Examples of writing in both black and red inks have been preserved. Papyrus was made from the stalk of the papyrus plant (which is no longer found in Egypt except in front of the archeological museum). The rind was removed and the pithy stalk was split and laid out in vertical strips. Over these were placed horizontal strips of the same material. They either adhered because of the fluids in the stalk or because of an unknown adhesive. (Pliny [*Nat. hist.* xiii.11-13] says that Nile water was used as the adhesive.) The sheets were then held together under pressure until dry and afterward rubbed until smooth. Writing was done on both sides, because of the cost of papyrus, but the side laid horizontally was considered the *recto*. The use of potsherds (ostraca) by student scribes was common. Hieroglyphics were carved or painted on wall surfaces.

VI. Calendar and Chronology.–*A. Calendar.* The date when the Egyptian calendar was first used is unknown, but from the Archaic Period until the Julian calendar was forced on Egypt (30 B.C.) the year was composed of twelve months of thirty days each, with five epagomenal days at the end of the year. Thus a year of 365 days was established. The year was divided into three seasons: *ȝḫt* (Copt. *ḫate*), "Inundation"; *prt* (Copt. *prou*), "Emerging (soil), winter," the season of planting; and *šmw* (Copt. *šōm*), "deficiency(?) of water, summer," the season of harvesting. A date would be given as *tpy ȝḫt śśw* ("first [month] of Inundation, day 1). Obviously, a calendar of 365 days would get out of phase with the actual seasons within a short time, for the solar year is approximately 365¼ days. Accordingly we find such statements as "winter is come in summer," and the actual flooding of the Nile would not occur in the calendar season of Inundation. The Egyptians made no attempt to correct this until the time of Ptolemy III Euergetes (237 B.C.), and even then his suggestion to add an extra day was rejected.

At an early date it was observed that the flooding of the Nile occurred at the same time as the heliacal rising of the Dog Star (Sirius or Sothis). At the latitude of Memphis this was 19 July by our calendar (*see* ASTRONOMY I.A). Instead of correcting their calendar to bring it into coincidence with the inundation, the Egyptians marked "the going up of Sothis" (*prt spdt*) and recorded when it occurred by their calendar. This idiosyncrasy has made it possible to establish a number of fixed points in Egyptian chronology. (O. Neugebauer says, "This calendar is, indeed, the only intelligent calendar which ever existed in human history" [*Exact Sciences in Antiquity* (1957), p. 81], since a fixed time scale without any intercalation is exactly what is needed for astronomical calculations.) The Latin scholar Censorinus records (21.10) that the beginning of a Sothic cycle coincided with the New Year of the Egyptian calendar (*wpt-rnpt*, "opening of the year") in the second year of Antoninus Pius, i.e., A.D. 139. The difference between the 365-day year and a solar year is approximately ¼ day per year or one day in four years, or one year in 1460 years (1461 calendar years = 1460 solar years), which is called a Sothic cycle. The Egyptians did not use the term Sothic cycle, but they did refer to the "perfect year" when the calendar New Year (*wpt-rnpt*) coincided with the "going up of Sothis" (*prt-spdt*). If a Sothic cycle began in the year A.D. 139 of the Julian calendar, other cycles would have coincided with the New Year in approximately 1321 B.C., 2781 B.C., and 4241 B.C. (Other scholars calculate these dates slightly differently, but on a basis unclear to me.) It was the hypothesis of Sir Flinders Petrie, followed by other Egyptologists, that the invention of the Egyptian calendar must have coincided with the beginning of a Sothic cycle; in other words, the going up of Sothis would have been marked as the first day of the newly instituted calendar. Since 2781 B.C. was

patently too late for the beginning of the dynastic era, the date 4241 B.C. was assumed. This hypothesis was rejected (cf. O. Neugebauer, *Acta Orientalia*, 17 [1938], 169-195; *JNES*, 1 [1942], 396-403), and Egyptologists were free to establish the date of the 1st Dynasty on the basis of other evidence. There is general agreement at the time of this article that the 1st Dynasty began *ca.* 3100 B.C. ± 150 years.

From the Persian period on, the Egyptians named their months. They also made a table of the stars according to which they could determine the hours of the night; they divided the day, as well as the night, into twelve hours, but the less accurate basis for the hours of the day was a water clock, or a sundial. Their *3t*, "minute," was an indefinite short period, like our "moment."

B. Chronology. In the days of Ptolemy II Philadelphus (283-247 B.C.), the Egyptian priest Manetho attempted to write a history of Egypt in which he listed the kings and the lengths of each reign, dividing them into thirty dynasties. The work is extant only in the versions of Africanus and Eusebius, the latter of which adds a 31st Dynasty. The two versions are not always in agreement. Manetho's figures for the length of each king's reign, and his names as he transcribed them in Greek, are not always reliable, but in general his outline is satisfactory and has become the basis for all modern histories of Egypt. See Gardiner, *Egypt of the Pharaohs*, pp. 429-453, for the complete list of kings and dynasties with Gardiner's notes.

Other works also furnish information. The Turin Canon of Kings is a papyrus list written in hieratic about the time of Ramses II, reportedly in good condition in the 17th cent. (A.D.) but now in fragments. The number of names is approximately the same as in Manetho's list. The Table of Abydos, inscribed on the walls of the temple, shows Seti I and his son making offerings to seventy-six of his ancestors whose names are written in hieroglyphic. The Table of Saqqârah, discovered in 1861, at one time had the names of fifty-seven kings honored by Ramses II, but because of damage to the inscription only fifty can be read. The Table of Karnak likewise is a wall inscription, this one dating from the reign of Thutmose III. It lists sixty-one names, of which forty-eight could be read when it was discovered (1825), but the names are not in chronological order. The Palermo Stone, fragments of which are in the museums at Palermo and Cairo, gives a year-by-year record of the kings and the principal events for the first six dynasties, but its condition makes it only of occasional use.

From these lists, together with synchronisms from other ancient Near Eastern documents and the correlations with the Sothic cycle in the reigns of Sesostris III and Amenhotep I, Egyptologists have been able to put together a reasonably complete and accurate chronology of the kings of Egypt. For portions of the history other data are available, such as the years of the "(cattle) count" (a kind of taxation), the *hb-śd* or Sed-Festivals, and the records of the precise dates of the birth and death of Apis bulls correlated with the dates of reigning kings. Because P. van der Meer (*Chronology of Ancient Western Asia and Egypt* [1955], pp. 83-85) has put so much value on the Sed-Festivals, claiming that they occurred regularly at thirty-year intervals, a word of caution is necessary. From records available it appears that some kings celebrated Sed-Festivals every *third* year, beginning with their thirtieth anniversary. Thus Ramses II celebrated six from his thirtieth to his forty-second year, and altogether celebrated twelve or thirteen such festivals. (Cf. R. A. Parker, *Calendars of Ancient Egypt* [1950]; A. H. Gardiner, *Royal Canon of Turin* [1959]; G. Steindorff, *Urkunden des ägyptischen Altertums* [1903-1917].)

VII. Science and Metrology.—The Egyptians were unusually clever in their powers of observation but lacking in their ability to abstract principles; hence, we give the Greeks credit for many discoveries in mathematics, geometry, and astronomy, whereas the foundations seem to have been laid by the Egyptians, and the principles abstracted by the Greeks.

We have already discussed some of the astronomical observations. To these we must add the ability to work from sightings of the stars to the orientation of the pyramids. The Great Pyramid deviates from true north by only 0°2′30″.

Egyptian medical texts indicate that the Egyptians had observed many facts about the body. From preparing bodies for mummification they had of course learned the positions of the organs and were aware of circulation of the blood. There is evidence that they performed operations, including trepanning of the skull. Much of their *materia medica* makes use of herbs, etc., but it is interesting that the diagnosis and treatment are tied to the calendar, indicating that they were aware of the interrelationship between sickness and climate or weather.

In mathematics the Egyptians used a decimal system except for the calendar, which was basically sexagesimal. There were figures for units, tens, hundreds, thousands, tens of thousands, hundreds of thousands, and even millions. There were also figures for fractions, but here the Egyptian inability to abstract a principle shows itself, for the numerator is always 1 and the denominator is 2 or a multiple, i.e., ½, ¼, ⅛, $^1/_{16}$, $^1/_{32}$, and $^1/_{64}$. These added, the Egyptian knew, to only $^{63}/_{64}$, and Thoth was supposed to supply the remainder. Other values could be expressed by hieroglyphs. Multiplication and division were accomplished by factoring, i.e., multiplying or dividing by 2, obviously a long and complicated process.

Geometry is illustrated on Papyrus Rhind, and is rather elementary, but it sufficed to lay out plots of ground as well as to build great pyramids and other structures.

The units of length were the *mḥ*, "cubit" (523 mm. or 20.6 in.), the *šsp* or palm ($^1/_7$ cubit), the *ḏb*ʿ or finger (¼ palm), and for larger measures the *ḫt* or rod (100 cubits) and the *3trw* or river-measure (20,000 cubits, 10.46 km., or 6.50 mi.). This was satisfactory even for great distances, and the Egyptians had measured Upper Egypt at 86 atours (900 km. or 559 mi.) and Lower Egypt at 20 atours (209 km. or 130 mi.), figures which are remarkably accurate.

Units of area were the *st-3t* (one square *ḫt* or 2735 sq. m. — about ½ acre), the land mile (1000 square cubits), and the *atour* (one square atour).

The measure of capacity was the *ḥq3t* (about 4.8 liters), which was divided into ½, ¼, etc., with the missing $^1/_{64}$ from Thoth.

The unit of weight was the *dbn* (91 gm., 3.2 oz.). A smaller unit was the *qdt* ($^1/_{10}$ of the *dbn*; cf. A. H. Gardiner, *Egyptian Grammar* [3rd ed. 1957], pp. 191-200).

VIII. History.—We shall concern ourselves here with the history of Egypt from late predynastic times to the Roman period, with emphasis on the periods that seem to have more relevance to biblical studies. (For the modern discovery of Egypt *see* ARCHEOLOGY OF EGYPT.)

A. Predynastic Period (*ca.* 5000-3200 B.C.). When the gulf that was formed in the Pliocene began to dry, the waters descended irregularly, leaving gravel terraces at heights of 90 m. (296 ft.) to 45 m. (148 ft.). These contain no trace of human habitation. The first artifacts indicating the presence of human beings are found in the 30-m. (98-ft.) level. After the 9-m. (30-ft.) stage, the river dropped below its present level, and the remains of human occupation there have been obliterated. We may assume that

there was continuous occupation, perhaps with some penetration of peoples from other areas. Cf. *CAH* (3rd ed.), I/1 (1970), 62-69.

The Neolithic "revolution," which appears to have left its earliest traces in the Zagros Mountains between modern Iraq and Iran, reached Egypt *ca.* 5000 B.C. Neolithic communities have been discovered at Merimda (Beni Salameh), about 48 km. (30 mi.) NW of Cairo, and at Der Tasa and Badari, between Akhmîm and Asyût in Upper Egypt. Typical finds are classified as "Tasian" and "Badarian." At Nagada (Naqada) on the west bank N of Luxor, the "Amratian" and "Gerzean" types were found. The presence of copper artifacts leads to the conclusion that the inhabitants had passed into the Chalcolithic Age. According to a modification of Petrie's system of Sequence Dating (abbr. S.D.), Amratian was assigned S.D. 30-37 and Badarian S.D. 38-63. More recent scholars have tended to use the terms "Naqada I" for the earlier (*ca.* 4500 B.C.), and "Naqada II" for the later (*ca.* 3500 B.C.). (Cf. *CAH* [3rd ed.], I/1 [1970], 463-497.) Newcomers, possibly Semitic, seem to have been responsible for the new vitality found in Naqada II. Cylinder seals and two original seals of the Jemdet Nasr period found in Naqada II tombs provide a synchronism with Mesopotamian prehistory and lend support to the theory of a Semitic invasion.

The geography of Egypt encouraged the development of individual kingdoms rather than a central government. Accordingly we find these petty states, to which Herodotus gave the name "nomes," each of which was ruled by a "nomarch," at the beginning of the dynastic era (cf. Herodotus ii.177). At an indeterminate date before the dynastic period the twenty-two nomes of southern Egypt federated to form Upper Egypt and the twenty nomes of northern Egypt formed Lower Egypt.

B. Archaic Period (*ca.* 3200-2700 B.C.). The union of Upper and Lower Egypt was accomplished by Narmer, who is often identified as Menes, though not without scholarly objection. The Narmer palette shows Narmer wearing the crown of Upper Egypt, and hieroglyphic signs have been interpreted to mean "Horus brings the captives of Lower Egypt," leading to the conclusion that Narmer unified the land by conquering Lower Egypt. The Turin Canon and the Abydos king list name the first king as Meni, the Min of Herodotus and the Menes who founded Manetho's 1st Dynasty. But W. B. Emery (*Archaic Egypt* [1961], pp. 32-37) gives arguments for and against this identification, concluding that Ḥor-aha and not Menes was Narmer. According to Herodotus, Menes founded a new capital at Memphis, named "White Wall(s)" or simply "Wall(s)." Since white was the color of Upper Egypt, to locate the new capital on the edge of Lower Egypt and to name it "White Wall(s)" may have been intended to emphasize the victory of the southern kingdom. On the other hand, it may simply have been descriptive of the color of the walls (cf. Thucydides i.104).

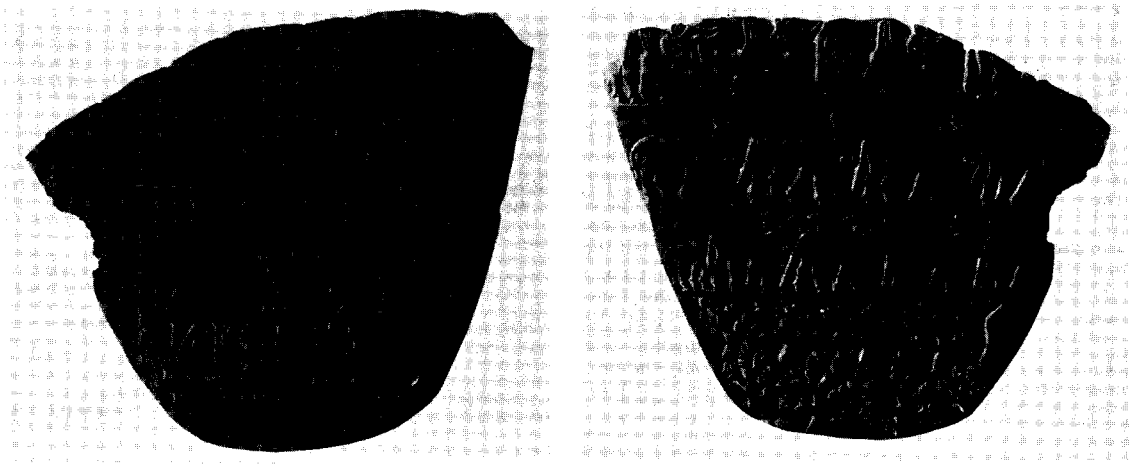
Since the division of the kings of Egypt into "dynasties" by the priest Manetho, historians have followed this general outline. The Archaic Period includes the 1st Dynasty, for which Manetho lists eight kings with a total of 253 years, and the 2nd Dynasty, nine kings with a total of about 300 years (297 or 302, according to the versions of Africanus and Eusebius). The average length of a king's reign in a dynastic sequence is usually around twenty or twenty-five years, so these totals seem to be somewhat high. Evidence from a later period that Egyptians practiced the custom of co-regencies suggests that these figures incorporate some overlapping of reigns.

It was formerly held that the historic period must have begun with the beginning of a Sothic cycle, and 4241 B.C. was taken as the date for the beginning of the 1st Dynasty, but, as we have seen, this view has been rejected. The 1st Dynasty must be dated within a century or two of 3200 B.C.

In the Archaic Period there was a strong central government, and significant progress was made. Irrigation canals were maintained, writing was introduced or at least first used extensively, and architecture was revolutionized by the introduction of stone as a building material. Stone was used for vessels and sculptors were showing mastery in carved reliefs and in representing the human figure (cf. W. S. Smith, *Art and Architecture of Ancient Egypt* [1958], pp. 11-29; I. Woldering, *Art of Egypt* [1963], chs. 2–4).

C. Old Kingdom (*ca.* 2700-2400 B.C.). The Old Kingdom includes the 3rd-6th Dynasties. Manetho lists nine kings of Memphis totalling 214 years for the 3rd Dynasty, eight kings of Memphis of a different line totalling 277 years for the 4th Dynasty, eight kings of Elephantine totalling 248 years for the 5th Dynasty, and six kings of Memphis totalling 203 years for the 6th Dynasty. The total for the four dynasties is therefore 942 years. By way of comparison, A. H. Gardiner (*Egypt of the Pharaohs*, pp. 433-36) gives the following dates for the beginning of each

The Tjeḥnu Palette. Left: the seven squares probably represent towns (signified by the hieroglyphs), and the seven animals, each breaking its way through the wall with a pick, probably represent provinces or nomes. Right: the booty captured from the towns(?) (Service des musées, Cairo)



dynasty: 3rd, 2700 B.C.; 4th, 2620 B.C.; 5th, 2480 B.C.; and 6th, 2340 B.C. Other scholars give somewhat different dates, but all in approximately the same time framework. The dates are self-consistent, and can be synchronized at points with other datable persons or events of the ancient Near East. Thus, e.g., the discovery of vase inscriptions of Chephren of the 4th Dynasty and of Pepi I of the 6th Dynasty at Tell Mardikh (Ebla) give approximate synchronisms with Iblul-Il of Mari and with Mesalim of Kish, according to G. Pettinato (*Catalogo dei testi cuneiformi di Tell Mardikh–Ebla* [1979], p. xxxviii); thus these Egyptian kings must be dated to the middle of the 3rd millennium B.C.

Of the kings in Manetho's 3rd Dynasty, only two are known from the monuments, Djoser (Zoser, Manetho's Tosorthros) and Ḥuny. Five are known from the king lists (adding Djoser-teti, Sedjes or Nebkare, and Neferkare, possibly Manetho's Kerpheres), and the total reigns of the four listed in the Turin Canon add up to fifty-five years. We can see that Manetho's lists and totals must be handled critically. Best known of these kings is Djoser, whose step-pyramid at Saqqârah (Sakkara) is considered to be the first sizable stone structure built by man. Djoser's architect and scribe was Imhotep, also considered a physician and a magician. Imhotep must have been a genius by any standards, and the nineteen years allotted to Djoser's reign by the Turin Canon, or the twenty-nine years of Manetho, do not seem to be sufficient for his accomplishments.

The 4th Dynasty consists of eight kings of a different Memphite line (Manetho), of whom three are well known: Cheops (Khufu), Chephren (Khafre), and Mycerinus (Menkaure), builders of the largest pyramids. Gardiner suggests 2620 B.C., W. S. Smith 2680 B.C., for the beginning of the 4th Dynasty. Snefru, founder of the dynasty, conducted raids on both Nubians and Libyans, and is credited with three pyramids, two at Dahshur and one at Meidum. Forty ships are reported to have brought cedar wood from Lebanon. From this time on, the nomen of the king seems to have been preferred to the Horus name, and was enclosed in a cartouche on monuments.

Since the names of the kings have been, and to some extent continue to be, one of the problems in reconstructing the history of Egypt, a brief description is needed. The "titulary" (*nḫbt*) of the king consisted of five "great names" (*rn wr*): (1) the Horus name, representing the king as an embodiment of Horus; (2) the "Two Ladies" (*nbty*) name, identifying the king with the ancient goddesses of the Upper Egyptian city of El Kâb and the Lower Egyptian city of *Dp*; (3) the Golden Horus name, the significance of which is not entirely clear; (4) the prenomen, which is always preceded by the title *n-sw-bỉt*, written as *insibya* in Babylonian cuneiform documents, and almost always compounded with Re'; and (5) the nomen, introduced by *s3 r'*, "son of Re'." The prenomen and the nomen were usually written in cartouches, and the nomen was usually the name by which the king was known — something like a family name — before his accession to the throne. The principal name is the prenomen, which often stands alone or accompanied only by the nomen. The Horus name, prominent in the early dynasties, was of less importance than the nomen from the 4th Dynasty on. The prenomen is the more personal, and the nomen the more familial name, but we generally use the nomen and attach a Roman number to designate which of the Thutmoses or Amenhoteps is meant. On the other hand, the prenomen often occurs on cuneiform documents. The Table of Abydos, by way of contrast, lists only the prenomen. Cf. A. H. Gardiner, *Egyptian Grammar* (3rd ed. 1957), pp. 71-76.

Cheops (Khufu) is best remembered for his Great Pyramid, one of the seven wonders of the ancient world. Much has been written about this pyramid, some of it nonsense. It was designed as a tomb, not as a calendar for predicting the future. But when we have made that distinction, it remains a marvel of engineering skill because of its size, proportions, and almost exact orientation north-south and east-west. (For a discussion, see I. E. S. Edwards, *Pyramids of Egypt* [2nd ed. 1961]; A. Fakhry, *The Pyramids* [1961].) His son Chephren (Khafre) built a pyramid almost as large (originally only 3 m. [10 ft.] less in height and 15 m. [48 ft.] less on each side) and as splendid as Khufu's. The approach to the pyramid was guarded by a huge figure that has come to be known as the Sphinx, a covered causeway, and a funerary temple. The Sphinx was carved from a rock outcropping, but the monolithic pillars of the Valley Temple are of rose granite from the quarries near Aswân. The pyramids were built of limestone blocks averaging 2500 kg. (2½ tons) each, brought from the quarries on the Muqattem hills, on the opposite side of the Nile. Originally the pyramids were covered with a layer of polished white granite also from the Aswân quarries, but only at the top and the base (which had been covered with sand) of Chephren's pyramid can the original covering be seen; the rest was robbed in antiquity for other building projects. The pyramid of Mycerinus (Menkaure) is only a little over half the size of the pyramids of Cheops and Chephren, but the covering with rose granite, originally planned, would have made it somewhat larger. It still ranks as the third greatest of the pyramids of Egypt.

There are numerous works of art from this period, including a splendid statue of Menkaure and his wife, now in the Boston Museum of Fine Arts. Little else is known of Egypt in the 4th Dynasty. We may assume that much of the strength of the country was spent in building the pyramids and their surrounding structures. According to Manetho, Khufu (Suphis) reigned sixty-three years, and his son Khafre (also called Suphis) reigned sixty-six years. Between them, another son Ra'djedef is named in the king lists. Menkaure is also credited by Manetho with a reign of sixty-three years. We may assume that these figures either are exaggerated or include co-regencies.

After Menkaure the dynasty declined rapidly. Manetho lists four more kings but the Abydos king list gives only one. The 5th Dynasty was founded by Userkaf, a priest of Re from On (Heliopolis, near Cairo). He and his successors worshiped Re, the sun-god, rather than Horus, and adopted the custom of using a Re name. There are long religious and magical texts from this period, and detailed

scenes of many aspects of everyday life portrayed in wall carvings. The Palermo Stone was engraved at this time.

The 6th Dynasty consisted of six Memphite kings and was founded *ca.* 2340 B.C. by Teti (Othoes in Manetho). The repression in art and literature that seems apparent until the 5th Dynasty now gave way to inscribed tombs throughout the country. During the reign of Pepi I, Weni, a commoner who rose to "friend" of the king and later to governor, organized expeditions to Sinai, south Palestine, and Elephantine; and Har-khuf, overseer of the interpreters, led caravans to southern Nubia and to oases in southern Libya. Among other items he brought back a pygmy dancer from the Sudan. After the long reign of Pepi II (99 years according to Manetho — a figure supported in the Turin Canon, where 90 plus a broken-away figure appears), the dynasty and the entire country fell into disarray. Civil war broke out, and the unity of the nation was gone.

D. First Intermediate Period (*ca.* 2258-2134 B.C.). Some idea of the turbulence of this period is conveyed by Manetho's treatment. For the 7th Dynasty he reports that "seventy kings from Memphis reigned for seventy days." There is no record of any king of this line. For the 8th Dynasty he reports that twenty-seven kings reigned for 146 years, an average of only 5.4 years per reign. He does not give their names. The Abydos list names eighteen successors to Pepi II. The 9th Dynasty, according to Manetho, consisted of nineteen kings who reigned 409 years, a reasonable if somewhat high average of 27.5 years. The dynastic capital was at Heracleopolis Magna, 90 km. (55 mi.) S of Memphis. The 10th Dynasty, according to the same source, consisted of nineteen kings who reigned 185 years (average 9.7 years). The total of these four dynasties, according to Manetho, was 740 years, which we must compress into not much more than 125 years. The impression left is that of rival kings in various parts of Egypt, each possibly controlling only a few nomes. The Turin Canon, like the Abydos list, apparently named eighteen kings, but there is little agreement between the names in the two lists. If we assume that there were indeed eighteen kings in 125 years, this averages less than 7 years per king, again indicating the very unstable conditions. From this period come some of the finest pessimistic writings, which began a literary genre used ever after, and indicated a complete upheaval of the social order. At the same time there is a paucity of monuments. Expeditions to the turquoise mines in Sinai ceased, and there were years of famine. Above all, Thebes, which had been very insignificant, began to increase in importance.

E. Middle Kingdom (*ca.* 2134-1786 B.C.). The priests at Thebes, probably led by Antef (Inyotef), asserted their independence of Lower Egypt, then pushed their borders northward, becoming rulers of all Egypt. The 11th Dynasty consisted of sixteen kings of Diospolis (Thebes), according to Manetho, but we can account for only six — three Antef's and three Mentuhotep's — from the monuments and king lists. Mentuhotep (perhaps II, but Gardiner credits the first of that name) established rule over Upper and Lower Egypt *ca.* 2040 B.C. He designed and began to build a magnificent funerary monument at Deir el-Baḥri, which became the model for the one built by Hatshepsut several centuries later. He also attempted to conquer Nubia. In his days, and those of his successor, a large expedition was sent to Wâdī Ḥammâmât to work the quarries and to open a more direct trade route to Punt. Tombs of the period contain many models depicting scenes from everyday life.

The 12th Dynasty is in many respects the zenith of Egyptian culture. Founded by Amenemhet I (Ammenemes), it consisted of eight kings, four named Amenemhet, three named Sesostris (Senwosre), and the female "king" Sebeknofru. Amenemhet I moved from Thebes to It-Tawi (El-Lisht), 32 km. (20 mi.) S of Memphis. It is in this dynasty that we get our first firm date, for a papyrus from El-Lahûn in the Faiyûm records a heliacal rising of Sothis in month 4 of *prt* (i.e., the eighth month of the year), day 16, of the seventh year of the reign of Sesostris III. On that date the year was 226 days out of phase, or 904 years from the "perfect year." The only reasonable

Sothic cycle for this king would be the one that began in 2781 B.C., hence the seventh year of his reign was 1877 B.C., and his reign began in 1883 B.C. (Because the observation of the heliacal rising cannot be precisely established, and because the difference of a day makes a difference in the calendar of four years, this date must be bracketed with a plus-or-minus of approximately six years. Cf. W. F. Edgerton, *AJSL*, 53 [1937], 188-197; *JNES*, 1 [1942], 307-314.) Gardiner (*Egypt of the Pharaohs*, p. 66) accepts 1872 B.C. for the seventh year of Sesostris III.

During the 12th Dynasty, the country was completely reorganized and foreign expansion was undertaken. Sesostris I and Sesostris III subdued Nubia to the Second Cataract, and Sesostris III invaded Palestine as far as Sekmem (believed to be Shechem). Evidences of Egyptian penetration have been found at Byblos, Qatna, Ugarit, and Atchana, and the court at Byblos seems to have been highly Egyptianized (but probably not under Egyptian control). Gold was brought from Nubia; ivory, ebony, leopard skins, and ostrich feathers from Sudan; and a trading post was established at Kerma near the Third Cataract. Expeditions were sent to Punt (referring, it seems, to both sides of the Red Sea at Bab el-Mandeb) and the Somali coast. Basalt was obtained from Wâdī Ḥammâmât, alabaster from Hatnub, diorite from the region NW of Abu Simbel, turquoise from the mines at Serābīṭ el-Khâdim in Sinai, and amethyst from Wâdī el-Hudi.

The region of the Faiyûm was developed, probably beginning with Sesostris I. Lake Moeris was made a reservoir for the waters of the Nile inundation. A mortuary temple was built at Hawwara, which came to be known as the Labyrinth, the wonder of visitors of classical times. (The name is probably not to be related to the Lydian *labrys* or the Cretan Labyrinth, but rather to the Egyptian king Nema're [Amenemhet III], rendered by Manetho as Lacharēs, which suggests that the character *n* may have represented the *l*-sound, resulting in something like "Lama're.")

Tombs and pyramids were built at numerous sites, including Lisht, Beni-hasan, Al-Bersha, Asyut, and Deir Rifah. The paintings in the tombs at Beni-hasan include scenes with Libyan and Asiatic merchants. Amon of Thebes began to be fused with Re, and the compound name Amon-Re' became prominent. Art and literature were developed. Among the literary compositions are "The Tale of the Eloquent Peasant" (T. E. Peet, *Comparative Study of the Literatures of Egypt, Palestine, and Mesopotamia* [1931], pp. 39-42; *ANET*, pp. 407-410), "Hymns to Senusret III from El-Lahûn" (Peet, pp. 67f.), "Instructions of King Amenemhet" (Peet, pp. 107-111; *ANET*, pp. 418f.), "The Shipwrecked Sailor" (Peet, pp. 28f.), and "The Tale of Sinuhe" (*ANET*, pp. 18-22). The last tells of the wanderings of a voluntary exile in Syria in the days of Sesostris I. (Cf. A. Erman, *Literature of the Ancient Egyptians* [1923], pp. 14-29.)

The most probable time for the visit of Abraham to Egypt, in the opinion of many scholars, is in the Middle Kingdom, although discoveries at Tell Mardikh (Ebla) have led a few scholars to place the time of the existence of the Cities of the Plain (Sodom, Gomorrah, etc.), and therefore the time of Abraham, two or three centuries earlier. Other scholars have attempted to date Abraham much later. *See* CHRONOLOGY OF THE OT III.A.

F. Second Intermediate Period (*ca.* 1786-1575 B.C.). The period between the end of the 12th Dynasty and the beginning of the 18th is difficult for scholars to study. Manetho lists sixty kings for the 13th (Theban) Dynasty, totaling 453 years, and seventy-six kings of the 14th (Xoite) Dynasty, totaling 184 (or 484) years. The 15th Dynasty consisted of six Hyksos or "Shepherd Kings" who ruled 284 years; the 16th Dynasty of thirty-two shepherd kings for 518 years; and the 17th Dynasty, forty-three shepherd kings and forty-three Theban kings ruling at the same time during a period of 151 years. This adds up to no less than 1590 (or 1890) years. To solve the problem Petrie would have added another Sothic cycle to the date for Sesostris III — but that makes nonsense out of Egyptian history, with respect to both foreign synchronisms and Egyptian monuments. Some of Manetho's figures are clearly absurd (e.g., six kings ruling 284 years). The king lists here are of little or no help, except for the Turin Canon, which supports Manetho to the extent of listing a large number of kings (more than a hundred) in a short period of time. We must conclude that many of them reigned over small parts of Egypt in concurrent or overlapping periods.

According to Manetho the 15th-17th Dynasties included the Hyksos. The word Hyksos may be derived from Egyptian *ḥiq-khase* (Gardiner) or *ḥq3w ḫswt*, pronounced something like *heku shoswet* (cf. G. Steindorff and K. C. Seele, *When Egypt Ruled the East* [1942], p. 24), "rulers of foreign lands." The term had been used as early as the Old Kingdom for Nubian chiefs (cf. K. Sethe, in G. Steindorff, ed., *Urkunden*, I [1903], 109, 134). As reconstructed by W. C. Hayes (*CAH* [3rd ed.], II/1 [1973], 44-64), the 13th Dynasty consisted of a large number of puppets or appointed officials who reigned for brief periods during a century and a half (*ca.* 1786-1633 B.C.), probably from the location at It-Tawi near Memphis. They were Thebans, and when Memphis fell in 1674 B.C., this line continued at Thebes where a new dynasty (the 17th) arose in 1650 B.C. Meanwhile, foreign peoples had invaded the eastern Delta, probably around 1720 B.C. They were not a single ethnic group, but were a mixture, with Semitic, Hurrian, and Indo-European chieftains, and they seem to have come in two waves, the second around 1674 B.C.

When the 12th Dynasty began to collapse, Hayes suggests that the western Delta became independent, with its capital at Xois (Khois). The line of kings ruling here formed Manetho's 14th Dynasty. The strong Hyksos rulers of the second wave include the six kings of the 15th Dynasty. The Hyksos of the 16th and 17th Dynasties, according to Hayes, were chiefs of the many Asiatic tribes. The Theban kings of the 17th Dynasty were the successors to the 13th Dynasty who organized the opposition, probably with the help of the "Pan Grave" people from Lower Nubia, and ultimately drove out the Hyksos under Kamose in 1567 B.C.

This reconstruction, it is granted, lacks support of a continuous record, although many of the individual names are found on the monuments which Hayes has cited. On the other hand, it does seem to fit the available time between the end of the 12th and the beginning of the 18th Dynasties, and it does commend itself as self-consistent. It is offered here as one plausible solution to the problem.

The expulsion of the Hyksos occurred *ca.* 1567 at the hands of Ahmose I — but the records of the period are scanty and the evidence is somewhat confusing. A stele discovered at Karnak in 1954 tells of the efforts of Kamose. The Hyksos were under Auserre Apophis I and apparently ruled Egypt from the Delta to Cusae a few miles N of Asyut. At the same time, the Nubians ruled the territory from the First Cataract to the Second, and possibly to Kerma near the Third Cataract. Kamose recorded, "My desire is to deliver Egypt and to smite the Asiatics" (cf. Gardiner, *Egypt of the Pharaohs*, p. 166). Kamose did succeed in driving the Hyksos out of Middle Egypt, but the final deliverance apparently was accom-

plished by his successor Ahmose I (Amosis). According to an inscription on the wall of a tomb at El Kâb, Avaris fell after a siege. This was followed by a siege of the Hyksos stronghold at Sharuhen in southwest Palestine (cf. Josh. 19:6). Ahmose may have penetrated deeper into *Ḏhy* (Palestine-Syria), but this seems unlikely, for he had to turn his attention to the Nubians. He seems to have driven them back to the Second Cataract at least, for there are remains of a temple connected with his name at Buhen (Wâdī Halfa), just below the Second Cataract. Ahmose reigned at least twenty-two years (the highest recorded regnal year — but he may have reigned longer, as indicated by Manetho), and was succeeded by his son Amenhotep I. (Cf. P. Labib; H. Stock; also J. Van Seters; D. B. Redford.)

G. New Kingdom (Empire) (*ca.* 1570-1085 B.C.). With the expulsion of the Hyksos, Egypt entered into a brilliant period of expansion. For convenience, this can be divided into three parts: (1) the 18th Dynasty from Ahmose to Amenhotep III; (2) the Amarna period, Amenhotep IV (Akhenaten) to Haremhab; and (3) the 19th and 20th Dynasties. This covers a period of nearly four hundred years and includes military campaigns that extended Egypt's borders at times to the Euphrates River or Qadesh on the Orontes and also deep into Nubia. It was also the time of colossal works in architecture and sculpture.

Amenhotep I (Amenophis, 1546-1527 B.C.) succeeded Ahmose, and thus the 18th Dynasty was established. Records are not plentiful, but we may assume that Ahmose had succeeded in stabilizing Egypt, and Amenhotep was able to express a desire to "extend the boundaries." From the claims of his successor Thutmose in his second year that his boundaries extended from the Third Cataract to the Euphrates, even allowing for considerable exaggeration, we may further assume that Amenhotep had succeeded in realizing that desire.

The extent to which we may credit the Hyksos period with this new attitude on the part of Egypt is not clear. There were contacts with the outer world long before the Hyksos period, but the new militarism of the 18th Dynasty has often been looked upon as a result of the period under foreign rulers. The Hyksos have also been credited with introducing the horse and chariot into Egypt, as well as the compound bow and other implements of war. Some of these claims have been seriously disputed by more recent scholarship. But whatever the cause, there can be no doubt that Egypt now embarked on an empire-building period.

We have an astronomical date for the reign of Amenhotep I. In Papyrus Ebers it is recorded that the going up of Sothis occurred in the ninth year of the king's reign on month 3 of *šmw* (i.e., the eleventh month of the year), day 9. From this we can calculate that the civil year was 308 days out of phase with the "perfect year," which occurred, as we have seen above, in 2781 B.C. (± 6 years). We can therefore date the beginning of the reign of Amenhotep I *ca.* 1557 B.C. (By another reckoning, the ninth year of Amenhotep I was 1537 B.C., hence his reign began in 1545 B.C.)

Thutmose I (*ca.* 1526-1512 B.C.) subdued Cush to Napata at the Fourth Cataract, and advanced in Asia to the Euphrates; hence he must be recognized as a ruler with military prowess. He made the first of the many additions to the temple of Amon at Karnak, and was the first king to be buried in the Valley of the Kings. He was succeeded by his son Thutmose II, who was married to his half-sister Hatshepsut. Thutmose II reigned only a few years, and when he died his son Thutmose III was merely a child. Hatshepsut seized the opportunity and had herself crowned king (1503-1482 B.C.) with all the royal honors. In representations of herself she appears in man's garb. A strong woman, Hatshepsut cultivated the art of peace, completed and decorated her funerary monument at Deir el-Baḥri, sent an expedition to Punt, and transported two granite obelisks by water from the quarries near Aswân to Karnak. The portrayal of this feat in relief on the wall of her temple at Deir el-Baḥri gives us some idea of how such tremendous achievements were accomplished. Meanwhile, Thutmose III was attempting to wrest the throne from her, and succeeded in doing so in his twenty-second regnal year. He reigned thirty-two years after that, and is considered by some to be the greatest king in Egypt's long history.

During his reign Thutmose III (1482-1450 B.C.) retook Syria, which had revolted under Hatshepsut's reign, conducting six campaigns against Qadesh on the Orontes and a total of seventeen campaigns into Syria and Palestine. (For a graphic account, see *ANET*, pp. 234ff.) In his thirty-third year he crossed the Euphrates at Carchemish and penetrated the territory of the Hurrian king of the Mitanni. Between military campaigns he carried out extensive building programs, led an expedition to Nubia, and put the empire on a sound administrative basis.

Amenhotep II (1450-1425 B.C.) was renowned as an athlete; his feats rival those of Hercules, if we can believe his modest accounts. One example: as an oarsman with an oar 20 cubits long (10 m. or 33 ft.!) he was the equal of 200 men, rowing six times as far as they could without stopping (cf. Gardiner, *Egypt of the Pharaohs*, p. 198). In the seventh year of his twenty-six-year reign he led an army to the Orontes in Syria. His successor Thutmose IV (1425-1416 B.C.) waged wars in Syria and, probably as protection against the growing Hittite power, married a Mitannian princess.

Amenhotep III (1416-1379 B.C.) was a mighty builder, especially at Thebes, which has been called the zenith of the magnificence of the 18th Dynasty. He built the temple at Luxor as well as the avenue of rams and the pylons at Karnak, and he constructed temples in Sedeinga and Soleb in Nubia. The so-called Colossi of Memnon, figures of himself 21 m. (70 ft.) high, were part of the approach to his funerary temple. The remains of the temple now lie beneath the cultivated fields behind the statues. He also built a lake for Queen Tiy, 3700 by 700 cubits (1880 by 178 m. or 6167 by 583 ft.), believed to be Birket Habu S of the temple at Medinet Habu. He carried on extensive international relations, and correspondence with the Hittites and the Mitanni, as well as with Alashia (Cyprus), has been recovered from Tell el-Amarna. He married Gilukhepa the daughter of the Mitannian king Shuttarna. But though he took the Golden Horus name of "Great of Strength who Smites the Asiatics," he let the influence of Egypt over its Asian holdings deteriorate. In his building projects he dismantled the works of predecessors in order to use their materials for his own.

The Amarna age spans three-quarters of a century, *ca.* 1379-1300 B.C. The son of Amenhotep III and Queen Tiy ascended the throne as Amenhotep IV. At that time the Amon priesthood was strong in Thebes, and the fact that three kings had been given names compounded with "Amen" indicates that the dynasty supported the Amon religion. The worship of the solar deity Re' had existed for a considerable time, and other divine names had been connected with the name Re', much as the name Amon had become Amon-re'. So a monotheism of the solar god was already developing, according to some scholars. Amenhotep is still named *ỉmn-ḥtpw* and portrayed as worshiping Amon in his fifth regnal year, but in the sixth

Some of the sphinxes that once lined the avenue from Luxor to Karnak (W. S. LaSor)

year he broke with the Amon religion and took the name Akhenaten, "serviceable to Aten." He removed his capital from Thebes, the center of Amon worship, to el-Amarna, about halfway between Memphis and Thebes. This location, a plain on the east bank of the Nile about 13 by 5 km. (8 by 3 mi.), was hastily developed into the seat of government. The excavations, begun by Petrie in 1891 and continuing with some interruptions until 1937, show haste in the shoddy workmanship. The new capital was called Akhetaten, "horizon of Aten." Akhenaten introduced the Amarna age in art, of which the principal characteristic is the rejection of the stylized form that had dominated Egyptian art from early dynastic times in favor of an informal realism. One of the best-known products of his time is the beautiful head of his queen, Neferneferuaten-Nefertiti, now in West Berlin. His "Hymn to Aten" (*ANET*, pp. 369-371) has often been compared to Ps. 104.

The AMARNA TABLETS, discovered in 1887, are addressed to two (or three) Egyptian kings (among other addressees): to Nibmuaria or Nimmuria, which probably approximates the pronunciation of the prenomen of Nebma'reʿ Amenhotep III; and to Napḫururia or Napḫururia or Napḫuriria, i.e., Neferheprureʿ Amenhotep IV (Akhenaten). In Am.Tab. 28 and 29, Tushratta king of Mitanni makes reference to "Taduḫepa my daughter your wife,' which has led some scholars to conclude that Amenhotep IV had taken over the marriage-alliance wife of his father.

The daughter of Akhenaten married Smenkhkareʿ, and he succeeded Akhenaten on the throne. He appears to have been the first to reject the Aten heresy. After three years he was succeeded by Tutankhaten, who must have been about ten years of age at the time. Whether one so young could have managed the restoration of Amon worship and of Amon monuments at Thebes unless he was being manipulated by the Amon priesthood is debatable. He did not abandon Tell el-Amarna, but he did change his name to Tutankhamen, and was buried, as had been all the kings of the dynasty before Akhenaten, at the Valley of the Kings. His tomb, discovered by H. Carter in 1922, yielded fabulous wealth, although he reigned only eight years and was about eighteen when he was embalmed for mummification.

Prior to the 19th and 20th Dynasties (*ca.* 1320-1085 B.C.), Ay reigned for five years, and then Haremhab took control. The connection of Ay with the preceding dynasty is not clear. Haremhab was a soldier with no recorded genealogy, hence in all likelihood a commoner. The Amarna Letters show that there was considerable turmoil in the Syro-Palestine areas once controlled by Egypt, and

Head of Nefertiti, queen of Amenhotep IV (Staatliche Museen Preussischer Kulturbesitz, Egyptian Museum, Berlin [West]; picture W. S. LaSor)

the Amarna revolution had not added to Egyptian stability, much less taken care of the Palestine situation. The time called for a strong man, and Haremhab seems to have filled the need. In addition to his military deeds, he also found time for building. The magnificent Hypostyle Hall at Karnak was planned and begun by him, and some attribute to him also the avenue of the ram-headed sphinxes. Perhaps his most valuable contribution to Egyptian history, however, was the appointing of a certain Peraʿmesse to the office of vizier. Peraʿmesse dropped the definite article (*p-*) and called himself Ramses (Raʿmesse) when he ascended the throne after Haremhab had reigned for about thirty years. Ramses I was then an old man, and he instituted the 19th Dynasty with a reign of but a little more than a year.

EGYPT

Hypostyle Hall at Abydos, completed by Ramses II (Oriental Institute, University of Chicago)

Seti I (*ca.* 1317-1304 B.C.) was a strong king who was fated to stand in the shadow of his son. In his first year he invaded Palestine and Syria, and restored a measure of Egyptian control. Two inscriptions of his have been found at Beisan (Beth-shean) in the Jordan Valley S of the Sea of Galilee. He built a magnificent temple at Abydos and continued the building of the Hypostyle Hall at Karnak. During the closing years of his reign his son Ramses II was co-regent.

Ramses II (*ca.* 1304-1227 B.C.) had a long and splendid reign. He waged wars with the Nubians, the Libyans, the Syrians, and the Hittites. In his fourth year he erected a stele at Nahr el-Kelb (Dog River) N of Beirut. In the fifth year he engaged the Hittites at Qadesh, which had been taken by Seti I and retaken by the Hittites. From a comparison of Hittite and Egyptian accounts, it would appear that Ramses barely escaped losing his entire army and his life (cf. J. H. Breasted, *Battle of Kadesh* [1903]). In his twenty-first year he made a treaty with Ḫattusilis of the Hittites and concluded it with a marriage alliance. The treaty is inscribed in hieroglyphs on the walls of the temple of Amon at Karnak and was found at Boghazköy written on clay tablets in Hittite cuneiform (cf. *ANET*, pp. 199-203). One of the greatest builders in history, Ramses II completed the Hypostyle Hall at Karnak, built the Ramesseum, and left colossal statues of himself in many places from Abu Simbel (near the Second Cataract) to Tanis in the eastern Delta. In order to strengthen the Delta frontier he built a capital at Pi-Raʿmesse, probably the biblical Raamses (Ex. 1:11; *see* RAMESES), most likely on the site of the Hyksos Avaris. According to some scholars Avaris was Egyptian Djaʿne, Greek Tanis, Hebrew Zoan, but others on the basis of later excavations would locate Pi-Raʿmesse at Qanṭîr, 17 km. (11 mi.) further south.

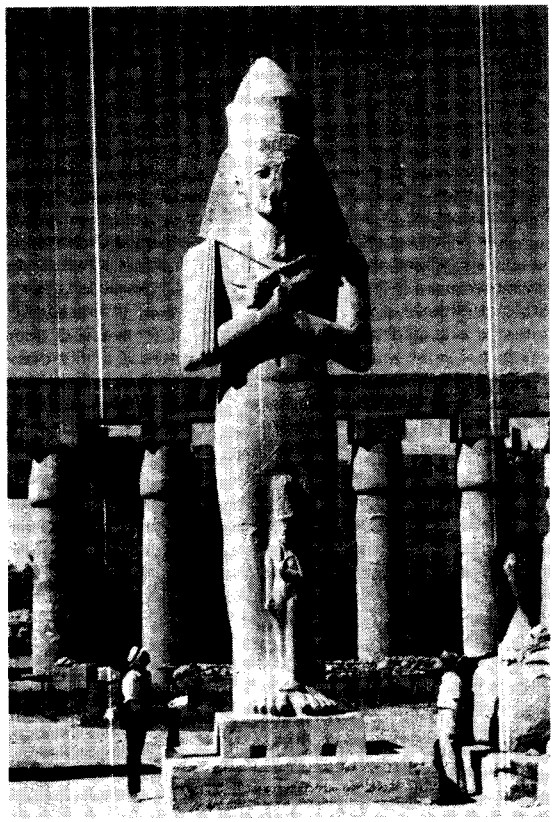
EGYPT



Statue of Ramses II at Karnak (W. S. LaSor)

Ramses II also produced a great progeny. Starting early with the gift of a harem from his father when he was only twelve, he managed to record the names of over one hundred sons and daughters of royal line — which probably does not include those who were commoners.

Ramses II was succeeded by his thirteenth son MERNEPTAH (*ca.* 1227-1217 B.C.), who was probably well advanced in years. The most noteworthy datum from his reign is his stele on which the name Israel occurs for the first time in history. In Merneptah's day the great movement of peoples was taking place which, among other effects, would push the Hittites out of Anatolia and would bring the sea-peoples to Egypt and the coast of Palestine. Merneptah's reign was probably weak, and it was followed by a succession of weak kings. *See* Plate 26.

The 20th Dynasty (*ca.* 1200-1085 B.C.) was inaugurated by Sethnakht, of whom we know little. He appears to have had a short reign (possibly 1200-1198 B.C.) during which he brought some stability to the Delta. His son, who was obviously impressed with Ramses II (but in no way related to him), took parts of the prenomen and nomen of Ramses II for his own names. He is known to history as Ramses III. His successors were all named Ramses (IV to XI), and this is known as the Ramesside era. Ramses III was the only great king of the dynasty. He repulsed an attempt of the sea-peoples to land in the Delta, with the result that many of them landed along the coast of Palestine, including the Pelest (Philistines) and the Tjekker who located at Dor. From the 20th Dynasty we have a great quantity of written material, including the most magnificent of state archives, Papyrus Harris No. 1, which is 41 m. (133 ft.) long by 42 cm. (16½ in.) high and contains 117 columns of hieratic writing. Also from this period comes the delightful story of the journey of Wen-Amon to Phoenicia (*ANET*, pp. 25-29).

H. The Hebrews in Egypt. By any system of reckoning we must place the Israelites in Egypt for some portion of the New Kingdom (Empire) period. The two most widely held theories of the date of the Exodus would place the Exodus either in the time of Thutmose III (specifically 1446 B.C.) or in the time of Ramses II (approximately 1290 B.C.). This is discussed at length elsewhere (*see* EXODUS, DATE OF THE). From our survey of Egyptian geography and history in this article at least two points stand out. (1) The Israelites were almost certainly in the eastern Delta, within a short journey from Yam Suph (translated "Red Sea" but more likely the Bitter Lakes). There is no other part of Egypt that allows, geographically, for the Exodus as it is described, in no little detail, in the book of Exodus. (2) The Egyptian ruler almost certainly was located somewhere near the Hebrews, for only in such a location could the baby Moses have been placed in the reed vessel where Pharaoh's daughter came to bathe, and only in such a location could the man Moses have made frequent journeys to plead his case with the ruler. A Theban dynasty is out of the question, unless it can be demonstrated that the king had a palace in the Delta. The mention of the store-cities of Pithom (Pi-Atom or Pr-Atom) and Raamses (Pr-Ra'messe) in Exodus seems further to limit the time to a period of such building operations.

I. Late Dynastic Period (*ca.* 1085-332 B.C.). The great days of ancient Egypt were now in the past, and a period of decline, not unbroken, had set in. Yet for biblical study this period is of considerable importance, for in it we have the first definite interconnections with the OT.

The 21st Dynasty (*ca.* 1085-945 B.C.) was located at Tanis, while at the same time descendants of Herihor were a priestly ruling caste at Thebes. Records are scanty, but it is clear that internal instability made it impossible for Egypt to control Palestine. About this time, the monarchy in Israel was established by Saul. The 22nd Dynasty (*ca.* 945-730 B.C.) was located at Bubastis, near the entrance to Wâdī Ṭumilât, also in the eastern Delta. Sheshonq (Shoshenq, Shishak of 1 K. 11:40) married into the pharaonic house at Tanis, thus establishing peaceably a Libyan dynasty. He managed to install his son as high priest at Thebes and brought Upper Egypt under control, and then he set about regaining control of Palestine (cf. 1 K. 14:25), erecting a stele at Megiddo (*ANEP*, p. 118 figure 349). Osorkon I sent Zerah, described in 2 Ch. 14:9 as "the Ethiopian," to Israel with a large army. Asa of Judah (910-870 B.C.) defeated him at Mareshah. The following kings of the dynasty were apparently weak, for a rival dynasty, the 23rd (*ca.* 817-730 B.C.), was established at Tanis according to Manetho, but more likely at Thebes in Upper Egypt.

Temple of Ramses III at Medinet Habu (Oriental Institute, University of Chicago)

When David had invaded Edom, Joab "slew every male in Edom," but the royal child Hadad was taken to Egypt for safety (1 K. 11:14-21). Hadad married the sister of Pharaoh, and later became an adversary against Solomon. In an attempt to develop peaceful relations with Egypt, Solomon entered into a marriage alliance with Pharaoh's daughter (1 K. 3:1), and had received "Gezer" (probably to be read Gerar) as a dowry (1 K. 9:16). But it is obvious that Egypt was not a trusted friend of Israel, for when Jeroboam appeared as a potential threat to Solomon's kingdom, he was given asylum in Egypt (1 K. 11:40; 12:2). Osorkon II appears to have had an alliance with the northern kingdom in the days of Omri or Ahab. When Rezin of Syria and Pekah of Israel besieged Ahaz in Jerusalem, the Edomites used the occasion to "recover" Elath for Edom (2 K. 16:5f.). And in the closing days of Israel, Hoshea turned to the Egyptian king So for help (2 K. 17:4), suggesting that an Edomite-Israelite-Egyptian alliance against Judah had continued throughout the period of the divided kingdom.

About 730 B.C., just before the fall of Samaria, two new dynasties appeared in Egypt. The 24th Dynasty, located at Sais in the western Delta, was short-lived (*ca.* 730-715 B.C.). The 25th Dynasty (*ca.* 730-656 B.C.) was foreign (Cushite or Ethiopian), with its capital at Napata near the Fourth Cataract. The Nubians had been a growing threat to Egypt since at least the days of Ramses II, and now the warrior Piankhy, son of the king Kashta, subdued Tafnekht the Saite pharaoh to "protect" Thebes, and returned to Napata. Piankhy was succeeded by his brother Shabaka (Sabacon), who proceeded to bring all Egypt under his rule (*ca.* 715 or 711 B.C.). A new power had arisen in the east, namely, Assyria under Tiglath-pileser III (745-727 B.C.). The Assyrian king had, according to his own claim (*ANET,* p. 284; *ARAB,* I, § 816), set Hoshea over Israel, and the biblical record confirms that Hoshea had been a tributary of Assyria (2 K. 17:3). It is probable that Hoshea's revolt against Assyria occurred soon after Tiglath-pileser died (cf. 2 K. 17:4), hence *ca.* 726 or 725. The identity of "So" has not been established, but obviously he cannot have been Shabaka; one suggestion is Osorkon IV, last king of the 23rd Dynasty, and another (by S. Yeivin) is that the Hebrew *sô'* is a transcription of Egyptian *ṯ3*, "vizier," hence 2 K. 17:4 would read, "to the vizier of the king of Egypt" (*VT,* 2 [1952], 164-68).

Shabaka was succeeded by Shabataka (Shebitku), a son of Piankhy, perhaps about the time that Sennacherib was marching against the coastal cities of Judah (701 B.C.). According to 2 K. 19:9, Tirhakah "king of Ethiopia" set out to engage the Assyrian army, but Tirhakah (Taharqa) did not become king until 689 B.C., according to Apis inscriptions. Several attempts have been made to resolve this problem, including the theory that Sennacherib actually made two attempts on Jerusalem. Scholarly opinion at this writing seems to favor the suggestion that Tirhakah was commander of the forces of his brother Shabataka. Sennacherib reported that Hezekiah king of Judah had appealed to the king of Egypt for help (*ANET,* p. 287; *ARAB,* II, § 240). (On the problem of Sennacherib's campaigns in Palestine, see *BHI* [2nd ed. 1972], 296-308, and references therein.) Tirhakah as king was defeated twice more in battles with Assyria, the first time (671 B.C.) by Esarhaddon, who made a punitive raid into Egypt and besieged Memphis, and the second (666 B.C.) by Ashurbanipal, who succeeded Esarhaddon in 669 B.C. Tiring of Egypt's attitude, Ashurbanipal launched a bitter attack against Ta-net-Amon (Urdamane), who had succeeded Tirhakah, and sacked Thebes in 664 B.C. (cf. Nah. 3:8-10). Neco was installed as governor in Sais. Ta-net-Amon continued to claim the kingship, but ultimately retired to Napata, the last of the Ethiopian dynasty.

Psamtik I (Psammetichus) appears to be the real founder of the 26th Dynasty, located at Sais in the western Delta. As Gardiner observes, "the history of Egypt now becomes increasingly merged into that of the Middle East and of Greece, and our main authorities besides Herodotus are the cuneiform chronicles, the Jewish historian Josephus and the Old Testament" (*Egypt of the Pharaohs,* p. 355). Psamtik reigned fifty-four years, according to an Apis stele, and was succeeded by his son Neco II in 610 B.C. Nineveh had fallen in 612 B.C. and a government-in-exile had been formed by Aššur-uballiṭ at Ḫarran. Neco, for reasons unclear, but possibly because there was a link between his dynasty and the Assyrians, went to the aid of the Assyrians (this seems to be the best translation of the preposition *'al* in 2 K. 23:29). Josiah of Judah attempted to stop the Egyptians and was killed in the battle at Megiddo (609 B.C.). The Egyptians defeated the Babylonians at Quramati, near Carchemish, but in 605 B.C. Nabopolassar mounted a great battle at Carchemish led by his son Nebuchadrezzar. On the death of Nabopolassar that same year, Nebuchadrezzar became king of the young Babylonian empire, and proceeded to conquer all of "Khatti," the name for Syria and Palestine (cf. *ANET,* p. 307; *CCK,* pp. 25,69).

In 601 B.C. Nebuchadrezzar marched against Egypt and was met by Neco, who drove him back. Both armies suffered heavy losses, and Nebuchadrezzar did not again attempt a campaign against Egypt (cf. *CCK,* pp. 29,71). It was possibly this Babylonian setback that caused Jehoiakim to revolt against Babylon and turn to Egypt (2 K. 24:1), in spite of Jeremiah's warning (Jer. 46:14-24).

Psamtik II (595-589 B.C.) succeeded Neco, and was in turn succeeded by Apries (Uaphris, Hophra of Jer. 44:30). When Jerusalem had revolted against Babylonia in 597 B.C., the Egyptian king did not become involved, but Apries followed a different course. Zedekiah of Jerusalem had revolted in 589 B.C., and had turned to Egypt for support (Ezk. 17:15), which Hophra apparently was willing to give (cf. Jer. 37:5). The relief for Jerusalem was only the calm before the storm, for Nebuchadrezzar sacked the city in 586 B.C. Meanwhile Apries turned his attention to Cyrene on the Libyan coast and was soundly defeated. Amasis (Ahmose II, 570-526 B.C.) succeeded him, and was a man of peace (Herodotus called him "Philhellene," ii.178).

Cyrus the Mede defeated the Babylonian empire in 539 B.C., and recognized that Egypt must be brought under control. It was Cambyses, however, who defeated Psamtik III in the Battle of Pelusium (525 B.C.), and who is listed by Manetho as the first of the 27th Dynasty consisting of "eight Persian kings" (525-404 B.C.). After the Greek defeat of the Persians at Marathon, Egypt attempted to revolt, and Xerxes, who had succeeded Darius, put down the revolt and "reduced all Egypt to slavery" (Herodotus vii.7). According to the Persian system of ruling conquered peoples, Egypt was a satrapy, ruled by a local governor. From the Jewish colony at Elephantine we have numerous Aramaic papyri which provide details of local administration. We also know that the temple at Elephantine was destroyed and that the Jews appealed to Bagoas, governor of Judah, for aid in rebuilding it. Herodotus the "father of history" toured Egypt *ca.* 450 B.C.

In 404 B.C. Amyrtaeus of Sais became the sole king of Manetho's 28th Dynasty. The 29th and 30th Dynasties consist of four and three kings, respectively. To Manetho's original thirty dynasties, a thirty-first has been added by a later record preserved in Eusebius's text; it

consisted of three Persian kings, Artaxerxes III Ochus, Arses, and Darius III. Alexander the Great entered Egypt in 332 B.C. and proceeded to Memphis, where he made a sacrifice to Apis and was proclaimed pharaoh. Then he laid out the site of the future city of Alexandria, and went to the oasis at Siwah where he consulted the oracle of Amon. According to some writers, Alexander conceived the idea of his own divinity at this time.

There is little else to add to the history of ancient Egypt. Upon the death of Alexander, Egypt passed to Ptolemy I Soter, son of Lagos and one of the Diadochoi in Alexander's campaigns. He organized Egypt and established the line of rulers each named Ptolemy (I-XVI). Palestine was under the Ptolemies until *ca.* 198 B.C., when it was taken by the Seleucid Antiochus III. The famous (or infamous) Cleopatra had ruled as queen with Ptolemy XIV, and her son from the union with Caesar ruled as Ptolemy XVI Caesarion (45-44 B.C.). When Cleopatra committed suicide in 30 B.C., Egypt came under Roman rule.

IX. Egypt and the Bible.—From this survey it may appear at first glance that Egyptian history, literature, or religion has little of value for the biblical student. If we are looking for close relationships, such as may be found between Ugaritic and the Bible or Assyrian and Babylonian and the Bible, we shall be disappointed. After all, the origins of the patriarchal line were in Mesopotamia, the closest contacts of the Israelites were with the Canaanites, and the exile was in Babylonia. Joseph and his brothers moved to Egypt and the Israelites lived there for a long period of time, but they were isolated from the Egyptians both by geography and by the Egyptian antipathy to foreigners. Nevertheless, a survey of Egypt is valuable to the student of the Bible for several reasons.

For one, Egypt was the custodian of young Israel when it was only a band of seminomadic tribes. If the Israelite people did not learn how to organize as a nation while living in Egypt, it certainly appears that Moses had learned something of the necessary elements of national leadership. Israelite law and historiography seem to be influenced more by Mesopotamia, for these genres are found in the literary remains of Mesopotamia to a greater extent than in Egypt. But the Egyptian contributions of story telling, of wisdom, and perhaps even of medicine, seem to have had some influence on Israel. The skilled workmanship required for building the tabernacle in the wilderness probably had Egyptian roots. It has been pointed out many times that the Joseph cycle (Gen. 37–50) and the book of Exodus show marked familiarity with Egypt and Egyptian customs. Much more can be learned by carefully controlled study of this Egyptian background.

During the days when Israel was just getting settled in the land of the Canaanites, Palestine was to a greater or lesser extent under Egyptian influence. It is true that Palestine was often the scene of battles between nations that came from beyond the northern and southern boundaries, but it is also true that Palestine enjoyed periods of peace and opportunities for development when Egyptian power was strong enough to maintain peace, or when there was a power vacuum in that part of the world. Once again, carefully controlled study of the historical situation, including the part Egypt played, can be of value to the student of the Bible.

Egypt was a place of refuge. Jews fled to Egypt when Assyria and Babylonia were waging war on Judah and Jerusalem. Jewish colonies were founded in Egypt, one at Elephantine, as we know from the Elephantine Aramaic papyri of the 5th cent., and another at Alexandria, as we know from the production of the OT in Greek (the Septuagint). The prophet Jeremiah was taken to Egypt toward the close of his life, and some of his prophecy has close relationship with Egypt. The baby Jesus was taken to Egypt to escape the bloody action of Herod. Perhaps we should look for further implications of these facts.

The study of the religion of Egypt is reserved for the article RELIGIONS OF THE BIBLICAL WORLD: EGYPT. Here only one fact may be mentioned: something approaching a monotheism was in the process of development in Egypt at about the same time that the Israelites were in Egypt. This is not to suggest that Israelite monotheism was fashioned in Egypt, or that Moses got his ideas from Akhenaten. But it is a fact of human nature, as well as of history, that the times influence all of us. In a philosophical age people are more likely to talk and think about philosophical subjects, whereas in a materialistic age, such as the present day, we have time only for materialistic subjects. In the providence of God, the Hebrew people were placed in Egypt for "four hundred years" prior to the revelations of Sinai and the conflicts of the prophets of Yahweh with the Canaanite religious concepts. Was there a divine plan in this? To deny it would seem to be a denial of God's wisdom. To admit it lays a burden on the biblical student to devote more study to the religious ideas as well as the other contributions of Egypt.

EHI ē'hī [Heb. *'ēḥî*] (Gen. 46:21). Apparently a contracted form of AHIRAM.

EHUD ē'hud [Heb. *'ēhûḏ*–'united,' 'strong'].

1. A left-handed Benjaminite, son of Gera, deliverer of Israel from oppression by Moab (Jgs. 3:15-30; 1 Ch. 8:6). Having gained a private interview with King EGLON under pretense of a secret errand connected with the payment of Israel's tribute, Ehud drew the sword he had concealed on his right side and thrust it through the king. After making his escape he gathered the Israelite forces and overcame Moab at the fords of the Jordan, slaying some ten thousand.

2. The son of Bilhan and great-grandson of Benjamin in 1 Ch. 7:10. Some scholars have supposed that the inclusion of a Benjaminite name in a chapter dealing partly with Zebulunite genealogy rests on the erroneous substitution of Benjamin for Zebulun in 1 Ch. 7:6. While some of the descendants of Benjamin appear under different names in genealogical records, there is no evidence that the name "Ehud" was ever restricted to that one tribe.

F. K. FARR
R. K. H.

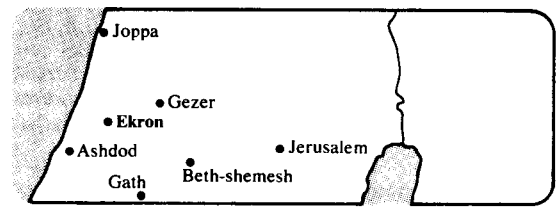
EITHER. Sometimes used in the AV in the now uncommon sense of "or" (Lk. 6:42; 15:8; Phil. 3:12; Jas. 3:12).

EKER ē'kər [Heb. *'ēqer*–'root']. A Jerahmeelite (1 Ch. 2:27).

EKREBEL ek'rə-bel. *See* ACRABA.

EKRON ek'ron; **EKRONITE** ek'rən-īt [Heb. *'eqrôn*–perhaps 'deep-rooted' (cf. Zeph. 2:4); Akk. *Amqarruna*; Gk. *Akkarōn*]. One of the five cities ruled by a Philistine "tyrant" (Josh. 13:3; 1 S. 6:17). The ancient Hebrew name may be preserved by the modern Arabic village name 'Âqir, which means "barren, childless, sterile."

Its territorial boundary marked the northern extension of the coastal area not taken on the Israelites' initial invasion of the land (Josh. 13:3); cf. LXX Jgs. 1:18, "Judah took not . . . Ekron with its territory," a rendering proved by the further statement in v.19b that Judah "could not drive out the inhabitants of the plain, because they had chariots of iron." In the tribal allotments Ekron was assigned to the Danites (Josh. 19:43), but they failed to break out of the hill country (Jgs. 1:34), leaving their coastal territory to be absorbed by Judah (Josh. 15:45f.). Thus, the border of Judah passed along the ridge to the north of Ekron (Josh. 15:11).



As one of the two Philistine cities facing the Judean Shephelah (see below), Ekron played an important role in the conflicts between the two peoples. Ekron was the last place to which the captured ark of the covenant was brought before its return to Israel (1 S. 5:10–6:16); the narrative indicates a certain topographical connection with Beth-shemesh (6:16). Later, led by the prophet Samuel, the Israelites regained control of the towns formerly lost to Ekron (7:14). Finally, the Philistines who retreated from the Vale of Elah ran toward Gath and toward Ekron (17:52).

During the prophet Elijah's ministry the deity of Ekron was known as Baal-zebub, of whom the stricken Ahaziah of Israel sought to inquire concerning his chances of recovery (2 K. 1:2-16). Toward the end of the 8th cent. B.C. the prophet Amos included Ekron in his imprecation against the land of the Philistines (Am. 1:8).

In 712 B.C. Sargon II of Assyria conquered Ekron; previously Ekron may have come under Assyrian domination when Tiglath-pileser III passed through Philistia in his campaign of 734. Furthermore, Sargon II had made invasions in 720 and 716; but Ekron is not specifically mentioned until 712 when it fell to Sargon's troops along with Gath, Gibbethon, and Ashdod.

A few years later Padi king of Ekron remained loyal to the Assyrians even though Sargon had died and his successor Sennacherib faced rebellion throughout the empire. The aristocrats of Ekron, however, had succumbed to the blandishments of Hezekiah king of Judah and chose to revolt against their Assyrian overlords. To succeed they had to depose Padi, handing him over to Hezekiah to be held as a political prisoner in Jerusalem. All of this was part of the combined effort of several Palestinian states to free themselves from Assyrian oppression; but in 701 Sennacherib led his army into Palestine for a showdown. After securing Joppa and the surrounding hinterland, he met the Egyptian forces rushing to aid the conspirators at Ekron. The Assyrians severely defeated the Egyptians

in the plain near Eltekeh, thus opening the way to subdue Ekron. After Eltekeh itself was taken, Sennacherib severed Ekron from its Judean allies by the conquest of Timnah. Ekron was now isolated from both the east and the west, and the expected Egyptian help from the south was crushed. Sennacherib ordered a full-scale assault on the hapless Ekron, and it quickly succumbed. The leading officials and nobility who had fomented the revolt were impaled on stakes outside the city. Common citizens who had supported the rebellion were taken into captivity, but the rest of the population was set free. During the ensuing conflict with Judah, Hezekiah agreed to release Padi, who was restored to his throne in Ekron by Sennacherib. Some of the territories taken from Judah were given to Padi as a reward for his loyalty.

The king of Ekron during the 7th cent. B.C. was a certain Ikausu (or Ikašamsu), whom Esarhaddon called to Nineveh for corvée service with other Levantine rulers (*ANET*, p. 291). When Ashurbanipal (669-633 B.C.) passed through Palestine on his way to Egypt (663 B.C.) the same king paid tribute to the Assyrian monarch (*ANET*, p. 294). During the reign of Josiah, Zephaniah prophesied that Ekron and other peoples of Philistia would be removed from their lands (Zeph. 2:4; cf. Jer. 25:20; Am. 1:8; Zec. 9:5,7). Ekron's actual fate during the Babylonian conquest of Palestine and the subsequent transfer to Persian hands is not known. Not until the Hellenistic age is Ekron again mentioned by historical sources. After Jonathan Maccabeus had demonstrated his military prowess by the defeat of Demetrius (147 B.C.) and the subsequent conquest of Ashdod (Ashkelon came to terms with him), Alexander Balas rewarded him with "Ekron and all its environs [toparchy]" (1 Macc. 10:89; Josephus *Ant.* xiii.4.4).

J. Naveh's 1957 researches confirm that Ekron was located at Khirbet el-Muqenna', a relatively low-standing tell just S of the Wâdī el-Majanne in a sort of depression surrounded by the rolling swells of the Philistine plain. In surface area, however, the fortified city covered about 16 ha. (40 acres), more than any other known Iron Age site. Numerous impressive architectural remains visible on the surface include an apparent gate area defended by a heavy stone glacis (on the southern side). The ceramic evidence ranged from some E.B. sherds through nearly all the Iron Age periods (including Persian material). Philistine ware was much in evidence; the lack of any from the M.B., the L.B., or the E.I. I periods suggests that the great city was founded by the Philistines on the ruins of an abandoned E.B. village. The ample water sources, namely, the springs just N of the tell in the wadi bed, were apparently a strong attraction for the Philistines, who were spreading their influence to the north and west.

A principal evidence for identifying Tell el-Muqenna' with Ekron is the boundary description of Judah (Josh. 15:10f.), which traces the line from Beth-shemesh (Tell er-Rumeileh) to Timnah (Tell Baṭâshī) and then to "the shoulder [ridge] of the hill north of Ekron." The next station on the line was Shikkeron (probably Tell el-Fûl), followed by Mt. Baalah (the el-Mughar hills) and Jabneel. If all these identifications be accepted, especially that of Ekron, then the stations along the border were spaced about 5-6½ km. (3-4 mi.) apart. Furthermore, a very prominent ridge of high ground separating the "basin" of Khirbet el-Muqenna' from the Sorek Valley and Tell el-Baṭâshī appears from the north as the most likely feature that could be described as "the shoulder north of Ekron."

The Philistines' flight toward Gath and Ekron from their defeat in the Vale of Elah favors the Tell el-Muqenna' identification. When the retreating Philistines debouched from the narrow defile created by the Wâdī 'Ajjûr as it passes between Khirbet 'Arabā and Khirbet esh-Shāh, they had only to cross over the high ground by Mughallis and follow a branch of the Wâdī Majanne directly to Khirbet el-Muqenna'. In addition, Sennacherib's campaign (see above) is better explained by locating Ekron between Tell el-Baṭâshī on the east and Eltekeh further to the west.

Assyrian guard with Israelite captives being deported from Ekron. Relief from Nineveh, 7th cent. B.C. (Louvre; picture W. S. LaSor)

Though remains of Jonathan's Hellenistic estate have not yet been found in the vicinity of Khirbet el-Muqenna', the district of Ekron (called a toparchy by Josephus) was evidently taken from Ashdod (the regional capital since Persian, even Assyrian times), and the territory of Ashdod had been adjacent to that of Gezer (1 Macc. 14:34). Beyer therefore argued that the toparchy of Ekron must have been located between those of Ashdod and Gezer. Khirbet el-Muqenna' meets this requirement admirably.

Citizens of Ekron, called Ekronite(s) (Heb. *'eqrônî[m]*; Gk. *'Akkarōneítēs*), are mentioned in Josh. 13:3 and 1 S. 5:10.

EL SHADDAI el shad'ī. *See* GOD, NAMES OF II.B.1.

ELA ē'lə [Heb. *'ēlā'*; Gk. *Ēla*].

1. Father of Shimei (1 K. 4:18; AV, NEB, "Elah").
2. (AV, NEB, 1 Esd. 9:27). The same as Elam in Ezr. 10:26.

ELADAH el'ə-də. *See* ELEADAH.

ELAH ē'lə [Heb. *'ēlâ*–'oak' or 'terebinth'].

1. A chief (head of a clan) of Edom (Gen. 36:41; 1 Ch. 1:52).
2. (AV, NEB, 1 K. 4:18). *See* ELA 1.
3. A son of Caleb the son of Jephunneh (1 Ch. 4:15).

4. Father of Hoshea, the last king of Israel (2 K. 15:30; 17:1; 18:1, 9).

5. A Benjaminite, son of Uzzi, one of the chiefs of the tribes when the country was settled (1 Ch. 9:8).

6. Son of BAASHA, fourth king of Israel (1 K. 16:6-14). He reigned two years, 886-885 B.C. The statement that he came to the throne in the twenty-sixth year of Asa, reigned two years, and died in the twenty-seventh year of Asa, illustrates the Hebrew method of synchronizing the reigns of the kings of Israel and Judah (cf. 1 K. 15:33; 16:8). Elah appears to have been a debauchee. While he was drinking himself drunk in the house of Azra, his servant Zimri, one of his military leaders, conspired against him and murdered him. According to Josephus (*Ant.* viii.12.4) Zimri took advantage of the absence of the army, which was at Gibbethon, to kill Elah. The extirpation of the royal family followed the murder of the king. Baasha's dynasty had its origin in a murder and it ended in a murder.

S. K. MOSIMAN

ELAH, VALLEY OF [Heb. *ʿēmeq hāʾēlâ*–'valley of the terebinth'; Gk. B *hē koilás Ēla,* A *tēs dryós*]. The scene of the events of 1 S. 17:2ff., referred to also in 1 S. 21:9 (MT 10). The location of this valley is established by reference to the towns in the former passage. Socoh is to be identified with the large Khirbet ʿAbād, an Iron Age site beside the Byzantine Khirbet esh-Shuweikeh. This ancient ruin stands on the southern edge of Wâdī es-Sanṭ, a valley whose Arabic name apparently means "valley of the acacia." Azekah was the lofty Tell ez-Zakarîyeh, perched atop a prominent ridge of the Shephelah around the foot of which the Wâdī es-Sanṭ is forced to twist northward before continuing its flow westward to the sea.

During the military confrontation described in 1 S. 12 the Philistines encamped upon the southern side of the valley, between Socoh and Azekeh. The significance and possible location of Saul's forces are difficult to ascertain; they must have been ranged along the northern ridge somewhere between the village of Beit Nettif and the slope opposite Azekeh. The contest between David and Goliath evidently took place in the broad valley on the southern side of the creek bed (which clings to the foot of the northern ridge). The Philistine retreat probably took them around the bend below Azekeh and westward along the course of the valley (1 S. 17:52; cf. esp. LXX). This would take them in the direction of Ekron (Khirbet el-Muqenna') and Gath (which strengthens its identification with Tell eṣ-Ṣâfī).

The (dry) brook in the valley of Elah (W. S. LaSor)

ELAM ēʹləm [Heb. *ʿēlām*].

1. A son of Shem (Gen. 10:22; 1 Ch. 1:17); *see* ELAMITES.

2. A Benjaminite (1 Ch. 8:24).

3. A Korahite (1 Ch. 26:3).

4. Heads of families in the return from exile (Ezr. 2:7 par. Neh. 7:12; Ezr. 2:31 par. Neh. 7:34; Ezr. 8:7; 10:2, 26).

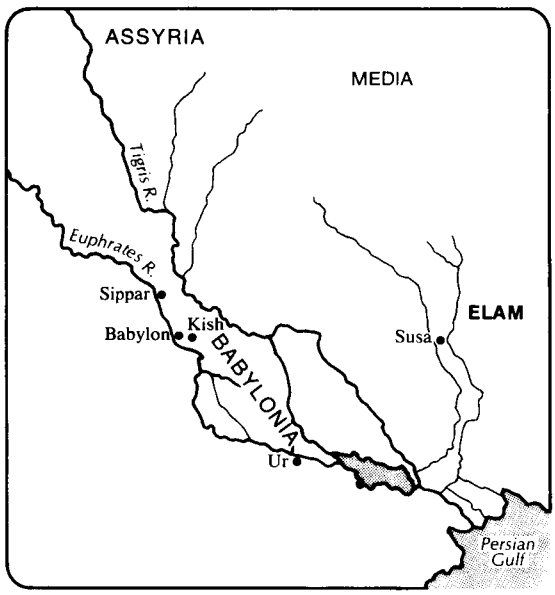
5. A chief of the people (Neh. 10:14).

6. A priest (Neh. 12:42).

ELAM; ELAMITES ēʹlə-mīts [Heb. *ʿēlām*; Gk. *Ailam*]. A land and people E of the lower Tigris.

I. Name
II. The Land
III. History
IV. Writing and Language
V. Art
VI. Religion

I. Name.–The native name *ḫal-tamti* may mean "land of god." It is represented in Akkadian cuneiform texts by the Sumerogram NIM, "high land," and by *elamtu,* a normalized form of the Elamite word. The Hebrew with initial *ayin* may have come by way of Akkadian, where there is slight evidence for pronunciation of an initial guttural, or equally well directed from Elamite.



II. The Land.–Topographical reasons underlie the Sumerian designation "high land," for the country is partly hidden in the southern Zagros Mountains E of the Tigris. The center of Elam is the area known today as the plain of Khuzistan in southwestern Iran. To the north it is bounded by the mountains of Luristan, to the east by the Bakhtiari range; to the south the Ahwaz hills form a slight barrier, and the Pusht-i-Kuh lie to the northwest. Three major rivers, the Karkho, Diz, and Karun water this plain, the last two combining to continue to the Shatt al-Arab. Tracts of land beside the rivers are cultivated, and after the winter rain there is abundant pasture over the whole plain. The ancient capital city SUSA lay beside a branch of the Karkho, the Shaur, in the center of the most fertile area.

Elam extended N and E of the riverine territory into the hills and mountain valleys, making a broken land, hard to unify. The mainstay of Elamite prosperity lay in this mountainous country, for here were the sources of timber and metals which the cities of Babylonia lacked.

Thus Elam was naturally provided with valuable trading materials. Routes ran to each of the cardinal points: westward past the foot of the Pusht-i-Kuh to Babylon, either following the marshy Tigris or the frontier as far as Der (modern Badrah) then across to Babylon; northward up the Karkho toward the modern towns of Horramabad or Kermanshah on the Iranian plateau; eastward along the course of the Karun ascending the Bakhtiari Mountains into the plateau near Isfahan; southward to the Persian Gulf for sea voyages.

III. History.–It is apparent from the geography that Elam is really a part of lower Mesopotamia (whence, perhaps, its representation as a son of Shem in Gen. 10:22). The two districts have been very closely related since prehistoric times, and the story of Elam is one of incessant struggle between the two areas. Two major excavations supply most of our information, those at Susa (ancient Shushan) and at Choga Zambil (Dur-Untash). At an early period ideas flowed from Elam into Iraq (Susa A: Ubaid, *ca.* 4000 B.C.), whereas subsequently strong Mesopotamian influences are traceable in Elam, the most important being the concept of writing (see IV below). During the earliest historic periods Elamite culture shows indigenous development, but to this time (Susa D: Early Dynastic I) refer the earliest international incidents mentioned in later epics such as the story of "Enmerkar and the Lord of Aratta." A Sumerian notice records a raid by a king of Kish into Elam *ca.* 2700 B.C., and a similar achievement is accredited to Gilgamesh slightly later.

After this time a dynasty arose in the city of Awan, a site as yet unidentified, situated E of Susa and near Shushtar. A raid into Iraq destroyed the current Sumerian dynasty at Ur and established Elamite independence until Sargon of Agade marched through the land *ca.* 2325 B.C. Sargon's descendant Naram-Sin made a suzerainty treaty with his Elamite vassal, which survives as one of the oldest examples of the covenant formulations found throughout the ancient Near East (*see* COVENANT II). It is written in Elamite and invokes Elamite deities, which may indicate that there were separate versions: in his native Akkadian for the overlord Naram-Sin, and in Elamite for the vassal.

The last monarch of the Awan dynasty, Kutik-In-šušinak, had been viceroy of Susa at first and left some inscriptions there. Incursions by mountain tribes cut short the might of this dynasty. For a century Elam was subject to the Sumerian city of Lagash to some degree, and thereafter to the 3rd Dynasty of Ur (*ca.* 2110-2005 B.C.). However, a local dynasty continued in Simash, possibly modern Horram-abad, eventually leading a coalition that conquered Ur and inaugurated a period of intercity rivalry in Babylonia. One family that gained power in the city of Larsa certainly owed something to Elamite favor, but of events within Elam little is known beyond names of kings. The attack on the cities in the Dead Sea plain recorded in Gen. 14 is probably to be dated in this era. The name of the Elamite king, CHEDORLAOMER, has a plausible form (Elamite Kutir-Lagamar), but no trace of him has been discovered.

Elam shared in the general round of intrigues and alliances of the Babylonian states, and was presently contained by the power of Hammurabi of Babylon. Although Kutir-Naḫḫunte I raided Babylon, *ca.* 1725 B.C., Hammurabi's successors seem to have held some dominion over Elam until their dynasty was ended *ca.* 1595 B.C. The darkness that hangs over the following centuries of Babylonian history is shared by Elam. Kassites and Hurrians from the North are attested among the citizens of Susa, and may have predominated in some areas. The country was no longer a single state, but a number of independent counties. One major event is recorded near the end of the dark age, an invasion by the Kassite king of Babylon, Kurigalzu II, *ca.* 1330 B.C.

At about that time a new native dynasty was gaining strength E of Susa and expanded to control most of Elam early in the 13th cent. B.C. Under Ḫumban-numena (*ca.* 1285-1266 B.C.) there was again a single realm of Elam. His son Untaš-^{d}GAL (the second element is a Sumerian writing "great god," variously rendered by the god's name Ḫumban or the epithet *napiriša*) built many temples and founded a new shrine and city called Dur-Untaš, "fortress of Untaš," after himself. In addition, Untaš-^{d}GAL took advantage of the waning Kassite power to raid the Babylonian territory E of the Tigris. However, this and Elamite land were soon lost to the newly powerful Assyria, which under Tukulti-Ninurta I (*ca.* 1244-1208 B.C.) installed a subject king in Babylon. The weakness of Babylon provided opportunity for the Elamite Kidin-Ḫutran (*ca.* 1244-1222 B.C.) to make two raids across the country, dethroning the Assyrian puppet on the first. Tukulti-Ninurta's strength was the greater, however; the Elamite disappeared, perhaps in a revolt, and with him his dynasty.

A further half-century of darkness gives way to the rise of another dynasty, probably centered at Susa, which raised Elam to its zenith for a few decades. Assyria had declined, and Babylonia too, after a brief resurgence. Thus Šutruk-Naḫḫunte, first of the new line, was able to establish an enlarged Elam, reaching S to Bushire, and then to invade Babylonia. He took a heavy tribute, including such famous monuments as the Law Code stele of Hammurabi, and set his son Kutir-Naḫḫunte on the throne of Babylon (*ca.* 1160 B.C.). The son faced the Babylonians after his father's death and defeated them in a three-year struggle, bringing the Kassite dynasty to an end and deporting many people and their gods. Another son of Šutruk-Naḫḫunte succeeded *ca.* 1150 B.C., Šilhak-In-šušinak. His various expeditions in eastern Iraq are recorded in detail, with long lists of the places conquered, stretching as far N as the regions of Kirkuk and Kirmanshah, although Babylon proper was gradually lost to Elamite sway. Unruly hill people in the mountains were also quelled. Šilhak-In-šušinak died *ca.* 1120 B.C., leaving a large empire to his successor (whether son or nephew is uncertain, for the second son of Šutruk-Naḫḫunte had married his brother's widow, who was probably their sister, according to Elamite royal custom). The new king was unable to keep up the might of his fathers. Babylonia and Assyria were rising again, and the king of Babylon was determined to recapture the cult-statue of his patron god from Susa. His first attack was unsuccessful; in the second his army was aided by various troops from Elam's borders and sacked Susa. With this disaster Elam entered a long period of obscurity (*ca.* 1110 B.C.).

An Assyrian inscription referring to events in 821 B.C. tells of the submission of an Elamite ruler, the first historical notice of that state since the sack of Susa. In the intervening years Elam had suffered pressure from Indo-Aryan invaders in the east and north. The MEDES gradually settled N of Elam, the Persians to the southeast, around Pasargadae and Persepolis. In the mountains enclosing the Elamite plain were the nameless tribes whose metalwork survives as the Luristan bronzes.

Elam enjoyed one more period of importance in world history within the decades following the battle of Der in 720 B.C., when Elamite troops, allied with the Babylonian king Merodach-baladan II, prevented the forces of Sargon II of Assyria from marching southward. Aid to Babylonia against Assyrian attempts at subjugation absorbed much of Elam's strength and eventually ruined the country.

Ḫumban-nikaš I (*ca.* 742-717 B.C.), whose army fought

at Der, was succeeded by his nephew Šutruk-Naḫḫunte II. In 710 B.C. Sargon made a show of force in western Elam causing the king to flee to the mountains, then marched into Babylonia. The Assyrian threat was effective; Merodach-baladan attempted to gain Elamite assistance with costly presents; they were accepted, but he was not granted asylum on Elamite soil. When he again seized the throne of Babylon (703 B.C.) his gifts persuaded Šutruk-Naḫḫunte to send a large force to his aid, including eighty thousand archers (cf. Isa. 22:6; Jer. 49:35). This was insufficient to contain the Assyrian might, despite a fierce battle, so the Elamites withdrew. Assyria reannexed two territories on the northwest border of Elam. In 700 B.C. Merodach-baladan received further support from Elam as the Assyrians advanced into southern Babylonia; but he could not withstand them, and fled to the Elamite coast where he died.

At this time (*ca.* 699 B.C.) Šutruk-Naḫḫunte was removed from the throne by his brother Ḫallutuš-In-šušinak, who ruled until 693 B.C. The policy of aiding Babylonian nationalists was continued, and refuge and help were given to the members of the royal family in the marshes about the head of the Persian Gulf. Sennacherib took his forces to crush this center of disaffection in 694 B.C.; and as soon as the Assyrians had passed to the south the Elamite king struck out, raiding Sippar and capturing Sennacherib's son, the Assyrian king of Babylon. A Babylonian noble was set on the throne in his place, but the Elamites were defeated by the returning Assyrian army and their protégé removed. Ḫallutuš-In-šušinak was deposed in 693 B.C.

Kudur-Naḫḫunte, who next took the throne, ruled for ten months only, bearing the defeat of the Assyrian return attack and losing more territory. A rebellion made Ḫumban-numena king, without changing the political orientation. Anti-Assyrian movements in Babylonia found more Elamite support, culminating in the indecisive battle at Ḫalule E of the Tigris. According to the Babylonian Chronicle the Elamite king was in command. However, he could not take up any advantage, for he suffered a stroke and died after a ten-month illness (688 B.C.).

The reign of Ḫumba-Ḫaldaš I (688-681 B.C.) was uneventful; a second Ḫumban-Ḫaldaš ruled until 674 B.C. He favored Assyria at first, executing Babylonian rebels who had fled to Elam; but while the Assyrians were campaigning in Egypt he made a raid across the Tigris and massacred men of Sippar (*ca.* 675 B.C.). His brother and successor is known solely from Assyrian texts which name him Urtaki. Early in his reign fear of reprisal, or an actual Assyrian threat, caused the return from Elam of certain divine images taken there as booty. On the other side, Assyria contributed to famine–relief measures in the borderlands. The Elamite broke the entente by raiding Babylonia in 665 B.C. while the main Assyrian army was again in Egypt. Local forces repulsed the Elamites; Urtaki was assassinated, and his son took refuge in Assyria (664 B.C.).

The next king, Tept-Ḫumban-In-šušinak (Assyr. Te-Umman), figures prominently in the sculptures and annals of Ashurbanipal. His early years were spent in enlarging Elam's domains to the north and southeast, perhaps exacting tribute even from the Persian tribes. Attempts to extradite Elamites who found asylum in Assyria provoked war. The Elamites were defeated by the Assyrians at the Ulai River, where they were defending Susa. The main cities were occupied by Assyrian armies; Te-Umman was decapitated, to Ashurbanipal's great satisfaction; and his domain was given to that son of Urtaki who had found refuge in Assyria, Ḫumban-nikaš (653 B.C.). A brother, Tammaritu, was made king in the southern province of Ḫidalu. Ḫumban-nikaš shifted his loyalties, aiding Šamaš-šum-ukīn of Babylon in his revolt. But his cousin, another Tammaritu, supplanted him (651 B.C.); this Tammaritu continued his policy, only to be deposed by a general, Indabigaš, after which he fled to Assyria (649 B.C.). Indabigaš adopted a more conciliatory attitude to Assyria.

In Susa ruled Atta-Ḫamiti-In-šušinak (Assyr. Attametu), who left an inscription recording his rule over the south-

Elamite archers of the Persian army. Relief from Susa (5th cent. B.C.) (Louvre)

eastern region. When he died in 648 B.C. his son Ḫumban-Ḫaldaš III (Assyr. Ummanaldasi) became the last Elamite king and dethroned Indabigaš. This monarch realized that a major cause of Assyrian hostility was the shelter Elam afforded to Nabû-bēl-šumāti, a rebel Babylonian descended from Merodach-baladan II. His attempt to deliver the Babylonian to Assyria was thwarted by his officers, precipitating an Assyrian campaign which drove Ḫumban-Ḫaldaš from Susa and reinstated Tammaritu, *ca.* 647 B.C. The latter rebelled but was forced to take refuge in Assyria once more.

A final campaign in the next year accomplished Ashurbanipal's desire: Elam was devastated and Susa despoiled, and the situation became so inimical that Nabû-bēl-šumati killed himself. Ḫumban-Ḫaldaš ruled his ravaged realm for a little longer until he lost his throne during a revolt and also fled to Assyria, *ca.* 644 B.C.

Thereafter little is known of Elam's history; it passed into the Persian empire as the third satrapy and attempted unsuccessfully to break away under another Atta-Ḫamiti-In-šušinak at the accession of Darius I. In the Hellenistic period Elymais existed as a small state under the Parthians and retained some national characteristics long after. It is profitable to compare the vicissitudes of Elamite history with those of two other minor states, Israel and Judah, in their similar contexts.

IV. Writing and Language.–Clay tablets from Susa and from Sialk (by Kashan) show that a local pictographic script ("proto-Elamite") was widely used *ca.* 2900 B.C., stimulated by the invention of writing in Sumer shortly before. Judging by the recognizable signs, these texts are accounts of livestock. The signs developed into a linear script with a very much reduced syllabary of about seventy characters, attested in a few inscriptions of Kutik-In-šušinak *ca.* 2250 B.C. The ensuing Akkadian domination brought the Akkadian script into official use, and a local form of this remained the vehicle for Elamite texts until the end of Elam, even though it was basically unsuited to the Elamite phonetics.

The Elamite language has no known relation, is agglutinative, and is only partially understood. The treaty imposed by Naram-Sin is the oldest text in Elamite. The resurgence in the 13th cent. B.C. included a revival of its use for royal inscriptions and private contracts, which was maintained into the Achaemenid era. In the mid-2nd millennium B.C. Babylonian was employed for legal contracts and economic documents. The exercise tablets of a scribal school have been found in Susa, based on Babylonian exemplars, including the myth of the bird Zu (cf. *ANET,* pp. 111ff., 515ff.). No native literature has been recovered.

V. Art.–Prehistoric Elam has become famous for its flowing abstract designs and more formal patterns painted on pottery and engraved on cylinder seals. Sumerian influence is very apparent in the early 3rd millennium B.C., yet, as is the case throughout Elamite culture, local characteristics are obvious. Lions loom large, symbolizing, perhaps, the awesome mountain spirits. The impressions of seals on clay tablets, which represent many aspects of daily life, are the chief source of knowledge. Naram-Sin's conquest introduced Akkadian styles, noticeable in rock-reliefs and seals. Hurrian influence appears in the seals of *ca.* 1500 B.C., bringing a rather barbaric touch. From slightly earlier there survive a few remarkable vessels of bitumen carved with naturalistic animals in high relief.

While the few stone sculptures of Šilhak-In-šušinak's period are generally unexciting, several bronze figures are outstanding. Most interest attaches to a model depicting a temple ritual with two squatting priests, offering tables, and sacred trees. Polychrome glazed tiles were introduced as wall plates, the designs depicting mythical creatures.

Elamite copper head of man with curled beard and banded hair from the late 2nd millennium B.C. (Metropolitan Museum of Art, Rogers Fund, Purchase, 1947)

This was the period of the Luristan bronzes, which, although not actually Elamite, have affinities with Elamite art and may owe their technical excellence to Elamite smithery. Detailed comparison of numerous bronzes has led to the distinction of a few as Elamite, mainly plaques and vessels with repoussé decoration.

VI. Religion.–Indirect evidence supplies a good deal of disjointed information about religious beliefs in Elam. A mother-goddess (called Pinikir in Susa, Kiririsha in the southwest) headed the pantheon and was considered wife of the chief god Ḫumban. Naḫḫunte was the son-god. There were many patron city deities, In-šušinak ("lord of Susa," a Sumerian phrase) being well known, and a host of others. A pair of serpents frequently occur in sculptures, probably as fertility emblems; and flowing water had an important place. Temple towers, like the ziggurats of Babylonia, dominated major cities. A feature peculiar to Elam was the tradition of horns in their decoration. Sacred groves were planted on or near the towers.

Lack of source material prevents analysis of any but the official or royal cult; mother-goddess figurines are about the only representatives of "popular" religion.

A. R. MILLARD

ELASA el'ə-sə [Gk. *Alasa*]; AV ELEASA; NEB ALASA. The place where Judas Maccabeus pitched his camp before the battle in which he was overwhelmed by the Syrians and slain in 161 B.C. (1 Macc. 9:5). It probably corresponds to the modern Khirbet el-ʿAshshī between Lower and Upper Beth-horon.

ELASAH el-ə-sə [Heb. *ʾelʿāśâ*–'God has made'].

1. [Gk. Apoc. *Salthes, Saloas*]; AV TALSAS; NEB SALOAS. An Israelite, son of Pashhur the priest, who had a foreign wife (Ezr. 10:22; 1 Esd. 9:22).

2. A son of Shaphan, by whom, with Gemariah, King Zedekiah sent a message to Babylon (Jer. 29:3). The same as ELEASAH **2.**

ELATH ē'lath, ā-lät'; **ELOTH** ē'loth [Heb. *ʾêlaṯ, ʾêlôṯ, ʾēlôṯ*]. A settlement in EDOM, near the present port city of Aqabah, Jordan, on the north shore of the Gulf of Aqabah. It is mentioned with EZION-GEBER in three OT passages (Dt. 2:8; 1 K. 9:26; 2 Ch. 8:17). Most modern scholars believe that the two names are applied to the same town, Elath being a later name of Edomite origin.

Elath lay along the route traveled by the Israelites on their journey from Egypt to Canaan (Dt. 2:8). It presumably came under Israelite rule when David conquered the Edomites (2 S. 8:13f.). During the reign of Jehoram (Joram) of Judah (848-841 B.C.) Edom revolted and regained independence (2 K. 8:20-22; 2 Ch. 21:8-10). Uzziah (Azariah) of Judah (767-740) recaptured Elath and rebuilt it (2 K. 14:22; 2 Ch. 26:1f.). During the reign of Ahaz (*ca.* 735) the king of Edom recovered Elath (2 K. 16:6).

In Roman times Elath was called Aila (Aelath, Aelana), also Berenike. Trajan's highway extended along the old King's Highway (cf. Nu. 20:17, etc.) from Damascus to Aila, where the Tenth Roman Legion was stationed. Four bishops from the Aila Bishopric appear in records of several church councils of the 4th to 6th centuries.

After the Moslem victory *ca.* A.D. 630, John, the Christian ruler of Aila, paid an annual tribute of three hundred gold pieces. The site became known as Aqabah and was an important station on the pilgrimage route to Mecca.

For archeology of the area *see* TELL EL-KHELEIFEH.

E. K. VOGEL

EL-BERITH el-ber'ith [Heb. *ʾēl bᵉrîṯ*; Gk. *Baal diathékēs*] (Jgs. 9:46). A Canaanite deity, known also as BAAL-BERITH, whose temple was at Shechem.

Cross regards the name as a specific epithet of the patriarchal god 'El (*TDOT*, I, 250). He refers to the Hurrian hymn to 'El (*Ugaritica*, V, 510ff.), which speaks of *il brt* and *il dn*. In any event Jgs. 9:46 clearly refers to a pagan deity.

EL-BETHEL el-beth'əl [Heb. *ʾēl bêṯ-ʾēl*] (Gen. 35:7). Probably "God of Bethel" (RSV mg.). Another possibility is that El-bethel is a divine title ("God Bethel") like El Elyon, El Shaddai, El Olam, and El Roi (*see* GOD, NAMES OF II.B.5). This possibility is supported by the use of the term as a title in the Elephantine papyri of the 5th cent. B.C. The MT of Gen. 31:13 reads *hāʾēl bêṯ-ʾēl* ("the God [of] Bethel"; cf. AV, RSV); but this text is probably defective and should read "the God who appeared to you at Bethel" with the LXX and some Targums (cf. NEB). In any case it is clear that Jacob named the altar not after a pagan Canaanite deity but after Yahweh, the God who had appeared to him at BETHEL **(1)** (28:12-22). N. J. O.

ELCIA el-sī'-ə (AV Jth. 8:1). *See* ELKIAH.

ELDAAH el-dā'ə [Heb. *ʾeldāʿâ*]. A son of Midian (Gen. 25:4; 1 Ch. 1:33).

ELDAD el'dad [Heb. *ʾeldāḏ*–'God has loved'(?)]. One of the seventy elders chosen by Moses at the command of Yahweh to share "the burden of the people" (Nu. 11:16-25). Eldad and his companion Medad were not present with the rest at the tent meeting, yet the Spirit rested also upon them and they prophesied in the camp (vv. 26-29).

ELDAD AND MODAD mō'dad, **BOOK OF.** An apocryphal book that was supposed to contain the prophecy of ELDAD and MEDAD (cf. Nu. 11:26-29; RSV "Medad"; LXX "Modad"). The nature of their prophecy is not recorded in the OT account, and thus it naturally became a good subject for the play of the imagination. It furnished the basis for a lost work, which was quoted by Hermas (Vis. 2:3): "The Lord is near to them who return unto Him, as it is written in Eldad and Modad, who prophesied to the people in the wilderness." The Palestine Targums also filled in the subject of the prophecy of Eldad and Modad; as they have it, it related to the coming of Gog and Magog against Israel at the end of the days. One of the Targums has the expression, "The Lord is near to them that are in the hour of tribulation." The authors of the Targums were either dependent upon that work or upon a similar tradition, the former view being the more probable.

Some scholars (e.g., J. B. Lightfoot, *Apostolic Fathers* [1890; repr. 1973], I/2, 80f.) think the lengthy quotation in 1 Clem. 23 and 2 Clem. 11 is from the Book of Eldad and Modad. The work is listed as part of the OT Apocrypha in the Stichometry of Nicephorus (*ca.* A.D. 850?) and consists of four hundred lines, which would make it about twice the length of the Canticles. A. W. FORTUNE

ELDER IN THE OT [Heb. *zāqēn*–'beard'; cf. Akk. *ziqnu*; Ugar. *dqn*; etc.]; AV also ANCIENT. An elderly person; also, an authority, or a person with judicial office. It is commonly accepted that the origin of this latter meaning is to be sought in the ancient patriarchal family institution of the Hebrews. The elder was similar to a sheikh among the Arabian bedouin.

Moses got the command from God to gather the elders of Israel to give to them the message of Yahweh (Ex. 3:16). These elders were probably the heads of certain family groups. Throughout the wanderings in the desert Moses continued his contact with the elders and even gave them delegated authority to judge in certain minor cases (cf. Ex. 18:13-27; Nu. 11:16, 24). The number of these elders is given as seventy; this number was probably not uniform.

Elder as a title continued in use throughout the times of the judges (e.g., Jgs. 8:16) into the kingdom. Saul asked to be honored before the elders (1 S. 15:30); the elders appeared before David in Hebron (2 S. 17:15); elders took part in the temple procession of Solomon (1 K. 8:3). It is obvious from these passages that the elders played a very important role in the election of the king and in advising the king. If the king did not accept their advice, he could anticipate evil consequences, as in the case of Rehoboam (1 K. 12:1ff.).

The elders served as local magistrates in bringing murderers to trial (Dt. 19:12; 21:1ff.; Josh. 20:4), punishing a disobedient son (Dt. 21:19), inflicting penalty for slander (22:15) and for noncompliance with the Levirate marriage law (25:7ff.), enforcing the law (27:1), and conducting the service of expiating an unwitting violation of the law (Lev. 4:13ff.).

From earliest times a judicial body of elders was formed to give judgment on certain cases. They gathered in the gates of the city where their rulings were pronounced. Even parts of Job might be understood in the light of this legal activity, according to L. Koehler.

The term elder thus has various meanings which must be carefully distinguished from each other. The most important are elders with certain governing rights and those with judicial rights.

F. C. FENSHAM

ELDER IN THE NT [Gk. *presbýteros*].

1. The word is used adjectivally to denote seniority (Lk. 15:25; Rom. 9:12).

2. It is used in reference to the Jewish elders of the synagogue, usually associated with the scribes and Pharisees (Mt. 15:2; 16:21; 21:23; 26:3, 47, 57; 27:1, 3, 12, 20, 41; 28:2 and par.; also Lk. 7:3; Acts 4:5, 8, 23; 6:12).

3. It denotes certain persons appointed to hold office in the Christian church, and to exercise spiritual oversight of the flock entrusted to them. From the references in Acts (14:23; 20:17) it may be inferred that the churches generally had elders appointed over them. That "elders" and "bishops" were in apostolic and subapostolic times the same is now almost universally admitted; in all NT references their functions are identical. The most probable explanation of the difference of names is that "elder" refers mainly to the person and "bishop" to the office; the name "elder" emphasizes what he is, while "bishop," i.e., "overseer," emphasizes what the elder or presbyter does. *See* PRESBYTER; BISHOP; CHURCH GOVERNMENT; MINISTRY III.B, C.

A. C. GRANT

ELDEST [Heb. *gāḏôl*–'great'] (Gen. 44:12; 1 S. 17:13f., 28); [*bᵉḵôr*–'firstborn'] (2 K. 3:27; Job 1:13, 18); [Gk. *presbýteros*] (Jn. 8:9). The eldest son in a family took precedence over his brothers while the father lived. When the father died the eldest became the head of the family, inheriting a double portion of the estate. Because the eldest sons were the FIRSTBORN they belonged to God — as did all "first fruits" — and had to be redeemed. The Levites were chosen to serve God as their substitutes.

ELEAD el'ē-ad [Heb. *'el'āḏ*–'God has testified']. An Ephraimite, slain by the men of Gath while he was making a raid (1 Ch. 7:21).

ELEADAH el-e-ā'də [Heb. *'el'āḏâ*–'God has adorned']; AV, NEB, ELADAH. An Ephraimite (1 Ch. 7:20).

ELEALEH e-lə-ā'lə [Heb. *'el'ālēh*–'God has ascended']. A city in Moab, part of the tribal allotment of Reuben, and, along with several other cities, rebuilt by Reuben (Nu. 32:3, 37). The cities that were rebuilt were renamed, but the new names are not given. Later Elealeh is mentioned in the oracles against Moab (Isa. 15:4; 16:9; Jer. 48:34). According to Eusebius (*Onom.* 84.10) it was still a large village in the 4th cent. A.D., located a little more than 1 Rom. mi. (1.5 km.; 0.9 mi.) from Heshbon. It is identified today with the ruins of el-'Al, 3 km. (2 mi.) NNE of Heshbon.

W. S. L. S.

ELEASA el-ə-ā'sə (AV 1 Macc. 9:5). *See* ELASA.

ELEASAH el-ə-ā'sə [Heb. *'el'āśâ*–'God has made']; NEB ELASAH.

1. A descendant of Judah (1 Ch. 2:39f.).

2. A Benjaminite, a descendant of Saul (1 Ch. 8:37; 9:43). The same as ELASAH **2.**

ELEAZAR el-ē-ā'zər [Heb. *'el'āzār*–'God has helped'; Gk. *Eleazar*].

1. The third son of Aaron by Elisheba (Ex. 6:23; Nu. 3:2). He married one of the daughters of Putiel, who bore him Phinehas (Ex. 6:25). With his father and three brothers he was consecrated to the priest's office (Ex. 28:1). After the destruction of Nadab and Abihu, he occupied a more important position, and he and Ithmar "served as priests in the lifetime of Aaron their father" (Lev. 10:6f.; Nu. 3:4; 1 Ch. 24:2ff.). He was given the oversight of the Levites and had charge of the tabernacle and all within it (Nu. 3:32; 4:16). To Eleazar fell the duty of hammering out for an altar covering the censers of Korah and his fellow conspirators who had attempted to seize the priesthood (Nu. 16:37, 39).

On the death of Aaron, Eleazar succeeded him (20:25ff.). He assisted Moses with the census after the plague in the plains of Moab (26:1ff.) and with Moses and the elders heard the petition of the daughters of Zelophehad who wished to receive the inheritance of their father (27:1ff.). After the entrance into Canaan, Eleazar and Joshua gave effect to the decision arrived at by giving the daughters of Zelophehad a share in the land of Manasseh (Josh. 17:4). He was priest and adviser to Joshua, the successor of Moses (Nu. 27:19; 31:12ff.), whom he also assisted in partitioning Canaan among the tribes (Nu. 34:17; Josh. 14:1; 19:51; 21:1). He was buried at Gibeah, the town of Phinehas his son in the hill country of Ephraim (Josh. 24:33).

For some unknown reason the descendants of Ithamar seem to have held the chief position among the priests from Eli until the accession of Solomon, when Abiathar was sent into retirement and Zadok, the descendant of Eleazar, was appointed in his place (1 K. 2:26ff.). Ezra was a descendant of Zadok (Ezr. 7:1ff.); and the high priest's office was in the family of Zadok until the time of the Maccabees.

2. The son of Abinadab, sanctified to keep the ark of Yahweh when it was brought from Beth-shemesh to Kiriath-jearim after being sent back by the Philistines (1 S. 7:1).

3. The son of Dodo, one of David's three mighty men. A famous feat of arms with David at Pas-dammin is recorded (2 S. 23:9f.; 1 Ch. 11:12f.).

4. A Levite, a son of Mahli, a Merarite. It is recorded that he had no sons, but daughters only, who were married to their cousins (1 Ch. 23:21f; 24:28).

5. A priest who accompanied Ezra from Babylon (Ezr. 8:33); the son of Phinehas. **5** may be identical with **7.**

6. A son of Parosh, among those who put away their foreign wives and children in accordance with Ezra's ban (Ezr. 10:25).

7. A priest who took part in the dedication of the wall of Jerusalem (Neh. 12:42).

8. A son of Mattathias and brother of Judas Maccabeus (1 Macc. 2:5; 6:43f.; 2 Macc. 8:23). *See* HASMONEANS; MACCABEES.

9, 10. Two others are mentioned in 1 Macc. 8:17; 2 Macc. 6:18ff.

11. An ancestor of Jesus, three generations before Joseph (Mt. 1:15).

S. F. HUNTER

ELEAZURUS el'ē-ə-zoo'rəs (AV 1 Esd. 9:24). *See* ELIASHIB **4.**

ELECT [Heb. *bāḥîr*; Gk. *eklektós*]; AV also ELECTION (Rom. 11:7); NEB CHOSEN, CHOSEN ONES, CHOSEN PEOPLE. The basic meaning is that of a people or persons "selected" or "chosen" by divine action. A secondary, though infrequent, meaning is "choice" or "precious." The biblical references to "the elect" are of four main types: (1) in the OT, Israel, (2) in the NT, heirs of salvation, (3) Jesus Christ as the Messiah, and (4) the good angels (only 1 Tim. 5:21).

(1) The OT covenant people, Israel, descendants of Abraham and Jacob, are God's "elect" (RSV "chosen," Isa. 45:4; 65:9, 15, 22). This choice of Israel from among all the nations is also expressed in other ways (Dt. 4:37; 7:6f.; 1 K. 3:8; Isa. 44:1f.; Am. 3:2). The election of Israel stems from God's sovereign choice, expresses His love, and has for its purpose the redemptive history culminating in Jesus Christ. The elect nation Israel is made to be God's people and is given covenantal privilege and blessing. While God's electing purpose for Israel is salvation, not all members of the nation are so elect. Within the election of the nation God exercises an individual election by which He distinguishes Isaac and Ishmael, Jacob and Esau (cf. Rom. 9:1-13). The LXX displays a fondness for *eklektós* so that the term becomes "a single catchword for a whole series of terms in the OT" (*TDNT*, IV, 179).

(2) In the NT the term likewise has a pregnant meaning. The most frequent reference to "the elect" relates to the "spiritual Israel" who are the heirs of salvation. The elect are those whom God has chosen (Mk. 13:20); they are now both Jews and Gentiles who come to believe in Jesus Christ and are gathered worldwide (Mk. 13:27; Mt. 24:31). As God had promised Abraham, the gospel is now preached to all nations. Yet, while many are called, "few are chosen" (Mt. 22:14). In Rom. 8:33 Paul uses the term "God's elect" as an emphatic summary of 8:14ff. The elect are those whom God "foreknew . . . predestined . . . called . . . justified . . . also glorified" (Rom. 8:29f.). The salvation of the elect has an origin before time, is realized in history, and culminates in eternal glorification. Hence there is no accusation nor condemnation of the elect (8:1, 33) and nothing can separate them from the love of God (vv. 35-39). The elect are to be "conformed to the image" of the Son (v. 29); they were chosen in Christ to be "holy and blameless before him" (Eph. 1:4). Thus the elect are exhorted to responsible Christian living (Col. 3:12ff.; Tit. 1:1-3), and they have an evangelistic task in the world (1 Pet. 2:9). Yet their preservation, also in the difficult last days, and their final glorification is God's gracious work in them (Mk. 13:19-17; Mt. 24:21-31; Lk. 18:7).

Although most NT references are to "the elect" in a general or comprehensive way, individuals are meant and some are even mentioned by name (cf. Rom. 9:6-13; cf. 1 Pet. 5:13; 2 Jn. 1, 13; *see* ELECT LADY). This does not mean individualism. The chosen "exiles of the Dispersion" addressed by Peter are designated "a chosen race, a royal priesthood, a holy nation, God's own people" (1 Pet. 1:1; 2:9). The elect in Christ comprise an organic unity that comes to partial manifestation in the Church and will be perfectly realized upon the Son's return when His angels will gather together all the elect (Mk. 13:27; Mt. 24:31).

(3) Jesus as the Messiah is also referred to as "the elect" or "chosen one." At the transfiguration the voice of the Father from heaven speaks of "my Son, my Chosen" (*eklelegménos*, Lk. 9:35); however, Mark and Matthew refer only to "my beloved Son" (Mk. 9:7; Mt. 17:5). And again in Luke at Jesus' crucifixion the rulers sneer at "his Chosen One" (Lk. 23:35), while Mark and Matthew refer the scoff to "the King of Israel" (Mk. 15:32; Mt. 27:42). (An alternate reading for Jn. 1:34 refers to Jesus as *eklektós*.) These references to the Messiah as the "Chosen One" reflect Isa. 42:1 in the LXX. Similar references are found in the Book of Enoch (40:5; 45:3ff.), which might indicate that this was a more common messianic designation in Jesus' day. Peter, quoting Isa. 28:16, refers to Jesus Christ as the living stone and as the cornerstone "chosen and precious" (1 Pet. 2:4, 6; cf. Mt. 12:18). Reference to Jesus as "the elect" thus refers to His unique and distinctive messianic office. In this term is an expression of the Father's peculiar delight in His beloved Son. Furthermore, everything that "the elect" heirs of salvation receive, they receive in and from Jesus Christ, "the Chosen One."

(4) Only once does the term "the elect" refer to the angels (1 Tim. 5:21). (Cf. other references to the angels such as 1 Cor. 6:3; 2 Pet. 2:4; Jude 6.)

Bibliography.—*TDNT*, IV, 181-192 (Schrenk); *TDOT*, II, *s.v.* "bāchar."

F. H. KLOOSTER

ELECT LADY [Gk. *eklektḗ kyría*]; NEB LADY CHOSEN BY GOD. This phrase in 2 Jn. 1 designates the addressee of the brief epistle. Much discussion has been devoted to the attempt to determine its precise meaning. Four translations are possible grammatically: (1) to the elect lady; (2) to an elect lady; (3) to the elect Kyria; (4) to the lady Electa. All interpretations come down to two main types: (1) the phrase is to be taken literally and refers to a particular person; or (2) the phrase is to be taken figuratively and refers to a particular church or congregation. The first two translations are open to either of these interpretations; the last two allow only for the interpretation of a particular individual. Good arguments are adduced in favor of each of the two main interpretations and responsible exegetes have taken opposite sides throughout Christian history. No particular theological bias is evident in the choices made. At present no convincing evidence exists to decide the issue clearly, and interpreters express their preference in the light of the arguments judged most convincing.

(1) The literal interpretation referring to a particular person. Many who favor this interpretation regard the identity of the lady addressed as unknown. Others have made conjectures about her name or identity. Clement of Alexandria took the first of the two words as her name and held that the epistle was addressed to "the lady Electa." This position hardly seems tenable since her sister mentioned in v. 13 would then have the same name. J. R. Harris also favored this view, and, on the basis of papyrus evidence that *kýrios* and *kyría* were used in ancient letters to express intimacy, rendered the phrase "my dear Electa." He thought she was a gentile proselyte of the tribe of Ruth and also a widow. This ingenious suggestion has gained little support.

Athanasius as well as later interpreters favored the translation "to the elect Kyria," thinking her name was *Kyria*, the Greek word for "lady." The name of Mary, the mother of Jesus, has been suggested with an appeal to Jn.19:27, but this conjecture is untenable. Martha of Bethany has also been suggested, since Gk. *kyría* means "mistress" and corresponds to Aram. *mārᵉṯā'* (Martha) and Lat. *Dom(i)na*.

All these suggestions concerning the name of the addressee are conjectural; if the phrase refers to a distinct individual, her name and identity remain unknown. Yet the literal interpretation is the simplest and most natural, and taken as a personal letter 2 John parallels 3 John.

(2) The figurative interpretation referring to a particular church or congregation. Clement and Jerome favored this interpretation and it is widely held by recent interpreters. Arguments are drawn from the general character of the Epistle: the subject with which it deals concerns a community rather than an individual or a family; the language of the first three verses fits a community more readily than an individual; the interchange of the singular and plural throughout the Epistle is easier to account for if the addressee is a church; the reference to a new commandment in v. 5 suggests a church rather than an individual; the message of vv. 6, 8, 10, 12 relates better to church members than to children in a family; the saluta-

tion of v. 13 is more understandable if it comes from a church rather than the lady's sister. Appeal is also made to the possible parallel in 1 Pet. 5:13, which personifies a church in feminine terms as Scripture does elsewhere (cf. also Bar. 4f.). If the figurative interpretation of "the elect lady" is favored, the specific identity of the church addressed is not known and depends, in part, on the identity of "the elder" in v. 1.

See J. R. Harris, *Expos.* 3 (6th ser., 1901), 194-203.

F. H. KLOOSTER

ELECTION [Heb. *bāḥar*–'choose'; Gk. *eklogḗ*–'chosen']. In both the OT and NT, a divine choosing of man, individually or corporately, either to salvation and eternal life, or to a special office or work. The term "the elect" in both Testaments applies mainly to God's elect people, chosen unto eternal life (2 S. 21:6; 1 Ch. 16:13; Ps. 105:6, 43; 106:5, 23; Isa. 42:1; 43:20; Mt. 24:22, 24, 31; Rom. 8:33; Col. 3:12; 1 Pet. 1:2, etc.). *See* ELECT.

When man first sinned his fellowship with God suffered a disastrous breach, for man declared his independence of his Creator (Gen. 3; Rom. 1:21ff.). Yet at the same time God in His grace introduced immediately into history (Gen. 3:15f.) the revelation of redemption, so that from the beginning one finds redeemed men who walked in faith and obedience to God (He. 11:4-7). Thus from Gen. 4 on there is a people of God who live in righteousness and truth. Yet, while such is the case, no direct reference appears in the early chapters of Genesis to the idea of election.

The first clear statement of election is in connection with Abraham, although the account of God's call to him to go into Canaan (Gen. 12:1) does not specifically state this. One finds such an explanation given later in Israel's history (Neh. 9:7; cf. Dt. 7:6ff.). Within two generations of Abraham, however, the idea of election had become clear, for it is stated that God chose Jacob rather than Esau (Gen. 25:24ff.; cf. Mal. 1:2ff.; Rom. 9:13f.). In all the cases of specific divine election and calling during the patriarchal age, one finds that God took action in order to bring His elect into a covenant relation with Himself. Thus neither at this point nor later may one separate election from God's covenant grace. On His own initiative He made His covenant, which applied not merely to elect individuals but also to their descendants, circumcision being the covenant sign and seal (Gen. 17:9ff.; Ex. 12:44ff.; Josh. 5:2ff.).

By virtue of God's election of the fathers, Israel became God's elect nation (Dt. 4:37; 7:6f., 10:15; 14:2), and for this reason God, after He had delivered them from Egypt (Ex. 19:3ff.), entered into a covenant relation with the people as a whole at Mt. Sinai. By this covenant Israel became a nation separated from all others that it might act as the repository of God's revelation for the rest of mankind (Rom. 9:5). Thus, although Israel experienced God's special favor, at the same time it had a special worldwide obligation.

Yet the election of Israel did not mean that every Israelite trusted in God's promises and faithfully served Him. Throughout the history of Israel one sees that the nation varied greatly in its obedience to its covenant Lord. Only too frequently Israelites believed that because they had descended physically from Abraham, Isaac, and Jacob, God's covenant remained inalienable despite their unbelief and their disobedience. As long as they fulfilled the ritual requirements of the law most Israelites felt they would remain secure in God's favor. Against this assumption Moses warned them, as did the prophets, both early and late, in no uncertain terms (Dt. 28:15ff.; 1 K. 21:21; Isa. 1:10ff.; Hos. 1:1ff.; Rom. 10:19ff.). Yet the nation as a whole refused to hear, and eventually God carried them off into captivity. In this way He showed that the external election of a group or of a nation to political and ecclesiastical favor did not necessarily constitute a vital covenant relationship between the creature and the Creator. This could come only by God's entering into this relationship with elect *individuals*.

The existence at all times within Israel of a faithful, believing remnant made this quite clear. One might liken Israel to two concentric circles, the inner circle consisting of those individuals whom God had chosen and effectually called to faith and obedience, and who consequently sought to serve Him. The outer circle was made up of Israelites who, while outwardly professing the covenant and so claiming to be of the elect, in truth were not of the covenant people. The kingdom consisted of these two groups, the remnant real but invisible (except to the eye of God) in the visible outward kingdom. One finds them referred to in a number of places throughout the OT (1 K. 19:18; Isa. 1:9; 6:13; Zeph. 2:9; Joel 2:32; cf. Rom. 9:6ff.). From this remnant God chose the judges, David, the prophets, Zerubbabel, and others to serve Him as leaders of the people (1 S. 10:24; 16:8ff.; Ps. 105:26; Isa. 41:9). Thus the election to favor and salvation lay at the basis of election to service.

At the same time as God made clear by the prophets that only the elect remnant within Israel truly were His people, He also indicated that eventually the Gentiles too would enter the kingdom. This would take place according to His plan and purpose and would be effected by His election and calling (Isa. 2:2ff.; Hos. 2:23; Acts 15:15ff.; Rom. 9:22ff.; 11:13ff.). In this way individual election took precedence over national election, which meant in turn that the covenant with Israel rested upon that with Abraham, for only as God sovereignly chose and called individuals could they truly come to Him in reconciliation (cf. Gal. 3:15ff.), and so truly become Abraham's seed (Rom. 9:7; Gal. 3:26ff.).

Yet while considering the OT doctrine of election one also finds a number of references, particularly in Isaiah, to the Lord's "elect servant" (Isa. 42:1; 65:9). The references appear to point to one individual specially called to a particular office and in whom the covenant God had a particular delight. This would seem to be the Messiah, who would save Israel from its sins, its election thus culminating with a redeemer.

As in all other aspects of God's revelation the NT both continues and fulfils that which was revealed in the OT. Christ's teachings contain many references to the elect and to God's action in choosing and calling men to Himself in and through Christ (Mt. 24:22ff.; Mk. 13:20ff.; Lk. 18:7; Jn. 6:37, 65; 10:15f.). After His ascension He led the Church to see that God had chosen Gentiles to become members of the covenant people (Acts 15:5ff.; Gal. 2:11f.), and through the instrumentality of the apostle Paul in particular, revealed the doctrine in all its fulness (Rom. 9–11; Eph. 1).

As one attempts to understand the whole NT doctrine of election, one finds that, as in the OT, it centers upon the covenant of which Christ is the head. He is *the elect* of God (Lk. 23:35; 1 Pet. 2:4, 6). In the eternal covenant He is the one chosen to redeem sinners as their Representative. There is no teaching that Christ saves all men. Rather it is perfectly clear that God has elected certain individuals in Christ (Jn. 6:37; Eph. 1:4f.; cf. Rom. 8:28ff.). God the Father bestows His love upon the elect sinners because He sees them at all times in Christ, the Son, the elect Redeemer.

The apostle Paul points out quite clearly that God has chosen individuals that they might be His people in Christ. He has not chosen them because of any foreseen faith or good works, but simply according to His own holy and sovereign will (Rom. 9–11; Eph. 1:3-12). This choice by God is a selection for salvation. Some would hold that He had chosen them to receive the offer of salvation, but Paul repeatedly points out that, like the Jews of the OT, all men are in rebellion against God. Therefore, when He chooses men to redemption He actually predestines them to adoption as His children in Jesus Christ (Eph. 1:5). Christ has paid the penalty of sin for them as the head of the covenant people, and by His atonement He has merited for His elect the gift of the Holy Spirit who regenerates and converts the elect sinner, so that he places his faith in Christ (Jn. 6:39; 63ff.; 10:11ff.; 17:6ff.; Rom. 8:7ff., 29ff.; Eph. 2:4ff.; 1 Pet. 1:2).

The elect of God are chosen not only for salvation, but also for service. They should have the assurance of their calling and election which gives them confidence, strength, and a sense of responsibility (2 Pet. 1:10f.). This leads the Christian to a knowledge of his responsibility to serve Christ as his Lord in this world (Rom. 12; Eph. 1:4). In this way the elect glorify Christ as their covenant Lord to whom they owe all that they are and have (1 Cor. 6:20; 7:23).

But what of the nonelect? Even though they hear the gospel offering to them eternal life in Christ, they refuse to accept it. Consequently they come under the judgment and condemnation of God, not because they are nonelect, but because despite God's revelation of His power and Godhead to all men, they have refused to glorify Him as God (Rom. 1:19-23). Therefore, God has given them up to sin so that their hearts are hardened against Him (Rom. 1:26ff.; 9:13ff.). Upon these rebels against His law will come God's wrath in the final day of judgment (Mt. 12:24, 50; 25:14-46; Rev. 20:12-15).

Up to this point we have dealt with what the Scriptures teach. Yet many problems for which one can find no rational solution remain unresolved, nor do the Scriptures even hint at any kind of answer. As Paul points out in Rom. 9:19ff., one cannot call God to account for an answer but must simply submit to the revelation that God in His wisdom has seen fit to give men.

Probably the most pressing question that arises is: Why has God chosen some and not others? Men have endeavored through the ages to offer explanations by referring to foresight of faith, universal grace that must be improved, or some other rationalization. Barth finds the answer in the fact that everyone is chosen in Christ, who Himself is rejected on man's behalf (*CD*, II/2, pp. 176ff.). But the only answer seems to be that man by virtue of his sinful corruption can and will do nothing for himself. Therefore God, under no obligation to save any of His rebellious creatures, of His own free, sovereign, and holy will determines to save some. Beyond this lies the mystery of the very nature and being of God Himself. Man may not and cannot go further.

W. S. REID

ELECTRUM. The RV mg. rendering of Heb. *ḥašmal* in Ezk. 1:4, 27; 8:2 (LXX *ēlektron* [which LSJ, p. 768, connects with *ēlektōr*, "the beaming sun"]; Vulg. *electrum*). Ancient writers used the term "electrum" to describe a native argentiferous gold, pale yellow in color, containing from 20 to 50 percent silver. (Modern electrum is an alloy of copper, zinc, tin, and sometimes nickel.) Both the AV and the ERV have "amber," while the RSV has "gleaming bronze" and the NEB reads "brass." Although various scholars (e.g., Cameron, Irwin, KoB, Staples) cite Akk. *ešmarû* ("inlay," from Elamite *ilmasu*, or "brass") as a cognate, *CAD* rejects that connection and suggests rather *elmešu*, a "quasi-mythical precious stone of great brilliancy" (note also the contexts given here; cf. G. R. Driver, *VT*, 1 [1951], 60-62, who connects Heb. *ḥašmal*, Akk. *elmešu*, and Egypt. *ḥsmn*, "bronze"; cf. also *IB*, VI, 70). The suggestion (KoB, Staples) that Ugar. *ṯrml* ("alabaster" or "limestone," *UT*, pp. 506f.) is a cognate is likewise to be rejected, since the interchange of Hebrew *ḥ* and Ugaritic *r* (in linguistic terms a fricative pharyngeal for a rolled dental) is unattested and extremely unlikely.

Bibliography.–*CAD*, IV, 107f., 366f.; G. G. Cameron, *Persepolis Treasury Tablets* (1948), pp. 129f.; *IDB*, I, *s.v.* "amber" (W. E. Staples); W. A. Irwin, *VT*, 2 (1952), 169f.; KoB, p. 342.

G. A. L.

EL-ELOHE-ISRAEL el-e-lō'he-iz'rē-əl; el-el'ō-he-iz'rē-əl [Heb. *'ēl 'ĕlōhê yiśrā'ēl*] (Gen. 33:20); NEB EL-ELOHEY-ISRAEL; AV mg., NEB mg., "God, the God of Israel." Found only in Gen. 33:20 as the name given to the altar erected at Shechem by Jacob, henceforth known as Israel, on the parcel of ground purchased by him from the inhabitants of Shechem during his first encampment of length since the return to Palestine from Paddan-aram and the eventful night at Peniel (32:30). Most probably the compound name was actually engraved on the structure.

This unusual combination of names has given occasion for much speculation and for various text emendations. Already the LXX sought to meet the difficulty by reading *wayyiqrā' 'el 'ĕlōhê yiśrā'ēl*, "and he called *upon* the God of Israel," instead of the *wayyiqrā' -lô 'ēl 'ĕlōhê yiśrā'ēl* of the MT, "and he called it El, the God of Israel." The phrase is best understood in its close connection with the struggle at Peniel, recorded in Gen. 32. Being victorious in that struggle, Jacob received the new name "Israel," and to his first altar in Palestine he gave the name of God that appeared in his own new name, further explaining it by the appositive phrase "Elohe-Israel." Thus his altar was called, or dedicated to, "El, the God of Israel."

E. MACK

ELEMENT; ELEMENTAL [Gk. *stoicheíon*, pl. *tá stoicheía*]. The Greek word occurs seven times in the NT: Gal. 4:3, 9; Col. 2:8, 20; He. 5:12; 2 Pet. 3:10, 12. The various translations given to the word by the AV, the RSV, and the NEB show the need for careful study to determine the precise meaning intended.

In Gal. 4:3 the AV has "the elements of the world" (mg. "rudiments"); RSV and NEB "the elemental spirits of the universe" (NEB mg. "elements of the natural world, *or* elementary ideas belonging to this world"). In Gal. 4:9 the AV has "the weak and beggarly elements"; RSV "the weak and beggarly elemental spirits"; NEB "the mean and beggarly spirits of the elements."

In Col. 2:8 the AV reads "the rudiments of the world" (mg. "elements"); RSV "the elemental spirits of the universe"; NEB "the elemental spirits of the world" (mg. "rudimentary notions").

In He. 5:12 the AV has "the first principles of the oracles of God"; RSV "the first principles of God's word"; NEB "the ABC of God's oracles."

In 2 Pet. 3:10, 12, the AV, RSV, and NEB all render the word *stoicheía* as "the elements."

I. Greek Literature Outside the NT.–The following six meanings show how diversified is the use of this word: (1) It designates the lengths of shadows. (2) As an ancient linguistic term it refers to a syllable or constituent part of a word. (3) It refers to cosmic or elemental substances. (4) It is a descriptive term for the elementary details of music instruction or the basic matters of mathematics. (5) It designates the stars or heavenly bodies. (6) It refers to spirit beings or elemental spirits of the stars. (For all of these meanings and related aspects see *TDNT*.)

II. Meanings and Theological Importance in the NT.–In 2 Pet. 3:10-13 the word *stoicheía* occurs twice (vv. 10, 12). Here it means "the elemental substances of the universe." In the day of the Lord the heavens will pass away with a roar, and these elemental substances, being on fire, will break up into their component parts (v. 10), or melt (v. 12). Thus, says Peter, there is no permanence or stability in material things. Because Christians are expecting these catastrophic changes, they are to make every effort to be spotless and without blemish. They want to be found by Christ in peace (2 Pet. 3:14). Since all things will be in the process of being dissolved, Christians are to be persons of quality in a holy manner of life doing godly acts (3:11).

The use in Hebrews is in the context of the writer's concern about his readers. They had become sluggish in their hearing. They had not matured. They were not able to be teachers but needed someone to teach them the initial elements of God's oracles (He. 5:12). The NEB renders the term *tá stoicheía* as "the ABC of God's oracles." These initial elements are listed in He. 6:1f. The basic principles referred to here certainly parallel the basic principles of mathematics or the elemental principles of music. (*See also* ELEMENTARY DOCTRINE OF CHRIST.)

Any agreement about how to translate *tá stoicheía* disappears when we consider the use of the term in Gal. 4:3, 9. The context in 4:1-11 must determine what meaning is given the word. At the close of ch. 3 those who are Christ's are Abraham's offspring and heirs according to God's promise. In the legal system of Judaism an heir was controlled closely by his father. He did not enter into the rights of manhood until the date set by his father (4:2). When the fulness of time came, God sent forth His Son to redeem those who were under the law (4:4) and thus made it possible for all men to receive sonship (5:5).

In this context the idea that Paul is referring to "the elemental spirits of the universe" does not make good sense. The context surrounding Gal. 4:3 favors the idea that when the readers were children and when Paul was younger, they were all part of a Jewish or gentile religion. In their former states they were in bondage to a way of life that did not give them freedom. Judaism, the religious expression of Paul and his contemporaries, was not a pure interpretation of the OT. Legalism had replaced law. The Gentiles knew neither God nor the law of the OT in its right meaning. They were tied up with idolatries (4:8). To return to any type of legalism would be to return to the weak and miserable religious expressions that preceded Christ and His freedom (v. 9). The "elements of this world" here are the constitutive elements of man's existence prior to God's sending His Son in the fulness of time. Christ's life and deeds made a radical change in how man's existence is to be constituted. Hence, as Delling has pointed out, "the elements of the world" is a Pauline term — not that of the Galatian readers (*TDNT*, VII, 684f.). For Paul, it summarized life before the fulness of time, before Christ's coming.

The phrase *tá stoicheía* occurs twice in Col. 2 (vv. 8, 20). In v. 8 it is parallel to the phrase "the traditions of men." It is contrasted with "being according to Christ." Paul is concerned about the Colossians. Living in the world, they have become subject to rules and regulations (v. 19). In this context, the "elemental spirits of the universe" is too specific a translation. Rather, if we translate *tá stoicheía* as "the elements of the world" (vv. 8, 20), the passage would seem to teach that religious activities not centered in Christ are judged by God to be invalid. To die with Christ is to be set free from these elements of the world (v. 20). They come under Christ's judgment because they are only commandments and teachings of men (v. 22). Those Colossians who may have been involved with worship of angels (v. 18) needed to break with this as well as with any of the other elements in their existence. But there is never any explicit connection between the elements of the world and the worship of angels. In Colossians, "the elements of the world" is again a broad term for human existence apart from Christ.

III. Creativity of Paul.–The expression "the elements of the world" in Galatians and Colossians is a vivid description by Paul of elements that characterize man in revolt. These elements show man's busy activities in which allegiance to God and Christ is absent. They denote a way of life that is not according to Christ. They designate the busy round of activities that discloses man's estrangement from God and from which man is set free when he genuinely identifies himself with Christ's death. Functioning in this way, the phrase "elements of the world" stands for all that is involved in bondage as contrasted with the freedom that comes in Christ.

ELEMENTARY DOCTRINE OF CHRIST [Gk. *ho tḗs archḗs toú Christoú lógos*] (He. 6:1); AV PRINCIPLES OF THE DOCTRINE OF CHRIST; NEB RUDIMENTS OF CHRISTIANITY. Here *lógos* is to be understood as "doctrine(s)," *archḗ* ("beginning") in the genitive as adjectival, and *toú Christoú* as modifying *lógos* (not *archḗ*). Thus, the whole expression refers to the teachings about Christ that come first, not to teachings about the beginning (origin) of Christ. *See also* ELEMENT II.

ELEPH ē'lef (Josh. 18:28). *See* HA-ELEPH.

ELEPHANT [Gk. *eléphas*] (1 Macc. 3:34; 6:30ff.; 8:6). During the Hellenistic age elephants were used militarily. These were mainly imported from India, although some evidence points to the breeding of the animals by the Seleucids in Syria. Lysias included thirty-two of them in his army mustered against the Jews in 163 B.C.

ELEPHANTINE PAPYRI el-ə-fan-tē'nē pə-pī'rī. A collection of fifth-century B.C. papyri recovered from a settlement on an island in the Nile in Upper Egypt opposite Aswân (about 885 km., 550 mi. S of Cairo). The colony is known by the Greek name *Elephantinē* ("elephant location"), but the Egyptians called it *Iebew*. Situated at the First Cataract of the Nile, the island was often considered to mark the southern extremity of ancient Egypt, along with the city Syene, which was located across the Nile on the east bank.

The papyri, written in Aramaic, were acquired in two principal sections. In 1893 C. E. Wilbour obtained some Aramaic legal texts from a dealer in Aswân, but the documents were placed in the Brooklyn Museum and lay unread

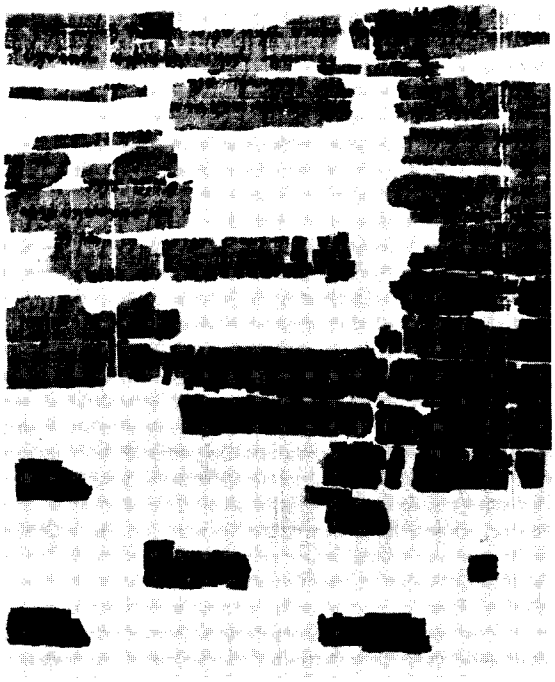
until they were published in 1953 by E. G. Kraeling. The second batch, which also comprised legal and some literary texts, was also purchased from Aswân dealers in antiquities, and appeared in separate publications by A. H. Sayce, A. E. Cowley, and E. Sachau between 1906 and 1911.

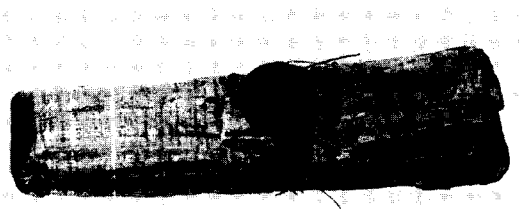
The colony from which these texts originated was a Jewish military settlement. In the documents the outpost is called "Yeb the fortress," preserving in modified form the older Egyptian name of the area (*Yeb* is Egyptian for "elephant"). Because of limited space on the island, the inhabitants bought residences in nearby Syene and in effect established a similar defensive post there. While Elephantine is not mentioned by name in the OT, its destiny was doubtless subsumed under that of Syene in the prophecies of Ezekiel (29:10; 30:6).

Origins of the establishment at Elephantine are obscure. The papyri imply that it had been in existence long before Cambyses, son of Cyrus, conquered Egypt in 525 B.C. Perhaps it had originated as a Jewish settlement far to the south of troubled Palestine when the Babylonians were threatening the future of that land in the time of Jeremiah. If so, it would have formed a natural basis for a military garrison organized by Cambyses to maintain Persian control over Egypt, and it was perhaps this latter circumstance that precipitated the trouble of which some of the papyri complain. At all events, the settlement began when Egypt and the Judeans were on friendly terms, perhaps during the reign of Pharaoh Hophra (Apries, 588-566 B.C.), mentioned in Jer. 44:30. The papyri indicate that the settlement survived well into the post-exilic period. There are some grounds for thinking that the Jewish garrison was removed after the accession of Nepherites in 399 B.C., but that Jews continued to live in the general area up to the beginning of the Christian era.

One of the principal concerns of the papyri was with a temple at Yeb dedicated to *Yhw* (a modified form of the sacred Hebrew name for God). This temple had apparently been constructed before the invasion of Egypt by Cambyses II, but had been destroyed by Egyptian insurgents in 410 B.C. That worship in this shrine was syncretistic may be inferred from the long list of contributors (many of them women) to the upkeep of the



Two of the Elephantine Papyri — a sealed marriage contract (bottom) and a deed for a house (top) — from the time of Darius II (*ca.* 420 B.C.) (Brooklyn Museum)



temple, for besides *Yhw* the donors honor also *Ishum-bethel, Anath-bethel,* and *Herem-bethel.* The *bethel* ("house of God") part of the name has been regarded by scholars as a mere designation of deity, and not as the proper name of a deity or a place. The deity designated by the compound name *Anath-Yhw,* a variant in the texts for *Anath-bethel,* may have been regarded as a consort of *Yhw* and was possibly the "queen of heaven" whose worship by the seventh-century B.C. Judeans was castigated in Jer. 7:18; 44:17. Certain of the letters request the blessing of "the gods" on the recipients, which indicates an accommodation to Egyptian polytheism at least in the use of the epistolary formula, but in other respects traditional Hebrew phrases such as "God of heaven" and "Lord of hosts" are also found, the latter on a potsherd.

Older liberal scholars professed "surprise" that a Jewish temple should have been standing in Elephantine in the 5th cent. B.C. (so H. H. Rowley in *DOTT,* p. 257). This perplexity was based on the theory that King Josiah had promulgated the "law of Deuteronomy" in 621 B.C., which, according to the interpretations of nineteenth-century exponents of literary criticism, had centralized worship in Jerusalem and prohibited the use of any other sacrificial altar. There is no evidence, however, that the scroll recovered in the time of Josiah consisted of the book of Deuteronomy, either in part or in whole; nor is there any objective support for the assumption that either the law scroll found by Hilkiah or the extant book of Deuteronomy prescribed Jerusalem as the place where a single sanctuary was to be established. (*See* DEUTERONOMY IV.) Deuteronomy simply does not consider the matter of erecting shrines in other countries, because in the time of Moses the expectation was that the Israelites would live as a spiritual community in the land that God had provided for them. But these conditions changed as the result of continued Israelite apostasy and the prospect of consequent destruction by enemies of the nation. Those who left Judah in the 7th cent. B.C. for less troubled areas were certainly not prohibited by Deuteronomy or any other part of the Mosaic legislation from building a shrine outside of Palestine, and thus the construction of a Jewish temple at Yeb for the worship of *Yhw* would have been both legitimate and normal.

One of the documents, the so-called Passover papyrus, throws light on the patterns of worship in the Yeb shrine. The text has been poorly preserved, but with some restoration it has been shown to deal with a festival celebrated in the month of Nisan. The document was sent in 419 B.C., by authority of Darius II, instructing the colony to observe the feast of Unleavened Bread. It mentions a count of fourteen days in Nisan, after which a gap in the text is followed by an injunction regarding a period from the fifteenth to the twenty-first day of the same month. There is no specific reference to the Passover, but this may have occurred originally in the portion that is now missing. Some scholars have maintained that there was never any reference to the Passover in the text, suggesting that the killing of an animal would have antagonized the local Egyptians, who venerated almost every animal in some manner as a god. Whatever the nature of the original document, it was issued by authority of the Persian king, like similar edicts in the time of Ezra and Nehemiah.

One of the most interesting of the letters is that addressed by the colonists of Yeb to Bagoas, the Persian governor of Judea. It seems to have been the successor to an earlier complaint sent to a Persian official in Egypt about the wanton destruction of the temple by rebellious Egyptians in 410 B.C. That letter had apparently gone unanswered, hence the petition in 407 B.C. to Bagoas, a copy of which was kept at Yeb. The document was sent by "your servants Yedoniah and his colleagues," and reports the shameless pillaging of the shrine. A concluding section requests official approval for the reconstruction of the building, and also states that the sons of Sanballat, governor of Samaria in the time of Nehemiah, have been requested to help.

If an official reply was received by the priests of Yeb, it has not survived. A memorandum has been recovered, however, which indicates that a verbal response sent to Arsames, the Persian governor in Egypt, supported the request for permission to rebuild. This is evidence that the Persian rulers took a genuine interest in the lives of their subjects, taking care to accommodate religious traditions. Meal offerings and incense are specified as the only ritual procedures to be followed, "as was done formerly." Another smaller Aramaic text dealing with the proposed reconstruction of the temple states specifically that sheep, oxen, and goats were not offered there. Thus it is far from certain that the Passover was ever observed at Yeb, at least in its traditional form.

Other papyri from Elephantine include marriage contracts, documents relating to adoption, and texts containing a number of business procedures connected especially with two families in the colony. All the transactions had been drawn up in an approved legal fashion, attested by

witnesses, and then sealed. A notation or "docket" on the exterior of the papyrus gave an indication of its contents. All of this was thoroughly in accord with the Babylonian tradition adopted by the Persians. Estate transactions are well represented among the texts, and they show that both men and women could engage in business. Among the other facets of civil life at Yeb and Syene revealed by the papyri is the extremely high rate of interest charged on loans, a circumstance that frequently resulted in civil litigation.

The Elephantine papyri are the principal witnesses to the existence of Aramaic in Egypt. The extent to which Aramaic had by this time become the language of commerce and diplomacy is also made abundantly clear. That members of the community at Yeb spoke and wrote in Aramaic is evidence that this language was popular in Palestine before the Exile. The language of the papyri is a rather early form of the official Aramaic appearing in Daniel and Ezra, and is of great importance for the period of Ezra and Nehemiah. The letters in Ezr. 4 particularly exhibit a great many of the characteristics of fifth-century B.C. Aramaic. The documents are all the more significant as external evidence because of the scarcity of such material as background for the fifth-century B.C. OT writings.

R. K. HARRISON

ELEUTHERUS e-loo'thər-əs [Gk. *Eleútheros*] (1 Macc. 11:7; 12:30). A river in Syria flowing from the base of the Lebanon to the sea. It formed an important boundary and is mentioned in the account of Jonathan Maccabeus in 1 Maccabees. It is probably to be identified with Nahr el-Kebir, 30 km. (19 mi.) N of Tripoli in Lebanon.

ELEVEN, THE [Gk. *hoi héndeka*] (Lk. 24:9, 33; Acts 2:14). The eleven apostles remaining after the death of Judas. The definite article serves to designate them as a distinct group whose integrity was not destroyed by the loss of one of the twelve. The company of "the twelve" had come to be so well recognized that all the Gospel writers used on occasions the word with the definite article to represent the twelve apostles chosen by Jesus. This custom remained and the numeral merely changed, as, "Afterward he appeared to the eleven" (Mk. 16:14). On the other hand, the substantive is also sometimes used, as, "Now the eleven disciples went to Galilee" (Mt. 28:16; cf. also Acts 1:26). As an illustration of the fixedness of usage, Paul refers to the eleven as "the twelve" when he recounts the appearances of Jesus after His resurrection: "and that he appeared to Cephas, then to the twelve" (1 Cor. 15:5). W. G. CLIPPINGER

ELHANAN el-hā'nən [Heb. *'elḥānān*–'God is gracious'].

1. A great warrior in the army of David who slew a Philistine giant. There is a discrepancy between 2 S. 21:19 and 1 Ch. 20:5. In the former passage we read, "And there was again war with the Philistines at Gob; and Elhanan the son of Jaareoregim, the Bethlehemite, slew Goliath the Gittite, the shaft of whose spear was like a weaver's beam"; while in the latter we are told, "And there was again war with the Philistines; and Elhanan the son of Jair slew Lahmi the brother of Goliath the Gittite, the shaft of whose spear was like a weaver's beam."

On careful comparison it is possible to discern a distinct relationship between the two passages, with the former containing certain transcriptional errors. The name of Elhanan's father should not contain the Hebrew word *'ōrᵉgîm*, which is an obvious copyist's mistake resulting from the occurrence of the term (Eng. "beam," "shuttle") at the end of that same verse. The name "Jaare" should be revised to agree with the textual variant in the Chronicles reference, i.e., Jairi. J. R. SAMPEY

In addition, the accusative particle *'ēṯ* in 2 S. 21:19 should read *'ªḥî* ("the brother of"), as in 1 Ch. 20:5. Finally, the term in Chronicles from which the name Lahmi is derived should be corrected to read "Bethlehemite," following the text of 2 Samuel. As corrected, the verse would then read: "And Elhanan, the son of Jairi the Bethlehemite, slew the brother of Goliath . . . ," thus removing the apparent discrepancy. R. K. H.

The resemblance to the story of David has been explained in two other ways. (1) With Jerome, it has been proposed that Elhanan is a name for David (some more recent scholars even supposing that "David" is the throne-name). (2) Following Ewald, it has been asserted that the name "Goliath" from the Elhanan story was inserted in 1 S. 17 and 21. Most conservative scholars consider these conjectures unnecessary.

2. The son of Dodo of Bethlehem, one of David's mighty men (2 S. 23:24; 1 Ch. 11:26). Some scholars think that there was only one Elhanan, and that he was the son of Dodo of the clan of Jair.

ELI ē'lī [Heb. *'ēlî*]; AV also HELI (2 Esd. 1:2). A descendant of Ithamar, the fourth son of Aaron, who exercised the office of high priest in Shiloh at the time of Samuel's birth. For the first time in Israel, Eli combined in his own person the functions of high priest and judge, judging Israel for forty years (1 S. 4:18).

The recorded events in Eli's life are few; indeed, the main interest of the narrative is in the other characters who are associated with him, particularly Samuel. In Eli's first interview with Hannah (1 S. 1:12ff.) she is the central figure; in the second interview (vv. 24ff.) it is the child Samuel. Eli next appears as the father of Hophni and Phinehas, whose licentious lives had profaned their priestly office and earned for them the title "men of Belial" (or "worthlessness"). Eli administered no stern rebuke to his sons, but only a gentle chiding of their greed and immorality. Thereafter he was warned by an unnamed prophet of the downfall of his house and of the death of both of his sons in one day (2:27-36); this was later confirmed by Samuel, who had received this word directly from Yahweh Himself (3:11ff.). The prophecy was not long in fulfillment. During the next invasion by the Philistines the Israelites were utterly routed, the ark of God was captured, and Hophni and Phinehas were both slain. When the news reached Eli he was so overcome that he "fell over backward from his seat by the side of the gate; and his neck was broken and he died" (4:18).

Eli, while sincere and devout, seems to have been lacking in firmness. He appears from the history to have been a good man, full of humility and gentleness, but weak and indulgent. He is always overshadowed by some more commanding or interesting figure. A. C. GRANT

ELI, ELI, LAMA SABACHTHANI ā'lē, ā'lē, lä'mə sə-bäk-thä'nē [Gk. *ēlí ēlí lemá sabachtháni*] (Mt. 27:46); NEB *"Eli, Eli, lema sabachthani"*; **ELOI** ē'loi or e-lō'ī, **ELOI, LAMA SABACHTHANI** [Gk. *elōí elōí lamá sabachtháni*] (Mk. 15:34); NEB *"Eli, Eli, lema sabachthani."* A statement uttered by Jesus on the cross just before His death, translated, "My God, my God, why hast thou forsaken

me?" With some changes of form, it is probably from Ps. 22:1 [MT 2]: Heb. *ʾēlî ʾēlî lāmâ ʿazaḇtānî*.

Variations exist on the readings of both Matthew and Mark. In some Matthaean MSS *elōí* occurs for *ēlí* and in some Markan MSS *ēlí* for *elōí*. The passage seems to be a mixture of Hebrew and Aramaic. The *elōí* of Mark and *lemá* of Matthew are closer to the Aramaic. Scholars do not agree about whether Jesus uttered this cry in Hebrew or Aramaic. In either language the first two words bear sufficient similarity to the name Elias to explain the jeer that Jesus was calling upon Elias (Elijah).

The Gospel writers note several instances of correspondence between the suffering of Jesus and the experience of the psalmist described in Ps. 22 (cf. Mk. 15:29 with Ps. 22:7, Mt. 27:43 with Ps. 22:8, and Mt. 27:35; Mk. 15:24; Lk. 23:34; Jn. 19:23f. with Ps. 22:18). Jesus may have been meditating upon this Psalm, as the Jews sometimes did in times of suffering. In any case, He used the opening lines to express His sense of being abandoned by God. It should be noted that Ps. 22 ends in a hymn of triumph and thanksgiving to God for His deliverance; thus, this lament does not indicate a loss of faith in God. N. J. O.

ELIAB ē-lī′əb [Heb. *ʾĕlîʾāḇ*–'God is father'].

1. Prince of the tribe of Zebulun in the Exodus (Nu. 1:9; 2:7; 7:24,29; 10:16).

2. A Reubenite, father of Dathan and Abiram (Nu. 16:1, 12; 26:8f.; Dt. 11:6).

3. Eldest son of Jesse and brother of David (1 Ch. 2:13; 1 S. 16:6), once called Elihu (1 Ch. 27:18). He was of commanding appearance (1 S. 16:6) and, serving with Saul's army when it was confronting the Philistines and Goliath, was inclined to lord it over his brother David (17:28f.). His daughter Abihail became a wife of Rehoboam (2 Ch. 11:18).

4. An Ephraimite, an ancestor of Samuel (1 Ch. 6:27); called Eliel in v. 34 and Elihu in 1 S. 1:1.

5. A Gadite warrior with David (1 Ch. 12:9), one of eleven mighty men (vv. 8, 14).

6. A Levite musician (1 Ch. 15:18, 20; 16:5).

7. An ancestor of Judith (Jth. 8:1; cf. 9:2). F. K. FARR

ELIADA ē-lī′ə-də [Heb. *ʾelyāḏāʿ*–'God knows'].

1. One of the sons of David (2 S. 5:16; 1 Ch. 3:8; called BEELIADA in 1 Ch. 14:7).

2. A descendant of Benjamin and a captain in the army of Jehoshaphat, commander of 200,000 men (2 Ch. 17:17).

3. Father of Rezon, an "adversary" of Solomon (1 K. 11:23, AV "Eliadah").

ELIADAS ē-lī′ə-dəs (AV, RSV mg., NEB, 1 Esd. 9:28). *See* ELIOENAI **5.**

ELIADUN ē-lī′ə-dən (AV 1 Esd. 5:58). *See* ILIADUN.

ELIAH ē-lī′ə (AV 1 Ch. 8:27; Ezr. 10:26; NEB 1 Ch. 8:27). *See* ELIJAH **2, 4.**

ELIAHBA ē-lī′ə-bə [Heb. *ʾelyaḥbāʾ*–'God hides']. One of David's thirty mighty men (2 S. 23:32; 1 Ch. 11:33).

ELIAKIM ē-lī′ə-kim [Heb. *ʾelyāqîm*; Gk. *Eliakeim*–'God raises up'].

1. The son of Hilkiah who succeeded Shebna as governor of the palace and "grand vizier" under Hezekiah (Isa. 22:20). The functions of his office are seen from the oracle of Isaiah in which Shebna is deposed and Eliakim set in his place (22:15ff.). He is the "steward" and is "over the household" (v. 15). At his installation he is clothed with a robe and girdle, the insignia of his office, and, having the government committed into his hand, is the "father to the inhabitants of Jerusalem and to the house of Judah" (v. 21). The key of the house of David is laid on his shoulder, and he alone has power to open and shut, this being symbolic of his absolute authority as the king's representative (v. 22).

One of Solomon's officials is the first mentioned as occupying this position (1 K. 4:6); the office was continued in both the northern and southern kingdoms (1 K. 16:9; 18:3; 2 K. 10:5; 15:5). Its importance is seen from the fact that after Azariah was smitten with leprosy, Jotham his heir "was over the household, governing the people of the land" (2 K. 15:5).

When Sennacherib sent an army against Jerusalem in 701, Eliakim was one of those Jewish princes who held, on behalf of Hezekiah, a parley with the Assyrian officers (2 K. 18:18, 26, 37; Isa. 36:3, 11, 22). As a result of the invader's threats, he was sent by Hezekiah in sackcloth to Isaiah, entreating his prayers to Yahweh on behalf of Jerusalem (2 K. 19:2; Isa. 37:2).

2. The original name of JEHOIAKIM, the son of Josiah, whom Pharaoh Neco made king of Judah (2 K. 23:34; 2 Ch. 36:4).

3. A priest who assisted at the dedication of the wall of Jerusalem, rebuilt after his return from Babylon (Neh. 12:41).

4. A grandson of Zerubbabel and ancestor of Jesus (Mt. 1:13).

5. An ancestor of Jesus (Lk. 3:30). S. F. HUNTER

ELIALI ē-lī′ə-lī. *See* ELIALIS.

ELIALIS ē-lī′ə-lis [Gk. *Elialis*] (1 Esd. 9:34); AV, NEB, ELIALI. One of the sons of Bani who put away foreign wives and children.

ELIAM ē-lī′əm [Heb. *ʾĕlîʿām*–'people's God'(?)].

1. Father of Bathsheba (2 S. 11:3); in 1 Ch. 3:5 called Ammiel.

2. One of David's "thirty," son of Ahithophel the Gilonite (2 S. 23:34).

ELIAONIAS ē-lī-ə-ō-nī′əs (AV, NEB, 1 Esd. 8:31). *See* ELIEHOENAI.

ELIAS ē-lī′əs. *See* ELIJAH.

ELIASAPH ē-lī′ə-saf [Heb. *ʾelyāsāp*–'God has added'].

1. Son of Deuel; prince of the tribe of Gad in the Exodus (Nu. 1:14; 2:14; 7:42, 47; 10:20).

2. Son of Lael; prince of the Gershonites (Nu. 3:24).

ELIASHIB ē-lī′ə-shib [Heb. *ʾelyāšîḇ*–'God restores'; Gk. *Eliasibos* (1 Esd. 9:1, 24), *Eliasimos* (1 Esd. 9:28), *Enasibos* (1 Esd. 9:34)]; AV also ELEAZURUS, ELISIMUS, ELIASIB, ENASIBUS; NEB also ELIASIBUS, ELIASIMUS, ENASIBUS.

1. A descendant of David (1 Ch. 3:24).

2. Head of the eleventh course of priests (1 Ch. 24:12).

3. The high priest in the time of Nehemiah (Neh. 3:1, 20f.; 12:10, 22f.; 13:4, 7, 28). He, with his brethren the priests, helped in the rebuilding of the wall (3:1). But later he was "connected with Tobiah" the Ammonite (13:4) and allowed that enemy of Nehemiah the use of a large chamber in the temple (v. 5); one of his grandsons, a son of Jehoiada, married a daughter of SANBALLAT

the Horonite and was for this reason expelled from the community by Nehemiah (v. 28).

4, 5, 6. Three Israelites, one a "singer," who had married foreign wives (Ezr. 10:24, 27, 36; 1 Esd. 9:24, 28, 34).

7. Father of Jehohanan (Ezr. 10:6; 1 Esd. 9:1); probably identical with **3** above. F. K. FARR

ELIASIB ē-lī'ə-sib. *See* ELIASHIB **7.**

ELIASIBUS ē-li-as'i-bəs. *See* ELIASHIB **4, 7.**

ELIASIMUS ē-li-as'i-məs. *See* ELIASHIB **5.**

ELIASIS ē-lī'ə-sis [Gk. *Eliasis*]. One who had married a foreign wife (1 Esd. 9:34). Attempts to identify him with Jaasu (Ezr. 10:37) or Binnui (Ezr. 10:38) are unconvincing.

ELIATHAH ē-lī'ə-thə [Heb. *'ĕlî'āṯâ*–'God has come']. A Hemanite, head of the twentieth division of the temple musicians (1 Ch. 25:4, 27). *See also* JOSHBEKASHAH.

ELIDAD ē-lī'dad [Heb. *'ĕlîḏāḏ*–'God has loved']. A leader of the tribe of Benjamin appointed by Moses to help in the division of the land of Canaan (Nu. 34:21); perhaps the same as ELDAD.

ELIEHOENAI ē-lī'ə-hō-ē'-nī [Heb. *'elyᵉhô'ênay*–'to Yahweh are my eyes'].

1. (AV, NEB, "Elioenai"). A gatekeeper of the family of Korah (1 Ch. 26:3).

2. (AV, NEB, "Elihoenai"). Head of a family that returned from the Exile (Ezr. 8:4). The RSV also renders Eliehoenai in 1 Esd. 8:31 for Gk. *Elialōnias* (AV, NEB, "Eliaonias").

ELIEL ē-lī'əl [Heb. *'ĕlî'ēl*–'El is God,' or 'my God is God'].

1, 2, 3. Mighty men of David (1 Ch. 11:46f.; 12:11).

4. A chief of Manasseh, E of the Jordan (1 Ch. 5:24).

5, 6. Two chiefs of Benjamin (1 Ch. 8:20, 22).

7. A chief Levite from Hebron (1 Ch. 15:9, 11).

8. A Kohathite in the line of Elkanah, Samuel, and Heman (1 Ch. 6:34). *See* ELIAB **4.**

9. A Levite of the time of Hezekiah (2 Ch. 31:13).

ELIENAI el-i-ē'nī [Heb. *'ĕlî'ênay*]. A Benjaminite chief (1 Ch. 8:20).

ELIEZER el-i-ē'zər [Heb. *'ĕlî'ezer*; Gk. *Eliezer*–'my God is help'].

1. The chief servant of Abraham (Gen. 15:2; AV, RSV, NEB, "Eliezer of Damascus"). The Hebrew is peculiar: lit. "and the son of the possession (*mešeq*) of my house is *dammeśeq* (of) Eliezer." A possible but unlikely meaning is that his property would become the possession of Damascus, the city of Eliezer. The Syriac Targum reads "Eliezer the Damascene"; this supposes a reading, "Eliezer *haddammaśqî*" or "*middammeśeq*". The text may be corrupt: the assonance between *mešeq* and *dammeśeq* is suspicious. Abraham calls Eliezer "a slave born in my house" (v. 3), i.e., a dependent, a member of his household, and so regards him as his heir in place of Lot, who had left his house (ch. 13). Eliezer is probably the servant described as "the oldest of his house, who had charge of all that he had" (24:2), whom Abraham sent to find a wife for Isaac.

2. The second son of Moses and Zipporah, called thus because "the God of my father was my help, and delivered me from the sword of Pharaoh" (Ex. 18:4; 1 Ch. 23:15, 17; 26:25).

3. A son of Becher, one of the sons of Benjamin (1 Ch. 7:8).

4. A priest who assisted in bringing up the ark from the house of Obed-edom to Jerusalem (1 Ch. 15:24).

5. The son of Zichri, ruler over the Reubenites in the time of David (1 Ch. 27:16).

6. The son of Dodavahu of Mareshah who prophesied the destruction of the ships which Jehoshaphat king of Judah built, because he had done so in cooperation with Ahaziah king of Israel (2 Ch. 20:35ff.).

7. One of the messengers whom Ezra sent to Iddo, the chief of Casiphia, with the request for ministers for the temple (Ezr. 8:16ff.).

8, 9, 10. A priest (Ezr. 10:18), a Levite (v. 23), and one of the sons of Harim (v. 31), all of whom were required to divorce their foreign wives.

11. An ancestor of Jesus in the genealogy given by Luke (3:29). S. F. HUNTER

ELIHOENAI (AV Ezr. 8:4). *See* ELIEHOENAI **2.**

ELIHOREPH el-ə-hō'ref [Heb. *'ĕlîḥōreṗ*–'God of autumn'?]; NEB "in charge of the calendar." A son of Shisha who with his brother Ahijah held the office of secretary to king Solomon (1 K. 4:3). For the NEB reading, see J. A. Montgomery, *Books of the Kings* (*ICC*, 1955).

ELIHU ē-lī'hū, ē-lī'hōō [Heb. *'ĕlîhû'*, *'ĕlîhû*–'He is (my) God'; Gk. *Ēliou*].

1. Samuel's great-grandfather (1 S. 1:1), called ELIAB **(4)** in 1 Ch. 6:27 and Eliel in 1 Ch. 6:34.

2. David's eldest brother ELIAB **(3)** is so called in 1 Ch. 27:18; since the LXX has Eliab here, the MT reading is probably a scribal error, though his eldest brother may well be intended.

3. A Manassite who joined David at Ziklag (1 Ch. 12:20).

4. A gatekeeper of the family of Korah, a descendant of Obed-edom (1 Ch. 26:7).

5. A character in the book of Job. He is of the tribe of Buz (cf. Gen. 22:21), a brother tribe of Uz (Job 1:1); thus (with the other characters in the book) from Transjordan. Elihu is the only character whose genealogy is given (32:2); thus, while the earlier speakers have been speaking from the standpoint of the wise, Elihu gives the well-bred aristocrat's point of view. After his introduction (32:6-22) he has three answers to Job (chs. 33, 34, 35–37). In spite of his indignation against Job's friends for their failure to prove Job wrong, he does little better. Elihu makes some new points in ch. 33, but in ch. 34 he fails to equal Bildad's argument, and in chs. 35–37 shows himself unable to cope with the greatness of God.

Most modern commentators see Elihu as a later interpolation, though some consider him an afterthought by the original author. No adequate reason is suggested why he should have been interpolated; nor is there much force in the suggestion that he had not been mentioned before, for had he been, the tension of the work would have been seriously affected, as the reader waited for his contribution. As it is, he enables Job to relax sufficiently to receive the divine revelation. The argument that God ignores Elihu's intervention (38:2 refers to Job), thereby showing that he was not in the original version, is valueless, for Job's friends are equally ignored.

A more cogent argument for regarding Elihu as a later interpolation is that the Epilogue (42:7-9) mentions the others but not Elihu. Critics point also to the peculiar language and style of the Elihu section, claiming that it

interrupts the natural progression from ch. 31 (Job's challenge) to ch. 38 (God's reply).

But none of these arguments is decisive, and Elihu does serve to show that the mystery of God's working surpasses all wisdom of man, not merely that of one class or age. In addition, his speeches can be seen as providing a further dramatic basis for the Lord's discourses in the following chapters.

***I. Introduction.**–A. Elijah the Man.* His name and memory have defied the passage of time, but about Elijah the man very little is known. Biblical traditions concerning him lack even a genealogy. He was a Tishbite, but it is unclear whether he came from Tishbe near Kedesh Naphtali (mentioned in Tobit 1:2 as "Thisbe") or from some otherwise unknown Tishbe in Gilead (based on the LXX rendering of *mittōšāḇê* ["from the inhabitants of," 1 K. 17:1]; cf. Josephus *Ant.* viii.13.2). His haunts were far from the cities, and his distinctive garb was a mantle (1 K. 19:13, 19; 2 K. 2:8, 13f.), perhaps woven of hair, with a rawhide rope tied around his waist (2 K. 1:8)—later recognized as the traditional garb of a prophet (Zech. 13:4; Mt. 3:4). Of his physical characteristics we know nothing; even his age is a matter of some conjecture, although he must have been well on in years when first we meet him in the Kings narrative.

B. Circumstances of His Ministry. In Elijah's day the religious life of the northern kingdom was in crisis. The political policies of Omri had tended toward an amalgamation of Israel with the Canaanite enclaves remaining in the land. Ahab carried his father's policies even farther. Spurred on by the haughty and strong-willed Jezebel, a devotee of the Tyrian Baal Melqart and his consort Asherah/Astarte (Jezebel's father was Ethbaal king of Sidon, who was, or had been, a priest of Astarte; cf. Josephus *CAp* i.18), Ahab established the cult of Baal and Asherah in his capital city of Samaria (1 K. 16:32f.). The large number of Baal and Asherah prophets maintained under Jezebel's sponsorship at court (18:19), and her brazen attempt to purge the realm of the prophets of Yahweh (v. 13), give striking evidence of her powerful influence. Ahab, though he gave his children Yahwist names (Azariah, Jehoram, Athaliah), apparently acquiesced in her designs. Elijah's prophetic ministry is presented as Yahweh's response to this crisis.

C. Primary Sources. All that we know of Elijah is based on the account of his ministry found in Kings, together with a brief notice in 2 Ch. 21. Other sources add nothing of substance.

The author of KINGS evidently had available to him an account of Elijah's ministry. From this source he selected what was useful and wove it into his narrative. This no doubt explains the abruptness with which Elijah is introduced. It appears that this earlier source already linked the ministries of Elijah and Elisha as one continuous story, and that it depicted their ministries as embodying singular analogies to the sequential ministries of Moses and Joshua. Even the names Elijah ("my God is Yahweh") and Elisha ("my God saves") evoked memory of Moses (under whose ministry Israel came to know God as Yahweh) and Joshua ("Yahweh saves"). (For the analogies to Moses, see II and V below.)

In Kings the Elijah material has been broken up into four sections of unequal length: 1 K. 17–19; 21:17-29; 2 K. 1:2-16; 2:1-12. The first of these presents a cycle of episodes that centers on the dramatic trial on Mt. Carmel; the second narrates Elijah's involvement in the episode concerning Naboth's vineyard; the third tells of the confrontation between Elijah and King Ahaziah; the fourth relates the manner in which Elijah's ministry was terminated and his prophet's mantle passed on to ELISHA.

***II. Elijah's Ministry.**–A. Baal Challenged: 1 K. 17–19. 1. Initial Confrontation of Ahab (1 K. 17:1).* As if from nowhere, Elijah abruptly appears in the narrative to announce to Ahab: "As Yahweh the God of Israel lives, before whom I stand, there shall be neither dew nor rain these years, except by my word" (17:1). In that brief but dramatic moment the great issues at stake in Elijah's ministry are sharply focused: the humble servant of Yahweh stands athwart the royal devotee of Baal and announces that only at the word of Yahweh's servant will the fertilizing rains return to the Promised Land. They are Yahweh's gift, not Baal's, though Baal be hailed as "Rider of the Clouds" (see, e.g., *ANET*, p. 132) and Lightning and Dew as his wives or daughters (*ANET*, p. 131). Yahweh will now make the land of milk and honey become like the desert through which Israel passed long ago on its way to the Promised Land.

2. By the Wadi Cherith (1 K. 17:2-7). The word of Yahweh then directs Elijah to get away to a remote place, E of the Jordan. There, outside the Promised Land, Yahweh provides bread and meat (1 K. 17:4f.; cf. Ex. 16; Nu. 11; Ps. 78:23-29), carried to him by ravens, and water (cf. Ex. 15:25; 17:6; Nu. 20:2-13; Dt. 8:15; Ps. 78:16, 20) from the Wâdī CHERITH. Thus, while the land that looks to the god of dew and rain suffers drought, Yahweh nourishes His servant with food and water.

3. At Zarephath (1 K. 17:8-24). a. Elijah and the Widow Sustained (vv. 8-16). When the source of water dries up, the word of Yahweh directs Elijah to go to the home of a widow in ZAREPHATH, a small town under the jurisdiction of Sidon. Both the location and circumstances are significant. In Phoenicia too — the homeland of Jezebel and her god Baal Melqart — the drought has struck (as Menander reports; cf. Josephus *Ant.* viii.13.2); Yahweh has shut up Baal's heavens. (According to an early Phoenician [Ugaritic] myth, when drought is upon the land Baal is dead, but when he lives "the heavens rain oil, the wadis run with honey" [see Coogan, p. 112].) But the life-sustaining blessings that are being withheld from Israel, because Yahweh's word is no longer heeded there while Baal is worshiped, are now bestowed on Elijah in Baal's own land and shared with a Phoenician widow who took Yahweh's word seriously enough to share her last morsel with His prophet (cf. Dt. 32:15-21).

b. The Widow's Son Revived (vv. 17-24). Through Elijah's ministry an even greater blessing is in store for

this Phoenician widow: the supreme blessing of the covenant, the gift of life (Dt. 30:19f.; 32:47). In ancient Near Eastern societies the situation of a WIDOW was desperate — especially if she had no son. Such is the prospect of this Phoenician widow when her son dies. But Elijah intercedes for her and the life of her son is restored. In this episode, too, reliance on Baal and his associate gods for the restoration of life seems to be directly challenged (cf. Coogan, p. 31).

4. Trial on Mt. Carmel (1 K. 18:1-46). "In the third year" (according to later tradition the drought lasted three years and six months; cf. Lk. 4:25; Jas. 5:17) Yahweh directs Elijah to announce to Ahab that He is about to send rain. Elijah's approach is indirect. He shows himself first to Obadiah, one of Ahab's high officials, and asks him to announce his coming. From Obadiah's lips we learn how far Ahab had searched for Elijah (among all nations) and of the popular opinion that the Spirit of God had carried the prophet away to unknown hiding places.

When the king and Elijah meet again, the issues at stake are once more clearly exhibited: Ahab hails the prophet as "you troubler of Israel" (v. 17), and Elijah replies, It is you and your dynasty that have troubled Israel, "because you have forsaken the commandments of Yahweh and followed the Baals" (v. 18).

Elijah then issues a challenge to the gods of Ahab and Jezebel, a test of their power in the presence of "all Israel" (v. 19). The lone prophet of Yahweh will face the 450 prophets of Baal and the 400 prophets of Asherah on Mt. Carmel. The site was chosen no doubt because it was normally crowned with luxuriant growth (*see* CARMEL 1) and was thought to be a place where the power of Baal was especially potent.

Elijah first rebukes his watching countrymen ("How long will you go limping with two different opinions?") and calls them to decision ("If Yahweh is God, follow him; but if Baal, then follow him," v. 21). He then lays down the conditions of the test. Two bulls are to be presented for sacrifice, from which the devotees of Baal will have first choice. Elijah and the prophets of Baal will each prepare their sacrifice and lay it on the wood. Then they will pray; "and the God who answers by fire, he is God" (v. 24). To this the people assent, and the prophets of Baal can hardly demur, since Baal is the storm-god, "flashing his lightnings to the earth" (see *ANET,* p. 133).

Throughout the clear, hot day, the prophets of Baal implore their god to hear, hopping about the altar, raising their cultic cries, finally in desperation gashing their bodies with knives and lances. But Baal remains silent. At noon Elijah mocks with merciless sarcasm; "Cry louder, for he is a god. He may be off somewhere meditating; maybe he has been side-tracked; maybe he is on a journey; perhaps he is sleeping and has to be awakened" (author's *ad sensum* tr. of v. 27). Yet Baal does not act.

As evening approaches Elijah calls the Israelites to gather around him. He rebuilds a crumbled altar of Yahweh (using twelve stones to represent the twelve tribes of Israel, v. 31), digs a trench around the altar, prepares the sacrifice, and has the whole thing drenched with water until the trench itself is filled. Then, when the hour of sacrifice has come, he prays that Yahweh will let it be known that He is God in Israel, that Elijah is truly His prophet and has been acting on His instructions, and that He is reclaiming Israel for Himself (vv. 36f.). Then Yahweh answers by fire, which consumes the sacrifice, the wood, the altar, and the water. At this the people acknowledge, "Yahweh, He is God; Yahweh, He is God" (v. 39).

But the confrontation is not finished until the land is purged of those who devoted themselves to Baal (cf. Dt. 13). Imperiously ignoring the king, Elijah orders the execution of the prophets of Baal, and the people obey him (v. 40). By day's end King Ahab stands alone over against the prophet and the people.

The time has now come for Yahweh to give rain once more. Elijah announces it and urges Ahab to feast in anticipation (v. 41). Returning to the top of Carmel, Elijah bows down and prays. At last a small cloud "like a man's hand" rises from the sea, and Elijah warns Ahab of the approaching storm. While the darkened heavens pour down a "great rain," Elijah, strengthened by Yahweh, runs before Ahab the 27 km. (17 mi.) to the king's residence in Jezreel.

5. At Mt. Horeb (1 K. 19:1-21). Ahab's report to Jezebel does not subdue her. Boldly she informs Elijah that she will kill him within a day's time. Triumphant one day, a fugitive the next, Elijah flees southward. Deep within the Negeb and alone, he prays that he might die and be released from his burdensome and apparently hopeless mission (v. 4; cf. Nu. 11:11-15). But Yahweh's work for Elijah is not finished; so He sends food and water rather than the sleep of death.

Thus sustained, Elijah travels forty days and nights to Mt. Horeb/Sinai (vv. 5-8) — the mountain where Moses had received the tables of the covenant during a stay of forty days and nights, had interceded for the Israelites after they had sacrificed to a golden calf (Ex. 24:12-18; 32:30-35), and had been hidden in a "cleft of the rock" while Yahweh passed by and His mercy and justice were proclaimed (33:12–34:7). Now Elijah sits in a cave on Mt. Horeb and pleads his own case *against* Israel, calling for judgment upon Israel for its apostasy. But when Yahweh passes by He is not in the wind, the earthquake, or the fire; He is present in the quiet stillness (1 K. 19:11f.). When questioned a second time about his purpose at the mount of God, Elijah renews his accusations against Israel (v. 14) — a complete reversal of Moses' intercession.

This time it is Yahweh who refuses to give up on Israel. Elijah must return and continue his mission. Two kings (Hazael of Syria and Jehu of Israel) and a prophet (Elisha) are to be anointed as Yahweh's agents to bring judgment on Israel — judgment for Israel's purging, not its destruction; Yahweh will leave a REMNANT in Israel who have not "bowed to Baal" nor "kissed him" (v. 18). The narrator evidently recognizes that in the anointing of Elisha, Elijah is to receive his "Joshua" who will finish his work. Is Elijah, like Moses, kept from completing his mission because he faltered under the severe aggravation of Israel's stubbornness? That analogy, too, is hinted at.

Having returned from Horeb, Elijah immediately seeks out Elisha; he finds him plowing the fields (the drought has been broken). Elijah casts his mantle on the young man and departs. This symbolic act is understood by Elisha, who holds a feast with his family and then leaves all to "minister" to Elijah (cf. Josh. 1:1).

B. Judgment on Ahab and Jezebel Announced (1 K. 21:17-29). Jezebel's continuing influence over Ahab is illustrated in the story of Naboth's vineyard. With blatant disregard for justice, she secures Naboth's execution on false charges and delivers to her husband the property he coveted. Although he may have been innocent of his queen's procedures, Ahab asks no questions when Jezebel triumphantly announces to him that Naboth is dead and his vineyard can be had for the taking.

Yahweh then sends Elijah yet again to confront Ahab, while he is still in the vineyard asserting his royal claim (vv. 17-24). Elijah's accusation lays responsibility directly on the king, and the judgment falls on him and his dynasty. They will share the fate of Naboth and that of the dynasties of Jeroboam I and of Baasha. Jezebel, too, will not be spared (v. 23).

This would have been the end of the matter had Ahab not humbled himself before so radical a judgment. Elijah is told that because of Ahab's response Yahweh's judgment will be postponed until the days of Ahab's sons (vv. 27-29).

C. Elijah and Ahaziah (2 K. 1:2-16). Ahaziah is perhaps even more exclusively devoted to Baal than his father Ahab. Seriously injured by a fall, he sends to inquire of BAAL-ZEBUB, a god worshiped in the Philistine city of Ekron. This blatantly disloyal act moves Yahweh once more to send His servant Elijah to challenge the house of Omri. Through His angel He commissions the prophet to announce the king's death — for it is Yahweh the God of Israel who heals or takes away life. The prophet accosts the king's emissaries and delivers his message, and they return to Ahaziah with a word from Yahweh, not from Baal-zebub.

Recognizing Elijah by the description of his garb, the king sends a company of soldiers to arrest him. They find him sitting high on a promontory and demand that he come down to them: "O man of God, the king says, 'Come down'" (v. 9). But the servant of Yahweh replies with fitting irony: "If I be a man (*'îš*) of God, let fire (*'ēš*) come down from heaven and consume you and your fifty" (v. 10). Then — as with Moses in the wilderness (Nu. 16:35) — Yahweh sends fire from heaven to vindicate His servant. The whole procedure is repeated (vv. 11f.): but when the king's third emissary shows Yahweh's servant due respect, Yahweh's angel instructs Elijah to accompany the king's officer and deliver His message to the king's face (vv. 13–15a). The episode concludes with Elijah's prophecy being fulfilled (v. 17).

D. Elijah's Translation (2 K. 2:1-12). The final episode tells of the events surrounding the termination of Elijah's ministry and the transfer of his prophetic mission to Elisha. Concerning the significance of Elijah's final movements in the land we can only conjecture. The places visited (Gilgal, Bethel, Jericho) are all memorable sites in Israel's traditions; but they appear also to have been towns to which the communities of the prophets were attached. In any case, a central concern of the whole narrative unit appears to be Elisha's special qualifications and his designation to continue Elijah's mission as mediator of Yahweh's royal presence in Israel, at this time when its kings had become apostate.

Recognizing that the day has come when Yahweh will take him away, Elijah seeks to release Elisha from further service to him. But Elisha refuses to accept release — not once, but three times (vv. 2, 4, 6). His tenacious refusal to leave his master's side suggests that he recognizes that his work as "minister" to Elijah is not finished and indicates his determination to carry on Elijah's work.

At the Jordan Elijah's mantle (like Moses' rod at the Red Sea) opens a path through the waters, and Elijah and Elisha cross the river to a region outside the Promised Land (v. 8). There Elijah asks his faithful "minister" what final bequest he desires of him. Elisha's answer (v. 9) further bespeaks his dedication to carry on Elijah's ministry; he requests the firstborn's portion of Elijah's only legacy.

In Elijah's response the text contains a troublesome ambiguity. The whole context, however, points to a reading that reflects Elijah's sense of relief at his imminent release from his mission, and his reluctance to pass on so onerous a task to his young friend. On this reading, Elijah's words should be rendered: "You have asked for a grievous burden." His further word makes clear his recognition that what Elisha requests is not his to grant — it lies with Him who commissions the prophets (v. 10).

The moment of Elijah's final departure, like so much of his ministry, is charged with significance. (1) It evokes memory of Moses' death and mysterious burial: both men are taken by Yahweh — outside the promised land, as a testimony against wayward Israel — with no tomb for Israel to convert into a shrine to rival the sanctuary of Yahweh. (2) The fiery host sent to escort Elijah discloses that Yahweh's host has accompanied Elijah's ministry and thus constitutes a divine vindication of Elijah as a true man of God (cf. 2 K. 6:17). (3) Yahweh's translation of Elijah demonstrates that it is to Yahweh, not to Baal, that the fiery chariots of heaven belong; and to Him, not to the gods of Baal's pantheon, belongs the power to bestow immortality on man. (4) That Elisha sees Elijah as he is taken up to heaven, and that Elijah's mantle is left for Elisha, disclose that Elisha has received his request and that the prophet's commission has been placed upon him — the second Moses has truly been given his Joshua (*see* ELISHA). (5) Elisha's epithet concerning Elijah ("My father, my father! the chariots of Israel and its horsemen!" v. 12) not only betokens Elisha's devotion to Elijah but also hails the departing prophet as the true source of Israel's power, in distinction from the apostate royal house.

E. A Letter to Jehoram (2 Ch. 21:12-15). The author of Chronicles adds one more episode to Elijah's ministry. He relates the substance of a letter sent by Elijah to King Jehoram of Judah. With his wife Athaliah, that apostate king had introduced the policies of Ahab into the southern kingdom and executed his royal brothers to cut off any political opposition. Elijah sets himself against this king also. He boldly lays out the charges against him in Yahweh's name (v. 12) and pronounces Yahweh's fearful judgment on him (vv. 14f.).

This account has occasioned lengthy discussions because of the chronological problems involved. According to 2 K. 3 it is Elisha who earlier accompanies the combined forces of Jehoshaphat (Jehoram's father) of Judah and Jehoram of Israel in a campaign against Moab. The best solution is that Elisha accompanied these armies on behalf of an aged Elijah; Elijah, then, outlived Jehoshaphat and, when he heard of Jehoram's apostasy and executions, sent him a sharp letter of condemnation, lacking the physical strength to face the king in person. If, as is likely, Jehoram committed these atrocities shortly after his father's death in 848 B.C., this letter may be dated as early as 847, and Elijah's translation may have taken place the same year.

III. In the Latter Prophets (Mal. 4:5).—Although Elijah's ministry marked a point of transition in the ministry of the prophets (*see* PROPHECY), and he completed his work some fifty years before Amos, he is mentioned but once in the literature of the writing prophets. At the very end of his prophecy, Malachi makes the momentous announcement: "Behold, I will send you Elijah the prophet before the great and terrible day of Yahweh comes. . . ." Just as other prophets announced the coming of another "David" (Ezk. 34:23f.; 37:24f.; etc.), so Malachi announces the coming of another "Elijah." Through his mission the generations in Israel will be united in a purified service of Yahweh, lest the Day of Yahweh (*see* DAY OF THE LORD) bring only a curse on the land. The announcement in 3:1 probably has reference to the same prophetic ministry: "Behold, I send my messenger to prepare the way before me. . . ." Against the background of the Elijah-Elisha narrative as preserved in Kings, this announcement of the coming of another Elijah, to be followed by a climactic redemptive event, strongly suggests that the Elijah to come will also have his Elisha.

IV. In Intertestamental Literature.—In his "praise of famous men," Ben Sira summarizes what is known of

Elijah from Kings and Chronicles and echoes Malachi's prophecy concerning the coming Elijah (Sir. 48:1-14). 1 Maccabees reports Mattathias' statement that "Elijah because of a great zeal for the law was taken up into heaven" (2:58). Two subsequent references to a prophet who will come and give decisions regarding uncertain matters are probably allusions to the expected Elijah (4:46; 14:41). In an apocalyptic dream-vision 1 Enoch foretells the return of Elijah before the judgment and before the appearance of the great apocalyptic lamb (89:12). A later reference to a man who "shall ascend" during the apostate sixth world-week is probably a reference to Elijah (93:8). In the Assumption of Moses is found a brief recounting of Elijah's reproof of Ahaziah (Asm. M. 2:14).

V. In the NT.–As is evident from Ben Sira and 1 Enoch (cf. also 1 Macc. 4:46; 14:41), Jewish eschatology in the intertestamental period picked up the reference to Elijah in the prophecy of Malachi and — in part, no doubt, due to the dramatic translation of Elijah — included the return of Elijah as a distinct element in its expectations for the end time. From the NT also it is evident that the expectation of Elijah was widespread in Palestine in the 1st cent. A.D. (No explicit reference to Elijah is found in the sectarian literature from Qumrân, though some have thought that the "prophet" of 1QS 9:11 may be Elijah in the role of messianic herald; cf. P. Wernberg-Møller, *Manual of Discipline* [1957], pp. 135f.)

Statue from Mt. Carmel showing Elijah victorious over a Baal prophet. The Latin text on the front panel is Sir. 48:1 (D. Baly)

A. Elijah and John the Baptist. According to Mt. 17:9-13 par. the disciples at one point asked Jesus about the scribal teaching that "first Elijah must come." Jesus replied that Elijah had already come, and then alluded to John the Baptist. Jesus' identification of John the Baptist as the promised Elijah is even more explicit in Mt. 11:14. This accords with Luke's account of the angelic announcement to Zechariah, which points to John as the fulfillment of Malachi's prophecy (1:17; cf. also Mk. 1:2). (By this identification Jesus was offering a subtle self-disclosure as the Elisha/Joshua — His Semitic name — who would complete John's ministry.) According to Jn. 1:21, 23 John the Baptist, when questioned by the Jews, refused identification of himself with Elijah, as well as with Messiah or "the prophet." But his garb (Mk. 1:6 par.), his asceticism (Mk. 1:6 par.; Mt. 11:18 par.), his ministry in the wilderness (Mk. 1:4 par.; Mt. 11:7 par.), and his bold rebuke of the powerful (Lk. 3:7-14; Mk. 6:18 par.) all evoked the memory of Elijah and suggested that he was indeed the Elijah to come, the one in whom prophecy was once more renewed as a sign of the dawn of the messianic age.

B. Elijah and Jesus. When John the Baptist described Jesus as the one who would "baptize with the Holy Spirit and with fire" (Mt. 3:11 par.), he may have hinted at an analogy between Jesus' ministry and Elijah's. James and John clearly made the association when they asked Jesus if He wished them to "bid fire to come down from heaven and consume" the Samaritans (Lk. 9:54). The nature of Jesus' ministry itself suggested to many that He was the Elijah to come (Mk. 6:15 par.; cf. 8:28 par.). Jesus Himself alluded to Elijah's journey to Zarephath and suggested a parallel between His own ministry and Elijah's (Lk. 4:25f.). He may also have alluded to Elijah's ministry when He said of Himself, "I came to cast fire upon the earth" (Lk. 12:49).

On the mount of transfiguration Elijah appeared with Moses and together they conversed with Jesus (Mk. 9:4 par.) about the "passage" (*éxodos*) He was to accomplish through His suffering at Jerusalem (Lk. 9:31f.). As fellow servants in God's mission, they were speaking with the last Joshua/Elisha, who would finish their work and lead Israel into God's promised "rest."

C. In the Epistles and Revelation. Elijah is mentioned twice in the Epistles. Paul recalls how Elijah pleaded with God against Israel, and how God replied by referring to a faithful remnant, the seven thousand "who had not bowed the knee to Baal" (Rom. 11:2-4). James points to Elijah, "a man of like nature with ourselves," to illustrate that "the prayer of a righteous man has great power in its effects" (Jas. 5:17f.).

The "two witnesses" in Rev. 11, from whose mouths fire proceeds to destroy their enemies (v. 5), who have "power to shut the sky, that no rain may fall . . . and . . . power over the waters to turn them to blood, and to smite the earth with every plague" (v. 6), and who go "up to heaven in a cloud" (v. 12), are usually understood to refer to Moses and Elijah. Some also suppose that the three and a half years of Rev. 12:14 has its prototype in the years of drought called down upon the land by Elijah (cf. Lk. 4:25; Jas. 5:17).

VI. In Early A.D. Extrabiblical Literature.–*A. Judaic.* Philo recalls "that [Elijah] did not die but was carried up with a whirlwind as it were into heaven and went up there to be among the angels" (*Quaestiones et solutiones in Genesin* i.86). Elsewhere he speaks of a coming redeemer, who seems to correspond to the Elijah figure of Malachi (*De praemiis et poenis* 28.163; 29.16). 2 Baruch (*ca.* A.D.

70) refers to Elijah's being fed by ravens (77:24f.). 4 Ezra mentions the answers to Elijah's prayers for rain and for the resuscitation of the widow's son (7:109). It also refers to "the men who have been taken up" and who will appear before the Messiah, presumably alluding to Enoch and Elijah (6:26). In the Mishnah Elijah appears as the one who will: (1) return to prepare the tribes of Israel for the messianic age, (2) resolve all the religious and judicial controversies with which the rabbis have wrestled, (3) restore the flask of manna, the flask of water for purification, the flask of oil for anointing, and Aaron's rod, (4) anoint the Messiah, and (5) have a part in the resurrection of the dead (see Friedmann; Klausner). According to Justin Martyr, the Jew Trypho insisted that even if Messiah had come he could not be known "until Elijah comes, and anoints him and makes him manifest to all" (*Dial.* 8.14; cf. 49.1). (For the many references to Elijah in the Talmud, and for his continuing role in the Jewish sabbath liturgy and Passover ritual, see Friedmann and Wiener.)

B. Christian. In NT Apocrypha and Pseudepigrapha, Elijah is frequently mentioned as a model both of ascetic piety and of bold rebuke of apostasy. His translation is recalled as analogous to Jesus' ascension; and, as one who was taken up to heaven in the body, he is frequently paired with Enoch, appearing with him in heaven or playing a role in the final eschatological events. (For the references, see H-S.)

For the church fathers Elijah was the greatest of the prophets, a model of piety and righteous zeal. His miracles were regularly interpreted as allegorical references to NT realities, and his relation to John the Baptist was thoroughly explored. As John heralded Jesus' first appearance, so, it was thought, Elijah would appear to announce His return in the day of judgment. (For a succinct overview of patristic references, see Wiener, pp. 145-47.)

2. [Heb. *'ēlîyâ*] (1 Ch. 8:27); AV ELIAH. A "head of a father's house" of the tribe of Benjamin.

3. [Heb. *'ēlîyâ*]. (Ezr. 10:21). A priest in the time of Ezra, one of the "sons of Harim," who is listed among those who had married foreign women.

4. [Heb. *'ēlîyâ*] (Ezra 10:26); AV ELIAH. An Israelite in the time of Ezra, one of "the sons of Elam," who is listed among those who had married foreign women.

5. [Gk. *Ēlion*] (Jth. 8:1); AV ELIHU; NEB ELIAS. An ancestor of Judith. J. H. STEK

ELIJAH, APOCALYPSE OF (COPTIC). An anonymous series of oracles attributed to Elijah only in the title. The work as a whole is known today only in Coptic. The existence of a brief Greek fragment suggests that the Coptic is a translation from the Greek.

The Apocalypse of Elijah is clearly Christian in its present form. Scholars disagree whether it is a Christian composition based on Jewish traditions or a Christian edition of one or more originally Jewish documents. The current form of the work can be dated to the second half of the 3rd cent. A.D., on the basis of 2:23-45, a passage that reflects Palmyrene domination of Egypt and antagonism between Palmyrenes and Sassanians. J. M. Rosenstiehl (pp. 75f.) argues that 2:23-45 is a late addition, and that most of the work is an Egyptian Jewish document with Essene traits dating to the 1st cent. A.D.

The document contains a review of history in the form of prediction. Eschatological motifs include a physical description of the eschatological adversary, the return of Enoch and Elijah, the destruction of the world, cosmic transformation, and personal afterlife.

Charlesworth, *Pseudepigrapha and Modern Research* (1976), pp. 95-98.

A. Y. COLLINS

ELIJAH, APOCALYPSE OF (HEBREW) [*sēper 'ēlîyāhû*–'The Book of Elijah']. An Aramaic and Hebrew account of the eschatological secrets that Michael revealed to Elijah on Mt. Carmel. In midrashic style the events are related to verses in Isaiah, Ezekiel, Zechariah, Daniel, and Deuteronomy.

A detailed eschatological timetable follows a report of Elijah's divinely conducted journey to the ends of the earth. It includes: (1) wars between Rome and Persia; (2) appearance of the eschatological adversary whose name (or mother's name) Gigit and physical description are provided; (3) return of the three exiles; (4) advent of the Messiah ("Yinnon," cf. T. B. *Sanhedrin* 98b) accompanied by Gabriel, angels of destruction, and thirty thousand righteous; (5) defeat of Gog and Magog; (6) defense of Jerusalem by God and Messiah; (7) destruction of non-Jewish cities; (8) resurrection of the dead, punishment of the wicked in Abaddon, and reward of the righteous who enjoy the marvelous material blessings of the new age in which Torah and Peace reign; (9) descent of heavenly Jerusalem.

Various scholars have attempted to date the work by identifying the personalities and events involved in the Roman-Persian wars. Buttenwieser placed the work in A.D. 261 and identified the "last king of Persia" as Shapur I and the eschatological adversary as Odenathus of Palmyra. According to S. Krauss (*Monumenta Talmudica*, 5/1 [1914], 53f.) the work was written a decade earlier (Persian king = Adashir; adversary = Alexander Severus). Y. Even-Shemuel (pp. 31-54) is more likely correct in assigning the work to the early 7th cent. A.D. (Persian king = Chosroes II; adversary = Phocas).

The work entitled *Pereq 'Ēlîyāhû* (a later recension of *Sēper 'Ēlîyāhû*) was produced after the rise of Islam.

Bibliography.–M. Buttenwieser, *Die hebräische Elias-Apokalypse* (1897) (includes Ger. tr.); Y. Even-Shemuel, *Midreshi Ge'ulah* (1953-54) (includes *Pereq 'Ēlîyāhû*). Eng. tr. in G. W. Buchanan, *Revelation and Redemption* (1978), pp. 426-441.

D. B. LEVENSON

ELIKA ē-lī'kə [Heb. *'ĕlîqā'*]. A Harodite (Uradite), one of David's "thirty" guards (2 S. 23:25); omitted from the list in 1 Ch. 11:27.

ELIM ē'lim [Heb. *'êlim*–derivation uncertain, perhaps pl. of *'ayil*, 'robust tree' or of *'ēl*, 'god']. One of the places where the Israelites under Moses stopped in their journey from the Red Sea (or Sea of Reeds) to Mt. Sinai. From the text of Ex. 15:22–16:1 it appears that Elim lay between MARAH and the Wilderness of Sin (but cf. Nu. 33:8-12, where an encampment by the Red Sea comes between Elim and the wilderness of Sin). Many scholars, however, feel that the text is composite here and that the section mentioning Marah was not originally part of the itinerary that listed Elim as a place of encampment.

The traditional site of the oasis at Elim where the Israelites camped en route from Egypt to Sinai (D. Baly)

In this view, Elim was an oasis in the general area known as the Wilderness of SHUR.

The location of Elim remains uncertain despite wide acceptance of the proposal to locate it in the Wâdī Gharandel. The question is closely tied to the whole problem of the route of the Exodus. (*See* EXODUS, ROUTE OF; WANDERINGS OF ISRAEL.)

E. D. WELCH

ELIMELECH ē-lim'ə-lek [Heb. *'ĕlîmelek*–'God is king'; Gk. *Abeimelech, Alimelek*]. A member of the tribe of Judah, a native of Bethlehem, a man of wealth, and probably head of a family or clan (Ruth 1:2f.; 2:1, 3; 4:3, 9). He lived during the period of the judges, had a hereditary possession near Bethlehem, and is chiefly known as the husband of Naomi the mother-in-law of Ruth. Because of a severe famine in Judea he emigrated to Moab with his wife and sons, Mahlon and Chilion. Not long afterward he died, and his two sons married Moabite women, Ruth and Orpah. During the ten years spent in Moab the two sons died and the three widows were left. The sequel is told in the book of Ruth. *See also* NAOMI; RUTH.

J. J. REEVE

ELIOENAI el-i-ō-ē'nī [Heb. *'elyô'ênay*; Gk. *Eliōnas, Eliadas*]; AV, NEB, also ELIONAS (1 Esd. 9:22), ELIADAS (1 Esd. 9:28).

1. A descendant of the house of David (1 Ch. 3:22-24).
2. A Simeonite tribal chieftain (1 Ch. 4:36).
3. A member of a Benjaminite family (1 Ch. 7:8).
4. A member of the priestly house of Pashhur who divorced his foreign wife (Ezr. 10:22; 1 Esd. 9:22). The latter reference is apparently to the Eliezer of Ezr. 10:31.
5. A descendant of Zattu who divorced his foreign wife (Ezr. 10:27; 1 Esd. 9:28).
6. A priest in the time of Nehemiah (Neh. 12:41).

ELIONAS el-i-ō'nəs (AV 1 Esd. 9:22). *See* ELIOENAI 4.

ELIPHAL ē-lī'fəl, el'i-fəl [Heb. *'ĕlîpāl*–'God has judged']. Son of Ur, one of the mighty men of David's armies (1 Ch. 11:35). He should probably be identified with ELIPHELET (2), son of AHASBAI of Maacah (2 S. 23:34).

ELIPHALAT ē-lif'ə-lat (1 Esd. 9:33, AV); **ELIPHALET** ē-lif'ə-let (1 Esd. 8:39, AV). *See* ELIPHELET.

ELIPHAZ el'i-faz, ē-lī'faz [Heb. *'ĕlîpaz*–'God is victorious'(?)].

1. Son of Esau by Adah, and father of Teman, Omar, Zepho (or Zephi), Gatam, Kenaz, and Amalek (Gen. 36:4, 10-12, 15; 1 Ch. 1:35f., which includes a sister Timna).

2. One of Job's three friends, who came to "condole" and "comfort" him (Job 2:11). He is always given the precedence (cf. esp. Job 42:7), probably because of both his character and his age. He came from Teman, doubtless in Edom. Though he is evidently a rich chief, he is presented, like his friends, primarily as one of the wise; hence no details of his family are given, in contrast to Elihu.

He was a kindly man, whose outlook on life was dominated by a dream he once had (4:12-21; cf. 15:14-16; 22:2-4). Like his two companions, he was limited by the contemporary view that suffering must be the outcome and punishment of sin, so he had assumed that Job must have sinned grievously. But this assumption did not become clear until Job had challenged the justice of God, thereby shaking the rock on which Eliphaz stood (ch. 21); he then (22:5-11) charged Job with sins for which there was no evidence.

He has three speeches: chs. 4f., 15, and 22. In the first he is kindly, treating Job's sufferings as merely an example of the universal experience of sinful men and promising forgiveness and restoration if Job repents. In his second he shows his shock at Job's self-justification and challenges his whole concept of life; hence there is a sharper edge to his words: the picture of man's sin is darker and ends in an exaggerated description of the fate of the wicked. The third reveals his inward thoughts about Job and directly charges him with being one of the wicked; even here, however, he ends with a moving account of God's mercy to the penitent.

Eliphaz was a man of sterling character and sympathy, but his dogmatic insistence on explaining everything by the pattern of his own experience and understanding of God prevented his understanding Job. Job's failure to appreciate his remonstrances drew out the expression of wounded pride.

See also JOB.

H. L. ELLISON

ELIPHELEHU ē-lif'ə-lē'hū [Heb. *'ĕlîp^{e}lēhû*–'may God distinguish him']; AV ELIPHELEH. A Levite of the second order appointed with five others to "lead with lyres" when the ark was brought up to Jerusalem by David (1 Ch. 15:18, 21).

ELIPHELET ē-lif'ə-let [Heb. *'ĕlîpeleṭ*; Gk. *Eliphalatos* (1 Esd. 8:39), *Eliphalat* (1 Esd. 9:33)]; AV also ELIPHALET, ELIPHALAT; NEB also ELIPHALATUS, ELIPHALAT.

1. A descendant of David (2 S. 5:16; 1 Ch. 3:6, 8; 14:7).
2. Son of AHASBAI; one of David's heroes (2 S. 23:34), probably the Eliphal of 1 Ch. 11:35.
3. A Benjaminite descendant of Saul and Jonathan (1 Ch. 8:39).
4. A person who returned to Palestine in the time of Ezra (Ezr. 8:13; 1 Esd. 8:29).
5. A man who divorced his foreign wife during Ezra's reforms (Ezr. 10:33; 1 Esd. 9:33).

III. Later Tradition

I. Introduction.–A. Elisha the Man. In youth a son of the soil, Elisha hailed from Abel-meholah E of the Jordan (N. Glueck, *River Jordan* [1946], pp. 168-172; traditionally in the Jordan Valley S of Beth-shean [Eusebius, *Onom.*]), where his father Shaphat must have been a man of some means, for he was able to field twelve yoke of oxen. When Elisha was still a young man Elijah summoned him to take up the prophetic vocation (1 K. 19:19-21); he then spent some years as Elijah's assistant (until *ca.* 847 B.C.; *see* ELIJAH II.E). For the next fifty years (during the reigns of Jehoram, Jehu, Jehoahaz, and Jehoash) he continued with his own ministry in the northern kingdom. Like his predecessor, he remained unmarried, accompanied only by his servant Gehazi. Unlike Elijah, he lived among the people. His connections with the several prophetic communities (2 K. 2:1, 3, 5; 4:38; 6:1; 9:1) were close, and he was held in high regard by them, but his precise relationship with them remains uncertain. Although he made Samaria his home (2:25; 5:3, 9; 6:32), apparently he traveled often, at times ranging as far as Edom and Moab to the south (ch. 3) and Damascus to the northeast (8:7). Persons of all stations in life had ready access to him, and he had access to the highest in the land (4:13). He was bald (2:23 — apparently rare among the ancient Semites) and walked with a staff (4:29). Whether he wore Elijah's mantle as a sign of office is not known. At the time of Elijah's departure he apparently was garbed in conventional clothes (2 K. 2:12). From the day of his call his dedication to Elijah and Elijah's God was complete and did not wane (13:14-19). Confident in his commission from the God of Elijah, he feared no one (2 K. 3:13f.; 5:10-12; 6:32). When he died (shortly after 798 B.C.), he was buried in his homeland E of the Jordan (13:20).

B. Circumstances of His Ministry. His association with Elijah began shortly after the confrontation between Elijah and Ahab on Mt. Carmel, and he began his own ministry early in the reign of Jehoram (852-841 B.C.). Although the new king broke partially with the religious practices of his parents (2 K. 3:2), he continued in the ways of Jeroboam I and made no effort to uproot baalism among the people. Jehu's revolt brought a bloody end to the Omride dynasty and the Baal worship it had encouraged (chs. 9–10). Friendly relations continued between Judah and Israel, but Syria under Ben-hadad and Hazael was a constant threat. At times Syria raided Israel at will (6:8-10), and once even subjected Samaria to a long and devastating siege (6:24-31). Hazael took all Transjordan from Jehu (10:32f.), and Hazael and his son reduced Jehoahaz to vassalage, allowing him only a small police force (13:1-7). Politically, Israel's very existence was threatened, a condition from which Elisha foresaw relief only on his deathbed (13:14-19). Faithfulness to Yahweh was relatively rare and yet was manifested by various groups and individuals: the communities of the prophets, the Shunammite (ch. 4), the farmer from Baal-shalisha (4:42), the captive girl in Damascus (5:2f.), some of the elders in Samaria (6:32), Jehu (10:16-30), and Jehonadab son of Rechab (10:15f.). Elijah's bold ministry had failed to reform the house of Ahab or the nation generally. It was Elisha's role to carry forward that ministry and mediate Yahweh's redemptive presence among His people during these very troubled times.

C. Primary Sources. All that we know of Elisha comes from the narrative of his ministry found in Kings. The compiler apparently had an account that viewed the interlocking ministries of Elijah and Elisha against the background of Yahweh's ways with Israel in the days of Moses and Joshua (*see* ELIJAH I.C).

In Kings the story of Elisha's ministry is found for the most part in a single block of narrative (2 K. 2:1–8:6 — interrupted only at 3:1-3 to introduce the reign of Jehoram), to which 8:1-6 constitutes a conclusion. This is followed by accounts of Elisha's involvement in the anointings of Hazael (8:7-15) and Jehu (9:1-3) and of events surrounding Elisha's death (13:14-21). The order of materials in the major segment is not chronological (see the comms.), but neither is it haphazard. Following the account of Elisha's investiture (2:1-18), three large narrative units (3:4-27; 4:8-37; 5:1-27) are interspersed between four smaller segments offering brief accounts of additional acts of Elisha (2:19-25; 4:1-7; 4:38-44; 6:1-7), each of which refers to acts performed on behalf of the prophetic communities. Central to this structure is the account of Elisha's dealings with the Shunammite.

Later, after two extended narrative panels (6:8-23; 6:24–7:20) concerning Elisha's involvement in the Israel-Syria conflicts (each resulting in deliverance for Israel), we are told how the recital of "all the great things Elisha has done" moved the king to restore the Shunammite's family inheritance (8:1-6). The subsequent accounts of Elisha's fulfillment of Elijah's commission to anoint Hazael and Jehu (1 K. 19:15f.) are integrated by the author into his story of the kings of Israel and Judah, as is also his account of Elisha's death and accompanying events. Thus the author shows that Elisha ("my God saves") completed Elijah's mission; he depicts Elisha's ministry as one through which Yahweh was savingly present among His people.

II. Elisha's Ministry.–A. Call (1 K. 19:15-21). At Horeb Elijah's mission to Israel was renewed, with specific commission to anoint Hazael king of Syria, Jehu king of Israel, and Elisha to be prophet in his place. Each of these three was to be used by Yahweh to chastise and purge Israel. Elijah sought out Elisha first, finding him plowing in his father's fields. He cast his mantle on the young man's shoulders and passed on without a word. Elisha understood and committed himself immediately, the firmness of his decision evident in the formal leave he took of his family, which included symbolically divesting himself of the implements of the soil — his slaughtering of the oxen and boiling them with their yokes (and plow?). Henceforth he would be the devoted servant of Elijah and Elijah's God.

B. Investiture (2 K. 2:1-18). Elisha knew when it was time for Yahweh to take Elijah (vv. 3, 5), but when Elijah offered to release him from his vocation (three times: at Gilgal, v. 2, at Bethel, v. 4, and at Jericho, v. 6), he steadfastly refused. Accordingly, his final request of his master was that he might inherit a "double share" of his spirit (v. 9), i.e., the inheritance of the firstborn. Elijah's response (*see also* ELIJAH II.D), "If you see me as I am being taken from you, it shall be so for you," was charged with double meaning: (1) if God allows it — only He can grant your request — and (2) if your resolve remains firm and you stay with me to the end. When Elijah was taken, Elisha was there, and he saw. And Elijah's mantle remained! Elisha's investiture was of Yahweh. Hailing the

departing Elijah as "father" and as the "chariots and horsemen of Israel" — Israel's true source of strength — he took up Elijah's mantle and returned in the spirit and power of Elijah back across the Jordan to the scene of Elijah's labors. There he was greeted by the sons of the prophets as Elijah's successor (v. 15).

C. Deeds (2 K. 2:19–8:6). 1. *Initial Signs Characterizing His Ministry* (2 K. 2:19-25). *a. Healing the Spring by Jericho* (2 K. 2:19-22). Elisha cast salt into the spring and pronounced the healing word of Yahweh. As a result its water no longer caused death or miscarriage (cf. Ex. 15:25).

b. Cursing the Youths of Bethel (2 K. 2:23-25). Proceeding past Bethel to Mt. Carmel, Elisha was ridiculed by the sons of the Bethelites, who had learned from their fathers to despise the representatives of Yahweh. When he cursed them in the name of Yahweh, two she-bears attacked them and killed forty-two of them.

Elisha's ministry would mean life for those who honored Yahweh but death for those who despised him.

2. Prophecy Against Moab (2 K. 3:4-27). Elisha accompanied the army of Israel (no doubt as Elijah's proxy; *see* ELIJAH II.E) when Jehoram went to suppress Moab's rebellion early in his reign. Refusing to serve Jehoram (v. 13), he responded to Jehoshaphat's inquiry. This one time he sought musical inducement to obtain an answer from Yahweh (*see* PROPHECY). Though victorious, the Israelites left the land without accomplishing their purpose (v. 27).

3. Multiplying the Widow's Oil (2 K. 4:1-7). A poor widow whose two sons were to be taken as bondmen for a debt she could not pay appealed to Elisha, at whose word her one jar of oil in the house filled many others borrowed from her neighbors. The market value of the oil thus supplied enough to pay her debt and provide for her and her sons (cf. 1 K. 17:8-16).

4. A Son for the Shunammite (2 K. 4:8-37). *a. The Son Given* (4:8-17). Having enjoyed the gracious hospitality of a wealthy woman of Shunem (4.8 km. [3 mi.] N of Jezreel) on his frequent passage through the town, Elisha sought to recompense her. When she declined and he learned that she was childless and her husband already old (she faced the prospect of early and desolate widowhood), Elisha promised her a son. Within a year the child was born.

b. The Son Revived (4:18-37). A few years later, when the Shunammite's son suddenly sickened and died, she turned to Elisha again and Elisha revived her son (cf. 1 K. 17:17-24; Lk. 7:11-17).

By centering this two-part narrative in his account of Elisha's deeds, the author demonstrated the significance of Elisha's ministry, namely, that God was present with His people to save.

5. Food for a Community of the Prophets (2 K. 4:38-44). *a. Cleansing the Poison Pottage* (4:38-41). When he visited the community of the prophets at Gilgal during a famine, Elisha played the host and instructed his servant to prepare a pot of gruel for the brothers. When some poisonous wild gourds (probably *citrullus colocynthis,* a strong purgative) were innocently added to the ingredients, Elisha threw some meal into the pottage and the brothers ate it without harm.

b. Multiplying the Loaves (2 K. 4:42-44). Circumstantial connections with the preceding episode can be deduced from the juxtaposition of the two accounts and the parallels that link them. A man from Baal-shalisha brought Elisha the first fruits of his barley harvest. These were to be consecrated to Yahweh (Lev. 23:15-17; Dt. 16:9-11) and were normally for the priests (Lev. 23:20). In bringing them to Elisha the man acknowledged that Elisha was the true representative of Yahweh. Elisha commanded that the loaves be distributed among the hundred men present (presumably the members of the prophetic brotherhood). Although his servant protested that the amount was insufficient, all ate their fill, and there was surplus, according to Yahweh's word (cf. Mt. 14:13-21, par.; Mt. 15:32-39).

6. Healing Naaman (2 K. 5:1-27). Naaman, a Syrian general afflicted with leprosy, heard about Elisha and went to Samaria bearing large gifts and requesting healing from the king of Israel (Jehoram?). Elisha requested that Naaman be sent to him (v. 8), and then instructed him to wash seven times in the Jordan. Reluctant at first, Naaman ultimately obeyed and was healed. He committed himself to worship only Yahweh and sought assurance from Elisha that he would be pardoned when his official duties required him to participate in the cult in the temple of Rimmon (Hadad). Elisha assured him with his parting word, "Go in peace" (v. 19). The greed of Elisha's servant Gehazi brought Naaman's leprosy on his own head. This episode shows that the true power of healing the world's sickness was present only in Israel, with the God of Elisha.

7. Recovering the Axe Head (2 K. 6:1-7). Apparently, in this time of widespread apostasy, membership in the prophetic brotherhoods was expanding. The community (at Jericho? Gilgal?) undertook to enlarge their domicile. In the process one of them lost the iron head of his borrowed axe in the Jordan. The distress with which he turned to Elisha for help suggests that, unable in his poverty to pay for the expensive tool, he was threatened with a debtor's bondage. Elisha threw a stick into the Jordan where the axe head had sunk; the axe head rose to the surface and the distraught man recovered it.

D. Involvement in the Israel-Syria Conflicts (2 K. 6:8–7:20). To the above account of the acts of Elisha the author of Kings appends two stories of Elisha's involvement in the Israel-Syria wars. The king of Israel is not named (Jehoram, M. Noth, *History of Israel* [2nd ed. 1960], p. 243 n. 1; Jehoahaz or Jehu, *BHI,* p. 244 n. 59; Jehu or Joash, Gray, pp. 513, 518), so the dates of the events are not known.

1. Syrian Raids Frustrated (2 K. 6:8-23). During a period of frequent Syrian incursions into Israel, Elisha provided his king with crucial intelligence that saved him repeatedly from Syrian ambushment. The Syrians retaliated by trying to capture Elisha at Dothan, but were struck with blindness (*sanwērîm,* cf. Gen. 19:11) and led into Samaria. In this episode Elisha is depicted as the eyes of Israel's army and the captain of the hosts of Yahweh; he, not the king, is Israel's defense.

2. Siege of Samaria Lifted (2 K. 6:24–7:20). During a long and bitter siege of Samaria by Ben-hadad, when the poorest of the city, the widows, were reduced to eating their children, the king vowed to kill Elisha. But Elisha told him that before another day passed, food would be so abundant in the city that the market would be glutted. Four desperate lepers found the Syrian camp deserted, and before sunset the next day, food was cheap in the market of Samaria.

E. Restitution of the Shunammite's Estates (2 K. 8:16). This episode constitutes the conclusion to the main body of the acts of Elisha, although it is itself not one of Elisha's acts but only a recounting of some of his deeds. Having been advised by Elisha to take up temporary residence outside the land to escape the seven-year famine Yahweh was about to bring on Israel (perhaps the famine of 4:38-41), the Shunammite, evidently now a widow, returned at the end of the seven years and appealed to the king for her expropriated property. She interrupted Gehazi's story of Elisha's great deeds (which the king [unnamed] had asked him to recount) just as Gehazi was telling of Elisha's res-

toration of her son to life. When the Shunammite confirmed Gehazi's account, the king commanded that her property be restored, together with all the produce that had been harvested from her fields.

F. Anointing Kings (2 K. 8:7–9:13). Following the account of the acts of Elisha, the author of Kings returns to his narrative of royal affairs. Interwoven with this narrative are his accounts of how Elisha completed Elijah's commission to anoint Hazael king of Syria and Jehu king of Israel (cf. 1 K. 19:15f.).

1. Hazael (2 K. 8:7-15). While on a journey to Damascus, Elisha was approached by Hazael, who had been sent by Ben-hadad (I? II?) to inquire about the outcome of his sickness (cf. 1:2). In reply, Elisha foretold the evil that Hazael would do to Israel. In spite of his innocent protestations, Hazael returned with Elisha's word to the king and the next day smothered him in his bed and took the throne. The year was *ca.* 842 B.C. (*BHI*, p. 250).

2. Jehu (2 K. 9:1-13). Shortly after Hazael's accession to the throne in Damascus, Jehoram, with the help of the recently crowned Ahaziah of Judah, attempted to recover Ramoth-gilead from the Syrians. He was wounded in the fighting and withdrew to recover in Jezreel. Elisha then sent one of the sons of the prophets to anoint Jehu, an officer in Jehoram's chariot corps. In the bloodbath that followed Jehu swept away the descendants of Ahab in both Israel and Judah. The sword of Elisha (1 K. 19:17) proved to be the sword of Yahweh's judgment in the hands of Hazael and Jehu.

G. Death and Burial (2 K. 13:11-21). *1. Prophecy to Jehoash* (13:11-19). Shortly after Jehoash came to the throne (798), Elisha fell ill. Jehoash went to visit the prophet and wept to see that the aged Elisha was dying. The words with which he hailed him, "My father, my father! The chariots of Israel and its horsemen!" are a duplicate of those with which Elisha summed up the significance of Elijah (2 K. 2:12).

Elisha's final deed was to lay his hands on the hands of Jehoash and shoot "Yahweh's arrow of victory, the arrow of victory over Syria!" (v. 17). Commanding the king to take arrows and strike the ground with them, Elisha was angered when the king did so only three times, for that meant that the king's triumphs would be limited to three victories.

2. Elisha's Grave Yields Life (2 K. 13:20f.). Shortly thereafter, Elisha died and was buried in his homeland E of the Jordan. When a dead body was hastily thrown into Elisha's tomb, it touched his bones and the man revived. Even in death, Elisha was the mediator of Yahweh's gift of life.

III. Later Tradition.–Elisha is mentioned but once in the intertestamental literature that has survived. In his praise of famous men, Ben Sira devotes a few lines to Elisha (Sir. 48:12-14) at the conclusion of his eulogy of Elijah. He recalls that Elisha was filled with Elijah's spirit and did not tremble before anyone.

In the NT Elisha is mentioned only once (Lk. 4:27), where his healing of Naaman is recalled as one of two instances in which prophets mediated God's mercies to Gentiles rather than to Israelites.

Although the authors of the Gospels seem clearly to have discerned in Jesus' ministry a fulfillment of that of Elijah (*see* ELIJAH V.B), there is some evidence that they also saw Jesus as being John the Baptist's Elisha. Note especially: (1) Jesus' baptism by John in the Jordan, at which time He received the Spirit that qualified Him for His ministry (Mk. 1:9-11 par.); (2) His continuing in a ministry like John's until John was removed from the scene, at which time He undertook His own distinctive ministry (Mk. 1:14; Mt. 4:12); (3) His movement among the people, together with His special association with the poor and outcasts; (4) His peripatetic ministry in Galilee and Samaria; (5) His miracles, which played a considerable role in His ministry and which were similar to those of Elisha: cf. (a) Jesus' healing of the ten lepers (Lk. 17:11-19) and Elisha's healing of Naaman (2 K. 5); (b) His multiplication of the loaves (Mt. 14:13-21 par.; 15:29-39; esp. Jn. 6:1-15) and Elisha's similar deed (2 K. 4:42-44); (c) His raising of the son of the widow of Nain (Lk. 7:11-17) and Elisha's raising of the son of the Shunammite (2 K. 4:17-37). For other possible parallels between the Gospel accounts of Jesus' ministry and that of Elisha, see Brown.

J. H. STEK

ELISHAH ē-lī'shə [Heb. *ʾĕlîšâ*–'God saves'; Gk. *Elisa, Eleisai*]. Mentioned in Gen. 10:4; 1 Ch. 1:7 as the eldest son of Javan, and in Ezk. 27:7 as the source from which the Tyrians obtained their purple dyes. On the basis of this latter statement attempts have been made to identify it with southern Italy or northern Africa. Josephus (*Ant.* i.6.1) identified Elishah with the Aeolians. The Targum on Ezekiel gives "the province of Italy." A place known as Alashia was mentioned in cuneiform records from the Middle Euphrates region, Hattusas, and Tell el-Amarna between the 18th and 13th cents. B.C., and this is probably the OT Elishah. Some section of Cyprus is probably indicated by the references, though distinct from the territory described as Kittim (Cyprus) in Ezk. 27:6.

R. K. H.

ELISHAMA ē-lish'ə-mə [Heb. *ʾĕlîšāmāʿ*–'God has heard'].

1. Grandfather of Joshua and son of Ammihud; leader of the tribe of Ephraim in the Exodus (Nu. 1:10; 2:18; 7:48, 53; 10:22; 1 Ch. 7:26).

2. A son of David, born in Jerusalem (2 S. 5:16; 1 Ch. 3:8; 14:7).

3. A textual corruption in 1 Ch. 3:6 for ELISHUA, another of David's sons; cf. 2 S. 5:15.

4. A scribe of Jehoiakim (Jer. 36:12, 20f.).

5. One "of the royal family," grandfather of Ishmael the slayer of Gedaliah (2 K. 25:25; Jer. 41:1).

6. A man of the tribe of Judah (1 Ch. 2:41).

7. One of the priests appointed by Jehoshaphat to teach the law (2 Ch. 17:8). F. K. FARR

ELISHAPHAT ē-lish'ə-fat [Heb. *ʾĕlîšāpāṭ*–'God is judge']. One of the "commanders of hundreds" employed by Jehoiada the priest in the conspiracy against Athaliah, to make Joash king (2 Ch. 23:1).

ELISHEBA ē-lish'ə-bə [Heb. *ʾĕlîšeḇaʿ*–'my God is fulness']. The daughter of Amminadab, sister of Nahshon, wife of Aaron, and mother of Nadab, Abihu, Eleazar, and Ithamar; the founder, therefore, of the entire Levitical priesthood (Ex. 6:23).

ELISHUA el-i-shōō'ə, ē-lish'ōō-ə [Heb. *ʾĕlîšû(a)*ʿ–'God is salvation']. A son of David (2 S. 5:15; 1 Ch. 14:5); apparently called Elishama in 1 Ch. 3:6 through a misreading by the copyist.

ELISIMUS ē-lis'i-məs (AV 1 Esd. 9:28). *See* ELIASHIB **5.**

ELIU ē-lī′o͞o (AV Jth. 8:1). *See* ELIJAH 5.

ELIUD ē-lī′əd [Gk. *Elioud*–'God my praise']. An ancestor of Jesus, four generations before Joseph (Mt. 1:14f.).

ELIZABETH ē-liz′ə-beth [Gk. *Elisabet* < Heb. *'ĕlîšeḇa'*–'God is (my) oath,' i.e., a worshiper of God]; AV ELISABETH. The wife of ZECHARIAH the priest and mother of JOHN THE BAPTIST (Lk. 1:5ff.). Elizabeth herself is described as being "of the daughters of Aaron," i.e., of priestly lineage. Although it was required of a priest only that he marry a virgin of Israel, it was preferable if he could marry the daughter of a priest (SB, II, 68-71). Luke also describes Elizabeth, along with her husband, as "righteous [Gk. *díkaios*] before God, walking in all the commandments and ordinances of the Lord blameless" (1:6). The language used is strongly influenced by the LXX and indicates that they were fully obedient to the will of God (*TDNT,* II, 189). Thus, Zechariah and Elizabeth possessed strong qualifications for being chosen as the parents of John the Baptist: not only in pure lineage but also as models of OT piety.

Elizabeth, however, was BARREN (Lk. 1:7) — the greatest misfortune that could befall a woman at that time. In this respect she stood in continuity with Sarah (Gen. 11:30), Rebekah (25:21), Rachel (29:31), Samson's mother (Jgs. 13:2f.), and Hannah (1 S. 1:2,5). As in the case of each of these women, Elizabeth's barrenness set the stage for a miraculous intervention of God in which He blessed Israel with a special leader. The parallel with the story of Isaac's birth is especially close in that Elizabeth and Zechariah, like Sarah and Abraham, were both "advanced in years" (Lk. 1:7). Like Abraham (Gen. 17:17) and Sarah (18:12), Zechariah at first found the promise of a son too hard to believe (Lk. 1:18); but there is no record of doubt on Elizabeth's part (perhaps because Zechariah could not inform her of the angel's message) — only of gratitude, after the conception, that God had removed her barrenness (1:25; cf. v. 58; Ps. 113:9).

Luke calls Elizabeth a "kinswoman" of MARY (6) the mother of Jesus. The Gk. *syngenís* indicates that they were relatives, but not necessarily cousins; it may indicate that Mary also was of priestly descent. The angel Gabriel informed Mary of Elizabeth's pregnancy in order to assure her that with God nothing is impossible. When Elizabeth heard Mary's greeting, her baby "leaped for joy" in her womb (Lk. 1:41-44) and Elizabeth was inspired by the Holy Spirit to prophesy. Without anyone telling her she knew about the angel's visit to Mary, the messianic future of Mary's child (1:42f.), and Mary's response of faith (*TDNT,* VI, 835). Her tribute to Mary's faith (1:45) may be intended as a contrast to Zechariah's doubt (vv. 18,20).

N. J. O.

ELIZAPHAN el-i-zā′fən, ē-liz′ə-fan [Heb. *'ĕlîṣāpān*–'God has protected; Gk. *Eleisaphan, Elisaphan, Elisapha, Elisaphat*].

1. The son of Uzziel the son of Kohath, thus a leader of the Levitical class of the Kohathites (Nu. 3:30; 1 Ch. 15:8; 2 Ch. 29:13). But in 1 Ch. 15:8; 2 Ch. 29:13 he seems to head a class parallel to the Kohathites. He is called Elzaphan in Ex. 6:22; Lev. 10:4.

2. A leader of Zebulun, who represented that tribe in the division of the land (Nu. 34:25).

ELIZUR ē-lī′zər [Heb. *'ĕlîṣûr*–'my God is a rock'; Gk. *Eleiour, Elisour*]. A leader of the tribe of Reuben (Nu. 1:5; 2:10; 7:30, 35; 10:18).

ELKANAH el-kā′nə [Heb. *'elqānâ*–'God has possessed'].

1. An Ephraimite, the father of Samuel (1 S. 1:1-28; 2:11-20). Of his two wives, Hannah, the childless, was most beloved. At Shiloh she received through Eli the promise of a son. Elkanah and Hannah took the young Samuel to Shiloh when he was weaned, and left him with Eli as their offering to the Lord. They were blessed with three other sons and two daughters.

2. The second son of Korah (Ex. 6:24), who escaped the fate of Korah, Dathan, and Abiram (Nu. 26:11).

3. One "next in authority to the king" in Jerusalem in the time of Ahaz; slain by Zichri of Ephraim in a war with Pekah (2 Ch. 28:7).

4. One of the Korahites among David's "mighty men" (1 Ch. 12:6).

5. A Levite, possibly the same as **2** above (1 Ch. 6:23, 25, 36).

6. Another Levite of the same line (1 Ch. 6:26, 35).

7. Another Levite of the same line (1 Ch. 6:27, 34).

8. Another Levite, ancestor of Berechiah (1 Ch. 9:16).

9. Another Levite (if not the same as **4** above), one of the "gatekeepers for the ark" (1 Ch. 15:23).

F. K. FARR

ELKIAH el-kī′ə [Gk. *Elkia*]; AV ELCIA; NEB HELKIAS. An ancestor of Judith (Jth. 8:1).

ELKOSH el′kōsh, **(OF)** [Heb. *hā'elqōšî*; Gk. *Elkesaiou*]; AV, NEB, ELKOSHITE. A name occuring in Nah. 1:1 only, probably designating the home of the prophet. The site is unknown.

The tradition identifying Elkosh with el-Qôsh, about 50 km. (30 mi.) N of Mosul, a rather large village with a Nestorian monastery, is not traceable before the 16th cent. and is utterly improbable. According to Jerome in his commentary on Nahum, Elkosh is Helkeseï in Galilee, often identified with el-Qauze W of Tibnin (21 km., or 13 mi., SE of Tyre), but the identification is doubtful; moreover, it is more probable that Nahum was a Judean, as was assumed by Cyril of Alexandria.

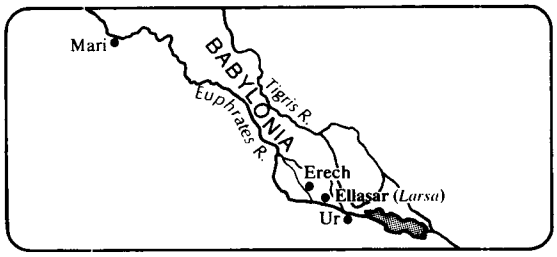
Vitae Prophetarum, wrongly ascribed to Epiphanius, identifies Elkosh with Elkesi, which, according to the text as corrected by Nestle, should be looked for "the other side of Begobara." This last name Nestle identifies with Beit Jibrîn. If he is right, the indication of pseudo-Epiphanius is based on a confusion between Elkosh and Lachish (situated in Roman times at el-Qubeibeh); however, the *qoph* in Elkosh is an obstacle against such an identification. Basing on the uncorrected text, H. J. Schoeps (*Theologie und Geschichte des Judentums* [1949], pp. 326f.) compares Begobara with Gk. *Bēthabara* in numerous text witnesses of Jn. 1:28, a town just over the Jordan, SE of Jericho; in that case Nahum's town should be sought in the eastern Jordan Valley N of the Dead Sea and might be the same as the center of the sect of the Elchesaites in later times.

For the meaning of the name, cf. *lāqaš* in Job 24:6, "glean," or *leqeš* in Am. 7:1, "latter growth."

A. VANSELMS

ELLASAR el-ā′sär [Heb. *'ellāsār*]. A city of Mesopotamia ruled by Arioch and other Babylonian kings (Gen. 14:1, 9). The Babylonian form of the name is (*âl*) *Larsa,* "the city Larsa." The Sumerian name is Ararwa, "abode of light."

At one time Ellasar was thought to be Asshur, ancient capital of Assyria. Others suggest it is located in northern



Mesopotamia at the town of Ilanzura of the Mari texts, a site between Carchemish and Haran. Most scholars accept H. Rawlinson's view that Ellasar is Larsa, ancient Babylonian city of the sun-god, whose ruins are seen at Senkereh in lower Babylon, on the east bank of the Euphrates midway between Erech (Uruk, Warka) and Ur of the Chaldees.

Its King Arioch, confederate of Chedorlaomer king of Elam, invaded Canaan, captured Sodom, and carried off Lot (Gen. 14:1,9). The Sumerian town flourished in the Mari period. The Elamite Kudur-Mabuk had set on the throne his son Warad-Sin, who was succeeded by his younger brother Rīm-Sin. The last ruler Rīm-Sin was defeated by Hammurabi, who made the town a capital of his Babylonian empire.

W. K. Loftus excavated Larsa in 1854. He discovered a cemetery there, but dated the finds incorrectly. He also found the ziggurat and temple of the old city. In 1922-1923 A. Parrot led an expedition, finding temples, palaces, and inscriptions that confirmed the importance of the ancient city in both Sumerian and Babylonian times. Tablets found indicate that the site was a noted center of Babylonian mathematical learning. Parts of walls and remains of homes were also uncovered.

The temples discovered reveal that the city was a seat of the worship of the sun-god Šamaš among the Babylonians. Like other important cities of Babylonia it boasted a great temple tower, known as the "house of the bond of heaven and earth." Its temple, named in honor of the sun-god, was called "House of Light." The sanctuary was restored by Hammurabi, Nebuchadrezzar, and Nabonidus.

C. L. FEINBERG

ELM. *See* TEREBINTH.

ELMADAM el-mā'dəm [Gk. *Elmadam* or *Elmōdam*]; AV ELMODAM. An ancestor of Jesus, according to Luke's genealogy, in the sixth generation before Zerubbabel (Lk. 3:28).

ELNAAM el-nā'əm [Heb. *'elna'am*–'God is delightfulness']. According to the MT the father of two of David's warriors (1 Ch. 11:46); according to the LXX himself one of the warriors.

ELNATHAN el-nā'thən [Heb. *'elnāṯān*–'God has given'; Gk. Apoc. *Elnatan, Ennatas*]; AV Apoc. ALNATHAN, EUNATAN; NEB Apoc. also ENNATAS.

1. The grandfather of Jehoiachin (2 K. 24:8). He was one of the princes present when Jeremiah's scroll was read by Baruch to Jehoiakim (Jer. 36:12). He was leader of the party sent to Egypt (Jer. 26:22) to extradite the prophet Uriah. The name Elnathan occurs in the third ostracon from Lachish as the father of the "commander of the host," but a positive identification of the two is difficult.

2, 3, 4. The name of two "chief men" — unless textual corruption has introduced the name at its second occurrence — and of one "teacher" sent for by Ezra from the camp at the river Ahava (Ezr. 8:16). If 1 Esd. 8:44 (LXX 43) is correct, only two persons should be named here.

R. K. H.

ELOAH e-lō'ə. *See* GOD, NAMES OF II.A.3.

ELOHIM e-lō'him, el'ō-hēm. *See* GOD, NAMES OF II.A.2.

ELOI ē'loi, ē-lō'ī **ELOI** (Mk. 15:34). *See* ELI, ELI, LAMA SABACHTHANI.

ELON ē'lon [Heb. *'ēlôn, 'ēlōn, 'ēlôn*–'terebinth'].

1. A Zebulunite who judged Israel ten years and was buried in Aijalon (Jgs. 12:11f.).

2. A son of Zebulun (Gen. 46:14; Nu. 26:26).

3. A Hittite whose daughter Esau wedded (Gen. 26:34; 36:2).

ELON ē'lon [Heb. *'ēlôn*–'terebinth'; Gk. *Ailōn*]. An unidentified town in the territory of Dan (Josh. 19:43). *Westminster Dictionary of the Bible* (1944) and *IDB* conjecture that the site is either 'Alein, W of Beit Maḥsir, or Khirbet Wâdī 'Alin, between Deir Aban and 'Ain Shems. It may be identical with ELONBETH-HANAN.

R. P. DUGAN

ELONBETH-HANAN ē-lon-beth-hā'nən [Heb. *'ēlôn bêṯ ḥānān*–'terebinth of the house of Elon'] (1 K. 4:9). A town in the second district supplying food for Solomon's household; probably the same town as ELON.

ELONITES ē'lən-īts [Heb. *'ēlônî*]. NEB ELONITE FAMILY. Descendants of Elon (Nu. 26:26). *See* ELON 2.

ELOQUENT [Heb. *'îš dᵉḇārîm*–'man of words'] (Ex. 4:10); NEB "ready speech"; [Gk. *lógios*] (Acts 18:24); [*sophía lógou*] ("eloquent wisdom," 1 Cor. 1:17); AV "wisdom of words"; NEB "worldly wisdom."

When God commanded Moses to go to Pharaoh and to lead the people out of Egypt, Moses protested and tried to escape by claiming that he was not a "man of words" or "good with words." This disclaimer became characteristic of the prophets (cf., e.g., Jer. 1:6; also Childs, pp. 49, 78). The NT use of *lógios* to describe the Jew Apollos from Alexandria can refer either to his great learning or to his skill in speaking. The first sense is similar to Josephus's use of the term (*Ant.* xvii.6.2) and to classical and more modern Greek descriptions of one well versed in the arts and literature, especially in history and the antiquities (Thayer, p. 379). On the other hand, the picture of Apollos from Acts 18:25ff.; 1 Cor. 1:12; 3:5ff. shows him to be well versed in the Scriptures and a bold speaker. The general description "a man of culture" may best convey the sense of Acts 18:24 (MM, p. 378).

In 1 Cor. 1:17 Paul declares that he has been sent to preach the gospel, but "not with eloquent wisdom, lest the cross of Christ be emptied of its power." Here there are several possibilities as to the meaning of "eloquent wisdom" (lit. "wisdom of speech" or "wisdom of the word"; *see* WISDOM). Similar phrases are found in 1 Cor. 2:1, where Paul writes, "I did not come proclaiming to you the testimony of God in lofty words (*hyperóchē lógou*) or wisdom (*sophía*)," and in 2:4, "my speech and my message were not in plausible (*peithós*) words of wisdom (*sophías lógoi*)." "Wisdom" probably means philosophical knowledge or style. Thus Paul contrasts his straightforward telling of the story of the Cross with the usual presentations

of public teachers who used elaborate argument and stylish, masterful rhetoric. Ancient sophists were very artful in public speech, often consciously disguising the truth by presenting persuasive arguments calculated to influence people's minds by their appearance of rationality. Paul denounces the use of learned and fascinating "wisdom" to trick or charm the audience. The "power of God" and the "wisdom of God" (1:24) lie in the facts of His action and not in any man's dramatic presentations (see Orr and Walther, p. 152).

Some have seen in the Corinthian situation an influence of Jewish Gnosticism in which "a wisdom doctrine had replaced the cross" for some sects and "Wisdom" had become a title for the exalted Christ (*see TDNT*, VII, 520; Bultmann, I, 180, 327; II, 132). Paul counters this by calling it "worldly wisdom" (2:5; RSV "wisdom of men"), therefore "wisdom of the word."

A final suggestion is that "wisdom of speech" includes some of the more unusual and refined methods of OT interpretation, perhaps coming from Philo of Alexandria through his supposed pupil Apollos. However, there is no proof that Apollos' "excelling in the knowledge of the Scriptures" (*dynatós en graphaís*) had come as a result of methods of interpretation he had learned from Philo or one of Philo's pupils.

D. K. MCKIM

ELOTH ē'loth. *See* ELATH.

ELPAAL el-pā'əl [Heb. *'elpa'al*–'God has wrought']. The name of a descendant of Benjamin (1 Ch. 8:11f., 18).

ELPALET el-pā'let (AV 1 Ch. 14:5). *See* ELPELET.

EL-PARAN el-pâr'ən [Heb. *'ēl pā'rān*] (Gen. 14:6). The southernmost point subdued by Chedorlaomer and his allies from the east. *See* PARAN.

ELPELET el'pē-lət [Heb. *'elpāleṭ*]; AV ELPALET. The name of a son of David (1 Ch. 14:5).

ELTEKE el'tə-kē, **ELTEKEH** [Heb. *'elt^{e}qēh* (Josh. 19:44), *'elt^{e}qē'* (21:23); Gk. B *Alkathá*, A *Elkethṓ*]. A place in the territory of Dan named between Ekron and Gibbethon (Josh. 19:44), and again between Beth-horon and Gibbethon, as given to the Kohathite Levites (21:23). It is probably identical with the Assyrian *Altaku*, where Sennacherib (Oriental Institute Prism inscription) claims to have defeated the allied armies of the Philistines and the Egyptians. The site is unknown, but should probably be located either E of Ekron toward Timnah or to the north between Ekron and Gibbethon. W. W. BUEHLER

ELTEKON el'tə-kon [Heb. *'elt^{e}qōn*] (Josh. 15:59). A village in the hill country of Judah, listed with Beth-zur and Beth-anoth, therefore in the area between Bethlehem and Hebron. F.-M. Abel (*GP*, II, 314) identifies it with Khirbet ed-Deir, about 3 km. (2 mi.) S of Ḥauṣan, and about 6½ km. (4 mi.) W of Bethlehem. W. S. L. S.

ELTOLAD el-tō'lad [Heb. *'eltôlaḏ*]. A city in the inheritance of Judah (Josh. 15:30) or Simeon (19:4), probably a variant form of TOLAD (1 Ch. 4:29). The name could be translated as "El shall cause to bear," hence the suggestion that it was a shrine to which women went to pray for children; but this lacks objective support. F.-M. Abel (*GP*, II, 314) identifies the site with Khirbet Erqa Saqra, but this is uncertain. W. S. L. S.

ELUL ē'lul, e-lo͞ol' [Heb. *^{e}lûl* (Neh. 6:15); Akk. *elulu, ululu*; Gk. *Eloul* (1 Macc. 14:27)]. The sixth month of the Hebrew year, corresponding to August/September. *See* CALENDAR II.A.2.

ELUZAI ē-lo͞o'zī [Heb. *'el'ûzay*–'God is my strength'; cf. UZZIEL]. A Benjaminite who deserted Saul to become one of David's "mighty men" (1 Ch. 12:5).

ELYMAIS el-ə-mā'əs [Gk. *Elymais*]. Mentioned in 1 Macc. 6:1 as a "city" (Gk. *pólis*) in Persia "famed for its wealth." No other reference to Elymais as a city occurs except in Josephus *Ant.* xii.9.1, which simply reflects the account in 1 Macc. 6:1; and even 1 Macc. 6:1 has variant textual readings. Tob. 2:10 simply states that Ahikar went "to" or "into" (Gk. *eis*) Elymais, without indicating whether this was a city or a region. References in Strabo and Ptolemy seem to indicate that Elymais, derived from ELAM, was the name of a region between Persia and Babylonia, essentially equivalent to the province Susiana, whose capital was Susa.

Bibliography.–Pauly-Wissowa, V, 2458-2467; Strabo *Geog.* xv.3.12, xvi.1.1; Ptolemy *Geog.* vi.3. W. S. L. S.

ELYMAS el'ə-məs [Gk. *Elymas*–'sorcerer'] (Acts 13:8). *See* BAR-JESUS.

ELYON el-yōn', ē-lī'ən. *See* GOD, NAMES OF.

ELZABAD el-zā'bad [Heb. *'elzāḇāḏ*–'God has given'; cf. ZABDIEL and ZEBADIAH].

1. The ninth of David's Gadite heroes who joined him in the wilderness (1 Ch. 12:12).

2. A Korahite gatekeeper (1 Ch. 26:7).

ELZAPHAN el-zā'fan [Heb. *'elṣāpān*]. One of the sons of Uzziel (Ex. 6:22) commissioned by Moses to remove from the camp the corpses of their priestly relatives who had offered "unholy fire" to the Lord (Lev. 10:4). *See* ELIZAPHAN **1.**

EMADABUN ē-mā'də-bun [Gk. *Ēmadaboun*] (1 Esd. 5:58); AV MADIABUN. The head of a family of Levites who superintended the repair of the temple; not named in Ezr. 3:9.

EMATHIS em'ə-this [Gk. *Emathis*, B *Emaththis*, A *Ematheis*]; AV AMATHEIS. One of the sons of Bebai (1 Esd. 9:29), called "Athlai" in Ezr. 10:28. *See* ATHLAI.

EMBALMING. *See* BURIAL II.B.

EMBASSY [Gk. *presbeía*] (Lk. 14:32; 19:14); AV AMBASSAGE; NEB ENVOYS, DELEGATION. A body of ambassadors with a message entrusted to them. The term *presbeía* is used by Jesus twice: (1) in the parable of the pounds, of the citizens who hated the nobleman and sent a delegation after him with the message that they refused to have him reign over them, thereby illustrating those who wilfully rejected Jesus' own kingdom (Lk. 19:14); (2) in the parable of a weak king who sends to a stronger ruler a delegation to ask conditions of peace (14:32). In 2 Macc. 4:11 *presbeía* is translated "mission" by the RSV

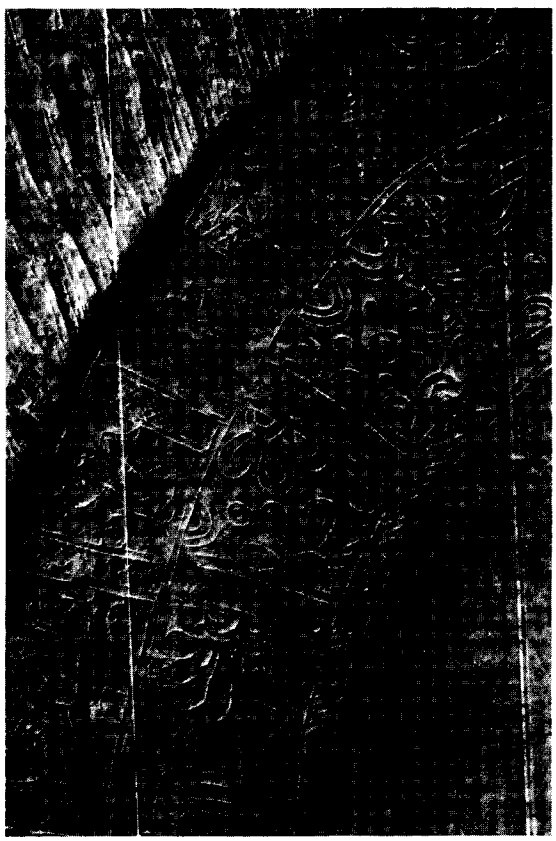
(NEB "treaty"; AV "ambassador").
See also MESSENGER. N. J. O.

EMBRACE [Heb. *ḥāḇaq*] (Gen. 29:13; 33:4; 48:10; 2 K. 4:16; Prov. 4:8; 5:20; Cant. 2:6; 8:3; Eccl. 3:5); NEB also "have in your arms" (2 K. 4:16), "was round me" (Cant. 2:6; 8:3); [*ḥēq*] (Gen. 16:5); AV BOSOM; NEB ARMS; [Gk. *epipíptō*] (Lk. 15:20; Acts 20:37); AV "fell on"; NEB "flung their arms around," "folded in their arms"; [*symperilambánō*] (Acts 20:10); NEB "seizing in his arms." The word has two distinct meanings in the OT: (1) to clasp and hold fondly in the arms, pointing to a common custom (Gen. 29:13; 33:4; 48:10; 2 K. 4:16; Cant. 2:6; 8:3; cf. Acts 20:10), and (2) to have sexual intercourse (Prov. 5:20; Eccl. 3:5). It seems to have acquired this technical sense in later Jewish usage.

EMBROIDERY [Heb. *riqmâ*; Gk. usually *poikilía, poikilma*. The AV usually has "broidered"; the NEB, besides "embroidered," uses "brocade," "striped," "patterned." How much ornamentation of cloth was in fact needlework, and how much was woven on the loom, is difficult to determine.

There is clearly a distinction between the work of the weaver (Heb. *ʾōrēg*) and that of the embroiderer (*rōqēm*, Ex. 35:35). The embroiderer produced the colored work such as decorated the tabernacle hangings (Ex. 26:1, 31), the ephod, girdle, and breastplate of the high priest (Ex. 28:6, 8, 15), and the garments of those who served in the sanctuary (Ex. 39:1). The same explicit connection with colored work is seen again in Jgs. 5:30.

Fine embroidery depicted in a detail of a relief of Ashurnasirpal II (9th cent. B.C.) from Nimrûd (Trustees of the British Museum)



Embroidered garments were naturally a sign of luxury (Ps. 45:14, NEB; Ezk. 16:10; 26:16). Egypt (Ezk. 27:7) and Syria (Ezk. 27:16) are singled out as producers of embroidered work, though the art probably originated in Babylon (cf. the costly Babylonian mantle, Josh. 7:21).

The word is applied metaphorically to the plumage of an eagle (Ezk. 17:3), to variegated stones for the house of God (1 Ch. 29:2), and to an unborn child (Ps. 139:15).

Gold thread cut from thin plates of beaten gold (Ex. 39:3) was sometimes worked into the embroidered pattern by the inventive craftsmen (Heb. *ḥōšēḇ*, Ex. 36:8, 35), as in the design of cherubim for the tabernacle. This was probably done with the needle rather than woven in on the loom, in view of the complex pattern.

The colored pomegranates that, together with gold bells, decorated the high priest's robe (Ex. 28:33) were probably of appliqué work.

In contrast, Aaron's tunic was of checkered work (Heb. *kᵉṯōneṯ tašbēṣ*, Ex. 28:4), perhaps woven in a checkered design, or with the pattern produced by threads sewn between two layers of cloth, as is still done in Syria. A similar pattern was fit for royal clothing (Ps. 45:13 [MT 14]). But here the reference may be to pearls in plaited settings of gold thread (reading Heb. *pᵉnînîm* for *pᵉnîmâ* [*BDB*]); this is parallel to the use elsewhere of Heb. *mišbᵉṣôṯ* for the settings of gems in the ephod (Ex. 28:11, 13) and in the breastplate (Ex. 39:13, 16). G. I. EMMERSON

EMEK-KEZIZ ē'mek-kē'ziz [Heb. *ʿēmeq qᵉṣîṣ*; Gk. B *Amekasis*, A *Amekkasis*]; AV VALLEY OF KEZIZ. One of the cities of Benjamin, located near Jericho and Bethhoglah (Josh. 18:21). The exact site is unknown, but it was probably located in the Jordan plain, S of Jericho.
K. G. JUNG

EMENDATIONS OF THE SCRIBES [Heb. *tiqqûnê hassôpᵉrîm*]. A list of eighteen words emended in the MT to remove anthropomorphism.

EMERALD. *See* STONES, PRECIOUS.

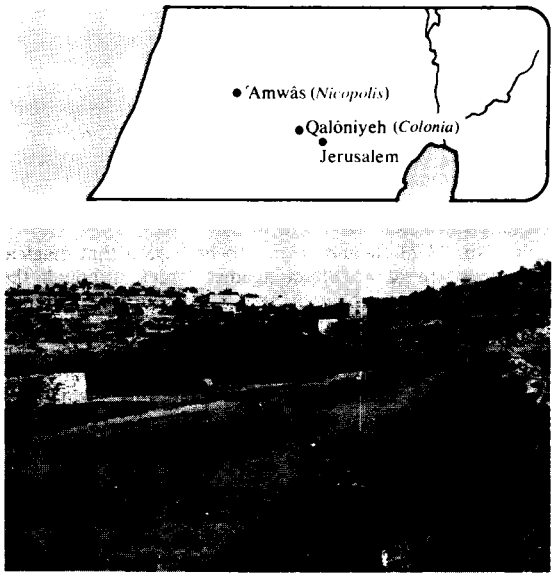
EMERODS em'ə-rodz. Archaic term used in the AV for "hemorrhoids." *See* TUMORS.

EMIM ē'mim [Heb. *ʾêmîm*–'terrors'(?); Gk. *Ommaein* and variants]. A Moabite designation of a race of giant people whom the Moabites dispossessed (Dt. 2:10f.). Chedorlaomer defeated them during the time of Abraham at Shaveh-kiriathaim, a plain E of the Dead Sea (Gen. 14:5), identified with modern el-Qereiyât. Known to the Israelites generally as REPHAIM who occupied much of the land E of the Jordan, they are called Zuzim, Horites (by the Edomites), and Zamzummim (by the Ammonites); see Gen. 14:5 and Dt. 2:10f., 20-23. A great and powerful people with an advanced civilization, they are unknown outside the OT. D. B. PECOTA

EMINENT. Occurs twice in the RSV: in Lk. 14:8 (Gk. *entimóteros*, "more eminent") referring to social standing, and in Rom. 16:13 (*eklektós*, "select"), describing Rufus. The AV uses the term in Ezk. 16:24, 31, 39; 17:22 in the literal sense of physical elevation.

EMMANUEL ē-man'ū-el. *See* IMMANUEL.

EMMAUS e-mā'əs [Gk. *Emmaous*]. A village (Gk. *kṓmē*) in Judea, "60 stadia from Jerusalem" (Lk. 24:13). It was the destination of Cleopas and an unknown companion to whom Jesus appeared after His resurrection. He spoke



Road near el-Qubeibeh, the traditional site of Emmaus (W. S. LaSor)

and ate with them before vanishing as suddenly as He had appeared. Josephus says the name of this town "may be rendered 'a warm bath' for therein is a spring of warm water useful for healing" (*BJ* iv.i.3). The name may be derived from Heb. *ḥammaṯ*, "hot spring."

The exact site of Emmaus is unknown, and various towns have been suggested as the original location. The Crusaders located Emmaus at el-Qubeibeh, just 60 stadia (about 11 km., 7 mi.) NW of Jerusalem. In 1873 the Franciscans unearthed the ruins of a Crusader basilica. In one of the adjacent naves the ruins of a small house were found, which was believed to have been the house of Cleopas. A hospice and school attached to the rebuilt Franciscan Church of Saint Cleopas fortify the tradition.

Some have located Emmaus at Qalôniyeh (Colonia), about 34 stadia (about 6½ km., 4 mi.) W of Jerusalem. According to Josephus (*BJ* vii.6.6), Vespasian assigned a place called Emmaus for eight hundred dismissed men. This site, however, has no spring and is only half the distance recorded in Luke; it may be instead Heb. *ḥammoṣa* of Josh. 18:26, mentioned in the Talmud (*Sukkah* iv.5) as a *colonia*.

The site with the most external evidence and tradition supporting it is the village of 'Amwâs. Early tradition identifies 'Amwâs as the Emmaus where Judas Maccabeus defeated the Syrian Georgias (1 Macc. 4:1-5), a site that was "in the plain" (1 Macc. 3:40). Because Josephus describes Emmaus as a city rather than a village (*BJ* iii.3.5), some scholars have not acknowledged 'Amwâs as the biblical Emmaus (cf. *WHAB*); Josephus, however, relates the utter destruction of Emmaus by Varus (*Ant.* xvii.10.9); it is quite possible, therefore, that it was only a village at the time of the postresurrection appearance but was later the seat of a toparchy. In the early Christian period 'Amwâs was also famous for a spring of reputed healing qualities. In the 3rd cent. A.D. it was called Nicopolis and was an episcopal see. The Bordeaux Pilgrim, the Holy Paula, and Jerome, in agreement with Eusebius, accepted this site as the Lukan Emmaus. The main question in identifying 'Amwâs with the biblical Emmaus is the distance involved. Instead of the Lukan 60 stadia, 'Amwâs is 160 stadia (about 31 km., 19 mi.) from Jerusalem. Some MSS, however, including Codex Sinaiticus, do read "160."

EMMERUTH em'ər-uth (NEB 1 Esd. 5:24). *See* IMMER.

EMMOR em'ôr (AV, NEB, Acts 7:16). *See* HAMOR.

EMPEROR [Gk. *ho sebastós*; Lat. *augustus*] (Acts 25:21,25); AV AUGUSTUS; NEB also "His Imperial Majesty"; [Gk. *basileús*] (1 Pet. 2:13,17); AV KING; NEB SOVEREIGN. A title, from Lat. *imperator* ("commander"), designating the rulers of the Roman empire. Originally *imperator* was a military term employed by the troops to salute a victorious general. Julius Caesar was the first to use the title continuously, and from the time of Octavian it was used regularly as an official title. Gk. *sebastós* (AUGUSTUS), likewise, was decreed an official title of the Roman ruler in 27 B.C., during the rule of Octavian, and it was so used by all the succeeding Roman emperors. Historians, however, have applied the designation "augustus" only to Octavian and have used "emperor" to designate the title of office. In Acts 25:21,25 *sebastós* refers not to Augustus Caesar Octavian (who had died in A.D. 14) but to the one who then held the office; thus the RSV and NEB have substituted the title "emperor" to avoid confusion.

See also CAESAR; ROMAN EMPIRE AND CHRISTIANITY. N. J. O.

EMPTY; EMPTINESS; EMPTY-HANDED [Heb. *rîq* (noun), *rêq* (adj.), *rêqām* (adv.), also *'ārâ* (Gen. 24:20; 2 Ch. 24:11), *yāṣaq* (2 S. 13:9), *nāṭaḳ* (2 K. 22:9; 2 Ch. 34:17), *bāqaq* (Isa. 19:3; Jer. 51:2), *šāw'* (Job 7:3; 15:31; 35:13; Ps. 41:6; Hos. 10:4; Zec. 10:2), *tōhû* (Isa. 29:21; 40:17; 41:29; 59:4), *pānâ* (Lev. 14:36), *pāqaḏ* (1 S. 20:18, 25,27), *hebel* (Job 21:34; 35:16; Eccl. 5:7; Isa. 30:7); Gk. *kenós*, *kenóō* (1 Cor. 1:17; Phil. 2:7), *battalogéō* ("heap up empty phrases," Mt. 6:7), *scholázō* (Mt. 12:44), *mataiológos* ("empty talker," Tit. 1:10)]; AV also VOID, VANITY, VAIN, etc.; NEB also FUTILE, VAIN, NOTHING, NONSENSE, etc. In Ezk. 24:10 the RSV ("empty out the broth") and NEB ("pour out all the broth") follow an emendation based on the LXX (Heb. *wᵉhārēq hēmmārāq*); the AV reads, with the MT, "spice it well."

The Hebrew verb stem *ryq* means "pour out," and so "empty"; thus the adjective means "empty" or "vain," the adverb "empty-handed," and the noun "that which is empty or worthless." An appearance at the sanctuary required a gift: no one was to appear "empty-handed" (Ex. 23:15; 34:20). Significantly, Hittite treaties also required annual appearances before the suzerain, probably for the purpose of bringing tribute (cf. Plastaras). In Ruth 1:21 *rêqām* is used opposite *mᵉlē'â* ("full") where Naomi says, "I went away full, and the Lord has brought me back empty." Here her emptiness refers especially to the loss of her husband and sons — in addition to her loss of property. Naomi's empty days are over when Boaz assumes the levirate (3:17; cf. Gesenius §100g). *See also* FULL. The remaining Hebrew verbs have a variety of meanings: "empty out" (*'ārâ*), "pour out" (*nāṭaḳ*), "lay waste" (*bāqaq*), "clear out" (*pānâ*), etc. (cf. *CHAL*, pp. 46, 249, 282, 293).

In the NT the adjective *kenós* is used in both a literal and a figurative sense. Literally the term means "empty" or "devoid of content" — thus, "with empty hands" in

Mk. 12:3, Lk. 1:53; 20:10f. In Eph. 5:6 and Col. 2:8 Paul uses *kenós* figuratively of deceitful words and philosophy; here the emphasis is not only on the lack of content, but also on the futility of these false teachings (cf. *TDNT*, III, 659f.). This second, figurative meaning of futility and powerlessness is also present in the term *mataiológos*, a compound of *mataíos* ("idle," "empty") and *lógos* ("word"), in Tit. 1:10 (cf *mataiología*, 1 Tim. 1:6). For the difficult *battalogéō*, Bussby suggests an Aramaic root *bṭl*, which means "not legal" (p. 26); Delling, on the other hand, suggests that it has been "constructed in analogy with" a more commonly used term, *battarízō*, which means "stammer or stutter" (*TDNT*, I, 597; cf. also Bauer, p. 137; BDF § 40; MM, p. 107). On Phil. 2:7, *see* KENOSIS.

EMULATION. Used by the AV and NEB in the sense of "jealousy" or "envious rivalry" in Rom. 11:14 for the verb *paraẓēlóō* (RSV "make jealous"), and by the AV in Gal. 5:20 for the verb *zēlóō* (RSV "jealousy"; NEB "envy").

EN [Heb. *'ayin*; cf. Arab. *'Ain*]. The Hebrew word for "spring" or "fountain" (Gen. 16:7; Nu. 33:9; Neh. 2:14; Prov. 8:28 [fem. pl.]). It occurs in numerous compound words, e.g., EN-GEDI, EN-HADDAH, EN-HAKKORE, EN-HAZOR, EN-RIMMON, EN-ROGEL, EN-SHEMESH. In the same way the word *'Ain* is a very common component of modern Arabic place names throughout Palestine and Syria. Places with names compounded with *En-* were almost always located near a spring. *See* FOUNTAIN; WELL.

ENABLE [Gk. *dýnamai*] (Phil. 3:21); AV "(whereby) he is able." In 1 Tim. 1:12 the AV uses "enable" (Gk. *endynamóō*) in the sense of "strengthen" or "endue with strength."

ENAIM ē-nā'əm [Heb. *'ênayim*–'two fountains' or 'double fountain'; Gk. *Ainan*] (Gen. 38:14, 21); AV "open place," "openly"; NEB "(where the road) forks." One of the fourteen cities of Judah in the Shephelah or low hill country between the mountains of Judah and the coastal plain. It is the same as Enam in Josh. 15:34, where it is mentioned along with Jarmuth, Adullam, Socoh, and Azekah in the territory assigned to Judah. The site has not been identified.

ENAM ē'nəm [Heb. *'ênām*] (Josh. 15:34). *See* ENAIM.

ENAN ē'nən [Heb. *'ênān*–'fountains'; Gk. *Ainan*]. The father of Ahira and leader of the tribe of Naphtali, who assisted in the first census of Israel (Nu. 1:15; 2:29; 7:78, 83; 10:27).

ENASIBUS ē-nas'ə-bəs (1 Esd. 9:34, AV, NEB). *See* ELIASHIB 6.

ENCAMPMENT. *See* WAR.

ENCAMPMENT BY THE RED SEA. According to the version of the wanderings of Israel given in Nu. 33, they "encamped by the Red Sea" (v. 10) after leaving Elim and before entering the Wilderness of Sin. *See* WANDERINGS OF ISRAEL.

ENCHANT; ENCHANTER; ENCHANTMENT [Heb. *nāḥaš*] (Nu. 23:23); NEB DIVINATION; [*ḥôḇēr*] (Ps. 58:5 [MT 6]); AV CHARMING; NEB SPELL; [*ḥeḇer*] (Isa. 47:9, 12); NEB SPELLS; [*'aššāp*] (Dnl. 1:20; 2:2); AV ASTROLOGER; NEB EXORCIST; [Aram. *'āšap*] (Dnl. 2:10, 27; 4:7 [MT 4]; 5:7, 11, 15); AV ASTROLOGER; NEB EXORCIST. A practice of the pagan cults involving magic, divination, astrology, and exorcism. The OT has little information about such practices, since they were strictly forbidden (Dt. 18:10-14).

In Nu. 23:23 Balaam seems to be saying that magical practices are of no effect against Israel, although the Hebrew text is ambiguous and may mean that in Israel there is no use of such practices. In Syriac and postbiblical Hebrew/Aramaic the root *nḥš* means to divine or augur, which accords well with this context in Numbers.

In Ps. 58:5 the context clearly points to a vocal enchantment by one who casts spells (cf. v. 4). Akk. *abaru*, Syr. *ḥabbārā'*, postbiblical Heb. and Aram. *ḥabbār*, etc., all signify a charmer or one who casts spells. Isa. 47:9, 12 reflect God's attitude toward such practices, and also the importance of these practices in Babylonia (cf. 47:1).

Similarly, the passages in Daniel indicate the importance of enchanters as cultic officials or advisers and reflect the Babylonian setting of the book. Since "enchanters" occurs only in lists of these officials, their specific function is not clear, and commentators (e.g., S. R. Driver, *Daniel* [*Cambridge Bible*, 1901], pp. 15f.; E. J. Young, *Prophecy of Daniel* [1953], pp. 51, 57) have inferred that the author used these terms in a broad sense without knowing the specific function or duty of these officials (but cf. Davies, p. 84). In spite of the concurrence of Theodotion's use of Gk. *mágos* for Heb. *'aššāp* with the postbiblical Hebrew meaning of *'aššāp* ("astrologer"), the Akkadian cognate *āšipu* points to a different meaning and must be given full consideration, since the Hebrew term is a loanword from Akkadian. The Babylonian *āšipu* was an exorcist and diagnostician, but not an astrologer (cf. *CAD*, I/2, 431ff.). His function was to avert or exorcise evil spirits from any political or physical manifestations by means of apotropaic rituals and incantations. The decision about the meaning of *'aššāp* thus depends somewhat on one's opinion regarding the date of Daniel: if the book is late, then the evidence from Theodotion and postbiblical Hebrew is more likely correct; but if the book was written in the 6th cent. B.C., then the Akkadian evidence is decisive.

G. A. L.

ENCOURAGE; ENCOURAGEMENT [Heb. piel of *ḥāzaq*] (Dt. 1:38; 3:28; 2 S. 11:25; 2 Ch. 35:2; Isa. 41:7; Ezk. 13:22); AV also STRENGTHEN (Ezk. 13:22); NEB also URGE STRENGTHEN, "tell (him) to take heart"; [*'al lēḇ*] (2 Ch. 30:22; 32:6); AV COMFORTABLY; [Gk. *paráklēsis, parakaléō, symparakaléō* (Rom. 1:12)]; AV COMFORTED, EXHORTATION, CONSOLATION; NEB also EXHORTATION, STIR THE HEART, HEARTEN, etc.; [*paramythéō* (1 Thess. 5:14), *protrépomai* (Acts 18:27), *euthýmos* (Acts 27:36), *oikodoméō* (1 Cor. 8:10)]; AV COMFORTED, EXHORTING, "of good cheer," EMBOLDENED (1 Cor. 8:10); NEB also GIVE SUPPORT, PLUCK UP COURAGE (Acts 27:36), EMBOLDENED (1 Cor. 8:10).

The OT uses a piel verb form (*ḥizzaq*) meaning "strengthen" for expressing its concepts of encouragement. Leaders are to be encouraged by their followers (Dt. 1:38; 3:28; 2 S. 11:25), and fellow workers by each

other (Isa. 41:7). This strengthening takes place within a person and thus has to do with the attitudes with which one faces life; cf. the adverbial uses in 2 Ch. 30:22; 32:6 (lit. "he spoke to their hearts"). In Ezk. 13:22 "encourage" (Heb. lit. "strengthening the hands") refers to the inner strengthening that enables one to work. In all of these uses of *ḥizzaq* the LXX also uses a verb for strengthening, usually Gk. *katischýō*.

In the NT "encouragement" usually translates Gk. *parakaléō* or a cognate. Unlike Heb. *ḥizzaq*, Gk. *parakaléō* in biblical writing usually means to "comfort," and only in a small percentage of its uses does it actually relate to encouragement. It is only a short step, however, from comfort in times of bereavement to encouragement in times of lesser troubles, a step taken most noticeably in the Apocrypha (esp. 1 Macc. 5:53; 12:5; 13:3; 2 Macc. 13:12; 3 Macc. 1:6; 3:8).

Two NT passages are of particular importance. Rom. 15:4-6 speaks of a situation in which a brother with a stronger conscience must allow for the conscience of the weaker brother. Encouragement is bound closely with hope in this passage. Paul says that divine aid is given to the community of believers through the exhortations and encouraging events of the Scriptures, which give the hope of final deliverance from the trials of this present life. In 1 Thess. 5:11-14 the idea of encouragement is closely related to exhortation. In v. 14 *paramythéō*, a synonym meaning "encourage" or "comfort" (cf. its use with *parakaléō* in 1 Cor. 14:3; Phil 2:1; 1 Thess. 2:11), calls for encouraging the weak, while *parakaléō*, translated "encourage" in 1 Thess. 5:11, is rendered "exhort" in v. 14. Thus exhortation becomes the means by which one gives strength to others. This function of exhortation was a part of early Christian worship (1 Cor. 14:3, 31).

In Acts 18:27 the AV differs significantly from the RSV and NEB. In the AV the objects of the encouragement are those brethren to whom the church in Ephesus wrote, while the RSV and NEB interpretation has Apollos receiving the encouragement. Both the context and the grammar (the verb normally takes an accusative object, not a dative) support the latter interpretation.

See *TDNT*, V, *s.v.* παρακαλέω, παράκλησις (Schmitz, Stählin).

D. W. WEAD

END [Heb. nouns *qēṣ*, *'aḥ^{a}rîṯ*, *sôp*; verbs *kālâ*, *šāḇaṯ*, *sûp*, *gāmar*, etc.]; AV also AFTER, LAST or LATTER END (*'aḥ^{a}rîṯ*), CONSUMED, CAUSE TO CEASE, etc.; NEB also AFTER, LATER, LAST DAYS (*'aḥ^{a}rîṯ*), FINISHED, etc.; [Gk. *télos*]; NEB also FULL EXTENT (Jn. 13:1), etc.; [*ákron*–'peak']; AV, NEB, TIP (Lk. 16:24), etc.; [*éschatos*] (Acts 1:8; 1 Pet. 1:20); AV UTTERMOST PART, LAST; NEB ENDS, LAST; [*syntéleia*–'completion'] (He. 9:26); NEB CLIMAX; [*pímplēmi*–'fulfil'] (Lk. 2:21); AV WERE ACCOMPLISHED; NEB LATER; [*ekleípō*] (He. 1:12); AV FAIL; [part. of *teleutáō*–'die'] ("at the end of his life," He. 11:22); AV WHEN HE DIED; [*píptō*–'fall']; AV FAIL.

I. In the OT.–Numerous Hebrew words are translated "end." Only four (*qēṣ*, *'aḥ^{a}rîṯ*, *kālâ*, *šāḇaṯ*), however, occur more than a few times. The term most frequently used is *qēṣ*, from the verb *qāṣaṣ*, "cut off." Often it refers to the end of a period of time, as in Nu. 13:25 where the spies end forty days of spying in the Promised Land (AV, NEB, "after forty days"). It can also refer to the physical end of something, e.g., in Gen. 23:9 the cave of Machpelah is at the end of the field. The term *'aḥ^{a}rîṯ* means "that which comes after" and has several shades of derived meaning. In Dt. 8:16 it refers to the period after the wilderness wandering. In many places, however, it refers to the "outcome," as in Am. 8:10 where the outcome is like a bitter day. The verb *kālâ* means "be complete, at an end, finished." For the hiphil the RSV often translates "make a (full) end" (e.g., Ezk. 20:13) while the NEB simply translates "destroy." When used with another verb the NEB translates "finish" (e.g., "finished speaking," Ex. 31:18). The verb *šaḇaṯ*, from which is derived the word "sabbath," in the hiphil means "cause to cease" (the usual AV translation) or "put an end to." The NEB uses several good equivalents, e.g., "stop" (Jer. 48:35), "quell" (Ezk. 7:24). Two other roots with the meaning "end" occur infrequently. The verb *sûp* means "come to an end, cease" (Am. 3:15), while the related noun *sôp* seems to be a synonym for *qēṣ* in later parts of the OT (e.g., Ecclesiastes and Daniel). The verb *gāmar*, "end, come to an end, complete," occurs only in the Psalms, e.g., 7:9 (MT 10; NEB "do no man harm"); 77:8 (MT 9; NEB "unfulfilled").

Several verbs which in a derived sense mean "end" are sometimes so translated by the RSV. They include: *tāmam*, "be complete, finished" (e.g., Nu. 14:35; NEB "be consumed"), *bālaʿ*, "swallow, engulf" (Ps. 107:27; NEB "all in vain"), *šāḵaḥ*, "forget" (Lam. 2:6), *kāraṯ*, "cut off" (Zec. 9:6; NEB "uproot"), *šālēm*, "be complete" (e.g., Isa. 38:12f.; NEB "torment"), *mûš*, "depart, remove" (Nah. 3:1), *māhar*, "hasten" (Job 5:13), *pānâ*, "turn" (Ps. 90:9; NEB "go by").

The noun *tōṣāʾâ* (e.g., Nu. 34:8; NEB "limit"), derived from the verb *yāṣāʾ*, refers to borders or the extremities of a territory. Some nouns that do not normally mean "end" are occasionally so translated on the basis of their context: *rōʾš*, "head" ("ends of the poles," 1 K. 8:8); *t^{e}qûpâ*, "circuit" ("end of the year," Ex. 34:22; NEB "turn of the year"); *zeh*, "this" (in *mizzeh ûmizzeh*, "each end of a step," 1 K. 10:20); *peh*, "mouth" (in *peh lāpeh*, "one end to the other," 2 K. 10:21); *ballāhoṯ*, "calamity, destruction" ("dreadful end," Ezk. 26:21); *mēhabbayiṯ*, "from the house" ("at the inner end," Ezk. 40:7, 9; AV "within, inward"); *nēṣaḥ*, "everlastingness, perpetuity" ("to the end," Job 34:36, etc.; NEB "once and for all").

"End" in the sense of purpose is conveyed by *ba'^{a}ḇûr* (Ps. 105:45), *l^{e}ma'an* (Lev. 17:5), and Aram. *'aḏ-dibraṯ* (Dnl. 4:17 [MT 14]), all translated "to the end that." Consequence is expressed by *'ēqeḇ* (Ps. 119:33, 112), translated "to the end" (NEB "reward"), and by *lāḵēn* (Isa. 26:14), "to that end."

There are a few difficult passages. In Am. 8:4 *lašbîṯ* is a difficult construction and has occasioned several emendations, but the MT should be retained and understood as referring to the oppressive destruction of the poor (E. Hammershaimb, *Book of Amos* [2nd ed. 1958], pp. 121f.). In Isa. 33:1 *kann^{e}lōṯ^{e}ḵā* probably comes from *nlh*, "complete, finish," though this is the verb's only occurrence (E. J. Young, *Isaiah* [repr. 1977], II, 405). In Job 36:14 the RSV translation "ends in shame" is a paraphrase; the literal rendering "among the cult prostitutes" (RSV mg.) is preferable.

II. In the NT.–The most frequent word for "end" is Gk. *télos*. It is used in the senses of termination or cessation (e.g., 1 Pet. 4:7), last part or conclusion (e.g., Mt. 24:6), goal or outcome (e.g., He. 6:8), and to the last (e.g., 1 Cor. 1:8). In a few cases the preposition *eis* plus neuter pronouns indicate purpose and are translated "to this/that end" (e.g., 1 Tim. 4:10). Other terms translated "end" occur only once or twice each; these are summarized in the heading of this article.

See also ESCHATOLOGY.

J. C. MOYER

END OF THE WORLD. *See* ESCHATOLOGY.

ENDAMAGE. Archaic for "damage" in the AV of Ezr. 4:13.

ENDEAVOR [Gk. *zētéō*] (Gal. 2:17); AV, NEB, SEEK; [*spoudázō*] (1 Thess. 2:17); NEB BE ANXIOUS. This word has been weakened since the AV was translated. In the 17th cent. it implied utmost exertion and success; now it emphasizes the difficulty of the effort and suggests the possibility of failure. For the AV "endeavouring," "endeavour," the RSV reads "sought" in Acts 16:10 (NEB "set about"), "eager" in Eph. 4:3 (NEB "spare no effort"), "I will see to it" in 2 Pet. 1:15, and "deeds" in Ps. 28:4.

ENDIRONS. A corruption of the Middle English term "andirons." *See* HOOK.

ENDLESS [Gk. *apérantos*] (1 Tim. 1:4); NEB "interminable." "Endless" can refer to "myths" as well as to "genealogies." Whether the myths and genealogies be interpreted as gnostic, Jewish, or a combination of Judaism and Gnosticism, the use of *apérantos* here seems to imply that they are tiresome, a waste of time (cf. Bauer, *s.v.*; also Dibelius/Conzelmann, *The Pastoral Epistles* [*Hermeneia*; Eng. tr. 1972], p. 17).

EN-DOR en'dor [Heb. *'ên dōr*–'fountain of dwelling' (Josh. 17:11), *'ên dō'r* (Ps. 83:10 [MT 11]); Gk. *Dōr, Aendōr*]; **ENDOR** [Heb. *'ên dôr*; Gk. *Aendōr, Nēndōr, Ēndōr, Aeldōr*] (1 S. 28:7). A town in the territory assigned to western Manasseh (Josh. 17:11). It is identified with modern Endôr, a village on the northern slope of Jebel ed-Duhy, more commonly known as the hill Moreh or Little Hermon. It is about 11 km. (7 mi.) SE of Nazareth and 6 km. (4 mi.) S of Mt. Tabor.

Two other villages of biblical significance are on the slopes of the hill Moreh. The village of Nain is about 3 km. (2 mi.) SW of Endôr, and on the south slope stood Shunem.

Endor (or En-dor) is mentioned three times in the OT. It is first mentioned among the towns in the territory of Manasseh (Josh. 17:11). Ps. 83:10 says that here the fugitives of Sisera's army perished after their defeat at the Kishon River (Jgs. 4). It was the residence of the woman with a "familiar spirit" (AV, NEB) whom Saul consulted on the night before the battle of Gilboa (1 S. 28:7); *see* DIVINATION III.G; MEDIUM.

J. F. PREWITT

ENDOW; ENDOWED; ENDOWING [*zāḇaḏ*] (Gen. 30:20); AV ENDUE; [piel of *mālē'*] (Ex. 28:3); AV FILLED; [*yāḏaʿ*] (Dnl. 1:4); AV CUNNING; NEB "at home in all branches of"; [hiphil of *nāḥal*] (Prov. 8:21); AV "cause to inherit"; **ENDOWMENT** [Gk. *dósis*] (Jas. 1:17); AV GIFT; NEB GIVING; **ENDUED** [Heb. *yāḏaʿ*] (2 Ch. 2:12f.); NEB ENDOWED. "Endow" originally meant "provide with a dowry," while "endue" meant "clothe." The likeness of the literal meanings confused the metaphorical uses of the words despite their different origins, so that they are now used in a nearly synonymous fashion. Thus we find in the RSV phrases in which "endow" and "endue" are used interchangeably: "whom I have endowed with an able mind" (Ex. 28:3), "youths . . . endowed with knowledge" (Dnl. 1:4), "a wise son, endued with discretion and understanding" (2 Ch. 2:12), and "a skilled man, endued with understanding" (v. 13).

F. K. FARR

ENDS OF THE EARTH. *See* EARTH, CORNERS OF THE.

ENDURE [Heb. *ḥāyâ*, *'āmaḏ* (e.g., Ex. 18:23; Ps. 102:26 [MT 27]; 111:3, 10; 112:3, 9; Ezk. 22:14; Dnl. 11:6), *qûm*–'arise' (e.g., Job 8:15), *yāḵōl* (e.g., Est. 8:6; Ps. 101:5; Isa. 1:13; Jer. 10:10), *yāšaḇ*–'sit down' (Ps. 102:12 [MT 13]); Gk. *ménō, hypoménō* (e.g., Mt. 10:22; 24:13), *phéro, hypophérō* (e.g., 2 Tim. 3:11), *makrothyméō* (He. 6:15), *stégō* (1 Cor. 9:12), *eimí* (Mt. 13:21 par. Mk. 4:17), *kakopathéō* (2 Tim. 4:5), *anéchomai* (e.g., 1 Cor. 4:12; 2 Tim. 4:3), *kateréō* (He. 11:27)]; **ENDURING** [Heb. *'êtān*–'lasting' (Nu. 24:21; Jer. 5:15; Mic. 6:2), *'āṯēq*, qal part. of *'āmaḏ* (Ps. 19:9 [MT 10]), *leʿôlām* (e.g., Eccl. 2:16); Aram. *qayyām* (Dnl. 6:26 [MT 27]); Gk. *anéchomai, hypomonḗ*]; **ENDURANCE** [Gk. *hypomonḗ*] (e.g., Lk. 21:19; Rom. 5:3f.; 4; 2 Cor. 6:4; Col. 1:11; He. 10:36).

The more common biblical terms are Heb. *ḥāyâ* and *'āmaḏ* and Gk. *hypoménō* and *hypomonḗ*. Sometimes the RSV inserts "endure" or "enduring," e.g., to render Heb. *'im šāmeš*, "like [=as long as] the sun" (Ps. 72:5), *leʿôlām ḥasdô*, "his steadfast love (is) forever" (Ps. 136), *ziḵrôn . . . leʿôlām*, "remembrance . . . forever" (Eccl. 2:16, AV; cf. Prov. 27:24; Lam. 5:19).

Basically "endure" has two meanings: (1) "last," "remain" (cf. Heb. *leʿôlām*, "forever" [Ps. 136]; Gk. *ménō*, "remain" [Jn. 6:27]); (2) "tolerate," "suffer" (cf. Gk. *phérō*, "bear [patiently]" [Rom. 9:22; He. 12:20], *hypomonḗ*, "patience" [2 Cor. 1:6]). In Job 8:15 the reference is to a house that does not hold up when leaned against (cf. Heb. *qûm*, "arise"; parallel to "stand").

(1) In the sense of "last" or "remain," "endure" is used of God. His years (Ps. 102:26), His glory (Ps. 104:31), His dominion (Ps. 45:6 [MT 7]; Lam. 5:19), His righteousness (Ps. 111:3), His faithfulness (Ps. 117:2), and His steadfast love (in Chronicles and frequently in the Psalms, esp. in Ps. 136) do not cease. In comparison with God's unending life, human life is brief (Ps. 102:24), and prayers are made that the king may live a long life (Ps. 61:6; 72:17; cf. 89:36). In the moral dimension, truthful lips (Prov. 12:19; in contrast with the lying tongue) and human righteousness (e.g., Ps. 112:3, 9; 2 Cor. 9:9, quoting Ps. 112:9) last.

(2) In the sense of "bear" or "tolerate," Paul tolerated all things in order that Christ's gospel would not be an obstacle to some (1 Cor. 9:12; cf. 2 Tim. 2:10), and stated forcefully that Christians bear all things in love (1 Cor. 13:7).

At times God's people must endure persecution (Ps. 119:84). In the NT particularly, believers accept persecution (1 Cor. 4:12; 2 Cor. 1:6; 2 Tim. 4:5; cf. Rev. 1:9) and are urged to bear divine discipline (He. 12:7). But they are reminded that suffering leads to endurance, which in turn produces character (Rom. 5:3f.) and in the end leads even to salvation (Mt. 10:22; 24:14 par. Mk. 13:13).

See *TDNT*, IV, *s.v.* μένω κτλ.: μένω, ὑπομένω, ὑπομονή (Hauck).

R. W. V.

EN-EGLAIM en-eg'lā-əm, en-əg-lā'əm [Heb. *'ên ʿeglayim*–'spring of (the two) calves'; Gk. *Enagaleim*; Lat. *Engallim*]. Ezk. 47:10 says that in the new age a stream of water issuing forth from the temple mount will so purify the Dead Sea that "fishermen will stand beside the sea; from En-gedi to En-eglaim it will be a place for the spreading of nets."

Documents from the Judean wilderness dating to the Bar Cochba period refer to *meʿḥôz ʿeglaṯayin*, "the harbor town of Eglatain." J. Starkey has suggested plausibly that this place be equated with En-eglaim. It is simply called

māḥôzā' in the Aramaic texts from this collection and *Kŏmē Maōza,* "the town of Maoza," in the Greek documents, which always specify a location in the vicinity of Zoar. A Hebrew deed concerns two residents of *hallûḥît šebbimḥôz 'eglaṭayin,* "Luhith, which is in [the municipal district of] the harbor town of Eglatain." Luhith is associated with Zoar and Eglath-shelishiyah (Isa. 15:5; Jer. 48:34); the latter may be another form of the same Eglaim/Eglatain.

Clearly the site must have been on the southeastern shore of the Dead Sea (near ZOAR) and must have had a good water source (*'ên* = "spring"); in the Roman period it must have been a port for sea traffic on the Dead Sea. Thus the prophet was evidently speaking of a purification of the poisonous waters from one end of the sea to the other. Earlier attempts to locate En-eglaim at the northern end of the Dead Sea can no longer be sustained.

ENEMESSAR en-ə-mes'är [Gk. *Enemessar, Enemessaros*] (AV, RSV mg., NEB mg., Tob. 1:2, 15, etc.). The name of an Assyrian king, generally considered (since H. Grotius, 17th cent.) to be a corruption (though sometimes defended as an alternative form) of the name of Shalmaneser who carried Israel captive to Nineveh, as related in 2 Kings. The writer of Tobit makes Sennacherib the son (1:15) as well as the successor of Enemessar, whereas according to the Assyrian inscriptions Sennacherib was the son of Sargon. This is only one of several serious historical difficulties in Tobit. J. HUTCHISON

ENEMY; FOE [Heb. *'ōyēḇ, ṣar (ṣār), ṣōrēr, śônē', śôrêr* (Ps. 5:8 [MT 9]; 27:11; 54:5 [MT 7]; 56:2 [MT 3]; 59:10 [MT 11]; 92:11 [MT 12]), *'ār* (1 S. 28:16), *qāmîm* (Ex. 32:25), *'aḵzārî*–'cruel' (Jer. 30:14), *ṣîyîm*–'dwellers in the wilderness' (Ps. 72:9); Aram. *'ār* (Dnl. 4:19); Gk. *echthrós, antikeímenos* (1 Tim. 5:14)]; AV also ADVERSARY, "one who hates," "one who troubles" (Ps. 3:1 [MT 2]; 13:4 [MT 5]), TROUBLE (Ps. 108:12 [MT 13]; 60:11 [MT 13]), AFFLICTION (Zec. 8:10), CRUEL ONE (Jer. 30:14), "ones who dwell in the wilderness" (Ps. 72:9); NEB also ADVERSARY, "one who hates," "one who speaks evil" (Ps. 92:11), CAPTOR (1 K. 8:48), OPPRESSOR (Jer. 30:16), PERSECUTOR (Ps. 81:14 [MT 15]), ETHIOPIANS (Ps. 72:9), INVADER (Lam. 4:12), etc. The RSV also has "enemies" in 1 S. 10:1 and 2 Ch. 32:22, where it follows the LXX (AV omits). It supplies the term as suggested by the context in Gen. 14:11 (NEB "four kings"); 1 K. 5:3; Jer. 46:22 (AV "army"); Zec. 10:5. It emends MT *zārîm* (Isa. 29:5), literally "strangers" as AV renders it, to *ṣārîm,* and MT *ṣārâ* (Nah. 1:9), literally "affliction" (cf. AV), to *ṣar.*

In the OT "enemy" and "foe" most frequently refer to national enemies of Israel and her king (1 S. 29:8; Dt. 20:1; etc.), although they also indicate personal enemies (Ex. 23:22; Nu. 35:23; Est. 7:6; etc.). It is in the latter sense that the word frequently appears in the Psalms. Many of these references express intense hatred toward the enemies: "I hate them with perfect hatred; I count them my enemies" (Ps. 139:22). Since these enemies are described in general terms, their identity has been much debated by scholars. Some have suggested that they were wicked sorcerers, political opponents, rich extortionists, or criminals. Christoph Barth thinks that we should not view these references as "outbursts of personal desire for revenge," but that we should consider them elements of "liturgical prayers and formulas, which are directed against the enemies of God in general, and only in a secondary sense against particular adversaries" (*Intro. to the Psalms* [Eng. tr. 1966], p. 48).

In the traditions that characterize Yahweh as a "divine warrior," He is spoken of as the enemy of Israel's enemies (Ex. 23:22; Dt. 20:4; Isa. 42:13 etc.). In His judgment of Israel, however, Yahweh can also be understood as Israel's enemy (Lam. 2:5).

In the NT "enemy" and "foe" usually refer to personal enemies (Gal. 4:16; 2 Thess. 3:15; etc.), but "enemies" can also be used in the OT sense of the national enemies of God's people (Lk. 1:71, 74; 19:43; etc.). Anyone who is hostile to God and His Son is an enemy (Lk. 19:27; Phil. 3:18; and the passages that quote Ps. 110:1, e.g., Mk. 12:36 par.; Acts 2:35; 1 Cor. 15:25; He. 1:13). In the latter sense, it is the devil who is the enemy above all enemies (Mt. 13:39; Lk. 10:19; etc.). Paul refers to death as the last enemy to be destroyed (1 Cor. 15:26). Only in the NT is the command given to love one's enemies (Mt. 5:44); however, in many places in the OT kindness to one's enemies is encouraged (Ex. 23:4; Prov. 24:17; 25:21).

ENENIUS e-nē'ni-əs (AV, NEB, 1 Esd. 5:8). *See* BIGVAI **1.**

ENFLAME. *See* BURN.

EN-GADDI en-gad'ī (Sir. 24:14, AV); RSV mg. "on the beaches." *See* EN-GEDI.

ENGAGE. In 2 Ch. 24:13 the Hebrew verb *'āśâ,* "labor," "make something," is used of the restoring of the house of the Lord. In Lk. 22:5 the Greek verb *syntíthēmi* occurs in the sense of "make a contract," "sign an agreement." In Phil. 1:30 the common verb *échō,* "have," is rendered "engaged" because of its association with the term "conflict."

EN-GANNIM en-gan'im [Heb. *'ên gannîm*–'spring of gardens'].

1. A town in the "valley" or Shephelah territory of Judah, named with Zanoah and Eshtaol (Josh. 15:34). Two places have been suggested as locations: one is Khirbet Umm Jina, very close to Beth-shemesh; the other is at Beit Jemâl about 3 km. (2 mi.) to the south.

2. A town in the territory allotted to Issachar (Josh. 19:21) assigned to the Gershonite Levites (21:29). In 1 Ch. 6:73 the name is replaced by Anem. It probably corresponds to the Ginnea of Josephus (*Ant.* xx.6.1; *BJ* iii.3.4) and may certainly be identified with the modern Jenîn on the southern edge of the plain of Esdraelon about 8 km. (5 mi.) SE of Megiddo and 11 km. (7 mi.) SW of Mt. Gilboa, on the road leading through Samaria to Jerusalem. The area is lush with beautiful gardens and fruitful orchards abundantly watered by local springs.

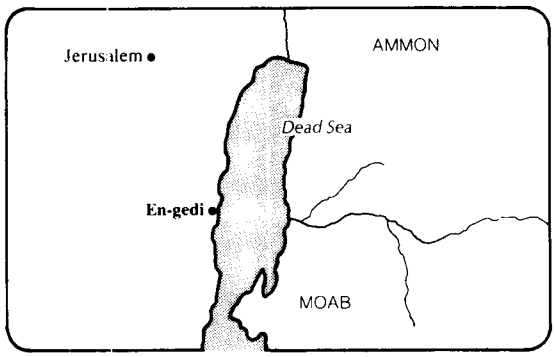
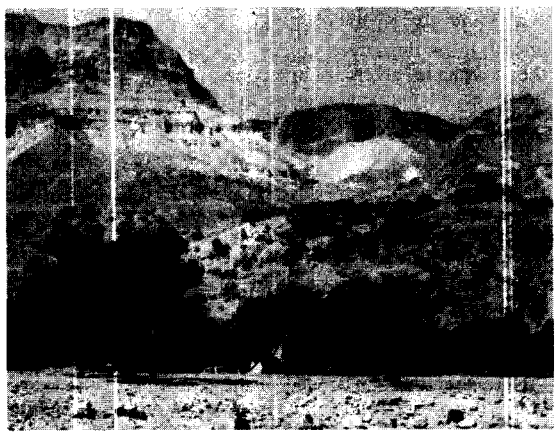
EN-GEDI en-ge'dē, en'gə-dī [Heb. *'ên geḏî*–'fountain of the kid'; Gk. *Engad(d)ei(n), Engaddi*]; AV Apoc. EN-GADDI. An ancient settlement on the western shore of the Dead Sea. It bears the name of a perennial spring that gushes from a small promontory about 180 m. (600 ft.) above the lake; this name has been preserved in the Arabic 'Ain Jidi. The remarkable water supply in the midst of such a desolate region led to the creation of a small community at the oasis between the courses of the Wâdī Sudeir and the Wâdī 'Areijeh. *See* Plate 3.

I. Iron Age.–En-gedi was included, along with five other

EN-GEDI





The spring of En-gedi with the mountains of Judah in the background (B. VanElderen)

settlements, in the "wilderness" district of the tribe of Judah (Josh. 15:62). During David's outlaw days the "strongholds of En-gedi" (1 S. 23:29 [MT 24:1]) in the "wilderness of En-gedi" (1 S. 24:1 [MT 2]) provided refuge from Saul and his armed search parties. The cave that figures so prominently in one of their encounters (1 S. 24) cannot be identified today, but investigators have noted several caverns in the ravines around En-gedi, especially the "Cave of the Pool" in the Wâdī Sudeir.

As a reprisal for the Judean and Israelite attack on Moab (1 K. 3), the Moabites, Ammonites, and Meunites crossed the Dead Sea (probably at the narrowest and shallowest point from the Lisân to the western bank) and encamped at En-gedi (2 Ch. 20:2; *see also* HAZAZON-TAMAR) in preparation for an invasion of Judah. Their alliance was not firmly established, however, and the would-be attackers soon fell to fighting among themselves and thus destroyed each other.

The prophet Ezekiel saw a vision of the Dead Sea being transformed by the life-giving waters from the Jerusalem temple. Fishermen would stand on the banks from En-gedi to En-eglaim, and their nets would bring in a multitude of different fish as if from the Great Sea (Ezk. 47:10).

The Song of Solomon also bears witness to the importance of En-gedi and its oasis: "My beloved is to me a cluster of henna blossoms in the vineyards of En-gedi" (Cant. 1:14). This is apparently a reference to the *Lausonia alba*, known for its small fragrant blossoms from which cosmetics were made.

There is no written record of En-gedi's destruction after the fall of Jerusalem (586 B.C.). Perhaps it can be ascribed to Edomite incursions against the hapless Judean settlements. The OT reflects the enmity provoked by this action (e.g., Ezk. 35:5, 10, 15; Ps. 137:7; Lam. 4:21). Mazar has suggested that this destruction took place *ca.* 582/581, when Nebuchadrezzar conducted a military campaign in Syria during which Ammon and Moab fell under his sway. Nebuzaradan deported additional members of the Judean population in that same year (Jer. 52:30).

Though archeological evidence has shown that a settlement arose at En-gedi during the 5th-4th cents. B.C., no references to it have been found in writings from the Persian period.

II. Hellenistic and Roman Periods.–The tall palm trees of En-gedi were still famous in the Hellenistic period (Sir. 24:14), as well as its balsam (Josephus *Ant.* ix.1.2). This latter, evidently the *commiphora opobalsamum*, produced a very precious resin used in the manufacture of perfume and medicine. Whether the settlement there in Ben Sira's day was Jewish or not is hard to say. Mazar assumes that En-gedi had been occupied by Edomites (Idumeans) who converted to Judaism upon the conquest of Idumea by John Hyrcanus (Josephus *Ant.* xiii.9.1). The Hasmoneans probably took over a Ptolemaic estate at En-gedi, which they in turn developed into a flourishing administrative center for the toparchy in that area (Josephus *BJ* iii.3.5). Some scholars think that Herodion became the capital of the toparchy under King Herod.

During the Jewish revolt against Rome, En-gedi suffered a cruel fate. The Sicarii (Zealots) who had seized Masada made a plundering raid during the Feast of Unleavened Bread, slaughtering the populace and looting the stores (Josephus *BJ* iv.7.2). Thus, after the Romans had quelled the rebellion, Pliny records that En-gedi was in ruins (*Nat. hist.* v.15 [73]).

At the beginning of the 2nd cent. A.D. En-gedi was rebuilt and assigned to the administrative district of which Jericho was the headquarters. The community consisted mainly of Jews plus a cohort of Thracian auxiliary troops. Much valuable information about the residents of En-gedi at this time is being gleaned from the MSS discovered in the "Cave of the Letters." These indicate that there was a very important commercial center, probably associated with a harbor, which had connections with other towns in the Dead Sea region. There are ample indications that the groves and vineyards were also flourishing. These documents add a new chapter to En-gedi's history.

The Second Jewish War with Rome clearly involved the Jewish population there. The leader of this new revolt, Simon Bar Cochba ("son of the star"), had representatives at En-gedi who governed in his name. In one of his letters he rebuked them for enjoying the benefits of the oasis without showing sufficient concern for their brethren on the battle line. Eventually, many of the residents had to flee to the caves high in the cliffs overlooking the desert canyons W of the Dead Sea. There they held out to the death against the Roman troops who encamped above them on the plateaus.

III. Byzantine Period.–Although historical sources do not describe the destruction or the rebuilding of En-gedi by the Romans, the geographer Ptolemy was aware of its existence in the middle of the 2nd cent. A.D. (*Geog.* v.15.5). Eusebius affirmed that a "very large village" was at En-gedi in his own day and indicated that it was attached to the Jericho administrative district; he also referred to the *opobalsamon* (*Onom.* 86.16-19). Stephanus Byzantius also mentioned this "large village" (170.10ff.). The decline of the settlement may have begun even prior to the Arab conquest. After that only bedouin or transhumants were in the area until the present kibbutz was founded after the establishment of the modern state of Israel.

ENGLISH VERSIONS. The English Bible in the form of the Authorized (or King James) Version has secured for itself an enduring place in the thought, piety, speech, and literature of the English-speaking world. It is not always appreciated, however, that this result was achieved only after a long effort and struggle dating back to the re-evangelization of Britain after the Roman withdrawal and the barbarian invasions. Nor is it always realized that the translation of the Bible into English did not stop in 1611, for with the discovery of new texts, the intensified examination of Scripture and its background, and changes in the English language, new renderings were continuously needed and attempted right up to the great outburst of translating in the later 19th and the 20th centuries. To give at least a summary of this larger story of the English Bible is the purpose of the present article.

I. Anglo-Saxon Versions.–The original British churches lived within the Roman empire, so they could make intelligent use of the Latin Bible, which from the 4th cent. on meant Jerome's translation, the Vulgate. With the barbarian invasions, however, a new situation arose. Whereas the Vulgate could be studied, used, and copied in the circles of Celtic monasticism, the newcomers, who had first to be evangelized, brought with them no background of Latin language and culture. The need for translation into the vernacular arose, therefore, with the extensive evangelization and the growth of the Anglo-Saxon Church in the 6th century.

The beginnings of this work seem to have come in the latter part of the 7th cent., not so much through precise translation of the Bible as through the rendering of portions of it into Anglo-Saxon poetry. Accrding to Bede's *Ecclesiastical History* iv.24, the herdsman Caedmon led in this new development. Inspired by a dream, Caedmon sang of creation; and when Hilda took him into Whitby Abbey for further teaching, he put other parts of the Pentateuch — and also, it is said, stories from the NT — into verse. Others adopted the same method of popularizing the contents of Scripture, including the ninth-century Cynewulf, who composed a poetic version of the gospel story in his *Crist*.

Translation proper began shortly after Caedmon. Aldhelm, who studied under Theodore of Tarsus, did pioneering work with his rendering of the Psalter into early English around 700. Bede himself, the great scholar of Jarrow, took a considerable interest in promoting popular knowledge of Scripture. His pupil Cuthbert wrote in a letter that Bede had been translating John's Gospel when he died in 735, and had either finished the work or reached as far as 6:9. Unfortunately all of his work has perished.

Further information comes only with Alfred the Great (848-901), and here again the reports are fragmentary and obscure. The tradition agrees solidly that the Decalogue and portions of Ex. 21–23, along with Acts 15:23-29, were put into English at the head of the code of laws. A further account has it that Alfred was at work on a translation of the Psalms at the time of his death. Undoubtedly the king stimulated the growth of Anglo-Saxon culture, with an important biblical component.

The practice of glossing (writing interpretative comments) the Latin text became widespread in the later Anglo-Saxon period. Various manuscripts of the Psalms with such glosses are extant, and in the middle of the 10th cent. Aldred added an interlinear Anglo-Saxon rendering to the Latin text of the Gospels. From the same period, the Rushworth Gospels offer more or less the same glosses on three of the Gospels but have an independent gloss on Matthew by a priest called Farman.

Some translations from this period have also come down to us, although not of a complete testament, let alone the whole Bible. The Wessex Gospels are the first translation of all four Gospels in English without the Latin text. From around 1000 we have a rendering of parts of the Hexateuch by Abbot Aelfric of Eynsham, who in his homilies rendered portions from other OT and NT books as well. Thus by the time of the Norman Conquest in 1066, important steps had been taken in the direction of an Anglo-Saxon Bible.

II. The Middle Ages.–A. Early Norman Period. The Normans initiated many reforms in the English Church, and in many areas a higher standard of Christian life resulted. From the standpoint of the English Bible, however, the conquest had adverse effects, so that translation work into English came to lag behind that into many other European tongues. Two reasons can be advanced for this. More important, initially, was that the Normans did not speak English; hence they had little interest in promoting versions in the native tongue. The second reason is that Anglo-Saxon itself was gradually developing into Middle English with the fusion of the peoples. For a time Anglo-Saxon versions could be copied, improved, and put to use, but in time they became unintelligible, and only as Middle English began to develop into a literary language did new work on Bible translation begin.

B. Middle English. This new beginning came at the end of the 12th cent., and it arain took the form of a poetic version, this time of the Gospels and Acts. The author, an Augustinian monk named Orm, also included a commentary in his edition. By the middle of the 13th cent. poetical versions of Genesis and Exodus had appeared,

and by the end of that century a poetical rendering of the Psalms.

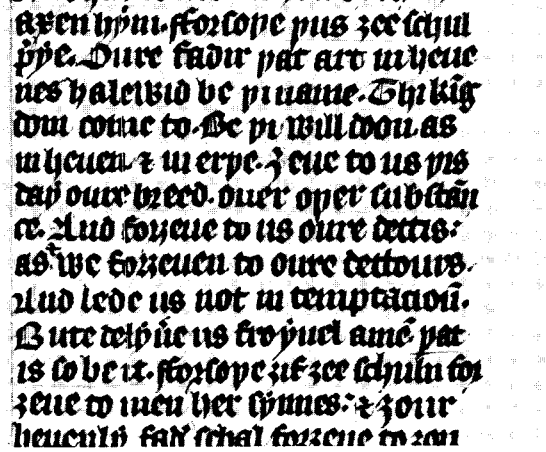
The Psalms had their usual appeal, and two versions in prose followed in the 14th century. One is from the Midlands, while the other is the famous translation by Richard Rolle of Hampole near Doncaster in the North. Rolle's version was incorporated in a commentary and proved to be so successful that it was copied out in other dialects.

Work on the NT followed before the end of the 14th century. This time the Epistles came first, apparently in a version made for English monasteries. Later, Acts and the first chapters of Matthew were added, along with a prologue summarizing Genesis and Exodus.

C. Wyclif. The mentioned renderings thus far did not cover the whole Bible and seem to have been designed for monastic rather than for popular use. Yet during this same period — the end of the 14th cent. — a giant stride was made toward the attainment of a complete Bible for the whole people. The reforming scholar John Wyclif was undoubtedly the driving force behind this enterprise. The first edition of the so-called Wyclif Bible came out between 1380 and 1384, in the closing years of Wyclif's life. The early part, up to Baruch 3:20, is stated in some copies to be the work of a certain Nicholas of Hereford, an ardent disciple of Wyclif whose career was interrupted by the repressive measures of 1382. The rest is ascribed to "j. and other men." On the assumption that *j.* stands for John, some conclude that John Wyclif is meant, but it might equally well be John Purvey or some other John; it is quite certain, however, that it comes from the Wyclif circle.

This first edition used the Latin Vulgate as a basis and adopted an extremely literal method that preserved Latin construction and even word order. Much speculation has arisen about the reason for this method, since it can hardly have contributed to the value of the work for popular instruction. Possibly the version was meant not so much for the people at large, who would mostly be unable to read and who could not afford copies, but rather for lay leaders of the Wyclif movement, who could make better use of commentaries and glosses if the English kept close to the Latin, and who could themselves pass on the contents in idiomatic form.

Earlier Wycliffite Version of the Bible (15th cent., on vellum, Egerton MS 618), Mt. 6:7-15, including the Lord's Prayer (British Library)



D. Purvey. With the second edition, however, came a radical revision, especially of the part done by Nicholas of Hereford. John Purvey, who had been Wyclif's secretary, in 1396 prepared the new edition and affixed a prologue explaining his aims and principles. The general purpose was to make it possible for all English people to know the divine law. The principles included the establishment of a pure text (Nicholas of Lyra was studied to this end), careful examination of the meaning, translation by sentence rather than word for word, and a rendition into the speech of the common man. In spite of an attempt to suppress this translation at the Synod of Oxford in 1408, it apparently enjoyed considerable success, and, since there was nothing in the text to suggest a Lollard provenance, copies made without the prologue and glosses could easily be accepted as orthodox productions.

Purvey represents a highly important transition to the period of modern Bible translation. He understood the task of translation so well, and did his work so competently, that he contributed much to the great translations of the Reformation period and through them to those of more recent times. Possibly the impact of his work might have been greater still had printing been available to give it wider and more economical circulation. As it was, however, the spoken tongue was changing so fast as to date it badly; in addition, some new factors had begun to make necessary a fresh and even greater and more successful movement for an English version of the Scriptures that all people might read and understand.

III. Reformation Bibles.—*A. New Factors. 1. Renaissance.* The first among these factors is the Renaissance. This opened up in a new way the treasures of classical and patristic learning. It also revived and extended the study of Greek and Hebrew, thus making possible a consultation of Scripture in the original languages. It stimulated textual research with a view to the preparation of original editions. It brought a searching light to bear on the ignorance and corruption of the contemporary church and in so doing showed a need to return to the first springs. Finally, it gave a sense of the value of learning, which filled scholars like Erasmus with enthusiasm to make Scripture available to people of all ages, states, and countries.

2. Reformation. The Reformation is the second and related factor. Even more radically than the humanists, the Reformers measured the church life and teaching of their day by the standard of Holy Scripture. The discrepancies appalled them. They thus made it their task to get at the pure message of the Bible and to reconstruct the teaching and work of the Church in accordance with it. In carrying out their task the Reformers naturally drew on the resources placed at their disposal by the new learning, in which they were themselves ardent participants. So urgent did they consider the need for disseminating Scripture and its teaching that they were not prepared to wait for officialdom to act, but regarded it as both legitimate and necessary to take the initiative when circumstances compelled.

3. Printing. Finally, the invention of movable-type printing came just at the right time to circulate the translated Bible on a scale previously unthinkable. Speed and comparative cheapness resulted from this technical advance. Large-scale illiteracy still posed a problem, especially in rural areas; thus educational reforms were an essential part of the Reformation program. But even before these reforms were effected, Bibles could be placed in the hands of those who were already literate and these persons could then read to others or share their newly acquired knowledge of Scripture with them.

B. Tyndale. In England the Reformation came late. Even the impulses stirred by the new learning were

Facsimile of William Tyndale's translation of the Bible (Cologne, 1525; repr. London, 1871), Mt. 1 and facing woodcut illustration of the Gospel writer and an assisting angel. Later translations and compilations, including Coverdale's, Matthew's, the Great, and the Geneva Bibles, made use of Tyndale's Bible (New York Public Library)

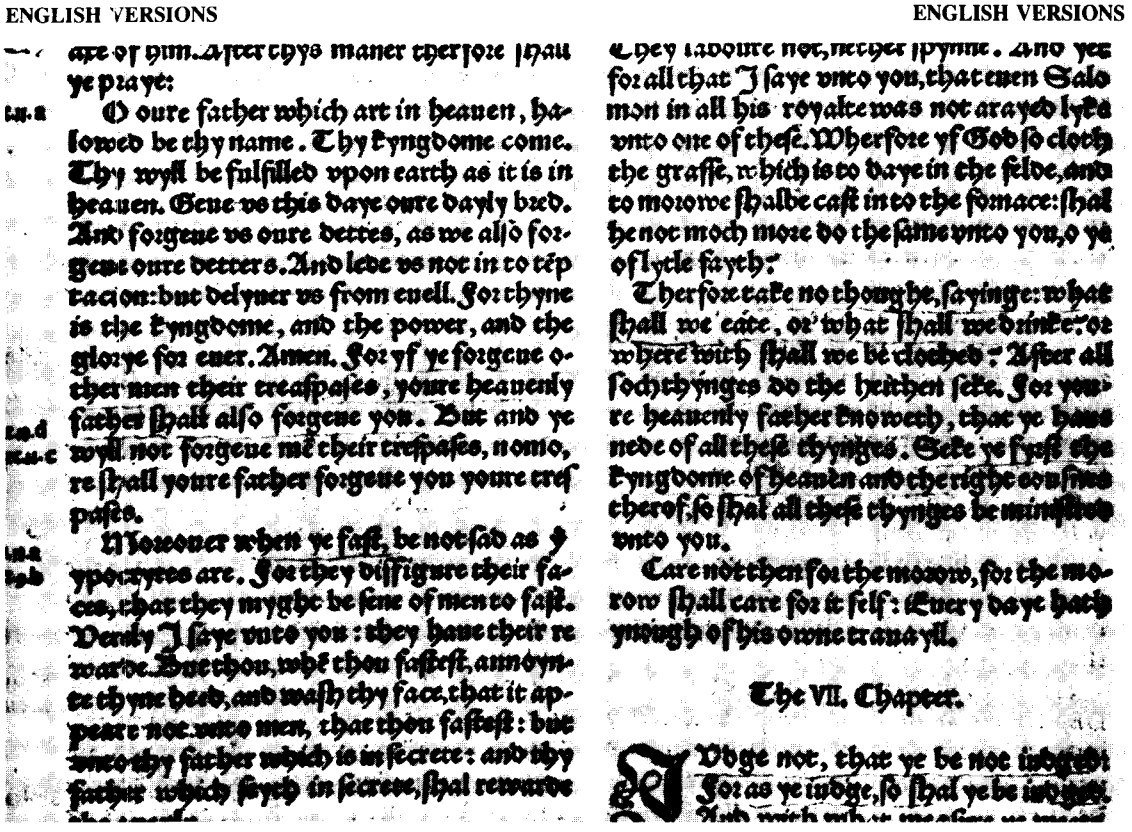
checked by fears of Lutheran heresy. Bible translation found an early champion, however, in William Tyndale. Educated at Oxford and later at Cambridge, Tyndale heard the call of Erasmus for Bibles in the common tongue, and the manifest ignorance of the clergy confirmed his desire to take biblical instruction directly to the people. When the cultured Cuthbert Tunstall (then Bishop of London) refused him patronage in 1523, he secured support from a London merchant. Convinced that he could not realize his ambition in England, he made his way to Germany in 1524 and lived out the rest of his life in various cities abroad. After an early visit to Wittenberg, where he probably met Luther, Tyndale finished his translation of the NT in 1525, and printing started at Cologne. The authorities interrupted the work, but Tyndale was able to escape to Worms with some of the sheets. There the first octavo edition of the NT appeared in 1526, followed by a notable revision in 1534 and another of less significance in 1535. Copies of the Cologne fragment in quarto, which contain only Matthew and the beginning of Mark but to which there is an important prologue, might well have reached England too, since at least one copy has survived.

This prologue follows that of Luther's 1522 NT. Since the contents page lists the books in the same way as Luther's, and since Tyndale's work in English is very similar to Luther's work in German, some have suggested that Tyndale displayed little originality but simply turned Luther's version into his own tongue. There is no doubt that he used Luther's work, as he also used the Vulgate, but careful study shows conclusively that he used Erasmus's Greek text as well. At many points his translation diverges from that of Luther, and in the main he emerges as a better Greek scholar. He broke free from subservience to the Vulgate, too, especially in his rejection of terms that had taken on a special ecclesiastical sense, such as "priest" for "elder" and "do penance" for "repent." Like Purvey, although in an English that had changed much since Purvey's day, he achieved a fresh and simple idiomatic translation that has laid its imprint on many subsequent versions.

The official reaction to Tyndale's NT was hostile. Those who bought copies were required to hand them in for destruction. The ports were watched to check imports. Thomas More initiated a violent attack on alleged mistranslations, the heart of the controversy being the ecclesiastical terms (cf. More's *Dialogue* of 1529). Tunstall apparently bought up as many copies as possible for burning. This action, however, encouraged printers to issue pirated editions. It also provided cash for Tyndale's own work of revising the NT and pressing on with the OT. He managed to publish his version of the Pentateuch in 1530 and of Jonah in 1531. After his execution in 1536 the Matthew's Bible appeared (1537), containing material from Joshua to 2 Chronicles which most scholars ascribe to Tyndale. The OT displays the same boldness and idiomatic freshness as the NT. It is a tribute to the quality of all of Tyndale's work, not only that it proved a model for later versions, but that at some points the RV went back to it where the AV had taken another course.

C. Joye. By 1530 Tyndale was no longer alone in the field. George Joye had also moved into exile, and worked for a while with Tyndale. Joye published his first version of the Psalms in 1530, Isaiah in 1531, and Jeremiah and Lamentations along with the Song of Moses and a second edition of the Psalms in 1534. In this same year he put out a new edition of Tyndale's NT with some annoying changes, especially the odd "life after this life" for "resurrection." This work, however, had the happy effect of stirring Tyndale to bring out his own 1534 edition, which B. F. Westcott described as his "noblest monument." Joye's further contribution consisted of another edition of the NT and some work on the OT, possibly including Proverbs and Ecclesiastes.

D. Coverdale. By 1534 the break with Rome and the cautious sponsorship of Thomas Cranmer, Archbishop of Canterbury, opened the way to less clandestine activity. Miles Coverdale, who had helped Tyndale in Hamburg



Miles Coverdale's Bible (Marburg?, 1535), Mt. 6–7, including the Lord's Prayer (New York Public Library)

and Antwerp, took advantage of the new situation to present his own rendering of the Bible for official approval. A graduate of Cambridge, Coverdale had translated the entire Bible while still abroad. Published in Europe (1535), the first complete printed English Bible soon reached England, furnished with a fulsome address to the king. Since no heresy could be found in it, Henry reportedly said: "Then in God's name let it go abroad among the people." A folio and a quarto edition appeared in 1537, and Coverdale added to his work in 1539 by publishing the Vulgate with an English translation in parallel columns.

Coverdale's work went more rapidly because he did not study the originals so closely as Tyndale. Indeed, he claims only to have translated from German ("Douche") and Latin versions using the Vulgate, the new Latin version of Pagninus, Luther, the Zurich Bible, and Tyndale where appropriate. Yet Coverdale brought excellent stylistic gifts to the task. If he relied heavily on Tyndale in the NT, he revealed his own talents in those parts of the OT that Tyndale never reached. His version of the Psalms, as he himself revised it for the Great Bible (1539), has become familiar to generations of Anglican worshipers through the Book of Common Prayer. If it is less accurate than the AV and later revisions, it has at many points both finer rhythms and more striking phrases.

E. Matthew's Bible. The year 1537 saw the appearance of an important English version bearing on the title page the name of a certain Thomas Matthew. No such person is known, and it seems probable that this was a pseudonym for John Rogers, a former assistant of Tyndale. Nor should Matthew or Rogers be called the translator, for in fact he was just an editor or compiler. His Bible consists of all of Tyndale's work supplemented by that of Coverdale, along with a rendering of the Prayer of Manasseh from Olivetan's French version. Yet this Bible is a significant one, for it quickly attracted the attention of Cranmer, who, by way of Thomas Cromwell, secured for it the approval of Henry VIII. A royal license was issued for it, so that by a stroke of irony Tyndale's work came out with official commendation only a year after his untimely death. The Bible of Richard Taverner, published in 1539, is simply a revision of Matthew's Bible, in which Taverner's fine Greek scholarship helps to attain greater accuracy in the NT.

F. Great Bible. The publication of Matthew's Bible opened the door for even greater accomplishments. In 1536, 1537, and 1538 diocesan and national injunctions were issued ordering the provision of English Bibles in all the churches. Little could be done as long as no approved version existed; but when the 1538 injunction called for "one book of the whole Bible of the largest volume in English," arrangements were also made to publish a new and larger edition of Matthew's Bible. Coverdale was entrusted with the task of revising it, and with the backing of Henry and Cromwell the printing was done in Paris. After some delays due to the Paris inquisition, what came to be known as the Great Bible was published in 1539. A revised edition followed in 1540 with a title page indicating that this was the Bible meant to be used in the churches, for it had royal approval and had sustained examination by two bishops, one of whom was Tyndale's former opponent Tunstall. Archbishop Cranmer contributed to this edition a preface which earned for it the name Cranmer's Bible. In it he recommended the use of Scripture and adduced passages from the church fathers to show that in it all people may "learn all things,

of my bones, and flesh of my flesh. She
shalbe called woman, because she was ta-

and his mother, and shal cleave to his wife,
and they shalbe one flesh.

A. Geneva Bible. A significant event, however, had occurred during the reign of Mary. English exiles in Geneva had continued the work of translation and revision which had been going on steadily from the publication of the first edition of Tyndale's NT. In 1557 they produced a revised NT, the work of William Whittingham, who had married a relative of Calvin and later became Dean of Durham. For this revision of Matthew's Tyndale, Whittingham used Theodore Beza's Latin NT of 1556. He introduced the verse divisions, first found in Stephanus's Greek NT of 1551. He also used italics for supplementary words, went back to "church" instead of Tyndale's "congregation," and substituted "General Epistles" for the earlier "Catholic Epistles."

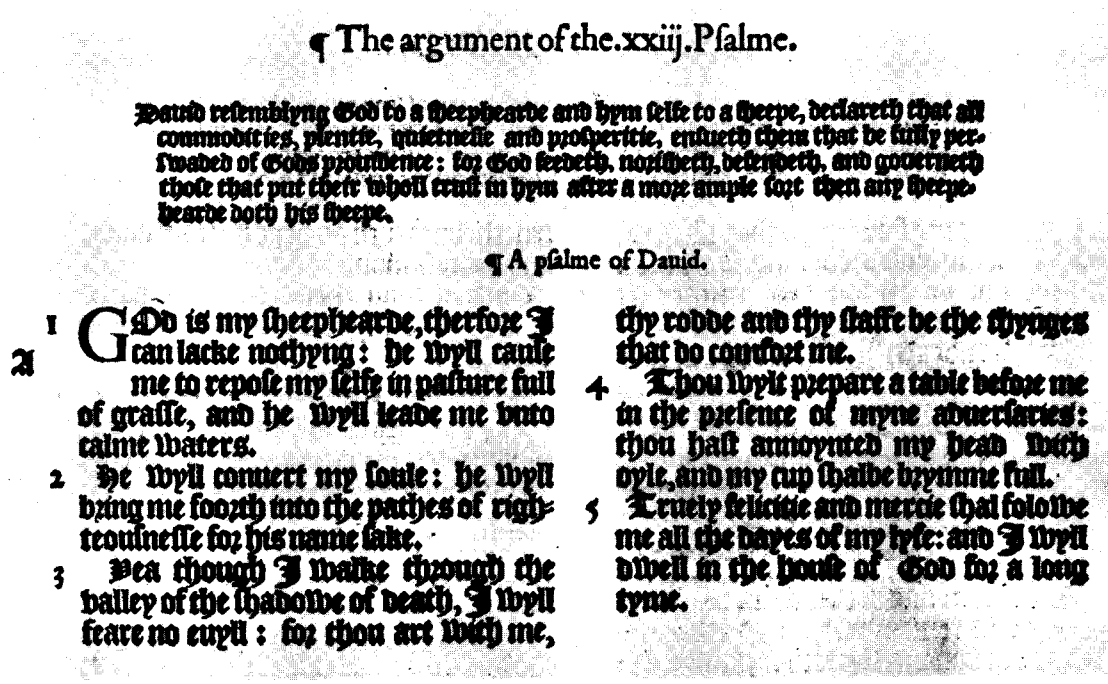
This 1557 translation was only the first part of a larger project which reached its culmination with the total Bible of 1560, normally called the Geneva Bible from its place of origin and also, perhaps, its theological slant. This version contains a dedicatory epistle to Elizabeth and a general address explaining the need for this revision. In particular it notes that the parts of the OT not done by Tyndale had never been directly translated from the Hebrew (and Aramaic). It also stresses that the presence of so many scholars in Geneva provided greater resources than could have been tapped in England. The books of the Apocrypha are included, although with warnings not to accord them the same authority as canonical writings. The polemical notes, which champion Calvinism and condemn Romanism, caused offence in some quarters, but for others they gave the Bible its strength; in fact, they are no stronger than was customary in annotated Bibles of the period.

During the reign of Elizabeth publication of the Geneva Bible went on unhindered. The work attained considerable popularity with the rise of various forms of Elizabethan Puritanism. A folio edition came out in 1561 and several editions followed, some printed in Geneva and others in England. In 1576 L. Tomson issued a revision of the NT which was often used in subsequent editions of the whole Bible. The Scottish edition of 1579 was the first Bible ever printed in Scotland, and even in later competition with the AV the Geneva Bible held its own for many years in Scotland. In England, too, editions of the Geneva Bible continued up to 1644.

B. Bishops' Bible. Even those who disliked Puritanism had to accept the superiority of the Geneva Bible over the Great Bible. In response, therefore, Archbishop Parker in 1561 advocated and promoted a revision of the Great Bible by the bishops with himself as chief editor. The revision was to be based primarily on Latin versions of the OT, which were themselves based directly on the Hebrew. Notes were not to be included, and some regard was to be had to matters of taste and style. Parker made no attempt to obstruct the Geneva Bible, which the revisers appear in fact to have used, but he did not want it as the version commended for public reading at worship. His colleagues completed the revision by 1568, and in 1571 convocation accepted it for public use. The second edition of 1569 included small changes, and the third edition of 1572 had a more thorough revision of the NT. To prevent confusion arising from the continued use of the Coverdale version of the Psalms for worship, some later editions either printed this version of the Psalms in parallel columns with that of the Bishops' Bible, or substituted it for that of the Bishops' Bible. The Bishops' Bible sold well but fell far short of the impressive figures achieved by the Geneva Bible in the period leading up to the accession of James and the proposal for a common version.

C. Rheims-Douay Version. As Mary's reign produced its exiles, so did Elizabeth's, and these Roman Catholic exiles produced their own translation of the Bible. This version emanated from the English College founded by William Allen and located first at Douay (1568), then at Rheims (1578), then back at Douay (1593). The work of translation was done mainly by Gregory Martin, formerly an Oxford scholar, who published the NT first at Rheims

The Bishops' Bible (London, 1st ed. 1568), a summary and the text of Ps. 23. Compare "for a long tyme" in v. 5b to the AV rendering (v. 6b), "for euer" (see picture of AV Psalms page in V below) (British Library)



¶ The argument of the.xxiij.Pſalme.

The Bishops' Bible (London, 1568), Mt. 6, including the Lord's Prayer. Archbishop Parker promoted this revision of the Great Bible (New York Public Library)

(1582) and then the OT at Douay (1609-1610). Allen and another colleague, Richard Bristowe, acted as consultants and revisers.

Four points call for notice regarding the Rheims-Douay version. First, the preface explains that the translators did not share the erroneous view that Bibles in the vernacular are always necessary or profitable. They undertook the work only because, according to "the present time, state, and condition of our country, . . . divers things are either necessary, or profitable, or medicinable now, that otherwise in the peace of the church were neither much requisite, nor perchance wholly tolerable." The work found its motive and justification in the need to counteract the mischievous translations of Protestants which had corrupted Scripture by "adding, detracting, altering etc."

Second, the translators took the Latin Vulgate as their original text. In this respect they remained loyal to the authoritative position of the Vulgate endorsed by the Council of Trent in 1546. At the same time they clearly did not ignore the Greek texts or even the Hebrew, as B. F. Westcott has convincingly shown (*History of the English Bible* [1868], p. 254). Thus they dealt well with the definite article, which Latin does not have. But by placing the apocryphal books in their Latin order, rather than grouping them separately in an appendix as the Reformation versions did, they confirmed their canonical status.

Third, the translators adopted the ecclesiastical and latinate style, which Gardiner had favored earlier, in place of the more idiomatic renderings championed by Tyndale and his successors. At difficult points they "presume not to modify the speeches or phrases but religiously keep them word for word." Some renderings come out oddly because of the general failure of the English language to follow this pattern. A commonly adduced example is Eph. 6:12: "Against the spirituals of wickedness in the celestials." In the Lord's Prayer supersubstantial bread is prayed for instead of daily bread, and the Good Samaritan is ready to pay back whatever the innkeeper will supererogate. "Do penance" is demanded by John the Baptist, while Paul and Barnabas ordain priests and in Gethsemane Jesus prays that the chalice will pass from him. At the same time, when no doctrine is at stake the Rheims-Douay Bible can be no less simple and direct than Tyndale. It has been observed that the AV took over a few of the terms of Latin origin (Westcott, p. 253) and by its greater influence brought them into regular English use.

Fourth, the translators provided extensive notes, partly to clear up problems but primarily to ensure that readers would understand what they read in accordance with the new orthodoxy of Trent. For this purpose positive interpretations accompany refutations of Reformation teaching. Allen bore chief responsibility for this part of the work as Martin did for the actual translation.

V. Authorized or King James Version.–When Elizabeth died in 1603, James VI of Scotland became also James I of England. Pressured immediately by the Puritans, he summoned a conference at Hampton Court early in 1604. The conference made only minor changes in the Puritan interest and it might indeed have been largely forgotten had it not reached an epoch-making decision when, with the enthusiastic support of the king, it accepted the proposal of Puritan leader John Reynolds: "That a translation be made of the whole Bible, as consonant as can be to the original Hebrew and Greek." For out of this decision came seven years later the so-called Authorized or King James Version (AV or KJV).

Arrangements were quickly set in hand to implement the decision. Responsibility for the OT devolved on three panels, for the NT on two, and for the Apocrypha on one. Fifty-four of the finest scholars of the day, both Anglican and Puritan, were chosen to serve on the panels, which met at Westminster, Oxford, and Cambridge. Each scholar on a panel made his own version of a passage and all the renderings were then discussed until agreement was reached. When a panel finished a whole book, it sent it to the other panels for approval or criticism. The drafts finally came under the scrutiny of a group of twelve composed of two representatives from each of the panels.

As the preface explains, the translators were not expected to begin with a clean slate. The aim was revision, not a fresh translation: "not to make a bad version good, but to make a good one better, or out of many good ones one principal good one." The Bishops' Bible provided the starting-point, but the revisers could also use Tyndale, Coverdale, Matthew's Bible, the Great Bible, and, of course, the Geneva Bible; in addition, they seem to have consulted at least the NT of Rheims-Douay. All these versions were checked against the tongues in which "God was pleased to speak to his Church by his Prophets and Apostles." In spite of the time involved, the companies also turned for help to other versions and commentaries in both ancient and modern tongues. The preface modestly admits that the precise meaning of many words has not been attained. It therefore makes a plea for an ongoing work of revision, perfection being beyond achievement in all human enterprises.

Certain rules governed the translation. First, change was not to be made merely for the sake of change. Second, biblical names were to correspond to popular usage and not to try to follow the Hebrew or Greek so closely as the Geneva and Bishops' Bibles had done. There are some unfortunate exceptions to this rule, Jesus for Joshua in the NT being a particularly bad example. Third, ecclesiastical terms such as "church" and "baptism" were to be retained, although "do penance" was not accepted as an accurate alternative for "repent." The AV tried to steer a middle course between Geneva, with its "congregation" and "washing," and Rheims-Douay, whose latinate expressions brought the AV's condemnation of "the obscurity of the Papists." Fourth, synonyms

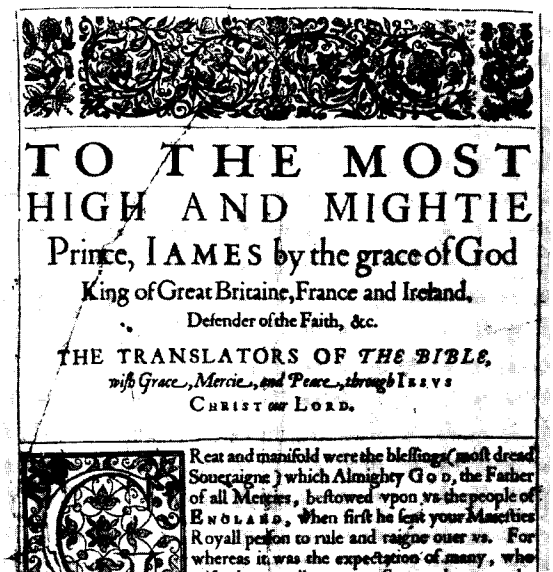
might freely be used, as by Tyndale, where the Hebrew or Greek word was the same. The preface offers a predominantly literary defense of this procedure: one should avoid discrimination between English words and not fall victim to pedantry ("niceness of words was always counted the next step to pedants"). It scoffs at the notion that "the kingdom of God is become words or syllables," yet in its application of this rule the AV tends at times to carry freedom to inordinate and unnecessary lengths. Fifth, notes were not to be included apart from alternative renderings in the margins. Most of the offense given by the Geneva Bible was due to the notes, which James found "very partial, untrue, seditious." An attempt to reach agreement on a new set of notes might well have wrecked the whole project; hence, the decision to drop them was wise. Sixth, the practice of indicating supplementary words by different type was to be continued. Seventh, chapter and verse divisions were to be employed, and chapter headings were to be provided. The latter might have aroused controversy; but the translators did the work well, offering factual headings for the most part, or agreed interpretations where some passages—especially in the Psalms and Prophets—were understood christologically.

When the first edition came out in 1611 it carried in its title the phrase "appointed to be read in Churches." This, along with official sponsorship and the known backing of the king, probably helped to give the new Bible in England the common name of Authorized Version, although in fact neither the king, parliament, nor convocation ever granted formal authorization. In America the title King James Version obviously derives from the important contribution that the sovereign made to the venture, which is acknowledged in excessively flattering terms in the dedicatory epistle.

Although many readers were attached to existing versions, especially the Geneva Bible, the AV met with a good reception. The only severe critic was Hugh Broughton, a distinguished scholar who, no doubt to his chagrin, had not been given a place on the panels, and who found the new version so distasteful that he called for it to be burned. In spite of his and other less fierce objections, three folio editions of the AV came out in 1611, including the so-called He and She versions named after the alternative renderings "he went" and "she went" in Ruth 3:15. Octavo editions followed in 1612 and many others in the succeeding decades and centuries, some with misprints which earned them such special titles as the Wicked Bible (1631; it left out "not" in the seventh commandment), the Vinegar Bible (1717; "vinegar" for "vineyard" in Lk. 20), and the Murderers' Bible (1795; "killed" for "filled" in Mk. 7:27). Across the years, publishers independently modified the spelling to reduce archaisms. In some Scottish editions the metrical version of the Psalter came to be added as an appendix for use in worship, just as the Bishops' Bible had included the Coverdale version, although the step was not taken of putting the metrical rendering in the main body of the text.

The AV undoubtedly merited the position it fairly quickly

Dedication to King James VI and I, who supported the translation of what came to be called the Authorized (King James) Version of the Bible (London, 1611) (New York Public Library)



TO THE MOST
HIGH AND MIGHTIE
Prince, IAMES by the grace of God
King of Great Britaine, France and Ireland,
Defender of the Faith, &c.
THE TRANSLATORS OF *THE BIBLE*,
with Grace, Mercie, and Peace, through IESVS
CHRIST *our* LORD.

Great and manifold were the blessings (most dread Soueraigne) which Almighty GOD, the Father of all Mercies, bestowed vpon vs the people of ENGLAND, when first he sent your Maiesties Royall person to rule and raigne ouer vs. For whereas it was the expectation of many, who wished not well vnto our SION, that vpon the setting of that bright *Occidentall Starre*, Queene ELIZABETH of most happy memory, some thicke and palpable cloudes of darkenesse would so haue ouershadowed this Land, that men should haue bene in doubt which way they were to walke, and that it should hardly be knowen, who was to direct the vnsetled State: the appearance of your MAIESTIE, as of the *Sunne* in his strength, instantly dispelled those supposed and surmised mists, and gaue vnto all that were well affected, exceeding cause of comfort; especially when we beheld the gouernment established in your HIGHNESSE, and your hopefull Seed, by an vndoubted Title, and this also accompanied with Peace and tranquillitie, at home and abroad.

But amongst all our ioyes, there was no one that more filled our hearts, then the blessed continuance of the Preaching of GODS sacred word amongst vs, which is that inestimable treasure, which excelleth all the riches

Authorized (King James) Version of the Bible (London, 1611), Mt. 6:9-15, including the Lord's Prayer (New York Public Library)

came to occupy in the English-speaking Christian world. While not, unfortunately, based on the best texts, it achieved considerable accuracy as a result of the many years of work and experience that had preceded it. At the same time it achieved a literary quality which tends to be the despair of all who try to improve it or even to break away from it. Many factors contribute to this literary excellence: freshness, vigor, simplicity, and rhythms which make it particularly impressive in public reading. One might wonder how a group of committees could ever produce a masterpiece of this order. Analyses have shown, however, that as much as 60 percent of the AV comes from previous versions and that always the underlying genius is that of Tyndale and Coverdale, who not only provided a model for all who followed, but whose hands may still be traced clearly in this consummation of the Reformation effort.

VI. Seventeenth- and Eighteenth-Century Contributions.– The early users of the AV did not regard it as a final word in the way that many of its more recent admirers have come to do. For a time some continued to buy previous versions. Others worked steadily at improving the AV itself; e.g., over 300 corrections were made already in the 1613 edition. Others again attempted new translations either because better manuscripts were becoming available or because changes in vocabulary and style demanded more up-to-date renderings. H. Ainsworth, e.g., had published a new translation of the Pentateuch and Canticles by 1616 and 1623, and later his version of the Psalms came out posthumously.

The Puritan period raised a demand for more official action. The Long Parliament went so far as to appoint a commission, but nothing came of it. For the most part later Puritans took the path of paraphrase. Thus a paraphrase of the NT came out in 1652, a paraphrase of Paul's Epistles in 1675, and Richard Baxter's *NT with Paraphrase and Notes* in 1685. Presentation of the fifth-century Alexandrine Codex to Charles I had made possible at this time an extensive textual scrutiny, but for the time being no advantage was taken of the new opportunity this offered.

The pace quickened in the 18th century. Paraphrase still dominated the scene in the first decades. Whitby, Guyse, Clarke, Pyle, and Barlee all made contributions between 1703 and 1735. The normal method was not to do an independent paraphrase but to use the AV text (usually the NT or some part of it) with supplementary or explanatory material in brackets. In the strict sense, then, these works were not new versions as some modern paraphrases are.

E. Wells, however, took a slightly different course with his revision of the AV NT in *The Common Translation Corrected, with a Paraphrase and Notes* (1718). He was followed by D. Mace, who, using new manuscripts, published a Greek edition of the NT along with the AV corrected both critically, to make it conform to the better readings, and linguistically, to keep it idiomatic as the language was changing. Other translations of this period were the *Paraphrase and Version of the NT* by P. Doddridge, *Translation of the Gospels* by G. Campbell, and *Translation of All the Apostolical Epistles* by J. Macknight; these three translations were later put together in a new version of the entire NT published in 1818. W. Whiston, the translator of Josephus, made a further attempt to use better manuscripts in his *Primitive NT* of 1745. R. Wynne had the same interest (1764) and a little later W. Newcome worked along similar lines, using Griesbach's Greek NT.

Others showed a greater concern to keep the language up-to-date. J. Worsley's rendering of the NT in the "Present Idiom of the English Tongue" came out posthumously in 1770. But E. Harwood's *Liberal Translation of the NT* (1768) is the most striking example, with its strange transposition of biblical prose and poetry into the "elegant" speech of the later 18th century. In the same year J. Wesley put his varied talents to work in providing a revised AV for "plain unlettered men." Wesley's many alterations include few of any significance, but his division of the text into paragraphs calls for notice. Even more boldly in the same period, N. Scarlett expressed the dawning sense of the literary character of the Bible by putting some of its material in dramatic form. The Friends contributed a version by A. Purver, which came out after many years of work, in 1764.

The Roman Catholics, however, made perhaps the most significant advance of the century with an important revision of Rheims-Douay by Bishop R. Challoner. Challoner had apparently supervised the 1738 edition of the Rheims NT but realized that the version had become badly dated by that time. With the help of F. Blyth he thus undertook an extensive revision of the NT in five editions from 1749 to 1772 and of the OT in two editions in 1750 and 1763. While maintaining the ecclesiastical terminology of Rheims-Douay, Challoner discarded many latinate terms and allowed the influence of the AV in phrasing and rhythm. He also cut down significantly the excessive annotations of the timid translators of Douay-Rheims. Subsequent editions did not consistently follow Challoner but all borrowed from him to some extent. American Roman Catholics received permission to use the Douay-Rheims-Challoner Bible in 1810.

During the 18th cent. many developments took place which contributed strongly to the sense of a need for official revision of the AV. Textual study proliferated. A beginning was made in the literary and historical investigation of the Bible as we have come to know it today. More and more people were trying their hand either at more accurate or more modern translations. Changes in written and spoken English became increasingly obvious. At the same time interest in the Bible surged with the movements, both evangelistic and theological, which gave birth to the Bible societies for publication and distribution of Scripture at home and translation abroad. By the turn of the century the time was surely approach-

ing when the AV would have to yield to a new version more up-to-date in both scholarship and expression.

VII. Revised and American Standard Versions.–The first half of the 19th cent. brought increasing pressure for a revision of the AV, but this had to face strong opposition. H. J. Todd published a *Vindication of the AV* in 1819, and the anonymous pamphlet *Remarks upon the Critical Principles . . .* (1820) has been called "the most masterly manifesto against change." Typical of the divided mind of the period is R. C. Trench, who in his *On the AV* acknowledged that change was inevitable but was less sure that the time for it had come.

E. H. Plumptre later took a line not dissimilar in spirit to that of Trench. Writing in the revised edition of W. Smith's *Bible Dictionary* (1870), he agreed that change must come but argued that "as little change as possible should be made in the language of the AV" and deplored the "emasculated elegance" of eighteenth-century attempts. "Some words," he confessed, "absolutely need change," because they had become obsolete or had shifted in sense. He also favored the elimination of chapter and page headings on the ground that they were interpretative.

J. B. Lightfoot in his *On a Fresh Revision* (1871) disputed the idea that the time had not yet come, at least so far as Greek scholarship was concerned. He believed that this scholarship "had never stood higher." There was not only "a sufficient body of scholars" to do the work but also of others able to submit their work to "minute and searching criticism." Indeed he feared that the present opportunity might not recur: "Greek scholarship has reached its height in England and henceforth it may be expected to decline" (p. 188).

Already in 1870 the discussion had come to a head with a motion in Canterbury Convocation to set up a committee to confer with York and report on the "desirableness of a revision of the AV." The report, quickly submitted in May of 1870, consisted of five resolutions supporting revision by emendations and marginal notes so long as all necessary changes followed "the style of the language employed in the existing version." A radically new translation was not contemplated.

The next step was an enunciation of eight principles. Some of these were procedural but others were of basic importance. The AV was to be altered as little as possible. In alterations the language of the AV and earlier versions was to be used as far as possible. When the text adopted differed from the AV, this was to be noted in the margin. Chapter headings were to be revised. Learned men "at home and abroad" might be consulted by scholars entrusted with the task of revision.

Two committees of eighteen members each were next formed, the one to revise the OT and the other the NT. Among the outstanding members of the OT panel were R. Payne Smith, T. K. Cheyne, A. B. Davidson, S. R. Driver, P. Fairbairn, J. J. S. Perowne, E. H. Plumptre, and W. Robertson Smith. The NT panel included C. J. Elliott, R. C. Trench, H. Alford, J. Angus, J. B. Lightfoot, E. Milligan, W. F. Moulton, and B. F. Westcott. The committees met for over eight years, usually at ten-day sessions four times a year.

The Revised Version of the NT was published in London and New York in May of 1881 and caused tremendous excitement. By the end of the first year a circulation of one million had been achieved. Readers found that chapter and page headings had been eliminated and that alterations had been made under five principal heads: (1) those required by the different text adopted (for the most part that of Westcott and Hort); (2) those adopted where the AV seemed to be incorrect or followed a less probable rendering; (3) clarifications of obscure or ambiguous translations; (4) changes for the sake of inner self-consistency; and (5) changes by consequence of other necessary alterations. It might be noted that the RV also followed "the rule of translating, as far as possible, the same Greek word by the same English word." Thus, in Mk. 1 the RV always has "straightway" for the same Greek term, whereas AV has "straightway" four times, "immediately" four times, and "forthwith" twice. Incidentally, the whole text of the NT is carefully broken up into paragraphs which are not necessarily controlled by the older chapter divisions.

When the OT followed, it adhered to the same principles but in the main the changes were not so noticeable. The constant use of "Jehovah" for "Lord" caused some adverse comment but many phrases were made more intelligible, e.g., "meal offering" for "meat offering." Sheol was translated "grave" or "pit" in the historical books but merely transliterated in the poetical works. In accordance with changed English usage the neuter possessive pronoun was altered from his to its, which was just coming into use in 1611 and which adds clarity at many points.

One NT change gave rise to a deep and prolonged controversy. In the opening clause of 2 Tim. 3:16 the RV supplied the verb "is" (missing in the typical Greek syntax here) at a point different from that in the AV, rendering "Every scripture inspired of God is also profitable . . .," instead of AV "All scripture is given by inspiration of God and is profitable. . . ." This seemed to many to leave open the possibility of Scripture that is not inspired of God, and, since the question of inspiration was sensitive at the time, theological criticism was quickly voiced. Indeed, even though the RV retained the AV in a marginal reading, many were prepared to denounce the RV and to oppose its use on this ground alone, regardless of any merits it might have in other respects.

The marginal notes in the RV were very important and much labor went into them. The notes fall into four groups: (1) those signifying different readings; (2) those indicating correct meanings which English idiom cannot reproduce literally; (3) those offering an explanation demanded by the original; (4) those giving alternatives at debatable points. Marginal biblical references were prepared separately and for these permission was secured to use the references in F. H. A. Scrivener's Paragraph Bible of 1873. Under the leadership of W. F. Moulton so vast a body of material was collected that a revision and selection had to be made when a reference edition finally came out in 1898. Eventually in 1910 a special edition was published which incorporated all the materials that Moulton had gathered with the assiduous help of J. H. Moulton and A. W. Greenup. The thoroughness of the treatment may be seen from the references given under Mk. 10:19, offering no less than ten OT quotations and thirty-two verses for comparison.

At the very outset the British revisers had invited American scholars to join in their enterprise, and by 1872 two American committees were at work, one on the OT and the other on the NT. Each committee consisted of fifteen scholars, representing nine denominations in one case and eight in the other. P. Schaff was the presiding genius of the total effort, and the NT committee included such illustrious figures as E. Abbott and T. Dwight.

Soon it became evident that, because of important differences of approach, a joint revision would not be possible. Cooperation continued until 1881, and the RV of that date listed preferred American renderings in an appendix. The American committees then set their own course, although agreeing not to publish for fourteen years.

ENGLISH VERSIONS

They put out their NT in 1897, which was followed in 1901 by the whole Bible under the title *Standard Version*. Over the years the American version has enjoyed greater success than its British counterpart, and in many circles it has been regarded as a superior production. It benefited, of course, from the critical and constructive reactions to its predecessor.

Comparison of the ASV with the ERV is interesting. Indeed, the ASV itself appended a lengthy list of particulars in which the two differed. A few illustrations of the differences may be given. Page headings are included in the ASV. The spelling of geographical names is more consistent. To some extent the ASV agrees with the ERV in using the same English word for the same Greek word, e.g., "straightway" in Mk. 1. In relation to the AV, "demons" is substituted for "devils" and the error in Lk. 23:15 is properly corrected. In Acts 17:22, where the AV has "too superstitious," the ERV offers "somewhat superstitious," but the ASV strikes out on its own with "very religious." This is more felicitous, although the delicate shade of meaning in the comparative is obscured.

An unfortunate misunderstanding temporarily soured relations between the two groups. In 1898 a new edition of the ERV was published which put the American preferences in the text and the British alternatives in an appendix. The change was perfectly legal but it seems the American revisers had not been told of it in advance, and they were annoyed when people received the impression, due in part to retail advertising, that this was in fact their edition. Under pressure the misleading title of *American Revised Version* was withdrawn, and once the full ASV came out the misunderstanding was quickly cleared up. From this time on the two revisions could stand on their own feet and secure their own followings without fear of confusion.

VIII. Other Nineteenth-Century Translations.–During the 19th cent. attention naturally focused on the more official cooperative ventures. It should not be imagined, however, that individuals did not also try their hand at fresh translation, especially when reproducing the text in commentaries. A brief survey of some of the more important independent revisions will thus be given.

The early decades of the century brought the Unitarians on the translation scene. T. Belsham published Paul's Epistles in English in 1822 and C. Eyre covered the same ground in 1832. S. Sharpe worked over the whole of the NT in a revision of the AV based on Griesbach's text, and his edition came out in 1840. He then did similar work in the OT, publishing the results in 1865 with the title *Hebrew Scriptures Translated.*

In the middle of the century, when the campaign for revision was gathering force, many commentators, e.g., R. C. Moberly and H. Alford, offered their own renderings of the works on which they wrote, which included John's Gospel, Romans, and 1 and 2 Corinthians. In addition, W. J. Conybeare made a new translation of all Paul's Epistles in his *Life of St. Paul,* which he wrote in collaboration with J. S. Howson (1851). In 1864 this translation was published independently with elaborate footnotes.

During the decade before work on the RV and ASV began, R. Young, who is best known for his invaluable *Analytical Concordance to the Bible* (1873) attempted singlehandedly a new version of Scripture. This was the *Literal Translation* (1862), in which a word-for-word rendering of the Hebrew and Greek texts was given. Young's odd handling of the Hebrew tenses prevented the work from securing wide approval, but it was not without merit and it helped to stimulate demand for an official revision.

Two other translators from this period call for notice. First is H. Alford, who not only offered new renderings in his commentaries but also published a scholarly revision of the NT in 1869. Alford regarded this purely as an interim report. He did not believe that one man could "fulfil the requisites for an accepted Version," but he hoped to stir the Church at large to action. In this hope, as has been seen, he was not disappointed.

Second was the founder of the Plymouth Brethren, J. N. Darby. In a remarkable tour de force Darby had first put the Bible into both German and French. He then turned to English and finished the NT and much of the OT. After his death in 1882 the OT was completed from his German and French versions. Darby, who was no mean scholar, supplied excellent critical notes, but was less successful in turning the originals into good and effective English. The second and revised edition of the NT came out in 1871 and the OT in 1890.

Other translators of the NT who deserve brief notice fall mostly into two groups. First are those who tried to achieve greater accuracy on the basis of the textual work of J. J. Griesbach, C. Tischendorff, and S. P. Tregelles. Among them are G. W. Braineld (1863), R. Ainslie (1869), and J. Davidson (1875). Then there are those whose aim was to put the NT into the speech of their time. A. Norton did this for the Gospels in his 1855 edition and L. A. Sawyer for the whole of the NT in his translation of 1858.

A work which found more extensive use, and even achieved a reprint in the second half of the 20th cent. (1959), was the so-called *Emphasized Bible* of J. Rotherham. The NT came out in 1872, and the OT was issued in successive volumes from 1897 to 1902, the whole then being gathered into a single volume. The first two editions of the Greek text were based on Tregelles, the third on Westcott and Hort. Like Young, Rotherham attempted a strictly literal translation. The new factor which gained his work attention, however, is the stress on pronunciation and emphasis. Speeches and poetic parallelisms are set out with indentations. OT refrains are distinguished by the use of italics. Rotherham also added an important expository introduction, and throughout the work he provided elaborate section heads, footnotes, references, and appendices.

The RV itself gave rise to two interesting experiments in the early years of the 20th century. The first was the *Interlinear Bible* (1907), which offers a ready comparison between the AV and the RV. As the preface explains, the large type in this edition represents agreement of the two versions. Where they differ, the renderings are printed in small type, the one above the other, the RV in the upper line and the AV in the lower. The RV notes are at the foot of the page with the AV notes below them.

The second experiment was *The Modern Readers' Bible . . . Printed in Modern Literary Form* (1914). Edited by R. G. Moulton, this won considerable acclaim and achieved wide use in colleges and universities. It presented the RV in such a way as to bring out the literary genres, e.g., poetry and drama. Introductions were provided for the various books, which included the Apocrypha, and extensive notes contributed to the value of the work. In fact, the edition was planned as a series of twenty-one volumes which began to appear already in 1895. When these were put together, they made up a single volume of over 1700 pages, of which 150 were devoted to introductions and 200 to notes. So long as the RV remained in common use, this work proved to be of real worth in many circles.

Two special editions of the RV itself call for brief notice. The *Parallel NT,* in quarto size, came out in 1882. This contained the AV of 1611 (with a few minor changes in spelling, capitalization, etc.) with its marginal notes in the

ENGLISH VERSIONS

left-hand column, and the RV of 1881 with its marginal notes in the right-hand column. Three years later, in 1885, a quarto edition of the whole of the RV was published in five volumes — four for the OT and one for the NT. This special edition featured large type and wide margins but the text itself differed in no way from that of the ordinary edition.

IX. Twentieth-Century Translations.–Apart from publications that made use of the RV, some new ventures in translations also appeared in the early years of the 20th century. The first of these, catching the moment, grandiosely styled itself the *Twentieth Century NT.* Its first section had in fact come out in 1898, but the complete text was published in 1901 and a second edition in 1904. Although the translators remained anonymous, the work had many useful characteristics and E. H. Robertson could even call it "one of the most careful translations ever undertaken" (*New Translations of the Bible* [1959], p. 53). Each book was given a detailed table of contents and a short introduction. Longer quotations from the OT were put in modern form and shorter ones in quotation marks, while allusions were indicated by references at the foot of the page. Once all the contributors had died, their names were finally disclosed in 1955; none of them had any established reputation as a scholar (*BJRL*, 38 [1955]).

To a similar category belongs the *Holy Bible in Modern English* by F. Fenton, for Fenton was a businessman who had received no special training in Greek or Hebrew. He brought out the first part, Romans, in 1882, the Epistles in 1884, the full NT in 1895, and the whole Bible in 1903. In spite of an unfortunate solecism at the very start in Gen. 1:1 ("By periods God created. . . ."), Fenton offered a creditable rendering, fully furnished with introductions and notes. He followed the order of the Hebrew Bible in the OT but an odd order of his own in the NT. The poetry of the OT he set out as such, and in some places he achieved excellent rhythms in English. Some of Paul's arguments were put in dialogue form, e.g., a discussion between Paul and "the Jew" in Rom. 3:1-18. The version enjoyed some success, being reprinted as late as 1944. It shows that a translation can make a useful contribution even though it be the work of a person with no formal training.

Far different is the case with the next important translation, the work of the distinguished classicist A. S. Way, who had already translated and edited a number of Greek and Roman classics. In a first edition Way confined himself to the *Letters of St. Paul to Seven Churches and Three Friends.* A second edition in 1906 added Hebrews and involved revision to the extent of five hundred changes. A 5th edition was called for within twenty years. A mark of this version is that some texts are printed as hymns; reasons for this are given by the author. The text is clear, vivid, illuminating, and at times exquisitely beautiful.

Precisely while Way was at work, the first of a great triad of NT translations was in preparation: that of R. F. Weymouth. Weymouth was also a gifted classical scholar. For many years he devoted his spare time to textual study which led to his *Resultant Greek Text.* This came out in the year of his retirement from teaching (1886), and he dedicated his remaining years to philological study and the attempt at a new rendering of the NT. As he stated in his preface to the *NT in Modern Speech,* this was based upon more than sixty years' study of both the Greek and the English languages. Weymouth's final illness prevented him from seeing the work through press, but it appeared in the year of his death (1903) and underwent a later revision by J. H. Robertson.

Weymouth broke relatively new ground by trying to use modern idiom instead of the hallowed language of the past. He achieved a high degree of success, as A. T. Robertson acknowledged when he called the work "a modern translation of a high order in dignified vernacular that is reasonably faithful to the Greek text" (*Sunday School Times* [1924], p. 424). Yet Weymouth himself modestly saw that he was merely a pioneer in this field. He believed—prophetically — that "some day the attempt will be renewed to produce a satisfactory English Bible . . . even altogether to supersede both the AV and the RV." It might be added that his version included hundreds of footnotes, although some of these are highly interpretative in nature.

The second of the three epoch-making versions followed ten years later when J. Moffatt produced his *New Translation of the NT* (1913), a work which took the English-speaking world by storm. Influenced by A. B. Bruce at Glasgow, Moffatt had already in 1901 published his *Historical NT,* which included a translation of his own. As a parish minister in Scotland, he continued his studies and brought out his *Intro. to the Literature of the NT* in 1911. This led him to an academic career at Oxford, Glasgow, and New York.

Moffatt's *New Translation* achieved swifter popularity than any previous individual rendering. Within a quarter of a century it went through seventy printings, and it came into extensive use in Bible classes, personal devotions, and the pulpit. Moffatt constantly revised the text up to the final revision of 1935. Some of his translations brought severe criticism, e.g., Mt. 1:16: "Joseph (to whom the virgin Mary was betrothed), the father of Jesus . . .," or 1 Pet. 3:19: "Enoch also went and preached to the imprisoned spirits." But at other points he achieved such a happy blend of clarity and beauty that the appeal of his work is readily understood. Emboldened by his success in the NT, Moffatt turned next to the OT. After many years of labor he published this work in 1924 and the combined Moffatt Bible in 1926. The OT translation, however, hardly enjoyed the same success as its NT predecessor, although it is not without its valuable features.

The third notable translation of the early 20th cent. was *The NT: An American Translation,* by E. J. Goodspeed (1923). Like Moffatt, Goodspeed caused considerable controversy (surveyed in his *As I Remember* [1953]), but he also met with instant success. Not only did the version sell over a million copies in twenty-five years, but it was also printed in full in several newspapers in the autumn of 1923. Like Moffatt, Goodspeed moved on to the OT, but put this in the hands of J. M. P. Smith (1935). He then took up the Apocrypha as well (1939), so that he could finally call his work "the first complete English Bible ever translated throughout from the 'original tongues.'" An unusual feature in the Amer. Tr. is the complete elimination of footnotes. In defence of this he argued that Moffatt's textual notes "are generally of little use to the reader." But his most telling argument was not in terms of utility, but simply, "there were none in the original NT."

The only woman singly responsible for an extended translation of the Bible into English was H. B. Montgomery, an excellent Greek scholar and cautious translator. Her *Centenary Translation of the NT* (1924) was published by the American Baptist Publication Society of Philadelphia to mark its 100th anniversary. Each book was furnished with a short introduction, and popular titles were provided for each chapter. Thus Philippians has the four headings: (1) A Great Voice out of Prison; (2) Weaving the Fair Pattern of the Gospel; (3) Real Religion and Formalism; (4) Paul's Recipe for a Life of Victory. Subtitles were also supplied for sections within the chapters. The work had some appeal but could not compete with its Weymouth and Moffatt rivals in either excellence or popularity.

ENGLISH VERSIONS

Another version of the NT, which began to appear in 1921 and was completed in nine parts in 1926, bears an extraordinarily lengthy title but is usually referred to by the first three words: *The Concordant Version*. The editor was A. E. Knoch, a self-taught student of Greek, who with assistants had spent many years preparing a concordance of the Greek language. His bulky translation consists of the Greek text in uncials, a sublinear translation in English, and on the opposite page an idiomatic rendering, all accompanied by an enormous mass of notes and adding up to some eight hundred pages. An unusual feature of the work is that Knoch rejects all existing Greek texts and offers "a totally new text" of his own. The work also shows some peculiarities in translation. Thus he displays an anti-trinitarian bias by always using the lower case for Spirit. "Eternal" in Rom. 16:26 is rendered "aeonic," while Rev. 1:18 reads: "the keys of death and the unseen." Finally, "to rouse" consistently replaces "to raise" in 1 Cor. 15.

The success achieved by Moffatt was not repeated until J. B. Phillips issued his *Letters to Young Churches* in 1947. The enthusiastic response to this up-to-date rendering led Phillips to continue with the *Gospels* in 1952, the *Young Church in Action* (Acts) in 1955, then Revelation, and finally the complete NT. Phillips was an English vicar, a fine linguist, whose translation work began in London during air-raid days when the young people with whom he worked could make neither head nor tail of the Epistles which he himself found so helpful and inspiring. He solved the problem by beginning again from the Greek, and when C. S. Lewis warmly received a sample of his work he continued with all the Epistles and eventually with the whole Bible. In this task, according to his own account, he deliberately tried to blot out all existing versions and all that he had read about translating and interpreting. He could then look at the Greek documents "as something I had never seen before," receive their impact afresh, and try to convey it in modern idiom. This meant, of course, that in many places Phillips had to paraphrase instead of giving a more literal rendering, and his work is exposed to obvious criticism in consequence. Nevertheless, he was not trying to provide a translation for scholars or more highly sophisticated Christians but to unlock the living message of the Bible for those who knew little about it and who received no great help from existing versions. At this level Phillips succeeded magnificently and in so doing posed the question whether, at least for certain purposes, the literal rendering is in fact the true translation. Certainly many passages which in previous versions did not carry a very vital message were now throbbing with life, e.g., 2 Cor. 6:11-13: "Oh, our dear friends, in Corinth, we are hiding nothing from you and our hearts are absolutely open to you. Any stiffness between us must be on your part, for we assure you there is none on ours. Do reward me (I talk to you as though you were my own children) with the same complete candour."

K. W. Wuest, for many years a teacher of Greek at the Moody Bible Institute, brought out the *Expanded Version of the NT* in three volumes (1956, 1958, and 1959). This rendering includes not only the customary notes but also definitions of terms and a bibliography. The text is printed single column in paragraph form, and verse numbers are given only at the beginning of the paragraphs. All the books have brief introductions. The distinctive feature of the work, however, is that by expansion the editor tries to bring out fully the various nuances of the Greek and at the same time to express the theological truth of Scripture. A high degree of verbosity and interpretation often results, as may be seen from Jn. 1:14: "And the Word, entering a new mode of existence, became flesh, and lived in a tent (His physical body) among us. And we gazed with attentive and careful regard and spiritual perception at His glory, a glory such as that of a uniquely begotten Son from the Father, full of grace and truth."

A not dissimilar version which has enjoyed wide circulation came out in 1958, namely, the *Amplified NT*. Many scholars helped to prepare this work under the editorial supervision of F. E. Siewert and the sponsorship of the Lockman Foundation. Behind this translation lies the sound principle that single English words are not exact equivalents of the Greek words. The translators concluded that at more important points alternatives should be offered in order to convey the fuller sense to the reader. Thus in Acts 16:31 Paul and Silas reply: "Believe in *and* on the Lord Jesus *Christ* — that is, give yourself up to Him, take yourself out of your own keeping and entrust yourself into His keeping, and you will be saved. . . ." Obviously this procedure has some advantages for students with no access to Greek, but it has obvious disadvantages too. Formally it makes the use of standard concordances difficult. Materially it may confuse, or even lead astray, those with no independent power of discrimination, and it involves an interpretative element in spite of the statement in the preface that "this version is free from private interpretation." The *Amplified OT* followed in two volumes in 1962 and 1964.

The year 1950 saw the entry of Jehovah's Witnesses, or the International Bible Student's Association, on the translation scene with the *New World Translation of the Christian Greek Scriptures Rendered from the Original Languages by the New World Bible Translation Committee*. This version rests largely on the Greek text of Westcott and Hort supplemented by that of Nestle. Footnotes, aids, and maps formed part of the enterprise. In 1953 the OT followed in five volumes on the basis of the Hebrew text of the 7th edition of R. Kittel's *Biblica Hebraica*. A single volume comprising both OT and NT came out in 1960. As might be expected, some unusual renderings characterize this translation. In 237 instances of what is normally given as "Lord" in the NT, "Jehovah" appears as a replacement. Jn. 1:1 has the strange statement: "In the beginning the Word was, and the Word was with God, and the Word was a god." Jn. 3:8b speaks of "everyone that has been born from the spirit." B. M. Metzger (*Theology Today*, 10 [1953], 65-85) may be consulted for a careful analysis of this interesting version.

X. Revised Standard Version and New English Bible.—In 1928 the copyright of the ASV, which had been taken out to protect it against pirated editions, came into the hands of the International Council of Religious Education, on which were representatives of the Churches of the United States and Canada. This Council proceeded to set up a committee to look into the need for revision and, acting on its report, voted in 1937 in favor of a revision which should "embody the best results of modern scholarship as to the meaning of the Scriptures, and express the meaning in English which is designed for use in public and private worship and preserves those qualities which have given to the KJV a supreme place in English literature." Essentially, then, the principle underlying the RV and ASV remained in force: what was being attempted was yet another revision, not a new translation.

To carry out the resolution, a committee of thirteen scholars — later increased to thirty-two — was appointed in 1937. Moffatt served as executive secretary up to 1944, and Goodspeed also served on the committee. One group devoted itself to the OT and another to the NT, but each

ENGLISH VERSIONS

group submitted its work to the other and changes had to have the agreement of two-thirds of the whole. In addition, the committee kept in touch with an advisory board made up of fifty representatives of the cooperating denominations. The NT appeared first in 1946 and the OT followed in 1952. In 1951, by a vote of the National Council of the Christian Churches, publication of the Revised Standard Version secured official approval. With some changes in the NT of 1946, the whole Bible came out in 1952 and the Apocrypha followed in 1957.

The main reasons for change, as explained in the preface, are the great advances made in the previous decades in textual scholarship, and more especially in linguistic studies. With respect to the OT, the discovery of writings in Semitic languages "has greatly enlarged our knowledge of the vocabulary and grammar of biblical Hebrew and Aramaic." Regarding the NT, "we now possess many more ancient manuscripts." While this was also true, of course, for those who worked on the RV and ASV, "they lacked the resources which discoveries within the past eighty years have afforded for understanding the vocabulary, grammar, and idioms of the Greek NT." With respect to the whole Bible, the preface reaffirms the need to replace AV terms and usages that have become obsolete or archaic, and expressions that have changed their meaning since 1611 so that "they no longer say what the KJV translators meant them to say." In favor of revision as opposed to a fresh start, the preface quotes the AV preface: "We never thought . . . to make a new translation, nor yet to make of a bad one a good one . . . but to make a good one better." The committee reaffirmed these principles in 1959, when it studied various suggestions and criticisms and made a few changes, for the most part minor in nature.

Some of the new features in the RSV quickly commended themselves. The general elimination of the outdated "thou," "thee," and "thy," and of the verb-endings in *-eth* and *-th* is a case in point, although the retention of "thou," etc., in address to God can lead to problems. Some would argue for a complete elimination so as to prevent address to God being set in an archaic world of its own, whereas others who approve of the exception think it should, in some cases at least, be used in relation to Christ too, e.g., in Mt. 16:16. The abandonment of "Jehovah," in direct rebuttal to the ASV also met with little resistance, since "Jehovah" is a late medieval form and "Yahweh," while probably correct, is not specifically indicated in the Masoretic text and has never had for the Christian public the attraction it seems to have for some scholars and clergy. In the updating of language the RSV achieves for the most part a fine blend of added clarity with the original beauty of the AV. Many passages (e.g., in Job or the prophets) which have in the AV only a magnificent obscurity, are illuminated in a new and impressive way with no stylistic loss. At the same time the revisers are modest or honest enough to confess that they cannot always fix the meaning with certainty (they indicate problem passages and alternatives in the notes) and that they did not always attain unanimity in their rendering.

1 Kings 10:28 might be adduced as one example among many in which previous versions, even including the RV and the ASV, gave little information, but upon which the RSV — in this instance combining new geographical knowledge with the LXX rendering — sheds new and clarifying light. When it comes to coins in the NT, the RSV retains clarity by refusing to be too modern. Thus it stays with "denarius" in Jn. 12:5 or simply has "a coin" in Mt. 22:19 for the Roman coins which have been put into pence in the AV, shillings in the ASV, and quarters and dollars (not always too accurately) in the American versions of Phillips. Inflation quickly robs the exchange equivalents of any credible meaning, whether they be given in the text or indicated in notes or tables. An example of return from the RV and ASV to the AV, which has given much satisfaction in conservative circles, occurs in 2 Tim. 3:16, where the RSV renders: "All scripture is inspired by God and profitable. . . ."

Against the many advantages of the RSV, which have won for it wide use and approval, must be set some criticisms. The criticism that Jn. 7:53–8:11 and Mk. 16:9-20 have been removed from the body of the text, along with some smaller verses or phrases, carries little weight, since these have dubious manuscript support. More serious is the dropping of the practice of indicating in some way (traditionally italics) words that have been added, for even though such additions are often essential for grammatical, stylistic, or even material reasons, readers who cannot refer to the original for themselves ought to know when and where they are made.

With respect to individual renderings the RSV committee has not been inflexible. "Consecrate" for "sanctify" met with much opposition in the first edition, and "sanctify" has been largely restored—although oddly enough "consecrate" is kept at Jn. 17:19 when "sanctify" returns at 17:17. Earlier editions offered Moffatt's rendering of Mt. 1:16 in a footnote, but later editions, recognizing the weakness of the "ancient authorities" he cited, eliminated this. Another interesting case where the RSV committee has reversed its decision is in 1 Tim. 3:2. Here the first rendering was "married only once." Obviously this imposed on bishops a definite prohibition of second marriage. But commentators have always thought that other possibilities were open, e.g., the forbidding of polygamy or, more likely against the background of the time, of second marriage after divorce. At any rate, the less definite "husband of one wife" has been restored in more recent editions.

In other instances, however, the translators have stayed with their choices in spite of heavy criticism from some quarters. "Letters" for "epistles" can hardly be regarded as a serious problem. The use of "young woman" for "virgin" in Isa. 7:14 has provoked more prolonged and vehement objection. It is argued that this entails contradiction between the OT passage and the fulfillment of it perceived in Mt. 1:23, as though the NT author had misunderstood or possibly even distorted the Hebrew text. Some conservatives, however, allow that "young woman" more accurately reflects the Hebrew term, and there does not have to be contradiction with the more precise sense of the Greek word demanded by the messianic fulfillment. Again, at Rom. 3:25 and 1 Jn. 4:10 the familiar "propitiation" has been replaced by "expiation." Fortunately, this does not carry with it the elimination of an objective presentation of the atonement. On the other hand, it seems to many that the reason for the change is far more theological than linguistic. On the literary plane, lovers of the AV are disturbed and irritated when what seems to be a pendantic or unnecessary change ruins a familiar and perhaps even proverbial saying, e.g., in Mt. 6:28: "They neither toil nor spin"; 1 Cor. 13:13: "So faith, hope, love abide"; and He. 12:16: "Who sold his birthright for a single meal." This difficulty can hardly be avoided, of course, when what is attempted is not a fresh translation but the revision of a superb literary achievement like the AV.

On this point the British Churches proved to be more radical and innovative. They entered the field later, but when they did they voted for the bolder and freer course of a completely fresh start. The initiative came this time from

the Church of Scotland, which in 1946 adopted an overture recommending the translation of the Bible into present-day speech. As a result, delegations from the Anglican, Scottish, Methodist, Baptist, and Congregationalist Churches met in conference in 1947, accepted the idea of fresh work on the Bible, and endorsed the preference for a new translation instead of a further revision. At a second conference the same year, steps were taken to form a joint committee, which extended the representation and set up four panels to do the work, one each on the OT, NT, and Apocrypha, and one for the literary revision of the work of the other three. The noted scholar C. H. Dodd served as director of the total enterprise. After many years of work the NT came out in 1961, and the OT and Apocrypha in 1970. The publication of the NT was accompanied by a strong advertising campaign which led to the demand for at least ten printings in the first three years.

Two of the reasons advanced for the new venture were substantially the same as those given for the RSV. First, the introduction draws attention to the progress in textual criticism not only since 1611 but even since the RV of 1881. Second, the better knowledge of Hebrew and Greek, enriched especially by new Semitic documents and papyri materials found after 1881, made possible a better grasp of the meaning of the text at many points. The translators, of course, preserved a due sense of modesty in both areas. They did not claim a perfect text, being "well aware that their judgement is at best provisional"; nor did they pretend that there had been "any far-reaching change in our understanding of the Greek of the NT period," only "a better appreciation of the finer shades of idiom." Nevertheless, it was felt, not without reason, that better tools were now available to enable scholars to do a more accurate job.

On a third point the NEB disagreed sharply with the RSV. It argued that the 1881 revision was hampered by the provisos that as little as possible should be changed and that changes should be adapted to the style of the AV. No such restrictions governed the new venture. Instead, as the introduction says, the AV has become archaic at an ever more rapid pace and the demand is "consistently to use the idiom of contemporary English to convey the meaning of the Greek." Word order, syntax, and vocabulary all came under searching review, and it was laid down that fidelity to the original need not involve "such irregularities of grammar as were indeed natural enough to authors writing in the easy idiom of popular Hellenistic Greek, but less natural when turned into English."

In this respect the committee consciously adopted "a different theory and practice of translation," which tried to reproduce, not an English word for a Hebrew or Greek word, but a set of terms that would "carry over the meaning of the sentence as a whole." On this theory the RV goal of using the same English term for the same Hebrew or Greek obviously proved to be undesirable. At the same time, care was taken to distinguish the new practice from paraphrasing. Paraphrase introduces "something which is not there, to elucidate the meaning which is there." That paraphrase occurs cannot be denied. It is indeed, justified on the ground that "every intelligent translation is in a sense a paraphrase." The plea is made, however, that this version, if not literal, is a faithful one "so far as we could compass it."

Not unexpectedly, the translation ran into heavy criticism. Some of the objections have been on literary grounds. Many sentences sound rough or crude. Readers outside Britain find that certain idioms are more enigmatic than helpful. A few passages are hardly distinguished for syntactical purity. Obviously the work as a whole does not measure up to the literary stature of the AV and dependent versions. Yet one wonders whether literary excellence is essential to Scripture or whether it might just be a happy by-product when it occurs. Furthermore, some striking and illuminating phrases can be found, and in the narrative portions especially the NEB often seems to catch the vigor and freshness of the original which the more venerable AV occasionally misses — at least for modern readers.

The main problems, of course, relate to specific renderings and the changes, omissions, additions, and delimitations one finds in them. It should be noted that, like the RSV, the NEB does not indicate supplementary words; it also removes Jn. 7:53–8:11 and Mk. 16:9-20 from the body of the text, in the former case printing it in isolation from its traditional context. Looking only at the NT, one finds a challenging reading already at Mt. 1:23: "The virgin will conceive." Lk. 22:19b-20 has been dropped from the main text. Jn. 1:1 has in the third clause the infelicitous and debatable, "What God was, the Word was." In Jn. 4:20 three new words are supplied: "Jews," "temple," and "God," and in 7:21 "sabbath" is inserted. The handling of the term "righteousness" in the early chapters of Romans raises questions. In 1:17 "God's way of righting a wrong" replaces "righteousness," and in 3:6, 21f., etc., "justice" stages a return. The concept of expiation partly covers that of propitiation in Rom. 3:25, but the weaker "remedy" replaces it in 1 Jn. 2:2. In Gal. 2:5 a phrase has been added: "I was determined. . . ." What is demanded of the leader or bishop in 1 Tim. 3:2, and the deacon in v. 12, is that he be "faithful to his one wife," with two alternatives in the notes: "married to one wife"; "married only once." Two interesting points arise at the important verses Jn. 3:16 and 2 Tim. 3:16. In the former "loved the world so much" restricts the meaning of "so," which might also mean "in such a way." In the latter "every inspired scripture" continues the ambiguity of the RV; moreover, all reference to God is eliminated, which is hard to understand in the light of the underlying Greek term. Page headings have been supplied for this version, and some of these raise questions. Thus in the NT four main subdivisions are helpfully suggested: The Gospel; Acts; Letters; and Revelation. But this being so, does it not cause confusion to entitle the first part of Romans (1–8) "the Gospel according to Paul"?

Beyond individual questions, perhaps the main difficulty with the NEB is that it tries to do too many things at once without excelling at any of them. Thus it seeks to be both scholarly and popular, and yet often the idiomatic English blunts the rendering academically without quite succeeding as the language of the people. Again, the desire to give the work sufficient dignity for use in public reading tends to be at odds with the aim of reaching people who will seldom if ever be in the pew. Thus the NEB finds itself caught in the middle. It cannot compete with the RSV liturgically nor with authentically popular versions evangelistically. Yet these drawbacks must not be exaggerated. The NEB undoubtedly has a solid scholarly base. It frequently achieves commendable idiomatic clarity. It has not proved unsuitable for use in public worship. It certainly demonstrates in practice that modern translators need not be held under the tyranny of the AV any more than the Reformers were under that of the Vulgate. Moreover, it raises the critical question that lies at the center of modern debate in this area, namely, that of the relation between literalness and fidelity in the translation of the Bible into other tongues.

XI. Roman Catholic and Jewish Versions.–The idea that the Roman Catholic Church in Britain and America has

made little contribution to Bible translation apart from the Douay version has no substance. In fact many new versions came out in the first decades of the 19th cent.; those of Coyne in 1811, of Haydock in 1811-1814, of Syers in 1813, and of Gibson in 1816-1817, not to speak of renderings of the NT alone. Then the Roman Catholic Emancipation Act of 1829 released a fresh translation wave of which G. MacGregor says that "the output is so prolific and the variety of renderings so staggering that it would require immense research and several volumes to give a full bibliographical account of the astonishing story" (p. 206).

In the middle of the century N.P.S. Cardinal Wiseman published his own edition in 1847. J. C. Cardinal Newman came under pressure to try his hand but declined on the strange ground that the Douay-Challoner version met all requirements. In America F. P. Kenrick published a translation of the NT for which he used the Vulgate but compared it constantly with the original Greek. Entitled *The Four Gospels*, etc. (1849) this carried so many critical and explanatory notes that it added up to a large volume. The OT came out in 1860.

In the latter part of the 19th and the first half of the 20th cent. more versions followed. Among the more important is *Westminster Version* by the Jesuit C. Lattey and many American and British assistants. The *Confraternity Edition*, published in 1941, and used extensively by English-speaking Roman Catholics in World War II, also deserves mention. This translation received its name from its sponsorship by the Episcopal Committee of the Confraternity of Christian Doctrine. E. P. Arbez edited it, and it was approved by the Biblical Commission and scholars of the Catholic Biblical Association. Many reprintings were required.

Perhaps the most interesting and significant Roman Catholic version of the 20th cent., at least by an individual, is that of the gifted writer and scholar R. Knox. After making his name as the author of *Loose Stones* and then as Roman Catholic chaplain at Oxford, Knox in 1938 was granted official authorization to prepare a new translation of the NT from the Clementine Vulgate, i.e., the Latin Bible approved by Clement VIII in 1592. Announcement of the authorization in 1939 roused vociferous protest, but support from the hierarchy enabled Knox to press on with the task. He finished the NT in 1942, although for various reasons publication was delayed until 1949. In the meantime Knox learned Hebrew and on his own volition began the translation of the OT, which also came out in 1949. Knox found the work demanding; he devoted no less than nine months full time to the Psalms. But he also found it exciting, so much so that he regarded the translation as the one great work of his life. His reward came when the work sold far beyond expectations and became the only individual translation at this period to carry the imprimatur of the hierarchy.

Attention may be drawn to two points of interest in this rendering. The first is in the OT. Here in Ps. 119 Knox makes a valiant effort to reproduce in English the alphabetical structure of the Hebrew. Thus in the fourth section each of the eight verses of the English begins with a word whose initial letter is "d": Deep, Deign, Direct, Despair, Deliver, Deity, Disappoint, and Do. The first verse of the section (v. 25) runs: "Deep lies my soul in the dust, restore life to me as thou hast promised." Most translations make no attempt at all to preserve this ACROSTIC in English apart perhaps from indicating the Hebrew letters.

The second point of interest is in the NT. From the Reformation period to modern times Roman Catholics have argued strenuously that Gk. *metanoéō*, which in verb and noun form occurs fifty-eight times in the NT, should be rendered "do penance" ("penance"), not "repent" ("repentance"). Indeed, T. More castigated Tyndale severely for his ignorance or falsification on this and similar matters. Knox, however, allows his scholarship to override age-old prejudice and accepts "repent" and "repentance" in the vast majority of instances (forty-nine out of fifty-eight). Even where this is not used he has such varied alternatives as "relent" in Mt. 21:29, 32, "full of remorse" in Mt. 27:3, "be sorry" in Lk. 17:3f., "feel sorry" in 2 Cor. 7:8, "change of heart" in 2 Cor. 7:10 and He. 6:1, and "second chance" ("no second chance was given him") in He. 12:17. "Do penance" remains only twice, in Mt. 12:41 and Lk. 11:32. Here, then, the Roman Catholic Knox provides Tyndale with tardy vindication against the vituperation of More and in so doing helps to forward both a new use of the Bible and also a more fruitful ecumenical approach to its translation and dissemination.

A point not always remembered is that English-speaking Jews also have a stake in translations of the major part of the Bible, namely, the OT. Hence their renderings should also be taken into account. I. Leeser, who introduced preaching in English into American synagogues and who founded the first Jewish Congregational Sunday School to have many years of continuous existence, proved to be the pioneer in OT translation too. His English version of the OT came out in Philadelphia in 1853. He based it on the AV but also drew heavily on German versions. Some of his renderings are designed to refute the christological interpretation of key OT passages. For many decades Leeser's work remained the most widely accepted Jewish rendering of the OT in English, and synagogues in both the United States and Great Britain used it extensively.

In 1892 the Jewish Publication Society proposed a thorough revision of the Leeser version. As the work proceeded, however, it was felt that a completely new translation was needed. To this end a committee was appointed with the illustrious scholar M. Jastrow as its president. The first part of the new version to appear was Psalms in 1903. On Jastrow's death a committee of seven was set up to carry on the work. M. L. Margolis, a noted Hebrew expert who became editor of *JBL* (1914-1921) and *JAOS* (1922-1932), took over the post of editor-in-chief. The whole of the OT had come out by 1917 and it was so well received that by 1950 it had enjoyed twenty-four reprintings and almost half a million copies had been sold.

Some Jews, of course, have given themselves to NT study too, among them H. J. Schonfield, who used his specialized knowledge of the NT background in an independent translation which he calls *The Authentic NT* (1955). The title seems to promise more than is offered, for Schonfield is not demonstrating that either the texts used in previous versions or the actual renderings have been inauthentic. In fact, Schonfield has little to add in these areas, although he achieves a high level of competence in his translation. The extra element, if any, derives from his greater closeness to the Jewishness of the NT and its authors. This enables him to bring out its true flavor a little better than any Gentiles, even Christian Gentiles, can do.

XII. Recent Translations.–The more official RSV and NEB ventures were accompanied and have been followed by a great number of other translation attempts during the middle and later parts of the 20th century. These tend to conform to well-defined patterns. Some, for example, aim primarily at revision of the AV, the ASV, or the RV, often in a certain conscious rivalry with the RSV. Others try to strike out in new directions with the principal

aim of making Scripture more understandable, more graphic, and perhaps more immediately appealing to the new age. Usually one finds a certain combination of the attempt to be more accurate on the one side and more contemporary on the other. A new feature is the readiness of different national or denominational groups to work together. Roman Catholics since Vatican II have done much to stimulate this cooperativeness and they showed their good intentions by putting out a special edition of the RSV for the use of Roman Catholic readers. The tension between more literal translation and the urge to modernize has also produced important discussion of what translation involves.

Among revisions of the ASV a first undertaking to call for notice is the Berkeley or Verkuyl Version. The first part of this came out in Berkeley in 1945, and the whole Bible was published in 1959. G. Verkuyl, the general editor, translated the NT. For the OT he enlisted the aid of several conservative scholars, although exercising tight editorial control. Not unjustly the work might be called the conservative alternative to the RSV.

It has many interesting features. Italics for supplementary words have been abandoned. Quotation marks are used in direct speech except when God speaks, for He, of course, is the speaker in and through all Scripture. In address to God "thou" is still used, but everywhere else "you." In the case of Christ we find a consistent but confusing pattern. Capitalization of pronouns referring to God represents a new departure. Capitals in general show which parts of the OT are taken messianically. Mostly Verkuyl follows the AV here, but surprisingly he does not adopt a typological understanding of Canticles. The assistant translators apparently followed their own judgment regarding the name of God in the OT, for "Yahweh," "Jehovah," and "the LORD" all occur.

The Berkeley Version provides in the main a sound and straightforward translation but it has perhaps a greater share of odd phrases and inappropriate idioms than most Bibles. F. F. Bruce in his *English Bible* (p. 223) points to "pattern after me" in 1 Cor. 1:11, "the left-overs shall be saved" in Rom. 9:27, "my facesaver and my God" in Ps. 42, and "my insides" in Jer. 4:19, while the notes have in Gen. 3:12 the tasteless slang phrase "passing the buck."

Materially the notes vary in quality. Some provide helpful information while others are moral comments. The dating of events after Gen. 14 has naturally caused controversy, especially when it comes to a highly debatable date for the Exodus. Opposition has also been aroused by the correction of the Hebrew text in 1 K. 10:28 on the ground that Egypt "was not a producer of horses." The attempt to provide equivalent values for Bible coins has fallen victim to accelerating inflation. Some useful corrections and revisions may be found in the 1970 edition.

Another alternative to the RSV has been advanced in the form of the New American Standard Version which came out in its entirety in 1963. The main criticism which has been brought against this more conservative revision of the ASV is that it is too pedantic and that it shows arbitrariness in its handling of the Greek tenses. Yet it has excellent qualities too. It aims at close fidelity to the originals. It has a keen sense of the need for grammatical correctness. Where necessary it keeps to the time-honored custom of offering alternatives in the margin. It stays with the use of italics to indicate necessary additions. At the same time it aims at clear contemporary language which will make Scripture more readily comprehensible and also dispel the idea that the Bible is an old-fashioned book. Many readers who not unjustly admired and profited from the ASV feel that this is its true modern successor rather than the much more radically altered RSV.

ENGLISH VERSIONS

A notable new version which has tried to combine scholarship with simplicity and even at times a graphic or dramatic quality is the so-called *Jerusalem Bible* of the Roman Catholic Church. Edited by A. Jones, the first part of this came out in 1956, the complete Bible following in 1966. It was published in Liverpool and secured the approval of Cardinal Heenan, the leader of English Roman Catholics.

The name is derived from the fact that the French *Bible de Jérusalem,* the work of the Dominican School in Jerusalem, forms an important basis. At times the first draft was little more than a translation of the French version, although this was then checked by the originals. Sometimes, however, the procedure was reversed with translation done directly from the originals in consultation with the French. In the OT "Yahweh" is used as the divine name, but for the most part the version uses good idiomatic English as it is employed today. While this involves some freedom at the word level, this version does not give translation the more extended sense it bears in some circles, since it rejects any attempted updating of symbols and metaphors. Good supplementary materials are provided, particularly an index of biblical themes.

Among examples of cooperative work, which naturally includes the RSV and the NEB, the New International Version calls for notice. This interdenominational venture was set in motion by the New York Bible Society and drew on scholars of different countries from a wide range of churches apart from the Roman Catholic and Greek Orthodox. Teams were assembled for each book and the procedure was for the team to make a draft and then submit it successively to three editorial committees, the intermediate, the general, and then the final committee of translation. Literary consultants were also employed. The translation of the NT came out in 1973, and that of the OT in 1978. The NT follows an eclectic text. It does away with archaisms such as "thou" and "thee." Alternative renderings are provided in the notes. The thrust of the work is conservative in the theological sense but not at the expense of contemporaneity of language. In the evangelical world in particular this version has been highly rated and warmly received.

The most ambitious cooperative undertaking, however, is undoubtedly the *Anchor Bible.* Under the initial leadership of W. F. Albright and D. N. Freedman, this employs scholars of different nationalities and even of different faiths, since Jews are included as well as Protestants and Roman Catholics. The *Anchor Bible,* which is not rushing on to the NT first, offers not just a new and exact translation but also some extended exposition and an attempted reconstruction of the historical setting of the books which will, it is hoped, enhance the understanding and appreciation of the general reader. Genesis came out first in 1964 and contained some challenging readings. Thus the very first verse, following Moffatt, replaces the traditional "In the beginning God . . ." with "When God set about to create. . . ." Again, in v. 2 the familiar "And the Spirit of God . . ." yields to "Only an awesome wind swept over the water," while in v. 26 "I will make man" replaces "Let us make man." The expository section, of course, explains and supports changes of this kind, although the general reader, who does not find similar material in more common versions, may well be left in the confusion of a little knowledge if he is not prepared for wider investigation. When completed the *Anchor Bible* promises to be an important contribution to Bible translation and study, although it is unlikely to crowd out more established versions in either individual or public use.

Another group of modern versions focuses primarily on

ENGLISH VERSIONS

increasing the clarity or effectiveness of the text for modern readers. In this regard the Penguin edition of the *Four Gospels* by E. V. Rieu (1952) and the *Acts of the Apostles* by C. H. Rieu (1957) forms an interesting point of departure, for apart from the merits of the rendering E. V. Rieu was an eminent classical scholar who devoted much thought to the aims and methods of translation. He helped to formulate the theory, found already in Moffatt, that beyond clarity and modernity of language a good translation should achieve an equivalent effect to that of the original. In some cases this might extend no little latitude in wording. Phillips, of course, operated on much the same principle, although it is interesting that in a famous radio discussion Rieu and Phillips disagreed a great deal on what an equivalent effect might be in specific instances. Thus Rieu did not like Phillips' rendering in Jn. 1:14, "The Expression of God became a human being," but Phillips thought that Rieu failed to make the right impact, especially in Matthew, by putting the observations on the fulfillment of OT prophecy in footnotes, since they are an integral part of the writer's message. The law of equivalent effect obviously leaves a good deal of play for the translator's subjective judgment on what the authors intended, how it struck the original readers, and how and to what readers can and should react today.

Among versions which are more concerned about simplicity an interesting example in E. Vernon's *Gospel of St. Mark* (1951). Vernon was trying here to embody his conviction that a proper translation of Scripture should not use any words that an average child of twelve could not understand. The *Basic English Bible* (NT 1940, whole Bible 1949) attempts something of the same. Accepting C. K. Ogden's list of 850 basic English words, along with 150 additional words permitted for and demanded by the project, it passes on the total message of the Bible in a vocabulary which is not beyond the grasp of readers with only a rudimentary knowledge of the language. The disadvantages of this type of restriction need not be labored, but under the able leadership of S. H. Hooke many of them were turned into at least partial assets as the translators necessarily discarded existing versions, worked from the originals, and considered every word and sentence with the utmost care in order to make the best possible use of their limited resources.

Shortly after the *Basic English Bible* came out in 1949, a *Plain English NT* followed (1952). Plain English, according to a London report of 1936, consists of 1500 "fundamental and common words" in ordinary use. The *Plain English Version* is the work of C. R. Williams, who had experience teaching English in India and Ghana, and who wished specifically to provide a copy of the NT in English for educated foreigners, while perhaps helping at the same time ordinary English readers of very limited vocabulary. Williams had to add some special words but he carefully explained the meaning of these in a glossary. Having at its disposal a greater range of English words than the *Basic English Bible,* his version enjoys many obvious advantages, although at many points *Basic English* offers a better rendering.

Incidentally another Williams, C. B., had much earlier, in 1937, published a similar sounding version, *The NT in the Language of the People.* Here, however, the main aim was to bring out the nuances of the Greek, especially the tenses, and this does not always produce sentences of a type that most people would speak. The version has, however, some effective renderings of individual statements and passages. The *NT in the Language of Today* is another work with much the same title. Produced by the Lutheran W. F. Beck, this strikes a good balance between fidelity to the original and modernity of expression.

The translation of Moffatt, and even more so the work of Phillips, raised with new acuteness the question whether what is in part a paraphrase might not be just as good a translation as, and possibly even a better one than, a more literal rendering. Experience in missionary translation helped to pinpoint the issue. Should the translator aim at a formal equivalent or at an effective or "dynamic equivalent" in which the content is forcefully presented even though individual words and even metaphors may be changed? On the latter view a translation is more than the reproduction in another tongue of the same terms and phrases as the original. It involves "translation" into another age and culture in order that what the original means and signifies for the writer and his first readers may make an equivalent impact on those who now read his work in a completely different time and setting.

Obviously the issue has a greater urgency among peoples who have no history of influence by Hebraic and Greek cultures. Yet it also has relevance to the evangelistic transmission of the biblical message to those in the Western world who have had little or no grounding in Christianity and its traditional idioms. Obviously, effective transmission in these circumstances entails the use of contemporary modes of thought and speech, as all modern versions allow. Does it also presuppose that, at least for certain purposes, careful paraphrase is the most authentic translation?

An example of the paraphrase translation is *Good News for Modern Man,* put out by the American Bible Society in 1966 with the subtitle *The NT in Today's English Version.* Very explicitly this version aims at those with little Christian background. Even the title is paraphrased to put across what the NT is all about. Line drawings are also provided as visual aids. Niceties of language and grammar are not allowed to stand in the way of simplicity, vigor, and relevance. The work is inexpensive and is admittedly introductory. There is even a preface showing in simple terms what the NT is. A word list explains more difficult technical terms and identifies some of the people and places mentioned in the text. An index enables the reader quickly to locate "the more important subjects, persons, places, and events in the NT." Christians moving on to fuller knowledge will need more literal versions, but for those who are only just finding their way to the Bible, or who are beginners in the faith, a version of this type serves a useful and necessary function. The OT was added in 1976 and the completed Bible bears the title *Today's English Version or The Good News Bible.*

The *Living Bible Paraphrased* (1972) has much the same goal as *Today's English Version.* K. Taylor, the translator, began this venture simply by paraphrasing the ASV for his own children. As the work proceeded and expanded, he enlisted the aid of scholars to check his version against the original and of literary consultants to examine and improve the style. Unable to find a publisher, Taylor founded his own publishing house to issue the NT and later the whole Bible. The work proved to be an astonishing success. After only three years some eighteen million copies in various editions had been sold and the *Living Bible* had captured almost half the total Bible sales in the crowded U.S. market.

The *Living Bible Paraphrased* obviously serves the purpose for which it was designed. It offers a translation, or rather, as Taylor freely admits in the preface, a paraphrase, which can be read easily by people of all ages and backgrounds. It has a particular sphere of mission among children and recent converts but even more so among those outside the churches who are easily dis-

couraged even by contemporary versions, let alone the more formal AV, ASV, or RSV. In this sense the *Living Bible* might be regarded as predominantly a form of the spoken word rather than, in the stricter sense, the written word. It is the Bible as living word of proclamation. Proclamation is supremely the sphere of dynamic as distinct from formal equivalence.

Yet the *Living Bible* also illustrates the problems which inhere in paraphrase and which challenge the view that dynamic equivalence means authentic translation. Taylor himself realizes these problems, for in his preface he asks for help and has now appointed a Revisions Committee. If one leaves aside occasional stylistic weaknesses, these problems are basically threefold.

First, a large area of subjective judgment opens up when the translator adopts the double rule (1) of going by what he thinks the author means to say rather than precisely by what he does say, and (2) of deciding how best what he means to say can make its impact on readers of another age and language. Second, the possibility of exegetical mistakes and theological intrusions, which is present in all translation, increases rapidly with the increase of elasticity in rendering. The *Living Bible* has received severe criticism at this level, especially where passages which might be open to differing theological interpretations have been definitely, if unintentionally, steered in the direction of the translator's own position. Here the translator gets between author and reader instead of mediating between them. Third, the focus on the Bible as spoken word, while undeniably justifiable, can in this form impede the functioning of the Bible as a normative written word. Ultimately, of course, only the Hebrew and Greek originals can fulfill this function but for the vast majority of Christians versions have to serve as a working norm. If, however, translations take considerable liberties with the originals, introducing subjective judgments, dubious exegesis, and theological interpretation, the rule of faith and practice undergoes a relativization which impairs and finally destroys its true use.

The *Living Bible*, with its staggering popularity and circulation, might prove to be a critical point in the history of English versions. If the Bible as written word comes to be absorbed in the Bible as spoken word, as naive enthusiasm for dynamic equivalence might entail, then the churches can be betrayed into the paradox of becoming both more and less biblical at one and the same time. But there are alternatives. A better balance might be struck between literal and dynamic translation; Taylor himself seems to be seeking it. Again, a clear distinction between translation and paraphrase might be perceived, upheld, and explicitly stated; readers who are introduced to the Bible by paraphrase can be specifically referred to more literal versions for teaching the Christian faith and life. To avoid confusion, some contribution of the two alternatives might well prove to be the best option. With this safeguard, ventures like the *Living Bible* unquestionably have an important and constructive role to play in the ongoing provision of versions of the Bible in English.

ENGRAVING. *See* CARVING; CRAFTS.

EN-HADDAH en-had'ə [Heb. *'ên-ḥaddâ*; Gk. B *Aimarek*, A *Ênadda*]. One of the cities of Issachar (Josh. 19:21) mentioned with Remeth (*see* JARMUTH 2). The exact site is unknown, but it is probably to be identified with el-Hadetheh, located about 10 km. (6 mi.) E of Mt. Tabor.

EN-HAKKORE en-hak'ə-rē [Heb. *'ên haqqôrē'*–'spring of the partridge' (or 'of the one who calls'; cf. LXX, Gk. *pēgḗ toú epikalouménou*)] (Jgs. 15:19). A spring at Lehi, miraculously provided by the Lord when Samson called upon him (hence the LXX translation). The site is unknown.

EN-HAZOR en-hā'zôr [Heb. *'ên ḥāṣôr*; Gk. *pēgḗ Asor*]. A fortified city in Naphtali (Josh. 19:37). The site is usually identified as Khirbet Haṣīreh, on the slopes W of Kedesh near Ḥazzûr. Other geographers, however, attempt no identification.

ENJOIN [Heb. hiphil of *'ûḏ*] (Dt. 32:46; Zec. 3:6); AV TESTIFY, PROTEST; NEB "solemnly give," "give . . . this solemn charge"; [piel of *qûm*] (Est. 9:21,31); AV PUNISH, STABLISH; NEB BIND, PRESCRIBE; [*pāqaḏ*] (Zeph. 3:7); AV PUNISH; NEB INSTRUCTIONS; [Gk. *kōlýō*] (1 Tim. 4:3); AV, NEB, FORBID. Its usual sense is "impose something," as a command, a charge, or a direction. In all the RSV references the matter enjoined is of a serious nature, demanding immediate attention and implicit observance. In some instances where the RSV renders "command," the AV and NEB have "enjoin" (for Gk. *epitassō*, Philem. 8, AV; *entéllō*, He. 9:20, AV, NEB).

ENJOY; ENJOYMENT [Heb. *rāṣâ*] (Lev. 26:34,43; 2 Ch. 36:21; Job 14:6); AV also ACCOMPLISH; NEB also "ran the full term," "counting the hours"; [*ḥālal*] (Dt. 20:6; Jer. 31:5); AV EAT; NEB USE, DEFILE; [*'ākal*] (Dt. 20:14; Neh. 9:36; Eccl. 5:19 [MT 18]; 6:2; Jer. 2:7); AV EAT; NEB also EAT; [*rā'â*] (Ps. 34:12 [MT 13]; Eccl. 2:1,24; 6:6; 9:9); AV also SEE, BE FED; NEB also FIND, PROSPER; [*'āśâ ṭôḇ*] (Ps. 37:3; Eccl. 3:12); AV DO GOOD; NEB "live the best life he can"; [*śāmē(a)ḥ*] (Eccl. 3:22; 5:19 [MT 18]; 8:15); AV REJOICE, BE MERRY; NEB also REJOICE; [*śāḇa'*] (Eccl. 6:3); AV BE FILLED; NEB GET SATISFACTION FROM; [*bālâ*] (Isa. 65:22); [*'ālas*] (Job 20:18); AV REJOICE; NEB "spew up undigested"; [*ḥûš*] (Eccl. 2:25); AV "hasten [to eat]"; NEB "be anxious"; [*śimḥâ*] (Eccl. 5:20 [MT 19]; 8:15; 9:7); AV MIRTH, JOY; [Gk. *tynchánō*] (Acts 24:2); [*apólausis*] (1 Tim. 6:17; He. 11:25); [*empímplēmi*–'have one's fill'; cf. Bauer, p. 255] (Rom. 15:24); AV BE FILLED. Heb. *rā'â* frequently occurs idiomatically with *ṭôḇ* and means, literally, "see (or seeing) good" (Ps. 34:12; Eccl. 2:1,24; 5:18 [MT 17]; cf. 6:6). Recent translations of Heb. *ḥûš* (Eccl. 2:25), implying "feel" or "perceive," thus "enjoy (with the senses)," reflect parallels in Aramaic, later Hebrew, and Ethiopic. Elsewhere the verb (or a similar form from a different root) is translated "hasten" (cf. AV; BDB, pp. 301f.).

Among those things from which one might take pleasure or satisfaction are the fruit and other "good gifts" of the Promised Land (Dt. 20:6; Neh. 9:36; Jer. 2:7; 31:5), wealth and possessions (Eccl. 5:19), the spoils of war (Dt. 20:14), work (Eccl. 3:22; Isa. 65:22) and the products of one's labors (Eccl. 2:21), the company of others (Rom. 15:24), or life in general ("enjoy oneself," Eccl. 2:1; 3:22; 8:15). One might also enjoy the "fleeting pleasures of sin" (He. 11:25).

Enjoyment might also entail possessing, or experiencing

with satisfaction, sabbaths (Lev. 26:34, 43; 2 Ch. 36:21), one's lifetime ("his day," Job 14:6), peace (Acts 24:2), security (Ps. 37:3), honor (Eccl. 6:2), God's favor (Prov. 14:9), and the good things of life (Ps. 34:12; Eccl. 6:7; 1 Tim. 6:17).

The references to "enjoyment" in Job and Ecclesiastes contrast the attitudes of the sinner and the righteous man, primarily toward their labors (Job 20:18; Eccl. 2:24f.; 5:18f.). Zophar says that the wicked man's pleasure turns bitter in his mouth (Job 20:12-15) and he will derive no pleasure from the fruits of his labor (v. 18). By contrast, the Preacher says that the righteous one may find enjoyment in his work, his food, or his life as a whole, because all are gifts from God.

In Lev. 26:34, 43; 2 Ch. 36:21, Heb. *rāṣâ* (lit. "make acceptable," "satisfy") means to pay off a debt (cf. RSV mg.), indicating that the sabbath dues of the subject land are to be paid off even while the people of Israel are in exile.

To enjoy the fruits of a vineyard (Dt. 20:6; Jer. 31:5) is to defile or profane it by rendering it "common" (Heb. *ḥālal*, lit. "pollute"; cf. BDB, p. 320).

See also JOY; PLEASE. A. C. M.

ENLARGE [Heb. hiphil of *rāḥaḇ* (Ex. 34:24; Dt. 12:20; 19:8; 33:20; Isa. 5:14; 54:2; Am. 1:13), hiphil of *pāṯâ* (Gen. 9:27), *šāṭaḥ*–'spread out' (Job 12:23), piel of *rāḥaq* (Isa. 26:15), hiphil of *rāḇâ* (1 Ch. 4:10), *qāraʿ* (Jer. 4:30); Gk. *megalýnō* (2 Cor. 10:15)]; AV also "remove" (Isa. 26:15), "rent" (Jer. 4:30); NEB also EXTEND, WIDE, GREED FOR (Am. 1:13), etc.

As used by the RSV, "enlarge" usually refers to territorial expansion by a family (e.g., Dt. 33:20; 1 Ch. 4:10; Gen. 9:27, where *yapṯ* is a play on the name Japheth, Heb. *yepeṯ*) or a nation. God's covenant with Israel included the promise of extended borders (Ex. 34:24; Dt. 12:20; 19:8; cf. Ex. 23:27-31), and the prophet Isaiah looked forward to a time after the Exile when Israel's borders would once again be extended (Isa. 26:15; 54:2f.). But to describe the severity of God's judgment against Judah's wickedness, Isaiah pictured Sheol as a ravenous beast with gaping mouth (5:14). Amos warned that judgment would fall upon the Ammonites for the atrocities they committed while expanding their territory at Israel's expense (1:13). Job testified that God is omnipotent; it is He who enlarges some nations and leads others into captivity (12:23). In the NT "enlarge" appears only once, of the expansion of Paul's field of missionary activity (2 Cor. 10:15).

See also BORDER. N. J. O.

ENLIGHTENED [Gk. *epiginṓskō*] (Rom. 10:2); AV "according to knowledge"; NEB INFORMED; [*phōtízō*] (Eph. 1:18; He. 6:4; 10:32); AV also ILLUMINATED; NEB also ILLUMINED; **ENLIGHTENING** [Heb. *ʾôr*] (Ps. 19:8 [MT 9]); NEB "shines clear"; **ENLIGHTENMENT** [Heb. *daʿaṯ*] (Isa. 40:14); AV "taught him knowledge"; NEB "gain discernment"; **ENLIGHTENS** [Gk. *phōtízō*] (Jn. 1:9); AV LIGHTETH.

Paul writes of those whose zeal for God is not "enlightened" in Rom. 10:2. The word *epiginṓskō* is used here to refer to a specifically theological knowledge of God, a higher and more perfect knowledge that recognizes the knowledge of God and of Christ to be the perfection of knowledge.

In Ephesians and Hebrews the term *phōtízō* is translated "enlightened." This refers to the knowledge of the truth, which, when received into their own lives (cf. Isa. 40:14), "enlightens" people by giving them life (Jn. 1:9, 4). This "illumination" in the early Christian communities took place in baptism, which was "the moment at which the individual passed out of the kingdom of darkness into the realm of light and hence the baptized were spoken of as 'the enlightened' [*phōtísthentes*, He. 6:4; 10:32; cf. Eph. 1:18]" (Richardson, pp. 338, 348). Justin Martyr (*Apol.* i.61; cf. *Dial.* 39.2) saw this illumination as the "illumination of the mind," though it should be noted that in the NT the word is not directly applied to baptism.

ENMISHPAT en-mish'pat. *See* KADESH 1.

ENMITY [Heb. *ʾêḇâ*] (Gen. 3:15; Nu. 35:21f.; Ezk. 25:15; 35:5); AV also HATRED (Ezk. 25:15; 35:5); NEB also ENEMY (Nu. 35:22), FEUD (Ezk. 35:5); [*śānēʾ*] (Dt. 4:42; 19:4, 6; Josh. 20:5); AV HATED; [*śāṭam*] (Ps. 55:3 [MT 4]); AV HATE; NEB REVILE; [Gk. *thymós*] (Gal. 5:20); AV WRATH; NEB "fits of rage"; [*échthra*] (Lk. 23:12; Jas. 4:4); NEB also FEUD (Lk. 23:12). Hostility or animosity directed toward God (Rom. 8:7; Jas. 4:4; cf. Rom. 1:30) and man.

The outward manifestation of enmity, whether vertical or horizontal, presupposes an inner disposition of hostility (cf. Mt. 15:19). The occurrence of the word in the fall narrative is significant; where God becomes man's enemy, enmity originates in man's sin (cf. the phrase "wrath of God" in Jn. 3:36; Rom. 1:18; Eph. 5:6; Col. 3:6). The tables must be turned; hence, the *protevangelium* (Gen. 3:15) proclaims victory and the cessation of hostilities (cf. Eph. 2:15f.).

The Heb. *śānēʾ* (Ugar. *šnʾ*) is equivalent to the Gk. *mísos*, while *ʾêḇâ* is equivalent to *echthrós* (*TDNT*, II, 811-15; Morris, pp. 220-25). *Thymós* differs little from *orgḗ* ("wrath," "anger"); *thymós* originally referred to violent movements of air, water, etc., and consequently came to mean "well up" or "boil up" (*TDNT*, III, 167f.).

According to the Pentateuch, the absence of enmity distinguishes unpremeditated from premeditated murder (cf. Ex. 21:12-14). The avenger of blood may not retrieve the manslayer, who kills accidentally, from the city of refuge. Thus, according to Scripture there is a type of killing that is not murder. In this connection, it must be noted that God Himself becomes the avenger of blood in the judgment oracles of Ezekiel (25:15-17; 35:5-9); He will pursue Philistia and Edom to destruction.

ENNATAS en'a-tas (1 Esd. 8:44, NEB). *See* ELNATHAN 2.

ENOCH ē'nok [Heb. *ḥ*^{a}*nôḵ*–'initiated'; Gk. *Henōch*].

1. The eldest son of Cain (Gen. 4:17f.).

2. The son of Jared and father of Methuselah, seventh in descent from Adam in the line of Seth (Jude 14; cf. 1 Ch. 1:3, AV HENOCH). He is said (Gen. 5:23) to have lived 365 years, but the brief record of his life is comprised in the words, "Enoch walked with God; and he was not, for God took him" (v. 24). The expression "walked with God" denotes a devout life, lived in close communion with God, while the reference to his end has always been understood, as by the writer of Hebrews, to mean that "by faith Enoch was taken up so that he should not see death; and he was not found, because God had taken him" (He. 11:5). *See also* APOCALYPTIC LITERATURE III.A.

A. C. GRANT

ENOCH. A city built by Cain in the land of Nod and named after his firstborn son (Gen. 4:17).

ENOCH, BOOK OF THE SECRETS OF. Also called 2 Enoch. *See* APOCALYPTIC LITERATURE III.F.

ENOCH, ETHIOPIC ē-thi-op'ik, **BOOK OF.** *See* APOCALYPTIC LITERATURE III.A.

ENOCH, SLAVONIC sla-von'ik, **BOOK OF.** *See* APOCALYPTIC LITERATURE III.F.

ENORMITY (Hos. 6:9, AV mg.). *See* VILLAINY.

ENOS ē'nos, **ENOSH** ē'nosh [Heb. *ʾĕnôš*–'man,' 'mankind'; Gk. *Enōs*] (Gen. 4:26; 5:6-11; 1 Ch. 1:1; cf. Lk. 3:38); AV ENOS; RSV ENOS only in Lk. 3:38; NEB ENOSH. The son of Seth and grandson of Adam, in whose time a new religious development began, for "at that time men began to call upon the name of the Lord" (Gen. 4:26). There seems to be an implied contrast to Gen. 4:17-24 which records a development in another area of life, represented by Enoch the son of Cain.

S. F. HUNTER

ENQUIRE. This is an Old English word, now obsolescent, common in the AV. In the RSV it is usually replaced by the more modern "inquire." *See* INQUIRE.

EN-RIMMON en-rim'on [Heb. *ʿên-rimmôn*–'fountain (or 'spring') of the pomegranate']. A city of Judah ascribed to Simeon, located S of Jerusalem. "Ain and Rimmon" in Josh. 15:32; 1 Ch. 4:32 should probably be Ain-rimmon or En-rimmon as in Josh. 19:7; Neh. 11:29. Nehemiah mentions it as a city resettled after the Captivity. Zechariah (14:10) speaks of it prophetically in connection with the future blessing that shall flow out from Jerusalem. The site usually accepted is Umm er-Ramāmîn, 14 km. (9 mi.) N of Beer-sheba. J. F. PREWITT

EN-ROGEL en-rō'gel [Heb. *ʿên rōgēl*–'spring of *rogel*'; *rogel*–uncertain, variously 'stream,' 'spies' or 'explorers,' 'treaders' and thus 'waterwheels,' 'fullers' or 'bleachers'; Josephus *Ant.* ix.10.4 (cf. Am. 1:1; Zec. 14:5) connects it by means of Gk. (LXX) *rhḗgnymi*– 'split,' with the earthquake in the time of Uzziah]. A spring (the *ʿên* or *ʿayin*, "spring," has a visible and spontaneous flow of water) second only to Gihon in supplying water to Jerusalem. It was located at, or close to, the present Bîr Ayyûb ("Job's Well"), near the confluence of two deep valleys, Kidron and Hinnom, and in OT times a third, the Tyropoeon. By its geological location a steady flow of ground water is assured.

A *bîr* is a spring that is accessible through an artificial entrance. Bîr Ayyûb today is a well 38 m. (125 ft.) deep. Those who live nearby praise the quality of its water. Local tradition connects the well with the curing of Job's diseases, probably a confusion traceable to the appearance of Joab's name in 1 K. 1:9. En-rogel is about 168 m. (550 ft.) below the temple hill and about 27 m. (90 ft.) lower than Gihon, from which it is out of sight but within earshot.

According to Josh. 15:7; 18:16, En-rogel was on the border between the tribes of Benjamin and Judah, the point nearest Canaanite Jerusalem. At En-rogel spies received information from within the city walls for David at the time of Absalom's revolt (2 S. 17:17). It was also the site of Adonijah's premature celebration of his kingship (1 K. 1:9).

The "dragon well" (AV), "Jackal's Well" (RSV), or "Dragon Spring" (NEB) of Neh. 2:13, a well or spring

Bîr Ayyûb, the site of En-rogel (W. S. LaSor)

with serpent associations, is often thought to be En-rogel. J. Simons (*GTTOT*) and others relate the "gate of the spring" (MT), "gate of the fountain" (AV), or "Fountain Gate" (RSV, NEB) of Neh. 3:15 to En-rogel, as the Water Gate of Neh. 3:26 is related to Gihon.

En-rogel has been called Nehemiah's well by legendary identification as the place where the fire was miraculously preserved during the Exile (2 Macc. 1:19).

See JERUSALEM II.C.2, III.F.2.f. P. L. GARBER

ENROLLMENT; ENROLLED [Heb. *yāḥaš*, also *kāṭaḇ*; Gk. *apográphō, apographḗ* (Lk. 2:2), *synkatapsēphízomai* (Acts 1:26), *katalégomai* (1 Tim. 5:9)]; AV RECKONED, also GENEALOGY (2 Ch. 31:16-18), WRITTEN, TAXED (Lk. 2), TAXING (Lk. 2:2), NUMBERED (Acts 1:26), "taken into the number" (1 Tim. 5:9); NEB also REGISTERED, REGISTRATION, "entered in the roll" (Ezk. 13:9), "assigned a place" (Acts 1:26), "put on the roll" (1 Tim. 5:9), "citizens" (*apográphō*, He. 12:23). A listing or census of people according to family (tribal) relationship and/or occupation.

Although we have no details of how such enrollments were made or how and where such records were kept, there can be no doubt that the practice had a long history. In the Bible, for example, we find it from the wilderness period to the apostolic age.

Because of the great importance attached to keeping the tribal inheritance intact, family and tribal genealogical registers were kept. A "register of the house of Israel" is mentioned in Ezk. 13:9. A genealogical register seems to be preserved in 1 Ch. 1-8 (cf. 1 Ch. 9:1a, "So all Israel was enrolled by genealogies"). Josephus tells us that he has set down the genealogy of his family as he found it described in the public records (*Vita* 1). It is obvious that the Jewish marriage laws concerning prohibited degrees of consanguinity required a carefully kept system of genealogical records

A specific use of genealogical registers pertained to the priests. In order to prove his right to serve as a priest and to receive support, a man had to be able to prove his descent from Levi (cf. Ezr. 2:61-63; Neh. 7:61-65). An enrollment (numbering) of the Levites was made by David (1 Ch. 23:3). Josephus, with indefensible hyperbole, says that the high-priestly record extended back over two thousand years (*CAp* i.36).

The use of the enrollment (numbering or census) for the purpose of raising an army — superficially similar to the

"draft" — likewise is found. The first such enrollment was made by Moses at the command of God (Nu. 1:2f.). This seems to have been more for the purpose of maintaining order in the encampments and marches than for war. On this and other numberings, *see* CENSUS.

In the NT the Roman enrollment is mentioned in connection with the birth of Jesus (Lk. 2:2) and again in a passing reference to the revolt of Judas the Galilean (Acts 5:37). It appears that the Romans took a census every fourteen years for the purpose of levying taxes. On the problems of dating the census of Quirinius, *see* QUIRINIUS; CHRONOLOGY OF THE NT I.A.2.

It appears that the early Church also maintained some kind of register, for Paul cautions Timothy against enrolling younger widows (1 Tim. 5:9, 11). No other references to such enrollment are found, however.

The Greek word used in Acts 1:26 is a hapax legomenon meaning "count/reckon together with." It has no relationship to a census.

See also GENEALOGY. W. S. LASOR

ENSAMPLE. *See* EXAMPLE.

EN-SHEMESH en-she'mesh [Heb. *'ên šemeš*–'spring of the sun'; Gk. *pēgḗ hēlíou* (Josh. 15:7), *pēgḗ Baithsamus* (Josh. 18:17)]. An important landmark on the border between Judah and Benjamin (Josh. 15:7; 18:17). It is usually identified with the little spring 'Ain el-Hôd just E of Bethany, on the road between Jerusalem and Jericho, the last spring before the Jordan Valley. Tradition dating from the 15th cent. relates that the apostles drank from this spring; since then 'Ain el-Hôd has been called the "Spring of the Apostles."

ENSIGN. *See* BANNER; STANDARD.

ENSUE. Used by the AV in the obsolete sense of "pursue" in 1 Pet. 3:11 (Gk. *diṓkō*, "follow after," "pursue").

ENTANGLE [Heb. *bûḵ*] (Ex. 14:3); NEB HEM IN; [*môqēš*] (Prov. 22:25; 2 S. 22:6; Ps. 18:5 [MT 6]); AV SNARE, COMPASS; NEB "catch in a trap," TIGHTEN ABOUT (AROUND); [*sāḇaḵ*] (Nah. 1:10); AV "fold together"; NEB TANGLE; [Gk. *pagideúō*] (Mt. 22:15); NEB TRAP; [*emplékō*] (2 Tim. 2:4; 2 Pet. 2:20); AV ENTANGLE (2 Pet. 2:20); NEB BE INVOLVED (2 Tim. 2:4). Various processes of frustration, including conversational or moral confusion (in addition to physical entrapment).

Physical entrapment is suggested by *bûḵ* in Ex. 14:3, which speaks of being lost in the desert. Moses had seemingly led the people on a foolish route, for Canaan lay to the northeast but the cloud led them southwest. Pharaoh would think them lost in the wilderness as in a maze; thus he could say they were "entangled in the land." Similarly, when *môqēš* is used symbolically in David's song (Ps. 18:5 par. 2 S. 22:6), the image is one of death closing in and engulfing him. Likewise, Prov. 22:25 suggests that involvement with anger catches us as if a trap had ensnared us. *Sāḇaḵ* suggests the actual intertwining of branches. *Pagideúō* is a bird-hunting term (cf. LXX Eccl. 9:12), used figuratively in Mt. 22:15 to indicate a conversational or mental snare.

A type of moral involvement can also be indicated. *Emplékō* means "entangle," or "become enchanted or involved with." Thus Paul alludes to soldiers whose first commitment is to soldiering and who cannot afford to become enmeshed or "involved in civilian affairs" (2 Tim. 2:4, NEB). Peter warns those who follow Christ never to become entangled again with the defilements of the nonbeliever (2 Pet. 2:20). Here the allusion to entrapment may suggest nets used not only for catching animals but also as weapons of combat.

The AV translates *enéchō* (Gal. 5:1) "entangled," while the NEB has "tied to the yoke," and the RSV has "submit again." The idea is that of yielding willingly rather than becoming entrapped or entangled.

See also SNARE; FOWLER. V. B. GILLESPIE

EN-TAPPUAH en-tap'o͞o-ə, en-ta-pō͞o'ə [Heb. *'ên tappûa(ḥ)*–'apple spring'; Gk. *pēgḗ Thaphthōth*]. A spring whose location is still disputed, but no doubt near Tappuah in Manasseh (Josh. 17:7f.), although it was possessed by Ephraim. On the border of Ephraim, it is probably to be identified with the spring at Yâsûf, about 13 km. (8 mi.) S of Shechem.

ENTERTAIN [Gk. *xenízō*] (Acts 28:7; He. 13:2); AV LODGE; **GUEST ROOM** [*katályma*] (Mk. 14:14; Lk. 22:11); AV GUEST CHAMBER; NEB "room reserved for me," ROOM; [*xenía*] (Philem. 22); AV LODGING; NEB ROOM; **HOSPITALITY** [*philoxenía*] (Rom. 12:13; He. 13:2; 1 Pet. 4:9); AV also ENTERTAIN; [*xenodochéō*] (1 Tim. 5:10); AV LODGE; **HOSPITABLE** [*philóxenos*] (1 Tim. 3:2; Tit. 1:8); AV HOSPITALITY; **HOSPITABLY** [*philophrónōs*] (Acts 28:7); AV COURTEOUSLY; **HOST** [*ho keklēkṓs*] (Lk. 14:10); AV "him that bade thee"; [*xénos*] (Rom. 16:23).

I. Hospitality in the Levant.–Throughout the Mediterranean world, hospitality toward strangers was recognized as a sacred duty. Among the Greeks hospitality was a decisive mark of culture. The civilized were "those who love strangers and fear the gods" (Homer *Od.* viii.576; ix.175). Zeus himself was the "Friend of Strangers" (2 Macc. 6:2; Homer *Il.* xiii.625; cf. Dt. 10:18). In Egypt the practice of hospitality assured a favorable existence in the next world. For the Romans entertaining strangers was considered a sacred obligation.

The emphasis upon entertaining guests probably originated in nomadic life. Travel was seldom, if ever, for pleasure but rather because of necessity. One never knew when he would be dependent upon the hospitality of others. Therefore a stranger had the right to expect hospitable treatment. A visitor had no need even to thank his host, since he was only receiving what was due him. The host would provide for his guest housing, protection, and food, if he arrived in time for the evening meal. (Many times, however, even if the visitor arrived too late and was not entitled to food, the host sought to provide for him [cf. Lk. 11:5f.].) A murderer would find protection in the tent of his host even if the host were the victim's own son. No expense or labor was too great for the traveler, who was treated as the master of the house. The host frequently prepared for his guest a luxurious banquet (Gen. 18:6-8; note how Abraham minimizes his gracious provision by referring to it in v. 5 as a "morsel of bread").

In time, villages began the practice of maintaining a room for sojourners, the expense being shared by the village. In Mk. 14:14 par. Lk. 22:11 the *katályma* probably means such a guest room, while in Lk. 2:7 a caravanserai is equally possible. Lk. 10:34 clearly refers to an inn. We know from Josephus (*BJ* ii.8.4) that the Essenes assigned someone in "every" town to care for strangers (cf. Cyprian *Epistula* 7, where Cyprian in his absence orders certain priests to supervise the entertainment of travelers).

II. Hospitality in Israel.–In Israel hospitality was encouraged. This was due in part to the command of Scripture (Lev. 19:33f.; Dt. 10:13f.; 24:17, 19), and in part to Israel's own experience of being aliens in Egypt (Ex. 22:21; 23:9;

Lev. 19:33f.; Dt. 10:19) and later in Babylon. It was not merely a courtesy but an obligation to care for strangers. Abraham, upon seeing strangers coming in his direction, runs out to greet them and pleads with them to stay in his home (Gen. 18:2f.), and Reuel is amazed that his daughters did not extend hospitality toward the stranger who assisted them in watering their flocks (Ex. 2:20). The extent to which a host felt responsibility toward his guests is illustrated in a number of ways. In Gen. 19:1-11, Lot seeks to protect his guests from sexual abuse by the hostile crowd by offering his virgin daughters to the crowd. A similar example is found in Jgs. 19:22f. Elijah is offered by his host, the widow at Zerephath, the last bit of food left in the house (1 Kgs. 17:10f.).

III. Breaches of Hospitality.–Breaches of such hospitality did occur in the ancient world. The Ammonites and Moabites are castigated for such discourtesy (Dt. 23:4), as are the Benjaminites (Jgs. 19:15, 18; cf. Josephus *Ant.* v.2.8), and the Sodomites, who are referred to as "haters of strangers" (Josephus *Ant.* i.11.1). Jael's murder of Sisera (Jgs. 4–5) must also be considered such an instance, even if it was a patriotic act. Nabal's lack of hospitality almost cost him his life, but he was saved by the actions of his wife Abigail (1 S. 25). James and John were so angry at the Samaritans in Lk. 9:54 largely because they had not extended to Jesus and His disciples the simplest hospitality to which every stranger was entitled (cf. Lk. 7:44f.). The OT mentions wicked men who hated and even killed strangers (Ps. 94:6; cf. Wisd. 19:13-15). At times Jewish exclusiveness resulted in a marked reserve toward strangers. (For violations of hospitality in the Greek world, cf. Homer *Od.* iv.535; xi.411; xxi.27).

Nevertheless, in general there existed throughout the Levant an emphasis on entertaining strangers, and a man's worth and piety was readily seen by his hospitality (Job 31:32; T. Zeb. 6:4f.). Furthermore, even as lack of hospitality brought condemnation, so its practice brought reward. According to 1 Clem. 10:7, Abraham was given a son because of his faith and his hospitality. Lot was spared from the destruction of Sodom and Gomorrah because of his hospitality (1 Clem. 11:1), as was "hospitable Rahab" from the destruction of Jericho (He. 11:31; Jas. 2:25; 1 Clem. 12:1-3). Because of their hospitality to Israel, the Kenites were excluded by Saul from the judgment brought upon the Amalekites (1 S. 15:6), and, despite his idolatry, Micah (Jgs. 17) was spared because of his hospitality (T.B. *Sanhedrin* 103b). Hospitality was especially extended to fellow Jews, and throughout the Diaspora a Jew could be assured of receiving such hospitality from his fellow Jews. To practice such hospitality toward the rabbis was particularly praiseworthy (T.B. *Berakoth* 63b).

IV. Jesus' Teaching Concerning Hospitality.–Our Lord frequently during His ministry experienced hospitality (Mt. 13:1, 36; Mk. 1:29f.; 7:24; 9:33; 11:11; 14:3f.; Lk. 7:36f.; 8:3; 10:38f.; 14:1f., 12f.; 19:5; Jn. 4:40; 12:1f.) and assumed that such courtesy would be offered Him (Lk. 9:51f.; cf. Jesus' use of this theme in the parables: Lk. 11:5f.; 14:12f., 15f.). The mission of the Twelve (Mk. 6:8-11 par.) and of the Seventy (Lk. 10:1-12) was based upon the assumption that such hospitality would be available. Both here and in the later mission which Jesus envisioned (Mt. 10:40; Jn. 13:20) one's destiny was bound up with the hospitality (or lack of hospitality) extended to Jesus' messengers. The reception afforded the messengers would ultimately bring eternal life or death. It might be argued that the sin here envisioned is not so much the lack of hospitality shown Jesus' messengers but the rejection of the gospel preached by them, but both are intimately connected. The reception of Christian strangers and messengers is in reality the reception of Christ Himself (Mt. 25:43).

V. Hospitality in the Early Church.–In the NT great emphasis is placed upon entertaining strangers. A bishop must have as one of his qualifications a hospitable nature and reputation (1 Tim. 3:2; Tit. 1:8), as must anyone seeking to be enrolled as a widow (1 Tim. 5:10). The practice of hospitality was enjoined upon the Church for several reasons. First, loving one another demanded being hospitable. One could not love strangers or visitors without caring for them and entertaining them. It should be noted that in Rom. 12:9-13; He. 13:1f.; and 1 Pet. 4:8f. the commands to love and to show hospitality are intimately connected. (Love and hospitality are also intimately associated by the rabbis. In T.B. *Kiddushin* 39b five acts are listed as bringing future reward: honoring parents, deeds of love, hospitality, establishing peace, and [the most important] studying the Torah. But some rabbis [T.B. *Shabbath* 127a] thought the practice of hospitality was more important than the study of the Torah.) Second, hospitality was essential for the propagation of the gospel. Itinerant missionaries were immensely aided in their labors, knowing that they would be received by fellow Christians and helped on their way. Furthermore, entertaining these missionaries made the host a "fellow worker in the truth" (3 Jn. 5-8; cf. Rom. 16:3f.) with the men he entertained.

Third, the possibility of angelic visitation (He. 13:2) prompted hospitality. No doubt the writer had in mind such OT passages as Gen. 18:1f.; 19:1f.; Jgs. 6:11.; 13:2f. (cf. Tob. 5:4f.). Mt. 25:31f. intensifies even this expectation by stressing that the unity of Christ with His Church is such that showing hospitality to a Christian is showing hospitality to Christ Himself (cf. Ign. Eph. 6:1, where receiving itinerant missionaries is equated with receiving the Lord). Fourth, one is to exercise the particular gift that the host has in this area (1 Pet. 4:9f.). The wherewithal to entertain is seen by Peter as a gift of the Lord. Faithful stewardship of such a gift required the practice of hospitality.

It is not surprising, therefore, that we find many examples of such hospitality in the life of the early Church. Paul's mission work was greatly aided by such hospitality (Acts 16:14f.; 17:5-7; 18:7, 27; 21:4-6, 8, 16; 28:7; Rom. 16:1f., 23; Philem. 22), as was the work of Peter (Acts 10:6, 18, 32, 48) and others (2 Jn. 10f.; 3 Jn. 5-8).

VI. Rules for Guests.–The danger of abuse of hospitality was recognized in Ps. 41:9 [MT 10], which assumed an obligation on the part of the guest as well as the host (cf. Job 19:15; Ps. 55:12f. [MT 13f.]; Jn. 13:18). Certain rules by which a guest should conduct himself are listed in T.B. *Berakoth* 58a (cf. the rules of hospitality by Ptaḥ-ḥetep in E. A. W. Budge, *History of Egypt* [1968], II, 149). That Jesus was sensitive with regard to this matter is evident from Mk. 6:10f. and Lk. 10:7b (cf. Mk. 12:39). His followers were not to presume upon the hospitality of one house after another. In the early Church care was also to be taken to discriminate between the true believers and deceivers, for the latter were not to be entertained in one's home (2 Jn. 10f.; cf. 1 Jn. 4:1), lest one find himself sharing in a deceiver's wicked work. In the Didache the treatment of itinerant missionaries is carefully described. These itinerant missionaries (called "apostles") were to be entertained for only two days. If they remained longer they were deceivers (Did. 11:5; among the Arabs one could usually remain three days according to R. de Vaux, *Ancient Israel* [1961], p. 10). Furthermore, they should be given bread for their journey and not money (Did. 11:6, 12; cf. Rom. 15:24). To aid believers in this regard, letters

of recommendation were frequently sent along with these missionaries (Acts 18:27; Rom. 16:1f.; 2 Cor. 3:1). They were not always required, however, and the Christians tended to err on the side of generosity and to practice ungrudging hospitality toward one another (1 Pet. 4:9; cf. Aristides *Apologia* 15, where all Christians are portrayed as being hospitable).

ENTHRONEMENT [Heb. *yāšaḇ*] (1 S. 4:4; 2 S. 6:2; 2 K. 19:15; 1 Ch. 13:6; Ps. 9:7 [MT 8]; 22:3 [MT 4]; 29:10; 33:14; etc.); AV DWELL, "endure," INHABIT, SIT, HABITATION, ABIDE; NEB also ROYAL SEAT (Ps. 29:10b), DWELLING-PLACE, DWELL, THRONE, omits in Ps. 29:10a.

The THRONE was symbolic of royal office and power; thus to say that a king was enthroned (i.e., took his seat upon the throne) meant that he began to reign (cf. 1 K. 16:11; 2 K. 13:13). In Israel all royal authority ultimately rested with Yahweh (cf. 1 Ch. 29:22f.). Apart from Ps. 61:7 (MT 8) the RSV uses "enthroned" exclusively of Yahweh, who is depicted as enthroned "on the praises of Israel" (22:3), "in the heavens" (123:1), "over the flood" (29:10), and "upon the cherubim" (e.g., 1 S. 4:4; 1 Ch. 13:6; Ps. 80:1 [MT 2]). The latter epithet should probably be understood as an allusion to the idea that Yahweh was enthroned upon the ark of the covenant, the symbol of God's presence among His people Israel (*see* ARK OF THE COVENANT, esp. VI). Thus the fact that the ark was carried at the head of the people (e.g., at the crossing of the Jordan [Josh. 3:3f.] and the conquest of Jericho [ch. 6]) symbolized that Yahweh was marching before His people and that the victory and the kingship belonged to Him.

Some scholars (e.g., S. Mowinckel) identify certain of the Psalms as enthronement Psalms that were used in a ritual reenthronement ceremony of Yahweh as King of Israel (cf. Pss. 47, 93, 95, etc.). That such a ceremony was ever celebrated in Israel is still, however, a matter of much debate. *See* PSALMS IV.C.

See also KING (esp. IV).

N. J. O.

ENTRAILS [Heb. *qereḇ*] (Ex. 29:13, 17, 22; Lev. 1:9, 13; 3:3f.; 4:8, 11; 7:3; 8:16f.; 9:14); AV INWARDS; [*kāḇer*] (Prov. 7:23); AV LIVER; NEB VITALS. The inner organs of sacrificial animals. In the case of the burnt offering they were burned, after cleansing, with the whole of the offering. For the sin offering only these parts were burned as a sacrifice and the rest of the animal was burned outside the camp, while for the peace offering these parts were burned and the rest was eaten by the priests and the people. The fat, as well as the blood, was considered Yahweh's portion of the sacrifice. *See also* SACRIFICES AND OFFERINGS IN THE OT V.D-H; LIVER; DIVINATION III.E.

ENTREAT; INTREAT (AV) [Heb. *pāgaʿ* (Gen. 23:8; Ruth 1:16; Jer. 15:11), *ʿāṯar* (Ex. 8:8f., 28 [MT 4f., 24]; 9:28; 10:17f.; Jgs. 13:8; 1 Ch. 5:20; 2 Ch. 33:13, 19; Ezr. 8:23), *ḥālâ* (1 S. 13:12; 1 K. 13:6; 2 Ch. 33:12; Ps. 119:58; Jer. 26:19; Dnl. 9:13; etc.), *bāqaš* (Est. 4:8), hithpael of *ḥānan* (2 K. 1:13); Gk. *parakaléō* (Lk. 15:28; Acts 9:38; 2 Cor. 6:1; 10:1; Phil. 4:2), *paraitéomai* (He. 12:19)]; AV usually INTREAT, also MAKE REQUEST, MAKE SUIT, BESEECH, PRAY, etc.; NEB also SPEAK, PRAY, URGE, SEEK, INTERCEDE, etc.; **ENTREATIES** [Heb. *taḥᵃnûnîm*] (Prov. 18:23); AV INTREATIES; NEB "tone of entreaty."

In 1611 the AV spelling was indifferently "intreat" or "entreat"; in the editions since 1760, however, "intreat" is used in the sense of "beg," and "entreat" in the sense of "deal with." As examples of "intreat" see Ex. 8:8, "intreat the Lord" (Heb. *ʿāṯar*); Ruth 1:16, "intreat me not to leave thee" (*pāgaʿ*); 2 Cor. 8:4, "praying us with much intreaty" (Gk. *paráklēsis*). In Gen. 25:21 "intreat" indicates the success of a petition. For "entreat" see Gen. 12:16, "he entreated Abraham well"; Acts 27:3, "and Julius courteously entreated Paul" (Gk. *philanthrōpōs chrēsámenos*, lit. "having used in a philanthropic way"); cf. also Jas. 3:17 where *eupeithḗs*, literally, "easily persuaded," is translated "easy to be entreated."

The RSV does not use "intreat"; instead it uses "entreat" or another word. The meanings of "entreat" in the RSV include "intercede" (Gen. 23:8), "beg" (Ruth 1:16; He. 12:19; etc.), "earnestly pray for" (Heb. *ʿāṯar, ḥālâ*; Gk. *parakaléō*), and "seek" or "request" (Est. 4:8).

R. B. MILLER
N. J. O.

ENTRUST [Heb. *ʾāman*] (Nu. 12:7); AV, NEB, FAITHFUL; [*nāṯan*] (Jer. 39:14); AV COMMIT; NEB HAND OVER; [Gk. *pisteúō*] (Lk. 16:11; Rom. 3:2; 1 Cor. 9:17; Gal. 2:7; 1 Thess. 2:4; 1 Tim. 1:11; Tit. 1:3); AV COMMIT, "commit to trust," "put in trust;" NEB also TRUST, "discharge a trust"; [*títhēmi*] (2 Cor. 5:19); AV COMMIT; [*paratíthēmi*] (2 Tim. 2:2; 1 Pet. 4:19); AV COMMIT; NEB COMMIT, "put into the charge of"; [*paradídōmi*] (Mt. 25:14); AV DELIVER; NEB "put into the hands of"; [*parathḗkē*–'deposit'] (2 Tim. 1:12); AV COMMIT; NEB "put into the charge of"; [*parakatathḗkē*–'deposit'] (1 Tim. 6:20; 2 Tim. 1:14); AV COMMIT, "commit to trust"; NEB also "in our charge."

After telling the parable of the unjust steward, Jesus asks, "If then you have not been faithful in the unrighteous mammon, who will entrust to you the true riches?" (Lk. 16:11). Here the word *pisteúō* has the sense of committing something to someone while trusting in that person's fidelity and faithfulness (cf. LXX Nu. 12:7; Wisd. 14:5; 1 Macc. 8:16; 4 Macc. 4:7). This is very similar to the meaning of *paratíthēmi*, which was used in classical Greek for anything deposited with a friend for the purpose of safekeeping (cf. 1 Cor. 9:17). The instruction in 1 Pet. 4:19 for those who are suffering and being persecuted is that they should "entrust their souls to a faithful Creator." God will keep them safe just as He will ultimately keep safe the transmission of His own truth. In the Pastorals there is special teaching regarding the apostolic tradition. That body of tradition which the apostles "delivered to the saints" (Jude 3) is called a "deposit" (*parathḗkē* in 1 Tim. 6:20; cf. 2 Tim. 1:12). The "instructions" or "proclamation" (*parangelía*) is handed over to Timothy (1 Tim. 1:18), who is twice urged to guard and keep safe the "deposit" entrusted to him (1 Tim. 6:20; 2 Tim. 1:14; cf. Gal. 2:7; Rom. 3:2). But Timothy must also hand this over to those who are faithful, able to teach others (2 Tim. 2:2). Thus the delivery of God's "good news" continues throughout the community and from generation to generation.

D. K. MCKIM

ENVOY [Heb. *ṣîr*–'messenger' (Prov. 13:17; Isa. 57:9), *malʾāḵ* (2 Ch. 35:21; Isa. 30:4; 33:7), *mēlîṣ*–'interpreter'

(2 Ch. 32:31)]; AV AMBASSADOR, MESSENGER; NEB also "those sent to sue," PROCURER. In 2 K. 20:12 and Isa. 39:1 the RSV and NEB follow the LXX, which adds *kaí présbeis* ("and envoys"). An envoy is an official representative of a king or government, as of Pharaoh (Isa. 30:4); of the princes of Babylon (2 Ch. 32:31); of Neco king of Egypt (2 Ch. 35:21); of the messengers of peace sent by Hezekiah king of Judah to Sennacherib king of Assyria (Isa. 33:7). The same Hebrew term (*mal'āḵ*) is used of the messengers sent by Jacob to Esau (Gen. 32:3); by Moses to the king of Edom (Nu. 20:14); etc.

See also AMBASSADOR; MESSENGER.

ENVY; ENVIOUS [Heb. *qānā'*] (Gen. 26:14; 30:1; Ps. 37:1; 73:3; Prov. 3:31; 23:17; 24:1, 19; Ezk. 31:9); NEB also JEALOUS, EMULATE; [*rāṣaḏ*] (Ps. 68:16 [MT 17]); AV LEAP; [*qin'â*] (Eccl. 4:4; 9:6; Ezk. 35:11); NEB RIVALRY, JEALOUSY; [Gk. *phthónos*] (Mt. 27:18; Mk. 15:10; Rom. 1:29; Gal. 5 21; Phil. 1:15; 1 Tim. 6:4; Tit. 3:3; 1 Pet. 2:1); NEB also MALICE, JEALOUSY; [*ponēría*] (Mk. 7:22); AV "evil eye"; [*phthonéō*] (Gal. 5:26); NEB JEALOUS. The RSV also supplies "envious" in 1 S. 2:32.

The verb *rāṣaḏ* (piel) of Ps. 68:16 occurs nowhere else in the OT, but its meaning has been preserved in Arabic, where the related word means "watch as an enemy, lie in wait or view with envy," carrying the idea of hostility and ill will (Alexander, II, 113). In other OT passages "envy" is closely tied to jealousy, rivalry, and misplaced zeal.

Among NT references to envy, the Greek phrase used in the list of vices in Mk. 7:22 is *ophthalmós ponērós*, lit. "evil eye" (used also in Mt. 20:15; cf. RSV mg.). All other translations are of *phthónos* (or *phthonéō*), a classical word denoting an intense feeling and eager desire of ill will or malice (cf. Tit. 3:3). This means "the desire to deprive another of what he has" (Lightfoot, p. 212) and frequently occurs in catalogue lists of vices (Rom. 1:29; 1 Tim. 6:4; 1 Pet. 1:21). Sometimes the word is joined with *zélos* ("zeal" or "jealousy," cf. 1 Macc. 8:16; Gal. 5:20f.), though *zélos* may upon occasion be seen as good (Jn. 2:17; Rom. 10:2; 2 Cor. 9:2) while *phthónos* is "incapable of good [and] is used always and only in an evil signification" (Trench, p. 82). It was "out of envy" that the chief priests delivered Jesus up to be crucified (Mt. 27:18; Mk. 15:10; cf. 1 Clem. 5:2, where this is said to have been the cause of the martyrdom of Peter and Paul) and "out of envy" that some even preach Christ (Phil. 1:15).

D. K. MCKIM

EPAENETUS ep-ē'nə-təs [Gk. *Epainetos*]. One of the Christians at Rome to whom Paul sent greetings (Rom. 16:5). All that is known of him is told here. Paul describes him as (1) "my beloved," (2) "who was the first convert in Asia for Christ." He was one of the first Christians in the Roman province of Asia.

This salutation raises the question of the destination of vv. 3-16. It has been argued that they are addressed to the church in Ephesus because Prisca and Aquila and Epaenetus are known to have dwelt in Asia. (For a summary, see H. Gamble, *Textual History of the Letter to the Romans* [1977], pp. 37-39.) On the other hand, more than twenty others in this list are not known to have spent any time in Asia. Prisca and Aquila had once dwelt in Rome (Acts 18:2), and there would be nothing unusual about an Ephesian dwelling in the capital of the empire. Of interest is a discovery made in Rome of an inscription bearing the name of Epenetus, an Ephesian (*CIL*, VI, 17171).

S. F. HUNTER

EPAPHRAS ep'ə-fras [Gk. *Epaphras*]. A contracted form of EPAPHRODITUS. He must not, however, be confused with the messenger of the Philippian community. He was with Paul during a part of his first Roman imprisonment, joining in Paul's greetings to Philemon (Philem. 23). Epaphras was the missionary by whom the Colossians had been converted to Christianity (Col. 1:7), and probably he had founded the other churches of the Lycus. In sending his salutation to the Colossians Paul testified, "He has worked hard for you and for those in Laodicea and in Hierapolis" (Col. 4:13). Epaphras had brought to Paul good news of the progress of the gospel among the Colossians, of their "faith in Christ Jesus," and of their love toward all the saints (1:4). Paul's regard for him is shown by his designating him "our beloved fellow servant," "a faithful minister of Christ" (1:7), and "a slave of Christ Jesus" (4:12 mg.). The last designation Paul uses several times of himself, but only once of another besides Epaphras (Phil. 1:1).

S. F. HUNTER

EPAPHRODITUS e-paf-rō-dī'təs [Gk. *Epaphroditos*]. Mentioned only in Phil. 2:25; 4:18. The name corresponds to the Lat. Venustus ("handsome") and was very common in the Roman period, appearing frequently in Greek and Latin inscriptions, sometimes in its contracted form "Epaphras" (see J. B. Lightfoot, *Philippians* [1896], p. 123). Epaphroditus was the delegate of the Christian community at Philippi, sent with their gift to Paul during his first Roman imprisonment. Paul calls him "my brother and fellow worker and fellow soldier." On his arrival at Rome, Epaphroditus devoted himself to "the work of Christ" (v. 30), both as Paul's attendant and as his assistant in missionary work. So assiduously did he labor that he lost his health and was "near to death" (v. 27). He recovered, however, and Paul sent him back to Philippi with this letter to quiet the alarm of his friends, who had heard of his serious illness. Paul sought for him an honorable and joyful reception by the church.

S. F. HUNTER

EPHAH ē'fa [Heb. *'êpâ*–'darkness'].

1. The son of Midian, descended from Abraham by his wife Keturah (Gen. 25:4 par. 1 Ch. 1:33), mentioned again in Isa. 60:6 as a tribe, transporting gold and frankincense from Sheba, thus bringing enlargement to Judah and praise to Yahweh. According to some scholars *'êpâ* is an abbreviation of *'Ayappa*, the Khayappa Arabs of the time of Tiglath-pileser III and Sargon.
2. A concubine of Caleb (1 Ch. 2:46).
3. The son of Jahdai, a descendant of Judah (1 Ch. 2:47).

C. B. WILLIAMS

EPHAH ē'fa [Heb. *'êpâ*]. A dry measure equal to one tenth of a homer, or about two thirds of a bushel. It corresponds to the bath in liquid measure and was the standard for measuring grain and similar articles, since it is classed with balances and weights (Lev. 19:36; Am. 8:5) in the injunctions regarding just dealing in trade. In Zec. 5:6-10 it is used for the measuring utensil itself. *See* WEIGHTS AND MEASURES.

EPHAI ē'fī, ē'fə-ī [Heb. *Q 'êpay, K 'ôpay*; Gk. *Iōphe, Ōphe*]. "The Netophathite," whose sons were numbered among "the captains of the forces" left in Judah after the carrying away to Babylon (Jer. 40:8). His sons assembled at Mizpah with Gedaliah, governor of the scattered Jews, and with him were slain by Ishmael, the son of Nethaniah (Jer. 41:3). The words "the sons of Ephai" are missing from the account in 2 K. 25:23.

EPHER ē'fər [Heb. *'ēper*–'young deer'; Gk. *Apher, Opher*].

1. The second son of Midian, descended from Abraham by his wife Keturah (Gen. 25:4; 1 Ch. 1:33).

2. The third son of Ezra, descended from the tribe of Judah (1 Ch. 4:17).

3. The first of five "heads of their fathers' houses," described as "mighty warriors, famous men" in the half-tribe of Manasseh, who dwelt between Bashan and Mt. Hermon (1 Ch. 5:23f.).

EPHES-DAMMIM ē-fes-dam'im [Heb. *'epes dammîm*]. A place in Judah (also called Pas-dammim in 1 Ch. 11:13) about 21 km. (13 mi.) SW of Jerusalem, where the Philistine armies drew their forces in preparation for battle with the Israelites (1 S. 17:1). It was here that David slew Goliath (17:50).

The meaning of the name is uncertain. The deep red color of the newly plowed earth in this area may have suggested blood (Heb. *dām*), so some scholars would interpret "end [or border] of blood."

EPHESIAN ə-fē'zhən [Gk. *Ephesios*]; **EPHESIANS** (Acts 19:28, 34f.; 21:29). *See* EPHESUS.

EPHESIANS, EPISTLE TO THE. This profound Epistle has been variously described as "the Switzerland of the New Testament," "the divinest composition of man," "the quintessence of Paulinism." The divergent texts and translations of the first verse in the RSV ("To the saints who are also faithful in Christ Jesus") and the NEB ("To God's people at Ephesus, believers incorporate in Christ Jesus") suggest the fluid state in the discussion concerning the historical circumstances surrounding the writing of Ephesians.

I. Contents.–The letter presents few personal data, concentrating rather on the unity of the Church. In what one may call his introductory chapter, the writer sends the customary greetings (1:1f.); states the purpose of God's redemptive plan, the summation of all things in Christ, with anticipation of the final installment of God's saving intention (1:3-14); and concludes with the prayer that his readers may appreciate the large and splendid scope of their new expectation as called saints (1:15-23).

In 2:1–3:13 the writer proceeds to expand on the theme of unity in terms of a common need. All are the children of wrath (2:3); and the Gentiles, who lacked all ability to locate God, find themselves the object of God's search, brought from death to life (2:1-10). Their common need introduces them to a common hope. This hope they share with their Jewish comrades, who also have access to God the Father through one Spirit on the basis of the cross of Jesus Christ, which breaks down all walls of partition (2:11-22). The apostolic and prophetic ministry of the early Christian Church, and especially that of Paul, who transferred his attentions from Jewish to gentile quarters, undergird the fact of the Church's unity in Christ. This ministry is part of God's plan (3:1-13). A prayer that the Church may see the significance of the common grace she enjoys in her common gospel paves the way (3:14-21) for a consideration of the second main portion of the letter, that the Church shares a common walk (4:1–6:20).

To ensure the success of her calling, the Church has been endowed with various instruments of edification, such as apostles, prophets, evangelists, shepherds, and teachers, so that through a common doctrine she might walk a common life (4:1-16). This common life is displayed in proper attitudes toward one another, for contrary patterns of behavior destroy the unity of the fellowship (4:17-32). Specifically, the Christian must shun the works of darkness and thus reflect his understanding of God's redemptive purpose (5:1-18). In their relations with one another — husbands with wives, parents with children, and masters with slaves — the members of Christ's body express their understanding of the unifying lordship of Jesus (5:19–6:9). United in her common arsenal (6:10-17), the Church enjoys her fellowship of prayer (6:18-20). A reminder of the unity between the apostles and the rest of the Church is signaled by the reference to Tychicus (6:21-22). The closing doxology impresses on the readers the supreme unifying force — love (6:23f.).

II. Authenticity.–Debate about the authenticity (Paul's authorship) of Ephesians was initiated in England by E. Evanson in 1792 and gained momentum in Germany under the searching criticism of W. M. L. de Wette and F. D. E. Schleiermacher. The trend continued on the Continent and in the United States; but British scholars, with the notable exception of J. Moffatt, have in the past largely supported Paul's authorship of Ephesians. At present, national lines in the discussion are largely blurred, and scholars from every quarter are urging reconsideration of both sides of the problem.

A. Difficulties for Pauline Authorship. Despite the evident affinities with Pauline theology, other aspects of thought in the Epistle have led to skepticism regarding its authenticity. C. L. Mitton (*Epistle to the Ephesians*), largely following E. J. Goodspeed, lists twelve such objections. The principal arguments are these:

(1) Such unquestionably Pauline letters as 1 and 2 Corinthians and Galatians specify individual congregations alongside discussion of the Church catholic. In Ephesians the Church appears as the "mystical" body of Christ, and all traces of a more fluid usage have vanished.

(2) The observation in Eph. 2:20 that the Church is "built upon the foundation of apostles and prophets" rings with a strange sound after the statement in 1 Cor. 3:11: "No other foundation can anyone lay than that which is laid, which is Jesus Christ." F. J. A. Hort, who strenuously defended the genuineness of Ephesians, admitted that this variation is embarrassing to the defense.

(3) Whereas in Paul's time the controversy between Jews and Gentiles can hardly be called settled, in Ephesians the position of the Gentiles is taken for granted. As Goodspeed observes, "There is no room for any Jewish Christianity in the picture. Christianity is now definitely a gentile religion" (*Key to Ephesians,* p. v). Ephesians, moreover, is unique in asserting that a principal object of Christ's redemptive work is the reconciliation of Jews and Gentiles.

(4) That the immediacy of the second coming of Jesus is a large factor in Paul's thought is evident from a cursory examination of his letters. Even Philippians, regarded by many as Paul's last Epistle, affirms that the Lord is near (4:5); and the earlier Thessalonian correspondence reflects the problem Paul had with his congregations on this subject. Ephesians, on the other hand, lacks the note of urgency sounded in Col. 3:4. The prospect of a long period of development is anticipated in the words, "To him be glory in the church and in Christ Jesus *to all generations,* for ever and ever. Amen." (Eph. 3:21).

(5) Connected with this approach to the Second Coming is the doctrine on marriage. In view of the expectation

of an early return of Jesus Christ, Paul was reluctant to see his Christians entangle themselves in the cares of life engendered by the responsibilities of marriage (see, e.g., 1 Cor. 7). In Ephesians marriage is elevated to such a position of honor that it becomes a symbol of the relationship between Christ and His Church. Mitton observes: "If the different attitudes towards the Second Coming can be reconciled as representing an earlier and a later stage in Paul's own experience, so probably can this change of attitude toward marriage. But many feel that the change is so great as to point to a different author rather than to a later phase in the life of the same author" (*Epistle to the Ephesians*, pp. 22f.).

(6) With respect to Eph. 6:4 Goodspeed writes, "The injunction of 6:4, to bring their children up with Christian training and instruction, is hardly like Paul; all he had to say on it in Col. 3:21 was, 'Do not irritate your children.' For Paul, expectations of the return of Jesus as the Messiah and of the establishment of God's kingdom are still too vivid and imminent to warrant the projection of long-term programs of religious education" (*Key to Ephesians*, p. vii). As Mitton observes, "The discipline of children would, of course, take on new importance as the expectation of an early end to all things diminished" (*Epistle to the Ephesians*, p. 23).

B. Similarity of Ephesians and Colossians. Those who favor the traditional authorship (see III below) attach great weight to the similarity of Ephesians and Colossians. As Percy admits, however, if both letters are Paul's, they must have been written within a very short time of one another. But this insistence poses difficulties, for, in answer to T. Zahn's challenge (*Intro. to the NT* [Eng. tr. 1909], I, 501), similar words and phrases are employed to express completely different concepts. In Col. 1:25 Gk. *oikonomía* is used in the sense of "assigned task"; in Eph. 1:10; 3:2, 9 of God's plan of redemption. Even more striking is the contrasting use of the Gk. *mystérion*, used in Eph. 1:9; 3:3f., 9; 6:19 (in view of the total context) with reference to the unity of Jews and Gentiles in benefits of salvation; in Col. 1:26f.; 2:2; 4:3, it is the mystery centered in "Christ, the hope of glory." Eph. 5:19f. appears to be a conflation of Col. 3:16f. If Paul had written Eph. 5:20 shortly after Col. 3:17, is he likely to have altered his own thought while retaining substantially the same wording? What occurs is exactly what might be expected from a writer who recalls a striking sentence or phrase without being very concerned about its context. Hence, he connects "giving of thanks" with *pánta*, which in Colossians properly goes with the clause immediately preceding. In Colossians angelic powers are in the main morally neutral, and Christians are cautioned not to substitute them for Jesus Christ as the means of contact with God; in Ephesians, however, they are an abiding source of evil.

The Gk. *apokatallássō* occurs only three times in the NT, in Col. 1:20, 22, and Eph. 2:16. Moffatt (p. 377) observes that in Colossians the word is used to describe the reconciliation of supernatural powers and of sinners to God, whereas in Ephesians the accent is on the new relation between Jews and Gentiles. Moreover, in Colossians God is the subject of the reconciliation, while in Ephesians it is Christ who takes the initiative.

A further impediment to common authorship of Colossians and Ephesians is posed by the divergent usage of the Gk. *plḗrōma*, found four times in Ephesians (1:10, 23; 3:19; 4:13), twice in Colossians (1:19; 2:9), and a total of six times in Romans (11:12, 25; 13:10; 15:29), 1 Corinthians (10:26), and Galatians (4:4). In Col. 1:19 and 2:9 the word gives expression to a solemn affirmation that the sum total of divine character inhabited the human personality of Jesus, to use Mitton's phrase. This usage represents a development over that in Romans, 1 Corinthians, and Galatians, and this fresh nuance should be reflected in Ephesians, a letter alleged to have been written so shortly after Colossians. Instead, Eph. 3:19 echoes the phrase in which the word occurs in Colossians but uses it in a different sense from Colossians. Indeed, three of the four uses of the word in Ephesians are strange to the reader of the other Pauline letters.

Finally, in Colossians the Christians are warned not to worship "principalities or authorities" (1:16; 2:10). These supernatural hosts become in Ephesians spiritual enemies against whom the Christian soldier must marshal his finest arsenal (1:21; 6:12). These differences between the thought and diction of Colossians and that of Ephesians are not in themselves decisive enough to establish the non-Pauline authorship of Ephesians, but many scholars feel that if Ephesians were written shortly after Colossians, these variations pose an almost insuperable obstacle to common authorship of these two Epistles.

C. Style and Vocabulary. Arguments based on style and vocabulary are apt to be deceptive in dealing with a mercurial personality like that of the apostle Paul (see esp. Cadbury). Yet there are impressions that cannot be ignored. W. R. Inge, according to A. M. Hunter, confessed that after reading the Epistle in English he was sure Paul wrote it, but when he read it in Greek his doubts began to awaken. One cannot gloss over the fact that Ephesians, when viewed in the light of familiar Pauline style, is like a duel with heavy swords compared with a contest of rapiers. Absent is what W. Sanday and A. C. Headlam call the "rapid, terse, and incisive" movement of the great letters. Paul is quick, agile, and nimbly allusive. Ephesians is massive and ponderous with the pressure of heaped synonyms, the piling of defining genitives, and frequent amplifications of individual words (e.g., 2:7; 3:12) and thoughts (1:17b is repeated in v. 18a; 1:22a repeats 1:20b-21). As a syntactical salmagundi, the marvelous spiral of Eph. 1:3-14 is probably without rival in Greek literature. But as K. G. Kuhn points out, it is not strange to the Qumrân texts, which also offer genitival constructions parallel to some in Ephesians (cf. Eph. 1:19 and 1QH 4:32).

Of the lexical phenomena, the occurrence of Gk. *diábolos* (4:27; 6:11) in place of the usual *satanás* is striking, although it should be noted that the two words are apparently quite often used interchangeably (e.g., Mt. 4:1-11). Nor should the peculiar transposition of Eph. 6:12 from the more usual "flesh and blood" to "blood and flesh" be cast into a main anchor for non-Pauline authorship. Percy may be right in suggesting that the writer here avoids collision of two *sigma*s. (Critics of this view usually ignore Percy's own footnote, which is at pains to state that 1 Cor. 6:16 and Eph. 5:31 indeed admit the conjunction of two *sigma*s, but in citations of the LXX [p. 184].) More to the point is the use of the Gk. *hágioi* (3:5). As a designation of the apostles, it is the typical usage of an age that is reassessing itself in the light of past authority (cf. 2 Pet. 3:2 and the shorter appendix to Mark's Gospel). The use of this adjective also involves in this passage a surprising modification of Col. 1:26, which states that the mystery is "now made manifest to his saints." Ephesians limits the saints to the "*holy* apostles and prophets." The Gk. *en toís epouraníois* (1:3, 20; 2:6; 3:10; 6:12) appears to be a mannerism with the writer.

D. Problem of the Addressees. Further difficulty in maintaining Pauline authorship for Ephesians is encountered when the attempt is made to locate the addressees in Paul's chief field of missionary labors on the "third

missionary journey" as described in Acts. Few scholars are prepared to defend the variant reading *en Ephesō* in 1:1, for the tone of the letter is too impersonal. Paul spent from two to three years in Ephesus, and one would expect some personal greetings in a letter addressed to the congregations there. On the contrary, the recipients appear to be unknown to the writer of Ephesians (1:5; 2:11; 3:2; 4:21). The writer's statements might be interpreted as ironical, but the rest of the letter is so unlike the tone of the Corinthian correspondence, in which such irony finds a proper place.

Scholars writing in defense of the authenticity, therefore, usually follow Archbishop Ussher's view that Ephesians is an encyclical addressed to a circle of churches. According to J. Armitage Robinson, the opening sentence contained a space into which the name of each church in turn might be read. Unfortunately for this theory, several important MSS lack not merely the place name, but the preposition *en* as well. Others suggest that the apostle produced several copies, each with a blank in which the courier could write the name of the receiving congregation. As Percy points out, one must be on guard against reading modern practices into the ancient world. Paul had no duplicating machines and the various congregations would not have been pleased to receive form letters.

Robinson also espouses the popular view that Ephesus was one of the primary recipients, thus explaining the subsequent attachment of the title "To the Ephesians," and the reading "in Ephesus" (p. 11). Fatal to this view, again, is the lack of personal references, which would certainly be forthcoming even in a circular letter, especially to a well-known circle of readers. Moreover, one is forced to explain the absence of "in Ephesus" from such authoritative MSS as p^{46}, B, and ℵ. Percy senses the difficulty; he locates the addressees in a circle of churches whose members had had no personal relations with the apostle because of their recent conversion and are being reminded to use the gifts they have received through their baptism. But the context of the letter does not lend support to this view, for advice to new converts on such topics as common meals between Jews and Gentiles and the holy eucharist is missing. The admonitions of the Epistle, especially 4:17-24, suggest that the writer is coming to grips with the moral relapses of Christians who are failing to consider sufficiently the meaning of the truths they have known for some time. Feine (p. 196) therefore takes refuge in the view that the letter is addressed to churches in the area around Ephesus, but that Ephesus was not one of the recipients. Yet on this view the Ephesians are ignored by the apostle (unless he sent them a letter of which we are totally ignorant), and the initial problem still remains: How may one explain the lack of personal concern in a letter addressed to an area where the apostle was so well known? Even Colossians, addressed to a congregation not mentioned in Acts, conveys a warmer note (cf. Col. 4:10-18).

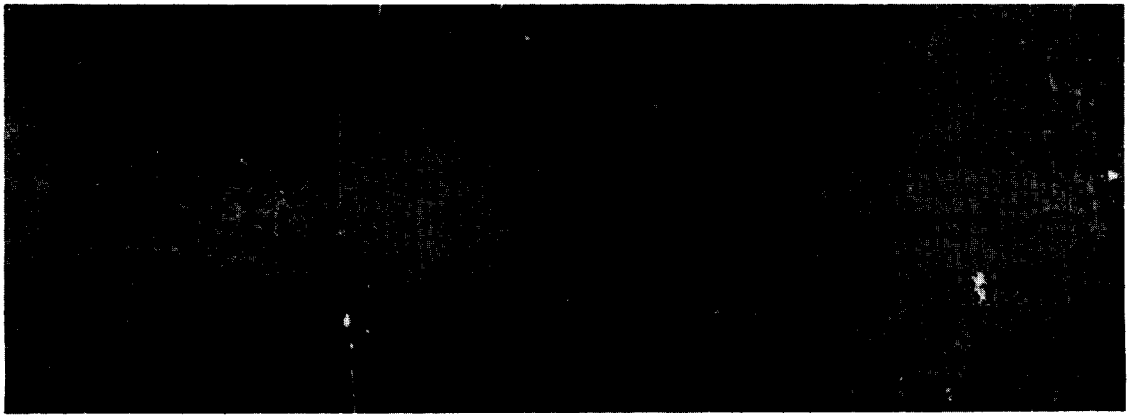
Marcion's view that Ephesians is the letter to the Laodiceans mentioned in Col. 4:16 found support in A. Harnack, who suggested that the name Laodicean was very early expunged because of the indictment in Rev. 3:14-22. But the church at Ephesus also receives a serious indictment (Rev. 2:4-7), and it is difficult to conjecture what reasoning prompted the deletion of the one name in preference for the other. Ancient monarchs chiseled off the exploits of their predecessors, but where is the evidence for this type of erasure in the early Church? Masson's amplification of Marcion's view, including the interpolation of 4:16 in Colossians, lacks the credible grace of simplicity.

III. Origin and Purpose.–It is indeed possible to meet singly each of the objections to authenticity with a solid defense; yet one should recognize that the combined challenge presented by the divergences in theological thought, by the differences between Ephesians and Colossians (assuming that the latter epistle is Paul's), by the style and diction, and by the difficulties concerning the addressees, is indeed formidable; and a serious hearing at least must be given to views that attempt to account for the data in other ways.

The puzzling conjunction of Pauline terminology and Pauline thought, in a letter that bears so many non-Pauline marks, prompted E. J. Goodspeed to undertake a study in which the correspondence between Ephesians and the nine generally accepted Pauline letters was carefully documented. From his study Goodspeed concluded that in all probability Onesimus, former slave and perhaps bishop of Ephesus (A.D. 110-117), was inspired by the publication of Luke-Acts to begin a search for Paul's letters, and that as an introduction to this collection Onesimus wrote Ephesians, a kind of patchwork composed out of Paul's genuine letters. Goodspeed was anticipated by J. Weiss in this view that the collector of Paul's letters is also the composer of Ephesians.

Taken as a whole, Goodspeed's theory is unconvincing

This Chester Beatty papyrus (p^{46}) is one of the earliest extant texts of Ephesians (*ca.* A.D. 200). Note that while the heading is *pros ephesious*, "to the Ephesians," in v. 1 the *en Ephesō*, "in Ephesus," of later MSS is missing (University of Michigan Library)



for the following reasons: (1) the connection proposed between Ephesians and Acts overemphasizes the influence of a book and ignores personal relationships; (2) it is highly improbable that the letters of so influential a teacher as Paul should have lain in disuse for several decades; (3) Ephesians includes too many non-Pauline elements to serve as an introduction to Pauline thought and practice; (4) all trace of the primacy of Ephesians in the sequence of Paul's letters is absent from the MS tradition; and (5) the writer does not depend nearly so heavily on the other Pauline letters as he does on Colossians, a fact obscured by Goodspeed's method of citing parallels. Yet, in its main points, Goodspeed's presentation supports the view that many scholars have endorsed.

The detailed chart of seventy-three pages that Goodspeed submits could, of course, be interpreted as evidence for Paul's echoing of his own writings; but the admixture of non-Pauline elements noted previously suggests to many a later Paulinist who has consciously modeled his presentation of the faith after the pattern of Paul's letter to the Colossians, and partly after the eight other generally accepted Pauline letters. If this is so, the author's aim is to make Paul's letter to the Colossians relevant to his own time. Hence he is not constrained to trace slavishly the theological contours of his master and in the manner of a homiletician offers fresh interpretation and application of his "text." Lack of reference to the eucharist in his model Colossians would help explain its absence in Ephesians. The perplexing fluctuation of 1st and 2nd person (see esp. 2:1-3) becomes explicable, and so does the change of emphasis from Paul's view of Christ as the foundation of the Church to the view of Ephesians that the apostles and prophets are its substructure. Assuming the validity of this view of a later authorship, the writer invokes the authority of the "holy apostles," including that of the apostle Paul, and thereby submerges his own identity. The addition of the phrase "Christ Jesus himself being the chief cornerstone" thus tips the writer's hand. Knowing full well what 1 Cor. 3:11 said, he is at pains to avoid what might appear to be a contradiction. That the writer includes almost verbatim the reference to Tychicus made in the first edition (Col. 4:7f.) need not be interpreted as an attempt to "lend *vraisemblance* to the writing" (Moffatt, p. 393). If this is a later Paulinist, it is his own signal that we are not dealing with an attempted "forgery" but a posthumous revision in the direction of a new type of early Christian literary genre.

If the question is raised concerning the admissibility of a pseudonymous writing in the sacred canon, it is well to note that the Holy Spirit's activity in the 1st cent. is not to be prejudged by contemporary canons of publication, which require more precise reference to sources and their contents. Sufficient precedents for pseudonymous authorship are at hand in such books as Daniel, the Testaments of the Twelve Patriarchs, Enoch, Epistle of Jeremiah, Epistle of Aristeas, and others. Luke himself reconstructs the kind of letter Claudius must have sent to Felix (Acts 23:26-30), thus indicating the literary freedom taken in antiquity. Neither the value nor the authority of the Epistle then is weakened by uncertainty concerning its authorship.

From the viewpoint of apostolic doctrine there is no hindrance to such a conclusion, for the Spirit's gifts are varied and His choice of instruments is not subject to human judgment. On the other hand, where false doctrine was an issue Paul warned his readers not to be taken in by a letter purporting to be his (2 Thess. 2:2; 3:17). For the recipients of Ephesians there would be no such problem. The apostle was already dead, and there could be no suggestion of underhanded methods, but rather a reaffirmation of Paul's instruction in accordance with the needs of the hour; hence the shifts in theological accent, but not conflict with apostolic doctrine.

The writer himself suggests the broader range of inspired channels in the early Church (Eph. 4:11) and perhaps in these words signs his own right to confront the Church of his time with the authoritative claims of the Head of the Church. That one who was capable of such high theological flight should have destroyed his identity for posterity is not inexplicable. Like the four Evangelists, like the author of Hebrews, he traded fame for nameless greatness. Precisely because of the Spirit's guidance, there is lacking both the inferior secondary increment often evident in a mere imitator's work and slavish adherence to the model under revision. That the letter should have been identified as Paul's without apparent dissenting vote is a proof not only of the writer's inspired orthodoxy, but a tribute to his understanding of the unity of the Church.

The many associations with Qumrân noted by K. G. Kuhn, the rabbinic treatment of Ps. 67:19 LXX (Eph. 4:8f.) and Isa. 57:19 (Eph. 2:13-17), and the direct address to the Gentiles in 2:11f. point to a Jewish convert. The writer's view of the universality of the new Israel of God and the fact that this new Israel is predominantly gentile would help further to account for the fluctuation between 1st and 2nd plural in 2:1-3.

Yet, when all is said, scrupulous scholarship must confess that the many lacunae in the history of early Christian literature admit of only tentative conclusions in the matter of Ephesians. The History of Religions school, which emphasized too strongly the influence of Hellenistic thought, has been compelled to learn from Qumrân. If the present state of evidence seems to favor the view that Ephesians is more probably post-Pauline, future discoveries and more detailed investigations yet to come may move the pointer more decisively in the opposite direction.

The best case for the traditional view of Pauline authorship is made by D. Guthrie (pp. 490-508).

(1) Linguistic and stylistic arguments. Guthrie cautions about dogmatizing on what expressions Paul could or could not have used and warns against the methodological hazard of conclusions based on questionable dating of "so-called later first-century books." The stylistic variations may be an indication of "Paul's versatility." If Ephesians is the work of someone else, the literary artistry displayed in the handling of Pauline themes is "extraordinary" (Guthrie, pp. 491f.).

(2) Literary arguments. Criteria of dissimilarity are not sufficiently refined to dissociate Ephesians from Paul. In fact, "a conscious imitator would have endeavoured to keep as close as possible to his model," but Ephesians displays both "spiritual and intellectual power" and "freedom from a slavish reproduction of Colossians" (p. 494). Furthermore, why should a later Paulinist have chosen Colossians, rather than another Epistle, as his base? Since both Epistles identify the body as the Church (Col. 1:18; Eph. 5:23), the alleged difference between Eph. 4:15f. and Col. 2:19 is untenable. Words like Gk. *mystérion* (see Rom. 16:25f.) and *oikonomía* could be used in various senses by the same person. The conflations are more probable on the assumption of Paul's authorship, for an imitator could easily have consulted Colossians. Mitton's two tests for discriminating between a writer and his imitator oversimplify literary data. Similarity in subject matter may well account for concentration of allusion to earlier writings into certain groups, and the reproduction of "striking and memorable phrases" is subject to a variety of factors. The personal references in Eph. 3:2, 4, 8 are not "theatrical," but accent Paul's dependence on the

grace of God; an imitator would hardly have made Paul, whom he admired so ardently, call himself "the least of the apostles" (Guthrie, pp. 492-502).

(3) Historical arguments. The theme of eliminating a spiritual barrier between Jews and Gentiles argues rather for Pauline authorship. After A.D. 70 a reference to the destruction of the temple would have borne much more force. The writer's self-identification as a "child of wrath" (2:3) does not rule out the apostle, who identifies himself in a universal expression with his readers and in v. 11 says "you Gentiles." Besides, both Jew and Greek are in "desperate need of God's mercy" (v. 4; Guthrie, pp. 502f.).

(4) Doctrinal arguments. A chain is as strong as its weakest link, and the support for non-Pauline authorship must be assessed analytically. Ephesians does not belabor the Christian ministry as a later "ecclesiastic" (Goodspeed) would have done. Eph. 2:20 is not out of harmony with Paul's frequent claims for apostolic authority. The description "holy" in 3:5 must not be confused with modern connotations. The term is also applied by Paul to believers in general, as in Col. 1:26. In addition, the term "prophets" suggests a more primitive period of the Church. Inconsistencies in expression of Christology are apparent also, e.g., in 1 Cor. 8:6. Goodspeed's argument based on Christ's descent into Hades founders on the questionable nature of his assumption that Rom. 10:6f. excludes the doctrine of Eph. 4:9. The doctrine of the unification of Jew and Gentile is less explicable in a later Paulinist who would be expected to stress the main Pauline themes of redemption rather than one of the subsidiary results of the death of Christ. Paul's high view of marriage in Ephesians is not inconsistent with his bachelor status. The admonition to fathers on rearing their children is scarcely indicative of "'a long-term policy of religious education' [Goodspeed]" (Guthrie, pp. 503-507).

(5) Conclusions. The self-testimony of the Epistles deserves greater consideration than is usually accorded it by exponents of pseudonymous authorship, insists Guthrie. Authorship by Paul rather than a later self-effacing Paulinist is more credible. It is improbable that the letter is to be traced to an amanuensis, for he would not have had access to all Pauline Epistles with which Ephesians has contacts; he would have adhered more closely to the phraseology of Colossians and would "hardly have enlarged upon the ethical sections as the author of Ephesians has done"; in addition, the author's references to himself become inexplicable, and "it is difficult to find an adequate motive for the apostle to adopt so unusual a procedure" (Guthrie, pp. 507f.; cf. van Roon, pp. 91-94).

IV. Date.–Allusions to this Epistle are indistinct in 1 Clement (36:2 [Eph. 4:18]; 59:3 [Eph. 1:18]; 46:6 [Eph. 4:4-6]), but more definite in Ignatius (Smyrn. 1:2 [Eph. 1:23; 2:16]; Polyc. 1:2 [Eph. 4:2f.]; 5:1 [Eph. 5:25]). In Polycarp the reproduction is even more precise; compare Eph. 2:8 with Polyc. Phil. 1:3, and 4:26 with Polyc. Phil. 12:1. If the letter is not Paul's, a date around A.D. 90 (perhaps a decade earlier if 1 Peter is dependent on the Epistle) would be perfectly plausible. The removal of the wall of partition between Jews and Gentiles (2:14) may be an allusion to the destruction of Jerusalem in A.D. 70. The Church has become predominantly gentile, and in place of fear of a relapse into Judaism (cf. Phil. 3, one of Paul's last letters) the temptation of the readers to fade back into pagan ways looms large. If the letter is from Paul's hand, its connection with Colossians and Philemon would point to Paul's imprisonment in Rome, *ca.* A.D. 61. (See Percy on the problems associated with the date and place of origin, pp. 467-474.)

V. Text.–The text of Ephesians has in general enjoyed an accurate transmission. The chief problem, as already noted, is in 1:1, the reading *en Ephesǭ*. Papyrus 46, the first hand in both Codices Vaticanus and Sinaiticus, 1739, and ancient codices known to Marcion and Origen omitted the words. The Gk. *toís hagíois toís oúsin kaí pistoís en Christǭ Iēsou* is rendered by Moffatt, "to the saints who are faithful in Christ Jesus." The Epistle does not, however, stress faithfulness but unity in the faith. The association of Gk. *ekklēsía* with *hágioi* in Ps. 88:6 LXX suggests rather that the writer of Ephesians sees in the Christian an extension of the Israel of old. The members are saints, but they are qualified as believers in Jesus Christ. The Hebrew word underlying the LXX term is also applied to its community by the Qumrân sect (cf. 1QH 4:24f., where, however, angels may be meant; 11:11f.; and, if the restoration is correct, 6:13). The title "To the Ephesians" was probably added in the 2nd cent. through association of Tychicus with Ephesus (2 Tim. 4:12). Some place name was felt desirable, and the name Ephesus was chosen for reasons unknown.

VI. Theology. Beyond question this Epistle fits within boundaries largely familiar in other Pauline letters. In the following paragraphs the main parallels with other Pauline Epistles (except Colossians, because of the more obvious dependence) are listed.

The dominant note is God's design before the foundation of the world to work out a plan for men to share a family relationship with their Creator (Eph. 1:4f.; cf. 1QH 9:29-31; 15:13-15). The personal accent in this plan is also expressed in Rom. 8:28-30. God's own sovereign will is the determining factor (Eph. 1:5, 9, 11; cf. Rom. 9:19-26). Eph. 1:4, however, introduces the thought that election, which took place prior to creation, was *in Christ*. We are not the victims of an inscrutable fate; we are left not to the mercy of astral vagaries, but to the concern of the Father (1:2f). For the sovereign will of God is qualified by love, the principal motivating cause of man's redemption (Eph. 1:4f. [following Moffatt and RSV]; 1:7; 2:4). Such thought is customary in the Johannine writings; but also in Romans (5:8) Jesus' death is a demonstration of God's love, and according to Rom. 8:39 God's love in Christ Jesus undergirds the Christian's hope. Apart from God's controlling purpose the death of Jesus would lack significance. But because this death is God's way of demonstrating His kindness toward man, Jesus is the Christ and His blood may be said to be the effective means of redemption (Eph. 1:7). From the standpoint of OT religion, His death restores contact between God and especially the Gentiles (2:13); in Romans (3:25 and 5:9), too, Paul capitalizes on the apparent disaster of Jesus' death. The immediate goal of the death of Jesus is to unify Jews and Gentiles by eliminating the law as a criterion of a proper relationship with God (Eph. 2:16). Thus the writer moves on the plane of thought expressed in Rom. 5:10, where the accent is on man's reconciliation with God.

A further objective of the redemptive process in Jesus Christ is the praise of God (cf. 1QH 13:13; 15:13-15). Demonstration of God's extraordinary kindness in connection with Jesus Christ is to be made to succeeding ages (Eph. 2:7); this echoes the thought of Rom. 9:23. The praise of God is actualized as the Christian lives a life of good works. These good works are not an afterthought, nor a human contribution in return for the divine favor; they are integrally related to the redemptive design (God has prepared them beforehand, Eph. 2:10) and are viewed as divine conferments (cf. Phil. 2:13) — the Christian exercises the privilege of "walking in them" (Eph. 2:9f.). This new behavior is in contrast to the addressees' former way of life in "the lusts of the flesh," when they followed the dictates of their flesh and mind, i.e., their determination to live independently of divine

direction (2:3f; cf. Gal. 5:16). It is made possible through union with Christ in His resurrection and enthronement (Eph. 2:6f.; cf. Rom. 8:10f.).

By thus reiterating the indicatives of redemption, the writer is able to present his practical ethical program inside a theological imperative. Union with God makes possible a fellowship guaranteed by "lowliness and meekness" (Eph. 4:2), honesty and respect for one another's property (Eph. 4:25-28; cf. 1 Thess. 4:1:1), and other desirable attitudes (4:29-32). The experience of God's love in Christ provides an objective criterion for strengthening proper impressions of the dignity and worth of fellow human beings, especially members of the opposite sex. Respect for personality rather than self-indulgence will indicate that one has learned to be an "imitator of God" (Eph. 5:1-20; cf. Gal. 5:19-23; 1 Cor. 6:9-11). Thus husbands and wives have a unique opportunity to indicate their understanding of the relation between Christ and His Church. Children are to obey their parents "in the Lord" (Eph. 6:1), and fathers are to bring up their children "in the discipline and instruction of the Lord" (6:4). Slaves are to serve their masters as though they were given their orders by Christ (6:6). In brief, the consciousness of an intimate connection with their heavenly Father is to trigger the Christians' responses to any social situation or demand. In the warnings against fellowship with the works of darkness (Eph. 5:7-14; cf. 2 Cor. 6:14) and the exhortation to reprove the guilty, we are perhaps justified in hearing echoes of 1QS 5:24–6:1; the same line of thought may underlie Eph. 4:26. In any event, the dualism light *v.* darkness is not cosmological but ethical, as at Qumrân (see esp. 1QS 3:13–4:26).

In competition with the objectives of God is the demonic world (Eph. 6:12; cf. 1 Thess. 3:5; 1 Cor. 7:5; 2 Cor. 2:11), whose headquarters are in the heavens (Eph. 2:2; 6:12; cf. Job 1:6; Zec. 3:1) and who govern the lives of unbelievers (Eph. 2:2). Against these celestial adversaries the Christian must fight valiantly (6:13-18; on the light shed from Qumrân on 6:10-20 see *TDNT*, V, 297-300 [Kuhn]). The outcome of the battle is never seriously in doubt, for Christ, as the Savior of the body (Eph. 5:23), is supreme over all rule, authority, power, and dominion (1:21; cf. Phil. 2:9); He is the head of all creation (Eph. 1:22). His achievements are ratified to the Christian's own satisfaction by the sealing of the Spirit, who is a pledge of the coming inheritance (1:13f.; cf. 2 Cor. 1:22; Gal. 3:2). He brings wisdom and insight into God's purpose (Eph. 1:17-19; cf. Rom. 9:23) so that the Christian's hope may remain alive. He supplies the Church with appropriate instruments of the revelation of His intent, namely apostles and prophets (Eph. 3:5), and fortifies the Christian to appreciate the greatness of God's redemption (3:16-19; cf. Rom. 9:23). Therefore the Christian must carefully avoid "grieving the Holy Spirit" (Eph. 4:30; cf. 1 Thess. 5:19). The Spirit prompts the Christian to proper worship (Eph. 5:18f.; cf. 1 Cor. 14:15) and equips him with a powerful offensive weapon, the Word of God (Eph. 6:17). The basic theme of election to unity is never left out of sight: that the Christian may not isolate himself he is reminded to pray "in the Spirit" and to make "supplication for *all* the saints" (6:18).

The Spirit makes possible the overarching unity of the Church through the missionary activity of the apostle Paul (3:1-13; cf. Rom. 12:5). The gentile Church is not a new or sectarian development but in continuity with Jewish history (Eph. 2:14f.; cf. 2 Cor. 8:1-7; Rom. 15:25-27). This Church is the body of Christ, the fulness of God, who has given Christ to the Church as the head of all things (Eph. 1:22f.). As God's new creation (2:15) it is the temple of the Spirit (2:22; cf. 1 Cor. 3:16) and the bride of Christ (Eph. 5:22-33; cf. 2 Cor. 11:2). At the same time the Church, being the *plḗrōma* or fulness of Jesus Christ, constitutes the Second Adam (Eph. 1:23; 2:15), who as God's creation is designed for good works (2:10; cf. 4:24; 2 Cor. 9:8). Thus ecclesiology becomes a function of Christology, and the Church's mission to the world is rooted in her understanding of the lordship of Christ.

The unity of the Church does not depend on resolutions of men; it is a gift of God, who gives one Lord, one faith, one baptism, and is Father to all who share the right of sonship (4:3-5; cf. 1 Cor. 8:6; 10:17; 12:13). The unity is to be maintained, not artificially created (Eph. 4:3). The peace of the Church is interrupted when Christians fail to exercise properly the gifts of service dispensed by Jesus Christ (4:1-3; cf. 1 Thess. 2:12). These gifts are designed for mutual edification and personal spiritual growth. Some, like the apostle Paul, who was given the opportunity (Gk. *cháris*) to preach the gospel to the Gentiles (3:7f.; cf. Gal. 1:16), are apostles, others prophets, others evangelists, and still others pastors and teachers (Eph. 4:11). William Tyndale has best caught the objective: "that the sainctes might have all thinges necessarie to worke and minister with all, to the edifyinge of the body of christ" (4:12; cf. 2 Cor. 12:19).

Mention of the holy eucharist is singularly absent from this letter. The sacrament of holy baptism, however, receives strong emphasis, in the reference to the sealing of the Spirit (Eph. 1:13; 4:30), and specifically in 4:5 and 5:26. Reitzenstein and Bultmann see in 5:14 a Gnostic call to the soul, but K. G. Kuhn (in *NTS*; cf. A. M. Hunter, *Paul and His Predecessors* [rev. ed. 1961], pp. 38f.) convincingly argues in favor of an early baptismal hymn and sees associations with Qumrân.

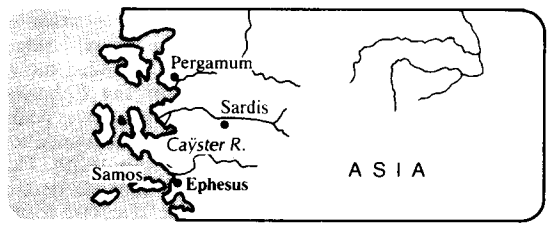
F. W. DANKER

EPHESUS

EPHESUS ef'ə-səs [Gk. *Ephesos*–'desirable']. An important seaport city of the Roman province of Asia. In the NT it is mentioned in Acts 18:19-28; 19:1, 17-20; 20:16f.; 1 Cor. 15:32; 16:8; 1 Tim. 1:3; 2 Tim. 1:18; 4:12; Rev. 1:11; 2:1. Since some of the earliest MSS omit Gk. *en Ephesō* ("at Ephesus") in Eph. 1:3, the Epistle to the Ephesians may have been intended as a circular letter rather than specifically directed to the Ephesian church (*see* EPHESIANS, EPISTLE TO THE II.D).

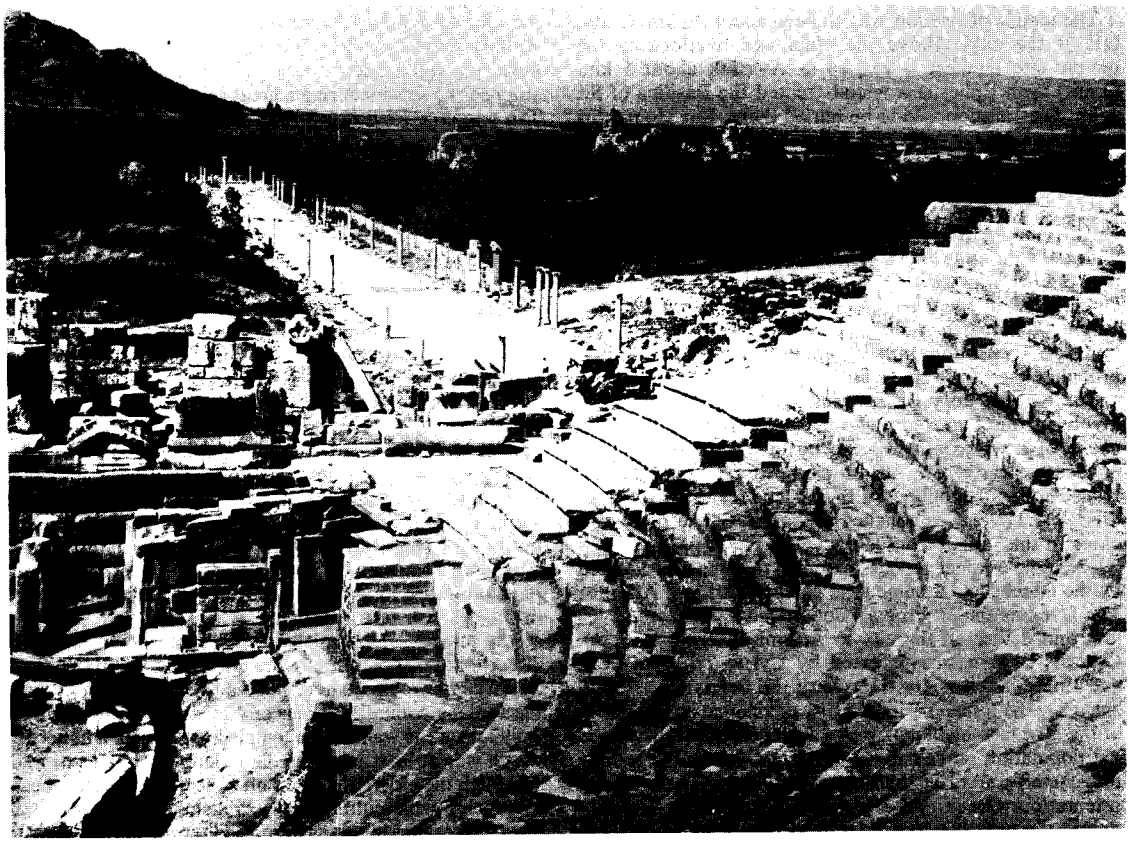


The site of ancient Ephesus is S of the Caÿster River and about 5½ km. (3½ mi.) upstream from where it enters enters the Aegean Sea at the point opposite the island of Samos. Because of the sandy beaches it has been thought that Ephesus was situated on an inlet of the Aegean and that the coastline has receded. J. T. Wood in his archeological campaigns for the British Museum (1863-1872) discovered a continuous stone embankment along the river leading from the city to within a few hundred feet of the coast. This embankment undoubtedly was a part of the abortive plan of King Attalus Philadelphus to deepen the inland waterway (cf. Strabo *Geog.* xiv.1.24). Pliny's statement that "the sea used to wash up to the temple of Diana" (*Nat. hist.* ii.87[201]) may be nothing more than legend or may reflect a very early tradition reaching back several centuries before the Roman period.

The Caÿster is the smallest of four major rivers entering the Aegean from Asia Minor. As long as the inland harbor remained accessible, Ephesus was well situated to become the chief commercial center of western Asia Minor (Strabo, *loc. cit.*), for it had ideally positioned passes that gave immediate access for trade both N and S to the Hermus and Maeander river valleys. The presence of the temple of Artemis (Diana) added to the commercial importance of Ephesus, for two reasons. First, the temple was regarded as sacrosanct throughout the Mediterranean world and thus became the primary banking institution of Asia Minor. Second, pilgrims swelled the population and contributed substantially to Ephesian business, especially during the festivals of Artemis (March-April). So prominent was the city that during the early Christian period the population of Ephesus probably exceeded a quarter million.

Ephesus lay at the intersection of two ancient major overland routes: the coastal road that ran north through Smyrna and Pergamum to Troas (near ancient Troy); and the western route to Colossae, Hierapolis, Laodicea, and regions of Phygia and beyond. Ephesus can also be viewed as the starting-point of a type of postal route (cf. the order of the seven cities of Revelation 2–3) running north to Pergamum and southwest through Sardis to Laodicea.

Greek theater and the Arkadiane Way leading to the harbor at Ephesus (B. K. Condit)



EPHESUS

The city was positioned between two mountainous ridges that run roughly northwest. The western ridge, composed of the Koressos and Astyages hills (also known as Bülbül), forms the background for the Ephesian harbor, while the eastern ridge, topped by the twin peaks of Mt. Pion (also known as Panayır), forms the foundation on which was constructed the theater (Acts 19:29). This theater held more than 24,000 people on sixty-six tiers of seats with a great stage measuring about 35 m. (115 ft.) by 21 m. (70 ft.). The facade was probably built in two periods, the first two levels apparently during the time of Domitian and the third level near the beginning of the 3rd century. Though the theater lies in ruins today, its acoustics are still superb.

Approximately ⅔ km. N of the theater lies the ruins of a great stadium, which probably served for various athletic events. The eastern end may also have been used for gladiatorial battles and wrestling matches with wild beasts.

The great marble main street of Ephesus, the Arkadiane, ran NW from the theater to the harbor and on both sides was flanked by an elaborate colonnade. Included in the remains are great baths, the once magnificent Fountain of Trajan, a second-century Temple of Hadrian, the Odeion or little theater, which served the city as a council chamber, a library linked with the name of Celsus (the opponent of the second-century Christian Apologists), and a great *agora* or marketplace (*see* picture in ACTS OF THE APOSTLES). Carved into the great sidewalk leading to a building on the marble street is the mark of a bare foot, the ancient sign of direction to a house of prostitution — a reminder that Ephesus was a port city with many visitors and sailors. Elsewhere, carved into the steps of the library, is a menorah, an indication of some Jewish presence in the city.

The temple of Artemis was situated about 1½ km. (1 mi.) NE of the city. Above the plain and overlooking the temple site in what is known as Aysaluk about 5 km. (3 mi.) from Ephesus was constructed the Basilica of St. John. John is supposed to be buried there. But Meinardus (p. 73) asks which John, since according to Eusebius (*HE* iii.3) Papias, the famed second-century bishop of Hierapolis, "asserts there were also two tombs in Ephesus, and that both are called John's even to this day." This church erected to the memory of John is not to be confused with the Church of the Virgin Mary in which the Council of Ephesus was held in A.D. 431, when Nestorius was condemned in the *Theotokos* issue. The Church of the Virgin was located slightly N of the Arkadiane and was built on the foundation of an earlier large building, probably used for a museum.

The early history of Ephesus is clouded by a legend involving the Amazons, who allegedly built the city because of its proximity to the birthplace of the mother goddess of earth. *Ca.* 1044 B.C., however, the Athenian King Androclus conquered the Asians (cf. Strabo *Geog.* xiv.1.4; 1.21) and established Ephesus as one of twelve cities in the Ionian Confederacy. As Pausanias indicates (vii.2.6), the oriental goddess native to the area was adopted by the Greeks and assumed the characteristics of Artemis. The Lydians under Croesus conquered Ephesus *ca.* 560 B.C. and dedicated the city to Artemis (Herodotus i.26). Croesus in turn was defeated by Cyrus (*ca.* 546 B.C.), and Ephesus fell under the rule of the Persians.

During the Ionian period the city developed on the slopes of the Koresos highland, while during the Persian period the population moved to the lowlands nearer the temple of Artemis, more in harmony with the Asiatic village orientation. Greek and oriental forces vied for Ephesus during the next two centuries, and it was not until Alexander the Great conquered the Persians in 334 B.C. that

Church of the Virgin Mary in Ephesus (B. K. Condit)

Ephesus fell under Macedonian influence. Apparently on the very night that Alexander was born (356 B.C.) the temple was burned. When Alexander reached maturity he offered to rebuild it at his own expense. The priests, who had already commissioned Dinocrates to rebuild the temple and who did not wish to be under greater obligation to Alexander, politely refused the offer, suggesting that it was not fitting for one god to build a temple to another (cf. Strabo *Geog.* xiv.1.22). M. Parvis notes an interesting shift in coinage after the period from the traditional bee, the symbol of Artemis, to the Greek type of image — the head of Artemis (p. 64).

After the death of Alexander, Lysimachus, one of Alexander's generals, received Asia Minor and sought to move the city to a more defensible position on higher ground within a walled complex. The ruins of these upper fortifications are still evident today. The people refused, so he stopped the sewers during a great rain and flooded the city. The people moved (cf. Strabo xiv.1.21). Lysimachus also constructed a new harbor. He concluded a treaty with Ptolemy of Egypt, and thus an Egyptian influence was begun at Ephesus, especially in religion and the magical arts.

In 281 B.C. Lysimachus fell to Seleucus I, and Ephesus thus came under the control of the rulers who would govern Palestine. In 190 B.C. the Seleucid ruler Antiochus the Great was defeated by the Romans at the Battle of Magnesia with assistance from King Eumenes II of Pergamum. Pergamum was accordingly given control of Ephesus (Livy xxxvii.36-45). When in 133 B.C., by testimentary disposition of King Attalus III of Pergamum, Asia was given to Rome and thereby became a Roman province, Pergamum, not Ephesus, was made the capital. With the help of Mithradates of Pontus, Ephesus in 88 B.C. rebelled and slaughtered the Romans even in the hitherto inviolable precincts of the temple of Artemis. The rebellion was stopped by Sulla but Ephesus was not finally subjected until 41 B.C. by Mark Antony. During the reign of Caesar Augustus, Ephesus began to flourish. It continued to expand until the Goths sacked the city and burned the temple in the last half of the 3rd cent. A.D.

The temple of Artemis was first constructed under the direction of Chersiphron in the 6th cent. B.C. on the site of an earlier worship center. During the battle with Croesus the Ionians committed their city to Artemis and symbolically joined the walls to the temple by means of a holy cord, which was at least seven stadia in length (Herodotus i.26). Although the city fell, a tradition concerning Artemis began to develop which ultimately established the temple as the most sacrosanct in the eastern Mediterranean world. After the fire of 356 B.C. (allegedly set by Herostratus [Strabo,

Geog. xiv.1.22]), because of lack of funds and the Ephesians' proud refusal of Alexander's offer, the temple was not fully restored for over two centuries. This later temple, according to Wood's reconstruction, measured about 128 m. (420 ft.) long and 73 m. (240 ft.) wide. The roof was about 18 m. (60 ft.) high and was supported by 117 columns (not 127 as Pliny suggests). Its magnificence and beauty earned it a place among the seven wonders of the ancient world. The statue of Artemis was probably at least in part constructed from a fallen meteorite, which would explain the statement in Acts concerning "the sacred stone that fell from the sky" (Acts 20:35). Several statues of Artemis have been discovered that picture her as a female deity with many breasts, symbolic of her fruitfulness and wealth. Her temple was devastated by the Goths in A.D. 262 and, although apparently reestablished in a smaller temporary setting for a short time, it was finally demolished in the 4th century. The stones and pillars were used in the construction of both the great Basilica of St. Sophia at Constantinople and the early Church of St. John at Ephesus.

Paul first visited Ephesus on his second missionary journey (Acts 18:19-28) and on the third journey remained approximately two years, teaching first in the synagogue and then in the hall of Tyrannus (19:8-10). Apparently Paul established a fairly strong church at Ephesus, because in Revelation the church is commended for its earlier strength and exhorted to return to its former love (Rev. 2:1-7).

When it became evident that the gospel would gain an audience in Ephesus as it had elsewhere, Demetrius, a maker of Artemisian silver shrines, became concerned for his business (Acts 19:23-28). Some scholars have suggested that because no such silver images have been uncovered and because an inscription has been unearthed referring to a Demetrius who was "a temple warden" Luke must have been mistaken. But as Filson indicates (p. 77) archeologists have been investigating public buildings, not private homes where such shrines would be found. Moreover, silver items are among the first to be plundered and remolded. Also, the base of a statue that had been erected by the guild of silversmiths has been discovered in Curetes Street (Meinardus, p. 73).

The protest that arose against Paul here nearly reached riot proportions and was quelled only by the logic of the town clerk — a chief city officer (Acts 19:35-41). Some argue that there were at Ephesus a Roman *praetorium* and *collegia* of imperial freedmen and slaves who composed a company that could be called "Caesar's household" (Phil. 4:22). This argument seems to suggest incorrectly that the capital had already been moved to Ephesus, but such a theory runs counter to the text of Acts, according to which an *asiarch* — not a Roman proconsul — seems to be in charge of the city. One wonders whether a proconsul would absent himself from the scene if he was in the same city when a riot was taking place. Some also link this theory to an argument that Paul was imprisoned at Ephesus at the time he wrote the Epistle to the Philippians. This latter theory is based chiefly on the suggestion that 2 Cor. 11:23 implies that Paul suffered more than the imprisonments at Caesarea and Rome, and is supported by a statement in the apocryphal Acts of Paul concerning his imprisonment at Ephesus.

Christianity gradually made inroads into the city known as the "temple keeper of the great Artemis" (Acts 19:35), and according to the weight of tradition the city became the center for the labor of the beloved disciple John, whose memory was preserved in the building of a great church.

Although Ephesus lies in ruins today, the railway station nearby is called Ayasoluk, a corruption of Gk. *hágios Theológos*, "the holy theologian," a well-known reference in Eastern Christendom to the beloved Evangelist.

EPHLAL ef'lal [Heb. *'eplāl*]. A descendant of Judah (1 Ch. 2:37).

EPHOD ē'fod [Heb. *'ēpōḏ*]. Father of Hanniel, a leader of Manasseh (Nu. 34:23).

EPHOD ē'fod, e'fod [Heb. *'ēpôḏ, 'ēpōḏ, 'aputtdâ* (Ex. 28:8; 39:5; Isa. 30:22); Akk. *epadu, epattum*; Ugar. *ipd*]. The name of a kind of garment, especially of the high priest, and perhaps of other coverings.

The references to the high priest's ephod in Ex. 28:4-40; 35:27; 39:2-30 describe a sleeveless vest, which fitted close to the body and may have extended somewhat below the hips. The feminine form of the word, Heb. *'aputtdâ* (Isa. 30:22), also designates a closely fitting tunic. The high priest's ephod was made from choice, expensive materials including gold in the form of chains and perhaps also of thread or thin wire; purple, blue, and scarlet cloth; and finely woven linen. The ephod was fastened at the shoulder by clasps, to which were attached two onyx stones engraved with the names of the twelve tribes of Israel (Ex. 28:9-12). An elaborately woven girdle circling the waist held the ephod close to the body. Placed over the ephod on the chest of the priest was a breastpiece of the same materials, on which were set twelve precious stones in four rows. This breastpiece was arranged in a double fold (Ex. 28:16) so as to form a pocket or pouch, in which the URIM AND THUMMIM were placed. The latter seem to have been small flat or rounded objects which were cast as lots by the high priest to discover God's will on particular matters. (*See* DIVINATION III.B.) The nature of these objects is rather obscure, however, and some modern scholars, following the LXX, Josephus, and certain later Jewish traditions, have identified them with twelve stones attached to the breastpiece. Also associated with the ephod and worn underneath it was a blue robe that reached to the feet, a garment decorated at the bottom with golden bells and pomegranates.

An essential component of the high priest's vestments, the ephod was worn for ceremonies in the wilderness tent of meeting or at the altar of the holy place in the tabernacle. From the early monarchy the ephod figured prominently in all sacrificial rites involving the high priest. After the wilderness period persons other than the high priest wore ephods, particularly when ministering before the altar. Typical of such attire as worn by ordinary priests (1 S. 2:28; 14:3; 22:18) was the linen ephod that young Samuel wore as he assisted the aged priest Eli in ministering before the Lord (1 S. 2:18). David wore a linen ephod when he cavorted in the procession returning the ark of the covenant to Jerusalem (2 S. 6:14). The divinatory functions of the ephod were enlisted by David on two occasions (1 S. 23:9; 30:7) to ascertain God's will for the immediate future. Evidently Abiathar the high priest had removed this particular ephod from Nob; hence it represented for David God's presence and authority in Israel.

Some scholars have argued that ephods other than that described in Ex. 28–39 may have been images rather than garments. Thus the golden ephod that Gideon made for

Ophrah (Jgs. 8:27) has been considered either a gold idol or image (cf. Ex. 32:4) or a representation of deity upon which a golden ephod had been placed to symbolize authority. Since Isaiah condemned the Israelite idolatry that had encouraged "silver-covered graven images and . . . gold-plated molten images" (Isa. 30:22), the adornment of idols may have been current in Israel from the Settlement period, an apparent imitation of Canaanite cultic practices (cf. 2 K. 23:7). The text seems to indicate, however, that Gideon's ephod was in fact an imitation of the high priestly garment described in Exodus, fashioned from the gold and jewels taken by the Israelites from Midianite warriors slain in battle. In the case of Micah the Ephraimite (Jgs. 17:5; 18:14-20), the ephod was associated in worship with the silver graven image, the molten image, and teraphim (terra-cotta images of the household deities). A similar tradition apparently existed in the northern kingdom as late as Hosea's time (Hos. 3:4). Although the Hebrews were discouraged from using teraphim as early as the patriarchal period (cf. Gen. 35:2-4), terra-cotta images of deities, many examples of which have been recovered from Near Eastern archeological sites, continued in use intermittently until the Exile. Micah's ephod seems to have been independent of the images, and was most probably worn by Micah in his capacity as priest or diviner. The mention of the ark of the covenant in the MT of 1 S. 14:18 presents a problem of location, since the ark was then stationed at Kiriath-jearim. The problem is resolved by reading "ephod" instead of "ark," as does the LXX.

In all cases, the ephods appear to have been elaborately decorated, costly garments of various sizes and weights. They were worn by the high priest in his special ministrations, and later by other priests during cultic functions, including the determination of the divine will. Perhaps, when not in use, certain ephods were hung on a wall, or placed on a stand, possibly of roughly human shape, as may have been the case with Gideon's ephod. In such a situation, an image's clothing would have had coincidental rather than cultic significance. Ephods were used in worship in the northern kingdom as well as in the southern (cf. Hos. 3:4), though the extent to which they were patterned upon Aaron's garment is unknown. While the postexilic high priests most probably did continue to use ephods as part of their ceremonial regalia, in conformity with traditional Mosaic regulations, no evidence for this exists.

EPHPHATHA ef'ə-thə, ef-ā'thə [Gk. *ephphathá* (transliteration of Aram.; cf. Heb. *pāṯaḥ*)]. An Aramaic word used by Christ in the healing of the deaf-mute (Mk. 7:34; cf. Isa. 35:5). Mark translates the term with Gk. *dianoíchtheti*, "be opened." This, with the corresponding act of the touch with the moistened finger, is the foundation of a corresponding ceremony in the Roman Catholic formula for baptism.

EPHRAEMI RESCRIPTUS. *See* TEXTS AND MSS OF THE NT I.A.2.c.

EPHRAIM ē'frē-əm, ē'frā-əm [Heb. *'eprayim* < either *pārâ*–'be fruitful' or *'ēper*–'earth'; Gk. *Ephraim*]. The name of the younger of the two sons of Joseph and Asenath, born in Egypt; and of the tribe named after him, its territory, and by extension, the northern kingdom.

Ephraim and his brother Manasseh were adopted by Jacob and ranked as his own sons, each becoming the ancestor of a tribe in Israel. In blessing his grandchildren, Jacob, despite their father's protest, preferred the younger, foreshadowing the future eminence of his descendants (Gen. 41:50-52; 48:17-20). In the Blessing of Jacob, however, the two are included under the name of Joseph (49:22-26).

At the first census after the tribes had left Egypt, Ephraim's men of war numbered 40,500, and at the second census 32,500 (Nu. 1:33; 26:37). In the wilderness march, with the standard of the tribe of Ephraim on the west side of the tabernacle were Manasseh and Benjamin (2:18).

The Ephraimite among the spies was Hoshea (i.e., Joshua) the son of Nun (Nu. 13:8). At the division of the land Ephraim was represented by Kemuel the son of Shiphtan (34:24). The future power of this tribe is again foreshadowed in the Blessing of Moses (Dt. 33:17). When Moses died, a member of the tribe, Joshua, whose faith and courage had distinguished him among the spies, succeeded to the chief place in Israel. It was natural that the scene of national assemblies and the center of the nation's worship should be chosen within the land occupied by the children of Joseph, at Shechem and Shiloh, respectively. Ephraim's leadership was further emphasized by the rule of Samuel. From the beginning of settlement in Palestine the Ephraimites enjoyed a certain prestige and were very sensitive on the point of honor (Jgs. 7:24; 8:1; 12:1). Their acceptance of, and loyalty to, Saul, the first king chosen over Israel, may be explained by his belonging to a Rachel tribe and by the close and tender relations existing between Rachel's children Joseph and Benjamin. But they were never reconciled to the passing of the scepter to Judah in the person of David (2 S. 2:8f.). That Israel would have submitted to the sovereignty of Absalom, any more than to that of David, is not to be believed; but his revolt furnished an opportunity to deal a shrewd blow at the power of the southern tribe (15:13). Solomon's lack of wisdom, and the crass folly of Rehoboam in the management of the northern tribes, fanned the smoldering discontent into a fierce flame. This made easy the work of the rebel Jeroboam; and from the day of the disruption till the fall of the northern kingdom there was none to dispute the supremacy of Ephraim, the names Ephraim and Israel being synonymous (cf. the book of Hosea where Ephraim represents Israel as the object of God's righteous judgment [e.g., 5:3-14] and also of His tender love [e.g., 11:1-4, 8f.]). W. EWING

When settling in Palestine the children of Rachel occupied the central part of the mountain between Jerusalem and the Valley of Esdraelon. The southern part of it fell into the hands of the Benjaminites, while the larger and more important northern part was conquered by the house of Joseph (Ephraim and Manasseh). These two separate territories are described as one in Josh. 16:1-3, whereas Josh. 16:5-8; 17:7-11 may be a description of the boundaries between Ephraim and Manasseh. The settlement of the house of Joseph, referred to in 1 Ch. 7:28f., does not easily harmonize with the story in the book of Joshua.

Pythian-Adams believed that the boundary lists in the book of Joshua reflect the situation at the time of Ahab; most scholars now agree that they go back to the beginning of the period of the judges.

According to Josh. 15:16 the territory of the tribe of Ephraim was limited to the western half of the southern Mt. Ephraim.

The southern boundary started at a point SE of Jericho and passed westward toward Bethel, Beth-horon, and Gezer. The northern boundary passed from Michmethah and Taanath-shiloh (near Shechem) toward Tappuah and then ran along the southern bank of the river Kanah

toward the sea. The eastern boundary passed N-S starting at Michmethah, forming a straight line to a point SE of Jericho. The western boundary is not as precisely known, for the biblical text included some land in Israelite territory although Canaanites continued to live there for a long time.

Yeivin believed that the tribes of the house of Joseph penetrated into western Palestine from the east (Jericho) and conquered the area of the central mountain that already had been occupied for long by old Israelite families (cf. the story of Dinah and the destruction of the city of Shechem). Possibly the tribe of Dan had previously settled in this area and was now pushed westward into new and insecure surroundings that they ultimately had to leave. At any rate, the tribe of Ephraim was fortunate in being surrounded by other Israelite tribes and therefore was not weakened in wars against the Canaanites and the Philistines, nor in fights against other Israelite tribes, as was the tribe of Benjamin. The tribe of Ephraim grew in strength and was finally able to spread northward and westward, taking possession of parts of the territories of Dan and Manasseh (Gen. 49:23).

A. A. SAARISALO

EPHRAIM [Heb. *'eprayim*; Gk. *Ephraim*].

1. A town near Baal-hazor, Absalom's sheep farm on which he arranged to assassinate his half-brother Amnon, two years after Amnon's sin with his sister Tamar (2 S. 13:23). That it was located N of Jerusalem seems to be indicated by v. 34. It may be identical to the EPHRON of 2 Ch. 13:19 and the OPHRAH of Josh. 18:23. If it is to be identified with Ephron, then it was near Bethel. *See* **2** below.

2. The town near the wilderness to which Jesus retired after the raising of Lazarus (Jn. 11:54); probably the same town as **1** above. This may be the place named along with Bethel by Josephus (*BJ* iv.9.9). It is generally identified with modern eṭ-Ṭaiyibeh, about 21 km. (13 mi.) NNE of Jerusalem and 6½ km. (4 mi.) NE of Bethel. "Aphaerema," in the district of Samaria, may also refer to this city (1 Macc. 11:34; cf. Josephus *Ant.* xiii.4.9).

W. EWING R. J. HUGHES, III

EPHRAIM, FOREST OF [Heb. *ya'ar 'eprayim*]; AV "wood of Ephraim"; NEB FOREST OF EPHRON (dubious, since it lacks textual support, though 1 Macc. 5:46 and 2 Macc. 12:27 mention an Ephron in Gilead [EPHRON **3**]). An unidentified region E of the Jordan in the mountainous country either N or S of the river Jabbok, apparently in the vicinity of Mahanaim (hence perhaps the LXX Lucian *Maainan* in 2 S. 18:6; cf. 2 S. 17:27). Here Absalom was defeated and killed by Joab (2 S.

Forest of oaks and pines in Jordan (ancient Gilead), perhaps to be identified with the Forest of Ephraim (D. Baly)

Olive grove in the hill country of Ephraim (D. Baly)

18:6-15). Although *ya'ar* can also mean open woodland, or even scrub, the area was probably thickly wooded, with oak, pine, cypress, arbutus, etc., since there is rich soil from the Cenomanian limestone and plentiful winter rainfall, averaging 70-75 cm. (28-30 in.). It was within the eastern half of the territory of Manasseh and the name may refer to the similarity of the landscape to that of the high hill country of the tribe of Ephraim W of the Jordan. It is also suggested that this area was at one time given to Ephraim (cf. Josh. 17:14-18) but later lost to the Gileadites (Jgs. 12:1-6). D. BALY

EPHRAIM, GATE OF. *See* JERUSALEM III.D.5.h, F.2.b'.

EPHRAIM, HILL COUNTRY OF [Heb. *har 'eprayim*]; AV MOUNT EPHRAIM. An expression used repeatedly to refer to that portion of the hill country of Canaan W of the Jordan Valley that was assigned to the tribe of Ephraim after the conquest under Joshua (Josh. 17:15; 19:50; etc.). The high plateau (900 m., 3000 ft.) was thickly forested at the time of the Conquest (17:15-18). As the Israelites settled there, the good soil and rainfall encouraged agricultural development. Today olive groves cover much of the area. The rocky gorges leading to this plateau were easily defended, so the area became a stronghold in wartime. Both Deborah (Jgs. 4:5) and Tola (10:1) lived there, and Samuel was born there (1 S. 1:1).

See also PALESTINE, GEOGRAPHY OF. G. A. L.

EPHRAIM, WOOD OF. *See* EPHRAIM, FOREST OF.

EPHRAIMITE ē'fra-im-īt [Heb. *'eprayim*, sing. *'eprāṯî*] (Josh. 16:5, 8f.; Jgs. 12:5f.; 1 S. 1:1; 1 K. 11:26; 1 Ch. 12:30; 27:20; 2 Ch. 25:7; Ps. 78:9); AV, NEB, also EPHRATHITE. A member of the tribe of EPHRAIM.

EPHRAIN ē'fra-in (2 Ch. 13:19, AV). *See* EPHRON 1.

EPHRATH ef'rath, ē'frath [Heb. *'eprāṯ*; Gk. *Ephrath*]; **EPHRATHAH** ef'ra-tha, ef-rā'tha [Heb. *'eprāṯâ*; Gk. *Ephratha*]; AV EPHRATAH. The place of Benjamin's birth and Rachel's death (Gen. 35:16-20), the name either of Bethlehem itself or of a district in which Bethlehem was located. The designer of the mosaic Madeba Map has separated Ephrathah from Bethlehem; apparently he thought of Bethlehem as being in the territory of Ephrathah. The name occurs in the NEB at Josh. 15:59, based on the LXX (59a). A man of this place was called an Ephrathite (Ruth 1:2; 1 S. 17:12).

Some authorities hold that Ephrathah where Rachel was buried (Gen. 35:16; 48:7) was a city N of Jerusalem near Ramah in the territory of Benjamin, the words "the same is Bethlehem" being a late and erroneous gloss.

See also CALEB-EPHRATHAH (1 Ch. 2:24, AV).

K. G. JUNG

EPHRATHITE ef'rath-īt, ē'frath-īt. *See* EPHRATH.

EPHRON ē'fron [Heb. *'eprôn*–'fawnlike']. The Hittite from whom Abraham bought the field and cave of Machpelah (Gen. 23:8f.; 25:9; 49:30) for four hundred shekels' weight of silver (cf. 33:19; 1 K. 16:24).

EPHRON ē'fron [Heb. *'eprôn*; Gk. *Ephrōn*].

1. A city captured along with its villages by Abijah king of Judah from Jeroboam son of Nebat, king of Israel (2 Ch. 13:19). Variant readings of this text and the apparent location lead many to identify this city with Ephraim (2 S. 13:23, so NEB), Ophrah (Josh. 18:23), and modern eṭ-Ṭaiyibeh, located about 21 km. (13 mi.) NNE of Jerusalem and 6½ km. (4 mi.) NE of Bethel. The RSV emends Josh. 18:15 also to read "to Ephron" (AV "on the west").

2. "The cities of Mount Ephron," a turning point in the boundary of the territory assigned to the tribe of Judah after the conquest of Canaan under Joshua (Josh. 15:9). The location remains undetermined.

3. A well-fortified city defeated by Judas Maccabeus (1 Macc. 5:46; 2 Macc. 12:27), located E of the Jordan, probably about 20 km. (12 mi.) SE of the Sea of Galilee.

R. J. HUGHES, III

EPICUREANS ep-i-kū-rē'ənz [Gk. *Epikoureioi*] (Acts 17:18). Members of a philosophical movement initiated by Epicurus (341-270 B.C.) on Lesbos off the western coast of Asia Minor (311 B.C.) and taken to Athens (306 B.C.). The movement, which maintained the unaltered teachings of its founder, spread to Rome after 146 B.C. and during the 1st cent. B.C. became identified with hedonism. Its decline coincided with the decline of Rome, and it was no match for Christianity once the latter became an acceptable Roman religion (after A.D. 323).

I. Teachings.–A. Individuality. Epicurus and his followers devoted themselves primarily to the pursuit of personal, individual happiness. In contrast to classical Greek thought, Hellenistic thought gave ethics great importance. After the death of Alexander the Great (323 B.C.) many Greeks were unable to accept his notion of a "cosmopolitan culture" in which Greeks and non-Greeks would live together. When many Greeks were forced to abandon their secure existence within the city-state, they withdrew from active participation in a supranational culture and began to search inwardly for happiness. Though Epicurus advocated little involvement in social and political life and stressed individual happiness, he did not promote individualism. For the acquisition of friends was "the most important" means toward the securing of "happiness throughout the whole of life" (Diogenes x.148, *LCL*), and happiness included justice and other virtues (cf. DeWitt, *Epicurus*, ch. 14).

B. Pleasure. It is well known (even today) that Epicurus believed that human happiness consisted in pleasure (Gk. *hēdonḗ*). But to him pleasure was a substitute for the experience of pain, not an invitation to indulge in the

EPICUREANS

Epicurus (341-270 B.C.) (Trustees of the British Museum)

"pleasures of the flesh." According to his own testimony, Epicurus did not teach "the pleasures of the prodigal or the pleasures of sensuality, . . . [but] the absence of pain in the body and of trouble in the soul" (Diogenes x.131f.).

Although Epicurus warned against indulgence in physical things because pain will be increased, he did not deny moderate use of physical enjoyment. He even constructed a hierarchy of physical pleasures. Some are natural and necessary, such as food; some are natural but not necessary, such as sexual union. Some are neither natural nor necessary, such as fame; some are short-lived, and these are inferior to those that are long-lived (Diogenes x.149).

The bodily pleasures were not deemed evil in themselves, but the mental pleasures were preferred. The happy person was one who attained mental peace (Gk. *ataraxía*, "lack of disturbance"). Besides having peace of mind, the happy person would be just, wise, and temperate. If one "is not able to live wisely, though he lives well and justly, it is impossible for him to live a pleasant life" (Diogenes x.140). Clearly, then, the good life for Epicurus included the virtues of mental peace, justice, wisdom, and temperance, through which the individual achieved a maximum of pleasure and a minimum of pain.

C. Present Happiness. Epicurus aimed at a life-style in which the present was given more prominence than the future. For many of his contemporaries the future held the fears of death and divine punishment, but Epicurus taught that (1) there is no life after (physical) death, for death is the dissolution of the atoms of our bodily existence; (2) even if man were to live on, there would be no divine retribution, for the gods are not concerned with human life. This deliverance from fears of the future contributed to present human happiness.

D. Materialism. Epicurus's ethical teachings must be related to his thoughts on physics. He conceived of reality materialistically, with atoms as the basic components of the universe. Assuming that all of reality is material, Epicurus concluded that human souls and the deities likewise are material. Moreover, as life is the integration of atoms, so death is their disintegration. When death occurs, the person no longer perceives and ceases to be. Future life is nonexistent.

As Epicurus sought to avoid individualism in his social philosophy, so he tried to escape a thoroughgoing determinism in his natural philosophy. On the one hand, all atoms "act" according to natural laws, i.e., according to cause and effect. On the other hand, human actions are done in freedom: "necessity destroys responsibility . . .; whereas our actions are free, and it is to them that praise and blame naturally attach" (Diogenes x.133f.). (For a sympathetic treatment of Epicurus's attempt to reconcile human ethical freedom and physical determinism, see DeWitt, *Epicurus*, pp. 169, 171.)

E. Role of the Gods. Epicurus's materialism did not result in atheism (Diogenes x.123). For him deities were material beings who certainly did exist. For practical reasons, however, they did not play a crucial role in human life. The gods were eternal and felicitous and did not interfere with human actions because doing so would have detracted from their own blessedness. Thus they did not punish people for unethical deeds either in this life or in an afterlife (should there be one).

II. Epicurus and Scripture.—*A. Ecclesiastes.* The earlier scholarly attempts to show Epicurean influences on Qoheleth in the long run "could not prove convincing, and it transpired that the decisive parallels were to be sought less in Greece than in the Old Testament itself, in Egypt and in Babylonia" (M. Hengel, *Judaism and Hellenism* [Eng. tr. 1974], I, 115). There are striking similarities between the teachings of Epicurus and Qoheleth (cf. DeWitt, *Epicurus*, pp. 230, 182, 319, 199, etc.), but Qoheleth concluded his messages with "religious wisdom" (2:26; 12:13). He affirmed that keeping the law gives meaning to the life of the righteous (12:1, 13f.), and thus work and learning take on new significance. Life does not terminate in death (12:7). Without speculating about the nature of the immortal soul (see ESCHATOLOGY II), Qoheleth affirmed a future life and a future divine judgment (3:17; 11:9b; 12:14), which the righteous need not fear (8:12).

B. Paul. In Luke's summary of Paul's address on the Areopagus in Athens, Paul did not criticize the Epicureans for their stress on pleasure but for their denial of the Resurrection (Acts 17:31). Nowhere in his letters does Paul mention the Epicureans, not even in Col. 2:8 (though Colossae was "the sort of town where Epicureanism flourished" [DeWitt, *St. Paul*, p. 75]). But he was very much aware of their presence in many of the cities of his missionary journeys.

Paul used phrases similar to Epicurus's (e.g., "peace and safety," 1 Thess. 5:3) and possibly employed similar words (e.g., the uncommon NT words "eternal" [Rom. 1:20, Gk. *aídios*] and "atom" [1 Cor. 15:52, Gk. *atómos*; cf. DeWitt, *St. Paul*, pp. 13, 117]). Paul also voiced Epicurus's warning not to revel in physical pleasures (Gal. 5:13; 1 Cor. 5:1, 11).

But Paul's teachings differed from the teachings of Epicurus. Paul used the word "pleasure" sparingly (Tit. 3:3), for "no compromise with pleasure was conceivable" to him (DeWitt, *St. Paul*, p. 172). Personal pleasure became a rejoicing in the Lord (Phil. 4:4); "all the treasures

of wisdom and knowledge" are hidden in God (1 Cor. 2:7) and not in nature; freedom is not merely a deliverance from fear, pain, and death but a positive putting into practice of divine love (Gal. 5:1, 13); the atoms are not eternal but God's power is (Rom. 1:20); mental peace is replaced by divine peace (1 Thess. 5:3).

The central thrust of Paul's theology contrasts with Epicureanism. (1) The universe is basically spiritual and not material (though the material realm is not negated), and man's spirit is a reflection of the divine Spirit. (2) God is blessed (Gk. *makários*, 1 Tim. 1:11) and eternal but does become actively involved in human affairs — notably in the Incarnation. (3) God's final judgment will be just — a warning to unbelievers and a comfort to believers. (4) Christ's death overcomes the "sting" of death, and a future life is affirmed. (5) True peace is found in the present life within the Christian community.

EPILEPSY. The Greek term in Mt. 4:24 and 17:15 (the only two occurrences of "epileptic" in the RSV) is the verb (part. in 4:24) *selēniázomai*, which literally means to be moon-struck. The AV renders "lunatick," a literal translation, in both cases. The Greek term reflects a widespread ancient belief in a connection between certain phases of the moon and various mental and physical disorders among human beings. It is not known, however, whether such a belief was still held in NT times. The Synoptists all regard the ailment described here as caused by demon possession (Mt. 17:14-20; cf. Mk. 9:14-29; Lk. 9:37-43).

The choice of the term "epileptic" by the RSV and NEB is good, for the symptoms described in all three accounts point to such a nervous disorder: the victim had "a dumb spirit" (temporary aphasia), and "wherever it seizes him, it dashes him down; and he foams and grinds his teeth and becomes rigid" (Mk. 9:17f.); "often he falls into the fire, and often into the water" (Mt. 17:15); "the demon tore him and convulsed him" (Lk. 9:42).

EPIPHANES. *See* ANTIOCHUS IV EPIPHANES.

EPIPHI ep'ə-fī [Gk. *Epiphi*]. Name of the eleventh month of the Egyptian calendar (June 25-July 24), mentioned in connection with Pachon in 3 Macc. 6:38.

EPISTLE ē-pis'əl [Gk. *epistolḗ*–'letter,' 'epistle'].

I. Antiquity
II. OT
III. Greco-Roman Period
  A. Kinds
  B. Characteristics
  C. Form
IV. NT
V. Paul
  A. Context
  B. Form
VI. Conclusions

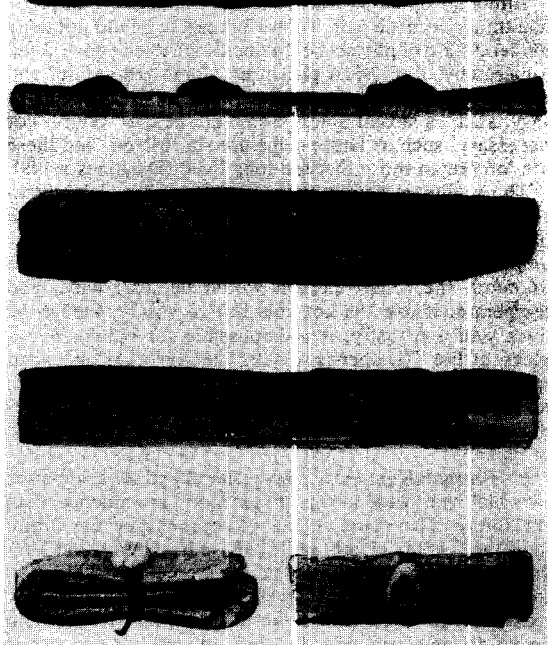
I. Antiquity.–The term "epistle" indicates a form of written communication between two persons or parties, private or official. The epistle is among the oldest and most abundantly preserved types of texts from antiquity. Apart from ancient administrative records, inscriptions, and chronological annals, the earliest known writings are in epistolary form. Epistolographical study has emphasized the importance of these extant documents for historical, literary, and biblical research.

As early as 2275 B.C. Babylonian royalty and officials used epistolary communication, while a similarly extensive correspondence is evidenced by Egyptian remains from the 2nd millennium B.C. Akkadian letters have been preserved on potsherds and clay tablets; approximately fourteen thousand letters are extant from the Greco-Roman period, though many others have been lost due to the deterioration of the materials (waxed, wooden tablets) on which they were written. Other epistolary materials have survived from such places as Tell el-Amarna, Mari, and Lachish. The Elephantine papyri also provide a rich source for epistolary studies.

In the Roman period Cicero, Seneca, and Pliny typified the literary epistolary traditions, and their letters are generally long, stylized, and formal products. Other epistles are embedded in literary or historical works such as Josephus' *Vita* and 1 Maccabees, but questions of authenticity and interpolation often negate their value for studies of epistolary form. The publication of official, administrative letters was by public posting, proclamation, or inscription on stone or ostraca, and frequently the royal archives preserved this material. Literary epistles were generally used as paradigms of style to be copied and studied in circulation before being edited into collections (cf. Cicero).

II. OT.–While none of the books of the OT can be classified as an epistle, there is ample evidence of epistolary activity throughout OT history. The following contain letters: 2 S. 11:14f. — David to Joab concerning Uriah; 1 K. 21:8f. — Jezebel to Jezreel officials concerning Naboth;

Papyri that have been rolled, bound, sealed, and addressed for dispatch (Staatliche Museen, Berlin)



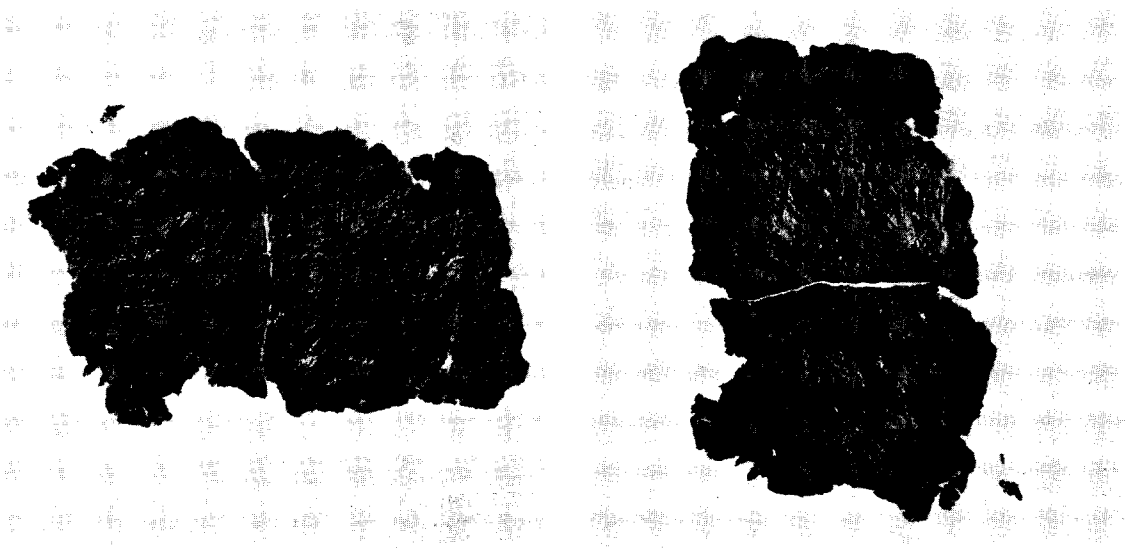
2 K. 5:5-7 — Benhadad king of Syria to Jehoram king of Israel; 2 K. 10:1f., 6f. — Jehu to Jezreel officials; 2 K. 19:14 (cf. Isa. 37:14; 2 Ch. 32:17) — Sennacherib to Hezekiah; 2 K. 20:12 (cf. Isa. 39:1) — Merodach-baladan to Hezekiah; Jer. 29:1, 4-32 — Jeremiah to the exiles (the closest OT approximation to NT epistolary polemic); Ezr. 4:7-23 — correspondence, in ARAMAIC, between enemies of the Jews and Artaxerxes; Ezr. 5:6-17 — Tattenai to Darius; Ezr. 7:11-28 — Artaxerxes to Ezra; Neh. 2:7f. — a request from Nehemiah to Artaxerxes for letters of recommendation; Neh. 6:17, 19 — correspondence among Tobiah, Nehemiah, and Jewish nobles. Additionally, Job 9:25 indicates the long-term existence of a mail courier system, particularly prominent in the Persian period. (See Est. 3:13, 15; 8:10, 14; and 2 Ch. 30:1, 6, 10.)

III. Greco-Roman Period.–*A. Kinds.* Several factors contributed to a surge of epistolary activity during this period: the increase of scribal learning and influence; the growing demands for carefully articulated verbal documents in the areas of commerce and travel; the need for official propaganda vehicles for which the letter form provided a tract/treatise base; the administrative concerns of the government, military, and legal and other professions; apologetic considerations; philosophical speculations; rhetorical practice (forensic, didactic, and epideictic). To these needs the responses came in the form of business letters, official communiqués, letters for public consumption and influence, discursive letter-essays, letters of introduction and commendation, poetic letters, epistles of consolation, encyclical documents, rhetorical paradigms, legal pleas, or "non-real" letters comprising representative compendia. Letters may also be classified according to form of preservation and writing materials used, the modes of dissemination indicated, stylistic intent, the particularity of an epistle and its context, or the distinction between personal (familiar) and ideological (negotiatory) missives. Other subclassifications might include reports, petitions, or "novelistic" epistles of pseudonymous or purportedly divine origin. For all these subcategories are found appropriate stock phrases and formal structures.

B. Characteristics. While the context and kind of a given epistle clearly influenced certain aspects of its format, definite characteristics were almost universally incorporated in the epistle beyond the rhetorical, stylistic, or situational demands. These included the establishment of a "friendly relationship" (*philophrónesis*) between sender and addressee; a sense of the author's "presence" (*parousía*); the facilitation of "dialogue" (*homilía*); clarity of expression, conventional courtesies, and adherence to "epistolary things" — a somewhat nebulous requirement. These factors correspond with the general intentions of epistles, which were basically to convey information, preserve communication, and facilitate requests. Both the opening and closing epistolary conventions and the flexible items, such as expressions of joy or third-party greetings, reflect these main purposes. Where an epistle goes beyond the simple paradigm to a more sophisticated, elaborate product, illustrative matter may be inserted in the form of personal experience, historical anecdotes and quotations, proverbial sayings and folk wisdom, or ethical paradigms (cf. Paul's epistles, *passim*).

C. Form. Where the rhetorical influence is strongest, as in the classical examples drawn from pedagogical exercises or in highly literary productions, the form of the epistle reflects a deliberately elaborate structure. The same effects hold true in letters of historical fiction written to express dialogical or ideological stances (cf. *Letter of Aristeas*, the fictional correspondence between Paul and Seneca, or the forensic portions of Romans and Galatians). Elsewhere, the basic, set form, also underlying the more hortatory letters, was as follows: first, the author's identity, along with the recipient's, in the form "A to B, greetings [*chaírein*]"; second, the main body of the epistle, followed by the closing greeting, which was nearly always a simple word (*érrōsō*) wishing the recipient good health (cf. Latin *vale*); last, the final signature of endorsement by the writer. This element authenticated the epistle, since frequently the epistle's contents were dictated to the scribe on a "thought" rather than verbal basis. At times, it is suggested, the amanuensis (scribe) may have played a significant part in a given epistle's actual literary formulation, for which the sender's signature would then have been an attestation of the accuracy and reliability of the contents. Additional information could be conveyed orally

Letter of Mnesiergus of Athens to his household, the oldest extant Greek letter. It was written on a leaden tablet and folded so that the contents were inside (left) and the address outside (right) (Antikenmuseum, Staatliche Museen, Berlin)



by the courier to circumvent possible forgery or distortion. These substantive oral instructions provided further corroboration and explication of the epistle's contents, often avoiding risks that volatile written material might entail (cf. also 2 Thess. 2:2; 3:17; 1 Cor. 4:17: cf. 2 S. 11:14f.; Rom. 16:1f.; Col. 4:7-9). Thus what probably began as a pattern in which written communication substantiated an oral message, was by the Hellenistic period a practice in which oral communications reinforced or informally expanded epistolary documents.

IV. NT.–Twenty-one NT writings are generally classified as letters, including the commonly acknowledged Pauline, the Pastoral, and the Johannine Epistles. The Epistle to the Hebrews appears to be a homily in contrived and artificial epistolary form, while that of James lacks significant epistolary features. The epistle of Jude and those of Peter also exhibit superficial epistolary form while using other modes (e.g., baptismal homily style or the device of a last will and testament). The book of Revelation provides an initial epistolary framework but more clearly belongs to the apocalyptic genre. Thus the epistle, written on a specific occasion to a particular person or circle for direct communication, without necessarily wider distribution, can double as a homiletic device (Hebrews, James, 1 Peter, 1 John), testament (2 Timothy, 2 Peter), or wisdom discourse (James). Alongside the "gospel" genre, therefore, the "epistle" alone carried equal importance in early Christian literature. With its formal but flexible dialogic quality the epistle supremely represented the early Church's "linguistic newness" (Doty). It became a uniquely appropriate and indispensible genre for the primitive Church's literary production and growth.

A. Deissmann first drew the distinction between the literary forms of letter and epistle, suggesting that the former is more particular, concrete, personal, and limited in scope than the latter, which he defined as a treatise or essay addressed to the general public and using the greeting as a merely literary device. (See Cicero *Ad Familiares*, xv.21.4 for private/public audience differentiation.) While this delineation has some validity, it should not be imposed on the NT writings mechanically or indiscriminately since often, due to exchange of letters (Col. 4:16), public readings (1 Thess. 5:27), and intercommunity cooperation (Gal. 1:2; 2 Cor. 1:1), what may have been intended as a personal communication could tend subconsciously toward an "official" text. Thus a double level of intentionality and reception probably operated quite early in the Christian community. (For more formal "epistles," literarily influenced, cf. Acts 9:2; 15:23-29; 18:27; 22:5; 23:25-30; 28:21).

V. Paul.–*A. Context.* For Paul the epistolary form was the extension of his presence, the embodiment of his person and the fellowship he shared with his addressees, as well as a vehicle by which to convey his apostolic authority and influence (cf. 2 Cor. 16:10). In structure his letters exhibit a familiar rather than negotiatory style, appealing consistently to the mutual experience and life-style he assumed he shared with the recipients. While retaining an appearance of studied casualness for private, specific consumption, Paul's letters were the result of his theological understanding and the formal implementation of the apostolic task. Background stylistic influences, such as Jewish epistolary materials, Hellenistic teacher-disciple modes (cf. Apollonius), or papyrological protocol, were subjugated to his overall aim of producing appropriate instruments for early Christian missionary work which reflected his personal, but also official, interest in the recipients. Thus the epistles came to have the stylistic flavor and features of oral missionary address — proclamation through worship, parenesis, preaching, witness, prophecy, credal hymns and formulas (cf. on this point Col. 1:15-20; Phil. 2:6-11; 1 Cor. 15:3-5; Rom. 1:3) — while using accepted literary types and features, e.g., thanksgiving (Phil. 1:3ff.; 4:10ff.), recommendation (Philemon; 2 Cor. 3:1-3; Rom. 16:1-2), apologetic (Romans *passim*; Gal. 1–2; 1 Cor. 1–4; 2 Cor. 10–13), philophronesis (2 Cor. 1–7), didactic (Rom. 1–11), parenesis (1 Thessalonians).

B. Form. A Pauline letter had certain typical elements. At the beginning were: an opening, which included name of sender, recipient, and greeting (cf. Rom. 1:1-7; Phil. 1:1-2); and a thanksgiving section, which may have included a prayer of intercession (Rom. 1:9f.) and an eschatological climax as transitional vehicles (1 Cor. 1:8f.; Phil. 1:10f.; Col. 1:5; cf. 1 Pet. 1:7). The body of the letter included formulary openings establishing relationship (Rom. 1:13-15; Phil. 1:12-18), eschatological digressions or conclusions (Gal. 6:7-10), travelogues (Phil. 2:19-24), formal disclosures or expressions of joy or disappointment (cf. Phil. 1:3-6; 1 Thess. 1:2-10; Gal. 3:1-5), expositional, theoretical arguments followed by practical parenesis (Gal. 5:13–6:10; cf. Rom. 1–8; 12–15), or an apostolic *parousía* (1 Cor. 4:14-21; 5:3; Col. 2:5). Typically the letter closed with a greeting, a doxology, and a benediction (cf. Phil. 4:21f.; 1 Cor. 16:20-24), with occasional references to public reading or circulation of the document (1 Thess. 5:27; Col. 4:16), and allusions to the amanuensis involved (Rom. 16:22). Personal signatures were also included (see Gal. 6:11ff.; 2 Thess. 3:17) to support veracity of authorship. Clearly the format was heavily influenced by the immediate context of a given Epistle, e.g., 1 Cor. 7:1; 1 Thess. 4:9; Rom. 1:13, in which the formal structures were used with considerable flexibility to meet situational demands. Even here conventional formulas indicated discrete intent. (See Philem. 8-10; Rom. 12:1 for *parakalō* formulas. Cf. "negative" philophronetic statements in Col. 1:6-9; 3:1-5; 4:8-11; 5:2; 6:17; and "liturgical" adaptation of epistolary formulas in, e.g., Philem. 1-7, 21-25, 1 Thess. 1–3; cf. 3 Jn. 4-6, 13-15.)

VI. Conclusions.–Post-Pauline epistolary production continued the basic Pauline letter type in and beyond the patristic period (cf. Ignatius, 1 Clement, Polycarp, Epistle of Diognetus). However, a more ecclesiastical and catholic style developed; increasingly, pseudonymous works were produced in which the literary creation of a sophisticated treatise-like letter often served merely to suggest orthodoxy by perpetuating tradition. Many of these and other "pseudo-epistles" were lost or suppressed, the fate also of many legitimate epistolary productions of the apostolic period (cf. 1 Cor. 5:9; 2 Cor. 10:9f.; Eph. 3:3; 2 Thess. 3:17; Col. 4:16; also Rev. 22:18f.).

EPISTLES, CAPTIVITY. *See* PHILEMON, EPISTLE TO.

EPISTLES, PASTORAL. *See* PASTORAL EPISTLES.

EPISTLES, SPURIOUS. *See* APOCRYPHAL EPISTLES.

EQUAL; EQUALITY. "Equal" occurs ten times in the RSV of the OT, for various Hebrew terms. In Ex. 30:34, e.g., "an equal part" renders *baḏ b^eḇaḏ* (lit. "part for part"); in Dt. 18:8 "equal portions" translates *ḥēleq k^eḥēleq*. In Job 28:17 "equal" translates *'āraq*, here meaning "compare": gold and silver cannot compare in value with wisdom. The cognate *'ēreḵ* appears in the phrase *'ĕnôš k^e'erkî*, literally, "a man of my value" (Ps. 55:13 [MT 14]), which the RSV renders "my equal" (cf. NEB "a man of my own sort"; *AB* "a man of my rank"). "Liken" (piel of *dāmâ*), "make equal" (hiphil of *šāwâ*; cf. AV of Lam. 2:13), and "compare" (hiphil of *māšal*) occur as parallels in Isa. 46:5 to emphasize that God the Creator cannot be compared to any creature — therefore He is far superior to the idol gods of the heathen (cf. 40:18-31). In Ezk. 18:25, 29; 33:17, 20, the AV translates the niphal of *tāḵan* ("is weighed") with "is equal" in the obsolete sense of "is just or impartial."

In the NT, "equal" occurs six times and "equality" three. The Greek is *ísos* and cognates (*isótēs* in 2 Cor. 8:14; *isángeloi* in Lk. 20:36; *isótimos* in 2 Pet. 1:1) except in 1 Cor. 3:8, where the term is *heís*, "one." In Mt. 20:12 "made them equal" means "put them on the same footing," i.e., regarded their brief service as though it were the very same as long hours of toil. In Lk. 20:36 the context restricts the equality to a particular relation. The precise meaning of *ísos* in Jn. 5:18, "making himself equal with God," is clearly defined by the preceding clause; for Jesus' opponents said that He had "called God his Father" (Gk. *patéra ídion*, i.e., His Father in a peculiar and exclusive sense; cf. *idíou huioú* of Rom. 8:32, applying the same adjective to the Son in His relation to the Father). They correctly interpreted the language of Jesus as declaring that He was the Son of God in a way that put Him in equality with God. The charge against Him was not that He said that He was "like" (*hómoios*), but that He was "equal" (*ísos*), i.e., of the very same rank and authority.

In Phil. 2:6 "equality" occurs in a paraphrase of Gk. *tó eínai ísa theṓ*, "the being on an equality with God." In this passage *ísa*, according to a not unusual Attic idiom, is construed adverbially (see Bauer, p. 382). This passage has been interpreted in many different ways. Perhaps the most likely interpretation is that Christ did not appear to men in "the form of God" in order to force them out of wonderment to acknowledge His divinity, but "emptied himself, taking the form of a servant, being born in the likeness of men" (v. 7).

H. E. JACOBS
N. J. O.

EQUIPMENT. In the OT, Heb *k^elî* is a general term for equipment of a material kind, e.g., utensils or furnishings (Nu. 4:26, 32; 1 S. 8:12; 2 K. 7:15; 2 Ch. 4:16; AV "instruments," "vessels"). "Equipment" appears twice in the RSV of the NT, for Gk. *katartismós* in Eph. 4:12 (AV "perfecting") and for *hetoimasía* in 6:15.

In Eph. 4:12 the equipment is spiritual. The Spirit's gifts are distributed to equip the members of the Christian community for active ministry.

A variety of interpretations has been given to *hetoimasía* in Eph. 6:15 (its only NT occurrence): cf. "preparation" (AV), "firm footing" (NEB), "eagerness" (JB), "steadfast" (*AB*), "readiness" (Today's English Version). The verb *hetoimázō* generally means "make ready" or "prepare"; the most common translation of the noun is "preparation" or "readiness" (cf. Bauer, p. 316; *TDNT*, II, 706). Because of the reference to the "gospel of peace," some have seen in this passage an allusion to Isa. 52:7 (e.g., *TDNT*, V, 312 n. 9); this is unlikely, however, because (1) the context is one of military imagery, and (2) *hypodēsámenoi toús pódas* indicates that something is strapped on the feet, whereas the one who ran quickly to bring a victory-message would have worn nothing on his feet (Barth, pp. 798f.). The author of Ephesians is referring figuratively to the Lat. *caliga* (cf. Vulg. *et caliciati pedes in praeparatione evangelii pacis*), the heavily studded half-boot worn by the Roman soldier, which enabled him to have a "firm footing" (NEB) in battle. It is the "gospel of peace," therefore, that enables the Christian to remain "steadfast" (*AB*). *See also* FOOTWEAR.

Bibliography.—M. Barth, *Ephesians (AB*, 1974), pp. 770f., 797-99; *TDNT*, I, *s.v.* ἄρτιος κτλ.: καταρτισμός (Delling); II, *s.v.* ἕτοιμος κτλ. (Grundmann); V, *s.v.* ὅπλον κτλ.: ὑποδέω (Oepke).

N. J. O.

EQUITY [Heb. *'ĕmeṯ*] (Prov. 29:14); AV FAITHFULLY; NEB STEADFASTLY; [*ṣ^eḏāqâ*] (2 S. 8:15; 1 Ch. 18:14); AV, NEB, JUSTICE; [*yāšār*] (Mic. 3:9); NEB STRAIGHT COURSE; [*mîšôr* (Ps. 45:6 [MT 7]; 67:4 [MT 5]; Isa. 11:4), *mêšārîm* (Ps. 9:8 [MT 9]; 75:2 [MT 3]; 96:10; 98:9; 99:4; Prov. 1:3, 2:9)]; AV also RIGHT, RIGHTEOUSLY, UPRIGHTLY, UPRIGHTNESS; NEB also RIGHTEOUSNESS, JUSTICE, FAIRLY, JUSTLY, PROBITY, "keep only."

The term *'ĕmeṯ* denotes firmness, faithfulness, and truth. The throne of the king with these characteristics will be established forever (Prov. 29:14); in contrast, the rulers of Israel condemned by Micah (3:9) were characterized by a lack of uprightness. David administered his kingdom with *ṣ^eḏāqâ*, "righteousness." *Mîšôr* and *mêšārîm*, literally denoting "level ground," are used metaphorically to mean straightness, evenness, uprightness, in descriptions of the

Lord's judgment and that of His servant.

See *TDOT*, I, *s.v.* "'āman" (Jepsen), 309-316.

J. R. PRICE

ER ûr [Heb. *ʿēr*–'watcher'; Gk. *Ēr*].

1. The eldest son of Judah the son of Jacob, by Shua the Canaanite. Judah took for him a wife named Tamar. It is recorded that Er "was wicked in the sight of the Lord; and the Lord slew him" (Gen. 38:3, 6f.; 46:12; Nu. 26:19; 1 Ch. 2:3).

2. "Er the father of Lecah" is mentioned among "the sons of Shelah the son of Judah" (1 Ch. 4:21).

3. An ancestor of Jesus in Luke's genealogy in the seventh generation before Zerubbabel (Lk. 3:28).

ERAN ē'rən [Heb. *ʿērān*; Gk. *Eden*]. The son of Ephraim's oldest son Shuthelah (Nu. 26:36). The Eranites were his descendants.

ERASTUS ə-ras'təs [Gk. *Erastos*–'beloved']. The name occurs three times, each time denoting a companion of Paul.

1. A Corinthian Christian who sent greetings to Rome (Rom. 16:23). He is given the title "city treasurer," and is probably the same Erastus mentioned in a Corinthian inscription as "procurator of public buildings" (cf. O. Broneer, *BA*, 14 [1951], 78-96, esp. p. 94; H. J. Cadbury, *JBL*, 50 [1931], 42-58; W. Miller, *Bibliotheca Sacra*, 88 [1931], 342-46; A. M. Woodward, *Journal of Hellenic Studies*, 49 [1929], 221).

2. One of Paul's helpers who accompanied Timothy from Ephesus to Macedonia (Acts 19:22).

3. One who "remained at Corinth" (2 Tim. 4:20).

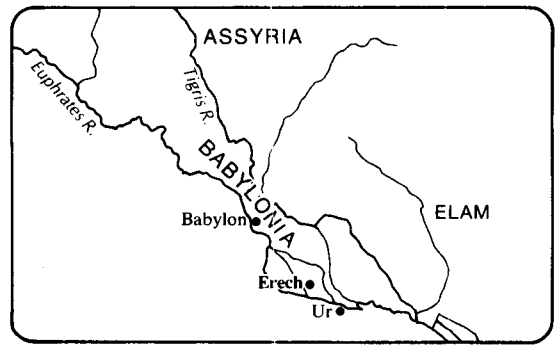
Although Erastus was a common name, all three could be the same Erastus, since both **1** and **3** are connected with Corinth and **2** and **3** are connected with Timothy. The latter connection is strengthened by the absence of any qualifying description, which might be expected with so common a name if different individuals were meant.

G. A. L.

ERECH ē'rek, er'ek [Heb. *ereḵ*; Gk. *Orech*]. One of the cities founded by Nimrod, the others being Babel, Accad, and possibly Calneh (Gen. 10:10; cf. RSV, NEB). Erech was known to the Assyrians and Babylonians as Uruk, to the Hebrews as Erech, and to the Arabs as Warka. Its importance can be seen in that no fewer than eleven names have been given it.

The city is located on the left bank of the Euphrates, 55 km. (35 mi.) N of Tell el-Obeid and 65 km. (40 mi.) NW of Ur. An important Sumerian city, Erech is one of the most ancient Mesopotamian cities and was the home of the mythical hero Gilgamesh. It was occupied continuously for nearly four thousand years, until the Greek period. Its ruins, almost 10 km. (6 mi.) in circumference, compare in importance with those of Babylon. The antiquity of the city is attested by (1) the number of names the site bears in the inscriptions, (2) the mention of the city in a non-Semitic creation story, and (3) references in Strabo, Ptolemy, and Pliny.

In the Sumerian king list the city appears as the center of the 2nd Dynasty after the Flood. The great wall of Erech was built during the Ur Dynasty before the middle of the 3rd millennium B.C. The city was captured by the Elamites *ca.* 2280 B.C., and the statue of the goddess Nana was removed. It was later recovered for Erech by Ashurbanipal of Assyria *ca.* 635 B.C. The city was inhabited in later centuries, but never again attained its early importance.



Earliest excavations of the site began in 1850 with W. K. Loftus; the German expedition under J. Jordan started thorough research in 1912. Interrupted by World War I, the work was resumed in 1928 and carried on until 1939. World War II caused another delay, but excavation began again in 1954 and continued until 1960. Eighteen levels of occupation were verified at one point.

The Mesopotamian ziggurat is first found at Erech. The Assyro-Babylonian word means "apex" or "top of a mountain." Thus the ziggurat was an artificially constructed mountain on whose summit stood the shrine of a god. Two ziggurats and several temples from the late 4th and early 3rd millennia B.C. were unearthed. The deities worshiped at Erech were Ishtar and Anu. The Ishtar temple is the great ziggurat of the site, rising to a height of about 28 m. (100 ft.) above the plain.

The excavated area yielded, in addition to the temples, the remains of buildings, walls, and gateways. Other finds included inscriptions of kings; tablets from the reigns of Nabopolassar, Nebuchadrezzar, Cyrus, Darius, and some Seleucids; many glazed earthenware coffins, and other receptacles for burials. Erech made distinctive pottery, the most important being the red ware, although other types were also found. The pottery, made on a spinning potter's wheel, was highly polished, but was unpainted. A rough limestone pavement in Erech is the oldest stone construction in Mesopotamia.

Erech's greatest contributions to the history of civilization were the cylinder seal and cuneiform script. A seal found in one of the temples is the first instance of such usage known to us. The seal was in the form of a small stone cylinder, with an incised design which left an impression when rolled across a soft surface. The use of such seals antedated the invention of writing. They were employed mainly to indicate ownership of property and to safeguard possessions. Such seals were used for more than three millennia, until displaced by the stamp seal in Persian times. The high quality of workmanship of the seals in Erech is seen in their animal figures, ornamental compositions, religious symbols, and illustrations of rituals.

Writing emerged soon after the appearance of the cylinder seal. Clay tablets have been unearthed at Erech bearing inscriptions in crude pictographic script, which is evidently the direct forerunner of the CUNEIFORM script used for the Sumerian language of Erech. The pictographs, in the interest of speed, were reduced to wedge-shaped writing or cuneiform, made by pressing a three-sided stylus into soft clay. This form of writing was used later by the Assyrians, Babylonians, Hittites, and Canaanites.

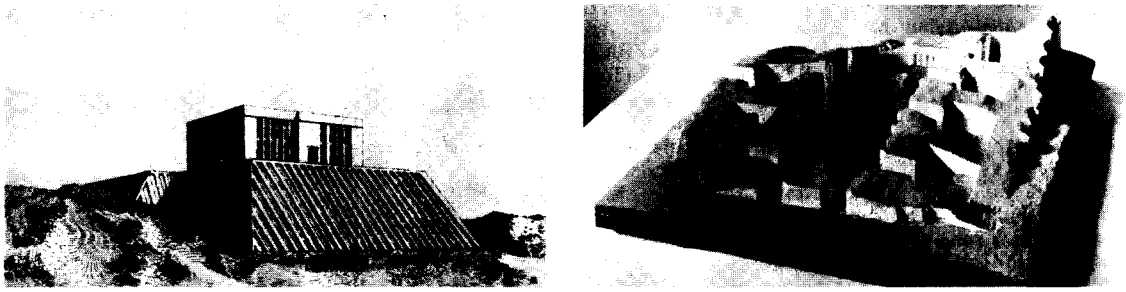
C. L. FEINBERG



Drawing and model of the "white temple" (so called because of the lime plastering) that forms part of the Anu ziggurat at Uruk (Erech). An early type of cult building, the temple has a central hall with a small, stepped altar and side rooms (early 3rd millennium B.C.) (Staatliche Museen, Berlin)

ERI ē'rī; **ERITES** ē'rīts [Heb. *'ēri*–'watcher']. The fifth of the seven sons of Gad (Gen. 46:16; Nu. 26:16), after whom a clan in Gad was named (Nu. 26:16).

ERI-AKU er-ē-ā'kōō [the probable Sumerian reading of a known Babylonian name that includes characters meaning 'servant' and that stands for the moon-god Sin, the entire phrase meaning 'servant of the moon-god']. A king of Larsa (ELLASAR), generally identified with the ARIOCH of Gen. 14:1,9. A number of contract tablets mention Eri-Aku. The linguistic background of the name is Hurrian. The comparatively rare form is not attested after the middle of the 2nd millennium B.C. Thus its occurrence in Genesis presupposes an ancient tradition. As king of Ellasar, Arioch was an ally of Chedorlaomer of Elam and Amraphel of Shinar, who fought against Sodom and Gomorrah.

Inscriptions show that Eri-Aku belonged to an Elamite family that ruled Larsa. He was a son of Kudur-Mabuk, known as "the father of the land of the Amorites [=Syria]." Kudur-Mabuk, the Elamite, is considered to have ruled in a province in the eastern part of southern Babylonia adjacent to Elam, and to have lent his support to his son Eri-Aku, who governed Larsa and the surrounding parts of southern Babylonia. The rule of both was brought to an end by their defeat at the hands of Hammurabi.

According to one view Eri-Aku is to be identified with Rim-Sin king of Larsa, whose accession to the throne is dated *ca.* 2098 B.C. It has been suggested that his Semitic subjects changed the name to Rim-Sin. Another view proposes the equation Arioch=Eriagu=Warad-Sin, who is to be kept distinct from Rim-Sin. A firm consensus has not yet been achieved.

In the so-called Chedorlaomer texts, Arioch appears twice in the forms Eri-e-a-ku and Eri-e-ku-a, father of Dur-maḫ-ilani. Some older scholars identified Eri-eaku with Arioch king of Ellasar, reasoning that such a reading was possible if the signs were given Sumerian instead of Semitic values. However, the documents are in Semitic, so that possibility appears to be ruled out.

C. L. FEINBERG

ERR; ERROR [Heb. *šāgâ*] (Nu. 15:22; 1 S. 26:21; Job 6:24; 19:4; Isa. 28:7; Ezk. 45:20); NEB also "(omit) through inadvertence" (Nu. 15:22), "in the wrong" (1 S. 26:21); [*šāgag*] (Lev. 5:18); AV IGNORANCE; [*šᵉgāgâ*] (Nu. 15:25f.,28; Eccl. 10:5); AV also IGNORANCE; NEB also OMISSION (Nu. 15:25), INADVERTENCE; [*šᵉgî'â*] (Ps. 19:12 [MT 13]); NEB "unwitting sins"; [*mᵉšûgâ*] (Job 19:4); [*tā'â*] (Ps. 58:3 [MT 4]; 95:10; Prov. 14:22; Isa. 29:24; 35:8; 63:17); AV also "go astray" (Ps. 58:3); NEB "taken to devious ways," ASTRAY, CONFUSED, TRESPASS, WANDER; [*tô'â*] (Isa. 32:6); NEB LIAR; [*tohᵒlâ*] (Job 4:18); AV FOLLY; NEB "find at fault"; [Aram. *šᵉḥāṭ*] (Dnl. 6:4); NEB "neglect of duty"; [Gk. *agnóēma*] (He. 9:7); NEB "sins of ignorance"; [*planē*–'wandering'] (Rom. 1:27; 1 Thess. 2:3; Jas. 5:20; 2 Pet. 2:18; 3:17; 1 Jn. 4:6; Jude 11); AV also DECEIT (1 Thess. 2:3); NEB also PERVERSION, CROOKED, "heathen environment" (2 Pet. 2:18).

"Err" and "error" are in the OT mainly the translation of Heb. *šāgâ* and *tā'â* with their cognates. Both of these verbs mean literally "wander" or "go astray" and are used to refer to unintentional sins or sins of ignorance (note the contrast with presumptuous or "high-handed" sins, Nu. 15:30) for which atonement can be made. *Agnóēma* is the Greek equivalent to Heb. *šgh,* referring to a sin committed in ignorance (cf. *TDNT,* I, 115f.). *See also* IGNORANCE.

Greek *planē* is frequently used in the LXX as a translation of *tā'â,* though is also occurs in Job 6:24 and 19:4 for Heb. *šgh*; in the OT it generally refers to Israel's disobedience, especially her following after and worshiping false gods. This LXX use is reflected in Rom. 1:27, where gentile idolatry is viewed as apostasy and is punished in the form of God's judicial abandonment. In 2 Pet 2:18 its meaning is broadened to include all gentile immorality. In 2 Pet. 3:17 and Jude 11 the term is used in description of false teachers who have abandoned the truth and "followed the way of Balaam, the son of Beor, who loved gain from wrongdoing" (2 Pet. 2:15), while in 1 Thess. 2:3 Paul declares that he (unlike the false teachers) did not preach from error.

In Prov. 12:28 the RSV, emending the MT to read *tô'ēḇâ* instead of *nᵉṭîḇâ,* translates "the way of error" (AV "in the pathway thereof"; NEB "there is a well-worn path"). Actually there is no need to emend the MT, as Dahood and Kidner have shown (M. Dahood, *Bibl.,* 41 [1960], 176-181; D. Kidner, *Proverbs* [1964], p. 100). Dahood notes (*Bibl.,* 50 [1969], 340) that Heb. *nāṭîḇ* ("path") is equivalent to Ugar. *ntb.*

J. T. DENNISON, JR.

ERUPTION [Heb. *sappaḥaṭ* (Lev. 13:2; 14:56), *mispaḥaṭ* (Lev. 13:6-8)]; AV SCAB; NEB PUSTULE. A redness, rash, or sore on the skin. The *mispaḥaṭ* of Lev. 13:6f. was harmless, but because such an eruption was one of the signs of leprosy, one had to be quarantined for fourteen days before it could be diagnosed as benign.

ESAIAS ē-zā'əs. *See* ISAIAH.

ESARHADDON ē-sər-had'ən [Heb. *ʾēsarḥaddōn*; Assyr. *Aššur-aḫᵘ-iddin*–'Ashur has given a brother'; Gk. *Asbasareth, Asbakaphath, Sacherdonos*]; AV Apoc. AZBAZARETH (1 Esd. 5:69 [LXX 66]), SARCHEDONOS (Tob. 1:21f.); NEB Apoc. ASBASARETH (1 Esd. 5:69). King of Assyria 681-669 B.C., son of Sennacherib and father of ASHURBANIPAL. The Bible mentions him only in connection with the assassination of his father, who was slain by his sons Adrammelech and Sharezer, "and Esarhaddon his son reigned in his stead" (2 K. 19:37; Isa. 37:38). Esarhaddon is sometimes identified with Osnapper (Ezr. 4:10), but this view is not generally accepted.

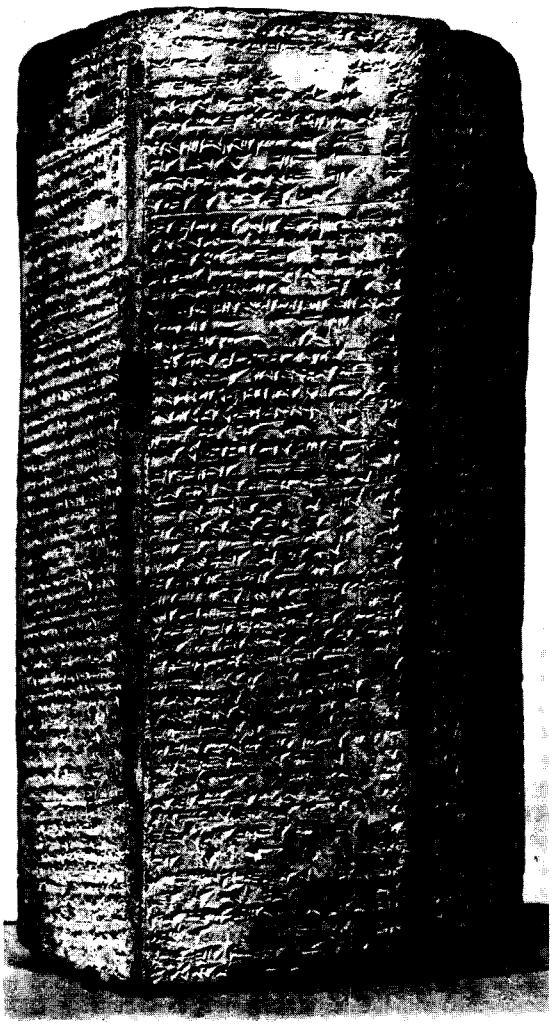
Sennacherib named Esarhaddon, who was still a youth, as his successor even though Esarhaddon was not the oldest son. (In his treaty with Baʿlu of Tyre, Esarhaddon refers to himself as "the oldest son of [Sennacherib]." A. L. Oppenheim, however, suggests that the name "Ashur has given a brother" implies that the child replaced "a lost son" [*IDB*, II, 124].) This caused his brothers to turn to deeds of violence (*ARAB*, II, §§ 500f.). When the sons slew Sennacherib the people backed the assassins, but the gods supported Esarhaddon (*ARAB*, II, §§ 503f.) and he pursued his brothers into Ḫanigalbat (*ARAB*, II, § 505; 2 K. 19:37 par. use the less precise term "Armenia"). Supporters of the brothers were slain or exiled, the people turned to Esarhaddon, and he took the throne to Nineveh (*ARAB*, II, §§ 505f.; *ANET*, pp. 288f.). His wife bore him twin sons, Ashurbanipal and Šamaš-šum-ukīn, whom he named crown princes of Assyria and Babylonia, respectively, doubtless in an effort to avoid the kind of internecine hostilities that had inaugurated his own reign. The plan failed, however.

Esarhaddon had problems on all frontiers. He began his reign by attempting to secure the northern frontier against the Cimmerians, the Manneans, and other peoples (*ARAB*, II, §§ 516f., 530-32). He reports controlling the Medes and other tribes beyond them (*ARAB*, II, §§ 519, 540) as well as the Elamites to the east (*ARAB*, II, § 524). To the south, he had numerous campaigns against the peoples of the Sea-Land (Chaldeans and others), whom he brought under control by putting Na'id-Marduk, brother of the defeated Elamite king, over their territory (*ARAB*, II, §§ 509f., 534f.). The kings of Arabia likewise received his attention (*ARAB*, II, §§ 518a, 536, 557). On the west Esarhaddon had a number of serious revolts by various kings of "Ḫatti" (Syria), doubtless instigated by Egypt (*ARAB*, II, §§ 511f., 527f.), and he resolved this problem by reorganizing the province, putting his official as governor over them, and increasing the amount of tribute required of them (*ARAB*, II, § 512). He reports in an inscription that he summoned twenty-two kings of the land of Ḫatti. Baʿlu king of Tyre and Manasseh king of Judah lead the list. This is probably the event recorded in 2 Ch. 33:11: Manasseh was taken to Babylon "bound with fetters of bronze." According to the biblical account Manasseh was later restored to his reign in Jerusalem. The restoration — and also the humiliating capture — may have taken place under ASHURBANIPAL. Sidon was destroyed after a three-year siege. Tyre also was attacked, but apparently it was too well defended by its island location. Esarhaddon records his treaty with the king of Tyre (*ARAB*, II, §§ 587-591).

Esarhaddon's most important campaign was his invasion of Egypt (*ARAB*, II, §§ 554, 557-565, 710). He had prepared for this through his policies on the other frontiers, particularly the settling of the Babylonian and Sea-Land region with the loyal Na'id-Marduk, and the stabilizing of the Syrian region and the treaty with Baʿlu of Tyre. He had also taken the city of Arzani "on the border of the Brook of Egypt" (the Wâdī el-ʿArîsh?) two years earlier. Esarhaddon invaded Egypt in 675. Taharqa (2 K. 19:9) fled to Nubia, and Esarhaddon sacked and destroyed Memphis. In his words, "Memphis, his royal city, in half a day, with mines, tunnels, assaults, I besieged, I captured, I destroyed, I devastated, I burned with fire" (*ARAB*, II, § 580). Esarhaddon claims to have conquered all of Egypt. On his stele, found at Zenjirli, he portrays himself holding ropes that pass through the lips of two men kneeling at his feet; one is probably Taharqa, and the other is perhaps Baʿlu of Tyre. We must accept his claims with caution, however. In one inscription Esarhaddon says, "I captured Tyre, which is in the midst of the sea" (*ARAB*, II, § 710); this does not appear to be supported by any other evidence, however, and Esarhaddon does not make the claim in other accounts of his campaign against Tyre. Taharqa, we know, continued to reign in Egypt, and led another revolt a few years later. Esarhaddon was in Haran, on his second campaign against Egypt, when he took ill and died (10 Araḫ-samnu 669). Ashurbanipal succeeded him.

Basalt stele of Esarhaddon (680-669 B.C.) from the outer city gate of Zenjirli (Sam'al). The king holds two prisoners by a rope, probably Ushanahuru son of Pharaoh Taharqa (kneeling) and Abdi-Milkuti prince of Sidon (or Baʿalu prince of Tyre) (Staatliche Museen, Berlin)

Esarhaddon was proud of his building achievements



Historical records of Esarhaddon on Prism A, the best preserved of the king's annals (Trustees of the British Museum)

and has left many prisms, stelae, and building inscriptions. One of his first efforts was to rebuild Babylon, which his father had destroyed, and to restore the shrine Esagila (*ARAB*, II, §§ 641-676, 712). It has been suggested that the summoning of the kings of the Ḫatti lands to Babylon (cf. 2 Ch. 33:11) was in connection with this building campaign. Esarhaddon built a new palace at Kar-Esarhaddon ("Esarhaddonsburg") not far from Nineveh (*ARAB*, II, §§ 688-700, 721), and he restored the temple of Ashur which Shalmaneser I had built *ca.* 1250. Then he established its foundations and started work. "I built and completed it, I made it magnificent, to the astonishment of the peoples" (*ARAB*, II, § 702).

Esarhaddon, like so many of the kings of the Assyrian empire, was a cruel and powerful monarch. His dedication to the gods and goddesses of his land is recorded many times in his inscriptions, which may give us some idea of how religion can be used to foster excessive might. He claimed to rule the "universe": Egypt, Ethiopia, and the islands of the sea, including Ionia, and Knossus (possibly to be read "Tarshish"), as well as the lands adjacent to Assyria (*ARAB*, II, § 710). In the Zenjirli stele Esarhaddon says, "I am powerful, I am all powerful, I am a hero, I am gigantic, I am colossal, I am honored, I am magnified, I am without an equal among all kings, the chosen one of Assur, Nabû and Marduk, called of Sîn, favorite of Anu, beloved of the queen Ishtar, goddess of all (the world); unsparing weapon, which utterly destroys the enemy's land, am I" (*ARAB*, II, § 577). He also calls himself "the humble king" (*ARAB*, II, § 707). The personality traits of Esarhaddon, which may seem contradictory to modern man, in a way serve to illustrate the characteristics of the Assyrian empire.

W. S. LASOR

ESAU ē'sô [Heb. *ʿēśāw*; Gk. *Ēsau*]. A son of Isaac and Rebekah, the older twin brother of Jacob (Gen. 25:24-26; 27:1, 32, 42). Esau's name ("hirsute") was given because of the presence of hair on his body at birth (25:25), and also because of his reddish appearance at delivery, from which his other designation, Edom or "red," was derived, in conjunction with the episode involving the lentil soup (25:30). Later Edomite peoples claimed Esau as their ancestor, and the name Seir, designating Edomite territory, may have been intended to preserve the memory of his name (*śāʿîr*–'hairy').

The birth narrative that mentioned the second child grasping the heel of the first foreshadowed the subordinate relationship of the Edomites to the offspring of Jacob (cf. Jer. 49:8; Ob. 6; Rom. 9:10-13). As a youth, Esau became an accomplished hunter, much as Ishmael had been; this way of life was a contrast with the semi-sedentary activities of his brother Jacob, and appears to mark the transition from nomadic to sedentary life in the patriarchal period.

The wild meats that Esau brought back pleased his father's tastes much more than the blander meats that Jacob provided from his own flocks; consequently Esau became the favored son. Returning on one occasion famished from an unsuccessful hunt, Esau traded his rights of primogeniture for food at his brother's instigation (Gen. 25:29-34). Archeological discoveries from Nuzi have shown that disposing of the birthright among members of the same family was not unknown.

Esau's apparent indifference to such valued possessions as the birthright was reflected in his marriage to two local women who were not of Abrahamic stock. This was a matter of great regret to Isaac and Rebekah (Gen. 26:35), and doubtless prompted the latter to instruct Jacob in ways of obtaining the patriarchal blessing that properly belonged to Esau (ch. 27). The successful deception prompted the prediction of a comparatively bleak future for Esau and his descendants, but with the assurance that one day they would be free from servitude to Jacob's seed (vv. 39f.). When he discovered the deception, Esau's anger was such that Rebekah advised Jacob to leave for Haran until Esau should be more amiably disposed to his fate. Two decades later Jacob appeased his brother successfully, helped by the fact that Esau had obviously forgiven the earlier act of treachery (33:4-16). Patriarchal blessings of the kind described in Genesis were a feature of Middle Bronze Age society in the Euphrates Valley, as indicated by archeological discoveries at Mari and Nuzi.

Historically the relationship between the Israelites and the Edomites followed the lines forecast by Isaac. In the time of David the Edomites were subjugated to the Israelites (2 S. 8:11-14; 1 Ch. 18:13) and remained under their control until the time of Jehoram of Judah (2 K. 8:20-22; 2 Ch. 21:8-10). They rebelled *ca.* 845 B.C.

and sacked Ezion-geber, becoming independent of Judah for a generation. They were reconquered under Amaziah (796-767 B.C.), but in 735 B.C. the Edomites regained their freedom, and never again came under the control of Judah.

ESAY ē'sā [Gk. *Ēsaias*] (AV, 2 Esd. 2:18; Sir. 48:22). *See* ISAIAH.

ESCAPE [Heb. *mālaṭ* (e.g., Gen. 19:20), *pālaṭ*, *pālîṭ*, *pᵉlêṭâ*, *yāṣā'*–'go out' (e.g., 1 S. 14:41), *mippᵉnê*–'from the face of' (Gen. 7:7), *lûz* (Prov. 3:21; 4:21), *'ālâ*–'ascend' (Ex. 1:10), *mānôs*–'refuge' ("way of escape," Job 11:20), *sûr*–'turn aside' (Job 15:30), *tôṣā'ôṯ*–'out going' (Ps. 68:20 [MT 21]), *'āḇar*–'pass on' (Ps. 141:10), niphal of *nāṣal*–'be delivered' (Dt. 23:15), *šᵉ'ērîṯ*–'the rest' (2 Ch. 36:20), hiphil of *yāṯar*–'have remaining' (Ezk. 12:16), *bô'*–'come' (Jer. 26:21); Gk. *pheúgō*, *ekpheúgō* (e.g., Lk. 21:36), *diapheúgō* (Acts 27:42), *apopheúgō* (2 Pet. 1:4; 2:18, 20), *paraitéomai*–'avoid' ("seek to escape," Acts 25:11), *ékbasis*–'way out' ("way of escape," 1 Cor. 10:13), *ananḗphō*–'come to one's senses' (2 Tim. 2:26; cf. Bauer, p. 57; NEB), *exérchomai*–'go out' (Jn. 10:39), *lanthánō*–'hide' (Acts 26:26), *diasṓzō*–'bring safely through' (Acts 28:1, 4)]; AV also DEPART, FLEE (OUT), "the issues" (Ps. 68:20), etc.; NEB also SLIP FROM, ABANDON, "become masters of" (Ex. 1:10), "pass safely through," WAY OUT, etc.

Hebrew *mālaṭ* is the most common OT word for escape. It occurs along with Heb. *nûs*, "flee," in 1 S. 19:10 (cf. the parallelism in Jer. 46:6) and with *bāraḥ*, "flee," in 1 S. 19:18. The RSV sometimes translates Heb. *pālîṭ* ("the escaped one") and *pᵉlîṭâ* ("an escape") as verbs (Ezk. 7:16; Joel 2:3; Am. 9:1), and the latter at least once as "a remnant that has escaped" (Ezr. 9:15). The RSV has "Rock of Escape" for Heb. *sela' hammaḥlᵉqôṯ* (lit. "rock of divisions," 1 S. 23:28; cf. AV, NEB; *see* ESCAPE, ROCK OF); in 2 S. 20:6 the RSV follows the Targum with "cause us trouble" rather than the MT *hiṣṣîl* (hiphil of *nāṣal*) *'ênênû* (lit. "snatch away our eyes"; AV, NEB, "escape us"). In Prov. 3:21 both the RSV and the NEB have reversed the MT order of the parallelism.

The RSV has preserved only in part the Hebrew pleonasms: "any survivors escape" (Ezk. 7:16, Heb. *ûpālᵉṭû pᵉlîṭêhem*; AV "they that escape of them shall escape"; NEB "if any escape"), and "the survivors . . . who escaped" (Neh. 1:3, Heb. *hanniš'ārîm ᵃšer-niš'ᵃrû*; AV "the remnant that are left"; NEB "those . . . who had survived"); but cf. 1 S. 27:1; Am. 9:1.

"Escape" often occurs in the ordinary sense of escape from persons or dangers, e.g., Ehud escapes from the Moabites (Jgs. 3:26), David from Saul (1 S. 27:1). For some, however, there could be no escape: Zedekiah (Jer. 32:4), the Baal prophets (1 K. 18:40), the liar (Prov. 19:5), etc. Among the dangers from which people seek escape are a flood (Gen. 7:7), the sword (Lev. 26:37), a trap (Ps. 141:9f.), fire (Ezk. 15:7), and a stormy sea (Acts 28:1, 4).

A few times the term is used figuratively: cities cannot escape their destroyers (Jer. 48:8), the land of Egypt its defeat (Dnl. 11:42), nor the wicked person darkness (Job. 15:30); and one is urged not to let wisdom escape (Prov. 3:21). Since Yahweh is a God of salvation, to Him belongs escape from death (Ps. 68:20). Paul said he did not seek to escape death should he be convicted of injustice (Acts 25:11).

In some passages the moral sense of the term is shown: those who please God escape the ensnaring woman (Eccl. 7:26), and the righteous escape trouble (Prov. 12:13). The Christian must escape from the enslaving corruption of the world (2 Pet. 1:4; 2:18, 20) and "come to one's senses [Gk. *ananḗphō*] out of the snare of the devil" (2 Tim. 2:26; cf. NEB); Paul assured the Corinthians that God would always provide a way out (Gk. *ékbasis*) of temptations (1 Cor. 10:13).

In both the OT and the NT the term occurs with respect to divine judgment. For Israel there was no escape from divine punishment (Ezr. 9:14; Jer. 11:11; Ezk. 15:7; Am. 9:1). Many Israelites lost their lives in the Exile, but a remnant escaped death (cf. Ezr. 9:15; Ezk. 12:16); and Joel prophesied that those who call upon the name of the Lord will escape divine anger on the Day of the Lord (2:32 [MT 3:5]). In the NT, likewise, those who continue in their unbelief or evil ways are warned that they will not escape divine judgment (Mt. 23:33; Rom. 2:3; 1 Thess. 5:3; He. 12:25). The summons to receive strength to escape judgment continues to sound forth (Lk. 21:36).

R. W. V.

ESCAPE, ROCK OF [Heb. *sela' hammaḥlᵉqôṯ*–'the rock of divisions' (1 S. 23:28)]; AV SELA-HAMMAHLEKOTH; NEB DIVIDING ROCK. The place in the wilderness of Maon where Saul had to forego his pursuit of David in order to go fight the Philistines (vv. 27f.). In this context the RSV rendering seems superior to both the AV's transliteration and the NEB's "Dividing Rock," although the primary sense of *ḥālaq* is "divide" (but cf. Akk. *ḫalāqu*, "escape," and a secondary meaning of Heb. *ḥālaq*, "be smooth, slippery," hence "slip away"; cf. also KD; BDB, p. 325). The place is perhaps to be identified with Wâdī el-Malâqi, about 20 km. (12 mi.) ESE of Hebron. G. A. L.

ESCHATOLOGY es-kə-tol'ə-jē [<Gk. *éschatos*–'last']. The doctrine of the last things. Included are two distinct but inseparable questions: the destiny of the individual — life, death, immortality, the intermediate state, and resurrection; and the destiny of history — the Day of the Lord, the end of the world, judgment, and the kingdom of God in the new world. Traditionally, eschatology has been concerned primarily with the destiny of the individual; but in biblical eschatology, individual destiny must be understood in connection with the destiny of history as a whole.

X. Consummation

I. Recent Criticism.–In modern times "eschatology" has come to mean much more than the events that will attend the end of the world; the basic stance of the interpreter will determine to a large degree his attitude toward eschatology. (1) Orthodox theologians have often regarded the Bible as a storehouse of texts whose proper interpretation and arrangement would lead to the correct program of the final events. One of the most vigorously debated questions among these theologians is whether the consummation

will include an interval between the parousia of Christ and the final judgment (premillennialism) or whether the Parousia will be immediately followed by the judgment and the new world (amillennialism). The older view held by many orthodox theologians, that the gospel would so prevail in the world that the kingdom of God would be established within history through the effective agency of the Christian Church, has today few proponents (see R. Campbell, L. Boettner). *See* MILLENNIUM.

(2) One particular school within orthodox circles has exercised great influence, namely, dispensationalism. The heart of this system is not, as has often been supposed, seven dispensations; it is rather that there are two peoples of God, Israel and the Church, for whom God has different programs and different destinies. This basic premise rests upon a strictly literal interpretation of the OT. The OT promises that Israel will be God's people forever and the promises that the nation will be restored in Palestine to rule over the Gentiles are taken as the basic program for eschatology; the NT is interpreted in terms of this OT program. Therefore, Jesus' proclamation of the kingdom of the heavens was an offer of this earthly nationalistic kingdom to the nation Israel. The Sermon on the Mount is the new law for the earthly kingdom. The Olivet Discourse and the Revelation of John are largely concerned with the eschatology of the Jewish nation, not with the Church; for the Church belongs to the "Great Parenthesis" in God's program for Israel. In this system the millennium is quite essential, for only in this period can the promises of God to Israel be fulfilled.

(3) Albert Schweitzer's epoch-making *Von Reimarus zu Wrede* (1910; Eng. tr. *QHJ*) interpreted Jesus as a Jewish apocalyptist whose entire mission centered upon the proclamation of the imminent catastrophic end of the world and the inbreaking of the apocalyptic kingdom of God ("thoroughgoing" or "consistent eschatology"). Jesus died in disillusionment because the end did not come; but Paul and the early Church believed that in His death and resurrection the messianic age had indeed begun, and that the blessings of the eschatological era were actually experienced (A. Schweitzer, *Mysticism of Paul the Apostle* [Eng. tr. 1931]). Other scholars have accepted this thesis as the key to the understanding of Paul (H. J. Schoeps, *Paul* [Eng. tr. 1961]).

(4) C. H. Dodd moved "realized Eschatology" back from Paul to Jesus Himself and made it the central fact in NT theology. In the person and mission of Jesus the eschatological crisis was present; the kingdom of God *has come*. The apocalyptic language in which Jesus described this present crisis was only a symbolic representation of that which stands beyond history — the absolute, the "wholly other," which in His person has entered into time and space (*Parables*). The early Church at first misinterpreted Jesus' "realized eschatology" because of its familiarity with Jewish eschatology, thus making two days out of what had been for Jesus a single Day of crisis. Thus Paul's letters reflect a good bit of Jewish apocalyptic eschatology; but finally the Gospel of John recovers the "realized eschatology" of Jesus, and the crude apocalyptic notions are refined away (*Apostolic Preaching*).

(5) Eschatology becomes existentialism in the theology of Rudolf Bultmann. Eschatology, realistically conceived, is mythology and is alien to a modern world view. Historically, Jesus was an apocalyptic prophet; but His eschatological perspective was only the reflex of His intense God-consciousness, before which the world seemed to fall away and be at its end. Indeed, when confronted by the demand of God, the person who answers by responsible decision does enter into eschatological existence. He comes to the end of his old life — he is freed from his past; and he enters into newness of life — he is open to the future.

(6) An increasing number of scholars recognize that there is truth in both consistent and realized eschatology; that the OT hope is in some real sense fulfilled in the person and mission of Christ, while the consummation of the hope awaits an eschatological consummation (Kümmel; Cullmann; Schnackenburg; see Ladd, *Jesus and the Kingdom*). The present article is written from this perspective of *Heilsgeschichte* or "biblical realism"; its primary purpose is not to attempt a systematic structuring of eschatological teaching but to show the integral role of eschatology in the biblical teaching of redemption.

II. The OT Hope.–NT eschatology can be understood only when interpreted against its OT background. Furthermore, the relation between OT and NT eschatology can be best understood in the light of progressive revelation in the terms of *Heilsgeschichte*, "redemptive history." The OT hope is set forth primarily in terms of God's dealings with the nation Israel and the economy of the old covenant; the NT reinterprets Israel as the Church and provides a more refined description of the fulfillment of God's redemptive purpose. The OT, therefore, must be interpreted in terms of the NT fulfillment.

The OT does not predict the era of the Christian Church. Ezekiel provides the fullest program of the eschatological hope. Israel is to be restored to the land (Ezk. 34:11-16) under a Davidic prince (37:24), to be converted (36:26), and enjoy the blessings of a covenant of peace (34:25), with God's sanctuary established in their midst forever (37:28). After the restoration of Israel under the blessings of God's kingdom, there will occur a final eschatological war (38–39), which will be followed by the final state of blessedness as described in great detail in terms of the OT cult (40–48). The life-giving river flowing from the temple (Ezk. 47:12) is redefined in Revelation as the river of life flowing from the throne of God (Rev. 22:1f.). Similarly, Isaiah sees a new heaven and a new earth (Isa. 65:17; 66:22), but death and sin still exist (65:20). Here is a fundamental characteristic of biblical eschatology: the description of the future in terms of known human experience.

A. General Features. Several features characterize the OT hope. It is, first of all, a *dynamic* hope; i.e., it is a hope in God more than in the future. The most fundamental idea in OT eschatology is "the God who comes." God will finally visit His people in both judgment and salvation. Behind the eschatological hope is the historical experience of divine visitations. God came down to deliver Israel from Egypt and to make them His people (Dt. 33:2, 5); God comes in history to visit His people with judgment as well as deliverance (Mic. 1:3f.); God even comes to deliver His individual servant in times of trouble (Ps. 18:6-15 [MT 7-16]). This same God will finally visit His people to bring them into the fulness of His salvation (Zec. 14:3, 5; Isa. 29:6; 35:4; 59:20), to punish the wicked (Isa. 26:21; 2:21; 63:1-6; 64:1ff.; 66:15f.; Zeph. 3:8), and to bring salvation even to the Gentiles (Isa. 66:18ff.; Zec. 2:10f.). Thus Israel's eschatological hope was rooted in history, or rather in the God who comes in history.

The OT hope may properly be called *eschatological*. The definition of eschatology and the use of the term to designate the OT hope have been vigorously debated. Some have insisted that eschatology properly refers to a great drama of the end time in which the age of this world ends and a new eternal age of salvation is introduced, i.e., it must include the dualistic concept of the two ages (Mowinckel, p. 125). Allied with this view is the critical hypothesis that two very different kinds of hope are found

in the OT: the prophetic and the apocalyptic (or eschatological; see Mowinckel; Bousset; Volz; Bultmann). The prophetic hope is entirely historical and earthly, centering upon the nationalistic hopes of Israel and her triumph over his enemies under the leadership of a Davidic king. This kingdom did not come to pass. Instead, after the restoration Israel found herself in Palestine, a small, weak nation, subjected to the rule of one pagan nation after another. Finally came the proscription of the Jewish religion by Antiochus Epiphanes, accompanied by fierce persecution and martyrdom. Under the burden of such experiences and the influence of Persian dualistic ideas, there emerged another kind of hope — the eschatological or apocalyptic, which despaired of history as the scene of God's kingdom and saw the kingdom coming only beyond history, in a transcendent order. Instead of a historical Davidic king, this dualistic hope posited a heavenly supernatural Son of Man as the messianic ruler. The prophetic hope expects a kingdom to arise within history; the apocalyptic hope expects the kingdom to come from outside of history. This distinction between the prophetic and apocalyptic kinds of hope has played a significant role in the contemporary discussion of eschatology.

Other scholars, however, recognize that the prophetic hope itself involves a divine breaking into history. "There is no eschatology without rupture" (Jacob, *Theology of the OT,* p. 318; see Frost; North; Vriezen). The sharp distinction between a prophetic historical hope and an apocalyptic transcendental hope is a structure of modern critical ideas about history which does not do justice to the biblical concepts (see C. C. McCown, *HTR,* 38 [1945], 151-175). The OT conceives of God as acting redemptively in history, and as finally bringing history to its consummation in the kingdom of God. History does not produce the kingdom; for evil has befallen both men and nature. Nothing less than a mighty inbreaking of God can avail to accomplish redemption.

Therefore the OT hope may properly be designated a *historical* hope, i.e., it has its setting within history and is viewed as the final term of God's acting in history. The biblical perspective does not allow for the sharp disjunction between "history" and "beyond history" that is often found in contemporary theology. The cleavage between history and eschatology in the OT is never radical, for the God who will reveal Himself by a grandiose theophany in the eschatological consummation has already manifested Himself and does not cease manifesting Himself in the course of history. Therefore all historical events in redemptive history are already charged with eternal significance (Jacob, p. 318).

That eschatological redemption means redemption of history is illustrated by the use of the expression, "the last (or latter) days" to designate the final redeemed state. This phrase in itself has no intrinsic eschatological significance but refers only to a period of time in the indeterminate future (Gen. 49:1; Nu. 24:14; Dt. 4:30; 31:29). It is used to designate the final period of time when God's kingdom of peace and blessedness will be realized (Isa. 2:2-4) and Israel will be redeemed under a Davidic king (Hos. 3:5). In Ezk. 38:16 it is used of the time of the eschatological war after Israel has been restored.

This view of the future, as including both the near and the far, involves what may be described as a tension between history and eschatology. This is illustrated by the fact that "the Day of the Lord" designates an imminent, purely historical judgment (Am. 5:18, 20, 27; Jer. 46:10) and also the eschatological event lying behind it (Isa. 2:12-22). A profound theology lies behind this phenomenon: the God who acts in history is also the God who will act at its eschatological consummation to accomplish a single redemptive purpose. In other words, the OT hope is not largely concerned about questions of chronology or sequence or the time of the consummation; it is concerned about God and His redemptive working. The purpose of prophecy is not to satisfy curiosity about the future, nor even to give to God's people a guaranteed future; it is rather to let the light of the future shine upon the present that God's people may be brought into conformity with His will.

This tension between history and eschatology explains an important characteristic of a number of prophecies: the immediate historical and the more remote eschatological are blended together as though they constituted a single event. The destruction of Babylon at the hands of the Medes is described in eschatological terms as though it constituted the end of the world (Isa. 13). Some unknown historical danger is described in Zephaniah in terms of a cosmic catastrophe. In Joel (1:4-7), the judgment of locusts and drought so blends into the eschatological judgment that it is impossible to be sure when one leaves off and the other begins. The critic fails to grasp the character of the OT hope when he analyzes such prophecies into two disparate types of expectation, or concludes that the historical is authentic and the eschatological a later accretion. The tension between history and eschatology is of the essence in the biblical hope, for hope is in God, not in the future.

The OT hope is *earthly* in character. The eschatological redemption includes the realm of nature and the world, for both man and the world are God's creation and both have suffered under the burden of evil. The evil that curses the world must be judged and cleansed (Isa. 51:6; 13:13; 34:4), and a new order of righteousness and blessedness created (Isa. 35:1-10; 11:6-9; Am. 9:13f.). This new order can be brought about only by the coming of God — a glorious theophany. But the new order that emerges is always earthly. Even the new heavens and the new earth of Isa. 65–66 are described in this worldly terms. The theology underlying this description is that man as creature stands in solidarity with the created world and even in the new age remains a creature.

This new order usually is seen as arising from the single eschatological visitation of God. In Ezekiel, the usual pattern is modified into two stages: first, Israel is restored to the land and enjoys the blessings of God's rule (Ezk. 34–37); then after the kingdom occurs an eschatological war with Gog and Magog (Ezk. 38–39), after which is seen, in very symbolic form, the final redemption when God forever dwells among His people, receiving their perfect worship (Ezk. 40–48). Seldom, however, are the prophets concerned about such sequences; their entire attention is focused upon the divine visitation for salvation and judgment. Questions that concerned later Judaism, such as the Days of the Messiah and the age to come, do not appear in the OT.

One reason for this is that the OT hope has above all an *ethical* concern. The prophets were not primarily concerned about the future but with God's people in the present. Prophets who promised peace instead of judgment were false prophets (Jer. 14:13-16). Indeed, Amos rebukes the popular hope of his day, that the Day of the Lord would bring certain salvation to Israel. Instead, that Day will be darkness and not light (Am. 5:18-20). The Day of the Lord will mean judgment for Israel as well as for the Gentiles; but beyond judgment is salvation both for Israel and the Gentiles. The prophetic announcements have as their main concern the divine demand for obedience and faithfulness in light of the total redemptive purpose of God.

Because of the ethical character of the OT hope, the

eschatological salvation of Israel is viewed not in particularistic terms but in terms of a converted *remnant*. Israel as a nation is sinful and doomed. The name of Hosea's son, Lo Ammi, illustrates that Israel as such is no longer God's people (Hos. 1:9). The Day of the Lord will mean national doom (Am. 5:18-20; 9:8a). "Never again, so far as we know, did a prophet seek to reform the state by direct political action" (J. Bright, *Kingdom of God* [1953], p. 66). Yet a remnant is to be saved (Am. 9:8b; Isa. 4:2-4; 10:20-22; 37:30-32), converted (Jer. 31:31-34; Ezk. 36:22-32; Joel 2), and restored to the land in righteousness. To the Gentiles is assigned a diverse destiny. Sometimes the prophets anticipate an eschatological war between converted Israel and the Gentiles (Mic. 4:11-13; Isa. 31:4-9; Ezk. 38–39; Joel 3:9-16; Zec. 12:1-9); sometimes the Gentiles will serve Israel (Am. 9:12; Mic. 5:9; 7:16; Isa. 45:14-16; 49:23; 60:12, 14); sometimes they are seen as converted and worshiping the God of Israel (Zeph. 3:9; 20; Isa. 2:2-4; 42:6f.; 60:1-14; Zec. 8:20-23; 14:16-19).

The OT prophets have diverse *messianic concepts*. The most common view is that of a Davidic messianic king who will reign in the eschatological kingdom of God (Pss. 2, 110; Isa. 9, 11). The king does not establish the kingdom but rules when the kingdom has been established by God. This figure plays an important role in later Jewish expectations as the Lord's Anointed, or Messiah (Ps. Sol. 17).

A second figure is the Suffering Servant of Isa. 52–53. The prophet describes an unidentified humble figure who comes to bring salvation through suffering and death. This figure is not identified with the messianic king, although Isa. 55:3f. may suggest such an identification. A humble king does appear in Zec. 9:9, and a smitten shepherd in Zec. 13:7-9. Later Judaism did not know how to relate this figure to that of the Messiah. J. Jeremias has attempted to prove that such an identification actually existed in Judaism (*Servant of God* [2nd ed. 1965]), but his evidence is tenuous.

A third messianic personage is the Son of man, or rather "one like a man" in Dnl. 7:13f. It is not altogether clear that this figure is to be identified as a distinct person in Daniel, for in the interpretation the "one like a man" disappears and the kingdom is given to the people of God. Thus the "one like a man" may be only a symbol for God's people; but since he comes to the throne of God to receive the kingdom, he is probably a supernatural heavenly being representing the people of God who on their behalf will receive the kingdom of God and reign in it. In any case, this heavenly figure became very important in Judaism as the supernatural agent of God's rule and judgment on earth (1 En. 37–71; 2 Esd. 13:3).

The OT does not conflate these messianic figures; they stand as three distinct concepts, without indication as to how they are related to each other or how there could be such diversity in the coming of God's kingdom.

B. Individual Hope. A question standing apart from the eschatology of God's people and the world is the fate of the individual. The OT pictures the dead as descending to Sheol (translated "grave," "hell," or "pit" in the AV). Sheol is pictured as a place beneath (Ps. 86:13; Prov. 15:24; Ezk. 26:20), a region of darkness (Job 10:22), the land of forgetfulness (Ps. 88:12 [MT 13]; 94:17; 115:17). Here the dead, who are gathered in tribes as in life (Ezk. 32:17-32), receive the dying (Isa. 14:9f.). The dead exist not as souls or spirits capable of existence apart from the body, but as "shades" (Ps. 88:10 [MT 11]; Prov. 9:18; Isa. 14:9). This shadowy, unsatisfying state of the dead is not meant to describe the geography of Sheol; it is rather the OT way, shared through general revelation with other ancient religions, of expressing the conviction that death does not terminate human existence. Sheol is not so much a place as the state of the dead (Jacob, p. 304). It is not nonexistence; but from the OT perspective, it is not life, for life can be enjoyed only in fellowship with God (Ps. 16:10f.). In a few places God gives the added revelation that since He is the living God, He will not abandon His people to Sheol but will bring them into the enjoyment of life in His presence (Ps. 16:9-11; 49:15 [MT 16]; 73:24; Job 19:25).

The concept of the resurrection of the body is found in only a few references, but it is a logical and necessary conclusion from the OT concept of humanity and God. A person does not consist of separate parts — flesh, soul, and spirit. Rather, these terms are different ways of viewing a single dynamic person. Both life and death involve the whole person. Therefore, while the concept is not developed, the OT anticipates ultimately the resurrection of the body (Isa. 25:8; 26:19) and the final participation of God's people in His kingdom (Dnl. 12:2). Belief in the resurrection is rooted in the confidence that God is the living God and therefore cannot abandon His people to death.

III. The NT Hope.—*A. General Structure.* The OT hope that the kingdom of God cannot be produced by history but only by a glorious theophany, which will redeem a fallen order and issue in both a transformed society and a renovated world, was developed in Judaism in various directions. Sometimes the contrast between the present and the future is relatively small; sometimes it is so great that the future is viewed in altogether transcendental terms, having nothing to do with this world or human history. 1 En. 1–36 pictures the kingdom in very materialistic terms. Ps. Sol. 17–18 pictures a Davidic messiah arising from among mankind, supernaturally endowed to destroy his enemies and to inaugurate an earthly kingdom with Jerusalem as its capital and the Jews triumphant over their foes. On the other hand, 1 En. 37–71, which pictures a radically transformed earth (45:5; 51:4f.), develops the motif of Isa. 65–66. Some scholars find in these Similitudes of Enoch a completely transcendental hope; but the kingdom remains on earth, even though radically transformed. The messianic person of the Similitudes is a supernatural, preexistent Son of man who has been kept in heaven since creation and who will come to earth and sit on the throne of his glory (47:3; 51:3; 62:5) to judge the living and the resurrected dead (51:1-5). A completely transcendental eschatology is found in 1 En. 92–105, where the final redemption will witness a new heaven but not a new earth (91:16). The righteous will be raised from Sheol (92:3-5), but not in bodily form. The portals of heaven will be open to them (104:2), and they will become companions of the hosts of heaven (104:6) as disembodied spirits (103:4).

This brief survey suggests that different apocalypses (the term given to this type of writing) dwelt upon various OT pictures of the future, some emphasizing one aspect and some another. Some prophets had described the future in very earthly terms, while Isa. 65–66 looked for a new order so different it could be called a new heaven and a new earth. Some apocalyptists emphasized the earthly aspect of the OT hope, sometimes in very sensuous terms. Others, pondering the implication of a new heaven and a new earth, tried to picture what this transformed order would be like. Two first-century A.D. apocalypses combined the two ideas of a very earthly kingdom followed by the new creation (2 Esd. 7; 2 Bar. 29–30). Charles has said that these conceptions are in germ and principle as old as Isa. 65–66 (*Apocalypse of Baruch*, p. 81). These two forms of the kingdom are found also in rabbinic terminology and are called "the days of the Messiah" and "the age to come" (see Klausner, pp. 339, 354-365, 408-419).

The NT, like Judaism, does not abandon the centrality of the eschatological hope in its teaching of redemption. Indeed, the meaning of the person and work of Jesus is set within this *heilsgeschichtliche* perspective. But the NT, like Judaism, employs a terminology that goes beyond the OT, by which it expresses the same redemptive structure as that implicit in the OT. The present "historical" order and the eschatological redeemed order are set more sharply over against each other by the Greek terms *houtos ho aiōn, ho nyn aiōn, ho enestōs aiōn,* "this age," "the present age" (Mt. 12:32; 13:22; Lk. 16:8; Rom. 12:2; 1 Cor. 1:20; 2:6, 8; 3:18; 2 Cor. 4:4; Gal. 1:4; Eph. 1:21; 2:2; 6:12; 1 Tim. 6:17; 2 Tim. 4:10; Tit. 2:12), and *ho aiōn ekeinos, ho aiōn mellōn, ho aiōn erchomenos,* "that age," "the coming age" (Mt. 12:32; Lk. 18:30; 20:35; Eph. 2:7; He. 6:5). This terminology emerges at about the same time in Jewish literature (2 Esd. 7:50, 113; 8:1; 2 Bar. 14:13; 15:7; Mish. *Aboth* iv.1, 21f.; vi.4, 7) and appears in the rabbinic literature as *'ōlām hazzeh* and *'ōlām habbā'* (Klausner, pp. 408ff.; Volz, *Eschatologie der jüdischen Gemeinde* p. 65). This terminology is implicit in 1 En. 16:1; 48:7; 71:15, but the earliest explicit references do not appear to be earlier than the last part of the 1st cent. A.D. While it is possible that a piece of Jewish theology has by divine revelation been incorporated into the NT teaching (Vos, p. 28), it is also possible, if the Gospels accurately represent Jesus' teachings, that He was the first to use this terminology. In any case, the same basic structure emerges at about the same time in the NT and in Jewish thought. Many scholars attribute this dualistic eschatology to Persian influence, but such a hypothesis is not necessary. The idea of the two ages separated by a glorious theophany is a natural development of the OT hope (W. D. Davies *Setting of the Sermon on the Mount* [1964], p. 121), for it develops the dual idea of the earthly and the supramundane character of the eschatological Kingdom (Eichrodt, *Theology of the OT,* I, 491).

While the NT reflects the same basic eschatological structure as Judaism, at an all-important point it stands apart from Jewish thought. The prophets taught eschatology with the ethical purpose of confronting a disobedient and sinning people with the will of God seen from the perspective of His total redemptive purpose, which involved both judgment and salvation. Therefore, they viewed history in the light of eschatology, interpreting both in the light of God's redemptive acts in history.

Jewish apocalyptic thought lost the sense of God's acting in history. As never before in Israel's history, the people were obedient to the law; and in Maccabean times many chose torture and martyrdom rather than break the law. Here was a dark enigma: an obedient, righteous people enduring tragic, crushing evil. The apocalypses offer a solution to this problem of theodicy: God is no longer redemptively active in history to deliver His people but has surrendered this age to evil demonic powers (1 En. 9:11; 42:3; 89:58, 71, 75). God's righteous people (2 Esd. 6:55-59) are enduring evils that are inexplicable (2 Esd. 4:12; 7:66). The solution is found in the hope of God's imminent coming to end the corrupt age, to destroy the powers of evil, and to bring Israel into the blessedness of the kingdom. Eschatology is altogether severed from history; salvation is exclusively eschatological.

The most distinctive difference between NT and Jewish apocalyptic thought is that the NT, like the prophets, again roots the eschatological consummation in God's redemptive working in history. The mission of Jesus in history is seen as the fulfillment of the OT promise, which in turn makes possible the eschatological consummation.

O. Cullmann has structured this distinctive element by making Christ the new center of the redemptive time line (*Christ and Time*). Judaism placed the center at the eschatological transition point between the ages; the gospel retains this eschatological structure but changes the center to the person and work of Jesus in history. Long before Cullmann, Vos had expressed this idea even more vividly by saying that the redemption wrought in Christ had in fact set in motion the eschatological process so that the age to come had in principle become present. Vos described the redemptive realities in Pauline thought as "semi-eschatological" (p. 38).

This means that the OT promise of eschatological redemption is fulfilled in two redemptive acts: in the mission of Jesus in history and in His parousia at the end of the age. What is seen in the OT as a single great Day of the Lord has become two days. This idea has been widely accepted in modern biblical theology; it means that the age of the Church is a period "between the times," in which the two ages, as it were, overlap. Therefore, instead of speaking of a new center in the time line of redemptive history, it would be more accurate to say that there are two pivotal points: the Incarnation and the Parousia, which are interrelated and equally essential in the accomplishment of redemption. This structure of "realized-futuristic" eschatology is the unifying factor in the diversity of NT thought. It also renders all NT truth essentially eschatological in character.

B. Synoptic Gospels. The two central themes of the Synoptic Gospels are the kingdom of God and the messianic mission of Jesus. In these two themes is a pattern of fulfillment of the OT hope within the structure of eschatological dualism. In Jesus' mission, God is fulfilling the OT promises; yet the consummation of the promise awaits the age to come, which is always future. Fulfillment is the note with which Mark introduces his Gospel (Mk. 1:14f.); and Luke deliberately sets the sermon in Nazareth at the beginning of his Gospel to sound the note of fulfillment (Lk. 4:18-22). Jesus' disciples were witnessing the events that the OT saints had longed to see (Lk. 10:23f.). In response to the perplexity of John the Baptist, Jesus asserted that the promise of Isa. 35:5f. was being fulfilled. Yet the fulfillment occurs in this age; the consummation awaits the eschatological age to come.

Here is a new fact in redemptive history: the messianic hope, which the OT anticipated as a single great Day of the Lord, even though it had historical antecedents, is in fact fulfilled in two acts — one within history, the other at the consummation of history. This means that the historical event that occurred in the person and mission of Jesus is essentially eschatological, and that the eschatological is the consummation of the historical. Apart from the historical, the eschatological could never come to pass; but without the eschatological, the historical remains incomplete.

This is why the kingdom of God can be spoken of as both future and present — an idea which, although logically inconsistent, is the heart of Jesus' message. Jesus, like the prophets, looks forward to the perfect establishment of God's reign in a renewed world (Mt. 19:28), when God's people will enter into eternal life in the age to come (Mk. 10:17-31; Mt. 25:31-46). The eschatological coming of the kingdom will mean, positively, the gathering of the elect into salvation (Mk. 13:27) and, negatively, the destruction of Satan and all evil powers (Mt. 25:41) and the exclusion of the wicked from the blessings of the kingdom (Mt. 7:23; 25:12). Their destiny is described sometimes in terms of fire (Mt. 13:42, 50; 25:41) and sometimes in terms of darkness (Mt. 8:12; 22:13; 25:30), both apparently symbolic descriptions of banishment from the presence and blessings of God in His kingdom.

While Jesus proclaims the consummation of the redemptive working of God only in terms of the eschatological consummation in the age to come, it has often been pointed out that He has little to say about the form and character of the kingdom, but chose to refer to it in metaphorical language: the Shepherd will gather His sheep (Mt. 25:32); the pure in heart will see God (5:8); an inheritance is received (19:29); a treasure is accumulated (6:20); thrones and positions of authority are bestowed (19:28); the harvest is gathered into the barn (13:30); the Gentiles will join in a heavenly feast with the patriarchs (8:11) at the table of the Son of man (Lk. 22:29f.) and drink the wine of the new age (Mk. 14:25); the marriage feast is celebrated (Mt. 22:3; 25:10). All of these metaphors describe the restoration of perfect communion between God and mankind which had been broken by sin.

The Gospels also assert that the kingdom of God has become present in history in the person and mission of Jesus, in anticipation of the eschatological consummation. This is most clearly asserted in Mt. 12:28f., where the presence of the kingdom of God means a defeat of Satan (here described as the binding of a strong man), that his goods may be spoiled — i.e., that people held in his power may be delivered. The efforts of the school of "consistent eschatology" to prove that *éphthasen* means *éngiken*, "has come near," forces that language to fit a theory. In advance of his eschatological destruction, Satan has already been defeated and bound. This spiritual victory is again reflected in Lk. 10:18, where the presence of the kingdom in the mission of Jesus' disciples is seen as toppling Satan from his heavenly place of power.

This means that in response to Jesus' mission, believers may enter into the enjoyment of the blessings of the kingdom before its eschatological consummation. This is why the Gospels speak of entering the kingdom in the present (Mt. 21:31; 23:15; Mk. 12:34). The messianic salvation present in Jesus' mission in fulfillment of Isa. 35:5f. is a new era which takes the place of the Law and the Prophets (Mt. 11:11-13). John was the last of the old era; with the message of Jesus, God's kingdom is working powerfully among people (Gk. *biázetai*, Mt. 11:12) and requires a strong response from its hearers. Because of the greatness of these messianic blessings, the "least" who is now in the kingdom, i.e., who has received the reign of God (Mk. 10:15) and entered into the blessings of His reign, is greater than the greatest of the prophets.

The presence of the kingdom means the gift of salvation. Salvation is both eschatological (Mk. 10:26) and present (Lk. 19:9f.). The parables of the lost sheep, the lost coin, and the lost son refer to a present salvation: the seeking of the lost and bringing them, like the prodigal, into restored fellowship with the Father. This anticipation of the eschatological salvation is set forth in the frequently acted parable of table fellowship. Jesus warmly received tax collectors and sinners at dinner (Mk. 2:15f.; cf. Lk. 15:1f.). There is joy in heaven over one sinner who repents (Lk. 15:7); but it is a joy that was anticipated on earth in the table fellowship of Jesus with repentant sinners. So typical was such fellowship that Jesus was accused of being a glutton and a drunkard (Mt. 11:19). Jesus did not observe the Jewish regulations about fasting because the presence of the bridegroom calls for joy, not fasting (Mk. 2:18f.).

Jesus' miracles of healing were a pledge of the resurrection life of the age to come (Lk. 20:35f.) and evidence of the presence of the messianic salvation (Mt. 11:4f.). Bodily healing and "spiritual" salvation, however, belong together. All ten lepers were cleansed and "healed" (Lk. 17:14f.); but to the Samaritan who returned to express gratitude Jesus said, "Your faith has saved you" (Lk. 17:19). The woman in the house of Simon received salvation apart from any miracle of healing (Lk. 7:50).

The presence of the messianic salvation also meant the gift of forgiveness. Forgiveness is a promise for the eschatological consummation (Isa. 33:24; Mic. 7:18-20; Jer. 31:31-34; Ezk. 36:22-28; Zec. 13:1). It was a prerogative belonging to God alone (Ps. 103:3; Isa. 43:25); there is no known Jewish source that expects the messiah on his own authority to forgive sins. This divine messianic forgiveness Jesus brought to mankind. His claim to possess such authority (Mk. 2:10) shocked the scribes (2:7). On their own presuppositions they were in the right; but Jesus forgave sins because He was the Son of man (2:10) in whom the blessings of the kingdom were present.

The messianic salvation meant, furthermore, the gift of righteousness. Righteousness in Judaism was a human activity, achieved by obedience to the law and by acts of mercy. The kingdom of God demands a greater righteousness than did Judaism (Mt. 5:20), but this very righteousness is itself the gift of God (Lk. 18:14; Mt. 5:6).

This emergence of the eschatological in history is the mystery of the kingdom (Mk. 4:11), which is illustrated by the parables of the kingdom (Mk. 4; Mt. 13). The kingdom is present, not in apocalyptic power but like a sower scattering seed; it demands a human response to be effective (the four soils). The kingdom is present without disrupting the course of this age, yet the apocalyptic separation will surely come (tares). The kingdom is present in an outwardly insignificant form (mustard seed, leaven), but eventually it will fill all the earth. Nevertheless, the kingdom even in its present hidden form is like a treasure or a pearl, to be acquired at all costs. In the present, the kingdom creates a mixed fellowship of people among whom are both good and bad; but at the consummation, there will be a separation even of those who profess the kingdom (draw net). In the parables, the present activity of the kingdom in Jesus' mission and the eschatological consummation are two inseparable aspects of a single redemptive work.

The union of history and eschatology is also seen in the nature of Jesus' messiahship. Jesus was the Messiah (Mt. 16:16f.; Mk. 14:61f.), the Son of David (Mk. 10:47; 11:10; Mt. 15:22; 20:30), but in a radically reinterpreted sense. Even as the mystery of the kingdom means the presence of the kingdom in a new and unexpected form, so Jesus' messianic mission did not involve eschatological judgment nor a political role. In fact, He firmly refused to play any political role (Jn. 6:15), for His mission was a spiritual one. Therefore He did not proclaim Himself Messiah, for such an announcement would have been misunderstood. His favorite self-designation was Son of man, derived from Dnl. 7. As Son of man, He has an eschatological mission at the consummation, when He will come in glory and power to destroy the powers of evil and to judge mankind (Mk. 13:26; 14:62; Mt. 13:41; 25:31). The eschatological Son of man, however, must first appear among mankind in history, in weakness and humiliation (Mt. 8:20) to fulfil a mission of suffering and dying in order to effect the messianic salvation (Mk. 8:31; 9:31; 10:45; 14:41). It was utterly unforeseen and unexpected that the eschatological Son of man should first fill the role of the Suffering Servant of Isa. 53 before coming as the heavenly judge. Indeed, the future destiny of men is determined by their reaction to Jesus as the lowly Son of man (Mk. 8:38). In some way not explained by the Gospels, the death of Jesus is an essential element in the coming of the eschatological kingdom (Mk. 14:25).

Jesus' reported teachings contain the so-called Olivet Discourse (Mk. 13; Mt. 24; Lk. 21:5-23). While this dis-

course obviously owes its present diverse form to the Evangelists, it does not contradict the teachings of Jesus as a whole, and it may be accepted as an accurate report of the substance of His eschatological teaching. Many scholars do not accept this conclusion but feel rather that the Evangelists embodied in part or in toto Jewish apocalyptic materials (see Beasley-Murray, *Jesus and the Future*). The "signs" of the end (Mk. 13:5-13) do not, however, provide a means of calculating the imminence of the end. In fact, they are not eschatological signs at all, for the discourse itself says that certain events will occur, "but the end is not yet" (Mk. 13:7). These are therefore signs of the delay of the end. They are only the "beginning of woes" (Mk. 13:8), which will mark the entire age until the end comes. Furthermore, the motif of these so-called signs is different from that of the messianic woes in the apocalypses (cf. 2 Esd. 4:52ff.; 6:18ff.; 8:63ff.; 1 En. 80:2ff.; 99:1ff.; Jub. 23:16ff.; Sib. Or. 2:199ff.; 2 Bar. 25:1ff.; 48:31ff.; 70:2ff.). The discourse also differs from the apocalypses in that it makes no use of pseudonymity, it is not based upon heavenly revelations or visions, and it does not rewrite history in the guise of prophecy. It is a prophecy of the future and in both form and language stands closer to the prophets than to the apocalyptists.

The central problem of the discourse is that it deals with two events: the destruction of the temple at the fall of Jerusalem, and the parousia of Christ at the eschatological consummation (Mk. 13:1-4; Mt. 24:1-3). The Evangelists, in compiling the discourse, have emphasized these two aspects differently. Mark and Matthew emphasize the eschatological aspect and Luke the historical (Lk. 21:20-23). In fact, Jesus views the future as did the prophets: He sees in the near future a historical judgment — the destruction of Jerusalem — that is an anticipation of the eschatological desolating sacrilege, or Antichrist. At this point, he again stands apart from the apocalyptists, who had lost the sense of God's acting in history. The two notes of time (Mk. 13:30-32) probably refer to these two facets of the future. "All these things" in Mk. 13:30, which are to occur within a generation, cannot include the end itself, for v. 29 has just used the same phrase to anticipate the end. To say, "When you see the Son of man coming, you know that he is near," is impossible. Therefore, the day and hour of the eschatological end is known only to the Father (Mk. 13:32); but the signs and events that are to precede the end, including the fall of Jerusalem, do not belong to the remote future but will begin to take place in the present generation (Cranfield, *SJT*, 6 [1953], 298).

The motif of Mk. 13:1-13 is that this age is to retain its evil character down to the very end. Evils will continue to occur in nature and in human society, and the disciples of Jesus will find themselves caught up in the same spiritual struggle in which Jesus Himself engaged, and will therefore suffer persecution and even martyrdom. God has not, however, abandoned the age of evil, as the apocalyptists thought; on the contrary, the good news of the kingdom is to be proclaimed in all the world before the end comes (Mk. 13:10; Mt. 24:14).

The evil that is to press heavily upon Jesus' disciples throughout the age will undergo a terrible intensification at the end. A desolating sacrilege (foreshadowed in the Roman intrusion into the temple in A.D. 66-70) will appear, which will bring persecution and martyrdom to a terrible climax (Mk. 13:9-20). The parousia of the Son of man will be attended by a cosmic catastrophe that will shake the established order (vv. 24-26), and the Son of man will appear in glory to gather His elect into the kingdom of God (v. 27). Nothing is said about resurrection or judgment, but these must be assumed.

Mark concludes the address (Mk. 13:33-37) with a motif, enlarged by Matthew with materials from Q (Mt. 24:37-51) and M (ch. 25), that again sets the Gospels apart from the apocalypses: a strong ethical emphasis, addressed to Jesus' disciples, that the eschatological consummation will mean judgment for those who are spiritually asleep. The apocalypses were written to encourage the righteous in persecution with the sure hope of imminent eschatological salvation; the Olivet Discourse challenges the Church with spiritual alertness lest the Day be one of judgment. This is particularly evident in the parable of the ten maidens (Mt. 25:1-13), which teaches that among Jesus' disciples (i.e., in the Church) are those who are spiritually unprepared for the Parousia and who will therefore be excluded from the wedding feast. The story of the talents (25:14-30) teaches that some among the professing servants of Christ will prove faithless and will be shown at the consummation not to have been servants at all. As in the prophets, eschatology has primarily an ethical orientation. It sheds the light of God's future upon His people in the present.

The Olivet Discourse in Matthew concludes with a prophetic parable of judgment (25:31-46). A common sight in Palestine is a small flock of sheep and goats mixed together, which are separated at night. Jesus announced that the eschatological consummation will witness a separation of all people on the principle of how they have treated His disciples as they go about preaching the gospel of the kingdom. The setting of this prophecy is the preaching missions of Jesus' disciples when they were dependent upon a friendly welcome both to get a hearing for their message and to find food and lodging (Mt. 10:9-15; Lk. 10). Jesus' disciples — His "brethren" (Mt. 25:40; cf. 12:48-50) — stand in such close relationship to Him that the treatment they receive is in effect treatment administered to Christ Himself (10:24, 40, 42). They will suffer maltreatment, they will be hungry, ill-clothed, sick, and imprisoned; but those who hear their message and receive the messengers in kindness and love will thereby show that they have responded to the message of the kingdom and will inherit this blessing in the eschatological judgment. This parable is designed not to provide a program of the future but to state in vivid terms the principle on which the final judgment will be carried out. The disciples of Jesus carry the destiny of the nations with them in their preaching of the gospel.

C. Fourth Gospel. The eschatology of the Gospel of John must be studied apart from the Synoptics because its entire emphasis is different and many scholars feel it has altogether lost the futuristic eschatology of the Synoptics. The difference in emphasis must be frankly admitted. The central theme of the Synoptics is the presence of the eschatological kingdom of God; John has almost nothing to say about this theme (3:3, 5). On the other hand, John's central theme is eternal life as a present possession (20:31; 3:36); the Synoptics say very little about eternal life, and that little refers to life as the eschatological blessing of the age to come (Mk. 10:17, 30; Mt. 25:46). It is a gross disservice to biblical studies to gloss over such distinctive differences.

This obvious difference of emphasis does not, however, mean that we have two contradictory theologies or that John has quite surrendered the futuristic eschatology of *Heilsgeschichte* in favor of a completely realized (Dodd) or existential (Bultmann) interpretation. That in John eternal life is still the life of the age to come is proven by 12:25. While the Gk. *aiōn* does not here appear, *kósmos* is its

equivalent (as is proved by comparing 1 Cor. 3:19; 5:10; 7:31; Eph. 2:2 with 1 Cor. 1:20; 3:18; 2:6). This saying reflects more distinctly the dualism of the two ages than does its parallel in the Synoptics (Mk. 8:35; Mt. 10:39; 16:25; Lk. 9:24; 17:33); and the eternal life in this verse belongs to the coming age. The eschatological character of eternal life is reflected also in Jn. 4:36; 5:39; 4:14; 6:27; 5:29.

This eschatological life has been brought to mankind in history in the person and mission of Jesus. That eternal life is now present does not empty the concept of its eschatological character, any more than the synoptic presence of the kingdom of God annuls its eschatological character. In fact, here is the analogous structure of futuristic-realized eschatology which gives the Synoptics and John the same underlying theology even though the form of expression is different. Both the kingdom of God and eternal life belong to the age to come, yet both have, by virtue of Jesus' mission, become objects of present experience. As Mk. 10:17,25 equate eternal life with the future eschatological kingdom, Jesus' discourse with Nicodemus equates the kingdom of God with eternal life (Jn. 3:6; cf. v. 36). So in the Synoptics, to "inherit eternal life" and to "enter into the kingdom of God" seem to be interchangeable terms (cf. W. F. Howard, *Christianity According to St. John* [1946], p. 112).

Another Johannine illustration of the contemporizing of eschatology is quite lacking in the Synoptics. In spite of his strong emphasis upon realized eschatology, John has more to say about the Resurrection than do the Synoptics. The Resurrection continues to be an eschatological event at the "last day" (5:28f.; 6:39, 44, 54; 11:24; cf. 12:48). Although Bultmann's critical excision of such sayings is a desperate expedient (*Theology of the NT*, II, 39), resurrection in John is contemporized: it has become a present spiritual experience (5:25). But the present is linked with the future. Only those who have been spiritually raised will enter into life at the last day.

The eschatological judgment is also contemporized. Judgment is still an eschatological event at the last day (Jn. 12:48; 5:28f.), but the future judgment has reached back into the present because of the mission of Christ; and the eschatological judgment will be the execution of the sentence of condemnation that has in effect been determined on the basis of response to the person of Christ here and now (3:18f.; 5:24). While the language is different, the same idea that a person's future destiny depends upon his or her present relationship to Jesus appears in the Synoptics (Mt. 10:32f.; cf. Mk. 8:38; Lk. 12:8f.).

John has little to say about the Parousia. Many critics conclude that John deliberately substituted the long discourse in the upper room (chs. 14–17) for the Olivet Discourse, and in doing so meant to replace apocalyptic eschatology by an altogether realized eschatology. It must be recognized that John's emphasis is very different. John does describe the coming of the Holy Spirit as a coming of Christ to be with His bereft disciples (14:18, 28). However, Dodd's conclusion that "all that the Church hoped for in the second coming of Christ is already given in its present experience of Christ through the Spirit" (*Apostolic Preaching*, p. 174) ignores the force of such sayings as 21:22. The promise to come to His disciples (14:3) includes the Parousia as an integral element in the Johannine doctrine. The same realistic eschatology appears in 1 Jn. 2:28 (Dodd attributes the Epistles to a different author).

In conclusion, while John focuses attention upon the realized aspect of eschatology, he has the same basic tension between futuristic and realized eschatology as have the Synoptics. In both, the consummation of God's redemptive purpose will occur in the age to come; but the life and blessings of the consummation have entered into history in the person and mission of Jesus.

D. Acts. If the Gospels interpret the mission of Jesus and His proclamation of the kingdom of God as a fulfillment in history of the OT eschatological hope whose consummation awaits the age to come, Acts sees in Easter and Pentecost a new depth of meaning in the same eschatological fulfillment. Thus the eschatological tension appears but in a different form. Modern criticism has recognized that the resurrection of Jesus, His enthronement at the right hand of God, and the coming of the Holy Spirit are essentially eschatological events and mean that in some real sense the messianic age has begun (Schweitzer; Schoeps; Dodd; Davies). Dodd has gone too far, however. It is too much to say, as he does, that the *eschaton* has come. In the age to come, the present order of evil, death, and trouble will be transformed into perfect righteousness, life, and blessedness. Acts still awaits this new order at the coming of Christ (3:21; cf. 1:11), when all that God had promised through the prophets would be established. The kingdom of God in Acts is usually the eschatological new order (1:3; 8:12; 19:8; 20:25; 28:23, 31). The eschatological judgment remains (10:42; 17:31; 24:25), and resurrection is awaited at the end of the age (23:6; 24:15, 21). Such sayings cannot be contemporized; God's redemptive purpose will be consummated only in the age to come after the parousia of Christ, the resurrection, and final judgment.

Yet within this futuristic expectation is found an anticipation of the eschatological blessings. The resurrection of Jesus was not merely the restoration of a dead man to physical life; it was such that it placed the entire doctrine of the resurrection in a new light. The Sadducees were annoyed because the disciples preached in Jesus the resurrection of the dead (Acts 4:2). The Pharisees, too, believed in resurrection, but this did not greatly annoy the Sadducees; the idea of the resurrection of Jesus, however, was an entirely different matter. No longer was resurrection merely a hope for the future; the resurrection of Jesus was the assurance of the eschatological resurrection. He was "the first to rise from the dead" (26:23); i.e., others would rise as He had risen. Here is the same theology of Jesus' resurrection as the "firstfruits" or beginning of the eschatological resurrection that is found in Paul (1 Cor. 15:23). The resurrection of Christ has introduced a new eschatological reality into history.

This same structure is seen in the ascension and enthronement of Jesus. By His exaltation to God's right hand, He has entered into a new dimension of His messianic mission; God has made Him both Lord and Messiah (Acts 2:36). This does not mean that He became Messiah at the ascension, for it was as Messiah that He suffered in the flesh (3:18). However, He is no longer the Messiah who is to suffer as the servant but the King who has been seated upon the throne of David and has begun His messianic reign (2:30-35). Peter reinterprets the throne of David, viewing it no longer as a literal throne of a political sovereignty exercised in Jerusalem by an earthly ruler, as in Ps. 110:1f., but as a spiritual sovereignty exercised by the exalted Lord in heaven. Messiah and Lord in this context (Acts 2:36) designate the same function: heavenly rule. Jesus as exalted Lord reigns as the Davidic King over His kingdom; the messianic age has come in history.

This fact is again illustrated by the gift of the Holy Spirit at Pentecost. Peter interprets the meaning of this event by citing Joel 2:28-32 (MT 3:1-5), which in its OT setting is an eschatological promise for the kingdom of God. Peter asserts that this eschatological event has taken

place in history. He illustrates this motif of messianic fulfillment further by a striking addition to his quotation of Joel. The prophet had said "afterward"; Peter reinterprets "in the last days" (Acts 2:17). In Isa. 2:2 "the last days" designates the time of the establishment of the kingdom of God; Peter asserts that this fulfillment has come in history before the age to come. The eschatological gift of the Spirit, in a way quite unforeseen in the OT, has occurred in the old age.

Because of these messianic blessings, "times of refreshing" come from the presence of the Lord while the consummation of the promises to the prophets awaits the return of Christ (Acts 3:19). Realized and realistic eschatology are both essential in Acts.

If Acts has the same basic tension of realized eschatology within the framework of futuristic eschatology as do the Gospels, is there any difference in their eschatological perspective? In other words, if the eschatological blessing of the kingdom of God was in some real sense present in the person and mission of Jesus, what redemptive need was there for the Resurrection and Pentecost? Why did the Christian kerygma not consist of the proclamation of the kingdom present in the Jesus of history, instead of His death and resurrection?

There is, in fact, a real difference between the theology of Acts (and the Epistles) and that of the Gospels. In the Gospels the presence of the kingdom is inseparable from the historical person of Jesus. Jesus' disciples did indeed preach the word and perform the works of the kingdom (Mt. 10; Lk. 10). They were, however, able to be instruments of the kingdom only when Jesus explicitly commissioned them so to be. The eschatological blessing was localized by Jesus' historical presence.

By virtue of Easter and Pentecost the eschatological blessings were experienced in a new depth of meaning; for by the indwelling of the Holy Spirit the life and blessings of the age to come were released from localization in a single historical personage and became the permanent possession of all God's people dwelling in the Church corporately and in believers individually. This probably explains why the primitive Christian kerygma centered in Jesus' resurrection rather than in His life and deeds. Redemptively, all that is included in the latter is present in the former — and far more.

E. Paul. The emphasis on realized eschatology in Acts has primarily a historical and collective reference. The proclamation of the resurrection of Jesus and the coming of the Spirit created in history the Church. In this sense, the Church is an eschatological fellowship of those who have experienced the powers of the age to come and who anticipate the consummation in the eschatological order. These motifs are made much more explicit in Paul and are developed with greater emphasis upon their personal dimension. Paul's entire theological structure must be understood in terms of eschatology. It would be profitable to begin with the Pauline themes of the present redemption in Christ and develop the eschatological dimension of each; but because of the large body of explicit eschatological material in the Pauline corpus, we must concentrate on these materials, showing that in each instance eschatology is the necessary consummation of redemptive realities already experienced in history.

This points up the perspective in which Pauline eschatology must be viewed. The events of the eschatological consummation are not merely detached events lying in the future about which Paul speculates. They are, rather, redemptive events that have already begun to unfold within history. The blessings of the age to come no longer belong exclusively to the future; they have become objects of present experience. The death of Christ is an eschatological event. By virtue of Christ's death the believer has already been delivered from this present evil age (Gal. 1:4). He has been transferred from the rule of darkness and now knows the life of the kingdom of Christ (Col. 1:13). In His cross, Christ has already defeated the powers of evil that have brought chaos into the world (Col. 2:14f.).

The resurrection of Christ is an eschatological event. The first act of the eschatological resurrection has been separated from the eschatological consummation and has taken place in history. Christ has already abolished death and displayed the life and the immortality of the age to come in an event that occurred within history (2 Tim. 1:10). Thus the light and the glory belonging to the age to come have already shined in this dark world in the person of Jesus Christ (2 Cor. 4:6).

Because of these eschatological events, the believer lives the life of the new age. The very phrase describing the status of the believer, "in Christ," is an eschatological term. To be "in Christ" means to be in the new age and to experience its life and powers. "If any one is in Christ, he is a new creation; the old has passed away, behold, the new has come" (2 Cor. 5:17). The believer has already experienced death and resurrection (Rom. 6:3f.). He has even been raised with Christ and exalted to heaven (Eph. 2:6), sharing the resurrection and ascension life of his Lord.

Yet the experience of this new life of the age to come is not a secular event of world history; it is known only to believers. All others are blinded so that they cannot behold it (2 Cor. 4:4). They are still in the darkness of the present evil age.

This new life of the believer therefore is an ambiguous experience, for he still lives in the old age. He has been delivered from the power of this age but must still live out his life in this age; yet he is not to be conformed to its life but is to experience the renewing powers of the new age (Rom. 12:1f.). The believer's new life is only "in the Spirit." He still has to make use of the world, but is no longer concerned to make full use of it (1 Cor. 7:31), for this world is transitory. Although Christ dwells in him, and his spirit has been made alive by the powers of the new age, his body is dying (Rom. 8:10).

Thus the transition from the sin and death of the old age to the life of the new age, although real, is as yet only partial. All that the new age means cannot be experienced in the old age; it must pass away and give place to the kingdom of God in the age to come when all that is mortal is swallowed up in life (2 Cor. 5:4). The believer lives in a tension of experienced and anticipated eschatology. He is already in the kingdom of Christ (Col. 1:13), but he awaits the coming of the kingdom of God (1 Cor. 15:50). He has already experienced the new life (2 Cor. 2:16), but he looks forward to the inheritance of eternal life (Gal. 6:8). He has already been saved (Eph. 2:5), but he is still awaiting his salvation (Rom. 13:11). He has been raised into newness of life (Rom. 6:4), yet he longs for the resurrection (2 Cor. 5:4).

The present ambiguity of the new life in Christ demands the return of Christ to complete the work of redemption already begun. The central theme of the Pauline eschatology is the consummation of God's saving work. Apart from the return of Christ and the age to come, God's saving purpose remains ambiguous and unfinished.

IV. Coming of Christ.—In the OT, "the Day of the Lord" could designate a day in the immediate historical future when God would visit His people in judgment (Am. 5:18; cf. Isa. 2:12ff.); and it could also designate the final visitation of God when He would establish His kingdom in the

world, bringing salvation to His faithful people and judgment to the wicked (Zeph. 1:14-18; Joel 3:14-21). In the NT the term has become a technical expression for the day when God will visit the world to bring this age to its end to inaugurate the age to come. The term is not to be thought of as a single calendar day but as the entire period that will witness the final redemptive visitation of God in Christ.

The expression assumes different forms: the Day of the Lord (1 Thess. 5:2; 2 Thess. 2:2; cf. Acts 2:20; 2 Pet. 3:10), the Day of the Lord Jesus (1 Cor. 5:5; 2 Cor. 1:14), the Day of the Lord Jesus Christ (1 Cor. 1:8), the Day of Jesus Christ (Phil. 1:6), the Day of Christ (Phil. 1:10; 2:16), that Day (2 Thess. 1:10; 2 Tim. 1:18); cf. the Day of God (2 Pet. 3:12); the last time (1 Pet. 1:5). Since the exalted Christ is for Paul, as for the early Church, the Lord (Phil. 2:11; Rom. 10:9), it should be obvious that efforts to distinguish between the Day of the Lord and the Day of Christ, and to find in them two different eschatological programs, one for Israel and one for the Church, are misguided. The coming of Christ to gather His people, both living and dead, to Himself (1 Thess. 4:13-17) is called the Day of the Lord (1 Thess. 5:2), as is His coming to judge the man of lawlessness (2 Thess. 2:2).

Paul uses three words to describe the return of the Lord. The first is Gk. *parousía,* which may mean both "presence" (Phil. 2:12) and "arrival" (1 Cor. 16:17; 2 Cor. 7:7). The word was used in a semitechnical sense of the visit of persons of high rank, especially of kings and emperors visiting a province. Since His ascension, Christ is pictured seated at the right hand of God in heaven. He will visit the earth again in personal presence (Acts 1:11) at the end of the age (Mt. 24:3) in power and glory (24:30), to raise the dead in Christ (1 Cor. 15:23), to gather His people to Himself (2 Thess. 2:1; cf. Mt. 24:31), and to destroy evil (2 Thess. 2:8; cf. 1 Thess. 2:19; 3:13; 4:15; 5:23).

The coming of Christ will also be an *apokálypsis,* an "unveiling" or "disclosure." The power and glory that are now His by virtue of His exaltation and heavenly session must be disclosed to the world. Christ has already been elevated by His resurrection and exaltation to the right hand of God, where He has been given sovereignty over all spiritual foes (Eph. 1:20-23). He now bears the name that is above every name; He is now the exalted Lord (Phil. 2:9). He is now reigning as king at God's right hand (1 Cor. 15:25). However, His reign and His lordship are not evident to the world. His *apokálypsis* will be the revealing to the world of the glory and power that are now His (2 Thess. 1:7; 1 Cor. 1:7; cf. 1 Pet. 1:7, 13). Thus the second coming of Christ is inseparable from His ascension and heavenly session, for it will disclose His present lordship to the world and be the means by which every knee shall finally bow and every tongue acknowledge His lordship (Phil. 2:10f.).

A third term, *epipháneia,* "appearing," indicates the visibility of Christ's return. Although this term is limited largely to the Pastoral Epistles, Paul tells the Thessalonians that Christ will slay the man of lawlessness by the breath of His mouth and destroy him by the *epipháneia* of His *parousía* (2 Thess. 2:8). The return of the Lord will be no secret hidden event but a breaking into history of the glory of God.

The inseparable connection between the two acts in Christ's redemptive work is illustrated by the twofold use of *epipháneia* to designate both the Incarnation and the Parousia. God has already broken the power of death and displayed the reality of life and immortality within history through the appearing (*epipháneia*) of our Savior Christ Jesus in the flesh (2 Tim. 1:10). This, however, is not the final term of redemption. Hope still awaits us in the future in the "appearing [*epipháneia*] of the glory of our great God and Savior Jesus Christ" (Tit. 2:13). In view of this twofold usage, the objections sometimes made against speaking of a "second" coming of Christ are overly critical.

The background for this language of the coming of Christ in glory is the OT language of theophany. The OT conceives of God working in history to accomplish His redemptive purposes; but it also looks forward to a day of divine visitation when God will come in judgment and salvation to establish His kingdom. In the NT this divine theophany is fulfilled in two stages: (1) in the coming of Jesus, who has already accomplished a redemptive work in history; (2) in His glorious return to bring the consummation of salvation to His people (1 Thess. 5:8f.) and judgment upon the wicked (2 Thess. 1:7f.), and to establish the kingdom, which is already His, in the world (2 Tim. 4:1).

V. Mystery of Lawlessness.–The coming of Christ is to be preceded by certain eschatological events. In his first letter to the Thessalonians, Paul spoke only of the return of Christ to gather the saints, both dead and living, to be with Him (4:13-18). He wrote with earnest anticipation, admonishing the Thessalonians to live with an attitude of expectancy of that day so that they would not be taken by surprise (5:1-11). As a result, believers in Thessalonica became upset and excited, and some claimed to have revelations from God or a special word from Paul indicating that the end was upon them and the events of the day of the Lord had actually begun (2 Thess. 2:1f.). In his second letter Paul corrects this erroneous view of imminency by saying that before the end comes, there will appear an evil ruler, the man of lawlessness, who will arrogate to himself all authority, both secular and sacred, and will demand the total submission of men to his rule, including worship (2:3f.). The statement that he will take his seat in the temple of God is an OT metaphorical way of expressing his defiance of God (cf. Ezk. 28:2; Isa. 14:13f.). He will be satanically empowered to deceive people and turn them away from the truth (2 Thess. 2:9f.). The essence of his character is his "lawlessness"; he defies the law both of God and of man, insisting that his will alone is law.

The "revealing" (v. 3) of the man of lawlessness is not merely an eschatological event; it will be the final manifestation of a principle that was operative even in the days of Paul. "For the mystery of lawlessness is already at work" (v. 7). Paul saw in his own time the principle of the deification of the state, which demanded not only civil obedience but also religious worship. This principle of lawlessness will one day break forth in uncontrolled concentration in a final evil ruler; and his appearance will be accompanied by an apostasy (v. 3) or rebellion against God. Many will submit to the man of lawlessness and defy the law of God.

This lawlessness is, however, held in check by some unnamed restraining power. The Thessalonians knew what this restraining power was, for Paul had told them about these things when he had visited them (vv. 5f.). We cannot recover Paul's verbal instruction, which he here assumes, and therefore we cannot be dogmatic about the identity of this restraining power. The day will come, however, when the restraint will be removed, and then the man of lawlessness will be revealed in all his God-defying wickedness.

The best solution to this difficult passage finds its clue in the character of this evil personage; he is the man of *lawlessness,* one who defies all duly constituted law, whether human or divine. Because Paul elsewhere clearly teaches that human government is a divinely established

ordinance (Rom. 13:1-7), we may conclude that the restraining power is the institution of duly constituted law and order, an instrument of God to restrain lawlessness. In Paul's day, God had invested this authority in the Roman empire and its head, the emperor. Paul sees a day when the rule of law will collapse, when political order will be swept away and be unable any longer to restrain the principle of lawlessness. Then, the last defenses that the Creator has erected against the powers of chaos will break down completely. This can well be understood in the principle of the deification of the state in defiance of the divine ordinance. The principles of both order and lawlessness can be at work at the same time, even in the same state. These two principles will be in conflict during the course of the age. At the very end, law and order will break down, demonic lawlessness will burst forth, and the Church will experience a brief period of terrible evil that will be quickly terminated by the return of Christ (v. 8).

VI. Resurrection and the Rapture.–The Pauline teaching of the eschatological resurrection is an extension of the resurrection of Jesus; or, better, the resurrection of Jesus is the beginning of the eschatological resurrection of the saints and demands it.

The same power that raised Christ will raise up His people (1 Cor. 6:14; 2 Cor. 4:14). In fact, Christ's resurrection is itself the first act of the final resurrection. It is the firstfruits of which the eschatological resurrection will be the harvest (1 Cor. 15:20). Therefore, the resurrection as Paul discusses it is concerned only with the resurrection of "the dead in Christ" (1 Thess. 4:16). Paul has no word in his Epistles concerning the resurrection of those who do not stand in solidarity with Christ — the unsaved. Luke quotes him in Acts 24:15 asserting resurrection of both the just and the unjust; and we may well believe this, for Paul does teach the judgment of all mankind (Rom. 2:6-11). But he says nothing about the time or the nature of the resurrection of any except Christians. Neither does Paul refer to the state of the unsaved after death. He does not even mention Hades in his letters (1 Cor. 15:55, AV, reflects the inferior reading of the TR).

The resurrection of those who belong to Christ is essential not only because Christ has been raised, but because the nature of mankind and of redemption requires it. Redemption means the redemption of the whole person, including the body (Rom. 8:23). Paul knows nothing of a blessed immortality of the spirit freed from its entanglement in the created order. Paul often contrasts the sufferings of earthly existence with the future glory (8:18), but he never considers bodily life in itself an evil thing from which he longs to be freed. Rather than being discarded, the body that often humiliates us is to be transformed and glorified (Phil. 3:21). The Holy Spirit who has quickened our spirits will also give fulness of life to our mortal bodies in the resurrection (Rom. 8:11). Paul's doctrine of bodily resurrection is grounded in his unitary view of the person.

The consummation of salvation and the full possession of inheritance at the resurrection (Eph. 1:14) await the return of Christ when "God will bring with him those who have fallen asleep" (1 Thess. 4:14). Then the spirits of the dead will be reunited with their bodies, but transformed, glorified. Paul knows nothing of glorified spirits apart from the body. The problem that called forth his long discussion of the resurrection was some sort of denial of the resurrection of the body (1 Cor. 15:12, 35). If Paul had taught a form of blessed immortality of the soul or resurrection of the spirit out of its entanglement in the world of matter into the realm of God, the Corinthians would have had no problem. Their difficulty was in accepting the idea of bodily resurrection. Paul's description of the resurrection body is one that transcends present historical experience. "Flesh and blood" (i.e., bodies constituted of mortal flesh) cannot inherit the kingdom of God, for they are perishable and the kingdom of God is the order of the imperishable (15:50). Therefore, a body suited for the life of the kingdom must be different from the bodies of this age. That there can logically be such a body Paul establishes by pointing to the difference between a kernel of grain and the shoot that comes from it (vv. 35-38). There are also different kinds of flesh — of humans, beasts, fish, birds (v. 39) — and there are different kinds of bodies — earthly and heavenly — which differ in their glory (vv. 40f.). Therefore it should not be surprising that God has a new and different kind of body adapted to the life of the age to come.

Paul does not attempt, however, to describe the nature of the resurrection body. He knows nothing of its constitution; but he can speak of some of the qualities which differentiate it from the body of "flesh and blood." The latter is perishable, dishonoring, and weak. The new body will be imperishable, glorious, and powerful (vv. 42f.). The contrast is summarized in the words *psychikón* (for which there is no adequate translation) and *pneumatikón* (v. 44).

The resurrection will occur instantaneously at the coming of Christ (1 Thess. 4:16; 1 Cor. 15:52). The change that will occur for the dead in Christ will also overtake those living in Christ (1 Cor. 15:51). Those "who are left until the coming of the Lord" will have no advantage over those who have fallen asleep (1 Thess. 4:15). The living will, as it were, put the new resurrection body on over the mortal body (*ependýsasthai*, 2 Cor. 5:4) without the dissolution of the latter. This is what Paul means by the so-called "rapture" of the Church. The "catching up" of living believers immediately after the resurrection, to meet the Lord in the air, is Paul's vivid way of expressing the sudden transformation of the living from the weak, corruptible bodies of this physical order to the powerful, incorruptible bodies which belong to the new order of the age to come. It is the sign of passing from the level of mortal existence to immortality. The important word is "so shall we always be with the Lord" (1 Thess. 4:17).

VII. Intermediate State.–If salvation includes the redemption of the body at the eschatological resurrection, an important question arises: What is the state of the dead between death and the resurrection? Paul has very little to say in answer to this question. He seems to deal with this question in 2 Cor. 5; but this is a notoriously difficult passage. Paul appears to shrink from death, because it is evidently a time of being unclothed (5:3f.). He does not know what will be the mode of existence between death and resurrection; God had not revealed this to him. Greek thought might find pleasure in the anticipation of the soul naked of the body, but not Paul. He longs for the resurrection body when mortality will be swallowed up by life (v. 4). He would prefer, indeed, to be alive when Christ comes, that he might have "the new [resurrection] body put on over" the mortal body without dying (v. 4, NEB). If he dies, he knows that a new body awaits him which will be suited to the new eternal order of the age to come (v. 1). The language of this passage has led some interpreters to feel Paul is here referring to an intermediate body, which already exists in heaven, to be put on at death; but the language is very similar to that of 1 Cor. 15:47-49 where Paul is discussing the resurrection body, even though he speaks of "those who are of heaven," who shall "bear the image of the man of heaven." Christ is now, as the last Adam, the man from heaven, bearing His resurrected glorified body; and Paul

looks forward to sharing the heavenly likeness of his exalted Lord in the age to come.

Meanwhile, although he shrinks from the nakedness of death, Paul takes courage in the realization that even though he does not know the mode of his existence, he will be "at home with the Lord" (2 Cor. 5:8). This is all Paul has to say about the intermediate state. To depart is to be with Christ (Phil. 1:23); but it is enough.

VIII. Judgment.–The Pauline doctrine of an eschatological judgment is related to the historical fact of justification. Here is a vivid illustration of the tension between realized and futuristic eschatology. Justification is an eschatological fact that has occurred in history. It is the decision of the Judge of all mankind that a person is clear of guilt. In Judaism it meant acquittal at the Day of Judgment, and the NT does not surrender this eschatological dimension (cf. Mt. 12:36f.; Rom. 8:33f.; 5:19; Gal. 5:4f.). What sets the gospel apart from Judaism at this point is the conviction that by virtue of Jesus' death this eschatological event has already occurred. The believer has been justified; the eschatological Judge has declared the person of faith to be guiltless, i.e., righteous before God.

Yet judgment remains an eschatological event, both for believers and for unbelievers. While Paul nowhere develops this doctrine as he does the resurrection, it stands constantly in the background of his thinking. He speaks of those who store up wrath for themselves on the day of wrath when God's righteous judgment will be revealed (Rom. 2:5). In that day God will judge the secrets of mankind by Christ Jesus (2:16). Other passing references to judgment are found in Rom. 3:6; 13:2; 1 Cor. 4:5; 11:32; 2 Thess. 2:12; 2 Tim. 4:1. In some way not explained to us, the saints are to assist God in the judgment of the world, even to the point of judging angels (1 Cor. 6:2f.).

The most developed passage on judgment is Rom. 2. There will be a Day when God will judge all people according to their works (Rom. 2:5). To the righteous He will give eternal life, to the wicked wrath and fury (vv. 6-10). Furthermore, people will be judged by the light they have. All have the light of nature by which they should recognize the existence of the true God and worship Him alone (1:18-20). Jews will be judged by the law (2:12), and those who have not had the law will be judged by the law of God that is written on their hearts — by conscience (2:14-16). While these verses suggest theoretically that people could survive the Day of Judgment on the basis of good works, Paul states clearly that people have not lived up to their light. Gentiles have perverted the light of general revelation (1:21-23), and Jews have failed to keep the law (Gal. 3:10-12). God in His mercy, however, has provided a way of salvation in the redeeming work of Christ, and the final basis of judgment will be the gospel (Rom. 2:16; 2 Thess. 1:8). God's final judgment will be absolutely just and not arbitrary.

Judgment is also an eschatological fact for believers. The righteousness we hope for (Gal. 5:5) is acquittal at the final judgment. "We must all appear before the judgment seat of Christ" (2 Cor. 5:10), which is also the judgment seat of God (Rom. 14:10). Because of the justification in Christ, however, the Day of Judgment has lost its terror for the person in Christ (8:1, 33f.). Nevertheless, the believer will be judged for his or her works. Our life will be laid bare before the divine scrutiny, so that each one may receive the proper recompense for the things done through the life of the body, whether that life record is good or bad. This judgment is not a declaration of doom, but an assessment of worth, involving not condemnation or acquittal, but rewards or loss on the basis of the worth or worthlessness of the Christian's life.

The same principle of judgment is expounded in 1 Cor. 3:12-15. Paul is here speaking of the work of Christian leaders, but the principle is valid for all believers. The only foundation upon which anything permanent can be built is Jesus Christ; not all, however, build alike. Some erect beautiful structures with gold, silver, precious stones; others build worthless houses of wood, hay, stubble. Clearly, Paul is applying his metaphor rather loosely, for these materials were not normally used in ancient construction. He deliberately uses a radical metaphor to contrast great value with worthlessness. Some Christians live worthless lives; their works, like wood, hay, and stubble, will be consumed in the flames of judgment so that nothing remains as a result of their life on earth. While this does not mean the loss of salvation ("he himself will be saved"), it does mean the loss of the "well done, good and faithful servant." Those who have built faithfully and effectively, on the other hand, will be rewarded for their love and devotion — although Paul does not indicate what the reward will be. The principle involved in this judgment is that, while salvation is altogether of grace, the Christian is fully answerable to God for the quality of his present life in the body.

IX. Future of Israel.–NT eschatology is centered almost exclusively on the destiny of the Church. This raises a serious question about the continuity between the OT promise and the NT fulfillment. The OT hope is structured in terms of the nation Israel and its future in the land. Jesus offered the reinterpreted messianic blessings to Israel, the natural "sons of the kingdom" (Mt. 8:12). The fulfillment of the OT promise in Jesus' messianic mission did not include a national destiny for Israel; realization of the blessings of the Kingdom was found in personal fellowship with Jesus. He accepted into fellowship with Himself all who responded to His challenge of the Kingdom, and indicated that this new fellowship of the Kingdom would constitute His *ekklēsía* (Mt. 16:18), i.e., the new people of God (21:43), which may be called the new Israel. The old Israel was to suffer the historical judgment of destruction and war (Lk. 13:34f.; 19:41-44; 23:27-31; Mk. 13:1f.; Lk. 21:20-24), for this generation was evil (Mt. 11:16-19) and could not recognize the fulfillment of the OT hope in Jesus' mission.

If, then, the Church has taken the place of Israel as the people of God, has God proved unfaithful to His OT promises to Israel? This is the question that Paul treats in Rom. 9–11; and while the main points of his thought are clear, they leave many questions unanswered as to how the promises are to be fulfilled.

Paul points out that God has not forgotten His promises to Israel, for there is in fact a believing Jewish remnant in the Church (Rom. 11:5). The key to interpretation, however, is that Paul implicitly redefines "Israel," both intensively and extensively. He indicates, first, that the true Israel does not include all physical descendants of Abraham but is limited to a believing remnant (9:6-13). Then he indicates that the people of God, the true Israel, is also extended to include Gentiles (9:24); taking promises from Hosea (1:10; 2:23), which in their OT setting referred only to the future of the nation Israel, Paul applies them to the Church (Rom. 9:25f.). Those who were "not my people"— Gentiles — have now become "my people," "sons of the living God," by inclusion in the Church. In a real sense, then, the OT promises to Israel are fulfilled in this new definition of the people of God, the Church.

The question remains: Does this mean the final rejection of all but a small believing remnant of Jews? Is there no redemptive purpose in the unbelief and rejection of Israel? The answer to this question is summed up in the statement,

"Now if their [the Jews'] trespass means riches for the world, and if their failure means riches for the Gentiles, how much more will their full inclusion mean" (11:12). That is, God has used the unbelief and the rejection of Israel as a means of bringing salvation to the gentile world; but God will yet include the Jewish people in the people of God, which will in turn result in even greater blessings for the Gentiles. Paul clearly asserts that Israel is still a "holy" people (11:15f.), i.e., the special object of God's concern. Therefore, while the trespass of Israel means salvation for the Gentiles (v. 11), and their rejection results in reconciliation of the gentile world, the acceptance of Israel into the people of God will result in a tide of blessing for the Gentile world so great that Paul calls it "life from the dead" (v. 15). This future movement of *Heilsgeschichte* Paul summarizes in vv. 25-32: (1) a (large) part of Israel has been hardened; (2) this issued in the carrying out of God's full purpose for the salvation of the Gentiles; (3) in some unexplained way, however, this salvation of the Gentiles is designed to make Israel jealous (10:11, 14); and (4) "in this manner" (*hoútōs*), namely, through provocation by gentile salvation, "all Israel [the Jewish people] will be saved." When and how these events will take place is not indicated. The basic and central affirmation is, however, that in some form or other the Jewish people is yet to be included in the new people of God, the Church. Piper has suggested that Israel is yet to become a Christian nation (O. Piper, *Theology Today*, 18 [1961], 60-71). In any case, the consummation of God's redemptive purpose is to include the salvation of the Jews.

X. Consummation.–The goal of God's redemptive purpose is the restoration of order to a universe that has been disrupted by evil and sin. This includes the realm of human experience, the spiritual world (Eph. 1:10), and, as we shall see, even nature itself. God will finally reconcile all things to Himself through Christ (Col. 1:20). All things were originally created through Christ and for Him (v. 16), and He will finally enjoy the preeminence that is His due (v. 18). The very cosmos that has been rent by conflict and chaos will be restored to peace with its Creator. This eschatological reconciliation will be accomplished through the blood of the cross (v. 20). Paul sees in the death of Christ a triumph over evil spiritual powers (2:14f.), although he nowhere explains what this involves; and the final eschatological reconciliation is but the effective extension of the victory won on the cross.

This same emphasis of universal reconciliation is repeated elsewhere. In the great kenosis hymn (Phil. 2:5-11) Jesus is now exalted as Lord, and because of this every knee will yet bow and every tongue confess that Jesus Christ is Lord, to the glory of God the Father (vv. 10f.). No rebellious will can finally remain outside the sovereignty of Christ's lordship.

The final subjection of every hostile will is also asserted in 1 Cor. 15 as the extension of Christ's kingly rule in the universe. He is to reign as king (*basileúein*) until He has subdued every enemy, the last of which is death (v. 25). When He has subdued every hostile spiritual power, He will deliver the Kingdom to the Father (v. 24). In view of the Pauline emphasis that Jesus has been exalted and is now reigning as Lord at God's right hand (Eph. 1:20-23; Phil. 2:9), it is clear that this kingly reign began at the Ascension. Lord and King are interchangeable concepts expressing Christ's exalted sovereignty, a sovereignty grounded in His resurrection.

1 Corinthians 15 envisages three stages in the subjugation of Christ's enemies, of which death is the final foe. Christ's resurrection is the first stage (v. 20; cf. Phil. 2:9). A second stage will be manifested at His *parousía*, when those who belong to Him will be raised (1 Cor. 15:23). Only "after that" (*eíta*) comes the end (*télos*), when His triumph is made complete. As there is an interval between Christ's resurrection and parousia, so there is an undefined interval between the parousia and the *télos*; and during the entire period between resurrection and *télos* Christ is reigning as king. Paul explains neither necessity for this second intermediate period nor its duration; but for some reason in God's redemptive purpose Christ's rule is to be extended between the parousia and the *télos* to complete the divine conquest of evil. During this interval the reign of Christ and His saints will be made visible to the world (4:8; 2 Tim. 2:12), and it is probably to this period that Paul refers when he says that the saints will share Christ's judgment over the world (1 Cor. 6:2f.). It is not insignificant that the structure of this passage parallels that of Rev. 20, where there is an intermediate kingdom of Christ and His saints (lasting "a thousand years," vv. 4-6) between their resurrection and the final consummation — but here, too, only as an extension of Christ's present messianic reign.

Some interpreters have seen in the language of this final reconciliation a "universal homecoming," interpreted in terms of a universal salvation of all sentient creatures, both human and angelic. Such an interpretation can indeed be drawn from such verses as Col. 1:20, if they are taken out of the context of the total Pauline teaching. A universal reconciliation would mean that peace is everywhere restored. The universal acknowledgment of Christ's lordship (Phil. 2:10f.), however, is not synonymous with universal salvation. There is a stern element in Paul's eschatology that cannot be avoided. There remain recalcitrant wills which must be subdued and which will bow only unwillingly before Christ's rule. How Christ will deal with them Paul does not say except in very general terms.

The final restoration includes the material world. Creation awaits the disclosure of the children of God when they will experience the redemption of their bodies, for creation itself will be freed from the bondage to decay and will experience freedom from the evil to which it has been subjected (Rom. 8:19-23). Thus the redemption of the natural world from evil and decay is the corollary of the redemption of the body. While Paul does not develop this truth, it is built upon the same profound biblical theology that is found in the OT. The prophets constantly described the establishment of God's kingdom in terms of a redeemed world (Isa. 11:6-9; 65:17-25); the NT shares the same theology. Creation is never viewed as something evil that must be escaped. Man as body is a creature of God. A person is not sinful because he or she is a creature, but because he or she has rebelled against God. In the final consummation the whole person and the world of which he is a part will be delivered from the curse of evil.

Paul describes the final state of those who have not obeyed the gospel of Christ by saying they "shall suffer the punishment of eternal destruction and exclusion from the presence of the Lord and from the glory of his might" (2 Thess. 1:9; cf. 1 Thess. 5:3). The rebellious and impenitent store up for themselves wrath on the day of wrath when God's righteous judgment will be revealed (Rom. 2:5, 8; cf. 5:9; 1 Thess. 1:10; 5:9). Paul also describes the fate of the unsaved by the concept of perishing (Gk. *apóllymi*). This is both a present condition (1 Cor. 1:18; 2 Cor. 2:15; 4:3) and a future doom (Rom. 2:12; 2 Thess. 2:10). This eschatological doom is also destruction (*apóleia*, Phil. 3:19; Rom. 9:22). It is also expressed as death. Death, in the full inclusiveness of the term, is the penalty of sin (Rom. 5:12; 6:16, 23). While this death is the death of the body (Rom. 8:38; 1 Cor. 3:22), the term designates much more. This is seen in that death is the

opposite of eternal life (Rom. 6:23; 7:10; 8:6; 2 Cor. 2:16). It is both a present fact (Rom. 7:10f.; Eph. 2:1) and a future fate (Rom. 1:32; 6:16, 21, 23; 7:5). The central idea is exclusion from the presence of the Lord in His consummated kingdom (2 Thess. 1:9) and the subsequent loss of the blessings of life that come from the enjoyment of the divine presence. However, the terms Paul uses make it clear that the final judgment will issue in a fearful condemnation which is the just desert of sin and unbelief; but he nowhere describes what this doom involves.

G. E. LADD

ESDRAELON, PLAIN OF ez-drə-ē'lən, ez-drā'lon [Gk. *Esdrēlōn*] (Jth. 1:8; 3:9; 4:6; 7:3); AV also ESDRAELOM (Jth. 1:8; 7:3). The Greek name, derived from Jezreel (Heb. *yizr^e'e'l,* Josh. 17:16; Jgs. 6:33) for the central part of the lowland corridor extending from the modern bay of Haifa to Beth-shean. It is also called the "plain of Megiddo" (Zec. 12:11; AV "valley of Megiddon," NEB "vale of Megiddo"). *See* JEZREEL, VALLEY OF; Plate 16.

ESDRAS, BOOKS OF. Two books of the OT Apocrypha.

I. Literary Introduction
II. The Greek Ezra (1 Esdras)
III. The Apocalyptic or Latin Esdras (2 Esdras)
IV. Conclusion

I. Literary Introduction.–The Greek Ezra and the Apocalyptic or Latin Esdras are the unambiguous titles of the two apocryphal books here discussed. These are distinct from the canonical Ezra-Nehemiah, though much of the scriptural material is incorporated in the Greek Ezra. The bewildering confusion of version nomenclature may be seen from the table, which lists the preferred titles at the left.

	Eng. Bible	LXX	Lucian	Vulgate
Ezra	Ezra	2 Esdras	1 Esdras	1 Esdras
Nehemiah	Nehemiah			2 Esdras
Greek Ezra	1 Esdras	1 Esdras	2 Esdras	3 Esdras
Latin Esdras	2 Esdras	.....	.....	4 Esdras

The Greek Ezra contains most of the canonical Ezra with smaller sections of Chronicles and Nehemiah, as well as considerable interpolation. The Semitic original is lost, but the Greek offers a polished, idiomatic version. The apocryphal-canonical relationship may be studied in parallel columns of English in *APOT,* I, 21-29, 34-57. The Greek is in *OTG,* II, 129-161. See also *IOTG,* pp. 265ff.; *HDB*; *HJP,* II/3, 177-181; *HNTT,* pp. 233-257. Pfeiffer (*HNTT,* p. 249) suspects Alexandrian origin and a date for the present form of the book not later than 150 B.C.

The Apocalyptic Esdras, lacking Greek textual attestation, is often ignored, despite its greatly superior intrinsic interest and importance. There is a critical Latin text, edited by R. L. Bensly, with a lengthy introduction by M. R. James, in *Texts and Studies,* 3/2 (1895). The RV is followed in W. O. E. Oesterley's *II Esdras* (*WC,* 1933). The central chapters are independently rendered in G. H. Box, *The Ezra Apocalypse* (1912); cf. also *APOT,* II, 542-624. J. H. Lupton expounds both books in Wace, I, 1-148. (Cf. also *HDB*; *HJP,* II/3, 93-114; etc.) The main section, beginning in 3:1, may with high probability be dated A.D. 100. The other portions are likely to fall within twenty years of this date, either way, excepting chs.

15–16, which are from the 3rd cent. A.D. Most Latin MSS designate chs. 3–14 as 4 Esdras (whence the other common designation, 4 Ezra), regarding the remaining chapters as independent books; some versions designate chs. 1–2 as 2 Esdras or 5 Esdras and chs. 15–16 as 5 Esdras or 6 Esdras. For fuller discussion, see the literature cited.

II. The Greek Ezra (1 Esdras).—*The Interpolation, 3:1–5:6.* As the rest of the book is virtually scriptural, attention may be concentrated on the story of the Three Guardsmen, related also, with significant variation, in Josephus *Ant.* xi.3.2-7. R. H. Pfeiffer is convinced that the Greek Ezra text is translated from an Aramaic version, resting in its turn on a pagan Persian source, perhaps a "Zoroastrian popular homily" (p. 256), adapted to Jewish tastes. The Aramaic version he would date *ca.* 300 B.C., the Persian perhaps a century earlier (p. 255). He makes the yet more interesting speculation (pp. 253f.) that this story inspired the personification of wisdom in Prov. 8. The special Christian significance springs from the mention of Zerubbabel, doubly attested (Mt. 1:12f; Lk. 3:27) in the ancestry of Jesus Christ. Pfeiffer regards the proper names as fictitious importations into an already existing story skeleton (*HNTT*).

The story recounts that the king — Darius, according to the text and Josephus, though other editorial preferences have been expressed — makes a great feast. Afterward, while he sleeps, three of his guardsmen decide that the king will richly reward the one of their number who makes the wisest decision as to which thing in the world is strongest. They write their sentences, and these are placed under the king's pillow. The first chooses wine; the second the king; the third, women and truth, in juxtaposition (3:1-17). (According to Josephus, the king himself initiated the contest, prescribing the theses to be defended. This purges the story of one absurdity.)

The first guardsman discourses before the king and his governors on the potential of wine, particularly its harmfulness (3:18-24); the second on the strength and authority of the king (4:1-12). It is not clear why Zerubbabel, or whoever he was, should have a double chance. He disclaims first on women, particularly on their seductive power over men, making a personal and surprisingly unresented reference to the king's concubine. It is most unlikely that an oriental despot would tolerate such public impertinence, even from an intimate; this offends against verisimilitude (4:13-32). Zerubbabel then speaks with yet greater eloquence on truth (4:33-41). The king bids him not only receive the stipulated reward but ask what he will in addition. His Majesty is then urged to fulfil his vow to rebuild Jerusalem and restore the sacred vessels. All this is royally implemented (4:42–5:6).

On Pfeiffer's theory (*HNTT*), this finale is a Jewish *cauda* to a Persian tale. He bestows on the whole composition a praise (p. 256f.) that is perhaps excessive. A Persian original might account for the very un-Jewish view of women, and the lack of direct religious teaching. Probably some compiler perceived in the story of the Three Guardsmen a useful etiological tale to account for the restoration of the temple and fitted this at the appropriate point into a borrowed framework of scriptural history.

III. The Apocalyptic or Latin Esdras (2 Esdras).—*Synopsis, Chs. 1–2.* An addition by a Jewish-Christian hand, giving the genealogy of Ezra, pseudepigraphically borrowed, and his divine prophetic commission, in OT style. The interest has really shifted to the Christian Church, the successor-in-privilege of the OT covenant.

The Apocalypse Proper, Chs. 3–10

Synopsis of First Vision, 3:1–5:19. The seer muses on God and sin, Adam's transgression, the sin and suffering of Israel, and the impunity of greater national offenders. The archangel Uriel appears, discusses the seer's intellectual problems, and heralds the approaching end of the age.

3:1. For the identity of Salathiel or Esdras, cf. Box, pp. 1-3, 8; Oesterley, pp. xiiff., 18, etc. The supposed date is 556 B.C., with Babylonian wealth flaunted before captive Jewish poverty. But Babylon is a cryptogram for Rome, and the real date is A.D. 100. Box (pp. 41ff.) believes that the original text contained a dream vision, now lost, between vv. 1 and 2.

3:7. Talmud and Midrash largely reject the doctrine of original sin. (Cf. R. A. Stewart, *Rabbinic Theology* [1961], pp. 67-81.) Here and elsewhere in the present work the doctrine emerges with almost Christian clarity — cf. 4:30ff.; 7:11f., 48, 118; 8:31, 60. *Diligentia,* usually "carefulness, heed," means here the verbal commandment to Adam to abstain from the forbidden fruit (cf. 3:19).

3:8. It is taught that the heathen nations sinned against God by His permissive will. The thorny problems of God, man, sin, and freedom recur frequently, but remain unsolved. (Cf. Stewart, *passim,* esp. pp. 26-31, 89-92.)

3:10. The writer sets Fall and Flood in punitive parallel; final judgment may be added in series. (Cf. Mt. 24:37, etc.)

3:19. Here *lex* means the written, *diligentia* the oral, Torah.

3:20. The *cor malignum* (evil heart) introduces another key rabbinic concept, the "evil impulse." (Cf. Stewart, pp. 81-85; cf. 7:48, etc.; Rom. 7:18-23.)

3:21f. These almost Pauline verses contain one fallacy — if Adam's corrupt heart antedates his fall, God must have put it there and must therefore be the author of sin. The stark reality of original sin, and the impotence of the law to save, may be freely admitted (cf. Rom. 3:20).

3:33. The concept of the treasury of merits, more specific in 7:77, is here implied. (Cf. Stewart, pp. 127-133.)

4:3f. The etiology of corruption would certainly be a skeleton key to unlock the innermost secrets of hamartiology! For the form of the archangel's words, cf. Lk. 20:1-8.

4:12. Cf. T.B. *Erubin* 13b. In the excellent parable following, v. 17 may be compared with Jer. 5:22.

4:30. The *granum mali seminis* (grain of evil seed) is another term for the evil impulse. (See 3:20 above.)

4:36. According to a similar deterministic rabbinic teaching, the Messiah will not come till all the unborn souls have lived out their earthly lives (T.B. *Yebamoth* 63b; Midr. *Gen. Rabbah* xxiv.4; etc.). This chapter wavers between a mundane and supramundane theater for the life of the world to come. This may be either personal inconsistency or bad editing.

4:45, 50. Cf. 14:10ff., which is from a different hand.

4:52. Archangels are represented as limited in knowledge.

5:2. The Synoptic apocalypses, Mt. 24, Mk. 13, and Lk. 21, may be aptly compared with many echo passages in chs. 4–9.

Synopsis of Second Vision, 5:20–6:34. This is partly repetitive, but introduces new questions, such as the fate of those who die before the close of this world order.

5:23-30. In all this rich, varied symbolism of Israel's election, the vine image of v. 23 rests probably on Ps. 80. Verse 28 stresses the darker side of the Jewish Diaspora, ignoring its spiritual challenge and missionary potential.

5:35. Cf. Jer. 20:17f. Job 3:11 and 10:18f. visualize death following conception; the metaphor of Jeremiah and Esdras, the womb of a living mother becoming a grave, is biologically impossible, but forceful and striking.

5:41. Cf. 1 Thess. 4:13ff.

6:5. The key thoughts are: (1) Human-computed time is finite, created, and distinct from the eternal realm (see

notes on 6:8 and 9:8). (2) Estrangement from God is the fruit of sin. (3) The treasury of merits is here interpreted in terms of faith, though this is not necessarily the exact equivalent of Pauline faith. (4) The sealing presupposes divine election. The splendor of the cosmological language of vv. 1-6 shines through the Latin translation.

6:6. In contrast to Prov. 8, Jn. 1, and the rabbinic literature, intermediaries in the divine act of creation — memra, wisdom, or logos — are here strongly rebutted. (Cf. Stewart, pp. 34-39.)

6:8ff. The usual rabbinic view of an earthly messianic era before the final consummation is here rejected. Jacob's hand gripped Esau's heel at their birth (Gen. 25:26), in symbol of continuity — so the world to come will be in immediate temporal succession to the present age. This cannot be true if, as v. 5 suggests, eternal and mundane time are different in kind. (See also note on 9:8.)

Synopsis of Third Vision, 6:35–9:25, including Bensly's Missing Fragment, 7:36-140. The seer discourses on the works of creation, the election of Israel, and the strange triumph of lesser and unchosen nations over her, with just a trace of proud particularism (6:35-59). There is worked out, in angelic parable and mortal objection, a fairly rigid doctrine of election and reprobation, with admission that the well-being of Israel is gravely compromised by Adam's sin. The seer is rebuked for judging too hastily the "unfairness" of God (7:1-25). A parenthetical and eschatological passage follows (7:26-44). Election and reprobation are further discussed at length, with angelic pronouncements on the future state of wicked and righteous. The seer will not be comforted by the bright hopes of the small minority or the bleak rewards of the many wicked — the perishing of the majority fills him with pity, sorrow, and questioning (7:45–9:25).

7:21. God's law has a universal reference.

7:28f. The original Jewish writer certainly referred only to the Son-Messiah, who became *filius meus Jesus* (my son Jesus), probably through the chain of associations *māšî(a)ḥ–Christos–Christus,* in the hands of a Christian copyist. Yet a Christian scribe would find it difficult to accept the notion of Christ dying, not on Calvary, but after four hundred years of interim terrestrial messianic reign. Box, p. 117, mentions the very significant alteration of *morietur* (shall die) to *adsumetur* (shall be taken up) in one Latin MS. The claim of assumption is much more likely, even from a Jewish standpoint.

7:32, 37. These are strong statements of corporeal resurrection.

7:36. Fiery torment and restful bliss, following the judgment of vv. 33-35. Oesterley, p. 74, suspects some confusion of thought; but surely there is adequate parallel in the parable of Dives and Lazarus and in the rabbinic teaching that paradise and Gehenna are adjacent (Midr. *Eccl. Rabbah* vii.14.3).

7:48. The seer's deep concern for the lost somewhat mitigates the particularism of certain other passages.

7:48. The evil impulse again (cf. 3:20 above), with almost universal corruption. Note the thoroughly Jewish reluctance to admit that man's depravity is total, despite the most obvious approximation.

7:52-61. If all glass beads are turned into diamonds, or all sinners into saints, the quality is cheapened so much that the article becomes worthless — therefore the spiritual fate of the myriads of the damned may be dismissed with a shrug. (The non sequitur, an archangelic one at least by attribution, is that a truth valid for diamonds is also necessarily valid for human beings. Admittedly sin keeps the saints few in number; but God is a righteous judge, not a diamond merchant concerned with extrinsic qualities. The teaching needs to be corrected with both halves of Mt. 3:9. Similar objections apply to vv. 54-57. The doctrine of God implied in v. 61 also needs amendment.)

7:62-69. Happy the grazing ox in the field, unreasoning and therefore unsinning, destined at death to oblivion and not to fiery torment! These somber verses lose much of their significance if they are understood only satirically. (Cf. 8:20-36, with note on 8:19 below.)

7:70. A somewhat rigid doctrine of determinism.

7:72. On the premises given, the deduction is at least logical.

7:75. The seer asks about the interim state between death and final judgment. The answer, extending to v. 115, is fascinating, though sometimes inconsistent. For general apocalyptic appraisal of the theme, see Oesterley, pp. 85f.; Box, pp. 141f.

7:78. When death occurs, unsaved and saved alike adore God. The seven special sorrows of the unsaved and special rests of the saved are next detailed.

7:88. The spirits of the righteous are separated at death *a vaso corruptibili,* from the corruptible vessel or body. This is somewhat like the Greek doctrine of *sōma sēma* (the body is a tomb), or the Pauline view of the flesh; it is very unlike the characteristic rabbinic acceptance of the body.

7:93. The frustration of the wicked on perceiving the bliss of the righteous in v. 83 may be inevitable and merited, but the converse satisfaction of the saints in the misery of the damned is very unpleasing. This strain crept into Judaism as a result of persecution. (Cf. Midr. *Lev. Rabbah* xxxii.1 and the references in note on 7:36 above.)

7:101. The "seven days" are carefully documented by Oesterley, pp. 90f., with Jewish, Iranian, and Mithraistic parallels.

7:102-115. In the final judgment, the fate of the individual is fixed absolutely by the quality of the life once lived in the flesh; no prayer by another is effective or even permitted. By implication, intercession for the dead seems to be excluded. This runs entirely counter to 2 Macc. 12:43-45 (*see* MACCABEES IV.D). Jerome fiercely repudiated the teaching of these verses. Indeed, they cut at the base of one of the pillars of the Roman Catholic Church. This is significantly part of Bensly's Missing Fragment; it may well have been suppressed for ecclesiastical reasons. Protestants have a clear-cut answer to the question involved. This cannot be said for the rabbinic literature and the Pseudepigrapha; see Oesterley, pp. 92f., and Box, pp. 153-56, for fuller discussion. The differing quality of earthly time and eternity is again hinted at in v. 113 (see notes on 6:5, 8 above, 9:8 below).

7:116. In the text available, the seer says: *hic sermo meus primus et novissimus, quoniam melius erat non dare terram Adam, vel cum iam dedisset coercere eum ut non peccaret.* (This is my first and last word, that it would have been better if the earth had not produced Adam, or else, when it had produced him, had restrained him from sinning [RSV].) The RSV takes the earth as the subject both of *dedisset* and of *coercere.* Yet some understand God as the implicit subject of *coercere,* which would come dangerously close to making Him the author of sin. This is heavily counterbalanced by the strong statements of original sin in v. 118 and of human freedom in vv. 122ff. Here and elsewhere, the writer cannot be exonerated from formal inconsistency; but apart from his prevailing pessimism, his heart is frequently in the right place. The passage 7:116-131 is a variant presentation of vv. 62-74 and has other parallels. This is Job 3, with the added interplay of volition and responsibility.

8:1-3. The rigid doctrine of limited election and widespread reprobation again. (Cf. note on 7:52 above; also 9:21f. below.)

8:6. The bounds of Judaism are outpassed in a stray note of universalistic concern for all mankind — but particularism returns in v. 15.

8:14. The writer asks what he cannot answer.

8:19. This evidently reflects a legend of Ezra's assumption, based on the argument from the silence of Scripture. The prayer following (vv. 20-36) is of great beauty, though the writer is torn between an almost Pauline insight into man's total depravity (vv. 31, 35) and an instinctive clinging to the concept of the treasury of merits (vv. 26-29, 33). This is the problem of Rom. 3:20-26; but the writer, earnest and honest as he is, possesses only a poor, legalistic substitute for the power of the risen Christ. Certainly there is contradiction, but it is the grappling of a sincere heart with problems beyond its reach.

8:28. A warning to hypocrites, who cannot deceive God, but may hoodwink their neighbors and even themselves. The writer's personal humility is seen in vv. 49ff.

8:38f. This representation of divine indifference to the fate of the unrighteous is contradicted in v. 47, which states emphatically that God's love for mankind exceeds people's love for each other — though the book as a whole fails to bring this out adequately. Oesterley aptly remarks that the seer, earnest but a little jaundiced, has grasped the enormity of sin without properly allowing for the potential of repentance.

9:7. A man is said to be saved *per opera sua vel per fidem in qua crediderit* (by his works or by faith in what he has believed). If the *vel* were changed to *et* (and), this would be Paul and James together in a nutshell. (Cf. 6:5; 13:23.)

9:18. The phrases *tempus erat saeculi* and *antequam fieret illis saeculum* are in formal contradiction. The first phrase, literally "the time within the age," refers to the eternal realm. The RSV renders the second "before the world was made for them," i.e., before time impinged into eternity. There are three popular definitions of eternity: "unending time," "timelessness," and "the transcending of time in infinity," of which the last is to be preferred (M. F. Cleugh, *Time and Its Importance in Modern Thought* [1937], p. 79). The creation of our solar system, involving the physical causation of our temporal divisions, occurred in the eternal realm — God's eternity is not therefore unending time into which our cosmic duration may be fitted as part of a greater whole; it belongs to a higher and entirely different plane of experience, poorly comprehended by mortals. Ps. 90:4 and 1 Pet. 3:8 are nearer the mark; so, in fairness, is 6:5 of this book.

Synopsis of Fourth Vision, 9:26–10:59. The seer has a vision of a woman mourning for the son of her old age, dead on his wedding night. This represents the heavenly Zion weeping for the earthly Jerusalem, destroyed in A.D. 70. The allegory contains many details not used in the interpretation, but this is not unusual.

9:31-37. The ground outlasts the seed sown therein, the sea the ships that sail thereon, the drinking vessel the particular draught for which it is used — so the law will outlast in honor its human transgressors. Yet the law cannot save; cf. v. 36 and 3:20, 22; 8:19, note; Rom. 3:20 and Rom. 7 *passim*.

9:45. Cf. Sarah, Hannah, the woman of Shunem, Elizabeth.

10:16. The hypothetical folktale here adapted might have related the birth of a second son or the restoration of the first to life. But the simple expectation of immortality affords a cogent enough explanation.

10:25ff. Cf. the transfiguration of Christ; also Rev. 21.

10:39, 57. The personal character of the seer is again commended.

10:54. Even the place of vision must be kept free from the works of human hands — a most interesting touch.

Chs. 11–12. The Eagle Vision. This is from a different author, political rather than religious in his interests. The eagle, a variant of the fourth beast of Dnl. 7, is a symbol for the Roman empire. A simple theory has been offered to explain difficulties and discrepancies. The chapters were first drafted *ca.* A.D. 96 as an apt and contemporary political allegory. About twenty-five years later circumstances had changed, and the document was manipulated to fit them, perhaps by a less skillful hand, with some resultant confusion. (For fuller discussion, see Box, pp. 244-280; Oesterley, pp. xviif.; 130-147.)

11:1. For the Jew, the sea, like the Roman empire, held predominantly evil associations (cf. Dnl. 7:3; Rev. 21:1; etc.). T.B. *Shabbath* 56b declares that Solomon's marriage into heathendom caused Gabriel to fix a reed in the sea, which gathered round it a sandbank on which Rome was built. This seems a flimsy foundation for the Imperial City, but the allegorical significance is clear. The three heads of the eagle have been widely interpreted as symbolizing Vespasian, Titus, and Domitian. This makes it difficult to equate the twelve wings with the twelve Caesars, though Oesterley, p. 145, applies three wings to aspirants who never actually became emperors. He cogently argues also that the eight smaller wings represent Roman governors in Palestine, which would account for the Jewish interest in them.

11:37. The Lion of Judah is the Messiah.

12:3. The downfall of Rome, in symbol.

12:11. It was customary at an earlier stage to take Daniel's fourth beast as signifying Greece, but interest and interpretation both shifted to Rome.

12:15. This is usually understood to mean Augustus.

12:37. A touch, perhaps, of pseudepigraphic embroidery.

Synopsis of Ch. 13. In vision the seer beholds a man, representing the preexistent Messiah, rise from the sea and ascend a mountain that has miraculously appeared. With the breath of his mouth he slays the multitude of his gentile foes. He then summons another multitude, the ten tribes of exiled Jews, some of whom accept his rule willingly, some unwillingly. This is probably an adaptation of a Babylonian creation epic, with Iranian elements, transmuted into a piece of Jewish eschatology, but not without the continued protrusion of discrepant elements. (See further Box, pp. 280-86; Oesterley, pp. 150-164.)

13:3. The sea and clouds are here incompatible, but so are other unresolved elements in the vision. The prejudice against the sea suggested in the last section has now disappeared; this chapter is from a different hand.

13:16-20, 22-24, 29-32. The thoughts are either parenthetic or interpolated.

13:40-50. The legend of the Lost Tribes.

Synopsis of Ch. 14. A controversial apologia for apocalyptic literature. After partaking of a cup divinely administered, Ezra with chosen assistants is divinely commissioned to restore to posterity the twenty-four lost books of the OT for open perusal, with seventy apocalyptic ones for esoteric use. On the supposed restoration of the forgotten Bible text, see *Jew.Enc.*, V, 323f., with the rabbinic references there. The clear purpose of the chapter is to assert the equal authority of apocalyptic with canonical Scripture — a claim that rabbinic and other strains of Judaism would repudiate. Noteworthy are the reference to the Messiah as the Son of God in 14:9 and the clear presupposition of the transition to Hebrew square characters for writing in 14:42.

Chapters 15–16, a late addition, contain a mixture of prophecy and eschatology, not equal in interest to the earlier sections. Oesterley gives the historical background, pp. 175-190. These chapters are to be dated probably in the second half of the third Christian century.

See also APOCALYPTIC LITERATURE III.G.

IV. Conclusion.–From the viewpoint of Apocrypha study, the interest of the Greek Ezra limits itself to the interpolation, though the rest of the book has its value for OT textual investigation. In the Latin Esdras, chs. 3–10 far outweigh the rest of the book in attractiveness and significance. The mind that produced them is somber but deeply pious, still Jewish, yet with a flavor more Christian than rabbinic in certain respects.

R. A. STEWART

ESDRIS ez'dris, es'dris [Gk. *Esdris*]; AV GORGIAS; NEB ESDRIAS. A leader of the troops of Gorgias, "put to flight" by Judas Maccabeus (2 Macc. 12:36). He is mentioned in the best texts and adopted in the RSV for "Gorgias" of the AV.

ESEBON es'ē-bon (Jth. 5:15, AV). *See* HESHBON.

ESEBRIAS es-ē-brī'əs, ə-sē'bri-əs (1 Esd. 8:54, AV). *See* SHEREBIAH **1.**

ESEK ē'sek [Heb. *'ēśeq*–'strife,' 'contention']. The name given by Isaac to a well dug by his servants, over which the herdsmen of Gerar contended until the patriarch was forced to abandon it and dig another well (Gen. 26:20). The location is not known but it must have been between Gerar and Beer-sheba.

ESHAN ē'shən [Heb. *'eš'ān*–'support'] (Josh. 15:52); AV ESHEAN esh'i-ən. A village in the hill country of Judah, part of that tribe's inheritance. Its location is uncertain, although the LXX B rendering *Soma* has led to conjecture that it may be Khirbet Sama'a, about 17 km. (10 mi.) SW of Hebron.

ESHBAAL esh'bā-əl (1 Ch. 8:33; 9:39). *See* ISHBOSHETH.

ESHBAN esh'ban [Heb. *'ešbān;* Gk. *Asban*]. A chief of the Horites (Gen. 36:26; 1 Ch. 1:41).

ESHCOL esh'kol [Heb. *'eškōl*–'cluster'; Gk. *Eschōl*]. The brother of Mamre and Aner, the Amorite allies of Abraham who took part with him in the pursuit and defeat of Chedorlaomer's forces (Gen. 14:13, 24). He lived in the neighborhood of Hebron (13:18) and may have given his name to the Valley of ESHCOL, which lay a little N of Hebron (Nu. 13:23).

ESHCOL esh'kol [Heb. *'eškōl*; Gk. *pháranx bótryos*–'cluster of grapes']. A valley near Hebron from which the spies brought back to Moses and Aaron a single cluster of grapes carried on a pole between two of them (Nu. 13:23f.; 32:9; Dt. 1:24). It is possibly located near Mamre, on the basis of Gen. 14:13 (so *GTTOT*, p. 255). The name is echoed in the (corrupted) form Burj Haskeh, about 3 km. (2 mi.) N of Hebron at the head of a vineyard-laden valley.

See also CLUSTER.

ESHEAN esh'ē-an, ē'shē-an. *See* ESHAN.

ESHEK ē'shek [Heb. *'ēšeq*–'oppressor']. A descendant of Jonathan son of Saul (1 Ch. 8:39).

ESHKALONITE esh'kə-lon-īt (Josh. 13:3, AV). *See* ASHKELON.

ESHTAOL esh'tā-ol [Heb. *'eštā'ôl*]. A town of the Danites located in the Shephelah of Judah, always referred to in connection with Zorah (Josh. 15:33; 19:41; Jgs. 13:25; 16:31; 18:2, 8, 11; 1 Ch. 2:53). Between Eshtaol and Zorah the Danites established their camp where the Spirit of the Lord began to arouse Samson (Jgs. 13:25) and where Samson later was buried (16:31). Five men of valor were sent forth as spies from these centers (18:2); and a contingent from Eshtaol formed part of the six hundred Danites who captured Laish, the modern Tell el-Qâḍī, in their thrust to the north (Jgs. 18). It is probably to be identified with Eshwa', about 2½ km. (1½ mi.) E of Zorah and about 21 km. (13 mi.) W of Jerusalem. K. G. JUNG

ESHTAOLITES esh'tā-ol-īts [Heb. *hā'eštā'ulî*]; AV, NEB, ESHTAULITES. Inhabitants of Eshtaol, named among the descendants of Shobal the son of Caleb (1 Ch. 2:53).

ESHTEMOA esh-tə-mō'ə [Heb. *'eštᵉmô(a)'*–'listening post'].

1. Son of Ishbah; a descendant of Caleb (1 Ch. 4:17). Another view is that Ishbah was "lord" of the city of Eshtemoa.

2. A Maacathite, son of Hodiah, of the tribe of Judah (1 Ch. 4:19).

ESHTEMOA [Heb. *'eštᵉmô(a)'*–'listening post']; **ESHTEMOH** esh'tə-mō [Heb. *'eštᵉmōh*] (Josh. 15:50). A mountain town of Judah about 15 km. (9 mi.) S of Hebron, assigned to the priests (Josh. 15:50; 21:14; 1 Ch. 6:57 [MT 42]). It is identified with es-Semû'.

According to 1 S. 30:28 David sent some of the booty taken in the recapture of Ziklag from the Amalekites to the elders of Eshtemoa, out of gratitude for their kindness to him and his army during his flights from Saul.

See *EAEHL*, II, *s.v.* (D. Barag). F. E. YOUNG

ESHTON esh'ton [Heb. *'eštôn*]. A name found in the genealogical table of Judah, probably that of a Calebite clan (1 Ch. 4:11f.).

ESLI es'lī [Gk. *Eslei, Esli*]. An ancestor of Jesus in Luke's genealogy, the tenth before Joseph the husband of Mary (Lk. 3:25).

ESORA ē-sō'rə (Jth. 4:4, AV). *See* AESORA.

ESPOUSAL; ESPOUSE. In the AV these words, following English usage that is now obsolete, are used to signify marriage or betrothal. The RSV renders "wedding" (Cant. 3:11), "bride" (Jer. 2:2; NEB "bridal"), and "betrothed" (2 S. 3:14; Mt. 1:18; Lk. 1:27; 2:5; 2 Cor. 11:2).

ESRIL es'ril, ez'ril. *See* AZAREL **4.**

ESROM es'rom, ez'rom (AV Mt. 1:3; Lk. 3:33). *See* HEZRON.

ESSENES es'ēnz [Gk. *Essēnoí, Essaíoi*–None of the numerous explanations of the name is more than merely

plausible (see, e.g., Audet, pp. 373-380)]. Members of an important Jewish community that existed in Palestine during the ministry of Jesus.

XII. Essenes and Christianity

I. Sources.–The primary sources for an examination of the Essenes are the descriptions given by Philo, Josephus, Pliny, and Hippolytus. Supplementary sources to be used for comparison are Epiphanius *Haer.* and the Qumrân (Dead Sea) Scrolls.

A. Philo. The earliest sources for our knowledge of the Essenes (at least apart from the Qumrân Scrolls) were written by Philo of Alexandria, who lived before A.D. 50. His writings on the Essenes include *Apologia pro Iudaeis* 11 and *Quod omnis probus liber sit* 12 (75-87). He also wrote about the Therapeutae, a group some scholars identify with the Essenes, in *De vita contemplativa*. The differences between the Essenes and the Therapeutae, however, are too great to use the Therapeutae as source material for learning about the Essenes. Philo intrudes his own point of view more than Josephus or Hippolytus, and therefore his account especially must be examined critically.

B. Josephus. Josephus is the main source for Jewish history from the Hasmonean period to the end of the Jewish War (A.D. 73). His discussions of Essenes are found chiefly in *BJ* ii.8; *Ant.* xiii.5.9; xv.10.5; xvii.13.3; xviii.1.5.

Josephus's source of knowledge of the Essenes is an enigma. He professes to have begun his study of the Essenes at about the age of sixteen (*ca.* A.D. 54). Under great difficulties he went through all three sects of the Jews. He thereafter spent three years with a certain Banus, who was evidently a very scrupulous observer of purity and dietary rules. At the age of nineteen, Josephus returned to the city and followed the rules of the Pharisees. Although there is the suggestion that he had lived with and studied each of the three sects, he cannot have given much time to this research, since most of this time between sixteen and nineteen must have gone into the "three years" with Banus (see *Vita* 2). Accordingly Josephus may have "gone through" the sects in a purely academic manner. At any rate it is safest to treat the information Josephus gives of the Essenes as if it were obtained indirectly.

C. Hippolytus. Hippolytus was a schismatic bishop of Rome *ca.* A.D. 218-235. Although some scholars have doubted that Hippolytus wrote the passage on the Essenes (see M. Smith, *HUCA*), the value of the account for an examination of the Essene sect has become increasingly apparent. Some have also dismissed Hippolytus because his account is very much like that of Josephus, but Smith (*HUCA*) has convincingly shown that both Josephus and Hippolytus utilized a common Semitic source which they sometimes translated differently into Greek. This admits the use of Hippolytus as a basic source that includes some information omitted by Josephus. His account is found in *Ref.* ix.13-23.

D. Pliny. Gaius Plinius Secundus, best known as Pliny the Elder, was born in A.D. 23. His *Naturalis historia* was dedicated to Titus in A.D. 77. He is the earliest ancient writer to describe the Essenes as a sect living on the west coast of the Dead Sea (*Nat. hist.* v.15[73]). There is no assurance that Pliny's account is derived from firsthand observation; it probably reports hearsay from a considerably earlier period.

E. Epiphanius. For this study his important work is *Adversus lxxx haereses* (*Haer.*), a book intended to contain antidotes for heresies of Barbarism, Scythism, Hellenism, Samaritanism, Judaism, and various Christian heresies, primarily the Origenists. Among the Jewish sects are the Osseni or Ossaeans, and among the Samaritans the Esseni (10.1), who have been thought by some to be successors to the Essenes.

F. Qumrân Scrolls. Since 1947 a very important source for studying Jewish beliefs in Palestine prior to A.D. 70 has been the DEAD SEA SCROLLS. Although no document so far published has recorded the name "Essene," the scrolls provide the only material written in Palestine prior to the fall of Jerusalem that could not have been edited or altered by Jews or Christians outside of Palestine at a later date. For this reason they are invaluable for comparing, interpreting, and testing Jewish documents of a later date that are presumed to reflect earlier views. The most descriptive sectarian document in this collection is the Manual of Discipline (1QS). Fragments of another manual were found in Cairo in 1897, called the Zadokite Fragments or Damascus Document (CD).

The scrolls were found in various caves along the northwest shore of the Dead Sea near Qumrân. They include OT texts, commentaries, psalms, and rules of order. It is not certain that all these documents represent either the compositions or points of view of any one particular sect within Judaism, but they disclose opinions that were held in Palestine before the fall of Jerusalem.

II. Jewish Sects.–Sectarianism within Judaism has an ancient history. The books of Kings and most of the prophets record numerous conflicts that took place within a people who worshiped one God but differed in their understanding of the way He should be worshiped (see Smith, *NTS*). Part of the disagreement arose over the practices enjoined in the pentateuchal holiness rules. The ark of the covenant and the presence of the Lord were in the camp. Because the Lord is holy, the members of the congregation must be holy (Lev. 20:7; Nu. 5:1-3; 16:3; Dt. 7:6). Holiness was maintained by contributing the proper offerings (Ex. 25:1-8; 29:38-45; 30:22-38; Lev. 16; 19:23f.; 21–23; Nu. 15; 18f.; Dt. 26), observing sabbaths, feasts, and jubilees (Ex. 31:12-17; 35:1-3, 11; Lev. 25; Dt. 15), eating only prescribed food (*kāšēr*) (Lev. 7:19-27; 17; 22:10-16; Dt. 14), etc. Because Israelites had various views concerning the exact way in which these laws were to be fulfilled, and because they disagreed on the importance of the various rules, certain sects arose within Judaism.

During the Roman period, especially after Archelaus was banished and Roman procurators were introduced (A.D. 6-7), Jews were keenly aware that their generation did not possess the heritage God had promised the children of Abraham. This must mean that they had sinned and must change their ways before God would comfort His people by restoring to them the Promised Land. The various groups had conflicting ideas about God's demands. The Zealots, basing their policy on the story of Phinehas (Nu. 25) and the history of the Maccabees, took up the sword at every opportunity in an attempt to expel the Romans and Roman collaborators from the land by military force. Those represented by 2 Macc.

6:12-17 and 1QS 9:21-23 believed Israel must be punished for her sin. Therefore, Jews must voluntarily accept whatever afflictions were placed upon them, believing that this would help cancel the debt and also make the sins of the oppressing nation greater, so that on the Day of Vengeance God would vindicate the Jews and suppress the Romans (see Stendahl). Some, like John the Baptist, practiced righteousness, carefully observing all dietary laws and avoiding all contact with unrepentant sinners. On the other hand, many, like the tax collectors, took advantage of the existing situation, collaborated with the Romans, and made little pretense of observing the pentateuchal regulations. These were called "sinners." A more moderate position was that of some Pharisees who mingled with the Romans but carefully observed the stipulated tithes, bathed properly before eating, and were careful not to eat with those who were less careful than they. Sects also probably had differences which were not directly related to interpretation of the Torah, but which reflected economic, philosophical, or social attitudes. One of the sects that existed in NT times was the Essenes.

III. Essene Economy.–The effect of the close-knit structure of the Essene sect on its whole economic existence is shown by two features: (1) the common fund of the monastic order, and (2) the hospitality shown to other members of the sect.

A. The Common Fund. Philo, who evidently described only the monastic Essenes, said that the Essenes owned no private property, but that they had pooled all of their resources into a common fund that was distributed to the individual members as each had need. Members labored daily for wages that were contributed to the common treasurer to buy the necessary provisions for the group. Not only was food for the entire group purchased from the common fund, but also clothing, which continued to be the property of the group. In addition to the practicality of the economy, this plan permitted strict supervision to see that all foods were *kāšēr* and properly tithed and that all Essenes were dressed with garments made of only one kind of material (Lev. 19:19). Furthermore, those who were ill or aged were treated at the common expense and given the same thoughtful care that parents might expect of children. Hence it was possible for Essenes with no children to live to a comfortable old age.

The reason for the communistic administration is not given. Bauer, however, gives several other instances in classical literature where people have abandoned their goods because they believed material things to be the root of all evil; and he presumes the Essenes had the same motivation for their economy (Pauly-Wissowa, Suppl. IV, 410-14). A more likely possibility is suggested by the circumstances. Since cultures of the ancient Near East had no social security program or pension plan to care for the aged, the principal insurance against neglect and starvation in old age was the care that children would provide. Members of a celibate order, deprived of children, needed some community plan to fulfil the needs otherwise met by family members.

B. Essene Hospitality. Philo said that no Essene called his house his own in the sense that he was free to exclude other Essenes, but that the door was open to visitors from other localities who *shared his convictions*. This meant those who could be trusted to keep the same tithing, heave offering, dietary, and purity regulations. Josephus said further that Essene customs permitted them to travel without taking any provisions except weapons as protection against brigands, but that in every city an appointed person was responsible for providing visiting Essenes with clothing and other necessities. Hippolytus added that the person assigned to provide for traveling Essenes did so from funds put aside for that purpose.

The Essene program of hospitality seemed well planned, efficient, and also necessary for a sect so exclusive in its regulations that its members could not accept the food or other provisions supplied either by Gentiles or by other sects within Judaism.

IV. Monasticism.–Philo, Josephus, and Hippolytus all agreed that the Essenes did not marry. Although both Josephus and Hippolytus conceded that one order of Essenes did permit marriage, they maintained that those who married did so only for the propagation of the race. Hence no more sexual intercourse was permitted than was necessary to produce children. Like others seeking admission, prospective wives were first required to observe the three-year probation period and were required to have had at least three purification periods to show that they were mature enough to bear children.

The reason given for celibacy was not that the sect objected to children. Indeed, they were willing to raise children to whom others had given birth. But according to Hippolytus they wanted to avoid every deed of concupiscence, and they distrusted women altogether; Josephus said the Essenes thought that marriage led to unrighteousness, and that no woman was faithful. Philo expounded at greater length on the wiles of women and the way wives and children could unconsciously divert an Essene's attention from his primary concern.

Pliny stated that the Essenes had renounced the patterns of ordinary society because they were tired of life and were driven to their accepted way of living by the waves of fortune. Pliny's interpretation has probably led many to associate Essene monasticism with Greek asceticism. Indeed, Eduard Zeller singled out the Essenes as the sect on Palestinian soil showing the greatest degree of Hellenistic influence (*Outlines of the History of Greek Philosophy* [Eng. tr. 1955], pp. 278f.). Marks of Greek philosophy, he said, were to be seen in asceticism based on dualism, worship of the sun, belief in angels and in preexistence of the soul and its survival after death. Bauer claimed that their rejection of marriage could be paralleled only in Buddhism (Pauly-Wissowa, Suppl. IV, 428f.).

A. Biblical Regulations. Philo said that the Essenes observed sabbaths meticulously. They avoided work and gathered in synagogues to read the books (presumably the OT) and discuss their meaning. Josephus claimed that they were stricter than all other Jews in sabbath observance, preparing all of their food the day before, refusing to kindle a fire or even to yield to nature's demands for elimination on the sabbath day. Some Jews of the Greco-Roman period insisted that elimination take place at least 2000 cubits from the camp (1QM 7:7). But 2000 cubits was the extreme limit a Jew was permitted to walk on the sabbath, and some held that the limit was 1000 cubits (Mish. *Sotah* v.3; T.B. *Erubin* 51a; CD 10:21). Any Jew, then, who was zealous not to defile the camp or break the sabbath would find it necessary to schedule his consumption so that elimination on the sabbath was not necessary. Hippolytus maintained that some Essenes would not even get out of bed on the sabbath.

On other days, the Essenes followed the Deuteronomic (Dt. 23:12-14) prescription of taking care of elimination needs in deserted places, modestly covered with cloaks, and carefully covering up the excrement with earth and washing themselves afterwards as if excretion were polluting.

Philo said that the Essenes ate together, and Josephus testified that only the initiated were allowed to share the

common meals and only after they had bathed and dressed in special linen garments. Hippolytus noted that no one of a different persuasion was permitted in the house while Essenes were eating. They kept such strict dietary laws that they were not at liberty to eat any other person's food. So rigidly were these rules imposed that any member excommunicated from the group was destined to die of starvation. Members would endure tortures or even death rather than eat food offered to idols.

The sectarians believed that oil was defiling, and if they accidentally came into contact with any they would scour themselves to be cleansed of this defilement. They were careful not to spit into the midst of the company or to the right.

Those who wanted to join the sect were not immediately received into the group but were given prescribed clothing and equipment and proper food to eat in separate quarters. Only after two (Hippolytus) or three (Josephus) years of probation, if the candidate was observed to be "worthy" (Gk. *áxios*), he was admitted to the inner circle. If a senior member accidentally touched a junior member, he would have to take a bath to remove the defilement, just as if he had touched a Gentile. Hippolytus told of an extremely scrupulous group of Essenes who considered themselves so much different from the "younger generation" of Essenes that if one of them happened to touch one of the less rigorous Essenes by mistake, he would bathe to remove the defilement.

The care with which Essenes are reported to have kept various regulations justifies the claim that they were known for their self-control and respect for the law, and that they were particularly concerned for the writings of the ancients dealing with the welfare of the soul and body — probably the ancient pentateuchal rules on cleanness and uncleanness. These were rules governing the attitude of the community toward leprosy, menstrual periods, childbirth, seminal discharges, and other conditions that rendered a member of the congregation unclean. If the holy army of Israel followed regulations specifically, it could expect with only a few men to overthrow an army (cf. 1 S. 14:6; Jgs. 7; 1 Macc. 3:18-22; 4:9f.; 2 Macc. 8:16-18). Before beginning a military campaign the soldiers of Israel had to be sanctified (Heb. *qᵉḏôšîm*; Josh. 3:5; 7:13-15). Those prepared or "sanctified" for war (Jer. 6:4; 51:27f.; Joel 3:9 [MT 4:9]) were ritually pure or "holy." The Israelites who were sanctified so that the Lord could appear at the giving of the Ten Commandments had stayed away from women for two days and had washed their garments (Ex. 19:10-15). David told Ahimelech that his soldiers' vessels were holy because the soldiers had kept themselves from women (1 S. 21:4-6). Uriah refused to lie with his wife while his fellow soldiers were at war (2 S. 11:11).

Later tradition held that after the commandments were given, Moses continually kept away from his wife. Since he never knew when God would speak to him, he had to be ritually pure every hour of every day. On the eve of the Day of Atonement the high priest was given short rations and kept awake all night to prevent a seminal discharge that would disqualify him for his function as high priest the following day (Mish. *Yoma* i.1, 4-8). The War Scroll gives instructions to prevent any type of defilement within the camp because holy angels were with their armies (1QM 7:3-7).

With so many regulations, and with so long a tradition underlying Israel's belief that ritual purity was necessary for holiness and that holiness was necessary for the Lord to be present in the congregation, it seems logical to suppose that a congregation could not be pure if men had free access to women. It is further reasonable to conjecture that the most scrupulous, pious Jews would find basis enough in holiness regulations to prompt them to form a celibate order. Only when Israel was in tents away from women was holy warfare possible. Since God could save the nation with only a small remnant of faithful covenanters, the monastic Essenes may have accepted the limitations necessary to be a holy congregation standing ready for God to act. The marrying order of the Essenes, then, observed the same rules as well as they could while still propagating the race.

B. "Trustworthiness." Josephus and Hippolytus referred to the Essenes who were finally accepted into full membership as "worthy" (Gk. *áxioi*). In rabbinic literature, a person who undertakes the responsibility of being "trustworthy" (Heb. *neʾᵉmān*) keeps *kāšēr*, fulfilling all the dietary, purity, tithing, and heave offering regulations that his association (Heb. *ḥᵃḇûrâ*) demands. Although the term *neʾᵉmān* generally means "trustworthy" in any sense, it also has the technical meaning of a person who remains *kāšēr*. The "trustworthy" person must tithe what he eats and what he sells and buys, and may not be a guest of an outsider. He enters the prescribed program by degrees: first he is accepted with regard to cleanness of hands and afterward for purities. The school of Hillel accepted members as "trustworthy" who had observed the regulations without default for thirty days. The school of Shammai prescribed thirty days for liquids; for clothing, twelve months.

There is a very close relationship among *áxios*, "worthy," *kāšēr*, "worthy" or "ritually permitted," and *neʾᵉmān*, "one who is worthy of being trusted to stay within the ritually permitted limits." The contexts show that the use of *áxios* by Josephus and Hippolytus is similar to the pharisaic use of Heb. *neʾᵉmān*; the only difference is in the particular qualifications required to achieve this standing. The Essenes required a longer probation period than the schools either of Hillel or Shammai, and they required all members of the monastic community to be "trustworthy," and possibly the marrying Essenes as well; whereas only very scrupulous Pharisees or Sadducees made any pretense of being "trustworthy."

Both Josephus and Hippolytus claimed that the Essenes believed no woman could be trusted. It seems unreasonable to believe that this lack of trust referred to marital loyalty. The text employed by Josephus and Hippolytus may have intended to say simply that the Essene sect differed from the pharisaic "association" in that it did not accept women as persons to be trusted with dietary rules, heave-offering and tithing rules, and purity regulations. Hippolytus seems to bear out this suggestion by his statement that Essenes did not even trust women who wished to devote themselves to the same polity. Since women were necessarily unclean at least one fourth of the time, it is not surprising that a meticulous group would not trust them with matters concerning defilement.

This does not mean that Essenes were misogynists. In fact, they were willing to rear children and even permitted these children to marry — a strange behavior, indeed, if the group really had strong feelings against the character of women. The monastic order avoided women for reasons of purity, and the sect in general apparently did not accept them as "trustworthy" (Heb. *neʾᵉmunôṯ*), but Philo's description of the Essene understanding of women's wiles probably reflects his own views as much as those of the Essenes. The Gk. terms *tērein . . . pístin* (observing . . . trust) and *pisteúontes* (trusting) may reflect a mistranslation of the Heb. *neʾᵉmunôṯ* (trustworthy). To be sure, this is only a con-

jecture; but reason requires some interpretation other than general hatred for the female sex, and this suggestion is possible.

V. Slavery.–According to Philo, "Not a single slave is to be found among them, but all are free, exchanging services with each other, and they denounce the owners of slaves, not merely for their injustice in outraging the law of equality, but also for their impiety in annulling the statute of Nature, who mother-like has born and reared all men alike, and created them genuine brothers, not in mere name, but in very reality, though this kinship has been put to confusion by the triumph of malignant covetousness, which has wrought estrangement instead of affinity and enmity instead of friendship." One of the ways by which they show their love of men is "by benevolence and a sense of equality" (*Quod omnis probus* ix.79, 84).

Josephus said, "They neither enter into marriage nor practice slave holding, considering the one to lead to unrighteousness and the other to give way to the formation of insurrection, but they live by themselves, making use of one another in service" (*Ant.* xviii.1.5 [21]). Of the two social customs, marriage would be the one thought to lead to unrighteousness, because marriage would cause Jews to break Levitical rules of purity. Slavery, then, according to Josephus, was avoided because slaves could form a subversive movement of some kind within the group.

Although both Philo and Josephus agreed that the Essenes did not hold slaves, the reason given for this refusal is quite different in each case. Philo's reason was that the Essenes were convinced of the equality of all men and for this reason would not treat another man in a subordinate fashion. But the egalitarianism Philo attributes to the Essenes is contrary to their basic outlook on life. Philo himself noted that in their sabbath instruction they were ranked "in rows according to their ages, the younger below the older"; they did nothing without orders from their superiors, and were careful to obey their elders. Therefore Philo's quasi-philosophical explanation of their refusal to have slaves is to be dismissed as a projection of his own quasi-philosophy.

Jews in Palestine before A.D. 70 might have held Jewish slaves until sabbatical years, or gentile slaves permanently. All slavery would be excluded for the Essenes on the basis of ritual purity. If even junior members of the sect could not be touched by senior members, and if meals could not be eaten while there was a non-Essene in the house, then it would be virtually impossible to keep slaves of any kind. The Levitical rules, then, and not the Essene concern for egalitarianism, prevented the acquisition of slaves among the Essenes. Josephus may have been more nearly correct when he said that the Essenes feared that slaves would "give way to the formation of insurrection" — a practical consideration which probably bolstered the decision dictated by the concern for purity. The Levitical rules that prevented the Essenes from marrying also prevented their use of slaves. The communistic economy was necessary to provide for a people deprived of children, and an organized sharing of each other's work was necessary because they were deprived of slaves.

VI. Vows.–The Mishnaic tractate *Shebuoth* deals with oaths. According to the rabbis, a person who swore and broke his oath was obligated to bring an offering (iii.1-4), receive stripes (iii.7f., 10f.), or pay a fine (iv.6; v.4). They considered oath-taking a serious matter, since the curses imposed might prevent the coming of the kingdom. Philo presumed an oath would be taken in the name of God; therefore he warned anyone tempted to take an oath to be sure his soul was pure from lawlessness, his body from pollution, and his tongue from evil speaking so that he did not commit a sacrilege in pronouncing the holiest of names. Furthermore, he must carefully choose the place and the time so that the occasion would not profane the holy name (*De decalogo* 18 [84-95]).

2 Enoch 49:1 was more careful than the later rabbis in the use of oaths: "I swear to you, my children, but I swear not by any oath, neither by heaven nor by earth, nor by any other creature which God created. The Lord said: 'There is no oath in me, nor injustice, but truth.' If there is no truth in men, let them swear by the words 'yes, yes,' or else 'no, no.'"

This position was similar to that of the Essenes. Philo said one of the proofs of their religious purity was their abstinence from oaths. Josephus said, "Any word of theirs has more force than an oath; swearing they avoid, regarding it as worse than perjury, for they say that one who is not believed without an appeal to God stands condemned already."

Nonetheless, upon admission to the sect, Essenes were made to swear tremendous oaths regarding their loyalty to the group and its accepted discipline. An Essene was required to die rather than break one of these oaths.

The two attitudes of the Essenes toward oaths are not necessarily inconsistent. The required oaths were necessary to insure the scrupulous self-discipline and prescribed order required of the sect. The refusal to take oaths was a further mark of carefulness to do nothing that would prevent God from dwelling with a remnant of His people and restoring to them the land promised to the children of Abraham.

VII. Divisions.–In addition to the monastic and marrying Essenes, both Josephus and Hippolytus describe other divisions. Josephus said there were four grades, but he described only three: (1) new candidates who remained outside the fraternity for one year, (2) those who had successfully completed the first probationary period and were allowed to share the purer kind of water "for sanctification," and (3) those who, if found "worthy" after two years in the second stage, were fully admitted into the society. Some have held that the fourth degree was made up either of the children being reared or the officers of the sect, but this is only a conjecture. The four grades may also have been degrees of full initiates, divided according to the time of membership.

Hippolytus listed four divisions of Essenes according to differences of their practice rather than their stages of development, but he also described only three: (1) those who carried no coins with images nor walked through gates bearing statues, (2) those (called by some "zealots," by others "sicarii") who killed all uncircumcised men who discussed God or the law, unless they would accept circumcision, and (3) those who accepted death rather than confess any other Lord but God (*see* ZEALOT). Hippolytus added that those Essenes who held to the early rules of order considered themselves defiled if they accidentally touched any later (i.e., more liberal) types of Essenes.

It is likely that there were grades of membership such as Josephus described, since, though more exacting, these are very similar to the probationary steps necessary for admission as a "trustworthy" member into a pharisaic "association." It is also likely that there were sects within the sect something like the ones Hippolytus described. There is no probability, however, that the zealots or sicarii described by Josephus were varieties of Essenes. Hippolytus began by misunderstanding his text and expanded his misunderstanding by misinformation. But some elements of his account have historical background.

Josephus described the torture Essenes suffered during the war with Rome while holding fast to their convictions (see also Smith, *HUCA*, pp. 282f.).

VIII. Worship and Theology.–In addition to their purifications, legalistic practices, and sacred meals, the Essenes also sent gifts to the temple; but they did not sacrifice at the temple because of its uncleanness (Gk. *koinós*). Hence they offered their own sacrifices according to the special conditions of purity they observed.

Essenes also prayed every morning at dawn to the sun, according to Josephus, as if entreating it to rise. Hippolytus simply mentions a hymn to God without any reference to possible sun worship. This is consistent with the Jewish practice of reciting the Shema and benedictions.

Josephus said the Essenes believed in the immortality of souls, and he further explained this doctrine to Romans in terms of Greek theology. He was probably describing the same belief Hippolytus called resurrection of the body, which he associated with a final judgment. After God, they honored most the name of their lawgiver and punished with death anyone who blasphemed him.

One of the "tremendous oaths" Essenes were required to swear was that they would carefully preserve the books of the sect and the names of the angels. Following the discovery of a text in Qumrân dealing with angelology (Strugnell, *SVT*), many scholars are quite convinced of a belief in angels among the Essenes.

The Essenes, said Josephus, differed from the Pharisees and Sadducees concerning fate, by which he probably meant providence. Essenes believed that providence caused all things; Sadducees said that providence did not exist; but Pharisees held that some actions were the work of providence and some were the result of human effort.

IX. The Ossaeans.–During the time of Epiphanius (*ca.* A.D. 310-403), there existed a Samaritan sect of Essenes (Gk. *Essēnoi*) who observed circumcision, the sabbath, and other legalistic requirements very carefully.

Another sect, which Epiphanius classified among the Jewish sects, was called the Ossaeans (Gk. *Ossaioi*). These originated from the areas of Ituraea, Nabatea, Moab, Arielis (perhaps Jerusalem), and the regions near the Dead Sea. They followed Jewish customs of sabbath observance, circumcision, and the fulfillment of the law. This sect existed from before the time of Christ until the destruction of Jerusalem (A.D. 70). The sect of Ossaeans still survived in Nabatea and Peraea near Moab during Epiphanius' lifetime under the designation Sampsaions (Gk. *Sampsaioi*). Together with the Ebionites, the Nazorians, and the Nasarians, this sect followed the leadership of a certain Elxai. The Sampsaions called themselves Jews, but they reflected Greek and Christian influences as well.

There is enough similarity between Epiphanius' descriptions of the Essenes and of the Ossaeans to prompt some scholars to identify the two (*HJP*, p. 213). The names are sufficiently alike to be confused. Furthermore, though not detailed, the description of the Ossaeans before the influence of Elxai is similar to other accounts of the Essenes. But it is also similar in general to other Jewish sects. Sects have been known to develop, change, and even reverse positions over a period of time.

It is conceivable that the Sampsaions are a later development of the Ossaeans or Essenes; but if this is so, the insights gained from later descriptions of them are of little value for understanding the early sect of Essenes.

X. Therapeutae and Other Sects.–The Therapeutae were members of a group described in Philo's *De vita contemplativa*. They existed in many places in the inhabited world, but flourished in Egypt, especially around Alexandria, near Lake Mareotis.

Philo began his discussion of the Therapeutae by mentioning that he had "discussed the Essenes." Instead of concluding that by this Philo indicated that he was moving into a different subject, many scholars have identified the Therapeutae with the Essenes. In some ways they are similar. Like the Essenes, the Therapeutae heal diseases, forfeit wealth and family, pray at dawn, study scriptures, are instructed on the sabbath, stress self-control, eat simple food, have common meals, do not hold slaves, and help one another with their work. They also differ at many points. Instead of giving their wealth to a common fund, Therapeutae give it to relatives and friends; they do not migrate; their location is principally in Egypt; instead of physical labor, they spend six days a week in meditation, some eating only once or twice a week; they include women in their group; and they do not baptize.

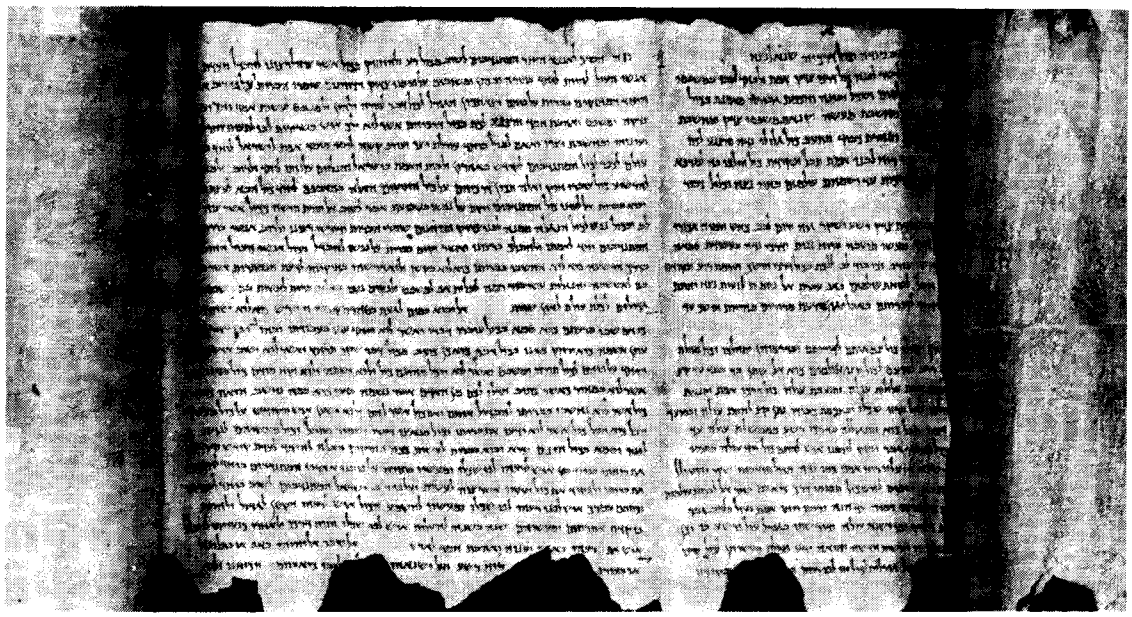
Vermes attempted to strengthen the belief that Therapeutae were Essenes by deriving the name Essene from Aram. *'āsîn*, "healers." He was opposed by H. G. Schönfeld (*RQ*, 3 [1961], 219ff.), who claimed that Philo's use of Gk. *therapeútein* was restricted to "worshiping," and that "Essenes" could not be derived from *'āsîn*. Geoltrain says, "The Therapeutae are the Essenes of the Diaspora" (*Semitica*, 10 [1960], 28). Even if this were so, the relationship between the two groups is too remote and uncertain to use the description of the Therapeutae to learn anything about the Essenes.

Various scholars have postulated relationships between the Essenes and other sectarian Jewish groups, such as the Boethusians and Ebionites, that flourished in Palestine. Usually some similarities are adduced to justify the supposed connection. But it is a priori likely that sects of the same religion developing in the same area and at the same time should have many similarities, so none of these proposed relationships is worth discussion, except in the case of the Dead Sea sect.

XI. The Scrolls and the Essenes.–Among the Dead Sea Scrolls was found a book of regulations for some Jewish sect that has prompted many scholars to presume that the Essenes inhabited the quarters excavated at Qumrân and composed the documents found in the caves nearby. Strugnell (*JBL*) has suggested that the Scrolls be considered primary source material by which Josephus, Philo, and others should be corrected. This opinion, however, though now general, is not universally accepted. Rabin (*Qumran Studies*) said the Dead Sea sect was Pharisaic, and Habermann claimed it was Sadducean.

Without prejudging the case, we shall compare the unknown sect governed by the Manual of Discipline (1QS) with the Essenes already described. Then a second book of sectarian regulations, the Damascus Document (CD), will also be compared with the Essenes to learn the similarities and differences of some of the sectarian movements in Palestine before the fall of Jerusalem.

A. Manual of Discipline. The sect governed by 1QS is similar in many ways to the Essenes. Those who joined the sect had to contribute all their possessions to the community. Members within the order were ranked according to status and were required to obey superior members. This also was an exclusive sect, which required meticulous observance of the law and purity rules. Only those within the sect were considered pure. For all others, ablutions were useless. Those not cleansed might not have contact with pure possessions of the sect, and were to be kept separate from the sectarians. Like the Essenes, members were kept on varying degrees of probation for two years — more rigorous than the pharisaic "associations." Upon admission to the sect, members were bound by oaths to follow the prescribed order, and



Column 5 (and part of col. 4) of the Manual of Discipline from Qumrân. Here the community members are commanded to avoid "men of deceit" and to obey the Torah and other rules of purity (copyright J. C. Trever, 1970)

failure to keep these oaths would bring upon them the assigned curses of the covenant. In addition, they might be fined or excommunicated. Like the Essenes, the Qumrân sect demanded very rigorous self-discipline, agreeing in such specific details as forbidding spitting into the midst of the session or to the right and punishing with death one who blasphemes the name of God.

Members of the Qumrân sect were to love all the sons of light (members of the sect) and hate all the sons of darkness (nonmembers), just as God loves one spirit and hates the other. Sectarians were not to hate one another. According to a man's spirit he should either be loved or hated, either accepted or rejected from the community "according to the cleanness of his hands."

Hippolytus said the Essene was required to vow to hate no one who wronged him or was an enemy to him, but this was apparently an attitude within the sect, or else hatred was given a different meaning, similar to 1QS 9:22f.: "[Let there be] eternal hatred toward the men of the pit in a spirit of secrecy, yielding to them wealth and manual labor as a servant to his master and the submission [fitting] toward one who rules him. But let each be zealous for the decree and its season — for the day of vengeance."

Although the discipline of the Essenes was not explained in terms of love and hatred, the attitude of acceptance or rejection based on a member's willingness to observe prescribed rules is descriptive of both groups. The Qumrân sect described rejection as hatred and acceptance as love.

Like the Essenes, the Qumrân sect based its existence on the Scriptures, which were to be read day and night and interpreted. Studying the Torah was the way sectarians prepared a highway for God in the desert. Anyone who transgressed a word from the Torah of Moses was to be banished from the council never to return.

B. Damascus Document. Like the Essenes and the Qumrân sect, the Covenanters called their group or special group within the sect "the many" (see Smith, *HUCA*, p. 291). They also ranked people according to status. Like the Essenes, they considered the sanctuary to be defiled, and like the Qumrân sect they held that there had to be a priest wherever ten men were present. They were meticulous in discriminating between the clean and unclean so as to observe ritual purity; they were strict sabbath observers; and they may have referred to their own group as a "trustworthy house" (Heb. *byt n'mn*). They identified hatred (*śn'*) with rejection (*m's*). They evidently enrolled their members by requiring them to take oaths, which if broken would impose upon the offenders the curses of the covenant; but they did not limit swearing to the oath of admission into the sect. Neither did the Covenanters prohibit slavery or marriage, but presumed a normal family existence in which members had children. They did object to bigamy, incest, and sexual intercourse in the holy city, and they excommunicated members who violated these rules. They gave offerings, as did the Essenes; but they had no communistic economy, although each member was taxed for charity.

It would not be surprising to discover similarities among many of the sects that existed in Palestine before the fall of Jerusalem. Agreements in belief and practice do not constitute enough evidence to conclude identity. The most convincing evidence that the Qumrân group was an Essene community was Pliny's statement that the Essenes lived on the west side of the Dead Sea above En-gedi. But this does not say whether "above" meant "to the north" or higher in altitude (see Audet; Burchard). Although there are striking similarities between CD and 1QS, there are important differences: The sect of CD had no monastic or communistic order and it permitted slavery. It was careful in its attempt to fulfil the law, but not so scrupulous as the Qumrân sect or the Essenes. The Qumrân sect is more like the Essene sect than any other known Jewish group, and Pliny's description is strongly in favor of identifying the Qumrân group with one community of Essenes; but it is more important to see the kind of movements that went on in Palestine before A.D. 70 than to identify the beliefs of a group with the name of a sect.

XII. Essenes and Christianity.–*A. Christianity and Communism.* There are obvious parallels among the practices

Two leaves of the Damascus (Zadokite) Document (CD 10:1-23; 11:1-23) outlining the strict Sabbath regulations of the sect. From the Cairo Genizah, 10th cent. A.D. (Cambridge University Library)

of the Essenes, the sect at Qumrân, the Zadokite Covenanters, and the early Christian Church. Some early Christians evidently practiced a form of communism similar, perhaps, to that of the marrying Essenes. Certainly men and women were both admitted into the economic community described in Acts 4:32ff., and they apparently were not required to contribute all their possessions to the group; but those who contributed under false pretenses, like Ananias and Sapphira, were severely punished.

There are also in the NT hints of a type of complete communism similar to that of the Essenes. The man who had kept the normal commandments was told that if he wanted to be "perfect" (a full member; see 1QS 1:8,22; 3:3f.; 4:22; 8:1,9f., 18-21), he must take all he had and give it to the poor (Mt. 19:21). By this Jesus may have been asking the man to contribute his resources into the common treasury of a group called the "poor," an economic policy similar to that of the Essenes and the sect at Qumrân. When confronted by Jesus, Zacchaeus volunteered, "'Behold, Lord, the half of my goods I give to the poor; and if I have defrauded any one of anything, I restore it fourfold'" (Lk. 19:8). This might mean complete surrender of wealth — one-half to repay his fraudulent acts in the past and one-half for the sect.

B. Monasticism. Jesus encouraged those interested in His teaching to break family ties and follow Him. He rejected His own family to accept a new one (Mt. 12:46-50; Mk. 3:31-35; Lk. 8:19-21). He said, "If any one comes to me and does not hate his own father and mother and wife and children and brothers and sisters, yes, and even his own life, he cannot be my disciple" (Lk. 14:25f.). In this instance the word "hate" means "reject" as in 1QS, CD, and Lk. 6:22. Likewise, would-be followers were not permitted to wait until their parents had died and were properly buried (Mt. 8:21f.; Lk. 9:59f.) nor even to say farewell to their families (Lk. 9:61f.). Jesus called people to take stands that would separate family members from one another. Those who had greater loyalty to their families than to Jesus could not be accepted into the movement. It was by losing one's life (so far as family was concerned) for Jesus' sake that one would find his life (so far as the group was concerned; cf. Mt. 10:35-39).

Paul also chose to be celibate, but he indicated that other apostles had married (1 Cor. 9:3-5). Mt. 19:27-29 implies, however, that the disciples of Jesus had left everything to follow Him. Paul recommended celibacy for others, but did not require it (1 Cor. 7:1-40). The 144,000 who were redeemed from the earth were celibates who had not defiled themselves with women (Rev. 14:3f.).

There is no indication that Christians rejected slaves on the grounds of ritualistic righteousness. This may be because the habits of monastic Christians were not described in detail in the NT.

C. Hospitality. Like the Essenes, Christians expected hospitality in every city in the homes of the "worthy." The twelve were sent out without gold, silver, or copper in their belts, no bags nor sandals, and with only one tunic each. They were told: "And whatever town or village you enter, find out one who is worthy in it, and stay with him until you depart. As you enter the house, salute it. And if the house is worthy, let your peace come upon it; but if it is not worthy, let your peace return to you" (Mt. 10:11-13). In conformity with the Essene type of hospitality, Christians were told not to give to dogs (Gentiles) that which was holy (Mt. 7:6), and to ask, seek, and knock, and be assured that their needs would be met (Mt. 7:7). Jesus said that the one who was more loyal to his family than to Him, and who would not take up his cross and follow Jesus, was not "worthy" so far as He was concerned (Mt. 10:37f.). The returning prodigal son who has been with "swine" and "harlots" (i.e., Gentiles, and Jews who mingled with Gentiles) knew he was no longer "worthy" (Lk. 15:19,21.) Those commended for acceptance as fellow workers deserving hospitality,

so that they could be sent on "in a manner worthy of God," had refused gentile hospitality for the sake of the Name (3 Jn. 5-8, NIV). Those who did not remain in the true doctrine were not to be admitted into the homes of the faithful, or even greeted by them (2 Jn. 7-11). Those in Sardis who had not "soiled their garments" were called "worthy" (Rev. 3:4). The one who could open the scroll and break its seals had to be "worthy" (Rev. 5:2, 4, 9, 12).

The Christians, as well as the Essenes and members of other sectarian "associations," belonged to a background of careful legalistic observances, followed similar hospitality practices, and called accepted members "worthy" or "trustworthy."

D. Antiexclusivism. Primitive Christianity, however, cannot be fully described in terms of monastic, communistic, exclusive sectarianism. Some of the earliest Synoptic sources depict Jesus as one who opposed Pharisees on the very point of ritual purity and dietary laws. Hence He was distinguished from John the Baptist. John practiced "righteousness" (Mt. 21:32), neither eating nor drinking (with those not "trustworthy"). But Jesus was called "an eater and a wine-drinker, a friend of tax collectors and sinners" (Mt. 11:18f.). The tax collectors and sinners were the Roman collaborators and those who did not observe the dietary and purity rules. Jesus taught that God accepted and forgave these nonobservant Jews (e.g., Mt. 9:10-15 par.; 15:1-3 par.; 18:21f. par.; 23:25 par.).

Paul, who represented a branch of Christianity that had broken away from ritualistic purity, was in constant conflict with those Christians who held to it (Gal. 2:1–5:25; Rom. 2:17-29; 3:19–6:23; 8:1-8; 15:7-18). Yet on occasion he modified or adapted his counsel to maintain order within the community (1 Cor. 6:12-20; 8:1-13; 9:19-23; 10:6-33).

E. Oaths. Like Essenes, Christians were forbidden to take any oath (Mt. 5:33-37), and Pharisees were criticized for upholding those who bound themselves by oaths to neglect their parents in their old age (Mt. 15:4-6; Mk. 7:10-12). The Pharisees feared the effects of the curses imposed in the oath more than the effects of neglected parents. (See Acts 23:12-15 for another example of an oath; cf. G. W. Buchanan, *HTR*, 58 [1965], 319-326.)

F. Theology. The Christian belief in providence reflected in the Gospels (Mt. 6:25-34; 7:7-11; Lk. 12:32) and in Paul's insistence that God controls all things (Rom. 1:18-32; 9:6-18) and acts without consulting anyone or needing justification (Rom. 9:19-29) is similar to that of the Essenes. Paul said it was God who foreknew, predestined, called, justified, and glorified (8:28-33). Like the Essenes and Pharisees, Christians believed in the resurrection of the dead (1 Cor. 15; Acts 23:6-10) and held that Christ was the first fruits of those who had died since He rose from the dead (1 Cor. 15:1-21).

G. W. BUCHANAN

ESTABLISH [Heb. *kûn, qûm, 'āmaḏ, śûm* or *śîm, 'āman,* also *yāsaḏ* (1 Ch. 9:22; Hab. 1:12), *ḥāzaq* (2 Ch. 1:1; 21:4), *'āmēṣ* (Prov. 8:28), *yāṣag* (Am. 5:15), *sāmaḵ* (Ps. 111:8), *sā'aḏ* (Isa. 9:7 [MT 6]); Aram. *t'qan* (Dnl. 4:36 [MT 33]); Gk. *stērízō, hístēmi*; also *synteléō* (He. 8:8), *bebaióō* (Col. 2:7; 2 Cor. 1:21); cf. *apokatástasis* (Acts 3:21)]; AV, NEB, also CONFIRM, PERFORM, MAKE, PREPARE, STRENGTHEN, APPOINT, STAND, SET (UP), FULFILL, CONSTITUTE, DETERMINE, etc. The Hebrew words may be translated by many synonyms of the English "establish," depending upon the context; in the RSV they appear as many as five hundred times with translations other than "establish" (cf. AV, NEB). Although it is not possible to draw too much significance from the roots, their basic meanings reflect the dual senses of the English "establish," namely, "make firm or stable" and "institute, bring into existence."

Six Hebrew words yield the first sense. The most frequently translated "establish" (sixty-eight times) is the verb *kûn*, "make firm," usually in the niphal or hiphil stems. This verb is usually connected with the idea of "kingdom," "throne," or "house (family)," especially in the historical books (cf. 2 S. 7:12f., 16, 26; 1 K. 2:12, 24, 45f.; 1 Ch. 14:2; 17:11f., 14; 22:10; 28:7; 1 K. 9:5 has *qûm*). A second word, *'āman*, "confirm, support," is translated "establish" four times (1 Ch. 17:23f.; 2 Ch. 20:20; Isa. 7:9). A third, *ḥāzaq*, "be (grow) firm, strong," is twice translated "establish" (2 Ch. 1:1; 21:4). The other three so translated are *'āmēṣ*, "be stout, strong," *sāmaḵ*, "lean, lay, rest, support," and *sā'aḏ*, "support, sustain, stay."

The second basic sense of "establish" is reflected in five Hebrew words. Most frequent is the verb *qûm*, "arise, stand up, stand," usually translated "establish" in the hiphil (causative) stem. Its most important connection here is with the theme of covenant (and God's word) or covenant people, especially in the Pentateuch (Gen. 6:18; 9:9, 11, 17; 17:7, 19, 21; Ex. 6:4; Dt. 28:9; 29:13 [MT 12]; 1 S. 1:23; 1 K. 2:4; Ezk. 16:60, 62; cf. *kûn* in Dt. 32:6). A second word is similar: *'āmaḏ*, "to take one's stand, to stand," is translated "establish" in the hiphil stem (1 K. 15:4; 2 Ch. 9:8; Neh. 13:30; Ps. 30:7 [MT 8]; 148:6). This meaning also occurs with *śîm* or *śûm*, "put, place, set," (1 K. 20:34; Job 38:33; Ps. 89:29 [MT 30]; Isa. 42:4) and *yāṣag*, "set, place" (Am. 5:15). Finally, *yāsaḏ* has a basic meaning "establish, found, fix," and is perhaps the closest parallel to the English word "establish."

The contexts of the two basic words of each sense are of interest. *Qûm*, with the connotation "bringing into existence" what has not previously existed, is used in the original declarations of the covenant to Abraham and Moses; *kûn* is used of the promise of the kingdom to David, suggesting "making firm" an already existing situation.

The NT Greek verbs also reflect the dual sense of "establish." On the one hand, *stērízō* (1 Thess. 3:2, 13; 2 Thess. 2:17; Jas. 5:8; 1 Pet. 5:10; 2 Pet. 1:12) has the basic sense of "make fast" what already exists, as does *bebaióō*, "make firm, confirm, make sure" (2 Cor. 1:21; Col. 2:7). On the other hand, *hístēmi* (a frequent LXX translation of *qûm, 'āmaḏ,* and *yāsaḏ*) in the transitive sense means "cause or make to stand; place, put, set" (Thayer).

The remaining two words are more complicated. In He. 8:8 the author uses *synteléō* instead of the LXX *diathḗsomai* (Jer. 31:31 [LXX 38:31]) of the OT quotation.

This reflects the new perspective of the NT that the covenant has been completed, "effected," or "accomplished" and not simply initiated or reaffirmed. The NEB "conclude" is perhaps better than the RSV "establish." In Acts 3:21, the RSV translates *apokatástasis,* "establishing," instead of the more correct "restoration" (cf. NEB; AV "restitution"). This is apparently on the theological grounds that "the fulfillment here is much wider in scope than the restoration of the Kingdom of Israel. . . ." (F. F. Bruce, *Acts* [*NICNT,* 1954], p. 51).

H. VAN BROEKHOVEN, JR.

ESTATE. The AV uses "estate" in the obsolescent sense of "state" or "condition" (cf. Col. 4:8) as well as for "position." The RSV uses it only in the latter sense and in the sense of "property."

ESTEEM [Heb. *'ênayim*] (Neh. 6:16); AV "eyes"; NEB "achievement"; [*qālâ*] ("lightly esteemed," 1 S. 2:30); NEB "treated with contempt"; [*lō' ḥāšaḇ*] ("esteem not," Isa. 53:3f.); NEB "hold of no account"; [*yāqar*] (1 S. 18:30); NEB "won a great name"; [Gk. *exouthenéō*] ("least esteemed," 1 Cor. 6:4); NEB "count for nothing"; [*krínō*] (Rom. 14:5); NEB REGARD. In 2 S. 16:23 the RSV and NEB supply "esteem" to make the Hebrew construction understandable.

In the one instance of "esteem" as a noun (Neh. 6:16) it translates the plural of *'ayin* ("eye"), which often means "opinion"; *see* EYE. As a verb it is used in the RSV for the neutral terms *ḥāšaḇ* ("account") and *krínō* ("judge"), for the negative terms *qālâ* ("dishonor") and *exouthenéō* ("despise"), and for the positive term *yāqar* ("be prized").

In Isa. 53:3f. "esteem" is used for Israel's response to the Suffering Servant. In 53:3 what disturbs the prophet most is that Israel "esteemed him not," i.e., it did not know Him or what He was doing. Verse 4 gives Israel's interpretation of His suffering; "Yet we esteemed him stricken, smitten by God, and afflicted." Like Job's comforters, Israel considered suffering a punishment from God.

Those designated as "least esteemed" in 1 Cor. 6:4 are the pagan judges who are outside the Church. Paul says that these people should have no right to judge the disputes which are dividing the Corinthian church.

The reference in Rom. 14:5 to one who "esteems one day as better than another" and to another who "esteems all days alike" presupposes two groups who are divided over the observation of special feast days. "Esteem" (Gk. *krínō*) here denotes the theological judgment of the two groups. In the first instance it means "prefer" and refers to those who set aside special feast days (cf. Gal. 4:10; Col. 2:16); in the second instance it means "not distinguish." The same Greek word is translated "judge" in Rom. 14:3, where Paul counsels against allowing different views on feast days to cause one to "pass judgment" on his neighbor. Thus, while brothers may "esteem" the question of foods differently (v. 5), this difference in view is no excuse for condemnation of the brother (v. 3).

J. W. THOMPSON

ESTHER es'tər [Heb. *'estēr*; akin to the Sanskrit *stṛi,* Gk. *astḗr*–'a star'; Gk. *Esthēr*]. According to the book of Esther, Esther was a Jewish orphan who became the queen of Ahasuerus (Xerxes) the Persian king. She was brought up at Susa by her cousin Mordecai, who seems to have held a position among the lower officials of the royal palace. After he had divorced Vashti, his former queen, Ahasuerus had the most beautiful virgins from all the provinces of the empire brought to the palace of Susa so that he might select her successor. He chose the Jewish maiden.

Soon after Esther's accession a great crisis threatened the entire Jewish people with destruction. The name of Esther is forever bound up with the record of their deliverance. By a course of action that gives her a distinguished place among the women of the Bible, Haman the great enemy of the Jews was destroyed and her people were delivered. Nothing more is known of her than is recorded in the book that Jewish gratitude has made to bear her name. *See* ESTHER, BOOK OF.

The change in the queen's name from Hadassah (Heb. *hᵃḏassâ,* "a myrtle") to Esther ("a star") reflects local usage. Hadassah was apparently her Jewish name, whereas Esther was used when she was given her official Persian title as queen. The narrative displays her as a woman of clear judgment, of magnificent self-control, and capable of the noblest self-sacrifice. J. URQUHART

ESTHER, ADDITIONS TO THE BOOK OF; AV, NEB, REST OF THE CHAPTERS OF THE BOOK OF ESTHER. Part of the OT Apocrypha.

The critical introduction to Esther and its additions bears some resemblance to a bog, with but a few firmer footpaths. The late and hesitant acceptance of the Hebrew text as canonical Scripture was eventually offset by its immense popularity in militant Judaism, once its propaganda value was discovered. No other book of the OT has been so freely translated or so copiously embellished as Esther, not only in the LXX, but also in Josephus, the Targum, the Talmud, and the Midrash. This article is confined to the LXX additions, which are the earliest in date.

1. Canon and Apocrypha.–The Greek text of Esther with the interpolations is preserved in two main forms:

(1) The ordinary Greek text, based on the famous uncial Codices Vaticanus, Alexandrinus, Sinaiticus, etc., and numerous minuscules. This text is followed in *OTG.*

(2) The rescension of Lucian, on which several further MSS are based. (See esp. A. E. Brooke, N. McLean, and H. St. J. Thackeray, *The OT in Greek,* III, [1906], v, vi, 1-42; also Paton, comm. on Esther [*ICC,* repr. 1951].)

These Greek traditions vary from the Hebrew and from each other. The Latin Vulgate, forsaking the good example of the LXX, placed the six main additions to the book of Esther in a disconnected and confused lump at the end; the English Apocrypha RV has segregated them further from the setting in which they are meaningful. The NEB Apocrypha, on the other hand, translates Swete's entire Greek text, with the apocryphal portions in brackets. The *ICC* translates all the interpolations from all the sources in their proper places, as is also done, with notes in another volume, in L. Ginzberg, *Legends of the Jews* (rev. ed. 1961). The English Bible and Apocrypha are sufficient for understanding, if the additions are read where they belong.

The exceptional discrepancies have led to several theories about the relationship between the Hebrew and Greek versions of Esther. Many Catholic exegetes maintain that the existing canonical Hebrew book is the abridgment of a once larger work containing all the apocryphal material. The hypothesis of C. C. Torrey (*HTR,* 37 [1944], 1-40) is broadly that both surviving versions were translated from an older and larger Semitic original, possibly Aramaic, which became represented more fully, and at an

earlier date, in the Greek version. But the controversial issue as to whether the additions are translation Greek or original compositions, or some the one, some the other, affects both theories. A third and more common view is that the LXX translates the canonical Hebrew, but that it does so more freely than in the case of other OT books, and at the same time interpolates long passages in their first or Greek dress.

The Hebrew text of Esther not only avoids the name of God but almost lacks a discernible religious motif — which explains some of the difficulties over its canonicity. Several reasons have been suggested. The writer may not have been a deeply religious man. Or the Feast of Purim with which Esther is associated, a noisy, secular, and alcoholic affair, may have been felt to be an occasion ill suited to the use of the divine name. Or religious sentiments openly expressed may have been fraught with some contemporary political danger. Or this outwardly secular book may have a deeper allegorical meaning — though this has not been satisfactorily demonstrated. Some have regarded the interpolations as being themselves intended to supply the missing religious motif.

For the additions, several scholars suggest a date in the last quarter of the 2nd cent. B.C. But this is a matter open to variant opinion. (See *APOT,* I, 665-671; *HNTT*; C. C. Torrey, *Apocryphal Literature: A Brief Intro.* [1945]; W. O. E. Oesterley, *Intro. to the Books of the Apocrypha* [1935]; *Jew.Enc.*; *HDB*; *ICC*; *IOTG,* pp. 257ff.)

II. The Six Additions to Esther, A-F.–A. The RSV 11:2–12:6 should be read before the beginning of the Hebrew version. It is significant for Mordecai's dream (11:5-11), which is interpreted in Addition F (10:6-9), and for Mordecai's revelation of the treasonable plot of the two eunuchs against Ahasuerus, which earned the hatred of Haman (12:1-6). The Vulgate and the RV disastrously place the interpretation before the dream.

The MT of Esther opens, quite Hebraically, with *wayᵉhî,* which the LXX renders *kaí egéneto*; Joshua, Judges, Ruth, 1 Samuel, etc., conform in both languages. It is only to Western, not to Eastern, thinking that such an opening is strange. In Est. 1:1, the LXX significantly adds the words *metá toús lógous toútous,* which are not contained in the Hebrew. This clearly refers back to Addition A and treats it as an integral part of the text.

B. RSV 13:1-7 should be inserted in ch. 3, between vv. 13 and 14, where it appositely supplies the decree of Artaxerxes against the Jews, inspired by the hatred and craft of Haman. This passage is an early and interesting parody of anti-Semitic polemic.

C. RSV 13:8–14:15 should be inserted between chs. 4 and 5 in the Hebrew. It contains the prayers of Mordecai and Esther. Mordecai's self-justification for refusing to bow to Haman may possibly be pride, casuistry, or special pleading (13:12-17.; cf. Paton, *ICC,* pp. 193ff.). Esther's hatred of her regal splendor (14:15-18) is very noble from a Jewish viewpoint, though some regard it as the invention of a later age. Both prayers are fine, though particular phrases might arouse criticism. They supply a religious element.

D. RSV 14:1-16, subjoined to C and also preceding ch. 5, provides a fuller account of Esther's appearance before the king.

E. RSV 16:1-24 should be inserted at 8:12 in the Hebrew text. Artaxerxes revokes his decree against the Jews, denounces Haman, and utters some religious sentiments. Here, apparently, the laws of the Medes and Persians may be altered.

F. RSV 10:4–11:1, appended to the canonical book, includes an interpretation of Mordecai's dream, an account of the institution of Purim, and a superscription.

III. Conclusion.–For the contradiction in the Greek version, and for fuller theological evaluation, the reader must be referred to larger works. R. H. Pfeiffer (*HNTT,* p. 311) dismisses the Greek work as an "anti-Gentile tract," "a travesty of a noble religion," and so forth. His strictures are perhaps too harsh, but it cannot be claimed that Esther, Hebrew or Greek, has uniformly commended itself to Christians, though it has its lesson to teach. The canonical portion may conceivably, as the Word of God, answer the special needs of special periods or situations. R. A. STEWART

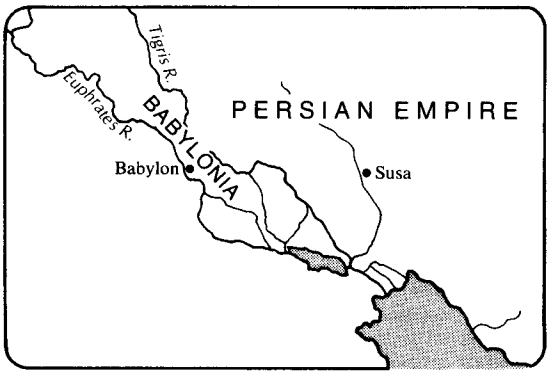
IX. Moral and Religious Problems

I. Contents.–The story is set in the Persian capital, Susa, during the reign of Ahasuerus (probably Xerxes I, 486-465 B.C.). The king, somewhat drunken during a state banquet, summoned Queen Vashti to his presence; but Vashti, insulted by his intention to make her a public spectacle, rebuffed him, and he in a fury divorced her. He then took steps to replace her, sending his courtiers to fetch all the beautiful, marriageable girls in the kingdom for his inspection. His final choice was Esther, a Jewish orphan, who had been adopted and reared by her cousin Mordecai. Shortly afterward, a plot to assassinate the king came to Mordecai's notice, and he was able to send a message to Esther, warning Ahasuerus. The plotters were duly executed, but Mordecai went unrewarded.



One of the king's chief nobles was called Haman. This man developed a violent dislike of Mordecai, who did not show him what he considered proper respect. Knowing Mordecai to be a Jew, he inveigled the king into issuing an edict authorizing the extermination of all the Jews in the Persian empire. Haman took pleasure in making his own arrangements for the death of Mordecai, even constructing gallows for the purpose. Frightened for her people, Esther (whose nationality had been kept secret) determined to approach the king and made arrangements to see him and Haman at a private banquet. At this juncture, the king chanced to read the court chronicles, where he

was reminded of Mordecai's loyalty, and learned that he had never been rewarded for it. So the next day Haman, much to his chagrin, was ordered to parade Mordecai through the streets in royal array, as a mark of honor.

At her feast, Esther now pleaded for her own life and her people's, with such success that the king gave orders for the immediate execution of Haman, as the instigator of the edict. Mordecai was elevated to Haman's position, and the edict was in effect revoked, for the Jews received permission to take revenge on their enemies. This they were not slow to do, and the occasion ended in a joyous festival, which became an annual feast called Purim. The book ends with the Jews happy and secure, Mordecai in high office, and Esther retaining her position as queen.

SYNOPSIS

Ch.	1	Banquet of Ahasuerus; dismissal of Vashti
	2:1-18	Choice of Esther as queen
	2:19-23	Mordecai foils the assassins
	3	Haman's rise to power; the fateful edict
	4	Jewish mourning; Esther and Mordecai confer
	5	Esther prepares her banquet, Haman his gallows
	6	Ahasuerus remembers and honors Mordecai
	7	Esther's banquet; execution of Haman
	8	New, pro-Jewish edict
	9	Jewish vengeance; feast of Purim
	10	Conclusion

II. Additions.–The LXX version of Esther has over one hundred verses, distributed throughout the book, that are not found in the MT. It is certain that the extra material is not original to the book; it was added at a later date to give the book a more explicit religious tone. This extra material was extracted by Jerome and placed at the end of the book in his translation; in English versions it appears in the Apocrypha, as the Additions to the Book of Esther, or the Rest of Esther. (*See* ESTHER, ADDITIONS TO THE BOOK OF.)

III. Position in the Bible.–In the English Bible the book of Esther is appended to the historical books; it therefore follows Chronicles–Ezra–Nehemiah and precedes Job. This follows the LXX order. But in the MT the book is in the third division, the Hagiographa or "Writings," and is the last of the five Megilloth or "scrolls." These five books (Ruth, Song of Solomon, Ecclesiastes, Lamentations, and Esther) were placed together, since each was read annually to commemorate some occasion of the Jewish year. Esther was, and still is, read at Purim.

IV. Canonicity.–After the fall of Jerusalem in A.D. 70, a school of rabbis at Jamnia, near the coast of southern Palestine, debated the right of Esther and a few other OT books to be included in the canon. No doubt it was the absence of God's name that made the book suspect, perhaps coupled with Purim's being a festival without pentateuchal authority. However, the Jamnia rabbis confirmed its canonical status. In all probability, the debates merely served to confirm what had already been agreed on (by public opinion); they were thus more of an academic exercise than an open-minded discussion. The earliest Christian canon of the OT known to us, that of Melito of Sardis (*ca.* A.D. 170), does not include Esther, but the reason for the omission is uncertain. The canon of Origen (*ca.* A.D. 187-254) includes it, and the book found its place in the canon of both Jews and Christians. It has always had a strong appeal to Jewish minds. In the Mishnah it is called *Megillah, "the* Scroll" par excellence. Maimonides prized Esther so highly that he bracketed it with the Pentateuch. It has not always been similarly valued by Christian writers, however. Its lack of explicit religious sentiment and its somewhat bloodthirsty nationalistic ardor have offended many, notably Martin Luther (cf. H. Bornkamm, *Luther and the OT* [Eng. tr. 1969], p. 189).

V. Authorship.–There is no available evidence to enable us to decide who wrote Esther. The suggestion that Mordecai himself did so, which may have been prompted by 9:20, is without any good foundation. In fact, Mordecai probably died before the book was written, although 10:3 does not necessarily imply this.

VI. Date.–The outside limits are obviously the reign of Ahasuerus (if he was Xerxes I, then the first half of the 5th cent. B.C.) and the date of the first extant quotation from or allusion to the book. The *terminus ante quem* is not easily determined, however. Neither the Qumrân Scrolls (to date) nor the NT documents reveal any knowledge of Esther. Josephus, on the other hand, at the end of the 1st cent. A.D., knew the LXX form of the book well — including the additions, which obviously postdate the composition of the Hebrew original — and apparently thought it canonical. The Jamnia discussions too make it clear that the book had received general recognition by the end of the 1st cent. A.D. The earliest evidence of the existence of Esther is the LXX, which may give us a second-century B.C. date as the *terminus ante quem.* On the other hand, Sirach (Ecclesiasticus, early 2nd cent. B.C.) fails to mention Esther and Mordecai in its list of biblical heroes; but the value of such negative evidence is uncertain. *See* Plate 25.

A. Internal Evidence. The book itself strongly suggests that it was written before the fall of the Persian empire. The reference to the Persian royal chronicles in 10:2 certainly implies that they were still accessible. Whereas the reign of Ahasuerus was probably past, the book reveals no hint of knowledge of any but a Persian administration. It is also noteworthy that although Persian loanwords appear in the Hebrew text, there are no borrowings from Greek, nor do any Greek personal names appear. A date prior to the fall of the Persian empire to Alexander the Great (331 B.C.) is therefore strongly indicated.

B. Maccabean Theory. The strong nationalistic feelings of the author and the anti-Semitic situation described in Esther have led a considerable number of scholars (e.g., *PIOT,* pp. 740-42) to conclude that it cannot have been written till after the Maccabean revolt against Antiochus Epiphanes. Haman, on this view, is but a caricature of Antiochus. But the details of the story are totally different from the Maccabean situation; and it is probable that anti-Semitism and Jewish nationalism existed prior to the reign of Antiochus (175-163 B.C.).

VII. Nature and Purpose.–The book of Esther has been variously described as history, fiction, and mythology. Numerous scholars (e.g., L. E. Browne, *s.v., Peake's Comm. on the Bible* [rev. ed. 1962]) call it a historical novel or romance. However, there seems to be a growing tendency to believe that there is at least a historical basis for the story, even when some of the details are regarded as fictional embellishments (so, e.g., B. W. Anderson, *Understanding the OT* [1957], pp. 504-508). The purpose of the book may have been merely to tell a story (whether true or fictional); but most scholars are agreed that the main function was to explain the origin of the PURIM festival and to authorize its continued observance. R. H. Pfeiffer's view (*PIOT,* pp. 737-747) that Purim, together with the story as a whole, was invented by the author, has gained little support.

The view of it as mythological is based on the similarity of the names of the chief characters in Esther to the

names of some Babylonian and Elamite deities. Mordecai is equated with the god of Babylon, Marduk, and Esther herself with the goddess Ishtar (who was Marduk's cousin), while Haman and Vashti are the Elamite deities Humman and Mashti (cf. L. P. Paton, *Esther* [*ICC*, 1905], p. 88). Furthermore H. Zimmern (*ZAW*, 11 [1891], 157-169) derived "Purim" from the Babylonian *puḫru*, the assembly of the gods. On this theory, the story of Esther represents the victory of Babylonian gods over the Elamite deities. The coincidence of the names is curious, but of course personal names were very often theophorous (cf. the name "Baal" for a man, 1 Ch. 5:5). In any case, the discovery of a cuneiform text (cf. A. Ungnad, *ZAW*, 58 [1940/41], 240-44; 59 [1942/43], 219) referring to a court official of Xerxes I called Marduka would seem to rule out the mythological approach. It seems clear that Mordecai was a real person.

This cuneiform text also confirms the identification of Ahasuerus (Heb. *'aḥašwērôš*) with Xerxes I, who reigned 486-465 B.C. The LXX renders the name "Artaxerxes," and following this hint some scholars (e.g., J. Hoschander) have identified Ahasuerus with Artaxerxes II (404-358 B.C.). It is just possible that there was another courtier named Marduka or Mordecai at the latter king's court, but the balance of probability must now support Xerxes I as the king of the book of Esther.

VIII. Historicity.–The discovery of a historical person named Marduka in the reign of Xerxes I is the most important evidence available for defending the book's historicity. It is true, moreover, that "the author possessed an amazingly accurate knowledge of Persian palaces and manners" (B. W. Anderson). It is also noteworthy that while Vashti was deposed in the third regnal year of Xerxes, it was his seventh year before Esther became his queen; during the intervening period Xerxes assembled a large army and naval force and invaded Greece, where he suffered heavy defeats at Thermopylae and Salamis in his sixth year (480 B.C.). The dates given by the book of Esther thus dovetail neatly with the known dates of events of his reign; it is improbable that this is just a coincidence.

On the other hand, to view the whole book as history raises certain problems. The first of these is that the only queen of Xerxes known to the contemporary Greek historian Herodotus (vii.61, 114) was named Amestris, and she was the daughter of a Persian general. In spite of an apparent similarity of name, it is difficult to equate her with Esther. This problem is the more serious, in that according to Herodotus (iii.34) the Persian king was not free to marry any but a Persian. Another difficulty is the age of Mordecai: 2:6 seems to state that he had been one of the exiles removed from Jerusalem by Nebuchadrezzar (in 597 or 587 B.C.). This is not certain, however; Mordecai's great-grandfather Kish may be the antecedent of the relative pronoun "who" in 2:6. Even if the chronological error were proved, that in itself would not necessarily reflect on the truth of the narrative as a whole. But most of the problems are of a more subjective nature; several scholars feel that the book has too many coincidences and improbabilities. In view of these difficulties, it may be best to treat the book as basically historical, while recognizing the possibility of fictional embellishments, the extent of which cannot be accurately evaluated until we are in a position to consult the Persian records to which the book refers the reader in 10:2. The fact is that our knowledge of the Jews in the eastern Persian empire is very slight.

IX. Moral and Religious Problems.–The lack of religious sentiment and the book's exultation in the Jewish slaughter of their enemies have made it repugnant to not a few Christians and moralists. The first deficiency was certainly felt at an early stage by Jews themselves, hence the pious additions in the LXX. But probably the writer saw the outworkings of divine providence in the elevation of Esther and Mordecai to positions where they could rescue their fellow Jews. And in view of the strong feelings inevitably roused by anti-Semitism, Jewish exultation in the downfall of their persecutors is not surprising; the book was penned long before Jesus uttered His revolutionary words, "Love your enemies and pray for those who persecute you" (Mt. 5:44). The universal interests of the latter part of Isaiah and the book of Jonah certainly seem far loftier to us today; but Israel could not channel God's blessing to the whole world while her own continued existence was threatened. Evidently the spirit of the book of Esther is due to the circumstances under which it was written, a time when the Jewish race was in jeopardy. (Cf. the similar tone of the book of Ezra, also written at a time when the Jewish faith was in jeopardy.) The missionary spirit could flourish only when the nation was secure.

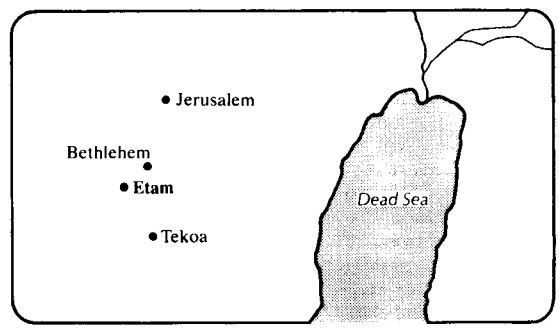
ESTIMATE. *See* VALUATION.

ESYELUS ē-sī-ē'ləs [Gk. *Ēsyēl, Esyēlos*] (RSV mg., NEB, 1 Esd. 1:8). *See* JEHIEL **6.**

ETAM ē'tam [Heb. *'ēṭām*].

1. A place mentioned along with Tekoa, Bethlehem, and other towns in northern Judah (2 Ch. 11:6; Josh. 15:59, LXX, NEB; the authenticity of this latter passage, though missing in the MT, is favored because the district focuses on Bethlehem). It was evidently named after an important member of the tribe of Judah (1 Ch. 4:3). In 2 Ch. 11:6 it occurs between Bethlehem and Tekoa as one of the cities fortified by Rehoboam. Thus it was designed to play an important role in the defensive network established at that time.

Josephus describes "a certain spot two *schoinoi* [about 14 km. (9 mi.)] distant from Jerusalem, which is called Étan [Gk. *Ētán*], delightful for, and abounding in, parks and flowing streams, and to this place he [Solomon] would make excursions, mounted high on his chariot" (*Ant.* vii.7.3[186], *LCL*). Mention of 'Aitān, described as the most elevated place in the land, occurs in T.B. *Zebahim* 54b, and T.P. *Yoma* iii.41 states that a conduit ran from 'Atān to the temple. Traces of this conduit remain; it may also have provided the water for the Roman bathhouse excavated at Ramat Raḥel, located between 'Ain 'Aitān and the Old City of Jerusalem.



One of the five springs in the vicinity of present-day 'Arṭas still bears the name 'Ain 'Aitān; it is the lowest of the springs supplying the aqueduct leading to the so-called Pools of Solomon. These latter may very well date from the Herodian period; their location suits the description by Josephus. Their repair is attributed to Pontius Pilate (*Ant.* xviii.3.2; *BJ* ii.9.4). During Turkish rule, water from these pools was brought to Jerusalem via ten-centimeter (four-inch) pipes. After the capture of Jerusalem by Allenby in 1917, the British Army installed pumps for transferring the water to storage reservoirs in Jerusalem. Today 'Ain 'Aitān provides water for Bethlehem by pipeline.

During the Middle Ages the association of the pools with Solomon was bolstered by citing Eccl. 2:6. Opposite the upper pool are situated the ruins of a Turkish fort from the 17th or 18th cent., Qal 'at el-Burak. Roman remains are also abundant in the vicinity of 'Arṭas. The OT town of Etam, however, is probably to be sought at Khirbet el-Khôkh.

2. A town assigned to Simeon (1 Ch. 4:32), though not mentioned in Simeon's inheritance according to Josh. 19. Its location is unknown.

3. The rock of Etam, where Samson took up his dwelling after smiting the Philistines "hip and thigh with great slaughter" (Jgs. 15:8, 11), was in Judah but apparently in the low hill country. The rocky hill on which lies the village of Beit 'Atab, near Ṣar'ah (Zorah), was suggested by Conder, but unless 3 is really identical with 1, which is quite possible, the cavern known as 'Arak Isma'in, described by Hanauer (*PEQ* [1886], p. 25), suits the requirements of the story better.

ETERNAL [Heb. *'ôlām* (Jer. 20:11; Eccl. 12:5), *qeḏem* (Dt. 33:27); Gk. *aiōn* (Mt. 18:8; Mk. 3:29; Jn. 3:15; etc.), *aïdios* (Rom. 1:20; Jude 6)]; AV also LONG (Eccl. 12:5), EVERLASTING; NEB also SHALL LONG BE (Jer. 20:11), AGE-LONG (Eph. 3:11), etc.; **EVERLASTING** [Heb. *'ôlām* (Ps. 90:2; etc.), *'aḏ* (Isa. 9:5 [MT 4]), *qeḏem* (Hab. 1:12); Aram. *'ālam* (Dnl. 7:14, 27; etc.)]; NEB also FROM OF OLD (Hab. 1:12); **FOR EVER** [Heb. *le'ôlām* (Gen. 3:22; 6:3; etc.), *'aḏ* (Job 19:24; Ps. 9:18; etc.), *nēṣaḥ* (Ps. 13:1 [MT 2]; 74:10; etc.), *kol-hayyāmîm*–'all the days' (Gen. 43:9; Dt. 4:40; etc.); Gk. *aiōn* (Lk. 1:33; Jn. 8:35; Eph. 3:21; etc.), *diēnekés* (He. 7:3)]; AV also FOR EVERMORE (Ps. 132:12); NEB also TO THE UTTERMOST (Isa. 28:28), BE ALWAYS (Ps. 9:18), etc.; **ALWAYS** [Heb. *kol-hayyāmîm* (Dt. 5:29; 1 K. 11:36; etc.), *tāmîḏ* (Ex. 25:30; 2 S. 9:7; etc.), *neṣaḥ* (Ps. 103:9; Isa. 57:16; etc.), *'ôlām* (1 S. 27:12; Ps. 73:12), *t'môl*–'before' (1 S. 21:5), *w'lō'-yikkārēṭ*–'and it shall not be cut off' (Josh. 9:23); Gk. *pásas tás hēméras*–'all the days' (Mt. 28:20), *pántote* (Lk. 15:31; Jn. 6:34; etc.), *diá pantós* (Mt. 18:10), *en pásin* (2 Tim. 4:5), *aeí* (2 Cor. 4:11; Tit. 1:12; etc.)]; AV also ALWAY (Ex. 25:30; 2 S. 9:10; etc.), CONTINUALLY (2 S. 9:7, 13; Prov. 6:21), etc.; NEB also AT ALL TIMES (Dt. 6:24; 2 Tim. 4:5), "hitherto" (1 S. 21:5), "from year's end to year's end" (Dt. 11:12), etc. A duration of time, whether of time that endures without end, either of the past (Hab. 1:12) or future (Eccl. 12:5), or of time in a more limited sense, as of a lifetime (Dt. 15:17) or age (Gen. 49:26).

Terms often are repeated in the same phrase to express the concept of eternity, e.g., *'aḏê-'aḏ* ("forever," Ps. 132:12), or synonyms are combined, e.g., *le'ôlām wā'eḏ* ("forever and ever," Ps. 9:5 [MT 6]; 10:16; etc.). Hebrew poetry often uses the terms in synonymous parallelism to achieve the same emphasis, e.g., in Gen. 49:26 and Hab. 3:6 the RSV translates *'aḏ* and *'ôlām* as "eternal" and "everlasting."

In some cases, the NEB emends the MT, resulting in a different translation. In Dt. 33:27, e.g., "The eternal God is thy dwelling place" (RSV; MT *me'ônâ 'ĕlōhê qeḏem*) becomes "who humbled the gods of old"; here the NEB reads Heb. *me'anneh*, the piel of *'ānâ*, "be bowed down, afflicted, humble" (BDB, p. 776), and *'ĕlōhê* as referring not to the God of Israel but to pagan deities. The RSV "dwelling place" understands *me'ônâ* as a den or lair of wild beasts (BDB, p. 733); thus Israel ("Jeshurun") is compared to a wild animal (cf. 33:17, 20, 22, 27b). In Job 19:24 "graven in the rock forever" (RSV) becomes "to be a witness" in the NEB, based on the emendation of MT *lā'aḏ* ("forever") to read *le'ēḏ* ("for a witness") (cf. Theod.).

The use of *'ôlām* and its synonyms in the OT provides the basis from which the later thought of intertestamental Judaism, Christianity, and rabbinic Judaism developed. The development in the use of such terms coincides with the development of eschatology in the postexilic and intertestamental period.

I. In the OT
  A. The Eternal God
  B. Destiny of the Righteous and the Wicked
II. In the Intertestamental Literature and the Dead Sea Scrolls
III. In the NT and Rabbinic Judaism
  A. In the Synoptic Gospels
  B. In the Johannine Tradition
  C. In the Pauline Epistles
  D. In Hebrews

***I. In the OT.**–A. The Eternal God.* The concept of God as an eternal being who has endured and will endure forever is a cornerstone for much OT thought. The psalmist ponders this idea and exclaims, "From everlasting to everlasting [*mē'ôlām 'aḏ 'ôlām*] thou art God" (Ps. 90:2). For Isaiah, God is the "everlasting father" (*'abî-'aḏ*, 9:5) and an "everlasting rock" (*ṣûr 'ôlāmîm*, 26:4). Habakkuk asks the rhetorical question, "Art thou not from everlasting?" (*miqqeḏem*, 1:12). The eternal nature of God and the transitory nature of man and other creatures are depicted in detail in Ps. 104. Because the God of Israel was believed to be eternal in nature, His decrees and attributes were also said to endure for ever. "His steadfast love endures for ever" (Ps. 136 *passim*). "The counsel of the Lord stands for ever" (33:11). The lamp outside the tent of meeting is to burn continuously (Ex. 27:20). This is a "statute for ever [*ḥuqqaṯ 'ôlām*] before the Lord" (v. 21; cf. Lev. 10:9; 16:29; etc.).

B. Destiny of the Righteous and the Wicked. The concept of a last judgment at which the fate of all humanity will be decided in regard to eternal life or resurrection is not clear in the earlier parts of the OT. In fact, some passages show a total lack of developed doctrine of the afterlife. The idea that God has any relationship with the dead is sometimes negated (e.g., Isa. 38:18; Ps. 88:11-13 [MT 12-14]; etc.).

Some passages, however, clearly imply a hope of fellowship with God after death: "But God will ransom my soul from the power of Sheol, for He will receive me" (Ps. 49:15 [MT 16]). The basis for an idea of the resurrection of the dead can be found in Isa. 26:19, even if the verse was originally intended to proclaim political restoration rather than physical revivification: "Thy dead shall live, their bodies shall rise. . . . For thy dew is a dew of light, and on the land of the shades thou wilt let it fall" (cf. Ps. 16:10; 73:24).

The idea of eternal punishment is likewise not thoroughly formulated in the OT. The story of the descent of Korah and his relatives into Sheol alive as a result of their rebellion against Moses certainly implies a retribution for evil

deeds (Nu. 16:33). This passage led to rabbinic speculation about whether Korah and his family would be resurrected in the age to come (Mish. *Sanhedrin* x.3). Sheol, however, is not always seen as a place of repose for the wicked only. Job claims that the small and great are there, including infants who died at birth (Job 3:16-19). Certainly the wicked are to be the objects of God's wrath, both in this life and, implicitly, in the life hereafter: the Edomites are the objects of God's anger "for ever" (*'aḏ 'ôlām*, Mal. 1:4), Zophar reminds Job that the wicked "will perish for ever" (*lāneṣaḥ yō'bēḏ*, Job 20:7), etc.

The book of Daniel has a clearer view of the resurrection and afterlife. Although some (e.g., G. F. Moore, *Judaism* [1927], II, 295-99) have argued that such ideas were imported from Greek ideas of immortality common during the 3rd or 2nd cent. B.C., the book of Daniel may be dated *ca.* 400 B.C. (*see* ARAMAIC III; DANIEL, BOOK OF VIII). Dnl. 12:2 reads, "And many of those who sleep in the dust of the earth shall awake, some to everlasting life [*ḥayyê 'ôlām*, lit. "life of the age"] and some to everlasting contempt [*lᵉḏir'ôn 'ôlām*]." "Those who turn many to righteousness" will shine like the stars "for ever and ever" (*lᵉ'ôlām wā'eḏ*, 12:3). These are synonymous with "the saints of the most high" of 7:18, who will possess the kingdom "for ever, for ever and ever" (*'aḏ-'ālmā' wᵉ'aḏ 'ālam 'ālmayyā'*).

II. In the Intertestamental Literature and the Dead Sea Scrolls.–The use of "eternal," etc., in the intertestamental literature follows that of the OT, except that eternal destiny is much more sharply depicted. Thus in 1 En. 10:10 the "children of the watchers" and of fornicators hope to live an "eternal life" (Gk. *zōḗn aiṓnion*), but they will be destroyed. Other wicked individuals will be confined to an abyss of fire "for ever" (*aiṓnos*, 10:13). In contrast, martyrdom of the righteous Israelites results in resurrection: "The King of the universe will raise us up to an everlasting renewal of life" (*aiṓnion anabíosin zōḗs hēmás anastḗsei*, 2 Macc. 7:9). Wisd. 5:15 teaches, "The righteous will live for ever" (*eis tón aiṓna zḗsin*).

The intertestamental literature also shows the development of eschatological dualism: the differentiation between "this age" and "the age to come" (Ladd, *Presence of the Future*, p. 90). Thus 4 Ezra 7:50 teaches, "The most high has not made one age but two," and 7:113, "But the Day of Judgment shall be the end of this age and the beginning of the eternal age that is to come" (cf. 2 Bar. 14:13; 15:8; Mish. *Aboth* iv.1; vi.4). This concept of the two ages forms the basis of eschatology in the NT and rabbinic Judaism.

The Hebrew vocabulary for "eternal," etc., is used frequently in the Dead Sea Scrolls. The God of the Qumrân covenanters continues to be the eternal God of the OT, as in 1QH 13:13: "You will remain for ever and ever" (*lᵉ'ôlᵉmê 'aḏ*). Ex. 15:17 is quoted in 4QFlor 1:3: "Yahweh is king for ever and ever" (*'ôlām wā'eḏ*). The attributes of God and the benefits He bestows are eternal. His loving mercy is bestowed "from eternity to eternity" (*mē'ôlām wᵉaḏ 'ôlām*, CD 3:20). He is able to bestow "eternal knowledge" (*bᵉḏa'aṯ 'ôlāmîm*, 1QS 2:3). The fate of the righteous and the wicked is sharply defined. The "sons of light" are contrasted with the "sons of darkness." The "spirit of light" and the "spirit of darkness" characterize these groups (1QS 4:1). God loves the spirit of light "for all eternity" (*ᵃḏē 'ôlāmîm*) and He takes pleasure in its deeds "for ever" (*lā'aḏ*). But he hates the ways of the spirit of darkness "for ever" (*lāneṣaḥ*). One of the blessings of the "sons of truth" is "everlasting life" (*ḥayê nēṣaḥ*). But the reward of "walking in a spirit of deceit" (1QS 4:12f.) is "eternal perdition" (*lᵉšaḥaṯ 'ôlāmîm*) and "everlasting terror" (*ḥerpaṯ 'aḏ*).

III. In the NT and Rabbinic Judaism.–Although the use of "eternal," etc., in the NT is derived primarily from OT material, it takes on a new significance since it is intimately related to the Christology and eschatology of primitive Christianity.

A. In the Synoptic Gospels. The Synoptic tradition reflects the influence of intertestamental Judaism, which developed the terminology of "this age" and "the age to come." In Lk. 18:18-30, e.g., the opening question, "What must I do to inherit eternal life?" demonstrates the desire among Jews to obtain the life of the age to come. Jesus' reply is that one must not only obey the Decalogue (18:20) but also follow Him in discipleship (18:22). The person who does so "will receive manifold more in this time [*en tṑ kairṓ toútṓ*] and, in the age to come, eternal life" (*en tṑ aiṓni tṓ erchoménṓ zōḗn aiṓnion*, 18:30). Obtaining the life of the age to come is synonymous with resurrection from the dead (cf. Mish. *Sanhedrin* x.1-3). The difference between rabbinic thought and the Synoptic tradition is the element of Christian discipleship: it is by following Jesus that one obtains the life of the age to come (cf. Mk. 10:17-31; Mt. 19:16-30; Lk. 10:25-28; 16:8f.).

The fate of the wicked is clearly demarcated in the NT. The wicked are destined for the "eternal fire" (*tó pýr tó aiṓnion*) along with the devil and his angels (Mt. 25:41; cf. 18:8f.). He who attributes the works of the Spirit of the God to Satan, blaspheming the Holy Spirit, assures himself of such a fate, for he becomes guilty of an "eternal sin" (*aiṓníou hamartḗmatos*, Mk. 3:29). The Matthaean account more clearly illustrates the Synoptic eschatology (Mt. 12:22-32). Jesus' ability to cast out demons demonstrates that He is indeed the son of David (v. 23), the servant-messiah of OT promise (vv. 18-21). As the Messiah, Jesus is the emissary of the kingdom of God, i.e., God's rule in this present age. He casts out demons by the power of the Spirit of God, proving that the kingdom has arrived (v. 28). The person who attributes such power to the devil has forgiveness neither in this age (*en toútṓ tṑ aiṓni*) nor in the age to come (*en tṑ méllonti*, v. 32). It is possible that this pronouncement represents part of Jesus' Halakah concerning those who are to be excluded from the age to come, in a manner similar to Mish. *Sanhedrin* x.1-4 (e.g., those who deny the resurrection, who say that the law is not from heaven, etc.).

B. In the Johannine Tradition. The Johannine concept of eternal life differs from the Synoptic view. Here eternal life is a present possession that is received when one believes in Jesus as the Messiah, the Son of God (Jn. 20:31). In John eternal life is totally christocentric: "Whoever believes in him may have eternal life" (3:15); "he who believes in the Son has eternal life: he who does not obey the Son shall not see life, but the wrath of God rests upon him" (v. 36); "you refuse to come to me that you may have life" (5:40); etc. According to the Johannine eschatology eternal life and eternal damnation are already a reality in this age (3:18). John's eschatology, however, does not differ totally from that of the Synoptics. Other elements of the eschatology of Pharisaic Judaism remain unchanged. Jn. 5:28f. contains a clear allusion to Dnl. 12:2, used as a proof text of the resurrection in T.B. *Rosh ha-Shanah* 16b, where the interpretation is attributed to the house of Shamai (*ca.* A.D. 10-80; H. Danby, *Mishnah* [1933], p. 799), and T.B. *Sanhedrin* 92a, where it is attributed to Raba and Rabina (4th cent.). John's view of eternal life continues to include a future blessing. This is clear in Jn. 12:25: "He who loves his life loses it, and he who hates his life in this world will keep it for eternal life [*eis zōḗn aiṓnion*]." Here the Jewish concept of this age and the age to come, in which one can enjoy the "life of the

age," is set forth even more clearly than in the Synoptics.

C. In the Pauline Epistles. The concept of eternal life in the Pauline tradition bears similarities both to the Synoptics and to the Johannine writings. Paul shares with the Synoptics the Jewish eschatological dualism of the two ages. Christ has been exalted above all other authority, "not only in this age [*en tō aiōni toutō*] but also in that which is to come [*en tō méllonti*]" (Eph. 1:21). Although this is the only place the full idiom appears, Paul frequently uses the expression "this age" (1 Cor. 1:20; 2:6; 2 Cor. 4:4; etc.) and also the phrase "the day of the Lord" (1 Thess. 5:2; 2 Thess. 2:2; etc.), a common OT expression. "In this basic eschatological structure of the two ages, divided by the day of the Lord . . . Paul agrees with the Old Testament perspective as developed in apocalyptic Judaism and found also in the Gospels" (Ladd, *Theology*, p. 365). In Paul, as in John, eternal life is christocentric: "As in Adam all die, so also in Christ shall all be made alive" (1 Cor. 15:22). Eternal life is a present reality which endures into the age to come. The Christian has been brought out of death into life (Eph. 2:1), but looks forward to the inheritance of eternal life (Gal. 6:8). Those who disobey the gospel, however, shall suffer "eternal destruction and exclusion from the presence of the Lord" (2 Thess. 1:9).

D. In Hebrews. The writer to the Hebrews uses the concept "eternal" frequently, usually in the exposition of his Christology. Faced with an audience that was lapsing back into the practices of Judaism, the author develops the theme of the eternal salvation accomplished by Christ, in contrast to the OT covenant which was intended to be only temporal. Jesus through suffering became the source of "eternal salvation" (5:9). He entered into the heavenly holy place upon His ascension, securing an "eternal redemption" (9:12). Jesus was appointed high priest as was Melchizedek in the OT. The author refers to Ps. 110:4 three times (He. 5:6; 6:20; 7:17) to stress this point: "Thou art a priest for ever." The eternal priesthood of Jesus contrasts with that of the Levites, which was temporary (7:11-27). Jesus is exalted in the heavens and is equal to God Himself: "Thy throne, O God, is for ever and ever" (1:8); and He remains enthroned forever (13:8).

ETERNITY. For Christians eternity must be defined in accord with biblical and not philosophical categories. While philosophical reflection may clarify such notions as "time" and "infinity," only a careful attempt to understand the concept of eternity as it is used by the authors of Scripture will enable us to grasp the significance of eternity in a specifically Christian, i.e., biblical, sense. This is because only such an exegetical approach will allow us to understand eternity within the larger context of God's redemptive activity, which occurs within the space-time continuum of our universe. This larger context is accessible only through the study of the self-revelation of God contained in the Bible

It should first be noted that eternity is not simply an abstract term in the biblical writings. Rather, it refers to one aspect of God's multifaceted nature, that of the endless duration of His being or existence. At the same time, though not bound by time as are finite creatures, God nevertheless reveals Himself through His redemptive acts, which occur on the same spatio-temporal stage as the one on which we play out our own lives. God, who is thus the Lord of time, is able to act in time. Further, it is because of this very divine transcendence over time that the eternity of the divine being and the eternity of man are qualitatively the same. Man eschatologically and God ontologically experience an endless duration of time; both experience a non-terminating sequence of events; both participate in eternity.

Two distinctions, however, between God's eternity and man's eternity must also be acknowledged. (1) Quantitatively, a person's eternity is bounded on one side by its beginning at a point in time. The human experience of eternity begins at an as-yet-undefined moment between conception and birth. In a similar way the NT speaks soteriologically of "eternal life" beginning at the time of regeneration (cf. Tit. 3:5-7). In such passages eternity in the sense of eternal life, i.e., the life characteristic of the age to come, becomes an immediate possession even though a full and complete experience of that life, that eternity, awaits the coming of Jesus at the Parousia. (2) In this way the chronological, quantitative aspect of the terminology shifts to the qualitative. Eternal life is distinguished from the life of this age not only by its endless duration but even more significantly by the superlative character of the existence enjoyed by the redeemed. This qualitative distinction which eternity often connotes is discernible in those references in the text which speak of the eternity of God. Here eternity is sometimes used apart from its temporal meaning of "unending time" and instead represents the nontemporal idea of "God over all," i.e., His immutability and glory (Isa. 40:28). But here we should be wary of construing God's eternity as some sort of metaphysical timelessness.

I. Eternity in the Greek Philosophical Tradition.—In Platonic and Hellenistic thought eternity was often conceived of as timelessness. According to this tradition man's final goal is to seek to escape from time into timelessness, i.e., into eternity (cf. Plato *Phaedo* 79, 106e-108a; *Symposium* 208a; *Republic* 611a-b; *Timaeus* 27d-28a [contrast 37d]). Because this present life in time was conceived of as consisting of unbroken cycles of experience which afford no means of escape from the limitations of mortality and a life oppressed (cf. the Orphic tradition), redemption could be found only in a transcendent experience of eternity, which would be qualitatively superior to the experience of being in time. Since it was often held that time contained only reverberations of the eternal prototype or "idea," time could not be the stage upon which a redemptive act could occur. In this way a sharp distinction between time and eternity developed in Western thought. This dualism is generally accepted in contemporary philosophy.

From the biblical perspective such a dualism, which posits an exclusive and qualitative difference between time and eternity, is false. In the understanding of the writers of the OT and NT, eternity is not timelessness but endless time.

II. Eternity in the OT.—The OT has no special term for "eternity" that can be contrasted with a term denoting "temporality." The Hebrew word most often used to express "eternity" is *ʿôlām*. It is the same word that expresses duration of time, and it designates eternity only in such statements as "from *ʿôlām*" and "until *ʿôlām*" (Ps. 90:2). Its meaning also shifts from a quantitative/temporal sense of a long span of time to a qualitative sense conveying the idea of permanence or immutability (2 S. 23:5; Ps. 78:69). Use in this latter sense does not deny the essential temporal quality of all OT thought when *ʿôlām* is used. While this word can shift in meaning to the qualitative ideas of greatness, power, or transcendence when referring to God, it must be noted that these are qualities of God and are

not implied in *'ôlām* itself. Because the concept of God's uniqueness was established in the postexilic period, "eternity" became increasingly a synonym for "godliness" and soon became a symbol for God's world and His activity (Ps. 90:2; 102:12f., 25f.; Isa. 35:10; 60:15, 19f.; 61:7f.).

In the LXX the Gk. *aiōn* translates the Heb. *'ôlām*. *Aiōn* conveys a number of meanings, ranging from "life" in Homer (e.g., *Od.* v.152) to "generation," "time," and "eternity" (cf. Pseudo-Demosthenes *Orationes* 60.6). The temporal idea is prominent. It refers to a period of time of either limited or unlimited duration. When unlimited duration is meant it should be translated "eternity." But even here no philosophically derived concept of eternity is connoted.

III. Eternity in the Intertestamental Literature.–The concept of eternity in the intertestamental Jewish literature quite closely parallels that of the OT. A prominent and characteristic feature of this literature is the dualism contrasting "this age" and the "coming age" (cf. 2 Esd. 7:50; 8:1; 2 Bar. 15:7). In this dualism both "this age" and "the coming age" are temporally conceived. The "coming age" may be eternity, but that is eternity in the sense of endless time (Sir. 18:9f.). Some writers of this literature even had difficulty imagining eternity as endless duration of time, rather than as a very long time. For example, 1 En. 10:10 represents eternal life as a span of five hundred years. About the time of Christ Greek influences penetrated this literature. The result was that the idea of an immediate escape from time into a timeless eternity was incorporated in certain writings (cf. 1 En. 37–71; 2 Enoch; Asm. M. 10:9ff.). In these writings a temporally oriented dualism of now and then is shifted to a metaphysical dualism of here and beyond.

IV. Eternity in the NT.–The NT, like the LXX, used Gk. *aiōn* (translated "age") for eternity. This same word is used for a long but limited duration of time. The use of identical terms for both everlastingly continuing time and limited time emphasizes the notion of eternity as an endless succession of ages. Time is not demeaned in the NT, but rather exalted. The very terminology that refers to the mundane, earthly time of a limited duration also refers to the eternal God and the eternal experience of the Christian with God. The ultimate redemptive experience of which the NT knows, the eschatological consummation, is preserved and presented in a temporally oriented context. That is, Jesus appears at the close of "this age" and inaugurates the "age to come" on the plane of human history. This is so for a profound theological reason: God revealed Himself in time, not for the purpose of redeeming man from the evil of time, but rather to redeem man from the evil of this age or this world and from the evil of man's own life. Indeed, since time is not evil, time will not come to an end. (The well-known saying at Rev.10:6 that there will be no more "time" [Gk. *chrónos*] does not refer to an era of timelessness. The context shows it means that there will be no more delay.) Time, then, did not first come into being in the fallen creation and so is not itself tinged with moral corruption. The NT representation is rather that God revealed Himself as a man limited to the fabric of created space and time so that man might be redeemed in time and not from time. (Apparently the view contrasting time and eternity, the view found in some intertestamental literature, never had a substantial impact on the NT.)

V. Eternity in Modern Philosophical Thought.–Basic to philosophical conceptions of eternity is the belief that the eternal belongs to another order of reality, that of timeless reality. Eternity is not to be defined in terms of time at all. God is the supratemporal *ens perfectissimum* (most perfect being); He experiences a mode of timeless self-existence as the Absolute Ground of the universe. To be sure, His timeless self-sufficiency and impassible aloofness are not such as to keep Him from being a source of strength and help in our temporal strivings — God's lordship over time is preserved. But the eternal cannot pass over into the temporal because an eternal Being who thinks all things as present and yet views the time sequence as a succession of states of consciousness is a self-contradiction. Thus for the Absolute Consciousness, time does not exist; the future cannot be thought of as beginning to be, nor the past as having ceased to be. For example, Spinoza used the term "eternity" to refer to God's infinite existence (*Ethica more geometrico*, propositions 8, 19, 21). Contingent or durational existence would not, in Spinoza's view, be eternal though it lasted forever. Neo-Kantian and neo-Hegelian philosophers follow this same conception by tending to regard metaphysical time conceptions as inappropriate categories for attempting to conceptualize the ultimate explanation of the universe. This fundamental qualitative distinction between time and eternity in modern philosophy harks back to the Platonic and Hellenistic conceptions that prevailed in classical and pagan philosophy before and during the formulation of the biblical texts.

VI. Summary Observations on Eternity.–Three summary observations must be made. (1) When viewed from the vantage point of the Bible, eternity is a term that includes temporal relations. Eternity is time stretching endlessly forward and backward, with the result that time itself must be regarded as a segment of eternity. Eternity may be best conceived of as a linear, goal-directed span of time that runs through this age, through the still-future events of the eschaton, and on into the coming age. ESCHATOLOGY is thus concerned not with the state of affairs subsequent to time but with the affairs and events connected with the termination of this age and the inauguration of the age to come. The entirety of redemptive history encompassing all of the ages can thus be located on a time line, the center point of which is Jesus Christ, who represents the ultimate validation of time and who Himself is the revelation of God in time, the *kairós* in the history of eternity (cf. Cullmann).

(2) This understanding of eternity is fundamentally important for grasping the biblical world view. To diverge from it is to diverge from the basic structure of redemptive history revealed in the Bible. Any nontemporal conception of eternity implies a docetism that results in a denigration of time and those events of redemptive significance that occurred in time, with a corollary emphasis on an eternity that becomes the exclusive and proper sphere for the life and redemptive work of God. It is beyond question that the biblical view of eternity as endless time is necessitated by, and intrinsic to, an incarnational theology. The divergence of this conception from Platonic and Hellenistic thought is not incidental or peripheral, but at the very heart of the biblical proclamation, and constitutes that miraculous and "new" thing that occurred in the 1st cent. A.D.: God became man in space and time.

(3) Finally it must be observed that while we may think philosophically about eternity if we so wish, we must do so cautiously. We are looking at these matters through darkened glasses. Everything divine, including God's eternity, can be seen only "from our point of view," i.e., from the revelation that came to us in Jesus Christ in the 1st cent. A.D. But "whatever ideas one may form concerning God's eternity 'in itself,' they must not destroy the characteristic perspective in which Primitive Christianity sees all revelation. This perspective is that of a point of time" (Cullmann, p. 66).

Human experience, human be-ing, is in time. However much we may try, we can only in small ways bring to understanding the unending time that characterizes the eternity of God. "From everlasting to everlasting thou art God" (Ps. 90:2). "I am the first and I am the last; besides me there is no god" (Isa. 44:6). "I am the first and the last, and the living one; I died, and behold I am alive for evermore" (Rev. 1:17f.).

ETHAM ē'thəm [Heb. *'ētām*; Gk. *othóm* (Ex. 13:20); *Bouthán* (Nu. 33:6f.); in 33:8 the LXX reads "in their wilderness," from another pointing for the word]. The name used to be explained as the Coptic *Atium*, "border of the Sea" (S. P. Tregelles, ed., *Gesenius' Hebrew and Chaldee Lexicon* [Eng. tr. 1846; repr. 1949], *s.v.*), which would agree with the MT in Nu. 33:8, where the "wilderness of Etham" is mentioned instead of that of Shur (Ex. 15:22) E of the Red Sea (*see* SHUR). At Etham (Ex. 13:20), the Hebrews camped on the "edge," or at "the end," of the desert W of the sea that they were to cross (*see* EXODUS, ROUTE OF THE). This camp was probably near the north end of the Bitter Lakes, not far from Succoth. H. Brugsch (*History of Egypt*, II [1879], 359) would compare Etham with the Egyptian *ḥetam* ("fort"), but the Hebrew word has no guttural. The word *ḥetam* is not the name of a place and more than one such "fort" seems to be mentioned. In the reign of Seti II a scribe's report (cf. *ANET*, p. 259) mentions the pursuit of two servants, apparently from Zoan, to the fortress of Ṯeku southward, reaching *ḥetam* on the third day; but if this was the *ḥetam* of Ramses II, or even that of Merneptah, it would not apparently suit the position of Etham.

C. R. CONDER

ETHAN ē'thən [Heb. *'êṯān*–'firm,' 'enduring'; Gk. *Haitham, Aitham, Aithan*].

1. A wise man with whom Solomon is compared (1 K. 4:31 [MT 5:11]). Called there "Ethan the Ezrahite," to whom the title of Ps. 89 (MT v. 1) ascribes the authorship of that Psalm.

2. A son of Kishi or of Kushaiah, of the Merari branch of the Levites; and, along with Heman and Asaph, placed by David over the service of song (1 Ch. 6:44 [MT 29]; 15:17, 19). *See* JEDUTHUN.

3. An ancestor of Asaph of the Gershomite branch of the Levites (1 Ch. 6:42).

4. A descendant of Zerah son of Judah, and ancestor of Azariah (1 Ch. 2:6, 8). His link with Heman and Calcol has led some (e.g., KD) to identify him with **1.**

5. (2 Esd. 14:24, NEB). *See* ETHANUS.

ETHANIM eth'ə-nim [Heb. *'ēṯānîm*]. The seventh month of the Jewish year (1 K. 8:2), later called Tishri. The word is of Phoenician origin and signifies "perennial," referring to the streams that still contained water during this dry month. It corresponds to September-October. *See* CALENDAR.

ETHANUS e-thā'nəs [Lat. *Echanus*]; AV ECANUS; NEB ETHAN. One of the scribes who wrote for forty days at the dictation of Ezra (2 Esd. 14:24).

ETHBAAL eth-bā'əl, eth'bə-al [Heb. *'eṯba'al*–'with Baal']. "King of the Sidonians" and father of Jezebel, whom Ahab king of Israel married (1 K. 16:31). According to Josephus (*CAp* i.18 [123]), Menander identified *Ithobalos* (his spelling of Ethbaal) as "the priest of Astarte," who assumed the throne by murdering the king, Pheles, and reigned over Tyre and Sidon for thirty-two years. Menander is also quoted as saying that "under him, there was a want of rain from the month Hyperberetaios till the month Hyperberetaios of the year following" (Josephus *Ant.* viii.13.2 [324]). This was the same drought that occurred during the reign of Ahab (1 K. 17).

ETHER ē'thər [Heb. *'eṯer*–'perfume'].

1. A place between Libnah and Beit Jibrîn, one of a group of nine cities in the plain of Judah (Josh. 15:42). Its location is perhaps modern Khirbet el-'Ater, about 6 km. (4 mi.) N of Lachish (Tell ed-Duweir).

2. A village assigned to Simeon (Josh. 19:7), probably modern Khirbet 'Attîr, about 13 km. (8 mi.) N of Beer-sheba.

NT ETHICS
PHILOSOPHICAL ETHICS
ETHICS AND DOGMATICS
MODERN PROBLEMS

TERMINOLOGY

Ethics is a vast and comprehensive subject constituting one of the main branches of theological study. Nevertheless, it has a slender linguistic base in the Bible. The word "ethics" derives from Gk. *éthos*, which in ordinary Greek usage has two related senses: habit or custom, and cultic ordinance or law. These can, of course, cover the whole range of human behavior. Hence it is no surprise that when customs and ordinances come under academic scrutiny, "ethics" can take on the significance that it does in Greek and later thought, that of the science of conduct. Jewish usage contributes nothing essentially different. A link is made with the OT, however, when the LXX employs *éthos* for Jewish law in 2 Macc. 11:25. Josephus gives the term a more specifically cultic reference when he uses it for the OT sacrifices (*Ant.* xv.8.4 [288]).

The NT preserves the normal secular use at Acts 25:16, referring to a practice or custom in Roman law whereby an accused person must be confronted by his accusers and have the chance to answer them. The same may well be true at 1 Cor. 15:33, where Paul argues that "bad company ruins good manners." Some exegetes and translators (e.g., RSV) prefer "morals" to "manners" in this context.

The other NT instances all have a religious slant, whether with reference to the OT cults, the law in general, or the practice of individual piety.

Thus in the Lucan Infancy stories, with their OT background, the "customs" mentioned at 1:9 and 2:42 are those of the regulated cultic life of the Jewish community. Zacharias, the father of John the Baptist, fulfils his duties at the temple "according to the custom of the priesthood." The parents of Jesus go with him to Jerusalem to keep the Passover feast "according to the custom."

In various passages in Acts, where there is tension between expanding Christianity and Judaism, the word is then used for the (cultic) law as a whole. Stephen, for example, is said to have taught that Jesus would change the rites or customs established by Moses (6:14). The Judaizers in Antioch argue that believers cannot be saved unless they are circumcised "according to the custom of Moses" (15:1). Paul is warned that he is suspected of

advocating that the Jews forsake Moses, neglect circumcision, and not observe the customs (21:21). Paul himself, in his speech before Agrippa, attributes to the king expertise in all Jewish "customs and controversies" (26:3). At Philippi Paul and Silas, as Jews, are rather oddly accused of sponsoring "customs which it is not lawful for us Romans to accept or practice" (16:21). Finally, in his discussion with the Jewish leaders in Rome, Paul says that he has been accused, and sent as a prisoner to Rome, even though he has done nothing contrary to "the customs of the fathers" (28:17).

For more specific usage one might turn to Jn. 19:40. Here Joseph of Arimathea and Nicodemus behave "ethically" by binding the body of Jesus in linen cloths and with spices according to "the burial custom" of the Jews — a practice not without religious significance. In Lk. 22:39, when Jesus follows his "custom" of going to the Mt. of Olives to pray, he observes an individual practice of piety, although one that has its roots in the law. The custom of individuals may sometimes be a bad one. Thus He. 10:25 issues a warning against neglecting to meet together, as is "the habit of some." Different Greek words are used for "custom" at Mk. 10:1 (*éthō*; cf. Mt. 27:15), Lk. 4:16 and Acts 17:2 (*eiōthós*), and Jn. 18:39 (*synḗtheia*; cf. 1 Cor. 11:16), but they come from the same root and have essentially the same meaning.

The movement from the original meaning of "ethics" to its use for the study of human behavior does not take place in Scripture or, indeed, in the earliest Christian writings. From the OT and NT standpoint the things that believers should do are laid down by God and have their basis in His word and work. Customs and conduct may be the subject of theological reflection and in this sense one might properly speak of biblical ethics. In contrast, no place exists in Scripture for ethics in the sense of philosophical analysis and construction. G. W. B.

I. Introduction: Dangers of Oversimplification.–Like other topics that span the OT, ethics tempts us to oversimplification. Several factors dictate the need for caution.

A. The Scope of the Material. The OT material presents both chronological and hermeneutical difficulties. Chronologically, questions arise in the dating of the law codes and the statutes within them — about seven hundred years are thought by some to be bridged in the development of the legal corpus. Similarly, though the wisdom books — Job, Proverbs, Ecclesiastes, Canticles — were perhaps composed in the exilic and postexilic periods, they contain ethical standards that reach back into Israel's antiquity. Hermeneutically, we face the problem of literary genres — narratives, various forms of laws (e.g., apodictic, casuistic) and proverbs (e.g., exhortations, descriptions, comparisons), oracles, visions of judgment, etc. — each of which has its peculiar way of conveying its ethical teaching. Moreover, it is not always possible to tell whether the ethical standards expressed in these various literary forms are to be understood as ideals toward which the people strove or as regulations that were enforced.

B. The Complexity of Israel's Society. Anthropologists warn against the oversimplification of OT tribal life and customs. To what extent a structure of social classes prevailed, with differing standards of conduct, is not clear. Though much of the teaching in Proverbs and Ecclesiastes seems to be directed toward a moneyed or landed class, the OT does not reflect the well-defined social layering of, e.g., Hammurabi's Code. Where class may be a factor, the OT seems to place a greater weight on the shoulders of the noble, powerful, and wealthy, who are made to bear the greater judgment for their ethical failures (Hos. 5:1; Am. 7:7-17).

C. The Perspective of Christian Faith. Often Christians puzzle over the application of OT ethical teachings. Have OT norms been completely superseded and thereby made obsolete by NT teachings? To what extent may one read NT teachings back into OT ethical instructions and thus claim them for Christian life?

These reminders of our distance in time and culture from the OT suggest humility and caution in approaching the basic questions: What factors governed the ethical practices of the people of God in the OT period? What contributions do these practices make to Christian conduct today? The complexity should neither be minimized nor allowed to paralyze us into silence. The subject can be pursued under three main headings: the sources of ethical conviction; the centrality of the divine relationship; the limitations and uniqueness of OT ethical instruction.

II. Sources of Ethical Conviction.–Basically, the OT has only one source of ethical teaching: the will of Yahweh for the people He has created and with whom He has made covenant. Yet that divine will is expressed in at least three significant ways: worship, law, and wisdom.

A. Worship. 1. Ethics of Response. In the OT, ethics is a response to the redeeming and creating work of Yahweh. Obedience to Yahweh is an act of gratitude and obligation for His providence and grace. The Decalogue sets the pattern. Yahweh announces His act of rescue and calls for the exclusive adoration and obedience of His people (Ex. 20:1-17; Dt. 5:6-21), summed up in the great commandment: "You shall love the Lord your God with all your heart, and with all your soul, and with all your might" (Dt. 6:5). Love is the ground of all other duties; "Love leads to fellowship and fellowship to service" (H. H. Rowley, *Faith of Israel* [1956], p. 135).

ETHICS: OT ETHICS

A cluster of literary forms demonstrates this ethics of response: covenant renewal ceremony (Josh. 24:1-28); ritual of firstfruits (Dt. 26); Psalms of entrance (15; 24); accusations or judgment speeches (Am. 2:9-16); divine complaints (Hos. 7:14-16; 10:11).

2. Ethics of Imitation. Israel's worship also called for an ethics of imitation: "God made man in His own image, and His essential law for man is that he shall reflect the image of God and become like Him in character" (H. H. Rowley, *Unity of the Bible* [1953], p. 77). Yahweh's holiness calls His people to holiness (Lev. 20:26); His attributes are to become theirs — love that fulfils its covenants (*ḥeseḏ*, Ps. 136; Mic. 6:8), faithfulness that discharges its responsibilities (*ʾᵉmûnâ*, Lam. 3:23; Prov. 28:20), truthfulness that is reliable (*ʾᵉmeṯ*, Ex. 34:6; Hos. 4:1). His social concerns are to be implemented in justice that both maintains a balanced order and seeks compassionately to correct abuses (*mišpāṭ*, Isa. 30:18; Mic. 6:8) and in righteousness that aims to conduct all its relationships with integrity and responsibility (*ṣeḏeq*, Ps. 35:24, 28; Dt. 1:16; *ṣᵉḏāqâ*, Mic. 7:9; Dt. 6:25). A sure test of covenant loyalty is whether God's people reflect His concerns for the neglected or exploited segments of society — the slave (Ex. 21:2-6; Dt. 15:12-18; Jer. 34:8-22), the poor (Isa. 29:19; Am. 2:7), the widow and orphan (Ps. 68:5 [MT 6]; Isa. 1:17), the resident alien (Ps. 146:9; Lev. 19:33f.).

Without this practice of imitation, worship is invalidated (Am. 5:21-24; Hos. 6:6): "the worth of worship, far from being absolute, is contingent upon moral living, and . . . when immorality prevails, worship is detestable" (A. Heschel, *The Prophets* [1962], p. 195).

Two other divine activities merit imitation: loving forgiveness of wrongs done by a neighbor (Ps. 103:8-18; Lev. 19:18), although the motivation for this is sometimes expressed more harshly (Prov. 25:21f.); willingness to suffer for a righteous cause (Isa. 50:4-10; Zec. 11). *"The God who suffers for the sake of men,* who was known to Hosea and Jeremiah, *is now balanced by the man who suffers in the service and commission of God"* (Eichrodt, *Theology*, p. 332).

Humility and delight become the experience of those who imitate Yahweh's holiness and character. God's awesome action in creation and history and His compelling compassion conspire to spark awed humility as well as gratitude. This humility is part of the required response to Yahweh's majestic grace (Mic. 6:8) and lies at the heart of the "fear of the Lord" that is "the beginning of wisdom" (Ps. 111:10). Simultaneously, God's joy (Ps. 104:31) kindles joy in His obedient people, who rejoice in His worship (Lev. 23:39f.) and delight in His law (Ps. 1:2; 119:111).

Gratitude and holiness are necessary results of worship; a supreme sin, then, is to *forget*. Both Hosea (2:13) and Jeremiah (2:32) brand forgetfulness as the source of other sins: "only because the present generation has forgotten God's deeds and gifts for Israel could such transgressions arise" (C. Westermann, *What Does the OT Say About God?* [1979], p. 55).

B. Law. The specific obligations of God's grace, which are themselves gracious, were a safeguard against such forgetfulness. In the broad sense of Torah (Heb. *tôrâ*, "instruction"), law includes both stories and statutes.

1. Law as Story. While the primary purpose of the patriarchal narratives is to depict God's saving deeds, they also convey ethical instruction — so they are *tôrâ* in the full sense of the word. They often illustrate upright behavior. Abraham is merciful to Lot, giving him the choice land (Gen. 13:8-13), compassionate toward Sodom's citizens despite their iniquity (18:22-33), humble and fair in his dealings with the Hittites (ch. 23), unselfish in his refusal of Amraphel's booty (14:21-24), and, finally, submissive to God's command to sacrifice Isaac (ch. 22). Joseph is resistant to the lures of Potiphar's wife, aware that adultery is "great wickedness . . . against God" (ch. 39). At the opposite extreme, human misconduct is also portrayed, as in the story of Jacob's dealings with Esau and Laban (chs. 27–31).

Similarly, the accounts of the establishment of the monarchy under Saul and David are alive with illustrations of good and bad conduct and the consequences of each (1–2 Samuel). Lesser known Israelites, e.g., Manoah and his wife (Jgs. 13), also serve as illustrations of ethical piety (Porteous, pp. 72f.).

2. Law as Statute. The statutes of the law were introduced into Israel's experience at the beginning of its existence as a nation. Prior to the Sinai encounter with God, the patriarchal families lived according to the tribal mores of their cultures except where their covenant with God dictated otherwise. Israel's establishment as a distinct political-religious entity under Moses called for legislation, setting the specific terms of their covenant with God and each other and stipulating appropriate penalties for transgressors.

The rugged terrain of Canaan made centralized authority difficult except under mighty monarchs like David and Solomon. The law, therefore, was the strongest force for building community. Justice was dispensed at the city gate, probably in the early morning (Am. 5:10, 15; Zeph. 3:5). Sharing in those deliberations was the pride of the respected elders (Job 29:7-25; cf. L. Köhler, pp. 125-149).

a. Decalogue. The most basic of law codes is the Decalogue (Ex. 20:1-17; Dt. 5:6-21). Its connection with Moses is well established. Its form is apodictic, a series of commands, usually negative, without much elaboration. Their force is highly personal — note the second person singular; their purpose is more to outlaw unacceptable conduct than to prescribe righteous acts; their scope is both religious and social — witnessing to the inextricable connection between OT religion and ethics: "Religion is not reduced to ethics. It is ethical religion because it expresses itself in ethical living, but it is religion because it springs from an experience of God and devotion to him" (H. H. Rowley, *Unity of the Bible* [1953], pp. 79f.). Flowing out of the exclusive worship of God — shunning idolatry and honoring His name and day — is the regard for human life, reputation, and property, summarized as love for neighbor (Lev. 19:18).

b. Covenant Code. The civil laws (e.g., Ex. 20:22–23:33, often called the Code of the Covenant) are generally casuistic in form, not apodictic. They propose representative cases, frequently introduced by "if" or "when." Where punishment is prescribed, it is commensurate to the crime — a form of *lex talionis*, which, though stern by modern standards, was a vast improvement over clan practices of excessive vengeance (e.g., Gen. 4:23f.). Designed for life in village and field, the laws protect the personal and property rights of society's every member by outlawing harm to the neighbor's family, goods, and animals.

c. Deuteronomic Code. Though some sets of statutes are clearly ceremonial (e.g., Ex. 34:17-26, "Ritual Decalogue") the Israelites made no clear distinction in law between the civil and the ceremonial. The Deuteronomic code (Dt. 12–26) mixes the two types of regulations with no discernible pattern: e.g., the call for judges who refuse bribes (16:18-20) is surrounded by regulations regarding feasts and a prohibition of pagan pillars; an outline of royal responsibility to enforce justice (17:14-20) is fol-

lowed by rules against divination; the barring of usury charges (23:19f.) is preceded by ritual laws for army life.

d. Holiness Code. Similarly, the Holiness Code (Lev. 17–26), among its stipulations of ritual purity, sets laws of reverence for parents (Lev. 19:3), of gleaning rights for poor and resident aliens (vv. 9f., 33f.), of abstinence from stealing, lying, oppression of neighbor, and abuse of deaf and blind (vv. 11-14), of justice without discrimination (vv. 15f.), of love for neighbor instead of revenge (vv. 17-19), of punishment for intercourse with a slave betrothed to another (vv. 20-22), of respect for aged persons (v. 32), of just weights and measures (vv. 35-37).

Again, the civil and ceremonial laws join in the Deuteronomic sabbath commands, where sabbath rest is extended to servants, sojourners, and animals as part of Israel's remembrance of Egyptian oppression (Dt. 5:12-15). In the various law codes, the one Lord, Sovereign of all of life, has laid down His demands for holiness, justice, and compassion. Though ritual law may label some areas of life as sacred and others as profane, Yahweh's dominion has no boundary.

e. Prophetic Summaries. The prophetic summaries of law (e.g., Am. 2:6-8; Hos. 4:2; Jer. 7:9) indicate Israel's accountability. Breach of these laws became the evidence for prophetic accusations against the people and the ground for announcements of judgment, which in effect invoked the curses threatened in Dt. 28:15-68 for violation of the covenant. The prophetic oracles of doom presuppose both Israel's knowledge of the law and its obligation to practice the law.

The expression of the will of the one God, Israel's law was an "unconditional obligation" (cf. W. Eichrodt, *Man in the OT* [Eng. tr., *SBT* 4, 1951], pp. 9-27), binding in every sphere, authoritative over every member — especially the most powerful, and beyond appeal to any court in heaven or earth. This obligation embraced motivation and action, attitude and deed, as the law against coveting (Ex. 20:17; Dt. 5:21) and the call to love God with the heart (Dt. 13:3) suggested. The prophets, in announcing God's judgment on Israel's failures, were not preaching novelty but reformation. Their cry was not "Go forward" but "Return." "They perceived . . . the glaring contrast between the way of life which God required of Israel and the way of life which resulted from compromise with the nature religion of Canaan" (Porteous, p. 56).

Tragically, the law was unevenly enforced throughout Israel's history. Kings (Ps. 72; 2 S. 12:5f.) and priests (Hos. 4:4-6; 5:1-4; 6:7-11) were particularly culpable, because of their responsibility to enforce and teach the law. The reforms of Jehoash (2 K. 12:1-16), Hezekiah (2 K. 18:1-8), and Josiah (2 K. 22:1–23:30) corrected that laxity in law enforcement.

C. Wisdom. Observation of order in creation and in experiences of society was another source of ethical conviction. The prophets were not unfamiliar with wisdom's methods (cf. Am. 3:3-8; 5:18-20; 6:12; Isa. 1:3; Jer. 8:4-7; 17:5-8, 11); but it is the wisdom books (Job, Proverbs, Ecclesiastes) that contain the main ethical teachings of Israel's sages.

1. Contrasts with Law. The contrasts between wisdom and law are apparent. Wisdom's moral dictates were dependent on observations of what actually happened in life, while law was ascribed to direct revelation. Wisdom's sanctions were blessings and woes that followed inevitably from good and bad conduct, whereas the sanctions of law were legal punishments that society imposed. Wisdom's focus was often twofold: both wise and foolish behaviors were described, with the contrast in results, i.e., "the two ways" of happiness or distress, whereas laws, whether positive or negative, did not regularly employ such a contrast (cf. Ex. 20:16 with Prov. 12:17).

2. Similarities to Law. Both law and wisdom used direct commands as a basic form; exhortations, both negative and positive (e.g., Prov. 24:1, 13, 15, 17, 27), resembled apodictic laws. There was also correspondence in ethical content: honor of father and mother (1:8; 19:26), refusal to bear false witness (6:19), abstention from adultery (6:20-35; 7:1-27), pursuit of just business practices (11:1), regard for the poor (13:23; 14:21, 31), consideration for animals (14:4), avoidance of bribery (15:27), proper use of power (16:12), justice in punishing wrong (17:26), reluctance to avenge (20:22), concern for the orphan (23:10f.), banning of usury (28:8), refusal to participate in bloodshed and theft (1:10-19).

Both wisdom and law stressed submission to God's will. For the sages that will was reflected chiefly in the orders of creation. They looked for patterns in society and nature that revealed Yahweh's demands and taught them as ethical norms but not mechanistically; they were open also to divine surprises: "A man's mind plans his way, but the Lord directs his steps" (Prov. 16:9). Such surprises call for submission, even when they carry loss, pain, and hardship, e.g., Job's experiences (cf. Pss. 49, 73).

3. Unique Contributions. As its contribution to the OT picture of the good life, wisdom made explicit the concern for personal dignity, humane values, and social stability implicit in the laws. Diligence in work (Prov. 10:4f.), refusal to hate (10:12), openness to correction (10:17), prudence in speech (10:31f.), humility of spirit (11:2), avoidance of gossip (11:12f.), generosity with wealth (11:24-26), commitment to truth-telling (12:19f., 22), discipline of children (13:24), patience of disposition (14:17), harmony in family life (17:1), comfort in friendship (18:24), temperance in drinking and eating (23:19-21), compassion for the grieving (25:20), and openness in personal relations (27:5f.) were among the virtues of those who showed their fear of God in all their dealings (1:7, 29-31; 2:1-5).

Part of that fear of Yahweh was the regard for the rights and abilities of women. Both adultery and lust were rejected (Job 31:1). The wise men's belief that "a prudent wife is from the Lord" (Prov. 19:14) became the theme played with variations in the ode to the devout and competent woman of Prov. 31:10-31, of which Eichrodt (*Theology*, p. 339) says: "If nothing like this is to be found anywhere else in the wisdom of the ancient Near East, then credit can only go to the Jewish belief in the Creator God, before whom man and woman stand in equal responsibility."

Worship, law, and wisdom all pledge allegiance to the will of the covenant Lord — the one true way to happiness. Any evolutionary approach to these three sources should be rejected; they represent three interrelated ways of discerning God's will, not three historical stages in its discovery.

III. Centrality of the Divine Relationship.–OT ethics can in no way be divorced from theology, because ethics is in the first place a statement about God — who He is, how He acts, what He values. Crucial, then, to obedience is fellowship with God: "ethical behaviour is a consequence of man's becoming fully personal through the realization of his immediate relationship to the will and purpose of God" (Porteous, p. 67).

Alien to the OT is any idea of abstract good, any imagined *summum bonum*. Good works are a response to God's personal authority as Creator (Gen. 1:26-28), King (Ps. 97:1), Husband (Hos. 2:16), Father (Hos. 11:1-4), Shepherd (Ps. 23:1), Judge (Gen. 18:25). These metaphors imply intimacy, as well as authority — intimacy that made

possible the integrity of OT exemplars like Abraham and Joseph and that the prophets treasured as the knowledge (i.e., intimate fellowship; cf. Gen. 4:1) of God (Hos. 2:19f.; 4:1, 6; Jer. 2:8). So essential is this fellowship that it is frequently described with the most basic words possible: "life" or "live" (Dt. 5:33; 30:15, 19f.; 32:46f.; Am. 5:4, 6, 14). This ethic of relationship expresses itself in a variety of ways: the divine will, enablement, sanctions, mission, preparation.

A. Divine Will. The divine will aimed to bring unity to all of Israel's life. Israel's belief in one God (Dt. 6:4) spared it the fragmentation characteristic of pagan polytheism, which had various aspects of life under the vigilance of individual deities with narrowly specialized authority. Consequently, Israel's ethical obedience was to be a harmony of action and motive. Words alone were not enough (Am. 5:21-24; Isa. 29:13f.), for they had to be expressed in deeds; but deeds alone were not enough, for God wanted the allegiance of the heart by which the true issues of life were decided (Dt. 6:5f.; Prov. 4:23). Similarly, Israel's obedience embraced both communal and individual responsibilities, since the one Lord had formed both the community (Ps. 100:3) and the life of the person within it (Ps. 139:13-16). A common historical and spiritual destiny bound the nation together as a community accountable to God; at the same time each person was to be blessed or judged on the basis of covenantal loyalty (Ezk. 18; cf. Vriezen, pp. 382-87).

B. Divine Enablement. The divine enablement came first through the light of revelation, without which the people would founder in the tides of ethical confusion (Ps. 19:7-13 [MT 8-14]; 119). Beyond that, divine forgiveness and cleansing were essential if ethical perspective and power were to be restored to the one who had failed wretchedly (Ps. 51:6-11 [MT 8-13]). Moreover, a divinely renewed heart and spirit were required (Ps. 51:10-12 [MT 12-14]) — the kind of heart that God will give His people in the latter days (Jer. 31:31-34; Ezk. 36:26).

C. Divine Sanction. The divine sanction was indispensable: "for I will not acquit the wicked" (Ex. 23:7). At stake was God's holiness, the dignity of His name; the inevitable result of ethical transgression was punishment. The punishment, suited to the crime, took several forms: specific penalties to be exacted by the courts (e.g., Ex. 21:12-19); divine retribution in history for persons (2 K. 1:16), nations (Am. 1:3–2:3), or Israel (Jgs. 2:11-15), when God's law was violated — history being the arena of judgment (e.g., the Exile) as it was of redemption (e.g., the Exodus); harmful results of bad conduct, where the laws of creation, precious to the sages, overtake those who spurn the divine order (e.g., Prov. 8:35f.; 16:18; 24:30-34; Ps. 9:15f. [MT 16f.]; cf. G. von Rad, *Wisdom in Israel* [Eng. tr. 1972], pp. 124-137).

D. Divine Mission. The divine mission insisted on Israel's obedience. The Servant of the Lord, embodying what Israel was meant to be, was commissioned to establish justice as part of his mission to the world (Isa. 42:1-9), a reminder that Israel's righteous walk was not for her sake alone but that the world might know that Yahweh is God (cf. Köhler, p. 126).

E. Divine Preparation. The divine preparation for the NT is another role of OT ethics. The call to personal and social justice, the sanctity of family life, the submission to God's will, the imitation of His acts and attitudes, the esteem for the rights of all persons regardless of sex or station — all of these demands the NT made concrete Christian duties. Even more, they are all personified in the person of the incarnate Son, whose mission embraces the king's commitment to righteousness, the priest's skill in applying the law, the prophet's drive for renewal, the sage's use of wisdom, and the servant's willingness to suffer. Nowhere is the unity of the Bible more apparent than in the correspondence between the major themes of OT ethics and their enfleshment in Jesus.

IV. Limitations and Uniqueness. *—A. Limitations.* Limitations of OT ethical instruction are frequently pointed out in social structures, politics, law, and motivation.

1. Social Structures. The social limitations include the toleration of slavery and polygamy. The OT laws sought to control perversions of slavery prevalent in the cultures of Israel's neighbors: the covenant militated against the permanent enslaving of Israelites; a periodic pattern of emancipation was established (Ex. 21:1-4) though not always enforced (Jer. 34:8-22); foreign slaves may have been protected also; only for volunteers was lifelong servitude allowed (Ex. 21:5f.); special protection was afforded female slaves (Ex. 21:7-11). Despite these policies, slavery did exist without protest from law, prophecy, or wisdom. Polygamy was evidently at variance with the Edenic picture of partnership, which shared the image of God, exercised dominion over the creation (Gen. 1:26-30), and enjoyed the delights of love (Gen. 2:24f.); yet it seemed to be tolerated throughout the OT period. Both polygamy and slavery illustrate the ways that Israel's historical and cultural setting kept the people from applying their faith fully and consistently.

2. Politics. In the political sphere, while both neighbor and resident alien (sojourner or stranger) had their rights guarded in laws of love (Lev. 19:18, 33f.), political enemies, troops, or citizens of other nations were offered no such defense (cf. David's bloody victories in 2 S. 8; also imprecatory poems like Ps. 137). Yet even in warfare, certain humane prescriptions were to apply, e.g., in the treatment of female captives (Dt. 21:10-14). Further corrective to a crass nationalism was found in the stories of Ruth and Jonah, as well as in the universal concerns of Am. 1:3–2:3; 9:7.

3. Law. The dominant role of law in OT ethics made Israel susceptible to legalism, especially from Ezra's day onward. Laws, carefully codified and meticulously enforced, at times diverted Jewish attention from the living demands of the covenant Lord. Yet without such laws the Jews' uniqueness as God's people was prone to continual compromise.

One by-product of legalism was the temptation to casuistry — the tendency to "make the consciousness of sin an outward show" (Vriezen, p. 403). Because sinful acts are the chief basis of judgment, the attitude of the heart both in a firm commitment to righteousness and in a genuine contrition in repentance was sometimes overlooked, especially as ritualistic and cultic observations began to play a dominant role (cf. Isa. 29:13; Ps. 51).

4. Motivation. Two factors dealing with motivation should be noted. (1) The doctrine of rewards, especially in wisdom literature, often seems *eudaemonistic* — good deeds are done for the gain involved, not simply because they are right. (2) Commands to righteousness are viewed as *heteronomous* — their authority lies outside the person, who may be forced to behave in ways with which he does not inwardly concur. Though neither of these motivations may be ideal, each takes seriously the realities of human sin and the inevitable need for both incentive to and direction in righteous living. Two reminders: (1) though rewards are held out as encouragement to righteousness, *"in the last analysis, the fellowship with God granted in election and covenant-making was felt to be the goal of moral action more important than all individual goods"* (Eichrodt, *Theology*, p. 351); (2) the OT itself looks be-

yond the external demands of law to a time when "I will put my law within them, and I will write it upon their hearts. . . . And no longer shall each man teach his neighbor . . . for they shall all know me" (Jer. 31:33f.).

B. Uniqueness. Claims for uniqueness in OT ethics need careful stating, because in both content and sanction Israel's ethical standards often parallel those of its neighbors; cf., e.g., Mesopotamian and Hittite law codes and Egyptian wisdom literature.

1. One Will. The one will of Yahweh, the incomparable source of human values, was binding on every level of society from king to commoner. In a way not possible to polytheists, the people of Israel had to reckon with Yahweh's lordship over every area of life: the Creator is the Redeemer, who is the King, who is the Enabler, who is the Judge, who is the Rewarder.

2. Communal Context. The communal context is also part of the OT's ethical uniqueness. It was the immediacy of fellowship with the living God and the believing community that accounted for Israel's rich ethical contribution. Porteous (p. 60) has suggested that the prophets' ethical teaching could not have developed elsewhere, "because it is not just the communication of ideas, but it is rather the flowering of lives lived in conscious fellowship with God and within a human fellowship which had been created by Him as a special medium of His revelation."

V. Apocryphal and Apocalyptic Writings.–In the main, the approaches to ethics found in the Law, the Prophets, and the Writings are continued in the intertestamental period (cf. R. T. Herford, *Talmud and Apocrypha,* 1933). The same virtues are extolled and the same vices excoriated.

Yet a few discernible trends beyond those of the OT should be noted. Jesus ben Sira (Ecclesiasticus) links Wisdom to Torah (24:23) in a way unprecedented in the OT and thus strengthens the idea that the Israelites must reckon with the one will of God. Ben Sira also was the first to use the stories of OT heroes as ethical examples (44–50; cf. He. 11). Apocalyptic literature (e.g., 1 Enoch) drives the wisdom doctrine of the two ways to its relentless conclusion in the heavenly blessing of the righteous and the destruction of the wicked at the last day. The Testaments of the Twelve Patriarchs (T. Iss. 5:2; 7:6; T. Dan 5:3) join the two great commandments of love for God (Dt. 6:5) and neighbor (Lev. 19:18) in a manner that anticipates the words of Jesus (Mt. 22:37-40). The doctrines of resurrection and final judgment, hinted at (Pss. 49, 73) or briefly stated (Dnl. 12:1f.) in the OT, come into prominence in the Maccabean period and give the demands of morality an eternal dimension (2 Macc. 7:9, 14; 14:46; cf. also 2 Bar. 50–51; 2 Esd. 7; T. Jud. 25:1-4; T. Benj. 10:6-9; T. Zeb. 10:4; 1QH 6:29-34). In these matters as in so many others, the intertestamental writings prepare the way for the full revelation of Jesus and the apostles.

IV. Validation of Jesus' Ethic

I. Importance of Jesus' Ethic.–The Church has always turned to the ethic of Jesus for moral guidance. Even before the NT was written, the sayings of Jesus circulated in the churches and shaped their moral life and thought. The authors of the Epistles and Gospels preserved existing traditions of Jesus' sayings and actively appropriated them, shaped them, and applied them in new contexts. Again and again in its history the Church has returned to the sayings of Jesus to discover in them the way of life worthy of the gospel.

II. Diversity of Interpretations.–While the importance of Jesus' ethic cannot be denied, neither can the diversity of interpretations it has received. Some order can be brought to this diversity by considering the variety of judgments about Jesus' teachings: (1) how to construe them, (2) their content, and (3) the mode and range of their application.

A. Construing Jesus' Ethic. Many construe Jesus' teachings as a new *law* that prescribes the conduct appropriate to the new covenant (e.g., H. Windisch, J. Knox, Thomas Jefferson, some Anabaptist writers). Many others construe Jesus' ethic as providing *ideals* to be sought rather than rules to be obeyed (e.g., N. Smyth, W. Rauschenbusch). Others insist that Jesus was concerned not so much with external acts as with the internal dispositions, the formation of *character* (e.g., L. H. Marshall, L. Dewar). Still others claim that "Jesus teaches no ethics at all" (R. Bultmann, *Jesus and the Word* [2nd ed. 1958], p. 66) in the sense of providing a morality, whether of precepts, ideals, or dispositions. Rather, He reveals a *reality* to which people must respond (e.g., H. R. Niebuhr, Bultmann).

B. Content of Jesus' Ethic. Those who share a certain judgment about how to construe Jesus' ethic may, nevertheless, differ significantly on the content of Jesus' moral teachings. Among those who construe Jesus' ethic as a new law, one finds, e.g., Jefferson's "sublime moral code," the prohibitions of violence, oaths, private property, etc., of some Anabaptists, and the identification of the new law with the love commandment (e.g., R. Niebuhr). Among those who agree that Jesus gives ideals, those ideals range from the ascetic (e.g., Thomas á Kempis), to personal moral development and consecration (Smyth), to an ideal social order (esp. Rauschenbusch). Those who take Jesus' ethic to be concerned with the formation of character do not always agree about which dispositions are to be formed. Finally, those who understand Jesus' teachings as the revelation of a reality can describe that reality quite differently. For Bultmann, for example, that reality is the individual person standing alone before the will of God and called to radical obedience in the crisis of decision. For H. R. Niebuhr, it is the one God who stands behind the law as Creator, Judge, and Redeemer.

C. Mode of Application. Already in the 2nd cent. a double standard was found within the teachings of Jesus, one standard being incumbent on all Christians, the second being only for those who sought a higher righteousness ("evangelical counsels"). Luther rejected this double standard, maintaining that Jesus' ethic is valid in its entirety for everyone; but for Luther it is valid only for private life. In Luther two realms with "two kinds of

righteousness" remain, one for personal relations (the ethic of Jesus) and another for social relations (also, e.g., H. Cadbury). The Radical Reformers — and many others — rejected both monasticism's double standard and Luther's two realms and insisted that Jesus' teachings are applicable to the whole of life of all Christians.

More recently application has been affected by views of Jesus' eschatology. A. Schweitzer introduced the influential theory that Jesus taught a heroic "interim ethic" immediately applicable only on the mistaken assumption that the end of the world was imminent. According to some radical dispensationalists, Jesus' ethic applies to a future dispensation of the kingdom and only secondarily to the extended interim of this dispensation.

For some (e.g., Jefferson), Jesus' ethic, because of its apparent reasonableness, makes claims on the universal human community. Others think that His ethic makes no sense apart from loyalty to Him or from His loyalty to God, and thus it is applicable only to the Christian community. Finally, some see Jesus' ethic as intentionally impossible in order to reveal our sinfulness; thus, its application will ordinarily allow some form of compromise or approximation (e.g., R. Niebuhr).

III. The Kingdom of God and Jesus' Ethic.–The best starting-point for inquiry into Jesus' ethic is Mark's striking summary of Jesus' teaching, placed at the head of his account of Jesus' public ministry: "The time is fulfilled, and the kingdom of God is at hand; repent and believe the gospel" (Mk. 1:15).

A. Apocalyptic Background. Jesus' proclamation of the kingdom of God must be understood against the background of first-century Jewish apocalyptic (e.g., Perrin, pp. 158-206; Wilkens, pp. 72f.). Jesus announced to His contemporaries that the promised "age to come," the new age of God's undisputed sovereignty over all His creation, was "at hand."

Against this background, to interpret the kingdom as an ideal social order whose coming is contingent upon human striving is clearly a misunderstanding. The coming of the kingdom is contingent only on the apocalyptic, world-shattering, world-renewing act of God that brings both final judgment and final salvation. Its coming is not something human beings can either hasten or delay, but something for which they can only pray — as the Jews did in the Kaddish (see Jeremias, *NT Theology*), and as Jesus taught His disciples (cf. Lk. 11:2).

It is equally mistaken, however, to limit the kingdom to God's sovereignty in the mysterious region of the soul, for the coming act of God establishes His sovereignty over the whole cosmos. Jesus nowhere narrowed the scope of apocalyptic expectation to the mystical or pious or "existential" surrender of the heart to God. Surely repentance is demanded of individuals, but not only of individuals (cf., e.g., Mt. 11:20-24; 12:38-42; see III.E. below).

B. Jesus' Revision of Apocalyptic. Jesus came announcing that the kingdom of God was "at hand" and, indeed, already making its power felt. God's sovereignty was not merely future, but already having effect in Jesus' exorcisms and miracles — and also in His ethical teachings. Thus, both Schweitzer's "consistent eschatology," with its single focus on the imminent future of the kingdom of God, and C. H. Dodd's "realized eschatology," which emphasized the present reality of the kingdom to the point of dismissing Jesus' proclamation of the future act of God, are mistaken. Both the future act of God and its present impact are part of Jesus' teachings and of His ethic (see Perrin, pp. 74-78, 83f.; see also Kümmel).

Although the proclamation of the future act of God remains fundamental in Jesus' teaching, the present impact of the kingdom is critical, for it involves an important revision of apocalyptic thought. Apocalyptic typically divided history into two ages, of which this present evil age, although it is submissive to the powers of darkness, is nevertheless running its predetermined course to its eschatological end. Human action was therefore thought to be fruitless and inconsequential, and the apocalyptic seer was preoccupied simply with the discovery of epochs and the calculation of the end time. (*See* APOCALYPTIC LITERATURE II.) But Jesus did not indulge in such speculation and calculation (Lk. 17:20; Mk. 13:32 par.). Rather, He emphasized the suddenness of the end (e.g., Mt. 24:37-41 par.; Mk. 13:35 par.) and the present impact of God's sovereignty in His own ministry. His eschatological command to "watch" (Mk. 13:35 par.) has in the tradition a whole range of ethical cognates (Lk. 12:35-48; 21:34; Mt. 24:45–25:46; cf. 1 Thess. 5:2-8; 1 Pet. 5:1-10; see Minear, pp. 152-177). For Jesus the eschatological command to "watch" and His moral teachings have a common source in the coming sovereignty of God and His holy will. This kind of moral alertness is not required where casuistry on the basis of law neatly defines what is to be done and what left undone; it is required in ethics in which anger, lust, and pride are condemned with equal seriousness as murder and adultery.

Thus, while apocalyptic provides the background for Jesus' teaching, to reduce Jesus to an apocalyptic seer is a misunderstanding, for He broke through the pessimistic determinism of apocalyptic. While human action does not establish the kingdom, it is nevertheless called for as the eschatologically urgent response to the action of God which is at hand and already making its power felt. The ethic of Jesus is first of all, then, an ethic of response — response to God's apocalyptic action.

Jesus also revised the material content of apocalyptic expectation. He still expected the reign of God to bring liberation and security. He still expected a great reversal of the present age. But the nationalistic hope for Israel's lordship over the nations is strikingly absent (e.g., Lk. 4:16-29; Jeremias, *Jesus' Promise*, pp. 41-46). Moreover, the eschatological woes and blessings are pronounced upon the very people conventionally thought least likely to receive them: blessings are pronounced upon the poor, the hungry, those who weep and are despised (Lk. 6:20-22; cf. Mt. 5:1-12; Lk. 16:25); woes fall upon the rich and carefree (Lk. 6:24-26; cf. 16:25) and on the scribes and Pharisees who use religion to assert their reputations and financial interests (Mt. 23:13-36; Lk. 11:42-52; cf. Mk. 12:38-40; Mt. 6:16-18). In Jesus' ethic the "great reversal" of God's rule is condensed into axioms like "Many that are first will be last, and the last first" (Mk. 10:31; Lk. 13:30; Mt. 19:30; 20:8), and "Whoever exalts himself will be humbled, and whoever humbles himself will be exalted" (Mt. 23:12; Lk. 14:11; 18:14; cf. Mt. 18:4); thus it is clear that both the apocalyptic seer who dreamed of vengeance and the rabbi who insisted on the first seat in the synagogue (Lk. 11:43; Mk. 12:38-40 par.) belonged to the present evil age.

C. An Ethic of Response. The "great reversal" already made its power felt in Jesus. Blessings already began to fall on the poor, the weak, and the despised (e.g., Lk. 4:16-21; 7:22 par.; Mt. 10:7f.). Already those who were entrenched in power, privilege, and their own conventional righteousness began to be cast out (cf. Mk. 11:15-17). Jesus said, "Blessed is he who takes no offense at me" (Lk. 7:23; Mk. 11:6); that is, one's eschatological destiny hinges on one's response to God's rule as it is presently manifested in Jesus and His ministry (cf. Mk. 8:38 par.; Lk. 12:8 par.). The response called for is repentance (Mk.

1:15; etc.), a radical transformation of values and behavior. There were some who were scandalized by Jesus' reversal of values. They had no readiness to repent and so missed the eschatological blessing. But others, particularly among the outcasts and sinners, welcomed the proleptic presence of the kingdom in Jesus' ministry. These repented and were blessed. What repentance means concretely can be discovered only in the specific commands of Jesus that issue from His announcement of the kingdom, and from the kingdom's impact on His own behavior.

1. "Be Last of All." Repentance means to welcome the announcement of a kingdom where "many that are first will be last, and the last first." It means obedience to Jesus' concrete command of humble service: "If any would be first, he must be last of all and servant of all" (Mk. 9:35 par.; cf. 10:43f.). Such humble service does not assert its own rights and privileges but submits to the coming reign of God and pours itself out for the neighbor's good. One's response to this command is also a response to Jesus, who was among them both "as one who serves" (Lk. 22:27; cf. Jn. 13:2-17; Mt. 20:28; Mk. 10:45) and as the one in whom God's kingdom already exerts its power. This command takes a number of cognate forms, such as not insisting on titles of distinction (Mt. 23:8-10) or the most honorable seat (Lk. 14:7-11; cf. Jas. 2:2-4) and showing hospitality to "the poor, the lame, the blind" (Lk. 14:13, 21).

2. "Be Not Anxious." God's eschatological blessing falls on the poor, judgment on the rich. The response to this great reversal is a carefree disposition toward riches. Jesus' concrete instruction is "be not anxious" (Mt. 6:25, 31, 34; Lk. 12:22). Jesus Himself had "nowhere to lay His head" (Mt. 8:20 par. Lk. 9:58). His command forces a choice between the present age and the age to come, between serving mammon and serving God (Mt. 6:24; Lk. 16:13), between trusting the conventional patterns of privilege, prestige, power, and security, and trusting God (Mk. 10:23-25 par.). But to trust riches will soon be shown up as folly (Lk. 12:13-21), and to "be not anxious" is to lay up "treasures in heaven" (Mt. 6:20).

3. "Give Alms." This carefree attitude toward riches results in a readiness to give generously to help the poor — the other side of the response to the eschatological blessing on the poor. The concrete command is "Sell your possessions and give alms" (Lk. 12:33; Mk. 10:21 par.). This concrete command is not intended as legislation, as is made clear by the cognate command to lend to the poor (Lk. 6:34f.), which presupposes continuing possession, and also by the example of Zacchaeus (19:1-10); nevertheless, it does give concrete shape to repentance. To help the poor with self-forgetful generosity is to welcome God's coming rule (19:9), and not to do so is to expose oneself to His judgment (16:19-31; Mt. 25:31-36). Such generosity takes many concrete forms: feeding the hungry, giving the thirsty drink, practicing hospitality, clothing the naked, visiting the sick and imprisoned (Mt. 25:31-46).

Jesus' word, "You always have the poor with you" (Mk. 14:7; Mt. 26:11), does not compromise His concern for the poor. That "the poor will never cease out of the land" (Dt. 15:11) is caused by the refusal of the community to keep the covenant with its stipulations for the alleviation of poverty (15:1-11; cf. Lk. 16:29-31). Thus, Jesus rebuked the disciples for presumptuously singling out this woman and self-righteously judging her when the very presence of the poor was a judgment on the whole community.

4. "It Shall Not Be Taken from Her." The blessing on the poor and outcast extends to women. Against the background of the conventional depreciation of women in first-century Palestine (see P. Jewett, *Man as Male and Female* [1975], pp. 86-94), Jesus' behavior was indeed a great reversal. He broke convention simply by talking publicly with women (Jn. 4:1-26; Mk. 7:24-30; etc.) and by including them among His followers (Lk. 8:1-3; etc.). He commended women (e.g., Mk. 12:41 par.) and defended them (Lk. 7:39f.; Mk. 12:40 par.). Two women stand out: the sisters Mary and Martha (Lk. 10:38-42; Jn. 12:1-8). In each narrative Martha serves at table (itself a surprising departure from custom when a group of men are present), but Mary's behavior is shocking and offensive to conventional protocol regarding women. In John's narrative she lets down her hair to anoint Jesus' feet (cf. Lk. 7:38), and in Luke's she takes the posture of the disciple, sitting at Jesus' feet listening to His teachings (no rabbi would permit a woman to be taught). It is little wonder that women apparently heard Him gladly (cf. Lk. 11:27), or that it was women who remained faithful to Him at the hour of His death (Mk. 15:40f. par.; Jn. 19:25). While no explicit commands to welcome this aspect of the great reversal are preserved in Jesus' sayings (but cf. the protection of women by the prohibition of divorce, Mk. 10:11 par.), it is not unreasonable to assume that there were such; such a command may be echoed in the formulation, "the good portion . . .shall not be taken away from her" (Lk. 10:42). To respond to the coming kingdom and its present impact in Jesus means welcoming rather than resisting the good news for women.

5. "Forbid Them Not." The coming kingdom is also good news for children. The disciples' rebuke of the women who brought their children to Jesus was conventional; but Jesus welcomed the children and blessed them (Mk. 10:13-16 par.). "Forbid them not, for of such is the kingdom of God" (v. 14) is a concrete command that challenges both conventional expectations of the kingdom and customary rules of protocol. To care for and love little children is to welcome the coming kingdom and its present impact in Jesus (9:37 par.).

6. "Judge Not." Among the poor, finally, are to be numbered the "sinners." To include repentant sinners in the coming kingdom was scandalous, yet such is the great reversal Jesus announced: "I came not to call the righteous, but sinners" (Mk. 2:17 par.; cf. Mt. 21:31; Lk. 19:10). He was notorious as "the friend of the sinners" (Mt. 11:19; Lk. 7:34, 37, 39; 15:2; 19:7). He ate with them and (already!) forgave them (Mk. 2:5 par.; Lk. 7:48; cf. Jn. 5:21-27). But the "righteous" who refused to repent, who refused to welcome such a kingdom, were already judged, and that judgment was the announcement of the coming reversal itself (Mt. 21:31; Lk. 15:7; 18:9-14). The concrete meaning of welcoming such a kingdom is captured in the commands to "judge not" (Mt. 7:1; Lk. 6:37; cf. Mt. 7:24; Lk. 6:41f.; Mk. 4:24) and to "forgive" (Mt. 6:14f.; 18:21-35; Mk. 11:25; Lk. 17:3f.).

Jesus' prohibition of judging does not eliminate the need for discernment and mutual admonition. On the contrary, Jesus commanded His disciples, "If your brother sins, rebuke him" (Lk. 17:3; cf. Mt. 18:15-17). But such a rebuke is transformed from an attempt to find security in conventional righteousness into an effort to serve the coming kingdom and the sinner.

D. Jesus and the Law. While Jesus' ethic is fundamentally one of response rather than obedience to law, the question of His attitude to the law is of obvious importance to any description of His ethic. The question is complicated by the presence of apparent discrepancies in the tradition: some texts seem to disclose an almost rabbinic nomism (e.g., Mt. 5:17-19; 18:16; 23:2f.; Mk. 1:44; 7:9f.; 10:18f.; 12:28-34; Lk. 5:14; 16:27-31), others

ETHICS: THE ETHIC OF JESUS

a radical rejection of law (e.g., Mt. 5:31f., 38f.; Mk. 2:18–3:6; 7:14-23; 10:2-12; Lk. 6:37; 13:10-17; 14:1-16). It is little wonder that some interpretations represent Jesus as an exponent of the law who "exposits" it (sometimes, indeed, reaching new depths, penetrating behind the letter to the spiritual principle), while others view Him as an opponent of the law who abrogates it and disobeys it (see Banks, pp. 1-9). The Gospels themselves apparently interpret and communicate the attitude of Jesus to the law differently, relating it to their specific themes, intentions, and audiences (see Banks). But, while Mark may emphasize the "rejection" of the law and Matthew the "exposition" of the law, the apparently disparate attitudes of Jesus to the law may be found within both Gospels.

1. External Observance in Crisis. The key is again related to Jesus' proclamation that the kingdom is at hand and already making its power felt in His ministry. Because of this, observance that is merely external and legal is put in crisis. A casuistry which attempts merely to insure external observance is condemned, for it leaves the internal dispositions untouched (Mt. 15:17-20 par.; 23:25-28; Lk. 11:39-41). The coming kingdom forces something more radical than Halakah (the casuistic application of legal precepts), something more penetrating than certain limits set on the external expression of one's lust, lack of truthfulness, vengefulness, avarice, and pride. It demands the response of the whole person, and its proclamation uses the narratives of the Torah (especially of creation; see Mk. 10:2-12 and 2:27; Jn. 5:9f.), the Prophets, and the Writings — as well as mundane parables — to lay claim to and form the whole character. In Jewish categories, the announcement of the coming kingdom forces a shift of emphasis from Halakah to Haggadah — the homiletical, nonlegal part of the Talmud (see G. F. Moore, *Judaism*, I [1927], 161-173). Jesus upheld the law — not, however, by casuistry, but by bringing it to its eschatological fruition, so that the intentions of God in creation and in the Law and the Prophets are fulfilled.

2. Jesus' Authority. The coming kingdom already made its power felt in Jesus and His ministry. So the will of God was revealed finally not on the basis of ancient authorities but on the basis of the authority of Jesus' own words. His deeds expressed His consciousness of authority (explicit links are made between "authority" and His cleansing the temple [Mk. 11:28-33 par.], His exorcisms [Mk. 1:21-28, 39; Lk. 4:31-37], and His forgiving of sins [Mk. 2:10f.; Lk. 7:48]). His words were spoken with authority (cf. His use of *amēn* and the emphatic *egō*). Indeed, it was this authority that amazed His hearers (Mk. 1:22 par.). Here was no pious interpreter of the law, but one who claimed to announce the will of God Himself. So Jesus set His own authority over against the authority of the law as the rabbis had interpreted it. His authority was connected with the apocalyptic sovereignty of God which was already making itself felt in Jesus' ministry, and with the apocalyptic revelation of God's will, which was now identified with Jesus Himself. Jesus' own words now took the place of the law (Lk. 16:16 par.) in providing the foundation for a life able to stand in the judgment of God (Mt. 7:24-27 par.). In all of this, however, Jesus did not destroy the law but fulfilled it (Mt. 5:17f.; Lk. 16:17). He brought it to its eschatological fruition.

3. Summary of the Law. It is love that fulfills the law. The double love commandment (Mk. 12:28-34 par.) was handed down in the tradition as a controversy saying in which Jesus put forth His own summary of the law. Such summaries were commonplace among the rabbis, but they were not Halakah. The purpose of these summaries was not to rank commandments for the sake of eliminating some or giving priority to others. They were "merely" Haggadah. But for Jesus it was legal observance that was put in crisis and Haggadah on which the emphasis fell. The commandments to love God and the neighbor are quotations of the Torah (Dt. 6:4; Lev. 19:18) and, it may be noted, they are "not ranked, but listed" (Furnish, p. 25f.; Luke makes of them one commandment). But they do allow other commandments to be ranked. In Mark the low ranking of the sacrificial system is explicit (12:33); the same point is made in Luke's parable of the Good Samaritan (Lk. 10:30-37). Matthew presents the summary of the law more on the model of the summaries of the rabbis, but he too uses love to rank and interpret the law (cf. Mt. 9:13; 12:7 with Hos. 6:6; see Furnish, pp. 74-84). Some of the controversies arose precisely because Jesus ranked acts of love higher than observance of the sabbath or purity regulations (e.g., Mk. 3:1-6 par.; 7:1-23 par.; Lk. 14:1-6; Jn. 5:2-18). Love, boundless and uncalculating, is the law for the new age. Love is, of course, no mere sentiment; it is a readiness for the concrete action which helps the neighbor (cf. the concrete command at the conclusion of the parable of the Good Samaritan, Lk. 10:37: "Go and do likewise").

The ethic of Jesus is, nevertheless, hardly an ethic of obedience to law, even the law of love. The love command is not used as a basic principle from which subsidiary rules are deduced. Jesus' ethic is rather an ethic of response to the coming kingdom of God and its present impact in Jesus. It is the recognition of what God is doing, rather than the love command as an ethical principle, which consistently shaped Jesus' moral discernment. Perhaps the clearest example is what happened to Lev. 19:18 in His teaching.

4. "Love Your Enemies." The commandment to love the neighbor had not been judged relevant to enemies; but now Jesus, without exegeting the text according to any rabbinic patterns, said on his own authority: "But *I* say to you, Love your enemies" (Mt. 5:44; cf. Lk. 6:27, 35). In justification of this command, Jesus appealed to the nature of God, who "is kind to the ungrateful and selfish" (Lk. 6:35; cf. Mt. 5:45). Implicit is the imminent rule of this God. Response to His coming kingdom is made concrete in the command to love the enemy. Repentance involves a radical turning from the conventional patterns of reciprocity, of loving those who are kind to us (Mt. 5:46; Lk. 6:32) and seeking the limit of lawful revenge against those who do us harm (Mt. 5:39-40, Lk. 6:29-30). Again the disposition to love is not merely sentiment. It makes one ready to do good to one's enemies, to pray for them, to bless them (Lk. 6:27f.). It penetrates to commonplace behavior like greeting them on the street (Mt. 5:47), not returning a blow (Mt. 5:36; Lk. 6:29), and lending (Mt. 5:42; Lk. 6:34). The power of the conventional pattern of reciprocity is broken only by trust in the coming rule of God. Those who follow the conventional pattern already have their reward, but those who welcome the new age shall receive the eschatological blessing (Lk. 6:35). So Jesus brings the commandment of love to its own eschatological fruition.

5. "Let Your 'Yes' Be 'Yes'." There was a well-developed casuistry with respect to oaths (echoed in Mt. 5:33-37; 23:16-22); but on His own authority Jesus simply demanded absolute truthfulness of His followers: "Let what you say be simply 'Yes' and 'No'" (Mt. 5:37; cf. Jas. 5:12). The integrity of one's words should not need the confirmation of oaths: "But I say to you, 'Do not swear at all'" (Mt. 5:34). The external regulations with respect to oaths could simply hide deceit, and could indeed be of use to the deceitful one who knew the law (Mt. 23:16-22;

Mk. 7:11-13 par.). But Jesus did not provide a legal pronouncement that there should be no oath-taking. Mt. 23 simply judges the casuistry which made it possible to swear some oaths "safely" or with impunity; it does not condemn oath-taking itself. The controversy over "Corban" demonstrates the same point (Mk. 7:9-13 par.). Jesus did not condemn oaths; He condemned a casuistry that made it possible to use oaths in self-seeking ways rather than in dutiful service. The emphasis is on the disposition of truthfulness (Mt. 12:34; Lk. 6:45). God's coming sovereignty means victory over Beelzebub, the father of lies (Jn. 8:44), and is already at work in Jesus' teaching. To welcome the kingdom is to accept the demand of absolute trustworthiness of speech; to resist such claims leaves one open to the judgment of God (Mt. 12:37).

The truthfulness Jesus required is not to be reduced to external conformity between words and the situation. It involves the whole person's response to the coming kingdom and therefore with seeking the neighbor's good. So truthfulness has its cognates in the prohibition of "careless words" (Mt. 12:36) and common insults (5:22). Thus Jesus brought to eschatological fruition God's intention in the commandment about false witness.

6. Other Commands. Everywhere the pattern is the same. Casuistry based on the sabbath legislation is put aside for the present impact of God's intentions of relief for the poor (Mk. 2:27). Casuistry about ritual cleanliness (and perhaps the laws themselves) is put aside for the fulfillment of God's desire for inward purity (Mk. 7:1-23; Mt. 15:1-20). Casuistry about divorce (cf. Dt. 24:1-4) is put aside for the fulfillment of God's initial and final purpose (Mk. 10:2-11 par.; *see* DIVORCE). External observance of even unquestionable stipulations of the law is put in crisis. So on His own authority Jesus commanded those who would welcome the kingdom not merely not to kill, but not to be angry and to be ready always to reconcile (Mt. 5:21-26); He prohibited not merely the external act of adultery but its inner motive of lust (Mt. 5:27f.).

7. Call to Discipleship. The call to discipleship is related to this simultaneous rejection and fruition of the law. The pupils of the rabbis gathered themselves around the teacher to study the law and its interpretation. They devoted themselves to the study of Torah. But the disciples responded to Jesus' call to follow Him, and they devoted themselves to *Him,* the one who spoke with authority. Rather than simply learning the old rules, they heard Jesus' words and were commanded to do them (Lk. 6:47; cf. Mk. 8:34-38). In His words and deeds they caught a glimpse of the coming kingdom, and they struggled to welcome it. To follow Him was costly; it meant an end to egotistical calculations and the comfortable old securities (Mt. 8:18-22 par.; Lk. 14:26-34).

E. The Politics of Jesus. As stated above (III.A), Jesus never announced a political program, as though the coming of the kingdom were contingent on human striving. On the other hand, the kingdom was not some secret sovereignty over souls but a cosmic sovereignty, and the repentance demanded (of cities and a generation as well as of individuals) was total. This total repentance in response to a cosmic kingdom may not be reduced to political dispositions and behavior, but it surely includes them.

Jesus rejected the vengeful nationalism of much contemporary apocalyptic expectation as well as the personal vengeful use of the law of retaliation. The zealot desire for vengeance surely belonged to the old age; Jesus was no zealot. But the implication is not a new law, namely, a total prohibition of political power and coercion. The implications seem rather to be a great reversal with respect to political power itself, and political dispositions which conform to that new reality. The pride of power is already judged and condemned: Herod Antipas ("that fox," Lk. 13:32) and the gentile rulers who "lord it over" those beneath them (Mk. 10:42) belong to the old age; authority in society is to be construed as a vocation to humble service (vv. 42-44 par.). Politically too, then, the kingdom is good news for the poor and oppressed. Even as He commended a pious sinner's wasteful use of ointment, Jesus called attention to the community's responsibility to the poor (Mk. 14:3-7 par.; III.C.3 above).

Jesus was no Sadducean collaborator either. The temple cleansing (Mk. 11:15-18 par. Jn. 2:13-17) was surely — even if not merely — a political challenge to the priestly aristocracy. The famous but notoriously difficult saying of Jesus about the tribute money ("Render to Caesar the things that are Caesar's, and to God the things that are God's") was no zealot call to arms, but neither was it the sort of compartmentalization of "two realms" which would leave the Herodians, the Sadducees, and other collaborators with an easy conscience. In the context of Jesus' proclamation of God's cosmic sovereignty, there can be no question about what things do and do not belong to God. All things will belong to Him, the claims of Caesar notwithstanding, and Jesus' hearers were being called to welcome that coming sovereignty of God. The collaborators were being called to political (even if not merely political) repentance. Just what concrete commands gave shape to such repentance it is now impossible to say. But the great reversal of the kingdom affected political values, even while it could not be reduced to the kind of political reversal of fortunes that the apocalypticists and zealots envisioned.

IV. Validation of Jesus' Ethic.—It is not implausible that this Jesus should be considered dangerous by those who refused to repent. So He was put to death. But God raised Him up. And against the background of apocalyptic, the resurrection is the vindication of this man, including His teachings. It is the verification of His claim to speak with authority, the divine stamp of approval on Jesus and His ethic. Matthew summarizes it well in his account of the words of the risen Lord (28:18-20): "All authority . . . has been given to me. Go therefore and make disciples . . . teaching them to observe all that I have commanded you. . . ."

I. Introduction.–Because Jesus was raised from the dead, the early Church proclaimed that He was "both Lord and Christ" (Acts 2:36). The Resurrection thus became the basis and norm of all early Christian reflection, including reflection about the conduct and character "worthy of the gospel of Christ" (Phil. 1:27). The Resurrection was both the vindication of Jesus and the expectation of His return.

For this reason morality in the NT is not autonomous. It is an inalienably religious morality. To isolate the ethics of the NT from its religious basis is to distort both. The NT literature includes no work concerned with the self-conscious and systematic address to questions in ethical theory and no work concerned with providing a comprehensive code. The concern is always rather to bring the memory of Jesus and the expectation of God's final victory to bear upon concrete situations faced by the churches. Ethics in the NT is always, therefore, both religious and concrete.

The relationship between religious affirmations and concrete moral exhortations is mediated, of course, by the theological and ethical reflection of each of the NT writers. The NT presents no unitary and monolithic ethics, and we cannot speak of *the* NT ethics as though it did. The authors of the NT address different communities with different concrete problems; they have different pastoral objectives and different theological and ethical concerns; they are heirs of moral traditions besides the Christian tradition, and even if they see those traditions now through the prism of the Resurrection, they use the wisdom of other traditions in their own ways. The Hebrew Scriptures, for example, always played an important role in the moral discernment and judgment of the early Christian communities, but the precise place and use of the law was a matter of considerable debate in the early Church, and the NT authors themselves provide no unified perspective on that critically important ethical question. Other traditions, whether Jewish and rabbinic or Greek and philosophical, were also used and left an impression both formally and materially, on the ethics of the NT.

The different situations, objectives, and traditions influenced and shaped the memories about Jesus, the expectation of His return, and surely the ways in which these were brought to bear on concrete moral questions. Because God had vindicated Jesus by raising Him from the dead, His memory was from the beginning normative for the moral discernment and judgment of the churches. But precisely because He had been raised, remembering Him could not follow the pattern of preserving the words of some famous, but dead, rabbi. He was not merely a figure of the past but also the present Lord who would come again as Judge, and the tradition about Him was not merely passively received but actively appropriated, constantly applied to new situations as the means by which the risen Lord continued to address His followers, also morally. The faith that the remembered Jesus had been raised allowed, and indeed called for, modification of the tradition to address new audiences concerning new situations.

The expectation of God's final victory had a double consequence for the life of the early Church. On the one hand, it forced a recognition of the distance between this world and the age of God's undisputed sovereignty. On the other hand, since it was the Creator's sovereignty over His own creation that was expected, it enabled a positive evaluation of the world God had made (e.g., 1 Cor. 10:26). This double consequence was susceptible, of course, to two different perversions, either denying the reality of the continuing power of sin or denying the goodness of the created world. The NT preserves the tension and balance, but its authors emphasize sometimes one consequence, sometimes the other.

The moral tradition which the NT receives, and of which it is the normative expression, is diverse and pluralistic, not simple and monolithic. To see and appreciate both the diversity of NT ethical thoughts and their convergence in loyalty to the risen Lord is the task undertaken here.

II. Synoptic Gospels.–*A. Mark.* Mark was probably the first Gospel to be written. After the death of Peter in Nero's persecution, A.D. 64/5, Mark wrote to preserve Peter's preaching and to encourage and exhort the Roman Christians. The primary focus of his encouragement was that Jesus Himself had suffered and died; the primary focus of his exhortation was the call to discipleship (Mk. 1:16-20; 2:14; 3:13; 8:34; 10:52).

In the central section of his Gospel, framed by Peter's confession and the Transfiguration, Mark placed the first prediction of the passion and its sequel, the call to discipleship, "If any man would come after me, let him deny himself and take up his cross and follow me" (Mk. 8:34, addressed to "the multitudes" as well as the disciples). The meaning is clear: to follow Jesus is to suffer with Him. But it was precisely that which the disciples could not or would not understand, according to Mark. In each of the three passion predictions Mark called attention to the failure of the disciples to understand (8:32 [Peter!]; 9:32; 10:32-35). Those failures climaxed in the garden when the disciples "all forsook him, and fled" (14:50), except for Peter, who followed Him to the courtyard of the high priest but then denied Him (14:66-72). Peter, of course, as Mark's readers knew, had learned and accepted that to follow Jesus is to suffer with Him; he had followed Jesus to the cross. Mark encouraged and exhorted his readers to a similar discipleship. (The references to martyrdom are most explicit in 10:38f. and 13:9-13.)

This heroic morality is essentially eschatological. It is enabled and required by the eschatological outlook called for in the command to "watch" (Mk. 13:33-37). Jesus had begun the great battle against the powers of darkness and by His patient endurance of suffering had carried the first stages of that battle to a victorious conclusion (3:23-27; note also Mark's interest in exorcisms, nature miracles, and, of course, the Resurrection in 8:31; 9:9, 31; 10:34; 14:28; 16:1-8). The departed Lord will return (within a generation; cf. 13:30; 9:1) to complete the victory and reveal His glory, but the watchers do not know "the day or the hour" (13:32f., 35). The period between His departure and His return, the "night," tests the loyalty and perseverance of His disciples.

Mark links the command to watch with his treatment of the disciples' failure to understand that to follow Jesus is to suffer with Him. The three exhortations to "watch" (13:33-37) are paralleled by the three failures of the disciples to "watch" in Gethsemane (14:32-40), and even as

Jesus accepted the will of the Father to drink the cup of His suffering, the disciples, including Peter, slept. But now the command to watch comes to "all" (13:37), and so all are encouraged and exhorted to a discipleship that is prepared to suffer with Jesus in the expectation of His final triumph.

Mark's eschatological ethic of watchful discipleship is applied to topics besides suffering, and illumines even the most mundane of them with the same moral heroism. The call of Levi the tax collector to discipleship (Mk. 2:14) and the table fellowship of Jesus with other sinners (2:15-17) provided the background for the first controversies about the law (2:18–3:6). These controversies are a strikingly recurrent motif in this Gospel. Whatever else discipleship required, it apparently provided significant freedom from punctilious observance of the law. Fasting (2:18-22), sabbath-observance (2:23–3:6), the distinction between "clean" and "unclean" (7:1-23), and the permission of divorce (10:2-12) belong to the past, not to the eschatological community oriented to the coming of the Son of man. The final norm is no longer the precepts of Moses but the Lord and His words (8:38). "The commandment of God" still holds, of course (7:8; cf. 10:19; and esp. the double love commandment, 12:28-34), but it is simply not identical with any manipulatable code or casuistry, even one based on the law.

The "vice list" (Mk. 7:21-23) is traditional, with echoes of Jewish morality, but Mark focuses on "the heart," the source of evil acts and traits. In Mark's address to the issues of a household, marriage, children, and possessions (10:1-31; the narratives compose a *Haustafel,* i.e., a table of rules for the household). Jesus and His words do not rely on the law or conventional righteousness; they call attention, rather, to God's intentions at the creation (10:6), to the coming kingdom of God (10:14f.), and to the cost of discipleship (10:21). The saying about paying taxes to Caesar (12:13-17) is not a casuistic apportioning of rights and obligations but an emphatic assertion of the total claims of God's sovereignty. Mark's eschatological ethic provided no code, but it did provide a moral posture that was both less rigid and more demanding than any code, a moral stance that, by its readiness for humble service and suffering, was contrasted with the ethos of both Jewish lawyers and gentile rulers (e.g., 10:42-45).

B. Matthew. The Gospel of Matthew contains almost all of Mark, but was written to a different audience, a largely Jewish Christian audience, facing a different crisis, namely, the conflict with the synagogue, with quite another ethical perspective, described below.

1. The Sermon on the Mount. Matthew followed Mark's order, but self-consciously imposed on it a pattern of alternating narrative and discourse sections (see the formula concluding each discourse section in Mt. 7:28; 11:1; 13:53; 19:1; 26:1). The first discourse section is the Sermon on the Mount (5:1–7:29), a collection and arrangement of originally independent sayings of Jesus. The sermon is the quintessence of Matthew's ethic, made easily accessible for instructing catechumens (Jeremias). The theme and outline of the sermon and, indeed, the focus of Matthew's ethic may be found in 5:20: "unless your righteousness exceeds that of the scribes and Pharisees, you will never enter the kingdom of heaven." Matthew exhorted the Church to righteousness (Gk. *dikaiosynē,* Mt. 3:15; 5:6, 10, 20; 6:1, 33; 21:32), a righteousness that does not fall below the standards of the synagogue but rather surpasses them.

Such a righteousness preserves the law of Moses as a normative standard. This was the teaching of Jesus Himself according to Matthew. He announced that He had not come to abolish the law, that the whole law, down to the very letters, remains in effect, and that even the least of the commandments ought to be taught and done (5:17-20; cf. 23:23). Even the oral law is preserved: "the scribes and Pharisees sit on Moses' seat" (23:1). It was not their teaching function itself but rather their self-righteous elitism and their pettifogging legalism which were excoriated in ch. 23. In the controversies about sabbath observance (12:1-14; cf. Mk. 2:23–3:6), Matthew added legal, "halakic," arguments to the Marcan material to show that Jesus was "guiltless" (Mt. 12:7) and that what He did was "lawful" (12:12). In the controversy about "clean" and "unclean" (15:1-20; cf. Mk. 7:1-23), Matthew omitted the Marcan interpretation that Jesus "declared all foods clean" (Mk. 7:19, which would abolish a large section of the written law) and focused the discussion instead on tradition's concern for external purity at the expense of a concern for internal purity (Mt. 15:20; cf. 23:25-28). In the controversy about divorce in Matthew (19:3-12), Jesus did not set aside Dt. 24:1ff. as belonging to the past (cf. Mk. 10:2-12), but rather used it as the basis of a strict legal judgment. The law holds, and its precepts, even the least of them, ought to be taught and done.

Matthew demanded a righteousness which "exceeds that of the scribes" (Mt. 5:20). The antitheses of 5:21-48 are both a judgment on the self-serving and legalistic interpretations of the scribes (cf. also ch. 23) and a demonstration of the fulfillment of the law in the surpassing righteousness that Jesus required. They do not provide "a new law." (Notice that Matthew omitted Mk. 1:27, which indeed described Jesus' teaching as "a new teaching.") They do not annul the law, but bring it to its own fruition. The surpassing righteousness is not something added but something transformed by its connection with the kingdom (6:33; the Beatitudes, 5:3-12; and especially 4:17, for the Sermon on the Mount was clearly intended as a development of this summary of Jesus' preaching in the first narrative section). The laws forbidding murder (5:21), adultery (v. 27), and false swearing (v. 33), restricting divorce (v. 31) and punishment (v. 38), and requiring love of the neighbor (v. 43) are not swept away. What is rejected, rather, is the scribal interpretation that placed only an external limit on the expressions of anger, lust, deceit, revenge, and self-centeredness. The scribal "righteousness" left the moral agent untouched, so that even the observance of the law was grudging and external. The righteousness of the Christian community was to exceed the righteousness of the scribes by making claims upon the moral agent himself, claims in line with both the intention of the lawgiver (e.g., 5:45) and the repentance required by the coming of His kingdom (4:17).

The righteousness required also "exceeds that . . . of the Pharisees" (Mt. 5:20; see 6:1-18). The contrast is simple: the righteous acts of the Pharisees, their almsgiving, praying, and fasting, were done "to be seen of men" (6:1f., 5, 16; 23:5, 28). These pious duties are not to be abandoned, but the self-righteousness with which they were performed must be.

Finally, Matthew undertook in the Sermon (6:19–7:27) to describe the righteousness without comparison or equal. To treasure "his kingdom and his righteousness" (6:33) gives and requires freedom from anxiety about earthly treasures or about food and clothes (6:19-34), calls for repentance and disallows self-righteous judgment (7:1-5), and prompts a life of prayer (vv. 7-11). A summary is provided by the Golden Rule (v. 12), and the conclusion is provided by a trio of contrasts, the two gates, the two trees, and the two houses (vv. 13-27), each reminding the congregation that it is not enough to call Jesus "Lord"

ETHICS: NT ETHICS

(v. 21), that it is necessary rather to "do" the surpassing righteousness He announced.

2. Rules for Discipline and Discernment. The fourth discourse (Mt. 18:1-35) is concerned with discipline and discernment in the community. Set among the exhortations to exercise patient and persevering concern for "the little ones who believe on me" (vv. 6-14) and to forgive "seventy times seven" (vv. 21-35) stand the rules for dealing with an offending brother (vv. 15-20). The rules insist both on the individual's responsibility for reconciliation and on the community's responsibility for mutual admonition and communal discernment. The authority to make judicial rulings and judgments "to bind and loose" was vested in the Church as a whole "gathered in his name" (vv. 18-20).

3. "Works Righteousness" and Eschatology. Matthew's ethic has often been described as a "works righteousness." There is surely some truth in the characterization. He made "entering the kingdom" (a phrase Matthew used more than any other NT author) contingent upon doing the righteousness required in the Sermon (5:20; 7:21; cf. 6:14f.). The rewards (e.g., 6:1-6, 16-18; 25:34) and punishments (e.g., 7:23; 13:42, 50; 22:13; 24:51; 25:30, 41) of the Final Judgment are consistently emphasized (cf., e.g., his treatment of Mk. 8:38, where Matthew adds to the coming of the Son of man in glory, "and then he will repay every man for what he has done" [Mt. 16:27; see also 12:36f.]).

But for all its persuasiveness, this characterization is deceptive. It overlooks the fact that the demands themselves were premised on Jesus' announcement of the kingdom and the proleptic demonstration of its saving power in His ministry (the first narrative; see the summary, Mt. 4:23-25). Matthew's perspective was thoroughly eschatological. In Jesus the times were fulfilled (the fulfillment of prophecy is a central motif in Matthew; cf. 1:22; 2:5, 15, 17, 23; 3:3; 4:14; 8:17; etc.). The new age, having made its power felt in Jesus' acts of healing and forgiveness and in His resurrection, is certain, and the new age can already mark the life of the community among whom He abides. The risen Lord abides with the community "always, to the close of the age"; that eschatological promise is the context for the continuing exhortation to "observe all that [Jesus had] commanded" (28:16-20; cf. v. 20 with 18:20). The message of God's gracious intervention retains its important priority. God's gracious intervention, however, also establishes the validity of His will. The present time, then, is a time of testing — not, however, as in Mark through suffering with Him, but rather through obedience to His righteousness. (See the series of parables used to close the apocalyptic discourse, 24:45–25:46.) So, in the parable of the unforgiving servant (18:23-35), the Lord's forgiveness is both gracious and demanding, the premise both for the requirement to forgive and for the judgment on not forgiving (cf. 18:35 with 6:15). In the parable of the marriage feast (22:1-14), the invitation to the joy of the eschatological banquet is indiscriminately given to "both bad and good," but with the invitation comes the demand for righteousness (and the guest with no wedding garment is cast out). At the beginning of the Sermon on the Mount stand announcements of the blessings of the kingdom (the Beatitudes, 5:3-12) and the glories of the eschatological community (5:13-16).

C. Luke-Acts. Luke, like Matthew, seems to have made use of Mark, but modified it and added to it from yet another ethical perspective, a perspective distinguished by its solicitude for the poor and oppressed and by its concern for the unity of Jewish and gentile Christians.

Both distinguishing characteristics are present in the episode which Luke, by a modification of Mark's order, put at the very beginning of Jesus' ministry. Jesus' sermon at Nazareth (Lk. 4:16-30; cf. Mk. 6:1-6) was made a preface to His ministry and took the place of Mark's summary of His preaching (Mk. 1:15, which Luke omitted). Jesus went to this synagogue "as his custom was" and used Isa. 61:1-2a to describe His own ministry: "the Spirit of the Lord God is upon me, because he has anointed me to preach good news to the poor . . ." (cf. 7:22). But He made no mention of "the day of vengeance of our God" (Isa. 61:2b). It was evidently this omission that prompted the ensuing discussion, with its reminder of the sympathy of Elijah and Elisha for Gentiles (Lk. 4:25-27). The form is narrative rather than hortative, but no one could claim loyalty to this Christ, this "anointed" one, and be unsympathetic toward the poor; no gentile Christian could claim loyalty to this Christ and repudiate the Jewish heritage of the gospel, and no Jewish Christian could repudiate the eschatological inclusion of the Gentiles.

1. Care for the Poor and Oppressed. From the very beginning Luke's story of Jesus emphasized His identification with the poor and the outcasts. It is Mary, not Joseph (cf. Mt. 1:20), who is visited by the angel. Mary's Magnificat (Lk. 1:46-55) rejoices in God's action to exalt the humble, the hungry, the poor, and to humble the exalted. The shepherds, not Magi, visit Jesus in an animal stall, not a house (cf. Mt. 2:1-12). John the Baptist exhorts the multitudes to share food and clothing, and tax collectors and soldiers not to abuse their power (Lk. 3:10-14). In Luke's Sermon on the Plain (6:20-49), Jesus makes no attempt to "spiritualize" the blessings on the poor and hungry (cf. Lk. 6:20f. with Mt. 5:3, 6); He includes corresponding "woes" on the rich (6:24-26), and He calls for a response to this eschatological reversal that focuses on the duties of love and mercy (cf. Lk. 6:26 with Mt. 5:48), including generosity, benevolence, lending without expecting a return, and almsgiving (Lk. 6:27-38). Luke's "travel narrative" (9:51–19:44), a long teaching section set in the form of a narrative of Jesus' journey to Jerusalem contains a number of hortatory parables: "the Good Samaritan," which explicates the love commandment in terms of mercy and concludes with Jesus' command, "Go and do likewise" (10:25-37); "the rich fool," with its judgment on the wealthy person's concern for his own ease (12:13-21); "the great supper," with its reminder of God's eschatological blessing on "the poor and maimed and blind and lame" (following an exhortation of solicitude toward the same in 14:12-24); "the unrighteous steward," with its exhortation to generosity, to "make friends . . . by unrighteous mammon" (16:1-13); and "the rich man and Lazarus," a parabolic announcement of the eschatological blessings on the poor and woes on the ungenerous rich (16:19-31). It includes biographical narratives like Mary's choice to sit at the Lord's feet as an equal among the disciples (10:38-42) and Zacchaeus's choice to do justice and mercy (19:1-10); both choices are commended by Jesus.

This focus continues into Acts. All the heroes give alms (Acts 3:1-10, Peter and John; 10:1-4, Cornelius; 11:27-30; 12:25; 24:17, Paul). The early Church itself "had all things in common . . . and distributed them to all, as any had need" (2:44f.; 4:32-35). The mission encounters resistance because it interferes with the "hope of gain" (16:19; 19:23-25).

The "great reversal" theme, first enunciated in the Magnificat, emphasized in the inaugural address, and displayed in Luke's whole portrait of Christ, is related, of course, to the key testimony text, Ps. 118:22, about the rejected stone being made the head of the corner (Lk. 21:17; Acts 4:11). The "great reversal" was important both morally and christologically for Luke. The God who

exalts the humble exalted Him. It is little wonder that at the end of Luke's Gospel, the risen Lord reminds them of the reversal (24:46) and exhorts them to preach repentance in His name (v. 47). There is no repentance in Luke that does not practice sympathy toward the poor and oppressed, no welcoming the saving act of God in Jesus Christ that does not do justice and kindness (19:1-10), no waiting for His return that does not expect and anticipate God's vindication of the humble poor (18:1-8).

2. Unity of Jew and Gentile. It is also little wonder that such repentance is to be preached "to all nations beginning from Jerusalem" (Lk. 24:47; cf. Acts 1:8). It was, of course, programmatic for the book of Acts, but also typical of Luke's insistence on both the Jewish origins of the gospel and the inclusion of the Gentiles.

The Jewish origins of the gospel are plain from the very beginning. Luke alone begins in the temple with the story of Zechariah, a devout and pious (1:5-13) old priest. Luke alone relates Jesus' circumcision (2:21; also that of John the Baptist, 1:59), His presentation in the temple "as it is written in the Law of the Lord" (2:22f.), and His annual Passover pilgrimage with His parents (2:41f.). In Luke's Gospel Jesus' ministry was conducted almost exclusively among Jews (he omitted Mark's narratives of Jesus' ministry in Tyre and Sidon and the Decapolis). The centurion's request for his slave was mediated by Jews (Lk. 7:1-10, esp. 3f.; cf. Mt. 8:5-13). In Luke the Resurrection appearances took place in Jerusalem, and the Gospel ends where it began, "in the temple."

The mission "to all nations" really begins in Acts (and there not until ch. 10). But from the beginning of Luke, alongside the emphasis on the Jewish origin of the Christian movement, were foreshadowings of the mission to come. The announcement to the shepherds was that the gospel would be "to all the people" (2:10). The song of the devout Simeon celebrated God's salvation of "all peoples" (2:25-32). John the Baptist, citing Isa. 40, described the coming of the Lord: "and all flesh shall see the salvation of God" (3:6; cf. also 13:29). The centurion's approach to Jesus was mediated by Jews, but he was nevertheless held up as a model of faith (7:9). In the beginning of Acts, long before the gentile mission began, Peter in his Pentecost sermon quoted Joel's saying that the Spirit would be poured out "upon all flesh" (2:17). In the narrative of Peter's visit with Cornelius, the real beginning of the gentile mission (9:32–11:18), Peter was hardly an eager evangelist, and the inclusion of uncircumcised Gentiles was plainly God's decision (15:7), not Peter's idea. By visions, heavenly messages, and the gift of the Spirit, God made it plain that He "shows no partiality" (10:34; cf. 11:12; 15:9) and that "what God has cleansed you must not call common" (10:15; 11:19; cf. 15:9). God's decision, however, did not apparently settle the issue in the Church; that awaited the Apostolic Council and its decision on Paul's case (ch. 15). Even then the controversy did not cease but marked the rest of the book of Acts (e.g., 21:19-21; 26:19-23) and, undoubtedly, the Christian communities to which Luke wrote.

To Jewish Christians and gentile Christians, these features of the narrative were not merely of historical interest, but fundamental to their relationship within the churches. The Jewish Christians ought to join Peter in welcoming, not judging, the Gentiles, and in acknowledging, not resisting, God's decision to include them *as Gentiles*: "What God has cleansed you must not call common" (Acts 10:15; 11:9). The gentile Christians ought to join the centurion in acknowledging that their access to God's saving power is through the Jews, repudiating neither the Jewish heritage of the gospel nor Jewish Christians, and in loving, not despising, the Jews (Lk. 7:5). This unity and harmony did not require uniformity. The Jewish Christians were to welcome the gentile Christians *as Gentiles*, demanding neither circumcision nor observance of the Jewish law. The gentile Christians were to love Jewish Christians *as Jews*, respecting their pious observance of the law.

Luke's treatment of the law is unique and clearly related to this distinctive concern. The law holds for Jews, but the duties of love and mercy take priority over ritual observance (Lk. 10:25-37; 6:1-11; 13:10-17; 14:1-6). And it also holds with respect to Gentiles, but in quite a different way! The Apostolic Council's "judgment" (Acts 15:19; Gk. *krínō*) was a legal ruling. The law simply does not require gentile observance; to accept God's decision to include them *as Gentiles* means legally not to require Jewish observance of the law from them. The council required only, as a *modus vivendi* to facilitate some degree of fellowship between Jews and Gentiles, that Gentiles "abstain from the pollutions of idols and from unchastity and from what is strangled and from blood" (15:20, 29). Luke surely intended to recommend such observance to gentile Christians, at least as a way of accommodating the Jewish Christians. The Gentiles need not observe the law, then, but they — like the Jews — were required "to repent and turn to God and perform deeds worthy of their repentance" (Acts 26:20).

III. Paul and His Interpreters. *–A. Paul. 1. A Pastoral Ethic.* Before the Gospels put the memories of Jesus into writing, Paul was addressing pastoral letters to his churches. His letters were intimate and personal, relevant to the concrete problems of particular communities, not self-consciously addressed to a larger (or later) audience. He presented no "timeless truths" in the style of either a philosopher or a code maker, but rather the timely application of the gospel to the concrete situations faced by the churches. He always wrote as an apostle (e.g., Rom. 1:1; 1 Cor. 1:1; 2 Cor. 1:1; Gal. 1:1), and he always wrote to churches (even the letter to Philemon was addressed "to the church in your house," v. 2). The letters sent in the service of Paul's mission were the means by which he was present as an apostle even while he was absent (Col. 2:5). So he could write with apostolic authority to pronounce judgment in the name of the Lord (1 Cor. 5:3-5). But, although he could, he seldom commanded; he rather "appealed" to his readers' own judgment (Philem. 8f.; 1 Cor. 10:15). He used the language of polite request (Gk. *parakalō*, Rom. 12:1 *et passim*) rather than the language of command, and so conveyed to the churches a sense of their own freedom and responsibility in moral discernment. He respected and cultivated the churches as the communal context of moral discernment and judgment, as "full of goodness, filled with all knowledge, and able to instruct one another" (Rom. 15:14).

Paul's use of Gk. *parakalō* and *paráklēsis* in exhortation is informative in another way as well, for Paul used the same words to mean also the "comfort" and "encouragement" of the gospel (e.g., 2 Cor. 1:4-7). So in Phil. 2, the "encouragement [Gk. *paráklēsis*] in Christ" (v. 1) comes to expression as exhortation to "have this mind among yourselves, which you have in Christ Jesus" (v. 5). The word itself demonstrates the inseparable unity of the gift and the demand, the indicative and imperative, in Paul's ethical thought (see Furnish, *Ethics*, pp. 106-111). Paul's moral exhortations were of one piece with his preaching the gospel.

2. Indicative and Imperative. Paul's continual proclamation of the gospel, "the power of God for salvation to everyone who has faith" (Rom. 1:16), to his churches was

ETHICS: NT ETHICS

expressed sometimes in the indicative mood (e.g., 1 Cor. 5:7b, "You really are unleavened") and sometimes in the imperative mood (e.g., 1 Cor. 5:7a, "Cleanse out the old leaven"). Indeed, frequently statements in the indicative have hortatory force; they function as subtle imperatives (e.g., Rom. 5:1-5). There is plainly, in Paul's thought, an intimate relation between the indicative and the imperative. There is, to be sure, an important priority to the indicative in Paul's thought, as his insistence on "justification by grace" makes clear (e.g., Rom. 3:21-30; cf. 1 Cor. 4:7). But the priority must not be understood in terms of the establishment of an ideal or principle which needs later and separately to be actualized or realized in decisions about character and conduct, for there is also an important "finality" to the indicative, as his persistent references to the promised future make equally clear (e.g., Phil. 3:20f.; Rom. 13:11-14). The relation must, then, be understood in terms of Paul's conviction that in the crucified and risen Christ God has acted eschatologically. In Christ God has acted to end the old age, which stood under the powers of sin and of death, and to begin the new age, the age of the undisputed sovereignty of God's transcendent power. The old age, however, continues; the powers of sin and death have not laid down their arms. They have been conquered but not destroyed; and they are, therefore, not yet ineffectual, not even against the believer. But the power of God stands in fundamental opposition to the powers of this age. And the one who receives the power of God is freed from their dominion to stand under the lordship of Christ. That "standing" is always *now* both gift and demand, both indicative and imperative (cf. Rom. 5:2 with 1 Cor. 10:12; 16:13; Eph. 6:14).

The juxtaposition of indicative and imperative is possible and, indeed, indispensable precisely because of the present coexistence of the old age and the age to come. The indicative describes the eschatological salvation of which Christians in the Spirit have the "first fruits" (Rom. 8:23) and "guarantee" (2 Cor. 5:5). But the imperative acknowledges that Christians are still threatened by the powers of the old age, though the doom of those powers is sure, and therefore that they are responsible for holding fast to the life given them in Christ against the powers of sin and death. "If we live by the Spirit, let us also walk by the Spirit" (Gal. 5:25).

3. Discernment. The ages have turned, and there is a corresponding change in discernment. So Paul admonished the Romans, "Be not conformed to this world [or age] but be transformed by the renewal of your mind, that you may prove [or discern] what is the will of God, what is good and acceptable and perfect" (Rom. 12:2). The Christians' discernment ought for Paul to be radically affected by God's eschatological action in Jesus Christ.

Their self-understanding as moral agents is to be determined by their incorporation into Christ (Gal. 2:20; Rom. 6:1-11; 2 Cor. 5:14f.). They "belong" to Christ (1 Cor. 6:19b-20) and freely offer themselves (Rom. 12:1). And this moral identity is important to discerning what they ought to be and do.

Their perspective on the world has also been determined by God's eschatological act. They understand that there is a "new creation," that "the old has passed away" and "the new has come" (2 Cor. 5:17), but also that there is a continuing conflict between the power of God and the "powers" (Eph. 6:12; Rom. 8:38), and they look for the day on which "the creation itself will be set free from its bondage to decay" (Rom. 8:21). This interpretation of the situation illumines the analysis of any particular situation and its moral requirements. Paul's own emphasis was relative to his audience and their situation. To the Corinthians, where the confidence of some that they were already fully in the new age led sometimes to libertinism (1 Cor. 5:12; 6:12), sometimes to asceticism (1 Cor. 7:1), and always to elitism, Paul consistently emphasized the "not yet" character of our existence (e.g., 5:3-5; 7:2; ch. 15). To the Colossians, however, tempted to submit again to the powers and their taboos (Col. 2:16-19), Paul emphasized that Christ had "already" achieved lordship over the powers and that their strength was already broken (v. 15).

This christological and eschatological perspective on the self and the world could be articulated by Paul in terms of some basic values. Those were not first carefully defined by Paul and then applied deductively and casuistically to concrete cases; Paul's discernment is more like the expression of the character and community formed by Christ. Yet there are articulated values, statements of principle, and indeed appeals to moral wisdom taken from a number of sources. Discernment as personal and historical response to what God has done, is doing, and will do in Christ surely involved for Paul rational discrimination.

Perhaps the most fundamental of the Christian values is freedom. "For freedom Christ has set us free; stand fast therefore, and do not submit again to a yoke of bondage" (Gal. 5:1; cf. 2 Cor. 3:17). This freedom is surely freedom from our bondage to sin and death, but it is also always freedom from the law (Gal. 5:2-4), and not only from the curse of the law but from the divisions established in and by the law, especially the division between Jew and Gentile, circumcised and uncircumcised (Gal. 5:5; 3:28). This gift and value took concrete shape when Paul insisted that the Galatians not yield to those who would compel them to be circumcised and to keep the law, when he judged the Corinthians free from scruples about food offered to idols (1 Cor. 8:4-8; but see v. 9 and below), and when he proclaimed to the Romans "the glorious liberty of the children of God" (8:21), which allows Jewish and gentile Christians their Jewish and gentle identities as long as they are subsumed to their Christian identity (Rom. 14).

If freedom is the most fundamental value, love is the most important. The two are related to each other because both are related to God's action in the cross and Resurrection. Christ frees us from our bondage to the powers of the old age to an eschatological existence whose distinguishing characteristic is love (1 Cor. 13:8-13; Rom. 5:5; also Gal. 5:22f. where love stands first in Paul's list of the "fruit of the Spirit"). The liberation God wins and grants in Christ is not license or independence but the freedom to love: "Do not use your freedom as an opportunity for the flesh, but through love be servants of one another" (Gal. 5:13; 1 Cor. 6:12; 10:23f.). Faith, by which we receive the liberation God has wrought, acts "through love" (Gal. 5:6). Indeed love is the characteristic that enables a new discernment; "It is my prayer," Paul says, "that your love may abound more and more, with knowledge and all discernment, so that you may approve what is excellent" (Phil. 1:9f.; cf. 1 Cor. 8:1f.). Love is the fulfillment of the law (Rom. 13:8-10; Gal. 5:14). This gift and value took concrete shape when Paul called for unity, peace, and love in churches composed of Jew and Gentile (Eph. 4:1-3; cf. Rom. 14:1–15:6), when he admonished some enthusiasts in Corinth against an elitism based on their "spiritual gifts" (1 Cor. 12–14), when he encouraged the Corinthians to give generously to the collection for the poor in Jerusalem (2 Cor. 8:8, 24), and when, dealing with role relationships, he required husbands to love their wives (Eph. 5:25, 28; Col. 3:19) and advised Philemon about his relationship to Onesimus (Philem. 7, 16). Paul

ETHICS: NT ETHICS

described the concrete shape of love in the central section of 1 Cor. 13 with his list of the works of love (vv. 4-7; the Greek uses verbs, not predicate adjectives).

Paul's ethic of response to God's eschatological act in Jesus Christ was, then, an ethic of freedom and love that took concrete shape according to the situation of the readers. But it did not create new guidelines for character and conduct *ex nihilo*. Love's discernment made use of other sources, especially the teachings of Jesus, the Jewish law, and "natural" moral standards.

The tradition which Paul received and handed down surely included a collection of Jesus' sayings, and he did occasionally make use of these in moral argument (explicitly in 1 Cor. 7:10f.; 9:14). Moreover, when he did use them, it is plain that he considered them authoritative, for he took care to distinguish them from his own opinion (1 Cor. 7:12, 25). Still, they are surprisingly seldom used; the collection of Jesus' sayings did not apparently play a leading role in Paul's ethic, and surely did not provide a basis for "Christian Halakah" (Davies, *Paul and Rabbinic Judaism* [rev. ed. 1955]). The focus of Paul's discernment was the Christ-event, not the teachings of Jesus. (When Paul demanded "imitation of Christ," 1 Cor. 11:1; 1 Thess. 1:6, the focus was not on the "earthly Jesus" but on the cross.)

Paul frequently cited the Jewish Scriptures in contexts of moral exhortation, but never casuistically. Indeed, he cited the Prophets and Wisdom more often than the Torah, and when he did appeal to the Torah it was more often to narratives than to statutes. We have already mentioned Paul's insistence on freedom from the law. Paul acknowledged that the "law" and the "commandment" are "holy and just and good" (Rom. 7:12). But he insisted that the law is not eternal, but secondary, added after the promise (Gal. 3:17; Rom. 4:10). Moreover, in the old age, it was co-opted by the powers of sin and death; it was even "the power of sin" (1 Cor. 15:56). It led to sins being "counted" (Rom. 5:13) and provided an "opportunity" for sin (7:8, 10). It was a "custodian until Christ came" (Gal. 3:24-26). Then the promise is kept, and Christ is "the end of the law" (Rom. 10:4; cf. Gal. 3:25). With Christ we have died to the law (Rom. 7:4; Gal. 2:19) and are "discharged from the law . . . so that we serve not under the old written code but in the new life of the Spirit" (Rom. 7:6). The fault was not with the law itself, of course, but with "the flesh," with man's susceptibility to the powers of sin and death (Rom. 8:3). The promise is fulfilled in Jesus Christ, so that in Him "the just requirement of the law might be fulfilled in us" (Rom. 8:4; cf. 13:8-10). But there is no going back to the boasting self-righteousness, to the condemnations, to the old written code. There is no building up again the "dividing wall of hostility" (Eph. 2:14; cf. Gal. 2:18) between Jew and Gentile. So when Paul used the OT, he did not use it as a code to determine God's will. He used it in the light of Christ (2 Cor. 3:16) as narrative, promise, and wisdom to illuminate and persuade his readers with respect to the gift and claim of the new life in Christ.

Paul also used the "natural" moral wisdom of the Hellenistic street preachers and philosophers. Even pagans, after all, live in God's creation and can know something of God and His law (Rom. 1:19; 2:14-16); so Paul could and did use Hellenistic concepts like "conscience" (Gk. *syneídēsis*), Hellenistic terminology for certain moral qualities (see esp. Phil. 4:8), Hellenistic forms of moral argument (esp. the diatribe, e.g., 1 Cor. 6:12-20), the Hellenistic appeal to "nature" as a moral teacher (e.g., 1 Cor. 11:14), and the Hellenistic emphasis on role assignments in determining one's conduct (e.g., the *Haustafeln*, the tables of rules for the household in Col. 3:18–4:1; Eph. 5:21–6:9). It has often been suggested that Paul (or a later Paulinist) simply adopted the familiar standards of Hellenism when it became clear that an ethic based on the eschatological salvation in Christ did not enable a settled common life in the midst of the world. But the appeal to moral commonplaces was not inconsistent with Paul's eschatological and christological themes, for it was Paul's conviction that the new creation is the fulfillment of the original will of God the Creator. Moreover, these familiar standards were thoroughly transformed in the light of Christ. In the *Haustafeln*, for example, the model was no longer the aloof dignity of the philosopher but the patience and love of Christ; the focus was no longer the self but the neighbor; the basic principle was not provided by the roles themselves but by mutual subjection (Eph. 5:21) and equality (Eph. 6:9; Col. 3:25). By addressing women and slaves and children as moral agents along with the freemen (and first!) and by demanding the freemen's submission to Christ and love of the neighbor, the *Haustafeln* did not conform to this age but were transformed and became serviceable to discernment (cf. Rom. 12:1f.).

Paul provided no theory of discernment, but the pattern is plain. It is done always in view of God's eschatological action in Jesus Christ, His gift and demand of a new life. God's act established a new identity, a new perspective on the world, and certain characteristics of the eschatological existence like freedom and love. The new discernment did not, however, create new principles, guidelines, and rules *de novo*; it rather selected, assimilated, and transformed Jewish, Christian, and "natural" moral wisdom in order to discern the particular conduct and character demanded at any particular time. For Paul, these sources of wisdom were never normative in the same way that God's action in Jesus Christ was, and they remained constantly under the criticism and transforming power of the new life claimed in Christ for Christians and of Christians.

4. Concrete Problems. a. Jew and Gentile. Paul's concern for the relation of Jews and Gentiles in the churches has already been observed. In Galatians, Romans, and Ephesians this problem seems to have been the occasion for the letters. For Paul the unity and equality of Jew and Gentile was closely related to "the truth of the gospel" (Gal. 2:5, 14), the "obedience of faith" (Rom. 1:5; 16:25), and "the mystery of God's will" (Eph. 1:9f.; 3:4-6). It is an eschatological unity to be sure (Gal. 3:28), but it must already shape the social reality of the Church. Paul did not demand that Jewish Christians or gentile Christians repudiate their Jewish or gentile identity (and stood against those who would make such demands), but he did demand that they not repudiate each other either. Jew and Gentile are equally "under the power of sin" (Rom. 3:9, with an appeal to the Jewish Scripture; cf. Eph. 2:1-3), and they are equally "justified by his grace as a gift . . . to be received by faith' (Rom. 3:24-30; cf. Gal. 3:6-14; Eph. 2:8). So "there is no distinction" (Rom. 3:22); there is "life for all men" (Rom. 5:18). These indicatives claimed a harmonious pluralism marked by respect and love for those who were and remained different. They must "welcome each other" (Rom. 15:7) and be "eager to maintain the unity of the Spirit in the bond of peace" (Eph. 4:3).

b. Slave and Free. There is also an eschatological unity of slave and free (Gal. 3:28; Col. 3:11). That unity also did not demand uniformity; there remained slave and free. But the relationship stood under the norm of what God has done in Christ. So masters were reminded in their relations with slaves that they, too, had a master (Gk. *kýrios*) and that with Him "there is no partiality" (Eph.

ETHICS: NT ETHICS

6:9); and Philemon was instructed to receive Onesimus back "no longer as a slave but . . . as a beloved brother . . . both in the flesh and in the Lord" (Philem. 16). New relationships were established "in the Lord" and that unity and fraternity must also have some consequences "in the flesh," in the social realities of the Church. The unity is eschatological, but it is not docetic. Paul brought the existing role relationship of slave and master under the lordship of Christ in such a way that it transformed that relationship (and ultimately shattered it).

c. Male and Female. The eschatological unity of male and female (Gal. 3:28), too, did not demand uniformity (especially since 1 Cor. 11:8f. traces the distinction not just to the law but to the original creation; Gal. 3:28, however, uses the very language of Gen. 1:27 [Gk. *ársen kaí thély*] to say "there is no 'male and female' "). The unity, however, did and must shape the new life in Christ. Paul counted Phoebe his "helper" and Prisca his "fellow worker" (Rom. 16:1-3). He brought the existing role relation of husband and wife under the lordship of Jesus Christ in such a way as to assimilate and transform that relationship. There is mutual subjection (Eph. 5:21), and "head" (v. 23) is defined in terms of Christ's love and sacrifice. This equality and mutuality in the marriage relationship is perhaps most striking in 1 Cor. 7:2b-4. Nevertheless, it was also in 1 Corinthians that Paul insisted that, when women pray and prophesy, they be veiled (11:3-16), and that women "be silent" (14:33b-35). The passages are difficult to reconcile with each other and to Paul's other behavior toward, and advice concerning, women (including the parenthetical 1 Cor. 11:11f.). However they are finally to be interpreted, the occasion for them was apparently that among the Corinthian enthusiasts, claiming on the basis of their "spiritual gifts" to be already and without remainder living in the new age, were women who disturbed the order and decorum of the church with their protestations of independence and their exercise of the gifts. Paul would, of course, be quite unsympathetic with both their eschatology and their concept of "freedom" (independence), and he made a wide variety of appeals, to the law, rabbinic teaching, church custom, and nature, to convince the Corinthians not to tolerate their excesses.

d. Sex and Marriage. Some of the same Corinthian enthusiasts thought that what they did in the body was a matter of indifference, since they lived already in the new age of the Spirit (1 Cor. 6:12-20). Some even boasted about their sexual libertinism (5:1f.). Against these Paul insisted on the resurrection of the body, so that the body, too, belongs to Christ. "The body is not meant for immorality, but for the Lord. . . . So glorify God in your body" (6:13, 20; cf. 1 Thess. 4:3-8).

Others among the enthusiasts at Corinth drew a quite different conclusion: because they were already in the age of the Spirit, they had to be ascetic and to refrain from sexual intercourse. ("It is well for a man not to touch a woman" is a Corinthian slogan which, while not rejected outright, is immediately qualified by Paul, 7:1f.) With them Paul affirmed that celibacy is a sign of a new age and that in the new age marriage is no longer a duty. But against them Paul insisted on the "not yet" character of our existence, recognized the temptation to immorality (7:2), and refused to make celibacy a duty either. Both marriage and celibacy are gifts (Gk. *chárisma,* 7:7). Within marriage sexual intercourse is not only allowed but encouraged (7:3-5; cf. Col. 2:20-23, where Paul again rejects asceticism, and Eph. 5:31f., where Paul draws an analogy between the sexual relation of husband and wife and the relation of Christ and the Church; on divorce, *see* DIVORCE: IN THE NT).

e. The State. Rom. 13:1-7 has often been misunderstood as requiring uncritical obedience to the state. The passage (written years before Nero's persecution in A.D. 64) has affinities with similar teaching of Hellenistic Judaism (e.g., Philo *De legatione ad Gaium*). Paul would seem to be instructing the Roman churches (especially the Jewish churches there) to keep to the tradition that had formed their political posture. Paul used the institutionally oriented advice of Hellenistic Judaism, that the rulers are appointed by God (13:1f.), that their legitimate function is to protect the innocent, promote the good, and punish the evil (vv. 3f.), and that those who desire a well-ordered community life ought to render the authorities appropriate taxes and honor (vv. 5-7). But Paul put that advice, that moral wisdom, in a new context, a transforming context. He set before it and behind it the duty to love (12:9; 13:8) and his reminders of the eschatological situation (12:2; 13:11f.). Submission to government was set in the context of the more urgent duty to love the neighbor while we await God's justice. To love the neighbor in a world still marked by selfishness and evil requires political responsibility. When Christians bring suit against each other, however, it signifies a failure to live the life that ought to mark their character and communities; it is a "defeat" (1 Cor. 6:1-8; also a clear indication of the presumption in the claims of the enthusiasts at Corinth). Love's politics, then, does not insist on one's own rights, is willing to "suffer wrong" (1 Cor. 6:7), but it does insist on government, on justice for the neighbor (Rom. 13).

f. The Collection. At the Apostolic Council Paul's mission among the Gentiles was approved by the elders at Jerusalem, and there they requested that he "remember the poor" (Gal. 2:10). Paul honored that request with the collection he conducted among his gentile churches for the poor in Jerusalem (e.g., 1 Cor. 16:1-4). It was an act of charity that was also to be instrumental in establishing the unity of Jewish and gentile Christians (Rom. 15:25-31; 2 Cor. 9:11-15). In exhorting the Corinthians to complete the collection Paul appealed to love (2 Cor. 8:8, 24) and the example of Christ (v. 9) as fundamental claims on their character (their "readiness," v. 12) and conduct. These took concrete shape not in inequitable burdens (vv. 12f.) but precisely in "equality" (v. 14 twice). That equality is explicated in terms of the distributive principle, "from each according to his ability, to each according to his need" (see 8:14).

In each case Paul's pattern of discernment is operative. The eschatological act of God in Jesus Christ provides a moral identity and a perspective on the world, and establishes certain fundamental values, but it does not create *ex nihilo* new rules, or roles, or institutions. To deal with concrete cases different traditional sources of moral wisdom are assimilated to, and transformed by, the new life given in Christ.

B. The Pastoral Epistles. The authorship of the Pastorals is disputed, but whether by Paul or a devoted student, the spirit of the ethic in them is indisputably more pedestrian and prosaic. To be sure, the gospel remains the eschatological act of God in Jesus Christ (1 Tim. 3:16; 6:11-16; 2 Tim. 1:8-10; 2:11-13; Tit. 2:11-14; 3:4-8), and it remains the basis of the morality (esp. Tit. 2:11-14). But the gospel that was entrusted to Paul (1 Tim. 1:11) and which he in turn entrusted to Timothy (1:18), charging him to guard it (6:20) and to entrust it to "faithful men who will be able to teach others also" (2 Tim. 2:2), gradually becomes identified with the tradition, with "sound doctrine" (1 Tim. 1:8).

Orthodoxy and morality are a matched set for the Pastorals (e.g., 1 Tim. 1:3-5; 3:9; 2 Tim. 2:14-19; Tit. 2:1ff.). The particular heresy (cf. 2 Tim. 1:15) opposed here seems

to have been a Jewish gnostic form of Christianity (1 Tim. 1:7; Tit. 1:10, 14-16; 3:9). The heretics held that "the resurrection is past already" (2 Tim. 2:18) and, on the basis of their otherworldliness, demanded abstinence from marriage and "foods" (1 Tim. 4:3). Against them the Pastorals remember that His coming is "not yet" (e.g., 2 Tim. 4:8; Tit. 2:11-14) and that God is the Creator of this world (1 Tim. 4:3f., "everything created by God is good, and nothing is to be rejected if it is received with thanksgiving"). Against the speculative and ascetic morality of these heretics, it was necessary carefully to define and courageously to defend sound doctrine and morality. An antinomian reaction to this legalistic heresy on the part of some compounded the problem (1 Tim. 1:19); so the readers are exhorted to "wage the good warfare, holding faith and a good conscience" (1 Tim. 1:18f.).

In spite of this commendable resistance to gnostic, legalistic, speculative, and antinomian perversions of the Christian ethic, in the Pastorals "the gospel" exercised less critical and transformative power on the sources of moral wisdom and role definitions that it assimilated and used. (Perhaps precisely because of the necessity of resistance to gnostic and antinomian tendencies it was important soberly to reinforce mundane obligations taught in the law and acknowledged in this world.) Orthodoxy and morality are a matched set, but the determination of what is good and right depends more on the common moral assumptions of the readers than on any "new discernment." The virtues and vices listed (1 Tim. 1:9f.; 2:2-5; 2 Tim. 3:2-5; etc.) are largely commonplace for the time. The position on the law simply affirms it against the antinomians and protects it against the speculative and ascetic interpretations of gnostic Judaizers: "the law is good, if anyone uses it lawfully" (1 Tim. 1:8). Most strikingly and troublesomely, the traditional role assignments of women (1 Tim. 2:9-15; Tit. 2:3-5) and slaves (1 Tim. 6:1f.) are assimilated without being balanced by appeals to mutual submission. The exhortations to pray for (1 Tim. 2:2) and be submissive to (Tit. 3:1) rulers are commonplace to Hellenistic Judaism and are not here transformed by the duty of neighbor love in a still selfish world (as in Rom. 13). The treatment of riches is also traditional (1 Tim. 6:7-10), but the final exhortation (1 Tim. 6:17-19) uses the eschatological perspective both to stand against asceticism and to demand that the rich be "rich in good deeds, liberal and generous."

C. Hebrews. Hebrews describes itself as a "word of exhortation" (Gk. *paráklēsis*, 13:22), and so it is. The sustained and involved theological arguments are punctuated and climaxed by vibrant exhortations to acknowledge the truth and to act on it (2:1-4; 3:7–4:16; 5:11–6:12; 10:19-39; 12:1–13:19). The author is not interested in theological and exegetical elegance for its own sake, but for the sake of showing his readers their great privilege and the immeasurable loss that would be theirs if they were to let the passage of time, whether in hardship or in ease, weary them in their "struggle against sin" (12:5).

The theological focus is the covenant, the "second" covenant (8:7), which is "new" (8:8, 13; 9:15; 12:24) and "better" (7:22; 8:6) precisely because it is based on God's effective and "once for all" dealing with sin in Jesus Christ (7:27; 9:12, 26; 10:10). This new and better covenant is "eternal" (13:20); the old covenant is "obsolete" (8:13). The stipulations and sacrifices of the old covenant are obsolete, but a response of gratitude and worship is also required by the new covenant (12:28). In the benediction the author prays that the God who raised Jesus from the dead and so made "eternal covenant" may equip the readers "that you may do his will" (13:20f.; cf. 10:5-9). The covenant theology supports and calls for the general exhortations in the first twelve chapters, e.g., to "hold fast the confession of our hope without wavering" and "to stir up one another to love and good works" (10:23f.), which are given concrete content in ch. 13.

Chapter 13 intends to provide paradigms of new covenant gratitude and worship (12:28). The foci are brotherly love (13:1), hospitality to strangers (13:2), a sympathetic identification with the imprisoned and ill-treated (13:3; cf. 10:32-34), respect for marriage (13:4, a position contrary to both asceticism and adultery), and the freedom "from the love of money" that comes from trusting God (13:5). These duties are summarized again in 13:16, where they are identified as the "sacrifices" appropriate to the new covenant: "Do not neglect to do good and to share what you have, for such sacrifices are pleasing to God."

IV. Catholic Epistles. *–A. James.* The "letter" of James is really a parenesis, a collection of general moral instructions, often — as here — a miscellaneous collection without a single focus. James must be read and understood as such, but as such it defies systematization and summarization. The sayings are often linked merely by catchwords. The moral instructions themselves are eclectic, drawn from a variety of sources, including Greek philosophy (the parenetic form, the use of diatribe, e.g., 2:14-26 and the material in 1:13-15 and 4:12), the wisdom literature of Hellenistic Judaism, the Law and the Prophets, and the sayings of Jesus.

There is, of course, the famous polemic against "faith apart from works" (2:14-26). There can be little doubt that the author had the Pauline teaching in view (as it was used in a perverted "Paulinism," to be sure; see also 2 Pet. 3:14-17); he used the same example, Abraham, and explicitly Gen. 15:6, but the decisive evidence is linguistic — both Paul and James (and only they!) used the phrase "justified *by faith* [Gk. *ek písteōs*]." But James was hardly interested in defending a different theology of justification or a new concept of faith. Indeed, he acknowledged the important priority of God's gracious action (1:17f.). He was interested only in preventing avoidance of one's obvious duty through rationalizing. James, like Paul, wanted a faith that acts (2:22; cf. Gal. 5:6; see also Jas. 1:22-25; cf. Mt. 7:24-27). The ethical perspectives of James and Paul are neither altogether contradictory nor identical, but complementary.

The law, at least in its moral parts, was obligatory for James (1:25; 2:8-12; 4:11f.). But cultic obligations were thoroughly relativized by the overriding religious significance of morality (1:26f.). Love was a commandment "first among equals" (see 2:8-12; 4:11) and entailed impartiality (2:9).

The foci of the parenesis included admonitions to govern the tongue (1:26; 3:1-12, with echoes of instructions found in the sayings of Jesus, Hellenistic Judaism, and Stoicism; 5:12; cf. Mt. 5:7), a severe rebuke of "the rich" (1:11; 2:1-7; 5:1-6), and exhortations not to judge or boast (4:11-16).

James's interest was not a theological basis for morality or transformation of morality, but the author did identify himself as "a servant of God and of the Lord Jesus Christ" (1:1; cf. 2:1) and reminded his readers of "the coming of the Lord" (5:7f.). His coming grounds the exhortation to patience and marks the whole parenesis with urgency and stringency (cf. 1:7f., 21; 2:12f.; 4:4; 5:1, 9). If any theological focus is to be discerned, it seems to be Jesus' theme of "the great reversal" of the kingdom (cf. 2:5; 4:6-10, with its exhortations to repentance; 5:1).

B. 1 Peter. Some have identified 1 Peter with a baptismal homily. Such an identification overstates the case,

but the baptismal allusions are clear (see esp. 3:18-22) and leave their mark on the ethic of this Epistle. The readers are "newborn babes" (2:2); they have been "born anew to a living hope through the resurrection of Jesus Christ from the dead" (1:3; cf. 2:23). This is cause for great joy (1:6), but "now" (1:6; 3:21) it is also reason to "be sober, set your hope fully upon the grace that is coming to you at the revelation of Jesus Christ" (1:13). This jubilation and sobriety in response to God's eschatological action in Jesus Christ correspond to Paul's indicative and imperative. The newborn are exhorted to be "obedient children," not to be "conformed to the passions of your former ignorance" (1:14). They are incorporated into Christ and into a new society (2:4-10). This affects their identity and their perspective on the world (they are "aliens and exiles," 2:11). Their character and conduct are no longer to be marked by "the futile ways inherited from your fathers" (1:18) or "the passions of the flesh" (2:11; 4:1-3 — note the proximity of indicative and imperative), but by brotherly love (1:22 — again, proximity of indicative and imperative; 2:17; 3:8; 4:8).

The *Haustafel* is here set in an eschatological context (2:11) and makes "good conduct" serviceable to the missionary enterprise of the Church (2:12; cf. 2:15; 3:1f.). The traditional exhortation to be subject to civil authorities is balanced by the exhortation to freedom (2:16) and the recognition of God's greater authority (2:16f.). Similarly the exhortation to women (3:1-6; the advice about adornment and submission, vv. 3-6, is quite traditional) is balanced by an exhortation to men to treat "the weaker sex" with consideration and honor as "joint heirs" (3:7). The exhortation to slaves to be submissive is not balanced by any appeal to masters to recognize one impartial Master, but it is the occasion for introducing the important theme of the example of (and participation in) Christ's sufferings (2:21-24; see also 3:9; 4:1,13, where it is used to encourage perseverance in the midst of persecution). That theme contains the expectation of vindication and blessing, and the slaves may, like Jesus, trust "him who judges justly" (2:23).

C. 2 Peter and Jude. These two Epistles both ardently defend orthodoxy and morality against the heretics who "promise freedom" (2 Pet. 2:19) but "pervert the grace of our God into licentiousness" (Jude 4) and scoff at "the promise of his coming" (2 Pet. 3:4). This abandonment of orthodoxy and morality only renders these heretics "creatures of instinct" (2 Pet. 2:12; Jude 10) and proves the imminence of the coming of the Lord (Jude 18). God's judgment is sure; that hope gives urgency to "lives of holiness and godliness" (2 Pet. 3:11-14).

V. Johannine Literature.–A. The Gospel and Epistles. The Gospel of John has sometimes been accused of anti-Semitism, and indeed uses the term "the Jews" pejoratively (in many of its nearly seventy occurrences). But this Gospel never draws a contrast between "the Jews" and "the Gentiles" (indeed, Gk. *tá éthnē* never occurs in either the Gospel or the Epistles). The only Gentile who figures in the narrative is Pilate, and he is clearly an outsider (18:35; compare the Synoptic Gospels, in which Gentiles are continually pressing their way into the narrative). Nowhere is the heritage of the Jews given to the Gentiles (note the contrast in John's and Paul's treatments of the vine, an old image for Israel, Jn. 15:1-8; Rom. 11:17-24). "The Jews" are contrasted with "the Jews who had believed" (8:31; 11:45; 12:42; etc.), not non-Jews. If "the Jews" are criticized, they are criticized from within Judaism. Far from anti-Semitic, John's Gospel is perhaps the most Semitic of our Gospels. The crisis he addressed was a crisis within Judaism. For John, Jews stood at a choice between light and darkness, truth and falsehood, life and death; that choice was being made in their response to their Messiah.

The ethics must also be understood against this Jewish background. The law apparently still stands. But as the eschatological prophet (in John, Jesus is the prophet, not John the Baptist! [1:21,25; 4:19; 7:40; 9:17]), Jesus renders final judgment about the requirements of the law. He discards the ritual requirements in favor of "worship in spirit and in truth" (4:19-24). He subordinates sabbath observance to His work of healing (5:9b-18; 7:22-24; 9:13-34). In all this Moses remains an authority, but not one to be used independently of, or in judgment against, Jesus (cf. also 5:39-47).

The focus of John's ethics, however, is not the law or its messianic interpretation. The focus is Christ and the "life in his name" (Jn. 20:31; 10:10; etc.). Christ is the great revelation of God's love (Jn. 3:16; 1 Jn. 4:9; etc.), as both a gift and a demand. John's narrative of the cross is unique and arresting in its description of Jesus' crucifixion as His exaltation (3:14; 8:28; 12:32, 34). He is exalted not after but precisely in the self-sacrificing love of the cross (e.g., 15:13). The narrative turns conventional judgments of glory upside down, and that glory of humble service and love is what is shared with His followers (17:22) as indicative and imperative. Christ Himself is exemplar (1 Jn. 2:6) and teacher (1 Jn. 3:24). But all of this, God's act of love in Christ, Christ's example (e.g., the footwashing, Jn. 13:14f.), and His teaching, is concentrated in a single command, "that you love one another" (Jn. 13:34; 15:12, 17; 1 Jn. 3:11,23; 4:11f.; 2 Jn. 5f.; etc.). This commandment is "a new commandment" (Jn. 13:34; 1 Jn. 2:8) precisely because of the christological and eschatological basis, a basis signed in the addition "as I have loved you." In the Epistles, however, it is also emphasized that the commandment is "old" (1 Jn. 2:7; cf. 2 Jn. 5), precisely because the new community is not seen over against the old covenant but in continuity with it and its "commandments" (see esp. 2 Jn. 5f., but also 1 Jn. 2:3-8; 3:22-24; 4:21–5:3).

The commandment to love one another surely focuses on relations within the community, but a focus is not a restriction. 1 Jn. 3:11-18 makes it quite plain that the duty of love extends to those outside the community (the contrast in vv. 13f., e.g., would be quite unintelligible if love were restricted to members of one's own community) and to concrete deeds of service to people in need (vv. 17f.).

B. Revelation. The apocalyptic character of Revelation is unmistakable; it is not to be overlooked, however, that the apocalypse is put into the form of a letter (cf. the opening in 1:4-7 and the closing in 22:21). Revelation was concrete pastoral encouragement and exhortation to churches in Asia Minor who found themselves in persecution. The confidence that God has acted, is acting, and will act eschatologically in Jesus Christ was the basis of this encouragement and exhortation. The seven letters to the churches (2:1–3:22) demonstrate the pattern of Revelation's ethics. After being introduced by an identical command to write (2:1, 8, 12, 18; 3:1, 7, 14), each letter identifies the speaker, and although a great variety of images is used (each relevant to the particular encouragement and exhortation to follow), each identification of the speaker acknowledges the unlimited lordship of Christ. There follows in each case (2:2,9,13,19; 3:1,8,15) Christ's discernment of the church's conduct and character, His verdict on it, and His command to it. These sections were each no doubt relevant to the concrete situation of the particular churches, but the encouragement and exhortation were also intended to be universally relevant (cf. the formula, "He who has an ear, let him hear what the Spirit

says to the churches" in 2:7, 11, 17, 29; 3:6, 13, 22). The focus in each case is life in conformity with the work of Christ, especially "patient endurance" (2:2f., 13, 19; 3:10f.). The need for patient endurance arose because of persecutions by Roman emperor and Jewish synagogue (2:9; 3:9), temptations to immorality (2:14, 20f.; 3:4), and indeed the seductions of ease (3:17). There is, finally, in each of the letters, a promise of a share in Christ's victory (2:7, 11, 17, 26-28; 3:5, 12, 21; the images return in the last two chapters of Revelation). From the very beginning the criterion upon which the commendations and commands were based needed no defense; it was established in God's vindication of Christ's work and accepted by the churches in their worship of Him. With John they "share . . . in Jesus the tribulation and the kingdom and the patient endurance" (1:9).

The remainder of the book is a series of apocalyptic visions developing the promise of the victory already assured in the enthronement of the Lamb that was slain (chs. 4–5). This victory involved them then in martyrdom and agony (2:13; 6:9; 13:15; 17:6; 20:4), in conflict with the satanic power exercised in imperial might and its totalitarian and religious claims (ch. 13). Such power could be resisted only in the victory assured in the past and promised in the future and expressed even then in loyal endurance (13:10; 14:12; see also 14:13; 15:2-4). It is a victory that involved them then in a spiritual exodus from "Babylon," fallen and to fall (ch. 18). The immorality of "Babylon" was exercised in Roman cities, but the Lord had won a great victory and established a new kingdom. The certainty of Babylon's doom and the Lord's victory was both encouragement (the funeral dirge, ch. 18, becomes "alleluia" in 19:1) and exhortation ("Come out of her, my people," 18:4). The exodus required is from the demonic values, the pride of power (18:3, 9f.), and the greed (18:3, 11-19) that marked her life and justified her doom. That exodus could be undertaken only in the assurance of a new city, a holy city, new Jerusalem, where "they shall be his people" (21:2-4).

PHILOSOPHICAL ETHICS

I. Nature and Function
II. History
  A. Classical Period
  B. Patristic and Medieval Christianity
  C. Modern Period
III. Conclusion

I. Nature and Function.–All cultures and religions have customs, practices, traditions, and modes of conduct. In this sense ethics is universal. Nevertheless, while maxims and adages regarding the proper way to act are common, not everywhere has there been more detailed and scientific reflection on human behavior. When this happens, as it did in ancient Greece, the result is ethics in the narrower sense of a philosophical inquiry into conduct in the context of a corresponding philosophical system.

In Greece, of course, "ethics" originally had the general sense of customs. Latin *mos* (pl. *mores*, from which Eng. "morality" derives) bears a similar sense. When thoughtful people began to question traditional modes of behavior in the light of new situations, interests, and concerns, this questioning took three related forms, which have become normative in ethical discussion. First, what is the basis of the action? On what ground ought one to do this action and not do another? Second, what is the criterion of evaluation? Is there some absolute or only a relative rule or principle by which to judge? Third, what is the goal of human conduct? What end or ends should actions serve? The link between the three questions is apparent, for the basis, norm, and goal might easily be the same.

Since ethics deals with ends and norms, the propriety of its description as a science has sometimes been challenged. If the procedures of natural science are regarded as criteria which all intellectual disciplines must meet in order to earn the title of science, ethics can be quickly eliminated. Predictability is certainly not possible in view of the variable human factors, and verification by experiment is obviously ruled out. Nor can an evaluative factor be eliminated from ethics, for by its very nature it puts the question, not merely of what we do, but also of what we ought to do. To assign ethics a purely descriptive role is to empty it of its main interest and content. The volitional element (the "will"), which must certainly be presupposed or taken into account in ethical study, also militates against the "scientific" character of ethics in a narrower definition of the term science. Nevertheless, ethics as an intellectual discipline can meet two of the fundamental requirements of science in the broader sense: it can adopt the necessary academic rigor, and it can let itself be controlled by its object. Ethics may rightly be numbered among the humane sciences.

How far philosophical ethics has a valid function, at least in the Church, has been a matter of considerable debate. Undoubtedly Christian ethics with its distinctive theological foundation must take a different course. Yet even in so doing it must be aware that philosophy, too, is concerned about the question of human conduct and is pursuing its own line of investigation and recommendation. It may be that, both negatively and positively, certain things can be learned from this parallel discussion. It may be that some Christians should actively participate in philosophical ethics as they do in other branches of human learning and inquiry. It may be that all Christians should have some knowledge of philosophical, and more recently sociological and anthropological, developments insofar as these exert a strong and pervasive influence on contemporary thinking and conduct which even Christians cannot wholly escape. If the Church must avoid the temptation to commingle theological and philosophical ethics, it can hardly afford to turn a blind eye to philosophical ethics and treat it as nonexistent.

II. History.–*A. Classical Period. 1. Socrates.* The study of ethics originated in Greece during the 5th cent. B.C. with the protest of the Sophists against established habits and traditions (*ethikā*). The attack on these practices went hand in hand with the decay of the religious and poetic beliefs on which they rested and the accompanying change in intellectual and educational life. The Sophists themselves were unable to follow up their attack, for they talked in abstractions that had little practical application. Socrates seems to have been the thinker who tried to show, not only what form conduct should take, but also what the goal of action should be, and the means of effecting it. Ignorance, he believed, lies behind wrong conduct and gives rise to disputes concerning right and wrong. The exposure of ignorance is thus an essential ethical task. All people want the good, but they do not achieve it because they do not know it. Knowledge is the basis of right conduct. Knowledge of what? Not of moral rules but of the true nature of pleasure or happiness which, as Socrates

sees it, is the goal of life, the good. All people want the good because they want happiness. But true happiness cannot be had without knowledge. Once it is known, the good will be both sought and done.

2. Plato. In his earlier period, when he was more strongly under the influence of Socrates, Plato accepted the thesis that pleasure constitutes the good. Hence right conduct will be that which brings pleasure and the art of ethics is discovering what this is. After Socrates' death, and with his Italian journey, Plato moved over to Pythagorean views which confirmed him in the belief in immortality and helped to give his thinking a broader social and cosmic aspect. As he now saw it, there are two worlds, the one the prototype of the other. Man belongs to both worlds, that of ideas and that of sense. What gives pleasure merely to the senses can no longer be regarded as the good, since sensation ties us to the lower world from which our higher being seeks to escape. Asceticism thus replaces an earlier hedonism. Plato, however, did not become a simple dualist. In his *Republic* he postulated a threefold division of the soul with desire at the lowest level, the affective element in the middle, and reason at the top. For each of the levels he found an appropriate virtue, temperance for the first, courage for the second, and wisdom for the third. Justice, somewhat in the sense of "to each his own," constitutes a fourth virtue, that of letting each division pursue its own end in such a way that harmony results. Evil arises not out of ignorance alone, but out of disorder, the disruption of inner harmony. This may be seen politically as well as individually, for Plato applied the three virtues to the three classes of merchants, soldiers, and philosopher-rulers, with justice again as the harmony of the three. Like Socrates, Plato saw no serious impediment to the willing of the good. Once it is truly known, to choose it should present no problem.

3. Aristotle. Aristotle, a pupil of Plato, did not show the same concern for immortality as his mentor did. He had a stronger interest in man in his distinctiveness as a social being. Ethics, then, had to do with social customs and conduct. The problem of ethics as he understood it was still that of the good that should inform such conduct and customs, but in order to discover this he engaged in a more exact and detailed investigation. For Aristotle the good is the ultimate purpose behind every lesser purpose in life. He accepted an equation of this purpose with happiness, but he rejected the simple equation of happiness and pleasure. Happiness relates to the nature and function of man, not that which he shares with other creatures, but that which is distinctive to him and consists in his rationality. The good may thus be defined as activity, or, more specifically, as "the activity of the soul in accordance with reason" (*Eth. Nic.* i.5).

In the moral sphere the means to attain the good is habit. Here as elsewhere, Aristotle believed, practice makes perfect. Habit produces character. In contrast to Luther's famous dictum, attention does not focus on the person doing the acts but on the acts constituting the person. The norm or goal of moral action is to be found in the mean between extremes. Each extreme has its opposite, and excess will always fall short of the good. Too much prudence, for example, is just as bad as too much rashness. The mean can be achieved by counterbalancing one's inclination to the extreme either on the right hand or the left.

In the intellectual sphere, which as that of reason is higher than the moral sphere, happiness is attained in the supreme activity of contemplation. This bears no necessary relation except to the self and it also constitutes an end in itself, not an end which might also be a means. It thus comes closest to what is immortal and divine.

ETHICS: PHILOSOPHICAL ETHICS

Aristotle recognized that education and favorable circumstances are conducive to virtue. He also perceived that some actions are involuntary, whether through ignorance or coercion. He conceded that even voluntary actions do not always involve deliberation and choice. Nevertheless, he contended for an area in which man can exercise deliberate choice, namely, the area in which the moving principle is the agent himself. Since deliberation and choice relate to purpose, they play an important role in his conception of moral and intellectual virtue. They also imply the ability of some people at least to achieve such virtue, although by its very nature Aristotle's ethics, like his politics, is aristocratic, not democratic, in both its conception and execution.

4. Epicureans. Epicureanism is popularly associated with the pursuit of sensuous pleasure. In fact, Epicurus himself (342-270 B.C.) set out to correct the licentiousness of the Cyrenaics. He certainly adopted pleasure as the supreme good, but, as he saw it, true pleasure can be attained only by living prudently and honorably, reducing desire, and avoiding pain. The Epicurean attitude to religion, which does not postulate the non-existence of the gods but their practical irrelevance, is shaped by the belief that religion causes evil and unhappiness. Even though the Epicurean system might suggest materialistic determinism, a certain freedom is reserved in it for the moral will. The difficulty in defining pleasure is what leaves the door open for the association of Epicureanism and sensuous living. If enjoyment is thought to constitute the norm and goal of conduct, then anything may be done so long as it does not entail pain or disturbance.

5. Stoics. Founded by Zeno of Citium (*ca.* 336-264 B.C.), Stoicism, too, regarded happiness as the supreme end of conduct. It equated happiness with the realization of man's natural purpose and thus arrived at the definition of good conduct as living in accordance with one's rational nature, namely, the avoiding of what is harmful and the doing of what is appropriate. The Stoics believed that happiness results when what is fitting is done, and they viewed pleasure and pain as mere accidents or incidents which the wise person will meet with indifference. Living in accordance with reason, the truly wise will achieve self-mastery and independence of earthly desires. Since this sovereignty can rise above the accidents of circumstance, the Stoics regarded it as a universal possibility binding all humanity into a single brotherhood. Of all the ethical systems of antiquity, Stoicism made perhaps the greatest appeal to the early Church because of its emphasis on moral integrity, the necessity of virtue, the joys of the inner life, and common humanity.

B. Patristic and Medieval Christianity. 1. The Early Church. The Church began its mission against the background of Greek thought and teaching. Nevertheless, its early ethical instruction gave little evidence of association with classical moral philosophy. Christianity was certainly seen as a way of life, not just a set of beliefs. The customs and conduct of Christians, however, were drawn from a different source and had a basis, norm, and goal established by the divine revelation in Christ to which their faith was directed. Justin could compare the ethical teachings of Scripture to the best insights of the philosophers, but any similarities, he suggested, arose simply because the philosophers were influenced by Moses. GNOSTICISM, of course, introduced Hellenistic ideas with related ascetic or licentious practices, but these were strongly resisted by the Church. If asceticism prospered in some orthodox circles, too, a biblical rather than a philosophical reason was found for it. At most, Clement of Alexandria introduced classical precepts into his portrayal of Christian life in his *Paedagogus*, but even here the

ultimate source seemed to be theological, not philosophical. Elsewhere, ethics denoted rules of Christian living either in the ecclesiastical world in general or in the monastic world in particular. Ambrose adopted some ideas of Cicero in his *On the Duties of the Clergy* (i.30, 50) but no need was seen for a specific philosophical investigation.

2. Augustine. In view of his evident Neo-Platonic leanings, Augustine has sometimes been presented as a bridge-builder between Christian theology and classical ethical inquiry. It can hardly be disputed that he appropriated many of the terms and concepts of philosophical ethics. Thus he referred consistently to the good as the supreme goal to which knowledge is subject. He found a progression from thought to action and from action to contemplation. Yet one should remember that Augustine did not address himself directly to the ethical question as such. If he spoke of the good, he always equated it, not with an abstraction, but with the known God of revelation. In contrast to the classical ethicists, he did not find in sinful man the freedom to achieve moral goodness by knowledge, choice, or practice. He identified love — the love of God graciously shed abroad in the heart by the Holy Spirit — as the motive power of true righteousness. For all the philosophical influences, Augustine seems to have been primarily a theologian. He might borrow thoughts and expressions from pagan ethicists but his own ethical reflections had finally a source in dogma.

3. Medieval Church. Legalism, not philosophical instruction, posed perhaps the most serious challenge to ethics in the Middle Ages. Original lists of customs and duties, partly collected already in the Apostolic Constitutions, achieved elaborate codification in Gratian's *Decretum* (*ca.* 1140). The developing church courts provided a powerful means of enforcement. While it was not intended that either theologically or personally the Christian way of life should be severed from its root, only too often this was the unhappy consequence. Ethics codified as law necessarily gave rise to "cases," and casuistry inevitably developed as an important and at times confusing branch of moral science with the possibility of rigid, moderate, or elastic interpretations.

Classical learning did not wither away, of course, even in the so-called Dark Ages. In the Carolingian renaissance Alcuin of York (735-804) included in his many works a significant treatise entitled *Virtues and Vices.* Abelard (1079-1142) contributed an ethical work and not merely his unsatisfactory ethical conduct to the twelfth-century scene. Under the title *Ethica,* or *Scito te ipsum* (*Know Thyself*), this work explored the importance of intention in moral acts. Lombard, too, has an ethical section in his famous *Sentences.*

4. Aquinas. Aquinas holds special interest because of his respect for Aristotle, his work in the development of a philosophical methodology in theological inquiry, and his influence on later Christian thinking. At three points he imported classical ideas into his substantially biblical presentation. First, he acknowledged a natural inclination to the good, or at least to individual goods, with a certain freedom of rational and volitional choice, although not to the point of a Pelagian freedom from the bondage of sin apart from special grace. Second, he accepted the place of habits, which, he believed, imply order in action and are necessary. Here again, however, he did not agree that habits can bring virtue unless they be the habits graciously implanted by God. Finally, he found a place for natural as distinct from both eternal and civil law. Natural law is a rule based on reason with the common good as its goal. It is natural inasmuch as the eternal law has been indelibly inscribed on the heart of man (cf. Rom. 1–2) and may be known by self-investigation. Aquinas did not conclude, however, that to know natural law is to know eternal law. As God's will cannot be done without grace, so it is not finally known without revelation. Thus the so-called theological virtues of faith, hope, and love, which form the apex of Christian morality, are known and given to us only by God's gracious word and work in Jesus Christ.

C. Modern Period. 1. British Hedonism. The Reformation brought with it a new surge of biblical and theological ethics, although not without a continuing philosophical interest in some thinkers. By the 17th cent. this surge had partly exhausted itself and in England especially a new attempt was made to put ethics on a scientific basis. In the work of Thomas Hobbes this led to a revival of the ancient idea that, since all people are motivated by self-interest, personal pleasure will have to be the norm and goal of action. Hobbes did not claim that this ought to be so but recognized that in fact it is. In his political theory he thus advocated authoritarianism on the ground that this offers the best safeguard for the achievement of pleasure.

2. Intuitionism. In reaction to both the teaching and the methodology of Hobbes many English moralists tried to find a higher principle of conduct and also a form of ethical imperative. Cudworth returned to the Platonic concept of ideas but the more common trend was toward a type of moral intuitionism. More, for example, argued that we instinctively know certain things to be right, and Shaftesbury and Hutcheson pointed out that variations in moral evaluation all rest on a general sense of what is good and bad. Butler related this intuition more specifically to conscience, although he tried to give it a more factual basis by arguing that observation will show that people everywhere have always distinguished between right and wrong. Partly in answer to hedonism, partly to find a legitimate place for it, he believed that following conscience even when it seems to be to one's disadvantage coincides with true self-interest. Yet even if it does not, conscience should still be followed; inequities will be balanced out at the last judgment, "the final distribution of things."

3. Natural Law. Even at the time of the Reformation the idea of natural law persisted. Melanchthon, in his discussion of law in the *Loci communes,* found three forms of law: divine, human, and natural. So long as natural law was equated in some sense with the knowledge of right and wrong described in Rom. 2, and thus seen as a form of eternal law, a distinctive Christian orientation could be maintained. By the 18th cent., however, an important reversal took place among the Deists and French Rationalists. Christian ethics now came to be viewed as either a republication of natural law or a mistaken divergence from it. Thinkers like Voltaire, adopting ideas parallel to those of the intuitionists, believed that all people know by nature that some things are right and others are wrong, although ignorance, superstition, and bad teaching can obscure and pervert this knowledge. Voltaire himself thought the requirements of natural law could be reduced to a few simple virtues and argued forcefully against the "unnatural" moral teaching of the Church, which confused matters and worked against genuine morality. Proponents of a secularized natural law in this sense experienced no difficulty in thinking that people can keep this law as well as know it, although they found little to their taste in the extreme naturalism of life and conduct rhetorically advocated by Rousseau in his famous essays.

4. The Categorical Imperative. In most of the moral thinking of the 17th and 18th cents. the results of acts, whether for the self or others, formed an important element in ethics. This is one reason why observation played a big part in the systems of such diverse moralists as Hobbes and Butler. Indeed, even intuitionists and advocates of

natural law, in their positing of a general sense of right and wrong, tended to relate this in some way to the happiness which right actions would bring. In Immanuel Kant, however, a new stress came to be laid on the *a priori* character of the moral imperative. Good acts certainly should be beneficial to others. Nor did Kant oppose the legitimacy of the pursuit of happiness as a goal of life. With a stricter realism, however, he perceived that in this world personal happiness may often be incompatible with doing one's duty and in these circumstances duty must be done, i.e., the moral imperative is categorical. Like Butler, Kant believed one must postulate God and immortality in order that a right balance may finally be struck between duty and happiness. While he recognized that an evil inclination opposes the inclination toward the good, Kant, like most thinkers of his day, presupposed that the will has the power to obey the categorical ethical demand. In his *Religion Within the Limits of Reason Alone* he thus emerged as one of the most blatant Pelagians of the whole Christian epoch. Divine forgiveness, he argued, can be merited by the moral achievement of which we are capable. No thinking person can believe in vicarious atonement or free justification except perhaps as theoretical ecclesiastical doctrines. Theology can be tolerated only as it promotes virtue. For Kant the categorical imperative constituted the *a priori* which formed not only an unassailable ground of action but also the only possible basis of his minimal religion.

5. Utilitarianism. Kant undoubtedly made an impressive plea for duty but he failed to gain many adherents. Idealists like Hegel moved back quickly to the idea of personal self-development, conceived of in triadic fashion. In England the idea of happiness as the goal and norm of right action took a new form in the utilitarianism of Jeremy Bentham, John Stuart Mill, and Henry Sidgwick. Starting from the position that each individual seeks happiness, Bentham argued that there is also a general and collective happiness. Morality, then, seeks what is good not only for the individual or for other individuals but for the aggregate of all individuals. Its goal must be the greatest good for the greatest number. How is this determined? Bentham suggested certain criteria of happiness, e.g., intensity and purity, by which right action may be measured. How is it enforced? He found sanctions in the physical, political, social, and religious consequences of acts, along with the possibility of eternal punishments. As Bentham saw it, the happiness of the whole will carry with it that of the individuals who compose the whole. Empirically, however, this does not follow. For this reason Sidgwick proposed a new basis for utilitarianism in the universal view of things set before us by reason. He had to admit that without a doctrine of ultimate retribution few could be persuaded of the rationality of this collective outlook.

6. Relativism. The failure of philosophy to come up with a goal or standard whereby an act may be clearly defined as right or wrong led many ethicists into forms of relativism. John Dewey may be cited as an impressive example. For him standards of morality were like accepted weights and measures. These are convenient and necessary but they are also temporary and variable. They serve their turn and may then be discarded or replaced. No act is intrinsically good or bad. If it has a beneficial effect it is good. If it ceases to have such an effect it may no longer be regarded as good. In practice, of course, Dewey ran into difficulties when trying to work this out consistently. He obviously found it hard to think that certain acts could ever be good and thus he fell back to some degree on the old idea of human consensus. Taken strictly, his ethics would simply be a matter of conflicting opinions or even tastes, about which there can be no ultimate debate.

This seems in fact to be the position of a group of moralists of whom W. H. F. Barnes and A. J. Ayer are influential spokesmen. In their view, moral statements have only subjective validity. They do not express facts but indicate personal reactions. At the most they can aim only to win over others to one's own preference. Finally, then, they have no real basis and can have no compelling force.

Situational ethics betrays a similar relativism. Adopting only a very general principle like love, it leaves the ground clear for individual decisions about what is right, i.e., loving, in a given situation. A twofold relativism ensues. First, the general principle itself may be different for different people. Second, the situation decides to a considerable extent the course of action that may be called right according to the principle adopted. Thus what is good at one time may be bad at another and what is bad may sometimes be accepted as good. In these circumstances there can be no final arbitrament. According to his own view each will have done what is right and no criticism can have any objective or absolute validity. Ethical discussion may continue only as an exchange of views.

III. Conclusion.–In the last analysis the whole history of philosophical ethics may not incorrectly be described as a history of relativism. Many bases, standards, and goals have been proposed. Many of them carry a certain cogency. None, however, has objective authority or absolute force. Each can be a matter of debate and division. Nor indeed can any of the proposals solve the deeper problem, not only of knowing the right, but of having the power to do it. The existence of this power may be lightly assumed. The history of human ethics has lamentably failed to demonstrate it.

ETHICS AND DOGMATICS

I. The Problem
II. Scripture
III. Historical Survey
  A. Early and Medieval Church
  B. The Reformation
  C. Post-Reformation Period
  D. Liberal Theology
  E. Contemporary Theology
IV. Theological Principles
V. Conclusion

I. The Problem.–On the surface ethics and dogmatics are so closely related in Christianity that they cannot be disjoined. Christians behave the way they do because they believe the way they do. Their life of action has its root in their life in Christ. The inner motivation of love for God and commitment to Christ impels them to love their neighbors and engage in practical discipleship. Even more detailed beliefs about God and His nature and work shape their lives positively and constructively. Insofar as Christians adopt a certain life-style, whether or not it conforms to that of contemporaries, it is because they are placed under obligation to do so by their Christian understanding of God, man, the world, and the future.

ETHICS: ETHICS AND DOGMATICS

Yet is the matter quite that simple? First, ethics deals with visible acts and not just inner motivations. At this level a Christian may well do at many points precisely what a non-Christian does. Even if he does it for different reasons, the act itself can be studied independently of its motivation, and this opens the door for ethics as an autonomous discipline with its primary focus on behavior. Second, even the Christian beliefs which underlie Christian conduct do not differ totally from beliefs which underlie non-Christian ethical systems. Thus, a comparison of systems becomes possible and Christian ethics can be subsumed under general ethical and philosophical investigation. Third, Christian conduct does not consistently or absolutely express the revelation which provides its ultimate motivation but undergoes intellectual and cultural assimilation. At this level, too, ethics can break free from dogmatics and merge into a more general inquiry. Finally, the question can at least be raised whether faith does in fact provide motivation for conduct. Might it not be a subsequent rationalization of acts which are basically performed for other reasons? If so, a general anthropology can finally absorb not only ethics but biblical and dogmatic theology as well.

II. Scripture.–Scripture, of course, leaves no place for an isolation of ethics as an independent sphere of study. This comes out very clearly already in the OT. All the ethical injunctions or prohibitions in the OT are rooted in the redemptive acts of God. The preamble to the Decalogue brings this out forcefully. Israel is given these commandments by the God who has liberated it from Egypt. The covenant, too, embraces the divine initiative on the one side and the resultant and responsive human action on the other: "I will be your God and you shall be my people" (cf. Ezk. 34:30; 36:28). For the prophets, misconduct is not just ethical ignorance or weakness; it is unfaithfulness to God and His covenant. Similarly, righteousness is not a realization of human possibilities of thought and action; it is the promised covenant fulfillment. Human behavior can never be considered from any standpoint apart from the underlying and overarching relationship with God.

The NT makes the same point with equal clarity and force. Even linguistically it finds no place for an autonomous ethics in the sense of moral science. Where ethical instruction is given, as it often is, the context of the divine relationship is plain. John the Baptist calls for specific works as the fruit of repentance (Lk. 3:7-14). Jesus proclaims the ethics of the kingdom in the context of His claim to lordship and the summons to discipleship (*see* ETHICS: THE ETHICS OF JESUS). Paul opens the ethical section of Romans with a "therefore," a call to self-dedication, and a demand for transformation by the renewing of the mind (12:1f.). Ephesians grounds the manner of Christian life in the saving work of Christ and the ministry of the Spirit (chs. 4–6). As John succinctly puts it, love for God necessarily finds expression in love for neighbor, and love for God proceeds from God's love: "We love, because he first loved us" (1 Jn. 4:19).

III. Historical Survey.–A. Early and Medieval Church. The early Church took over the biblical understanding. This may be seen in the baptismal vows, where obedience came to be linked with repentance and faith. Catechetical instruction followed the same pattern; the ethical section dealt with living the new life in accordance with the revelation of God's will for His people. The Apologists, it is true, compared Christian moral teaching with that of the philosophers. Justin Martyr argued that nowhere was more lofty ethical instruction to be found. Yet, if there is any relation, it is because Plato and others originally took their teachings from Moses. Philosophical ethics, then, drew on the same source of revelation. Instead of a philosophizing of Christian ethics, the Apologists engaged in a theologizing of philosophical ethics.

The dogmaticians of the early and medieval Church were also informed by the biblical outlook and for the most part developed their ethical instruction in a dogmatic context. For early examples we may turn to the *Enchiridion* of Augustine and the *De fide orthodoxa* of John of Damascus, while Lombard's *Sentences* and Aquinas's *Summa Theologica* may be quoted from the Middle Ages. Ethics is not viewed as a separate branch of investigation and discussion, nor is it brought under a general discipline which embraces philosophical ethics on the one hand and biblical ethics on the other.

Yet, these Christian writers were not insensitive to the problems raised by the externality and visibility of Christian action and its consequent exposure to comparison with the ethical thought of pagan philosophy. An odd reflection of the former may be seen in Basil's use of the title "Ethics" for his monastic rule, although naturally the rule itself has dogmatic and biblical roots. More seriously, Gregory in his *Moralia* explored a general basis of ethics in which Aristotelian and Stoic anthropology figured prominently. Materially if not formally, a similar pattern may be found in other theologians. Thus Aquinas preserved the formal structure by including ethics within dogmatics. Yet what he had to say on the subject included a good deal of material drawn from nonbiblical sources (*see* ETHICS: PHILOSOPHICAL ETHICS II.B.4).

A separate question was raised at the same time by the increasing development, codification, and enforcement of church law (cf. Gratian's *Decretum* [*ca.* 1140]). Originally seen as an exposition of biblical law and still subordinate to it, church law tended to take on an authority of its own. It thus promoted a special type of moral theology in which detailed cases could be decided by the various ethical norms, and rules were thus set up for spiritual direction. This type of casuistry ultimately had a theological basis, but in practice it became a science of its own, drawing on various sources and modeling itself to a large extent on law rather than theology.

B. The Reformation. Reaction against theological distortions and casuistic perversions of the later Middle Ages led the sixteenth-century Reformers to a new stress on the interrelation of theology and ethics. Neither Luther nor Calvin specifically rejected the idea of an innate natural law, but the rethinking of justification and good works, along with the new understanding of renovation of life, necessarily brought Christian conduct into closer relation to Christian faith. Luther's *Sermon on Good Works,* Cranmer's *Homilies on Justification,* and the relevant sections in Calvin's *Institutes* (esp. iii.6-10, 19) offer clear illustrations. True works of righteousness derive from faith and, according to the third use of the law, may be learned only from Scripture. Christians need to learn the mind of Christ; they cannot act apart from the Word and the Spirit. Right behavior is thus inseparable from true faith. Authentically Christian ethics, then, arises only in the context of dogmatics. The development of an independent ethics could mean only (1) that salvation and the reconstruction of life may be achieved apart from faith, or (2) that faith is mere belief which, however necessary in its own place, has no life-changing effect.

Melanchthon with his humanistic leanings proved to be a partial exception to the general rule. In his *Loci communes* he showed the usual Reformation understanding; but in a later work, *Epitome of Moral Philosophy* (1538), he used Luther's old enemy Aristotle as a basis and set up

an autonomous ethics, which also did duty as a proof of God. Melanchthon was not entirely alone in taking this course. Indeed, T. Venatorius had preceded him with a work on *Christian Virtue* in 1529. Yet Melanchthon probably bears a larger share of responsibility for the development which followed.

C. Post-Reformation Period. In the main both Reformed and Lutheran orthodoxy stayed close to the chief Reformers in the handling of ethics. L. Danaeus had a special work on *Christian Ethics* (1577) and B. Keckermann a *System of Ethics* (1577); predominantly, however, the theologians still dealt with ethics within the context of dogmatics. Even W. Amesius in his *Marrow of Theology* did not depart from this, although he took the strange and radical step of defining theology as the practice of God, thereby absorbing theology into ethics.

At the same time a tendency developed to divide theology, formally at least, into theoretical on the one side and practical on the other (e.g., Polanus, Wollebius, and Amesius). Although the division makes sense and may even claim the model of Paul's Epistles, a serious problem arose with the tendency to introduce natural ethics in some way into the ethical section of dogmatics, thereby weakening the grounding of ethics in Christian theology. G. Calixtus perhaps took a logical course when he presented a completely independent ethics, *The Epitome of Moral Theology* (1634), in which he seemed to see the Decalogue as a reaffirmation of natural law. He did, of course, equate natural law with the law of creation or general revelation; but even so he prepared the ground for the later stripping away from Christian ethics — and indeed from Christianity in general — of any element of special revelation, as in English Deism.

Puritanism made its own unusual contribution to the ultimate severance of ethics from theology. Largely, it seems, in an attempt to find verification of election in changed patterns of life, the Puritans came to focus increasingly on Christian action, whether introspectively in the searching of conscience or externally in the application of discipline. While the reasons for this development were primarily theological, the result in practice was an isolation of conduct from its theological root. Hand in hand with the concept of an original covenant of works and the developing orientation to natural law, this led to a decisive shift away from the Reformation's integration of theology and ethics, even though formally the crucial doctrines of the Reformation were still held and taught.

D. Liberal Theology. Three tributaries — the rationalist, empirical, and emotional — flowed together to form the mainstream of modern liberal theology. Each helped to dissociate ethics and dogmatics. Rationalism distrusted dogmatics, had a philosophical orientation, and tended to seek an ultimate criterion in rational conduct. Empiricism brought with it an anthropological and sociological interest which concentrated on human phenomena rather than theological origination. Emotionalism in its romantic form focused on the individual, had no primary concern for moral action, and made the religious *a priori* in man its point of departure; thus little place remained for dogmatics except in an anthropocentric sense.

Rational-empirical ethicism found its natural culmination in I. Kant's *Religion Within the Limits of Reason Alone*. Here dogmatic theology is allowed a place, but it proves to be completely irrelevant to true religion, which derives from the moral imperative and has a strictly ethical orientation. At most man needs only an example of right conduct and earned forgiveness for his mistakes on the way to moral perfection. For Kant ethics itself plays the role of an independent *a priori*. Being self-grounded, it obviously rests on nothing else. Intermingling ethics with dogmatics can lead only to unethical confusion and hampering of the ethical pursuit which is real religion. (*See* ETHICS: PHILOSOPHICAL ETHICS II.C.4.)

Romantic emotionalism as expressed by Schleiermacher offered the fine principle that "the doctrine of Christian ethics is the doctrine of faith," for "is not also Christian doctrine ethical doctrine?" (*Die christliche Sitte* [1843]). Schleiermacher offered primarily a religion of feeling rather than of thinking and doing. He saw, however, that feeling results in thinking and doing, and along these lines he found a relation between theology and ethics. Unfortunately, theology for him amounted to little more than a description of pious states. Piety, which is innate in us, forms the basis. In the larger sense, then, Christian conduct rests on an anthropocentric understanding rather than the revelation of God in word and work. Ethics stands related to religion. It even stands related to a type of theology. But it does not stand related to Christian theology in the strict sense.

The more purely ethical component found a representative in R. Rothe. Rothe boldly and logically developed what he regarded as a theological ethics. Yet in his presentation doctrine seems to be dissolved in cultural science. The primarily phenomenological approach leaves no place for authentic dogmatics. Thus, the interrelating of ethics and theology, while seriously meant, has no authenticity unless one accepts the liberal redefinition of theology.

Nineteenth-century theology retained an awareness of the problem and made various attempts at true unification, including those of J. C. Nitzsch (1828) and, in the early 20th cent., H. H. Wendt (1906). Perhaps the most impressive and effective effort along those lines was that of M. Kähler in his *Wissenschaft der christlichen Lehre* (1883). But even for Kähler, the center and starting-point is mankind, not the divine revelation in Jesus Christ. Thus, theological ethics is still the ethics of liberal theology; a true grounding of ethics in Christian dogmatics is not achieved.

E. Contemporary Theology. In his monumental *Church Dogmatics* (I/2 § 22, 3) Karl Barth began with the principle that dogmatics always involves ethics and vice versa. This led him to incisive criticism of the sixteenth- and seventeenth-century dogmaticians who prepared the way both for separation and for misunderstanding of dogmatics itself. In this regard he asked a series of probing questions. How could Venatorius first describe Christian faith as faith in Christ and then go on to speak, in a highly unbiblical sense, of Christian virtue? How could Polanus and Wollebius, while including ethics in dogmatics, effect a separation of discussion which so easily implies or entails material separation? Why was a door left open for the smuggling in of the principles and themes of philosophical ethics when what was supposedly being attempted was an orthodox theology of revelation?

When he turned to the 19th and early 20th cents. Barth's questions took on an even sharper edge. He asked C. Palmer (*Die Moral des Christentums* [1864]) how doctrine could be defined as what God has done and morality as what we must do. He asked A. Ritschl (*Rechtfertigung und Versöhnung*, III [1875]) how doctrine could be viewed as God's effectual working and ethics as a scheme of independent personal activity. He asked T. Häring (*Das christliche Leben* [1907]) how a distinction could be made between doctrine as a gift becoming a possession through faith and ethics as a task for which we have power in faith. He asked O. Kirn (*Grundriss der theologischen Ethik* [1906]) how doctrine as reception could be differentiated

from ethics as spontaneity. Finally, he asked C. Stange (*Dogmatik* [1927]) how both doctrine and ethics could be brought into correspondence with religion in general, the former as its supposed essence and the latter as its supposed effects.

Obviously the detailed descriptions matter little here. The core of Barth's objection lay in the detachment of the Christian from Christ in ethical matters. Since the Christian life is, and has to be, life in Christ, at no point can what God does yield to what we do, nor gift lead simply to task. Such concepts as action, task, and spontaneity have a certain validity, but not when they entail isolation from the all-embracing act of divine salvation fulfilled by God through His Son and Spirit. The Christian life and our understanding of it must rest in the divine word and work which are the true theme of theology.

On the proper interrelating of ethics and dogmatics, Barth made three main points. First, the Christian can be the theme of neither theology nor ethics except as he is seen in Christ. This necessarily implies that ethics has a christological root and center. When this is changed the true basis of ethics is lost and another foundation has to be sought, i.e., in philosophical ethics. Second, theology focuses on the Word of God. Very explicitly, however, the Word itself demands doing as well as hearing. This applies not merely in matters of sin, law, and sanctification, but at every point. For the Christian, then, ethics arises within the context of the Word of God and the Church's resultant word about God. Ethics belongs necessarily to theology. Third, ethics is not merely bound up with theology; it is itself theology just as theology is ethics. Barth thought this would be brought out best by making ethics an integral part of dogmatic presentation. Yet it did not have to be this. A dogmatics might well be written with no explicit ethics or an ethics with no explicit theology. But, if authentic, the dogmatics would still be ethics too, and the ethics dogmatics.

Various attempts have been made at a truly theological ethics in recent decades. Brunner's *Divine Imperative* (Eng. tr. 1937) and Bonhoeffer's *Ethics* (1955) both try, in different ways, to solve the problem of natural law by bringing the related themes under the doctrine of creation. The concept of orders figures prominently in this understanding, although the question arises whether many of the orders should not be described as orders of the fall rather than of creation. Along similar lines, Dutch theologians in particular have explored the possibility of bringing all philosophical ethics under a theological rubric through the concept of common grace (e.g., A. Kuyper, *Calvinism* [1899]). On this view the truth in human systems does not derive from the unaided nature of fallen humanity but from the divine work, either in an original general revelation or in the common operation of the Spirit, even in those to whom revelation and salvation have not yet come. H. Thielicke has offered a detailed discussion of the whole question in his *Theological Ethics* (Eng. tr. 1966). In the Prolegomena he discusses issues such as the relation between indicative and imperative, the Lutheran view of spontaneity, the problematic nature of casuistry, the "two kingdoms" teaching of Luther, the scholastic approach to natural law, and the role of the Ten Commandments and the Sermon on the Mount in a fallen world. Later volumes illustrate the outworking of theological ethics in such varied fields as politics, aesthetics, and sex.

In America Reinhold Niebuhr, author of *Interpretation of Christian Ethics* (2nd ed. 1963), *Nature and Destiny of Man* (2nd ed. 1963-1964), and *The Children of Light and the Children of Darkness* (1944), presented ethics from a theological perspective. Like Barth, he objected to humanistic ethics and the separation of ethics from Christian faith. Jacques Ellul's *Ethics of Freedom* (1976) provides another example of ethics on a theological foundation.

Barth himself, although unable to finish his ethical chapters in *CD*, did at least develop his methodology and make an impressive material start in the early volumes. In the Prolegomena (I/1 and 2) he has his study of the place of ethics in theology. He also includes a brief ethical discussion in the great chapter on the trinity. Then in II/2, which deals with the divine election and command within the doctrine of God, he lays a theological basis for ethics by bringing both election and command together as twin aspects of the covenant of grace made and fulfilled in Jesus Christ. III/4 forms the ethical chapter of the doctrine of God the Creator, and here, with the Decalogue as a guide, Barth uses criteria from the theology of creation to bring out the Christian implications of love of God and love of neighbor in relation to pressing contemporary problems such as war, suicide, abortion, the family, and sex. Similar chapters were planned for the doctrine of reconciliation (Vol. IV) and the doctrine of redemption (Vol. V), but Barth did not live to complete IV/4 or to write any of V.

IV. Theological Principles.–In any theological development of ethics certain principles must be taken into account. They can be worked out in various ways, but they play a fundamental part in any authentically Christian ethics.

First, God Himself is the ground of right human action. He is this in His very being as God — the God in whose image we were created. He is this in His sovereign will for us, expressed in the covenant and expressly stated in His commandments. He is this as the Creator, who establishes human life and its nature and destiny; as the Redeemer, who brings men and women back to Himself in reconciliation and renewal; and as the Consummator, who is effecting our continuing renovation in the image of Christ and who will achieve its definitive fulfillment at the resurrection. He is known to us as the ground of our true being and conduct through His self-revelation in Jesus Christ, according to the inspired testimony of Holy Scripture.

Second, God Himself, as ground, is also the norm of right human action. Created in the image of God, we are to be as God is and to act as He acts (cf. Lev. 11:44; Mt. 5:43-48 par.; 1 Pet. 1:15). In order that we might have a sense of right and wrong, God wrote on our hearts what the law requires and gave us conscience as a witness (Rom. 2:15). When sin intervened, He gave us His law in the moral commandments, which bear testimony to what He demands from those whom He has redeemed (Ex. 20:1-17). Finally, He sent His Son, Jesus Christ, who radicalized the law by demanding purity of inner motivation (Mt. 5:21-48), and who at the same time provided a model of authentic humanity by fulfilling it. Christian ethics, then, is the ethics of transformation into the likeness of Christ (Rom. 8:29; 12:1f.), who, being Himself the express image of God (Col. 1:15; He. 1:3), came down for us in the likeness of man (Rom. 8:3; Phil. 2:7). Holy Scripture as the record of God's word and work constitutes the functioning norm whereby the will of God for us, both in His commandments and in His Son, is presented to us, and whereby our own acts may consequently be directed, evaluated, and corrected.

Third, God Himself, as ground and norm, is the power of right human action. Although systems of philosophical ethics may contain useful insights, they all break down at the decisive point of achievement. Their only alternative to devastating pessimism, expressed in attempted ethics of self-interest, is a naive and ungrounded optimism about

human capability or even perfectibility. The gospel frankly admits — indeed, it proclaims — the impotence of human beings to fulfil the divine commandments. Nevertheless, it heralds a new beginning with the justification of sinners by Jesus Christ, the regenerative ministry of the Holy Spirit, the movement of repentance and faith from which spring authentic works of righteousness ordained by God, and the grateful love of believers which responds spontaneously to God's loving grace. The love of God "poured into our hearts through the Holy Spirit" (Rom. 5:5) achieves the necessary purification of motive; the new life given by God constitutes the driving force for the doing of what is right (cf. 1 Jn. 3:9); and Holy Scripture serves both as the Word of God by which renewal comes and as the guide by which the right that corresponds to God's sovereign will may be discerned.

Fourth, God Himself, as ground, norm, and power, is the goal and purpose of right human conduct. As we are from Him and by Him, so we are to Him. According to His self-revelation God is to be glorified in His creation. Thus the praise of God constitutes the ultimate ethical purpose. God is praised as His will is done. Obedience is thus the means to achieve the goal. Nevertheless, God's glory does not stand alone; for the glory of God means also the glorifying of the creature (Rom. 8:17, 30; cf. 2 Cor. 3:18). This glorifying is linked with the "spirit of sonship" that is given to all children of God who through right action are joined to Christ (Rom. 8:15-17). Human beings are thus brought into union with God both in being and in act — a union that embraces union with fellow believers (e.g., Eph. 4:4-16). In the obedient doing of the will of God is achieved the authentic humanity, or being in the divine image, which God planned for men and women in His creative work. Since the divine mandate at creation included also dominion over other creatures (Gen. 1:26), the proper ordering and curatorship of the physical environment forms part of theological ethics according to its goal in God (cf. Rom. 8:18-22). In relation to goal as well as to ground, norm, and power, Holy Scripture plays a key role, for it is only through the inspired record that God as the goal of human action may be known and accepted, with all that this implies for the direction of life, the course and validity of right action, and the destiny of those who commit themselves to God as their all in all.

V. Conclusion.–As we have seen, there is no biblical justification for a separation of ethics from dogmatics, especially when human philosophy takes the place that biblical theology should occupy, or when the moral teaching of Christianity is seen simply as a promulgation of natural law. Nor does the Bible leave any place for a two-tier structure in which philosophical ethics, even in the form of general revelation or a common work of the Spirit, forms the foundation and the ethics of special revelation the superstructure. Biblical ethics appears consistently as the ethics of special revelation, not of human ratiocination.

On the other hand, philosophical ethics is a fact, and one need not conclude that philosophical ethics and theological ethics stand in complete isolation from one another. Obviously, many of the recommended actions coincide, even if motives and reasons differ. Hence at the very least comparison and contrast are not to be ruled out. Beyond that, a theological interpretation of the existence and nature of philosophical ethics can hardly be viewed as illegitimate. From this standpoint there is room for investigation along the lines of the doctrines of creation, general revelation, and common grace. Danger arises, of course, when this type of work is done in such a way that an alliance is sought between philosophical and theological ethics or the latter is diminished or even dissolved altogether in the former. For this reason it is essential that the biblical norm be taken seriously and the integral relation between ethics and dogmatics not be forgotten. What is sought is an integration of philosophical ethics itself into a theological understanding.

G. W. BROMILEY

Modern Problems

In Christian tradition the Bible is authoritative for morals as it is for faith. In situations that have no biblical precedent, however, it is not self-evident how the Bible's moral teachings are to be applied. The understanding of how the ancient biblical moral standards bear on uniquely modern problems is, therefore, a continuing task for the Christian community. The purpose of this article is to show how the Bible's moral teaching might be pertinent to one illustrative set of moral problems that has arisen in modern times, in the area of medical science.

I. Biblical Morality
II. The Bible and Medical Technology
  A. Life-prolonging Techniques
  B. Life-changing Techniques
  C. Life-determining Techniques
III. Summary

I. Biblical Morality.–Prior to a consideration of specific problems, some general comments on how the Bible teaches morality are in order. (1) The Bible's directions for the moral life are varied. The Bible contains clear moral precepts and norms, the Decalogue being the best known — but not the only — set of moral laws (Ex. 20, Dt. 5). But morality is also taught through living examples (unique among which is the life of Jesus Christ), through parables and stories (the parable of the Good Samaritan [Lk. 10:29-37] teaches a moral lesson more vividly than moral rules), and, to mention but one other, through the great and decisive events of redemption (the cross of Christ, when accepted analogously as one's own cross, has deep moral implications for the Christian's pilgrimage).

(2) The Bible writers expected Christian people to be led by the Spirit in their search for the morally right decision in a morally difficult situation. Paul prayed that the Colossian Christians would "be filled with the knowledge of his will in all spiritual wisdom and understanding, to lead a life worthy of the Lord . . ." (Col. 1:9f.). He prayed similarly for the Ephesian Christians that God would give them "a spirit of wisdom" (Eph. 1:17). The gift of the "spirit of wisdom" — in answer to prayer — suggests strongly that members of the believing community are expected not only to deduce the will of God from the texts but to pray and counsel together for spiritual understanding of moral issues and to expect guidance in their decisions. The need for spiritual wisdom suggests the need for insight into the realities of a new situation and an ability to calculate the moral importance of the various factors in the situation.

(3) The total biblical message of God's creation and redemption provides for the believer a certain way of looking at and evaluating what is at stake in moral problems. For instance, the belief that every person exists by virtue of God's care, is an image-bearer of God, and has an eternal destiny, compels the Christian to view every person's life as having such value that it demands respect, care, protection, and support from the human community. To view human life in this way provides a profound moral bias with respect to such issues as euthanasia, abortion, capital punishment, and war. That every person is called by Jesus Christ to enter the kingdom of God through faith likewise provides a perspective on persons: every person is seen as open to God's redemptive

ETHICS: MODERN PROBLEMS

healing. Indeed, redemption and healing are the believer's most pressing desires for other persons. This, too, compels a bias of moral significance. The Christian's relationships with other persons will be dominated, not by self-interest, not by consideration of gain, but by the redemptive desire for their salvation.

The Bible does not give clear instruction on how to reason from its moral imperatives to their application in every problem of real life. For instance, it does not apply the sixth commandment ("thou shalt not kill") to the question of whether defensive nuclear warfare might ever be justified (*see* HOMICIDE; KILL; MURDER). Nor does it state how the same commandment would apply to the question of when it is right to remove life-support mechanisms from a comatose patient whose brain has ceased to function. Having noted, then, that biblical direction for moral decisions comes in varied forms and with no explicit instructions for its application to modern moral problems, we will now consider a specific set of moral problems in the light of Scripture.

II. The Bible and Medical Technology.—Moral problems arise in the area of medical technology because we are now turning technology on ourselves (as we used to turn it mainly on nature) in ways that can determine life and death or change human beings at the core of their humanity. The moral question is whether we, as mere creatures, have a warrant to use our techniques to determine the lives of human beings. Moreover, ought we to encourage medical technologists to experiment with life-changing and life-determining techniques? How does the Bible speak to such problems?

Medical technology offers various possibilities, which may be divided into three types: life-prolonging, life-changing, and life-determining. Such devices as heart transplants and dialysis machines are life-prolonging. Psychosurgery and the use of chemicals for brain alteration are life-changing. Test-tube conception and cloning may be called life-determining.

To discover the Bible's direction in the use of life-affecting medical technology, we need much knowledge about what is actually happening in the various applications of technology. But the facts in cases entailing modern technology are sometimes very complex, involving not merely technical and medical data but also such matters as the possibilities for weal or woe in the experiments, the ability of the engineers to predict all the effects of their work, and the nature of the human person(s) being affected. Such facts are not easily ascertained or interpreted. How one interprets them will depend on how one views human life and human responsibility; and this depends not merely on clinical information but on one's deepest beliefs.

A. Life-prolonging Techniques. The biblical view of the value of human life gives us, to begin with, a strong bias toward using technology to save or prolong human life. The sixth commandment against killing (Heb. *rṣḥ*) implies a positive command to protect, nourish, and sustain human life; this seems to be the thrust of Paul's word that love is the fulfillment of the law (Rom. 13:8-10). Hence the biblical message constrains us to do all we can to sustain human life.

Moral problems arise in the use of techniques to prolong a life that without them would have ceased. The problems cluster around three typical sets of circumstances: (1) the life prolonged is only questionably human; (2) the extension of life brings indignity to the patient and great grief to loved ones; (3) the use of the techniques exacts an enormous price in both money and human resources. These circumstances raise the questions: is it morally required to use a machine to keep alive a comatose person whose brain is so irretrievably damaged that there remains no promise of any human activity? or to force a patient to exist biologically when his or her truly human selfhood is destroyed? or to continue to use the machine in such a case if its use taxes inordinately the financial and psychic resources of the loved ones? What does the Bible say?

The Bible teaches us to nourish and sustain human life, but there is still the question of what constitutes human life. Is the patient still human whose heart beats only as it is stimulated by a machine, or whose brain has all but ceased to function? There is much uncertainty, medically and often legally, about what constitutes normative humanity. Further, there is the question of whether we are morally obligated to sustain *all* human life at *any* cost. Are we obligated to keep alive an aged comatose patient who would have died had medical technology not invented its machines — just because a machine manages to make his heart beat? The Bible gives no precise answer to such questions. It does commend a bias toward life-support when uncertainty exists; but it does not give detailed medical information to help one determine whether a given patient is still a living human being who has a moral claim on others to support his or her life. In cases of painful uncertainty, we are called to prayer for "spiritual wisdom," for purity of motive, for courage, and for guidance from the Church, the Body of Christ. We act in the assurance of God's gracious forgiveness and the prevailing power of His providential will.

B. Life-changing Techniques. Another moral question is created by medical technology: when do human beings have the right to change or determine the lives of other human beings? In the light of scriptural data, we must rephrase the question to show that it has religious as well as moral dimensions: do mere creatures under God have the right to intervene in human lives in ways that are fitting only for God? Is there a biblical directive that tells us what we may or may not do?

There appears to be no biblical injunction against all interference into natural processes. While life is at God's disposal, to give or to take away (Ps. 90), it is also given into the care of human parents, human governors, and human physicians. Human beings have always exercised intervening care over one another as God's caretakers in the covenant responsibilities of God's family. Yet there is a limit. To intervene into the fundamental structure of a person, to determine his or her future, particularly without that person's consent, seems to be arrogating God's sovereign prerogatives. Two biblical teachings warn against aspiration for such control over other human beings, even if it is benevolent: (1) each individual, in the depths of his or her personhood, stands as the image of God against the will of other human beings to alter the person; (2) technologists also are sinners, whose hearts are as deceptively wicked as the hearts of all others, and whose judgment and ambition cannot be totally trusted in such profoundly person-changing endeavors.

Not even love sanctions all things. Love must respect the reality of the neighbor as God's image. Love must respect the will and consent of the neighbor. Love must be practiced in awareness of our sin-infected judgment and our penchant for controlling others in the name of love. The biblical warrant for asserting that love must respect certain limits is the example of God's respect for the individual reality and freedom of His creatures. Thus, love's consent to the use of technology for the support of life does not sanction any or all uses of technology for the changing life.

ETHICS: MODERN PROBLEMS

We may draw a general rule from the inviolable status of each person as God's image-bearer and the command of love to help one another. That rule might be: healing intervention into human life is limited by the responsible consent of the patient and also by the patient's uniquely human nature. This general rule leaves much room for the use of "spiritual wisdom." For there is no certain way to tell when a patient is indeed giving free and responsible consent, uninfluenced by the authority of the physician, the weakness of old age, or the debilitating effects of drugs. There is, further, no certain guide to indicate when one is intervening to alter the essentially human dimension of a person. The Bible does not provide precise guidance, for instance, as to whether it is right to change the personality of a violent person through brain- and personality-altering chemicals in order to render him more passive and, therefore, safer to himself and others. Clearly, the guidance of Scripture does not eliminate the necessity of prayer and the agony of coming to decisions without precise instructions.

C. Life-determining Techniques. Another set of moral problems is created by medical technology's ability to determine human life. In one instance, in what is popularly called test-tube conception, technology determines whether human life shall be born. In another instance, technology projects the possibility of determining the genetic structure of a human life through a process called cloning. We will confine our attention here to the Bible's guidance on whether it is morally allowable to conceive a child in a laboratory.

The process of "test-tube conception" requires surgical removal of ova from the woman. Several ova are removed, to improve the chances of success, and are placed in a fluid synthetically similar to the fluids of the uterus. The man's semen is then added to the fluid. Once an ovum has been fertilized and has gone through a short period of development, the zygote is surgically planted in the uterine chamber. In this way a married couple who would otherwise be barren may conceive a child.

Are there biblical guidelines that indicate the moral rightness or wrongness of conceiving a child in this way? The question is complex. First, is there a specific prohibition of test-tube conception? The Bible assumes that (except in the case of Jesus) children are conceived only through sexual union of a man and a woman and that sexual union produces offspring unless God wills otherwise. The Bible nowhere prohibits any other mode of conception, probably because its writers never imagined that any other way might be possible. May we, nonetheless, suppose that the *intention* of God is that the profound reality of the conception of a new life is properly associated only with the profoundly intimate sexual union of two people in a marriage covenant? Theologians have drawn such an inference, not from the Bible, but from natural law. Perhaps such an inference could be drawn from the Bible's silence, but it would surely lack convincing biblical authority.

The issues, however, are too complex to allow us to accept the legitimacy of test-tube conception on the basis of the Bible's silence on it. We might note that this procedure gives the medical technologist power to manipulate life at its genesis, a power the Bible is inclined to concede only to God, the giver and taker of life. Even if it is not explicitly prohibited, may it be *inappropriate* for human beings to exercise such power? This question has been asked many times in the face of modern technology; it can never be answered simply, once and for all. We do grant to medical science the power to *prolong* lives that otherwise would have died — and in effect postpone the day of God's taking a person. May we then refuse similar powers at the point of conception?

The question of appropriateness is intensified by the possibilities of irresponsible experimentation, especially in view of the secrecy in which such experiments are carried out. For example, there is the possibility that at an early stage the fertilized ovum may reveal a terrible deformation, such that the doctors would not place the ovum in the mother's uterus. But this would leave open the possibility of preserving the "monster" alive in the test tube for experimental purposes, and only later killing it. The biblical respect for even potential human life provides a strong motive for wanting to avoid such experiments. Thus, we must also face the question whether such experiments are likely accompaniments of test-tube conceptions.

The question of test-tube conception is also bound up with the question of abortion. The procedure calls for placing several ova in the laboratory dish. This means that several ova are likely to be fertilized. From among several fertilized ova, one is chosen for implanting in the uterus. The others are destroyed. In short, human zygotes are aborted. If the Bible speaks against all induced abortion, short of defense of the mother's life, it speaks against test-tube abortion. This feature can be removed only as technicians are able to confine the procedures to the use of only one ovum.

A basic biblical law that bears on the potential parents is the law of love. Test-tube conception offers barren couples the hope of having children. Love constrains us to act in order to fulfil their natural hope. The question, however, is whether the possibility of unknown evils and the likelihood that innumerable abortions will occur are sufficient reasons to deny the gift of procreation to childless couples.

The answer does not come to the believing community through a single text; nor will it come without agonizing reflection. The prayer of Paul for "spiritual wisdom" must be offered continually. There must be mutual help and counsel in the spirit of Christ. We deal here, as in other medical problems and, indeed, in many other moral problems, with the question of the right means to achieve a benevolently intended goal The Bible provides general moral laws and calls us, in Christ, to discern the will of God in their light. Discernment calls for biblically informed understanding of the facts, a reasoned calculation of the consequences of our acts, a prayerful sensitivity to the Spirit's movement, and a sure persuasion that when a decision is made, it is made under the sustaining and forgiving grace of God.

III. Summary.—We will conclude this discussion with several summary observations regarding the Bible's guidance in moral problems not foreseen within the Bible.

(1) The Bible gives moral direction in various forms, including prescriptions, general principles, examples, and stories.

(2) Modern life presents moral problems not covered in the specific prescriptions of Scripture.

(3) The Bible's moral teachings are relevant, in a general sense, to all modern moral problems. The positive intent of the Decalogue, the law of love, and the goal of justice inform the moral agent in significant, if general, ways.

(4) The application of biblical guidance to moral problems requires a careful analysis of the facts of the case. Without analysis of the facts, moral guidance is aimless. All facts are viewed and interpreted, however, from a moral and religious bias; all facts touching human life, especially, ought to be interpreted in the light of the Bible's message concerning human values and human nature.

(5) In the crucible of life's moral challenges, we are not excused by the Bible from the agonies of decision making. Not every right act is outlined in advance on the pages of the Bible. Here we must turn to prayer for "spiritual wisdom," to the promise of guidance in the practice of godliness, and to the assurance of forgiveness when we fail.

ETHIOPIA ē-thi-ō'pē-ə [Heb. *kûš*; Gk. *Aithiopia*]; AV also CUSH (Isa. 11:11); NEB also CUSH, NUBIA. A geographical term derived ultimately either from Gk. *aíthops*, "red (face)," or from *aíthō* plus *óps*, "burnt face" (cf. Jer. 13:23). "Ethiopia(n)" in the RSV of the OT translates Heb. *kûš(î)*, although *kûš(î)* is sometimes simply transliterated as "Cush(ite)" (cf. Gen. 2:13; 10:6-8 par. 1 Ch. 1:8-10; Nu. 12:1; 2 S. 18:21-32; Ezk. 38:5) or as the personal name "Cush(i)" (cf. Ps. 7 title [MT 7:1]; Jer. 36:14; Zeph. 1:1). In these last three passages the LXX also reads a personal name, *(ho) Chousi*, and probably also in Gen. 10:6-8 par. 1 Ch. 1:8-10 (*Chous*). In Ezk. 30:5 the LXX reads erroneously *Persai*, "Persians" (perhaps through contamination from Ezk. 38:5). Elsewhere in the LXX, *Aithiopia/Aithiops*, "Ethiopia(n)," translates Heb. *kûš(î)*, as well as Heb. *kûšān*, a synonym for "Midian" in Hab. 3:7, and *ṣîyîm*, "desert creatures," in Ps. 72:9; 74:14.

I. Location and Extent.–Egyptian *K3s/š* (later *Kš*) — whence Assyr. *Kûsu*, Bab. *Kûšu*, Amarna *Kâšu*, Heb. *kûš* — designated, in its broadest sense, the countries of the upper Nile S of Egypt. More precisely, however, the southern border of Egypt proper was in the area of the First Cataract of the Nile; S of Egypt the land of Wawat stretched to the vicinity of the Second Cataract; still further south, reaching at least as far as the Fourth Cataract, was Cush in the narrower sense. Wawat and Cush together were called "Ethiopia" by the classical writers of Greece, although Homer (*Od.* i.22-24) could also use the term in its broader sense by referring to "the distant Ethiopians, the farthest outposts of mankind, half of whom live where the Sun goes down, and half where he rises." It is thus clear that "Ethiopia" could denote all southern peoples with dark skins, from Cush to India. Herodotus mentioned Asiatic Ethiopians during the reign of Darius (iii.94) and as part of the army of Xerxes (vii.70), thus differentiating them from African Ethiopians and demonstrating that "Ethiopian" could be employed as a broad generic term. Herodotus also used "Ethiopia" in its narrower sense, however, by identifying it with the kingdom of Meroë: "Ethiopians inhabit the country immediately above [= S of] Elephantine [at the First Cataract

near Aswan, OT "Syene"; cf. Ezk. 29:10] and one half of the island; the other half is inhabited by Egyptians; . . . finally, you will arrive at a large city called Meroë: this city is said to be the capital of all Ethiopia" (ii.29). One of the terms used by Assyrian rulers of the 8th and 7th cent. B.C. to refer to the territories S of Egypt was *Meluḫḫa*, formerly believed by some to be identical to Meroë. The latter city, however, did not become historically significant until much later, and the origin of the name *Meluḫḫa* therefore remains obscure.

Like Egyp. *K3s/š* and Gk. *Aithiopia*, Heb. *kûš* is used in both a broad and a narrow sense (although only rarely does it include modern Ethiopia [= Abyssinia]). More frequently it corresponds roughly to the present northern *Sûdân*, a word meaning "black (country)," the equivalent of ancient "Nubia" (meaning "slave country"?), the earliest occurrence of which appears in the writings of Eratosthenes *ca.* 200 B.C. (Strabo *Geog.* xvii.1.2), who mentions the Noubai on the western side of the Nile "as far as the bends of the river."

The referent of *kûš* in Genesis is a vexing problem, however. In Gen. 2:13 it is rendered "Ethiopia" (cf. also the AV) by the LXX, which apparently understood Gihon to be another name for the Nile (cf. Jer. 2:18, LXX; also Josephus *Ant.* i.1.3). To this day Ethiopians refer to the Nile springs as "Giyon," the Ethiopic word for Gihon. But since the Garden of Eden narrative (Gen. 2:10-14) can hardly be understood as representing two ancient foci of civilization, it would seem best to seek the Cush of Gen. 2:13 in Mesopotamia, the region of the well-known Tigris and Euphrates Rivers (2:14). It would thus be equated with Akk. *Kaššû*, Gk. *Kossaioi, Kissioi*, the Kassite (Cossaean) rulers of Babylonia for about half a millennium down to the 12th cent. B.C. (cf. perhaps the personal name Cushan-rishathaim in Jgs. 3:8, 10).

The Cush of Gen. 10:6-8 (= 1 Ch. 1:8-10) is in some respects even more difficult to locate. With the exception of Canaan, the areas mentioned in the passage, as far as they can be identified, lie S of Egypt and on both sides of the Red Sea. The inclusion of Canaan may simply reflect the broader imperial interests of Egypt during much of her history, or there may be at least an incidental relationship to the presence of Cushite tribes in the Arabah mentioned in the nineteenth-century Egyptian Execration

Texts published by G. Posener. The problem is heightened, however, by the fact that the Cushite Nimrod's activities take place entirely in Mesopotamia according to Gen. 10:9-12 (a passage omitted by the Chronicler in his summary). While it is possible that Nimrod migrated from Nubia to Mesopotamia, it is also possible that the Cush of Gen. 10:6f. (= 1 Ch. 1:8f.) is Nubia, whereas the Cush of Gen. 10:8 (= 1 Ch. 1:10) is Mesopotamia (as is likely in Gen. 2:13) and that the compiler of the Table of Nations inserted the story of Nimrod because of the catchword "Cush" (LXX *Chous*, throughout this passage; Gen. 10:13 returns to a list of Egypt's relationships after the Nimrod interlude). Alternatively, the Cush of Gen. 2:13; 10:8 could refer to Kish, the storied Mesopotamian city that tradition states to have been the seat of the first Sumerian dynasty after the Flood.

The original location of the Nubian Cush was probably S of the Third Cataract at or near Kerma, the most important native kingdom in the northern Sudan. It seems likely that the pharaohs of the 11th Egyptian Dynasty (*ca.* 2133-1991 B.C.) permanently occupied the northern reaches of Nubia, attracted as they were by the possibilities of exploiting its riches. The material wealth of Nubia has tempted Middle Eastern rulers from time immemorial (cf., e.g., Job 28:19); Gudea of Lagash imported its black diorite stone; the Middle Kingdom pharaohs its spices, resins, fine wood, ostrich feathers, and black slaves; Darius of Persia its ivory; and everyone its gold.

A certain amount of intermarriage took place between Egyptians and Nubians, since the two peoples were ethnically related to each other. In fact, Amenemhet I, founder of the 12th Dynasty, may have had a Nubian mother. At the same time, Egyptians tended to regard Nubians with disdain. The Admonitions of Ipuwer, possibly antedating the 12th Dynasty, refer to the Nubians as "barbarians," as do inscriptions of Thutmose III and Amenhotep III centuries later.

II. History.–*A. 12th-17th Dynasties.* The earliest inscriptional references to "Cush" derive from the reign of Sesostris I (1971-1928 B.C.), who completed the conquest of Nubia that had been initiated by his father, Amenemhet I. After a peaceful interval of about eighty years, Sesostris III (1878-1843 B.C.) resumed military operations and Nubia was once again annexed to Egypt as far as the region of the Second Cataract at Wâdī Halfa. Sesostris himself became a sort of patron deity in Nubia and was worshiped there for centuries after his death. The Middle Kingdom pharaohs built a total of fourteen forts in Nubia during the period of their hegemony, and Egyptian trade penetrated even farther up the Nile than did political control. A fortified trading station called the "Walls of Amenemhet" was constructed at Kerma and a thriving mercantile colony was established there. The ushering in of the unsettled Second Intermediate period (13th-17th Dynasties, 1786-*ca.* 1550 B.C.) witnessed the end of effective Egyptian control over Nubia. It seems certain, however, that the Hyksos conquerors of Egypt were firmly entrenched in Nubia for a considerable time, occupying the area as far south as Kerma.

B. 18th Dynasty. After the expulsion of the Hyksos, the pharaohs of the 18th Dynasty reconquered Nubia with a vengeance, extending the frontier to Napata near modern Jebel Barkal S of the Fourth Cataract. A key figure in the program of expansion was Thutmose I (1525-1512 B.C.). The entire territory from Hierakonpolis (S of Thebes) to Napata was now put in charge of a viceroy, called the "King's 'Son' in Cush," appointed by, and directly responsible to, the pharaohs from Ahmose (at the beginning of the 18th Dynasty) to Herihor (at the beginning of the 21st Dynasty). Meroë, the capital of the Meroitic kingdom (descendants of the 25th Dynasty) from *ca.* 500 B.C. to *ca.* A.D. 350, may well have originated as an Eighteenth-Dynasty Egyptian post. After Thutmose III (1504-1450 B.C.) and well into the 19th Dynasty, expeditions to Nubia are mentioned frequently in the sources. Under a peaceful and efficient administration, the region prospered with the construction of irrigation works, the founding of new cities, and the erection of at least a dozen new temples, many of great size. The finest of the temples was built by Amenhotep III (1417-1379 B.C.) at Soleb; although reminiscent of his lovely temple at modern Luxor with its closed papyrus columns, it is sadly ruined today. One of the Amarna Tablets (Am.Tab. 287), probably dating from the early years of the reign of Amenhotep IV (Akhenaten, 1379-1362), mentions Cushite mercenaries garrisoned in Jerusalem. Four centuries later, during Shishak's invasion of Palestine, Cushite mercenaries, who were skilled warriors when properly trained (Jer. 46:9), would again make their appearance in Jerusalem (2 Ch. 12:2f.).

C. Moses. It is virtually certain that there were Nubian elements in the family of Moses. According to Ex. 6:25; 1 Ch. 6:3f., 50 (MT 5:29f.; 6:35); Ezr. 7:5, his brother Aaron had a grandson named Phinehas (Heb. *pînḥās* = Egyp. *p3-nḥsy*, "the Nubian"; cf. the various OT spellings of the Egyptian place name Tahpanhes, Egyp. *t3-ḥ(t)-p3-nḥsy*, "the Fortress of the Nubian"). Moses himself had earlier (Nu. 12:1) married a Nubian (RSV "Cushite"; LXX, AV, "Ethiopian") woman, an action for which at that time he was criticized by Miriam and Aaron. It is possible that Moses' Nubian wife is to be equated with the Midianite Zipporah (Ex. 2:16-21; 18:1f.), since "Cushan" (Heb. *kûšān*; LXX *Aithiopōn*) appears in synonymous parallelism with "Midian" in Hab. 3:7. Although some early Jewish commentators were clearly embarrassed by the likelihood that Moses had married a Nubian slave girl, others made capital of the relationship by midrashically elevating her to the status of princess or queen and giving her various names, such as Tharbis (cf., e.g., Josephus *Ant.* ii.10.2) or Adoniah. (*See also* CUSHITE WOMAN.)

D. 19th-21st Dynasties. Ramses II (1304-1237 B.C.), the greatest builder of the 19th Dynasty, constructed six major temples in Nubia during his reign, locating them at Beit el-Wali, Gerf Husein, Wâdī es-Sabua, Derr, Abu Simbel, and Aksha. The temple of Abu Simbel, with its four sandstone colossi 20 m. (67 ft.) high, is the most famous and greatest of the six. Before completion of the High Dam at Aswan, engineers cut the Abu Simbel temple into huge blocks and then rebuilt it on higher ground to protect it from the backed-up waters of the Nile — a remarkable feat worthy of Ramses himself, who during his sixty-six-year reign remade Egypt and Nubia in his own image, effectively Egyptianizing the southern reaches of his vast empire. The riches of Nubia were bequeathed to the Twentieth-Dynasty pharaohs, the last of whom, Ramses III (1198-1166 B.C.), attempted to rival the vast building projects of his earlier namesake. The weaklings who followed him spawned nearly a century of power struggles and graft, at the end of which the "King's 'Son' in Cush," Herihor, intervened in the name of law and order and established the 21st (Tanite) Dynasty, the final years of which were contemporary with Israel's united monarchy under David and Solomon.

The unnamed messenger who informed David of Joab's victory over Absalom is called simply "the Cushite" (AV "Cushi"; 2 S. 18:21-32). That he was a foreigner in Israel is perhaps indicated by his ignorance of the shorter route taken by Ahimaaz, by the failure of the

watchman to recognize him, and by his lack of familiarity with the emotional attachment that David had for his son. Some would equate him with the Benjaminite named "Cush(i)" in the title of Ps. 7, but without sufficient reason.

E. 22nd (Libyan)–25th (Cushite) Dynasties. The death of Solomon doubtless encouraged Sheshonq (Shishak) I (945-924 B.C.), the founder of the 22nd (Libyan) Dynasty, to test the defenses of Israel's divided monarchy in Rehoboam's fifth year. Nubian mercenaries were among the troops who attacked Jerusalem at that time (2 Ch. 12:2f.). Sheshonq's success is underscored by the account of his victory inscribed on a wall of the temple of Amon at Karnak in Upper Egypt. Not so fortunate was Zerah the Ethiopian who, according to 2 Ch. 14:9-13 (MT 8-12), was unable to defeat Asa of Judah in spite of his superior military strength (cf. also 16:7f.). Although some scholars would equate Zerah with Osorkon I, the son of Sheshonq, linguistic considerations make such an identification unlikely, and it is best to assume that the otherwise unknown Zerah was one of Osorkon's generals.

The lackluster 23rd and 24th Dynasties were partly contemporaneous with and almost completely overshadowed by the 22nd (Libyan) Dynasty and the 25th (Cushite) Dynasty. The latter was founded by Kashta, ruler of Cush at Napata, who obtained control of Upper Egypt, adopting Amon, the Theban king of the gods, as the national deity. Kashta's son, Piankhy (751-716 B.C.), completed the conquest of virtually the entire country. It was probably during the hegemony of the powerful Piankhy that Cush, now an independent kingdom, began to attract the attention and even the admiration of the writers of the OT (see Am. 9:7), who frequently referred to the territory as an exemplar of the remote and strange (cf. also Ps. 87:4; Zeph. 2:12). The Display Inscription of Sargon II (722-705 B.C.) similarly mentions Nubia as "a distant country, . . . an inapproachable region," and (referring as it does to his conquest of Ashdod) illumines the text of Isa. 20 and underscores the rivalry between Assyria and Cush.

Other Isaianic references reflecting the rising importance of Nubia are 7:18; 11:11; and 18. Some scholars identify "the rivers of Cush [RSV, AV, Ethiopia]" (18:1; cf. also 18:2,7; Zeph. 3:10) as the White and Blue Niles (which converge at modern Khartoum) and the Atbara (which meets the Nile at a point between the Fifth and Sixth Cataracts). The "vessels of papyrus" (18:2) have their modern counterparts in the *tankwas* still used on Lake Tana in Abyssinia. The "fly which is at the sources of the streams of Egypt" (7:18) is a veiled allusion to Cush; whether it helps to interpret the "whirring wings" of 18:1 is a matter of conjecture. Particularly instructive for Isaiah's use of the term "Cush" is 11:11, which refers to *miṣrayim* (Lower or Northern Egypt), *paṭrôs* (Upper or Southern Egypt), and *kûš* in the same north-to-south geographical order as the *Muṣru–Pāturîsu–Kûsu* of the somewhat later Assyrian inscriptions of the prophet's contemporary (37:38), Esarhaddon (681-669 B.C.). In 11:11 Cush is represented once again as being a faraway place, as far to the southwest as Mesopotamia is to the northeast, in a manner reminiscent of one of the Jerusalem Amarna Tablets (Am.Tab. 288). During the reign of the Persian Xerxes (486-465 B.C.), the termini of his empire were "from India to Ethiopia" (Est. 1:1; 8:9; cf. similarly the Akkadian version of a Persepolis foundation tablet ordered by Xerxes, translated in *ANET*, pp. 316f.).

The brilliant work of G. A. Reisner in the Sudan brought into relative chronological order the rulers of the Cushite Dynasty and made possible a continuous history of the area from the 8th to 4th cents. B.C. Shabaka, Piankhy's brother, strengthened the Cushite hold over all of Egypt and took the title of "King of Cush and Egypt." The names (though not necessarily the persons) of Shabaka and Shabataka (Piankhy's son) have been claimed by some to be reflected in Sabta(h) and Sabteca, two of the "sons of Cush" mentioned in Gen. 10:7 (= 1 Ch. 1:9).

Tissisat Falls at Lake Tana in Ethiopia, the source of the Blue Nile (W. S. LaSor)

The reign of Taharqa, the brother of Shabataka, has been brought into clearer relief by F. L. Griffith's excavations at Kawa near the Third Cataract. During the days of Hezekiah king of Judah, Taharqa was Assyria's archenemy. In Isa. 37:9 (= 1 K. 19:9) he is referred to as "Tirhakah king of Cush" (perhaps proleptically; for a reasoned treatment of the chronological issues involved cf. esp. K. A. Kitchen, *Ancient Orient and OT* [1966], pp. 82-84), exactly as in the royal inscriptions of Esarhaddon and Ashurbanipal, both of whom report Esarhaddon's destruction of Taharqa's Memphis *ca.* 671 B.C. Ruins of Taharqa's impressive building projects are visible throughout northern Sudan, and a fine column from his period of rule still stands at Karnak near the temple of Amon.

Ashurbanipal (669-627/6) records the Assyrian sack of Thebes during the reign of Tanutamun (Ta-net-Amon, whom Ashurbanipal calls Ur-damane), Taharqa's nephew, in 663 (cf. esp. Nah. 3:8-10). The Assyrian ruler thus brought the Cushite Dynasty to an end and inaugurated Egypt's 26th Dynasty under Psamtik I (663-610 B.C.), although the successors of Tanutamun continued to reign for another thousand years in Cush, first at Napata and later at Mēroë. They no longer ruled Egypt, but Egyptian influence continued, however feebly, to make an impact on their culture to the end.

F. New Foreign Influences. During this millennium a new ethnic strain manifested itself in Nubia. Steady migrations westward across the Red Sea produced the amalga-

mation of a small number of Semites from southwest Arabia with the mass of the native Cushite population. 2 Ch. 21:16 alludes to the proximity of Arabs and Cushites, as does Isa. 43:3 and 45:14. Jer. 44:1 mentions Jews who had settled in both Lower and Upper Egypt; Zeph. 3:10 refers to a diaspora in Cush; and the Elephantine papyri demonstrate the existence of a Jewish colony near Aswan at least as early as the 5th cent. B.C. Undoubted Hebraic influences and practices still exist among the inhabitants of Abyssinia (modern Ethiopia), the cultural heirs of the ancient Cushites. For their part, the Cushites made an impact on Israel as well. There is good reason to believe that the prophet Zephaniah had some Cushite blood (Zeph. 1:1; cf. Jer. 36:14 for another occurrence of the proper name "Cushi"), and the prophet Jeremiah was befriended by Ebed-melech, a Cushite who held a responsible position in the court of King Zedekiah (Jer. 38:7-13; 39:15-18). Another prophet, Ezekiel, predicted doom for the Cushites of the future (Ezk. 30:4-9; 38:5; cf. also Dnl. 11:43), while the OT Apocrypha and Pseudepigrapha tended to portray Nubia as being remote and/or barbarous (cf. Jth. 1:10; Sib. Or. 3:319f.; 512-19).

G. Meroë, Aksum, and Ethiopian Christianity. Beginning with Queen Bartare (*ca.* 284-275 B.C.), female rule became increasingly important in the kingdom of Meroë. "Candace" is the Meroitic word for "queen (mother)" and was therefore a title rather than a name. The Candace of Acts 8:27 may be Amanitēre who perhaps survived her husband, Natakamun, ruling as queen mother in his place (see plate 16b in A. J. Arkell, *History of the Sudan*). Modern Ethiopians erroneously tend to equate her with the queen of Sheba on the basis of passages in the *Kebra Nagast*, the Ethiopian national saga.

The first known reference to Aksum, the ancient capital of the territory today called Ethiopia, is in the *Periplus Maris Erythraei*, an anonymous first-century A.D. account of travel and trade in the Indian Ocean. The kingdom of Meroë at that time was languishing, and Aksum stepped into the power vacuum. In *ca.* A.D. 350, Meroë was sacked by Ezānā, Aksum's greatest king, the kingdom of Meroë came to an inglorious end, and the ancient name of Cush ceased to be used for all practical purposes. A convert to Christianity, 'Ezānā made it the official religion of the Aksumite kingdom. An impressive series of obelisks was built during his reign.

H. Moslem Conquest and Solomonic Dynasty. The Moslem conquest in the 7th cent. A.D. temporarily severed Ethiopia from its spiritual source, the patriarchate of Alexandria. Isolated from the outside world for almost a thousand years, the people retired within their impregnable mountain fastnesses, and Ethiopian Christianity began to assimilate indigenous and even pagan elements. Because Ethiopia turned its attention southward, very little is definitely known of the thousand-year period. In A.D. 1270, however, the so-called Solomonic dynasty became dominant and reigned in Ethiopia until 1975. Proper historical documentation is available for it. The province of Amhara became Ethiopia's political center, and church and state were once again fused. In 1434 Zar'a Ya'qob, the greatest ruler Ethiopia had seen since 'Ezānā, became king. With the exceptions of Menelik II and Haile Selassie, none can be compared to him. He instituted religious and administrative reforms and enjoyed military successes against the Moslems. Only two or three MSS in Ge'ez (the ancient Ethiopic language) antedate him, but many derive from his time and later. Although his successors were unable to stop further Moslem encroachment, the Portuguese helped them to remove the menace forever in the 16th century.

P. Rombulo, an Italian who arrived in Ethiopia in 1407, was the first modern reliable reporter of the Ethiopian scene. In the following century F. Alvarez, a Portuguese, produced a coherent and authoritative work on Ethiopia that excited considerable interest in Europe. In 1588 the Italian G. Gabriel became the first European to visit the source of the Blue Nile at Gish above Lake Tana, the largest of Ethiopia's lakes, about 3235 sq. km. (1250 sq. mi.). The eighteenth-century Scottish explorer J. Bruce traversed the length and breadth of Ethiopia in a manner unexcelled until his time and brought back a magnificent collection of Ethiopic MSS.

After the great Galla migrations from Ethiopia's coastlands (*ca.* 1550-1850) Ethiopia again emerged from her isolation. King Theodore (1855-1868) eliminated his rivals and was anointed *negusa nagast* ("King of Kings"). Menelik II rose to power in 1889 and moved the capital to Addis Ababa, ruling there till 1913. After a fourteen-year regency, Ras Tafari prevailed over his rivals and was crowned in 1930 as Emperor Haile Selassie ("Might of the Trinity") I in St. George's Cathedral there. Except for the Italian Fascist interlude (1936-1941), he reigned until deposed by a military coup in 1975.

III. Geography.–The modern country encompasses about 1,035,000 sq. km. (400,000 sq. mi.). Separated from Arabia (Asia) by the narrow Bâb el-Mandeb, Ethiopia is shaped like a triangle with its apex to the north. Its vast mountain massif, 2100-2400 m. (7000-8000 ft.) high, makes for astonishing contrasts in climate. The mountains are cleft by the great rift valley in a NE-SW direction. W of the mountains is the immense Nile Valley, fed by the Abbai (Blue Nile), which, a thousand miles from its source above Lake Tana, meets the White Nile at Khartoum in the Sudan. The Takkaze, Atbara, and Mareb rivers also flow westward toward the Nile, ultimately emptying their waters into the Mediterranean.

IV. Climate and Crops.–Ethiopia has three main climatic zones: the highlands (temperate), over 2100 m. (7000 ft.); the intermediate (once the main region for vine cultivation), 1500-2100 m. (5000-7000 ft.); and the lowlands (hot). The "small" rains last from March to May, the "big" rains from June to September. It is the alternation of Ethiopia's dry and rainy seasons that causes the annual flooding of the Nile. Planting of crops in Ethiopia takes place from March to June, and harvesting occurs immediately after the "big" rains. Needless to say, the nature, yield, and frequency of crops (and all plants) vary considerably depending on altitude. Domestic and wild animals and birds of all sorts abound.

V. Population and Language.–The population of Ethiopia numbers about ten million. Cushitic, Semitized Cushitic, and Nilotic are the three main ethnic groups. Amharic is the official language, although other dialects such as Tigre and Tigriña are widely used.

Serious investigation into the nature of the ancient Ge'ez language of Ethiopia did not begin until the 16th century. The Italian scholar M. Victorius published the first grammar of Ethiopic in 1548. Ninety years later, J. Wemmers of Antwerp published the first Ethiopic dictionary. J. Ludolf, a seventeenth-century German, was the most brilliant and prolific of all the earlier Ethiopic scholars. In the 19th cent. A. Dillmann published a new grammar, dictionary, and chrestomathy. Other important names in the highly specialized modern field of Ethiopic studies are T. Nöldeke, F. Praetorius, C. C. Rossini, E. A. Wallis Budge, E. Littmann, H. J. Polotsky, W. Leslau, and E. Ullendorff.

VI. Abyssinian Church.–Ge'ez serves the same purpose for the Abyssinian Church as did Latin for the Roman

Catholic Church. Monophysite Christianity as enshrined in the Ethiopian Orthodox Church is the official religion of Ethiopia. Before their conversion to Christianity under 'Ezānā, the Abyssinians were probably partly pagan, influenced by Cushite animism, and partly adherents of a form of Judaized religion brought by immigrants from south Arabia across the Bâb el-Mandeb. The Scripture of the Abyssinian Church consists of the OT and NT, plus a number of apocryphal books. The councils of Nicea (325), Constantinople (381), and Ephesus (431) are recognized, but not that of Chalcedon. Christ is believed to have only one nature (divine). Of the traditional seven sacraments, confirmation and extreme unction are not practiced. Trine immersion constitutes baptism. Magical practices and superstitions abound in Ethiopian Christianity, derived partly from old Cushitic pagan beliefs and partly from the ancient Semitic world. Feasts, fasts, and commemorative days are numerous, including thirty-three in honor of the Virgin Mary alone. Until very recently, close ties existed between the Abyssinian and the Coptic Church. Famous monasteries are located at Debra Libanos and Debra Damo. The most beautiful and oldest of the Ethiopian churches is the rectangular building at Debra Damo, dating back to the early Middle Ages. The eleven rock-hewn churches of the village of Lalibala are also outstanding in beauty and workmanship.

King Amda Sion (1314-1344) started a literary renaissance in Ethiopia. During his reign the foremost creation of Ethiopian literature, the *Kebra Nagast* ("Glory of the Kings"), came into being. The legend of the queen of Sheba is its *pièce de résistance,* telling how she visited King Solomon (cf. 1 K. 10:1-13), accepted his religion, and bore him a son (Menelik I), who later visited his father and abducted the ark of the covenant, taking it to Aksum, the new Zion. The basic elements of this legend were also enshrined in Article Two of the 1955 Constitution.

About half the populace of modern Ethiopia are adherents of the Ethiopian Church. Their favorite Bible verse is undoubtedly Ps. 68:31 (MT 32), which is frequently used as a motto or in heraldic devices. The verse represents Ethiopia (LXX *Aithiopia*) hastening "to stretch out her hands to God" and has become a proof text of much of the country's passionate adherence to Ethiopian Orthodox Christianity. Moslems and pagans make up most of the rest of the population. The Falashas are not the Jews of Ethiopia (as is often claimed) but rather indigenous Judaized tribesmen, non-Christianized remnants of the Aksumite kingdom. In recent years evangelical Christianity has experienced an upsurge in Ethiopia resulting in thousands of converts.

R. F. YOUNGBLOOD

ETHIOPIAN EUNUCH [Gk. *Aithiops eunoúchos*]. Acts 8:26-40 gives an account of Philip's evangelization of a eunuch returning home to Ethiopia after a visit to Jerusalem. This man was called a eunuch (*eunoúchos*) and a ruler (*dynástēs*) of the Ethiopian court. Probably he was a castrated man with authority in the court of the queen mother of Ethiopia, since eunuchs were most often used where queens were involved. Plutarch even records that Lysimachus resented being called a treasurer (which this Ethiopian was, cf. Acts 8:27) because treasurers were usually eunuchs (*Demetrius* 25.5). Usage during this time also permitted the application of *eunoúchos* to a high ruler with a military commission, not necessarily castrated (cf. *TDNT,* II, 766), or to one who by choice desired to abstain from marriage (Mt. 19:12).

The ETHIOPIA referred to here is not the modern country of the same name but the ancient kingdom of Meroë, which lay along the upper Nile S of Aswan to Khartoum in the Sudan. It appears that the king of this country was venerated as a child of the sun and regarded as too sacred a person to care for the duties of state; hence these duties were filled by the queen mother, who was regularly called "Candace," as the Egyptian ruler was called "Pharaoh."

The relation of the eunuch to Judaism is a problem. The text merely tells us that he was on a pilgrimage to Jerusalem. Dt. 23:1 and Lev. 21:20 indicate that eunuchs were not to be admitted to the congregation of Israel or allowed to minister in the sanctuary. This was perhaps because the divinely created state of man was thus destroyed or because mutilation of the male destroyed the patriarchal ideal of the early nation (cf. *TDNT,* II, 766). Isa. 56:3-5 seems to have provided a basis for the admission of the eunuch into the nation of Israel, although this cannot be certain. If this is so, the Ethiopian may have been a Jew or a Jewish proselyte; but it is more probable that he was a God-fearing Gentile (*see* DEVOUT; DISPERSION V.C.). This account must then be considered in relation to the general spreading of the gospel to the Gentiles. Luke intends this segment of the book of Acts to show the spread of the gospel to Africa and is not concerned with the question whether this was the first gentile conversion. The conversion of Cornelius was undoubtedly more important for the Jerusalem church because Cornelius was a prominent Gentile and his conversion took place in Palestine, where news of it would be widespread. This conversion of the Ethiopian was important as a fulfillment of the prophecies of Zeph. 3:10 and Ps. 68:31 (MT 32).

In Luke's account the angel of the Lord appeared to Philip and commanded him to go to the road to Gaza, a road which led from Jerusalem through the coastal plain and then along the Mediterranean to Egypt. As he went along this road Philip saw the eunuch in a wagon (perhaps covered). As it was usual for people in ancient times to read aloud, Philip would have had no trouble knowing that the man was reading the prophet Isaiah. Although Meroë had its own language and also used a form of Egyptian hieroglyphics, there seems to be little problem related to the eunuch's use of Greek. In answer to the eunuch's question as to the person about whom the prophet spoke, Philip told him that the Suffering Servant of Isa. 53 was Jesus Christ. Accepting the message about Jesus, the eunuch desired baptism in a body of water along the road. Many believe that this is the Wâdī Ḥesī NE of Gaza, although this cannot be known with certainty. After the baptism Philip was caught away and the eunuch proceeded to his homeland.

The eunuch's confession of faith (8:37) is omitted from the best Greek MSS and therefore is not found in our most reliable English translations. This confession appears earliest in Irenaeus and then in the later Western texts. Most scholars believe that such confessions were the usual practice before baptism. For this reason the verse was added to the text of Acts at a very early date.

D. W. WEAD

ETHIOPIC ē-thi-op'ik [Eth. *lesāna Ge'ez*–'the tongue of Ge'ez']. The language of Ethiopia, used in the inscriptions of the kings of the ancient Aksumite (Axumite) empire

and in most of the literature of Christian Ethiopia. The Ag'azyan or "Ge'ez" tribe must have dwelt in or near Aksum (Axum) in antiquity.

The names "Ethiopia" and "Ethiopians" have had a variety of uses in various stages and writings of history, and in ancient times designated something quite other than the Ethiopia of today. While to classical Greek historians (and hence in Bible translations; *see* CUSH) "Ethiopia" referred specifically to the land S of Egypt, to Nubia in what is now the Sudan, in Hellenistic times it covered all the land between the Red Sea and the Nile. To some historians "Ethiopian" and "Indian" became synonymous, and on some ancient maps Ethiopia spanned Africa to the Atlantic. Historically, as well as officially today, the Ethiopians themselves have preferred the name "Ethiopia" (*Itiōpiyā*) to "Abyssinia." Therefore, in the bilingual inscription of King Aeizanas (ʿĒzānā), Gk. *Aithiopia* is a rendering of the Semitic *Ḥābāšāt* (Abyssinia, but here referring more specifically to northern Ethiopia). Under the same king, *ca.* A.D. 350, Ethiopia became a Christian kingdom, and after the translation of the Bible into the Ge'ez language the name "Ethiopia" came to be used widely and proudly.

The term "Ethiopic language" has come into accepted usage as an equivalent of *lesāna Ge'ez* and must be understood to apply specifically to the ancient or classical language of Ethiopia. Ethiopic (Ge'ez) was a highly evolved language, distinct from its south-Arabian origins, by the 4th cent. A.D. when Frumentius established a connection with the Christian church of Alexandria that was to open a new epoch in Ethiopian history; thus the language provided a ready vehicle for a body of both translated and indigenous Christian literature.

This language, closely allied to the languages of south Arabia, is the most extensive extant representative of that branch of Semitic languages. While Ethiopic has a great deal in common with the Arabic language, at the same time it preserves elements of ancient Semitic usage that at points align it more closely with Hebrew and even with Babylonian and Assyrian. The Semitic inhabitants of Ethiopia must have come from across the Red Sea. It is thought that Yemeni colonizers of the Red Sea coast of Africa became established during the 4th and 3rd cents. B.C., and that the Ge'ez language, though only one of several dialects derived from South Arabic, had developed distinctively by the end of the 1st cent. A.D.

The two races of peoples that the Semitic conquerors of northern Ethiopia found were African aborigines and Cushites, a branch of the Hamitic family. While the Semites did not at first allow the several representatives of these varied linguistic groups to influence their own dialects very much, the local influence increased with time, as is evident in the modern Semitic languages of Ethiopia.

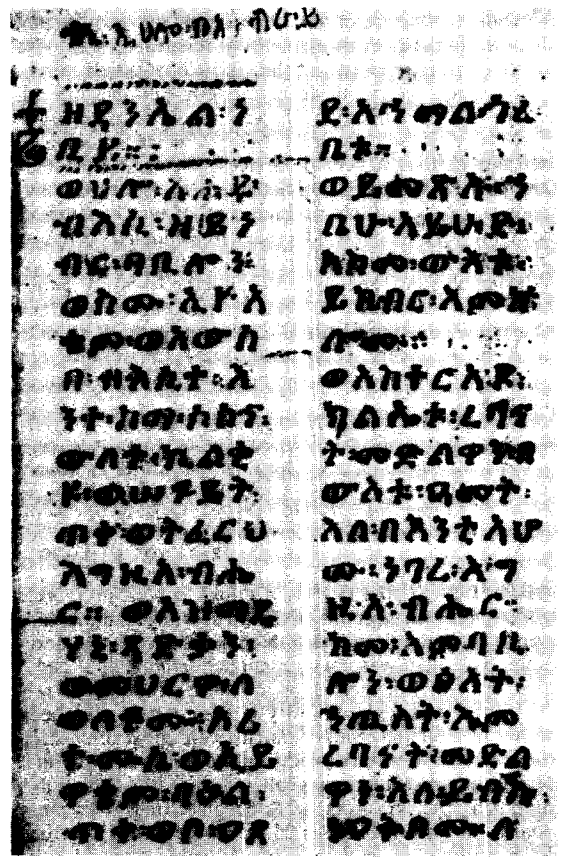
Many of the details of the stages of development remain obscure to us, but an outline of the history of the Ethiopic language can be made as follows. Its oldest monument known so far is the Semitic part of the bilingual inscription of King ʿĒzānā (*ca.* A.D. 325). Well before that time Ethiopic must have been spoken, if not written (Greek and Sabean were written). Although Sabean script was still used ornamentally, knowledge of that language was slight by ʿĒzānā's time. The Semitic part of the aforementioned inscription is true Ethiopic but is carved once in Sabean script and repeated in the Ethiopic script that had been derived from it. In the former version just a few Sabean words are employed for the Ethiopic equivalents. A few other ancient inscriptions of the same period have been found in the Aksum area.

Two features set the Ethiopic script apart from other Semitic writing systems. The first is its development into a quasi-syllabic system, in which a modification of the basic consonantal form of each letter yields a vowel sound in combination with it; the second is that the order of the alphabet differs from any of the other Semitic systems or their derivatives. A recent archeological discovery at the site of ancient Timnaʿ in Yemen reveals a sequence of Qatabanian consonants similar to that now seen only in Ethiopic.

Possibly also in the 4th cent. the translation of the Bible into Ethiopic was begun; this marks the beginning of Ethiopic literature. Probably the Psalms and Gospels were translated first, being most needed in church services. Apparently both Testaments were translated from the Greek by men whose mother tongue was Aramaic. This tradition is supported by the presence of Greek and Aramaic words and by the forms in which Hebrew names appear in the Ethiopic transliteration. Subsequent Ethiopian authors show dependence upon the style of these translations of the Scriptures.

The formative influences upon the Ethiopic language were, therefore: (1) Sabean, from which a number of technical terms may have been adopted by the ancient Aksumites even after Ge'ez became their literary language; (2) African, i.e., Cushitic and native African, especially for local flora and fauna; (3) Aramaic, both Jewish and Christian, primarily the former, mostly words referring to religious or theological matters; and (4) Greek, appearing in the form of religious and technical borrowings,

Ethiopic MS of Job and Daniel, 14th cent. A.D., showing part of Susanna, the apocryphal addition to Daniel (Deutsche Bibelstiftung, Stuttgart)



either transliterations or names for objects foreign to Ethiopian culture.

The Ethiopic language flourished during the time of the Aksumite empire (*see* ETHIOPIA II.G-H); but of the succeeding period, *ca.* A.D. 700-1300, we know very little. When, after a lapse, the Solomonic dynasty was restored in 1270, the seat of the empire was no longer Aksum, but Gondar N of Lake Ṭānā. Meanwhile, the literary language had become a dead language, new dialects having sprung up and taken its place in everyday conversation. But Ge'ez continued to be the sacred language, the language of the Bible and of the Church; and when in the 14th and 15th cents. a revival of Ethiopian literature occurred, the literary language was still Ge'ez. Yet it was influenced by new dialects, especially by Amharic, the language of the Amhara people of Gondar, where most of the books were written or translated. This influence affected the spelling of Ge'ez in religious books, and in historical books many words were taken from Amharic, so that *lesāna tārīk*, "the tongue of the chronicles," often has the appearance of a mixed language.

When in the 16th and 17th cents. European missionaries used Amharic literature, attempting to attract the common people to Roman Catholicism, the defenders of the native Orthodox Church felt compelled to reply in kind, so that Amharic became a recognized literary language. But Ge'ez has continued to be the real language of the Church, both in liturgy and in sacred studies. Amharic was apparently derived from a sister language of Ethiopic, the most widespread direct descendant of Ge'ez being Tigriña, with the minor language called Tigre being the most closely related geographically.

Ethiopic study continues to shed as much light on other Semitic languages as it receives from them, so that both for comparative Semitic studies and for historical study of biblical, apocryphal, and church liturgic and dogmatic material written in Ethiopic, it holds no small place in biblical research.

ETHIOPIC VERSIONS. *See* VERSIONS.

ETHIOPIC WOMAN. *See* CUSHITE WOMAN.

ETH-KAZIN eth-kā'zin [Heb. *'ittâ qāṣîn*]; AV, NEB, ITTAH-KAZIN. A town on the east border of Zebulun (Josh. 19:13). "Ittah" in the AV and NEB is due to a misunderstanding of the changed spelling that indicates direction (*he* locale). While the location is uncertain, the context may put it at Kefr Kennā.

ETHMA eth'mə (1 Esd. 9:35, AV). *See* NEBO 2.

ETHNAN eth'nan [Heb. *'eṯnān*–'give' or 'hire'; Gk. *Ethnadi*]. A Judahite (1 Ch. 4:7), perhaps from the south Judean town of Ithnan, which may have been founded by one of his ancestors (cf. Josh. 15:23). R. K. H.

ETHNARCH eth'närk [Gk. *ethnárchēs*–'ruler of the people' < *éthnos*–'people' + *árchōn*–'ruler'] (1 Macc. 14:47; 15:1f.); AV GOVERNOR, PRINCE. A title used to designate a subordinate ruler. The precise meaning of the term varied throughout the centuries of its use.

The RSV uses this term only in 1 Maccabees, where Simon Maccabeus the high priest is called "commander and ethnarch of the Jews and priests" (14:47; cf. 15:1f.). Here the title denotes a representative of a subject people who has been given certain powers of control and discipline over his own people but is responsible to the foreign dominating power. The title appears several times with this meaning in the writings of Josephus. He reported that this title was granted by the Roman senate to Hyrcanus, "the high priest and ethnarch" of the Jewish people (*Ant.* xiv.8.5). Archelaus son of Herod was appointed ethnarch over half of his father's kingdom, while the other half was divided into two tetrarchies granted to Philip and Antipas (*BJ* ii.6.3; *Ant.* vii.11.4); thus, the office of ethnarch was greater than that of TETRARCH. The Jewish community in Alexandria is also reported to have had the privilege of being governed by an ethnarch of its own race (*Ant.* xiv.7.2; xix.5.2).

The Gk. *ethnárchēs* appears once in the NT, in 2 Cor. 11:32 (AV, RSV, "governor"; NEB "commissioner"). The nationality and function of this ethnarch are not certain, since scholars are divided about whether Damascus at this time was under Roman domination or under the full control of the Nabatean king Aretas IV (9 B.C.-A.D.40). (*See also* ARETAS 3; DAMASCUS III.) The ethnarch was likely the leader of the Nabatean community in Damascus or its environs, responsible either to the Roman authority or to Aretas. It is also possible, however, that he was a Jew with some control over the large Jewish community in Damascus (cf. *BJ* ii.20.2; vii.8.7), similar to the Jewish ethnarch in Alexandria (see Hughes, p. 424). According to the Acts 9 account of Paul's escape from Damascus, it was the Jews who plotted to seize Paul (v. 24). Apparently the Jewish community enlisted the support of the ethnarch — whatever his ethnic identity — in this scheme.

N. J. O.

ETHNI eth'nī [Heb. *'eṯnî*–'gift']. An ancestor of Asaph, of the Gershomite branch of the Levites (1 Ch. 6:41 [MT 26]).

EUBULUS ū-bo͞o'ləs [Gk. *Euboulos*–'of good counsel'] (2 Tim. 4:21). A member of the church in Rome who remained loyal (cf. v. 16) at the time of Paul's second imprisonment in that city.

Nothing more is known in regard to Eubulus. As his name is Greek, he was probably a Gentile by birth. The name occurs frequently in inscriptions and papyri.

EUCHARIST ū'kə-rist. *See* LORD'S SUPPER.

EUERGETES ū-ûr'jə-tēz [Gk. *euergétēs*–'benefactor'] (Sir. Prologue). A title given in ancient times to those who had performed outstanding works of benevolence. The author of the Prologue to Sirach dates his writing by referring to his arrival in Egypt in the thirty-eighth year of Ptolemy VII Euergetes (132 B.C.). *See* PTOLEMY.

EUGNOSTOS, LETTER OF. *See* NAG HAMMADI LITERATURE II.

EUMENES II ū'me-nēz [Gk. *Eumenēs*–'well-disposed']. King of Pergamum (197 B.C.), son and successor of Attalus I. He is mentioned in the Apocrypha (1 Macc. 8:8) in connection with the league that Judas Maccabeus made with the Romans. As their ally in the war against Antiochus the Great and in recognition of his distinguished service at the decisive battle of Magnesia (190 B.C.), the Romans

granted Eumenes extensive tracts of land so that he rose at once from comparative insignificance to sovereign of a great territory. The statement in 1 Maccabees of the territory granted to him differs from those of Livy (xxxviii.39), Polybius (xxi.45), and Appian (*Syr.* 44), and cannot be correct. The Romans are said to have taken "India and Media and Lydia" from Antiochus and to have given them to Eumenes. Antiochus never had any possessions in India, nor had any earlier king of Syria. He was obliged to give up only the countries on the side of Taurus toward Rome (cf. A. H. McDonald, *Journal of Roman Studies,* 57 [1967], 1-8). No alternative for the reading "India" in the narrative has met with acceptance (it may have been a copyist's error for "Ionia"; see Livy xxxvii.56). Eumenes cultivated the Roman alliance carefully but became suspect in connection with the affairs of Perseus, the last king of Macedonia. He never came to an open rupture with the Romans, however, and died in 159 B.C. after a reign of thirty-nine years.

J. HUTCHISON

EUNATAN ū-nā'tən (1 Esd. 8:44, AV). *See* ELNATHAN 3.

EUNICE ū'nis [Gk. *Eunikē*–'good victory'] (2 Tim. 1:5). The mother of Timothy. Although her name was Greek, she was a Jewess (Acts 16:1). Her husband was a Gentile. Eunice was in all probability a daughter of Lois, Timothy's grandmother, for Paul mentions these Christian women together in highly commendable terms (2 Tim. 1:5).

Timothy had not been circumcised in childhood, probably because his father was a Gentile, but Eunice and Lois did everything in their power to train him in the fear of God and knowledge of the OT Scriptures (2 Tim. 3:15). Timothy's name, signifying "one who fears God," was evidently chosen not by his father but by Eunice. Apparently Eunice, along with Timothy and Lois, was converted during Paul's visit to LYSTRA on his first missionary journey. This is implied in the account of Paul's second missionary journey, where it is said that Paul found in Lystra "a disciple . . . named Timothy, the son of a Jewish woman who was a believer" (Acts 16:1). This conclusion is confirmed in 2 Tim. 3:11, where Paul reminds Timothy that he had witnessed the persecution the apostle had endured at Lystra. This persecution occurred on Paul's first visit to that city (Acts 14:8-22). Eunice was therefore among those who on that occasion became "disciples" (v. 21). Her faith in Christ stood the test of the "many tribulations" about which Paul warned them (v. 22). During Paul's next visit to Lystra she had the great joy of seeing her son chosen by the apostle to be his companion in his missionary work. Eunice is not afterward mentioned in the NT, though she may be included in what is said about widows and their children in 1 Tim. 5:4f.

See also TIMOTHY.

J. RUTHERFURD

EUNUCH [Heb. *sārîs*]; AV also CHAMBERLAIN; [Gk. *eunoúchos*] (Mt. 19:12; Acts 8:27, etc.); NEB also INCAPABLE OF MARRIAGE; [part. of *eunouchízō*] ("made eunuchs," Mt. 19:12); NEB also RENOUNCE MARRIAGE. An emasculated human male.

I. In the Ancient World.–Exactly where and why human castration began is still uncertain. The tradition reported by the Byzantine historian Ammianus Marcellinus (*Rerum gestarum libri* xiv.6.17) — that it was instituted by the legendary Assyrian Queen Semiramis (Sammu-ramat, *ca.* 810-805 B.C.) — at least suggests Mesopotamia as its place of origin, though it is now known that the Assyrian practice of making men eunuchs actually antedates this queen by many centuries. Castration as a means of punishment was known in Assyria already in the 2nd millennium B.C. An example may be noted in the "Middle Assyrian Laws" (tablets from the time of Tiglath-pileser I, 12th cent. B.C., but laws and regulations which may actually derive from the 15th cent. B.C.): "if a seignior has caught a(nother) seignior with his wife . . . if the woman's husband puts his wife to death, he shall also put the seignior to death, but if he cuts off his wife's nose, he shall turn the seignior into a eunuch [*ālla*(LÚ) *ana ša rēšēn útâr*] and they shall mutilate his whole face" (Tablet A.15; tr. T. J. Meek, *ANET,* p. 181; text, R. Borger, *Lesestücke,* II, 51; III, plate 34).

Commonplace from early times in Mesopotamia was the employment of eunuchs as servants or supervisory officials in the women's quarters of royal households (see E. Weidner, pp. 264ff.). But eunuchs in ancient Mesopotamia were known not only as bodyguards or domestics, but also as palace officials, statesmen, and military generals (see, e.g., Borger, *Lesestücke,* I, lxxvi, *s.v. šūt rēši*).

Concerning the origin of eunuchs, it is generally assumed that human castration was first suggested by analogy with that of animals. Xenophon (*Cyropaedia* vii.5.60-65) reports that it was the belief of the Persian king Cyrus the Great that emasculation yielded more docile and easily managed slaves who, undistracted by family ties, were characterized by single-hearted loyalty (and in the harem by unquestioned fidelity). Thus Xenophon says of Cyrus, "Recognizing these facts, he selected eunuchs for every post of personal service to him, from the doorkeepers up" (*Cyropaedia* vii 5.65 [LCL]).

The use of eunuchs, both domestically and politically, became commonplace throughout the Persian empire under the Achaemenean kings (559-330 B.C.), during the Roman and (especially) Byzantine empires, and in the various Islamic caliphates after *ca.* A.D. 750. Nevertheless, the phenomenon was not unique to the Fertile Crescent or Mediterranean cultures, for eunuchs are known to have served royalty in China as political advisers already in the Chou period (*ca.* 1122-221 B.C.) (cf. *Enc.Brit.* [1974], III, 994). There is no clear evidence, however, of eunuchs in ancient Egypt (see G. Kadish, p. 61).

Through Near Eastern influence the custom of making men eunuchs was introduced to the ancient Greek world, although the concept of human castration was fundamentally alien to Greek thought (*TDNT,* II, 765). This influence was most prominently felt in hellenized Asia Minor, the land-bridge between the Near East and the Aegean sphere. There, particularly in the cults of Cybele, Attis, and Artemis, the institution of ritual castration and a corresponding eunuch priesthood flourished, probably motivated by a desire to be one physically with the deity (i.e., in transmundaneity) as well as spiritually (*ERE,* V, 580-82; *TDNT,* II, 765).

II. In Israel.–*A. OT Teaching.* Castration was prohibited in ancient Israel. In Dt. 23:1 eunuchs are excluded from the cultus. The rationale for this exclusion was multifaceted and in varying proportions included the following arguments: (1) emasculation is contrary to the divine order in creation; (2) it represents syncretistic accommodation to foreign influence; (3) the maimed or mutilated are considered unfit for priesthood, since by definition they constitute an affront to the God who made the world without blemish (cf. Lev. 21:20); and (4) the practice tends to undermine the natural patriarchal cultic order.

This prohibition notwithstanding, the eunuch is later considered admissible to the worship assembly (Isa. 56:3f.). This does not constitute the establishment of some new cultic norm, but rather the concrete application, to an especially problematic case, of the universalistic principles

delineated by Isaiah in passages such as 44:5; 45:14, 23; 55:5, so that the unlimited nature of Yahweh's love may be manifested. With a skilful piece of prophetic *tôrâ*, the prophet counters the traditional objection to membership of eunuchs ("a dry tree," i.e., unproductive of offspring) with the instruction that the single most important thing is devoted loyalty to the covenant. The kind of perpetual memory gained by the eunuch's loyal deeds represents, in the prophet's eye, a more significant hope than the traditional one of a name perpetuated through numerous progeny. This teaching is reemphasized in Wisd. 3:14: "Blessed is the eunuch, if he has never done anything against the law" (cf. the first two categories of Mt. 19:12, those born eunuchs and those castrated involuntarily); sterility is no disgrace or impediment for the pure in heart, for he will find "a place in the Lord's temple" (NEB).

B. OT Terms. 1. Heb. sārîs. The Hebrew term *sārîs* appears forty-seven times in the OT (including four times in the title *raḇ-sārîs* and six in the title *śar-hassārîsîm*, both "chief eunuch"). In twenty-eight of these occurrences the RSV translates literally, "eunuch," but in the others it renders "(military) officer," "(political) official," or "chamberlain." (The NEB consistently translates "eunuch" for every occurrence of the term.) While in some instances *sārîs* clearly has the literal sense "emasculated male" (BDB, p. 710), especially in some of the later OT writings (cf. Dnl. 1; Est. 1–2 *et passim*; Isa. 56:3f.; Sir. 30:20), elsewhere it appears to denote in a more general sense "courtier," "political official," or "military officer" in service to royalty. *See also* CHAMBERLAIN; OFFICER.

This usage in a more general sense occurs in 1 K. 22:9 par. 2 Ch. 18:8, where a *sārîs* functions as an emissary for Ahab, and in 2 K. 8:6, where another is appointed by the king to restore lost property to the woman of Shunem. Several *sārîsîm* throw Jezebel to her death from a palace window (2 K. 9:32f.). Describing the despotic character of Near Eastern kingships, Samuel warns that the royal servants and *sārîsîm* will be beneficiaries of the king's harvest and vintage tax (1 S. 8:15). *Sārîsîm* are listed among ranking dignitaries in Jer. 34:19: princes, priests, and *sārîsîm* (cf. LXX *dynástas*, "men in power"). The *sārîs* Nathan-melech is said to have had a room in the temple during the time of Josiah (2 K. 23:11). In Jer. 29:2 (cf. 2 K. 24:12, 15) *sārîsîm*, together with the queen mother, harem wives, princes, courtiers, nobles, craftsmen, and smiths, are taken into exile along with King Jehoiachin. At the fall of Jerusalem the Babylonians captured, among others, a *sārîs* who was "in command of the men of war" (Jer. 52:25; 2 K. 25:19).

The term is similarly applied in the OT to foreign dignitaries; e.g., Potiphar, the captain of Pharaoh's guard (Gen. 37:36; 39:1), is called a *sārîs*, as are Pharaoh's chief butler and chief baker (40:2). In military contexts, the Assyrian officials sent by Sennacherib to negotiate tribute from the besieged Hezekiah (2 K. 18:17) are the *tartān* (commander-in-chief), the *raḇ-sārîs*, and the *raḇ-šāqēh* (chief officer); and the Babylonian *raḇ-sārîs* of Nebuchadrezzar, Nebushazban, is named in Jer. 39:13 (cf. v. 3) along with a host of other military officers of the Babylonian king. It is not certain whether *sārîs* has the general or specific sense in Isa. 39:7 par. 2 K. 20:18 — Isaiah's warning to Hezekiah that "some of your own sons . . . shall be eunuchs in the palace of the king of Babylon" (but cf. LXX *spádōn*, "eunuch").

The literal sense of the term is exemplified particularly in Esther (twelve times), where the *sārîsîm* are regularly identified by their personal names and by such titles as "keeper of the women" (*šōmēr hannāšîm*, 2:3, 15), "keeper of the concubines" (*šōmēr happîlagšîm*, 2:14), "keepers of the door" (2:21; 6:2), all generally reflective of Persian custom. The *sārîsîm* in 2 K. 9:32 and Jer. 41:16 may also have functioned in connection with the harem.

The Heb. *sārîs* is now generally considered a loanword from Akk. *ša rēši (šarri)*, "the one who is at the head [of the king]," i.e., "courtier" (first proposed by P. Jensen, 174 n.1; see also R. Borger, *Akkadische Zeichenliste* [1971], p. 31; *Lesestücke*, I, lxxvi; Bauer and Leander, p. 538; R. de Vaux, *Ancient Israel*, I, 121; K. A. Kitchen, p. 160; J. Fitzmyer, p. 108; BDB, p. 710). The term may have passed into Hebrew via Aramaic (cf. Sfire stele III.5; I.B.45; S. Kaufman, *Akkadian Influences on Aramaic* [1974], pp. 100, 147f., 152), and thence into Syriac and Arabic as well (cf. BDB, p. 710).

The Akkadian idiom *ša rēši* exhibits in the cuneiform literature the same double meaning as Heb. *sārîs*. Originally a generalized term for "courtier," "official," *ša rēši* underwent a specialization of meaning already before (cf. *ANET*, p. 181, where the term is used in the expression "turn into a eunuch"), but especially after the turn of the 1st millennium B.C. This semantic narrowing likely occurred as eunuchs increasingly were found to be the most reliable supervisory personnel in the harem. The same evolution of meaning may well explain the OT uses of the Hebrew counterpart, *sārîs*, since the specialized sense is clearly evident only in the later strata of the OT. Although scholarly consensus generally rests with the above explanation, two other opinions have been suggested: (1) two originally distinct Semitic homophones meaning "official" and "eunuch" have inextricably coalesced in Heb. *sārîs* (*Enc.Brit.* [1914], II, 247 [Cheyne]; cf. J. Gray, *I & II Kings* [*OTL*, 2nd rev. ed. 1970], pp. 449f.); (2) the meaning evolved from the specific to the general sense as eunuchs in domestic service for royalty merited ever more responsible positions for their reliability (*Enc. Brit.* [1911], IX, 890; this opinion, dependent on a suspect etymology of Gk. *eunoúchos* as "bed wardens," is rejected by L. Gray in *ERE*, V, 579).

2. LXX Usage. In the LXX *eunoúchos* is used almost exclusively to represent Heb. *sārîs* (thirty-one times, and seven times in Daniel in the compound *archieunoúchos*; cf. also *spádōn*, "eunuch," in Isa. 39:7). The peculiar LXX translation of *sārîsîm* as *dynástas*, "men in power," in Jer. 34:19 (LXX 41:19) suggests conscious accommodation to the Deuteronomic regulation excluding the castrated from the cultus. *Eunoúchos* is used in the LXX much as *sārîs* in the Hebrew OT, i.e., in the sense of a military or political official as well as in the more restricted sense of eunuch. In the Apocrypha the latter sense prevails (cf. Wisd. 3:14; Sir. 20:4; 30:20).

C. Judaism. That Herod the Great employed eunuchs in his court is reported by Josephus (*Ant.* xv.8.4.; xvi.8.1). Rabbinic Judaism approached the question of eunuchs from the viewpoint of creation, teaching that not to beget offspring was to disobey the divine command of Gen. 1:28 ("be fruitful and multiply"). A distinction was also made between the *sᵉrîs ʾāḏām*, "man-made eunuch," and the *sᵉrîs ḥammâ*, "eunuch by nature" (Mish. *Yebamoth* viii.4-6; cf. Jesus' distinctions in Mt. 19:12; see *TDNT*, II, 767).

III. In the NT.–The Gk. *eunoúchos* appears infrequently in the NT: five times in Acts 8:27-39 and twice in Mt. 19:12; in addition, the cognate verb *eunouchízō*, "make a eunuch," appears twice (Mt. 19:12). In Acts 8 the eunuch of the Ethiopian queen Candace comes to faith in Jesus and is baptized. That this person is a eunuch is of greater significance than that he is an Ethiopian, for this event is a fulfillment of the prophetic saying in

Isa. 56:3-5. The eunuch (an outcast like the Samaritans in the preceding verses of Acts 8) is no longer excluded from the kingdom of God. *See* ETHIOPIAN EUNUCH.

Jesus' teaching goes beyond the rabbinic teaching in that He distinguishes three types of "eunuchs": those who are so by birth, those who have been involuntarily castrated, and those who have "made themselves eunuchs for the sake of the kingdom of heaven" (Mt. 19:12). The last category is often interpreted figuratively rather than literally, in the sense that those who for the sake of the kingdom forego the sexual life and marriage do so in order to focus their energies totally on a goal that reaches beyond the demands of existence — the goal of establishing the kingdom of God on earth (*TDNT*, II, 768). A contemporary example of this last group, familiar to Jesus, would have been the Qumrân Essenes for whom celibacy was a part of the community discipline.

IV. In the Early Church.–The attitude of the early Church to self-mutilation appears to have been ambivalent. The Mt. 19:12 saying wielded a strong influence and in early exegesis was frequently interpreted literally (*TDNT*, II, 768). Nevertheless, only a few early Christians (the great theologian and linguist Origen, A.D. 185-254, being the most celebrated example) took the drastic step of self-castration in hope of avoiding temptation or sexual sin. Canons were eventually adopted in the 4th cent. admitting into the Christian ministry those belonging to the first two categories of Mt. 19:12, but permanently barring from the ministry those who had emasculated themselves (Apos. Const. viii.21-24,47; see *ERE*, V, 583; *TDNT*, II, 768; Quesnell, pp. 335-358; Blinzler, pp. 254-270).

D. G. BURKE

EUODIA ū-ō′dē-ə [Gk. *Euodia*–'prosperous journey'] (Phil. 4:2); AV EUODIAS. A Christian woman, one of the members of the church in Philippi. She and SYNTYCHE, who is named in the same verse, were evidently persons of note, prominent in the work of the church there. At Philippi the gospel was preached first to women (Acts 16:13) and the church was first formed among women, evidently in the house of Lydia (vv. 15, 40). Possibly, as J. B. Lightfoot (*Philippians* [1978], *in loc.*) has suggested, Euodia and Syntyche were deaconesses in the Philippian church; but whatever their position in this respect, differences had arisen between them. The dispute — the nature of which is not known — had become chronic, and news of it had reached Paul in his captivity in Rome.

The Christian life exemplified in the church at Philippi gave Paul almost complete satisfaction. Apparently the only thing that caused him uneasiness was the lack of harmony between Euodia and Syntyche. In Phil. 4:2, therefore, he appeals to them impartially (he repeats the verb *parakalō*, "I entreat") to give up their differences and to live at peace in the Lord. His motive is to bring about reconciliation between these two women who had "labored [Gk. *synēthlēsán*, 'struggled,' 'fought'] side by side with me in the gospel" (4:3). Paul asks a certain (unnamed) person, whom he terms "true yokefellow," to assist them. It is uncertain who is meant by "true yokefellow" (*see* YOKEFELLOW). He also asks Clement and all the other Christians at Philippi, his fellow workers, to aid in this work of reconciliation.

See comms. on Philippians. J. RUTHERFURD

EUPATOR ū′pə-tor [Gk. *Eupatōr*–'of noble father']. The name given to Antiochus V (1 Macc. 3:32; 6:17). Epiphanes had appointed his friend and foster brother Philip as his son's guardian; but in Philip's absence Lysias continued his duty as guardian, set the king upon the throne, and named him Eupator (164 B.C.). Shortly after his accession Eupator collected a large army and, accompanied by Lysias, marched against Jerusalem for the relief of a Syrian garrison that was threatened by Judas Maccabeus (6:19f.). Judas was repulsed at Beth-zechariah, and after a severe struggle Beth-zur was captured (vv. 31-50). The Jewish force in the temple was hard pressed and reduced to the last extremity (v. 53), when Lysias, upon hearing that his rival Philip had returned from Persia and had made himself master of Antioch (Josephus *Ant.* xii.9.5f.), made a hasty peace and returned to meet Philip, whom he easily overpowered. In the following year (162 B.C.) Antiochus and Lysias were both put to death by Demetrius Soter, son of Seleucus, in requital of wrongs inflicted upon himself by Antiochus Epiphanes (1 Macc. 7:2-4; 2 Macc. 14:1f.; Josephus *Ant.* xii.10.1). J. HUTCHISON

EUPHRATES ū-frā′tēz [Heb. *pᵉraṯ*; Gk. *Euphratēs*; Akk. *purattu*]. The largest river in southwest Asia and one of the two main rivers in Mesopotamia. The upper course includes the streams of the Armenian mountains, which unite through two main branches to form the Euphrates N of Malatya. The northernmost of these main tributaries according to some maps still bears the name Firat, the Turkish form of Euphrates. After going through a narrow channel, generally southward, the river swings SW and enters the plain at Samsat, the ancient Samosata, about 80 km. (50 mi.) NW of the ancient site of Ḥarrân (Haran, Gen. 11:31). *See* Plate 45.

From this point, which is the beginning of the middle Euphrates, the river begins the "great bend" until at last it is flowing SE, continuing for 1100 km. (700 mi.) to the plain of ancient Babylonia. Approximately at the modern border between Turkey and Syria, just N of Jerablus, is the site of Carchemish, an important crossing, the capital of the kingdom of Mitanni, and one of the capitals of the Hittite empire and later of the Assyrian empire. At Carchemish in 605 B.C. Nebuchadrezzar II of Babylon defeated Neco of Egypt (2 K. 24:7). Farther south at ar-Raqqah the Balîkh River, one of the important tributaries, flows into the Euphrates from the north. Ḥarrân is on the Balîkh just N of the Turkish border. The Khābûr (Habor) River, the only other main tributary, empties into the Euphrates from the north at Bushayrah. The name Aram Naharaim ("Aram of the two rivers," the Mesopotamia of Gen. 24:10) originally belonged to the region between the Khābûr and the west bend of the Euphrates. Some 80 km. (50 mi.) SE of the junction of the Euphrates and the Khābûr is the site of Mari, an important city-state in the time of Hammurabi. A few miles to the northwest is Dura-Europus.

The lower Euphrates begins at Hit, where important bitumen (pitch) reservoirs were located that supplied the bonding material for much of the building in ancient southern Mesopotamia. The land from here south is very flat, and the lower Euphrates follows a circuitous route

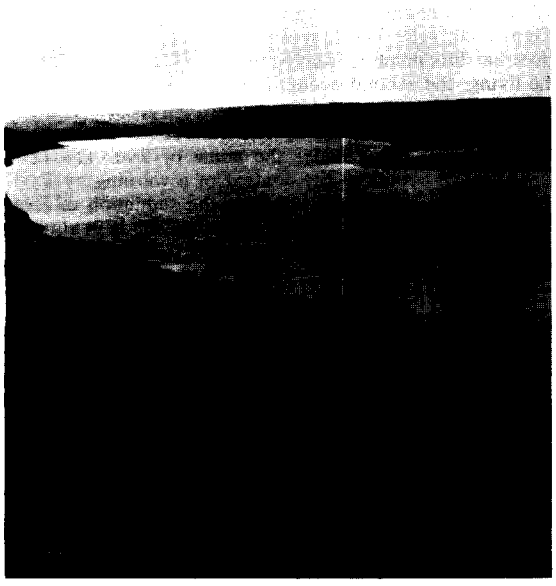
EUPHRATES

The Euphrates flows through mountains in Anatolia (W. S. LaSor)

through it before flowing into the Persian Gulf. This portion of the river overflows its banks every spring because of the melting snow in the mountains, and this flooding has caused much of the area to become marshland.

The river flows generally SE for 2860 km. (1780 mi.). In ancient times it emptied directly into the Persian Gulf, which according to some scholars extended over 160 km. (100 mi.) farther inland than it does today. This view has been challenged by other scholars, and discussion on the matter continues. It has been thought that the coast was built up through the centuries by the great amount of silt brought down by the Euphrates and Tigris rivers. Today these two streams are joined together and flow as one river, the Shaṭṭ el-Arab, 190 km. (120 mi.) to the gulf, where the water is deep enough for warships. In antiquity the course of the lower Euphrates was considerably different from its present location, as indicated by the locations of the ancient ruins. At that time it flowed considerably farther to the east than it does today, passing such sites as Kish, Nippur, Shuruppak, and then turning southward to Erech (Warka). From Erech the river continued SE, crossing the present course of the Euphrates,

The Euphrates winds through the Syrian countryside E of Aleppo (D. Baly)



and touched Ubaid and Ur. If the theory of the extension of the Persian Gulf is accepted, Ur was close to the gulf at that time.

The Euphrates is the third most frequently mentioned river in the Bible. Only the Jordan and the Nile surpass it in scriptural notice. It is referred to by name twenty-one times and probably more often is simply called "the river" (in which cases it must be identified from the context). This designation is given to supply the location of the action being narrated or to limit the scope of a phrase denoting a geographical area. By this means, however, we learn two rather unusual details about the Euphrates River: It flowed in the vicinity of the Garden of Eden (Gen. 2:14), and in Revelation it is the scene of some phases of divine judgments that will fall on the earth during the tribulation period (Rev. 9:14; 16:12). This stream was too far away from the land of Canaan to appear prominently in the history of the ancient Hebrews. It was the largest river that flowed the year around, in contrast to the watercourses of their own land, which were torrents in the rainy season and dry beds the rest of the time.

The plain through which the Tigris and Euphrates rivers flowed was the home of one of the earliest civilizations, that of the Sumerians, so the Euphrates was one of the most famous waterways of ancient times. The literature of these people mentioned this river frequently as one of the elements of their daily lives. Many cities were erected on its banks, the most notable of which was Babylon. IRRIGATION was practiced, for although rainfall in the region was insufficient for crop growing, this use of the water from the river made the land very productive and able to support a dense concentration of people.

The Babylonians who succeeded the Sumerians in control of this region adopted and improved the irrigation system of their illustrious predecessors. It is recorded that one of the Babylonian kings had a tunnel dug under this stream to enable him to pass back and forth from his royal palace on one side to the temple of his god on the other bank of the river. The medieval and more recent inhabitants of the vicinity have not practiced irrigation. The soil that became barren, through neglect, can support only a very sparse population. In modern times some attempts are being made to remedy this unhappy situation.

The upper Euphrates formed a natural boundary. This is demonstrated by historical events. The ancient royal Egyptian conquerors never carried their arms beyond this waterway; it formed the dividing line between the Hittite empire on the west and the Assyrian domain on the east; and the forces of Rome were able to extend their realm

eastward only as far as this stream. But most important from the biblical standpoint, the river marked the eastern limit of the Promised Land (see Gen. 15:18).

EUPOLEMUS ū-pol'ə-məs [Gk. *Eupolemos*]. Son of John the son of Accos; one of the two deputies sent by Judas Maccabeus (1 Macc. 8:17; 2 Macc. 4:11) to Rome *ca.* 161 B.C. to ask the help of the Romans against Demetrius. Eupolemus has been identified with the historian of the same name quoted by Eusebius (*Praep. ev.* ix.17ff.), but there is no evidence that the historian was of Jewish origin.

EUROCLYDON (Acts 27:14, AV). *See* NORTHEASTER.

EUTYCHUS ū'tə-kəs [Gk. *Eutychos*–'fortunate'] (Acts 20:9). The story of Eutychus occurs in the "we" section of Acts and is therefore related by an eyewitness of the incidents (Acts 20:7-12). On the first day of the week the Christians of Troas met for an evening service in an upper chamber, where they were joined by Paul and his company. Since he was to leave in the morning, Paul "prolonged his speech until midnight." The youth named Eutychus, sitting at the open window, was overcome by sleep because it was so late, and fell through the opening from the third story. He "was taken up dead." This direct statement is evaded by some scholars, who understand it as merely the judgment of those who took him up, translating "for dead" or "as though dead." This, however, is not the reading of the Greek. Luke the physician is giving his verdict, and he plainly believes that a miracle was wrought by Paul in restoring a corpse to life. According to his account, Paul went down and embraced the youth (cf. 1 K. 17:21; 2 K. 4:34) while comforting the lamenting crowd, "Do not be alarmed, for his life is in him." The interrupted meeting was resumed, the bread was broken, and the conversation continued till break of day. "And they took the lad away alive, and were not a little comforted."

S. F. HUNTER

EVANGELIST [Gk. *euangelistēs*–'a bringer of good news' < *euangelizomai*–'announce good news'] (Acts 21:8; Eph. 4:11; 2 Tim. 4:5); NEB also "to spread the Gospel." Though the noun *euangelistēs* occurs in the NT only three times, the verb occurs frequently. Jesus Christ was an evangelist, for He preached the gospel (Lk. 20:1); Paul was an evangelist as well as an apostle (Rom. 1:15); Philip the deacon was also an evangelist (Acts 21:8), as was Timothy the pastor (2 Tim. 4:5), and indeed all the early disciples who, upon being driven out of Jerusalem, "went about preaching the word" (Acts 8:4).

But Eph. 4:11 teaches that one particular order of the ministry, distinguished from every other, is singled out distinctly by the Head of the Church for this work. All may possess the gift of an evangelist in a measure and be obligated to exercise its privilege and duty, but some are specially endued with it. "And his gifts were that some should be apostles, some prophets, some evangelists, some pastors and teachers."

It will be seen that as an order in the ministry, the evangelist's work precedes that of the pastor and teacher, a fact that harmonizes with the character of the work each is still recognized as doing. The evangelist has no fixed place of residence, but moves about in different localities, preaching the gospel to those previously ignorant of it. As these are converted and united to Jesus Christ by faith, the work of the pastor and teacher begins, to instruct them further in the way of Christ and build them up in the faith.

At a later time the name of "Evangelist" was given the writers of the four Gospels because they tell the story of the gospel and because the effect of their promulgation at the beginning was very much like the work of the preaching evangelist. In character, the Gospels bear something of the same relation to the Epistles as evangelists bear to pastors and teachers.

J. M. GRAY

EVE [Heb. *ḥawwâ*; Gk. *Heua*]. The name given to the first woman by the first man after the fall. According to the popular etymology in Gen. 3:20, the name seems to be derived in some way from the verb *ḥayyâ*, to "live": "The man called his wife's name Eve, because she was the mother of all living."

It is interesting that this is the third name given to the first woman. When she was created and brought to the first man, he named her "woman" (Heb. *'iššâ*) to indicate that she was taken from man, made of the same bone and flesh, and therefore able to be his partner and to become one flesh with him (Gen. 2:23). This was her second name.

Her first name was given to her by God. It is the same name given to the first man. Together they are called *'ādām* ("man," "mankind"), created by God in His own image to be fruitful, to fill the earth, and to rule over all living creatures (Gen. 1:26-28).

Each of these three names has its own significance and its own usage in Scripture. Heb. *'ādām* is found explicitly as a name for Eve in Gen. 1:26-28 and 5:2. Thereafter, Eve is presumably included in the further references to "man" or "mankind." This is her primary name, assigned by God, signifying that she, with the man, is created in the image of God, blessed by God, named by God, and given by God the same responsibility to tend and have dominion over creation.

The second name, *'iššâ* ("woman" or "wife"), is used to refer to the first female human being in the stories of the creation of mankind and the fall (Gen. 2:20-25; 3:1-19; cf. Gk. *gynē* in 1 Cor. 11:8f.; 1 Tim. 2:14 [referring to the "curse" on the woman in Gen. 3:16]). This name, given to her by her husband, signifies her role as partner and wife, "of one flesh" with her husband.

The third name, Eve, occurs after the story of the fall (Gen. 3:20; 4:1). The first reference tells us that Adam gave her this name to signify that she was mother of all the living; the second occurs in telling of the conception of her first son.

In the NT there are only two references to the first female human being under the name of Eve. The first (2 Cor. 11:3) occurs in the context of a warning by Paul to the church in Corinth, recalling the seduction of Eve by the serpent and declaring that the church is in similar danger of being seduced into corrupt thinking and into losing her single-hearted devotion to Christ. The second (1 Tim. 2:13) occurs in a warning to a church in similar danger — the church in Ephesus, of which Timothy was bishop or elder — again recalling the creation and seduction of Eve, and instructing Timothy not to allow a woman to "be a teacher" or "domineer" over men in his church (2:8-15, NEB).

In the OT "Eve" has its primary significance in referring to the first woman as the mother of the human race. But in the NT a shift takes place. When Paul alludes to the creation and fall, he refers to the man Adam as the one in whom all die because of his sin (Rom. 5:12-19; 1 Cor. 15:21f.); but he refers to Eve as an illustration of

the dangers of being seduced into evil (2 Cor. 11:3; 1 Tim. 2:13). The references to Adam are made in the context of a teaching about the condition of mankind lost in sin. The references to Eve appear in warning instructions to churches in specific danger of being seduced into false teaching.

Thus, whereas in the OT "Eve" simply signifies the role of the first woman as mother of the human race, NT usage also recalls the seduction of the first woman into evil, and Eve comes to serve as a warning — an example of what can happen when false teachings are heeded.

The influence of rabbinic theology of the intertestamental and early Christian eras in this shift is quite clear. In a typical passage from the Midrash, women are viewed as having qualities that make them unreliable and far from the ideal that God intended: "I will not create her from the eye, lest she be coquettish; nor from the ear, lest she be an eavesdropper; nor from the mouth, lest she be talkative; nor from the heart, lest she be of a jealous nature; nor from the hand, lest she be thievish; nor from the foot, lest she be a gadabout" (Midr. *Gen. Rabbah* xviii.2.; see Stewart, p. 71). The daughters of Eve, like herself, are thus seen as having the very qualities that God tried to avoid. This and many other rabbinic passages indicate that by NT times there was a significant body of teaching, with which Paul must have been familiar, that referred to Eve (and woman in general) in terms of her seductiveness and other undesirable qualities (cf. Stagg and Stagg, pp. 50-53).

It is not surprising, therefore, that Paul refers to Eve not simply as "mother of the living" but also with respect to her seduction into evil. Much traditional theology has concluded from this that in the NT passages Eve is not only an illustration but in her fallen nature is somehow representative of all women. Some early church fathers exegeted these NT passages to show that women are by nature weaker, more prone to evil, and the original cause of the fall; therefore they are unworthy to teach or hold positions of authority in the church or society (e.g., Tertullian, Basil of Ancyra, and St. Augustine; see Tavard, pp. 76, 115).

A more positive view of Eve is based on Eph. 5:22-33. Although Paul does not mention Eve by name in this passage, the quotation of Gen. 2:24 shows that the relationship of Adam and Eve (before the fall) is understood as symbolizing that of Christ and the Church. This positive view was so important that some of the church fathers could view Mary as the New Eve and Christ as the Second Adam.

In modern times conservative theologians often appeal to Eve's being created after Adam and to her being the first to fall into sin as arguments against allowing women to hold positions of ordained leadership within the church (although, interestingly, they no longer use these arguments with respect to leadership in society). Many other conservative, evangelical theologians, however, have come to interpret the references to Eve as purely illustrative. They point out that the old descriptions of the nature of all women, derived from Pauline references to Eve, are simply not borne out in experience, nor are they supported by exegetical material (cf. Wilson and De Jong, pp. 121-176). Some have traced carefully the influence of rabbinic theology in Paul's references to Eve (e.g., Jewett, pp. 86-94). Others have documented cultural factors that may have called for Paul's instructions (e.g., Stagg and Stagg, pp. 15-79, 162-187; Mollenkott, pp. 90-106). Still others have pointed out that in Ephesus, where Timothy was bishop, there was a special danger of heresy propagated by false teachers, some of whom may have been women, and that this may have prompted the instructions to keep women from teaching in that particular church (e.g., Spencer, pp. 215-222).

Finally, biblical scholars are now more aware that Paul's own practice of allowing women to prophesy in the Corinthian church, his use of women as fellow workers, and the examples of such women as Deborah, Huldah, Miriam, Anna, and Phoebe create real difficulties for the position that would limit the role of women on the basis of Paul's references to Eve (cf. Callahan, pp. 35-56).

EVE, GOSPEL OF. A Gnostic work mentioned by Epiphanius (*Haer.* 26.2ff.). It is possible that the subject of this work is Eve's discovery of *tó brōma tḗs gnṓseōs* ("the food of *gnṓsis*," or saving knowledge) through a revelation from the serpent (*Haer.* 26.2.6), and that this may account for its being called a "gospel" (see H-S, I, 241-43). *See also* APOCRYPHAL GOSPELS V.B.

EVENING [usually Heb. *ʿereḇ*; Gk. *opsía, opsé, hespéra*]; **EVENTIDE** [Heb. *ʿāraḇ*] (Isa. 24:11); AV, NEB, DARKENED. "Evening" is used by the RSV with slightly different meanings. In Lev. 15 it designates sunset, the beginning of the Hebrew day, as the time when a ceremonially unclean person became clean again. Gk. *hespéra* apparently designates sunset in Lk. 24:29. Gk. *opsé* is literally "late" (Mk. 11:19; 13:35). In Ezk. 12:4, 7 "evening" means the early part of the night, "in the dark" (vv. 6f.). In Prov. 7:9 and Jer. 6:4 ("the shadows of evening lengthen") it is twilight, the time of approaching darkness.

Twilight may also be the time designated by the Heb. *bên hāʿarbayim* (lit. "between the two evenings" [cf. Ex. 12:6, RSV mg.]; RSV "in the evening"). It is mentioned as the time when the lamps were lit and the evening incense burned (Ex. 30:8), when the evening portion of the daily burnt offering was made (Ex. 29:39, 41; Nu. 28:4), and when the Passover lamb was slain (Ex. 12:6; Nu. 9:3, 5, 11). The precise time of day it designated is not known. According to the Karaites and Samaritans it was a time between sunset and total darkness. Although the Mishnah allowed for slaughtering the Passover lamb in the afternoon, this may originally have occurred after sunset (see *IB*, I, 919; KD on Ex. 12:6).

H. PORTER N. J. O.

EVENT. Occurs in the plural only, translating *taúta eplērṓthē* (AV "after these things were ended"; NEB "when things had reached this stage") in Acts 19:21 and the phrase *perí tṓn mēdépō blepoménōn* (AV "of things not seen as yet"; NEB "the unseen future") in He. 11:7.

EVERGREEN CYPRESS [Heb. *bᵉrôš raʿᵃnān*] (Hos. 14:8 [MT 9]); AV GREEN FIR TREE; NEB PINE-TREE. According to KoB (p. 148), Heb. *bᵉrôš* designates a Phoenician juniper. H. N. and A. L. Moldenke, however, take this passage as referring to the stone pine, or *Apinus pinea* (*MPB*, p. 46). The adjective *raʿᵃnān* indicates that it was "luxuriant" or "full of leaves" (*CHAL*, p. 343).

See CYPRESS; FLORA IV.D.

EVERLASTING. *See* ETERNITY.

EVI ē'vī [Heb. *'ēwî*–'desire'; Gk. *Euei*]. One of the five kings or chiefs of the Midianites slain by Israel during their sojourn in the plains of Moab (Nu. 31:8; Josh. 13:21).

EVIDENCE; EVIDENTLY. In Jer. 32:10-16, 44, the AV uses "evidence" for Heb. *sēper* ("a writing") in the obsolete sense of a deed of purchase (cf. RSV, NEB). In Acts 10:3 the AV uses "evidently" in another obsolete sense to translate Gk. *phanerós* ("openly," "clearly," "manifestly"; cf. RSV, NEB, "clearly").

"Evidence" is also the AV's translation of Gk. *élenchos* in He. 11:1: "Now faith is . . . the evidence of things not seen." The Greek term denotes "putting to the test," "examining for the purpose of proof," "bringing to conviction." Thus, a well-grounded and assured CONVICTION (cf. RSV; NEB "makes us certain") of things not seen is the implied result of this putting to the test. See also *TDNT*, II, *s.v.* ἐλέγχω κτλ.: ἔλεγχος (Büchsel).

W. L. WALKER
N. J. O.

EVIL [Heb. *ra'* (Gen. 2:9; Dt. 23:9; 2 Ch. 33:9; Est. 7:7; Ezk. 14:21; etc.), *rā'a'* (Ex. 5:22; etc.), *rō(a)'* (Dt. 28:20; 1 S. 17:28; Isa. 1:16; Jer. 21:12; 23:2,22; 26:3; 44:22), *dibbâ*–'calumny' (Nu. 13:32; 14:36f.; Ezk. 36:3), *'āwen*–'trouble, deceit, nothing' (Job 15:35; Ps. 6:8 [MT 9]; 7:14 [MT 15]; 28:3; 53:4 [MT 5]; 59:2,5 [MT 3,6]; 92:11 [MT 12]; Isa. 29:20; Jer. 4:14f.), *zimmâ*–'evil plan' (Ps. 26:10; 119:150; Prov. 21:27; 30:32), *m'zimmâ*–'plot' (Ps. 37:7; 139:20; Prov. 12:2), *rāšā'* (Ps. 140:8 [MT 9]), *rešaʿ* (Prov. 16:12), *maʿaʿlāl*–'deed' (Jer. 11:18); Gk. *ponērós* (Mt. 5:11,37; 7:17f.; Lk. 3:19; 6:22; Acts 28:21; 2 Tim. 4:18; He. 10:22; Jas. 2:4; 3 Jn. 1:10; Rev. 16:2; etc.), *ponēría* (Rom. 1:29; 1 Cor. 5:8), *kakós* (Mt. 27:23; Acts 23:5; Rom. 1:30; Col. 3:5; Tit. 1:12; etc.), *kakía* (1 Cor. 14:20; 1 Pet. 2:16), *kakopoiéō*–'do evil' (3 Jn. 11), *kakologéō*–'speak evil of' (Mt. 15:4; Mk. 7:10; 9:39; Acts 19:9), *phaúlos*–'worthless' (Jn. 3:20; 5:29; 2 Cor. 5:10; Tit. 2:8), *saprós*–'decayed, corrupt' (Eph. 4:29), *blasphēméō*–'speak evil against' (Rom. 14:16; Tit. 3:2), *katalaléō*–'speak evil of' (Jas. 4:11), *adikéō*–'injure, act unjustly' (Rev. 22:11)]; AV also WICKED, BAD, INIQUITY, VANITY, HARM, MISCHIEF, SLANDER, etc.; NEB also WRONG, WRONGDOING, HARM, MISCHIEF, CRUELTY, CALAMITY, RUIN, WICKEDNESS, MISDEED, FALSE, etc. *See also* EVIL-DOERS; EVIL-WORKERS.

  D. Summary

"What is the meaning of evil?" can be taken as a semantic question, "What does the word 'evil' mean?" But it can also be taken — and must also be taken — as a human and existential question, "How can one account for, and how should one respond to, the reality of evil in our world?" The semantic question appropriately calls for our attention first.

I. The Meaning of "Evil."–*A. The Expressive Component.* The word "evil" can be analyzed as having both an expressive and a descriptive component. It is expressive of disapproval, whether of an action, or a state of affairs, or a person. The speaker reveals something about himself when he calls anything evil, namely, that he disapproves of it. Sometimes this expressive component dominates the meaning of the word, e.g., when it is used simply to express an immediate or spontaneous reaction of dislike. This seems to be the case when Jacob complains to Pharaoh that his life has been evil (Gen. 47:9); "evil" is used here to express Jacob's own emotive state rather than to describe his life.

The expressive component dominates the use of the word by the author of Ecclesiastes. When he says, "This also is vanity and a great evil" (Eccl. 2:21), and "There is a grievous evil" (5:13; cf. 5:16; 6:1; 9:3; 10:5), he expresses his emotive reaction to certain states of affairs. He does not give any criteria for this emotive response; he simply reports it or, better, expresses it.

B. The Descriptive Component. The expressive component is never dismissed; the word "evil" is always expressive of the speaker's emotive state. But the emotive state is not exhausted by being vented. Rather, people not only express their disapproval and dislike, but also direct them. To direct disapproval, to direct the acting and reacting that is associated with our emotive states, demands that "evil" be given some objective referent, some descriptive component.

1. Unhappiness. "Evil" in the Bible can refer to someone else's emotive state as well as express one's own. So when Judah appeals to Joseph to allow Benjamin to return with them, he says that he fears "to see the evil that would come upon my father" if Benjamin were not to return (Gen. 44:34). Judah is not only expressing his own dislike of what would come upon his father; he is also referring to his father's emotive state, his misery, if Benjamin stayed in Egypt. So the descriptive component of "evil" can be unhappiness. This is the meaning in Prov. 15:15, "All the days of the afflicted are evil." "Evil" there expresses the unhappiness and misery of the afflicted as well as expressing the author's own emotive state in response to that situation.

2. Harm or the Threat of Harm. The descriptive component, however, is not always equivalent to unhappiness. Sometimes what harms or threatens to harm one's life, self-esteem, reputation, or society's well-being is called "evil." This descriptive component is obvious when "evil" is used of animals that are considered dangerous (Lev. 26:6; Ezk. 14:21) or of places like Kadesh, where there was no water and the people of Israel thought they would die (Nu. 20:5), or even of situations that are full of danger, as when Pharaoh requires the same number of bricks without providing straw (Ex. 5:19). This is the meaning when "evil" is used of diseases (Dt. 7:15), sores (Rev. 16:2), spirits (e.g., Lk. 7:21), or men who harm (Ezk. 30:12). A name or epithet can be called "evil" when it is an accusation that harms a person's reputation (Dt. 22:14, 19; Neh. 6:13).

Harm or the threat of harm seems to be the descriptive component of "evil" in Jas. 3:8 in its description of the tongue as a "restless evil." That interpretation is confirmed by the next phrase, "full of deadly poison." Heb. *dibbâ* is to be interpreted as having this objective referent, but notice that while the "evil report" of the

spies (Nu. 13:32; 14:36f.) was evil in the sense that it threatened harm to the people if they entered the land, the "evil gossip" of Ezk. 36:3 was evil in the sense that it was a threat to their reputation. With the words, "Evil is determined by him" (1 S. 20:7), Jonathan reports that his father Saul planned to harm David. Harm or the threat of harm is the descriptive component whenever God "brings evil" or "sends evil." Joshua warned the people of God that God would bring evil upon them until they perished if they transgressed the covenant (Josh. 23:15). In response to unfaithfulness God brings harm (e.g., 1 K. 14:10; 21:21,29; 2 K. 22:16,20; Jer. 4:6; 6:9).

3. Dysfunction. In the proverb "the bad tree bears evil fruit" (Mt. 7:17f.), the descriptive component of "evil" is simply some departure from commonly accepted standards. Similarly, Eccl. 10:1 calls the odor evil because it departs from the standard for perfumes and ointments.

4. Immorality and Unfaithfulness. "Evil" can also have either immorality or unfaithfulness as its descriptive component. This "moral sense" and this "religious sense" can be distinguished in Scripture, but they cannot be separated. In the refrain of 1 and 2 Kings, ". . . did what was evil in the sight of God," "evil" refers always to unfaithfulness and specifically to idolatry and apostasy (e.g., 1 K. 11:6). In Judges and Chronicles the phrase is identically used, always with reference to apostasy and idolatry (cf. also Nu. 32:13; Dt. 4:25; 9:18; 17:2). But in Samuel the phrase is used with reference to immorality; it is used of Saul when he disobeys God's concrete command by gathering the spoils of victory rather than destroying the enemy and its goods (1 S. 15:19), and of David when he kills Uriah and takes Bathsheba (2 S. 12:9).

In the phrase of Deuteronomy, "you shall purge the evil from the midst of you" (i.e., capitally punish), "evil" refers to apostasy and idolatry (Dt. 13:5; 17:7), to disobedience of authority (17:12), dishonoring parents (21:21), giving false testimony (19:19), harlotry (22:21), adultery (22:22,24), and stealing (24:7).

The intimacy of this relation between evil as immorality and evil as unfaithfulness comes into clearest focus with the prophets. The "evil" of Isa. 1:16, e.g., is at once that they have forsaken God and that they do not correct oppression. Isaiah defines (by means of parallelism) "did what was evil in my eyes" simply and comprehensively as "chose what I did not delight in" (Isa. 65:12; 66:4). That includes both unfaithfulness and immorality.

Not only actions can be called "evil" in these senses, however, for there are not only "evil doings" but an "evil way" (e.g., Jer. 23:22; 25:5). Indeed, evil doings and an evil way are but the concretization of evil dispositions. The wicked man "with perverted heart devises evil" (Prov. 6:14). "The soul of the wicked desires evil" (Prov. 21:10). Therefore, persons themselves can be called evil (e.g., Ezk. 30:12; Prov. 11:21; 12:13), and similarly the heart (Jer. 3:17; 7:24; 11:8; 18:12) and the will (Jer. 16:10) can be called evil with the use of synecdoche.

This movement in emphasis from external actions to internal dispositions reaches its climax in the NT. That is, of course, the point of the proverb about trees and their fruit (Mt. 7:17f.). Perhaps the clearest indication is Mt. 12:35 (cf. par. Lk. 6:45), "The evil man out of his evil treasure brings forth evil." The concern of Jesus — and the NT generally — is less with concrete acts of unfaithfulness and specific acts of disobedience than with the person from whom they issue. "For out of the heart come evil thoughts, murder, adultery, fornication, theft, false witness, slander" (Mt. 15:19 par. Mk. 7:21). Moreover, not only individuals and their dispositions but also groups can be called evil: family (Jer. 8:3), a people (Jer. 13:10), a generation (Dt. 1:35; Mt. 12:39,45; 16:4; Lk. 11:29). This movement from calling actions evil to calling individuals and groups evil seems to be licensed when people habitually do evil, when they stubbornly persist in evil, adamantly refusing education and repentance (cf. Jer. 3:17; 7:24; 11:8; 16:10).

This diversity of meaning is obviously important for interpretation. The diversity is already present in the Hebrew and Greek words; therefore, translations frequently represent some decision about the descriptive component. When Pilate, e.g., asks the people for a justification for their demand that Jesus be crucified ("Why, what evil [Gk. *kakós*] has he done?" [Mt. 27:23 par.]), is the descriptive component of "evil" harm, threat, immorality, or unfaithfulness? The NEB has made the decision that the descriptive component here is harm and translates *kakós* thus. The parallel in John, however, makes it clear that the Jews and Pilate were concerned about a crime Jesus had committed — some wrong, some disobedience to the law. The meaning is usually made clear from the context, but that does not allow one to ignore this diversity of meaning.

By providing a referent the descriptive component enables us to direct our expressions of dislike and disapproval. But it is also necessary to criticize our feelings of dislike and disapproval and to criticize our ways of thinking and acting associated with them. That critical task confronts us with the necessity of discerning what the status and meaning of evil really is. If "evil" really is an expletive for expressing the emotive state of dislike — and only that — then the critical task is impossible. Perhaps we can choose to ignore or change those feelings; but a reason for ignoring or changing them would have to come from some source other than the meaning of evil, for "evil" is then simply a word to use to vent those feelings. If evil really is unhappiness, then one must do all we can to promote happiness. The critically reflective process demands that we at least rank these descriptive components. Harm may be evil and not evil at the same time, and that is not a contradiction, nor even a paradox, but the result of using "evil" with two different descriptive components. It is clearly evil in the sense of evil in which the descriptive component is harm, but it may very well not be evil in the sense of evil in which the descriptive component is immorality or unfaithfulness. (Of course, sometimes something is both immoral and a threat of harm, e.g., the "evil woman" of Prov. 6:24.) It is therefore important to look beyond the semantics of "evil" to the theology of evil, to ask the question of the meaning of evil in the purposes of God.

II. Special Semantic Studies.—*A. Evil One.* Gk. *ho ponērós* may be translated "evil" or "the evil one." It clearly means "the evil one" in Mt. 13:19, because the Synoptic parallels have *satanás* (Mk. 4:15) and *diábolos* (Lk. 8:12). And these passages may also be used to define the use of *ho ponērós*: "the evil one" is a term for the devil, for Satan, for the spirit that opposes God and His people. It is a common term for the devil in 1 John. The dualism of the Epistle, which makes man the field for the battle between Christ and Satan, is reflected in this use of "the evil one" (2:13f.; 3:12; 5:18f.). Eph. 6:16 also is a fairly clear reference to the devil (cf. 6:11).

Other cases, however, are more dubious (Mt. 13:38; 5:37; Jn. 17:15; 2 Thess. 3:3). Probably the most important of the disputable cases is Mt. 6:13, where *toú ponēroú* occurs in the Lord's Prayer. The NEB translates it "the evil one," while the RSV translates it "evil" and gives "the evil one" as a marginal reading. The Eastern

Church has favored "the evil one," the Western Church, "evil." Calvin, in his commentary on the passage, leaves the question open. And that seems the prudent course, for whether one understands the whole of evil or the eminence of evil, the petition is for God's deliverance.

B. Knowledge of Good and Evil. Consideration of this phrase is important, not only because it contains the word "evil," but also because the tree of the knowledge of good and evil has figured importantly in theologies of the origin of evil. This phrase is, of course, most familiar in connection with the tree of the knowledge of good and evil, but it may be best to begin apart from that tree.

In Dt. 1:39, after God has told the Israelites that He will not permit them to enter the land of Canaan, He says, "Moreover your little ones, who you said would become a prey, and your children, who this day have no knowledge of good or evil, shall go in there." Is knowledge of good and evil here a mark of moral maturity? And is the children's lack of it their innocence, their inculpability for the unfaithful anxiety of the people about entering Canaan? An alternative interpretation would be to construe their lack as parallel to "would become a prey." "Have knowledge" (Heb. *yāḏaʿ*) can mean "have skill" or "have the power to do" (e.g., Gen. 25:27). And the expression "good and evil" can be understood as encompassing everything (Prov. 15:3; Lev. 5:4) — everything is either good or evil. Taking the two components together, then, the lack of the knowledge of good and evil would be equivalent to the children's complete lack of power in anything whatsoever, which would make them a prey to the Canaanites. But the context of this phrase — the judgment of God upon the people of Israel — and the apparent excusing (rather than justifying) of the children supports the first interpretation, that "knowledge of good and evil" is equivalent to moral maturity, a presupposition for moral culpability, as one assumes when excusing children by saying "they do not know any better yet."

Hebrews 5:14 picks up the Hebrew idiom with obvious reference to maturity. The parallel phrase, denoting that which children lack, is "the word [Gk. *lógos*] of righteousness." That the culpability theme is also present here is evident from 6:4f.

In 2 S. 14:17 the phrase "to discern good and evil" clearly refers to the omnipotence of David in the land, to his power to do anything. The woman sent by Joab may be insincere in flattering David with this phrase and with her likening of him to an angel of God on account of this power, but there is little doubt that this is what she meant by it (cf. v. 20).

The prayer of Solomon provides a third understanding of this phrase. His request for the knowledge of good and evil (1 K. 3:9) is clearly to be understood as moral and judicial discernment, the ability to discern what is right (cf. 1 K. 3:11, 28). God commends Solomon's request and desire for the knowledge of good and evil and rewards him with riches and honor.

In addition, the phrase seems to hint at sexual potency in 2 S. 19:35 (MT 36) and in the Rule of the Congregation of Qumrân (1QSa 1:10f.; cf. *New Catholic Encyclopedia*, XIV, 269).

The phrase, then, is open to different interpretations: moral maturity, cultural power, moral discernment, sexual maturity. The striking thing is that these references are positive. The meaning of knowing good and evil is positive; it is of some good for man. Indeed Sir. 17:7 quite appropriately says of God's creation of man that "He filled them with knowledge and understanding, and showed them good and evil."

What, then, of the tree of knowledge of good and evil? It has no close analogy in ancient Near Eastern texts — quite the reverse of the situation of the tree of life — so contemporary religions provide no guidance for interpretation. The tree of the knowledge of good and evil was created by God (Gen. 2:9), but of all the trees of the Garden only it was proscribed as a source of food (v. 17; the penalty was death). The serpent urged Eve to eat its fruit, for, he said, death would not come, but their eyes would be opened and they would be as God. Eve saw that the tree and its fruit were good; so she ate the fruit, as did Adam. "The eyes of both were opened"; they were ashamed of their nakedness and hid from God. God acknowledged (3:22) that by eating the fruit they had become as gods, and He removed them from the Garden and from ready access to the tree of life. This context provides no decisive basis for determining whether this tree is the tree of moral maturity, the tree of cultural power, the tree of moral discernment, or the tree of sexual maturity. Indeed, man possessed all of these without eating the fruit of the tree. In fact, the argument sometimes advanced against understanding the tree of the knowledge of good and evil as the source of sexual maturity, viz., that sexual maturity is presupposed in the institution of marriage before the Fall, can be used against each understanding. Adam and Eve had to possess moral maturity and discernment in order to understand the probationary command and to be culpable for not obeying it. Cultural knowledge and power was given with the cultural mandate and was disclosed in the naming of the animals. The knowledge of good and evil is good and is given to mankind. It was the serpent's insinuation, however, that God intended to keep good things from mankind. This insinuation was accepted by Eve. In that attitude of distrust of the One who had called her into being, she seized what properly could only be received. The evil or sin was not in the knowledge of good and evil but in the unfaithfulness to God and disobedience to His command. The root of evil is not knowledge of good and evil, nor power, nor sexuality, but unfaithfulness.

III. The Meaning of Evil.—The meaning of evil is an existential question with which the people of God — not least among them the authors of Scripture — have always struggled.

A. Monotheism. Basic to their struggle to find the meaning of evil is the rejection of dualism. Other peoples might hold the world of demons or the skilful magic of evil persons responsible for misfortunes large and small, but that solution was not open to the Israelites. Their radical monotheism demanded that even the most grievous harm be accounted for in terms of the power of the same God who called them out of Egypt. The gracious God by whom all good things came to them is the same God by whom all evil things came to them.

The monism of the OT is clearly seen in the mention of evil spirits that come from God, which comes close to attributing the demonic to God (e.g., 1 S. 16:14, "Now the Spirit of the Lord departed from Saul, and an evil spirit from the Lord tormented him"). The descriptive component of "evil" here seems to be unhappiness; the objective referent is Saul's melancholia. The point, however, is that Saul's depression, which led to fits of madness (cf. 18:10; 19:9), is ascribed to God. Consider also the "evil spirit" God sent between Abimelech and the men of Shechem (Jgs. 9:23; cf. 1 K. 22:19-23).

B. Covenant. It is not simply the radical monotheism of the Hebrews that forces the question, however; this one God is the God of the covenant. Other religions

explain the harm and suffering of men as resulting from the wrath of a god or gods; thus it would be possible to ascribe to the same god both good things and evil things by attributing the evil to his capriciousness. But the God of Abraham, Isaac, and Jacob has proclaimed His will and shown His purposes; and thereby He breaks the mold of the capricious and arbitrary power in which other Near Eastern deities were cast. On this account the Israelites were confident that God never departs from His fundamental intention to save and to bless His people, and that conviction protects the Israelites from despair.

But the contradiction looms still larger. The very God who intends to save His people brings harm to them. Within their convictions that God is one and that He has covenanted with men, the authors of Scripture struggled with the meaning of evil. The covenant assured the people of God that harm is not arbitrarily distributed. Yahweh is the covenant God, not an arbitrary divinity. The possibility of an explanation must exist; the contradiction must not be ultimate. But Moses himself could still ask, "O Lord, why hast thou done evil to this people?" (Ex. 5:22). That there is an explanation is certain; but the biblical authors struggle to find and to say what the explanation is.

C. Explanations. 1. Retribution/Reciprocity. The first explanation is given in terms of the covenant itself. God's wrath and its consequence, harm and suffering of men, is due to righteous retribution. Evil is just return for evil. Evil, i.e., harm or the threat of harm, is righteously brought upon evil, i.e., unfaithfulness and immorality. Typical is the refrain in the book of Judges, "The people of Israel did what was evil in the sight of the Lord and served the Baals. . . . So the anger of the Lord was kindled against Israel, and . . . the hand of the Lord was against them for evil" (Jgs. 2:11-15; cf. 2 S. 12:9, 11; 1 K. 2:44; 14:9f.). God reciprocates; He brings evil for evil. In this way harm and suffering have a place and, therefore, an explanation in God's world. Evil is not the result of an equally ultimate destructive power or of meaningless (because arbitrary) fate. It is justice.

2. Deterrent/Chastisement. Moreover, it is positive. It has a place in God's saving intention. It is a deterrent to deliberate disobedience among God's people (cf. Dt. 17:13, "And all the people shall hear, and fear, and not act presumptuously again"; 19:20). God's reciprocation of evil for evil provides a warning and a call to repentance (cf. Jer. 36:3). Ezekiel, e.g., in the face of evil provides this consolation to the people and justification of God's bringing harm, that the sons and daughters, chastened and purified, will live faithfully (Ezk. 14:22; cf. 6:10). Education and purification put harm and suffering within the context of God's saving will.

3. Beyond Reciprocity: Mercy to the Unjust. The recognition of God's saving will forces the biblical authors to move beyond their account of evil in terms of simple reciprocity. God can "repent of the evil." Sometimes for the sake of His covenant will He bears the evil rather than returns evil. When Moses reminded God of what he had sworn to Abraham, Isaac, and Jacob, God "repented of the evil which he thought to do to his people" (Ex. 32:13f.). He is long-suffering and does not bring evil out of spite or revenge. His promise is that if the nation "turns from its evil, I will repent of the evil that I intended to do to it" (Jer. 18:8; cf. 26:3, 13, 19).

Jonah, after attempting to escape the presence and mission of God, proclaimed God's judgment upon Nineveh. But the Ninevites responded to the threat of harm in penitence and faith, and "when God saw what they did, how they turned from their evil way, God repented of the evil which he had said he would do to them" (Jonah 3:10). Then Jonah complained that God had justified his fears, for He had acted according to character; Jonah said, "That is why I made haste to flee to Tarshish; for I knew that thou art a gracious God and merciful, slow to anger, and abounding in steadfast love, and repentest of evil" (4:2). The covenant God may legitimately reciprocate evil for evil, but His intention is always to save. Therefore, He does not deal with mankind simply in terms of retribution, but also mercifully.

This move beyond reciprocity does not challenge that account of evil, but builds on it. The appropriate human reaction to evil, then, is first to turn from evil, i.e., to turn from immorality and unfaithfulness, and second, to accept evil contritely, i.e., to accept harm or the threat of harm in penitence and confession. Thus the OT Scriptures constantly urge their hearers to hate the evil, to turn from their evil ways, to repent of their evil works. The appropriate reaction to evil is neither sloth nor pride, but rather gratitude and humility.

4. Beyond Reciprocity: Suffering of the Innocent. The explanation of the reality of evil in terms of reciprocity, however, was soon to face a decisive challenge: the suffering of the righteous. As long as the individual's responsibility and destiny were seen as subordinate to those of the nation, the question did not press so desperately upon the consciousness of Israel (but consider 2 S. 24:17; 1 Ch. 21:17). But as the explanation in terms of reciprocation developed, the notion of corporate responsibility diminished. And soon the sufferings of the righteous man demanded an account. Both Jeremiah and Ezekiel reject the proverb, "The fathers have eaten sour grapes, and the children's teeth are set on edge" (Jer. 31:29; Ezk. 18:2; however, both prophets refuse to surrender the concept of corporate responsibility; cf. Jer. 32:18f.). When individual responsibility gains clarity and attention, the evils that befall the innocent cannot but call into question that very righteousness of God that had been the mainstay of Jewish life and theodicy. The account of evil in terms of reciprocity continued, now construed individually; cf., e.g., Prov. 1:33, "He who listens to me will dwell secure and will be at ease, without dread of evil." But the evil that comes upon the innocent contradicted that concept. The educational value of evil might mitigate the contradiction, but it could not finally account for the evils wrought on the innocent. Moreover, where the concepts of reciprocity and chastisement were hardheartedly and bullheadedly held, this could only result in the conclusion that every person struck by some misfortune had been guilty of unfaithfulness or immorality.

Jesus stands against that conclusion (Lk. 13:1-5; Jn. 9:1-3). But already the OT writers, especially the wisdom teachers, stand in sharp opposition to the proud and clever attempts to save God's honor at the expense of innocent persons and in the face of the simple truth. The author of Ecclesiastes struggles with the problem. He acknowledges that sentence is executed tardily against evil men, but he does not let go of the righteousness of God (Eccl. 8:11f.). For the present, however, evil does indeed seem arbitrary; there is no way to "know . . . what evil may happen on earth" (11:2). And the author of Job also struggles with the problem. The cry of Job is simply, "When I looked for good, evil came" (30:26). The innocence of Job, that he is a man who "fears God, and turned away from evil" (1:1, 8; 2:3), is the stumbling block for any simple attempt to justify God's bringing of evil as reciprocation. Job will let go of neither his own innocence

nor the righteousness of God, and it is clear finally that his friends' accusations do an injustice not only to him but also to God. The God of Job 38–42 is majestically awful, not prosaically awful. He calls mankind to stand humbly before its Creator, not fearsomely and desperately before its inquisitor (cf. ch. 7). This is not so much a positive answer to the evils that befall the innocent as a rejection of simple reciprocity.

5. Beyond Reciprocity: Mission of God. The positive explanation in the OT is occasionally that the disclosure of God's justice will take place some time in the future. When the people complain against God that the evil seems rewarded by Him (Mal. 2:17; 3:15), Malachi reminds them of their own sin and the consequent presumption of their complaint (3:7-9); but more to the point, he promises a day in which "all evildoers will be stubble" and in which "for you who fear my name the sun of righteousness shall rise, with healing in its wings" (Mal. 4:1f. [MT 3:19f.]).

But a profound shift occurs in the understanding of and reaction to evil, and the development of explanations for innocent suffering reaches its climax with the concept of vicarious suffering — when the life and suffering of the people of God is interpreted in terms of a Suffering Servant (cf. the Servant Songs of Isaiah, Isa. 42:1-9; 49:1-6; 50:4-11; 52:13–53:12). Perhaps the careers of the prophets themselves provided the impetus for this reinterpretation, for they endured the evil, the harm, and the threat of harm that their loyalty to God and His cause brought upon them. Their consolation was precisely their mission and their confidence in its ultimate vindication. To participate in the cause of God involves suffering in this present age. Jeremiah, e.g., experiencing harm and the threat of harm, has cause to complain, "Is evil a recompense for good?" (18:20), but he never loses hope. He endures the suffering involved in his mission for the sake of God's cause.

The view here, too, is toward the future, no longer in the sense that in the future reciprocity will finally be clear, but now rather in the sense that the future reveals the present community to be a humble interim community whose mission is precisely to prepare the way for, and to give way to, a new world order. There is suddenly a relation between God's activity and the evil that befalls the innocent. The Servant Songs of Isaiah prophesy a messianic figure, but they also declare how the innocent sufferer is to regard, and respond to, the evils that befall him. These evils do not mean that one is guilty before God, but rather that one is called to participate in God's mission.

The OT itself abrogates the painful and sometimes malicious calculating of reciprocation. The justification of God's actions upon mankind is finally cast in a different mold, a mold which prepares the way for the cross of Christ. There, precisely in the worst evil borne by the One whose claim to innocence is not pretentious — i.e., precisely in the cross of Christ — the Scriptures discover and declare that God is good.

And in the light of that cross and in the light of this Suffering One's vindication at the Resurrection, the NT urges a faith-full response to evil. The NT, as the OT, makes no compromise with evil: "Hate what is evil, hold fast to what is good" (Rom. 12:9); "Abstain from every form of evil" (1 Thess. 5:22; cf. 1 Pet. 3:10-12, quoting Ps. 34:12-16). But the uniqueness of the NT lies in its exhortation to the followers of Christ to mirror the cross-bearing of Christ by dismissing reciprocity and retributive calculations in their dealings with each other and their neighbors: "Repay no one evil for evil" (Rom. 12:17); "Do not be overcome by evil, but overcome evil with good" (Rom. 12:21; cf. 1 Thess. 5:15; 1 Pet. 3:9); "Do not resist one who is evil" (Mt. 5:39). The community that follows Christ bears the hurt, the harm, and the threat of harm for love's sake, for the sake of the mission of God. And that patient love is the climax of the struggle of God's people to direct their thinking about, and reacting to, evil.

D. Summary. Evil remains a mystery. Any attempt finally to explain evil must be an oversimplification and a falsification. Still, it is necessary to take this mystery seriously if anything like an adequate account of life is to be given. There are basically two directions in which reflection on evil may go. One direction is simply the agonized acknowledgment of the reality of evil. This may be heroic, but it frequently tears meaning from life. The opposite direction, then, is to hold fast to meaning. But frequently this response all too facilely ignores the reality of evil. Theologically, these two directions presuppose two generalizations: If evil is real, God is not good; and if God is good, evil is not real. The Bible takes neither of these directions and it rejects both of these hypothetical generalizations. It affirms both that the one covenant God is good and that evil is real. Indeed, precisely in the context of the worst evil, the Scriptures discover and announce that God is good — i.e., precisely in the cross of Christ. And precisely in this event the Scriptures discover and direct the people of God to a faith-full reaction to evil, that of patient love.

A. D. VERHEY

EVIL EYE. A look or glance that reflects an unfavorable disposition toward a person. The phrase appears several times in the AV as a literal translation of the biblical text: in Prov. 23:6; 28:22 for Heb. *ra' 'ayin* (RSV "stingy," "miserly"; NEB "miser"); in Dt. 15:9; 28:54, 56 for *'ayin* with the verb *rā'a'* (RSV "eye be hostile," "will grudge"; NEB "look askance," "will not share"); in Mt. 20:15; Mk. 7:22 for Gk. *ophthalmós ponērós* (RSV "begrudge," "envy"; NEB "jealous," "envy").

The discovery of the widespread and ancient popular belief in the power of an envious glance to inflict harm has aroused speculation that this belief may be referred to in the passages cited above. Although there is evidence that this superstition existed in ancient Judaism (see Jastrow), it is unlikely that these passages preserve any connection with magical practices. The RSV and NEB correctly translate the phrase as referring simply to an envious or miserly disposition.

In Gal 3:1, however, this superstition clearly lies behind the use of Gk. *baskaínō* (AV, RSV, NEB, "bewitch"). Paul uses the term figuratively to denote the Galatians' captivation by the falsehood into which the Judaizers had led them.

EVIL ONE. *See* EVIL II.A.

EVIL SPIRIT. *See* DEMONOLOGY; SATAN.

EVIL THING [Heb. *rāʿ* (Ps. 140:2 [MT 3]; Prov. 15:28), *dāḇār rāʿ* (Dt. 17:5; 23:9; Josh. 23:15; Neh. 13:17); Gk. *tó ponērón* (Mk. 7:23; Lk. 3:19), *tó kakón* (Lk. 16:25)]; AV also MISCHIEF, WICKED THING, EVIL; NEB also WICKED SCHEME, MISCHIEF, WICKED DEED, FOULNESS, MISDEED, etc. "Evil things" may refer to thoughts, plans, or deeds of evil men; the things people suffer for their own errors; or the evils that result from the errors of others. The evil thing referred to in Dt. 17:5 is the breaking of the covenant with Yahweh and the pursuit of other gods; in Neh. 13:17 it is sabbath-breaking. According to Prov. 15:28, "The mouth of the wicked pours out evil things." In the proverb of the rich man and Lazarus (Lk. 16:19-31), the rich man had good things in his life but did not use them to the glory of God or the good of men. The poor man had evil things: sickness, nakedness, and hunger. The situation was reversed, however, after death. D. R. DUNGAN N. J. O.

EVIL-DOING [Heb. *rāʿâ*] (1 S. 25:39; Prov. 14:32; Eccl. 7:15); AV WICKEDNESS; NEB WICKEDNESS, WRONGDOING; **EVILDOER** [Heb. *ʿāśâ rāʿâ* (2 S. 3:39; Ps. 34:16 [MT 17]), *rāʿ* (Ps. 10:15), *ʿāśâ rišʿâ* (Mal. 3:15; 4:1 [MT 3:19]), *rāʿa'* (Ps. 22:16 [MT 17]; 27:2; Prov. 24:19; Isa. 1:4; 9:17 [MT 16]; etc.), *pāʿal ʾāwen* (Job 34:8, 22; Ps. 14:4; 36:12 [MT 13]; 64:2 [MT 3]; Prov. 10:29; 21:15; Hos. 6:8); Gk. *hoi ergazómenoi tḗn anomían* (Mt. 7:23), *hoi poioúntes tḗn anomían* (Mt. 13:41), *kakón poiṓn* (Jn. 18:30), *adikṓn* (Rev. 22:11)]; AV also WICKED, EVIL MEN, WORKER OF INIQUITY, DOER OF EVIL, MALEFACTOR, etc.; NEB also WRONGDOER, RUFFIANS, CRIMINAL (Jn. 18:30), etc.

The term "evil-doing" can refer to a personal injury, as in 1 S. 25:39, where it refers to Nabal's personal affront to David. In other instances it is used in a general sense of evil actions. The author of Eccl. 7:15 complains that people who perform such evil works are rewarded with long life (cf. Mal. 3:15).

The basic meaning of each of the Hebrew terms rendered "evildoer" is "one who causes evil." The Gk. *anomía* has the basic meaning of "lawlessness." The meaning of *kakón poiṓn* in Jn. 18:30 is "one who is a lawbreaker." *Adikṓn* in Rev. 22:11 is the normal Greek term for one who violates a divine or human law.

The Bible regularly assumes that a person has two possibilities: to do evil and to do good. It is within this framework that the "evildoer" is to be understood. In the OT, the historical literature has the term only once, 2 S. 3:39, for the murderous activity of the enemies of David; but in the Writings (Job, Psalms, Proverbs) and prophetic literature the subject receives considerable attention. It is usually assumed that the "evildoers" are those who neither call on the Lord (Ps. 14:4; Isa. 14:20; 31:2) nor keep God's law (Ps. 119:115). They are thus the opposite of those who are described as the "righteous" (Ps. 34:16; cf. 125:5; Prov. 10:29; Mal. 3:15; 4:1). Their arrogance and refusal to acknowledge the demands of God on their lives result in their failure to lead ethical lives. Thus they are known for their violence and mischief (Prov. 24:19), their adultery and lies (Jer. 23:14), and their lives of murder and oppression (Ps. 94:4, 16). The Psalms regularly give an indication of the continual struggle of the righteous against those "evildoers" who attempt to crush them (Ps. 22:16; 27:2; 119:115; 141:9). The OT expresses the conviction that although "evildoers" frequently prosper (Mal. 3:15), they will be crushed in the end (Ps. 92:7, 9 [MT 8, 10]).

In Matthew two descriptions of the last judgment mention the condemnation of "evildoers" (7:23; 13:41). These people are in each instance those within the community of believers who have failed to meet the requirements of discipleship. In Matthew's Gospel the Church is regarded as a mixture of the good and the evil (13:41; 25:31-46). In the final judgment these two groups will be separated and judged according to the criterion laid down in 7:21: the doing of God's will. The "evildoers" of 7:23 have been followers of Jesus and have carried on miraculous activity in the name of Jesus, but they have failed to meet the demands of discipleship laid down in v. 21. In Matthew discipleship involves bearing fruit (7:16) and the doing of good deeds (10:42; 25:40). To fail in this responsibility is to be an "evildoer." According to 7:23; 13:41 (cf. 25:31-46), these "evildoers" will be condemned in the final judgment.

In Jn. 18:30 Jesus is described by the Jews with the term *kakón poiṓn*, a general term for "criminal." The related term *kakopoiós* (RSV "wrongdoer") is used in 1 Pet. 2:12 for the claim of outsiders that the Church is a company of criminals. This claim provides the background for Peter's exhortation that the Church be known for doing good rather than for doing evil (1 Pet. 3:17; cf. 4:15).

EVIL-FAVOREDNESS (Dt. 17:1, AV). The word is the translation of the Heb. *dāḇār raʿ*, literally "evil thing" (RSV "defect"), and refers to the ritual unfitness for sacrifice of any animal that, though included in the class of clean beasts, yet possesses a blemish or otherwise lacks beauty of symmetry, or is lean-fleshed (cf. "ill blemish," Dt. 15:21, AV). *See* BLEMISH.

EVIL-MERODACH ē'vəl mer'ə-dak [Heb. *ʾĕwîl mᵉrōḏaḵ*; Bab. *Amēl-Marduk*—'man of Marduk']. King of the Neo-Babylonian empire, 562-560 B.C., son of Nebuchadrezzar II.

Nothing is known of the brief reign of this king from Babylonian annals. In 2 K. 25:27-30 par. Jer. 52:31-34 we read that Evil-merodach, in his accession year, freed Jehoiachin king of Judah from prison and elevated him above the other kings who were in Babylon; from then on Jehoiachin "dined regularly at the king's table." This almost incredible statement has received support from administrative tablets found at Babylon that contain lists of rations that were issued. Among those receiving rations is "*Ia-ku-ú-ki-nu*, the son of the king of *Ia-ku-du*" (*ANET*, p. 308; "Jehoiachin" and "Judah" are rendered thus, since the writing system lacked *h*). In other tablets from the same period, the writing *Ia-ʾu-ki-nu* and *Ia-ḫu-du* also occur, demonstrating the inability of the Babylonian scribes to render the names with phonetic precision (cf. *DOTT*, p. 86).

According to Berossus (quoted by Josephus *CAp* i.20[146f.]), Evil-merodach conducted his reign in an illegal manner and was slain by his brother-in-law Neriglissar (*Nergal-šar-uṣur*), possibly the Nergal-sharezer of Jer. 39:3, 13. It is a curious fact that Nabonidus mentioned Nebuchadrezzar and Neriglissar as his predecessors but made no mention of Evil-merodach: "I am the real executor of the wills of Nebuchadnezzar and Neriglissar, my royal predecessors!" (*ANET*, p. 309).

W. S. L. S.

EVIL-SPEAKING. *See* SLANDER.

EVIL-WORKERS [Gk. *kakoí ergátai*] (Phil. 3:2); NEB "malpractices." The literal meaning is "malicious laborers." The noun *ergátai* is used frequently, almost technically, of Christian missionaries, the "laborers" whom God sends forth into His harvest (Mt. 9:38). Used of Jewish

propagandists — probably an extremist party of Judaizers within the early Church — the phrase suggests that they are carrying on a parody of the Christian mission, working to bring harm to men rather than salvation. The adjective *kakós* is one of the broadest Greek words for "evil," "bad," but often has the particular sense of "malicious," "bent on doing evil to others." The reference in Phil. 3:2 (cf. 2 Cor. 11:13) is to opponents whose teaching includes certain Judaizing elements, the same group that Paul brands "dogs" and "those who mutilate the flesh."

EVOLUTION [< Lat. *evolvere*–'unfold'].

I. Meaning and Usage
II. Evolution in Nature
III. Evolution in History
IV. Evolution in Religion
V. Evolution in Revelation

I. Meaning and Usage.–The term "evolution" in earlier biological use referred to the development of the embryo, and this was in accordance with the stricter etymological sense, for the intended meaning was not the developing of a new thing out of an older, but the continuing process of unfolding that which was implicit from the very first. In modern thought, however, the word has taken on a much more extended and general meaning which includes the possibility of completely new features emerging. Thus the root idea of "unfolding" can be retained only in the sense either of disclosure to view or of the development of possibilities rather than latent features. Construed thus, evolution can mean that things emerge *de novo*. This may be in terms of a simple historical process but it often carries the further implication that what is present has the power either to change into or to produce new things in certain conditions, that these things constitute on the whole an ascending scale, and that at some point within the process there may be a movement from the inorganic to the organic.

Within such an interpretation of evolution there is naturally a great deal of variation. Under the general concept of evolution it is possible to hold to the stricter construction, namely, that all developments are implicit in the world from the very first. It is also possible to think in terms of deistic evolution, namely, that God created the world in such a way that the process of cause and effect would give rise to all subsequent developments. It is also possible to understand evolution theistically, namely, that God commands and uses the process of evolution in the work of creation, perhaps intervening at specific points to introduce new turns, e.g., the specifically human element in man. In many cases, however, evolution is taken to be a self-contained cosmic process whereby all that is or can be is subsumed pantheistically or materialistically under the single factor of matter; and purpose, if there be such, is explained in terms of an immanent teleology of progress.

To add to the confusion, the word can be figuratively applied to developments in the human sphere: historical evolution, the evolution of ideas, the evolution of a literary form, or the evolution of a movement. In this usage the word is for the most part a loose equivalent of "development." It may equally well denote on the one hand the unfolding of incipient tendencies or implications and on the other the emergence of new things. Often it carries the sense of progress from the more primitive and simple to the more complicated and sophisticated, though this is not essential. In some cases its use is based on a grand interpretation of all dimensions of life in which the advancing achievements of the human spirit are regarded as a continuation of the creative evolution discerned first in the inorganic and then in the organic world.

This brief review of the meaning and use will be enough to show that "evolution" is in fact a very imprecise word, which can be used as the vehicle of ideas that differ very widely both in general and in detail. In a strictly scientific sense, the older usage stands on a solid basis; and it is also beyond question that the history of a species will manifest changes and that natural causes may sometimes have produced changes of a more radical character. On the other hand, the broader postulates, that lifeless matter develops into living, that simple mechanisms evolve into more complex, and that the changes will be necessarily advantageous, give rise to serious difficulties; and the general presupposition of some thinkers that eternal, self-existent matter has of itself some kind of inherent or random creative power is a speculation that does not lie in the sphere of true science. It is in fact a matter for serious regret that a word that had its own limited but precise scientific usage was ever exalted to its present status as the catchword of a whole interpretation or philosophy. Since this has happened, it is most important that the distinctions among strictly scientific, semiscientific, speculative, and figurative meanings should be kept clearly in view when the term is encountered or used, more particularly when the claim is made that evolution is a proved and accepted fact of science (which is of course true in a strict and limited sense).

II. Evolution in Nature.–The word "evolution" in the modern sense forms no part of the vocabulary of the Bible. On the one hand, the Bible has no particular occasion to mention or to describe the objective process of evolution, e.g., in the case of an embryo or a species. Ordinary physiological developments are obviously presupposed in Scripture, and it might be assumed that even the strictest teaching on creation allows for normal variations and mutations, whether for good or for bad. Such matters are of no particular interest in the biblical narrative except perhaps in terms of questions concerning, e.g., the apparently declining lifespan of man through the patriarchal period.

On the other hand, the Bible quite definitely opposes the fact of creation to concepts of creative evolution. In particular, it states that God commanded vegetation to come forth and that He created or made creatures that swim, the fowls of the air, the beasts of the field, and man. Two points may be noted in this connection. First, the Bible does not itself say that each species of plants or animals was individually created, unless this is the implication of the "after his (their) kind" in Gen. 1:11, 21, 24f. Second, the Bible does in fact seem to suggest something of a progression up through vegetation to man. If the days of creation are to be taken literally, what might otherwise seem to be the slow development of millennia is speeded up, as it were, in great creative acts. But there are many expositors who claim that the days stand for long periods of time and that specific creative acts are divine interventions in a slow natural process. What is plain in any case is that the divine self-witness decisively rejects any suggestion of an autonomous creativity of matter or of necessary progress by mutation. Even changes within a given species can be for the worse as well as for the better, and it is not proved that they must or will constantly lead on to higher stages of life. While the use of secondary causes is not excluded, decisive progression is attributed to the Creator alone. *See* CREATION; CREATOR.

Thoughtful consideration will show that the actual data of natural history are broadly parallel to such data as are given in the theological account of Scripture. There is, of course, a difference of purpose, for science aims to give a description and theology seeks to supply the ultimate interpretation. This leads to a difference of presentation, for science develops its own terminology and classification for the purpose of exact description, whereas theology used broad and simple terms which can convey the divine self-revelation to all sorts and conditions of persons. Once these points are grasped, however, it will be seen that there need be no quarrel about the actual data. The biblical creation narrative involves either a series of aeons or an acceleration which covers true scientific findings, and the biblical account of the early period of civilized or historical man is in agreement with available data from other sources. Where conflict arises is in the sphere of interpretation, for the theological data of the divine self-revelation as Creator cut sharply across the philosophical and pseudo-scientific hypotheses of uninformed mankind. At this level, however, science betrays its own ultimate inadequacy. It really has no data regarding the origin of nature; it can work only within a self-enclosed cosmos. Within closely defined limits, and where there is a modest awareness of limitation, this is, of course, valid. But when all the data are taken into account — those concerning the Creator and His relation to the cosmos as well as those concerning the cosmos — the very limitation of science obviously involves a final invalidity which is inescapable in the fallen state of mankind, or which can be escaped only when ignorance is dispelled by the divine self-revelation.

III. Evolution in History.–The Bible does not speak of evolution in history. It recognizes, of course, that there is change in people and nations. It recognizes that there is a rise of people and nations. It recognizes that people and nations are in a sense comparable to seeds — they contain already the harvest the future will unfold. It also recognizes, however, that there is a fall of people and nations as well as a rise. Nor is the fall merely a single step backward for the sake of two steps forward. No general line of progress is discerned in history. The first period of civilization is in general one of deterioration which moves irresistibly to the Flood. Since then, good and bad periods have followed or intermingled with one another, and the final movement at the end of the age will again be one of decline. The standard of judgment is theological. In the biblical view, then, advances in arts and sciences do not compensate in the long run for apostasy from God and injustices among people. Rising prosperity and population, even if they continue, do not indicate true human progress. Even knowledge is not necessarily a sign of advance, for greater knowledge, e.g., of literary or artistic technique, may go hand in hand with a decline in art and letters; and scientific knowledge, while it can do great good, can also work great mischief. According to the biblical story, human history is set under the judgment of God. This judgment is immanent, but it is also divinely directed. While not every individual sin is individually visited, there is a broad movement of judgment without which history is inexplicable.

This means that the real story of mankind in the Bible is not the story of autonomous and progressive mankind but the story of mankind under God. The bright side of this story of great expectations and great disappointments, of human upsurgence and divine judgment, is that it is not merely of the outworking of divine judgment, but also of the ongoing history of salvation. It has a teleological direction — good seed is sown and will grow along with the tares until the harvest. The age of final decline is the night before the dawn of the new age. In the parable of the seed growing secretly (Mk. 4:26-29), the emphasis is perhaps not on the element of growth. Hence, no doctrine of historical evolution can be derived from it. Yet God is secretly at work for good even when it appears that evil or neutral powers are dominant, and to that degree history is the story of fulfillment as well as judgment. The point is, however, that this is wholly God's work. Mankind contributes only confused and conflicting patterns in which the judgment of God on human achievement is manifest. The true hope of mankind is not in his own evolution, but in the saving work that God Himself accomplishes in, through, and in spite of human deeds.

The polemic of the Bible is sharper against historical evolution than against natural evolution (in the sense of a rising scale of life-forms) because in the former case there are no data to which to appeal and on which to find a measure of common ground. The most that can be said is that history involves progression in a nexus of events and that in some areas and ages there is a rising graph, though the graph falls again in others. For the rest of the term "evolution," unless it is taken rather colorlessly to mean the unfolding of all possibilities, can only be an interpretation and not a statement of facts. The biblical data show, however, that it is a false and imposed interpretation. Its criteria are inadequate, its speculations are ill-founded, and its philosophical framework is without substance. Except in a platitudinous sense, the word is quite inappropriate in this sphere. As history is theologically grounded and controlled, so it is to be theologically understood. As it is the sphere of the outworking of the divine purpose, so it is to be expounded in terms of the divine data of judgment and salvation.

IV. Evolution in Religion.–What is true of history in general is true of the history of religion in particular. Now it is true that the Bible is not itself the story of human religion or even a part of this story. It is also true that religion does show movement. Ideas originate, are developed, modified, perhaps purified, and make way for, or merge into, other ideas. In many cases a line of advance may be discerned. But the Bible, both as a record of the divine self-revelation and, incidentally, as a record of religious beliefs and practices, does not at all support the view that there is a real evolution of religion, e.g., from primitive animism to purified monotheism. Indeed, it shows that the very opposite is the truth. An original knowledge of God gave way to idolatry (Rom. 1:21-23). When knowledge was restored by revelation, the basic pattern remained the same. Primitive idolatry might have evolved into more sophisticated idolatry, but it was still idolatry. With regard to the true knowledge and worship of God, the clever thinkers of Greece had no advantage over the most primitive of savages. Within Israel the movement was one of decline and restoration, and if the religion of, e.g., the Pharisees was in many ways inestimably superior to that of the ordinary Israelites of the 8th cent. B.C., it was still not the religion of the majority, and it also contained within itself the same corruption. (Even today the Bible could give us little ground for supposing that the religious ideas and practices of most Christians show any real advance over those of Abraham, Moses, or Isaiah.) The history of religion, then, would appear on a graph as a fluctuating line, not a general upward rise.

Nor is it true that there is a steady unfolding of possibilities hitherto latent, for both on the good side and on the bad most of the possibilities have already been explored during the course of the centuries, and the only differences are in detail. Where there is decisive change, e.g., in the setting aside of the OT sacrifices, it is not

by a process of religious evolution but in terms of a response to the new situation created by God's revealing and reconciling action. Indeed, it is interesting that even at a point like this the tendency of religion is to substitute new sacrificial forms in spite of the clear revelation that they are now redundant. This is characteristic of human religion as it is depicted in the Bible, for did not the early Israelites set about to transform Yahweh into the more familiar Baals? In fact, the Bible bears consistent testimony against the view that there is an evolution of religion. Its whole thesis is that the knowledge of God is by revelation from above, not by upward movement from below — that the movement below is a movement in the circle of ignorance and idolatry which will still manifest themselves only too easily even in the response to revelation. It might be contended that in the Bible as we now have it later redactors have altered the story to fit a thesis which differs widely from the actual facts. But to try to recover the so-called facts requires a drastic new work of redaction which is highly speculative, which necessarily denies the fundamental biblical principle of the divine self-revelation, and which still leaves so many loose ends that the idea of religious evolution obviously remains in the sphere of hypothesis. The Bible is in fact the story of revelation, not of evolving religion.

V. Evolution in Revelation.–Is there, then, an evolution of revelation? If God's self-revelation takes historical form, does this mean that here at least there is genuine evolution either in the sense of making explicit what is implicit, or in that of gradually introducing new things on an ascending scale, or perhaps in both? The ancient dictum that what is latent in the OT is patent in the NT seems at least to point in the direction of an unfolding, and in the age of the evolutionary hypothesis the concept of a progressive revelation has gained wide credence as the theological counterpart of theistic evolution in nature. What truth is there in this application of the term?

Certain points allow little questioning. There is no doubt that God reveals Himself in history. But history involves successiveness or progression. Even if there is no necessary advance from the lower to the higher, there is always movement. Movement is to be discerned in revelation too; the things of God are not all revealed at the same time, or at least not with the same emphasis or fulness at the same time (He. 1:1f.). If it is true that all the NT is present in essence in the OT, this does not mean that the NT is a mere repetition of the OT; and the same principle holds good of the various portions or books within both the OT and the NT. If things were different, there would be no need for the spread of revelation over so many centuries. The principle is particularly confirmed when we come to Jesus Christ the incarnate Word, for in Him God is bodily present and accomplishes salvation, so that a new point of reference is given for the proclamation of the old truths, and the truths themselves are set in a new light. Again, the movement of the Bible is in the main a movement from promise to fulfilment. This may not always be true in detail, e.g., in the movement from the Law to the Writings or from the Gospels to the Epistles, but it is certainly true in general, i.e., in the movement from the Law to the Gospel. And in the relation of the Prophets and the Writings to the Law, or the Epistles to the Gospels, there is unquestionably the basic element of explication and application, so that one could very well speak here of evolution in the sense of an unfolding or unrolling.

Nevertheless, there are other points which show that the indefinite word "evolution," and even the ambiguous "progressive," are to be used of the biblical revelation only with the greatest circumspection. The first point is that revelation is not an immanent process. If there is evolution, it is not from within the world or humanity itself. It is always by the act of God's unfolding. Revelation does not unroll itself; God unrolls it. God is here the acting subject in the history; the progression is that of God's own acts. The second point is that the object of revelation does not really change. For the object of revelation, like the subject, is God Himself. Certainly, revelation takes the form of specific acts and words which both advance the concrete history of salvation and also display or express this or that aspect of God. But the movement is not from a lower God to a higher, or from the bit of God to more bits of God and finally to the whole. If God reveals Himself, He does not first reveal Himself as it were in embryo and then through growth to maturity. The action goes forward, and God constantly reveals Himself in word and act until He takes the stage in person. But the subject, who is also the Subject, remains the same.

It must be emphasized as strongly as possible that the progression here is not from the lower to the higher, so the word "progressive" is suspect if it is used as the adjective of "progress" rather than of "progression." One might perhaps say that there is progression from the partial to the total, for the divine work of salvation and the divine self-manifestation are not really complete before the coming of the incarnate Son. On the other hand, this is hardly the best way in which to present the biblical data, for the Bible makes it plain that in a very true sense God is fully at work at every stage, but "at sundry times and in divers manners" (He. 1:1, AV). The categories used in the Bible seem to be rather those of promise (or prophecy) and fulfillment. God reveals Himself to the patriarchs and the prophets with great and gracious promises, which carry with them a first installment but which look and move forward to their fulfillment in the Word. God then reveals Himself to the Evangelists and apostles in the fulfillment of these promises in and through the incarnation of the Word. Since this is all worked out in history, it obviously entails movement or progression. The promise itself is given in various forms, and at every stage there is an installment which is also action moving to the fulfillment. Again, the divine record accompanies the various forms of promise and, bringing out the implications and making the applications, it moves with the divine action to the fulfillment and its meaning. While the element of movement is obvious, it may be doubted whether the upward line or curve of progress is really the right figure to express this progression; and the pedagogic concept of a teacher leading the class from elementary aspects of a subject to more complex is plainly inappropriate in relation to God's revelation of Himself in word and act from Abraham through Moses and the prophets to Paul and John. For pedagogically this is not in fact the order in which this subject is best learned, e.g., in the work of evangelization and instruction as it is now carried on in the Christian world.

The truth is, of course, that revelation is too big to be brought under the categories implied in such words as "evolution" or "progressive." As the revelation of the eternal God in time and history, revelation is unique. It merges into the stream of history, but it is never absorbed in it. It does not follow the pattern of rise and fall that may be discerned even in the religious life of its recipients. It cannot be described adequately by analogies from natural and historical life. If epithets are to be used, they are better taken from the divine side. This is not evolutionary or progressive revelation. It is God's

revelation in history. It is incarnational revelation. It is revelation in salvation history. From the standpoint of the record, it is biblical revelation. This can allow for such elements of evolution (i.e., unfolding) or progression (movement) as may be rightly discerned. But it safeguards the divine work against the imposition of an alien and distorting principle of interpretation and leaves room for its primary and determinative understanding from within itself and in its own categories.

G. W. BROMILEY

EWE [Heb. *keḇeś*] (Gen. 21:28-30); NEB also LAMBS; [*kiḇśâ*] (Lev. 14:10; Nu. 6:14; 2 S. 12:3); [*rāḥēl*] (Gen. 31:38; 32:14; Cant. 6:6); AV also SHEEP; [*śeh*] (Lev. 22:28); NEB SHEEP; [*'ûl*] (Ps. 78:71); [*q^{e}ṣûḇâ*] (Cant. 4:2); AV SHEEP; NEB "ewes just shorn." This term generally denotes a female sheep, though in Lev. 22:28 it could refer equally well to a female goat. *See* SHEEP.

EXACT (vb.) [Heb. *nāgaś*] (Dt. 15:2f.; 2 K. 23:35); NEB also "press for payment"; [*nāšâ', nāšâ*] (Neh. 5:7, 11; Job 11:6); NEB also "holdings," "taking as pledges"; [*yāṣâ'*] (2 K. 15:20); NEB "lay a levy"; [*śûm*] (Ex. 22:25); AV "lay usury upon"; [*ḥāḇal*] (Job 22:6; Ezk. 18:16); AV TAKE, WITHHOLD; NEB TAKE; [*t^{e}rûmôṯ*] ("[one] who exacts gifts," Prov. 29:4); AV "(he) that receiveth gifts"; NEB "forced contributions." Used by the RSV with several shades of meaning: (1) establish or impose a tax (Ex. 22:25; 2 K. 15:20); (2) demand interest or secure it by force (Dt. 15:2f.; 2 K. 23:35; Neh. 5:7, 11); (3) take in pledge (Job 22:6; Ezk. 18:16); (4) demand (Job 11:6; Prov. 29:4). The Heb. *t^{e}rûmâ* means "tribute," "gift," or "contribution"; thus Prov. 29:4 would read, literally, "a man of gifts" or "a man of exactions." N. J. O.

EXACTION. The term is used three times by the RSV: (1) Heb. *maśśâ'* (Neh. 10:31 [MT 32]), a demand for money lent on pledge, which the Jews agreed to forego in the seventh year; (2) *maś'ēṯ*–"tribute," "tax" (Am. 5:11; NEB "levy taxes"), condemned by Amos as blatant exploitation of the poor; (3) Gk. *pleonexía*–"greed," "cupidity" (2 Cor. 9:5; NEB "extortion").

EXACTOR [Heb. *nôgēś*]; AV "raiser (of taxes)"; NEB "officer . . . to extort (tribute)." The verb *nāgaś* generally has an oppressive connotation, as the noun "taskmasters" in Ex. 3:7. In the RSV, "exactor" occurs only in Dnl. 11:20 to describe some government official who will levy tribute upon an otherwise unidentified kingdom.

EXALT; EXALTED [Heb. *gāḇah, gāḏal* (Josh. 4:14), *'elyôn* (2 Ch. 7:21), *z^{e}ḇul* (1 K. 8:13; 2 Ch. 6:2), *nāśâ', sālal* (Ex. 9:17), *'ālâ* (Ps. 47:9 [MT 10]; 97:9), *rûm, rāmam* (Job 24:24; Ps. 118:16), *śāgaḇ*; Gk. *doxázō* (He. 5:5; 1 Pet. 1:8), *hyperaírō* (2 Thess. 2:4), *hyperypsóō* (Phil. 2:9), *hypsēlós* (Lk. 16:15; He. 7:26), *hypsóō*]; AV also EXCELLENT, GLORIFY, HIGH ABOVE, HIGHLY ESTEEMED, LIFT UP, MADE HIGHER, MAGNIFY, SET UP, "to dwell in" (1 K. 8:13), "of habitation" (2 Ch. 6:2), "set up the horn of" (Lam. 2:17), "full of glory" (1 Pet. 1:8); NEB also ARROGANT, BOAST, BUILD UP, CONFER GLORY, CONFIRM, DENOUNCE, ELATE, GREATER GLORY, GROW ARROGANT, HEIGHT, HIGH ABOVE, HOLD HIGH, INCREASE, YEARN, "held in high honor" (2 Ch. 32:23), "stand erect in their full height" (Ezk. 31:14), "too great for words" (1 Pet. 1:8), etc.; **EXALTATION** [Gk. *hýpsos*] (Jas. 1:9); NEB "that God lifts him up."

"Exalt" is most often used to translate Heb. *rûm*, "be high, exalted, rise." It is used with reference to humans exalting God (e.g., Ps. 34:3 [MT 4]), God exalting humans (Ps. 89:17), and humans exalting themselves (Dnl. 11:36). Other words used are: *gāḇah*, "be high, lofty, tall," used positively of God being exalted (Isa. 5:16), exalting kings (Job 36:7), and admonishing humility among men (Ezk. 21:26) (for its negative use, *see* ARROGANCE; HAUGHTY; PRIDE); *nāśâ'*, the common word for "lift, carry, take" in the qal, "lift up, exalt" in the piel, "be lifted up, exalted" in the niphal; *gāḏal*, commonly having to do with "being great, lifted up, high," translated "exalt, exalted" four times (Josh. 3:7; 4:14; Ps. 138:2; Zec. 12:7); *sālal*, in the hithpolel meaning "exalt oneself, resist," used of pharaoh in Ex. 9:17; *'ālâ*, the common term for "go up, ascend, climb," and in the niphal used twice of God being exalted (Ps. 47:9; 97:9); *rāmam*, the niphal of *rûm*, "be high, exalted" (Job 24:24; Ps. 118:16); *śāgaḇ*, "be inaccessibly high," is used only of God being exalted (Job 36:22; Ps. 148:13; Isa. 2:11, 17; 12:4; 33:5). The term *z^{e}ḇul* has a disputed rendering: the older lexicons translated it "habitation, residence," especially of God, thus the AV "habitation, dwelling, to dwell in"; this translation would also fit the poetic parallelism of the prayer of Solomon in the MT. Later studies, however, particularly of cuneiform inscriptions, produced the translation "elevation, height, lofty abode," from the Assyr. *bît zabal*, "lofty house," and Ugar. *zbl*, "exalt, honor"; thus the RSV translates *z^{e}ḇul* "exalted" in 1 K. 8:13 and 2 Ch. 6:2 (NEB "lofty"), while retaining "home" in Ps. 49:14 [MT 15] (NEB "honor") and "habitation" in Isa. 63:15; Hab. 3:11 (NEB "heights" and "course"), from the older rendering.

The RSV translates Heb. *'elyôn* in 2 Ch. 7:21, referring to the temple of Solomon, as "exalted"; two emendations, however, have been suggested: *š^{e}māmâ*, "desolation," based on the Syriac, and *l^{e}'iyîn*, "ruins, ruinous heaps," based on a LXX variant, from which the NEB translates "ruins."

In the NT "exalt" translates *hypsóō*, "lift up, raise high, elevate." It is used mainly of people, especially in the Gospels of exalting the lowly and humbling the lofty (Mt. 23:12; Lk. 14:11; 18:14), but also twice of Christ's being exalted to the right hand of God (Acts 2:33; 5:31). In Jas. 1:9 *hýpsos* is to be taken in the sense of exaltation of rank, following the usage of *hypsóō* in Mt. 23:12; Lk. 14:11; 18:14. See *TDNT*, VIII, *s.v.* ὕψος (Bertram).

Other NT terms are *doxázō*, usually "glorify" but twice "exalt" (He. 5:5; 1 Pet. 1:8); *hyperaírō*, "lift oneself up, exalt oneself" (2 Thess. 2:4); *hyperypsóō*, "exalted to the highest rank" (Phil. 2:9); and *hypsēlós*, used of Christ in the comparative sense of "raised to greater heights than the heavens" (He. 7:26) and used in the negative figurative sense of "haughty, proud" in Lk. 16:15 (Bauer, rev., pp. 849f.). W. A. SHELL

EXALTATION OF CHRIST. After the completion of His earthly ministry of humiliation and suffering, culminating in His crucifixion, Christ was exalted to an estate of heavenly blessedness and installed in the glory of full lordship (Phil. 2:6-11). His earthly ministry was filled with intimations of His future exaltation. The steps in this exaltation are Christ's resurrection, His ascension, His enthronement at the right hand of God, and His parousia or coming in glory.

There are numerous anticipations of exaltation in Jesus' life of service. At His transfiguration, the voice out of heaven acclaimed Him "my beloved Son," as had occurred also at His baptism. Our Savior affirmed His former glory (Jn. 17:5), prophesied His future exaltation (Mk. 14:61f.),

and avowed the unique reciprocal knowledge, authority, and revelation of the Son (Himself) and the Father (Mt. 11:25-27 par.) His exaltation is implied in the disciples' confession of Jesus as Messiah, Lord, and Son of God, and by the mighty miracles of His person and work. So greatly do these anticipations permeate the Gospel accounts that for G. Bertram (*TDNT*, VIII, *s.v.* ὑψόω) the concept of His exaltation is logically prior to that of His humiliation. Paul testifies that the rulers of this age crucified the Lord of Glory (1 Cor. 2:8).

I. Christ's Resurrection.–On Easter morning the disciples found Jesus' tomb empty except for His grave clothes. To them an angel announced, "Jesus who was crucified . . . is not here; for he has risen, as he said" (Mt. 28:5f.; Jn. 20:6f.).

A. Its Attestation. Over a period of forty days the risen Christ appeared several times to His disciples. Each of these appearances resulted, though not always immediately, in their recognition of Him. They saw Him with the scars of Calvary on His body; they heard His familiar voice; they touched Him with their hands; they ate with Him; He breathed upon them. They testified that He did not see corruption (Acts 2:27; 13:35). Moreover, the wisdom of the Risen One opened their minds to interpret the OT christologically. His lordship challenged their wills with the Great Commission. His love made their hearts burn with a new devotion. He blessed them spiritually with repentance, forgiveness, peace, and power for witnessing. His fellowship knit them together as the Church of God in Christ Jesus. The numerous impacts of the risen Lord established the objective character of the Resurrection as an event brought about by God, not by the disciples.

B. Its Glory. Like a great avalanche, sin and death swept over all men, but in raising Christ from the dead God broke that reign of death. Christ's resurrection (1) revealed His power over death (Rev. 1:18; Jn. 5:25f.; 1 Cor. 15:20-23); (2) confirmed His divine sonship (Rom. 1:4); (3) attested God's acceptance of His finished work of righteousness for the justification of His people (Rom. 3:21-24; 4:25; 10:4; Phil. 3:9); (4) is the beginning of the new creation that is life eternal, over which death has no power (Rom. 6:4-19; Col. 2:13; 2 Tim. 1:10); (5) is the entrance of the Son of God, the divine-human head of His body the Church, into the resurrection power and royal glory of His redemptive reign of grace (Eph. 1:19-21); (6) and is God's assurance that He has ordained Christ to judge the world on the day He has appointed (Acts 17:31).

C. Its Author. In the scriptural accounts Christ generally is spoken of as passive, while God is the active author of His resurrection, e.g., "This Jesus God raised up" (Acts 2:32; cf. 2:27, 31; Rom. 6:4; Eph. 1:19f.; 1 Pet. 1:3). In two passages, however, John represents Jesus as affirming His own action in this event: "I lay down my life, that I may take it again" (Jn. 10:17f.; 2:19). Nor is the Holy Spirit absent from the resurrection process. At His resurrection, Christ became a life-giving Spirit (1 Cor. 15:45). Through His Spirit God will give life to our mortal bodies (Rom. 8:11), i.e., raise them as spiritual bodies (1 Cor. 15:44), conformed to the body of His glory (Phil. 3:21).

II. Christ's Ascension.–"Ascension" means the transfer of Jesus to heaven, i.e., to the realm of the divine. The Ascension and sitting at the right hand of God are combined in 1 Pet. 3 22. More often the NT writers imply the Ascension in their references to Christ's exaltation to the right hand of the Father and, once, to His being received up in glory (1 Tim. 3:16). In Eph. 4:10 (cf. 1:20), Christ is described as ascending above all heavens.

A. Johannine Account. In Jn. 20:17 the risen Lord says to Mary, "Do not hold me, for I have not yet ascended to the Father; but go to my brethren and say to them, I am ascending to my Father and your Father, to my God and your God." This suggests an invisible Ascension on the day of the Resurrection and interprets the several appearances as returns of the risen Christ (*see* ASCENSION I). On this interpretation the Johannine accounts of the Resurrected One coming where the doors of the house were shut are best understood as His descending into the open court around which many first-century homes were built, thus bypassing the closed outer doors of the residence.

B. Public Event. Lk. 24:50f. and Acts 1:9-11 give accounts of Christ's public ascension. The latter details the witnessing of the event by His disciples, the cloud that received Him out of their sight, and the promise of His return in like manner.

C. Saving Significance. Christ's triumphal departure from this world demonstrated that He had accomplished the work that His Father had given Him to do (Jn. 17:4; 4:34; 19:30). As our representative He had perfectly obeyed the Father's will (Phil. 2:8f.; Rom. 5:19). As our substitute He had borne our sins in His body on the tree (1 Pet. 2:24; 2 Cor. 5:21). Now ascended to the right hand of God He is our righteousness (1 Cor. 1:30) and our Advocate near the ear of the Father (1 Jn. 2:1). Thence the ascended Lord sends from the Father the Holy Spirit to convince the world of righteousness because of His finished work (Jn. 16:7-11). Thus does the Spirit bear witness to and glorify Christ (Jn. 15:26).

Gnostic thinkers interpreted Christ's ascension as the finality of God's victory and taught that those united to Him by baptism had risen and ascended with Him and were thus exalted above the suffering and service of earthly life. In contrast to this claim, J. M. Robinson (*IDB*, *s.v.* "Ascension") shows Paul's position to be "that our ascension has not already happened so as to remove us from historical involvement, but rather that our future ascension does await us, thus giving meaning to that involvement (Phil. 3)."

III. Christ's Enthronement at God's Right Hand.–Based on Our Lord's application of Ps. 110:1 to the Messiah, the NT writers frequently present the ascended Christ as enthroned at the right hand of God and as sharing the throne of His Father. By His exaltation Christ was reinstalled in the primal glory that He had with the Father before the world was (Jn. 17:5, 24; cf. 1:1-18 and Mk. 1:1-11, where He is already the beloved Son and heir when He comes to the vineyard). Yet the christological summaries present that exaltation as a reward for His incarnate ministry; His obedience even unto death (Phil. 2:6-11); His having made peace by the blood of His cross (Col. 1:15-20); and His purification of sins (He. 1:3). Thus it is as the Reconciler, the divine-human Person, that He is associated with God in power and glory. In Christ, "the dust of earth is on the throne of the universe." With the Father He is praised by the heavenly hosts (Rev. 1:6; 5:9-14). According to Pliny the Younger the primitive churches "sang antiphonally to Christ as to God" (*Ep.* x.96.7). Examples of these hymns have been identified in Jn. 1:1-18; Phil. 2:6-11; Col. 1:15-20. *See* Plate 35.

According to Acts 5:31, God has exalted the crucified Jesus to His right hand to be a Leader and a Savior to give repentance and forgiveness of sins. In Rev. 5, the sacrificed Lamb in the midst of the throne is opening the seals and applying the redemption He has won for mankind. Such passages led Justin Martyr to write, "The Lord entered His glory directly from His cross" (*Dial.* 73.1).

In His Great Commission, the resurrected Jesus affirmed, "All authority in heaven and on earth has been given to me. Go therefore and make disciples of all

nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit" (Mt. 28:18f.). Despite wars, tumults, and persecutions Christ is so reigning that disciples are being made in all nations. From His throne of grace, Christ rules His Church by His Spirit and Word and appoints ministers to proclaim His gospel and to maintain His lordship in His Church.

In the book of Revelation, Jesus Christ is the faithful witness whose name is the Word of God, even as in 1 John He is the Word of life and in Jn. 1:1-18 the eternal Word who reveals the Father. By the word of His mouth and by His Spirit the enthroned Christ speaks to His churches and sends forth His saving revelation to all the world (Rev. 2–3).

Hebrews presents Christ as our High Priest entering into heaven itself to appear before the face of God in our behalf (He. 9:24). His propitiation, His presence, and His intercession open the way for His people to the throne of grace (He. 2:17; 4:14-16; 10:19-22). Upon heaven's golden altar the fragrant incense of His intercession is added to the prayers of the saints (Rev. 8:3), so that as we pray in Christ's name He becomes both our merit and our mouth.

IV. Christ's Coming in Glory.–Referring to Dnl. 7:13, Our Lord prophesies the coming of the Son of man on the clouds with power and glory (Mk. 13:26; 14:62), coming with His holy angels (Mk. 8:38). His return will be like His ascension (Acts 1:11) and as sudden as lightning (Mt. 24:27). In the Epistles, this coming is the Day of the Lord (1 Cor. 1:8; 2 Pet. 3:10), the revelation of Jesus Christ (1 Cor. 1:7; 2 Thess. 1:7; 1 Pet. 4:13), and His appearing (1 Tim. 6:14; 2 Tim. 4:1; Tit. 2:13). By cataclysmic events Christ's reign of grace will be transformed into His reign of glory, and He will be revealed as:

A. Conqueror of Death. Bringing with Him "those who have fallen asleep," Christ will come to raise the dead and to bring the rapture of the living (1 Thess. 4:14; Jn. 5:25-29; 1 Cor. 15:22, 52). Indeed, He will destroy death itself, the last enemy (1 Cor. 15:25f.; 54-57; Rev. 21:4).

B. Judge of the Living and the Dead. We must all appear before the judgment seat of Christ (2 Cor. 5:10), for the King shall gather all nations before the throne of His glory and separate them as a shepherd separates the sheep from the goats (Mt. 25:31-46; Acts 17:31). He will vindicate His martyrs (2 Thess. 1:5-10) and bring into His everlasting fold those written in the Lamb's book of life (Rev. 20:11-15), for His verdicts are final (Mt. 7:23; 25:46).

C. Bridegroom of the Church. Having cleansed the Church "by the washing of water with the word," the Savior of the world will present to Himself the glorious Church without spot or wrinkle (Eph. 1:22f.; 5:23-27). And blessed are those who are bidden to the marriage feast of the Lamb (Rev. 19:7-9; 21:9).

D. King of Kings. The kingdom of the world will become "the kingdom of our Lord and of His Christ, and He shall reign forever" (Rev. 11:15; cf. 12:10). For in the end Jesus will put all enemies under His feet, abolish all rule and every authority and power, and then deliver up the kingdom to God the Father (1 Cor. 15:24).

E. Consummator of Creation. Christ returns to bring all God's purposes in creation to completion and all His precious promises to fulfillment. For the promises of God are all Yes and Amen in Christ (2 Cor. 1:20). His coming is the final act of world history in which the heavens and the earth shall be dissolved, and "new heavens and a new earth in which righteousness dwells" shall appear (2 Pet. 3:10-13; Rev. 21:1; Rom. 8:21).

EXAMINE; MAKE EXAMINATION [Heb. *rā'â* (Lev. 13:3; 14:3; etc.), *ḥāqar* (Prov. 18:17; Lam. 3:40), *tûr* (Eccl. 9:1), *dāraš* (Ezr. 10:16), *bîn* (Jer. 2:10); Gk. *dokimázō* (Lk. 14:19; 1 Cor. 11:28), *anakrínō* (Lk. 23:14; Acts 4:9; 12:19; 17:11; 24:8; 25:26; 28:18; 1 Cor. 9:3), *anetázō* (Acts 22:24, 29), *peirázō* (2 Cor. 13:5)]; AV also SEE, LOOK, SEARCH, CONSIDER, PROVE; NEB also "make formal inquiry" (Ezr. 2:10), "cross-question" (Prov. 8:17), "consider well" (Jer. 2:10), "test himself" (1 Cor. 11:28), etc. "Examine" is used for a variety of Hebrew and Greek words with the meaning "look at" (*rā'â*, Lev. 13-14), "search" (*ḥāqar, dāraš*), "discern" (*bîn*), "make a judicial inquiry" (*anakrínō, anetázō*), or "put to the test" (*dokimázō, peirázō*).

The subject of Lev. 13–14 is physical examination for skin diseases. *Rā'â*, generally "see" or "look at," is used for the physical examination conducted by the priests to determine whether a skin disease was of such a nature that it rendered the person ritually unclean.

In other instances in the OT, "examine" is used for the act of discerning a truth. *Ḥāqar* is used in Prov. 18:17 for the investigation of a legal case; cf. Job 29:16 (RSV "search out") and Prov. 28:11 (RSV "find him out"). In Lam. 3:40 the term is used for rigorous self-examination; cf. Ps. 139:1 (RSV "thou hast searched me . . ."). Ezr. 10:16 employs *dāraš* for the inquiry conducted concerning the intermarriage of Israelites and other peoples. In Eccl. 9:1 the RSV emends the MT *bûr* (AV "declare") to *tûr*, "search out" (cf. Eccl. 1:13; 2:3; 7:25), indicating that the author is examining "how the righteous and the wise and their deeds are in the hand of God." Similarly, *bîn* occurs in Jer. 2:10 for an inquiry into religious matters.

In the NT Gk. *anakrínō* and *anetázō* are used regularly for the judicial interrogation of the accused; cf. the interrogation of Jesus (Lk. 23:14) and of the apostles (e.g., Acts 4:9; 22:24, 29). In 1 Cor. 4:3 *anakrínō* (RSV "judged") is used for a quasi-judicial investigation that the arrogant bring against Paul. In one exceptional case, the term is used in a nonjudicial text for "examining the Scriptures" (Acts 17:11); here the term may reflect the Heb. *dāraš* ("search"), a technical term for interpreting Scripture.

As the author of Lam. 3:40 uses Heb. *ḥāqar* to urge self-examination, so Paul in two NT texts encourages Christians to practice self-examination. In 1 Cor. 11:28 he uses *dokimázō* (lit. "put to the test") to encourage the Corinthian Christians to test themselves before partaking of the Lord's Supper. In vv. 21, 28, and 30 he indicates what is involved in failing to conduct this self-examination. To disregard one's brother (v. 21) is to disrupt the fellowship, or body, created by Christ (vv. 27, 29), and thus to act "in an unworthy manner" (v. 27) and bring judgment (v. 29) upon oneself. Both *dokimázō* (RSV "test") and *peirázō* are used in 2 Cor. 13:5 for the self-examination of the community. This exhortation is to be understood in the context of Paul's impending visit and his warning that he will not "spare" those who have been the source of trouble. The Corinthians have desired "proof" of Paul's genuineness as an emissary of Christ (v. 3). Paul therefore implies in 13:5, "You must give the proof, not I." To meet the test is to comply with Paul's demands before he arrives.

EXAMPLE [Gk. *hypódeigma*] (Jn. 13:15; Jas. 5:10; 2 Pet. 2:6); AV also ENSAMPLE; NEB also PATTERN, OBJECT LESSON; [*íchnos*] (Rom. 4:12); AV STEPS; NEB FOOTPRINTS; [*týpos*] (Phil. 3:17; 1 Thess. 1:7; 2 Thess.

3:9; 1 Tim. 4:12; 1 Pet. 5:3); AV also ENSAMPLE; NEB also MODEL; [*deigmatízō*] (Col. 2:15); AV SHEW; NEB SPECTACLE; [*hypotýpōsis*] (1 Tim. 1:16); AV PATTERN; NEB TYPICAL; [*hypogrammós*] (1 Pet. 2:21); [*deígma*] (Jude 7). "Example" is supplied by the RSV in Eccl. 9:13 and Gal. 3:15.

A number of Greek words are translated "example" in the RSV. Used in an ethical sense the word *týpos* — meaning "pattern" — is prominent. It is formed from *týptō* (to "strike"), and in classical Greek means a "blow" or the "mark" left by a blow. Thus it was a suitable term for describing the "impression" made on wax by a seal. This is the most common meaning and the one from which most of the others come. These other meanings fall under two classifications: (1) "pattern" or "model" and (2) "that which is formed" or the "image" (Lampe and Woolcombe, p. 61).

Paul always uses *týpos* in the sense of "pattern" or "model," e.g., when he marks himself as an "example" of living in the faith and a model to be "imitated" (*miméomai*) by others (Phil. 3:17). The Thessalonians are to emulate him as a *týpos* for their own walk as Christians (2 Thess. 3:9; cf. 1 Cor. 11:1). He urges Timothy to "set the believers an example" (1 Tim. 4:12) and praises the Thessalonians for having become a model for others (1 Thess. 1:7). Paul finds that their community of faith is a model that makes an impression "because it is moulded by God" (*TDNT*, VIII, 249; cf. 1 Thess. 1:4, 6). The same mighty grace of God that Paul experienced is to be the *hypotýpōsis* ("pattern" in the sense of prototype) for future believers (1 Tim. 1:16).

Another NT word for "example" is *hypogrammós*, derived from *gráphō* (to "write"). The term is rarely used but is found in Plato, where it refers to the "drawing of lines by the elementary teacher in order to guide children who are learning to write" (*TDNT*, I, 772); it can also be "an architectural outline or artist's sketch to be colored or filled in by others" (Selwyn, p. 179; cf. 2 Macc. 2:28). Hence it means a model or pattern to be copied, as in its only NT usage in 1 Pet. 2:21, which says that "Christ also suffered for you, leaving you an example, that you should follow in his steps." This means that Christ has left footprints through His sufferings, and that we must take these as models in the same way that a student learns by following the guiding lines of his teacher (*TDNT*, I, 773). The "footprint" image is also found in Rom. 4:12 in the use of the word *íchnos*, which literally means "footprint" but is used here in the figurative sense of following the example of Abraham's faith. Abraham, though dead, has left his "footprints" through his faith, the nature and reality of which we perceive and experience. These "tracks" that he left serve as markers for those to come, for both Jews and Gentiles. On the other hand, the graphic picture of judgment for lack of faith and for disbelief is found in the "example" (*deígma*) of Sodom and Gomorrah (Jude 7).

An "example" to be imitated is found in Jesus' words at the footwashing, "I have given you an example [*hypódeigma*], that you also should do as I have done to you" (Jn. 13:15). The "suffering and patience" of the prophets are the things to be imitated in Jas. 5:10, while in 2 Pet. 2:6 the destruction of Sodom and Gomorrah is again cited as a warning example of the results of disobedience.

In Col. 2:15 Christ is descibed as having "disarmed the principalities and powers and made a public example of them." Here the word *deigmatízō* (from *deíknymi*), meaning to "display in public boldly," signifies that Christ displays the conquered forces before the whole cosmos — possibly in the same way as the ancient victors displayed their captives as trophies in a triumphal procession before the people. Thus the true nature of inferiority and ultimate powerlessness of the conquered forces is exhibited.

D. K. MCKIM

EXCEED; EXCEEDING; EXCEEDINGLY. The verb is used by the AV in the obsolete, intransitive sense of "overdo" in Job 36:9 for the hithpael of Heb. *gāḇar* (RSV "behaving arrogantly"; NEB "insolence and tyranny") and in 1 S. 20:41 for the hiphil of *gāḏal* (RSV "recovered himself"; NEB "was even greater than"). The versions differ in their interpretation of this term (*higdîl*). The usual meaning is to "make something (or someone) great"; the NEB takes it in a comparative sense in reference to David and Jonathan's grief while *CHAL* suggests "take courage" (p. 56). "Exceeding" (as an adverb with adjectives and rarely as an adjective) and "exceedingly" occur often as representing various expressions for the superlative in Hebrew and Greek.

EXCELLENT [Heb. *gāḏal*] (Isa. 28:29); NEB WONDERFUL; [Aram. *yattîr*] (Dnl. 5:12, 14; 6:3); NEB NOTABLE, PECULIAR, etc.; [Gk. *krátistos*] (Lk. 1:3; Acts 24:2; 26:25); AV MOST NOBLE; NEB EXCELLENCY; [*diaphérō*] (Rom. 2:18; Phil. 1:10); [*diáphoros*] (He. 1:4; 8:6); NEB FAR SUPERIOR; [*hyperbolḗ*] (1 Cor. 12:31); NEB SURPASSES; [*kalós*] (Tit. 3:8b); AV GOOD; **EXCELLENTLY** [Heb. *ḥayil*] (Prov. 31:29); AV VIRTUOUSLY; NEB CAPABLE.

Daniel is described as having an "excellent" spirit in him (Dnl. 5:12; 6:3) and being great or abundant in wisdom (5:14), as is also the Lord of hosts (Isa. 28:29).

In the NT *krátistos* is the official equivalent of the Latin phrase *vir egregius* ("most noble") and is used in addressing the procurator of Judea (Acts 24:2; 26:25). In Lk.1:3, however, "most excellent Theophilus" is a form of polite address used in dedications and has no official connotations implied (Bauer, p. 450).

In Rom. 2:18 and Phil. 1:10 Paul speaks of "approving what is excellent" (*diaphérō*), which in its absolute sense may mean "the things that really matter" as opposed to *adiáphora*. His audience in Corinth is shown a "far better way" (*hyperbolḗ*), one of "extraordinary quality," the way of love (1 Cor. 12:31–14:1). Christ has a more "excellent" name than the angels (He. 1:4) and His ministry far surpasses and is more outstanding (*diáphoros*) than any earthly ministry because of the superiority of the covenant He mediates (He. 8:6). The "good deeds" that Paul insists on in Tit. 3:8b are "excellent" in the sense of being morally good or beautiful, and they form a striking contrast to the senseless controversies and quarrels which are "unprofitable and futile" (*anōphelḗs* and *mátaios*) in Tit. 3:9.

The woman who does "excellently" in Prov. 31:29 is a woman of virtue who shows strength in mind and body.

D. K. MCKIM

EXCHANGE; EXCHANGER. *See* BANK; BANKING.

EXCITED [Gk. *throéō*] (2 Thess. 2:2); AV TROUBLED; NEB ALARM YOURSELF. The translation "excited" is acceptable if understood to mean "stirred by strong emotion" (*Oxford English Dictionary*, I [1971], 381), without, perhaps, the connotation of pleasurable anticipation. In the Synoptic Apocalypse (Mk. 13:3-37 par.), which has a number of similarities with Paul's caution in 2 Thess.

2:2f., *throéō* also appears (raising the question of Paul's familiarity with this material, or at least of a common background). There, the cause of this agitation is the rumor of war, justifying the translation "alarmed" (Mt. 24:6; Mk. 13:7; cf. Lk. 24:37, "startled," following var.).

The situation is more ambiguous in 2 Thess. 2:2f., depending somewhat on the meaning of "day of the Lord." If it means a complex of events, including wars, tribulation, and judgments, then fearful anxiety, alarm, or fright (cf. Bauer, p. 364) may be the dominant mood. If, however, it means primarily the parousia of the Lord (v. 1), then the believer might indeed have been beside himself with joy. The effect is the same, in any case: an unwarranted agitation of mind that interferes with the normal sobriety necessary for "standing firm" (v. 15) and distinguishing the real Christ from impostors (Mt. 24:5).

H. VAN BROEKHOVEN, JR.

EXCOMMUNICATION.

I. Definition.–Excommunication in its most general sense is the deliberate act whereby a group denies the privileges of its membership to those who were once members in good standing. As part of a broad range of social control that includes limited ostracism, temporary or permanent exclusion, and sometimes death, excommunication came in the Christian era to refer to an act of exclusion by which a religious community denies to offenders the sacraments, congregational worship, and possibly social contact of any kind. Such action is taken because of heresy, sin, or both. Although excommunication in its broadest sense is known from very early times, its purposes, penalties, procedures, and intended results within the Jewish and Christian religions have changed over the centuries. The distinct category of "excommunication" (Lat. *excommunicatio*) did not come into use until the era of the Christian Church.

II. Terms.–The OT includes no term specifically designating excommunication in its narrower sense. The OT vocabulary, however, does include many terms that would fall under the more general definition cited above: Heb. *ḥāram*, noun *ḥērem*, "banish, put to destruction" (e.g., Ex. 22:19; Lev. 27:28; Josh. 6:17), *'ālâ*, "curse" (Lam. 3:65), *kāraṯ*, "cut off" (Ex. 12:15, 19), *bā'ar*, "extirpate" (Dt. 13:6), *bāḏal*, "be excluded" (Ezr. 10:8), *'ārar*, "curse" (Mal. 2:2), *zā'am*, "curse" (Nu. 23:7f.), *nāḏa'*, "cast out, banish" (Isa. 66:5), *qālal*, "declared cursed" (2 S. 16:5), *šammâ*, "desolation, thing of horror" (2 K. 22:19; Jer. 25:18).

The NT, likewise, contains not just one term for excommunication in the narrower sense, but a number of terms whose meanings fall within the larger sense of the term: Gk. *anáthema, anáthēma* (corresponding to Heb. *ḥērem*), "devoted, accursed" (Lk. 21:5), *katáthema*, "accursed thing" (Rev. 22:3), *katára, epikatáratos*, "curse," "accursed" (Gal. 3:10), *ará*, "curse" (Rom. 3:14; cf. Ps. 10:7), *aphorízō*, "exclude" (Lk. 6:22), *aposynagōgos*, "expelled from the synagogue" (Jn. 16:2).

Because there is much overlapping of meaning in the original languages as well as in translation, extreme caution should be exercised in attempting to make distinctions on the basis of terminology alone. It is best to be content with determining the particular idea given in each specific context, rather than trying to draw distinct lines between excommunication and simple exclusion.

III. Rationale.–The basic rationale for excommunication was to protect the standards of the group: "a little leaven leavens the whole lump" (1 Cor. 5:6). This motive is clear in most biblical and extracanonical passages, but concern for the individual, even after expulsion, was the basis of Paul's pleas in 2 Cor. 2:7-10 and 2 Thess. 3:15 (but see also 1 Cor. 5:5).

IV. Causes.–Specific causes for excommunication fall into two categories: sin and heresy. Thirty-six OT offenses punishable by extirpation are summarized in the Mish. *Kerithoth* (< Heb. *kāraṯ*, "to cut off"). Examples include breaking the fast on the Day of Atonement (Ex. 12:15-19), sexual violations, and ritual impurities (Lev. 18:6-30). In the NT the author of 2 John authorized a limited form of ostracism for those who promulgated a heretical Christology (vv. 7, 9; cf. Gal. 1:8f.; 4:30), and the writer of 3 John was prepared to take action against Diotrephes, who not only was insubordinate and failed to practice hospitality, but was himself excommunicating those who did practice it (vv. 9f.). 1 Cor. 5:11 lists other reasons.

V. Procedures.–Procedures for excommunication within the various religious groups must have varied, but a general guideline was widely followed. Mt. 18:15-18, based on Jewish tradition, provided a series of steps the group was to employ before purging a recalcitrant sinner: personal confrontation, then two or three witnesses, then exposure before the congregation. Only if the offender acknowledged wrongdoing and still refused to repent was he or she to be excommunicated. Some NT writings allude to this cautious procedure (e.g., Lk. 17:3; Gal. 6:1; 1 Tim. 5:20; Tit. 3:10), but others suggest a speedier operation (Rom. 16:17; Gal. 1:8f.; Eph. 5:7). (The Qumrân community also followed the more cautious procedure [1QS 5:25–6:1].)

VI. Degrees of Punishment.–The Mishnah states that the court had the power to inflict four kinds of capital punishment: stoning, burning, decapitation, and strangulation (*Sanhedrin* vii.1). Stoning was the most common form in NT times (Jn. 7:58–8:11; Acts 7:58). Jesus was almost executed by being thrown off a cliff (Lk. 4:28-30). "Delivering to Satan" (1 Cor. 5:5; 1 Tim. 1:20) apparently involved some physical punishment, perhaps culminating in death (cf. Acts 5:5; 8:20; 13:11). The rigid OT penalties were later softened by the rabbis, who added conditions, exceptions, and degrees of punishments (see, e.g., *Kerithoth* i.2). Although "cutting off" could mean death, and is often so translated, the basic idea was separation from the community — as this term implies — rather than "execution." *See also* PUNISHMENTS.

Unless the offense was an unforgivable sin, usually blasphemy, excommunicants were expected to continue in piety and good deeds, with hope of restoration. (For a list of the procedures for restitution and unforgivable sins, see Buchanan, pp. 222-237). Paul (Gal. 6:1; 2 Thess. 3:15) and James (5:19f.) stressed a continuing concern for those put outside because of sin or false doctrine. Ignatius urged the Smyrnaeans to pray for those who should repent, but not to receive them (Smyrn. 4:1) until they did so.

VII. Authorization.–Numerous examples in the Torah, later Prophets, and Psalms show that God was the one who sent curses upon those who disobeyed the commandments (Dt. 27; Ps. 119:21) and otherwise broke the covenant (Mal. 2:2-9; 4:6 [MT 3:24]). But beginning in early times, the community assumed its responsibility for acting on God's behalf to reprimand or punish offenders within the group, sometimes by exclusion (see, e.g., Isa. 66:5; 1 Cor. 5:3). Balaam saw that his curses and denunciations were not automatically those that God would make: "How can I curse whom God has not cursed?" (Nu. 23:8). David, on the other hand, even though he was on the receiving end of Shimei's curses, assumed that the condemnations of his policies might well have come from the Lord; therefore he rebuked those who sought to silence Shimei (2 S. 16:5-14).

The authority to excommunicate was vested in the communiy and exercised by its leaders. Within normative Judaism the power was with the Sanhedrin in Jerusalem or with the elders of a local synagogue. At Qumrân the decision was made by the priests (1QS 5:25–6:1; Heb. *rabbim*, lit. "great ones"; the precise meaning, whether leaders only or all members in full standing, is debated). Jesus assigned the power of "binding and loosing" on earth and in heaven to Peter (Mt. 16:18f.) and the other disciples (18:18f.; Jn. 20:23). Paul assumed such authority among the churches he had established (Gal. 1:8f.; 2 Thess. 3:6, 14). He could also authorize a local church to excommunicate offenders in his absence (2 Cor. 6:10), but not all church leaders were so empowered. Timothy and Titus were not instructed to excommunicate, although both heretics and sinners were in their midst. They were simply to avoid controversy and lead exemplary lives.

VIII. In the Early Christian Community.–The early Christians knew of excommunication through their Jewish heritage before they themselves experienced such pressures from the synagogues (Lk. 6:22; Jn. 9:22; 12:42; 16:2). Whether such pressures were the direct result of Christian doctrine, or behavior resulting therefrom, is debated (see Hare, ch. 2). Later, Christians also struggled with the problem of sin after baptism and of the possibility of remaining in the community after a second offense (He. 6:4-6; Shep. Herm., esp. Vis. 2:2:5 and 3:5:4).

CLEMONS

EXCUSE [Gk. *próphasis*] (Jn. 15:22); AV "cloak"; [*paraitéomai*] (Lk. 14:18); NEB "please accept my apologies"; for the terms in Rom. 1:20; 2:1, 15, see below.

Statements in Luke (14:18f., 24), John (15:22; cf. 9:41), and Romans (1:20; 2:1, 15) together make it clear that people who reject God are judged to be without excuse. Such people cannot plead that they had received no invitation, for the invitation to the kingdom of God had come (Lk. 14:17); nor that the Son had not come to them, for He had both come and spoken (Jn. 15:22); nor that God was unknowable because He is invisible, for the fact of divine sovereignty (Gk. *dýnamis kaí theiótēs*) is clearly seen in God's works of creation (Rom. 1:20). Since none of these writings presupposes a comprehensive philosophy of religions, nor comparisons between religions, one is not justified in deducing from these early texts modern conclusions about "what happens to those who never heard of Christ." Rather, the function of each text in its context must be respected.

(1) The parable of the great supper (cf. Gospel of Thomas 64, perhaps closer to the earliest form of the parable) functions for both Luke (14:16-24) and Matthew (22:1-14) as a commentary on "the kingdom of God," as their introductions indicate. The invitation to come to the prepared banquet echoes Jesus' call to "repent, for the kingdom of God has drawn near" (Mk. 1:14).

The guests who were invited first (i.e., the "righteous" leaders) were excluded only by their own action of begging pardon for rejecting the invitation. The point of the parable is: the time of decision is now (Perrin), for God has made everything "ready," and that time cannot be deferred by trying to make excuses (Gk. *paraiteísthai*).

(2) In the upper-room discourse (Jn. 14–17) Jesus is presented as analyzing the world's hatred of both the Master and the servants (15:18-22). There is no *próphasis* for the sin of rejecting the light that came in the incarnate Word, or of unbelief in Jesus (cf. 16:9) "without a cause" (15:25; cf. Ps. 69:4 [MT 5]).

Because the Messiah had come and spoken to "them" (i.e., religious authorities who were hostile to Jesus), their subsequent "hatred" was in no way due to God. Both the making of excuses (the parable of the great supper) and the inability to find any valid excuse for rejecting the Messiah are, accordingly, part of the mystery of evil.

The consequent judgment comes, for the Fourth Gospel, not on Jews as Jews, but on any opposition to Jesus (Brown).

(3) In Romans the Greek expression *anapológētos eínai* ("be without excuse," "have no excuse") is used in 1:20; 2:1, and a form of *apologéomai* in 2:15 (AV "excusing" is better; cf. AV "we excuse ourselves" for *apologoúmetha* in 2 Cor. 12:19, where the RSV uses the concept of "defense" [as does the NEB in all three passages]).

Paul's charge of inexcusability provides no warrant for anti-Semitism. It is unrighteousness and ungodliness as such that are literally "without apology," for gentile (Rom. 1:20) and Jewish (2:1) opponents of God have acted alike (1:18; 2:1, 3).

What is inexcusable among non-Jews is stated in Rom. 1:21-23 (introduced by *dióti*): they did not glorify nor thank God, and they did make themselves out to be wise while actually concluding with empty thoughts, while exchanging the glory of God for shadowy images. But many non-Jews are doers of the law (2:14).

On the other hand, many Jews who have and hear God's law do not do it (Rom. 2:13, 17-24). So, when Jews follow falsehood rather than the truth and act with selfish ambition, their inexcusability likewise is met with God's wrath (2:8).

Why is there "no excuse"? There is no excuse for Jewish opponents because they have received the law and could have responded to God's will (Rom. 2:17f.). The reason that the gentile opponents have no excuse is less clear. Some interpreters have said it is because Gentiles have "natural theology" (Calvin, Brunner); but others have denied this (K. Barth, C. K. Barrett). Quite possibly this debate is about a false issue, arising from the premise, shared by Paul, of natural revelation. That revelation, no less than the law, has often been inexcusably misused.

Paul's thesis in the first main section of Romans (1:18–3:20) is, rather, that all people actually (objectively) are under God's sovereign will, whether or not they know it and respond to it. There is, as Lightfoot put it, "remarkable correspondence" between this part of Romans and Wisd. 13–15. The point established in Wisd. 13–15 is that idolatry is evil (in 13:1-9 the point is the uselessness of deifying nature). One would have to be a fool, one who does "not deserve to be excused" (13:8, NEB; LXX *oud' autoí syngnōstoí*), not to know the mere fact that God "really is" (13:1), and that He is "much better" and "much more powerful" than His works (13:3f.). Natural theology is not predicated thereby.

Paul similarly presupposes that there is, even outside the law given to Israel, an awareness of the God who "really is." There is, then, "no excuse" not to respond to this God, even though such awareness outside the law is never equated with the knowledge of God according to law. This Law shows what natural revelation does not, namely, God's kindness (Rom. 2:4), will (v. 18), knowledge and truth (v. 20), faithfulness (3:3), peace (v. 17), righteousness (v. 21), etc. Hence, Paul's mission continuously up-

held the priority "to the Jew first and also to the Greek" (1:16; 3:2,29; 9:3-5; 11:1f., 17-24,29). But the inexcusability is shared by both those who have and those who have not received the law and who, in either case, reject God.

EXECRATION [Heb. *'ālâ*] (Nu. 5:21,27; Jer. 42:18; 44:12); AV also CURSE; NEB also ADJURATION. Though "execration" can refer to either a curse or the victim of a curse, it is used by the RSV only in the latter sense. Heb. *'ālâ* is more often translated "curse." In Jeremiah "execration" is used to distinguish *'ālâ* from another Hebrew word (*qᵉlâlâ*), translated "curse," which occurs in the same passage. *See* CURSE.

EXECUTE [Heb. *'āśâ* (Ex. 12:12; Nu. 5:30; 33:4; Dt. 10:18; 33:21; etc.), *nāqam* (Lev. 26:25; Nu. 31:3), *ḥāšaḇ* (2 Ch. 2:14), *šāpaṭ* (2 Ch. 20:12; 22:8; Ps. 75:7 [MT 8]; Isa. 66:16), *dîn* (Ps. 110:6; Jer. 21:12), *pāqaḏ* (Jer. 51:52), *'āḇaḏ* (Ezr. 7:26), *qûm* (Jer. 30:24); Gk. *poiéō* (Jn. 5:27; Rom. 9:28; Jude 15), *ékdikos* (Rom. 13:4)]; AV also AVENGE, DO, FIND OUT (2 Ch. 2:14), JUDGE, MAKE, PERFORM, etc.; NEB also "deal with," EXACT, MAINTAIN, JUDGE, PUNISH, etc. Used mainly of carrying out vengeance or justice. Heb. *'āśâ* and Gk. *poiéō* are very common verbs meaning "do" or "make"; the RSV renders *'āśâ* by "execute" about forty times. In 2 Ch. 2:14 the Hebrew term *ḥāšaḇ* refers to devising or inventing artistic designs. In Rom. 13:4 the rare noun *ékdikos*, "an avenger," is used of the governing authorities as they enforce the law.

EXECUTIONERS [Heb. *pᵉquddôṯ*] (Ezk. 9:1); AV "them that have charge"; NEB "those appointed to punish." The OT has no special word for those who carry out a legal sentence of capital punishment. Ezk. 9:1 refers to officers in charge of the city who were appointed to carry out this sentence.

See also PUNISHMENTS.

EXEGESIS. *See* INTERPRET V; INTERPRETATION, HISTORY.

EXERCISE. As a verb this term is used ten times by the RSV with two different shades of meaning: (1) "to do," "to put into action," "to perform," as in Lev. 25:33 (Heb. *gā'al*, "exercise the right of redemption"), Mt. 20:25 and Mk. 10:42 (Gk. *katakyrieúō*, "exercise authority"), Rev. 13:5 ("exercise [*dídōmi*] authority [*exousía*]"), etc.; (2) "to subject to training and discipline," as in 1 Cor. 7:9 and 9:25 (Gk. *enkrateúomai*, "exercise self-control").

The AV uses "exercise" in several ways that are now becoming obsolete; (1) to "take pains" (RSV), as in Acts 24:16 (Gk. *askéō*); (2) in the general sense of "to train," as, e.g., in 1 Tim. 4:7 (Gk. *gymnázō*).

EXHORT [Gk. *parakaléō*] (Acts 2:40; 11:23; 14:22; 15:32; 16:40; 20:1; Rom. 12:8; 1 Thess. 3:2; 4:1,10; 5:14; 1 Tim. 5:1; He. 3:13; etc.); AV also COMFORT, BESEECH, ENTREAT, omits in Acts 20:1; NEB also ENCOURAGE, APPEAL TO, URGE, etc.; **EXHORTATION** [Gk. *paráklēsis*] (Lk. 3:18; Acts 13:15; 15:31; Rom. 12:8; He. 12:5; 13:22); AV also CONSOLATION; NEB also ENCOURAGEMENT, STIRRING SPEECH, APPEALS.

The NT word for "exhort" is *parakaléō*, a word with various translations for its 103 uses in the NT (fifty-four in the writings of Paul). It can mean either "call" in the sense of "summon," "invite," "address," or "speak to" someone, the meaning then being dependent upon the nature of the call. This second sense is predominant in the NT with *parakaléō* meaning not only "exhort," but also "request" and "comfort." (*See* COMFORT.)

When the term is used for "exhorting," it refers to that urging and encouraging addressed to those of the community of faith which is "designed to lead them to conduct worthy of the Gospel" (*TDNT*, V, 795; cf. 1 Thess. 4:1,10). It is more than just an appeal to morality, inasmuch as it has for its basis and presupposition the action of God in Jesus Christ for salvation. The acceptance of this offer of grace involves obligations for life and conduct. Paul's desire that his fellow workers be active in "exhorting" others (1 Tim. 5:1; Tit. 2:15) has led to speculation that perhaps there was even a *chárisma* ("gift") of pastoral exhortation in the early Church (cf. Rom. 12:8). Mutual exhortation in the community is desired also by the author of Hebrews (3:13). While some passages indicate no sharp, polemical, or critical sides to the exhortings (1 Thess. 3:2), other passages have surrounding terms and contexts that make it clear just how serious and urgent the exhorting is to be (1 Thess. 5:14; 2 Thess. 3:12; 1 Pet. 5:1).

That this exhorting played an important part in the life of the early Church is seen by the use of the word *paraklēsis*, meaning "exhortation." In Pisidian Antioch the rulers of the synagogue asked Paul and Barnabas if they had any "word of exhortation" for the congregation (Acts 13:15). The remarks that follow provide an example of the "word of exhortation," which was probably "a synagogue expression for the sermon which followed the Scripture lessons" (Bruce, *Acts*, p. 261; cf. 1 Tim. 4:13). This is the same expression used by the author of Hebrews to describe the book's literary character (13:22), thus making it a kind of "homily in written form" (Bruce, *Hebrews*, p. 413). The encouraging and comforting aspects of an "exhortation" are seen in the rejoicing of the congregation of Antioch when they received the letter from the Jerusalem Council (Acts 15:31) and in the words of wisdom of Prov. 3:11f. quoted in He. 12:5f.

EXILE. In the OT the most common term for "exile" is Heb. *gālâ* and its cognates (1 Ch. 5:22; Jer. 13:19; 29:1; Ezk. 12:3; etc.). One cognate is *gālûṯ* (2 K. 25:27; Ezk. 1:2; Am. 1:6; etc.), which has the same meaning as *gôlâ* and can refer either to exile (Ezk. 1:2; 12:11) or corporately to those who had been exiled (Jer. 29:20,22). In preexilic OT writings *gôlâ* is applied to peoples other than Israel and Judah (cf. Isa. 20:4; Jer. 48:7; Nah. 3:10; etc.), though it most commonly refers to Assyrian or Babylonian deportations. The verb *gālâ* refers only once to a non-Israelite people (Am. 1:5), otherwise alluding to Israel (2 K. 15:29; 17:11; etc.) or Judah (2 K. 24:14; Ezr. 2:1; etc.). Synonymous in meaning with *gālâ* is *šāḇâ*, "carry off captive" (Ezk. 6:9), while *šᵉḇî* and *šiḇyāṯ*, both meaning "captivity," "captives," are synonymous with *gôlâ* (Dt. 32:42; Ezr. 2:1; 35c). *See* CAPTIVITY. In Ezr. 6:16 Aram. *gālû* occurs in reference to "those taken into exile." In the LXX, Gk.

aichmalōtízein and *metoikízein* with their cognates are used to render *gālâ* and its cognates.

NT writers varied equally in their use of terms. *Metoikízein* occurs in Acts 7:43 ("take into exile"; NEB "banish"), while the concept of exile itself is rendered by such terms as *metoikesía* (Mt. 1:11f., 17; NEB "aliens"), *aichmatōsía* (Rev. 13:10; NEB "made prisoner"), and *paroikía* (1 Pet. 1:17; NEB "your time on earth"). An exile is designated in Acts 7:29 (NEB "settled") and 1 Pet. 2:11 (NEB "aliens") by the term *pároikos*. The dispersion consequent upon exile is referred to in Jn. 7:35; Jas. 1:1; 1 Pet. 1:1. R. K. HARRISON

EXIT [Heb. *môṣā'*] (Ezk. 42:11; 43:11); AV GOING OUT; [*tôṣā'ôṯ*] (Ezk. 48:30); AV GOING OUT; NEB WAY OUT. An outlet from the temple (42:11; 43:11) or city (48:30) described in Ezekiel's vision. In 42:11 the RSV emends the MT *kōl môṣā'êhen* (AV "all their goings out") to read *k^emôṣā'êhen* (lit. "like their exits").

EXODUS, BOOK OF.

I. Introduction
  A. Name
  B. Outline of Contents
  C. Connection with Other Pentateuchal Books
II. Composition of Exodus
  A. Critical Theory
  B. Weaknesses of Graf-Wellhausen View
  C. Composition in the Light of Ancient Scribal Practices
  D. Authorship and Date
III. Historical Criticism of Exodus
  A. The Deliverance from Egypt
  B. The Covenant at Sinai
  C. The Wilderness Tabernacle

I. Introduction.—A. Name. The second book of the PENTATEUCH was known to the Jews by the designation *w^e'ēlleh šemôṯ* ("and these are the names"), sometimes abbreviated to *šemôṯ*, taken from the opening words. This designation was familiar to Origen in the form *Oualesmoth*. The LXX, however, entitled the book according to its main theme (Ex. 19:1), this being followed by the Vulgate (*Exodus*) and the English versions.

B. Outline of Contents. The book is extremely valuable in preserving the link between the historical material of the Genesis narratives and the later history of the people of Israel. The sequence of events is of prime importance to the Hebrew concept of history, and Exodus is of fundamental significance for the manner in which it depicts the historical basis for the existence of Israel as the chosen people of God.

The contents can be broken down into three broad divisions:

I. Events Leading to the Exodus (chs. 1–11)
  A. Preliminary Genealogy (1:1-6)
  B. The Bondage in Egypt (1:7-22)
  C. Early Days of Moses (2:1-10)
  D. Later Life of Moses (2:11–4:26)
  E. Israel in Bondage (4:27–6:13)
  F. Genealogical Table (6:14-27)
  G. Moses and Aaron Encounter Pharaoh (6:28–7:25)
  H. The Ten Plagues (8:1–11:10)
II. The Exodus and the Journey to Sinai (chs. 13–19)
  A. The Passover Instituted (12:1-28, 43-50)
  B. The Tenth Plague and the Withdrawal from Egypt (12:29-42, 51)
  C. Regulations about Firstlings and Unleavened Bread (13:1-16)
  D. Preparations for Complete Withdrawal (13:17-22)
  E. The Exodus Accomplished (14:1-31)
  F. Song of Moses (15:1-21)
  G. The Wilderness of Shur (15:22-27)
  H. The Wilderness of Sin (16:1-33)
  I. Editorial Gloss (16:34-36)
  J. Occurrences at Rephidim (17:1-16)
  K. Jethro and Moses (18:1-27)
  L. Moses at Sinai (19:1-25; 20:18-21)
III. The Legislation at Sinai (chs. 20–40)
  A. The Decalogue (20:1-17)
  B. The Covenant Code (20:22–23:33)
  C. The Ratification Ceremony (24:1-8)
  D. Moses' Return to Sinai (24:9-18)
  E. The Tabernacle Specifications (25:1–27:21)
  F. The Tabernacle Ministry and Ritual (28:1–31:11, 18)
  G. Sabbath Enactment (31:12-17)
  H. The Golden Calf Incident (32:1-35)
  I. God and Moses at Horeb (33:1-23)
  J. A Second Recording of the Covenant (34:1-35)
  K. A Brief Sabbath Enactment (35:1-3)
  L. Sanctuary Offerings (35:4–36:38)
  M. Ark and Tabernacle Furniture Constructed (37:1–38:31)
  N. Preparation of Priestly Garments (39:1-43)
  O. Erection of Tabernacle (40:1-33)
  P. The Guiding Cloud (40:34-38)

C. Connection with Other Pentateuchal Books. Ex. 1:1-7 connects the history of the people as found in Exodus with the family history of Genesis by narrating how the seventy descendants of Jacob who had migrated to Egypt (cf. Ex. 1:5; Gen. 46:27) had come to be the people of Israel, and that the God who offers Himself as a liberator to Moses and the people is also the God of those fathers of whom Genesis spoke (cf. Ex. 3:6, 13, 15f.; 4:5; 6:3). His covenant with the patriarchs and His promises to them are the reasons why He cares at all for Israel (2:24; 6:8; 33:1), and when Moses intercedes for the sinful people his most effective motive is found in God's promises made to the patriarchs (32:13).

As is the case with Genesis, Exodus stands in very close connection with the succeeding books of the Pentateuch. Israel is certainly not to remain at Sinai, but is to come into the Promised Land (3:17; 6:8; 23:20-26; 32:34; 33:1-3, 12-17; 34:11.; cf. also the many ordinances of the Books of the Covenant, 21–23; 34:11-26). In this way the narratives of the following books, which begin again in Nu. 10:11ff. with the story of the departure from Sinai, continue the history in Exodus. But the legislation in Leviticus also is a necessary continuation and supplement of the book of Exodus and is prepared for and pointed to in the latter. The erection of the altar of burnt offering (27:1-8; 38:1-8), as well as the mention of the different kinds of sacrifices, such as the sin offering and the burnt sacrifices (29:14, 18), and of the wave offering (29:28), point to the promulgation of a law of sacrifices such as we find in Lev. 1–7. The directions given in regard to the consecration of the priests (Ex. 29) are carried out in Lev. 8–9. The indefinite commands of 30:10 in reference to the atonement on the horns of the incense altar once every year render necessary the special ritual of the Day of Atonement in Lev. 16 as a supplement. The more complete enlargement in reference to the showbread mentioned in 25:30 is found in Lev. 24:5-9; and even the repetitions in references to the candlesticks (Ex. 25:31-40; Lev. 24:1-4; Nu. 8:1-4), as also the *tāmîḏ* ("continuous") sacrifices (cf. Nu. 28:3-8 with Ex. 29:38-42), point to a certain connection between Exodus and the following books. The close connection between Deuteronomy and Exodus, in regard both to the historical narratives and to their legal

portions (cf. the Decalogue and the Books of the Covenant), will be examined subsequently.

II. Composition of Exodus.–A. Critical Theory. The literary criticism of Exodus has for long been linked with that of Genesis and the other pentateuchal writings (*see* PENTATEUCH; CRITICISM II). The criteria for such activity, as furnished by Astruc (1753) and developed with certain modifications by a succession of scholars including Eichhorn, Geddes, Hupfeld, Graf, and Wellhausen, consisted primarily of the variants of the divine name used in Genesis. In his attempts to resolve supposed chronological confusion in the MT and set the material in proper order, Astruc postulated several underlying literary sources or "documents." All passages that used the tetragrammaton YHWH were assigned to a J(ahwistic) document, while those in which the common designation Elohim occurred were credited in a similar manner to an E(lohistic) document. Subsequent literary-critical speculation produced a P(riestly Code) source (which at first was thought to be early but under the influence of Wellhausen was assigned to the postexilic period) and finally a D(euteronomistic) document, consisting predominantly of the canonical book of Deuteronomy. At this point it must be emphasized that J, E, and P are purely hypothetical "documents" whose existence has never been even remotely demonstrated by any adherent of the literary-critical theory. Astruc, in fact, had some reservations about the validity of his criteria, but despite whatever circulation these reservations were given, they were swept aside by nineteenth-century European scholars in their eagerness to develop an "evolutionary" hypothesis of pentateuchal literary growth. It is only recently that the erroneous postulates and methods employed in such source-analysis have been recognized and exposed for their inadequacy and inaccuracy. Consequently there are few contemporary liberal scholars who would care to identify themselves in every respect with the complexities of the literary analysis of Exodus as postulated in the heyday of the Graf-Wellhausen theory of pentateuchal origins. Indeed, even at that period, there was considerable difference of opinion as to where the alleged underlying "documents" began and ended, and this constituted a tacit recognition of the fact that, on any basis of literary criticism, the book of Exodus exhibits a remarkable compositional unity and is therefore considerably more difficult to analyze than might be the case for other pentateuchal material.

As late as 1956, however, Eissfeldt was insisting that there was at least one other documentary source for the Pentateuch that up to that time had eluded the best efforts of the literary critics to isolate. To meet this deficiency he gathered up all those fragments that had not already been marshalled into one "document" or another and claimed that they belonged to an L or Lay source. J. Morgenstern claimed to have found a less exotic source styled as the K(enite) document, which comprised the story of the life of Moses, containing details of the Sinai covenant and its supplementary legislation.

B. Weaknesses of the Graf-Wellhausen View. While these are discussed at greater length in the article PENTATEUCH, some of the more important deficiencies may be referred to here. Perhaps the most significant is that the entire literary-critical theory was based on a priori intellectual considerations, whereby it assumed without reference to objective criteria the validity of certain antecedent postulates and then proceeded to make the facts as contained in the MT agree with them. What was undoubtedly one of the more embarrassing results of this procedure was its description in nineteenth-century literature as "scientific."

Regrettably for the OT literary-critical speculators of nineteenth-century Europe, their activities gave no indication whatever of the basic knowledge or application of scientific method. Since they felt no need to concern themselves with external evidence, the followers of Astruc, Hupfeld, and Graf paid no attention whatever to the increasing corpus of archeological material that was being amassed by contemporary antiquarians. Instead of inquiring into the methods employed by ancient Near Eastern scribes in compiling their material, the Graf-Wellhausen school preferred to indulge in literary-critical speculations that had absolutely nothing in common with the Near Eastern methods of literary transmission but that, in accordance with the spirit of the age, were dominated by a strictly evolutionary character. One result of this view was the notion that all material passed through long interludes of oral transmission before being committed to writing, a view that leaned heavily upon theories of the origins of European literature. In contrast, more recent studies in Near Eastern scribal methods have shown that anything of significance was written down within a very short period after the event itself and that the primary use of oral tradition was for disseminating material that was already in written form.

Because of their a priori approach, the exponents of the documentary theory showed markedly little respect for the MT and felt at liberty to make whatever textual emendations and rearrangements were thought desirable to make the Hebrew text conform to their theories of origins. Some enterprising analysts would extract a few words from the middle of a verse already credited to one "document" and quite arbitrarily assign them to another of supposedly quite different provenance. Thus, not a little discredit accrued to the various analytical schemes because of the wide range of disagreement regarding the contents of the "documents," along with the fact that the various literary sources were incapable of the slightest degree of factual demonstration.

Probably the greatest weakness of the literary-critical approach, however, is its almost complete divorce from factual reality as experienced in the ancient Near Eastern life-setting, a fact that has been demonstrated amply by modern archeological discoveries. The criterion of the divine names (about which even Astruc entertained some doubts, as remarked above) has now been shown to be entirely invalid as a basis for postulating pentateuchal documentary sources. There *are* genuine literary sources for the pentateuchal writings, of course, but they are quite different in nature from those formulated by nineteenth-century European scholars (*see* GENESIS). The doublets and repetitions taken by the literary-critical school as indications of diverse documents are now known to have been a regular part of ancient Near Eastern compositional activity. Finally, form-critical studies in Genesis give clear indications that the bulk of the book consisted of ancient historiography, patterned along Mesopotamian lines and united with the Joseph narratives to form the completed canonical work. These studies, which are supported by archeological discoveries from Mari, Nuzi, and elsewhere, deal the death-blow to any European theory of subjective and rather fragmentary "documents" based upon the tightly-restricted use of one or other of the divine names and committed to writing many centuries after the events that they described.

C. Composition in the Light of Ancient Scribal Practices. It will be necessary in attempting to indicate the possible means by which Exodus was compiled to draw to some extent upon what is now known about literary and scribal practices in the 2nd millennium B.C. As indicated above, a great many Near Eastern literary sources such as annals

and court histories show that events of any significance were recorded at the time they occurred or shortly thereafter. This was one result of the comparatively high degree of literacy in the ancient Near East, as contrasted with the virtual illiteracy of early European nations, which consequently had to depend to an embarrassing extent upon campfire bards for the preservation of national sagas and other topical material.

The assumption by Graf, and especially Wellhausen, that writing came into use only about 1000 B.C., at the beginning of the Iron Age, and was therefore not available to Moses, was one of the tragic results of ignoring already extant factual material in the form of ancient Near Eastern inscriptions. It is now known that writing was one indication of culture in the Orient from at least 3500 B.C. onward, and archeological discoveries in Canaan have shown that in the Late Bronze Age (*ca.* 1550-1200 B.C.) the native population employed a linear alphabetic script, an indigenous cuneiform language (Ugaritic), and a syllabic script used at Byblos in Phoenicia. In addition, Babylonian cuneiform was the *lingua franca* of the age, as demonstrated by the Amarna Tablets, while Egyptian hieroglyphic writing had also been in use in the ancient Near East for many centuries.

In the light of this evidence it is impossible on any basis of reasoning to deny the existence of writing in the Mosaic period or to doubt the validity of the Hebrew tradition which ascribed literary activity to Moses and other Hebrew personages in the Late Bronze Age. As far as contemporary writing materials are concerned, the most readily accessible for the wandering Hebrews, and by far the most permanent, would have been the hides of slaughtered animals, suitably prepared to receive writing. According to Jewish tradition the Torah was originally written on leather scrolls in an early angular Phoenician script, which was replaced only in the days of Ezra by the square or Aramaic script used in modern printed editions of the Hebrew Bible (cf. T.B. *Sanhedrin* 21b). It is certain that leather rolls would have been much more accessible during the wilderness wanderings than papyrus, which in any event would have disintegrated quickly once it was removed from the dry Egyptian climate, and would have been far more desirable than stone blocks, which would have been too cumbersome for easy handling or transporting. The Dead Sea Scrolls show how the scribes of antiquity stitched pieces of leather together in order to form a roll of suitable length.

While the actual mechanics of the compilation of Exodus are, of course, unknown, it may be possible in the light of current information concerning Near Eastern scribal practices to suggest the process by which the canonical work was composed. As a basis for the work the compiler would have access to the Decalogue (20:1-17) and the Book of the Covenant (20:22–23:33), the latter perhaps in a shortened form, as well as the songs composed by Moses and Miriam. In addition there would be available the various regulations relating to sabbath observance and the instructions for the fashioning of the tabernacle. The detailed nature of the various moral and ceremonial regulations would suggest that they were written down at, or shortly after, the time of their promulgation, in accordance with ancient Near Eastern scribal practice. Even if the songs of Moses and Miriam were still in oral form, they also would be in written form by the time the compiler had finished his work. Since, however, in the view of the present author the songs were delivered orally and committed to writing within the same generation, any time lapse between the two stages of transmission would be negligible.

The book was compiled against the background of its principal theme of deliverance, but enough historical material was introduced as a preface to the actual departure of the Hebrews from Egypt to preserve a proper sense of historical continuity. Since the sequence of events was the prime consideration in Hebrew historiography, questions of strict chronology or the identification of specific foreign personages such as the Egyptian pharaohs were relegated to a somewhat secondary position, to the disadvantage, unfortunately, of the modern student. However, the Exodus scroll began with 1:1-17, a section that linked the work with Genesis by the simple expedient of identifying the enslaved peoples. The insertion of a list dealing mainly with the ancestry of Moses and Aaron helped to ground these individuals firmly within Hebrew historical tradition, and at this point the first section (1:1–6:28) ended. A rather better chronological picture might have been preserved had the material of 6:14-27 been inserted after 4:26, but as indicated above, strict chronological considerations were not of paramount significance to Hebrew historians. The list of names is very similar to the Genesis genealogical tables, some of which may have been written on the back of the tablets that, in the view of the present writer, formed the original, genuine literary sources of that book (*see* GENESIS). Lists of this kind have been recovered in abundance from Mari, Nuzi, and other sites in Mesopotamia. While the Exodus material does not conform to the general pattern as closely as its Genesis counterparts, 6:26-28 is quite similar in character to the typical colophon of Mesopotamian tablets, in which the owner (or scribe) of the material was identified ("this Moses . . . this Aaron") and some scribal attempt at dating was generally made ("on the day when the Lord spoke to Moses in the land of Egypt"). Probably Ex. 6:10-13 and 6:28–7:7 indicate the end of one leather roll and the beginning of another, since the similarity of the two passages would enable the second to be read intelligently yet independently of the first. A similar relationship exists between 2 Ch. 36:22f. and Ezr. 1:1-3a, where the former is used as a rather lengthy "catch-line" in the traditional Mesopotamian manner, with the intention of ensuring the proper continuity of the narrative.

Any attempt to understand the processes of compilation of Exodus must necessarily be conjectural. But if it is legitimate to suppose that the book was written on leather, as suggested above, a new piece of scroll would have been added after 6:29. This would then carry the narrative material to 12:28, where there appears to be some dislocation of the text. In such an event, 12:43-50 may have come originally after 12:18 in order to preserve the general continuity. Ex. 13:1-16 is also somewhat displaced as far as the order of events is concerned, but would have been inserted at that point because of its priestly characteristics. Another portion of the scroll would commence at 13:17-22, where there is some overlapping with 12:37-41 similar to that noticed above in connection with 6:10-13 and 6:28–7:7. The narrative then continued to the events at Sinai and the Decalogue (20:1-17), but whether or not all this was contained on one piece of leather scroll is impossible to say. The Covenant Code (20:22–23:33) may well have had an independent existence at one point, or else was in circulation in conjunction with the Decalogue (20:1-17), if the remarks in 24:4 are a credible record of contemporary happenings. Ex. 20:18-21 would form the introduction to a new section of scroll that continued to 24:18.

At 25:1 occurs the beginning of a corpus of material dealing with the tabernacle and the regulations relating to its use. This was oral in form originally and, following

Exodus 29:41–30:23b in the oldest extant Torah (*ca* A.D. 900) (Trustees of the British Museum; picture J. C. Trever)

ancient Near Eastern scribal practice, was committed to writing very soon after it was received, not least because of its fundamental importance for Israel's religious life. This material terminated at 31:11, 18, with vv. 12-17 perhaps constituting a dislocation from 31:1-3. The general historical narrative was resumed with 32:1 and carried on without interruption to 34:28. The remainder of the book was written on one piece of leather, since it is an unbroken account of how the instructions for the building of the tabernacle were implemented.

The entire roll was concluded somewhat in Mesopotamian fashion by a colophon, dealing with the finished tabernacle and the guiding cloud (40:36-38), a theme picked up later in Nu. 9:15-23. From 34:27 it would appear that the enactments of 34:11-26 may have had an independent existence at one period, and these, along with the Decalogue and Covenant Code, would comprise some of the original literary sources employed by the compiler in assembling the appropriate portions of the Exodus scroll. On any basis of literary criticism the delineation of sources in Exodus is an extremely difficult task, as scholars in an earlier generation discovered. While the foregoing suggestions are based upon current knowledge of scribal methods in the Amarna Age and later periods, it must not be imagined that they necessarily depict even approximately the method by which the book was originally compiled.

D. Authorship and Date. Liberal scholars generally have been unanimous in their repudiation of the traditional Mosaic authorship of Exodus, although in recent years increasing numbers of them have been prepared to allow the antiquity of specific elements in the "documents" that they regard as constituting the underlying sources of the work. Classic liberalism assigned little if any of Exodus directly to Moses himself, preferring to think instead of literary sources that, while going back in a general manner to the Mosaic period, actually appeared in writing no earlier than the 9th cent. B.C., and that were intermingled with postexilic priestly material to form the basis of the extant work.

That this position is by no means wholly uniform for contemporary liberals has been shown by the willingness of Albright and others to assign a date in the Late Bronze Age to the songs of Moses and Miriam (15:1-18, 21). Furthermore, archeological discoveries have demonstrated the antiquity of specific formal elements in the legal institutions of Israel, and this again has won acceptance in liberal circles. Thus, the Covenant Code (20:22–23:33) is now known to contain a legal tradition reflected in the Sumerian Code of Eshnunna, the legislation of Hammurabi, the Hittite law code, and the enactments from Assyria. While none of the above codes is characterized by exactly the same conditions of society as any other, there is a common element of jurisprudence in these Near Eastern codes, described by Alt as "casuistic" law, and this element occurs also in Exodus. This type of formulation commenced with a conditional clause, stated the case, and outlined the penalty to be described. Another characteristic element of Exodus that also has early Near Eastern parallels is the covenant, which as a theological compact must obviously have had some precursor in secular jurisprudence. This antecedent has now been discovered in the Hittite suzerainty treaties from the Late Bronze Age, the nature of which is discussed below. But even the demonstration of the antiquity of specific elements of Exodus has been insufficient to shake the faith of many liberals in the comparatively late date of the final form of Exodus.

In a reaction against the Graf-Wellhausen theory, Pedersen suggested that Ex. 1–15 comprised the nucleus of the whole Pentateuch, and that it was in effect cultic material forming a separate integrated unit that celebrated God's victory over Egypt at the Reed Sea (*ILC*, III-IV, 726ff.). While this view had the undoubted merit of relating the central theme of Exodus to the religious life of Israel, it seemed to ascribe its provenance to community rather

EXODUS, BOOK OF

than to individual activity and gave little indication concerning the time when the material achieved definite literary form. In the light of the oral-tradition concepts of the Uppsala school, it suggested that the text had experienced a prolonged history of transmission after having originated in cultic (presumably priestly) circles whose connection with Moses could not be established with certainty. Von Rad postulated a similar origin for Ex. 20–24 in his liturgical interpretation of that material (*Gesammelte Studien zum AT* [1958], pp. 9ff.). For him the Sinaitic tradition arose from a cultic festival that was marked by certain characteristic liturgical acts such as exhortation, the recitation of the law, and the promise of blessing. Again, certain anonymous cultic officiants were credited with originating and perpetuating this material, which in its final form was thought to be of comparatively late date. A rather incidental connecting of the Exodus event with the person of Moses was made by Noth (*History of Pentateuchal Traditions* [Eng. tr. 1972], pp. 38ff., 173f.) in an attempt to study Exodus by the "history of tradition" method. But even this was based upon the supposed literary sources for the book as adduced by earlier European scholars, and while certain fundamental themes were held to be enunciated in Exodus, the traditions were really viewed as the property of the amphictyonic Israelites during the judges period and consequently had little, if anything, to do with Moses and his age.

All such reconstructions of alleged sources imply some kind of oral transmission of the material involved. While this concept may well be true of certain isolated elements such as the songs of Moses and Miriam, it is by and large a remarkable assumption in the light of the fact that the MT repeatedly mentions writing and written records. It is even more curious that such oral transmission supposedly continued for many centuries before literary fixity was accomplished, despite clear Near Eastern evidence to the contrary. For those scholars who ascribed little, if anything, of Exodus to the activities of Moses, the extant composition was, in effect, a retrojection of later customs and traditions to the Mosaic age (S. R. Driver, *Book of Exodus* [*CBSC*, 1953 reprint], p. lxv). Enthusiastic nineteenth-century representatives of literary criticism were accustomed to claim that narrators in different generations embellished the narratives in an imaginative manner, so that by the time the compilers of the supposedly underlying "documents" came to their task, the oral tradition from which they worked had become heavily overlaid with miraculous material — much of it, as far as the book of Exodus was concerned, associated in a rather dubious manner with the man Moses. In many quarters serious doubts were entertained with respect to the historicity of Moses, and these have persisted in various forms to the present time (*see* MOSES). There are doubtless plausible reasons why liberal scholars have neglected to take the person of Moses seriously, but it is still true that, in the light of modern archeological knowledge of Egypt and Canaan in the Late Bronze Age, the man Moses is long overdue for historical rehabilitation.

Another institution described in Exodus that was relegated to a late date by Wellhausen and his followers was the tabernacle. This arbitrary position meant that any material dealing with this topic was necessarily of a late date also, since for many nineteenth-century critics the tabernacle as described in Exodus was unhistoric, being instead a simple retrojection to the Mosaic age, on the part of postexilic priests, of traditions connected first with the Solomonic temple. (This position will be discussed in greater detail below.) It seems, therefore, that whatever variations from nineteenth-century liberal orthodoxy have been entertained by later scholars, they have encompassed approximately the same conclusions regarding authorship and date as the earlier views. This has occurred because many writers have held the same assumptions regarding the alleged "documents" that underlie the finished composition.

Those scholars who espoused the Mosaic authorship of Exodus regarded the views of the literary critics as in effect postulating the essentially fraudulent nature of the composition. Conservative scholars were the first to make proper use of archeological evidence in substantiating their case for overall Mosaic authorship of Exodus, in contrast to the nineteenth-century critics who, ignoring archeological discoveries, preferred instead to appeal to late Arabic customs if possible. More recent conservative investigators have combined a knowledge of literary artifacts and scribal transmissional techniques current in the Bronze Age with form-critical studies of Genesis to isolate a series of tablets that give every appearance of comprising the genuine underlying literary sources of that book (*see* GENESIS). This kind of literary analysis absolutely precludes the existence of "documents" such as J, E, and P.

Conservative scholars have generally recognized that Exodus was not written originally as a continuous narrative and that there was probably some editorial activity brought to bear upon the material, possibly even in the immediate post-Mosaic age. It should be noted that the scribes of antiquity, with the exception of the Sumerians, regularly revised earlier literary material and made such changes in orthography, grammar, and syntax as would update it. Explanatory glosses and other relevant additions were frequently inserted by scribes without any prejudice at all to the integrity of the original authorship. Because the scribes of Near Eastern nations were uniformly some of the most responsible elements of the population and pursued their craft along accredited disciplinary lines, editorial activity of the kind mentioned could seldom do anything but enhance the original composition by making the ancient national traditions and literature meaningful for the current generation.

The view that Moses compiled or dictated the bulk of Exodus is based partly upon the biblical report that committing events directly to writing was a part of the regular activity of Moses. This again is in complete harmony with what is known about ancient scribal activity and is therefore an unexceptionable presupposition for authorship by the celebrated Hebrew leader of important sections of the extant Exodus. Moses is credited specifically with a brief document dealing with divine judgment on Amalek (17:14), which would have been in written form shortly after the occurrence if ancient scribal practices were being followed at the time. The resultant book (*sēper*) would then correspond to the "annals" written by the scribes of all the major Near Eastern nations, in which by ancient tradition all the memorable events of the particular period being surveyed, especially if they reflected favorably on the nation, were written down for posterity. Other documents in Exodus attributed directly to Moses are the Book of the Covenant (20:22–23:33; 24:4-8) and the material dealing with the restoration of the covenant (34:27; cf. 34:10-26). Elsewhere in the Pentateuch he is credited with the compilation of statutes (Dt. 30:10), legal enactments (Dt. 24:1), details of the Israelite wanderings (Nu. 33:2), and the words of the victory paean (Dt. 31:19, 22).

Persons other than Moses were also occupied in making records during this period, including priests who wrote down curses (Nu. 5:23) and names of objects (Nu. 17:3). Moses was helped in his literary activities by *šôṭerîm*,

or literate officials (Nu. 11:16; AV, NEB, "officers") of recognized standing in the community. Because these men were able to record decisions, they played an important role in the entire judicial process (cf. Dt. 16:18; 1 Ch. 23:4) and probably recorded much of the material as Moses dictated it. With this kind of secretarial assistance and the existence of a basic source-residuum (consisting of the Decalogue and Covenant Code, the songs of Moses and Miriam, the enactments relating to sabbath observance, and the detailed specifications for the tabernacle), it would undoubtedly be possible for Moses, or some person such as Joshua or Eleazar under the direction of Moses, to have compiled Exodus in substantially its present form during Moses' lifetime or immediately after his death. The historiographic method employed, as noted above, preferred to cover the general trend of events rather than to depict a precise chronological sequence. Leather would probably be the material used for the purpose of containing the written record, and would certainly be the most readily available substance in the wilderness.

In the light of this general compositional procedure it will be readily recognized that post-Mosaic and even non-Mosaic additions could be present in the extant book. Since, however, it was considered a normal function of scribes who were editing and revising earlier material to explain, modify, and even supplement the text at hand without impairing the original authorship, it will be seen that the possibility of post-Mosaic insertions raises no real problems with regard to the Mosaic authorship of the extant composition. One commonly alleged post-Mosaic element is 6:26f., where it has been supposed that one would write in that fashion only of deceased persons. However, the verses in question follow a genealogy and comprise a colophon that means: "this is the genealogy of Moses and Aaron to whom God spoke." When 6:26 is compared with 6:14, it carries precisely the same force as v. 27 compared with v. 13, thus raising immediate doubts as to whether in fact 6:26f. is post-Mosaic. Ex. 16:33-35, which mentions the "testimony," is actually referring to the covenant tablets, which had not yet been given to the people if the strict succession of events is being followed. Despite this, there is nothing in the passage being considered that would preclude its insertion in the Exodus scroll during the lifetime of Moses, especially if the book were compiled at a later rather than at an earlier stage in his career. If later than Moses, however, it is possible that Ex. 16:33-36 comprised an editorial explanation of the manna phenomenon that was designed for the understanding of later generations. Even this, however, does not require a date later than the time of Samuel. The explanatory gloss represented by 16:36 has been thought to indicate a time of composition when the value of the comparatively rare word *ʿōmer* had been forgotten. The term occurs only in that chapter in the MT, but in such a manner as to make its significance as a measure and as a measured quantity immediately evident to anyone who understood the phenomena of the wilderness wanderings. Ex. 11:3 would appear *prima facie* to present greater difficulties, since Moses could hardly be expected to have described himself as being of impressive stature in Egyptian society. But even here little prevents this from being a typical marginal gloss that was incorporated into the text at a later stage.

Having regard to the nature of scribal activity in the ancient Near East, the greatest caution is necessary before authoritative pronouncements are made about supposedly non-Mosaic material in Exodus and other Pentateuchal books. It is no longer necessary to urge that the use of the third person militates against direct Mosaic authorship, since this procedure was common a millennium or more after the Mosaic era, occurring, e.g., in the writings of Xenophon and Caesar. The practice finds OT support in prophetical literature of persons such as Isaiah (20:1-4) and Ezekiel (24:24).

In view of the above considerations, then, the ancient tradition that credited Moses with a substantial amount of literary activity is supported by what is now known of scribal practices in the Bronze Age. Furthermore, the fact that certain characteristic Israelite institutions had significant elements in common with contemporary secular forms would seem to point to the coordinating activity of an outstanding leader of the people, which again is in accord with ancient Hebrew tradition. When the biblical data are reviewed in the light of the objective evidence now available, the most logical explanation of the provenance and date of Exodus is that the work is a product of the Late Bronze Age and was most likely compiled by Moses from contemporary written and oral sources with the assistance of certain priests and the *šôṭᵉrîm*. The finished product was, of course, amenable to the normal processes of later scribal revision, as mentioned above.

III. Historical Criticism of Exodus.—*A. The Deliverance from Egypt.* The function of historical criticism is to establish as far as possible the historicity of the events and personages under consideration in a given area of the biblical record. Where extrabiblical sources such as annals, inscriptions, and monuments testify directly or indirectly to the historic nature of the people and happenings mentioned in the OT, they obviously confirm the record of the MT and serve as valuable supplements to the biblical narratives.

While many OT books have been illumined in this manner, the general period covered by the age of Moses exhibits little in the way of specific correlation between secular Egyptian records and the scriptural text. That particular time was one of Egyptian preoccupation with the restoration of the national greatness of earlier days after the embarrassment of the Hyksos occupation during the Second Intermediate Period (*ca.* 1780-1570 B.C.). During this cultural renaissance known as the New Kingdom period (*ca.* 1570-1150 B.C.), in which Egypt once again exercised an important military, economic, and social influence in the Near East, the work of Moses can be placed with the greatest degree of historical accuracy. This assessment is based, among many other factors, on the interval of 430 years (Ex. 12:40; cf. Gen. 15:13) that occurred between the entry of Jacob and his family into Egypt at *ca.* 1700 B.C. and the rise of a pharaoh who "did not know" (Ex. 1:8) the achievements of Joseph during the Hyksos period (*see* CHRONOLOGY OF THE OT). Characteristic of the unnamed pharaoh was the cultural reaction of the New Kingdom period, which set about the deliberate physical and mental obliteration of anything connected with the hated Hyksos. This wave of nationalism, which reached its height in the 18th Dynasty in the later Amarna period, would naturally take no official cognizance in annals or inscriptions of a person such as Moses once his Hebrew ancestry was discovered. The absence of extrabiblical information about Moses has been one factor in the vagueness of many modern liberals about the historicity and work of Moses, but against this must be reckoned the uniform testimony of Hebrew tradition as concerning the towering stature and fundamental importance of this man as the founder of normative Hebrew law.

Egyptian archeology has yielded a vast amount of background information for the life of Moses without actually

corroborating the biblical record about him at any specific point. There is ample evidence for the royal harems of the New Kingdom period, the educational system of that time, life in the Egyptian courts, and the social conditions existing in the 13th cent. B.C. The name "Moses" is evidently a play on the verb *māšâ*, "draw out," but may also have a superficial relationship to the Amarna-age word for "child" (*ms[w]*). Since the pun is Semitic rather than Egyptian in form, it suggests that the name was originally given by Moses' natural mother and not by one of the harem princesses who subsequently adopted him. Excavations at Tell el-Retabah uncovered what was believed to be the ancient city of Pithom, and the recovery from the massive brickwork there of "bricks without straw" such as were manufactured by the captive Israelites (Ex. 1:14; 5:7f.) seems to lend historical dimensions to the Hebrew account of the captivity in Egypt. The store-city known to the Hebrews as RAMESES (Ex. 1:11) was possibly ancient Tanis (Zoan). Rameses was the capital city of the 19th Dynasty and originally the capital of the Hyksos rulers also, which Ramses II enlarged considerably. Since Exodus uses the name by which the city was known only for a period of two centuries (*ca.* 1300-1100 B.C.), it is highly probable that the Hebrew tradition dated from this time. In passing it should be noted that the corporal punishment endured by the captive Hebrews adds an authentic if unfortunate touch to the situation, since this was standard procedure in ancient Egypt for encouraging progress in any kind of work (C. H. Gordon, *Intro. to OT Times* [1953], pp. 130f.) and was applied without discrimination to native peoples and foreigners.

According to Papyrus Anastasi III, it was not uncommon for the people of Rameses to present petitions to Pharaoh Ramses II (P. Montet, p. 71) and therefore not surprising that Moses should also be able to do this, particularly if the pharaoh of the Exodus were Ramses II. Egyptian ostraca recording the absences of workmen have also been recovered from this period (A. Erman, *Life in Ancient Egypt* [1894], pp. 124f.), one source mentioning certain workmen being away from their tasks in order to present offerings to their gods. That the Hebrews were able to make a similar request without arousing popular resentment (Ex. 8:26f.; 10:9, 25f.) is thus thoroughly in accord with the contemporary situation.

Historical criticism of the plagues in Egypt encounters the difficulties associated with the factual demonstration of any historic natural phenomenon. No account of the plagues has been recovered from Egyptian sources, so that the description in Exodus furnishes the only information about the situation. Recent studies have helped to confirm the actuality of the plagues and have shown the accuracy with which the phenomena were reported. The first nine plagues are now seen to have followed in sequences on the basis of an unusually high inundation of the Nile, commencing in July-August. The chronology of the Exodus account would point to the termination of the plagues the following March (G. Hort, *ZAW*, 69 [1957], 84-103; 70 [1958], 48-59). The final plague, being supernatural in nature, is naturally not amenable to historical demonstration.

The place where the actual departure from Egypt occurred is difficult to locate, if only because the construction of the Suez Canal altered the appearance of the landscape in the area of the papyrus marsh mentioned in Ex. 13:18. This locality, rendered "Red Sea" in many translations, is probably the "Papyrus Lake" mentioned in the Egyptian Anastasi III papyrus as the source of papyrus for the city of Rameses. Since papyrus is a freshwater plant, it is not found in the salty Gulf of Suez, nor for that matter in the brackish waters of the Bitter Lakes or Lake Timsah. Most likely the "Reed Sea" was located E of Rameses in an area that may now be covered by part of Lake Menzaleh (*see* RED SEA).

The date of these events is one of the most perplexing matters in OT chronology, and archeological discoveries have so far failed to resolve the problems presented by the two principal conflicting views (*see* CHRONOLOGY OF THE OT; EXODUS, DATE OF THE). The suggested dates differ by over 150 years and each can be supported to some extent by the OT records. The earlier date places the Exodus at the time of Thutmose III (*ca.* 1504-1450 B.C.), while the later one regards it as falling within the reign of Ramses II (*ca.* 1290-1224 B.C.). The fifteenth-century date rests in part on a chronological note in 1 K. 6:1, which mentions that the Solomonic temple was started in the 480th year after the Exodus. If Solomon is to be dated *ca.* 971-930 B.C., the Exodus would have occurred about 1441 B.C. Excavations undertaken by J. Garstang at Jericho purported to indicate that the city fell before 1400 B.C. (*Joshua-Judges* [1931], p. 146) and showed that diplomatic contact with Egypt ceased under Amenhotep III. According to Garstang the Exodus occurred in the time of Amenhotep II (*ca.* 1436-1422 B.C.). The mention of marauding Ḫabiru in the Amarna Tablets was equated by some other scholars with the conquests of the Hebrews under Joshua, and the disturbances reflected in the letters were regarded as a native Canaanite version of the Israelite conquest of Palestine.

A thirteenth-century-B.C. date was based in part on Ex. 1:11, which implies that the Hebrews were enslaved when Pithom and Rameses were being enlarged, thus making Seti I or Ramses II the pharaoh of the Israelite oppression. A stele recovered from Tanis and dated *ca.* 1320 B.C. states that the city had been founded four hundred years earlier. Since most scholars identify Pi-ramses with a site at or near ancient Tanis, the Hyksos capital, it is not difficult to associate the Exodus with the Avaris era on the basis of such references as Ex. 12:40 and Nu. 13:22. More recent archeological work at Jericho by K. Kenyon has compelled a modification of Garstang's conclusions by showing, among other things, that his "City D" went back to about 2300 B.C., and that the walls that he discovered had no relevance for Joshua's campaign (*see* JERICHO II). Unfortunately, the site (Tell es-Sulṭân) has been so denuded by a variety of agents that it is virtually impossible for archeologists to say anything accurate about Jericho during the 15th to 13th cents. B.C. A more critical study of the Amarna correspondence (see above) has shown that the Canaanite princes loyal to Egypt were appealing for help against the mercenary troops (Ḫabiru) employed by neighboring city-states as a means of self-aggrandizement. Since as few as fifty, and in one case ten, Egyptian soldiers were requested to strengthen Canaanite defensive forces, the repulsing of a concerted attack by large and determined forces of Hebrew invaders can scarcely have been envisaged. Furthermore, while the reference in 1 K. 6:1 when taken at face value would indicate a fifteenth-century-B.C. date, it may not be a factual number so much as a symbolic one, indicating a cycle of twelve generations consisting of forty years each and related consciously to the activities of the Hebrew tribes.

While these and other difficulties indicate the complexity of the problems associated with the date of the Exodus, it is quite possible that future discoveries in Egypt or Canaan will go far towards resolving one of the major issues in OT chronology.

B. The Covenant at Sinai The mighty acts of God

demonstrated in the phenomena of the Exodus and the deliverance of the Israelites from captivity in Egypt formed a preliminary to the establishment of a spiritual covenant between God and the Hebrews (*see* COVENANT). This relationship elevated the Hebrew tribes to the status of an elect people, bound to the God with whom they had entered into a solemn agreement not merely by religious ties but by specific legal obligations. The idea of a pact or treaty binding contracting parties to agreed terms was familiar to the Hebrews (cf. Gen. 21:27; 26:28; 31:34; 1 S. 18:3; etc.), but the Sinai covenant was unusual in that it constituted a proposal initiated by a Divine Ruler who, in revealing Himself to a particular people, demanded their obedience to the terms that He was proposing and their continuing loyalty as His servants. This type of association has been greatly illumined by a study of second-millennium-B.C. suzerainty treaties as recovered principally from Boghazköy. So close are these secular treaties to the OT traditions of the Sinaitic covenant in their general form and more specific items of content that the parallels cannot possibly be accidental in nature. The Hittite suzerainty covenants were established between a great king and an inferior power on which he wished to impose a political alliance. A brief analysis of the overall form, accompanied by the appropriate Exodus references to indicate the characteristic internal elements common to both, will illustrate the similarities.

Suzerainty treaties of the 2nd millennium B.C. commenced with a title or preamble in which the instigator of the covenant was identified (cf. Ex. 20:1). This was followed by a historical prologue recapitulating any previous relations between the contracting parties in order to secure the vassal's acceptance and submission for the future (cf. 20:2). Then came the stipulations imposed by the overlord, of both a general (20:3-17, 22-26) and detailed (chs. 21–23; 25–31) nature. Hittite treaties required the deposit of a copy of the covenant in the chief shrine of the vassal (cf. 25:16) in order to guarantee its preservation. Lists of gods were regularly invoked in the secular international treaties as witnesses to the covenant, but because pagan deities were obviously precluded by the nature of the Sinai covenant, memorial stones could serve equally well (cf. 24:4). Blessings and curses invoked upon the vassal in the text of the secular covenants, to become operative according to whether the treaty was kept or broken, do not actually occur in Exodus, but are represented clearly in Dt. 28:1-14 (blessings) and 28:15-68 (curses). The book of Deuteronomy is itself, of course, a covenant-renewal document (*see* DEUTERONOMY). The solemn ratification and oath-taking ceremony prominent in Hittite treaties is paralleled by Ex. 24:1-11.

This type of covenant formulation differed from Hittite treaties of the 1st millennium B.C. in that in the latter the historical prologue was consistently omitted and the curses were not balanced by corresponding blessings. These and other factors indicate clearly that the form of the Sinaitic covenant corresponds to that of international treaties of the late 2nd millennium B.C., as Mendenhall (*BA*, 17 [1954], 56, 61) and others have shown, indicating that it could have originated in the 15th or 13th cent. B.C. (cf. K. A. Kitchen, *Ancient Orient and OT* [1966], pp. 90ff.).

The Sinai covenant furnished a nucleus about which Israelite historical tradition could develop, and for this reason it was of fundamental importance for all future national growth. It also provided the means of transmitting legal terminology into theological language, thereby providing the Israelites with an assured metaphysic of history. In conformity with secular treaties, which contained a clause regulating modes of procedure against rebellious vassals, the so-called controversy pattern of the Sinai covenant enabled God, through His spokesmen the prophets, to arraign His people in subsequent generations for breaking the provisions of the agreement. The entire relationship between God and Israel was based upon a free demonstration of divine grace that had ransomed captive Israel from bondage and promised protection, prosperity, and guidance for the future. As was fitting, the agreement was established upon a proper legal basis, the significance of which would be immediately apparent to all informed people in the 13th cent. B.C. Its acceptance by the Hebrews made them unique in antiquity for their endeavors to interpret all national life in terms of a solemn covenantal agreement with a single, living deity.

Brief mention should be made of the probable content of the Book of the Covenant read at Sinai by Moses when the divine agreement with Israel was ratified. Its description as a "book" (*sēper*) denotes its existence in written form, since that term was never used to describe oral tradition. Most likely it at first comprised only the Decalogue (Ex. 20:2-17), though in scholarly circles it has long been the practice to refer to Ex. 20:22–23:33 as the "Book of the Covenant." It is the oldest extant codification of Hebrew law, containing elements of civil and criminal legislation, humanitarian prescriptions, and ritual regulations. Its nature is such that it could easily have been modified or amended during the period immediately after the death of Moses as circumstances warranted, without doing the slightest violence to the concept of Mosaic authorship. Thus Ex. 22:18f., 31; 23:1 may be later scribal insertions that could conceivably date from the early judges period. The legislation included "precedents," which appeared as case-law, and "statutes," which assumed the form of prohibitions. As noted above, the case-law or casuistic form is the dominant one known from ancient Near Eastern law codes. In the Book of the Covenant it is expressed initially as a conditional clause that then states the case and concludes with the prescribed penalty. The "statutes," sometimes described by scholars as "categorical" or "apodictic" in nature, consist of specific prohibitions, which, however, do not carry any stated form of implementation. A related variety also occurring in the Book of the Covenant commences with an active participial form and concludes with the emphatic prescription "(he) shall surely be put to death."

Earlier critical scholars had imagined that the agricultural and community legislation in Exodus presupposed a date of origin not earlier than the time of Samuel. It is too often forgotten, however, that the Israelites at Sinai were already the inheritors of four centuries of agricultural and pastoral experience in a highly fertile area of the Nile delta and that they had never been a nomadic people in the sense of the modern bedouin Arabs. Such a situation would make a date of the 15th to 13 cent. B.C. for the Book of the Covenant eminently suitable, whereas a considerably later date would involve making conjectures or retrojections that would be out of harmony with the wilderness milieu of the book. In short, there was absolutely no need for the Hebrews to have been settled in Canaan for some centuries before such laws and regulations could have been promulgated.

The principle on which the laws in the Book of the Covenant were arranged is not clear. As noted earlier, the case-laws have points of contact with other Near Eastern bodies of jurisprudence, while at the same time pointing to a consistently less sophisticated life-style. Some scholars have suggested that the Covenant Code can be divided into ten sections, each of which has to do with the concerns of one of the commandments to

comprise a "running midrash" to the Decalogue (cf. E. Robertson, *The OT Problem* [1950], p. 95), but this is at best uncertain.

C. The Wilderness Tabernacle. Chs. 25–31 deal with the regulations for constructing and equipping a portable shrine that would serve as the focus of congregational worship and the place where divine guidance could be received. The literary sources describing this structure were held by Wellhausen to have been nothing more than an idealization of the Solomonic temple and as such were historical fiction. The materials were regarded as the product of a postexilic priestly writer and thus did not emerge from the Mosaic age in any significant respect. Archeological discoveries have done much to modify this extreme view, however, by showing among other things the antiquity of portable tent-shrines in the Near East. Early prefabricated structures from Egypt include the magnificent portable bed canopy of Queen Hetepheres I (*ca.* 2600 B.C.), whose beams and rods were so fashioned as to enable rapid assembly and dismantling, as with the Hebrew tabernacle. The prevalence of such canopies in Egypt between 2850 and 2200 B.C. is indicated by the number of sculptures from the 4th to 6th Dynasties that displayed them, as well as by the recovery of fragments of canopy poles from a royal tomb of the 1st Dynasty at Saqqara (cf. K. A. Kitchen, *Tyndale House Bulletin*, 5-6 [1960], 8ff.). The cultic use of a tabernacle was familiar to the people of Ugarit, as indicated in one of the cuneiform texts (*Legend of Krt*, 159), which in an age of roofed houses spoke of the king as performing certain rituals in a tent, while the fragmentary Phoenician histories of Sanchuniathon (*ca.* 7th cent. B.C.) made reference to a portable shrine drawn by oxen. The concept of the tabernacle as a palladium was by no means restricted to the Hebrews, since the Egyptians regularly took on their military campaigns a sacred shrine that was stationed in the middle of the camp and was used for consultations with the deity. A bas-relief from the time of Ramses II, *ca.* 1285 B.C., depicts a scene in which the tent of the divine king is stationed in the middle of the Egyptian military encampment. Another interesting structure of an even older nature was the third-millennium B.C. Egyptian "Tent of Purification," where the corpses of deceased royalty and high government officials were deposited before and after embalming. Old Kingdom representations of these portable structures show that they were made from a framework of vertical pillars linked with horizontal bars and surrounded with hangings of cloth.

Although liberals have objected that the Hebrews of that age did not possess the skills necessary for constructing a tent of the kind described in Exodus, numerous Egyptian tomb scenes consistently depicted the Hebrews as skilled workers in precious metals (cf. D. J. Wiseman, *Illustrations from Biblical Archaeology* [1958], p. 34 fig. 29).

In view of this and other evidence it is entirely unwarranted to deny either the antiquity or the historicity of the Hebrew tabernacle or to assume that the tabernacle represented an end product of postexilic priestly cultic speculation. Instead, the wilderness tabernacle must now take its legitimate place as a genuine Hebrew cultic phenomenon of the 2nd millennium B.C., fulfilling the purposes and objectives described in connection with it by the narratives of Exodus.

    3. Archeology

I. Introduction.—The date of the Exodus is one of the most debated topics in OT studies because of the ambiguous nature of the evidence. Although the biblical texts seem to require a date in the middle of the 15th cent. B.C., archeological evidence seems to point to a date in the 13th cent. B.C. (*see* CHRONOLOGY OF THE OT III.B; ISRAEL, HISTORY OF THE PEOPLE OF III). Merneptah's "Israel" stele (*ca.* 1220 B.C.) fixes a date before which the Exodus occurred, since it mentions Israel, as a people, among names that otherwise refer to places (cf. K. Kitchen, pp. 59f.; *see* picture in ISRAEL). Thus Israel was established in Canaan by at least 1220 B.C.

II. Egyptian Evidence for Thirteenth-Century Date.—*A. City of Raamses.* Exodus 1:11 indicates that the Israelites built Raamses (usually spelled "Rameses") for the pharaoh of the oppression. The stele of Merneptah indicates that Israel already was settled in Palestine early in his reign. Only two pharaohs preceding Merneptah bore the name of Ramses, and Ramses I was not very significant since he reigned less than two years. Ramses II, however, ruled Egypt from 1290 to 1224; he was a great builder whose

Granite statue of Ramses II (1301-1234 B.C.) wearing the double crown of Upper and Lower Egypt and holding the flail and scepter (Trustees of the British Museum)

monuments are known throughout Egypt. Papyrus Anastasi III describes his royal residence city of Pi-ramses, located in the delta. If the reference to this city in Ex. 1:11 is related to this information from Egypt in a straightforward manner, Ramses II should be connected in one way or another with the events of the oppression and the Exodus. Thus the archeology of this site might offer some assistance in deriving the date of the Exodus if the site has been located correctly and excavated.

1. Tanis. A sizable number of monuments from the Hyksos kings and Ramses II has been recovered at Tanis (P. Montet, *Les Nouvelles fouilles des Tanis* [1934]; *Le Drame d'Avaris* [1940]). It is generally agreed on the basis of Egyptian evidence that Pi-ramses occupied the site of the earlier Hyksos capital of Avaris, so Hyksos monuments are to be expected there (P. Montet, *RB*, 39 [1930], 1-28). The presence of such objects at Tanis does not confirm its identification with Pi-ramses, however, because not one of them was found in its original location; rather, they were taken from their original locations and brought to this site to be used as building materials. There is no archeological evidence *in situ* for the occupation of Tanis in the second half of the 2nd millennium B.C. before the time of the 21st Dynasty, *ca.* 1100 B.C. Inscriptions date the foundation of the inner wall of Tanis to the 21st Dynasty and its outer wall to the 22nd Dynasty. No palace has been found there yet and its excavator Montet admits that no evidence is available with which to date the temples of Tanis as early as Ramesside times.

Egyptian textual evidence concerning Pi-ramses indicates that it was situated on the waters of Ra, which have been identified with the Pelusiac or easternmost branch of the Nile. Tanis, however, was located on the Tanitic branch, the next branch W of the Pelusiac. Pi-ramses was also located "at the forefront of every foreign land." Tanis was an important port but it was poorly situated to serve as a place from which to leave for Asia by land. Papyrus Anastasi III praises the fertility of the fields around Pi-ramses, but the land around Tanis is low and often flooded from the sea, so that it consists primarily of infertile salt flats.

Thus the literary evidence relating to Pi-ramses does not accord well with Tanis, and there is no architectural and stratigraphic evidence for its existence prior to the 21st Dynasty. If the biblical Rameses was located at Tanis, then according to this archeological evidence the Exodus could not have taken place before the 21st Dynasty, more than a century after Merneptah's reference to Israel in Palestine.

There is also some biblical evidence that the Raamses of Ex. 1:11 was not located at Tanis. When the Israelites left Egypt they started out from "Rameses" (Ex. 12:37). No bridges crossed the branches of the Nile in the delta in ancient times. Therefore, if the Israelites traveled E from a Rameses located on the Tanitic branch, they still would have had to cross the Pelusiac branch. This would have posed a considerable problem for a sizable group of people accompanied by herds and flocks. Thus Tanis must be rejected as the site of the Egyptian Pi-ramses. The last reason for this rejection requires a site located on the east bank of the easternmost branch of the Nile. That leads to a consideration of Qanṭîr.

2. Qanṭîr. Since 1930 various studies have suggested that Qanṭîr was Pi-ramses (e.g., M. Hamza, *Annales du service des antiquités de l'Égypte*, 30 [1930], 31-68). Recent examinations of the literary evidence relating to Pi-ramses have concluded that it should be located in the vicinity of Qanṭîr (cf. J. Van Seters, E. Uphill [*JNES*, 27], and M. Bietak). The fertility of the fields around Qanṭîr, its location on both the land and sea routes to Asia, the existence of a palace of Ramses II there, and the geographical divisions of the city and its surrounding regions all correspond to the literary references to Pi-ramses.

Just S of Qanṭîr is Tell el-Dab'a. The occupation of this site under the 12th and 13th Dynasties was brought to an end with a violent destruction. Three Hyksos strata or building phases follow this destruction and the city enlarged progressively through these three periods. The third and last Hyksos stratum was brought to an end with a violent destruction which has been connected with the conquest of Lower Egypt by the early 18th Dynasty. The 18th Dynasty appears to have left this site unoccupied (Bietak, p. 25), but it was rebuilt under the 19th Dynasty.

These archeological findings lend support to the reasons advanced above for identifying Qanṭîr and its immediate vicinity with the Hyksos capital of Avaris and with Pi-

ramses, the delta residence of Ramses II. Since the 19th Dynasty is represented here and the 18th Dynasty is not, these findings seem to support a 19th-Dynasty (thirteenth-century) date for the Exodus.

B. Political History of the 19th Dynasty. 1. Ramses II's Wine-Jar Sealings. To support his date of *ca.* 1290 for the Exodus, W. F. Albright called attention to the sharp reduction in wine-jar sealings from this time found in the Ramesseum at Thebes (*Yahweh*, p. 156). Since earlier Egyptian tomb reliefs depict 'Apiru (Egyp. *'pr.*) or HABIRU working in the vineyards of the northeastern delta, and since these Ḫabiru have been connected in part with the biblical Hebrews, the departure of the large number of Hebrews could have left these vineyards largely untended and caused a sharp drop in the production of wine. Albright connected this departure with a revolt by Egypt's Asiatic dependencies which called for Ramses' campaign of Year 8.

2. Ramses II's Transjordanian Campaign. The only text of historical significance from the second decade of Ramses' reign is the stele from Beth-shean in Palestine that is dated to his 18th year (Schmidt, p. 36; *see* picture in INSCRIPTIONS). An inscription from the Karnak temple (cf. K. Kitchen, *JEA*, 50 [1964], 47-70) indicates that Ramses II campaigned in Moab. His previously known inscriptions indicate that he also campaigned in Edom, which he referred to as Seir in the land of the Shasu bedouin (cf. R. Giveon, *Les Bédouins Shosou des documents égyptiens* [1971]). Geographically his campaigns in Moab and Edom probably should be linked together as parts of the same campaign. This Transjordanian campaign is best dated to Year 18 because his targets on the preceding four campaigns from Year 4 through Year 10 were located in Lebanon and Syria. Ramses probably crossed the Sinai peninsula on the central route through Kadesh-barnea. If the Exodus occurred shortly before this time, that would have put Ramses II in the very territory where the Israelites were wandering before they went around Transjordan. Given this course for this campaign, one could regard part of this mission as a search for the escaped Israelite slaves.

3. Ramses II's Hittite Treaty. Support for dating the Exodus *ca.* 1290 might be drawn from an unusual feature of the covenant between Ramses II and the Hittite king Ḫattusilis III. This treaty was inscribed on the walls of both the Karnak temple and the Ramesseum. A Hittite copy of it is known, also (*ANET*, pp. 199-203). Of the four main stipulations in this treaty, the first, second, and fourth apply similarly to the Egyptian and Hittite kings.

The third stipulation incumbent upon Ramses II was that, in the event of an irregularity in the succession to the Hittite throne, he was to support — evidently by force of arms if necessary — the successor designated by Ḫattusilis. Ḫattusilis became king by deposing his nephew Mursilis III (Urkhi-Teshub) and installing himself upon the throne. He obviously wanted to insure that his designated successor would not have similar problems and enlisted the aid of Ramses toward that end. The third stipulation incumbent upon the Hittite king was that, in the event that Ramses' "own subjects" committed "another crime against him," the Hittite king would come to his aid in suppressing such a disorder.

This third stipulation is extraordinary and can be attributed to the exceptional conditions of that time. In the case of the Hittite king that condition was his own irregular accession to the throne. In the case of the Egyptian king that condition appears to have involved a recent "crime" committed by his subjects against him. The evident distinction between the foreign territories of the pharaoh in the second stipulation and "his own subjects" in Egypt in the third stipulation appears to be quite intentional. The use of the word "another" modifying the word for crime in the third stipulation also appears to be intentional (cf. J. Schmidt, p. 133).

This treaty dates to the twenty-first year of Ramses II. Ramses was preoccupied with Asia during the first decade of his reign, campaigning there in his fourth, fifth, eighth, and tenth years according to his dated inscriptions. Given the tendentious nature of royal inscriptions of ancient Egypt, no direct reference to the Exodus is to be expected from them. If the Exodus took place at this time, its setting can be sought only through veiled Egyptian references to events that correspond satisfactorily with those events described in the Bible. Unfortunately for such a search, the second decade of Ramses' reign is largely unknown (cf. Schmidt, p. 170).

In spite of this paucity of sources, the situation presupposed by the third stipulation of Ramses' treaty with the Hittites could be viewed as providing just such a veiled reference to these biblical events. The departure of the Israelite slaves could have been viewed by the pharaoh as a crime. The severity of the "crime" perpetrated by Ramses' subjects shortly before the treaty of Year 21 was of such a magnitude that he was willing to appeal to a foreign potentate for assistance to prevent a recurrence. The biblical description of the events surrounding the Exodus appears to reach this level of importance from the Egyptian point of view. At least it comes at the right time to accord with Albright's date for the Exodus.

4. Form of the Mosaic Covenant. A sociological point in the context of the Exodus can be made from the present knowledge of the Hittite treaty form used in Egypt at that time. This particular treaty refers to two previous Egyptian-Hittite treaties, the earlier of the two dating to the middle of the preceding century. These are parity treaties, in which the two great kings treated each other essentially as equals. The other type of covenant known from the Hittites is the suzerainty type, used by Hittite kings to make vassal treaties with the kings of smaller states. G. E. Mendenhall noted that there are a number of significant resemblances between the Mosaic covenant of the Bible and the suzerainty covenants of the Hittites (*BA*, 17 [1954], 24-46; 50-76; *see* COVENANT [OT]). These resemblances could be most easily explained if Moses was in Egypt during the 13th century.

C. Objections.–1. City of Raamses. The Bible does not employ the name of Ramses with the same chronological specificity with which it is employed in Egyptian texts. This is evident from Gen. 47:11, which refers to the "land of Rameses" as that part of Egypt in which Jacob and his descendants settled. Since no one dates the arrival of the biblical patriarchs in Egypt in the time of Ramses II of the 19th Dynasty, the use of the name Ramses here must represent the modernization or updating of an older name for that region. If the name of Rameses was used in this way in Gen. 47:11, it could have been used similarly in Ex. 1:11. Thus the mere presence of the name of Ramses in Ex. 1:11 cannot be the final arbiter of the date of the Exodus.

2. Political History of the 19th Dynasty. The political conditions cited above as a possible historical context for the Exodus early in the 13th cent. are not sufficiently specific to confirm that date for it. They only provide a potential historical situation for it.

a. Ramses II's Wine-Jar Sealings. The reduction in wine-jar sealings at Thebes may have occurred because the wine was shipped elsewhere. These sealings continued at a low rate there for the next four decades, and it seems

improbable that the wine industry of Egypt did not recover for more than four decades after the Israelite workers in the vineyards were supposed to have departed.

b. Ramses II's Transjordanian Campaign. Ramses may have conducted his campaign through Transjordan and Sinai in order to pacify his eastern flank prior to concluding his treaty with the Hittites, not to pursue any escaped Israelite slaves.

c. Ramses II's Hittite Treaty. Ramses' allusion in the Hittite treaty to a crime by his subjects could just as well have referred to a conspiracy or revolt by native Egyptians as to an Exodus of Israelites.

d. Form of the Mosaic Covenant. Moses' knowledge of Hittite treaties is a general feature that could be applied to earlier times as well.

3. Historical Evidence. Beyond the nonspecific nature of the preceding suggestions, some problems with dating the Exodus in the 13th cent. arise when the history of this period is examined from the biblical point of view. These problems have to do with the pharaohs involved: the pharaoh of the oppression, who died while Moses was in exile (Ex. 2:23), and the pharaoh who died during the Exodus (Ex. 14:23-28; cf. Ex. 15:19; Ps. 136:15; and F. M. Cross and D. N. Freedman, *Studies in Ancient Yahwistic Poetry* [1975], p. 50, on Ex. 15:4).

The question here is how well the pharaohs of the 19th Dynasty fulfil these qualifications. Two sets of rulers are involved. Either Ramses II was the pharaoh of the oppression and Merneptah was the pharaoh of the Exodus (the older view), or Seti I was the pharaoh of the oppression and Ramses II was the pharaoh of the Exodus (the more recent view).

a. Ramses II and Merneptah. Ramses II corresponds to the pharaoh of the oppression well, employing state slaves on his many building projects, but Merneptah does not correspond to the pharaoh of the Exodus very well. If Merneptah was the pharaoh of the Exodus, the Exodus must have occurred early in his reign, because the Israelites already were in Palestine by the time his stele mentioning Israel was inscribed. But that does not allow sufficient time for Israel to wander in the wilderness, and in any case Merneptah did not die at the time of the Exodus.

b. Seti I and Ramses II. These difficulties with Merneptah lead to consideration of Seti I and Ramses II as the pharaohs of the oppression and the Exodus. Seti I reigned only eleven years, so he would not fit very well as pharaoh of the oppression if one takes seriously the biblical indications that Moses stayed in the wilderness a long time (Ex. 4:19; 7:7). Ramses II would not fit very well as pharaoh of the Exodus either, according to this scheme, for he did not die until *ca.* 1224, long after the latest possible date for the Exodus.

Thus there is no satisfactory way to harmonize the rulers of the 19th Dynasty with all that is stated or implied in the Bible about the pharaohs of the oppression and the Exodus. If the Exodus is to be dated at this time, then a pharaoh did not die while Moses was in the wilderness (Ex. 2:23), or a pharaoh did not die with his army at the time of the Exodus (Ex. 14–15; Ps. 136:15), or Moses did not spend a long time in exile (Ex. 4:19; 7:7), or the Israelites did not wander very long in the wilderness (Numbers–Deuteronomy), etc. The lack of satisfactory historical correlations with these elements in the biblical record casts some doubt upon dating the Exodus during the 19th Dynasty.

III. Fifteenth-Century Date.–*A. Biblical Evidence.* The main text is in 1 K. 6:1, which states that Solomon began to build the temple in the fourth year of his reign, 480 years after the Exodus. (Note that the month is also given; such specificity may give some weight to the literal understanding of these 480 years.) Since the dates for Solomon's reign are generally agreed to be *ca.* 971-931 (perhaps beginning earlier if a coregency with David is allowed), the Exodus would be dated *ca.* 1450 (*see* CHRONOLOGY OF THE OT IV.B).

One other text may be correlated roughly with this date. In Jgs. 11:26 Jephthah (*ca.* 1100) states that the Israelites had lived in Transjordan for three hundred years. Thus the Conquest would be dated *ca.* 1400, and the Exodus *ca.* 1440. Other texts (e.g., Gen. 15:13, 16; Ex. 12:40) that might appear relevant have other problems that lessen their value (*see* CHRONOLOGY OF THE OT III).

B. Egyptian Evidence. The pharaohs of this period must be dated as accurately as possible before the attempt is made to associate biblical events with them, because if they have been misdated then the correlations suggested by the biblical date for the Exodus will be incorrect. The chronology of the 18th Dynasty has been established by using three types of data: Sothic cycle dates, new moon dates, and the highest-numbered regnal years attested for each of the kings who ruled during this period (*see* EGYPT). Using these data the following correlations may be suggested.

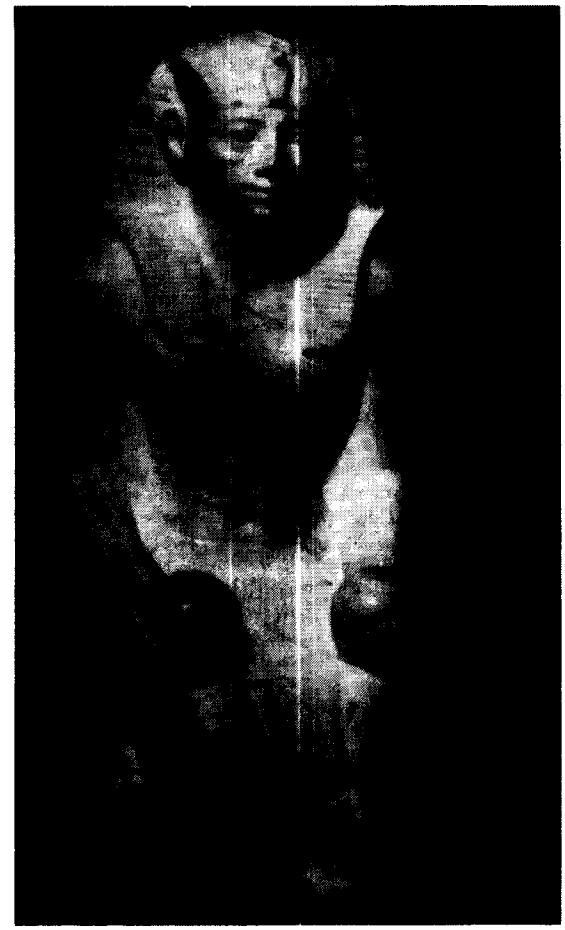
1. Thutmose I. When Moses was born a decree was in effect which ordered that all male babies born to the Hebrews were to be killed (Ex. 1:22). Aaron does not appear to have been threatened by this decree, and he was only three years older than Moses (Ex. 7:7); hence this decree may have been proclaimed only a short time before Moses was born. Moses was eighty years old when he went to negotiate with pharaoh (Ex. 7:7). Adding these eighty years to the date of 1450 for the Exodus dates the birth of Moses in 1530. The Sothic cycle datum and the total number of regnal years known for Amenhotep I date his reign from 1553 to 1532. This would put Moses' birth, when the death decree was in effect, early in the reign of Thutmose I, and the birth of Aaron three years earlier, when the death decree was not in effect at the end of the reign of Amenhotep I. These considerations suggest identifying Thutmose I as the pharaoh who proclaimed the death decree.

In some respects the character of Thutmose I would fit that part very well. Prior to his time the 18th Dynasty had been mainly on a defensive footing after defeating the Hyksos. It was Thutmose I who set this dynasty on the road to an empire; he staked out the territory of that empire by campaigning all the way to the Euphrates and to the Fifth Cataract of the Nile. Some of his barbarity can be seen in his act of hanging the head of his executed Nubian enemy, as Amenhotep II did later, from the prow of his royal barge. He moved his court to Memphis, where the palace he built was still used by royalty 150 years later (Redford, *History*, p. 79), and it was here in the north that the daughter of the pharaoh who issued the death decree came in contact with the baby Moses (Ex. 2:1-10). All factors considered, therefore, Thutmose I fits reasonably well as the pharaoh of the death decree.

2. Hatshepsut. It is possible that she was the pharaoh's daughter who rescued the baby Moses (Ex. 2:1-10). If Moses was born *ca.* 1530, the pharaoh who decreed the death of all Hebrew male babies would have been Thutmose I, Hatshepsut's father. Moses would have grown up during the reigns of Thutmose I and Thutmose II (Hatshepsut's husband), and with Hatshepsut's sponsorship he could have attained the prominence that later tradition attributed to him (cf. Acts 7:22; Josephus *Ant.* ii.10). If Moses fled Egypt when he was forty (Acts 7:23), then it was late in the reign of Hatshepsut (1504-1482), and her

EXODUS, DATE OF THE

Statue of Hatshepsut (*ca.* 1504-1482 B.C.) with the *nemes* (striped wig cover) and *shendyet* (kilt) of the king (Metropolitan Museum of Art; picture W. S. LaSor)



Statue of Thutmose III (1504-1450 B.C.) (Service des musées, Cairo; picture W. S. LaSor)

coregent Thutmose III (1504-1450) may have begun to assert himself (note that *ca.* 1488 is the last reference to Senmut, Hatshepsut's prime minister; Thutmose may have disposed of him in order to gain full control of the throne).

According to this scheme, Hatshepsut also would have been the pharaoh who died while Moses was in exile (Ex. 2:23; the masculine reference here may be explained by Hatshepsut's adoption of all royal titles and prerogatives, including the masculine ones). During the reign she undertook building projects that would have required the kind of labor the Israelites could supply.

3. Thutmose III. Several characteristics of the pharaoh of the Exodus could be pointed out from the biblical references to him, but the most significant information about him is that he died in the Reed Sea at the time of the Exodus. No reference in Egyptian sources to his death need be expected; not only would such a reference be contrary to the propagandistic nature of the royal inscriptions of Egypt but it would also be contrary to the Egyptian theology of kingship. Pharaoh was a god, Horus incarnate. Gods, of course, do not die in the human sense of the term. In spite of this qualification, a few random dates of pharaohs' deaths have survived.

The date of Thutmose III's death has come down to us through the biography of Amenemhab, who served in the Egyptian navy under several pharaohs. That date is given as "the last day of the 3rd month of the 2nd season" (Breasted, III; 234).

The Egyptian calendar was divided into three seasons of four months each, so the third month of the second season was the seventh month of the year. These months had thirty days, so the date referred to here is VII/30. The Elephantine temple inscription from 1468 B.C. dated the mid-July rising of Sothis at the end of the eleventh Egyptian month. The rising of Sothis had moved only four days by 1450 when Thutmose III died at the end of the seventh month, four months before Sothis rose in mid-July. Thus the death of Thutmose was in mid-March, March 17 to be exact when more detailed calculations are carried out (Breasted, III, 234).

The pharaoh of the Exodus died shortly after Passover, according to Ex. 12–14. Passover — the celebration of which began with the Exodus — was celebrated in the middle of the first month of the Israelite lunar calendar, later called Nisan, which corresponds to March-April in the Julian calendar. Although one would thus expect the pharaoh's death to be in early April, the slightly later spring harvest in Palestine, coupled with the later omission of an intercalary month (which would have been added *ad hoc* at this early period), could account for this difference. Thus not only did Thutmose III die in the year

of the Exodus according to the chronologies worked out above, but he also died at the right time of that year.

A mummy labeled with his name in the Cairo Museum warrants closer inspection. Occasionally it has been objected that neither Ramses II, Merneptah, Thutmose III, nor Amenhotep II could have been the pharaoh of the Exodus because their mummies have all been found, whereas the pharaoh of the Exodus drowned and his body should have been lost in the Reed Sea. His body could have washed ashore (Ex. 14:30), however, and been recovered by a search party that set out when it became evident that he and his troops were overdue. But further evidence needs to be considered. These mummies have been x-rayed recently to determine their ages at death, and the one labeled Thutmose III has been estimated to have been between forty and forty-five when he died (cf. R. Harris and K. Weeks, *X-raying the Pharaohs* [1978], p. 138). Since Thutmose III reigned fifty-four years, he presumably should have been at least sixty when he died. Thus it may be that another body was substituted for Thutmose III when his was not recovered from the Reed Sea.

It is important to note that the Israelites' oppression became worse at this time (Ex. 2:23). A fitting circumstance to explain this development is present in the history of the 18th Dynasty. Thutmose III was one of the great military pharaohs. He established Egypt's Asiatic empire by a series of some sixteen campaigns into Syro-Palestine, conducted almost annually from his twenty-third year, the year after Hatshepsut died, to his forty-second year.

From these conquests the booty and tribute, described in long lists of Thutmose III, flowed into Egypt's treasuries. It was also necessary to establish a base N of Memphis as a point of departure for these campaigns. The location of the later Rameses would have been a logical site for such a base. The cities of Pithom and Rameses that the Israelites built are described as "store-cities" (Heb. *ʿārê miśkᵉnôṯ*). Elsewhere in the OT (1 K. 9:19; 2 Ch. 8:4, 6; 16:4; 17:12) this phrase refers to military bases with armories and supply depots, which were usually on the periphery or borders of the Hebrew kingdoms. This phrase should have a similar meaning in Ex. 1:11, and the Asiatic campaigns of Thutmose III provide an excellent explanation why construction on these delta projects would have become more pressing, since they served both as bases from which his troops and their supplies were sent into Asia, and as temporary sites for the storage of the booty and tribute brought back from those campaigns.

4. Amenhotep II. The coregency of Thutmose III and Amenhotep II should be taken into account here. Three main lines of evidence point to the existence of this coregency (Redford, *JEA*, pp. 108-122). General evidence for it comes from monuments on which their names appear together. Specific evidence for it comes first from Amenhotep II's accession date of IV/1, which should have been VIII/1, after the death of his father on VII/30, if a coregency was not involved here. The second specific line of evidence in support of this coregency comes from Amenhotep II's Syrian campaign of his third year (Amada and Elephantine stelae) and his seventh year (Memphis stele), both of which are called his "first victorious campaign." This was a specific and technical identification in Egyptian political terminology, not a general one, and thus two "first" campaigns present a problem. The best solution to this problem is to suppose that when Amenhotep II campaigned in his third year he still was coregent with his father, but when he campaigned in his seventh year he was sole ruler after his father's death, and that fact was indicated by the reuse of this term (Redford, *JEA*, p. 121).

The new-moon date of Amenhotep II, published recently, and the new-moon dates of Thutmose III together indicate that their reigns overlapped by three years regardless of which set of absolute Julian dates is selected for them (R. Parker, "Once"). This means the campaign of Amenhotep II was conducted during his third year, the last year of his coregency with his father Thutmose III, who died that same year. During his last dozen years Thutmose III did not campaign in Syro-Palestine. This absence led to a revolt among his vassals there and he dispatched Amenhotep II with the army to quell this revolt in the last year of his reign. When Amenhotep II returned to Egypt from that campaign, in the eleventh month according to the relevant stelae, he found that his father had died some three months earlier.

The existence of this coregency does not mean that Moses dealt with two pharaohs, because only one of them (Thutmose III) remained in Egypt, while the other (Amenhotep II) was away in Asia. This historical context provides a good reason why Thutmose III would have been resident in the delta where Moses consulted with the pharaoh, since it probably was from that area that he had sent his son on his first military expedition not long before this, and he may have remained there to await news of his son's success. The revolt in Syria could have strengthened Thutmose III's resolve not to let his Semitic slaves go to sacrifice in the wilderness (Ex. 5:2). From the Israelite point of view, however, this would have been an auspicious time to leave Egypt, since some of the troops were away. Of possibly greater importance could have been the effect this information had upon the route chosen for the Exodus. The coastal route had the risk not only of military engagements with the residents of southern Canaan (Ex. 13:17), but also of a possible encounter with the troops of Amenhotep II returning to Egypt.

Of importance in this connection was the reaction of Amenhotep II upon his return to Egypt. After giving the date of Thutmose III's death, the tomb biography of Amenemhab describes the coronation of Amenhotep II, and this description is remarkable in that it contains a reference to the execution by beheading of the foreign chiefs he brought back to Egypt with him as captives. As Breasted noted (III, 319), "Amenemhab doubtless refers to the sacrifice of the seven kings of Tikhsi." This region (Semitic Taḫši) was the target for the campaign of Amenhotep II's third year, and the execution of these captive princes in Egypt upon his return is also mentioned by the stelae which refer to that campaign.

Several reasons for this extraordinary course of action can be suggested when it is viewed from the standpoint of the events of the biblical Exodus. First, the rebellion raised by these princes took Amenhotep away from Egypt when he should have been there with his troops to defend his father, and this reflected upon his kingship. Second, the escaped Hebrew slaves who caused his father's death were Semites and the royal captives he executed were Semites, so he could have expressed his anger at the Semites as a group in this way. Third, the Hebrews had rebelled against pharaoh by escaping from Egypt. It was in the interests of Amenhotep to provide the strongest possible deterrent to prevent any other subjects, native or foreign, from attempting to follow their example. Executing these foreign princes and parading their heads up the Nile warned everyone else against such a course of action. From a biblical point of view, therefore, these actions of Amenhotep II fit very well with the actions of the enraged son of the pharaoh of the Exodus who returned to Egypt to find his father dead from circumstances caused by the Hebrews.

Two elements in the Egyptian texts mentioned above appear to be false, and this emphasizes the extraordinary nature of these events. Amenemhab introduced the description of Amenhotep II's coronation with the phrase, "when the morning brightened." This phrase has been understood by Egyptologists as indicating that Amenhotep II was crowned the day after his father died. But Amenhotep was away in Syria at the time; his coronation had taken place three years earlier when he was installed as coregent. At that time he "was established upon the throne of his father," and at that time he "assumed the royal titulary." Egyptian records do not describe any ceremony for a coregent coming to sole reign, because he already had been installed as king and assumed the royal titulary when he was enthroned as coregent. By identifying this occasion as Amenhotep's coronation, Amenemhab attempted to deny the coregency. The Amada and Elephantine stelae of Amenhotep indicate that the princes of Takhsi were executed at a public function, but it is unlikely that this function was Amenhotep's coronation as Amenemhab would have us believe.

The other example of falsification comes from the Memphis stele of Amenhotep II, in which he identified the campaign of his seventh year as his "first victorious campaign"; that designation, however, had already been applied to the campaign of his third year. This looks like a deliberate attempt to expunge the memory of the campaign of Year 3. Was some disgrace connected with it? For Amenhotep to have been out of the country when his father died under unusual circumstances could have brought some disgrace upon him. Thus Amenemhab's incorrect date for Amenhotep's pseudo-coronation and the contradictory system of numbering employed by Amenhotep for his own campaigns look like deliberate distortions in an attempt to cover up the truth of what really happened.

If Amenhotep held the Hebrews responsible for the death of his father, it would have been natural for him to seek revenge. It is interesting to note in this connection, therefore, that the first contemporary Egyptian reference to ʿApiru *outside* of Egypt comes from the Memphis stele's combined record of the campaigns of Amenhotep's seventh and ninth years, in which he claimed that he brought 3600 ʿApiru back to Egypt among the captives he took in Syro-Palestine (*ANET*, p. 247). This could have been a compensation for the escape of the Hebrews four years earlier. The loss of a sizable number of Hebrew slaves also depleted the ranks of the Egyptian work force. Amenhotep's claim to have brought a total of 90,000 captives back from these two campaigns could have been an attempt to replenish that depleted work force.

Finally, from the end of Amenhotep's reign comes a text that is so unusual that Egyptologists think he may have been drunk while dictating it. Basically, it expresses his hatred of Semites (cf. A. Gardiner, *Egypt*, p. 199). This inscription is dated fourteen years after the last of his Asiatic campaigns, that of Year 9, which shows that he still had the Semites on his mind, even when he was as far away from them as Nubia. The Hebrews are not mentioned by name in this inscription, but Takhsi, where Amenhotep campaigned in the proposed year of the Exodus, is. If Amenhotep held the Hebrews responsible for the death of his father at the Exodus, then he had good reason for the hatred of the Semites he expressed here. The reference to magicians is interesting, and although the Nubians may have been noted for their practice of the magic arts, the reference to that practice in this context might convey echoes of the contest in magic between Moses and the Egyptians which preceded the death of Thutmose III — if he is identified as the pharaoh of the Exodus. Taking all the factors discussed above into consideration, Amenhotep II fits very well as the pharaoh after the Exodus.

5. Thutmose Son of Amenhotep? Few texts are known from the end of the reign of Thutmose III; thus it is not surprising that no reference to the biblical plagues have been found in Egyptian sources. Even if more sources were available, it is unlikely they would mention such adverse events. Indirect evidence of the tenth plague, however, might be found among the members of the royal household. Amenhotep II was not the eldest son of Thutmose III, for he had an elder half brother named Amenemhet who died earlier in the reign of Thutmose (Redford, *JEA*, p. 108). Thus Thutmose III's firstborn son was not alive in 1450 when the tenth plague fell on Egypt. If the household of the pharaoh suffered the loss of a son in this plague, therefore, that son must be sought in the family of Amenhotep II.

In earlier presentations of the fifteenth-century Exodus, attention was called to the Dream Stele of Thutmose IV, which relates how he was told that he would become king even though he was not in line for the throne. This was taken as indirect evidence for Amenhotep II's firstborn son who was thought to have been lost in the tenth plague. This view must be revised now that the sons of Amenhotep II have been studied more carefully. The son of Amenhotep II who was in line for the throne before Thutmose IV was named Amenhotep. It has been estimated that he was born early in the reign of Amenhotep II, and he is known to have been the heir apparent until his father's twentieth year (Redford, *JEA*, p. 115). He apparently died around that time, which is the reason Thutmose IV came to the throne. But Amenhotep the son of Amenhotep II did not die until near the end of his father's reign; so he could not have been the son who was lost in the tenth plague at the beginning of his reign.

It has been noted, however, that it is somewhat unusual to have a king and eldest son by the same name. While this arrangement is not impossible, it seems more likely that the firstborn son of Amenhotep II would have been given a different name. Thutmose was the other royal nomen particularly favored by this dynasty. It has been proposed therefore, wholly apart from any consideration of the Exodus, that Amenhotep II had a son named Thutmose who was older than Amenhotep. Even though no inscriptional evidence for this son named Thutmose has been recovered, he has been suggested as the one who was originally first in line for the throne (cf. Redford, *JEA*, p. 114). If Amenhotep II did have such a son, he would have been born late in the reign of Thutmose III and would have died early in the reign of Amenhotep II, which would make him the best current candidate for the royal son who died in the tenth plague. This relationship could have given Thutmose III added cause to pursue the Hebrews.

6. ʿApiru. The first reference to ʿApiru in Egypt comes from a tomb painting which depicts them working in the vineyards of the eastern delta in Hatshepsut's time. On the basis of a 1450 Exodus date, this was around the time when the enslavement of the biblical Hebrews became especially oppressive. The dictum appears to apply here that the Hebrews were ʿApiru, but not all ʿApiru were Hebrews (*see* HABIRU). Thus these ʿApiru working in the Delta could have been Hebrews, but they could also have come from some other Semitic group.

The next contemporary Egyptian reference to ʿApiru comes from the Memphis Stele of Amenhotep II, which lists 3600 ʿApiru as captives he brought back to Egypt

from the Asiatic campaigns of his seventh and ninth years. These probably were not biblical Hebrews, because they still were wandering in the wilderness when Amenhotep conducted these campaigns. These ʿApiru could have been taken captive, however, to compensate for the damage to Egypt and to Amenhotep's pride that occurred as a result of the Hebrew Exodus.

In some instances in the Amarna Letters, "Ḫabiru" is used to refer in a derogatory way to rival Canaanite rulers (*see* AMARNA TABLETS). In other instances these letters refer to Ḫabiru who are more like those known in texts from elsewhere in the ancient Near East. In still other instances the activities attributed to some Ḫabiru are consistent with activities of the biblical Hebrews early in the period of the judges — which is when these texts should be dated in terms of biblical history, according to a fifteenth-century date for the Exodus.

The stele of Seti I from Beth-shean (*see* picture in INSCRIPTIONS) refers to military contacts with ʿApiru. Since these operations took place in a region where the northern Israelite tribes settled, it is possible that some of these ʿApiru were Hebrews. Some of the ʿApiru depicted as state slaves in Egypt during the 19th Dynasty could have come from this campaign, but they may have come from other Semitic groups captured at other times.

C. Objections. 1. Chronology. The main objection to a fifteenth-century date for the Exodus is that the figure of 480 years presented by 1 K. 6:1 may have been derived from an inaccurate estimate, such as calculating twelve generations of forty years each. Since the length of time from the birth of one generation to the next was closer to twenty years, it is argued that this period should be shortened considerably. (The presence of the stock numbers twelve and forty may be indicative of an approximation, but there is no other indication in the text that the 480 is not literal.) The reference in Jgs. 11:26 may be a gloss based on the preceding chapters in Judges, which include a total of approximately three hundred years for the reigns of the judges up to that point.

From the lines of evidence discussed above, however, it is evident that the Israelites who lived at the end of the 2nd millennium B.C. held chronological views dating the Exodus in the 15th cent., and that corresponds to the only date given for it in the Bible. While it is possible that these data could have been corrupted in transmission, the most reasonable approach to them is to examine in more detail the historical context in which they date the Exodus. This biblical date for the Exodus has a reciprocal relationship with the events described in Exodus as related to Egyptian history. A pragmatic approach to this date suggests a period in Egyptian history that should be examined for a possible relationship to the biblical Exodus, and considerable agreement of the evidence from Egyptian and biblical sources pointing to that period supports the accuracy of the chronological datum (480 years) from which that search started.

2. City of Rameses. The problem that Rameses poses for the 18th-Dynasty (fifteenth-century) Exodus is not so much that it was named for a 19th-Dynasty (thirteenth-century) pharaoh as that archeological evidence for an 18th-Dynasty (fifteenth-century) occupation of the area with which Rameses is best identified has not been found yet. This is especially the case now with the excavations at Tell el-Dabʿa, which have revealed a gap in occupation from the end of the Hyksos settlement there down to the time when it was rebuilt by the 19th Dynasty (thirteenth century).

The first point that should be taken into account here is the extent and nature of the area involved. Including its suburbs or sectors, the city of Pi-ramses took in an extensive area that now includes a number of tells. J. Van Seters estimated its size as 3 km. (2 mi.) from north to south and 1.5 km. (1 mi.) from east to west, and he located six sites of antiquities within that area. E. Uphill has estimated this area as more than 3 km. (2 mi.) on a side, and he has located six sites of antiquities within that area. M. Bietak, the excavator of Tell el-Dabʿa, estimates it covered 3 square km. (1.2 square mi.), and he has mapped almost a dozen sites of antiquities within that area.

The Egyptian texts that describe the city of Rameses refer to the palace area in its center and four sectors of the city surrounding it. They also refer to its port and granaries, and some area within this complex must have been occupied by the troops of pharaoh, including his chariots. If Ramses' palace has been correctly located at Qantir, the excavators of Tell el-Dabʿa have been digging in the southern sector of the city. Hyksos remains have been found at both Tell el-Dabʿa and Ezbet Rushdi N of it. Remains from the 12th Dynasty have been found at Tell el-Dabʿa, Ezbet Rushdi, and Khataʿna S of Tell el-Dabʿa.

Thus, the city of Rameses took in a large area, and the more thorough study of that area by means of excavation has only begun. It is possible, therefore, that evidence for an 18th-Dynasty (fifteenth-century) occupation in this area will be found during subsequent explorations. A fragmentary inscription with the name of Haremhab, the last pharaoh of the 18th Dynasty, has already been found at Tell el-Dabʿa. Since the 18th-Dynasty pharaohs who ruled through the 15th cent. (Thutmose III, Amenhotep II, and Thutmose IV) conducted well over twenty campaigns into Asia, one would expect that they had a base of operations somewhere in this vicinity.

An alternate proposal to solve this problem has been to interpret Ex. 1:11 as referring to Israelite work on the sites involved under the Hyksos or the Egyptian rulers of the Middle Kingdom (J. Bimson, p. 244). Since evidence for the occupation of this area during both of these periods exists, this proposal satisfies the requirements of the archeological findings in the area. The context of Ex. 1:11 appears to connect the construction work of the Israelites more closely with the Exodus than it does with their entrance into Egypt, however, so this suggestion seems less likely at the present time. Further archeological developments from the region of Rameses can be expected, and they may well include the discovery of evidence for an 18th-Dynasty (fifteenth-century) occupation there.

3. Archeology. The major objection to the fifteenth-century date for the Exodus has come from the results of excavations in Palestine. Ai, Arad, Bethel, Debir, Gibeon, Hazor, Hebron, Heshbon, Hormah, Jarmuth, Jericho, Lachish, and Megiddo are among the more important sites that have relevance for the date of the Conquest, and hence the Exodus. The prevailing opinion among archeologists has been that a number of these sites show evidence of destruction and resettlement in the 13th cent., presumably caused by the Israelite conquest, since the Bible mentions most of these towns in its account of the Conquest. As the excavations continue, however, new evidence comes to light that renders the earlier interpretations inconclusive. A brief summary of this evidence is given below; for a more detailed discussion, see the articles on the individual sites.

Several factors must be considered in evaluating the archeological evidence. First, according to the Bible only three towns were burned (Jericho, Josh. 6:24; Ai, 8:19;

Hazor, 11:13); thus destruction levels should not be expected at other sites, although evidence of occupation should be found. Second, other peoples, e.g., the Egyptians and sea-peoples, could be responsible for the destruction of some of these towns. Third, the tentative nature of archeological evidence must be remembered. Bimson's theory that the relative chronology should be revised downward, moving the end of M.B. II.C from 1550 to 1400, would help to harmonize the biblical account with archeological evidence, but his theory is not without problems.

Arad, Hebron, and Jarmuth yield no evidence of thirteenth-century occupation, and thus these towns do not support a late date for the Exodus. Similarly Ai, if it is identified with et-Tell, has no evidence of occupation from 2400 to *ca.* 1220. This fact can be harmonized with Josh. 7–8 in two ways: either the excavations need to be expanded to another part of the tell, or another site identification must be made. Albright followed the latter option and located Ai at Bethel, which had a thirteenth-century destruction level. This level, however, may be earlier in the 13th cent. than Albright supposed; but in any case, if that level is assigned to the Conquest, then the later destruction of Bethel (Jgs. 1:22-25) is not in evidence. It seems more plausible to locate Ai at et-Tell and assign Bethel's thirteenth-century destruction to the judges period.

Debir, which Albright incorrectly identified with Tell Beit Mirsim, has now been identified with Khirbet Rabûd, but it was apparently destroyed in the early 12th cent., too late to be relevant to the Exodus and Conquest. Gibeon has yielded no evidence of occupation in the 13th cent., although one would expect such evidence in view of Josh. 9–10. Hazor has destruction levels at the end of the 15th, 14th, and 13th cents., but the Early Iron Age occupation was only a small village, which hardly corresponds with Jgs. 4:2; hence it would seem that one of the earlier destructions was a result of the Conquest. The earliest occupation of Heshbon (modern Ḥesbân) was in the 12th cent. (L. Geraty and R. Boraas, *Andrews University Seminary Studies*, 16 [1978], 1-17), and thus it is of no help; however, it is possible that Heshbon was earlier located elsewhere, perhaps at Jālûl, where there is evidence of Late Bronze Age occupation. Jericho has no evidence of thirteenth-century occupation or destruction, but some scarabs point to a fifteenth-century occupation (despite disclaimers) and there is Late Bronze Age pottery there; also, the Middle Bronze Age wall could have continued into the Late Bronze Age, and thus could have been the wall of Josh. 6. Lachish and Megiddo were destroyed early in the 12th cent., too late for a thirteenth-century Exodus and Conquest. Finally, N. Glueck's surface survey (*AASOR*, 14-15 [1934/35]; 18-19 [1939]; 25-28 [1951]) of Moab was inadequate, and thus his results showing no occupation until 1300 must be discarded (so J. M. Miller in "An Archaeological Survey of Central Moab," a report presented to the annual session of the American Schools of Oriental Research on Nov. 19, 1978).

In conclusion, the archeological evidence does not seem to support a thirteenth-century Exodus and Conquest; rather, much of it points to a fifteenth-century date.

EXODUS, ROUTE OF THE.

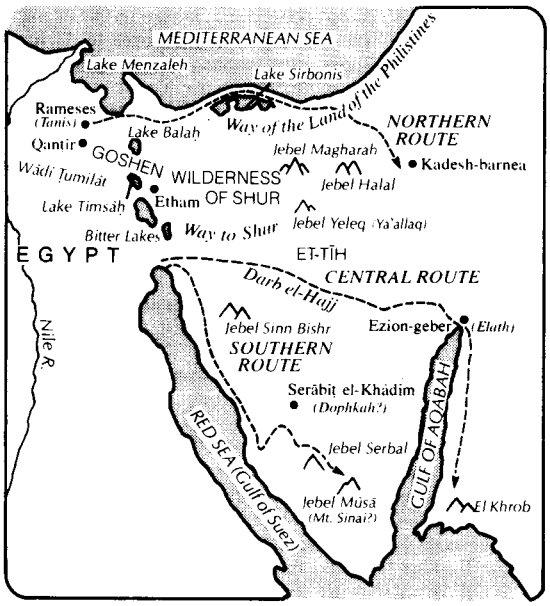
I. Introduction
II. Geography of the Sinai Peninsula
III. Beginnings of the Journey
IV. The Three Major Route Theories
  A. Northern Theory
    1. Extreme Northern Crossing
    2. Alternate Northern Route
  B. Central Theory
    1. Arabian Sinai
    2. Alternate Central Route
  C. Southern Theory
    1. Route to Jebel Mûsā
    2. Alternate Southern Route

I. Introduction.–Identification of the route of the Exodus must take into account significant geographical, topographical, and critical problems. Some understanding of these problems is necessary to appreciate the complexity of the task of identification. Further, because of the fragmentary and often tenuous nature of the evidence, all route suggestions must remain hypothetical.

Scholars differ in their evaluations of the historical aspects of the scriptural narrative. The traditio-historical approach of Noth posits that many of the geographical notations of Exodus and Numbers are secondary, intended to connect originally disparate traditions, although some lists within the narrative might be authentic (Noth, *Traditions*, pp. 220-27). Others, working from the traditional literary divisions (JEDP), suggest that several routes of the Exodus are preserved in the various strata (Haran, *IDB Supp.*). Some (e.g., de Vaux, pp. 374-76) have suggested a "double Exodus" theory, holding that one group took a northern route while another made its way south. However, some effort must be made to understand the present scriptural narrative in terms of the geography of the northeastern Nile Delta and the Sinai.

This in turn draws attention to a second set of problems. Although Exodus and Numbers are replete with geographic notations concerning the route, these are not as helpful as one might hope. Sinai's isolation and desolation throughout the centuries have destroyed the continuity of place names. When it is recalled that many sites in Palestine have been identified on the basis of identical, similar, or corrupted forms of the ancient names that are retained in the immediate area, the seriousness of such discontinuity in Sinai becomes apparent.

One factor that will be assumed in this discussion is the identification of Kadesh-barnea. This important site has been identified with near certainty at ʿAin Qudeirât (cf. *EAEHL*, III, *s.v.* "Kadesh-Barnea" [M. Dothan]). Also, some attention will be given to the possible locations of Mt. Sinai, since this would affect any route theory. Finally, since all travel in the Sinai is restricted to certain tracks, some attention is given to the ancient routes and geography.



II. Geography of the Sinai Peninsula.–Sinai is a triangle of land measuring approximately 240 km. (150 mi.) across the top and 420 km. (260 mi.) along the sides. Two arms of the Red Sea, the Gulf of Suez and the Gulf of Aqabah, flank it on the SW and SE respectively. Geologically and geographically, this area of 60,115 sq. km. (23,220 sq. mi.) is divided into three distinct parts.

The northern sector of the peninsula consists of a sandy coastal plateau. Averaging 32 km. (20 mi.) in width and narrowing in the eastern extremity, this area is often characterized by sand dunes reaching 27 m. (90 ft.) in height. To the west the area opens out into the desert of Al-Jifar, probably the ancient wilderness of Shur (Ex. 15:22). The term "Shur" seems to be connected with a line of Egyptian fortresses built by the Middle Kingdom ruler Amenemhet I (1991-1962 B.C.). The line was built to control the influx of Asiatics who sought pasturage here in time of famine (cf. *ANET*, p. 259).

South of the coastal area a limestone plateau rises slowly from N to S and stretches across almost two-thirds of the peninsula. A series of low mountains jutting upward from the plain forms the plateau's northern limit. These mountains, rather unimpressive to the eye, range from 610 to 1070 m. (2000 to 3500 ft.) in height. From W to E the major peaks are Jebel Jiddi, Jebel Yeleq (Ya'allaq), Jebel Magharah, and Jebel Halal. The plateau's southern limit is much higher, culminating in Jebel 'Ajmah (1625 m. [5335 ft.]). In the center of the plateau lies an area known as Badiyat et-Tīh, "the desert of the wanderings." The characteristic bare, unending gravel plain of et-Tīh has virtually no water and little vegetation.

Southern Sinai differs radically geologically and geographically. Basically sedimentary material further north gives way to igneous masses forming peaks that reach over 2440 m. (8000 ft.) in height. Chief among these peaks are Jebel Katerīn (2636 m. [8651 ft.]), Jebel Umm Shomer (2584 m. [8482 ft.]), and Jebel Mûsā (2280 m. [7482 ft.]). The last has been identified traditionally as Mt. Sinai since at least the 4th cent. A.D. Access to the area is by the Wâdī Feiran and Wâdī es-Sheikh. Southwest Sinai in particular interested the Egyptians from very ancient times down to the 20th Dynasty (*ca.* 1200 B.C.) because of turquoise and copper deposits in the area (Rothenberg, *PEQ*).

III. Beginnings of the Journey.–The biblical narrative consistently places the Hebrews prior to the Exodus in areas that have been identified with the northeastern delta (Gen. 47:27; Ex. 1:11; 13:17). The delta reaches out to the desert by two extensions. The northern extension protrudes to Qantarah while the southern extension begins near Zagazig and ends near Ismailia (Wâdī Ṭumilât); it has been suggested that this corresponds to the biblical Goshen, although Goshen appears in a general way to refer to the northeastern delta region. Both extensions were connected to lands further east by important routes. The "Way of Horus" (the biblical "way of the land of the Philistines") connected Egypt with Canaan. This route hugged the coast and was a major military highway (Gardiner, *JEA*, 6). God specifically forbade the Hebrews to take this route (Ex. 13:17). A second route began near Ismailia, crossed to Kadesh-barnea, and branched off to Canaan, the Arabah, and Ezion-geber. This route could be the "Way to Shur."

Between the Mediterranean and the Gulf of Suez several salt marshes and lakes separated the delta from

Sand dunes characteristic of the northern Sinai peninsula (D. Baly)

EXODUS, ROUTE OF THE

Al-Jifar. From N to S they were Lakes Menzaleh, Balaḥ, Timsâḥ, and the Bitter Lakes. Each of these, along with the more traditional Gulf of Suez, has been suggested as the "Reed Sea."

The biblical narratives locate the beginning of the journey at Rameses (Ex. 12:37; "Raamses" in Ex. 1:11). The exact location of Rameses is of considerable debate (*see* EXODUS, DATE OF THE II.A. and III.C; cf. Uphill). Two sites, Tanis and Qanṭîr (Tell el-Dab'a) have been suggested, with scholarship increasingly favoring the latter. From Rameses the Hebrews journeyed southward to Succoth (Ex. 13:20), generally located at Tell el-Maskhûṭah, and to Etham. Here, apparently unable to move on, the Hebrews turned northward (Ex. 14:2; Nu. 33:7). Three sites are mentioned next: Baal-zephon, Migdol, and Pi-hahiroth. One should probably locate Baal-zephon on or near a body of water because its name is that of a deity with nautical associations. An inscription mentions Baal-zephon in association with Tahpanhes (Tell Defneh), which borders Lake Menzaleh (cf. Albright). Migdol probably is to be identified with Tell el-Ḥeir, NW of Qantarah.

Why did the Hebrews change directions? The reason may have involved their inability to penetrate the "Wall of Shur," traditionally thought of as a line of fortresses extending from Pelusium to Ismailia to keep check on migrating bedouin (Gardiner, *Egypt*, p. 131). A canal discovered in the eastern delta in the 1970s suggests that the "Wall" actually was a canal with fortresses stretched along its length (cf. Sneh, Weissbrod, and Perath; W. Shea, *BASOR*, 226 [Apr. 1977], 31-38). Such an obstacle would force the Hebrews to take a more northerly track and eventually "entangle" them in the salt marshes of the northern delta (cf. Ex. 14:3). It is interesting to note that the name Pi-hahiroth may come from the root *ḥrt*, "dig," suggesting a location on a canal (Albright, p. 16). The deliverance through the sea could be located in the north, perhaps on a southern extension of Lake Menzaleh. After crossing to the east any line of march would place the Hebrews in Al-Jifar. Instead of continuing east, however, they very likely turned south toward the southern Sinai to avoid further contacts with the Egyptians (see IV.C below).

IV. The Three Major Route Theories.—*A. Northern Theory. 1. Extreme Northern Crossing.* One northern theory holds that the Hebrews crossed the narrow spit of land separating the Mediterranean Sea from Lake Sirbonis (Sabkhat Bardawil). The latter is a shallow clay pan that becomes filled with water when certain winds blow. After escaping the Egyptians, the Hebrews continued along the arm of land, crossed over through the coastal dunes, and reached Kadesh-barnea. Suggestions for Mt. Sinai in relation to this theory include Jebel Magharah, Jebel Yeleq (Ya'allaq), and Jebel Halal. The last is particularly attractive because of its proximity to Kadesh-barnea.

Several arguments lend weight to this theory. Baal-zephon has been identified by some with either Mohammediyeh or, more likely, Ras Kasrun (cf. Cazelles and Eissfeldt). If the latter identification is correct, this route becomes a certainty since Ras Kasrun is located approximately halfway across the arm of land around Lake Sirbonis. A second argument suggests that the Hebrews' immediate objective was Kadesh-barnea (cf. Jgs. 11:16). This route is one of the shortest to that objective, yet still manages to avoid the Egyptian fortresses along the "Way of Horus." Further, the Hebrews encountered the Amalekites (Ex. 17:8), a people otherwise located in the Negeb and W of Kadesh-barnea. The request of Moses for a "three days' journey" (Ex. 3:18; 8:27) fits a Mt. Sinai located in the north. Again, the quail narrative (Ex. 16) points to a northern route; a similar phenomenon still occurs near el-'Arīsh on the Mediterranean coast, where natives catch the migrating quail on their flight from Europe to Africa. Also, records of military catastrophes occurring in Lake Sirbonis recall the destruction of Pharaoh's army. Finally, it is interesting to note that Titus used this route in A.D. 68 on his way from Alexandria to Syria (E. Kraeling, *Rand McNally Bible Atlas* [1956], p. 105).

Serious objections to a northern route have been raised. First, the identification of Baal-zephon with Ras Kasrun is by no means certain (see III above). It is difficult to see how this route would avoid the Egyptian garrisons along the "Way of Horus." In any case, no natural route connects Lake Sirbonis with Kadesh-barnea. Nearly impassable dunes would prevent movement. One must also point out that Dt. 1:2 states that Mt. Horeb (Sinai) was eleven days' journey from Kadesh-barnea. This statement is impossible to harmonize with any Mt. Sinai in the north and argues for a more southerly location. Finally, Israel apparently very soon lost the precise location of Mt. Sinai. It is difficult to accept that this could occur if Mt. Sinai was located in the north, since Judah's borders included the area of Kadesh-barnea for much of its history.

2. Alternate Northern Route. Another proposal suggests that the Exodus followed the ancient track that connects the Wâdī Ṭumilât with Kadesh-barnea (the "Way to Shur"). The suggestion retains many of the strengths of the previous theory and avoids some of the pitfalls; but it is still susceptible to many of the above objections. Further, bedouins in search of pasturage undoubtedly used this route as a conduit to the delta. The Egyptians would keep a sharp watch over this route and it seems unlikely that a group of runaway slaves would be successful if they fled in this direction.

B. Central Theory. 1. Arabian Sinai. From the late 19th cent. until quite recently many scholars proposed locating Mt. Sinai in northwest Arabia on the strength of two primary arguments. First, the Sinai theophany (Ex. 19:16-20) was said to reflect an active volcano (Beke). But the Sinai Peninsula has had no active volcanos in historical memory; northwest Arabia represents the nearest area displaying that phenomenon. Second, it is noted that the biblical material connected Moses with the Midianites (Ex. 3:1; 18:1). Northwest Arabia generally is acknowledged as the homeland of the Midianites and this suggested that Mt. Sinai also should be located there.

A reconstructed line of march connects the Exodus with the ancient route that joined Egypt to Arabia, known today as the Darb el-Hajj, the modern Moslem pilgrim route. This route crosses the Sinai on a line from Suez to Elath (ancient Ezion-geber). From Ezion-geber the Hebrews turned south along the east side of the Gulf of Aqabah to the vicinity of El Khrob, where Mt. Sinai is to be located.

Objections to the two foundational arguments have seriously weakened this theory. Two counter-arguments militate against using Moses' connection with the Midianites. First, Moses also was connected with the Kenites (Jgs. 1:16; 4:11), whose relationship to the Midianites is unclear. Most interpreters suggest that the Kenites were a Midianite clan of trading smiths; their presence in the Sinai would not be surprising. Further, the Midianites were nomads; determining their sphere of influence is impossible. A near-fatal blow to an Arabian Mt. Sinai has been the recognition that the theophany of Ex. 19:16-20 is typical of other ancient theophanic descriptions which certainly do not presuppose volcanic activity (F. Cross, *Canaanite Myth and Hebrew Epic* [1973], pp. 156-177). Finally, Rothenberg's survey of southern Sinai raises serious questions concerning the identification of the

EXODUS, ROUTE OF THE

Jebel Mûsā, the traditional Mt. Sinai in the southern Sinai peninsula (W. S. LaSor)

Darb el-Hajj with any biblical road or any connection with the biblical period (Rothenberg, *PEQ*, p. 13).

2. Alternate Central Route. Another theory postulates that the Hebrews utilized the track connecting Egypt with Arabia, but turned northeastward before crossing the Sinai. Either Jebel Sinn Bishr or Jebel Yeleq (Ya'allaq) would be a good suggestion for Mt. Sinai. Note should also be made that some locate Mt. Sinai in Edom. Several references seem to associate the mountain of God with Mt. Seir (see *NHI*, p. 132). Interestingly, two of Haran's reconstructed pentateuchal source routes (ED and J) follow this general track. However, in addition to the objections raised by Rothenberg's survey mentioned above, it is difficult to fit the stations of the Exodus along this route. Moreover, if it could be demonstrated that the Exodus route went further south, any more northerly route theory would be invalidated.

C. Southern Theory. 1. Route to Jebel Mûsā. This theory suggests that after leaving the delta the Hebrews entered Al-Jifar and headed south (see III above for initial stages). The route proceeded along the coastline of the Gulf of Suez where several stations have been identified tentatively. Among the more significant are: Marah (Ex. 15:23) with either ʿAin Ḥawârah or ʿAin Musa; Elim (Ex. 15:27; Nu. 33:9) with Wâdī Gharandel; and the encampment by the sea (Nu. 33:10) with el-Merkhah. Near modern Abu Zeneimeh the route headed southeast inland. The wilderness of Sin (Ex. 16:1) may be the sandy plain Debbet er-Ramleh while Serābīṭ el-Khâdim probably is the biblical Dophkah (Nu. 33:12). Two major wadis, Wâdī Shellal and Wâdī Feiran, connect the coast with the great granite peaks of the south, one of which is to be identified with Mt. Sinai. In addition to the traditional Jebel Mûsā, Râs eṣ-Ṣafṣefeh and Jebel Katerīn are plausible candidates. The route to Kadesh-barnea is more difficult to determine but likely followed a series of valleys, passing near Ezion-geber (Nu. 33:35). *See* Plate 7.

Several factors make a southern route attractive. Although traditional identifications of sacred sites are often erroneous, it should be noted that this location goes against the early tendency to locate sacred places in areas readily accessible to pilgrims. Furthermore, there is some indication that the tradition was established prior to Christian penetration of southern Sinai (Rothenberg and Aharoni, *Wilderness*, p. 170). Again, Dt. 1:2, which placed Mt. Sinai (Horeb) an eleven-day journey from Kadesh-barnea, fits well a southern route. It should also be noted that the stations of the journey are much easier to locate along a southern route.

The existence of copper and turquoise mines in southwestern Sinai, although admittedly providing no direct link, may establish a context which lends support to a southern route. Cultural relationships between southern Sinai and Arad in the Early Bronze Age II (*ca.* 2850-2650 B.C.) suggest that miners, smiths, or traders, motivated by the presence of ore, sought out this area (R. Amiran, *IEJ*, 23 [1973], 197). Serābīṭ el-Khâdim, an Egyptian turquoise mining center, has been identified with Dophkah (Nu. 33:12) on the basis of the similarity of the Egyptian word for turquoise (*GTTOT*, § 428). Early alphabetic inscriptions (15th cent. B.C.), bearing affinities with the Semitic family of languages, suggest the use of Semitic labor. It seems clear that Semites from very early times were interested in southwestern Sinai. Moses' association with Kenites (wandering smiths) may have led him into this area, where he encountered the holy mountain.

That Israel early forgot the exact location of Mt. Sinai argues for a more remote area. It is also curious that many of the stations mentioned in the Exodus, including those in Nu. 33, are not found again either in the Bible or in extrabiblical documents, including the Karnak inscription of Sheshonq (Shishak) that lists many sites in the Negeb. It would appear that the Exodus sites were no longer normally accessible, a situation that suits the southern portion of the peninsula much better than the northern portion.

Work begun in 1956 has suggested that some of the stations mentioned before Ezion-geber should be located S of that site along the western shore of the gulf of Aqabah. Particularly striking are the identifications of Dizahab (Dt. 1:1) with Dhahab and Jotbathah (Nu. 33:33; Dt. 10:7) with Ṭabeh (Rothenberg and Aharoni, *Wilderness*, p. 167; *LBHG*, p. 183). If either identification is correct, this would argue strongly for a southern route. In addition to these specific identifications, there is some evidence that Paran, associated with Mt. Sinai (Dt. 33:2; Nu. 10:12; cf. Hab. 3:3), originally referred to the southern portion of the peninsula (*LBHG*, pp. 182f.).

Chief objections to a southern route include the assertion that the tradition is very late (4th cent. A.D.). Further, it is suggested that the locations of the initial stages presume a northern route (see III above) and that the immediate objective was Kadesh-barnea. As has been presented, the tradition may be more solid than is sometimes acknowledged, and a northern "Reed Sea" crossing does not rule out a southern route. It should also be noted that the immediate destination was the mountain of God, not Kadesh-barnea.

2. Alternate Southern Route. A few believe that Mt. Sinai should be located at Jebel Serbal, which adjoins Oasis Feiran NW of Jebel Mûsā. The identification rests upon the similarity between Feiran and Paran (see IV.C above).

T. V. BRISCO

EXORCISM. A word derived from the Gk. *exorkízein*, meaning "adjure," "charge (someone) under oath." The verb *exorkízein* occurs in the NT only in Mt. 26:63, where it is translated "adjure" (NEB: "charge"), and as a variant reading in Acts 19:13f. The prefixed preposition *ek* (normally "from," "out of") functions as an intensifier or perfectivizer (BDF, § 318) of the verb *orkízein*, which means "adjure" or "implore, entreat." The two uses of *orkizein* in the NT (Mk. 5:7; Acts 19:13) are translated "adjure" (NEB paraphrases "in God's name" in Mk. 5:7). The LXX uses *exorkízein* in Gen. 24:3 and 1 K. 22:16 to translate Heb. *šāḇaʿ* ("swear"), which the RSV renders "swear" and "adjure" respectively. The LXX also uses *exorkízein* to translate the verb *ʾālâ* ("to swear, curse") in Jgs. 17:2 (RSV, AV, "curse"). The verb *orkízein* is used twenty-eight times in the LXX, always as a translation of Heb. *šāḇaʿ*. The simple use of the Greek noun *exorkistḗs* in the NT is the plural form in Acts 19:13, translated "exorcists." "Exorcism" may be defined as the process of expelling an evil spirit or spirits from a possessed individual through the means of (magical) adjurations and rituals. Oaths are important in exorcism, and the invocation of a supernatural being or beings is almost always a central feature of exorcistic formulas.

V. Early Christianity
A. Synoptic Gospels
B. Acts of the Apostles
C. Second-Century Christianity

I. Ancient Near East.–People throughout the ancient Near East believed that they could be subject to a variety of ill effects caused by malevolent supernatural beings ("demons"). Apotropaic techniques (used to ward off the evil effects of demonic influence) included the use of charms, amulets, and prescribed ritual procedures. When evil spirits had already succeeded in invading the personality, exorcistic techniques were used to expel the spirit and to restore the afflicted person to physical and mental health. The harmful effects of demons were thought to include physical and mental illnesses, reversals of fortune, various types of antisocial behavior, and even death. The ancient Egyptians believed that demons were among the root causes of sickness and disease, and held that such beings could be expelled by magical incantations (E. A. W. Budge, *Egyptian Magic* [1901], pp. 206-213), though this was not a major concern, for they were not preoccupied with the concept of evil (Frankfort, *Ancient Egyptian Religion* [1948], pp. 73-80). The belief in the destructive effects of evil spirits was much more pervasive in ancient Assyria and Babylonia. One result of this belief was the Akkadian conjuration-priest's practice of relieving an afflicted individual by fashioning a small figure of the demon and then destroying it in fire.

The demonological beliefs that later pervaded the Greco-Roman world derived from Persian religious traditions shaped by Zoroastrianism. One of the better-known examples was Aeshma Daeva, one of the seven chief demons under Ahriman the prince of darkness. (Aeshma Daeva appears as the demon Asmodeus in the apocryphal book of Tobit.) The *Vendidad*, a collection of books containing apotropaic and exorcistic lore regarding demons, came into existence after the 5th cent. B.C. in Persia. One object of central concern for Zoroastrians was the proper disposition of cut hair and nails, regarded as potentially useful to the daevas (demons) for their attacks on man. The fly, partially because of its predilection for filth, was regarded as the embodiment of the female demon Nasu, and elaborate cleansing rites were instituted to ward off her influence.

II. OT.–Evil spirits or demons were also familiar figures to the ancient Israelites, though surprisingly, rites of exorcism are almost unknown (*see* DEMONOLOGY). Demons are referred to in Dt. 32:17 and Ps. 106:37, and elsewhere in the OT the RSV translates Heb. *śaʿîr* (lit. "hairy one") "satyr" in Lev. 17:7; 2 Ch. 11:15 (but NEB "demons," AV "devils"). Two of the more prominent demonic figures in the OT are Lilith the "night hag" (Isa. 34:14) and Azazel (Lev. 16:8, 10, 26). While the existence of malevolent evil spirits is unquestioned in the OT, they are not the object of superstitious preoccupation. In ancient Israel, as in the later rabbinic literature, evil spirits were regarded as subject to the authority of Yahweh. "Lying spirits" were regarded as commissioned by God (1 K. 22:21-23; 2 Ch.18:20-23). Satan himself was not regarded as an independent evil force, but as subject to divine authority and control (Job 1:11-13; 2:5f.). As in ancient Assyria, Babylonia, Persia, and Egypt, evil spirits were closely associated with the spread of illness and disease in Israel (Lev. 14:2-9; 2 S. 24:15-17; 2 K. 19:35; Job 2:7).

In view of the strong demonological traditions in Assyria, Babylonia, and Persia, it is noteworthy that the Israelite emphasis on the sovereignty of Yahweh did not encourage the development in the preexilic period of a consistent or complex demonology and the requisite techniques of apotropaism and exorcism. The single instance of exorcism found in the entire OT is in 1 S. 16:14-23. This passage tells how the Spirit of the Lord departed from Saul and was replaced by an evil spirit, which began to torment him. David functioned as an exorcist, for whenever the evil spirit from Yahweh troubled Saul, David would play the lyre and cause the spirit to depart from him, thereby bringing temporary relief. No magical incantations appear to have been involved, though later Jewish tradition supposed that certain Davidic psalms were particularly effective in exorcisms (see below).

In the postexilic period Judaism became more profoundly aware of the existence and effects of evil spirits, a development facilitated by the historical experience of oppression and subjugation to a series of foreign conquerors beginning with the Babylonians who conquered Judah and sacked Jerusalem in 586 B.C. Among the elements of the eschatological program formulated by the prophet Zechariah were the opening up of a fountain for cleansing from sin and uncleanness, the removal of idols, and the removal of the unclean spirit (Zec. 13:1-6). This latter act functions as a kind of national experience of exorcism that is a prerequisite for the arrival of the eschaton (cf. 1QS 4:19-21; 1QM 14:10; 1QH 3:18).

III. Postbiblical Judaism.–The elaborate demonological systems of Assyria, Babylonia, and particularly Persia had a significant influence on the development of defensive techniques — apotropaic and exorcistic incantations and rituals in Judaism. The first literary evidence for the practice of exorcism in Judaism is found in the apocryphal book of TOBIT, which may have originated as early as the 4th cent. B.C. (*see* DEMON III). Tobias the son of Tobit drove off the demon Asmodeus by burning the heart and liver of a fish. This act of exorcism probably reflected actual practice.

King Solomon was increasingly regarded in postbiblical Judaism as the exorcist and magician par excellence, and as the patron of exorcists (SB, IV, 510-13, 533f.). Solomon's phenomenal wisdom was extolled in 1 K. 4:29-34, which says not only that he composed three thousand proverbs and a thousand and five songs, but also that he

"spoke of" various plants and animals. In Wisd. 7:15-22, composed during the 1st cent. B.C., Solomon's knowledge is expanded to include "the powers of spirits" and the "virtues of roots" (v. 20). By the end of the 1st cent. A.D. Solomon's reputation as a magician and exorcist had been further embellished. This is evident in the expansions of Josephus on 1 K. 4:29–32:45; "And God granted him [Solomon] knowledge of the art used against demons for the benefit and healing of men. He also composed incantations by which illnesses are relieved, and left behind forms of exorcisms with which those possessed by demons drive them out, never to return" (*Ant.* viii.2.5 [45], *LCL*). Josephus then described the technique of exorcism used by Eleazar, a contemporary Jewish exorcist. Eleazar would take a ring containing a root prescribed by Solomon and put it to the nose of the afflicted person. The odor would draw the demon out of the nose and Eleazar would then recite Solomon's name and various incantations to prevent the return of the demon. As proof that the demon had actually been expelled, Eleazar would place a container of water near the possessed person and command the demon to overturn it as he left. "When this was done," continues Josephus, "the understanding and wisdom of Solomon were clearly revealed" (*Ant.* viii.2.5).

The fullest development of the tradition of Solomon as exorcist and magician is reflected in the Testament of Solomon, a second- or third-century A.D. Jewish text, originally written in Greek, with some Christian interpolations. This document describes how Solomon built the temple in Jerusalem with the aid of demons by controlling them with a magic signet ring that he had received from the archangel Michael. Solomon interviewed a number of demons, each of whom was asked his name, the kind of malevolent activities in which he indulged, and the name of the angel who was able to control him. The demon Asmodeus, for example, was thwarted by the angel Raphael and by the burning of the liver and gall of a fish. Evidence of Solomon's influence on the magical traditions of the Greco-Roman period is the use of his name in several incantations in the magical papyri (Preisendanz, I, 102 [Pap. IV, 850, 853]; II, 218 [Pap. 10, 30]). The following adjuration is found in Preisendanz, I, 170 (Pap. IV, 3039-3041): "I adjure you by the seal which Solomon placed on the tongue of Jeremiah, and he spoke."

The practice of exorcism is also reflected in several documents among the DEAD SEA SCROLLS. In the Aramaic expansion of the Genesis account called the Genesis Apocryphon (1QapGen) 20:28f., Pharaoh asks Abraham to pray that an evil spirit may depart from his household. "So I [Abraham] prayed for that [ ] . . . and I laid my hands upon his head. The plague was removed from him and the evil spirit was commanded to depart [from him], and he was cured" (Fitzmyer, p. 67). This narrative is striking in that it is the first instance found in a Jewish source of the rite of healing by laying on of hands, which has no parallels in the OT or rabbinic literature (Flusser). Further, prayer is not associated with the laying on of hands in the NT, as it is in 1QapGen. In another document from Qumran called the Prayer of Nabonidus (4QPrNab), Nabonidus the Babylonian king says in 1:3f.: "But I prayed to the Most High God and an exorcist forgave my sins; it was a Jewish [man], one of [the exiles]," i.e., Daniel (Dupont-Sommer, p. 322). Further, in one of the apocryphal psalms found at Qumran (11QPs^{a} 19:15f.), we read: "Let Satan not rule over me, nor an unclean spirit; neither let pain nor the evil inclination take possession of my bones" (Sanders, p. 121). According to 11QPs^{a} 27:10 David composed four psalms for singing to the stricken, a fact that may be correlated with the rabbinic tradition that Ps. 91 was particularly suited for singing to those afflicted with demons or evil spirits (van der Ploeg). Similarly, in the *Liber Antiquitatum Biblicarum* of pseudo-Philo (a Jewish composition of the late 1st cent. A.D.), the author provides a haggadic midrash (i.e., a periphrastic interpretative expansion) of the biblical account from Genesis to the death of Saul. In 6:1-3, the author mentions David's use of the harp to drive the evil spirit from Saul and quotes an apocryphal psalm that David is supposed to have sung.

The practice of magic was generally prohibited in Judaism (Lev. 19:26, 31; 20:27; Dt. 18:9-14; 2 K. 17:17; *see* DIVINATION; MAGIC), yet evidence suggests that, while it may not have been practiced publicly, it was practiced privately and surreptitiously (Trachtenberg). References to Jewish exorcists are found within the NT (Mk. 9:38f. par. Lk. 9:49f.; Acts 19:13-16), and Jewish magicians and exorcists were highly regarded throughout the Greco-Roman world. Jewish exorcists used the name of the God of Israel in their exorcisms (Josephus *Ant.* ii.12.4 [275f.]; viii.2.5 [46-48]; Irenaeus *Adv. haer.* ii.4.6), sometimes in the formula "the God of Abraham, (the God of) Isaac, and (the God of) Jacob" (Justin *Dial.* 85.135; Origen *Contra Celsum* i.22; iv.33f.; v.45; Rist; Heitmüller, pp. 180-82). Various Hebrew names of the God of Israel, transliterated into Greek, are found in the incantations of the magical papyri, revealing the extensive influence of Jewish magic (Preisendanz, I, 114 [Pap. IV, 1230ff.]; II, 77 [Pap. XII, 287f.], 124 [Pap. XIII, 815f., 975f.]). Jewish exorcists also used angelic names in their incantations (Heitmüller, pp. 176-180), a fact attested by the third-century Jewish magical handbook entitled *Sepher ha-Razim* ("Book of Mysteries") published in 1966 by M. Margalioth. In a lengthy exorcism found in a magical papyrus entitled "The Stele of Ieu the Hieroglyphist," Jewish influence is obvious (Preisendanz, I, 184 [Pap. V, 97-120]): "I invoke you, Headless one, who created earth and heaven, who created night and day, you who created light and darkness . . . I am Moses your prophet to whom you have transmitted your mysteries celebrated by Israel. . . . Listen to me and turn away this demon."

In Babylonian Judaism of the 6th and 7th cents. A.D., the practice of apotropaic and exorcistic rites against demons is reflected by inscriptions preserved on Aramaic incantation bowls. Some of these Jewish exorcisms are structured in accordance with legal divorce terminology: "This day above any day, and generations of the world, I Kômêš bath Maḥlaphta have divorced, separated, dismissed thee, thou Lilith, Lilith of the Desert, Hag and Ghul . . . I have fenced you out by the ban which Joshua ben Peraḥiah sent against you" (Neusner and Smith, p. 335). This evidence indicates the continuous existence and practice of exorcism in Judaism from the later postexilic period into the Talmudic period and beyond.

IV. Greco-Roman World.—Though there is evidence that the Greeks believed in supernatural possession from very early times, evidence for the practice of exorcism as the expulsion of evil spirits by magical means does not antedate the 2nd cent. A.D. (Smith, p. 409). Lucian of Samosata, a second-century A.D. Epicurean philosopher and satirist, is the first pagan author to describe an exorcism in detail (*Philopseudes* 16, *LCL*): "Everyone knows about the Syrian from Palestine, the adept in it [i.e., exorcism], how many he takes in hand who fall down in the light of the moon and roll their eyes and fill their mouths with foam; nevertheless, he restores them to health and sends them away normal in mind, delivering them from their straits for a large fee. When he stands beside them as they lie there and asks: 'When came you into this body?'

the patient himself is silent, but the spirit answers in Greek or in the language of whatever foreign country he comes from, telling how and when he entered into the man; whereupon, by adjuring the spirit and if he does not obey, threatening him, he drives him out. Indeed, I saw one coming out, black and smokey in colour." In this remarkable narrative, the therapeutic interview is presented as an essential element in exorcisms. A comparison with similar accounts (i.e., the practices of the Jewish exorcist Eleazar described in Josephus *Ant.* viii.2.5 [46-48], Apollonius of Tyana as described by Philostratus *Vita Apollonii* 3.38; 4.20,25; and others), allows us to characterize the essential features of the therapeutic interview of the ancient exorcist: (1) the demon must speak, (2) the demon must reveal his name or his nature and his evil works, (3) the demon is commanded to leave, (4) the exorcist swears an oath in the nature of a curse making use of particularly powerful names, and (5) the demon marks his departure by an act of physical violence (Bonner, *HTR*, pp. 39-49; Smith, p. 409). Eleazar caused the demon to overturn a container of water (Josephus *Ant.* viii.2.5 [48]), while the one expelled by Apollonius overturned a statue (Philostratus *Vita Apollonii* 4.20).

From the 1st to the 4th cents. A.D., the belief in the malevolent influence of evil spirits encouraged the production of enormous numbers of magical amulets, worn to ward off the deleterious influences of demons (cf. Bonner, *Amulets, passim*). Some exorcistic formulas have been preserved in the magical papyri, among which is this short adjuration (Preisendanz, I, 114 [Pap. IV, 1239-1244]): "I adjure you, demon, whoever you are, by this god sabarbarbathioth sabarbarbathiouth sabarbarbathioneth sabarbarbaphai come out, demon, whoever you are, and keep away from so-and-so, right now! right now! quickly! quickly!"

V. Early Christianity.—*A. Synoptic Gospels.* In the NT exorcisms are primarily found in the Synoptic Gospels and Acts. Surprisingly, no exorcisms are referred to in the Gospel of John. Jesus is depicted as an exorcist in the Synoptic tradition, and He is able to delegate this ability to His disciples (Mk. 3:14f.; 6:7 [par. Mt. 10:1; Lk. 9:1; 10:17-20]; 9:18,28 [par. Mt. 17:16,19; Lk. 9:40]; 16:17f.). Exorcisms, which are acts of liberating afflicted persons from the malevolent influence of demons, are distinguished from other forms of cures involving the restoration to health of those whose disease or affliction was not regarded as having a demonic cause (Mk. 1:32-34 [par. Mt. 8:16; Lk. 4:40f.]; 1:39 [par. Mt. 4:24]; 3:10f. [par. Lk. 6:17f.]; Lk. 13:32; cf. Eitrem, pp. 34f.). Jesus' method of curing the sick usually involved the touch of His hand, but in performing exorcisms He avoided the use of His hand and focused on addressing the demon with short, authoritative commands. Six accounts of exorcisms performed by Jesus are preserved in the Synoptic Gospels (1) Mk. 1:21-28 par. Lk. 4:31-37; (2) Mk. 5:1-20 par. Mt. 8:28-34; Lk. 8:26-39; (3) Mk. 7:24-30 par. Mt. 15:21-28; (4) Mk. 9:14-29 par. Mt. 17:14-21; Lk. 9:37-43; (5) Mt. 9:32-34; (6) Mt. 12:22f. par. Lk. 11:14. That Jesus' ministry was characterized, among other things, by the performance of exorcisms, is indicated by a number of editorial summaries and comments by the Synoptic evangelists (Mk. 1:32-34 par. Mt. 8:16; Lk. 4:40f.; Mk. 1:39 par. Mt. 4:24; Mk. 3:10f. par. Lk. 6:17f.; Lk. 7:21; 8:2).

In two of the six exorcism stories of the Gospels, Mt. 9:32-34 and Mt. 12:22f. (par. Lk. 11:14), nothing is said of the technique used by Jesus. In three exorcism stories Jesus expels demons with short, succinct commands: "Jesus rebuked him, saying 'Be silent and come out of him!'" (Mk. 1:25 par. Lk. 4:35); "Come out of the man, you unclean spirit!" (Mk. 5:8 par. Lk. 8:29); "He rebuked the unclean spirit and said to it, 'I command you, come out of him and never enter him again!" (Mk. 9:25 par. Mt. 17:18; Lk. 9:42). The brevity and authority of such commands and the absence of the invocation of divine or angelic names contrast with the lengthy adjurations and invocations that characterize formulas in the magical papyri (cf. the "Recipe of Pibeches" in Preisendanz, I, 170ff. [Pap. IV, 3007-3086]). That Jesus could confidently command demons and expect instant obedience indicates that He regarded Himself as in full possession of all the supernatural powers necessary for the performance of such acts. The dumbness caused by some afflicting demons depicted in the Gospels may be regarded as a way to keep the healer from starting the "therapeutic interview" (cf. Mt. 9:32; 12:22 par. Lk. 11:14; Mk. 9:17,25). In one instance Jesus asked a demon for his name (Mk. 5:9 par. Lk. 8:30), and the occasional convulsions and collapse of the victim would provide visible proof of the expulsion of the demons (Mk. 9:26), while according to Mk. 5:13 (par. Mt. 8:32; Lk. 8:33) the demons abandoned the Gerasene demoniac for a herd of swine which then stampeded into the sea in an act of self-destruction.

In addition to the references to exorcisms performed by Jesus, three sayings of Jesus deal specifically with exorcisms. (1) In Mk. 3:19-27 (par. Mt. 12:25f., 29; Lk. 11:17f., 21f.), Jesus is accused by His enemies of performing exorcisms "by Beelzebul" (i.e., "in the name of Beelzebul"), an indirect way of charging Jesus with the practice of magic (cf. BEELZEBUL). Jesus, however, is not recorded as having invoked any supernatural being in the performance of exorcisms. (2) In Lk. 11:19f. (par. Mt. 12:27f.) it is clear that Jesus' primary purpose in performing exorcisms was not to relieve afflicted individuals (though the element of compassion is not unimportant), but to demonstrate the presence and power of the Kingdom of God through His activities and message. (3) Lk. 13:32 shows that Jesus' ministry of curing and exorcism was integral to His ministry, the goal of which was His last fateful trip to Jerusalem. Jesus' battle against demons should be viewed within the setting of the Jewish eschatological hope that the unclean spirit would finally and decisively be banished from Israel (Zec. 13:2; 1QS 4:19-21; 1QM 14:10; 1QH 3:18; Betz, pp. 116-137). Some have suggested that when Jesus was occasionally addressed as "Son of David," as by blind Bartimaeus in Mk. 10:47f., the reference is really to Son of David = Solomon, i.e., to Jesus as the heir to the therapeutic and healing abilities associated with Solomon (Fisher, Berger). Solomon is referred to as "Son of David" in such late texts as the Testament of Solomon 1:7; 20:1 and in the inscriptions on some Aramaic incantation bowls, but it is doubtful that the title "Son of David" can bear this meaning in the Gospels (Duling).

B. Acts of the Apostles. The Gospels themselves contain evidence that the name of Jesus was used during His lifetime by disciples in the performance of exorcisms (Mt. 7:22; Lk. 10:17; cf. Mk. 16:17), as well as by other Jewish exorcists not formally associated with Him (Mk. 9:38f. par. Lk. 9:49). In Acts it is primarily through the utterance of the name of Jesus that healings and exorcisms are effected (3:6, 16; 4:7, 10, 30; 9:34). The name of Jesus was regarded as so effective that it was also taken up by non-Christian exorcists (Acts 19:13; Eitrem, p. 8 n. 1). Origen noted that the name of Jesus was so powerful that it was even effective when used by evil men (*Contra Celsum* i.6).

In Acts there is a general emphasis on miracles, exorcisms, and magic, since the author wishes to demonstrate not only that the gospel proclaimed by the apostles was

confirmed by supernatural demonstrations of power, but also that Jewish and pagan magic and exorcism was impotent by comparison. The occurrence of exorcisms is only generally referred to in Acts (5:16; 8:7; 19:12). The only exorcism specifically narrated in Acts (and in the entire NT apart from those performed by Jesus) is that performed by Paul in Acts 16:16-18. Irritated by a demon-possessed slave girl, he turned and said, "I charge you in the name of Jesus Christ to come out of her" (Acts 16:18).

C. Second-Century Christianity. The Church drew a sharp dividing line between Christian exorcists and pagan magicians. The second-century Christian apologist Justin Martyr contrasted successful Christian exorcists who used the name of Jesus with pagans who relied on incantations and drugs. Justin also claimed that Jewish exorcists who attempted to cast out demons in the names of Israelite kings (Solomon?), righteous men, prophets, or patriarchs would not be successful, while those who used the name of the God of Abraham, Isaac, and Jacob might succeed (*Dial.* 85). Origen, himself a firm believer in the power of magic, attributed the success of Jewish and pagan exorcisms to the use of the name of the God of the Jews (*Contra Celsum* iv.33f.). Christians too, observed Origen, used the name of the supreme God and that of Jesus to effect exorcisms and curing which non-Christian magicians found impossible (*Contra Celsum* iii.24). By the time of Justin (*ca.* 150 A.D.), the name of Jesus had been supplemented in exorcistic formulas by the phrase "crucified under Pontius Pilate" (*Apol.* ii.6; *Dial.* 30.3; 76.6; 85.2; Irenaeus *Adv. haer.* ii.49.3; *Epideixis* 97). This tendency is already observable in the MS tradition of the NT, where in addition to Peter's short statement in Acts 9:40, "Tabitha, rise," some Latin versions added the phrase "in nomine domini nostri Jesu Christi" ("in the name of our Lord Jesus Christ"). Such expansions were apparently influenced by the notion that it was the crucifixion of Jesus that spelled the potential destruction of demonic powers. The same formula also entered baptismal liturgies, which came to function as magical rituals that expelled demons from baptismal candidates (Justin *Apol.* i.61; Böcher, *Christus Exorcista*, pp. 166-180; Dölger).

EXPECT; EXPECTATION [Heb. *tiqwâ*, piel of *yāḥal* (Ezk. 13:6), *tôḥeleṯ, ʾālay śāmû* (1 K. 2:15); Gk. *prosdokáō, prosdokía, apokaradokía* ("eager expectation"; Phil. 1:20), *dokéō* (Mt. 24:44 par.), *ekdéchomai* (1 Cor. 16:11), *elpízō* (2 Cor. 8:5), *apelpízō* (Lk. 6:35)]; AV also HOPE, THINK, LOOK FOR, WAIT FOR, "set their faces on me" (1 K. 2:15), "he should have" (Acts 28:6); NEB also "was looking to me" (1 K. 2:15), "passionately hope" (Phil. 1:20).

According to its predominant OT use "expectation" is the common property of all persons, good and wicked alike. At issue is not the fact of expecting, but the realization of that which is expected, the fruition of one's desires. The hopes of the wicked are frustrated, while those of the good find fulfillment (Prov. 10:28; cf. 11:23, which contrasts good results with destructive ones). The ultimate frustration for the wicked is death, which brings an end to all their hopes. It is not clear what this expectation is, but it is clear that for the wicked any such hope is thwarted.

Theologically, it is Yahweh who is the source of the fulfilled expectation, and conversely, the cause of the thwarted hope. It is Yahweh who guarantees such an order in the affairs of the world. It is for this reason that the person who had known affliction and suffered defeat confesses the loss of any expectation from Yahweh (Lam. 3:18; but cf. 3:22-27). Closely related is the question of the fulfillment of the spoken, prophetic word. The person who proclaims a word that is not from Yahweh waits in vain for its fulfillment (Ezk. 13:6).

In the NT "expect" is often used in the sense of awaiting or anticipating the arrival of someone. Gk. *ekdéchomai* (1 Cor. 16:11) connotes awaiting, while *prosdokáō* suggests anticipation or preparation (Acts 10:24). Theologically, regarding expected salvation, the latter term is used in the parable of the true and untrue servant to describe the return of the master. He arrives at a time the servant does not anticipate, when the servant is unprepared to encounter him (Mt. 24:50 par.). In Lk. 3:15 the term is used in the context of a messianic expectation. Speaking of the unknown hour at which the Son of Man will come, *dokéō* (lit. "think," "believe") is employed (Mt. 24:44 par.).

One can also expect something — a gift (Acts 3:5) or interest (or possibly repayment) on a loan (Lk. 6:35). In the latter case, Gk. *apelpízō* (the opposite of *elpízō*), which normally means "despair," probably means "expecting nothing (in return)."

"Expect" can also be applied to an anticipated act or a consequent event (the normal consequence). Gk. *elpízo*

(2 Cor. 8:5) connotes hoping, counting upon something. In Acts 28:6 *prosdokáō* suggests that which a person has been taught or led to anticipate, the consequences that should normally or naturally follow (cf. "expecting" in 12:11, where it suggests that which one has planned or prepared). The noun *apokaradokía* of Phil. 1:20 occurs elsewhere in the NT only in Rom. 8:19, where the RSV renders it "eager longing." It means literally stretching the head forward or looking away from other objects. It is intensive, unreserved waiting or watching. It is a confident waiting and is closely related to the concept of hope. *See also* HOPE; WAIT.

EXPECTATION, MESSIANIC. *See* CHRISTS, FALSE; ESCHATOLOGY; JESUS CHRIST; MESSIAH.

EXPEDIENT [Gk. *symphérō*] (Mt. 19:10; Jn. 11:50; 18:14); AV also GOOD; NEB BETTER, "more to your interest." Gk. *symphérō* ("help" or "be useful, profitable") is used by the disciples when Jesus is talking about divorce. If a man commits adultery by marrying another woman after he has been divorced, the disciples ask then if it is "better not to marry" (Mt. 19:10, NEB).

The high priest Caiaphas uses the word in his "unconscious prophecy" of the salvific nature of Jesus' death when he says, "It is expedient for you that one man should die for the people, and that the whole nation should not perish" (Jn. 11:50; 18:14). This concept that "the sacrifice of an individual is never too high a price to pay for national security" has OT roots (2 S. 20:20-22; Jonah 1:12-15), and the death of Jesus was to Caiaphas and the Sanhedrin "a means by which the Jewish nation may be saved from disaster" at the hands of the Romans (Dodd, p. 62). Ironically, this death did not preserve either the temple of the Jewish people or their permanent nationhood. To John the Evangelist, however, the "expediency" of His death took on a much deeper dimension, as "Jesus was indeed to die for Israel [but] no doubt in a more profound sense than Caiaphas dreamed of" (Dodd, p. 63).

EXPERIENCE; EXPERIENCED [Heb. *yāḏaʿ*] (Dt. 1:13, 15; Jgs. 3:1); AV KNOW, KNOWN; NEB REPUTE, "take part in"; [*rāʾâ*] (Eccl. 1:16); NEB FAMILIAR; [Gk. *energéō*] (2 Cor. 1:6); AV EFFECTUAL; NEB STRENGTH; [*gínomai*] (2 Cor. 1:8); AV "come to (us)"; NEB "come upon (us)"; [*páschō*] (Gal. 3:4); AV SUFFER; [*páthēma*] ("experience of suffering," 1 Pet. 5:9); AV AFFLICTIONS; NEB "kinds of suffering." The RSV also supplies "experienced" in 1 Ch. 12:8.

Several shades of meaning are present in the RSV's use of this term. The Hebrew verb *yāḏaʿ* is a common term meaning "know," "be acquainted with," "understand"; thus the men referred to in Dt. 1:13, 15 were either men of insight and judgment, or (according to the NEB) men who were well known in Israel. The writer of Eccl. 1:16 says, "I have acquired great wisdom . . . my mind has had great experience of wisdom and knowledge." Here *rāʾâ ḥarbēh* means "has seen abundantly," and the idea seems to be that of a wide outlook combined with actual trial of the things discovered or known.

In the NT the term is always used in connection with suffering. While *páschō* originally meant to experience any sort of treatment and *páthēma* simply denoted an experience, both terms came to denote the experiencing of ill treatment or suffering. N. J. O.

EXPERIMENT. The AV uses this word in the phrase "the experiment of this ministration" (2 Cor. 9:13; cf. RSV "the test of this service"). The Greek term *dokimḗ* denotes "approvedness" or "tried character"; thus, the apostle is saying that the liberal contribution was proof of the sincerity of the Corinthian congregation's profession.

EXPIATE; EXPIATION [Heb. *kipper, kippurîm, kappōreṯ, kōper*; Gk. *hiláskomai, exiláskomai, hilasmós, hilastḗrion*].

In the OT the NEB renders Heb. *kipper* most often by "make expiation," but also by "(secure) pardon," "blot out," "wipe away," "purge." In place of "expiate" the AV and RSV prefer "atone" or "make atonement," but also render "forgive," "appease," "be merciful," and "make reconciliation." The RSV has "expiate" in 1 S. 3:14; Isa. 27:9; 47:11; or "(make) expiation" in Nu. 8:7; 35:33; Dt. 32:43; 2 S. 21:3. In the NT the RSV has "expiate" or "expiation" in Rom. 3:25 (*hilastḗrion*; AV "a propitiation"; NEB "the means of expiating sin"); He. 2:17 (*hiláskomai*; AV "make reconciliation"); 1 Jn. 2:2; 4:10 (*hilasmós*; AV "propitiation"; NEB "remedy"). The NEB has "the place of expiation" for *hilastḗrion* in He. 9:5 (RSV "mercy seat").

"Expiation" focuses on the removal of sin, and "propitiation" on the appeasement of wrath. "Atonement" in Scripture encompasses both concepts. Expiation of sin is usually accomplished by sacrifice. The OT understands that expiation can be achieved also by intercession (Ex. 32:30), a burning coal from the heavenly altar (Isa. 6:6f.), the death of the members of a guilty family (2 S. 21:3-6), loyalty and faithfulness (Prov. 16:6), or the purging out of idolatry along with captivity (Isa. 27:8f.). Expiation results in the reconciliation of God and the sinner by removing the cause of God's wrath.

There is some debate among scholars about the emphasis of Scripture. One group of scholars argues that the meaning of atonement in the Bible is exclusively expiation. Some of them carry this idea far enough to remove all stigma of the concept of the wrath of God. Another group argues that although expiation is evident in atonement the primary emphasis is on propitiation. The influence of the former group on newer translations is extensive, as evidenced in selected passages in the RSV and especially in the general way of translating this class of words in the NEB.

To gain some insight into the debate, a consideration of the OT emphasis will be given, followed by the LXX word usage and a look at key NT passages.

I. OT.—In the OT the root *kāpar* is central to the cultic ritual of atonement. Some take it etymologically to mean "(to) cover" (Arab.). Others go to Assyrian and understand it as "wipe away." *CAD* defines *kapāru* as "wipe off, smear on, clean (objects), purify"; an example is cited where the root deals with purifying a temple (cf. Lev. 16:33). This word may connote "propitiate"; e.g., Jacob seeks to appease his offended brother with presents (Gen. 32:20 [MT 21]; cf. Prov. 16:14). When this root relates to the cultic ritual of atonement in P (the Priestly Code), however, some significant observations must be made. (1) The priest serves as the subject of "atone" (*kipper*). (2) Only things stand as direct objects of "atone," i.e., the temple (Lev. 16:11), the altar (Ezk. 43:20); however, the object may be preceded by a preposition (e.g., Ex. 29:37). (3) Frequently "atone" is followed by a person

preceded by the preposition "on" (*'al*) or "in behalf of" (*ba'aḏ*). (4) Often a word for sin follows "atone" preceded by a preposition as "on" (*'al*) or "from" (*min*). (5) The ritual of atonement is to take place in the presence of Yahweh (Lev. 10:17; 14:29). (6) Atonement is made by blood since blood bears the life (*nepeš*; 17:11). (7) The result of atonement is forgiveness (4:20, 31, etc.). Therefore, concerning sacrificial atonement, both the person who sinned and the sin itself are affected by the sacrifice. The person is purged or cleansed (16:30), and the sin is covered or wiped out (4:26, 35). The extent of the sacrificial system, however, is limited to sins of inadvertence; deliberate sins are beyond its scope. Certain OT passages refer to sins that cannot be expiated at all (1 S. 3:14; Isa. 47:11; cf. Jer. 18:23). Along with the other observations, the very restricted nature of the sacrificial system explains the reason that wrath is not in the immediate context of *kipper* in P. In these passages "expiation" is a correct translation.

The place of ritual atonement, however, must be further considered within the context of the covenant. Atonement is needed only for maintaining or restoring an established relationship that is endangered or broken. Sin violates the covenant law, with the result that the unfaithful party becomes subject to a series of curses (cf. Lev. 26). The OT explicitly understands that these curses do not take effect automatically, but become active only through the intervention of Yahweh. The OT also pictures God as slow to anger, but He will definitely execute His wrath against sin (Ps. 103:8f.). Whoever violates the covenant is to take advantage of God's mercy immediately upon awareness of his sin through the proper use of the cult. Through the action of *kipper* he gains forgiveness and is rendered acceptable to God (Lev. 1:4; 4:35; cf. Ps. 65:3 [MT 4]; 79:9).

In other passages *kipper* appears in the context of wrath. Ps. 78:38 (NEB) says, "Yet he wiped out [*kipper*] their guilt and did not smother his own natural affection; often he restrained his wrath and did not rouse his anger to its height." Wrath, not yet executed, is avoided by God's expiating iniquity and granting forgiveness (cf. Ps. 65:3 [MT 4]; 79:9). Thus atonement, instead of appeasing wrath, is normally structured to avert wrath. In addition, there are a few incidences where *kipper* appears in a context in which ignited wrath is appeased. When Moses intercedes for the Israelites who had committed idolatry through worshiping the golden calf, he hopes that his intercessory prayer will make atonement for or expiate their sins and remove God's wrath (Ex. 32:30). Another incident is recorded in Nu. 25:1-13. God was executing His anger through a plague against those who had yoked themselves to Baal-peor. His wrath ceased with the slaying of a guilty couple by Phinehas, a priest. Unquestionably God was propitiated. The text affirms that Phinehas made atonement or propitiation (*kipper*; v. 13) for the people of Israel. The word *kipper*, therefore, can mean "propitiate," and it certainly bears this idea as part of its wider meaning, even in P. In summary, S. R. Driver defines the scope of *kipper* as "*make . . . harmless* or *inoperative* . . . with the attached ideas of *reinstating in His favour, freeing from sin,* and *restoring to holiness*" (p. 131).

II. LXX.–The translation of the NT forms related to *hiláskomai* as "expiate" is based upon the LXX translation of the various passages regarding atonement. To translate *kipper* the LXX most frequently uses words related to *hiláskomai*, which in classical Greek definitely means "propitiate." The verb *kipper* is also translated by other words, including *hagiázō* ("sanctify," Ex. 29:36), *athōióō* ("absolve," Jer. 18:23), *apokathaírō* ("clear off," Prov. 16:6 [LXX 15:27]), *aphairéō* ("remove," Isa. 27:9; 28:18), *aphíēmi* ("cancel," "pardon," Isa. 22:14), *gínomai katharós* ("become clean," Isa. 1:16; 47:11), *ekkatharízō* ("cleanse," Dt. 32:43), *perikatharízō* ("cleanse all around," Dt. 30:6).

Forms related to *hiláskomai* render several other Hebrew words, e.g., *ḥiṭṭē'* ("purify from sin" or "uncleanness"), *pillēl* ("interpose," Ps. 106 [LXX 105]:30), *ḥillâ* ("appease"), *ḥālîlâ* ("far be it"), *niḥam*, niphal of *nāḥam* ("be compassionate"), and *sālaḥ* ("forgive"). (For complete lists see Nicole.)

C. H. Dodd takes this evidence and concludes, "The LXX translators did not regard *kipper* (when used as a religious term) as conveying the sense of propitiating the Deity, but the sense of performing an act whereby guilt or defilement is removed, and accordingly rendered it by *hiláskesthai* in this sense" (p. 93). Therefore he understands that the *hiláskomai* word-group in the LXX means "expiate" with a human subject and "be gracious toward," "forgive" with a divine subject (p. 88). He further discovers that the pagan ideas of "propitiation" are preempted from this Greek root, and it in turn is filled with the uniqueness of the Hebraic view of the deity, namely, a gracious, not an angry, Being, willing to show his mercy in forgiveness.

R. Nicole and L. Morris have clearly shown that Dodd overstates his case. It is true that the view of God's wrath is radically different from the wrath of the fickle Greek gods. But both testaments give abundant testimony to the fact of God's wrath. Certain passages also make it clear that the LXX translators still understood some element of propitiation in this word-group, e.g., by using *exiláskomai* to render *ḥillâ* ("appease") in Zec. 7:2; 8:22; Mal. 1:9; and *pillēl* ("mediate," "interpose") in Ps. 106 (LXX 105):30. In conclusion, these related words take on new force and convey more strongly expiation and forgiveness than in classical Greek, and yet to the translators they surely signified some element of propitiation.

III. NT.–In the NT, He. 2:17; 1 Jn. 2:2; 4:10 reflect the idea of P's use of *kipper*. In these passages, especially He. 2:17, Christ's death expiated the sins of the people. Once Christ had expiated sin He was in a position to reconcile mankind to God. Again, God initiated the means of atonement (1 Jn. 4:10; cf. 2 Cor. 5:19). Although the immediate thrust of the verb appears to be expiation, it also includes propitiation. 1 Jn. 2:1 clearly substantiates this interpretation. The believer is promised that Jesus Christ is his advocate to the Father. An advocate is needed only when enmity exists between the parties.

The use of *hilastḗrion* in Rom. 3:25 is more complex. Büchsel takes this word as having its background in the "mercy seat" over the ark of the covenant (Heb. *kappōreṯ*; in He. 9:5 it definitely refers to the mercy seat). Christ then is a superior mercy seat sprinkled with His own blood, fully exposed and accessible to the public. Conversely, L. Morris strongly argues that it is a neuter noun that signifies "the means of propitiation." The substitutionary work of Christ has averted God's wrath and established men into a new relationship with God (pp. 185f., 202). The main thrust of Rom. 3:25 is that God has secured the remission of sin for the one who has faith in Christ. Justification was obtained by *hilastḗrion*. Although wrath is not in the immediate context of Rom. 3:21-31, it is certainly in the larger context. Rom. 1–3 is a tightly argued passage. Chs. 1–2 explicitly argue that both Gentile and Jew are subject to God's wrath (cf. 1:18; 2:5). The only remedy for the guilty is Christ's expiatory work that secures the removal of God's wrath. As in the OT, atonement in the NT is achieved by expiation, which

results in propitiation. The difference in the NT is the superiority of the sacrifice and the priest, both of which are Jesus Christ.

In conclusion, sin is expiated by sacrifice, for that represents the basis of justice, life for life. Only by expiation is reconciliation possible. In pagan religion an irate god could be propitiated by a bribe or a gift. But no human means are available to propitiate Yahweh's wrath, as Isa. 47:11 clearly reveals. His wrath is fully rational and under His complete control (Jer. 30:23f.) True, He must execute it against sin unless expiation is made, but God decides when and how to accomplish proper judgment. In the meantime, He extends His mercy by providing the means of atonement. The thrust of atonement, however, centers on the cause of the wrath, not on the wrath itself. Since God, or His servant the priest, or Jesus Christ is the subject of "expiate," the emphasis is on the object of God's activity, namely the purging of sin and the cleansing of mankind. This explains why expiation is more central to *kipper* and *hiláskomai* than propitiation. As a result of expiation God is propitiated.

This emphasis on expiation reflects a strong scriptural view of sin. Sin once committed has profound effects on a person's relationship to God, to other people, to himself, and to nature. Expiation seeks to purge the enduring fact of its commitment, and it cleanses the person so that sin's hardening of the heart is ended. The process results in a renewed relationship with God, which has the potential of renewing all of mankind's other relationships. Too much emphasis on propitiation may overlook the seriousness of sin itself, and too much emphasis on expiation may ignore the importance of God's wrath. Since English is very inadequate in cultic language, the best translation for *kipper* and *hiláskomai* appears to be "atone" or "make atonement"; in that way both ideas, propitiation and expiation, are expressed.

Driver); *TDNT*, III, *s.v.* ἵλεως (Herrmann, Büchsel). J. E. HARTLEY

EXPLAIN [Heb. *bā'ar* (Dt. 1:5), *nāgaḏ* (Gen. 41:24; 1 K. 10:3; 2 Ch. 9:2; Est. 4:8), *bîn* (Isa. 28:9), *dāḇar* (Josh. 20:4); Aram. *ḥ"wâ* (Dnl. 5:12); Gk. *epilýō* (Mk. 4:34), *phrázō* (Mt. 13:36; 15:15), *ektíthēmi* (Acts 11:4), *dianoígō* (Acts 17:3), *hermēneúō* (He. 5:11)]; AV DECLARE, TELL, "make to understand," SHOW, EXPOUND, OPEN UP, UTTER; NEB also PROMULGATE, STATE, TELL, "make sense to," LAY BEFORE, EXPOUND.

"Explain" occurs in a wide variety of contexts: a man expressing feelings to a woman (Est. 4:8), a leader warning his followers (Dt. 1:5), refugees presenting their cases to city elders (Josh. 20:4), a prophet delving into something considered deeply important (Isa. 28:9), etc. Such broad usage suggests a verb of generalized intent, conveying the basic idea of "giving an account." In the one instance where "explain" occurs in direct parallel with another verb (*paratíthēmi*, Acts 17:3), it receives the particular coloring of "making plain or clear," "rendering intelligible."

See also EXPOUND. C. G. CHRISTIANS

EXPOUND [Gk. *ektíthēmi*] (Acts 18:26; 28:23); NEB also "dealt at length"; cf. Acts 11:4, RSV "explain." The sense of *ektíthēmi* is accurately conveyed by the English verb "expound"—to set forth vigorously a case in some detail. Thus the RSV is inconsistent in rendering Acts 11:4 with the weaker "explain." *See* EXPLAIN.

In all three NT passages, *ektíthēmi* involves a similar situation: a knowledgeable authority going to passionate length to inform a person or group about specific aspects of the gospel. In each case the subject (Peter, Aquila and Priscilla, or Paul) expounds on Christian truth with painstaking thoroughness. Acts 11:4-18 informatively provides the entire exposition and the reaction of the listeners: "When they heard this, they were silenced" (v. 18). The "expounding" was necessary as a corrective in Acts 18:26, and carries the overtone of persuasive urgency in 28:23. "To expound" suggests an extended one-way presentation in 11:4 and 18:26, though heated discussion erupted (at which point is unclear) while Paul was elaborating the truths of Christianity to the Jews in Rome (28:23).

C. G. CHRISTIANS

EXPRESS. In the AV of He. 1:3 "express" means "exactly resembling the original," as the impress of a seal resembles the figure engraved upon the seal. Thus "express image" is a good translation of Gk. *charaktḗr*, lit. "engraving" and hence "impression"; cf. RSV "very stamp."

EXTINCT [Heb. niphal of *zā'aḳ*–'extinguish']. In Job 17:1 "my days are extinct" implies that a state of existence is being brought to a close (cf. NEB "are numbered").

EXTORT; EXTORTION; EXTORTIONERS [Heb. *'āšaq*] (e.g., Ezk. 18:18); AV "cruelly oppress," "use oppression"; NEB "be guilty of oppression," "be bullies"; [*'ōšeq*] (Ps. 62:10 [MT 11]; Ezk. 22:12); AV also ROBBERY; [Gk. *harpagḗ*] (Mt. 23:25; Lk. 11:39); AV RAVENING; NEB GREED; [*hárpax*] (Lk. 18:11); NEB GREEDY. The RSV translates Heb. *'āš^{e}qû 'ōšeq* as "[they] have practiced extortion" in Ezk. 22:29 but as "[he] suffers extortion" in v. 7 (Targum; MT *'āśû* instead of *'āš^{e}qû*).

Extortion is the acquisition of another's money or property through deceit or force or under cover of office and is closely associated with robbery (cf. Ps. 62:10 [MT 11]). The poor and the alien are easy prey for the extortioner (Ezk. 22:7, 12, 29; cf. Zec. 7:10), so Israel's law seeks to protect them (cf. Ex. 22:21-24 [MT 20-23]). Consequently, righteousness stands in antithetical parallelism to extortion (NEB Isa. 33:15; cf. 54:14). Even if a person is legally right, he cannot be righteous and take advantage of another person for his own profit (cf. Am. 2:6-8; 4:1).

God strongly exhorts His people not to set their hearts on riches, especially when they increase (cf. Dt. 6:10-13). Material things are never to become the object of trust. But he who enjoys riches, with the freedom of life-style and power that they bring, often is enticed to search for greater wealth (cf. Eccl. 5:10 [MT 9]). The anxiety may lead one to attempt to increase wealth by inappropriate means, including extortion, and to forget that power belongs to God, not to the rich (Ps. 62:10f. [MT 11f.]).

The extortioner, too, suffers for his greedy practice. A proverb in Eccl. 7:7 says, "Surely oppression makes the wise man foolish." God's judgment against whoever practices this evil is death (Ezk. 18:18). Jerusalem, too, came under God's condemnation by taking advantage of its neighbors through interest and gain by extortion (Ezk. 22:7, 12; cf. Jer. 6:6).

Jesus condemns the scribes and Pharisees for falling into this evil; they "cleanse the outside of the cup and of the plate, but inside they are full of extortion and rapacity" (Mt. 23:25). Paul unequivocally asserts that extortioners will not have a part in the kingdom of God (1 Cor. 6:10, AV). Therefore whoever wishes to walk in God's way

personally avoids extortion, resists it at all levels, and seeks to help its victims.

J. E. HARTLEY

EYE. In the OT the word "eye" generally renders Heb. *'ayin*; there are, however, a few exceptions, e.g., *pānîm* ("face") in Ex. 20:20, *nāḇaṭ* ("look at," "obey") in Ps. 119:6, 15. In the NT the usual term is Gk. *ophthalmós*; some exceptions here are *ómma* ("eye") in Mk. 8:23 and, for "eye" of a needle, *trýpēma* ("hole," "that which is bored") in Mt. 19:24 and *trymaliá* ("hole") in Mk. 10:25 par. Lk. 18:25.

"Eye" usually occurs in Scripture in the literal sense of the physical organ of sight, one of the chief channels of information for humans. David is described as having beautiful eyes (1 S. 16:12), and in Canticles the lovers describe each other as having eyes like doves or pools (1:15; 4:1; 5:12; 7:4). Leah had "weak" eyes (Gen. 29:17), although the meaning of Heb. *raḵ* may be "delicate, tender" (cf. AV; *CHAL*, p. 339).

A cruel custom among heathen nations sanctioned the gouging out of the eyes of an enemy or rival because his power was thereby most effectively shattered (Jgs. 16:21; 2 K. 25:7; Jer. 39:7). Such blinding or putting out of the "right eye" was also considered a deep humiliation, as it robbed the victim of his beauty and made him unfit for military service (1 S. 11:2; Zec. 11:17).

The Israelites were instructed by Moses that, in the execution of Yahweh's judgment upon the nations (Dt. 7:16) and upon wrongdoers (19:13, 21; 25:12), their "eye shall not pity," i.e., be deflected from the dictates of God's law by feelings of sympathy. Similarly, Yahweh warned through His prophet Ezekiel (5:11; etc.) that "my eye will not spare, and I will have no pity." The *lex talionis* demanded "life for life, eye for eye, tooth for tooth, hand for hand, foot for foot" (Ex. 21:23-25; Lev. 24:20; Dt. 19:21).

The Bible also uses "eye" in several figurative senses, which illustrate the intimate relationship in Hebrew thought between spiritual and physical realities. Brightness of eyes is a sign of well-being (Ps. 38:10 [MT 11]; cf. 1 S. 14:27; Ps. 19:8 [MT 9]), while dimness of eyes signifies a lack of well-being (Dt. 28:65; Job 17:7; Ps. 69:3 [MT 4]; Lam. 5:17). The eye provides a concrete medium of expression for a variety of emotions or mental attitudes. The eyes may waste away with grief, or pour down tears (Ps. 6:7 [MT 8]; 31:9 [MT 10]; 88:9 [MT 10]; 119:136; Lam. 1:16; 2:11; 3:48f.). They can express mockery or hatred (Job 16:9; Ps. 35:19; Prov. 6:13; 10:10; 16:30; 30:17), haughtiness (Ps. 18:27 [MT 28]; Prov. 6:17; 21:4; 30:13), generosity (Prov. 22:9; cf. Mt. 6:22), pity (Dt. 7:16; 13:8; 19:13, 21; 25:12; etc.), greed (1 S. 2:29, 32), desire or lust (Ps. 73:7; Prov. 17:24; 27:20; Eccl. 2:10; 4:8; Ezk. 6:9; 2 Pet. 2:14; 1 Jn. 2:16; cf. Mt. 5:29), etc. To "lift up the eyes" (e.g., Gen. 13:10, 14; 18:2; 22:4, 13; 24:63f.) means to look around for information and often for help; to "close the eyes" or "hide the eyes" indicates carelessness or lack of sympathy (e.g., Prov. 28:27; Mt. 13:15); to "set eyes upon" (e.g., Gen. 44:21; Ezk. 20:24) or "fix eyes upon" (e.g., Ps. 119:6, 15; Lk. 4:20) is to turn attention to someone or something. *See also* EVIL EYE.

Often the eye represents the total process of perception and understanding (e.g., Gen. 3:5, 7). The eyes as organs of spiritual perception may be enlightened or opened (e.g., Ps. 119:18); this act is accomplished by the law of God (19:8) or by the Spirit of God (Eph. 1:18); or they may be "darkened" or "blinded" (Lk. 24:16; cf. Mt. 13:13; 2 Cor. 4:4). The psalmist ridicules the idols of the nations, for "they have eyes, but they see not" (135:16). Similar words are used by the prophet Isaiah, who is commanded to "make the heart of this people fat, and their ears heavy, and shut [Heb. hiphil of *šā'a'*, "smear," "stick shut"] their eyes; lest they see with their eyes, and hear with their ears, and understand with their hearts, and turn and be healed" (6:10). The message is one of doom: since they have refused to respond to God's word, let them now persist in their insensitivity (v. 9). Isaiah is commanded to preach to them so that their hearts will become hardened and eventually they will become blind and deaf to God, incapable of responding to His message. Thus their sin becomes their punishment (*see also* HARDEN). The same charge of insensitivity to God's message and deeds is brought against the people of God in Dt. 29:4 and Jer. 5:21. Jesus Himself quotes this Isaiah passage (Mt. 13:13f.; Mk. 4:12) with reference to those in His day who would not respond to His divine message (cf. Mk. 8:18; Acts 28:26f.; Rom. 11:8).

All-seeing "eye idols" from the temple area of Tell Brak, Syria. The temple may have originally contained 20,000 or more of these idols (Trustees of the British Museum)

The OT frequently attributes eyes to God as a figurative expression of His omniscience (e.g., Job 28:10; Ps. 139:16; Prov. 15:3; cf. He. 4:13) and His watchfulness and loving care (e.g., Jgs. 18:6; Ezr. 5:5; Ps. 33:18; cf. 1 Pet. 3:12). Similarly, in the NT the seven eyes of the Lamb (Rev. 5:6) and the many eyes of the four living creatures (4:6; cf. Ezk. 1:18; 10:12) describe His unceasing watchfulness.

A common phrase in the OT (occurring only twice in the NT, Mt. 21:42; Mk. 12:11) is "in the eyes of" ("find favor in the eyes of," etc.), generally meaning "according to the judgment of" (e.g., Gen. 6:8; 20:16; 50:4; Ex. 15:26). To do "what is right in one's own eyes" is usually to do wrong, the expression denoting a stubborn unwillingness to heed the will of God (e.g., Dt. 12:8; Jgs. 17:6; 21:25). The righteous kings of Israel were those who did "what was right in the eyes of the Lord," as, e.g., King David (1 K. 15:5, 11; 2 K. 14:3; etc.).

EYE PAINT. *See* EYELIDS; KEREN-HAPPUCH; PAINT.

EYELIDS [Heb. *'ap'appayim*, *'ayin* (Ps. 77:4 [MT 5])]; AV also DAWNING (Job 3:9), EYES (Ps. 77:4); NEB also EYE(S), SHIMMER, etc. Eyes and eyelids in Hebrew are sometimes used synonymously, as in the parallelism of Prov. 4:25 (cf. 6:4; 30:13; Job 41:18; Ps. 11:4; Jer. 9:18 [MT 17]). Paint was frequently applied to the eyes and lids in antiquity, partly for hygienic — but also for cosmetic — purposes.

KoB (p. 723) suggests as a better translation "beams, glare, glance, beaming eyes"; cf. Job 3:9; 41:18 (MT 10).

EYES, BLINDING OF THE. *See* EYE.

EYES, DISEASES OF THE. *See* BLINDNESS; DISEASE III.G; IV.C.

EYES, TENDER. *See* BLINDNESS.

EYESALVE (Rev. 3:18, AV). *See* SALVE.

EYESERVICE [Gk. *opthalmodouleía*]. A term coined by Paul to describe the conduct of slaves who work only when they are being watched. Their motive, therefore, is not fidelity to duty but the desire to avoid punishment or to gain reward from their masters (Eph. 6:6; Col. 3:22).

EYEWITNESS [Gk. *autóptēs*] (Lk. 1:2); [*epóptēs*] (2 Pet. 1:16); NEB also "saw with our own eyes."

Luke in his famous prologue speaks of the gospel materials as having been delivered by eyewitnesses to those who wrote down these accounts. He apparently does not know of any written accounts by these eyewitnesses themselves (cf. 2 Pet. 1:16). But those who in fact wrote down the various accounts with which Luke was familiar did so using the reports of the eyewitnesses (cf. He. 2:3). These traditions were handed down during the oral period by the eyewitnesses and ministers of the word, who served as the normative bearers of the tradition (cf. Eusebius *HE* iii.39).

The early Church greatly esteemed and valued the testimony of the eyewitnesses. The first official act of the Church was to select a replacement among the Twelve for Judas, with the one condition that the individual be an eyewitness of Jesus' life from His baptism to His resurrection (Acts 1:21f.). Further evidence that the testimony of the eyewitnesses was highly esteemed in the early Church is found in Acts 4:20; 10:39; 1 Cor. 15:6; Jn. 19:35; 21:24; 1 Jn. 1:1-3; 1 Pet. 5:1; and 2 Pet. 1:16. Some form critics have sought to minimize the importance of these eyewitnesses in the life of the early Church, arguing that the NT references are not as simple or straightforward as they first appear and that the early Church was more concerned with charismatic leadership than with a centrally organized collegium of eyewitnesses located in Jerusalem. This argument has brought Taylor's well-deserved comment (p. 41) that in the eyes of some form critics "the disciples must have been translated immediately after the resurrection." Luke clearly states that during this period of oral tradition it was the eyewitnesses who passed on the gospel traditions, thus witnessing to what they had seen with their own eyes, heard, and handled concerning the Word of Life.

I. Prophet's Name.–Ezekiel's name (identical with that of JEHEZKEL) may be interpreted variously. The book suggests three meanings: (1) 'God is strong, prevails" — at his call, Yahweh's hand was "strong" upon him (3:14), overwhelming him with a sense of divine presence and commission; (2) "God makes strong" — hence God "will strengthen the arms of the king of Babylon" (30:25) and "strengthen the weak" of His own flock (34:16); (3) "God makes hard" — therefore He will make Ezekiel every whit as "hard-headed" as his opponents, so that unflinchingly he will proclaim God's word to them (3:8f.).

II. History of Criticism.–The book has been exposed to many serious challenges to its unity and authenticity for over fifty years. Even the locale of the prophet, his sanity, and his authorship of prose in the book have all been questioned. Yet serious criticism was not anticipated at the close of the last century, and had only modest beginings at the opening of the 20th century. The general viewpoint at the end of the 19th cent. was summed up by S. R. Driver (p. 261, 1891 ed. [= p. 279, 1956 ed.]): "No critical question arises in connection with the authorship of the Book, the whole from beginning to end bearing unmistakably the stamp of a single mind."

Yet scholars have observed numerous repetitions, doublets and illogical breaks in the text. In 1900 R. Kraetzschmar suggested that these were the consequence of late editorial combining of two different recensions of the text, one of which was in the first person, the other in the third person (cf. 24:24).

In 1908 and 1924, J. Herrmann endorsed Kraetzschmar's theory that Ezekiel is an edited work incorporating dual recensions; but these were not distinguished by differences of person. He insisted that Ezekiel, as his own editor, added dates to a number of oracles; but the prophet gave primary consideration to homiletical and topical arrangement, so that some passages are out of chronological order, and not a few duplicate passages are to be found. In his final editing, he expanded and reinterpreted some of his earlier oracles. Although nearly all the book is by Ezekiel, there are evidences of later editorial activity.

G. Hölscher made a radically new approach in 1924, arguing that the authentic writing by Ezekiel was to be confined to a small poetic nucleus, all of it composed in the 3+2 rhythm characteristic of *qînâ*, or dirge (*see* POETRY, HEBREW II). He omitted some oracles because they seemed to imply the prophet's presence in Palestine. He retained as authentic only fifteen short poetic oracles and a few brief prose statements necessary for locating the prophet geographically and historically, keeping in whole or in part only 170 verses out of a total of 1273. He held that the book received its final and fullest redaction sometime after the rebuilding of the temple and before the time of Nehemiah (*ca.* 500-450 B.C.).

Hölscher's view was to most scholars far too radical, especially to W. Kessler and R. Kittel, who attributed both prosaic and poetic oracles to the prophet. Yet even Kittel felt a certain discordance between the prophet's Babylonian locale and his preoccupation with Palestine, and between his priestly and his prophetic concerns — which he reconciled by asserting that Ezekiel had "two souls in one breast" (p. 146).

In 1930 C. C. Torrey published the most radical view of Ezekiel. According to him the prophecy is a late pseudepigraphon composed *ca.* 230 B.C. It consists of an imaginary prophecy by one of the unnamed prophets of Manasseh's reign (2 K. 21:10), *ca.* 692-639 B.C. As the book was originally written, this prophet was a Palestinian; and his oracles were dated to the reign of Manasseh, who alone of the last kings of Judah ruled as long as thirty years (Ezk. 1:1). Torrey's assumption that the Deuteronomic reform carried out by King Josiah was permanent prevented him from placing the beginning of Ezekiel's ministry as late as the reign of Zedekiah, for Ezekiel constantly denounces practices abolished by Josiah. Soon after its composition the book was edited into an apology for the Jewish temple and cult as opposed to the Samaritan. It is this editing that altered the time and place of the prophet's ministry.

Also in 1930, James Smith set forth views of Ezekiel similar to those of C. C. Torrey, except that for Smith the prophet was a historical figure living in the area of the former northern kingdom of Israel. Late in his career, he may have visited exiles from that kingdom in Assyria.

G. R. Berry, in a review of C. C. Torrey, at once argued that the Palestinian locale of Ezekiel was correct, but that his oracles are to be dated from the fifth year of King Jehoiachin's captivity (1:2), which is likewise the fifth year of Zedekiah's reign. The authentic oracles are messages of doom for Judah; all the other materials (promises of restoration, oracles against foreign peoples, and apocalyptic materials [chs. 38–39]) are later additions. The whole book was subject to a revision in the middle of the 3rd cent. B.C., to which Berry attributed most of the legal and priestly materials as well as the Babylonian locale.

Torrey's views provoked strong rebuttals from other American scholars such as Shalom Spiegel and W. F. Albright, who continued to argue for the traditional understanding of Ezekiel. Yet eventually Spiegel conceded (*JBL*, 54 [1935], 145-171) that some passages were addressed to Hebrews living in Palestine, not to Babylonian exiles. He suggested that Ezekiel prophesied in Judah late in the reign of King Jehoiakim, or even as late as the fourth year of Zedekiah's reign; but shortly thereafter he went to the exiles in Chaldea (1:2f.). In this Spiegel was anticipated by Oesterley and Robinson in 1934 (pp. 328f.).

In 1932, V. Herntrich espoused a view of Ezekiel similar to Berry's. He was the first to support the theory of the Palestinian locale by a detailed critical analysis of the whole book. He postulated an exilic redaction at about the time that traditional scholarship supposed that Ezekiel had edited his own book. This redaction was responsible for the following: the throne vision of ch. 1, the exilic frame of the prophet's call in chs. 2–3, the visionary framework of chs. 8–11, the interpolation of chs. 9–10, the Babylonian setting of the account of the refugee (33:21f.), the sacerdotal program of chs. 40–48, and numerous minor interpolations. Many passages are of doubtful origin, especially oracles against foreign nations. Instead of finding a solution to the problems of the book in the dual personality of the author (as Kittel had done), he attributed the book to two distinct sources: Ezekiel himself in Palestine, and a priestly redactor of the Babylonian captivity.

J. B. Harford, in 1935, rebutted the views of James Smith (who had assigned the prophet to the northern kingdom of Israel) by a careful study of the expression "house of Israel." Its primary reference, according to him, was to Judah and Jerusalem rather than to Israel and Samaria — and Ezekiel was a Judean prophet.

In 1936 A. Bertholet assigned the prophet two ministries — the first in Palestine, after his vision of the scroll (Ezk. 2:9–3:3), the second in Chaldea, following his vision of Yahweh on the throne chariot (ch. 1). The former is to be dated to the fifth year of Jehoiachin's captivity, according to 1:2 (593 B.C.); but the latter to the thirteenth year (his emendation of the thirtieth year of 1:1), i.e., 585 B.C. Between these two ministries was a brief transitional ministry outside Jerusalem, where he withdrew shortly before the fall of Jerusalem (the "another place" of 12:3), and where he remained until he received news of Jerusalem's fall (33:21).

I. G. Matthews, in 1939, espoused views similar to those of Herntrich, but he allowed that Ezekiel may have written some of the hopeful materials, especially the promises for spiritual renewal, whereas materialistic hopes, sacerdotal promises, and eschatological materials were probably from a later, postexilic editing, between 520 and 500 B.C.

In the same year O. R. Fischer completed his Boston University thesis, which became the basis of the views of R. H. Pfeiffer. Like Bertholet, he divided the ministry of Ezekiel between Palestine and Babylon; but the vision that sent him on his Palestinian mission was received in Babylon, and the vision that launched his Babylonian ministry was received in Judah. The prophet traveled back and forth between the two areas. The exaggerated language of 8:3 was Ezekiel's way of describing inspired travel on foot. The whole book was basically authentic, except for the apocalyptic section (chs. 38–39).

W. A. Irwin picked up another thread of criticism, namely Hölscher's concern for an originally poetic author. Freed from the presuppositions that Ezekiel's meter needed to be uniform and that Ezekiel must have been in

the Exile, Irwin reconstructed more authentic poetry — yet not very much more. In his book of 1943 he denigrated Hölscher's work of reconstruction as "pure subjectivism" (p. 12); and, despite his own attempt at an inductive method, most reviewers have passed a similar judgment upon Irwin's limited restorations.

Recognition of Ezekiel as a Palestinian prophet became widespread. P. Auvray (1948), H. W. Robinson (1948), J. Steinmann (1953), and H. G. May (1956) divided the prophet's ministry between Judah and Chaldea. Erratic views which locate Ezekiel in Palestine, but in a late postexilic period, are those of N. Messel (1945) and L. E. Browne (1952) — the former dating the prophet to *ca.* 400 B.C., the latter in the next century, in the time of Alexander the Great. Torrey's view of the book as a late pseudepigraph was endorsed by A. van den Born (1947), who, however, dated the composition to the earlier period of Ezra and Nehemiah. In 1951 O. Eissfeldt reported: "The majority of scholars would restrict Ezekiel's share in his book to a minimum, and represent him as prophesying either solely or additionally in Jerusalem" (p. 153).

Yet some continued to defend the traditional view of Ezekiel, while having to deal with the problem that this poses for the prophet's personality. Thus G. A. Cooke defended the supposed absurdity of "a prophet in Babylonia hurling his denunciations at the inhabitants of Jerusalem across 700 miles of desert" (p. xxiii) by averring (p. xxiv) that "to a man of Ezekiel's temperament the unseen was more vividly present than the seen." Kittel's idea of Ezekiel's schizophrenia was developed to absurd lengths by E. C. Broome, and G. Widengren interpreted Ezekiel in the light of parapsychic experiences.

A new trend in criticism began with the publication of the dissertation of C. G. Howie (1950). He argued strenuously for the prophet's exilic locale. He placed great weight upon archeological indications of Ezekiel's Babylonian milieu, citing such data as the imagery of the vision in ch. 1, the ceramic map of 4:1, and Ezekiel's digging through a sun-dried clay brick wall (12:5). In the hill country of Judea at that time only stone walls were used. If 8:8 seems to indicate an exception, one must remember that Ezekiel's tour was in vision only and need not be historical. Even the report of the death of Pelatiah in Jerusalem under the impact of the prophet's preaching (11:13) is to be explained as an embellishment based upon an oral report reaching the prophet at a later time. Ezekiel did not need to be present in Jerusalem to denounce it, since, as in oracles against foreign nations, the prophet could hurl his anathemas from afar. Then, too, as Jer. 29 proves, travel and correspondence between Babylon and Jerusalem continued, so that indirectly the Judeans could learn of Ezekiel's prophecies. He explained the relevance of the prophet's proclamations of doom for Judah as one of disabusing the exiles of any idea of their early return from captivity.

In his 1952 discussion of the chief problems of Ezekiel G. Fohrer stressed the book's theological aspects, which in his view both added to the relevance of the prophet's message for the exiles and reinforced the substantial unity of the book. Yet his analysis stresses complexity in literary development.

In the wake of Howie and Fohrer, most scholars have acceded to the Babylonian locale and to the basic unity of the book, with the authenticity of only a few passages being questioned. This view gives a much larger place to the contributions of disciples and editors than the earliest criticism. Still the result is a modified traditional view, championed by such scholars as W. Zimmerli, W. Eichrodt, and J. W. Wevers, whose commentaries are standard reference works. P. Auvray and W. H. Brownlee have continued to uphold the Palestinian locale.

III. Locale of the Prophet. *–A. Problems with Babylonian Locale.* The issues raised by the study of the book show the need to weigh the evidence for the prophet's locale. The difficulties that the book presents for the Babylonian locale of the prophet are as follows.

(1) "The house of Israel" is used everywhere before the fall of Jerusalem (587 B.C.) for the Judean kingdom, except where it is necessary to distinguish the northern kingdom from the southern. Twice, in order to include the exiles, the book speaks of "the whole house of Israel" (11:15; 37:11). When the exiles alone are in view, after 587, "house of Israel" can designate them (36:16-20).

(2) The address of Ezekiel's sermons to Judah and Jerusalem indicates more than apostrophe, for he must "*make known* to Jerusalem her abominations" (16:2; 22:2). The promises of restoration (11:17-20; 20:41-44; 34:11-31; 36–37) are addressed to Jews scattered in many lands, not specifically to Babylonian exiles.

(3) His implied presence in Palestine is pervasive, though sometimes subtle, as in calls to repentance in order to avert ruin and death (3:17-21; 18; 33:1-20). He is said to "dwell in the midst of a rebellious house" (12:2), which he is to warn of coming exile. In ch. 8 he witnesses the abominations practiced in the temple and discovers seventy elders in secret conclave, of whom he recognizes one. In ch. 11, he visits the east gate of the temple, where he finds twenty-five men in secret counsel, two of whom he knows by name. He accuses them of murder, and Pelatiah the son of Benaiah drops dead.

(4) He has intimate acquaintance with the moral, political, and military conditions in Judah. He even addresses the sentiments of the people in Palestine, answering them directly (11:15; 12:21-28; 20:32; 33:23-29). His oracles often echo themes in Jeremiah, which is natural if both men were in Judah.

(5) No distinctive information about the Babylonian exiles is given. Only upon the assumption that he is among them may one infer a little about the exiles. Since he had a house (Ezk. 3:24; 8:1) and a wife (24:15-18), one supposes that they followed Jeremiah's advice and built houses and married (Jer. 29:5f.). Since elders of Judah (Ezk. 8:1) and Israel (14:1; 20:1) visit him, some have inferred that the exiles had worked out their own social organizations; but others think these elders came to him from Palestine. Since false prophets in the Exile were predicting their early return to Judah (Jer. 29), some have interpreted his prophecies of further ruin for Judah as an indirect reply to them; but Ezekiel never mentions this hope of the exiles. Where Ezekiel addresses the moods and sayings of his auditors (e.g., 18:2; 33:10), the statements are just as appropriate for people in the motherland (Jer. 31:29f.). A late editor may have known of a Jewish settlement in Chaldea at Tel-abib by the river Chebar (1:1; 3:15); but this place, as will be seen below, may be Palestinian.

(6) Apostrophe would be insufficient to accomplish the prophetic mission. Some have argued that the magical power of the spoken prophecies was sufficient to bring doom upon Judah; but the mission of the prophet was one of warning the people so that they would repent and avoid ruin. The urgency of warning every soul (33:1-9) would not be satisfied by his reliance upon rumor to carry his message to Palestine. Josephus (*Ant.* x.7.2 [106]) suggested that Ezekiel wrote letters, but these are never mentioned in the biblical text.

(7) The supposed miraculous or visionary transport of the prophet to Jerusalem (8:3) supports the contention that his personality was abnormal. It is sometimes claimed

that he was so unhappy in the Exile that he escaped into imaginary flights. Thus by mental telepathy he saw Pelatiah die in Jerusalem (11:13). His alleged schizophrenia is supported by 4:4-8, where he is supposed to lie 390 days (190 in the LXX) on his left side without turning, and then to lie another forty days on his right side without shifting. This feat is so extraordinary that it has been interpreted as evidence for catalepsy, which is not an organic disease, but a symptom of aggravated schizophrenia. In brief trances of this kind, during which one may see visions, a few minutes may seem like days.

B. Varied Solutions. Varied solutions to the problem of locale have been noted (see II above).

(1) The prophet's unusual (if not abnormal) personality was capable of embracing a wide variety of literature and outlook. It is not necessary, therefore, to say that the moral and poetic prophet could not compose a program of restoration in prose (chs. 40–48).

(2) Through telepathic powers he knew the exact date that Nebuchadrezzar laid siege to Jerusalem (24:1f.) and witnessed events in the temple (chs. 8–11).

(3) He was not really preaching to Jerusalem (despite 16:2; 22:2; etc.), but to the exiles in Chaldea, seeking to disabuse them of their false hopes.

(4) Ezekiel was either solely or initially a Palestinian prophet, but later editing has confused the issue.

(5) Ezekiel's original messages were often poetic, and their careful reconstruction often brings into stronger focus the implied Palestinian locale of his announcements of doom for Judah.

The present author believes that there is some truth in (1), using the word "unusual," but not "abnormal." He sees no need to resort to (2), since numerous texts either imply or state the prophet's presence in Judah. Solution (3) is an improbable rationalization. Solution (4) is fundamentally the correct solution, but it is important to understand how and why the editing was achieved. Solution (5) contains much truth; perhaps half of the book was composed in poetry; but poetic reconstructions are too long to be undertaken here. Both Hölscher and Irwin pointed the way, but they failed to grasp the wide stylistic range of the poet and the basic genuineness of most of the book, including prose materials such as chs. 1, 8–11, and 40–48. Though glosses, textual corruptions, and interpolations seem to be more common than in the other prophets, most of the book is authentic. Most of the literary problems arise from conflations (interweaving) of originally separate oracles or of different versions of the same oracle that the prophet preached in different periods of his career.

C. Ezekiel at Gilgal. 1. Gôlâ (Exile) = Gilgal. The varied spellings of GILGAL, together with the geographic requirements of the book, suggest that references to the *gôlâ* ("exile") conceal original mentions of Gilgal, Ezekiel's hometown. In the original consonantal spelling, "to [or at] Gilgal" was written *hglglh*, whereas "the exile" was written *hglh* (or *hgwlh*). The former could easily be reduced to the latter, either through scribal error or through editorial verbal play (discussed below). Very suggestive here is a peculiar spelling of Gilgal as *Golgol* in the LXX of Dt. 11:30; from this pronunciation one would get the Hebrew of "to Gilgal" in expansive spelling as *haggôlgôlâ*, which compares closely with *haggôlâ* ("the exile"). An ending that was originally locative (*h* or *â*) may in popular usage have become accepted as part of the name (cf. Josh. 5:9, LXX: "He called the name of that place *Galgala*"). Other dialectical forms of the name are possible, such as *haggalgôlâ* and *haggalgûlâ*.

2. Gilgal near Jericho. The Gilgal located NE of Jericho satisfies the geographical requirements. (On identification of the town see J. Muilenburg, *BASOR*, 140 [Dec. 1955], 11-33; B. M. Bennett, *PEQ*, 1973, pp. 111-122; G. Landes, *Report on Archaeological Work at Suwwanet eth-Thaniya, Tananir, and Khirbet Minha (Munhata)* [*BASOR Supp. Studies*, 21, 1975], pp. 1-24.) It is situated near a plain (3:22f.) and close enough to Jerusalem that a fugitive could bring Ezekiel news of the city's destruction in one night's downhill flight (24:25-27; 33:22). The area was watered by three copious springs ('Ain ed-Dûq, 'Ain en-Nu'eima and 'Ain Dajani) that once made of the Wâdī en-Nu'eima in this area a perpetual river (Heb. *nāhār*), whereas later irrigation control that removed the water from the river bed has made of it a dry wadi (Heb. *naḥal*) most of the year. However little or much the flow of water from these springs was controlled in Ezekiel's time, the abundant water supply can explain the reference to his vineyard in 19:10: "Your mother was like a vine of *your vineyard* [so to be read], planted beside the water."

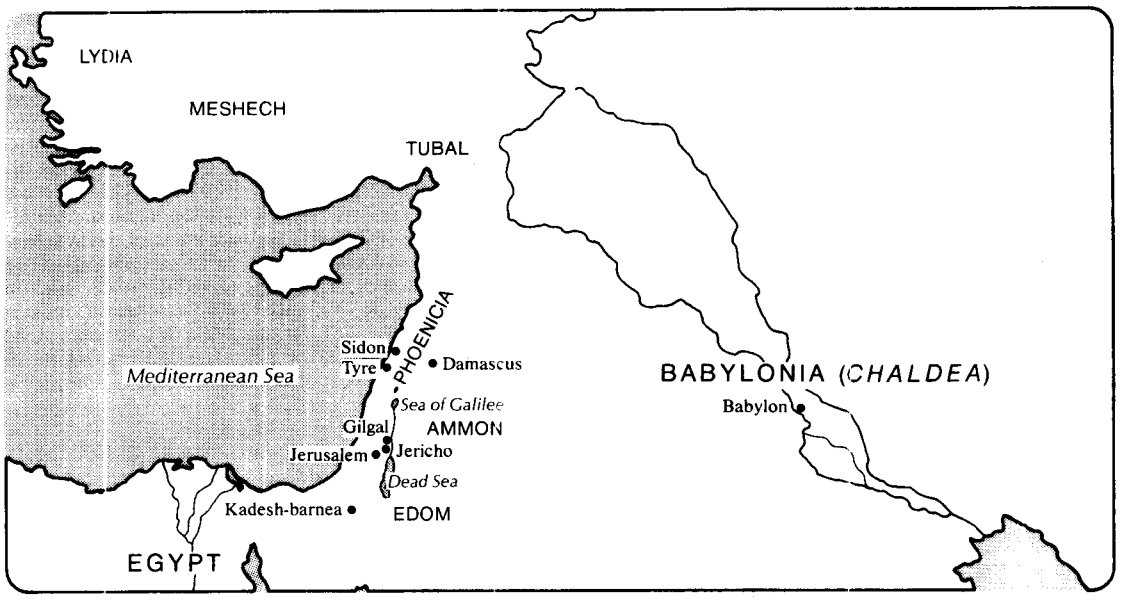
References to Tel-abib and the river Chebar (1:3; 3:15; 10:20-22; 43:3) are so few and nonessential to the understanding of the book that some have found it reasonable to explain them as interpolations based upon traditional data concerning known circumstances of the exiles in Babylon. Of the three named tells in the OT, the two not mentioned in Ezk. 3:15, Tel-melah and Tel-harsha (Ezr. 2:59 par. Neh. 7:61), are places from which exiles returned to Judah. Tel-abib as a place of Jewish settlement in Babylonia would provide us with a triple strand difficult to break. Some Mesopotamian towns with the prefix tēl (Bab. *til*) were not settled by Jews, e.g., Til-Turahi (*ANET*, pp. 278f.) and Til-Zibar (Albright, pp. 100f.). The inference that Tel-abib was a Babylonian site may be reinforced by the observation that ancient ruins throughout Mesopotamia were often termed examples of *til-abūbi* ("mound of the flood"), a ruin so old that people believed that it was a city destroyed by the great Flood. It may even be that before Tel-melah and Tel-harsha were settled by the Jews, they also were classified as examples of the *til-abūbi*. Assuming that Jewish exiles settled at one such site, they may have punned this popular designation as *Tēl-'ābîb*, "mound of young barley heads." For a river named Chebar, one refers to the Babylonian canal *Nāru Kabari* ("big canal"), whose existence is attested in the 5th cent. B.C. Perhaps Tel-abib was near this canal.

The question now arises, however, whether this speculative position should be replaced by another speculation; for Gilgal seems to have consisted of several small, neighboring settlements that bordered the Wâdī en-Nuwei'meh. One may suggest, but not prove, that one of these was specified by the Hebrew name Tel-abib (*tēl 'ābîb*), or simply *'Ābîb*, and that the Wâdī en-Nu'eima was then called the river Chebar (*nᵉhar kᵉbār*). For the sake of comparison one may note that another nearby wadi, the Wâdī Kelt, is known popularly in the area as *Wâdī Kabîr* ("big wadi").

Constructions in the area have always been made of sun-dried clay bricks, and excellent examples from the time of Ezekiel have been found (cf. 12:5, 7).

3. The Plain of Ezekiel's Visions. This is possibly "the plain of Jericho" (Dt. 34:3), at the edge of which Gilgal is situated. This makes vivid his going forth into the "valley" or "plain" (3:22f.; 37:1). There one could get an unobstructed view of any storm sweeping down from the north (1:4).

This is also a suitable location for the enacted pantomime of 21:18-23 (MT 23-28). The prophet is to go to an intersection and set up signs, one reading "To Rabbah" and the other "To Jerusalem." Several places in the lower Jordan Valley would be appropriate for such an action.



The bones of fallen warriors that Ezekiel in his old age saw in the plain (37:1-14) could be the remains of Zedekiah's army, which was defeated and dispersed there in July, 587 (2 K. 25:3-21; Ezk. 12:10-20). Herodotus (iii.12) has described a similar battlefield.

4. Religious Importance of Gilgal. The Gilgal near Jericho was important for the religious traditions that may have influenced Ezekiel. It figures in the story of conquest under Joshua, and remained an important center for national rallies and religious pilgrimages in later history. The priestly laws of Ezk. 40–48, which cannot all be reconciled with the priestly legislation of the Pentateuch, may stem from the traditions of this Gilgal. Elijah and Elisha established a school of prophets at Jericho and Gilgal (2 K. 2:5; 4:38). Even if this one were a different Gilgal, Jericho was so near Ezekiel's residence that any continuing influence of these "sons of the prophets" would be felt at the neighboring Gilgal.

5. Gilgal and Exile. The word *haggôlâ* is probably not the only corruption of the text. It is easy enough to explain "in the land of the Chaldeans" at 1:3 as a simple interpolation; but this may interpret an original "in Gilgal" (cf. 1:1) and be intended as a stylistic variation from the preceding *haggôlâ*. Similarly, at 11:24, the prophet possibly wrote: "And the Spirit lifted me up and brought me eastward [*qāḏîmâ*] to Gilgal." If so, this was revised to read: "and the Spirit lifted me up and brought me *in the vision by the Spirit of God into Chaldea* [*Kaśdîmâ*] *to the exiles.*"

The original reference to Gilgal in 11:24 is supported by the punning prophecy of Gilgal's imminent exile in the immediately following passage (12:1-9, 11). Such a pun is as ancient as Am. 5:5: "Gilgal [*hglgl*] shall surely go into exile [*glh yglh*]." The symbolic pantomime of digging through the wall at night does not represent captivity, but secret flight. This is an example of what the Qumrân commentary on Nahum calls "exile from fear of the enemy" (4QpNah 2:5). The case of Zedekiah (12:10, 12f.) is no exception, since before his capture he too was a fugitive. It is with the scattering of the people from the land, not with the captivity, that the prophet was constantly concerned (5:12; 11:16f.; 17:21; 20:34, 41; 28:25; 34:12; 36:19). Verses 6:8f. are exceptional in linking exile with captivity. Excavations at Gilgal (as also at nearby OT Jericho) reveal that all the constructions there were of a good quality of sun-dried clay bricks, which are the kind through which Ezekiel could dig.

D. Ezekiel in the Diaspora. 1. Idiom of Dispatch. An overlooked idiom in Ezekiel is "Set your face toward [place name, or personal name], and prophesy against [person or place], and say, 'Thus says Yahweh.'" In the literature of ancient Ugarit, whenever a god dispatches a messenger, he is told to set his face toward such and such divine person or place and to deliver such and such a message from the god sending him. This command is followed by a report of compliance, relating how the messenger actually went and delivered the message. (See J. C. L. Gibson, *Canaanite Myths and Legends* [2nd ed. 1978], e.g., Palace of Baal, 3F:vi:12ff. [p. 55]; Keret, 14: vi:301ff. [p. 90]; cf. also Gen. 31:21; Nu. 24:1; 2 K. 12:17; Jer. 44:12; Dnl. 11:17; Lk. 9:51.)

The same language occurs frequently in Ezekiel, but without the report of compliance, which may have seemed redundant. Thus the prophet does not often record his obedience in connection with symbolic actions (e.g., 4:1–5:4; 6:11; 12:17f.; 21:12-14, 18-20 [MT 17-19, 23-25]).

2. Messenger to the Nations. Interpreting the "set your face" passages as the language of dispatch (except for 4:7, where the Hebrew is different) makes Ezekiel visit "the mountains of Israel" (6:2), southern Judah (20:45f. [MT 21:1f.]), and Jerusalem (21:2 [MT 7]), and it also sends him home to rebuke the false prophetesses (13:17). More dramatically, it sends him forth into neighboring nations: Ammon (25:2), Phoenicia (28:21), Egypt (29:2), and Edom (35:2). Many scholars have noted Ezekiel's remarkable familiarity with Tyre: its island location, its resemblance to a ship, its seafaring, its commerce, and its mythology (26–28). Hence they have suggested his presence in Tyre at some time. If he actually visited these lands, his statements about what the peoples were saying are not all hearsay or literary convention (25:3, 8; 26:2; 27:3; 28:2; 29:3, 9; 35:10, 12; 36:2, 13) — even though the precise, poetic phrasing of their sentiments no doubt comes from the prophet. According to the MT of 2:3, the prophet was sent not only to Israel, but also "to nations that are rebellious" (ASV).

3. Ezekiel in Babylon? Did Ezekiel ever go to Babylon?

In the light of the above, one would like to affirm this. L. Finkelstein (*The Pharisees: The Sociological Background of Their Faith* [1938], I, 338) suggested that the cryptic meaning of 38:2 is: "Son of man, set your face toward Gog of the land of Babel" — reading *bbl* (Babel) for *mgg* (Magog). Ezekiel, he suggested, resorted to midrashic ciphers in order to conceal his message from the Babylonian authorities. Since, however, the prophet was frank and open toward other rulers and nations, this explanation seems less likely than a later editorial concealment of the prophet's presence outside "the land of Babel" until a late date in his career. The cryptic device would be first the spelling of Babel backwards (*lbb*) and then the substitution for each letter of the word the next letter of the Hebrew alphabet (*mgg* = Magog). As appealing as this suggestion is, it seems doubtful in view of the questionable genuineness of 38:1–39:16 (on which see below).

4. Ezekiel in Egypt, Interrupted by Visits Elsewhere. Ezekiel first went to Egypt on Jan. 7, 587, as the idiom of dispatch at 29:1f. indicates. This date corresponds to the lifting of the siege during the approach of Pharaoh Hophra's army (Jer. 37:5), when Jeremiah tried to return to Anathoth but was arrested (37:11-15). Ezekiel delivered three oracles in Egypt that spring (29:1-16; 30:20-26; 31). The other oracles against Egypt are later: (1) March 13, 586 (LXX) or March 3, 585 (MT) (32:1-16); (2) April 27, 586 (32:17-32); (3) April 26, 571 (29:17-20); and (4) probably 30:1-19, which is undated.

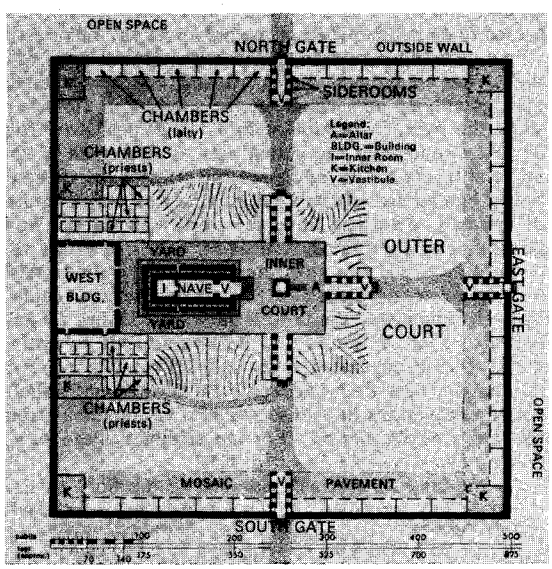
Other antiforeign oracles (chs. 25–28) lie between these two sets of dated messages to Egypt. The interval is sufficient to suggest that during the early summer of 587 Ezekiel returned to Gilgal, where his wife died (24:15-24) and he learned of Jerusalem's destruction on the day it happened, in agreement with 24:25-27. At 33:21f., one needs to correct the reading of the MT from the twelfth year/tenth month/fifth day to the eleventh year/fifth month/tenth day. With the MT date, it took the news seventeen months to reach the prophet in Babylon — which is far too long. One may reduce the time by a year by reading the eleventh year with the LXX, Syriac, and eight Hebrew MSS. Even so, Ezekiel would have been the last person in Babylonia to get the news! Ezra took only 108 days to make the journey with a considerable company (Ezr. 7:9; 8:31). Since Ezk. 24:25-27 requires that the news reach the prophet on the day of the temple's destruction, a transposition of the dates of the month and day is required; this corrected date (Aug. 28, 587) agrees with Jer. 52:12.

It was probably in late September or during October, after the assassination of Gedaliah (2 K. 25:24; Jer. 41–43), that Ezekiel went with other refugees to Transjordan (ch. 25) and after that, as early as November (?), to Phoenicia (chs. 26–28). His one dated oracle there, ch. 26 against Tyre, probably dates to the first day of the eleventh month of the eleventh year (the number of the month having fallen out), i.e., Feb. 13, 586.

Unfortunately, the idiom of dispatch is used only once in connection with the oracles against Egypt (29:2); but since this stands at the head of all the anti-Egyptian messages, it was probably regarded as sufficient to indicate that all these were delivered on the spot. At 32:2, the prophet is told to address a lamentation over the pharaoh "and say to him." In the light of Ezekiel's constant usage, this requires that the prophet at least attempt an audience with him. The date of either March 15, 586 or March 3, 585 (discussed above) would be the date the prophet received the command in Phoenicia to go to the pharaoh. A return to Egypt after his Phoenician ministry would put him in the company of Jeremiah and Baruch. This would help explain the continuing correlations of language and thought between the oracles of Ezekiel and Jeremiah.

E. From Egypt to Israel. 1. Vision of Restoration (chs. 40–48). Two years before Ezekiel's last dated oracle against Egypt (29:17) was his great vision of the restored cult and nation (chs. 40–48), dated to April 28, 573 (according to the spring reckoning of the year, as indicated by 45:21). The natural inference is that this great vision of restoration was received in Egypt. Between 586 (or 585) and 573, there are no dated oracles. One may infer that during this interval Ezekiel was engaged largely in his pastoral work among the Jewish exiles in Egypt and was even studying ideas for the restoration of the kingdom of Israel in the whole of the land. Many different ideas troubled his mind, until his vision of restoration brought clarity and cohesion to his thoughts.

His vision of the restored temple (40–43; 46:19–47:12) may be compared with Moses' vision of the tabernacle on Mt. Sinai (Ex. 25:8f.). His legislation concerning the future worship there (43:18–46:15) stands closest to legislation given Moses after his ascent of Mt. Abarim (Nu. 27:12–29:40). His program of land distribution (47:13–48:35) may be compared with that of Moses (Nu. 34–36) carried out under Joshua (Josh. 13–23). J. D. Levenson has recently stressed the Mosaic role of Ezekiel. Already a document of the 1st cent. A.D., *Lives of the Prophets*, published by C. C. Torrey (*JBL Monograph*, 1 [1946], pp. 23, 38), stated: "Also after the manner of Moses he foresaw the fashion of the temple, with its walls and its broad surroundings."



Floor plan of Ezekiel's envisioned ideal temple and temple grounds (interpretation W. H. Brownlee; drawing W. C. Loper)

The central place of the temple in the life of the restored nation must be viewed in relation to the total map of the area. The Mediterranean forms the western boundary as far north as Hethlon (47:15), N of Tripoli; and its northern boundary cuts E to a point NE of Damascus. The eastern boundary angles SW to the Sea of Galilee, S of which the Jordan River and the Dead Sea form the eastern boundary. The southern boundary runs SW from the southern end of the Dead Sea to Meribath-kadesh (47:19), which is Kadesh-barnea. Not far from there it follows the Brook of Egypt to the Mediterranean. This area does not correspond

with any historical boundaries of ancient Israel, for it contains both too much and too little to reproduce the boundaries of the kingdom of Israel at their greatest expansion under David and Solomon. Phoenicia was not conquered by David or ruled by him. Hiram of Tyre was his ally, and we hear nothing of the area N of Sidon. But David did conquer Transjordan, which is entirely excluded by Ezekiel's ideal program. It seems that Ezekiel was drawing on ancient traditions that antedate the Conquest (described most fully in Nu. 34:1-12), which were never realized in the history of Israel.

This total area is to be divided into twelve strips for the twelve tribes, with the intention that each would receive a strip of equal size between parallel lines extending from east to west. The arrangements of the tribes are therefore totally different from those of the settlement period described in the traditions of Joshua and implied in subsequent history. The central portion, not assigned to any tribe, is 25,000 cubits wide (about 56 cm. [22 in.] here for each royal cubit), extending the total width of the country, from the Mediterranean to the Dead Sea. Seven tribes lie N of this strip and five S of it — Judah immediately to the north and Benjamin immediately to the south (the two tribes having changed places). In the middle of this sacral strip is a special holy portion, a square with sides of 25,000 cubits. This in turn is divided into three strips. The southernmost is 5000 cubits wide and has in its middle the capital city Yahweh Shammah (45:6; 48:30-35). North of this lie two strips, each 10,000 cubits wide (45:1-5), one strip for the priests and the other for the Levites. In the middle of the priestly strip is the temple, 500 cubits square (45:2). Since the temple is assumed to be in the middle of the holy portion, the priestly strip is generally supposed also to be the central strip, with the Levites bordering it to the north and the strip containing the capital lying immediately to the south of it. However, since the overall description in 47:15-29 proceeds from north to south and the sacral area is described in the midst of this (48:8-20), and since the priestly strip is mentioned before that of the Levites, it seems probable that the priestly strip lies along the north side of the holy portion, and that the Levitical strip lies between the priestly area and the strip containing the capital. With the temple to be placed at Jerusalem, the new capital Yahweh Shammah ("the Lord is there," 48:35) lies 7.7 km. (4.8 mi.) S of the temple, at Bethlehem; but according to the other arrangement, it lies only 2.6 km. (1.6 mi.) S of the temple, near Beth-hacherem (modern Ramat Raḥel), where excavations have discovered royal buildings from the late preexilic period. (For the arithmetic, see *Interpreter's One-Volume Comm.*, p. 435.)

All the land to the east and west of the holy portion is assigned to the prince, the reigning descendant of David (45:7f.; 48:21f.). He is thereby self-supporting, not needing to exact taxes (45:8f.). This will prevent any crimes like Ahab's seizure of Naboth's vineyard (1 K. 21). Also, all property rights of non-Jews living anywhere in Israel are protected and safeguarded, for they are counted equal to those born as sons of Israel (47:22f.). This rule prevents oppression of the sojourner (22:7).

Ezekiel was painfully aware of the desolation of the east half of the sacral portion, between Jerusalem and the Dead Sea. In his prophecy a holy spring in the temple area flows eastward to the Dead Sea, becoming a mighty river in the process and transforming the Judean wilderness into a paradise (47:1-12). Even the Dead Sea will be sweetened and become a great fishing area, with only a few salt marshes preserved for their salt production (47:8-11).

2. New Exodus. Only two years after Ezekiel's great vision of the restoration (i.e., in April, 571), he uttered a new prophecy predicting Nebuchadrezzar's invasion of Egypt (29:17-20). This did not begin until 568; but the invasion created new confidence in the prophet Ezekiel, so that at that time a group of Jewish exiles in Egypt "sprang forth" like "a horn to the house of Israel" (29:21). These are the people whom the prophet almost at once led back to the land of Israel.

The first movement is indicated by the anti-Edomite oracles (ch. 35), which are introduced by the idiom of dispatch (35:2). The designed antithesis between the mountains of Edom (ch. 35) and the mountains of Israel (ch. 36) indicates that Ezekiel returned to Israel via Edom, the route necessary to bypass the area of actual, or imminent, conflict. This route is also reminiscent of the Exodus, which also brought the Hebrews into contact with Edom (Nu. 20:14-22; 21:4). Here too Ezekiel is playing the role of the new Moses; he is leading a group of returning exiles who lay claim to the land by walking over it (36:12), while the prophet proclaims God's word, which wrests the land from its recent usurpers (35:10–36:5). At this point, then, Ezekiel has become a new Joshua.

3. Return to Gilgal. a. The Valley of Dry Bones. In ch. 37 the valley strewn with the dry bones of Zedekiah's fallen warriors is the setting of Ezekiel's vision of the resurrected nation. Since this is near Gilgal, it is inevitable that he would have returned there also. The passage that once said so was evidently 1:1, which should stand before 37:1: "In the thirtieth year, in the fourth month, on the fifth day of the month, I was in the midst of the *gôlâ* [or Gilgal?] by the river Chebar. The hand of Yahweh was upon me, and He brought me out into the midst of the plain, and it was full of bones." Since Gilgal lay in ruins, Ezekiel may have written *gôlâ* here (with reference to the returning exiles) rather than Gilgal, implicitly renewing the pun of ch. 12. The use of *gôlâ* for "[returned] exiles" appears also in Ezra 8:35; 9:4; 10:6-8, 16.

b. The Thirtieth Year of 1:1. This has been reckoned variously, but most notably: (1) from the year of King Josiah's reform, (2) from the year of the prophet's birth, (3) from the year of King Jehoiachin's captivity. The third reckoning is preferred, since this makes the dating consistent with the others. The era is not specified, since this is the last, not the earliest, dating of the book. Evidently the heading has been brought forward from ch. 37, which in the career of the prophet is later than chs. 40–48.

This solution has profound implications, for it means that Ezekiel has imitated Joshua in leading his people back to Gilgal, for a new settlement of the land. Also "the thirtieth year" at this point agrees with our inferences from 29:17-21 about the year of Ezekiel's exodus (568/567 B.C.)

c. The sprinkling of 36:25. As part of an exilic sermon, this sprinkling would have only a vaguely eschatological meaning; but once Ezekiel had led the exiles home, fulfillment had begun to take place. Under these circumstances, the prophet had to face the question of realization. Being a priest (1:3), there is no reason why he could not act as God's agent of purification. The call for "clean water" would be best satisfied by a river or spring (Lev. 14:5f., 51f.; 15:13). Any spring, such as Gihon at Jerusalem, would be suitable; but in view of the special significance of Gilgal, it may be that he led his little group of returning exiles to the river Chebar, whose perpetual spring would be a copious source of purifying water. Instead of holding a ceremony of circumcision (like Joshua), Ezekiel may have held a ceremony of lustral sprinkling, during which he proclaimed Yahweh's promise of the gift of the new heart. It is suggested, therefore, that upon first

arriving at Gilgal, he repeated his old sermon of 36:16-36.

d. Symbolic Actions. Such actions (chs. 4–5) followed the accounts of the prophet's first visions; so also a symbolic action (37:15-20) followed his last vision. He joined two sticks labeled Joseph and Judah to indicate the reunion of the former northern and southern kingdoms in their own land. This action suggests that among the returning exiles (or refugees) were descendants of the former northern kingdom.

This theme of the reunited nation occurs in a balancing piece, 4:4-8. If this is dated to the time of ch. 4, Ezekiel's binding by the Lord (v. 8) would prevent him from preparing his own meals, as he is supposed to do in 4:9-17. More probably, the interest of 4:4-8 in the restoration of Israel and Judah reflects the final events in the prophet's life and his latest preaching (47:13–48:29). Just as he had given symbolic meaning to the death of his own wife (24:15-27), so his stroke of paralysis was interpreted as an atonement that made up for whatever was lacking in the sufferings of Israel and Judah, as needed for their restoration.

As a paralytic, Ezekiel could instruct his attendants to prop him up for 190 days (4:4f., LXX) on his left side to represent the number of years that Israel must suffer before being restored, and then order them to prop him up for forty days on his right side to represent the years of Judah's dispersion (4:6). The forty years of Judah would correspond with the forty years of the wilderness wandering with Moses (cf. 20:34f.). To be consistent with other dates in Ezekiel, this should be counted from Jehoiachin's captivity of 597 B.C., so that the exile of both former nations should terminate in the year 558/557.

From this line of reasoning, one should calculate the 190 years for the northern kingdom of Israel as the period between its first captivity mentioned in 2 K. 15:29 (that of Galilee) and the fortieth year of Jehoiachin's captivity. Scholars date this early exile from Israel (on the basis of ancient Near Eastern documents) to 734-732 B.C. Ezekiel, however, probably based his calculations on 2 Kings alone. Since the Galilean deportation is mentioned just before the reign of Jotham king of Judah, who began to rule in the second year of Pekah king of Israel, one would think that by adding up the reigns of the kings of Judah from Jotham to Jehoiachin he could obtain the total of 150 (190 − 40 = 150); but this yields 160+ years: 16+16+29+55+2+31+0.25+11+0.25 (2 K. 15:33; 16:2; 18:2; 21:1, 19; 22:1; 23:36; 24:8). An important synchronism at 17:1, which assigns the beginning of Pekah's successor to the twelfth year of King Ahaz of Judah, reduces the total to 150 years; for it allows only twenty-four years for the combined reigns of Pekah and Ahaz, whereas the total of the reigns of Jotham and Ahaz (with each assigned sixteen years [15:33; 16:2]), plus the nearly two years for the beginning of Pekah's reign (16:1), add up to thirty-four years. The inconsistency of ten years can be explained by a ten-year co-regency of Jotham with his aged father, King Azariah of Judah.

Although Ezekiel had already led a new exodus from Egypt during the thirtieth year of Jehoiachin's captivity, in 568 B.C., his group of people was too small to constitute the major event that 4:4-8 promises. Yet it was an important turning point in the history of Israel, a morning star heralding the dawn of the new day expected ten years later. It may be that Ezekiel's stroke occurred during the fortieth year itself, so that his exactitude in arithmetic was prompted by the timing of this significant event in his own life. One suspects that the original location of 4:4-6, 8 was immediately after ch. 37, and that this was followed by 39:25-29; and thus "*Now* I will restore the fortunes of Jacob and have mercy on *the whole house* of Israel" (v. 25) is Ezekiel's triumphant "It is finished!" after his 230 days of expiatory suffering, which by God's grace he had been enabled to endure.

IV. The Man and His Message.—*A. Mystic and Visionary.* Ezekiel's visions grew mostly out of concrete situations: (1) a storm cloud from the north (ch. 1), (2) the sight of apostasy at the temple (chs. 8–10), (3) the grim remains of an old battlefield (37:1-10). Only his vision of restoration (chs. 40–48) lacks this concreteness; it seems to be rooted rather in his past remembrances and his contemplations of the future.

B. Member of the Elijah School. His vision of the chariot throne of Yahweh may be partially inspired by speculations concerning the fiery chariot which took Elijah to heaven. The perfect mobility of Ezekiel's chariot (with wings, feet, and wheels) expressed Yahweh's freedom to intervene quickly at any time or place. Its manifestation at the temple (ch. 10) was proof that Yahweh perceives the people's most private sins (8:12), and that He is about to wreak judgment upon Jerusalem; for, as 43:3 states, He has come "to destroy the city." The halting of the celestial chariot on the Mt. of Olives (11:22f.) represents the hovering presence of God, awaiting the moment of real destruction through the Chaldeans. The descriptions of the hand of Yahweh coming upon Ezekiel and of his being lifted up and taken away (3:12-15, 22f.; 8:3; 11:1, 24; 37:1), are in language reminiscent of the accounts concerning Elijah and Elisha (1 K. 18:12, 46; 2 K. 3:15; cf. Isa. 8:11; Jer. 15:17; 1 S. 10:6).

C. Sound in Body and Mind. Ezekiel was not a sick man, insofar as we know, with two exceptions. After the death of his wife he suffered aphasia for a few weeks — a condition perhaps brought on by suppressed grief (24:15-24) and public threat to his safety by men who would bind him (3:25). From this he recovered when he perceived that his worst foreboding, the destruction of the temple, had been realized (24:25-27; 33:21f.). In his old age, as argued above, he suffered a stroke of paralysis which he marvelously transmuted into a redemptive experience. He was no recluse, with a mind wholly absorbed in faraway places; he lived and preached in Judah and neighboring lands. He was intimately acquainted with all aspects of public and private life, wherever he was. As "son of man," he claimed to be only a man among men.

D. Herald of Individualism. He called upon people to repent for their personal salvation (ch. 18), which was understood in historical terms (14:12-20) — a position actually compromised by experience (14:21-23). He himself felt a deep sense of personal responsibility for the salvation of each person (33:1-20). His implied rebuke of private persons is not recorded in the book; only general oracles denouncing the nation and its officials are noted. To apply these to persons would not require any special revelation, but it would consume much of his time. This pastoral ministry would be continued during his life as an exile in neighboring lands.

E. Deuteronomic Reformer. He emphasized the need for the people to worship solely at the temple in Jerusalem (20:27-31, 40f.; 6:1-7). He denounced the nation's rulers ("shepherds") for allowing the people to go astray upon the mountains, where occult shrines abounded (34:6a).

F. Priest. Ezekiel condemned the nation for despising "the holy things" of the temple; but these were not subordinated to the demands for justice and morality (22:6-12). Yet idolatrous practices in the temple (ch. 8) sealed the doom of Jerusalem more than anything else. His vision of the restored temple and of renewed sacrifices (chs. 40–48) is unique in prophetic literature.

G. Internationalist. He was not content to denounce foreign nations from afar, but he went to them and either spoke directly to the rulers (28:2, 12; 29:2; 31:2) or approached them as closely as possible. He denounced King Zedekiah for breaking an international treaty (17:11-21). In the future Israel, aliens were to have equal rights (47:21-23).

H. Herald of National Renewal. He traveled from land to land, proclaiming Yahweh's gracious intention of bringing back His dispersed people and of renewing them in heart and spirit (11:17-20; 34:11-16, 23-31; 36:16-38).

The new gift of the land, its marvelous new temple, and the new capital city Yahweh Shammah are not at all achievable by human intervention. They are to be wholly the gift of God. Since Ezekiel sees all this in a vision, it already exists in the mind of God and remains simply to be given. Thus, R. G. Hammerton-Kelly has argued that here is to be seen the origin of apocalyptic thought (*VT*, 20 [1970], 1-15). Others would emphasize chs. 38-39 as further proof that Ezekiel was the father of apocalyptic literature, since this material sets forth in its dramatic, cataclysmic judgment of Gog a further work of God in the salvation of Israel which makes no use of human instrumentality. There is also a new stress on the last days as the time of this salvation.

I. Poet and Dramatist. He had a large repertoire of literary forms and dramatic devices to make his message vivid. Symbolic pantomimes portrayed the coming doom (chs. 4–5; 12:1-7; 24:1-14) and the coming reunited nation (37:15-23). His vivid and colorful imagination found expression in poetry, especially in his allegories (chs. 15–17; 19; 23; 27). Many of his oracles were poetic and were probably chanted. Unfortunately some listened to him more out of aesthetic appreciation than out of moral concern (33:30-33).

J. Prophet of the Word. Ezekiel had had a vision of a scroll inscribed with words of "lamentation and mourning and woe" (2:10). He ate it and absorbed it into his very being. Therefore, his private experiences contain an omen for Israel: (1) the fear and sorrow with which he awaited the devastation of his country (12:17-20; 21:6f. [MT 11f.]), (2) the death of his wife (24:15-24), and (3) even the paralysis which preceded his own death (4:4-6, 8). This last passage has a remarkable affinity with Yahweh's Suffering Servant in Isa. 53.

V. Editing.–A. By Ezekiel. Individual oracles were probably repeated on many occasions, especially in view of the prophet's itinerant ministry. He was continually reshaping his oracles with new additions and adaptations. Thus the prediction of exile proclaimed to Gilgal (12:1-9, 11) was augmented in application to Zedekiah of Jerusalem (12:10, 12-16). An oracle of doom against the "shepherds of Israel" (34:1-10) was supplemented during Ezekiel's exilic ministry to assure the Diaspora of God's saving purpose for His scattered flock (34:11-16, 23-31).

Systematic arrangement of the oracles is based on mixed considerations of subject matter and chronology. The datings can come only from Ezekiel. He may himself have begun the process of grouping, but this task was completed by a disciple and altered by subsequent editings.

Ezekiel's editing is probably to be seen in some of the contents and arrangement of ch. 33, a summary of his preaching to the Egyptian Jews. He probably used the parable of the watchman in both chs. 3 and 33 (3:17-21; 33:1-9) because it expressed his consciousness of personal responsibility throughout his whole ministry. Chronologically 29:17-21 is the last of the anti-Egyptian oracles and should follow ch. 32. Placing this just before ch. 33 is illuminating, for it means that "the sons of your own people" in 33:2, 12, 17, 30 are naturally interpreted as "the horn for the house of Israel" (29:21) that has sprung forth. In its present (mildly expanded) form 33:1-6 portrays Ezekiel as the one whom "the people of the land" took "and made . . . their watchman." The same ministry is extended to these partisans of Ezekiel in 33:7-9, who are called upon as a corporate "son of man" to warn people of the sword coming upon Egypt. Verses 12-16 summarize ch. 18 and suggest that the theme of ch. 18 was important in Ezekiel's exilic ministry. Thus one can see that the prophet was still preaching doom to the Jews in Egypt. Those who "escape from the fire" of Jerusalem in 587 (15:7) face another fire (30:14, 16), so that 14:21-23 constitutes no contradiction of 14:12-20.

B. By a Disciple. This seems probable in 35:1–36:15. The passages are replete with introductory, transitional, and concluding formulas that are not always appropriate. Consequently it has been suggested that here is evidence for a series of editorial supplements, with stylistically inane results. More probably we have a condensation of several similar oracles. Identical verses were not repeated, but reverence for every word which the prophet uttered led to the preservation of the least consequential clauses in all their variations. It seems that Ezekiel was accompanied by a scribe on his return journey via Edom to Israel. This scribe recorded every speech of his master, even near duplicates, which he sought to amalgamate. Perhaps also other oracles existed in variant forms and were conflated.

If 4:4-6, 8 interpret Ezekiel's deathbed experience (as suggested above), its inclusion in the book would need to come from a disciple who completed the prophet's editing.

C. Additions to Chs. 40–48. These are problematic as to date. Praise for "the sons of Zadok" as those who were loyal to Yahweh in the former temple (44:15) can hardly come from Ezekiel, since this contradicts ch. 8. Perhaps Ezekiel distinguished between two classes of Levitical priests, the loyal and the disloyal, without distinguishing them as Zadokite and non-Zadokite. Yet the exclusion of the latter may contradict his doctrine of individualism (ch. 18). Pro-Zadokite material could have been inserted as early as Jeshua, the first chief priest of the post-exilic community, or it could stem from the final editing of the book.

Inconsistencies indicate authors of divergent points of view. The prescription that the priests are to have no inheritance, but are to live solely from offerings (44:28-31), is in agreement with the priestly law of the Pentateuch (Lev. 2:3-10; 6:14-18 [MT 7-11]; 7; Nu. 18:8-32), but not with Ezk. 45:1-8. One supposes that the former is an orthodox correction, but by whom? There may be other supplements of various dates throughout these chapters.

D. Fifth-Century Additions. Some passages may be reminiscent of Nehemiah and his reforms. Among them 23:36-49 stands out. In the earlier part of the chapter, Oholah (Samaria) and Oholibah (Jerusalem) proved disloyal to Yahweh their husband by making alliances with foreign nations, instead of trusting in Yahweh alone for protection. In this new situation, they are accused of defiling the temple at Jerusalem. Earlier they were punished by Assyria and Chaldea, but in this section they are to be executed by "righteous men," who attack both cities and kill them with stones and swords. In contrast, the Chaldeans are described as "the most wicked of nations" (7:24; 28:7). This is reminiscent of the punishment of apostate cities prescribed by Dt. 13:12-16 (MT 13-17) and of the reforming zeal of King Josiah (2 K. 23:15-20). Cf. also the execution of adulterers and adulteresses with stones (Dt. 22:22-24). For Samaritans defiling the temple, see Neh. 13:28f., where Nehemiah expels from Jerusalem the priestly son-in-law of the governor of Samaria.

Yet 23:36-49 may be attributed to Ezekiel himself if it is

assigned to a time after his return from Egypt (after 568 B.C.). For people from Samaria worshiping at Jerusalem in this period, see Jer. 41:4f.; Ezr. 4:1f.

E. Additions from the Time of Alexander. According to some, these additions include all of ch. 26 (concerned with Tyre), since v. 8 suggests Alexander's stratagem of demolishing houses of the mainland to construct a land mole to the island city, so that siege weapons could be brought to bear against it. More probably (as the date of 26:1 suggests) we have here an oracle by Ezekiel which was later glossed with reference to Alexander.

The section 38:1–39:16, in its portrayal of God's judgment of the eschatological foe, Gog of the land of Magog, uses apocalyptic imagery not found elsewhere in the book. Its late stance is shown by its situation long after Israel has been restored to her land (38:8). Gog's invasion is in fulfillment of ancient prophecies (38:17; 39:8), but no such explicit predictions exist. An examination of the references in study editions of the ASV reveals that the phraseology of these chapters is borrowed largely from prophecies concerning Assyria and Chaldea, especially those of Isaiah, Jeremiah, and Ezekiel, which are here reapplied. (For a complete listing of these references, see G. Hölscher, pp. 177-189.)

Who is Gog? Some think that his name is derived from the ancient king Gyges of Lydia in northwestern Asia Minor. His portrayal as a foe from the north, and as chief ruler of Meshech and Tubal in the land of Magog, suggests the same general area (cf. Gen. 10:2f.). The fact that Gog must be turned around to be brought into Israel may suggest a conqueror who was headed toward another foe (such as Alexander toward Persia), but who was turned aside in order to be brought into Palestine. Alternatively, the foe has already passed through the land once and is to be brought back to his doom. C. C. Torrey and others have identified Gog with Alexander the Great, who came to Palestine from Macedonia after conquering the area of "Magog." (Late features of these chapters exclude Nebuchadrezzar as the enemy; see III.D.3 above.)

The idiom of dispatch in 38:2 (see III.D.1 above) suggests a historical figure and implies a prophetic journey to deliver the message. Either the apocalyptic author simply imitated the style of Ezekiel, or he actually visited the camp of Alexander in order to proclaim this hostile prophecy.

F. Major Revision. 1. Midrashic Methods. These were employed by the editors who transformed Ezekiel into a prophet of the Babylonian exile. (For reasons for this, see 3 below.) Simple verbal play could alter *hglglh* (Gilgal) to *hglh* (the exile) in 3:11, 15; 11:24f. (see III.C.1 above). The nearly identical headings of chs. 1 and 37 justified another rabbinic device (*gᵉzērâ šāwâ*), that of interpreting together passages with identical phrasing. This, one suggests, led to the moving of the heading of ch. 37 to 1:1 (see III.E.3.a, b above). Since in this verse Ezekiel himself probably wrote *hglh* with reference to the exiles he had brought back to Gilgal from Egypt, it served as proof that "Gilgal" everywhere in this book meant "the exile."

Unambiguous references to two ecstatic, but literal, journeys to Jerusalem (8:3; 11:1) could not be negated; but they were edited slightly in order to make of them one visionary round trip. (The composite character of Ch. 11 and the later insertion of most of this material is generally recognized.) In 8:3 Ezekiel's own words "in the visions of God" at 40:2 were cited. The fact that chs. 9–10 were vision made it plausible that ch. 8 and 11:1-13 were likewise vision. One conjectures that another verbal play in 11:24 interpreted *qāḏîmâ* ("to the east") to mean *Kaśdîmâ* ("to Chaldea"). (See III.C.5 above.) This interpretation could be supported by noting that "the east wind" (*qāḏîm*) was Ezekiel's allegorical term for Chaldea in 17:10; 19:12; 27:26. Hence *qāḏîmâ*, understood as "to the east wind," could be interpreted as "to Chaldea." There was nothing dishonest in this kind of midrash, for it rested upon the sincere conviction that the Scripture had hidden meanings which could be mined with cryptic tools.

2. New Structuring. This was achieved by rearrangements. The original answer to Ezekiel's cry of apprehension in 11:13 was 9:9f.; but these verses were replaced by an originally independent passage, 11:14-20, which not only substituted an optimistic answer for a pessimistic one, but which made chs. 8–11 relevant to the exiles. Such rearrangements are rather numerous.

The most dramatic restructuring builds upon Ezekiel's own correlation between chs. 3 and 33 by the dispersal of materials relating to the prophet's dumbness following the death of his wife. The original sequence was probably: (1) 24:15-24; (2) 3:24c-27 (the last clause of v. 24 to be inserted in v. 25, as the next to the last); (3) 24:25-27, (4) 33:21f. It is at first bewildering (esp. in the grandiose setting of 3:22f.) to discover Ezekiel confined and stricken with dumbness before he ever begins his ministry. The vision of 3:23b-24b harks back to chs. 1–2; and 3:22-23a was the original setting of that vision. The insertion of 3:22-27 here was not intended to halt the prophet's ministry before it began, but to interpret it by giving it a new dimension, that of redemptive suffering. Perhaps the editors were trying to identify Ezekiel with Yahweh's Suffering Servant, who also was "dumb" (Isa. 53:7) — though voluntarily so — and "bore the sin of many" (53:12). Their intention was not to declare that Ezekiel was dumb throughout chs. 4–24, etc., for their motivation was theological.

All this balanced structuring supports also a bisection of the book, according to an ancient custom supported in connection with Isaiah by the objective division of the great Isaiah Scroll of Qumrân into two parts. Viewed in this way, the divine judgments proclaimed against foreign nations (chs. 25–32) prepare the way for Israel's restoration (28:24-26). Hence God's punishment of His people dominates the first half (chs. 1–24) and His plan of gracious renewal dominates the second half (chs. 25–48).

3. Reasons for Major Revision. Some have already been adduced, but there are more.

a. Defense of the postexilic temple. This was achieved by a reinterpretation of Ezekiel's visions of the divine glory riding the celestial chariot. Originally, this represented Yahweh's descent from heaven to judge His nation (see IV.B above) and His coming to authenticate the future temple (44:4). Chs. 8–10 originally stressed the former, but a new dimension is suggested by the insertion of 11:14-20, for v. 16 declares that Yahweh will briefly become a sanctuary for the exiles in the lands to which they have gone. The reinterpretation made chs. 8–11 mean that the glory of Yahweh, which normally makes its abode in the most holy place of the temple, has departed (making possible the temple's destruction) and has taken up its abode among the Babylonian exiles, whence it will return to the new temple at Jerusalem. The destruction of Solomon's temple was not a repudiation of Jerusalem as the site of the true temple, but a judgment of purgation that removed past abominations (ch. 8) and prepared for the new, undefiled temple whither Yahweh's glory will return and abide forever (43:1-7a).

b. Defense of the Jerusalemite Priesthood. This is assured by the endorsement of the sons of Zadok (44:15-27), and it is reinforced by the manifestation of the divine glory to Ezekiel in Babylon by the river Chebar. One cannot say that Yahweh's exile of the leading priests to Babylon represented his repudiation of them, for the divine glory appeared to one of them in the plain near the river Chebar.

4. Occasion of Major Revision. This is to be defined in relation to the opposition party. Who objected to the Jerusalemite priesthood and temple? Who claimed that the Babylonian exile showed Yahweh's unalterable opposition to the leadership of the postexilic community? Are these people to be located already in the time of Jeshua and Zerubbabel? If so, the major revision of the book was much earlier in date than the additions mentioned under D and E. An opposition party with a rival temple and priesthood seems to be in view; it is suggested that they are the Samaritans.

According to Josephus (*Ant.* xi.8.4 [321-25]) the Samaritans built their rival temple at the time of Alexander the Great, and it stood two centuries before its destruction by John Hyrcanus in 128 B.C. (*Ant.* xiii.9.1 [254-56]). Therefore, the editing with which we are here concerned is probably from the late 4th century. Such a late date accords well with the advanced state of midrashic exegesis employed by this editing.

It is probably in relation to this editing that the figure of 390 days replaced the earlier reading of 190 days at 4:5. (For the interpretation of 190 which survived in the LXX, see III.E.3d above.) The 390 + 40 = 430 days represent 430 years of exile, corresponding with the 430 years of the Hebrew bondage in Egypt (Ex. 12:40). Counting 390 years from the fall of Samaria (722) brings us down to 332, the time of the conquest by Alexander the Great, at which time the Samaritans rebuilt the city of Shechem, the first capital of Israel. Allowing forty more years for the messianic fulfillments associated with Judah would be to anticipate a consummation at about 292 B.C. Consequently, the major revisions of the book seem to stem from an editing late in the 4th century.

G. Summary. This series of editings may serve to justify the rabbinic tradition (T.B. *Baba Bathra* 15a), that "the men of the Great Synagogue wrote Ezekiel." "Wrote" here probably means edited, and the activities of this assembly of sages is said to have begun with "Ezra and his companions" (Midr. *Lev. Rabbah* ii.11) and to have survived until the time of Simeon the Just (Mish. *Pirke Aboth* 1:1f.), roughly from the 5th to the 3rd cents. B.C. Despite all this editorial activity, the major contents of the book of Ezekiel are genuine, and whatever editing they later received serves to emphasize the prophet's greatness.

VI. Canonicity.—The Council of Jamnia (*ca.* A.D. 90), which apparently defined the final limits of the Hebrew Bible, found strong opposition to the book of Ezekiel. This is very surprising, since in all probability it had been recognized as inspired Scripture for centuries. The reason given (T.B. *Hagigah* 13a), "for its words contradict the words of the Torah," is, as Shalom Spiegel has stated (*HTR*, 24 (1931), 262), "a true statement of the Talmud which deserves full credence." Thus for the celebration of the new moon, Nu. 28:11 prescribed the sacrifice of two bulls, seven lambs, and one ram, while Ezekiel 46:6 requires only one bull, six lambs, and one ram. The Babylonian Talmud (*Menahoth* 45a) reconciles these numbers by stating that if one cannot find the larger numbers of animals, it is permissible to use the lesser. So numerous are the difficulties, however, that it is stated (T.B. *Hagigah* 13a) that Hananiah ben Hezekiah used 300 jars of midnight oil in an effort to harmonize the texts, and so the book was retained as Scripture. For an ultimate reconciliation, one must await the coming of Elijah.

VII. Rabbinic Speculations Concerning "The Chariot."—Even after the problem of canonicity was laid to rest, those who had not reached a mature age were forbidden to study the first chapter of the prophet. Special speculations that were current concerning the intricate vision of the celestial chariot were thereby discouraged. "The work of the chariot" (*ma'aśeh merkaḇâ*) could not be taught, but it could be discussed between two "sages" who had come to understand the mystery through their own unaided study (T.B. *Hagigah* 11b). Most scholars believe that all this concerns theosophical speculations concerning cosmogony and the angelic world, and one hymnic work from the Qumrân Scrolls (cf. J. Strugnell, "The Angelic Liturgy at Qumrân — 4Q *Serek Šîrôt 'Ôlat Haššabbât,*" in *SVT*, 7 [1960], 318-345) shows that there were such speculations. Yet most aspects of the vision are repeated in 8:2 and ch. 10, on which there were no restrictions. C. C. Torrey (pp. 14-16) argued that the real reason for suppressing open study of ch. 1 was to prevent people from prying critically into the edited dates of 1:1f. and figuring out that Ezekiel was not really in the Babylonian exile at the time of Jehoiachin's captivity. Yet in the rabbinic Midrash *Mekilta* (*Pisha* 1.40ff.), one interpretation insinuates that Ezekiel's initial vision was "in the plain" of 3:22f., which it locates in the Holy Land. Even the Targum of Jonathan explains the repetitive text of 1:3, "The word of Yahweh *came came* [or, coming came; AV, expressly came] to Ezekiel" as meaning that the divine word came twice to the prophet: "The word of prophecy came from Yahweh's presence to Ezekiel the son of Buzi, the priest, in the land of Israel. Then it came back again and conversed with him in the province of the land of the Chaldeans."

The exact nature of the rabbinic interpretation of Ezk. 1 is not fully known, although the passage gave rise to a whole Jewish mystical tradition (cf. *Encyclopedia Judaica,* XI [1971], *s.v.* "Merkabah Mysticism" [G. Scholem]; G. Scholem, *Major Trends in Jewish Mysticism* [3rd rev. ed. 1954], pp. 40-79). The basis of the rabbinic interpretation was the identification of the chariot of Ezekiel's vision with God's throne; Ezekiel, having seen the throne, was supposed to be enlightened about the divine mysteries. Apparently later Jewish sages who had correctly understood and expounded Ezk. 1 were privileged with similar visions or at least some kind of mystical experience (cf., e.g., J. Neusner, *Life of Rabban Yohanan Ben Zakkai* [1962], pp. 97-103, esp. pp. 97f., where he quotes T. B. *Hagigah* 14b).

VIII. Ezekiel and the NT.—The frequent addresses to Ezekiel as "son of man" find an exact parallel only in Dnl. 8:17; but this expression is a frequent designation of Jesus in all four Gospels and rarely elsewhere (Acts 7:56; Rev. 1:13; 21:7). This title for Jesus may derive wholly from Dnl. 7:13f. and its lengthy interpretation in 1 En. 37–71, "the Similitudes [or Parables] of Enoch." Yet, in contrast with these sources, "son of man" in the Gospels sometimes designates Jesus as a lowly, suffering prophet (Mt. 8:20 par.; 17:12 par.). The son of man's mission "to seek and to save the lost" (Lk. 19:10) may be compared with Ezekiel's pastoral ministry of warning sinners (3:17-21 par. 33:7-9) out of conviction that Yahweh has "no pleasure in the death of the wicked" (33:11) and will Himself "seek the lost" (34:16). *See* SON OF MAN.

Jesus' role as the Good Shepherd (Jn. 10:1-18, 25-29) is reminiscent of Yahweh's work in this same capacity (Ezk. 34:11-16), especially since He and the Father are one (Jn. 10:30). "The one flock, one shepherd" (Jn. 10:16) accords with Ezekiel's emphasis upon the oneness of the restored nation (37:22), which will have but one royal shepherd (34:23; 37:24). A new element in Jn. 10 is the inclusion of Gentiles among the gathered flock (cf. v. 16a). Implicitly, Ezekiel's prophecy concerns the Church as the new Israel.

Among the hundreds of biblical allusions in the book of

Revelation, Ezekiel was not ignored. The "one like a son of man" (Rev. 1:13, exactly as in Dnl. 7:13) has a voice "like the sound of many waters" (Rev. 1:15), as the Almighty does in Ezekiel's vision (Ezk. 1:24). The "living creatures" of Rev. 4:6-9 are reminiscent of those in Ezk. 1; *see* CREATURE, LIVING. Most dramatically, "Gog and Magog" designate "the nations at the four corners of the earth" (Rev. 20:8), with allusion to the prophecies of Ezk. 38–39, which concern "Gog of the land of Magog" (38:2). Their siege of "the camp of the saints" in "the beloved city" (which in Sir. 24:11 designates Jerusalem) refers to the persecution of Christians, who alone in the NT are called "saints." The coming of these foes from "the four corners of the earth" (Rev. 20:8) stresses their universal character, in agreement with the depiction of the "many peoples" accompanying Gog in Ezk. 38:5f. who derive from every direction, and not just the north.

Like Ezekiel in 40:2, John in Rev. 21:10 was "carried away to a great, high mountain" where he saw "the holy city Jerusalem," but with a striking difference: Ezekiel saw there the new temple (Ezk. 40–47), whereas John's "new Jerusalem" had no temple in it, "for its temple is the Lord God the Almighty and the Lamb" (Rev. 21:22). In this respect, however, John's "holy city" is exactly like the future capital of Israel, the city of the reigning "prince" (Ezk. 45:7; 48:15-22). Although it will have no temple, it will be called Yahweh Shammah, "Yahweh is there" (48:30-35). Like this future capital, the new Jerusalem of Revelation will be foursquare (Rev. 21:16) and have twelve gates named after the twelve tribes of Israel (v. 12). It is important to note that Yahweh Shammah in Ezekiel is not a new Jerusalem, for the geographic arrangements of 47:13–48:29 make clear (as explained above) that this is at some distance south of the sanctuary, perhaps even at Bethlehem.

W. H. BROWNLEE

IX. Alternative Views and Additional Information.—*A. Authorship and Locale.* The single-author view of the book can be demonstrated by several lines of evidence. The address "Son of man" is used ninety-three times in Ezekiel, always by Yahweh when addressing Ezekiel. Elsewhere in the OT it occurs as a form of address only in Dnl. 8:17, which according to Eichrodt (*Ezekiel* [Eng. tr., *OTL*, 1970], p. 61) is derived from Ezekiel. (The term *ben 'āḏām* is used in parallel strophes with *'āḏām*, "man," in Job 25:6; Ps. 8:4 [MT 5]). This address formula is found throughout Ezekiel (omitted only in chs. 1, 9–10, 18–19, 41–42, 45–46, 48) and often follows the phrase "the word of Yahweh came to me." The address first occurs in 2:1: "And he said to me, 'Son of man, stand upon your feet, and I will speak with you.'" It occurs in the language of commission, e.g., v. 3, "Son of man, I send you to the people of Israel . . . ," and 3:4, "Son of man, go, get you to the house of Israel, and speak with my words to them." Ezekiel describes the effect of the word in 2:2: "And when he spoke to me, the Spirit entered into me and set me upon my feet; and I heard him speaking to me." Similar phenomena throughout the book imply that Ezekiel was fully aware that Yahweh was speaking to him and even telling him what to say or do. To suppose that a later redactor has woven this formula into the account about ninety times requires more credulity than some scholars can muster. At face value it argues strongly for a single author.

The expression *'ᵃnî YHWH*, "I am Yahweh," occurs about sixty times in Ezekiel. Usually it follows some statement including the verb "know," such as "they shall know that I am Yahweh." According to BDB (p. 219, II.2.b), such expressions occur forty-nine times in Ezekiel and only nine times elsewhere. The expression *'ᵃnî YHWH* is therefore a hallmark of Ezekiel and is reminiscent of the same expression in Leviticus, where it occurs about fifty times. (For discussion of *yd'* passages as "proof sayings" in Ezekiel, and of *'ny yhwh* as self-introduction, cf. W. Zimmerli, *Ezekiel*, I [*Hermeneia*, 1979], 36-40.) This emphasis on Yahweh's being the one who is acting would be particularly significant to those exiled from the land that Yahweh had given them to a land that, according to popular belief, was the territory of Marduk and other gods. Thus the constant repetition of the words "that you/they shall know that I am Yahweh" supports not only the single authorship of Ezekiel, but also the foreign locale of the prophecies. The words would have had far less meaning to the defeated remnant in Judea, and probably

just the opposite effect, i.e., they would have shown that Yahweh, after all, was powerless against the pagan gods.

The date formulas also support single authorship. Thirteen dates are given by day, month, and year, and each is connected with a revelation from Yahweh. These can be equated with our present calendar as follows:

Ezk.	subject	da	mo	yr	yr 1 = 597/6
1:2	Opening vision	5	4	5	Jul. 31, 593
8:1	Vision in the temple	5	6	6	Sep. 17, 592
20:1	Message to the elders	10	5	7	Aug. 14, 591
24:1	Report of siege of Jerusalem	10	10	9	Jan. 15, 588
26:1	Prophecy against Tyre	1	(1)	11	(Apr. 23) 587
*29:1	Prophecy against Pharaoh	12	10	10	Jan. 7, 587
*29:17	Prophecy to Babylon about Egypt	1	1	27	Apr. 26, 571
30:20	Prophecy against Pharaoh	7	1	11	Apr. 29, 587
31:1	Prophecy to Pharaoh	1	3	11	June 21, 587
*32:1	Lamentation over Pharaoh	1	12	12	Mar. 3, 585
33:21	Report of Jerusalem's fall	5	10	12	Jan. 8, 585
40:1	Vision of restored temple	10	1	25	Apr. 28, 573

*Obviously not in chronological sequence

(Dates calculated from tables in R. A. Parker and W. H. Dubberstein, *Babylonian Chronology 626 B.C.–A.D. 75* [1956], pp. 27f.)

Once again it is exceedingly difficult to accept the position that a later redactor carefully wove these date formulas into the work. Although it is possible to suppose that only the dated prophecies — with the dates — came from the original author, it seems more reasonable to suppose that the dates were intended to furnish some sort of sequence for the entire prophecy. The latter view is particularly significant because some of the dates are out of chronological order, which would be inconceivable for a later editor to have done. Again, the same evidence seems to support a Babylonian or at least a foreign locale.

B. "Set Your Face" as a Messenger Formula. The suggestion that "set your face" is the language of dispatch (see III.D.1,2 above) is most interesting and deserves careful evaluation. The formula "Son of man, set your face [*śîm pānêḵā*] to..." occurs nine times (6:2; 13:17; 20:46 [MT 21:2]; 21:1 [MT 7]; 25:2; 28:21; 29:2; 35:2; 38:2). Generally it is followed by *'el* but in 20:46 by *dereḵ*, and in 29:2 and 35:2 by *'al*. The formula is used with messages to "the mountains of Israel," "the daughters of your people," "the South," "Jerusalem," "the Ammonites," "Sidon," ' Pharaoh king of Egypt," "Mount Seir," and "Gog of the land of Magog." With the exception of 29:1f., none of these occurs in connection with a date formula.

The expression "set (one's) face to" is found elsewhere in the Semitic world. In the Code of Hammurabi, for example, the idiom is *ana... panišu ištakan*, where the infinitive of the action follows the preposition *ana*, and the expression is translated "to [verb] his face he has set." The formula is found in such expressions as "has set his face to divorce" (§ 137), "has set her face to go out" (§ 141), "has set his face to disinherit his son" (§ 168). In these examples and throughout the code it is not a dispatch formula, but instead means "make up his/her mind" to do something. It should be noted, however, that the Babylonian examples are all in the indicative, but the *śîm pānêḵā* passages in Ezekiel are all in the imperative.

A similar idiom occurs in Ugaritic in the customary form *ìdk lttn pnm 'm...*, "then he/she set the face to/with..." (49.I.4; 49.IV.31f., *ìdk lttn pnm 'm nrt ilm špš*, "then she set her face toward the luminary of the gods Shipish"; 51.IV.20; 51.V.84; etc.). The verb is *ytn*, cognate with Hebrew *ntn*, "give, appoint, set." In context the expression seems to mean "go" or "make up the mind to go" and hence would lend support to the thesis in IV, V above.

While a study of cognate languages is an aid to understanding Hebrew (or any other language), ultimately the meaning of words must be determined from context. What did the author of Ezekiel intend when making use of the words *śîm pānêḵā*? A careful study of the numerous commands to Ezekiel to "prophesy," "speak," "say," "make known to," "raise a lamentation against," etc., does not indicate any special feature about the "set your face to" passages. When a dispatch formula is used, it contains *lēḵ*, "go," as in 3:1, 4, 11, and the recipients of the proposed message are always the exiles of Israel. A tentative conclusion is that "set your face against" is simply the language of commission, perhaps explained by 3:8, "I have made your face hard against their faces," to strengthen Ezekiel's determination to carry out the order. The idiom is similarly used in Lk. 9:51, where Jesus is said to have "set his face to go to Jerusalem," i.e., to have steadfastly determined to accomplish his appointed mission to be received up.

In the light of the facts adduced above, the single authorship of Ezekiel and the Babylonian locale of the prophet's work seem to be reasonable conclusions.

C. Eschatology. One of Ezekiel's great contributions to OT theology is his presentation of events relating to the end of the age. As is customary with the canonical prophets, the near and the distant are merged, so that it is impossible to mark out certain portions as dealing only with the latter days. Beginning with the prophecy against the "shepherds" (the spiritual and political leaders, cf. 34:2, 10), Ezekiel contains prophecies that have both gladdened the hearts of the people of God and filled them with foreboding. Yahweh identifies Himself as the true shepherd (34:11, 13) who seeks the lost (vv. 15f.; cf. Lk. 19:10). At the same time there is a merging of the shepherd's office, for ' my servant David" is also the single shepherd (Ezk. 34:23). Ezekiel thus provides a basis for the ultimate identification of the Messiah with Yahweh Himself (cf. 37:24; Jn. 10:1-18).

Ezekiel makes it clear that Yahweh's purpose is not merely to punish some of His people while preserving a remnant. There is to be something new — a "new covenant," a "new heart," a "new spirit" — but the figures of speech used indicate that, although this program may be new, it will not be different. No new name replaces Israel, and no new king replaces David. The new law in the heart is still called Torah. Ezekiel added an element to the central truth: "It is not for your sake, O house of Israel, that I am about to act, but for the sake of my holy name, which you have profaned among the nations to which you came" (Ezk. 36:22; cf. v. 32). The vindication of God's character is an important point in Ezekiel. The concept of a tragic deity, caught in the vortex of history and unable to do anything about it, is foreign to Ezekiel. Yahweh is the Lord of history.

Chapter 37 does not portray the final resurrection although belief in the resurrection underlies its figures of speech. Rather, it is a prophecy of the reestablishment of the single nation: "These bones are the whole house of Israel" (v. 11). The "stick of Joseph" is joined to the "stick of Judah" to become "one stick" (vv. 19f.). "They shall be no longer two nations, and no longer divided into two kingdoms" (vv. 21f.). David is to be the king (v. 24), and the people shall dwell in the land which Yahweh gave to Jacob (v. 25).

Chapters 38–39 appear to teach that there will be a second attack on the nation after it has been reunited (38:8; cf. Rev. 20:8), an idea that is also found in Zec. 12:3. A power from the north comes against Israel "in the latter days" (Ezk. 38:14-16; cf. Rev. 19:17-21). There will be "a great shaking" in the land of Israel (Ezk. 38:19), but this time Yahweh does not call upon a Cyrus or a foreign

power to deliver His people. He uses "every kind of terror" (v. 21) in a direct confrontation of God and Gog. The battle, described in gory detail (ch. 39), seems to represent the final judgment of the nations. It is a fitting introduction for the final section of the prophecy.

Chapters 40–48 are very difficult to interpret. It seems clear that Ezekiel has the messianic age in view (43:2-5, 7; 44:2; 47:7-12 [cf. Zec. 14:8; Rev. 22:1f.]; 48:35b). On the surface, Ezekiel seems to be foretelling the rebuilding of the temple, the reinstitution of the sacrificial system (45:18-25), and the reapportionment of the land among the twelve tribes. This interpretation, however, appears to be contrary to the prophetic view of the OT and to clear statements in the NT (cf. Mic. 6:6-8; Isa. 1:11; esp. He. 8–10). Since those who hold to the infallibility of Scripture will not concede that Ezekiel was mistaken, they must attempt to harmonize the OT and NT. Suggested solutions include: (1) a literal fulfillment, such as has been held by many Chiliasts and Premillennialists; and (2) a typico-symbolical fulfillment, which often fails to do justice to the many OT prophecies that bear on the subject and sometimes also fails to give serious consideration to Rom. 9–11; rather, it leans heavily on He. 8:13; 9:23–10:4. (3) A third suggestion is that in the messianic age, when Israel is gathered as a nation with the messianic king on the throne in Jerusalem, the temple and the sacrifices will be memorials (somewhat as many Christians in this age regard the Lord's Supper as a memorial), reminding the earthly Israel of their background.

The prophecy against Tyre (Ezk. 28) is also problematic. Who is this "prince of Tyre" who said, "I am a god, I sit in the seat of the gods," yet who was "but a man, and no god" (v. 2)? Yahweh says to him, "You were the signet of perfection, full of wisdom and perfect in beauty. You were in Eden, the garden of God.... You were blameless in your ways from the day you were created, till iniquity was found in you.... I cast you to the ground" (vv. 12-17). Like Isa. 14:12-21, these verses have often been taken as a prophecy concerning Satan. But how can such an interpretation be held in the light of grammatico-historical exegesis? The passage appears to be a taunt song, a characteristic of which is hyperbolic ridicule. In context it refers to the king of Tyre, perhaps Ba'li II. At the same time, scholars have found both in Ezk. 28 and Isa. 14 "reflections of Ugaritic mythology" (cf. H. G. May, *IB*, VI, 218; J. Morgenstern, *JBL*, 64 [1945], 29-37).

The king of Tyre (Ezk. 28), just like the king of Babylon (Isa. 14), has a satanic element. "Satan" means "adversary," and "satanic" means "opposed to God and His purpose." Tyre, with its Baal worship, its Jezebel-Elijah confrontation, and its determined efforts to replace Yahwism with Baalism, was satanic. All earthly kings represent the Edenic or existentialist Adamic experience that attempts to set personal choice above the will of the Creator. Like "Messiah," the term "Satan" later came to have a technical meaning. Every use of earthly power to oppose the purpose or people of God prefigures the satanic-messianic confrontation at the end of the age. Ezekiel, with his underlying emphasis on eschatology (cf. B. S. Childs, *Intro. to the OT as Scripture* [1979], pp. 366f.), must have intended this interpretation when he spoke at length on Tyre. W. S. LASOR

EZEL ē'zəl [Heb. *hā'āzel*–'departure'] (1 S. 20:19). In the AV and RSV mg. the proper name of the stone at which David was to meet Jonathan.

The textual tradition is considerably confused at this point. The MT reads *'ēṣel hā'eḇen hā'āzel*, literally, "beside the stone, Ezel." The LXX B reads *ergab ekeíno*. Driver conjectures that Gk. *ergab* is a transliteration of Heb. **hā'argāḇ*, "mound, heap," apparently the word presupposed by the LXX B translator. If the letters of *h'zl* are transposed and vocalized as *hāllā'z* (lit. "this") the result is a coherent text presupposed by the LXX B: *'ēṣel hā'argāḇ hāllā'z*, "beside this heap." This solution, although coherent, is not entirely satisfactory, since Symmachus and Theodotion read *líthon*, "stone," rather than *ergab*, and so agree with MT *hā'eḇen*.

The textual difficulties are reflected in the various translations. The AV and RSV mg. follow the MT and render "the stone Ezel." The RSV "stone heap" follows the text presupposed by the LXX B and deletes *hā'āzel*. The NEB follows the LXX B entirely: "the mound there."

Bibliography.–S. R. Driver, *Notes on the Hebrew Text and the Topography of the Books of Samuel* (2nd ed. 1913), pp. 167f.; *BH*; BDB, pp. 229, 918. R. J. W. G. A. L.

EZEM ē'zəm [Heb. *'āṣem* (Josh. 15:29; 19:3)]; AV AZEM; [*'eṣem* (1 Ch. 4:29)]. The Hebrew spelling with *ā* is a Masoretic pausal form, which the AV rendered literally. Ezem was a city of Simeon somewhere in the Negeb, perhaps to be identified with Umm el-'Azam, about 20 km. (12 m.) SE of Beer-sheba.

EZER ē'zər [Heb. *'ēzer* (1); *'ēzer*–'help'].

1. A Horite chief (Gen. 36:21, 27, 30; 1 Ch. 1:38, 42; AV EZAR).
2. A Judahite (1 Ch. 4:4).
3. An Ephraimite, slain by men of Gath (1 Ch. 7:21).
4. A Gadite who followed David while in exile on account of the wrath of Saul (1 Ch. 12:9 [MT 10]).
5. One of those who, under the direction of Nehemiah, repaired the wall of Jerusalem (Neh. 3:19).
6. A musician in one of the two great companies appointed by Nehemiah to give thanks at the dedication of the wall of Jerusalem (Neh. 12:42).

EZERIAS ez-ə-rī'əs (1 Esd. 8:1, AV, NEB). *See* AZARIAH **24**.

EZIAS ē-zī'əs (1 Esd. 8:2, AV). *See* UZZI **7**.

EZION-GEBER e'zē-ən gē'bər, e'zē-ən ge'bər [Heb. *'eṣyón geḇer*]; AV also EZION-GABER (-gā'bər, -gä'bər). A port city of Edom on the north shore of the Gulf of Aqabah. It is mentioned as one of the cities on the route of the Exodus (Nu. 33:35; Dt. 2:8). It seems to have been an important commercial city in the time of Solomon, for he built there a fleet of ships, manned by Phoenician sailors, which he sent to Ophir for gold and other riches (1 K. 9:26-28; 10:11, 22; 2 Ch. 8:17). Jehoshaphat king of Judah joined with Ahaziah king of Israel to attempt a similar enterprise, but Jehoshaphat's fleet was destroyed in the port (1 K. 22:48; 2 Ch. 20:35-37).

ELATH may have been the later name for Ezion-geber, which was in the same general area.

See TELL EL-KHELEIFEH. E. K. VOGEL

EZNITE ez'nīt (2 S. 23:8, AV). *See* ADINO.

EZORA ē-zō'rə [Gk. *Ezōra*] (1 Esd. 9:34); AV OZORA. He and his six sons "pledged themselves to put away their wives" (v. 20; cf. "Machnadebai" of Ezr. 10:40).

EZRA ez'rə [Heb. *'ezrā'*; Gk. *Esras*; *Esdras*; *Ezdras*; **EZRAH** [Heb. *'ezrâ* (1 Ch. 4:17)]. Probably abbreviated forms of *'azaryâ*–'Yah(weh) helps.'

1. A priest who returned from Babylonia with Zerub-

babel (Neh. 12:1, 13). In Neh. 10:2 (MT 3) he is called Azariah.

2. A member of the tribe of Judah and father of Jether and three other sons (1 Ch. 4:17).

3. The author of the memoirs attributed to him in the canonical books of Ezra and Nehemiah (Ezr. 7–10; Neh. 8–10). His credentials are inherent in his genealogy (Ezr. 7:1-6), which traces his descent from Aaron, the first high priest of Israel. The genealogy is shortened by comparison with the list in 1 Ch. 6:4-14 (MT 5:30-40), six names being omitted in Ezr. 7:2-7 between Azariah and Meraioth, and one between Shallum and Ahitub. Ezra was a descendant of Seraiah, who was killed by Nebuchadrezzar at Riblah (2 K. 25:18-21), and whose son Jehozadak was the high priest taken in captivity to Babylonia (1 Ch. 6:14f. [MT 5:40f.]). The omission of Jehozadak's name from Ezra's genealogy might indicate his descent from a younger brother who was not a high priest.

In Jewish tradition Ezra was uniformly described as a "scribe" who was especially versed in the Torah. In his letter of instruction (Ezr. 7:6, 11), Artaxerxes designated him as "the scribe," indicating that he held a high position in the administration of the royal court. Ezra returned to Jerusalem with a group of repatriates and others in the seventh year of Artaxerxes, and depending upon whether the individual named was Artaxerxes I or Artaxerxes II, this would be either 458 B.C. or 397 B.C. (*see* CHRONOLOGY OF THE OT VI). Ezra had requested and received permission (Ezr. 7:11-26) to visit the returned exiles in an official capacity, and thus was acting as a crown commissioner. He received a grant from the royal treasury as well as freewill offerings from Jews living in Babylonia, and those he took to Palestine along with vessels for the service of the Lord's house. The royal decree afforded Ezra administrative privileges backed by civil authority.

When he arrived in Jerusalem he began his tour of inspection. He was shocked immediately to discover that the priests and Levites had intermarried with local pagan women, and that the civil leaders had been prominent in this activity also. He lamented and confessed the sin publicly, and in this act of contrition the people ultimately joined. As a result, the offenders agreed for the most part to divorce their pagan wives. At the Feast of Tabernacles (Neh. 7:73–8:12) Ezra read the "book of the law of Moses" and expounded it to the people, persuading the assembly to abide by its provisions. Consequently, mixed marriages were widely renounced, and promises were made to observe the sabbath and the sabbatical year. In addition, the people undertook to meet the administrative needs of the temple. Subsequent to this, Ezra apparently returned to Persia to report to the king; there are no further records of his life.

The Talmud enshrined various traditions regarding Ezra, one of which identified him with the prophet Malachi (T. B. *Megillah* 15a; Targum on Mal. 1:1). Exaggerated claims about his personality and role included the statement that he would have received the revealed Torah of God had Moses never existed (Tosefta *Sanhedrin* 4.7).

EZRA, BOOK OF.

I. Name
II. Purpose
III. Sources
IV. Style
V. Languages
VI. Special Problems
A. Edict of Cyrus
B. Date of the Founding of the Temple
C. Lists in Ezra 2 and Nehemiah 7
D. Sheshbazzar and Zerubbabel
E. Chronology of Ezra 4
F. Date of Ezra's Coming to Jerusalem

I. Name.–The book of Ezra, like its companion Nehemiah, is named after the principal person mentioned in its pages. The two books are counted as one in the Talmud, in Josephus, and in the Canon of Melito (A.D. 171), and are so treated in the subscription of the MT. In the LXX Ezra-Nehemiah is called Esdras B, while an apocryphal book of Ezra is called Esdras A. The apocryphal Greek Ezra is usually in English versions called 2 Esdras or 3 Ezra following the Vulgate, which counts Ezra and Nehemiah as 1 and 2 Ezra. A later apocalyptic book is denominated 4 Ezra.

II. Purpose.–Ezra, with Nehemiah, completes the great postexilic history of Israel begun in 1 and 2 Chronicles. Although it incorporates a variety of sources, the book's function, in its present form, is clear from 2 Ch. 36:22 par. Ezr. 1:1-3. It was to show that God fulfilled His promise by the mouth of Jeremiah, that He would restore His exiled people to their inheritance in the land. To that end the Lord stirred up the spirit of great Persian monarchs (Cyrus, Darius, and Artaxerxes) on the one hand, and on the other hand the leaders of the community in Exile (Sheshbazzar, Joshua, Zerubbabel, Haggai and Zechariah, Ezra and Nehemiah). Historical details are clearly subordinate to the theological purpose, so that the structures and purity of the restored Israelite worship consistently overshadow details of political relationships of the period. The conviction of the author/editor(s) that the restored community must respond in pure forms is as basic to his book as his belief that God was working out His purpose. The object of the book is at once historical, theological, and polemical.

III. Sources.–The final editor of Ezra and Nehemiah is often considered to be the Chronicler; the larger question of when he wrote and how he used his sources remains a matter of dispute (*see* CHRONICLES, BOOKS OF). Support for a date considerably later than the events covered usually comes from the conclusion that certain names (e.g. Jaddua [Neh. 12:11, 22] and the later descendants of Zerubbabel [1 Ch. 3:19-24]) in these books represent later figures. In contrast, many scholars are quite ready to admit certain "marginal" additions and would retain a date for the bulk of the work closer to 400 B.C. In any case, if Ezra-Nehemiah is separated from the Chronicler's work (as has been argued) there is no reason to place the final form of the dual memoirs much after 400 B.C. (see VI below).

Four kinds of source material have been isolated in Ezra, though the provenance and genuineness of several of these sources has often been debated. Considered the most secure is the "Nehemiah Autobiography" (Neh. 1:1–7:5; 13:4-30). Of similar genre is the "Ezra Memoirs" section (Ezr. 7:27–9:15), a first-person account of the activities connected with Ezra's return under Artaxerxes, to which the third-person narratives of Ezr. 7:1-26 and Ezr. 10 may be added. The remainder of the work consists of Aramaic letters (4:8-22; 5:1–6:18; and 7:12-26), and various kinds of lists, the latter undoubtedly from temple records (Ezr. 2 par. Neh. 7; Ezr. 8:1-14; 10:18-43; Neh. 3; 10:1-27 [MT 2-28]; 11; 12:1-26). To this has been added the remaining narrative (Ezr. 1; 3:1–4:7; 4:23–5:6a; etc.), which forms an editorial framework for much of the source material cited.

Theories abound concerning the final arrangement of

Ezra-Nehemiah and its attendant purpose (cf. in R. W. Klein, pp. 368ff.). It is probably best to limit ourselves to the obvious purposes noted above, and examine the material and its arrangement from that standpoint.

IV. Style.–The diversified character of the style, languages, and other literary peculiarities of Ezra (and Nehemiah) may be explained by the large number and variety of the sources. Genealogical lists and diplomatic correspondence have their own well-documented style, for which the contents of Ezra and Nehemiah provide a rich source. The category of individual memoir is by no means so widespread in the ancient world; these books provide one of the earliest examples of this genre. As a means of related historical detail the third-person narrative is common not only in the biblical books but in such ancient historians as Herodotus and Thucydides as well. Nor is first-person narrative unknown — both the Babylonian monuments and the OT prophets employ it — but it is usually mixed with standard narrative. In Ezra and Nehemiah there is little mixing of the styles. Ezra begins with narrative, changes abruptly to a personal memoir (7:27, as a response to Artaxerxes' letter containing Ezra's commission), and reverts to the narrative third person (ch. 10), although the subject material remains largely the same. We must conclude that the preservation of the intact memoir sections came about because their presence and form gave a special authority to the entire book. More than anywhere else in the postexilic history these personal records breathe a sense of devotion and piety. The language of history has become the language of prayer, and the record of deeds done assumes the character of a holy crusade. Undoubtedly it was to capture something of this flavor that the final editor preserved the form as well as the content of such memoirs as he possessed.

V. Languages.–The language of the book is Hebrew, except 4:7–6:18 and 7:12-26, which are written in Aramaic. The Hebrew closely resembles that of Daniel, Haggai, and Chronicles, much more so than that of Sirach, written *ca.* 180 B.C. The Aramaic has been the subject of many contradictory claims, with frequent comparisons with the fifth-century Aramaic papyri of Elephantine in Egypt, and more recently with the first-century B.C. Genesis Apocryphon found at Qumrân. Differences between the language of Ezra (and Daniel) and the Palestinian first-century Genesis text have only begun to receive full scholarly attention. Again, the evidence is subject to quite varied interpretations, with G. L. Archer's claim to a clear separation (Archer, pp. 160-69) in contrast to H. H. Rowley's contention that both Daniel and the Genesis Apocryphon date from about the same period ("Notes on the Aramaic of the *Genesis Apocryphon*," in D. W. Thomas and W. D. McHardy, eds., *Hebrew and Semitic Studies Presented to Godfrey Rolles Driver* [1963], pp. 116-129; cf. J. Fitzmyer, *Genesis Apocryphon of Qumran Cave 1: A Commentary* [2nd rev. ed. 1971], pp. 19-29). *See also* ARAMAIC.

VI. Special Problems.–The book of Ezra has more than its share of problems, which fall generally into the following (sometimes overlapping) categories: (1) problems of internal harmonization (e.g., variants of the Cyrus decree in chs. 1 and 6); (2) problems of harmonization with Nehemiah (e.g., the lists in Ezr. 2 and Neh. 7); (3) alleged conflicts with secular sources (e.g., the reference to Jehohanan in Ezr. 10:6, with the Elephantine papyri); and (4) problems of a literary nature (e.g., the role of the "Artaxerxes letter" of Ezr. 4:7-22). Many of these problems have made Ezra constantly the subject of critical attack, so they will be examined in turn.

A. Edict of Cyrus (538 B.C.). In addition to variant accounts of the edict within Ezra itself (Ezr. 1:1-4 par. 2 Ch. 36:22f.; Ezr. 6:3-5), we now have access to the Persian king's own records of his declarations regarding the return of captured peoples. In the famous Cyrus Cylinder (*ANET*, p. 315; *see* picture in CYRUS) Marduk is said to have declared that Cyrus would "become the ruler of all the world," in return for which Cyrus resettled (the statues of) all the gods in their sacred cities and endeavored to fortify (repair) their dwelling places. The language is not unlike that of Ezr. 1:1-4 (the Hebrew version), although of course Yahweh rather than Marduk called Cyrus to restore Jerusalem. The copy of the decree given in ch. 6 (the Aramaic version) omits the call to the captured peoples to return; instead it focuses on aspects of funding and supply. There is no reason to deny authenticity to either. In light of the similarities of both to contemporary documents it is difficult to understand claims that the historian was confused about the period.

B. Date of the Founding of the Temple. Perhaps more to the point is the contention that both Ezr. 5:1 and Hag. 2:18 date the founding of the temple to 520 B.C., whereas the edict of Cyrus and references in Ezr. 3:10 and 5:16 point to a founding in 536 B.C. It has been suggested (cf. *IDB*, II, 217) that if the great Cyrus really had issued such an order it could hardly have been ignored, and further that it is not possible for the temple foundations to have been laid twice. But the picture in Ezra is precisely that. Cyrus' decree was ignored when the exiles encountered some opposition (the fault lay with their timidity, not with the strength of the decree), and it was not until years later that the project was resumed. Ezra 5, the very passage alleged to support the 520 date, is very clear that in this year the abandoned task was recommenced. Furthermore, there seems no reason why, after such meager beginnings and such a long hiatus, the building activity of 520 would not be treated as something of a new beginning.

C. Lists in Ezra 2 and Nehemiah 7. Why Neh. 7 repeats almost verbatim the list of those returning under Zerubbabel (Ezr. 2) is explained in the text, and it is hardly fair to claim that the second list "is said . . . to be a list of the inhabitants of Judea in the time of Nehemiah a century later" (*IDB*, II, 217). The heading in Neh. 7:5f. makes it plain that no such idea was in the mind of the writer; rather, the earlier list provided a basis for the later genealogical reckoning.

D. Sheshbazzar and Zerubbabel. According to Ezr. 1:8-11, Cyrus originally committed the task of rebuilding to Sheshbazzar, or Shenazzar, a son of the exiled Judean monarch Jehoiachin or Jeconiah (1 Ch. 3:17f.). In v. 18 we find that Zerubbabel was a nephew of Sheshbazzar and a grandson of Shealtiel. Thus, when 3:2 and 4:2f. picture the latter as the secular head of the work force we should not be surprised. The younger man functioned as the executor of the plan initially given to his uncle. By 520 B.C., when the work recommenced, Sheshbazzar was probably dead (ch. 5), but the search for the decree would still have to be done in his name (5:14-17).

E. Chronology of Ezra 4. Ezr. 4:1-4 appears to be a continuation of the narrative that reports opposition to the building of the temple in 536/535 B.C. But v. 6 dates the writing of an accusation to the beginning of the reign of Ahasuerus (Xerxes I, 486-465 B.C.), while the correspondence of vv. 7-23 comes from "the days of Artaxerxes" (probably Artaxerxes I, 464-424 B.C.), and deals with rebuilding the walls (v. 12) rather than the temple. Finally, v. 24 returns to the "house of God" theme and closes with a reference to Darius (presumably Darius I, 522-486 B.C.) The whole section may have been misplaced, of

course, but in light of the obvious nature of the conflict it is probably better to take the chapter as an episodal resumé of various attempts made by hostile forces to halt the work. However explained, it is a literary rather than a historical problem.

F. Date of Ezra's Coming to Jerusalem. Partly because of problems already alluded to and partly for other reasons, the statement in Ezr. 7:7 that dates the movement of Ezra from Babylon to the year 458 (the seventh year of Artaxerxes) has often been questioned. Since Nehemiah, whose arrival in Jerusalem is commonly dated to 444 B.C. (Neh. 1:1; 2:1), seems to know nothing of Ezra or his work before ch. 8, many have argued that the chronology of the two is confused or possibly reversed. Support for placing Ezra later than 458 is gained from Ezra 9:9 with its reference to a wall already in existence, as well as from Ezr. 4:12f. with its reference to the wall and opposition in the days of Artaxerxes prior to Ezra's coming. It is then contended that Nehemiah and his wall-building activities must have preceded Ezra's mission, whenever it was. Since the date for Nehemiah is considered firm, the easier course is to shift Ezra to a later period. A second problem is found in Ezr. 10:6 where Jehohanan the son of Eliashib is in the position of a high priest, presumably a contemporary of Ezra. For a detailed comment on the priestly lineage, *see* NEHEMIAH, BOOK OF; suffice it to say here that a reference in the Elephantine papyri to a "Johanan" as high priest in 408/407 B.C. is better harmonized with a later date for Ezra.

Three basic positions (and too many subpositions to mention) have emerged. The traditional date and order are still vigorously defended (J. S. Wright, *Date of Ezra's Coming to Jerusalem*), but perhaps the majority of contemporary scholars take the king of Ezr. 7:7 to be Artaxerxes II (Mnemon, 404-359 B.C.) rather than Artaxerxes I, thus dating the return at 398 B.C. A third position (cf. *BHI* [2nd ed. 1972], p. 363) emends Ezr. 7:7 to read the "thirty-seventh year," making the return at 428 and preserving the contemporaneity of Ezra and Nehemiah, though reversing their order. A few have even put both Ezra and Nehemiah in a later period (cf. R. W. Klein's article) though such radical solutions tend to create more problems than they solve.

The traditional dating leaves us with no more problems than its alternatives, and has the decided advantage of keeping the biblical order and the text of Ezr. 7:7 reasonably intact. Wright (pp. 17ff.) argues for an earlier wall, stopped forcibly under Artaxerxes I (Ezr. 4:7-23), and still a recent memory at the arrival of Nehemiah (Neh. 3:1).

The lineage of the high priest, likewise a knotty problem, can be solved by positing a second Jehohanan, the "son of Eliashib" (cf. Ezr. 10:6; Neh. 12:10) and thus uncle of the Jehohanan or Jonathan who, according to the Elephantine papyri, was high priest in 408 B.C. Since no date is attached to Ezr. 10, it could have occurred any time after Ezra's reforms of *ca.* 458. As neither Eliashib (known to be high priest in 444 [cf. Neh. 3:1]) nor Jehohanan is actually called high priest in Ezr. 10, the event can hardly be used to argue a detailed case. Alternative positions, particularly those which place Ezra's coming as late as 398 B.C., must either move the Chronicler (or whoever wrote Ezra and Nehemiah) to well after 300 B.C. or face the problem of how the true order could have been forgotten in such a short period.

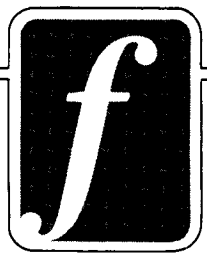
C. E. ARMERDING

EZRAHITE ez'rə-hīt [Heb. *'ezrāḥî*; Gk. *Asebōn*]. Found in 1 K. 4:31 and in the titles of Pss. 88, 89; the clan of traditional Hebrew sages headed by Ethan and Heman, sons of the Judahite Zerah (1 Ch. 2:6). Interpretations based on Gk. *autóchthōn* favor the meaning "aborigine, native of the land" (W. F. Albright, *ARI* [5th ed. 1968], pp. 127, 210).

EZRI ez'rī [Heb. *'ezrî*—'my help'; Gk. *Ezrai* or *Ezdri*] (1 Ch. 27:26). "Ezri the son of Chelub," appointed by David to be superintendent of agriculture.

EZRIL ez'ril (1 Esd. 9:34, NEB). *See* AZAREL 4.



FABLE. A parable-like story intended to teach truth in an interesting way.

Usually the characters in a fable are animals or plants that talk like human beings. Fables in the Bible include: Jotham's address to the people of Shechem (Jgs. 9:7-15); Jehoash's answer to Amaziah (2 K. 14:9); Isaiah's poem about the vineyard, which, although it did not speak, exercised its will against its owner (5:1-7; cf. Ezk. 19:2-9); and the debate among the members of the human body, told by Paul in 1 Cor. 12:14-26.

The term "fable," however, does not occur in the Bible. Although it appears in some English versions of the NT as a translation of Gk. *mýthos* (e.g., AV, ASV), it does so wrongly, based on the Vulg. *fabula*. It has subsequently been corrected to "myth" or "mythology" (RSV; NEB), "tale" (NEB), or "legend" (Good News Bible). *See* MYTH. G. F. HAWTHORNE

FABRICS. A word supplied by the RSV to fill out the meaning of 2 Ch. 2:7, 14; 3:14. The NEB employs "yarn." The AV has simply "purple, and crimson, and blue" without an additional noun. Dyes in the ancient Near East were obtained from such sources as the juice of crushed cochineal insects, mollusks, pomegranate rinds, and indigo plants. The skillful man sought by Solomon would, as the custom was, dye the threads and not the woven fabric.

FACE (noun) [Heb. usually *pānîm*, also *'ap*–'nose,' 'nostrils' (e.g., Gen. 3:19; 19:1; 48:12), *'ayin*–'eye' (e.g., Ex. 10:5, 15); Aram. *'ᵃnap* (Dnl. 2:46); Gk. usually *prósōpon*, also *ópsis* (Jn. 11:44), *stóma*–'mouth' (2 Jn. 12; 3 Jn. 14)]; NEB also SURFACE (e.g., Gen. 2:6; Acts 17:26), "(are) bent on" (Jer. 42:17), PRESENCE (Gen. 43:5), "made for" (Gen. 31:21), "(prostrated) himself" (Dnl. 2:46), "would have (nothing) to do with" (2 Ch. 29:6), SIGHT (Prov. 17:24), etc. (often not translated). Literally, the front part of the head of a human being or animal (e.g., Job. 41:14; Ezk. 41:19). The term is sometimes used figuratively in expressions such as "the face of" the deep (e.g., Gen. 1:2; Job. 38:30; Prov. 8:27), the waters (e.g., Gen. 1:2; 7:18; Job 24:18; 26:10), the ground (e.g., Gen. 2:6; 6:1, 7), the earth (e.g., Gen. 8:9; Ex. 32:12; Nu. 22:5; Jer. 25:26), the field (2 K. 9:37), the wilderness (Ex. 16:14), and even the moon (Job 26:9).

The human face was frequently regarded as representative of the person (e.g., Lam. 1:8; cf. the expression "face to face," Jer. 32:4; Acts 25:6; 1 Thess. 2:17), since personality is most clearly expressed through facial expressions. Often "my face" or "your face" is merely a circumlocution for "me" or "you" (cf. NEB Hos. 5:15; Ezk. 3:8; Mk. 1:2). Thus to seek someone's face (e.g., Ps. 24:6; 27:8; Hos. 5:15) was to make an effort to be in that person's presence (Ps. 105:4; Prov. 7:15; Acts 5:41; etc.), sometimes to obtain a favor (2 Ch. 7:14).

The range of emotions reflected in facial expressions includes determination (harden or "set" the face; cf. Isa. 50:7; Jer. 5:3; 42:17; Ezk. 3:8; Lk. 9:51); indifference, contempt, or rejection ("turn away the face," e.g., 2 Ch. 29:6); friendship or gracious favor (the face "shines" upon someone, e.g., Nu. 6:25); displeasure ("hide the face," e.g., Ps. 102:2; Ezk. 39:23); and hostility ("set the face against," e.g., Jer. 21:10). The face could also be averted out of an attitude of respect, fear, humility, or subservience (e.g., Ex. 3:6; 1 K. 19:13), while at a time of mourning (2 S. 19:4; Ezk. 12:6, 12) or imminent death (Est. 7:8) the face was completely covered. To "fall upon one's face" signified respect or submission, in which case the nose would touch the ground or be pressed into the earth by the foot of the conqueror (Gen. 19:1; 1 S. 5:4; etc.).

When applied to God, "face" often means God's presence (cf. Gen. 4:16; Mt. 18:10; 2 Thess. 1:9). (*See* ANTHROPOMORPHISM.) From the time of the wilderness wanderings the concept of "presence" was made specific in Hebrew worship through the use of the term "bread of the presence" (Heb. *leḥem pānîm*, lit. "bread of the face"; AV "shewbread"); *see* PRESENCE, BREAD OF THE. At times God hid His face from His people, showing indifference to their plight (cf. Dt. 31:17; Ps. 13:1 [MT 2]). When this happened prayers were made that God would again show His face (e.g., Dnl. 9:17). Moses was allowed to speak to God "face to face" (Ex. 33:11; cf. Dt. 34:10), but he was not permitted to see God's face, lest he die (Ex. 33:20, 23; on Gen. 32:30, *see* ANGEL II.C). To see God "face to face" is reserved for believers in the life to come (1 Cor. 13:12).

See also COUNTENANCE; PRESENCE.

Bibliography.–*RTWB*, pp. 173f.; *TDNT*, VI, *s.v.* πρόσωπον (Lohse). R. K. H.

FACETS [Heb. *'ênāyim*–'eyes'] (Zec. 3:9); AV, NEB, EYES. The small plane surfaces of a cut gem. A stone with seven facets will have an inscription engraved on it by Yahweh Himself, and it will then be given to the priest Joshua. (Cf. the use of *'ayin* for "surface" or "face" of the earth in Ex. 10:15; Nu. 22:5, 11.)

FACT. In 1 S. 24:11 the RSV renders a Hebrew infinitive periphrastically by inserting the term "fact." In several NT

passages "fact" also occurs, either as a translation of the Greek particle *hóti* (Mt. 16:8; Mk. 8:17; Acts 13:34) or of *toúto* (2 Pet. 3:5, 8) or *nuní* (1 Cor. 15:20). The plural is used to render *tó asphalés* (AV "the certainty") in Acts 21:34.

FACTIONS [Gk. *haireseis*] (1 Cor. 11:19); AV HERESIES; NEB DISSENSIONS; **FACTIOUS** [Gk. *eritheía*] (Rom. 2:8); AV CONTENTIOUS; NEB "governed by selfish ambition"; [*hairetikós*] (Tit. 3:10); AV, NEB, HERETIC. The term "factions" has various meanings in the NT. When used in a more neutral sense it connotes groups within a unified congregation. When used in its negative sense it denotes divisive persons or groups within a church.

The Gk. *haíresis* is from a root connoting a "free choice." Thus it becomes a term that describes the philosophical parties within Greek culture. This meaning is carried over into the NT to describe the Pharisees (Acts 15:5; 26:5) and the Sadducees (5:17). In these cases no negative connotation, such as the English "sect" carries, is implied; the meaning is closer to our word "party" (cf. RSV, NEB) in a political sense. Paul uses the Greek term in much the same way in 1 Cor. 11:19, where he says that "factions" (*haireseis*) within the church are needed so that discussion may prove what is correct. These "factions" are different from the "divisions" (*schísmata*, v. 18) that Paul had earlier condemned (1:10f.); the *haireseis* are groups that do not threaten the church's unity.

In other contexts *hairésis* takes on a negative connotation, as when Christianity is called the "sect of the Nazarenes" (Acts 24:5, 14; 28:22). This negative sense of the word became dominant in the patristic period (cf. the English term "heresy"). Thus the "factious man" is condemned in Tit. 3:10. The Christian is told not to have anything to do with such a man after one or two admonitions.

In Rom. 2:8 Paul denounces factiousness (Gk. *eritheía*) as a sin. *Eritheía* is used in classical Greek of one who seeks political office for the fulfillment of his selfish ambitions and for personal gain. Both *haireseis* and *eritheía* appear in the catalog of sins in Gal. 5:20. The RSV renders *haireseis* "party spirit" and *eritheía* "selfishness." This aptly shows the difference between the two words.

D. W. WEAD

FACULTIES [Gk. *aisthētérion*] (He. 5:14); AV SENSES; NEB PERCEPTIONS. A term denoting the "sense" that has the ability of moral discrimination (Bauer, rev., p. 25). Gk. *aisthētérion* occurs also in the LXX in Jer. 4:19 where Heb. *qîrôṭ libbî*, "walls of my heart," is rendered *tá aisthētéria tḗs kardías mou*, "the senses of my heart." In He. 5:14 this internal sense of perceiving and judging is regarded as becoming perfected by use or exercise (cf. Eph. 4:12; 1 Tim. 4:7; 2 Pet. 3:18).

FADE. The concept of diminishing, dying out, or withering is expressed in the OT by Heb. *qāpaṣ* (Job 24:24; AV "taken out of the way"; NEB "wilt"), *mālal* (Ps. 37:2; 90:6; AV "be cut down"; NEB "wither," "is parched"), *nāḇēl* (Isa. 28:1, 4; 40:7f.; 64:6 [MT 5]; NEB also "flowering," "have withered"), the pulal of *'āmal* (Nah. 1:4; AV, NEB, "languish"), and *kālâ* (Job 7:9; AV "is consumed"; NEB "break up"). In the NT "fade" translates Gk. *maraínō* (Jas. 1:11; NEB "wither") and *katargéō* (2 Cor. 3:7, 11, 13; AV "abolish," "done away").

In 2 Cor. 3:7-18 the participle *katargouménos* means "transitory" (cf. Bauer, rev., p. 417). Paul contrasts the transitory splendor of the old covenant (mediated through Moses) with the greater splendor of the new covenant (mediated through Christ and the Spirit). The fading brightness of Moses' face (cf. Ex. 34:29-35) symbolizes the provisional character of the old order of Mosaic law.

N. J. O.

FAIENCE fā-ons'. A porous body of finely ground quartz held together by a glassy "connective tissue" and covered with a colored vitreous glaze. The surface is a hard glaze; the body remains relatively friable. This material may be modeled, or even thrown on a wheel like potter's clay, to achieve its final shape before firing. Although many objects were coated with a separate glaze by dipping or painting, several different techniques were probably used for making small faience objects in antiquity. Using contemporary Persian bead making as an analogous industry, Wulff has reported that faience donkey beads are made by mixing the quartz powder with some alkaline binder and forming the object, which is then placed in a tray filled with charcoal, potash, copper oxide, and lime. The entire unit is baked in a low-fired furnace of 900-1000° C for a day, so that a potassium silicate glaze is formed within the tray. This glaze migrates to the individual beads, whose surface is wetted by the alkaline binder, and a thin, relatively even glazing results. A similar technique must have been used to produce the millions of mummy beads preserved from antiquity.

FAIL; FAILURE [Heb. *kālâ*, *rāpâ*, *kāraṯ*, *nāpal*, *ḥāsēr*, *yāṣā'*, *kāšal*, *'āḇaḏ* (Jer. 4:9), *'āzal* (Job 14:11), *'āyin* (Isa. 44:12), *bôš* (Joel 1:10, 12, 17), *gā'al* (Job 21:10), *ḥāḏal* (Job 19:14), *kāzaḇ* (Isa. 58:11), *kāhá* (Isa. 42:4), *kāḥaš* (Hos. 9:2; Hab. 3:17), *nāšaṯ* (Jer. 51:30), *'āḏar* (Zeph. 3:5), *'āzaḇ* (Ps. 38:10 [MT 11]; 40:12 [MT 13]), *pārar* (Eccl. 12:5),

tam (Ezk. 47:12); Aram. *šālû* (Ezr. 6:9); Gk. *ekleípō, anékleiptos* ("does not fail," Lk. 12:33), *hysteréō, adókimos, epileípō* (He. 11:32), *aníēmi* (He. 13:5), *asthénēma* (Rom. 15:1), *ekpíptō* (Rom. 9:6), *katalýō* (Acts 5:38), *ptaíō* (Jas. 2:10), *héttēma* (Rom. 11:12)]; AV also FORSAKE, PERISH, FALL, BE CONSUMED, BE WITHERED, DECAY, BE DRIED UP, COME TO NOUGHT, BE REPROBATES (2 Cor. 13:5-7), etc.; NEB also STRAIN AFTER, LOSE HEART, LACK, WANT, DWINDLE, GROW DIM, DISOWN, BE UNSURE, BE BARREN, COLLAPSE, PROVE (or BE) UNEQUAL (2 Cor. 13:5f.), BE DISCREDITED (2 Cor. 13:7), PROVE FALSE, "tender scruples" (Rom. 15:1), etc. To be or become insufficient; to become extinct or break down; to neglect or forsake.

Of the twenty-two Hebrew roots translated "fail" in the RSV, the most common is *kālâ:* "come to an end, cease to function or exist," hence "fail." Its subject is most often "eyes" in the idiom "the eyes shall fail," meaning "to die" — an example of synecdoche (a part representing the whole). In most cases this event is to be understood literally and not simply as disappointment (see Dt. 28:65; Job 11:20; 17:5; 31:16; Jer. 14:6; Lam. 4:17; cf. Lev. 26:16; 1 S. 2:33); but a spiritual-emotional meaning occurs in Ps. 69:3 [MT 4]; Lam. 2:11. With other subjects this verb can refer to the physical destruction of plant life (Isa. 15:6) or a wine harvest (32:10), or a figurative dying of a human spirit (Ps. 143:7) or flesh and heart (73:26).

Hebrew *rāpâ* means "abandon, desert, forsake." The formula "he will not fail you" (Dt. 4:31; 31:6, 8; Josh. 1:5; 1 Ch. 28:20) affirms that God will not abandon His people but will be with them in every national crisis. This was confirmed by Israel's experience. When they prepared to occupy the Promised Land, when Solomon prepared to build the first temple, and when God's people longed to return from exile, they found their God to be faithful. In contrast, 2 S. 4:1 (MT; cf. AV) speaks literally of the failing of the warrior's hands, an idiom for the loss of courage in battle.

The faithfulness of God is also expressed in God's conditional promise concerning the royal line of David: "there shall not fail you a man on the throne of Israel" (1 K. 2:4; 1 K. 8:25 par. 2 Ch. 6:16; 1 K. 9:5 par. 2 Ch. 7:18). Here Heb. *kārat* means "cut off," hence "be brought to an end" (cf. 1 K. 9:7). Another expression of God's faithfulness uses Heb. *nāpal,* literally, "fall down, be ineffective." God's promises do not "fall down"; God does not fail to fulfil His word (Josh. 21:45; 23:14; 1 K. 8:56). In contrast, human courage can fail (1 S. 17:32).

Hebrew *ḥāsēr* means "run out of, be without," and is used of oil (1 K. 17:14, 16) and bread (Isa. 51:14). Heb. *kāšal,* "stumble," is used figuratively for the failure of human strength and endurance (Neh. 4:10 [MT 4]; Ps. 31:10 [MT 11]; Lam. 1:14); men of violence will stumble in their plans (Dnl. 11:14).

In the NT, Gk. *ekleípō* means "cease, stop functioning." Its subject can be mammon (Lk. 16:9), the sun (23:45), or even human faith during a crisis (22:32).

Greek *hysteréō* means "come too late" or "come short, not far enough." In He. 4:1; 12:15, it expresses the failure of Christians to reach the goal of their faith, namely, God's rest. It also can mean "run short" or "run out" and is so used of wine in Jn. 2:3. The same word is translated "fall short" in Rom. 3:23.

Greek *adókimos,* "not standing the test," hence "unqualified, worthless," occurs in the context of endurance (2 Cor. 13:5-7). (*See* REPROBATE.) Faith must be proved by works; not to live the life one professes is to fail the test. (Cf. 1 Cor. 9:27; Tit. 1:16, where the same Greek word is used.) The opposite is to be approved (*dókimos,* Rom. 16:10; 2 Tim. 2:15; cf. Jas. 1:12).

H. W. LAY

FAIN. Occurs twice in the AV, in the sense of "gladly": (1) in Job 27:22 as the rendering of Heb. *bārô(a)ḥ yiḇrāḥ:* "he would fain flee" (lit. as in AV mg., "in fleeing he would flee"; RSV "he flees . . . in headlong flight"); (2) in Lk. 15:16, as the translation of Gk. *epithyméō,* "fix the mind or desire on," in the clause: "he would fain have filled his belly" (RSV "he would gladly have fed on").

FAINT; FAINTHEARTED. These terms translate a number of words as follows.

(1) Heb. *'āyēp* denotes exhaustion after harassment by an enemy (Dt. 25:18; Jgs. 8:4f.; cf. Jer. 4:31) or following frustration (Isa. 29:8).

(2) *Yā'ap* is used in reference to exhausted troops (1 S. 14:28, 31; 2 S. 16:2; cf. adj. *yā'ēp* in Jgs. 8:15). In Isa. 40:28-31, God is said not to grow weary, giving strength to those who are weary (cf. 44:12).

(3) *Rāḳaḳ,* denoting loss of resilience, is used in prophetic warnings to the nation to remain resolute in the face of enemy opposition (Dt. 20:3; Isa. 7:4; Jer. 51:46). In Job 23:16 it refers to faintness before God. *Raḳ hallēḇāb* in Dt. 20:8 means faint of heart.

(4) *'Āṭap* indicates a general state of faintness, whether of body (Ps. 107:5; Lam. 2:11f., 19) or mind (Ps. 61:2 [MT 3]; 77:3 [MT 4]; 142:3 [MT 4]; 143:4; Jonah 2:7).

(5) *'Ālap* describes despondency (Isa. 51:20), physical faintness from heat (Jonah 4:8) or thirst (Am. 8:13); or it is used figuratively (Ezk. 31:15).

(6) *Kāhâ* (Ezk. 21:7) and adjective *kēhâ* (Isa. 61:3) denote faintness of spirit.

(7) *Māsas* describes melting in fear (Nah. 2:10).

(8) *Mûg* is a verb for melt or waver, in the niphal meaning "be disheartened," thus "fainthearted" in Josh. 2:24.

(9) *Ḥālâ* indicates exhaustion from a journey (Isa. 57:10).

(10) *Pûg* describes the numbness of Jacob upon hearing that Joseph was still alive (Gen. 45:26).

(11) *Kāmah* depicts David's intense longing for God (Ps. 63:1 [MT 2]).

(12) *Kālâ* is used to describe the psalmist's wasting away for desire of the courts of the Lord (Ps. 84:2 [MT 3]).

(13) *Dāwwāy* depicts the depletion of bodily reserves due to illness (Isa. 1:5) or calamity (Lam. 1:13, 22).

(14) *Rāpâ* indicates collapse in the face of adversity (Prov. 24:10).

(15) Gk. *eklýō* describes collapse from general physical exhaustion (Mt. 15:32; Mk. 8:3; He. 12:3).

(16) *Apopsýchō* is used for fainting from fear (Lk. 21:26).

(17) *Oligópsychos* means discouraged (1 Th. 5:14).

R. K. H.

FAIR. This adjective, along with its comparative, superlative, and adverbial forms, is used in two distinct senses:

(1) [Heb. *ṭôḇ* (Gen. 6:2; 24:16; 26:7; Nu. 24:5; etc.), *ṭûḇ* (Hos. 10:11), *yāpeh* (Job 42:15; Ps. 45:2 [MT 3]; Cant. 1:8; Jer. 11:16; Ezk. 31:3; etc.), *yāpâ* (Cant. 7:6 [MT 7]), *tip'ereṯ* (Ezk. 16:17, 39), *ḥēn* (Prov. 1:9; 4:9), *šiprâ* (Job 26:13); Aram. *šappîr* (Dnl. 4:12, 21 [MT 9, 18]); Gk. *eudía* ("fair weather," Mt. 16:2), *eulogía* ("fair words," Rom. 16:18)]; AV also GOODLY, BEAUTY, GRACE (Prov. 1:9; 4:9), "garnish" (Job 26:13); NEB also GOODLY, SPLENDID, BEAUTY, GRACE, etc. Good, fine, beautiful.

The broadest term is *ṭôḇ,* which in the above passages

refers to aesthetic goodness, or beauty. The adjective *yāpeh* and its cognate verb always indicate that something is "pleasing" or "beautiful"; the word occurs most frequently in Canticles (1:8; 2:10, 13; 4:7; 5:9; 6:1, 10; 7:6). *Ḥēn* usually means "grace" or "favor," but in Prov. 1:9 and 4:9 it denotes "charm" or "a pleasing quality" (*see also* GRACE).

Especially interesting is Rom. 16:18, where for the hendiadys *diá tḗs chrēstologías kaí eulogías* the RSV has "by fair and flattering words" (cf. AV "by good words and fair speeches"; NEB "with smooth and specious words"). This is the only NT use of *eulogía* (cf. English "eulogy"), "praise, blessing," in a negative sense, reminding believers that beauty—whether visible or audible—is indeed sometimes only skin-deep (cf. 1 S. 16:7; Jas. 3:5-10).

(2) [Gk. *kalós*] (Mt. 15:26); AV MEET; NEB RIGHT; [*isótēs*] (Col. 4:1); AV EQUAL. Unprejudiced, right, just. *Kalós*, like Heb. *ṭôḇ*, is an inclusive term for "good"; here it means "morally good." *Isótēs* denotes "equality of treatment."

See *TDNT*, II, *s.v.* εὐλογέω κτλ. (Beyer); III, *s.v.* καλός (Bertram). R. F. YOUNGBLOOD

FAIR HAVENS [Gk. *kaloí Limenes*]. A harbor on the south side of CRETE (Acts 27:8). It is now identified with a bay E of Cape Littinos. The harbor opens toward the east and is sheltered on the southwest by two small islands. In 1853 a naval officer, Captain T. A. B. Spratt, discovered on a hill overlooking the bay a chapel dedicated to Paul. He also noted that southeast winds blowing in winter would make the harbor unsafe (see T. A. B. Spratt, *Travels and Researches in Crete* [1865], II, 1-6). This hazard and the necessity (as some have thought) of obtaining supplies at LASEA 8 km. (5 mi.) away may be why the ship carrying Paul soon left Fair Havens for Rome (cf. vv. 8-12). R. EARLE

FAITH [Heb. *'ĕmûn*–'trustworthiness'; Gk. *pístis*].

I. The Term
II. Faithfulness
III. Mere Belief
IV. The Faith
V. Special Faith
VI. Trust
VII. Justifying Faith
VIII. In Theology

I. The Term.–This is the noun corresponding to the verb "believe." The Heb. *'ĕmûn* has primarily the sense of faithfulness or trustworthiness, and *'ĕmûnâ* normally refers to the faithfulness of God, though it can be used of man's response (Hab. 2:4). The LXX translation and NT equivalent, Gk. *pístis*, is very common in the NT, and bears the sense not of faithfulness alone, but of the reliance or trust that is the basis of man's faithfulness, i.e., the faithfulness that expresses confidence in the faithfulness of God. Incidentally, the English word "faith" is akin to the Lat. *fides*, and probably to the Sanskrit *bhidh*, "unite," "bind." An interesting feature of the NT usage is that Paul regularly has the noun whereas John prefers the verb, though with no essential difference of meaning. The AV once uses "faith" for *elpís*, which properly signifies "hope" (He. 10:23).

II. Faithfulness.–Before discussing the central meaning of the word in the NT we should take note of some of the subsidiary senses. The first is faithfulness, as in the OT. This is obviously the true sense in Rom. 3:3, where the reference is to the faithfulness of God. It is also very probably the meaning in Gal. 5:22, where the context suggests a quality that, like love, joy, peace, etc., is a gift of the Holy Spirit. Some commentators favor here a special faith rather beyond the general trust in God common to all believers. Mt. 23:23 is another instance in which the rendering "faithfulness" might be apposite, though this is not the normal usage on the lips of Jesus.

III. Mere Belief.–Another special use of the term is found in Jas. 2:14-26, where all that is denoted is an intellectual assent which carries no element either of true committal or of implied obedience. We are not to suppose that this is the only meaning of the term in James, since a fuller content seems to underlie 5:15. Again, there is no need to think that James is here arguing specifically against Paul, as though Paul were teaching that mere belief is enough to justify. Luther's hasty conclusion to this effect caused him to miss the real qualities of this epistle (cf. Tyndale's judicious correction of Luther on the matter); and the later thesis of a Paul-James controversy has hardly contributed to a proper understanding of the NT teaching on either faith or works. In fact, James is warning against the antinomian conclusion that mere assent is the justifying faith of Abraham and his believing successors; and in this James and Paul (cf. also He. 11) are wholly at one. While faith justifies, this faith is the faith which is demonstrated in works, which operates by love (Gal. 5:6), and which necessarily implies obedient action (He. 11).

IV. The Faith.–In a few verses in the NT the reference is fairly clearly not to faith itself but to "the faith" in the sense of the body of Christian truth implied in faith. This could be the meaning in Rom. 1:5, though some expositors prefer "the obedience of faith" (RSV) to "obedience to the faith" (AV). It is certainly the natural sense in Gal. 1:23; 1 Tim. 4:1, 6; and Jude 3. There is, of course, no conflict between faith as a body of beliefs and the living, personal reality of trust in God. For trust is no mere emotional and mystical experience; it has an intellectual element. Certain things are believed about the God in whom trust is placed, about His nature, word, and works, about His relation to man as Creator, Lord, Judge, and Savior. The gospel itself is believed when there is trust in Christ, and the gospel is the faith. This sense is thus legitimate in itself, though it tended to become too prominent after the NT; and in abstraction from the main sense it could easily come to be linked with the mere belief James finds so inadequate.

V. Special Faith.–The Lord Himself speaks of a faith that is so strong it can work miracles (Mt. 17:20f.) or cause the working of miracles (9:28f.). He Himself enjoyed this faith in full measure even to the point of raising the dead, and Peter and Paul are notable examples from the apostolic period. As noted, some have suggested that the faith of Gal. 5:22 belongs to this category, and certainly the spiritual gift of 1 Cor. 12:9 seems to do so. That this is not the faith all Christians must have for salvation is clear from the latter verse, for the whole point of 1 Cor. 12 is that the Holy Spirit distributes different gifts to different people, and the "faith" of v. 9 is one of these gifts. Conversely, not all who have the faith to work miracles necessarily have justifying faith; at least this seems to be implied in Mt. 7:22f.

VI. Trust.–The main sense of the word "faith" in the NT is that of trust or reliance. When this is the sense, the verbal form ("believe") is often accompanied by a preposition which brings out the meaning. Gk. *en* and *epí* with the dative express reliance on the thing or person in whom confidence is put, while the distinctively NT use of *eis* or *epí* with the accusative expresses the movement of confident committal to the object of faith. In very many cases it is a person on whom or toward whom there is faith, namely, God or Jesus Christ. This usage brings out very

strongly the *fiducia* ("trust") aspect in faith, for this kind of reliance or committal signifies much more than intellectual belief. It is directed primarily not to facts or codified beliefs, but to God Himself in Jesus Christ.

Yet the intellectual element is included. A person is not an abstraction. Nor does a person exist merely as an existential object or concept. A person is and says and does things. To have faith in a person is to believe certain things about this person, his nature, word, and work. It is more than this, but it is certainly not less. One does not need to know everything, nor even everything that is knowable, but it is essential to know and believe something. One cannot really trust in Jesus Christ without believing that He is the Messiah, the incarnate Son, the crucified and risen Savior. The words and works, the essential being of Jesus, are all part of His person. It is not possible to have a vague attachment to a shadowy construct of one's own imagining and to say that this is faith in Jesus Christ. Or perhaps it is, for God's mercy is great and broad. But this can only be faith *per nefas*. True faith is confident attachment to the Jesus of the NT.

The content of faith is given in and by the Word of God. The Word of God is, of course, Jesus Himself. But it is also the word written and the word preached. This is why Paul says that sending and preaching and hearing are so important. "Faith comes from what is heard, and what is heard comes by the preaching of Christ" (Rom. 10:17). It is by receiving and believing the words and works recorded in Holy Scripture and proclaimed by ministers of the gospel that Jesus Himself is received and believed (Jn. 1:12; cf. 20:31). In this respect it should be noted that if there is no confidence in the testimony of Scripture it is hard to see how there can be real faith either in the God who gave the testimony (1 Cor. 2:13; 1 Thess. 2:13) or in the God to whose word and work testimony is given. As it is with Christ Himself (Jn. 3:11, 32ff.), so it is with the record that bears witness to Him (cf. Lk. 1:1,4).

Yet, while faith must include an intellectual element, i.e., the reception of the words and works fulfilled in Christ, recorded in Holy Scripture, and proclaimed in genuine preaching, a mere assent to the body of facts and truths herein contained is very much less than faith. For, in the first place, even to understand the facts and truths in their real significance an illumination is required that goes beyond ordinary comprehension (1 Cor. 2). This is the illumination that is effected by the Holy Spirit bearing His own witness along with that of the written and spoken word. Again, this illumination carries with it more than intellectual perception. It is a disclosure not only of facts and truths, but of the true nature of God in Jesus Christ and of the true nature of man as the lost sinner who has no hope of salvation except in God. As such, it carries with it also a redirection of the emotions and a liberation of the will, so that there can be true committal to God and a true reorientation of the whole life and person in this committal. If faith comes by hearing the word, it comes by hearing this word as the Word of God by the Holy Spirit. It comes through the operation of the illuminating and life-giving Spirit Himself (1 Thess. 1:5). Hence faith in the true sense is not a human possibility; it is the gift of God. While it may be true that the reference of Eph. 2:8b ("it is the gift of God") is not just to faith, it is also true that faith is consistently presented in Scripture as a divine gift or work. It is brought into the closest relation to regeneration in Jn. 3. To come to Christ one must be drawn by the Father (Jn. 6:44). It is given to Christians to believe and to suffer (Phil. 1:29). The Lord adds to the Church those that are saved (Acts 2:47). This is why faith is so confident: it is a trust in God evoked by God. This is why faith is so total and so powerful: it is the operation of God which claims and directs and energizes the whole man.

VII. Justifying Faith.–What, then, are the implications of faith in the NT sense? There are many different angles from which one might legitimately approach this question, but perhaps it will be best to bring out the features that are most prominent in Scripture itself. First, faith implies the honest recognition of one's own sinfulness. The faith that comes by hearing is acceptance of the truth about oneself. This is why repentance and faith are so closely connected (Acts 2:38-44; 17:30, 34; 26:20). Repentance, however, is more than recognition of sin. It is recognition that this sin is under the judgment of God. This is another aspect of what one might call faith on its negative side (Rom. 2:1-3). A sense, even a proper fear, of judgment is an essential ingredient in faith, for faith is faith in the righteous God, who neither can nor will relax His righteous demand nor overlook its unrighteous transgression. Repentance, however, takes no refuge in an illusory hope of meeting God's justice by amendment. This brings us to a third negative characteristic of faith: it is a recognition of helplessness, a renunciation of all other trust than trust in God. No works either under the law or apart from the law can avail for justification before God (Rom. 2:1-3; 3:19f.). There is nothing and no one else upon whom we can rely. Our trust must be in God alone.

But can we trust in God? This brings us to the positive and crucial aspect of faith. For faith is the movement not merely away from helpless self but toward God as the one who has in fact helped in Jesus Christ. The gospel is the news that God Himself has acted for our justification and that we can and should trust in Him. Faith is this committal to God. It is no blind committal, for the God in whom we trust is already revealed to faith. The action on which we rely has already taken place. Faith is thus acceptance. It is acceptance of the righteousness God has purchased for us by the death of Jesus Christ in our stead and on our behalf. It is committal to the God who is both just and the justifier of those who believe in Jesus, not in a puzzling intellectual paradox, but in the actual deed fulfilled in the incarnate Son. Faith is the conviction, grounded in the message of God Himself in the gospel, that though we are unrighteous in ourselves we are now righteous and accepted in Jesus. Faith is the humble recognition that sin is pardoned, its penalty borne, righteousness imputed. Faith is entry into the new relation of sonship established thereby. When there is no one else to trust, God is trusted, not as a last resort, but because in His revealing and reconciling action He shows Himself to be wholly worthy of trust. In this sense, i.e., because God has already acted, faith is justifying faith (cf. esp. Rom. 3–4). *See also* JUSTIFICATION.

It is important to note at this point that faith is not justifying faith because it is itself a work that avails as the ground of justification. Certainly, Abraham's faith was imputed to him for righteousness (Rom. 4:3). But behind faith is grace (Rom. 4:16; Eph. 2:8). The power of faith is the power of its object. Merely to believe does not help. One has to believe in God, in the promise, in Jesus Christ, in His word and work, in what God has done in Him. Faith is justifying faith, not because it justifies, but because it grasps the justification God Himself has effected. As Calvin finely observed, faith plays a passive role in justifying. It is necessary, but only as the empty hand which receives or the empty vessel which is filled. What really forgives is the atoning blood of Jesus Christ. What really justifies is the righteousness of Jesus Christ. Faith is the divinely appointed and divinely effected means whereby this forgiveness and righteousness are appropriated to us, whereby we are identified with Christ and enter into justification. It

must be said, and said with force and conviction, that justification is by faith alone. But this can be said only because there stands behind it the even more fundamental truth that justification is by grace alone, i.e., by Christ alone.

Yet faith is not just passive. Divinely given, involving a total reorientation of life, it is also supremely active. Closely related to the regenerative work of the Holy Spirit, it is the dynamic behind the Christian life. To believe in Christ is in fact to have eternal life (Jn. 5:24). The Christian life is the life of faith. Faith is identification with Christ, not only in justification, but in sanctification. Faith means assurance of the resurrection (Jn. 11:25f.). It means the ability to do even greater works than those of Jesus (Jn. 14:12). With its certainty that the promises of God, fulfilled or not yet fulfilled, are all true, it is the knowledge of things not yet seen (He. 11:1). Faith is the seeing of life from the perspective of eternity. Faith is the inward compulsion, not only to trust God, but, trusting Him, to obey Him, to do exploits in His name, to bring forth fruits of righteousness, to find expression in faithfulness. Thus Abraham, believing in God, does things consistent with his faith. There is no cleavage between the faith that looks to God alone and the works which are the fruit and expression of obedient faith. Christians walk in faith (2 Cor. 5:7). They are strong in faith (cf. 1 Cor. 16:13). They rejoice in faith (Rom. 15:13). They are the household of faith (Gal. 6:10). They bear the shield of faith (Eph. 6:16). Their faith works by love (Gal. 5:6). Faith is one of the three things that abide (1 Cor. 13:13). The greatest of these is love; but the love for God, which is the very essence of love, is itself rooted and grounded in faith. It is the trusting response of love to Him who first loved us.

VIII. In Theology.–In the doctrinal presentation of faith, four main trends are to be observed corresponding to the four main epochs in the history of dogma: the patristic, the medieval (continued to a large degree in Roman Catholicism), the Reformation (represented today by orthodox Protestants), and the liberal Protestant. In a brief review it is impossible to do justice either to the details of, or variations within, the different movements. Nevertheless, it will be helpful to characterize the general tendencies, for thereby light is shed both on the pitfalls to be avoided and on the path to be followed in fidelity to the biblical and apostolic norm.

The patristic age, for all its magnificent achievements, quickly lost sight of the essential element in NT faith and tended to subsume faith under "the faith," or assent to the faith. This was not without reason, for the early Church had to face heresies that might easily have destroyed its message. There was need both to formulate the orthodox faith and to regard assent to it as an important element in true Christian profession. Nor should the development be seen out of proportion, for, in the first instance the creed was not just a statement of beliefs and facts but an expression of faith in God the Father, Son, and Holy Spirit. Furthermore, a transformation of life was expected as part of conversion to Christianity. Yet a trend toward intellectualization of faith is plainly to be seen, e.g., in Tertullian's concept of the rule of faith, or in the Alexandrian view of faith as little more than minimal assent to the rudiments. One of the reasons for this, and yet also a result of it, is failure properly to grasp the Pauline doctrine of justification, so that with the developing doctrine of baptismal regeneration, distorted emphasis on the problem of postbaptismal sin, and the excessive growth of monasticism in both theory and practice, faith and its role are increasingly misconceived and minimized in the early centuries.

The full results of this false development are to be seen in the Scholastic theology of the Middle Ages. Some fine notes were still sounded. Hardly anywhere could one find more magnificent expression of loving trust in God than in Bernard of Clairvaux. Lombard, followed by Aquinas, could still insist that unbelief or insincerity blocks the operation of grace in baptism. Yet the general dogmatic trend was toward an understanding of faith alone (*informata*) as the mere assent which may be very largely induced by reason and which in an adult opens the way to baptism and thus earns congruent grace, without which this faith is not adequate for justification. With baptismal grace the habit of virtue or love is then implanted, and faith is no longer alone. It is now formed faith (*formata*), the faith which is completed by love and which does in fact justify. This in turn brings further grace, the grace of condignity, so that unless grace is forfeited by mortal sin, final salvation is secure. But faith in itself has the significance only of a first and intrinsically not very important step in this whole process. It is essential, but alone it is not enough. A further reduction of faith is to be seen in the tendency toward an additional distinction between implicit faith and explicit faith. This distinction, already prepared in Scholasticism, is more fully worked out in later Roman Catholicism. It rested on the widespread ignorance of the laity and the alleged danger that instruction might open the way to heresy. The argument was that for ordinary people, who do not have the capacity for or the opportunity of instruction in the faith, and who may well be better without it, faith (implicit) is simply believing what the Church teaches, whether this be known or unknown. For the majority, no more is necessary for salvation. Even as assent, then, faith was robbed of any content except insofar as the Church itself now became the true object and content. In these circumstances, it is hardly surprising that Roman Catholicism has found it difficult to accept or even to understand the Reformation doctrine of justification by faith.

It was Martin Luther supremely who rediscovered the doctrine of justification by faith and therewith the rich signification and significance of faith in the biblical sense. His own lack of assurance and his intensive biblical study brought him to this epoch-making understanding, which had dogmatic and practical ramifications far beyond anything he himself had first envisaged. The heart of it all is that faith is no mere acceptance of facts and doctrines. It is trust in Christ and His accomplished work as the only but all-sufficient ground of salvation. Because of this orientation to Christ, faith alone is enough for justification. This does not mean that it alone is meritorious. Faith is a looking away from all human merit to the unique merit of Christ Himself. In this sense it is not a first step which must be followed by other steps if there is to be justification. It embraces the whole life of the Christian, so that there can be abiding assurance of forgiveness in spite of postbaptismal sin. Nor is faith merely a human response. It is the work of the life-giving Spirit, and as such it is itself a living and active thing which is naturally and necessarily accompanied by fruits of righteousness. These fruits are not a ground of justification. Justification and sanctification are not to be confused. On the other hand, the absence of these fruits is a sign that there is no true faith. Justification and sanctification are not to be separated. Calvin put this aspect of the matter finely in a single judicious sentence when he said that "it is faith alone which justifies, but the faith which justifies is not alone."

The beginnings of departure from the Reformation position are to be seen already in the 16th and 17th centuries. On the one hand, Osiander moved toward a new subjectivization with his doctrine of imparted righteousness. Antinomianism, on the other hand, attempted an impossible abstraction of faith from works. Arminianism, too, was

responsible for a dangerous development with its implication that the free response of faith is the last stone, as it were, which we ourselves place in the edifice of salvation. The solid orthodoxy of the 17th cent. (both Lutheran and Reformed) was not free from the tendency to substitute right belief (including belief in the doctrine of justification by faith) for the true and living faith of the NT. The rise of liberal Protestantism brought even more serious departure from Reformation teaching, whether in the form of emotionalized psychological faith (Schleiermacher), moralism (Ritschl), faith mysticism (Schweitzer), or a new intellectualism (rational orthodoxy). The main trend has been toward a subjectivizing of faith, as though it were simply a human psychological factor which in some form accomplishes of itself a right relationship with God and the world. Existentialism as advocated by Bultmann and his disciples carries this subjectivism to the new point where it is the glory of the believer not to be concerned whether Jesus ever lived or died or rose again, but to commit himself to Jesus as the Christ who brings new light and life and to find the existential reality of His saving work by faith. Here the whole movement of liberal Protestantism reaches a climax. Not only is faith psychologized, it is completely divorced from any historically objective content (the message that evokes faith is also existential), so that faith in Christ is no longer real faith in the real person who has accomplished real work and who comes to us through the real Spirit in a real encounter. At one extreme this is as far from the faith of the NT as is the unformed or implicit faith of Roman Catholicism at the other.

Yet Luther's discovery has not been in vain. Orthodox Protestantism has continued to maintain its witness to biblical faith, with Pietism to prevent it from sinking into barren intellectualism. Continuing intensive linguistic and exegetical work has confirmed and deepened the exposition of the Reformers. Renewed interest in the theology of the Reformation has brought to light a wealth of dogmatic material. Karl Barth has attempted a solid restatement of the biblical and Protestant position. Roman Catholicism, too, has begun to show a new appreciation of the biblical teaching and the Reformation concern. An age of misunderstood faith has also become an age of diminished faith, and it is obvious that neither the new existentialism nor the new techniques and principles of communication, but only the NT faith in Christ which is the work of the Holy Spirit, can bring about any genuine restoration. This alone is faith, and there can be no substitute.

FAITHFUL; FAITHFULNESS [Heb. *'āman*, *'ĕmûnâ*, *'ēmûn*, *'ĕmeṯ*; Aram. *'ᵃman*]; AV also TRUTH, TRULY, STEADFAST (Ps. 78:8), ASSUREDLY (Jer. 32:41), "in their office of trust" (2 Ch. 31:15, 18); NEB LOYAL, TRUSTWORTHY, TRUE, TRUTH(FUL), SURE, CERTAIN, WELL-MEANT (Prov. 27:6), of steady character (Prov. 28:20), etc.; [Heb. *ḥāsîḏ*, *ḥeseḏ* (Jer. 31:3)]; AV HOLY ONES, SAINTS, LOVINGKINDNESS; NEB SAINTS, LOYAL SERVANTS, UNFAILING CARE; [*kēn*] (Jgs. 5:15); AV "so" (adverb), NEB "stood by"; [Gk. *pistós*, *pístis*]; NEB TRUSTY, TRUSTWORTHY, TRUST(ED), "keep faith," TRUE, "will not fail," FIDELITY, BELIEVER, FAITH; [*prosménō*] (Acts 11:23); AV CLEAVE; NEB "hold fast."

I. Vocabulary
II. Faithfulness of God
III. Faithfulness of God's People

I. Vocabulary.–The qal of the Heb. *'mn* stem, which is found only in the participle, refers to "carrying" a child (e.g., Nu. 11:12) or "caring for" a child (e.g., Isa. 49:23). Whether carrying or caring is the original sense is not clear, nor is that as important as the conjunction of the two — of the supporting activity and the intimate relationship. Indeed, both are probably developments from a more likely root meaning of "firmness, stability." Thus, in the niphal form the meaning is "show oneself firm," "be faithful." The hiphil form means "cause to be supported by, rely on, commit oneself to, believe." The substantives, Heb. *'ĕmeṯ* and *'ĕmûnâ*, represent the sense of the niphal, "faithfulness." It is noteworthy that the LXX renders these words mainly by Gk. *pistós* and *alétheia*.

II. Faithfulness of God.–The faithfulness of God can be defined as His "determined loyalty to a gracious covenant." This is disclosed first of all by the relation of "faithfulness" to "steadfast love" (Heb. *ḥeseḏ*, i.e., "love conforming to the covenant"; cf. Ps. 138). "Faithfulness" is frequently linked to "steadfast love" by means of a copula (e.g., Ps. 25:10; 40:10f. [MT 11f.]; 57:3 [MT 4]). Such a construction normally indicates that the terms thus joined are nearly synonymous or at least have some special bond. Likewise, "faithfulness" frequently parallels "steadfast love" in Hebrew poetry (e.g., Ps. 57:10 [MT 11]; 108:4 [MT 5]; 36:5 [MT 6]; *see* POETRY, HEBREW III). (The RSV once translates *ḥeseḏ* as "faithfulness" when referring to God, Jer. 31:3.)

There are other words to which "faithfulness" is sometimes joined or paralleled. It is joined to "thy saving help" (Heb. *tᵉšûʿāṯᵉḵā*, Ps. 40:10 [MT 11]). It parallels "thy wonders" (Heb. *pilʾᵃḵā*, 89:5 [MT 6]). In Ps. 33:4 it parallels "upright," and in 111:8 it is joined to "uprightness" (Heb. *yāšār*). In 111:7 it is joined to "just" (Heb. *mišpāṭ*). In 119:138 and 143:1 it parallels "righteousness" (Heb. *ṣeḏeq*). These conjunctions and parallels, while occurring considerably less frequently than with *ḥeseḏ*, point also toward a determined loyalty to a gracious covenant.

This interpretation of faithfulness is beautifully confirmed in Hos. 2:19f. (MT 21f.), where God promises to betroth His unfaithful people forever in righteousness (*ṣeḏeq*), in justice (*mišpāṭ*), in steadfast love (*ḥeseḏ*), and in faithfulness (*'ĕmûnâ*). That rich association of words itself points to God's determined loyalty to a gracious covenant, but the covenant reference is sealed when the Lord continues (2:23 [MT 25]): "and I will say to Not my people, 'You are my people'; and he shall say, 'Thou art my God'" (cf. Zec. 8:8). Dt. 7:9 affirms that God is faithful and explicates that affirmation in terms of God's keeping covenant (Heb. *bᵉrîṯ*) and His steadfast love (*ḥeseḏ*).

Faithfulness is seen as an attribute of God (Dt. 7:9; 32:4; Ex. 34:6; Ps. 31:5 [MT 6]; Isa. 49:7). And because God Himself is faithful, so are all His works faithful (and just, Ps. 111:7). His works are done in faithfulness (Ps. 33:4); His judgments have been appointed in faithfulness (119:138); His paths are faithfulness (25:10). The psalmist can even discern that afflictions are given in faithfulness (119:75). God gives men their recompense faithfully (Isa. 61:8); His plans are faithful (25:1).

The psalmists praise God for His covenant faithfulness (Ps. 33:4; 36:5 [MT 6]; 57:10 [MT 11]; 71:22; 92:2 [MT 3]; 98:3; 100:5; 108:4 [MT 5]; 117:2; 119:90; 138:2; cf. Gen. 24:27; Isa. 25:1) and witness to the congregation of His

faithfulness (Ps. 40:10 [MT 11]; 91:4). Moreover, they base their appeals upon this faithfulness (Ps. 30:9 [MT 10]; 40:11 [MT 12]; 54:5 [MT 7]; 57:3 [MT 4]; 69:13 [MT 14]; 86:15; 88:11 [MT 12]; 115:1; 143:12; cf. Gen. 32:10, where Jacob appeals for safety from Esau on the basis of God's steadfast love and faithfulness even while he acknowledges that he is not worthy of it, and Lam. 3:23, where there is no overt appeal but whatever hopefulness remains is based upon God's faithfulness). Sometimes the appeal is not only based on God's faithfulness, but is specifically an appeal for God's faithfulness (Ps. 61:7 [MT 8]; cf. the bidding of David to Jabesh-gilead [2 S. 2:6] and to Ittai [15:20]: "May the Lord show steadfast love and faithfulness to you"). This sentiment is beautifully expressed in Ps. 85. The psalmist praises God for His gracious favor in the past, then appeals to God to manifest His favor in the present distress, and finally, with the assurance of hope, recites his vision of a time when steadfast love and faithfulness will meet, when righteousness and peace will kiss, when faithfulness will spring up from the ground and righteousness will look down from the sky.

Psalm 89 gives typical expression to these themes. It begins with praise for God's steadfast love and faithfulness, allowing faithfulness its connotations of both carrying and caring, both strength and love. The psalmist recalls God's covenant with David and the faithfulness and steadfast love with which God surrounded that covenant (vv. 24, 33 [MT 25, 34]); and on this basis (v. 49 [MT 50]) he appeals to God to grant His people victory. Similarly, Hezekiah's song includes both an appeal for health on the basis of God's faithfulness (Isa. 38:18) and praise and witness to His faithfulness: "the father makes known to the children thy faithfulness" (v. 19).

It is of God's covenant loyalty that the prophets assure His people, and it is on this assumption that they promise a restored Israel (Isa. 49:7; Hos. 2:20; Jer. 32:41). The conclusion of Micah (7:20) is typical: "Thou wilt show faithfulness to Jacob and steadfast love to Abraham, as thou has sworn to our fathers from the days of old."

The NT reaffirms this faithfulness of God, now powerfully and finally confirmed in Jesus Christ. "God is faithful [Gk. *pistós*]," Paul says, "by whom you were called into the fellowship of his Son, Jesus Christ our Lord" (1 Cor. 1:9). God's *pístis* surely continues to mean His determined loyalty to His gracious covenant. God has fully shown His caring and His carrying, His love and His strength, in the cross and resurrection of Jesus Christ (cf. 2 Cor. 1:18).

Because of that loyalty, Paul is confident that God will sustain the community even in temptation (1 Cor. 10:13; cf. 1 Thess. 5:24; 2 Thess. 3:3; He. 10:23; 11:11). Interestingly, in 1 Pet. 4:19 it is specifically the Creator who is called faithful (although this passage does not lose sight of the final revelation of God's covenant faithfulness in Jesus Christ). The one God who made heaven and earth can be entrusted with our souls because He has the strength and the love to carry and to care. Because God is faithful and just (Gk. *díkaios*; cf. Heb. *ṣeḏeq*), because He is loyal to His gracious covenant, He forgives our sins if we confess them (1 Jn. 1:9).

It should be observed that many times in the NT "truth" (Gk. *alḗtheia*) is to be understood against the background of "faithfulness." The LXX frequently translates *ʾĕmeṯ* as *alḗtheia*. Consider, e.g., Jn. 1:17: grace and truth (Gk. *hē cháris kai hē alḗtheia*; cf. Heb. *ḥeseḏ wᵉʾĕmeṯ*) came through Jesus Christ.

III. Faithfulness of God's People.—God's loyalty to His covenant demands a response of loyalty from His people. God is faithful, says Moses in Dt. 7:9 (after reminding the people of the heart of the law, chs. 5–6), and therefore His people are required to respond with obedience to His commands.

When the Israelites were finally settled in Canaan, God renewed His covenant with them; Joshua's injunction was again that they serve the Lord in sincerity and faithfulness (Josh. 24:14). Similarly, Samuel recounted God's faithfulness and then demanded of the people that they serve Him faithfully with all their heart (1 S. 12:24).

It is striking that whereas "faithfulness" is most often linked with "steadfast love" when God is the subject, it is linked with other terms when the human response to God is described: with "righteousness" (Heb. *ṣeḏeq*, 1 S. 26:23; 1 K. 3:6). "uprightness" (Heb. *yāšār*, Ps. 111:8; 1 K. 3:6), "sincerity" (Heb. *tāmîm*, Josh. 24:14), and "with all your heart" (Heb. *kol-lᵉḇaḇ*, 1 S. 12:24; Isa. 38:3; 1 K. 2:4; 2 K. 20:3; 2 Ch. 19:9). Human loyalty to God is plainly not a gracious act but rather a dutiful response.

It must, however, be mentioned here that *ḥāsîḏ*, a derivative of *ḥeseḏ*, is used of God only twice (Jer. 3:12; Ps. 145:17; possibly Job 39:13); for the rest it is used of man's loyalty with its disposition toward pious, humble service (e.g., Ps. 50:5; 1 S. 2:9; in Ps. 89:19 [MT 20] of David). *See* HASIDEANS; SAINTS.

The "way of faithfulness" (Heb. *dereḵ-ʾĕmûnâ*) is the law of God (Ps. 119:30). The commands of God are to be performed in faithfulness and uprightness (Ps. 111:8), and disputed cases are to be judged in faithfulness (2 Ch. 19:9). God makes His claim upon both the dispositions and the actions of mankind; He claims a total response of faithfulness.

Such faithfulness brings reward (1 S. 26:23); the faithful are preserved (Ps. 31:23 [MT 24]). In Ezra's great confession he recites God's call to Abraham, Abraham's response of faithfulness, the promise of land, and its fulfillment (Neh. 9:8). Thus faithfulness brings the fulfillment of God's promises. David asks for vindication on the grounds that he has walked in faithfulness to God (Ps. 26:3), and Hezekiah protests God's decision with the claim that he has walked before Him "in faithfulness and with a whole heart, and . . . done what is good in thy sight" (Isa. 38:3; cf. 2 K. 20:3; 2 Ch. 31:20). It is clear, then, that faithfulness provides a basis of appeal before God.

The relation of faithfulness to both the law and the fulfillment of God's promises is assumed by David when he exhorts Solomon to follow the Mosaic law lest national ruin follow, and to be faithful to God so that his reign will be blessed (1 K. 2:4). It is in the context of this admonition that Solomon, seeing its truth in God's blessing upon his father David, asks for wisdom (1 K. 3:6).

But human beings are not faithful. God's faithfulness frequently stands in contrast to the unfaithfulness of men. "[He has] dealt faithfully and we have acted wickedly" (Neh. 9:33; cf. Ps. 78:8; cf. also 2 Tim. 2:13 and Rom. 3:3f. in the NT). Of this the psalmists lament and the prophets complain. Dt. 32:20 sees idolatry as lack of faithfulness, while Hosea cites "swearing, lying, killing, stealing, and committing adultery; they break all bounds" as evidence of a lack of faithfulness to God (Hos. 4:1f.; cf. Ps. 12:1 [MT 2]). Faithfulness to God's covenant entails, of course, the prohibition of idolatry; but beyond that what is required is not cultic purity so much as justice to, and care for, the neighbor. (Cf. the prophetic vision of a faithful city in Isa. 1:21, 26; Zec. 8:3.) *See also* FAITHLESS.

We have seen that faithfulness is not joined with steadfast love (*ḥeseḏ*) when man's faithfulness to God is in view (see II above). But when man's faithfulness to man is considered, once again faithfulness, as a human virtue, is typically joined with steadfast love. The spies tell

Rahab they will deal with her "kindly" (*ḥeseḏ*) and "faithfully" (*ʾĕmeṯ*, Josh. 2:14). The wise man exhorts his son, "Let not loyalty and faithfulness forsake you; bind them about your neck, write them on the tablet of your heart" (Prov. 3:3). Human beings ought to form their characters toward steadfast love and faithfulness. These human virtues do good (Prov. 14:22) and cover evil (16:6); their effects in conduct are what God delights in (12:22).

These are especially virtues in a king (Prov. 20:28); one can rely on such a king. The promised king of Isa. 16:5 will rule in faithfulness, seeking justice and being swift to do righteousness. Faithfulness and righteousness are the panoply of the Messiah in 11:5. The promised servant will faithfully bring forth justice (42:3).

But faithfulness is a virtue for other roles as well: for the servant (1 S. 22:14; 2 S. 20:19), the messenger (Prov. 13:17; 25:13), the witness (Prov. 14:5; Jer. 42:5), the priest (1 S. 2:35; 2 Ch. 31:18), contributors (2 Ch. 31:12), administrators (31:15; Dnl. 6:4), workmen (2 Ch. 34:12), preachers (Jer. 23:28). Being counted faithful is reason for appointment to roles in Neh. 7:2 (charge over Jerusalem) and 13:13 (treasurer of the storehouse). Faithfulness here is role-relative; the priests, e.g., are faithful "in keeping themselves holy" (2 Ch. 31:18). Social expectations are attached to these roles, creating a kind of covenant, and thereby creating role obligations that must be met out of loyalty to the covenant.

The NT also refers to faithfulness as a human virtue. In Gal. 5:22, e.g., it is listed in a catalog of virtues. Here, too, it is a virtue relative to roles, a firm loyalty to the bond created by role expectations. In 1 Tim. 3:11 women are exhorted to be "faithful in all things," i.e., to fulfil the role obligations of women. It is used thus in Matthew's and Luke's references to faithful servants and faithful stewards (Mt. 24:45; 25:21, 23; Lk. 12:42; 16:10-12; 19:17). "Faithful" here is very much role-relative; but the point of the parables is not that the Christian should allow role expectations to determine totally his or her behavior, but that one be faithful to God and give that loyalty precedence over all others.

Faithfulness is applied to the roles of witness and minister (Tychichus, Eph. 6:21 and Col. 4:7; Epaphras, Col. 1:7), child (fig. of Timothy, 1 Cor. 4:17), brother (fig. of Onesimus, Col. 4:9, and of Silvanus, 1 Pet. 5:12), and even perhaps the role of martyr (Antipas, Rev. 2:13, where the role expectation is not to deny the faith). Paul gives as the reason for his appointment to his role, Christ's judgment that he was faithful (1 Tim. 1:12). Timothy is told to find faithful men and to appoint them to the role of teachers in the Church (2 Tim. 2:2). But in all these cases such faithfulness in a role meshes with faithfulness to the Lord, as can be seen by the frequent addition of a phrase such as "in Jesus Christ."

When the NT takes up the OT appeal for human faithfulness to God, Gk. *pistós* is generally translated "faith." (*See* FAITH I.) There are, nevertheless, a few occasions where "faithful" is used. The Christian community is frequently described as faithful (Eph. 1:1; Col. 1:2; cf. Rev. 17:14; Acts 16:15, with reference to Lydia). Acts 11:23 exhorts Christians to remain faithful (Gk. *prosménō*) to the Lord with a steadfast heart, while Rev. 2:10 promises a reward for faithfulness.

Finally, it must be noted that the NT describes Jesus as faithful. He is called a merciful and faithful (cf. Heb. *ḥeseḏ wᵉʾĕmeṯ*) high priest. He fulfils that role finally and ultimately "in the service of God, to make expiation for the sins of the people" (He. 2:17). Similarly, He is faithful in Moses' role (3:2, 5f.); He surpasses and fulfils the faithfulness of Moses in building and ruling the house of God. He is the faithful witness (Rev. 1:5; 3:14, where Jesus is the "Amen" [Gk. *amḗn*; cf. Heb. root *ʾmn*], the faithful and true witness [Gk. *ho mártys ho pistós kaí alēthinós*]). In 19:11 the rider of the white horse is called faithful and true. This Jesus, then, is the consummation of God's determined loyalty to His gracious covenant. In Him God's grace and truth, His *ḥeseḏ* and *ʾĕmeṯ*, fully are and are fully revealed.

FAITHFUL SAYINGS [Gk. *pistós ho lógos*]. The striking formula, "the saying is sure" (AV "this is a faithful saying"; NEB "here are words you may trust"), is found five times in the Pastoral Letters (1 Tim. 1:15; 3:1; 4:9; 2 Tim. 2:11; Tit. 3:8). Twice there is added, "and worthy of full acceptance" (1 Tim. 1:15; 4:9; NEB "words that merit full acceptance"). This formula either introduces or concludes a quotation borrowed from earlier preaching, liturgical forms, or church regulations. It also affirms that these sayings are efficacious and therefore constitute a reliable foundation for the life of Christians and the Church. The precise extent of the sayings cannot always be decided with certainty.

Two sayings highlight the work of Christ. 1 Tim. 1:15 affirms that "Christ Jesus came into the world to save sinners." This objective doctrinal statement is in essence a summary of the gospel and is in form similar to sayings in the Gospels. Tit. 3:4-7 seems to be a quotation from an existing confession in the early Church. Because of its stress on washing, the Holy Spirit, inner change, and the trinity, it is possible that this saying was originally a corporate baptismal confession.

Two sayings concern godly living. 1 Tim. 4:8 contains the familiar comparison between exercise for physical fitness and exercise for godliness. The former has only limited value, but the latter is valuable in every way because it contains the promise of true life now and in the age to come. Although some have interpreted bodily exercise in terms of asceticism, this saying is almost certainly a Christian antidote to the overemphasis on the gymnasium in the Hellenistic world.

The poetic structure of the saying in 2 Tim. 2:11-13 would seem to indicate that it is a fragment of an early Christian hymn. Because of the context (vv. 8-10), some view this hymn as a martyr song. Since, however, the first line almost exactly parallels Rom. 6:8, it is more likely that the reference is to a spiritual dying with, rather than a literal dying for, Christ. To those who have died with Christ and continue to endure, the hymn promises that they will live and reign with Him. Although denial merits Christ's denial, the hymn concludes with the assurance that Christ is faithful even when His people are not. Both the parallel with Rom. 6:8 and the content of the hymn suggest that originally this hymn may have been used in a baptismal setting.

The single saying concerning church order in 1 Tim. 3:1 is the source of much scholarly controversy. Some believe that the saying precedes the formula and is actually found in 2:15, "woman will be saved through bearing children." Several early scribes understood that the saying was contained in 3:1, but because of its content they felt it necessary to alter *pistós* ("sure") to *anthropínōs* ("human"; NEB "there is a popular saying"). The majority consider the faithful saying to be: "If anyone aspires to the office of bishop, he desires a noble task." For its life and well-being, the Church needs overseers or bishops.

This saying served not only to emphasize that need, but also to call qualified persons to that task.

A similar formula is found in Rev. 21:5; 22:6, "these words are trustworthy and true" (Gk. *hoi lógoi pistoí kaí alēthinoí*). This is not so much a formula designating a quotation as it is a formula of affirmation that underscores the complete reliability of the words of the ascended Lord.

FAITHLESS; FAITHLESSLY; FAITHLESSNESS [Heb. *mā'al, ma'al, bāgaḏ, bōg'ḏōṯ* (Zeph. 3:4), *m'šûḇâ* (Jer. 3; Hos. 14:4 MT 14:5]), *šôḇāḇ* (Jer. 3:14, 22), *šôḇēḇâ* (Jer. 31:22; 49:4), *z'nûṯ* (Nu. 14:33); Gk. *apistéō* (2 Tim. 2:13), *ápistos, apistía* (Rom. 3:3), *asýnthetos* (Rom. 1:31)]; AV also TRANSGRESS, BACKSLIDE (esp. in Jeremiah), DEAL TREACHEROUSLY, TRESPASS, WHOREDOMS (Nu. 14:33), COVENANTBREAKERS (Rom. 1:31), UNBELIEF (Rom. 3:3), etc.; NEB also TRAITOR, TREACHERY, SCOUNDREL, APOSTATE, WAYWARD, UNBELIEVING, TREAT UNFAIRLY (Ex. 21:8), BREAK FAITH (Ezk. 14:13; 15:8), WANTON DISLOYALTY (Nu. 14:33), etc.; **UNFAITHFUL; UNFAITHFULLY; UNFAITHFULNESS** [Heb. *mā'al* and cognates, hiphil of *zānâ* (2 Ch. 21:11, 13); Gk. *apistéō, (moichoí kaí) moichalídes* ("unfaithful creatures," Jas. 4:4)]; AV also TRANSGRESSION, UNBELIEVERS (Lk. 12:46), NOT BELIEVE (Rom. 3:3), COMMIT FORNICATION (2 Ch. 21:13), WHOREDOMS (2 Ch. 21:13), etc.; NEB also DISLOYALTY (2 Ch. 12:2), SINS (1 Ch. 9:1), SEDUCE (2 Ch. 21:11, 13), etc.

While the English "faithless" is a privative form of "faith" (like Gk. *pist–*, which becomes *apist–*), the Hebrew terms rendered by "faithless" belong to a different set of words from those translated by "faith." The latter normally connote trust, confidence, and hope; the former describe a relationship—a *broken* relationship—between persons, between peoples, or between Yahweh and His people Israel. "Faithless" characterizes a lack of loyalty on the part of either or both parties in a relationship governed by covenant stipulations. It signifies a failure to adhere to the obligations of such a loyalty — a transgression of the covenant stipulations. Thus it is not so much an attitude as the actions expressive of that attitude.

Within the sphere of secular law, a marriage partner who committed adultery was "faithless" or "unfaithful" and therefore liable for divorce (Nu. 5:12, 27; cf. Ex. 21:8). The imagery and language of the broken marriage was used by the prophets in their announcements of judgment on Israel (and/or Judah). Israel had committed adultery in seeking other gods, in worshiping them, and in building altars to them. Thus Israel was liable for divorce from Yahweh, i.e., for the appropriate punishment (divorce, Jer. 3:8; servitude, 5:11ff.; desolation of the land, Ezk. 14:13; 15:8; Hos. 5:7). Particularly interesting is the language of Jer. 3:22, where the author plays with the root *šûḇ*, "turn," "return" (which was common treaty or covenant language; see Holladay, pp. 128-139, 152-54): "Return, turnable [faithless] children, and I shall heal your turnings [faithlessness]" (Holladay, p. 129). This verse illustrates that the prophets announced not only punishment for unfaithful Israel but also Yahweh's overriding desire to heal the relationship (cf. vv. 12, 14; Hos. 14:4; also Neh. 1:8).

Disloyalty was not restricted to legally established relationships. It could also define the rupture of "natural relations" (e.g., between a child and his or her parents, Jer. 31:22; 49:4), which also had their obligations. Thus kings (cf. 1 Ch. 10:13), prophets (Zeph. 3:4), and even the city of Jerusalem (2 Ch. 12:2) could be charged with "faithlessness." Extended to the international political realm, such a concept meant that certain demands of justice and world order were made of every state and nation. Thus even a foreign nation, a nation not party to the Yahweh-Israel covenant, could be called "faithless" (Hab. 1:13).

The OT proverbs also were concerned with faithlessness: (1) its consequences (Prov. 13:15; 21:18; 22:12); (2) one of its causes: the harlot (23:28); and (3) the attitude to be held toward the unfaithful person (25:19).

In the NT "faithless" sometimes designates disloyalty, but its range of meaning includes unbelief, distrust, and lack of confidence and hope. Jn. 20:27 contrasts "faithless" with believing in the resurrected Christ (cf. also Mk. 9:19 par.). In Lk. 12:46 the term probably refers to the "unbelievers," i.e., the "non-Christians" (*TDNT*, VI, 204f.). Rom. 3:3, which contrasts the faithlessness of the Jews with the faithfulness of God, carries the sense of covenant disloyalty (cf. 2 Tim. 2:13, where the contrasted faithfulness of God is that of His loyalty to the covenant; see M. Dibelius and H. Conzelmann, *Pastoral Epistles* [Eng. tr. 1972], p. 109). In Rom. 1:31 Gk. *asýnthetous* (lit. "breaking a covenant or agreement") occurs in a catalog of violations of relationships — with other persons generally, with parents, with God, or with oneself (cf. Rev. 21:8, Gk. *apístois*).

FALL, THE

FALL, THE. Although the term "fall" appears neither in Gen. 3 nor elsewhere in Scripture to designate the event recorded in Gen. 3, the term is apt, for it suggests mankind's loss of an earlier higher estate. Through the fall, humanity lost much of what it had been as created by God.

I. Philosophical Views
II. Biblical View
  A. Historicity
  B. Mystery
  C. Character

I. Philosophical Views.–Various views of the fall as an upward advance or a forward movement find no support either in Gen. 3 or elsewhere in the Bible. The Genesis account does not warrant the philosophical views of Kant (*Religion Within the Limits of Reason Alone* [Eng. tr. 1934], I), Hegel (*Lectures on the Philosophy of Religion* [Eng. tr. 1895], III, 46-56), and others that the fall was a sudden irruption of human self-consciousness. The divine command to till the ground, keep the garden, and have dominion over the earth all presuppose man's self-consciousness. An attempt to interpret the fall in terms of human sexuality, as has often been done (e.g., N. Berdyaev, *Destiny of Man* [Eng. tr. 1955], I, ch. 3, §3), also fails to comport with the biblical account. Sexual differentiation in the Genesis account is good, not evil; it reflects the image of God in which Adam and Eve were created, and the command to be fruitful and multiply and replenish the earth is issued by God before the fall. Nor does the account warrant the interpretation of those rationalistic theologians who regard the fall as the first post-creation forward step toward the realization of God's eternal purpose to have a populated heaven and hell. In biblical thought the fall is associated with sin, death, and a world whose history is spattered with blood and human agony; it is not, even for the heaven-bound Christian, something for which to be glad and thank God. It is a downward or retrogressive movement, not an upward or forward step.

Impression of the so-called Adam and Eve seal (*ca.* 3500 B.C.) from Tepe Gawra near Nineveh. It shows a man followed by a woman and a serpent in the upper field (University Museum, University of Pennsylvania)

II. Biblical View.–It is remarkable how infrequently the OT refers to the narrative of the fall. The Prophets, Psalms, and Proverbs never quote from it. At the most, Hos. 6:7 and Eccl. 7:29 may be allusions to it. Even Jesus and the NT apostles seldom allude to Gen. 3 (Jn. 8:44; Rom. 5:12; 2 Cor. 11:3; 1 Tim. 2:14). But it may be observed that the prophetic literature, Psalms, and Proverbs rarely mention past events and that even the apostles rarely quote the words of Jesus, and only seldom — and then only indirectly — refer to Jesus' virgin birth. But just as the NT pervasively assumes that the Incarnation was not a human achievement, so the whole of Scripture pervasively assumes that man has lost his original integrity, enters an abnormal world as a sinner, and from the moment of his entry is subject to death. The biblical significance of an event does not derive from the number of times it is explicitly mentioned.

A. Historicity. There is no general agreement, even among conservative scholars, about the literary form of the fall narrative or about the literal historicity of some of its details. Is the Genesis account to be regarded as symbolic, or is it prophetic (sermonic) historical writing, the specific form of which is determined by its religious purpose? Is it the type of historical writing found in Kings and Chronicles, or is it more like the prophetic historical writing of Revelation? The latter seems preferable and more faithful to the prophetic-religious intent of Scripture, for the intent and purpose of biblical historical writings is never simply to present an accurate historical account but to present a *redemptive* history.

Many conservative biblical theologians regard the Gen. 3 account of the fall — and even the Gen. 1 and 2 narratives of creation — as having received literary shape not from Israel's own inner religious perceptions, but from the divine disclosure of Israel's special status as a people created and chosen by God and placed in a covenantal relationship with Him. Israel understood the creation of the world through the perspective of her own creation as a nation by God, and similarly understood the nature of the fall through those very deeds by which Yahweh redeemed and recreated Israel as His own peculiar people. Thus Israel's inspired prophets and writers knew the reality and nature of the fall through the reality and nature of her redemption from it by Yahweh. Such a perspective comports with the fact that Israel understood and received the Law only after and within the context of the Covenant of Grace, and also with the fact that the reality and nature of sin are truly known only by those who know the grace of forgiveness. In biblical thought the fall is, no doubt, a historical event, something that occurred as surely as the historical reality of ancient Israel. Likewise, Israel's need for restoration within the historical world of space and time is as certain as mankind's historical fall.

Karl Barth regarded the fall not as myth, an event that never happened, but as a saga, an event that really occurred though it cannot be the subject of normal historical writing (*CD*, IV/1, p. 508). But because Barth regarded man as being eternally in Christ, he conceived of the fall also as an event in Christ, and of fallen man as eternally reconciled in Christ. Hence he regarded the fall, as well as the Resurrection, as an event of *Geschichte* and thus as an occurrence of *prae-historia*, a suprahistorical event rather than an event that can be recorded in terms of our space-time history.

Many other theologians, under the influence of existentialism, have defined the fall as everyman's act (cf. R. Niebuhr, *Nature and Destiny of Man* [repr. 1964], I, 260-64). Each of us falls and falls only for himself. As in Barth, this makes the fall a suprahistorical occurrence — some-

thing taking place outside of, and prior to, the experience of any of us. None of us has any experience of falling into sin and death, for none of us has any experience of having once lived in a sin-free, death-free world. Support for the view that each person effects his own fall is claimed in the consideration that Heb. *'ādām* simply means man, not a particular man. Many biblical considerations, however, rule out such an interpretation: (1) it places the fall again outside our time-space history; (2) it undercuts the psalmist's claim of being born in sin and conceived in iniquity (Ps. 51:5 [MT 7]); (3) it rests on an unbiblical individualism which violates the biblical teaching of the parallelism between the first Adam and Christ; and (4) it cannot be squared with the Pauline teaching that all men living between Adam and Moses died even though they had not sinned in the same way as Adam, whose transgression brought death into the world (Rom. 5:14).

Moreover, in biblical thought sin is regarded not merely as a human act but as a destroying power that enters the *world* and does not wait on the fall of each individual. It was through one man's transgression that sin entered the world and with it death, just as it was through one man's obedience that man is made righteous (Rom. 5:17-21). This parallelism drawn by Paul between Adam and Christ breaks down completely where the fall is construed as an event that each person effects for himself alone. Such an exhaustive individualism leaves no room for God's judgment of all men through Adam's transgression and His redemption of all through Christ's obedience (Rom. 5). Sin and the death that comes with it are powers that stem from an original and unique fall and pervade the whole world from the moment of that fall.

B. Mystery. Much about the fall remains shrouded in mystery. How human beings created in God's image could succumb to sin is left unexplained. How a person created by God — not with a neutral, unqualified, but with a positive, authentic freedom, which subsists in obedience to God — could sin, not by coercion but freely, is something on which the Bible throws no light. How sin, though no part of God's creation, could enter the world from elsewhere through the successful temptation of a man created in possession of righteousness, holiness, and a true knowledge of God, is something human rationality cannot comprehend. Sin is a mystery; in biblical parlance it is the "mystery of lawlessness" (2 Thess. 2:7), something at which even Jesus "marveled" (Mk. 6:6). (*See also* EVIL III. C-D.)

Thus, sin lies beyond the reach of rational explanation. If a good and valid moral reason could be found for sin, it would not be immoral. If a good and valid rational explanation could be found for sin, it would not be irrational. Even God does not rationalize sin, but overcomes it, obliterates it, blots it out so that even He "will remember their sin no more" (Jer. 31:34). He knows that man cannot himself undo sin; therefore He "remembers that we are dust" (Ps. 103:14). The Bible summons us to respond to sin in a manner that comports with God's redemptive triumph over sin: to confess our sins, express our sorrow for them, and then through Christ be set free from them — free from even a guilty remembrance of them. Within this perspective, no one can make the fall lucid to either his moral or his rational consciousness any more than he can offer an exonerating explanation of any of his sins (cf. Augustine *Conf.* vii.5.7). It is only within these limitations that one can interpret the fact and nature of the fall recorded in Gen. 3.

C. Character. While we cannot, and the Bible does not, explain how the fall could occur, the Bible does in various ways describe the nature of the sin that constitutes the fall. Sin is described as a "transgression of the law," as that "offense" with which man reacts to the goodness and mercy of God (cf. Jonah 4), and to the right and freedom of God to dispose of His grace as He wills (Mt. 20:15), an offense which ultimately has Jesus as its target and prompted Him to say, "Blessed is he who takes no offense at me" (Lk. 7:23). Calvin defined sin as the absence of gratitude toward God for all His goodness (*Inst.* ii.1.4); Augustine saw pride as the essence of sin (*De natura et gratia* 33). Others have described sin as autonomy, man's claim to the right to rule himself.

However sin may be defined, it is clear that man was *tempted* to sin; i.e., the inducement that led to the fall was not made by a direct reference to the nature of sin. The inducement was via untruth about sin; sin was represented as a good and right thing.

According to Gen. 2:16, before creating Eve, God commanded the man, "You may freely eat of every tree of the garden; but of the tree of the knowledge of good and evil you shall not eat, for in the day that you eat of it you shall die." In Gen. 3 the serpent, identified later in Scripture as Satan, worked his strategy not upon the man but upon the woman. Since Scripture does not tell us why he chose this strategy, we ought to maintain a similar silence. Eve was asked an untruthful question: "Did God say, 'You shall not eat of any tree of the garden?'" (3:1). Eve's response was a mixture of truth and untruth: "We may eat of the fruit of the trees of the garden; but God said, 'You shall not eat of the fruit of the tree which is in the midst of the garden [true], neither shall you touch it [untrue], lest you die'" (vv. 2f.). From this less-than-truthful answer to his less-than-truthful question, the serpent moved strategically to the heart of the temptation: "For God knows that when you eat of it your eyes will be opened, and you will be like God, knowing good and evil" (v. 5). These words suggested — and were meant to suggest — to the woman that God's prohibitive command was a strategic protective device by which He sought unjustly to keep for Himself alone what belonged to man — the right to determine what is good and what evil.

The serpent told the woman that if she ate, her eyes would be opened (3:5); she looked at the tree and saw that it was "good for food," "a delight to the eyes" (v. 6). At this point the woman's eye reflected the evil inclination of her desire to be wise (v. 6). Then came the deed: she ate. She gave to her husband, and he ate. "Then the eyes of both were opened," and what they saw was their naked selves (v. 7). Once they had fallen they knew that while they had previously known the good, they now knew both good and evil, and what they now saw as evil was themselves. Hence they were ashamed, becoming aware of their nakedness. They wanted their nakedness to be seen neither by God, by each other, nor even by themselves. Thus they hid from each other by making for themselves garments of fig leaves, and from God by hiding in bushes (vv. 7f.). They attempted to hide from themselves in that neither admitted personal guilt: Adam blamed Eve — and even God for giving her to him — and Eve blamed the serpent. All these attempts to maintain innocence by transferring their guilt to someone else were attempts of the fallen, sinful creature to hide from itself what it had become.

The attempt of the creature to be like God his creator is not only unsuccessful, but an irrational act for which there is no explanation, an act in which the creature destructively acts against his own self. The Gen. 3 account of the fall is prophetic, sermonic. It presents the fall not in purely objective, historic factuality, but in terms of a summons to all men to admit their sin, guilt, and shame so that

they may be saved. This it does admirably well. For as Herman Bavinck wrote, "There is a great deal of truth in the often-expressed thought, that we can give no account of the origin of sin, because it is not logical, and does not result as a conclusion drawn from two premises. But facts are brutal. What seems logically impossible often exists in reality. The laws of moral life are different from those of thought and from those of mechanical nature. The narrative of Gen. 3, in any case, is psychologically faithful in the highest degree. For the same way that it [sin] appears there in the first man, it repeatedly takes place among ourselves" (*ISBE* [1929], II, 1094).

The historical account of Gen. 3 was not written to satisfy the historical interest of historians, nor the scientific interest of scientists; it was written rather to show us the origin and nature of our sin, for the advancement of true religion. J. DAANE

FALLING STARS. *See* ASTRONOMY.

FALLOW. The term designates ground that has been plowed and then left uncultivated for a season. Jer. 4:3 and Hos. 10:12 read Heb. *nîrû . . . nîr,* literally, "freshly till the once-tilled [but fallow] ground." In Ex. 23:11 God commanded Israel to let the land "lie fallow" (Heb. *nṭš,* "leave") every seventh year, to permit the poor to eat from it. From Lev. 26:34f. it is clear that the Israelites did not adhere to this divine injunction. (*See* AGRARIAN LAWS III-V.)

The meaning of Prov. 13:23a, literally, "Much increased [will be] the fallow ground [*nîr*] of the poor," is uncertain. It has been interpreted that the fallow ground of the poor may produce a good crop if it be spared "injustice" (RSV, NEB) or "want of judgment" (AV). The LXX emends "the poor" to "the righteous" and reads the verse as a contrast between the happy life of the righteous and the unhappy life of the unrighteous (cf. *IB,* IV, 860). According to another emendation, the land of "chiefs" will not yield much because of lack of equity (W. McKane, *Proverbs* [*OTL,* 1970], pp. 462f.). R. W. V.

FALLOW DEER (Dt. 14:5; 1 K. 4:23, AV). The translation of Heb. *yaḥmûr,* which the RSV renders "roebuck" (cf. *CHAL,* p. 133). It belongs to the class of animals that Israel was allowed to eat and seems to indicate a member of the DEER family.

FALSE APOSTLES [Gk. *pseudapóstoloi*] (2 Cor. 11:13); NEB SHAM-APOSTLES. Adversaries of Paul in Corinth, whom he opposes in 2 Cor. 10:1–13:10. Though little is said about their message, a few clues are given about their character. They were intruders who had invaded the territory marked out for Paul by divine commission (10:13-16) and were now attempting to undermine his apostolic authority (cf. the "false brethren" of 11:26). Their weapons included slander — charges of cowardice (2 Cor. 10:10; cf. 11:21) and guile (12:16f.) — and letters of recommendation (3:1). They were arrogant; they claimed for themselves the credit for having first brought the gospel to Corinth (10:13-18); in fact, they had gone so far in their boastful claims to apostolic authority that Paul twice refers to them sarcastically as "superlative apostles" (11:5; 12:11; cf. 11:12). They were also characterized by greed, being eager to accept financial support (11:7-12, 20) and showing no interest in collecting gifts for the needy Christians in Jerusalem.

Of their message, Paul simply says that they preach "another Jesus . . . a different gospel" (11:4). They are "false apostles, deceitful workmen, disguising themselves as apostles of Christ"; they are servants of Satan rather than "servants of righteousness" (11:13-15). Scholars do not agree on the content of the "gospel" they preached. Some suppose from the fact that they were Jews (11:22) that they were Judaizers (cf. 3:6-18; cf. also the "false brethren" of Gal. 2:4). Others have posited a Gnostic party that claimed special esoteric knowledge in opposition to the knowledge of God that is available to every person (cf. 2 Cor. 2:14; 4:6; 10:5; 11:6). These are conjectures; it is clear, however, that these opponents had succeeded in stirring up a rebellion against Paul in Corinth, and that their influence had resulted in selfishness and immorality (12:20f.).

See P. E. Hughes, comm. on 2 Corinthians (*NICNT,* 1962). N. J. O.

FALSE BRETHREN [Gk. *pseudadélphoi*] (2 Cor. 11:26; Gal. 2:4); NEB FALSE FRIENDS; SHAM-CHRISTIANS. Apparently the same persons whom Paul calls FALSE APOSTLES in 2 Cor. 11:13.

FALSE CHRISTS. *See* CHRISTS, FALSE.

FALSE PROPHETS. *See* PROPHECY, FALSE.

FALSE WITNESS. *See* CRIME; OATH.

FALSEHOOD. *See* CRIME; LIE.

FAME [Heb. *šēm*] (Dt. 26:19; 1 K. 4:31; 1 Ch. 14:17; 22:5; 2 Ch. 26:8, 15; Ps. 72:17); AV also NAME; NEB also RENOWNED, NAME; [*šēmaʿ*] (Nu. 14:15; 1 K. 10:1; 2 Ch. 9:1); NEB also TALES, "heard of me" (Isa. 66:19); [*šōmaʿ*] (Josh. 6:27; Est. 9:4); [*zēker*] (Ps. 145:7); AV MEMORY; NEB STORY; [Gk. *akoḗ*] (Mt. 4:24; 14:1; Mk. 1:28); NEB also REPORTS; [*diaphēmízō*] (Mt. 9:31); NEB "talked about him." "Fame" has a two-fold meaning: (1) report or rumor (now obsolete); (2) renown or reputation. In the OT it is not always easy to distinguish the two senses. *Šēm* means lit. "name" and thus would have the second meaning of renown or reputation. *Šēmaʿ* (cf. *šāmaʿ,* "hear") probably means "report" in Nu. 14:15 but "renown" in the rest of its occurrences, while *šōmaʿ* seems to indicate reputation. *Zēker,* in Ps. 145:7, seems to comprehend both meanings.

In the NT *akoḗ,* "hearing," means "report," while the verb *diaphēmízō,* "say throughout," "report publicly," seems to imply fame in the sense of reputation. In 1 Macc. 3:26 "fame" occurs in the sense of reputation: "His fame [Gk. *ónoma,* "name"] reached the king" (cf. "what was said," 3:41). W. L. WALKER

FAMILIAR. Of the OT occurrences in the RSV (1 K. 9:27; 2 K. 10:11; 2 Ch. 8:18; Ps. 55:13 [MT 14]; Jer. 20:10), all translate Heb. *yāḏaʿ,* "know," in one form or another, except Jer. 20:10, where the Hebrew expression *ʾĕnôš šᵉlômî,* "man of my peace," expresses the concept of familiarity. Gk. *gnōstēs,* "knower," "expert," occurs only once in the NT (Acts 26:3).

The AV uses "familiar spirit" to render Heb. *ʾôḇ*; *see* DIVINATION; MEDIUM.

FAMILY [Heb. *mišpāḥâ*]; AV also KIND (Gen. 18:19), KINDRED; NEB also CLAN, etc.; [*bayiṯ*] (Gen. 34:19; Josh. 22:14; Jgs. 6:15, 27; 8:27, 35; 16:31); AV, NEB, also HOUSE, HOUSEHOLD; [*ʾelep*] (Josh. 22:21, 30); AV THOUSAND; NEB CLAN; [*zeraʿ*] (2 K. 11:1; 25:25; 2 Ch. 22:10; Jer. 41:1; Ezk. 43:19; Dnl. 1:3); AV SEED;

NEB also LINE, HOUSE, BLOOD; [*'āḇôṯ* < *'āḇ*–'father'] (2 Ch. 19:8; Ezr. 2:68); AV FATHERS; [*tôlēdôṯ*] ("history of the family," Gen. 37:2); AV GENERATIONS; NEB DESCENDANTS; [*'aḥîm* < *'āḥ*–'brother'] (Nu. 25:6); AV BRETHREN; [Gk. *oíkos*] (1 Tim. 5:4, 8; Tit. 1:11); AV HOUSE, HOME; NEB also HOUSEHOLD; [*patriá*] (Acts 3:25; Eph. 3:15); AV also KINDRED; [*génos*] (Acts 4:6; 7:13; 13:26); AV KINDRED, STOCK; NEB also STOCK. In Ezk. 45:15 the RSV and NEB emend MT *mašqeh*, literally "watering place" (cf. AV "fat pastures"), to *mišpāḥâ* on the basis of the LXX *patriá*.

I. Terminology
   A. In the OT
   B. In the NT
II. Scope of the Family
III. Status and Role of Family Members
IV. Figurative Use

I. Terminology.–A. In the OT. No Hebrew term in the OT corresponds precisely to the modern Eng. "family." The term most frequently translated "family" is *mišpāḥâ*, which had a larger connotation than "family." It meant "clan" and could be applied, e.g., to six hundred Danites from two villages (Jgs. 18:11). The term closest in meaning to Eng. "family" is Heb. *bayiṯ* (lit. "house"). This may indicate a house either as a building or as the occupants of a building, i.e., a "household" or "family." So we read of Abram's trained men "born in his house" (Gen. 14:14; cf. 17:12f.). In Ex. 1:21 the word refers to "families" that God gave to the Egyptian midwives and in 1 Ch. 4:21 to a family of linen workers. It could be used not only of those who lived under the same roof (Ex. 12:4) but also of much larger groups, e.g., the house of Israel (Isa. 5:7), which included the whole nation. Quite frequently the word is applied to a family of descendants, e.g., in 1 K. 12:19, where it refers to the "house of David." The Hebrew terms *'elep*, *zera'*, *'āḇôṯ*, *'aḥîm*, and *tôlēdôṯ* are translated literally by the AV, but more accurately in terms of the context by the RSV and NEB.

B. In the NT. The NT generally uses Gk. *oíkos*, "house," as the equivalent of Heb. *bayiṯ* and renders it "family" in 1 Tim. 5:4, 8; Tit. 1:11 (and "household," or a family of descendants, in Lk. 1:27, 69). Gk. *patriá* is the NT equivalent of Heb. *mišpāḥâ* and can mean: (1) the historical origin of a household, i.e., its patriarch rather than its present head (Lk. 2:4); (2) a tribe or even a nation (Acts 3:25, "the families of the earth"); (3) the whole human race in Eph. 3:14f. ("every family . . . on earth"), behind which is the universal fatherhood of God. The term *génos* refers to descendants of a common ancestor and can designate a family, race, or a nation. The RSV inserts "family" in Rom. 16:10f. (AV, NEB, "household"), and in Mk. 3:21 renders *hoi par' autoú* as "his family" (AV "friends"; NEB "family").

II. Scope of the Family.–Partly because of the acceptance of polygamy, in some instances the OT family could be quite extensive. Even where monogamy was practiced the family was large, including the father, mother, sons, daughters, brothers, sisters (until marriage), grandparents, and other kinsmen as well as servants, concubines, and sojourners. The Israelites were encouraged to have large families for economic as well as religious reasons. The solidarity of a large family was maintained by its organization around the father figure.

III. Status and Role of Family Members.–Implicit from the beginning was the equality of the sexes before God. EVE, "the mother of all living" (Gen. 3:20), is portrayed as distinctly as Adam in the picture of the first couple. She is the feminine representative (*'iššâ*) of the race as Adam is the masculine representative (*'îš*) (Gen. 2:23). Her personality is as complete as Adam's; she is as rational and accountable as he. After the fall the position of the wife and of the mother became less than equal (*see also* MARRIAGE IV.D).

In OT times family life was father-centered. The family was a community of people related by ties of marriage and kinship, ruled by the authority of the father. The father might be a grandfather or a great-grandfather. He had the power to offer his son as a sacrifice (Gen. 22; but *see* SACRIFICE, HUMAN) and could destroy members of his family if they undermined his loyalty to God (Dt. 13:6-10). He also had the responsibility of teaching his sons (Prov. 1:8) and did pity them on occasion (Ps. 103:13).

In Semitic society the family was much more than a mere social organism. One of its highly significant features was its function as a religious community. It was through the family that the cult of the household and the tribal deities was practiced and perpetuated. The father of the house, by virtue of being the family head, was the priest of the household. As such he was responsible for the religious life of his family; he maintained the family altar and he offered sacrifices to the family gods. This situation is reflected in the stories of the Hebrew patriarchs (Abraham, Isaac, and Jacob; cf. also Job) who, living before the centralization of worship, offered sacrifices to Yahweh as the tribal or national deity. It goes far to explain records such as those in Gen. 31:53; 32:9 and the exceptional reverence that was paid to paternal sepulchres (1 S. 20:6).

Abraham was regarded as the father of the nation of Israel. The family continued to play a constructive and important role in the development of Hebrew thought and life, forming the basis for its social structure, merging gradually into wider tribal organisms, and vitally affecting the political and religious life of the nation of Israel. The solidarity of the family as institution was such that forces that threatened its security were vigorously combatted. Each member was urged to fight for the defense of his brothers, sons, daughters, wives, and home (Neh. 4:14). All members were obliged to protect the entire family through the correctness of their own behavior. During

Akhenaten (left), Nefertiti, and their three daughters. Painted limestone plaque (14th cent. B.C.) from a house chapel at Tell el-Amarna (Service des musées, Cairo)

economic crises, however, entire families might be sold for debt (Mt. 18:25).

See also FATHER.

In the NT the size of the family is little mentioned (but cf. Eph. 6:4-9), and some of the OT prerogatives of the father had vanished. Though Christ said little about the family (on Mk. 3:31-35 see W. L. Lane, comm. on Mark [*NICNT,* 1974], pp. 147f.; on Lk. 8:19-21 see I. H. Marshall, comm. on Luke [*New International Greek Testament Commentary,* 1978], pp. 330-32), He criticized moral impurity among members of a family. He reaffirmed the monogamic character of marriage (Mt. 19:11f.; Mk. 10:2-12) and the indissolubility of the family not only with regard to the parties involved but also in terms of the power of society. Christ, curiously, did not touch on children's obedience to their parents, though He Himself was obedient to Joseph and Mary (Lk. 2:51).

In his "household ethics" Paul stressed the mutual duties of the members of the family, those between husbands and wives, between parents and children, and between masters and slaves (Eph. 5:22–6:9; Col. 3:18-22). Unlike Christ he specifically restated the fifth commandment as applied to children's obedience to parents. Accepting other OT obligations, he stated that religion was to be taught in the home (1 Tim. 5:4), and (economic) provision had to be made for the members (v. 8).

IV. Figurative Use.–A religious metaphor is used in the description of the relation between Yahweh and His people. God remembered Israel as His "bride" (Jer. 2:2) and would call back His "children" (3:14), "betrothing" Himself forever in love to Israel (Hos. 2:19f. [MT 21f.]). In the NT this image is applied to Christ and the Church. Paul betrothed the Corinthian church as a "pure bride" to Christ (2 Cor. 11:2) and compared the conjugal love between husband and wife in Eph. 5:25-33 to the love Christ has for His Church. (Cf. similar images in Rev. 19:7, "the marriage of the lamb," and 21:2, the new Jerusalem as "the bride.")

In a related image, God's love for Israel (cf. Am. 3:1f.) was to include all "the families of the earth" (e.g., the promises to Abraham, Gen. 12:3; 28:14, will one day be fulfilled, Ps. 22:27 [MT 28]; cf. Zec. 14:18f.). In the NT believers from every nation are called "members of the household of God" (Eph. 2:19; cf. 3:15 where God is said to be the father of "every family . . . on earth"). Frequently the Christian Church is compared to "the household of God" (Gal. 6:10; 1 Tim. 3:15; 1 Pet. 4:17).

FAMILY RELATIONSHIPS. *See* RELATIONSHIPS, FAMILY.

FAMINE [Heb. *rāʿāḇ*–'hunger,' 'famine'; cf. Ugar. *rġb*–'to be hungry'] (Gen. 12:10; 26:1; 41:27-54; etc.); AV also DEARTH; NEB also HUNGRY, etc.; [*reʿāḇôn*] (Gen. 42:19, 33; Ps. 37:19); NEB also HUNGRY; [*kāpān*] (Job 5:22); NEB STARVATION; [Gk. *limós*] (Mt. 24:7; Mk. 13:8; Lk. 4:25; 15:14; 21:11; Acts 7:11; 11:28; Rom. 8:35; Rev. 6:8; 18:8); AV also DEARTH, HUNGER; NEB also HUNGER.

I. Causes of Famines.–The Fertile Crescent with Palestine in its center is highly dependent upon rainfall. If little or no rain falls, drought with consequent famine results. This natural cause of famine is often referred to in the OT (Gen. 12:10; 26:1; 41:54; 2 S. 21:1; 1 K. 18:1f.; 2 K. 8:1; Am. 4:6f.; Hag. 1:1-11; Ruth 1:1). Jer. 14:1-6 depicts the dreaded results of the drought. Another natural cause of famine was the destruction of the crop through "blight and mildew" (Am. 4:9) and locusts (Joel 1:4-20; Am. 4:9). An extensive drought led also to the loss of livestock and thus to starvation (1 K. 18:5). Some of the most terrible famines were man-made. The siege of Samaria by Ben-hadad king of Syria brought a famine of such severity that children were eaten (2 K. 6:24-29). The siege of Jerusalem by Nebuchadrezzar in 586 B.C. also led to a very severe famine (2 K. 25:3), which was intensified by two seasons' use of the crops by the Babylonian army and by the latter's sealing off of the city so that no food supplies could reach it. A standard practice of ancient warfare by the Hittites, Egyptians, and Assyrians was to bring about starvation by cutting down grain, orchards, gardens, etc. in order to break political independence and prevent quick repopulation (*ANET,* pp. 239-241; Goetze, p. 127; *ARAB,* I, 230, 243, 279, etc.).

The Bible understands famine in terms of the God-man relationship. In opposition to the Canaanite fertility religion, in which the natural processes are deified and Baal, "the rider on the clouds," is the god of rain and fertility, the OT emphasizes that Yahweh, as Creator, possesses and controls the forces of nature, the order of the seasons, and the material support of human life (cf. Ps. 104). In this sense the OT affirms that God caused famines throughout Israel's history for certain purposes in His plan of salvation.

II. Famines in the Bible.–*A. In the OT.* Such early historical figures as Abraham (Gen. 12:10) and Isaac (26:1) were forced to migrate to other lands in order to escape local famines (cf. 2 K. 8:1-3). A protracted seven-year famine during Joseph's stay in Egypt (Gen. 41:27) affected Canaan (42:1) as well as Egypt and is said to have been "over all the earth" (41:57). Since Egypt was watered by the seasonal inundation of the Nile and Palestine by occasional rainfall, drought seldom occurred in the two areas simultaneously (cf. Gen. 12:10; 26:1f.). Egypt experienced famines from time to time. Records report famines so severe that the inhabitants resorted to cannibalism (Vandier, pp. 8f., 14f.; *ANET,* p. 31 n. 1). The Egyptian ruler's duties included the responsibility for providing enough food in times of famine to keep the population from starvation. One Egyptian biographical text reads: "When famine came for many years, I gave grain in my town in each famine" (Vandier, p. 115). An Egyptian relief from Saqqârah, dated to the 5th Dynasty (*ca.* 2500-2350 B.C.), pictures emaciated, starving people (*ANEP,* no. 102). Egyptian sources refer to numerous instances in which inhabitants from other nations, or even whole nations, sought help from Egypt during periods of famine (Janssen). Against this background the seven-year famine in Joseph's day has a ring of historical accuracy. It is beyond doubt that this famine had a significant role in salvation-history, for it threatened the life of the clan of Jacob. The touching scene in which Joseph reveals himself to his surprised brothers climaxes in his statement that God had sent him to preserve a remnant on earth (Gen. 45:5-7). God's providential guidance reunited estranged brothers and preserved the clan of Jacob as a remnant from which the nation Israel would emerge.

A famine in the time of the Judges led to the emigration of Elimelech and his family to Moab (Ruth 1:1). Later in the Davidic period mention is made of a three-year famine (2 S. 21:1), and one of seven (1 Ch. 21:12, LXX "three") years is threatened (24:13). In Ahab's day Elijah

An emaciated desert herdsman leads oxen in a procession of tributebearers to Ukh-hotep. Relief from Meir, Egypt (20th cent. B.C.) (photograph courtesy of Metropolitan Museum of Art)

announced a three-year famine (1 K. 17:1; 18:2; cf. Josephus *Ant.* viii.13.2 [319]), and two famines are mentioned during the days of Elisha (2 K. 4:38; 8:1). The Shunammite woman was forced to journey to the land of the Philistines to escape a seven-year famine (2 K. 8:1-6). The famine of Samaria caused by the siege of the Syrian forces (2 K. 6:25; 7:4) and the famine of Jerusalem caused by the Babylonian army (2 K. 25:3; Lam. 4:8-10) were so severe that some resorted to cannibalism (2 K. 6:28f.; Lam. 2:30f.; 4:10; cf. Dt. 28:56f.; Ezk. 5:10). Cannibalism under the stress of siege is recorded again for Jerusalem during the siege of the Romans in A.D. 70 (Josephus *BJ* vi.3.4 [207f.]).

The classical triad of major calamities in the form of sword, famine, and pestilence (Jer. 14:12; 21:7, 9; 24:10; 27:8, 13; 29:17f.; 32:24, 36; 34:17; 38:2; etc.; Ezk. 6:11f.; 7:15; 12:16) appears in more elaborate form in Lev. 26:3-33 and Am. 4:6-11. When David was confronted by God with a choice between famine, sword, or pestilence (2 S. 24:13-17), he chose the last, apparently because it was the calamity feared the least. The writer of Lamentations reflects the conviction that those who perish by the sword are better off than those who die of hunger (Lam. 4:9). This suggests that famine was the most terrible affliction on the scale of ancient scourges (Dt. 32:23; Ezk. 3:16).

Famines played an important role as "chastisements" sent by God for Israel's sins. Their aim was to lead the covenant people to obey God (Lev. 26:18-26). God warned that He would withhold the gift of rain, inevitably resulting in famine and death (Dt. 11:17), should Israel engage in idolatry. Lack of rain in the Promised Land would be experienced as God's curse for Israel's disobedience (Dt. 28:23). In the dedicatory prayer of the temple, Solomon referred to lack of rain (1 K. 8:35) and famine (v. 37), which came because of sin, and requested that they be removed if Israel repented. Amos proclaimed that what God had threatened in Lev. 26 and Dt. 28 had actually occurred (Am. 4:6-11). He exhorted in the tradition of 1 K. 8:33-40), that the calamities of insufficient rain and famine were designed to lead to repentance. The ultimate goal of these "natural" catastrophes was to bring Israel back to wholehearted obedience to the divine will. Release from the scourge of famine was to come through prayer and supplication (1 K. 8:37-40).

Wisdom literature teaches that the God who sends famine will redeem man from death by famine (Job 5:20). Those who fear the Lord and hope for His kindness are preserved in spite of famine (Ps. 33:18f.; 37:19). The sage knows that Yahweh does not let the righteous go hungry (Prov. 10:3). The inner appetite (Heb. *nepeš*) of the just will not lead to perpetual frustration but will be satisfied by complete fulfillment and total self-realization.

"Famine" appears in a metaphorical sense in Am. 8:11: "I will send a famine on the land; not a famine of bread, nor a thirst for water, but of hearing the words [LXX, Syriac, Vulgate, 'word'] of the Lord" (cf. 1 S. 3:1; 28:6; 2 Ch. 15:13; Ezk. 7:26). The truth is here affirmed (as Jesus taught later) that man does not live "by bread alone" (Dt. 8:3; Mt. 4:4; cf. Dt. 30:15f.; 32:46f.) but by the word of the Lord. Amos warned that sometime in the future would come the worst famine that can be experienced, namely, the inability to hear the word of the Lord.

B. In the NT. Two NT passages refer to famines mentioned in the OT: Jesus refers to the famine of Elijah's day (Lk. 4:25; cf. 1 K. 17:1, 8-16) and Stephen to the seven-year famine during the time of Joseph's stay in Egypt (Acts 7:11).

The famous general famine predicted by Agabus, the Jerusalem prophet (Acts 11:27f.), came in the reign of the Roman Emperor Claudius (A.D. 41-54). Classical writers reported famines at various times during the reign of Claudius (Suetonius *Claudius* 18; Tacitus *Ann.* xii.43; Dio Cassius *Hist.* lx.11; Orosius *Historiae* vii.6.17), while the Jewish historian Josephus recorded a great famine in Palestine in A.D. 44-48 when grain was imported from Egypt to relieve the great suffering (*Ant.* xx.2.5; 5.2 [51; 101]).

Jesus predicted that famines will be a part of the escha-

tological woes serving as signs of the last days, when the kingdom of God will be ushered in by the apocalyptic return of Jesus Christ (Mt. 24:7; Mk. 13:8; Lk. 21:11). These famines point to the end and are a pledge of it, just as the labor pains of a woman in childbirth are a promise of that which she has expectantly awaited. Thus these sufferings are a sign that the Parousia is near and a pledge that a new age will break in. Famine is a part of the triad of calamities in Rev. 6:8 (cf. 18:8) that together with death by wild beasts will bring widespread devastation. But once the new age of final salvation has begun, there will be no more hunger and famine (Rev. 7:16; cf. Ezk. 34:29).

G. F. HASEL

FAMISH. The RSV renders Heb. *rāzâ* ("make lean") as "famish" in Zeph. 2:11, describing the action of God against other deities. In Gen. 25:29f. *'āyēp* ("faint," "weary") depicts the condition of the exhausted and hungry Esau, while in 41:55 the seven-year famine of Egypt is portrayed by *rā'ēḇ* ("be hungry").

FAN; FANNER (AV Isa. 30:24; 41:16; Jer. 4:11; 15:7; 51:2; Mt. 3:12; Lk. 3:17). *See* FORK (3); WINNOWING.

FANCY. In Cant. 6:12 *nepeš*, "self," is translated "my fancy" by the RSV. The meaning of the MT is obscure, and the NEB "I did not know myself," while a literal rendering, does not particularly clarify the passage. In Dnl. 4:5 (MT 2) "fancies" renders Aram. *harhōrîn*, "dream-fantasies" (*CHAL*, p. 404).

FANGS [Heb. *malt^{e}ôṯ* (Ps. 58:6 [MT 7]), *m^{e}ṯall^{e}ôṯ* (Job 29:17; Joel 1:6)]; AV GREAT TEETH, JAWS, CHEEK TEETH; NEB also JAWS. The word is used figuratively, as a synonym of reckless strength and cruelty.

FAR. Used either as an adjective ("distant," "remote") or as an adverb ("widely removed"). It most frequently translates Heb. *rāḥôq* in the OT and Gk. *makrán* in the NT, but it also renders other Hebrew and Greek words. Heb. *ḥālîlâ* (cf. Gk. *mḗ génoito*; *see* FORBID), an exclamation of abhorrence or aversion, is rendered "far be it from me," "far be it from thee," etc. (Gen. 18:25; 44:7, 17; Josh. 22:29; 24:16; 1 S. 2:30; 12:23; 20:9; 2 S. 20:20; 23:17; 1 Ch. 11:19; Job 27:5; 34:10; cf. Gal. 6:14).

In addition to its literal sense, distance in a spiritual sense is expressed by "far," as in "Salvation is far from the wicked" (Ps. 119:155; cf. Prov. 15:29), "far from deliverance" (Isa. 46:12), "not far from the kingdom of God" (Mk. 12:34).

W. L. WALKER

FAR HOUSE [Heb. *bêṯ hammerḥāq*—'house (place) afar'] (2 S. 15:17, NEB); AV "a place that was far off"; RSV "at the last house"; cf. RV "Beth-merhak." A place mentioned in the account of David's flight from Absalom, probably not to be identified as a town.

FARE. "Fare" occurs in the RSV OT eleven times as a verb and three times as a noun. As a verb it generally means "go," "get along," or "succeed"; the AV often translates the Hebrew more literally with "be" (e.g., for Heb. *hāyâ*, Gen. 18:25). In 1 S. 17:18 "fare" translates the noun *šālôm*, "peace," "prosperity," "completeness." In Hag. 2:16 the RSV follows the LXX rather than the MT, which is translated literally by the AV "since those days were." In 1 K. 22:27 par. 2 Ch. 18:26 "scant fare" renders *laḥaṣ* literally, "affliction" (cf. AV), while in Jonah 1:3 the noun *śāḵār*, "hire," "reward," refers to the price Jonah paid for a voyage to Tarshish.

In the NT "fare" occurs only once, Rom. 9:29, for the Greek verb *gínomai*, "be," "become," or "be made."

N. J. O.

FAREWELL [Heb. *nāšaq*] ("kiss farewell," Gen. 31:28); AV, NEB, KISS; [Gk. *apotássomai*] ("say farewell," Lk. 9:61); NEB "say good-bye"; [*rhṓnnymi*] (Acts 15:29); AV "Fare ye well"; [*apaspázomai*] ("bid farewell," Acts 21:5); AV "take leave"; NEB "say good-bye"; [*chaírō*] (2 Cor. 13:11). Originally a wish at parting for those traveling (faring) forth.

The term occurs in the OT (RSV) only once, for Heb. *nāšaq* ("kiss"); the context indicates a farewell kiss. As a parting wish at the close of a NT letter it represents the Gk. *rhṓnnymi* ("make strong") and *chaírō* ("Rejoice!"). As equivalent to our saying "good-bye" (cf. NEB) it represents the Gk. *apaspázomai* and *apotássomai*.

W. L. WALKER

FARM [Gk. *agrós*] (Mt. 22:5); **FARMER** [Heb. *'ikkār*] (2 Ch. 26:10; Jer. 14:4; 31:24; 51:23; Am. 5:16); AV HUSBANDMAN, PLOWMAN; NEB also PLOUGHMAN; [Gk. *geōrgós*] (2 Tim. 2:6; Jas. 5:7); AV HUSBANDMAN. Mt. 22:5 is the only passage where Gk. *agrós* ("field," "ground") has been rendered "farm." Farms in the Western sense — isolated dwellings with their groups of outbuildings, surrounded by walls or hedges and overlooking the planted fields — were probably unknown in Palestine. For protection against wild beasts and human marauders, everyone lived in a village and went out to the fields, located perhaps miles away, only as occasion required.

The "farmer" in the RSV is not a landowner, but one who works the land, thus a serf or tenant farmer.

See also HUSBANDMAN.

J. A. PATCH

FARTHING. *See* MONEY.

FASHION [Heb. *yāṣar*] (Ps. 33:15; Isa. 44:10; 45:9; 54:17); AV also FORM; NEB also CAST METAL, MAKE; [*ṣûr*] (Ex. 32:4); NEB CAST; [*'āśâ*] (Isa. 44:13); AV FIT; NEB PLANE; [polel of *kûn*] (Job 31:15; Ps. 119:73); NEB CREATE, MAKE; [piel of *'āṣaḇ*] (Job 10:8); AV MAKE; NEB GIVE SHAPE. To create, shape, form; the work of a craftsman.

The root *yṣr* refers to the concrete act of making an object. The most common RSV translation is "to form." It refers most extensively to the act of pottery-making, and the noun "potter" is a form of this verb (*yôṣēr*). This meaning was extended to include the work of a metalsmith (Isa. 44:12 [RSV "shapes"; the word translated "fashions" is an emendation]). It is often used to refer to God's creative activity and has more concreteness than the verbs *'āśâ* ("make") and *bārā'* ("create") (cf. Gen. 2:7; Isa. 45:7, 18). Inherent in this concept is the sovereignty of the workman. The craftsman forms the object according to his own plans and desires. This concept is applied to God in Jer. 18:1-11. Jeremiah is sent to watch a potter (*yôṣēr*) at work, and God informs Jeremiah that this is the manner in which He is shaping Israel (cf. G. C. Berkouwer, *Divine Election* [Eng. tr. 1960], pp. 76-78).

The verb *kônēn* (polel of *kûn*) connotes firmness and stability. It is more commonly translated "establish" (Ps. 8:3 [MT 4]).

The RSV translates "fashion," meaning "way" or "manner," in 2 Ch. 32:15 (Heb. *kāzō't*; NEB "like this") and 2 Cor. 10:2 (Gk. *katá sárka*; lit. "in accordance with

flesh"; cf. Bauer, p. 408, "on the physical plane"). In 2 K. 16:10 the AV renders Heb. *dᵉmût* as "fashion," in the obsolete sense of "model" (NEB "sketch").

FAST. Deliberate and sustained ABSTINENCE from all food for a specific period of time. A fast may be associated with private acts of piety, the acknowledgment of disaster, emotional disturbance, mourning, or repentance, or it can form part of public devotion. The biblical writers accepted the social and religious concepts of fasts without discussing the origin of the custom.

Hebrew terms include *ṣûm* (verb) and *ṣôm* (noun), along with expressions such as *ʿānâ nepeš* (Lev. 16:29; Isa. 53:3, 5), "afflict oneself"; *lō' 'ăkal leḥem* (1 S. 28:20), "not to eat bread"; and the niphal of *kānaʿ* (1 K. 21:29; cf. v. 27), "humble oneself." Heb. *taʿᵃnît* (later the name of tractates in the Mishnah, Talmud, etc., that deal with fasting) occurs only in Ezr. 9:5. The Aram. *ṭᵉwaṭ* (Dnl. 6:18 [MT 19]) describes part of Darius's anguished response to having to put Daniel in the lions' den. The LXX and NT verb for "fast," *nēsteúō* (Mt. 9:15; Lk. 5:33), usually denotes abstinence from food as a religious rite but also can mean simply hunger (Mt. 15:32; Mk. 8:3; 2 Cor. 6:5; 11:27). From early times the wearing of sackcloth and ashes accompanied by fasting indicated self-abnegation.

Moses fasted at Sinai while receiving the law from God (Ex. 34:28; Dt. 9:9) and again when he smashed the law tablets in front of the apostate Israelites (Dt. 9:17f.). In the law the tenth day of the seventh month was reserved for "afflicting one's soul" (Lev. 16:29), an activity that was entirely appropriate for the Day of Atonement.

At all periods in Israelite history fasts were proclaimed as a response to national emergency or distress (Jgs. 20:26; 1 S. 7:6; 2 Ch. 20:3; Ezr. 8:21-23; Neh. 1:4; Est. 4:16; Jer. 36:9), as an act of penitence (1 K. 21:27; Neh. 9:1), or as an accompaniment to earnest prayer, whether public or private (2 S. 12:16; Ps. 35:13). Fasting often accompanied periods of mourning (2 S. 1:12; 12:21; Isa. 31:13).

During and after the Exile certain fasts commemorated the Babylonian destruction of Jerusalem. The fasts were: the ninth day of the fourth month, for the fall of Jerusalem (2 K. 25:3f.); the tenth day of the fifth month, for the destruction of the temple (cf. Jer. 52:12f.); the second day of the seventh month, for the murder of Gedaliah (2 K. 25:23-25); and the tenth day of the tenth month, for the first attack on Jerusalem (2 K. 25:1). Zechariah prophesied (8:19) that these fasts would be transformed into times of joy.

Fasts varied in length from one day (1 S. 14:24; 2 S. 3:35) to one night (Dnl. 6:18), three complete days (Est. 4:16), seven days (1 S. 31:13; 2 S. 12:16-18), or forty days (Ex. 34:28; Dt. 9:9; 1 K. 19:8). In Nineveh the Assyrians made even the animals fast (Jonah 3:7), and Jth. 4:10-13 records this practice among the Jews. Isa. 58:5; Joel 2:13; Jer. 14:12 discourage ostentation in fasting.

In the Apocrypha, fasting was regarded as a meritorious religious exercise (Tob. 12:8). It figured prominently in the devotions of Judith (Jth. 8:6) and Ezra (2 Esd. 6:31). People also fasted in times of national danger (1 Macc. 3:47; 2 Macc. 13:12).

John the Baptist required his followers to fast, whereas Jesus imposed no such rule on His disciples. When asked about this divergence from Jewish tradition (Mt. 9:14; Mk. 2:18; Lk. 5:33), Jesus stated that His followers would indeed fast once the bridegroom had been taken from their midst, i.e., after the Ascension. This statement has been interpreted as making fasting a legitimate, though not obligatory, function of the Christian life. Jesus is recorded as having fasted before His temptation (cf. Mt. 4:2; Mk. 1:13), but this was evidently a necessity because of the barren locale. Elsewhere He agreed with the prophets in denouncing ostentatious fasting (Mt. 6:16-18; Lk. 18:9-14), but he did not condemn fasting itself, apparently expecting His listeners to fast voluntarily.

Paul fasted after his blinding vision (Acts 9:9), before his first missionary journey (13:2f.), and for fourteen days during the storm in the Mediterranean Sea (27:33). Certain Jerusalem Jews took a vow of fasting until death (23:12-14) in an attempt to ensure Paul's death. The Textus Receptus associated fasting with prayer in several NT passages (Mt. 17:21; Mk. 9:29; 1 Cor. 7:5), but scholars generally consider these to be inferior readings, since they do not occur in several early uncial manuscripts.

FAT. In the OT "fat" usually translates Heb. *ḥēleḇ* or *ḥeleḇ*. It designates the layer of subcutaneous fat and the compact suet surrounding the viscera and imbedded in the entrails, which like the blood were forbidden as food in the Mosaic code (Lev. 3:17). Fat was to be sacrificed to God by being burned upon the altar (3:16; 7:30) on the very day on which a beast had been slaughtered, to remove temptation from the Israelite to use it otherwise (Ex. 23:18). The law was probably a sanitary restriction, for at an early date leprosy, scrofula, and disfiguring cutaneous diseases were thought to result from eating fat. The law was, moreover, an important provision teaching self-denial and the maxim that the best meat of the edible animal belonged to the Lord. *See also* SACRIFICES AND OFFERINGS IN THE OT V. On Mt. 22:4, *see* FATLING.

"Fat" is often used in figurative senses, e.g., abundant, fertile, robust, outwardly successful, insensitive, dull (see Dt. 32:15; Ps. 92:14 (MT 15), AV; 119:70; Prov. 11:25, AV; 13:4, AV; Isa. 6:10; Jer. 5:28; etc.). *See also* FATNESS.

In the AV of Joel 2:24, "fats" is an obsolete spelling of "vats." *See* WINE. H. L. E. LUERING R. K. H.

FATE [Heb. *pᵉquddâ*] (Nu. 16:29); AV VISITATION; [*ʿēṯ*–'time'] (Ps. 81:15 [MT 16]); AV TIME; NEB TROUBLES; [*derek*–'way'] (Ps. 49:13 [MT 14]); AV WAY; [*miqreh*] (Eccl. 2:14; 3:19; 9:2f.); AV EVENT, "that which befalleth"; NEB also CHANCE; [*nāweh*] (Jer. 49:20; 50:45; Lam. 3:51); AV HABITATION, "because of." In the Bible fate is usually associated with the inevitability of death. But this is always seen as being determined by the sovereign will of God; thus the Hebrew notion of fate was not fatalistic, as was the Greek (cf. W. C. Greene, *Moira: Fate, Good and Evil* [repr. 1963]). This does not mean, however, that the concept of fate was not problematic for the Hebrews. The Preacher perceived that the same fate came to all men, whether wise or foolish (Eccl. 2:14), righteous or wicked, good or evil (3:19; 9:2f.). This appeared to him an evil, a vanity that renders all things vain. He concluded that, because this mystery could not be fathomed, one should enjoy life while it lasts by living as God wills (cf. 9:7-10; 12:13; etc.).

G. WYPER N. J. O.

FATHER [Heb. *'āḇ* (cf. Akk. *abu*; Ugar. *ab*; etc.); Gk. *patḗr*].

I. Uses of the Term.–Along with its usual meaning (Ex. 20:12; Job 42:15; Jer. 47:3; etc.), Heb. *'āḇ* can also mean grandfather (Gen. 28:13; 32:9 [MT 10]; etc.), great-grandfather (1 K. 15:11, 24; etc.), or even the ancestral father of a tribe or people (Gen. 10:21; 17:4f.; 19:37f.; Dt. 26:5; etc.). Sometimes "the fathers" refers to the early

generations of a people, i.e., the forefathers (Ex. 3:15; Nu. 20:15; Ps. 22:4 [MT 5]; etc.). On the expression "be gathered to one's fathers" *see* GATHER.

The Heb. *'āḇ* can also refer to the founder of an occupation or a life-style (e.g., Gen. 4:20f.; Jer. 35:6, 8). Sometimes a specific characteristic of a literal father is applied in a nonliteral way; thus the *'āḇ* may be a person who provides protection (Job 29:16; 31:18), acts as a counselor (Gen. 45:8; 1 Macc. 2:65; 11:32), or is worthy of honor or respect, e.g., a prophet (2 K. 2:12; 6:21; 8:9; 13:14) or a priest (Jgs. 17:10; 18:19). Cf. also Acts 7:2; 22:1; and the title of the Mishnaic tractate *Aboth*, which contains the sayings of the esteemed rabbis. To prevent excesses in this regard, Jesus exhorted His followers not to desire the title of "father," i.e., respected teacher (cf. vv. 8, 10, where Jesus similarly discouraged the desire for the titles "rabbi" and "master"). The use of "father" in 1 Jn. 2:13f. is problematic; it may refer to elders in the church (so B. F. Westcott, *Epistles of John* [repr. 1966], p. 60), although a reference to mature Christians seems more likely (cf. I. H. Marshall, *Epistles of John* [*NICNT*, 1978], pp. 137-140).

In an exchange with some Jewish followers, Jesus stated that they were of their "father the devil" (Jn. 8:44). The context indicates that Jesus was thereby referring to their spiritual heritage, which contrasted so vividly with His own (cf. vv. 37-43). Cf. also 1 Cor. 4:15, where Paul says that he became the spiritual father (Gk. *egénnēsa*) of the Corinthians.

For God as father, see III below and GOD THE FATHER.

II. Function of the Father in the Family.–In the OT, the father was the main figure who wielded authority and commanded respect. He was to be honored (Ex. 20:12; Dt. 5:16; Mal. 1:6; cf. Ex. 21:15, 17) and obeyed (Dt. 21:18; Prov. 23:22; cf. Isaac's obedience to Abraham in Gen. 22:1-14). He possessed almost unlimited power over the lives of the members of his family — he could sell his daughter into slavery (Ex. 21:7), have his son stoned if the son attempted to entice him away from Yahwism (Dt. 13:6-10) or if the son was a glutton or drunkard (Dt. 21:18-21; cf. Judah's pronouncement of the death sentence upon his daughter-in-law in Gen. 38:24), or take away the birthright of the eldest son for a serious offense (Gen. 35:22; 49:4; 1 Ch. 5:1; favoritism was prohibited, however, in Dt. 21:15-17; cf. deVaux, pp. 41f.). Along with this position of authority the father had certain responsibilities. He had to love, care for, and protect his children (Dt. 1:31; Ps. 103:13; cf. Job 1:5; Jer. 47:3; Hos. 11:1-3). He also had to train, educate (Dt. 4:9; 6:7; Prov. 1:8; 22:6) and discipline them (Prov. 13:24; 19:18; 23:13f.; Sir. 30:1-13; cf. deVaux, pp. 48-50).

In the NT, Jesus acknowledged the continuing validity of the command in Ex. 20:12 for children to honor their parents (Mk. 7:9-13; 10:19). Paul reiterated this (Eph. 6:2f.) and added that obedience to one's parents is also necessary (Eph. 6:1; Col. 3:20). He instructed fathers not to provoke their children to anger (Eph. 6:4a; Col. 3:21), but to discipline and instruct them (Eph. 6:4b).

III. Theological Concept of Father.–God, in biblical thought, is designated as the father of the second person of the trinity, of the world and of all things in it, of the individual believer, of the nation Israel, of Jesus of Bethlehem, and of all spiritual blessings and realities. Contingent on this meaning of father, and corresponding to it, the term son is applied in biblical thought to angels (Job 38:7), to the individual believer, to the nation of Israel, and to Jesus of Bethlehem as the eternal Son.

To childless Abram, husband of barren Sarai, God's promise to make him a prolific fountain was expressed in terms of fatherhood. Abram's seed will be in number like the stars of the heavens and the sands of the seashore. God will make him "exceedingly fruitful" (Gen. 17:6), so that his seed will be in number "as the dust of the earth" (Gen. 13:16), "as the stars of heaven and as the sand which is on the seashore" (22:17); "kings shall come forth from you" (17:6); Abram will become "the father of a multitude of nations" (17:5), "the father of all who believe" (Rom. 4:11), "the father of the circumcised" (v. 12), and "the father of us all" (v. 16). In each instance the promised fatherhood was a promise of becoming a source from which would flow that which was not Abram; yet in becoming such a source Abram would become what he had not been, and therefore he received a new name, Abraham. That Abram became the father of others, and through this what God willed him to be, only by faith and through the promise of God, indicates that God Himself is the father of the whole movement. God, accordingly, is the father of Israel (Jer. 31:9; Isa. 63:16; cf. Isa. 64). Similarly, the source-quality of God's fatherhood is expressed in the phrases "Father of glory" (Eph. 1:17), and "Father of lights" (Jas. 1:17).
