Thus the concept of father, whether applied to God, man, the devil, or evil, and whether used biologically or spiritually, literally or figuratively, always expresses the notion of source or fountain of procession. The richness and beauty of the biblical concept of father lies in that, being a source of another, the father imparts and communicates himself to this other. This idea of self-impartation and self-communication is as definitive of the concept of father as is the notion of source. A father gives of himself to that which he fathers, so what proceeds from the source participates in the source. He who is a father communicates something of himself to that which he fathers in such a way that the other has not merely his source in the father, but also the nature of the father's reality. The other partakes of the nature of his father. This accounts for the close ties and deep affection between the source and that which proceeds from it.

This relationship between source and its issue must be distinguished from all pagan notions that conceive of reality as an emanation from or an overflow of the divine being. On the contrary, this relationship must be understood within the biblical categories of creation and re-creation.

Since the created world has its source in God the Creator, it shares in the power and glory of God and is thus a revelation of its Maker. Man, too, has his origin in God, and as the image of his Father he shares in the nature of his Father, as for example, in his sexuality and in his dominion over the earth (Gen. 1:26-28). A more expansive example of this truth is found in the teaching of the Heidelberg Catechism that man is created in the image of God in order that man may rightly "know" God, "love" Him, and "live with Him in eternal blessedness" (Lord's Day III). In this sharing in the life of God whence man came, man's life consists. Because God is man's origin, God is man's home, his "dwelling place in all generations" (Ps. 90:1), and man is restless until he rests in God; for the same reason, a human rejection of God and departure from Him is self-destructive, the way to death.

In this biblical idea of fatherhood, as a source that shares its nature with its issue, lies the basis for the distinctive feature of biblical epistemology. Knowledge, as biblically defined, depends on the willingness of the object to make itself known and on the willingness of the knower to participate in, and be identified with, the object of his knowledge. There is no essential dualism between the knower and the known. Adam "knows" his wife (Gen.

4:1), and in this knowing they become "one flesh" (2:24); the believer knows God, and in this knowing he shares God's life and has, thus, "eternal life" (Jn. 17:3). In the Bible nothing is to be found of that objective-subjective dualism that has characterized modern epistemology since Kant, in which the knower is alien and estranged from the object of his knowledge. In biblical thought both nature and man derive from God, and each in its own way mutually shares the nature of its origin. Thus there is no ontological estrangement between man and man, or between man and nature. The strange reality is only a matter of time, place, and circumstance, without ontological rootage. In biblical thought even the "ox knows its owner, and the ass its master's crib" (Isa. 1:3).

This self-communication of God as father that is expressed in creation comes to clearer expression in God's relationship to Israel. God is the source, the creator of Israel; He is therefore the father of Israel, and Israel is God's son. To Israel He gives Himself in His covenant, makes known His secret, and gives His name so that His people are called by His name (Jer. 14:9); and from Israel He takes His own name, a name that is His "name for ever," "to be remembered throughout all generations," when He declares Himself to be the God of Abraham, Isaac, and Jacob (Ex. 3:15). The unique and profound significance of this divine self-giving to Israel, through which each assumes and wills to be known by the name of the other, is expressed in the biblical concept of father and in the singularly rich meaning that a name has in biblical thought.

The full meaning of father, as the denotation of origin and also as self-impartation, comes to ultimate expression in the NT in that fatherly act of God in sending forth His only begotten Son into the world of sin, death, cross, and hell, that Israel and the world might be saved, and in that complementary act in which God sends forth His Spirit into the Church and into the hearts of its members. The sum of this action is variously described as a creation in Christ (Eph. 2:10), a new birth (Jn. 3:5f.), and a being begotten again by the Word of God (1 Pet. 1:23). Peter puts the whole purpose of God's fatherly redemptive action in bold theological shorthand when he says that mankind "may . . . become partakers of the divine nature" (2 Pet. 1:4).

The statement that God is Father and the statement that God is love are only two different ways of asserting what God *is*. God is father, not by independent decision, but in His very nature and being. God is not love because He loves; He loves because He is love. God is not a father because He has a son; He has a son because He is a father. In His free sovereign decision to father the world, Israel, Jesus of Bethlehem, and the Church, to be the God by whom every family on earth is named, God neither contradicts nor violates but only freely reveals what He in His nature and being necessarily is. Within the trinity God as Father gives and communicates Himself in His begetting of the Son and aspiration of the Spirit; and in His free works *ad extra* by which He makes Himself the source of that which is not-God, and gives Himself to that which He has willed to issue from Himself, He reveals in being-for-us what He is in Himself.

Because God as father is not only the source of man but a source that determines the nature of man, biblical thought regards it as wholly natural that the creature will honor its creator, and that the son will acknowledge, honor, and thank his Father, and that the Son, through whom, by whom, and unto whom all things were created, will be acknowledged when He comes to "his own" (Jn. 1:11). Where this occurs, the son finds himself in the father. Where this does not occur, sin is present, the son is rejecting his father, and thereby repudiating both whence he came and what he is. For what he is is determined by his origin, his father; and in repudiating his father he repudiates himself. Father and son are so related that if the son loses the father, he loses himself.

FATHER, GOD THE. *See* GOD THE FATHER.

FATHER-IN-LAW. *See* RELATIONSHIPS, FAMILY.

FATHERLESS [Heb. *yāṯôm, 'ên 'āḇ*]; AV also POOR (Job 5:15); NEB also ORPHAN, DESTITUTE (Job 5:15), INNOCENT (Job 31:21), WITHOUT A FATHER (Lam. 5:3). The fatherless were one of the oppressed classes in Israelite society, together with the widow and sojourner (cf. Zec. 7:10). Because the husband or father was the primary legal defender in biblical times, the widow and her children often had no one to defend them. Consequently, in every instance in which the fatherless are mentioned, the context is one of helplessness in the face of oppression.

God is the Father of the fatherless and the Protector of widows (Job 5:15; Ps. 10:14; 68:5 [MT 6]; 146:9; Jer. 49:11), and He is the one who executes justice for them (Dt. 10:18; Ps. 10:18). The Covenant Code contains special provisions for their protection and welfare. The fatherless were entitled to receive a share of the produce of the field by gleaning (Dt. 24:19-21) and by sharing in the third year's tithe (14:29; 26:12f.). They were to be included in the feasts (16:11, 14) and had to be protected from all forms of injustice (Ex. 22:22-24 [MT 23-25]; Dt. 24:17; 27:19; Prov. 23:10; Ps. 82:3; 2 Esd. 2:20). Israel's duty to the fatherless was rooted in the Exodus (Dt. 24:18, 22). Because God had redeemed Israel from oppression, Israel was required to redeem the helpless in her society.

In spite of the Covenant Code, however, the fatherless frequently lived in a situation of terror (Ps. 10:18; 94:6); thus, the most terrible curse invoked on the wicked man is that his children be fatherless (Ps. 109:9, 12), and God's judgments on Israel could be described as an absence of His compassion on Israel's fatherless (Isa. 9:17). Consequently, oppression of the fatherless became a typical way of describing Israel's failure to keep the covenant. In the book of Job, the sinner is one who oppresses the fatherless (6:27; 22:9; 24:3, 9), and the righteous person is one who defends their cause (29:12; 31:17, 21). The prophets condemn Israel for breaking the covenant by oppressing the fatherless (Isa. 1:17, 23; 10:2; Jer. 5:28; Ezk. 22:7), and they announce that exile can be avoided only by doing justice and showing kindness to the fatherless (Jer. 7:6; 22:3; Zec. 7:10-14). In exile Israel became like the fatherless she had never defended (Lam. 5:3). Then the people of Israel experienced, as the fatherless had always known, that God alone could help her (Hos. 14:3, AV).

The fatherless, who necessarily depended on God for safety and salvation, became a type representing the people of God. Consequently, Israel's treatment of the fatherless revealed in a most unique way whether Israel itself understood what it meant to be the people of God.

D. E. HOLWERDA

FATHER'S BROTHER. *See* RELATIONSHIPS, FAMILY.

FATHER'S HOUSE; FATHER'S HOUSEHOLD [Heb. *bêṯ hā'āḇ*, Gk. *hós oíkos toú patrós, en toís toú patrós* (Lk.

2:49)]; AV also FAMILY, "Father's house" (Jn. 14:2); NEB also FATHER'S FAMILY, FAMILY, FATHER'S LINE, TRIBE, CLAN, ANCESTRAL HOUSE. The idea of "house" is also elliptical in Heb. *rā'šê hā'āḇôṯ*, "head of the fathers' (houses)."

The father's house was the basic social unit within Israel. Israel was a tribal society in which kinship played the primary part. The phrase *bêṯ hā'āḇ* occurs most frequently in regard to genealogies and census taking; it apparently refers to the smallest unit used for these purposes. The relationship between a father's house and a family is vague. Such passages as Gen. 12:1 suggest that the family was a larger unit. There is, however, no clearcut line. The NEB translates the Hebrew with "family," "tribe," and "clan," thereby showing that the phrase could also refer to a very large unit. The number within a father's house could be large. Jerubbaal's house was composed of seventy-two sons (Jgs. 9:5); the house of Eleazar produced sixteen heads of fathers' houses (1 Ch. 24:4).

Fathers' houses played a crucial role in the organization of the nation. In the wilderness the camp was arranged by fathers' houses (here for tribes, cf. Nu. 2:2f.), each with its own ensigns (v. 2). During the kingdom the army was ordered according to fathers' houses (2 Ch. 25:5). At the time of King Uzziah there were numbered 2600 heads of fathers' houses who commanded an army of 307,500 (2 Ch. 26:12f.). Moses communicated instructions to the people through the heads of fathers' houses (Nu. 32:28). David did the same in regard to the priests (1 Ch. 15:11f.): he summoned two priests and six Levites as heads of fathers' houses to communicate a message to the entire tribe. Heads of fathers' houses were also present at important matters of state. At his enthronement, Solomon delivered an address in their presence (2 Ch. 1:2). Later they were present for the great occasion of bringing the ark into the temple built by Solomon (1 K. 8:1). Again they participated in the covenant when Joash was enthroned under the leadership of the high priest Jehoiada (2 Ch. 23:2f.). In Babylon after Cyrus assumed the rulership, God moved the spirits of the heads of fathers' houses to return to Jerusalem in order to rebuild the house of the Lord (Ezr. 1:5). Those who returned and could not prove that their fathers' houses belonged to Israel were excluded from the priesthood and holy food (2:59-63). In reestablishing the Jerusalem community, Ezra, in his desire to produce a far-reaching observation of the law, instructed the heads of fathers' houses (Neh. 8:13-19).

The head of each house bore responsibility for that house. He was to see that the members learned the law and observed it. His participation in the formal worship of Yahweh affected all of his family. He might confess the sins of the members of the household (Neh. 1:6; cf. Job 1:5). As long as the father was living, even his sons' families remained a part of his family. If a father was very important (e.g., in the case of Jacob or King David), all the members of that family continued to partake of that name as well as the name of their immediate father.

Women and children received their standing through the father's house. When a woman made a vow, her father — or her husband if she was married — had the right to negate it (Nu. 30). Inheritance of the father's house was through his sons (Gen. 31:14) or, if there were no sons, through the daughters (Nu. 36). A childless widow or divorcee returned to her father's house (Gen. 38:11; Lev. 22:13). At least one bride who became dissatisfied fled from her husband and returned to her father's house (Jgs. 19:2).

A member of the house could act in such a way as to bring blessing or condemnation on the entire house, as Rahab did in saving her whole family from the Israelite destruction of Jericho (Josh. 6:17,23). Similarly, Korah, Dathan, and Abiram, in wrongly challenging God's methods, brought destruction on their entire households (Nu. 16:16-33). An illegitimate son might be expelled from the household, as in the case of Jephthah (Jgs. 11:2).

In OT times the preservation of one's memory through his father's house was a great concern. Saul realized that David was destined by God to become king over Israel; therefore he had David take an oath that he would not destroy Saul's name from his father's house (1 S. 24:21). Brothers without many children could join together to become one father's house (1 Ch. 23:11). Levirate marriage was intended to insure the establishment of a father's house for the deceased brother (cf. *ILC*, I, 77-81).

In the NT the rich man in Hades asked that a messenger be sent to his father's house, which included five brothers (Lk. 16:27f.); the same concept is employed here as in the OT (cf. Acts 7:20). In the same manner the Philippian jailer brought salvation to his entire household through his own faith (Acts 16:31-34). The phrase took on a richer meaning, however, when Jesus referred to the temple as His Father's house (Jn. 2:16). After failing to accompany His parents on their homeward journey from Jerusalem, Jesus stated His reason for remaining behind: "I must be in my Father's house" (Lk. 2:49; lit. "about the things of my father"). Obviously "the things" refer to His ministry, which began at the temple and ended there. In Jn. 14:2 Jesus referred to heaven as His Father's house, where He was about to go to prepare "rooms" for His followers. Jesus belongs to God's household; and He makes all of His followers members of that household. J. E. HARTLEY

FATHOM [Gk. *orguiá*] (Acts 27:28). The literal meaning is the length of the outstretched arms, equal to 4 cubits or about 2 m. (6 ft.). *See* WEIGHTS AND MEASURES.

FATLING; FATTED ANIMAL. A domestic animal, generally young, well cared for, and fattened for sacrificial slaughter, although not restricted to such use (cf. 1 S. 28:24; Mt. 22:4; see also Prov. 15:17; Jer. 46:21).

The several terms so translated stress the animal's quality rather than its species. Most frequent is Heb. *mᵉrî'* (2 S. 6:13; 1 K. 1:9, 19, 25; Isa. 11:6; Ezk. 39:18; AV also "fat cattle"; NEB "buffaloes," "fat beasts," "calf"). Primarily used for cattle and listed with other sacrificial animals, in Ezk. 39:18 it is a general term for a variety of "princes of the earth" that are to be sacrificed. Similar in use is Heb. *mē(a)ḥ* (Ps. 66:15; Isa. 5:17), derived from the word for marrow. Heb. *bārî'* (Ezk. 34:3) is rendered "fat sheep" in Ezk. 34:20 (AV "fat cattle"). The AV translates Gk. *sitistós* in Mt. 22:4 as "fatlings" (RSV "fat calves").

Probably meaning "second offspring" and implying higher quality than firstlings, Heb. *(ham)mišneh* is generally emended to *hammašmannîm*, literally "fatted things," or *haššᵉmēnîm*, literally "fat" (pl.) (cf. BDB, p. 1041).

Participial adjectives meaning "fatted" include Heb. *marbēq* (1 S. 28:24; Jer. 46:21, AV mg. "bullocks of the stall"; NEB "stall-fed") and Gk. *siteutós* (Lk. 15:23, 27, 30), referring to cattle, and Heb. *'āḇas*, applied to an ox (Prov. 15:17) and fowl (1 K. 4:23 [MT 5:3]). The plural of Heb. *mᵉrî'*, "fatling," is translated "fatted beasts" in Am. 5:22.

See also CALF; CATTLE. A. C. M.

FATNESS. A term describing either animal tissue or the condition of the soil. Heb. *mišmān* denotes the fatness or fertile condition of the land (Gen. 27:28, 39; NEB

"richness"). Heb. *dešen* points to the best part of a tree (Jgs. 9:9; NEB "rich oil"), the best food served (Job 36:16; NEB "unlimited plenty"), or the earth's abundant fruits (Ps. 65:11 [MT 12]; NEB "sweet juice"). Israel was not forbidden to enjoy the rich increase of the soil; in fact it would be theirs as long as they served the Lord (cf. Isa. 55:2; NEB "the fat of the land").

Hebrew *ḥēleḇ* refers to the fat of animals that covered their inner parts (*see* FAT). Its meaning in Ps. 73:7 is not clear. The context describes the proud and violent behavior of the arrogant (v. 6). In v. 7 the "fatness" of the eyes" parallels the "folly of the heart." One likely meaning is "gluttony" (*IB*, IV, 388), which is shown through the stretching of the eye. R. W. V.

FAULT [Heb. *ḥaṭṭā't*–'sin' (Ex. 5:16), *rîḇ* (Ex. 17:2), *mᵉ'ûmâ* (2 S. 29:3), *ḥēṭ'* (Gen. 41:9), *sēṯer*, *'āwōn* (2 S. 3:8; Ps. 59:4 [MT 5]); Aram. *šᵉḥaṭ*; Gk. *elénchō* (Mt. 18:15), *mémphomai* (Rom. 9:19; He. 8:8), *mōmáomai* (2 Cor. 6:3)]; AV also CHIDE, BLAME; NEB also DISPUTE WITH, "charge with disloyalty," MALPRACTICE, "take the matter up with" (Mt. 18:15), etc.; **FAULT-FINDER** [Heb. *rîḇ*] (Job 40:2); AV CONTENDETH; NEB (A MAN WHO) DISPUTES; **FAULTFINDING** [Heb. *rîḇ*] (Ex. 17:7); AV CHIDING; NEB DISPUTED; **FAULTLESS** [Gk. *ámemptos*] (He. 8:7).

In Ps. 19:12 (MT 13) the RSV renders Heb. *sēṯer*, "hiding place," as "hidden faults" (NEB "secret faults"), parallel to "sin" (Heb. *šᵉgî'â*, "sin [of ignorance]"). In Dnl. 6:4 (MT 5) Aram. *šᵉḥîṭâ* (part. of *šᵉḥaṭ*, "spoil") occurs in conjunction with *šālû*, "negligence." The Hebrew of Ps. 73:10, *ûmê mālē' yimmāṣû*, literally "and waters of fulness were drained out," is difficult. The AV rendering, "and waters of a full cup are wrung out of them" (cf. RSV mg.), is a literal though unintelligible translation. The RSV emendation, *ûmᵉ'ûmâ lō' yimṣā'û lᵉhem*, "and find no fault in them" (cf. NEB), relates v. 10 to the preceding verses: people agree with violent men and accept their behavior. (Cf. M. Dahood, *Psalms*, II [*AB*, 1968], 186, 190.)

The OT words for "fault" point to wrong or error that results in the failure to reach a certain standard. Moses was accused by the Israelites of failing to meet their needs (Ex. 17:2); Abner had to defend himself against the charge of moral impurity (2 S. 3:8); and David had to face enemies who harassed him for no sin on his part (Ps. 59:4). In two instances, however, people were found blameless (1 S. 29:3, David; Dnl. 6:4, Daniel).

The NT deepens this OT concept. According to Mt. 18:15 the sinner must confess his fault to the one against whom he sinned. Human wrong, moreover, is seen as a failure to reach integrity with God. Thus the first covenant became faulty because of human unbelief, so God established a new covenant (He. 8:7f.; *see* COVENANT [OT] IV.D). In Rom. 9:19 Paul rebukes those who accuse God of unfairly finding fault with human beings (*see* ELECTION).

See also INIQUITY; RIGHTEOUSNESS.

V. B. GILLESPIE
R. W. V.

FAULTY. The AV translates Heb. *'āšēm* in 2 S. 14:13 in the obsolete sense of "guilty."

FAUNA. *See* ZOOLOGY.

FAVOR; FAVORABLE; FAVORABLY; FAVORITE [Heb. *ḥēn, ḥānan, tᵉḥinnâ, rāṣâ, rāṣôn, ṭôḇ, ṭôḇâ*–'good,' *nō'am* (Ps. 90:17), *šālôm*–'peace' (Gen. 41:16), *ḥāpēṣ* (2 S. 20:11), *dereḵ*–'way' (Jer. 3:13), *diššēn*–'find (burnt-offering) fat' (Ps. 20:3 [MT 4])]; AV also GRACE, ACCEPT(ABLE), GOOD, GOOD WILL, BEAUTY, PEACE, WAYS, etc.; NEB also "delightful things," WELFARE, "are for" (2 S. 20:11), "promiscuous traffic" (Jer. 3:13), GRACIOUS, KINDNESS, PITY, ESTEEM, SUCCESS, WILL, etc.; [Gk. *cháris, charitóō* (Lk. 1:28), *peíthō* (Gal. 1:10), *prókima* (1 Tim. 5:21), *hessóomai* (2 Cor. 12:13)]; AV also GRACE, PERSUADE, PREFER, "be inferior" (2 Cor. 12:13); NEB also "canvass . . . for support" (Gal. 1:10), PRE-JUDGE, "be treated worse" (2 Cor. 12:13), etc. The term also occurs in such OT and NT phrases as "find favor in the sight of" (Heb. *māṣā' ḥēn bᵉ'ênê*, occurring frequently), "find favor" (*nāśā' ḥēn bᵉ'ênê*, Est. 2:15), "win favor" (*nāśā' ḥeseḏ lipnê*, Est. 2:9), "give favor" (*nāṯan ḥēn*), "grant [show] favor" (*nāśā' pᵉnê*–lit. "lift up the face of"), "entreat the favor of" (*ḥillâ pᵉnê*–lit. "make the face pleasant"), "look with favor on" (*'ênê bᵉ*–lit. "eyes on," Ps. 101:6), "in favor of" (Gk. *hypér*, 1 Cor. 4:6), "find favor" (*heurískō chárin*), "give favor" (*dídōmi chárin*, Acts 7:10), "do a favor" (*chárin katathésthai*, Acts 24:27; 25:9), etc.

"Favor" characterizes strong personal relationships. It is any free act of kindness toward another person. "To find favor" means to receive the attention and respect of another. Lot was granted deliverance from Sodom, for the messengers favored him (Gen. 19:15-23). Jacob sent all kinds of gifts to appease his brother and gain his favor (32:5). Joseph was successful, became greatly favored by his master, and was elevated to overseer of the household (39:4). These three examples indicate a type of relationship in which the party favored receives great benefits. Therefore, in making a request one entreats the favor of the other person (50:4f.).

To behold the FACE of someone or to be granted an audience, especially with regard to an important leader, is to receive his favor. Consequently, many phrases translated with "favor" have the word "face" as a component. "To lift up the face" is translated "to win the favor of" or "accept." "To make the face of one pleasant" is to entreat that person so that his hostility is turned to kindness. The same is true in prayer when the supplicants endeavor to gain the face or favor of God; i.e., they desire to be heard, and God's hearing His people implies that He will act on their behalf.

Thus favor is ultimately a divine quality, given to human beings as long as they live (Ps. 84:11 [MT 12]); by it people are firmly established (Ps. 30:5, 7 [MT 6, 8]). God grants His favor to help a person endure difficult circumstances (Gen. 39:21). It protects the righteous like a shield (Ps. 5:12 [MT 13]). Whoever has the favor of the Lord has great power in prayer. Moses had the favor of the Lord so he was able to intercede for the people (Ex. 32:7-14; 33:12-23). Finally, when God acts openly and dramatically for the salvation of humanity, the time is called "a time of favor" (Isa. 49:8; cf. 61:2).

God can also cause an enemy to be favorably disposed to His people, as the citizens of Egypt were to the Israelites to the extent that they provided them with all kinds of gifts at the time of the Exodus (Ex. 3:21f.; 11:2f.).

On "Favour and Union" (Zec. 11:7, 10, NEB) *see* GRACE AND UNION.

See also GRACE; MERCY. J. E. HARTLEY

FAWN. *See* DEER.

FAWNING, COME [Heb. *kāḥaš*] (Dt. 33:29); AV "be found liars"; NEB "come cringing." Heb. *kāḥaš*, properly "lie, deceive," here probably means "insincerely (or unwillingly) show homage."

B. Qumrân
IV. NT
A. Terms
B. Meaning
1. Religion
2. Reverence
3. Terror
V. Conclusion

I. Introduction.–This article concentrates on the relationship between God and fear. This relationship may be viewed from three perspectives. Though these three points of view are interrelated and unavoidably overlap, it is helpful to treat them separately in order to delineate as fully as possible the nuances of each one. It must be stressed that the classification given below is suggestive, not absolute, and many texts listed under one category might well be included under another.

II. OT.–A. Terms. Although the root *yr'* is by far the most common Hebrew root related to "fear," other roots occur often enough to warrant consideration and more specifically elucidate the concept. The following is a list of these roots with their primary and/or significant (RSV) translations.

'ym, "terror, dread"	*yr'*, "fear"
bhl, "dismay, terror"	*'rṣ*, "ruthless, dread, terror"
b't, "terror"	*phd*, "dread, fear"
gwr, "fear"	*pls*, "horror"
ḥyl, "anguish, trembling"	*rgz*, "tremble"
ḥrd, "trembling, fear"	*r'd*, "tremble"
ḥtt, "dismay, terror, ruin"	*r'š*, "quake, shake"

(For a complete list of related terms and a thorough treatment of this subject, see Becker.)

From this list it is apparent that the notion of fear ranges from terror, which may be evidenced by shaking or trembling, to awe or reverence, which induces love or worship rather than terror. That these extremes are not contradictory is suggested not only by instances of the same Hebrew word being translated by both extremes (e.g., niphal of *ḥāṭaṭ*, "stand in awe," Mal. 2:5, and "be terror-stricken," Isa. 30:31), but also by synonymous parallelism of two (or more) different Hebrew roots (e.g., Ps. 55:4f. [MT 5f.], *ḥîl*, "be in anguish," *'êmâ*, "terror," *yir'â*, "fear," *ra'aḏ*, "trembling," *pallāṣûṯ*, "horror"). Even in nonpoetic contexts the clear correlation of terms may indicate their synonymity (e.g., niphal of *ḥāṭaṭ*, "be dismayed," and *yārē'*, "fear," in Dt. 1:21; Josh. 8:1; *'rṣ*, "be frightened," and the niphal of *ḥāṭaṭ*, "be dismayed," in Josh. 1:9 — note the similarity of contexts).

B. Meaning. 1. Religion. One peculiar characteristic of the root *yr'* (and its derivatives) is that it frequently occurs as an equivalent for true religion. This characteristic is evidenced by those words or expressions with which it is associated. Most frequently this root is connected with God's ways or laws, for which several different expressions are used. Thus to fear God is to keep His commandments (Dt. 5:29; 6:2, 24; Eccl. 12:13; etc.) and His laws (Dt. 31:12f.; 28:58; cf. Jer. 44:10), obey His voice (1 S. 12:14; Hag. 1:12), walk after Him (Dt. 10:12) or in His ways (Dt. 8:6; 2 Ch. 6:31), or simply serve Him (Dt. 6:13; 10:20; Josh. 24:14). The fear of the Lord is parallel to the ordinances of the Lord in Ps. 19:9; in 86:11 the psalmist asks God to teach him His way that he may walk in His truth, and to unite his heart to fear God's name. In Dt. 10:20 the Israelites are told to fear God, serve Him, cleave to Him, and swear by His name (cf. 6:13); in 13:4 they are commanded to walk after Him, fear Him, keep His commandments, obey His voice, serve Him, and cleave to Him. It should be noted that such obedience is not a burden, but a delight (Ps. 112:1; Isa. 11:3).

The elements of loyalty (*ḥeseḏ*) and faithfulness (*'ᵉmûnâ* or *'ᵉmeṯ*) or belief (hiphil of *'mn*) are also associated with fearing God (Ex. 14:31; 2 Ch. 19:9; Prov. 16:6). Similarly, the fear of the Lord and the knowledge of Him are related (1 K. 8:43 par. 2 Ch. 6:33; Prov. 1:29; note the parallelism in Prov. 2:5 and 9:10; cf. also Isa. 11:2). Thus Eliphaz can charge Job with "doing away with the fear of God and hindering meditation before God" (Job 15:4; cf. Mal. 3:16), Zephaniah can parallel fearing God with accepting instruction (*mûsār*; cf. Prov. 15:33, "the fear of the Lord is instruction [*mûsār*] in wisdom"), and the Chronicler can speak of Zechariah instructing Uzziah "in the fear of God" (2 Ch. 26:5). This relation with knowledge or wisdom is most evident in that famous wisdom saying, "The fear of the Lord is the beginning of knowledge" (Prov. 1:7; with slight variation in Job 28:28; Ps. 111:10). The meaning of this saying has been debated; some (e.g., von Rad, p. 66) understand "beginning" (Heb. *rē'šîṯ*) as the starting point, i.e., the most basic level, but others (e.g., D. Kidner, *Proverbs* [*Tyndale OT Comms.*, 1964], p. 59) prefer to see it as the "first principle," i.e., an essential or chief factor.

The fear of the Lord, moreover, is connected with departing from evil (Job 1:1, 8; 2:3; 28:28; Prov. 3:7; cf. 8:13). Thus those in authority who fear God will rule justly (2 S. 23:3; 2 Ch. 19:7). To withhold kindness (*ḥeseḏ*) from a friend is to forsake the "fear of the Almighty" (Job 6:14). The fear of the Lord is contrasted to wickedness: it "prolongs life, but the years of the wicked will be short" (Prov. 10:27; cf. Eccl. 8:12f.). Thus believers should not envy sinners, but persevere in the "fear of the Lord" (Prov. 23:17; cf. 15:16).

Perhaps the most characteristic expression for religious persons is "those who fear him [God]" (*yᵉrē'āyw* or *yir'ê YHWH*). This expression occurs almost exclusively in the Psalms (elsewhere only Mal. 3:16; 4:2 [MT 3:20]) and is an indicator of the Psalms' use as cultic hymns in the temple. That the phrase is a synonym for the worshipers assembled in the temple is clear from its synonymous parallelism with various other terms for that congregation: sons of Jacob and sons of Israel (22:23 [MT 24]), great congregation (22:25), Israel and the house of Aaron (115:9-11; 118:2-4), etc. In other psalms the identification is perhaps less explicit, but equally clear. Thus it is several times tied to the covenant (the means by which God related to His people), either explicitly (Ps. 25:14; 111:5), or implicitly by mention of *ḥeseḏ* (RSV "steadfast love"), the covenant love (33:18; 103:11, 17; 147:11; on *ḥeseḏ* as covenant love, see N. Glueck, Ḥesed *in the Bible* [Eng. tr., repr. 1975]). In at least one case the cultic setting is clear from the context (66:16; cf. vv. 13-15; cf. also 34:9; 128:4f.).

Although the probable late date of most (or all) of these psalms and the undoubtedly late date of Malachi suggest that the identification of the fear of Yahweh with religion was a later development, many other texts with this identification do not admit of a late date (even if postexilic

editing is allowed, it can hardly have been that extensive). According to W. Eichrodt (II, 268), this identification has in the OT a "remarkable regularity from earliest to latest times," as is clear from such passages as Gen. 20:11; Ex. 18:21; 2 K. 4:18. Thus it seems that this identification must have developed in preexilic times and been maintained along with the other senses of fear (i.e., reverence and terror). (For a general contrast of Israel and its ancient Near Eastern neighbors on this point, see Eichrodt, II, 272f., 275f.; cf. also R. Pfeiffer.)

This fear of God, this piety, has various effects, often resulting in some general good (Prov. 22:4; Eccl. 7:18; 8:12f.), social justice (2 K. 4:1; 2 Ch. 19:7 [*pāḥaḏ*, "fear"], 9; Neh. 5:15), personal longevity (Prov. 10:27; 14:27; 19:23), or family security (Prov. 14:26). It also aids instruction (Ps. 25:12; Prov. 1:7; 15:33) and prevents sin (Ex. 20:20; Prov. 16:16).

2. Reverence. The fear of God may also be understood as one important element in religion. This notion is most apparent in texts that conjoin or parallel two of the Hebrew synonyms listed above. In Ps. 33:8, e.g., "all the earth" is called upon to fear (*yr'*) the Lord, and the inhabitants of the earth to "stand in awe [*gûr*] of him" (cf. Ps. 22:3 [MT 4]; cf. also *pāḥaḏ* in Ps. 119:161). Here reverence for God is clearly in view, as it is in Mal. 2:5, where the prophet says Levi "feared" (*yr'*) God and "stood in awe" (niphal of *ḥāṭaṭ*) of Him. God is to be "held in awe [*nôrā'*, niphal part. of *yr'*] above all gods" (1 Ch. 16:25). the Israelites are to follow the law, that they may fear (*yārē'*) God's awful (*nôrā'*) name (Dt. 28:58).

The RSV uses "revere" only three times in reference to God. In Dt. 32:51 God rebukes His people for breaking faith with Him at Meribath-kadesh, for not revering Him as holy (piel of *qāḏaš*). In 1 K. 18:3, 12, Obadiah, who was over Ahab's household, is said to have revered ([*hāyâ*] *yārē'*) the Lord, as evidenced by his action of hiding God's prophets during Jezebel's purge (v. 4). (Cf. Ps. 130:4 for the relation between forgiveness and fear of God.) *See also* AWE; REVERENCE.

In many texts the fear of God is strongly linked with obedience and sometimes may be identified with it. (G. von Rad's thesis that one should interpret "'fear of God' simply as a term for obedience to the divine commands" [*Genesis* (*OTL*, rev. ed. 1972), p. 242; cf. also *OT Theology* (1965), II, 215; *Wisdom in Israel* (Eng. tr. 1972), p. 66] is an overstatement; cf., e.g., 2 Ch. 19:9; Jonah 1:9. For a more balanced view, see Brongers, pp. 161f.; Ringgren, pp. 126f.) Thus in Ps. 119:63 "all who fear thee [God]" is parallel to "those who keep thy precepts" (cf. v. 48; Dt. 5:29; 6:2, 24; 10:12; etc.). Prov. 24:21 states, "Fear the Lord and the king, and do not disobey either of them" (cf. Dt. 13:4; 1 S. 12:14; Hag. 1:12). A series of commands in Leviticus concludes with "and you shall fear your God" (19:14, 32; 25:17, 36, 43), clearly implying obedience.

As with the first sense of the fear of God, several effects may be attributed to reverence. Some of the same blessings accrue: general good (Dt. 5:29; Jer. 32:39), military victory (2 K. 17:39), political success (1 S. 12:14; Neh. 1:11), and family (Ps. 128). One of its purposes is to prevent people from turning away from God (Jer. 32:40).

3. Terror. A third aspect of "fear of God" is terror. God does inspire human beings to be in dread of him, sometimes unintentionally (in contexts of revelation or theophany, e.g., Ex. 3:6), sometimes intentionally. Thus He may rebuke the people for not fearing (*yr'*) or trembling (*ḥîl*) before Him (Jer. 5:22), and the psalmist exhorts: "Serve the Lord with fear [*yir'â*], with trembling [*rᵉʿāḏâ*] kiss his feet" (2:11f.). (The RSV here follows the traditional emendation, while the AV follows the MT; although the emendation seems preferable, it is not entirely satisfactory. See the comms.) Isaiah uses "terror" (Heb. *paḥaḏ*) in contexts of judgment. Three times in ch. 2 the prophet states that sinful people should hide from the "terror of the Lord" (vv. 10, 19, 21). In 24:17f. the prophet plays on the words "terror" (*paḥaḏ*), "pit" (*paḥaṭ*), and "snare" (*pāḥ*) to indicate the hopelessness of sinners on the Day of the Lord. Jeremiah may have borrowed this saying and applied it to Moab (48:43f.; cf. Lam. 3:47 for a similar play on words whose alliteration has not been lost in the RSV translation). He also states that God will bring terror on the Ammonites (49:5). (For a discussion of outward manifestations of fear, *see* HORROR; TREMBLE.)

But God also delivers His people from fear. The formula "Fear not" (or its equivalents) characterizes a great number of texts in which the objects of the fear are human enemies. The niphal of *ḥāṭaṭ*, "be dismayed," is frequently paired with *yr'* in contexts of impending battle, and usually God is exhorting His people not to fear, because He is with them (e.g., Dt. 1:21; 31:8; Josh. 8:1; 10:25; 2 Ch. 20:15, 17; 32:7; Jer. 30:10; 46:27; Ezk. 2:6; 3:9). *Yr'* also parallels *ʿāraṣ*, "be in dread," in similar contexts (Dt. 1:29; 31:6; cf. 7:21, where the Israelites are told not to be in dread of the Canaanites because God is great and terrible [*nôrā'*, niphal part. of *yr'*], and He is with the Israelites). Dt. 20:3 adds a third element: the Israelites need not fear, tremble (*ḥāpaz*), or be in dread. The root *ḥrd* is used several times when God promises peace for His people — no one shall make them afraid (Lev. 26:6; Jer. 30:10; 46:27; Ezk. 34:28; 39:26; Mic. 4:4; Zeph. 3:13).

To the believers this fear of God may become a problem. Since they (presumably) have been delivered by God from judgment, they should not have to experience the dread and terror that are usually associated with divine judgment. One solution to this problem is to regard this terror as a chastisement rather than a judgment (*see* EVIL III).

Job is the best example of one who has a great reverence for God (even God says so, 1:8; 2:3) but also an almost overwhelming terror of Him. (It is no solution to the problem to state that the prologue may have been part of an earlier and shorter story and the dialogues added later, and therefore the two different analyses of Job's relationship to God need not be reconciled. Whoever finally put the book together in its present form could not have been unaware of the problem, and must not have thought of this tension as contradictory. It is the canonical form of the book that is important.) Job associated God with the thing that he feared (*paḥaḏ pāḥaḏ*) and dreaded (*yāgar*, 3:25). In 6:4 he claimed that the "terrors [*bᵉʿûṯ*] of God" were arrayed against him. He became afraid (*yāgar*) of all his suffering, for which he held God responsible (9:28), and he appealed for the removal of the dread (*ʾêmâ*) of God that terrified (*bāʿaṯ*) him (9:34; repeated in 13:21). Later he confessed that he was terrified (*bāhal*) at God's presence and in dread (*pāḥaḏ*) when he considered Him (23:15f.).

One final expression warrants examination here. "Fear" and "trembling" are twice used together with the sense of reverence, although their obvious meaning is the common one (cf. Ex. 20:18; Dt. 20:3; Jgs. 7:3; etc.). In Jer. 33:9 the nations will "fear and tremble" (*pāḥaḏ wᵉrāgaz*) at God's work in Zion; reverence seems to be the more likely connotation here. Reverence also seems clearly in view when Darius decrees that everyone "tremble and fear" (Aram. *zwʿ* and *dḥl*) before the God of Daniel (Dnl. 6:26 [MT 27]; cf. also Ps. 2:11; 119:120). It should also be noted here that the participle *ḥārēḏ*, "trembling," is used four times to describe the (pious) response to God's word (Ezr. 9:4; 10:3; Isa. 66:2, 5 -- if scholars are correct in

assigning this part of Isaiah to postexilic times, this expression may be a later, alternative expression for "fear of the Lord").

C. Fear of Isaac (Heb. *paḥaḏ yiṣḥāq*). The name or epithet of the deity by whom Jacob swore an oath as part of his covenant with Laban (Gen. 31:42; in v. 53 it is slightly altered to the "Fear of his father Isaac"). The name has been interpreted in three basic ways. Some scholars (cited in A. Alt, p. 33 n. 63) thought it meant the fear that proceeded from the deity Isaac. In rejecting this proposal, Alt successfully argued for what has become the most widely accepted analysis of this name — the name of a deity (perhaps the deity's main or most impressive characteristic) who terrified Isaac and whom Isaac therefore worshiped. This analysis could have as its background Isaac's experience in Gen. 22 (for an interesting interpretation of Gen. 22, see Kierkegaard). Alt further pointed out (pp. 33f.) that on his analysis the "Fear of Isaac" would parallel in form "God of Abraham" and "Mighty One of Jacob," the deities of the other patriarchs (cf. Gen. 49:24 for "Mighty One of Jacob").

On the basis of several Semitic cognates W. F. Albright proposed a new sense for *paḥaḏ* — "kinsman" (*FSAC*, pp. 248f., esp. n. 71). Though his proposal was emotionally more palatable than "fear" and was widely accepted, D. Hillers later offered a thorough criticism of Albright's philological arguments, and Albright's proposal should now be rejected.

Thus Alt's explanation of the basic meaning of *paḥaḏ yiṣḥāq* as "Fear of Isaac" seems preferable; his analysis need not be accepted in all its details, however. The main criticism of it is that it supposes that the "Fear of Isaac" was a deity distinct from the "God of Abraham," a distinction bound up in large part with the documentary hypothesis (cf. pp. 22f., 34, esp. n. 66, 60f., 65-70). (On the weaknesses of the documentary hypothesis, *see* CRITICISM II.D.) The plain sense of Gen. 31:42 is that the "God of my father," the "God of Abraham," and the "Fear of Isaac" are all identical; these were simply different names or titles of the one God. Jacob's use of this title in v. 52, following (the pagan) Laban's reference to the "God of Abraham" and the "God of Nahor," may have been intended to avoid identifying too closely his God with Laban's.

D. Conclusion. The role of fear in the OT must not be isolated from other major elements in OT religion, especially when the "fear of the Lord" is seen as the OT expression for religion. Some references to faith, obedience, and the covenant were pointed out above (cf. Eichrodt, II, 309f., for further discussion of fear and faith).

Love (Heb. *'hb*) is another element that should not be ignored. Especially in Deuteronomy the love and fear of God are closely related (so closely that Eichrodt, II, 299, states, *"The requirement of love is thus nothing other than a new clarification and a deeper understanding of the old commandment to fear God"*). Not only are they explicitly linked (10:12f.; cf. 13:3f.), but they are also implicitly related through texts that delineate each of them by similar or identical expressions. Thus love is associated with walking in God's ways and keeping His commandments (e.g., 11:22; 19:9; 30:16) and obeying His voice (30:20). Blessing is also associated with love (7:13). The response of love, therefore, may be seen as a primary characteristic of that OT piety called the "fear of the Lord" (cf. further B. J. Bamberger, *HUCA*, 6 [1929], 39-53; Becker, pp. 60-65; V. H. Kooy, "The Fear and Love of God in Deuteronomy," in J. I. Cook, ed., *Grace Upon Grace* [1975], pp. 106-116).

Both divine holiness and human sinfulness are also related to the fear of God. Obviously God's holiness requires the judgment of human sin, and people's awareness of this requirement often causes them to be in dread of Him (e.g., Gen. 3:10; Dt. 9:19; Ps. 76:8 [MT 9]). But the grace that characterizes God (cf. the formula in Ex. 34:6, repeated in Neh. 9:17; Ps. 103:8; 145:8; Jonah 4:2) and His forgiveness can change that dread into reverence (Ps. 130:4), so that His terrible (*nôrā'* < *yr'*) name may be praised (Ps. 99:3; 111:9; cf. Becker, pp. 42-46).

III. Intertestamental Period.–*A. Apocrypha and Pseudepigrapha.* Most of these references occur in Sirach, which has several extended passages on the topic. Fear is used only in the sense of religion, however (but cf. von Rad, *Wisdom*, pp. 242-45). Sirach uses exalted language in delineating this concept: it is glory (cf. 40:27), it causes gladness, and gives long life (vv. 11-13). Verses 14-20 relate the fear of the Lord to wisdom: "To fear the Lord is the beginning of wisdom," i.e., its "foundation" (cf. 19:20, where "All wisdom is the fear of the Lord"; and 21:11, where "wisdom is the fulfilment of the fear of the Lord"); it is wisdom's full measure, giving satisfaction (cf. 40:26); it is wisdom's crown, giving peace and health; finally, it is the root of wisdom and gives long life. (Some manuscripts add v. 21, "The fear of the Lord drives away sins; and where it abides, it will turn away all anger.") Thus the person who fears the Lord is greater than the nobleman, the judge, and the ruler (10:24); and the "God-fearing man who lacks intelligence" is better than "the highly prudent man who transgresses the law" (19:24).

Outside of Sirach "fear" occurs less frequently, e.g., in the Letter of Aristeas fear is related to keeping God's law (159, 189); in T.Benj. 3:3f. fear denotes both religion and reverence. For further discussion of these and other texts, see *TDNT*, IX, 204-207.

B. Qumrân. The DSS mention the fear of God several times, though as K. Romaniuk (p. 29) points out, this element is not as dominant in the DSS as it is in the OT. Some of the same Hebrew terms are used (e.g., forms of *yr'*, *pḥd*) in ways similar to OT usage. Thus the members of the community are called *yr'y 'l* ("those who fear God," 1QH 12:3; 1QSb 1:1; CD 10:2; 20:19f.). The only occurrence of *yr't 'l* (1QSb 5:25) corresponds to its use in Isa. 11:2f., as one would expect, since the Qumrân text is dependent on the OT passage.

Pāḥēḏ occurs once for "reverence" (of the Torah) (1QS 4:2); elsewhere *pḥd* expresses its more basic meaning of dread, e.g., which a believer feels when he has erred and he knows God's judgment or chastisement is imminent (1QH 10:34). *Pḥd* is also coupled with *'ymh* several times; in 1QS 1:17 the members of the community must be faithful regardless of the terror or dread that the enemy (Belial) might cause them to feel (cf. also 10:15).

Several other roots express this dread. God is described as "terrible" (*nôrā'*, 1QM 10:1; 12:7). Twice several terms are conjoined in exhortations not to fear (1QM 10:3f.; *yr'*, *yrk*, *ḥpz*, *'rṣ*; 15:8: *yr'*, *ḥtt*, *'rṣ*); elsewhere only one term occurs (*yr'* in 1QM 17:4; *ḥtt* in 1QH 2:35; 7:8).

Both Romaniuk and DeVries assert ties between the DSS and the Bible (OT and NT). Romaniuk links closely the Qumrân concept of the fear of God (which he claims is very primitive compared to that of the NT) with that of the OT. But DeVries calls it "a deterioration and a distortion" (p. 237) that reflects only later, more legalistic OT developments (except for 1QH 4:29-37, which "while coming short of expressing the fulness of New Testament salvation, surely stands upon its very threshold" [p. 236]; note the use in v. 33 of *r'd*, "trembling," and *rtt*, "shivering," to describe the believer's reaction to his sin). DeVries prefers to see the NT as directly related to the earlier and purer classical Yahwism.

IV. NT.–A. Terms. Though the relation between God

and fear is far less frequently treated in the NT than in the OT, it is by no means ignored and is quite similar to the OT conceptualizations. Fewer terms are involved, the dominating ones being *phobéō* and its cognate noun *phóbos*; these generally denote terror (cf. Eng. phobia).

B. Meaning. 1. Religion. In the Magnificat, which is composed of various OT phrases, Mary states, "His mercy is on those who fear him" (Lk. 1:50; cf. Ps. 103:13, 17). Acts 9:31 states that the church was built up and multiplied by "walking in the fear of the Lord and in the comfort of the Holy Spirit." In Col. 3:22f. Paul links fearing the Lord with obeying and serving one's earthly master; one should serve him "as serving the Lord." Peter commands: "Love the brotherhood. Fear God" (1 Pet. 2:17; cf. Lk. 18:2, 4 for a contrasting divine-human correlation). In Rev. 11:18 prophets, saints, and those who fear God are rewarded. In 14:6f. an angel proclaims the "eternal gospel": "Fear God and give him glory . . . and worship him" (cf. 15:4). In 19:5 God's servants are identified with those who fear him.

Another expression connoting this idea is "the ones who fear God," i.e., the God-fearers. These were the gentile adherents to the synagogue. Their status is most clearly seen in Acts 13:16, where Paul addresses the synagogue: "Men of Israel, and you that fear God" (cf. also v. 26). Thus Cornelius was "a devout man who feared God" (Acts 10:2; cf. v. 22), and Peter, when addressing Cornelius and his guests, states, "Anyone who fears him [God] and does what is right is acceptable to him" (10:35).

2. Reverence. Jesus' deeds often inspired awe or reverence (e.g., Mt. 17:6; Lk. 5:26). Paul warned the Roman Christians not to be proud but to stand in awe (Rom. 11:20). Reverence for Christ should cause believers to be subject to one another (Eph. 5:21). He. 5:7 states that Jesus' prayers were answered because of His "godly fear" (*eulábeia*). In 12:28 the author exhorts his readers to "offer to God acceptable worship, with reverence [*eulábeia*] and awe [*déos*]" (but note the element of terror that immediately follows — "for our God is a consuming fire").

Peter exhorts his readers not to fear their persecutors, but to reverence (*hagiázō*) Christ as Lord and defend the faith with "gentleness and reverence" (1 Pet. 3:14-16). He also encourages wives with non-Christian husbands to win them over by "reverent and chaste behavior" (3:2; cf. Tit. 2:3, where Paul instructs Titus to ask the older woman to "be reverent [*hieroprepḗs*] in behavior").

3. Terror. Like the OT, the NT mentions that people stand in dread of God's actions toward them. At times this dread is produced unintentionally by God (e.g., Mt. 17:7; 28:10; Lk. 5:10), though often He causes it intentionally as a sign of His judgment on sin (e.g., Lk. 12:5; Acts 5:5, 11; 1 Tim. 5:20). Perhaps the most famous statement relating terror and God is He. 10:31: "It is a fearful thing to fall into the hands of the living God." Here the context is clearly one of judgment (cf. vv. 27, 30).

But God encourages His followers not to fear their enemies, for He will deliver them either in this world or in the world to come. Thus in Mt. 10:26 Jesus exhorts His listeners to "have no fear" of those who might persecute them, for the persecutors can kill only the body and not the soul (v. 28; cf. v. 31). God used a vision to encourage Paul not to be afraid to speak the gospel, for He was with him (Acts 18:9f.). God later used an angel to reassure Paul that he would not die, even though the situation looked hopeless (27:24). No doubt these experiences enabled Paul to exhort the Philippians not to be frightened (Gk. *ptýrō*) by their opponents, for God would judge the opponents but save the believers (Phil. 1:28).

The idea that believers need not fear receives its most radical expression in 1 John. This Epistle, with its great emphasis on love and its fatherly tone, reassures its readers that on the day of judgment they need not fear, because fear has to do with punishment, and God's perfect love for them has removed that threat (4:17f.; cf. I. H. Marshall, *Epistles of John* [*NICNT*, 1978], pp. 222-25).

The expression "fear and trembling" (Gk. *phóbos kaí trómos*) may also be considered here. It occurs four times (1 Cor. 2:3; 2 Cor. 7:15; Eph. 6:5; Phil. 2:12). In 1 Cor. 2:3 it may denote only timidity (cf. "weakness"), but the context does allow a more religious connotation (cf. vv. 2, 4), i.e., that Paul did not live and preach by human ability or power but by his faith. Respect may be the meaning in 2 Cor. 7:15 — the Corinthians received Timothy with respect and obeyed him. But "fear and trembling" here may also be understood in reference to God; Timothy was impressed by their obedience and piety, which enabled them to receive him so graciously. In Eph. 6:5 obedience is again linked to "fear and trembling," here in regard to the slave-master relationship. While it is possible to see this as a reference to fearing punishment from the master, it may also be seen as a reference to piety. The service that slaves render to their masters should be done "as to Christ"; they should consider themselves "slaves of Christ" (RSV mg., v. 6) who do "the will of God from the heart." The enigmatic Phil. 2:12f. also links obedience with "fear and trembling." By itself v. 12 could be understood as an exhortation for the believers to live carefully, doing what is right in order to avoid judgment. But when it is taken with v. 13, such an interpretation seems unlikely. Instead, Paul seems to be exhorting his readers to continue to obey him, even though he is absent, and to continue to manifest the saving work of Christ in their lives, even though Paul is not there to help them — God is still with them, and He is the one who does the work.

V. Conclusion.–God and fear were thus integrally related throughout biblical times. In its more positive sense "the fear of God" could be the essence of biblical religion, or at least one aspect of it, reverence. God instilled this fear in people, who at the same time were both attracted and terrified by His awesomeness (Otto's *mysterium fascinans* and *tremendum*). Only those who had faith could perceive both elements. The unfaithful could only tremble at the coming judgment.

FEAR AND TREMBLE. *See* FEAR II.B.3; IV.B.3.

FEASTS [Heb. *mô'ēḏ*–'an appointed matter,' either a place, as the tabernacle (Ex. 30:30), or a time, as the Hebrew feasts (= Heb. *miqrā'*–'what is called,' a convocation, Lev. 23:2), *ḥag*–'dancing, procession,' a pilgrimage feast; Gk. *heortḗ*–'feast'].

I. Nature of the Hebrew Feasts.–The sacred seasons of Israel stem directly from divine revelation and were de-

signed to illustrate significant aspects of the eternal redemption that God had already ordained for His own under the OT. The Hebrew calendar of convocations is therefore not to be explained on the basis of natural phenomena, such as the phases of the moon or the Palestinian agricultural cycle, as proposed by liberal theology (cf. Eichrodt, I, 120-23). Neither may it be attributed to pre-Mosaic custom, whether Canaanite or nomadic (cf. Pfeiffer, p. 40). Israel's feasts served rather as divinely revealed expressions of the moral obligations of His people, as memorials of God's saving acts in the past, as sacraments of His sanctifying power in the present, and as types of His anticipated victory over sin in the forthcoming first and second advents of Jesus Christ. Parallels to the sacred calendars of the surrounding pagans may then be accounted for by a divine grace that was willing to grant to Israel certain forms that were already more or less familiar. For their secondary but still real purpose was that of expressing Israel's gratitude for God's providential sustaining of life in general throughout the year.

The sacred feasts of Israel were communal in nature, whether of the kind claimed by Moses for observance in the desert prior to the Exodus (Ex. 5:1), or those celebrated when the Israelites were in sedentary occupation of the land (Dt. 16:14; 1 S. 1:3). Even the way in which the Israelites worshiped the golden calf in the wilderness was described as a "feast" (Ex. 32:5-19) because of the religious associations involved, pagan though they were.

Feasts appear to have been times of rejoicing and excitement, with ceremonial dancing (Jgs. 21:21), songs (Isa. 30:29) and noisy processions going on their way to the temple (Ps. 42:4 [MT 5]). Where Canaanite traditions were in evidence on such occasions, drunkenness and other undesirable forms of behavior would be inevitable accompaniments to festal celebrations (cf. 1 S. 1:13f.; Am. 2:8).

In addition to communal feasts there were also times of private rejoicing in which a small social unit such as a family would be involved. These occasions included weddings (Gen. 29:22), weaning feasts, when a child began to eat solid food (Gen. 21:8), the visit of a guest (Gen. 19:13), or the celebration of someone's birthday (Gen. 40:20). Families recognized the beginning of the sheepshearing activities by holding a feast and sending a token offering of wool to the Lord's house (Dt. 18:4; 1 S. 25:4-11; etc.). The children of Job apparently entertained each other regularly in turn on a purely social basis (Job 1:4f.), and this fact indicates that it was not necessary for a specific occasion to arise for a feast to be enjoyed. Life in the ancient Near East was arduous for the great majority of people, and a feast was a welcome diversion from the rigors of workaday living.

II. Mosaic Festivals.–A. The Sabbath and Its Extensions. In addition to daily sacrifices, morning and evening (Ex. 29:38-42), God revealed through Moses a set of seasonal *môʿᵃḏîm*, "set feasts" (Lev. 23:2, RV; see esp. Ex. 23:10-17; Lev. 23 and 25; Nu. 28–29; Dt. 16). First in importance stood the weekly sabbath (Lev. 23:3), which originated in God's rest on the seventh day of creation and is reflected in certain Babylonian parallels, but which was reinstituted among the Hebrews by Moses (Neh. 9:14), though prior to Sinai (Ex. 16:23-26). Of similar character were the seven "convocation" sabbaths at the five annual feasts, Passover and Tabernacles having two each (Lev. 23:7f., 35f.); note the title of the last, *ʿᵃṣereṯ*, "restraint [of work]" (v. 36; cf. Jn. 7:37). A day of rest observed monthly was the New Moon (Nu. 10:10; 28:11-15). By analogy to the sabbath, moreover, every seventh year constituted a Sabbatical Year (Ex. 23:11; Lev. 25:1-7;

Pages from the Passover Haggadah (Moravia, A.D. 1732), which relates the Jewish ritual of the feast (Jewish Theological Seminary Library)

FEASTS

Title page of Ecclesiastes from a prayerbook (Italy, A.D. 1492). Ecclesiastes is traditionally read in the synagogue during the Feast of Sukkoth (Booths) (Jewish Theological Seminary Library)

Title page of the Ethics of the Fathers (a mishnaic tractate also called *Pirke Aboth*) from a prayerbook (Italy, A.D. 1452). Since the Ethics of the Fathers begins with the events at Mt. Sinai, it is customarily read during the seven weeks between Passover and Pentecost (Feast of Weeks). The latter feast celebrates the giving of the Torah (Jewish Theological Seminary Library)

Dt. 15:1); and every cycle of seven Sabbatical years terminated with a Jubilee Year (Lev. 25:8-18).

B. The Five Annual Feasts. The *mô'ᵃdîm* in a stricter sense consisted of Moses' five annual feasts (Lev. 23:4). The three *ḥaggîm*, or pilgrimage festivals, were so designated because on them the Israelites gathered at Jerusalem to give joyful thanks to their God (Dt. 16:16). They were of agricultural significance as well as commemorative of national events. Thus the Passover, followed by the seven days of unleavened bread, is connected with the barley harvest (Ex. 12:6; Lev. 23:5-8; Nu. 28:16-25; Dt. 16:1-8); Pentecost, the Feast of Weeks, celebrates the wheat harvest (Ex. 34:26; Lev. 23:10-14; Nu. 28:26-31); and Tabernacles (Booths) is at the same time the Feast of Ingathering, the general harvest festival (Ex. 23:16; Lev. 23:33-36; Dt. 16:13-15). The Passover was described specifically as a "feast" only in Ex. 34:25, although its association with the observance of the Feast of Unleavened Bread left no doubt as to its festival character (*see* PASSOVER). The one-day Feast of Pentecost was celebrated on the fiftieth day after the Passover sabbath (Ex. 23:16; 34:22; Lev. 23:15-21; Nu. 28:26-31; Dt. 16:9-12). The Feast of Tabernacles occurred five days following the Day of Atonement, and lasted for a week. It was a time of general rejoicing (Lev. 23:33-43) that assumed a special character in the time of Ezra (Neh. 8:13-18), and continued to be observed in the time of Jesus. (*See* BOOTHS, FEAST OF; *see also* PENTECOST; APPOINTED FEAST.)

Trumpets (Lev. 23:23-25; Nu. 29:1-6) and the Day of Atonement (Lev. 16; 23:26-32; Nu. 29:7-11) may have marked the turning of the year according to the older calendar (cf. Ex. 12:2; 23:16) but found their primary significance in the inner life of the nation and the individual. The latter celebration was Israel's supreme type of the atoning work of Christ (He. 2:14f.; 6:19; 7:27; 9:24; 13:12) for those who would turn to God in sincere repentance, "afflicting their souls" (Lev. 16:29-31, AV) through prayer, sackcloth, fasting, etc. (Fasting, however, is never specifically legislated in Scripture, though this phrase came later to be so understood; cf. Ps. 35:15; Isa. 58:3-6; *see* FAST.) On each of the feasts special sacrifices prescribed for the occasion were offered (Nu. 28–29); trumpets were blown while the burnt offerings and peace offerings were being presented (10:10).

III. Exilic Fasts and Feasting.–A. Zechariah. In the exilic situation important historical events were made the basis for new observances. When the first temple was destroyed and the people were carried into captivity, "the sacrifice of the body and one's own fat and blood" came to be substituted for animal sacrifices (T.B. *Berakoth* 17a). Four new fasts were introduced: that of the fourth month commemorated the Babylonian breach of Jerusalem's walls (Zec. 8:19; Mish. *Taanith* iv.6), the fifth month recalled the burning of the temple (Zec. 7:3, 5; 8:19), the seventh marked the murder of Gedaliah the governor (Zec. 7:5; 8:19; *Seder Olam Rabbah* 26), and the tenth observed the beginning of the Babylonian siege (Zec. 8:19).

B. Esther. The only new observance that is known to have been enjoined by divine inspiration is the Feast of

FEASTS

PURIM (Est. 3:7; 9:24-32; 2 Macc. 15:36). Out of the total list of Israel's God-given festivals, some are noted in the NT as still celebrated by early Jewish Christians (cf. Acts 20:16); but the sabbath and the Passover have now become, respectively, the Lord's Day and the Lord's Supper, and have been explicitly continued with moral, sacramental, and typological force (He. 4:9; Acts 20:7; Mt. 26:26-28). Otherwise, however, the Hebrew feasts, including the seventh day of the week for the observance of sabbath, have been fulfilled in Christ and have been abrogated for Christians as far as their present observance is concerned (Gal. 4:10f.; Col. 2:16f.). But while the precise forms and times no longer possess relevance, the moral principles that lay behind the feasts — of gratitude toward God, of care for the poor, of submission to His providence, and of joy in His service — retain permanent validity (cf. Payne, Appendix E).

IV. Intertestamental Observances.–*A. Added Days.* During intertestamental times, Judaism incorporated two additional services, the Feast of Dedication, or "Lights" (1 Macc. 4:52-59; Jn. 10:22; Mish. *Taanith* ii.10; *Moed Katan* iii.9; Josephus *Ant.* xii.7; *CAp* ii.39) and the Fast of Esther (Est. 4:16f.; 9:31), which have been preserved by Jewish tradition to this day. Other fasts and feasts no doubt were instituted on similar occasions and received a local temporary observance, e.g., the Feast of Acra (1 Macc. 13:50-52; cf. 1:33) to celebrate the recapture of Acra ("the citadel") on 23 Iyar, 141 B.C., and the Feast of Nicanor in celebration of the victory over Nicanor on 13 Adar, 160 B.C. (1 Macc. 7:49).

Several other festivals are mentioned in the Talmud and other postbiblical writings that may have been of even greater antiquity. The Feast of Woodcarrying (Midsummer Day; Neh. 10:34; Josephus *BJ* ii.7.6; Mish. *Taanith*

Title page of the book of Esther (Cologne, A.D. 1843). Esther is traditionally read at the Feast of Purim (Jewish Theological Seminary Library)

The order of the lighting of the Hanukkah candles, from a prayer-book (Pforzheim, A.D. 1723) (Jewish Theological Seminary Library)

iv.8a), for example, is referred to as the greatest day of rejoicing of the Hebrews, ranking with Atonement Day. It was principally a picnic day to which a religious touch was given by making it the woodgatherers' festival for the temple. A New Year for trees is mentioned in the Mishnah (*Rosh ha-Shanah* i.1). The pious, according both to the Jewish tradition and the NT, observed many private or semipublic fasts, such as Mondays, Thursdays, and the Mondays after Nisan and Tishri (the festival months: Lk. 18:12; Mt. 9:14; 6:16; Mk. 2:18; Lk. 5:33; Acts 10:30; T.B. *Megillah* 31a; *Taanith* 12a; T.P. *Baba Kamma* viii.2). The day before Passover was a fast day for the firstborn (*Sopherim* xxi.3).

B. Added Meanings. In several instances the rabbis proceeded to connect the dates of the feasts and fasts with national events, other than those for which the days were primarily instituted. Pentecost was called *zman mattan tôrâ*, the "date of the giving of the law", and this religious side has so completely overshadowed the agricultural that among modern Jews Pentecost has become "confirmation day." On the day of the fast of the fourth month it was held that the Israelites made the golden calf and Moses broke the tables of the law. On that of the fifth month, not simply was the first temple destroyed by Nebuchadrezzar, but also the second temple by Titus. In addition it is said that on this day Yahweh decreed that those who left Egypt should not enter the land of promise, and the day is also the anniversary of the capture of the city of Bether by the emperor Hadrian.

V. NT Feasts.–In NT times the sabbath was observed regularly, as was the Feast of the Passover and Unleavened Bread (Mt. 26:17; Mk. 14:1; Lk. 22:1; Jn. 7:2). After Jesus entered on His public ministry He may have participated in as many as four Passover celebrations (Jn. 4:45; 5:1; 6:4; 12:1). According to the custom of the day, Christ ate the Passover privately with His disciples. After the meal He initiated the Lord's Supper, a communion in which He gave sacramental significance to the bread and wine by associating them symbolically with His death on Calvary. This event also occurred during the Passover season (Jn. 13:1), and it may be that Christ was actually dying on the cross as the Passover lamb was being slain. Paul regarded Christ as the Passover lamb (1 Cor. 5:7) whose atoning death brought redemption and salvation to mankind (*see* PASSOVER).

The Feast of Tabernacles continued with unabated popularity in Christ's time, and the esteem in which it was held was noted also by Josephus *Ant.* viii.4.1). The feast acquired ceremonial accretions in the postexilic period, one of which involved a procession to the pool of Siloam and the drawing of a libation of water. Since Jesus attended this feast (Jn. 7:2-14) it is possible that His teaching about living water (vv. 37-39) was prompted by this particular ceremony.

The Feast of Dedication, mentioned only in the NT in Jn. 10:22, was otherwise known as the Feast of Hanukkah, described by Josephus as the Festival of Lights (*BJ* xii.7.7). It was a winter feast that lasted eight days, and commemorated Judas Maccabeus' discovery in 167 B.C. of a small container of oil that lasted surprisingly for eight days (cf. 1 Macc. 4:53-59; 2 Macc. 10:3; *Ant.* xii.7.6). In NT times it was observed, like Tabernacles, by means of feasting, singing, and processions with palms and tree branches. The Feast of Pentecost was the occasion when the Holy Spirit was poured out upon the disciples as they were assembled in Jerusalem (Acts 2:1-4).

Other feasts celebrated in NT times included the *agápē* or "love feast," when Christians met in fellowship and provided for the needs of the poor. It is not always easy to distinguish between the *agápē* and the Lord's Supper in the records of primitive Christian worship (cf. Acts 2:42, 46; 6:1f.; 1 Cor. 11:20-34). These occasions were open to certain abuses (cf. Jude 12), which probably included inebriation and false teaching. Paul permitted the Corinthian Christians to attend feasts held by unbelievers, but instructed them to ask no questions about the food for conscience's sake (1 Cor. 10:27). Christ sometimes accepted invitations to feasts (Lk. 5:29; Jn. 2:8), and occasionally used the imagery of a banquet or festival in His teaching (Mt. 22:2-14; Lk. 14:16-24, etc.).

In postbiblical times the Jews outside of Palestine doubled each of the following days: the opening and closing day of Passover, Tabernacles, and Pentecost, because of the *ṣāpēq*, or doubt as to the proper day to be observed, growing out of the delays in the transmission of the official decree of the Sanhedrin in each season. Differences in hours of sunrise and sunset between Palestine and other countries may have had something to do at least with the perpetuation of the custom. New Year's Day seems to have been doubled from time immemorial, the forty-eight hours counting as one "long day."

Many new modes of observance appear in postexilic times in connection with the old established festivals, especially in the high festival season of Tishri. Thus the *ṣimḥaṯ bēṯ haššō'ēḇâ*, "water-drawing festival," was celebrated during the week of Tabernacles with popular games and dances in which even the elders took part, and the streets were so brilliantly illuminated with torches that scarcely an eye was closed in Jerusalem during that week (T. B. *Hullin*).

The last day of Tabernacles was known in talmudic times as *Yom Hibbot Araboth* from the custom of beating willow branches, a custom clearly antedating the various symbolical explanations offered for it. Its festivities were connected with the dismantling of the booth. In later times the day was known as *Hoshanah Rabbah* from the liturgical passages beginning with the word *hōša'nā'*, recited throughout the feast and "gathered" on that day. The day after Tabernacles has been made *Simḥath Torah*, the Feast of the Law, from the custom of ending on that day the cycle of fifty-two weekly portions read in the synagogues.

In general it may be said that although the actual observance has changed from time to time to meet new conditions, the synagogal calendar of today is made up of the same festivals as those observed in NT times.

E. D. ISAACS J. B. PAYNE

FEATHERS [Heb. *nōṣâ*] (Lev. 1:16); NEB "contents." This term occurs only twice in the RSV: Lev. 1:16, relating to the sacrifice of a turtledove or pigeon; Dnl. 4:33 (MT 30), where the MT actually has no word for "feathers" but the concept of plumage is obviously necessary in order to preserve the figure of a bird.

FEEBLE KNEES. The expression occurs twice in the RSV: Job 4:4, "you have made firm the feeble knees" (Heb. *birkayim kōr'ôṯ*, lit. "bending knees"); Isa. 35:3, "make firm the feeble knees" (*birkayim kōšelôṯ*, lit. "tottering knees"). Weakness of the knees could be the re-

sult of fear, fasting, old age, or disease. It is used as a figure for general weakness or fear (cf. Ps. 109:24; Ezk. 7:17; 21:7; Dnl. 5:6; Nah. 2:10; He. 12:12).

FEEBLE-MINDED. Only in 1 Thess. 5:14, AV, for Gk. *oligópsychos,* in the obsolete sense of "fainthearted," as it is translated in the RSV. In the LXX this term is used as the equivalent of Heb. *kôšēl,* the tottering or feeble-kneed in Isa. 35:3; 54:6; Gk. *oligopsychía* occurs in the LXX twice (Ex. 6:9; Ps. 54:7 [MT 9]) for "anguish of spirit" and "trouble." The term refers to weakness of will and vacillation of purpose rather than to idiocy or morbid imbecility.

FEED. The term most often rendered "feed" by the RSV is Heb. *rā'â.* This verb usually occurs with reference to the feeding of animals, either transitively (e.g., Gen. 30:31,36; 1 S. 17:15; Isa. 61:5) or intransitively (e.g., Gen. 41:2, 18; Ex. 34:3; Isa. 5:17; 11:7; Jonah 3:7). It frequently appears in figurative passages using the shepherding motif (see below). In Job 24:21 the AV ("evil entreateth") and NEB ("may have wronged") follow the Targum and LXX, reading Heb. *hēra'* in place of MT *rō'eh* (RSV "feed on"). When speaking of human beings, the OT frequently uses *'ākal,* meaning "eat" in the qal (cf. "feed on," Hos. 4:8), "give to eat" or "feed" in the hiphil (Ex. 16:32; Dt. 8:3, 16; 1 K. 22:27; Ps. 80:5 [MT 6]; 81:16 [MT 17]; Isa. 58:14; Jer. 9:15; 23:15; etc.). The pilpel of *kûl* means "sustain, support, nourish" (BDB, p. 465). Yahweh sustained Elijah through the help of ravens and a widow (1 K. 17:4, 9); Obadiah kept a hundred prophets alive in a cave with bread and water (18:4, 13). Heb. *śāḇa',* "be sated" ("satisfy" in the hiphil), is rendered "fed to the full" in Hos. 13:6 (qal) and Jer. 5:7 (hiphil). In Ex. 22:5 (MT 4) the NEB renders the piel of *bā'ar* by its most common meaning, "burn" (but cf. mg.). The RSV and AV correctly interpret the verb to mean "graze" or "feed on"; cf. the cognate noun *bᵉ'îr,* "beast," used in the same verse (see *TDOT,* II, *s.v.* "bā'ar" [Ringgren]).

In the NT, Gk. *bóskō* is used either actively or passively of the feeding of animals (Mt. 8:30; Mk. 5:11; Lk. 8:32; 15:15; Jn. 21:15, 17). *Poimaínō,* likewise, means "tend" or "feed" a flock (Acts 20:28). *Chortázō* can be used of either human beings or animals and means "fill" or "satisfy" (Mt. 15:33; Mk. 7:27; 8:4; Lk. 16:21). In Lk. 15:16 the RSV renders "fed on" for Gk. *chortasthênai ek*; the AV and NEB follow a different textual tradition, reading *gemísai tḗn koilían autoú apó* ("filled his belly with"). *Tréphō* (Mt. 6:26; 25:37; Lk. 12:24) means "nourish," "provide with food." *Psōmízō* ("feed," Rom. 12:20) and *potízō* (lit. "give to drink," 1 Cor. 3:2) are each rendered "feed" once by the RSV.

The Bible emphasizes that it is God who supplies food for all His creatures (see Gen. 1:29f.; Ps. 104:14f., 27f.; 136:25; 145:15f.; etc.; cf. Mt. 6:26 par. Lk. 12:24). Yahweh, the covenant God, fed the Israelites in the wilderness with manna to teach them His providential care and their dependence on Him (Ex. 16; Dt. 8:3, 16; cf. Ps. 78:23-25). Jesus, the new Moses, satisfied the hunger of the multitudes (Mt. 14:15-21 par.; 15:32-38 par.) in order to teach them that He Himself was "the bread which came down from heaven," "the bread of life" (Jn. 6:30-59). *See also* BREAD V; MANNA.

Hebrew *rā'â* appears frequently in the prophetical literature in metaphorical passages depicting God's people as sheep and their ruler(s) as shepherd(s). Hosea warns that Yahweh cannot be expected to feed Israel, because Israel is a stubborn heifer rather than a docile lamb (Hos. 4:16). Isa. 40:11, however, prophesies of a day when God Himself "will feed his flock like a shepherd." Micah calls upon Yahweh to shepherd His people in fertile pasture lands (Mic. 7:14), and he looks forward to a time when God will feed His flock through a messianic shepherd (5:4). Jeremiah, likewise, prophesies that Israel will one day be restored to its pasture (Jer. 50:19) and that Yahweh will give Israel faithful shepherds who will "feed you with knowledge and understanding" (3:15). In the most extended passage, Ezekiel condemns the shepherds of Israel for feeding themselves instead of the sheep (Ezk. 34:1-10); Yahweh Himself will rescue His sheep and "feed them with good pasture" (vv. 11-16); He will judge between the sheep to see that each gets its fair share of pasture (vv. 17-22); finally, He will establish over them a messianic shepherd of the line of David, through whom He will rule and feed them (vv. 23f.; cf. Mic. 5:4). The same shepherding metaphor is used in the NT with reference to the Church. Jesus refers to Himself as the "Good Shepherd"— the messianic shepherd promised to Israel (Jn. 10). As representatives of Christ, church leaders are responsible for feeding His sheep (Jn. 21:15-17; Acts 10:28). (See *TDNT,* VI, *s.v.* ποιμήν κτλ. [J. Jeremias]; *see also* SHEEP.)

See also EAT; FULL; SATISFY. N. J. O.

FEEL [Heb. *mûš, bîn, yāḏa', māṣā', bāṭaḥ, kā'ēḇ*; Gk. *psēlaphάō, zēlóō, phronéō, chaírō, peíthō*]; AV also "handle," "find," TRUST, "have pain" (Job 14:22), "think," "persuaded" (He. 6:9), etc.; NEB also "What of it?" (Prov. 23:35), "untroubled" (Am. 6:1), "become black" (Job 14:22), etc.

The RSV translation of Ps. 58:9 [MT 10], "Sooner than your pots can feel the heat of thorns" (Heb. *bᵉṭerem yāḇînû sîrōṯêḵem 'āṭāḏ,* lit. "before your pots understand the thorny bush"), is unintelligible. The NEB emendation, "All unawares [=before they understand], may they be rooted up like [Heb. *yikkārᵉṭû kᵉmô* instead of *sîrōṯêḵem*] a thornbush," is to the point (cf. *IB,* IV, 305 and *Tyndale OT Comms., in loc.*). The wicked will be trodden down (v. 7), dissolved (v. 8), and finally rooted up (v. 9). The RSV rendering of Heb. *yimṣā'û* (lit. "they may find," Jer. 10:18) as "they may feel it" makes little sense. The AV translation "they may find it so" is better but still is unclear. J. Bright's emendation *(Jeremiah [AB,* 1965], p. 70), "they may be squeezed dry" (Heb. *yimmāṣû*; cf. NEB), makes this phrase parallel to the preceding one, "I will press hard upon them." God will (figuratively) uproot the inhabitants and increase their afflictions.

The RSV eliminates the Greek pleonasms in 2 Cor. 11:2 (Gk. *zēlṓ . . . theoú zḗlō,* "I am jealous with a divine jealousy"; cf. AV, NEB), "I feel a divine jealousy," and in 1 Thess. 3:9 (Gk. *pásē tḗ charᾷ hḗ chaíromen,* "with every joy in which we rejoice"; cf. the AV) "for all the joy which we feel."

"Feel" may mean: (1) external, physical contact with someone or something, "touch or be touched" (Heb. *mûš*). Jacob is touched by his father Isaac (Gen. 27:12, 21), Samson takes hold of the pillars supporting the Philistine temple (Jgs. 16:26), and the hands of an idol are lifeless and cannot feel anything (Ps. 115:7).

(2) The word may refer to internal, subjective experiences, such as "feel secure" (Am. 6:1), "feel about others" (Phil. 1:7, Gk. *phronéō,* "think or feel in a certain way," Bauer, rev., p. 866), "feel sure of" (He. 6:9, Gk. *peithō,* "be convinced of," Bauer, rev. p. 640; cf. NEB). The phrase "feel after" in Acts 17:27 (Gk. *psēlaphάō,* "grope after," Bauer, rev., p. 892; NEB "touch") refers to a spiritual search for the Creator.

In two passages the distinction between physical contact and inward experience disappears. In Prov. 23:35 the

intoxicated person does not "feel" (Heb. *yāḏaʿ*, "know") the blows he received nor remember what happened to him. Job 14:22 mentions a person "feeling pain" (Heb. *kāʾēḇ*, "be in pain").

R. W. V.

FEES [Heb. *qᵉsāmîm*–'divinations'] (Nu. 22:7); AV "rewards (of divination)." The context (Nu. 22:18) indicates that the emissaries from Balak brought fees to entice Balaam to curse Israel.

FEIGN [Heb. *hālal*] (1 S. 21:13 [MT 14]); NEB "act like." This term occurs only once in the RSV, where Heb. *hālal* is used reflexively to describe how David "played the part" of a madman.

FELIX fē'liks **ANTONIUS** an-tō'ni-əs [Gk. *Phēlix* < Lat. *felix*–'happy']. A Roman procurator of Judea, appointed by the emperor Claudius to succeed Cumanus.

The event that led to the introduction of Felix into the narrative of Acts was the riot at Jerusalem (Acts 21:27). There Paul, being attacked at the instigation of the Asian Jews for alleged false teaching and profanation of the temple, was rescued with difficulty by Lysias the chief captain. But Lysias, finding that Paul was a Roman citizen, and that therefore the secret plots against the life of his captive might entail serious consequences for himself, and finding also that Paul was charged on religious rather than on political grounds, sent him on to Felix at Caesarea for trial (Acts 21:31–23:34). On his arrival, Paul was presented to Felix and was then detained for five days in the judgment hall of Herod, till his accusers could also reach Caesarea (23:33-35).

The trial was begun, but after hearing the evidence of TERTULLUS and the speech of Paul in his own defense, Felix deferred judgment (24:1-22). The excuse he gave for delay was the continued absence of Lysias, but his real reason was to obtain bribes for the release of Paul. He therefore treated his prisoner at first with leniency and pretended along with DRUSILLA to take interest in his teaching. But these attempts to induce Paul to purchase his freedom failed ignominiously; Paul sought favor of neither Felix nor Drusilla and made the frequent interviews that he had with them an opportunity for preaching to them concerning righteousness, temperance, and the final judgment. The case dragged on for two years till Felix, upon his retirement, "desiring to do the Jews a favor . . . left Paul in prison" (24:27). (According to some MSS, the continued imprisonment of Paul was due to the desire of Felix to please Drusilla.)

Felix was the brother of Pallas, the infamous favorite of Claudius who, according to Tacitus (*Ann.* xiii.14), fell into disgrace in A.D. 55. Tacitus implies that Felix was joint procurator of Judea along with Cumanus before being appointed to the sole command, but Josephus is silent about this. Both Tacitus and Josephus refer to his succeeding Cumanus, Josephus stating that it was at the instigation of Jonathan the high priest. There is some doubt about the chronology of Felix's tenure of office. Harnack and Blass, following Eusebius and Jerome, place his accession in A.D. 51, and the imprisonment of Paul in 54–56; but most modern commentators incline to the dates 52 for his accession and *ca.* 58-60 for Paul's trial. Felix was succeeded, after Nero recalled him, by FESTUS. (*See also* CHRONOLOGY OF THE NT II.G.)

The testimony of Acts concerning the evil character of Felix is fully corroborated by the writings of Josephus (*BJ* ii.13.2-4 [252-261]; *Ant.* xx.8.5 [160-66]; cf. Tacitus *Ann.* xii.54). Although he suppressed the robbers and murderers who infested Judea, among them the "Egyptian" to whom Lysias refers (Acts 21:38), yet "he himself was more hurtful than them all." When occasion offered, he did not hesitate to employ the Sicarii (*see* ASSASSINS) for his own ends, including the murder of the high priest Jonathan (Josephus *Ant.* xx.8.5). Trading upon the influence of his brother at court, his cruelty and rapacity knew no bounds; during his rule revolts became continuous, marking a distinct stage in that seditious movement which culminated in the outbreak of A.D. 66-70 (cf. *HJP*, II/2, 174-182). His leaving Paul in bonds was but a final instance of one who sacrificed duty and justice for the sake of his own unscrupulous selfishness. C. M. KERR

FELLOES (1 K. 7:33, AV). Archaic term used by the AV. *See* WHEEL.

FELLOW [Heb. *rēʿ(a)*–'companion' (Ex. 2:13; Jgs. 7:22; 1 S. 14:20; Isa. 34:14; Zec. 8:10; 14:13), *ʾîš*–'man, person' (1 S. 25:25; 29:4; 30:22; 2 S. 20:1; 1 K. 20:35; 2 K. 9:11; Isa. 3:5), *ʾāḥ*–'brother' (Dt. 18:7; 20:8; Ezr. 3:2; 6:20; Jer. 34:14; Ezk. 11:15; Hag. 2:22), *ʾĕnôš* (Dt. 13:13; Jgs. 9:4; 11:3; 18:25; 1 K. 21:13), *ʾeḥāḏ*–'one' (Gen. 19:9), *ḥāḇēr*–'companion' (Ps. 45:7 [MT 8]; Eccl. 4:10; Isa. 44:11), *bēn*–'son' (Jgs. 19:22; 20:13; 1 S. 10:27; 1 K. 21:10), *zeh*–'this' (1 S. 21:15; 25:21; 1 K. 22:27; 2 K. 9:11; 2 Ch. 18:26); Aram. *ḥaḇrâ* (Dnl. 7:20); Gk. *anḗr*–'man' (Acts 17:5; 24:5), *ánthrōpos*–'human being' (Jas. 2:20), *plēsíon*–'neighbor' (He. 8:11), *hoútos*–'this' (Mt. 26:61), *toioútos*–'of such a kind' (Acts 22:22), *syn*-(see below)]; AV also NEIGHBOR, BROTHER, MAN, ANOTHER, PERSON, SON, etc.; Gk. also NEIGHBOR, ANOTHER, MAN, COMPANION, COMRADE, BROTHER, etc.

Colloquially "fellow" can refer to any man (1 S. 29:4; 2 S. 16:7; Jas. 2:20); used as a noun, however, it usually denotes a "companion," "comrade," or "associate" (Eccl. 4:10; Hag. 2:22; Zec. 13:13). In the NT the term is usually used as an adjective to denote "accompaniment" and "association," the usual prefix *syn-* (meaning "with") forming the first part of the word. There are a variety of such words, each indicating different relationships.

Greek *sýndoulos* ("fellow servant") refers to the relationship between the oriental court official and his ruler (Mt. 18:28-34). It is used literally in Mt. 24:49, and it shows a relationship with the heavenly Lord when Paul designates certain Christians as his "fellow servants" in Col. 1:7; 4:7. In Revelation (6:11) the term means "fellow Christian" and is used by the angel himself in relation to the writer and his brothers (19:10; 22:9).

Thomas speaks to his *symmathētḗs* ("fellow disciples") in Jn. 11:16, and the term *synkleronómos* ("fellow heir") in Eph. 3:6 shows that both Gentiles and Jews inherit the promise in Jesus Christ. When a Gentile accepts the faith he becomes *sympolítēs* ("fellow citizen") with the saints as a citizen of God's kingdom (Eph. 2:19; cf. Rom. 8:17).

One who helped Paul spread the gospel is called his *synergós* ("fellow worker," e.g., Rom. 16:3, 9, 21; 1 Cor. 3:9) or *synstratiṓtēs* ("fellow soldier" or "fellow campaigner," Phil. 2:25; Philem. 2). Anyone who is a prisoner for the sake of the gospel is Paul's *synaichmálōtos* ("fellow prisoner," Rom. 16:7; Col. 4:10; Philem. 23).

In 1 Pet. 5:1 the plural of the term *sympresbýteros* ("fellow elder") may include "all who have any kind of authorized pastoral office and function" in the Church (Selwyn, p. 227).

FELLOWSHIP. *See* COMMUNION.

FEMALE [Heb. *nᵉqēḇâ*; Gk. *thēlys*]. The counterpart of the male of a species, either human or animal. In Gen. 7:2 Heb. *ʾiššâ* is translated "female" by the AV but "mate" by the RSV. Heb. *nᵉqēḇâ* is a cognate of the verb *nāqaḇ*, meaning "pierce" (cf. BDB, p. 666). Gk. *thēlys*, literally "the one nursing" or "the one giving suck," is a cognate of the verb *thēlázō*, "suckle."

In the OT "female" is used of both man and animal; in the NT it refers solely to the human species. In both the OT and NT it has an original biological meaning, but while the Hebrew seems to refer to the female primarily as the sexual partner of the male, in the Greek the emphasis falls on her function as mother.

In the OT "female" occurs particularly in the accounts of Creation (Gen. 1:27; 5:2) and the Flood (6:19; 7:3, 9, 16), and in the passages describing the laws by which Israel was to live (Ex. 21:20, etc.; Lev. 3:1, 6; 4:28, 32; etc.). In the NT the term appears only three times: in Mt. 19:4 par. Mk. 10:6, in Jesus' discourse about marriage and divorce; and in Gal. 3:28, where Paul states that in Christ "there is neither male nor female."

It is striking that most of the references to "female" occur in the linguistic pair "male and female." The contexts of the NT references to "female" and of the Creation account cited by Jesus reinforce the impression given by the use of "female" with "male," namely, that the two are seen in Scripture as belonging together in a unity. This is stated clearly in the Gen. 1 account of the creation of man: "So God created man in his own image . . .; male and female he created them" (v. 27). Jesus explicitly forbade the parting asunder of the union of male and female in marriage (Mt. 19:4).

In Gal. 3:28 Paul declared that in Christ the old separations between male and female no longer hold, for all are one in Christ. The context clearly indicates that Paul was referring to the Law, which contained many provisions separating Jews and Gentiles, slave and free, male and female, both in social life and in liturgical practices. The Galatians were in danger of becoming enslaved again to such laws, after having been given new freedom in Christ. Paul's stern warning showed that "in Christ" the barriers people have created on the basis of class, race, and sex must give way to a unity that transcends these historic divisions. This reinforces the insight of the creation story, which sees male and female as two aspects of humanity. Thus, all that Gen. 1:26-28 says about the image of God and the responsibility for ruling and tending the creation applies equally to male and female.

Stewart, *Rabbinic Theology* (1961), pp. 145-48, 155; G. H. Tavard, *Woman in Christian Tradition* (1973); *TDNT*, I, *s.v.* γυνή (Oepke). M. V. RIENSTRA

FENCE [Heb. *gāḏēr*, *gᵉḏērâ*] (Ps. 62:3 [MT 4]; Nah. 3:17); AV also HEDGE; NEB WALL. The term occurs twice in the RSV to describe some kind of boundary or enclosure.

FENCED CITIES (AV Nu. 32:17, 36; Dt. 3:5; 9:1; 2 Ch. 8:5; 11:23; etc.). The AV uses "fenced" in the obsolete sense of "fortified" (cf. RSV "fortified cities"). *See* FORTIFICATION.

FERRET (Lev. 11:30, AV). A domesticated breed of polecat. "Ferret" is an incorrect translation of Heb. *ʾᵃnāqâ*. *See* LIZARD.

FERRY BOAT (2 S. 19:18, AV). *See* FORD.

FERTILITY CULTS. *See* ASHTORETH; RELIGIONS OF THE BIBLICAL WORLD: CANAANITE.

FERVENT; FERVENTLY. Each term occurs only once in the RSV. Acts 18:25 describes Apollos as "being fervent [Gk. *zéōn*–'burning'] in spirit," and Jas. 5:17 refers to Elijah as having "prayed fervently [Gk. *proseuchḗ*–'with prayer'; AV, NEB, "earnestly"] that it might not rain."

FESTAL GARMENTS [Heb. *ḥᵃlipôṯ śᵉmālōṯ*–'changes of mantles'] (Gen. 45:22); AV "changes of raiment"; NEB "changes of clothing"; [*ḥᵃlîpôṯ bᵉgāḏîm*– 'changes of garments'] (Jgs. 14:12f., 19; 2 K. 5:5, 22f.); AV "changes of garments"; **FESTAL ROBES** [*maḥᵃlāṣôṯ*] (Isa. 3:22); AV "changeable suits of apparel." The festal garment was a special item of clothing for occasions other then the ordinary. The connotation of the festal robe, though worn on similar occasions, was cleanness, purity, and whiteness (cf. Zec. 3:4).

FESTAL GATHERING [Gk. *panḗgyris*] (He. 12:22); AV GENERAL ASSEMBLY; NEB FULL CONCOURSE (the AV and NEB consider the word part of v. 23). The various readings of the passage in which this Greek term occurs are based on different punctuations of the Greek text. The AV and NEB take *panḗgyris* in close conjunction with *ekklēsía prōtotókōn*, "assembly of the first-born," while the RSV correctly takes it as a circumstantial dative with *myriás angélōn* (see F. F. Bruce, *Hebrews* [*NICNT*, 1964], p. 370 n. 131), with the alternate reading in the margin. Thus, the "festal gathering" refers to the angels while the "assembly of the first-born" refers to the whole Church of Christ, whose members have their names "enrolled in heaven." N. J. O.

FESTIVAL. *See* FEASTS.

FESTUS fes'təs, **PORCIUS** pôr'shəs [Gk. *Porkios Phēstos*]. The Roman governor or procurator who succeeded FELIX ANTONIUS in the province of Judea (Acts 24:27). The only sources of information concerning Festus are the NT and Josephus.

Josephus' writings picture Festus as a prudent and honorable governor. Felix's maladministration bequeathed to Festus the impossible task of restoring order to a province embroiled in political strife and overrun by robbers. The Sicarii (*see* ASSASSINS), as the robbers were called on account of the small swords they carried, would come upon a village, plunder it, set it on fire, and murder whomever they wished. Through the use of an impostor, Festus succeeded in ridding the province of many of these criminals (*Ant.* xx.8.10 [185-88]). But his procuratorship was too short to undo the legacy of his predecessor, and under his successor, Albinus, the situation rapidly deteriorated once again (*BJ* ii.14.1 [271-76]).

One of the problems Festus inherited from Felix was the question of Paul's imprisonment. Attempting to exploit the new governor's inexperience, the Jews requested that Paul be sent to Jerusalem for trial, hoping to assassinate him on the way (Acts 25:3). Festus at first refused their request, and upon his return to Caesarea he himself examined Paul (v. 6). On finding that the evidence was conflicting, however, and desiring to please the Jews, he asked Paul if he were agreeable to making the journey to Jerusalem (vv. 7-9). But Paul, who knew well the nefarious use that the Jews would make of the favor Festus was willing to grant them, made his appeal to Caesar (vv. 10f.). To this request of a Roman citizen accused on a capital charge (cf. v. 16), Festus had to give his consent (v. 12).

When King Agrippa and Bernice arrived in Caesarea a few days later, Festus sought Agrippa's advice on this difficult case. (*See* HEROD VIII.) At Agrippa's request, Paul was brought before him for a private hearing. Festus' reaction to Paul's testimony betrayed his Roman mind and his ignorance concerning the Jewish and Christian religions (vv. 24-27). Festus' friendship with Agrippa is further illustrated by Josephus' account of a dispute between Agrippa and the Jewish priests (*Ant.* xx.8.11 [189-196]). When the priests discovered that Agrippa could observe the activities in the temple from his portico, they built a wall to obstruct his view. Agrippa objected to this, and Festus sided with him. The Jews therefore appealed to Rome, with the result that Nero permitted the wall to stand.

The exact dates of Festus' term in office are uncertain. Eusebius gives the date of his accession as A.D. 56, but this is too early His term probably extended from 60 to 62.

See F. F. Bruce, *Paul: Apostle of the Heart Set Free* (1977), ch. 31. C. M. KERR N. J. O.

FETCH A COMPASS. Archaic in the AV for Heb. *sābaḇ* ("turn," "go around"; cf. RSV, NEB) in Nu. 34:5; Josh. 15:3; 2 S. 5:23; 2 K. 3:9, and for Gk. *periérchomai* ("make a circuit," "go around") in Acts 28:13.

FETTER [Heb. *nᵉḥōšeṯ* (Jgs. 16:21; 2 S. 3:34; 2 K. 25:7 par.; 2 Ch. 33:11; 36:6), *ziqqîm*, *keḇel* (Ps. 105:18; 149:8), *'ēsûr*, *bêṯ pᵉquddâ*–'guardhouse' (Jer. 52:11); Gk. *desmós*, *pédē* (Mk. 5:4)]; AV also BANDS, BONDS, CHAINS, etc.; NEB also IRONS, PRISON, "shut up." Except for 2 Tim. 2:9 (Gk. *déō*) the term occurs in the RSV in the plural. (In 2 S. 3:34 the RSV renders *linḥuštayim huggāšû*, "they will be put into fetters" as "[they] were . . . fettered" to preserve poetic parallelism.) Fetters of iron (Heb. *keḇel*; prob. Gk. *pédē*) or bronze (Heb. *nᵉḥōšeṯ*) were frequently used for securing prisoners. (*See* CHAIN.) Paul's "fetters" in Acts 16:26 were stocks that "had more than two holes for the legs, which could be forced wide apart in such a way as to cause the utmost discomfort and cramping pain" (F. F. Bruce, *Acts* [*NICNT*, 1954], p. 336).

In Eccl. 7:26 the hands of the woman with evil intentions are figuratively compared to "fetters" (Heb. *'ēsûr*) which people can escape only through divine help (*see* WOMAN). The righteous may be "bound in fetters" (Heb. *ziqqîm*, Job 36:8; parallel to "caught in the cords of affliction"), but their punishment is for purification (*see* EVIL III.C).

At the end of his life Paul was confined in fetters (Gk. *desmós*, 2 Tim. 2:9; cf. Col. 4:18) for the sake of the gospel. Though according to outer appearance he was a criminal, he used his humiliating condition to further the gospel — the word of God "is not fettered" (Gk. *déō*).

See *TDNT*, II, *s.v.* δεσμός, δέσμιος (Kittel).

R. W. V.

FEUD [Heb. *rîḇ*] (Jgs. 12:2); AV STRIFE. The term *rîḇ* generally denotes some sort of legal dispute or lawsuit. When the men of Ephraim demanded to know why Jephthah had not called for their assistance in the conflict against the Ammonites, Joshua answered that he and his people had a great *rîḇ* against the Ammonites, and that they were forced to fight the battle alone when Ephraim refused to respond to their request for help.

FEVER [Heb. *qaddaḥaṯ*, *dalleqeṯ*, *ḥarḥur*, *šaḥepeṯ*; Gk. *pyretós*, *dysentérion*]. A bodily condition (pyrexia) in which the temperature exceeds 37°C. (98.6°F.). Of the many forms of febrile disease, those mentioned in the Bible can usually be identified with reasonable certainty. As in antiquity, certain fevers are among the commonest of illnesses in Palestine today. Most frequent of all is malaria, which prevails wherever pools or marshes permit mosquitoes to breed. These conditions occur mainly in the north, the Shephelah, and the Jordan Valley.

The AV translates Heb. *qaddaḥaṯ* (LXX Gk. *íkteros*) in Lev. 26:16 as "burning ague" (RSV "fever"; NEB "recurrent fever"), linking it with Heb. *dalleqeṯ* (Gk. *rhígos*, "ague") in Dt. 28:22, where, however, the LXX renders Heb. *qaddaḥaṯ* by Gk. *pyretós*. The variation is interesting, since Galen employed the Gk. *rhigopýretos* to describe a common Palestinian fever. The LXX of Lev. 26:16 means "jaundice," a disease not otherwise mentioned in the Bible. This condition (icterus) results from a yellowish staining of the skin and other tissues with bile pigments and is symptomatic of organic liver disease. Toxemic jaundice is often associated with such infectious conditions as relapsing fever, yellow fever, and malaria. The two Hebrew terms may describe different stages of the same malarial condition. The attack commences with chill and severe shivering (Gk. *rhígos*), which are followed by a febrile stage and concomitant physical symptoms, terminating in a period of profuse perspiration. In tertian malaria the paroxysms recur every second day and in quartan malaria every third day (not reckoning the day of the paroxysms as the first).

Blackwater fever, a disease similar to malaria in which the urine contains hemoglobin, has been reported infrequently in Palestine, as has undulant (Malta) fever, which also presents characteristics similar to malaria. The AV "extreme burning" (RSV "fiery heat") of Dt. 28:22 (Heb. *ḥarḥur*; Gk. *erethismós*) may be a description of undulant fever. A differential diagnosis might include erysipelas or some other eruptive fever such as measles or scarlatina.

Hebrew *šaḥapeṯ* (Lev. 26:16; Dt. 28:22; Gk. *aporía*), translated "consumption" in most English versions, was a febrile disease with distressing aftereffects. Phthisis, however, is infrequent in Syria, so that the disease implied may perhaps be undulant fever. This condition is frequently accompanied by febrile paroxysms, anemia, and emaciation. It may have been referred to in the Ebers papyrus as a "fever of the gods" (46), or as a "burning of the heart" (102), an affliction sent by the "god of fever" and having sequelae affecting the eyes, stomach, heart, and other organs. Diseases such as typhoid and typhus almost certainly existed in the ancient Near East but cannot be identified from biblical references.

In the NT, "fever" is mentioned eight times. Where Gk. *pyretós* is employed it generally indicates malaria, a disease of frequent occurrence in Palestine. Peter's mother-in-law (Mt. 8:14 par.) and the nobleman's son at Capernaum (Jn. 4:52) were probably afflicted with this disease. The dysentery of Acts 28:8 (AV "bloody flux") was accompanied by a febrile condition, perhaps relapsing malarial fever. The serious nature of the condition might indicate acute gangrenous dysentery, which is usually fatal.

See also DISEASE III.H; IV.E. R. K. H.

FIELD [Heb. *śāḏeh*, *ḥelqâ* (e.g., 2 S. 14:30f.), *yᵉgēḇîm* (Jer. 39:10), *šᵉrēmôt* (Jer. 31:40), *šāḏay* (e.g., Dt. 32:13), *šᵉḏēmâ* (Dt. 32:32; Isa. 16:8), *ḥûṣ* (Job 5:10); Aram. *bar* (Dnl. 2:38); Gk. *agrós*, *chôra* (Jn. 4:35; Jas. 5:4), *chōríon* (Acts 1:18), *geōrgion* (1 Cor. 3:9), *kanōn* (2 Cor. 10:15f.), vb. *agrauléō* ("were . . . in the field," Lk. 2:8)]. In Jer. 39:10 the NEB reads *yōgᵉḇîm*, "labourers," for MT *yᵉgēḇîm*, "fields" (so RSV, AV) on the basis of similar texts in 2 K. 25:12 par. Jer. 52:16; the change, however, is unwarranted, since the MT makes sense as it stands (also

note that the NEB rendering calls for another change, reading *kōrᵉmîm*, "vine-dressers," for MT *kᵉrāmîm*, "vineyards"). Heb. *šᵉrēmôṯ*, which occurs only in Jer. 31:40, is probably an error for *šᵉḏēmôṯ* (so *Q*; cf. KoB, p. 950; *BH*; on Ugar. *šdmt*, see M. Lehman, *VT*, 3 [1953], 361-371).

The most common biblical words for "field" are Heb. *śāḏeh* and Gk. *agrós*. A basic distinction exists between open fields (e.g., Nu. 19:16; 2 S. 11:11; Ezk. 29:5; 32:4; 33:27) and enclosed fields (e.g., Nu. 22:23f.; Prov. 24:30f; cf. Dt. 27:17). An even more important distinction must be made between cultivated (Ruth 2:2; Ps. 107:37; Eccl. 5:9) and uncultivated fields. Fields could be owned by one family, or even by a nation (e.g., "country of Moab," Gen. 36:35); the fields of the fatherless were to be especially respected (Prov. 23:10).

Beside the literal use of "field," figurative uses include fields exulting (1 Ch. 16:32; Ps. 96:12) and languishing (Isa. 16:8). Human beings are likened to fields in Gen. 27:27 (the human smell is compared to the smell of the field), and in Isa. 1:8 Zion is represented as a "lodge in a cucumber field" (cf. Jer. 26:18). The Corinthian church is a field to be cultivated by the apostles (1 Cor. 3:9; cf. 2 Cor. 10:15). "Field" represents the world in Mt. 13:38, and in Jn. 4:35 the fields are "already white for [spiritual] harvest."

Fields were not only places of sowing, harvesting, and raising cattle but also arenas of battle (1 S. 4:2; 2 S. 18:6), murder (Gen. 4:8), and burial grounds (2 Ch. 26:23; but cf. 2 K. 9:37; Jer. 9:22). They provided an opportunity for meditation (Gen. 24:63; Jgs. 13:9). They could be dedicated to God (Lev. 27:17f.) or used for spiritual harlotry (Jer. 13:27). The fields became fruitful (Isa. 32:15, Heb. *karmel*, "orchard"; NEB "grassland") when blessed by God (Dt. 28:3; Isa. 29:17) but withered when cursed by Him (Dt. 28:16; Isa. 16:10; but cf. Hab. 3:17f.).

R. W. V.

FIELD OF BLOOD (Acts 1:19). *See* AKELDAMA.

FIERCE [Heb. *ḥārôn, ḥᵒrî* (1 S. 20:34; 2 Ch. 25:10; Isa. 7:4; Lam. 2:3), *ʾaḵzār, ʿāz*–'strong,' 'insolent' (Gen. 49:7; Ps. 59:3 [MT 4]; Isa. 19:4), *hāḏaḏ* (Hab. 1:8), *zaʿam*–'curse' (Lam. 2:6), *qāšâ*–'be hard' (2 S. 2:17; Isa. 27:8), *šaḥal*; Gk. *anémeros*–'untamed' (2 Tim. 3:3), *barýs, chalepós*–'dangerous' (Mt. 8:28)]; NEB also FURY, RAGE, CRUEL, BURNING (Zeph. 2:2), "fearfully" (Rev. 16:9), etc., and frequently omits; **FIERCENESS** [Heb. *ḥārôn* (Dt. 13:17; 2 K. 23:26), *raʿaš* (Job 39:24)]; NEB also "trembling" (Job 39:24), and omits (Dt. 13:17 [MT 18]); **FIERCELY** [piel of *mārar*–'irritate' ("fiercely attacked," Gen. 49:23), *nāḥar*–'snort' ("blow fiercely," Jer. 6:29)]; AV SORELY, "are burned" (Jer. 6:29); NEB SAVAGELY, PUFF AND BLOW.

The most common word for fierce(ness) is Heb. *ḥārôn*, which, like *ḥᵒrî*, means "heat, fervor." Frequently these occur with Heb. *ʾap*, "anger," and denote the intensity of anger (e.g., Job 20:23; 2 Ch. 25:10). In Job 4:10 the NEB's rendering "cubs" (Heb. *šaḥal*, "[young] lion") is perhaps preferable to RSV, AV "fierce lion" (cf. *TDOT*, I, *s.v.* "ʾᵃrî" [Botterweck]). In Job 39:24 Heb. *bᵉraʿaš wᵉrōgez* may be translated either "with rattling and excitement" (cf. NEB) or "with fierceness and rage" (RSV, AV; see comms.). Heb. *ʾaḵzār* (elsewhere "cruel"; cf. KoB, p. 43) in Job 41:10 (MT 2) is best understood as "fierce" in the sense of "bold" (cf. Syr. *kᵉzîr*; *BH*, KD *in loc.*); see the context, especially v. 10b.

"Fierce" may denote the intensity of a battle (2 S. 2:17) or of a fire (Rev. 16:9). Animals can be fierce or menacing (e.g., Hab. 1:8). A few times "fierce" applies to humans, in the sense of being savage (NEB, Ps. 59:3), cruel (NEB, Isa. 19:4), and violent (NEB, Mt. 8:28). In 2 Tim. 3:3 fierceness is a vice; in the last days people will be "savage" or "brutal" (Bauer, rev., p. 66). Luke uses "fierce" (Gk. *barýs*) figuratively: those coming after Paul's departure are compared to "fierce wolves" (Acts 20:29).

Most often "fierce" occurs in the expression "fierce anger." In the Blessing of Jacob the anger of Simeon and Levi is denounced (Gen. 49:7); but note that the reaction of Jonathan to Saul's intention to kill Jonathan's best friend David appears to be condoned in 1 S. 20:34.

Scripture does not hesitate to ascribe intense anger to the holy God because of human sinfulness. His anger (e.g., Nu. 25:4), His wrath (e.g., Ex. 32:12), and His indignation (Lam. 2:6) are such that crops (Jer. 12:13), the land (Jer. 4:26), people (e.g., Jer. 49:37), and possibly the earth itself (Isa. 13:9) are or will be destroyed. But His fury is tempered by His love (Hos. 11:9). *See also* WRATH.

R. W. V.

FIERY HEAT [Heb. *ḥarḥur*] (Dt. 28:22); AV EXTREME BURNING; NEB ERUPTIONS. *See* FEVER.

FIERY ORDEAL [Gk. *pýrōsis*] (1 Pet. 4:12); AV FIERY TRIAL. The metallurgical associations of this word later were used in a vivid designation for sufferings, even persecutions, that tested faith. (Cf. the meaning of Heb. *kûr* in Dt. 4:20, 1 K. 8:51, Prov. 17:3; 27:21; etc.) *Pýrōsis* meant: (1) exposure to burning, as in cooking or surgery; (2) the place of burning, as a furnace (LXX Prov. 27:21); (3) the process of burning, which either caused destruction (cf. Josephus *Ant.* i.11.4 [203], referring to Sodom; Rev. 18:9, 18, referring to Babylon) or purified and refined metals (cf. LXX Ps. 66:10; Rev. 3:18); (4) metaphorically, the testing of faith.

The last is the meaning of Heb. *kûr* in the Manual of Discipline at Qumrân (1QS 1:17f., a close parallel to 1 Pet. 4:12) and of *pýrōsis* in an edited manual of church order from the 2nd cent. (Did. 16:5). 1 Pet. 4:12 refers back to 1:7, and both verses describe the protracted ("do not be surprised") crisis in which Christians were persecuted "for the Name" (cf. Mt. 5:10f.; Acts 4:7, 17; 5:28, 40f.; 9:14, 16), but a crisis filled with hope and eschatological meaning (1 Pet. 4:13-19; cf. the role of fire in apocalyptic expectations of the end, as in 1 En. 102:1; 108:3, 5). (*See also* PETER, FIRST EPISTLE OF IV.)

G. Selwyn, *First Epistle of St. Peter* (2nd ed. 1947), pp. 53-56, 221; J. Strugnell, *CBQ*, 29 (1967), 580-82.

J. G. GIBBS

FIERY SERPENT. *See* SERPENT; ZOOLOGY IV.

FIG; FIG TREE [Heb. *tᵉʾēnâ, pag*; Gk. *sýkon, sykéa, sykē, olýnthos*]. The common fig, *Ficus carica* L., mentioned nearly sixty times in Scripture, is one of the most important Bible plants and was cultivated throughout Palestine, particularly in the mountainous regions. The wild fig was also commonly found as a shrub, but was generally barren. Its flowers contained insects that probably fertilized the cultivated fig. Am. 7:14 may refer to artificial fertilization of the fig. *See* Plate 10.

Usually growing to about 5 m. (15 ft.) in height, the fig tree sometimes attains a maximum of 8 m. (25 ft.). Its foliage is dense, providing welcome shade (e.g., Mic. 4:4; Zec. 3:10; Jn. 1:48). The fruit of the fig tree (a *syconium*)

is peculiar, being an enlarged fleshy receptacle containing small gritty particles at maturity, which are the true fig seeds and fruit. As the flower develops, the axis closes upon the small internal blooms instead of expanding outward, ultimately leaving a minute aperture at the apex. The axis becomes pulpy and succulent, and the tree is fertilized by the presence of small hymenopterous insects.

Various stages in the development of the fruit are mentioned in the OT. Heb. *tᵉʾēnîm* in Jer. 8:13, etc., describes figs ripe from the end of August; Heb. *pag* (LXX Gk. *ólynthos*) in Cant. 2:13, the green fig remaining on the tree during the winter; Heb. *bikkûrâ* (Gk. *okopós*) in Hos. 9:10, an early fig growing on the stock of the preceding year; Heb. *dᵉḇēlâ* (Gk. *paláthē*) in 1 S. 25:18, a cake of pressed dried figs kept for winter use. *See* Plate 13; *see also* EARLY.

There are several varieties of Palestinian figs, some of which are inferior (cf. Jer. 24:1f, 8; 29:17). Two crops are gathered; the first is ripe about June and grows from the midsummer shoots of the previous year, while the second, ripe about August, is produced from the new spring shoots. By December all figs in the mountainous areas have shed their leaves, and new leaf buds appear only in March (cf. Mt. 24:32 par.), when the tiny figs appear simultaneously in the leaf axils. The figs grow to about the size of a small cherry and then the majority fall off (cf. the "winter fruit" of Rev. 6:13; AV "untimely figs"). Known to the Arabs as *taksh*, this underdeveloped fruit is often gathered for sale in the markets. In April and May the fig leaves develop and the fruit reaches maturity about June (cf. Isa. 28 4; Jer. 24:2; Hos. 9:10), being then of delicate flavor (e.g., Mic. 7:1). Frequently, ripe winter figs can be found, hidden by leaves, when the summer figs are growing in August and September.

Christ's miracle (Mt. 21:18f. par.) during the Passover season (about April) can be understood in the light of these observations. When the young leaves are appearing in spring, every fertile fig will have some *taksh* on it, even though the season for edible figs (Mk. 11:13, AV) has not arrived. When the leaves are fully developed the fruit ought to be mature also. But if a tree with leaves has no fruit, it will be barren for the entire season. Thus the fig tree was cursed for its pretentiousness, predicting the fate of the fruitless Jewish nation (cf. W. L. Lane, *Mark* [*NICNT*, 1974], pp. 399f.).

Years of labor are required (cf. Lk. 13:7) before newly planted figs bear profitably, since the tree grows slowly. Thus the destruction of the fig (cf. Ps. 105:33; Jer. 5:17; Hos. 2:12; Am. 4:9) would have serious economic implications. Obversely, the state where the individual dwelt securely under his own fig tree was one of safety and prosperity (1 K. 4:25; cf. 2 K. 18:31; Isa. 36:16; Mic. 4:4; Zec. 3:10; 1 Macc. 14:12). Only a supreme faith in God could bring rejoicing in the absence of a flourishing fig tree (Hab. 3:17).

Dried figs were always a more important dietary item than fresh figs. Cakes were made by pressing the figs together (1 S. 30:12). Abigail gave David two hundred such cakes (1 S. 25:18); the people of northern Israel sent fig cakes with other gifts to the newly crowned David (1 Ch. 12:40). A poultice of figs was applied to Hezekiah's boil (Isa. 38:21 par.), following contemporary therapeutic practices.

FIGHT. *See* WAR.

FIGURE [Heb. *semel, miqlaʿaṯ*]; [*mᵉlîṣâ*] (Prov. 1:6); AV INTERPRETATION; NEB PARABLE; [*taḇnîṯ*] (Isa. 44:13); NEB SHAPE; [*kᵉlî*] (1 S. 6:8, 15); AV JEWEL; NEB OFFERING; [*dᵉmûṯ*] (2 Ch. 4:3); AV SIMILITUDE; NEB "what looked like"; [Gk. *paroimía*] (Jn. 10:6; 16:25, 29); AV PARABLE, PROVERB; NEB also PARABLE; [*týpos*] (Acts 7:43); NEB IMAGE. The term is employed in three different ways in the RSV; its basic meaning is "form," "shape," or "image."

(1) Frequently "figure" designates images used in worship. Heb. *semel* in Dt. 4:16 is the normal word for "statue" (cf. 2 Ch. 33:7, 15). *Taḇnîṯ* in Isa. 44:13 is the word ordinarily used for a "model" or "pattern" for construction; in Dt. 4:16f. it is translated "likeness." In Ex. 25:40 the term refers to the heavenly "pattern" that served as the model for the earthly tabernacle (cf. Josh. 22:28). In Am. 5:26 Amos condemns Israel's worship of "images" (LXX *týpos*) they had made for themselves. (*See* KAIWAN.)

Clearly evident in each of these texts is the distinctive Hebraic attitude toward the use of any form that humans can shape with their own hands. The ground given in Dt. 4:16 for the prohibition against figures is that at Sinai Israel had not seen God's form (4:15). Because God is above the creation, there is no form, shape, or likeness that human beings can construct to represent Him. Similarly, the prophet in Isa. 44:13 ridicules the notion that any shape or figure made out of material objects can represent the deity. Because God is Creator, no figure or likeness can represent Him (Isa. 40:12-18). (*See also* GOD II.D.2; IDOL.)

Stephen's accusation directed at Israel in Acts 7:43 sets the condemnation of Am. 5:25-27 in a new context. The rebellion of Israel in OT times included the use of the tent of MOLECH and the making of figures (*týpoi*) for worship. Stephen contrasts the pagan tent and figures (*týpoi*) to the true tent that was made according to the divine pattern (*týpos*). In this instance the contrast is between the purely material *týpoi* (Acts 7:43) that characterized pagan worship and the divine *týpos* that characterized the tabernacle (v. 44). The material figures, shaped by human hands, were not suitable for representing God because He is set apart from the creation. This is the basis for the condemnation of any material figures used to represent Him. (For *týpos* as "type" *see* TYPE.)

(2) Hebrew *miqlaʿaṯ* (<*qālaʿ*, "carve") refers to carved figures. The term is used in 1 Kings for the carvings

that adorned the temple. In 6:18 *miqla'aṯ* (RSV "form") is used for the cedar carvings of gourds and flowers in the temple, and in v. 32 for the carvings of cherubim, palm trees, and open flowers.

(3) In a few instances obscure or enigmatic speech is designated as a "figure." Heb. *mᵉlîṣâ* ("satire," BDB, p. 539; cf. Hab. 2:6) denotes enigmatic speech (Prov. 1:6; *see* DARK SAYINGS). Similarly, Gk. *paroimía* expresses hidden or obscure speech. The Fourth Gospel, which never uses the more familiar *parabolḗ*, uses *paroimía* for the speech of Jesus that needed interpretation. Just as Jesus in Mk. 4:10-12 intentionally speaks in parables that are difficult to understand, so the Johannine Christ speaks "in figures" (*see* MYSTERY III; PARABLE). Thus Jn. 10:6 calls the shepherd speech (vv. 1-5) a "figure," and 16:25 describes all of Jesus' words up to the departing discourses as "figures" that can only imperfectly indicate divine truth in human words.

Bibliography.–L. Morris, comm. on John (*NICNT*, 1971), pp. 500f., 708f.; *RGG*, I, *s.v.* "Bild" (B. Gemser); *TDNT*, II, *s.v.* εἰκών (von Rad); V, *s.v.* παροιμία (Hauck); VIII, *s.v.* τύπος (Goppelt). J. W. THOMPSON

FIGURED STONE [Heb. *'eḇen maśkîṯ*; Gk. *líthos skopós*]; AV IMAGE OF STONE (Lev. 26:1), PICTURES (Nu. 33:52); NEB also CARVED FIGURE (Nu. 33:52). An object used in pagan religious worship. It probably comprised a slab of stone decorated with some carved or painted idolatrous representation such as occurred on Egyptian temple walls or orthostats.

See also IDOL. R. K. H.

FIGUREHEAD (Acts 28:11). *See* TWIN BROTHERS.

FILIGREE [Heb. *mišbᵉṣôṯ*]; AV OUCHES; NEB ROSETTES; [*millu'â*] (Ex. 28:20); AV INCLOSINGS; NEB ROSETTES. Ornamental work of fine wire, used in setting the two onyx stones on the high priest's EPHOD (Ex. 28:11; 39:6), the twelve stones on the BREASTPIECE (28:20; 39:13), and the cords that fastened the breastpiece to the shoulder-pieces of the ephod (28:13, 25; 39:16, 18). The use of *mišbᵉṣôṯ* in Ps. 45:13 (MT 14), where the princess is said to be dressed in "gold-woven" robes, indicates that the settings were not of solid gold but of woven wire. Ex. 39:3 tells how this wire was produced. A floral design such as the NEB suggests is a likely possibility. R. K. H.

FILL. *See* FULL.

FILLET [Heb. *ḥāšûq*] (Ex. 27:10f.; 36:38; 38:10-28); NEB "bands on the posts." This word describes a metal band that enclosed the tops of pillars used in the construction of the tabernacle. From Ex. 26:32, 37 it seems that the veil and the screen were suspended from hooks attached to the fillets on the pillars, and this would preclude the older concept of a fillet as a rod that connected the pillars. R. K. H.

FILTH; FILTHINESS; FILTHY [Heb. *ṣô'â*] (Isa. 4:4; 28:8; Prov. 30:12); [*ṣô'î*] (Zec. 3:3f.); [*šiqqûṣ*] (Nah. 3:6); [*ṭum'â*] (Ezk. 22:15; 24:11, 13); NEB also DEFILEMENT, IMPURITY; [*niddâ*] (2 Ch. 29:5; Lam. 1:8, 17); AV also "menstruous woman," "removed"; NEB also POLLUTION; [Gk. *aischrótēs*] (Eph. 5:4); NEB COARSE; [*rhypaínō, rhypareúō, rhyparía, rhyparós*] (Jas. 1:21; Rev. 22:11); NEB also SORDID. Anything that defiles or soils in such a way as to be disgusting or revolting. In its literal sense filth may refer, for example, to vomit (Isa. 28:8), impurities in metal (Ezk. 24:11), or soiled clothing (Zec. 3:3f.). The word may be used figuratively in the sense of ceremonial uncleanness, such as idolatrous practices in the temple (2 Ch. 29:5), or in the sense of ethical uncleanness or immorality (Prov. 30:12; Ezk. 24:13; Eph. 5:4; Jas. 1:21; Rev. 22:11). E. W. CONRAD

FIN. *See* FISH.

FINAL PUNISHMENT [Heb. *'ēṯ ᵓᵃwōn qēṣ*–'time of punishment (iniquity) of the end'] (Ezk. 21:25, 29 [MT 30, 34]; 35:5); AV "iniquity shall have an end." Ezekiel is concerned with God's judgment of destruction upon a faithless king and people (Israel in 21:25 and 35:5, Ammon in 21:29), rather than a judgment day at the end of time (cf. Isa. 40:2).

FIND. Among the many words translated "find," Heb. *māṣā'* and Gk. *heurískō* are the most common. Aside from the obvious literal uses, "find" is used figuratively with an object or complement (e.g., "find favor"); often it is supplied where the original text has only the complement (e.g., in 2 Ch. 30:9 the RSV translates Heb. *lᵉraḥᵃmîm*, lit. "for compassion," as "will find compassion"). Sometimes the RSV simply supplies "find" (e.g., 1 Cor. 5:1). In Ps. 73:10 the RSV ("find no fault") and the NEB ("find nothing to blame") emend the MT *mê mālē' yimmāṣû* (cf. AV "waters of a full cup are wrung out") apparently to *mᵉ'ûmâ lō' yimmāṣᵉ'û*; there is little textual evidence, however, for this change, although it does improve the sense of the passage.

Our Lord's claim, "Seek, and you will find" (Mt. 7:7 par. Lk. 11:9) is a reassurance to those uncertain of God's existence (cf. I. H. Marshall, comm. on Luke [*New International Greek Testament Comm.*, 1978], p. 467). Jesus' enigmatic statement "He who finds his life will lose it, and he who loses his life for my sake will find it" (Mt. 10:39; 16:25; cf. Mk. 8:35; Lk. 9:24; 17:33; Jn. 12:25) seems to mean that the selfish person will forfeit eternal life, but the person who lives (and dies) for Christ will gain eternal life (cf. W. F. Albright and C. S. Mann, *Matthew* [*AB*, 1971], p. 133). R. W. V.

FINE. An adjective that indicates superior quality. Only in a few instances does the English translation "fine" represent a separate word: (1) Heb. *ṭôḇ*, "good," qualifies gold (2 Ch. 3:5, 8, "fine gold"; cf. Gen. 2:12, "good") and copper (Ezr. 8:27, "fine bright bronze"); Aram. *ṭāḇ* (Dnl. 2:32, "fine gold"); (2) Heb. *yōšer* (emended from *yeṯer*, following the LXX), "uprightness," modifies "speech" (Prov. 17:7); (3) *'āṯîq*, "choice," describes clothing (Isa. 23:18); (4) *tip'ereṯ*, "beauty," qualifies jewels (Ezk. 23:26); (5) Gk. *kalós*, "good," describes pearls (Mt. 13:45); (6) *lamprós*, "shining," is used of clothing (Jas. 2:2f.).

In other places there is no separate word, but "fine" expresses a quality of the substantive: Heb. *keṯem*, "fine gold" (Job 31:24); *pāz*, meaning "refined gold" (Job 28:17; Ps. 19:10 [MT 11]; Prov. 8:19; Isa. 13:12; Lam. 4:2); *sōleṯ*, "flour," rendered "fine flour," rolled or crushed small (Lev. 2:1, 4f., 7; etc.); *qemaḥ sōleṯ*, "fine meal" (Gen. 18:6); *bûṣ*, "fine linen" (Ezk. 27:16, etc.); Gk. *býssos*, from Heb. *bûṣ* (LXX in 2 Ch. 2:14; 3:14), deemed very fine and precious, worn only by the rich (Lk. 16:19); Gk. *býssinos*, "made of fine linen" (LXX for *bûṣ* in 1 Ch. 15:27; Rev. 18:12, 16, "clothed in fine linen"; 19:8, 14); *semídalis*, "fine flour and wheat" (18:13).

In Job 28:1 the AV employs "fine" in the obsolescent sense of "refine." W. L. WALKER
N. J. O.

FINER. (Prov. 25:4, AV). Obsolete for "refiner." *See* SMITH.

FINES [Heb. vb. *'ānaš* (Ex. 21:22; Dt. 22:19; Prov. 17:26; Am. 2:8)]; AV BE SURELY PUNISHED, AMERCE IN, PUNISH, CONDEMN. Monetary penalties, often added to other forms of punishment, were assessed in biblical times both as compensation for hurt, loss, or damage and as a deterrent to criminal behavior. As elsewhere in the ancient Near East, fines were paid to the victim, who was responsible for the execution of the court's verdict. No evidence has been attested of fines paid to the court or state, although some scholars so interpret goods and moneys contributed through guilt or sin offerings (cf. Am. 2:8; 2 K. 12:16 [MT 17]; Lev. 5:6-19); confiscation of property as a judicial punishment was permitted after the Exile (Ezr. 7:26; 10:8; cf. 1 K. 21:15f.).

Indemnification was to be made by one who caused a miscarriage, in an amount determined by the woman's husband and approved by judges (Ex. 21:22). For seduction of a virgin a man was to pay to her father her "marriage present" and make her his wife (Ex. 22:16f. [MT 15f.]; Dt. 22:29). False defamation of a virgin carried a fine of one hundred shekels (Dt. 22:19). An unspecified sum was assessed for seducing a betrothed slave woman (Lev. 19:20-22). Compensation for loss of time, as well as medical care, was to be given in cases of personal injury (Ex. 21:18f.). When an ox gored a person to death the deceased's kin could accept a ransom in place of the negligent owner's life (Ex. 21:30). Damages were to be paid for an ox or ass that fell into an open pit (Ex. 21:34). In the case of stolen property, fines could amount to several times the actual value, depending upon whether the goods were returned (Ex. 22:1-4, 9 [MT 21:37–22:3, 8]; cf. Lev. 6:5; 2 S. 12:6; Prov. 6:31; Lk. 19:8).

In contrast with earlier Israelite laws and Mesopotamian codes that accorded the death penalty for theft, the law of "eye for eye, tooth for tooth" (Ex. 21:22-24) reduced the punishment to restitution plus a fine, thus demonstrating the Hebrew concern for all members of the community.

See PUNISHMENTS. A. C. M.

FINGER [Heb. *'eṣba'*, *qōṭen*–'small thing' ("little finger," 1 K. 12:10 par. 2 Ch. 10:10); Gk. *dáktylos*]. In 1 K. 7:15 the RSV and NEB follow the LXX (cf. also Jer. 52:21), while the AV follows the MT.

In ancient as in modern times the fingers were frequently an important adjunct to conversation. Insulting, perhaps obscene, gestures are alluded to in Prov. 6:13 and Isa. 58:9 (*see* GESTURE III.A). The fingers were often decorated with valuable rings that needed careful safeguarding. In the same way the Hebrews were commanded to bind God's laws upon their fingers (Prov. 7:3; cf. Dt. 11:18). In 1 K. 12:10 and 2 Ch. 10:10 Rehoboam employs "finger" in a figurative sense.

Often the fingers were used in cultic ceremonies to sprinkle the blood of animals upon the horns of the altar (e.g., Ex. 29:12; Lev. 4:25), on or in front of the mercy seat (Lev. 16:14), and in front of the tent of meeting (Lev. 4:6; Nu. 19:4). In the administration of the guilt offering the priest was instructed to use his right finger (Lev. 14:16, 27). (*See also* SACRIFICES AND OFFERINGS IN THE OT.)

The "finger of God," a highly anthropomorphic phrase like the "hand of God," is synonymous with divine power. Pharaoh's magicians had to concede that God was responsible for the plagues, that human means could not produce them (Ex. 8:19 [MT 15]). In Ps. 8:3 (MT 4) the psalmist stands in awe of the vast universe made by the fingers of God. For Moses God wrote the law with His own finger (Ex. 31:18; Dt. 9:10; cf. Ex. 32:15), impressing upon His people the infallible evidence of its divine authorship. In contrast, human fingers create idols (Isa. 2:8; but cf. 17:8) and are full of bloodshed (59:3). The "fingers of a man's hand" in Dnl. 5:5 refer to God's dramatic intrusion in Belshazzar's feast.

In the NT Jesus cast out demons by the "finger of God" (Lk. 11:20; on the relation of this verse to Mt. 12:28, see I. H. Marshall, Comm. on Luke [*New International Greek Testament Comm.*, 1978], pp. 475f.; see also *TDNT*, II, 20), signifying the heavenly origin of His power. The resurrected Christ allowed Thomas to touch Him with his fingers (Jn. 20:27).

The phrase "they themselves will not move them with their finger" (Mt. 23:4) refers to the Pharisees' practice of not removing with their fingers (= erasing) the numerous requirements of the (ceremonial) laws placed as a heavy burden upon the common people (*IB*, VII, 529).

For "finger" or "digit" as a linear measurement (1 K. 7:15; Jer. 52:21 [LXX *dáktylos*; Josephus *Ant.* viii.3.4 (77)]), *see* WEIGHTS AND MEASURES.

See HAND. H. L. E. LUERING R. W. V.

FINING POT (AV Prov. 17:3; 27:21). *See* CRUCIBLE.

FINISH. The most common OT and NT verbs rendered "finish" by the RSV are Heb. *kālâ* and Gk. *teléō;* the usual sense is "complete" or "end." Gen. 2:2, e.g., reads that "on the seventh day God finished [*kālâ;* AV "ended"; NEB "completed"] his work." In 2 Tim. 4:7 Paul says, "I have fought the good fight, I have finished the race" (*teléō*); the term in Lk. 13:32, however, is *teleióō*, where Jesus says, "the third day I finish my course" (Bauer, rev., p. 809, "reach my goal").

The most significant scriptural example is the cry upon the cross, "It is finished" (*tetélestai*, Jn. 19:30; cf. v. 28). The surface meaning is that Jesus' life is ended. The more important meaning, however, is that His work is completed: God's plan of redemption has been brought to completion. Thus, in John's Gospel Jesus' last word on the cross is a cry of triumph (cf. R. E. Brown, comm. on John [*AB*, 1970], II; L. Morris, comm. on John [*NICNT*, 1971]). N. J. O.

FINISHER. *See* PERFECTER.

FIR TREE [Heb. *b^erôš*] (Ps. 104:17; Ezk. 27:5; 31:8); NEB also "tops" (Ps. 104:17), PINE (Ezk. 27:5). The true fir, *Abies cilicia* Carr., though well suited to regions such as Lebanon, is seldom found there and as an identification has generally been abandoned by botanists in favor of either the pine (cf. NEB, 1 K. 5:8, 10; etc.; 2 K. 19:23; 2 Ch. 2:8; 3:5; Isa. 14:8; etc.; Hos. 14:8; Zec. 11:2) or cypress (the RSV rendering of the foregoing references). The NEB translates *b^erôš* in Ezk. 27:5 by "pine" as against the RSV "fir."

The Heb. *tiḏhār* (Isa. 41:19f.; 60:13), a rare word rendered "pine" (AV) and "plane" (RSV), is probably correctly translated by the NEB "fir." Evidently one of the juniper species is meant, perhaps *Juniperus excelsa* Bieb., a tall, sturdy tree resembling the cedar in shape and producing durable timber.

The AV consistently translates *b^erôš* by "fir," but the confusion attending the identification of many Hebrew trees and shrubs makes such a uniform rendering improbable. In 2 S. 6:5, the RSV ("with songs") and the NEB ("singing") follow the LXX (and the par. 1 Ch. 13:8), assuming only a slight change in the MT (*bšyrym* for

brwšym). In Nah. 2:3 (MT 4) the RSV has "chargers" and the NEB "squadrons of horse," following the versions and requiring only a slight change in the MT (*pršym* for *bršym*).

See also CYPRESS; PINE TREE; PLANE TREE.

R. K. H.

FIRE [Heb. *'ēš* (Ex. 3:2; 22:6 [MT 5]; Ps. 39:3 [MT 4]; Jer. 51:58; Hab. 2:13; etc.), *'iššeh* ("offering by fire," Lev. 3:3, 9, 14; 7:25, etc.), *'ûr* (Isa. 31:9; 44:16; 47:14; 50:11; Ezk. 5:2), *śᵉrēpâ* (2 Ch. 16:14; 21:19); piel of *lāhaṭ*– 'devour, scorch' ("set on fire," Dt. 32:22; Isa. 42:25), hiphil (or niphal; cf. *BH*, KoB, p. 397) of *yāṣaṭ* ("be on fire," Jer. 51:30); Aram. *nûr* (Dnl. 3:22, 24-27; 7:10), *'eššā'* (Dnl. 7:11); Gk. *pýr* (Mt. 17:15; Lk. 17:29; 1 Cor. 3:13; etc.), *pyrá* (Lk. 22:55; Acts 28:2f.), *pýrinos* (Rev. 9:17), *kausóō* (2 Pet. 3:10, 12), *phlogízō* (Jas. 3:6)]; AV also VERY FIRE (Hab. 2:13), BURNING (2 Ch. 16:14; 21:19), BURNED (Jer. 51:30), BURNING FLAME (Dnl. 7:11), etc.; NEB also FEVER (Ps. 39:3 [MT 4]), "mere nothing" (Jer. 51:58; Hab. 2:13), GREAT FIRE (2 Ch. 16:14), FLAMES (Dnl. 7:11), "red-hot" (Jas. 3:6), etc. On the meaning of *'iššeh*, see Hoftijzer. In Jer. 6:29 the *K* of the MT (*m'štm*) is corrupt; following the LXX and *Q*, read *m's tm*, "is consumed by the fire" (cf. *BH*, comms.).

"Fire" in the Bible may be discussed under three headings — literal, metaphorical, and eschatological. These divisions are somewhat artificial, however, and especially in some eschatological contexts it is difficult to distinguish the literal from the figurative.

I. Literal Fire.–A. Domestic Fire. The method of making fire is not mentioned in the Bible, unless friction by wood is implied in Nu. 15:32f. (cf. Ex. 35:3) and 1 K. 17:12 (see also flint fire in 2 Macc. 10:3). The necessary preservation of fire in hot coals may stand behind Prov. 25:32. Incidental references to domestic fire are relatively infrequent: e.g., metalwork (Ex. 32:24; Isa. 44:12; 54:16), baking, cooking, and warmth (Isa. 44:15f.; Mk. 14:54 par.; Jn. 18:18; 21:9; Acts 28:2-5; etc.).

B. Ritual Fire. Altar fires are frequently mentioned. Of particular interest is the legislation for a perpetual altar fire (Lev. 6:9ff. [MT 2 ff.]; cf. 24:1f.). This legislation, contrasted with the "unholy fire" of Nadab and Abihu (Lev. 10:1-3; cf. Nu. 3:4; 26:61), indicates, according to some scholars, special veneration for a fire of heavenly origin (cf. Lev. 9:24). More probably, the perpetual flame is maintained as a symbol of God's presence and human preparedness for perpetual sacrifice (cf. Lev. 6:8-13). The "unholy fire" may refer to an improper ritual — due perhaps to drunkenness (cf. Lev. 10:8-11) — rather than to an inherently unholy origin or quality. There is no other hint that the Hebrew religion included the worship of fire as such. The OT also refers to funeral burnings (2 Ch. 16:14; 21:19) and the persistent sin of child sacrifice in fire (e.g., Lev. 18:21; Dt. 12:31; etc.; *see also* MOLECH; SACRIFICES AND OFFERINGS IN THE OT V.D).

C. Civil and Military Fire. Fire had both purgative and punitive use. It was used to combat the contagion of diseases (Lev. 13:52, 55), gross sexual sins (Lev. 20:14; 21:9), and false religions (Dt. 7:5, 25; 12:3). Of particular effect was the punishment by "divine fire" (e.g., Lev. 10:2; Nu. 11:1-3; 16:35).

In military campaigns, the purgative and preventive role of fire merges with the punitive, especially in the conquest of Canaanite cities under the ban (e.g., Nu. 31:10; Josh. 6:24; 8:8, 19; 11:11). But burning a city with fire was a basic principle of ancient total warfare (e.g., Jgs. 1:8; 9:49; 18:27; 20:48; 1 S. 30:1-4; 1 K. 9:16), and eventually the same fate fell upon the Holy City (2 Ch. 36:19), as Jeremiah had sadly prophesied (Jer. 17:27; 21:10; 22:7; 32:29; etc.). Not surprisingly, then, the vengeance prophesied for the nation's enemies often included the burning of cities (Jer. 43:12f.; 49:27; etc.), expressed with particular effect in Amos (1:4-14; 2:2, 5).

D. Theophany. The ancient Hebrews described lightning as fire (e.g., Ex. 9:23) and may have regarded the lightning as angels (cf. the MT and LXX in Dt. 33:2; Ps. 104:4). Similarly, God's presence was seen in fire (e.g., Gen. 15:18): the burning bush (Ex. 3:1f.; Acts 7:30); the pillar of fire (Ex. 9:24; 13:12, 22; 14:24; Nu. 9:15f.); above all, the theophany of Sinai (Ex. 19:18). Several eschatological visions use this imagery (Isa. 4:5; 66:15; Dnl. 7:9f.; Mic. 1:4; Mal. 3:2; cf. also Ezk. 1:13). In the NT this fire motif continues. Thus the descent of the Holy Spirit is accompanied by "tongues as of fire" (Acts 2:3), and in John's vision of Christ, He has eyes "like a flame of fire" (Rev. 1:14; 2:18; 19:12).

II. Metaphorical Fire.–*A. Of Individuals.* Human speech (Prov. 16:27; Jas. 3:5f.), jealousy or passion (Cant. 8:6), vexation (Ps. 39:3; cf. NEB "fever"; Jer. 20:9; Lam. 1:13), peril (Ps. 66:12; Isa. 43:2; Zec. 3:2; Jude 23; cf. Am. 4:11), personal disaster or decline of prosperity (Job 18:5; 20:26), adulterous activity (Job 31:12), and wickedness (Isa. 9:18) are likened to fire.

B. As a Judgment on Nations or Peoples. Israel is "on fire" (Isa. 42:25); Israel is compared to an olive tree on fire (Jer. 11:16), a vine on fire (Ps. 80:16 [MT 17]; Ezk. 15:4-7; 19:12-14), thorns on fire (Isa. 33:12). Jerusalem is a caldron on fire (Ezk. 24:10-12); Babylon will be burned as chaff (Isa. 47:14). In the NT, similar pictures are presented (eschatologically) of unbelievers (e.g., Mt. 3:12; 13:24-30, 37-42; Jn. 15:1-6) or of believers' works (1 Cor. 3:13ff.).

C. Of God. His jealous wrath (Zeph. 1:18; 3:8), His wrath (e.g., Ps. 89:46 [MT 47]; Jer. 4:4; Lam. 2:4; Ezk. 21:31), His tongue (Isa. 30:27), His words (e.g., Jer. 23:29), and His presence (Ps. 68:2 [MT 3]) can be described in terms of fire. The same metaphor extends to God's judgment (Ps. 11:6; 21:9 [MT 10]; 97:3; Isa. 30:30; Jer. 21:14; Lam. 2:3; Ezk. 20:47; Am. 7:4).

Perhaps the strongest metaphor is "God is a devouring fire" (Dt. 4:24; He. 12:29; cf. Ex. 24:17; Dt. 9:3; cf. also *TDOT*, I, 238f.) This statement seems to be added as a warning to the people about the seriousness of their covenant responsibilities.

III. Eschatological Fire.–Occasionally in the prophets and usually in the NT, fire is mentioned in an eschatological context. (For postbiblical Jewish literature, see *TDNT*, VI, 937ff.)

A. Final Judgment of the World. The fire of final judgment is mentioned frequently in the OT, especially in the prophetic literature (Isa. 66:15f.; Ezk. 38:22; 39:6; Zeph. 1:18; 3:8; Zec. 12:6; cf. Mal. 4:1 [MT 3:19]), and in the NT as well (2 Pet. 3:7, 10, 12; also Rev. 8:7f.; 9:17f.; 16:8; 18:8; 20:9).

B. Eternal Fire as Hell. The OT references to hell fire are rare and disputed (esp. Isa. 34:10; 66:24). It is this fire to which the NT most often refers: eternal fire (Mt. 18:8; 25:41; Jude 7); unquenchable fire (Mt. 3:12; Mk. 9:43; Lk. 3:17); hell of fire (Mt. 5:22; 18:9; for GEHENNA alone, cf. Mt. 5:29f.; 10:28; 23:15, 33; Mk. 9:43, 45, 47; Lk. 12:5; Jas. 3:6); the furnace of fire (Mt. 13:42, 50); lake of fire (Rev. 19:20; 20:10, 14f.; 21:8).

C. Fire as a Sign of the Day of the Lord. While by implication fiery judgment would signal the Day of the Lord, fire is explicitly mentioned as a sign in Joel 2:30 (MT 3:3). In apocalyptic imagery, the Lord and the Son of man are identifiable by their fire (e.g., Dnl. 7:9-11; 2 Thess. 1:7; Lk. 17:29f.; Rev. 1:14; 2:18; etc.).

As final eschatological victory has been anticipated in Christ, so also has been His judgment. Christ is introduced (Mt. 3:10f.; Lk. 3:16f.) as baptizing "with the Holy Spirit and with fire." "Fire" is sometimes seen as "purifying" to lessen its contrast to "Holy Spirit." But the contrast is intended, just as "wheat" is gathered to the granary and the "chaff" to the furnace. This baptism of fire is amplified in Lk. 12:49-51. Remarking that He came to cast fire upon the earth, Jesus continued to say that He must wait until His own baptism was accomplished. This was done at Calvary and the judgment thereby assured. Mk. 9:49 ("For every one will be salted with fire") is difficult but perhaps best explained from the OT sacrifice that was "salted" (Lev. 2:13; Ezk. 43:24). Each believer is a "sacrifice" to God, made suitable by the "fire" of self-imposed judgment (cf. Mk. 9:43f.) or perhaps of persecution.

FIRE, UNQUENCHABLE. *See* UNQUENCHABLE FIRE.

FIREBRAND. The RSV uses this term only twice and in the plural form. In Prov. 26:18 Heb. *ziqqîm*, "sparks" (NEB "darts"), describes fiery torches in the hands of a madman, while in Isa. 7:4 *'ûḏîm* (NEB "firewood") is used figuratively of angry men.

FIREPAN [Heb. *maḥtâ*] (Nu. 4:14; 1 K. 7:50; 2 K. 25:15; 2 Ch. 4:22; Jer. 52:19); AV also CENSER. A vessel for carrying coals. Brazen firepans were part of the furnishings of the altar of burnt offerings (Nu. 4:14). In 1 K. 7:50; 2 K. 25:15; 2 Ch. 4:22; Jer. 52:19 the firepans were apparently of gold and were used in conjunction with the golden candlestick to receive the burnt ends of the wicks. A similar firepan is described by the same term but rendered "censer" (Lev. 10:1; 16:12; Nu. 16:6, 17f., 37-39); this was used to carry the glowing coals upon which the incense was thrown and burned. *See also* CENSER.

FIRKIN fûr'kin. The AV translation of Gk. *metrētēs*, stone jars used for the Jewish rites of purification. The British firkin was one-fourth of a barrel. *See* GALLON; WEIGHTS AND MEASURES.

FIRM; FIRMLY; FIRMNESS [Heb. *ḥāzaq*–'be strong' (2 K. 14:5; 2 Ch. 25:3; piel, Isa. 33:23; hiphil, Dnl. 11:32); *kûn*–'be stable, secure' (niphal, 1 K. 2:12; 1 Ch. 16:30; Ps. 112:7; hiphil, Ps. 89:2 [MT 3]); *'āmaṣ*–'be strong' (piel, Job 4:4; Prov. 8:28; Isa. 35:3); *'āman*–'be lasting, sure' (niphal, Ps. 89:28, 37 [MT 29, 38]); *'ᵉmānâ*–'sure, firm' (Neh. 9:38 [MT 10:1]); *yāṣaḇ*–'stand' (hithpael, Ex. 14:13; niphal, Ps. 119:89); *yāṣaq*–'pour out, cast' (Job 41:23 [MT 15]); *ḥubbar lāh yāḥdāw*–'be bound firmly together' (Ps. 122:3); *nāṭaʿ*–'plant, infix' (Eccl. 12:11); *'āṯâ 'āṯōh*–'grasp firmly' (Isa. 22:17); *bᵉ'ēṯān*–'in perpetuity' (following *BH* emendation of MT *yittēn*, Prov. 12:12); Aram. *niṣbᵉṯā'*–'hardness' (Dnl. 2:41); Gk. *stēkō*–'stand firm, be resolute, steadfast' (1 Cor. 16:13; Phil. 1:27; 4:1; 2 Thess. 2:15); *stereós* –'solid, firm' (1 Pet. 5:9); *steréōma*–'solidity, steadfastness' (Col. 2:5); *hístēmi*–'stand firm' (2 Cor. 1:24; 2 Tim. 2:19), *antéchō*–'hold on to firmly' (Tit. 1:9); *bébaios* –'steadfast' (He. 3:14); *pistóō*–'be assured of' (2 Tim. 3:14)]; AV also CONFIRM(ED), ESTABLISH(ED), WELL, STRONG, etc.; NEB also FAITHFUL, FIX(ED), STEADFAST, SECURE, etc.

In the OT the psalmist states that God's covenant with David "will stand firm for him" (Ps. 89:28), which means that, as promised (cf. 2 S. 7:12-16), David's dynasty will be perpetual (cf. A. Weiser, *Psalms* [Eng. tr., *OTL*, 1962], pp. 592f.). In another psalm Yahweh's word is said to be "firmly fixed in the heavens" (Ps. 119:89), which perhaps means that the precepts, statutes, etc. about which the psalmist has been speaking (e.g., vv. 4f.) have (in the language of personification) their permanent residence with God in heaven. Alternatively, it may mean that these precepts, etc. are as enduring as the heavens (emending *baššāmayim* to *kaššāmayim;* so NAB; cf. W. O. E. Oesterley, *Psalms* [1939], p. 494), or that they are more stable than the heavens (M. Dahood, *Psalms*, III [*AB*, 1970], 183f., who posits a comparative meaning for the preposition *b*). In the line of a psalm that the Chronicler attributes to Asaph and his brothers it is said that "the world stands firm, never to be moved" (1 Ch. 16:30; cf. Ps. 96:10). This is perhaps a poetic reference to the ancient notion that the world was constructed upon and supported by pillars (cf., e.g., 1 S. 2:8; Ps. 75:3 [MT 4]). Wisdom (personified) says that she was there when Yahweh "made firm the skies above" (Prov. 8:28), which is probably a reference to the creation of the heavenly dome or firmament (L. I. J. Stadelmann, *Hebrew Conception of the World* [*Analecta Biblica*, 1970], p. 100).

In the NT Paul encourages the Corinthians to "stand firm in [their] faith" (1 Cor. 16:13; cf. 2 Cor. 1:24), which means to maintain a persistent attitude of belief and obedience to the Lord and to the teachings/traditions delivered to them by Paul and his representatives (cf. 2 Thess. 2:15). He tells the Colossians of his joy "to see...the firmness of [their] faith in Christ" (2:5). This use of *steréōma*, "firmness," may contain an allusion to the Gnostic *steréōma*, which was the solid barrier between the upper and lower realms (H. Chadwick, *NTS*, 1 [1954/55], 272f.).

Bibliography.–*TDNT*, VI, *s.v.* πιστεύω κτλ. (Bultmann, Weiser); στερεός κτλ. (Bertram); *TDOT*, I, *s.v.* "'āman" (Jepsen).

J. E. H.

FIRMAMENT [Heb. *rāqîʿ(a)*] (NEB VAULT, VAULT OF HEAVEN). The expanse of the atmosphere or sky. This term is derived from *firmamentum*, the Vulg. rendering of the LXX *steréōma*. Although in classical Greek the latter denoted something solid, or a firm structure such as a foundation, its LXX usage was of the open sky, or the expanse stretching above the earth. This curious divergence of meaning is matched by the difficulty in translating the original Hebrew term *rāqîʿ(a)*. It is a cognate form of the verb *rqʿ*, "spread out" (Ps. 136:6; Isa. 42:5; 44:24), or "beat out" (Ex. 39:3; Nu. 17:4), the former usage referring to the expanse of the heavens at creation, and the latter to the beating out of metal into thin plates or sheets.

In Job 37:18 the existence of the vault of heaven is attributed to God's spreading it out, "hard as a molten mirror." From this poetic allusion some writers have assumed the existence of a primitive cosmology in which the universe was formed as a hollow, beaten-out sphere, using the analogy of the "brassy heaven" of Homer. A concept of this kind was never part of Greek cosmology, however, which like its Babylonian and Egyptian counter-

parts conceived of water encircling the cosmos both above and below it. Even Homer spoke of an all-encompassing river, Oceanus, which surrounded the universe (cf. *Iliad* xviii. 483-85; xxi. 194-97). The suggestion by T. H. Gaster (*IDB*, II, 270) that in Job 26:13 the sweep of the winds across the sky represented God breathing on the hard metallic surface of the firmament in order to polish it seems to overemphasize the poetic imagery of what is only a basic process of atmospheric self-renewal.

In Gen. 1:6 the firmament comprised an expanse that penetrated the mass of water vapor covering the earth and divided it into lower (or terrestrial) and upper (or atmospheric) levels. The expanse that was formed by the lifting of the water vapor constituted the atmosphere, which stretched around the earth and made possible the existence of subsequent plant and animal life. In Gen. 1:8, the expanse was given the name "heaven" (*šāmayim*), a better translation of which would be "sky" (cf. Ps. 85:11 [MT 12]; Prov. 30:19).

The word firmament occurs only in the OT, and always within the context of creation, of which the nine occurrences in Gen. 1 are representative. In Ps. 19:1 (MT 2) the sky and the firmament are parallel and synonymous terms used to symbolize the unanimity with which cosmic creation adulates its Creator. The brightness of the ethereal expanse above the earth was alluded to in Dnl. 12:3, when in the eschatological disclosure the wise were to shine like the brightness of the firmament. In certain OT passages the firmament was conceived of as God's sanctuary (Ps. 150:1) in which man could offer Him praise, or as forming the foundation of a celestial throne room (Ezk. 1:26) which contained the likeness of God's glory. In this passage the imagery is highly pictorial in nature, but it still manages to preserve, and even enhance, the general concept of brightness associated with the firmament by describing it as "shining like crystal" (Ezk. 1:22). The relationship of the firmament to the concept of heaven can be clarified if the firmament is identified with the troposphere, and then by thinking of the celestial heavens either as a topographic dimension beyond the firmament itself, or as the designated abode of God (cf. Ps. 33:13f.; Isa. 63:15; Lk. 16:9). R. K. H.

FIRST. The most common words for "first" are Heb. *ri'šôn, 'eḥād,* and Gk. *prôtos, prôton.* Other words include Heb. *rē'šîṯ*–'beginning' (Nu. 15:20; 24:20; Neh. 10:37 [MT 38]; Am. 6:1); AV also FIRSTFRUITS, CHIEF; *qeḏem*–'in front,' 'before,' 'aforetime' (Prov. 8:22); AV, NEB, BEFORE; *rō'š*–'head,' 'top,' 'chief' (Prov. 8:23, 26); AV BEGINNING, HIGHEST PART; NEB BEGINNING; and Gk. *próteron*–'formerly' (2 Cor. 1:15; Gal. 4:13); AV BEFORE; *mía*–'one' (Mt. 28:1 par.; Rev. 9:12); AV also ONE; *archḗ*–'beginning,' 'ruler,' 'rule' (Jn. 2:11; 6:64; He. 2:3; 5:12); AV also BEGINNING; NEB also "all along."

Hebrew *ri'šôn* and *rē'šîṯ* differ in that the former generally means "first in order" (e.g., in a series), and (along with *'eḥāḏ*–'one') is thus always the word used in temporal references (cf. Gen. 8:5; Ex. 40:2; Nu. 9:1), whereas the latter means "first in importance," "choicest," "best," and thus can mean FIRST FRUITS. Thus, Moses is commanded to cut two tablets of stone like the first ones (*ri'šōnîm*) that he had broken (Ex. 34:1, 4; cf. also Gen. 25:25), and Israel is called the "first [i.e., "best," "choicest," *rē'šîṯ*] of the nations" (Am. 6:1; cf. also Nu. 24:20, "Amalek was the first of the nations"). "At the first" (Gen. 13:4; Neh. 7:5; Isa. 1:26; 52:4) translates *bāri'šōnâ.*

Greek *prôtos* can mean both first in order and first in rank. As "first in order," Acts 1:1 refers to the Gospel of Luke as the "first book," Paul speaks of his "first defense" (2 Tim. 4:16), and He. 9:1, 15, 18, etc., discuss the "first covenant." Likewise, Christ is called the "first to rise from the dead" (Acts 26:23), and He designates Himself "the first and the last" (Rev. 1:17; 2:8; 22:13), the same title which Yahweh gives to Himself in Isa. 44:6; 48:12 (Heb. *ri'šôn 'aḥ^{a}rôn*). Examples of *prôtos* in the sense of "first in rank," "most important" are: Mt. 22:38, where Jesus calls the commandment to love God with one's whole being "the great and first commandment" (cf. Mk. 12:28f.); Mt. 20:27, "whoever would be first among you must be your slave" (cf. Mt. 19:30; 20:16 par.); and 1 Tim. 1:15, where Paul calls himself the "foremost of sinners." *En prôtois* ("among the first, most important things") in 1 Cor. 15:3 is translated "as of first importance." The adverbial form *prôton* has this twofold meaning, too, e.g., Mt. 13:30, "gather the weeds first"; Mt. 6:33, "But seek first [i.e., above all, especially] his kingdom"). Other NT words translated with "first" are *phthánō* (2 Cor. 10:14) and *prophthánō* (Mt. 17:25), meaning "come before," "precede"; *proelpízō,* "be the first to hope" (Eph. 1:12); and *philoprōteúō,* "wish to be first" (3 Jn. 9). "When we first believed" in Rom. 13:11 translates *hóte episteúsamen,* the aorist tense being understood in an inchoative sense. Christ's reply to the request that some of His disciples be first (i.e., the most important ones) in the kingdom of God is fitting: "whoever would be first . . . must be [a] slave" (Mt. 20:27; cf. Mt. 19:30 par.). Among believers preeminence becomes service.

For "first principles" in He. 5:12 *see* PRINCIPLES; for "first and second Adam," *see* ADAM (NT) III.

FIRST FRUITS [Heb. *bikkûrîm, rē'šîṯ*; Gk. *aparchḗ*]. In acknowledgment of the fact that the land and all its products were the gift of Yahweh to Israel, and in thankfulness for His bounty, all the first fruits were offered to Him. These were offered in their natural state (e.g., cereals, tree fruits, grapes), or after preparation (e.g., musk, oil, flour, dough), after which the Israelites were at liberty to use the rest (Ex. 23:19; Nu. 15:20; 18:12; Dt. 26:2; Neh. 10:35, 37). No absolute distinction can be made between *rē'šîṯ* and *bikkûrîm,* but *rē'šîṯ* seems generally to mean what is prepared by human labor, and *bikkûrîm* the direct product of nature. The phrase "the first of the first fruits" (Ex. 23:19; 34:26; Ezk. 44:30, Heb. *rē'šîṯ bikkûrē'*) is not quite clear. It may mean the first ripe or the choicest of the first fruits. The *rē'šîṯ* offerings were individual, except that a *rē'šîṯ* of dough was to be offered as a heave offering (Nu. 15:17-21). The priest waved a *rē'šîṯ* of corn before the Lord on the morrow after the sabbath in the week of unleavened bread (Lev. 23:9-11). These offerings were given to the priests (Nu. 18:12). *Bikkûrîm* refers specially to things sown (Ex. 23:16; Lev. 2:14). At the Feast of Weeks, seven weeks after the offering of the sheaf, *bikkûrîm* of corn in the ear, parched with fire and bruised, were brought to the house of the Lord as a meal offering (Ex. 34:22–26; Lev. 2:14–16). The *bikkûrîm* also were meant for the priest, except a portion that was burned as a memorial (Lev. 2:8–10, 16). The beautiful ceremony of the offering of the *rē'šîṯ* in the house of God is described in Dt. 26:1–11 and is enlarged upon in the Talmud (Mish. *Bikkurim* iii.2). According to the Talmud (Mish. *Terumoth* iv.3) a sixtieth part of the first fruits in a prepared form was the minimum that could be offered; the more generous brought a fortieth part, and even a thirtieth. The fruits of newly planted trees were not to be gathered during the first three years; the fruits

of the fourth year were consecrated to Yahweh and from the fifth year the fruits belonged to the owner of the trees (Lev. 19:23-25). According to Mish. *Orlah* i.10, even the shells of nuts and pomegranates could not be used during the first three years as coloring matter or for the lighting of fires. It is held by some scholars that the institution of the tithe is a later development from the first fruits (but *see* TITHE).

In Jer. 2:3 Israel is called "the first fruits of his harvest." In the NT *aparchḗ* is applied figuratively to the first convert(s) in a particular place (Rom. 16:5; 1 Cor. 16:15); to the Christians of that age (Jas. 1:18; 2 Thess. 2:13), and to the 144,000 in heaven (Rev. 14:4); to Christ, as the first who rose from the dead (1 Cor. 15:20, 23); as well as to the blessings which we receive now through the Spirit, the earnest of greater blessings to come (Rom. 8:23).

P. LEVERTOFF

FIRST-BEGOTTEN. *See* FIRST-BORN.

FIRST-BORN; FIRSTLING [Heb. *bᵉḵōr*; Gk. *prōtótokos*]. The Hebrew word denotes the first-born of human beings as well as of animals (Ex. 11:5), while a word from the same root denotes first fruits (Ex. 23:16).

Some of the early Semitic tribes believed that the first-born belonged to the deity and had to be offered up sacrificially. Child burials uncovered at some Palestinian sites have been interpreted occasionally as the remains of such sacrifices, but direct evidence for this supposition, associated with Megiddo, Jericho, and elsewhere, is lacking. Thus the narrative of the Moabite war records that Mesha sacrificed the heir to the throne to Chemosh, the national god (2 K. 3:27). This barbarous custom must have become extinct at an early period in the religion of Israel (Gen. 22:12). It was probably due to the influence of surrounding nations that the cruel practice was revived toward the close of the monarchical period (2 K. 16:3; 17:17; 21:6; Jer. 7:31; Ezk. 16:20; 23:37; Mic. 6:7).

Already in the patriarchal period a ram was deemed an acceptable sacrificial substitute for the first-born (Gen. 22:13), but at the time of the EXODUS God renewed His claim to the first-born of humans and animals (Ex. 13:1-16). Since heathen practices involving child sacrifice were abhorrent to God, the first-born child was redeemed while corresponding animals were offered as a sacrificial offering. But even the firstling of an ass could be redeemed through the sacrifice of a kid. A special degree of sanctity was accorded to first-born male animals, and certain prohibitions were attached to them (Dt. 15:19).

The regulations governing the first-born were given spiritual significance by being connected with the miraculous departure of the Israelites from Egypt, and with the enactments concerning the Feast of Unleavened Bread (Ex. 13:1-10). It was also made incumbent upon the Israelites to observe these prescriptions once they were in sedentary occupation of the Promised Land (Ex. 13:11), as a reminder of God's saving power and also as a safeguard against the influence of heathen customs.

In the wilderness period there was instituted the practice of consecrating the Levites for service in the Lord's sanctuary as a substitute for the offering of the first-born (Nu. 3:11-13, 45). On the thirtieth day after birth the first-born was brought to the priest by the father, who paid five shekels for the child's redemption from service in the temple (cf. Lk. 2:27; Mish. *Berakoth* viii.8).

The first-born possessed definite privileges which were denied to other members of the family. The Law forbade the disinheriting of the first-born (Dt. 21:15-17). Such legislation, in polygamous times, was necessary to prevent a favorite wife from exercising undue influence over her husband in distributing his property, as in the case of Jacob (Gen. 25:23). The oldest son's share was twice as large as that of any other son. When Elisha prayed for a double portion of Elijah's spirit, he simply wished to be considered the first-born, i.e., the successor, of the dying prophet. Israel was Yahweh's first-born (Ex. 4:22; cf. Jer. 31:9 [Ephraim]). Israel, as compared with other nations, was entitled to special privileges. She occupied a unique position in virtue of the special relationship between Yahweh and the nation. In three passages (Rom. 8:29; Col. 1:15; He. 1:6), Jesus Christ is the first-born — among many brethren (Rom. 8:29) — of every creature (Col. 1:16).

It is important that the relationship between Jesus as first-born of Mary (Mt. 1:25; Lk. 2:7) and as the first-born of all creation (Col. 1:15) be understood correctly. The incarnate Christ is still truly God, while as "first-born" Jesus exercises complete preeminence over all created things. As first-born from the dead (Rev. 1:5) Christ demonstrates His power over death and the grave and initiates the new life in which all believers rejoice. The "assembly of the first-born" (Heb. 12:23) represents the corpus of those who have died in the Christian faith and are in the nearer presence of God. Because the believer is "in Christ," he shares the privileges of Christ's own relationship to God as first-born. A messianic interpretation of the term may also be derived from Ps. 89:27, in which the Davidic ruler is described as the Lord's first-born.

FIRSTLING. *See* FIRST-BORN.

FISH [Heb. *dāg, dāgâ, dā'ḡ*; Gk. *ichthýs, ichthýdion, opsárion, prospházion*].

Fishes abound in the inland waters of Palestine as well as in the Mediterranean. They are often mentioned or indirectly referred to both in the OT and in the NT, but it is remarkable that no particular kind is distinguished by name. In Lev. 11:9-12 and Dt. 14:9f. "whatever has fins and scales" is declared clean, while all that "have [not] fins and scales" are forbidden. This excluded not only reptiles and amphibians, but also, among fishes, siluroids and eels, sharks, rays, and lampreys.

The most remarkable feature of the fish fauna of the Jordan Valley is its relationship to that of the Nile and East Central Africa. Two Nile fishes, *Chromis nilotica*

Coptic stone relief (4th cent. A.D.) of fish and cross, two symbols of Christianity (Louvre)

Hasselquist, and *Clarias macracanthus* Gunth.. are found in the Jordan Valley, and a number of other species found only in the Jordan Valley belong to genera (*Chromis* and *Hemichromis*) that are otherwise exclusively African. This seems to indicate that at some time, probably in the early Tertiary, there was some connection between the Palestinian and African river systems. No fish can live in the Dead Sea, and many perish after being carried down by the swift currents of the Jordan and other streams. There are, however, several kinds of small fish which live in salt springs on the borders of the Dead Sea. *Capoëta damascena* Cuv. and Val., a common fish of Syria and Palestine, also finds its way occasionally to the approaches of the Dead Sea.

There are three main varieties of fish in the Sea of Galilee, comprising *Cichlidae,* which include the Tilapia or "St. Peter's fish"; the *Cyprinidae* or carp family, ranging from the Barbel species to the small lake "sardine"; and the *Siluridae* or catfish. Not indigenous to the Sea in Bible times, but of comparatively recent introduction, is the Gray Mullet (*Mugil cephalus*).

Fishes are mentioned indiscriminately in Scripture, and aside from being recognized as "clean" or "unclean" according to the Mosaic law there seems to have been no other form of differentiation or attempt at classification (cf. Gen. 1:26; 9:2; Nu. 11:22; Dt. 4:18; 1 K. 4:33; etc.).

Figuratively, the fish "declare" that God punished Job (12:8). That so many of Our Lord's disciples were fishermen lends a profound interest to their profession. Christ tells Simon and Andrew (Mt. 4:19 par.) that He will make them fishers of men (cf. W. H. Wuellner, *Meaning of "Fishers of Men"* [1967]). The kingdom of heaven (Mt. 13:47) is likened to a net that was cast into the sea. When it was filled, men gathered the good into vessels, but the bad they threw away. Such sorting processes are still common among fishermen in Galilee and elsewhere. In Jer. 16:16 God promised that foreign peoples would drag the apostate inhabitants of Judah out of their hiding places as a fisherman plucks a fish from the depths of the waters. Then they would be punished the way that freshly caught fish were treated, namely, by having sticks placed through their gills ready for being carried away (cf. Job 41:2).

In the vision of Ezekiel (47:9f.), the multitude of fish and the nets spread from En-gedi to En-eglaim are marks of the marvelous change wrought in the Dead Sea by the stream issuing from the temple. The same sign, i.e., of the spreading of nets (Ezk. 26:5, 14), marks the desolation of Tyre. It is a piece of broiled fish that the risen Lord eats with the Eleven in Jerusalem (Lk. 24:42), and by the Sea of Galilee (Jn. 21:13) He gives the disciples bread and fish. By NT times there was a thriving trade in fish caught in the Mediterranean and brought to ports such as Tyre and Sidon. The fish was preserved in salt and brought to Jerusalem, where some of it was sold at a specially named "Fish Gate" in the city (*see* JERUSALEM).

For the "great fish" in Jonah, *see* JONAH. A. E. DAY

FISH GATE. *See* JERUSALEM.

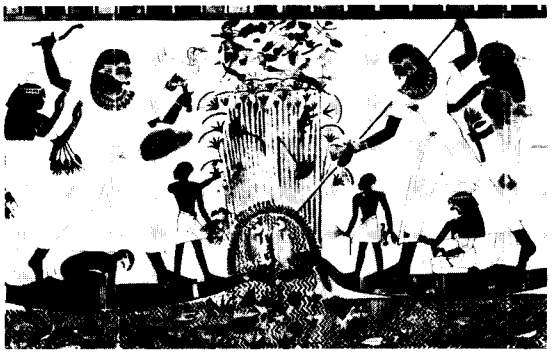
FISHER; FISHERMAN [Heb. *dawwāg* (Jer. 16:16; Ezk. 47:10), *dayyāg* (Isa. 19:8); Gk. *halieús*]. Although the Bible makes few references to fishermen, these men and their vocation are brought into prominence by Jesus' call to certain Galilean fishermen to become His disciples (Mt. 4:18f. par.). Fishermen, then as now, formed a distinct class. The strenuousness of the work (Lk. 5:2-5) ruled out the weak and indolent. They were crude in manner, rough in speech and in their treatment of others (Lk. 9:49, 54; Jn. 18:10). James and John before they became tempered by Jesus' influence were nicknamed the "sons of thunder" (Mk. 3:17). The fishermen's exposure to all kinds of weather made them hardy and fearless. They were accustomed to bear with patience many trying circumstances. They often toiled for hours without success; yet they were always ready to try once more (Lk. 5:5; Jn. 21:3). Such men, when impelled by the same spirit as filled their Master, became indeed "fishers of men" (Mt. 4:19; Mk. 1:17; cf. Lk. 5:10). J. A. PATCH

FISHER'S COAT. This expression is found in the AV of Jn. 21:7 where the RSV has "clothes" and the NEB "coat." John here, after representing Peter as "naked" (Gk. *gymnós*), pictures him as girding on his "coat" (*ependýtēs*), literally "outer garment," and not specifically a "fisher's coat." *See* COAT; GARMENTS.

FISHHOOK [Heb. *sîr dûgâ*] (Am. 4:2); NEB FISH-BASKET; [*ḥakkâ*] (Job 41:1 [MT 40:25]); AV HOOK; NEB GAFF. The ancient Hebrews appear to have fished in order to feed themselves rather than for sport, and thus the net was preferred to the hook, which caught only one fish at a time. Reliefs from Egypt and Assyria depict individual fishermen catching fish by means of a fishhook, and the antiquity of the device is indicated by the presence of bone fishhooks at Natufian levels. Iron hooks from the Solomonic period have been found at Ezion-geber. The use by Amos of *sîr* might indicate that the original fishhook in Israel was a curved thorn. In Hebrew tradition the hook and line were familiar objects (cf. Isa. 19:8); but there is no mention of fishing rods, since these do not appear to have been used significantly in the ancient Near East. R. K. H.

An Assyrian, with a basket holding his catch on his back, fishes with a line in a mountain pool. Gypsum relief (7th cent. B.C.) from Kuyunjik (Nineveh) (Trustees of the British Museum)

FISHING. In the OT fishing is rarely mentioned and did not play an important role in economic life. The Mediterranean Sea was full of fish (Ezk. 47:10), but its shores were occupied by the Philistines and Phoenicians. The Dead Sea had no fish (cf. Ezk. 47:9f. to the contrary). The river Jordan and its main tributaries had some fish, but not enough for any considerable part of the population to live on. The Baḥret el-Kheit (the northernmost lake formed by the river Jordan) was called Semechonitis in Josephus' time and Samko in the Palestinian Talmud and therefore must have been a fishing place (cf. Arab. *samak*,



Fishing and fowling in the marshes. At right a man spears a fish. Painting of mural in tomb of Menna (18th Dynasty, 15th cent. B.C.) at Thebes (Oriental Institute, University of Chicago)

"fish"). Finally, there was Lake Tiberias, whose abundance of fish is mentioned only in the NT.

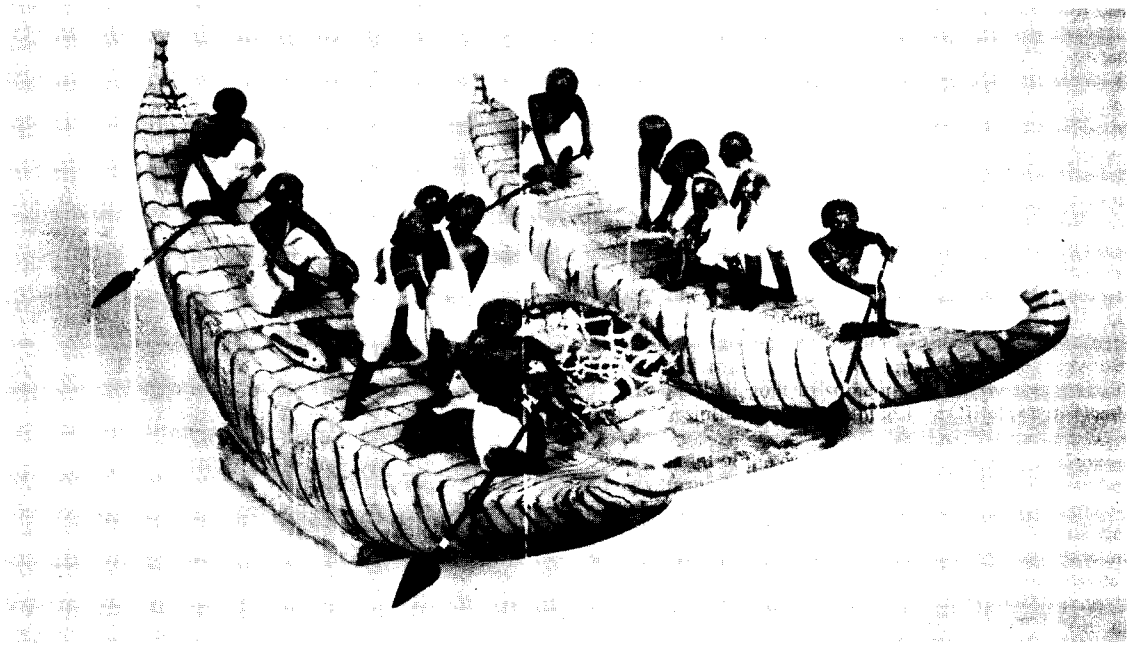
In most instances where fishing is mentioned in the OT, the reference is to countries outside Palestine, especially Egypt (cf. Nu. 11:5) and Phoenicia, which sent dried salted fish to Jerusalem (Neh. 13:16; cf. Zeph. 1:10). Fishing as a trade is mentioned in Isa. 19:8 (Egypt); Jer. 16:16 (metaphor for foreigners); and Ezk. 47:10 (in an ideal future). Lev. 11:9-12 and Dt. 14:9f. draw a line between inhabitants of the water that may be eaten and those that may not (*see* FISH).

Fish were caught in three ways: (1) by hook (without a rod), Heb *ḥakkâ* (Isa. 19:8; Hab. 1:15; Job 41:1 [MT 40:25]), *sîrâ* (Am. 4:2), and *ḥāḥ* (Ezk. 29:4) or *ḥô(a)ḥ* (Job 41:2 [MT 40:26], perhaps rather a thorn put through the branchiae to carry the fish home; bronze hooks found in Tell el-ʿAjjûl look like modern ones); (2) by a fish spear or harpoon, frequently used in Egypt, Heb. *ṣilṣāl* and *ṣukkâ* (Job 41:7 [MT 40:31]); (3) by nets. *Meṣôḏâ* seems to be a general word for a "catching" net (Eccl. 9:12); *reše<u>t</u>*, otherwise a hunting net, is mentioned in Ezk. 32:3 as a means to catch a sea monster; *mikmere<u>t</u>* (Hab. 1:15f.) or *mikmōre<u>t</u>* (Isa. 19:8) is a net cast from the shore, which falls flat on the water and sinks by means of leaden weights; *ḥerem* is a seine, leaded on one edge and provided with floats on the other; it is payed out from boats and gradually drawn in to the shore (Ezk. 26:5, 14; 32:3; Hab. 1:15-17). Most words used in connection with fishing are also familiar from hunting vocabulary.

In the NT, especially the Gospels, fishing as a trade is frequently mentioned. This is quite different from the OT and is probably the result of the shifting of the main scene from Judea to Galilee. There were several important centers of fishing and fish industry along the shore of Lake Tiberias, as attested by the names Bethsaida ("house of fishing"), Magdala (Migdal Nūnayā, "bulwark of the fishes"), and Tarichaea ("salting installation for fish," the Greek name of Magdala). Fish was a common dish, not only in Galilee (Mt. 7:10; 14:17 par.; 15:34 par.; Jn. 21:9) but also in Jerusalem (Lk. 24:42). Several of the disciples of Jesus were fishermen (Gk. *halieús*, Mt. 4:18 par.; Lk. 5:2), and after His resurrection Jesus appeared to seven of them while they were fishing (Jn. 21:2).

As in the OT, fishing is done with the help of a hook without rod (Gk. *ánkistron*, Mt. 17:27), with a net cast from the shore (*amphíblēstron*, Mt. 4:18 par.), and with nets payed out from boats. Here the NT distinguishes between the *sagḗnē* (Mt. 13:47), the seine, which is only a few feet high and is cast out in shallow water, and the *díktyon*, also a seine but six or more feet high (Mt. 4:20f. par.; Lk. 5:1-8; Jn. 21:1-11). This last net was not normally pulled to the shore, as the seine was, but was lifted into the ships (Lk. 5:7; Jn. 21:8 is an exception). One of the fishermen had to be ready to dive if the net should be caught on the rocks of the sea bottom (Jn. 21:7). The harpoon or fish spear is not mentioned in the NT. As the steering oar of the boats was on the right side, the *díktyon* was pushed out over the left board, lest it should be caught by the end of the steering oar. The command "Cast the net on the right side of the ship" (Jn. 21:6) required something quite unusual.

Egyptian funerary models made of papyrus (9th Dynasty): fishing boats and fish being caught in a net (Metropolitan Museum of Art, photograph by Egyptian Expedition)



Fishermen were the owners of their own ships, took hirelings into their service, and sometimes joined together to form companies (Mk. 1:20; Lk. 5:7). One should, therefore, regard the disciples as members of the lower middle class rather than a very low social class.

See also FISH.

FISHPOOLS (Cant. 7:4, AV). This is a mistranslation. The Heb. *bᵉrēḵôṯ* simply means "pools" (RSV); "fish" is quite unwarrantably introduced in the AV. In Isa. 19:10, again, instead of "all that make sluices and ponds for fish" (AV), one should read with the RSV, "All who work for hire will be grieved."

FIST. *See* GESTURE; HAND.

FIT. The Hebrew phrase *ʿēzer kᵉnegdô* in Gen. 2:18, 20 is translated "a helper fit for him" (AV "help meet for him"; NEB "partner for him"). Literally the expression means "a helper according to what is in front of him," i.e., "corresponding to him," "his complement."

In 2 K. 10:3 the Hebrew adjective *yāšār*, "straight, right," "just, upright," is used in the superlative degree in a discussion of throne succession to refer to the "fittest of your master's sons" (AV "meetest"; NEB "most suitable"), i.e., the "most right" for the job. *See also* RIGHT.

Hebrew *yāpeh*, "fair, beautiful," most commonly an attribute of women, is used in Eccl. 5:18 (MT 17) in evaluating certain actions as behavior that is good and "fitting" (AV "comely"; NEB "proper"). Also having reference to appropriate behavior is Aram. *ʾᵃrîḵ*, "fitting, proper," in Ezr. 4:14 (AV "meet"; NEB "right"). *See also* PROPER.

In Prov. 25:11 praise is given for a word that is "fitly spoken" (NEB "spoken in season"). The sense of the Heb. *ʿal-ʾopnāw* is usually understood as "(spoken) at its times" or "in its circumstances," i.e., "appropriately." This meaning, however, is not at all certain, for **ʾôpen* is a hapax legomenon in the OT. The term has traditionally been associated with the more common *ʾôpan*, "wheel," and thus, supposedly, denoting "circumstance" as an abstraction from the root sense of "turning" (see BDB, p. 67). The suggestion has been made that the vowels have been mispointed and that the form should rather be *ʾōpannāw* (dual of *ʾôpan*, "wheel"). The underlying hypothesis is that the dual of "wheel" may have served as a technical term in wisdom poetry referring to the two balancing halves of a wisdom sentence, and that in the context of Prov. 25:11 it would mean "a compact elegance of expression" (see KoB, p. 78, and W. McKane, *Proverbs* [*OTL*, 1970], p. 584). Another etymological proposal relates this word to Arab. *fannu(n)*, "manner, mode" with the sense "at the right moment" (see KoB, p. 78).

In Cant. 5:12 the bride alludes figuratively to the eyes of her lover: "His eyes are like doves/beside springs of water,/bathed in milk,/fitly set." The phrase "fitly set" (NEB "they sit where it [water] is drawn") is an attempt to render the obscure Heb. *yōšᵉḇôṯ ʿal-millēʾṯ*. The first part of the phrase is clear — the feminine plural participle, "those sitting," having reference to the doves. The second part is not so clear. The RSV "fitly" follows the AV "fitly set" and likewise assumes that this final phrase alludes to the setting of jewelry. This is suggested naturally by the fact that two Hebrew substantives, *millūʾâ* (cf. Ex. 28:17) and *millû'* (cf. Ex. 25:7), both very similar to the obscure hapax legomenon *millēʾṯ*, are used in the OT to designate the setting of jewels. In this light the phrase *yōšᵉḇôṯ ʿal-millēʾṯ* is construed as a redundancy — "sitting as a setting," i.e., "fitly set" (see BDB, p. 571).

But in view of the consistency of the imagery of bright-plumed birds sitting beside the shining milky waters (the irises and whites of the eyes), such an unexpected change at the very end of the verse to allude to jewelry is viewed with suspicion by some scholars. What is expected is a noun denoting "pool" or "watering place." Emendation has been proposed (see, e.g., KoB, p. 527; A. Harper, *Song of Solomon* [*CBSC*, 1902], pp. 39f.), but without confidence or success. Strong support for understanding *millēʾṯ* to mean "watering place," "water-filling place" comes from the Jewish Aramaic term *mlyṯ*, "watering place, place where water is drawn" (cf. LXX "sitting by pools [*plērōmata*]"; see E. Y. Kutscher, *SVT*, 16, 170 ["Schöpfstelle"]; R. Gordis, *Song of Songs* [1954], p. 90).

The Hebrew verb *šālaḇ*, "be bound, joined," occurs only twice in the OT. In both instances it appears as a pual (passive) participle, *mᵉšullāḇôṯ*, and has reference to the twin tenons in each frame of the tabernacle that are used "for fitting together" (Ex. 26:17; AV "set in order"; NEB "joined"; Ex. 36:22; AV "equally distant"; NEB "joined").

The Hebrew verb *kûn*, "be firm," appears in an intensive form (polel, "make firm, set up") in Ps. 11:2 with reference to the fitting of arrows to the taut bowstring: "they have fitted their arrow to the string" (AV "made ready"). The expression "fit for war" appears three times in the OT: in 2 K. 24:16 for *ʿōśê milḥāmâ* (lit. "makers of warfare"; AV "apt for war"; NEB "skilled armorers"), and in 2 Ch. 25:5; 26:11 for *yôṣᵉʾê ṣāḇā'* (lit. "those who go out to battle"; AV "able to go forth to war," "that went out to war"; NEB "ready for service"). These expressions denote warriors or soldiers who have been trained in the martial arts and are thus ready for battle (see also J. Greenfield, *Bibl.*, 45 [1964], 527-534).

Greek *eúthetos* (lit. "well-placed"), "fit, useful," has the sense "prepared, suitable (for the kingdom)" in Lk. 9:62. In Lk. 14:35 unsavory salt is said not to be fit for anything (cf. NEB "useless").

The Greek verb *prépō*, "be suitable," is translated four times in the NT as "fitting." In Mt. 3:15 Jesus replies to John that "it is fitting for us to fulfil all righteousness" (i.e., "appropriate" or "necessary"). The sense of appropriateness is also implied in the other occurrences: among believers immorality and covetousness are not "fitting" (Eph. 5:3); it was appropriate for God to make Christ the perfect pioneer of human salvation (He. 2:10), who fulfils the role of high priest (He. 7:26). Elsewhere Gk. *prépō* is applied to the behavior of women ("befits"; 1 Tim. 2:10), or to doctrine ("befits," Tit. 2:1).

The Greek verb *anḗkō*, whose primary sense is "refer, relate, belong to (something)," also has a secondary meaning in the NT — "be suitable, proper, fitting." In Col. 3:18 wives are urged to be subject to their husbands "as is fitting in the Lord," and in Eph. 5:4 filthy or silly talk is said not to be "fitting."

The Greek adjective *áxios*, "worthy, comparable," when used without a particular referent, as in 2 Thess. 1:3, has the meaning "(it is) worthwhile, fitting." The noun *chreía* usually has the sense "need, lack, necessity" (cf. the cognate *chráomai*, "use, make use of"). In a context of admonition about evil talk, it appears in the phrase *prós oikodomḗn tḗs chreías*, "for edifying, as fits the occasion" (Eph. 4:29; AV "to the use of edifying"; NEB "helpful to the occasion"), meaning the kind

of talking that serves to build up "where it is necessary" (see Bauer, rev., p. 885).

At the end of the parable of the prodigal son the father responds to the eldest son's complaints with the advice, "It was fitting [Gk. *deí*, "is necessary"] to make merry" (Lk. 15:32). Here, as elsewhere, Gk. *deí* has the sense that whatever happened "had to happen" (e.g., Lk. 22:7; Acts 1:16).

The verb *dokimázō*, which commonly has the meaning "test, accept as tested, approve," is sometimes used with a following infinitive to mean "intend, wish (to)" (e.g., "see fit to," Rom. 1:28).

See also BECOME. D. G. BURKE

FITCHES. *Nigella sativa* L., an annual of the buttercup family, popularly named "nutmeg-flower," mentioned only in the AV (Isa. 28:25, 27; Ezk. 4:9). The seeds were used as a condiment in antiquity, having aromatic and carminative properties. As with other plants that yield their seed easily, the seeds were beaten out with rods. The contrast between the stouter staff for "fitches" and the lighter one for cummin is the more notable because of the similarity between the two kinds of seed.

See DILL; SPELT.

See *MPB*, pp. 152f. R. K. H.

FIVE [Heb. *ḥāmēš*; Gk. *pénte*]. *See* NUMBER.

FIVE SCROLLS. A designation of Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. *See* CANON OF THE OT I.C.

FLAG. *See* REED (Job 8:11; Ex. 2:3, 5); RUSH (Isa. 19:6).

FLAGON [Heb. *nēḇel*] (Isa. 22:24); NEB POT; [*qaśwâ*] (Ex. 25:29; 37:16; Nu. 4:7); AV COVER. A large pitcher or jug, which in the tabernacle rituals was the container from which the drink offerings were poured out.

In 2 S. 6:19; 1 Ch. 16:3; Cant. 2:5; Hos. 3:1 the AV mistranslates *ʾᵃšîšâ* as "flagon." In all these passages the RSV correctly translates "raisins" or "cake of raisins."

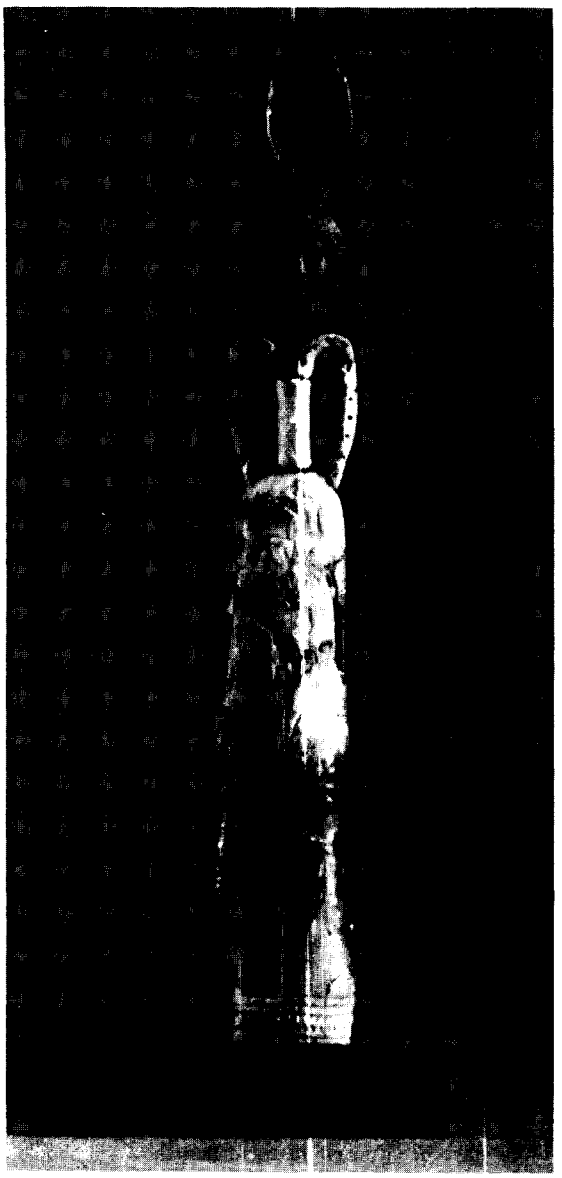
FLAGSTAFF. *See* STANDARD.

FLAME. In the OT "flame" usually translates Heb. *lahaḇ* or a form from the same root. Other terms are *labbâ* (Ex. 3:2), *lāhaṭ* ("burn, scorch," Gen. 3:24; Ps. 104:4). Aram. *šᵉḇîḇ* in Dnl. 3:22 refers to an already burning fire bursting into flames (cf. "fiery flames" in 7:9). In Ps. 83:14 (MT 15); Isa. 5:24; 10:17, the imagery of flames is a symbol of divine wrath.

In the NT "flame" renders Gk. *phlóx* (Lk. 16:24; Acts 7:30; He. 1:7; etc.). In Revelation flames are used figuratively to describe the eyes of the glorified Christ (1:14; 2:18; 19:12).

FLASK [Heb. *paḵ*] (2 K. 9:1, 3); AV BOX; [*baqbuq*] (Jer. 19:1, 10); AV BOTTLE; NEB JAR; [Gk. *aggeíon*] (Mt. 25:4); AV VESSEL; [*alábastron*] (Lk. 7:37); AV ALABASTER BOX. The *paḵ* was a small perfume jug, while the *baqbuq* was a container for water and other liquids found in the wealthier homes. The *aggeíon* carried by the wise virgins was a small oil jug. The flask of perfume used by Mary (cf. Jn. 12:3) to anoint Jesus' feet is called an *alábastron* (cf. "alabaster jar," Mt. 26:7; Mk. 14:3). This was a jar with a long neck that was broken when the ointment was about to be used. *See* Plate 28.

FLAT CAKES [Heb. *ḥᵃḇittîm*] (1 Ch. 9:31); AV "things that were made in the pans"; NEB WAFERS. *See* BREAD IV.



Ointment flask (ca. 1400-1200 B.C.) from Lachish. A hollowed elephant tusk forms the torso of the human figure; the hole pierced through the head into the spoon (which is shaped like a hand) may have been a channel for liquid ointment (Israel Department of Antiquities and Museums)

FLAT NOSE (Lev. 21:18, AV). The AV translation of Heb. *ḥārum* (LXX *kolobórin*; RSV "mutilated face"; NEB "stunted"). The Hebrew term occurs only in Lev. 21:18 as the name of a deformity that disqualified a member of a priestly family from serving at the altar. It is not certain whether this deformity is congenital or the result of self-mutilation.

FLATTERY [Heb. *ḥālāq*, hiphil of *ḥālaq*] (Ps. 5:9 [MT 10]; 12:2f. [MT 3f.]; 36:2 [MT 3]; Prov. 26:28; 28:23; 29:5; Ezk. 12:24; Dnl. 11:21, 32, 34); NEB also SMOOTH, SMOOTH TALK, SPECIOUS, DISSIMULATION, PLAUSIBLE PROMISES, INSINCERE; [piel of *kānâ*] (Job 32:21f.); [piel of *pāṭâ-* 'deceive'] (Ps. 78:36); NEB BEGUILED;

[Gk. *thaumázō prósōpon*] (Jude 16); AV "have men's persons in admiration"; NEB "court favour"; [*eulogía*] (Rom. 16:18); AV FAIR SPEECHES; [*kolakeía*] (1 Thess. 2:5).

The term "flattery" as used by the RSV is always associated with deception. Elihu says that he would not "use flattery toward" any man (Job 32:21; cf. AV "give flattering titles"). In the next verse he says that his Maker would put an end to him if he spoke in such a manner. Gk. *thaumázō prósōpon*, "admire the face" of someone (Jude 16), has its source in many similar expressions used in the OT (cf. Bauer, rev., p. 352).

FLAX [Heb. *pešeṯ, pištâ*; Akk. *pištu*; Gk. *línon*]. The Hebrew terms are used to describe the plant in bloom (Ex. 9:31), the stalks placed on the roof to dry (Josh. 2:6), and the fibers used for illumination (Isa. 42:3; 43:17). Isa. 19:9 refers to "combed" flax, i.e., ready for spinning (Heb. *pištîm šᵉrîqôṯ* cf. Hos. 2:5, 9; Prov. 31:13). The twisting of flax into ropes is mentioned in Jgs. 15:14, while in Jgs. 16:9 and Isa. 1:31 Heb. *nᵉʿōreṯ* was the material shaken off from flax when beaten, i.e., "tow." The plural form was used of linen or linen garments (cf. Lev. 13:47f., 52, 59; Dt. 22:11; Jer. 13:1; Ezk. 44:17f.). Flax is the oldest known textile fiber, and in antiquity linen was the preferred fabric for clothes, especially in Egypt, where the priestly garments were of pure linen. (*See* picture of statue of Egyptian nobleman in GARMENTS.) Mummies were wrapped in linen strips (*see* LINEN); the Hebrews and Greeks also employed it for wrapping around the dead.

Flax is produced from the herbaceous plant *Linum usitatissimum* L., which grows up to 1.3 m. (4 ft.) in height and is probably native to Mesopotamia. The tough fibers of the stalks are separated from the soft, nonfibrous parts by prolonged soaking in water. When dried the fibers are removed by combing. Egyptian monuments contain pictures of the method. Linseed, linseed oil, and oilcake are produced from this plant.

See *MPB*, pp. 129-133. R. K. H.

FLAYING. *See* PUNISHMENTS IV.G.

FLEA [Heb. *parʿōš*; cf. Arab. *bargût*–'flea'; Akk. *pāršu'u*]. The only biblical reference to the flea is in 1 S. 24:14, as a symbol of insignificance. A wingless member of the species *Pulex* is indicated, perhaps *Pulex irritans, P. penetrans*, or *P. canis*, all of which are found in Palestine.

FLEE [Heb. *bāraḥ*] (Ex. 2:15); NEB "made good his escape"; [*nāḏaḏ*] (Isa. 22:3); NEB "are . . . in flight"; [*nûs*] (Prov. 28:1); NEB RUNS AWAY; [Gk. *pheúgō*] (Mk. 14:50 par. Mt. 26:56); NEB RAN AWAY; **FLIGHT** [Heb. *ḥippāzôn*] (Dt. 16:3); AV HASTE; NEB URGENT HASTE; [*mᵉnûsâ*] (Isa. 52:12); NEB LEAVE LIKE FUGITIVES; [Gk. *phygḗ*] (Mt. 24:20); NEB ESCAPE; **PUT TO FLIGHT** [hiphil of Heb. *nûs*] (Dt. 32:30); [Heb. *rāḏap*] (Josh. 23:10); [Gk. *klínō*] (He. 11:34); NEB "put to rout"; **IN FLIGHT** [Heb. *nāḏaḏ*] (Isa. 10:31); AV "is removed." The Heb. noun *mānôs*, "place of escape" (Jer. 25:35), is rendered "refuge" by the RSV, and "way to flee" by the AV. The Heb. noun *mᵉnûsâ* and verb. *nûs* occur together in Lev. 26:36; the two verbs *bāraḥ* and *nāḏaḏ* are parallel in Isa. 22:3, as are the two Heb. nouns *ḥippāzôn* and *mᵉnûsâ* in 52:12.

Metaphorically, waves are said to flee from the presence of God (Ps. 104:7, Heb. *nûs* in parallel position with Heb. *ḥāp̱az*; AV "fled . . . hasted away"; NEB "ran . . . rushed away"; cf. Ps. 114:3), sleep has fled a person (Isa. 38:15; AV "I shall go softly all my years"; NEB "I wander to and fro all my life long"), the harvest will flee (Isa. 17:11), and "sorrow and sighing shall flee away" (Isa. 35:10 par. 51:11).

In a religious sense, a person cannot flee from the presence of God (Ps. 139:7f.), even though Jonah attempted to do so (Jonah 1:3, 10). It is, furthermore, futile to flee from the Day of the Lord (Am. 5:18-20; cf. Mt. 3:7 par. Lk. 3:7). Rather, people are to flee to the Lord for refuge (Ps. 143:9; cf. He. 6:18).

One interesting instance of "flight" is the holy family's flight into Egypt (Mt. 2:13; cf. Hos. 11:1). This is one of a number of parallels that Matthew draws between Jesus and Moses in order to show that Christ is greater and thus more authoritative than Moses (cf. P. F. Ellis, *Matthew: His Mind and His Message* [1974], pp. 29f.; J. D. Kingsbury, *Matthew: Structure, Christology, Kingdom* [1975], p. 12). As Moses was miraculously spared while many other male children perished (Ex. 1:15-20), so Christ was protected while the other male infants in Bethlehem were killed (Mt. 2:16-18).

See *TDOT*, II, *s.v.* "bārach" (Gamberoni).

R. W. V.

FLEECE. *See* GIDEON IV; WOOL.

FLEETING. In Ps. 39:4 (MT 5) Heb. *ḥāḏēl*, "transient," is used to convey the brevity of human life (*see* ETERNITY). "Fleeting" translates the niphal of *nāḏap*, "scatter," in Prov. 21:6. One plausible interpretation of this verse is that the accumulation of wealth through lying is something ephemeral which may cause death (cf. KD *in loc.*). In He. 11:25 it is stated that Moses would rather suffer with his fellow Hebrews than enjoy the "fleeting [Gk. *próskairos*, "transitory"] pleasures of sin" at the Egyptian court. Here the contrast is between a few years of personal prominence and prestige in Egypt and many years of hardship leading God's people out of slavery in Egypt into the Promised Land (cf. F. F. Bruce, comm. on Hebrews [*NICNT*, 1964], pp. 318-320). R. W. V.

FLESH [Heb. *bāśār, šᵉʾēr* (Ps. 73:26; 78:27; Mic. 3:2f.), *ṭerepâ* (Nah. 2:12 [MT 13]), *lᵉḥûm* (Zeph. 1:17); Aram. *bᵉśar* (Dnl. 2:11; 4:12; 7:5); Gk. *sárx, sarkikós* (1 Pet. 2:11), *katatomḗ*–'mutilation' (Phil. 3:2)]; AV also NAKEDNESS (Ex. 28:42), SKIN (Ps. 102:5 [MT 6]), NAVEL (Prov. 3:8), CARNAL/CARNALLY (Rom. 8:6f.; 1 Cor. 3:1, 3), CONCISION (Phil. 3:2); NEB also MEAT, BODY, MANKIND, MORTAL MAN, etc.

I. OT.–The term has a number of different meanings. *A. Literal Flesh.* Heb. *bāśār* and less often *šᵉʾēr* mean the muscular part of the human or animal body. "Flesh" is sometimes mentioned with other body parts: bones and skin (Job 10:11; Lam. 3:4), blood (Isa. 49:26, etc.), fat (Isa. 17:4), etc.

B. Food or Sacrifice. As the muscular part of human or animal bodies — frequently translated "meat" in the RSV — flesh is also viewed as food or sacrifice. Animal flesh is food for humans (e.g., Gen. 9:4) and for wild animals (Ex. 22:31; here the flesh is killed prey and thus unclean). In Nah. 2:12 (MT 13) Heb. *ṭᵉrēpâ* is "prey" (RSV, "torn flesh"). Animal flesh, moreover, is given as a sacrifice (e.g., Ex. 29:31), which, depending on the type of sacrifice, may then be eaten by the priests. Human flesh may be food for wild creatures (e.g., Gen. 40:19) or for people. In the latter usage it refers metaphorically to exploitation or oppression (Mic. 3:3, Heb. *šᵉʾēr*), folly ("eats his own flesh," Eccl. 4:5), or slander (Job 19:22). Cannibalism could be the result of a siege or, as in Lev. 26:29, of divine punishment.

C. Body. "Flesh" can mean simply "body" (Jgs. 8:7;

1 K. 21:27; 2 K. 4:34; etc.). Often where the AV has "flesh" for this meaning of Heb. *bāśār*, the RSV translates "body" (e.g., Ex. 30:32; Lev. 6:10 [MT 3]). (*See* BODY I.)

D. Euphemism. "Flesh" is a euphemism for the sexual organs (Ex. 28:42; cf. Gen. 17:14; Lev. 15:2f.).

E. Relationship. "Flesh" can denote a relationship in such phrases as "bone of my bones and flesh of my flesh," meaning kinsman (Gen. 2:23), "one flesh," i.e., husband and wife (Gen. 2:24), "my bone and my flesh," i.e., kinsman (Gen. 29:14).

F. The Whole Person. "Flesh" may denote the entire person, not just the physical aspects. Thus, "much study is a weariness of the flesh" (Eccl. 12:12) is an apt description of the toil humans go through to become wise. In several passages, "flesh" parallels "heart" (Heb. *lēḇ*, e.g., Prov. 4:21f.; cf. Ps. 73:26, "my heart and my flesh may fail") or "soul" (Heb. *nepeš*, Ps. 63:1 [MT 2]; 84:2 [MT 3]; etc.; cf. Job 14:22). This is a means of referring to human beings in their entirety. There is no hint here of a dualism, in which the mind or the soul is sharply distinguished from and superior to the flesh. Quite the contrary, the external and internal human aspects are closely tied together: "My soul longs, yea, faints for the courts of the Lord; my heart and my flesh sing for joy to the living God" (Ps. 84:2 [MT 3]). (*See also* BODY I; ANTHROPOLOGY III.E.) The phrase "all flesh" may denote all animals (Gen. 6:19; Ps. 145:21; etc.); all humans (e.g., Isa. 40:5f.); and all living beings, including humans (Gen. 6:17; 9:11; etc.).

G. Theological Significance. The use of the word "flesh" to designate both humans and animals suggests their common condition as creatures. God gives life to all flesh (Gen. 6:3; Job 10:11). As flesh, humans are mortal, weak, and limited (Isa. 40:6f.), compared with God, who is superior to "all flesh" (Jer. 32:27). In a number of passages the difference between mankind and God is expressed in terms of the antithetical pair "flesh" and "spirit" (e.g., Gen. 6:3; Isa. 31:3; God is spirit, not flesh, cf. *TDOT*, II, 330). The sometimes pejorative use of "flesh" or "all flesh" stems from this distinction. There is nothing sinful about flesh per se. Sin arises when a person ignores the difference between flesh (human) and spirit (divine). Jer. 17:5 puts this well: "Cursed is the man who trusts in man and makes flesh his arm, whose heart turns away from the Lord." To attribute to humans what is God's is sin. In Ps. 78:39 flesh and sin seem closely related. God checked His wrath against Israel in the wilderness because "He remembered that they were but flesh" (i.e., "weak and liable to sin"). (In later Judaism and in the theology of Paul the contrast between flesh and spirit would return; see III.B below.)

In His grace, however, God promises to give His people a "heart of flesh" and to remove their "heart of stone" (Ezk. 11:19; 36:26), so that they may respond obediently rather than disobediently as before. Some of the prophets look forward to the age in which "all flesh shall come to worship" before the Lord (Isa. 66:23; cf. Joel 2:28 [MT 3:1]).

II. Intertestamental Literature.–*A. Qumrân.* The usage of flesh (*bśr*) in the Qumrân texts reflects the OT usage. It includes the literal meaning (1QS 9:4), flesh as body (1QpHab 9:2; 1QSa 2:5f.), and the phrase "all flesh" (in 1QSb 3:28, not negative). In 1QS 3:8f. flesh denotes the total person.

Drawing on the OT meaning of flesh as limited, moreover, the Qumrân texts understand flesh as a synonym for human corruptibility (e.g., 1QH 4:29; 15:21) and the tendency toward sin (e.g., 1QM 4:3; 12:12). (See also *TDNT*, VII, 110-14.)

B. Apocrypha, Pseudepigrapha. To some extent, the OT usage is followed — the literal meaning of flesh occurs (e.g., Jub. 7:4), flesh as human body (7:28), as sexual organ (15:13f.), and commonly the term "all flesh." There is an evident development toward both a cosmic and an anthropological dualism here, which can be seen already in the LXX translation of Nu. 16:22; 27:16: "the God of the spirits [Heb. *lᵉḵol-bāśār*, LXX *kai pásēs sarkós*] of all flesh" (see *TDNT*, VII, 110, 119-121).

III. NT.–*A. Continuation of OT Uses.* The principal NT word for "flesh" is Gk. *sárx*, which the LXX usually employs as a translation of Heb. *bāśār* (*TDNT*, VII, 108; cf. 1 Pet. 1:24, quoting Isa. 40:6; Acts 2:17, quoting Joel 2:28 [MT 3:1]). "Flesh" is (1) food (Jn. 6:52; Rev. 19:18; etc.), and can be considered for sacrificial purposes; (2) a synonym for the body in Eph. 5:29; He. 9:13 (cf. 2 Cor. 12:7); (3) a euphemism in Col. 2:13; Phil. 3:2; Gal. 6:13; Eph. 2:11 (for Phil. 3:2 *see* CIRCUMCISION III); (4) a relationship in Rom. 1:3 (the relation between David and Jesus); and (5) the whole person in Acts 2:26f. (a quote from Ps. 16:9f., LXX [Heb. *bāśār*]); Col. 1:24 (cf. Rom. 7:18, "my flesh" = "me").

Two NT expressions are not found in the OT. The expression "flesh and blood" may signify specific individuals, as in Gal. 1:16 and Eph. 6:12. In Mt. 16:17 it points to the human inability to know apart from revelation that Christ is the Son of the living God, while in 1 Cor. 15:50 humans cannot "inherit the kingdom of God" because of their mortal nature. The second expression, "according to the flesh," may mean "the merely natural" (e.g., Rom. 1:3), but often it refers to taking the natural as a norm in opposition to the spirit (e.g., Rom. 8:13; cf. Gal. 4:23, 29).

B. Theological Significance. In the NT, flesh represents the natural, created human aspect. As such it is not sinful — merely weak, limited, and temporal. Because of its limitation, it is liable to sin, e.g., to set up the natural and human as God, neglecting the true God, and thus can even be regarded as mankind's master (Gal. 5:17). It then becomes "sinful flesh," with passions, indulgences, or "zeal, boasting," etc. In 1 Pet. 2:11, e.g., the "passions of the flesh . . . wage war" against the soul, and the believers are exhorted to have a good conduct among the Gentiles. In 2 Pet. 2:18 the passions of the flesh are labeled "licentious" and can barely be escaped. For John (1 Jn. 2:16) "the lust of the flesh and the lust of the eyes" are not of the Father but of "the world," which is darkness, in opposition to the light, which is God.

The contrast between flesh and spirit reflects in part the OT idea of the distinction between God and mankind (e.g., Jn. 6:63: "It is the spirit that gives life, the flesh is of no avail") and is not always expressive of the contrast between sin and grace (e.g., Mk. 14:38, "The spirit indeed is willing, but the flesh is weak"). But for Paul the "flesh" can oppose the Spirit (e.g., Gal. 5:17, "For the desires of the flesh are against the Spirit"; cf. Rom. 8:8f.; Jn. 1:13; 3:6; 1 Pet. 4:6). Here flesh is the opposite of the Spirit, not because it is material but because it lives by its own standards. This contrast between spirit and flesh is reflected in Rom. 7:14 (see comms.), where Gk. *sárkinos* (adjective of *sárx*) is translated "carnal" (NEB, NIV, "unspiritual"). Unlike the Gnostics, for whom the flesh as such is identified with evil (*see* GNOSTICISM III, IV), Paul is aware of the distinction between the flesh as created and as fallen (*see* BODY II; DESIRE). (The life "in the flesh" of Phil. 1:22-24 does not designate the sinful but the "weak, transitory nature of the physical body" [J. J. Müller, comm. (*NICNT* [1955]), p. 62].)

Though flesh and sin are closely related, Christ redeemed sinful human flesh. In the Incarnation Christ as-

sumed human flesh (Jn. 1:14) and lived as a human being (e.g., He. 5:7; 1 Tim. 3:16). It is in His flesh that Christ suffered (1 Pet. 4:1). Against the Gnostics, John taught that the flesh as such is not sinful (*see* GNOSTICISM VIII.B; cf. VI.D). In fact, Christ's incarnation and death are the occasion for the believer's fellowship with Him in the "eating" of His flesh (Jn. 6:52; *see* LORD'S SUPPER VIII). As in the OT, the NT professes that one day "all flesh shall see the salvation of God" (Lk. 3:6; cf. Jn. 17:2).

FLESH AND BLOOD. *See* FLESH III.A.

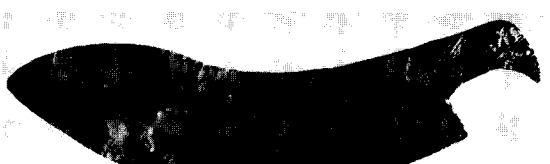
FLESHHOOK (AV). *See* FORK.

FLESHPOT [Heb. *sîr habbāśār*–'kettle of meat']. One of the six kinds of cooking utensils spoken of as pots, pans, caldrons, or basins. These were probably made of bronze or earthenware. The only mention of fleshpots, specifically so named, is in Ex. 16:3, where the discontent Israelites recall the abundance of meat during their Egyptian servitude. *See* FOOD IV.

FLIES. *See* FLY.

FLINT; FLINTY (ROCK) [Heb. *ṣōr*] (Ex. 4:25; Josh. 5:2f.; Isa. 5:28; Ezk. 3:9); AV also SHARP (Josh. 5:2f.); NEB also "shooting stars" (Isa. 5:28); [*ḥallāmîš*] (Dt. 8:15; 32:13; Job 28:9; Ps. 114:8; Isa. 50:7); AV also ROCK; NEB also HARD, GRANITE. This substance, which is an imperfect type of quartz, is found in abundance in the limestone rocks of Syria, Palestine, and Egypt and is represented from the earliest occupational deposits there. Flint artifacts were prominent in the Neolithic period, being used for a wide variety of purposes. Even after the introduction of copper, bronze, and iron they continued to be used for specific purposes such as circumcision (Ex. 4:25; Josh. 5:2f.). In Ezk. 3:9 ADAMANT is regarded as even harder than flint.

Flint knife, 37 cm. (14 in.), of King Djer (Egyptian, early 1st Dynasty, *ca.* 3000 B.C.) with his name inscribed on the gold foil of the handle (Royal Ontario Museum, Toronto)



Figuratively, the impact of horses' hooves is likened to the hardness of flint (Isa. 5:28), and humans can harden their faces like flint (50:7; cf. Ezk. 3:9). The psalmist sings of God turning flint into "springs of water" (Ps. 114:8), an allusion to God's rescuing His people in the desert (Dt. 8:15; cf. 32:13).

FLOCK. *See* CATTLE; SHEEP.

FLOG [hiphil of Heb. *nāḵâ*–'strike, smite'] (Prov. 17:26); AV STRIKE; NEB INFLICT BLOWS; [Heb. *mahᵃlumôṯ*–'strokes'] Prov. 18:6; 19:29); AV STROKES, STRIPES; NEB BLOWS; [Gk. *mastigóō*] (Mt. 10:17); AV SCOURGE.

In Prov. 17:26 Heb. *nāḵâ* may be rendered "flog" (cf. Dt. 25:2); like imposing a fine, flogging in the OT was considered a punishment for a crime (*see* PUNISHMENTS IV.A,B). According to H. Cohn, "floggings were administered with a whip made of calfskin on the bare upper body of the offender — one third of the lashes being given on the breast and the other two thirds on the back. The offender stood in a bowed position with the one administering the beating on a stone above him and the blows were accompanied by the recital of admonitory and consolatory verses from Scripture" (*Encyclopedia Judaica*, VI [1971], 1350). In Prov. 18:6 foolish talk leads to strife or quarreling (cf. 20:3) and thus may be punished by flogging (cf. 19:29), usually executed with rods (10:13; 26:3). This may be Proverbs' understanding of Dt. 25:1-3.

Flogging was also applied to children for correction (Prov. 23:13; cf. 13:24). In fact DISCIPLINE had been interwoven in the fabric of child-rearing as long as the Israelites had been in Palestine (Dt. 21:18).

Though the innocent were not supposed to be flogged, often they were. Jeremiah was flogged ("beat," hiphil of Heb. *nāḵâ*, Jer. 37:15; NEB "flogged") for no moral wrongdoing at all. The only NT reference to flogging is in Mt. 10:17 (NEB "flog"; cf. 23:34, "scourge"). Here our Lord warned His followers of the beatings that may be inflicted on them for the sake of the preaching of the gospel (and not because of unethical behavior; cf. Acts 5:40, "beaten," Gk. *dérō*). The reference is clearly to Dt. 25:1f.; their punishment will be executed legally in the synagogue. Paul was "beaten with rods" (Gk. *rhabdízō*, "beat with a rod") by the Roman officials (Acts 16:22f.; cf. 2 Cor. 11:24f.). The Romans used flogging to speed up the death of criminals by crucifixion (*see* CROSS VI.B); perhaps Christ was flogged for that reason (Mk. 15:15; W. L. Lane, comm. on Mark [*NICNT*, 1974], pp. 556f.; on Jn. 19:1, see R. E. Brown, comm. on John, I [*AB*, 1970], 874, 885-89).

See *TDNT*, IV, *s.v.* μαστιγόω (Carl Schneider). R. W. V.

FLOOD [Heb. *mabbûl*] (Gen. 6:17; 7:6-17; 9:11, 15, 28; 10:1, 32; 11:10; Ps. 29:10); [*mayim*–'water'] (2 S. 5:20; 1 Ch. 14:11; Job 27:20; Ps. 88:17 [MT 18]; 124:4); AV WATER(S); NEB also RIVER, WATERS; [*nāhār*–'stream, river'] (Ps. 93:3; 98:8; Cant. 8:7; Jonah 2:3 [MT 4]); NEB OCEAN, RIVERS; [*šipʿâ*] (Job 22:11; 38:34); AV ABUNDANCE; NEB WEIGHT; [vb. *śāḥâ*] (Ps. 6:6 [MT 7]); AV "make to swim"; NEB SOAK; [*šibbōleṯ*] (Ps. 69:2, 15 [MT 3, 16]); [*šēṭep, šeṭep*] (Dnl. 9:26; Nah. 1:8); NEB also DELUGE; [*tᵉhóm*] (Ex. 15:5); AV DEPTHS; NEB WATERY ABYSS; [*nāzal*] (Ex. 15:8); NEB WATERS; [Gk. *kataklysmós*] (Mt. 24:38f.; Lk. 17:27; 2 Pet. 2:5); NEB also DELUGE; [*plémmyra*] (Lk. 6:48); [*potamós*–'river, stream'] (Mt. 7:25, 27; Rev. 12:15).

The word "flood" always brings to mind the flood at the time of Noah. Gen. 6–9 uses a special word for that flood, *mabbûl*. Its origin is only conjectured (cf. U. Cassuto, *From Noah to Abraham* [1964], pp. 66f.). However, it must have a meaning wider than "flood," for "waters of" generally appears before it and it appears frequently with the article. The NT supports this idea, for it refers to that flood as *kataklysmós*, from which comes the English "cataclysm." Frequently ancient

documents date themselves by reference to some natural phenomenon; such is the case in Gen. 9–11, for events from the flood to the call of Abraham are classified as "after the flood." *See* FLOOD (GENESIS).

Numerous Hebrew phrases refer to the powerful force of water, particularly as a metaphor for any type of disaster, such as distress (Job 22:11) and the anger of enemies (Ps. 124:4). Love, however, can overcome all of these difficulties; "many waters cannot quench love, neither can floods drown it" (Cant. 8:7). Jonah figuratively describes his circumstances within the belly of the fish as "the flood was round about me" (Jonah 2:3). The Song of the Sea portrays the Egyptians as being overcome not by the sword but by the waters (deeps, floods) of the sea (Ex. 15:5). In Revelation the flood is one of the dragon's weapons in his attempt to overcome the woman (Rev. 12:15f.).

The Psalms particularly use "river" in the plural to signify the massive power of water. Rivers and oceans are often poetically visualized as primeval enemies of God. Ps. 93 observes that the mighty noises put forth by these waters are not powerful enough to drown out the voice of God. No natural force or mythological being is a threat to Him. In fact, the floods will even break forth in praise of God (Ps. 98:8), for "the Lord sits enthroned over the flood" (Ps. 29:10). No hostile force is adequate even to challenge His kingship.

Drawing from the past judgment of the Flood, Nahum (1:8) and Daniel (9:26) foresee God as destroying His enemies by a flood. That does not mean they anticipate another literal flood, but rather they use the same image to point out that God has complete authority and power to overcome His enemies totally by whatever means He chooses. Jesus also talks about the Final Judgment in terms of the Flood (Mt. 24:38f.).

FLOOD (GENESIS). The concise and somewhat cryptic account of the Flood in the days of Noah (Gen. 6–9) would fill little more than 225 lines of a modern newspaper. Yet it has given rise to whole shelves of books, which seek to clarify and debate aspects of the Flood. Any attempt to interpret the biblical account introduces uncertainty, and all the efforts of modern scholarship have settled little. In faith the Genesis account is accepted as historical, but numerous unanswered questions remain.

VI. Nonbiblical Flood Traditions

I. Biblical Account of the Flood. *–A. Reason.* God determined to destroy all living creatures with a flood because "the wickedness of man was great," "every imagination of the thoughts of his heart was only evil," and "all flesh had corrupted their way upon the earth" (Gen. 6:5, 12). Evidently the corruption of humanity was so great that God could find only one, Noah, who was "righteous," right with God, and of unimpeachable character. God commissioned him to be a "herald of righteousness" (2 Pet. 2:5) while he constructed an ark for the safety of himself, his wife, his three sons and their wives, and numerous animals (1 Pet. 3:20). The usual interpretation is that 120 years elapsed between God's announcement of the Flood and the occurrence of the catastrophe (Gen. 6:3).

If this was the case, Noah was 480 when God ordered him to build the ark and 600 when the Flood came (Gen. 7:6). Whether he did much preaching during that extended period of time or whether construction of the ark itself was viewed as an act of warning (He. 11:7) must be left undecided. It is also uncertain whether Noah hired a work force to help him, how he financed the project, how much ridicule he received, and whether he suffered sabotage or hate attacks that slowed construction.

B. Size and Nature of the Ark. According to Gen. 6:14-16 God commanded Noah to build an ark of gopher wood 300 cubits long, 50 cubits broad, and 30 cubits high. It was to have three stories divided into compartments, was to be covered with pitch on the inside and outside, and was to have a door and a window. GOPHER WOOD has not been identified. Some believe that it was a cypress or cedar and others oak, but there is no certainty on this point today.

Likewise, it is impossible to be dogmatic about the length of the CUBIT and thus about the size of the ark. The length of Babylonian, Egyptian, and Hebrew cubits differed; and the Hebrews themselves had two cubit measurements: a long cubit of 52 cm. (20.4 in.) and a common cubit of about 44.5 or 46 cm. (17.5 or 18 in.). If the shorter Hebrew cubit is used as a basis of computation, then the ark was about 135 m. by 22.5 m. by 13.5 m. (450 ft. by 75 ft. by 45 ft.), with a total volume of just over 41,000 cubic m. (150,000 cubic ft.). The use of a longer cubit would substantially increase the size of the ship. Computing on the basis of the shorter cubit, the ark was 185 m. (510 ft.) or almost half the length of the Queen Mary. And apparently no ship would have exceeded the length of the ark until the Cunard Line built the Eturia in 1884.

There is no need to debate whether Noah and his sons had the engineering skills to design such a great ship early in antiquity. It was probably a very large barge; nothing is said about its having a keel, oars, or rudder. Its function was only to serve as a houseboat for animals and people for the duration of the flood. Apparently long before Noah's day people had learned the art of making the metal tools necessary for such a massive undertaking (Gen. 4:22). Bitumen for caulking purposes was available in quantity in Mesopotamia; presumably that is where the ark was built.

The door was located in the side of the ark; but the nature of the window is uncertain. Frequently this is interpreted to have been an open area a cubit high under the eaves and running around the entire structure. Such an aperture would have been divided into segments by the supporting timbers of the roof, and lattice work could have been installed in places where birds were housed. The window could have provided light and ventilation for the lower decks only if a large area was open in the center of the ark.

Though compartments were to be constructed for the animals on the ark, their nature is unknown. It has been assumed that cages for small birds or mammals were stacked to make maximum use of deck space. Of course no one knows how many animals the ark housed. The Genesis account commands only that a single pair of unclean fauna and seven pairs of clean fauna should be taken aboard the ark. The reason for the larger number in the latter case was to provide food for Noah and his family. Evidently the distinction between clean and unclean existed long before the decrees of the Mosaic law. The problem of determining the number of animals involved is complicated by the difficulty of deciding whether

only certain parent types (dog, cat, cow) or more numerous representations were involved. Some 4500 species of mammals and some 8,650 species of birds exist on earth today.

Various computations have been made to demonstrate that the ark was large enough to house the required number of species. On the generous side, LaHaye and Morris settled on a figure of 50,000 animals that would need to have been housed in the ark, averaging in size a little smaller than a sheep. They conclude that these would fill only about one-third of the capacity of the ark, leaving plenty of space for storage (p. 247). Though the various estimates do show the feasibility of protecting fauna against even a global flood, one need not be dogmatic about the way it was accomplished. Another unanswered question is how Noah rounded up all those animals and birds. It may be that God somehow compelled or impelled the fauna to move toward Noah and the ark in advance of boarding day (cf. Gen. 6:20).

See also ARK OF NOAH.

C. Causes. The Genesis account gives a twofold source of the waters responsible for the flood: "the sluice gates of heaven were opened" with the result that rain cascaded upon the earth; and "the fountains of the great deep burst forth" (Gen. 7:11). What is meant by the latter clause is not clear. Often it is taken to imply some terrestrial convulsion that released vast stores of subterranean waters, but no evidence of subterranean reserves on the required scale can be found. Nor is there evidence of any general and cataclysmic alteration of the earth's crust at a given time in the past when such reservoirs may have been eliminated by the collapse of geological structures above them.

D. Duration. According to popular opinion the flood lasted forty days because that was the length of time it rained. But a careful reading of the Genesis account reveals that Noah, his family, and the animals were shut up in the ark for a total of 371 days. This figure is calculated as follows. On the seventeenth day of the second month of Noah's six hundredth year, Noah, his family, and all the animals were safely in the ark and God shut the door (Gen. 7:11, 16). Then it poured for forty days and nights, during which time the waters rapidly covered the earth. Evidently it continued to rain lightly for another 110 days, making a total of 40 + 110 or 150 days of rain (7:24; cf. 8:4).

For the next 74 days (13 + 30 + 30 + 1, Gen. 8:5) the waters abated until the tops of the mountains could be seen. Then Noah waited forty days before opening the lattice on the window of the ark and releasing a raven (8:6f), which did not return because as a scavenger it was able to live off the land. Seven days later (deduced from the "other seven days" of v. 10 and the total of v. 14) Noah sent out a dove which found no resting place (v. 9). Seven days later he sent out a dove again; this time it returned with an olive leaf (v. 11). After another seven days Noah sent out the dove for the third time, and this time it did not return (v. 12). After a lapse of twenty-nine more days Noah removed the covering of the ark (v. 13). And after another fifty-seven days God commanded Noah to evacuate the ark (vv. 14-17), on the twenty-seventh day of the second month of his six hundred first year (vv. 13f.), 371 days after God shut the door at the beginning of the flood.

A consecutive reading of the whole Flood narrative shows a continuous progress from beginning to end, with only such repetitions for literary effect as commonly appear in oriental writings. There is no basis for asserting, as Wellhausen did, that Gen. 6–9 is a patchwork of J and P source materials (cf. *IDB*, II, 279). Not only does such a view contradict common literary practice and common sense, but it also runs counter to the Babylonian flood account, which includes supposed J and P elements side by side. Unity of authorship in the biblical narrative may be confidently assumed.

F. Theological Significance. A number of important religious truths may be derived from the historical event of the Flood. First among them is God's displeasure with sin and the certainty of His judgment against it. Flood waters inundated the earth because of humanity's complete corruption. Second, it shows His mercy and grace as He withheld judgment for many years — for more than a century — while He continued to call for repentance through the preaching and ark-building of Noah (cf. 1 Pet. 3:20 about God's patience). Third, the Flood demonstrates God's right to govern His creation and to interfere in its affairs in a cataclysmic way. Fourth, it portrays His sovereign power as He exercises absolute control over the forces of nature. Fifth, it indicates God's grace to Noah and his family by saving them (He. 11:7; 1 Pet. 3:20), the flood being a symbol of baptism (1 Pet. 3:21; *see* BAPTISM VII.A). Last, the Flood and conditions preceding it served as an example and warning of events at the end of time. Jesus Himself declared that just as people turned their backs on God in the days before the Flood and fell under the hand of God's judgment, so they will ignore Him at the end times and can just as certainly expect judgment by another cataclysmic event — the second coming of Christ (Mt. 24:36-42; Lk. 17:26f.).

II. Extent of the Flood.–A literal interpretation of the biblical account of the Flood leads to the conclusion that the Flood was universal. But numerous questions have been raised about this traditional position, and the tendency today is to posit a local flood (cf. *IDB*, II, 283).

Arguments for a local flood include the following. (1) The Genesis narrative does not use *tēḇēl* (the world as a whole) in the Hebrew text but *'ereṣ* ("earth, land"). Thus, statements which sound universal in the English Bible could have a local reference (see, e.g., 7:4, 10, 17-19). (2) In order to cover the highest mountains, eight times more water would be required than the earth now possesses. (3) The disappearance of such a tremendous quantity of water after the flood is hard to explain because neither the atmosphere nor subterranean cavities can hold more than a small fraction of it. (4) Probably most of the marine life would have been destroyed by the flood — crushed by the tremendous water pressure, starved by loss of feeding grounds, or killed by the dilution of the salt waters to which they were accustomed. (5) Most plant life would have been destroyed by submersion under salt water for over a year, even though the salt water was considerably diluted. (6) Some areas of the earth's surface show no evidence of submersion during a flood.

There are various arguments in defense of a universal flood. (1) It is asserted that the phrase "under the whole heaven" (Gen. 7:19) cannot be reduced to a local condition (but cf. Dt. 2:25). (2) The purpose of the Flood was to judge the sinfulness of the entire antediluvian population; a local flood would not have fulfilled this purpose. (3) The size of the ark makes a local flood impossible; in fact, the construction of an ark of any size would have been unnecessary because animals could have simply fled the Mesopotamian valley and returned when the flood was over. (4) Universality of flood legends seems to require a universal flood. (5) An overwhelming cosmic catastrophe seems to be in view in 2 Pet. 3:3-7. (6) A flood that would cover the Ararat Mountains (which rise to a height of 5163 m. [16,946 ft.]) for over a year could not be a local flood. Water seeks its own level and would flow over the entire earth to a depth of three

FLOOD (GENESIS)

miles. It would not stand in heaps over the Near East. (7) The promise never again to cut off all flesh or to destroy the earth with a flood (Gen. 9:11) has universal implications.

It should be clear from a study of the arguments for and against a universal flood that neither side has the preponderance of answers at the present stage of research. In fact, even if one were to grant the validity of only a local flood, great difficulties would remain. As already indicated, water seeks its own level. Mesopotamia is no watertight basin to be filled with flood waters; and certainly inhabitants could scurry up the slopes of the Zagros or other mountains flanking the lowlands. Moreover, if salty waters of the Persian Gulf had mixed with fresh water standing on land, at least the southern part of the region would have been rendered sterile after a year of inundation. As a matter of fact, the salinization of southern Mesopotamia did not begin to be serious until the 3rd cent. B.C., as a result of conditions that had nothing to do with any flood. Taking literally the various features of the Flood narrative (e.g., size of the ark, depth of flood waters), one would find it hard to accept a purely local flood. And if the Flood was designed to bring judgment on all mankind, it would have to be universal. Whatever is concluded about the extent of the Flood, the element of miracle should not be discounted. The Flood cannot be completely explained in terms of natural causes.

III. Date.–The date of the flood raises as many questions as do the extent and other aspects of this event. Flood layers found by L. Woolley at Ur and by other archeologists at various Mesopotamian sites can have no bearing on the question because they date to a wide range of periods, hundreds of years apart. Obviously they resulted from purely local floods which were often devastating in their own regions.

After the 6th or 5th millennium B.C., there is no break brought on by a flood or any other catastrophe in Near Eastern civilization. And in fact excavations at Jericho in Palestine and Jarmo in Iraq push undisturbed remains at those sites back into the 8th millennium B.C. Unfortunately, there is no basis for assigning any firm dates earlier than that time either (*see* CHRONOLOGY OF THE OT II) Thus, various popular handbooks that assign dates for the Flood should be read with care because they lack significant collections of evidence in support of their conclusions.

Regrettably, as new information becomes available the picture does not become any clearer. Anthropologists, e.g., are now claiming that human beings arrived in North America from Asia well before 20,000 B.C. An assertion that all mankind was judged by the Flood would require either that the flood was universal and may have occurred after the arrival of humans in North America or that it was local and came before they crossed the Bering Strait.

IV. Flood Geology.–Twentieth-century flood geology is an outgrowth of the nineteenth-century catastrophic school. Chief representatives in the earlier part of this century were G. M. Price, B. Nelson, A. M. Rehwinkel, and H. W. Clark (*New Diluvialism*). In 1961 J. C. Whitcomb, Jr. and H. M. Morris updated the flood geology argument in *The Genesis Flood*. Their work brought about a rebirth of flood geology in Christian circles and led to the establishment of such organizations as the Creation Research Society and the Creation Science Research Center, and the circulation of a great amount of literature propagating this position.

According to this view, the Flood was a truly catastrophic event, responsible for a tremendous amount of geologic work. In fact, the geologic formations as they now appear

are essentially due to the Flood. The rates of erosion and sedimentation were speeded up during the Flood year. Even the radioactive decay process was increased so that rocks and minerals have a greater apparent age than is actually the case. Death did not occur until after the curse on Adam; so all fossils were entombed after the fall — most of them in sedimentary layers laid down during the Flood. Thus the earth is not as old as it appears to be and the position known as uniformitarianism is rejected.

The flood geology position has been discredited in university geology departments and is being rejected almost universally by evangelical geologists. This is true in part because it does not agree with scientific arguments according to which, e.g., many geologic features could not have been formed under water or in so short a time. (A survey of some of the arguments against flood geology may be found in B. Ramm, pp. 124-130; D. Young, pp. 176-210.)

Flood geology is also rejected because it does not tally very well with Scripture itself. Geography or topography, e.g., does not seem to have been changed greatly by the Flood. Mesopotamia with its great rivers appears to have been much the same after the Flood as before it. Even the generous supplies of pitch (bitumen), available for such projects as ark-building, were still there in quantity after the Flood. Furthermore, as Young has argued (pp. 121-25), "waters above the firmament" cannot be interpreted as a canopy that cascaded down on the earth during the Flood because Ps. 148:4, written long after the Flood, calls on the waters above the heavens to praise God. The waters above the firmament are still there and evidently are the clouds.

Those who oppose flood geology observe that the Flood was designed to be an event in redemption history, not in geological history. And as Young points out (p. 172), one can hold to a universal flood brought on by rains and tidal waves, which deposited surface materials such as gravels and silts, without holding to flood geology. Flood geology is an interpretation of the universal flood and its effects, but is not synonymous with a belief in a cataclysmic or even a universal flood.

FLOOD (GENESIS)

V. Search for the Ark.–Many students of Scripture are not interested in looking for the ark because they believe the Genesis Flood account to be a legend with no basis in fact. At the opposite end of the spectrum are those who support such a search because they want to prove the historicity of the Flood and thus of Scripture and thereby bring many to the kingdom of God. Though some might, indeed, opt for the truth of Christianity if the ark were to be discovered, it should be remembered that one cannot be argued into the kingdom and that scoffers have always abounded. Most who knew Jesus Christ and witnessed His miracles refused to put their faith in Him and even to accept His resurrection. A more sober approach to a search for Noah's ark recognizes this to be a legitimate endeavor, which, if successful, would throw light on one of the greatest events of biblical and world history and would provide tremendous confirming support for the Christian faith. Christians who engage in such projects as this one should approach them with an open mind, willing to follow where the evidence leads them.

If one is going to search for the ark on Mt. Ararat, he must first locate the mountain. The Bible states that the ark came to rest on "the mountains of Ararat" (Gen. 8:4), and thus warns the modern reader against seizing too readily on any particular spot for the landing of the ark. (*See also* ARARAT I.) The traditional site is Ağri Dağ, the highest peak (5163 m., 16,946 ft.) of Ararat, located in eastern Turkey on the Russian border. Ancient traditions point to at least six other landing places. Most Christians prefer the traditional site, however, largely because it would have been the first peak to emerge from the receding flood waters. Clearly the identification is not absolute, so there is always the possibility that expeditions may be looking for the ark in the wrong places. Searchers have always concentrated on the traditional peak, however. *See* Plate 46.

Numerous popular books on the Flood and Noah's ark have reported sightings of the ark on Mt. Ararat during ancient, medieval, and early modern times. (Some of these appear in the bibliography.) A new "ark fever" has broken out since the 1950's, and the results of some expeditions require comment. Of special interest are the efforts of F. Navarra, a French industrialist, whose 1952 expedition to the traditional site claimed to have found the dark form of a ship under the ice at the 4100-m. (13,500-ft.) level. In 1955 he extracted a section of wood that he believed to be a piece of the ark. This was subjected to a variety of tests, such as lignite formation and fossilization, and was determined to be oak, hand-tooled and partly fossilized, about 5000 years old. When carbon-14 tests were made, they dated the wood to the 8th century A.D. If the earlier date is right, the wood apparently has no bearing on the ark because there is no evidence of a major break in civilization about 3000 B.C. If the later date is right, the wood certainly can have no connection with the ark. Specialists conclude that the various nonradiocarbon methods of dating are not very reliable in this case; and these radiocarbon tests do not suffer from conditions that make carbon-14 dating somewhat uncertain. Evidently this wood did not come from Noah's ark.

Moreover, individuals close to the Navarra expeditions claimed that he planted the wood or purchased it and perpetrated a hoax. Subsequently he seemed rather vague about where he had found the wood. Later, in 1969, Navarra served as a guide for an expedition of SEARCH, Inc., and secured additional pieces of wood encased in ice high on the mountain. Again cries of fraud arose, but too many people of excellent reputation were involved this time for the discoveries to be contrived. Finding some old wood on the traditional Mt. Ararat is not the same as finding Noah's ark, however. Carbon-14 tests on this wood dated it to the first half of the 7th cent. A.D.

In 1959 a report appeared in a Turkish magazine of the sighting of the ark by a Turkish airman in the foothills adjacent to Ararat. The Archaeological Research Foundation was formed to investigate what had been seen at a height of 2130 m. (7,000 ft.). Following the Turkish report, an issue of *Life* magazine (Sept. 5, 1960) printed an article on the ark and a photograph that stirred considerable interest. But the ARF expedition of 1960 showed that the supposed boat was merely a "freak of nature," a "clay up-push in a lava flow." Thus another case of ark fever came to an end.

A satellite photo of Ararat (taken July 13, 1973), was announced by Senator Frank E. Moss of Utah (Feb. 21, 1974) as possibly showing the ark. Later the possibility was completely discounted.

In 1974 a Palestine, Texas group claimed to have been on Mt. Ararat and to have seen the ark from a distance of 600 m. (2000 ft.). Some question that they ever ascended the mountain, and the CIA demonstrated that the photo they showed of the "ark" was retouched.

Numerous expeditions scrambled up Mt. Ararat in the 1960's and 1970's looking for Noah's ark. Their task was herculean, for they attacked one of the largest mountains in the world, the base of which covers approximately 12,950 sq. km. (5000 sq. mi.) and the ice cap 52 sq. km. (20 sq. mi.). The ark was not found, and exploration came to an end with worsening Turkish-American relations in the wake of the Cyprus dispute.

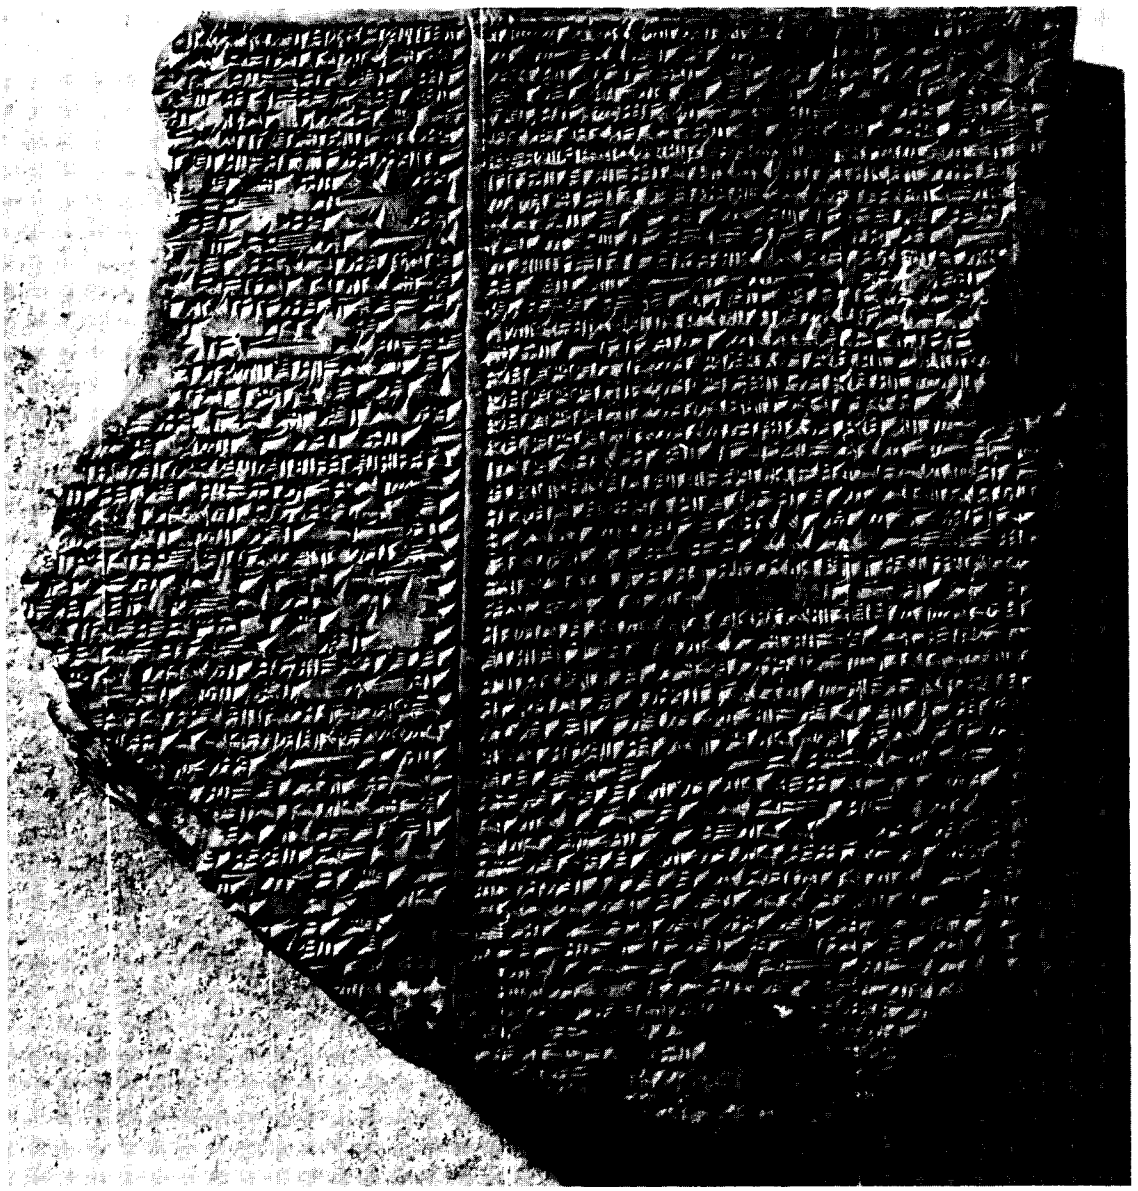
VI. Nonbiblical Flood Traditions.–Flood stories have been discovered among nearly all nations and tribes. Though most common on the Asian mainland and the islands immediately south of it and on the North American continent, they have been found on all the continents. Totals of the number of stories known run as high as about 270, of which more than 220 are definitely known to the writer of this article.

Although these traditions have been modified through the ages and some have taken on fantastic elements, most of them have certain basic elements in common. LaHaye and Morris concluded (p. 237) that 88 percent of them single out a favored individual or family; 70 percent point to survival due to a boat; 66 percent see the Flood coming as a result of human wickedness; 67 percent speak of animals saved along with human beings; 57 percent record that the survivors end up on a mountain; and 66 percent indicate that the hero or favored one receives warning of the coming catastrophe.

The universality of the flood accounts is usually taken as evidence for the universal destruction of humanity by a flood and the spread of the human race from one locale and even from one family. Though the traditions may not all refer to the same flood, apparently the vast majority do. The assertion that many of these flood stories came from contacts with missionaries will not stand up because most of them were gathered by anthropologists not interested in vindicating the Bible, and they are filled with fanciful and pagan elements evidently the result of transmission for extended periods of time in a pagan society. Moreover, some of the ancient accounts were written by people very much in opposition to the Hebrew-Christian tradition.

Most important of all the flood stories is the Babylonian account. Interest in it rises because it comes from the same Semitic context and the same geographical area as the Genesis narrative and because it is similar to the Genesis account in so many ways.

The Babylonian flood story was part of the library of King



Fragment of Tablet XI of the Gilgamesh Epic (the Babylonian flood account) written in Assyrian cuneiform. It details the building of the ship, the storm, and the landing on Mt. Niṣir (Trustees of the British Museum)

Ashurbanipal of Assyria (668-*ca.* 627 B.C.) found during the British excavations at Nineveh in 1853 and 1873. The story was on the eleventh tablet of a twelve-tablet piece entitled the *Gilgamesh Epic*, an account of Gilgamesh's search for immortality. In the eleventh tablet Gilgamesh (king of Uruk, biblical Erech) interviewed Utnapishtim, the "Babylonian Noah," and learned from him the story of the flood and his securing of immortality. (*See* BABYLONIA IX.A.)

Subsequently an early Akkadian story of the flood, written in Mesopotamia about 1600 B.C. and known as the Atra-ḫasis Epic, and a Sumerian version of the Babylonian flood story (dating *ca.* 1700 B.C.) have come to light. The story in all these texts is similar and the flood hero is known variously as Ziusudra in Sumerian and Atra-ḫasis or Utnapishtim in Akkadian.

As the story goes, the god Enlil could not sleep because the increasing number of people on earth made too much noise, and he finally decided to destroy mankind by a flood. Another deity, Enki, partial to Utnapishtim or Atra-ḫasis, warned the hero and instructed him to build a boat and load it with his family and possessions, and with animals and birds. The flood lasted for seven days and seven nights, after which the boat landed on Mt. Nisir and the hero sent out three birds (a dove, a swallow, and a raven) to investigate the situation. Upon disembarking, Utnapishtim made an offering to the gods, after which he was granted immortality. (*See* RELIGIONS OF THE BIBLICAL WORLD: ASSYRIA AND BABYLONIA V.)

A comparison of the Genesis and Mesopotamian flood stories shows numerous similarities. Both accounts indicate that the flood was divinely planned and that the

disaster was revealed to the flood hero. Both accounts assert that the hero was divinely instructed to build a boat of large proportions in which a limited number of persons embarked along with other living creatures, and that those on board were not destroyed. Both accounts also specify the physical causes of the flood, its duration, the landing place of the boat, and the sending out of birds. And in both accounts the heroes offer a sacrifice after the flood is over, receive a divine blessing, and are given some assurance that a similar catastrophe will never again overtake mankind.

But the differences are far greater than the similarities. Most significant among them is that the Babylonian and Assyrian stories are (grossly) polytheistic, while the Genesis narrative is characterized by (an exalted) monotheism. Second, the Mesopotamian deluge comes as a result of the caprice of the gods or because mankind was so noisy that Enlil could not sleep, whereas the Genesis account gives human sin as the cause of the Flood. Third, in the Babylonian account an effort is made to hide from mankind the coming of the flood, but the biblical account gives abundant opportunity to repent. Fourth, Utnapishtim's ship was cubical, had seven stories, and was some fifteen times larger than Noah's ark. Fifth, the duration of the flood (rain) was different; Utnapishtim endured a rain of only seven days and nights. Sixth, Utnapishtim was granted immortality while Noah was not. There were also minor differences in the birds that were sent out, those who went aboard the ark, and the landing places of the boats.

Though the differences in these accounts are very great, the similarities are still amazing. Some scholars (the protagonists of higher criticism) commonly tried to explain these similarities by concluding that the Hebrews borrowed the flood account from Babylonian sources and merely purified it of polytheistic elements. But many contemporary biblical scholars find this view increasingly unacceptable because it is overly simplistic in its failure to account for differences between the two. More appealing is the view that both descended from a common original. After all, Genesis gives Mesopotamia as the original home of the Hebrews, the place where civilization first began, and where it made a fresh start after the Flood. What would be more likely than that many accounts of an early tragedy of such magnitude would be preserved by peoples who lived in Mesopotamia or had migrated from there. In accepting such a conclusion, divine inspiration is not ruled out. Biblical writers did not always write without access to source materials (cf. Lk. 1:1-4), but God overruled and directed in the choice of such materials, guaranteeing accuracy of the finished product.

Accounts of other flood narratives may be found in several works listed in the bibliography. The most extensive collection appears in Frazer's book.

I. Diversity of Species
II. Fertility and Climate in Historic Times
III. Identification of Plants
IV. Plant Zones in Palestine
  A. Coastal Plains and Western Mountains
  B. Jordan Valley
  C. Desert Zones
  D. Northern Mountains
V. Humans and Plants

I. Diversity of Species.–The flora of Palestine is exceptionally rich in species relative to the limited extent of the area. The number of indigenous species amounts, according to informed estimates, to about 2400, most of them annuals, the rest perennial herbs, shrubs, and trees.

Among the reasons for this diversity are the following factors. (1) The climate of Palestine, though generally of the Mediterranean pattern, i.e., with the year divided into a rainy winter and a dry, hot summer, displays a number of variants. On the snowcapped Mt. Hermon the climate approaches arctic severity, while in the lower Jordan Valley it is decidedly tropical. A number of climatic variants between these extremes can be distinguished, from the sand dunes and meadows of the western coastal region to the inland hills of central Palestine and the elevated plateaus E of the Jordan. Plants flourish in the warm springtime, rest in the summer, and grow again in winter. Many die through lack of water during the long summer months, but adaptation to conditions of heat and shortage of moisture has brought into prominence drought-resistant plants. The depredations of earlier centuries have resulted in large areas of Palestine, Syria, and Transjordan becoming barren; in some areas reforestation is being attempted, in the hope that rainfall will increase moderately.

(2) Topography, too, is extremely diverse in this country. Altitudes range from about 400 m. (1300 ft.) below sea level in the Dead Sea region to 1675 m. (5500 ft.) above in the highlands. Surface configuration varies among low and high beaches, open plains, intermountain valleys, rough mountainous areas, deep depressions, etc.

(3) Rocks and soils similarly display an array of varieties, both in their chemical make-up and in their physical constitution. Bare rocks of varied lithological character occur side by side with deep alluvial soils, salt marshes, sand dunes, and variously colored mountain soils.

This diversity of physical conditions divides the country into countless habitats, each harboring a flora and vegetation of its own.

(4) Time has also largely contributed to the richness of the flora. Palestine emerged from the sea in the Early Tertiary Age and was long subject to several changes in its flora in accordance with the changes of its climate. Repeated invasions and retreats of various floras during this long geological past have left their traces in the make-up of the present flora. Retreats have never been complete; hence there are many relic species of the floras that occupied this country during different geological periods.

(5) Another important factor is human interference with the vegetal environment. Destructive activity during the millennia has not only altered the make-up of the flora but has created numerous new secondary sites for alien plants that entered this country long before history.

II. Fertility and Climate in Historic Times.–Authorities differ on the issue of climatic changes in the period of human history. Some believe that no significant changes in climatic conditions have occurred since the Ice Age ended (cf. W. F. Albright, *FSAC*, pp. 108-112), while others assert that the migrations of Near Eastern peoples at the beginning of the 2nd millennium B.C. resulted from climatic conditions marked by drought (cf. N. Winkless, III and I. Browning, *Climate and the Affairs of Men* [1975],

pp. 140ff.). Two facts are important in this matter. (1) The climate of Syria-Palestine has remained virtually unchanged since the Middle Bronze Age (*ca.* 1900-1550 B.C.). References to the "former" and "latter" rains (Dt. 11:14; Jer. 5:24; Hos. 6:3), the frequent droughts (1 K. 17; Am. 4:6f.), and the welcome dew (Dt. 32:2; 2 S. 1:21; Mic. 5:7; etc.) accord with modern climatic estimates. Equally consonant are the most characteristic features of modern Palestinian flora — the olive, fig, vine, and almond, the oak and the terebinth. Additional confirmation is supplied by the widely distributed ruins of ancient hillside terraces and abandoned wells at sites where once cultivation flourished.

(2) The destruction of forests and thickets, abundant in ancient times, has been greatest during the last hundred years. With the removal of the trees the exposed land eroded, and the fertile topsoil was swept from the hillsides by the action of wind, rain, and animals such as the mountain goat. Neglect of the ancient terrace type of cultivation, which took greatest advantage of the natural contours of the land, contributed further to the erosion, which the modern inhabitants are trying desperately to remedy.

Since time immemorial much available wood has been used in the manufacture of charcoal. When clearing land for cultivation after the Arabs settled in Palestine, the fellahin invariably disposed of existing vegetation by burning it off, and such fires often burned far beyond the intended area (cf. Ps. 83:14 [MT 15]). Once erosion had begun, the rainfall swept over the denuded rocks to lower levels instead of trickling through the soil to replenish the springs beneath the surface. Consequently many underground water resources dried up, and streams began flowing into disease-breeding marshes. Even where soil erosion was less evident, the removal of vegetation increased the evaporation rate of the moisture in the soil, making the land infertile. By these means the gloomy predictions of the eighth-century B.C. prophets (Isa. 32:13; 33:9; Hos. 10:8) were fulfilled and have remained valid ever since. Despite the comparative stability of climatic conditions over the centuries, it is certain that the native vegetation of Palestine was far richer in antiquity than at present. This situation has presented serious problems for the modern state of Israel, and it will be many years before the efforts to reclaim and conserve natural resources will begin to redress the depredations of past centuries.

III. Identification of Plants.–A number of problems hinder the identification of biblical plants, and these are complicated by the introduction of some non-native species into Palestine during the last century or so. In a survey of the flora A. Eig estimated that only 115 plant species were truly native to Palestine. This compares with over 2000 types of plants growing there today. Moldenke (p. 5) has pointed out that it is fallacious to think that present plant species in Palestine have always existed there, or that one can identify biblical plants from existing flora. In the first place, as Linnaeus discovered, floras and faunas vary considerably, depending upon such factors as location, climate, and geological considerations. In the second, numbers of plants now thriving in Palestine are of comparatively recent introduction, such as the American locust (*Robinia pseudo-acacia* L.) and the American pricklypear cactus (*Opuntia ficus-indica* L. Mill.) Some nineteenth-century botanists thought that the pokeweed (*Phytolacca decandra* L.) was the hyssop mentioned in connection with the Passover (Ex. 12:22), unaware that it was actually an American species. In fact, the identification of "hyssop" is one of the most difficult botanical problems of Scripture. Several varieties of Australian eucalyptus trees have found climatic conditions in Palestine congenial. Apart from being attractive, quick-growing evergreens, they are of value in drying up marshes by absorbing great quantities of water through their roots. Other trees of recent introduction that flourish even better than the indigenous trees are the "Spanish pepper tree" (*Schinus molle*), the "pride of India" (*Melia azedaracht*), the Australian *Casuarina stricta,* and the *Ailanthus glandulosus,* a native of China.

IV. Plant Zones in Palestine.–Palestine is situated on the crossroads of four biogeographical regions: the Mediterranean, the Irano-Turanian, the Saharo-Arabian, and the Sudanian. Accordingly, Palestine has been divided by botanists into four plant-geographical territories, each with a flora and vegetation of its own, and each with its peculiar climatic conditions, soils, and even human culture.

A. Coastal Plains and Western Mountains. These have a distinctive Mediterranean flora. The maritime plain has a rich alluvial soil with abundant underground water resources. The annual mean temperature is 70°F, with considerable humidity, though less rainfall than in the uplands. Frost is extremely rare in this zone. Citrus groves flourish in the area, while vines and cereals are cultivated extensively, but the wild flora varies somewhat from that found in the mountains. The sycamore-fig (*Ficus sycomorus* L; AV "sycomore") grows abundantly in the lowlands around Jaffa, being unable to survive the temperature fluctuations of the mountains (cf. Ps. 78:47). In the Talmud one distinction between lower and upper Galilee was that the sycamore-fig flourished in the former and not in the latter. Like the common FIG (*Ficus carica* L.) it produces fruit several times each year. Sometimes known as "mulberry fig" or "fig mulberry," it is a sturdy evergreen growing to 9 or 12 m. (30 or 40 ft.) in height, with a trunk circumference of up to 6 m. (20 ft.). (*See also* SYCAMORE.) Another tree that reaches perfection in the warmer lowlands is the TAMARISK, of which there are several species. *Tamarix articulata* and *T. tetragyna* grow in sandy places such as deserts and beaches. They are gnarled and stunted in appearance, unlike the larger *T. pentendra* Pall., which grows in hill country and provides wood that can be used in building. *See* Plates 10, 13.

In the central mountain range and on Mt. Carmel the temperature varies from a few degrees of frost in the winter to periods in the summer when the heat is in excess of 27°C (80°F), though this is rather unusual. Even then a breeze usually blows inland from the Mediterranean. These conditions are favorable for the fig, vine, and olive, while in gardens and sheltered areas it is possible to grow trees such as peach, plum, pomegranate, walnut, apple, and almond. In various areas of the mountain uplands wheat and barley are grown, while districts such as the Dothan Valley still produce the grain crops for which they were known in antiquity. *See* Plates 8, 14. In wadis leading from Transjordan to the Jordan Valley, in the Jordan Valley itself, and around the Sea of Galilee and elsewhere are masses of oleander (*Nerium oleander* L.). It is a beautiful evergreen shrub which can grow to 12 feet in height and bears clusters of white or pink flowers. For all its beauty the plant is highly poisonous.

A massive tree that flourishes in watery habitats is the *Platanus orientalis* L., or PLANE TREE, found throughout Lebanon and Syria but only rarely in northern Palestine. It often reaches a height in excess of 18 m. (60 ft.) with a maximum trunk circumference of 12 m. (40 ft.). It is usually mentioned in Scripture along with willows and POPLARS, which thrive in a similar habitat. Some eight varieties of willow have been reported, along with one

native poplar. The Lombardy poplar, an imported species, is widely cultivated, while the walnut (*Juglans regia* L.), originally from Persia and northern India, flourishes in the Damascus region and elsewhere.

The southern hackberry or nettle tree (*Celtis australis*), a member of the *Ulmaceae* closely related to the elm, is extensively planted. It attains a maximum height of 9 m. (30 ft.) and yields a finely grained wood which takes a high polish. The carob (*Ceratonia siliqua* L.), an attractive evergreen bearing dense glistening foliage, is conspicuous in Palestine, especially in the lower mountain region. Its long pods, the "husks" of Lk. 15:16, contain seeds similar to peas, embedded in pulp. The pods are used now, as in antiquity, for feeding horses and cattle.

According to Moldenke, some twenty-four kinds of *Quercus* occur in Palestine, including the *Q. calliprinos*, a small OAK infested by an insect *Coccus ilicis*, which secretes a scarlet dye (cf. Ex. 25:4; 26:1; etc.). Another widely distributed tree closely allied to the oak both in the OT and by modern interpreters — although botanically quite distinct — is the TEREBINTH, *Pistacia terebinthus* L. It generally grows in localities that are too warm for the oak, and from it is extracted the commercial Cyprus turpentine.

Several important shrubs are found on the limestone hills and in sandy areas. *Pistacia lentiscus* L., the lentisk or MASTIC tree, is commonly distributed throughout Palestine. A bushy evergreen, it yields a fragrant gum identified by some with the OT balm. The bay laurel (*Laurus nobilis* L.), a tall and compact evergreen, flourishes in the Mediterranean region. Laurel crowns adorned the heads of Greek and Roman heroes, priests, and poets, and denoted victory in the Pythian and Olympic games. To the psalmist its evergreen nature and spicy fragrance symbolized prosperity (Ps. 37:35, AV). The tree was conspicuous in classical mythology, being sacred to Apollo. The leaves, roots, and bark had a reputed medicinal value. The MYRTLE (*Myrtus communis* L.) is commonly found in Lebanon and Palestine as a straggling bush of a few feet in height that in favorable locations seldom exceeds 1 m. (3 ft.). Its dark, fragrant leaves and aromatic berries were used in antiquity to manufacture perfumes. Prominent in the original Feast of Tabernacles, the myrtle symbolized justice, peace, and joy. A small and now rather rare shrub, the butcher's broom (*Ruscus aculeatus* L.), has flattened leaflike branches which bear small greenish flowers and red berries in such a way that they appear to arise from the center of the midrib to the leaf. One attractive species of *Arbutus*, a shrub that often exceeds 8 m. (25 ft.) in height, is found in the coastal plain and in the highlands. The *A. andrachne* has a smooth red bark which peels off to reveal a red inner surface and bears small orange-colored edible berries. The OLEASTER (*Elaeagnus angustifolia* L.), a small graceful shrub with silvery leaves and fragrant white blossoms, is commonly found in Palestine, although it is not native to the country. "Oleaster" is a name associated with one variety of the olive tree, and in translations the name of the shrub is variously rendered "oil tree" (Isa. 41:19, AV), "oil" (Mic. 6:7), "olive tree" (1 K. 6:23, 31f.; 1 Ch. 27:28; Isa. 41:19, RSV), and "wild olive" (NEB). It is now evident that the true "oil tree" is the *Pinus halepensis* Mill., or *P. maritima* Mill., which is native to the Mediterranean area. Another attractive shrub is the styrax (*Styrax officinalis* L.), which bears beautiful white flowers similar to orange blossoms. The exudate obtained from the incised stems was highly prized as a perfume in antiquity. The storax of modern commerce is derived from an unrelated tree, *Liquidambar orientale*. The common caperberry (*Capparis sicula* Duham.) grows profusely also, often covering rocks and ruins in the manner of a creeper. The young buds were used from early times as a condiment. Their effect in stimulating hunger and thirst, which become less acute in old age through atrophy of the tastebuds, is referred to in Eccl. 12:5. The manner in which the ripe fruit hung down on long stalks suggested to the oriental mind the figure of a drooping, aged man. Several species of *Cistus* flourish on Palestinian mountains and hills. The commercial oleoresin ladanum has been extracted from one of these bushes and was probably the "myrrh" of Gen. 37:25; 43:11.

Widely distributed in Palestine are many varieties of prickly shrubs described in Scripture as "briers" and "thorns." Many commentators have supposed that the genus *Rubus* or Palestinian bramble is indicated in all instances, but this is incorrect. Thus the "bramble" of Jgs. 9:14 is probably *Lycium europaeum* L., the European boxthorn, while the reference in Isa. 34:13 may be to the Syrian thistle (*Notobasis syriaca* L.) or the spotted golden thistle (*Scolymus maculatus* L.). The "thorn" of Ps. 58:9 [MT 10] appears to be the species *Rhamnus palaestina* Boiss., or Palestinian buckthorn, while in Jgs. 8:7; Isa. 7:19; 55:13; Mt. 7:16, the reference is possibly to the shrub *Zizyphus spina-christi* or Syrian Christ-thorn. In Mt. 13:7 and He. 6:8 the species *Centaurea iberica* Trev. may be intended, while in Isa. 34:13 and Hos. 9:6 the allusion is probably to *Xanthium spinosum* L., a prickly burweed. *See* Plate 5; *see also* THORN.

Although the rose is commonly mentioned in English translations (e.g., AV Isa. 35:1), there has been much dispute regarding the exact nature of the species mentioned. The "rose of Sharon" (Cant. 2:1) has been variously identified with *Narcissus tazetta* L., *Anemone coronaria* L., *Cistus creticus* L., and others, the most probable one, however, being *Tulipa montana* Lindl., common in the mountains of Palestine. The reference in Isa. 35:1 (AV; RSV "crocus") is to a bulbous plant, of which the most logical is the *Narcissus tazetta* L. or polyanthus narcissus. This may perhaps be the "rose" of Sir. 50:8, whereas those mentioned in Sir. 24:14 and 39:13 may have been the oleander (*Nerium oleander* L.), a colorful shrub flourishing in Palestinian wadis and watercourses. Probably the "roses" of 2 Esd. 2:19 and Wisd. 2:8 were Phoenician roses (*Rosa phoenicia* Boiss.), commonly found in Palestine. Though now only two species of true roses grow in the Holy Land, they afford little help in identifying the biblical "roses."

Spring flowers bloom profusely in this area, beginning with the CROCUS and cyclamen, and followed by narcissi, several varieties of anemone, gladioli, irises, FLAX, mountain lilies (*see* LILY), ranunculuses, and many others. When the blooms have disappeared further color is provided by varieties of the thistles and the glossy leaves of some evergreens. *See* Plates 9, 12.

B. Jordan Valley. The flora here has affinities with that of Africa. Prominent are several species of acacia, which in desert areas are often the only surviving trees. According to many authorities, the "shittim wood" was one of the acacias, either *A. seyal* Delile or *A. tortilis* Hayne, since these species alone provide timber to any extent. They now grow in areas E of the Dead Sea, in the Sinai Peninsula, and elsewhere in barren regions. In favorable locations these species attain a height of 8 m. (25 ft.), but in the desert they are gnarled, stunted, and shrublike in appearance. The bark is used in tanning leather, and gum arabic is derived from *A. seyal* and *A. arabica*, neither of which, however, actually grows in Palestine.

Characteristic of the entire region are species of the

zizyphus ("thorns," RSV, e.g., Jgs. 8:7), the most common of which is the *Z. spina-christi* (L.) Willd. It bears greenish flowers and rounded fruit, and under favorable conditions attains a height of 5 m. (15 ft.) A related species, the jujube (*Z. vulgaris* Lam.), a native of the Orient, has an edible berry-like fruit similar to an olive. Also common is the Levantine LOTUS bush (*Z. lotus* [L.] Lam.), a shrub that bears pale green flowers and pea-sized fruit. This bush may be the "shady tree" of Job 40:21f. (so RSV). Another shrub widely distributed in this region is the Jericho balsam, *Balanites aegyptiaca* (L.) Delile. In antiquity the oil was extracted from the fruit for medicinal usage, and this substance has been identified by some with the BALM OF GILEAD in Jer. 8:22; 46:11; 51:8; and perhaps in Gen. 37:25. A nauseous plant commonly found in the Dead Sea region is the colocynth, *Citrullus colocynthis* (L.) Schrad. This "vine of Sodom" (Dt. 32:32) has long straggling tendrils bearing atttractive orange-colored fruits. These, however, contain merely a dusty powder surrounding the seeds and are extremely nauseous. The colocynth may have been envisaged when some OT writers spoke of "gall" or "poison" (cf. Dt. 29:18; Ps. 69:21 [MT 22]; Jer. 9:15; 23:15). The neighborhood of the Dead Sea is also notable for species of plants that flourish in the saline marshes, and these include several kinds of saltwort (*Salsola*). Of the latter there are twelve kinds in Palestine, and in biblical times some of these plants were burned to obtain the alkaline salts (potash) which were then mixed with olive oil to make soap (e.g., Jer. 2:22; Mic. 3:2, according to *MPB*, pp. 215f.).

In various parts of the Jordan Valley several species of WILLOW are to be found, including *Salix alba* and *S. acmophylla* Boiss., the latter being the most common willow. The Egyptian bulrush (*Cyperus papyrus* L.) also thrives in the Huleh swamps beside the Jordan, though it is extinct in many other parts of Palestine. PAPYRUS was the source of the earliest form of paper. The TAMARISK (*Tamarix articulata* Vahl, *T. deserti* Boiss., etc.) abounds on saline flats and sandy locations in this general area, and is a valuable source of wood and charcoal.

The OLIVE TREE (*Olea europaea* L.) is represented here as elsewhere, and another familiar biblical tree, the PALM TREE (*Phoenix dactylifera* L.), was as characteristic of ancient Palestine as of Egypt. Its fruit was a staple dietary item, while the leaves and wood were used in building. The ancient Babylonians made an intoxicating drink from date flowers, and this may have been the "honey" of certain OT passages (e.g., Gen. 43:11; 1 S. 14:25-30; Ps. 19:10 [MT 11]). *See* Plate 4.

C. Desert Zones. These are notable for the absence of trees and for the stunted, straggly appearance of the small shrubs that grow there. Species of thistles and thorny plants such as *Notobasis syriaca* (L.) Cass. and *Scolymus maculatus* L. are among the numerous kinds with which Palestine abounds. In such sandy areas as the eastern Negeb and Edom, as well as other places in Palestine, the *Retama raetam* (Forsk.) or white broom flourishes, to the delight of travelers. It is a small, compact bush with rather sparse foliage and clusters of fragrant white flowers. Other forms of sandy desert vegetation include species of *Salsola* or saltwort, *Zygophyllum, Haloxylon persicum,* and *H. salicornicum.* Saline desert vegetation includes species of tamarisk such as *Tamarix articulata* Vahl and *T. deserti* Boiss, *Atriplex,* and varieties of *Salsola.* The lack of an adequate water supply stunts the majority of species, which often grow larger in other regions. *See* Plate 19.

D. Northern Mountains. No reference to Palestinian flora would be complete without some mention of the FIR TREE. Where this attractive tree is alluded to in Scripture, the reference is most frequently to the Aleppo pine, (*Pinus halepensis* Mill.), which flourishes in Palestine and Lebanon. A native of the Mediterranean area, its wood is comparable to that of the Lebanon cedar. An even more elegant species is the stone pine, *Pinus pinea* L., which has a hemispheric top and horizontal lower branches that are frequently removed to produce an ornamental umbrella-like effect. This tree, the stone pine, may be the one referred to in Hos. 14:8, the "fruit" being an edible nutlike seed with an almond flavor. The most characteristic member of this order of trees is the CEDAR (*Cedrus libani* Loud., var. *Pinus cedrus* L.), by far the tallest and most massive tree in Palestine. It grows rapidly, attaining a maximum height of 37 m. (120 ft.), and often has a trunk diameter exceeding 2 m. (6 ft.) Once widely distributed in the Lebanon and elsewhere, it is now reportedly restricted to a few areas of the Lebanon Range. Two species of heather (*Erica orientalis* Dyer; *E. verticillata*) are said to grow here, and of two species of juniper occurring in Palestine, the brown-berried cedar (*Juniperus oxycedrus* L.) is rare in the northern mountain areas. *See* Plate 11.

Above the height of 2100 m. (7000 ft.) trees and shrubs disappear, vegetation thereafter consisting chiefly of low thorny plants such as the *Astragalus* (especially *A. tragacantha* and *A. gummifer*) and Cerasus (*C. prostata*) species. Even on the summit of Hermon many tiny flowers bloom in the late summer after the snow has melted.

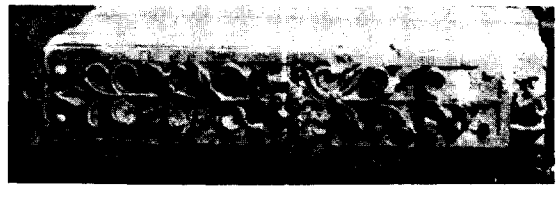
V. Humans and Plants.—Recent discoveries in Palestine and neighboring countries have cast much light on human antiquity in Southwest Asia. Excavations in the upper Jordan Valley have brought to light human habitations, artifacts, and animal remnants of the Villafranchen period of the Lower Pleistocene.

A very long span of time elapsed between that era and the better-known Mesolithic period. It is now fairly certain that *ca.* 10,000-8000 B.C. many relatively developed cultures occurred in this region. Among these the Natufian culture, which can be synchronized with the period of the invention of food production, was the most eminent. The early types of farming — formation of crop plants from local wild ancestors and domestication of animals — was no doubt not a speciality of the Jarmo population on the Western slopes of the Zagros Mountains, but started simultaneously or successively along the whole Fertile Crescent, which abounds with prehistoric sites from that period and possesses all those properties that have sponsored or favored food production in Jarmo.

From that period on, devastation of the vegetation for farming assumed ever increasing dimensions, while domestication of animals changed the composition of the primeval vegetation enormously. Besides producing food, humans continued destroying vegetation by collecting plants for fuel, industries, buildings, etc. Even today, wild plants are being used for a variety of purposes:

(1) Food for mankind. There are hundreds of species of plants among the local vegetation of which various parts

Nabatean floral ornamentation from Khirbet Brak near Petra (E. K. Vogel; picture N. Glueck)



are edible. These plants are still collected by peasants and bedouin and some are even sold in the markets. There were no doubt many more of them in the past.

(2) Pasture and forage. A tremendous number of pasture plants still occur in the local vegetation, despite thousands of years of uncontrolled grazing.

(3) Medicinal plants. Folk medicine is a very common feature in the Middle Eastern countries. Many plants are used in healing external and internal diseases, and drugs from local plants are also sold in the markets.

(4) Forest and fruit trees. Some of the local tree species have since ancient times been used in afforestation or taken into cultivation as fruit trees. Of indigenous trees one might mention the cypress, the pine, the carob, the almond, and the olive tree.

(5) Ornamentals. Many indigenous species are known as ornamental plants (e.g., the myrtle, cistus, lily, antirrhinum, and spartium). Ancestral strains of some cultivated cereals such as wheat, barley, and oats are still growing wild in this country. Of other cultivated plants (e.g., clovers, flax, carthamus, vetches, lentils) the ancestral stocks are probably indigenous to Palestine.

The introduction of alien plants from almost all the main regions of the world, noted earlier, is yet another way in which humans have changed the primeval landscape. It can be concluded that if changes occurred in the vegetation during the Pleistocene these were due less to fluctuations in climate than to the influence of mankind.

FLOUR. *See* BREAD III, IV; FOOD II.

FLOURISH. The RSV uses this term only in the OT. It translates several Hebrew verbs with various shades of meaning: (1) *pārah* (cf. Akk. *parāḫu*), "sprout, break forth" (Ps. 72:7; 92:12f. [MT 13f.]; Prov. 11:28; 14:11; Isa. 66:14; Ezk. 17:24; Hos. 13:15, AV "be fruitful"; 14:7, AV "revive," NEB "grow"); (2) *ṣûṣ,* "blossom" (Ps. 90:6; 92:7 [MT 8]; 103:15); (3) *nûḇ,* "thrive" (Zec. 9:17 AV "cheerful," NEB "strengthen").

FLOW. This term translates several Hebrew and Greek words. Figuratively, Palestine is portrayed as a land "flowing [Heb. *zûḇ*] with milk and honey" (e.g., Ex. 3:8; Jer. 11:5; Ezk. 20:6; note the Ugaritic parallel in *UT* 49:iii: 6f., 12f.); its hills are covered with milk and its streams flow with water (Heb. *hālaḵ,* Joel 3:18 [MT 4:18]). In Job 20:17 the NEB attempts to improve the sense and parallelism of MT *pᵉlaggôṯ nahᵃrê naḥᵃlê* (lit. "canals, rivers of, wadis of"; cf. AV) by taking the second term as a reference to "cream." (The RSV prefers a lesser emendation and translates the third term as a verb, although this verb does not occur in the OT.) M. Dahood's suggestion (*Bibl.,* 48 [1967], 437) to understand *nhr* as "oil," though not without its problems, accomplishes what others attempt by emendation, namely, improving the sense and parallelism (see comms.). In Am. 9:13 the RSV renders the hithpoel of *mûg* as "flow," apparently to enhance the parallelism; in its other occurrences (Ps. 107:26; Nah. 1:5) the RSV uses "melt" (so AV; cf. KD *in loc.*). But Palestine's mountains may also flow with human blood (niphal of Heb. *māsas,* Isa. 34:3; cf. *exérchomai,* Rev. 14:20; the RSV slightly emends Ezk. 32:6, changing MT *ṣāpāṯᵉḵā* [<**ṣāpâ,* a hapax legomenon] to **ṣāpôṯ,* fem. pl. part. of *ṣûp,* "flow").

Human sadness is expressed by eyes "flowing with tears" (*yāraḏ,* lit. "descend," Lam. 1:16; 3:48f.). God's care for the widow was such that the oil stopped flowing only when the need was met (Heb. *ʿāmaḏ,* "cease moving," 2 K. 4:6).

In eschatological visions people will flow like a river to God (Heb. *nāhar,* Isa. 2:2 par. Mic. 4:1) in contrast to those who now flock to Bel in Babylon (Heb. *nāhar,* Jer. 51:44).

For the expression "flow of blood" (Heb. *māqôr,* "well," Lev. 12:7; Gk. *rhýsis,* Mk. 5:25 par.) *see* DISEASE IV.G; for the symbolic meaning of flowing/living water(s) *see* WATER.

See RIVER.

R. W. V.

FLOWER; BLOSSOM; BLOOM; etc. [Heb. *peraḥ, ṣîṣ, ṣîṣâ, niṣâ, niṣān, nēṣ, ʾēḇ,* vbs. *pāraḥ, nûṣ, ṣûṣ, ṣāmaḥ*; Gk. *ánthos*].

The Heb. *peraḥ* (from *pāraḥ,* "break forth") denotes an early stage of flowering (Isa. 5:24; cf. 35:1f.; Nah. 1:4). It is used in Ex. 25:31-34 for the flowers molded on the candlesticks. Flowers as architectural ornaments are mentioned in 1 K. 6 (*ṣîṣ*); the same word indicates actual flowers in Job 14:2; Ps. 103:15; Isa. 28:1; 40:6-8.

The beauty and profusion of the Palestinian spring flowers seem largely taken for granted in the OT (cf. Cant. 2:12), though mentioned by Christ (Mt. 6:28; Lk. 12:27). The dramatic manner in which the flowers burst into bloom for a few short weeks in spring and then fade into masses of withered leaves and stalks was regarded as an apt illustration of the evanescent nature of human life (Job 14:2; Ps. 103:15; Isa. 40:6; Jas. 1:10).

See also FLORA.

R. K. H.

FLUTE [Heb. *ḥālîl* (e.g., 1 S. 10:5); Gk. *aulós* (1 Cor. 14:7)]. *See* MUSIC II.C.

FLUX. Archaic in the AV of Acts 28:8 for DYSENTERY.

FLY; FLIES [Heb. *ʿārōḇ*; Gk. *kynómuia*–'dogfly'] (Ex. 8:21f., 24, 29, 31; Ps. 78:45; 105:31); [Heb. *zᵉḇûḇ*; Gk. *muíai*–'flies'; cf. Akk. *zumbu*; Arab. *dhubâb*–'fly,' 'bee'] (Eccl. 10:1; Isa. 7:18). The term *ʿārōḇ* alludes to a mixture of different types of insects, hence a swarm. It was associated with the fourth Egyptian plague and could have included the common housefly (*Musca domestica*), the Tabanid fly (*Stomoxys calcitrans*), or the Barghash midge. The word *zᵉḇûḇ* has been interpreted as the common housefly, but Isa. 7:18 implies a more vicious species such as the horsefly (*Tabanus arenivagus*). The god of flies, Baal-zebub, was worshiped at Ekron (cf. 2 K. 1:2-16; Mt. 10:25; 12:24, 27; Lk. 11:15, 18f.). *See also* ZOOLOGY.

FLY (vb.); **FLY AWAY; FLYING** [Heb. *ʿûp*] (e.g., 2 S. 22:11; Prov. 23:5; 26:2; Isa. 14:29; 30:6; 60:8; Hos. 9:11; Hab. 1:8; Zec. 5:1f.); AV also FLEE (Nah. 3:16); NEB also SWEEPING, "quickly pass" (Ps. 90:10), "spread in flight" (Isa. 6:2); [*nāṣō*] (Jer. 48:9); AV FLEE; [*dāʾâ*] (Dt. 28:49; Ps. 18:10 [MT 11]; Jer. 48:40; 49:22); NEB also SWOOP (Dt. 28:49), "swoop down" (Jer. 48:40; 49:22); [*ṣippôr*] (Ps. 148:10); NEB WINGED; [*nāḏaḏ*]

(Nah. 3:7); AV FLEE; NEB SCURRY; [Gk. *pétomai*] (Rev. 4:7; 8:13; etc.); NEB "in flight" (Rev. 4:7); [*pheúgō*] (Rev. 9:6); AV FLEE; NEB ELUDE.

There are two basic meanings of the terms: (1) to move through the air — generally of birds (e.g., Gen. 1:20; Dt. 4:17), but also of sparks (Job 5:7), angels (Rev. 14:6), seraphim (Isa. 6:2, 6), and arrows (Ps. 91:5); (2) to disappear (e.g., Job 20:8) or escape (e.g., Ps. 55:6 [MT 7]). *Ṣippôr* (Aram.-Syr. *ṣeprâ*) is usually taken to be a generic term for "bird"; but according to Driver and Thomas it means "sparrow" (cf. Ps. 84:3 [MT 4]; Prov. 26:2). *Dā'â* (Ug. *d'y*; cf. Dahood) is used of the eagle as a bird that swoops (*CHAL* and Driver), soars (*CHAL*), or pounces (KoB).

Bibliography.—G. R. Driver, *PEQ*, 1955, pp. 5-20, 129-140; D. Winton Thomas, *VT*, 14 (1964), 114-16; M. Dahood, *Bibl.*, 45 (1964), 393-412. J. T. DENNISON, JR.

FOAL. *See* COLT.

FOAM [Heb. *ḥāmar*] (Ps. 46:3 [MT 4]; 75:8 [MT 9]); AV "be troubled," "red"; NEB also "seethe with tumult"; [Gk. *aphrízō* (Mk. 9:18, 20), *epaphrízō* (Jude 13). *metá aphroú* (Lk. 9:39)]. The Hebrew verb has two basic meanings: "foam" or "ferment," and "be reddened" (KoB, p. 312); hence the AV rendering of Ps. 75:8 (MT 9). The term probably refers here to wine that is still fermenting.

The NT terms are all based on Gk. *aphrós*, a medical term for the foam that appears in the mouth during an epileptic seizure. In Jude Gk. *epaphrízō* is used figuratively of the evildoers who foam up shameful deeds as the sea tosses foam and refuse onto the beach. N. J. O.

FOE. *See* ENEMY; PSALMS VI.A.

FOLD; SHEEPFOLD [Heb. *nāweh*] (Job 5:24; Jer. 23:3; 49:19f.; 50:44f.); AV also HABITATION; NEB HOME, PASTURE; [*mā'ôn*] (Jer. 25:30); AV HABITATION; NEB "the heavens, his home"; [*rēḇeṣ*] (Jer. 50:6); AV RESTING PLACE; [*marbēṣ*] (Ezk. 25:5); AV COUCHING PLACE; NEB SHEEP-WALK; [*dōḇer*] (Mic. 2:12); [*miḵlâ*] (Ps. 50:9; 78:70; Hab. 3:17); [*gᵉḏērâ*] (Nu. 32:16, 24, 36; Zeph. 2:6); [*nā'â*] (Jer. 25:37); AV HABITATION; NEB HOMESTEAD; [*mišpᵉṯayim*] (Gen. 49:14; Jgs. 5:16); AV also BURDENS; NEB CATTLE-PENS; [*šᵉpattayim*] (Ps. 68:13 [MT 14]); AV POTS; [*giḏrôṯ haṣṣō'n*] (1 S. 24:3 [MT 4]); AV SHEEPCOTE; [*ʿᵃwērôṯ*] (2 Ch. 32:28); AV COTES; [Gk. *aulḗ* (*tôn probátōn*)] (Jn. 10:1, 16).

In the RSV "fold" and "sheepfold" are used for a number of OT terms with a variety of meanings. Heb. *gᵉḏērâ* means literally a "wall" or "hedge" made of stones, which might be used for a defense or a fold. *Rēḇeṣ* and *marbēṣ*, on the other hand, denote "a place to lie down." *Mišpᵉṯayim* occurs only twice (see above), and scholars are not certain of its meaning. KoB (p. 580) suggests "both saddlebags (of an ass of burden with which he likes to lie down stubbornly)"; similarly, for *šᵉpattayim* KoB (p. 1006) suggests "places where to set down things" or "pack-saddles." In 2 Ch. 32:28 *ʿᵃwērôṯ* may be an error for *'ûrāwôṯ* (KoB "stall" [p. 84]).

The setting of this concept is generally a place of habitation for sheep and goats. The fold is their home, their place of security (Mic. 2:12). Folds were an essential part of ancient community life. They were built along with the cities (Nu. 32:24, 36). The fold as well as the house was an essential part of a person's belongings. If this is true, "fold" (RSV) is the better translation in Job 5:24 than "home" (NEB), for it stands parallel to tent; i.e., the blessed man has security both in his own house or tent and with his valuables or fold.

"Fold" is used in a metaphorical sense for the habitation of the people of God (Jer. 23:2f.). They are the flock and Jesus is their shepherd (Jn. 10:1, 16); He is the only way into His sheepfold. Once in a while "fold" can refer to the flock itself (Jer. 25:30). The NEB, however, understands that text differently as the habitation of God; "(The Lord) roars across the heavens, his home." In the end of days God will restore Israel to "a good fold" (AV) on the mountains of Israel (Ezk. 34:14).

FOLLOW [Heb. *yālaḵ 'aḥar* (Gen. 24:5, 8, 39, etc.), *'aḥᵃrê-ḵēn* (Gen. 41:31), *rāḏap* (Gen. 44:4), *regel*–'at the foot of' (Ex. 11:8), *tûr* (Nu. 15:39), *'āśâ* (2 S. 17:23), *hālaḵ 'aḥar* (Gen. 32:19; Dt. 4:3), *'aḥar*–'after' (e.g., Nu. 14:24; 32:11; Dt. 12:30), *zā'aq 'aḥar* (Jgs. 6:34f.; lit. "be called together after"), *ḥāṿâ 'aḥar* (1 S. 12:14), *māšaḵ* (Job 21:33), *yāṣā' 'aḥar* (2 S. 11:8), *dāḇēq*–'cling to' (Jer. 42:16)]; AV also PURSUE AFTER, COME AFTER, WALK AFTER, GATHER AFTER, DRAW AFTER, etc.; NEB also GO AFTER, PURSUE, IMITATE, etc.; [Gk. *akolouthéō*, *epakolouthéō*, *exakolouthéō* (2 Pet. 1:16; 2:2, 15), *katakolouthéō* (Lk. 23:55; Acts 16:17), *synakolouthéō* (Mk. 5:37; Lk. 23:49), *deúte opísō*, *diṓkō*–'pursue' (17:23), *katadiṓkō* (Mk. 1:36), *stoichéō toís íchnesín*, *échō*–'cling to' (Lk. 13:33; 2 Tim. 1:13), *peíthomai*–'believe,' 'obey' (Acts 5:36f.), *eímí*, *peripatéō* (2 Jn. 6; 3 Jn. 3f.), *apérchomai opísō* (Mk. 1:20), *thaumázō opísō*–'wonder after' (Rev. 13:3), *gínomai* (Rev. 8:7)]; AV also COME AFTER, HOLD FAST, WALK AFTER, etc.; NEB also COME WITH, WALK IN, "keep before you," OBEY, etc.

A common OT meaning is that of "walking behind" or "going with" someone (Gen. 24:5; Josh. 3:3; 2 K. 6:19). It can also refer to "setting off after someone to catch him," often with hostile intentions (*rāḏap* in Gen. 44:4). Perhaps it was the remembrance of divine benevolence in the face of enemy persecution that led the psalmist to choose this word in Ps. 23:6. "Follow" is also used in the sense of adherence to a leader (Jgs. 8:5; 1 S. 25:27; 2 S. 20:11). Theologically, especially in the Deuteronomic writings and Jeremiah, it means adherence to a god or to God. It then becomes an almost technical term, describing the going after other gods and the apostasy of the people, which is their basic sin (*TDNT*, I, 211; cf. Dt. 16:20; 18:9; 1 K. 18:21; Jer. 3:17; 13:10; 18:12).

The NT never applies the phrase to "following after God," but the early Christian community initiated the expression "following after Christ." This referred to the life of Christian discipleship and is the figurative use of the verb *akolouthéō*, which literally means to "come after" (cf. Mk. 14:13; Lk. 22:10; Jn. 10:4f.). Except for Rev. 14:4, 13, this discipleship aspect of "follow" occurs only in the four Gospels. The command to "follow" is absolute (Mt. 8:22; Lk. 18:22); the disciples did what the rabbis' students did, only with an "internal attachment to Jesus." (The traditional master-student relationship involved the rabbis' going ahead, perhaps riding on an ass, with their pupils following behind at an appropriate distance [*TDNT*, I, 213].) Jesus gave this type of "following" a new content—Himself. Participation includes "personal surrender to his summons, and acceptance of his leadership" (Taylor, p. 169) and participation in His suffering and outcome (Mt. 8:19-22; Mk. 8:34; Jn. 12:25f.).

A related word, *synakolouthéō*, means to "accompany someone" (Jn. 13:36; Mk. 5:37), and in Lk. 23:49 has the connotation perhaps of "being a disciple." The forceful-

ness of the command "Follow!" is found in the imperative *deúte opísō* ("Follow me!" in Mt. 4:19; Mk. 1:17; cf. *deúro akolouthéō* in Mt. 19:21, etc.).

Ethical conduct is related to the other NT words for "follow." Jesus warned His disciples not "to run after" or "pursue" (*diṓkō*) those claiming to be the Son of man in Lk. 17:23. Paul exhorts his readers to be "drawn up in a line with" or to "keep in the footsteps of" the faith of Abraham (*stoichéō* in Rom. 4:12). This is also the meaning of *epakolouthéō* in 1 Pet. 2:21, where believers follow in the footsteps of the suffering of Christ (*see* EXAMPLE). *Exakolouthéō*, used figuratively in 2 Pet. 1:16, means to follow in the sense of obedience to an authority, here an impersonal authority (cf. Josephus *Ant.* i.22).

In the Epistles of John, Christ's "walk of life" is the norm for believers' conduct (2 Jn. 6a). The state in which they live or ought to live is what they should "follow" (*peripatéō*); they are commanded to follow love (2 Jn. 6b) and the truth (3 Jn. 3f.).

Timothy is urged to "keep" or "preserve" (*échō*) the example of sound teaching in 2 Tim. 1:13 while Gk. *to esómenon*, "what was going to happen," colloquially stands for "what would follow" (Lk. 22:49; cf. Sir. 48:25).

FOLLOWER. *See* IMITATE.

FOLLY. *See* FOOL.

FONDLING [Heb. piel of *ṣāḥaq*] (Gen. 26:8); AV SPORTING; NEB LAUGH. In the qal, *ṣāḥaq* means to "laugh." In the piel it has the meaning of "play," "jest," "amuse oneself," etc. Used with the object Heb. *'ištô* ("his wife"), the term probably refers to conjugal caresses. In any case, the behavior of Isaac and Rebekah indicated to Abimelech king of the Philistines that they were husband and wife.

FOOD [Heb. *'ōḵel, 'oḵlâ, leḥem, ma'ᵃḵāl, makkōleṯ, māzôn, ṣayiḏ, 'ᵃḵîlâ, bûl, šᵉ'ēr*; Gk. *brṓsis, diatrophḗ, trophē*].

I. Mineral Food
II. Vegetable Food
III. Animal Food
IV. Food Preparation
V. Food Regulations
VI. Food Supply

This article is limited to the foodstuffs used in Israel in biblical times, specifically to those kinds of food that are explicitly mentioned in the Bible, though it may be assumed confidently that there were many more. The Mishnah and Talmud mention many varieties of vegetable food that are not found in Scripture. The list could be supplemented further by comparing the Egyptian or Babylonian diet, but there is no reason to assume that every food known in these countries was also used in Israel. Even more caution is needed when comparing present-day conditions in the East with those of biblical times. Several very common kinds of food (e.g., rice, tomatoes, maize) were wholly unknown in biblical times.

I. Mineral Food.–In biblical times, as in other times, there were only two kinds of food that were not products of the animal or vegetable kingdom: water and salt. The first was obtained from rivers, lakes, springs, wells, and cisterns; the second was produced from the Mediterranean, but especially from the Dead Sea. Josh. 15:62 mentions "the City of Salt" (Heb. *'îr hammelaḥ*), which is possibly to be identified with Qumrân, where the Dead Sea Scrolls were found.

II. Vegetable Food.–Though some scholars infer from a comparison between Gen. 1:29f. and 9:3 that divine permission to eat the flesh of animals was first given after the Deluge, it is more probable that mankind from the beginning made use of both animal and vegetable food. The dominion given to humans over animals (Gen. 1:26) included the eating of them, as dominion over fish at least cannot mean anything else. Abel's sacrifice (4:4) supposed the eating of mutton: mankind offered to the Divinity what he himself ate. The distinction between clean and unclean animals in the ark has no meaning if meat was not eaten (7:2). Prehistoric findings point to primitive man as an omnivore. It is only after settling down as an agriculturist that humans became chiefly eaters of vegetable food. Seminomads like the patriarchs combined both categories (18:5-8). They were prepared to go on lengthy travels (42:1-3, etc.) or even to leave their accustomed abodes (12:10, etc.) in order to get their supply of grain.

After the conquest of Canaan, Israel gradually became an agricultural nation with bread as its staple food. This was made of cereals, which therefore are to be mentioned first among the foodstuffs of the Bible. The most important grains of the Bible were WHEAT and BARLEY; the latter, though mainly used as a fodder, was often eaten in expectation of the wheat harvest, frequently by the poor, and in general when wheat was scarce. Other grains were MILLET and SPELT (Ezk. 4:9; Ex. 9:32; Isa. 28:25). The most primitive way to eat grain was to pluck fresh ears, remove the husks by rubbing in the hands, and eat the grains raw (Lev. 23:14; Dt. 23:25; 2 K. 4:42; Mt. 12:1 par.). A slightly more advanced method was to roast fresh ears and eat the grain unground (e.g., Lev. 2:14, as a sacrificial gift); Lev. 23:14 means perhaps the same, though it is possible to understand here (as in 1 S. 17:17; 25:18; 2 S. 17:28) roasted grain that has been threshed beforehand. In Ruth 2:14, however, one could think of roasted ears, harvested and parched on the field. After being crushed in a mortar (Prov. 27:22), wheat groats could be cooked (cf. Nu. 11:8); according to Dalman (III, 269), Heb. *gereś* (Lev. 2:14, 16) refers to these groats (but *see* BREAD). Probably these groats played a larger role in the Israelite diet than is apparent from their mention only in Lev. 2. The most frequent way of dealing with cereal, however, was to grind it into flour (*qemaḥ*) or groats (*sōleṯ*) by rubbing the grains between two stones (*rēḥayim*); turning mills were introduced into Palestine in Hellenistic times.

Vegetables of different kinds are mentioned occasionally in the Bible but much more often in postbiblical Jewish literature. Vegetables in general (cereals included) are mentioned in Dnl. 1:12 (*zērōʿîm*, lit. "things sown"; cf. Dnl. 1:16; Isa. 61:11). LENTILS, white and red, the "red" (brown) thought to be the best variety, were considered very tasty and nutritious. Though sometimes ground (Ezk. 4:9), they were commonly cooked into a pottage (Gen. 25:29, 34). 2 S. 17:28 shows the importance of lentils as food for the army. Of all the different sorts of BEANS, only horsebeans were mentioned (2 S. 17:28; Ezk. 4:9).

In the desert the Israelites longed for the CUCUMBER, the MELONS, the LEEKS, the ONIONS, and the GARLIC of Egypt (Nu. 11:5). None of these occurs in other parts of the Bible; yet one may be sure from numerous indications in postbiblical literature that all these vegetables were grown in biblical times. Moreover, Isa. 1:8 mentions a field of cucumbers, large and important enough that a lookout for a watchman was built in it; according to Jer. 10:5 a scarecrow was erected in it. Cucumbers, leeks, and

onions could be eaten raw, with bread, but they could also be cooked.

The "bitter herbs" of the Passover ritual (Ex. 12:8; Nu. 9:11) were probably wild lettuce or wild endive. These, together with chervil and an herb (identified by Dalman [I, 346] as an eryngo variety) are mentioned in Mish. *Pesahim* ii.6. Most of the vegetables were wild plants, accessible to the poor, who also "pick mallow and the leaves of bushes" (Job 30:4). The "vegetables" (*láchana*) of Rom. 14:2 comprised both wild and cultivated plants; the same word is also used for those plants that yield condiments, as CUMMIN, black cummin (Isa. 28:25, 27), dill (Mt. 23:23), mint (Lk. 11:42), MUSTARD (Mt. 13:31; 17:20; etc.), and rue (Lk. 11:42), though these were cultivated. Apart from these special dainties a "dinner of herbs" was considered a poor dish (Prov. 15:17). 2 K. 4:38-40 presents a graphic picture of poor people who in times of dearth gathered wild herbs and faced the risk of unknowingly introducing some toxic plants into their pottage.

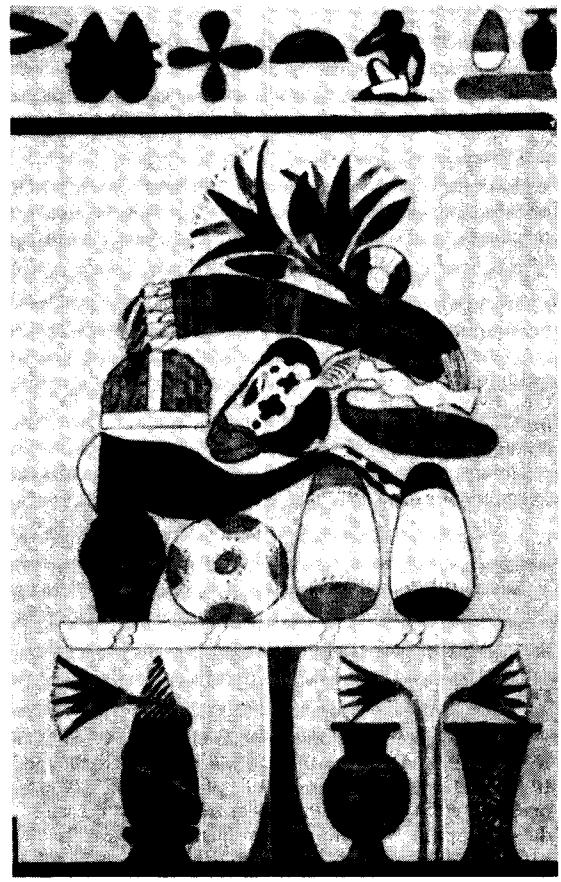
Genesis 1:29f. considers grains and fruits proper human food and assigns "every green plant" to the animals. But in Gen. 9:3 these herbs are described as a well-known food for humans, and in Dt. 11:10 and 1 K. 21:2 vegetable gardens are mentioned, in the latter passage as supplying the royal kitchen. Here certainly a garden of plants that yield condiments must be assumed; nevertheless, the passage seems to imply that changing a vineyard into such a garden was an insult to the good soil.

This shows, as is evident in many places, that fruits were appreciated above vegetables. Egyptian sources show that fruit trees abounded in Palestine many centuries before it was occupied by the Israelites. So important were they for the economy of the land that to destroy fruit trees in war was forbidden (Dt. 20:19f.). The parable of Jotham in Jgs. 9:8-13 enumerated the most important fruit trees: olive, fig, and vine.

It is not without significance that Jgs. 9:8-13 mentions the OLIVE TREE first; it is the most important tree around the Mediterranean. Its fruits were eaten, though this is nowhere expressly stated in Scripture; more important was the oil pressed from the fruits. It was used for baking and was an ingredient for nearly every dish; it was used also as fuel for the oil lamps both in the home and in the sanctuary; and it was used as an unguent for wounds (Lk. 10:34) and in illness (Jas. 5:14). Finally, it formed the basis of ointments, which made the human skin fresh and supple.

Next in importance is the FIG, whose sweetness was praised in Jotham's parable and whose "first-ripe fig," i.e., the early fig which grew on the previous year's wood, was esteemed a delicacy and was often eaten while it was still green (Isa. 28:4; Jer. 24:2; Mic. 7:1; Mk. 11:13). Of the late figs large quantities were dried in the sun and stored for use out of season. Pressed in a mold, they formed the "cakes of figs" (Heb. *dᵉḇēlâ*) mentioned as provisions for soldiers (1 S. 25:18; 30:12; etc.); these cakes also could be used as a plaster upon a boil (2 K. 20:7; Isa. 38:21). The same device is mentioned in an Ugaritic veterinary treatise (Ugar. *dblt*, e.g., *UT* 56:33).

The VINE and its products have always been much prized in oriental literature. Palestine, and especially the mountainous region of Judah, yielded excellent grapes (e.g., Nu. 13:23). Grapes were enjoyed both before their full ripeness (Heb. *bōser*, a dainty snack in the Orient; cf. Isa. 18:5; Jer. 31:29; etc.) and when ripe; and they were often dried in the sun (Nu. 6:3) and made into raisin cakes (Heb. *ṣimmûqîm*, "military provisions," 1 S. 25:18; 30:12; etc.; or *ᵓᵃšíšâ*, 2 S. 6:19; Hos. 3:1). The juice of



Food and drink; reconstruction of Egyptian wall paintings (Royal Ontario Museum, Toronto)

grapes, drunk before the fermentation process set in (*mišrâ*), is mentioned only in Nu. 6:3. The same is perhaps meant by *ᵓāšíš* in Isa. 16:7. Three Hebrew words are used to indicate the product after fermentation: *ḥemer* probably means wine that is still fermenting; the non-Semitic word *yayin* is of the same obscure origin as our word "wine"; *tîrôš* does not seem to indicate a special stage or kind, but is rather an archaic and poetical word, as is also the "blood of the grape" (Heb. *dam ʿēnāḇ*, Dt. 32:14; cf. Ugar. *dm ʿṣm*, "blood of trees").

Less prominent were the fruits of other trees: almonds of the tree that is the first to flower in spring and therefore is called "the wakeful one" (*šāqēḏ*); nuts (in Cant. 6:11 only); pistachio nuts (Gen. 43:11 only); the fruits of the sycamore-fig (Am. 7:14); the *tappû(a)ḥ*, probably not our apple, but rather a quince (according to some scholars the apricot). The POMEGRANATE (*rimmôn*) is frequently mentioned, especially in Canticles. The "fruit of goodly trees" (Lev. 23:40) according to Jewish tradition is the etrog, a citrus variety. Though growing in a few parts of Palestine only (Jericho, the shores of Lake Galilee), the date-palm is often mentioned. Its name became a proper name for several biblical women (Tamar). Only in the Canticles is it mentioned; but it must have had some importance in Israel's diet, especially because the word rendered by "honey" (*dᵉḇaš*) in some instances is to be explained as a date syrup, like the corresponding Babylonian and Arabic words. In times of need the rather tasty pods of the carob tree were eaten (Lk. 15:16).

III. Animal Food.–Like most Semitic nations, the Hebrews passed through a nomadic stage, during which animal food (meat and milk products) was the mainstay of their diet. This stage, however, is not represented in the Bible. Even the patriarchs, from Abraham on, were not nomads but transhumants or "seminomads," i.e., though they had their flocks and often went far away in search of good pasture (Gen. 37:12-14), they also sowed and reaped their own grains (26:12). A mixed diet therefore was the rule with them. Abraham offered both animal and vegetable foods to his guests (18:6-8). After the settlement in Canaan, Israel became gradually an agricultural nation and vegetable food prevailed. With the common people, animal food was reserved to festival times, mostly in connection with sacrifices; meat was a negligible part of the poor man's diet. Solomon and his courtiers devoured a great quantity of animal food daily (1 K. 4:22f. [MT 5:2f.]), and his way of life was imitated by the wealthy classes of later times, to the indignation of the prophets (Am. 6:4).

Among the mammals SHEEP and goats (*see* GOAT) were reared in large numbers. As a meat the goat was less appreciated than the sheep; goat's flesh, mostly of the kids, was the cheapest form of meat (Lk. 15:29). Most of the Israelites' milk came from goats (cf. Prov. 27:27). Milk (Heb. *ḥālāḇ*) was consumed both fresh and after it had soured. Many scholars maintain that Heb. *ḥem'â* was soured, thick milk; according to Dalman and others this word denoted fresh butter, produced by swinging the soured milk in a goatskin. Cheese (*g^{e}ḇinnâ*) is mentioned in Job 10:10. In 1 S. 17:18 David gave *ḥ^{a}rîṣê he-ḥālāḇ* to a captain of a thousand men. If the Hebrew is rendered "milk cheeses," then *ḥālāḇ* here has the meaning of "cheese," since *ḥ^{a}rîṣê* simply means "slices." In 2 S. 17:29 *š^{e}p̄ōṯ* is mentioned, which Dalman identifies with "curds." A preferable translation is "cheese" (from cow's milk), since this explains how the valley inside Jerusalem, at whose end the "ash gate" stood, became known as "the valley of cheesemakers" (Tyropoeon) in Josephus' time (*see* CURDS).

The sheep of Palestine were mainly of the fat-tailed species. In honor of a guest or at a festive occasion lambs were slaughtered (2 S. 12:4); less is said about the slaughtering of adult sheep. Calves supplied a highly appreciated meat; the "fatted calf" of Lk. 15:23, like its counterparts in the OT (1 S. 28:24; Jer. 46:21; Am. 6:4; Mal. 4:2 [MT 3:20]), was a calf kept in a stall; Abraham chose a calf from the herd, i.e., one that was not kept in a stall (Gen. 18:7). A stalled ox (lit. "kept at the manger") was part of a rich man's dinner (Prov. 15:17, AV). 1 K. 4:23 (MT 5:3) distinguishes between "fat oxen" and "pasture-fed cattle."

The king's court devoured an abundance of game — fallow buck, gazelles, and roebuck — hunted for this purpose; to the game eaten by the Israelites Dt. 14:5 adds the wild goat, the *dîšôn* (an antelope?), the wild sheep, and another kind of gazelle. That these four names do not occur elsewhere in the OT may serve as a proof that hunted game did not play a very important role in the average Israelite diet. In Sinuhe's time (20th cent. B.C.) game was plentiful in Palestine and Syria, and the same seems to be the case in the patriarchal period (Gen. 25:28; 27:4). With the increase of the population during the 1st millennium B.C. most of the game disappeared.

Neither wild nor domesticated swine were allowed to the Israelites; unlike the Arabs they abstained also from camel flesh. The smaller mammals such as the hare or rabbit were also forbidden (Dt. 14:7f.).

Although some birds (especially the birds of prey) were forbidden (Dt. 14:12-18), fowl were an important source of food. We do not know what kind is meant by the "fatted fowl" (Heb. *barbur*) of 1 K. 4:23 (MT 5:3); many scholars understand geese here, and geese were a very frequent dish in Egypt; but Koehler (KoB, p. 147) supposes that the word should be rendered "cuckoos." Nowhere in the OT are chickens mentioned (*see* CHICKEN; COCK); but since the discovery of two preexilic seals showing an engraving of a fighting cock it is probable that the Israelites from an early date knew domesticated chicken. Job 38:36 is to be rendered: "Who put wisdom in the ibis or who gave understanding to the cock?" A drawing on ivory from Tell el-Fâr'ah in the Negeb shows attendants bringing in ducks, probably wild ones. 1 S. 26:20 and Jer. 17:11 mention partridges (*see* PARTRIDGE). Quails passed Palestine and the Sinaitic desert on their way to Africa. Pigeons are frequently mentioned and are still a common food among the Arabs; both the tame kind (Heb. *yônâ*) and the wild (*tôr*) are eaten. Of most of the birds enumerated here the eggs were eaten too.

FISH were especially important for the population in the vicinity of the Sea of Tiberias, but there was also a large import of dried and salted fish from the Tyrian coast to Jerusalem (Neh. 13:16; cf. Zeph. 1:10). Water animals without fins and scales were forbidden (Dt. 14:9f.). This excludes, apart from snakelike fish, all shellfish and the like. No special kinds of fishes used as food are mentioned in the Bible.

The only insects whose use as a food was allowed were

Wild fowl are netted, plucked, and prepared for consumption in a wall painting from the tomb of Nakht at Thebes (Service des musées, Cairo; picture Lehnert and Landrock)

locusts (Lev. 11:20-23). The Assyrians relished them, as is known from scenes from their reliefs; to this day one finds them sold in Arab markets. The most common way of preparing them is to remove the head, legs, and wings, to drop the bodies in meal, and then to fry them in oil or butter. One product of insects allowed to the Israelite was honey, if it was produced by bees and not from a date syrup. From the 2nd millennium on, bee farming occurs in Egyptian, Hittite, and Assyrian texts and drawings. It is therefore to be considered accidental that the Bible seems to mention "wild honey" only. The honeycomb (Heb. *ya'ar* or *ya'ărâ*) is mentioned in Cant. 5:1 and 1 S. 14:27; perhaps Isa. 7:8 alludes to a custom of beekeepers. As sugar was unknown, honey was the best sweetening agency and was used in many dishes and dainties.

IV. Food Preparation.–In general, cooking or broiling took place in the open air, either outside the house (1 K. 19:6; Jn. 21:9) or inside, in the open courtyard. Ezk. 46:21-24 describes the four kitchens (Heb. *bêṯ ham'ᵉḇaššᵉlîm*, "house of those that cook") in the four corners of the outer temple court. The word rendered "vaulted" in v. 22, NEB, is rather to be understood as "without roof" (cf. T.B. *Middoth* 35a).

Food was prepared by the lady of the house (Gen. 18:6) and/or servants, both male (Gen. 18:7) and female (1 S. 8:13), but it was not considered undignified for a young man to prepare a special dish (Gen. 25:29-34) either for himself or for an honored guest (Jgs. 6:19). In the temple food was prepared by men.

Lentils, beans, all kinds of vegetables (Nu. 11:5), and herbs found in the fields (2 K. 4:39) were boiled in a cooking pot. 1 S. 2:14 mentions four different types of cooking pots, all made of clay. An iron griddle is mentioned in Ezk. 4:3, a copper pot in Ezk. 24:11. These utensils were also used for boiling meat. Boiling was the usual way of preparing flesh. Roasting of meat is seldom mentioned (1 S. 2:15; Isa. 44:16, 19); it was done on charcoal, probably with the help of a fork or a stick. A very special way of roasting by heaping charcoal and ashes all around the animal was prescribed for the paschal lamb, which was broiled with "head, shins, and entrails" (Ex. 12:9, NEB), as is still done by the Samaritans.

Fish was broiled (Jn. 21:9; Lk. 24:42; NEB "cooked"). The fish, brought by Tyrian merchants to Jerusalem (Neh. 13:16), was probably dried and salted (cf. Tob. 6:5). Salt and all kinds of herbal condiments were added to both vegetables and meat, and especially to broth or sauce (Heb. *māraq* [Jgs. 6:19f.; Isa. 65:4; cf. Ezk. 24:10]).

For the roasting of locusts, see III above; for the baking of bread, *see* BREAD IV. It is possible that grain was also used to make porridge, but this is never mentioned in Scripture.

V. Food Regulations.–The rules to distinguish between clean and unclean food were very strict. Since food goes into the body and therefore becomes part of the person, much caution was needed in order to prevent harmful influences from spreading through the body. As a rule mineral and vegetable foods were considered clean; but if water or food prepared with water was defiled by the carcass of a dead unclean animal, that water or food was considered unclean (Lev. 11:32-38, with the exception of water in a fountain or cistern). This shows already that the uncleanness of certain foodstuffs was in reality restricted to the animal kingdom. Of the mammals only those that part the hoof and chew the cud are allowed (Lev. 11:1-8; Dt. 14:6-8). It is difficult to see in which manner the combination of having cloven feet and chewing the cud could impart "cleanness"; it is probable that the rule is secondary only, discovered after clean mammals had been enumerated: cows, sheep, goats, and antelope. One should bear in mind that the meat of these animals was clean when they were slaughtered in the right way, i.e., after the blood had been removed. The consuming of blood was forbidden at least from Noah's time (Gen. 9:4). Since it could not be ascertained whether heathens had slaughtered in the right way, and there was a chance that the meat presented by them was part of a sacrifice, there was a taboo against partaking of food prepared by pagans (Acts 11:3; Gal. 2:12). If the Pharisees doubted that a person had presented the tithes of everything to the temple, they refused to eat with him. The rules about the "cleanness" and "uncleanness" of birds, fish, and insects are given in Lev. 11 and Dt. 14.

In the NT the food rules were reduced, at least for gentile Christians, to abstention from blood and things strangled (Acts 15:20). If meat was known to have been sacrificed to idols, it was not to be eaten; but Paul advised not to ask questions about the origin of the meat (1 Cor. 8; 10:23-33), though he warned against giving offense to more strict ("weaker") brethren (Rom. 14). In principle the teaching of Our Lord that "there is nothing outside a man which by going into him can defile him" (Mk. 7:14-23) meant the end of all OT food rules, though He Himself during His ministry on earth conformed to these rules. Peter could say, "Nothing common or unclean has ever entered my mouth" (Acts 11:8), but with the acceptance of former heathens into the Christian Church another attitude was indicated.

See also CLEAN AND UNCLEAN II.A; V.

VI. Food Supply.–The impression is given that in OT times as a rule every household provided food for its own wants. This is certainly true of nomadic life and generally also of the seminomadic life of the patriarchs. But even after Israel had settled and become an agricultural population, food was produced by every household for its own wants; every tiller of the soil had also some sheep and goats, and most had a few oxen. The towns were "the cities of our tillage" (Neh. 10:37 [MT 38], AV). An exception must be made for a royal settlement for industry and sea traffic like Ezion-geber, where it may be supposed that food was delivered from elsewhere by royal management.

In the main centers like Jerusalem or Samaria grain could be bought (e.g., 2 K. 7:1), but it is highly improbable that bread was for sale. (On Jer. 37:21 *see* BREAD IV.) Some condiments and other ingredients for more sophisticated dishes had to be bought from merchants. In Nehemiah's time, fish (dried and salted) was imported into Jerusalem by Tyrian merchants, and the Judean farmers used to bring grain and fruit to the metropolis (Neh. 13:15f.). In NT times wandering persons had to buy bread (Jn. 4:8), though we do not know who sold it. There was a meat market in Corinth (1 Cor. 10:25), and sparrows were sold in the Palestine markets (Mt. 10:29). Nevertheless, it is very probable that in general even in NT times most households were self-supporting, although a product like oil was then procured from professional shopkeepers (Mt. 25:9). Wine shops from Hellenistic times have been discovered in Marisa and Beth-zur.

Irregularities in nature could cause scarcity of food: too little rain or, less frequently, too much rain or rain in the wrong season might be the cause of "blight" or "mildew," respectively (Am. 4:9). In such times people tried to buy grain and sometimes wandered far to get supplies (Gen. 42:1f., etc.). They even changed their abodes in such cases — not only seminomads like Abraham and Isaac (Gen. 12:10; 26:1), but also farmers and town dwellers like Elimelech (Ruth 1:1) and the woman

of Shunem (2 K. 8:1f.), returning sometimes after seven or more years. No mention is made of food imported by state measures, as from Egypt to Rome in the times of the Caesars.

On food as fellowship *see also* BREAD V.

VAN SELMS

FOOL; FOOLISH(LY); FOLLY.

I. In the OT.–*A. General.* Outside of wisdom literature the most common Hebrew words for "fool" and "folly" are *nāḇāl*, *nᵉḇālâ*, and *sāḵāl*. *Nāḇāl* denotes a wicked person, rather than merely a person who lacks sense. *Nᵉḇālâ* signifies "wickedness," "shameless impropriety" (cf. Isa. 32:6). Abigail described her husband Nabal as "this ill-natured fellow," for "as his name is, so is he" (1 S. 25:25), and his conduct confirms this judgment. Other occurrences of *nᵉḇālâ* are generally associated with some form of wickedness, often with base and unnatural lewdness (Gen. 34:7; Dt. 22:21; 2 S. 13:12, "wanton folly").

Sāḵāl, rendered "foolishly" or "foolishness" by the RSV, and its cognates *seḵel* and *siḵlûṯ* generally denote "thickheadedness." Though its use in 2 S. 15:31 does not imply moral condemnation (perhaps also in Gen. 31:28), *sāḵāl* usually implies sin and error (2 S. 24:10; 1 S. 26:21) or a lack of trust in God (2 Ch. 16:7-9; cf. Dt. 32:6, 21).

Other related words are **yā'al*, "be empty," "be or become foolish," rendered by the RSV "do foolishly" in Nu. 12:11 and "become fools" in Isa. 19:13 (parallel to *nišše'û*, "are deluded") and Jer. 50:36, *'ĕwîl* (Isa. 19:11, parallel to *niḇ'ārâ*, "are stupid"; cf. *TDOT*, II, 204f.), which connotes a lack of understanding, and *kāsal*, "be foolish" (Jer. 10:8).

B. Wisdom Literature. In the wisdom literature "fool" and "folly" are frequent and distinctive words. Their significance is best seen in contrast with "wisdom," which was the outcome of careful observation and long pondering on actual life in the light of religion and divine revelation. Wisdom had its seat in God and was imparted to those who feared Him ("The fear of the Lord is the beginning [chief part] of knowledge," Prov. 1:7). Such wisdom was the essence of life, and to be without it was to walk in the way of death and destruction. Fools were thoughtless, careless, conceited, self-sufficient, indifferent to God and His will, and might even oppose and scoff at religion and wise instruction. *See* WISDOM.

Hebrew *'ĕwîl*, a frequently used word in the wisdom literature, denotes one who rejects instruction (Prov. 12:15; 15:5); is ready to speak and act without thinking (10:14); is quick to get angry, quarrel, and cause strife (12:16; 20:3; 29:9); is unrestrained in his anger (Job 5:2). He is associated with transgression (Ps. 107:17, RSV mg.) and sin (Prov. 24:9). The associated noun *'iwweleṯ*, "foolishness" (Ps. 38:5 [MT 6]; "fool," 69:5 [MT 6]; Prov. 13:16; etc.) occurs with *'ĕwîl* in Prov. 16:22; 27:22; and with *kᵉsîl* in 26:11. (In Prov. 14:24 the RSV and the NEB emend [with *BH*] the first occurrence of *'iwweleṯ* to *liwyaṯ*, "wreath," preserving the parallelism with "crown.")

Hebrew *kᵉsîl*, "stupid person" (cf. the related noun *kesel*, "stupidity"; Arab. *kasal*, "sluggishness") denotes one who is self-confident (Prov. 14:16; 28:26); ignorant (Eccl. 2:14); hates instruction (Prov. 1:22; 18:2); is thoughtless (10:23; 17:24); is angry and contentious (Prov. 18:6; 19:1; Eccl. 7:9); rages (Prov. 17:12); is indolent (Eccl. 4:5; Prov. 21:20); and engages in silly merriment (Eccl. 7:4-6). Such a one is also associated with slander (Prov. 10:18) and evil (13:19).

Hebrew *sāḵāl* and its derivatives occur in Ecclesiastes (e.g., 2:12; 7:25), but not in Proverbs. In Eccl. 7:25 Heb. *siḵlûṯ* is related to madness. Less frequent are *nāḇāl* (Prov. 17:7, 21; cf. Ps. 14:1; 53:1; Job 2:10), *nᵉḇālâ* (Job 42:8), and *hālal*, "make a fool of" (KoB, pp. 235f.) in Job 12:17.

II. In the Apocrypha.–Words for "fool" occur frequently in Wisdom and Sirach, Gk. *áphrōn*, "mindless," being the dominant term in the former and *mōrós*, "foolish," the dominant one in the latter. *Áphrōn*, like *mōrós* (Sir. 21:14; 22:7, 26), signifies lack of understanding (Sir. 22:13, parallel to *asýnetos*, "without sense") and is frequently associated with idolatry (Wisd. 12:24; 15:5). Some behavioral patterns of a fool may be excused (such as the raising of his voice when laughing, Sir. 21:20; his peculiar manner of lending money, 20:14f.; his inopportune speaking, 20:20), but he remains an ungodly person (22:12) and his folly should be hidden (20:13). In Wisd. 3:2 fools do not believe in divine protection and form a class of people opposite to that of the wise or righteous.

III. In the NT.–The RSV renders various Greek words by "fool," "foolish," or "folly" in the ordinary sense of being without sense or intelligence: *áphrōn*, "mindless" (Lk. 11:40; 12:20; 1 Cor. 15:36), *anóētos*, "without understanding" (e.g., Gal. 3:1-3), and *mōrós*, "foolish" (Mt. 7:26; 25:2; cf. 23:17 where it occurs with *týphlos*, "blind"). Other words have a decidedly moral connotation: *aphrosýnē*, "lack of sense," is a vice as are pride and slander in Mk. 7:22; *asýnetos*, "without sense," is ranked with being "faithless, heartless, and ruthless" in Rom. 1:31; *ánoia*, "without a mind," in 2 Tim. 3:8 is ascribed to men of "corrupt mind and counterfeit faith."

Greek *mōré* in Mt. 5:22 has been understood as: (1) a transliteration of the Hebrew-Aramaic term *mrh* or *mr'*, "bitter, rebellious"; (2) the vocative form of Gk. *mōrós*, "fool," which the rabbis borrowed and sometimes used in their debates; (3) Gk. *mōrós*, not as a loanword but simply as the equivalent of Aram. *šôṭeh*, "fool, blockhead"; (4) a translation into Greek idiom of Aram. *rêqâ*, "emptyhead," transliterated in the preceding clause in v. 22. This last explanation, however, would mean that there is no threefold progression of thought in v. 22, which is unlikely in view of the progressions in v. 25 (judge; guard; prison), vv. 34f. (heaven, throne; earth, footstool; Jerusalem, city of the king), and 7:7 (ask; seek; knock). Cf. *TDNT*, IV, 839-842.

In the Corinthian Epistles "foolishness" is a rich concept with at least three shades of meaning. (1) The message of the gospel is folly (Gk. *mōría*) to the Greeks, i.e., not in accord with their notion of wisdom (1 Cor. 1:18f.; cf. 2:14; *see* PHILOSOPHY). But God makes this so-called wisdom foolishness (Gk. *mōraínō*, 1 Cor. 1:20; 3:19; cf. Rom. 1:20) through the apparent "folly" of the gospel (1:21, 27). (2) Some of the Corinthian Christians are counseled to become fools, i.e., to behave as true Christians, which behavior the world would call foolish (3:18). (3) In 2 Cor. 11 Paul's own foolishness refers to his boasting in behalf of his church in response to the unwarranted bragging of intruders into the church (P. E. Hughes, comm. on 2nd Corinthians [*NICNT*, 1962], pp. 372f.).

For "fools for Christ's sake" (1 Cor. 4:10) see F. W. Grosheide, comm. on 1st Corinthians (*NICNT*, 1953), pp. 107f.

FOOT [Heb. *regel*]; NEB also "descendants" (Gen. 49:10), BODY (Isa. 7:20), "voyages" (Isa. 23:7), etc.; [*raglî, 'îš raglî, kap regel*–'sole of the foot,' *marg^{e}lōṯ, pa'am, taḥaṯ*–'under,' *qarsōl*–'ankle' (2 S. 22:37 par. Ps. 18:36 [MT 37])]; [Gk. *poús*]; NEB also (FOOT)STEPS (Acts 5:9; He. 12:13), GROUND (Acts 10:25), etc.; [*básis, hypopódion, pezḗ*] (Mt. 14:13 par. Mk. 6:33).

Both Heb. *regel* and Gk. *poús* mean "foot," and usually refer to the human foot (e.g., Ex. 21:24; Lev. 14:14; Lk. 7:38). As a euphemism for the pudenda the RSV renders Heb. *regel* "feet" in Ex. 4:25; Dt. 28:57, but in Jgs. 3:24 (AV "he covereth his feet"); 1 S. 24:3; 2 K. 18:27 par. Isa. 36:12 (AV mg. "the water of their feet" [*Q mêmê raglêhem*]); Ezk. 16:25 (AV "hast opened thy feet") the genital connotations are more explicit. (They may be implied in 2 S. 11:8; Cant. 5:3. See also *TDNT*, VI, 627.)

Hebrew *raglî*—translated "men on foot," "footmen," or "foot soldiers"—denotes an infantryman, armed with a spear, bow, sling, or sword. These men were apparently known for their speed and stamina, for Jeremiah's stamina is compared to theirs (Jer. 12:5).

Hebrew *marg^{e}lōṯ* ("legs" in Dnl. 10:6) means "the place of the feet." Ruth approaches the sleeping Boaz and uncovers his *marg^{e}lōṯ* (Ruth 3:4, 7). This was evidently a sign of (intention of) marriage (cf. Ezk. 16:8).

Hebrew *pa'am* is properly "foot." Like Heb. *regel* and Gk. *poús* it can stand for the whole person (Ps. 17:5; 140:4 [MT 5], RSV, NEB). The feet of the ark (Ex. 25:12; AV "corners") were probably short legs designed to keep the ark from resting directly on the ground.

Greek *básis* was commonly used for the base of a statue (MM, p. 106) and occurs only in Acts 3:7. *Hypopódion* (Jas. 2:3) is properly "footstool" (so AV, NEB; RSV "at my feet"). *Pezḗ* (Mt. 14:13 par. Mk. 6:33) means "by land," "on foot" in contrast to traveling by boat. In these two pericopes Jesus retreats by boat on the Sea of Galilee, but the crowd follows Him "on foot" along the shore.

Actions involving the feet are often rendered "trample, tread under foot" (e.g., Isa. 63:3; Dnl. 8:13; cf. Mt. 5:13; Lk. 8:5), "walk on foot" (Eccl. 10:7), "set upon [one's] feet" (Dnl. 8:18). The RSV and the AV interpret Heb. *yiḵbōš* (Mic. 7:19) as a form of *kāḇaš*, "tread down, subdue," (KoB, p. 423), keeping the parallelism with the next line "casting . . . into . . . the sea" (cf. LXX *katadýsei*, "he will make to go down"). The NEB translates "wash out" (piel of *kāḇas*, "wash out" [KoB, p. 422]). The various translations of Heb. *yard* (< *rdd* or *rdh*) (Isa. 41:2, "tramples . . . under foot"; AV "rule"; NEB "go down," from the root *yrd*) could all be correct and express dominance and conquest. The RSV understands the uncertain text of Ps. 68:30 (MT 31) to read *rāpas*, "kick" (KoB, p. 905), which is closer to the MT than the NEB's translation.

A common figure of speech, synecdoche, uses one part of the body to represent the total person. "Foot" is used this way, and accordingly the NEB often translates Heb. *regel* with a pronoun. The RSV does so less frequently (cf. RSV and NEB in Dt. 32:35; Job 31:5; Ps. 31:8 [MT 9]; Isa. 59:7). Likewise, Gk. *poús* is understood (though not translated) this way in, e.g., Lk. 1:79; Rom. 3:15; He. 12:13. The entire person is denoted by means of such expressions as "from the head to the foot" (e.g., Lev. 13:12), "from the sole of one's foot to the crown of one's head" (cf. 2 S. 14:25 and Job 2:7), "hand and foot" (Mt. 22:13).

Various expressions involving feet are found in the Bible. Roads in the Near East were dusty and dirty, so an act of hospitality was to supply visitors with water to wash their feet (Gen. 18:4; 19:2; 24:32; 43:24; Jgs. 19:21; 1 S. 25:41; Lk. 7:44). A sign of special welcome and devotion was for the host or hostess to do the washing (Jn. 12:3) or for oil to be used instead of water (Lk. 7:38; Jn. 12:3). Jesus Himself washed the feet of the disciples (Jn. 13:2-20) as an enacted parable of the meaning of His death (vv. 2-11) and of discipleship (vv. 12-20), thereby making loving service the highest Christian virtue. As a result, FOOT WASHING has been practiced in the Church since apostolic times and is mentioned as one of the duties of widows in 1 Tim. 5:10.

In the OT, washing the feet was a ritual of the priests preparatory to service at worship (Ex. 30:19, 21; 40:31). "Foot washing" may also refer to the preparation for conjugal love (2 S. 11:8; Cant. 5:3).

Placing one's feet on the neck of a person symbolized conquest and dominion (Josh. 10:24), as did placing someone under the feet of another (2 S. 22:39 par. Ps. 18:38; Ps. 8:6 [MT 7]; 47:3 [MT 4]). Ps. 110:1 speaks of God making the enemies of His people a footstool for the feet of the Davidic king. This Psalm took on messianic meaning during and after the Exile and is applied to Jesus Christ in the NT (Mt. 22:44 par. Mk. 12:36 par. Lk. 20:43; Acts 2:35; 1 Cor. 15:25; He. 1:13; 10:13).

After His resurrection Christ was understood by His disciples to have ascended to the right hand of God, from where He rules the universe until His enemies are subservient to Him at the end of the age (Acts 2:32-36; 1 Cor. 15:25; He. 10:12f.).

To sit at the feet of someone is to learn as a student from a master (Lk. 8:35; 10:39; Acts 22:3). To shake the dust from one's feet is a sign of repudiation and separation (Mt. 10:14; Lk. 9:5; 10:11; Acts 13:51). To bow before or hold the feet of someone is an act of supplication (Mk. 5:22 par. Lk. 8:41; Mk. 7:25; Jn. 11:32), thanksgiving (Lk. 17:16), submission (Rev. 3:9), and worship (Mt. 28:9; Acts 10:25; Rev. 19:10; 22:8).

In ethical contexts, feet may "run to evil" (Prov. 1:16), even "swiftly" (Prov. 6:18; cf. Rom. 3:15), in contrast to those who turn to God (Ps. 119:59). The feet of those bringing good tidings are beautiful (e.g., Nah. 1:15; cf. Rom. 10:15), and the feet of some are "shod" with the equipment of the gospel of peace (Eph. 6:15; *see* EQUIPMENT).

The "feet" of God are a symbol of the salvation of His people (Zec. 14:4). Clouds (Nah. 1:3) and darkness (2 S. 22:10 par. Ps. 18:9 [MT 10]) indicate His presence,

Fragment of a stele from Babylon (1st Dynasty, *ca.* 1800-1500 B.C.) showing victor with enemy underfoot (Louvre)

King Darius (521-486 B.C.) sits on a throne with his feet on a footstool; behind him is Crown Prince Xerxes. Limestone relief from Persepolis (Oriental Institute, University of Chicago)

and His victory brings glory to the place of His feet, the temple (Isa. 60:13).

FOOT WASHING. In the Orient the wearing of open sandals on dusty roads made it necessary to wash the feet frequently; therefore a host would customarily provide water for his guests upon their arrival, so that they might wash their feet (cf. Gen. 18:4; 19:2; 24:32; 43:24; Jgs. 19:21). Sometimes a servant performed this service for the guests (1 S. 25:41). It was considered the most menial task a servant could perform (cf. Mk. 1:7 par.). Not washing one's own feet, on the other hand, was a sign of deep mourning (2 S. 19:24).

Luke records an incident in which Jesus rebukes Simon the Pharisee for not having shown the common courtesy of providing Him with water, while at the same time He commends the woman who has washed His feet with her tears, wiped them with her hair, and anointed them with ointment (7:36-50). Such an act of love prompts Jesus to declare that this woman, known as a "sinner," is forgiven.

John indicates that Jesus Himself performed this service for the disciples at the Last Supper (Jn. 13:1-17). None of the Synoptic accounts of the Supper includes the foot-washing incident; Luke, however, tells of a dispute that arose among the disciples at this time about which of them was the greatest. It may be that they were quarreling about which of them should perform this service for the others (22:26f.). As recorded in John's Gospel, this act of Jesus has a twofold significance. First, it is a symbolic prophecy of Jesus' atoning death, which would cleanse from sin and make it possible for His disciples to inherit eternal life with Him (13:8; cf. Lk. 22:28-30). Second, it is a lesson in humility. "It is a parable in action, setting out that great principle of lowly service which finds its supreme embodiment in the cross, setting out also the necessity for the disciple to take the Lord's way, not his own" (Morris, pp. 612f.). Some have also seen the foot washing as alluding to the sacraments of baptism and the Lord's Supper. Cullmann, e.g., believes that the intent of the Evangelist is to show the relationship between the two sacraments, baptism being that sacrament which is performed once for all and the Lord's Supper being that which is to be repeated (p. 109).

The NT contains one other reference to foot washing (1 Tim. 5:10), where Paul lists among the qualifications for enrollment as a widow that a woman must have "washed the feet of the saints." Hospitality was expected of all Christians, but particularly of widows, who were charged with accommodating travelers — of whom there were many, since the gospel was carried from village to village on foot. The reference to foot washing is probably both figurative and literal. Following the example of the Lord, the widow was to give evidence of her humility by performing even the most menial tasks.

In the early Church, foot washing came to be practiced as a rite. In its earliest form it was observed at the baptism service and involved the ceremonial washing of the feet of the newly baptized catechumens (cf. Augustine *Ep.* 119.18). This practice never gained universal acceptance, and no traces of it are left. The rite did come to be widely practiced, however, during the Maundy Thursday service in both the Western Church and the Eastern Church. At the Synod of Toledo in 694, Spain became the first European country to attest the practice; Rome first attested it in the 11th cent. (*Ordo Romanus* x). Called the *pedilavium*, this rite continues to be part of the Maundy Thursday observance in many churches. Among the Protestant churches and sects that have practiced foot washing are the Moravian Brethren, the Mennonites, and the Seventh-Day Adventists.

FOOTMAN. *See* WAR.

FOOTSTOOL [Heb. *kebeš* (2 Ch. 9:18), *hᵃḏôm regel* (1 Ch. 28:2; Ps. 99:5; 110:1; 132:7; Isa. 66:1; Lam. 2:1); Gk. *hypopódion tōn podōn* (Mt. 5:35; Acts 7:49)]. Of the nine RSV references, only one is literal in nature (2 Ch. 9:18), describing the golden footstool of Solomon's throne. In 1 Ch. 28:2 the allusion is to the ark, while in Ps. 99:5; 132:7; Lam. 2:1 the term is a metaphor for the Jerusalem temple. In Isa. 66:1 (quoted in Acts 7:49) it is used figuratively of the earth, in contrast to the heavens as God's throne. The concept of Davidic dominion as expressed in Ps. 110:1 is quoted by Christ in Mt. 22:44 par. 12:36; Lk. 20:43.

FOOTWEAR. *See* GARMENTS VII; SANDAL; SHOE.

FOR ALL; FOR THAT; FOR TO. Obsolete phrases used by the AV. In Jn. 21:11, e.g., "for all" occurs in the phrase "for all there were so many" (Gk. *tosoútōn óntōn*); the RSV correctly translates "although." "For that" renders Gk. *ei* (He. 7:15), *epeí* (He. 5:2), *epeidḗ* (2 Cor. 5:4), *epí* (Rom. 5:12), *hóti* (Jn. 12:18; 2 Cor. 1:24; 1 Tim. 1:12), etc. and generally means "since" or "because." "For to" is used for Heb. *lᵉmaʿan* (Jer. 43:3) and for Gk. *eis tó* (Rom. 11:11), *hína* (e.g., Mk. 3:10), *prós tó* (Mt. 23:5), etc. and means "in order that."

FOR EVER. *See* ETERNAL.

FORBEAR [Heb. *ḥāḏal*] (e.g., 1 K. 22:6; Job 16:6); NEB REFRAIN, BE SILENT; [Gk. *aníēmi*] (Eph. 6:9); NEB "give up"; **FORBEARING** [Gk. *anéchomai*] (Eph. 4:2; Col. 3:13); [*makrothyméō*] (2 Pet. 3:9); AV LONGSUFFERING; NEB VERY PATIENT; [*anexíkakos*] (2 Tim. 2:24); AV PATIENT; NEB KINDLY; **FORBEARANCE** [Heb. *ʾereḵ ʾap*] (Jer. 15:15); AV LONGSUFFERING; NEB "be patient"; [Gk. *anochḗ*] (Rom. 2:4; 3:25); NEB TOLERANCE; [*epieikḗs*] (Phil. 4:5); AV MODERATION; NEB MAGNANIMITY; [*makrothymía*] (2 Cor. 6:6; 2 Pet. 3:15); AV LONGSUFFERING; NEB PATIENCE.

The usual meaning of Heb. *ḥāḏal* is "cease, come to an end, leave off," but in all the RSV uses it has the meaning of "desist from" (1 K. 22:6, 15; 2 Ch. 18:5, 14; Job 16:6). (*See also* REFUSE.) The AV translates Heb. *ḥāḏal* as "forbear" more frequently than the RSV, and unlike the RSV, the AV translates other Hebrew words in the same way. Heb. *ʾereḵ ʾap*, "long of (concerning) anger," the RSV usually renders "slow to anger"; but in Jer. 15:15, where this translation would have been awkward, the RSV uses "forbearance."

In the NT *anéchomai* occurs fourteen times but is translated "forbearing" only twice. Although the usual meaning of the verb is "bear with, endure" (AV also "suffer"), in these two passages "forbearing one another" has a more positive meaning of Christian love in action. (*See* ENDURE; LOVE III.) The noun *anochḗ*, whose basic meaning is "a holding back" is used by Paul to speak of the restraint of God's wrath (see *TDNT*, I, 359f.).

The basic meaning of *aníēmi* is to "release from tension" (*TDNT*, I, 367), to "let go, relax, loosen," and metaphorically, to "desist from" in Eph. 6:9. *Epieikḗs* means "what is fitting, right, or equitable" (*TDNT*, II, 588), and except for its use as a noun in Phil. 4:5 it is translated "gentle" in all passages; the NEB renders it "considerate" (Jas. 3:17; 1 Pet. 2:18), and "forbearing" (1 Tim. 3:3; similarly Tit. 3:2). The RSV renders *makrothymía* "patience" in all but two instances. Only once is the verb *makrothyméō* rendered "forbearing"; *see* PATIENCE. The hapax legomenon *anexíkakos* means "tolerant of evil [things] or calamity," and calls the servant of Christ to be long-suffering toward those who would do him evil (cf. *TDNT*, III, 486f.).

FORBID; FORBIDDEN [Heb. *kālâ*–'restrain'] (Nu. 11:28); NEB STOP; [*ṣāwâ*–'command'] (Dt. 4:23; 17:3; Lam. 1:10); AV also COMMAND; [*ʿāral ʿorlâ*–'having a foreskin'] (Lev. 19:23); AV UNCIRCUMCISED; [*ḥālîlâ*] (1 S. 24:6 [MT 7]; 26:11; 1 K. 21:3); [Gk. *kōlýō*–'prevent'] (Mk. 9:39; Lk. 9:50; 23:2; Acts 10:47; 16:6; 1 Cor. 14:39; 1 Tim. 4:3); NEB also STOP, OPPOSE, WITHHOLD, PREVENT; [*híleōs soi*] (Mt. 16:22); AV "Be it far from thee"; [*mḗ génoito*] (Lk. 20:16).

The most significant use of "forbid" in the OT is in the phrase "the Lord forbid." The Hebrew phrase here is *ḥālîlâ* [denoting profanation or abhorrence; cf. the verb *ḥālal*, "be profaned"] *mēyahweh*, an interjection meaning "far be it from Yahweh." Elsewhere in the RSV *ḥālîlâ* is rendered "Far be it" (e.g., Gen. 18:25; Josh. 22:29; 24:16; 2 S. 23:17), "Far from it!" (1 S. 14:45; 20:2), or "No!" (1 S. 22:15). On Lev. 19:23, *see* UNCIRCUMCISED.

Greek *mḗ génoito* (lit. "let it not be") is one of the LXX renderings of *ḥālîlâ*, and it functions in the NT in much the same way. Whereas the RSV renders it "God forbid" only once and elsewhere gives "by no means!" (Rom. 3:4, 6, 31; 6:2, 15; 7:7, 13; 9:14; 11:1, 11), "Never!" (1 Cor. 6:15), "Certainly not!" (Gal. 2:17; 3:21), or "far be it from me" (Gal. 6:14), the AV renders "God forbid" in all these cases. According to Bauer (p. 376), *eíē ho theós* should be supplied in Mt. 16:22, giving a literal translation of "may God be gracious to you." The RSV correctly interprets the sense in which it was used.

N. J. O.

FORCE. The Hebrew, Greek, and Aramaic words that are rendered by the word "force" in the RSV contain either the idea of someone compelling or coercing another to do something against his will or the idea of sheer physical strength. The word has several distinct uses.

(1) [Heb. piel of *ʿānâ* (2 S. 13:12, 14, 22, 32), *ʿāpaq* (1 S. 13:12), *māraṣ* (Job 6:25), *kāḇaš* (Neh. 5:5); Gk. *angareúō* (Mt. 5:41; *see* COURIER), *anankázō* (2 Cor. 12:11), *kakóō*–'mistreat' (Acts 7:19), *ischýō* (He. 9:17)]; AV also COMPEL (Mt. 5:41; 2 Cor. 12:11), "bring into bondage" (Neh. 5:5), "evil entreated" (Acts 7:19), "strength" (He. 9:17); NEB also "dishonour(ed)" (2 S. 13:12-14), FELT COMPELLED (1 S. 13:12), MAKE GO (Mt. 5:41), DROVE TO (2 Cor. 12:11), "harsh" (Job 6:25). To force or compel. *ʿĀnâ* literally means to force someone to have sexual relations as Amnon forced his sister Tamar. *Kāḇaš* literally means to subdue or to bring into bondage.

(2) [Heb. *gāzal* (Gen. 31:31); Gk. *harpázō* (e.g., Mt. 11:12; Jn. 6:15)]; NEB also PULL OUT (Acts 23:10). To take or seize by force.

(3) [Heb. *ḥayil*, *maḥᵃneh*–'camp' (Josh. 10:5; 1 S. 28:1; 29:1), *zᵉrôʿ(a)*–'arm' (Dnl. 11:15, 31), *memšālâ*–'dominion' (2 Ch. 32:9)]; AV also ARMY, HOST (Josh. 10:5), ARMS (Dnl. 11:15, 31), POWER (Est. 8:11; 2 Ch. 32:9); NEB ARMED BANDS, TROOPS (1 S. 29:1; 2 Ch. 17:2), ARMY (1 S. 28:1), ARMED FORCES (Dnl. 11:31); ARMED HORDE (Dnl. 11:10), "high command" (2 Ch. 32:9), strength (Est. 8:11). "Forces" in the sense of an army or band of warriors as an implement of force. The RSV also has "forces" for *ʿam*, "people," in Josh. 8:13, because of the context (NEB "army"). (In Gen. 14:3, 15; Josh. 11:5; 1 Ch. 19:17 the RSV adds the word "force" for a similar reason.)

(4) [Heb. *yāḏ*–'hand' (Nu. 20:20; Job 20:22), *ḥozqâ*–'strength' (1 S. 2:16; Ezk. 34:4), **lē(a)ḥ*–'moisture, freshness' (Dt. 34:7), **maʾᵃmāṣ* (Job 36:19); Aram. *ʿeḏrāʿ* (Ezr. 4:23)]; AV also HAND (Nu. 20:20; Job 20:22); NEB also HAND (Job 20:22), FULL STRENGTH (Nu. 20:20), VIGOUR (Dt. 34:7), "resources" (Job 36:19), etc. These terms all refer to force in the sense of physical strength. Though Dt. 34:7 is the only occurrence of the Heb. noun *lē(a)ḥ*, adjectival forms are found elsewhere describing freshness in rods (Gen. 30:37), grapes (Nu. 6:3), bowstrings (Jgs. 16:7f.), and trees (Ezk. 17:24; 20:47). (Cf. on Ugar. *lḥḥ*, "life-force, vigor," W. F. Albright, *BASOR*, 94 [1944], 32-35.) Moses, then, at the end of his long life, still possessed a physical vigor unusual for old men.

(5) **FORCED LABOR; FORCED LEVY** [Heb. *mas*,

sēḇel (1 K. 11:28)]; AV TRIBUTE, TRIBUTARY, LEVY (1 K. 9:15), CHARGE (1 K. 11:28), "discomfited" (Isa. 31:8); NEB also LABOUR GANGS (1 K. 11:28). A body of workers coerced into labor, or (borrowed from the French) a corvée. Conquered populations were subjected to forced labor by Israel (Jgs. 1:30). Forced labor was used by David for his building projects (2 S. 20:24) and continued to be used under Solomon. Under Solomon the size of the group was reported to be thirty thousand men (1 K. 5:13 [MT 27]). The biblical material is unclear as to whether Solomon's forced labor included Israelites (1 K. 5:13) or only the non-Israelite population of the old Canaanite city-states (1 K. 9:15a, 20-22).

See also LABOR; LEVY; SLAVE.

Bibliography.–*TDNT*, I, *s.v.* ἀρπάζω κτλ.: ἁρπάζω (Foerster); III, *s.v.* ἰσχύω κτλ. (Grundmann), κακός κτλ.: κακόω (Grundmann).

E. W. CONRAD

FORD [Heb. *maʿᵃḇār* (Gen. 32:22 [MT 23]), *maʿbārâ* (Josh. 2:7; Jgs. 3:28; 12:5f.; Isa. 16:2; Jer. 51:32)]. In 2 S. 15:28 the RSV follows *K* *ʿᵃḇrôṯ* (but cf. *Q* *ʿᵃrāḇôṯ* and the versions followed by AV "plain"). In three other passages the RSV slightly emends the MT: in 1 S. 13:7 "[they] crossed the ford" (presupposing *wayyaʿaḇᵉrû maʿbᵉrôṯ*) for MT *wᵉʿiḇrîm ʿāḇᵉrû*, "Hebrews crossed over" (so AV); in 2 S. 17:16, reading with 15:28 (*K*) and some MSS *ʿᵃḇrôṯ*, "fords," for MT *ʿarᵉḇôṯ*, "plains" (so AV); in 2 S. 19:18 (MT 19), reading "they crossed" (*wᵉʿāḇᵉrû* or *wayyaʿaḇᵉrû*) for MT *wᵉʿāḇᵉrâ*, "(it) crossed" (cf. AV), and understanding *hāʿᵃḇārâ* as "ford" (as in the above passages, rather than "ferry boat," AV).

A location where one might "pass through" or "pass over" (cf. verb *ʿāḇar*) a body of water. In the OT the river crossed most frequently in this way was the Jordan (cf. Josh. 2:7; Jgs. 3:28; 12:5f.; 15:28; 19:18). The lower Jordan was between 27 and 30 m. (90 and 100 ft.) wide, and varied from 1 to 4 m. (5 to 12 ft.) in depth. Since in antiquity there were no bridges in Palestine, it was extremely important that there be areas of the river that could be crossed either by wading or swimming. In the Pentateuch allusions are made to the fords connected with the Zered and Arnon wadis (cf. Nu. 21:12f.; Dt. 2:24). The Jabbok is mentioned frequently, especially in connection with Jacob. It is now impossible to locate these ancient crossing points with any precision, although some have associated the fords of 2 S. 15:28; 17:16 with Maḥadat el-Hajilah and Maḥadat el-Henu, located at the southern end of the Jordan just N of the Dead Sea. The fords of Babylonia (Jer. 51:32) were evidently the many bridges across the rivers and irrigation canals of that country. Aenon near Salim, where John the Baptist was baptizing (Jn. 3:23), may have been a ford in the Jordan Valley, though some ancient traditions have located it in Perea beyond the Jordan.

R. K. H.

Drivers and laden donkeys ford the Jordan near Tell ed-Dâmiyeh (courtesy of E. K. Vogel)

FORECAST. Used by the AV in the obsolete sense of "devise" or "scheme" (Dnl. 11:24f.).

FOREFATHER. In the OT "forefather" renders Heb. *ʾāḇ riʾšôn* (lit. "preceding father," Jer. 11:10) or simply *riʾšôn* ("predecessor, ancestor," Lev. 26:45; Ps. 79:8). The NT terms are Gk. *propátōr* ("forefather," Rom. 4:1) and *patḗr* (lit. "father," often used in the sense of "ancestor"). *See* ANCESTOR.

FOREFRONT. A word occurring in the RSV only once, with reference to the planned death of Uriah (2 S. 11:15). The literal meaning of Heb. *mûl pānîm* is "over against the face," i.e., confronting (cf. NEB "opposite"). The AV uses "fore-front" in Ex. 26:9; 28:37; Lev. 8:9; 1 S. 14:5; 2 K. 16:14; Ezk. 40:19 (RSV "front"); in Ezk. 47:1 the RSV does not translate Heb. *pᵉnê* and in 2 Ch. 20:27 the RSV translates Heb. *rōʾš* literally, "head."

FOREGO. Occurs in the RSV for Heb. *nāṭaš* (Neh. 10:31 [MT 32]), referring to the practice of not tilling or sowing the fields in the seventh year (cf. Ex. 23:10f.).

FOREHEAD [Heb. *mēṣaḥ* (e.g., Ex. 28:38), *gibbē(a)ḥ* (Lev. 13:41-43), *pēʾâ* (Nu. 24:17; Jer. 48:45), *bên ʿênêḵem*–'between your eyes' (Dt. 14:1); Gk. *métōpon* (e.g., Rev. 7:3)]; AV also BROW, "corner," "between your eyes", etc.; NEB also "squadrons" (Nu. 24:17), FORELOCK, etc.

The word occurs frequently in the literal sense. Every high priest was to wear on his forehead the golden frontlet having the engraved motto, "Holy to the Lord" (Ex. 28:36, 38). The condition of the forehead was an important criterion in the priest's diagnosis of leprosy (Lev. 13:42f.; 2 Ch. 26:20). (*See* LEPER.) It was in the forehead that brave young David smote Goliath with the stone from his sling (1 S. 17:49). While the cutting or tattooing of the body was strictly forbidden to the Israelites on account of the pagan associations of the custom (Lev. 19:28), frequent mention is made of markings on the forehead, which were especially used to designate slaves or devotees of a god-head (Lucian *De Syria Dea* lix). In 3 Macc. 2:29 it is stated that Ptolemy IV Philopator branded some Jews with the sign of an ivy leaf, marking them as devotees of Bacchus-Dionysos. Very clear is the passage Ezk. 9:4, 6 (and perhaps Job 31:35), where the word used for "mark" is *tāw*, the name of the last letter of the Hebrew alphabet, which in its earliest form has the shape of an upright cross (+) as in Egyptian hieroglyphic writing and the Sinaitic script (1500 B.C.), or the tilted cross (×) of the Iron Age Phoenician (*ca.* 1000 B.C.) and the Siloam Hebrew scripts (*ca.* 701 B.C.). The NT echoes Ezk. 9:4, 6, in the marking of the foreheads of the righteous (Rev. 7:3; 9:4; 14:1; 22:4). The godless followers of the beast are marked on the (right) hand and on the forehead (13:16; 14:9; 20:4), and the symbolic woman dressed in scarlet and purple has her name written on her forehead (17:5).

In a metaphorical sense the AV uses the expression "a whore's forehead" (Jer. 3:3; RSV, NEB "harlot's brow") to describe the shameless apostasy and faithlessness of Israel. Ezekiel speaks to the stiff-necked obstinacy and the persistent unwillingness of Israel to hear the message of the Lord: "All the house of Israel are of a hard forehead and of a stubborn heart" (3:7), and God makes

His prophet's "forehead hard . . . like adamant harder than flint," whereby an unflinching loyalty to God and a complete disregard of opposition is meant (vv. 8f.).

See *TDNT*, IV, *s.v.* μέτωπον (Carl Schneider).

H. L. E. LUERING R. K. H.

FOREIGN. *See* MIXED MULTITUDE; STRANGE.

FOREIGNER [Heb. *nēḵār, ben-nēḵār, noḵrî, zār* (Prov. 20:16; 27:13; Ezk. 7:21; 11:9; 28:10; 30:12; 31:12); Gk. *xénos* (Acts 17:21), *allogenḗs* (Lk. 17:18), *bárbaros* (1 Cor. 14:21)]; AV also STRANGER, ALIEN, BARBARIAN (1 Cor. 14:11), "other" (1 Cor. 14:21); NEB also STRANGER, ALIEN (Isa. 61:5), UNKNOWN PERSON, etc.

This term denotes one who is not a member of the people of Israel (Jgs. 19:12) and "comes from a far land" (Dt. 29:22; 1 K. 8:41). The foreigner is to be distinguished from the sojourner (*gēr*), the non-Israelite whose place of residence is in the land of Israel. The enemy who invades the land of Israel is referred to as a foreigner (Ezk. 7:21; 11:9; Ob. 11).

The OT includes legislation regarding Israel's relationship to the foreigner in both civil and cultic matters. There was special legislation regarding financial dealings with foreigners (Dt. 15:3; 23:20). Foreigners were forbidden to be kings over Israel (Dt. 17:15), to enter the temple (Ezk. 44:7), or to participate in the Passover (Ex. 12:43). Even animals bought from foreigners were not to be used in sacrifice (Lev. 22:25).

In the exilic and postexilic periods when the Israelites were living in increasing numbers in foreign lands, Israel was forced to reconsider its relationship to foreigners. In some contexts the foreigner's role in the religious life of Israel was viewed favorably (1 K. 8:41-43; cf. Isa. 56:3, 6, which refers to foreigners as Jewish proselytes); in others it was viewed critically (Neh. 9:2; Ezr. 10:2).

In the NT the word "foreigner" is used for the non-Jew only in Lk. 17:18, where it refers to the Samaritan who was the only leper of the ten healed by Jesus to offer Him thanks. At other places "foreigner" is used for the person who spoke a foreign language (1 Cor. 14:11) and for the non-Athenians who were present in Athens when Paul preached there (Acts 17:21).

See also STRANGE; SOJOURNER. E. W. CONRAD

FOREKNOW [Gk. *proginṓskō*] (Rom. 8:29; 11:2); NEB KNEW BEFORE, "acknowledged of old as his own"; **FOREKNOWLEDGE** [Gk. *prógnōsis*] (Acts 2:23); NEB "plan." These Greek terms express the concept of knowing reality before it is real and events before they occur. In the NT these terms (used also in 1 Pet. 1:2, 20; RSV "destine") always refer to God's knowledge, except in Acts 26:5; 2 Pet. 3:17 (in which the human foreknowledge is the result of information received earlier or of revelation). In theology, therefore, "foreknowledge" refers to that aspect of God's omniscience whereby God not only knows all things and persons, but knows them before they are real or before they occur.

Scripture leaves little doubt about the all-comprehensive character of God's knowledge. God's eyes go "to and fro" through all the earth (2 Ch. 16:9) and are in every place beholding the evil and the good (Prov. 15:3); Sheol is naked before God's eyes (Prov. 15:11; Job 26:6); the night and darkness are light to Him, and darkness and light to God are both alike (Ps. 139:12). All animals and fowls are His and are known by Him (50:11), and as their Creator God knows all the hosts of the heavenly bodies (Ps. 147:4; Isa. 40:26). He knows the heart of man and his thoughts (1 S. 16:7; 1 K. 8:39; Ps. 7:9 [MT 10]; 94:11; 139:2; Jer. 11:20; 17:9f.; 20:12; Ezk. 11:5). Furthermore, God knows man entirely in all his ways (Ps. 139:1-5; Prov. 5:21), including evil and sin (Gen. 3:11; 6:5, 9, 13; 2 S. 7:20; Ps. 69:5 [MT 6]).

The NT similarly teaches that God knows all. Jesus taught that God knows the hidden secrets of man's heart (Lk. 16:15), and the apostles affirm God's omniscience (Acts 1:24; 15:8; 1 Cor. 3:20; 1 Thess. 2:4; Rev. 2:23). According to the Epistle to the Hebrews, everything is open to God, so that He is omniscient (He. 4:13).

Scripture also leaves no doubt that all of God's knowledge is of the nature of foreknowledge. Nothing future is ever hidden from His eyes (Isa. 41:23; 42:9; 44:6-8; 46:10). And what is true of God's knowledge of the future is also true of His knowledge of things past. God sees and knows us and our days when we and our years are not yet. This moved the psalmist to cry: "Wonderful are thy works! Thou knowest me right well; my frame was not hidden from thee, when I was being made in secret, intricately wrought in the depths of the earth. Thy eyes beheld my unformed substance; in thy book were written, every one of them, the days that were formed for me, when as yet there was none of them" (Ps. 139:14b-16). God's all-comprehensive knowledge is prescient, knowing reality before it is real, people before they exist, and days and events before they occur. God's knowledge, therefore, is not dependent on the object of His knowledge, nor contingent on the factuality of the event. God's is prescient knowledge for it is real before what is known is real.

This divine knowledge, which precedes the reality it knows, has caused theological difficulties, particularly in the area of human free will. Theologians have struggled with the problem of God's foreknowledge and human freedom — if human beings act freely, how can God foreknow their acts before they occur? Arminian theology, in all its variant forms, contends that God's foreknowledge is simply a prescient knowledge, a knowing in advance whether a given person will believe in Christ or reject him. God's election, therefore, is said to be simply God's choice unto salvation of those whom He knows in advance will choose to believe in Christ. God foresees the contingent free action of faith and, foreseeing who will believe in Christ, elects those because they do. But this is destructive of the biblical view of election. In biblical thought election means that God elects people, not that people elect God. In Scripture it is God who in Christ decides for us — not we who, by making a decision for Christ, decide for God.

Reformation theology has contended that the divine foreknowledge contains the ingredient of divine determination. The Reformers claimed that God indeed foreknows who will believe, because believing in Christ is not a human achievement, but a divine gift imparted to men by God's grace and Spirit. Thus God's foreknowledge is not merely prescience, but a knowledge that itself determines the event. That is, in Reformation thought what God foreknows He foreordains. This tradition also maintains that God could not foreknow an event if its occurrence were contingent on the free will of man, i.e., on a will that in its freedom might do one thing or might do its very opposite.

The argument that God could not foreknow the occurrence of faith had He not determined the believing response of faith itself may seem to be an argument based on a restrictive notion of what God can do. Does it rest on a faulty idea of divine possibility? If, indeed, the insistence that God can foreknow only what He Himself has determined lacked biblical support, the argument would be less than convincing. But there are biblical considera-

tions that call into question the idea that God's foreknowledge is simply a prevision of purely contingent human actions and events.

There are, first, scriptural passages in which foreknowledge quite explicitly carries the meaning of foreordination. In Peter's speeches in Acts, what Peter says about the predestination of the crucifixion of Christ in 4:28 is almost identical with the meaning of *prógnōsis* in 2:23. What happened to Jesus, says Peter, took place according to "the definite plan and foreknowledge of God." Foreknowledge here echoes the idea of God's counsel or plan in 4:28, reflecting that foreknowledge is an ingredient of that determination which made the death of Christ certain. God foreknows the death of Christ because the crucifixion was His planned determination.

Similarly, in what 1 Pet. 1:2 says about an election which is "according to the foreknowledge of God," foreknowledge appears to be more than a mere divine prevision of faith. Foreknowledge here carries the notion of divine purpose (cf. RSV "destined by God"). If it meant a mere prevision of faith or of some other worthy quality in those characterized by Peter as "chosen," then Peter would be teaching a view of election quite contrary to the predominant scriptural emphasis that election does not rest on some worthy quality in the elect. It is clear that Peter teaches that the chosen (Gk. *eklektoís* in 1:1) are foreknown unto obedience and the sprinkling of the blood of Christ (1:2), but not because of some self-possessed worth observed by God and used by God as a reason for their being elect.

In Rom. 11:2 Paul, speaking of the Jews, says, "God has not rejected his people whom he foreknew." Given the context of this statement, which pointedly describes the unbelief and the spiritual hardness of Israel, it is quite impossible to hold that God's foreknowing of Israel is based on His prevision of some quality in Israel that prompted the divine choice.

That God's foreknowledge contains the idea of divine determination does not rest merely on a few biblical texts but reflects a truth about God that comes to expression in a variety of biblical concepts descriptive of the unique and mysterious character of God's actions. God's foreknowledge is itself a form of determination which accounts for the reality of that which is divinely foreknown. What God knows is real because He knows it. In biblical thought God calls the things that are not as though they were (Rom. 4:17), and then they are. God creates by uttering His word (Ps. 33:6). It is not only God's knowing and/or foreknowing that determines the reality that God knows. The uttering of His creative word determines that reality that we call the created universe. Thus God's speech shares in the mysterious character of His foreknowledge, indeed in the mysterious nature of God's entire relationship to the world. God calls Israel into existence and by that call Israel exists. God elects what is not and the elective divine call creates what it elects (Isa. 51:1f.). Jesus calls a dead, unhearing Lazarus, and His call gives hearing where there is none; His call determines the reality of the hearing (Jn. 11:43f.). The dead hear His voice (Jn. 5:25, 28). God causes His face to shine and men are saved (Ps. 80:19 [MT 20]). God *looks* upon the afflicted (Gen. 29:31-35; 2 S. 16:12), God *hears* Israel's groaning, God *remembers* His covenant with Abraham (Ex. 2:24f.), God *knows* Israel's sufferings (Ex. 3:7), God *turns to* the destitute (Ps. 102:17), and has *regard for* Abel's offering (Gen. 4:4; Ps. 119:132) — and these very divine actions impart deliverance and blessing. As in God's foreknowledge, all of these divine actions are reality-imparting, blessing-bestowing divine actions, which as such predetermine. He who creates (or recreates) by that very fact determines in advance. The inclusion of divine determination in divine foreknowledge is not essentially different from that determination that is reflected in God's creative, elective calling, looking, regarding, seeing, turning to, and remembering.

In view of what has befallen Israel, Paul asks whether God has rejected Israel. He answers emphatically that God has not rejected the people He foreknew (Rom. 11:1f.). God's foreknowing of Israel guarantees Israel's continuance. Similarly, God's calling and endowment of Israel guarantees that God will not repent of His calling and gifts (Rom. 11:29).

God's foreknowledge is far from mere prevision or prior intellectual awareness; even its ingredient of determination is an expression of blessing. In biblical usage God's foreknowledge does not relate to whatsoever comes to pass, to an all-comprehensive divine will. Foreknowledge relates to matters beneficent and salvific. In this it reflects and comports with the biblical idea that to be looked upon, regarded, remembered, and heard by God are all matters of blessing. The Bible uses the words "foreknow" and "predestinate" in a salvific context and with a salvific meaning. Israel as God's chosen people whom God foreknew is a clear example of the salvific character of God's foreknowledge. Scripture does not use the term "foreknowledge" to describe God's prescient knowledge of the Philistines, or the Moabites. This indicates how little foreknowledge can be limited to simple prevision or mere intellectual awareness.

But it must also be added that Scripture does not allow the drawing of the logical inference that none but the Jews are foreknown by God unto salvation. For it was to the church at Rome that Paul wrote, "For those he foreknew he also predestined to be conformed to the image of his Son" (8:29).

In biblical thought, divine foreknowledge includes the idea of foreordination to salvation and we may not enlarge the meaning of either term to include "whatsoever comes to pass." To give it a larger coverage is to include those whom the Bible describes as those whom God does not know, as in Jesus' disclaimer, "'I never knew you'" (Mt. 7:23).

See also OMNISCIENCE; PREDESTINATION.

J. DAANE

FOREMEN [Heb. *hōgᵉšîm*] (Ex. 5:6, 10, 14f., 19); AV TASKMASTERS. The overseers of forced labor gangs that are depicted on Egyptian reliefs carrying rods to insure the prompt completion of assigned tasks by those under them. The verb root on which the participle is based, *nāgaš*, means "oppress"; cf. "taskmaster," Ex. 3:7.

FOREORDAIN (1 Pet. 1:20, AV). *See* DESTINE; *see also* CHOOSE; ELECTION; FOREKNOW; PREDESTINATION.

FOREPART. Used by the AV in the obsolete sense of "bow" in Acts 27:41. *See* SHIPS.

FORERUNNER [Gk. *pródromos*]. This word occurs only once in the Bible (He. 6:20): "where Jesus has gone as a forerunner on our behalf." The word signifies one who comes in advance to a place where the rest are to follow, or one who is sent on before as a scout to make observations (cf. "pioneer" in 12:2). In this sense Christ is our forerunner, for He has gone into heaven to prepare for His people a place into which He will eventually lead them. The idea of a forerunner is peculiar to the NT. The OT high priest was a representative, not a forerunner: where he

led, namely, into the holy of holies, the people could not follow. He was not the pioneer of the people; Christ is. Christ goes nowhere but where His people may follow. *See also* JOHN THE BAPTIST. W. EVANS

FORESAIL (Acts 27:40). *See* SHIPS.

FORESHIP (Acts 27:30, AV). Used by the AV in the obsolete sense of "bow." *See* SHIPS.

FORESKIN [Heb. *'orlâ*] (Gen. 17:11, 14, 23-25; Ex. 4:25; Lev. 12:3; etc.); NEB also "circumcise" (Jer. 4:4). The word is frequently mentioned in the literal sense. The rite of circumcision, practiced in Israel since the days of Abraham (Gen. 17:9-14), is also commonly attested among several other peoples of antiquity (and modern times). Among the Jews circumcision had to be performed by means of a flint or stone knife (Ex. 4:25; Josh. 5:2f.) on the eighth day after birth (Gen. 17:12; 21:4; Lev. 12:3; cf. Lk. 2:21; Phil. 3:5), even if this day were the sabbath (Jn. 7:23).

Very early the practice was one of which the descendants of Abraham became proud (Gen. 34:14); the Philistines, who did not practice the rite (1 S. 17:26; 18:25, 27), were scorned as "the UNCIRCUMCISED" (e.g., Jgs. 14:3; 15:18; 1 S. 14:6; 31:4; etc.). In the time of oppression under King Antiochus Epiphanes many Israelites suffered martyrdom rather than give up the distinctive sign of their people (1 Macc. 1:48, 60f.; 2 Macc. 6:10). Among the Arabs and all Moslems the custom of circumcision prevails from pre-Islamic times, for it is nowhere ordered in the Koran, and the appellation "uncircumcised" (Arab. *ghalaf*) is considered the greatest possible insult.

Metaphorically the word "foreskin" is used in the sense of "obstinacy," "opposition to God's law." The rite of circumcision meant submission under the law. While an outward form could not be identical with an inward attitude toward God, the use of the word "circumcision" was soon extended to that of purity and obedience of the heart (Dt. 10:16; Jer. 4:4; cf. Col. 2:11). The uselessness of outward circumcision that does not include obedience and purity is shown by Paul (Rom. 2:25; 1 Cor. 7:18; cf. Acts 7:51). *See* CIRCUMCISION. H. L. E. LUERING

FOREST; WOODS [Heb. *ya'ar, ya'ᵃrâ, pardēs, ḥōreš, śāḏeh*; Gk. *drymós* (LXX), *hýlē* (Jas. 3:5)].

The Heb. *ya'ar* (cf. Ugar. *y'r*) can mean a stony wasteland or a definite wooded tract (e.g., 1 S. 22:5; 1 K. 7:2f.). The root appears in "Kiriath-jearim" and "Mt. Jearim." See also Dt. 19:5; Ps. 96:12; Cant. 2:3; Mic. 7:14.

A moderately extensive growth of vegetation is indicated by Heb. *ḥōreš* (Ezk. 31:3; 2 Ch. 27:4). But in 1 S. 23:15-19 the RSV and NEB read *ḥōreš* as a proper name (*see* HORESH). In Isa. 17:9, the RSV and NEB follow the LXX by introducing "Hivites and Amorites" for the MT "the woodland (*ḥōreš*) and the elevated height." The Heb. *pardēs* (cf. Akk. *pardīsu*) can refer to a park (cf. Neh. 2:8, RV mg.; Eccl. 2:5, RV, RSV, NEB) or orchard (Neh. 2:8, AV; Cant. 4:12), but since it supplied timber it was no doubt meant to indicate a forest in Neh. 2:8 (NEB "forests").

Sometimes forests are intended by Heb. *sᵉḇāḵ, sᵉḇōḵ*, from a root meaning "be interwoven," and thus a "thicket," or "thicket of trees" (Gen. 22:13; Isa. 9:18; 10:34; Jer. 4:7; Ps. 74:5), but these two terms are infrequent in the MT. *See also* THICKET.

Palestinian forests and woodlands were much more extensive in antiquity than at present, several of them being mentioned by name in the OT. These included the celebrated Lebanon forest near Tyre, which was unquestionably the largest of its kind in Palestine, and produced pine and myrtle trees as well as the famous cedars. Another extent of woodland was the Carmel forest, which flourished on the top of the mountain (Cant. 7:5) from Neolithic times. The forest of Hereth in Judah stretched down to the edge of the Philistine plain, and at one period provided shelter for David after his departure from Moab (1 S. 22:5). An extensive forest of date palms is believed to have flourished in antiquity in the Jordan Valley N of the Dead Sea, and traces of it were still evident at Jericho in the time of Josephus (A.D. 37-95).

Forest of Gilead (D. Baly)

The expression "thickets in Arabia" (Isa. 21:13) does not appear to refer to a large woodlot so much as to shrubs and palm trees growing in the region of oases. Another phrase, "the House of the Forest of Lebanon" (1 K. 7:2f.), can also be misinterpreted, the actual reference being to a portion of the royal palace in Jerusalem in the Solomonic period. The name was derived from the Lebanese cedar used in the construction of the pillars and paneling.

Differences in soil and climate produced a wide variety of trees and shrubs in Palestine, although the woods and forests would consist principally of oaks, terebinths, cedars, Aleppo pines, and in the Dead Sea region would include tamarisk trees, willows, and poplars. Deciduous oak forests flourished in OT times in lower Galilee, Ephraim, Sharon, and Bashan. Woods and forests provided a home for animals of various kinds (2 K. 2:24; Ps. 50:10), and in the preexilic period the area known to the Arabs as the Zor, close to where the Jordan emptied into the Dead Sea, was luxuriant with trees and tropical vegetation. Asiatic lions were to be found there also, and it was deemed an outstanding feat of virility for a man to enter the area and kill a wild animal unaided (cf. 1 S. 17:35).

The indiscriminate felling of trees was prohibited in Dt. 20:19. Instead, they were to be conserved whenever possible, and like human beings were not to be regarded as disposable. The cutting down of trees causes the erosion of the soil and an alteration in the amount and frequency of rainfall. Taken together, these two conditions quickly bring about sizable areas of desert. The large expanses of woodland and forest that occurred in Palestine and Syria have disappeared for the most part, except in places that have been difficult of access, and belated attempts at reforestation have formed part of the national conservation programs of Israel and Jordan from the 1970's.

See also FLORA. R. K. H.

FOREST OF EPHRAIM. *See* EPHRAIM, FOREST OF.

FORETOLD [Heb. *dāḇar*] (2 K. 24:13); AV SAID; [Gk. *protangéllō*] (Acts 3:18); AV BEFORE SHEWED; [*semaínō* (Acts 11:28); AV SIGNIFIED; NEB PREDICT. In the OT the foretelling of future events is the prerogative of Yahweh (Isa. 41:22f.; 42:9; cf. Dt. 18:22; Acts 3:18). Though prophecy was believed to have ceased in Israel soon after the return from Exile, it reappeared with John the Baptist. In NT times a prophet named Agabus predicted a famine, which occurred in the reign of Claudius (Acts 11:28). *See* PROPHECY.

FORFEIT [Heb. niphal of *qāḏaš*–'be consecrated' (Dt. 22:9), *ḥāram*–'devote to the ban' (Ezr. 10:8), *ḥāṭā'*–'miss' (Prov. 20:2; Hab. 2:10), *taḥaṯ*–'instead of' (2 K. 10:24); Gk. *apóllymi*–'destroy' (Lk. 9:25), pass. of *zēmióō*–'inflict injury or punishment' (Bauer, rev., p. 338; Lk. 9:25 par.)]; AV also "be defiled," "sinneth against," "(his life shall be) for" (2 K. 10:24), LOSE (Mt. 16:26 par.); NEB also CONFISCATE, "is his own worst enemy" (Prov. 20:2), AT THE COST OF (Mt. 16:26 par.).

In the OT "forfeit" (from Lat. *forisfacere*, "act beyond") implies loss through transgression or nonobservance of some law or rule. One could forfeit, e.g., his crops when improperly sown (Dt. 23:9; *see* SOW). The most important instance of this term is Christ's referral to forfeiting one's life (Lk. 9:25 par.). Here Our Lord contrasts "the whole world" with human life (Gk. *psyché*, "soul"; cf. Heb. *nepeš*, "soul," in Prov. 20:2; 2 K. 10:24; Hab. 2:10) and "gain" with "forfeit." (In Luke Gk. *zēmióō* and *apóllymi* mean the same thing — "destroy.") Christ reminds His followers that earthly gains, such as the world's approval, are less important than the value of one's life, which here means one's fellowship with God and future eternal life. Those who deny Christ in this life Christ will deny ("be ashamed of") at the end of time (Lk. 9:26).

R. W. V.

FORGE [Heb. *pā'al*] (Isa. 44:12); AV WORK; NEB SHAPE; FORGER [part. of *lāṭaš*] (Gen. 4:22); AV INSTRUCTOR; NEB MASTER. In Gen. 4:22 *lōṭēš*, "hammerer," describes Tubal-cain, "the forger of all instruments of bronze." The antiquity of this tradition has been demonstrated by Russian excavations at the foot of Mt. Ararat that uncovered an estimated two hundred amazingly sophisticated smelting furnaces. These were designed to produce different kinds of bronze, including alloys of copper with zinc and iron, as well as a variety of ceramics, glasses, and metallic paints. The location accords with the OT traditions relating to the contemporaries of Enoch and Methuselah. The activities of the forger are also referred to in Isa. 44:12.

R. K. H.

FORGET [often Heb. *šāḵaḥ*]; NEB also HEEDLESS (Ps. 44:24 [MT 25], IGNORE (Ps. 74:23), HOLD IN MIND (Ps. 78:7), etc.; [Heb. *šākē(a)ḥ*]; NEB also HEEDLESS (Ps. 9:17 [MT 18]); [*nāšâ* (Gen. 41:51; Job 39:17; Isa. 44:21)]; Gk. *epilanthánomai, eklanthánomai* (He. 12:5), *epilēsmonḗ*–'forgetfulness' (Jas. 1:25), *léthē*–'forgetfulness' (2 Pet. 1:9)]; AV also FORGETFUL (Jas. 1:25).

"Forgetting" as "loss of memory" has several closely related nuances. In Isa. 23:15f. Tyre is told that it will be forgotten as a harlot is forgotten (complete obliviousness of memory). In Gen. 40:23 the chief butler forgot (completely lost track of) Joseph, and the Egyptians in Gen. 41:30 are told that they will find their memory of the seven years of plenty obliviated by the misery of the seven-year famine. Jeremiah declared at the time of his beating at the hands of Pashhur that the "eternal dishonor" of his persecutors will never be obliviated (20:11). In Dt. 25:19 Israel is urged not to forget (NEB "not fail to") the treachery of Amalek (i.e., not to lose the freshness of memory). Similarly, in Job 11:16 to forget misery is to remember it as waters "that have passed away," and in Amos 8:7 Yahweh himself swears, "Surely I will never forget any of their deeds" (loss of fresh awareness).

This sense of "lose consciousness of" is prominent in the use of Heb. *šāḵaḥ* in connection with forgetting God and His mighty deeds (e.g., Ps. 78:7,11; 106:13,21; Hos. 2:13; 13:6), His name (Jer. 23:27), or the covenant with Him. Yet there can be a more concrete conception of how one forgets God, as the Deuteronomist makes clear: "Take heed lest you forget the Lord your God, by not keeping his commandments and his ordinances and his statutes" (Dt. 8:11; cf. also 26:13).

"Forget" approaches the meaning "unlearn" in such passages as Hos. 4:6, where the Lord accuses his people of having forgotten the law (parallel to "rejected knowledge"), Gen. 41:51, "God has made me forget all my hardship," and Lam. 3:17, "I have forgotten what happiness is."

But "forget" also has another range of meaning which does not really concern loss or obliviousness of memory; it may connote "overlook, neglect, care little for." The same Greek verb *epilanthánomai* is used in Jas. 1:24 to refer to the loss of memory of the features of one's own face, and in Mk. 8:14 (par. Mt. 16:5) to indicate the negligence of the disciples in forgetting to bring enough bread. (Cf. He. 6:10, "overlook," and NEB "forget.") Similarly, in Ps. 102:4 (MT 5) the distressed psalmist in his anxiety has even neglected eating ("I forget to eat my bread"; NEB "I cannot find the strength to eat"). The sense is "overlook" in Dt. 24:19: "When you reap your harvest in your field, and have forgotten a sheaf in the field, you shall not go back to get it; it shall be for the sojourner, the fatherless, and the widow." The ostrich in Job 39:15 overlooks an important fact in laying her eggs on the ground, "forgetting that a foot may crush them." (Cf. *šāḵaḥ* parallel to "forsake" in Isa. 49:14 and "hide [one's] face" in Ps. 44:24 [MT 25], etc; and *šākē(a)ḥ* parallel to "forsake" in Isa. 65:11.) God does not overlook the slightest detail according to Lk. 12:6, for not even a sparrow is "forgotten [NEB "overlooked"] before God."

In Dt. 32:18 the NEB uses this sense of overlooking when it renders "forgot the God who gave you birth" with "cared nothing for" (cf. Jer. 3:21 where NEB has "ignored . . . God" for "forgotten . . . God"). This sense is also present in the plaintive cry that echoes throughout the Psalms of Lament: "How long, O Lord? Wilt thou forget me forever?" (Ps. 13:1 [MT 2]), or "Arise, O Lord . . . forget not the afflicted" (Ps. 10:12), "Has God forgotten to be gracious?" (Ps. 77:9 [MT 10]). (Note also the ironic parallel in Am. 8:7 in language borrowed directly from the plaintive Psalms of Lament: "I will never forget any of their deeds.")

Psalm 137 is a community lament that reflects the agony of those people who painfully made the adjustment to the grim reality of exile and destruction and had to realize the implications of defeat for the power of Yahweh and of superior authority for Babylonian deities. They sat and wept when they remembered Zion. Could Yahweh still be worshiped in a strange land where other gods

appeared to be in control? Ps. 137 captures the poignant despair that permeated the exilic community, but it also reflects in vv. 5f. the absolute determination to keep fresh and vibrant the memory of Jerusalem and what had been done to its proud temple and walls. These verses constitute a passionate self-imprecation aimed at safeguarding any forgetfulness or loss of fresh consciousness. The psalmist here looks both with hope for recovery of what was, and for the requital of Babylon for the wanton destruction that it wreaked on Jerusalem and its environs. In the context of the Exile, to remember what had happened was essential to Israel's continuity and survival as a people.

In Isa. 44:21f. Yahweh assures His despondent people that they "will not be forgotten," for He cast away their sins and redeemed them. Though seemingly God had forsaken His people, God's love for the despairing city of Zion is more secure than the love of a mother for her child — God "will not forget" (49:14f.).

A unique use of "forget" appears in Job 39:17. There it is said that God caused the ostrich to forget (hiphil of *nāšâ*; AV "deprived"; NEB "denied") wisdom, meaning that God had not endowed the ostrich with much wisdom when He created it. In Mic. 6:10 the RSV translation assumes the emendation *ha'eššeh*, "can I forget?" (NEB "overlook") for the obscure MT *ha'iš* (AV "is there?"). In Ezk. 39:26 the RSV and NEB follow the *qere* *wᵉnāšû*, "they shall forget," rather than the *kethiḇ* *wᵉnāśᵓû* (AV "they have borne").

FORGETFULNESS, LAND OF [Heb. *'ereṣ nᵉšîyâ*] (Ps. 88:12 [MT 13]); NEB LAND OF OBLIVION. This expression is a poetic designation for SHEOL. In Ps. 88:11f. (MT 12f.) this is the fourth such circumlocution for Sheol in a parallel series: "the grave" (*haqqeḇer*) par. "Abaddon" (*ᵃḇaddôn*) and "the darkness" (*haḥōšeḵ*) par. "land of forgetfulness" (*'ereṣ nᵉšîyâ*). (*See also* ABADDON.) Ps. 88:5, 10-12 (MT 6, 11-13), and the expression "land of forgetfulness" itself, suggest that the dead are beyond the care of God; but His presence even there with the dead is affirmed elsewhere (cf. Job. 26:6; Ps. 139:8; Prov. 15:11).

FORGIVENESS [Heb. *kāpar*–'cover,' *nāśā'*–'take away,' 'forgive' (Gen. 18:24, 26; Isa. 2:9), *sālaḥ*–'forgive,' *sᵉlîḥâ*–'forgiveness,' *sallāḥ*–'pardon,' 'forgiveness,' *kāsâ*–'cover,' 'conceal,' *māḥâ*–'wipe out']; AV also COVER (Ps. 85:2 [MT 3]; cf. 32:1); NEB also PUT AWAY; [Gk. *aphíēmi* (Mt. 6:12ff.; Mk. 2:7, 10; Jn. 20:23; 1 Jn. 1:9; etc.), *apolýō* (Lk. 6:37), *charízomai* (2 Cor. 2:7, 10; 12:13; Col. 3:13), *áphēsis* (Mk. 3:39; Acts 5:31; 13:38; 26:18)]; AV also REMIT (Jn. 20:23).

I. Terms.–The Hebrew verb *kāpar* is the word commonly used for atonement, in which sins were "covered" by offering a sacrifice as a substitute for the life of the sinner. In this sense *kāpar* obviously refers only to God's forgiveness of the transgressor (Dt. 21:8; Ps. 78:38; Jer. 18:23). *Nāśā'* is forgiveness in terms of guilt being taken away, atoned for, or borne, resulting in divine pardon (Ex. 28:43; 32:32; Lev. 5:1, 7; Nu. 14:19, 34; 18:1; Josh. 24:19; Ps. 85:3; etc.), and also of human forgiveness (Gen. 50:17; Ex. 10:17; 1 S. 25:28). The cognates of *sālaḥ* always refer to an act or function of forgiveness on the part of God to mankind (cf. Nu. 30:5, 8, 12; 1 K. 8:30, 34, 36, 39, 50; 2 K. 24:4; Am. 7:2; Ps. 86:5; 130:4; Dnl. 9:9; Neh. 12:7, 20). *Māḥâ*, "wipe away," expresses the concept of forgiveness in Ps. 51:1, 7; Isa. 43:25; 44:22. *Kāsâ* has the general sense of covering or concealing, and from the idea of covering a person came that of covering sins (Neh. 4:5; Ps. 32:1; 85:2).

In the LXX Greek words expressing forgiveness are *euïlateúō*, "show mercy," used to translate both *nāśā'* and *sālaḥ*, while *epikalýptō*, *kalýptō*, and *krýptō*, "cover, conceal," serve as the equivalents of *kāsâ*. *Sālaḥ* is also occasionally rendered by *híleōs*, while the infrequent *māḥâ* is translated exactly by *exaleíphō*, "wipe away." The noun for "atonement" (*hilasmós*) appropriately renders the rare word *sᵉlîḥâ* in Ps. 130:4; Dnl. 9:9, and increases the dimension and spiritual depth of the concept of forgiveness by making specific the ideas of propitiation and atonement found elsewhere (Ex. 29:36; 30:10; Lev. 16:20; Ezk. 43:20; etc.).

In the NT the Greek terms used for forgiveness are the verbs *apolýō*, *aphíēmi*, *charízomai*, *kalýptō* (RSV "cover," 1 Pet. 4:8; Jas. 5:20), and *epikalýptō* (Rom. 4:7), and the nouns *áphesis* and *páresis*. *Apolýō* (Lk. 6:37) is used because of the analogy of sin to debt, and denotes the release from it. It has the meaning "forgiveness" in 2 Macc. 12:45 also, in which passage the word for sin is expressed. In Rom. 3:25 Paul uses *páresis* instead of the usual *áphesis*. The former means "passing over," the latter "putting away" completely and unreservedly. "Passing over" simply means that God had not executed the full measure of the retribution due to sin, that He exercised forbearance and longsuffering (cf. Acts 14:16; 17:30). This passing over of sins tended to destroy mankind's conception of God's righteousness, and in order to avert this Christ was set forth as a propitiation.

Charízomai is not found outside of the writings of Luke and Paul, and in the sense "forgive sins" is peculiarly Pauline (2 Cor. 2:7; 12:13; Eph. 4:32; Col. 2:13; 3:13). It expresses, as no other of these words does, Paul's conception of the graciousness of God's pardon. Remission (Mt. 26:28; Mk. 1:4; Lk. 1:77; 24:47; Acts 2:38; 10:43; He. 9:22; 10:18) and blotting out (Ps. 51:1, 9 [MT 3, 11]; Isa. 43:25; Jer. 18:23; Acts 3:19) are synonyms of forgiveness, and to understand the concept fully such words as "save," "justify," "reconcile," and "atonement" should also be considered. Forgiveness is thus an activity that is characteristic of a merciful and loving God who does not take pleasure in the death of the sinner, and who is ready to pardon him once proper confession and atonement have been made. Forgiveness is preceded by the covering of the sin so that it is obscured from God's sight. Consequent upon this, God undertakes to remember it no more (cf. Isa. 43:25; Jer. 31:34), so that there can be no further claim against the sinner for recompense by a God whose holiness has been violated by iniquity. Nor can any state of resentment continue against the transgressor for past misdeeds, since all demands have been met through the act of atonement. Forgiveness is always a matter of divine privilege rather than human right, for the price of sin must first be paid before the conditions can exist for forgiveness to become a reality. Thus, when under the New Covenant the vicarious atonement of Christ on Calvary is appropriated personally by penitence and faith, the blood of Christ cleanses from all sin, and results in pardon, peace, and the restoration of spiritual fellowship with God.

Forgiveness is necessary in the first instance because mankind is separated from God by the sins committed as

a result of our fallen nature. This transgression may be deliberate or accidental, but in any event it is a consistent mark of human beings (Isa. 64:6). Those who would be God's followers have imposed upon them the demands of obedience (Dt. 13:4; Jer. 26:13; etc.) and holiness (Lev. 11:44), among other spiritual responsibilities, and the ethical nature of God is such that He cannot look with equanimity upon violations of His law (Ex. 20:5; Lev. 20:7). The sacrificial provisions of the Sinai covenant enabled the penitent sinner in Israel to obtain cleansing and forgiveness through divine mercy. By this means the spiritual integrity of the individual as a member of a holy nation was restored, the penal death of the ungodly was averted, and the complete removal of sin (Isa. 30:17) was accompanied by the assurance of a renewal of fellowship between God and the repentant sinner. The latter could thus take his place once again as a member of a nation of God's priests, pursue the ideal of a holy life, and experience the blessing of God in whatever he undertook. This rich spiritual relationship, like forgiveness itself, was a free gift of divine grace, and was available to all who in penitence and faith submitted to the overlordship of the one true God. *See* ATONEMENT; SACRIFICE.

II. Forgiveness in the Ancient Near East.–In the unremitting struggle for survival that characterized the lives of most persons in the ancient world, individual interest was a predominant concern. This expressed itself most satisfactorily in power and wealth, which went far toward allaying the widespread feelings of personal insecurity. Because of this, any threat to personal well-being was considered to be a most serious affair, so crimes committed against individuals or groups were dealt with according to current concepts of justice. Where codes of law existed, it was possible for the offender to be brought to trial, and if convicted, to be punished according to the penalty prescribed. Where such codes were ignored or did not exist, summary justice when opportune rather than a magnanimous act of forgiveness seems to have been the usual procedure righting wrongs.

Among the Hebrews a person's forgiveness of his fellow is only mentioned infrequently, and in each instance the one requesting pardon is in a position of subservience, and is petitioning for that to which he has no just or natural right (Gen. 50:17; Ex. 10:17; 1 S. 15:25; 25:28). Otherwise forgiveness is spoken of in relation to sin against God, where divine pardon is sought (Nu. 14:19; 1 K. 8:34; Am. 7:2; etc.). If the forgiveness of individuals was not considered especially virtuous, that of the nation's enemies was even less so. War in the ancient Near East was fundamentally a conflict between deities, fought by the peoples who owed allegiance to the gods in question. Victory was always the objective of such a struggle, and for one pagan deity to pardon another was unthinkable. Among the Israelites the imprecatory psalms attest that the pardoning of enemies was not esteemed as a virtue. This is not to say that the Hebrews were being vindictive or sadistic when they prayed that the young children of the enemy might be dashed against the rocks (Ps. 137:9). They were supplicating for the extinction of God's enemies, represented by a generation that might well live to rise against Him in the future, a contingency that would not occur were they to be exterminated forthwith. The Torah discouraged the Hebrews from seeking either the peace or prosperity of their enemies (Dt. 23:6), lest these conditions should lead the Hebrews to imagine that following a pagan way of life would make them equally prosperous also. The law thus made it legitimate for a follower of the covenant ethic to hate rather than to forgive his enemy.

III. The Teaching of Christ.–Jesus summed up this attitude broadly by contrasting the love of one's friends with the hatred of one's enemies (Mt. 5:43). In expounding the ethic of the New Covenant, Christ taught that forgiveness is a duty. No limit can be set to the extent of forgiveness (Lk. 17:4), and it must be granted without reserve. Jesus will not admit that there is any wrong so gross nor so often repeated that it is beyond forgiveness. To Him, having an unforgiving spirit is one of the most heinous of sins. Jesus sought to displace the pagan spirit of implacability by a generous, forgiving spirit. It is so far the essence of His teaching that in popular language "a Christian spirit" is not inappropriately understood to be synonymous with a forgiving disposition. His answer to Peter that one should forgive not merely seven times in a day but seventy times seven (Mt. 18:21f.) not only shows that He thought of no limit to one's forgiveness, but shows also that the principle could not be reduced to a definite formula.

IV. Conditions of Forgiveness.–Jesus recognized that there are conditions to be fulfilled before forgiveness can be granted. Forgiveness is part of a mutual relationship; the other part is the repentance of the offender. God does not forgive without repentance, nor is it required of mankind. The effect of forgiveness is to restore to its former state the relationship that was broken by sin. Such a restoration requires the cooperation of both parties. There must be both a granting and an acceptance of the forgiveness. Sincere, deep-felt sorrow for the wrong, which works repentance (2 Cor. 7:10), is the condition of mind that insures the acceptance of the forgiveness. Hence Jesus commands forgiveness when the offender turns again, saying, "I repent" (Lk. 17:3f.). It was this state of mind that led the father joyfully to welcome the Prodigal before he even gave utterance to his newly formed purpose (15:21).

V. The Offended Party.–It is not to be supposed, however, that failure to repent on the part of the offender releases the offended from all obligation to extend forgiveness. Without the repentance of the one who has wronged him he can have a forgiving state of mind. This Jesus requires, as is implied by, "if you do not forgive your brother from your heart" (Mt. 18:35). It is also implied by the past tense in the Lord's Prayer: "as we also have forgiven our debtors" (6:12). It is this forgiving spirit that conditions God's forgiveness of our sins (Mk. 11:25; Mt. 6:14f.). In such a case the unforgiving spirit is essentially unrepentance (Mt. 18:23-35).

The offended is to go even farther and is to seek to bring the wrongdoer to repentance. This is the purpose of the rebuking commanded in Lk. 17:3. More explicitly Jesus says, "If your brother sins against you, go and tell him his fault, between you and him alone" (Mt. 18:15-17). He is to carry his pursuit to the point of making every reasonable effort to win the wrongdoer, and only when he has exhausted every effort may he abandon it. The object is the gaining of his brother. Only when this is obviously unattainable is all effort to cease.

The power of binding and loosing, which means forbidding and allowing, was granted to Peter (Mt. 16:19) and to the Christian community (18:18; Jn. 20:23). It clearly implies the possession of the power to forgive sins. In the case of Peter's power it was exercised when he used the keys of the kingdom of heaven (Mt. 16:19). This consisted in the proclamation of the gospel and especially of the conditions upon which men might enter into relationship with God (Acts 2:38; 10:34ff.). It was not limited to Peter only, but was shared by the other apostles (Mt. 16:19; 18:18).

VI. Divine and Human Forgiveness.–That there is a close analogy between human and divine forgiveness is clearly implied (Mt. 5:23f.; 6:12; Mk. 11:25; Lk. 6:37; Col. 1:14;

3:13). God's forgiveness is conditional upon a person's forgiveness of the wrongs done him, not because God forgives grudgingly, but because forgiveness alone indicates that disposition of mind which will humbly accept the divine pardon. Repentance is a necessary ingredient of the fully developed forgiveness. There is no essential difference between the human and the divine pardon, though the latter is necessarily more complete. It results in the complete removal of all estrangement and alienation between God and mankind. It restores completely the relationship that existed prior to the sin. The total removal of the sin as a result of the divine forgiveness is variously expressed in the Scriptures: "for thou hast cast all my sins behind thy back" (Isa. 38:17); "Thou wilt cast all our sins into the depths of the sea" (Mic. 7:19); "I will forgive their iniquity, and I will remember their sin no more" (Jer. 31:34); "I, I am He who blots out your transgressions for my own sake, and I will not remember your sins" (Isa. 43:25); "as far as the east is from the west, so far does he remove our transgressions from us" (Ps. 103:12).

Ideally the same result is attained in human forgiveness, but actually the memory of the sin remains with both parties as a barrier between them, and even when there is a complete restoration of amity the former state of alienation cannot entirely be removed from memory. When God forgives, however, He restores a person to the condition of former favor. Release from punishment is involved, though divine forgiveness is more than this. In most cases the consequences, which in some instances are spoken of as punishment, are not removed, but they lose all penal character and become disciplinary. Nor does the forgiveness remove from the human mind the consciousness of sin and the guilt which that involved, but it does remove the mistrust that was the ground of the alienation. Mistrust is changed into trust, and this produces peace (Ps. 32:5-7; Rom. 5:1), and consciousness of the divine love and mercy (Ps. 103:2ff.); it removes fear of punishment (2 S. 12:13), and awakens love to God.

VII. Forgiveness and Justification.–Paul rarely uses the term "forgiveness," but in its place prefers "justification." They are to his understanding practically synonymous (G. B. Stevens, *Theology of the NT* [1902], p. 418). He preferred the latter, however, because it was better fitted to express the idea of secure, present, and permanent acceptance in the sight of God. It connoted both a complete and a permanent state of grace. In popular thought forgiveness is not so comprehensive, but in the biblical sense it means no less than this. It removes all of the guilt and cause of alienation from the past, it assures a state of grace for the present, and it promises divine mercy and aid for the future. Its fulness cannot adequately be conveyed by any one term or formula.

Divine, like human, forgiveness is always contingent upon the fulfillment of conditions. It must be preceded by repentance and a firmly fixed intention not to repeat the offense. In addition to this, one was required to conform to certain legal or formal acts before the assurance of pardon was his. These acts, expressive of the sinner's state of mind consisted of certain kinds of sacrifice in the pre-Christian times and of baptism during the ministry of John the Baptist (Mk. 1:4; Lk. 3:3) and under Christ (Acts 2:38; 22:16). These acts are never regarded as in any sense a *quid pro quo* in return for which the benefit of forgiveness is granted. Forgiveness is an act of pure grace on God's part, and the human acts are required as expressions of the person's attitude toward God. The state of mind required in order to obtain the gift of forgiveness is that to which the Prodigal Son came (Lk. 15:17-19), and that of the sinner who went to his house justified rather than the Pharisee (18:9-14), because he realized that forgiveness was to him an act of pure favor.

VIII. OT Teaching.–There was real and actual forgiveness of sins in the OT times as well as since Christ. Certain passages have been construed to teach that the law provided only for a passing over or rolling back of sins, and that there was not then an actual forgiveness. The sacrifices prescribed by the law were not adequate atonements, so that there was constant necessity of yearly remembrance of sin (He. 10:3; cf. Lev. 16:21). The atonement of Christ is, however, of permanent adequacy, and became retroactive in the sense that it unified in Christ the divine arrangement for saving mankind in all ages (He. 11:40). No expression in the OT suggests any inadequacy of the forgiveness extended to Israel, but many passages may be quoted to show how rich and full it was deemed to be (Pss. 32, 103; Mic. 7:19; Isa. 38:17; Jer. 31:34).

IX. Limitations of Forgiveness.–Two passages seem to limit God's forgiveness. They are Christ's discussion of the unpardonable sin (Mt. 12:31f.; Mk. 3:28-30; Lk. 12:10), and the one that mentions the sin unto death (1 Jn. 5:16; cf. He. 6:4-6). In the former passage there is mentioned a sin that has no forgiveness, and in the latter, one on behalf of which the apostle cannot enjoin prayer that it be forgiven — though he does not prohibit it. In both cases the sin is excluded from the customary forgiveness that is extended to sins of all other classes.

The act of the Pharisees in attributing to Satan a good deed wrought by Jesus through the Spirit of God (Mt. 12:28) may have been what led Jesus to speak of the unpardonable sin. No one could do such a thing unless his moral nature was completely warped and the fundamental distinctions between good and evil were obliterated. He is beyond the hope of forgiveness, not because God has set an arbitrary line of sinfulness beyond which His grace of forgiveness will not reach, but because the person has put himself beyond the possibility of attaining that state of mind which is the essential condition of divine forgiveness. *See* HOLY SPIRIT II.B.1; SIN XI.

There is no possible way of determining what specific sin, if any, John refers to. Probably the same principle applies in this case as in that of the unpardonable sin. God's forgiveness is limited solely by the condition that a person must accept it in the proper spirit.

X. Christ's Power to Forgive Sins.–Some passages seem to imply that forgiveness was the principal messianic task. This is suggested by the name given to the Messiah during His earthly career (Mt. 1:21) and by the fact that He was the Savior. The remission of sins was the preparation for the advent of the Messiah (Lk. 1:77), and repentance and remission of sins were the prerequisites to a state of preparation for the kingdom.

It is not surprising, therefore, that we find Jesus laying claim to the power to forgive sins. This provoked a bitter controversy with the Jews, for it was axiomatic with them that no one could forgive sins but God only (Mk. 2:7; Lk. 5:21; 7:49). This Jesus did not question, but He would have them infer from His power to forgive sins that He was the possessor of divine power. Jesus asserted His possession of this power on two occasions only, though it has been insufficiently inferred from Jn. 5:14; 8:11 that He was accustomed to pronounce absolution upon all of those He healed. On one of these occasions He not merely asserted that He possessed the power, but demonstrated it by showing Himself to be the possessor of the divine gift of healing. The impostor might claim some such intangible power as the authority to forgive sins, but he would never assert the possession of such easily disproved power as the ability to heal the sick. Jesus claimed both and based

His claim to be the possessor of the former on the demonstration that He possessed the latter. God would not support an impostor, so His aid in healing the paralytic proved that Jesus could forgive sins. The multitude accepted this logic and "glorified God, who had given such authority to men" (Mt. 9:2-9; cf. Mk. 2:3-12; Lk. 5:18-26).

On the other occasion when His possession of this power was under discussion (Lk. 7:36-50), He offered no other proof than the forgiven woman's deep gratitude and love. One expression that He uses, however, has raised some discussion about the relative order in time of her love and forgiveness (v. 47). Did she love because she was forgiven, or vice versa? Manifestly the forgiveness precedes the love, even though the first part of v. 47 seems to assert the opposite. This is supported by the parable of the two debtors (vv. 41-43) and the latter part of v. 47. It is clear that she had previously repented and had been accepted, and her anointing of Jesus was an outpouring of her gratitude. The phrase of v. 47, "for she *loved much,*" is proof of the greatness of her sin rather than a reason why she was forgiven. In both cases where Jesus forgave sins, He did so because the state of mind of the person forgiven was consonant with the blessing. To this as a condition of forgiveness there is no exception. Christ's prayer on the cross (Lk. 23:34) would not avail to secure the pardon of His murderers without their repentance.

XI. Need of an Atonement.–Though forgiveness is on God's part an act of pure grace prompted by His love and mercy, and though He forgives freely all those who comply with the condition of repentance and abandonment of sin, atonement is still necessary. The parable of the Prodigal Son was spoken to teach the freedom of God's forgiveness and acceptance of returning sinners, and the duty of men to assume the same attitude toward them. This much it teaches, but it fails to set forth entirely God's attitude toward sin. With reference to the sinner God is love and mercy, but with reference to sin He is righteous, and this element of God's nature is no less essential to Him than His love, and must be considered in any effort to set forth completely the doctrine of God's forgiveness of sinners. The atonement of Christ and the many atonements of the law were manifestations of this aspect of God's nature.

XII. NT Doctrine of Atonement.–The idea of an atonement is fundamental in the teachings of the NT (Rom. 5:10; 2 Cor. 5:18-21; Col. 1:21). It is very clearly implied in such terms as reconciliation and propitiation and is no less present in pardon, remission, and forgiveness. The doctrine of the atonement is not developed by Jesus, but it is strongly hinted at and is unmistakably implied in the language of Mt. 20:28; 26:28; Mk. 10:45; Lk. 24:46f. John the Baptist's salute, "Behold, the Lamb of God, who takes away the sin of the world!" (Jn. 1:29), also implies it. In the writings of the apostles it is repeatedly and clearly affirmed that our forgiveness and reconciliation to God are based upon the death of Christ. "And there is salvation in no one else" (Acts 4:12); through Him is the redemption (Rom. 3:24); God set Him forth to be a propitiation (v. 25); through Him "we have now received our reconciliation" (5:11); "God was in Christ reconciling the world to himself" (2 Cor. 5:19); "For our sake he made him to be sin who knew no sin" (v. 21); and "Christ redeemed us from the curse of the law, having become a curse for us" (Gal. 3:13). Such citations might be greatly multiplied. That which was so perfectly accomplished by the offering of Christ was in an analogous though imperfect way accomplished by the sacrifices required by the law. It was "a shadow of the good things to come" (He. 10:1).

The unvarying effect of sin is to produce an estrangement between the injurer and the wronged. The nature of God is such and the relationship between Him and mankind is of such a character that sin brings about an alienation between them. It is this presupposition of an estrangement between them that renders the atonement necessary before forgiveness can be extended to mankind. This estrangement must be removed and the alienation be transformed into a reconciliation. In what, then, does the alienation consist?

The sin of mankind produces a changed attitude toward each other on the part of both God and mankind. God holds no personal pique against a person because of his sin. The NT language is very carefully chosen to avoid any statement that would seem to convey such a conception. Yet God's holy righteousness is such that He cannot be indifferent to sin. His wrath must rest upon the disobedient (Jn. 3:36; Rom. 1:18). It is not merely impersonal. It is not enough to say He hates the sin. Man's unrighteousness has not merely alienated him from God, but also God from him. The word "enemies" (Gk. *echthroí*) of Rom. 5:10 is passive, and means the object of God's enmity (W. Sanday and A. C. Headlam, comm. on Romans [*ICC*, 14th ed. 1913], *ad loc.*). It was because of this fact that God set forth Christ to be a propitiation, to show His righteousness because of the passing over of sins done aforetime (3:25f.). God's passing over the sins of pre-Christian times, without inflicting punishment, was liable to obscure His righteousness and expose Him to the charge of tolerating sin. God could not be true to Himself while He tolerated such an imputation, and so instead of visiting punishment upon all who sinned — which would have been one way of showing His righteousness — He set forth Christ to death ("in his blood"), and in this way placed Himself beyond the imputation of unrighteousness while enabling Him to show mercy to sinners. The effect of sin upon man was to estrange him from God, to lead him farther and farther away from his Maker. Each successive sin produced a greater barrier between the two. Now the atonement was designed to remove the cause of this estrangement and restore the former relationship between God and mankind. This too, it has been observed, is the purpose of forgiveness, so that the atonement finds its completion in forgiveness. It should be noted that the reconciliation originates with God and not with mankind (Rom. 3:25; 2 Cor. 5:19). God woos a person before the person seeks God. The effect of the atonement is the removal of God's alienation from mankind. The recognition of the love and grace of God manifest in this reconciliation, and the experience of forgiveness flowing from it, evoke the response of love and win the hearts of people. "We love, because he first loved us." At the same time the atonement is such a complete expression of both the love and the righteousness of God that, while on the one hand it exhibits His yearning for mankind, on the other it shows that He is not tolerant toward sin. In the atonement of Christ, therefore, is the meeting place and the reconcilement of God's holy horror of sin and the free bestowal of forgiveness upon penitent believers.

FORK. Renders several biblical terms with a variety of meanings.

(1) [Heb. *mazlēg*]; AV FLESHHOOK. A three-pronged sacrificial implement used by a priest to extract his portion of sacrifice (1 S. 2:13f.).

(2) [Heb. *mizlāgâ*]; AV FLESHHOOK; NEB also TOSSING-BOWL. An altar implement in the tabernacle (Ex. 27:3; 38:3; Nu. 4:14) and in the temple an implement of gold (1 Ch. 28:17) or bronze (2 Ch. 4:16).

(3) [Heb. *mizreh*]; AV FAN. A pitchfork with six prongs used in winnowing provender (Isa. 30:24), used figuratively of winnowing, i.e., chastising, the people (Jer. 15:7).

(4) [Gk. *ptyon*]; AV FAN; NEB SHOVEL. An implement used to separate chaff from grain, also used figuratively of God winnowing His people (Mt. 3:12; Lk. 3:17).

See also WINNOWING.

FORM [Heb. *t^emûnâ* (Nu. 12:28; Dt. 4:12, 15f., 23, 25; Job 4:16; Ps. 17:15), *miqla'at*, *qeṣeḇ*, *yāṣar* (e.g., Gen. 2:19; Ps. 94:9; 104:26; 139:16; Isa. 27:11; 29:16; 43:1, 7, 10, 21; 45:7, 18; Jer. 33:2; Am. 4:13; 7:1; Zec. 12:1), *d^emût*, *taḇnît* (Ezk. 8:3; 10:8), *ḥāšaḇ*, *ṣîr* (Ps. 49:14 [MT 15]), *sāḵaḵ* (Ps. 139:13), *tō'ar*, *qizrâ* (Lam. 4:7), *mar'eh* (Ezk. 1:26; 10:1), *ṣûrâ* (Ezk. 43:11), *'āraḵ*, *sîm* (Job 1:17), *qāraṣ* (Job 33:6), *ḥîl* (Ps. 90:2), *kûn* (Ezk. 16:17), *'āśâ* (Dt. 31:21); Gk. *eídos* (Lk. 3:22; Jn. 5:37; 1 Thess. 5:22), *eikṓn* (He. 10:1), *schḗma*, *morphḗ*, *mórphōsis* (2 Tim. 3:5), *morphóō*, *plássō*, *synístēmi*]; AV also IMAGE, SIMILITUDE, LIKENESS, APPEARANCE, etc.; NEB also FIGURE, SHAPE, FACE, etc.

Various terms are used in the Hebrew Bible to express the concept of "form" both as a noun and a verb. In Gen. 1:2 the noun *tōhû*, elsewhere used for a "deserted" city (Isa. 24:10; RSV "city of chaos") or an "empty" plea (in court, Isa. 29:21), means "that which is waste and void and empty" (*CD*, p. 104), and thus the earth is said to be "without form." By His act of creating, God ordered this formless chaos. *T^emûnâ*, sometimes used of an artistic image or representation (Dt. 4:25), is also used for the "shape" or "likeness" of Yahweh (Nu. 12:8), while *d^emût* is used for the human "shape" or "likeness" (Ezk. 1:5; 8:2). In 1 K. 6:18 *miqla'at* denotes the form of a carved figure or wood carving, while "size" or "shape" is denoted by *qeṣeḇ* in 1 K. 6:25 and 7:37. When "form" in the sense of "appearance" is meant, either human (Ezk. 1:26) or otherwise (10:1), the word *mar'eh* is used. In the Servant Songs of Isaiah, God's servant is said to have a "marred" appearance, a "form" (*tō'ar*) that was "beyond that of the sons of men" (52:14), and "no form [*tō'ar*] or comeliness that we should look at him" (53:2), meaning that his appearance was not one of dignity (cf. 1 S. 16:18, where the RSV translates *tō'ar* as "good presence").

The action of "forming" in the sense of "creating" is usually expressed by the Heb. verb *yāṣar* with God as the subject. It was the Lord God who "formed" man (Gen. 2:7f.) and every beast. He is the Creator who "brought to birth" (*ḥîl*) the created world (Ps. 90:2), who "formed" the earth (Isa. 45:18), the mountains (Am. 4:13), and the seas (Ps. 95:5). He is the Creator of all things (Jer. 10:16; 51:19). He is the eternal God and the only God; for "before me no god was formed, nor shall there be any after me" (Isa. 43:10). The Lord God "formed" for Himself a people named Israel to be His servant (Isa. 43:21; 44:21). He has been intimately connected with them, "forming" them from the womb (Isa. 44:2, 24), as He has also created the inward parts (Ps. 139:13) and "formed" from the womb (Jer. 1:5) individuals to be His servants (Isa. 49:5).

Other verbs expressing the same concept include *ḥāšaḇ* with its sense of devising a purpose against someone, as when Nebuchadnezzar "forms a purpose" against the inhabitants of Hazor (Jer. 49:30) or when God forms plans against the inhabitants of Teman (v. 20) and the land of the Chaldeans (50:45). The term *'āraḵ*, meaning to "draw up in battle order" in the sense of forming the battle line, describes the scene where the Israelites fight the Benjaminites (Jgs. 20:22).

In the NT "form" renders a number of Greek words, all of which are similar in meaning. Two of these are *morphḗ* and *schḗma*. In their strictest senses, *morphḗ* is connected with the essence of a thing while *schḗma* has to do with its qualities (Trench, p. 261f.). Both words are derived from the visual realm and are concerned with appearance. *Morphḗ* may represent "all those sensible qualities, which striking the eye lead to the conviction that we see such and such a thing," i.e., the inward reality (Lightfoot, *Philippians*, p. 127). *Schḗma*, however, "always denotes the outward form or structure perceptible to the senses and never the inward principle of order accessible only to "thought" (*TDNT*, VII, 954). "The *morphḗ* of a definite thing as such, for instance of a lion or a tree, is one only, while its *schḗma* may change every minute" (Lightfoot, *Philippians*, p. 127).

In the LXX, however, *morphḗ* denotes the "appearance, look or likeness of some one, that by which those beholding him would judge him" (cf. Job 4:16; Dnl. 5:6; Wisd. 18:1; 4 Macc. 15:4). In later Greek the term apparently lost the accurate, metaphysical content that belonged to it in writers like Plato and Aristotle, receiving instead a "vague, general meaning" (*Expos.G.T.*, III, 435; cf. *TDNT*, IV, 745). Thus "the meaning must not be overpressed in the NT occurrences" (MM, p. 417), nor should firm boundaries be established between the terms (*TDNT*, IV, 742).

Both terms are found in the "Christ-hymn" of Phil. 2. Christ was in "the form [*morphḗ*] of God" (v. 6); He took "the form [*morphḗ*] of a servant (v. 7), and was "found in human form" (*schḗma*, v. 8). These verses show that Christ is divine, since *morphḗ* "always signifies a form which truly and fully expresses the being which underlies it" (*Expos.G.T.*, III, 436), and that His "shape" or "form" is not "in contrast to His essence, but precisely as the expression thereof" (R. Bultmann, *Theology of the NT*, I [Eng. tr. 1951, 1970], 193). Thus, according to Bultmann, "the 'form of God' in which the pre-existent Christ existed is not mere form but the divine mode of being just as much as the 'form of a servant' is the mode of being a servant (Phil. 2:6f.) The same is true of *schḗma*. He who 'was found in human form' (Phil. 2:8) did not merely look like a man but really was a man 'obedient unto death'" (p. 193; cf. *TDNT*, VII, 955). Likewise, Christ's "servant form" designates "not only the outward form and shape in contrast to his nature but his nature itself [and] also shows that the 'form of a servant' is not a role that he plays, but the very nature he assumes" (Bornkamm, p. 115).

The only other use of *schḗma* is in 1 Cor. 7:31, where Paul warns not to become too attached to the world, "for the form of this world is passing away." Paul means here that the world itself, not just its form, is in the process of

passing away (Bultmann, p. 193). The derivative *mórphōsis* (from *morphḗ*) is used in 2 Tim. 3:5 for those "holding the form of religion but denying the power of it." This verbal noun has the sense of "appear to be" and is used of those who hold to the external appearance of Christian life but who have no inner power. They have the mere mask of pious conduct "without the corresponding reality which derives from inner piety" (*TDNT*, IV, 755). "Religion is not entirely denied, but amounts to no more than an empty shell" (Guthrie, p. 158).

The verb *morphóō* finds its only NT use in Gal. 4:19, where Paul writes that he is "in travail until Christ be formed in you." The passage pictures the process of becoming a Christian in terms of a birth. Christ must take shape or develop (figuratively) in a life as a child develops in its mother's womb. The idea of creation is present in 1 Tim. 2:13, which states (following the existing Jewish-Hellenistic tradition) that "Adam was formed [Gk. *plássō* for Heb. *yāṣar*] first, then Eve"; and also in 2 Pet. 3:5, where the earth is said to have been "formed [*synístēmi*] . . . out of water and by means of water."

Greek *eikṓn* has a very important theological history in the Arian controversy and in the discussion about the "image" and "likeness" of God in Gen. 1:26 (see Trench, pp. 9-53; Lightfoot, *Colossians*, pp. 144ff.). It is used in the LXX mostly for Heb. *ṣelem*, meaning an image, model, or drawing. In Greek it is linked with *tíkō* ("be similar," "appear") and in its strict sense is used of artistic representations such as paintings, statues, or impressions on coins. In He. 10:1 it is used in contrast to *skiá* ("shadow"): "law has but a shadow of the good things to come instead of the true form [*eikṓn*] of these realities," for the law's continual sacrifices can never make perfect those who draw near. "In the NT the original is always present in the image" (*TDNT*, II, 395). Hence the image (*eikṓn*) is superior to the shadows (*skiá*; and also to the "copies" or "patterns" of 9:23f.), and in the same way Christ's high-priestly work is superior to the Levitical ceremonial law, which was only a "shadow of the good things to come."

Greek *eídos*, which has a rich history in Greek philosophy (Lightfoot, *Philippians*, p. 128), is the LXX rendering of Heb. *mar'eh* and *tō'ar*, meaning "that which strikes the eye or is exposed to view." This is the sense of Lk. 3:22 where the Holy Spirit is said to have descended upon Jesus "in bodily form, as a dove." *Eídos* can also refer to God, as in Jn. 5:37 where Jesus tells the Jews that they have never heard the Father's voice nor seen "his form." This context of seeing and hearing is reminiscent of Nu. 12:8, though it may instead refer to "the popular tradition about seeing and hearing God at Mt. Sinai" (Brown, p. 225; cf. Ex. 19:11; Dt. 4:12, 15). The use of *eídos* in the papyri supports the meaning "of every kind" or "manner" for the rendering "abstain from every form of evil" (1 Thess. 5:22; MM, p. 182).

D. K. MCKIM

FORM CRITICISM. *See* CRITICISM III; PETER, FIRST EPISTLE OF: SPECIAL APPENDIX.

FORMER. This word occurs only as an adjective in the sense of preceding in the order of time. In the OT Heb. *ri'šôn* and its derivatives are commonly used (Nu. 21:26; Dt. 24:4; Isa. 48:3; etc.). In the NT Gk. *próteros* occurs in Eph. 4:22; He. 10:32; *prôtos* in Rev. 21:4; *próteron* in 1 Pet. 1:14, etc. The preposition *pró* compounded with verbs also expresses the concept of "former" (e.g., Rom. 15:4; He. 7:18; etc.).

FORNICATION [Gk. *porneía*–'unchastity,' *porneúō* ("commit fornication," Rev. 17:2; 18:3, 9)]; NEB also BASE-BORN (Jn. 8:41); **FORNICATOR** [Gk. *pórnos*] (Rev. 21:8; 22:15). Illicit (and immoral) sexual relations are strictly forbidden by Scripture (Gal. 5:19; Eph. 5:3; Col. 3:5; *see* MARRIAGE VII) and are considered a crime (*see* CRIME). According to Our Lord fornication proceeds from the heart and defiles a person (Mt. 15:19f. par. Mk. 7:21f.). In Revelation Babylon is symbolically portrayed as the great harlot leading the nations astray with her immoral behavior (*see* HARLOT).

The Jews' reply to Jesus' defense of His Sonship and His accusation that they were children of the devil is interesting. Clearly they were claiming their legitimate Abrahamic lineage: "'we are not born of fornication . . .'" (Jn. 8:41). According to some commentators (R. E. Brown, comm. on John, I [*AB*, 1966], 357; L. Morris, comm. on John [*NICNT*, 1971], pp. 461f.), however, their words contained an implicit questioning of the legitimacy of Christ's own birth. (*See* VIRGIN BIRTH.)

See ETHICS: NT; IMMORAL.

See J. Jensen, *Nov.Test.*, 20 (1978), 161-184.

R. W. V.

FORSAKE; FORSAKEN; FORSOOK; etc. [Heb. *nāṭaš* (Dt. 32:15; Jer. 7:29), *'āzaḇ* (1 K. 12:8); Gk. *aphíēmi* (Mt. 26:56 par. Mk. 14:50), *(eg)kataleípō* (Mt. 27:46 par. Mk. 15:34)]. Heb. *nāṭaš* usually means abandon, and connotes cessation of activity, e.g., leaving a field fallow or debts unclaimed (Neh. 10:31 [MT 32]), ceasing to be concerned about animals (1 S. 10:2), abandoning quarrels (Prov. 17:14). Heb. *'āzaḇ* emphasizes being remote, departing from, or leaving behind some entity, e.g., a man leaving his parents (Gen. 2:24), forsaking counsel (1 K. 12:8, RSV, AV; NEB "he rejected the advice"), forsaking the God who made him (Dt. 28:20), abandoning one's cities (1 S. 31:7, NEB; RSV, AV, FORSAKE). Gk. *aphíēmi* is translated "forsook" only in Mt. 26:56 par. Mk. 14:50; where the AV has "forsaken" or "forsook" (Mt. 19:27, 29; Mk. 1:18; Lk. 5:11), the RSV has "left" (cf. *TDNT*, I, *s.v.*, αφίημι κτλ. [Bultmann]). Gk. *(eg)kataleípō* is rendered "forsake(n)" only in Mt. 27:46 par. Mk. 15:34; 2 Cor. 4:9; He. 13:5; 2 Pet. 2:15; the other AV passages (2 Tim. 4:10, 16; He. 10:25; 11:27) the RSV translates "deserted," "neglecting," and "left."

Sometimes the AV translation of "forsake(n)" is better rendered "left widowed" (Heb. *'almān*, Jer. 51:5, NEB; RSV = AV), "leave" (Heb. *ḥāḏal*, Jgs. 9:11, RSV, NEB), "fail" (Heb. *rāpâ*, Dt. 4:31, RSV, NEB), "leave not unfinished" (Heb. *rāpâ*, Ps. 138:8, NEB; RSV = AV), "left solitary" (Heb. *šālaḥ*, Isa. 27:10, NEB; RSV = AV), "turn their backs on" (Gk. *apostasía apó*, Acts 21:21, NEB; RSV = AV), or "renounce" (Gk. *apotássomai*, Lk. 14:33, RSV; NEB "parting with").

At times Heb. *'āzaḇ* and *nāṭaš* occur in parallelism (Jer. 12:7, "forsaken . . . abandoned"). Usually Heb. *'āzaḇ* is used when human beings are forsaking God; but cf. *nāṭaš* in Dt. 32:15.

There are several uses of forsake: (1) Things may (or may not) be forsaken: figurative paths (of righteousness) or ways (Prov. 2:13; 15:10; Isa. 55:7; 2 Pet. 2:15), teaching and wisdom (1 K. 12:8, 13; 2 Ch. 10:13; Prov. 4:2, 6; 6:20), idols (Ezk. 20:8; Jonah 2:8 [MT 9]), brothers (Josh. 22:3), a city (1 Ch. 10:7; Jer. 49:25), etc.

(2) Occasionally humans are described as not forsaking God (Josh. 24:16, the peoples' answer to the confession of faith at Shechem; 2 Ch. 13:10; Ps. 119:87, the psalmist himself).

(3) The majority of instances mention that people do forsake God: Dt. 28:20, Israel forsaking God in the wilderness; Dt. 31:16, the prediction of future forsaking; Josh. 24:20, Joshua's last warning to the people not to forsake; Jgs. 2:12f.; 10:10, the forsaking during the period of the judges; 2 K. 22:7, during Josiah's reform; Isa. 1:4, 28; Jer. 1:16; Hos. 4:10, the prophetic interpretation of Israel's history of forsaking God. Finally, in the NT the disciples forsook the Lord in the garden (Mt. 26:56 par. Mk. 14:50), in direct contrast to the forsaking of their nets to follow Him (Mk. 1:18). Similarly, people forsake God's law (Jer. 9:13; 2 Ch. 24:18), His commands (2 K. 17:16), His covenant (1 K. 19:10, 14; Dt. 29:25), His worship and His Levites (Dt. 14:27).

A major theme in the (late seventh-century B.C.) Deuteronomic theology of history (cf. esp. Jgs. 2:6–3:6) is that the Israelites forsook Yahweh, who brought them out of Egypt, and that they entered instead into the Canaanite nature cult with its worship of Baal. Israel's apostasy is placed in sharp contrast to "the God of faithfulness" (Heb. *'ĕmûnâ*, Dt. 32:4). The major purpose of Deuteronomy, then, is the recall of Israel to renew the covenant with Yahweh (Anderson, Bright). Jeremiah (early 6th cent. B.C.) reiterates God's call that Israel return (Heb. *šûḇ*, Jer. 35:15; cf. Am. 5:4; Hos. 11:8f.; cf. Rowley).

(4) Sometimes God forsakes people, their land, or their place of worship (Dt. 31:17; 2 Ch. 15:2; Ps. 78:60; Isa. 2:6; 49:14; etc.). But none of these texts describes that divine forsaking as God's final action toward His people. Deuteronomic theology, e.g., with all its confession of national guilt, emphasizes Yahweh's word of promise and forgiveness that follows upon His word of judgment (Hayes; cf. Isa. 54:7f.).

(5) God is frequently depicted as not forsaking people (e.g., Dt. 31:6, 8; Josh. 1:5; 1 K. 6:13; Ezr. 9:9; Ps. 94:14). Indeed, God's assurance that He will "never fail you nor forsake you" becomes the basis for rejecting materialism (He. 13:5, quoting Dt. 31:6, 8; Josh. 1:5). Consciousness of one's sin or need may prompt petitions to God not to be forsaken by Him (1 K. 8:57; Ps. 27:9; 38:21 [MT 22]; etc.).

(6) One of the most discussed occurrences of the term is Jesus' so-called cry of dereliction from the cross: "My God, my God, why hast thou forsaken me?" (Mk. 15:34, representing an Aramaic original; Mt. 27:46, a Hebrew parallel except for the Aramaic last word; cf. Metzger). This statement has long been a difficulty for some Christians: Luke has omitted it (23:44-49) and the Gospel of Peter 19 rendered it as "my strength, my strength."

Some have emphasized that Ps. 22:1 (which is here quoted, and not v. 20 as Bowman argued) (MT 22) ends in affirmation of faith (Trudinger). There appears to be indirect testimony in the Matthaean version, moreover, that Jesus is the Son of God, for Matthew interpolated Mark's text and made an explicit reference to the "Son of God" in 27:43, thereby confirming Jesus' response in 26:64, *sý eípas*. According to Matthew, Jesus remains obedient to the Father's will even though God is delivering Him up to death, with the result that God accomplishes through Jesus' obedience the forgiveness of sins (Kingsbury).

Although Jesus' question does not express loss of faith in God, and may even hint at the ultimate triumph to which the end of Ps. 22 points, it does express the loneliness of God-forsakenness. "It is no fiction or playacting," as Calvin put it, "that prompts His complaint, that He is forsaken by the Father" (*Harmony of the Gospels*, III [Eng. tr. 1972], 208).

The humanity of Jesus speaks here, the same humanity that "learned obedience through what he suffered" (He. 5:8) and that experienced the long descent of humiliation and emptying (Phil. 2:7f.), which ended when He was "crucified in weakness" (2 Cor. 13:4). After Christ's resurrection Christians found in this mortal cry, this "elementary crying in which the final reserves of man are concentrated" (*TDNT*, I, 627), at once the first cry of a new humanity that no longer cries out to be helped but now cries out for God Himself (cf. Rom. 8:16, 26; 2 Cor. 13:4; Gal. 4:4-6).

FORTH. An adverb signifying movement (1) forward, (2) out of, (3) beyond a certain boundary. It frequently occurs as an expletive of various verbs, e.g., "go forth," "come forth," "set forth" (cf. Gen. 31:13; Nu. 26:4; Josh. 9:12; etc.). In the Fourth Gospel it is the translation of Gk. *éxō*, "without," "outside," in 11:43; 15:6; 19:4; etc.

FORTIFICATION. A structure built to defend a place or a position. Two basic types of fortifications developed, temporary and permanent. Temporary defenses thrown up in the field while combatants are facing the enemy or when contact is near are called field fortifications. Field fortifications, e.g., baggage piled around a defensive position or a parapet of earth and stone thrown up for protection, may be expanded under favorable conditions into major defensive systems. But normally they are abandoned when the arena of combat shifts or hostilities cease.

Permanent fortifications are usually built in times of peace to protect a place (i.e., a permanent settlement, rather than a temporarily defensible position) against sudden attack. Permanent fortifications are thus more substantial than field fortifications. In the ancient Near East they were normally constructed of masonry and/or mud brick. Such defensive works allowed an army to obtain maximum advantage of its weaponry and strength while impeding the advance of an enemy and the effective use of his resources. A major danger to an armed force within a fortified position, however, was the possibility of a siege if surrounded by a superior force.

Biblical writers refer to permanent rather than field fortifications, although the Israelite camp of Saul that David visited may have had temporary defensive works (1 S. 17); no field fortifications from biblical times have survived. Other information about fortifications in the biblical world is obtainable only through archeological research. Together the Bible and archeology provide a fairly comprehensive picture of the ancient search for physical security.

IV. Fortification Terminology as Symbol
A. In the OT
B. In the NT

I. Biblical Terminology.–*A. Fortified Settlements.* The basic word used in the OT to designate a permanent fortified settlement is *ʿîr*, "city" (in the LXX chiefly Gk. *pólis*). The initial occurrence (Gen. 4:17) refers to a city built by Cain; thereafter the word appears some 1090 times in the OT. Its range of meaning includes a walled permanent settlement, a fortified area within such a settlement (citadel), an isolated smaller fortress (e.g., the Judean fortress at Arad, dating from the 10th to the 7th cents. B.C. or, infrequently, the population of a city (e.g., 1 S. 4:13).

A synonym of *ʿîr* is *qiryâ* (e.g., 1 K. 1:41), derived from Heb. *qîr*, which normally referred to the wall of a house but was also used to designate a city wall (e.g., Nu. 35:4; cf. Phoen. *qr*; Moabite *qr* means "town"). An allied, archaic form, *qereṯ* (cf. Ugar. *qrt*), occurs less frequently in the Bible (Job 29:7; Prov. 8:3; 9:3, 14; 11:11).

B. Nomenclature of Fortifications. As a reference to a permanent, walled settlement, *ʿîr* is frequently modified by *miḇṣār*, "fortified [place]" (KoB, p. 492). The word is derived from *bāṣar*, "to be inaccessible," an appropriate designation for a high-walled city. (The AV usually renders this word as "fenced" [Nu. 32:17] or "defenced" [Isa. 25:2].) Such a city was frequently located on a steep hill (e.g., Hazor, Lachish, and Jerusalem), and was viewed with awe by the Israelite spies (Nu. 13:28; Dt. 1:28).

Two other words derived from the same root are *bᵉṣûrâ*, "fortified (wall)" (e.g., Isa. 2:15; AV "fenced," NEB "sheer") and *biṣṣārôn*, "stronghold" (Zec. 9:12).

The usual word for the wall of a city is *ḥômâ*, "(defensive) wall" (e.g., Dt. 3:5; Josh. 2:15; 1 S. 31:10; Am. 1:7). (The development of city fortifications will be discussed below.)

The Heb. *ḥēl/ḥêl*, "rampart" (AV "trench," e.g., 2 S. 20:15; Ps. 48:13 [MT 14]), usually connotes a steep embankment (glacis) thrown up against an inner core wall, often with a dry moat at its base.

The Heb. *šaʿar*, "gate," is used, e.g., in the description of the rebuilding of the Valley Gate in Jerusalem (Neh. 3:13), which mentions the basic parts: *dᵉlāṯôṯ*, "doors," *manʿulîm*, "bolts," and *bᵉrîḥîm*, "bars." In the construction of a gate *qôrôṯ*, "beams," were also used. The gate was a part of a defensive complex built around the *peṯaḥ*, "entrance," into the city through the wall.

An important word is *migdāl*, "tower" (e.g., 2 K. 9:17, NEB "watchtower"; Isa. 2:15). The "tower" of Gen. 11:4 is usually understood as a ziggurat, while that of Shechem (Jgs. 9:46-49) was the fortified citadel of the city, including the temple fortress (cf. R. Boling, *Judges* [*AB*, 1975], pp. 180f.). Frequently *migdāl* refers to towers or bastions built into the city walls (cf. Jer. 31:38; 2 Ch. 14:7 [MT 6]; 2 Ch. 26:9; Neh. 3:1). These functioned both as guard towers at the city gates and as firing stations along the walls. In the latter use they were spaced so that archers could cover the distance between towers. King Uzziah is credited with building towers in the wilderness (2 Ch. 26:10), a practice also pursued by his son and successor, Jotham (2 Ch. 27:4). These were "forts" (Heb. *bîrâ*), established at strategic points within Judah (cf. the ruins found in the lowest level of occupation at Qumrân by de Vaux).

The Heb. *ʾarmôn* (Gk. *ákra*) is variously translated as "castle" (Prov. 18:19), "citadel" (2 K. 15:25; AV "palace"), "palace" (Jer. 6:5), and "stronghold" (Am. 1:12; AV, NEB "palace"). In Hos. 8:14 it is synonymous with "palaces" (Heb. *hêḵāl*) and fortified dwelling places or cities (Heb. *ʿārîm bᵉṣurôṯ*); however, in Ps. 122:7 it is rendered "towers" and is parallel to "walls" (Heb. *ḥêl*). Heb. *ʾalmānôṯ* appears in Isa. 13:22 (parallel to "palaces," Heb. *hêḵāl*) and Ezk. 19:7 (parallel to "cities," Heb. *ʿārîm*).

The Heb. *bîrâ* ("citadel, acropolis," KoB) appears only in the later books, Chronicles, Nehemiah, Daniel, and Esther, and may be a substitute for the earlier *migdāl*, "tower" (see below), although its plural, *bîrāniyôṯ*, is paired with *migdālîm* (pl. of *migdāl*) in 2 Ch. 27:4 as "forts and towers." *Bîrâ* is consistently translated "capital" in Esther and Daniel. The RSV renders it "fortress" (Neh. 2:8; AV "palace," NEB "citadel"), "castle" (Neh. 7:2), and "palace" (1 Ch. 29:1). The last reference is to the temple complex. The temple complex, royal quarters, and major governmental buildings were the most important components of the citadel of a city. Citadels frequently occupied the heights of the city and could be encircled by a separate wall within the major defensive wall.

The Heb. *miśgāḇ*, derived from *śāgaḇ*, "to be (inaccessibly) high," may be rendered variously as "high" (Isa. 25:12), "place of defense" (Isa. 33:16), and "sure defense" (Ps. 48:3 [MT 4]; AV "refuge," NEB "tower of strength").

The Heb. *māʿôz*, which denotes a mountain stronghold or place of refuge, is rendered "fortress" in Dnl. 11:10 (NEB "stronghold"). The plural occurs in 11:39 (AV "strongholds"). The word is translated "stronghold" in Jgs. 6:26 (AV "rock"; NEB "earthwork") and in Isa. 23:14 (AV "strength," NEB "haven").

The Heb. *mᵉṣûḏâ* normally refers to a mountain stronghold (KoB), but the references in 2 S. 5:7, 9 to "the stronghold (of Jebus)" obviously refer to the citadel of the city (AV "fort," v. 9).

The Heb. *māṣôr/mᵉṣûrâ* is usually "rampart(s)," e.g., Zec. 9:3 (AV "stronghold"), Nah. 2:1 (AV "munition," NEB "bastions"); however, in 2 Ch. 11:5 *ʿārîm lᵉmāṣôr* are "cities for defense," and *ʿārê mᵉṣûrôṯ* is rendered "fortified cities" (AV "fenced cities") in v. 10 while *hammᵉṣûrôṯ* in v. 11 is translated "fortresses" (AV "fenced cities," NEB "fortifications"). The variations in translation for *māṣôr* are seen by comparing the above uses with Dt. 20:20, "siegeworks" (AV "bulwarks"); Ezk. 4:2, "siegeworks" (AV, NEB "siege"); 4:3, "state of siege" (AV, NEB "besieged"); and 4:7, "siege."

Rarer words for elements of fortifications include *baḥan*, "watchtower" (Isa. 32:14, AV "tower"; cf. *migdāl*, "tower," in Neh. 3:27); *pinnâ*, "battlement" (Zeph. 1:16; 3:6; AV "tower"), although the word usually connotes "corner"; *miṣpeh*, "watchtower" (Isa. 21:8; 2 Ch. 20:24); *ṣᵉrî(a)ḥ*, "stronghold" (Jgs. 9:46, 49; AV "hold," NEB "great hall"); *muṣṣāḇ*, "towers" (Isa. 29:3; AV "mount," NEB "outposts"); *ʾagam*, "bulwark" (Jer. 51:32; AV "reed," NEB "guard-tower"); *ʾošyâ*, "bulwark" (Jer. 50:15; AV "foundation," NEB "bastion"), is more properly "tower" (cf. H. Cohen, *Biblical Hapax Legomena in the Light of Akkadian and Ugaritic* [1978], pp. 46f., 89f.); and *ʿōz*, "bulwark" (Ps. 8:2 [MT 3]; AV "strength," NEB "the mighty").

C. Act of Fortifying. The usual verb for fortifying is *bānâ*, "build," but also, "build, refurbish, or expand the fortifications," e.g., Josh. 6:26; Am. 9:14; Isa. 45:13 (NEB "rebuild"); 58:12 (AV "build," NEB "restored"); this rebuilding may include walls (1 K. 3:1), gates (2 K. 15:35; NEB "constructed"), and towers (2 Ch. 26:10).

The piel of *bāṣar*, "cut off, make inaccessible, fortify," occurs in Isa. 22:10 (NEB "make [the wall] inaccessible") and Jer. 51:53 (NEB "make [her high towers] inaccessible"). Both the feminine singular (*bᵉṣûrâ*) and plural

(*bᵉṣurôṯ*) passive participles are used adjectivally, e.g., Nu. 13:28 ("fortified") and Dt. 1:28.

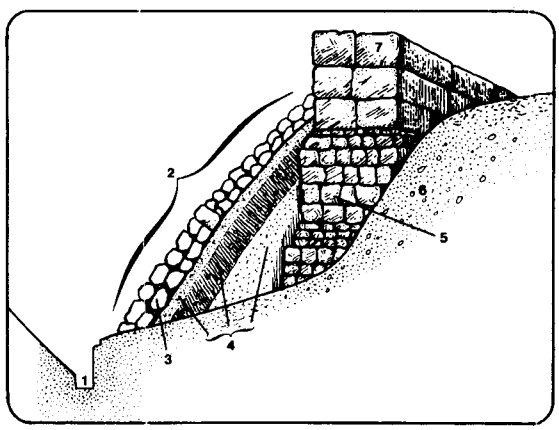
The piel of *ḥāzaq*, "make strong, fortify," occurs frequently in later texts, e.g., Nah. 3:14, "strengthen [your forts]" (AV "fortify"); Ps. 147:13 (NEB "put new bars on your gates"); 2 Ch. 11:11, "made [the fortresses] strong" (AV "fortified," NEB "strengthened"); and 26:9. The hiphil stem is also used with the same meaning in Nehemiah for the refortification of Jerusalem's walls, e.g., "repair," 3:4.

The Heb. *gāḏar*, "build a wall, repair breaches," occurs rarely and is used in a figurative sense, e.g., Ezk. 13:5 (AV "made up the hedge," NEB "repair the broken wall [around the Israelites]"); cf. Hos. 2:6 (MT 8); Am. 9:11. The participle *gōḏēr* usually means "mason," but in Ezk. 22:30 it functions verbally, "[a man who . . .] should build up the wall" (AV "make up the hedge," NEB "build up a barricade").

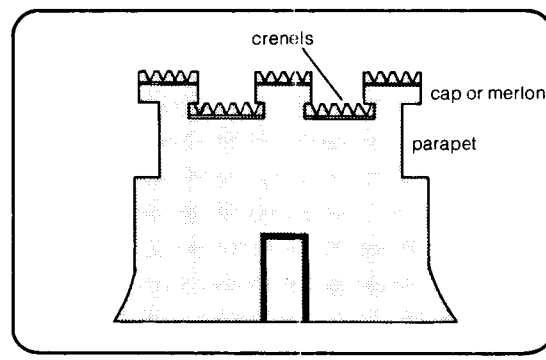
II. Basic Elements.—In the ancient Near East defensible cities required a wall system with its associated components and a supply of water. A simple "curtain" wall functioned as a passive barrier to delay the entrance of an enemy. An opening in the wall for entrance and exit was closed with a simple swinging gate locked with a bar. Such simple walls were easily scaled or breached and did not provide adequate protection against siege.

The need for more adequate defense led to the development of a thicker and higher wall that provided the defenders with protection from the missiles of attackers and a firing platform from which to retaliate. Walls measuring as much as 7.5 m. (25 ft.) in breadth have been discovered in the ruins of biblical cities. They were usually built 10.5-12 m. (35-40 ft.) high in order to discourage scaling and were strengthened by thick buttresses at regular intervals. Attackers discovered that even thick walls were vulnerable to tunneling by sappers and to the destructive effects of battering rams, so further protective measures were developed. The foundations of walls were laid deep and broad, and frequently a protective glacis was thrown up against the base at a 45° angle. This battered earth (*terre pisée*) construction was then sealed with a thick layer of crushed and beaten limestone. Often a retaining wall at the base of the glacis helped to stabilize this thick protective device. As a further deterrent to both scaling and sapping operations, a moat (fosse) was sometimes excavated at the perimeter of the glacis.

Typical Middle Bronze fortifications: (1) fosse (moat), (2) glacis, (3) layers of stones or crushed, beaten limestone, (4) layers of beaten earth (*terre pisée*), (5) retaining wall, (6) natural slope of mound, and (7) city wall.



Atop the wall added features enabled the defenders to fire at the enemy frontally or toward either side while at the same time protecting the defenders from enemy fire. Battlements, consisting of parapets with crenelations, were developed. The caps or merlons that extended above the top of the parapet shielded the protectors of the wall from the missiles of attackers while the crenels, the openings between the merlons, provided space for firing down upon the enemy. In addition, towers or bastions — usually square or semicircular in shape — were often built into the wall at regular intervals within bow-range of one another, permitting the defenders to shoot directly along the base of the wall. Balconies were built from them and from the wall with holes in the floors that permitted firing at targets directly below. Another (though less effective) method of broadening the range of defensive fire from the wall was the building of the wall along an inset-offset line.



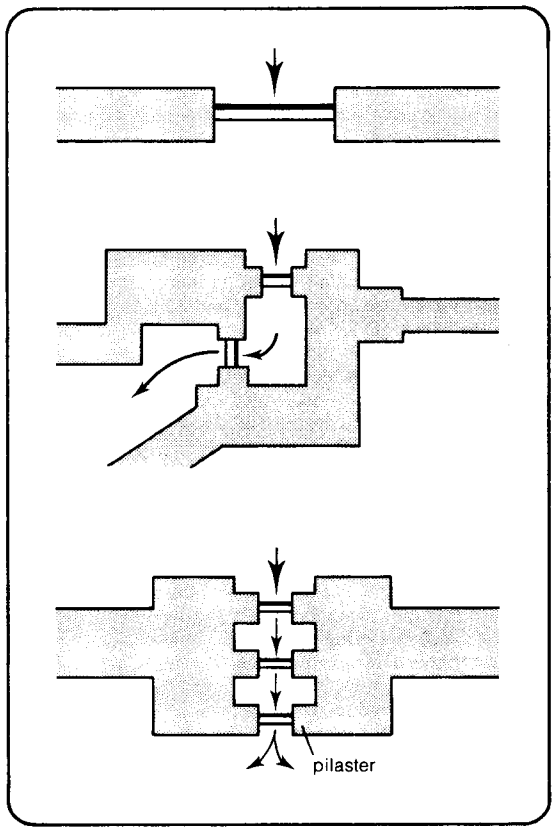
Another technique employed in defensive fortifications was the construction of an outer wall, with its own bastions and battlements, down the slope from the main wall. This wall was an alternative to the construction of a fosse, but some cities were exceptionally fortified with an outer wall, a fosse, and a glacis.

Like the walls, the city gate underwent development as siege tactics and equipment changed. The gate was essentially a hole through the wall and the weakest point in the line of defense. Extraordinary care was taken, therefore, to strengthen it. Towers were normally built on either side of the gateway, and the entire construction might extend from the line of the wall as much as 15-18 m. (50-60 ft.) into the city. Along this length chambers were formed by a series of paired pilasters on either side of the passageway. The space where the passageway passed between the pilasters could be closed with secondary gates, hindering the capture of the city should the main gate be penetrated. The popularity of one-, two-, and three-bay gates varied from time to time. The two leaves of the gate were constructed of heavy timbers, often plated with metal for protection from the axes or the fires of the foe. They were attached to heavy doorposts that turned in stone sockets. These doors of the entrance were closed at the center of the opening and barred with a heavy beam inserted in slots on either side of the gateway. The base of the doors rested against a doorstop when closed, and blocking against the interior bottom further strengthened them when closed against an enemy. For even greater protection, a strong outer gate with towers and a walled courtyard connected to the city walls and the main gate could be built.

Since most walled cities were located on elevations, a ramp was built leading from the base of the site to the gateway. Builders normally constructed these approaches along the wall to the right of the gate in order to leave the

unshielded right arm of enemy soldiers open to attack from the wall. The passageway of the gate could have either direct access or the more popular indirect access. With the latter, two 45° turns, to the right and then to the left or vice versa, were required to enter the city. All of these features had the practical purpose of halting or slowing the entrance of an attacking force into the city. Even after penetrating the city beyond the major gate and wall system, the attacker still faced a heavily fortified citadel with its own walls, towers, and gates.

A heavily protected city could sometimes be defended for years, if sufficient food and especially water were available. Plastered underground cisterns provided one means of storing water. Another method was to dig a water shaft with a tunnel leading down to ground water level, thus providing a natural well or spring. Late in the Bronze Age and during the Iron Age impressive water



shafts were constructed at such sites as Gibeon, Gezer, Hazor, and Megiddo.

III. Archeological Evidence.–A. Neolithic Age (*ca.* 8000-4000 B.C.). The earliest known permanent fortifications of the ancient world were discovered at Jericho. The inhabitants of the Prepottery Neolithic A city had constructed a free-standing stone wall by 8000 B.C. The wall, which encircled a city of approximately 4 ha. (10 acres), was constructed of undressed stone. It was over 1.8 m. (6 ft.) thick and when excavated still stood over 7 m. (23 ft.) high.

Outside the wall a dry moat (fosse) 2.7 m. (9 ft.) deep and 8 m. (27 ft.) wide had been cut into the bedrock, an amazing achievement by builders who apparently worked with only flint tools. On the inside of the western part of the wall, a circular stone tower had been constructed. It measured 8.5 m. (28 ft.) in diameter and still stands 9 m. (30 ft.) high. Within the tower a stairway of twenty-two steps led to the top.

The Neolithic A wall had a long history, but eventually the site was abandoned so that it suffered from the effects of erosion, collapsing in places and being covered by debris. During the 7th millennium the site was reoccupied by Prepottery Neolithic B people who also built a defensive wall, but its use was of much shorter duration than the earliest wall of Jericho. These defensive structures at Jericho predate by some four thousand years other known fortifications.

B. Chalcolithic Age (*ca.* 4000-3100 B.C.). Although the earliest fortified city-states in southern Mesopotamia (Sumer) were being founded by the middle of the 4th millennium, open villages rather than fortified settlements dominated this period.

C. Early Bronze Age (*ca.* 3100-2000 B.C.). The close of the 4th and the beginning of the 3rd millennium witnessed the development of fortified cities in many regions of the ancient Near East. Urban centers developed in the two great riverine civilizations, Mesopotamia and Egypt, setting the stage and providing the stimulus for the development of cities in Syria and Palestine. Several factors contributed to the development of cities from unwalled villages in this period: the accumulation of wealth due to agricultural surplus and widespread trade activity; the development of the city-state with concomitant expansionist tendencies, including tendencies toward empires in Mesopotamia and Egypt; and the threat of nomadic tribes, who were always lurking on the fringes of cultivated lands and awaiting the opportunity to plunder the unprotected villages.

Even though a number of sites have been excavated that were occupied in the Early Bronze period (e.g., Jericho, Megiddo, Ai, Tell el-Fâr'ah (N), Taanach, Beth-yerah, Beth-shean, and Dan), evidence for E.B. fortifications systems is sketchy because the E.B. remains are beneath a thick accumulation of debris. Archeological research has tended to explore the more accessible upper levels of sites in the Near East so that the lower E.B. levels have been reached only in restricted areas. The site of Arad is, however, an exception.

Just beneath the modern surface of Arad, Ruth Amiran uncovered the ruins of a major E.B. II (*ca.* 2900-2700) walled city. The evidence indicates an unbroken development from an early village to a major walled city. The wall, encircling an area of some 10 ha. (25 acres) and built on bedrock, was constructed of large stones along the outer courses with a rubble fill between. The width varies from 2.1 to 2.4 m. (7 to 8 ft.), and in places it still stands to a height of about 1 m. (3 to 4 ft.). A number of semicircular towers were built into the Arad city wall at intervals of 18-23 m. (60-75 ft.). The towers have interior diameters of 2.4 to 3 m. (8 to 10 ft.) and a passage to the inside of the city about 1 m. (3 ft.) across. No major city gate has been excavated at the site.

The E.B. II defenses of Arad are typical of contemporary Canaanite cities, although each site is unique. Some of the sites exhibit the earliest phases of mud brick, but these walls were soon strengthened or replaced by stone, usually small and undressed. At Megiddo the earliest wall was built of stone. Originally 4.5 m. (15 ft.) thick, it was later enlarged to 8 m. (26 ft.). Beth-yerah, located along the southwest shore of the Sea of Galilee, was protected by the lake on the east and north so that a wall was needed only along the west and south. A massive mud

brick wall 7.5 m. (25 ft.) thick was built, consisting of a central core and steeply sloping walls on both sides. A gate on the south side of the tell was constructed of basalt stone. At Tell el-Fâr'ah North, about 11 km. (7 mi.) NE of Shechem. R. de Vaux found a wall of mud brick 2.7 m. (9 ft.) thick, built on three courses of stone base and strengthened by towers and projecting bastions. Later additions to this wall included a stone wall 3 m. (10 ft.) thick and a glacis 9 m. (30 ft.) thick in places at the base. Such sloping embankments in this period were probably constructed to counteract the internal pressures against the wall caused by accumulated debris. The city consisted of an opening with two projecting rectangular towers, one on each side. At Ai a walled citadel stood atop the acropolis within an area of 11 ha. (27 acres), the city proper. The entire site was surrounded by a wall 5.5 m. (18 ft.) thick that underwent subsequent rebuilding to a width of 7.5 m. (25 ft.). A semicircular tower also strengthened the wall of Ai.

Many of the E.B. sites give evidence of frequent repairs, rebuilding, and the expansion of fortifications. The walls of Jericho, e.g., in this period exhibited seventeen different phases.

D. Middle Bronze Age (*ca.* 2000-1550 B.C.). The major urban centers of Palestine were by and large destroyed and left uninhabited by *ca.* 2300 B.C. Most scholars connect this disruption, which affected Egypt and Mesopotamia as well as the Canaanite world, with the movements of nomadic peoples called the Amorites. The ensuing Middle Bronze I period (*ca.* 2000-1800) in Palestine reflects a seminomadic population living in rural and unwalled settlements.

Middle Bronze IIA marked the resurgence in Palestine of sedentary life and the reestablishment of fortified cities. At Megiddo the first fortifications of the period consisted of a flimsy wall but in the succeeding phase a new city wall 1.5 m. (5 ft.) thick was constructed of mud brick on a stone foundation. A city gate was built so that a stepped approach led into a tower which contained both an outer and an inner gate. These were set at right angles to each other, with the inner gate chamber parallel to the city wall. Such a plan indicates that only foot traffic could use the gate.

A major change in city planning and fortifications ushered in the Middle Bronze IIB period (*ca.* 1750-1550 B.C.). Huge, steeply sloping mounds of earth were cast up around the cities. Atop these glacis were erected the city walls, frequently constructed of mud brick laid upon a stone foundation. Concurrent with this change was a redesigned city gate with a direct entrance, in contrast to the earlier indirect entrance.

The new fortifications have been associated with the HYKSOS who ruled the Canaanite city-states in this period. The Hyksos introduced a revolutionary war implement in the Middle East, the light chariot with four-spoked wheels. This development and that of the battering ram were apparently the causes for the change in the design of fortifications. The identification of the battered earth ramparts with the Hyksos period occurred early in this century when Flinders Petrie excavated Tell el-Yehūdîyeh, a site some 32 km. (20 mi.) N of Cairo. He found a camp surrounded by a huge glacis about 450 m. (1500 ft.) square. The embankment measured 24 by 42.5 m. (80 by 140 ft.) at the top with a base 40-60 m. (130-200 ft.) wide. The rampart had been built by heaping up sand and then covering it with bricks and plaster. The interior of the camp measured about 365 m. (400 yds.) square, and it has been estimated that forty thousand people could have taken refuge within it. A sloping ramp on the east side, guarded by two towers, was apparently an access route by which chariots could be brought into the city.

The mightiest Hyksos city in Palestine was Hazor. A description of the fortifications of Hazor in this period provides an insight into similar constructions discovered at such sites as Dan, Jericho, Megiddo, Taanach, Dothan, Shechem, Bethel, Jerusalem, Beth-zur, Beth-shemesh, Gezer, Lachish, Tell Beit Mirsim, Tell Jerîsheh, Joppa, Ashkelon, Tell en-Nagilah, and Tell el-'Ajjûl in Palestine, as well as at sites to the north such as Qatna, Carchemish, and Tell Mardikh in Syria.

Hazor consisted of an upper city, the tell proper, covering 10 ha. (25 acres) and rising about 43 m. (140 ft.) above the surrounding landscape, and a lower city that covered some 71 ha. (175 acres) of the tell. The upper city, which began to be occupied in the Early Bronze Age, was unwalled. In the E.B. IV phase it lay deserted. In the M.B. IIB period a brick wall 7 m. (23 ft.) wide was built on a stone foundation. It was strengthened with towers, and on the eastern end of the tell a glacis of stone provided the base for the wall. (*See* Plate 22.) Adjacent to the glacis was a deep, narrow moat. This wall protected the tell, the citadel of the city. The lower city was built on a plateau which on the east had a steep slope that was strengthened with retaining walls and a glacis. To the north and west, however, the builders dug a deep, wide moat and used the excavated material to build a rampart. In one area a cut through the glacis revealed a core wall of mud brick against which earth was thrown in alternating layers with plastered surfaces intervening. Sealed in this sandwiched construction were quantities of E.B. and M.B. pottery, indicating that the rampart was constructed later rather than earlier in the M.B. period.

During the Hyksos period improvements in the construction of glacis were made at some sites. At Shechem, e.g., a glacis was constructed of stone. At Tell Dan the Hyksos period rampart is unique, with a huge core wall of stone that measures 6 m. (20 ft.) wide in places. Against this core, both within and without, the builders cast up a glacis so that the inner surface of the tell has a concave shape.

The glacis of this period were thrown up against the sloping sides of tells that had known long periods of occupation so that the slopes were soft and easily dislodged by the first crude battering rams. The Hyksos glacis was a response to this defensive problem. The walls, with towers, battlements, and gates, were built atop the glacis.

The Hyksos introduced the light war chariot, an innovation that required a change in the construction of city gates. The sharply angled entrance of earlier gates was now eliminated in favor of a design that provided a wider direct entry, but since the gate was the most vulnerable part of a city's fortifications, the passageway was lengthened and strengthened. The new gates, 15-18 m. (50-60 ft.) long, were divided by pilasters, three to each side, to which three doors could be fixed. Large towers were usually built on each side of the passage. When the gate was built high on a tell, a ramp was constructed from the base of the tell to the gate, with an area before the gate wide enough for turning a chariot. When feasible, the approach moved parallel to the wall from the right of the gate, leaving the unshielded arm of attacking troops who used the ramp open to fire from the adjacent wall.

E. Late Bronze Age (*ca.* 1550-1200 B.C.). Fortifications during this period changed little from those of the Middle Bronze period. The massive constructions of the Hyksos seem to have been used continuously during the L.B. period, or reconstruction took place along the same defensive lines. At Gezer a new wall about 3.5 m. (12 ft.)

FORTIFICATION

Shechem's East Gate and steps leading down into the city. Originally built *ca.* 1600 B.C., it was destroyed by the Egyptians *ca.* 1550. New guard rooms were added in the Late Bronze Age, and Jeroboam I repaired and strengthened the gate. It was again destroyed in the 8th cent. B.C. (W. S. LaSor)

thick and strengthened by a glacis was erected early in this period. The wall was further strengthened with several rectangular bastions protruding from both sides. A number of the bastions were built at the same time as the wall, while others were added later. At Shechem the eastern gate was constructed with a broad entrance between two pilasters on each side strengthened by adjacent towers.

Sometime during the L.B. period the inhabitants of Gezer dug a huge shaft down through the tell and the subterranean limestone to ground water level. This assured the city of an adequate water supply within its fortifications in case of siege.

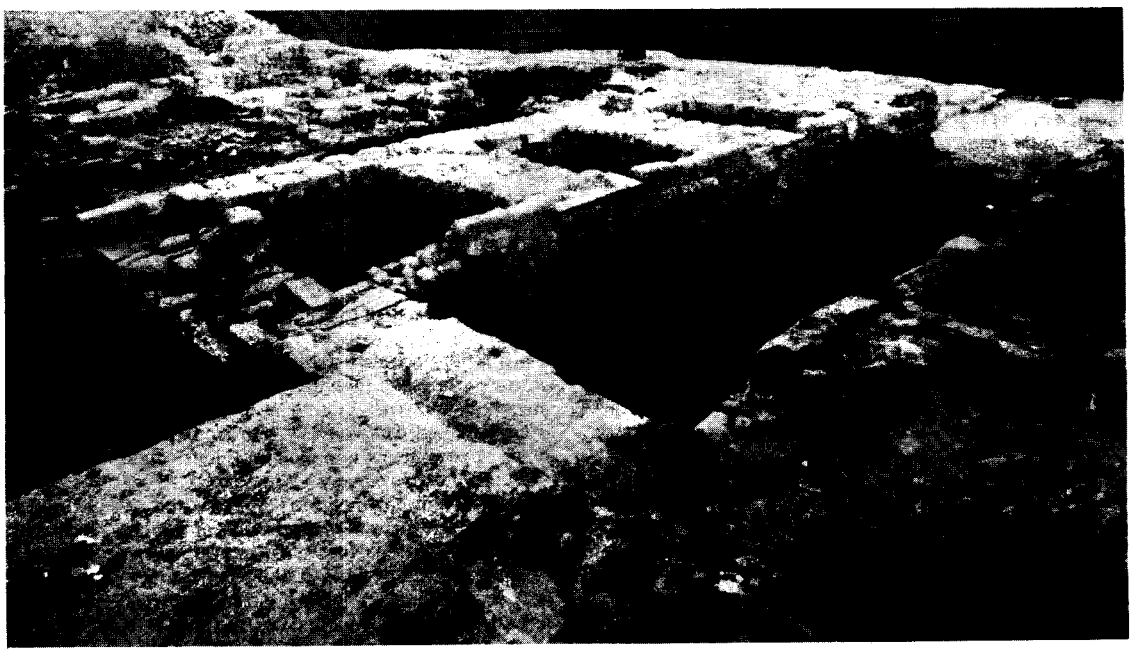
F. Iron Age I (*ca.* 1200-900 B.C.). The Late Bronze Age witnessed the decline of the major empires of the period — Egypt, the Hittites in Anatolia, and the Mitanni on the Middle Euphrates. By *ca.* 1200 B.C. the migrating sea-peoples had ended the Hittite empire, destroyed the major cities along the Syro-Palestinian coast, and were threatening Egypt. Also during this period the Israelites conquered a part of Canaan while an Aramean kingdom was being established around Damascus.

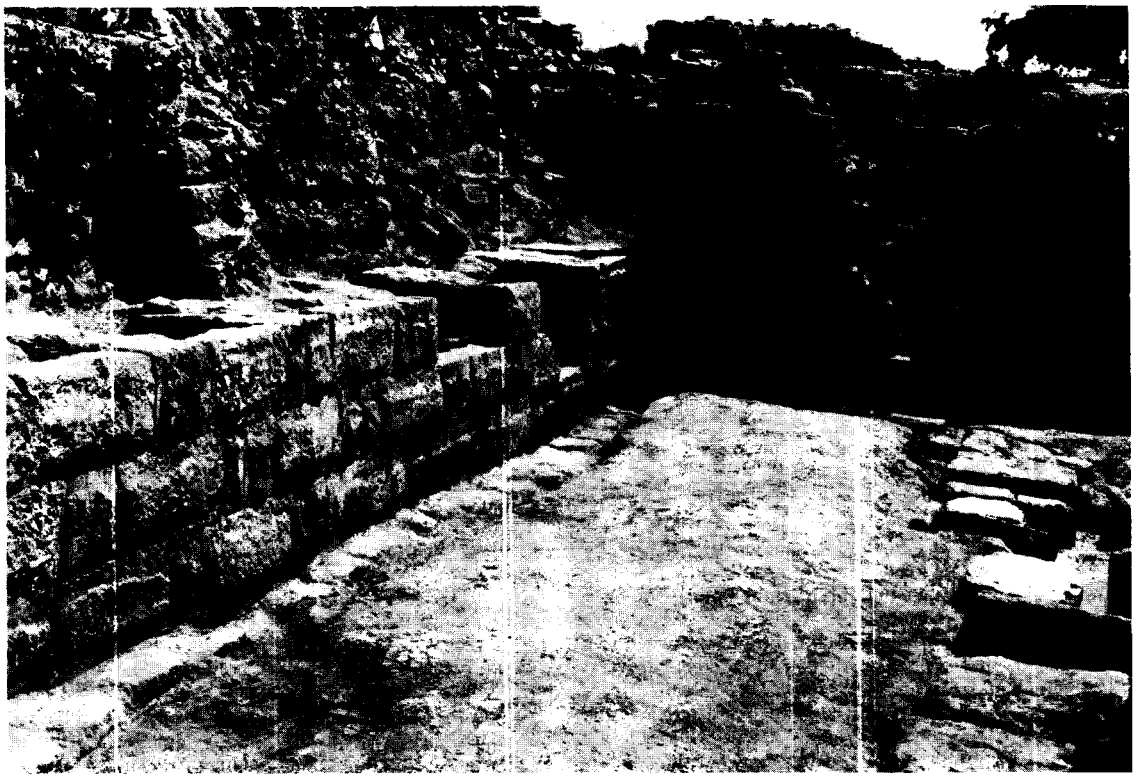
These factors help to explain the decline in the quality of the Canaanite fortifications in the period of the judges and the united monarchy (Iron Age I). The conquering Israelites initially built no fortifications on the captured tells. The earliest phases of their occupation were characteristically villages and campsites with associated stone-lined storage pits. The earliest recognizable Israelite fortification is probably the flimsy wall of rubble stone about a meter (3 ft.) thick built at Tell en-Naṣbeh (biblical Mizpah). Double-chambered towers were set into this wall at strategic locations, but such a weak defensive structure could not sustain a long siege. The towers, however, gave a vantage point from which to identify an approaching hostile force, permitting the inhabitants either to flee into the surrounding countryside for safety or to send out their own troops to ambush the enemy or to engage them in open combat.

The establishment of the monarchy in Israel led to the refortification of the major cities and to the building of fortresses at strategic locations. At Tell en-Naṣbeh the earlier wall was replaced by a casemate wall 4 m. (13 ft.) thick, built perhaps during either Saul's or David's reign. It was about 800 m. (½ mi.) long and surrounded an area of 3.2 ha. (8 acres). Small stones were used to level the bedrock and were topped by large boulders. The wall itself, built of stone blocks, was erected on this base and plastered on the outside. It was further strengthened by ten projecting towers spaced irregularly along its perimeter and by a huge retaining wall at the base. The stone wall was probably surmounted by a brick wall. The gate, situated in the northeast section of the wall, had a direct approach and a double jamb. It was protected by a massive tower. Similar early Israelite casemate wall systems were discovered at Tell Beit Mirsim and Beth-shemesh.

During Solomon's reign major defensive works were built at Jerusalem, Hazor, Megiddo, and Gezer (1 K.

The Solomonic gate of Megiddo showing the typical triple piers. Rubble filling the spaces between the pillars later sealed off the guardrooms (Oriental Institute, University of Chicago)





Header-and-stretcher Israelite wall at Samaria (Israel Department of Antiquities and Museums)

9:15). The distinctive Solomonic casemate walls and gates have been uncovered at all of these sites except Jerusalem, where later rebuilding and continuing occupation make discovery of the Solomonic structures unlikely. The three known Solomonic gates have similar dimensions and are all built on the same plan: a six-chambered main gate built into the casemate wall and extending about 20 m. (65 ft.) into the city with an outer gate structure. The six chambers were formed by three piers on each side of the passageway. The piers were about 2 m. (6 ft.) thick, and the guard rooms measured 3 by 5 m. (10 by 17 ft.). The width of the passageway between the piers measured about 4 m. (14 ft.).

Two solid stone towers were built at the line of the wall. They were faced with well-cut ashlar masonry with nicely drafted margins. Beyond the main gate and set at a right angle to it was an outer gate with two piers and an enclosed courtyard large enough to permit a chariot to turn into the inner gate. A ramp led up the slope of the tell to the outer gate. Similar indirect approach gates have been found in Iron Age II levels at Tell en-Naṣbeh, Tell el-Fâr'ah North, Tell Beit Mirsim, and Lachish.

G. Iron Age II (*ca.* 900-600 B.C.). The widespread use of the casemate wall in the early period of the Israelite monarchy was followed in the northern kingdom by new, solid walls, apparently erected in Ahab's reign (cf. 1 K. 22:39). These changes were probably made to defend against the more sophisticated battering ram that the Assyrians had developed. At Megiddo a solid wall with salients and recesses was built, and similar walls have been uncovered at Hazor, Beth-shemesh, and Tell en-Naṣbeh. A new gate design that reduced the space allocated to it within the city replaced the earlier Solomonic structure. It contained two piers on each side of the passage. Earlier, Omri had built a solid wall 1.5 m. (5 ft.) thick around the crest of the hill of Samaria that was superbly crafted with fine ashlar exterior stones laid in the header-and-stretcher fashion. Phoenician craftsmanship may be reflected in the marginal bossing and the tight fit that required no mortar. The inner wall was filled with stones about one meter (3 ft.) long chinked with smaller stones. Later an outer wall was built, in casemate fashion, around the earlier wall. It varied in width from 5 to 10 m. (16 to 33 ft.) with cross-walls nearly one meter (3 ft.) thick, spaced every 2 to 3 m. (7 to 10 ft.). This wall underwent several phases in the reigns of both Jehu and Jeroboam II.

Excavations at Tell el-Qâḍi (biblical Dan) have revealed massive fortifications datable to this period. There is no evidence of Danite defensive constructions following the conquest of Laish (Jgs. 18), but along the southern edge of the mound an Israelite gate structure and a massive wall at the base of the M.B. IIB rampart have been uncovered. Two major phases, attributable to Jeroboam I and Ahab, with possible additional modifications in the time of Jeroboam II, have been uncovered. The complex included a wall at the base of the rampart that is 3.6 m. (12 ft.) thick and probably once stood 7.6 to 9.1 m. (25 to 30 ft.) high, a beautifully cobbled street leading into a two-chambered gate structure and then up the rampart, and a second gate structure and wall system atop the rampart. A similar double-walled defensive system from this period at Lachish is graphically depicted on reliefs found in the ruins of Sennacherib's palace in Nineveh (cf. *ANEP*, nos. 372f.)

Apart from fortifications constructed around cities, royal Judean fortresses were built at strategic locations, particularly in the Negeb, during this period. The early fortress of Saul at Gibeah has been mentioned above. It was abandoned until the last decades of Iron Age II when it was again strongly fortified on the original plan.

Three basic types of fortresses were built: rectangular

forts, about 40 by 50 m. (130 by 160 ft.), with projecting towers; irregularly shaped fortresses without towers; and a smaller (about 20 m. [70 ft.] sq.) fortress without towers. Arad provides an excellent example of these structures, which were obviously built to control both military threats along the border and the incursions of nomadic elements (cf. the raids of the Amalekites, 1 S. 30:1ff.). The Arad fortress passed through six phases from the 10th to the early 6th cents. B.C. The first had a casemate wall. The second wall was solid and strengthened with a glacis. It was rebuilt and reused except during the last phase when a casemate wall was again constructed. A feature of extraordinary interest in the Arad fortress was a Judahite sanctuary.

Under King Uzziah, additional fortresses were built (2 Ch. 26:10). The earliest phase of Khirbet Qumrân, where the Dead Sea Scroll community later lived, was possibly one of Uzziah's forts.

H. Persian Period (ca. 600-330 B.C.). Benevolent Persian control may have reduced the necessity for fortified cities; thus few fortified sites of this period have been found in Palestine. At Tel Megadim, S of Haifa, a rectangular casemate wall in this period surrounded a 1.5 ha. (4 acre) site, presumably Phoenician. A few large administrative buildings have been discovered, of which the governor's palace at Lachish is the best preserved. The sparse population seems to have lived in small villages. Excavations in Jerusalem, however, have produced fragments of the walls built by Nehemiah on the east crest of Ophel.

I. Hellenistic-Early Roman Periods (ca. 330 B.C.-A.D. 70). The conquests of Alexander the Great brought a resurgence of urban life to the older locations in Palestine and led to the establishment of several new Greek cities (the Pentapolis). Examples of fortifications for cities in this period have been unearthed at such sites as Gezer, Jerusalem, Mareshah, and particularly Samaria.

In the early Hellenistic phase at Samaria, the old walls of the acropolis were reused with the addition of huge, round towers built on the earlier square Israelite foundations. One tower measured 19 m. (63 ft.) in diameter and still stood to a height of 8 m. (27 ft.) when it was discovered. John Hyrcanus, the Hasmonean ruler, destroyed Samaria in 107 B.C. It was rebuilt *ca.* 60 B.C. with an acropolis wall 4 m. (14 ft.) thick and a series of rectangular towers.

During the Roman period a wall encircled the entire city of about 70 ha. (170 acres). The city gate on the west boasted two huge, round towers, 14 m. (46 ft.) in diameter, which sat on earlier Hellenistic foundations. Herod the Great built a number of monumental buildings in the city and erected a 4-km. (2½-mi.) wall around it with imposing gates and towers.

Mareshah was a major Idumean city in the Hellenistic period, laid out on the Hippodamian plan, i.e., with streets intersecting at right angles. The city wall enclosed an almost square area, 158 m. (520 ft.) measured at the widest point from east to west, and 152 m. (500 ft.) from north to south. The gates were not definitely identified in the excavations.

The high priest Simon was noted (cf. Sir. 50:1-4) for repairing the walls of Jerusalem *ca.* 200 B.C. Apparently he refurbished the walls constructed by Nehemiah. In 168 B.C. Antiochus IV built a fortress within Jerusalem's walls in an effort to control the recalcitrant Jews, who rejected his demands to hellenize their ways. That fort, the Acra, is known from Josephus (*BJ* i.1.4 [39]; *Ant.* xii.5.4 [252]), but its location has not been identified. The two choices are: (1) on the slope of the Upper City to the west of the Temple Mount, and (2) to the south of the Temple enclosure. The latter location agrees with the account in Josephus.

In the Hasmonean phase of this period, the walls of Jerusalem were extended to the west and north to incorporate the western hill, the "Upper City." Beneath the Citadel of modern Jerusalem at Jaffa Gate (the Tower of David), remains of a Hasmonean tower have been uncovered. The wall extended eastward from this point to the Temple Mount near Wilson's Arch. Parts of this First Wall have been traced around Mt. Zion along the Valley of Hinnom to the Kidron Valley. Herod the Great not only erected monumental buildings, but also expanded the defenses of Jerusalem. The Second Wall was built to connect the First Wall with the new Damascus Gate to the north. The wall then turned southward to join with the Antonia fortress at the northwest corner of the Temple area (cf. Acts 21:34, 37, "barracks"). Little evidence remains of this fortress, so one must turn to Josephus for a description of it (cf. *BJ* v.5.8 [238-245]). The major remaining fortification from Herod's time is the Tower of David, actually a remnant of three towers that fortified his palace on the ridge of the Upper City. Here characteristic Herodian masonry with flat bosses and wide margins form the base of a tower 18 m. (60 ft.) square and still preserved to a height of 20 m. (66 ft.).

Herod also built fortress retreats in the desert, of which the two most striking are MASADA and the Herodium (*see* HEROD). At Masada a casemate wall 4 m. (13 ft.) thick with four gates and strengthened by thirty towers surrounded the summit. The walls and towers were coated with white plaster. The Herodium is located 5 km. (3 mi.) SE of Bethlehem. Herod artificially heightened a hill into a gigantic conical base upon which he constructed a fortress with a double circular wall. Four towers were built facing the four points of the compass, three semicircular in design and the eastern one round. The outer diameter of the complex is 55 m. (180 ft.) while the inner diameter is 45 m.

Qasr Abu el-Kharaq, a Moabite border fortress (E. K. Vogel; picture N. Glueck)

Ruins at the top of the Herodium, a palace-fortress built by Herod the Great (37-4 B.C.). It is located about 6 km. (4 mi.) SE of Bethlehem (B. VanElderen)

(150 ft.). The interior was divided into palatial rooms and courts. Herod was buried in this fortress, but his coffin has not been discovered; it may lie hidden in the unexcavated east tower.

IV. Fortification Terminology as Symbol.–Although defensive walls never adequately protected city dwellers in biblical times, they did represent the most powerful physical means of security. Both biblical poets and prophets, therefore, used fortification terminology to express the spiritual (and frequently the physical) security of the believer in God.

A. In the OT. The psalmist notes in his thanksgiving (9:9 [MT 10]) that the Lord is "a stronghold [*miśgāḇ*; AV "refuge," NEB "tower of strength"] for the oppressed." The opening lines of Ps. 18 (v. 2 [MT 3] par. 2 S. 22:3) characterize God with a series of metaphors including *mᵉṣûḏāṯî*, "my fortress," and *miśgabbî*, "my stronghold" (AV "my high tower," NEB "my strong tower"). In Ps. 46:7 (MT 8), the presence of the Lord of hosts is a "refuge" (*miśgāḇ*, NEB "high stronghold"). In Ps. 31:2 (MT 3) *ṣûr-mā'ôz*, "rock of refuge" (AV "strong rock") parallels *bêṯ mᵉṣûḏôṯ*, "a strong fortress" (AV "house of defence," NEB "strong hold"), and therefore the psalmist can trust in the Lord to save him from his troubles. That this protection by God was not merely spiritual is apparent from the account of Assyria's attack (and continued threats) on Jerusalem (1 K. 18–20 par. Isa. 36–38); God promised to "defend" (Heb. *gānan*; cf. *māgēn*, "shield") the city (19:34; 20:16), and He did (19:35f.). In describing both the beauty and chastity of a woman, Cant. 8:9 refers to her as a wall (Heb. *ḥômâ*) fortified (Heb. *bānâ*) with a silver battlement (Heb. *ṭîrâ*; AV "palace," NEB "parapet"; cf. M. Pope, *Song of Songs* [*AB*, 1978], pp. 679-683).

The prophets, too, use this imagery. God has made Jeremiah (1:18) "a fortified city" (*'îr miḇṣār*, AV "defenced city") and "bronze [AV "brasen"] walls," so that he may speak fearlessly the word of God in the face of "all the tribes of the kingdoms of the north" (1:15). Zechariah perceived an eschatological vision of Jerusalem with no need for walls, for the Lord would be a "wall of fire" (*ḥômaṯ 'ēš*) around the city (2:5 [MT 9]). The poem in Isa. 60 foresaw a time when war would cease in the Holy Land and the inhabitants would "call your walls Salvation [NEB "Deliverance"] and your gates Praise" (v. 18). So Nahum, to echo the thoughts of the psalmists, testified that "the Lord is . . . a stronghold [*mā'ôz*, NEB "sure refuge"] in the day of trouble" (1:7).

B. In the NT. The writers of the NT were well acquainted with the cities, walls, and gates of their time, yet they employed fortification terminology very sparingly. Matthew recorded the statement of Jesus that "the powers of death" (AV "gates of hell") would not prevail against His Church (16:18), metaphorically referring to death occupying a fortress city under siege whose downfall was certain. Paul in 2 Cor. 10:3-5 wrote of a spiritual warfare in which "strongholds" (Gk. *ochýrōma*, which often in the LXX translates Heb. *miḇṣār*) are destroyed, implying siege warfare, but the more usual symbolism of Christian conflict is that of personal, hand-to-hand combat (cf. Eph. 6:10-17; 1 Thess. 5:8). In a spiritual conflict the Christian is to be on the offensive in the field rather than on the defensive within protective walls. Nevertheless, the book of Revelation (21:10-27) pictures the New Jerusalem fortified with a great wall and with twelve gates, marvelous in height and beauty. The visionary author was a child of his times and saw the eternal city in spiritualized terms of the walled cities of the first century. One important feature separated the heavenly from the earthly, however — the gates of the New Jerusalem would never close, for its sure defense was not in the walls but in the presence of the Lord God the Almighty and the Lamb.

FORTUNATUS fôr-tōō-nā'-təs [Gk. *Phortounátos* < Lat. *Fortunatus*–'blessed,' 'fortunate']. Found only once in Scripture (1 Cor. 16:17). Fortunatus, with Stephanus and Achaius, was a member of the Corinthian church, whose presence at Ephesus refreshed the spirit of the apostle Paul. It is possible that these men carried the letter to Corinth (cf. the subscription of the TR).

FORTUNE [Heb. *gaḏ*] (Isa. 65:11); AV "troop," mg. GAD; NEB THE GOD OF FATE; **GOOD FORTUNE** [*K bāgāḏ, Q bā' gāḏ*] (Gen. 30:11); AV "a troop cometh"; NEB "good fortune has come." The different translations of Gen. 30:11 go back to variants in the Hebrew tradition. The *kethibh* reads literally "with fortune," thus "good fortune," "how propitious," etc., while the *qere* reads *bā' gāḏ*, "good fortune comes." (The AV's understanding of *gaḏ* in the sense of *gᵉḏûḏ*, "raiding party," "troops," is based on popular wordplay in Gen. 49:19 [see S. R. Driver, *Expos.*, 2 (1885), 8f.].) The intention is to explain the origin of the name Gad (cf. E. A. Speiser, *Genesis* [*AB*, 1964], p. 229). The name Gad is also attested in the place names Baal-gad (Josh. 11:17; 12:7; 13:5) and Migdal-gad (Josh. 15:37).

In Isa. 65:11 Gad (Fortune) is parallel to the deity Meni (Destiny); thus Gad here may be the name of a specific deity. The reference is to the idolatrous practice of offering food to the gods (cf. R. de Vaux, *Ancient Israel* [Eng. tr. 1961], II, 413, 435; A. L. Oppenheim, *Ancient Mesopotamia* [1964], pp. 183-198).

Gad, or Fortune, was a West Semitic deity. Occurrences of the name, alone or in theophorous combination, are found in Punic, Nabatean, and Palmyrene texts, as well as those from Hatra. The word is also found in Palmyrene texts as a common noun meaning "fortune" or "destiny" (cf. Jean and Hoftijzer, p. 47; *IP*, pp. 126f.).

There is ambiguity about the gender of the deity. Jean and Hoftijzer refer to Gad as a goddess; yet the name is generally taken to be masculine. Meni, the other deity mentioned in Isa. 65:11, is also masculine in form, but is often equated with Manât, a goddess of fortune (cf. KD, *in loc.*). Both gods were apparently astral deities, as Gad is often identified with Jupiter and Meni with Venus.

G. Fohrer has suggested that Isa. 65:11 was composed in the 4th cent. B.C. when Israel came under the influence of the Nabateans. As a rule, he maintains, Gad was not the proper name of a specific god but was applied to various male and female deities in Syria-Palestine; it became the name of a specific deity in the 4th cent. B.C. among the Nabateans.

Fohrer, *Intro. to the OT* (Eng. tr. 1968), p. 387; *TDOT*, II, *s.v.* "gadh" (Schunck); also comms. on Isaiah by T. K. Cheyne (1890), II, 117-19; G. Fohrer (1964), III, 264f.; J. Muilenberg (*IB*, 1956), pp. 751f.; C. Westermann (*OTL*, 1969), p. 405. A. F. CAMPBELL

FORTUNES [Heb. *šᵉḇûṯ, šᵉḇîṯ*] (e.g., Dt. 30:3; Ps. 14:7; 126:1, 4; Jer. 30:3, 18; Ezk. 29:14 etc.); AV CAPTIVITY; NEB also PROSPERITY. The phrase *hēšîḇ ʾeṯ-šᵉḇûṯ* or *šāḇ ʾeṯ-šᵉḇûṯ* occurs frequently, usually with God as its subject, and means to bring an end to captivity or imprisonment for debt, and thus to turn one's fortune for the better. Israel's fortunes will be restored (i.e., Israel will have material prosperity and forgiveness of sins) when the Lord brings the Israelites back from captivity to their homeland (e.g., Ezk. 39:25-29). Their return is contingent upon obedience to God (Jer. 29:12-14). Similarly, Job, who had been held captive by misfortune and disease, received again the status and possessions he had lost (Job 42:10).

FORTY [Heb. *ʾarbāʿîm*; Gk. *tessarákonta*]. *See* NUMBER IV.

FORTY LASHES (1 Cor. 11:24). *See* PUNISHMENTS IV.A.

FORUM OF APPIUS (Acts 28:15). *See* APPIUS, FORUM OF.

FORWARD. This adverb implies an onward movement in time or space or in the conduct of affairs. It frequently modifies a verb, e.g., "go forward" (Ex. 14:15; 2 K. 20:9; etc.), "come forward" (e.g., Dt. 20:2). The Hebrew expression *lᵉpānîm*, "forward," occurs in Jer. 7:24, while in Ezk. 1:9, 12; 10:22 the phrase *ʾel ʿēḇer pānāw* is rendered "straight forward." In Ezk. 39:22 *hālēʾâ*, "onward," denotes distance in time, while *maʿal*, "above," is used similarly in 1 S. 16:13; 30:25. The Greek particle *prós* occurs in such compound NT forms as *prosérchomai* (Mt. 8:5; 25:20; etc.), while *pró-* is found with *títhēmi* (Rom. 3:25) and *bállō* (Acts 19:33).

The AV also uses "forward, forwardness" in the sense of "eager" (e.g., 2 Cor. 8:10, 17; Gal. 2:10).

FOUL [Heb. *bāʾaš*]; AV, NEB, STINK; [*boʾšâ*] (Job 31:40); AV COCKLE; NEB omits; [*zānaḥ*] (Isa. 19:6); AV "turn far away"; NEB STINK; [*piggûl*] (Ezk. 4:14); AV ABOMINABLE; NEB TAINTED; [*rāpaś*] NEB FOULING, TRAMPLE DOWN; [*bᵉʾōš*] (Joel 2:20); AV STINK; NEB STENCH; [Gk. *aischrología*] (Col. 3:8); AV, NEB, FILTHY; [*kakós*] (Rev. 16:2); AV NOISOME; [*akáthartos*] (Rev. 16:13; 18:2); AV also UNCLEAN; NEB also UNCLEAN.

In the OT various things "became foul" (Heb. *bāʾaš*): the Nile because of the dead fish (Ex. 7:18, 21), the manna that was left until the following morning in the wilderness (Ex. 16:20; cf. v. 24), and the wounds of the psalmist (Ps. 38:5 [MT 6]; cf. Joel 2:20; Job 31:40; Isa. 19:6). Meat from the peace offering sacrifice becomes "abominable" or "tainted" (*piggûl*) if not eaten within a specified time (Lev. 7:18; 19:7), and it is this "foul flesh" that Ezekiel claims had never "come into my mouth" (4:14). Making water muddy and thus undrinkable (*rāpaś*) by trampling through it is mentioned in Ezk. 32:2 and 34:18.

"Foul talk" (*aischrología*, from *aischýnō*, "shame" or "bring shame" in classical Greek) is condemned by Paul. This term is taken to mean "evil speech in the sense of obscene speech" (Bauer, rev., p. 25), or beyond that, "every kind of abusive language" (Lohse, p. 140; cf. Lightfoot, p. 214). "Foul and evil sores" (*hélkos kakós kai ponērós*) erupt upon the people who bear the mark of the beast and worship it in Rev. 16:2 (cf. Ex. 9:10; Dt. 28:27, 35; Job 2:7).

"Foul spirits" are mentioned twice in Revelation, once as "three foul spirits like frogs" (16:13) and once as inhabitants of fallen Babylon (18:2). *Pneúma akátharta* ("foul spirits") is used in Matthew, Mark, Luke, Acts, and Revelation to denote demons. In this moral sense, then, it means "evil spirits" (cf. Rev. 16:14; Mt. 10:1; Mk. 1:26; etc.). The reference to frogs in 16:13 may be an allusion to the plague in Ex. 8:1-7 and Ps. 78:45; and thus the "spirits" (or "breath") issuing from the mouth of the dragon, the beast, and the false prophet have the quality of evil, being "froglike," like a plague (Barclay, p. 169). These three spirits deceive (cf. Rev. 13:14) the "kings of the whole world" into waging battle against the Lord Almighty, a battle which leads to their doom.

In Rev. 18:2 "foul spirit" is again to be seen in its moral sense of being "evil." To say that the fallen Babylon is a "haunt of every foul and hateful bird" is using the term in its cultic sense, meaning "that which may not be brought into contact with the divinity" (Bauer, rev., p. 29). The double usage of *akáthartos* in this verse provides a contrast to the holy city which nothing unclean can enter (21:27). The context of 18:2 is the angelic proclamation of the doom of Babylon and is in the form of other "Doom Songs" found often in the prophetic literature (Isa. 13:19-22; 34:11-15; Jer. 50:39; 51:37; Zeph. 2:15) that portray unclean birds and wild beasts dwelling in the ruins of once great cities.

FOUND [Heb. *yāsaḏ*] (e.g., Ps. 24:2; 78:69; 89:11 [MT 12]; 119:152; Prov. 3:19; Isa. 14:32; Zec. 12:1); AV also ESTABLISH, ORDAIN, "lay the foundation"; NEB also "first beginnings" (Ex. 9:18), "rebuke" (Ps. 8:2 [MT 3]), FIX, ARCH (Am. 9:6), etc.; [*yᵉsûḏâ*] (Ps. 87:1); AV, NEB, FOUNDATION; [*kûn*] (Hab. 2:12); AV STABLISH; [Gk. *themelióō*] (Mt. 7:25); NEB FOUNDATIONS. The Hebrew cosmogony saw the world as resting on foundations. The psalmist, writing against a background of ancient Near Eastern creation myths, poetically depicts Yahweh as defeating the chaotic monsters of the DEEP (*see also* CHAOS) and establishing firm foundations for an ordered world (cf. Gen. 1:2, 9f.; Ps. 89:10-12 [MT 11-13]; 104:5f.; etc.). The author of Prov. 3:19 says that it was by wisdom that God founded the world, implying that man's life should be directed by this same wisdom in order that he might live in harmony with the world around him.

See also FOUNDATION. N. J. O.

FOUNDATION. ***I. In the OT.***–Hebrew *yāsaḏ* originally meant "support, lean against, firm up," thus by extension more commonly "found, establish, lay the foundation of." It appears most frequently in the literal sense in connection with the construction of buildings or cities (esp. the first and second temples in Jerusalem, e.g., 1 K. 5:17 [MT 31]; 6:37; Ezr. 3:6, 10-12; Isa. 44:28; Hag. 2:18; Zec. 4:9; 8:9; for cities cf. Josh. 6:26; 1 K. 16:34; Isa.

54:11) but also occasionally in the cosmological imagery of Yahweh establishing or laying the foundations of the earth (e.g., Ps. 102:25 [MT 26]; Isa. 51:13, 16). The RSV translates this verb with either active or passive variants of "lay (= set) the foundation(s) of" in nearly half its OT occurrences.

Several substantives are cognates of *yāsaḏ*. *Yᵉsôḏ*, "foundation," may refer to the foundation of a city wall (Mic. 1:6; Ps. 137:7), of Zion (Lam. 4:11), of one of the temple gates (known as the "Gate of the Foundation," 2 Ch. 23:5), or of a defense wall (fig. for false prophecies, Ezk. 13:24). Figuratively, it represents a national government (the 'foundations" of Egypt, Ezk. 30:4), and human origins and human life (Job 4:19; 22:16).

Hebrew *mûsāḏ* occurs twice in the OT: as a figurative cornerstone in Zion in Isa. 28:16, and as the foundation of the Solomonic temple in 2 Ch. 8:16. Heb. *mûsāḏâ*, "foundation," occurs in Ezekiel's description of his temple vision (*Q*, Ezk. 41:8). *Môsāḏôṯ*, "foundations," is usually cosmological in meaning: the foundations of the earth (e.g., Ps. 82:5; Isa. 24:18; Mic. 6:2), of the world (2 S. 22:16; Ps. 18:15 [MT 16]), of the heavens (2 S. 22:8 par. Ps. 18:7 [MT 8]), and of the mountains (Dt. 32:22). It is also used temporally ("from the foundations of the earth," Isa. 40:21) and literally (for the cities of Judah, Isa. 58:12; and for Babylon, Jer. 51:26). *Massaḏ*, "foundation," occurs only in 1 K. 7:9.

Hebrew *māḵôn*, "fixed place," "site" (< *kûn*, "be firm," "make firm," "fix," "establish") is three times translated "foundation(s)." In Ps. 104:5 the phrase *yāsaḏ ʾereṣ ʿal-mᵉḵôneyhā* is rendered, "Thou didst set the earth on its foundations." Both of the other occurrences have an ethical connotation and appear in the phrase "righteousness and justice are the foundation of thy/his throne" (Ps. 89:14 [MT 15]; 97:2). In Ps. 11:3 the plural of *šaṯ* (< *šîṯ*, "set, put, constitute") is usually understood figuratively for the established laws of the land. The obscure first word in the phrase *ʾammôṯ hassippîm*, "foundations of the thresholds," in Isa. 6:4 is rendered largely from context, for its etymology is uncertain.

The plural of the Aram. *ʾuššayyā*', "foundation," occurs twice in the Aramaic portion of Ezra (4:12; 5:16). In the context of the rebuilding of Jerusalem the first instance refers to the city itself, the second to the reconstructed temple.

II. In the NT.–The NT has two terms that are translated "foundations": Gk. *themélios* (sixteen times) and *katabolḗ* (ten times). The essential meaning of *themélios* is the "basic stone" or "foundation". Its only NT occurrence in a literal sense is in Acts 16:26, where the earthquake shakes the foundations of the Philippian prison, allowing Paul and Silas to escape. The other occurrences are figurative. Jesus Christ Himself is the foundation for all mission work and for the new life of the Church as the household of God (1 Cor. 3:10-12; Rom. 15:20). Indeed, He is the chief cornerstone that anchors the foundation of the apostles and prophets (Eph. 2:20) or of the apostolic teaching (2 Tim. 2:19). In He. 6:1 "foundation" is figurative for elementary doctrines, and in 1 Tim. 6:19 a reservoir of good and generous deeds is said to be "a good foundation for the future."

While *themélios* refers to city-wall foundations in Rev. 21:14, 19, and to city foundations in He. 11:10, that the city referred to in each case is the heavenly city (the New Jerusalem) indicates the metaphorical (and ecclesiological) nature of these passages. Similarly, in Lk. 6:48f. the house built with or without foundations is symbolic of a faithful or unfaithful life style; cf. Lk. 14:29 where the foundations are laid for a tower that is itself a figure for the life of commitment to Christ.

Greek *katabolḗ*, lit. "casting down, laying down," and thus "foundation," occurs ten times in the NT in the phrase *apó/pró katabolês kósmou*, "from/before the foundation of the world." (The only other appearance of this NT term is in the expression *eis katabolḗn spérmatos*, a technical term for the "casting or sowing of seed" [see *TDNT*, III, 621], in He. 11:11 [RSV "conceive"].) In most cases the phrase *apó/pró katabolês kósmou* has a temporal sense, and usually occurs within the context of salvation-history (Mt. 13:35; here *katabolḗ* is used absolutely without *kósmou* in B while the other codices have *kósmou*; see Aland, p. 50; Metzger, pp. 33f.; Lk. 11:50; He. 4:3; 9:26). Rev. 13:8 and 17:8 refer to those dwellers of earth "whose names have not been written in the book of life from the foundation of the world." These passages together with Mt. 25:34 stress the eternal verity of God's salvation plan. The pretemporal existence of God's love for Jesus (Jn. 17:24), His pretemporal election (1 Pet. 1:20), and as well the pretemporal election of believers in Christ (Eph. 1:4), are all expressed by the same phrase, *pró katabolês kósmou*.

FOUNDATION, GATE OF [Heb. *šaʿar haysôḏ*] (2 Ch. 23:5). A gate in Jerusalem mentioned in connection with the plot to assassinate Athaliah. Exactly what gate is meant is problematic since the LXX has "middle [Gk. *mésos*] gate" (cf. Jer. 39:3) instead of "foundation," and the parallel passage in 2 K. 11:6 reads "the gate Sur" (Heb. *šaʿar sûr*).

FOUNDER (AV Jgs. 17:4; Jer. 6:29; 10:9, 14; 51:17). *See* GOLDSMITH; SILVERSMITH.

FOUNTAIN [Heb. *ʾāpîq*] (Ezk. 34:13); AV RIVER; NEB STREAM; [*mabbû(a)ʿ*] (Eccl. 12:6); NEB SPRING; [*maʿyân*] (e.g., Gen. 7:11; 8:2; Cant. 4:12, 15); NEB also SPRING, WELL; [*māqôr*]; AV also SPRING, WELL, WELL SPRING; NEB also ASSEMBLE, DISCHARGE, SPRING, WATERS, WELL; [*ʿayin*–'eye'] (Dt. 8:7; 33:28; 1 S. 29:1; Neh. 2:14; 3:15; 12:37; Prov. 8:28); NEB also SPRING, TRIBE, EN-HAROD; [Gk. *pēgḗ*] (Rev. 8:10; 14:7; 16:4; 21:6); NEB also SPRING, WATER-SPRING.

These OT and NT terms for a spring or source of water are used in various figurative senses. In eschatological visions a fountain is given as a sign of the Lord's favor (Isa. 41:18; Joel 3:18 [MT 4:18]), while dry fountains are described as a sign of His disapproval. The term *māqôr* is used in a variety of ways. (1) It is used for the source of a woman's menstrual discharge (Lev. 20:18). (2) It is also used for the source of life (Ps. 36:9 [MT 10]; Prov. 5:18), the mouth of the righteous (Prov. 10:11), the teaching of the wise (Prov. 13:14), the fear of the Lord (14:27), and wisdom (16:22; 18:4). (3) The Lord is called the fountain of Israel (Ps. 68:26 [MT 27]) and of living waters (Jer. 2:13; 17:13). (4) The eyes are a fountain of tears (Jer. 9:1). (5) The righteous giving way to the wicked is like a polluted fountain (Prov. 25:26); and (6) a source of true cleansing will become available in the final days (Zec. 13:1).

In 1 S. 29:1 the NEB, following the LXX reading *Aendōr*, renders "En-harod." In Dt. 33:28 "fountain of Jacob" means Jacob's descendants (cf. NEB "tribe").

For "fountains of the . . . deep" (Gen. 7:11) *see* FLOOD (GENESIS) I.C. J. R. PRICE

FOUNTAIN GATE. *See* JERUSALEM VI.

FOUR; FOUR HUNDRED; FOUR THOUSAND; FOURTEEN; FOURTH PART. *See* NUMBER.

FOURFOLD [Heb. *'arba'tāyim* (2 S. 12:6); Gk. *tetraploún* (Lk. 19:8)]. Fourfold the amount stolen was the restoration that Roman law required of a thief. This was the extreme penalty the Jewish law imposed for destructive robbery (Ex. 22:1 [MT 21:37]). In some cases double the amount was to be restored (Ex. 22:4,7 [MT 3,6]); in others, a fifth of its value was added to the thing restored (Lev. 6:5 [MT 5:24]).

FOURSCORE [Heb. *šᵉmōnîm*; Gk. *ogdoékonta*] (Ps. 90:10). In modern versions, as in Hebrew and Greek, simply "eighty."

FOURSQUARE [pual part. of Heb. *rbᶜ* (Ezk. 40:47); Gk. *tetrágōnos* (Rev. 21:16)]. Foursquare, meaning equal in length and breadth, is derived in both Hebrew and Greek from the word "four," i.e., having four equal sides. In some modern translations, e.g., NEB, "foursquare" has become, following contemporary usage, simply "square."

FOWL [Heb. *'ôp, ṣippôr, barburîm*]. Since the 16th cent. the word "fowl" has undergone a change in meaning. Then it meant any winged animal, domesticated or wild. Since then its meaning has been restricted to domesticated birds, and "birds" replaced "fowls." Accordingly, the RSV has retained only three of the eighty-five AV references to "fowls" and translated most other instances as "birds." The RSV also uses "winged insect," "winged things" (Dt. 14:20; Ps. 78:27), or "birds of prey" (e.g., Gen. 15:11; Job 28:7; Isa. 18:6; *see* BIRDS OF PREY) for AV "fowl."

It is not certain when the domesticated bird was introduced into Palestine. The "fatted fowl" (Heb. *barburîm ᵃbûsîm*) of 1 K. 4:23 (MT 5:3) has been a subject of much debate but with little conclusive evidence (cf. J. Gray, comm. on Kings [*OTL*, 2nd rev. ed. 1970], p. 143). These birds could have been guineas or pigeons. The young of ostriches were delicious food, and no doubt when Solomon's ships brought peafowl they also brought word that they were a delicacy for a king's table. The domesticated fowl were not common early in Palestine, but they may have been brought by Solomon with other imports from the East.

A housemaid brings a fowl to the cook and baker in a reconstruction of Egyptian wall paintings (Royal Ontario Museum, Toronto)

If this is a plausible assumption, then the RSV "fowls" (Heb. *ṣippôr*, < *ṣāpar*, "twitter, chirp") in Neh. 5:18 is an appropriate rendering. According to this translation (cf. NEB "fowls") fowl was part of the Jews' diet while Nehemiah was governor (*ca.* 430 B.C.). Lev. 7:26 forbids the eating of the blood of fowls or animals, probably because the life of the animal was thought to be (symbol-

W. L. WALKER R. W. V.

FOWL, FATTED [Heb. *barburîm* *ʾᵃbûsîm*] (1 K. 4:23). *See* BIRDS IV; FOWL.

FOWLER foul'ər [Heb. *yāqôš, yāqûš, yôqēš*]. A bird-catcher. The fowler was very common in the ancient Near East. In Egypt, e.g., "fowling was one of the great amusements of all classes" (J. G. Wilkinson, *Manners and Customs of the Ancient Egyptians* [rev. ed. 1878], I, 234); and in Israel there were both professionals and amateurs. The fowlers supplied the demand for birds used as caged pets, in sacrifice, and for food.

Many methods of birdcatching were used; one was the bow and sling; the net, of which there were at least four kinds, was probably the most common (Prov. 1:17; Hos. 7:12; Ezk. 12:13; 17:20; 32:3). In addition there were snares, also very common; springy twigs; clap-boards; and decoy birds (cf. Sir. 11:30, "like a decoy partridge in a cage, so is the mind of a proud man"), whose cry attracted others, which were then caught with the aid of birdlime, a sticky substance smeared on a stick to which the birds adhered. Another common piece of equipment was the throwstick. This was a small piece of wood thrown at the legs of birds; it was especially effective when thrown into flocks of ground birds. Jeremiah mentions the crates into which birds were put (5:27).

The five references to the fowler in the OT have a metaphorical sense. Deliverance from evil plans is promised (Ps. 91:3); the joy of the freed person is compared to the delight of the escaped bird (Ps. 124:7). A man must free himself from a pledge to a neighbor just as the bird struggles to escape from the snare of the fowler (Prov. 6:5). The work of wicked men in ensnaring their fellows is compared to the work of the fowler (Jer. 5:26); the prophet is in constant danger of being trapped: "a fowler's snare is on all his ways" (Hos. 9:8).

See also HUNTING. J. A. BALCHIN

FOX [Heb. *šûʿāl*; cf. Arab. *thaʿlab* (Jgs. 15:4; Neh. 4:3; Cant. 2:15; Ezk. 13:4); Gk. *alōpēx* (Mt. 8:20; Lk. 9:58; 13:32)]; NEB also JACKAL. In Ps. 63:10 (MT 11) and Lam. 5:18 the RSV and NEB read "jackal" for Heb. *šûʿāl* (AV "fox"); it is probable that "jackals" should also be used in Jgs. 15:4, since they were much more common than foxes.

In Cant. 2:15 there is an allusion to the fondness of the fox for grapes, while Mt. 8:20; Lk. 9:58 indicate the preference of the *Canidae* for a burrow as a lair. If they do not actually excavate these themselves, they will often take over the burrow of another animal such as the badger. The use of "fox" in reference to Herod (Lk. 13:32) indicated his low cunning and comparative worthlessness (cf. Neh. 4:3 for the insignificance of this animal). Ezekiel compared Israel's prophets to foxes; they care for themselves but show little concern for Israel's relation to God (13:4f.).

R. K. H.

FRACTURE [Heb. *šeḇer*] (Lev. 24:20); AV BREACH. The Hebrew noun comes from the verb *šāḇar*, to "break"; cf. "injury," Lev. 21:19. The law of personal retribution for both the native Israelite and the resident alien was to be the *lex talionis*. The loss of a tooth or the breaking of an arm, e.g., would be punished, respectively, by the loss of a tooth or a fractured arm in the body of the assailant — no less and also no more.

FRAGMENTS. The term "fragments" occurs four times in the RSV. In Isa. 30:14 the plural of Heb. *mᵉḳittâ* (a hapax legomenon) denotes the smashed pieces of an earthenware jar, collectively a symbol of effective divine judgment. The cognate verb (a form of which also occurs in this

A fowler hidden by a blind tugs a rope to trap marsh birds in a cagelike net. Relief from the tomb of Kagemni (6th Dynasty, 2350-2200 B.C.) at Saqqârah (Service des musées, Cairo; picture Lehnert and Landrock)

verse), is *kāṭaṭ*, "beat, smash." Again in Am. 6:11 divine judgment is symbolized by destruction; in this instance the picture is of houses reduced (perhaps by earthquake) to rubble, regardless of their size. The translation of *r^{e}sîsîm* is not entirely certain, but it is usually rendered "fragments" in the light of postbiblical Heb. *rāsas*, meaning "break." Earthquake imagery is reinforced by the fact that *r^{e}sîsîm* stands in poetic parallelism with *b^{e}qî'îm*, "cracks, fissures" (AV "breaches"; cf. Isa. 22:9).

In the NT the plural of Gk. *klásma*, "fragment, piece, crumb (of bread)," occurs twice in John's narration of the feeding of the five thousand (6:12f.). In the Synoptic parallels *klásma* is consistently translated as "broken pieces" (Mt. 14:20 par.; cf. Mt. 15:37 par.). (In the LXX of Ezk. 13:19 *klásma* also refers to scraps of bread.) The cognate noun *klásis* (Lk. 24:35; Acts 2:42) and the cognate verb *kláō* are likewise used in the NT only for the breaking of bread. The custom in the ancient Near East was not to cut bread for eating but to break it into pieces. It is significant that *klásma* is the term used in Did. 9:3f. for the eucharistic bread. (For a detailed comparison of the Didache's eucharistic prayer over the bread and the Johannine feeding narrative, see C. F. D. Moule, *JTS*, 6 [1955], 240-43.)

See also BREAD V.

See *TDNT*, III, *s.v.* κλάω (Behm). D. G. BURKE

FRAGRANCE [Heb. *rê(a)ḥ*] (Cant. 1:12; 2:13; 4:10; 7:13; Hos. 14:6); AV SMELL; NEB SCENT, SWEETER, PERFUME, FRAGRANT; [*beśem*] (Cant. 4:16; 5:13); AV SPICES; NEB PERFUMES; [*zēḵer*–'mention, memorial'] (Hos. 14:7); AV SCENT; NEB "be famous as"; [*'^{a}ḇāqâ*] ("fragrant powders," Cant. 3:6); [Gk. *osmḗ*] (Jn. 12:3; 2 Cor. 2:14, 16); AV ODOUR, SAVOUR; **FRAGRANT INCENSE** [Heb. *q^{e}ṭōreṭ sammîm*] (e.g., Ex. 25:6; 30:7; Lev. 4:7; Nu. 4:16); AV SWEET INCENSE; **FRAGRANT** [Gk. *euodía*] (Eph. 5:2; Phil. 4:18). AV SWEET-SMELLING, ODOUR. The RSV and NEB supply "fragrant" in Ps. 45:8 (MT 9) (AV "smell"). The difficult text of Cant. 1:3a is perhaps best understood as parallel to v. 2b: "For your love is better than wine, (better) than the fragrance [*rē(a)ḥ*] of your precious oil" (see M. Pope, comm. on Cant. [*AB*, 1977], *in loc.*; cf. NEB mg.).

Egyptian ladies present fragrant incense in a relief from the tomb of Meserhat, high priest under Thutmose I (*ca.* 1526-1512 B.C.) (Service des musées, Cairo; picture Lehnert and Landrock)

The love of the lover and the beloved in Canticles makes them sensitive to the fragrance of the flowers of the garden (2:13; 7:13) and of the oils they are wearing (1:12; 4:10) to the extent that the beloved is perceived in metaphors of fragrance. Likewise, when the Lord promises to heal the faithlessness of Israel, the resultant fellowship between the Lord and His people will be as a pleasant garden (Hos. 14:6f.). In the NT the love and adoration of Mary for the Lord Jesus is symbolized in the aroma of costly ointment that filled the house (Jn. 12:3). Paul's reference (2 Cor. 2:14, 16), however, is not to the fragrance of love but to the odor of incense burned by the priests in the triumphal procession of a conqueror, an odor that was highly agreeable to the victors but full of foreboding to the captives (*see* TRIUMPH).

Fragrant incense was manufactured by blending stacte, onycha, galbanum, frankincense, and a seasoning of salt (Ex. 30:34-38). Used for sacred purposes only, it was to be burned on the altar located before the curtain veiling the holy of holies.

G. WYPER

FRAME. Several different and unrelated Hebrew words are rendered by the word "frame" in the RSV.

(1) [Heb. *qereš*] (e.g., Ex. 26:15-29; 35:11; 36:20-34); AV also BOARD; NEB PLANK. The individual vertical panels of the wooden framework over which the curtains of the tabernacle were spread. Scholarly opinion is divided as to whether the *q^{e}rāšîm* were open framelike panels that would make the inner curtain visible from within the tent (reflected in the RSV's translation) or solid boards or planks (reflected in the translation of the AV and NEB). *See* TABERNACLE.

(2) [Heb. *misgereṭ*] (Ex. 25:25, 27; 37:12, 14; 2 K. 16:17); AV BORDER; NEB RIM, etc. A brace that gave support to the legs of the table for the bread of the Presence. According to the representation of the table taken from Herod's temple on the Arch of Titus in Rome, the frame was located about halfway between the top and bottom of the legs. In 2 K. 16:17 *misgereṭ* refers to a cross section of the stands that support the lavers in the temple (*see* LAVER).

(3) [Heb. *šălāḇ*–'cross-bar'] (1 K. 7:28); AV LEDGES. The cross sections of the stands that support the lavers in the temple.

(4) [Heb. *šeqep*, *š^{e}qûp*] (1 K. 6:4; 7:4); AV LIGHT, WINDOW; NEB also EMBRASURES. The enclosing framework of windows and doors.

(5) [Heb. *môṭ*] (Nu. 4:10, 12); AV BAR; NEB POLE. The apparatus for carrying the lamps and utensils of the tabernacle.

(6) [Heb. *'ēreḵ*] (Job 41:12 [MT 4]); AV PROPORTION; [*'eṣem*] (Ps. 139:15); AV SUBSTANCE; NEB BODY; [*yēṣer*] (Ps. 103:14); NEB "how we were made." In these passages "frame" refers to the human body.

(7) [Heb. *yāṣar*] (Ps. 94:20); NEB CONTRIVE; [*ṣāmaḏ*] (Ps. 50:19); NEB HARNESS. As a verb, "frame" is used figuratively. In Ps. 94:20, the wicked rulers frame mischief by statute, and in Ps. 50:19, the tongue of the wicked is said to frame deceit. E. W. CONRAD

FRANKINCENSE [Heb. *lᵉḇōnâ*; Gk. *líbanos* (Mt. 2:11; Rev. 18:13)]; AV, NEB, also INCENSE. A substance referred to in, e.g., Ex. 30:34; Lev. 2:1f., 15f.; Neh. 13:5, 9; Isa. 66:3. The Hebrew term, from a root meaning "whiteness," refers to the milky color of the fresh juice. The English term comes from the Old French *franc encens*, "pure incense."

The references are to the true frankincense, derived from three species of the genus *Boswellia: B. carterii, B. papyrifera*, and *B. thurifera*. These trees grow in southern Arabia, India, and elsewhere and are related to the terebinth and the shrubs yielding balsam and myrrh. The gum is exuded from the incised bark in pale glittering drops. It is bitter in flavor and has a strong balsamic odor when heated. It was highly valued by the Egyptians for fumigation and embalming and was used ceremonially among the Hebrews. A refined variety was presented with the showbread (Lev. 24:7). It was often associated with myrrh (Cant. 3:6; 4:6) and was offered to the infant Jesus (Mt. 2:11).

See also INCENSE. R. K. H.

FRANKLY. Occurs once in the AV in the archaic sense of "freely," "graciously," as a partial translation of Gk. *charízomai*, "forgive" (Lk. 7:42, NEB "let off," NIV "cancel the debt").

FRAUD [Heb. *mirmâ*] (Ps. 55:11 [MT 12]; Zeph. 1:9); AV GUILE, DECEIT; NEB also SPITE; [Gk. *plánē*–'wandering'] (Mt. 27:64); AV ERROR; NEB DECEPTION; [*aposteréō*] (Jas. 5:4); NEB "(wages) never paid"; **DEFRAUD** [Heb. *ʿāšaq*] (1 S. 12:3f.); NEB WRONGED; [Gk. *aposteréō*] (Mk. 10:19; 1 Cor. 6:7f.); NEB ROB; [Gk. *sykophantéō*] (Lk. 19:8); AV FALSE ACCUSATION; NEB CHEATED. An act of deceit, treachery, extortion, or robbery in which something is taken unjustly from someone to whom it rightfully belongs.

Fraud was a sin with which Samuel as judge could not be charged (1 S. 12:3f.); but this was one of the sins for which the prophets later — under the kings — arraigned Israel (Zeph. 1:9). Paul charged the Corinthian Christians with defrauding even their own Christian brothers; and James accused the rich of robbing the workers of their wages. Zacchaeus promised to restore fourfold for any extortion of which he was guilty (Lk. 19:8). The term *plánē* is used in the Epistles especially of the error or delusion of the ungodly, in radical contrast to the truth of God (cf. Rom. 1:27; Eph. 4:14; 2 Thess. 2:11; 2 Pet. 2:18; 1 Jn. 4:6; *see* ERR, ERROR). R. J. HUGHES, III

FRAY. The AV translation of the hiphil of Heb. *ḥārad*, "make afraid," in the archaic sense of "scare, frighten away" (Dt. 28:26; Jer. 7:33; Zec. 1:21 [MT 2:4]; cf. RSV "frighten," "terrify").

FRECKLED SPOT (Lev. 13:39, AV). *See* DISEASE III.I; TETTER.

FREE; FREEDOM. *See* CHOOSE; LIBERTY; WILL OF GOD.

FREE WOMAN [Gk. *eleuthéra*] (Gal. 4:22f., 30f.); NEB also FREEBORN WIFE. In vv. 22f., 30 it refers to Sarah, the free woman and true wife of Abraham, in contrast with Hagar, the Egyptian slave who became his concubine (Gen. 16:1-6). In v. 31 the term is applied metaphorically to the Christians who are the children of the promise, of freedom, of the spirit, the children of the free woman, in contrast with the Jews who are the children of the letter, of bondage, of the slave woman.

FREEDMAN [Gk. *apeleútheros*] (1 Cor. 7:22). The Greek term, denoting one who was born a slave and has received freedom, is used only once in the NT. The freedom referred to here is spiritual freedom: he who was in bondage to sin has been presented with spiritual freedom by the Lord. This new freedom does not involve autonomy, however, but slavery to one's Lord (v. 22b).

See also LIBERTY; SLAVE.

FREEDMEN, SYNAGOGUE OF THE. According to Acts 6:9, Stephen incurred hostility from different groups, including members of a "synagogue of freedmen." The Greek word *libertînos* is Luke's transliteration of the Latin *libertinus*, which in turn appears in the older English versions as "libertine." The loanword means people who had been manumitted (Chantraine, p. 1 n. 2).

It was customary in antiquity for people of similar backgrounds and interests to form clubs or associations, often with a component of religious ceremony. The so-called synagogue of freedmen might well have owed its origin to Jews who had been taken as prisoners of war to Rome in the time of Pompey (63 B.C.). After their liberation they formed a colony on the banks of the Tiber (Philo *De legatione ad Gaium* 155). Tacitus relates that the Senate decreed (A.D. 19) that a number of Jewish freedmen should be transported to Sardinia and that the rest should leave Italy, unless they renounced, before a certain day, their profane customs (*Ann.* ii.85; cf. Josephus *Ant.* xvii.3.5; *HJP* II/2, 275f.). Many would naturally have sought refuge in Jerusalem and formed a synagogue there. Deissmann, however, correctly cautions against ready identification of the meeting place of this group with the building referred to in an inscription predating A.D. 70 (*LAE*, pp. 439-441; cf. *BC*, IV, 67f.). Similarly, Jackson and Lake (*BC*, IV, 67) reject G. B. de Rossi's attempt to interpret *CIL*, IV, 117 as a reference to an alleged synagogue of freedmen in Pompeii.

In large commercial and religious centers it was not uncommon for tradespeople to form or join associations that catered to citizens of specific cities, such as Cyrene and Alexandria (cf. Poland, *passim*). Memberships might range from a dozen to thirty or more, and it is highly probable that Luke means to designate the Cyrenians and Alexandrians as constituting two other synagogues (on Jews in Cyrene, cf. *HJP* II/2, 245f.; Safrai-Stern, I, 487-89; on Alexandrian Jews, cf. *HJP* II/2, 226-230; *HJP*² II, 445 n. 80).

Linguistic considerations also substantiate the foregoing interpretation. Throughout his twofold work Luke is at pains to avoid terms that require translation. Apart from Acts 4:36 (Barnabas = Son of Exhortation) and 13:8 (on the significance of Elymas' function in the narrative), 6:9 contains the only instance of Luke's overt concern over a foreign term. Precisely because the synagogue in question bore a Latin name, Luke did not use the Greek term *apeleútheros*; he alerted his auditors to the datum by using the qualification *legoménē* ("as it is termed"). Also, the application, for the sake of brevity, of the term *synagōgḗ* to two more groups, Cyrenians and Alexandrians, would have been quite acceptable. Indeed, the addition of a qualifying phrase, e.g., "and synagogues of," could have been taken as an insult to his auditors' intelligence. Moreover, in the three other instances in Acts (11:20; 15:24; 17:4),

Luke's use of *tines ek* consistently refers to defined groups. Conversely, Luke's use of the phrase *tines (tōn) apó . . .*, which occurs only two other times in Acts in connection with geographical point of origin (10:23; 24:19), suggests that in 6:9b Luke thought primarily of people's shift in locale rather than of societal factors. In brief, the people from Cilicia and Asia sympathized with the members of the aforementioned synagogues.

Luke's overall literary interests are a primary factor in his choice of geographical terms at 6:9. In a general way he displays Stephen as a victim of international hostility from followers of Moses. The specific reference to Cyrene anticipates 11:20 and 13:1, which show the reversal of the attitude cited at 6:9. Similarly 18:24 displays Apollos as a converted Jew from Alexandria. Since Tarsus was the capital of Cilicia, with a large Jewish population, Luke's reference to the province would provide a backdrop for Paul's emphasis on his Jewishness (22:3; on the Jewish population, cf. Ramsay, 169-186). Despite the hostility generated in "Asia," 19:10 informs Luke's public that Jews and non-Jews of all Asia are hearing God's word (on Asian Jews, cf. *HJP* II/2, 226).

The exegetical literature on Acts 6:9 has, in general, failed to give adequate consideration to the literary and linguistic-semantic factors, and commentators for the most part ignore epigraphical evidence, as cited by Poland (cf. pp. 115, 125, 130f.), relating to clubs and associations (but see *HJP* II/2, 244-251). Among the older commentators, Calvin concluded that Luke referred to one synagogue (so also Beza, Bengel, and later Haenchen and Conzelmann); Wendt and Zahn, followed by Strathmann, allotted one to the three mentioned in v. 9a and one to the Cilicians and Asians; Alford apportioned three: one to the Freedmen, one to the Cyrenians and Alexandrians, and one to the Cilicians and Asians; B. Weiss, and Schürer (*HJP*^{2}, II, 76, 428. n. 8), designated five. In view of Luke's carefully chosen diction and syntax, Beza's conjectural emendation *Libystinōn,* with support from an Armenian catena (on Chrysostom's authority, Goodspeed, p. 128), is to be rejected (cf. Jackson and Lake, *BC,* III, 58).

F. W. DANKER

FREELY. The term occurs in three senses.

(1) The obsolete sense of "gratis, for nothing," in the AV of Nu. 11:5 (Heb. *ḥinnām*); Mt. 10:8 (Gk. *dōréan*); Rom. 3:24; 2 Cor. 11:7; Rev. 21:6; 22:17.

(2) "Willingly, spontaneously" for Heb. *nāḏaḇ* ("volunteer, offer voluntarily") in 1 Ch. 29:9, 17; Ezr. 1:6; 7:13, 15; Ps. 110:3; *nᵉḏāḇâ* ("voluntary gift") in Hos. 14:4.

(3) "Without hindrance or restraint" in Gen. 2:16 and 1 S. 14:30 ("eat freely," Heb. *'āḵōl 'āḵal*); Dt. 15:10 ("give freely," Heb. *nāṯōn nāṯan*); 1 Ch. 12:1 ("not move about freely," Heb. *'āṣar*); Ps. 112:9 and Prov. 11:24 ("distribute or give freely," Heb. *pāzar*); Mk. 1:45 ("talk freely," Gk. *kēryssō pollá*); Jn. 2:10 ("drink freely," Gk. *methýō*); Acts 26:26 ("speak freely," Gk. *parrhēsiázomai*); Eph. 1:6 ("freely bestow," Gk. *charitóō*). W. L. WALKER

FREEWILL OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT.

FRESH. Several OT and NT terms are rendered "fresh": Heb. *laḥ*–'moist,' 'green' (Gen. 30:37; Nu. 6:3; Jgs. 16:7f.), *karmel*–'fresh grain' (Lev. 2:14; 23:14; 2 K. 4:42), *ṭārî* (Jgs. 15:15), *ḥāḏāš*–'new' (Job 29:20), *raʿᵃnān* (Ps. 92:10 [MT 11]), *ṭārāp*–'newly plucked' (Ezk. 17:9), *rāpā'*–'restore,' 'make drinkable' (Ezk. 47:8f., 11); Gk. *néos*–'new' (Mt. 9:17 par.; 1 Cor. 5:7), *glykýs*–'sweet' (Jas. 3:11f.). In Job 33:25 Heb. *ruṭᵃpaš* is a hapax legomenon; the RSV emends the MT to read *yirṭaḇ*. The term "fresh" does not represent any specific Hebrew word in Job 10:17; Isa. 29:19; Jer. 6:7; and Ezk. 47:12.

FRESHETS [Heb. *'ᵃpîq nᵉḥālîm*] (Job 6:15); AV "stream of brooks"; NEB "channel of streams." Job tells his friends that they have been as treacherous as the flash floods that sweep down the normally dry wadis after the snow has melted on the mountains, and as faithless as such a torrent, which vanishes when it is most needed (cf. Jer. 15:18).

FRET. The term comes from the Old English *fretan,* "devour." The RSV uses it only in the sense of "being vexed or agitated" for the hithpael of Heb. *ḥārâ* in Ps. 37:1, 7f.; Prov. 24:19. "Fretful" (*kaʿas*) occurs in the sense of "irritable" in Prov. 21:19. The AV uses "fretting" in the sense of "eating away, consuming" (*māʾar,* "be sharp, painful") of leprosy in Lev. 13:51f.; 14:44.

FRIEND [Heb. *'ōhēḇ, 'allup, mᵉyuddāʿ, mōdāʿ* (Prov. 7:4), *mērēʿ, rē(a)ʿ, rēʿeh, rēʿâ, rōʿeh, 'îš šālôm, šōlēm, mᵉṭê sôḏ* ("intimate friends," Job 19:19), *yakkîr* ("they are friends," Job 24:17), *'ᵉnôš šᵉlômî* ("my familiar friends," Jer. 20:10), *'anšê šᵉlōmekā* ("your trusted friends," Jer. 38:22; Ob. 7); Gk. *hetaíros, phílos, 'ísthi eunoōn* ("make friends," Mt. 5:25), *toús soús* ("your friends," Mk. 5:19), *toús idíous* ("their friends," Acts 4:23), *tōn idíōn autoú* ("his friends," Acts 24:33)]; AV also COMPANION, "him that was at peace with me" (Ps. 7:4 [MT 5]; 55:20 [MT 21]), NEIGHBOR, "consentedst," (Ps. 50:18), ACQUAINTANCE, etc.; NEB also "another" (Ex. 33:11), "him" (2 S. 16:17), DARLING (Cant. 5:16), etc.; **FRIENDLY** [Heb. *šᵉlēmîm* (Gen. 34:21); Gk. *met' eirḗnēs* (Heb. 11:31)]; AV PEACEABLE (Gen. 34:21); WITH PEACE (He. 11:31); NEB KINDLY (He. 11:31); **FRIENDSHIP** [Heb. *šālôm* (1 Ch. 12:17 [MT 18]), *sôḏ* (Job 29:4; Ps. 25:14), *rāʿāʿ* (Prov. 22:24); Gk. *philía* (Jas. 4:4)]; AV also PEACEABLY (1 Ch. 12:17), "secret" (Job 29:4; Ps. 25:14); NEB also FRIENDS (1 Ch. 12:17), "protected" (Job 29:4), "confides his purposes" (Ps. 25:14); **COMPANION** [Heb. *'aḥ*] (Jer. 41:8), *'allup, ḥāḇēr, mērēʿ, rē(a)ʿ, rāʿâ* (Ex. 32:27; Jgs. 14:20; 15:2, 6; Job 30:29, etc.); Gk. *synékdēmos* (Acts 19:29)]; AV also GUIDE (Ps. 55:13 [MT 14]; Prov. 2:17), FELLOWS (Jgs. 11:37), FRIENDS (Ps. 38:11 [MT 12]), etc.; NEB also FRIEND (Ex. 32:27; Jgs. 14:20; Ps. 88:8 [MT 9], Cant. 8:13), GROOMSMAN (Jgs. 15:2, 6), COMRADE (Ps. 55:13 [MT 14]), etc.

The semantic notion of "friend" includes a commitment, whether in business (e.g., Mt. 20:13) or marriage (e.g., Mal. 2:14). Thus "friend" has a broad semantic range, from casual acquaintance to the most intimate of personal relationships.

1. OT.–A. Characteristics. Central to the idea of "friendship" is loyalty. Through both good and bad times of life, friends are bound together (Job 17:5; Ps. 122:8; Prov. 16:28; 17:17; 18:24). This loyalty bridges even the generation gap, as Abner pointed out to Ishbosheth (2 S. 3:8; cf. Prov. 27:10). Because of this loyalty, one does not slander or otherwise harm a friend (Ps. 7:4; 15:3). It is just this characteristic that caused Absalom to suspect Hushai, a known "friend" of David (2 S. 16:16f.; *see* FRIEND OF THE

KING) and that motivated Hushai to act as David's spy (2 S. 15:32ff.). Job's loyalty to his friends enabled him to intercede for them in the end (42:8f.).

Concomitant with this loyalty is the sharing or participation that marks a friendship. Judah's friend Hirah traveled with him (Gen. 38:12), and then went to Tamar for the exchange of payment for pledge (38:20). Perhaps primarily because of loyalty, when a king was overthrown, his family and friends shared his fate (1 K. 16:11; 2 K. 10:11; Jer. 41:8; cf. Jer. 6:21; 20:4, 6). Daniel and his friends were to share the fate of their colleagues (Dnl. 2:13, 18); when Daniel mollified Nebuchadnezzar, all the wise men received a reprieve and Daniel shared his prominence with his three friends (Dnl. 2:48f.). Similarly Haman rejoiced with his friends over his apparent success (Est. 5:10), the lover called his friends to feast with him (Cant. 5:1), the royal bride was accompanied by her friends (Ps. 45:14 [MT 15]), and David shared the spoils of war (1 S. 30:26). Sharing the burden of grief is also common (Jgs. 11:37f.; Job 2:11ff.).

These ideas of loyalty and sharing are underlined in several texts which link friendship with covenant (Ps. 25:14; 55:20; Prov. 2:17; Mal. 2:14); hence the seriousness with which the betrayal of friendship is treated (Ps. 88:18 [MT 19]; Jer. 20:10; Ob. 7, etc.). Job frequently accused his friends of breaking their covenant of friendship by laughing at him (12:4), scorning him (16:20), failing him (19:14), and abhorring him (19:19). Proverbs contains several warnings about friends, because those who appear friendly may not turn out to be so (13:20; 22:24; 28:7; cf. Ex. 32:27; Dt. 13:6 [MT 7]; Mic. 7:5). This is especially true when wealth is either abundant or lacking (Prov. 14:20; 19:4, 6f.).

B. Special Classes. The "king's friend" was apparently an official in the royal court acting in some advisory capacity (e.g., 2 S. 15:37; 1 K. 4:5; 1 Ch. 27:33; *see* FRIEND OF THE KING).

For a select few (at least in preexilic times) another title was reserved — "friend of God." Moses was implicitly so called (Ex. 33:4), and Abraham was so designated (2 Ch. 20:7; Isa. 41:8), especially by later generations (2 Esd. 3:14f.; Jub. 19:9; Jas. 2:23). Job lamented the loss of the "friendship of God" (29:4). In more general terms God's friends are contrasted with His enemies (Jgs. 5:31) and Jeremiah quoted the nation calling itself God's friend (3:4). A similar generalization occurs in later Jewish literature (e.g., Wisd. 7:27, Philo, *Quis rerum divinarum heres* 21; *Quod omnis probus liber sit* 42).

C. Examples. Classic examples of friendship in the OT are David and Jonathan's (2 S. 1:26; cf. 1 S. 18:1; Mish. *Aboth* v. 19) and Ruth and Naomi's. Ruth's famous statement of commitment to Naomi epitomizes the depth of their relationship: ". . . where you go I will go, and where you lodge I will lodge; your people shall be my people, and your God my God; where you die I will die, and there will I be buried. May the Lord do so to me and more also if even death parts me from you" (Ruth 1:16f.).

D. Problem Texts. Four passages require brief comment. In Ruth 4:1 the RSV translates *pᵉlōnî 'almōnî* as "friend," but AV "such a one" and NEB "calling him by name" more accurately express the indefiniteness intended by the Hebrew phrase. In Ps. 55:20 the RSV unaccountably supplies "my companion"; NEB "such men" is slightly better, and AV "he" is most accurate. Prov. 27:6 makes little sense as it stands, but the contrast seems to be between a friend who faithfully speaks the truth, though it hurts, and one who appears friendly but really is an enemy (cf. the AV. NEB). Jer. 13:21 is a notoriously difficult passage (J. Bright, *Jeremiah* [*AB*, 1965], p. 95, does not attempt to make sense of it, but simply refers his readers to the other commentaries), but the sense seems to be one of betrayal, or at least a reversal in authority — one's former pupil now rules over his teacher; a further complication is that *'allupîm*, RSV "friends," may mean "chiefs"; cf. AV "captains," NEB "leaders."

II. NT.–A. Characteristics. The same characteristics outlined above may be seen here. Loyalty motivated Paul's friends to visit him in prison (Acts 24:23) and to voice concern for his safety (Acts 19:31). James stresses that God demands loyal friends — friendship with the world means enmity with God (4:4). Friends share their joy (Lk. 15:6, 9, 29; Jn. 3:29), their faith and experiences (Mk. 5:19; Acts 4:23; 10:24), as well as care for each other (Lk. 11:6; Acts 27:3). When they share a common experience, even enemies can become friends (Lk. 23:12); Jesus seemed to recognize this possibility when He exhorted His followers to "make friends quickly" to avoid jail (Mt. 5:25). Friends are entrusted with important errands (Lk. 7:6). Jesus also warned about betrayal by friends (Lk. 21:26).

B. Special Classes. In several passages Jesus used "friend" as an introductory greeting which appears to be casual; however, there may be a deeper significance to this use. In Mt. 20:13; 22:12; 26:50, W. F. Albright and C. S. Mann (*Matthew* [*AB*, 1971], p. 237) see an implied rebuke to the one so addressed; there seems at least to be a reminder of the mutual obligation that exists between the parties involved. "Friend" has similar connotations in Lukan parables (11:5ff.; cf. 14:10).

There is also mention of the "friend of Caesar" (Jn. 19:12), an official title that A. Deissman (*LAE*, pp. 377f.) traces back to Alexander's time. Echoes of this title also occur in intertestamental literature (1 Macc. 2:18; 3:38; 10:65; cf. Spicq, III, 167).

"Friends" (Gk. *philoi*) apparently took on the special sense of "Christians" later in the 1st cent.; thus John concluded his third epistle: "The friends greet you. Greet the friends, every one of them" (v. 15; Stählin, *TDNT*, IX, 162f., 166, observes a similar tendency in Luke). It may be that such use was based on Jesus' own declarations to His followers, especially as recorded by John (15:13ff.; cf. Mt. 11:19; Lk. 7:34; 12:4).

C. Examples. Two great examples of friendship in the NT are Jesus and Lazarus's, and Paul and Timothy's. Jesus' love for Lazarus and his sisters is repeatedly mentioned (Jn. 11:3, 5, 36); it is in this context that the Bible's shortest and very powerful verse — "Jesus wept" — dramatizes Jesus' love for His friend (Jn. 11:35). The relationship between Paul and Timothy is like that of father and son (1 Tim. 1:2, 18; 2 Tim. 1:2; 2:1; 1 Cor. 4:17; Phil. 2:22), and the personal notes scattered throughout Paul's epistles indicate the depth of their relationship (e.g., 1 Cor. 16:10; 2 Cor. 1:19; Rom. 16:21; Phil. 2:19ff.).

D. Problem Texts. Two texts in Luke seem on the surface to be problematic. In 14:12 Jesus exhorted His followers not to invite friends and relatives to a banquet. But consideration of the context and of the verb "invite" clarifies Jesus' meaning: do not keep inviting only your friends and relatives, who you know will repay the favor. In 16:9 Jesus seemed to advocate buying friendship; but again the context makes clear that Jesus was telling His followers to make good use of their wealth; W. Manson, *Luke* (*MNTC*, 1930), p. 184, and A. Plummer, *Luke* (*ICC*, 1900), p. 385, suggest that Jesus is referring to giving to the poor, who will in turn bless them in prayer.

Bibliography.–H. Donner, *ZAW* 73 (1961), 269-277; *ILC*, I-II, 57ff., 285ff.; C. Spicq, *Agapé dans le NT* (1958), I-III; *TDNT*, II, *s.v.* ἑταῖρος (Rengstorf); IV, *s.v.* φιλέω κτλ.: φίλος (Stählin); *TDOT*, I, *s.v.* "'āhabh" (Bergman, Haldar, Wallis).

G. A. LEE

FRIEND OF THE KING [Heb. *rē'eh hammeleḵ*] (1 K. 4:5; 1 Ch. 27:33); AV also KING'S COMPANION; [Gk. *phíloi toú basiléōs*] (1 Macc. 2:18; 3:38; 6:10; 10:65). An intimate adviser or royal companion high in the hierarchy of palace officials. In Gen. 26:26 Ahuzzath appears to have been such an "adviser" (RSV, Heb. *rē'eh*) to King Abimelech. The devotion of Hushai, who is repeatedly referred to as the friend of David, is a notable example of the affection of a subordinate for his superior (cf. 2 S. 15:32-37; 16:16ff.; 17; 1 Ch. 27:33).

A similar office is mentioned in Egyptian texts, the Amarna Letters, and the Akkadian documents from Ugarit (cf. E. A. Speiser, *JAOS*, 75 [1955], 154-165), although in all these texts the office is not exclusive, whereas in the OT only one man holds the office during the king's reign. From this fact and on the basis of other evidence A. van Selms (*JNES*, 16 [1957], 118-123) argued convincingly for a distinctively Canaanite office with this title. He traced the origins of the office to the best man (the "friend" of the bridegroom, e.g., Jgs. 14:20) at the king's wedding; since political marriages were frequent in OT times, a marriage adviser would have been necessary, especially to Solomon! (Cf. Prov. 22:11 for what appears to be a nontechnical use of the term.)

In 1 Maccabees these privileged advisers had become a distinct class. In view of the appointment of one of them as regent of Antiochus's empire and the consequent power of that position (6:14), the temptation of status and prestige presented to Mattathias was intended to be a powerful one (2:18). N. J. O. G. A. L.

FRINGES [Gk. *kráspedon*] (Mt. 9:20; 14:36; 23:5; Mk. 6:56; Lk. 8:44); AV HEM, BORDER; NEB EDGE, TASSELS.

In OT times fringes consisted of tassels (Heb. *ṣîṣiṯ*) or twisted threads (Heb. *gᵉḏilîm*) and were worn by the Israelites on the four corners of their garments to remind them of God's commandments (cf. Nu. 15:37-41; Dt. 22:12). Originally they contained a violet thread, but this was subsequently replaced by dark blue lines dyed on the borders of the garments on which the fringes were sewn. In Jewish tradition any garment having four corners was adorned by means of fringes, and this practice was still observed in NT times. The later Jews, after adopting the garments of the Diaspora, in order to observe the *ṣîṣiṯ* commandment began to use two extra four-cornered fringed garments: the large *ṭallîṯ* while at prayer, and the small *ṭallîṯ* as an undergarment during the day. Their tradition prescribed the exact manner in which each tassel was to be made and gave a symbolic meaning to the numbers of windings and knots. The main aim seems to have been the association of the fringes with the Law in the mind of the wearer.

The hemorrhaging woman who touched the fringe of Jesus' garment (Mt. 9:20f. par.) probably accepted the common idea that a person's clothes retained a person's power (cf. W. L. Lane, *Mark* [*NICNT*, 1974], p. 142); whatever her reason, the Lord honored her faith, and she was healed.

See GARMENTS. E. D. ISAACS
R. K. H.

FROG [Heb. *ṣᵉpardēa'*; cf. Arab. *ḍafda'* (Ex. 8:2ff.; Ps. 78:45; 105:30); Gk. *bátrachos* (Rev. 16:13; cf. Wisd. 19:10)]. The references in the Psalms, as well as in Exodus, are to the plague of frogs. Rev. 16:13 refers to "three foul spirits like frogs," indicating the uncleanness of the animal (cf. Lev. 11:10,41). The word *ṣᵉpardēa'* probably referred both to frogs and to toads, as does the Arab. *ḍafda'*. In Palestine and Syria *Rana esculenta*, *Bufo viridis*, and *Hyla arborea* are common. The species found most frequently in Egypt are *Rana mascariensis* and *Bufo regularis*. *Rana esculenta*, *Bufo viridis*, and *Bufo vittatus* are also found, but are much less common.

A. E. DAY

Ivory relief plaque from Nimrûd (Assyrian period) showing a man wearing a fringed cut-away coat (Royal Ontario Museum, Toronto)

FRONTIER. The term occurs four times in the RSV for three Hebrew words: *mûl*–'before, opposite' (Dt. 2:19; Josh. 22:11), *gᵉḇûl*–'boundary' (2 K. 3:21), *qāṣeh* (Ezk. 25:9). The Hebrew conveys the sense of "territorial boundary."

FRONTLETS [Heb. *ṭôṭāpôṯ*, from *ṭûp*–'bind'] (Ex. 13:16; Dt. 6:8; 11:18; cf. Ex. 13:9); NEB PHYLACTERY. Ornaments worn on the forehead, particularly phylacteries, which were also worn on the arms. *See* PHYLACTERY.

FROST [Heb. *ḥᵃnāmāl*] (Ps. 78:47); NEB RAIN; [*qîṭôr*] (Ps. 148:8); AV VAPOUR; NEB ICE; [*qerāḥ*] (Jer. 36:30); [*K yᵉqippā'ôn, Q wᵉqippā'ôn*] (Zec. 14:6); AV DARK. A temperature of freezing or lower is called frost. Dew forms when the temperature is decreased; and if below

freezing, the dew takes the form of a white film or covering over rocks and leaves. This white covering is called hoarfrost or frost. Like dew it is the result of condensation of the moisture of the air on objects that radiate their heat quickly. In order that condensation may take place, the atmosphere must be saturated. Frost may be expected on clear, still nights when the radiation is sufficient to reduce the temperature below the freezing point.

In Syria and Palestine frost is a very rare occurrence at sea level; but on the hills and elevated plains it is usual in the winter, beginning in November, and on the highest elevations throughout the year. Late spring frosts in March or early April do great damage to fruit. In clear weather there is often a great variation in the temperature of the day and the night, especially on the inland plains (Jer. 36:30). The reference in Jer. 36:30 night suggest that Jehoiakim's corpse was left unburied. Perhaps Heb. *ḥ*^{a}*nāmāl* in Ps. 78:47 would be better rendered "devastating flood" (cf. NEB "torrents of rain").

FROWARDNESS. Archaic term used by the AV for "perverseness" in Prov. 2:14; 6:14; 10:32.

FRUIT [Heb. *p*^{e}*rî*, also *bikkûrîm, bikkûrâ, rē'šîṯ, qayiṣ, t*^{e}*nûḇâ, y*^{e}*ḇûl* (Dt. 11:17), *la*^{ʿa}*nâ, rō'š, ma'*^{a}*ḵāl*–'food' (Neh. 9:25), *leḥem, pōrîyâ, 'ōsep, zimrâ, meged, yâgāʿ* ("fruit of toil," Job 20:18), *y*^{e}*gî(a)*^{ʿ} ("fruit of labor/toil," e.g., Ps. 78:46), *niḇ, nûḇ, bāḵar, ḥālal*; Aram. *'ēḇ*; Gk. *karpós*, also *génēma, aparchḗ, ólynthos, opṓra, karpophoréō, telesphoréō*]; **FRUITFUL** [Heb. *pārâ, p*^{e}*rî, pōrîyâ, karmel*; Gk. *karpós, karpophóros*]; **FRUITLESS** [Gk. *ákarpos*] (Jude 12); **UNFRUITFUL** [Heb. *m*^{e}*šakkāleṯ*–'causing miscarriages' (2 K. 2:19); Gk. *ákarpos*].

I. Biblical Terms
  A. In the OT
  B. In the NT
II. Fruit Products

I. Biblical Terms.–A. In the OT. By far the most common Hebrew term translated "fruit," either independently or in combination, is *p*^{e}*rî*. This general term denotes the edible product of a tree or woody plant, i.e., the succulent tissue that envelops the seeds (e.g., of fruit trees, Gen. 3:2f., 6; Ex. 10:15; Lev. 26:4; of grape vines, 2 K. 19:29). On occasion *p*^{e}*rî* is also used to refer to vegetables or general produce as the "fruit of the ground" (Gen. 4:3, *p*^{e}*rî hā'*^{a}*ḏāmâ*) or "fruit of the land" (Nu. 13:20, 26, *p*^{e}*rî hā'āreṣ*).

More frequently *p*^{e}*rî* has an extended symbolic sense. As the "product" or issue of human fertility, children are called "fruit of the womb" (*p*^{e}*rî-ḇeṭen*, Gen. 30:2; Ps. 127:3; Isa. 13:18; cf. Lk. 1:42) or "fruit of your body" (*p*^{e}*rî-ḇiṭn*^{e}*ḵā*, Dt. 7:13; 28:4; etc.). Similarly, animal offspring are designated "fruit of your beasts/cattle" (*p*^{e}*rî ḇ*^{e}*hemt*^{e}*ḵā*, Dt. 28:4, 11; 30:9). The phrase *pārîm s*^{e}*pāṯênû* in Hos. 14:2 (MT 3) is rendered "fruit of our lips" by the RSV, but "calves of our lips" by the AV and "cattle from our pens" by the NEB. The RSV assumes that the unpointed Hebrew text read *p*^{e}*rî*, "fruit," rather than the MT *pārîm*, "bulls," for what follows is the worshipers' prayer, "the fruit of their lips" (i.e., their promise to renounce all false allegiances; cf. Prov. 12:14; 13:2; 18:20; Isa. 57:18; He. 13:15; 1QH 1:28; Ps. Sol. 15:3; LXX *karpón cheiléōn*; cf. also JB "our words of praise"). The final *m* may be satisfactorily explained as an archaic Canaanite case ending (see H. W. Wolff, *Hosea* [Eng. tr., *Hermeneia*, 1974], p. 231), or as a case of incorrect separation of words — the prefixed preposition *min-* misplaced at the end of the preceding word (i.e., *p*^{e}*rî miśś*^{e}*pāṯênû*, "fruit from our lips"; see also W. Rudolph, *Hosea* [1966], p. 248; S. Holm-Nielsen, *Hodayot: Psalms from Qumran* [1960], p. 29.)

P^{e}*rî* also refers frequently to the results or consequences of one's actions. Thus in Ps. 104:13 the earth is said to be "satisfied with the fruit of thy work," the fruit being the manifest creativity of Yahweh in the natural realm. In many instances *p*^{e}*rî* represents the divine judgment merited by human actions. In Jer. 17:10 the Lord is said to give to each person "according to the fruit of his doings" (cf. 32:19). Thus both the wicked (cf. Prov. 1:31; 14:14; Hos. 10:13; Mic. 7:13) and the righteous (cf. Prov. 12:14; 18:20) will eat the fruit of their deeds.

The phrase *bēn pōrāṯ* in Gen. 49:22 has traditionally been rendered "fruitful bough" (AV, RSV) by identifying *prt* as a form of the feminine participle of *pārâ* (see BDB, p. 826) and by assuming that the "son of a fruit-bearer/tree" is a "fruit branch or bough" (cf. Ezk. 19:10, where Israel is depicted as a "fruitful vine"). This identification of *prt* with *pārâ* is hardly certain, however, and it has been challenged. Observing that similar metaphors in the Testament of Jacob have to do with fauna and not flora (cf. Gen. 49:9, 14, 17, 21, 27), some have suggested that *prt* is rather the feminine form of *pere'*, "wild ass" (cf. Gen. 16:12), and that *bn prt* is thus a "wild ass colt" (see E. Speiser, *Genesis* [*AB*, 1964], pp. 367f.).

Another very common Hebrew term for "fruit" is *bikkûrîm*, "first fruits," i.e., that portion of the grain or fruit crop that ripened first and was harvested to be offered ritually to God. The very similar *bikkûrâ*, "early fig," usually translated "first-ripe fig" (Isa. 28:4; Jer. 24:2; Mic. 7:1), is rendered "first fruit on the fig tree" in Hos. 9:10 (*see* FIG). The term *rē'šîṯ*, "beginning" or "chief," also has the technical sense "first fruits" in the cultic vocabulary. *See* FIRST FRUITS.

The translation of Heb. *qayiṣ* (Am. 8:1f.; Mic. 7:1) as "summer fruit" is the secondary meaning of "summer, heat of summer" (cf. Aram. and Syr. *qyṣ'*; Ugar. *qz*, "summer"). Thus this term specifies whatever comes ripe in the heat of summer.

Hebrew *t*^{e}*ḇû'â* most frequently designates the "yield" or "produce" of the earth (Ex. 23:10; 2 K. 8:6; etc.). It bears this meaning also in the four instances that it is rendered "fruit" in the RSV: Lev. 25:3 (NEB "harvest"); 25:21 (NEB "crop"); Dt. 33:14; Josh. 5:12 (NEB "produce"). *See also* HARVEST.

Another general term for "fruit" or "produce" is *t*^{e}*nûḇâ*, derived from the little-used verb *nûḇ*, "bear fruit." The cognate noun *niḇ (Q), nōḇ (K)*, also meaning "fruit," connotes thanksgiving in the phrase "fruit of the lips" (Isa. 57:18).

The general term *'ōsep*, "gathering" (< *'āsap*, "gather, collect"), is rendered "fruit harvest" (parallel to *bāṣîr*, "vintage") in Isa. 32:10 (cf. AV "gathering"; NEB "produce"). *Leḥem*, "bread, food," appears to be uniquely applied to the product of a tree in Jer. 11:19, where schemers propose to destroy "the tree with its fruit [= bread, *'ēṣ b*^{e}*laḥmô*]." The RSV assumes that *leḥem* has reference to the produce of the tree. Emendation to *b*^{e}*lēḥô*, "in its sap," has long been suggested (see *BH*), but such is probably unnecessary if the problematic *m* is an enclitic between the noun and its suffix (i.e., *lē(a)ḥ* + *m* + suffix; cf. KoB [3rd ed.], p. 499; M. Dahood, *Bibl.*, 47 [1966], p. 409; J. Bright, *Jeremiah* [*AB*, 1965], p. 84). The NEB follows the latter course, translating "sap" (cf. Ps. 92:14 [MT 15], where *dāšēn*, "fat," is used to designate the sap of a tree).

In nine instances Heb. *karmel* is translated "fruitful

field" (Isa. 16:10; 29:17; 32:15f.) or "fruitful land" (Isa. 10:18; Jer. 4:26; 48:33). Elsewhere *karmel* may be found as "garden land" (Mic. 7:14). *See also* GARDEN.

The obscure hapax legomenon *zimrâ* in Gen. 43:11 has customarily been translated "choice fruits" (AV "best fruits"; NEB "produce . . . famous") from the context and from an assumed association with *zmr*, "be strong" (cf. Ugar. and Arab. *ḏmr*; see also KoB [3rd ed.], p. 263). Thus from the literal sense "strength of the land" the meaning "best produce of the land" is derived. Another etymological possibility has been suggested, namely, derivation from *zmr*, "wonder at, admire" (Syr. *dᵉmîrâ'*, "wonder, admirable thing"; see BDB, p. 275).

In Dt. 29:18 "bitter fruit" renders Heb. *laʿᵃnâ*, traditionally "wormwood" (cf. AV, NEB; but note AV "hemlock" in Am. 6:12). Wormwood is the popular term for a bitter and aromatic herb known botanically as *Artemisia absinthium L.* The Hebrew term is always used figuratively of things that are experienced as bitterness (e.g., Dt. 29:18, the consequences of idolatry; Am. 5:7; 6:12, the perversion of justice). (Note the parallel with *rōʾš*, "poison," in Am. 6:12; Dt. 29:18; Jer. 9:14; 23:15; see also R. S. Cripps, *Critical and Exegetical Comm. on the Book of Amos* [1969], p. 183).

The plural of *meged* is translated "choice fruits" in Cant. 7:13 (cf. *pᵉrî mᵉgādîm*, "choicest fruits," 4:13, 16). Arabic cognates for this term suggest the sense of "excellence, glory," but the Syriac and postbiblical Hebrew equivalents mean "fruit" (BDB, p. 550); thus "choice fruits" accommodates both. (*Meged* also appears five times in Dt. 33, always with reference to the excellent benefits of nature.)

Several Hebrew verbs are translated with the terms "fruit," "fruitful." The divine command to "be fruitful" (i.e., reproductive) is expressed by the verb *pārâ* ("be fruitful"; hiphil "make fruitful") in the creation story (Gen. 1:22, 28) and after the Flood (Gen. 8:17; 9:1, 7). One prominent feature of God's promise to His chosen people was that He would "make them fruitful" (e.g., Gen. 17:6; 28:3; 48:4). *Pōrîyâ*, the feminine participle of *pārâ*, is translated in Isa. 17:6 as "fruit tree" (NEB "fruiting tree") by virtue of its literal sense, "fruit-bearer." The same term is rendered "fruitful" in the phrase *gepen pōrîyâ* (RSV "fruitful vine"; figurative for Israel in Isa. 32:12 and for a wife in Ps. 128:3). The rare verb *nûḇ*, "bear fruit," is applied to the majestic cedars of Lebanon in Ps. 92:14 (MT 15), for, like the righteous, they still "bring forth fruit" in old age (NEB "vigorous in old age"). *Bāḵar*, along with its Arabic, Aramaic, and Syriac cognates, has the basic meaning of "early," "do (something) early" (cf. the related noun *bᵉḵôr*, "first-born"). In Ezk. 47:12 this verb is applied to fruit trees that will "bear fresh fruit" (NEB "bear early").

The verb *ḥālal*, "treat as common, profane, defile," sometimes has a specialized sense with regard to vineyards: "enjoy [use] the fruit of" (Dt. 20:6; 28:30; Jer. 31:5; cf. AV, NEB). That enjoying the fruit of a vineyard can be connoted by the term for "profaning" is based on the principle that the first produce of the vineyard is reserved as sacred. According to the Torah the fruit is taboo for the first three years, and in the fourth it is consecrated to Yahweh; thereafter, beginning with the fifth year, the sanctity is removed and the fruit is free for common use (Lev. 19:23-25). Thus, to enjoy the fruit of a vineyard for the first time may be conceptualized as profaning that vineyard, reducing its status from sacrosanct to common.

The Aramaic substantive *'ēḇ* (cf. Akk. *inbu*, "fruit") occurs three times in Daniel (4:12, 14, 21) as "fruit." In each instance it refers to the fruit of the great symbolic tree in Nebuchadnezzar's dream vision.

B. In the NT. The NT equivalent of *pᵉrî* is Gk. *karpós*, "fruit." Its meaning may be literal, e.g., fruit of a fig tree (Mt. 21:19 par.), of a vineyard (Mt. 21:34-43), and of the earth (Jas. 5:7). But more often it too is symbolical. A child is the "fruit of the womb" (Lk. 1:42); praise is the "fruit of the lips" (He. 13:15). The image of bearing fruit is used often in the NT to indicate the results of the obedient or disobedient life: the yield may be "good fruit" (e.g., Mt. 3:8; 7:17-19; 12:33; 21:43) or "bad fruit" (Mt. 3:10; 7:17f.; 12:33; Lk. 6:43). This imagery figures prominently in Jesus' analogy of the "true vine" (Jn. 15:2-11); it is only the branch that "lives" in the vine that bears fruit. The symbolism of the tree (Rev. 22:2) and of the grain of wheat (Jn. 12:24) similarly expresses the productive quality of the life of a servant people. In Phil. 1:22 Paul applies this imagery to his own ministry when he says that for him "life in the flesh" means "fruitful labor" (*karpós érgou*, lit. "fruit of labor"; cf. AV) on behalf of the churches.

In Gal. 5:22f. Paul catalogs the components of the "fruit of the Spirit" as "love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, self-control." Similarly, in Eph. 5:9 the "fruit of light" is found in "all that is good and right and true." Contrasted with this are "the unfruitful [*ákarpos*] works of darkness" (v. 11), the "fruitless trees" of heretical teachings (Jude 12), and the unfruitful results of faith (Mt. 13:22 par.). One of the characteristics of the "wisdom from above" is that it is "full of mercy and good fruits" (Jas. 3:17; cf. 2 Pet. 1:8). The cognate verb *karpophoréō*, "bear fruit," is used figuratively for the exemplary conduct yielded by a life in Christ (Mt. 13:23 par.; Rom. 7:4; Col. 1:6, 10; cf. Wisd. 10:7). The hapax legomenon *karpophóros* (Acts 14:17) refers to the "fruitful" seasons that give constant testimony to God's beneficence.

Greek *génēma*, "product, fruit, yield," is used consistently in the Synoptic accounts of the Last Supper to refer to wine as the "fruit of the vine" (Mt. 26:29 par.; cf. the LXX translation of "fruitful vine" in Isa. 32:12). *Aparché*, "first fruits," is a technical term from the sacrificial vocabulary, representing that initial portion of the harvest, yield, or (animal) offspring that is sacred to God and must therefore be consecrated to Him before the remainder may be used. Sometimes it is used of the first converts in an area (Rom. 16:5; 1 Cor. 16:15; on 2 Thess. 2:13, see B. Metzger, *Textual Comm. on the Greek NT* [1971], pp. 636f.). (*See* FIRST FRUITS.)

Three other Greek terms are hapax legomena in the NT. *Ólynthos* denotes the fruit of the fig tree (*sykḗ*) as "winter fruit" (Rev. 6:13; AV "untimely figs"; NEB "figs"). The verb *telesphoréō* has the meaning "bring or bear fruit to maturity" (Lk. 8:14). The meaning of *opṓra* as fruit (Rev. 18:14) is a secondary development in Greek usage. The term originally denoted the time of year that begins with the ascendancy of the star Sirius; because it coincided with the time that fruit ripened, *opṓra* by extension came into use for the fruit itself.

II. Fruit Products.—Fruit constituted an essential part of the diet in ancient Palestine, a country that was known for the abundance of its fruit trees. Fruit trees were so important to the economy that Israel was forbidden to destroy them, even in time of war (Dt. 20:19f.). The three most basic fruits of Israel's economy were the olive (*see* OLIVE TREE), the grape (*see* VINE), and the FIG. Their importance is illustrated by Jotham's parable of the olive tree, the fig tree, the vine, and the bramble (Jgs. 9:7-15), and by the fact that Israel itself could be symbolized by an

Pomegranate, palm-leaf, and date or grape designs, in reddish-brown paint on a buff background, on a partially reconstructed Nabatean bowl from Khirbet et-Tannur (SE of the Dead Sea) (E. K. Vogel; picture American Schools of Oriental Research)

olive tree (Jer. 11:16; Rom. 11:17-24), by a vine or vineyard (Ps. 80:8-11 [MT 9-12]; Isa. 5:1-7; Jer. 2:21; 12:10), or by a fig tree (Lk. 13:6-9; cf. Mt. 21:18f.; Mk. 11:12-14, 20f.).

Among the other fruits mentioned in the Bible are dates (*see* PALM TREE), the POMEGRANATE, MELONS, the APPLE (probably an apricot), the MULBERRY, the ALMOND, the pistachio nut and walnut, and SYCAMORE figs.

See also FLORA; FOOD; ORCHARD.

D. G. BURKE

FRUSTRATE [hiphil of Heb. **pārar*] (Ezr. 4:5; Neh. 4:15 [MT 9]; Job 5:12; Ps. 33:10; Isa. 44:25); AV also "bring to nought," DISAPPOINT, "make of none effect"; NEB also DEFEAT, "bring to nothing"; **FRUSTRATION** [Heb. *mig'eret*] (Dt. 28:20); AV REBUKE; NEB "dysentery." The sense of the verb is to "make void, bring to nothing" human plans or intentions.

FUEL [Heb. *'oklâ* (Ezk. 15:4, 6; 21:32 [MT 37]), *ma'ᵃkōlet* (Isa. 9:5, 19 [MT 4, 18]), piel of *bā'ar* (Isa. 40:16; 44:15)]; AV also BURN. Its general literal meaning is "food of fire" and might include any sort of combustible material. The common forms of fuel were wood of various sorts (even thorns, Ps. 58:9 [MT 10]; 118:12; Eccl. 7:6), dried stalks of flowers or grass (Mt. 6:30), charred wood as charcoal (Lev. 16:12; Isa. 44:19; etc.), and dried dung (Ezk. 4:12, 15).

Figuratively, the Israelites were like fuel consumed by God's anger for lack of brotherly love (Isa. 9:19). In Ezk. 21:32 this metaphor is even more apt. L. W. DOOLAN

FUGITIVE [Heb. *nû(a)'*–'wander,' 'be unstable'] (Gen. 4:12, 14); NEB VAGRANT; [*pālîṭ, pālêṭ*–'escaped one'] (Nu. 21:29; Jgs. 12:4f.; Jer. 44:14; Ezk. 24:26f.; 33:22; Ob. 14); AV (HE THAT) ESCAPED; NEB also ESCAPE (omits in Jgs. 12:4); [*nûs*–'flee,' 'escape'] (Prov. 28:17; Jer. 48:45); AV FLEE; NEB also ESCAPE; [*nāṣâ*] (Lam. 4:15); AV FLED AWAY; NEB HASTENED AWAY; [*bārî(a)ḥ*] (Isa. 15:5); NEB NOBLES; [*nāḏaḏ*] (Isa. 16:3; 21:14; Jer. 49:5); AV HIM THAT WANDERETH; HIM THAT FLED. One who flees to escape danger; one who has no home; a refugee.

The dangers that a fugitive might seek to escape include retaliation for a crime committed intentionally or unintentionally (cf. Prov. 28:17; *see also* REFUGE, CITIES OF) and the ravages of war. Cain's punishment for murdering his brother was condemnation to a life of homelessness, wandering (Heb. *nāḏ*, parallel to *nā'*) in the land of NOD (Heb. *nôḏ*; cf. RSV mg. "Wandering"). The earth that had drunk his brother's blood would no longer provide a home for him (Gen. 4:10-16). The unfaithful prophets and priests of Judah shared Cain's fate when Jerusalem fell (Lam. 4:15). Like lepers, they were unwelcome among all the peoples; they were denied even the rights of sojourners (v. 15b).

In ancient as in modern times, one of the consequences of war was the displacement of many persons who fled their homeland to seek refuge in another country. At the time of Judah's collapse, many Jews fled to Egypt despite Jeremiah's warning that this would only bring suffering upon them (Jer. 41:17–44:30). Others sought refuge in Moab, Ammon, and Edom (40:11; cf. Ob. 14). The suffering of refugees was likewise a part of the catastrophe that was to befall Judah's neighbors (e.g., Moab, Isa. 15:5; 16:3; Jer. 48:45; Ammon, Jer. 49:5; Dedan, Isa. 21:14). Isaiah urged the Israelites to show compassion toward the Moabite refugees (16:3f.). Edom was castigated for its extreme cruelty in handing over Jewish refugees to the Chaldeans (Ob. 14). *See also* WAR.

  B. Time of Fulfillment
    1. In the OT
    2. In the NT
    3. In the Future
  C. Critical Theories
III. Fulfillment of the Law
IV. Other Uses

I. Terminology.–The most important theological meanings of the Hebrew, Aramaic, and Greek terms behind "fulfil" are "obey, observe, or meet the requirements of" and "bring to pass a prediction" (cf. the occasional translation "accomplish"). Dalman attempted to trace primary NT usage back to Heb. *qûm* ("stand," and thus causatively "confirm by fulfillment") rather than to *mālē'* ("fill," and thus "fulfil by bringing to pass") (G. Dalman, *Jesus-Jeshua* [Eng. tr. 1929], pp. 56ff.; but cf. *TDNT*, VI, *s.v.* πληρόω [Delling]; and W. D. Davies, in *Mélanges Bibliques . . . Robert* [1957], p. 429). In the LXX, however, Heb. *qûm* is represented mainly by Gk. *hístēmi* and its cognates; and the Mishnah rarely uses *qûm* to introduce scriptural quotations and never to indicate fulfilled prophecy. B. M. Metzger notes that W. Bacher (*Die exegetische Terminologie der jüdischen Traditionsliteratur*) cites only one example from later rabbinical literature (*Seder Olam* c. 27 *fin*) of *qûm* for the fulfillment of predictive prophecy through historical event (in *JBL*, 70 [1951], 301, 307). M. Black, on the other hand, has suggested that the ithpaal of Aram. *kᵉlal* with the meaning "be completed" stands behind Gk. *plērōthḗ* in the NT (*An Aramaic Approach to the Gospels and Acts* [2nd ed. 1954], pp. 168f.). The OT use of Heb. *kālâ* in 2 Ch. 36:22 = Ezr. 1:1 for fulfillment of prediction supports Black's suggestion. But the idea of completeness lies close to the idea of fulness, and it is probably *mālē'* that provides the primary rationale underlying the concept of fulfillment. A prediction by itself is only half full: the historical event fills up the prediction. Similarly, a command or precept not carried out is only half full: obedience

fills it up. Fulfillment, then, is a figurative filling by means of actualization.

In the NT Gk. *plēróō* ("fill") and its cognates (cf. also *pímplēmi*) correspond most closely to Heb. *mālē'*, but Gk. *teléō* ("bring to an end" and thus "to completion"; cf. *synteléō*) carries a similar thought. The AV renders *plēróō* as "complete" in Col. 2:10; 4:12. Cf. the LXX use of Gk. *teleióō* and *teleíōsis* for Heb. *mālē'* (HR).

II. Fulfillment of Prophecy. *–A. Basic Concepts.* Particularly instructive on the synonymy and interchange of the Greek and Hebrew terms for fulfillment of prophetic prediction are 2 Ch. 36:21 (Heb. *mālē'*; LXX *plēróō*), 22 (Heb. *kālâ*; LXX *pleróō*), and the repetition of v. 22 in Ezr. 1:1 with *teléō* substituted for *plēróō* in the LXX. The type of expression that occurs in 1 K. 2:27 stands behind NT fulfillment formulas and concepts: "in order to fulfil the word of the Lord which he had spoken concerning the house of Eli in Shiloh." (*See* B. Gärtner, *ST*, 8 [1955], 14.)

This concept of fulfillment implies the unity of time and events in a history directed by God. Thus time itself is fulfilled (Mk. 1:15; cf. Gal. 4:4; Eph. 1:10) according to a divine timetable that makes events appropriate (Jn. 2:4; 7:30; 13:1; Lk. 21:24; 2 Thess. 2:6; 1 Tim. 6:15; Rev. 11:18). Fulfillment does not mean that history repeats itself in successive epochs (the cyclical view of history), but implies that the fulfilling event belongs to the same piece of fabric as the prediction. The prophetic word potently effects its own fulfillment; it is causative as well as descriptive, for it comes from the Lord of history. Moreover, typology receives its rationale, for in the single fabric of history God intends predictive symbolism in early events, persons, and institutions, and then causes the realization of that symbolism with the result that affinity of content overcomes temporal gaps as history develops into unified wholeness under divine direction. See B. S. Childs, *Interp.*, 12 (1958), 265ff.; O. Cullmann, *Christ and Time* (Eng. tr., 2nd ed. 1964). With Heb. *mālē'* instead of *qûm* behind the NT terms for fulfillment, then, fulfillment in the first instance is a matter of completion, not just confirmation.

Confirmation must not be excluded from the concept of fulfillment, however. For even *mālē'* occurs in the sense "to confirm" (1 K. 1:14); and the Gk. conjunctions *hína* and *hópōs* which frequently introduce fulfillment formulas in the NT, clearly convey the idea of the divine purpose being worked out for people to see, be convinced, and believe. See especially the latter half of Isaiah and the fulfillment citations in Matthew, each introduced by "This was to fulfil what was spoken by the prophet, saying . . . " or almost identical words (1:22; 2:15,23; 4:14; 8:17; 12:17; 13:35; 21:4; cf. 2:5,17; 26:56; Mk. 4:11f.; Jn. 12:37-43; 19:24, 28).

It has sometimes been debated whether the Gk. *hína* of fulfillment formulas is telic, indicating a deterministic purpose behind the fulfillment, or ecbatic, merely indicating a result whether deterministically accomplished or not. Lexicographically, *hína* usually is telic; and the occasional substitution of *hópōs* favors the telic idea. Conceptually, however, purpose and result merged in biblical thinking, so that the tension between divine determination and human freedom and responsibility was not keenly felt. For example, "The Son of man must [Gk. *deí* of predestination] be lifted up [crucified]" (Jn. 3:14; 12:34; cf. Mk. 8:31 par.) in no way contradicts "I lay down my life. . . . No one takes it from me, but I lay it down of my own accord" (Jn. 10:17f.). Even less specific expressions such as "it is written" frequently connote fulfillment (e.g., Mk. 1:2; 14:27 par.).

The Mishnah fails to use the fulfillment formulas so frequent in the NT, because there was nothing in mainstream Jewish theology comparable to the Christian belief that the ministry of Jesus had inaugurated the eschatological age in which the OT revelation was reaching completion and receiving confirmation. The writings from Qumrân, however, offer closer parallels to the NT. The Qumrân sectaries believed that the eschatological age of fulfillment had dawned or was about to dawn. But for the Qumrân writers the decisive fulfillments lay in the future; for the NT writers they had already taken place in the career of Jesus. Furthermore, the Qumrân Teacher of Righteousness was more a revealer of eschatological meanings in the OT than himself the embodiment and fulfiller of such meanings, as in the case of Jesus. To be sure, the Qumrân writers thought they could see the career of their leader foretold in the OT. But NT writers saw the career of Jesus predicted and prefigured in the OT far more extensively, so that Jesus occupied a position of far greater importance by fulfilling in deeds as well as by explaining in words the central events of the eschaton. Yet further, the imminent fulfillment expected at Qumrân was a carrying forward of the OT economy by way of purification and restoration. NT fulfillment exhausted and abrogated the OT economy and thereby necessitated a new beginning, related to the old but still new: "The law and the prophets were until John; since then the good news of the kingdom of God is preached" (Lk. 16:16 par.). (*See also* DEAD SEA SCROLLS II.H, I.)

As already noted, the biblical concept of fulfillment included typological fulfillment as well as the bringing to pass of conscious predictions (cf. Rom. 5:14; 1 Cor. 10:6; He. 9:24). The NT writers regarded OT historical events, persons, and institutions as divinely intended to be prefigurative by way of similarity or (occasionally) contrast between the OT type and the NT antitype (fulfillment of the type). As distinct from ALLEGORY, typological fulfillment does not overlook the historical meaning of the OT text. Indeed, the very historicity of the types in their contextual meaning gives them their worth as pointers toward a future culmination.

B. Time of Fulfillment. 1. In the OT. Already in the OT we see fulfillments. 1 K. 2:27 notes the fulfillment of the prophecy concerning the house of Eli (1 S. 3:11-18). So also 1 K. 12:15 notes the fulfillment of Ahijah's prophecy that Jeroboam would rule ten of the tribes of Israel (1 K. 11:29-39), and the Chronicler notes the fulfillment of Jeremiah's prophecy concerning the seventy years of Babylonian Exile (2 Ch. 36:21; Jer. 29:10). Daniel's prophecy of Nebuchadrezzar's madness was fulfilled (Dnl. 4:33 [MT 30]); and the near completion of Jeremiah's prophecy concerning the seventy years of Babylonian Exile prompted Daniel to pray for the restoration of Jerusalem and the temple (Dnl. 9:1-19). The Lord responded with the famous revelation of seventy weeks (Dnl. 9:20-27); thus the fulfillment of one prophecy led to the giving of another.

2. In the NT. In the NT the theme of fulfillment is more prominent. Since it is not always possible to determine whether the NT writer thought of the fulfilled OT text in terms of conscious prediction or unconscious typology, these two aspects of fulfillment may be lumped together and summarized under the following main themes accompanied by representative passages where the themes occur: Jesus fulfilled the activities of Yahweh Himself (Mt. 1:21; 3:3f. par.; 11:5 par.; 13:41; 24:31 par.; 27:9f.). He was the messianic King (Mt. 1:23; 2:6, 23; 3:17 par.; 4:15f.; 21:5; 22:44 par.; 26:64 par.), the Isaianic Servant of the Lord (Mt. 3:17 par.; 8:17; 11:5 par.; 12:18-21; 1 Pet.

2:22-24), and the Danielic Son of man (Mt. 24:30 par.; 26:64 par.; 28:18). He was the culmination of the line of OT prophets from Moses onward (Mt. 12:39f. par.; 13:13-15 par., 35; 17:5 par.; 1 Cor. 10:2; 2 Cor. 3:7f.; He. 3:1f.), of the succession of OT righteous sufferers (Mt. 21:42 par.; 27:34f. par., 39 par., 43, 46 par., 48 par.), and of the Davidic dynasty (Mt. 12:42 par.). He reversed the work of Adam (Mt. 4:1-11 par.; Rom. 5:12; 1 Cor. 15:21f., 45-48; He. 2:6-10, cf. Lk. 3:38), fulfilled the promise to Abraham (Gal. 3:16), and recapitulated the history of Israel (Mt. 2:15, 18; 4:4, 7, 10 par.).

Melchizedek prefigured His priesthood (He. 7:1-10), as did also (in an inferior and sometimes contrasting way) the Aaronic priesthood (He. 8–10). The paschal lamb and other sacrifices symbolized His redemptive death (1 Cor. 5:7; Eph. 5:2; He. 9–10; Rom. 3:25; 1 Pet. 1:19-21; Rev. 5:6) — and secondarily, Christian service (Rom. 12:1; 15:16; Phil. 2:17). He was life-giving bread like the manna (Jn. 6:35; 1 Cor. 10:3), the rocklike source of living water (1 Cor. 10:4; cf. Jn. 7:37), the serpent lifted up in the wilderness (Jn. 3:14), and the tabernacle-temple abode of God on earth (Jn. 1:14; 2:19-22; cf. Col. 1:19).

John the Baptist was the predicted prophetic forerunner (Mk. 1:2f. par.). Jesus inaugurated the foretold eschatological period of salvation (Jn. 6:45) and the new covenant (He. 8:8-12; 10:16f.). Judas Iscariot fulfilled the role of the wicked opponents of OT righteous sufferers (Acts 1:20). The Church is (or individual Christians are) the new creation (2 Cor. 5:17; Gal. 6:15; Col. 3:10), the spiritual seed of Abraham by incorporation into Christ (Gal. 3:29; 4:24-31; Rom. 4:1-12; 9:6-13; Phil. 3:3), the true Israel (Rom. 9:6-13; 11:17-21; 2 Cor. 6:16; 1 Pet. 2:9f.), and the new temple (1 Cor. 3:16; 6:19; 2 Cor. 6:16; Eph. 2:20-22). The Mosaic law prefigured grace both positively and negatively (Jn. 1:17; Col. 2:17; Galatians). The Deluge stood for the last judgment (Mt. 24:37-39) and for baptism (1 Pet. 3:20f.). Both the passage through the Reed Sea and circumcision also pictured baptism (1 Cor. 10:2; Col. 2:11f.). Jerusalem stood for the celestial city (He. 12:22; Rev. 21:2; Gal. 4:26). Entrance into Canaan prefigured the entrance of Christians into spiritual rest (He. 3:18–4:13). And proclamation of the gospel to all mankind fulfilled the promise to Abraham and prophetic predictions of worldwide salvation (Acts 3:25; 13:47; 15:16-18; Rom. 15:9-12, 21).

3. In the Future. Not even in the NT, however, are all prophecies considered fulfilled. Indeed, the NT itself offers a considerable amount of predictive prophecy that awaits fulfillment in the return of Jesus and attendant events (Mk. 13 par.; 2 Thess. 2:1-12; Rev. 6–22, esp. 10:7; 17:17). The very distinction between two comings of Christ rests on recognition that not all messianic prophecies reached fulfillment in the earthly ministry of Jesus (cf. His stopping short of the phrase "and the day of vengeance of our God" when reading Isa. 61:1-2 in the synagogue at Nazareth, Lk. 4:16-21). *See also* PROPHECY.

C. Critical Theories. For modern theological scholarship, however, fulfillment poses a problem that has received various answers. (For the following see the articles collected in C. Westermann, ed., *Essays on OT Hermeneutics* [Eng. tr. 1963], and other literature cited there.) The rise of critical thinking has called into question the legitimacy of the way in which NT writers cited the OT as fulfilled. R. Bultmann, W. Zimmerli, F. Baumgärtel, C. Westermann, and others have all denied that NT events fulfilled specific OT predictions, for OT scholarship has shown that the OT "predictions" did not at all mean what NT writers took them to mean when writing about their "fulfillment." Bultmann claims that the NT not only followed Jewish tradition in referring the OT to the eschatological age of salvation, but also followed Hellenistic tradition when reading into authoritative texts meanings not originally intended (cf. Philonic exegesis). Thus, fulfillment of predictive prophecy and typology is a fiction. One can speak of OT promise and NT fulfillment only in the negative sense that the miscarriage of history in the failure of OT legalism held the promise of justification by faith.

Zimmerli strives to save the concept of fulfillment by arguing that prophetic prediction has an opaqueness, which God reserves the right to clarify through His fulfillment. Thus it really does not matter that NT fulfillment does not correspond to the letter of the OT text.

Baumgärtel argues emphatically that historical-critical investigation not only explodes fulfillment of predictive prophecy, but also excludes typological and christological ways of understanding the OT: (1) the this-worldliness of the OT and the other-worldliness of the NT contrast so sharply that any correspondence between the two Testaments on the historical level is imaginary; (2) what the NT regarded as salvation-history in the OT has been proved to be historically distorted and false, so that typological fulfillment rests on an unhistorical base. Baumgärtel then tries to rescue the idea of fulfillment by distinguishing prophecy, which he defines as a humanly conditioned and therefore fallible attempt to understand the workings of God in history, from promise, which he defines as the central OT affirmation "I am the Lord thy God." It is only the promise which OT and NT really have in common, so that we may speak of *promise* and fulfillment but not *prophecy* and fulfillment. The OT expected by faith the realization of "I am the Lord thy God"; the NT knew by faith that in Jesus Christ the promise has been realized. With similar presuppositions A. A. van Ruler seems to ignore fulfillment and finds the value of the OT in its this-worldly emphases on creation, humanity, culture, society, and the state.

The salvation-history school of thought attempts to retain the idea of fulfillment and at the same time to acknowledge the higher-critical loss of detailed, long-range predictive prophecy by viewing prophecy as history itself rather than verbal prediction. Thus prophecy is the movement of historical events toward the goal of Jesus Christ and the redemption accomplished by Him. See J. C. K. Von Hofmann, *Weissagung und Erfüllung* (1841-1844); and O. Cullmann, *Christ and Time; Salvation in History* (Eng. tr. 1967). Cullmann speaks of *preparation* and fulfillment. Closely related is the revival of typological interpretation (W. Eichrodt, G. von Rad, J. Coppens, W. F. Pythian-Adams, G. W. H. Lampe and K. J. Woollcombe, W. Vischer, *et al.*).

Denial of verbal prediction in the OT and its *quid pro quo* fulfillment in the NT, however, leaves both salvation-history and typological fulfillment devoid of solid foundation. Without real and specific fulfillments of real and specific predictions, both the reconstruction of salvation-history and all typological interpretations lie open to the charge that they are purely speculative. Only NT fulfillment of conscious, detailed predictions in the OT can justify the addition of the broader typological and salvation-history approaches. To be valid, the concept of fulfillment must rest first of all on bona fide messianic predictions in the OT and their actual coming to pass in NT history.

III. Fulfillment of the Law.—A special question arises in connection with the fulfillment of the OT law. On the one hand the NT has indications that the fulfilling of the law established its validity as enduring forever: Mt. 5:17, 19, "I have come not to abolish . . . but to fulfil. . . .

Whoever then relaxes one of the least of these commandments and teaches men so, shall be called least in the kingdom of heaven; but he who does them and teaches them shall be called great in the kingdom of heaven"; Rom. 8:4, "in order that the just requirement of the law might be fulfilled in us"; 13:8, "he who loves his neighbor has fulfilled the law"; Gal. 5:14, "For the whole law is fulfilled in one word, 'You shall love your neighbor as yourself.'" On the other hand the NT also has indications that the new covenant abrogated the OT law: Mk. 7:18f., "Thus he declared all foods clean"; Mt. 5:31f., 38-42 (a contrast between OT statements and Jesus' teaching); Mk. 10:2-9 par. (Jesus' restricting the Mosaic law of divorce); Lk. 16:16 par., "The law and the prophets were until John"; Rom. 6–8; 10:4; Galatians; 2 Cor. 3. Perhaps it is best to say that the ministry of Jesus formed a transitional period during which He exhausted the demands of the OT law and thus outmoded it as a whole, but at the same time restated and intensified for the eschaton the timeless ethical demands embedded within the law. Cf. "Fulfill the law of Christ" (Gal. 6:2) and "not being without law toward God but under the law of Christ" (1 Cor. 9:21). *See also* ETHICS: THE ETHIC OF JESUS III.D; LAW IN THE NT.

IV. Other Uses.–Not all fulfillment deals with predictive prophecy. Besides obvious literal meanings, biblical words for fulfillment convey such notions as spending time ("complete," Gen. 29:27f.; "ended," Lk. 2:43), completing a term of pregnancy (Gen. 25:24), living out a lifespan (2 S. 7:12; 1 Ch. 17:11), doing a task ("complete," Ex. 5:13-14; Acts 12:25; 14:26; Col. 4:17; 2 Tim. 4:5), answering prayer (Ps. 20:5 [MT 6]), and bringing joy (Jn. 3:29; Phil. 2:2; 2 Thess. 1:11).

R. H. GUNDRY

FULL. The term "full" appears approximately 270 times in the RSV, translating in the OT about six words and fifteen idioms and in the NT about seven words and ten expressions.

The most generally used OT word for "full" is Heb. *mālē'*, which in various forms is translated "full" about a hundred times by the RSV, with many variations in the AV and NEB. It is used to refer to various containers as being full (Lev. 16:12; Nu. 7:13f.; 2 K. 4:4; etc.), to a complete price (Gen. 23:9), to an excellent grain harvest (Gen. 41:7), to an abundance of the Lord's blessing (Dt. 33:23), to great wisdom (Dt. 34:9), to a man with plenty to say (Job 32:18), to hearts of evil men (Eccl. 9:3), to hands shedding much blood (Isa. 1:15), to a city enjoying prosperity as indicated by the presence of many children (Zec. 8:5), etc. In literal and figurative expressions the term refers to an abundance that allows little or nothing to be added to the supply (cf. "fill," Gen. 42:25; Ex. 10:6).

Hebrew *śāḇa'* usually includes the idea of "satisfaction" or "all that is wanted," e.g., of satisfying the appetite with foods (Ex. 16:3) until one is grown fat (Dt. 31:20; "eat your fill," Lev. 25:19; Dt. 23:24). A long and satisfying life is described as one full of days or years (Gen. 25:8; 35:29; 1 Ch. 23:1; 29:28; 2 Ch. 24:15; Job 42:17). But "full" is also used of Job's restlessness (7:4) and limitless trouble (14:1; "fills with bitterness," 9:18), and the psalmist refers to a soul that is "full of troubles" (88:3 [MT 4]). The author of Proverbs warns that the condition of being satisfied by abundance may cause one to leave God (30:9 [MT 10]).

Hebrew *šālēm* has the meaning of "complete," "sound," "safe," "at peace." In Dt. 25:15 it means that weights are to be true. Ruth was wished a perfect or "full" reward for her goodness to Naomi (Ruth 2:12). In 1 Ch. 12:38 *šālēm* denotes the unanimity of the warriors of Israel in their determination to make David king of all Israel (1 Ch. 12:38).

Hebrew *tāmîm* refers to that which is "sound" or "complete." It is used of time periods being complete (Lev. 23:15; 25:29f.) and of transgressors reaching their peak, which will set the stage for a bold and mighty king to arise with great power to do evil (Dnl. 8:23).

Hebrew *kālâ* ("be complete, at an end") refers to a final end intended for various kingdoms: Assyria (Isa. 10:23), Nineveh (Nah. 1:8f.), all the nations (Jer. 30:11; cf. Zeph. 1:18); but Israel, though severely punished, will have a remnant preserved (Jer. 4:27; 5:10, 18; 30:11; Ezk. 20:13, 17; cf. Lam. 4:11).

Numerous Hebrew expressions convey the implication of completion, perfection, precision, clarity, greatness, maturity, etc.: e.g., *yeraḥ yāmîm*, "a month of days" (RSV "a full month," Dt. 21:13), *šᵉnāṯayim yāmîm*, "two years of days" (RSV "two full years," 2 S. 13:23; 14:28), *šᵉlōšâ šāḇuʿîm yāmîm*, "three weeks of days" (RSV "full three weeks," Dnl. 10:2f.). *Beʾᵉrôṯ beʾᵉrôṯ*, "wells, wells" (RSV "full of wells," Gen. 14:10) and *gēḇîm gēḇîm*, "pools, pools" (RSV "full of pools," 2 K. 3:16) indicate an area full of these depressions. In Ezr. 7:23 "in full" renders *'aḏrazdā'*, "exactly," while *kol*, meaning "all," is rendered "full" in reference to authority (Est. 9:29), spirit (Prov. 29:11), and tithes (Mal. 3:10). *Pārāšâ*, "clear marking," is rendered "full account" in Est. 10:2.

In the NT the Greek root most frequently rendered "full" is *plēróō*, which in its various forms (*plēróō, plḗrēs, plḗrōma plērophoría*) is translated "full" about twenty-eight times in the RSV. It occurs in reference to nets stretched with fish (Mt. 13:48), baskets weighted with scraps (Mt. 14:20; 15:7; Mk. 6:43; 8:19, 20), persons rejoicing (Jn. 3:29; 15:11; 16:24) or being glad (Acts 2:28), Our Lord displaying grace and truth (Jn. 1:14; cf. "fill all things," Eph. 4:10). It is used to describe people characterized positively by the control of the Holy Spirit, and by wisdom, faith, grace, power, and good works (Lk. 4:1; Acts 6:3, 5, 8; 7:55; 9:36; 11:24), or negatively by envy, murders, etc. (Rom. 1:29), or by deceit and villainy (Acts 13:10). These characteristics have control of the person; they describe the dominant expression of the life, strength, or detriment that the individual asserts in society or in the church. The positive graces are usually in context related to the divine activity of the Holy Spirit, whereas the iniquities are related to godlessness, sinfulness, and domination by the Evil One. This root is also used in combination (Gk. *plērophoría*) to emphasize the degree of conviction, certainty, and assurance with which Paul preached the gospel (1 Thess. 1:5) and with which Christians are to hold their faith and hope (He. 6:11; 10:22).

About eighteen times the RSV renders Gk. *pímplēmi* "filled." Literally, a wedding hall is filled with guests (Mt. 22:10) and boats with fish (Lk. 5:7). Figuratively, people are filled with the Spirit (e.g., Lk. 1:41, 67; Acts 2:4), awe (Lk. 5:26), and wrath (4:28).

Twelve occurrences of "full" in the RSV translate Gk. *gémō* (Mt. 23:25, 27; Mk. 15:36; Lk. 11:39; Rom. 3:14;

Rev. 4:6,8; 5:8; 15:7; 17:3f.; 21:9). Most of these uses are either figurative or describe an object in a vision. The emphasis is again on that which obviously dominates the scene, leaving room for little else.

Eight NT references to "full" translate Gk. *mestós*, which like *gémō* has both literal and figurative uses. A bowl of vinegar and a sponge (Jn. 19:29) and a net of fish (21:11) are literally full, while Pharisees known for hypocrisy (Mt. 23:28), Romans full of goodness (Rom. 15:14), the great capability of the tongue for evil (Jas. 3:8), godly wisdom producing always mercy and good fruits (Jas. 8:17), and men with eyes only for adultery (2 Pet. 2:14) give a figurative expression to this term.

Greek *pás* ("all," "every") is rendered as "full" courage in Phil. 1:20, payment in Phil. 4:18, and acceptance in 1 Tim. 1:15; 4:9. Gk. *téleios*, meaning "complete," "mature," "perfect," is behind the "full" effect steadfastness is to have in Jas. 1:4. The term *hólos* is used of the complete illumination or lack of it provided by healthy or unsound eyes (Mt. 6:22f.; Lk. 11:34,36) and of the "full" moon turning to blood (Rev. 6:12). Luke uses the participle of the verb *empíplēmi* to refer to those who have enough to eat and are satisfied. The RSV also supplies "full" to translate several NT words or expressions in which this concept is implied (Mk. 8:8; Lk. 16:20; Acts 17:16; 1 Cor. 9:18; Phil. 2:2).

FULLER [Heb. *kāḇas* (2 K. 18:17; Isa. 7:3; 36:2; Mal. 3:2); Gk. *gnapheús* (Mk. 9:3)]; NEB also BLEACHER (Mk. 9:3). The fuller was usually the dyer since before the woven cloth could be properly dyed it had to be freed from the oily and gummy substances naturally found on the raw fiber. Many different substances were used for cleansing. Among them were white clay, putrid urine, and the ashes of certain desert plants (Arab. *qali* ["soap," Mal. 3:2]). The fuller's shop was usually outside the city (2 K. 18:17; Isa. 7:3; 36:2) for two reasons: first, because of his need for space to spread out his cloth for drying and sunning; and second, because of the offensive odors sometimes produced by his processes. The Syrian indigo dyer still uses a cleaning process closely related to that pictured on the Egyptian monuments. The unbleached cotton is soaked in water and then sprinkled with the powdered ashes of the *ishnan*, locally called *qali*, and then beaten in heaps on a flat stone either with another stone or with a large wooden paddle. To wash the cloth free from the alkali, small boys tread on it either in a running stream or in many changes of clean water (cf. *En-rogel*, lit. "foot fountain," but translated also "fuller's fountain" because of the fullers' method of washing their cloth). God's purifying activity has been compared to "fuller's soap" (Mal. 3:2), and Mark described Jesus' garments at the time of His transfiguration as being whiter than any fuller on earth could whiten them (Mk. 9:3).

FULLER'S FIELD [Heb. *śᵉḏēh ḵôḇēś*]. A well-known landmark at Jerusalem in the time of the monarchy, mentioned three times in the OT with similar phraseology: "the conduit of the upper pool, on the highway to the Fuller's Field." Here stood the Assyrian general in his interview with Eliakim and others on the wall (2 K. 18:17 par. Isa. 36:2); clearly the highway was within easy earshot of the walls. Here Isaiah met Ahaz by command of Yahweh (Isa. 7:3).

The biblical data do not suffice to locate the Fuller's Field with certainty or precision; the termini of the conduit can only be guessed at (though Isa. 7:3 suggests that at least one of them lay outside the city), and the same is true of the highway. The "upper pool," one of the conduit's termini, has been variously located. One common view is that it was the pool at the spring GIHON, the present "Virgin's Fount," which was perhaps known as the "upper spring" (2 Ch. 32:30). In this neighborhood — or lower down the valley near En-rogel, which is supposed by some to mean "the spring of the fuller" — is the natural place to expect "fulling." On the other hand, no known highway ran down toward En-rogel, and it seems unlikely that the Assyrian spokesman would have chosen this area SE of the city, down in the Kidron Ravine, for a parley. On the north side of Jerusalem, however, the terrain is of higher altitude than the city itself, and this is the side where armies more naturally mustered to attack Jerusalem. Furthermore, Josephus (*BJ* v.4.2 [142-155]) in his description of the walls placed a "Monument of the Fuller" at the northeast corner, and the name "fuller" survived in connection with the north wall till the 7th century.

See J. Gray, *I & II Kings* (*OTL*, 2nd ed. 1970), pp. 679-682.

D. F. PAYNE

FULLER'S FOUNTAIN. *See* EN-ROGEL.

FULNESS [Heb. *bᵉḵôr*] (Ex. 22:29 [MT 28]); AV, NEB, FIRST; [*mᵉlē'â*] (Nu. 18:27); [*mᵉlō'*] (Dt. 33:16; Ps. 24:1); NEB also ALL; [*mālē'*] (Job 20:22); NEB FULL FORCE; [*śōḇa'*] (Ps. 16:11); [Gk. *plḗrōma*]; NEB also RIPE, FULL, COMPLETE, etc.; [*plēróō*] (Col. 2:10); AV COMPLETE; NEB COMPLETION. *See also* FULL.

"Fulness" is an important theological concept that has been the focus of considerable study (see Lightfoot, pp. 257-273; Robinson, pp. 255-260). The usual biblical sense is "that which fills." This is the case in Ps. 24:1 (cf. Dt. 33:16), which says, "The earth is the Lord's and the fulness thereof." All that is in the earth is the Lord's. At other times "fulness" means "the state of being full," or "abundance," e.g., in God's presence there is "fulness of joy" (Ps. 16:11; cf. Job 20:22). The "full yield" of the wine press (Nu. 18:27) and the "first fruit" of the harvest (Ex. 22:29) are subsidiary OT renderings.

In the NT Gk. *plḗrōma* expresses the same ideas. Similar to the adjectival usage in the AV ("full of faith," etc.) is the phrase in Jn. 1:16: "from his fulness have we all received, grace upon grace." Christ, who is "full of grace and truth" (1:14), possesses this grace in "full measure" and in "completeness," and He imparts it to others. Similarly, in Col. 1:19 and 2:9 it is said that in Christ dwells the

whole "fulness" of God, meaning that Christ is the complete incarnation of God Himself. In Him exists "the totality of the Divine powers and attributes" (Lightfoot, p. 159); Christians "come to fulness of life," i.e., they find completeness, by virtue of their incorporation into His body, the Church (Moule, p. 94).

That *plḗrōma* may be applied in some sense to the Church as well as to Christ is substantiated by several passages in Ephesians. Eph. 1:22f. clearly links the Church and the fulness of Christ, but it is not certain how the participle *plēroumḗnou* should be understood. If it is taken to be passive, then the meaning is that "the Church is to be the completion (*plḗrōma*) of Christ who will (as the Church grows) be totally ('all in all') completed" (Moule, p. 167). If the participle is in the middle voice and is taken in the active sense, the Church is seen as the completion of Christ: "the fulness of him who fills all in all" (RSV). Taking the participle as active but *plḗrōma* (v. 22) as a passive noun gives the meaning that the Church is "that which is filled by the all-filling Christ" (Moule, p. 167). Or, again taking the participle as active with *plḗrōma* in apposition to "Christ" instead of "the Church," the meaning is that "God has appointed Christ both to be head of the church and to be God's own full representative" (*IDB*, III, 827; cf. Col. 1:19; 2:9).

Ephesians 3:19 ("the fulness of God"; cf. Col. 2:10) and 4:12f. ("fulness of Christ") describe the future condition of Christians: "they are to be 'filled up to the full maturity intended by God'" (Moule, p. 169). "The fulness of God is that excellence, says Chrysostom, of which God himself is full" (Hodge, p. 190). In Eph. 1:10 Christ is said to have been sent forth by God "as a plan for the fulness of time" (cf. Gal. 4:4). The underlying concept here is of God's predetermined plan unfolding in history. When according to God's plan the time had become fully ripe, He sent His Son (see Ridderbos, p. 155). This act of God was "not just an end point, but the dawning of a new period in which God's promise and law (that is, even all that is said in the Scriptures) are fulfilled" (M. Barth, p. 88; cf. pp. 200-210).

FUNERAL. *See* BURIAL III.

FURLONG [Gk. *stádion*] (Mt. 14:24); AV "in the midst of the sea." In Lk. 24:13; Jn. 6:19; 11:18; Rev. 14:20; 21:16 the AV uses "furlong" for Gk. *stádion*, while the RSV uses "stadia" or translates into miles. The *stádion* is a Greek measure of length, being 600 Gk. ft., or 100 *orguiaí* equal to 185 m. (607 ft.) and thus somewhat less than a furlong, which is 201 m. (660 ft.). *See* WEIGHTS AND MEASURES.

FURNACE. The word is used to translate six terms in the OT and one in the NT. The OT refers to four general types: (1) a furnace or oven for baking bread; (2) a furnace or kiln for pottery; (3) a furnace or smelter for metals (rare because of the lack of metals in Palestine, thus mostly used metaphorically); and (4) a furnace used as an instrument of execution.

The Aram. *'attûn* (Dnl. 3), a loanword from Akk. *utūnu, atūnu*, meaning "oven," for baking bricks or smelting metals (S. Kaufman, *Akkadian Influences on Aramaic* [1974], p. 110), was Nebuchadrezzar's instrument for the attempted execution of those who would not worship his image.

The Heb. *kiḇšān* (Gen. 19:28; NEB "lime-kiln") is used metaphorically to describe the smoke of Sodom and Gomorrah. It denotes a kiln for firing pottery or reducing lime to the desired form. The AV translated it thus in Ex. 9:8, 10 and used it metaphorically for the smoke of Mt. Sinai in Ex. 19:18 ("kiln" in RSV and NEB).

The Heb. *kûr*, a smelting pot or furnace for metals, is often used metaphorically: God has redeemed His people Israel out of an iron furnace (Dt. 4:20; 1 K. 8:51; Isa. 48:10; Jer. 11:4); God will consume the dross of Israel in the furnace (Ezk. 22:18, 20, 22; NEB "crucible"); it is used literally of a furnace for smelting gold in Prov. 17:3; 27:21.

Hebrew *môqēḏ*, literally "hearth," is translated "furnace" in Ps. 102:3 (MT 4) (AV "hearth"; NEB "oven") as a figure of judgment; otherwise it is rendered "burning" (Isa. 33:14, also metaphorical) and "hearth" (Lev. 6:9).

The Heb. *'ālîl*, used only in Ps. 12:6 (MT 7; NEB "crucible"), is a metaphor of God's words that are as silver refined in a furnace.

The most common term, Heb. *tannûr*, is translated once as "furnace" by all three versions (Isa. 31:9), once metaphorically in the AV of God's presence (Gen. 15:17; RSV "fire pot"; NEB "brazier"), and all other times as "oven."

The Gk. *káminos*, used metaphorically of the fires of hell (Mt. 13:42, 50; Rev. 9:2) and of the appearance of Christ's feet (Rev. 1:15), is the common LXX term for Aram. *'attûn* and Heb. *kiḇšān* and *kûr*.

W. A. SHELL

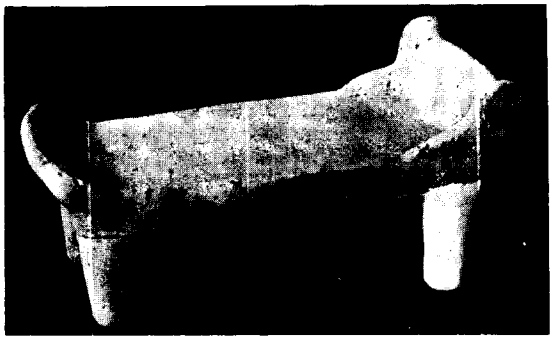
FURNACES, TOWER OF THE. This is the AV rendering (cf. NEB mg.) of Heb. *migdal hattannûrîm* in Neh. 3:11 and 12:38; it is rendered "Tower of the Ovens" in the RSV and NEB. *See* JERUSALEM; OVENS, TOWER OF THE.

FURNISH. To furnish is to supply with what is useful or necessary, to provide, equip. It translates one Hebrew and two Greek words: the hiphil (infinitive followed by the imperfect) of Heb. *'ānaq*, "supply literally" (Dt. 15:14, NEB "give lavishly"); Gk. *strōnnymi*, "spread" (Mk. 14:15; Lk. 22:12; NEB "set out"); *paréchō*, "provide" (1 Tim. 6:17; AV "give," NEB "endow"). "Furnish" is supplied in Ezk. 45:17.

FURNISHINGS [Heb. *kēlîm*] (Ex. 31:7; Nu. 1:50; 3:8; 4:15; 7:1; 19:18); AV also VESSELS, INSTRUMENTS; NEB also EQUIPMENT, VESSELS. *Kēlîm* is a very broad term; it can refer to vessels (e.g., Gen. 31:37), utensils of various sorts (e.g., Gen. 49:5), weapons (e.g., 2 K. 7:15), etc. The reference in the above passages is to cultic objects in the tabernacle. *See* FURNITURE; TABERNACLE.

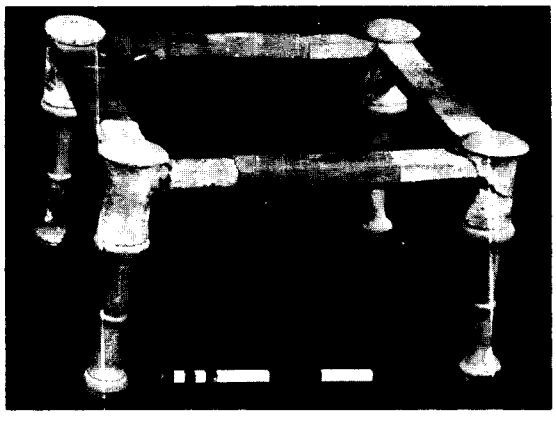
FURNITURE [Heb. *kēlîm*, Gk. *skeuḗ*]. The Hebrew term, from a root *klh*, "be complete," refers in general to manufactured articles and objects. It is used particularly in connection with the furnishings of the wilderness tabernacle (Ex. 29:9; 40:9). In Ex. 31:7; 39:33, the AV reads "furniture" where the RSV has "furnishings" and "utensils" respectively. In 1 Ch. 9:29 the word occurs in connection with the Davidic organization of tabernacle worship, when certain Levites were made responsible for attending to the furniture (AV "vessels") in the shrine. In Neh. 13:8 the reference is to the household utensils and furnishings being thrown out of Tobiah's room in the temple precincts by Nehemiah, the governor.

The AV renders Heb. *kār* in Gen. 31:34 by "furniture,"



Model couch from an Iron Age tomb at Lachish (Israel Department of Antiquities and Museums)

Bronze stool of the Persian period, reconstructed with wooden connecting pieces, from Sharuhen (Tell el-Fâr'ah South) (Israel Department of Antiquities and Museums)



but the RSV "saddle" conveys more properly the concept of a camel saddle.

See also TABERNACLE; TEMPLE IV. H. W. PERKIN

FURROW [Heb. *telem* (Job 31:38; 39:10; Hos. 10:4; 12:11), *gᵉḏûḏ* (Ps. 65:10 [MT 11]), *maʿᵃnâ*, *maʿᵃnîṯ* (1 S. 14:14; Ps. 129:3)]; AV also ACRE; NEB also PLOUGHED. In these passages the fields are pictured as they were in the springtime or late autumn. When the showers had softened the earth, the seed was sown and the soil turned over with the plow and left in furrows, not harrowed and pulverized as in our modern farming. The Syrian farmer today follows the custom of his ancient predecessors.

Hebrew *gᵉḏûḏ* probably refers to the ridges along the edge of the furrow rather than the furrow itself. *Maʿᵃnâ* denotes the length of a furrow in 1 S. 14:14, and is used figuratively (*Q maʿᵃnîṯ*) in Ps. 129:3.

See AGRICULTURE III.A.1; PLOW.

FURY; FURIOUS; FURIOUSLY [Heb. *ḥēmâ*, *bᵉḥēmâ* (Ezk. 23:25), *ḥārôn* (Ex. 15:7), *ʿeḇrâ* (Ps. 7:6 [MT 7]; Prov. 22:8), *zaʿam* (Isa. 10:5; Hab. 3:12), *zaʿap* (Isa. 30:30), *nāqām* (Isa. 59:17) *bᵉšiggāʿôn* (2 K. 9:20), *maḏhēḇâ* (Isa. 14:4), *qinʾâ* (Isa. 42:13); Aram. *qᵉṣap* (Dnl. 2:12), *ḥᵃmâ* (Dnl. 3:13, 19); Gk. *thymós* (Rev. 16:19; 19:15), *ánoia* (Lk. 6:11), *emmaínomai* (Acts 26:11), *orgḗ* (Rom. 2:8), *zḗlos*–'envy' (He. 10:27), *lían*–'exceedingly' (Mt. 2:16)]; AV also WRATH, JEALOUSY, "golden city" (Isa. 14:4), EXCEEDING (Mt. 2:16), etc.; NEB also INFURIATED, THREATS (Hab. 3:12), FIERCE, etc.

Most frequent is Heb. *ḥēmâ*, which basically means "heat" (see below); the AV frequently renders it "fury," while the RSV more often uses "wrath." The basic meaning of *zāʿap*, "to storm," is carried over in Isa. 30:30 to mean "furious (= raging) anger." In 2 K. 9:20 Jehu is described as one who "drives furiously" (lit. "with madness"; see below). The NEB follows the LXX in Prov. 22:8, reading *ʿᵃḇōḏāṯô* ("his work") instead of MT *ʿeḇrāṯô* ("his fury"), while in Isa. 14:4 the RSV, along with most modern translations, emends to *marhēḇâ*, supported by several versions and 1QIsa[a]; the AV interprets MT *maḏhēḇâ* on the basis of Aram. *dᵉhaḇ*, "gold," hence "golden city"

Fury is often paralleled with the words "anger" and "wrath." It emphasizes the intensity of the anger. Many of the Hebrew words for "fury" literally mean "heat" or "burning." Intense anger overpowers a person; both facial features and inner sensations support the image of burning. Examples of men who experienced great fury are Haman against Mordecai (Est. 3:5), Nebuchadrezzar against the three Hebrew slaves (Dnl. 3:19; cf. 2:12), and the scribes and Pharisees against Jesus (Lk. 6:11). It may even become a part of one's disposition; the RSV renders *baʿal ḥēmâ* as "a man given to anger," and the NEB translates the verse "a hot-head is always doing wrong" (Prov. 29:22). Human fury can get out of control and cause a person to behave irrationally; hence sometimes a word with the underlying meaning of "madness" appears in English as "fury" (2 K. 9:20; Lk. 6:11).

In reference to God, the emphasis is definitely on the intensity of His anger rather than on any inability to control it. The sins of His people arouse God's fury (Lev. 26:28; Rom. 2:8), and His enemies are consumed by it (Ex. 15:7). His fury is visualized as being poured out like fire (Lam. 2:4; Jer. 7:20, AV); it justly punishes the wicked. The judgment of the Lord is full of fury, as the prophets Isaiah, Jeremiah, and Ezekiel frequently tell us (Isa. 66:15; Jer. 21:5; Ezk. 24:13). In the same manner, Rev. 16:19 and 19:15 build up words to indicate how intense the "fury of his wrath" will be during the final judgment. But God's fury is not continuous; it becomes satisfied and ceases (Ezk. 16:42; 21:17; 24:13).

A definite relationship exists between anger and jealousy. Jealousy is the basis for both human (Prov. 6:34) and divine (Ezk. 5:13b; cf. 16:42) fury. Three times the RSV translates as "fury" the basic word for jealousy (Isa. 42:13; 59:17; He. 10:27; cf. NEB "jealous anger," Isa. 59:17).

Bibliography.–*TDNT*, III, *s.v.* θυμός κτλ.: θυμός (Büchsel); IV, *s.v.* νοέω κτλ.: ἄνοια (Behm); V, *s.v.* ὀργή κτλ.: ὀργή (Kleinknecht, Grether-Fichtner, Stählin). J. E. HARTLEY

FUTILE [Gk. *mataióō*] (Rom. 1:21); AV VAIN; [*mátaios*] (1 Cor. 3:20; 15:17; Tit. 3:9; 1 Pet. 1:18); AV VAIN; NEB also NOTHING, EMPTY, POINTLESS; **FUTILITY** [*mataiótēs*] (Rom. 8:20; Eph. 4:17); AV VANITY; NEB FRUSTRATION, GOOD-FOR-NOTHING;

"Futile" in the RSV is restricted to Gk. *mátaios* and its two cognates, rendered "vain" or "vanity" by the AV. While there is a strong semantic bond between *mátaios* and *kenós* (usually rendered "vain" in the AV and RSV), the two words are not fully synonymous (*see* VAIN). The term *mátaios* indicates that something is "worthless" because it is "deceptive" or "ineffectual." It appears to be what it is not, or lays claim to causing something when it has actually had no effect.

FUTURE. *See* ESCHATOLOGY.

GAAL gā'əl [Heb. *ga'al*–'scarab']. A man of whose antecedents nothing is known, except that his father's name was Ebed. He fomented and led an unsuccessful rebellion by the inhabitants of Shechem against Abimelech son of Gideon (Jgs. 9:26-45). *See also* ABIMELECH **4.**

GAASH gā'ash [Heb. *gā'aš*]. A mountain first mentioned in connection with the burial place of Joshua, "in his own inheritance at Timnath-serah, which is in the hill country of Ephraim, north of the mountain of Gaash" (Josh. 24:30; cf. Jgs. 2:9). The wadis ("brooks") of Gaash are mentioned as the native place of Hiddai (2 S. 23:30), or Hurai (1 Ch. 11:32), one of David's heroes. Though its location is unknown, the mountain might have been about 30 km. (20 mi.) SW of Shechem. *See also* TIMNATH-SERAH.

GABA gā'bə [Heb. *gāḇa'*].

1. (AV Josh. 18:24; Ezr. 2:26 par. Neh. 7:30). *See* GEBA.

2. (NEB 1 Esd. 5:30). *See* HAGAB.

GABAEL gab'ə-el [Gk. *Gabaēl*; Lat. *Gabelus*].

1. An ancestor of Tobit (Tob. 1:1).

2. A poor Jew of Rages, a city of Media, to whom Tobit lent ten talents of silver (1:14). The money was restored to Tobit in the time of his distress through his son Tobias, whom the angel Raphael led to Gabael at Rages (1:14; 4:1, 20; 5:6; 9:2, 5f.; 10:2).

GABATHA gab'ə-thə [Gk. *Gabatha*]. A eunuch of Artaxerxes the Great (Ad. Est. 12:1).

GABBAI gab'ī [Heb. *gabbay*; LXX Gk. *Gēbē*]. One of the chiefs of the Benjaminites in Jerusalem after the return from Exile in Babylonia (Neh. 11:8). Some (e.g., KoB, p. 106; *BH*) suggest reading *gibbōrê ḥayil*, "mighty men," on the basis of v. 14 and 1 Ch. 9:8f.; but cf. J. Myers, comm. on Nehemiah (*AB*, 1965), p. 184.

GABBATHA gab'ə-thə [Gk. *Gabbatha*, prob. < Aram. *gabbᶜṯā'*–'height,' or *gabbaḥtā'*–'open space'] (Jn. 19:13). Another name of the special pavement (Gk. *lithóstrōton*) where Pilate judged Jesus.

The excavations by L.-H. Vincent at the site of Herod's fortress, Antonia, include a massive Roman pavement, of which the central area is about 2000 sq. m. (2400 sq. yds.) and the blocks 1.2 by 1 by 0.6 m. (4 by 3.5 by 2 ft.). Some of these blocks have Roman games scratched on them (cf. Jn. 19:24f.). Theodosius (A.D. 530) called Antonia "the house of Pilate," and Vincent's discovery of this pavement supports this identification. Some think the pavement over the cisterns of Antonia dates to *ca.* A.D. 135. The so-called Ecce Homo Arch spanning the traditional Via Dolorosa at the west end of the pavement, the central arch of a triple triumphal arch, is also of Hadrianic construction.

Related data in Philo and Josephus indicate that Gabbatha was more likely located E of Herod's Palace, the so-called Tower of David near the Jaffa Gate (but *see* JERUSALEM III.H.10). The *sella curulis*, the judgment seat of the Romans, however, was a portable chair.

Bibliography.–M. Burrows, *BA*, 1 (1938), 17-19; C. C. Torrey, *ZAW*, 65 (1953), 232f. D. J. WIEAND

GABDES gab'dēs (1 Esd. 5:20, AV). *See* GEBA.

GABRIAS gā'brē-əs [Gk. *Gabrias*]. In Tob. 1:14 he is described as the brother of GABAEL, but in 4:20 as Gabael's father.

GABRIEL gā'brē-əl [Heb. *gaḇrîʾēl*–'God is powerful,' 'man of God' (?); Gk. *Gabriēl*].

A celestial being or personage who is mentioned by name only four times in Scripture. In Dnl. 8:16 he is described as "one having the appearance of a man," who was directed by "a man's voice" to make clear to Daniel the significance of the vision that he had just seen but could not comprehend. In discharging this function the being indicated that the vision had eschatological significance.

In Dnl. 9:21 he was spoken of as "the man Gabriel," who appeared to Daniel while the latter was praying at the time of the evening sacrifice. On this occasion the stated purpose of his mission was to impart to Daniel "wisdom and understanding" because Daniel was "greatly beloved" of God.

These two incidents are the only mention of Gabriel in the OT, and neither of them accords him the status of an "angel," or preferably, "messenger." Since Gabriel clearly bears divine authority for his mission and message, however, it is legitimate to regard him as a "messenger" of God. Thus by implication he is a surrogate for God, since in the OT where God's messengers appeared God Himself was present (cf. Ex. 3:2).

His supernatural capacities also included the power to revive Daniel from his trance (8:18) and to appear to him "in swift flight" (9:21) before interpreting the vision

of the seventy weeks. While Daniel was terrified by Gabriel's appearance on the first occasion, he was able to regard him as a "man" on the second. Whether or not Gabriel was the personage mentioned in 10:18 is unknown.

In the NT Gabriel was sent on a mission of annunciation on two occasions. In Lk. 1:11 he appeared to Zechariah the priest as an angel standing beside the altar of incense to announce the coming birth of a son. He subsequently revealed himself as one who stood in God's presence, and furnished his name. In a later appearance to Mary he announced the impending conception and birth of Jesus (1:31), and on that occasion was described simply as "the angel Gabriel." In contrast to the awe and fright that he inspired in Daniel, his function in NT annunciations was to reassure and comfort the one to whom he appeared, as well as to proclaim a demonstration of the power of God among people.

Gabriel may have been included among those beings who stood in the presence of God in Rev. 8:2, but this is at best uncertain since none of the angels is named. It is significant that each of the four biblical appearances of Gabriel was connected in some way with the implementing of the promise concerning the Messiah.

Gabriel figured prominently in the pseudepigraphal literature of the intertestamental and later periods. His status was raised to that of an archangel in 1 and 2 Enoch, and his activities were defined in terms of current Jewish folklore. Thus in 1 En. 40:3 he was represented as one of the four presences that looked down from heaven upon mankind. He was venerated as supreme over all powers (40:9), and was included among the Lord's glorious ones. In 1 En. 9:1-11 he was one of the four angels who took to God's presence the prayers of the martyrs as they appealed to God for an end to the lawlessness upon earth. In the narrative of 2 En. 24:1 Gabriel was described as one seated at the left hand of God in a position of supreme power. This function was indicated by the role he followed in avenging God by casting the wicked into the furnace (1 En. 54:6), which constitutes an interesting reflection on the book of Daniel. By this period Gabriel had become both intercessor and judge, thereby assuming functions that in the NT were accorded to Christ (cf. He. 7:25; Rom. 14:10).

The Jewish Targums elaborated on the role of Gabriel and attributed to his activities certain events that occurred in the earlier period of OT life. Thus he was credited with leading Joseph to his brothers (Gen. 37:15), participating with another archangel, Michael (cf. Dnl. 10:13, 21; 12:1), in the burial of Moses (cf. Dt. 34:6), and being sent by God to destroy the armies of Sennacherib (cf. 2 Ch. 32:21). In the cabalistic literature he participated in further exploits, along with Michael, Uriel, and Raphael.

L. HUNT

GAD gad [Heb. *gāḏ*–'fortune'; Gk. *Gad*].

1. The seventh son of Jacob, the first by Leah's maid Zilpah (Gen. 30:11); and the tribe named for him. His birth was welcomed by Leah with the cry, "Good fortune" (*Q bā'* *gāḏ*, "fortune came"; cf. the Pesh., Tgs.; *K b^egāḏ*, "with fortune"; cf. the LXX), and thus he was named. Some have sought to connect the name with that of the pagan deity Gad, of which traces are found in the names Baal-gad, Migdal-gad, etc. *See* FORTUNE.

The Blessing of Jacob (Gen. 49:19) first plays upon the name as if it meant "troop" or "marauding band" (cf. *gāḏaḏ* and its related noun *g^eḏûḏ*). This is doubtless a reference to the high spirit and valor that characterized the descendants of Gad. The enemy who attacked them exposed himself to grave peril. The Blessing of Moses describes Gad: "couches like a lion, he tears the arm, and the crown of the head" (Dt. 33:20). Leonine qualities are also ascribed to the Gadites, mighty men of valor, who joined David. Their faces were like the "faces of lions," and they were "swift as the gazelles upon the mountains" (1 Ch. 12:8). Among their captains "the least was equal to a hundred, and the greatest to a thousand" (v. 14).

Of the patriarch Gad almost nothing is recorded. Seven sons went down with him into Egypt when Jacob accepted Joseph's invitation (Gen. 46:16). At the beginning of the desert march after leaving Egypt the tribe Gad numbered 45,650 "from twenty years old and upward, all that were able to go forth to war" (Nu. 1:24f.). In the plains of Moab its number had fallen to 40,500 (26:18), tenth in size among the tribes. Gad's place was with the standard of the camp of Reuben on the south side of the tabernacle (2:14). The prince of the tribe was Eliasaph son of Deuel (1:14) or Reuel (2:14). Among the spies Gad was represented by Geuel son of Machi (13:15).

The biblical information regarding the tribes in eastern Palestine is scant compared with the details given in the genealogical and geographical lists of the tribes settled in western Palestine. These lists say very little that could shed light on the families, their lands, and the history of Gad; this information can be inferred (with difficulty) only from outside documents. Although archeological research has been carried out in this area no less than in other areas in eastern Palestine, with the exception of Dhībân (*see* DIBON 2) no systematic archeological excavations have added to our knowledge of the biblical period. Yeivin (*EB*, II, 423-29) believed that two waves of Israelite immigration into eastern Palestine took place at two different periods. Analysis of documents seems to show, in his opinion, that the first wave of Israelite tribes preceded the foundation of the kingdom of Sihon, and apparently also the consolidation of the kingdom of Moab, although Edomite and Moabite permanent settlements could have existed there before. The second wave, at the end of the 13th cent. B.C., led to a settlement in eastern Palestine. According to Yeivin the Gadites seem to have been among this second wave.

The Gadites established eight settlements upon entering their territory (Nu. 32:34-36), which consisted of two parts, one the territory between the brook Heshbon and the river Jabbok, the other a strip lying SE of this area bordered by the Arnon River in the south and in the west by the watershed. Most of the place names have been identified, and their examination proves that all of them were founded anew at the beginning of the Israelite period after their destruction in the 13th cent. B.C. It is not clear, however, whether the Gadites founded these new settlements or whether they settled there after the Moabites and the Amorites. According to Josh. 13:24-28, the kingdom of Sihon was divided between the Reubenites (13:21), who inherited most of it, and the Gadites, who took possession of a smaller part.

The identification of the boundaries of the territory of Gad depends on the place name RAMATH-MIZPEH, which Glueck identified with Khirbet Umm-dananir, in which case the territory bounded by the secondary watershed of the southern Gilead mountains lay between the brooks that flow into the Jordan from the west and those that flow into the southern course of the Jabbok from the east, from Heshbon to Ramath-mizpeh (Josh. 13:26). Another strip jutted out from the above-mentioned territory toward the southeast between Moab S of the Arnon, the territory of Reuben, and the area that later was conquered by the Ammonites. Possibly another area, consisting of

the city of Dibon, was in their hands; but this may be the description of the situation at a later time, when the tribe of Reuben was weakened by border strife and Gad had taken possession of parts of Reuben's territory (Nu. 33:45).

The northern border reached Mahanaim (near 'Ajlûn) and, to the northeast, Lo-debar; from here it passed through the Jordan Valley to the Sea of Galilee (Josh. 13:27); its western border was the Jordan. The southern border is not mentioned; but apparently it went through the brook Heshbon toward the east, and from the city of Heshbon it turned SE to the Arnon.

Reuben and Gad were absent from the muster against Sisera (Jgs. 5:15-17), but they united with their brethren in taking vengeance on Benjamin; Jabesh-gilead, from which no contingent was sent, was destroyed (21:8-12). Jephthah was probably from this tribe, since his house at Mizpah (Jgs. 11:34) was apparently within its territory (Josh. 13:26). Gad furnished a refuge for some of the Hebrews during the Philistine oppression (1 S. 13:7). Certain Gadites attached themselves to David while he was hiding from Saul at Ziklag (1 Ch. 12:8-15). A company of them also joined in making him king at Hebron (12:38). In Gad the adherents of the house of Saul gathered around Ish-bosheth (2 S. 2:8-10). David went there in his flight from Absalom (17:24). Gad fell to Jeroboam at the disruption of the kingdom, and Penuel, apparently within its borders, was first fortified by Jeroboam (1 K. 12:25). It appears from the Moabite Stone (*ca.* 830 B.C.) that part of the territory afterward passed into the hands of Moab. (Note that according to line 10 Gadites had occupied Ataroth [cf. Nu. 32:34] *m'lm,* "from of old," i.e., for a long time.) Under Omri this was recovered; but Moab again asserted its supremacy. Elijah probably belonged to this district, and the brook Cherith must be sought in one of its glens.

Gad formed the main theater of the long struggle between Israel and Syria. At Ramoth-gilead Ahab received his death wound (1 K. 22). Under Jeroboam II this country was once more an integral part of the land of Israel. In 734 B.C., however, Tiglath-pileser appeared and conquered all eastern Palestine, carrying its inhabitants captive (2 K. 15:29; 1 Ch. 5:26). This seems to have furnished the occasion for Ammon to occupy the country (Jer. 49:1). In Ezekiel's ideal picture (48:27, 34) Gad was allotted the southernmost of the tribal portions. Obadiah seems to have forgotten the tribe, and its territory was assigned to Benjamin (Obad. 19). In Rev. 7:5, however, Gad is placed among the tribes of Israel.

See Vol. I, Map VI.

2. David's seer (*ḥōzeh,* 1 Ch. 21:9; 29:29; 2 Ch. 29:25), or prophet (*nāḇî'*; cf. 1 S. 22:5; 2 S. 24:11). He appears (1) to advise David, when David was an outlaw fleeing before Saul, to return to the land of Judah (1 S. 22:5); (2) to rebuke David and give him his choice of punishments when, in spite of the advice of Joab and the traditional objections (cf. Ex. 30:11-16), he numbered the people of Israel (2 S. 24:11; 1 Ch. 21:9f.); (3) to instruct David to erect an altar on the threshing floor of Araunah when the plague that had descended on Israel ceased (2 S. 24:18; 1 Ch. 21:18); and (4) to assist in the arrangement of Levitical music with cymbals, psalteries, and harps (cf. 2 Ch. 29:25). Of his writings none is known, though he is said to have written a history of a part of David's reign (1 Ch. 29:29) E. D. ISAACS

GAD ABOUT [Heb. *'āzal*] (Jer. 2:36); NEB omits; [Gk. *periérchomai*] (1 Tim. 5:13); AV WANDER ABOUT; NEB GO AROUND. Jeremiah asks the people of Judah why they are going about seeking alliances — first with Assyria and now with Egypt. God will shame them for disloyalty to Him by breaking the power of Egypt as well as that of Assyria. In the NT Paul warns Timothy that widows who make a practice of going about from house to house learn to be idlers, gossipers, and busybodies.

GAD, RIVER OF (AV 2 S. 24:5). The AV follows the MT, which reads *naḥal haggāḏ,* while the RSV ("valley, toward Gad") and the NEB ("gorge, proceeding towards Gad"), following Lucian, emend to *naḥal 'el-haggāḏî.* The valley is probably the Arnon.

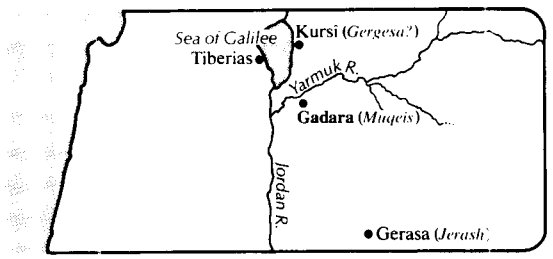
GADARA gad'er-ə [Gk. *Gadara*]; **GADARENES** gad'ə-rēnz [Gk. *Gadarēnoi*]. Gadara was one of the more important cities of the DECAPOLIS (Polybius v.71.3; Pliny *Nat. hist.* v.74; Josephus *Ant.* xvii.11.4 [320]). The Gadarenes were the inhabitants of the city and the attached territory (*Ant.* xv.10.2f. [351, 354-59]). The designation "territory of the Gadarenes" (Gk. *hē chōra tōn Gadarēnōn*) occurs as the accepted reading only in Mt. 8:28. Variant readings include "Gergesenes" and "Gerasenes." In Mark (5:1) and Luke (8:26, 37) "Gerasenes" has the best support."Gadarenes" and "Gergesenes" are the variant readings. The textual tradition reflects confusion over the story's proper locale ("opposite Galilee" according to Lk. 8:26; *see* GERASA I). *See also* GALILEE VI.

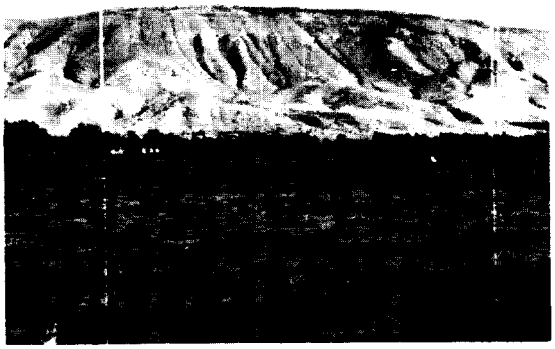
Gadara was already a well-established and significant fortress when Antiochus III subdued it (218 B.C.) and later occupied it (198 B.C.) after his victory over Scopas at Paneas (Polybius xvi.39.3, quoted in *Ant.* xii.3.3 [136]). Alexander Janneus captured the city during the Maccabean period (*Ant.* xiii.13.3 [356]; *BJ* i.4.2 [86]) and it remained in Jewish territory until it was annexed to the province of Syria by Pompey (*Ant.* xiv.4.4 [74-76]; *BJ* i.7.7 [155f.]). The passages in Josephus (*Ant.* xiv.5.4 [89-91]; *BJ* i.8.5 [170]) that are frequently used to show that Gadara functioned as the seat of one of the five councils (Gk. *synédria*) probably refer instead to Adora (Dûrā) in Idumea or Gazara (Tell Jezer) in Judea (cf. *HJP*^{2}, II, 134f.; Thackeray, *Josephus* [*LCL*], II, 78f. n. b; VIII, 494f. n. d).

In 30 B.C. Augustus gave Gadara to Herod the Great, whose oppressive policies the Gadarenes protested several times (*Ant.* xv.10.2 [351]; xv.10.3 [354-59]). After Herod's death in 4 B.C., Gadara was again annexed to the province of Syria (*Ant.* xvii.11.4 [320]; *BJ* ii.6.3 [97]) and was later sacked by Jews during the second revolt (A.D. 66). This resulted in the slaughter and imprisonment of Jews by the Gadarenes and the inhabitants of neighboring Hippos (cf. *BJ* ii.18.1 [457-460]; ii.18.5 [477f.]). Josephus refers to a Gadara occupied by Vespasian "on the fourth of the month Dystrus" (*ca.* March 21) A.D. 68, but this town is probably to be identified with Gedor (Tell Jedûr) in Perea (see Thackeray, *Josephus* [*LCL*], III, 120f. n. b; *HJP*^{2}, II, 134).

A fragmentary inscription ("col[onia] Valen[tia] Gadara"; *CIL,* III, 181) discovered by E. Renan (*Mission de Phénicie* [1864-1874], p. 191) indicates that Gadara was probably a Roman colony later in the imperial period. By the 2nd cent. A.D. the large Christian community there had developed into a bishopric. In A.D. 325, a bishop representing Gadara participated in the Council of Nicea (see Honigmann, pp. 429-439).

The ruins of Muqeis (or Umm Qeis) have long been identified as the remains of the ancient city of Gadara.





Eastern shore of the Sea of Galilee, possibly where Jesus cast the demons into the swine (W. S. LaSor)

The city was strategically situated on a headland reaching westward into the Jordan Valley, protected on the north by the Nahr Yarmûk, and on the south by the Wâdī ʿArab, and located about 10 km. (6 mi.) SE of the Sea of Galilee. In 1974 Ute Wagner-Lux directed a survey of Muqeis, which was followed by archeological campaigns under the aegis of Das Deutsche Evangelische Institut in 1976 and 1977 (reported in *ZDPV*, 94 [1978], 135-144, 161-63). The remains demonstrate that Gadara was indeed a significant and vital Greek *pólis* (*Ant.* xvii.11.4 [320]; *BJ* ii.6.3 [97]) containing temples, theaters, a hippodrome, an aqueduct, etc. The epitaph of a Gadarene named Apion refers to Gadara as a *chrēstomousía* ("city of culture"). Philodemus the Epicurean, Meleager the epigrammatic poet, Menippus the Cynic and satirist, and Theodorus the orator were all sons of Gadara (Strabo *Geog.* xvi.2.29 [758]), as were the Cynic Oenomaus (D. R. Dubley, *History of Cynicism* [1937], pp. 162-170) and the rhetorician Apsines (F. Miller, *Journal of Roman Studies*, 59 [1969], 16).

The territory of Gadara extended at least as far north as the Nahr Yarmûk (Pliny *Nat. hist.* v.16.74) and probably included the renowned hot springs of Ematha (Tell el-Ḥammeh; Eusebius *Onom.* 22.26); it probably extended as far south as the Wâdī et-Taiyibe; toward the east, it stretched at least as far as el-Khureibe, where the city aqueduct originated; its western boundary was the valley of the Jordan (*BJ* iii.3.1 [37]) and perhaps the Sea of Galilee (Mt. 8:28; *Vita* 9 [42]).

Bibliography.—T. Baarda, "Gadarenes, Gerasenes, Gergesenes, and the 'Diatessaron' Traditions," in E. E. Ellis and M. Wilcox, eds., *Neotestamentica et Semitica: Studies in Honour of Matthew Black* (1969), pp. 181-197; *HJP*², II, 49f., 132-36; E. Honigmann, *Byzantion*, 9 (1936), 429-449; B. M. GADDI gad'ī [Heb. *gaddî*–'my fortune'; Gk. *Gaddi*].

1. One of the twelve spies, son of Susi, and a leader of Manasseh (Nu. 13:11).

2. [Gk. Apoc. *Gaddis, Gaddi*] (1 Macc. 2:2); AV CADDIS; NEB GADDIS. Surname of John, the eldest brother of Judas Maccabeus.

GADDIEL gad'i-əl [Heb. *gaddî'ēl*–'blest of God']. One of the twelve men sent by Moses from the wilderness of Paran to spy out the land of Canaan. He represented the tribe of Zebulun (Nu. 13:10).

GADFLY [Heb. *qereṣ*] (Jer. 46:20); AV DESTRUCTION. An insect that nips, stings, or pinches, perhaps either the horsefly (*Tabanidae* family) or the botfly (*Oestridae*) whose larvae are parasitic on horses and other animals. The mosquito is also suggested (KoB, p. 857). Since the beautiful heifer of Egypt has turned and fled because of the painful sting of Nebuchadrezzar, it would seem that the metaphor intended is that of the gadfly and not the mosquito, which might have been more annoying than painful.

GADI gā'dī [Heb. *gāḏî*–'fortunate']. The father of Menahem, one of the kings of Israel who reached the throne through murder (2 K. 15:14, 17).

GADITES gad'īts [Heb. *haggāḏî*]. Members of the tribe of Gad (Dt. 3:12, 16; 4:43; etc.).

GAHAM gā'ham [Heb. *gaḥam*]. A son of Nahor, brother of Abraham, by his concubine Reumah (Gen. 22:24).

GAHAR gā'här [Heb. *gaḥar*; Gk. *Gaer, Gaar,* Apoc. *Geddour*]; AV Apoc., NEB Apoc., GEDDUR. A family name of temple servants who came up with Zerubbabel to Jerusalem (Ezr. 2:47; Neh. 7:49; 1 Esd. 5:30).

GAIN. In the OT various idiomatic and periphrastic constructions express the verb "gain"; sometimes the RSV supplies "gain" from the context (e.g., Prov. 10:2; 20:17), thus translating the sense of the Hebrew rather than the literal words. Most frequently the root *bṣʿ* underlies the RSV's rendering (cf. *TDOT*, II, *s.v.* "bṣʿ" III [D. Kellermann]). The use of the participle with the cognate accusative (*bōṣē(a)ʿ bāṣaʿ*; cf. W. Gesenius, E. Kautzsch, A. E. Cowley, *Hebrew Grammar* [1910], § 117 p-r) describes robbers or plunderers, who "get gain" by violence (Prov. 1:19; Hab. 2:9). Jeremiah uses the same construction in denouncing the people of Judah, all of whom are "greedy for unjust gain" (6:13; 8:10; cf. also Ezk. 22:27).

In Job 30:2 and Jer. 2:18 the RSV renders the Hebrew idiom *mâ* ("what") + *l*ᵉ + pronominal suffix ("to/for me/you"; cf. the American idiom "what's in it for you") as "what could I gain," "what do you gain." Related expressions with *yiṯrôn*, "profit," occur in Eccl. 1:3, where the RSV renders Heb. *mah yiṯrôn lāʾāḏām* by "what does man gain" (cf. 3:9; 5:16 [MT 15]). In Eccl. 2:11 the RSV translates *ʾên yiṯrôn* (lit. "there is no profit") as "there is nothing to be gained."

In the remaining occurrences various Hebrew words are translated "gain" on the basis of context. Heb. *gāḏēl* (lit. "great") describes Isaac's accumulation of wealth (Gen. 26:13); *rāḵaš* (lit. "gather property") describes Jacob's accumulation of livestock (31:18; 46:6), as does *ʿāśâ* (lit. "do, make") in 31:1. In 47:27 *ʾāḥaz* (lit. "seize, grasp") describes Jacob's prosperous growth while in Egypt.

"Gain" is not limited to a materialistic sense, however. We thus read that the enemy "gained [*gāḇar*, "be superior"] an advantage" in battle (2 S. 11:23) and the wise men were trying to "gain [Aram. *zᵉḇan*, "buy"] time,"

i.e., delay (Dnl. 2:8). *Māṣā'* (lit. "find") occurs in reference not only to material growth (Hos. 12:8 [MT 9]), but also to spiritual or religious growth (Prov. 16:31). *Qānâ* (lit. "acquire") can refer to the acquisition of knowledge (Prov. 15:32), as can *lāqaḥ* (lit. "take"; Prov. 21:11). In Proverbs the father instructs the son to "gain insight" (Heb. *lāḏa'aṯ bînâ*, lit. "to know insight") by listening to the father's instruction (4:1); the wisdom teacher instructs his pupil to listen and accept instruction that he may "gain wisdom" (Heb. *ḥākam*, lit. "be wise"; 19:20); the man of understanding will "gain [*bîn*, "understand"] knowledge" when he is reproved (19:25).

As a noun "gain" usually has a negative connotation. *Beṣa'* is most frequent, and is sometimes translated "dishonest gain" (Jer. 22:17; Ezk. 22:13). Thus Samuel's sons "turned aside after gain," taking bribes and perverting justice (1 S. 8:3; cf. Prov. 15:27). Similarly Isaiah denounces the leaders because they went after their own gain (56:11). In several texts the upright or pious person is contrasted with those who go after gain (Ps. 119:36; Prov. 28:16; Isa. 33:15; Ezk. 33:31).

Only in three passages is "gain" used in a neutral sense. Eliphaz denies that God benefits from anyone's piety (Job 22:3). In Mic. 4:13 the wealth of conquered enemies will be given to the Lord. In Jer. 20:5 it is just the reverse: the wealth and all the "gains" (*y^egî'ā*) of Judah will be given to Babylon.

In Prov. 3:14 Heb. *saḥar* is used first positively, of the benefit of acquiring wisdom, and then negatively, of gain from silver. In Prov. 31:11 Heb. *šālāl* (usually a negative word meaning "booty"; cf. W. McKane, Proverbs [*OTL*, 1970], pp. 666f.) means the profit that the good wife is able to provide for her husband. The remaining occurrences are negative. Heb. *t^eḇû'â* (lit. "what is brought in"), a neutral word, is clearly pejorative in Prov. 10:16 and Eccl. 5:10 (MT 9). Heb. *kišrôn* ("skill"), used elsewhere in Ecclesiastes positively (2:21; 4:4), has a neutral or negative connotation in 5:11 (MT 10).

In the NT the situation is similar. Of the verbs, Gk. *kerdaínō* occurs most frequently. It is used of material gain in Mt. 16:26 par., where Jesus contrasts the value of material possessions with the value of one's life (cf. also Jas. 4:13). One may, however, "gain" a brother (Mt. 18:15) through reconciliation, and Paul strives to gain Christ as his sole possession (Phil. 3:8; see *TDNT*, III, 673). Similarly, Gk. *ōpheléō* can refer to material gain (Mt. 15:5 par.), but also to personal advantage of a political (Mt. 27:24) or spiritual nature (1 Cor. 13:3). Gk. *peripoiéō* can mean "leave alive, preserve" (Lk. 17:33) and also "acquire" (1 Tim. 3:13). Gk. *ktáomai* refers to winning eternal life by perseverance through persecution (Lk. 21:19). Material gain is clearly in view in Lk. 19:15 (*diapragmatéuomia*, "gain by trading, earn") and in Rev. 18:15 (*ploutéō*, "be rich"). In 2 Cor. Paul uses "gain" (*symphérō*) in its general sense; cf. 2:11 where he explains that forgiveness is essential "to keep Satan from gaining advantage" (*pleonektéō*).

In Jude 4 ungodly people have "secretly gained admission" (*pareisdú[n]o*) to the church. In 1 Cor. 7:21 Paul tells slaves to "gain their freedom" (*eleútheros gínomai*, lit. "become free") if they are given the opportunity.

Two of these verbs have cognate nouns. Thus *kérdos* occurs in conjunction with *kerdaínō* in Phil. 3:7f. (cf. also Phil. 1:21), and *ōphéleia* (see *ōpheléō* above) occurs in Jude 16 in a pejorative sense of boasters who flatter people to "gain advantage." Other pejorative nouns are *ergasia*, which is used of the commercial profit from a slave girl's soothsaying (Acts 16:16, 19); *misthós*, which describes Balaam's love for profit from wrongdoing (2 Pet. 2:15; Jude 11); *aischrokerdés*, "greedy for gain," which neither deacons (1 Tim. 3:8) nor bishops (Tit. 1:7) are supposed to be (cf. also *aischrokerdṓs*, "shameful gain" in 1 Pet. 5:2), and *aiskroú kérdous*, "base gain," in Tit. 1:11). Gk. *porismós* is apparently a neutral word, for in 1 Tim. 6:5 it is used disparagingly, but in v. 6 it is admitted that there is "great gain in godliness with contentment." Gk. *óphelos* is another general word for benefit (1 Cor. 15:32). G. A. L.

GAINSAY. Archaic term used in the AV for Gk. *antilégō* (Rom. 10:21, RSV "contrary"; Tit. 1:9, RSV "contradict"), *anteípon* (Lk. 21:15, RSV "contradict"), *antilogía* (Jude 11, RSV "rebellion"), *anantirrhḗtōs* (Acts 10:29, RSV "without objection").

GAIUS gā'yəs [Gk. *Gaïos*].

1. The Gaius to whom 3 John is addressed. He is spoken of as "the beloved" (3 Jn. 1f., 5, 11) and is commended for "the truth of [his] life" and his hospitality (vv. 3, 5f.).

2. Gaius of Macedonia, one of Paul's "companions in travel" (Acts 19:29). He was one of those who were seized by Demetrius and the other silversmiths in the riot at Ephesus during Paul's third missionary journey.

3. Gaius of Derbe, who was among those who awaited Paul at Troas and accompanied him on his return to Jerusalem on his third missionary journey (Acts 20:4). It is possible here that "of Derbe" should be taken with Timothy and that Gaius should be classed with the Thessalonians. According to the Western reading he was not from Derbe but "of Doberus," another Macedonian town.

4. Gaius, the host of Paul when he wrote the Epistle to the Romans (Rom. 16:23). As Paul wrote this Epistle from Corinth, it is probable that this Gaius is identical with **5.**

5. Gaius, whom Paul baptized at Corinth (1 Cor. 1:14). See **4** above.

GALAAD gal'ə-ad (AV Jth. 1:8; 1 Macc. 5:9, 55). *See* GILEAD.

GALAL gā'lal [Heb. *gālāl*]. The name of two Levites, one mentioned in 1 Ch. 9:15, the other in 1 Ch. 9:16 and Neh. 11:17.

GALATIA gə-lā'shə [Gk. *Galatia*]; **GALATIANS** [Gk. *Galátai*] (Gal. 3:1).

I. Two Senses of the Name
II. Origin of the Name
III. Luke's Narrative
IV. Paul's Use of "Galatians"

I. Two Senses of the Name.–"Galatia" was a name used in two different senses during the 1st cent. A.D.: (1) geographically, to designate a country in the northern part of the central plateau of Asia Minor, touching Paphlagonia and Bithynia on the north, Phrygia to the west and south, Cappadocia and Pontus to the southeast and east, and situated about the headwaters of the Sangarius and the middle course of the Halys; (2) politically, to designate a large province of the Roman empire, including not merely the country Galatia but parts of Paphlagonia, Pontus, Phrygia, Pisidia, Lycaonia, and Isauria. The name occurs in 1 Cor. 16:1; Gal. 1:2; 1 Pet. 1:1; and perhaps 2 Tim. 4:10 (*see* GAULS). Some writers assume that Galatia is also mentioned in Acts 16:6 and 18:23, but the Greek there has the phrase *hē Galatikḗ chṓra*, "Galatic region" or "territory." Although the RV has "Galatia," it must not be assumed without proof that "Galatic region" is synonymous with "Galatia." (To cross "British territory"

GALATIA

means something different from crossing "Britain.") So "Galatic region" must have had a distinct connotation, and the writer had some reason for using that term, even if it were geographically equivalent to Galatia (but see *SPT*, pp. 104, 194).

Two questions must be answered. (1) In which of the two senses is "Galatia" used by Paul and Peter? (2) What did Luke mean by "Galatic region" or "territory"? These questions have not merely geographical import; they bear most closely, and exercise determining influence, upon many points in the biography, chronology, and missionary work and methods of Paul.

II. Origin of the Name.–The name "Galatia" was introduced into Asia after 278 B.C., when a large body of migrating Gauls (Gk. *Galátai*) crossed from Europe at the invitation of Nicomedes I of Bithynia; after ravaging much of western Asia Minor they were gradually confined to a district, and boundaries were fixed for them after 232 B.C. Thus originated the independent state of Galatia, inhabited by three Gaulish tribes, Tolistobogii, Tectosages, and Trocmi, with three city centers, Pessinus, Ancyra (modern Ankara), and Tavium. They had brought their families, and therefore continued to be a distinct Gaulish ethnic community. The Gaulish language was apparently imposed on the former inhabitants, who remained in the country as an inferior caste. The Galatai soon adopted the religion of the country but retained also their own, at least until the 2nd cent. A.D.; it was politically important for them to maintain and exercise the powers of the old priesthood, as at Pessinus, where they shared the office with the old priestly families.

The Galatian state of the three tribes lasted until 25 B.C., governed first by a council and by tetrarchs or chiefs of the twelve divisions of the people (four to each tribe), and, after 63 B.C., by tribal kings. Deiotarus established himself as sole king by murdering the other two kings, and after his death in 40 B.C. his power passed to Castor and then to Amyntas (36-25 B.C.). Amyntas bequeathed his kingdom to Rome, and it was made a Roman province (Dio Cassius *Hist.* xlviii.33.5; Strabo *Geog.* xii.5.1 omits Castor). Amyntas had ruled also parts of Phrygia, Pisidia, Lycaonia, and Isauria. The new province included these parts, and to it were added Inner Paphlagonia in 6 B.C., part of Pontus in 2 B.C. (called Pontus Galaticus in distinction from Eastern Pontus, which was governed by King Polemo and styled Polemoniacus), and in A.D. 64 also Pontus Polemoniacus. Part of Lycaonia was non-Roman and was governed by King Antiochus; from A.D. 41 to 72 Laranda (Karaman) belonged to this district, which was distinguished as "Antiochiana regio" from the Roman "regio Lycaonia" called "Galatica."

This large province was divided into *regiones* for administrative purposes; and the *regiones* coincided roughly with the old national divisions of Pisidia, Phrygia (including Pisidian Antioch, Iconium, Apollonia), Lycaonia (including Derbe, Lystra, and a district organized on the village system), etc. The Romans called this province "Galatia," the kingdom of Amyntas. The extent of the application of names like Asia and Galatia, in the Roman language, varied with the shifting boundaries of each province. The name Galatia is used to indicate the contemporary province by Ptolemy, Pliny (*Nat. hist.* v.42 [146]), and Tacitus (*Hist.* ii.9; *Ann.* xiii.35), by later chroniclers when using the term in a sense no longer customary, and in inscriptions (*CIL*, III, 254,272; VI, 332,1408f.; VIII, 11,028,18,270, etc.). These are almost all Roman sources, and express a purely Roman view. If Paul used the name "Galatia" to indicate the province, then he consistently and naturally took a Roman view, used names in a Roman connotation, and grouped his churches according to Roman provincial divisions; and that view is characteristic of the apostle, who looked forward from Asia to Rome (Acts 19:21), aimed at imperial conquest for Christ, and crossed the empire from province to province. Macedonia, Achaia, and Asia were always provinces to Paul. On the other hand, in the Greco-Asiatic world the tendency was to speak of the province either as the Galatic Eparchia (as at Iconium in A.D. 54, *CIG*, 3991) or by enumerating its *regiones* (or a selection of them). The latter method was followed in a number of inscriptions found in the province (*CIL*, III, *passim*).

III. Luke's Narrative.–Applying these contemporary facts to Luke's interpretation of the narrative, the evangelization of the province began in Acts 13:14. The stages were: (1) the audience in the synagogue at Pisidian Antioch, 13:14-43; (2) almost the whole city, 13:44; (3) the whole region, i.e., a large district that was affected from the capital (as the whole of Asia was affected from Ephesus, Acts 19:10); (4) Iconium, another city of this region — in 13:51 no boundary is mentioned; (5) a new region Lycaonia with two cities and a surrounding district, 14:6; (6) return journey to organize the churches in (a) Lystra, (b) Iconium, and (c) Pisidian Antioch (14:21-23, adopting the secondary reading of B. F. Westcott and F. J. A. Hort, *The NT in the Original Greek* [1886], Gk. *kaí eis Ikónion kaí Antiócheian*, and distinguishing the two regions Lycaonia and Iconium-Antioch); (7) progress across the region Pisidia, where no churches were founded (14:24; Pisidian Antioch is not in this region, which lies between Antioch and Pamphylia).

Again (in 16:1-6) Paul revisited the two *regiones*: (1) Derbe and Lystra, i.e., "regio Lycaonia Galatica"; (2) the Phrygian and Galatic region, i.e., the region that was racially Phrygian and politically Galatic. Paul traversed both regions, making no new churches but only strengthening the existing disciples and churches. In 18:23 he again visited the two *regiones*, and they are briefly enumerated: (1) the Galatic region (so called briefly by a traveler who had just crossed Antiochiana and distinguished Roman Lycaonia from it as Galatica); (2) Phrygia. On this occasion he specially appealed to individual disciples. It was a final visit before Paul went to Rome and the west. The contribution to the poor of Jerusalem was evidently instituted on this occasion, and the proceeds later were carried by Gaius of Derbe and Timothy (Acts 20:4; 24:17; 1 Cor. 16:1). This was a device to bind the new churches to the original center of the faith.

According to Lukan usage, these four churches always belong to two *regiones*, Phrygia and Lycaonia; and each *regio* is in one case described as Galatic, i.e., part of

the province of Galatia. Luke did not follow the Roman custom, as Paul did; he kept the custom of the Greeks and Asiatic peoples, and styled the province by enumerating its *regiones*, using the expression "Galatic" (as in "Pontus Galaticus" and at Iconium, *CIG*, 3991) to indicate the supreme unity of the province. By using this adjective about both *regiones* he made it clear that for him all four churches were included in that unity.

From Paul's references we gather that he regarded the churches of Galatia as one group, converted together (Gal. 4:13), exposed to the same influences and changing together (1:6, 8; 3:1; 4:9), naturally visited at one time by a traveler (1:8; 4:14). He never thought of churches of Phrygia or of Lycaonia, only of the province Galatia (as of provinces Asia, Macedonia, Achaia). Paul did not include in one class all the churches of one journey; he classed the churches of Macedonia separately from those of Achaia. Troas, Laodicea, and Colossae he classed with Asia (as Luke did Troas, Acts 20:4f.), Philippi with Macedonia, Corinth with Achaia. These classifications are true only of the Roman usage, not of the early Greek usage. The practice (later universal) of classifying churches by provinces was derived from the usage of the apostles, according to Theodore of Mopsuestia on 1 Tim. 3:8 (Swete, *OTG*, II, 121; cf. A. von Harnack, *Mission and Expansion of Christianity in the First Three Centuries*, I [repr. 1962], 446f.; II [1904-1905], 96). His churches then belonged to four provinces, Asia, Galatia, Achaia, and Macedonia. There were no other Pauline churches; all united in the gift of money that was carried to Jerusalem (Acts 20:4; 24:17).

IV. Paul's Use of "Galatians."–The people of the province of Galatia, consisting of many diverse ethnic groups, when summed up together were called *Galatae*, e.g., by Tacitus (*Ann.* xv.6). An inscription of Apollonia Phrygiae also called the people of the city *Galatae*. If Paul spoke to an individual church at Philippi or Corinth, he addressed the members as Philippians or Corinthians (Phil. 4:15; 2 Cor. 6:11), not as Macedonians or Achaeans; but when he addressed a group of several churches (as Antioch, Iconium, Derbe, and Lystra) he could use only the term for the province.

All attempts to find in Paul's letter to the Galatians any allusions that reveal the distinctive character of the Gauls or Galatai have failed. The Gauls were an aristocracy in the land they had conquered. They clung stubbornly to their own Celtic religion long after the time of Paul, even though they also acknowledged the power of the old goddess of the country. They spoke their own Celtic tongue. They were proud, even boastful, and independent. They kept their native law under the empire. The "Galatians" to whom Paul wrote had changed very quickly to a new form of religion, not out of fickleness, but out of a certain propensity to a more oriental form of religion that exacted of them more sacrifice of a ritual type. They needed to be called to freedom; they were submissive rather than arrogant. They spoke Greek. They were accustomed to the Greco-Asiatic law: the law of adoption and inheritance which Paul mentioned in his letter. (This law is not Roman, but Greco-Asiatic.)

GALATIANS, EPISTLE TO THE.

I. General Theme
II. Addressees
III. Location of the Congregations of Galatia
IV. Occasion and Purpose
V. Date
VI. Content
  A. Paul's Defense of His Apostolic Qualifications
  B. Gospel of Justification by Faith Alone Upheld
  C. New Life Through the Holy Spirit
VII. Authenticity

I. General Theme.–The Epistle to the Galatians is perhaps, in its personal and emotional quality, the most characteristic letter that we possess from the hand of Paul. In the context of an antithesis between faith and Judaizing (under the influence of which the congregations in Galatia were beginning to observe Jewish practices and ceremonies), Paul presented an explication of the gospel and of the meaning of the law that, in its polemical radicalness and boldness of thought, in its emotional tone, and in its pastoral concern for the congregation, is scarcely equalled by any other Epistle.

II. Addressees.–Although a well-known controversy exists over the reference of the term "Galatia" in 1:2 (see below), we can, from the contents of the Epistle, deduce a few things concerning the relationship that existed between Paul and his readers. The churches of Galatia had been founded by Paul himself (1:8; 4:19). His first preaching of the gospel to them occurred as a result of (or while he was suffering from) a physical infirmity or sickness (4:13). Perhaps, due to illness, he had been compelled to remain with them for a period of time. If "Galatia" referred to the Roman province of that name, his infirmity may have been a result of physical suffering inflicted upon him when he preached the gospel in that area for the first time (Acts 13:50f.; 14:5-7; cf. 2 Tim. 3:11). Whatever it may have been, those who responded to his preaching did not despise him on account of his infirmity, but rather received him as an angel of God. Thus a close bond existed between Paul and these congregations, and Paul made an emotional appeal to this old and intimate relationship now that others had come between him and them (cf. esp. the moving pericope of 4:12-20). We can infer from 1:8 that others had accompanied Paul in the preaching of the gospel to the Galatians. The identification of these companions depends upon the meaning of "Galatia" in 1:2. If it referred to the northern geographical territory of that name, then they may well have been Silas and Timothy, Paul's companions on his second missionary journey. If the Roman province was intended, the most likely candidate is Barnabas.

It can also be inferred from 4:13 that Paul had already visited these congregations more than once, for in this verse he used the expression "when I preached the gospel to you for the first time" (Gk. *tó próteron*; RSV "at first"). It is true that *tó próteron* can be translated as "formerly" (cf. NEB mg.), in which case more than one visit was not implied. "The first time" is the preferable reading, however, since "formerly" would be somewhat superfluous in this context. "The first time," then, implies that Paul had already preached the gospel in Galatia on two different occasions (namely, "the first time," 4:13, and again very recently, cf. 1:6) before writing this Epistle. Thus it is more likely that "Galatia" referred to the province than to the territory, for it is not certain that Paul preached the gospel in the latter upon two different occasions (see III below). The interpretation of *tó próteron* in 4:13 also has great importance for the dating of the Epistle.

Finally, it is to be noted that the apostle apparently addressed himself to Christians of pagan background. He told in 2:5 how at Jerusalem he contended for the freedom of the gentile Christians, and how he was thus serving the interests of the Galatians. He reminded them in 4:8 of the time when they served idols and he warned them more than once not to allow themselves to be circumcised (5:2; 6:12). All of these considerations indicate the pagan origin of the Galatian congregations. It is true that Paul assumed on the part of his readers more than a mere passing acquaintance with the Jewish religion and the OT (cf. 3:6-22; 4:21-31). Perhaps many proselytes were among the members of the congregations. The Judaizing influences that were threatening the congregations, however, also confronted them with the Jewish religion. Finally, direct proof from the OT belonged to the heart of Paul's method of presenting the gospel. Thus the gentile congregations were in need of some knowledge about the OT, and they must have been instructed therein.

III. Location of the Congregations of Galatia.–We must here choose between the so-called North Galatian and South Galatian hypotheses (also known as the territorial and provincial hypotheses, respectively).

North Galatia, or the geographical territory of Galatia, referred to an area in the heart of Asia Minor, bounded on the north by Pontus and Bithynia, on the southwest by Phrygia, and on the east by Cappadocia. The Tectosages, Tolistobogii, and Trocmi, Celtic tribes that had infiltrated from Macedonia and Thessaly in the 3rd cent. B.C., gave it its name. Its principal cities were Ancyra, Pessinus, and Tavium. The inhabitants of this territory, in distinction from the West European Celts, were called the Gallogrecians. They constituted a heterogeneous element among the Asiatic peoples and for a long time preserved their own customs and peculiarities. Even after centuries had passed, a deep gulf separated them from the surrounding peoples. Shortly before the beginning of the Christian era, Rome took over the kingdom of Galatia and made it into a province with Ancyra as capital. In addition to the original regions of Galatia, however, this province now comprised the territory of Pisidia and parts of Lycaonia, Phrygia, and Cappadocia.

Whereas formerly scholars assumed that "Galatia" in 1:2 referred to the original landscape, since the middle of the 18th cent. the South Galatian hypothesis has been defended, especially under the influence of such scholars as T. Zahn and W. M. Ramsay. According to this theory, Paul was not addressing this Epistle to the North Galatians, but rather to the congregations in the more southern cities of Antioch, Iconium, Lystra, and Derbe, whose founding the book of Acts so vividly describes. Even today the South Galatian theory has many adherents, e.g., Goodspeed, T. W. Manson, McNeile-Williams, Michaelis, Guthrie, and Klijn. Other important spokesmen (e.g., Schürer, Behm, Greijdanus, Kümmel, and Stählin) still adhere to the North Galatian theory.

The most important arguments for and against the theory are the following five:

(1) For: Paul always, or at least nearly always, used the names of the Roman provinces, not those of the original territories.

Against: Important exceptions to the above statement suggest it cannot be considered a rule. Several times (Gal. 1:22; 1 Thess. 2:14; 2 Cor. 1:16) Paul referred to Judea in the old territorial sense, and he did not use an official name in the reference to Arabia in Gal. 1:17.

This counterargument does not carry much weight. It is not strange that Paul, a native Jew, should continue to refer to Judea in the original, territorial sense rather than in the official sense, and this can hardly be used as an argument against the general rule of using a provincial name. Concerning the reference to Arabia, though it is true that Paul did not intend the entire Arabian peninsula, but merely the Nabatean Kingdom (the capital of which was Petra) that lay in the northern part of the peninsula, in view of the geographical relationships, it would be difficult to use this fact as a touchstone for drawing conclusions about Paul's general usage. We can say with confidence that, as a rule, where there are no important reasons to do otherwise, Paul used the names of the Roman provinces.

(2) For: This Epistle assumes more contact with and knowledge of Judaism on the part of its readers than is likely to have been present in the remote areas of North Galatia. In contrast, we know from Acts 13–14 that the churches of South Galatia were from the outset exposed to heavy Jewish pressure. Acts 16:1-5 expressly mentions the cities of Lystra, Derbe, and Iconium as the places to which Paul conveyed the decisions of the apostolic council of Jerusalem.

Against: We know far too little about the situation in North Galatia to attach much weight to this argument. Moreover, the North Galatians' greater unfamiliarity with Judaism may have been precisely the reason that they were so quickly drawn away from the gospel (1:6-9.).

Although this does not constitute a decisive argument, in terms of the available evidence we can better account for the Galatians' familiarity with Judaism by means of the South Galatian hypothesis.

(3) Another argument in favor of the South Galatian hypothesis is that we actually know nothing of the foundation or existence of churches in the northern territory. These churches must have arisen during Paul's second or third missionary journey. Although Acts generally gives a clear picture of the churches that Paul founded on his journeys, it reports nothing concerning the foundation of churches in North Galatia. We read only that on his second missionary journey Paul went through the regions of Phrygia and Galatia with his coworkers, and that they were forbidden by the Holy Spirit to speak the word in Asia (Acts 16:6).

Regarding the third missionary journey, Acts 18:23 states that Paul, after remaining in Antioch (Syria) for a time, traveled successively through Galatia and Phrygia, strengthening all the disciples. Acts 16 gives more negative than positive indications with respect to the foundations of North Galatian churches. Thus we can more legitimately ask whether "all the disciples" in Acts 18:23 referred to congregations in the territory of Galatia, or whether Luke here (esp. in view of the sequence: Antioch [Syria], Galatia, Phrygia) had in mind the many congregations that lay to the south. In addition, if Paul did travel to the Celtic cities of North Galatia, he would have been required to make a detour of dozens of miles each time, whereas Acts 16 and 18 give the impression that he was merely passing through these regions en route to somewhere else. All of this can hardly be the background for the formation of congregations in North Galatia.

In opposition to this argument one could well maintain that Luke gave only a very summary report and that one must not attempt to read more into it than what is given (cf., e.g., A. Oepke, *Der Brief des Paulus an die Galater* [1957], p. 7). The question, however, is whether there is *any indication at all* of the foundation of churches in North Galatia. In any case, the possibility that the North Galatian hypothesis concerns itself with fictitious congregations cannot be ruled out.

(4) Paul's statement in Gal. 2:5 that he opposed the

false brethren in Jerusalem so "that the truth of the gospel might be preserved [Gk. *diameínēi*] for you" appears to have great importance in this connection. If we assume that Paul was here speaking of the apostolic council of Jerusalem (Acts 15), then the situation referred to in Gal. 2:5 occurred before Paul could have made his first visit to the territory of Galatia (Acts 16:6), and thus he could not at this time in Jerusalem have been defending the interests of congregations in North Galatia. He had every reason, however, to come forward for the congregations that he had just established in the southern parts of the province of Galatia. Thus Gal. 2:5 cannot be understood in terms of the North Galatian hypothesis.

(5) Over against these arguments in favor of the provincial hypothesis, to which a few of lesser importance could yet be added (e.g., the repeated mention of Barnabas [2:1, 9, 13], Paul's co-worker in the establishment of the South Galatian congregations; the comparison of 1 Cor. 16:1 with Acts 20:4, from which it could appear that Gaius of Derbe and Timothy of Lystra represented the congregations of Galatia on the journey to Jerusalem), the arguments that have been advanced in favor of the North Galatian hypothesis are of less significance. W. G. Kümmel (*Intro. to the NT*, p. 297) offers two arguments:

First, if the Epistle were addressed to the congregations of the so-called first missionary journey, Paul would not have said in 1:21, "then I went into the regions of Syria and Cilicia," but rather, "then I went to Syria and *to you.*"

Second, it is impossible that Paul would have addressed Christians from Lycaonia and Pisidia as "O . . . Galatians" (3:1), especially since such an expression occurs nowhere else in Paul's writings.

Concerning the former argument, however, Paul is not speaking at all in 1:21 about his first missionary journey, but about a journey that had taken place long before (cf. Acts 9:30) in which he did not come at all into the region of the South Galatian congregations. Regarding the latter argument it must not be overlooked that Paul was here writing to a *group* of congregations that could only be addressed with the collective name "Galatians." It may be true that such an expression never occurs in the (relatively few) sources that are now available, but this in no way proves the impossibility of Paul's having addressed the inhabitants of South Galatia in such a way.

We conclude as follows: though we must exercise much caution and reserve in judging a matter that involves so many historical factors that are not completely transparent, the greater part of the evidence seems to favor the South Galatian hypothesis. Thus we view the Epistle as sent to the churches that Paul founded (Acts 13–14) and again visited (Acts 16) after the Apostolic Council of Jerusalem (Acts 15). These churches were among the first that Paul founded, and it is thus no wonder that their welfare lay particularly close to his heart. His first visit to them took place, due to the enmity of the Jews, under very difficult circumstances; and it is understandable that Paul was greatly disturbed by the thought that of all his congregations, *these* might finally fall prey to Judaism: "My little children, with whom I am again in travail until Christ be formed in you" (4:19).

IV. Occasion and Purpose.–We can ascertain the following concerning the occasion and purpose of the Epistle to the Galatians and the false doctrine that it combated. Since Paul's recent visit to the Galatians (1:6), men had arisen among them who presented a doctrine other than Paul's and tried to question his authority. It appears that they were Christians. They at least claimed that their teaching was the gospel, although Paul declared that it was no gospel at all (1:6f.). They taught that circumcision was necessary for salvation (5:2; 6:12f.) and they demanded that the ceremonial law of Moses be maintained, at least in the observance of "days, and months, and seasons, and years" (4:10). Paul ascribed false motives to them in these matters. Although they wanted to subject the congregation to themselves, drawing them away from Paul (4:17), they did not themselves fulfil the law that they commended; on the contrary, they were driven by selfish ambition (6:13) and sought to escape from the offense of the cross of Christ (6:12).

From the way in which Paul defended his apostolic office, we can infer that these false teachers had cast doubt upon, or even denied, the legitimacy and genuineness of his calling. Over against their contentions Paul maintained that he was seeking to please God and not men (1:10) and that he was called not by men but by God Himself (1:1, 12) in a very direct and extraordinary way (1:13-17). In addition, he had received his knowledge of the gospel from the Lord Himself and not from the other apostles. Later, when he came into contact with the other apostles, he maintained his independence from them; e.g., he took his co-worker Titus with him to Jerusalem without first circumcising him (2:1-10), and later in Antioch, he openly opposed Peter for taking an indecisive stand with regard to the gentile Christians (2:11-21). Paul showed, however, in the same connection that there was no discord between him and the other apostles (the "pillars," 2:9). Rather, they were in full agreement about the conditions with which gentile Christians would have to comply, as appears from the solemn compact that they made in Jerusalem (2:7-10).

All of the evidence indicates that these false teachers were Jewish Christians who tried to combine the gospel with the observance of the Jewish ceremonies, above all with circumcision. Paul had met such people in Jerusalem; he referred to them there as "false brethren" who formed a threat to the freedom that had been given in Christ (2:4). It is quite possible that the false teachers in Galatia had connections with this Jerusalem faction, though we have little proof. Paul did speak in 4:21-31 of Jerusalem as the mother or center of enslavement under the law. It is certain that various influences in opposition to the freedom preached by Paul came from Jerusalem. But the available evidence gives no accurate information concerning the circumstances under which these false teachers appeared among the Galatian congregations. Some have wanted to infer from 5:10 that one distinct person of especial importance had the leadership in this group. The expression which Paul used here can be construed in more than one way, however, and it may carry a more rhetorical character. In any event, this verse offers no support to the (old Tübingen) contention that Paul's adversaries were the leaders of the congregation in Jerusalem (Peter and James). The way in which Paul spoke of these leaders in Gal. 2 is the most solid proof that he was in fundamental agreement with them, and it was on this basis that he could reprimand Peter when the latter in a moment of weakness tried to avoid the consequences of their agreement.

There are other conceptions concerning these false teachers of the Galatians. Some have argued that Paul's adversaries were themselves of pagan origin, pagans who had received the Jewish circumcision and who were attempting to win others over to it. Advocates of this position appeal, among other things, to the present tense of the verb in 6:13, saying that Paul thereby indicated that they were not Jews who had been circumcised from birth. They appeal, moreover, to Paul's reproach that these people did not keep the (whole) law themselves (6:13), and to his sharp word in 5:12 that they had better

mutilate (castrate) themselves as the heathen did. This conception (as advanced, e.g., by E. Hirsch in *ZNW*, 29 [1930], 192ff., and later, in modified form, by J. Munck, in *Paul and the Salvation of Mankind* [Eng. tr. 1959], pp. 86ff.) is, however, hardly acceptable. For the present tense in 6:13 ("who receive circumcision") need not be taken in a temporal sense; what is more, it is open to question whether the variant reading, the perfect tense, which appears in p^{46} B and elsewhere, is not to be preferred. That these false teachers did not themselves observe the demands that they imposed upon others is not necessarily an argument against their Jewish origin (cf. Mt. 23:3f.; Lk. 11:46). Leaving aside these incidental expressions that have no decisive force, the entire tendency of Paul's argumentation in Galatians refutes this conception. Paul was not merely opposing the circumcision of gentile believers; he also gave a penetrating analysis of what the promise, the law, and the fatherhood of Abraham meant for the Jews. The antithesis, therefore, was directed against Judaism itself, not merely against the influence of Jewish proselytism.

Others, such as W. Lütgert (*Gesetz und Geist: Eine Untersuchung zur Vorgeschichte des Galaterbriefes* [*Beiträge zur Förderung christlicher Theologie*, 22/6, 1919]) and J. H. Ropes (*The Singular Problem of the Epistle to the Galatians* [*Harvard Theological Studies*, 14, 1929]) have thought that Paul was taking issue in Galatians not only with Judaism, but also with a spiritualistic libertinism. They appeal for support to Paul's pronouncements in Gal. 5 against the misuse of the freedom that had been given in Christ. Thus Paul is seen as fighting a battle on two fronts. W. Schmithals (*ZNW*, 47 [1956], 25ff.) went even further, contending that Paul is here (as in many of his other Epistles) involved in a struggle with Gnosticism. The circumcision that the false doctrine required is then not that of the Judaizers but one conceived from the standpoint of Gnostic dualism. "The elemental spirits of the universe" of which Paul spoke in 4:3,9 in connection with the observance of days, months, seasons, and years, are seen as having reference to Gnostic ideas. Finally, Paul's warning to the Galatians (5:3) that he who allowed himself to be circumcised was obliged to keep the whole law indicates that the false teachers had *not* imposed this requirement and thus could not have been Judaizers.

This entire conception, however, misses the actual scope of the Epistle, for Paul was undoubtedly concerned with the relationship of the Galatians to Judaism (the promise to Abraham, the seed of Abraham, the law as pedagogue, etc.). The "Gnostic" interpretation of the circumcision mentioned in Galatians is therefore pure fancy, while the claim that the *stoicheía* ("the elements") have reference to angel-spirits cannot be substantiated (cf. A. J. Bandstra, *The Law and the Elements of the World* [1964]). For the same reason, Gal. 5:3 cannot be used to support this conception, but is best understood as an integral part of Paul's polemic against the Judaizers (see above). Finally, Paul's warning against the misuse of freedom need not be seen as directed against a libertine group. It can be well understood as a warning against a mistaken conception of freedom on the part of the congregation itself, or even as Paul's self-defense against criticism coming from the Judaizers that his doctrine of justification by faith would give free rein to sinfulness (cf. Rom. 3:8; 6:1). All in all, it cannot be said that these new conceptions offer a better vantage point for understanding the Epistle. On the contrary, they can only strengthen the conviction that Paul's polemic in Galatians was directed against Judaizers.

V. Date.–The question of the time and place of the writing of the Epistle to the Galatians is closely connected with the above discussion. If we accept the South Galatian hypothesis, then the Epistle must have been sent shortly after Paul's second visit to these congregations (cf. 1:6), for 4:13 speaks of a *second* visit, if we accept the interpretation of Gk. *tó próteron* given above. If we compare this evidence with what is given in the book of Acts, then there is much in favor of the view that Paul wrote this Epistle during his so-called second missionary journey, perhaps in Corinth, where he stayed for a considerable length of time (Acts 18). If we take into account the chronological information concerning Gallio's proconsulship in Achaia that can be deduced from the inscription on the stone fragment found at Delphi (cf., e.g., A. Deissmann, *St. Paul* [1912], pp. 213ff.), the date comes to A.D. 50/51 (*see also* CHRONOLOGY OF THE NT II.F). Galatians would then be one of the oldest, if not the oldest, Pauline letter that has been preserved.

The frequently discussed question of whether the trip to Jerusalem (Gal. 2) is identical to the Apostolic Council (Acts 15) has great importance for the dating of the Epistle. For more than one reason, this is a complicated matter. First, some are of the opinion that the information that is given in Galatians disallows the identification of Gal. 2 and Acts 15. Second, it is maintained that this identification would conflict with what is given in Acts; for according to Acts, the Apostolic Council occurred on Paul's third stay in Jerusalem after his conversion (cf. Acts 9:26; 11:30), whereas Galatians speaks of only two trips (1:18; 2:1), of which the second would then be the Apostolic Council.

It is difficult to deny that Gal. 2 and Acts 15 describe the same event, although it may be that they do so in different ways and from different points of view. In both reports the same matter was at stake — namely, to what extent gentile believers must subject themselves to the law of Moses, and especially whether they should be circumcised. Both reports show Paul and the leaders of the Jerusalem church (Peter, John, and James) arriving at a common viewpoint and adopting a common policy. That the same matter should be dealt with upon two different occasions under almost the same circumstances is highly unlikely.

As has been said, however, two objections against this identification have been entered. (1) On the basis of the information in Galatians, the following questions have been raised. If the Apostolic Council of Acts 15 preceded the Epistle to the Galatians, how could it be that Jewish Christians in Galatia were yet demanding the circumcision of gentile believers? And why then did not Paul in his letter simply refer to the clear pronouncements of the Apostolic Council instead of entering anew into a thoroughgoing argument against Judaism? Why did he not cite the utterances of James and Peter in order to terminate the attempts of the Judaizers to set him in opposition to the leaders at Jerusalem? How can Peter's conduct at Antioch (Gal. 2:11-14) be explained if the Apostolic Council had occurred just shortly before? These objections, which have been presented in various forms, are not too difficult to answer. To be sure, whatever the objections brought against the identification of the agreement in Gal. 2 with that of the Apostolic Council, one cannot deny that Paul in this Epistle presupposed this agreement. In Gal. 2 he referred to such an agreement at length. That all Jewish Christians (e.g., those in Galatia) did not adhere to the agreement that had been reached can hardly serve as an argument against the identification of Gal. 2 with Acts 15. Judaism was no minor problem among Christian congregations even *after* the Apostolic Council, as can be seen, e.g., from Romans and Philippians. It is not difficult to understand, moreover, why Paul in this letter did not, in a

formal way, refer to or reproduce the decisions of the Apostolic Council; he had surely already done so before he wrote the Epistle (cf. Acts 16:4). Thus he was amazed that his readers were already departing from his injunctions (Gal. 1:6). Further, he was not content merely to demonstrate his conformity with the Jerusalem leaders. He asserted his independence of them and showed that it was in his independent position that Peter and James accepted him. Thus he did not content himself with an appeal to these "pillars" (2:9), but rather set himself the task of explaining to the Galatians his own insights into divine purposes in the history of salvation. Finally, with regard to Peter, his weakness at Antioch was not that he rejected the decisions of the Apostolic Council; rather, he did not draw the correct conclusions from them *for himself* in his intercourse with gentile Christians, and thus he indirectly put the gentile Christians back into an isolated position. Hence none of the above arguments constitutes a serious objection to the identification of Gal. 2 with Acts 15. (But *see* ACTS OF THE APOSTLES VIII.)

(2) At first sight, that Paul seemed to be speaking in Gal. 2:1 about his second trip to Jerusalem presents greater difficulties. For this reason several scholars think that what is reported in Gal. 2 must be identified with Paul's trip to Jerusalem described in Acts 11:30; 12:25 (the so-called collection journey). Calvin (comm. on Galatians [repr. 1965], p. 24) thought that Paul was speaking in Gal. 2:1 about the event recorded in Acts 11:30. If this were the case, then Paul could have visited the Galatians only once before he wrote his Epistle, and 4:13 would have to be interpreted accordingly (although one would still distinguish between Paul's journey [Acts 13:1–14:20] ending in Derbe, and his return journey [14:21], through the same cities of Galatia). De Zwaan, Guthrie, Klijn, and others have defended this position. It remains, however, a major problem for this concept that the same matter should have been decided by the same individuals on two different occasions, and that Gk. *tó próteron* in 4:13 would have to be interpreted unnaturally.

In addition, nothing in Acts 11:30 (cf. also 12:25) lends support to the notion that Paul went to Jerusalem on this occasion for any reason beyond the delivery of the collection money. This objection carries greater weight, since in accordance with Gal. 2:1 this unmentioned reason would actually have been the main business of the journey. Conversely, Gal. 2:1 says nothing about this collection as the first motivation for the journey. Thus there is more to favor the identification of Gal. 2 with Acts 15 than with Acts 11:30 and 12:25.

Must we then suppose that Luke erred in the report of Paul's journeys — either that the journey mentioned in 15:1-4 was identical to that of 11:30 and was incorrectly described as a later event, or that 11:30 was mistaken? The former position is held, e.g., by P. Bonnard (*L'Épître de Saint Paul aux Galates* [1953], pp. 46ff., who also gives an overview of all the alternative solutions to this problem), the latter by Kümmel (pp. 301f.).

It is our opinion, however, that all of these suppositions are based on a false premise, namely, that Paul in Gal. 1–2 enumerated all of his trips to Jerusalem and thus cannot have omitted the one recorded in Acts 11:30. This premise poses a dilemma: either Gal. 2 and Acts 11:30 must refer to the same event, or Acts 11 or 15 must be in error. A closer consideration of the chain of reasoning in Gal. 1:16–2:1, however, brings us to a different point of view. Paul was concerned here merely to show, first, that he was independent as an apostle, and second, that he was in agreement with the apostles in Jerusalem. For this reason, he said first (Gal. 1:17-24) that he did not go directly to Jerusalem after his conversion; he went there three years later for a fifteen-day period, at which time he had contact only with Peter. Thus he showed that he had received his commission and his gospel not from men, but from God. When he continued in 2:1, "Then after fourteen years I went up again to Jerusalem," his argument is not the same as in 1:17-24. He had no more need of demonstrating his independence and he was not concerned to enumerate his (few) journeys to Jerusalem. His concern, rather, is now to show how, on the matter of circumcision, he not only stood his ground in the presence of the Jerusalem leaders, but also met with their concurrence on every point. The matter that is at issue here is thus his quarrel with opponents in Galatia, and the attitude of the apostles with regard to it. It is therefore no surprise that he did not mention the collection journey of Acts 11:30, nor need this be regarded as a suppression of the truth (cf. 1:20). That journey was entirely beside the point here, having no relation to the conflict between Paul and his opponents.

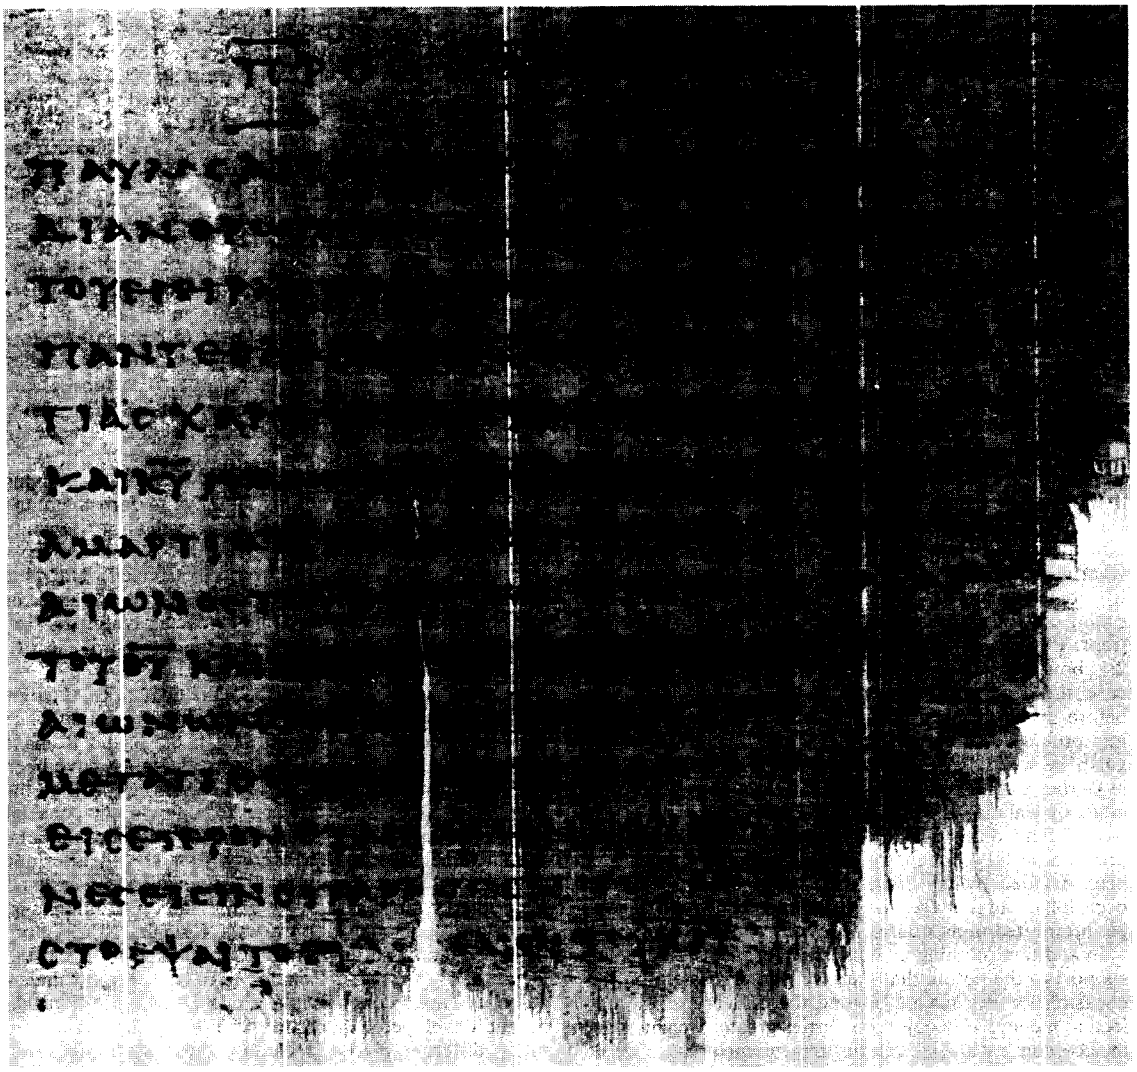
Once we have set aside the notion that Paul is giving a review in Gal. 1f. of all his journeys to Jerusalem and of all his contacts with the other apostles, no difficulty remains in understanding both Gal. 2 and Acts 15 as speaking of the same meeting (the Apostolic Council). The issue at stake was the same in both reports. The differences between the two accounts could be discussed further, but they are hardly so great that one cannot regard the two as speaking of the same event.

Once this identity is established, the difficulties of dating the letter are essentially removed. Some think that since the terminology and contents of Galatians and Romans have so much in common, both Epistles must have been written during the same period. Others argue that the same applies to 2 Corinthians. Yet one cannot consider such comparisons of much value in dating Galatians. Romans and 2 Corinthians were written shortly after one another, but they are not significantly similar. Galatians is undoubtedly more akin to Romans than 2 Corinthians is. Yet closer consideration reveals Romans to be more balanced and thorough than Galatians (*see* ROMANS, EPISTLE OF VI, VII). Romans is most naturally understood as Paul's concluding summary of the position that he had developed as a result of his many disputations in many different places, including those with the Jews. Paul's reflections on one's relationship to Judaism, the law, justification, and the Spirit were not merely occasional concerns in his apostolic preaching and other activities. They were rather his constant preoccupation. Thus one may assume without difficulty that what Paul had treated in Galatians in terms of a very specific situation he took up again six or seven years later (when this phase of his activity had come to a close, cf. Rom. 15:23), expounding it in a larger context and with much less local color.

VI. Content.–The content and the theological character of the letter can be described as follows. The very brief and sober *exordium* and salutation (1:1-5), in which Paul immediately and with great power defended the unassailability of his apostolic calling, was *not* followed, as in all the other Epistles that we possess from the hand of Paul, by a thanksgiving for the recipients of the letter. Instead, he at once expressed his amazement that the Galatians had so quickly allowed themselves to be led astray by another gospel. He directly mentioned his opponents, denied that what they preached was worthy of the name "gospel," and pronounced an *anathema* against anyone who preached a gospel other than the one the Galatians had heard from him (1:6-9).

The remainder of the Epistle is essentially divided into three parts.

A. Paul's Defense of His Apostolic Qualifications (1:10–



Chester Beatty papyrus (p^{46}) showing Gal. 1:1-7 (University of Michigan Library)

2:21). The gospel that he preached was no human invention. He was at one time himself an enemy of the gospel, when in his zeal for the ancestral traditions he persecuted the Church. He had received his commission not from men but from God Himself. It was only later that he came into contact with a few of the apostles, and then only for a short time. He was personally unknown to the members of the Judean churches. All of this (as described in 1:10-24) indicates how little he was dependent upon people for his apostolic calling. He had also preserved his independence in the exercise of his calling. When he returned to Jerusalem fourteen years after his first visit (since his conversion), he presented his gospel with restraint to the leaders there, having Titus, a gentile believer who had not been circumcised, present with him. He had come to full agreement with them without conceding an inch to those who begrudged the gentile Christians their freedom in Christ (2:1-10). Later, in Antioch, he openly opposed Peter and Barnabas, when out of fear before certain men from Jerusalem they did not comply with the obligation that the agreement in Jerusalem had laid upon them (2:11-21). This passage at the same time forms a transition to the second section of the Epistle, for what was at stake in this conflict between Peter and Paul was the manner in which mankind is justified.

B. Gospel of Justification by Faith Alone Upheld (3:1–5:12). In this section, the apostle defended the contents of his gospel with great power and deep emotion. He rebuked the Galatians sharply. Had they been bewitched? Had they forgotten their experience of the gospel with all the blessings that it brought? Paul proceeded with a detailed argument from the OT, undoubtedly directed against the pretensions of the Judaizers. Abraham himself was justified, not by circumcision but on the basis of his faith, and it is *as one who had faith* that he became the father of many nations. In contrast, as Scripture makes plain, the law cannot secure the fulfillment of the promise, for the law brings a curse upon the transgressor. This curse has been borne by Christ in order that the fulfillment of the promise might come through faith rather than through the works of the law.

This issue brought the apostle to a profound contemplation of the relationship between the promise and the law (3:15-22). Here he made some of his most characteristic

utterances concerning the law: the law, in the sinful situation in which it functions, can only increase sin; it bars the way to salvation, throwing mankind into prison; and thus it was, in the negative sense, mankind's pedagogue or disciplinarian until Christ came. Only with the coming of faith in Christ does mankind again have access to the promise, and it is only on this basis that all of those who are in Christ may call themselves children of Abraham and heirs of the promise (3:23-29).

This argumentation was continued in ch. 4, again in terms of mankind's enslavement under the law and the freedom that is in Christ. It is not the law but the Spirit who brings freedom (4:1-7). How then could the Galatians fall back into their former servitude (4:8-11)? This was followed by the apostle's most poignant emotional appeal to his relationship with the congregations, and his denunciation of those who would interpose themselves between him and them (4:12-20). He concluded with the profound allegory of Hagar and Sarah. In this allegory Paul pointed to the fundamental two-sided principle that was already manifest in the family of Abraham and that, via the law given at Sinai, had continued into the present — the principle, namely, of the earthly Jerusalem, the center of the law and of slavery, on the one hand, and on the other hand the heavenly Jerusalem, where Christ is, the place from which freedom is imparted in accordance with the Spirit and the promise and not in accordance with the flesh and the law (4:21-31). This section closed with the demand that the Galatians therefore make their choice — it is a question of all or nothing (5:1-12).

C. New Life Through the Holy Spirit (5:13–6:10). Proceeding from what had been said in the previous section about the Spirit (in opposition to the law), the apostle gave a fuller explication of the life that comes through the Spirit. It is a life in freedom — not a freedom that is in service of the flesh, but rather a freedom that is able to subdue active enslavement to the flesh. He placed the two in opposition to each other, here in terms of their manifestation in the works of the flesh and the fruit of the Spirit (5:13-25), and he continued with a series of separate exhortations (5:26–6:10). To the end, the opposition between the flesh and the Spirit formed the background of his presentation.

The postscript, written with Paul's own hand, warned once more against the self-seeking false teacher; it contains no further personal information or greetings, but closes with yet another personal appeal and with the apostolic blessing (6:11-18).

The great theological significance of this epistle lies in its central theme of justification by faith alone. This theme is then developed in terms of the *negative* role, so characteristic of his theology, that Paul accorded to the law in the history of redemption. The conception of the promise with which Paul operated here also has great significance. In contrast to the law, which is dependent upon human cooperation for fulfillment, the promise functions here as the overpowering, life-giving word of God. It is in this context that the Spirit enters into the picture, the new principle of life given in Christ, who alone has the power to give life to mankind, and to deliver from the bondage to sin and the flesh.

It is evident that the same thoughts were developed in a more thorough and perhaps more balanced manner in the Epistle to the Romans. A chapter such as 2 Cor. 3 also contains the same basic outlines of the Pauline gospel. The Epistle to the Galatians, although it is more abrupt and less systematic, has a great appeal in that in addition to being a document of deep theological insight, it gives a picture of Paul's great humanity and emotion in one of the most critical moments of his apostolic activity.

VII. Authenticity.–On the basis of the above considerations, we may say that the genuineness of this Epistle is self-evident. It has nevertheless at times been the object of certain hypercritical tendencies in the history of NT scholarship. Whereas the so-called Tübingen school chose for Galatians in the question of the alleged disparity between Acts and Galatians, the so-called radical Dutch school of the 19th cent. preferred to regard Acts as the authentic document, and Galatians as a second-century product of non-Pauline origin. Other arguments have been leveled against the authenticity of Galatians, e.g., its elevated Christology, which supposedly betrays a later origin. This radical criticism, introduced by Evanson (1792) and especially by B. Bauer (1850), was taken up by such scholars of the Dutch school as Loman, Pierson, Naber, and van Manen, who were followed by Steck of Switzerland. Others, for whom this radical criticism went too far, have sought to win support for the conception of an originally Pauline Epistle to which all sorts of insertions and interpolations were later added (Weiss, Baljon, Cramer, Völter, *et. al.*). Yet none of this criticism has been able to hold its ground. There is scarcely another Epistle of which the integrity and authenticity are now so generally accepted as that of Galatians. The arbitrary nature of this hypercriticism has been more and more acknowledged. The Epistle to the Galatians was accepted in the Christian Church from the beginning (cf. Polyc. Phil. 3:3; 5:1), and it is one of the most valuable documents that we possess for the understanding both of Paul's powerful personality and of the specific character of his gospel.

Bibliography.–Practically all the comms. contain a discussion of the problems dealt with above. For a list of the most important comms. on Galatians in recent years, see D. Guthrie, *NT Intro.* (1970), pp. 1027f., and W. G. Kümmel, *Intro. to the NT* (1975), p. 558.

For specific studies in Galatians, besides those mentioned in the article itself and listed by W. G. Kümmel, *Intro. to the NT* (1975), p. 294, see J. Becker, comm on Galatians (*NTD*, 8, 1976), p. 7; H. D. Betz, *Galatians* (*Hermeneia*, 1980); J. van Bruggen, "Na Veertien Jaren: de Datering van het in Galaten 2 genoemde Overleg te Jeruzalem" (Ph.D. diss., Kampen, 1973), esp. pp. 240-260 for an extensive bibliography. H. N. RIDDERBOS

GALBANUM gal-ba'nəm [Heb. *ḥelbᵉnâ*; Gk. *chalbánē*] (Ex. 30:34; Sir. 24:15); NEB Apoc. GALBAN. A fetid yellowish resin derived from species of *Ferula*, probably *F. galbaniflua* (a plant in the carrot family), and apparently imported from Persia or India. When burned it emitted a disagreeable odor, and in antiquity was of some value as a fumigant. As the biblical texts indicate, however, it could be mixed with more fragrant spices and gums for a pleasant effect, since it enhanced and maintained those more pleasing aromas.

GALEED gal'ē-əd [Heb. *gal'ēḏ*–'witness heap'] (Gen. 31:47f.); NEB GAL-ED. Its meaning is "cairn" or "heap of witness," corresponding to Aram. *yᵉgar śāhᵃḏûṯā'* (Gen. 31:47). It is applied to the stones piled up by Jacob and Laban to preserve the memory of their covenant, which was sealed by a common meal beside this cairn. The ancient custom of associating events with inanimate objects as witnesses is often illustrated in Hebrew history (e.g., Josh. 4:4ff.). This narrative may contain a suggestion of how the name "Gilead" came to be applied to that country. *See* GILEAD. W. EWING

GALGALA gal'gal-ə [Gk. Galgala] (1 Macc. 9:2, AV). Equivalent to GILGAL, but it is uncertain which Gilgal is meant (cf. Josephus *Ant.* xii.11.1 [421]).

GALILEAN gal-ə-lē'ən. *See* GALILEE.

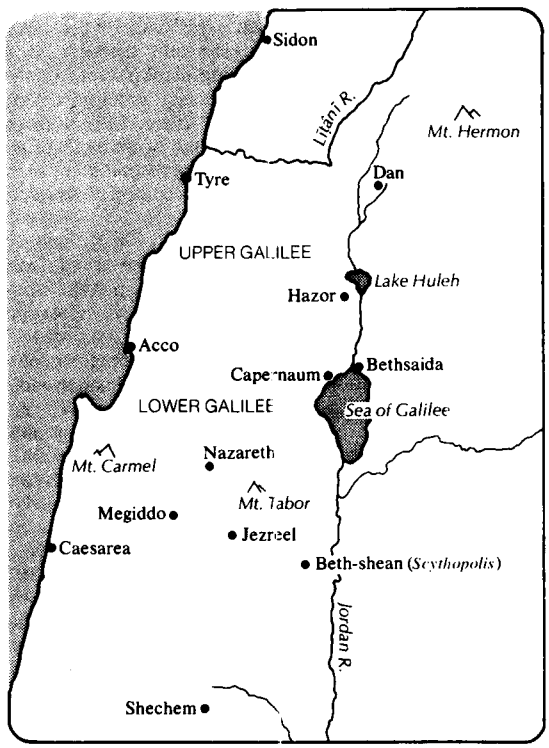
GALILEE gal'ə-lē [Heb. *gālîl*–'circuit, district, cylinder,' in construct 'the region of'; Gk. *galilaía*]. The northern portion of Palestine, scene of most of the earthly ministry of Jesus.

I. Name
II. Location
III. Physical Features
A. Coastal Plain
B. Upper Galilee
C. Lower Galilee
D. Plain of Esdraelon
E. Galilee Rift
IV. Galilee in the OT
V. Galilee in the Apocrypha
VI. Galilee in the NT
VII. Galilee in Early Judaism

I. Name.–The modern Hebrew name *gᵉlîl*, according to its vowel pattern, is in construct and requires another term to follow it in the genitive (cf. the plural *gᵉlîlê kesep*, "rings of silver" [Est. 1:6] and *gᵉlîlê zāhāḇ*, "cylinders of gold" [Cant. 5:14]). Such a phrase occurs in Isa. 9:1 (MT 8:23), *gᵉlîl haggôyîm*, "the region of the gentiles/nations." The word became a proper name, however; cf. *qeḏeš baggālîl*, "Qadesh in (the) Galilee" (Josh. 20:7; 21:32; 1 Ch. 6:76 [MT 61]) and *bᵉ'ereṣ haggālîl*, "in the land of (the) Galilee" (1 K. 9:11), always written with the definite article. The feminine forms of the word, *gᵉlîlâ*, pl. *gᵉlîlôṯ*, also occur, used of the region of the Philistines (Josh. 13:2), of the regions of the Jordan (Josh. 22:10f.), and once of Galilee (2 K. 15:29). This last reference, as accented, appears to be with the *-â* directive ("toward the Galilee"), but the presence of the *'eṯ* of the direct object almost certainly requires the form to be a feminine singular with an erroneous accent. In the Greek of Josephus and the NT, the word *Galilaía* occurs regularly as a proper noun. It is reasonable to infer that the origin of the term is indicated in Isa. 9:1 — that "Galilee" was at first a pejorative term or at least descriptive of the fact that it was occupied or traversed by a large number of foreigners, and that "the Region" ("the Galil") subsequently became a proper name.

It is possible that *Gôyim* was originally the name of a people, for in Gen. 14:1 it appears in a list of kings of Shinar, Ellasar, Elam, etc., as "Tidal king of Goiim," and it would make little sense to speak of a "king of nations." If so, Harosheth-ha-Goyim in Jgs. 4:2 could also be understood as "the wooded hills of the Goyim." Later, because of gentile traffic in the region, *gôyim* came to be understood as meaning "gentiles."

II. Location.–In the OT, Galilee was "in the hill country of Naphtali" (Josh. 20:7). Likewise in Josh. 21:32 and 1 Ch. 6:76 Qedesh in Galilee is a portion of Naphtali. In Isa. 9:1 "Galilee of the nations" is associated with "the land of Zebulun and the land of Naphtali," but because of the structure of the passage it is not clear that identification is intended. ("The land beyond the Jordan" occurs in the same verse, immediately before the reference to Galilee.) According to 2 K. 15:29 Tiglath-pileser captured "Ijon and Abel-beth-maacah and Janoah and Kedesh and Hazor and Gilead and Galilee — all the land of Naphtali." The repetition of the conjunction "and" is significant, for it connects the first seven names and sets them apart from the next phrase; in other words, it names them as constituting "all the land of Naphtali." This, however, creates another problem, for while it places Galilee in Naphtali, as do the other texts mentioned above, it also places Gilead in Naphtali — which is not in accord with the boundaries of Naphtali given in Josh. 19:32-34. The northern border of Naphtali is not given, but it lay W of the Upper Jordan system (including lakes Huleh and Galilee) and was bounded



on the west, southwest, and south by the tribal portions of Asher, Zebulun, and Issachar. The southern boundary was approximately from the southern end of the Sea of Galilee to (but not including) Mt. Tabor, and therefore did not include Nazareth. Nor did it include the Valley of Jezreel, which belonged to Issachar.

In the Hellenistic and Roman periods Syrophoenicia included the coastal strip which was the tribal allotment of Asher. Indeed, there is little if any evidence that Asher ever fully occupied this region. The kingdom of Herod the Great did not include the coastal region N of Caesarea, nor did the tetrarchy of Herod Antipas. The plain of Esdraelon (Jezreel) was apparently included in Galilee during this period, but the eastern end, including Beth-shean (Scythopolis) was part of the Decapolis.

It is reasonable, therefore, to describe Galilee in NT times as consisting of Upper Galilee, Lower Galilee, and the plain of Esdraelon. Thus it stretched from the Jordan system (the source rivers, Lake Huleh, the Upper Jordan, and the Sea of Galilee) westward to, but probably not including, the maritime plain.

There is some evidence that a portion of the land E of the Jordan system was also included in Galilee. As we have seen, "beyond the Jordan" is mentioned in Isa. 9:1, and Gilead is mentioned along with Galilee in 2 K. 15:29. According to Josephus, "Judas the Galilean" (cf. Acts 5:37), who stirred up a revolt against the Romans (*BJ* ii.8.1 [118]), was from Gamala in Gaulonitis (*Ant.* xviii.1.1 [4]). Accordingly, G. A. Smith states that "the eastern shores of Lake Gennesaret also fell within the province," adding in a footnote that under the Turks it was part of Kada Tubariya, and that Palestine included a stretch along the eastern shore of the lake "from a minimum of 10 meters parallel with high-water mark to a maximum of about 2000" (*HGHL*, p. 271). The territory established by the United Nations (1947) for the Jewish state likewise includes such a strip.

It is not certain when the valley of Esdraelon was first

considered a part of Galilee. Josephus described the western frontiers of Galilee as "the outlying territory of Ptolemais and Carmel, a mountain once belonging to Galilee and now to Tyre" (*BJ* iii.3.1 [35]). G. A. Smith states that the valley became part of Galilee at the time of the Samaritan schism, but his reference to Josephus (*BJ* ii.3.4) is erroneous (*HGHL*, p. 247).

III. Physical Features.—Historically, Galilee has been divided into Upper Galilee and Lower Galilee (Josephus *BJ* iii.3.1 [35]), but for our purposes this oversimplifies the region. It is better to divide Galilee into five areas: (1) the coastal plain, (2) Upper Galilee, (3) Lower Galilee, (4) the plain of Esdraelon (Jezreel), and (5) the adjacent portions of the Rift (the Jordan system).

A. Coastal Plain. The tribal allotment of Asher included Carmel (Josh. 19:26) and extended "as far as Sidon the Great" (19:29). While it appears that Asher never controlled the coastal plain (cf. Jgs. 1:31), the limits mentioned cover roughly the same distance as is included in the other divisions we shall consider; hence this is a suitable starting-point.

The region is, generally speaking, a coastal plain, cut by numerous streams and wadis that drain the highlands on the east. One notable exception to this general description is the point where the mountains come right to the sea, between Naqûrā and Ras en-Naqûrā (Rōsh ha-Niqrāh), known from ancient times as "the Ladder of Tyre" (1 Macc. 11:59; Josephus *BJ* ii.10.2 [188]). Josephus located the Ladder 100 stadia (18.5 km., 11.5 mi.) N of Ptolemais (which he included in Galilee) — remarkably close to the actual distance from Acco to Rōsh ha-Niqrāh. The outer limits of Great Sidon would possibly be the mouth of the Litani gorge and may have been an "ideal" boundary, much as was "the entrance of Hamath," part of the "very much land" that remained to be possessed (Josh. 13:1). South of the Ladder of Tyre, the coastal plain is about 11 km. (7 mi.) wide, becoming much wider at the entrance to the plain of Esdraelon E of the Gulf of Haifa. This region is known today as *ʿĒmeq Zᵉvûlûn*, "the plain of Zebulun." The steep flank of Mt. Carmel forms a natural southern boundary and also interrupts the coastal plain. Most of the cities included in Asher's allotment are on the slopes of the Galilean hills. Significant exceptions are Carmel and Acco (emending "Ummah" in Josh. 19:30, following LXX; cf. Jgs. 1:31).

B. Upper Galilee. The division between Upper and Lower Galilee can be made roughly by drawing a line from Acco to Rōsh Pinnāh, 10 km. (6 mi.) N of the Sea of Galilee. Upper Galilee is a distinctive region of high hills and numerous narrow valleys; in fact, the highest point in all Palestine, Jebel Jarmāq (Har Mêrôn, 1208 m. or 3962 ft.), lies in this region. D. Baly divides Upper Galilee into the western and eastern regions. The Great Rift, which runs from the Syro-Turkic region to the southern part of Africa, divides somewhat at the southern end of the Beqʿa (between the Lebanon and the Anti-Lebanon), one part (the Lebanon Rift) being the valley of the Līṭânī River, the other (the Jordan Rift) draining the western slopes of Mt. Hermon into the Bereighith and Ḥasbânī rivers and ultimately into the Upper Jordan. The dividing line is approximately at the modern border of Israel and Lebanon, where a slight rise of about 200 m. (660 ft.), less than 4 km. (2.5 mi.) in width, divides the Bereighith from the Līṭânī. The western part of this rift can be traced southward through Wâdī Dubbeh, E of the mountains of Meron and Hillel, W of the Horns of Ḥattin, to where it joins the plain of Esdraelon E of Mt. Tabor. A modern road runs almost the entire length of this depression.

The northern limits of Upper Galilee, as we have seen, are not clearly defined. A case could be made for taking the Litani gorge as the edge of Galilee. Baly suggests a line running from Tyre to Tibnine as another possibility, noting that all land above 1000 m. (3300 ft.) lies S of this line. Much the same could be said if we used the northern boundary of the modern State of Israel as the northern limits of Upper Galilee. The highest peaks lie in the western part of Upper Galilee: Jebel Jarmāq (Har Mêrôm, 1208 m., 3962 ft.), Jebel ʿArûs (Har Hillēl, 1071 m., 3513 ft.), Jebel Haider (Har Haʾārî, 1048 m., 3437 ft.), and Jebel ʿAdathir (Har ʿAddîr, 1008 m., 3307 ft.). A cleft runs northwestward (*ʿĒmeq Peqîʿin*) from Har Haʾārî and then turns westward to empty into the coastal plain N of Nahariyya. The eastern part of Upper Galilee is less rugged but more irregular, as the tortuous road from Pārôd to Rōsh Pinnāh by the way of Mêrôn and Safed clearly indicates.

C. Lower Galilee. The northern limits of this region are fairly clearly defined, marked by the scarp of esh-Shagûr which begins about 10 km. (6 mi.) E of Acco and runs eastward to the Ghor near Rōsh Pinnāh. It consists of Har Gāmāl, Har Shēzôr, Har Hûd, Har Haʿārî, Har Kefîr, and Har Shimʿei in the western part of Lower Galilee, and Har ʿAkbārā (626 m., 2054 ft.) and several Ramoth (hills) in the eastern part. The highway from Acco to Parod by way of Biqʿat Beit Kerem closely traces much of this northern border. The southern limits of Lower Galilee are less well defined, but for our purposes we may take the plain of Esdraelon as the boundary. In some works, this plain is included in Lower Galilee. No mountains in Lower Galilee are higher than 600 m. (2000 ft.). Moreover, the valleys and depressions in Lower Galilee are broader, providing for numerous roads. The most important of these valleys are Biqʿat Beit Kerem (the basin of esh-Shagûr), Biqʿat Beit Nᵉṭôphāh (Sahl al-Baṭṭauf, the Baṭṭōf depression), Biqʿat Tirʾān through which the road runs from Nazareth to Tiberias, and Biqʿat Yabneʾēl in the hills above Tiberias. The road from Afula to Ṣômet Ḥanāniāh serves to mark the division between eastern and western Lower Galilee.

D. Plain of Esdraelon. The plain of Esdraelon (Valley of Jezreel) is bounded on the north by the foothills of Lower Galilee, and on the south by Mt. Carmel, the hills of Samaria, and the mountains of Gilboa. With the exception of the hill of Moreh (Gibʿat ha-Môrêh or Jebel Daḥī, 515 m., 1690 ft.), it is quite flat, rising from where it merges into the coastal plain between Mt. Carmel and Tel Meʿammēr to where it drops suddenly into the Ghor E of ʿÊn Ḥarôḏ; it is rarely more than 100 m. (330 ft.) above sea level.

The name "Valley of Jezreel" is sometimes used for the eastern part and "plain of Esdraelon" for the western (cf. *GB* [2nd ed. 1974], p. 147), but this is a somewhat artificial distinction. The western part, near Megiddo, was also the Valley of Jezreel in the OT, and "Esdraelon" was the Greek equivalent (Jth. 3:9, here actually used of the eastern portion). Josephus uses the term "the Great Plain" (*Vita* 24 [115]; *BJ* ii.10.2 [188]; here he states that Ptolemais was "built at the entrance to the Great Plain"; *Ant.*xx.6.1 [118]; etc.). A far more meaningful distinction would be the use of *Biqʿaṯ Mᵉgiddô*, "the broad valley of Megiddo" cf. 2 Ch. 35:22), and *ʿĒmeq Yizrᵉʿel*, "the deep valley of Jezreel" (cf. Josh. 17:16), the former to refer to the western portion and the latter to the eastern, as do the texts cited.

The western portion is drained by the Kishon River, which originates somewhere S of Afula (the wadi at this point is seasonally dry, hence the indefinite statement). In the rainy season in times past the Kishon flooded the flat plain, and until systematic cultivation of the region by Jewish pioneers at the end of the 19th and the beginning of the 20th cents., there were extensive marshes, hence the Arabic name *Merj ibn ʿAmr*, "the meadow of Amr's son."

This portion is roughly triangular in shape, the southwestern side extending along the foot of Mt. Carmel from N of Jokneam to Jenin, a distance of 36 km. (22 mi.), the eastern side from Jenin to Tel ʿAdashim just below Nazareth, a distance of 22 km. (13.7 mi.), and the northern side closing the triangle, a distance of 18 km. (11 mi.). An extension of this plain spreads eastward about 12 km. (7½ mi.) between the hill of Moreh and Mt. Tabor, so that the plain is often described as Y-shaped. The mountains of Gilboa extend northward in the area from Jenin to Jezreel and drop off sharply into the eastern part of the Valley of Jezreel and the Jordan Ghor.

The eastern portion (the true *ʿĒmeq Yizrᵉʿel,* although modern Israeli maps use this name only for the broad plain), begins around Afula (biblical Ophrah?) and runs ESE for about 20 km. (12.4 mi.) to Beth-shean. It is drained by Nahal Harod (hence the modern name *ʿĒmeq Ḥᵃrôḏ*), and is quite narrow (3 km., 2 mi.) where it begins its decline, reaching sea level in the vicinity of ʿAin Ḥarôḏ, dropping to 150 m. (500 ft.) below sea level at Beth-shean, and then falling suddenly to the Ghor, which is about 300 m. (1000 ft.) below sea level at that point.

This eastern portion, ʿĒmeq Ḥarôḏ, is well watered by the many springs from the mountains of Gilboa, and, at this writing, is filled with fish ponds for the raising of protein food supplies. The biblical Beth-shean is identified with Tell el-Ḥuṣn, a short distance N of the modern city. Biblical Jezreel is identified with Zerʿin, E of modern Jezreel.

E. Galilee Rift. We have already seen that the Great Rift divides at the lower end of the Beqʿa to form the Lebanon Rift and the Jordan Rift. The Jordan Rift (Arab. *Ghôr*) develops into much the greater trough; hence the name "rift" properly belongs to it from the region of Mt. Hermon southward. The streams and underground springs fed by Mt. Hermon furnish a copious amount of water, which develops into four sources of the Jordan River. The well-watered meadows around Merj ʿAyûn ("the meadow of the springs") at the southern end of the Lebanon Beqʿa are drained by the Wâdī Bereighith. In former times this river joined the other sources of the Jordan around Lake Huleh, but at present it is part of the drainage system of the Huleh basin. The longest of the sources is the Ḥasbânī (Nahal Shenir) which rises in the western part of the foot of Hermon. The other sources, which spring from the southern part of the foot of Hermon, are the Leddan (Nahal Dan), and the Bâniyâs (Nahal Hermon). These three join near the modern village of Śdêh Nehemyāh and become another part of the drainage system.

The upper end of the Jordan Rift has often been a meeting place of nations. In OT times, Phoenicia, Syria, and Israel met here (Dan, the northern limit expressed in the phrase "from Dan to Beer-sheba," was located at the source of the Leddan). In NT times, the Tetrarchy of Herod Antipas, the Tetrarchy of Philip (who built Caesarea at Bâniyâs, the source of the Bâniyâs River), and Phoenicia met in this region. More recently, it was the meeting point of Lebanon, Syria, and Israel.

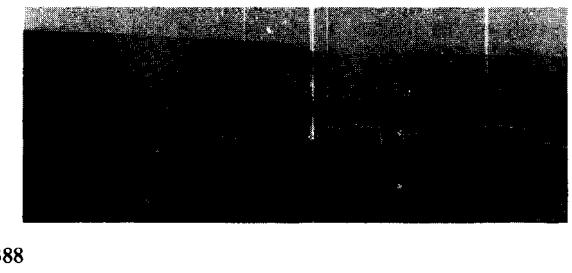
Biblical maps include a turnip-shaped lake, Lake Huleh or Lake Semechonitis, N of the Sea of Galilee. In 1952 traces of the lake were still visible in the marshy valley, but since then it has entirely disappeared, the result of the drainage system installed by the Israeli government to create a rich agricultural region. In the biblical period the lake was about 5½ km. (3½ mi.) long and 4½ km. (2¾ mi.) wide, situated in the Huleh basin, a flat, low-lying region between the hills of Upper Galilee and the plateau of Gaulanitis (Jaulan, Golan). Neither "Huleh" nor "Semechonitis" occurs in the Bible, nor has any term been positively identified with the lake or the basin. In Josephus, the term Semechonitis (Semachonitis in *Ant.* v.5.1 [199]) is used of the lake above the "Lake of Gennesar" (the Sea of Galilee; cf. *BJ* iii.10.8 [515]; iv.1.1 [2f.]). Josephus described the region as one of marshes and lagoons, and gave the dimensions of Lake Semechonitis as 30 stadia (5½ km., 3½ mi.) in breadth and 60 stadia (11½ km., 7 mi.) in length — considerably larger than its measurements in more recent times. Josephus also stated that the marshes extended as far as Daphne, "a delightful spot with springs which feed the so-called Little Jordan, beneath the temple of the golden cow" (*BJ* iv.1.1 [3]), obviously referring to the Leddan and the temple at Dan. In some works, the marshes of the Huleh basin are identified as the waters of Merom (Josh. 11:5f.), but marshland is not suited to warfare such as is described in Josh. 11:1-9, and more recent scholars locate the waters of Merom near the village of Meron, WNW of Safed.

The elevation of Lake Huleh (from the Arabic name *Baḥret el-Ḥûleh,* "the little sea of Huleh") has been a matter of considerable confusion, some atlases recording it as 2 m. (7 ft.) below sea level, others as 2 m. (7 ft.) above sea level. The modern survey map indicates that the elevation is 73 m. (240 ft.) above sea level, and because of the basalt plug at the bottom of the basin, it could never have been much lower. Just S of Lake Huleh there was an important ford across the Upper Jordan, which came to be known in the Middle Ages as "the Bridge of the Daughters of Jacob" (*Jisr Banât Yaʿqûb;* the name has no reference to the patriarch Jacob, but was taken from a convent of the Daughters of St. James located near this place in Crusader times). From just S of this crossing the Upper Jordan plunges through a basalt gorge, descending about 270 m. (885 ft.) in the next 12 km. (7½ mi.), then spreading out over a grassy plain near the site of Bethsaida Julias (called simply Julias in *BJ* iii.10.7 [515]; Josephus gave the length of this portion of the Jordan as 120 stadia [22 km., 14 mi.]), and emptying into the freshwater Sea of Galilee.

The Sea of Galilee is a harp-shaped lake, 21 km. (13 mi.) long by 12 km. (7½ mi.) wide, lying at an altitude of 210 m. (689 ft.) below sea level (1976). In the OT it is called "the Sea of Chinnereth" (Nu. 34:11; etc., whence the modern Israeli name *Yam Kinneret*) and "the Sea of Chinneroth" (Josh. 12:3; etc.). In the NT it is called "the Sea of Galilee" (Mt. 4:18; etc.), "the lake of Gennesaret" (Lk. 5:1), "the sea of Tiberias" (Jn. 21:1; cf. the modern Arabic name Baḥr Ṭabarîyeh), "the lake" (Lk. 5:1; etc.), and "the sea" (Jn. 6:16, etc.). The name "sea of Gennesar" occurs in 1 Macc. 11:67, and "Lake of Gennesar" in Josephus (*BJ* iii.10.8 [515], etc.); Josephus also used the name "lake of Tiberias" (*BJ* iii.3.5 [57], etc.), and variants "Gennesaret" and "Gennesaritis" also occur.

Except for the northwestern area and the southern end, the Sea of Galilee is surrounded by high hills, the Golan Heights on the east being higher and the shoreline steeper than the hills of Lower Galilee on the west. Thus when the wind is from the west, as customarily, it generates a

Southern end of the Sea of Galilee (D. Baly)



high-pressure area over the lake and the water is calm; but when the wind shifts and blows from the east, it creates a venturi effect, resulting in a low-pressure area, and sudden and severe storms come up on the lake.

The northwestern shore is the plain of Gennesaret (Biq-ʿat Ginnesar), a well-watered and extremely fertile plain. The subtropical climate, caused by the altitude and the protection of the surrounding hills, enables almost continuous production of agricultural products in this plain. In an oft-quoted passage, Josephus described this region with a touch of hyperbole: "There is not a plant which its fertile soil refuses to produce, and its cultivators in fact grow every species" (*BJ* iii.10.8 [516]). The tetrarch Herod built a capital on the western shore of the lake about 5 km. (3 mi.) S of this plain, naming it Tiberias in honor of Tiberius Caesar (*Ant.* xviii.2.3 [36]; cf. Jn. 6:23). *See* Plate 15.

The Sea of Galilee empties into the Jordan River at the southwestern end, where the Jordan Ghor is broad. About 11 km. (7 mi.) S of that point, the Yarmuk enters the Jordan from the east, and about 15 km. (9 mi.) further south the Jezreel Valley empties into the Jordan Ghor from the west. In this region the Jordan system is entirely fresh water, salts being picked up from the soil as it progresses southward.

IV. Galilee in the OT.–The route of Abraham (then known as Abram) from Haran to Shechem is not clearly traced (Gen. 12:4-6). If Eliezer was indeed from Damascus (Gen. 15:2, a problem text; see comms.), the route was probably by the way of Ebla, Hamath, Damascus, and then along the southeastern flank of Mt. Hermon, across the ford where the Bridge of the Daughters of Jacob is located, through Lower Galilee, across the plain of Esdraelon, past Dothan to Shechem. Later, when the coalition of kings captured Sodom and Gomorrah, taking Lot with them, Abram pursued the enemy "as far as Dan" (Gen. 14:14), and indeed even to Hobah "north of Damascus" (14:15).

When Moses sent the twelve "spies" to survey the land of the Canaanites, they traveled "to Rehob, near the entrance of Hamath" (Nu. 13:21). The route is not described in detail N of the Valley of Eschol in Judea, but we may assume that they journeyed by the direct route, traversing Galilee from the plain of Esdraelon to its northern limits.

After Joshua had conquered the southern part of the land, Jabin king of Hazor formed a coalition of kings of the region which can roughly be described as Galilee (cf. Josh. 11:2f.), and Joshua engaged them in battle "by the waters of Merom" (11:7). The following locations are of interest: "the northern hill country" (v. 2) is probably Upper Galilee, "the Arabah south of Chinneroth" (v. 2) is the broad Ghor of the Jordan just S of the Sea of Galilee; "the lowland" (v. 2) is possibly the plain of Jezreel; "the land of Mizpah" which is "under Hermon" (v. 3) is possibly the region around Merj ʿAyûn; Misrephoth-maim (v. 8), which is connected in the context with Great Sidon and the valley of Mizpeh, may well be the Līṭânī gorge (cf. *LBHG,* p. 216); Hazor, which was formerly "the head of all those kingdoms" (v. 10), guarded the main road which went from Acco to the Bridge of the Daughters of Jacob and on to Damascus, as well as the north-south road through Upper Galilee; Hazor is N of the Sea of Galilee, overlooking the Huleh basin. The names in Josh. 12:7-24 could be studied with profit in this connection.

In the tribal allotment, Galilee was divided among the tribes of Asher, Zebulun, Naphtali, and Issachar. Later the tribe of Dan moved from its original location in Philistine country to the northern end of Galilee (Josh. 19:40-47).

The battle with Sisera, described in Jgs. 4–5, took place in the plain of Jezreel in the vicinity of Mt. Tabor (Jgs. 4:6f.). Deborah was from Ephraim (= Samaria), but Barak was from Kedesh in Naphtali (4:5f.). Sisera, the commander of the army of Jabin of Hazor, "dwelt" (Heb. *yôšēḇ,* perhaps meaning "had his headquarters") in Harosheth-ha-goiim (4:2). No such city is known, and the suggestion has been made that the term means "the wooded hills of the Goyim," synonymous with "Galilee of the Gentiles," referring to Lower Galilee. The battle began at Taanach "by the waters of Megiddo" (Jgs. 5:19), and moved toward Tabor. "The stars" (Heb. *hakkôḵāḇîm,* 5:20) fought Sisera, probably meaning rain (cf. J. Blenkinsopp, *Bibl.,* 42 [1961], 73f., for a Canaanite parallel) which caused the Kishon to flood and trap Sisera's army (5:21). Sisera fled on foot, and took refuge in the house of Heber (4:17), located near Kedesh. Aharoni locates Kedesh-Naphtali in the plain of Jabneel in the hills above the southwestern shore of the Sea of Galilee (*LBHG,* Map 16, p. 202), to be distinguished from Tell Qades in Upper Galilee (p. 204). The description of Sisera's flight on foot makes more sense if we accept such a location.

In the 11th cent. B.C. the "Midianites," tribes from E of the Jordan, were making raids on the Israelites. Finally, Gideon was called to put a stop to these harassments (Jgs. 6:7, 11-16). He assembled an army from Asher, Zebulun, Naphtali, and Manasseh, and probably also from Issachar, for that is where he was located (6:11). The Midianites came up the deep Valley of Jezreel (6:33), i.e., from the direction of Beth-shean, and camped by the Hill of Moreh, N of Gideon's band at the spring of Harod (7:1). Gideon and his three hundred put the Midianites to flight, and men from Naphtali and Asher joined in the rout, pursuing the Midianites "beyond the Jordan" (7:23, 25).

When Saul united the tribes into his kingdom, he apparently took control of the Via Maris ("the way of the sea"), the highway that connected Damascus with Acco and also, by way of Wâdī ʿAra next to Megiddo, with the Philistine region and Egypt. Such a situation would explain the Philistine attempt to seize the plain of Esdraelon. The Philistine army moved, it would seem, from Aphek in the Sharon plain (1 S. 29:1) via Wâdī ʿAra to Shunem at the base of the hill of Moreh (1 S. 28:4). Saul had visited the medium at EN-DOR, identified with the modern Ṣafṣefoth, 6 km. (4 mi.) S of Mt. Tabor, not far from the hill of Moreh (1 S. 28:7-19). Saul's forces were in the mountains of Gilboa when the Philistines attacked. Saul and his three sons fell in the battle (1 S. 31:1-8), and their bodies were hung on the wall of Beth-shean (31:10, 12).

David subdued the Philistines, regaining the plain of Jezreel, but in his campaign to Damascus and the north, it appears that he marched through Transjordan (1 Ch. 19:7-19). There can be no doubt, however, that David controlled Galilee and beyond. The census conducted by Joab included "Kadesh in the land of the Hittites" (2 S. 24:6, which would be Qadesh on the Orontes), Dan-jaan (24:6 [MT], possibly Ijon N of Dan in the vicinity of Merj ʿAyûn), Sidon, the fortress of Tyre (the mainland city, not the island), and "all the cities of the Hivites and Canaanites" (24:7, probably referring to the Phoenician coast from Tyre to Acco; cf. *LBHG,* pp. 264f.).

Solomon fortified Megiddo and Hazor, important and strategic points on the Damascus-Gaza route (the Via Maris) along with Gezer (1 K. 9:15). His fifth, eighth, ninth, and tenth administrative districts were in the region that we have defined as Galilee (1 K. 4:7-19). He ceded twenty cities in Galilee to Hiram of Tyre, seemingly to pay for materials used in his building program (1 K. 9:10f.). According to modern consensus the cities were in the coastal plain and foothills of Galilee.

When the monarchy was divided, Galilee became part of the kingdom of Israel under Jeroboam (cf. 1 K. 12:20), who built altars and erected golden calves, one at Bethel and the other at Dan (12:29). Dan was known as Laish (Jgs. 18:29) or Leshem (Josh. 19:47); cf. Lus(i) in Egyptian texts of the 19th cent. B.C.

Shishak (Sheshonq) of Egypt invaded Palestine in the fifth year of Rehoboam (*ca.* 926 B.C.; cf. 1 K. 14:25). According to Shishak's list, he also invaded the northern kingdom, naming among other places the Emeq, Rehob, Beth-shean, Shunem, Taanach, and Megiddo (*LBHC*, p. 285). A fragment of a stele erected by Shishak has been recovered at Megiddo.

Ben-hadad of Damascus, responding to a payment by Asa of Judah, invaded Galilee in the days of Baasha (*ca.* 885 B.C.), conquering Ijon, Dan, Abel-beth-maacah, all Chinneroth, and all the land of Naphtali (1 K. 15:18-20). The growing strength of the Aramean city-states, allied with Ahab of Israel, led to the confrontation with Shalmaneser III at Qarqar in 853 B.C. Elijah the prophet came from Tishbe, which has sometimes been identified with a place in Naphtali, but 1 K. 17:1 clearly locates it in Gilead. (In the light of Jn. 7:52 it is hard to believe that there was any Jewish tradition that Elijah came from Galilee!) His ministry, however, included locations in Galilee. The miracle at Zarephath took place near Sidon (1 K. 17:9). The contest with the prophets of Baal took place on Mt. Carmel (18:20-40), which, as we have seen, was at one time attributed to Galilee. The death penalty on the false prophets was exacted at the river Kishon in the plain of Esdraelon (18:40). Naboth's vineyard was in Jezreel, beside the palace of Ahab (1 K. 21:1), and it was there that Elijah rebuked the king. It was at Naboth's property that Jehu put to death Joram king of Israel (2 K. 9:21, 24). Jehu shot Ahaziah king of Judah with an arrow at the ascent of Gur near Ibleam, but the king died at Megiddo (9:27). At Jezreel Jehu caused the death of Jezebel (9:30-37). The prophet Elisha also performed part of his ministry in Galilee: the episode with the Shunammite woman (2 K. 4:8-37) took place at Shunem in the plain of Esdraelon.

Shalmaneser III continued his campaigns against the Arameans, defeating Hazael at Mt. Senir, possibly Mt. Hermon (cf. Dt. 3:9; but in Cant. 4:8 and 1 Ch. 5:23 the two names seem to refer to different places), probably destroying Hazor at that time (Level VIII), and reaching the mountain Ba'li-ra'si (= Baal Rosh, or Mt. Carmel), where he set up a monument (*ANET*, p. 280).

Tiglath-pileser III captured much of Galilee *ca.* 732 B.C., as described in 2 K. 15:29. The route apparently was down the Lebanon Beq'a and into the upper Jordan Valley, but Tiglath-pileser's own account is devoid of details, stating simply, "...the wide land of (Naphta)li, in its entire extent, I united with Assyria" (*ANET*, p. 283; *ARAB*, I, § 815). The region that we know as Galilee became the Assyrian province of Megiddo. (Y. Aharoni, in *Macmillan Bible Atlas*, p. 95, takes the phrases in Isa. 9:1 to refer to the three Assyrian provinces, "the Way of the Sea" = Dor, "Galilee of the Nations" = Megiddo, and "Beyond the Jordan" = Gilead.) After the capture of Samaria, the province of Dor was incorporated into the province of Samaria.

When Pharaoh Neco went to the aid of Aššur-uballiṭ at Carchemish (609 B.C.), Josiah of Judah attempted to intercept him and was killed at Megiddo (2 K. 23:29). Neco probably continued through the Lebanon Beq'a to Riblah (where he appointed Jehoiakim king of Judah, 23:33f.), then to Hamath, Aleppo, and Carchemish.

V. Galilee in the Apocrypha.–Simon the Maccabee (*ca.* 163 B.C.) led a band against enemies from Ptolemais, Tyre, and Sidon who had attacked the Jews in Galilee (1 Macc. 5:14-23). In 161 B.C. Demetrius I sent Bacchides at the head of an army to Judea and, passing through Galilee, he punished the Jews of Arbela near the Sea of Galilee (1 Macc. 9:1-4; *Ant.* xii.11.1 [420-22]). In 144 B.C. Jonathan defeated the forces of Demetrius at Cadasa near Hazor (1 Macc. 11:63f.; *Ant.* xiii.5.7 [158-162]). Tryphon marched against Jonathan in 143 B.C. from Damascus, and the two forces met at Beth-shean. By a series of ruses, Tryphon led Jonathan to Ptolemais, where Jonathan was captured (1 Macc. 12:39f.; 13:1-30; *Ant.* xiii.6.1-6 [187-212]).

In 104 B.C. Aristobulus conquered Galilee, making it a Jewish land and putting most of Galilee under the Maccabeans. In a very short time Sepphoris and Asochis were Jewish cities (*Ant.* xiii.11.3 [319]; *BJ* i.3.3 [76]). The coastal plain remained outside the Maccabean kingdom. In 63 B.C. Pompey conquered Palestine for Rome, "liberated" the cities that had been taken by the Jews, and established the Decapolis, including Scythopolis (Beth-shean). An attempt was made to partition Judea into five *synedria*, but this was short-lived. Galilee and Judea (except for a large coastal portion), together with Perea, formed the new Judea. Herod was made king of the Jews by Caesar Augustus and gradually accumulated almost all of Palestine as well as large portions of Transjordan. On the death of Herod in 4 B.C. Galilee and Perea were made the Tetrarchy of Herod Antipas (*Ant.* xvii.11.4 [317-321]; *BJ* ii.6.3 [93-98]).

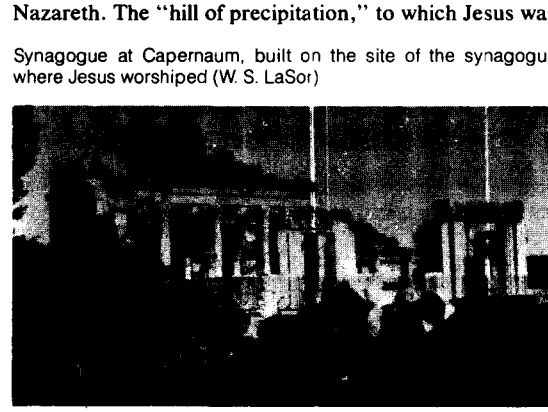
VI. Galilee in the NT.–Since the major part of the ministry of Jesus was conducted in Galilee, it is not possible to review all of the NT references to Galilee. In general we should note that Jesus' boyhood and the opening of His ministry took place in Nazareth in Lower Galilee, and much of the rest of His public ministry took place at the northern end of the Sea of Galilee. A number of locations should be singled out for special mention.

Cana of Galilee, where the first miracle occurred (Jn. 2:1, 11), according to most modern scholars was not at the modern site of Kefr Kenna on the road from Nazareth to Tiberias, but more likely at Khirbet Qânâ N of Nazareth on the far side of Biq'at Beit Neṭofa; the old road would have gone through Sepphoris. On the other hand, Jesus' "second visit" to Cana (Jn. 4:46), in context, would appear to be on the Nazareth-Capernaum road, which would favor Kefr Kenna.

The call of the disciples took place on the shore of Galilee near Capernaum (Mk. 1:16, 21, 29). The site of Capernaum was formerly hotly debated, but since World War II scholars are generally agreed on the modern Kefr Nahum, where excavations have uncovered foundations of a house believed to be that of Simon Peter's family.

The raising of the widow's son occurred in the village of Nain, on the northern foot of the hill of Moreh, SE of Nazareth. The "hill of precipitation," to which Jesus was

Synagogue at Capernaum, built on the site of the synagogue where Jesus worshiped (W. S. LaSor)



taken by an unruly mob that would have lynched him (Lk. 4:29), would seem to be nearer to Nazareth than the precipice that today marks the traditional site. Perhaps it was at this time that Jesus withdrew from Nazareth and relocated at Capernaum.

His ministry around the lake involved a number of locations. The "Sermon on the Mount" (the envelope-pattern context of Mt. 4:25 and 8:1 suggests that it was a specific event at a specific place) probably occurred on the slopes above Capernaum. The feeding of the 5000 (Jn. 6; Mt. 14:13-21 par.) took place on "the other side of the Sea of Galilee" (Jn. 6:1), which probably means on the east side of the Upper Jordan, where there is a large, gentle, grassy slope, and not at Tabgha, where the modern site is located. Bethsaida presents a problem, for Bethsaida Julius was E of the Upper Jordan, but Mk. 6:45 suggests that the disciples were sent from a place E of the Jordan "to the other side, to Bethsaida" (6:45), to which a further note indicates that they were proceeding toward the plain of Gennesaret (6:53). It has therefore been proposed that there were two Bethsaidas, the second a "Bethsaida of Galilee" (Jn. 12:21) perhaps W of Capernaum. The woes pronounced against Capernaum, Bethsaida, and Chorazin (which is 4 km. [2½ mi.] N of Capernaum) would seem to require a Bethsaida near the other two cities (Mt. 11:21-23).

The drowning of the swine, caused by exorcising demons, is difficult to locate due to the textual problems (various readings are "Gadarenes," "Gergesenes," and "Gerasenes"; see Mt. 8:28). Gergasa was on the east side of the lake, N of Hippos, where the slope is not too steep to fit the story. Gerasa has been identified with Jerash, and is thus out of the question. Gadara is SE of the Sea of Galilee, on the slopes of the Yarmuk River. *See* GERASA.

The Gospels report that Jesus visited the region of Tyre and Sidon (Mk. 7:24; Mt. 15:21), but the expression does not necessarily imply that Jesus actually visited those cities. The border of Sidon, we have seen, may have been at the Litani gorge, which could also have been the northern border of the region of Tyre. It would therefore be possible to interpret the statement by proposing that Jesus traveled from the region of the sources of the Jordan along the Litani to an unknown place, or even to assume that the regions of Tyre and Sidon extended eastward to the vicinity of Merj 'Ayûn. After healing the Syrophoenician woman, Jesus returned to the Sea of Galilee through the region of the Decapolis (Mk. 7:31), which may simply indicate the eastern side of the Sea of Galilee.

At a critical point in His ministry, Jesus took His disciples to Caesarea Philippi (Mt. 16:13; again, since "the region of" is used, it is not necessary to understand that they actually went into that city). There Peter made his great profession of faith. A week later Jesus took Peter, James, and John and "led them up a high mountain" (Mt. 17:1), where the Transfiguration occurred. The traditional site of the Transfiguration is Mt. Tabor or "Little Hermon," E of Nazareth. But this is by no stretch of the imagination "an unusually high mountain" (*óros hypsēlón*); nor is it likely that Jesus could have found the necessary solitude so close to Nazareth. Caesarea Philippi is on the southern side of Mt. Hermon, near the source of the Bâniyâs, one of the tributaries of the Jordan. Mt. Hermon, furthermore, rises to an elevation of 2814 m. (9235 ft.), and in comparison with the mountains in Galilee, which are never above 1208 m. (3964 ft.), this is exceptionally high. Mt. Tabor, by way of contrast, is only 580 m. (1903 ft.), a little sugarloaf hill scarcely higher than the hills of Nazareth a short distance to the west.

There is no mention of evangelizing Galilee after the Resurrection, and Galilee is not mentioned in Jesus' parting instructions (Acts 1:8).

VII. Galilee in Early Judaism.–Since Josephus was a general of Jewish forces located in "both Galilees" (*BJ* ii.20.4 [568]), we could easily lose our objective if we were to track down his many references. Furthermore, for this article it would serve no useful purpose. Suffice it to say that Vespasian quickly conquered Galilee, taking Josephus prisoner in the process. Jotapata, Sepphoris, and Gischala were already important Jewish cities. After the destruction of Jerusalem in A.D. 70, the religion of the Jews might have come to an end. But Johanan ben Zakkai escaped from Jerusalem, according to tradition smuggling a copy of the Holy Scriptures with him, and obtained permission from Vespasian to set up an academy at Jabneh (Jamnia, the OT Jabneel in the Sharon plain). He organized a Beth Din to take the place of the Sanhedrin, which had ceased to exist. After the defeat of Bar Cochba in A.D. 135 the council moved to Sikhnin N of Jotapata, and due to the persecution under Hadrian other schools that had developed moved to Galilee, with locations at Usha, Peqi'in, Sepphoris, Beth-shearim, and Tiberias. Galilee thenceforth became a strong center of Judaism. The teachings of the Tanna'im were gathered, the codification of the Mishnah was accomplished by Judah ha-Naśi', and the traditional pronunciation of the Hebrew Bible was preserved by the Tiberian masoretic pointing. Thus the foundations of modern Judaism were securely laid — in Galilee of the Gentiles.

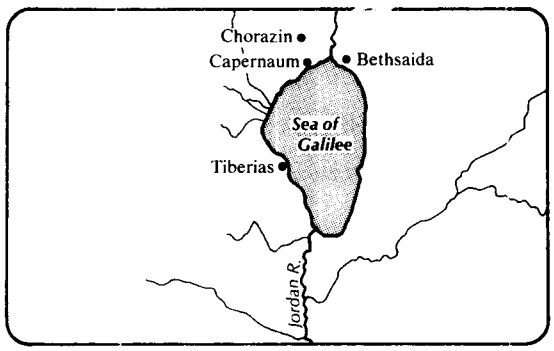
GALILEE, MOUNTAIN OF. *See* HILL III.C.3.

GALILEE, SEA OF [Gk. *hē thálassa tḗs Galilaías*]. The most common name in the Gospels for that lake where so much of Jesus' ministry took place, taken from the district in which it was located (Mt. 4:18; 15:29; Mk. 1:16; 7:31; Jn. 6:1). It was also named for the fertile plain at the northwest shore, i.e., "the waters of Gennesaret" (1 Macc. 11:67), and thus once in the NT it is called "the lake of Gennesaret" (Lk. 5:1). Josephus consistently uses "Genesar." In addition it was called the "Sea of Tiberias" (Jn. 6:1; 21:1), a name derived in NT times from the capital city built by Herod Antipas on the western shore. Sometimes it is simply called "the sea" (Gk. *thálassa*, e.g., Jn. 6:16) or "the lake" (Gk. *límnē*, e.g., Lk. 5:2). The Arabic name used today is Baḥr Ṭabarîyeh.

In the OT it is called "the Sea of Chinnereth" (Heb. *yam-kinneret*, Nu. 34:11; Josh. 13:27) and "the Sea of Chinneroth" (Heb. *yam-kinn^{e}rôṯ*, Josh. 12:3). In Hebrew and Aramaic *yam* can mean both lake and sea, as is the case also with Gk. *thálassa*. The name appears to have been taken from an ancient Canaanite town (Josh. 11:2; 19:35; 1 K. 15:20), which has been identified with Tell el-'Oreimeh, near the northwest shore. The lake formed a part of the boundary of the Promised Land (Nu. 34:11) and of the territory of the Gadites (Dt. 3:12; Josh. 13:27) and was mentioned in connection with the borders of the conquered Amorites (Josh. 12:3). Chinnereth means "harp" or "lyre" and perhaps is derived from the hill of Tell el-'Oreimeh, which resembles an ancient harp. This is more likely than the notion that the town took its name from the lake, which itself is shaped roughly like a harp. (*See also* CHINNERETH.)



I. General Description.–The lake is 21 km. (13 mi.) long and about 13 km. (8 mi.) wide at the point of greatest breadth. It is pear-shaped, with the narrow end pointing south and a decided bulge to the northwest. The sea lies in the deep trough of the Jordan Valley with its surface 212 m. (696 ft.) below sea level. Due to this position it is for the most part surrounded by only a narrow ribbon of plain. Its greatest depth is over 46 m. (150 ft.). The lake is fed by the Jordan River flowing down from Lake Huleh in the north, as well as by underground streams. The water is clear and sweet, and fish abound.

The north end of the lake is open, with the hills about 3 km. (2 mi.) distant and green slopes stretching down to the water. On the northwest shore is the plain of Gennesaret. To the south, beginning in the vicinity of Tiberias, there are dark cliffs with only a narrow coast. At the south end the coast widens and the area becomes open once again. The east side of the sea is characterized by a wall of sharply rising hills that form the edge of the Jaulan Plateau (Gaulanitis). The main formation is limestone covered by a layer of basalt. The coast running along the east side is about 1 km. (½ mi.) wide and well watered. This plateau, about 610 m. (2000 ft.) above the lake, caused most of the life and activity to be confined to the west side. For those living on the east shore, commerce was easier with the towns across the lake than with the villages on the plateau. The shore on both sides is fertile, and water for irrigation is available from springs. There is large-scale agricultural activity around the lake now, although in previous years barrenness and desolation marked the area. Thus today the country is taking on more of the appearance of Jesus' time, when it was the center of industry and commerce in Galilee. *See* Plate 17.

The climate is semitropical. In the winter the hills and shores surrounding the lake are green, but during the summer the district becomes arid. During May and June the temperature rises as high as 40°C (104°F) in the shade, and by August the heat can become unbearable. The difference in temperature between the surface of the sea and the high surrounding mountains makes it liable to sudden and violent storms, as the cool air from the uplands sweeps down the gorges and upon the surface of the water. The Gospels mention two such storms (Mt. 8:24 par.; 14:24 par.).

II. Cities and Industry.–In the NT period cities of considerable size and importance surrounded the lake. The Gospels do not mention two of the busiest centers, Tarichea and Tiberias. Tarichea means "preserving" or "pickling," and its salted fish were known throughout the Roman world. In Pliny's time the whole lake was named for this city (*Nat. hist.* v. 15 [71]), and Josephus credited it with a population of forty thousand and a fishing fleet of 230 boats (*BJ* ii.21.4, 8 [608, 635]). These boats were of good size, for from four to six thousand inhabitants of Tarichea were able to take refuge in them when pursued by the Romans (*BJ* iii.10.5 [499]). Some have placed the city at the southwest corner of the lake, but it is more probably to be identified with Magdala (present-day Mejdel), about 5 km. (3 mi.) N of Tiberias.

The name BETHSAIDA, "home of fishing," also reflects the fishing industry. This city, the home of Peter, Andrew, and Philip (Jn. 1:44), was located at the north end of the sea, possibly 3 km. (2 mi.) from the coast at et-Tell but more likely on the shore at el-ʿAraj. In NT times agriculture, dyeing, and tanning were also important industries in the lake region; but by far the most important was fishing, with the related occupations of boat building and fish curing. The Gospels themselves hint at this great fishing activity and its economic importance. At least four of the disciples—Peter, Andrew, James, and John—were fishermen, and there is no reason to believe that they were poor men. Mark intimated that the family of Zebedee was one of substance when he mentioned the hired servants left to help the father when James and John departed to follow Jesus (Mk. 1:20). That John was acquainted with the household of the high priest in Jerusalem also indicates that his family was one of some means and influence (Jn. 18:15; but cf. L. Morris, comm. on John [*NICNT*, 1971], pp. 752f.).

Hot springs located about 1.6 km. (1 mi.) S of Tiberias supplied baths, which were famous in the ancient world. They were mentioned by Pliny (*Nat. hist.* v. 15 [71]) and appeared on a coin of Tiberias issued in the reign of Trajan.

CAPERNAUM, at the northwest corner of the lake, was a commercial center where the customs station was located from which Matthew was called (Mt. 9:9 par.). About 3 km. (2 mi.) to the north lay Chorazin (Khirbet Kerâzeh). The principal cities on the east side of the sea were Hippos and Gadara, both of which were much larger in the NT period than today.

III. Jesus' Ministry.–Jesus' entire ministry was limited to the northern half of the lake. There is no record of His traveling to the south or southwest shore, and apart from the feeding miracle on "the other side of the sea" (Jn. 6:1) and the meeting with the demoniac at Gergesa (Lk. 8:26 par.), the east side of the lake played no part in His life. The northern third of this area was predominantly Jewish, but the territory to the south was gentile. The location of Gergesa is uncertain, but the narrative points to a heathen district. The most likely spot is the vicinity of a small place named Kersa on the east shore.

Jesus moved to Capernaum at the beginning of His ministry (Mt. 4:13), and it became the center of His Galilean activity. The actual location of the city was long in doubt, but it has now been identified with Tell Ḥûm. Tradition has placed the site of the Sermon on the Mount in the surrounding mountain region.

TIBERIAS was one of the most important cities, yet Jesus and His disciples seem to have avoided it. This may have been due to the circumstances surrounding its construction. When it was built by Herod Antipas, he was forced to fill it with a gentile population because it was found to be resting upon the site of an old cemetery and thus the Jews considered it unclean. The Jewish attitude toward the city changed in later years, and after the destruction of Jerusalem in A.D. 135 it became a center of Jewish learning.

GALL [Heb. *mᵉrērâ*, *mᵉrōrâ*, *rōʾš*; Gk. *cholé*] (Job 16:13; 20:14; 20:25; Lam. 3:19; Mt. 27:34; Acts 8:23).

The RSV used "gall" to translate Heb. *rōʾš* (*rôš* in Dt. 32:32) only in Lam. 3:19, rendering "bitterness" in Lam.

3:5 and "poison," "poisoned," or "poisonous" for the other instances where the AV has "gall" (Dt. 29:18; Ps. 69:21 [MT 22]; Jer. 8:14; 9:15; 23:15; Am. 6:12). Probably the references are to the colocynth, *Cucumis colocynthis* L., a trailing vine bearing orange-colored fruit having drastic cathartic qualities. Hemlock is a less probable alternative.

The Heb. *mᶜrērâ* (Job 16:13), *mᶜrōrâ* (Job 20:25), is human bile, but in Job 20:14 *mᵉrōrâ* is serpent venom. The poison of serpents was held to reside in their bile.

The Gk. *cholḗ* in Mt. 27:34 is a reference to the LXX of Ps. 69:21. In Mk. 15:23, "wine mingled with myrrh" indicates that the bitter ingredient of the analgesic potion was myrrh (cf. Pliny *Nat. hist.* xx.18 [36]; Seneca *Epistulae morales* 83.27). The "gall of bitterness" of Acts 8:23 may mean the "'bitter gall-root' of superstition and magic" (F. F. Bruce, comm. on Acts [*NICNT*, 1954], p. 184).

GALLERY [Heb. *ʾattîq*; LXX *peristylon*–'colonnade' (Ezk. 42:3, 5); NEB CORRIDOR. A word of doubtful meaning. K. Galling (in G. Fohrer, *Ezechiel* [1955]) rendered it "terrace," which suggests a derivation from *nāṯaq*, "cut off, tear away." G. R. Driver (*JTS*, 32 [1931], 363) related it to Akk. *etēqu*, "to pass along," hence "corridor." But neither *etēqu* nor any of its derivative nouns means "corridor" in Akkadian, and since Heb. *ʿāṯaq*, "move forward," is clearly related to Akk. *etēqu*, Driver's suggestion should be rejected (contra KoB, p. 101). In addition, in 41:15 C. H. Cornill's emendation (comm. on Ezekiel [1886]), viz., "and the walls thereof" (cf. RSV, "and its walls") is textually unsupported (except for the minor detail of *w* [*K*] for *y* [*Q*], the MT makes as much sense and should be retained; cf. AV, NEB). That they were woodpaneled in 41:16 suggests that some form of interior corridor is intended.

Its use here must be interpreted by our understanding of the priests' chambers (*see* TEMPLE). Probably the building rose in three steps or terraces corresponding to the rise in the ground. If this is so, it will explain why only the upper story (42:6) was narrower; owing to the hillside the actual depth of the first and second stories will have been the same. The "gallery against gallery" (42:3) may refer to the symmetrical parallelism of the chambers to the north and south. Since the terraces presumably gave admission to the upper stories, it can easily be seen why the same word should be used with respect to corridors within the temple block itself.

GALLEY [Heb. *ʾonî*] (Isa. 33:21). *See* SHIPS.

GALLIM gal'im [Heb. *gallîm*–'heaps']. Two sites, one N and the other S of Jerusalem.

1. A town in the hill country of Judah, listed among eleven towns in the LXX of Josh. 15:59 that are not found in the MT. It is mentioned between Karem (ʿAin Kârim) and Bether (Bittîr) and is probably to be identified with Beit Jalā, WNW of Bethlehem.

2. A town in Benjamin, mentioned along with Laishah and Anathoth (Isa. 10:30), on the route that the Assyrians would take in their advance to Jerusalem according to Isaiah's prophecy (Isa. 10:24-34). It was the home of Palti the son of Laish, to whom Saul had given his daughter Michal, David's wife (1 S. 25:44). It has been identified with the modern Khirbet Kaʿkûl, about 1 km. (0.6 mi.) W of Anathoth (ʿAnâtâ). W. S. L. S.

GALLIO gal'i-ō [Gk. *Galliōn*]. The Roman deputy or PROCONSUL of Achaia before whom Paul was brought by his Jewish accusers on his first visit to Corinth, during his second missionary journey (Acts 18:12-17). The trial was not of long duration. Although Gallio extended his protection to the Jewish religion as one of the religions recognized by the state, he contemptuously rejected the claim of the Jews that their law was binding upon all. In the eyes of the proconsul, the only law universally applicable was that of the Roman code and social morality, and under neither was the prisoner chargeable; therefore, without even waiting to hear Paul's speech in his own defense, he summarily ordered his accusers to clear the court. Even the subsequent treatment meted out to Sosthenes, ruler of the synagogue, was to him a matter of indifference. Gallio has often been described as typical of one who is careless or indifferent to religion; yet in the account given of him in Acts, he merely displayed an attitude characteristic of that with which Roman governors regarded the religious disputes of the time (*see also* LYSIAS; FELIX; FESTUS). He refused to adjudicate the squabbles of what he regarded as an obscure religious sect, whose law was to him a subtle quibbling with "words and names."

According to extracanonical sources the original name of Gallio was Marcus Annaeus Novatus, but this was changed when he was adopted by the rhetorician Lucius Junius Gallio. He was born at Cordova, but came to Rome during the reign of Tiberius. He was the son of Seneca the rhetorician and brother of Seneca the philosopher, by whom, as also by Statius, reference is made to his affable nature. An inscription from Delphi makes it probable that he acceded to the office of proconsul of Achaia *ca.* A.D. 52. (*See also* CHRONOLOGY OF THE NT II.F.) Early in Nero's reign he returned to Rome, having been granted a substitute consulate. He and his brother (who had earlier been Nero's tutor) lost their lives as a result of their participation in a conspiracy against Nero.

C. M. KERR

GALLON. The AV "two or three firkins" (Gk. *metrētḗs*) in Jn. 2:6 is rendered in the RSV and NEB "twenty to thirty gallons," an approximate equivalent. *See* FIRKIN.

GALLOWS. *See* HANGING; PUNISHMENTS.

GAMAD, MEN OF gā'mad [Heb. *gammāḏîm*] (Ezk. 27:11); AV GAMMADIMS; NEB MEN OF GAMMAD. Gammad is the name of an unknown place near Tyre, the inhabitants of which were in Tyre's army. (The JB has "kept watch," following the LXX *phýlakes*.) Some have identified it with the Kumidi of the Amarna Letters.

GAMAEL gam'ə-el [Gk. *Gamaēl*]. Chief of the family of Ithamar who went up from Babylon with Ezra (1 Esd. 8:29); called Daniel in Ezr. 8:2.

GAMALIEL gə-mā'lē-əl [Heb. *gamlîʾēl*–'God is my recompense/reward,' indicating the loss of one or more earlier children in the family; Gk. *Gamaliēl*].

1. Gamaliel son of Pedahzur, leader of the tribe of Manasseh during the census of the Israelites in the desert of Sinai (Nu. 1:10; 2:20; 7:54, 59; 10:23).

2. Rabbi Gamaliel I, son of Simon and grandson (according to the Talmud) of Rabbi Hillel (founder of the more liberal of the two main schools of the Pharisees, Shammai being the other). Although an alternate tradition makes Gamaliel the son of Hillel, the Talmud is surely to be preferred on this point. A member of the Sanhedrin and a teacher of the law (Acts 5:34), he was known in rabbinical writings as Gamaliel the Elder to distinguish him from his grandson, Gamaliel II. He was the first of seven successive leaders of the school of Hillel to be honored with the title *Rabban* ("Our Rabbi/Master").

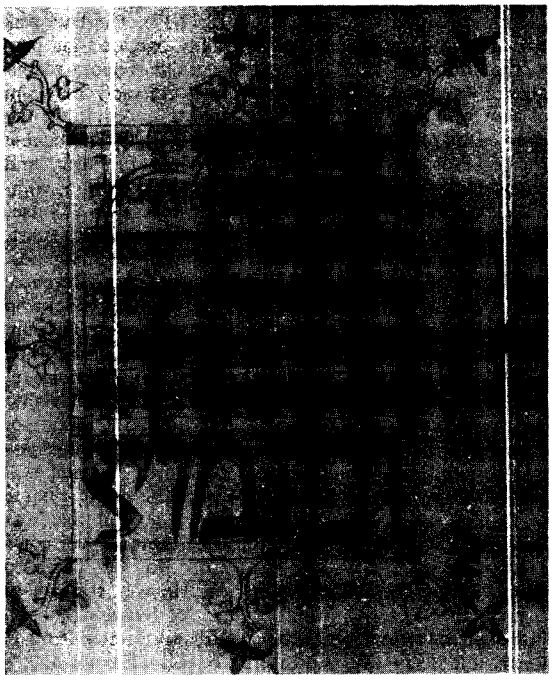

Illustration from the *Pollak-Pratto Haggadah* (Spain, ca. A.D. 1300) showing Gamaliel instructing two pupils (Jewish Theological Seminary Library)

While believing the law of God to be divinely inspired, Gamaliel tended to emphasize its human elements. He recommended that sabbath observance be less rigorous and burdensome, regulated current custom with respect to divorce in order to protect women, and urged kindness toward Gentiles. Scholarly, urbane, a man of great intellect, he studied Greek literature avidly. What we know of his tolerance and cautious spirit is entirely in keeping with the account of his appeal in the Sanhedrin to spare the lives of Peter and his companions (Acts 5:33-39).

T.B. *Shabbath* 30b mentions a student of Gamaliel who displayed "impudence in matters of learning," a young man identified by some as the apostle Paul. Paul himself says, "Under Gamaliel, I was thoroughly trained in the law of our fathers and was just as zealous for God as any of you are today" (Acts 22:3, NIV). Several indications from elsewhere in the NT tend to corroborate Paul's claim as recorded by Luke.

(1) Although Paul usually quotes from the LXX when referring to OT passages, he sometimes clearly makes use of the Hebrew text (Job 41:3 in Rom. 11:35; Job 5:12f. in 1 Cor. 3:19; Ex. 16:18 in 2 Cor. 8:15; Nu. 16:5 in 2 Tim. 2:19).

(2) In Gal. 1:14 Paul mentions a period of advanced and specialized study of the very kind that one might expect under a teacher of Gamaliel's stature, and he does so in language strongly reminiscent of Acts 22:3: "I was advancing in Judaism beyond many Jews of my own age and was extremely zealous for the traditions of my fathers" (NIV).

(3) In Phil. 3:6f. Paul asserts that before his conversion to faith in Christ he was faultless as far as legalistic righteousness is concerned. In accordance with the Judaism of his day, Paul had earlier believed in the possibility of salvation through works, but after exercising faith in Christ he came to realize that only through Him could the righteous requirements of the law be fully met in redeemed sinners like himself (Rom. 8:3f.).

(4) Paul made use of five of the seven hermeneutical principles usually associated with Gamaliel's grandfather Hillel. This is understandable in the light of the fact that Gamaliel consistently and faithfully perpetuated the teachings and methodology of his grandfather. For example, Paul uses the hermeneutical principle of arguing from the lesser to the greater in 1 Cor. 9:9-12, which begins as follows: "Do not muzzle an ox while it is treading out the grain." After thus quoting Dt. 25:4, the apostle makes application — in typical Halakic fashion — by stating that if God is concerned about oxen He is all the more concerned that His faithful human servants receive the support they deserve and need.

(5) In 1 Cor. 14:21 Paul quotes Isa. 28:11f. as a citation from "the law" — a statement entirely fitting for a student of Gamaliel.

Luke's characteristic restraint in his references to Gamaliel in Acts may be contrasted with two later passages that also mention him. According to Clement *Recognitions* i.65, the apostle Peter states that Gamaliel was "our brother in the faith," and Photius (*Bibliothecae codices* 171 [*PG*, p. 199]) asserts that he was baptized by Peter and Paul. But both of these traditions are now universally rejected as spurious.

Gamaliel's reputation as one of the greatest teachers in the annals of Judaism, however, remains untarnished and is perhaps best exemplified in Mish. *Sotah* ix.15: "Since Rabban Gamaliel the Elder died there has been no more reverence for the law, and purity and abstinence [*pᵉrîšût*, cf. "Pharisee"] died out at the same time."

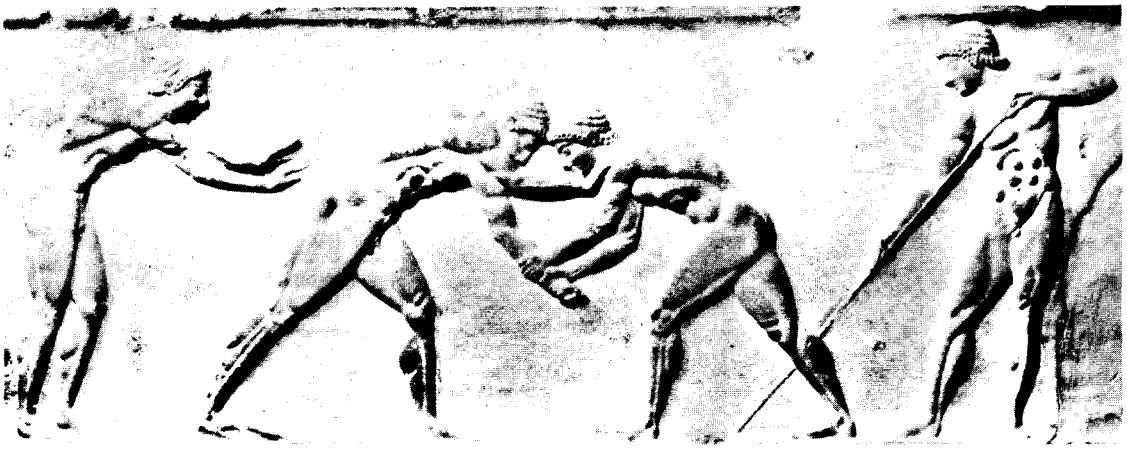
GAME [Heb. *ṣayiḏ*] AV, NEB VENISON. The RSV references to game occur in Gen. 25:28; 27:3-33 only, and refer to the wild beasts of the chase that were regarded as suitable for food. The list of provisions for Solomon's table (1 K. 4:23), including "harts, gazelles, roebucks and fatted fowl," represents the variety of game in the ancient Near East.

See also HUNTING.

GAMES. The Bible contains little information about amusements in the form of games, but archeology and history provide an invaluable background for the frequent indirect allusions to them.

I. Games in Antiquity
  A. In the Ancient Near East
  B. In Greece and Rome
II. Games in the Bible
  A. In the OT
  B. In the NT

I. Games in Antiquity.—*A. In the Ancient Near East.* From the vantage point of the history of religion, the various forms of secular games in antiquity seem to derive from original engagements that expressed magical intentions. The players, reenacting mythical scenes, represented deities and often carried masks. The purpose of these ritual enactments was to secure the existence of the world, the life cycle, or the victory of the positive principle over the antagonistic one (chaos, dragon). An illustration may be found in the fake battles fought between the followers of Osiris and those of Seth, god of battles, in the cult of Osiris (Herodotus ii.63f.). The name "sacer



Relief showing, from left, a runner, two wrestlers, and a javelin thrower (National Archaeological Museum, Athens)

ludus" has been suggested (G. van der Leeuw) for this form of the holy games from which drama developed (Montet, p. 297).

One of the Egyptian tomb paintings at Beni-hasan (*ca.* 1900 B.C.) shows young women or teenage girls playing ball. They show their skill by keeping two of four balls in the air at once. Another picture from the same tomb shows a player on his knees while two others, unseen by him, thump or pretend to thump his back with their fists (J. G. Wilkinson, *Ancient Egyptians* [1878], II, 61). This seems to have been the type of game known by the Greek name "Kollabismos," of which Pollux said that one player covered his eyes with the palms of his hands while another hit him and asked him which hand dealt the blow (Pollux *Onomasticon* ix.129). Egyptian paintings show boys or young men playing team games and tug of war, while girls practiced juggling or ball games, including catch played with younger girls sitting on older girls' backs (Montet, p. 101 fig.).

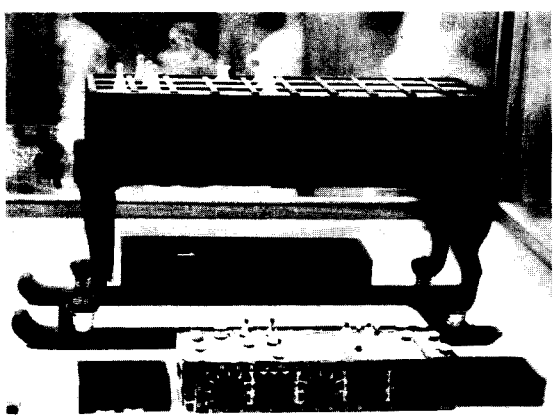
In Egypt married couples played checkers on a rectangular board, divided into thirty or thirty-three squares with black and white pieces much like the pawns in modern chess. The moves were governed by throwing dice, unlike the free moves of today (Hayes, pp. 249-251). Examples of dice have been found at Beth-shean and Tell Beit Mirsim (17th cent. B.C.) with playing pieces (Albright, p. 117 plate 21). A teetotum was spun, and the number of holes on the side that fell uppermost determined a player's moves. An ivory gaming board with the playing pieces was also found at Tell Beit Mirsim and further gaming boards have been recovered from excavations at Beth-shemesh (one from stratum V, *ca.* 1700-1500 B.C. and another from stratum IV, *ca.* 1500-1200 B.C.) and Tell el-'Ajjûl in Palestine. These gaming boards from Palestine are presumably for a game that originated in Mesopotamia, where the Sumerians played on a board of twenty squares (van Buren, pp. 11ff.). From there it spread also to Egypt (Albright, p. 49). An elaborate game board made of ivory and ebony veneer with ten carved ivory pins having heads of dogs and jackals has been preserved in Egypt; the pins were moved according to the throwing of knucklebones.

Excavations at Megiddo in Palestine have brought to light an ivory game board (*ca.* 1350-1150 B.C.) for the "game of 58 holes," and one made of stones has been found at Gezer (*ca.* 1200 B.C.). Some ivory game pieces from Megiddo (*ca.* 1200 B.C.) include a circular disc with an animal and a tree incised on its face, and conical pieces with a knob at the top, not unlike the "halma" men of today. Pyramidical or conical game pieces and counters and "halma" men were also discovered at Lachish near Jerusalem.

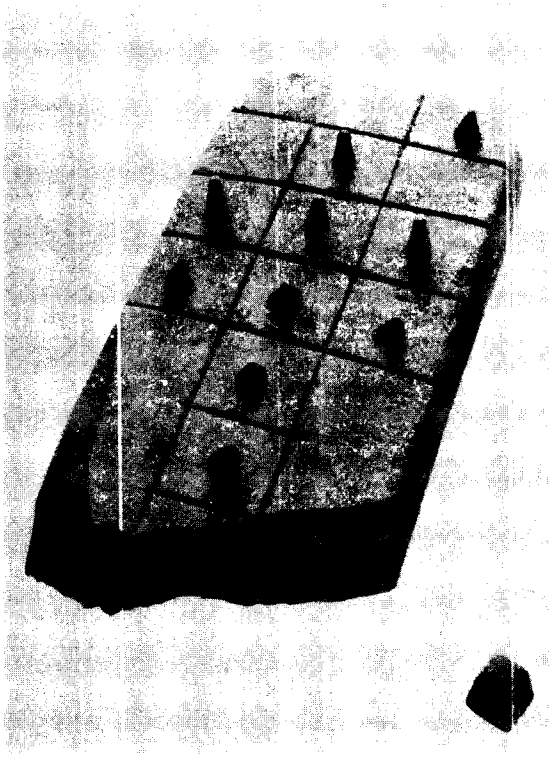
At Umm el-Bayyârah (biblical Sela), the great mountain city that dominated the basin in which the Nabatean city of Petra was built, game boards were discovered carved

Queen Nefertari, wife of Ramses II, playing checkers in a painting from her tomb in the Valley of the Queens at Thebes (ca. 1292 B.C.) (Service des musées, Cairo; picture Lehnert and Landrock)

Two Egyptian games of checkers from the tomb of Tutankhamen (Egyptian Museum, Cairo; picture Lehnert and Landrock)



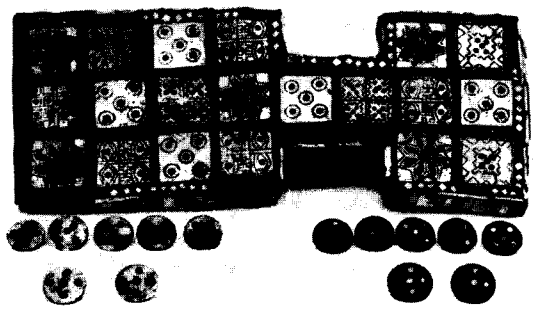
GAMES



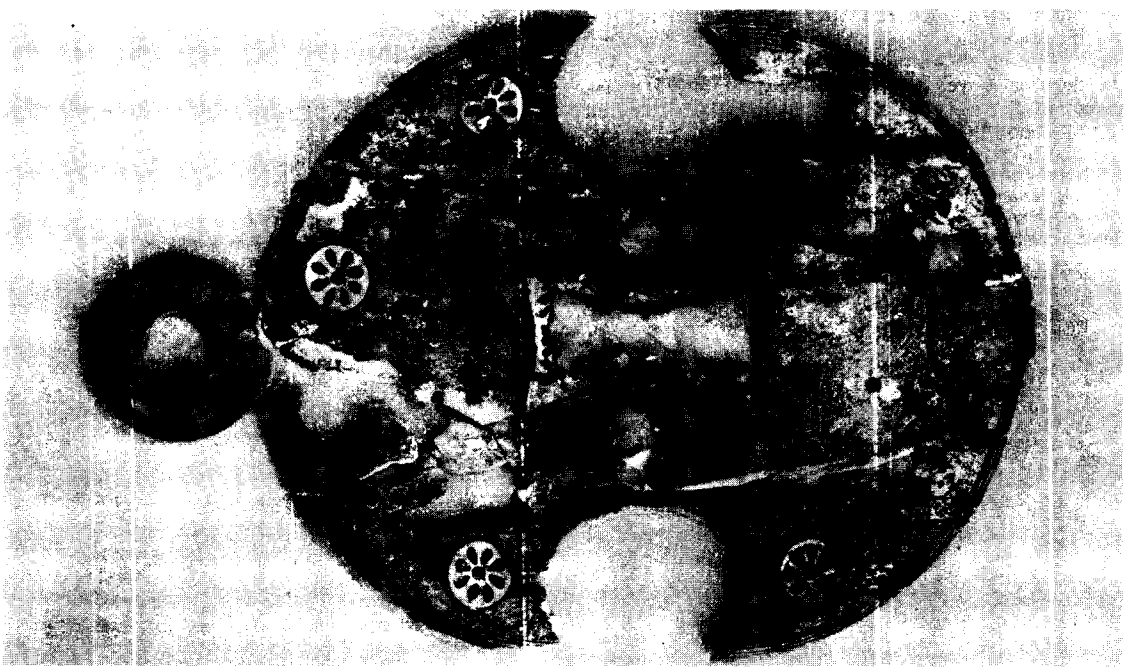
Game board from Beth Shemesh, with five pyramid-shaped and five conical pieces of blue faience from Tell Beit Mirsim. The object at lower right is ivory and looks like a die — note the varying number of holes on its four sides — and was perhaps thrown to determine the moves. All game parts are Middle Bronze (Israel Department of Antiquities and Museums)

Hounds-and-jackals game made of ivory and ebony, from the tomb of Ren Seneb (*ca.* 1800 B.C.). The pegs were moved on the board according to the throw of the knucklebones (Metropolitan Museum of Art, Carnarvon Collection, gift of Edward S. Harkness 1926)

Inlaid game board originally hollowed to contain the fourteen playing pieces, which are made of black shale inlaid with white shell, or of shell with lapis-inlaid spots. From a grave at Ur (25th cent. B.C.) (Trustees of the British Museum)



Ivory game board (*ca.* 13th cent. B.C.) with gold and blue paste inlays, found with twenty-six gold-leaf studs at Megiddo (Oriental Institute, University of Chicago)



in rock. These game boards are made up of three rectangles within which are parallel rows of nine to eleven smaller rectangles (Morton, p. 35 fig. 6). It is believed that the game played on these boards may have been an ancient Nabatean or possibly pre-Nabatean version of the modern "mancala" game (Matson, p. 139), which is still played by the bedouin of the district (Morton, pp. 33f.). Another game played on a game board was chess, known to have been played in Babylonia and Elam from the 3rd millennium B.C. and possibly known in Palestine as well. Excavations at numerous Palestinian sites have brought to light what must be considered toys of the young, such as rattles, marbles, animals (with wheels), chariots, whistles, dolls, etc. These have survived because they were made of baked clay.

Although archeology has provided much information concerning games that were known in biblical times, information on the rules that governed their playing is still lacking.

B. In Greece and Rome. It is known that in the Hellenistic period many Jews readily adopted Greek games, and the gymnasium and theater became popular, largely through the influence of the Seleucid rulers. Early in the reign of ANTIOCHUS IV EPIPHANES (175-164 B.C.) a gymnasium was built in Jerusalem (1 Macc. 1:14; cf. 2 Macc. 4:9, 12). Reportedly even priests were such enthusiastic spectators at the athletic fields that they would leave the altar and run to the arena when they heard "the call to the discus" (2 Macc. 4:14). The Tobias family, which was the leader of a new aristocracy of wealth, was responsible for converting Jerusalem from an obscure city into a town of prominence. To hellenize Jerusalem they succeeded in building the above-mentioned gymnasium and formed bodies of (Gk.) *éphēboi,* i.e., corps of young men associated with this central institution of a Hellenistic city. Judean youths and priests were nude during the athletic games (1 Macc. 1:12-15). After the Maccabean revolt (167 B.C.) the athletic games fell into general disrepute among the Jewish population of Palestine (Josephus *Ant.* xv.8.2 [277]). Nevertheless, Hellenistic games were familiar to most in Jerusalem and elsewhere during the later Herodian and Roman periods. Herod the Great built a theater, amphitheater, stadium, and hippodrome in Caesarea, where games were to be held every fifth year. He also built a theater in Jerusalem and an amphitheater nearby (*Ant.* xv.8.1 [268]). Jericho reportedly was also provided with a theater, amphitheater, and hippodrome. Thus, Greek and Roman games appear to have been widely known in Palestine, and an acquaintance with them will facilitate a better understanding of a number of NT passages.

The public games of Greece (Gk. *agônes*) and Rome (Lat. *ludi*) consisted of a variety of athletic games and contests. The athletes were trained in the Greek gymnasium, which was the central market where poets, artists, and merchants brought their goods. The exhibitions of the later Roman amphitheater and circus never matched the glory of the ancient Greek games; they were at best a shadow and later nothing more than a farcical imitation.

The Olympic games were the earliest and remained the most celebrated of the four national festivals of Greece. The foot race (*drómos*) of a single lap of the stadium (*stádion*), which was about 180 m. (200 yds.) long, was at first the only contest. Later (14th Olympiad) the double lap and others were added. The goal of the foot race was a square pillar that the runner kept in view to redouble his exertion. Wrestling was introduced at the 18th Olympiad. Plutarch called wrestling the most artistic and cunning of all athletic games. The wrestler's limbs were oiled and sprinkled with sand. Otherwise wrestling differed little from that of today. No struggling was allowed on the ground, however, and the third throw decided the victory (cf. 2 Macc. 4:14). Boxing was carried on much as it is today, with leather thongs bound round the boxer's fists and wrists. The Greek boxers did not hit out straight from the shoulder but fought in a windmill fashion. A Roman development of boxing involved a weighting of the leather thongs with lead, iron, or metal studs, which produced grave injuries to the boxers. The chief strategy of the boxers was therefore evasion. Discus throwing was carried on with a round plate of stone or metal 30 cm. (12 in.) in diameter (2 Macc. 4:14). Pausanius enumerated twenty-four Olympic contests, though it must not be supposed that all were exhibited at any one festival. At first the games lasted one day; later they were extended to five.

Roman theater in Amman (W. S. LaSor)

The Pythian games, as a chronological era, dated from 527 B.C. and were especially devoted to musical competitions. The Pythiads were also held at the end of every fourth year. The Nemean games were biennial and dated from 516 B.C. The contests were like the Olympiads. The Isthmian games began in 523 B.C. and were held at the first and third years of each Olympiad. These games were managed by the Corinthians on the Corinthian Isthmus. They included gymnastics, horsemanship, and musical contests. A herald (Gk. *kḗryx*) announced the name and country of each competitor and the name, country, and father of each victor. The victors were rewarded at the great games by a wreath or crown consisting in the NT period of wild olive (Olympiads), laurel (Pythiads), wild celery (Nemeads), and pine or wild celery (Isthmiads).

The Romans introduced the *venatio,* i.e., the baiting of wild animals that were pitted against each other or against men who could be either captives, criminals, or trained hunters called *bestiarii.* This type of exhibition was carried on in the amphitheater. Herod the Great followed the custom of the Roman proconsuls and generals in supplying his arenas with lions and other wild beasts of rare or unusual strength in order to have condemned men fight them or have these animals fight each other (Josephus *Ant.* xv.8.1). The special show of the amphitheater was the *manus gladiatorium* or gladiatorial combat. These brutal shows clearly exhibit the vein of coarseness and inhumanity running through the character of mankind. It is known that Herod the Great had condemned criminals thrown to wild animals in his amphitheater near Jerusalem in order to afford "delight to spectators" (*Ant.* xv.8.1). After the fall of Jerusalem in A.D. 70, Titus had a great number of captives either thrown to wild beasts or forced to kill one another as if they were animals (Josephus *BJ* vii.2.1 [24]).

II. Games in the Bible.–The Bible gives only scattered indications of games and play. But the ancient Hebrews had their games as the various archeological finds indicate (see I.A above).

A. In the OT. Though there is not a single direct reference in the OT to toys for children, the finds of whistles, rattles, marbles, dolls, animals (at times with wheels), and other objects on numerous sites in Palestine give some indication of the type of toys with which the Israelite young played.

The first reference to playing is Gen. 21:9, where Ishmael was "playing" (Heb. *mᵉṣaḥēq*) with Isaac (AV "mocking"; NEB "laughing at him"). The Hebrew word is the intensive form (piel) of the verb *ṣāḥaq*, a wordplay on the name "Isaac." Some interpreters suggest that the meaning "mocking" would require the Hebrew preposition *b-* to designate the object. Others point out that in the majority of instances this intensive form of the verb is used in the sense of behaving wantonly with someone, viz., taunting, jesting, making sport of someone (Gen. 19:14; 39:14-17; Ex. 32:6; Jgs. 16:25). On this basis the seventeen-year-old Ishmael appears to have maliciously laughed at this three-year-old brother Isaac (cf. Gen. 16:16; 21:5). This "playing" with Isaac would mean something much different than that the older brother was merely trying to "amuse" his little brother.

Yahweh's question to Job, "Will you play with him [Leviathan = crocodile] as with a bird, or will you put him on leash for your maidens?" (Job 41:5 [MT 40:29]), suggests that Hebrew children, especially girls, made pets of birds. Job 21:11f. makes reference to children engaged in carefree singing and dancing (*ANEP*, no. 216). In Zec. 8:5 the aged of the restored city are envisaged as enjoying days of leisure when boys and girls will be playing in the streets. The nature of their games is not indicated, but reliefs from Egypt that depict girls dancing or playing games (no. 216) and boys engaged in tug of war and other games (no. 217) may provide a background. Playing ball is alluded to in Isa. 22:18: "He will . . . whirl you round and round, and throw you like a ball into a wide land." The Hebrew verbs (from *ṣnp*) underlying the initial phrase imply a winding up of cloth into the shape of a ball that can roll freely.

Jacob's long bout of wrestling at Penuel seems to presuppose some prior practice of this type of fighting, for the struggle was indecisive for a long period of time (Gen. 32:24). Jacob's opponent won the upper hand when Jacob's hip socket was wrenched at the sciatic muscle during the struggle (vv. 25, 33). It is not impossible that both wrestlers were acquainted with the rules and tricks of fighting. The proverbial expression "hip and thigh" (lit. "thigh upon hip"), used in connection with Samson's victory over the Philistines (Jgs. 15:8), is taken by some interpreters to be a technical term that ultimately derives from wrestling.

The meeting between Saul's men and those of David at Gibeon, where Abner and Joab agreed to let them "arise and play before us" (2 S. 2:14 [Heb. *śiḥaq*]; NEB "join in a single combat"), seems to refer to a tournament or a group combat with wrestling. Wrestling by grasping the belt of an opponent was an ancient form of engagement in combat (*ANEP*, no. 219). In any case the group combat of the young men at Gibeon soon degenerated into a fierce battle (vv. 15-32).

Running evidently was practiced at least from the time of the monarchy. Saul and Jonathan (2 S. 1:23), Asahel (2:18), Ahimaaz (18:23, 27), and some of the Gadite warriors in David's service (1 Ch. 12:8) were famous for their swiftness, which must have been the result of exercise and training. The feats of those who ran before the king or prince (1 S. 8:11; 2 S. 15:1; 1 K. 1:5; 18:46) could not have been achieved without practice. The figure of speech of the sun rejoicing like a strong man to run his course seems to have its origin in competitive games (Ps. 19:5b [MT 6b]); for a similar metaphor, cf. the one who will "run the course" of God's commandments (Ps. 119:32, NEB).

Archery could be a game of skill with the shooting of an arrow at a fixed target (1 S. 20:20, 35-38). Job's complaint that "he set me up as his target, his archers surround me" (Job 16:12b-13a) reflects archery (cf. Lam. 3:12). Assyrian reliefs depict archery as both a game of skill and a warlike art. (*See also* ARCHER, ARCHERY.)

The custom of using a sling for projecting stones must also be mentioned. The sling was used among the Hebrews by shepherds (1 S. 17:34-36, 40, 49) and warriors (2 K. 3:25; 2 Ch. 26:14). But it must not be supposed that the use of the sling was in OT times restricted to these groups; doubtless it was also a game of skill. Stone-slinging as a formidable weapon of war was used not only by the Israelites but also by the Assyrians, Egyptians, and Babylonians. The Benjaminites had an elite group of seven hundred left-handed stone-slingers who could sling a stone at a hair and not miss (Jgs. 20:16; cf. 1 Ch. 12:2). Archeologists have discovered round stone balls of two or three inches in diameter at numerous Palestinian sites and have usually identified these as slingstones. According to estimates, a slingstone weighing up to 453 gm. (1 lb.) can be catapulted with a sling at a speed up to 140 km. (90 mi.) per hour and hit its target with great accuracy.

The Israelites also participated in another sort of "play." They spoiled the cult in the wilderness in that they "sat down to eat and drink, and rose up to play" (Ex. 32:6). Special emphasis is here placed upon extravagant celebrations. The eating and drinking refer to a sacred meal. But this cultic festival had its final aim in the rising up "to play," which "doubtless refers to sexual orgies (see Gen. 26:8) such as played a part in the Canaanite fertility cults" (M. Noth, *Exodus* [Eng. tr., *OTL*, 1962], p. 248).

B. In the NT. The NT references to games are fairly frequent but never direct. With rare exceptions they are used in drawing spiritual lessons.

An indirect reference to the games children played in the streets and town squares is provided by Jesus in quoting a saying that they called to their playmates (Mt. 11:17; Lk. 7:32). It reveals that these youngsters copied their elders in playing weddings and funerals. This may mean by implication that the children of Jesus' day copied other customs and rites of everyday life for their games.

Spiritual lessons could be easily drawn from the various known Greek and Roman games. In 1 Cor. 9:24-27, Paul, who may have witnessed the Isthmian Games in A.D. 51 (Broneer, pp. 185-87), called the attention of the Corinthian believers to the vigorous training of the athletes (a metaphor also used by the Greek poet Epictetus). The athletes exercised "self-control in all things" (v. 25; cf. 1 Tim. 4:7; 2 Tim. 2:5), which reflects the Greek custom that athletes observe a severe period of training under very specific rules and exercise self-denial in watching their weight. The race in which all the runners competed (v. 24) referred to the foot race (see I above). Paul did "not run aimlessly" (v. 26), because like the runners in the foot race of the Greek games he had his eyes fixed upon the goal. As the victor received the "prize" (v. 24) in the form of "a perishable wreath" (v. 25), viz., the wreath of wild celery of the Corinthian Isthmian games that withers quickly, so the Christian will receive a wreath. But his wreath or crown of victory is "imperishable" (v. 25; cf. 2 Tim. 2:5; 4:8; cf. 1 Pet. 1:4; 5:4). Phil. 4:1; 1 Thess. 2:19; He. 2:7-9; Jas. 1:12; Rev. 2:10; 3:11 also

allude to the wreath or crown. The palm-bearing multitude of Rev. 7:9 is possibly reminiscent of the carrying of palm branches by victors at the games.

The phrase "I do not box as one beating the air" (1 Cor. 9:26) depicts a boxing contest in which the hands were bound with studded leather that inflicted grave injury. The boxers, therefore, used a technique of evasion rather than one of parrying — hence the phrase "beating the air." Paul concluded this passage by comparing himself to the "herald" (*kḗryx*) who called others to the contest but was himself disqualified from competing (v. 27; cf. 1 Tim. 2:7; 2 Tim. 1:11). These pictures drawn from the Greek games were particularly meaningful metaphors for the Corinthian readers of this letter, since the Isthmian games were a Corinthian festival.

Several NT epistles compare the Christian life to a foot race. The writer of the letter to the Hebrews stressed that the successful runner of the Christian's race had to lay aside everything that was a hindrance (sin) and had to persevere in order to win (He. 12:1). In addition, the runner's eye had to be fixed upon the goal, Jesus (v. 2), as the eye of the runner in the games was fixed on the square pillar that he must reach. Paul employed the picture of the runner a number of times. He wanted to make absolutely sure that the course that he was pursuing or had pursued was not in vain (Gal. 2:2). The fruit of the Philippian believers proved to Paul that he had not run the race in vain (Phil. 2:16). Paul's whole attention in the race that he was running was on the finish line in order to win the prize that God had in store, viz., life on high with Jesus Christ, his Lord (Phil. 3:14). But the wreath or crown of the winner could not be received unless one had kept the rules of the athletic contest (2 Tim. 2:5).

A reference to wrestling (Gk. *pálē*) is found in Eph. 6:12, where the Christian is told that he is engaged in an all-out wrestling match not against flesh and blood but against principalities and powers and world rulers of the present aeon of darkness.

Philippians 3:13f. may refer to a chariot race. In NT times hippodromes existed in many cities of the Roman empire, and Philippi was a Roman colony. Paul seemed to picture himself as a charioteer who in the decisive state of the chariot race was "straining forward to what lies ahead" (v. 13). In such intense pressing on "toward the goal for the prize" (v. 14) at high speed a glance at "what lies behind" (v. 13) would be fatal. Thus, Christians must "forget" that which they have achieved already, and with newly bestowed powers they must strain forward and press on with all their might to reach the goal and gain the prize of victory.

The judges who sat near the goal and had been carefully prepared for their task (at least at the early Olympiads) are employed in a metaphor in 2 Tim. 4:8: "The crown of righteousness, which the Lord, the righteous judge, will award to me on that Day. . . ." The emphasis on the "righteous" nature of the judge may likely be due to the deterioration of the games, as was illustrated by Nero's announcement of his own infamous victory at Olympia (A.D. 67).

In the Synoptic account of Jesus' "mockery" (*empaízō*, Mt. 27:29-31 par.) Jesus among other things was reported "blindfolded" (*perikalýptō*, Mk. 14:65 par. Lk. 22:64), "struck" (*kolaphízō*, Mt. 26:67; Mk. 14:65; *dérō*, Lk. 22:63), and also commanded to guess who was the source of the physical abuse by the specific demand, "Who is it that struck you?" (Mt. 26:68; Lk. 22:64). The mockery referred to the playing of blindman's buff with Jesus. This game, called *chalkḗ myía* by Pollux (*Onomasticon* ix.123), had a rich mythological and religious history and background (cf. Miller, pp. 309-311). A possible site of the events indicated in the accounts of Jesus' mockery is the court of the Fortress Antonia in Jerusalem. At the base of the northeastern stairway of the court archeologists have discovered games incised into the flagstone pavement (Aline de Sion, plate 45) underneath the convent of "Notre Dame de Sion." These game tables indicate the range of games: knucklebones, dice games, and capture games or tic-tac-toe board games. At three places in the flagstones a "B" was incised, symbolizing the Greek *basileús* (king) or the Roman *basilicus*, the latter being the best roll of dice and possibly implying that the "king's command" (Gk. *basilínda*) was played here. This game is related to the modern "dare, double dare" (Opie, p. 266). Pollux reported that in the ancient form of this game a king was elected by lot and all others had to obey his commands (*Onomasticon* ix.110). This game has been connected to the cruel practices of certain saturnalian festivals during which a scapegoat was elected by lot as a mock king, abused for the festival period, and killed at the end. This game may have been related to the parody of royalty imposed on Jesus during His passion (Mk. 15:16-20 par.).

G. F. HASEL

GAMMADIM gam'a-dim (Ezk. 27:11, AV). *See* GAMAD, MEN OF.

GAMUL gā'məl [Heb. *gāmûl*]. The head of the twenty-second of the twenty-four divisions of priests inaugurated by David (1 Ch. 24:17).

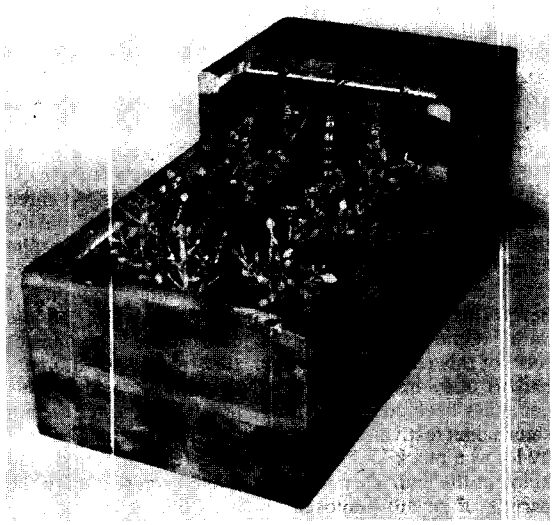
GANGRENE [Gk. *gángraina*] (2 Tim. 2:17); AV CANKER. A Greek medical term used since the time of Hippocrates for a spreading ulcer. Paul compares the corrupting influence of profane talk to this disease. The old English word "cankers" (cf. AV) was used by sixteenth- and seventeenth-century authors as the name of a caterpillar that eats into a bud.

GAR gar (1 Esd. 5:34, AV). *See* GAS.

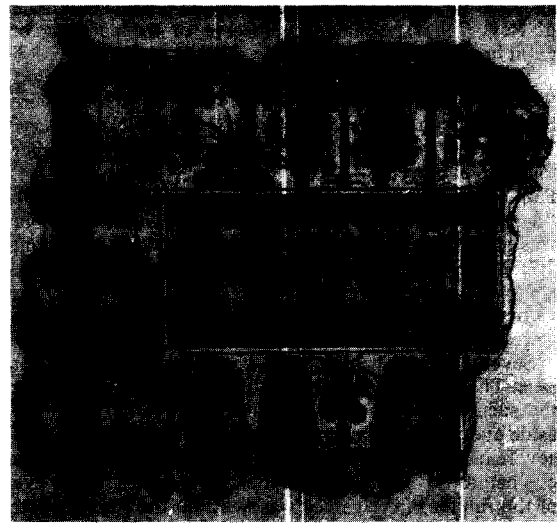
GARB, HER CAPTIVE'S [Heb. *śimlaṯ šiḇyāh*] (Dt. 21:13); AV "raiment of her captivity"; NEB "clothes which she had when captured." The clothing worn by a woman of an enemy people at the time she was taken captive was to be shed when she was taken into the house of an Israelite as a wife. This act was perhaps symbolic of her crossing over to a new way of life.

GARDEN [Heb. *gan, gannâ, karmel*; Gk. *kḗpos*]. An enclosure or surrounded area of land, such as a fenced plot that could be used for various purposes. In different locations the fence could be made from thorns, stones, or mud bricks.

Gardens were a prominent part of the irrigation economies of both Mesopotamia and Egypt; and in the case of wealthy or influential persons the garden was quite ex-



Funerary model of a garden from the tomb of Meket-Re (11th Dynasty, *ca.* 2000 B.C.) at Thebes (Metropolitan Museum of Art, Museum Excavation, 1919-1920; Rogers Fund, supplemented by contribution of Edward S. Harkness)



Painting of the garden of a private estate with ornamental water, from the tomb of Nebamen at Thebes (*ca.* 1400 B.C.) (Trustees of the British Museum)

tensive and usually adjoined the residence. In ancient Mesopotamia the royal palace normally had adjacent courts where gardens were cultivated, the most celebrated being the so-called hanging gardens of Babylon. Actually, these "gardens" were elevated masonry terraces supposedly built in the form of a square of which the sides were about 120 m. (400 ft.) in length, and raised on arches to a height of 23 m. (75 ft.), so that the trees they contained were visible above the roofs of other buildings. When Babylon was enlarged under Nebuchadrezzar II it spread out on either side of the Euphrates, and according to Herodotus (i.178) enclosed an area of 525 sq. km. (200 sq. mi.), about nine-tenths of which comprised parks, fields, and gardens.

The ancient Egyptians, too, cultivated gardens, orchards, and parks, and wealthy families frequently maintained country estates where the owners could relax amid a profusion of flowers, fruit trees, and artificial ponds. Excavations at Râs Shamrah (Ugarit) have shown that a garden once occupied a large court inside the well-appointed palace of the kings of Ugarit in the 14th and 13th cents. B.C.

The gardens referred to in biblical times were generally walled enclosures that were frequently irrigated (Isa. 58:11); they sometimes contained a shelter or arbor in which the owner could sit and enjoy the fragrance of the herbs and flowers. Such gardens are mentioned in Eccl. 2:5f.; cf. the figurative use in Cant. 4:12-16; and the mention of "Eden the garden of God" in Ezek. 28:13; 31:8f.; Joel 2:3. If they belonged to kings or to people of wealth, they would probably include an orchard and a private park as well as a flower or herb garden (cf. 2 K. 25:4). The gardens mentioned in the Bible allowed various uses, since they were not merely cultivated for their produce but were often intended to serve as outdoor living areas in the summer, when the houses were hot and stuffy. The gardens in which trees were planted were favorite places for walking or for outdoor banqueting, or, if a pool had been installed, for bathing (Sus. 4, 7, 15-18). *See* picture in EAT.

The most common use of gardens was for the cultivation of vegetables, herbs, and flowers (Cant. 5:1; 6:2), while some gardens contained fruit and olive trees as well as grape vines. The Garden of Gethsemane, for example, was a private olive grove that would have its own vat for extracting the olive oil. In the case of large estates it was common for the family graves to be located in a garden (cf. 2 K. 21:18, 26; Jn. 19:41), while in preexilic times the seclusion of such places permitted unhindered indulgence in pagan rites that were most likely connected with the depraved fertility cults of the Canaanites (Isa. 1:29; 65:3; 66:17).

From the time of the Exile the Persian term *pairi-daēza* (Heb. *pardēs*; Gk. *parádeisos*) appeared in Hebrew literature to denote more extensive parks or gardens. In Eccl. 2:5 and Cant. 4:13, the AV translates the word "orchards," while in Gen. 2:8 the LXX translates the phrase *gan ʿēḏen* ("garden of Eden") by *parádeisos*. The word *pardēs* was nowhere used in Hebrew in an eschatological sense, unlike its occurrence in the NT, though in the pre-Christian period it was employed to describe the bliss of primeval times (*see* EDEN). Figuratively, the RSV translates Heb. *karmel* ("vineyard") as "garden land" in Mic. 7:14 (AV "Carmel"; NEB "meadows"), depicting the Jews' return to prosperity after the Exile.

A fruitful garden was synonymous with prosperity (Job 8:16; Isa. 51:3; Jer. 29:5, 28). The life of God's redeemed was likened to a watered fertile garden (Isa. 58:11; Jer. 31:12). In contrast, the destruction of gardens indicated desolation (Am. 4:9).

See also KING'S GARDEN.

See *TDNT*, V, *s.v.* παράδεισος (J. Jeremias).

R. K. HARRISON

GARDEN HOUSE [Heb. *bêṯ haggān*–'house of the garden']. The AV for RSV and NEB BETH-HAGGAN in 2 K. 9:27.

GARDENER [Gk. *kḗpouros*] (Jn. 20:15). "Gardener" occurs once in the RSV as the translation of *kḗros*, "garden," and *oúros*, "warden" or "keeper." The man referred to was probably the watchman or keeper (Arab. *naṭûr*; Heb. *nôṣēr*), corresponding to those mentioned in 2 K. 17:9; 18:8; Job 27:18; etc., and not one who did the manual work. It was the common practice in biblical times to set a watchman over a garden during its productive season. *See* WATCHMAN.

GAREB gār'eb [Heb. *gārēḇ*–'scabby'].

1. An Ithrite who was one of David's "mighty men" (2 S. 23:38; cf. 1 Ch. 11:40).

2. The prophet envisioned that Jerusalem should extend to a hill of this name (Jer. 31:39). The site is unknown, but the context (vv. 38-40, suggesting a northwest to southeast progression) points to an area W of the Tyropoeon Valley, possibly to the southwestern hill or the "upper city" of postexilic times.

GARIZIM gar'i-zim. *See* GERIZIM, MOUNT.

GARLAND [Heb. *liwyâ*] (Prov. 1:9; 4:9); AV ORNAMENT; [*'iwweleṭ*–'folly'] (Prov. 14:24); AV "folly"; NEB CHIEF ORNAMENT; [*p'ēr*] (Isa. 61:3, 10); AV BEAUTY, ORNAMENTS; [Gk. *stémma*] (Acts 14:13). The RSV emends *'iwweleṭ* in Prov. 14:24 to read *liwyâ*.

A wreath to be worn on the head as an ornament for festive occasions; a chaplet. Its use in the OT is primarily figurative. In Proverbs the instruction of parents (1:9) and the work of wisdom (4:9) are to be worn on the head as a garland; they are to be worn as beautiful ornaments and not borne as a burden. The prophet in Isa. 61 uses "garland" (perhaps "turban"), an ornament worn at wedding festivities (v. 10), as a symbol of the joy and festivity that will characterize the salvation he announces.

In Acts 14:13, because the people believed Paul and Barnabas to be gods, a priest of Zeus brought garlands and oxen in preparation for a sacrifice with the people. These garlands were woolen fillets used to decorate animals to be offered in sacrifice. E. W. CONRAD

GARLIC [Heb. *šûm*; cf. Arab. *ṯûm*]. One of the Egyptian delicacies that the wandering Israelites longed for (Nu. 11:5). The common garlic, *Allium sativum* L., was cultivated in the ancient Near East for culinary purposes. It has stomachic, diuretic, antispasmodic, and anthelmintic (worming) properties. A bulb of garlic placed near a door was thought to be a powerful charm against evil influences.

GARMENTS. Ever since the fall humans have made and worn clothing (Gen. 3:7, 21) for modesty, protection, and status. Although this study of the biblical words for clothing covers a period of more than a thousand years, it is made easier because fashions in the ancient world did not change constantly, as in the modern world. This study can thus be organized according to the following outline.

I. Materials
II. Garments for Both Men and Women
  A. Undergarments
  B. Outer Garments
    1. General Terms for Clothing
    2. Specific Terms
III. Garments for Men
  A. Undergarments
  B. Outer Garments
IV. Garments for Women
V. Girdles, Belts, Sashes
VI. Headgear
VII. Footwear
VIII. Priests' Garments
  A. Undergarments
  G. Outer Garments
IX. Ornaments
X. Gestures and Figurative Uses

I. Materials.–The earliest common materials were animal skins: leather (Heb. *'ôr*, Gen. 3:21) and goatskins (*taḥaš*, Ex. 25:5; Nu. 4:6, 25); cf. Gk. *mēlōté*, "pelt," any rough woolly skin, "skins of sheep and goats" that the ancient suffering heroes wore (He. 11:37; cf. the metaphoric usage referring to false prophets in Mt. 7:15; *see also* LEATHER). Wool (Heb. *ṣemer*, e.g., Lev. 13:47; Gk. *érion*, e.g., Rev. 1:14) was later produced and made into clothing in Palestine, especially in Judea; it was spun from fleece (*gēz*, Job 31:20) and woven into cloth. Hair (*śē'ār*, Zec. 13:4, "hairy mantle"; NEB "robe of coarse hair") from goats or camels was woven into coarse cloth (cf. *trichôn kamēlou*, the CAMEL'S HAIR garment of John the Baptist, Mt. 3:4). Linen (*baḏ*, e.g., Lev. 16:4) was woven from the fibers of flax (*pištâ*, e.g., Ex. 9:31; later produced mainly in Galilee and the Jordan Valley). The Hebrews were forbidden to wear *ša'aṭnēz*, garments of mixed fibers of wool and flax (Lev. 19:19; Dt. 22:11). Sackcloth (*śaq*, lit. "sack"; e.g., Gen. 37:34) refers to very coarse material from which a basic garment was made and worn in mourning and repentance (2 S. 3:31; Jonah 3:5); the corresponding Gk. *sákkos* is a coarse cloth of hair, especially goat's hair (Mt. 11:21; Rev. 11:3), that could be dark in color (Rev. 6:12; cf. Isa. 50:3).

Hebrew *bûṣ* was fine white Egyptian linen (Est. 8:15), known from very ancient times; Gk. *býssos*, *býssinos*

Wooden statue (ca. 1400 B.C.) of a high-ranking Egyptian nobleman wearing a tight, pleated, wide-skirted linen garment (Trustees of the British Museum)

(Isa. 3:23, LXX; Rev. 18:12,16; 19:8,14) referred to fine linen. Heb. *šēš*, translated "silk" in the AV (Prov. 31:22), should doubtless be translated "fine white linen" (cf. RSV, NEB, "fine linen"; LXX *býssos*).

Cotton was apparently an important Egyptian product in Isaiah's time (*ḥôrāy*, Isa. 19:9) and was later used for curtains in the palace at Susa (*karpas*, Est. 1:6; the LXX uses *býssos* in both instances).

The meaning of Heb. *mešî* (Ezk. 16:10, 13) is uncertain, though translated "silk" in the AV and RSV, "lawn" in the NEB. The LXX *tríchapta* indicates a "fine veil of hair" (LSJ. *s.v.* τρίχαπτον, p. 1824). Gk. *sirikós* (or *sērikós*, Rev. 18:12) does mean silk or a silken garment.

Variegated material (Heb. *riqmâ*) was evidently highly prized; thus it was worn by a princess at the marriage ceremony (Ps. 45:14 [MT 15], "many-colored robes"; AV "raiment of needlework"; NEB "richly embroidered"), and by a prince (Ezk. 26:16, "embroidered" garments; NEB "brocaded" robes), and it was a valued trade item (Ezk. 27:16,24, "embroidered work"; NEB "brocade"). *See also* EMBROIDERY.

Various words for colors also mean cloth or clothing of those colors. Three common ones occur in Ex. 25:4 and 2 Ch. 2:7,14 (MT 6,13): purple (Heb. *'arg^{e}wān/'arg^{e}mān*, equivalent to Gk. *porphýra*), used for outer garments of kings and others of royal or priestly rank (cf. Ex. 26:1; Rev. 17:4; 18:12,16); scarlet (Heb. *šānî*; probably the same as *karmîl*, "crimson," both of which were included in Gk. *kókkinos*; cf. Rev. 17:4; 18:12,16); blue (Heb. *t^{e}kēlet*, Gk. *hyákinthos*; cf. Ex. 26:1; 28:31; Rev. 9:17 — of blue precious stones). The Beni-hasan tomb painting (from Egypt *ca.* 1900 B.C.) shows figured garments of red, blue, and white, on both men and women (*ANEP*, no. 3). *See also* COLOR; DYE; picture of faience tile depicting prisoner in HITTITE.

II. Garments for Both Men and Women.—*A. Undergarments.* Hebrew *k^{e}tōnet*, *kuttōnet*, "garment, coat" (Gen. 3:21, with *ôr*; 37:3,23,31-33; 2 S. 13:18f., with *passîm*) was a shirtlike or long tunicklike garment, with or without sleeves, usually of linen, worn next to the skin. It corresponded to the Gk. *chitōn*, "coat, tunic," which early was used only of a man's undergarment, a woman's being *péplos*, but later was used of both (LSJ, *s.v.* χιτών, p. 1993). It is used for a man's garment (e.g., 2 S. 15:32), for a woman's (Cant. 5:3), for a princess' (2 S. 13:18f.), for a priest's (Ex. 29:8), and for the high priest's (Lev. 16:4). Jesus' garment was seamless; thus the Roman soldiers cast lots for it rather than dividing it (Jn. 19:23f.). Joseph's coat (Gen. 37:3,23, 32) was evidently of great value or status, although it is uncertain whether it was "of many colors" (cf. the LXX and AV), or long with sleeves (cf. the RSV and NEB), or of many pieces (cf. KoB, p. 768), or ornamented (cf. E. Speiser, *Genesis* [*AB*, 1964], pp. 289f.). *See also* COAT.

B. Outer Garments. 1. General Terms. A number of words mean "clothes, clothing" in general. Heb. *beged* occurs 200 times and refers to items from bedclothes (1 K. 1:1) to the covering of the ark (Nu. 4:6-9) to kings' robes (1 K. 22:10). From the verb *lābaš*, "clothe," come the nouns *l^{e}bûš*, "raiment" (Ps. 102:26 [MT 27]; AV "vesture"; NEB "cloak"; LXX *peribólaion*); *malbûš*, "clothing" (1 K. 10:5; AV "apparel"; NEB "livery"; LXX *himatismós*); and *tilbōšet*, "garments" (Isa. 59:17; LXX *himátion*). From the verb *kāsâ*, "cover," come the nouns *k^{e}sût*, "cloak" (Dt. 22:12, of men; AV "vesture"), and *m^{e}kasseh*, "clothing" (Isa. 23:18, as a garment of a metaphorical harlot, a city; NEB "attire"). Heb. *šît* (from the verb *šît*, "put"), "garment" is something put on (Ps. 73:6, of men; NEB "robe"; in Prov. 7:10 the RSV and NEB translate it as a verb, "dressed," but the AV uses the noun "attire"; the reference is to a harlot's clothing). From the verb *'āṭâ*, "wrap," comes *ma'^{a}ṭeh*, "mantle" (Isa. 61:3; AV, NEB "garment"). Though Dt. 22:5 forbids one sex to wear garments pertaining to the other, many of the outer garments looked very similar; probably distinctive headgear or sashes, or other differences such as in embroidery, made the distinction obvious.

Smith-god Vulcan (Hephaistos) wearing the workman's *chitōn* (Trustees of the British Museum)

General Greek terms for clothing are *himatismós*, "apparel" (e.g., Acts 20:33; NEB "clothes"); *himátion*, "mantle" (Mt. 24:18; AV "clothes"; NEB "coat"), a length of cloth draped around the body, sometimes specifically worn over a *chitōn* (cf. Mt. 5:40, which implies that legally only the less expensive inner garment could be claimed, since the outer garment was the poor person's cover at night; in Lk. 6:29 the order is reversed in a case of robbery); *peribólaion*, "covering" (1 Cor. 11:15) or "mantle" (He. 1:12; AV "vesture"; NEB "cloak"), literally "something thrown around one"; *amphíasis*, "clothing" (Job 22:6, translating *beged*; 24:7, translating

k^{e}*sût*) or "garment" (Job 38:9, translating *l*^{e}*ḥûš*). The *stolḗ* was a large, flowing robe of rank, used by men (Mk. 12:38, scribes; Lk. 15:22, the prodigal son on his return); by angels (Mk. 16:5); by multitudes including both men and women (Rev. 6:11; 7:9,13f.; 22:14). Garments that were wrapped around the body rather than being made with sleeves were held by a clasp or buckle. *See also* ROBE.

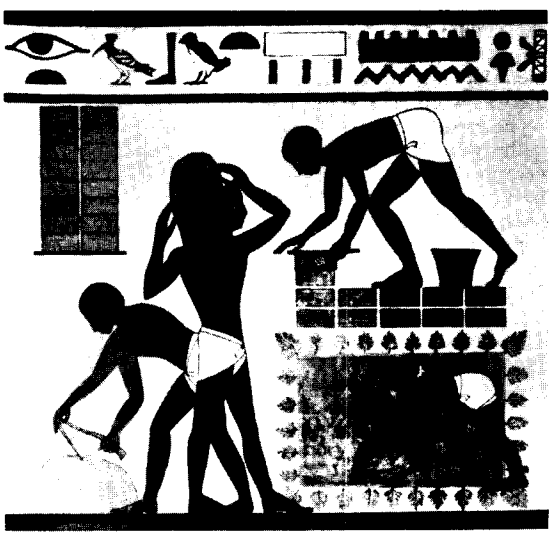
2. Specific Terms. Heb. *śimlâ* (sometimes *śalmâ* by metathesis) was a square cloth used by both men and women as a wrapper or mantle, and also as a cover for sleeping (Gen. 9:23, "garment"; NEB "cloak"; LXX *himátion*; *see also* GARB, HER CAPTIVE'S). A *śāḏîn* is a linen sheet or garment (Jgs. 14:12f.; Prov. 31:24; Isa. 3:23, a luxury item for women, but see IX below). The LXX uses *sindṓn* in these verses, except the last, which has *hyakínthinos*, elsewhere meaning "fine leather" (Ex. 25:5) or "blue color" (Ex. 26:4). *Sindṓn* occurs also in Mt. 27:59 of the "shroud" or winding-sheet used for Jesus' body (in nonbiblical Greek the word meant surgeons' or mummies' bandages, napkins, ships' sails, flags, and other things made of fine cloth, usually linen [LSJ, *s.v.* σινδών, p. 1600]). In Mk. 14:51f., it was the "linen cloth" on the unnamed young man, who fled without it.

The Hebrew word for an outer garment with the most status, used by both sexes, was *m*^{e}*ʿîl*, a (sleeveless) coat or mantle or robe of rank (Ezr. 9:3,5; Job 1:20). It was worn by a king or a prince (1 S. 18:4; 24:4 [MT 5]), a princess (2 S. 13:18), the high priest (Ex. 28:4,31), and a prophet (1 S. 15:27; 28:14).

The *šûl* or *kānāp* (lit. "wing") usually denotes the skirt of a garment. It was large enough to carry goods (Hag. 2:12), and in Isa. 6:1 God's "train" (*šûl*; NEB "skirt of his robe") is so long that it fills the temple. *Kānāp* by itself may mean "robe" (Zec. 8:23; AV "skirt") or "skirt" (Dt. 22:30 [MT 23:1]; 27:20; AV, RSV mg.). In the latter passages *kānāp* probably is a euphemism; to "cover with the skirt" was evidently a sign of (intention of) marriage (Ruth 3:9; Ezk. 16:8), and to "uncover the skirt" meant an invasion of sexual privacy (cf. the similar use of *šûl* in Jer. 13:22,26; Nah. 3:5).

Hebrew *ḥ*^{a}*ṭullâ* is the "swaddling band" in which babies were wrapped (Job 38:9, used figuratively; cf. the LXX, which uses a verb, *sparganóō*, "wrap in swaddling cloths"; the same word is used of the baby Jesus in Lk. 2:7,12).

Brickmakers wear short wrapped skirts in a reconstruction of Egyptian wall paintings (Royal Ontario Museum, Toronto)



III. Garments for Men.–A. Undergarments. Besides the tunic or shirt, the common primitive article of clothing, especially for slaves, was Heb. *ʾêzôr*, "girdle, waistcloth," which might be of skin (2 K. 1:8; NEB "leather apron") or of linen (Jer. 13:1; NEB "linen girdle"). It was the "waistcloth" worn by Assyrian warriors (Isa. 5:27) and the "belt" worn by Chaldeans (Ezk. 23:15); metaphorically it was the "girdle" of righteousness and faithfulness (Isa. 11:5). Rather than being a mere belt, when it was the sole garment it was a short wrapped skirt, as in Egyptian and Assyrian scenes (*ANEP*, nos. 1,2,8, etc.). Breeches apparently were reserved for the priests.

B. Outer Garments. Heb. *ʾaddereṯ* was a wide, sometimes magnificent cloak or robe, the garment of distinction worn by kings (Jonah 3:6; LXX *stolḗ*) and prophets (1 K. 19:13; 2 K. 2:8,13f.); it was also part of the booty taken by Achan (Josh. 7:21,24). It could be of fur or woven hair (Gen. 25:25; Zec. 13:4; goat's hair according to Dalman, V, 248). A related word is *ʾeḏer*, "robe" (Mic. 2:8; NEB "cloak"). Another rare word, *māḏû* (or *maḏweh*), names the long, probably stately "garments" worn by David's servants on a mission to the Ammonite capital, where for an insult the garments were "cut off . . . in the middle, at their hips" (2 S. 10:4 par. 1 Ch. 19:4). In Ezk. 27:24 "clothes" translates *g*^{e}*lôm*, apparently some kind of wrap or mantle (cf. postbiblical Heb. and Aram. *glm*, "to roll, wrap up"). *Sût*, "vesture" (Gen. 49:11; AV "clothes"; NEB "robes"; LXX *peribolḗ*), may be a mantle (cf. postbiblical Heb. *sût*, "dress, cloak," and F. Cross and D. Freedman, *Studies in Ancient Yahwistic Poetry* [1975], p. 84). *Taḵrîḵ* is a "mantle" of fine linen worn by Mordecai (Est. 8:15; AV "garment"; NEB "cloak"; cf. postbiblical Hebrew and Aramaic; but cf. the LXX *diádēma*, "fillet").

Hebrew words for warriors' armor are *mad(dîm)*, "armor" (NEB "tunic"; LXX *mandýa*, "woolen cloak") of Saul, put on David, and *širyôn*, "coat of mail" (1 S. 17:38). The outfit was completed by the *qôḇaʿ*, a metal helmet (see VI below). Other words are: *ḥ*^{a}*liṣâ*, "spoil" (NEB "belt"), stripped off defeated foes (Jgs. 14:19; 2 S. 2:21); *ḥ*^{a}*gôrâ*, "girdle, belt" (KoB, p. 276; cf. 2 S. 18:11; 1 K. 2:5; Isa. 3:24).

Greek words are *hópla*, used metaphorically of "armor" (Rom. 13:12) and "weapons" (2 Cor. 6:7). *Panoplía* is "armor" (Lk. 11:22) and "whole armor" (Eph. 6:11, metaphorically), which includes *thṓraka*, "breastplate," *thureós*, "shield," and *perikephalaía*, "helmet" (Eph. 6:11-17). *See also* WEAPONS OF WAR.

Greek terms for men's outer garments are: *chlamýs*, "robe" (Mt. 27:28,31; NEB "mantle"; the parallel passages, Mk. 15:17,20, and Jn. 19:2,5, use *himátion*, "robe"), in classical usage a short mantle worn by horsemen, generals, kings, and also civilians (cf. LSJ, *s.v.* χλαμύς, p. 1993).

Esthḗs is usually used of apparently elegant clothing (cf. the "gorgeous apparel" Herod put on Jesus, Lk. 23:11; the "dazzling apparel" of the angels after the Resurrection, Lk. 24:4; cf. Acts 1:10; the "royal robes" of Herod, 12:21; cf. 10:30), but Jas. 2:2f. makes it clear that *esthḗs*, "clothing," could be either "fine" or "shabby."

Éndyma (e.g., Mt. 3:4, used only in Matthew) and *ependýtes* (both < *endýō*; "clothe, put on") mean simply something worn. The former is used for clothes from John the Baptist's garment of camel's hair to the "wedding garment" (Mt. 22:11f.) and the "raiment" of an angel (Mt. 28:3); in the LXX it is used of the "vestments" of the priests of Baal (2 K. 10:22). The latter is used of Peter's

"clothes" (Jn. 21:7; AV "fisher's coat"; NEB "coat"; *see also* FISHER'S COAT), and in the LXX of Jonathan's "robe" (1 S. 18:4).

Podērēs is a "long robe" that goes down to the feet, as its etymology indicates (cf. LSJ, *s.v.* ποδηνεκής, p. 1426; Ex. 28:31; Rev. 1:13). The "soft raiment" (*tá malaká*, Mt. 11:8; Lk. 7:25) that Jesus said was on those in kings' houses rather than on John the Baptist could refer to fine clothing of women as well as of male courtiers or royal family members. *Diploîs*, "mantle" (lit. "double cloak"), occurs only in the LXX, e.g., Ps. 109:29 (LXX 108:29); in 1 S. 2:19 it is Samuel's "little robe," and in 1 S. 24:4, 11 (MT 5, 12) it is Saul's "robe." Paul's "cloak" (*phailónēs* rather than *phelónēs*, transposed from *phainólēs*; cf. Lat. *paenula*) left at Troas (2 Tim. 4:13), was a traveling coat. *See also* CLOAK; MANTLE; ROBE.

King Barrakib of Sam'al wears a pointed cap on his curled hair and a long, fringed garment; the beardless scribe has a plainer robe and a cap covering his hair. Relief from Zenjirli, ca. 730 B.C. (Staatliche Museen, Berlin)

Kore from Keratea, Attica, ca. 580-570 B.C. The woman wears a long pleated robe, fringed mantle, necklace, and bracelets and holds a pomegranate (Pergamon Museum, Berlin; picture Rosenthal Art Slides)

Only references to men's garments occur in Aramaic, and their meanings are uncertain. *Sarbāl*, "mantles" (Dnl. 3:21, 27; AV "coats"; NEB "trousers") is in the LXX *sarábara*, "loose trousers worn by Scythians" (LSJ, *s.v.* σαράβαρα, p. 1583; thus NEB). **Paṭṭîš*, "tunic" (v. 21, AV "hosen"; NEB "shirts"), is in the LXX *tiára*, "cap," the Persian headdress (LSJ, *s.v.* τιάρα, p. 1789; cf. KoB, pp. 1104, 1112; Dalman, V, 259; see VI below; *see also* BREECHES).

IV. Garments for Women.–Outer garments for women, aside from those listed for both sexes, include: Heb. *miṭpaḥaṭ*, "mantle" (Ruth 3:15; AV "vail"; NEB "cloak"; LXX *perízōma*), large enough to carry six measures of barley, or "cloak" (Isa. 3:22; AV "wimple"). Two words for "veil" are *ṣā'îp* (Gen. 24:65; 38:14, 19) and *r^eḏîḏ* (Isa. 3:23; "mantle" in Cant. 5:7). The LXX has *théristron*, "light summer garment" (LSJ, *s.v.* θέριστρον, p. 793), for both words. The *qiššurîm*, "sashes" (Isa. 3:20; AV "headbands"; NEB "necklaces") or "attire" (Jer. 2:32; NEB "ribbons"), seem to be something a maiden or a bride puts on.

V. Girdles, Belts, Sashes.–Adam and Eve sewed fig leaves together to make the first garment, a *ḥ^agôrâ* (Gen. 3:7); these "aprons" (NEB "loincloths") were in other cases a "girdle" (1 S. 18:4; 2 S. 18:11; NEB "belt"; LXX *zṓnē*, *parazṓnē*), usually a woven piece of wool or linen cloth, folded and wrapped several times around the waist, such that its folds could be used for pockets or a purse in which to carry objects (e.g., a sword, 2 S. 20:8) or money (e.g., Mt. 10:9, *zṓnē*; *see also* APRON; BAG). The similar *'ēzôr* (probably wider) could be of leather (e.g., the "girdle" of Elijah, 2 K. 1:8) or of cloth, e.g., linen (Jer. 13:1-11, "linen waistcloth"; AV "linen girdle"), and was worn next to the skin (Jer. 13:2, 4, 11).

The *mēzaḥ* (Ps. 109:19), of leather and also worn next to the skin (KoB, p. 509), and the *m^ezî(a)ḥ* (Job 12:21), were also belts. The *'aḇnēṭ*, "girdle" (NEB "sash") of the priests, was of fine linen, blue, purple, and scarlet (linen or embroidery; Ex. 28:4; 39:29); it was also worn by Shebna the steward (Isa. 22:21; NEB "sash"). The *ḥēšeḇ* was the "band" (AV "curious girdle"; NEB "waistband"; Ex. 28:8, 27f.) of the ephod (see VIII below).

The common LXX *zṓnē* is in the NT a girdle or belt; John the Baptist's was of leather (Mt. 3:4), and the risen Christ's was golden (Rev. 1:13). The loose *chitṓn* needed to be held around the waist by a belt, and its hem or folds could be tucked up into it so the person was "girded up" for work or rapid movement (cf. 1 K. 18:46). The loose outer garments, except stately, gorgeous robes left flowing, were also held in by a second belt or sash (Acts 21:11; Rev. 1:13; 15:6).

VI. Headgear.–Heb. *p^e'ēr*, "turban," was a headdress

for men (Ezk. 24:17), and possibly also for women (Ezk. 24:23; Isa. 3:20; cf. "garland" in Isa. 61:3); evidently it was of some distinction, since it was worn by priests (Ex. 39:28; Ezk. 44:18) and by a bridegroom ("garland," Isa. 61:10). According to Dalman (V, 331) the *pᵉʾēr* and the *ṣᵉnîpâ*, "turban" (possibly for women, Isa. 3:23; for men, Job 29:14; Zec. 3:5; "diadem" in Isa. 62:3 *Q*) were wound around the head (the root *ṣnp* means to "wrap"). Other words for a woman's veil (*rᵉḏîḏ* and *ṣāʿîp*, see IV above) mean cloth simply thrown over the head to hang down before the face, sometimes almost reaching the feet. The queen's headdress or "royal crown" (Est. 1:11; 2:17) was *keṯer malkût* — also used for a horse's head ornament or "royal crown" (Est. 6:8).

Statue of Princess Washfari (or Sapphira), daughter of the ruler of Hatra, wearing an ornate headdress, long robe, and several necklaces or collars (1st-2nd cents. A.D.) (State Antiquities Organization, Republic of Iraq)

Moses' veil, used to hide the divine splendor reflected in his face, was called *masweh* (Ex. 34:33-35; LXX *kálymma*, which is used also in 2 Cor. 3:13-16 to refer first to Moses' veil and then metaphorically to the "veil over their minds"). The *kôḇaʿ* (1 S. 17:5; Isa. 59:17; etc.) or *qôḇaʿ* (1 S. 17:38; Ezk. 23:24) was a helmet (Goliath's was bronze); it is used metaphorically in Isa. 59:17 (cf. Eph. 6:17). It is apparently a foreign word, related to Hittite *kupaḫi* (KoB, p. 425). The LXX regularly has *perikephalaía*, literally something "around the head" (cf. Eph. 6:17). Aram. *karbᵉlâ* (Dnl. 3:21) was probably a cap or hat, related to Late Bab. *karballatu*, a word for the high pointed caps of the Kimmerians and Persians (KoB, p. 1087).

Greek *soudárion*, "handkerchief," may have been a headband (Acts 19:12; cf. Lat. *sudor*, "perspiration," and *sudarium*; *see also* HANDKERCHIEF). For the priests' headgear, see VIII below. *See also* CROWN; HAT.

VII. Footwear.–The general Hebrew word for shoe or sandal is *naʿal* (e.g., Ex. 3:5; LXX *hypódēma*), and its lace or thong is *śᵉrôḵ-naʿal* (Gen. 14:23; Isa. 5:27; LXX *sphairōtḗr* and *himás*, respectively). *Minʿāl*, AV "shoes," is better translated "bars" (RSV) or "bolts" (NEB) in Dt. 33:25 (but note LXX *hypódēma*). Shoes generally had soles of hard leather, and if they had uppers, these were of finer, softer leather (Ezk. 16:10, *taḥaš*). In the Beni-hasan tomb painting the men (except the two Egyptians, the barefoot leader, and the next man leading the gazelle) wear sandals; the women and the boy have higher shoes covering the ankles (*ANEP*, no. 3). For reverence (Ex. 3:5) or sorrow (Ezk. 24:17, 23) one went barefoot, and therefore the priests did so in the tabernacle and temple (cf. the Muslim custom today in the mosques). Removal of the shoes apparently also symbolized the renunciation of levirate responsibility (Dt. 25:9; Ruth 4:7f.).

Greek words are *hypódēma*, "sandals" (Mt. 3:11) or "shoes" (Lk. 15:22) and *sandálion*, "sandals" (Mk. 6:9; Acts 12:8). *Himás* is a sandal-thong (Mk. 1:7).

See also BOOT; SANDAL; SHOE.

VIII. Priests' Garments.–*A. Undergarments.* The *miḵnāsayim*, "breeches" (NEB "drawers"; LXX *periskelía*) were worn only by the priests. They were made of linen, as all the priests' garments were, except the outer mantle, which might have been of wool (Ex. 28:42f.; 39:28; Lev. 6:10 [MT 3]; 16:4; Ezk. 44:18). According to Josephus, "this garment is cut short above the waist and terminates at the thighs, around which it is drawn tight" (*Ant.* iii.7.1 [152]). The high priest also wore a "coat of checker work" (*kᵉṯōneṯ tašbēṣ*, Ex. 28:4; AV "broidered coat"; NEB "chequered tunic"; LXX *chitṓn kosymbōtós*, a fringed or tasseled *chitṓn* [LSJ, p. 985]), a "tunic descending to the ankles, enveloping the body and with long sleeves tightly laced round the arms" (Josephus *Ant.* iii.7.2 [153]). It was held by a "girdle," *ʾaḇnēṭ* (NEB "sash"), which was "embroidered with needlework" (Ex. 28:39, LXX *érgon poikiltoú*; cf. Josephus *Ant.* iii.7.2 [154]).

B. Outer Garments. A special garment for the high priest was the ephod, *ʾēpôḏ* (cf. Akk. *epattu*, Ugar. *ʾpd*; W. F. Albright, *BASOR*, 83 [Oct. 1941], 40 n.10), with its "breastpiece," *ḥōšen* (Ex. 28:4). The ephod was a sleeveless linen waistcoat (but cf. Josephus *Ant.* iii.7.5 [162]), with its front and back panels held together by shoulder pieces on which were set in gold two onyx stones engraved with the names, six on each, of the sons of Israel. It was worn over the robe (Lev. 8:7). Other priests wore plain linen ephods (e.g., 1 S. 2:18), but the high priest's was "of gold, of blue and purple and scarlet stuff, and of fine twined linen, skilfully worked" (Ex. 28:6). Its woven bottom "band," *ḥēšeḇ*, formed a belt, tying the garment once around the waist (Ex. 28:8, 27f.). The breastpiece

was held in place by golden rings and chains (Ex. 28:15-30).

The *me'îl*, "robe" (NEB "mantle"), was long, apparently reaching to the feet (cf. LXX *hypodýtēn podērē*, Ex. 28:31), with "skirts" (*śûl*, Ex. 28:33f.) made of blue material; "fine linen" is not mentioned in connection with the robe, so it alone may have been of wool, especially for winter wear. It was woven in one piece, hem to hem, with a bound opening in the middle for the head, and the hem was decorated with alternate gold bells and pomegranates of the three colors (cf. Josephus *Ant.* iii.7.4 [160]).

Presumably all the priests were barefoot while serving. The common priests wore "caps," *migbā'ôṯ* (AV "bonnets"; NEB "tall head-dresses"; LXX *kídaris*, pl. *kidáreis*; Ex. 28:40; 29:9; 39:28; Lev. 8:13), but the high priest wore a "turban," *miṣnepeṯ* (AV "mitre") of fine linen, with a gold plate laced to its front engraved "Holy to the Lord" (Ex. 28:36, 39). The purpose of these special priestly garments is expressed in Ex. 28:40: "for glory and beauty" (NEB "to give them [the priests] dignity and grandeur").

IX. Ornaments.–Both men and women in the ancient world used gold, silver, and various semiprecious stones as ornamentation. Heb. *nezem* means a man's earring (Jgs. 8:24), a woman's earring (Ex. 32:2f.) or nose ring (Gen. 24:47; the LXX uses *enôtion* in all three texts). Another word for earring is *n'ṭîpâ*, "pendant," worn by Midianite kings (Jgs. 8:26; AV "collars") and perhaps by women (Isa. 3:19; AV "chains").

Abraham's steward gave Rebekah a "gold ring," *nezem zāhāḇ*, and two "bracelets," *ṣāmîḏ*; these are commonly found in Palestinian tombs, along with the "armlet," *'eṣ'āḏâ* (2 S. 1:10). "Crescents," *śahᵃrōnîm*, were worn by kings and their camels (Jgs. 8:21, 26), and perhaps also by women (Isa. 3:18).

The "signet" or "signet ring," *ḥôṯām*, was worn on a cord around the neck (Gen. 38:18; LXX *daktýlios*, "finger ring"), or on the hand (Jer. 22:24; LXX *aposphrágisma*, "seal"). A "signet ring," *ṭabba'aṯ*, signified rank (e.g., Gen. 41:42; Est. 3:10) or was simply an ornament (Ex. 35:22; LXX *daktýlios*; cf. Lk. 15:22); the same word was used for the rings for the carrying poles of the ark (e.g., Ex. 25:12). A "magic band," *keseṯ*, was worn on the wrist (Ezk. 13:18, 20; AV "pillows" see comms.; *see also* BAND).

Pᵉnînîm were "jewels" (Prov. 8:11) or "corals" (Lam. 4:7; AV "rubies"; NEB "coral" in both texts), evidently of great value. *Ḥᵃlî* was some kind of golden "ornament" (Prov. 25:12; NEB "necklace") or "jewel" (Cant. 7:1 [MT 2]); a related form *ḥelyâ*, "jewelry" (NEB "necklaces") appears in Hos. 2:13 (MT 15). A "brooch," *ḥāḥ*, similar to a safety pin but often ornamented, was used to hold together, e.g., the neck opening of a garment, and is a common archeological find (Ex. 35:22; AV "bracelets"; NEB "clasps"; it usually means the "hook" used to lead animals or captives on a rope, e.g., 2 K. 19:28; cf. KoB, p. 288).

Only some of the jewels in such lists as the stones in the high priest's breastpiece, Ex. 28:17-21; 39:10-14; Job 28:12-19; Isa. 54:11f.; and Ezk. 28:12-19 are well known. *See also* ORNAMENT; STONES, PRECIOUS.

Two terms for ornaments in general are *kᵉlî* and *'ᵃḏî*. *Kᵉlî* is a common term for various objects, including vessels and equipment. It is used of gold and silver "jewelry" (Gen. 24:53; NEB "ornaments"; Ex. 3:22); such "jewels" were also part of the bride's attire (Isa. 61:10; Ezk. 16:17; in this last text NEB "ornaments" is preferable, since they are of gold and silver). *'ᵃḏî* is also used of a bride's "ornament" (Jer. 2:32), something bound on (Isa. 49:18). Such "ornaments" of gold are also worn by courtesans (Jer. 4:30; cf. Ezk. 23:40: NEB "finery"), and have been otherwise misused by Israel (Ezk. 7:20; NEB "jewels").

The description in Isa. 3:18-23 has often been used as a basis for sermons against women's supposed vanity, although in ancient times wealthy, proud men wore as much ostentatious adornment. Some of the terms are quite unknown; for others, archeology has brought understanding. It is now being recognized that many of the terms in the Isaiah list pertain to men rather than, or as well as, to women, both as ornaments and especially as insignia of official position. E. E. Platt threw light on the meanings of the twenty-one words in the list, and summarized them conveniently, as in the table below. Though

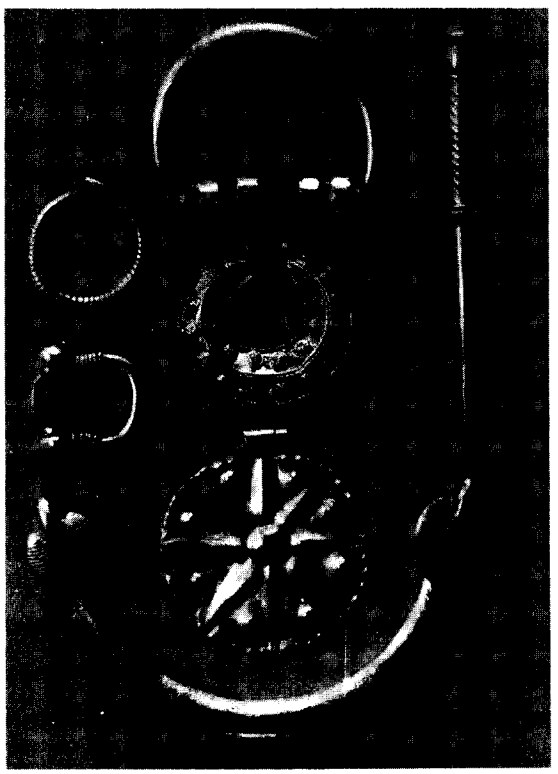
THE JEWELRY CATALOG OF ISA. 3:18-23

	RSV	HEBREW	SUGGESTIONS
v. 18	In that day the Lord		
	will take away the finery of	*tip'eret*	the insignia of office:
	(1) the anklets,	*hā'ᵃḵāsîm*	the ankle bangles,
	(2) the headbands,	*wᵉhaśśᵉḇîsîm*	and the sun- or star-disks,
	(3) and the crescents;	*wᵉhaśśahᵃrōnîm*	and the crescents;
v. 19	(4) the pendants,	*hannᵉṭîpôṯ*	the drop pendants,
	(5) the bracelets,	*wᵉhaššᵉrôṯ*	and the necklace cords,
	(6) and the scarfs;	*wᵉhārᵉ'ālôṯ*	and the beads;
v. 20	(7) the headdresses,	*happᵉ'ērîm*	the garland crowns,
	(8) the armlets,	*wᵉhaṣṣᵉ'āḏôṯ*	and the armlets (or foot jewelry),
	(9) the sashes,	*wᵉhaqqiššurîm*	and the sashes (or girdles),
	(10) the perfume boxes,	*ûḇāṯê hannepeš*	and the tubular "soul" cases,
	(11) and the amulets;	*wᵉhallᵉḥāšîm*	and the snake charms;
v. 21	(12) the signet rings,	*haṭṭabbā'ôṯ*	the signet rings;
	(13) and the nose rings;	*wᵉnizmê hā'āp*	and the nose rings;
v. 22	(14) the festal robes,	*hammaḥᵃlāṣôṯ*	the loin cloths,
	(15) the mantles,	*wᵉhamma'ᵃṭāpôṯ*	and the enveloping capes,
	(16) the cloaks,	*wᵉhammiṭpāḥôṯ*	and the mantles,
	(17) and the handbags;	*wᵉhāḥᵃrîṭîm*	and the wallets;
v. 23	(18) the garments of gauze,	*wᵉhaggilyōnîm*	and the thin garments,
	(19) the linen garments,	*wᵉhassᵉḏînîm*	and the warriors' belts,
	(20) the turbans,	*wᵉhaṣṣᵉnîpôṯ*	and the turbans,
	(21) and the veils.	*wᵉhārᵉḏîḏîm*	and the outer cloaks.

the helpful explanations and supporting archeological and linguistic evidence are impossible to summarize in the space available, only items 1, 9, 16, and 21 are shown to be exclusively women's articles; several were used by both sexes and the rest apparently only by men. Platt concludes (p. 83):

> Isa. 3 gives a collection of oracles that denounce *both* the men and women *aristocrats*. The choice of the symbols of office in jewelry, garments and cosmetics reflects the societal positions of both men and women. More items belonging to men are mentioned because Jerusalem was a predominantly "patriarchal" society in political structure. The injustices of the society are being condemned by denouncing the symbols of those officers who have transgressed their authority and taken advantage of the poor by virtue of power positions. The catalog in vss. 18-23 especially reflects this with its predominance of identifiable articles from other biblical contexts.

For garment decorations, *see* EMBROIDERY; FRINGES; TASSEL.



Gold and electrum jewelry of the Late Bronze Age from Tell el-'Ajjûl (Israel Department of Antiquities and Museums)

X. Gestures and Figurative Uses.–Several gestures are associated with garments. In 2 K. 9:13 (cf. Josephus *Ant.* ix.6.2 [111]) men placed their garments (Heb. *beged*) on the steps of a house so that Jehu might walk on them; cf. the similar action of the people who spread their garments (Gk. *himátion*) before Jesus when He entered Jerusalem on a donkey (Mt. 21:8). In contrast to this gesture of respect are two other gestures. (1) Shaking out one's garments, as Paul did in Acts 18:6, was a Jewish practice that "signified the breaking off of all intercourse, and among Jews was tantamount to calling a man a heathen" (F. F. Bruce, comm. on Acts [*NICNT*, 1954], p. 284 n. 74). (2) Tearing or throwing a garment was an expression of horror caused by apparent blasphemy (Mk. 14:63; Acts 22:23). This act was also part of the mourning ritual, preparatory to putting on sackcloth (note Joel 2:12f., which emphasizes the importance of inner change accompanying the outward demonstration). To cover one's garment with violence (Mal. 2:16), moreover, may refer to the gesture of the bethrothal rite (see II.B.2 above), or figuratively to general acts of "injustice which, like the blood of a murdered victim, leave their mark" (J. Baldwin, *Haggai, Zechariah, Malachi* [*Tyndale OT Comms.*, 1972], p. 241). *See also* GESTURE VII.

A figurative use involving nature is Job 38:9, where God made clouds the garment (*l^e^ḥûš*) of the sea (cf. Ps. 104:4; Prov. 30:4). Ps. 104:2 describes God as covered with light "as with a garment [*śalmâ*]" (cf. Mt. 17:2 par.). In Isa. 59:17 God puts on "garments [*beged*] of vengeance" to judge the earth. Violence (Ps. 73:6) and curses (Ps. 109:19) cover the wicked like garments (*śît* and *beged* respectively). Leviathan's thick skin is likened to a garment (*l^e^ḥûš*, Job 41:13 [MT 5]). The impermanent nature of garments is the image in Ps. 102:26 (MT 27), where enemies will wear out like a garment (*beged*). Several texts mention white, festive garments (Eccl. 9:8; R. Gordis, *Koheleth — The Man and His World* [3rd ed. 1968], p. 306, noted parallels in Rev. 3:4f.; 7:9; T.B. *Shabbat* 114a; cf. also Isa. 52:1; 61:10; Zec. 3:3f.; Rev. 3:18; 4:4).

Jesus used garment imagery to explain why His disciples were not fasting (Mt. 9:16 par.). His own garment was the medium of healing to the hemorrhaging woman (Mt. 9:20), perhaps due to the common idea that clothing retained the power of its wearer (cf. Acts 19:12; cf. W. L. Lane, *Mark* [*NICNT*, 1974], p. 192, n. 47, who points out that Lev. 15:27; 17:15; Mish. *Hagigah* ii.7 discuss the negative effects of sin on garments; cf. also Jude 23).

L. G. RUNNING

GARMITE gär'mīt [Heb. *garmî*]. A gentilic name applied to Keilah in 1 Ch. 4:19, perhaps alluding to his physique (cf. *gerem*, "bone").

GARNER. The verb "garner" occurs once in the RSV, for Heb. *'āsap*, "gather" (Isa. 62:9; AV "gather"; NEB "bring in"). "Garner" as a noun is found in Ps. 144:13 and renders the hapax legomenon *māzû* (NEB "barns"; cf. KoB, p. 509).

GARNISH. The word is not used by the RSV, but it occurs in the AV twice in the OT and four times in the NT. In 2 Ch. 3:6, the piel of Heb. *ṣāpâ* means to "overlay, plate." Solomon overlaid or studded God's house with precious stones, and so adorned and beautified it. In Job 26:13, *šiprâ* is a feminine noun meaning "fairness, beauty, brilliancy." In the NT the Gk. *kosméō* means "set in order, make ready, adorn" (RSV "put in order," Mt. 12:44 and Lk. 11:25; "adorn," Mt. 23:29 and Rev. 21:19).

GARRISON. *See* WAR.

GAS [Gk *Gas*]; AV GAR. Named among the "sons of Solomon's servants" (1 Esd. 5:34); not mentioned in the lists of Ezra and Nehemiah.

GASH [Heb. *gāḏaḏ*] (Jer. 41:5; 47:5; 48:37); AV CUT, CUTTINGS; [*gûr*] (Hos. 7:14); AV ASSEMBLE. Cutting oneself was practiced as a sign of grief and mourning or as a part of the ecstatic worship of pagan gods. The RSV and NEB follow the LXX (Gk. *katatémnō*) in Hos. 7:14, reading *yiṯgôḏāḏû* (hithpoel of *gāḏaḏ*, "show oneself sharp") for MT *yiṯgôrārû* (hithpolel of *gûr*, "loaf about").

See also CUTTINGS IN THE FLESH; GESTURE III.

GASHMU gash'mo͞o (Neh. 6:6, AV, NEB, RSV mg.). The name GESHEM (RSV) occurs in Neh. 6:6 for Heb. *gašmû*.

GASPAR gas'pər. One of the three Magi of late Western tradition, supposedly a king of India. The other two kings were BALTHASAR and MELCHIOR. The relics of these three that are possessed by the cathedral of Cologne can be traced to twelfth-century A.D. Milan. The names are from the 8th century. Neither the names, the number, nor the specific point of origin of the WISE MEN is mentioned in the NT.

GATAM gā'təm [Heb. *ga'tām*]. An Edomite chief, grandson of Esau (Gen. 36:11, 16; 1 Ch. 1:36).

GATE [Heb. *ša'ar, deleṯ*–'door,' *peṯaḥ*–'doorway'; Aram. *ṭ^era'*; Gk. *pylōn*–'gateway,' *pýlē, thýra*–'door' (Mt. 24:33 par.; Acts 3:2; 21:30]. Frequently an entrance to a city, but also to Israel's camp in the wilderness (Ex. 32:26), the tabernacle (Ex. 27:14-16), and the temple (Ezk. 40–48).

The gate of a house was separated from the house or complex of houses by a court (Lk. 16:20; Acts 10:17; 12:14; cf. *TDNT*, VI, 921), as was the "king's gate" (Heb. *ša'ar hammeleḵ*, Est. 2:19, 21, etc.; KoB, p. 1138; cf. Aram. *ṭ^era' malkā'*, "court," Dnl. 2:49). The "gate of the guards" (*šaʿar hārāṣîm*, 2 K. 11:19) seems to have been one of the palace gates; the "Gate of the Guard" (*ša'ar hammaṭṭārâ*, Neh. 12:39; AV "prison gate"; NEB "Gate of the Guardhouse") was apparently near the temple, though its location is disputed (cf. KD *in loc.*). In Jgs. 5:8 the NEB reads *lāḥēm śe'îrîm*, "they consorted with demons," for MT *lāḥem śe'ārîm* (lit. "bread of the gates"; cf. LXX A), which the RSV and AV translate as "war [< *lḥm*, "to fight"] was in the gates" (cf. LXX B). Various other interpretations and emendations have been proposed (cf. *BH*), but none is satisfactory (see the comms.).

I. Means of Defense.–The usual gateway was provided with double doors, swung on projections that fitted into sockets in the sill and lintel. Ordinarily the material was wood (Neh. 2:3, 17), but greater strength and protection against fire was given by plating with metal ("doors of bronze"; AV "gates of brass," Ps. 107:16; Isa. 45:2). Josephus (*B.J* v.5.3 [201]) spoke of the *solid* metal doors of the Beautiful Gate (Acts 3:2) as a very exceptional thing. Some doors were solid slabs of stone, from which the imagery of single jewels (Isa. 54:12; Rev. 21:21) was derived. When closed, the doors were secured with a bar (usually of wood, Nah. 3:13, but sometimes of metal, 1 K. 4:13, "bronze bars"; Ps. 107:16; Isa. 45:2), which fitted into clamps on the doors and sockets in the post, uniting the whole firmly (Jgs. 16:3). Sometimes, perhaps, a portcullis was used, but Ps. 24:7 refers to the enlargement or enrichment of the gates. As the gate was especially subject to attack (Ezk. 21:15, 22), and as to "possess the gate" was to possess the city (Gen. 22:17; 24:60), it was protected by a tower (2 S. 18:24, 33; 2 Ch. 14:7; 26:9), often, doubtless, overhanging and with flanking projections. Sometimes an inner gate was added (2 S. 18:24).

For the specific towers of Jerusalem *see* JERUSALEM. *See also* FORTIFICATION.

II. Other Uses.–As even farm laborers slept in the cities, most of the men passed through the gate every day, and the gate was the place for meeting others (Gen. 19:1; Ruth 4:1; 2 S. 15:2) and for assemblages. For the latter purpose "broad" or open places (distinguished from the "streets" in Prov. 7:12) were provided (1 K. 22:10; Neh. 8:1), and these were the centers of the public life. Here the markets were held (2 K. 7:1), and other business was transacted (Gen. 23:10, 18; Ruth 4:1); the special commodities sold there gave names to the gates (Neh. 3:1, 3, 28). In particular, the "gate" was the place of the legal tribunals (Dt. 21:19; 22:15; 25:7; etc.), so that a seat "among the elders" "in the gates" (Prov. 31:23) was a high honor, while "oppression in the gates" was a synonym for judicial corruption (Prov. 22:22; Isa. 29:21; Am. 5:10; cf. 2 S. 3:27 for Joab's atrocious crime). The king held public audiences in the gate (2 S. 19:8; 1 K. 22:10; Jer. 38:7; cf. Jer. 39:3). To the gates, as the place of throngs, prophets and teachers went with their message (1 K. 22:10; Jer. 17:19; Prov. 1:21; 8:3; 31:31), while on the other hand the gates were the resort of the town good-for-nothings (Ps. 69:12 [MT 13]; cf. 1 S. 21:13).

The NT mentions gates only in passing. In Jn. 5:2-9 Jesus healed the paralytic near the Sheep Gate. Prayer was held outside the gate in Acts 16:13, and in 14:13 sacrifices were about to be given near the gates of the city of Lystra. In accordance with the OT and with Roman law crucifixions were held outside the city gate (Jn. 19:20; He. 13:12; cf. Mk. 15:20 par.; *TDNT*, VI, 921f.).

III. Symbolism.–The gate of a city was a symbol of defense and safety (Ps. 127:5; Isa. 28:6; cf. Jer. 49:31; Ezk. 38:11). The "gates of righteousness" (Ps. 118:19f.) perhaps referred to the temple gates (see the comms.). The loss of city gates denoted utter destruction (Neh. 1:3; 2:3; Lam. 1:4), which was sometimes dramatized by personifying the gates as wailing (Isa. 14:31), lamenting and mourning (Isa. 3:26), and languishing (Jer. 14:2). Nehemiah allowed the city gates to be open only during the middle of the day (7:3), but the prophets predicted a period in which the gates would remain open forever (Isa. 60:11; cf. Rev. 21:25, where the gates of the new Jerusalem will never be shut).

Our Lord used gate imagery to illustrate the difficulty of entering the kingdom (Mt. 7:13f.; in Lk. 13:24 the image is that of a door, Gk. *thýra*; cf. *TDNT*, VI, 922f.). In Mt. 16:18f., the AV more literally translates Gk. *pýlai hádou* as "gates of hell [Hades]"; the RSV and NEB translate as "powers of death," and thus indicate the (nonliteral) meaning of the expression more clearly. The background for this expression may be found in the OT (e.g., Isa. 38:10) and in intertestamental literature (e.g., Wisd. 16:13; cf. *TDNT*, VI, 924f. for further discussion of these parallels). Throughout the ancient Near East the underworld was portrayed as a kingdom (see Tromp), and in the OT that kingdom was a rival to God's kingdom (e.g., Ps. 107:18f.; Isa. 38:10f.).

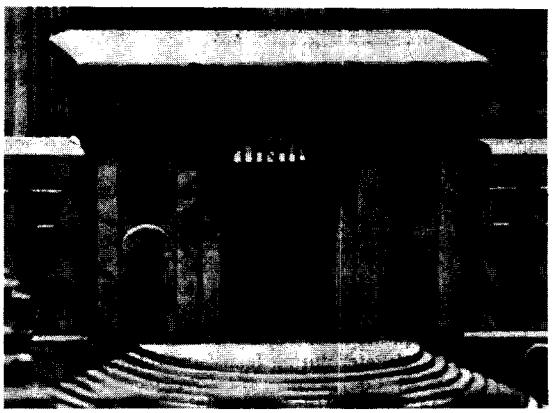
B. S. EASTON R. W. V.

GATE, BEAUTIFUL [Gk. *hē hōraía pýlē*]. A gate of Herod's temple mentioned in the narrative of the healing of the lame man by Peter and John (Acts 3:2, 10). The



Jerusalem Temple Model showing the Nicanor Gate, which some consider the Beautiful Gate (W. S. LaSor)

traditional view places this gate at the east side of the whole temple area, equating it with the Susa (or Shushan) Gate. Majority opinion, however, now locates this gate at the east side of the Court of the Women (i.e., leading from the Court of the Gentiles). This location is consistent with the NT usage of Gk. *tó hierón*, "the temple," and would probably have been an ideal position for a beggar.

Neither Josephus nor the Mishnah mentioned the Beautiful Gate, but Josephus (*BJ* v.5.3 [201]) spoke of a gate "of Corinthian bronze" outside the sanctuary; this may be equated with the Beautiful Gate with reasonable certainty. A problem arises, however, from the Mishnah (*Middoth* ii.3), which spoke of "Nicanor's Gate" as the only gate not of gold, and seemed to locate it at the west side of the Court of the Women, i.e., leading to the Court of Israel. It is probable that either the Mishnah is in error about the location or else Nicanor's Gate must be distinguished from the Beautiful Gate. It is less likely that the Corinthian Gate is to be placed at the west side of the Court of the Women and in this way equated with Nicanor's Gate.

Both the Corinthian Gate and Nicanor's Gate were especially magnificent. That the Beautiful Gate was probably neither of gold nor of silver may bear on Peter's remark in Acts 3:6. *See* TEMPLE.

GATE BETWEEN THE TWO WALLS [Heb. *ša'ar bên haḥômōṯāyim*] (Jer. 39:4). *See* JERUSALEM.

GATE, CORNER, FOUNTAIN, HORSE, VALLEY, etc. *See* JERUSALEM.

GATE, EAST. The eastern gate of Ezekiel's ideal temple (Ezk. 43:1, 4). This gate was patterned after the gate of the tabernacle, which also was entered from the east (Ex. 27:13). Although the orientation of Solomon's temple is not specified, it was probably the same. The main gate of the second temple, known as the "Beautiful Gate" and described in detail by Josephus (*BJ* v.5.3 [201]), also faced the east (*see* GATE, BEAUTIFUL).

In Ezekiel's vision of the ideal temple the glory of God came from the east, passed through this eastern gate, and filled the temple (Ezk. 43:1-4). This gate was 13 cubits (about 6 m., 20 ft.) wide (40:11). Inside the gate on either side were three rooms. In several areas of the Middle East archeologists recently uncovered ruins of ancient temples that show this same tripartite construction of main gates. Ezekiel described gates of similar size and construction reserved for the use of priests on the north and south of the court. The eastern gate was the most important; it was reserved for "the prince," for royalty, for the Lord (44:1-3). This gate was to be closed to preserve its unique sanctity, since the Lord had used it for entry and exit. The inner portion of the east gate, however, was to be opened each sabbath and on each new moon (46:1).

Ezekiel earlier had reported seeing in a vision the temple of Solomon in Jerusalem, with similar structures. The north gate was being used as a seat of idolatrous worship, but toward the "door of the east gate" he saw the glory of God (10:19). From the east gate the glory of the Lord moved out to the Mt. of Olives on the east side of the city and disappeared (11:1, 23). But Ezekiel witnessed the Lord's return in his vision of the new temple (43:1-5). Also, from the south side of the "outer gate that faces toward the east" the prophet saw fresh water emerge. The water increased in volume until the Dead Sea area became teeming with new life: fish in the water and vegetation along the banks (Ezk. 47:1-12; cf. Rev. 22:1f.).

Today the most elaborate among the eight gates in the walls of the Old City of Jerusalem is the "Golden Gate" facing east from the temple area. It is of sixth-century Byzantine construction (Justinian), the only one designed more for ornament than for defense; it has been closed for centuries. Some think its closure is a fulfillment of the prophecy that the eastern gate will be closed until the return of the "prince" (at the Second Coming) as glimpsed in Ezk. 44:2.

On the East Gate of Jer. 19:2 (AV), *see* POTSHERD GATE; on Neh. 3:29, *see* JERUSALEM III.F.2.m. G. A. TURNER

GATEKEEPER [Heb. *šô'ēr*] (2 K. 7:10f.; 1 Ch. 9:17-26; 15:18; etc.); AV PORTER, DOORKEEPER (1 Ch. 15:23f.); NEB also DOOR-KEEPER, "watch (at the city gate)"; [Gk. *thyrōrós*] (Jn. 10:3); AV PORTER; NEB DOOR-KEEPER; **DOORKEEPER** [Heb. *sāpap*] (Ps. 84:10 [MT 11]); NEB "linger by the threshold"; [Aram. *tārā'*] (Ezr. 7:24); AV PORTER; [Gk. *thyrōrós*] (Mk. 13:34); AV PORTER; **GUARD THE THRESHOLD** [Heb. *šōmēr hassap*] (2 K. 12:9 [MT 10]; Est. 2:21; 6:2); AV also KEPT THE DOOR; NEB "on duty at the entrance" (2 K. 12:9); **KEEPER(S) OF THE THRESHOLD** [*šōmēr hassap*] (e.g., 2 K. 22:4; Jer. 35:4); AV also KEEPER OF THE DOOR; NEB also "on duty at the entrance" (2 K. 22:4; Jer. 52:24), "on guard at the threshold gates" (2 Ch. 23:4), "on duty at the threshold" (2 Ch. 34:9).

In the ancient Near East the entrances to both city and temple resembled the doorways of houses, the gates themselves being like doors; thus, one who guarded the entrance could be called either "doorkeeper" or "gatekeeper."

I. City Gatekeepers.–Their position was of some importance, requiring loyal and trustworthy men to ensure the safety of the entire city. Obviously their main responsibility was to admit or to refuse entrance (2 K. 7:10f.). On one occasion they had the additional duty of guarding the king's palace, but apparently this protective measure was due to special circumstances and was not part of their normal functions (2 K. 11:4-9).

II. Temple Gatekeepers.–Much more information is given about the temple gatekeepers, who had more duties than just guarding the temple entrances. In preexilic works it is mentioned (briefly and infrequently) that the "priests who guarded the threshold" gathered the worshipers' monetary offerings (2 K. 12:9; 22:4), and that a "keeper of the threshold" had a room in the temple complex (Jer. 35:4). During Josiah's reform the "keepers of the threshold" along with the high priest and the priests of the second order were commanded to rid the temple of the idols and pagan objects that had been desecrating it (2 K. 23:4). Thus the

gatekeepers were apparently a third class of priests, who were somehow responsible for the care of the temple and perhaps were occasionally given a room in the complex for their own use.

It is in the postexilic writings of Ezra, Nehemiah, and Chronicles that the gatekeepers receive much more attention. They seem to have been organized into a sacred guild, as were the temple singers and servants (1 Ch. 9:10-33; Ezr. 2:36-43; Neh. 7:39-46). David and Samuel were credited with establishing the gatekeepers in their office (1 Ch. 9:22; cf. 15:16-18; 23:2-5), and Solomon likewise appointed sacred officers, including gatekeepers, during his reign (2 Ch. 8:14). Thus, although the office of gatekeeper could be traced back to Moses' time (1 Ch. 9:20), and could be hereditary (1 Ch. 9:19,23), the king had the authority to appoint and establish his own staff. Apparently the only limitation of this royal authority was that temple personnel had to be Levites; cf. 1 Ch. 9:26; 15:23; 23:5; 2 Ch. 23:4; 34:13, for the identification of gatekeepers as Levites. (Although the RSV and NEB in Ezra 2:70 distinguish gatekeepers from Levites, this reading is based only on 1 Esd. 5:46; the AV follows the MT and makes no such distinction. Other texts [e.g., 2 Ch. 8:14; Ezr. 2:42; Neh. 7:1; etc.], which may be interpreted as maintaining this distinction, may also be construed as merely differentiating the subgroup of gatekeepers within the larger group of Levites. This explanation seems best, not only because of the unmistakable identification of gatekeepers as Levites in the texts mentioned above, but also because such an explanation accounts for the gatekeepers receiving portions like the priests and Levites [Neh. 12:47; 13:5].)

Aside from watching the temple entrances (1 Ch. 9:23-27; 2 Ch. 23:19), the gatekeepers cared for the ark (1 Ch. 15:23f.), oversaw and distributed the freewill offerings (2 Ch. 31:14), helped perform a service of purification (Neh. 12:45), and guarded the storehouses located at the gates (v. 25). They were given their gates by lot (1 Ch. 26:13-16). Their number varied from 4000 in David's time (1 Ch. 23:5) to 172 in Nehemiah's day (Neh. 11:19) — probably due to the great differences in the number of available Levites and in temple size.

III. Other Gatekeepers.–Est. 2:21; 6:2 mention "those who guarded the threshold" at the court of King Ahasuerus in Susa; these were "eunuchs" (AV "chamberlains"), probably serving as the king's bodyguards.

Only four other OT passages remain to be discussed, each with its own special problem. In Ps. 84:10 the RSV and AV render the hapax legomenon *histōpēp* as "doorkeeper," but the NEB translates "linger by the threshold," apparently on the basis of the LXX (*pararriptéisthai*). While this latter translation seems to fit the context, which could be interpreted as requiring a humble position to contrast with the dwelling in the tents of wickedness, the heading of the psalm should also be noticed, for it attributes the psalm to the "sons of Korah," who were gatekeepers (1 Ch. 9:19). Thus a reference to their office would be natural in this psalm, and the needed contrast in v. 10 could be seen in the difference between one serving in Another's house and one dwelling in tents.

The NEB's use of the LXX in Job 38:17 seems unwarranted, for the context and parallelism favor the MT, especially since elsewhere the gates of the netherworld are mentioned but not its gatekeepers (Isa. 38:10; Ps. 9:13 [MT 14]; 107:18).

In 2 S. 4:6, however, the LXX does read more smoothly, avoiding the awkward Hebrew phrasing and repetition. If it is accepted it would be the only OT reference to a woman doorkeeper in a private household.

1 Samuel 3:15 has been thought by some (e.g., L. Batten *Ezra-Nehemiah* [*ICC*, 1913], p. 85) to portray Samuel as a gatekeeper at the Shiloh sanctuary. Although it is clear that Samuel indeed served in some sense as a doorkeeper, he was probably too young (cf. v. 1) to serve in the full capacity of gatekeeper; and, as stated above, that office was not yet fully developed.

The NT has no references to either temple or city gatekeepers but does have several references to gatekeepers of private houses. Thus Jesus spoke of a "doorkeeper" who was to watch over the household while the master was away (Mk. 13:34). Another parable features the "gatekeeper" of a sheepfold (Jn. 10:3). Finally, it was a "maid who kept the door" at the house of the high priest who recognized Peter during Jesus' trial (Jn. 18:16f.).

Bibliography.–A. Cody, *History of OT Priesthood* (1969); *ILC*; R. de Vaux, *Ancient Israel* (Eng. tr. 1961). G. A. LEE

GATEWAY [Heb. *ša'ar*] (Ezk. 8:3; 11:1; 40:3, 6, 8, 11, 14, 16); AV GATE; NEB also GATE; [Gk. *pylón*] (Acts 12:13); AV GATE; NEB "outer (door)"; [*proaúlion*] (Mk. 14:68); AV, NEB, PORCH; RSV mg. "fore-court." In Ezekiel's vision of the temple the RSV uses "gateway" when the context clearly implies the opening rather than the gates themselves. Otherwise in Ezk. 40 the RSV uses "gate," while the NEB uses "gateway" thirty-five times and "gate" only six. The AV uses "gate" consistently throughout the chapter.

In Acts 12:13 the RSV has "door of the gateway," since *pylón* is the opening in which the door (*thýra*) is hung (cf. AV "door of the gate"). The word *pylón* is often used of a gate separated from the house by a courtyard, thus the NEB rendering "outer door." Mk. 14:68 parallels Mt. 26:71, where *pylón* is used (AV, RSV, "porch"; NEB "gateway"). *Proaúlion* is the space between the outer gate (*pylón*) and the house proper. The two Greek words are used imprecisely by Matthew and Mark to speak of the general courtyard area.

GATH gath [Heb. *gaṯ*–'winepress'; LXX usually Gk. *Geth*, also *Gaith* (1 Ch. 7:21), *Gettha* (1 S. 5:8); cf. *Gitta* (Josephus *Ant.* vi.1.2 [8])]. Widely used as a place name in the Levant. Some of the Greek transcriptions, as well as Lat. *Getta* (Pliny *Nat. hist.* v.17 [75]) agree with the Hebrew gentilic form *gittî*, "Gittite," in showing gemination of the last consonant (cf. the related form GITTAIM; Akk. *gin-ti, gin-ti-e-ti* [*ANET*, p. 286]; Egyp. *k-n-ṯ, k-n-t, ḳ-ṯ, ḏ-d*); the gemination is also preserved in the Arabic reflex *Jatt*, frequently found as the name of modern Arab villages on or near the sites of the ancient Gaths.

I. Explanation
II. Gath (Philistia)
  A. Location
  B. History
III. Gath(-padalla)

I. Explanation.–Hebrew *gaṯ* usually means "winepress" (cf. LXX *lēnós*), although a more common word for winepress is *yeqeḇ*; in Joel 3:14 (MT 4:14) several of these latter "winepresses" are associated with Heb. *gaṯ*. While there are some allusions to "treading" the *gaṯ* (Isa. 63:2; Lam. 1:15), other agricultural activities could be carried out there as well (Jgs. 6:11; Neh. 13:15).

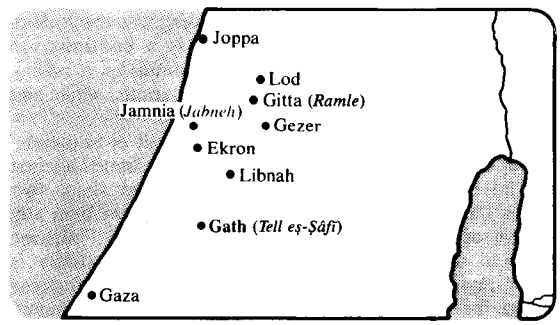
Ugaritic *gt* appears numerous times in geographical names on Ugaritic administrative tablets, e.g., *gt gl'd*, "Gath-gilead" (no relation to the biblical region) and *gt 'ṯtrt*, "Gath-ashtoreth." It is strongly reminiscent of Akk. *dimtu*, "tower," used in conjunction with another element to denote local districts or rural administrative centers

(especially at Nuzi). The *dimtu* at Ugarit appears to have been more than just a tower, probably a complex of several agricultural and defensive installations located among the fields, vineyards, and orchards of an estate; cf. the familiar inclusion of a tower (Heb. *migdāl*) among the installations required for a well-planned vineyard (Isa. 5:1f.; Mt. 5:33). Although winepresses would naturally be found at a *gaṯ*, the term may have been somewhat broader in meaning. Therefore, as a geographical name, Gath probably signified a fortified complex where agricultural products were brought for processing and storage.

In the OT, Heb. *gaṯ* often appears with a second element, usually an ethnic designation; the respective clan or tribe must have used its own *gaṯ* as a central rallying point. Without such qualifying terms, it is sometimes difficult to decide which biblical Gath is meant, though the most prominent Gath was that of the Philistines. The Bible also records a Gath-hepher (Josh. 19:13; 2 K. 14:25) and two Gath-rimmons (the first, Josh. 19:45; 21:24; 1 Ch. 6:69; the second, Josh. 21:25). Gittaim, bearing the locative sufformative *-aim*, might be referred to simply as Gath. Such was apparently the case with Moresheth-gath, evidently the Gath intended in the list of Rehoboam's fortified cities (2 Ch. 11:8).

At least two other Gaths are known from the topographical lists of Thutmose III. The first can be identified with the Ginti-ashna of the Amarna correspondence and may be identical with the Gath-rimmon located in the same area near the plain of Jezreel (Josh. 21:25). The other town, perhaps the Gintēti or Ginti-ʾeti mentioned in Am.Tab. 295, was evidently in northwestern Galilee, and probably corresponds to the Gath-asher captured by Ramses II. The name of this Gath has been preserved in the modern Druze village of Jett.

II. Gath (Philistia).–A. Location. Perhaps the most debated issue in Palestinian geography is the location of Philistine Gath. Because a qualifying appelative is absent in many biblical passages, it is frequently difficult to ascertain just which Gath is intended. The early destruction of Philistine Gath (probably in the late 8th cent. B.C.) would account for the confusion in Roman-Byzantine sources about its location. The Madeba Map identifies Philistine *Geth* with Gitta, a contemporary town S and slightly W of Lydda (Lod) that corresponds with modern Ramle. Medieval Jewish tradition strongly identified Ramle with "Gath." The original Jewish inhabitants moved from Tell Râs Abū Hamid to the newly founded Ramle in the mid-18th cent. A.D. and carried with them the name of their former village. References in Eusebius' *Onomasticon* reveal that the relatively insignificant Gittaim (probably Râs Abū Hamid; 2 S. 4:3; Neh. 11:31,33) had long since usurped in local tradition the place rightfully held by the extinct Gath of the Philistines. Concerning Gettha, to which the ark was brought from Ashdod, Eusebius says, "Even now there is a very large village which is called *Gitthám*, midway as one goes from Antipatris to Iamnia [Jamnia]. And there is also another *Gettheím*" (Klostermann, p. 72). The latter may have been the subject of a separate entry concerning 2 S. 4:3 that has subsequently dropped out of Eusebius' text. In any case, he does not equate the two places, although his description of Gittham coincides with the position of Gitta on the Madeba Map. Perhaps he had no suggestion for the site of Gittaim. With regard to Geth in Josh. 11:22, Eusebius noted, "Even unto the present time it is a village near the 5th milestone from Eleutheropolis [Beit Jibrîn = Beth Guvrin] as one passes along from Eleutheropolis towards Diospolis [Lydda]" (Klostermann, p. 68). He also described "Another Gethremmon [Gath-rimmon]; in the



inheritance of Dan, set apart for the Levites" (Josh. 19:45). He said it was "a very large village, twelve miles from Diospolis as one goes towards Eleutheropolis" (Klostermann, p. 70). Jerome, in his Latin translation of Eusebius' work, reversed the direction slightly; he placed this town "twelve miles from Diospolis, as one goes towards it from Eleutheropolis" (p. 71). Elsewhere (*Comm. on Micah* 1:10), Jerome indicated that Geth "is one of the five cities of Philistia, close to the boundary of Judea, from Eleutheropolis when going towards Gaza (Gazam)."

Mainly on the basis of Jerome's commentary and the assumption that 1 S. 7:14 requires Gath to stand at the opposite end of Philistia from Ekron (cf. below), W. F. Albright proposed to identify Philistine Gath with Tell ʿArâq el-Menshîyeh (also known as Tell Sheikh Aḥmed el-ʿAreini). This opinion soon gained acceptance in many quarters, and the site was named "Tel Gat" on Israeli maps. Excavations by S. Yeivin, however, have now shown that a city of such importance as Philistine Gath could not have occupied this tell on which the Iron Age town was limited to the small upper citadel. Although B. Mazar and others suggested that the most likely candidate for Gath was Tell en-Najīla, no Philistine ware was ever found at this site, and R. Amiran's excavations showed that it was not even a town in the Iron Age.

Noting that Josephus apparently placed Gath at the opposite extremity of Philistia from Gaza (*Ant.* ix.13.3 [275]; cf. 2 K. 18:8) — as part of the Danite inheritance near Jamnia and Ekron (*Ant.* v.1.22 [87]) — C. R. Conder suggested a textual error in Jerome's commentary on Mic. 1:10, which located Gath between Eleutheropolis and Gaza; the original statement may have concerned Gezer instead of Gaza, i.e., Gazam should be corrected to Gazaram (cf. 1 Macc. 13:43, which states that Simon Maccabeus besieged Gaza; Josephus shows that the attack was really against Gazara, Joppa, and Jamnia [*Ant.* xiii.6.7 (215)]).

Evidence from the Late Bronze Age through the Roman-Byzantine period clearly indicates that Gath was thought to be in the northern reaches of Philistia. Unless it originally had been relatively close to Gittaim, the two hardly would have been confused in such a manner. A reference to *Catharocastrum* located "on the mountain called Telesaphion or Telesaphy" apparently alludes to a Latin "Camp of Gath," no doubt Tell eṣ-Ṣâfī, which appears on the Madeba Map as Saphitha, just W of Bethzachar. The obviously Aramaic form Sapitha may mean "lamp" or something similar; it militates strongly against the assumption that the tell's Arabic name reflects the Hebrew place name LIBNAH, "white." Known as Lobna in the Byzantine period, Libnah was located in the immediate region of Eleutheropolis (Eusebius *Onom.*, in Klostermann, p. 120) and may be identified with Tell Bornāt. Tell eṣ-Ṣâfī is undoubtedly the most prominent site within the entire northeastern Philistine plain; it effectively

guards the mouth of a major defile leading into the Judean hills, viz., the Wâdī ʿAjjūr, which is a continuation of the Vale of Elah, and it literally dominates a rolling plain that spreads out at its feet to the south, west, and north for a radius of about 11 km. (7 mi.).

The identification of Ekron with Khirbet el-Muqenna' 8 km. (5 mi.) N of Tell eṣ-Ṣâfī in no way militates against the latter's association with Gath. Although these two major Philistine cities would be closer together than any of the other three, perfect symmetry in the Philistine political divisions is not necessary. Their proximity is more intelligible if Tell eṣ-Ṣâfī were a mighty fortress before the Philistines founded Ekron. Khirbet el-Muqenna' was no doubt selected for its rich water supply, which was too far removed to serve Tell eṣ-Ṣâfī, yet provided a strong attraction for would-be town builders. Furthermore, Khirbet el-Muqenna', situated just S of "the shoulder" (Josh. 15:11) that shielded it from the Wâdī eṣ-Ṣarâr (the valley of Sorek), was in a position to guard that strategic valley without being exposed, and it provided a vital link with the Philistine city of Timnah (clearly associated with Tell el-Baṭṭashi). Ekron hardly would have been founded as a regional center so close to such a powerfully situated city unless Gath were already enjoying extra prestige as the capital of *all* Philistia. Ekron also would have served as both a buffer and a connecting link between Gath and Gezer. Finally, certain biblical passages demand that Ekron and Gath be fairly close together, and the Amarna Letters strongly suggest a reasonable proximity to Gezer.

B. History. 1. Late Bronze Age. Of the Gaths occurring in Late Bronze Age sources, none of those listed by Thutmose III seems to correspond to the later Gath of the Philistines, and the Gittam in a cuneiform letter from Gezer probably is biblical Gittaim. A city called Gimti/Ginti in Am.Tab. 290 (*ANET,* p. 489) played a sufficiently important role in the history of that period to warrant consideration. Furthermore, regardless of its identification, Tell eṣ-Ṣâfī was one of the three dominant cities on the western border of the Shephelah during that period, between Gezer on the north and Lachish on the south. The question is whether the association of this Gimti/Ginti with Gath, and of Gath with Tell eṣ-Ṣâfī can be harmonized to produce an intelligible historical interpretation.

In the relevant epistle (Am.Tab. 290), ARAD-Ḫepa (*ANET* "'Abdu-Heba") king of Jerusalem complains to Pharaoh that Milkilu of Gezer and Šuwardata, ruler of the Hebron district, had "rushed troops of Gezer, troops of Gimti, and troops of Keilah [Khirbet Qîlā] in order to seize the territory of Rubute [probably biblical Rabbah; Josh. 15:60]." He also indicated that a town belonging to Jerusalem called Bīt-NINIB (perhaps Beth-horon; *ANET* "Bit-*Lahmi*") had transferred its allegiance to Keilah, thereby aligning itself with Šuwardata, master of Keilah. Previously Šuwardata had accused ARAD-Ḫepa of bringing Keilah to join him (Am.Tab. 280; *ANET,* p. 487), and requested Pharaoh's assistance because the town was in jeopardy (Am.Tab. 279). He was only too happy to comply with the ensuing Egyptian instruction that he retrieve Keilah by force (Am.Tab. 280:9-15; *ANET,* p. 487). Suffering along with Milkilu from pressure by the ʿApiru (Am.Tab. 271:9-16; *ANET,* pp. 486f.), their joint operation against ARAD-Ḫepa's town of Rubute (Am.Tab. 290; *ANET,* p. 489) is not surprising, and the use of troops from Gezer and from Keilah is perfectly understandable. The fact that soldiers from Gimti/Ginti also participated suggests that the latter was actually Šuwardata's capital city (cf. Aharoni). Locating Šuwardata's principal city at Tell eṣ-Ṣâfī permits a very logical reconstruction of the relationship among Gezer, Jerusalem, Keilah, and the other towns in the area. Later, Šuwardata fought alongside ARAD-Ḫepa against the ʿApiru (Am.Tab. 290a), perhaps after Milkilu's death; the situation had become so serious that it warranted their cry for assistance from Acco and Achshaph.

See picture in DISH.

2. Iron Age. The Israelite invasion drove the "giants" from the hill country, but they held fast in the low country at Gath, GAZA, and Ashdod (Josh. 11:22). Of the three major cities in the eastern coastal plain that stood at the edge of the Shephelah in the Late Bronze Age, Gezer remained in Canaanite hands (Josh. 16:10; Jgs. 1:29), while Lachish fell to the Israelites (Josh. 10:31f.; 12:11). Therefore only Tell eṣ-Ṣâfī was open to the Philistines, and it must have become the principal Philistine stronghold facing the hill country. At the same time Gath appeared as one of the five Philistine capitals (Josh. 13:3, 1 S. 6:17). That another, Ekron, was only 8 km. (5 mi.) north can be explained in terms of each site's topographical relation to the approaches to the hill country. The Philistine intrusion created a political situation that also called for certain precautions on the north side of Tell eṣ-Ṣâfī. A town at this site had already enjoyed a long history during the Late Bronze Age, probably as an ally of Gezer. With this new hostile situation, the Philistines had to reinforce their defenses on the northeast, both against the Canaanites at Gezer and the Israelites in the Aijalon-Zorah region. Therefore the choice of Khirbet el-Muqenna' within the territory of the mother city at Tell eṣ-Ṣâfī is logical and does not affect the latter's identification with Gath. In fact, some passages seem to require that Gath and Ekron be closer to each other than to the other Philistine cities. The captured ark of Israel's God was taken first to Ashdod, then to Gath, and finally to Ekron, from which it was returned via the valley of Sorek (1 S. 5:6-10; 6:9-12). Later, when the prophet Samuel succeeded in relieving the foreign pressure against his people, "the cities which the Philistines had taken from Israel were restored to Israel, from Ekron to Gath" (1 S. 7:14); Samuel's concern was to drive the Philistines out of the hill country and to secure the Israelite frontier against their incursions. Albright assumed that Gath must be in the south and Ekron at the opposite end of Philistia; but if the area between Ekron and Tell eṣ-Ṣâfī were intended, obviously no Israelite towns could have intruded within the 8 km. (5 mi.) between them. Also, the biblical phrase may refer to towns in the Sorek and Elah valleys that had fallen under Philistine control. An alternate explanation is that this is an additional allusion to Gittaim, or more likely, to the Gath in the plain of Sharon (see III below). In any event, the towns returned to Israel were in the northern areas of contact between the Philistines and their neighbors in the hill country. The Benjamites from Aijalon "who put to flight the inhabitants of Gath" (1 Ch. 8:13) may have been associated with this action under Samuel's leadership. At least their contact with people from Gath points to a northern location for that city (though Gittaim or Gath in the plain of Sharon might be meant).

The encounter between David and Goliath is singularly illustrative of the close association between Gath and Ekron. Goliath, evidently a descendant of the Bronze Age population absorbed when the Philistines occupied Gath (1 S. 17:4, 23), was one of at least four such warriors who fell before Israelite prowess (2 S. 21:18-22; 1 Ch. 20:4-8). The Philistine retreat can be explained only by Ekron's proximity to Gath. According to the MT the Israelites "pursued the Philistines to the entrance of the valley [Heb. *gay*'; LXX *Geth*] and to the gates

of Ekron; and the Philistine casualties fell on the road to Shaaraim, and as far as Gath and Ekron" (1 S. 17:52). Thus the retreating Philistines evacuated the valley of Elah, turned northward through the pass E of Azekeh (Tell ez-Zakarîyah), which put them on the "road to Shaaraim"; next they swerved left toward Tell eṣ-Ṣâfî, which they reached via Wâdī ʿAjjūr (MT *gay'*). Some sought refuge at Gath (Tell eṣ-Ṣâfî), while others turned northward to Ekron (Khirbet el-Muqennaʿ).

David's first attempt to find refuge at Gath (1 S. 21:10-15 [MT 11-16]) brought only suspicion from the servants of Achish, so he was obliged to flee (cf. superscriptions to Pss. 34, 56). Later when the warrior's alienation from Saul was obvious even to the Philistines, David returned to Achish and was well received (1 S. 27). David's appointment over Ziklag and his conduct there seemed to presuppose Gath in the north and Ziklag in the south. David viewed Gath as the "royal city" (1 S. 27:5) and requested his own town somewhere in Philistine territory. While at Ziklag, he reported regularly to Achish, claiming raids on Judean-occupied territory (v. 10) while actually assisting the southern Judean clans by attacking their enemies who dwelt in the desert to the south and east. Therefore Ziklag must have been in the south, in the "Negeb of the Cherethites" (1 S. 30:14), WNW of Beersheba (perhaps Tell esh-Sheriʿah). Yet if Ziklag were too close to the Judean foothills, David could not with impunity have pretended to attack the Israelites (this rules out Tell el-Khuweilfeh). Furthermore, if Gath were in southern Philistia, then the king could have noted the direction in which David headed on his campaigns. Therefore Gath must have been in the north, far removed from David's actions.

Gath's position as the "royal city" is demonstrated in 1 S. 29:1-10, where Achish is called "king" (Heb. *melek*; 1 S. 21:10; 27:2), while the "lords" are ranked only as "commanders" (*śārîm*; 1 S. 29:3f.; only in 1 S. 29 is the Philistine loanword *seränîm* given its Hebrew equivalent, "prince, minister"). Achish's relation to the other Philistine lords was as "first among equals." Therefore David's position at Ziklag was as vassal to the senior Philistine ruler.

If the capital were in the north, e.g., at Tell eṣ-Ṣâfî, then clearly Achish was seeking to strengthen Philistine security by placing an allegedly loyal chieftain on his exposed southwestern frontier with Judah. David's practice of slaying all victims in his desert raids lest someone "bring tidings to Gath" (1 S. 27:11) may have become proverbial (cf. 2 S. 1:20; Mic. 1:10).

When David became king over all Israel, he waged a long and bitter struggle against his former Philistine masters. In his drive toward the sea and the resulting skirmishes along the Philistines' eastern frontier, David "took Metheg-ammah [lit., "the bridle of the forearm," perhaps an allusion to the Philistine capital's authority] out of the hand of the Philistines" (1 S. 8:1); the parallel 1 Ch. 18:1 substitutes "Gath and its villages." Apparently during this conflict the famed heroes of Gath tried their mettle several times against David's own men (2 S. 21:18-22; 1 Ch. 20:6-8). Eventually David's military prowess attracted a force of Gittite warriors to his banner (2 S. 15:18-23).

Early in Solomon's reign, Achish was still ruling at Gath, although somewhat overshadowed by the united Israelite monarchy (1 K. 2:39-41). His kingdom must have been separate, however, for Shimei's runaway slaves thought refuge could be found there.

The Gath listed among Rehoboam's fortified cities (2 Ch. 11:5-12) should be understood as Moresheth-gath (probably Tell el-Judeideh), following Aharoni and assuming scribal omission of the first element "Moresheth-" either because of confusion with the following Mareshah or more likely by a desire not to confuse the two places. The network of forts thus represented would be a defensive system quite suitable to the topography of the Shephelah and Judean hill country.

During the latter part of the 9th cent. B.C. Hazael king of Syria conducted a campaign against Jerusalem and western Palestine in which one of the principal objectives was the conquest of Gath (2 K. 12:17f.). This campaign, a part of Hazael's effort to gain control of the main commercial routes across the Palestinian land bridge, also serves as an indication that Gath was located in northern Philistia.

Gath's association with Jabneh (Yebnā) and Ashdod (Esdûd) as the target of Uzziah's military activities on the northern Philistine plain (2 Ch. 26:6) is the most important witness concerning its identification. Apparently this Judean attack in the mid-8th cent. B.C. brought about Gath's downfall as a major Philistine city. Royal stamp seals at Tell eṣ-Ṣâfî bearing the typical Heb. *lmlk* ("for the king") point to a temporary Judean occupation of the site during the late 8th or early 7th cent. B.C. Amos referred to Gath as an example of a mighty stronghold that was taken by siege (Am. 6:2), and he did not include it in his oracle against the leading towns of Philistia (1:6-8). Nevertheless, Gath (*Gimti*) appears alongside several towns in northern Philistia as one of the campaign objectives of Sargon II in 712 B.C. (*ANET*, p. 286). Micah's satirical reference (1:10) suggests that such a proverb as "Tell it not in Gath" had long since taken root in Israelite culture, possibly meaning that Gath was destined to suffer yet another attack, this time at the hands of Sennacherib (701 B.C.). Sennacherib, however, did not mention the city in the detailed account of his actions against Ekron and Timnah (cf. *ANET*, pp. 287f.), though Tell eṣ-Ṣâfî was probably included among the forty-six walled cities taken from Hezekiah.

Later references to the Philistine cities ignore Gath altogether (Jer. 25:20; Zeph. 2:4; Zec. 9:4-7). The Philistine hegemony had passed to Ashdod, which could provide for the new Assyrian provincial administration a center nearer to both the commercial trunk route and the sea. Gath eventually, if not suddenly at the end of the 8th cent. B.C., lost its former significance and apparently even its name. By the Greco-Roman and Byzantine periods the exact site of Philistine Gath had been irrevocably lost, and only the tradition of its northern location remained.

III. Gath(-padalla).–At least one biblical reference suggests a Gath located on the Ephraimite border. Two of Ephraim's sons, Ezer and Elead, were slain by "the men of Gath who were born in the land" in retaliation for cattle rustling (1 Ch. 7:21). Though the Ephraimites tried to take Gezer, and therefore were pushing toward Philis-

tine Gath, their efforts were unsuccessful (Josh. 16:10; Jgs. 1:29). Most likely, the Gath whose residents resisted the Ephraimite incursions was located at modern Jett on the eastern edge of the plain of Sharon at the foot of the Ephraimite hill country. This Gath is first mentioned in Thutmose III's list (written *k-n-t*) where its position on the traditional highway across Palestine is after Aphek (Râs el-ʿAin). Socoh (1 K. 4:10; Khirbet Shuweikeh), and Yaham (Khirbet Yammah), but before Megiddo (Tell el-Mutesellim). This was hardly the Gintikirmil (Gath-carmel) referred to by ARAD-Ḥepa king of Jerusalem, a town somewhere in the northern part of the country (Am.Tab. 288); its ruler, Tagi, was somehow in league with Milkilu of Gezer and also had a garrison at Beth-shean (Am.Tab. 289). Pliny mentioned a Getta N of the Carmel headland (*Nat. hist.* v. 17 [75]); this is most likely the Gath-carmel of the Amarna Letters, and thus should not be identified with Gath-padalla. In any case, Jett on the plain of Sharon was definitely known as Gath-padalla (cf. the Shishak reference below); a certain official, probably the ruler of this Gath (his name meant "Baal [the Storm God] is a warrior"), reported to Pharaoh that the princes of Shechem (Tell Balâṭah) were angry because he had put Gath-padalla under Egyptian aegis although it had formerly been subject to their father, the infamous Lab'aya king of Shechem (Am.Tab. 250). They evidently wished him to join them in their conflict with certain principalities in the Valley of Jezreel. The identification of Jett on the plain of Sharon with Gath-padalla is confirmed by its appearance in the list of Pharaoh Sheshonq (Shishak) (*ca.* 923 B.C.), situated between Borim (Khirbet Būrīn) and Yaḥam.

Justin Martyr claimed that Simon Magus (Acts 8:5-24) was a Samaritan from the town of Gitta (in the genitive, *Gittōn*; *Apol.* i.26.56; *Dial.* 120; called *Gitthōn* in Eusebius *HE* ii.13.14 and *Gitthôn* in Epiphanius *Haer.* 21.1.2). Stephanus Byzantius quoted an extinct portion of Polybius (xvi.40[41].2) concerning the Palestinian city of Gitta (*Ethnika*, ed. A. Meinemii, p. 208).

A. F. RAINEY

GATHER. Of the significant or unusual uses of the term, perhaps most interesting is its use in contexts of death. Most frequent in these contexts is the expression "to be gathered [Heb. *neʾĕsap*, lit. "to be added"] to one's people." This expression is used of Abraham (Gen. 25:8), Ishmael (25:17), Isaac (35:29), Jacob (49:29,33), Moses (Nu. 27:13; 31:2; Dt. 32:50), and Aaron (Nu. 20:24; Dt. 32:50); perhaps it was intentionally restricted to this select group. A similar expression, "to be gathered to one's fathers," occurs only in Jgs. 2:10 and 2 K. 22:20 (par. 2 Ch. 34:28); the former passage concerns all of Joshua's generation, who "served the Lord" (v. 7), and the latter passage is about Josiah (note that this passage adds the phrase "be gathered to your grave in peace"; for the significance of this and other apparent references to burial see below).

The qal of *ʾāsap* is used in apparently abbreviated forms of these expressions (Jgs. 18:25; 1 S. 15:6; Job 34:14; Ps. 26:9; 104:29; cf. Nu. 20:26, where the niphal of *ʾāsap* occurs alone, with apparently the same meaning as the fuller expression; cf. also Isa. 57:1).

The meaning of these expressions is debated. Archeologists have found family graves with evidence of secondary burial and have concluded that these expressions refer to such group interment (see Kenyon, p. 263). This idea finds biblical support in several passages that mention the "gathering" (Heb. *ʾsp*) of bodies or bones (Jer. 8:1f.; 25:33; Ezk. 29:5). Some, e.g., Meyers, add that the expression "to be gathered to one's people" reflects not only a family burial but also a belief in the afterlife — in SHEOL the whole family of Israel is assembled (*see also* BURIAL IV). Tromp (p. 168) holds that this sense of reunion in Sheol developed from the practice of family burials, and that this development occurred before the biblical texts were written. For Heidel and others the expression refers only to the afterlife; it cannot refer to burial because other terms for burial occur in the context (cf., e.g., Gen. 25:8f.; 2 K. 22:20) or the burial is clearly a later event (cf. Gen. 49:33 and 50:3-13). That the expression is used of those who were not buried in an ancestral grave, e.g., Abraham, Moses, and Aaron, seems a telling point (on these points see Alfrink; but cf. J. Skinner, comm. on Genesis [*ICC*, 1910], p. 352).

Another significant use of "gather" occurs in eschatological contexts. Thus God will gather all nations to see His glory (Heb. *qāḇaṣ*, Isa. 66:18), to do battle with them (Heb. *qāḇaṣ*, Joel 3:11 [MT 4:11]; Mic. 4:12; Heb. *ʾāsap*, Zech. 14:2; Gk. *synágō* Rev. 19:19; 20:8; cf. 16:14, 16), and to judge them (Heb. *qāḇaṣ*, Joel 3:2 [MT 4:2]; LXX *synágō*). The agricultural associations of Gk. *synágō* are explicit in the imagery of Mt. 3:12 (cf. Lk. 3:17), where the Messiah will "gather his wheat into the granary," and in 13:30, where the "reapers" will gather first the "weeds," to be burned (cf. a similar use of Gk. *syllégō* in Mt. 13:28-30, 40f.; and *trygō* in Rev. 14:18f.), and then the wheat, to be saved. Gk. *episynágō* refers to the gathering of the elect in Mt. 24:31 (par. Mk. 13:27).

In Jn. 4:36 Jesus speaks of gathering "fruit for eternal life," apparently a reference to the results of evangelism (cf. v. 35; C. H. Dodd, *Interpretation of the Fourth Gospel* [1970], p. 146, noted the interesting parallel to Tosefta *Peah* 4:18).

G. A. L.

GATH-HEPHER gath-hē'fər [Heb. *gaṯ haḥēper*–'winepress of the well']; AV also GITTAH-HEPHER (Josh. 19:13). A border town in the territory assigned to Zebulun after the Conquest (Josh. 19:13); also the hometown of the prophet Jonah (2 K. 14:25). Probably to be identified with modern Khirbet ez-Zurrâʿ, the city was located 5 km. (3 mi.) NE of Nazareth, 22 km. (14 mi.) W of the south coast of the Sea of Galilee. El-Meshad, located a short distance N of ez-Zurrâʿ, is the traditional site of Jonah's tomb.

GATH-RIMMON gath-rim'ən [Heb. *gaṯ rimmôn*–'winepress by the pomegranate'].

1. A city assigned by Joshua to the tribe of Dan (Josh. 19:45); one of the cities from Dan allotted to the Kohathites of the tribe of Levi (21:24). Gath-rimmon was located in the territory that Dan was unable to hold against the incursions of the Canaanites and that later became part of Ephraim. This explains the statement in 1 Ch. 6:69 (MT 54) that it was one of the cities from the hill country of Ephraim that were assigned to the Kohathites. It has been identified with Tell ej-Jerîsheh on the south bank of the river Yarkon about 8 km. (5 mi.) NE of Joppa.

2. A city in the territory of Manasseh W of the Jordan

that was assigned to the Kohathites of the tribe of Levi (Josh. 21:25). In this passage Gath-rimmon may have been copied incorrectly from v. 24 (cf. 1 Ch. 6:70 [MT 55] and the LXX); perhaps the correct reading would be "Ibleam." *See* IBLEAM.

See *EAEHL*, II, *s.v.* "Jerishe, Tell" (N. Arigad).

GAULANITIS gôl-ə-nī'tis. *See* GOLAN.

GAULS [Gk. *Galatai*]; AV GALATIANS. The people of Galatia (1 Macc. 8:2). Celtic tribes from Gallia (Gaul) first entered Asia in 278 B.C. at the invitation of Nicomedes I of Bithynia. They plundered other peoples extensively until confined within the borders of Galatia by Attalus I of Pergamum *ca.* 232 B.C.

Galatia is literally the Gaul of the East: the peoples of both lands were called *Galli* by earlier Roman writers, and *Galatai* by the Greeks until the 2nd cent. A.D. The Gk. *eis Gallian* (ℵ, etc.) for *eis Galatian* in 2 Tim. 4:10 reflects later usage and the belief that the words alluded to Gaul. Paul presumably wrote "Galatia"; and Timothy, in Ephesus, would naturally understand him to mean Asiatic Galatia, since he did not qualify the term. The tradition that Crescens founded the churches at Mainz and Vienne in Gaul is probably derived from this passage and is thus without independent value.

It is difficult to say whether 1 Macc. 8:2 refers to victories over the Gauls of Europe or those of Asia Minor. The Romans under Scipio Nasica subjugated the Boii in northern Italy in 191 B.C. and formed the province of Cisalpine Gaul; but in 189 B.C. Manlius Vulso subdued the Galatians who had assisted Antiochus III at Magnesia. T. Mommsen and others argue that the reference is to the Gauls of northern Italy, since they are here mentioned as tributary to Rome, and in connection with the Roman conquests in Spain. Not much can be based on the last point, however, for the defeat of Antiochus in Asia is also mentioned in this passage.

Although the occasion is uncertain, 2 Macc. 8:20 doubtless refers to the Asiatic Gauls. Possibly the victorious eight thousand, evidently Jews, were fighting for Antiochus III against Galatian mercenaries of his rebel satrap Molo in 220 B.C. Livy says that the Galatians never had more than twenty thousand warriors in the field.

See also GALATIA.

C. J. HEMER

GAUZE, GARMENTS OF [Heb. *gilyōnîm*] (Isa. 3:23). Traditionally scholars have assumed that Heb. *gilyōnîm* is the pl. of *gillāyôn* ("tablet," Isa. 8:1), and is thus derived from *gālâ*, "uncover, reveal." Since the cognate Arab. *jalā* can mean to clean or polish, some scholars hold that *gillāyôn* means "polished (metal) object," i.e., "mirror" (cf. AV, RV); others, however, retain the basic sense of "clarify, reveal," and thus see here a reference to delicate or sheer garments (cf. RSV, NEB; LXX *býssinos*, "[fine] linen"). While either of these suggestions seems preferable to *CHAL*'s "papyrus garments" (p. 61), this mention of papyrus points up the fundamental problem — in Isa. 8:1 *gillāyôn* clearly means a writing surface, which may have been metal, wood (cf. G. R. Driver, *Semitic Writing* [rev. ed. 1976], p. 80), or papyrus (cf. postbiblical Heb. *gillāyôn*, which means the blank part or margin of a page).

In view of this meaning of *gillāyôn*, E. J. Young's suggestion (comm. on Isaiah, I [*NICOT*, 2nd ed. 1972], p. 166) that Heb. *gilyōnîm* is related to Akk. *gulēnu*, "coat," seems preferable. If this is accepted, then Heb. *gilyōnîm* is probably related to Heb. *g^{e}lôm*, "mantle" (cf. *gālam*, "wrap"; *gālal*, "roll"; cf. also *CAD*, V, 127; H. Cohen, *Biblical Hapax Legomena in the Light of Akkadian and Ugaritic* [1978], p. 93 n. 253).

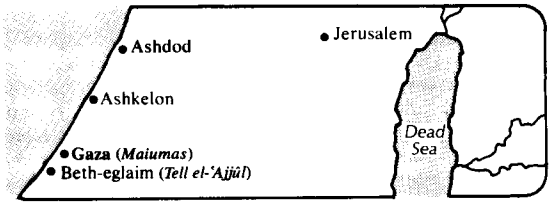
GAZA gā'zə, gâ'zə [Heb. *'azzâ*; Gk. *Gaza* (Acts 8:26)]; AV also AZZAH (Dt. 2:23; 1 K. 4:24; Jer. 25:20). One of the five chief cities of the Philistines.

I. Location
II. History
  A. Early History
  B. Iron Age
  C. Persian Period
  D. Hellenistic Period
  E. Roman Period and Later
III. Excavations

I. Location.—The ancient tell of Gaza is located at the site of modern Ghazzeh and consists of a hill rising from 18 to 61 m. (60 to 200 ft.) above the surrounding plain. It is separated from the sea, about 4 km. (2.5 mi.) away, by sand dunes. The plain around Gaza, especially on the east, is very fertile and dotted with numerous wells. Its greatest importance, however, stems from its location on the vital highway connecting Egypt with Syria and Mesopotamia. Recognition of this strategic position finds expression in the Bible. Gaza was known as the southernmost limit of the land of Canaan on the one hand (Gen. 10:19), and as the northernmost limit of the desert region separating Palestine from Egypt (Josh. 10:41; Jgs. 6:4) on the other.



II. History.–A. Early History. The first appearance of Gaza in ancient records is the reference to it as "that-which-the-ruler-seized" (or "the holding of a ruler") by Thutmose III. He had marched to Gaza from Egypt on his first campaign in western Asia. Perhaps Gaza was still within the Egyptian "holdings" on Palestinian soil; it apparently served as the main staging area for the invasion of Palestine (cf. *ANET,* p. 235; Am.Tab. 314:4; 315:3).

In a letter sent from Taanach (no. 6; cf. W. F. Albright, *BASOR,* 94 [Apr. 1944], 12-27) to Gaza by a certain Amenhotep, the writer appears to be displeased that he had not been met by the local official or his representative at Gaza. It has been (cogently) suggested that this letter (*ca.* 15th cent. B.C.) may reflect correspondence between the commander at Taanach and Pharaoh Amenhotep II on the eve of the latter's second campaign in Palestine. In any case, that an important personage with a manifestly Egyptian name should appear to be using Gaza as a base of operations conforms to the prior situation under Thutmose III as well as to that represented in the Amarna Letters. During the so-called Amarna age (*ca.* 14th cent. B.C.) Egyptian-occupied territory was organized into a province called "Canaan," which was divided into three districts, of which Palestine was the southernmost. Gaza appears to have been the headquarters of a district governor, and may also have served as the capital for the whole province. Its administrative importance is underlined by three references to it in a letter to Pharaoh from the king of Jerusalem (Am.Tab. 289; *ANET,* p. 489). Since it was located at the southern extremity of Canaan (Gen. 10:19), Gaza maintained its prominence during the ensuing Ramesside dynasty.

According to the Bible, the original inhabitants of the region around Gaza were called the AVVIM and were subjected to an invasion by "the Caphtorim, who came from Caphtor" (a term for Crete or part of the Aegean area) and destroyed the indigenous population in order to settle in their stead (Dt. 2:23).

B. Iron Age. During the Iron Age Gaza and its territory were assigned to Judah in the biblical division of the land (Josh. 15:47). But its inclusion in the land that remained to be conquered after the initial invasion (Josh. 13:2f.; cf. Jgs. 3:3) demonstrates that the LXX of Jgs. 1:18 is probably correct, contra the MT. If so, then the verse must be translated: "Judah did *not* take Gaza with its territory. . . ." This harmonizes with the next verse, which clearly indicates that Judah did not drive out the inhabitants of the plain because of their iron chariots. It is also commensurate with the city's new role in the Philistine occupation by which it became one of their five major cities (Josh. 13:3; 1 S. 6:17; Jer. 25:20). As such it figured prominently in the adventures of Samson. During one of his amorous escapades there, he avoided an ambush by the citizens and carried away the doors of its gate (Jgs. 16:1-3). After his final capture by the Philistines, he was blinded and taken to Gaza as a prisoner and forced to grind at the prison mill (16:21). The account of his heroic death provides the earliest reference to a temple at Gaza devoted to the worship of the god Dagon (16:23-31).

Gaza represented the southernmost limit of the area under Solomon's aegis (1 K. 4:24). In this instance it is noted as a boundary point in the region called "beyond the river" (i.e., the Euphrates), which later became the official title of the Persian province in that region. The history of the relationship between Philistia and Israel during the monarchy is not clearly delineated by the sources. Gezer seems to have been on the recognized border between the two realms. In the fifth year of Rehoboam an invasion was carried out by Pharaoh Sheshonq (Shishak, 1 K. 14:25f.; 2 Ch. 12:2-9). Entry no. 11 on Sheshonq's list of "conquered" towns may perhaps be a reference to Gaza, though some scholars have rejected this reading.

The Assyrian king Adadnirari III (810-783 B.C.) claimed that Philistia had paid him tribute (*ANET,* p. 281), but the implications of this boast for the history of Gaza are not clear. During the 8th cent. B.C. Gaza was, however, known for her active slave trading with the Edomites (Am. 1:6f.). This conforms to the general picture of the Philistines' role as middlemen between Phoenicia and the interior (cf., e.g., Joel 3:4-8 [MT 4:4-8], where it is stated that Judah will usurp this function). With the appearance of Tiglath-pileser III (745-727 B.C.), Gaza became an important buffer state on the border of Assyria's empire. In 734 B.C. Tiglath-pileser made a foray into Philistia, forcing Khanno king of Gaza to flee to Egypt. The Assyrian conqueror set up his own images in Gaza and thus established his authority over it. He also appointed an official to guard the frontier with Egypt (*ANET,* pp. 282-84). Khanno evidently returned after Tiglath-pileser's death and probably had a part in the rebellion against Assyrian authority that brought about the final downfall of Samaria (2 K. 17:4-6). In 720 B.C. Sargon II (722-705), after seeing to the final deportations of the Israelites, turned south and recaptured Gaza (*ANET,* pp. 284f.).

When Sennacherib succeeded Sargon II (705 B.C.), Gaza seemingly did not join in the general revolt against Assyrian authority. This left the city exposed to attack by Hezekiah king of Judah, who was one of the leading partners in the anti-Assyrian alliance (2 K. 18:7f.). After Sennacherib (705-681 B.C.) had defeated the Egyptians at Eltekeh and crushed all Judean resistance in the Shephelah, he transferred many of Hezekiah's towns to the jurisdiction of Ṣilli-Bēl king of Gaza, as well as to the rulers of Ashdod and Ekron (*ANET,* pp. 287f.). Thus was Gaza rewarded for her loyalty. It was probably this same king (Ṣilli-Bēl) who was ordered to Mesopotamia by Esarhaddon (681-669 B.C.) to do corvée work (*ANET,* p. 291) along with Manasseh of Judah (2 Ch. 33:11). Ṣilli-Bēl was required by Ashurbanipal (669-*ca.* 627 B.C.) to assist in the second Assyrian invasion of Egypt (669 B.C.) in which Thebes (MT No-amon, Nah. 3:8) was destroyed (*ANET,* p. 294).

It is not clear what position Gaza may have taken in regard to Pharaoh Neco's attempt to aid the Assyrians against the combined forces of Media and Babylon (609 B.C., 2 Ch. 35:20). Jeremiah pronounced an oracle against the Philistines "before Pharaoh smote Gaza" (Jer. 47). Therefore, the people of Gaza may have sought to prevent Neco's advance; perhaps Neco had to subdue Gaza before his encounter at Megiddo with the hapless Josiah (2 Ch. 35:20-24). Neco's failure and the consequent rise of Nebuchadrezzar II (605-562 B.C.) to power, however, was envisioned by Jeremiah as a time of impending judgment upon the whole Middle East, in particular on Gaza and her commercial associates of long standing (Jer. 25:20-22). After Syria and Palestine became firmly established in Babylonian hands, a king of Gaza may have been taken captive as was Jehoiachin (2 K. 24:10-16; 2 Ch. 36:9f.); this seems to be indicated by the reference to a ruler of Gaza on a prism from the Babylonian court (*ANET,* p. 308; cf. the oracle against Gaza in Zec. 9:5).

C. Persian Period. Herodotus, who at one time must have paid a personal visit to Gaza, was quite impressed by its size and importance — it was "not much smaller than Sardis" (iii.5; cf. also ii.159). In the same passage, however, he made it clear that Gaza (Kadytes) was no longer reckoned as part of Philistia. Instead, the entire

strip of coast from Gaza to another port, Ienysos (as yet unidentified), was under the control of a "king of Arabia" (probably a king of Kedar). Cambyses exempted this "Arabian territory" from taxes for services rendered during his invasion of Egypt (525 B.C.; iii.9). Herodotus' silence concerning any resistance met by Cambyses at Gaza weighs against a later allusion by Polybius (xvi.22a.4) to a stand taken by the people of Gaza against the Persians (perhaps this latter is a reference to some Persian campaign to regain Egypt during the middle or late 4th cent. B.C.). It was to Persia's advantage that this district be preserved under friendly, local control. The Arabians were better able to maintain the famous watering stations on the route to Egypt (cf. the itinerary of Seti above); furthermore, they were masters of the trade routes connecting the Mediterranean coast with the Arabian peninsula. Gaza was especially important as the outlet for the precious commodities transported from south Arabia via the caravan routes. In the course of time, Persia transformed Gaza into a major royal seaport and fortress; Greek merchants, in stiff competition with the Phoenicians who controlled most of the coastal towns farther north, flocked to Gaza as a ready outlet for their wares. Gaza was the first town in Palestine to mint coins on the Attic standard.

D. Hellenistic Period. Alexander the Great found Gaza strongly fortified and defended by a trustworthy Persian "eunuch" named Batis. The account of the Macedonian siege serves to underline the strength of the city's position. After a two-month siege, including the erection of ramparts and the undermining of the city walls, Alexander finally took the city but sustained a personal injury (Arrian *Anabasis* ii.25-27). The slaughter of the population was greater than in Tyre, and the women and children were sold into slavery. Henceforth Gaza became a Macedonian garrison.

During the strife that followed Alexander's death, Gaza changed masters several times. At first it was under the aegis of Ptolemy I, who had seized power in Egypt (*ca.* 320 B.C.; Appian *Syr.* 52); but in 315/314 B.C. it passed into the hands of Antigonus, who was striving for mastery over the entire empire (Diodorus xix.59; Appian *Syr.* 69). Ptolemy made a play to retake Palestine in 312 and fought a pitched battle at Gaza against Antigonus' famous son Demetrius (Diodorus xix.82-84, 90-93). Although Ptolemy's superior forces gave him a decisive advantage, it was only after a valiant charge by Demetrius' elephants had spent itself against his own palisade that victory was won for the Egyptians. Shortly after that, Ptolemy retreated to Egypt and ceded the territory to Antigonus (311 B.C.; Diodorus xx.73). Nevertheless, Palestine changed hands another five times until 301 B.C. when Ptolemy refused to give it up to his former ally Seleucus. Gaza, along with several other coastal towns, became an independent Hellenistic city with the right to mint its own coins.

Antiochus III tried several times to take Palestine away from the Ptolemies. He was severely defeated in a fierce battle near Raphia, but finally won a decisive victory at Paneion (later Caesarea Philippi) that gave him mastery over the country as far as Gaza (198 B.C.). Under Seleucid rule, Gaza enjoyed autonomy as a Hellenistic city. Its great importance as a world market is illustrated by the lists of cult prostitutes on inscriptions from Ma'în. While there were eight such women devoted to the local shrine from Egypt and nine from Dedan, there were twenty-seven from Gaza, which was doubtless a major source for the purchase of such women.

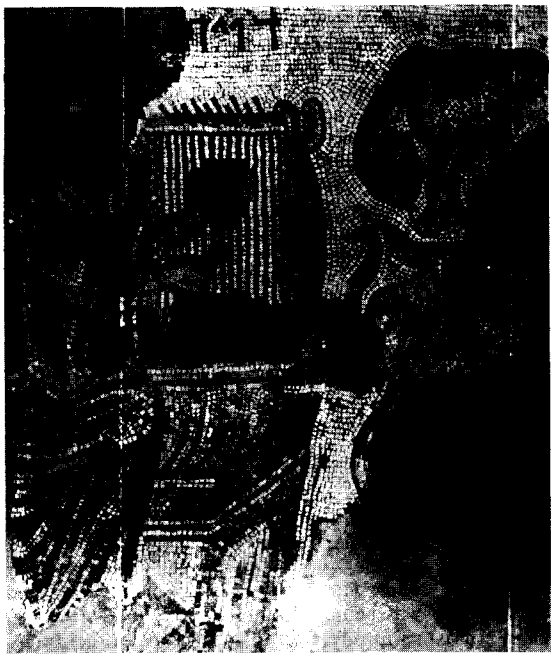
During the Maccabean struggle for power, Gaza resisted Jonathan's attempt to seize the city. But after he had burned the suburbs, the townspeople finally came to terms and surrendered hostages to him (1 Macc. 11:61f.; Josephus *Ant.* xiii.5.5 [150-53]). Although Simon is said to have subdued it (1 Macc. 13:43-48, LXX, AV), the reference is contradicted by Josephus (*Ant.* xiii.6.7 [215]) and therefore is probably an error for Gezer (RSV and NEB Gazara). Sometime between 112 and 103 B.C. the phrase "the Seleucid citizenry of Gaza," which had been the expression of its ties with the Syrians, disappeared from its coins.

Alexander Janneus brought Gaza under Jewish control (*ca.* 96 B.C.), but only after it had been abandoned by Ptolemy VIII Lathyrus. Ptolemy had been driven from Egypt by his mother, Cleopatra III (*ca.* 107 B.C.), and had established himself in Cyprus. He invaded Palestine hoping to gain a land base with the support of several coastal cities, including Gaza, from which to attack Egypt. Ptolemy's severe defeat of Alexander Janneus drove him to invite Cleopatra's intervention. Then Alexander secured Raphia and Anthedon to the south, and Ptolemy decided to leave Gaza to its fate. During the night the people of Gaza attacked Janneus' camp and achieved a temporary success because the Jews thought that Ptolemy himself was against them. The following morning they realized that the city was actually standing alone. Nevertheless, Gaza continued to offer stiff resistance under their commander Apollodotus. Its close associations with Arabia are again illustrated by the offer of support that came at this time from Aretas king of the Nabateans. But before the promised assistance from Nabatea could arrive, Apollodotus' own brother Lysimachus slew the commander out of jealousy and betrayed the city. After gaining entrance to the city, Alexander Janneus pretended at first to offer them easy terms; a short time later he loosed his troops on the populace, and a terrible slaughter ensued. This siege lasted the better part of a year (Josephus *Ant.* xiii.13.2f. [352-364]; *BJ* i.4.2 [86f.]).

E. Roman Period and Later. Pompey declared Gaza a free city (62 B.C.; Josephus *Ant.* xiv.4.4). Gabinius, the Roman governor of Syria, rebuilt Gaza (57 B.C.). According to certain ancient authors this new town was somewhat S of the old town (cf. Strabo *Geog.* xvi.2.30; Appian *Syr.* 51 [also 54]; Josephus *Ant.* xiv.5.3), but this is contradicted by others (Diodorus xvii.49; Arrian *Anabasis* ii.26, etc.). To some commentators the desert Gaza of Acts 8:26 referred to the older site; it seems more likely, however, that this expression, like several others, was used to distinguish the old Gaza from the "new town" that existed on the seacoast and was more commonly known by the name Maiumas. On the other hand, the Greeks referred to Beth-eglaim (Tell el-'Ajjûl) as "Old Gaza" to distinguish it from the other two (Diodorus xix.80).

After Octavian's victory at Actium (31 B.C.) he became convinced of Herod's trustworthiness and awarded him a number of coastal towns that Cleopatra VII had induced Antony to give her (Josephus *Ant.* xv.4.1 [95]); in addition Gaza was placed under Herod's jurisdiction, and henceforth it enjoyed the status of an autonomous city within his realm (Josephus *Ant.* xv.7.3 [217]; *BJ* i.20.3 [396]). When Herod's kingdom was divided after his death, Caesar returned Gaza to the direct control of the governor in Syria (*Ant.* xvii.11.4 [320]; *BJ* ii.6.3 [97]). With the outbreak of the Jewish War, the Jews sacked Gaza (*BJ* ii.18.1 [460]); but the numismatic evidence, namely, coins in honor of Titus and Vespasian, indicates that the city soon revived after the revolt was quelled.

Subsequently, Gaza continued to thrive as a center of



David plays the harp, above which is his name in Hebrew, and a lion cub listens in a fragment of the sixth-century-A.D. mosaic in Gaza (Israel Department of Antiquities and Museums)

Part of the Gaza mosaic showing a lioness and suckling cub, zebra, tigress, giraffe, peacock, and other animals, surrounded by grapes and flowers, and the synagogue dedication in Greek (Israel Department of Antiquities and Museums)

Greco-Roman culture and a market of world renown. The captives of the Bar Cochba revolt were sold there as slaves. Nevertheless, the late Roman Period saw a thriving Jewish community there, even though the city was, like other parts of Palestine, considered by rabbinic authorities to be out of the bounds of the "Holy Land" and therefore not subject to all relevant commandments. During the Byzantine period, when Jews were forbidden to enter Jerusalem, those who lived in the southern parts of Palestine assembled at Gaza for their convocations. Sozomenus (*HE* v.3) relates that under Constantine the seaport of Maiumus was granted status as an independent Christian town apart from Gaza, which was predominantly pagan. The emperor Julian, however, ordered them to be united into one town. When Julian announced the plan to rebuild the temple at Jerusalem and to turn Palestine over to the Jews, the pagan mob at Gaza persecuted the local Christians and burned their churches. Eventually, however, Gaza itself became the seat of a bishopric. During the 4th cent. A.D. there was also an important Samaritan community at Gaza, which continued its existence until conquered by Napoleon Bonaparte.

The Muslims conquered Gaza after they had defeated the Byzantines led by Sergius, patrician of Palestine, in the Arabah S of the Dead Sea. When Sergius retreated toward Gaza, his forces were overtaken and nearly annihilated. The Arab commander Amr ibn-al-As took Gaza in A.D. 634.

III. Excavations.–W. J. Pythian-Adams excavated part of the mound in 1922, and A. Ovadiah resumed excavation there in 1967 after a mosaic pavement (*ca.* A.D. 500) was discovered in 1965. This mosaic, the only surviving remains of a Jewish synagogue, "depicts King David as Orpheus, dressed in Byzantine royal garments and playing a lyre" while surrounded by various animals (*EAEHL*, II, 412). A section of an industrial complex, probably dye works, dates to *ca.* A.D. 420.

See also AYYAH.

A. F. RAINEY

GAZARA gə-zā'rə [Gk. *Gazara, Gazēra*]; AV also GAZERA (1 Macc. 4:15; 7:45). A strong fortress in Judea that figures often in the Maccabean wars (1 Macc. 4:15; 7:45; 9:52; 13:53; 14:7, 34; 15:28, 35; 16:1, 19, 21; 2 Macc. 10:32; cf. Josephus *Ant.* xii.7.4 [308]; xiv.5.4 [91]; *BJ* i.8.5 [170]). In 1 Macc. 13:43, the LXX and AV Gaza should probably read Gazara (so RSV, NEB).

Judas pursued Gorgias to Gazara. It was fortified by the Greek general Bacchides In 142 B.C. it was captured by Simon Maccabeus, who expelled the pro-Syrians, strengthened the fortifications, and built a palace for himself. (A Greek graffito by Pampras is said to read, "To blazes with Simon's palace.") Simon appointed his son John commander of his army (1 Macc. 13:53).

Seven boundary stones *ca.* A.D. 100 read in Greek *Alkiou*, "belonging to Alkios"; the other line is in Hebrew and reads, "the boundary of Gezer" — which may mean the boundary of Alkios' estate worked by laborers from Gezer (cf. *WBA*, p. 44a; *BA*, 30 [1967], 47).

The city is identical with Tell Jezer, the ancient GEZER. Part of Macalister's so-called Maccabean castle is now held to be a Solomonic gate (W. G. Dever, *BA*, 30 [1967], 49).

D. J. WIEAND

GAZATHITES gā'zə-thīts. The AV in Josh. 13:3 for Heb. *hā'azzāṯî*, RSV "those of Gaza." The Hebrew form is a gentilic singular (collective), lit. "the Gazite [= Gazathite]"; the form in Jgs. 16:2 is a gentilic plural, "the Gazites [= Gazathites]." No distinction between the use of the two terms is apparent.

W. S. L. S.

Gazelles captured in the chase are led by the horns in a relief from the tomb of Ptahhotep at Saqqârah (Service des musées, Cairo; Lehnert and Landrock)

GAZE. *See* LOOK.

GAZELLE gə-zel' [Heb. *ṣᵉḇî, ṣᵉḇîyâ*; Gk. *Dorkas*–'the one seeing clearly'(?)]; AV ROEBUCK, ROE. The gazelle is an antelope belonging to the bovine family of the even-toed ruminants. There are more than twenty species of gazelle, all belonging to Asia and Africa. The species found in Syria and Palestine are the Dorcas gazelle, *Gazella dorcas* (cf. RSV mg., NEB, Acts 9:36) and *Gazella arabica*. Both species are about 60 cm. (2 ft.) high at the shoulders, and about 1 m. (3 ft.) long. Both sexes have unbranded, lyrate, ringed horns, which may be 30 cm. (1 ft.) long. The *Gazella dorcas* is tawny and the *Gazella arabica* is gray, though both are creamy white below and on the rump, with a narrow white line from above the eye to the nostril. Several varieties have been distinguished, but they will not bear elevation to the rank of species — except perhaps *G. merilli*, which has been captured in the Judean hills and found to have horns distinctly different from those of the common gazelle. The gazelle is found singly or in small groups on the interior plains and the uplands, but not in the high mountains. It is a marvel of lightness and grace, and when alarmed a herd makes off with great rapidity over the roughest country (cf. Prov. 6:5). The skin is used for floor coverings, pouches, or shoes, and the flesh is eaten, though not highly esteemed.

A. E. DAY

The gazelle and hart were among the clean animals that the Israelites were permitted to eat (Dt. 14:5). They were known for their speed (2 S. 2:18) and their beauty (Cant. 2:9; 4:5; 7:3). But the gazelle is also one of the more timid animals. Thus Isaiah described the Day of Judgment as a time when "like a hunted gazelle . . . every man will turn to his own people . . . and flee to his own land" (Isa. 13:14).

Relief of a gazelle with reverted head surrounded by acanthus. From Qasr er-Rabbah in Transjordan (2nd cent. A.D.) (E. K. Vogel; picture American Schools of Oriental Research)

The oath formula "I adjure you . . . by the gazelles or hinds of the field" (Cant. 2:7; 3:5) may be interpreted in two ways. Some scholars, e.g., M. H. Pope (*Song of Songs* [*AB*, 1978]), discuss the appropriateness of the gazelle's known "amative propensities" for the contexts in Canticles. The LXX and Tg., however, suggest references to deities (cf. NEB). R. Gordis combines these two views; he sees the expression as a euphemism using the words for animals in place of divine names, which would have been thought inappropriate in those contexts (*Song of Songs and Lamentations* [rev. ed. 1974], pp. 26-29).

R. W. V.

GAZER gā'zər (AV 2 S. 5:25; 1 Ch. 14:16). *See* GEZER.

GAZERA gə-zē'rə [Gk. *Gazēra*].

1. (1 Esdr. 5:31, AV, NEB). *See* GAZZAM.

2. A fortress in Judea (AV 1 Macc. 4:15; 7:45). *See* GAZARA.

GAZEZ gā'ziz [Heb. *gāzēz*–'shearer'] (1 Ch. 2:46). Two individuals, one the son of Caleb's concubine Ephah, and brother of Haran and Moza, and the other Haran's son, thus nephew of the first Gazez. Although the repetition of the name (which is otherwise unknown) seems suspicious, the textual tradition strongly supports the MT (only a few minor LXX MSS have variant readings).

GAZINGSTOCK [Heb. *rᵒ'î*–'seeing'] (Nah. 3:6); NEB "excrement." An obsolete word, probably meaning a spectacle. Elsewhere Heb. *rᵒ'î* does not have the negative connotation (Gen. 16:13; 1 S. 16:12; Job 7:8; 33:21). The AV also translates Gk. *theatrízō* "gazing stock" in He. 10:33 (RSV "publicly exposed," NEB "public show"). The reference here may be literally to a public show, for in antiquity people delighted in observing the suffering of slaves, criminals, and captives; or the term may be used figuratively, as Paul uses *théatron gínomai* in 1 Cor. 4:9 to compare himself and the other apostles to men condemned to death who are exhibited as a spectacle before the world, angels, and men.

W. L. WALKER

GAZITES gāz'īts [Heb. *'azzāṯîm* (Jgs. 16:2). Inhabitants of Gaza.

See also GAZATHITES.

GAZZAM gaz'am [Heb. *gazzām*; Gk. Apoc. *Gazēra*]; AV Apoc., NEB Apoc., GAZERA. Head of a family of temple servants who returned from exile (Ezr. 2:48; Neh. 7:51; 1 Esd 5:31).

GEAR [Gk. *skeúos*] (Acts 27:17); AV SAIL; NEB MAINSAIL. Scholars disagree about the precise meaning of this term, which elsewhere in the NT ranges in meaning from a thing or object, e.g., a bowl (Jn. 19:29), to a metaphor for the human body ("vessel" in 2 Cor. 4:7). From the context it is clear that *skeúos* here refers to an object on the ship that, when lowered, would reduce the danger of running on the sands of the Great Syrtis. Some, e.g., Bauer (rev., p. 754) and E. Haenchen (comm. on Acts [Eng. tr. 1971], pp. 703f. n. 2) suggest "drift-anchor," which would lessen the storm's effect on the ship, and thus enable it to navigate more safely. Others, e.g., F. F. Bruce (comm. on Acts [*NICNT*, 1954], pp. 505 n. 24, 510), suggest the gear connected with one or more of the sails that, when partially lowered, would reduce the wind's effect but still allow the sailors to navigate. Perhaps in view of the use of *skeúos* ("tackle") in v. 19, this latter suggestion s preferable. G. A. L.

GEBA gē'bə [Heb. *geḇa'*–'height'; Gk. *Gaba, Gabaa, Gabee*]; AV also GABA (Josh. 18:24; Ezr. 2:26 par. Neh. 7:30), GIBEAH (Jgs. 20:33; 1 S. 13:16; 14:5), GABDES (1 Esd. 5:20); NEB also GIBEAH (Jgs. 20:33; 1 S. 13:16), GABBES (1 Esd. 5:20). In Jgs. 20:10 read Gibeah (so RSV, AV, NEB, contra MT Geba'); so again probably in 1 S. 13:3 (cf. LXX, Tg.); in 2 S. 5:25 read Gibeon with the LXX and 1 Ch. 14:16. On the other hand it is probable that in 1 S. 14:2 Geba is meant (cf. 13:16; 14:5). A Levitical town (Josh. 21:17; 1 Ch. 6:60) in Benjamin (Josh. 18:24), identical with present-day Jeba', 9 km. (5.5 mi.) N of Jerusalem. Thus far no excavations have been carried out. The name means "height," as do Gibeah and Gibeor, two other towns of Benjamin which have often been confused with Geba, not only in the versions but also in the MSS of the MT.

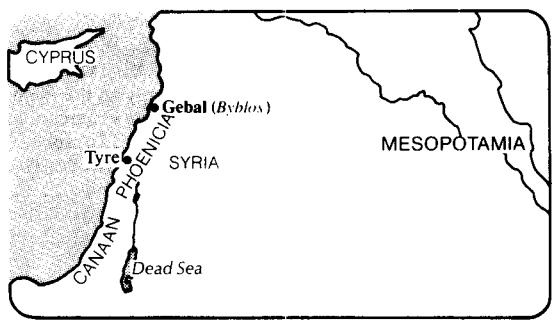
Because of textual uncertainty in Jgs. 20:33 (cf. LXX *Maraagabe*) the scene of the decisive battle between Benjamin and the other tribes is not quite clear; Driver (*Welt des Orients*, 1 [1947], 30), followed by KoB, p. 550, translates "in the vicinity of Geba." Here Saul had his camp before his first battle against the Philistines (1 S. 13:16), who themselves encamped at Michmash, 3 km. (2 mi.) NE of Geba. Between the two localities lies the deep gorge of Wâdī Ṣuweinît, the pass described graphically in 1 S. 14:4f. *See* MAAREH-GEBA.

Asa fortified the town as a boundary fortress against the northern kingdom (1 K. 15:22; 2 Ch. 16:6), and so it was an indication of the northern boundary of the kingdom of Judah (2 K. 23:8; cf. also Zec. 14:10). It protected a secondary road to Jerusalem, the main road following the watershed. The Assyrian invasion as visualized by Isaiah followed this secondary road (Isa. 10:29). After the Exile it was again inhabited (Ezr. 2:26 par. Neh. 7:30) by Benjaminites (Neh. 11:31) and Levitical singers (12:29). Perhaps 1 Ch. 8:6f. throws some light on the early history of Geba: the father of judge Ehud and his uncles carried the original inhabitants, Canaanites, into exile to Manahath (5 km. [3 mi.] WSW of Jerusalem); from that time on the town was Benjaminite.

Bibliography.–A. Alt, *PJ*, 23 (1927), 17-20; A. Demsky, *BASOR*, 212 (Dec. 1973), 26-31. A. VAN SELMS

GEBAL gē'bəl; **GEBALITES** gē'bəl-īts [Heb. *gᵉḇāl*–'border,' *giḇlî, giḇlîm*]; AV also "stone-squarers" (1 K. 5:18 [MT 32]), GIBLITES.

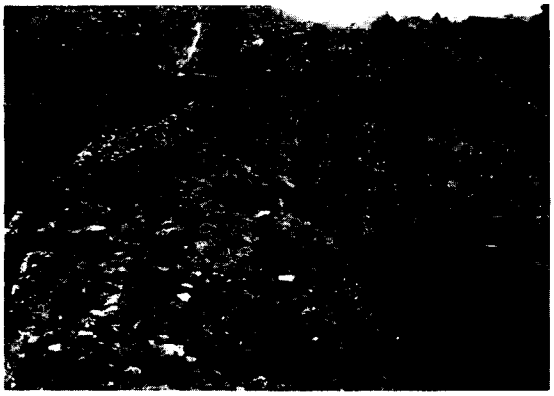
1. An ancient Phoenician city — the modern Jebeil, situated on a bluff of the foothills of Lebanon, overlooking the Mediterranean about 32 km. (20 mi.) N of Beirut — and its inhabitants. It was one of the principal seaports of Phoenicia and had a good harbor for small ships. The brisk trade between Egypt and Gebal in ancient times brought such a large volume of papyrus into the port that its Greek name "Byblos" came to be synonymous with papyrus, or book (our word "Bible" ["the book"] perpetuates the name of the ancient port). Josh. 13:5 mentions the town with its dependent territory as the land of the Gebalites; later the Gebalites aided in the construction of Solomon's temple (1 K. 5:18). The "elders" and the "wise men" of Gebal were among the workmen employed on Tyrian ships (Ezk. 27:9). "The land of the Gebalites" was given to Israel as part of its future territory (Josh. 13:5), but the Israelites never occupied it.



E. Renan conducted preliminary archeological work at Gebal in 1860. P. Montet undertook systematic excavations there from 1920 to 1924. Since then the Lebanese government has taken over the work, and put it under the leadership of M. Dunand.

Gebal was regarded as a holy city by the ancients. According to tradition the god 'El, whom the Greeks identified with Kronos, established himself there at the beginning of time and surrounded his house with a rampart. Excavations found that the earliest occupation of the site dated to *ca.* 5000 B.C. By 3000 B.C. real urbanization had occurred, and evidence of trade with Egypt, Mesopotamia, Sudan, Cyprus, and the Caucasus region multiplied. Trade relations with Egypt were especially extensive during the Egyptian Old Kingdom (*ca.* 2700-2200 B.C.). A famous temple dedicated to the goddess Baalat was built near the end of the 4th millennium; Egyptian pharaohs sent gifts there during the entire Old Kingdom period.

Five hundred years of peace terminated sometime before 2100 B.C. when the end of the Egyptian Old Kingdom coincided with Amorite conquest. The Amorites brought a new era to Mesopotamia (where they put an end to Sumerian power), Syria, Phoenicia, and Canaan, and even threatened Egypt. After a semblance of peace settled over the land again, Gebal enjoyed a new era of prosperity. Culturally it gave evidence of closer ties with Western Asia; economically and politically it fell under the dominance of the Egyptian Middle Kingdom. The temple of Resheph, god of destruction (*ca.* 2000 B.C.), contained about twenty stone pillars cut in the general form of obe-



Walls from seven civilizations at Gebal (A. C. Myers)

Stele of Yehawmilk king of Gebal (5th-4th cents. B.C.) describing his offerings to his goddess, the Lady of Gebal, who is seated and holds a scepter. The double-horned crown is the symbol of Hathor, the Egyptian goddess of the sky and love, whom the Egyptians had identified with the Lady of Gebal since the 15th cent. B.C. (Louvre)

lisks, the famous *maṣṣēḇôṯ*, perhaps representing the god (later an abomination in the OT).

As the Egyptian Middle Kingdom declined *ca.* 1800 B.C., Egypt lost its grip on outposts in Phoenicia and Syria. The Hyksos moved in to control not only the whole region of Syria and Palestine but even the delta of Egypt. Gebal at this time enjoyed great population density, and armaments excavated demonstrate the military capabilities of the Hyksos. The Egyptians chased out their conquerors after 1600 and moved rapidly northward to establish military control over Phoenicia (perhaps their earlier control had been only economic and cultural). During the Amarna age (*ca.* 1400 B.C.) Egyptian power again waned. Pressure of the Hittites and local rulers built up against all Egyptian strongholds in Phoenicia. Rib-Addi of Gebal sent some fifty fruitless appeals to Amenhotep IV of Egypt for help (e.g., Am.Tab. 137; cf. *ANET,* pp. 483f.), but soon Egyptian power crumbled all along the coast. Restoration of Egyptian control under Ramses II (after 1300) did not last long and Phoenicia entered her period of independence by 1200. Thus *ca.* 1100 Wen-Amon, an Egyptian official sent to Gebal to buy lumber, received abrupt and cavalier treatment there (*ANET,* pp. 25-29). By that time the Arameans had occupied Syria, the Hebrews the highlands of Palestine, and the Philistines the southwest coast of Palestine.

One of the most interesting finds unearthed at Gebal is the tenth-century sarcophagus of King Ahiram. This sarcophagus bears an alphabetic inscription that includes a typical curse for disturbing a sarcophagus and is of special interest as one of the oldest Canaanite inscriptions (cf. *ANET,* p. 661; *ANEP,* nos. 456-59 and notes p. 302).

Gebal lapsed into eclipse under the rising sun of Tyre. Gebal could still assemble a considerable force to contribute to the coalition that met the Assyrian invasion of Syria in 853, but Tyre was destined to dominate the area for several centuries. During the Persian, Hellenistic, Roman, and Byzantine periods Gebal remained quite prosperous, but archeologists found no remains at the site after the Moslem conquest in 636.

2. A district SE of the Dead Sea, referred to in Ps. 83:7 (MT 8) in connection with Moab, Ammon, Amalek, and others, as making a covenant together against Israel. E. Robinson (*Biblical Researches,* II [1856], 154) found the name Jebal still applied to this region, and Josephus (*Ant.* ii.1.2 [6]) spoke of a Gobolitis as forming part of Idumea. H. F. VOS

GEBER gē'ber [Heb. *geḇer*–'strongman'].

1. The last named individual in the list of Solomon's commissariat officers (1 K. 4:19). His district was E of the Jordan, in Gilead.

2. (1 K. 4:13, AV). *See* BEN-GEBER.

GEBIM gē'bim [Heb. *gēḇîm*–'trenches']. A city N of Jerusalem whose inhabitants fled at the approach of the Assyrian invaders (Isa. 10:31). Its place in the order of names, after Anathoth and before Nob, seems to point to some position not far from Jerusalem, though its precise location is unknown.

GECKO. *See* LIZARD.

GEDALIAH ged-a-lī'ə [*gᵉḏalyâ, gᵉḏalyāhû*–'Yahweh is great'].

1. Son of Ahikam (the friend and protector of Jeremiah) and grandson of Shaphan (the scribe during the reign of Josiah) (2 K. 25:22-25; Jer. 39:14; 40:5-16; 41:1-18).

After destroying Jerusalem and sending many captive Jews to Babylon (586 B.C.), Nebuchadrezzar appointed Gedaliah governor over the poor Jews who had been left in the land to be vinedressers and plowmen (2 K. 25:12, 22). To his charge were committed also some royal princesses (Jer. 43:6) and courtiers (41:16) who had been allowed to remain as unlikely to cause any trouble. Gedaliah fixed his residence at Mizpah, about 11 km. (7 mi.) NW of Jerusalem. Here he was joined by Jeremiah (40:6).

The Jewish soldiers who had escaped capture, having heard that the Chaldeans had departed and that Gedaliah, one of their own nation, had been appointed governor in Judah, came with Ishmael, Johanan, and other officers to Gedaliah at Mizpah (2 K. 25:23f.; Jer. 40:7-10). The governor assured them that they need not fear vengeance from their conquerors, and under oath promised them protection and security, if they would remain and cultivate the land and become peaceful subjects of the king of Babylon. This assurance led to a general gathering around Gedaliah of refugees from all the neighboring countries (Jer. 40:11f.). For two months (some think longer) Gedaliah's beneficent and wise rule did much to consolidate affairs in Judah and to inspire the feeble remnant of the Jews with heart and hope.

But evil forces were at work against him. Baalis king of Ammon was determined to take his life (Jer. 40:13-16). The peaceful and popular rule that was being established by the good governor stood in the way of any plan of conquest Baalis entertained. Baalis found a ready instrument for his murderous design in Ishmael who, as one of royal birth and among the chief officers of the king (41:1), was doubtless jealous of the man who had been chosen governor in preference to himself. Gedaliah was informed by Johanan and the other captains of the plot to assassinate him, and Johanan at a private interview expressed to him a strong desire to go himself and slay Ishmael secretly, declaring that the safety of the Jews depended upon the life of the governor. But Gedaliah refused to allow Johanan to anticipate his enemy, believing, in the generosity of his heart, that Ishmael was not capable of such an act of treachery. He soon found, however, that his confidence had been sadly misplaced. Ishmael, with ten of his companions, came on a visit to him to Mizpah, and after they had been hospitably entertained they fell upon their good host and murdered him, along with all the Jewish and the Chaldean soldiers he had with him for order and protection (2 K. 25:25; Jer. 41:1-3). They then cast the bodies of their victims into the cistern that Asa had made (v. 9). Ishmael was pursued and overtaken by Johanan, but he succeeded in escaping to the Ammonites (vv. 11-15). Then Johanan and the other captains, afraid lest the Chaldeans should avenge upon them the murder of the governor (vv. 16-18), and against the earnest entreaties of Jeremiah (ch. 42), fled to Egypt, taking the prophet and the Jewish remnant with them (43:5-7). In memory of the date of Gedaliah's assassination the Jews kept a fast (which is still retained in the Jewish calendar) on the third day of the seventh month, Tishri (Zec. 7:5; 8:19).

The narratives reveal Gedaliah in a very attractive light, as one who possessed the confidence both of his own people and their conquerors; a man of rare wisdom and tact, and of upright, transparent character, whose kindly nature and generous disposition would not allow him to think evil of a brother; a man altogether worthy of the esteem in which he was held by succeeding generations of Jews.

2. [*g*^{e}*ḏalyāhû*]. Son of Jeduthun, and instrumental leader of the second of the twenty-four choirs in the Levitical orchestra (1 Ch. 25:3, 9).

3. [Gk. Apoc. *Ōkidēlos*]; AV OCIDELUS; NEB OKIDELUS. A priest who had married a foreign woman (Ezr. 10:18; 1 Esd. 9:22).

4. [*g*^{e}*ḏalyāhû*]. Son of Pashhur (who beat Jeremiah and put him in the stocks, Jer. 20:1-6) and one of the chiefs of Jerusalem who, with the sanction of the King Zedekiah, took Jeremiah and let him down with cords into a cistern where he sank in the mud (38:1, 4-6).

5. Grandfather of Zephaniah the prophet and grandson of a Hezekiah, probably the king (Zeph. 1:1).

J. CRICHTON

GEDDER ged'ər (1 Esd. 5:30, AV, NEB). *See* GAHAR.

GEDEON ged'ē-on (He. 11:32, AV). *See* GIDEON.

GEDER gē'dər [Heb. *geḏer*] (Josh. 12:13). A royal city of the Canaanites conquered by Joshua. It may be the BETH-GADER in 1 Ch. 2:51 and the birthplace of Baal-hanan, the custodian of David's orchards in the Shephelah (1 Ch. 27:28). Its location is unidentified, but it is listed together with the cities of the Shephelah and upper Negeb taken by Joshua (Josh. 12:11-14).

GEDERAH gə-dir'ə [Heb. *g*^{e}*ḏērâ*–'enclosure']; AV also "hedges" (1 Ch. 4:23); **GEDERATHITE** gə-dir'ə-thīt [Heb. *g*^{e}*ḏērāṯî*] (1 Ch. 12:4, AV); RSV, NEB, "of Gederah." A town of the Shephelah in the allotment to Judah (Josh. 15:36). Certain of the posterity of Judah are listed as dwelling in a town by this name and in the neighboring Netaim (1 Ch. 4:23). This town is probably to be identified with Gedera, about 19 km. (12 mi.) SW of Lod. "Gederathite," applied to Jozabad (1 Ch. 12:4), means an inhabitant of Gederah.

GEDERITE gē'dər-īt [Heb. *g*^{e}*ḏērî*]. An inhabitant of GEDER. Baal-hanan, the custodian of David's orchards in the Shephelah, was a Gederite (1 Ch. 27:28).

GEDEROTH gə-dir'oth [Heb. *g*^{e}*ḏērôṯ*]. A town in the Shephelah of Judah (Josh. 15:41). It is mentioned along with Beth-shemesh, Aijalon, and Soco, as taken by the Philistines during the reign of Ahaz (2 Ch. 28:18). It has been identified with modern Qaṭrā, a site about 18 km. (11 mi.) SW of Lod on the Ramle-Al Mughar road.

GEDEROTHAIM ged-ə-rō-thī'əm [Heb. *g*^{e}*ḏērōṯayim*–'enclosures' or 'sheepfolds'] (Josh. 15:36); NEB "namely both parts of Gederah." This term stands fifteenth in a list that professes to give the names of only fourteen cities in the Judean Shephelah. Many modern scholars suggest that it be read "and her sheepfolds" instead of "and Gederothaim"; this would agree with the LXX, which reads "and its cattle shelters." Thus rendered the term is a further description of the previously mentioned GEDERAH, and the number of places are reduced to fourteen as the text states.

J. F. PREWITT

GEDOR gē'dôr [Heb. *g*^{e}*ḏôr*–perhaps 'wall' or 'pock-marked'].

1. A personal or family name of Judah (1 Ch. 4:4 [but see 3 below]) and Benjamin (8:31; 9:37).

2. A town in the hill country of Judah, named with Halhul and Beth-zur (Josh. 15:58), possibly Khirbet Jedûr about 12 km. (7.5 mi.) N of Hebron. If 1 Ch. 4:4 refers to the same town, Penuel, who is called the "father" of Gedor, may be its founder.

3. A Calebite town in Judah mentioned with Soco and Zanoah (1 Ch. 4:18) and founded by Jered; site uncertain but possibly S of Hebron. Some would equate this with **1.**

4. In 1 Ch. 4:39f. the pasture lands of Simeon extend

to the east side of the valley of Gedor. Here the LXX reads "Gerar" (Tell Abū Hureirah) and is probably correct.

5. Joelah and Zebadiah, two of David's followers, came from this place in Benjamin (1 Ch. 12:7). The site is uncertain but possibly Khirbet el-Gudeirah, 10 km. (6 mi.) W of Gibeon (cf. 1 Ch. 9:35; cf. also *GP*, p. 330).

Bibliography.–Y. Aharoni, *IEJ*, 6 (1956), 26-32; J. E. Pritchard, *BA*, 23 (1960), 25. D. J. WIEAND

GE-HARASHIM gə-har'ə-shim [Heb. *gê' ḥ^{a}rāšîm*–'valley of craftsmen' (1 Ch. 4:14); AV "valley of Charashim." Cf. Neh. 11:35, where it is rendered "valley of craftsmen" and placed in the vicinity of Lod and Ono, which would be in the southern part of the Plain of Sharon. Joab of the tribe of Judah was the founder of this community of craftsmen (1 Ch. 4:14). Following the return from Babylon it was resettled by Benjaminites.

GEHAZI gə-hā'zī [Heb. *gêḥ^{a}zî*–'valley of vision']. The confidential servant of Elisha. Various words are used to denote his relation to his master. He is generally called Elisha's "boy" (Heb. *na'ar*), servant, or personal attendant; he calls himself (2 K. 5:25) his master's servant or slave (Heb. *'eḇeḏ*); and if the reference is to him in 4:43 (cf. RV mg.), he receives the designation "minister" (Heb. *m^{e}šārēṯ*), or chief servant of Elisha. He is mentioned by name in three narratives: 2 K. 4, 5, and 8.

He is introduced in the story of the wealthy Shunammite who provided in her house special accommodation for Elisha (2 K. 4:8-37). Having failed to determine what she might desire as repayment for her kindness, Elisha asked Gehazi what should be done for her. Gehazi had the insight to recognize her great wish and told Elisha of her secret desire for a son. Elisha promised that this wish would be granted. Later when the child died, in her grief she clutched at the prophet's feet, and Gehazi thrust her away, probably in a desire to protect his master but nevertheless exhibiting a lack of the finer feelings so apparent in Elisha. Gehazi was directed to hasten to Shunem and lay the prophet's staff on the child. In this narrative he appears in general as a willing, efficient, and practical man.

In the incident connected with the healing of Naaman (2 K. 5:20-27) the moral character of Gehazi is revealed in its sordid covetousness. Elisha's integrity in refusing the gifts of Naaman sharply contrasts with the baseness of Gehazi's action. To him, Elisha's refusal of the Syrian's wealth was incomprehensible. The careless repetition of Elisha's oath, the glibness with which he lied to Naaman, and the coolness with which he subsequently appeared before Elisha indicate that such actions were characteristic of him. His deception of Naaman was in itself worthy of punishment, but his guilt was magnified because his actions gave the Syrians occasion to impugn Yahweh's servant and thus Yahweh Himself. Although the story told by Gehazi about the fictitious guests who had come unexpectedly to Elisha was credible, the Syrians would undoubtedly have interpreted the request as a measure of covetousness on the part of Elisha. Gehazi's punishment was immediate and permanent leprosy, extending even to his descendants.

Gehazi is mentioned only once more by name, in 2 K. 8:1-6, where he appears in a more favorable light. King Jehoram summoned him into his presence to recount the wonderful deeds of Elisha. The truthfulness with which he told about his master's deeds, along with the retention of his title "the servant of the man of God," would seem to indicate a lack of vindictiveness for his severe sentence and a probable penitence. When the Shunammite entered the presence of the king during Gehazi's recital, he identified her as the woman whose son Elisha had restored, and the king secured her inheritance for her. Although no positive word is given concerning Gehazi it would appear that his chastening, though for the moment grievous, yielded the peaceable fruit of righteousness (cf. He. 12:1-11).

Although the conversation between Jehoram and Gehazi has raised some questions, conversation between lepers and others was not forbidden. The leprosy (Heb. *ṣāra'aṯ*) of Gehazi was not necessarily the disease now known as leprosy (*see* DISEASE III.I). It is also possible that the sentence of perpetual leprosy was not carried out if Gehazi was indeed penitent, for the judgments of God, though apparently unconditional, are often withdrawn when the judged person repents (cf. 2 K. 20:1-11).

M. A. MACLEOD

GEHENNA gə-hen'nə [Gk. *géenna* < Aram. *gêhinnām* < Heb. *gê-hinnōm*–'valley of Hinnom' (Josh. 15:8) < *gê ben-hinnōm*–'valley of the son of Hinnom' (Josh. 15:8; 18:16; 2 Ch. 28:3; etc.) or *gê b^{e}nê hinnōm*–'valley of the sons of Hinnom' (2 K. 23:10)]. The English transliteration of the Gk. *géenna*, which the RSV, AV, and NEB translate as "hell" (RSV mg. "Gehenna"; in Mk. 9:47 the AV has "hell fire," apparently on the basis of some MSS that add *toú pyrós*, "of fire," which occurs with *géenna* in Mt. 5:22; 18:9).

The idea of Gehenna originated in the OT. The Valley of Hinnom (Wâdī er-Rabâbeh, S of Jerusalem) was infamous for the pagan rites, especially child sacrifice, that were offered there (2 K. 16:3; 23:10), and Jeremiah prophesied that God's judgment would fall there (e.g., Jer. 19:6f.; *see* HINNOM, VALLEY OF). As the concept of the afterlife developed in the intertestamental period, the Valley of Hinnom came to represent the eschatological place of judgment (1 En. 27:1f.; 54:1-6; 90:25-27; etc.) or hell itself (2 Esd. 7:36; 2 Bar. 85:13). It is not necessary to see Iranian influence in this development, since the purpose of the Zoroastrian molten fire was purgatorial rather than penal (*Yasna* 51:9; but cf. one early rabbinic tradition that Gehenna was a purgatory for those whose merits and sins balanced each other [Tosefta *Sanhedrin* xiii.3]).

The NT seems to distinguish Gehenna from Hades: Gehenna is the place of final judgment, and Hades is the intermediate place where the ungodly await their final judgment (cf. Rev. 20:14, where Death and Hades are cast into the lake of fire at the last judgment). As the place of final punishment, Gehenna receives both body and soul (Mt. 10:28 par. Lk. 12:5), whereas Hades receives only the soul (Acts 2:27, 31; but *see* HADES). Thus Jesus urged His listeners to avoid Gehenna at all costs (Mt. 5:29f.; 18:9; Mk. 9:43, 45, 47), for it is the place where "the fire is not quenched" (Mk. 9:48). Those who call their brothers "fools" (Mt. 5:22) and the "scribes and Pharisees, hypocrites" (Mt. 23:29, 33) are liable to Gehenna (the rabbis similarly consigned various groups to Gehenna, e.g., physicians [Mish. *Kiddushin* iv.14], those who talk much with women [Mish. *Aboth* i.5], disciples of Balaam [*Aboth* v.19], the shameless [*Aboth* v.20]). Like the rabbis, Jesus used the term "child of hell" (Gk. *huiós géennēs*, Mt. 23:15) as an epithet for the ungodly (cf. *b^{e}nê gêhinnām*, T.B. *Rosh ha-Shanah* 17b).

The only other NT reference to Gehenna is in Jas. 3:6. Here James warns his readers about the dangers of the tongue, which can cause great destruction if one allows it to be "set on fire by Gehenna," i.e., motivated by the evil powers that are consigned to Gehenna.

GELASIAN DECREE. *See* APOCRYPHA II.E.

GELILOTH gē-lī'loth [Heb. *gᵉlîlôṯ*]. This term is used only in Josh. 18:17 as a place name. Geliloth lay on the boundary between Judah and Benjamin which passed Enshemesh (probably 'Ain el-Hôd, about 3 km. [2 mi.] E of Jerusalem), "thence goes to Geliloth, which is opposite the ascent of Adummim." From this point it "goes down" toward the plain. The place cannot therefore be identified with Gilgal in the Jordan Valley. Some point on the road leading from Jericho to Tal'at ed-Damm, about 10 km. (6 mi.) from Jerusalem, was probably intended, but no identification is possible. W. EWING

GEMALLI gə-mal'ī [Heb. *gᵉmallî*–'camel owner'(?)]. Father of the spy Ammiel from the tribe of Dan (Nu. 13:12), who was one of those sent by Moses to spy out the land of Canaan.

GEMARA gə-mä'rə. *See* TALMUD I.

GEMARIAH gem'ə-rī'ə [Heb. *gᵉmaryāhû, gᵉmaryâ*–'Yahweh has accomplished']. The name occurs in Lachish Ostracon I (*ca.* 590 B.C.; cf. *DOTT,* p. 213), and is perhaps the same as "Gemariah" in one of the Elephantine Aramaic papyri (cf. *ANET,* p. 491).

1. A son of Shaphan the scribe, one of the princes, from whose chamber Baruch read Jeremiah's prophecies to the people. He, with others, sought to dissuade Jehoiakim from burning the roll (Jer. 36:10-12, 25).

2. A son of Hilkiah, one of Zedekiah's ambassadors to Babylon, by whom Jeremiah sent his letter to the captives (Jer. 29:3).

GENDER. Used by the AV as a verb in the obsolete sense of "engender" (Lev. 19:19; Job 21:10; 38:29; Gal. 4:24; 2 Tim. 2:23).

GENEALOGY jē-nē-äl'ə-jē [Heb. *yaḥaś*; *tôlēḏôṯ*; Gk. *genealogía*]. A record or catalog of an individual's descent from ancestors according to generations. Whereas in modern genealogical records the lines of descent are traced generation by generation, in the ancient Near East it was not uncommon for individuals to be omitted from such records for a variety of reasons. OT genealogies traced inheritance lines both forward (cf. Ruth 4:18-22) and backward (cf. Ezr. 7:1-5) for a nation, tribe, family, or individual. Such records were compiled to authenticate hereditary succession and inheritance rights, biological descent, and geographical or ethnological relationships. Because of the patriarchal nature of Semitic society, lineage was normally traced through the males of a family, but females were mentioned occasionally too, particularly where property inheritance was involved (cf. Nu. 26:33; 27:1-11).

I. Terminology
II. In the Ancient Near East
III. Purpose and Use
IV. Problems

I. Terminology.–Hebrew *yaḥaś* may originally have signified "people" in a general sense, without any attempt to do more than suggest some ethnic or social group. Because of the strong sense of family and tribal kinship among the ancient Semitic peoples, the term ultimately came to be used in a more specific sense involving legitimate descent. By the postexilic period it had acquired the technical meaning of a genealogical register (Ezr. 8:1; 1 Ch. 4:33; etc.), or the process by which one's line of descent was recognized officially (Ezr. 2:62; Neh. 7:5; etc.).

Whereas *yaḥaś* was used technically at a comparatively late period in Israelite life, the term *tôlᵉḏôṯ* appeared in the earliest historical records. The word is commonly translated "generations," and only once in the RSV as "genealogies" (Gen. 10:32). It also means "succession," "narrative," and "family history," and in the first thirty-seven chapters of Genesis it occurs in a particular formula translated in the AV and RV by "these are the generations of," which the RSV uses along with "descendants." The NEB renders *tôlᵉḏôṯ* by "story" or "record." This expression occurs at the end of eleven sections of narrative material, some of which include genealogies while others do not (Gen. 2:4; 5:1; 6:9a; 10:1; 11:10a, 27a; 25:12, 19a; 36:1, 9; 37:2). As such it serves to mark the ending of a specific section of the text in a manner comparable to the colophon of Mesopotamian tablets. If the formula in which *tôlᵉḏôṯ* occurs is taken in this way rather than being regarded as a heading for subsequent material, it will be seen to refer specifically to whatever precedes it. Since persons are usually named in connection with the word *tôlᵉḏôṯ*, the narratives may well have been written or commissioned by the individual mentioned, and at the very least were undoubtedly the personal property of that man and his family. Where these narratives contain actual genealogies, it would appear that attempts were being made to trace the lines of descent of historical families or peoples. When the eleven sections of narrative are assembled in general chronological order, they furnish a connected history of life from the time of its origin to the period of Joseph, with special reference to the line of descent through Noah and the patriarchs. While other peoples are mentioned, such notices are incidental to the purpose of indicating precisely how the twelve tribes later came into existence. Within such a context it is thus proper to take the word *tôlᵉḏôṯ* as a description of a form of historiography that was comparable to the rather terse historiographical compositions of ancient Mesopotamia. (*See also* GENESIS II.D.1-2.)

In the NT the word *genealogía* occurs in 1 Tim. 1:4 and Tit. 3:9 in connection with the formulation or discussion of pedigrees, while the cognate verb is found only once to describe Melchizedek king of Salem as a person without recorded ancestry (He. 7:6).

II. In the Ancient Near East.–In the 3rd millennium B.C. the Sumerians compiled records dealing with the dynastic descent or succession to office of the early rulers of Mesopotamia. One such early list cataloged eight kings whose reigns were centered in five different Sumerian cities for a total of 241,000 years. Another Sumerian king list was found by Woolley at Tell el-Ubaid, and was dated *ca.* 2700 B.C. This tablet listed the four kings who together made up the First Dynasty of Ur, and who reigned for a total of 177 years. This particular record also gave evidence of a tendency that was to become more prominent in subsequent periods, namely, that of occasionally omitting names from lists of successors or descendants. It showed that Mes-Anne-pada had founded the First Dynasty, but equally significantly that his son and successor, A-Anne-pada, had apparently been dropped from the list. His regnal years, however, had evidently been added to those of his father, making a total of 80 years, as compared with 36 years for Meskiag-Nanna, 25 for Elulu, and 36 for Balulu. Why the name of A-Anne-pada had been omitted is impossible to say, since it was included with that of his father in a foundation deposit of contemporary date at Tell el-Ubaid. In later Hittite and Israelite genealogies names were omitted perhaps because the person was considered unimportant or regarded as an individual from whom a claim of descent might not have been an honor.

The list of early kings recovered from Ebla (Tell Mardikh) has proved to be an important record of succession

in Syria when the Sumerians still dominated Mesopotamia. Beginning with Gumalum, who may have ruled *ca.* 2400 B.C., it preserved the list (though it may have gaps) of Eblaic kings to the time of Dubuhu-Ada, who was a contemporary of Naram-Sin of Akkad (*ca.* 2250 B.C.).

The early Mesopotamians also began the tradition of using the terms "son" or "daughter" to mean simply "descendant," without specifying a particular interval in the descent. As far as ancient royalty was concerned, the interest was mainly in the succession itself rather than in the actual lineal relationship of individuals. Thus the Egyptian Pharaoh Tarhaqa (OT Tirhakah) (*ca.* 685 B.C.) could speak quite correctly of his ancestor Sesostris III, who lived *ca.* 1850 B.C., as his "father." From Kassite times in Babylonia the terms "son" and "daughter" were also used to indicate a grandson or a granddaughter. Family trees written on the backs of cuneiform tablets dealing with personal or business matters have been recovered from NUZI, and if the sections of Genesis that form criticism can isolate on the basis of the incidence of *tôl*^{e}*dôt* were in fact ancient historiographical material, then the genealogical passages that they contain could also have been written on the backs of tablets dealing with narrative or other types of material and incorporated into the text when the ancient sources were edited to form, with the Joseph narratives, the extant book of Genesis.

While ancient scribes made official genealogical tables, and individuals preserved their own family pedigrees (at least in part) down to Roman times, nothing quite like the biblical genealogies of Genesis and 1 Ch. 1–9 has been found elsewhere in antiquity. While it was by no means impossible for detailed records to have been kept by other nations, none is extant. The Hebrew practice of collecting and preserving complicated genealogical records was taken up once more with the extension of Islam, and has remained a permanent feature of that tradition. A number of Western scholars have reported an intense interest in genealogies among Arab peoples, especially tribal nomads, and have listened with some surprise as individuals have spent an hour reciting from memory the names of ancestors who went back several centuries. Some contemporary Jews are also able to trace their ancestry back to very early times, even to such a remote person historically as Aaron, though in the writer's experience written rather than oral material was always used for the exercise.

III. Purpose and Use.–Records of descent were an extremely important part of Hebrew tradition from the very beginning, and no fewer than three of the earliest were concerned with the posterity of Adam (Gen. 4:1f., 17-22, 25f.; 5:1-32). If the Genesis sources were originally in tablet form as suggested above, these genealogies are among the most primitive of their kind. For the Hebrews, such catalogs of descent served various purposes, the first of which (Gen. 4:1f., 17-22) indicated that considerations of biological succession by generations was but one function of such records. Although the line of Cain was traced for seven generations, an equally important emphasis in this chapter was placed upon recording new cultural or technological events. Thus, the occupations of Cain (agriculturalist and city builder), Abel (shepherd), and Jabal (cattleman) represented the agrarian aspect of early Mesopotamian life, which was enriched almost contemporaneously by such developments as music (Jubal) and metallurgy (Tubal-cain).

The second genealogy (Gen. 4:25f.), dealing with the offspring of Seth, has more in common with a pedigree, but also serves the purpose of contrasting the fidelity to God of Seth's offspring with the behavior of Cain's apostate descendants. The third of these early sources (Gen. 5:10-32; cf. 1 Ch. 1:1-4) traced the posterity of Adam through Seth down to Noah and his sons and stopped at a point just before the Flood. The background of this material is obviously Mesopotamian in character, and if the sources were transmitted originally on tablets the lists would have been inscribed most probably in an ancient form of Mesopotamian script on the reverse side of one or more of the tablets.

At the beginning of the patriarchal period when God promised a specific amount of territory to Abraham and his descendants, the importance of maintaining personal genealogies became more obvious. When the Israelite tribes came into existence after Jacob, the recording of family and community relationships assumed a new importance in the light of the necessity for establishing and maintaining the allotment of the land by tribal divisions. Once sedentary occupation of Palestine had taken place under Joshua and the land had been apportioned to the various tribes, the genealogical records were adduced as evidence of a legitimate title or claim to the property of one's ancestors.

Genealogies also served a fundamentally important purpose when the hereditary Aaronic priesthood was established. Pentateuchal tradition uniformly regarded the priesthood as restricted to the tribe of Levi and the house of Aaron in particular, and one had to meet these conditions to be eligible for the priestly service of the sanctuary in the tabernacle and the later temples. To be able to trace one's descent from Aaron was therefore mandatory for the Levitical priests, and in the time of Josephus every priest was expected to be able to prove such a descent.

Genealogical records were used, furthermore, to establish and maintain the right of royal succession in the southern kingdom. Here descent from the house of David was the important consideration, and when the prophets began to teach that the Messiah would emerge from that stock (cf. Isa. 11:1-5), such genealogies immediately became far more significant than before. As a result, it is hardly surprising that in the NT great care was taken to establish Jesus' lineal descent from David.

Membership of families and tribes was emphasized during the period of the wilderness wanderings, when the very position that was occupied in the camp and on the march was determined on that basis (Nu. 2:2, 17; 10:1-28). During that time the military organization of the Israelites was also governed by genealogy (Nu. 1:2-4), and this included the priests and Levites (Nu. 3:11-39). Taxes and offerings (Nu. 7:11-89) for the support of the sanctuary (Nu. 3:40-51) were also based on such records. Where communities were organized in terms of a general tribal structure, the genealogy of an individual served the purpose of identifying him and locating him within the community.

The great stress laid upon the need for the congregation of Israel to be pure (cf. Dt. 7:1-4; 23:1-8) naturally tended to enhance the keeping of records in order to prevent the possible intrusion of foreign, and therefore pagan, elements into Israel. This issue became one of great concern in the postexilic period, when many foreign wives managed to find their way into the families of the nation (Neh. 13:23). For Ezra, the presence of such foreign elements was incompatible with the theocratic ideal, and with Nehemiah he insisted upon separating all foreign women from the mainstream of Jewish life (Ezr. 2:59-63; 10:9-44; Neh. 13:23-28). Written evidence of purity of descent became a requisite for admission to the priesthood, and those who could not document their claims by reference to genealogical records were excluded from

priestly functions because they were deemed ceremonially unclean (Neh. 7:61-64). With the incursion of subversive Greek cultural elements into traditional Jewish faith during the Hellenistic period, the compiling of genealogies became a matter of great concern for the orthodox Jews. The covenant nation, whether in the preexilic or postexilic period, was always conscious that the blessings of God were transmitted from one member of a family to his progeny (Gen. 48:15f.). Obversely, in defense of His own rights, God could visit the iniquity of the fathers upon the children up to the third or fourth generation of those who rejected His sovereignty (Ex. 20:5).

IV. Problems.–OT genealogies clearly served a variety of interests, with some early lists being as much ethnic or geographic in character as personal. With Wellhausen, many literary-critical scholars came to think of the lists in terms of groups rather than as pedigrees of individuals. Thus for them the marriages that were mentioned represented the union of groups rather than persons, the names being regarded as eponymous in character. This view encounters difficulties in that it fails to define the nature of a "group," or to distinguish between such a "group" and a "family" as one unit of a clan or tribe. As a result, this view is in danger of assuming that far more "groups" than families or clans existed.

That the OT pedigrees describe individuals rather than "groups" (except where "groups" resulting from an eponymous ancestor are mentioned) seems borne out by the evidence of Mesopotamian and Eblaic king lists, where there is no question that the names mentioned are those of individuals. Perhaps the most difficult problem that literary-critical adherents have yet to resolve is the determination of the stage at which "group" genealogies began to assume an individual character. Some scholars who support the literary-critical position have adopted the view that the genealogies from the Middle Bronze Age onward deal specifically with persons, a contention that receives ample support from the family trees inscribed on tablets recovered from Nuzi.

The interval of time covered by a GENERATION is a different problem. In Semitic usage "generation" generally designated the period between a person's birth and that of his first son (cf. KoB). In a corporate sense it also designated the people who were living during that interval (cf. Ps. 24:6; 78:8; etc.). The average length of a generation has been assumed to be forty years (cf. Ps. 95:10), based on the life span of those who died in the wilderness (Dt. 2:14). Here, however, the reference seems to be to persons who were already young adults, making for an average life span of some sixty years. It is probably more correct to assume that the interval between a man's birth and that of his firstborn would be closer to thirty years or less. Though persons such as David (1 K. 2:11) and Solomon (1 K. 11:42) were credited with forty-year reigns, it is important to note that the Hebrew text does not equate this period with a generation. This term is used on one occasion only for a thirty-eight-year interval (Dt. 2:14).

The principal OT genealogical records are as follows:

(1) The line from Cain through seven generations (Gen. 4:17-22).

(2) The descendants of Seth (Gen. 4:25f; 5:6f.), of unspecified number.

(3) The line from Adam to Noah (Gen. 5:1-32), comprising ten names in all. There is some variation among the MT, LXX, and Samaritan Pentateuch regarding the life span of certain individuals. Thus according to the MT and the LXX, Methuselah lived 969 years, but 720 years according to the Samaritan Pentateuch. According to the MT, Lamech lived 777 years, but the LXX has 753 years, and the Samaritan Pentateuch 635 years. These divergent figures may be based on ancient manuscript traditions other than those of the MT, and should not necessarily be understood to have resulted from errors in copying. The ten names in this list have been seen as reminiscent of an ancient Sumerian king list which named ten "great men" who ruled in antediluvian times.

(4) Noah's descendants (Gen. 10; cf. 1 Ch. 1:1-23). This is the so-called Table of Nations. The names seem to have been originally those of individuals that were applied subsequently to their descendants or to the territory in which they lived. Attempts to identify the various peoples have not met with complete success, but allowances must be made for changes in the significance of names due to conquest, migration, and other movements of peoples. If at least some of these names bore different meanings at different times, then they could describe linguistic, social, and geographical entities without particular consistency and still be correct for given periods of time or special circumstances (*see* TABLE OF NATIONS).

(5) The line from Shem to Abraham (Gen. 11:10-26; cf. 1 Ch. 1:24-27), comprising ten names. Again there are divergences between the MT, LXX, and the Samaritan Pentateuch, where in most instances the MT and the Samaritan Pentateuch agree against the LXX. Thus the LXX assigned Terah 145 years of life, whereas the MT and the Samaritan Pentateuch credited him with 205 years (Gen. 11:32).

(6) Lot's descendants (Gen. 19:37f.).

(7) Descendants of Nahor (Gen. 22:20-24).

(8) Abraham's offspring by Keturah (Gen. 25:1-4; cf. 1 Ch. 1:32f.), who became the ancestors of various north Arabian tribes.

(9) Ishmael's descendants (Gen. 25:12-18; cf. 1 Ch. 1:29-31).

(10) Offspring of Jacob (Gen. 46:8-27) by Leah (8-15), Zilpah (16-18), Rachel (19-22), and Bilhah (23-25).

(11) Reuben's genealogy (Gen. 46:9; Ex. 6:14; Nu. 26:5-11; cf. 1 Ch. 5:1-10).

(12) Simeon's descendants (Gen. 46:10; Ex. 6:15; Nu. 26:12-14; cf. 1 Ch. 4:24-43).

(13) Levi's offspring (Gen. 46:11; Ex. 6:16-25; cf. 1 Ch. 6:1-53 [MT 5:27–6:38]). This was the line from which the priests descended. Aaron's ancestry is condensed in Ex. 6:16-20, and all subsequent high priests claimed him as their ancestor.

(14) Judah's lineage (Gen. 46:12; Nu. 26:19-22; cf. 1 Ch. 2:3f.; 9:4), from which David and the preexilic kings of Judah from Solomon to Josiah descended (1 Ch. 3:10-15).

(15) Issachar's descent (Gen. 46:13; Nu. 26:23-25; cf. 1 Ch. 7:1-5).

(16) Zebulun's descent (Gen. 46:14; Nu. 26:26f.).

(17) Gad's offspring (Gen. 46:16; Nu. 26:15-18; cf. 1 Ch. 5:11-17).

(18) Asher's descendants (Gen. 46:17; Nu. 26:44-47; cf. 1 Ch. 7:30-40).

(19) Joseph's descent (Gen. 46:20; Nu. 26:28-37; cf. 1 Ch. 7:14-27). Joseph's two sons, Ephraim and Manasseh, were sometimes known as the "tribe of Joseph," the "house of Joseph," or the "sons of Joseph," and were adopted by Jacob as his own sons (i.e., descendants) in Gen. 48:5, 16.

(20) Benjamin's descent (Gen. 46:21; Nu. 26:38-41; cf. 1 Ch. 7:6-12; 8:1-40; 9:7, 35-44).

(21) Dan's descent (Gen. 46:23; Nu. 26:42f.).

(22) Naphtali's offspring (Gen. 46:24; Nu. 26:48-50; cf. 1 Ch. 7:13).

(23) A comprehensive genealogy of persons from Adam to Saul (1 Ch. 1–9), the most lengthy of its kind in the

Bible; it stresses the importance of purity of descent in the postexilic times.

The above records were supplemented by a number of registers of individuals, families, or periods as follows:

(24) Levitical registers dating from the periods of David (1 Ch. 15:5-24), Jehoshaphat (2 Ch. 17:8), Hezekiah (2 Ch. 29:12-14; 31:12-17), Josiah (2 Ch. 34:12f.; 35:8f.), Zerubbabel (Neh. 12:1-24), and Nehemiah (Neh. 10:9-13 [MT 10-14]).

(25) Registers and lists of David's soldiers (2 S. 23:8-39; 1 Ch. 11:11-47; 12:3-13, 20), tribal supervisors (1 Ch. 27:16-22), and administrative officials (1 Ch. 27:25-31).

(26) Lists of individuals and families in the postexilic community from the time of Zerubbabel (Ezr. 2:2-61; Neh. 7:7-63) and Ezra (Ezra. 8:2-14), along with the roster of those who built the wall around Jerusalem (Neh. 3), those who had married foreign women (Ezr. 10:18-43), the signatories to the covenant (Neh. 10:1-27 [MT 2-28]), and the register of persons resident in Jerusalem (Neh. 11:4-19; 1 Ch. 9:3-17).

The NT has only two genealogies of any significance. Both of these trace the descent of Jesus Christ the Messiah from the house of David, one of them (Mt. 1:1-17) beginning with Abraham, and the other (Lk. 3:23-38) tracing the pedigree back to "Adam, the son of God."

In the Western practice of drawing up family trees, great care is taken that the genealogical record is as complete as possible for each generation. This procedure contrasts notably with ancient Near Eastern custom, where it was not considered necessary for pedigrees to be complete. Variations in designation from the modern pattern were also entertained in a manner that is not always easily recognized. The term "father," e.g., could be applied to a superior who was not a relative, and this is reminiscent of the "schoolfather" (i.e., school principal) of the Sumerians. People could also be considered brothers merely by being associated with one another in a treaty (cf. Am. 1:9). The word "son" could be used almost as widely as it is in modern Western society, and the same was generally true for "mother" and "daughter" as well.

The aim of such genealogies was to establish the general line of descent from given ancestors, and this objective was in no way impaired by the omission of certain generations as long as the line was being traced properly. For purposes of ancient Near Eastern genealogies, all members of a particular line were not necessarily equal in importance, and because of that principle, as well as for other reasons, certain names and generations could be omitted from family lists without prejudice to either the intent or the accuracy of content of the genealogy. Thus the Levitical pedigree of Moses (Ex. 6:16-20) records four generations between Levi and Moses, i.e., over four hundred years (cf. Ex. 12:40). In this list Kohath appears as one of Levi's sons and the leader of a Levitical clan. Amram was descended from Kohath after an unknown interval. It seems quite clear that some generations were omitted in the compilation, if only because the Levites numbered 22,000 males alone in the days of Moses (Nu. 3:39). The purpose of establishing Moses' descent from the family of Levi was accomplished, despite what appear to be obvious omissions from the list.

In the same manner, the genealogy of Ezra (Ezr. 7:1-5) cataloged only five generations of ancestors from *ca.* 458 B.C., when Ezra came to Judea, back to the high priest Zadok (*ca.* 966 B.C.). Obviously this is a condensed record of the family line, but still it achieved its objective of demonstrating Ezra's descent from Zadokite stock, which was Ezekiel's ideal of priestly ministry for the postexilic theocracy. Mt. 1:1 is a similar, though even shorter, genealogy — just three links from Christ to Abraham were recorded. The fuller form of Christ's ancestry (Mt. 1:2-17) was still incomplete (omitting Ahaziah, Joash, Amaziah, and Jehoiakim) when compared with OT records of royal descent.

Schematic patterns can be discerned periodically in Scripture, notably in Gen. 5 and 11. The genealogies in both these chapters consist of ten units in which the age of the parent at the birth of his firstborn was recorded, as were the remaining years of his life. Both lists also concluded with the names of three male siblings in a manner that can hardly be accidental. While these genealogies are no doubt genuine and ancient, they seem to have been arranged in such a manner as to permit easy memorization of the chief descendants of the ancestral stock.

The NT genealogies of Jesus Christ exhibit similar internal patterns. The period covered by Mt. 1:1-17 is divided among forty-two generations, and consists of three blocks of fourteen generations each. This schematic arrangement, involving a multiple of the sacred number seven, was obviously formed by processes of selection and omission. Such a list can hardly be considered an official, detailed pedigree, but once again the purpose of the compiler had been achieved, namely that of authenticating the descent of Christ from the Davidic line through Joseph, his putative father. (*See also* GENEALOGY OF JESUS II.A.). Multiples of seven characterize the series of names listed in Lk. 3:23-38, where each series normally comprises twenty-one names. Fourteen generations occupy the period between the time of David and the Exile in the Matthaean account, while the Lukan genealogy has almost double the number of names that represent twenty-one generations.

The period from the Exile to the time of Christ is covered by another fourteen generations in Matthew, and by twenty-one generations in Luke. A further complication is the wide dissimilarity in the names of persons from the time of David to the period of the birth of Christ. This discrepancy has been explained by the supposition that both lists belonged to Joseph, but were based upon different principles of compilation. Some scholars have suggested that Luke's list was actually the lineage of Mary, not Joseph, since she also most probably belonged to the Davidic house (cf. 1:32). For some writers Luke's list reflects the prophetic office of Jesus, and his extension of Christ's pedigree beyond Abraham to Adam emphasized the universality of Jesus' messianic mission. (*See also* GENEALOGY OF JESUS IV.B.)

Considering the difficulties inherent in the recording and transmission of Hebrew names, it is remarkable that so many genealogies have survived in the Scriptures. So many names in antiquity either sounded or were spelled alike that written records would be a necessity for establishing and maintaining proper identity, however tenacious oral tradition might have been. While "all Israel" was believed to have been enrolled by genealogies in a register (1 Ch. 9:1), there can be no doubt that many names would have been forgotten or omitted on other grounds, while some would be reduplications in one way or another of already existing names. Thus Elihu was also known as Eliab and Eliel (1 S. 1:1; 1 Ch. 6:27, 34), while Nahath had the names Tohu and Toah at various times in his life (1 S. 1:1; 1 Ch. 6:26, 34). The removal of the pagan theophoric element "baal" from Hebrew names resulted in Merib-baal becoming known as Mephibosheth (2 S. 4:4), a circumstance that can cause some confusion for the unwary. Certain names were regarded as general family property for the males, and as such were shared by one or more

generations (see the prologue to Sirach), as is occasionally the case today. For reasons not apparent from the text, the name of a father could be replaced by that of a more distant ancestor (cf. Josh. 7:1,24).

The eclectic principles upon which the compilation of so many Scriptural genealogies are based should be a sufficient caution against using them for anything more than the most general of chronological purposes (cf. 1 Tim. 1:4; Tit. 3:9). Quite obviously a person such as Archbishop Ussher, who assumed that the Genesis genealogies were complete and proceeded to date terrestrial creation in 4004 B.C., was totally unaware of the rationale of ancient techniques of genealogical compilation, and the consequent pitfalls awaiting uninstructed occidental investigators. Nevertheless, it must not be forgotten that such records, whether written or oral, comprised history for those who utilized them, and consequently it is of the greatest importance for modern students to understand such lists as far as possible from the point of view of the original compilers before drawing conclusions from them.

GENEALOGY OF JESUS. A record (compilation) of Jesus' purported descent, found in extensive form only in Mt. 1:1-17 and Lk. 3:23-38.

I. Setting in Judaism
  A. Concern for Genealogical Purity
  B. Speculation on the Ancestry of the Messiah
II. Purpose of Matthew's Genealogy
  A. Structure
  B. Details
  C. Relation to Matthew's Gospel
III. Lukan Genealogy
IV. Comparison of the Two Lists
  A. Differences
  B. Harmonizing Attempts
V. Conclusion

I. Setting in Judaism.–While interest in genealogical relationships, especially among clans and tribes, can be traced back to the oldest written sources of the OT, it is clear that after the Babylonian exile the function of the genealogical form changed and its importance increased. The priestly writings in the OT — especially Ezra, Nehemiah, and 1-2 Chronicles — as well as later Jewish writings (Apocrypha, Pseudepigrapha, Dead Sea Scrolls, and rabbinic materials) demonstrate that interest in genealogies centered on the following two functions:

A. Concern for Genealogical Purity. The books of Ezra and Nehemiah as a whole present the idea of genealogical purity more explicitly than any other OT material. The author warns against any mixing of "the holy seed" (Ezr. 9:2) with the peoples of the land, implying that all returning exiles were required to prove descent from a preexilic Israelite family (Ezr. 2:59,62); the motivation here is to demonstrate and preserve a continuity between preexilic and postexilic Israel. Moreover, the list of returning exiles includes five categories: people of Israel (noncultic), priests, Levites, temple servants, and king's servants (Ezr. 2:2-58 par. Neh. 7:7-60; 11:3). Of these the first three were considered to represent the core of Israel (Ezr. 9:1; 10:18-25). These categories provided the basis for later rabbinic classifications of degrees of purity in the Mishnah (*Kiddushin* iv.1; *Horayoth* iii.8), except that the latter became more precise with regard to the position of those with doubtful or impaired ancestry. The distinction between full Israelites and those of doubtful descent was particularly important for the regulation of marriage, but it included also the whole question of social position and civil liberties (Jeremias, pp. 271-344). The rabbinic sources, however, also reflected the difficulty of obtaining genealogical information and frequently revealed recourse to midrashic exegesis of biblical texts in the attempt to establish genealogical relationships (Johnson, pp. 99-115). The motivation for the composition — though not the *manner* of composition — of the two genealogies of Jesus within Jewish-Christian circles therefore can be seen as the necessity to show Jesus' status as a full Israelite, without genealogical impairment.

B. Speculation on the Ancestry of the Messiah. It was not the unanimous Jewish opinion in the early Christian period that the Messiah would stem from David. On the basis of the OT concept of the perpetuity of the priesthood alongside the office of king (1 S. 2:35; Jer. 33:17-22; Zec. 4:14; cf. Sir. 45:6f., 15, 23-25; 1 Macc. 2:54), the expectation of a priestly Messiah came to be reflected in various Jewish sources, e.g., the Testaments of the Twelve Patriarchs, the Dead Sea Scrolls, and rabbinic materials. Rabbinic sources have clear and numerous traces of discussions between the partisans of each expectation. It was argued that the Davidic line was tainted by the illegal marriage of Judah and Tamar, the gentile status of Ruth, the Bathsheba affair, and the fact that the mother of Rehoboam was Naamah the Ammonitess (1 K. 14:31). The rabbinic writings were generally concerned with explaining these difficulties and at the same time charging that the priestly line was tainted in similar ways (Johnson, pp. 115-138). Thus the purpose of Mt. 1:1-17 and Lk. 3:23-38, the only extant genealogies written from the point of view of messianic fulfillment (i.e., from the conviction that the Messiah had already come), also may have been to provide the proper credentials for Jesus as the Messiah and so reflect contemporary Jewish speculation on the ancestry of the Messiah.

II. Purpose of Matthew's Genealogy.–The Matthaean genealogy is composed of OT (LXX) data for the names from Abraham to Zerubbabel (vv. 2-12; cf. Ruth 4:18-22; 1 Ch. 2:5-15; 3:10-15; Ezr. 3:2,8; 5:2; Neh. 12:1; Hag. 1:1, 12; 2:2) with some deletions in the list of kings (between Joram and Uzziah) and a few apparent discrepancies (cf. 1 Ch. 3:19; Mt. 1:12). The derivation of the nine names between Zerubbabel and Joseph is unknown. The intention of the compiler of the Matthaean genealogy can be determined only by accounting for the deliberate 3x14 structure, the details added to the succession of names in the list, and the relation of the genealogy to the subsequent material in Matthew.

A. Structure. In Mt. 1:17 the compiler of the genealogy emphasized that he found three groups of fourteen generations each in the ancestry of Jesus, beginning with Abraham. This emphasis transforms the genealogy at once into a periodization of Israel's history: fourteen generations from Abraham to David, fourteen from David to the Exile, and fourteen from the Exile to the Messiah. What was the intention of this structure? A commonly accepted view is that the number fourteen was reached by *gematria*, i.e., from the numerical value of the Hebrew letters in the name David (*daleth-waw-daleth*, 4+6+4), thus triply emphasizing the Davidic descent of Jesus. This view, however, is weakened by the probability that the genealogy was originally composed in Greek. W. D. Davies (pp. 302-304) suggested that the number fourteen was a conscious reaction to the Pharisaic chain of tradition that may have included fourteen members or groups from Moses to Hillel and Shammai. According to this

view the Matthaean genealogy constituted the credentials of the Messiah in opposition to the credentials of the rabbinic oral law. Yet the two lists have a different tone; while the rabbinic chain shows how past events have been transmitted to the present, the Matthaean genealogy shows how the historical process has reached a fulfillment in the coming of the Messiah. Moreover, the most numerous parallels to the structure of Mt. 1:1-17 are found in the periodizations of history that were common in Jewish apocalyptic (Daniel; 2 Bar. 53–74; 1 En. 91, 93; 2 En. 33:1f.) and that occur also in rabbinic writings. According to the apocalyptic structuring of history, a fixed number of equal periods would elapse before the beginning of the age of fulfillment. Thus, the original readers of this genealogy would probably have understood its structure to have eschatological significance: history is in order with its symmetrical periods, the time is fulfilled, and the messianic age has dawned.

B. Details. In addition to the climactic v. 17, the author included several phrases that were not essential to the pedigree of Joseph. "The book of the genealogy [Gk. *bíblos genéseōs*] of Jesus Christ" (1:1) is reminiscent of Gen. 2:4a and 5:1 and carries the connotation of a new beginning. "The Son of David, the son of Abraham" (1:1) recalls the central position of these two figures in the genealogical memory of the rabbis (SB, I, 13f.). The phrase "and his brothers" (v. 2) acknowledges that Jacob was the father of the twelve tribes, while the same phrase in v. 11 recalls the departure from the father-to-son succession of kings at the end of the monarchy.

Certainly the most curious feature of the Matthaean genealogy is the mention of the four women, a rare feature in Jewish genealogies. This is especially striking since Tamar and Rahab were harlots, Bathsheba was an adulteress, Ruth was a Moabitess, and all four were probably considered Gentiles in the Jewish tradition contemporary with Matthew. Many ancient and some modern scholars have considered this the result of Matthew's desire to anticipate Jesus' concern for sinners and Gentiles (a motif stronger in Luke). Others find their function to be a demonstration that God can use even the humble and despised to accomplish His purpose. Still others find the four women to be "types of Mary," or more explicitly, a refutation of Jewish calumnies on the nature of Jesus' birth.

It is not often recognized, however, that each of these four women was in the Jewish tradition a subject of polemical controversy related to the question of the legitimacy of the descent of David. The Pharisaic tradition, which held to the expectation of the Davidic Messiah, exonerated and in fact glorified the four women, and by the end of the 1st cent. B.C. these four had a traditional place in the Pharisaic speculation on the ancestry of the Messiah. It is therefore probable that Matthew included the four women in Jesus' genealogy to show that in every respect the Pharisaic expectation of the Messiah has been fulfilled in Jesus of Nazareth, who was the son of David and therefore a descendant of the four women (Johnson, pp. 153-179).

C. Relation to Matthew's Gospel. Many contend that the account of the Virgin Birth (Mt. 1:18-25) is irreconcilable with a genealogy of Jesus that traces descent through Joseph, and that therefore the genealogy is not the work of the Evangelist himself. Against this view it can be argued that the distinctive features of the genealogy — its numerical structure, its dependence on data from the LXX, its "son of David" Christology, its eschatological tone — are consistent features of Matthew as a whole. A purpose can be seen behind the startling juxtaposition of genealogy and virgin birth: both describe who and what Jesus is on the basis of His ancestry; both use the title "son of David" (the genealogy applying it to Jesus, and 1:18-25 to Joseph); and the Virgin Birth account already presupposes the genealogy (Pesch, *BZ*, 10 [1966], 220-245). The genealogy centers on the Davidic sonship of Jesus, while 1:18-25 centers on His divine sonship. The whole of Mt. 1 may be considered a midrash on these two titles, possibly suggested by the terms "Christ, Son of God" in Mk. 1:1, which Matthew had as a source (Johnson, pp. 224-26). We may therefore conclude that the whole of Mt. 1 is composed by the author of the Gospel of Matthew and is not merely an incorporation of earlier materials.

III. Lukan Genealogy.–After the introductory remark that Jesus was about thirty years of age when He began His ministry, Lk. 3:23-38 consists of a bare list of names with the genitive article, going from Joseph back to Adam or, more precisely, to God. The names from Abraham back to Adam (vv. 34-38) are derived from Gen. 5; 11:10-27 (1 Ch. 1:1-4, 24-26), with Cainan added from the LXX of Gen. 10:24; 11:12f. From Nathan to Abraham (vv. 31-34) the list follows Gen. 25:19-26 and Ruth 4:18-22 except that Arni and Admin in Lk. 3:33 replace Ram (LXX "Arran") in Ruth 4:19. The only other identifiable names are Salathiel and Zerubbabel (v. 27) until Joseph. The remaining names are striking in two respects. There are several repetitions (five variations of Mattathias, two of Simeon, two of Levi, two of Melchi, three of Joseph, and two of Jesus). Moreover, Jeremias (p. 296) showed that use of the names of the twelve tribal fathers of Israel as personal names cannot elsewhere be traced to preexilic times; yet in his preexilic section Luke lists the names Levi, Simeon, Judah, and Joseph. These duplications and anachronisms not only necessitate caution with regard to the historical authenticity of Luke's list, but also suggest a pre-Lukan origin for at least some of his data.

Among the special features of the Lukan genealogy, the following should be noted:

(1) In 3:23 the author remarked that Jesus was the "son (as was supposed) [Gk. *hōs enomízeto*] of Joseph. . . ." This phrase may be an editorial remark by Luke indicating his awareness of the difficulty of tracing Jesus' descent from Joseph while at the same time holding to the tradition of the Virgin Birth. Others think the phrase indicates that Luke was recording a tradition different from that of Matthew while being aware that the latter list was the correct one. The phrase, however, can be read equally well as an indication that the genealogy of Jesus was already a matter of polemics and that Luke has some uncertainty regarding the historical authenticity of the list itself. In any case, this phrase is another indication of the pre-Lukan origin of some data in the list.

(2) Some attempts have been made to find a significance in the total number of names in Lk. 3:23-38, i.e., seventy-seven. This number may be seen as eleven "world-weeks" at the end of which the messianic week begins. But nothing here is comparable to Mt. 1:17, which draws attention to the symmetrical pattern there. Moreover, the Lukan list has much textual variation. Several MSS testify to seventy-two names, as does Irenaeus, who believed that this corresponds to the number of names in Gen. 10, "implying that it is He [Jesus] who has summed up in Himself all nations dispersed from Adam downwards . . ." (*Adv. haer.* iii.22.3). It seems impossible to demonstrate any special meaning in the total number of names in the Lukan list.

(3) Lk. 3:23-38 traces Jesus' ancestral line back to "Adam, the son of God," unlike Matthew, who goes back only to Abraham and therefore is limited to Israelite

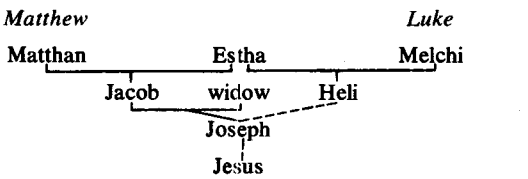
history. It is often rightly held that this illustrates Luke's general concern to portray the universal character of Jesus' ministry. But attempts to find here an Adam/Christ typology must realize that this Pauline motif is nowhere explicit in Luke-Acts. Moreover, the genealogy does not end with Adam but with the phrase, "Adam, son of God." If Luke intended a typological significance between the beginning and the end of his list, it would seem more appropriate to find it in the designation of Jesus as the Son of God.

(4) Unlike Matthew, who began his Gospel with the genealogy, Luke inserted his list into a pre-Lukan context (i.e., between the baptism of Jesus and the temptation) in such a way that the sequence was disturbed (4:1 refers to 3:21f.). This fact has often been linked with the "Proto-Luke" theory, according to which the first edition of Luke began at 3:1. Certainly the position of the genealogy in Luke is a curious one, whether seen from the "Proto-Luke" perspective or not. It is, moreover, striking that the only motif common both to the baptism account (3:21f.) and the genealogy (3:23-38) is the mention of sonship from God. The genealogy runs *backward* from Jesus to God (no other known biblical or Jewish genealogy culminates in the naming of God). Perhaps Luke saw in the genealogy one way of understanding the ascription of divine sonship to Jesus: He is Son of God through the line of OT patriarchs and subsequent historical figures. He inaugurates a new epoch and yet derives significance from his historical continuity with the redemptive history of the OT and of Judaism.

(5) The most striking feature of Luke's genealogy of Jesus is the rejection of the royal line of Judah in favor of proceeding from David to his son Nathan (2 S. 5:14; 1 Ch. 3:5; 14:4) and from him through a series of unknown names to Shealtiel and Zerubbabel. Why Luke (or his source) avoided the royal line cannot adequately be explained by appealing to his desire to avoid political overtones in connection with Jesus' messiahship. It is more probable that the Lukan genealogy reflects an awareness of esoteric Jewish tradition found in several sources (Johnson, pp. 240-45), according to which David's son Nathan was identified with the prophet Nathan and was considered to be an ancestor of the Messiah. Eusebius (*Quaestiones ad Stephanus* iii.2) suggested that the explanation for Nathan's position in Luke's genealogy was to be found in the Jewish disagreements over the ancestry of the Messiah. Perhaps, then, the Lukan genealogy reflects postbiblical Jewish data, or Luke himself, in line with his predilection to picture Jesus as a prophet (Lk. 7:16, 39; 13:33; 24:19), desired to include a prophet in the lineage of Jesus.

IV. Comparison of the Two Lists.–*A. Differences.* (1) Matthew followed the royal line from David to Jechoniah, while Luke traced Jesus' descent from David's son Nathan through a series of different and unknown names; both lists meet again in Salathiel, who is given different fathers in the two lists (Mt. 1:12; Lk. 3:27). (2) From Zerubbabel to Joseph both lists are composed of unknown names, those in one list differing from those in the other until they meet again in Joseph. Thus Joseph's father in Mt. 1:16 is Jacob; in Lk. 3:23, Heli. (3) Matthew has thirteen names from the Exile to Jesus (in spite of his assertion in 1:17 that he has fourteen); Luke has twenty-two for the same period — a more probable number for six centuries, though Matthew's is not impossible, as is often contended. (4) Matthew included an introduction (1:1), references to brothers of Judah and Jechoniah (1:2, 11), the four women (1:3, 5f.), and a deliberate 3x14 scheme (1:17). (5) Matthew has an ascending order, Luke a descending one; in Matthew the formula is "N was the father of N," while Luke has the genitive article with the name. (6) Matthew goes back to Abraham, Luke to Adam. Besides these differences there are minor variations in orthography and form among those names that the two lists have in common.

B. Harmonizing Attempts. It is especially the first two differences mentioned above that have caused numerous attempts to harmonize the two lists. Briefly stated, the most frequently recurring hypotheses have been the following: (1) Both lists are genealogies of Joseph, but Matthew traced the biological ancestry, Luke the legal. The earliest extant harmonizing attempt, that of Africanus (*ca.* A.D. 200), was of this sort. He presupposed that the custom of levirate marriage was the key: Matthan, grandfather of Joseph in Matthew's list, married Estha and fathered Jacob. After Matthan's death, Melchi (unrelated to Matthan), grandfather of Joseph in Luke's list, married Estha and begat Heli; hence Jacob and Heli were half-brothers. Heli married and died childless; his half-brother Jacob married the widow in a levirate marriage and fathered Joseph. Thus Matthew gave the physical ancestry of Joseph, Luke the legal. In diagram form this argument can be seen more clearly:



(2) More frequently suggested in modern times is the theory that Matthew gave the legal line of descent and Luke the natural. (3) Annius of Viterbo (*ca.* 1490), Luther, and Bengel have been followed by several modern scholars in considering the Matthaean list a genealogy of Joseph and the Lukan list a genealogy of Mary. This view is usually linked to the assumption that the phrase, "as was supposed" (Lk. 3:23), applied only to Joseph. (4) Tertullian and a few modern scholars reversed the preceding view and held that Matthew gave the genealogy of Mary and Luke that of Joseph.

Certainly none of these attempts has proved to be totally convincing. While one may argue that a study of Luke's list reveals a more accurate use of historical information than that of Matthew (Jeremias, pp. 292-97), it would be rash to treat the genealogies of Jesus as pure reflections of accurate genealogical information concerning Jesus' ancestry, especially in view of the midrashic exegesis that usually accompanied rabbinic messianic speculation.

V. Conclusion.–The two genealogies of Jesus are probably examples of the tendency to historicize traditional motifs in the Gospel material. They, along with all early Christian literature, presuppose the Davidic ancestry of Jesus. But the genealogies probably arose in Jewish-Christian circles from the need to historicize this item of belief. On this view both lists fall into the category of midrash, the Jewish method of exegesis that expounded Scripture in such a way as to comfort, exhort, edify, and strengthen faith. No NT materials are more closely connected with Jewish forms and thought than these two passages; yet both are apologetic attempts to express more fully the Christian conviction that Jesus is the fulfillment of the hope of Israel.

GENERAL [Heb. *śar*] (Jgs. 4:7); AV CAPTAIN; NEB COMMANDER; (cf. AV 1 Ch. 27:34; RSV, NEB, "commander"); [Gk. *stratēgós*] (1 Macc. 10:65); AV DUKE; [*chiliarchos*] (Rev. 6:15); AV CHIEF CAPTAIN; NEB MARSHAL. In the OT both Sisera and Joab held the rank of *śar* in the sense of "general." The title of the officer noted in 1 Maccabees might be given to either a military or civil official. A chiliarch was technically the commander of a thousand men, but the Roman tribune of NT times actually led only about six hundred. Rev. 6:15, however, has in view a broader high military designation than that of tribune.

See also CHIEF; COMMANDER; TRIBUNE.

GENERATION [Heb. *dôr, tôlēḏôṯ*; Aram. *dār* (Dnl. 4:3, 34); Gk. *geneá*]; AV also AGE (Eph. 3:5, 21), TIME (Acts 14:16; 15:21), "nation" (Phil. 2:15); NEB also TIME, DESCENDANTS, AGE, TRIBAL LISTS, etc. The AV, RSV, and NEB also supply "generation" when the Hebrew, in speaking about the future, refers to the third and fourth generation but uses only the words "third" (*šillēšîm*) and "fourth" (*ribbēʿîm*) (Gen. 50:23; Ex. 20:5; 34:7; Nu. 14:18; Dt. 5:9; 2 K. 10:30; 15:12; cf. Jgs. 1:14). In 2 S. 7:19 the RSV emends the MT, partially on the basis of the LXX in the par. 1 Ch. 17:17 (on these difficult verses cf. KD *in loc.*; S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [1913], pp. 276f.; J. M. Myers, *I Chronicles* [*AB*, 1965], p. 129).

Hebrew *dôr*, Aram. *dār*, and Gk. *geneá* refer to a period of time loosely defined as the time between a parent's prime and that of his child. These terms may be used to speak about past ages (Isa. 51:9; Col. 1:26) or about the ages or times to come (Isa. 34:17; Lk. 1:48). Those living at a given time in history are referred to as a generation (Jer. 2:31; Mt. 11:16), and can be characterized as a whole, e.g., as a "perverse and crooked generation" (Dt. 32:5), as a "faithless and perverse generation" (Lk. 9:41), or as "the generation of the righteous" (Ps. 14:5). Cf. *TDOT*, III, *s.v.* "dôr" (Freedman-Lundbom, Botterweck).

Hebrew *tôlēḏôṯ*, which is found only in the plural, is used in genealogical lists and refers to the successive generations of families (Nu. 1:20-42). In some instances the word has the sense of an account of a man and his descendants (Gen. 2:4; 6:9; NEB "story"). (*See also* GENESIS II.D.1-2.)

In the AV of Mt. 3:7 "generation" is used in the obsolete sense of "offspring" (RSV, NEB "brood," Gk. *génnēma*).

See *DNTT*, II, 35-39. E. W. CONRAD

GENEROSITY; GENEROUS [Heb. *nāḏîḇ*] (Ex. 35:5; Prov. 19:6); AV WILLING, "prince"; NEB WISH, "the great"; [*ḥānan*] (Ps. 37:21; 112:5); AV "sheweth mercy," "sheweth favour"; NEB also "be gracious"; [Gk. *agathós*] (Mt. 20:15); AV GOOD; [*haplós, haplótēs*] (2 Cor. 9:11, 13; Jas. 1:5); AV BOUNTIFULNESS, "liberal distribution," LIBERALLY; NEB also "liberal"; [*aphelótēs*] (Acts 2:46); AV "singleness of heart"; NEB "unaffected joy"; [*koinōnikós*] (1 Tim. 6:18); AV "willing to communicate"; NEB "ready to give away."

The man with a "generous heart" (*nᵉḏîḇ libbô*) of Ex. 35:5 is one who gives willingly, and Heb. *ḥānan* means especially to deal graciously with the needy but undeserving. Whereas the NT term *agathós* can be used for any good characteristic, *koinōnikós* specifically denotes giving what is one's own, and *aphelótēs, haplós*, and *haplótēs* emphasize sincerity in giving. I. General Data.–*A. The Name.* The first book of Moses is named by the Jews from the first word, namely, Heb. *bᵉrēʾšîṯ*, preferably translated "by way of beginning" (cf. the Gk. *Brēsith* of Origen). In the LXX it is called *Genesis*, because it recounts the beginnings of the world and of mankind. This name has passed over into the Vulgate (*Liber Genesis*). As a matter of fact, the name is based only on the beginning of the book.

B. Survey of Contents. The book opens with the story of the creation of the world and of the first human beings (ch. 1). It tells of Paradise and the fall (chs. 2–3), Adam's and Eve's descendants and Cain's murder of Abel (chs. 4–6), the Deluge and Noah and his descendants (5:28–10:32; 11:10-26), and the construction of the tower of Babel (11:1-9). It also contains the lineage and histories of the patriarchs and their households: Abraham (11:27–25:18), Isaac and Jacob (25:19–37:2), and Joseph (37:3–50:26). The first part of the book (1:1–11:26) is the history of mankind. The second part (11:27–50:26) is the history of families and the introduction to the history of the chosen people, which begins in Ex. 1. The promise made to Abraham (Gen. 12:1-3) declares that God, even if He originally set apart one man and his family (chs. 12–50) and then a single nation (Ex. 1–2), nevertheless intends salvation eventually to include all mankind.

C. Connection with Succeeding Books. By the statements just made it has already been indicated in what close connection Genesis stands with the subsequent books of Scripture. The history of the chosen people, which begins with Ex. 1–2, at the very outset and with a clear purpose refers back to the history as found in Genesis (cf. Ex. 1:1-6, 8 with Gen. 46:27; 50:24-26), although hundreds of years had elapsed between these events. To Abraham in Gen. 12:1-3 the promise had been given, not only that he was to be the father of a mighty nation that would recognize him as their founder (the earliest history of which is reported in Exodus and the

following books of the Pentateuch), but also that he would receive the Promised Land. In this respect the book of Joshua, which gives the story of the capture of this land, is also a continuation of the historical development begun in Genesis. The blessing of God pronounced over Abraham, however, continued to be efficacious also in later times among the people who had descended from him. In this way Genesis is an introduction to all the succeeding OT books that in any way have to do with the fate of this people. But insofar as this blessing of God was to extend to all the nations of the earth (12:3), the promises given can be entirely fulfilled only in Christ, and can expand only in the work and success of Christian missions and in the blessings that are found within Christianity. Accordingly, this book treats first of beginnings and origins, in which is contained, as in a kernel, the entire development of the kingdom of God down to its consummation.

II. Composition.–Jewish and early Christian traditions (as well as the rest of the Torah) ascribed the composition of Genesis to Moses. Sporadic criticism of Genesis during the 10th and 11th cent. cast some doubt on Mosaic authorship, but it was only in the 16th and later cents. that the traditional views of composition began to be seriously questioned. In 1753 Astruc published a treatise on Genesis which, while ascribing the compilation of the book to Moses, purported to discover "duplicate" narratives of events such as the creation and the Flood. More important was his recognition of the use of two names for God, namely, Yahweh and 'Elohim, in Genesis and parts of Exodus, and these he employed as "criteria" for the recovery of what he imagined to be the corresponding underlying literary sources. With disarming simplicity he suggested that all passages that used the name Yahweh belonged to one source document, while those in which 'Elohim occurred belonged to another. The Elohistic document was for him the original source for the contents of Genesis, but it stood parallel to the Yahwistic document. In addition, he purported to have discovered numerous repetitions which, along with supposedly non-Israelite material, made up four literary "columns" from which Moses had compiled Genesis.

A. Literary-critical Theories of Authorship and Date. The age of rationalism was reflected in the work of Eichhorn, who in 1780 published the first of what ultimately proved to be a lengthy series of modern introductions to the OT. He extended the "criteria" suggested by Astruc by including considerations of literary style and phraseology as an additional means whereby alleged underlying sources could be differentiated. In 1792 and 1800 Geddes published two works in which he assigned the Pentateuch to the age of Solomon and attributed its compilation to a redactor. He agreed with Astruc's suggestion that the incidence of the divine names could be used to cover two underlying sources, but rejected the Yahwistic and Elohistic documents as they had been reconstructed by Astruc and Eichhorn, preferring instead to think of two series of fragmentary sources. A developed fragmentary hypothesis of pentateuchal origins was formulated by J. S. Vater, for whom there may have been as many as forty separate fragmentary sources, some of which were held to be older than the time of Moses. Astruc and Eichhorn found a degree of support in the writings of de Wette, who thought that their documentary hypothesis was superior to the fragmentary theory advanced by Geddes. De Wette therefore argued that Genesis depended for its origins on an Elohistic document, and that much of this material was in fact like epic poetry.

In 1823 Ewald strongly attacked the fragmentary theory and supported the view that an Elohistic type of source, supplemented by earlier sections such as the Decalogue, underlay the final form of Genesis. This supplementary theory was favored by de Wette in 1840, who advanced the view that the augmenting had actually been made from a Yahwistic source. In his *Komm. über die Genesis* (1838) Tuch argued that the basic source (*Grundschrift*) of the entire Pentateuch was the Elohistic document, and that it had been supplemented by portions of the Yahwistic material that he himself dated in the early monarchy.

In his study of the sources of Genesis (1853), Hupfeld argued that the *Grundschrift* was not the literary unity maintained by earlier writers, but in fact the product of two persons, both of whom had used 'Elohim as the name of God, and who could be differentiated by means of certain linguistic peculiarities. Redactors or editors, always of an anonymous character, were adduced as necessary elements in the process of compilation, and passages that presented problems for the various theories were frequently credited to the activities of these persons.

For Genesis, therefore, there were by now three alleged documentary sources which had been used in the process of compilation: a Yahwistic (J) source, an Elohistic (E) document, and a postexilic Priestly (P) source, the latter formerly thought to have been part of the *Grundschrift*.

K. H. Graf followed Vatke in the view that the *Grundschrift* was one of the latest, rather than the earliest, sources of Genesis and the other pentateuchal writings, and assigned it to a postexilic period. Although his criteria for these options could not be demonstrated objectively, and even though he was challenged seriously by some of his contemporaries, he nevertheless clung to his position. Colenso agreed with Graf that the basic documentary source claimed by earlier scholars was late in date, thereby giving impetus to an interpretation of the significance of ancient priestly writings from the Near East that was totally contrary to the actual facts of the case. Kuenen, who was influenced by Colenso, supported Graf in the view that the J source was basic to all pentateuchal writings and that it had been supplemented by portions of the E source. Wellhausen, a student of Ewald, leaned heavily and uncritically upon the views of Graf in developing an evolutionary reconstruction of the Hebrew religion. His theory regarding the literary sources behind the Pentateuch came to be recognized as the classical literary-critical theory of pentateuchal origins (*see* PENTATEUCH). As far as the composition of Genesis was concerned, Wellhausen regarded it as a compilation of material obtained from the supposed documents P (dated to the 5th cent. B.C.), J (assigned to the 9th cent. B.C.), and E (dated approximately to the 8th cent. B.C.). While these conclusions added virtually nothing to the views expressed by Graf, they did succeed in bringing all earlier literary-critical speculation to a climax. So completely did the theory meet the intellectual and emotional needs of most European scholars of that time that within a very short period it had swept all other competitors aside and gained dominance of the field. Soon it spread to Britain and the USA.

Some attempts will now be made to convey at least part of the content of each of the hypothetical documents, although scholars seldom agreed precisely — or sometimes even in broad detail — about the content of individual sources, due to the rather subjective nature of the accepted analytical method. The majority of scholars during the time of Wellhausen, however, would have credited the supposed J source with many of the following portions of Genesis: 12:1-4a, 7-9; 12:10-20; 13:1f., 4f., 7a, 8-10a; 16:1f., 4-7a, 8, 11-14; 18:1-33; 19:27f.; 21:1a,

2a, 7, 33; 24; 25:21-26a, 27-34; 26:1-33; 28:10, 13-16, 19a; 41:14a, 21a, 29-31, 35b, 36b, 42a, 43b, 45b, 49, 54, 56a, 57. The supposed P source was thought by its proponents to have included parts of the following sections: 1:1–2:4a, 5; 6:5–9:19, 28f.; 10; 11:10-27, 31f.; 12:4b-5; 13:6, 11b-12a; 16:1a, 3, 15f.; 17; 19:29; 21:2b-5; 23; 25:7-10, 12-17, 19f., 26b; 26:34f.; 27:46; 28:1-9; 29:24, 28b-29; 30:4a, 9b; 31:18b; 33:18a; 35:6a, 9-13, 15, 22b-29; 36:1-2a, 6-8, 40-43; 37:1f.; 41:4a; 46:6-27; 47:5-11, 27f.; 48:3-7; 49:1, 28-33; 50:12f. The E document was credited by most literary-critical speculators with at least the following: 15:1-3, 5f., 11-12a, 13f., 16; 20:1-17; 21:6a, 8-24, 27, 31; 22:1-13, 19; 28:11f., 17f., 20-22; 29:1, 15-18; 30:1-3, 4b-8, 17-20a, 21, 22b-23, 26, 28; 31:2, 4-11, 13-17, 19-25a, 26a, 28-31a, 33-35, 36b-37, 41-43, 45, 47, 49f., 54f.; 32:13b-21, 23a, 24a, 26b, 27f., 31f.; 35:5, 11a, 18a, b, 19f.; 36:1-4, 6b-8, 14, 16-20; 37:5a-11, 19f., 22, 24, 28-30, 32-34a, 35b, 36; 40:2-3a, 4-5a, 6-15a, 16-23, 41; 45:1b, 3, 5b, 7a, 8-9a, 13, 15-18, 20, 24b, 25-27; 46:2-5a; 47:7; 48:1-2a, 7-9, 11f., 15f., 20-22; 50:15-26. It must be emphasized that the apparent precision of the foregoing is illusory, and is in fact dependent to a very large extent upon the literary-critical whim of the individual analyst. In time it came to be recognized that certain parts of the text of Genesis defied any attempts at separation into documents, particularly some sections in which there was thought to be a mixture of J and E documents. The general theory was therefore adjusted to accommodate this embarrassment, and accordingly a source dubbed JE was postulated. Depending upon the views of the individual critic, this consisted of a minimum of chs. 27; 29:2-14, 26, 31-35; 30–32; 33:1-17.

For a more extensive treatment of the Wellhausen hypothesis, see *ISBE* (1929), II, 754-760.

B. Early Opponents of These Theories. It must be recognized that this evolutionary hypothesis of origins was never without its serious critics, and this situation has persisted to the present time. The fragmentary theory of Geddes, developed by Vater, came in for strong criticism by Ewald in 1823, who in a work on the composition of Genesis presented strong arguments for the unity of the composition on philological and other grounds without, however, actually giving support to the traditional view of Mosaic authorship. In 1846, J. H. Kurtz in a commentary on Genesis inquired why Elohistic passages, supposedly earlier than the time when the Yahwistic supplementer began his work, still presupposed or alluded to the contents of the Yahwistic sections of Genesis. Supporters of the supplementary hypothesis could not answer this question and never resolved the problem that had provoked it. Another outstanding opponent of the various literary-critical views was the orthodox scholar E. W. Hengstenberg (1802-1869), who in a professional lifetime of literary activity made many devastating criticisms of the liberal movement; his criticisms, however, seemed to have had little effect upon those whose views he was opposing. Others who stood in the same general conservative tradition included M. Drechsler, H. C. Havernick, and C. F. Keil.

In a discerning OT intro. published in 1889, E. Riehm condemned the theory that priestly material was of a later date than any other of the pentateuchal sources. In this stance he was supported by R. Kittel, who ascribed a lengthy pre-history to priestly writings, taking them to be documents that had been restricted primarily to priestly circles and only made public subsequently through force of circumstances. F. Delitzsch made a frontal assault on the entire Wellhausen scheme in 1887 in a commentary on Genesis, arguing among other things for an early date for priestly materials in Genesis. A. Klostermann also rejected the developmental hypothesis and in its place suggested a modification of Ewald's views, which involved dating priestly sources in the preexilic period.

In Britain, E. C. Bissell castigated the basic presuppositions of the Wellhausen school and its critical method in 1885, while in 1906 an impressive theological appraisal of contemporary literary criticism was made by J. Orr. Orr exposed some of the basic weaknesses of Wellhausen's system, and so devastating was his approach that his arguments were never accorded the courtesy of an answer. Much the same result occurred in the case of Baxter, whose *Sanctuary and Sacrifice* (1895) argued strongly for an early date for priestly material. The distinguished scholar A. H. Sayce was the first to bring archeological discoveries to bear upon the theories of the Wellhausen school, one result of which was that Sayce himself abandoned his earlier liberal opinions and lent massive intellectual support to more traditional views. Further pointed attacks upon the criteria employed by exponents of literary criticism were made in 1903 by J. Dahse, and in 1912 by H. M. Wiener. Both men indicated the wide degree of divergence between the traditional Hebrew text and the LXX, and suggested that the extent of this inconsistency made the divine names totally unsuitable as criteria for the recovery of underlying sources. B. D. Eerdmans enlarged on this approach between 1908 and 1914, rejecting entirely the view that the divine names could be employed as valid criteria. In the USA one of the most outstanding nineteenth-century opponents of the Graf-Wellhausen theory was W. H. Green of Princeton Theological Seminary, who in a number of publications leveled fundamental charges against the procedures adopted by the exponents of literary criticism.

C. Weaknesses of the Literary-critical Approach. 1. General. Despite the great weight of academic respectability that the developmental theory was commanding at the end of the 19th cent., its critics were correct in pointing to many areas in which the procedures and the resultant conclusions were either gravely deficient or absolutely incorrect. Scholars such as Bruston, Smend, Eichrodt, and others, however, continued to propose even greater fragmentation of supposedly underlying sources than their predecessors had done. Typical of this activity were the efforts of Eissfeldt, who produced an entirely new document described as a "Lay" source or "L document." Characteristic of this material in Genesis was its "antique flavor," as he described it. It comprised most of the fragments of verses left over from the attempts of others to formulate underlying documents. His source seems to have contained the following sections of Genesis: 2:4b–3:24; 4:1, 17a, 18-24; 6:1-4; 9:21-27; 11:1-9; 12:1-4a, 6-8; 13:2, 5, 7-11a, 12b-18; 18–19; 25:1-6, 11b, 21-26a, 29-34; 26:1-2a, 3a, 6-23, 25b-33; 29:1–30:24, 25-43; 31:1, 3, 19-54; 32:24b-33; 33:18f.; 34; 35:5, 21-22b; 36:2b-5, 9-39; 38; 49:1-7.

It was in fact this very kind of unrestrained speculation that brought discredit upon the method in the judgment of observers such as Möller and König, and led Kittel and Gressmann to declare, shortly after World War I, that the minutiae of literary-critical research had attained the limits of their usefulness. It had become evident that from the beginning opinions about the contents of the supposed pentateuchal "documents" diverged widely, and this lack of unanimity in a crucial area did nothing to increase the confidence of those who were already dubious about the methodology. Unfortunately, many exponents of the developmental theory of pentateuchal origins were already heirs to two intellectual disadvantages. The first partook

of the character of ancient Greek life, in which speculation, wholly unverified by an reference to external or objective phenomena, was allowed to serve as an acceptable substitute for critical ratiocination. The second was that, for the nineteenth-century scholars, the evolutionary zeitgeist appeared to be the only rational, scientific explanation of biological existence, and it was but a small step to transfer that principle from the descriptive sciences to literary criticism in the misguided belief that the latter would then become scientific. The developmental hypothesis was the very antithesis of all that can be described as scientific, and this unfortunate situation has proved to be the greatest weakness of the literary-critical approach. In the laboratories of Europe, scientific investigators were following a proper method of approach known technically as a posteriori, in which the investigator first examines relevant factual evidence and argues cautiously from what he has found to some possible explanation of the phenomena under consideration. In contrast, the literary-critical speculators were following the a priori approach, in which the investigator begins with a preconceived explanation of the materials that he is studying and is concerned to find evidence that will justify (even partially) his intellectual position. Because so much of the general evidence available even at that period militated against the position represented by the developmental view, European scholars had to resort to such measures as the emendation of the text, the reconstruction and rewriting of the history, the invoking of anonymous redactors or editors to help in awkward situations in which the theory was threatened, and the assigning of specific passages which controverted the theory to a different author in a much later period. At best, any OT material was held to be comparatively late rather than early in origin, and replete with myth, legend, and folklore, and narratives of dubious accuracy. At worst it was deemed valueless for serious historical study and in need of wholesale reconstruction by modern literary-critical methods before it could be of the slightest use to scholars. The abandon with which the European savants indulged in their speculations was never clouded by any reference to specific facets of ancient Near Eastern life which might have been inferred from monuments and inscriptions known at that time; the closest that Wellhausen himself ever came to this sort of explanation was the occasional recognition of parallels between some biblical passages or incidents and a few late Arabic institutions. The latter obviously postdated the OT by many centuries, however, and are thus of no significant value for purposes of comparison.

Another weakness of the literary-critical approach was that it reflected the skeptical and positivistic outlook typical of Hegelian philosophy. The contemporary rationalistic prejudices against supernatural phenomena made for the immediate relegation to the realm of myth and legend of any OT material that could not be interpreted strictly along positivistic lines. As far as Genesis was concerned, the sections dealing with the creation of mankind and the fall were dismissed as mythological simply because they were not understood from the standpoint of the ancient Near Eastern mind. The tower of Babel incident and the Flood were regarded similarly as long-remembered traditions that have claimed only a vague and rather confused historicity at best, while the names of Abraham and the patriarchs usually were understood as probable tribal designations that were only later attached to individuals (and at that under quite dubious historical circumstances).

From the foregoing general remarks it will have become apparent that the development theory was a microcosm of the evolutionary, positivistic, rationalistic, and doctrinaire intellectual movements of nineteenth-century Europe, and that its weaknesses were compounded by inadequate methodologies.

2. Specific. Some of the more serious weaknesses can now be examined in greater detail. The earliest criterion used for the separation of the alleged underlying documents in Genesis, namely that of the variant usage of the divine names YHWH and 'Elohim, appeared disarmingly simple and effective, but even its originator Astruc realized that it was inadequate by itself for purposes of analysis. In fact, the criterion was entirely erroneous and misleading and had no validity as a means of determining the presence or absence of source material in Genesis. This position can be substantiated quite readily when subjective considerations are relinquished in favor of an examination of the objective data furnished by archeology. Of the many religious documents recovered from various sites in the Near East, not one of them can be shown to have been compiled in the manner described by nineteenth-century literary critics and their successors for the book of Genesis. Were one to take a characteristic Mesopotamian composition such as the Epic of Gilgamesh, which is known to have incorporated older sources, and analyze it into underlying documents with the aid of Astruc's criterion, one would be able to formulate as many hypothetical documents as the number of deities named in the Epic.

Clearly, such a result can have no relevance for the composition of the Gilgamesh Epic, or, for that matter, for any other documents from the ancient Near East. Not even a considerably later body of Semitic literature, the Koran, can be reduced to underlying documents by utilizing the analytical system of Graf and his successors. R. Dick Wilson studied the incidence of the divine names in the Koran (cf. *Princeton Theological Review,* 17 [1919], 644ff.) and showed that in some suras God was spoken of as Allah and in others as Rab, just as YHWH was used in some parts of Genesis and 'Elohim in others. But even though Astruc's criterion can be seen to exist in the Koran, Islamic scholars are united in their denial that the Koran was compiled along the lines suggested by literary criticism for Genesis. Again, it is possible, as K. A. Kitchen has pointed out (*Ancient Orient and OT* [1966], p. 125), to take monumental inscriptions from the Near East that were composed and executed as literary units under the direction of one person and purport to discover underlying documentary sources. Thus a biography of Uni, an Egyptian official who lived *ca.* 2400 B.C., contained flowing narrative of a J or E variety, alternating with summary statements of a P type, a paean of victory (H or hymnal material), and two different refrains (editorial additions?). Although all the elements basic to classical literary-critical speculation are present in this particular inscription, no one questions that it was an integrated compositional unit with no oral or literary pre-history, executed over a short period within the lifetime of the individual who commissioned it, and entirely independent of any underlying documentary sources. Other rock inscriptions of this general kind can be adduced to show the essential falsity of the literary-critical criteria entertained by eighteenth- and nineteenth-century speculation. If the scholars concerned had been conversant with the practices adopted by Near Eastern scribes for perpetuating literary traditions, they might not have resorted to their own a priori criteria.

If the situation is demonstrably false where single names for deity were employed, it is even more so when compound forms such as YHWH-'Elohim occur, as in Gen. 2:4–3:24. Liberal scholars tried to explain away this difficulty by regarding it as a conflation of J and E sources into JE. The precise meaning of JE is far from clear,

because it ran completely counter to the theoretical use of the criterion by combining the same divine names that by their independent occurrence were supposed to help identify the documents from which Genesis and other pentateuchal writings were compiled. The discovery that the LXX contained many more examples of compound names for deity than the MT made the situation even more awkward. Because the scholarly speculators were unaware of the nature of literary forms and usages in the ancient Near East, however, they were reduced to all sorts of desperate expedients to sustain a basically erroneous theoretical approach to source-analysis.

More recent studies have shown that in Greek, Ugaritic, Babylonian, and Egyptian literature compound names of deity occur frequently. In the code of Hammurabi one god was known as Nintu and Mama; in the Babylonian Creation Epic, Ea was also described by the name Nudimmud, while at Ugarit Kothar was named Hayyin in some of the texts. In Egypt the most familiar compound name for deity resulted from the fusion of Amon and Re during the 18th Dynasty. Second-millennium B.C. literature has many other examples of this tendency, all of which show how commonplace it was for deities to have compound names. Attempts to delineate underlying documents by employing the occurrence of double names for persons, places, tribes, etc., are equally fallacious. Out of many possible Near Eastern examples it may suffice to point out that Hittite kings sometimes had double names (cf. H. G. Güterbock, *JCS*, 10 [1956], 120-22), while in the Amarna correspondence the Mitanni kingdom was known as Ḫanigalbat and the Mitanni people also described as Hurrians (I. J. Gelb, *Hurrians and Subarians* [1944], pp. 72ff.). For Jacob to be known alternately as Israel, or for Jethro also to be called Reuel, was thus a perfectly normal procedure in the 2nd millennium B.C., and had this been known and acknowledged by nineteenth-century literary critics, some of their criteria would have been shown to be wrong from the start.

So-called duplicate narratives in Genesis (e.g., 1:1–2:4a and 2:4b-25; 15 and 17; 16 and 21; 21:22-34 and 26:12-22; 28:10-22 and 35:15; etc.) were also erroneously accepted as an indication that the same material had survived from two different documentary sources. In the first instances the narratives are never duplicates in the strictest sense of the term, as a glance at the material will show. Thus, the first chapter of Genesis deals with the creation of the cosmos and the appearance of organic life on the earth, while Gen. 2:4b-25 localizes the terrestrial situation and against a specific topographical background treats of the creation of *homo sapiens*. It is quite clear that each passage describes different activities and therefore the real issue is a matter of correct interpretation rather than the presence of alleged underlying documents. Similar considerations should be remembered regarding the supposition that the Joseph narrative contains irreconcilable statements about the sale of Joseph into Egypt (cf. K. A. Kitchen, *Ancient Orient and OT* [1966], p. 119f.). Furthermore, a wider acquaintance with ancient Near Eastern literature on the part of modern scholars now makes it evident that duplication and repetition in a looser sense were actually accepted features of literary style in the 2nd millennium B.C. and later. Babylonian, Ugaritic and Greek literary works all contain such repetitions, while the Koran, a much later composition, is replete with repetitions of the traditional Semitic style. Apparently such forms had pedagogic as well as a literary or artistic value, and occasionally one narrative would appear in both prose and poetic forms, as in Jgs. 4 and 5.

Early literary-critical scholars argued a great deal about such matters as variations in literary style and the incidence of differing theological conceptions. Unfortunately even from the beginning this particular facet of criticism was so subjective in nature that it had little value. All too frequently the alleged changes in style were the result of a difference in subject matter within the same narrative, but because arbitrary characteristics had already been assigned to the various documents, the unity and continuity of particular narratives were shattered in the interests of shoring up entirely hypothetical postulates whose validity has still not been demonstrated. In the light of more recent information about ancient scribal techniques and the way in which information was transmitted at that time, it is now clear that stylistic variations were governed by the character of the personages or events being described, and that in every case they were compatible with the accepted ideas of literary suitability (cf. C. H. Gordon, *Ugaritic Literature* [1949], p. 6).

The foregoing criticisms will have made clear some of the graver weaknesses of the Graf-Wellhausen view of the origins of Genesis. From the very first the theory was ill-founded, being a priori in nature and characterized by a monolinear view of evolution (*see* PENTATEUCH; CRITICISM II). The error of this approach was compounded by a misinformed concept of what was actually scientific, leading to the questionable practice of manipulating the OT text in order to make it conform to the demands of the theory. When genuine literary evidence from the ancient Near East is considered, this theory can be shown to be erroneous and misleading.

D. Form-criticism and the Origin of Genesis. The vast majority of compositions, both ancient and modern, draw upon various kinds of source material, and Genesis is no exception to this principle. In the light of the conspicuous failure of European literary criticism of the Graf-Wellhausen variety to elicit accredited and realistic sources, however, it is clearly necessary to adopt some other approach that will accommodate itself much more readily to relevant, objective evidence. For this purpose the most satisfactory analytical tool available is that of form-criticism, through the exercise of which specific units of the book can be recognized and classified according to their form.

This is no arbitrary or subjective procedure of the Graf-Wellhausen variety, however, for to be valid it must necessarily take account of data relating to ancient life as furnished by Near Eastern archeological discoveries. In this instance the data involve, among other things, the literary form of many clay tablets unearthed at Mesopotamian sites. Those artifacts varied considerably in size and contained a wide range of material, including contracts, invoices, business ledgers, letters, genealogical information, diplomatic correspondence, and epic poetry. Tablets containing communications normally commenced with a title, continued with the text of the document, and concluded with a colophon. The colophon contained all that one would expect to find today on the title page of a book, though the modern use of the term "colophon" is restricted to the publisher's imprint at the foot of the title page. In an ancient colophon the title was sometimes repeated, the scribe or owner of the tablet was often identified, and it was not unusual for a date to be given. Certain tablets were rendered more personal by the imprint of the owner's button- or stamp-seal, as well as by the occasional recording of his family tree on the back of the tablet. If the length of the particular communication required more than one tablet, the proper order of the text was preserved by a system of numbering, as well as by titles and catch lines. The latter involved the repetition of

the first word or two of the succeeding tablet at the bottom of its precursor, a practice still followed in the printed Hebrew Bible. If a tablet formed part of a series, the colophon usually furnished a serial number and noted whether that particular tablet concluded the series. The object of all this was intelligibility and ease of reading, and the method can be attested readily from a great many Mesopotamian tablets.

1. Tōlᵉḏôṯ *as Indicative of a Colophon.* All commentators on Genesis, both liberal and conservative, have recognized the recurrence of a distinctive expression, translated in many English versions as "these are the generations of." While some scholars have observed that the phrase was intimately connected with the structure of Genesis, few knew how to proceed further because of their ignorance of the literary form of many Mesopotamian tablets. On the assumption that most of the separate sections in Genesis began with a genealogy, as sometimes occurred in ancient cuneiform texts, scholars supposed that the phrase actually comprised a preface or heading that related to what followed. Thus, for S. R. Driver (*Book of Genesis* [*WC*, 1904], p. ii; *Intro. to the Literature of the OT* [1912], pp. 6f.), it indicated that the principal person mentioned, along with his offspring, would form the basis of consideration in the section following the phrase until some other prominent individual was discussed in the narrative. That this principle of interpretation was faulty in at least one vital respect is shown in the case of Abraham, who though being the most widely described individual in Genesis, was never once mentioned by name in the phrase "these are the generations of." A careful study of the text shows, in contrast, that the preponderance of information given in relation to the person mentioned in the phrase comes before, not after, the expression "these are the generations of." Thus, following the notation about Adam in Gen. 5:1, nothing else is said concerning him except a statement of his age at death. Again, after the mention of Jacob in Gen. 37:2, the only other references to him are of a rather incidental character, with Joseph being the principal person under consideration. Quite clearly, therefore, the phrase "these are the generations of" cannot legitimately constitute a heading for a subsequent section. Thus it is legitimate to ask if this distinctive phrase points to the *conclusion*, rather than to the commencement, of a division in the MT. The word *dôr*, not *tōlᵉḏôṯ*, is the common word for "generation," and it can refer to a past (Isa. 51:9) or future (Ex. 3:15) period. Since the time of Gesenius, lexicographers have given the meaning of "history," "narrative," or "genealogical record" to the word *tōlᵉḏôṯ*, and it seems clear from the special use of the term on ten occasions in Genesis that it describes family history in its origins. If the term is held to be part of a phrase that concludes a section of the narrative material and thus points back to its beginnings, as is obvious in Gen. 2:4, it is possible to isolate eleven passages as comprising genuine literary sources for the book. When these eleven units are examined carefully, they can be seen to exhibit clearly a definite form-critical character which coincides with that demonstrated from a vast number of clay tablets from Mesopotamia. The term "book" in Gen. 5:1 can refer only to such a clay tablet, and in the light of what is now known about ancient Near Eastern practices of writing history, personal and other, it seems clear that this type of tablet record was in the nature of ancient historiography. It might also be noted, following Mesopotamian usage, that the person mentioned in connection with the term *tōlᵉḏôṯ* could have been either the writer of the tablet, the owner, or both. In Gen. 10:1 the allusion to the sons of Noah can be taken to mean that the preceding account of family history was in their actual possession, a practice that can be documented at great length from family archives uncovered at Mari, Nuzi, and other sites in Mesopotamia.

2. Structure of the Eleven Proposed Underlying Tablets. If *tōlᵉḏôṯ* indicates a colophon, it is possible to identify eleven literary units or tablets characterized by this form. The first tablet (Gen. 1:1–2:4), describing the origins of the cosmos, would have as its title "God created the cosmos" (regarding the MT "heavens and the earth" as a *merismus* form for "cosmos," "universe"). This title is repeated in the colophon (2:4), unless that verse is to be divided in half with the latter portion constituting the title of the second tablet. If not, the second proposed tablet (2:5–5:2), dealing with the origins of mankind, would have its own title which was lost either in transmission through tablet damage, as commonly occurred in the ancient Near East, or through editorial deletion. The recording scribe or scribes attempted to convey the antiquity of this material by the phrases "when they were created" (2:4), "when God created man" (5:1), and "when they were created" (5:2). Whereas the colophon of tablet one contained no hint of ownership, that of tablet two (5:2) spoke of this ancient historiography in terms of the Adamite family. Tablet three (5:3–6:9a), containing the Noachian histories, had as its title "when Adam"; it narrated his descent and mentioned Noah in the colophon (6:9a), perhaps as owner of the material. Tablet four, treating the histories of Noah's sons (6:9b–10:1), had as its probable title "Shem, Ham, and Japheth." This tablet ended with the colophon in 10:1, which repeated the title in a manner familiar from other Mesopotamian texts. The reference to the period "after the flood" may perhaps be a scribal attempt at dating the material.

Tablet five (10:2–11:10a) is a rather short source entitled (apparently) "the sons of Japheth"; it dealt with the Table of Nations and the incident in the land of Shinar. The colophon shows that it was in the possession of Shem. Another brief source, tablet six (11:10b–27a), containing the genealogical table of Terah, probably bore the title "Shem," and the mention of Terah's age (11:26) may be a scribal attempt at dating. Tablet seven, consisting of family histories in the possession of Ishmael (11:27b–25:12), dealt in considerable detail with the activities of Abraham. Its title was apparently "Abram, Nahor, and Haran," and the reference to Isaac living at Beer-lahai-roi (25:11) may be an attempt by the scribe to date the material, following a Mesopotamian tradition. This section seems closely linked to the contents of tablet eight, a small document (25 13-19a) originally written by Isaac. The occurrences recorded in these two tablets ended just prior to Isaac's death. He seems to have survived Ishmael by well over fifty years, according to the MT, and presumably gained possession of the family histories when Ishmael died. Tablet nine (25:19b–36:1), apparently entitled "Abraham begat Isaac," dealt in some detail with Esau and Jacob, concluding with the death and burial of Isaac. These narratives were of Edomite origin, as the colophon in 36:1 makes clear. Another rather fragmentary record, also from Edomite sources, comprised tablet ten (36:2-9), which preserved a record of the descendants of Esau. A scribal attempt at dating in the colophon may perhaps be seen in the statement that, at the time, Esau was living in the area of Mt. Seir (36:8). An explanatory gloss, obviously a later scribal addition, equated Esau and Edom. The final postulated source, tablet eleven (36:10–37:2), also seems to have come from an Edomite background, with Gen. 36:31 appearing to comprise a post-Mosaic scribal comment that may have originated in the

early monarchy. An attempt at dating by the scribe who compiled this source may be seen in the statement (coming immediately before the colophon) that Jacob was then living in the land of Canaan (37:1). It was not long after this that Jacob migrated to Egypt, but when the narrative closed he was still residing in the area of Hebron.

If these eleven literary units are genuine underlying literary sources for Genesis, as form-critical study would suggest, then it is apparent that they have been edited in such a way as to minimize interference with the texts of the various tablets. As is now known, it was common for Babylonian and Egyptian scribes to insert explanatory glosses, update grammatical and syntactical forms, and replace ancient place names with their more modern counterparts, without impugning the integrity of the original authorship. The tactful nature of the editorial changes in Genesis might well point to the compiler's high degree of veneration for the sources because of their origin and antiquity. An attempt to link certain of the tablets in series, following Mesopotamian tradition, may be seen in 6:9; 11:10; 11:27; 25:19; and 36:1, in which the last word of a suggested tablet is the same as the first word of its successor, excluding the obvious gloss in 36:1. If this was a genuine attempt to preserve continuity and a rough chronological sequence, it would constitute a primitive form of what at a later time came to be the more highly developed catch lines, by which Mesopotamian tablets were linked in series. As a means of emphasizing the ancient historiographic character of the material (over against any mythical or legendary estimate), it should be noted that none of the tablets contains any information that could not have been known to the individuals mentioned in the colophons as scribes or owners of the various sources. Ancient Near Eastern literary traditions furnish ample support for the composition of Genesis on the basis of the foregoing proposed tablets, with the addition of the Joseph narratives, but deny any credibility whatever to a book of origins compiled on the basis of eighteenth- and nineteenth-century literary-critical speculation. It is thus regrettable that eminent orientalists such as E. A. Speiser and T. J. Meek, who were thoroughly conversant with Near Eastern tablet material, were so committed to the traditions of European documentary speculation that either they were unaware of the real nature of the sources in Genesis, or were unwilling to go in the direction indicated by all the evidence. Unfortunately scholarship of this kind has not abandoned the a priori character of the Graf-Wellhausen school.

3. Joseph Narratives. This portion of material (Gen. 37:2b–50:26) completes the book of Genesis. Egyptological research has done much to illumine the cultural background of these narratives (cf. P. Montet, *Egypt and the Bible* [Eng. tr. 1968]; J. Vergote, *Joseph en Égypte* [1959]; K. A. Kitchen, *Tyndale House Bulletin,* 5-6 [1960], 4ff.; etc.), and consequently only a few matters will be noted here. The best indications at present are that Joseph and his brothers were settled in Egypt during the Hyksos period (*ca.* 1715-1570 B.C.), perhaps *ca.* 1700 B.C. The Hyksos were Semites who employed the iron-fitted, horse-drawn chariot and compound Asiatic bow to conquer Egypt and establish their own regime there. Only during a period of foreign conquest would it have been possible for a non-Egyptian such as Joseph to succeed to high office and promote ambitious schemes that included the nationalizing of the land (Gen. 47:13), since under native Egyptian leadership all foreigners would have been excluded from important positions in government. While there were many Semites working as servants in Egyptian households during the Middle Bronze Age (*ca.* 1950-1550 B.C.), as indicated by Albright (*JAOS,* 74 [1954], 222ff.), comparatively few became household stewards, as Joseph did under Potiphar (G. Posener, *Syria,* 34 [1957], 145ff.), or rose to the position of grand vizier of Egypt (Gen. 41:40; 45:8). A mural from the time of Seti I (*ca.* 1308-1290 B.C.) has depicted the way in which the grand vizier was formally invested with his golden collar of office. Only high state officials normally rode in chariots and merited the command to passersby to "stand to attention" (Gen. 41:43; NEB, incorrectly, "Make way!"). The incidence of periodic famines in Egypt was noted by inscriptions on the walls of tombs at Beni-hasan as early as 1980 B.C., and also from a later period at El Kab.

Contrary to earlier assertions, the narrative dealing with the attempted seduction of Joseph by Potiphar's wife (Gen. 39:7-23) contains no other parallels with the *Tale of the Two Brothers* (A. Erman and A. M. Blackman, *Literature of the Ancient Egyptians* [1927], pp. 150ff.) aside from indicating that such an occurrence was not an isolated incident. Pharaoh's command to Joseph's family to leave their possessions behind in Palestine and settle in Egypt (Gen. 45:17, 21; 46:5) was matched by the instructions of an earlier pharaoh to Sinuhe, a fugitive Egyptian living in Syria *ca.* 1900 B.C. Among other evidence, a final touch of veracity is added by the last verse in Genesis (50:26), which spoke of Joseph dying at the age of 110 and being embalmed before being placed in an anthropoid coffin. In ancient Egypt, to credit the deceased with a life span of 110 years was tantamount to saying that he had lived an ideal, productive, and blessed life. Embalming had been practiced from the beginning of the Old Kingdom period (*ca.* 2700 B.C.) as part of a well-developed eschatology and proved to be one of the most characteristic of Egyptian mortuary customs.

4. Authorship and Editorial Activity. Whether the Joseph stories were in written form by Moses' time is uncertain, although if Near Eastern scribal practices were being followed, Joseph's achievements would most probably have been recorded as they occurred. It is quite probable that Moses had a hand in producing the elegant literary form in which they are extant in Hebrew. If it is correct to assume that the first thirty-six chapters of Genesis had originally had an independent existence as cuneiform tablets, it would have been a comparatively easy matter for a talented person such as Moses to compile the canonical book by arranging the tablets in a rough chronological order, adding the material relating to Joseph, and transcribing the entire corpus on a leather or papyrus roll. As opposed to the Graf-Wellhausen contention that writing was unknown during the time of Moses, numerous archeological discoveries have demonstrated that several literary means of communication were available in the Mosaic age. Thus, the Amarna texts show that Babylonian cuneiform was the diplomatic language of the day, while Egyptian hieroglyphic script had been in existence for many centuries. In addition, excavations at Râs Shamrah have recovered tablets containing the native cuneiform language (Ugaritic), to which can be added the syllabic script used at Byblos in Phoenicia and the linear alphabetic form of writing also employed in Canaan during the Late Bronze Age (*ca.* 1550-1200 B.C.). Supplementing these was the "proto-Sinaitic" script (*ca.* 1500 B.C.), in which certain inscriptions recovered from the turquoise mines of Serābîṭ el-Khâdim had been written. A person like Moses, who was by tradition educated in all the wisdom of the Egyptians (Acts 7:22), would thus have had ample means for recording his sources in the language of his choice. Perhaps at this time leather began to be used in preference to papyrus or clay tablets as a more

durable material, and this would seem to be implied by the passage in Nu. 5:23f.

Once all this material had been transcribed, it would then have achieved the kind of literary fixity characteristic of Near Eastern annalistic and historiographic sources, and from that time onward would be subject only to the kind of modification current in ancient oriental scribal circles. Extant literature shows that in Babylonia and the Near East generally, apart from Sumer, such modification included the modernizing of archaic grammatical forms, sometimes on a thoroughgoing basis, as well as the updating of ancient names of places and persons by successive generations of scribes, and the insertion of explanatory glosses for the guidance of the reader. All this was done strictly in the interests of intelligibility and contemporaneity. This modest degree of literary freedom was forbidden to Sumerian scribes, however, who for generations reproduced without alteration the texts as they had received them. Modern comparative historiographic studies have made it clear that, along with the Hittites, the Hebrews were the most careful recorders of history in the ancient Near East, and this tradition of scribal scrupulosity would obviously extend to other than purely historiographic material. Yet no evidence indicates that these scribes thought their activities infringed upon or compromised the literary integrity of the original composition, or usurped the place or function of the attributive author. On such a basis of scribal operation one can explain the later additions or anachronisms in Genesis, e.g., the earlier waves of sea-peoples would be known by their later name of Philistines (cf. Gen. 21:34; 26:14).

5. Translation Problems. On the whole, English translations of the first dozen or so chapters of Genesis are so literal that they betray the translators' ignorance of the Mesopotamian background that Genesis so faithfully reflects. Even translators who are versed in Mesopotamian studies are so frequently stultified in their efforts by the dead hand of past literary-critical tradition that their versions prove to be just as inadequate as others'. Even when such influences are not immediately present, other factors combine to furnish a rendering that is less than satisfactory in the light of modern linguistic knowledge. For example, most modern English renderings of Genesis (including the NEB) translate the very first word of the Hebrew Bible incorrectly, giving it the meaning "in the beginning," when there is quite clearly no definite article in the MT. A more accurate rendering would be "by way of beginning," "to start with," a translation that has the merit of removing an absolute temporal beginning from the fact of God's creative activity. Or, as Augustine expressed it (*Conf.* xii), *Non in tempore sed cum tempore deus finxit mundum* ("Not in time but with time God created [lit. shaped] the world"). The same verse contains what seems to be one of the most ancient of literary expressions, the significance of which was not generally known or appreciated until recently. Familiar to modern scholars as *merismus*, it was a means of expressing the totality of a concept through the use of words paired in an antonymic relationship. It originated with the Sumerians, was subsequently adopted by the Egyptians, and became current in the Near East, where in the writings of the Hebrews it occurred in phrases such as "evening and morning," "young and old," "from the greatest to the least," to express different kinds of totality. The Sumerian phrase *an-ki* ("heaven-earth") meant "cosmos," and therefore its counterpart in Gen. 1:1; 2:1, 4 should also be translated in that manner, and not in the literal sense of all English versions. Translators are slowly becoming aware of the fact that the AV "spirit of God" in Gen. 1:2 should actually be rendered "an awesome gale," using *'ĕlōhîm* as an adjective, following the pattern of 1 S. 14:15; Jonah 3:3; etc. The "evening-morning" *merismus* of Gen. 1:8 should be more accurately rendered "this was the second complete phase of the entire cycle" in order to capture the meaning as understood by the original author. This procedure should obviously be adopted *pari passu* throughout the chapter in the relevant verses.

In Gen. 2:6 the term "mist" (NEB; RSV mg. "flood") is an erroneous translation for "river," "canal," which when rectified points to the irrigation culture characteristic of early Near Eastern civilizations. The four-branched "river" in Eden clearly consisted of two rivers that would be recognized as such at the present day, i.e., the Tigris and Euphrates, and two major irrigation canals, Pishon and Gihon, which have long since disappeared from the area. That Babylonian had no separate words for "irrigation canal" and "river" accounts for the confusion in modern translations, which, of course, would not be present in the mind of the original author. On such a basis of interpretation it is obviously unnecessary to consider countries such as India and Ethiopia as possible locations of Pishon and Gihon.

Again, the time-honored translation of *ṣelāʿ* as "rib" in Gen. 2:21 is as arbitrary as it is incorrect, for the context makes it clear that the term describes part of the essence of the original man's totality, not just an organ or a portion of bony tissue. When viewed in this context, the ancient comment in Gen. 2:24 has much to say about the manner in which a compatible monogamous union reflects the primal integration of human personality. Gen. 6:16, which deals with the construction of the ark, is another difficult passage for the translators, and not least where the word *ṣōhar* is involved. Both the RSV and NEB render it "roof," with the former reading "window" in the margin. The NEB translation suggests a roof having a pitch of one cubit, but this would make the ark an entirely closed box without any light inside. Since it had to have three decks, it would obviously have a roof in any event, so that probably the best way to render *ṣōhar* would be to commence the verse: "You shall make a peripheral window for the ark, and you shall take it to within a cubit of the top. . . ."

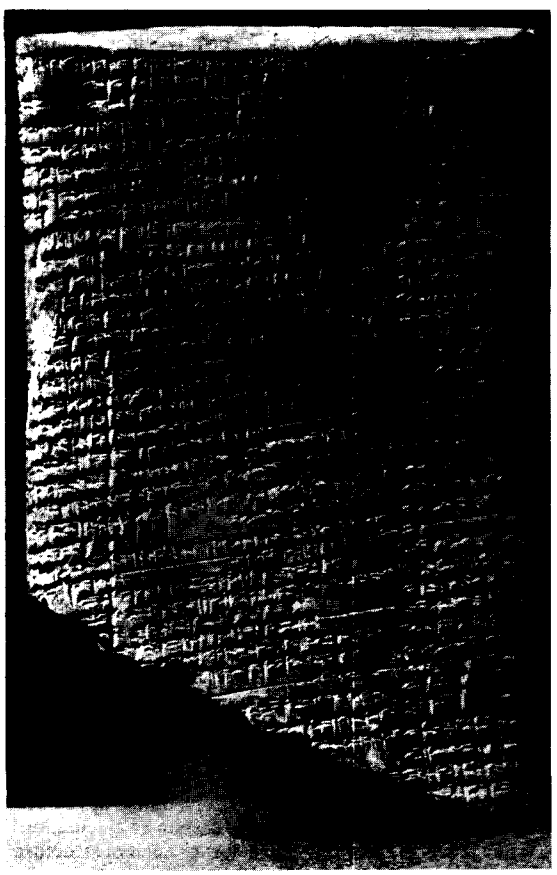
Other points of interest to translators include a rare grammatical expression in 40:10, which should be translated, ". . . just as it was on the point of budding, its blossoms shot up . . . ," instead of the RSV, NEB rendering, ". . . as soon as it budded. . . ." The command given by the Egyptian outriders in Gen. 41:43, translated "Bow the knee" by the RSV and "Make way!" in the NEB, seems to have been a characteristic Egyptian order meaning literally, "Heart to thee!" and more properly rendered by "Stand to attention!" or some similar expression. In the blessing of Jacob (Gen. 49), verse 14 should begin, "Issachar is an alien donkey-herder camping between the sheepfolds . . . ," a rendering which involves a slight alteration in one word of the MT. These and numerous other instances show that advances still have to be made before it is possible for modern readers to appreciate the significance of the text as the original authors envisaged it.

III. Archeology.—*A. Genesis and Sumerian Historiography.* The Sumerians were evidently the first Near Eastern people to write as well as make history. They had a dynamic appreciation for life and kept records of all manner of happenings in both the past and present. Some of these sources have survived in the form of king lists, official inscriptions commemorating the building of palaces and temples, court annals, chronicles, epic com-

GENESIS

positions (often based on historical personages and events, which had subsequently become overlaid with legend and myth), and a number of other nonliterary sources. Like most of the ancient Near Eastern peoples, the Sumerians were profoundly superstitious, and their great sense of inferiority virtually demanded that the course of events in the cosmos should be governed by decisions that came from superhuman beings. This feature was a prominent element in their myths and legends and indicated that, for them, history was primarily theocratic. The deities venerated by the Sumerians were originally the forces of nature as experienced personally; thus the metaphysical force that activated history had a distinctively elemental character to it and partook of reality in this special manner. The Sumerians began the Mesopotamian tradition of writing history against a cosmic background, presenting in their narratives what can best be described as a world view. In their cosmological material they represented themselves as one member-group of the human race that inhabited one of the four regions into which they had divided the world. The Sumerians had had a "golden age" in their history, when "there was no fear, no terror. Man had no rival" (S. N. Kramer, *The Sumerians* [1970], p. 262). But because the gods had planned unethical, immoral, and criminal behavior as part of human conduct, this state of bliss was short-lived. One Sumerian composition even spoke of the creation of woman against the background of the paradiselike land of Dilmun, located E of Sumer. In the story, a goddess healed one of the god Enki's diseased organs, which proved to be a rib. Consequently the goddess came to be known as "the lady of the rib," or, as an alternative translation, "the lady who makes live." While this narrative clearly has little in common with that in Gen. 2, it makes the latter much more intelligible if envisaged against a Sumerian literary background rather than one involving the second temple and a postexilic date, as nineteenth-century literary criticism would have had its adherents imagine.

Akkadian (originally Sumerian) account of the gods Marduk and Aruru creating the world. Babylonian cuneiform tablet (6th cent. B.C.) from Sippar (Trustees of the British Museum)



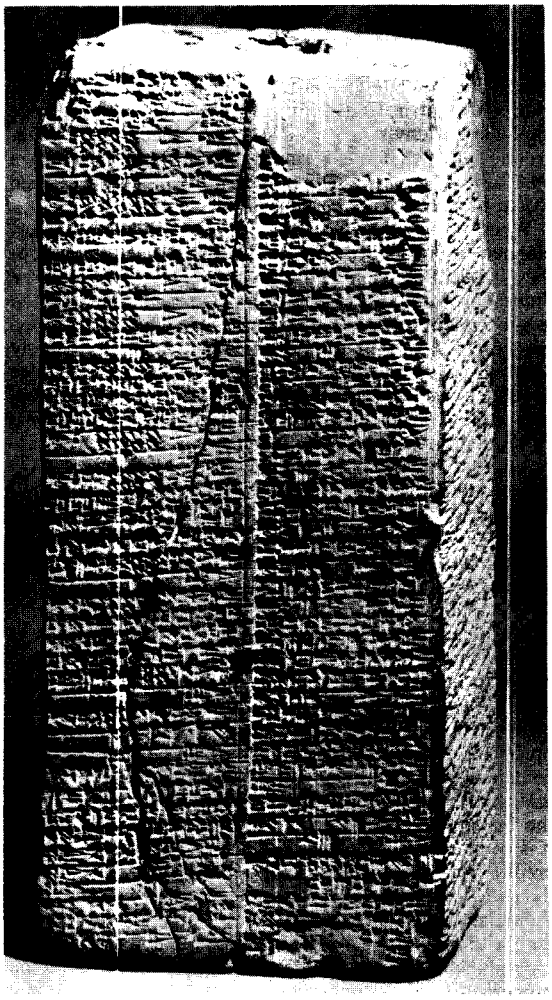
When the gods of Sumer, angered by human clamor, planned to engulf them by means of a devastating flood, they brought about a deluge that in effect destroyed the Sumerian world. This cataclysmic event was perpetuated in subsequent Babylonian tradition, even though its scope was confined to southern Mesopotamia. Again, it is hardly surprising that the biblical account of a similar deluge described an occurrence of "world" proportions, particularly if that narrative, too, came from a Mesopotamia cultural milieu. Once this is understood it will be apparent that the Noachian flood involved the Mesopotamian world only, and not the entire earth.

Extant compositions indicate that the Sumerians were far more interested in composing religious epics and mythological texts than they were in historiography. Despite this they devised dating schemes for their historical records, and this procedure involved the naming of the years in relation to important political and religious events. Even more precisely, the Sumerians scribes began to list all the year names in a given regnal period, or in a succession of such reigns. The compilers of the celebrated king list (cf. S. N. Kramer, *The Sumerians*, pp. 328-331) apparently used this system of date formulas, containing as it did a record of the majority of the Sumerian rulers with the computed length of their reigns. While the material presents certain problems for the historian, it is of interest for Genesis because of the large numbers credited to the regnal years of many rulers in the earlier dynasties. Some scholars have accused both the ancient Sumerian scribes and their Genesis counterparts of mixing fact with fancy in exaggerating the longevity of specific individuals. It would appear, however, that a common numerical tradition underlies both types of material, and therefore it is important for modern scholars to try to discover the basis upon which the computations were made. It is possible that a precursor of the traditional Chinese method of reckoning ages was used, or alternatively, that the numbers were pictorial in character and described the relative importance of the individual to the authors. As far as Genesis is concerned, the reference to Joseph (50:26) falls into this latter category, as observed above, although this, of course, is Egyptian, not Mesopotamian, in provenance (cf. J. W. Wenham, *Tyndale House Bulletin*, n. 18 [1967], 2-36). Because the literary and other problems presented by the first six proposed tablets underlying Genesis, i.e., 1:1–11:27, have so much in common with some that occur in Sumerian and other Near Eastern writings, it seems only legitimate and appropriate to evaluate them against what is now known of life and culture in that early phase of human history.

See also SUMER; SUMERIANS.

B. Genesis and Near Eastern Archeology. To what extent the earliest chapters of Genesis can be related to specific phases of Sumerian history is uncertain. It seems clear, however, that the background of Gen. 2–3 is in harmony with the river- and irrigation-culture that the Sumerians apparently originated and certainly developed. One of the most significant archeological discoveries concerning early biblical traditions occurred in 1966, when some Russian excavators working at the foot of Mt. Ararat

GENESIS



The main source of the Sumerian king list, which records most of the Sumerian monarchs and the length of their reigns from the beginning of the empire until the fall of Isin (*ca.* 1800 B.C.). The text also mentions a flood "that swept over (the land)" early in Sumerian history (Ashmolean Museum, Oxford)

unearthed what they claimed to be the oldest known astronomical observatory and iron smeltery in the Near East. An estimated two hundred smelting furnaces employing a surprisingly sophisticated technique for producing alloys of copper with tin, iron, zinc, and arsenic were uncovered. Other smelters were designed in order to produce a variety of glasses, metallic paints, and ceramic ware. The site, located near the joint boundaries of Iran, Turkey, and the U.S.S.R., seems to accord very well with the activities of the sons of Lamech (Gen. 4:22), and shows the amazingly advanced civilization in that area toward the close of the Chalcolithic Age (4000-3200 B.C.). The technology associated with the smelting of iron was apparently rediscovered by the Hittites at an early period in the Middle Bronze Age (*ca.* 1950-1550 B.C.) and manufactured iron tools have been recovered from Early Dynastic III levels (*ca.* 2600 B.C.) at some Sumerian sites (cf. *CAH* [3rd ed.], I/2). By the Early Iron Age ore smelting was being promoted by the Philistines at various Canaanite sites. The discoveries at the foot of Mt. Ararat, however, throw interesting light on the Genesis tradition relating to the origin of metallurgical activity.

The Noachian Deluge, described in Genesis by the rare word *mabbûl* (cf. Ps. 29:10), was evidently a flood of stupendous proportions (cf. Gk. *kataklysmós* in Mt. 24:38f.; Lk. 17:27; 2 Pet. 2:5). On the assumption that the biblical Flood might have left identifiable traces behind, attempts have been made to associate one or more of the alluvial layers discovered in Mesopotamia with that catastrophic event. From time immemorial that part of the world has been subjected to sudden inundations, and the tradition of a vast flood established itself in Sumerian literature during the early dynastic period. Some texts even located the main inundation at Shuruppak, and a fragmentary Sumerian tablet from the 3rd millennium B.C. described the event in six columns of text. A later poem from Babylonia, the celebrated Gilgamesh Epic, leaned considerably upon Sumerian tradition in furnishing a Babylonian account of a devastating flood at Shuruppak from which a godly man was preserved by means of an ark. When late Jemdet Nasr levels at Shuruppak were explored, a large deposit of alluvial clay was revealed. At Kish, an analogous stratum discovered by Langdon measured 46 cm. (18 in.) in depth, while at Ur, Woolley found a 2.5-m. (8-ft.) alluvial layer dating from the middle Ubaid period. Both Langdon and Woolley claimed their discoveries as the material remains of the biblical Flood, but problems arose when the two layers were found to have originated at different periods in the chronology. Nor do similar levels at Uruk and Lagash correspond with the suggested dating of the Ur stratum. At Kish, Watelin uncovered a number of alluvial levels, two of the larger ones being separated by a 6-m. (19-ft.) section of debris, while at Tell el-Ubaid, 6 km. (4 mi.) from Ur, there were no indications of water-laid clay when Woolley excavated the site. Since it is in the nature of alluvial deposits to be virtually free from any form of positive identification, attempts at dating have to be related to associated levels. When several water-laid deposits are at a given site, separated by numerous layers of debris, the problem of deciding which one of them, if any, represents the biblical Deluge becomes correspondingly difficult. Indeed, not a few scholars have maintained that positive identification of the Noachian Flood level is not only improbable but virtually impossible in the present state of the evidence, whether the Deluge was local or not. Despite this pessimism, however, it is not too much to hope that further discoveries will help to resolve at least some of the more pressing difficulties in this area.

Since 1856, more than two hundred persons have claimed to have seen some sort of structure on Mt. Ararat resembling an ancient vessel. This has been taken as an indication that the remains of the celebrated ark built by Noah to escape destruction during the Flood have somehow been preserved under the ice covering the mountain. It is possible to identify the mountains of Ararat (Gen. 8:4), the traditional resting place of the ark, with the *Urarṭu* of Assyrian records and modern Armenia. Ararat was a country in the general district of Armenia, with Lake Van as its geographical center. The particular object claimed by many as constituting the remains of Noah's ark is located at the 4300-m. (14,000-ft.) level of Mt. Ararat, and for some time has been the focus of antiquarian and archeological interest (cf. Violet Cummings, *Noah's Ark: Fact or Fable?* [1972]; J. Warwick Montgomery, *Quest for Noah's Ark* [1972]). Explorers have recovered pieces of hand-tooled lumber from the area, some of which have been estimated to be between four and five thousand years old, though others have been dated at only *ca.* 1500 years, using carbon-14 calculation.

While it seems clear that some sort of ancient structure is involved, a number of difficulties remain for the claim

that it is in fact a vessel and the one used by Noah and his family. In the 1960's and 1970's topographical and political difficulties have conspired to hinder the excavation of the artifact, whatever it might be, and even if these are resolved it will not be possible to identify the structure with certainty as Noah's ark unless it is in fact a vessel, and if other associated artifacts (such as tablets demonstrating ownership) are also present at the site. If the material is excavated and found to have come from some sort of medieval shrine on the mountain, as some have imagined might be the case, there would seem to be little point in searching for any other ark in the location. The same would apply if the ancient timber were proved to have been part of an ark reconstructed for purposes of Christian piety either before or after the Crusades. In either of these two cases, however, definite proof concerning the nature of the artifact would need to be furnished. Were an ancient vessel to be found, it would be by no means impossible for inscribed tablets demonstrating ownership to be recovered from the site, too, since materials of the later variety have been recovered in quantity from third-millennium B.C. sites in Mesopotamia.

See also FLOOD (GENESIS).

The excavations of Woolley at Ur of the Chaldees have provided a rich background of information regarding the history of that city. The Sumerian king list has claimed that Mes-Anne-pada was the founder of the 1st Dynasty, and this was confirmed dramatically when a tablet was found at Tell el-Ubaid. Dated *ca.* 2700 B.C. it read as follows: "A-Anni-pad-da King of Ur, son of Mes-Anni-pad-da King of Ur, has built this for his Lady Nin-kharsag" (C. L. Woolley, *Ur of the Chaldees* [1950], p. 73). The artifacts unearthed showed graphically the advanced nature of the culture of Ur during the 1st Dynasty. Temples and other structures revealed the presence of elaborate mosaic work and elegantly decorated columns, while a number of copper bulls were recovered in fragmentary condition. From the lower levels of a burial area outside the walls of the early city came the celebrated "royal tombs" of Ur. Though some have suggested that these burial places contained the bodies of priestly persons sacrificed in fertility rites rather than the remains of royalty (cf. S. Smith, *Journal of the Royal Asiatic Society* [1928], pp. 862f.; E. A. Speiser, *Antiquity,* VII [1934], 451; H. Frankfort, *Kingship and the Gods* [1948], p. 400 n.12), they were clearly the tombs of important individuals in the state, if only because they were constructed principally from limestone blocks that would have to be imported from a considerable distance. Artifacts recovered from the site included a lapis lazuli cylinder, objects and vessels of gold, silver, and semi-precious stones, jewelry, weapons, and some funerary objects. Among the latter were one or two exquisitely inlaid harps and two statues of goats standing erect before a bush (C. L. Woolley, *Ur of the Chaldees,* plates 5[a], 6).

The high standard of workmanship at this time is adequately illustrated by the superb golden helmet recovered from the grave of "Mes-kalam-dug, hero of the Good Land." It had been hammered into the form of a wig from a sheet of solid gold, and on the surface were locks of hair in relief, with the individual hairs engraved in delicate symmetrical lines. From the same site came the so-called Standard of Ur, a wooden panel 56 cm. (22 in.) long and 23 cm. (9 in.) wide, with triangular end pieces. When restored, one side of the panel depicted the theme of war, with soldiers and military equipment fashioned skillfully from shell and set into a lapis lazuli background. On the other side, the panel expressed the activities of peace in terms of a lavish regal feast at which musicians performed in the presence of the king and his guests. In conformity with the Sumerian literary device of *merismus,* in which opposite concepts were paired to describe the totality of a given situation, the mosaic panel would thus symbolize all life activities at Ur.

A significant renewal of culture occurred during the magnificent 3rd Dynasty (*ca.* 2070-1960 B.C.), whose first ruler was Ur-Nammu. This pious and energetic king erected a massive ziggurat or staged temple some 21 m. (70 ft.) high. It was unique in having no straight lines in its structure, but instead employed curves and slopes to convey the effect of lightness and strength. One of the workshops associated with this temple produced a dozen varieties of woolen cloth. Several tablets recovered from the ruins contained the names of the weavers, their rations of food, and an inventory of supplies and finished products (*LAP,* p. 44). Abraham apparently was born at Ur during this period, as can be deduced from archeological discoveries in the area of Bâb edh-Dhrâʿ, SE of El Lisan, located E of the Dead Sea. This site, apparently a place of festival and pilgrimage between *ca.* 2300 and 1900 B.C., was no longer patronized after Sodom, Gomorrah, and the other cities of the plain were destroyed *ca.* 1900 B.C. Since Abraham was in Palestine at that period (Gen. 19), his birth would seem to have occurred at the end of the 20th cent. B.C. *See also* ARCHEOLOGY OF MESOPOTAMIA III.G.

Excavations at Mari, Nuzi, and Alalakh have enriched our understanding of many aspects of the patriarchal narratives, which can now be placed confidently against a background of Middle Bronze Age culture. To mention just a few examples, the names of Abraham, Isaac, Jacob, Laban, and Joseph were in common use during the 2nd millennium B.C., while in the Balîkh valley S of Haran the names of some patriarchs were perpetuated in the designation of such sites as Serug, Peleg, and Terah (*FSAC,* pp. 236f.). From the Horite city of Nuzi (Yorgan Tepe) came some twenty thousand tablets, dated mostly in the 15th cent. B.C., that dealt among other things with the practice of adoption. Very often, it seems, this procedure was used as a device to mask the transfer of land, which was divine property and could not legally be bought or sold. The adopted person was expected to bring a filial gift amounting to the value of the property involved, and came into possession of it when the adopting parents died. Genuine adoptions by childless couples were also common, and even slaves could be adopted for this purpose. Possession of the terra-cotta household gods or teraphim was an indication of the rights of inheritance, but if they were originally the property of an adopted son, they were forfeited when a natural son was born to the adopting couple.

The birthright or right of primogeniture could be negotiated under Nuzi law, and this is paralleled by the transaction occurring between Esau and Jacob (Gen. 25:31-34). Birthrights do not seem to have been transferred to people other than members of the same family, since they were after all the property of specific family units. Quite frequently Mesopotamian marriage contracts obliged a sterile or infertile wife to give her handmaid to her husband as a concubine in order to preserve the family line (C. H. Gordon, *BA,* 3 [1940], 3), a fact which clarifies the situation relating to Abraham and Sarah (Gen. 16:2). An important provision of Nuzi law made it mandatory for the offspring of a concubine to remain in the family, and attempts to expel the mother and child were regarded in a very serious light (cf. Gen. 21:11). Mesopotamian adoption traditions seem to throw light on the relations between Jacob and Laban, the latter apparently having no male heir when he adopted Jacob. As was customary, Laban gave his daughters to his heir as wives after a

suitable period of service had been completed, and the agreement included a provision to the effect that Jacob would forfeit his inheritance rights if he married any other women. From the way in which Laban behaved as a patriarch it would seem that Jacob was regarded in every sense as an adopted son, so that his wives were still Laban's property and thus not free to leave Laban's household. Rachel's flight may have been prompted by the birth of Laban's natural sons, who would have taken over Jacob's rights of primogeniture. Her theft of the household gods (Gen. 31:19) was evidently meant to secure her husband's privileges in this regard. At Nuzi, impending death furnished an opportunity for the bestowing of patriarchal blessings on members of the family (cf. Gen. 27:27-29; 49:3-27). Such pronouncements were in the nature of a last will and testament on the part of the dying person, and were regarded as legally binding on all those involved (cf. Gen. 27:33). In one Nuzi text a dying father willed a certain young woman in marriage to his bachelor son, and subsequently a court ruling upheld the latter's right to proceed with the marriage.

Archeological discoveries have now shown clearly that references to domesticated camels in Genesis are by no means anachronistic, as some earlier scholars supposed. While camel caravans seem to have been used regularly only from the Late Bronze Age onward, archeologists have found numerous bones of domesticated camels. Thus when Parrot was excavating Mari, he found camel bones in the ruins of a house dated in the pre-Sargonic period (*ca.* 2400 B.C.). An eighteenth-century-B.C. relief from Byblos pictured a camel in a kneeling position, and a socket on the back showed that the animal's hump and its load had been attached separately. In accord with patriarchal traditions, cylinder seals from Middle Bronze Age Mesopotamia showed riders seated upon camels. Excavations on the island of Bahrain (cf. G. Bibby, *Looking for Dilmun* [1970], pp. 303ff.) have revealed the existence of camel bones that may go as far back as the 4th millennium B.C., while other evidence for the early domestication of the camel has been recovered from the Indus valley (cf. J. Marshall, *Mohenjo-daro and the Indus Civilization* [1931], I, 28; II, 660), and in southeast Persia (cf. S. Piggott, *Ancient India* [1948], p. 36).

At Alalakh, texts were found at Levels VII (*ca.* 1900-1780 B.C.) and Level IV (15th cent. B.C.) that proved to be even closer topographically and chronologically to the patriarchal period than most of those coming from Assyrian sites. Among the social customs at Alalakh that bore on patriarchal traditions were those wherein the father had the privilege of disregarding the rights of primogeniture and choosing an heir from among his sons. In the light of this practice it is possible to see new significance in the events relating to Manasseh and Ephraim (Gen. 48:13-20), the repudiation of Reuben (49:3f.), and the status accorded to Joseph (48:22). Other traditions of Alalakh society illumine some Hebrew practices in the Late Bronze Age and Early Iron Age. Discoveries at Boghazköy in Turkey, the site of the ancient Hittite capital of Hattusas, have thrown light upon the transaction that resulted in Abraham's acquiring the cave of Machpelah. One who purchased a complete unit of property was required, under contemporary Hittite law, to render certain feudal services of a still uncertain nature to the vendor. If only a portion of the property was sold, however, such duties were no longer mandatory for the purchaser. With the latter situation doubtless in mind, Abraham wished to purchase only a part of the entire holding (Gen. 23:9), but Ephron was unwilling, thus compelling Abraham to become legally feudatory. The sale was ratified in public, according to local custom, and the price was paid in weighed amounts of silver. The mention of trees in the transaction (Gen. 23:17) reflected the Hittite practice of listing the precise number of trees growing on every piece of property sold.

Some indication of what the Hebrew patriarchs must have looked like has been afforded by a tableau in relief from a tomb at Beni-hasan in Egypt (*ca.* 1900 B.C.) (*ANEP*, no. 3). It depicts a group of Semitic seminomads on their way to an Egyptian city, dressed in multicolored clothing and carrying their wares on donkeys. While the men wore short skirts and sandals, the women were attired in long dresses, fastened at the shoulder with a clasp, and shoes. This kind of clothing may well have appeared rustic to the fastidious Egyptian townspeople, but it was by no means primitive, and was practical in nature.

The Egyptian background of the JOSEPH narratives (*see* EGYPT) has been well attested by archeological discoveries, as has been noted earlier. The rise to power of a Semite like Joseph is best associated with the period of the Semitic-Asiatic Hyksos rulers, and the location of their capital, Avaris, accords well with conditions occurring at the end of Genesis and the beginning of Exodus. The phrase "overseer of his house" (Gen. 39:4) is a direct rendering of a title used of officers in Egyptian noble houses, while Egyptian inscriptions contain the familiar designations "chief of the butlers" and "chief of the bakers" (Gen. 40:2). These titles appear to be very ancient, and it is probable that by Joseph's time the original functions of the office had changed drastically while the archaic title still survived. The royal birthday celebrations in Egypt normally included the pardoning of prisoners (Gen. 40:20), while the place given to magic, the general attitude adopted toward Asiatic seminomads (Gen. 46:34; cf. 43:32), the 110 years of Joseph as a symbol of a fruitful, creative, and blessed life, along with the embalming of Jacob and Joseph, are all readily attestable indications of genuine background of Egyptian culture for the Joseph narratives.

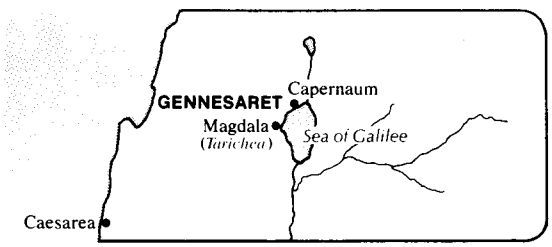
GENNAEUS gə-nē'əs [Gk. *Gennaios*] (2 Macc. 12:2); AV GENNEUS. Father of APOLLONIUS, one of the Syrian generals who troubled the Jews while Lysias was governor for Antiochus Eupator. The description is added to distinguish the Apollonius here mentioned from several others of the same name.

GENNESARET gə-nes'ə-ret, **LAKE OF.** *See* GALILEE, SEA OF.

GENNESARET gə-nes'ə-ret, **LAND OF** [Gk. *Gennēsaret*]; AV Apoc. GENNESAR. The fertile plain on the northwest bank of the Sea of Galilee, which in Jesus' time enjoyed a reputation of fabulous fertility and was heavily populated. The name, which occurs twice in the Gospels (Mt. 14:34 par. Mk. 6:53), is a lengthened form of Gennesar (cf. AV 1 Macc. 11:67, Gk. *Gennēsar*; Josephus *BJ* iii.10.7f. [506, 516]). Some scholars, following the Targums, identify the name with Chinnereth of the OT (Nu. 34:11; Dt. 3:17; Josh. 11:2; 12:3; 13:27; 19:35; 1 K. 15:20), while others treat it as a compound of Heb. *gan* (garden) with a proper name, or even Heb. *gan ha-śar*, "garden of the prince." The modern designation is el-Ghuweir, "the little valley."

Gennesaret is a coastal plain about 5 km. (3 mi.) long and 1.5 km. (1 mi.) wide, extending from Magdala to just S of Capernaum. Sheltered from the wind by mountains



and lying 210 m. (682 ft.) below sea level, it consists of well-watered alluvial soil and enjoys a subtropical climate. (*See* Plate 15.) Josephus (*BJ* iii.10.8 [516]) described it as an area in which "there is not a plant which its fertile soil refuses to produce," with a climate "so well-tempered that it suits the most opposite varieties." The vigorous agricultural activity by the present Israeli state has brought to the plain once again the verdant qualities it had in the NT period. In addition to the walnuts, figs, olives, and grapes mentioned by Josephus, modern irrigation methods have brought forth products such as citrus fruits, bananas, peppers, and tomatoes.

The plain of Gennesaret was an integral part of the commercial complex that characterized the northwest side of the lake in Jesus' day. Not only was it a rich agricultural center, but the area also played an active role in the great fishing industry. Magdala (Tarichea), the chief city on the plain, had a population of forty thousand and a fishing fleet of 230 boats (Josephus *BJ* ii.21.4,8 [608, 635]). Capernaum, at the north end of the plain, was an important military post and toll station on the great caravan route from Damascus to the seaport of Caesarea. This road, the *Via Maris*, traversed Gennesaret.

View southwest from the hill above Capernaum across the plain of Gennesaret. At left is the Sea of Galilee (D. Baly)

The district with its dense population afforded Jesus a fruitful area for ministry, while its fishing and agriculture provided the setting for many of His parables. Because the region to the south was gentile, Jesus limited His Galilean activity largely to the plain of Gennesaret and the northern half of the lake. W. W. BUEHLER

GENTILE [Heb. *gôy*, pl. *gôyim*; Sabean, Phoen., *gw*- '(the whole) community' (cf. G. A. Cooke, *Textbook of North-Semitic Inscriptions* [1903], no. 33); Gk. *éthnos*, *Hellēn*]. Non-Jewish (non-Hebrew, non-Israelite) person(s) or peoples. The Heb. *gôy* is rendered "Gentiles" in the AV in some thirty passages, but much more frequently "heathen," and still more often "nation," which is the usual rendering in later versions; but it is commonly used for a non-Israelite people, and thus corresponds to the meaning of "Gentiles." It also occurs, however, in passages referring to the Israelites, as in Gen. 12:2; Dt. 32:28; Josh. 3:17; 4:1; 10:13; 2 S. 7:23; Isa. 1:4; Zeph. 2:9; but Heb. *'am* is the term commonly used for the people of God, and in some of the texts quoted Heb. *gôy* is used for Israel as a rebuke or in a slighting way. The relation between the two words may be seen in Zec. 2:11 (MT 15). In the NT Gk. *éthnos* is the word corresponding to *gôy* (usually rendered "Gentiles" by the English versions), while Gk. *laós* is the word corresponding to *'am*. The AV also renders Gk. *Hellēnes* "Gentiles" in six passages, but the RV renders "Greeks" throughout. In Gen. 14:1,9; Josh. 12:23; Jgs. 4:2,13,16 *gôyim* is a proper name (cf. Isa. 9:1 [MT 8:23], where *gôyim* is translated "nations," but may be a proper name).

Antagonism against the Gentiles was present far more in NT times than in OT times. The book of Genesis reports no barrier between the patriarchs and their Canaanite surroundings. Though Isaac and Jacob avoided marrying Canaanite wives, Jacob's sons as far as we know married the daughters of Canaanites (or in Joseph's case, of Egyptians). It is true that the conquest of Canaan saw some instances of complete massacres of the indigenous population, but this was not the case in Gibeon and the neighboring towns, nor in those towns that remained Canaanite until the time of the first kings (Jgs. 1:27-36). What happened in Jerusalem probably was typical: after the conquest by David the non-Israelite Araunah lived there in full possession of his ancestral domain (2 S. 24:16-24). Notwithstanding injunctions like Ex. 34:15f., we may assume that in the course of the centuries intermarriage took place frequently. In any case no one objected to marrying women conquered in war (Dt. 21:10-14) or from neighboring nations; cf. Boaz's marriage to Ruth

and several of David's marriages. Solomon's defection, however, is traced to the influence of his foreign wives (1 K. 11:1-4), and even more dangerous was the influence of gentile women like Jezebel and Athaliah.

A systematic opposition to marriages with non-Jewish women appears only after the Exile (cf. Ezr. 9f.; Neh. 13:23-30; and figuratively Mal. 2:11-16). This did not mean, however, that foreign-born people were excluded from Israel. There were many living as protected *gērîm* ("strangers") in Israel (one should not, however, assume that every *gēr* was a non-Israelite; cf. Jgs. 19:1). In any case a *gēr* was supposed to conform to the Hebrew way of life (cf. Ex. 12:43-49). It was otherwise with the *nokrî*, the foreigner living (mainly as a trader) in Israel without conforming to the religious laws. Prov. 2:16-19; 5:3-23; 6:24-35; 7:1-27 warn against such foreign women (RSV "adventuress"; for this sense cf. W. McKane, *Proverbs* [*OTL*, 1970] pp. 285f., and D. Kidner, *Proverbs* [1964], p. 62). Gentiles were allowed to visit the outer precinct of the temple, up to the low wall; inscriptions in Greek warned them to go no further if they did not want to be the cause of their own death. The costs of sacrifices could be borne by strangers, even if they remained pagans (Josephus *BJ* ii.17.2-4; *Ant.* xi.8.5; etc.); and for the pagan Persian kings and their Greek and Roman successors sacrifices and prayers were offered (Ezr. 6:10; 1 Macc. 7:33; etc.).

Even in NT times pious Jewish women married gentile husbands; cf. Acts 16:1. The general tendency, however, was one of increasing hostility toward Gentiles. They and their countries were considered unclean (Am. 7:17) even before the Exile, and the harsh treatment meted out to the Jews by Antiochus IV and later by tactless Roman administrators strengthened this tendency, which finally led to the terrible rebellion of A.D. 66-70.

Some elements in the oldest Christian community shared the common Jewish aversion to Gentiles. Peter was the first to break through the barrier (Acts 10f.), though at a later moment he wavered again (Gal. 2:11-14). It was Paul who drew the full consequences from the gospel of salvation by grace and not by the works of the law; he even suffered for the Gentiles (Acts 21). The mother church in Jerusalem accepted a compromise, requiring gentile Christians to abstain at least from some of the most offending pagan customs (Acts 15:23-29). One part of the Church in Palestine maintained a rather exclusive attitude against the Gentiles, namely, the Ebionites, who at the end of the 2nd cent. were considered a sect by the Church as a whole and gradually disappeared during the next century.

GENTILE NATIONS. *See* NATIONS.

GENTILES, COURT OF THE. *See* TEMPLE (HEROD'S).

GENTILES, ISLES OF THE. *See* ISLAND.

GENTLE [Heb. *marpē'*] (Prov. 15:4); AV WHOLESOME; NEB SOOTHING; [*'allûp*] (Jer. 11:19); AV "ox"; NEB "obedient"; [**śā'îr*] ("gentle rain," Dt. 32:2); AV "small rain"; NEB "fine rain"; [Gk. *prayś*] (Mt. 11:29; 1 Pet. 3:4); AV MEEK; [*épios*] (1 Thess. 2:7); [*epieikés*] (1 Tim. 3:3; Tit. 3:2; Jas. 3:17; 1 Pet. 2:18); AV also PATIENT; NEB FORBEARING, CONSIDERATE; **GENTLENESS** [Gk. *praýtēs*] (1 Cor. 4:21; Gal. 5:23; 6:1; 2 Tim. 2:25; 1 Pet. 3:15); AV also MEEKNESS; NEB also MODESTY; *praÿpathía* (1 Tim. 6:11); [*epieikeia*] (2 Cor. 10:1); NEB MAGNANIMITY; **GENTLY** [Heb. *le'aṭ*–'for gentleness'] (Isa. 8:6); AV, NEB SOFTLY; ("deal gently," 2 S. 18:5; Job 15:11); AV also "secret thing"; NEB also "whispered quietly"; [*nāhal*] ("gently lead." Isa. 40:11); NEB "lead to water"; [Gk. *metriopathéō*] ("deal gently," He. 5:2); AV "have compassion"; NEB "bear patiently"; [*hypopnéō*] ("blow gently," Acts 27:13); AV BLOW SOFTLY; NEB "spring up."

Two major Greek words are translated "gentle" or "gentleness" in the English versions. *Epieikés* is prominent in the highly developed ethical thought of the Greeks and broadly means "'that which is the general conception of life,' and therefore 'what is fitting, right, or equitable'" (*TDNT*, II, 588). The notions of equity and fairness present in the Greek cannot be adequately expressed in one word by either Latin (*clementia, aequitas*, or *modestia*) or English. The word was originally connected with *eikós*, meaning "what is fit and reasonable," but later became associated also with *eíkō* ("yield"), thus indicating "one ready to give way" (Eng. "meek"; Mayor, p. 131). The understanding is of "that moderation which recognizes the impossibility cleaving to all formal law, of anticipating and providing for all cases that will emerge, and present themselves to it for decision" (Trench, p. 154). Aristotle contrasted the man who stands up for his legal rights in strict justice with the one who is willing to give way and be "reasonable" (*Eth. Nic.* v.10). This same "yieldingness" is the quality of character possessed by the individual with "heavenly wisdom" in Jas. 3:17 who is *epieikés* and peaceful, not always insisting on standing upon his own rights.

In the LXX this characteristic is found supremely in God (Ps. 85:5 [MT 86:5], *sālaḥ*, "forgiving"; cf. "mildness," Wisd. 12:18; "forbearance," 2 Macc. 10:4). In Tit. 3:2 it is enjoined on all Christians in general, while it must especially be a mark of bishops (1 Tim. 3:3). Slaves are commanded to be submissive to "kind and gentle masters" (1 Pet. 2:18).

The inner spirit which produces "gentle" behavior is described by the term *praýtēs*. The Greeks highly prized the social virtue of "mildness" or "friendliness in dealing with others," seeing it as opposed to roughness, bad temper, or sudden outbursts of anger. *Praýtēs* has the sense of "quiet and friendly composure which does not become embittered or angry at what is unpleasant, whether in the form of people . . . or fate. This is an active attitude and deliberate acceptance, not just passive submission" (*TDNT*, VI, 645). Such an attitude is reflected in Tit. 3:2, where the RSV translates *praýtēs* by "courtesy."

"Gentleness" is one of the self-predications of Jesus (Mt. 11:29) and was an established disposition describing Him at the time of Paul (2 Cor. 10:1). The spirit of the "gentleness of Christ" is one rooted and grounded in Christian love which "cannot think in terms of harsh punishment even in relation to the disobedient" (*TDNT*, VI, 650; cf. 1 Cor. 4:21). Thus because of its basis, Christian "gentleness" is distinct from Greek "virtue" and is one of the gifts of the Spirit (Gal. 5:23). This gift enables believers to correct an erring brother (Gal. 6:1) or an opponent (2 Tim. 2:25) without arrogance, anger, or impatience; it is also a dominant attitude when believers must make a defense for the hope that is within them (1 Pet. 3:15). This kind of gentle and quiet spirit is called an "imperishable jewel" (1 Pet. 3:4).

In the OT, King David directly ordered his commanders to "deal gently for my sake with the young man Absalom"

(2 S. 18:5), an order later broken (v. 14). In the book of Isaiah the Lord God is portrayed as feeding His flock like a shepherd and gently leading the sheep with young (40:11). Every high priest appointed by this same Lord God has the inward feelings that are in keeping with his sacred work of offering sacrifice, which is to "deal gently [*metriopathéō*] with the ignorant and the wayward" (He. 5:2). This too is the disposition of the "gentle" Jesus Christ who is the "great high priest" (4:14).

D. K. MCKIM

GENUBATH gə-nōō'bəth [Heb. *gᵉnuḇaṯ*– 'weaned'(?)]. Son of Hadad, the fugitive Edomite prince; born and brought up at the court of Egypt, to which Hadad had fled when David conquered Edom (1 K. 11:20). His mother was a sister of Tahpenes, queen of the pharaoh who ruled Egypt at that time, and who belonged to the notoriously weak and uninfluential 21st Dynasty.

GENUINE [Gk. *anypókritos*] (Rom. 12:9; 2 Cor. 6:6); AV "without dissimulation," UNFEIGNED; NEB SINCERE; [*dókimos*] (1 Cor. 11:19); AV APPROVED; NEB SOUND; [*gnēsios*] (2 Cor. 8:8); AV SINCERITY; NEB "put to the test"; **GENUINELY (CARE)** [*gnēsíōs*] (Phil. 2:20); AV NATURALLY (CARE); NEB (TAKE A) GENUINE (INTEREST); **GENUINENESS** [*dokímion*] (1 Pet. 1:7); AV TRIAL; NEB "which has stood the test."

Anypókritos is a negative adjective related to *hypokritḗs* and refers to a nonhypocritical love (Rom. 12:9; 2 Cor. 6:6), as well as to "sincere" faith (1 Tim. 1:5; 2 Tim. 1:5), wisdom (Jas. 3:17), and brotherly love (1 Pet. 1:22). *Gnḗsios* comes from *gnētós*, which means "born in wedlock," or "legitimate." It is used figuratively of a spiritual relationship that the writer believes is legitimate and true. Paul used this term of Timothy (1 Tim. 1:2), Titus (Tit. 1:4), and an unnamed person in Phil. 4:3, perhaps because Paul not only was assured of their genuine faith but also felt that he was their spiritual father (cf. Phil. 2:22; 1 Tim. 1:18; 2 Tim. 2:1).

The root *dokim-* is used in technical terms for the testing of something or someone. In the LXX it is used in reference to precious metals (Gen. 23:16; 1 Ch. 28:18; 29:4; 2 Ch. 9:17; Prov. 8:10) that had passed the test and were therefore pure. Since the Bible, and especially the NT, sees God testing all of human existence (Mt. 25:14-30; 1 Cor. 3:13; 9:27; 1 Thess. 2:4; Jas. 1:12; etc.), it is not surprising to find this root frequently used for the divine examination of mankind. (Rom. 14:18, which speaks of being "approved by men," is an exception.) Although the final judgment still lies in the future, in a sense certain people such as Apelles (Rom. 16:10), some Corinthians (1 Cor. 11:19), and Paul (2 Cor. 13:6f.) have passed the test already in this life, and Paul urged Timothy (2 Tim. 2:15) and the Corinthians (2 Cor. 10:18) to seek this approval in their lives and service for God.

GEOGRAPHY. *See* PALESTINE; TABLE OF NATIONS; WORLD.

GEOGRAPHY, BIBLICAL. The study of the characteristics of particular places on the surface of the planet Earth as it relates to an understanding of the Bible. Of the several categories into which geography has been divided, historical geography is of primary importance for biblical studies; physical and political geography are also meaningful.

The study of geography is an essential part of biblical exegesis. It is not generally recognized that the Bible is the only book of the religions of the world that puts any emphasis on geography. The Koran, e.g., hardly includes geographical data, and scholars of the Koran have to decide only whether a Sura (chapter) originated in Mecca or Medina. The Bhagavad-Gita is timeless and placeless, and students of this Hindu work have first of all to realize that it does not deal with time or place. But in the Bible almost every event is anchored in a specific location, and although the chronological details in the earlier portions (and even some in the later portions) are not sufficient for the scholar seeking an absolute chronology (i.e., to the day, month, and/or year) or even a relative chronology (i.e., relating the event to other data that can be absolutely or approximately dated), these data are everywhere present.

From Abana to Zuzim there are about two thousand place names in the Bible, including regions and countries, cities and villages, mountains and valleys, seas and rivers. The atlases, geographies, and similar reference works for the Bible far outnumber those available for other religions. The Bible, as G. E. Wright pointed out, "is primarily a historical literature, which tells how God confronted men at particular times and places. Geography, history, and religion are so inextricably bound together in it that the religious message cannot be truly understood without attention to the setting and conditions of the revelation" (*WHAB*, p. 5).

Physical geography deals with the physical details of the earth: mountains, river valleys, rock and soil structure, winds and weather, etc. In the Bible physical geography is an elemental part of God's creation and providence. He formed the mountains and causes the rivers to flow to the seas. He sends the rain, the blasting east wind, and the drought. Physical geography affects lives of human beings, for forest, rocks, and clay determine the types of housing they build; rainfall and the seasons cause them to move with their flocks or to collect and store water for agricultural needs. Almost every page of the Bible reports some details of physical geography. The parables of Jesus and the journeys of Paul, like the migration of Abraham and the questions God put to Job, cannot be understood without some knowledge of the physical details of this earth.

Political geography deals with the organization of groups of peoples. The earliest form encountered in the Bible is the city-state, a petty kingdom ruled by a king, or an equivalent governmental form. Later in biblical history kingdoms were larger, more powerful, and generally more cruel. The "kingdom of God" becomes the term for the eternal reign of God and for His ultimate kingdom on earth. The vision granted to John of a "great multitude, which no man could number, from every nation" (Rev. 7:9) indicates that the kingdom of God comes into existence not by destroying the peoples of other kingdoms but by redeeming men and women "from all tribes and peoples and tongues" to sing praises "to our God who sits upon the throne, and to the Lamb" (v. 10).

Historical geography, the broadest category, deals with the historical development of peoples in place and time. This discipline, even more than those previously mentioned, is an essential characteristic of biblical studies. The Bible is the record of how, where, and when God revealed Himself and His purpose to His chosen men and women, who lived at specific places and times. This re-

velatory activity progresses historically, continually referring to previous revelatory acts. It begins in prehistory, before the garden of Eden, and its teleological consummation is beyond history, in the new heavens and the new earth. But between the first chapters of Genesis and the last chapters of Revelation, revelation always occurs in space and time. Thus scholars can make such statements as "God entered into history," and theologians can speak of "God incarnate." The ultimate demonstration of the significance of historical geography in the study of biblical revelation is the Incarnation, which took place "in the days of Caesar Augustus" in a city of Judah called "Bethlehem" to Joseph and Mary, who had come from "Nazareth." It achieved its purpose in "Jerusalem," where Jesus was crucified by "Pontius Pilate," was buried in a tomb belonging to "Joseph," was raised from the dead, and departed to heaven from "the Mount of Olives." Bible students ever since have traced and retraced the footsteps of Jesus, and pilgrims have visited every site, real or imaginary, identified with the Gospel record.

An existentialist may say that it does not matter where, when, or even if the events recorded in the Bible actually occurred; what matters is the divine encounter, the meeting between God and those who read about these events. Part of that statement is a great basic truth, for it is indeed the divine encounter that matters. "Now these things happened to them as examples and were written down as warnings for us" (1 Cor. 10:11, NIV). There is also a greater truth to take into consideration: if "these things" had not happened to the men and women of the Bible — if God had not encountered them in time and space — there would be no divine encounter in reading the stories. It is precisely because God has entered into history that He meets us in the Bible. The study of the historical and geographical details of each biblical account makes God's revelation personally meaningful.

GEOLOGY OF PALESTINE. *See* PALESTINE, GEOLOGY OF.

GEON gē'on (Sir. 24:27, AV). *See* GIHON 1.

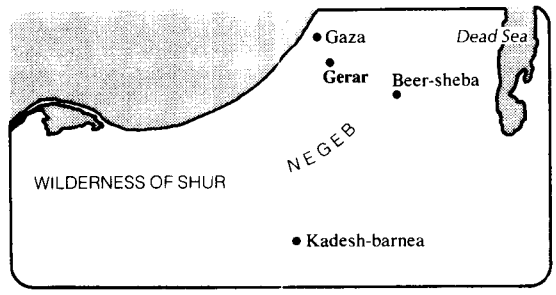
GEORGIAN VERSION. *See* VERSIONS V.

GERA gē'rə [Heb. *gērā'*]. A family name of the tribe of Benjamin; thus 3 and 4 are not necessarily separate persons.

1. A son of Benjamin (Gen. 46:21).
2. According to 1 Ch. 8:3, 5, 7, a son of Bela and grandson of Benjamin. The name is repeated (v. 5) in the list of Bela's sons.
3. Father, or ancestor, of the judge Ehud (Jgs. 3:15).
4. Father, or ancestor, of Shimei, the Benjaminite who cursed David when David fled from Absalom (2 S. 16:5; 19:16, 18; 1 K. 2:8).

GERAH gē'ra [Heb. *gērâ*–'grain, kernel']. A weight, the twentieth part of a shekel (Ex. 30:13; Lev. 27:25; Nu. 3:47; 18:16; Ezk. 45:12). *See* WEIGHTS AND MEASURES.

GERAR gē'rär [Heb. *gᵉrār*–meaning unknown]. A town in the western Negeb. Gen. 10:19 states, "The territory of the Canaanites extended from Sidon, all the way to Gerar,



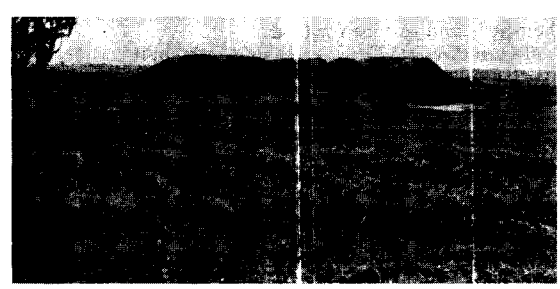
near Gaza" (after Ginsberg). According to this reading Gerar was in the southern extremity of the land of Canaan.

The patriarchs Abraham and Isaac each spent an extended period of time in the territory of Gerar. "Abraham journeyed... toward the territory of the Negeb, and dwelt between Kadesh [-barnea] and Shur [the Egyptian defense "wall" which guarded the eastern delta], and [then] he sojourned in [became a resident of] Gerar" (Gen. 20:1). He was apparently seeking the status of a resident alien in the kingdom of Gerar; this was awarded to him after the episode between Sarah and the local king (Gen. 20:15). When the rest of the land was suffering a famine, Isaac also sought resident status at Gerar (Gen. 26:1, 6). The account of his own troubles over Rebekah (Gen. 26:7-11) requires an urban setting. Later he lived outside the city in the "valley [brook] of Gerar" (Gen. 26:17). After various troubles with the local inhabitants, both Abraham and Isaac were obliged to remove their entourage to the very margin of Gerar's territory, i.e., as far as Beer-sheba; but they were still within the hegemony of Gerar's ruler (Gen. 21:31-34; 26:26) and entered into treaty relationships with him.

The king of Gerar bore the Semitic name Abimelech (Gen. 20:2) in the passages concerning the two patriarchs. He is also called "king of the Philistines" (Gen. 26:1, 8), and the term Philistine is used of the people (Gen. 26:14f.) as well as the land (Gen. 21:34). This association with the sea-peoples is related to the statement that the original inhabitants of this same region, the Avvim, were displaced by the Caphtorim (Dt. 2:23; *see also* CAPHTOR). The prophets preserved the recollection that the Philistines came from Caphtor (Am. 9:7; Jer. 47:4). Furthermore, the same area was also called "the Negeb of the Cherethites" (1 S. 30:14; cf. Ezk. 25:16; Zeph. 2:5).

Nevertheless, Gerar was not counted among the principal Philistine cities (Josh. 13:3). It is absent from the list of towns conquered by the Israelites (Aharoni emends the Geder of Josh. 12:13 to Gerar, but this is unlikely) because all the Philistine territory, including that of the Avvim, was still unsubdued by Israel at the end of Joshua's career (Josh. 13:1-4).

Tell esh-Shariyeh, a possible site of Gerar (W. S. LaSor)



When King Asa of Judah routed the invading Ethiopian forces under Zerah, his troops pursued the enemy as far as Gerar (2 Ch. 14:13-15) and plundered all the settlements in the region. In the reign of Hezekiah, many clans from the tribe of Simeon "journeyed to the entrance of Gerar [LXX against MT, which has Gedor], to the east side of the valley..." and drove out the Meunim, who were living there in tents (1 Ch. 4:39-41). The valley [Heb. *gāy'*] referred to here is evidently the "valley of Gerar" (Gen. 26:17).

Using the meager information provided by the written sources, various scholars have sought to identify Gerar with one of the ancient sites in the region between Beer-sheba and Gaza. More recently, however, Tell Abū Hureirah has become a serious candidate. The Madeba Map and other Byzantine evidence support the existence of a real town called Gerara within the Geraritike district; the most natural assumption from the patriarchal narratives is that Gerar was a city in that time also. Assuming that the Wâdī esh-Sherî'ah is the "valley of Gerar," Tell Abū Hureireh stands on the western bank, for the stream bed actually takes a NE-SW course at this point. The Simeonites who intruded into Gerar's territory during Hezekiah's reign are said to have remained on the eastern side of the valley; the tell is also reasonably close to Beer-sheba, but probably was outside the original Simeonite inheritance (Josh. 19:1-9). (Cf. also Eusebius *Onom.* 60.7.)

Antiochus Eupator appointed Hegemonides governor of the district "from Ptolemais to Gerar [Gk. *Gerrēnōn*]" (AV "Gerrhenians," NEB "Gerra," 2 Macc. 13:24).

A. F. RAINEY

GERASA ger'ə-sə [Gk. *Gerasa*]; **GERASENES** ger'ə-sēnz [Gk. *Gerasēnoi*]. Gerasa was one of the significant cities of the DECAPOLIS (Pliny *Nat. hist.* v. 74). The Gerasenes were the inhabitants of the city and its surroundings (Josephus *Ant.* xiii.15.5 [398]). The ancient city has been identified with modern Jerash, about 36 km. (22 mi.) N of Amman, 30 km. (19 mi.) E of the Jordan, and 60 km. (37 mi.) SE of the Sea of Galilee. The identification is based on the similarity between the ancient and modern names and on inscriptions which describe the ancient residents as "the first Gerasenes" (Gk. *tōn próteron Gerasēnōn*; see *EAEHL*, II, 417).

The Bible does not refer to the city itself but to "the territory of the Gerasenes." "Gerasenes" is the reading of the RSV in Mk. 5:1 (also NEB; AV "Gadarenes"), Lk. 8:26 (AV "Gadarenes"; NEB "Gergesenes"), and Lk. 8:37 (AV "Gadarenes"; NEB "Gergesene district"). In Mt. 8:28 the RSV reads "Gadarenes" (also NEB; AV "Gergesenes").

I. Text Criticism.–In three instances (Mk. 5:1; Lk. 8:26, 37), the reading *tōn Gerasēnōn* ("of the Gerasenes") accords with the best MS evidence, early witnesses "of both Alexandrian and Western types of text" (Metzger, pp. 84, 145). The variant *Gadarēnōn* ("Gadarenes") is regarded as the work of a scribe who changed the text to agree with the text of Mt. 8:28. The variant *Gergesēnōn* may be a correction inspired by Origen (comm. on John vi.24), who argued that Gergesa (*see* GERGESENES) was the most suitable site for the destruction of the swine, for GADARA (Muqeis or Umm Qeis) and Gerasa were too far from the Sea of Galilee (Metzger, pp. 23f.).

II. History.–Greek traditions attribute the founding of the Hellenistic city of Gerasa to Alexander the Great, though excavations in the vicinity have revealed sites dating as far back as the Stone Age (*EAEHL*, II, 417). One tradition claims that Alexander founded the city for his veterans (Gk. *gérontes*); another states that Alexander killed all the young men in the area, leaving only the elderly (Gk. *gérontes*). An inscription on a coin from the reign of Commodus (A.D. 180-192) reads *Alex[andros] mak[edon] kti[stēs] Gerasōn* ("Alexander the Macedonian, founder of Gerasa"; see H. Seyrig, *Syria*, 42 [1965], 25-28). A statue of Perdiccus, one of Alexander's generals, has also been discovered at Gerasa, suggesting that he was related to the founding of the city (*EAEHL*, II, 419).

Probably the city was well established by 143/2 B.C. This can be inferred from an inscription on a lead weight from the Seleucid era (*ca.* 170 B.C.) that refers to the inhabitants of Gerasa as "the Antiochenes by the Chrysorhaas" (see Kraeling, p. 461; H. Seyrig, *Numismatic Notes and Monographs*, 119 [1950], 33, n. 45).

According to Josephus, the city was conquered by Alexander Jannaeus (*Ant.* xiii.15.3 [393]; *BJ* i.4.8 [104]) toward the end of his career (*Ant.* xiii.15.5 [398]). It remained under Jewish rule until Pompey took it for Rome in 63 B.C. Thereafter Gerasa was included among the cities of the Decapolis and reckoned its continuing history from that date. The inscriptions of Gerasa are frequently dated according to the Pompeian era (see Kraeling, p. 358; C. C. McCown, *Transactions of the American Philological Association*, 64 [1933], 81-88). One inscription dates the dedication of the southern theater to the year 153, i.e., A.D. 90/91 (see B. VanElderen, *American Schools of Oriental Research Newsletter*, 4 [1974], 2). During the Roman period Gerasa enjoyed increasing prosperity.

At the outbreak of the First Jewish Revolt (A.D. 66-74) Gerasa and the neighboring cities of Philadelphia and Heshbon were attacked by Jewish rebels (*BJ* ii.18.1 [458]), and, although the inhabitants of the other cities retaliated, the Gerasenes "not only abstained from maltreating the Jews who remained with them, but escorted to the frontier any who chose to emigrate" (*BJ* ii.18.5 [480]). The Gerasa captured and destroyed by Lucius Annius under the command of Vespasian (*BJ* iv.9.1 [486-89]) can hardly have been this one (cf. *HJP*², II, 149-155; K. H. Rengstorf, *Complete Concordance to Flavius Josephus*, supp. I: *Namenwörterbuch zu Flavius Josephus, s.v.* "Gerasa, 2").

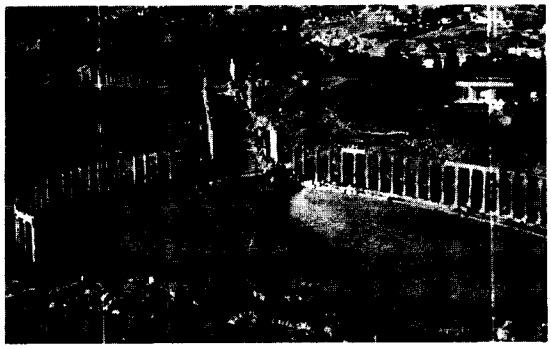
Like the other cities of the Decapolis, Gerasa belonged originally to the province of Syria. This is indicated by an inscription from Pergamum (R. Caguat, *et al., Inscriptiones Graecae ad Res Romanas Pertinentes*, IV, 374) and by the observations of the geographer Ptolemy (v.74.18). By the end of the first decade of the 2nd cent. A.D., however, Gerasa had become one of the three chief cities of the province of Arabia. Its importance is attested by the visit of the emperor Hadrian in 129.

After a period of decline, the city revived under Diocletian and became an important ecclesiastical center. Another period of decay had set in by the 6th cent., and the city was captured first by the Persians (614-628) and then by the Moslems (635). The city was eventually deserted about the 12th century.

J. J. C. COX

III. Excavation.–The excavation of Jerash was a joint venture begun in 1925 by J. Garstang, then director of the Department of Antiquities of Palestine and the British School of Archaeology in Jerusalem. The Department of Antiquities, the British School, Yale University, and the American Schools of Oriental Research joined in the excavations, which lasted from 1925 to 1940. Further clearance and restoration work has been conducted by the Jordan Department of Antiquities since 1953.

An excellent example of city planning, Jerash was laid



The Gerasa forum and colonnaded way as seen from the temple of Zeus (L. T. Geraty)

out with a single main street intersected at right angles by two cross streets. The main street was just over 0.8 km. (0.5 mi.) in length and was flanked by 260 Ionic and Corinthian columns on either side. The side streets likewise were colonnaded, and a drainage system ran under the middle of the streets. All the principal buildings and the best shops had their entrances from the main street, which ran N-S. To the west of the main street on the highest point in town rose the second-century temple of Artemis, patron deity of the municipality, with Corinthian columns 14 m. (45 ft.) high. East of the street stood two bath complexes and in the north part of town was a theater.

At the south end of the street stood a first-century circular forum, unique in the Greco-Roman world. From the forum a great flight of steps led up to the temple of Zeus, begun in A D. 22. Next to it stood the south theater (1st cent.) capable of accommodating about 5000 people. At the south entrance of the city was a great triumphal arch, commemorating Hadrian's visit to the city in A.D. 129, and next to that sprawled the hippodrome. Ruins of thirteen churches appeared in the excavations. *See* Plate 18.

GERGESENES ger'gə-sēnz [Gk. *Gergesēnoi*]. Residents of a town (and its territory) on the east coast of the Sea of Galilee identified by Origen (comm. on John vi.24) and certain NT MSS (mostly later than the 4th cent.; $\aleph^2$ L Θ, etc.) as the locale of the healing of a demoniac and the subsequent drowning of a herd of swine in the sea (Mt. 8:28-34 par. Mk. 5:1-13; Lk. 8:26-39). The ruins of a cliff town are found near the modern village of Kursī, but the Greek and Arabic names are not exact equivalents, leaving the identification uncertain.

See GADARA; GERASA I.

GERIZIM ger'ə-zim, **MOUNT** [Heb. *har gᵉrizîm*]; AV also GARIZIM (2 Macc. 5:23; 6:2). Modern Jebel eṭ-Ṭôr, about 3 km. (2 mi.) NW of Shechem.

Mt. Gerizim (868 m., 2849 ft.) stands almost exactly in the center of Palestine W of the Jordan. Together with Mt. Ebal to the north, it commands the Nâblus Valley, which gives the only E-W access into the hill country of Ephraim. Its location on the N-S road also gave it strategic importance from earliest times. Jacob's well (Jn. 4:6) lay in the valley at the northeastern foot of the mountain. Abram built his first altar nearby after arriving in Canaan from Mesopotamia (Gen. 12:6f.).

In obedience to Moses' command, the great ceremony of rehearsing the law took place here after the Hebrews entered Canaan. The ark and the Levites stood in the valley between the two mountains. The people arranged themselves on the slopes of the mountains and responded antiphonally to what was read — those on Mt. Ebal responding to the cursings and those on Mt. Gerizim to the blessings (Josh. 8:30-35; cf. Dt. 11:29; 27:11-13).

During the days of the judges Jotham uttered his taunting parables from a spur of Mt. Gerizim (Jgs. 9:7). Jgs. 9:37 apparently refers to Mt. Gerizim as the *tabbûr hā-'āreṣ*, a phrase of uncertain meaning. Although some (e.g., R. Boling, *Judges* [*AB*, 1975], pp. 178f.) follow the LXX *ómphalos tḗs gḗs*, "navel of the earth" (so JB), and thus accept the postbiblical Hebrew and Aramaic meaning of *tabbûr*, others (e.g., *TDOT*, III, 438) derive the meaning "plateau, height" (cf. NEB "central ridge") from the context (cf. L. Stadelmann, *Hebrew Conception of the World* [1970], pp. 148f., 154). After the Babylonian captivity a separate Samaritan sect arose when the Jews under the leadership of Ezra and Nehemiah insisted on Jewish ethnic purity. This cleavage became complete with the construction of a Samaritan temple on Mt. Gerizim, probably during the 4th cent. B.C. Mt. Gerizim became the spiritual center of the Samaritans. In NT times this fact is reflected in Jesus' conversation with the Samaritan woman at Jacob's well (Jn. 4, esp. v. 20).

The Samaritans have suffered at the hands of pagans, Jews, and Christians. Antiochus IV Epiphanes desecrated the Samaritan temple and dedicated it to Zeus Helios (2 Macc. 6:2). A few decades later, in 128 B.C., the Jewish king John Hyrcanus destroyed the Samaritan temple completely. Then, just before the destruction of Jerusalem in A.D. 70, the Romans surrounded Mt. Gerizim and massacred 11,600 Samaritans there (Josephus *BJ* iii.7.32 [307-315]). Early in the 2nd cent. the emperor Hadrian built a temple to Zeus over the ruins of the Samaritan temple and constructed a monumental access stairway to it. In a struggle between Samaritans and Christians during the 5th cent. the emperor Zeno drove the Samaritans from Mt. Gerizim and commanded that a church be built on the highest point and dedicated to Mary as the mother of God (486). The Samaritans destroyed this church, but Justinian later built another on the spot and fortified it (*ca.* 530). This was destroyed during the Arab conquest (7th cent.).

A. M. Schneider of Göttingen excavated the ruins of Justinian's octagonal church and the protecting enclosure in 1928. In 1964 R. J. Bull of Drew University excavated at Tell er-Râs, a spur on the northern slope of Mr. Gerizim. There he found remains of the temple of Zeus, confirmed by an inscription "to Zeus Olympius." The temple itself measured 20 by 14 m. (65 by 45 ft.) and stood on a platform 6.7 m. (22 ft.) high measuring 65 by 45 m. (213 by 148 ft.). Remains of a monumental stairway were located on the slope nearby. Under the temple of Zeus were remains of a Hellenistic structure 21 by 20 m. (68 by 65 ft.), which may belong to the Samaritan temple destroyed by John Hyrcanus.

A third area of Mt. Gerizim received archeological attention in 1968 when R. G. Boling led an American Schools of Oriental Research dig at Tananir on the lower north slope about 300 m. (1000 ft.) from ancient Shechem.

The structure he excavated, probably a temple, went through four building phases (1650-1540). It had rooms grouped around a central courtyard in which was a sacred pillar. Scholars have suggested that it was on the ruins of this building that Jotham stood when he uttered his condemnation (Jgs. 9:7-20).

The Samaritan community that maintains a synagogue in nearby Nâblus still celebrates the feasts of Passover, Pentecost, and Tabernacles on Mt. Gerizim every year.

GERRHENIANS gə-rē'ni-ənz (AV, 2 Macc. 13:24). *See* GERAR.

GERSHOM gûr'shəm [Heb. *gēr^{e}šōm*]. Derived, according to the etymology in Ex. 2:22; 18:3 from *gûr*, "be a sojourner."

1. Firstborn son of Moses and Zipporah. The only details of his life contained in the Pentateuch are the account of his circumcision (Ex. 4:25), and his remaining under the care of Jethro while Moses was in Egypt leading the Exodus. His descendants were numbered among the tribes of Levi (1 Ch. 23:14). One of them apparently was the Jonathan who officiated as priest of the idolatrous sanctuary at Dan, and whose descendants held the office until the captivity. Another descendant was Shebuel, a ruler over the treasuries of David.

2. A son of Levi, so called in 1 Ch. 6:1, 16f., 20, 43, 62, 71 (MT 1f., 5, 28, 47, 56); 15:7; 23:6; elsewhere GERSHON.

3. A descendant of Phinehas, the head of a father's house, who journeyed with Ezra from Babylon to Jerusalem during the reign of Artaxerxes (Ezr. 8:2; 1 Esd. 8:29; Gk. *Gērsōn*). E. D. ISAACS

GERSHON gûr'shən [Heb. *gēršôn, gēr^{e}šôm*]; **GERSHONITES** gûr'shən-īts [*gēršūnnî*]. Firstborn of the three sons of Levi (Ex. 6:16; Nu. 3:17; *see also* GERSHOM **2**). He had two sons, Libni, also known as Ladan (1 Ch. 23:7 mg.; 26:21), and Shimei (Ex. 6:17; Nu. 3:18), and consequently two groups of descendants, enumerated in the censuses taken in the Wilderness of Sinai (Nu. 3:21ff.) and in the plains of Moab (Nu. 26:57). In the distribution of functions among the Levites, the Gershonites were charged with the carrying of the curtains, coverings, screens, hangings, cords, and instruments of the tabernacle and the tent of meeting on the journeys in the wilderness, under the supervision of Ithamar the son of Aaron. Their function was thus more exalted than that of the Merarites, who carried the boards, but less than that of the Kohathites, who carried the most holy utensils and symbols. The Gershonites were given two wagons with four oxen — half as many as the Merarites, according to their service (Nu. 7:7). Thirteen cities were assigned to the Gershonites in northern Palestine by Eleazar and Joshua (Josh. 21:6, 27-33 par. 1 Ch. 6:62, 71-76 [MT 47, 56-61]).

Among the Gershonites who achieved distinction in later biblical times was the family of Asaph, the singers from the time of David to the days of the second temple (1 Ch. 6:31-47; 25:1-7; 15:7, 17, 19; 16:5, 7; 2 Ch. 35:15; Ezr. 2:41; 3:10; Neh. 11:17, 22; 12:35; 1 Ch. 9:15). Other Gershonites named are the heads of the fathers' houses in the days of David in connection with the dividing of the Levites into divisions (1 Ch. 23:7-11); the superintendents of the treasuries of the house of the Lord at the same time (1 Ch. 26:21f.; 29:8); and, finally, Gershonites are mentioned among those who cleansed the house of the Lord in the days of Hezekiah (2 Ch. 29:12f.). E. D. ISAACS

GERSON gûr'sən (1 Esd. 8:29, AV). *See* GERSHOM **3.**

GERUTH CHIMHAM gē'rōōth kim'ham [Heb. *gērûṯ kimhām Q*] (Jer. 41:17); AV "habitation of Chimham"; NEB "Kimham's holding." If the reading *gērûṯ* is correct, a "lodging-place" or "khan" on the highway to Egypt may be meant. It may have been built by CHIMHAM son of Barzillai; or it may have been named after him as owner of the land on which it stood. It was in the general area of Bethlehem, but to date the location has not been identified. Perhaps this was the "inn" to which Joseph and Mary were refused admittance (Lk. 2:7).

GESHAN gē'shən [Heb. *gêšān*–'firm,' 'strong']. A descendant of Judah through Caleb (1 Ch. 2:47). The AV has "Gesham," but not in the original 1611 edition.

GESHEM ge'shəm [Heb. *gešem, gašmû*; Gk. *Gēsam*, 'rain storm']. An Arab, probably chief of an Arabian tribe that either settled in southern Palestine during the Exile in Babylon or was settled in or near Samaria by Sargon (Neh. 2:19; 6:1f., 6). He was a confederate of Sanballat and Tobiah and strenuously opposed the building of the wall under Nehemiah. He with the others mocked at the first efforts to build the wall and afterward repeatedly sought to entice Nehemiah to the plains of Ono. The name also occurs in the form *Gašmû*, perhaps an Assyrian form of the same name Geshem. J. J. REEVE

GESHUR gesh'ər [Heb. *g^{e}šûr*–'bridge']; **GESHURITES** [Heb. *g^{e}šûrî*]; AV also GESHURI.

1. A small Aramean kingdom (2 S. 15:8), known extrabiblically also as Gessur, located N of Bashan (Dt. 3:14; Josh. 12:5; 13:11) and NE of the Sea of Galilee on what is now the southwest border of Syria. Geshur was an independent kingdom within Israel (Josh. 13:13), for the half-tribe of Manasseh never expelled the Geshurites.

David made an alliance with Geshur by marrying Maacah, who was the daughter of Talmai its king and the mother of Absalom (2 S. 3:3); and it was to Talmai that Absalom fled after killing Amnon (2 S. 13:37; 14:23). Later, during the reign of Solomon, Geshur became subordinate to the kingdom of Israel, but with the division of the Israelite kingdom Geshur joined Aram in raiding the area of Bashan, capturing the cities of Jair from the Israelites (1 Ch. 2:22f.). Geshur then probably became part of the kingdom of Damascus, sharing Damascus' fate in 732 B.C.

According to some scholars "Geshurites" should be read for "ASHURITES" in 2 S. 2:9 (cf. Pesh., Vulg.). The Targum, followed by the NEB, reads "Asherites" (cf. Jgs. 1:32), keeping the same consonants as "Ashurites," which appears nowhere else in the Bible.

2. "Geshurites" also appears as a tribe bordering the Philistines on the south (Josh. 13:2); while David was in exile he raided them and other old inhabitants of the land (1 S. 27:8). P. C. HUGHES

GESHURITES gesh'ə-rīts [Heb. *g^{e}šûrî*]. *See* GESHUR **2.**

GESTAS. A name given to the unrepentant thief (Lk. 23:39-43). *See* APOCRYPHAL GOSPELS III.B.

GESTURE. The word is derived from the Latin *se gerere*, "comport or behave oneself," and *gestus*, "carriage of the body." Near Eastern peoples, both ancient and modern, make extensive use of gestures to express emotion, to

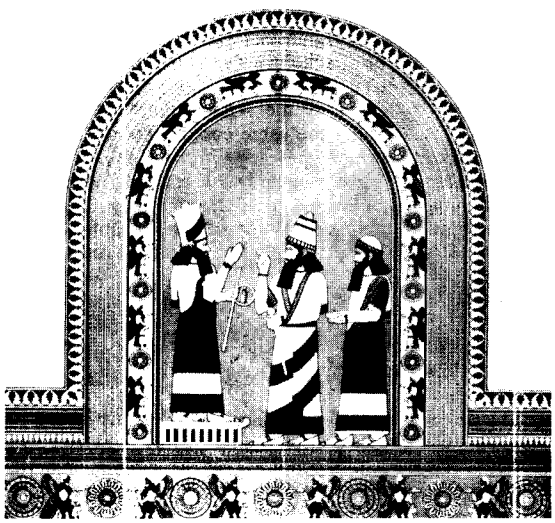
emphasize words, or to communicate nonverbally. Almost every available part of the body is employed in gesture; however, the freest body parts are the most naturally used — the hands, feet, head, and face.

Gestures in general may be categorized as autistic (highly personalized and very predictable movements, especially of the hand or face in speaking), "instinctive" or universal (transcultural), technical (true substitutes for speech, e.g., a sign-language system), culture induced, and semiotic (folk gestures). The bulk of the gestures illustrated in the Bible fall into the last two categories.

I. Hands
II. Other Appendages
  A. Finger
  B. Arm
  C. Foot
  D. Thigh
  E. Knee
III. Breast
IV. Whole Body
V. Head
  A. Face
  B. Eye
  C. Mouth
  D. Nose
  E. Ear
  F. Neck
  G. Beard
VI. Clothes

I. Hands.--Predictably, the hands are most frequently involved in gesture. As a liturgical gesture the hands are "spread forth" (NEB "spread out") toward heaven, both to accompany verbal prayer and to enact or symbolize its nature as an appeal. In 1 K. 8:22 Solomon literally "divided his palms heavenward" (Heb. *wayyiprōś kappāyw haššāmāyim*) at the outset of his great temple prayer. The suppliant probably makes this gesture by placing his palms together (cf. examples in Mesopotamian sculpture of this "attitude of adoration" in *ANEP*, nos. 431, 433, 435, and 436) and then raising his arms and spreading out his hands (cf. 2 Ch. 6:12f.; Ezr. 9:5) to enact the rising of the prayer to heaven. Interestingly, the same word combination (Heb. *pāraś* + *yaḏ*) is applied with a quite different sense to Yahweh in Isa. 65:2. In this instance it is a gesture of entreaty with which a very available Yahweh sadly demonstrates His loyal concern for a people more interested in superstitious cults.

Sargon II (center), pointing his finger in supplication and holding a mace, and an officer (right) with folded hands stand before a god, who holds symbols of authority, the rod and ring. Reconstruction of a wall painting at the Khorsabad citadel of Sargon II (721-705 B.C.) (Oriental Institute, University of Chicago)



The "lifting up" (Heb. *nāśā'*) of the hands is so naturally and integrally the gesture of prayer in the Bible that reference to the gesture itself often suffices to express the act of praying. In Lam. 2:19 the besieged and desperate mother Jerusalem is urged: "Lift your hands to him [*śĕ'î 'ēlāyw kappayiḵ*] for the lives of your children,/ who faint for hunger at the head of every street." In Ps. 141:2 the gesture parallels the verbal prayer: "Let my prayer be counted as incense before thee,/ and the lifting up of my hands as an evening sacrifice!" (Cf. 1 Tim. 2:8, "I desire then that in every place the men should pray, lifting holy hands" [Gk. *epaírō* + *cheír*]; Neh. 8:6; Ps. 28:2; 63:4 [MT 5]; and 1 Clem. 2:3, "you stretched out your hands to Almighty God . . . beseeching him. . . .") For visual examples of the hand raised in prayer, see the relief on the Syrian funerary stele of Sen-zer-ibni (*see* picture in INSCRIPTIONS), as well as several Mesopotamian statuettes (Gray, pp. 56f.). The force of this gesture is to underscore the psychosomatic character of prayer — it is an experience involving the total self, and the physical comportment of the body in the act of praying is important.

Carved ivory casket from Hazor depicting a man with outstretched arms kneeling in prayer (9th-8th cents. B.C.) (Institute of Archaeology, Hebrew University of Jerusalem)

Holding the hands at shoulder level with the palms forward, simultaneously turning the head slightly to one side, is a gesture of surrender throughout the contemporary Arab world (Barakat, p. 778 no. 104). This gesture is illustrated in a Theban tomb painting in which five submissive foreigners, with hands up and palms out, are portrayed enclosed in a platform that serves as a footstool for Pharaoh Amenhotep III (*ANEP*, no. 4; cf. Ps. 110:1, and the discussion of foot gestures below; similarly, cf. *ANEP*, nos. 46f.).

Nubian tribute bearers. Painting of wall painting in the tomb of Ḥuy (18th Dynasty), Thebes (Oriental Institute, University of Chicago)

The hand placed upon one's mouth is a universal gesture for silence. This gesture becomes even more forcefully a sign of respect to a superior, as Job recalled an earlier preeminence when

> the young men saw me and withdrew,
> and the aged rose and stood;
> the princes refrained from talking,
> and laid their hand on their mouth

(Job 29:8f.). Contemporary Arabic cultures employ a similar semiotic gesture — touching the tips of the right forefinger, second finger and thumb to the mouth and bowing slightly while so doing — for precisely the same purpose of showing respect to the person addressed (Barakat, p. 773 no. 24). To cease talking in the presence of a superior is to show proper respect; the hand-over-mouth gesture thus signifies both the cessation of speech and the acknowledgment of respect. This gesture is clearly portrayed in a Persepolis relief featuring a Median dignitary with his right hand raised to his mouth out of respect for King Darius before whom he stands (*ANEP*, no. 463).

The right hand placed upon the head of another signifies the blessing of that other person. This gesture indicates physically that one has "touched" the other with the hand of authority, and that a transfer of power or authority has occurred. In Gen. 48:14f. the dying patriarch Israel/Jacob blessed (Heb. *bāraḵ*) Joseph and his Egyptian-born sons by putting his hands on the heads of the two sons (deliberately crisscrossed so as to suggest the later preeminence of the second born, Ephraim). The gesture of placing one's hand on the head of a person being blessed is so integral to the concept of blessing that blessings can be spoken of as being "on the head of" someone (Gen. 49:26; Prov. 10:6; cf. also Rev. 1:17; Mk. 10:16). (For the "laying on of hands" in healing, baptism, investiture of office, etc. [e.g., Lk. 4:40; Acts 28:8; 8:17f.; 6:6], *see* HANDS, LAYING ON OF.) A related gesture is the laying or resting (Heb. *sāmaḵ*) of the hand on the head of the burnt offering (Lev. 1:4) or the scapegoat (Lev. 16:21); this action symbolized the transfer of sin from the guilty person(s) to the substitutionary sacrifice.

The hand(s) may also simply be "lifted up" for the act of blessing, e.g., of the people by Aaron (Lev. 9:22), of the disciples by Jesus (Lk. 24:50), and of God by the people (Neh. 8:6; Ps. 134:2). Ancient Near Eastern art provides ample illustration of the hand raised in blessing, e.g., by a deity (*ANEP*, nos. 535, 537; *see* picture of relief showing Sargon II and deity) or by a king (*ANEP*, no. 460; Gray, pp. 71, 68). The lifting up (and shaking) of the hand or fist may also be a gesture of defiance (Isa. 10:32) or contempt (Zeph. 2:15). Rebellion against the Davidic monarchy is twice described as men having "raised/lifted their hand" against the king (2 S. 18:28; 20:21). For the so-called brandishing gesture illustrated on an exorcism amulet see *ANEP*, no. 660.

A very common gesture is the raising of the hand in the solemn act of swearing an oath: "For I lift up my hand to heaven, and swear, As I live for ever" (Dt. 32:40). The phrase "to heaven" indicates that the hand was pointed up in the direction of God, in whose name the oath was sworn. The semiotic gesture of contemporary Arabic cultures for oath taking is similar — the right hand is held up before the right shoulder with the palm facing out (Barakat, p. 772 no. 10; cf. modern practice: "Raise your right hand and repeat [the oath] after me"). In Ps. 106:26 this hand gesture also accompanied the verbal act of oath taking, but in other instances the gesture itself sufficed to convey the entire action so that the literal phrase "lift up the hand" can be translated as "swear" (cf., e.g., Gen. 14:22 where Heb. *hᵃrîmōṯî yāḏî 'el-YHWH* is rendered by the AV, "I have lift up mine hand unto the Lord," by the RSV, "I have sworn to the Lord," and in composite fashion by the NEB, "I lift my hand and swear by the Lord"; cf. Ezk. 20:5f., 15, 23, 28, 42).

Closely related as an oath-taking gesture is the placing of the right hand "under the thigh" (Heb. *taḥaṯ yᵉrēḵî*) of another when taking a solemn oath. In the two biblical instances of this practice (Gen. 24:2; 47:29) the last request

GESTURE

of a dying superior (Abraham, Jacob) is that the inferior (the servant, Joseph) make a final oath of loyalty while holding his hand on or near the genitals of the superior. The usual meaning of the contact with the genital organ in oath taking is to render the oath as inviolable as possible, i.e., if the oath is broken may the same happen to the object touched. A similar gesture may be observed in Saudi Arabia when a sheikh or judge places his right hand on or near the genital organ of a man being questioned. That man is thus threatened with sterility and lack of posterity if he lies (Barakat, pp. 761, 784). In Roman custom a man swearing to tell the truth placed his forefinger on his own testicles, with the same threat implicit in that gesture (Barakat, p. 761). The striking feature of the biblical examples is that the procedure is the opposite of that described above; if anyone's genital organ (his virility) is here being placed under threat it is not that of the oath taker but rather that of the dying oath imposer. The significance in these instances may be that failure to comply with the request of the dying patriarch would mean dire consequences for the very important line of patriarchal descent to which Yahweh's promises were attached. Or, it may be that another oath-taking pattern is involved — that of placing one's hand on a sacred object while swearing the oath, with the threat coming from the power of the sacred object.

A pledge of SURETY was concluded between an intervening bail lender and an insolvent debtor by the symbolic gesture of "striking the hands" (Heb. *tāqaʿ* + *kap*), i.e., a vigorous handshake (cf. Prov. 6:1; 17:18; 22:26; Job 17:3). In these instances the gesture itself (always in poetic parallelism with *ʿārab*, "intervene, go surety") suffices to denote the pledge of surety and is so translated (RSV "give pledges"; AV "strike hands") in the above passages. (The same Hebrew expression can mean simply "clap," as a sign of joy [Ps. 47:1 (MT 2)].)

Without the legal aspects of the above example the "giving of the hand" (Heb. *nāṯan* + *yad*) may also be a gesture that signifies an agreement or unity between persons (2 K. 10:15). Further, in a society in which the clasping together of right hands was immediately recognized as a sign of agreement such a simple phrase as "hand to hand" (Heb. *yad l*^{e}*yad*) came naturally into idiomatic use as an affirmation: "indeed, surely" ("be assured," Prov. 11:21; AV "though hand join in hand"; NEB "depend upon it").

The clapping of hands (Heb. *nāḳâ* + *kap*) appears as a sign of acclamation in the Hebrew coronation rite (by the citizens for King Joash in 2 K. 11:12), and as a figurative gesture of rejoicing in Yahweh (Heb. *māḥā'* + *kap*; by the floods in Ps. 98:8; and by the trees in Isa. 55:12). By the addition of the preposition *ʿal*, "against," "at," the clapping of hands becomes sinister — a derisive gesture of malicious glee directed at someone suffering misfortune (e.g., the passersby at Jerusalem in Lam. 2:15 [Heb. *sāpaq* + *kap* + *ʿal*], all who hear of Assyria's demise in Nah. 3:19 [Heb. *tāqaʿ* + *kap* + *ʿal*], and, figuratively, the east wind at the wicked in Job 27:23 [Heb. *śāpaq* + *kap* + *ʿal*]).

In Isa. 49:22 the upraised hand (Heb. *nāśā'* + *yad*) appears as a gesture of Yahweh, "I will lift up my hand" (parallel to "raise my signal"), done to indicate (NEB "beckon") to the nations that the ingathering of scattered Israel must now begin. The lifting up of the hands (Heb. *nāśā'* + *yad*) may also be a gesture of homage (figuratively, of the deep to Yahweh in Hab. 3:10; but cf. the NEB, which divides vv. 10f. differently and conjectures, "The sun forgets to turn in his course" [lit. "The sun raised the height of his hands"]). (For illustrations of this gesture see *ANEP*, nos. 132, 246 [the Hammurabi stele], 325, 460, 700.)

Black-marble inscribed stone of the Babylonian king Merodach-baladan (722-711 B.C.), holding a staff in his left hand and lifting his right as he grants land to an official (right), who also holds a staff and lifts his right hand to show respect. Above are emblems of several deities who thus give their sanction to the grant (Staatliche Museen, Berlin)

To "wave the hand" (Heb. niphal of *nûp* + *yad*) has several connotations. In 2 K. 5:11 the disappointed Naaman declares that he surely had expected the holy man, Elisha, to "come out to me, and stand, and call on the name of the Lord his God, and wave his hand over the place [*'el-hammāqôm*], and cure the leper." This is either a gesture of invocation accompanying healing ("over the place") or a beckoning hand signal directing Naaman ("to the place"). This same Hebrew idiom (niphal *nûp* + *yad*) is used for the menacing gesture of the hand poised to strike that accompanies or effects Yahweh's drying up of the Euphrates in Isa. 11:15, and in Isa. 19:16 and Zec. 2:9 (MT 13) it signals impending disaster when Yahweh "shakes his hand." In Job 31:21 the phrase "If I have raised my hand against the fatherless" refers to exploiting or taking advantage of the defenseless. To "shake the fist" is yet more intensely accented with menace in Isa. 10:32 and Zeph. 2:15. In the first instance it is the defiant gesture of the Assyrian general about to set Jerusalem under siege — his "shaking of the fist" (polel of Heb. *nûp* + *yad*) conveys in a gesture the full menace of his army's devastating progress through the land to the very environs of Jerusalem. In the second it is the same gesture (though here translating the hiphil of Heb. *nû*[*a*]*ʿ* + *yad*) of defiance and doom still being hurled at the now deserted and ruined Nineveh by passersby, whose recollection of Assyrian terror is still strong

enough to elicit such gestures of contempt even after the fact of destruction. Nevertheless, depending on context, the wave of the hand may be simply an innocent gesture of direction, as in Isa. 13:2.

In Acts 12:17; 13:16; 19:33; 21:40, the Greek verb *kataseíō*, "motion, signal" (lit. "shake at") is employed in combination with *cheír*, "hand," to represent the gesture a public speaker uses either to gain the crowd's attention or quiet it down before beginning his speech. The RSV translates in each instance "motioning/-ed with his hand" (cf. NEB "with a movement of the hand he signed" [Acts 12:17], "made a gesture with his hand" [13:16]). The same motion is described by the Greek verb *ekteínō*, "extend, stretch out," in combination with *cheír* in Acts 26:1: "Then Paul stretched out his hand and made his defense."

The washing of the hands as a symbolic gesture is a declaration of innocence or noncomplicity (Dt. 21:6 [Heb. *rāḥaṣ* + *yaḏ*]; Mt. 27:24 [Gk. *aponíptō* (from *aponízō*) + *cheír*]; cf. also Ps. 26:6; 73:13).

To "catch/lay hold of [Heb. *ḥāzaq, 'āḥaz*] the horns of the altar" is a public and political gesture of sanctuary (1 K. 1:50f.; 2:28). The drooping or weakening of the hands is a spontaneous or instinctive gesture triggered by utter terror (Heb. *rāpâ* + *yaḏ*; 2 S. 4:1; Jer. 6:24; 38:4; 50:43; Isa. 35:3; cf. He. 12:12), expressing the sheer helplessness engendered by fear (cf. hand wringing in Wolff, p. 45). Holding the hands on the loins or abdomen is a natural gesture indicating birth pains and thus also, by extension, expressing terror and fear (Jer. 30:6). In Lk. 1:22 the aged priest Zechariah, suddenly mute, "made signs" (Gk. *dianeúō*; AV "beckoned") to communicate. This hardly represents technical gesture (i.e., a sign-language system), for he would have had little prior need to learn one; his signs were more likely a matter of spontaneous invention (*see* BECKON).

See also HAND.

II. Other Appendages.—*A. Finger.* Gestures with the finger(s) appear less frequently in the Bible. The bad habits of the scoundrel or mischief-maker (Heb. *bᵉliyya'al*) cataloged in Prov. 6:13 are that he: "winks with his eyes, scrapes with his feet, points with his finger" (Heb. *mōreh bᵉ'eṣbᵉ'ōṯāyw*). Together these amount to a kind of duplicitous sign language that correlates closely to the scoundrel's malevolent mind and interior orientation toward evil (cf. AV "teacheth with his fingers"; NEB "a sign with the fingers"). In Isa. 58:9 the "pointing of the finger" (Heb. *šᵉlaḥ 'eṣba'*) is a menacing gesture linked with such politically freighted symbols as "the yoke" (oppression) and "speaking wickedness" (AV "speaking vanity"; cf. AV "the putting forth of the finger"; NEB "to point the accusing finger"; and McKenzie, p. 165, "insulting gesture"). Contemporary Arabic cultures have a threatening or angry gesture that consists of extending the right forefinger from the fist and pointing it steadily at someone (Barakat, p. 773 no. 22). While appealing to the compassion of those who had caught a woman in the act of adultery (Jn. 8:6, 8), Jesus "wrote with his finger on the ground" (Gk. *tṓ daktylṓ katégraphen eis tḗn gḗn*). In healing the deaf-mute in the Decapolis region Jesus "put his fingers into his [i.e., the deaf-mute's] ears" (Mk. 7:33).

B. Arm. Gestures made with the arms are mostly embraces. In Mk. 9:36 Jesus extended His arms (Gk. *enankalízomai*) to embrace a small child as He announced: "Whoever receives one such child in my name receives me" (v. 37, cf. 10:16). In Gen. 33:4 the repentant Jacob, approaching Esau with ample bowing and prostration, is surprised to be warmly embraced (*ḥāḥaq*) by his forgiving brother (cf. NEB "threw his arms round him"; cf. Gen. 48:10). The use of the Greek verb *kataneúō*, "signal, motion," in Lk. 5:7 with regard to the fishermen who "beckoned to their partners in the other boat to come and help them," strongly implies a vigorous arm gesture.

C. Foot. A very ancient foot gesture is placing one's foot on the neck of the slain or prostrate foe to symbolize conquest or subjugation. In Josh. 10:24, after the five captured Amorite rulers were paraded before the Israelite army, Joshua summoned his "chiefs of the men of war" to "put [their] feet upon the necks [*śîmû 'eṯ-raglêḵem 'al-ṣawwᵉ'rê*] of these kings" to signify their victory and superiority. The same gesture appears in Bar. 4:25 where exiled Israel is urged to wait patiently: "Your enemy has hunted you down, but you will soon see him destroyed, and will put your foot on his neck" (NEB; cf. Gen. 49:8; Dt. 33:29 [LXX]; 1QM 12:11). The same gesture is the working image of 1 Cor. 15:25 — "For he must reign until he has put all his enemies under his feet" (cf. Ps. 110:1, and the surrender gesture above).

Tiglath-pileser III (745-727 B.C.) rests his foot on the neck of a prostrate king. Relief from Calah (Nimrûd) (Trustees of the British Museum)

"Shaking off" (Gk. *ektinássō*) the dust from one's feet is a NT gesture indicating the severance of the connection with, or responsibility to, others. In Mt. 10:14 among His instructions to the disciples Jesus stated, "And if any one will not receive you or listen to your words, shake off the dust from your feet as you leave that house or town." This gesture appears also in Acts 13:51; as Paul and Barnabas were being driven from Pisidian Antioch, "they shook off the dust from their feet against them" (*ep' autoús*). The simple addition of the prepositional phrase adds force to the gesture; thus NEB "they shook the dust off their feet in protest against them" (cf. JB "in defiance"). It is also clear from this passage that the gesture is directed *at* someone.

Uncovering one's feet is a gesture of grief and repentance in 2 S. 15:30 as the king himself, head covered and weeping, walked barefoot (Heb. *yāḥēp*). Isaiah went barefoot (as well as naked) for three years (Isa. 20:2, 4) to dramatize the stark threat of Assyrian exile.

Uncovering the feet of another may also in some contexts be a sign of willingness to marry. The young widow Ruth followed the instructions of her mother-in-law Naomi to "uncover the feet" (*wᵉgillîṯ margᵉlōṯāyw*) of Boaz as he slept (Ruth 3:4, 7). (Heb. **margᵉlôṯ* means "legs" in Dnl. 10:6 and is closely related to *raglayim*, "feet," which can

be a euphemism for the genitals, e.g., Jgs. 3:24, etc.) Thus in the light of commands against uncovering another's "skirt" (*kānāp*) (Dt. 22:30 [MT 23:1]; 27:20), and a context rife with sexual connotations (e.g., the verbs *šāḵaḇ*, "lie down"; *yāḏaʿ*, "know"; *bôʾ*, "go in"), a few interpreters have considered Ruth's action part of a deliberate seduction of the potential *gôʾēl* ("redeemer"), Boaz. Such an interpretation, however, is inconsistent with the character of Ruth and Naomi revealed throughout the story. Although Naomi's plan does leave itself open to misunderstanding (indeed, the deliberate ambiguity is a sign of the narrator's craft in heightening the suspense; cf. E. F. Campbell, *Ruth* [*AB*, 1975], pp. 130-32), it really only intends a symbolic act, a mimed invitation to marriage. The ambiguity begins to clear up at v. 13 with Boaz's use of Heb. *lûn/lîn*, "lodge," which has no sexual connotations. This was not a sexual encounter after all; Boaz did not take advantage of the young widow, and his measuring out of grain is evidence of his determination to care for the two widows as custom and generosity dictate.

The expression "covering his feet" is a well-known euphemism for relieving oneself (e.g., Jgs. 3:24, *mēsîḵ hû' 'eṯ-raglāyw*).

In Jn. 13:5-12 Jesus washed (Gk. *níptō*) the feet of His disciples as a symbolic gesture of humble service, thereby delineating the authentic character of authority: "If I then, your Lord and Teacher, have washed your feet, you also ought to wash one another's feet" (13:14). To "lift the heel against" another, as used in Ps. 41:9 (MT 10) and quoted in Jn. 13:18, is a gesture (or at least a figure of speech with its roots in gesture) for opposition (cf. NEB "has turned against me").

In Prov. 6:13 the scoundrel is said to have several signals ready when he desires to communicate covertly; in addition to winking and finger gesture he "scrapes [Heb. *môlēl*, lit. "speaks"; RSV mg. "taps"] with his feet" (cf. AV "he speaketh with his feet"; NEB "a touch with the foot"). This may have taken the form of tracing patterns or signs in the dust with the foot (see McKane, p. 325).

See also FOOT.

D. Thigh. In Jer. 31:18f. Ephraim figuratively recalls how as a youth he had to be chastened "like an untrained calf" by Yahweh, and adds:

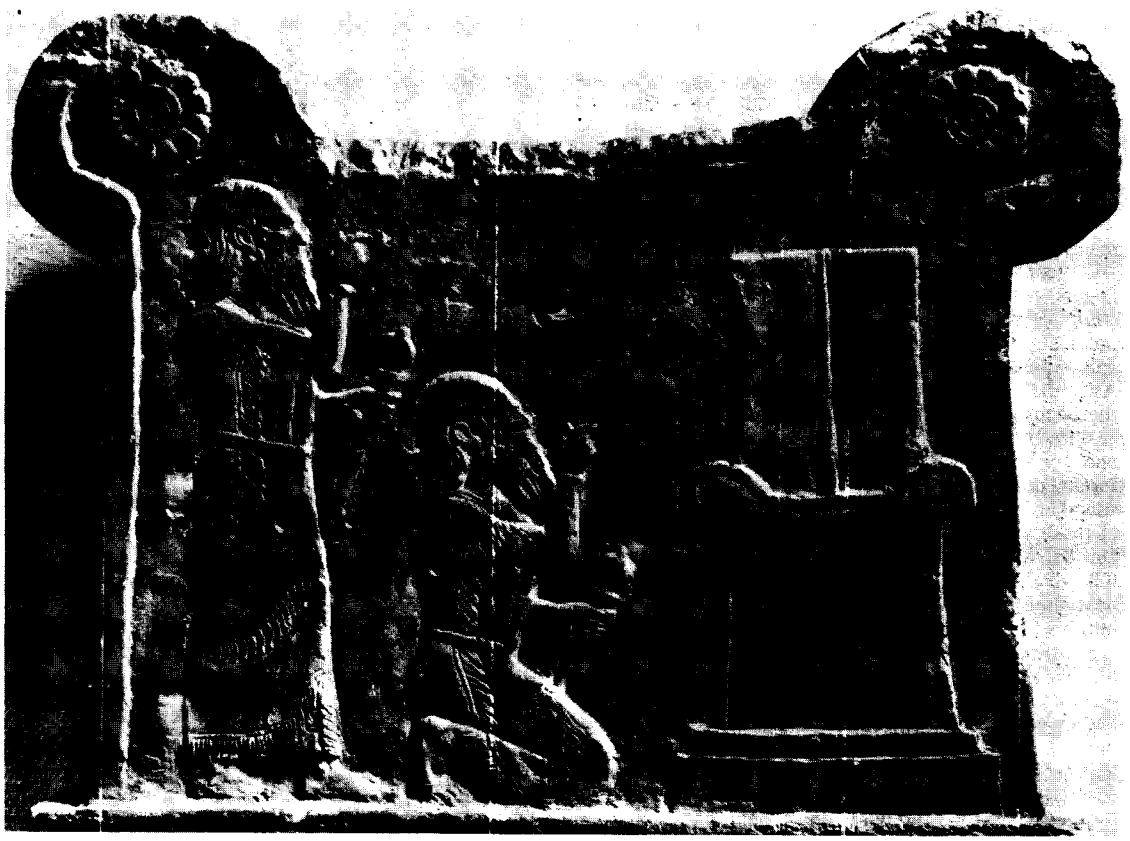
> For after I had turned away I repented;
> and after I was instructed, I smote upon my thigh;
> I was ashamed, and I was confounded,
> because I bore the disgrace of my youth.

In the context the smiting of the thigh appears to be a gesture of remorse or shame, but following an experience of insight or instruction it may well be a gesture of coming to one's senses or of suddenly recalling something important. In contemporary Arabic cultures hitting the right thigh with the right palm indicates surprise, joy, or the recollection of something (Barakat, p. 774 no. 30).

E. Knee. Knees (Heb. *birkayim*; Gk. *góny*) are bowed (Heb. *kāraʿ*; Gk. *kámptō*) in homage (1 K. 19:18; Isa. 45:23; Rom. 14:11; Phil. 2:10) or in prayer (Ezr. 9:5; cf. also 2 Ch. 6:13). See illustration in Gray, p. 56. (*See also* KNEE.)

III. Breast.–The "beating of the BREAST" (Gk. *týptō*

nscribed alabaster cult socket of Tukulti-Ninurta I (1243-1207 B.C.) from Asshur. The king is shown twice, first standing and then kneeling, holding a mace and pointing his index finger at the shield of the fire-god Nusku (Staatliche Museen, Berlin)



tó stḗthos) appears twice in the NT as a gesture of remorse or contrition: on the part of the tax collector in the temple (Lk. 18:13) and the crowd at the crucifixion (23:48). Mourning women in the ancient Near East lacerated their breasts to express their grief (Ezk. 23:24). Figures slash their breasts and pull out their hair (see below) on the sarcophagus of King Ahiram of Byblos (see *ANEP*, no. 459; Gray, p. 87). In addition to shaving off their hair and beard, tearing their clothing, and putting on sackcloth, mourners were known to lacerate their bodies as a public gesture of grief — "cut himself" (Jer. 16:6), "their bodies gashed" (41:5), and "upon all the hands are gashes" (48:37). *See also* CUTTINGS IN THE FLESH.

IV. The Whole Body.–The whole body is bowed to the ground (Heb. *šāḥâ* + *'ārṣâ*) in greeting, and to indicate deference to a superior (Gen. 18:2; 19:1). In some instances protocol demanded a fixed number of such bows (seven times in Gen. 33:3, 7, and in Am.Tab. 137, 147, 234, etc.; three times in 1 S. 20:41). Similarly, "bowing, doing obeisance to" (*šāḥâ* + *l*^{e}-) someone is a sign of deference to a superior (Gen. 23:7; 42:6; 2 S. 9:6, 8; 1 K. 1:31, 53; 2:19), of obedience (2 S. 18:21), or of worship (2 K. 5:18; 2 Ch. 29:29). To stand upright (Heb. *qûm*) in the presence of the elderly is a gesture of respect and honor for the aged. Such action is commanded in Lev. 19:32. Thus, so highly esteemed was Job before the onset of all his calamities that even "the aged rose and stood" (Heb. *qûm* + *'āmaḏ*) in his presence (Job 29:8)! This same gesture of respect is also practiced in contemporary Arabic cultures whenever an esteemed person enters the house or tent (Barakat, p. 783 no. 181).

V. Head.–The head is bowed (*qāḏaḏ*) for prayer (Gen. 24:26). The lifting up of one's head (Heb. *nāśā'* or *rûm* + *rō'š*) is a gesture signifying rebellion (Ps. 83:2 [MT 3]; Jgs. 8:28), resistance or opposition (Zec. 1:21 [MT 2:4]). It may also indicate victory: "my head shall be lifted up above my enemies" (Ps. 27:6; cf. Ps. 110:7). Thus this phrase, *nāśā'* + *rō'š*, may also be idiomatic for "free" or "release from captivity" as in 2 K. 25:27, "Evil-merodach king of Babylon . . . graciously freed Jehoiachin" (AV "did lift up the head of Jehoiachin"; NEB "showed favor to Jehoiachin . . . brought him out").

Covering (Heb. *ḥāpâ*) the head is a gesture of grief (2 S. 15:30), mourning (Est. 6:12), or shame (Jer. 14:3f.). Grief or remorse is also indicated by the gesture of putting on dust (*'āpār*, Josh. 7:6), earth (*'^{a}ḏāmâ*, 1 S. 4:12; 2 S. 1:2), or ashes (*'ēper*, 2 S. 13:19; Est. 4:1). This gesture is usually accompanied by the rending of one's garment(s) (2 S. 13:19), and at times the donning of sackcloth (Est. 4:1). Tamar, after her cruel mistreatment at the hands of Amnon, not only put ashes on her head and rent her robe, but also "laid her hand on her head" (Heb. *wattāśem yāḏāh 'al-rō'šāh*) in a gesture of shame as she went away crying. Likewise the people will march ignominiously into exile with their hands on their heads (Jer. 2:37; cf. the Egyptian relief from Abusir of a procession of prisoners [*ANEP*, no. 1]).

A common head gesture is the "wagging" or "shaking" of the head to indicate contempt, reproach, or horror. Job wished that he could "shake" (Heb. **nû(a)'*) his head in reproach at his advisers just as they had been doing to him (Job 16:4). Jeremiah envisioned passersby "shak-

Lachish residents (extreme left) bow before Sennacherib as he receives tribute. Relief from Kuyunjik (Nineveh) ca. 700 B.C. (Trustees of the British Museum)

ing" (Heb. *nûḏ*) their heads at the coming ruin of Israel (Jer. 18:16). And so did they "wag" (Heb. **nû(a)ʿ*) their heads over the plight of fallen Jerusalem (Lam. 2:15). In addition, in both these instances the passersby also hissed contemptuously. The personified Jerusalem in 2 K. 19:21 (= Isa. 37:22) wagged her head behind the arrogant Sennacherib to signify her contempt of his might. Heads were "wagged" (Heb. **nû(a)ʿ*) also in derision and reproach of the sufferer in Ps. 22:7 (MT 8), 109:25; cf. Sir. 12:18. Similarly, at the crucifixion taunting onlookers "wagged" (Gk. *kinéō*) their heads at Jesus (Mt. 27:39 par.). Thus, since the gesture of head wagging suffices in itself to indicate derision, the phrase *mᵉnôḏ-rōʾš* may be idiomatic for "laughingstock" (Ps. 44:14 [MT 15]; RSV mg., AV "a shaking of the head"; NEB "shake their heads").

The head is "nodded" (Gk. *neúō*) in order to signal another person (Jn. 13:24; RSV, AV, "beckon"; NEB "nodded"). The "wagging" or "shaking" of the head may also be a genuine gesture of sympathy in a context of grief or dismay. The Hebrew verb *nûḏ*, "move to and fro," frequently appears in the extended sense of "commiserate, express sympathy" as in Job 2:11 ("condole") and 42:11 ("showed . . . sympathy"). (Cf. also Jer. 18:16.)

See also HEAD.

A. Face. Covering the face is a gesture of solitary mourning in 2 S. 19:4 (MT 5) where David "covered his face" (Heb. *lāʾaṭ ʾeṯ-pānāyw*; NEB "hid his face") while grieving deeply over Absalom's death.

B. Eye. The most obvious gesture with the eyes is winking, and in Prov. 6:13 one aspect of the scoundrel's sinister sign language is that he "winks with his eyes" (*qōrēṣ bᵉʿênāw*) for no good purpose. That the wink is a duplicitous gesture is confirmed by Sir. 27:22, "A man who winks is plotting mischief" (NEB), and Prov. 10:10, "he who winks the eye causes trouble." Looking upward prior to or during prayer is a gesture obviously directing the prayer to God. In Lk. 18:13 the tax collector considered himself so unworthy to enter into the divine presence that he "would not even lift up his eyes to heaven" (Gk. *oudé toús ophthalmoús epárai eis tón ouranón*). In Lk. 9:16, before blessing and breaking the five loaves and two fishes, Jesus "looked up to heaven" (Gk. *anablépsas eis tón ouranón*). It is the same eye gesture in each instance; the first is simply described differently through a semitism.

In another context, however, lifting the eyelids, and thus the eyes, becomes the obvious gesture of self-righteous pride that looks down on others:

> There are those who are pure in their own eyes
> but are not cleansed of their filth.
> There are those — how lofty are their eyes,
> how high their eyelids lift!

(Heb. *wᵉʿap̄appāyw yinnāśēʾû*, Prov. 30:12f.; NEB "how disdainful their glances"; see McKane, p. 311, for "glances").

C. Mouth. The sufferer in Ps. 22:7 (MT 8) lamented that "all who see me mock at me,/they make mouths at me,/they wag their heads." The literal meaning of the Hebrew phrase *yapṭîrû bᵉśāpâ* is "they cause the lips to separate." The verb *pāṭar* is also used to describe the opening up of a flower (1 K. 6:18); "to make mouths at" (RSV, NEB; cf. AV "shoot out the lip") is thus to gape at another in mock horror or derision. The mouth was used in a very common gesture of greeting and salutation — the kiss (Heb. *nāšaq*; Gen. 45:15; 48:10; Ex. 18:7; 1 S. 20:41; Gk. *kataphiléō*; Mt. 26:49; Lk. 15:20). Jesus spat in connection with His healing of both the deaf-mute (Mk. 7:33) and the blind man (8:23). Spitting in someone's face was a way to shame him. Thus the brother-in-law who refused to act on his leviratic obligation, in the presence of the elders, had to face the solitary widow who by law was required to remove his sandal and spit in his face (Heb. *wᵉyārᵉqâ bᵉpānāyw*, Dt. 25:9); cf. Nu. 12:14; Isa. 50:6, "I hid not my face from shame and spitting" (Heb. *rōq*). This gesture has the same import in the NT where it appeared in Jesus' humiliation (Gk. *emptýō*; Mt. 26:67 par.; 27:30 par.). Spitting in the face of another person, or at his feet, is still a contemporary Arab expression of shame or insult (Barakat, p. 783 no. 185). *See also* MOUTH.

D. Nose. The NOSE is the focus of an obscure gesture mentioned in Ezk. 8:17 — in a vision twenty-five idolatrous sun worshipers are observed by Ezekiel to "put the branch to their nose" (Heb. *šōlᵉḥîm ʾeṯ-hazzᵉmôrâ ʾel-ʾappām*). This gesture has been understood, on the one hand, to be one of appeasement (cf. NEB "even while they seek to appease me"), and one of extreme offensiveness on the other. (Cf. Today's English Version, "they insult me in the most offensive way possible." T. H. Gaster, following older Jewish interpretation that suspects Persian influence involving the smelling of aromatic plants, proposes: "They were inhaling the fragrance of vine-branches (lit. sending the vine-branches to their nose)" [p. 309]. The LXX has *myktērízontes*, "turning up the nose" [i.e., sneezing]. H. Saggs suggests [pp. 318ff.] that Mesopotamian parallels point to phallic fertility-cult associations with the stick or vine branch; cf. Isa. 10:17.) It seems clear that in a context of progressive abominations this final one, whatever it is, should be the worst. Thus, as traditional Jewish exegesis has generally concluded, it may be that this gesture was obscene. Such a conclusion is supported by the fact that this passage contains one of the eighteen textual emendations (*tiqqûn sōpᵉrîm*) made by the ancient scribes for the sake of maintaining proper reverence for God. In the original text the offense had been directed at Yahweh Himself — "to *my* nose." Thus Eichrodt, conjecturing the sense of "stink" for *zᵉmôrâ*, "branch, tendril," renders the passage: "forcing their stink up my nostrils," in reference to their blasphemous rituals (see Eichrodt, pp. 106, 108, 127f.). It may also have been that the act of putting a branch to someone's nose was an ordinary and obvious gesture of provocation whose meaning and origin were subsequently lost. Thus Gordis (p. 287) contends that this idiom, whatever its origin, functions with the meaning "harass, irritate."

E. Ear. To "incline the ear" (i.e., "bend" or "lean near," Heb. *nāṭâ* + *ʾōzen*) is a common gesture of attentiveness in the OT (cf. Ps. 45:10 [MT 11]; 86:1; Jer. 7:26; NEB "hear my words," "turn," "paid heed"). *See also* EAR.

F. Neck. "Stiffening of the NECK (Heb. *qāšâ* + *ʿōrep*) appears as a gesture of obduracy in Prov. 29:1 (AV "hardeneth his neck"; NEB "still stubborn"); Jer. 7:26 (NEB "were obstinate"); 17:23; 19:15; and Neh. 9:16f. (NEB "were/remained stubborn"). To "fall upon the neck" (Heb. *nāp̄al* + *ʿal-* + *ṣawwāʾr*; Gk. *epipíptō* + *epí* + *tráchēlos*) of someone (i.e., embrace with arms encircling the neck) is a gesture of warm welcome (Gen. 33:4; 45:14; 46:29; AV Lk. 15:20; Acts 20:37). Walking "with outstretched necks" (Heb. *nᵉṭûʿōṯ gārôn*) is a gesture of haughtiness that Isaiah found distasteful in the conduct of the daughters of Zion (Isa. 3:16). One of Jeremiah's symbolic actions was to fashion a yoke and put it on his own neck (Jer. 27:2).

G. Beard. In contemporary Arab societies it is customary for the victorious in battle to cut off the BEARD of those conquered, a victory gesture implying that the defeated men have lost the virility that the beard represents (see Barakat, p. 782 no. 174). Thus Ezekiel in one of his symbolic actions shaved his beard (and head) as a gesture that signified what sort of dire consequences might be expected to follow the siege of Jerusalem (Ezk. 5:1; cf. Isa. 15:2). Again, when Ammon's new king Hanun had

half the beard of each of King David's ambassadors cut off, they were too ashamed to return home until the hair was regrown, so strongly did this act imply that they were each thereby only half a man (2 S. 10:1-5). The act of shaving the beard (except in cases of leprosy; cf. Lev. 14:9) became then a desperate public gesture of shame and loss of potency (Jer. 41:5). In Isa. 7:20 Yahweh is envisioned as using the rapacious Assyrian war machine as a "razor" that will "shave" (fig.) not only the beard of Judah but also all the hair on its body — complete devastation and loss of virility. "Plucking out" (Heb. *māraṭ*) the hair of one's own beard or head is a gesture of consternation and anger, as illustrated by Ezra's reaction to troubling news (Ezr. 9:3).

VI. Clothes.–A dramatic gesture expressing grief, horror, or anguish is the tearing of one's garments (e.g., Heb. *qāraʿ* + *beged*, Nu. 14:6; Jgs. 11:35; 2 S. 1:2; Ezr. 9:3, 5; Gk. *diarḗssō* or *diarrēgnymi* + *himátion, chitṓn*, Mt. 26:65; Mk. 14:63; Acts 14:14; Jth. 14:19). That the external gesture of sorrow can never replace the need for internal reorientation or repentance is clear from Joel 2:13: "rend your hearts and not your garments." Another gesture involving garments is illustrated in Acts 18:6 where Paul, after being reviled, symbolically "shook out his garments" to indicate a severance of connection with, or obligation to, those who were rejecting him. *See also* GARMENTS.

GET. Many Hebrew and Greek verbs are rendered "get" and have various shades of meaning.

(1) Literally, "get" is used in the sense of "acquire" or "obtain," e.g., property (Gen. 34:10, niphal of *ʾāḥaz*), wealth or riches (Dt. 8:17, *ʿāśâ*, "do," "make"; Prov. 11:16b, *tāmaḵ*, "grasp, lay hold of"), cities (2 S. 20:6, *māṣāʾ*, "find"). Metaphorically, one is to "gain" understanding (Job. 11:12, niphal of **lāḇaḇ*, "be made intelligent"; Ps. 119:104, hithpolel of *bîn*, "pay attention to"), wisdom and understanding (Prov. 16:16, *qānâ*, "obtain"), a new heart (Ezk. 18:31, *ʿāśâ*), honor (Prov. 11:16a, *tāmaḵ*), etc.

(2) At times "get" is equivalent to "fetch," as in Jer. 36:21 ("get [a scroll]," *lāqaḥ*, "take"), Lam. 5:6 ("get enough [bread]," *śāḇaʿ*, "be sated with"), Mk. 12:2 ("get [fruit]," Gk. *lambánō*, "take"), 2 Tim. 4:11 ("get [Mark]," *analambánō*, "take up").

(3) Often "get" occurs in compounds and signifies "go" (e.g., "get out," *yāṣāʾ min*, Gen. 19:14, "get away from me," *lēḵ mēʿālāy*, Ex. 10:28), or "become" (e.g., "get warm," 1 K. 1:1 [*ḥāmam*], "get drunk," Lk. 12:45 [*methýskō*]). Of interest is Our Lord's rebuke to Peter, "Get behind me, Satan!" (*hýpage opísō mou, sataná*, Mk. 8:33 par.). It may mean that Christ, who would not yield to the temptation to forego His sufferings on the cross, implied that Peter should "return to [his] rank" as a true believer of Christ (W. L. Lane, comm. on Mark [*NICNT*, 1974], p. 295 n. 77). On the other hand, it may simply mean, "Get out of my way," i.e., do not try to block my determination to accomplish my mission. R. W. V.

GETHER gē'thər [Heb. *geṯer*]. In Gen. 10:23 named as one of the four sons of Aram. In 1 Ch. 1:17 mentioned simply among the sons of Shem.

GETHSEMANE geth-sem'ə-nē [Gk. *Gethsēmani* < Aram. or Heb. *gaṯ šᵉmānîm*–'oil press']. The place where Jesus agonized in prayer on the night of His betrayal.

I. Location.–The name is mentioned in Matthew (26:36) and Mark (14:32) as the piece of land or field (*chōríon*) to which Jesus and His disciples retired following the Last Supper. In Jn. 18:1 it is described as a garden (*kḗpos*), from which comes the traditional designation "Garden of Gethsemane," while Lk. 22:40 has simply "place" (*tópos*). From Jn. 18:1 it is evident that it was across the Kidron, and from Lk. 22:39, that it was on the slope of the Mt. of Olives. It was a place where Jesus frequently went with His disciples (Lk. 22:39f.; Jn. 18:2). Its name suggests a grove of olive trees, as does its location on the Mt. of Olives. The language of John's Gospel seems to imply a walled garden ("entered," 18:1).

II. Event.–The terms in which the experience of Gethsemane is described in the Gospels speak of deepest sorrow and suffering. Lk. 22:44 used the word "agony" (Gk. *agōnía*) to speak of Our Lord's experience, thus implying a great strain or struggle (cf. Mt. 26:37 par. Mk. 14:33). And it is Luke who gave the physical description: "his sweat became like great drops of blood falling down upon the ground" (Lk. 22:44, RSV mg.). Jesus' words of warning to His disciples (Mt. 26:41; cf. Lk. 22:40, 46) and His prayer (Mt. 26:39 par.) imply that He regarded the event in terms of a temptation (cf. He. 5:7f.), from which He emerged victoriously (cf. I. H. Marshall, comm. on Luke [*New International Greek Testament Commentary*, 1978], p. 831).

III. Meaning.–The exact meaning of the event has been a subject of theological controversy from earliest times. But certainly there seems to be an anticipation of the cross, where the Son of God Himself was to experience man's

Rembrandt van Rijn, *Agony in the Garden*, a seventeenth-century etching showing Christ (right), an angel, and sleeping disciples (left) (Metropolitan Museum of Art, Harris Brisbane Dick Fund, 1923)

greatest inhumanity to man and also abandonment by God and man in fulfillment of the role of the Servant of Yahweh, who voluntarily suffered an atoning death for the sins of mankind. Some would see in the event an intended contrast with the experience of Adam in the Garden of Eden: here the Second Adam prevailed, by prayer and inward submission to the will of God, over temptation.

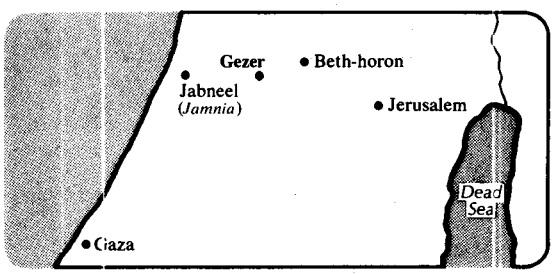
IV. Tradition.–The site on the slopes of the Mt. of Olives where the Franciscans maintain the Grotto of the Agony dates back at least to the 5th cent. and has as good a claim as any place to be the location of Gethsemane, but one cannot be certain. Several other spots vie for the honor of being the location of the event mentioned in the Gospels. Although the olive trees in the present Garden are very old, they cannot, in spite of claims to the contrary, go back to the 1st century. *See* Plate 42.

See *DBSup.*, III (1938), 631-659. W. W. GASQUE

GEUEL gē'el, gə-ū'el [Heb. *gᵉ'û'ēl*–'majesty of God' (?)]. The man from the tribe of Gad (Nu. 13:15), sent by Moses to spy out the land of Canaan.

GEZER gē'zər [Heb. *gezer*; LXX Gk. *Gazera, Gazēra, Gazer, Gader*]; AV GAZER (2 S. 5:25; 1 Ch. 14:16), GAZERA (1 Macc. 4:15; 7:45), or GAZARA. An important city in the northern Shephelah, the modern Tell Jezer.

I. Location.–Gezer is situated on the northwestern extension of that intermediary line of hills (the Shephelah) separating the Judean hill country from the Philistine plain. Its significance stems from its proximity to the great N-S trunk line (Via Maris) that runs along the coast to Jabneel (Jamnia) and turns eastward across the plain of Ono to reach Aphek (Râs el-'Ain); and equally significant, Gezer guards the junction of the Via Maris with the principal highway going laterally into the hill country via the ascent of Beth-horon.



II. Excavation.–The site was discovered by C. Clermont-Ganneau in 1871. R. A. S. Macalister conducted two major campaigns at Tell Jezer between 1902 and 1905 and again between 1907 and 1909. From 1964 to 1974 the Hebrew Union College Biblical and Archaeological School in Jerusalem conducted a series of excavations directed by G. E. Wright, W. G. Dever, and J. D. Seger.

One problem that troubled scholars after the publication of Macalister's work was the apparent absence of a stratum from the period of the Israelite monarchy. Y. Yadin, by comparing the ground plan of the tenth-century city gate and casemate wall discovered at Hazor, demonstrated that a so-called Maccabean palace in Macalister's drawings had practically the same dimensions as half the gate at Hazor; the adjoining casemate wall was of exactly the same measurements (1958). Such a coincidence is hardly likely unless the two structures were contemporary.

Part of a row of ten monoliths (some of which are over 3 m. [10 ft.] high) at the so-called Gezer high place (17th cent. B.C.). These stones are now thought to have been connected with covenant ceremonies among the neighboring peoples (cf. Ex. 24:4) (D. Baly)

III. History.–A. Bronze Age. The first recorded reference to Gezer is in the topographical lists of Thutmose III, where it appears as no. 104 (written *g-ḏ-r*). This would indicate that it was conquered by that pharaoh during his first campaign to Canaan; his march from Gaza to Yaḥm was considerably impeded by the resistance he encountered from Gezer and her neighbors. Along with all of Canaan, Gezer seems to have remained loyal to Egypt throughout the reign of Thutmose III and Amenhotep II. Thutmose IV may have had to take punitive action there, however, for on a stele in his mortuary temple he mentions Khurru (Horite) captives from Gez[er] who have been installed in Egypt (*ANET*, p. 248). A cuneiform tablet discovered on the surface at Tell Jezer appears to be a request from a high-ranking Egyptian that the ruler of Gezer bring him seven oxen at the town of Gittim (Gath, or perhaps Gittaim). It has been suggested that the tablet was sent by Thutmose IV during some campaign to Canaan and that failure to comply with the request resulted in the capture of the city.

Gezer and its rulers figure prominently in the Egyptian archives from Tell el-Amarna. The course of events pertaining to the city and its neighbors as reflected in these texts has been the subject of several recent studies (cf. bibliography). These texts mention the 'Apiru (outlaws, renegade soldiers, or even political rivals to the Egyptians; *see also* HABIRU), who were exerting strong pressure on Gezer and on a neighboring ruler, Šuwardata (from Gath, or Hebron[?]); Milkilu, ruler of Gezer, called to Pharaoh for a chariot force that would rescue him and Šuwardata (Am.Tab. 271). Later Abdu-Ḫeba, prince of Jerusalem, confirmed an alliance between Gezer and Shechem (289); Milkilu and Šuwardata (290), supported by Tagu (289), had seized Rubutu (=Rabbah, Josh. 15:60), a town that belonged to Jerusalem. In another letter Abdu-Ḫeba blamed Gezer, Ashkelon, and Lachish for furnishing supplies to his enemies (287); but the king of Gezer (here called Ilimilku) seems to have been the prime mover behind the 'Apiru attempt to seize the territory loyal to Pharaoh (286).

How the new coalition under Milkilu's leadership fared is not stated in any of the Amarna Letters, but its failure seems to be implied by certain hints that have been preserved. Amenhotep IV (Akhenaten) is known to have

planned an expedition to Canaan, probably directed against his recalcitrant vassal in the north, Amurru. Though the campaign was evidently cancelled at the last minute, the impending show of force may have caused the partners to fall out with one another. The death of Milkilu may have been a decisive factor, though that event is not recorded. What does seem clear is the replacement of Gezer's prince by his sons. The princess of Zaphon in the Jordan Valley reported that Pharaoh's land was falling away to the 'Apiru, who had attacked Aijalon and Zorah; during this encounter the sons of Milkilu escaped being smitten only by a "finger's breadth" (273). One of these sons was probably Yapaḫu, a subsequent ruler of Gezer. Yapaḫu affirmed his own loyalty in the face of pressure from the 'Apiru (299). His younger brother (unnamed) is said to have entered Muḫḫazu and to have aligned himself with the 'Apiru (298).

Gezer does not appear in the extant records of the later pharaohs of the 18th Dynasty, nor is it mentioned by members of the 19th Dynasty until the reign of Merneptah (*ca.* 1223-1211 B.C.), who called himself "the reducer of Gezer" and whose victory stele boasts that Gezer was captured (*ANET,* p. 378). The political circumstances that brought on this Egyptian attack are unknown; besides Gezer the same text gloats over Canaan, Ashkelon, Yanoam, and the people of Israel.

B. Iron Age. During the conquest of the land by Israel, Horam king of Gezer came to the aid of Lachish but was defeated in the field (Josh. 10:33; the LXX has Gk. *Gaza,* a common scribal error for Gazara in Greek sources). Thus Horam appears in the list of conquered Canaanite kings (Josh. 12:12). Gezer's location on the border of the territory allotted to the sons of Joseph after Lower Beth-horon (Josh. 16:3) was a helpful guide to the eventual discovery of the ancient site at Tell Jezer. Although the town was assigned to the tribe of Ephraim (1 Ch. 7:28), the Ephraimites did not succeed in driving out the Canaanite population (Josh. 16:10; Jgs. 1:29); when Israel became strong, the Canaanites were subjected to forced labor. The Kohathites (Levites) who settled in Ephraim's territory were allotted Gezer as one of their cities (Josh. 21:21; 1 Ch. 6:67 [MT 52]).

During the early stages of David's conflict with the Philistines, when he repulsed their intrusions into the hill country, he pursued them as far as Gezer (2 S. 5:25; 1 Ch. 14:16). Subsequently, David carried the war down to the region of Gezer itself (1 Ch. 20:4). It seems unlikely that David would have left Gezer untouched as a Canaanite enclave within his kingdom; nevertheless, the town was conquered and ravaged by the pharaoh of Egypt during the reign of Solomon (1 K. 9:15-17). Either the Egyptians had begun hostilities against Israel and later became reconciled to Solomon's power, or Gezer had somehow rebelled and regained its independence for a brief time in the early years of Solomon's reign. Whatever the situation, Solomon incorporated Gezer into his network of military stations along with Hazor, Megiddo, Beth-horon, and others (1 K. 9:15-17). (*See* Map VII.) As noted above, almost identical gates and casemate walls existed at Gezer and Hazor.

Perhaps the Philistines had gained control of Gezer before Pharaoh's deed. His drive across Philistia seems to reflect a renewed Egyptian suzerainty over that area. Such a situation apparently prevailed somewhat later, because Pharaoh Sheshonq (Shishak) was able to march across the Philistine plain from Gaza (no. 11 in his list) to Gezer (no. 12) without meeting resistance. Gezer itself did fall in his line of fire, however, and its reduction was essential for Shishak to penetrate the hill country via the Beth-horon route and threaten Jerusalem (1 K. 14:25-28; 2 Ch. 12:1-12).

During the period of the divided monarchy, it is not certain to whom Gezer belonged. In fact, Gezer does not figure in the biblical text at all. Only from a relief depicting its conquest by Tiglath-pileser III (*ANEP,* no. 369) was it learned that the city had suffered during his conquest of Philistia (734 B.C.) or of Israel (733 B.C.).

The discovery of two Assyrian cuneiform tablets in the excavations at Tell Jezer suggests an Assyrian colony there following the fall of the Israelite kingdom. The presence at Gezer of stamped jar handles and a shekel weight marked "for the king," however, indicate that Gezer was attached to the Judean monarchy during the late 8th cent. B.C.

In the postexilic period Gezer may have been attached to the Judean province, as evidenced by the stamped jar handles with the "Yehud" and "Yerushalem" inscriptions. But the situation is far from clear. After the Egyptians broke away from the Persian empire they may have maintained a foothold for some time in Palestine; a stone slab and a scarab bearing the name of Neferites, founder of the 29th Dynasty (398-393 B.C.), was found at Gezer.

C. Hellenistic Age. Before the rise of the Hasmonean kingdom Gezer was evidently a gentile fortress (Avi-Yonah suggests that the Andronicus of 2 Macc. 5:23 was stationed at Gezer rather than [Gk.] *Garizin*). Thus it served as a refuge for the fleeing Syrians after Judas Maccabeus had routed them near Emmaus (1 Macc. 4:15; Josephus *Ant.* xii.7.4 [308]; 165 B.C.). The same was true for the shattered remnants of Nicanor's army, whom the Judean villagers harrassed as they desperately sought to reach the safety of Gezer from the heights near Jerusalem (1 Macc. 7:45; 161 B.C.). After Bacchides' victory over Judas in 161, he began to surround central Judea with new fortresses, and Beth-zur and Gezer were strengthened at the same time (1 Macc. 9:52; Josephus *Ant.* xiii.1.3 [15f.]).

Twenty years later Simon Maccabeus took advantage of the dynastic struggle for the Seleucid throne to extend his authority to the coast; an essential link in the chain was Gezer (AV, Gk. "Gaza"; RSV, NEB "Gazara"), which he reduced by the use of a siege engine (1 Macc. 13:43-48). It was at Gezer that Simon stationed his son John with a garrison (1 Macc. 13:53; 14:34). In 137 B.C. Antiochus Sidetes had achieved a position of strength and therefore demanded that Simon return to him the coastal possessions, including Gezer (1 Macc. 15:28-35). When the Jews refused, he appointed an officer named Cendebeus to open hostilities against Judea; John went up from Gezer to inform his father Simon of the impending threat (1 Macc. 16:1); he was given command of a field army that repelled the Syrians (1 Macc. 16:4-10). Afterward, John (Hyrcanus I) remained at his post in Gezer until the murder of his father by Ptolemy son of Abubus. When the latter sent men to Gezer to slay John as well, they were caught by him and executed.

Once John Hyrcanus had become high priest in his father's place, Antiochus Sidetes came against him again (133/132 B.C.) and by besieging Jerusalem forced John to surrender the coastal cities (Josephus *BJ* i.2.5 [61]; *Ant.* xiii.8.3 [245-48]). After Antiochus' death, Hyrcanus regained Gezer and the other towns on the plain (129 B.C.); in this he had the support of the Roman senate (*Ant.* xiii.9.2 [259-266]). Though not included in Josephus' list of cities in Jewish hands during the reign of Alexander Janneus (*Ant.* xiii.15.4 [395-97]), Gezer was clearly still a Hasmonean fortress.

During the Roman period, Gezer had become merely

a village; it was by then overshadowed by the nearby town of Emmaus-Nicopolis (Eusebius *Onom.* 66.19–68.2).

A. F. RAINEY

GEZER CALENDAR. A listing of agricultural events in a twelve-month year, inscribed on a small piece of limestone excavated at Gezer in 1908 by R. A. S. Macalister (see *ANEP* no. 272). It is undoubtedly a copy and may have been used for teaching or as a schoolboy's exercise (*see* EDUCATION II). A small hole in the tablet indicates that it may once have hung on a wall. It is important because it attests an early stage of both Hebrew orthography (spelling), which is valuable for tracing the development of the language, and paleography (the development of scripts), which is helpful (sometimes vital) for dating written material. It is also of sociological value, because it begins its calendrical reckoning in the fall rather than in the spring, contrary to OT practice. (*See* CALENDAR II.B.)

GEZRITES gez'rīts (1 S. 27:8, AV). *See* GIRZITES.

GHOR. *See* JORDAN.

GHOST [Heb. *'ôḇ*] (Isa. 29:4); AV FAMILIAR SPIRIT; [Gk. *phántasma*] (Mt. 14:26 par. Mk. 6:49); AV SPIRIT. The term "ghost" is the Middle English word for "breath," "spirit," and signifies the life-principle. The biblical references, however, seem to suggest some form of specter or apparition from the realm of the dead.

See also SPIRIT. R. K. H.

GHOST, HOLY. *See* HOLY SPIRIT.

GIAH gē'ə [Heb. *gî(a)ḥ*]. An unidentified place mentioned in 2 S. 2:24, though the text may be corrupt. The passage speaks of "the hill of Ammah, which lies before Giah on the way to the wilderness of Gibeon." Ammah has not been identified as either a place or a person, and there is no wilderness in the vicinity of GIBEON. The LXX renders *gî(a)ḥ* as Gk. *Gai*, suggesting Heb. *gay'*, "valley." On the basis of the context, Simon (*GTTOT* §§ 745f.) suggests a location in the wilderness E of Gibeon (cf. Jgs. 20:42-45). Others suggest GEBA (cf. S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [2nd ed. 1913], p. 244). Geba, Gibeah, and Gibeon are in the same general region, so it is rather pointless to attempt a more precise location.

W. S. L. S.

GIANTS [Heb. *rāpā'*, *rāpâ*] (2 S. 21:16, 18, 20, 22; 1 Ch. 20:4, 6, 8). The RSV references are unquestionably to people of immense physical stature. The NEB uses "giants" and "Rephaim" interchangeably, making the latter the race from which the giants came. At present little archeological evidence supports the existence of an ancient race of giants in Palestine, although one such skeleton has been found. It has been attributed to the period of the Crusades, though from what is known of the stature of medieval peoples it would appear that such a dating is open to considerable doubt.

People who exhibit gigantic stature usually have either genetic abnormalities or some disease. That 2 S. 21:20 mentions a giant who had six fingers on each hand and six toes on each foot seems to indicate that the individual concerned was the product of genetic mutation. Where disease is a factor, the usual cause is hypertrophy of the anterior pituitary lobe of young persons, often the result of a tumor. Perhaps Goliath of Gath was the victim of this kind of disease. Another form of gigantism, which is also the product of anterior pituitary hypertrophy, involves species as they approach familial extinction. Here the pathology is not fatal, but because it is frequently accompanied by sterility it eventually secures the demise of the species involved.

See also NEPHILIM; REPHAIM. R. K. H.

GIANTS, VALLEY OF THE (Josh. 15:18; 18:16, AV). *See* REPHAIM, VALLEY OF.

GIBBAR gib'är [Heb. *gibbār*–'hero']. In Ezr. 2:20 the "sons of Gibbar" are mentioned among those who returned with Zerubbabel. The parallel passage (Neh. 7:25) has "sons of Gibeon." It has been suggested that Gibbar might be a corruption of Gibeon, but this is uncertain.

GIBBETHON gib'bə-thon [Heb. *gibbᵉṯôn*]. A city in the tribal allotment of Dan before Dan moved northward (Josh. 19:44). In the allocation of certain portions of land to the Levites, Gibbethon was assigned to the Kohathites (Josh. 21:23). In the context it is joined with Elteke, Aijalon, and Gathrimmon, all of which soon fell into the hands of the Philistines. Baasha the son of Ahijah assassinated Nadab as he was attempting to capture Gibbethon (1 K. 15:27). Twenty-five years later, Elah, who had succeeded his father Baasha as king of Israel the previous year, was assassinated by Zimri at Tirzah. When news of this coup reached the Israelite troops (who under Omri were attempting once more to capture Gibbethon), Omri was made king, and marched from Gibbethon to Tirzah (1 K. 16:15-17). The site of Gibbethon is possibly to be located at the modern Tell el-Melât, about 5 km. (3 mi.) E of Gezer, 22 km. (14 mi.) SSE of Joppa. W. S. L. S.

GIBEA gib'i-ə [Heb. *giḇ'â*–'hill']. A grandson of Caleb (1 Ch. 2:49). His father was Sheva, whose mother was Maacah, Caleb's concubine (v. 48).

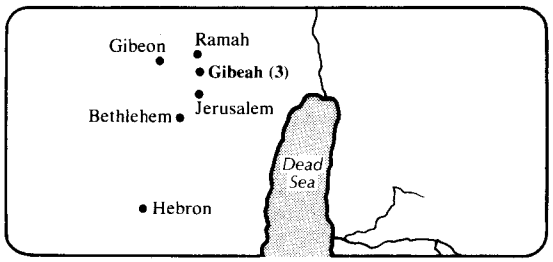
GIBEAH gib'ē-ə [Heb. *giḇ'â*–'hill']. Along with its literal meaning, in which it is distinguished from *har*, "mountain," Heb. *giḇ'â* is sometimes used as a place name.

1. A city in Judah, named in a list of ten cities allotted to Judah (Josh. 15:57). It has been identified with el-Jeba', 12½ km. (7½ mi.) WSW of Bethlehem, but since it is listed with "cities" further to the south, it is possibly to be located SE of Hebron. It is perhaps the Gibeah of 2 Ch. 13:2.

2. A town given to Phinehas. It was located somewhere in the hill country of Ephraim. There Eleazar the son of Aaron was buried (Josh. 24:33; cf. Josephus *Ant.* v.1.29 [119]), and, according to an addition in the LXX, there also Phinehas was buried. The Samaritan tradition

that the location is at Awertah, 6 km. (4 mi.) SE of Nablus, is without support; its location remains unknown.

3. A city in Benjamin, called "Gibeah, which belongs to Benjamin" (Jgs. 19:14; 20:4), "Gibeah of Benjamin" (Jgs. 20:10; 1 S. 13:2, 15; 14:16), "Gibeah of the Benjamites" (2 S. 23:29; 1 Ch. 11:31), "Gibeath" (MT, AV Josh. 18:28; RSV Gibeah), and "Gibeah of Saul" (1 S. 11:4; 15:34; Isa. 10:29). It is possibly to be identified also with GIBEATH-ELOHIM, "Gibeah of God" (but cf. *LBHG*, p. 254 n. 2).



The first reference to Gibeah is in connection with the story of the Levite and his concubine (Jgs. 19–21). An old man from Gibeah provided a night's hospitality for a Levite, and certain men of the city, "base fellows," demanded to have the Levite to commit homosexual acts with him. The concubine was thrown out to them, and they "abused her all night." This led to action of the tribes against Benjamin resulting in a great slaughter of Benjaminites. The story is told to indicate conditions in the days when "there was no king in Israel" (Jgs. 19:1; 21:25), possibly to show the need for a king (see KD *in loc.*).

Gibeah was the home of Saul, who became the first king of Israel (1 S. 10:26). After he was anointed by Samuel, Saul met a band of prophets at Gibeath-elohim (10:5, called simply Gibeah in 10:10), and the spirit of God "came mightily upon him." Simons (*GTTOT*, §§ 669f.) would read Geba in both passages. From Gibeah Saul summoned the tribes of Israel to deliver Jabesh-gilead from the Ammonites (11:1-11). Gibeah was the site of Saul's war with the Philistines (13:2; 14:2, 16), apparently having become Saul's capital (15:34; 22:6; 23:19). Certain Ziphites came to Gibeah to inform Saul of David's hiding place (23:19; 26:1). David drew three of his "thirty" mighty men from Gibeah: Ittai the son of Ribai of Gibeah (2 S. 23:29), and the sons of Shemaah of Gibeah (1 Ch. 12:3). It is likely that these men were formerly associated in some way with Saul's court. According to the MT, seven sons of Saul were slain by the Gibeonites and were "exposed to Yahweh" at Gibeah of Saul (2 S. 21:6, RSV mg.), but this is generally emended to Gibeon in the light of the context and with the support of the LXX. Micaiah the mother of Abijah king of Judah is described as "the daughter of Uriel of Gibeah" (2 Ch. 13:2).

In Isaiah's prophecy of the Assyrian advance on Jerusalem, Gibeah of Saul is one of the places named (Isa. 10:29). Hosea mentioned the corruption of Gibeah, no doubt referring to the incident of the Levite's concubine and the sin of the city, and he prophesied that war would overtake Israel in Gibeah (Hos. 9:9; 10:9).

The location of Gibeah can be rather closely established from the OT passages: N of Jerusalem in the hill country of Benjamin, not far from Gibeon and S of Ramah. Josephus (*BJ*, v.2.1 [51] located "Gabath Saul, which means 'Saul's hill,'" thirty stadia (about 5.5 km., 3.4 mi.) from Jerusalem. The site of Tell el-Fûl ("mound of beans"), about 5 km. (3 mi.) from the old city of Jerusalem, just E of the main N-S road (where King Hussein began to erect a royal building before 1967), is generally accepted as the location of Gibeah of Saul. Excavations were conducted there in 1922/23 and in 1933, revealing a twelfth-century-B.C. village and the remains of a fortress of the late 11th cent. B.C., believed to be Saul's citadel. New excavations were undertaken in 1964 by Paul Lapp, to seek solutions to problems that had arisen from the earlier work. The plan of the structure proposed by Albright could not be fully supported, and a casemate wall of the late 7th and early 6th cents. was identified. A rebuilt city of the middle 6th cent. and a Hellenistic town of the latter part of the 2nd cent. were uncovered. The basic conclusions of earlier excavators, however, were not greatly altered.

GIBEATH (Josh. 18:28, AV). *See* GIBEAH 3.

GIBEATH-ELOHIM gi'bē-əth ə-lō-hēm' [Heb. *gib'at hā'ĕlōhîm*–'hill of God']; AV, RSV mg., NEB, "hill of God." The place where Saul, after leaving Samuel, met the company of prophets and prophesied with them (1 S. 10:5; note that in v. 10 it is simply called "Gibeah"). It is defined as the place "where there is a garrison [or "governor," "pillar"] of the Philistines." This may be intended to distinguish it from Gibeah of Saul, with which it is often identified. The site is probably the same as GEBA (13:3), where Jonathan defeated the Philistine garrison. The identification with Mizpah-Gibeon, Ram-Allah, or Bethel is unlikely.

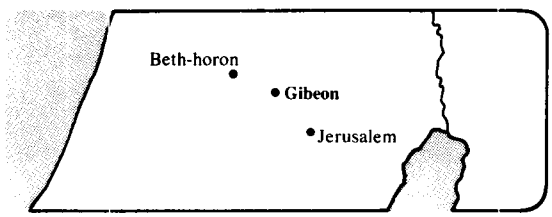
GIBEATH-HAARALOTH gi'bē-əth hā-ar'ə-lōth [Heb. *giḇ-'aṯ hā-'ᵃrālôṯ*–'hill of the foreskins']; AV "hill of the foreskins," mg. GIBEAH-HAARALOTH. A place at or near Gilgal between the Jordan River and Jericho. Here the Israelites who grew up in the wilderness were circumcised after the passage through the Jordan (Josh. 5:3). The name was obviously given to the place from this event and is not otherwise a proper name. The site has not been identified. D. J. WIEAND W. S. L. S.

GIBEATHITE gib'ē-əth-īt (1 Ch. 12:3). *See* SHEMAAH.

GIBEON gib'ē-ən [Heb. *giḇ'ôn*]. A city about 8 km. (5 mi.) NW of Jerusalem. It is first mentioned in the Bible in connection with the Israelite Conquest (Josh. 9:3). Following the Conquest, Gibeon became a levitical city in the tribal territory of Benjamin. The name *giḇ'ôn* suggests a height, and the site is atop a limestone outcropping in the Judean hills at the eastern end of the Valley of Aijalon. Currently an Arab village occupies the northern slope of the tell. Its name, el-Jîb, retains a part of the ancient designation for the place.



I. Gibeon in the Bible.–Josh. 9 recounts the successful ploy of the Gibeonites by which the invading Israelites were tricked into signing a treaty with the city. The Gibeonites were consigned to the role of "hewers of wood and drawers of water" in Israelite society (Josh. 9:21, 23, 27). When the Gibeonites were attacked by Adoni-zedek, the Amorite king of Jerusalem, because they had made peace with Israel, they called on Joshua for help. He remained true to his covenant vow and relieved the besieged city, pursuing the attackers down the ascent of Beth-horon and winning decisively (*see* BETH-HORON, THE BATTLE OF).

Gibeon is not mentioned again in the Bible until the time of David. 2 S. 2:12-17 reports the contest between the young warriors of Abner and those of Joab "at the pool of Gibeon." On another occasion, Joab treacherously disemboweled Amasa at the "great stone which is in Gibeon" (2 S. 20:8). In a strange case of blood revenge, David handed over to the Gibeonites seven of Saul's sons, who were hung "at Gibeon on the mountain of the Lord" (2 S. 21:6). This expression suggests the existence of a sacred place in conjunction with Gibeon. Solomon sacrificed at the high place at Gibeon and had his famous dream there (1 K. 3:4f.). 2 Ch. 1:3,13 indicates that the tent of meeting was located at Gibeon, and this is confirmed by 1 Ch. 16:39; 21:29.

A certain Hananiah, a prophet from Gibeon, was soundly denounced by Jeremiah for lying to the people (Jer. 28). The book of Jeremiah also reports that in the troubled last days of the Judean state a rebel leader named Ishmael murdered Gedaliah, the governor who had been appointed over the remnant of the Jews by Nebuchadrezzar. His flight was stopped "at the great pool which is in Gibeon" (Jer. 41:12).

The Bible reveals nothing about the fate of the city during the Babylonian conquest, but scattered references from postexilic sources indicate that Gibeonites were among the people who returned from Exile (Neh. 7:25). Men from Gibeon helped rebuild the temple (Neh. 3:7), and, surprisingly, Gibeonites are connected with the house of Saul in a genealogical list in 1 Ch. 8:29; 9:35.

II. Gibeon in Extrabiblical Sources.–The earliest extrabiblical reference to Gibeon is in the list of Asian cities captured by Pharaoh Shishak (Sheshonq I, *ca.* 940-915 B.C.). He invaded the region in the fifth year of the reign of King Rehoboam (1 K. 14:25), and upon his return to Egypt he had his exploits engraved on the south wall of the temple of Amon at Karnak.

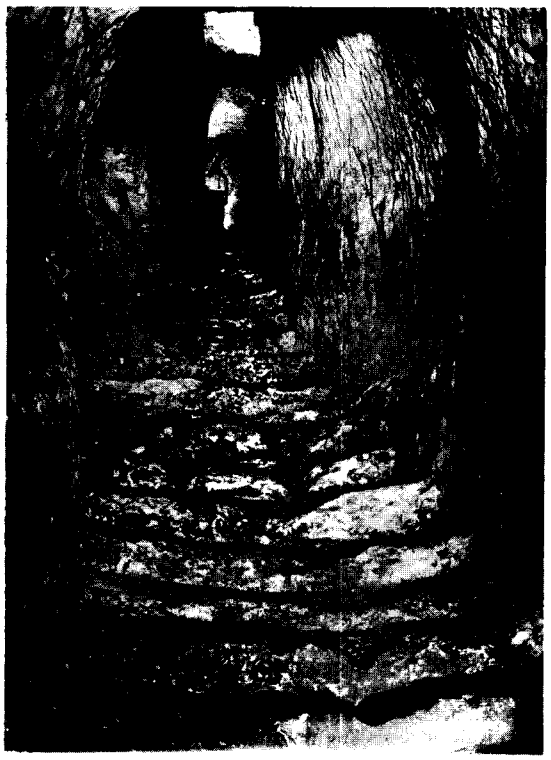
Josephus, the Jewish historian who wrote near the end of the 1st cent. A.D., recorded an incident that occurred in A.D. 66 and involved Gibeon. Cestius, the Roman governor of Syria, had marched toward Jerusalem to besiege the city, encamping en route at Gibeon (Gabao). Failing to capture Jerusalem, he retreated to Gibeon and remained in the area for three days before fleeing to the west from the attacking Jews (*BJ* ii.19.1 [515f.]).

III. Exploration and Excavation of Gibeon.–An early Arab geographer, Yakut, mentioned el-Jîb in the 13th cent., but the explorations of E. Robinson in 1838 first brought the attention of Westerners to the site and its identification with ancient Gibeon. Robinson's suggestion was based on both the location of the site and the similarity in sound between the modern Arab name of the village and the ancient name Gibeon. In 1926 A. Alt argued strongly against the identification of el-Jîb with Gibeon, convincing many of his peers that Gibeon was to be found at some other site. Only with the excavations that were begun in 1956 was the location of ancient Gibeon at el-Jîb confirmed by archeological evidence.

Excavations at el-Jîb were carried out during four summers in 1956, 1957, 1959, and 1960 by a team of archeologists under the direction of J. B. Pritchard. Their most spectacular discovery was the "pool." Located just inside the city wall on the northeast side of the city, this cylindrical shaft is 11.3 m. (37 ft.) in diameter and 10.6 m. (35 ft.) deep, with a balustraded spiral stairway cut out of the rock. An estimated 3000 tons of limestone had been excavated in the cutting of this shaft. (The stone was probably used in the construction of the adjacent city wall.) Beneath this great shaft a narrow tunnel slants downward for another 13.7 m. (45 ft.) to a water chamber that had been hewn out at groundwater level. The great pool apparently provided a catch basin for rainwater, which supplemented the groundwater. This was no doubt the pool mentioned in the Bible. It went out of use at the close of the Judean kingdom period, according to the ceramic evidence. Huge stones had been cast down from above to close the entrance to the tunnel, and sealed within the water chamber were two jars datable to the early 6th cent. B.C. Pritchard dated the construction of the pool to the 12th/11th cents. B.C., so it remained in use for over a half a millennium. It had been completely filled with debris and was indistinguishable until the expedition chanced upon its rim in 1956.

The water system described above was apparently insufficient to meet the needs of ancient Gibeon, however, for a tunnel system dated to the united monarchy in the 10th cent. B.C. was also discovered. It led from inside the city wall, also constructed in this period, down the slope of the hill to a spring chamber hidden from view within the hill. This spring has a copious flow of water; along with the water systems that were discovered, it illuminates the reference to "many waters [Heb. *mayim rabbîm*] that are in Gibeon" (Jer. 41:12).

The wealth of ancient Gibeon was apparently based on the cultivation of grapes and winemaking. An area of more



The tunnel's ninety-three steps lead from the city to the spring (University Museum, University of Pennsylvania)

The pool at Gibeon with its spiral staircase (University Museum, University of Pennsylvania)

than 920 sq. m. (1100 sq. yds.) which had been devoted to this work was discovered. The evidence supporting this view consisted of wine presses, plastered channels, settling basins, storage tanks, ceramic funnels, and jars with narrow mouths and stoppers obviously used for storing liquids. Large pits with small openings were cut into the limestone, providing wine cellars with a constant temperature of 18° C (65° F). The jars had a capacity of 37 l. (9¾ gals.) each, and the entire complex could store an estimated 95,000 l. (25,000 gals.) of wine. It is presumed that the population of Gibeon did not consume this amount annually but carried on an extensive trade in wine.

Some of the jar handles were inscribed with the name of Gibeon itself, along with the word *gdr*, apparently another place. Several handles had personal names written upon them, such as Hananiah, Azariah, Amariah — names common in the Bible — and rarer names, Shebuel and Domla. These obviously Hebrew names confirm what is implied in the Bible, that the Gibeonites were thoroughly assimilated into the nation Israel before the Babylonian Exile and were worthy to be counted in the book of the genealogy "of those who came up at the first" (Neh. 7:5, 25).

GIBEONITES gib'ē-ən-īts. Inhabitants of GIBEON.

GIBLITES gib'līts (Josh. 13:5, AV). *See* GEBAL.

GIDDALTI gi-dal'tī [Heb. *giddaltî*–'I magnify (God)']. A son of Heman (1 Ch. 25:4, 29), one of David's musicians. *See also* JOSHBEKASHAH.

GIDDEL gid'əl [Heb. *giddēl*–'very great,' 'stout'].

1. The name of the head of a family of temple servants (Ezr. 2:47 par. Neh. 7:49); it occurs as "Cathua" in 1 Esd. 5:30.

2. The name of the head of a family of Solomon's servants (Ezr. 2:56 par. Neh. 7:58); it occurs as "Isdael" in 1 Esd. 5:33.

GIDEON gid'ē-ən [Heb. *gid'ôn*–'cutter down,' 'feller,' or 'hewer'; Gk. *Gedeōn* (He. 11:32)]; AV also GEDEON (He. 11:32). Also named Jerubbaal (Jgs. 6:32, etc.) and Jerubbesheth (2 S. 11:21), the youngest son of Joash, of the family of Abiezer in the tribe of Manasseh. His home was at Ophrah, and his family an obscure one. He became the chief leader of Manasseh and the fifth recorded judge of Israel. The record of his life is found in Jgs. 6–8.

1. Midianite Oppression.–Joash was an idolater, and sacrifices to Baal were common among the entire clan. Gideon held this worship in contempt and pondered the causes of Israel's reverses and the injuries heaped upon his family by the Midianites (camel-riding bedouin).

The Midianites under Zebah and Zalmunna, their two great chiefs, accompanied by other tribes of the eastern desert, gradually encroached on Israel's territory in central Palestine. They came first as marauders and pillagers at the time of the harvests, but later they forcibly took

possession of lands, inflicting permanent injury and loss, especially upon Manasseh and Ephraim. The conflicts became so numerous and the appropriation of the land so flagrant that sustenance became a serious problem and defense difficult (Jgs. 6:4). The Israelites, lacking a sense of national unity, took to dens, caves, and rocky strongholds for safety (6:2). After seven years of such invasion and suffering, Gideon came upon the scene.

II. Call of Gideon.–Probably Gideon had already distinguished himself in Israel's resistance to the Midianites (Jgs. 6:12), but he now received divine commission to assume the leadership against them. Having hid his own little harvest in a secret place for threshing that it might escape the greed of the Midianites, he was surprised while at work by a visit from an angel of the Lord (6:11-24). There can be no question of the divine origin of Gideon's call or of the authenticity of God's voice. The brooding over the death of his brothers at Tabor (8:18f.) and the patriotic impulses surging in his soul cannot account for his assumption of leadership. Neither did the populace choose him as a leader. The call came to him as a surprise, and found him distrustful both of himself (6:15) and of his people (v. 13). Only his conviction that it was a divine command persuaded him to assume leadership. This attests to the accuracy of the essential facts of the account. After Gideon's demand for a sign (v. 17) was answered, and the food offered to the messenger was consumed by fire at the touch of his staff, Gideon acknowledged the divine commission of his visitor and built an altar to Yahweh (vv. 19-24).

III. His First Commission.–The call and the first commission of Gideon were closely united. He was commanded to destroy at once the altars of Baal set up by his father at Ophrah, to build an altar to Yahweh, and to offer one of his father's bullocks as a sacrifice there (Jgs. 6:25f.). So Gideon's call followed the usual command to God's prophets and reformers to begin their work at home. Taking ten men, under the cover of darkness Gideon obeyed his instructions (v. 27). The morning revealed his work, and in their wrath the people of Ophrah demanded Gideon's death. The answer of Joash his father is an ironical but valid defense of Gideon. Why should the people plead for Baal? A god should be able to plead his own cause (vv. 28-31). This defense gained for Gideon the name of Jerubbaal ("let Baal plead," 6:32).

The subsequent events of the story are somewhat confused but the difficulties are not irreconcilable. The narrative of Gideon's victory over the Midianites is probably preserved in two forms: an earlier (Jgs. 8:4-21) and a later (6:1–8:3) account.

IV. Gideon's Army.–When the allied invaders encamped on the plain of Jezreel, Gideon recruited the Abiezrites, sent messengers to the various tribes of Israel (Jgs. 6:34f.), and pitched his camp near the Midianites. Locating the various camps of Gideon is difficult, and his method of recruiting the tribes raises further problems (cf. 6:35 with 7:23). Evidently at the preliminary encampment, the rallying place, he further tested his commission by the dry and wet fleece (6:37-40; cf. Boling, p. 141). Now, convinced of God's purpose to save Israel by his leadership, Gideon moved his camp to the southeast edge of the plain of Jezreel, close to the Harod spring. From this vantage point he could look down on the tents of Midian. Neither of the tests by which he reduced his large army from 32,000 to 300 is unnatural, and the first was not unusual (cf. Dt. 20:1-8). Gideon, at God's command, first excused all the fearful, leaving himself with ten thousand men. Then this number was further reduced to three hundred by a test of their method of drinking water, leaving him only the courageous, eager, and discerning soldiers ready for battle (7:2-7).

V. Defeat of the Midianites.–Gideon, with a servant, went under cover of darkness to the edge of the camp of his enemy, and there heard the relating and interpreting of a dream, which greatly encouraged him and led him to strike an immediate blow (Jgs. 7:9-22). Dividing the remnant of his band into three equal parts, Gideon ordered that with trumpets, with lights concealed in pitchers, and with the cry, "The sword of Yahweh and of Gideon!" they should charge the Midianites simultaneously from three sides. This strategy of concealing his numbers and terrifying the enemy succeeded, and the Midianites and their confused allies fled in disorder toward the Jordan (7:18-22). The rout was complete, and victory was ensured when the enemy turned their swords against one another in the darkness.

One part of the fleeing enemy, under Zebah and Zalmunna, evidently crossed the Jordan to Succoth. The superior force followed the river farther S toward the ford of Beth-barah. Gideon sent messengers to the Ephraimites (Jgs. 7:24), probably before the first attack, requesting them to intercept the Midianites should they attempt to escape by the fords in Ephraim's territory. Ephraim defeated the enemy at Beth-barah and slew the princes Oreb and Zeeb ("the raven" and "the wolf"). As proof of their victory and valor they brought the heads of the princes to Gideon, and they accused Gideon of having discounted their bravery by not calling them earlier in the fight. But Gideon, being a diplomat and a strategist, won Ephraim's friendship by extolling their feat in comparison with his own (8:1-3).

Gideon then pursued Zebah and Zalmunna on the east side of the river. The people on this side were still in great fear of the Midianites and refused even to feed his army. At Succoth they complained, "Are Zebah and Zalmunna already in your hand, that we should give bread to your army?" (Jgs. 8:6). He met with the same refusal at Penuel (8:8). Promising to deal with Succoth and Penuel when he had completed his present task, Gideon pushed on with his half-famished but courageous men, overtook the Midianites, defeated them, and captured Zebah and Zalmunna. Upon his return he fulfilled his promise to both Succoth and Penuel (8:7, 9, 13-17).

Thus the power of the Midianites and of the desert hordes was broken in Canaan, and forty years of peace came to Israel. The two kings of Midian now had to meet their fate as defeated warriors. Because Gideon's brothers had perished in battle at Tabor fighting them, Gideon commanded his young son Jether to slay them, as though they were not worthy of an honorable death at a warrior's hand (8:20). But the youth feared the task and so Gideon slew them (8:21).

VI. Gideon's Ephod.–The people clamored to make Gideon king; but he refused — Yahweh was their king (8:22f.). (His son Abimelech did rule, however; *see* ABIMELECH **4.**) He requested only the jewelry captured in the battle (8:24-27), and with it he made an ephod (weighing about 30 kgs. [65 lbs.]) and placed it in the house of Yahweh at Ophrah. Some contend that this was an image of Yahweh, which later led Israel to idolatry; but it probably was a surrogate for an "ark" or sacred box used by the priests in divining (see W. R. Arnold, *Ephod and Ark* [1917], pp. 125, 128).

The narrative proper closes with 8:28; vv. 29-35, which include the account of Gideon's family and death (8:30-32) and the incidents immediately subsequent to Gideon's death (8:33-35), are probably taken from other secondary sources.

Bibliography.–R. G. Boling, comm. on Judges (*AB*, 1975), pp. 121-164; R. K. Harrison, *Intro. to the OT* (1969), pp. 688, 690-93.

GIFT.

I. Terminology
   A. In the OT
   B. In the NT
II. Patterns of Giving Gifts

I. Terminology.–*A. In the OT.* The Hebrew terms *mattān, mattānâ,* and *mattāṯ* are all derived from the verb *nāṯan,* "give." *Mattān* refers to a marriage gift in Gen. 34:12, and to the priest's due in Nu. 18:11. In Proverbs, however, it has a pejorative sense: a bribe that makes friends (19:6) or spreads influence (18:16) or buys silence (21:14, par. *šōḥaḏ*). *Mattāṯ* characterizes a person's enjoyment of life as a gift of God (Eccl. 3:13; 5:19). In Prov. 25:14 it is used of ungiven gifts (i.e., promised but never delivered), in 1 K. 13:7 of the reward that the king is able to bestow. *Mattānâ* has a wide range of application. It characterizes Levitical and priestly service as a gift of God (Nu. 18:6f.), but it also denotes human sacrifice to idols (Ezk. 20:26, 31, 39). It represents the parting gifts of a father (Gen. 25:6) as well as the property inheritance of a ruler's sons (Ezk. 46:16f.; 2 Ch. 21:3). It may also be simply an offering to God (Ex. 28:38; Nu. 18:29) or charity to the poor (Est. 9:22). The Aramaic cognate *matt^{e}nā'* refers to royal largesse in Dnl. 2:6, 48; 5:17.

The Hebrew *qōḏeš,* "holiness, sacredness," is applied in Kings and Chronicles to "votive" or "dedicated gifts." These constitute some of the temple treasuries (1 Ch. 26:26) and frequently are gotten as spoils of conquest (1 Ch. 26:27 [the hiphil stem of the vb. *qāḏaš* denotes the act of dedication]) and occasionally lost in the same manner (2 K. 12:18).

Hebrew *qorbān,* usually "offering," is thrice rendered "gift" by the RSV (Lev. 1:10; 17:4; Nu. 6:14; AV, NEB, always "offering"), apparently only for stylistic reasons. In these passages it refers to an animal though it may refer also to grain (Lev. 2:1), silver (Nu. 7:13), or gold (Nu. 31:50). In the NT Jesus' use of this same term transliterated in the Greek of Mk. 7:11 (*korbán*) referred to a current method of sidestepping the obligations of the law regarding the support of parents. The procedure was to dedicate one's money to God, declaring it to be *qorbān,* and thus legally (albeit uncharitably) retaining possession of it. Confirmation that *qorbān* was practiced in Jesus' day comes from a first-century-A.D. ossuary inscription that is a dedicatory formula offering the contents within to God, thereby prohibiting any profane use of them (see Fitzmyer, pp. 60, 65; *TDNT,* III, 860-66). *See* CORBAN. *Minḥâ,* usually rendered "offering," is used of the "gifts" that people brought to the Lord after Jerusalem's narrow escape from Sennacherib (2 Ch. 32:23) and of "gifts" to royalty designed to win favor (Ps. 45:12). *See* SACRIFICES AND OFFERINGS IN THE OT IV.A; V.E.

Maś'ēṯ (for **maśś^{e}'ēṯ,* from *nāśā',* "lift"), literally "a lifting-up," is twice rendered "gift." In one instance it refers to royal largesse (Est. 2:18); in the other it is simply an offering to Yahweh (Ezk. 20:40). It can have other connotations such as exactions (Am. 5:11), lifting up (of the hands in prayer [Ps. 141:2]), and portions (Gen. 43:34). The obscure *niśśē'ṯ* in 2 S. 19:42 is usually understood to be a participial form from *nāśā'.* While it is rendered "gift," it may have the sense of "portion" or may be a mistake for *maś'ēṯ* (the LXX features a doublet, "gift" and "portion").

Hebrew *ṭûḇ,* "good things," is twice rendered "gifts" in the RSV: "choice gifts" to be presented to distant kinfolk (Gen. 24:10) and "good gifts" in reference to the produce of the land (Neh. 9:36). *Megeḏ,* "choiceness, excellence," referring in Dt. 33:13, 16 to divine provision, is translated "choice gifts" and "best gifts" ("abundance," Dt. 33:15). *B^{e}rāḵâ* is usually "blessing," but in one instance (Gen. 33:11) the RSV translates "gift" (cf. AV "blessing") because the reference is to a peace offering made by the returning Jacob to his swindled brother Esau. *Šay,* "tribute," is translated "gifts" (Ps. 68:29 [MT 30]; 76:11 [MT 12]; Isa. 18:7; cf. NEB "tribute"). Always used in combination with the verb *yāḇal,* "bear, carry," the sense of *šay* is that of tribute brought by vassals to a superior. In Ps. 68:29 (MT 30) it is kings who "bear gifts" to God.

Hebrew *'eškār* is a noun of uncertain etymology that occurs only in Ps. 72:10 (again "gifts" brought to God by kings) and in Ezk. 27:15 (referring to the seafaring merchant empire of Tyre), where the RSV has "payment." *Šōḥaḏ* is properly "bribe" but once is rendered "gifts" in the RSV (Prov. 6:35). Even in this instance the sense is clearly "hush-money"; the "gifts" spoken of are said to be incapable of appeasing the anger of a cuckolded husband. The plural of *šalmōn* is a hapax legomenon in Isa. 1:23. It is translated "gifts" by the RSV largely from context, but that it connotes a financial inducement or payoff is clear from its position in poetic parallelism with *šōḥaḏ,* "bribe." Isaiah thus characterized Judah's government officials: "Every one loves a bribe and runs after gifts."

Since the literal sense of *t^{e}rûmâ* is "a raising-up," it is expectedly a common OT term for "offering" (cf. RSV Ex. 25:2; Lev. 22:12; etc.). In Prov. 29:4 the RSV translates the phrase *'îš t^{e}rûmôṯ* (lit. "a man of raisings") as "one who exacts gifts" (cf. NEB "forced contributions"). Whereas a just king brings his land stability, the exacter of gifts is said to bring his land to ruin.

The terms *nēḏeh* and *nāḏān* in Ezk. 16:33 occur only in this passage and each denotes the fee given to a harlot. Jerusalem is here metaphorically characterized by Ezekiel as a wanton who, not content to receive such fees or gifts for her adulterous liaisons, even gives out such gifts to solicit further unfaithfulness. *Ḥ^{a}mûḏâ,* "preciousness," occurs only in the plural. In Dnl. 11:38 it is rendered "costly gifts" (elsewhere "precious things" [e.g., 11:43] or "greatly beloved" [9:23]).

Šillûḥîm, from the verb *šālaḥ,* "send away," may by extension connote "parting gifts" or "send-off presents." This is clearly the sense in 1 K. 9:16 ("dowry"; NEB "marriage gift"), and in Mic. 1:14 ("parting gifts"; but the NEB translates in the primary sense of "dismissal"). *See* DOWRY.

B. In the NT. The Gk. *dōron,* "gift" (< *didōmi,* "give"), is used variously in the NT. In Mt. 2:11 it refers to the material gifts of homage presented by the Magi. Most frequently, however, it points to sacrificial offerings (He. 5:1; 8:3f.; 9:9; 11:4) or money offerings (Lk. 21:1). In Eph. 2:8 God's gift of salvation by faith is a *dōron.* The cognate *dōreá* differs from *dōron* in that originally it appears

to have had a more pronounced legal sense, denoting formal endowments (see *TDNT*, II, 167). Thus it is significant that in the NT it is always used for gifts of God (cf. Jn. 4:10). Justification by grace is the "gift" of God in Rom. 3:24, righteousness His "free gift" in 5:17. The Holy Spirit is consistently characterized in Acts as God's *dōreá* (2:38; 8:20; 10:45; 11:17; cf. He. 6:4). Elsewhere in the Pauline corpus the term appears generally for God's (or Christ's) gifts (2 Cor. 9:15; Eph. 3:7; 4:7; "free gift," Rom. 5:15). *Dőrēma* similarly refers to God's gifts in its NT use. Paul declares the grace that is God's work in Jesus a "free gift" in Rom. 5:16, and according to Jas. 1:17, "every perfect gift is from above, coming down from the Father of lights. . . ." *Dóma*, "gift," is also used of God's gifts (Eph. 4:8 quoting Ps. 68:18 [MT 19; LXX 67:18, *dóma*]). The ability of imperfect human parents to provide good gifts to children suggests that God is all the more able to "give the Holy Spirit to those who ask him" (Lk. 11:13). In Phil. 4:17 *dóma* has the sense of "reward."

Cognate to *chaírō*, "rejoice," *cháris* in the classical literature denotes "what delights." In the LXX it almost exclusively translates Heb. *ḥēn*, "favor" (thirty-one times in Sirach alone; see *TDNT*, IX, 389); in the NT *cháris* usually has the meaning "grace, favor." In Rom. 4:4 the phrase *katá chárin* (lit. "according to grace, as a favor") is rendered "as a gift," and in 1 Cor. 16:3, in reference to the collection for the Jerusalem church, *cháris* represents a deed of grace or benefaction (thus a "gift"). *Chárisma* means a gift or favor bestowed freely and graciously. In the NT it always has reference to God's gifts of grace (Rom. 11:29; 12:6; 1 Pet. 4:10). Righteousness in Christ (Rom. 5:15ff.) and eternal life in Christ (6:23) are each said to be God's "free gift"; in 1 Cor. 1:7 the RSV translates "spiritual gift" (cf. Rom. 1:11, *chárisma pneumatikón*). Paul says in 1 Cor. 12:4 that there are "varieties of gifts" (*diairéseis charismátōn*) but the same Spirit. One of the Spirit's gifts is healing (1 Cor. 12:9, 30). Immediately preceding the love hymn in 1 Cor. 13 Paul admonished his readers, "Earnestly desire the higher gifts" (*tá charismata tá meízona*, 12:31). Among the "gifts" Paul included sexual continence (1 Cor. 7:7). He also understood ecclesiastical office bestowed by the laying on of hands as a "gift" of God (1 Tim. 4:14; 2 Tim. 1:6). Paul's inclusion of officebearing and acts of ministry (1 Cor. 12) among the *charísmata* signaled the onset of a major tension in the early Church — that between Spirit and office (law), between charismatic and officebearer (see *TDNT*, IX, 406; Conzelmann, *1 Corinthians*, pp. 207ff.). In 1 Pet. 4:10 any serving deed that enacts the commandment of love is a *chárisma*. *See also* GRACE III.H.

Greek *hadrótēs*, "abundance," is a NT hapax legomenon used by Paul in reference to the collection for Jerusalem in 2 Cor. 8:20, where the RSV translates "liberal gift" (cf. AV "abundance"; NEB "generous gift"). *Eulogía* (lit. "a good word") is usually translated "praise, blessing" in the NT. The latter meaning allows for the connotation "bounty" and thus, again in reference to the Jerusalem collection, it is rendered in 2 Cor. 9:5 "a willing gift" (cf. NEB "bounty"). *Timḗ*, "honor, respect," when used in Acts 28:10 with its cognate verb (*pollaís timaís etímēsan*) has the sense of "confer honors." Since in context these honors appear to take the material form of parting gifts, however, the RSV renders "they presented many gifts." The plural of *merismós*, "division, distribution" (<*merízō*, "divide"), is once translated "gifts" in He. 2:4 in the phrase *pneúmatos hagíou merismoís*, "gifts of [lit. "distributions of"] the Holy Spirit."

The RSV supplies "gift" in Rom. 11:35 to translate more smoothly the verb *prodídōmi*, "give first, give in advance." Similarly, since the absolute use of the definite article in 1 Cor. 2:14 and Phil. 4:18 has as its antecedent something which has been given, it is rendered "gifts" in the RSV (but cf. AV and NEB). *Pneumatikós*, an adjective meaning "of the Spirit, spiritual," is used a few times in the NT as a substantive (i.e., *tá pneumatiká* are "spiritual things"). In 1 Cor. 12:1 and 14:1 the RSV translates "spiritual gifts" (cf. Rom. 15:27; 1 Cor. 9:11; 15:46).

II. Patterns of Giving Gifts.—Gifts were expected to accompany acts of worship in the cultus of ancient Israel; they were the material support of the priests and Levites as well as tokens of the worshiper's self-dedication (cf. Ex. 23:15; 34:20). Gifts were also requisite when soliciting an oracle or ministration from a prophet (2 K. 8:9, Heb. *minḥâ*; Dnl. 5:17, Aram. *mattᵉnâ*; cf. also 2 K. 5:5, 15-19; 1 S. 9:7). Kings expected homage in the form of gifts (Ps. 45:12 [MT 13]; 72:10), particularly from vassals (1 K. 4:21). The depiction of vassal rulers presenting their "gifts" to their overlords is a prominent motif in ancient Near Eastern monumental art. (*See* picture in JEHU; picture of tribute bearers in GESTURE.)

The OT model for the giving of gifts is the generous example of God Himself who bestows a countless variety of gifts. The application of this divine pattern of generosity to human society was particularly incumbent upon the king. Ps. 72, e.g., details a shepherding kind of concern for even the lowliest of subjects; the king is so to give of himself and of personal and national resources as to defend the defenseless, sustain the poor and needy, and provide justice for the oppressed. While the king regularly expected gifts from vassals and subjects, he was also expected to give generously in return (cf. Gen. 43:34; 2 S. 11:8; Est. 2:18; Jer. 40:5).

Nevertheless, the giving of gifts among people (royalty and commoners alike) often followed a lower standard, so that what is described as a "gift" in some OT passages may be difficult to distinguish from a "bribe" or "payoff." Prov. 18:16 indicates the fine line between gift and bribe and the selfish abuse of giving: "A man's gift makes room for him and brings him before great men." The numerous injunctions in the OT against the taking of bribes suggests that such abuse was well known (e.g., Ex. 23:8). In Sir. 18:17 the sage suggests that "a word is better than a gift."

"Gift" in the NT is used mostly to characterize all that God has given to humankind — life, His grace as a free gift, the Holy Spirit (and His manifestations), and especially Jesus Christ Himself. Paul referred to Jesus in 2 Cor. 9:15 when he exclaimed: "Thanks be to God for his inexpressible gift!" As in the OT, the pattern for human giving is the divine example of self-giving, now incarnated in Jesus, "who though he was in the form of God, did not count equality with God a thing to be grasped, but emptied himself, taking the form of a servant, being born in the likeness of men. And being found in human form he humbled himself and became obedient unto death, even death on a cross" (Phil. 2:6-8). Thus it is for humans "more blessed [i.e., more godly] to give than to receive" (Acts 20:35).

In the Gospels (cf. Mt. 6:1ff.; Lk. 6:30) Jesus affirmed charitable giving (giving of alms), but reoriented the practice away from all thought of thereby seeking favor with God or esteem from peers, toward a charitable social posture motivated by love for the other rather than self-interest. For Paul this self-giving, serving posture toward others is mandated for the believer by his new identity in Christ (cf. Gal. 5; Rom. 6, 12; etc.).

In the liturgies of the Church the offering of gifts has always been significant, not as influence on God, but rather as homage to God and a token of the volitional

self-offering of the believer's life according to the Pauline dictum: "Present your bodies as a living sacrifice, holy and acceptable to God, which is your spiritual worship" (Rom. 12:1). The model, the mandate, and the fulfillment of this kind of self-giving are all to be found in Jesus.

GIHON gī'hon [Heb. *gîḥôn*–'stream'].

1. One of the four rivers of the Garden of EDEN, described as the "one which flows around the whole land of Cush" (Gen. 2:13). Assuming that CUSH referred to Ethiopia, some scholars identified it with the Nile; but it seems certain now that the Cush referred to here was the area of Mesopotamia from which the Kassites subsequently emerged. More plausibly some river descending into Mesopotamia from the eastern mountains has been suggested, such as the Kerkha or the Diyala. But there is no linguistic distinction in Babylonian between "river" and "irrigation canal," and the "river" Gihon was most probably a major irrigation ditch which can no longer be located. In Sir. 24:27 (AV Geon) it is used figuratively in reference to wisdom. R. K. H.

2. A spring in Jerusalem, evidently sacred, and for that reason selected as the scene of Solomon's coronation (1 K. 1:38). Ps. 110:7 may suggest that it became customary for a new king to drink of Gihon's waters during his coronation ceremony. It is the spring known to the Moslems as 'Ain Umm ed-Daraj ("the spring of the steps") and to the Christians as 'Ain Sittī Maryam ("the spring of the lady Mary"), or commonly as "the Virgin's Fount." It is the nearer and more important of the only two true springs of Jerusalem, and was the site's original source of attraction to the early settlers. It is situated in the Kidron Valley on the east side of Ophel, and due S of the temple area. The spring is intermittent in character, "bursting up" at intervals. This may account for the name Gihon, and for popular belief in its sacred character. Its position is clearly defined in the OT. Manasseh "built an outer wall to the city of David west of Gihon, in the valley" (Heb. *nahal*, i.e., the Kidron, 2 Ch. 33:14).

The importance of Gihon to Jerusalem needs no stressing; but it has never been within the city walls, and this fact posed a problem in times of warfare and siege. During the Jebusite occupation of Jerusalem, several underground shafts enabled the inhabitants to reach the spring unobserved, and one tunnel served to bring water into the city itself. One such shaft may well have played a part in the capture of Jerusalem by David's men (2 S. 5:8), if indeed Heb. *ṣinnôr* does mean "water shaft." During the early monarchy the waters were collected in a pool (the upper pool?) at the spring mouth, and thence conveyed by an open channel S along a ridge to another pool (the old pool[?], modern Birket el-Ḥamra). This aqueduct was used for irrigation of the adjoining valleys. But Hezekiah, at the threat of Assyrian invasion, embarked on a more ambitious project, an underground aqueduct bringing the waters to a pool inside the city (2 Ch. 32:30; cf. 2 K. 20:20). This aqueduct is the famous SILOAM tunnel. Its construction, together with the damming up of previous outlets, must have emptied the older pool, unless perhaps the new pool overflowed into it.

Gihon is approached by a steep descent, the water rising deep underground; the condition is due to the vast accumulation of rubbish — the result of the many destructions of the city — that now fills the valley bed. Originally the water flowed down the open valley.

GILALAI gə-lā'lī [Heb. *gil^{a}lay*]. A musician in the procession at the dedication of the wall, son of a priest (Neh. 12:36).

GILBOA gil-bō'ə, **MOUNT** [Heb. *har haggilbō(a)*ʿ–'mount of the bubbling fountain']. A chain of mountains in the territory of Issachar rising from the eastern edge of the plain of Esdraelon, the southern edge of the Valley of Jezreel, to a height of 520 m. (1696 ft.) above sea level. On this mountain Saul camped against the Philistines (1 S. 28:4) and later died with three of his sons, including Jonathan, when the Philistines defeated Israel (1 S. 31:1, 8; 2 S. 1:6, 21; 21:12; 1 Ch. 10:1, 8).

Though the location is not named, apparently from this height GIDEON descended to rout the Midianites and their allies who were camped in the Valley of Jezreel (Jgs. 6:33), near the hill of Moreh, which is 6½ km. (4 mi.) N, across the valley from Gilboa (Jgs. 7:1f.).

Modern Jebel Fuqûʿah, about 11 km. (7 mi.) W of Bethshean and 5 km. (3 mi.) SE of Jezreel, represents the location today. The village of Jelbôn on the southern slope perpetuates the ancient name. *See* Plate 20.

R. J. HUGHES, III

GILEAD gil'ē-əd [Heb. *gil'ād*, possibly 'mound of stones' or 'stronghold'].

1. The grandson of Manasseh and son of Machir (Nu. 26:29). Gilead is described as the progenitor of "the family of the Gileadites," and their clans are mentioned in 26:30-33; Josh. 17:3-6.

2. The father of Jephthah (Jgs. 11:1f.). Since Jephthah is described as "the Gileadite" (11:1) and later was made the leader of the Gileadites in the war with Ammon (11:8, 11), it is possible to consider Gilead here as a patronymic, but the details in 11:1f. appear to contradict this view.

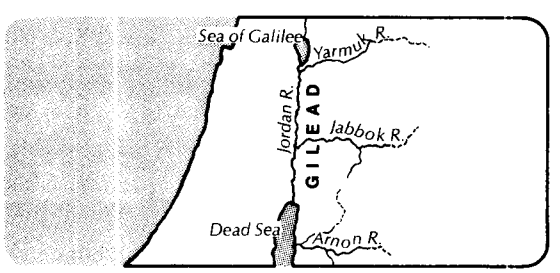
3. A descendant of Gad and ancestor of one of the clans of the Gadites (1 Ch. 5:14; cf. vv. 11-16). Again it is possible to consider Gilead as a patronymic or eponym, since the clan dwelt "in Gilead, in Bashan and in its towns" (5:16), but the name occurs in a genealogy: "These were the sons of Abihail the son of Huri, son of Jaroah, son of Gilead, son of Michael," *et al.* (5:14), and it is difficult to separate the name Gilead from this list and make it the patronymic of the entire clan. W. S. L. S.

GILEAD gil'ē-əd [Heb. *gil'ād*, possibly 'mound of stones' or 'stronghold']. A place name.

I. Name.–According to Genesis 31:47f., it is derived from *gal 'ēd*, "a heap of [=for] witness," the Hebrew equivalent (written as a single word in the MT) of the Aramaic name Jegar-sahadutha. The tradition that Jacob gave the Hebrew and Laban the Aramaic name to the place is generally taken by modern scholars to be a folk etymology. The Arabic word *jal'ad* has the meaning "strong, sturdy," and is used of camels, particularly of camel humps; thus it has been suggested as an explanation of the word (cf. BDB, p. 166), but this could be challenged on phonemic grounds in the light of the Assyrian form of the word (*Gal'aza*).

II. Limits of the Region.–"Gilead," as used in the OT, is a rather imprecise term. In the narrowest sense, it is a "city" (Hos. 6:8), the place of the encampment of the Ammonites while the Israelites camped at Mizpah (Jgs. 10:17). At the other extreme, the term seems to be used for all of Transjordanian Israel (Jgs. 20:1; cf. 2 K. 10:33; Jer. 50:19; Zec. 10:10).

The term "Gilead" is most closely associated with the region around the JABBOK, a river formed by many tributaries that rise in the interior N of Amman, watering a broad area, draining into the deep gorge of the Jabbok (the modern Zerqâ), and emptying into the Jordan River S of Deir 'allā. The Jabbok system thus forms a large loop, flowing first northeastward, then westward, and finally southwestward. The region within this bend has sometimes been considered to be Gilead proper, but this lacks substantial support. Baly (*GB*, rev. ed.; p. 220 map 69) suggests that the region occupied the triangular area from the Yarmuk to the Zarqā' Mā'în, and from the Jordan extending back to Mafraq, but excluding Ammon and the surrounding region of the Ammonites. Thus Gilead is divided into two parts by the Jabbok, northern Gilead, the modern 'Ajlūn, extending northward from the Jabbok to the Yarmuk, and southern Gilead, the modern Belqā, extending southward more or less from the Jabbok to the Arnon. This general description can serve as a working basis for the present discussion, but it must be remembered that the southern boundary of Gilead is far from definite, and the Ammonites and the Moabites at times in history extended into this area. It must also be kept in mind that Gilead sometimes appears to extend northward in what is called "Bashan and Gilead" (Mic. 7:14), "Gilead and Bashan" (Josh. 17:5; 2 K. 10:33), and possibly "Gilead in Bashan" (1 Ch. 5:16).



III. Physical Geography.–Because of the Jordan Valley, which is part of the Great Rift, and political boundaries, we are accustomed to think of Cisjordan and Transjordan as separate entities. As Baly makes clear, however, the "Dome of Gilead [is] a continuation structurally of the hill country of Judah" (*GB*, rev. ed., pp. 12, 219). It is formed principally of Cenomanian limestone, and the main lines of relief run SW-NE, which is at right angles to those of Bashan. The Transjordan plateau lies at an altitude of between 500 and 600 m. (1650 and 2000 ft.) above sea level, sloping gently downward toward the desert in the east. The term "plateau" is somewhat misleading, for Transjordan is cut by several deep river valleys, and there are a number of high points with elevations up to 1050 m. (3450 ft.), so that a person traveling the length of the region would only occasionally describe it as a plateau. (For a profile, see *GB*, rev. ed., p. 213 diagram 67.)

The Etesian winds that blow from the west through most of the year (from the northwest in winter and from the southwest in summer) bring rainfall to Palestine and Transjordan, but this rainfall is precipitated mainly on the western slopes, i.e., on the western part of Palestine and on the western part of Transjordan. It is this rainfall, together with springs, that waters Transjordan and forms the many tributaries of the large rivers that cut the plateau. The four main rivers, from north to south, are: the Yarmuk, traditionally the border between Bashan and Gilead; the Jabbok, on both banks of which lies Gilead; the Arnon (modern Wâdī Môjib), often the northern boundary of Moab (but *see* MOAB); and the Zered (modern Wâdī el-Ḥesā), the traditional boundary between Moab and Edom. Other river valleys in Transjordan are also significant and from time to time served as boundaries between peoples. Because the land slopes gently downward to the east, the rains form numerous streams that flow generally eastward. At the same time, the rains cut ravines in the scarp that rises above the Jordan, and the small streams converge to flow into these ravines, forming the rivers mentioned above.

Gilead is therefore more rugged than either the portion of BASHAN to the north or of Moab to the south. It is also more densely wooded, particularly in the higher portions, with scrub oak, carob, and pine. These regions are sometimes compared to the forests of Lebanon (cf. Jer. 22:6; Zec. 10:10), though no trees in Gilead compare to the famous cedars of Lebanon. There are spots of exquisite beauty, with phlox, lotus, narcissus, cane brake, oleander, tamarisk, white broom, arbutus, or hawthorn, sometimes in abundance along the streams. The medicinal "BALM OF GILEAD" (Jer. 8:22; 46:11) was exported to Tyre (perhaps Ezk. 27:17) and to Egypt (cf. Gen. 37:25). In the flatter portions of Gilead, olive trees and grape vines are plentiful, and in some areas wheat is grown; thus the staples of life, "the grain, the wine, and the oil" (Hos. 2:8), could be produced in Gilead. The rugged character of the land, however, is not to be overlooked, and it was a place of refuge as well as of encounters with God. In

GILEAD

A farm in the highlands of Gilead built on a rocky outcrop to conserve arable land. The grainfields are in the valley bottom and the olive orchards on the slopes (D. Baly)

Gilead Jacob sought refuge from Laban (Gen. 31:21). There the Israelites in the days of Saul sought escape from the Philistines (1 S. 13:7). When David was anointed king in Hebron, Saul's son Ishbosheth was established as king-in-exile in Gilead (2 S. 2:8f.). And when Absalom revolted against David, David fled to Gilead (2 S. 17:22-24; cf. v. 26). It was in Gilead by the river Jabbok that Jacob had his great experience with God and was called "Israel" (Gen. 32:22-30 [MT 23-31]). Elijah the prophet was of Tishbe in Gilead (1 K. 17:1), possibly receiving his prophetic call in that region. It was in the southern portion of Gilead (here called Moab) that Moses received his final message from the Lord (Dt. 32:48-52; 34:1-6), and it was in this same region that Joshua received his commission from Yahweh to cross the Jordan and take the Promised Land (Josh. 1:1-9).

IV. History of Gilead.–The early history of Transjordan is still somewhat of a problem. Early Bronze settlements have been found in a very few places. Middle Bronze sedentary populations have been established for Bashan and Ammon, but not for other parts of Transjordan. Glueck's view that Transjordan was largely unsettled during most of the 2nd millennium, though disputed, has not been completely refuted, and sedentary populations seem to be dated after the 13th cent. B.C. In the light of the Tell Mardikh (Ebla) materials so far published, it would not be surprising to find mercantile outlets in established cities all along the trade routes, with cities going back to Early Bronze III or IV, but no such evidence has yet come to light.

It is therefore with the Israelite journeyings from the wilderness of Sinai to the crossing of the Jordan that we begin the history of the region. Since the Israelites moved from south to north, the descriptions are given in this order, progressing from Edom to Moab, Gilead, and Bashan. The Ammonites entered the picture at this point only incidentally. The tribes of Reuben and Gad were immediately impressed with the land, and wanted to settle there (Nu. 32:1-5), but Moses insisted that first they should help their brothers in the conquest of Canaan, and afterwards inherit Gilead (32:28-32). The description set forth in Dt. 3:12-17 includes the words: "I gave to the Reubenites and the Gadites the territory beginning at Aroer, which is on the edge of the valley of the Arnon, and half the hill country of Gilead with its cities; the rest of Gilead, and all Bashan, the kingdom of Og, that is, all the region of Argob, I gave to the half-tribe of Manasseh." The tribe of Reuben occupied the southern part, from the Arnon in the south to a line extending from the northern end of the Dead Sea to Heshbon (cf. Josh. 13:15-23). A natural boundary would be Wâdī Ḥesbân or Wâdī el-Kefrein, which join to form the Wâdī Abū Gharrûbbâ, 5 km. (3 mi.) before emptying into the Jordan. At a time before the Mesha Inscription (or Moabite Stone, *ca.* 830 B.C.; cf. *ANET,* pp. 320f.), the territory of Reuben had been taken over by the Moabites; Gad is mentioned in the Mesha Inscription (line 10), but Reuben is not, and henceforth disappears from history. In fact, we think of this portion of Transjordan as Moab and not as Gilead. The tribe of Gad occupied the territory from the northern boundary of the Reubenites to the Jabbok. The half-tribe of Manasseh occupied the land north of the Jabbok, including "all Bashan" (Josh. 13:29-31).

In the time of Solomon, the nation was divided into twelve administrative districts (cf. 1 K. 4:7-19). Two of these were in Transjordan: that of Ben-geber in Ramoth-gilead, who had "the villages of Jair the son of Manasseh, which are in Gilead, and he had the region of Argob, which is in Bashan, sixty great cities with walls and bronze bars" (4:13); and that of Geber the son of Uri "in the land of Gilead, the country of Sihon king of the Amorites and of Og king of Bashan" (4:19).

During the last half of the 9th and the early 8th cents., the Aramean city-state of Damascus repeatedly attacked Gilead; in the words of Amos, "they have threshed Gilead with threshing sledges of iron" (Am. 1:3). From then until the Assyrian invasion, Gilead seems to have been a hotbed of rebellion. In the days of Ahab (874-853), the Syrians "filled the country" in the region around Aphek (modern Fîq), and Ahab won a victory (1 K. 20:23-43); but apparently it was not decisive, for three years later Ahab complained to Jehoshaphat of Judah that the Syrians held Ramoth-gilead. In the attempt to take the city, Ahab was killed (1 K. 22:1-4, 29-40). After the death of Ahab, Moab rebelled against Israel (2 K. 1:1), and although it seemed that victory was in sight for the Israelites, they withdrew without defeating the Moabites (2 K. 3:26f.). Ahaziah of Judah (841 B.C.) allied himself with Joram the son of Ahab in another attempt on the Syrians at Ramoth-gilead (2 K. 8:28). Joram was wounded and returned to Jezreel, and Jehu (841-814) was anointed by Elisha to be king of Israel (2 K. 9:1-10). In 2 K. 13:22 we read that Hazael king of Syria oppressed Israel all the days of Jehoahaz (814-796).

One of the knotty problems of Israelite chronology concerns Pekah, whose reign of twenty years (752-732; 2 K. 15:27) had to overlap the reigns of Menahem (752-743) and Pekahiah (741-740). Of all the suggested solutions to the problem, the most probable is the theory that Pekah had set up a rival government in Gilead when Menahem took the throne in Samaria. Menahem had assassinated Shallum (2 K. 15:14) and had waged bitter warfare on the cities of Israel. When Tiglath-pileser (or Pulu, the Pul of 2 K. 15:19), marched on Israel, Menahem paid tribute in order to avoid defeat. It was about this same time that Tiglath-pileser occupied Gilead; thus it is reasonable to suppose that Pekah was supported by Tiglath-pileser, in case Menahem should attempt a revolt.

When Tiglath-pileser III occupied Galilee, he established three provinces on the borders of Bīt Humria (the House of Omri, i.e., what was left of the northern kingdom), one at Dor, one at Megiddo, and one in Gilead (Assyr. *Gal'aza*; cf. 2 K. 15:29; *ANET,* p. 283; *ARAB,* I §815). According to Aharoni, Ezekiel had the Assyrian provinces in mind when he described the borders (Ezk. 47:17f.; cf. *LBHG,* p. 333 and map 31), but there is considerable time difference between Tiglath-pileser's campaign in 733 B.C. and Ezekiel's prophecy, and there is no evi-

dence that these same districts continued under the Babylonians. Since Israelites had been taken captive from Gilead, Zechariah foretold that exiles would be returned to Gilead (Zec. 10:10; cf. Mic. 7:14; Ob. 19).

In the days of Judas Maccabeus, "the Gentiles in Gilead" plotted against Israelites who lived in the territory. The Israelites sent for help, and Judas and his brother Jonathan went to their aid (cf. 1 Macc. 5:9-54, AV "Galaad"). About seventy years later, Alexander Jannaeus subdued the people of Gilead and Moab (Josephus *BJ* i.4.3 [89]), but when he attacked the king of Arabia, he fell into an ambush and was forced to give up his gains (*BJ* i.4.4 [90]; *Ant.* xiii.14.2 [382]).

In the Greco-Roman period, the cities of the DECAPOLIS were developed, most of them in Gilead (cf. Pliny *Nat. hist.* v. 16 [74]). Best preserved of all these cities is Gerasa (Jerash). Other remains can be seen at Pella (Khirbet Faḥil), Gadara (Um Qeis or Muqeis), and Hippos or Susitha (Qal'at el-Ḥuṣn). Philadelphia (modern 'Ammân) lies outside Gilead, as does Scythopolis (Beisan).

During the Crusades, Baldwin I (A.D. 1118) and Baldwin II (A.D. 1121) attempted to control this region, and Crusader remains can be seen at Qal'at er-Rabad, 3 km. (2 mi.) NW of 'Ajlûn, and at es-Salṭ.

See Vol. I, Map VI.

GILEAD, BALM OF. *See* BALM OF GILEAD.

GILEAD, MOUNT. The AV rendering in Jgs. 7:3 "let him ...depart early from mount Gilead" (Heb. *wᵉyiṣpōr mēhar haggil'āḏ*; cf. LXX Gk. *ekchōreítō apó órous Galaad*) is questionable because there is no specific mountain in Gilead (though the terrain is hilly with several high and low points; *see* GILEAD III), and the terrain of Gilead is E (not W) of the Jordan. (The slight emendation *gilbō(a)'*, cf. KD *in loc.* and *IB*, II, 737, fits the general geographical area W of the Jordan but is textually unsupported.) The RSV translation "and Gideon tested them" (*wayyiṣr'ēm giḏ'ôn*; cf. KoB, pp. 185, 817) eliminates the location E of the Jordan, but it requires too much emendation, none of which is textually supported. The NEB gives the most appealing solution: "is to leave Mount Galud." The area may be identified with 'Ain Jālûd, W of the Jordan and S of the Valley of Jezreel; thus no emendation is needed (cf. R. G. Boling, comm. on Judges [*AB*, 1975], p. 145).

R. W. V.

GILEADITES gil'ē-ə-dīts [Heb. *gil'āḏî*].

1. A branch of the tribe of Manasseh (Nu. 26:29).
2. Natives of the district of GILEAD (Jgs. 12:4f.; 2 K. 15:25)

GILGAL gil'gal [Heb. *haggilgāl(â)*; Gk. *Galgal(a)* (usually declined as a pl.), *Golgol* (LXX, Dt. 11:30); Heb. also *galgûlâ* in the personal name of Yeshua ben Galgoula of the Bar Cochba documents].

The meaning is uncertain, but the use of the Hebrew article (*hag-*) indicates a common noun. *Gilgāl* as an ordinary noun occurs only in Isa. 28:28, where it means "wheel." This is the usual sense of the common *galgal* (e.g., Isa. 5:28; Jer. 47:3; Ezk. 10:2, 6, 13 [RSV "whirling wheels"]). The cognate verb *gālal* (reduplicated as *glgl*) means "roll" or "roll away" (e.g., Josh. 5:9). One would expect the noun to refer to something that rolls, whirls, or has been subjected to this motion. Yet it is commonly believed that *haggilgal* means "the stone circle of sacred pillars," a meaning derivable from the shape of the wheel. If the stones set up at Gilgal (Josh. 4:8) were sacred pillars (*maṣṣēḇôṯ*), they were very small, since each could be carried by one man (Josh. 4:2). Moreover, excavations of other sanctuaries in Canaan reveal pillars arranged in rows. One may consider another round shape, "the dome," the meaning which M. Dahood (*Psalms*, II [*AB*, 1968], 224, 232) gives *galgal* in Ps. 77:18 (MT 19). One may also consider the related term *gal*, "heap," in the pun of Hos. 12:11 (MT 12). Not all Gilgals need derive their original (probably forgotten) meaning from the same usage.

1. Gilgal near Jericho. ***I. History.***–The history of this Gilgal begins with the first military encampment of the Hebrews in the land of Canaan. From here they launched the Conquest (Josh. 5:13-15; 9:6; 10:6f., 15, 43; 14:6). It was the first place of sanctuary and altar (Josh. 9:23, 27) and an important place of sacrifice (1 S. 10:8; Hos. 12:11; Am. 4:4). The appearance of Yahweh's angel as commander of His army (Josh. 5:13-15) authenticated Gilgal as the site of the official sanctuary of the Israelite tribal alliance. The movement of this angel from Gilgal to Bochim (Bethel) in Jgs. 2:1 was probably due to the capture of the former by Eglon king of Moab (Jgs. 3:15-23), which required the removal of the ark of the covenant to Bethel. The "sculptured stones [*pᵉsîlîm*] near Gilgal" (3:19) may have been sacred pillars, but the ordinary meaning of the word is "idols."

Eclipsed for a long time by other cultic centers, Gilgal came into prominence again in the days of Samuel and Saul, after the demise of the sanctuary of Shiloh (1 S. 4; Jer. 7:12; 26:6). Though Gilgal was but one of three centers where Samuel sat as judge (1 S. 7:16), it was the spiritual capital where all the people rallied (1 S. 10:8; 13:4, 7, 15b-18; 15:10-33). Saul was made king there (1 S. 11:14f.), and David was welcomed back as king to Gilgal after his victory over Absalom (2 S. 19:15, 40).

The eighth-century prophets refer to Gilgal as a center of pilgrimage and they castigate it for apostasy (Hos. 4:15; 9:15; 12:11; Am. 4:4; 5:4f.). In the early 6th cent. (it is suggested), Ezekiel arose there as the last great preexilic prophet (*see* EZEKIEL III.C).

II. Cultic Celebration at Gilgal.–The cultic instruction and deeds of Josh. 3–6 sound like the prescriptions and acts of an elaborate liturgy, beginning at Shittim (Josh. 3:1), about 14 km. (8 mi.) E of the Jordan, with a movement across the Jordan to Gilgal and Jericho. When Micah called upon the people to "remember . . . what happened from Shittim to Gilgal, that you may know the saving acts of the Lord" (Mic. 6:5), he was referring, some scholars think, to a real liturgy performed there annually, which celebrated the Conquest and the formation of the twelve-tribe league. E. Otto argues for the intertwining of two parallel narratives, one of them written by the Yahwist (a tenth-century-B.C. historian) and the other by the Deuteronomic historian (6th cent. B.C.), both drawing upon an eleventh-century source. (There are other, often more complicated theories of composition.) Gilgal, having come into prominence just before and after the establishment of the Hebrew monarchy, served (many scholars believe) as the cult center where Israel's earliest historical and cultic traditions were brought together. The cultic celebration would begin with self-purification (Josh. 3:5) and be carried out with a processional crossing of the Jordan (Josh. 3–4), the erection of memorial stones (Josh. 4:1-9), the circumcising of the Hebrew males (Josh. 5:2-9), the celebration of a feast at Gilgal (Josh. 5:10-12), and the trumpeting processions about Jericho (Josh. 6) (but cf. J. R. Porter).

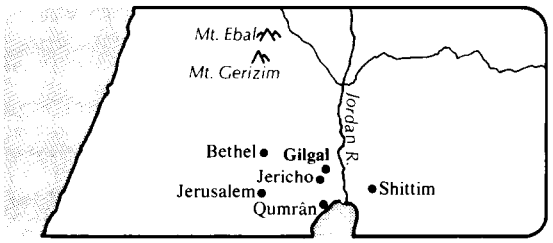
The dramatizing of history in the cult seems to have given everything a double meaning. The crossing of the Jordan recalled the previous crossing of the Red Sea at the Exodus from Egypt (Josh. 4:23f.; Ps. 66:6; 114:3, 5). The encamping at Gilgal was reminiscent of earlier encampments in the Wilderness of Sinai (Hos. 12:9 [MT 10]). Processions around Jericho represented the taking of numerous walled cities in Canaan. This dramatization of salvation history was probably completed by a covenanting ceremony reminiscent of the Sinaitic covenant (Ex. 24:1-11). This may have attracted to itself a reenactment also of the covenant first observed at Mts. Gerizim and Ebal (Dt. 27:2-8, 11-13; Josh. 8:30-35; 24). As performed anew, surrogate mountains with another diviner's oak (Oak of Moreh) were found in the vicinity of Gilgal (Dt. 11:29f.). Rabbi Eleazar (2nd cent. A.D.) identified these mountains with artificially constructed stone heaps set up at Gilgal (T.P. *Sotah* vii.21c): "They made two rock piles and called one Mount Gerizim and the other Mount Ebal." Even though this interpretation was used in disputation against the Samaritans and was contrary to that of Rabbi Judah, it was probably based on old tradition: the stones in the annual ceremony of crossing the Jordan were thrown into memorial heaps (Gen. 31:46-49), which grew larger every year until they were taken over to represent the mountains Gerizim and Ebal. The early church fathers were content to argue simply that these sacred mountains were near Jericho (cf. *GP*, I, 361f.).

The community at Qumrân performed an annual liturgy of covenant renewal; its Rule (1QS 1–2) prescribed a "crossing over into the covenant" (1:16) and a "crossing over" (the Jordan?) in military ranks (2:19-22), in a public ceremony concluding with a liturgy of blessings and curses (2:2-18) reminiscent of Dt. 27:11–28:68. This ceremony, which is ultimately derivable from that of Gilgal, was celebrated at the Feast of Weeks (W. H. Brownlee, *BASOR*, 123 [Oct. 1951], 30-32).

Scholars have disputed whether the ancient festival of Gilgal was celebrated at the Feast of Unleavened Bread, dated to the new moon of the month Abib (H. Wildberger; E. Otto) or to mid-month (H.-J. Kraus); at Passover, the 14th of Abib (J. A. Soggin; J. A. Wilcoxen); or at the Feast of Weeks, falling seven weeks later (von Rad); for though Josh. 5:10 refers to the Passover, "the unleavened cakes" of 5:11 may refer to an originally separate festival; and "parched grain" occurs elsewhere in the context of ordinary "bread" (Lev. 23:14). Even though the first celebration was held at Passover, the flooding Jordan was overcome only by an act of God (Josh. 3:15f.). The memorial celebration was best held at the Feast of Weeks, when the Jordan was low, as observed also by the people of Qumrân.

III. Location.–Gilgal's location is defined most explicitly in Josh. 4:19: "on the east border of [the territory of] Jericho." "Jericho" here refers to the entire oasis, and not just to the city proper on the mound W of Elisha's Fountain. This gusher of a spring, which gave water to Jericho and most of its fields, was next to the city itself, where it was easily defended against invading Israelites. There were two other major sources of water. One was the Wâdī Qelt, which flowed past Jericho on the south, emptying its perennial spring water to the southeast. The other was the Wâdī en-Nu'eima (Nu'eimeh), which augmented the oasis to the northeast with a perennial stream fed by copious springs ('Ain ed-Dûq, 'Ain en-Nu'eima, and 'Ain Dajani). Since Roman times these waters have been lifted out of the wadis in controlled irrigation.

No satisfactory location for Gilgal has been proposed



either E or SE of Jericho, since no archeological remains earlier than Byzantine have been found there. To the northeast, however, in the vicinity of Khirbet el-Mefjer, several small sites have disclosed the presence of pottery datable to the period *ca.* 1200 to 600 B.C. One of those areas, known as Suwwânet eth-Thaniye ("the flint rock of the winding road") lies immediately to the west of Mefjer, where the Wâdī en-Nu'eima cuts through the ridge known as Dhaharet eth-Thaniye ("the ridge of the winding road"), which extends east from Jebel Qarantal ("the mount of temptation") to Mefjer. The very name of this spot, excavated by B. M. Bennett and G. M. Landes, calls attention to an outcropping of flint rock, which may have been the source of the flint knives at Gilgal (Josh. 5:2f.).

The distances of Gilgal from the ford of the Jordan and from Jericho as attested by ancient Christian pilgrims agree closely with those of Khirbet el-Mefjer. An older witness is Josephus (*Ant.* v.1.4 [20]): "These [invading Israelites] advanced fifty stades [from the Jordan], pitched their camp [Gilgal] at a distance of ten stades from Jericho." J. Muilenburg (p. 18) counted the actual distances from a spot just N of Mefjer (where he found preexilic pottery) as being 50.09 and 10.87 stades (9.3 and 2 km., 5.8 and 1.25 mi.), respectively.

2. The Gilgal of Elijah and Elisha has been identified by some scholars with **1**; but the description of the journey of these prophets to Transjordan by way of Bethel and Jericho (2 K. 2:1-8) suggests the existence of another Gilgal in the hill country above Bethel. Today a Jiljûlieh does exist, about 13 km. (8 mi.) N of Bethel, not to be confused with Jiljulieh in the Shephelah to the west.

3. Joshua 15:7 mentions a Gilgal near the ascent of Adummim, about halfway from Jerusalem to Jericho; but 18:17 gives the name as Geliloth (cf. also the Pesh. of 15:7). Despite the error of the MT, it may be that it records the postexilic name of the place, at a time when the Gilgal near Jericho no longer existed. This gives us a place for Beth-gilgal (Neh. 12:29) within the tiny province of postexilic Judah.

The site, though commonly identified with Khan el-Aḥmar (the so-called Good Samaritan Inn), might be identified with nearby 'Arâq ed-Deir (R. Boling). Any hamlet in this arid region would consist mainly of huts for herdsmen and folds for their flocks. Perhaps the latter (like the sheepfolds of the area today) were circular stone corrals, hence called *g'lîlôt* ("circles").

4. Some suppose that Dt. 11:30 supports the existence of another Gilgal near Shechem; but on this verse see **1.** II above.

5. Joshua 12:23 refers to "King of Goiim in [or at] Gilgal"; but most scholars follow the LXX in reading *glyl* (*gālîl*, Galilee) for *glgl* (Gilgal). If Goiim is to be identified with Harosheth-ha-goiim (Jgs. 4:2), this place (or area) would be in Galilee. 1 Macc. 9:2, in its best-attested reading, refers to a northern Gilgal; but Josephus (*Ant.* xii.11.1 [421]) reads Galilee.

6. "Gilgal [*Galgala*] of the Jordan" occurs in some LXX MSS at Josh. 22:10, but the Hebrew text reads

"*gᵉlîlôṯ* of the Jordan" as in 22:11, where the LXX reads "Gilead [Galaad] of the Jordan." The context favors reading *gᵉlîlôṯ* with the MT and interpreting this as "the region about the Jordan" (RSV).

GILGAMESH gil'gə-mesh or gil-gā'məsh. *See* BABYLONIA IV.B; IX.A; SUMER III, VII, X.

GILOH gī'lō [Heb. *gilōh*]. A town in the hill country of the territory allotted to the tribe of Judah (Josh. 15:51). It was the home of Ahithophel (the "Gilonite," Heb. *haggîlōnî*, 2 S. 15:12; in 23:34 the RSV renders *haggilōnî* "of Gilo"; cf. AV, NEB), one of David's counselors (cf. 1 Ch. 27:33) who joined Absalom in his revolt (2 S. 15:12). The identification with Khirbet Jala, about 8 km. (5 mi.) NNW of Hebron, would seem to contradict Josh. 15:48-51, which suggests a location about 20 km. (12½ mi.) SSW of Hebron (cf. Y. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* [rev. ed. 1977], map 130).

GILONITE gī'lō-nīt (2 S. 15:12). *See* GILOH.

GIMEL gim'əl [ג, ג]. The third letter of the Hebrew alphabet; used as such to designate the third part of Ps. 119; transliterated in this encyclopedia with the dagesh as *g*, and without as *g* (aspirated *g*). It came also to be used for the number three and with the diaeresis for three thousand. *See* WRITING.

GIMZO gim'zō [Heb. *gimzô*]. A city of Judah in the Shephelah near the Philistine plain that was captured by the Philistines in the days of Ahaz (2 Ch. 28:18). It is the modern Jimzū about 5 km. (3 mi.) SE of Lod off the Jerusalem road.

GIN. *See* TRAP.

GINATH gī'nath [Heb. *gînaṯ*]. Father of Tibni, the unsuccessful rival of Omri (1 K. 16:21f.).

GINNETHOI gin'ə-thoi [Heb. *ginnᵉṯôy*] (Neh. 12:4); AV GINNETHO; NEB GINNETHON; **GINNETHON** gin'ə-thon [Heb. *ginnᵉṯôn*] (Neh. 10:6 [MT 7]; 12:16). The head of a priestly family.

GIRDLE. *See* GARMENTS III.A; V; VIII.A.

GIRGASHITE gûr'gə-shīt [Heb. *girgāšî*; Gk. *Gergesaios*]. One of the tribes of western Palestine descended from Canaan (Gen. 10:16; 1 Ch. 1:14), listed in the Abrahamic promise (Gen. 15:21), and dispossessed by Israel (Dt. 7:1; Josh. 3:10; 24:11; Neh. 9:8). Some identify them with the Qaraqisha of Hittite and Egyptian records. The name has been linked with the personal names Grgshy, Grgsh, and Grgshm found in Punic texts, and *grgš* and *bn grgš* in Ugaritic. This link suggests that the tribe was related to the Phoenicians. Maisler holds that their name is theophorous and means "client of Ges [the Sumerian god of light]," that his worship was introduced into Phoenicia and Palestine *ca.* 2000 B.C., and that "Gergesenes" ("Gerasenes," AV, RSV mg.) in Mt. 8:28; Mk. 5:1; Lk. 8:26, 37 may be the same name.

Bibliography.–*UT*, p. 381; B. Maisler, *ZAW*, 50 (1932), 86f.

D. J. WIEAND

GIRL [Heb. *'almâ* (Ex. 2:8), *yaldâ* (Joel 3:3 [MT 4:3]; Zec. 8:5), *naʿᵃrâ* (Jgs. 19:3-6, 8f.); Gk. *korásion* (Mt. 9:24f.; 14:11; Mk. 5:41f.; 6:22, 28), *paidískē* ("slave girl," Acts 16:16), *parthénos* (1 Cor. 7:28, 34)]; AV also MAID, DAMSEL, VIRGIN (1 Cor. 7:28, 34); NEB also CHILD (Mk. 5:41), VIRGIN (1 Cor. 7:28), CELIBATE WOMAN (1 Cor. 7:34); **YOUNG GIRLS** [Heb. *ṭap bannāšîm*] (Nu. 31:18); AV WOMEN CHILDREN; NEB WOMAN.

Except for the use of *yaldâ* in Zec. 8:5, the OT renderings refer to girls in late adolescence rather than childhood. The word *ṭap* denotes those of the tribe who are unfit to march, including women and children (KoB, p. 355), while *nāšîm* means "women." The NT terms range in meaning from "child" (*korásion*) to "unmarried woman of marriageable age" (*parthénos*). *Paidískē* always refers to a slave girl. In Mk. 5:41 *korásion* is used to translate the Aram. *ṭᵉlîṯâ*, "maiden" (transliterated in the Greek as *talithá*).

See also DAUGHTER; MAID. N. J. O.

GIRZITES gûr'zīts. In 1 S. 27:8, the *kethibh* has *girzî*, whereas the *qere* reads *gizrî*. The RSV follows the *kethibh*, while the AV ("Gezrites") and NEB ("Gizrites") follow the *qere*. This in the only mention of an otherwise unknown people living between Philistia and the Egyptian border, who with the Amalekites and Geshurites were in brief conflict with David when he was at Ziklag. Attempts to associate the *qere* with the inhabitants of Gezer should be avoided, if only on topographical grounds. R. K. H.

GISHPA gish'pə [Heb. *gišpā'*] (Neh. 11:21); AV GISPA. An officer of the temple servants. A comparison with Ezr. 2:43 makes it probable that he is to be identified with Hasupha, and quite possible that this word is a corruption of "Hasupha."

GITTAH-HEPHER git-ə-hē'fər (Josh. 19:13, AV); RSV, NEB GATH-HEPHER. "Gittah" is correctly "Gath" with *h* locale, meaning "toward Gath." *See* GATH-HEPHER.

GITTAIM git'ā-əm [Heb. **gittayim*–'double winepress']. The town to which the Beerothites fled for refuge from the persecution of Saul (2 S. 4:3). This town may be identical with the one named with Hazor and Ramah in Neh. 11:33, where returning Benjaminites settled after the Exile.

GITTITES git'īts [Heb. *gittîm*]. The inhabitants of Gath,

one of the five chief Philistine cities, previously occupied by the formidable Anakim (Josh. 11:22).

Gath was the scene of an outbreak of bubonic plague (1 S. 5:6-12), which devastated its inhabitants. The Gittites were apparently men of great stature (cf. 2 S. 21:19-22; 1 Ch. 20:5-8), and the giant Goliath (1 S. 17:4-7) killed by David was one of them. David subsequently had Gittite friends in his retinue (2 S. 6:10f.; 15:19-22) and Gittite troops among his mercenaries (2 S. 15:18). One Gittite warrior had a congenital deformity of the hands and feet (2 S. 21:20; 1 Ch. 20:6). Twice David fled from Saul to Achish, king of Gath (1 S. 21:10-15; 27–28). The Gittites were successively subjugated by Rehoboam (2 Ch. 11:8), Hazael (2 K. 12:17), and Uzziah (2 Ch. 26:6), though in Am. 6:2 Gath is described as Philistine. R. K. H.

GITTITH git'ith [Heb. *gittîṯ*] (headings of Pss. 8, 81, 84). *See* PSALMS II.C; MUSIC III.B.2.

GIVE. *I. Terminology–A. Common Verbs.* In the OT "give" most frequently represents the common Hebrew verb *nāṯan* (more than 900 occurrences). The later synonym **yāhaḇ* (whose cognate *yᵉhaḇ* exclusively denotes "give" in biblical Aramaic) is far less frequent and occurs only in the imperative. Used independently these two verbs denote simply "give": volitional transference of a thing or benefit from one to another. Sometimes these verbs occur in idiomatic combination with a substantive, e.g., *nāṯan qôl*, "utter a voice" (Am. 1:2; 2 S. 22:14), *nāṯan bᵉyaḏ*, "give into the hand of" (i.e., "hand over to," Nu. 21:2; Dt. 1:27; etc.), *nāṯan bᵉnepeš*, "give up to the will of" (Ps. 27:12), *nāṯan lēḇ*, "give heed" (Eccl. 7:21).

In the NT the Greek verb *dídōmi* is by far the most frequently represented term (more than 300 occurrences), used either in independent form or in cognate forms in which prepositional prefixes add nuances to the verbal root. Examples of the latter are *apodídōmi*, "give back" (Lk. 9:42), *prodídōmi* (lit. "give first"), "give a gift" (Rom. 11:35), *metadídōmi* (lit. "share"), "contribute" (Rom. 12:8), *epidídōmi*, "give way" (Acts 27:15), *paradídōmi*, "give up" (Rom. 1:26, 28; etc.).

The RSV does not limit its translation of Heb. *nāṯan* or Gk. *dídōmi* to "give." *Nāṯan* is also translated as "put" (e.g., Ex. 25:16), "yield" (e.g., Lev. 26:4), "allow" (Dt. 18:14), "set" (2 K. 18:23), "bring" (1 S. 9:23), "bestow" (Ex. 32:29), etc. *Dídōmi* is likewise variously rendered as "offered" (Mt. 27:34), "put" (Bar. 3:7; Mk. 13:34), "assign" (1 Cor. 3:5), "make" (Eph. 1:22), "commit" (Rev. 20:4), etc.

B. Causative Verb Forms. In the OT "give" translates the hiphil form of many Hebrew verbs, e.g., the hiphil of *nāgaḏ*, "give account of" (Job 31:37), *zāhar*, "give warning" (Ezk. 3:17; 33:7), *yāṣā'*, "give vent to" (Prov. 29:11), *yārâ*, "give revelation" (Hab. 2:19), of *gāmā'*, "give to drink" (Gen. 24:17), of *kā'as*, "give provocation" (Hos. 12:14 [MT 15]), of *yāḏâ*, "give thanks" (Ps. 7:17 [MT 18]), etc.

C. Specific Verbs. In addition, the RSV frequently renders many other Hebrew, Aramaic, and Greek verbs by expressions that use "give" as an auxiliary. Heb. *yālaḏ* (1 S. 4:19b) and *ḥûl* (Dt. 32:18), and Gk. *gennáō* (Lk. 1:57) and *tíktō* (Lk. 2:7) are rendered "give birth."

Many verbs for speaking and commanding are rendered with "give": Heb. *'ānâ*, "give answer" (Gen. 41:16), *yā'aṣ*, "give counsel" (Ex. 18:19), *'āmar*, "give command" (1 Ch. 14:12), "give orders" (Est. 6:1), *ṣiwwâ*, "give in commandment" (Ex. 25:22), *'āzaḇ*, "give free utterance" (Job 10:1), *pāṯar*, "give interpretation" (Gen. 41:12), niphal of *šāḇa'*, "give an oath" (2 S. 19:23 [MT 24]), etc.; Gk. *apokrínomai*, "give answer" (Mt. 27:14), *symbouleúō*, "give counsel" (Jn. 18:14), *parakaléō*, "give encouragement" (Acts 20:2), *keleúō*, "give orders" (Mt. 8:18), *diatássō*, "give directions" (1 Cor. 11:34), *diastéllomai*, "give instructions" (Acts 15:24), *parakaléō*, "give instruction" (Tit. 1:9), *emphanízō*, "give information" (Acts 25:15), etc.

Certain verbs expressing gratitude and praise are also rendered with "give." "Give praise" renders Heb. *hālal* (Jer. 31:7) and Gk. *exomologéō* (Rom. 14:11); "give glory," Heb. *śîm kāḇôḏ* (Josh. 7:19) and Gk. *doxázō* (Mt. 5:16); "give thanks," Gk. *eucharistéō* (Lk. 17:16; etc.).

The English idioms "give oneself," "give up," and "give away" represent a variety of terms with a range of meanings. "Give up" can mean deliver in the sense of handing someone over (e.g., hiphil of Heb. *sāgar* in Dt. 23:15 [MT 16]; Josh. 20:5; Gk. *paradídōmi* in Rom. 1:26, 28; *charízomai* in Acts 25:11, 16), or abandon, cease, neglect (e.g., Heb. *'āzaḇ* in Ps. 16:10; Gk. *kataleípō* in Acts 6:2; *aphíēmi* in Rom. 1:27; *katargéō* in 1 Cor. 13:11; cf. "give up worshiping," *mḕ proskynéō* in Rev. 9:20). The RSV renders "give themselves to" for hiphil of Heb. *ḥāzaq bᵉ*, with the meaning "devote themselves to" (2 Ch. 31:4). In 1 S. 11:3, 10 "give ourselves up" (Heb. *yāṣā'*) denotes surrender, as does "give way" (Gk. *epidídōmi*) in Acts 27:15. (Cf. also references to Jesus "giving himself [up]," discussed under II below.)

D. Nouns. "Given to" sometimes translates the Hebrew noun *ba'al* (lit. "possessor" or "master") in construct with a noun describing a human proclivity: *ba'al nepeš*, "a man given to appetite" (Prov. 23:2), *ba'al 'ap*, "a man given to anger" (Prov. 22:24), *ba'al ḥēmâ*, "a man given to anger" (Prov. 29:22), *ba'al rešaʿ*, "those who are given to [wickedness]" (Eccl. 8:8).

E. As a Translational Facilitation. In some instances the appearances of "give" in the RSV are merely an aid to facilitate translation. In Nu. 11:12; 14:16, 23, e.g., the literal "swore to their fathers" becomes in the RSV "swore to give to their fathers." In Jn. 7:39 the literal "for the Spirit was not yet" is rendered "for as yet the Spirit had not been given" (but cf. the undoubtedly secondary Greek variant *dedoménou*, "given," that is represented in a number of Syriac, Coptic, and Latin MSS as well as citations by some church fathers). In Gal. 3:15 "to give a human example" renders Gk. *katá ánthrōpon légō* (cf. AV "I speak after the manner of man"). Cf. also Dt. 33:8; 1 Ch. 6:61 (MT 46); Jer. 43:11; Rom. 2:7; 5:13; 15:8.

II. Concept.–In the OT the concept of giving is significant and multifaceted. The model is God Himself who is ever giving generously of Himself and His own bounty. The land of promise, the covenants, the tablets, the Torah, the kingship, peace, power, justice, deliverance from the enemy, the phenomena of nature, provision, and sustenance are but some of the many gifts that the OT attributes to God's own gracious giving. It is God alone who gives salvation, but as Lord of history He is also viewed as giving peoples "into the hands of" (Nu. 21:2) or "over to" (Dt. 7:16) enemies.

God also gives people signs (2 Ch. 32:24), answers (Gen. 41:16), and blessings (Gen. 28:4). In contrast, the handcrafted idol cannot "give revelation" (Hab. 2:19).

In the OT human beings also give to God. They give Him thanks (Ps. 7:17 [MT 18]) and praise (Ps. 66:2). They promise and are urged to give Him their tithes and offerings (Gen. 28:22; Ex. 30:14). Freewill offerings for the furbishing of the Solomonic temple were "given willingly" (1 Ch. 29:9) by the people of Israel. The underlying rationale for this giving to God is clearly stated in 1 Ch. 29:14: "For all things come from thee, and of thy own

have we given thee." The model is always God's own prior generosity; the goal is to show gratitude by emulation of that model in the human sphere. *See* TITHE.

The same elevated concept of giving may also be perceived in the Apocrypha. Tobit, affirming that "the Lord himself gives all good things" (4:19), indeed life itself (5:19), urged by both word and example (1:7f., 17, etc.) that human comportment model itself after God's own generosity: "Give of your bread to the hungry, and of your clothing to the naked. Give all your surplus to charity, and do not let your eye begrudge the gift when you make it" (4:16). "It is better to give alms than to treasure up gold" (12:8). The sage Sirach, however, advocated a more circumscribed posture of benevolence:

Give to the godly man,
but do not help the sinner.
Do good to the humble,
but do not give to the ungodly (12:4f., 7).

He reasoned that just as wicked people are odious to God, so must they be to the faithful. No distinction is made here between sin and the sinner; indeed, the righteous are to share in the retributive attitude that is ascribed to God vis-à-vis the unrighteous. In 1 Macc. 6:44 the concept of giving for the sake of others is extended even to the giving up of one's life: "he [Eleazar] gave his life to save his people" (cf. 2:50).

The NT particularly accents God's giving nature. In John's Gospel Jesus' own works (5:36) are attributed to God's giving. Indeed, "God so loved the world that he gave his only Son" (3:16), and the Father "has given all things into his [the Son's] hand" (3:35). Jesus Himself taught the maxim that it is "more blessed to give than to receive" (Acts 20:35), thereby extending to the sphere of human relations the divine example of giving freely of oneself for the well-being of others. This may include tithing but should not be construed in terms of "external magnitude" but on the basis of "the internal state of the giver's heart" (P. E. Hughes, comm. on 2nd Corinthians [*NICNT*, 1962], p. 330).

Consonant with divine giving is the "new commandment" that Jesus gives his followers in Jn. 13:34, "even as I have loved you, that you also love one another." By His life of total self-giving, humbling Himself and becoming obedient unto death, Jesus made the perfect offering of obedience to God and set an example for all to emulate. Using the traditional language for martyrdom (cf. 1 Macc. 6:44 above) the NT describes Jesus' death as an act of love in which He "gave Himself" (Gal. 1:4; 2:20; Eph. 5:25; 1 Tim. 2:6; Tit. 2:14). "Therefore," urged Paul, "be imitators of God, as beloved children. And walk in love, as Christ loved us and gave Himself up for us, a fragrant offering and sacrifice to God" (Eph. 5:1f.). (See M. Barth, comm. on Ephesians [*AB*, 1974], p. 556f.; *see also* LOVE III.)

This God, then, whose very nature it is to give and whose preeminent gift to humankind is Jesus (Jn. 3:16), calls all to a life of trust in His ability to give what is necessary for life. "He who did not spare his own Son but gave him up for us all, will he not also give us all things with him?" (Rom. 8:32).

GIZONITE gĭ'zən-īt [Heb. *gizônî*]. This gentilic name in 1 Ch. 11:34, "Hashem the Gizonite," is probably an error for "Gunite" (cf. Nu. 26:48), and the passage should then be corrected, after 2 S. 23:32, "Jashen the Gunite." Other authorities emend to read "from Gimzo" (cf. 2 Ch. 28:18).

GIZRITES giz'rīts (1 S. 27:8, NEB). *See* GIRZITES.

GLAD [Heb. *śāmaḥ* (Ex. 4:14; 1 S. 11:9; 1 Ch. 16:31; Ps. 31:7 [MT 8]; etc.), *tûḇ/yāṭaḇ ṭôḇ* (Jgs. 18:20; 1 K. 8:66 par. 2 Ch. 7:10; Est. 5:9; Eccl. 7:3), *gîl* (Prov. 24:17; Isa. 25:9; 66:10; Joel 2:21, 23), *śûś, śîś* (Job 3:22; Isa. 35:1; 65:18f.; Lam. 1:21), piel of *ḥāḏâ* (Ps. 21:6 [MT 7]), *bāśar* ("told the glad news," Ps. 40:9 [MT 10]), *rinnâ* (Ps. 42:4 [MT 5]; 118:15); Aram. *ṭᵉʾēḇ* (Dnl. 6:23 [MT 24]); Gk. *agalliáomai* (Mt. 5:12; 1 Pet. 4:13), *chaírō*–'rejoice' (Mk. 14:11; Lk. 15:32; 22:5; etc.), *thélō*–'will, wish' (Jn. 6:21), *euphraínō* (Acts 2:26; 2 Cor. 2:2)]; AV also REJOICE, PREACH (Ps. 40:9), JOY, MERRY, "is made better" (Eccl. 7:3), WILLINGLY (Jn. 6:21), etc.; NEB also PLEASED, "take heart" (1 S. 11:9), REJOICE, EXULT, etc.; **GLADNESS** [Heb. *śimḥâ* (Nu. 10:10; 1 Ch. 29:22; 2 Ch. 29:30; 30:21, 23; etc.), *ṭûḇ* (Dt. 28:47; Isa. 65:14), *śāśôn* (Ps. 45:7 [MT 8]); Isa. 61:3; Joel 1:12), hiphil of *bālag* ("know gladness," Ps. 39:13 [MT 14]), *rinná* ("shouts of gladness," Prov. 11:10), *māśôś* (Isa. 24:11), *śāmaḥ* ("give gladness," Jer. 31:13), *gîl* (Joel 1:16); Gk. *agallíasis* (Lk. 1:14; He. 1:9), *euphrosýnē* (Acts 2:28; 14:17)]; AV also JOY, "recover strength" (Ps. 39:13), SHOUTING (Prov. 11:10), MIRTH (Isa. 24:11), MAKE REJOICE (Jer. 31:13); NEB also FESTAL, REJOICING, JOY, JOYFULLY, SMILE (Ps. 39:13), etc.; **GLADLY** [Gk. *asménōs*] (Acts 21:17); [*hēdéōs*–'pleasantly'] (e.g., Mk. 6:20); NEB also LIKEN TO, EAGERLY, PREFER TO; [*epithyméō*–'desire'] ("would gladly," Lk. 15:16); NEB GLAD.

In 2 S. 18:11; Philem. 13 the RSV supplies "gladly" (AV, NEB, "I would have given"). Usually the RSV keeps the expression "gladness of heart" (e.g., Dt. 28:47; Cant. 3:11; Isa. 30:29), though it changes it in Acts 2:46 to "glad...hearts" (Gk. *en agalliásei...kardías*).

In Est. 9:19, 22, gladness is part of a larger context of "feasting and holiday-making," of sending "choice portions to one another" and "gifts to the poor." In Zeph. 3:17 it parallels love (Heb. *ʾahᵃḇâ*). Thus for the Hebrews "gladness" was more than mere gratification of a physical pleasure (as in Herod's case, Lk. 23:8). Often it is interchanged with "joy" (e.g., Ps. 14:7; cf. "rejoice and be glad" in Ps. 31:7; Mt. 5:12), finding its "seat" in the heart (Ex. 4:14; 1 K. 8:66; Prov. 27:11; Ps. 16:9 = Acts 2:26).

Gladness is expressed at the birth of a son (Lk. 1:14; but cf. Jer. 20:15), at a reunion of relatives (Ex. 4:14), and at a son's show of wisdom before his father (Prov. 10:1; 15:20; 23:24; 29:3). It is a contrast to sadness, lamenting ("mourning," Est. 9:22), and sorrow (Prov. 15:13; but cf. Jer. 31:13). Only rarely does one face death with gladness (Job 3:22; but cf. Ps. 39:13). But to Paul there can be gladness in pain and weakness (2 Cor. 2:2; 12:9; 13:9), and Peter linked gladness to suffering for the Lord (1 Pet. 4:13). It is unacceptable to rejoice at the calamity of one's enemy (Prov. 17:5; cf. 24:17), though this injunction had been violated (Lam. 1:21). (For other nonreligious occurrences of "gladness," see TDNT, II, 774.)

In the Psalms gladness refers to cultic celebration ("with glad shouts," cf. Ps. 42:4) of the great acts of divine deliverance (cf. Ps. 107:30, 42) and to a general joy in God. (See *TDOT*, II, 475; cf. p. 474 for the "secular" use of Heb. *gîl*.) To the psalmist God is the source of human joy (Ps. 118:14), which is associated with the stringed instruments (Ps. 45:8 [MT 9]), the flute (cf. Isa. 30:29), and the divine anointing with the "oil of gladness" (Ps. 45:7 = He. 1:9; Isa. 61:3; Prov. 27:9) or "superabundant joy" (KD *in loc.* on Ps. 45; cf. F. F. Bruce, comm. on Hebrews [*NICNT*, 1964], p. 20). The relation between gladness and wine is ambiguous; wine may cause merriment (at harvest

time, Ps. 104:15; Eccl. 10:19; cf. Jer. 48:33; Zec. 10:7) or much misery (Isa. 22:13; see *DNTT*, III, 919, 922).

Metaphorically, "gladness" can be attributed to a nation (Ps. 106:5), to dry land (Isa. 35:1), to the heavens (1 Ch. 16:31; Ps. 96:11), etc. In Ps. 46:4 "streams make glad the city of God," while Isa. 65:17-19 gives a glimpse of an eternal jubilation. On Ps. 40:9 (Heb. *bāśar*) *see* GOOD NEWS; PREACH.

See JOY.

N. J. O. R. W. V.

GLAD TIDINGS. Occurs in the AV translation of the Greek verb *euangelízō*, "tell the good news" (Lk. 1:19; 8:1; Acts 13:32; Rom. 10:15). The verb is also frequently translated "preach the gospel" (< Anglo-Saxon *godspell*, "good tidings"). The AV adopted "glad tidings" from Tyndale's version, which was the first English Bible to use the phrase. The RSV uses "good tidings" (only in the OT), "good news," and "gospel."

See GOOD NEWS; GOSPEL.

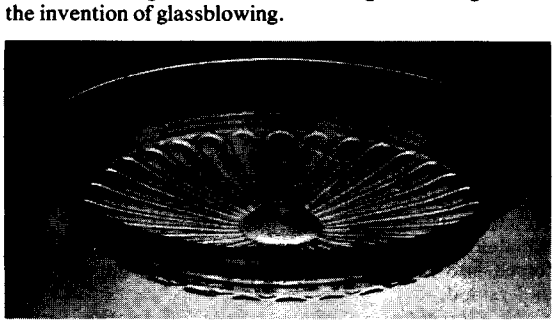
GLASS [Heb. *zᵉḵôḵîṯ* (Job 28:17); AV, NEB, CRYSTAL; Gk. *hýalos* (Rev. 21:18, 21)]. A homogeneous material that has a random liquid-like (noncrystalline) molecular structure, composed primarily of silica or sand mixed with soda and lime. The manufacturing process for glass requires that the raw materials be heated and reacted so as to form a completely fused melt, which is then cooled rapidly so that it becomes rigid without crystallizing.

I. Techniques.–Three basic techniques were used to fashion vessels: casting, mosaic, and core-forming. The casting of vessels was probably done in molds similar to those used in casting early metals. Usually some final cutting and polishing were needed after removal from the mold.

The more sophisticated mosaic glass technique is the same as that used today to make paperweights. By heating small amounts of glass and drawing them into thin rods, a design could be built with multiple rods, which were heated to form a solid cane. The cane could be heated again and pulled out like taffy to miniaturize the design. The resulting cane was cut into sections, which were used to make beads or arranged in a mold to form a vessel. Excavations at Tell er-Rimah in Iraq confirm a fifteenth-century B.C. date for this sophisticated technique.

In core-forming a rod or tool was dipped into a pot of molten glass and trailed onto a core that was made of clay and dung and supported on a metal rod. (The high viscosity of early glass would have made dipping the core directly into a pot very difficult.) Then the glass was reheated and smoothed by marvering, rolling the hot form on a flat stone surface. Characteristic of this technique are trail decorations in contrasting colors wound over the marvered form. With a single point or a comblike tool these trails were dragged up and down into elaborate feather or festoon patterns, a technique easily accomplished in glass but nearly impossible in any other medium. After the handles, feet, and rim were fashioned, the core-formed object was removed from the supporting rod and the core material was scraped out. Most of the extant bottles and jars from the middle of the 2nd millennium were fashioned by core-forming, although the three techniques were contemporary.

II. History.–Pliny's account of the accidental discovery of glass by Phoenician sailors at the Syro-Palestinian coast (*Nat. hist.* xxxvi.65 [191]) is quaint but anachronistic. The origin of glass was farther east and probably associated with the metal-working or faience industries, which required intense heat and used similar raw materials. Small objects, such as beads and pendants, were probably made of glass well before 1500 B.C. Shortly after the middle of the 2nd millennium glass vessels were made in western Asia by the three basic techniques mentioned above. With the expansion of Egypt under Thutmose III, glassmaking technology was brought back to Egypt where it flourished from the 18th through the 20th Dynasties. Job (28:17) equates the value of glass with gold and rubies; the vessels inscribed with the name of Thutmose III and found in the tombs of his minor wives confirm the high value of glass and suggest Asian glassworkers were eager to extol their new patron. After the 20th Dynasty, Egypt was not a glassmaking center again until the establishment of Alexandria in the late 4th cent. B.C. Near Eastern centers continued to produce glass objects after the 1st millennium B.C. Casting vessels seem to be the craftsman's tour de force. At the Anatolian site of Gordion, a Phrygian center, a colorless fluted bowl was discovered in a ninth-century-B.C. context. It is the first of a series of colorless glass objects which culminate in the shallow phiale that imitated rock crystals and precious metal forms at the Persian court of the 5th cent. B.C. These vessels are among the finest technological achievements in glassmaking before the invention of glassblowing.



Phiale of colorless glass, cast and cut in Persia during the Achaemenian period (450-400 B.C.) (Corning Museum of Glass)

Aristophanes (*Acharnians* 74) mentioned the haughty ambassadors at the Persian court drinking from goblets of glass and gold. At Nimrûd, vessels associated with Sargon II (722-705 B.C.) were excavated from the northwest palace. The most important of this group was an alabastrom with the king's name inscribed on the side. Several vessels, some without excavated context, relate to this early group, such as the large, yellow-green, footed vase now in Corning, New York.

Glass production between the 6th and 4th cents. was limited to small core-formed unguent containers (*see* Plate 29) made in the eastern Mediterranean. The vessels were as precious as their contents and were usually fashioned as miniature Greek ceramic forms such as the alabastron, aryballos, or amphoriskos.

The Hellenistic period is remarkable for its luxury vessels. Quantities of mosaic glass were made in Egypt, Rome, and Syro-Palestine. Pliny and Strabo mentioned the importance of Alexandria as a major glassmaking center, but little material has come from the site itself. Glass imitated costly minerals, especially *murrhine*, the fabulous material highly prized by wealthy Romans.

A formidable technique employed in the Hellenistic period was that of sandwiching a cutout design of gold leaf or foil between two colorless glass surfaces (*see* Vol. I, Plate 11). Even after the invention of glassblowing, this

GLASS

Footed vase of yellow-green glass, cast and cut in Assyria or Syria (750-700 B.C.) (Corning Museum of Glass)

technique continued to be used for decoration (see III below).

A transitional drinking vessel, the ribbed bowl, was produced between the 2nd cent. B.C. and the 1st cent. A.D. in both western and eastern glassmaking centers (see Weinberg). These bowls were mold-pressed; glass was forced into ribbed molds by some method not yet fully understood.

III. Glassblowing.—Somewhere along the Syro-Palestinian coast shortly after 50 B.C. the discovery was made that glass could be worked by gathering it on the end of a hollow pipe and blowing it; this remains the single greatest discovery since glass was first worked 3500 years ago. Excavations in Israel (see Avigad) have helped confirm both the location and date mentioned by authors such as Strabo and Pliny (see Grose for textual evidence).

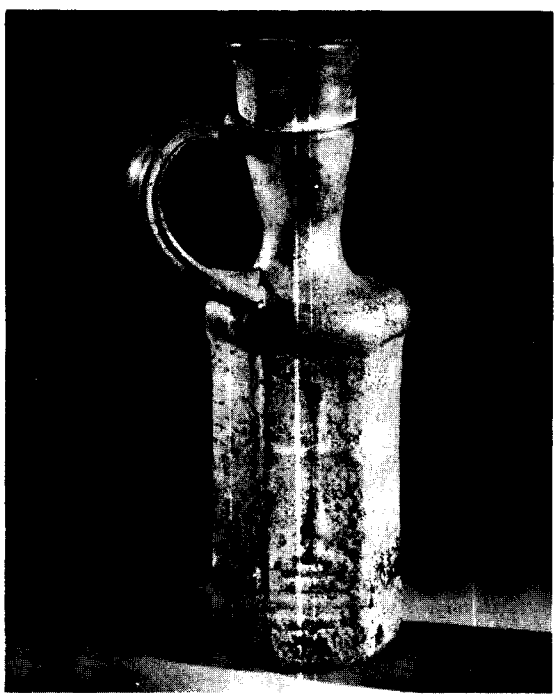
Blown tablewares (*see* Plate 30) and mold-blown vessels were soon being manufactured at an increased rate. The numerous bottles, similar to test tubes, found as grave goods have often been called tear flasks or lacrimonia (see Scheiber), but most scholars think that these vessels contained scented unguents or perfume rather than tears of mourners collected at the funeral. (They should not be related to Ps. 56:8 [MT 9], where RSV, AV, "bottle" is misleading anyway, since Heb. *nō'd* is a container made of animal skins.)

Centers such as Tyre and Sidon became famous for the quantities of glass produced. Both Pliny (*Nat. hist.* v. 17 [75]) and Josephus (*BJ* ii.10.2 [189-191]) mentioned the Belus River near Acre as a source for excellent glassmaking sands. Many mold-blown vessels, some with religious symbols among the designs, are described as "Sidonian." Among these are the works of Ennion, a first-century A.D. glassmaker who signed his elegant vessels by cutting his name in the mold.

Glassmaking quickly spread throughout the empire and centers were established near many major cities. As the empire grew, glass was used for shipping and storage as well as table service. During the 3rd and 4th cents. numerous cups and bowls had gold-glass bases (see Morey). These bases often depicted OT or NT scenes, though some were individual or family portraits. The bases, often plastered on the catacomb wall, identified the deceased. It has been suggested that the vessels were used during the life of the individual and ceremonially broken at the funeral. Many gold-glass bases and wheel-cut vessels of this later period bear inscriptions such as "PIE ZESES" ("long life") or "DULCIS ANIMA VIVAS" ("sweet soul, may you live").

Base of a bowl made of colorless blown glass and gold glass with a scene of the Good Shepherd. Probably from Rome, 4th cent. A.D. (Corning Museum of Glass)

Pitcher of yellow-green glass, mold blown, with Christian symbols. From the Syro-Palestinian coast, late 6th-early 7th cents. A.D. (Corning Museum of Glass)



Although production declined with the Western Roman Empire, the Syro-Palestinian coast continued to produce glasses in the later Byzantine period. Mold-blown and wheel-cut decorations on fourth- and fifth-century vessels frequently depicted religious motifs. A series of sixth- and seventh-century hexagonal flasks were mold-blown with Jewish or Christian symbols (see Barag). Apparently the same workshops were supplying vessels filled with water, oil, or earth from Jerusalem to both Jewish and Christian pilgrims. These workshops and their counterparts farther east may have provided the basis for continuing glass production in the Islamic world.

S. M. GOLDSTEIN

GLASS, SEA OF [Gk. *thálassa hyalínē*] (Rev. 4:6; 15:2). In the vision of heaven in these two apocalyptic passages the likeness of a "glassy sea" is seen before the throne of God. The pure translucency of the sea is indicated in the former reference by the words "like crystal"; its fiery appearance is suggested in the latter passage by the words "mingled with fire." Beside the sea stood the victorious martyrs, with harps in their hands, singing the song of Moses and of the Lamb (15:2-4).

The background for this imagery is found in the OT. On Mt. Sinai the elders of Israel saw a vision of "the God of Israel; and there was under his feet as it were a pavement of sapphire stone, like the very heaven for clearness" (Ex. 24:10). Ezekiel also saw a vision markedly similar to John's: "Over the heads of the living creatures there was the likeness of a firmament, shining like crystal.... And above the firmament... there was the likeness of a throne, in appearance like sapphire" (Ezk. 1:22, 26). (Cf. also Solomon's molten sea [1 K. 7:23-26].) The "song of Moses" obviously points to the song of victory sung by Moses and the Israelites after their passage through the Red Sea (Ex. 15:1-18). Some would therefore see the "sea of glass" as a symbolic Red Sea through which the martyrs have safely passed in order to escape their persecutors. Others, however, simply see it as picturing the majesty, holiness, and purity of God.

J. ORR

GLAZE; GLAZING [Heb. *kesep sîgîm*–'silver of dross'] (Prov. 26:23); AV SILVER DROSS; [Gk. *chrísma*] (Sir. 38:30). Palestinian potters, unlike those of Egypt, did not glaze their products, but rather rubbed their surfaces with a tool, small stone, or shell. Sir. 38:30 may also have in view the smearing of an item with paint. The RSV, influenced by Ugar. *spsg* (*UT*, 2 Aqht 6:36; cf. H. L. Ginsberg, *BASOR*, 98 [Apr. 1945], 21 n. 55), combines the two words in Proverbs, which gives the meaning "like a glaze" (*kᵉsapsāgîm*; cf. D. Kidner, *Proverbs* [1964], p. 164).

GLEAMING BRONZE. *See* ELECTRUM.

GLEANING [Heb. *lāqaṭ* (Ruth 2:2-23; Isa. 17:5), *leqeṭ* (Lev. 19:9; 23:22), *ʿālal* (Dt. 24:21; Jer. 6:9), *ʿōlēlôṭ* (Jgs. 8:2; Isa. 17:6; 24:13; Jer. 49:9; Ob. 5; Mic. 7:1), *lāqaš* (Job 24:6)]; AV also GATHER, "some grapes" (Ob. 5); NEB also "stripped" (Isa. 24:13), "filch" (Job 24:6). Hebrew law required that the poor, the orphan, the widow, and the stranger be allowed to glean the grain, grapes, and olives left behind during the harvest. The owner was prohibited from harvesting the corners of his field and from stripping bare his fields, vineyards, and orchards (Lev. 19:9f.; 23:22; Dt. 24:19-21). In this way provision was made for those who had no property of their own. This practice is illustrated by the story of Ruth (2:2-23). The generosity of the owner determined the value of the gleanings; in Ruth's case it was beyond the commonly accepted bounds (2:16; cf. KD *in loc.*). Sometimes the poor were hired to glean the vineyard while others gathered the grapes (Job 24:6; cf. KD *in loc.*).

The prophets used the imagery of "gleaning" to depict destruction. According to Jeremiah (the remnant of) Israel is to be gleaned "thoroughly as a vine" (6:9; cf. the sharp contrast with Jgs. 8:2 where the "gleaning of the grapes of Ephraim" means Ephraim's victory over the Midianites; see KD *in loc.*), for it is "gleaned" of justice; only injustice is left (Mic. 7:1). Isaiah described divine doom as a gleaning of the ears of grain (17:5); but Israel will not be totally annihilated, for some gleanings will remain (v. 6). In Jer. 49:9; Ob. 5, the figurative gleaning of Edom is more thorough than the usual agricultural gleaning.

GLEDE (Dt. 14:13, AV). *See* BUZZARD.

GLEN [Heb. *mᵉṣulâ*] (Zec. 1:8); AV BOTTOM; NEB HOLLOW. The Hebrew noun is from the root *ṣālal*, which can mean either "sink" or "grow dark, shadowy"; thus the idea of a low, shady place. The reference is probably to a valley in the neighborhood of Jerusalem.

GLISTERING. A poetic term meaning "glistening," used by the AV in 1 Ch. 29:2 and Lk. 9:29. *See* ANTIMONY; TRANSFIGURATION.

GLOOM [Heb. *ʿărāpel*] (Dt. 4:11); AV THICK DARKNESS; NEB THICK MIST; [*ḥōšeḵ*] (Job 3:5; 10:21; 34:22); AV DARKNESS; NEB also BLACKNESS, DARK; [*ʿêpâ*] (Job 10:22); AV DARKNESS; NEB GATHERING SHADOWS; [*ʾōpel, ʾăpel, ʿᵃpēlâ*] (Job 28:3; Isa. 29:18; 58:10; 59:9; Joel 2:2; Am. 5:20; Zeph. 1:15); AV DARKNESS, DARK, OBSCURITY, GLOOMINESS, VERY DARK; NEB also DARKNESS, DEEP GLOOM, DUSK; [*ṣalmāweṭ*] (Ps. 107:10, 14; Jer. 13:16); AV "shadow of death"; NEB "dark as death," DEEP GLOOM; [*māʿûp*] (Isa. 8:22); AV DIMNESS; NEB "constraint"; [*mûʿāp*] (Isa. 9:1 [MT 8:23]); AV DIMNESS; NEB "escape"; [*qāḏar*] ("clothe in gloom," Ezk. 31:15); AV "caused to mourn"; NEB "put in mourning"; [Gk. *zóphos*] (He. 12:18; 2 Pet. 2:4, 17; Jude 6, 13); AV MIST, DARKNESS, BLACKNESS; NEB also DARK, DARKNESS, BLACKEST. The "nether gloom" of 2 Pet. 2:4, 17 and Jude 6, 13 is synonymous with the HELL reserved for fallen angels and the heretical teachers who follow their sinful example. Elsewhere the term is employed literally (Dt. 4:11) or figuratively (Am. 5:20) of darkness (cf. Ps. 107:10, 14), and of the abode of the dead (Job 10:21f.).

See also DARK; DEATH III.B.

GLORIFY. *See* GLORY.

GLORIOUS. The word occurs in the obsolete sense of "boastful" in the AV of Ad. Est. 16:4. For its use in the RSV, *see* GLORY.

GLORY [Heb. *ʾaddereṭ* (Zec. 11:3); *tip̄ʾārâ* (Isa. 4:2;

28:5; Est. 1:4; Ps. 96:6; Zec. 12:7; etc.); *ṣᵉḇî*–'glory,' 'beauty' (2 S. 1:19; Isa. 13:19; 24:16; Ezk. 20:6; etc.); *kāḇôḏ*, from *kāḇēḏ*–'to be heavy,' hence 'wealth, honor, dignity, power,' etc.; Aram. *yᵉqār* (Dnl. 7:14); *yᵉqārā'* (Dnl. 2:37); Gk. *dóxa*– 'reputation, fame, splendor, honor, praise, majesty,' etc.]. A comprehensive term applicable to both men and God, reflecting such qualities as esteem, reputation, essential worth, prestige, fame, and honor. As used of God, it is deemed particularly appropriate for describing His moral uniqueness and grandeur as Lord of the universe.

I. OT and Intertestamental Background.–In the OT, glory was an attribute that was applied, along with beauty and splendor, to such intricately contrived cultic objects as the priests' vestments (Ex. 28:40), or such architectural marvels as the Solomonic temple (1 Ch. 22:5). When glory was used of persons, it reflected noteworthy elements such as dignity of character, position (cf. Gen. 45:13), wealth (Gen. 31:1; Ps. 49:16 [MT 17]), or power. Thus the king's glory consisted in the multitude of his people (Prov. 14:28), but by contrast the glory and pomp of the rebellious people would receive its reward by being banished to Sheol (Isa. 5:14).

The common use of Heb. *kāḇôḏ* to describe human dignity occurs in Isa. 22:23, which depicts Eliakim as a symbol of the splendor and honor of his father's house. References to the glory of nations include the mention of Ephraim (Hos. 9:11), Moab (Isa. 16:14), and Kedar (Isa. 21:16). The species *homo sapiens* was described in Ps. 8:5 (MT 6) as crowned by his Creator with glory and honor because he represented the height of God's creative activity. In Ps. 49:16f. the word *kāḇôḏ* referred to the wealth of a rich man as "glory" without specification as to the means by which that wealth had been acquired. In Sir. 9:11, however, the glory of the sinner that is not to be envied appeared to be wealth obtained by dubious means. A loss of glory occurred when the Israelites were deprived of their sacred ark at the hands of the Philistines (1 S. 4:21f.). By its capture the covenant people lost their most distinctive religious symbol. In Job 29:20 the use of glory most probably indicates selfhood or life, as with certain passages in which *kāḇôḏ* is paralleled with, or substituted for, either *nepeš* or *lēḇ* (cf. Gen. 49:6; Ps. 4:2 [MT 3]; 7:5 [MT 6]; 16:9; 30:12 [MT 13]; 57:8 [MT 9]; 108:1 [MT 2]).

The concept of glory is employed supremely in the OT as a characteristic attribute and possession of God (cf. 1 Ch. 29:11). Because it is pervasive in nature, it is imparted to those persons or objects that come into close association with Him. God's glory implies His power, and consequently Isaiah saw God's self-manifestation in glory as bringing judgment upon human pride and power (Isa. 2:10,19,21). But whatever the consequences, it was through this type of revelation that divine glory became a factor in human consciousness. The earliest account of this phenomenon is in Ex. 33:18-23, where in a personal reminiscence of theophany Moses described his experience, momentary though it was, of God's glory in something resembling physical form. This type of manifestation appeared again, this time in visionary form to Isaiah (6:1-5), who saw the enthroned God attended by seraphim. There is no other indication of what Isaiah saw, or how he recognized the presiding figure as God. The experience of divine glory, however, was undeniable, since it was connected with his prophetic call. The concept of God's glory filling the earth occurs in Ps. 19:1 (MT 2), and is paralleled in Ps. 8:1 [MT 2]; 29:1-3,9; 57:5 [MT 6]; 108:5 [MT 6]; and 113:4.

The manifestation of divine glory was an essential element of the proceedings not merely at the time when the law was given on Mt. Sinai (Dt. 5:24), but also when Solomon's temple was dedicated (1 K. 8:10f.; 2 Ch. 5:14), where the cloud was identified with God's glory. Other cloud manifestations were recorded in Ex. 16:7, 10 (cf. 24:16f.); 40:34f.; Lev. 9:6,23; Nu. 14:21f.; 16:19,42; 20:6. Cf. Sir. 17:13; 45:3. The divine glory that Ezekiel saw was not identified with storm clouds or angelic beings, but was something peculiar to God Himself that exhibited certain human appearances or characteristics (Ezk. 1:28; 3:12,23; 8:4; 9:3; 10:4,18; 11:22f.). In each vision Ezekiel is careful to distinguish between the glory of God and its attendant circumstances.

Isaiah represented faithful Israel as an important aspect of divine glory (Isa. 40:5; 43:7; 60:1f.), which would be manifested by the restoration of the faithful to the land of their ancestors. There the presence of the Lord will bring grace and glory (Ps. 84:11 [MT 12]), and His saving of the remnant causes glory to dwell in the land (Ps. 85:9 [MT 10]). In this respect God's glory carries an ethical significance, relating to the holiness that must always characterize a priestly people (cf. Lev. 11:44). To recognize God's glory is thus to acknowledge Him as the supreme moral ruler.

In the Apocrypha, "glory" is the normal translation of the Greek noun *dóxa*, which generally appears to represent the thought underlying the Heb. *kāḇôḏ*. Glory also refers to human honor and splendor (1 Esd. 1:33; Wisd. 10:14; Jth. 15:9) as well as to the adornment of the temple (2 Macc. 5:16,20). Glory as an invariable accompaniment of God was referred to in 2 Esd. 3:19, where the Sinai theophany was mentioned. The glory of the messianic kingdom was probably being alluded to in 1 Esd. 5:61, whereas an apocalyptic realm inhabited by the saints in glory seems intended in 2 Esd. 2:36; 7:52; 8:51; 10:50. In general, however, the apocryphal use of glory is that of the blaze of light and splendor characterizing the expression of the Lord's holy majesty. Occasionally the term glory is used as a surrogate for deity (cf. 2 Esd. 8:30; 16:53; Tob. 12:15; 13:14; Wisd. 7:25). R. K. H.

In order to grasp the NT significance of *dóxa* it is necessary to survey its role in the LXX. Derived from Gk. *dókein*, denoting in classical usage "think" or "seem," *dóxa* has basically two meanings: opinion (what one thinks), or reputation (how one is thought of by others, how one appears in their estimation). Usually when the word denoted reputation it carried a favorable sense, which opened the way for such meanings as fame and glory. A major shift occurred in the LXX. On the one hand the word ceased to be used for opinion; on the other hand it acquired a cluster of meanings absent from classical usage. Of the 285 occurrences of *dóxa* in the OT, approximately 175 render *kāḇôḏ*. Since *dóxa* could be used legitimately to translate *kāḇôḏ* in the areas of reputation and honor, only a slight step was required to make it a blanket term for rendering other meanings of *kāḇôḏ* that had not belonged to *dóxa* in its classical Greek setting. Once *dóxa* had become established as a translation for *kāḇôḏ* in the sense of majesty or splendor, which was something of a departure from native Greek usage, apparently this was sufficient precedent to go further and employ *dóxa* to ren-

der a whole group of Hebrew words involving the notion of beauty or adornment. This group accounts for more than forty occurrences of *dóxa*. These Hebrew terms include *hāḏār, hôḏ, ṣᵉḇî,* and *tipᵉʾereṯ*. A few additional words were translated by *dóxa,* but in most cases these are restricted to a single occurrence and are of minor significance.

Of greatest importance among the *kāḇôḏ/dóxa* passages are those that portray a manifestation of the deity in terms of glowing light. This acquired force of *dóxa* carries over into the NT and becomes the medium for expressing the uniqueness and sublimity of God.

II. Human and Natural Glory.–As the handiwork of God, nature exhibits a beauty and order that constitute its glory, but God has crowned mankind with glory and honor in a manner exceeding that of the material creation (Ps. 8:5-8 [MT 6-9]). Made in God's image, mankind is set apart to rule over the earth. To the male element has been given a special prerogative of headship within the family (1 Cor. 11:7). Yet in contrast to God and even to the natural order, humans are weak and transient, likened to the grass that perishes (Isa. 40:6; 1 Pet. 1:24). Nevertheless, because the soul outlasts the body, it can be called his glory (Ps. 16:9). Similarly, in Gen. 49:6 "my spirit" is literally "my glory" (Heb. *kᵉḇōḏî*; cf. RSV mg.).

Some people, notably rulers, attain the glory that attaches to high station (2 S. 1:19; Ps. 21:5 [MT 6]). Joseph's exalted rank in Egypt is called his "splendor" (Heb. *kāḇôḏ,* Gen. 45:13). The magnificence of Solomon's reign was widely recognized (Mt. 6:29). The magnificence of royal tombs witnesses that death does not extinguish the prestige thus acquired (Isa. 14:18). The kingdoms of this world have sufficient splendor to serve as inducement in Satan's temptation of Our Lord (Mt. 4:8). A sovereign's military might, as represented by his army, can be designated as his glory (Isa. 8:7). One's wealth and prosperity bear this label also (Heb. *kāḇôḏ,* Gen. 31:1; cf. Isa. 61:6). The same term serves to summarize the beauty and stateliness of Solomon's temple (Hag. 2:3). Glory expresses one's good reputation, the honor in which one is held by one's peers, in contrast to shame or disrepute (Ps. 4:2 [MT 3]; Hab. 2:16). The finer traits of character set apart those who possess them and constitute their glory in the eyes of society (Prov. 19:11). Divine appointment to a position of leadership and responsibility bestows the glory of authority (Nu. 27:20). Scripture warns against conceit (Gk. *kenodoxía,* lit. "empty glory") that is fostered by the lack of perspective that humility can provide (Phil. 2:3; Gal. 5:26; cf. Jer. 9:23). The pride involved in human glory is an offense to God, inviting judgment (Isa. 23:9).

III. Glory of God.–In the ultimate sense, no subject is more important than this. Yet there is difficulty in trying to analyze God's glory because of its many aspects. No facile answer can be given to the question, Wherein does that glory consist? The answer must come in multiple terms. Only then can the comprehensiveness of the concept be appreciated.

Whereas it is the tendency of mankind to seek eminence and recognition, on God's part one finds no trace of ambition or naked claim unsupported by intrinsic worth. His is the right of preeminence by virtue of being God — the Creator, the Redeemer, the All in all. His glory has intrinsic worth and permanence. Through the prophet He announces, "My glory I give to no other" (Isa. 42:8; 48:11). What is involved here is the divine uniqueness, the right to be acknowledged as supreme. This lies at the heart of the biblical concept. In view of His uniqueness, profound indeed is the pathos of Judah's unfaithfulness. "Has a nation changed its gods, even though they are no gods? But my people have changed their glory for that which does not profit" (Jer. 2:11). That glory is personal — God Himself. He occupies a solitary throne that allows no place for a rival. Idolatry disputes this and by so doing invites the revelation of His wrath (Rom. 1:18-25). The attempt to worship what human hands have made is an affront to the deity because it not only repudiates His aseity but also His spirituality, an essential element of His glory (Ps. 106:20).

He does not leave His creatures without witness. The heavens declare the glory of God both by day and by night (Ps. 19:1-6 [MT 2-7]). Likewise the elements, thunder and lightning, are pictured as acting in His service (Ps. 29). His voice is heard in the thunder, His splendor seen in the lightning. In nature God presents in tangible form a demonstration of His own power, beauty, and order. These are ingredients of His glory. Things celestial and things terrestrial exhibit the magnificent tapestry that the Creator has woven into His handiwork (1 Cor. 15:40f.).

The manifestation of the deity by means of light could serve as a reminder that He is the One who brought light into being (Gen. 1:3). But the very intensity of the light on various occasions (Ex. 34:29; 1 K. 8:10f.) betokens something more, namely, the personal presence of One who is greater than His works. In connection with the Exodus God is represented as taking up His station in a pillar of cloud by day and of fire by night (Ex. 13:21), the cloud concealing the mystery of His being and the fire revealing His presence. As the account of the Exodus continues, this phenomenon is associated with the glory of the Lord (Ex. 16:10). What is denoted in both passages is God's might, in the one case designed to stress His protection of Israel and in the other His readiness to judge for their disobedience the very people He has rescued (cf. Nu. 14:10-19). He is the righteous judge as well as the mighty deliverer. This emphasis on the power element in glory reappears in the NT use of the word in connection with God's raising the dead (Jn. 11:40; Rom. 6:4).

When the tabernacle in the wilderness was completed, the glory cloud settled on it, preventing human entrance (Ex. 40:34f.). This was repeated at the dedication of Solomon's temple (1 K. 8:11). Here the emphasis falls on the holiness of God, a significant aspect of His glory (cf. Isa. 6:1-3).

In Ezekiel's prophecy the imagery of the glory of God becomes somewhat complicated (Ezk. 1:1–3:15), but a later vision, this time in Jerusalem rather than by the river Chebar, discloses the glory departing from the Lord's house (10:15-19). This separation of the divine presence from the sanctuary was due to the iniquity of the inhabitants of the city, and parallels the withdrawal of Yahweh into the wilderness after the worship of the golden calf (Ex. 33:3-7). In Ezk. 39:21-29 God's glory appears to be treated as something underlined by His judgment. In the same vein, His glory is revealed not only by restoring His people from captivity and dispersion but also by permitting captivity as a vindication of His righteousness.

A further manifestation of the divine glory emphasizes God's mercy. This provides a balance to the judgmental aspect. When in communion with God on the mount, Moses, weighed down by the responsibility of bringing Israel into the Promised Land, made two requests. "Show me now thy ways" (Ex. 33:13) was a plea growing out of his leadership role. He needed divine wisdom. "Show me thy glory" (v. 18) was a prayer that had its source in a personal longing. He did not have in view the bright cloud in making this request, nor yet the luminous pavement that he and the elders of Israel had seen (Ex. 24:10). Rather, he wanted to know God in His essence. This nu-

ance is captured in the LXX by the rendering of Codex Vaticanus, which has *emphánisón moi seautón,* "Show me thyself," a perceptive rendering and one that is perfectly feasible for *kāḇôḏ/dóxa.*

But if "show me thy glory" is preferred, even so the context compels us to think in terms of internal, invisible factors. God Himself explains the glory in terms of goodness (Heb. *ṭûḇ,* goodliness or beauty), which means, as A. H. McNeile construed it, "a spectacle of outward beauty as a visible sign of His moral perfection" (*Book of Exodus* [*WC,* 1931], p. 215). The self-revelation of the glory continues: "I will be gracious . . . I will show mercy." This is reassuring, for the divine perfection has no existential significance of a positive nature for sinful mankind unless it is accompanied by the welcome adjunct that the Judge of all mankind is actually gracious and merciful. Surely there is a broad hint here that the Creator cannot afford to permit the marring and alienating effects of sin to continue indefinitely. He will accept the challenge so that the original purpose of creation may be realized. His honor is at stake.

Moses could not see God's face (His glory epitomized) but God allowed His goodness to pass before His servant. The glory of God on this occasion expresses His uniqueness, His perfect holiness, and consequently His detachment from the world, but also His deliberate intention to disclose Himself to mankind. This duality in the *kāḇôḏ/dóxa* concept may be illustrated by the veil that separated the holy of holies from the holy place. On the one side it was in contact with the ineffable glory of the most holy One and on the other side with the desperate need of sinful mankind.

God's glory will be most openly displayed in the consummation, whether depicted as a golden age on earth (Hab. 2:14; Isa. 4:5) or given a heavenly setting (Ps. 73:24). This eschatological use is more prominent in the NT than in the OT. The believer rejoices in his hope of sharing the glory of God (Rom. 5:2). It is the goal of the Christian's calling to salvation (1 Thess. 2:12; 1 Pet. 5:10). The New Jerusalem, the future home of the saints, is pictured in terms of radiance and splendor (Rev. 21:10f.). No artificial illumination is needed there, for the glory of God is its light (Rev. 21:23).

The expression "glory to God" in Lk. 2:14 must also be examined. It is the acclaim by the angelic host on the occasion of the birth of God's Son. Clearly it denotes praise. Similarly it becomes an established usage in Christian worship and in the doxologies that are a regular feature of NT letters (Eph. 3:21; Phil. 4:20). Paul cannot resist breaking forth into praise to God as he gives Him credit for the entire sweep of His redemptive purpose — the planning, the execution, and the consummation (Rom. 11:36). To God belongs the kingdom (His right to rule), the power (His ability to rule), and the glory (recognition by His subjects). This doxological use is common to humans and angels alike. It pervades the present age and the age to come.

In the captivity letters of Paul most of the references to God's *dóxa* are related to the gospel, which is something so characterized by the plenitude of wisdom, grace, and power that it reflects more fully than any other work of God the wealth of His glory (Eph. 3:16).

In a few passages the interpretation of glory is uncertain. Paul declares, "All have sinned and fall short of the glory of God" (Rom. 3:23). God's approval in the form of praise is possible here, but this force of the word is rare in Paul except in doxologies. Eschatological glory is unlikely also, although the present tense of the verb could be interpreted futuristically. Some understand here a reference to the image of God imparted at the creation and then lost through sin. According to 1 Cor. 11:7, however, that glory is not wholly lacking now, in spite of sin. Perhaps the best conclusion is that because of man's disobedience he lacks communion with God. He is deprived of access to His presence except as a child of God through faith in Christ (cf. Rom. 5:2).

The meaning of *dóxa* in Phil. 4:19 is not easily grasped. Some (e.g., NIV) take "in glory" to mean glorious, but this is somewhat awkward. Glory may be a synonym here for heaven, indicating that the divine resources will prove ample to meet the needs of God's pilgrim people.

In 2 Pet. 1:17 the "Majestic Glory" is probably best understood as a surrogate for God Himself.

IV. Glory of Christ.—By virtue of being the Son, Christ shares the glory of God (He. 1:3), not merely as a reflection but as the manifestation or radiance of that glory. Through Him the knowledge of God's glory (His essential being) is made available to mankind (2 Cor. 4:6). Before the world was created He shared that glory in fellowship with the Father (Jn. 1:1; 17:5).

The Incarnation made it possible for those with spiritual understanding to discern His glory, which consisted in being the unique Son of God, full of grace and truth (Jn. 1:14). The divine nature loses nothing of its essential character by being yoked with humanity, and the human nature is not so overshadowed by the divine as to cease to be truly human. This glory could be seen (apprehended) by true believers.

Jesus' humanity veiled the glory of oneness with the Father (Jn. 10:30) but the signs that He wrought manifested a phase of His glory, the divine power that He possessed (Jn. 2:11; 11:40-44).

On only one occasion did His inherent glory break through the veil and become visible, and then only to a select group of disciples on the mount of transfiguration (Lk. 9:28-36). This disclosure was accompanied by a cloud, the combination serving to provide a linkage with various manifestations in OT times. Coming only a few days after Jesus' solemn declaration about the death that awaited Him, this display was doubtless intended to be a pledge that despite the suffering in store for the Son of man there would be a glorious vindication at His return (Lk. 9:26; 2 Pet. 1:16-19). The splendor was an earnest of the coming of the kingdom of Christ. It is this splendor that makes improbable any attempt to explain the transfiguration as a reading back of Jesus' resurrection glory into His pre-cross ministry, since the reports of the resurrection appearances lack any indication of heavenly radiance such as was seen on the mount.

In view of the distinct separation of Jesus' glory from His suffering in the representations of Scripture (e.g., Lk. 24:26) one is hardly prepared for the emphasis peculiar to one Gospel that links glorification with His death (Jn. 12:23; 13:31). This emphasis can be accounted for in part by the association of the Incarnation and the public ministry (specifically the miracles) with glory. Also, if we look forward from the public ministry to its close, we get the impression that John comprehends the totality of acts that embrace the winning of redemption into one, each phase having its share in the glorification, whether it be death, Resurrection, or Ascension.

Other NT writers make room for the element of glory in Jesus' ministry prior to the Resurrection. James describes Jesus as the Lord of glory (Jas. 2:1). Judging by the context, James is thinking of the great condescension involved in His coming to live among mankind, matching and even exceeding the condescension inherent in the dwelling of God among His people in the Shekinah. Paul

notes that the rulers of this age, by crucifying the Lord of glory, gave evidence of their spiritual blindness, failing to perceive in Him and His mission the wisdom of God that centered in the very cross that took His life. There redemption was secured (1 Cor. 2:8).

The Ascension was anticipated by the Lord Jesus in His request that the Father glorify Him with the glory He had in the presence of the Father before the world was created (Jn. 17:5). In Peter's second address in Acts the apostle affirms that God did indeed glorify Jesus (3:13). A creed-like statement centering on Our Lord concludes with the words "believed on in the world, taken up in glory" (1 Tim. 3:16). Here the pairing of world and glory suggests that the latter is intended to denote heaven. That the present state of the ascended Lord is one of splendor is suggested by the vision of Stephen (Acts 7:55f.) and by the narrative of the conversion of Saul of Tarsus (Acts 9:3; 26:13).

Christ's resurrection body, which He continues to possess during this age, will be the pattern for the glorious resurrection bodies of the saints (Phil. 3:21). The same truth is suggested by the statement that Christ is a life-giving spirit (1 Cor. 15:45). According to 2 Cor. 3:18, as believers contemplate the glory of Christ they are being transformed into His (moral) likeness in preparation for the bodily transformation of which Phil. 3:21 speaks.

During His earthly ministry Jesus explicitly taught that He would return to this world. The Synoptics unanimously report His declarations of a coming in glory (Mt. 24:30; Mk. 13:26; Lk. 21:27). The certainty of this great event is affirmed in the Epistles also (e.g., Col. 3:4). Of special interest is the statement of the blessed hope of believers as being "the appearing of the glory of our great God and Savior Jesus Christ" (Tit. 2:13). Many gods and lords were honored as divine in the world of the apostolic age (1 Cor. 8:5). Some were hailed as saviors. Caesar was worshiped as lord. The Titus passage amounts to a challenge to the imperial cult. No Caesar returned, but Christians confidently affirm that Christ will honor His promise.

In His great prayer Jesus looked beyond His death, resurrection, and exaltation to the time when His followers would be with Him in the heavenly home. He prayed that they would then behold His glory — surely with greater understanding and appreciation than they had shown in the days of His flesh (Jn. 17:24; cf. 1:14). Meanwhile, as believers await His coming, they unite in praising Him by ascribing glory to Him just as they do to the Father (2 Pet. 3:18).

See also EXALTATION OF CHRIST.

V. Glory of the Holy Spirit.–Peter writes, "If you are reproached for the name of Christ, you are blessed, because the spirit of glory and of God rests upon you" (1 Pet. 4:14). Probably "spirit" should be capitalized here, despite the AV and RSV (cf. NEB, NIV). Otherwise the sense is virtually impossible to grasp. Even when understood of the Holy Spirit, the passage is difficult, as the history of the transmission of the text in the early centuries demonstrates by the emergence of variant readings. The latter half of the verse rather clearly reflects the influence of Isa. 11:2, a messianic prediction. Even as the Spirit rested on Jesus, so He rests on those who belong to Him, a source of comfort and strength when opposition confronts the believer. The glory is the divine presence whether that presence is indicated by a transfigured countenance, as with Stephen (Acts 6:15), or simply by the impartation of inner strength.

The severely limited use of *dóxa* in connection with the Spirit can be explained in the light of His customary role of subordination both to the Father and to the Son. Even so, the dispensation of the Spirit involves glory (2 Cor. 3:8) and His operation within the believer likewise (2 Cor. 3:18).

VI. Glory of the People of God.–In line with the tenor of biblical teaching, the saints do not find reason to glory in themselves but in God who is the fountain of all blessings. David exclaimed, "But thou, O Lord, art a shield about me, my glory, and the lifter of my head" (Ps. 3:3 [MT 4]). He found in God his sufficiency in every situation. This should also have been the confession of the nation Israel, but often this was not so (Jer. 2:11).

Simeon saw in the infant Jesus God's promised salvation, a light for revelation to the Gentiles and for glory to God's people Israel (Lk. 2:25-32). The Savior would be Israel's crowning token of God's favor.

In His great prayer on the threshold of His Passion Jesus made this observation regarding the disciples: "The glory which thou hast given me I have given to them" (Jn. 17:22). Here *dóxa* probably refers to the distinction of being permitted to represent God in the world. The apostles were to carry on the witness that Jesus initiated (Jn. 20:21).

Paul did not shrink from calling the Thessalonian believers his glory and joy (1 Thess. 2:20). He was proud of these people who had made so much progress in the faith in so short a time.

Sanctification is linked with glory in 2 Cor. 3:17-18. The passage has as its background the experience of Moses in his desire to behold the glory of God (Ex. 33). At length, in the Incarnation, the answer to Moses' prayer was given (Jn. 1:14). Even more fully was it given in the glorification of Christ wherein the contemplation of the Lord, mediated by the Spirit, accomplishes an increasing conformity to the exalted Savior. The Spirit is the key to this process, affording liberty to the saints to keep Christ before them and grow up into Him in all things (2 Cor. 3:18; Eph. 4:15). Meanwhile the Christ who indwells the believer by the Spirit constitutes the hope of glory (Col. 1:27), anticipating the time when the veil will not merely be penetrated but removed. The presence of the Lord with His people will be finalized.

This eschatological goal is characteristically described in terms of glory. Though rare in the OT (possibly Ps. 73:24, but cf. the NEB), the allusions in the NT are fairly numerous. Christ's earthly mission results "in bringing many sons to glory," a clear reference to heaven (He. 2:10). The future glory is frequently set forth by way of contrast to the present condition of trial and suffering (Rom. 8:18; 2 Cor. 4:17; 1 Pet. 5:10), affording a parallel to the experience of Christ (1 Pet. 1:11). A mark of the finality of this future blessing is the possession of the resurrection body that is portrayed in terms of glory (1 Cor. 15:43; Phil. 3:21). The reward for faithful service will be the unfading crown of glory (1 Pet. 5:4).

VII. Special Uses.–Not to be confused with that use of glory which denotes praise is the specialized expression "give glory to God" in a judicial interrogation (Josh. 7:19; Jn. 9:24). Here it amounts to an adjuration to tell the truth, a reminder that what is said will not escape the attention of the heavenly Judge.

In Jude 8 (cf. 2 Pet. 2:10) the plural of *dóxa* is used in what is evidently a reference to persons, either human dignitaries or angelic beings. The false teachers revile these "glorious ones." Jude's familiarity with apocalyptic imagery is thought by some to favor the identification with angels. However, a good case can be made out for the other view. In the OT *kāḇôḏ*/*dóxa* is used several times in a collective sense of leaders, the noblemen of the nation (Mic. 1:15; Isa. 5:13; etc.). It is possible that in Jude 8 what "authority" expresses in the abstract is then made

concrete by the plural of *dóxa*. The latter term could denote those who stand for truth and decency, whether in society or in the Church, and are for that reason the target of these abusive libertines.

VIII. Theology of Glory.–Something of the significance of this biblical concept can be ascertained by noting the various terms with which it is combined. We have observed the pairing of glory with light and with holiness. Others deserve attention at this point.

Glory is frequently linked with honor. These terms can have both current application and future reference. To some extent they are synonyms, but *dóxa*, "glory," has a wider range of meaning. It is possible to ascribe honor to God (1 Tim. 1:17), but honor is not used of something God has, and it cannot serve to express His being in terms of perfection. As a species of honor, reward is sometimes involved in the use of glory. For example, Paul asserts that "this slight momentary affliction is preparing for us an eternal weight of glory beyond all comparison" (2 Cor. 4:17). Glory is pictured here as an expression of God's appreciation for the faithful endurance of suffering by His servants.

Glory is correlated with life when life is presented from the eschatological perspective. Eternal life is qualitative and is the present possession of the redeemed. But even in John's Gospel, where this emphasis is so strong, life is nevertheless associated at times with the resurrection and the age to come (Jn. 5:28f.; 11:25f.). The same is true in the teaching of Jesus (Mk. 10:30). Paul likewise links life with glory as though they were part of one great experience (Rom. 2:7). In his Captivity Epistles he treats their relationship most precisely (e.g., Col. 3:3f.). Christ dwells in Christians as their life and as their hope of glory. At present their life is hidden with Christ in God. When the Savior comes again, He will still be their life, but then the relationship will no longer be a hidden one. Right at this point Paul introduces the word *dóxa* to express this manifested phase of the relationship.

Quite naturally glory is closely associated with joy. The two elements mingle in the experience of the shepherds at the birth of Jesus (Lk. 2:9f., 20) and in the acclaim given Him at the triumphal entry into Jerusalem (Lk. 19:38), as well as in the Savior's expectation of return to the Father (He. 12:2). Likewise the prospect of future glory evokes in the saints the response of joy (Rom. 5:2; 1 Pet. 4:13; Jude 24).

Fulness *(plḗrōma)* has some affinity to *dóxa*. If Christ has (or is) the fulness of God (Col. 2:9), this could be another way of saying that He has the *dóxa* of God and imparts this to His people insofar as it can be shared with them. What *plḗrōma* expresses under the concept of completeness *dóxa* expresses through its emphasis on power and splendor.

Again, *dóxa* and *pneúma* are intimately related. The believer has the Spirit of Christ as the earnest of full redemption (Rom. 8:10f., 23). His operations are presently confined largely to the inner man, shaping the desires of the heart and molding the life in accordance with the divine will. But eventually His operations will reach the stage of external manifestation, for the "clothing" of the Christian in the eternal state is described as a "spiritual" body (1 Cor. 15:44). Whereas Christ as *pneúma* effects a present glory in His people (2 Cor. 3:18), He will accomplish a corresponding communication of external, bodily glory in terms of resurrection. Throughout these operations He is a life-giving *pneúma* (1 Cor. 15:45).

Dóxa as beauty illumines the concept of God. For some, God is little more than an idea. For others, He is conceded to be the Eternal One. But unending existence is scarcely able of itself to enhance the prospects of the saints. Eternity could be a dull experience. But it will not be, for it will involve fellowship with One who is the epitome of all that is good and beautiful in profound depth and ever enlarging revelation of Himself to His people during the coming ages.

In keeping with this prospect we can sense a degree of development in the disclosure of glory during the course of redemption history. In the OT the element of glory is basically concentrated on God. In the NT the glory is shared by the Son of God, yet not in such a way that the glory of the Father is diminished, for He is the end and goal of all things. In the OT the people of God characteristically experience His glory as a matter of seeing, whereas in the NT the glory is shared with believers on the basis of their relationship with the Son. No passage expounds the contrast to better advantage than the Pauline exposition of the two covenants (2 Cor. 3). The old is symbolized by the glory on the face of Moses, a glory that faded. The new is expressed in terms of a glory that is a permanent element and also permits of increasing participation by the saints. External glory marking a dispensation of condemnation gives way to a dispensation of righteousness that is both fixed as a standing (2 Cor. 5:21) and progressing as a state (2 Cor. 3:18). This work of the Spirit in the area of glory is a species of realized eschatology.

Finally, it is noteworthy that everything and everybody surrounding God is pictured as partaking of His glory — the cherubim of the sanctuary (He. 9:5), the angelic host (Lk. 2:9; 9:26; Rev. 18:1), and the holy city, the New Jerusalem (Rev. 21:11). No darkness (the symbol of ignorance and sin) characterizes the eternal city. The glory of God illumines it continually.

IX. Related Words.–A. Glorious. In the OT various forms of *kāḇēḏ* (vb. or adj.) are so rendered, as are some other terms denoting honorable, splendid, etc. God promises to do marvelous things in the eyes of Israel (Ex. 34:10). Samuel was held in honor (1 S. 9:6) and David also (1 S. 22:14). Glorious things are spoken of Zion (Ps. 87:3).

In the NT the adjective *endóxos* is used only four times, including a description of the works of healing wrought by Jesus (Lk. 13:17) and concerning the Church in the future as the bride of Christ (Eph. 5:27). More frequent is the use of the noun *dóxa* in various constructions that are capable of being rendered adjectivally. The gospel is glorious (1 Tim. 1:11), as are the resurrection body of the Savior (Phil. 3:21) and the future liberty of the children of God (Rom. 8:21). Occasionally such an adjectival rendering of the noun by translators is open to question, as when the RSV pictures the Lord at His return as seated on "his glorious throne" (Mt. 25:31). This calls attention to the throne rather than to the majesty of the One who occupies it. Here the AV ("throne of his glory") is preferable.

B. Glory (vb.). Used in a favorable sense this can mean to exult, as in the psalmist's injunction, "Let the righteous rejoice in the Lord, and take refuge in him! Let all the upright in heart glory!" (Ps. 64:10 [MT 11]). Occasionally the favorable and unfavorable connotations are juxtaposed (e.g., Jer. 9:23f.). In the preponderance of passages the force of the word is "boast," and modern versions tend to substitute this term for "glory."

Paul answers his detractors at Corinth by allowing himself to boast of his labors and sufferings in the service of Christ (2 Cor. 11:21–12:13). Yet he is aware that such boasting is valuable only for shutting the mouths of the opposition. The kind of boasting that needs no apology is boasting in the Lord (2 Cor. 10:17) and in His cross (Gal. 6:14). Secondarily the apostle considers it legitimate to boast on occasion in his converts (2 Thess. 1:4).

C. Glorify. Various situations involving God's action in judgment have had the result that He was glorified, presumably because He demonstrated His holiness and power in the face of those who acted unrighteously or rebelled against Him (Lev. 10:3; Ezk. 28:22; 39:13). At other times He is represented as acting on behalf of His people Israel to restore and transform them, with the result that He is glorified, i.e., that He is seen in the loveliness of His person and fidelity to His purpose (Isa. 60:21; 61:3). When God delivers His people out of their troubles, He expects them to glorify Him with appropriate praise and thanksgiving (Ps. 50:15).

On occasion the miracles of Jesus caused the assembled crowds to glorify (praise) God for the results achieved (Mt. 15:31; Mk. 2:12). His teaching in the synagogues of Galilee led to His being glorified (praised) by all (Lk. 4:15).

Of the fourteen occurrences of *doxázein* in the Synoptics, one refers to the desire of men (hypocrites) to be glorified by their fellows (Mt. 6:2). Only one involves praise rendered to Jesus (Lk. 4:15). The remaining instances record ascriptions of praise to God. On these occasions the Savior made no complaint that He was being overlooked. The Servant-Messiah would not have it otherwise.

In the Fourth Gospel the glorification of the Lord Jesus receives much more attention than in the Synoptics, but not in detachment from corresponding praise to God the Father. The purpose of it is that the Father may be glorified in the Son (Jn. 14:13). An additional emphasis in some cases is the inclusion of the redeemed in the acknowledgment of the Father. Since the Son has glorified the Father by accomplishing the work the Father has given Him to do (Jn. 17:4), it is fitting that those who belong to the Son should glorify the Father by their fruitful works (Jn. 15:8).

The Epistles have a modest contribution to make on this subject. Believers are enjoined to glorify God in their bodies (1 Cor. 6:20) and in the exercise of spiritual gifts (1 Pet. 4:11). By a daring use of language Paul asserts that those whom God has called and justified he *has* also glorified (Rom. 8:30).

D. Glorification. This form occurs once (1 Cor. 2:7). The allusion is apparently to the experience of full and final glory on the part of the redeemed in contrast to what is reserved for the rulers of this age who rejected Christ (v. 6).

GLOSSOLALIA. *See* TONGUES, GIFT OF.

GLUTTON; GLUTTONOUS [Heb. *zālal*–'squander, be frivolous'] (Dt. 21:20; Prov. 23:20f.; 28:7); AV also RIOTOUS (MEN); NEB also RIOTOUS, GREED, GREEDY, WASTREL; [Gk. *phágos*] (Mt. 11:19; Lk. 7:34); [*gastḗr*] (Tit. 1:12); AV BELLY. In Dt. 21:20 and Prov. 28:7 the term may mean a prodigal or squanderer. The term "glutton" was applied to Jesus because of His freedom from the ascetic life-style of John the Baptist (Mt. 11:19; Lk. 7:34). Fasting was not an appropriate form of behavior when the Kingdom was being manifested in the works of Jesus (cf. Mt. 9:14f.). Gk. *gastḗr* means literally "belly," but is used figuratively here of gluttony.

W. L. WALKER
N. J. O.

GNASH [Heb. *ḥāraq*] (Job 16:9; Ps. 35:16; 37:12; 112:10; Lam. 2:16); NEB GRIND, GROUND (Ps. 35:16); [Gk. *brygmós*]; (Mt. 8:12; 13:42, 50; 22:13; 24:51; 25:30; Lk. 13:28); NEB GRINDING.

The Heb. *ḥāraq* occurs always in connection with *šēn*, "tooth" (or its plural). That it means "gnash" or "grind" (the teeth) is supported by other Semitic cognates (Syr. *ḥ^{e}rēq* [pael] may mean either "sharpen" or "gnash teeth"; postbiblical Heb., Aram. *ḥrq*; Arab. *ḥaraqa*). In four of the five occurrences the gnashing of teeth is a malicious gesture with which the wicked taunt the righteous ("gnashing the teeth at . . ." in Job 16:9; Ps. 35:16; 37:12), in one instance accompanied by railing and hissing (Lam. 2:16). Ps. 112:10 suggests that this action may also be one of despair or envy. (The LXX translates each occurrence with *brýchō* [*toús odóntas*], a Gk. vb. used initially by Hippocrates to connote "gnash" [i.e., as symptomatic of chills; see *TDNT*, I, 641].) The same Greek verb appears once in the NT with the very same form and sense. In Acts 7:54 the reaction of Stephen's adversaries is one of malice bent on destruction: "Now when they heard these things they were enraged, and they ground their teeth against him" (*ébrychon toús odóntas ep' autón*). This gesture on the part of Stephen's tormentors corresponds so closely to that of the psalmist's adversaries in Ps. 35:16 that it suggests deliberate allusion.

The Gk. *brygmós* is a cognate of *brýchō* and is in all seven occurrences found in the formulaic statement *ekeí éstai ho klauthmós kaí ho brygmós tṓn odóntōn*, lit. "there will be weeping and gnashing of teeth" (RSV "There men will weep and gnash their teeth"). In both form and sense this now differs markedly from the OT (and other Greek) usage mentioned above. This saying of Jesus describes the state of those who through their own faithlessness have in effect placed themselves outside the Kingdom (i.e., in the "outer darkness" [Mt. 8:12; 22:13; 25:30], in the "furnace of fire" [Mt. 13:42, 50], or "with the hypocrites" [Mt. 24:51]). Contrary to the usual OT pattern there is here no sense in which "the gnashing of teeth" is a gesture of malicious taunting. Rather, significantly always coupled in this phrase with "weeping" (*klauthmós*), it is symptomatic of the desperate hopelessness of such a status beyond the Kingdom. (1 En. 103:8 features this place of darkness as a place of grievous judgment for sinners; cf. 2 En. 40:12; Ps. Sol. 14:6; 15:11.)

The phrase *brygmós tṓn odóntōn* occurs also in the Apocrypha (Sir. 51:3 [Gk. text only]) in the usual OT taunting sense. The NT use of the phrase statistically appears to be peculiarly Matthaean, but the lone exception (Lk. 13:28) makes that uncertain. In Mk. 9:18 the verb *trízō*, "grind" (+ *toús odóntas*), expresses one of the manifestations of a seizure — the youth "grinds his teeth."

Bibliography.–BDB, p. 359; B. Schwank, *BZ*, 16 (1971), 121f.; *TDNT*, I, *s.v.* βρύχω, βρυγμός (Rengstorf). D. G. BURKE

GNAT [Heb. **kēn*, pl. *kinnîm*] (Ex. 8:16-18 [MT 12-14]; Ps. 105:31; Isa. 51:6); AV LICE, "in like manner" (Isa. 51:6); NEB MAGGOTS; [Gk. *kṓnōps*] (Mt. 23:24); NEB MIDGE.

The third plague of Egypt (Ex. 8:16-18; Ps. 105:31) was brought about through gnats (*kinnîm*) and not "lice" as rendered by the AV, which follows Josephus *Ant.* ii.14.3 [300] and the Talmud, a tradition without linguistic basis.

The precise species of gnat is difficult to identify. The most common suggestion is that it was the *barghaš* midge (*Chironomidae*), a tiny gnat barely visible to the eye, but according to Philo and Origen its sting caused a most painful irritation of the skin. This gnat is said to creep into the eyes, nose, and ears. The Heb. *kinnîm* of Ex. 8:16-18 is probably derived from the Egyptian *chenemeś*, meaning "gnats" or "mosquitoes." It has also been supposed that the insect could be the dengue fever-carrying sand fly (*Psychodidae*) or the malaria-carrying Anopheles mosquito. But it is more likely that the fourth plague (Ex. 8:20-24) refers to such larger flies or mosquitoes.

Isa. 51:6 is problematic. The AV, following the LXX, reads "in like manner" for Heb. *kᵉmô-ḵēn*. But this Hebrew expression is redundant and of questionable sense. Thus *kēn* is usually either taken as the sing. of *kinnîm*, or the text is emended to read the pl. (cf. *BH*). There is no textual evidence for such a change, however, and the sing. of *kinnîm* should be *kinnâ/kînnâ* (cf. postbiblical Hebrew/Aramaic). Thus it seems that either *kēn* is an anomalous form, or a slight textual emendation is necessary (cf. also J. Reider, *ZAW*, 12 [1935], 270f.).

The hapax legomenon *kōnōps* in Mt. 23:24 is believed to designate a "gnat" or "mosquito," though Aristotle employs this word for a certain worm found in wine (*Historia Animalium* v. 19). A typographical error crept into the AV and RV that read "strain at." It should have been rendered "strain out" as in the RSV and NAB or "strain off" as in the NEB. Jesus' accusation that the Pharisees drink water through a straining cloth to avoid swallowing an insect regarded as unclean, but meanwhile swallow a camel, emphasizes the contradiction between the scrupulous observation of the smallest detail of every religious rule and the disregard for weightier and more essential matters (Mt. 23:24).

IX. Modern Gnosticism

Gnosticism was a heresy far more subtle and dangerous than any that had appeared during the early years of the church. It became so widespread that by the beginning of the 3rd cent. A.D. most of the intellectual Christian congregations throughout the Roman empire were to some degree infected by it. Except perhaps in 1 Tim. 6:20, where Paul warned Timothy against "what is falsely called knowledge [*gnōsis*]," it is not mentioned in the NT. The leaven was at work, however, and very soon its baneful influence became only too apparent. In the 2nd cent. the movement "spread with the swiftness of an epidemic over the Church from Syria to Gaul" (Law, p. 26). It is not easy to give a proper and complete account of this potent anti-Christian influence, for Gnosticism was not a homogeneous system of either religion or philosophy, but embraced many widely diversified sects holding opinions drawn from a great variety of sources.

I. General Definition.—"Gnosticism," according to Gwatkin, "may be provisionally described as a number of schools of philosophy, oriental in general character, but taking in the idea of a redemption through Christ, and further modified in different sects by a third element, which may be Judaism, Hellenism, or Christianity. . . . The Gnostics took over only the idea of a redemption through Christ, not the full Christian doctrine, for they made it rather a redemption of the philosophers from matter, than a redemption of mankind from sin" (II, 20).

James Orr viewed Gnosticism as "the fantastic product of the blending of certain Christian ideas . . . with speculations and imaginings derived from a medley of sources (Greek, Jewish, Parsic; philosophies, religions, theosophies, mysteries) in a period when the human mind was in a kind of ferment. . . . It involves, as the name denotes, a claim to *'knowledge,'* knowledge of a kind of which the ordinary believer was incapable, and in the possession of which 'salvation' in the full sense consisted" (*Early Church*, p. 71).

Neander, a Greek philosopher of the 2nd cent., described Gnosticism as "the first notable attempt to introduce into Christianity the existing elements of mental culture, and to render it more complete on the hitherto rather neglected side of theoretical knowledge; it was an attempt of the mind of the ancient world in its yearning after knowledge, and in its dissatisfaction with the present, to bring within its grasp and to appropriate the treasures of this kind which Christianity presented" (*Antignostikus*, Intro., 199).

Gnosticism accordingly comprehended in itself many previously existing tendencies; it is an amalgam into which quite a number of different elements have been infused. A heretical system of thought, at once subtle, speculative, and elaborate, it endeavored to introduce into Christianity a so-called higher knowledge, which was grounded partly on the philosophical creed in which Greeks and Romans had taken refuge consequent to the gradual decay and disintegration of their own religions, partly, as will be shown, on the philosophies of Plato and of Philo, and still more on the philosophies, theosophies, and religions of the East, especially those of Persia and India.

Though usually regarded as a heresy, Gnosticism was at first not really such; it was not the perverting of Christian truth but instead came from outside. Having worked its way into the Christian Church it then became intensely heretical.

II. Revived Interest in Gnosticism.–In recent times several original Gnostic writings have been discovered such as *Pistis Sophia,* written in Coptic and discovered in Egypt. A most important find was made in 1896 when a codex containing the *Gospel of Mary,* the *Apocryphon of John,* and the *Sophia of Jesus Christ,* all of them Gnostic, was discovered in the same country. Strangely enough, it was not published until 1955.

A more valuable discovery was made in 1945 by some peasants near the little town of Nag Hammadi in Upper Egypt. They found a large jar containing a collection of Coptic Gnostic books and documents dating from the 4th cent. A.D. Altogether there were forty-eight treatises — Gnostic gospels, epistles, etc. They were found near the site of one of the monasteries founded by Pachomius *ca.* A.D. 320, at Chenoboskion, and it is suggested that instead of calling them the Nag Hammadi Library they should be called the Chenoboskion Library. This exceedingly valuable collection, with the exception of one volume, the *Gospel of Truth,* is in possession of the Coptic Museum in Cairo. The *Gospel of Truth* (tr. and ed. by K. Grobel, 1960) was the first to be published. This book is thought to be by Valentinus or one of his contemporaries. It is thus of great importance as it gives a clearer idea than ever before of the views of the original Valentinian Gnostics — the most erudite Gnostic sect. Hitherto only the representations of later generations of Valentinians were known among whom the views of the founder had become adulterated.

With the examination of a large amount of new Gnostic literature, and the possibility of further important finds, the study of Gnosticism is probably about to enter upon a new phase when its origins, teachings, and developments will be better understood. While we are indebted to people like J. Doresse, R. M. Grant, H. Jonas, and R. M. Wilson for their careful examination of the new situation that has arisen, nothing has so far been brought to light that has shaken the main conclusions of authorities on Gnosticism at the beginning of this century.

See NAG HAMMADI LITERATURE.

III. Sources.–Mansel (p. 32) summed up the principal sources of Gnosticism in these three: Platonism, the Persian religion, and the Buddhism of India. To Platonism it owed much of its philosophical form and tendencies. From the dualism of the Persian religion it derived its speculations regarding the origin of evil, and much of what it taught about emanations. To Buddhism, Mansel believed, it owed the doctrine of the antagonism between matter and spirit, and the unreality of derived existence — the germ of Docetism.

A. Alexandrian Philosophy. Alexandrian philosophy endeavored to unite Greek philosophy and Hebrew religion. PHILO JUDAEUS, the great Jewish commentator of Alexandria (1st cent. A.D.), had tried to interpret the Jewish Scriptures by the aid of Greek philosophy, to expound the OT in terms of Platonic thought, and to discover allegorical meanings where they were not intended. Philo drew a sharp line between God and the material world: with him God cannot exert any action upon the world of matter except through intermediate agencies, the Jewish angels and the heathen demons. While Philo, like the gospel, said much about the Logos, his conception was very different. For him the Logos was merely an impersonal power of God, although He is the only firstborn of God, the chief of the angels, the viceroy of God, and the representative of mankind (*see* LOGOS).

According to Philo the creation of the universe was a gradual molding out of matter; thus evil arose. He also taught the preexistence of the soul, which is now imprisoned in the flesh. To secure salvation, therefore, mankind must break the thraldom of the flesh and rise by a sort of ecstasy to the immediate vision of God. It is clear that the various Gnostic sects were deeply indebted to Philo.

B. Zoroastrianism. The Zoroastrian or Persian system was based on the assumption that there existed two original and independent powers of good and evil, of light and darkness, Ormuzd (Ahura-Mazda) the wise Lord, and Ahriman (Angra-Mainyu) the wicked spirit. These powers were believed to be equal and each supreme in his own domain. The earth, which was created by Ormuzd, became the battlefield of the two powers. Ahriman led away the first man and woman from their allegiance to Ormuzd, and all evils to mankind resulted. From some angles Gnosticism might be regarded as a combination of spirit and matter; this combination could have resulted in its pessimism and asceticism.

C. Buddhism. Mansel's view that Gnosticism owed a great deal to the Buddhism of India has been strongly opposed by the greatest authorities. At the same time it is difficult to escape the conclusion that the hopelessness of the East and the intense asceticism so characteristic of India must have exercised a profound influence upon Persia, Iraq, and Syria in the early ages. It is now well known that ideas then spread with surprising rapidity, and while Gnosticism may not have owed a direct debt to Buddhism it was certainly influenced indirectly.

R. M. Grant proffered the theory that Gnosticism had its rise chiefly in the disillusionment and pessimism engendered among the Jews by the overthrow of their apocalyptic-eschatological hopes through the destruction of Jerusalem in A.D. 70 and the events following. This thesis is much too simple and does not take cognizance of all the complicated factors. A. M. RENWICK

D. Dead Sea Scrolls. The discovery of the Dead Sea Scrolls, beginning in 1947, opened up a new discussion of the origins of Gnosticism. In some respects there was more confusion than clarification, for the words "know," "knowledge," and "secret" were used, often in a prooftext methodology, to argue that the Qumrânians were "Gnostics." At the same time, the discussion evoked a number of studies that pointed toward, if they did not completely support, certain conclusions. These may be summarized as follows: (1) Zoroastrian origins of Gnosticism have been overstated; (2) Hellenistic Gnosticism — the type best known and most frequently discussed — almost certainly had an earlier and possibly non-Hellenistic basis; and (3) so-called Jewish Gnosticism, lacking at least one of the basic elements of true Gnosticism, namely cosmological dualism, must be clearly distinguished from Gnosticism. In this last category should be included the "Gnostic" elements of NT writings, since they sprang from Judaism rather than from a non-Judaic Hellenism.

(1) A number of scholars have argued strongly for a Zoroastrian background for the Qumrân sectarian beliefs. K. G. Kuhn, for example, wrote: "This Gnostic structure of the new text [i.e., Qumrân materials] can scarcely have sprung up from Jewish tradition — there the presuppositions for it would be lacking; while they would be genuinely present in this sect. But it agrees surprisingly with the original preaching of Zoroaster, and thereby is set forth anew the old question of the Parsee influence on Judaism" (*ZTK,* 47 [1950], 211). But this statement is not supported by what is known about Zoroastrianism. Zoroaster was born *ca.* 569 B.C. (E. Herzfeld, *Zoroaster and His World* [1947], I, 19, 29). The religion named after him underwent subsequent change. The dualism of Zoroastrianism passed from an ethical dualism in the Gathas (the earlier poems, generally attributed to Zoroaster) to a cosmological dualism in the later writings. According to

Herzfeld (p. 316), the doctrine that Ahriman is the creator of evil is not found until 1500 years after Zoroaster — a date, of course, much too late to be the source of ideas in either the NT or Qumrân literature. It is to be admitted that the forces that led to the development in Zoroastrian doctrine were at work for some time before the doctrine appeared in the Parsee scriptures. This, however, raises a further question: were such ideas indigenous to the Parsees, or did they come from outside this religion? If from outside, then we must still look for a possible common source of such ideas that may have been influential in Judaism, at least to the extent that it can be found in the DSS and/or the NT.

The suggestion, sometimes presented as an affirmed conclusion, that there is a true dualism in Qumrân must also be challenged. Careful study of the doctrines expressed in the DSS will lead to the conviction that the underlying philosophy was monistic. The God of Israel is creator of all beings and things, including evil and the beings connected with it. God "made Belial" (1QM 13:10f.). The angelology and satanology of Qumrân are basically that of Judaism. The dualism of Qumrân is ethical rather than cosmological.

(2) The Qumrân studies led a number of scholars to conclude that the rise of Gnosticism must be placed two or more centuries earlier than had been commonly held. Elements of Hellenistic Gnosticism have been found, as will be discussed below, in the Fourth Gospel, Colossians, and elsewhere in the NT. Critical scholars of the past have sometimes dated such portions of the NT in the middle of the 2nd cent., since they could find no earlier traces of Gnosticism. But with the advent of Qumrân studies, this was changed. Some scholars were dating the Fourth Gospel to the first half of the 1st cent. (e.g., W. F. Albright). Terms such as "pre-Christian Jewish Gnosticism" were used, and the term "Hellenism" was expanded to include non-Hellenistic ideas (cf. O. Cullmann, *JBL*, 74 [1955], 213-226). Other scholars protested against the confusion created by calling such pre-Gnostic non-Hellenistic concepts by the name "Gnosticism" (cf. W. S. LaSor, *Dead Sea Scrolls and the NT* [1972], p. 92 n. 5; R. M. Grant, ed., *Gnosticism: An Anthology* [1961]). The fact remains, however, that something like Gnosticism is found in the Judaism of the 1st cent. B.C. and 1st cent. A.D., and possibly earlier. More precise definition of terms is needed, and exegesis of the Qumrân, NT, and gnostic texts must be more carefully controlled. It is not satisfactory to seize upon a few key words, such as "knowledge," "mysteries," and "secrets," or to speak of "dualism" without further qualifying it, and to label the result "Gnosticism." The texts from Nag Hammadi must also be brought into the discussion. But once again, the methodology must be to recognize that these texts are later, and therefore the earlier elements that they contain must be carefully separated from the later developments that characterize them.

(3) Jewish "Gnosticism" likewise needs more carefully controlled study. It can be readily admitted that the concepts of Satan, angels, the two "spirits," and related ideas are more fully developed in Qumrân than in the OT. It can also be admitted that similar ideas and doctrines can be found in the NT. But the "mysteries" or "secrets" spoken of in Qumrân literature are clearly defined: they are to be found in the Jewish Scriptures (the Christian OT), as interpreted by Qumrânian exegetes. The Qumrânians were sectarian Jews — but they *were* Jews, and they drew their theology, anthropology, pneumatology, and eschatology from the OT. Other influences were and had been at work on them and their predecessors. It is part of the Judeo-Christian system to consider the God of Israel as using even the thoughts and acts of pagan peoples to shape the thoughts and actions, and even the destiny, of His own people. Nevertheless, the Judaism of Qumrân, like that of Christ and the apostles, is basically monistic. There is only one God, and beside Him there is none other. He is the Creator and Sustainer of all things visible and invisible. The gods of the nations are nothing — and the same could be said of the Demiurge and the emanations of Gnosticism or its ancestor. There is a kingdom of evil, headed by Satan (or Mastema or Belial), and there is a struggle within every person between the spirit of light and the spirit of darkness. But in Qumrân, as in the NT, the outcome is never in doubt. This is not an eternal struggle. In Qumrân, Michael at last overcomes the leader of evil, just as in the NT Jesus ultimately overcomes Satan. Further studies of "Jewish Gnosticism" are needed, but nothing will be gained by obscuring the clear distinctions between "Jewish Gnosticism" and the Gnosticism that developed in the Hellenistic world after the 1st cent. A.D.

The two essential elements of Gnosticism are (a) cosmological dualism consisting of matter and spirit, the one evil and therefore not created directly by a good spirit, and the other good; and (b) esoteric knowledge, limited to those who are initiated into the gnosis, by which they are able to be "saved," i.e., freed from evil material existence to enter into pure spiritual life. Both elements have seeming relationships with the Judeo-Christian Scriptures. Both, however, come into basic conflict with biblical doctrine. Matter is not evil in the Bible, but is God's creation, and the "new earth" exists in the age to come alongside the "new heaven." The body, likewise, is not evil, and salvation is not an escape from it. There is a resurrection body, as eternal as the soul. Jewish eschatology, like its Christian counterpart, knows nothing of salvation *from* the body, but rather of redemption *of* the body (cf. 1QM 12:9-15). W. S. LASOR

IV. Characteristics.—"Gnosticism," stated Gwatkin, "is Christianity perverted by learning and speculation" (II, 73). The intellectual pride of the Gnostics changed the gospel into a philosophy. The clue to the understanding of Gnosticism is found in the Greek word from which its name is derived — *gnōsis*, "knowledge." The Gnostics claimed to be the elite, the wise, the philosophers, to whom was revealed a secret knowledge which the overwhelming mass of mankind could never know.

To the Gnostics the great question was not the intensely practical one, "What must I do to be saved from sin?" but "What is the origin of evil?" "How is the primitive order of the universe to be restored?" In the knowledge of these and of similar questions, and in the answers given to these questions, lay redemption as the Gnostic understood it.

The following may be regarded as the chief points in the Gnostic systems: (1) a claim on the part of the initiated to a special knowledge of the truth; a tendency to regard knowledge as superior to faith and as the special possession of the more enlightened, for ordinary Christians did not possess this secret and higher doctrine; (2) the essential separation of matter and spirit, matter being intrinsically evil and the source from which all evil has arisen; (3) an attempt to solve the problems of creation and the origin of evil by postulating a demiurge, i.e., a creator or artificer of the world distinct from the deity, and emanations extending between God and the visible universe (the demiurge for the Gnostics being the God of the OT, an inferior being infinitely remote from the Supreme Being who can have nothing to do with anything material); (4) a denial of the true humanity of Christ; a docetic Christology which considered the earthly life of Christ and especially His sufferings on the cross to be unreal; (5) the

denial of the personality of the Supreme God, and also the denial of the free will of mankind; (6) the teaching, on the one hand, of asceticism as the means of attaining spiritual communion with God, and, on the other hand, of an indifference that led directly to licentiousness; (7) a syncretistic tendency that combined certain more or less misunderstood Christian doctrines and various elements from oriental, Jewish, Greek, and other sources; (8) ascription of the OT to the demiurge or inferior creator of the world. Some of these ideas are more obvious in one and some of them in another of the Gnostic systems.

V. Harnack's View of Gnosticism.–Harnack laid the chief emphasis on its Judeo-Hellenistic side. He described well how, when Christianity appeared, an extensive spiritualizing or allegorizing of the OT had already taken place. He maintained that this allegorizing was "the outcome of a lasting influence of Greek philosophy, and of the Greek spirit generally, upon Judaism. In consequence of this, all facts and sayings of the OT in which one could not find his way were allegorized. Nothing was what it seemed, but was only the symbol of something invisible. The history of the OT was here sublimated to a history of the emancipation of reason from passion" (*History of Dogma* [Eng. tr. 1958], I, 223). Harnack's insistence that the Greek element in Gnosticism was the predominant one has been challenged by many eminent scholars. It is obvious, however, that this element was very important, though by no means the only one.

VI. Gnosticism in the Early Christian Church.–The germ of Gnosticism made its appearance in the apostolic age. (On its presence in James, *see* JAMES, EPISTLE OF I.B.4.)

A. Colossians. Much is said of a false teaching, apparently a theosophist doctrine that was alienating Christians in Colossae from the gospel and leading them to worship of angels contrary to the worship of Christ. The esoteric exclusiveness and asceticism of its adherents were injurious to Christian freedom and derogatory to the human body as indwelt by the Holy Spirit. These tendencies were identical with the more fully developed Gnosticism of later days. Already present was the great Gnostic error that God had no connection with matter. From this theoretical basis arose the error that, as sin is inherent in the material substance of the body, the only way to perfection is to punish the body by pain and mortification of the flesh so that the soul may be saved. This ascetic attitude prevailed in many parts of the world, particularly among the pagans of the East, long before the advent of Christianity. The Epistle to the Colossians reveals the existence of ascetic practices inculcated by false teachers. Their words are quoted — "Do not handle, Do not taste, Do not touch" (Col. 2:21). Contrary to Christian teaching, they sought spiritual deliverance by "self-abasement and severity to the body" (Col. 2:21-23). These tendencies were worse later on, for Paul complained in 1 Tim. 4:3 of those who "forbid marriage and enjoin abstinence from foods." Such ascetic practices became very common among Gnostics. Paul set himself to correct these errors among the Colossians by presenting to them the person and work of Christ — Christ the Creator, possessing all the fulness of the Godhead bodily, Christ in whom all matter and all creatures "hold together" (*see* COLOSSIANS II, III).

B. 1 Corinthians: "Knowledge." Even as early as 1 Corinthians Paul rebuked some who claimed to have "knowledge" which others did not possess, a claim the apostle met with stern resistance. They were given to disputing and professed that they "all had knowledge," but it only puffed them up and did not make them sympathetic (1 Cor. 8:1, 7-11). Even if they could "understand all mysteries and all knowledge," this of itself was worthless (1 Cor. 13:2).

C. Pastoral Epistles. In 1 Tim. 6:20f. Paul referred to "what is falsely called knowledge [*gnōsis*]." In 1 Tim. 1:4 he warned against "myths and endless genealogies which promote speculations rather than the divine training that is in faith." Philo had popularized allegorical interpretations of the OT. This, coupled with the teaching of the genealogies of the Gnostic aeons, would leave no place for the Redeemer. The ascetic teaching on marriage and abstention from certain foods was supposed to be most meritorious. Paul condemned it as unnatural and contrary to the constitution of the world (1 Tim. 4:3). Believers must not treat the Creator's good gifts as "common or unclean."

Those who favored unnatural asceticism often fell into the opposite sin of shocking licentiousness. As body and soul are entirely distinct in their nature, the soul cannot be defiled by anything, however carnal and gross, that the body can do. Let the soul go its way on the wings of spiritual thought, and the body indulge its fleshly desires. Such was the reasoning of this class of Gnostics. Many traces of this antinomianism are found in the Pastoral Epistles and 2 Peter and Jude; e.g., Paul warned against the Gnostics in 2 Tim. 3:2-5. They were "lovers of self, lovers of money . . . arrogant . . . unholy, inhuman . . . lovers of pleasure rather than lovers of God; holding the form of religion but denying the power of it." Ignatius of Antioch at the beginning of the 2nd cent. applied somewhat similar words to people in the area to which he addressed his letters.

Though they professed that they knew God, by their works they denied Him, being "detestable, disobedient, unfit for any good deed" (Tit. 1:16). They enticed others into sins of impurity (2 Tim. 3:6f.). Exactly the same kind of charges are made against this class in 2 Pet. 2:12-18 and throughout the vigorous little Epistle of Jude (cf. vv. 4, 8, 11, 19).

D. 1 John. Nowhere is the tendency to Gnosticism more clearly or emphatically condemned than in 1 John, the Epistle of the apostle of love. John referred reprovingly to the "spirit of error" (1 Jn. 4:6); "many false prophets" (4:1); they were "the antichrist" (2:22) and "the deceiver and the antichrist" (2 Jn. 7). Many claimed "I know God," "I abide in Christ," "I am in the light," even when they did not love their brethren on earth, did not obey Christ, and were destitute of love. John showed how the Christ of history is the Christ of experience. "And we know that the Son of God has come and has given us understanding, to know him who is true; and we are in him who is true, in his Son Jesus Christ. This is the true God and eternal life" (1 Jn. 5:20). This knowledge of God and communion with Him are attained not by Gnostic speculation, but by the obedience of faith, the outcome of which is love for one another and a life in which Christians walk even as Christ did. This is the test of Christian profession (cf. 2:7-11; 2:29; 3:10).

Gnosticism was distinguished by an unethical, loveless intellectualism. John described vividly this dry knowledge devoid of love and pity. In Gnosticism knowledge was the supreme end and purpose of life, but Gnostics were left in a loveless state.

On Gnostic principles God could have no immediate contact with matter. Thus the Incarnation was inconceivable, and it was denied that Christ's body was a real body. For John, the antichrist was docetic Gnosticism. John knew personally the historical Jesus; He was the divine Being. "Who is the liar but he who denies that Jesus is the Christ?" (2:22). "Every spirit which confesses that Jesus Christ has come in the flesh is of God: and every spirit

which does not confess Jesus is not of God. This is the spirit of antichrist" (4:2f.).

Again and again John condemned antinomianism, which was so characteristic of certain sects of the Gnostics. "All wrongdoing is sin" (5:17). "No one born of God commits sin" (3:9; cf. 3:4, 7f., 10, which presuppose a situation where false teachers were proclaiming that morals were different so long as a person was "spiritual" through having Gnostic knowledge). (*See* JOHN, EPISTLES OF I.)

E. Revelation: "To Know the Depths." As time went on the Gnostics made greater and greater claims for themselves. A favorite claim was that they alone "knew the depths," and the Ophites in particular claimed this. According to John, the depths which they knew were not of God, but were rather "the deep things of Satan," because their works were so evil (Rev. 2:20-24). (See also R. H. Mounce, comm. on Revelation [*NICNT*, 1977], pp. 105f.)

Mansel (p. 71) and others believed that the NICOLAITANS mentioned in Rev. 2:6, 15 were antinomian Gnostics of the licentious type. While they certainly had the characteristics of this class of Gnostics it would be rash to conclude that they actually belonged to the Gnostic school.

VII. Christian Antithesis.–We now shall summarize briefly the difference between Gnosticism and Christian teaching.

A. God and the World. For the Gnostics God is the ultimate, nameless, unknowable being called the "Abyss." He is perfect, but the material world is alien to the divine nature. How, then, does it come to exist at all? What is the source of its imperfections and evils?

The Gnostic answer is that the FULNESS (Gk. *plḗrōma*) of the deity could flow out in no other way than in emanations or aeons or angels, all of which are necessarily imperfect, the highest of them being more spiritual than the grade immediately below. Of these aeons there is a gradation so numerous that at length the lowest of them is almost wholly corporeal, the spiritual element having been gradually diminished or eliminated until at last the world of mankind and of matter is reached, the abode of evil. In this way the gulf is bridged between God and mankind. The highest aeons approximate closely to the divine nature, so spiritual are they and so free from matter. These form the highest hierarchy of angels, and these with many other grades of angelic hosts are to be worshiped.

In opposition to this view, Christian faith worships God as the free self-sufficient Creator, infinitely good and wise and powerful and holy, the Author of all things, and affirms creation as an incomprehensible fact which is revealed to faith and which rises above the grasp of the understanding (cf. He. 11:3).

B. Evil. The doctrine of evil follows directly from the above account of the relation of God to the world. According to Gnosticism the manifestation of God is possible only through self-limitation on His part, for in His essence God is the unfathomable abyss. Through this self-limitation are evolved, first, the divine powers or attributes, which previously were hidden in the abyss of His being. These divine powers (the *plḗrōma*) become the principles of all further developments of life, which continues to unfold in such a way that its successive grades sink farther and farther from the purity of God. Life becomes feebler the nearer they come to matter, with which at length they blend. Such according to Gnosticism is the origin of evil.

Whenever people are not content with acknowledging evil to be the act of their own free will which has chosen to forsake its absolute dependence upon God, one of two results follows. They either limit the holiness of God, and find the cause of evil in God Himself, thus annihilating all distinction between good and evil — which is monism; or they limit the power of God by granting the existence of an eternal evil power beyond the control of God — which is dualism. In avoiding monism, Gnosticism accepted the dualistic solution, ascribing to evil an eternal self-subsistent nature. As absolute self-subsistence can be affirmed of none but God, the eternally self-subsistent evil of dualism must be God, which it cannot possibly be, because it is not good. Here is the self-contradiction in which dualistic Gnosticism was entangled.

1. Christian Doctrine of Sin. Directly contrary to this is the Christian doctrine, according to which evil is the refusal of the creature to lean absolutely and utterly upon God, on His care and love and upholding grace. Sin is defiance of God; it is moral transgression; its magnitude cannot be exaggerated — it would dethrone God if it could. It has defied His righteousness, holiness, wisdom, and even His grace. It is, therefore, dealt with by God in two ways, either by direct punishment or by redemption, which is effected by the Lamb of God who takes away the sin of the world. The question "What is sin?" is no mere academic or philosophical discussion in which one opinion may be as good as another. "Here, certainly, if anywhere, Christian theology must fight *for our altars and our hearths*" (Julius Müller, quoted in J. Orr, *Sin as a Problem of Today* [1911], p. 6).

2. Sin and the Moral Law. The universality of sin, its persistence, its gravity, its power to destroy and to deprave — these can hardly be exaggerated. To view sin aright, it is impossible to leave out of sight its relation to moral law, to God, and to His kingdom. It is the resolve of the sinful will to make itself independent of God and to renounce His authority. Sin is self-will, false independence, freedom which ends in bondage and misery.

But in Gnosticism sin is something quite different; it is only a physical fact or quality inherent in the body and in matter everywhere. Redemption, therefore, does not consist in the work of Jesus Christ for us on the cross, and the applying of the benefits of that work by the Holy Spirit in the renewal of human moral nature. Redemption is simply each person's efforts to secure emancipation from the flesh — from physical evil.

3. Christ and Redemption. A system of this kind has no need of Christ and leaves no place for redemption in the Christian sense of that term. Redemption in this scheme of thought is not deliverance from sin; it is not removal of guilt and renewal of the mind. It is something quite different. It consists in the restoration of the cosmic order and the illumination of the mind of the select few through knowledge. Christ is not the Savior who saves His people from their sins, and who gives them unceasingly, through union with Himself, deliverance from the power of sin. He is only one of the aeons, though the highest of them. He is an originated being, not God. Thus Gnosticism has no place either for the creation of the universe by God, or for the incarnation and work of Christ. Once the essential evil of matter is granted, the possibility of Christ's having assumed a true human nature is excluded, simply for the reason that the world and human nature are originally and necessarily evil. Thus, as already seen, a form of Docetism is being espoused.

The Christology of the Gnostics assumed two forms. "One class of early Gnostics separated the spiritual being Christ from the man Jesus; they supposed that the Christ entered Jesus at the time of His baptism, and left Him at the moment of His crucifixion. Thus the Christ was neither born as a man nor suffered as a man. In this way they obviated the difficulty, inseparable to the gnostic mind, of conceiving the connection between the highest

spiritual agency and gross corporeal matter, which was involved in the Catholic doctrine of the Incarnation and Passion, and which Gnostics of another type more effectively set aside by the doctrine of Docetism, i.e., by assuming that the human body of Our Lord was only a phantom body, and not real flesh and blood" (J. B. Lightfoot, comm. on Colossians [1900], p. 264). We have already seen how strenuously this doctrine was combated by John and Paul.

VIII. Influence and Development.–Gnosticism is peculiarly (though not solely) the heresy of the 2nd cent. and in itself a proof of the extent to which a knowledge of the Christian faith had, at that early period, penetrated into literary and philosophical circles. Though it is true that Christianity at first influenced chiefly the humbler classes, yet it was not among these that the various Gnostic heresies arose. As Orr has pointed out, it presupposed a speculative bent of mind. Its appeal as a religion of *gnosis* was to intellectuals. Its rise was due to the impact of the gospel of redemption upon the educated classes (cf. Orr, *Neglected Factors*, p. 196).

A. Cerinthus. The earliest Gnostic known by name is Cerinthus, the antagonist of the apostle John. On the authority of Irenaeus, who quoted Polycarp the disciple of John, there is little doubt that the two met in Ephesus. Cerinthus was a Jew who seemed to have stood between the EBIONITES and Gnostics. From the accounts that have been preserved of Cerinthus and his teaching, it can be gathered that he taught that the world was created not by the Supreme God, but by an inferior power; he also taught a docetic theory of the Incarnation. Caius of Rome, a disciple of Irenaeus, recorded that Cerinthus held there would be a millennium of unrestrained sensuality. Dionysius of Alexandria (*ca.* A.D. 260) confirmed this (R. Law, p. 37). There is the testimony of Irenaeus, that the Gospel of John was written to oppose that form of Gnosticism taught by Cerinthus and, before him, by the Nicolaitans. According to Irenaeus, Cerinthus maintained that the world was made not by the sovereign Power but by some inferior being who was ignorant of the supreme God. He taught that Jesus was not born of a virgin but was the son of Joseph and Mary, born after the manner of other people. After His baptism the Spirit in the form of a dove descended on Him, and before His crucifixion the Spirit left Him. Thus, while the man Jesus suffered and rose again, the Christ remained impassible as a spiritual being (cf. Mansel, p. 74).

B. Gospel of John. Some regard Jn. 19:34f. as a personal protest against Gnosticism. After describing the piercing of Christ's side by the soldier's spear, and how "at once there came out blood and water," the apostle adds, "He who saw it has borne witness — his testimony is true, and he knows that he tells the truth — that you also may believe." Other passages seem to be directed against Docetism, e.g., "And the Word became flesh and dwelt among us . . . we have beheld his glory" (1:14). This is, perhaps, the most convincing statement of all (cf. also 4:6 and 20:27). It would be a mistake, however, to hold with Jerome that John wrote his Gospel in response to Gnostic attacks. He had much wider aims.

C. Various Sects. Generally the forms in which Gnosticism appeared varied greatly in different periods. Some departed farther than others from the Christian faith, but even in its mildest form Gnosticism was a danger to the Church.

Some communities, such as the Encratites, laid the greatest stress on the necessity of asceticism; other communities were wholly docetic. The Carpocratians taught the philosophy of Plato. One of these, Epiphanes son of Carpocrates, taught a pure form of communism. Although only seventeen when he died, he was honored as a god. Furthermore, there were impostors of all varieties: magicians, soothsayers, jugglers, and other deceivers, "who appeared using mighty words with a host of unintelligible formulae and taking up with scandalous ceremonies in order to rob men of their money" (Harnack, I, 239), and having even viler purposes.

1. Ophites. These represented the earlier manifestations of Gnosticism and stood for a number of coteries rather than a definite school. Their distinctive ideas were of pagan origin, and they derived their name from Gk. *óphis*, "serpent," which they honored as the highest intelligence. This worship of the serpent was widespread in the ancient world. The Ophite Gnostics held that the creator of the world was an ignorant and imperfect being, Ialdabaoth the Son of Chaos, and that it was a meritorious act when the serpent persuaded Adam and Eve to disobey him. Several Ophite sects, such as the Cainites, altered the Bible's moral standards and chose as their heroes those condemned in Scripture, e.g., Cain, Pharaoh, the men of Sodom, and Korah.

2. Valentinians. By the time of Justin Martyr (*ca.* A.D. 150) Gnosticism was represented by various sects or schools: Valentinians, Basilideans, Saturninians, and Marcionites.

Valentinus was born evidently on the Egyptian coast soon after A.D. 100. He was educated in Alexandria, receiving a thorough Hellenistic education. He moved to Rome *ca.* 136 and worked there for at least twenty years. When he became a Christian is unknown, but for a time he had very close relations with the church in Rome. It is held by some that his character and power were so clearly recognized in the church that he was on the verge of becoming a bishop when his heresy disqualified him. Even his archcritic Tertullian acknowledged that "both as to talent and eloquence he was an able man" (*De praescr. haer.* 30). He has long been regarded as the greatest of the Gnostics — an acute thinker with a touch of mysticism and a philosopher's delight in contemplating things *sub specie aeternitatis* (Gwatkin, II, 36). By common consent Valentinianism has been acknowledged as the most impressive of all the Gnostic systems.

Hitherto scholars had to depend very largely on Irenaeus' *Adv. haer.* (*ca.* A.D. 185) for an account of the work of Valentinus. It is now clear that what Irenaeus took to be teachings of Valentinus were in reality the version of Valentinianism taught by his disciples and successors at least three steps removed from the master. The *Gospel of Truth* makes this very clear (cf. Grobel, ed., Intro., p. 14). It shows that Valentinus must have been the nearest of the great Gnostics whose writings are known to the teachings of the Church. There is little doubt that the *Gospel of Truth* was written either by Valentinus himself or by a disciple who was his contemporary. According to Grobel,

> Deity, far from being a thirtyfold complex à la Irenaeus, consists of the Father, the Son, and the Holy Spirit. "God" as an explicit word . . . occurs twice; once in the most Hebraic passage of the whole work (37:33), and the context leaves us no doubt that the Hebrew-Christian God is meant, God whose will is supreme and who, Himself — not some Demiurge — is the creator of the universe. . . . Several of the other attributes and epithets of God from which the thirty Eons of the Pleroma bore their names in the system of Ptolemy's disciples occur either in transparent Coptic translation or are left as Greek, but they occur *as attributes* and *epithets* of *God*, not as independent mythological per-

sons. There is but one Son, not a whole genealogy of several generations of Eons — the Father's beloved Son (30:31) who pre-existed as the Father's secret, His Word . . . , upon whom he conferred his name, whom the Father revealed, and who thereupon revealed the Father, thus bestowing saving knowledge of Him, salvation (Intro., pp. 21f.).

The difference between this kind of teaching and that given by the successors of Valentinus is amazing. The later Valentinians confound our imaginations with their aeons and their mythological persons — thirty aeons — Bythos and Sige, Word and Life, Horus, Achamoth, etc., so very different from the simple teaching of the original Valentinus.

3. Basilideans. Basilides, an Egyptian like Valentinus, taught at Alexandria during the time of Hadrian (117-138) and was a man of powerful intellect. It is clear that, as in the case of Valentinus, there was an earlier and a later form of Basilidean teaching. Clement of Alexandria and Hippolytus gave the earlier form of the teaching — a form strongly pantheistic and Greek. Irenaeus gave an account of the Basilidean movement as it existed in Gaul fifty years later when it had become dualistic.

A distinctive feature of Basilides' own teaching is that the world is continuously evolved from a *pansperma* or germinal "seed of the world" in which originally all things were potentially contained.

Thus a not-being God made a not-being world of things that were not. From the seed came a triple Sonship, whereof one was light, which flew straight up to the not-being God, whom all things desire. A second was gross, and flew up too, taking the Holy Spirit as wings. The third Sonship (Divine element) needed purification, and remained in the seed. From this seed came forth the Great Archon, in power and beauty inexpressible. Then from the seed arose another Archon, less than the first but inexpressible too. These two Archons subserve the designs of the Supreme. The highest light descends through the successive spheres till it rests on Jesus of Nazareth. The process is complete when the Divine element (Sonship) is finally drawn out from the material and restored to God. Oblivion then falls on lower intelligence -- the great mass of mankind (Gwatkin, II, 52f.).

All this is typical of the varieties with which the Gnostics built up their religious philosophy.

4. Saturninians. The Gnostic leader Saturninus flourished in Syria about the same time as Basilides in Alexandria. He was a disciple of Menander, who in turn is said to have been a disciple of SIMON MAGUS. His views were similar to those of Cerinthus with the mythology much more developed. He was not chiliastic like Cerinthus, but was strongly dualistic and a gloomy ascetic. For him the God of the Jews was only an angel, and the Savior had only the appearance of a body. He condemned marriage as a base adultery and abstained from animal food. The Assyrian church father, Tatian, became a member of this Gnostic sect and exercised very great influence in the Middle East, teaching the usual theory of aeons and the demiurge.

5. Marcionites. Marcion was a native of Pontus, where he was a prosperous shipmaster. He taught in Rome A.D. 140-155. He distinguished absolutely between the God of the OT, who was regarded as merely great, harsh, and rigorous, and the good God of the NT, who was wholly love. He also held to the usual Gnostic Docetism and dualism. He drew up a canon of Scripture that contained only one Gospel (Luke in a mutilated form) and ten Epistles of Paul. He cut out of the Gospel of Luke everything that connected Christ with nature and history. He was a rigorous ascetic, refusing baptism to married persons and using water, not wine, in the Lord's Supper. He was, perhaps, a greater danger to the Church than any of the other Gnostics (cf. P. Schaff, *History of the Christian Church* [1910], II, 482f.).

D. Relation to the OT. All the Gnostics regarded the OT and NT as revelations of two different deities. They looked upon the God of the Jews as far inferior to the Supreme Being, called by them the Abyss. The God of the OT was the creator of the world, often referred to as the demiurge. Some sects regarded him as being altogether alien from and opposed to the supreme God; others considered him merely as a subordinate power, inferior but not hostile to the supreme God and acting as His unconscious organ (cf. Mansel, p. 45).

E. Influence on Theology. The rise of Gnosticism compelled Christian thinkers to face up to and think out the problems of theology. This led to the rise of systematic theology and the anti-Gnostic works of the ancient catholic fathers (of Irenaeus, *Adv. Haer.*, Tertullian, *Adv. Marc.*, Hippolytus, *Ref.*, in particular). Gnosticism also gave a powerful impetus to the formation of a NT canon of Scripture, for the Gnostics claimed to have authoritative gospels and epistles of their own and it was necessary for the Church to distinguish between spurious and genuine Scriptures.

IX. Modern Gnosticism.—The ancient form of Gnosticism passed away completely in the 5th cent., but its spirit has reappeared from time to time in modern days. Gnosticism, as already seen, is not one aspect of thought alone, but many, and it surfaced again and again in one form or another. The denial of Jesus' Virgin Birth, e.g., is related to that form of Gnosticism that taught that the man Jesus became the divine Christ only at His baptism, when the Holy Spirit descended upon Him from heaven.

Aspects of Gnostic teaching are reproduced in modern pantheistic philosophies, and in forms of religious doctrine that deny an objective atonement.

It is easily seen how teaching of this sort strikes at the root of all religion and morality. The personality of God, the personality and free will of human beings, the existence of moral evil, the incarnation of Our Lord Jesus Christ, the redemption He accomplished for the world, His resurrection, the whole significance of His person and His work — all this is denied. This is the spirit of Gnosticism.

A. M. RENWICK

GO. "Go" ("went," etc.) occurs very frequently in Scripture and is the translation of a great many different Hebrew and Greek words. Since the word implies *movement* of all kinds, physical and mental, it has many applications.

I. In the OT.—In the OT Heb. *hālaḵ* is among the com-

monest words, meaning to "go" in its original sense of "walk" but also in the most varied senses — according to the verbal conjugation, the preposition attached, the context, etc. *Hālaḵ* is often used figuratively (translated "walk," etc.) for "live" in the sense of pursuing a way of life, e.g., "walking ever in his ways" (NEB "conforming," Dt. 19:9; cf. Ps. 15:2; 89:30 [MT 31]; 1 K. 2:3f.; 3:3; etc.), and for "die," e.g., "He departed [lit. "went"] with no one's regret" (2 Ch. 21:20). *Bô'*, properly "go/come in, enter" (e.g., Gen. 7:9), is very common, and *yāṣā'*, "go/come out, exit," also occurs frequently, often with the meaning "go forth," e.g., Gen. 8:18, "So Noah went forth" (NEB "came out"). Other frequent words are *yāraḏ*, "go down" (Gen. 11:7; etc.); *'ālâ*, "go up, come up" (NEB "used to rise," Gen. 2:6, etc.; Isa. 15:5, "go it up," AV), used also figuratively for "rise up, surpass" (e.g., Prov. 31:29, AV, NEB, "excel"), "come into mind, be remembered," (Isa. 65:17, NEB "be called to mind"; Jer. 3:16, NEB "think"; etc.); *'āḇar*, "go" or "pass over," "cross" (AV "get over," Dt. 2:13, etc.), also used figuratively for "fall into disuse" (e.g., Est. 9:28; AV "fail"), etc; *šûḇ*, "go again" (NEB "go back," Gen. 43:2, etc.); *nāsaʿ*, "move, go forward, set out" (Ex. 14:15, NEB "strike camp," 19; Nu. 2:24, NEB "march"; etc.); Aram. *ʾazal*, "go" (Ezr. 4:23, AV "went up," NEB omits; Dnl. 2:17; etc.). Many other Hebrew words occur once or twice, e.g., *'āraḥ*, "go" (NEB "chooses to share," Job 34:8); *'āšar*, "walk" (AV "go," NEB "follow," Prov. 4:14; 9:6, AV "go," NEB "grow"); *dāraḵ*, "go" (NEB "walk," Isa. 59:8); *dāḏâ*, "led in procession" (Ps. 42:4 [MT 5], AV "went," NEB "the great"); *rāgal*, "taught to walk" (AV "taught to go," Hos. 11:3).

The AV uses two obsolete expressions in the OT: "go to" (derived from Tyndale) is the translation of *yāhaḇ* (BDB, p. 396; KoB, *CHAL*, *s.v. hab*; cf. Aram. *yᵉhaḇ*), "give," in Gen. 11:3f., 7; 38:16; but "come on" in Ex. 1:10; of *hālak* in 2 K. 5:5, and of the particle *nā'* in Jgs. 7:3; Isa. 5:5; Jer. 18:11 (omitted in RSV; NEB "go"). "Go aside" translates *śāṭâ* (NEB "go astray") in Nu. 5:12 (RSV "go astray"), 19f. (RSV "turn aside"), 29 (RSV "go astray"), and *sûr* in Dt. 28:14 (RSV "turn aside," NEB "turn neither to the right nor to the left").

II. In the NT.–In the NT, Gk. *anabaínō*, "go up," occurs in Mt. 3:16; 5:1; etc.; *érchomai*, "go on," in Mt. 12:9, etc.; *apérchomai*, "go off or away," in Mt. 2:22, etc.; *poreúomai*, "go, travel," in Mt. 2:8, 20, etc. (also used figuratively for "live" in the same sense as Heb. *hālaḵ* [see above] in 1 Pet. 4:3, etc.; *hypágō*, "go away," in Mt. 5:41; 8:32; etc.). Other combinations have different shades of meaning, e.g., *eisérchomai*, "go into," in Mt. 15:11, etc.; *proporeúomai*, "go before," in Lk. 1:76; Acts 7:40. *Ágō* (*ágōmen*) is rendered "let us go" in Mt. 26:46; Jn. 14:31; etc. "Go on" renders *phérō* in He. 6:1, while "go down" renders *epidýō*, "sink," in Eph. 4:26.

The AV uses "go" in several obsolete expressions in the NT: "go to" for *áge* in Jas. 4:13; 5:1 (RSV "come"); "go about" for *zētéō*, "seek" in Jn. 7:19, for *peirázo*, "try, attempt," in Acts 24:6, for *peiráomai* (RSV "try") in 26:21, and for *epicheiréō* (RSV "seek") in 9:29; "go beyond" for *hyperbaínō*, "transgress," in 1 Thess. 4:6.

Bibliography.–*TDNT*, I, *s.v.* βαίνω κτλ. (Schneider); II, *s.v.* ἔρχομαι κτλ. (Schneider); *TDOT*, II, *s.v.* "bô'" (Preuss); III, *s.v.* "halakh" (Helfmeyer). W. L. WALKER

GOAD [Heb. *dorḇān*] (1 S. 13:21); [*dorḇōnôṯ*] (Eccl. 12:11); [Gk. *kéntron*] (Acts 26:14); AV PRICK; **OXGOAD** [Heb. *malmāḏ*–'learn'] (Jgs. 3:31). The goad used by the Syrian farmer is usually a straight branch of oak or other strong wood from which the bark has been stripped, and which has at one end a pointed spike and at the other a flat, chisel-shaped iron. The pointed end is to prod the oxen while plowing. The flattened iron at the other end is to scrape off the earth which clogs the plowshare. The ancient goad was probably similar to this instrument. It could do villainous work in the hands of an experienced fighter (Jgs. 3:31). If 1 S. 13:21 is correctly translated (cf. RSV, NEB mgs.), the goads were sharpened by files.

The term is used figuratively in Eccl. 12:11: "The sayings of the wise are like goads," meaning that they were as effective as goads. The only reference to goads in the NT is the familiar passage, "It hurts you to kick against the goads" (Acts 26:14). It was as useless for Saul to persist in the wrong way as for a fractious ox to attempt to leave the furrow. He would surely be brought back with a prick of the goad. J. A. PATCH

GOAH gō'ə [Heb. **gō'â*–'lowing']; AV, NEB, GOATH gō'ath. (The RSV form is based on the standard analysis of Heb. *gō'āṯâ*, a base form *gō'â* plus the directive *â* suffix, which preserves the original feminine ending *t* [cf. W. Gesenius, E. Kautzsch, A. Cowley, *Hebrew Grammar* (1910), § 90i]. This is the original form reflected in the AV, NEB "Goath.") Part of the restored city of Jerusalem envisaged in Jer. 31:39 and mentioned with the hill of GAREB, extending possibly to the south of the latter and eastward toward the Tyropoeon Valley.

GOAL (Phil. 3:14). *See* GAMES.

GOAT.

I. Terms.–The common generic word for "goat" is Heb. *'ēz* (cf. Arab. *'anz*, "she-goat"; Gk. *aíx*), sometimes used for "she-goat" (Gen. 15:9; 30:35; etc.), also with Heb. *gᵉḏî*, "kid," as *gᵉḏî 'izzîm*, "kid from the flock" (Gen. 38:17), with *śā'îr*, "he-goat," as *śᵉ'îr 'izzîm*, "kid from the flock" or "he-goat," or translated simply "goats," as in 1 K. 20:27, "The people of Israel encamped before them like two little flocks of goats." Next frequently used is Heb. *śā'îr*, literally "hairy" (cf. Arab. *sha'r*, "hair"; Gk. *chḗr*, "hedgehog"; Lat. *hircus*, "goat"; *hirtus*, "hairy"; also Ger. *Haar*; Eng. "hair"), like *'ēz* and *'attûḏ* used of goats for offerings. The goat which is sent into the wilderness bearing the sins of the people is *śā'îr* (Lev. 16:7-22). (*See also* AZAZEL.) Cf. also *śᵉ'îraṯ 'izzîm*, "a female from the flock" (Lev. 5:6). The male or leader of the flock is *'attûḏ*; Arab. *'atûd*, "yearling he-goat"; figuratively "leaders" (Isa. 14:9; cf. Jer. 50:8). A later word for "he-goat," used also figuratively, is Heb. *ṣāpîr* (2 Ch. 29:21; Ezr. 8:35; Dnl. 8:5, 8, 21). In Prov. 30:31, one of the four things "which are stately in their stride" is the he-goat, *tayiš* (Arab. *tais*, "he-goat"), also mentioned in Gen. 30:35; 32:14 among the possessions of Laban and Jacob, and in 2 Ch. 17:11 among the animals given as tribute by the Arabians to Jehoshaphat. In He. 9:12f., 19; 10:4, we have *trágos*, the ordinary Greek word for "goat"; in Mt. 25:32f., *ériphos*, and its diminutive *eríphion*; in He. 11:37 *dérma aígeion*, "goatskin," from *aíx* (see above). "Kid" is Heb. *gᵉḏî* (cf. En-gedi [1 S. 23:29], etc.), fem. *gᵉḏîyâ* (Cant. 1:8), but also *'ēz*, *gᵉḏî 'izzîm*, *śᵉ'îr 'izzîm*, *śᵉ'îraṯ 'izzîm*, *bᵉnê 'izzîm*, and Gk. *ériphos*. There remain Heb. *yā'ēl* (1 S. 24:2, RSV, NEB "wild goat"; Job 39:1, RSV, NEB "mountain goats"; Ps. 104:18, RSV "wild goats"; NEB "mountain-goat"); *'aqqô* (Dt. 14:5); and *zemer* (Dt. 14:5, RSV "mountain sheep"; NEB "rock-goat"). Heb. *yaʿalâ* (Prov. 5:19) is more likely a (female) mountain goat (KoB, p. 389; BDB, p. 418).

II. Origin.–The goat is a hollow-horned ruminant that is lighter and more agile than the sheep. Perhaps the original species from which the Neolithic herds of Mesopotamian domesticated goats came was the Persian wild goat (*Capra aegagrus*), which can still be found in some upland areas of the Near East and the Aegean, as well as in southern Europe.

III. Domestic Goats.–Domestic goats differ greatly among themselves in the color and length of their hair, in the size and shape of their ears, and in the size and shape of their horns, which are usually larger in the males, but in some breeds may be absent in both sexes. A very constant feature in both wild and domestic goats is the bearded chin of the male. The goats of Palestine and Syria are usually black (Cant. 4:1), though sometimes partly or entirely white or brown. Their hair is usually long, hanging down from their bodies. The horns are commonly curved outward and backward, but in one very handsome breed they extend nearly outward with slight but graceful curves, sometimes attaining a span of 60 cm. (2 ft.) or more in the old males. The profile of the face is distinctly convex. They are herded in the largest numbers in the mountainous or hilly districts, and vie with their wild congeners in climbing into apparently inaccessible places. They feed not only on herbs, but also on shrubs and small trees, to which they are most destructive. They reach up the trees to the height of a man, holding themselves nearly or quite erect, and even walk out on low branches.

IV. Economy.–Their flesh is valuable for food and available when neither mutton nor beef can be found. Their milk is drunk or made into cheese and *semn*, a sort of clarified butter much used in cooking. Their hair is woven into tents, carpets, cloaks, sacks, slings, and various camel, horse, and mule trappings. Their skins are made into bottles (Heb. *nō'ḏ*; Gk. *askós*; Arab. *qirbeh*) for water, oil, *semn*, and other liquids (cf. also He. 11:37). According to 2 Ch. 17:11, Jehoshaphat received a gift of 7700 he-goats. From Ezk. 27:21 it appears that Tyre traded with Arabia in sheep and goats.

V. Religious and Figurative.–Just as the kid was often slaughtered for an honored guest (Jgs. 6:19; 13:19), so the kid or goat was frequently taken for sacrifice (Lev. 4:23; 9:15; 16:7; Nu. 15:24; Ezr. 8:35; Ezk. 45:23; He. 9:12). A goat was one of the clean animals (*śēh 'izzîm*, Dt. 14:4). In Daniel, the powerful king out of the West is typified as a goat with a single horn (8:5). One of the older goats is the leader of the flock, reflecting the ancient custom whereby some male goats were trained to be leaders of the flock. Human leaders were typified as such in Isa. 14:9; Jer. 50:8; Ezk. 34:17, 23; and Zec. 10:3.

Goats at Khirbet el-Kerak SE of the Dead Sea (D. Baly)

The scene of final judgment depicted in Mt. 25:32 represented the righteous and wicked in terms of sheep and goats (cf. Ezk. 34:17-22). While it is not unusual for sheep and goats to graze together on mountainsides, they are normally herded into separate folds. A. E. DAY
R. K. H.

GOATH (Jer. 31:39, AV). *See* GOAH.

GOATS' HAIR. The word for goat (Heb. *'ēz*) is used elliptically to mean goats' hair, which was used in the tabernacle furnishings in the form of curtains (Ex. 26:7; 36:14). Spun goats' hair was probably used in the Midianite and Israelite camps in making tent ropes, rugs, provision sacks, and saddlebags (cf. Nu. 31:20). A strip of the cloth rolled up furnished a bolster for the head while sleeping (cf. 1 S. 19:13, 16). Goats' hair cloth is admirably suited to stand the hard usage of a frequently shifting encampment. The Israelites appreciated its utility, even for the tabernacle, where according to most modern standards it would have been out of place, matched against scarlet and fine linen (Ex. 25:4; 35:6, 26).

See also HAIR; WEAVING. J. A. PATCH

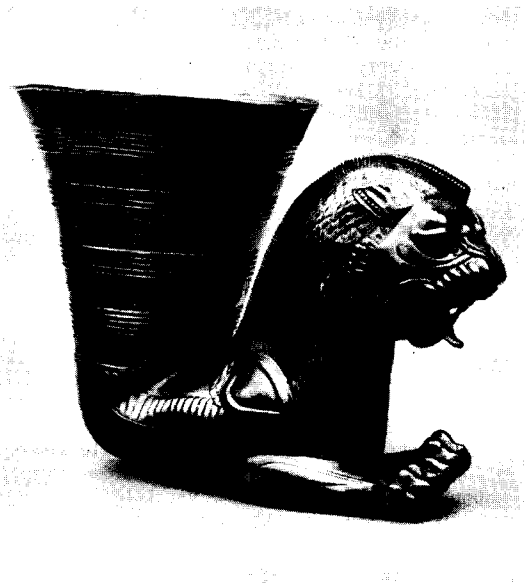
GOATSKINS [Heb. *taḥaš*, *'ôr taḥaš*] (Ex. 25:5; 26:14; 35:7, 23; 36:19; 39:34; Nu. 4:6, 8, 10-12, 14, 25); AV BADGERS' SKINS; NEB PORPOISE-HIDE, mg. "hide of sea-cow"; [Gk. *aígeion dérma*] (He. 11:37).

Taḥaš seems to designate some sort of animal whose skin was used as a covering for the tabernacle, ark of the covenant, and other sacred objects. The LXX understood *taḥaš* to be referring to the color of the skins. Scholars today agree that it refers to an animal, but they do not agree as to which animal. Both "badger" (AV) and "goat" (RSV) lack philological grounds. Arab. *tuḥas*, "dolphin" or "dugong," has been suggested as a cognate, and marine animals such as the dugong have been found in the Red Sea; thus the NEB rendering is possibly correct. But the only other occurrence of *taḥaš* refers to footwear, for which leather was the common material (Ezk. 16:10). *See also* LEATHER.

Goatskins are referred to only once in the NT (He. 11:37), where the wearing of goatskins indicates extreme poverty. Ascetics of various sects in Syria and Palestine, especially of Moslem sects, have frequently worn sheepskins or goatskins as a sign of their renunciation of all worldly things. N. J. O.

GOB [Heb. *gōḇ*, *gôḇ*–'pit' or 'cistern']. The scene of two of David's battles with the Philistines (2 S. 21:18f.). The parallel account in 1 Ch. 20:4f. identifies the place as Gezer, a fortified city with a long history, located 29 km. (18 mi.) NW of Jerusalem in the Shephelah, overlooking the coastal plain.

GOBLET [Heb. *k'lî*] (Est. 1:7); AV VESSEL; NEB CUP. *K'lî* is a very general term which can be used of various sorts of containers and other implements. At the seven-day banquet of Ahasuerus drink was served in golden vessels of different kinds. The quality and variety of these goblets indicated the great wealth of the king.



Gold drinking vessel (*rhyton*) reputedly from Ecbatana (Hamadân), 5th cent. B.C. (Metropolitan Museum of Art, Harris Brisbane Dick Fund, 1954)

"Nestor's cup," found in a Mycenaean grave circle, so called because it resembles the huge goblet described in the *Iliad*. It was hammered from a single sheet of gold and has a bird on each handle at the rim (National Archaeological Museum, Athens)

GOD [Heb. *ʾĕlōhîm, ʾēl ʿelyôn, ʾēl šaddāy, YHWH*; Gk. *theós*].

I. Introduction.–*A. Description.* Descriptions of God are as varied as the religious ideas and experiences of mankind. In principle, however, they may be divided into two classes. On the one hand are those which rest on human apprehension, on the other those which derive from the divine self-revelation. This does not mean that there is not a mediating group. Many descriptions, however inadequate or distorted, may finally spring from the primitive revelation of God whereby His "eternal power and deity" may be understood from the things which are made (Rom. 1:20). Again, many descriptions which derive from the specific self-revelation of God may incorporate elements that come from other sources. Nevertheless, a distinction is still to be made in principle between general religious or philosophical descriptions on the one side and biblical or theological descriptions on the other.

1. General. E. Caird, in his *Evolution of Religion* (3rd ed. 1899), I, 40, 64, offered a very general suggestion that God is "the unity which is pre-supposed in the difference of the self and not-self." H. Spencer (*First Principles*, V [1862], 31) took an equally abstract but more pessimistically agnostic line when he described God as "an inscrutable power manifested in and through all phenomena." (This is, incidentally, a strong confirmation of Paul's argument in Rom. 1:20, which condemns mankind for failing to see the things of God which are clearly manifested in creation.) Equally general descriptions, but with a little more content, are those of M. Arnold ("a power not ourselves making for righteousness"), E. B. Tylor ("spiritual beings"), A. Menzies ("a higher power"), Lotze ("a supersensible being or beings"), H. N. Wieman ("that character of events to which man must adjust himself in order to attain the greatest good and avoid the greatest ills"), and W. Adams Brown ("an unseen being, real or supposed, to whom an individual or a social group is united by voluntary ties of reverence or service," *Christian Theology in Outline* [1906], p. 30). In terms of experience rather than thought, a popular attempt has been made more recently to describe God in terms of the awe or reverence evoked by the sense of the unknown. God is the numinous element, the *mysterium tremendum* (R. Otto, *Idea of the Holy* [Eng. tr., 2nd ed. 1958]), which is not

strictly definable, but which is sensed by all men, whether it be by the religious man in his worship, the poet in his awareness and expression of beauty, or the scientist impressed by the grandeur and complexity of the cosmos. Tillich's "ground of being" (*Systematic Theology*, I [1951], 235, 238) perpetuates the line of metaphysical definition; it is hard to see why something so commonplace should still find enthusiastic adherents, unless it be that human nature will always snatch at the offerings of natural theology.

Apart from their vagueness, such descriptions bear three obvious defects. First, they assume that there is a general category "God" or the "divine" of which the God of the Bible is an example, or perhaps the only example, and in terms of which He then has to be described. Second, they have no specific reference. Dealing with a generalized abstraction, they are themselves abstract. Third, they are thus reduced to the position that either they will have no content or they will take such content as they have from human ideas or experiences, not from God Himself. Thus, they are fundamentally anthropocentric in either the negative or the positive sense. Strictly, they are not descriptions of God at all; they are descriptions of what mankind thinks or senses the divine to be.

2. Specific. In sharp contrast are the specific theological descriptions which take their content from divine self-revelation. It is true that some of these, e.g., in the mediating theology of the 19th cent., are little more than general descriptions. Thus Schleiermacher, in the first edition of the *Speeches* (1799), was even prepared to substitute the term *Universum* for God (anticipating Tillich). Thomasius interjected a little more content with his description of God as the "absolute personality." Others went even further. W. N. Clarke (*Outline of Christian Theology* [1898], p. 66) called God "the personal Spirit, who in holy love creates, sustains and orders all." It is in the great doctrinal statements and credal definitions, however, that the most specific and pregnant descriptions of God are to be found. Melanchthon defined God as "a spiritual essence, intelligent, eternal, true, good, pure, just, merciful, most free, and of infinite power and wisdom." In the Thirty-nine Articles (Art. I) God is "the one living and true God, everlasting, without body, parts, or passions; of infinite power, wisdom, and goodness; the Maker and Preserver of all things both visible and invisible. And in unity of this Godhead there be three persons, of one substance, power, and eternity; the Father, the Son, and the Holy Ghost." The Westminster Confession is similar and even fuller (Art. II): "There is but one only living and true God, who is infinite in being, a most pure spirit, invisible, without body, parts, or passions; immutable, immense, eternal, incomprehensible, almighty, most wise, most holy, most free, most absolute; . . . most loving, gracious, merciful, longsuffering, abundant in goodness and truth, forgiving iniquity, transgression, and sin. . . . God hath all life, glory, goodness, blessedness, in and of Himself. . . . In the unity of the Godhead there be three persons, of one substance, power, and eternity." Descriptions of this kind could easily be multiplied, not only from Reformation and post-Reformation confessions and theologies, but also from patristic, medieval, and Roman Catholic writers.

The chief characteristics of these specific descriptions are as follows. They have no general category of God or the divine which must be described first in broad and comprehensive terms; they have from the very outset a specific reference. They are thus descriptive rather than speculative or abstract. They are theocentric, not anthropocentric; objective, not subjective. From the standpoint of a general definition it might be objected that they are simply defining the biblical view of God, not God. But this is the whole point. They deny that there is an abstract category of the divine. They deny that the biblical presentation is simply the biblical view of God. They claim that God is self-revealed in Scripture and that thus the definitions are not of a "divine," which may take different forms according to different human developments, but of God as He is. They take their content not from general ideas or experiences or aspirations, but from the data of God's self-revelation. Thus they are not definitions of human ideas of God, or of abstractions of God. They are in the strict sense descriptions of God Himself.

B. Knowledge of God. To be able to speak of such a definition it is essential that God be known. But a problem arises here, for God is obviously not in Himself an object of ordinary perception in the way that creation is. "No one has ever seen God" (Jn. 1:18) is not merely a statement of fact. It points to an intrinsic characteristic of God, namely, that in Himself He cannot be seen. He is no doubt an object to Himself but He is not an object to us. All genuine human knowledge, however, is by way of objectivity. It may thus be asked whether there can be any knowledge of God at all, and, if so, whether it will be a knowledge that is so clear and sure that specific definitions can be based on it.

Just as there are general and specific definitions of God, so there are general and specific approaches to the knowledge of God. One approach is that of natural theology and another that of theology based on revelation. To be sure, the distinction is not always clear cut. Much natural theology may be a confused development of the natural revelation to which Paul refers in Rom. 1:20. Again, much theology which is based on revelation makes use of elements taken from natural theology and in varying degrees and proportions and combinations works them into its theological presentation, perhaps as a preamble or supporting argument, perhaps even as a basic constituent. There is nonetheless a plain distinction in principle between the two approaches.

1. In Natural Theology. Natural theology assumes that in some way man can know God of and by himself. One may simply build on one's sense of the numinous; one may face the riddle of the universe and presume that there must be a transcendent cause. One may be conscious that there are powers, not merely of matter but of will and intelligence, beyond oneself and the cosmos. One may see evidences in life or history of a higher ordination or teleology. One may be impressed by the almost universal conviction that there is a divine being or beings. One may appeal to the religious instinct of mankind, the impulse to worship. One may be moved by the existence of an ethical sense, of awareness of an imperative for which there is no apparent basis in human or cosmic reality as such. One may tackle the question philosophically and argue that cosmological, ontological, or teleological considerations demand the existence of God as a first cause, a necessary postulate, or a final telos. One may advance elaborate arguments such as Aquinas's "five ways" or Descartes' ontological argument. In all these ways an idea or experience of God may be evolved which, even though it cannot claim the factuality of empirical knowledge, is not to be dismissed as mere imagination. The God thus postulated or experienced may then be endowed with various attributes, whether by extension of these discerned in the universe or mankind, or by abstraction from them, or by the *via negativa* of their opposites. If a conflict arises, as it will, between the results of such activity, the highest concept may then be selected as at least the nearest approximation to the God in whom one should believe and

whose direction one should obey. In "pure" natural theology the Jewish and Christian views of God will be taken into account along with others. In a mixture of natural and revealed theology a jump will be made at some point from the highest concept of mankind to the God of revelation.

The characteristics of the knowledge of God by way of natural theology are plain to see. It is an anthropocentric knowledge, moving from mankind upward to God. It is a comparative and evolving, or at least changing, knowledge, for different people and groups reach different conclusions, and these conclusions are always open to revision as insights are gained or ideas are found to be groundless. It is an uncertain knowledge, for it has a shifting basis, its data are ultimately subjective, its arguments are all vulnerable, and even its best conclusions are far from adequate. Were it not that natural theology has some remote basis in natural revelation, in the original disclosure of God in nature and conscience, one might even pass the harsh judgment that it can lead only to illusion and confusion, to human ideas about God and not in any sense whatever to God Himself. Certainly, it does lead only to human concepts, though these may contain genuine elements of truth. For this is knowledge with neither the true subject nor the true object. It is knowledge of the Creator in which mankind is the subject and mankind, or the cosmos, the object. God Himself, who ought to be both subject and object, is given a place only as the final deduction. Thus the only truly scientific study that can result from natural theology is comparative religion, i.e., the study of religious ideas, beliefs, and practices. Natural theology has necessarily carried with it the replacement of exegetical and dogmatic theology and is finally the enemy of theology in its strict sense, namely, the study of God.

2. In Biblical Theology. Theology grounded in revelation forms a sharp contrast. It admits from the very outset that it can know God only from and by God. Since mankind is not God, it is not possible to proceed from mankind to God. Since nature is not God, it is not possible to proceed from nature to God. No doubt both these processes were possible before the fall, for then God Himself not only revealed Himself but was truly discerned internally in conscience and externally in nature. But we live after the fall. The invisible things of God are still revealed in the things that are seen, but they are not perceived because man is now vain in his imaginations and his foolish heart is darkened (Eph. 4:18). Left to himself, he now worships and serves the creature rather than the Creator (Rom. 1:20-25). He makes conscience and nature the object of his study and himself the subject, so that it is no longer God who is here speaking to him about Himself. If one is to know not a postulate of God but God Himself, one must learn from a new act in which God is both subject and object. Revelational theology begins with the claim that this act has taken place. It derives its knowledge of God from this divine self-manifestation. *God Himself* makes Himself known. He is the true subject of the act. He teaches what mankind can no longer find out for itself. But God makes *Himself* known. He is also the object of the act. He becomes an object of human knowledge, so that man can have a reference outside himself, so that he can have controlling external data and not just variable internal ideas, experiences, or arguments. This objectification of God involves historical acts which culminate in the incarnation of the Son, so that God's works may be the object of empirical study and even God Himself may be seen, heard, and handled in a historical person and a historical life. It also involves the written documentation of these acts of God, i.e., the records of Scripture, which are given in order that the objective revelation may still be there for those who live in other times and places. It is to be noted, however, that although the revelation takes the form of words, deeds, and records, these data do not merely add to our stock of historical, literary, or religious knowledge. They are data of revelation; God Himself is here the subject and the object of knowledge. The knowledge that may be acquired is truly knowledge of God; God Himself in His self-revelation is its basis.

This knowledge does not begin with mankind — its insights, experiences, emotions, needs, or genius; it begins with God. It is theocentric, not anthropocentric. The data are just as objective for mankind as are the data of natural science or history. The results are not comparative except insofar as there is variation in the exposition of the data. Just as the exact description of, e.g., a tree cannot be compared with abstract subjective conceptions of what a tree might be, so the exact description of God should not be relativized by abstract conceptions of what God might be. The knowledge also has solidity. It is based on the object itself, which provides an unchanging foundation. People may have varying ideas, needs, and experiences in their search for the divine. But here they all come under the constraint of the one object, God Himself. If it be argued that we cannot know that this is a real object, there is, of course, no answer to the absolute skepticism that destroys all knowledge, and in so doing destroys itself. Knowledge of every kind involves a measure of trust, even if it is only the trust that phenomena really are as they appear to be. The knowledge of God also demands trust. It demands commitment to the data presented. Either we learn from God, or we cannot know at all. There can be no knowledge of a nonexistent object. If we are prepared to learn from God, however, we can be quickly satisfied that it is in fact God who teaches us about Himself. And the truth learned rests neither on our perception nor indeed on our choice. It rests on the reality of the God who teaches us, on the data of self-revelation from which we learn.

C. Human Concepts of God. A brief enumeration of the most important human concepts of God may emphasize the biblical witness to the divine self-revelation. The fuller study of these concepts, both in general and in detail, is the proper business of comparative religion or the philosophy of religion, not of theology in the strict sense.

(1) Animism is relatively one of the lowest forms of human belief. It assumes the presence of spiritual beings or disembodied spirits which affect human life for good or ill and which are to be revered or placated. Some attempts have been made to construct an evolutionary ladder of religion with animism as one of the lowest rungs, but this is historically debatable.

(2) Fetishism has been defined as the view that the fruits of the earth, and phenomena in general, are divine, or are animated by powerful spirits (J. G. Frazer, *Adonis, Attis, Osiris* [3rd ed. 1961], p. 234). More specifically, it is the belief that spirits "take up their abode, either temporarily or permanently, in some object... then worshipped" (C. P. Tiele, *Outlines of the History of Religion,* p. 9).

(3) Idolatry occurs when a natural or artistically fashioned object is regarded as the habitation of deity, the artistic workmanship being designed to make it a more adequate representation of the god. The object itself is not strictly the god; it is the abode of the god. Nevertheless, the god is thought to bear at least some similarity to the object (cf. Acts 17:29).

(4) Polytheism is the belief in many gods. It may go

hand in hand with (1), (2), or (3), or it may be independent of them. It involves the worship of many more or less well-defined deities associated with natural objects (e.g., planets or mountains) or people (heroes/heroines), or regarded as pure spirits, and usually symbolized in images which express something of their character. It is clearly understood, e.g., in India or Greece, that the images are not the gods, which dwell in a higher sphere.

(5) Henotheism is a tendency to set one god above the rest, e.g., Zeus in Greece, and perhaps even to confine worship to this one god. Henotheistic or monolatrous tendencies may be perceived in Babylonia, Egypt, India, and China as well as in Greece. This may be due to varied causes such as rational reflection, ethical or personal considerations, sociological or political demands. It may even be due to the surviving influence of an original monotheism, for the idea that monotheism is a higher stage in upward development is not very firmly supported by the evidence.

(6) Pantheism means that the one god is so supreme that he absorbs all the others, who are simply forms of his manifestation; cf. the Indian Brahma. Indeed, this one god absorbs the universe as well, so that the deity is the totality of things (God is all) and the totality of things is the deity (all is God). Pantheism can easily embrace other forms of belief, for if the deity is all things, then he can be worshiped in all things. It can also be adapted to such diverse philosophies as idealism or materialism. In pure materialism, e.g., the cosmos itself may easily be regarded as the eternal and self-existent deity, and an element of immanent teleological direction may be ascribed to it.

(7) Deism restores the element of transcendence. It is belief in a single transcendent being who is the author of the universe but who is so high above that he has no living relation to it. Incipient deistic tendencies may be seen, e.g., in the Greek concept of necessity; but deism came into its own in the horologically inclined 18th cent., which depicted God as the clockmaker who has created and wound up a perfect clock and who now leaves it to tick away happily and irresistibly on its own. The deistic God is a remote and impersonal absentee, and may well be defined in such abstract terms as the first cause, the infinite, the supreme power, etc.

(8) Theism is a more personal deism. Borrowing in many cases from the biblical revelation, it postulates a personal and a more specifically moral relation between God and the world. God is the sole God, as in monolatry or pantheism. He is also the transcendent author of all things, as in deism. But He stands in continuing relation to the world, especially to mankind, so that He can be clothed with personal and ethical qualities. God in His self-revelation does in fact give us the basic materials of theism. It should be emphasized, however, that there is a difference between God Himself and a theistic conception of God. A theistic conception is not a preparatory stage on the way to true knowledge of God. If theism is no doubt the highest and comparatively the truest human concept, it is still a human concept. It is not knowledge.

D. Self-Revelation of God. Attention has been drawn already to the original self-revelation of God in nature and conscience. It is to be noted, however, that this does not form the substance of the biblical presentation. The reason is that sin has blinded the eyes and minds and hearts of mankind to this revelation. Due to the fall, it has become unprofitable. In fact, as Paul pointed out, it serves only to leave sinners without excuse. By virtue of this revelation humans might have known God, but in fact they do not. Restoration of this knowledge now requires a different route which allows for the sin and ignorance of mankind. The story of the Bible is the story of this new self-revelation, which is also reconciliation. It is the story of God's revealing and reconciling action for the restoration of mankind to knowledge and fellowship. Four aspects call for brief mention.

(1) It is revelation in historical acts. God enters human history and both reveals Himself and works out His saving purpose there. The record of this historical intervention is to be found in the biblical narrative from Abraham to Jesus and the apostolic mission.

(2) It is revelation in words which accompany and interpret the action. God speaks to people, telling them what He will do, presenting His own character in His action, making clear what He demands of mankind, interpreting His action as it takes place, and leaving a written record for all future generations.

(3) It is revelation through persons, and supremely in and through the person of the incarnate Son. Patriarchs, prophets, kings, priests, and apostles succeed one another as the people of God in and by whom God works and speaks. But finally God Himself enters the human stage to speak and act in person. He who cannot be seen or heard makes Himself the object of human seeing and hearing. The fulness of deity is present bodily (Col. 2:9) to work out reconciliation and to make God known both by teaching and by action and presence.

(4) It is revelation by the Holy Spirit, who guides the chosen instruments of God, who fills the incarnate Son, who inspires the sacred records, and who bears His accompanying witness, so that the inward eyes and ears of people are opened to the God who is here made known, and reconciliation is brought to its objective fulfillment in repentance and faith.

Two points may be emphasized. God Himself has the initiative and superintends the whole process. He is thus the subject of this knowledge. But God also gives Himself concrete embodiment in acts and words and records, and supremely in the incarnate Word. He is thus the object of this knowledge. In His self-revelation God is known as He presents Himself. He presents Himself in such a way that data are given by which He is accessible to us. He is thus known as the data are assessed and expounded. But by the Holy Spirit He Himself still remains the subject even in this exposition, so that what we have is not just true knowledge about God. It is in the ultimate sense knowledge of God.

II. God in the OT.–*A. Forms of Manifestation.* In the OT various terms are used to indicate the direct action of God in the midst of His people. A certain measure of legitimate anthropomorphism is involved in these terms, but in some cases there can be little doubt that they involve sensual phenomena which indicate the divine presence. The underlying point in each case is that God Himself is present and active in such a way that there may be accompanying knowledge.

(1) Thus we read in many verses of the FACE or countenance (Heb. *pānîm*) of God. The place where He is seen is Peniel (lit. "the face of God," Gen. 32:30). With His face He brings up Israel out of Egypt, and His face goes with them to Canaan (Ex. 33:14, "presence" is lit. "face") and is their blessing (Nu. 6:25f.). Alienation from God is the hiding of (Dt. 31:17), or being hidden from (Gen. 4:14), His face. In these cases face is a metaphorical term for presence.

(2) The voice (Heb. *qôl*) and WORD (*dāḇār*) of God are also media of His action. They may include the direct voice of God, as at the burning bush or at Sinai, or they may be the indirect declaration of His will through the prophets (Isa. 2:1, etc.).

(3) The GLORY of God (Heb. *kāḇôḏ*) is also a phenom-

enon by which the direct presence of God is known. It is like a devouring fire (Ex. 24:17). It fills the tent (Ex. 29:43) and later the temple (cf. Ezk. 10). It is also reflected on the face of Moses (Ex. 34:29; cf. 2 Cor. 3:12-18). The divine glory figures prominently in the visions at the calls of Isaiah and Ezekiel. The glory of God is provoked (Isa. 3:8). In the final sense it fills the whole earth (Isa. 6:3), and this will finally be revealed. Behind the physical manifestation is God Himself, not merely in His transcendent immanence, but in His word and work.

(4) The ANGEL (Heb. *mal'āḵ*) of God or Yahweh is another mode of theophany. In itself the term angel is quite general and might be used for any divine messenger. But in many instances the angel is identified with God Himself in visible and audible form (cf. Gen. 16:7-14; 22:15-18; Ex. 3:2, 4-6), though usually with some degree of differentiation in order to make it clear that God Himself does not have such a form (Gen. 24:40; Ex. 23:20f.). The identity of the angel of the Lord (as distinct from angels in general) has been much discussed, and some scholars have seen here a reference to the Son who was to become incarnate. This is unlikely, however, in view of the role of the angel of the Lord in Lk. 2:9. The angel is the angel of God's presence, and this perhaps helps us to understand better the use of "face" (1) for the divine presence, at least in some instances. *See* ANGEL II.C.

(5) The name (Heb. *šēm*) of God is a common form of manifestation. The name stands for the person and it is also something visible and audible in terms of which He may be revealed and known. God's self-revelation is a proclamation of His name (Ex. 6:3; 33:19; 34:5f.). His servants derive their authority from His name (Ex. 3:13, 15; 1 S. 17:45). To worship God is to call on His name (Gen. 12:8; 13:4; 21:33; 26:25; 1 K. 18:24-26), to fear it (Dt. 28:58), to praise it (2 S. 22:50; Ps. 7:17 [MT 18]; 54:6 [MT 8]), to glorify it (Ps. 86:9). It is wickedness to take it in vain (Ex. 20:7), to profane and blaspheme it (Lev. 24:16). God dwells where He chooses to cause His name to dwell (Dt. 12:11, 21; 2 S. 7:13; 1 K. 3:2; 5:3, 5 [MT 17, 19]; 8:16-19; 18:32). God's name defends His people (Ps. 20:1 [MT 2]; Isa. 30:27). For His name's sake He will not leave them (1 S. 12:22). The point of this emphasis on the name is that God is the specific God who makes Himself known to His people and whose revelation is given concrete expression in the name.

B. Names of God. God bears many names in OT revelation, and since all these names are significant, they are of considerable importance in relation to human knowledge of God. Only a brief survey will be given here; for a fuller account *see* GOD, NAMES OF.

1. General. There are, of course, general names for God, of which the most common is *'ᵉlōhîm*. This word can, in fact, be used for other gods (Gen. 31:30) and even for men (cf. Ex. 4:16; 7:1; cf. BDB, p. 43). This does not mean, however, that God is brought under a general category, for the whole point of OT revelation is that Yahweh is *'ᵉlōhîm* in the strict sense. That is, *'ᵉlōhîm* is finally defined in terms of Yahweh, and all others who bear the name are then brought into relation to Him. The plural form has given rise to much discussion, and various explanations have been advanced, especially an underlying polytheism, a plural of majesty, or even an intimation of the trinity. The derivation is obscure, but the implied sense seems to be that of strength or authority. The singular *'ĕlô(a)h* is found in poetry, mostly in Job. Another general term which occurs some 200 times is *'ēl*. Although not from the same root as *'ᵉlōhîm*, this, too, is a general word for God signifying ultimate supremacy.

2. Qualifying. The name *'ēl* in particular is often qualified in order to bring out the distinctive nature and person of God. God is not just *'ēl*, as in the last resort other gods might be. He is *'ēl 'elyôn*, the "Most High," or *'ēl šaddāy*, "God Almighty," or *'ēl-ro'î*, "a God of seeing" (Gen. 16:13). In addition to these compound forms there are many other qualifying names which bring out particular aspects of God. Thus He is Rock, Strong One, King, Lord, etc. These descriptive names are of great importance. They again make it clear that there is no such thing as God as an abstract concept; God is all these things in particular even though a generic name may often be used. Again, they specifically show that God stands in a personal relationship to mankind. Furthermore, they all indicate that God has the initiative in this relationship. Finally, they are not just poetic attributes; they are all based on actual dealings of God with His people. It is not that mankind has an idea of God and then selects and heaps up suitable epithets. Nor is it that mankind has certain experiences of what he takes to be the divine and then puts these experiences into words. God Himself provides both acts and words. He is this God, whether we experience Him as such or not. He acts and manifests Himself thus. Beside Him there is none else.

3. Personal. In addition to the general names and qualifying names, God also bears a qualifying name that is His OT name par excellence, that characterizes Him as the living God of revelation and reconciliation in a particular way, and that thus comes to have the nature of a proper name. This is the name Yahweh (Jehovah), which consists basically of the consonants *YHWH*, and which is connected in Ex. 3:13-15 with Heb. *hāyâ* ("to be") to give the interpretation "I am that I am," or "I will be that I will be." Several questions arise in connection with this name. The linguistic derivation is undoubtedly obscure. The meaning given in Ex. 3:13-15 can hardly bear the metaphysical sense that has sometimes been read into it, namely, that of self-existence (cf. Aquinas *Summa Theol.* i.2.3), but seems to imply rather the abiding faithfulness of God. Whether the name was already known and used by other groups, e.g., the Kenites, cannot be determined. In any case, its distinctive significance for Israel is undoubtedly given with the theophany at the burning bush. Whether the name was really new to Israel (Ex. 3:13f.; 6:2f.) must also be a matter of conjecture in view of its earlier use in the patriarchal stories. Two possibilities are: (a) that the name had in fact been used but had dropped out during the period in Egypt, or (b) that it was given for the first time with the new step of the divine deliverance from Egypt, and was then quite correctly read back into the earlier stories in order to bring out the continuity of God's saving action through Israel. The alternation of the divine names in the pentateuchal records underlies a good deal of modern source criticism, but the analysis is complicated and there might well be genuine theological reasons for the distinction. The existence of all these questions should not be allowed to divert our attention from the clear implications of the name Yahweh and from its outstanding importance in OT revelation. God is named; this in itself is of the utmost significance. God is not an abstraction; He is the living God. But this Yahweh, who is God, is *'ᵉlōhîm*, the God of creation, the Lord of the cosmos. He is not just a tribal deity like the deities of the nations. Yet He is in fact the God of Israel. He is the God who works in history, the God who has chosen this people as both the first object and the agent of His revealing and reconciling action. As the God of this people He is the covenant God, the God of relationship, the God who establishes a relationship of faithfulness and obedience, the God of a mutual relationship of love. The whole of the OT revelation, and the

whole of the NT revelation as well, is already implicit in these four simple letters which are so puzzling and yet also so luminous and revealing. To say Yahweh is to say God; to say God is to say Yahweh.

C. God in the Preprophetic Period. The revelation of God in the preprophetic period might very well be regarded as the drawing out of the first implications of the name Yahweh both for the divine actions and for the required but sluggish response of the people. Already in the particular stories, the story of the Exodus, the law, the entry into the Promised Land, and the episodes of Judges, the main aspects of God and His word and work may be clearly discerned.

1. God of Israel. From the days of Abraham God is the one who has particularly chosen this family and people to be associated with Him in His action. He is the God of the patriarchs, who led Abraham from Ur to Canaan, who gave him the temporal and the spiritual promise, and who made Himself known in a particular way to Isaac and Jacob. He is the covenant God of Israel, who constituted Himself its King and Lord, manifested Himself to Moses, gave Israel the promise, delivered it in a mighty act of liberation from Egypt, declared to it the law, instituted its cultic life, brought it into the Promised Land, and there executed His righteous judgments and mercies in its relations to the surrounding peoples. This covenant God is the God of sovereignty, election, faithfulness, righteousness, mercy, and love. He is the God of creation, and He rules over the nations according to His sovereign will and power. Yet His sovereignty is the sovereignty of righteousness, and He demands righteousness from His people.

2. Israel's Response. That all the essential characteristics of God are revealed already in the early period admits of little question unless the evidence is readjusted to suit a different theory. It is no less incontestable, however, that then, as now and always, the response of the people moves on a different plane. Not only does Israel revolt against the teachings of Moses and his prophetic successors, but in many different ways, some more explicit than others, inadequate and erroneous ideas and practices are in continual conflict with divine self-revelation. The story of Israel's religion is in fact a very different one from the story of God's own action in self-revelation.

Thus it is evident that for many people Yahweh was just one of many national gods (1 S. 4:8). As such, He was thought to have a geographical restriction, first perhaps at Sinai (Jgs. 5 4), then in Canaan (1 S. 26:19f.). In addition, several superstitious practices continued, e.g., the use of teraphim (RSV mg., 1 S. 19:13, 16), the practice of necromancy (1 S. 28:7-19), and especially worship at the shrines of Baal with all the accompanying cultic ceremonies (Jgs. 2:13; 3:7; 8:33; etc.). Foreign worship was also established in Jerusalem by Solomon (1 K. 11:5-8), and worship of Yahweh Himself was transformed into idol worship, e.g., by Jeroboam with his golden calves (1 K. 12:26-33). Indeed, the setting up of different sanctuaries for Yahweh probably led to His localization, so that for the people He was Himself the equivalent of the earlier Baal. But this is still idolatry and apostasy, for it involves the substitution of a concept of Yahweh for Yahweh Himself; and the prophetic witness is raised up from the time of the judges onward to bear witness to God Himself in the face of all false ideas about God. As a final abomination human sacrifices seem to have been offered on occasion, though it seems to have been mainly in the prophetic period that this became customary (cf. 2 K. 16:3; Jer. 7:31; Ezk. 16:20).

3. Biblical Witness. A naturalistic interpretation of the Bible seizes on these inadequacies in the response of the people and tries to draw from them a scheme of gradual progress to true conceptions of God such as those enunciated by the great prophets from Elijah to the Exile. In fact, however, it is difficult to deduce any such scheme even from the religious data, for at many points it seems as though there is a progressive decline rather than a progressive advance. Even more important, the inadequacies are always portrayed in Scripture as a failure to be taught by the clear revelation which has already been given in word and work. Even through the so-called preprophetic period, and increasingly so in the age of the prophets, the Bible has another strand, that of revelation — the continuing acts and words of God through His chosen leaders and spokespeople. God bears constant witness to Himself, so that there is knowledge of God even in and in spite of the continuing false conceptions, superstitious practices, and blatant idolatries.

He bears witness to Himself in both the acts by which He judges and delivers Israel and the declarations of those whom He raises up to speak on His behalf. He manifests Himself as the God of the whole earth, who overrules, e.g., Syria or Egypt as well as Israel. He displays His power in the deliverance at the Red Sea and also in the great liberations of the judges period. He displays His righteousness in the great declarations of the law, in its administration by Moses, in the promises and threats of the Deuteronomic exhortation, and in the outworking of these threats in the lives of tribes and individuals. He also makes known His faithfulness, both in the great promises of the Exodus and in His refusal to abandon even a rebellious and apostate people. His faithfulness merges at this point into His mercy and grace. He is always ready to pardon His people and to deliver them again from oppression. If God has the sternness of justice and judgment, He has also the tenderness of pity and forbearance. The Davidic Psalms in particular cast a wholly new light on God at this early period. They bring out the intensely personal aspects of His dealings with Israel and Israelites — aspects that are only too easily lost in the lightnings and thunderings of Sinai, in the complicated ritual of the sanctuary, or in the story of the people's superstition and apostasy. God is the personal God of His people, who manifests His goodness to individuals as well as to the nation. One might properly say that all the essentials of the knowledge of God are present from the very first, for God Himself, not just an idea of God, is present from the very first. The task of the later prophets and psalmists is to make these essentials explicit in the varying situations of Israel's history, as God continues to work out His purpose and as the people continue to meet His self-revelation with different degrees of ignorance and apostasy.

D. God in the Prophetic Period. All that is true in the preprophetic period from the patriarchs to the judges and the early monarchy is no less true in the days of the later monarchy, the Exile, and the postexilic period, when the great prophets bore their distinctive witness to God in inspired interpretation of His dealings with Israel and the nations. New facets of God, of His sovereignty and love, were constantly brought out as the people moved more deeply into disobedience, came under catastrophic judgments in the form of defeat, occupation, and exile, and displayed continuing reluctance to walk in faith and discipleship even after their restoration. God was even more vividly self-revealed as the sovereign, righteous, and merciful God, ruling the universe and nations, faithful to the covenant promises to Israel, requiring righteousness of His people, visiting them with drastic judgments for their failures, yet always ready to pardon, to help, to heal, to restore, and to establish where there was penitence and

faith. Indeed, there was a growing realization at this period that God had revealed Himself to be Israel's God, not for Israel's sake alone, but for the sake of all nations, to whom salvation was to be extended and to whom the Servant of the Lord was to be a light and witness.

As noted, this was again a period of widespread ignorance, apostasy, and disobedience. The idolatry and moral decline of the Ahab period were vigorously exposed and resisted by Elijah. The sins and social injustices of the later kingdoms were then graphically depicted and denounced by Amos, Hosea, Isaiah, and Micah. The worship of Israel had become so debased, so divorced from the reality of knowledge and service of God, that it was offensive rather than pleasing to God (Am. 2:6-8; 5:21-23; Hos. 3:1; Isa. 30:22). Prosperity had led to the pursuit of luxury and the spread of licentiousness, and increasing wealth to insatiable rapacity (Isa. 5:8-12). Against a fluctuating but threatening international background, the aggression of Syria and the Philistines, the internecine strife of the kingdoms, the ominous expansion of Assyria and the final upsurge of Babylon, Israel lacked confidence in God and futilely and disobediently resorted to diplomacy and alliances. God was not really accepted as the sovereign and righteous Lord. Profession had become a hollow mockery, sacrifice a sham, prophecy itself a professional business, and the expression of trust an empty self-reassurance.

1. Righteousness. In the face of this deteriorating situation the first prophetic emphasis was on God as the God of RIGHTEOUSNESS both in the sense that He is righteous and in the sense that He demands righteousness. In illustration, quotations could easily be multiplied from all the prophets, whether positively in the form of statements and exhortations or negatively in the form of threats and condemnations. What God requires is that people act justly (Mic. 6:8). He wants "justice [to] roll down like waters, and righteousness like an ever-flowing stream" (Am. 5:24). Zion is to be the city of righteousness (Isa. 1:26f.). Closely associated with the righteousness of God is His righteous judgment, which falls on Israel, too (cf. esp. Amos, Isaiah, Jeremiah, and Ezekiel). But it falls no less on the nations which do not realize that in their victories over Israel they are the rod of God's anger, and that God will bring down similar judgments on their own sins, cruelties, and pride (Isa. 10–13; Ezk. 25–32). Though judgment is collective, God deals with individuals as well. A righteous remnant is preserved (Isa. 4). The children are not to suffer for the sins of the fathers but each is to be individually responsible to God (Ezk. 18; cf. Jer. 31:29-34). Since this cannot always work out in terms of this life and its material blessings, the way is thus opened up for the truth of a final judgment of righteousness that is to come (cf. the problem of Job, the restoration after the Exile, and finally Dnl. 12:1). The final revelation is that righteousness is not just a demand. It is something that is itself revealed (Isa. 56:1), for God Himself is righteousness (Jer. 23:6).

2. Holiness. Closely associated with God's righteousness is His HOLINESS. If the original orientation of holiness is to separation or transcendence, this is increasingly revealed as the separation of the righteous God from sinful mankind. God is high and lifted up in power, majesty, and glory (Isa. 6:1; 8:13). But the real reason why one must shrink before Him is not because one is puny; it is because one is unclean (Isa. 6:5). God's holiness is profaned by the sin of His people. He vindicates His holiness by righteous dealing among the nations (Ezk. 36:23). He is finally sanctified in the obedience of His people (cf. Hag. 2:11-19). If He is the "high and lofty One who inhabits eternity, whose name is Holy," He dwells not merely in the high and holy place, but also with "him who is of a contrite and humble spirit" (Isa. 57:15). The lesson of God's holiness is brought home by ritual requirements. But it is only in popular misunderstanding that this can take the form of taboo or priestly externalism. For the God of holiness is the holy God. Separation for Him is the true holiness which He seeks. To be holy as He is holy is to be righteous as He is righteous.

3. Lordship. In the face of the attacks of the nations God reveals Himself clearly as the LORD of the nations. They are no less under His sovereignty than Israel. He uses them as the instruments of His judgment and mercy. Amos pronounces judgment on all the nations, including Israel (Am. 1–3). Isaiah recognizes that Assyria is the rod of God's anger (10:5), and Cyrus the chosen vessel of restoration (45:1). The gods of the nations are things of nought. Isaiah in particular scorns the idols of Babylon (46:1f.). Yet God's purpose for the nations is also positive. Jonah had a mission to Nineveh, which repented and was spared. Egypt and Assyria are to be won to true faith and worship (Isa. 19:24f.). All nations are to go up to the house of the Lord established on the top of the mountains (Isa. 2:2-4; Mic. 4:1-3). Israel has a holy mission to be God's witness (Isa. 43:10). It is the task of the servant to be a light to the Gentiles, God's salvation to the end of the earth (Isa. 45:6). The earth shall be "full of the knowledge of the Lord as the waters cover the sea" (Isa. 11:9).

4. Unity. This implies that God is God alone, and in His acts and declarations the message that only one God exists is carried to the people. This is the supreme revelation of Isa. 40. God is Creator, King of the cosmos, Ruler of the nations, the Lord to whom past, present, and future are all one. Rival deities are confidently challenged (Isa. 41:21-29); idols are dismissed with contempt (Isa. 44:20, 25). Some of the Psalms make the same point. If God is God of gods, this does not mean that other gods are real. The Lord God omnipotent reigns, and the earth is to rejoice, the multitude of isles to be glad (Ps. 97:1). Idols have mouths, eyes, and ears, but they cannot speak or see or hear (Ps. 115:4-8). God comes, the one God, and He shall judge the whole world with "righteousness, and the peoples with his truth" (Ps. 96:13). This is no new revelation; it is implied in the identity of Yahweh with the Creator. It finds expression in the great confession: "The Lord our God is one Lord" (Dt. 6:4). But it is now driven home with new power and emphasis: "Is there a God besides me? There is no Rock; I know not any" (Isa. 44:8). "I am the Lord, and there is no other" (Isa. 45:5).

5. Faithfulness. If, however, Israel is to be restored and light is to be brought to the Gentiles, then God must exercise His grace and loving faithfulness. God is FAITHFUL to Israel even though it is unfaithful to Him and has come under His judgment. He is like the husband who remains faithful to the unfaithful wife and redeems her when she has fallen (Hos. 1–3). This is the point of the restoration of Israel time and again during its history and supremely after the Exile. Israel has not been faithful, but God has formed it for Himself and therefore He redeems it just the same (Isa. 43:21–44:6). This obviously greatly transcends ordinary loyalty; it is a pardoning loyalty. God's message to Israel is: "Though your sins are like scarlet, they shall be as white as snow" (1:18). "I, I am He who blots out your transgressions for my own sake" (43:25). His dealings even with pagan Nineveh include the sparing of a penitent city, for He is "a gracious God and merciful, slow to anger, and abounding in steadfast love" (Jonah 4:2). This is also faithfulness, for the original covenant promise included the blessing of the nations in the seed of Abraham. It serves to enhance, however, the

sweep and grandeur of the divine forgiveness, for the Gentiles are even further from God than Israel. God's faithfulness is also a saving faithfulness. This is illustrated especially in the deliverance of Jerusalem from the Assyrians and in the bringing back of Judah to new national life after the Exile: "Behold, God is my salvation; I will trust, and will not be afraid" (Isa. 12:2); "I am the Lord your God, the Holy One of Israel, your Savior" (Isa. 43:3). It is illustrated again in the final salvation of the nations: "That my salvation may reach to the end of the earth" (Isa. 49:6). Finally, it is the faithfulness of loving-kindness, of love. Even though Israel is unworthy and sinful, God loves His people. "And the Lord said to me, 'Go again, love a woman who is beloved of a paramour'" (Hos. 3:1). It was out of gracious love that at the very first He chose this foundling child (Ezk. 16:3-5) to be His own bride. Thus, He can appeal to the love of the wilderness marriage, and in the message of the new promise He can declare: "I have loved you with an everlasting love; therefore I have continued my faithfulness to you" (Jer. 31:3). The Psalms in particular are full of this thought of the gracious and loving faithfulness of God. Not only does God surround Israel with the constancy of the mountains (Ps. 125:2), but even when it falls from Him, it can still hope. "For with the Lord there is steadfast love, and with him is plenteous redemption" (Ps. 130:7). Thus He is to be praised for His loving-kindness and for His truth (Ps. 138:2).

6. Salvation Through Suffering. The salvation of the people of God is not without suffering. Already in the OT God is revealed as the one who overrules suffering, and ultimately His own suffering, as a means of blessing. This is apparent in His dealings with the prophets. From Moses down through Elijah to Jeremiah and beyond, the prophets suffer because of their fidelity to God and His message. When judgment falls on the people, righteous Israel suffers along with the guilty. Indeed, it seems at times that the righteous suffer more than the wicked (cf. Pss. 37, 73). Certainly they have the sense that the degree of their suffering is unmerited.

Out of this situation arises the great protest of Job. Yet the book of Job is also a revelation of God's dealings, for it shows that God is staking His own honor on the integrity of His tempted servant, that He is finally with and above Job in all the period of affliction, that out of the suffering He is forging a tested discipleship. The lesson of Job is not just that things will finally be redressed either in this world or in the world to come, though this is also true. The real point is that in a sinful and rebellious world no one can claim exemption from suffering, that God uses even affliction to test and strengthen righteousness, with a final hint that the one who comes through the test can make intercession and atonement for others (Job 42:8). As we learn from the prologue, Job suffered just because of his faith (1:8), and it is finally seen that he served God only for God's sake and not for concomitant blessings (1:9). As the psalmist puts it, "It is good for me that I was afflicted, that I might learn thy statutes" (Ps. 119:71).

Consistently, however, the servant of God suffers for the good of others too. What is hinted at in the case of Job is plainly seen in many of the prophets, whose sufferings were really the sufferings of their people, and who by their sufferings finally brought spiritual blessing to the people at large. This truth of the vicarious power of suffering comes to magnificent expression in the Servant Songs of Isaiah, especially Isa. 53. Here God, the God of grace, loving-kindness, and faithfulness, lays suffering on His faithful and righteous Servant in order that the Servant may bear the griefs and carry the sorrows of others. In imposing this suffering, God imposes the iniquity of us all, so that what seems to be heartless from the standpoint of the Servant is in fact gracious and pardoning love from the wider standpoint of the "all." It pleases God to put the Servant to grief, not in senseless sadism, but in fulfillment of the great purpose of intercession and redemption. Nor is God a mere spectator here, who leaves the burden to be carried by the Servant. For in truth it is He Himself who in the greatness of His love takes up the burden and carries it for His people. The suffering of the righteous, not merely in confirmation of his own righteousness, but on behalf of others, is a token that God Himself suffers, and that it is by His suffering that salvation is finally wrought.

> In all their affliction he was afflicted,
> and the angel of his presence saved them;
> in his love and in his pity he redeemed them;
> he lifted them up, and carried them all the days of old. (Isa. 63:9)

7. Messiah. In fulfillment of His gracious purpose, not merely in the sense of historical deliverance but in the wider sense of salvation, God is to raise up the root of David, the Messiah. Various representations are given, not all of which may originally have had the same figure in view from the standpoint of the authors and readers. The Messiah is the Davidic king who will reign in righteousness (Isa. 9:7 [MT 6]). He is the Son of man who is given dominion, glory, and a kingdom (Dnl. 7:13f.). He is the Suffering Servant, for, while Isa. 53 may have had an immediate reference to some figure of the time, or to righteous Israel, it obviously points beyond these to a deeper fulfillment (Calvin, comm. on Isaiah, *in loc.*; KD, *in loc.*). Thus the Messiah is also to be the one who will gather up the tribes of Israel and be a light to the Gentiles. He is finally the child, the son, who is given the significant name Immanuel, and who bears the tremendous titles "Wonderful Counselor, Mighty God, Everlasting Father, Prince of Peace" (Isa. 7:14; 9:6). The Messiah is in a very direct sense God Himself at work among and on behalf of His people. "Behold, the days are coming, says the Lord, when I will raise up for David a righteous Branch, and he shall reign as King and deal wisely. . . . And this is the name by which he will be called: 'The Lord is our righteousness'" (Jer. 23:5f.).

***III. God in the NT.**–A. Relation to the OT.* The revelation of God in the NT is wholly consonant with His revelation in the OT. While certain terms may be adopted and adapted from current discussion (e.g., *logos*), there is no infiltration of the religious or philosophical concepts of the Hellenistic world. Nor is any attempt made, not even for the sake of the gentile mission, to introduce general theistic proofs of God as a preamble to faith in the God of revelation. Paul certainly claimed that God is the Creator of the earth and the one in whom "we live and move and have our being" (Acts 17:28). But he did not initiate a chain of reasoning that leads from a general concept of God to the God of Christianity. The NT does not deal with ideas or experiences of God any more than the OT. It is a declaration, a self-revelation of God. God Himself tells mankind about Himself; He reveals Himself in word and work. If there is a new feature as compared with the OT, it is that Jesus Christ is this word and work of God. But the element of self-declaration remains the same. The apostles are not preaching the idea of God either as it is found in the OT or as it is advanced by Jesus. They are preaching God Himself, the God of the OT, revealed in Jesus.

This God has all the attributes disclosed and emphasized already in the OT. He is the one God, the Creator of all things, the Lord of heaven and earth, the supreme King of people and nations. He is the covenant

God who has bound Himself to Israel, and through Israel to all nations, and who has thus bound Israel and all nations to Himself. He is the God of grace, faithfulness, mercy, and love. He demands righteousness and exercises judgment. Yet He is also the righteousness and salvation of His people, and He is this supremely in and by righteous and vicarious suffering, the suffering of Jesus. The writers of the NT quoted copiously from the OT. Jesus Himself claimed that He was fulfilling the Law and the Prophets, and He expounded to His disciples in all the Scriptures the things concerning Himself. Both Peter and Paul saw in the NT revelation a fulfillment of the OT covenant and promise (cf. Acts 2:14-36; Gal. 3:7-29; 1 Pet. 1:10-12). The God of Jesus is the God of the fathers. The God of Christians is the God of Abraham, the father of all who believe. No attempt whatever is made to revise or to correct the OT presentation. Nor, in the strict sense, is any attempt made to amplify it. "Thou shalt love the Lord thy God" is the great commandment both in the Law and in the Gospels, and this God is one and the same God: "The Lord our God is one Lord" (Dt. 6:4; Mk. 12:29).

B. God as Father. Yet, while it is the same God who is self-revealed, and while the substance of this self-revelation is not changed, the NT has certain new emphases. The first of these is that God is now more specifically and expressly self-revealed as Father. God is, of course, the Father of Israel in the OT. He pities those who fear Him as a father pities his children (Ps. 103:13). He chastens Israel as a man chastens his son (Dt. 8:5). He calls His son out of Egypt (Hos. 11:1).

In the NT, however, the fatherhood of God is shown to have a far deeper significance. Jesus constantly refers to God as the Father. He is "my Father," "your Father," "the heavenly Father," also the father in the parables. In relation to people generally this implies that He is the author of their being, that He distributes His gifts impartially (Mt. 5:45), that He watches over them with providential care (Acts 14:17), and that He is willing to forgive and restore the disobedient (Lk. 15:18-32). But beyond this, God is in a wholly specific sense the Father of Jesus. Jesus must be about His Father's business (Lk. 2:49, AV). He and the Father are one (Jn. 10:30). He is sent by the Father (Jn. 17:18), and He speaks the words and does the works of the Father (Jn. 14:10). He is loved by the Father and keeps His commandments (Jn. 15:9f.). He is acknowledged by the Father (Mt. 3:17) and disclosed to be the Son of the living God by Him (Mt. 16:17). He glorifies the Father and asks to be glorified by Him (Jn. 17:4f.). He commits His spirit into the hands of the Father (Lk. 23:46) and goes to the Father to prepare a place for His disciples (Jn. 14:2f., 12). All power is given to Him by the Father (Mt. 28:18; Jn. 17:2). He is the only One who truly knows the Father, and no one comes to the Father but by Him (Jn. 14:6). To know Him is to know the Father (Jn. 14:7). He is in fact the only-begotten Son who stands in a unique relationship to the Father (Jn. 3:16; Mk. 1:1; 1 Jn. 4:9f.).

Yet this relationship is in a secondary sense extended also to believers by regeneration or adoption. Believers, too, can call God their Father in a special way. They are the children of God through faith in Jesus Christ (Gal. 3:26). They have received the Spirit of adoption whereby they cry, "Abba! Father!" (Rom. 8:14f.). They are to pray: "Our Father..." (Mt. 6:9). They are heirs with Christ of the kingdom of God (Rom. 8:17). They have the glorious liberty of the children of God (Rom. 8:21). They are assured of a glorious destiny in virtue of their sonship (He. 2:10). Indeed, in a bold phrase it can even be said that they are made "partakers [*koinōnoí*] of the divine nature [*phýsis*]" (2 Pet. 1:4) — so significant is their union with the only begotten Son, and so real is the Fatherhood of God in Him.

C. God as King. Another NT emphasis is on God as the KING, or, more specifically, on the KINGDOM OF GOD. Once again, the basis is to be found in the OT, both in the truth that God is the real King of Israel (1 S. 8:7) and in the promise of the everlasting kingdom which God Himself is to establish (2 S. 7:13; Ps. 145:13; Dnl. 2:44; 7:14). In the NT, however, the kingdom fills the picture in a new way, for the time of temporal foreshadowing and promise now yields before the fulfillment. The kingdom is at hand (Mk. 1:15); it is indeed present (Mt. 12:28; Lk. 17:21). Repentance is demanded in face of it, for entry into the kingdom is only by conversion and regeneration (Mt. 18:3; Jn. 3:3). It is a kingly rule which is not of this world but which is present in this world, which will finally be brought to a great consummation (Mt. 25:31-46) and for which prayer is now made (Mt. 6:10). It is to be sought above all things (Mt. 6:33). It may be compared with the sowing of a seed. As humans sow the seed and wait for the harvest, so the seed of the kingdom is sown and God brings it to fruition (Mt. 13:3-30).

God the Father is the King in this kingdom (Lk. 12:32). He it is to whom we pray for the coming of the kingdom (Mt. 6:10). Yet Jesus is also King. He is to come in His kingdom (Mt. 16:28). As Judge, He is also King (cf. Mt. 25:31-46). He accepts the title "King" from Pilate (Jn. 18:37). The kingdom is present among people because He Himself, the King, is present among them, and it will come in manifest glory when He Himself comes again in power. Already He claims the allegiance of people as King, and the day is coming when every knee shall bow before Him and every tongue confess that He is Lord (Phil. 2:10f.). The kingdom may thus be related both to God and to Christ (Eph. 5:5). Christ subdues all things to Himself; but at the end He delivers up the kingdom to God, even the Father, that God may be all in all (1 Cor. 15:24-28).

D. God as Love. That the kingdom is a kingdom of LOVE as well as righteousness is a reminder that the love of God also receives a new emphasis in the NT. Here again there is no innovation. Quotations could easily be accumulated from the OT to show that the God of Israel is declared supremely to be a God of love. The idea that a stern OT God stands in contrast to the merciful and loving God of the NT is a travesty hardly deserving notice. Indeed, the NT itself in no way minimizes the emphasis on the righteousness of God, on the severity of His judgment. God is no feeble sentimentalist. The revelation of the gospel, of God's righteousness in the gospel, is also a revelation of the wrath of God (Rom. 1:17f.).

Nevertheless, the NT is primarily and finally gospel; and the revelation of righteous wrath only serves to enhance the revelation of justifying righteousness (Rom. 3:21-26). What is intimated largely in type and promise in the OT is brought to full and clear expression in the word and work of the NT. The central declaration of the NT is that God loves. He loves the Son (Jn. 5:20). He loves believers, for they are accepted in the Beloved (Eph. 1:6). In the Beloved, however, God also loves the world. This is why He sent the Son into the world (Jn. 3:16f.). The love of God in Christ is fully manifested as an initiative of grace, the initiative intimated already in Hosea and ultimately in the whole of the OT. God commends His love toward us "in that while we were yet sinners Christ died for us" (Rom. 5:8). Love is not "that we loved God but that he loved us" (1 Jn. 4:10). This love involved the achievement of reconciliation by the self-offering of the Son, i.e., by His dying for us, laying down His life for

sinners. In full actualization of the gracious and saving involvement of God in the afflictions of His people, He became the atonement for our sins and reconciled us by His death and passion. God was prepared to go to the extreme length of love by causing His righteous Son to be the Suffering Servant who poured out His soul an offering for sin, the Lamb of God who bore the sin of the world.

God loves also in the sense that He pours His love into our hearts by the Holy Spirit (Rom. 5:5). He evokes the responsive chord of love so that we love Him as He first loved us (1 Jn. 4:19). So fully is love a divine perfection that in the last analysis one may go even further than the statement that God loves or that God is loving, and say quite categorically that "God is love [*agápē*]" (1 Jn. 4:8, 16). This is not, of course, a metaphysical identification. It could not be reversed and made into the abstraction that love is God. That God is love implies at once words and works of love, for God is the living as well as the loving God. The fact remains, however, that love is of the very essence of God. "His nature and His name is love" (Charles Wesley).

E. Christ as God. These NT emphases are all striking and significant. Yet they are not in the last resort the genuinely new thing in the NT declaration. The genuinely new thing is that all that can be said of God is also said of Christ. In Christ is fulfilled the messianic prophecy of the King, the Son of man, the Servant, the Immanuel, in whom God will be directly present and active among and on behalf of His people. But this active presence goes beyond the previous activity of God in and through chosen leaders and messengers. Jesus Himself comes with an immediacy of authority far above that of the prophets or even of Moses, as may be seen supremely in His use of the "I am." He quotes Ps. 110 to show that, even as David's son, He is also David's Lord (Mt. 22:44). He claims that all power is given to Him in heaven and on earth (Mt. 28:18). He endorses the confession of Peter that He is the Son of the living God (Mt. 16:17), and by His answer to the question of the high priest He makes it plain that He is indeed the Christ, the Son of God (Mt. 26:63f.).

The apostolic witness brings this identification out in terms which could hardly be more explicit. The risen Christ is exalted at the right hand of God (Acts 2:33). He is the incarnate Word who in the beginning was with God and was God (Jn. 1:1, 14). He is the express image of God, the One by whom all things hold together (Col. 1:15-20). In Him dwells all the fulness of the Godhead bodily (Col. 2:9). Hebrews, comparing Jesus with angels, demonstrated from the OT that He is the Son who is begotten of the Father, whose throne is for ever and ever, and who in the beginning laid the foundation of the earth (He. 1:1-13). As kingship, power, righteousness, and love belong to God, so they belong with the same fulness to Christ. God was in Christ reconciling the world to Himself (2 Cor. 5:19). In the vision of Rev. 21 the new Jerusalem has no temple, but the Lord God Almighty and the Lamb are the temple; and there is no sun or moon, for "the glory of God is its light, and its lamp is the Lamb" (v. 23). Christ is Himself "the Alpha and Omega, the first and the last, the beginning and the end" (Rev. 22:13). The name Immanuel, which had previously indicated the fact of God's presence, is now brought to its most literal fulfillment, for God is directly with His people in Jesus. Christ Himself is God. *See also* JESUS CHRIST.

F. Spirit of God. Less fully, yet hardly less plainly, the Holy Spirit is declared to be God. It is not just that the NT refers generally to the spirit of God, as the OT does. Nor is it merely that God Himself is Spirit (Jn. 4:24), though this is an important declaration which sums up in a simple phrase what has been implicit from the very first. Beyond this the NT speaks of the Holy Spirit in a distinction-in-unity from the Father and the Son. The Holy Spirit is the Comforter "who proceeds [*ekporeúetai*] from the Father" (Jn. 15:26), who is given by the Father (14:16) and sent by the Son (16:7), and who plays His own distinctive role in the divine work of revelation, reconciliation, regeneration, and redemption. (*See also* HOLY SPIRIT.) Hence trinitarian formulae already begin to appear in the NT. Baptism is to be in the name of the Father, Son, and Holy Spirit (Mt. 28:19). The fellowship of the Spirit is associated with the love of God and the grace of Christ (2 Cor. 13:14). If grace and peace are from the Father and the Son (1 Thess. 1:1, etc.), the gospel comes in the Holy Spirit (1 Thess. 1:5f.). The new birth is of God, Christ came by water and blood, and the Spirit bears witness, so that one who has eternal life from God in the Son has also the witness in oneself (1 Jn. 5:1-12). Father, Son, and Holy Spirit all have their part in the outworking of the one divine purpose of sovereignty, righteousness, and love.

The self-revelation of God as Himself a trinity of persons with a divine life of inner relationship is a distinctive element in the NT witness. The intimations of it in the OT take on new significance in the light of the fulfillment. The OT makes no express declarations. Nevertheless, it should be noted that no change in essential testimony is involved. God has not suddenly become different, so that after all we are still in the sphere of shifting human concepts or experiences. All that is said of God in the OT is still said of God in the NT. The only point is that it is now said of the Son and the Holy Spirit as well as of the Father. Even the unity of God is still maintained with vigor. Jesus Himself repeated the Shema: "The Lord our God, the Lord is one" (Mk. 12:29). Paul insisted that the God who justifies the circumcision by faith and the uncircumcision through faith is one Lord (Rom. 3:30). In respect of idol-meats he stated that to us there is but one God, and if he added that there is one Lord, Jesus Christ, it was not to set a second God alongside the first (1 Cor. 8:6). There is one God and Father of all (Eph. 4:6).

The Word was in the beginning with God, but the Word is not alongside God, for the Word is God (Jn. 1:1). No suggestion of polytheism is to be found in the NT, and tendencies in this direction were always sharply resisted in the early Church when it tried to grapple with the trinitarian question. There is one God; and the Father, the Son, and the Holy Spirit is God. In other words, the one God is not an isolated and abstract monad. He has His own rich life in which the Father loves the Son, the Son loves the Father, and the Holy Spirit is the bond of love (cf. Augustine *De trin.* v.11; vi.5).

How this can be said, and what it implies, is to involve not only conflict with Judaism, which will not agree that this is the self-revelation of God, but also much doctrinal effort and contention in the Church. But the fulness of Christian belief is that, quite irrespective of the element of mystery, this, too, is part of what God has revealed concerning Himself in His revealing and reconciling word and work, so that knowledge and exposition of the true and living God must also be knowledge and exposition of God in His triunity, the one God -- Father, Son, and Holy Spirit.

GOD, ASCRIPTIONS TO. The term "ascription" is borrowed from ecclesiastical nomenclature and is used to identify some of the ways in which God is referred to or addressed. It does not appear in the Bible with this meaning. Grammatically, an ascription to God is an adjectival clause that comes after, or stands in place of, the divine name, as in "Our Father, who art in heaven," or "God who said, 'Let light shine out of darkness.'" Although easily identifiable as a literary form and significant for biblical interpretation, ascriptions have not received the scholarly attention afforded other forms.

  A. OT
  B. NT
    1. Forms
    2. Types
    3. Distribution and Function
III. Significance
  A. Literary and Form-Critical
  B. Theological

I. Ascriptions in Nonbiblical Religious Literature.–As early as the 25th cent. B.C. religious writers used ascriptions to specify aspects of the nature, location, or function of their gods that were not specified in the divine names themselves. For example, an Egyptian text from this period addresses a god as the "Eye of Horus, who art glorious, unharmed, and youthful in peace." Nine centuries later, Egyptians referred to "Ptah who is upon the Great Throne ... who made all and brought all gods into being." Similar elaborations on the divine names are found in the religious literature of later Hittites, Akkadians, Assyrians, Jews, Greeks, and Syriac-speaking Christians.

II. Biblical Uses.–A. OT. Ascriptions to God appear in many books of the OT, especially in the Pentateuch, the later chapters of Isaiah, and Psalms. Some examples are: "I am the Lord your God, who brought you forth out of the land of Egypt" (Lev. 25:38); "your God, who pleads the cause of his people" (Isa. 51:22); and "the God who gave me vengeance" (Ps. 18:47 [MT 48]). The Aramaic portions of Daniel, Ezra, and Jeremiah also contain divine ascriptions, each offering some specific aspect of God's nature or function.

B. NT. 1. Forms. Most English translations of NT ascriptions to God are adjectival clauses beginning with the pronoun "who," as in "God who," "the Father who," "the Lord who," "He who," etc. The original Greek forms of these ascriptions appear in two basic grammatical constructions, using either a relative pronoun and a verb (e.g., *toú theoú hós hikanósen hḗmas*, "the God who has qualified us") or a participle (*ho pémpsas me patḗr*, "the Father who sent me").

2. Types. Like earlier religious literature, the NT contains ascriptions that (1) assert God's existence (Mt. 6:6a); (2) locate God in a place, usually heaven (5:16); (3) attribute a quality to God (Lk. 1:49); and (4) describe an activity of God (1 Cor. 4:4).

3. Distribution and Function. Among the Gospels, Mark has only one ascription (11:25; v. 26 is a repetition) and Luke only four (1:49; 9:48; 10:16; 12:5). Matthew has twenty-nine, over half of which simply locate the "Father ... in heaven." John has thirty-two, seventeen of which are spoken by Jesus to identify the "Father who sent me," a theme in keeping with this Gospel's unique christological emphasis. The repetition of these highly stylized ascriptions in Matthew and John strongly suggests that they were used in liturgical contexts.

Paul was by far the most prolific and creative user of ascriptions. In the first four Epistles, he referred to God forty-six times in this way. Not at all interested in merely making an assertion about God's existence or location (see II.B.2 above), and only slightly concerned with ascribing some static attribute to the divine (only Rom. 1:25; 9:5; 16:25; 2 Cor. 11:31; Gal. 1:5), Paul was most eager to express a wide range of God's activities (type 4 in II.B.2 above; forty-one occurrences).

A list of some of the Pauline ascriptions shows how the apostle saw God at work on cosmic, social, and personal levels. He referred to God as the One who justifies (Rom. 3:30; 4:5; 8:33), makes alive and calls things into being (4:17), raises the dead (4:24; 8:11; 2 Cor. 1:9; 4:14; Gal. 1:1), subjects things to Himself (Rom. 8:20; 1 Cor. 15:27f.), searches hearts (Rom. 8:27), loves us (8:37), gives the growth (1 Cor. 3:7; 2 Cor. 8:16), judges us (1 Cor. 4:4), enlightens and reveals the dark things (4:5), energizes us (1 Cor. 12:6; Gal. 2:8), gives us the victory (1 Cor. 15:57), establishes us (2 Cor. 1:21), calls us (2 Cor. 1:21; Gal. 1:6, 15), comforts us (2 Cor. 1:4; 7:6), always leads us (2:14), speaks (4:6a), prepares life for us (5:5a), has given us the Spirit as a guarantee (5:5b), reconciles us and gives us the service of reconciliation (5:18), and sets us apart (Gal. 1:15).

When Paul did occasionally use the attributive type of ascription, he usually added an "Amen," suggesting that he was in those rare instances repeating an ascription already well established in Christian liturgy. But his own understanding of God was that of a God who acts to enable, energize, and empower the Christian individual and community to bear witness that they were now justified, reconciled, and set apart for ministry.

III. Significance.–A. Literary and Form-Critical. Literary analysis of Scripture continues to yield new insights, especially in the areas of form and structure. Whereas earlier form critics worked primarily on larger units or segments (pericopes) of Scripture, especially in the Gospels, later scholars have given attention to smaller units of the Gospels and the Epistles, such as the greeting, thanksgiving, judgment, and benediction. Use of form-critical methodology on the ascriptions reveals that, far from being mere liturgical baggage, they were, especially for Paul, devices deliberately contrived and intentionally used in given contexts. As such, they not only describe God, but also give added or more precise meaning to the contexts in which they occur.

B. Theological. The purpose of critical study is to enable the informed reader to make a more responsible judgment whenever two or more interpretations of a text are possible. Also, such study can, as in the present analysis, provide broader perspectives and deeper insights into the author's mind, into his or her way of thinking about God. By noting the forms and uses of the ascriptions, readers can better understand the situation in which the words were used, their development within the tradition, and the theological dimensions of God that were intended by the writer to be uppermost in the reader's mind.

An example of this theological significance may be seen in Paul's use of two ascriptions in 2 Cor. 4:6. The first is simply an introductory formula, "God who said," for an OT quotation, "Let light shine out of darkness" (cf. Gen. 1:3). The references to light and darkness were deliberately chosen, tying in with references to Moses' veil in 2 Cor. 3:7, 13-18 and 4:4. Paul could easily have stopped there and still have made a good point. But by adding a second, and uniquely Christian, ascription he showed that this is the same active God who has more recently "*shone* in our hearts to give *light* of the *knowledge* of the *glory* of God in the *face* of Jesus Christ" (the italicized words relate to the Mosaic episode in Ex. 34:29f. and to Gen. 1:3). This intentional addendum in the second ascription provides a unique insight into Paul's literary skills and into the way he went about theologizing his gospel.

III. NT Names

I. Significance of God's Names.–In contemporary Western culture personal names are little more than labels that distinguish one person from another. The pride often associated with having or giving a certain family name and the common use of character nicknames, however, are pale reflections of earlier periods of history, notably biblical times, in which a person's name had much deeper significance.

The importance of the personal name finds clear expression in the OT in the stories concerning the giving or changing of names. The name represented the whole person; it could be said that the name was the person. Thus a change in a person's character, destiny, or status could be marked by a change of name, e.g., Abram to Abraham (Gen. 17:4f.); Jacob to Israel (32:28); cf. Simon to Peter (Mt. 16:17f.). Names could be given prophetically and assume theological meaning, as did the names of the children of Hosea (Hos. 1:6, 9) and of Isaiah (Isa. 7:3; 8:3). Thus, if human names are important, it is to be expected that the names and titles of God carry great significance.

A. Expressive of His Person. God's person, presence, and character — none of which can be fully comprehended by the human mind — are all concentrated in His name. Therefore a certain mysterious quality attaches to that name. Yahweh's angel refers to this quality in his question to Manoah, "Why do you ask my name, seeing it is wonderful?" (Jgs. 13:18; cf. Gen. 32:29). In accordance with the coupling of God and His name, the intense reverence for it in Israel (witness the capital sanction of the law protecting it in Ex. 20:7) is really awe for the presence and power of God Himself.

An important early use of the name occurs in Ex. 23:20f., where the angel who was to lead the Israelites into the Promised Land bore God's name. He thereby not only embodied God's presence with His people but also possessed full divine authority to demand obedience and judge sins. Only the name, however, not the totality of God's being, was in the angel; the two appear to have been in some sense separable. Thus, after the people's apostasy of making the golden calf, God repeated His promise to provide an angel to go with them but refused to accompany them Himself (33:2f.). Only the persistent intercession of Moses secured the continued presence of God Himself with His people (vv. 12-16).

That the name signified the personal presence of God and yet was not in itself the "whole of God" was used by Deuteronomy and the "Deuteronomic" historical writers to express what a modern theologian would call the immanence and transcendence of God. God Himself dwells in heaven and cannot be contained by any place or structure (Dt. 26:15; 1 K. 8:27), but He condescends to choose a place where His name will be remembered (Ex. 20:24), dwell (Dt. 12:11; 14:23; etc.), and be set (12:5; 14:24). Solomon's prayer identified the temple as the place built "for the name of the Lord" (1 K. 8:20, 29). The rest of his prayer thus envisaged people praying and calling on God's name "toward this place," where His "eyes and heart" were (9:3), even though God Himself would hear in heaven, His dwelling-place (8:30).

Because the name represented the person of God, "calling upon the name of the Lord" was a means of entering into a personal relationship with Him. This relationship was the goal of cultic worship, so often described by that phrase (e.g., Gen. 12:8; 1 K. 18:24; Zeph. 3:9). The personal relationship thus established through the name of God was a means of salvation and assistance (e.g., Ps. 54:1 [MT 3], where God's name and saving might are paralleled). The third commandment strictly forbade any attempt to use the power of God's name for magical or selfish ends (Ex. 20:7), precisely because the name was considered so powerful. To attempt to manipulate God's power to one's own ends is to abuse the person and sovereignty of God Himself and is therefore similar to idolatry. The third commandment is thus a logical development from the first two.

It is interesting that one of the earliest descriptions of the Christian community was "those who call on this [i.e., Jesus'] name" (Acts 9:21), a phrase witnessing to the personal and saving relationship with God that they experienced through the person of Jesus Christ.

B. Gift of Revelation. "The revelation of the Name of God stands in the centre of the Biblical witness to revelation" (Brunner, p. 119). God Himself is known where His name is made known. The initiative of revelation thus lies clearly with God. The gift of knowledge of His name is an act of grace. It is appropriate, therefore, that the places where He makes His name known are places for worshiping response to His grace. Those who know God's grace, through knowing His name, are thereby led into a relationship of trust and confidence in Him (e.g., Ps. 9:10 [MT 11]; 91:14). When the priest invoked God's blessing of grace and peace he "put [God's] name upon the

people" (Nu. 6:23-27); the revealed character of God guaranteed the blessing.

In the OT God's acts not only reveal His character but are also often marked by a particular mention of a divine name or title. In Gen. 17:1 the title 'El Shaddai was revealed when the covenant of promise with Abram was renewed. (Significantly, Abram's name was changed at the same time.) A fresh revelation of the name of Yahweh preceded the great redemptive act of the Exodus (Ex. 3:13-15; 6:2-8; see II.C below). The name of God was similarly stressed in Isa. 40–55 in expectation of God's new act of deliverance from Exile (cf. 42:8). No new name was actually given, but titles like "Your Savior," "Your Redeemer," "Holy One of Israel," "Lord of hosts," and "Mighty One of Jacob" occur frequently. Indeed, a glad appropriation of God's name by His people would mark the restoration (43:7; 44:5).

Since God's revelation of His name was an act of grace and enabled personal communion between Him and those to whom He revealed it, the name was closely associated with the covenant. Moses' intercession with God on behalf of the people (Ex. 33, esp. v. 19) and the remaking of the covenant, which followed the proclamation of the name — and character — of Yahweh (34:5f.), clearly show this association. Likewise, a prime feature of the covenant foretold by Jeremiah will be that God's people will know Him (Jer. 31:34).

In keeping with this, Jesus described the whole of His revelatory ministry in the words "I have manifested thy [God's] name" (Jn. 17:6, 26). His disclosure of the person, character, and saving work of God could all be summed up in the disclosure of "the name," and the saying is significantly put in the deeply covenantal setting of Jesus' last meal with His disciples before the crucifixion. Furthermore, the name of Christ as Lord (Gk. *kýrios*) takes over for the NT all that is contained in the titles, descriptions, and especially the covenant name of God in the OT.

C. Symbol of Authority. The angel of Ex. 23:20 exercised God's authority because he bore God's name. This coupling of God's authority with His name occurred often in Israel's history. Perhaps the most important example was the prophetic claim to speak in the name of the Lord, i.e., by His authority or commission. This was clearly the essential characteristic of the prophet mentioned in Dt. 18:18f. One who claimed, however, to speak in God's name without being commissioned and sent by Him not only committed a serious offence (cf. Dt. 18:20) but also could badly confuse God's people and His true prophets (cf. Jer. 14:13f.; 23:25-32; 29:8f.).

Many other things were said and done in the Lord's name in the sense of claiming His power or support. Battles were fought and won in His name (Ps. 20:7 [MT 8]; 44:5 [MT 6]; 118:10, 12), and David claimed personal protection and victory over Goliath (1 S. 17:45). Likewise, an oath in His name was binding (Dt. 6:13). Linked with this idea are passages where God acted "for the sake of his name," i.e., to vindicate His authority and power or to defend His character as Savior (e.g., Ps. 79:9f.; 143:11; Isa. 48:9-11; Ezk. 20:9, 22, 44; 36:21-23). Some of these passages refer to the honor that the nations of the world will pay to God's name (cf. Ps. 8:1 [MT 2]; 48:10 [MT 11]; Jer. 10:6f.; Mal. 1:11, 14), pointing not only to God's glory as universal Creator (Am. 4:13) but also to His sovereignty. His name is higher than any other; indeed, it is the only name (Isa. 45:21f.).

The NT transfers this concept of the authority of the name to Jesus Christ. He is both Lord and Christ (Acts 2:36). God has given Him the name that is above every name (Phil. 2:9 [alluding to Isa. 45:23]). His commission and authority, therefore, lay behind all that the apostles did in His name (cf. Acts 3:6, 16).

II. OT Names.–A. General. 1. 'El [Heb. *'ēl*]. This basic word for deity is found in various forms throughout the ancient Semitic languages. Although various opinions are held regarding its etymology, it probably derives from a root meaning "power" or "preeminence." Occasional adjectival use of the word to denote might or majesty (e.g., "cedars of 'El" = mighty cedars [Ps. 80:10 (MT 11)], "mountains of 'El" = majestic mountains [Ps. 36:6 (MT 7)], "in the 'El of one's hand" = within one's power [Gen. 31:29; Dt. 28:32; Mic. 2:1]) supports this derivation.

The word *'el* was also used as a proper noun to refer to the supreme god of the Canaanite pantheon, as is known from Ugaritic texts (14th cent. B.C.) that extol him as "father of men" and "god of gods." The name is commonly compounded with other descriptive titles in OT patriarchal narratives (mid-second millennium B.C.) (see II.B below). Of course the OT tradition treated all these as name of the one God, the God of Israel ("'El, the God of Israel," as He is actually called in Gen. 33:20). But probably separate names of possibly separate deities, or names associated with separate centers of worship of one deity, became identified with Yahweh, the personal name of the God of Israel. A great deal of uncertainty must surround any attempt to delineate the historical stages of this assimilation, however, and such a task is unproductive. Although the OT does witness to the strains of early Israel's polytheistic environment — and the polytheism in its own ancestry (Josh. 24:14f.) — from the perspective of the history of revelation it mainly witnesses to the various revelations of the one living God to the patriarchs against the cultural background of their time. Through those revelations He created that relationship of promise upon which the nation and its faith were founded.

In the postpatriarchal literature the name 'El is clearly interchangeable with Yahweh. It occurs more frequently in poetic literature (particularly in Psalms and Job), which preserves ancient literary forms and usage. It is commonly compounded with words describing the characteristics of Yahweh. In these compounds 'El can be in the construct state, e.g., "God ['El] of glory" (Ps. 29:3), "God of knowledge" (1 S. 2:3), "God of salvation" (Isa. 12:2), etc.; or it may be qualified by an adjective or participle, e.g., Yahweh is a great (Dt. 7:21), compassionate (Ex. 34:6), forgiving (Ps. 99:8), jealous (Ex. 20:5), living (Josh. 3:10) God (*'ēl*).

"'El" was also frequently used to form personal names (theophorous names), e.g., Eliezer, "God is help" (Gen. 15:2). In some cases it was an alternative to the use of "Yahweh" (Ja-, Je-, Jeho-, Jo-) in names, e.g., Elnathan = Jonathan, "God/Yahweh has given." Elijah's name, "Yahweh is my God," summed up his life's work.

2. 'Elohim [Heb. *'ĕlōhîm*]. This word is plural in form, and although it most frequently means "God" it can be used in a plural sense. Thus it can refer to other gods (Ex. 20:3; Josh. 24:16), foreign gods (Jer. 5:7), gods of the nations (Isa. 36:18), etc. Sometimes it appears to mean beings with divine qualities or authority — either angelic or human (Ps. 8:5; 82:1, 6; 138:1).

The use of the plural form with singular meaning is not unique to Israel. Similar forms occur in pre-Israelite Babylonian and Canaanite texts in which a worshiper wishes to exalt a particular god above others. This form has been called the "plural of majesty" or the "intensive plural" because it implies that all the fulness of deity is concentrated in the one god. 'Elohim's being the most common word for God in the OT thus conveys this idea. Some have also thought that the frequent use of 'Elohim

emphasizes that God is not intrinsically monistic but includes within Himself plurality of powers, attributes, and personhood.

'Elohim was frequently used by itself, much in the same way that modern speakers refer to Yahweh as "God." Like 'El it is often coupled with descriptive adjectives or genitives as a means of characterizing Yahweh (cf. BDB, p. 44). Frequently in Deuteronomy and related literature 'Elohim with a personal pronominal suffix occurs with Yahweh, e.g., "Yahweh your God" (*YHWH ʾĕlōheykā*). The constant repetition underlies that intensely personal and possessive relationship between Israel and their God that was the essence of the covenant.

3. 'Eloah [Heb. *ʾĕlô(a)h*]. It is uncertain whether this form is an original singular, of which 'Elohim is the plural, or has been formed by inference from the latter. Nor is its etymology any clearer than that of 'El and 'Elohim.

Its use is confined almost entirely to poetry, and its appearance in very early Israelite poetry (Dt. 32:15, 17; Ps. 18:31 [MT 32]; Hab. 3:3 — usually regarded as an ancient hymn used by Habakkuk [cf. Dt. 33:1-5; Jgs. 5:4f.]), suggests that it was an ancient title of God. It appears to be synonymous with 'Elohim and can also be used synonymously with Yahweh (Ps. 18:31; 50:22f.; Isa. 44:8 [cf. v. 6]). It occurs more often in Job (42 times) than in the rest of the OT (15 times). Whether its use in Job was theologically motivated (i.e., intended to maintain a certain detachment from the historical connections of the God of Israel), was a deliberate archaism, or evinces an early date for the book, is a matter for the critics. (The Aramaic form of 'Eloah, *ʾĕlāh*, occurs frequently in Ezra [e.g., 5:2] and Daniel [6:7 (MT 8)].)

B. "'El" Compounds. 1. 'El Shaddai [Heb. *ʾēl šadday*]. This title first appears in Gen. 17:1, where God identifies Himself thus when renewing the covenant with Abram. It recurs in 28:3; 35:11; 43:14; 48:3; 49:25 and appears to be the most common title of the deity known and worshiped by the patriarchs (cf. Ex. 6:3; see II.C below).

The antiquity of the title, however, seems likely to defeat all attempts to uncover its etymology. It has been derived from various roots that suggest that it means "sufficient," "lord," "rain-god," or "mountain-god." Most recently the meaning "all-knowing" has been suggested on the basis of an Akkadian name of the god Marduk (see Walker). In the postpatriarchal period, however, a connection seems to have been made in the popular mind between the title and the verb *šādaḏ*, "devastate, destroy." This meaning certainly fits contexts like Ruth 1:20f.; Job 5:17; 6:4; Ps. 68:14 [MT 15]; Isa. 13:6; and Joel 1:15, but is probably paronomasia rather than the true etymology. It has, however, influenced the Greek and Latin translations, which most often render the word respectively by *pantokrátōr* and *omnipotens*, "all-powerful," and have in turn produced the rendering "the Almighty" uniformly used by the AV, RSV, and NEB.

2. 'El 'Elyon [Heb. *ʾēl ʿelyôn*]. The second word of this title is a superlative (cf. W. Genesius, E. Kautzsch, and A. E. Cowley, *Hebrew Grammar* [2nd ed. 1910], § 133g) derived from *ʿālâ*, "go up," and is often used, apart from its use as a divine title, as an adjective meaning "high, uppermost, exalted" (cf. Dt. 26:19; 2 Ch. 7:21). As a title for God, therefore, it obviously means "Most High," "Exalted One" (cf. Ugar. *ʿly*, "Most High").

It first occurs in Gen. 14:18-21 in the encounter between Abram and Melchizedek king of (Jeru)Salem. Since Melchizedek was a "priest of 'El 'Elyon" and blessed Abram by that god, many scholars believe that 'Elyon was the deity worshiped at the Jerusalem cultic center in pre-Israelite times. Melchizedek called him "maker [or possessor] of heaven and earth," which Fisher, on the basis of Akkadian and Ugaritic comparisons, has interpreted as "parent of all gods in heaven and earth." This exalted status fits well with the occurrence of the title in the very ancient Israelite poem in Dt. 32:8, in which 'Elyon has preeminence over all the nations on earth.

In subsequent Israelite tradition the title was entirely appropriated and assimilated by Yahweh. Thus Abram in Gen. 14:22 spoke of "Yahweh, 'El 'Elyon." In the rest of the OT it occurs for the most part in poetry, especially in Psalms, is always synonymous with Yahweh, and is uniformly translated "the Most High." Ps. 91:1f. combines 'Elyon, 'El Shaddai, and Yahweh in one confession of trust in God. The same grouping appears in the oracles of Balaam (Nu. 24:16). 'Elyon also occurs several times in the exalted language of Dnl. 7, where the people of God are described as "saints of the Most High" (vv. 18, 22, 25, 27).

The following are other "'El" compounds occurring in Genesis that in the view of its narrator were synonymous with Yahweh but in the view of many contemporary scholars were originally particular names or titles by which the high god 'El was worshiped at different sites.

3. 'El 'Olam [Heb. *ʾēl ʿôlām*]. Yahweh was invoked under this title, "the everlasting God," at Beer-sheba (Gen. 21:33). The title is not found in this form again (but cf. Isa. 40:28: "the Lord is the everlasting God" [*ʾĕlōhê ʿôlām YHWH*]; Ps. 90:2: "from everlasting to everlasting thou art God" [*ʿôlām . . . ʾēl*]). Its meaning, however, lives on in the frequent description of Yahweh as "the living God" (cf. Josh. 3:10; Ps. 42:2 [MT 3]; 84:2 [MT 3]; Hos. 1:10 [MT 2:1]; etc.) and in the attaching of *ʿôlām* to many of His attributes (e.g., His love [Jer. 31:3], mercy [Isa. 54:8], glory [Ps. 104:31], faithfulness [Ps. 117:2]).

4. 'El Ro'i [Heb. *ʾēl rōʾî*]. This expression appears only in Gen. 16:13, which tells how Hagar finds protection and sustenance in the desert at the spring Beer-lahai-roi. She addressed Yahweh with this title, which probably means "God of seeing" or "God who sees me."

5. 'El Bethel [Heb. *ʾēl bêṯ ʾēl*]. This expression occurs in Gen. 31:13, where God thus identified Himself to Jacob, and again in Gen. 35:7, where Jacob built an altar at Bethel in memory of his earlier experience there (Gen. 28:10-22). The ELEPHANTINE PAPYRI mention this divine title.

C. The Covenant Name: Yahweh. Yahweh is the only truly personal name of God in Israel's faith; the others are titular or descriptive expressions. References to "the name" or "in the name" of God indicate this name.

The name consists of four consonants, *YHWH* (known as the tetragrammaton). Shorter forms also occur: *Yāh* (Ex. 15:2; the exclamation *halʾlûyāh*, "praise Yah," is frequent in the Psalms); *Yāhû* and *Yô*, both used in the formation of personal names (e.g., Joel [*yôʾēl*–'Yo is God'] and Elijah [*ʾēlîyāhû*–'Yahu is God']). But these are probably abbreviations of the tetragrammaton rather than more original forms of the name, as some scholars have thought.

Recently archeologists unearthed what some scholars regard as early non-Israelite occurrences of the divine name. *Yw* as a name of Baal has appeared in a text from UGARIT, but the reading has been disputed. The Ebla tablets (*see* TELL MARDIKH) reportedly contain the name in the forms *-Ya* and *-Yau*. Unfortunately the reading is far from certain, and since the element forms the ending of a word, it may merely represent a common Akkadian hypocoristic or diminutive form. This phenomenon seems to have been preserved to some extent in Hebrew and can be illustrated by the name Abijah, commonly rendered "Yah is my father." The name, however, may mean nothing more than "little father," or something similar.

It would thus seem precarious to argue from early Ebla renderings that a deity named Ya(u) was worshiped there.

The pronunciation of *YHWH* in the OT can never be certain, since the original Hebrew text used only consonants. The vowel points added in the MT are not those of the name itself (see below), which had come to be considered too holy to pronounce (cf. Ex. 20:7; Lev. 24:11). But the early Greek transliterations of the name by Clement of Alexandria and Theodoret, respectively *iaoue* and *iabe* (*b* pronounced as an English *v*), have led scholars to the view that "Yahweh" is probably the closest equivalent to the original pronunciation.

The English form "Jehovah" arose by a latinized combination of the four consonants (*YHWH*) with the vowel points that the Masoretes used to show that they meant the reader to say "'Adonai" (see II.D below) when reading the tetragrammaton. That is, they left the consonants for "Yahweh" in the text but put with them the vowels for "'Adonai" — ^{a}, *ō*, *ā*. Though the older English versions sometimes used this hybrid form with compound names (such as "Jehovah-Jireh" [Gen. 22:14]), usually the divine name has been rendered by "the LORD," following the ancient Greek translations of the OT, which commonly rendered Yahweh by *kýrios*.

Scholars have also disputed the linguistic root and meaning of *YHWH*, though, as H. H. Rowley pointed out, "Etymology is not finally important here for OT theology since not etymology but experience filled the term with meaning" (p. 55). Scholars now generally agree, however, that the name is connected with the verb *hāwâ*, itself an archaic form of *hāyâ*, "be, become, happen." What is in doubt, however, is the form of the verb. Some scholars have seen it as simply a combination of the root *hwh* plus prefixed *y* to make a personal name. Much more common is the view that it is the qal (simple) conjugation of the verb, with either a present sense — "He who is," "the self-existent one" — or an imperfect, future sense — "He who will continue to be (present with His people)." Another common view is that it is the hiphil (causative) conjugation: "He who causes to be, who brings into existence," i.e., "the Creator." Although this last explanation is attractive and has had much support, it is doubtful for two reasons. First, there is no known example of *hāyâ* in the hiphil. Second, on the only occasion where an apparent attempt is made to explain the name (Ex. 3:14f.), Yahweh's character and acts as Israel's redeeming, covenant God, not His role as Creator, are indicated.

In Ex. 3:14f. God declares that His name is *'ehyeh 'ašer 'ehyeh*. The verb *'ehyeh* is imperfect qal and is obviously linked to the tetragrammaton, as vv. 14f. make plain. Of the two possible senses for it, "I am who/what I am" and "I will be who/what I will be," the latter is preferable but not because the idea of God as a self-existent, unique, transcendent being is "foreign to Hebrew thought," as has often been said (cf. Isa. 40–55, which describe Yahweh in exalted language that implies all those things). Rather, it is preferable because the verb *hāyâ* has a more dynamic sense of being — not pure existence, but becoming, happening, being present — and because the historical and theological context of these early chapters of Exodus shows that God is revealing to Moses, and subsequently to the whole people, not the inner nature of His being, but His active, redemptive intentions on their behalf. He "will be" to them "what" His deeds will show Him "to be."

It is especially made clear that He will be "with" them. In the context of the call of Moses and the revelation of the significance of the divine name, the promise "I will be with you/your mouth" occurs three times (Ex. 3:12; 4:12, 15). The presence of God is then realized in the covenant, of which the vital preface is God's proclaiming Himself as a redeeming (20:2) and forgiving (34:6) God. "It is this assurance of the presence of the Saviour God with his covenant people which is embodied in the name Yahweh" (Abba, p. 325).

Attempts to find extra-Israelite origins of the name have been entirely unconvincing. The view that Moses adopted the name from the Kenites (Midianites) during his stay with Jethro — apparently a priest of Yahweh (Ex. 18) — has at least some slight biblical basis (*IDB*, II, 409f.) but a totally new dimension of meaning was attached to the name at the Exodus.

More important is whether *YHWH* was known to the patriarchs or was first made known to Moses. Some scholars interpret Ex. 6:3 to mean that the patriarchs had not known the name Yahweh, and, regarding this passage as conflicting with passages in Genesis where the patriarchs apparently knew and worshiped God under this name (Gen. 15:7; 28:13; etc.), attribute the discrepancy to the existence of different documentary sources woven together in the text. According to this view, the J source had for theological reasons employed the name Yahweh anachronistically from the start, whereas the E and P sources had on the whole avoided it until the Exodus period. More careful exegesis of Ex. 6:3, however, shows that this passage concerns the character and content of the respective names 'El Shaddai and Yahweh, not simply knowledge of the names themselves. It should accordingly be translated: "I appeared to Abraham . . . in the character of 'El Shaddai, but as to the character of my name Yahweh I did not make myself known" (cf. Motyer, pp. 11ff.; Abba, p. 323). Therefore one need not doubt the biblical tradition that the use of this name was already very ancient by the time of Moses (cf. Gen. 4:26; 9:26; cf. the abbreviation *yô* in the name of Moses' mother Jochebed [*yôkeḇeḏ*, Ex. 6:20]), so that God could in truth be called "the God of your fathers" (Ex. 3:15). What was new at the call of Moses and the Exodus was not the revelation of the name itself but a new experience of its meaning, bound up with God's faithfulness to His covenant promises and redemptive acts on behalf of His people (cf. Jacob, pp. 49f.).

The divine name also occurs in the compound "Lord of hosts" (Heb. *YHWH ṣᵉḇā'ôṯ*; sometimes found in the fuller form "Yahweh, God [*'ᵉlōhîm*] of hosts"). This title is absent from the Pentateuch but occurs occasionally in Samuel, Kings, Chronicles, and Psalms. It is very common in the prophets, especially Isaiah, Jeremiah, and the postexilic trio Haggai, Zechariah, and Malachi.

Scholars hold various views concerning the identification of these "hosts." In the earlier passages the title occurs in connection with the ark of the covenant (2 S. 6:2, 18; 7:2, 8, 26f.; cf. 1 Ch. 17:7), and since the ark was a kind of war shrine (cf. Nu. 10:35), it is thought that the "hosts" were originally the armies of Israel (cf. 1 S. 17:45). This meaning, however, is not found in the prophets, where the title is used in nonmilitary contexts (e.g., Isa. 47:4; Jer. 5:14; Hos. 12:5; Am. 3:13; 6:14). Therefore some regard the "hosts" as heavenly, angelic beings (cf. Ps. 103:21; 148:2) or possibly astral divinities over whom Yahweh was supreme (cf. Isa. 40:26).

Probably all of these senses are combined in the title, which clearly is used to exalt Yahweh as all-powerful sovereign and controller of all human and superhuman forces. (For the view that *YHWH ṣᵉḇā'ôṯ* is a sentence-name meaning "he creates the [divine] hosts," see Cross, pp. 65f.)

D. 'Adon, 'Adonai [Heb. *'ᵃḏôn, 'ᵃḏōnāy*]. This word is

of uncertain origin, but its basic meaning in Hebrew is "lord, master, sir." It is thus commonly applied to a human overlord (cf. esp. the phrase "my lord, the king" [e.g., 1 S. 26:19]), a husband (Gen. 18:12), a slave's master (Ex. 21:5), and other persons in authority (cf. BDB, pp. 10f.). Its application to God clearly implies dignity and dominion (cf. Ps. 2:4; Isa. 7:7).

'Adonai occurs most frequently with the name Yahweh. (It is thus usually translated in the English versions as "the Lord GOD" [e.g., Isa. 61:1] to distinguish it from "the LORD God," which is "Yahweh 'Elohim" [e.g., Ezr. 9:15].) This usage is widespread throughout the OT. It occurs less frequently with 'Elohim (e.g., Ps. 35:22f. [where Yahweh, 'Elohim, and 'Adonai all occur]; 86:12).

Eventually reverence for the divine name *YHWH* led to its being replaced by 'Adonai not only in oral reading but probably also in the written copying of the text (in several places). In the Masoretic pointing, the final vowel *a* was lengthened to *ā* to distinguish the divine title from *ʾᵃḏōnay*, which denotes the human plural "my lords."

E. Other Descriptive Terms. The character and acts of God were so rich and many-sided that Israelite piety employed a wide variety of metaphors and epithets in trying to convey what He meant to them. Such terms were not strictly names, but a few were used so frequently that they almost became names.

1. Rock [Heb. *ṣûr*]. This title occurs frequently in poetic literature (Dt. 32:4, 15, 18; Ps. 18:2, 31, 46 [MT 3, 32, 47]; 19:14 [MT 15]; 89:26 [MT 27]; Isa. 17:10; 26:4; 44:8; Hab. 1:12) and obviously symbolizes Yahweh's steadfast, enduring strength and protection.

2. Holy One [Heb. *qāḏôš*]. Holiness is such an essential attribute of God that "holy" becomes a descriptive name (cf. Isa. 57:15). Most frequently it occurs in the phrase "the Holy One of Israel," which emphasizes that God's holiness is closely related to the holiness He demands of Israel (Lev. 19:2). It is a favorite title throughout the book of Isaiah (e.g., 1:4; 12:6; 40:25; 43:3; 60:9; cf. esp. 6:3), but it often occurs elsewhere (e.g., 2 K. 19:22; Job 6:10; Jer. 50:29; Hos. 11:9; Hab. 3:3).

3. King [Heb. *meleḵ*]. This title expresses the sovereignty of God. Although it derived from the institution of monarchy, it was nevertheless even used in premonarchial Israel, as certain early texts show (Ex. 15:18; Nu. 23:21; 24:7; Dt. 33:5). It is particularly frequent in the Psalms (5:2 [MT 3]; 44:4 [MT 5]; 68:24 [MT 25]; 74:12; 84:3 [MT 4]; etc.). It does not often appear elsewhere in the preexilic period, perhaps because of the existence of a foreign deity known as *mlk* (*see* MOLECH), whose cult appears at times to have infected Israel and to have included child sacrifice (cf. Lev. 20:2). But the title bursts forth in Deutero-Isaiah as part of his proclamation of the universal sovereignty of Yahweh (Isa. 41:21; 43:15; 44:6; 52:7).

C. J. H. WRIGHT

III. NT Names.–Greek *theós* occurs hundreds of times in the NT and is thus the most common NT name for God. *Theós* usually translates Heb. *ʾĕlōhîm* in the LXX, though it occasionally translates *YHWH*, *šadday*, etc. (HR, I, 630-648). "God" usually denotes the God of Israel (Acts 2:30; Rom. 11:1; etc.), the "Father who is in heaven" (Mt. 6:1 par.; 7:11 par.; 10:32 par.; etc.), the One who has sent the Son to redeem the world (Jn. 3:16). *Theós*, however, also denotes Jesus the divine Son in the Johannine tradition (Jn. 1:1, 18; 20:28), as well as the deities of the pagan pantheon (e.g., Acts 28:6; 1 Cor. 8:5; cf. Ps. 81:6 [LXX] = Jn. 10:34f.). The assimilation of the words of Jesus into Greek from their original Semitic languages is shown in Matthew (27:46) and Mark (15:34), who translate Heb. *ʾēlî* and Aram. *ʾĕlāhî* ("my God") as Gk. *theé mou* (vocative of *theós*) and *ho theós mou*, respectively (cf. B. M. Metzger, *Textual Comm. on the Greek NT* [1971], pp. 70, 119).

Greek *kýrios* is usually translated "Lord" in the English versions and is the equivalent of Heb. *YHWH* in the LXX (e.g., Isa. 40:3; HR, II, 800-839). "Lord" may denote God (the Father; Mt. 5:33; Lk. 1:6; etc.) or deities of the Greco-Roman world (1 Cor. 8:5). Usually, however, *kýrios* is a title of the exalted Jesus, applied to Him by virtue of His resurrection and session at the right hand of God the Father (Acts 2:36; Rom. 10:9; cf. Phil. 2:11; Mk. 12:36 par.). The acknowledgment of Jesus as Lord was the earliest confession of faith in the Church (V. H. Neufeld, *Earliest Christian Confessions* [*NT Tools and Studies*, 5, 1963], pp. 51-60).

Other names for God in the NT are used infrequently. Gk. *hósios* most frequently translates Heb. *ḥāsîḏ* ("pious," "loyal") in the LXX (HR, II, 1018). *Hósios* usually means "devout," "holy" (e.g., 1 Tim. 2:8; Tit. 1:8) but denotes God, the "Holy One" in Rev. 16:5, and Jesus, the "Holy One" of God in Acts 2:27; 13:35 (= Ps. 15:10). Gk. *hágios* ("holy") corresponds to Heb. *qōḏeš* (HR, I, 12-15) and occurs most frequently as an adjective, but its use as a substantive in 1 Jn. 2:20 probably refers to God as the "Holy One," though it could refer to Jesus (cf. Jn. 6:69; see Bauer, rev., p. 10; R. Bultmann, *Johannine Epistles* [Eng. tr., *Hermeneia*, 1975], p. 37). The Greek term *despótēs* ("lord," "master") often denotes a slave owner (1 Tim. 6:1; Tit. 2:9; etc.) but also refers to God (see "Lord," Lk. 2:29; "Sovereign Lord," Acts 4:24; Rev. 6:10). Gk. *despótēs* is the usual equivalent of Heb. *ʾᵃḏōnāy* ("master," "lord") in the LXX. Gk. *hýpsistos* usually translates Heb. *ʿelyôn* ("most high") in the LXX (HR, II, 1420f.). In the NT the term is used only of God the Father (Mk. 5:7; Lk. 1:32, 35, 76; 6:35; 8:28; Acts 7:48; He. 7:1). Gk. *pantokrátōr* is used extensively in the LXX to translate Heb. *ṣᵉḇā'ôṯ* ("hosts") in expressions such as "God of Hosts" (*kýrios pantokrátōr*, 2 S. 5:10), "Lord God the God of Hosts" (*kýrios ho theós ho pantokrátōr*, Am. 3:13), etc. (HR, II, 1053f.). In the NT *pantokrátōr* occurs ten times, with nine occurrences in the book of Revelation, and is always translated "Almighty." With the exception of Rev. 1:8, *pantokrátōr* appears with other names for God. Thus the RSV translates *kýrios pantokrátōr* in 2 Cor. 6:18 as "Lord Almighty," and *kýrie ho theós ho pantokrátōr* as "Lord God Almighty" in Rev. 16:7. The term is applied both to the risen Christ (Rev. 1:8) and to God (4:8; 11:17; etc.). Gk. *sōtḗr* ("savior," "deliverer") is a widely attested term for divinities in the Greco-Roman world as well as the title of deified rulers (Bauer, rev., pp. 800f.). The Hebrew root *yš'* ("save," "deliver") is the most frequent antecedent of *sōtḗr* in the LXX (HR, II, 1331). *Sōtḗr* is used as a name for God (Lk. 1:47; 1 Tim. 1:1; 2:3; 4:10; Tit. 1:3; 2:10; 3:4; Jude 25) as well as for Jesus (Jn. 4:42; Acts 13:23; Tit. 2:13; 1 Jn. 4:14; etc.). Gk. *basileús* ("king") is used of God, the "King of the ages" (1 Tim. 1:17; Rev. 15:3). The title "King of kings," denoting absolute authority rather than divinity per se, is used of God and Christ in the NT (always with "Lord of lords": 1 Tim. 6:15; Rev. 17:14; 19:16). Its use was a response by both Jews and Christians to the practice of deifying earthly political rulers (M. Dibelius and H. Conzelmann, *Pastoral Epistles* [Eng. tr., *Hermeneia*, 1972], pp. 89f.; H. B. Swete, *Apocalypse of St. John* [1906], pp. 7, 220).

GOD, SON(S) OF. *See* SONS OF GOD (OT); CHILDREN OF GOD.

GOD SPEED. Occurs only in 2 Jn. 10f., AV, as the translation of Gk. *chaírein*, the infinitive of *chaírō*, and is rendered in the RSV "greet, greeting," in the NEB "give a greeting." It means "rejoice, be of good cheer, be it well with you"; *chaíre, chaírete, chaírein* were common forms of greeting and farewell, expressive of good will and desire for the person's prosperity, translated in the Gospels as "Hail!" (Mt. 26:49; 27:29; 28:9; etc.; it was transliterated *kêrî* in rabbinic Hebrew with the same meaning, "hail"; cf. M. Jastrow, *Dictionary of the Targumim, The Talmud Babli and Yerushalmi, and the Midrashic Literature* [repr. 1967], p. 63b), and "greeting" in Acts 15:23; 23:26; Jas. 1:1; cf. 2 Macc. 1:10. Thus it is similar to Heb. *šālôm*, "peace," which is used for a greeting in the OT (e.g., 1 S. 25:5f.; cf. Jn. 20:21). "Godspeed" first appears in Tyndale's version; Wyclif had "heil!" and Rheims, "God save you."

The author of 2 John warned against showing any form of hospitality toward those "who will not acknowledge the coming of Jesus Christ in the flesh" (v. 7). The people in view here were not merely heretics: "such a one is the deceiver and the antichrist" (v. 7). Extending Christian hospitality to such propagandists would enable them to lead more people astray. W. L. WALKER

GOD THE FATHER.

OLD TESTAMENT

I. Derivation of the Concept
II. Yahweh as Father
III. Yahweh's Son
IV. Meaning of Divine Fatherhood

I. Derivation of the Concept.–Israel's heritage from its neighbors included the concept of God as "father of the gods," but the references are fleeting and in no way constitutive for theology. In Semitic mythology paternity was understood literally and metaphysically. The other gods were seen as the offspring of God. Tribes and families traced their origin to God and expressed this in theophoric names. Israel would not disagree in essence but found other means such as the idea of "creation" to express their understanding of their debt to God. But some reflections of their neighbors' ways of thinking remain in the OT.

The term "sons of God" (Heb. *bᵉnê 'ēlîm*) in Ps. 29:1 and 82:6 (MT 7) (RSV mg.) probably means only "divine or supernatural beings," e.g., the members of the heavenly court (cf. Ps. 82:6f.; Dt. 32:8 [LXX]). On the difficult Gen. 6:2, where the sons of God (Heb. *bᵉnê hā'ᵉlōhîm*) marry "the daughters of men," see the comms.; elsewhere *bᵉnê hā'ᵉlōhîm* clearly denotes angels, heavenly beings (Job 1:6; 2:1; 38:7; cf. Aram. *bar 'ᵉlāhîn*, "a son of the gods," in Dnl. 3:25). Otherwise, OT references to God as "Father" speak of His relation to human beings.

Northwest Semitic literature shows that it was common to have names with *'āḇ*, "father," as an element. Most of them may be understood as theophoric, claiming God (or a god) as father. Such names are familiar in the OT. They may recall God as the father of the family or clan, but this is doubtful for most Israelite names. Others claim a particular god, as do Heb. *'ᵃḇî'ēl*, "My Father is El" (1 S. 9:1; 14:51); *'ᵉlîāḇ*, "My God is Father"; *'ᵃḇîmeleḵ*, "My Father is King"; and *'ᵃḇîšālôm*, "My Father is Peace." The name "Joab" testifies to Yahweh as Father, as does Heb. *'ᵃḇîyāhû*.

II. Yahweh as Father.–Yahweh is called the "Father of Israel." In Ex. 4:22 He calls Israel His "first-born son." He thus establishes His right to act on Israel's behalf. Dt. 32:6 asks, "Is not he your father, who created you, who made you . . .?" Paternity is used along with verbs usually associated with creation (cf. v. 18:1, "the Rock that begot you . . . the God who gave you birth"). In this verse, as in passages stressing the compassion or protection of God, masculine and feminine implications mingle. This should be enough to warn against using the father imagery as a sign of God's masculinity. Sex identification plays no part in the OT understanding of God. Only the origin of the metaphors or symbols that are used to portray His person or His role brings such an identification to the OT.

Hosea 11:1 states that Yahweh called His son from Egypt and cared for him, and Isa. 1:2 says that Yahweh has raised sons. These passages, along with Jer. 3:19, lament the lack of a response worthy of the relation. Jer. 31:9 supports the promise of God's providential care with "for I am a father to Israel, and Ephraim is my first-born."

References to God as Father stress His authority over Israel and His responsibility to care for her. In Isa. 45:9-11 the figure is paired with that of the potter who exercises his will freely over the pot. The same relation applies in Isa. 64:8: "O Lord, thou art our Father; we are the clay, and thou art our potter." Isa. 63:16 calls on Yahweh as Father at a moment when neither Abraham nor Israel can be called upon. Here Father and Redeemer are parallel concepts. Mal. 2:10 combines the Father and Creator concepts: "Have we not all one father? Has not one God created us?" One other use (Mal. 1:6) complains of a lack of appropriate response to God as father.

Interpreters agree that these references do not document a basic concept for OT doctrine. Fatherhood is one of many figures used by the OT to communicate a picture of God's relation to Israel.

III. Yahweh's Son.–Yahweh recognized the king as His son. The classic example is Ps. 2:7: "You are my son, today I have begotten you." This recognition testifies to an adoption ceremony and is based on the promise to David in 2 S. 7:14 and 1 Ch. 28:6: "I have chosen him to be my son, and I will be his Father." Ps. 89:26f. prescribes the names the king must use for God as "Father, God, and the Rock of his help." In return God will name him His firstborn and make him the greatest of the kings.

All the references fit a picture of adoption and support the authority of the king by this close association with God. Being recognized as "son" of God is a guarantee of the king's power and authority in Zion. Thus being "son" and "servant" of Yahweh is a basic concept of Davidic kingship in the OT and of messianic teaching which builds on Davidic promises and ideals.

IV. Meaning of Divine Fatherhood.–The OT is very restrained in its use of the father-son relation for God.

Only once is Israel called "the sons of the Lord" (Dt. 14:1), while Hosea reserves the title "'Sons of the living God'" (1:10 [MT 2:1]) for the last days. Yet Israel could think of God as they would of a father. By Hellenistic times one could even address Him as "Father" (Sir. 23:1).

The basic idea of God as Father was one of authority over His people, or of authority exercised through the king or the messiah. But the use of the father-child figure softened the picture, always lending it a touch of the love and tenderness which Hosea stressed so effectively.

When the idea of Father is combined with that of Creator, the groundwork is laid for a universal concept of God as Father. Quell's development of this idea (pp. 972f.) goes beyond the evidence. But Jeremiah's description (3:19) of Israel being set down among God's children with the hope that they would call God "Father" points in that direction. Other passages support the growing breadth of the concept.

The OT concept of God as Father is thin and underdeveloped, perhaps deliberately so in order to avoid association with pagan ideas of divine fatherhood in the sense of procreation. Nevertheless, the OT concept is the foundation for the NT doctrine.

New Testament

I. Uses of the Term
II. God as the Father of Jesus
III. Limited Scope of Divine Fatherhood
IV. Comfort of Divine Fatherhood

I. Uses of the Term.–The most interesting and important term in the Gospels reflecting how Jesus thought about God is the simple word "Father." In the OT, God is occasionally thought of as Father, but the term is usually used of God's relationship to Israel as a people, not of His relationship to the individual. God is the Creator and Lord of His people; He can be called their Father.

In intertestamental Judaism, "Father" appears only infrequently: "because he is our Lord and God,/he is our Father for ever" (Tob. 13:4), "I praised the Lord: Thou art my Father" (Sir. 41:10), "O Lord, Father and Ruler of my life" (23:1), "O Lord, Father and God of my life" (23:4). The last two references are a translation of the Greek, but the Hebrew original has "God of my Father." In one reference (Jub. 1:24: "I will be their Father and they shall be My children"), the relationship is eschatological.

All the above instances come from the literature of Palestinian Judaism. Nowhere in this literature is God addressed in prayer as "Father" or "my Father."

The term occurs more frequently in the literature of the diaspora of Hellenistic Judaism. God is addressed in prayer as Father in 3 Macc. 6:4, 8 and He is called Father in the same work (5:7; 7:6), but here He is the Father of His people. We should conclude that this is also the meaning of 6:4, 8. In Wisd. 2:16; 11:10 God is called the Father of righteous men, and is addressed in prayer as Father (14:3). At Qumrân the term is rare (*Prayer for Intercession* 3:5-8; 1QH 9:35). In rabbinic literature God is called "our heavenly Father" by Johanan ben Zakkai (*ca.* A.D. 50-80; cf. J. Jeremias, *Prayers of Jesus*, p. 16), and this became a common designation in later rabbinic writings.

The term occurs four times in Mark, eight times in Q, thirty-six times in Matthew, and one hundred times in John. The most important of these are the expressions "my Father" (seventeen times) and "your Father" (nineteen times). Jesus teaches His disciples to pray "our Father," but Jesus never uses "Our Father" to designate God at the same time and in the same way as the Father of Himself and of His disciples It is true that many of these expressions seem to be editorial on the part of the Evangelist Matthew, but this appears nevertheless to be a sound tradition reflecting Jesus' usage. This is especially true of the expression "heavenly Father" or "Father in heaven," which is found almost exclusively in Matthew (cf. Lk. 11:13 par. Mt. 7:11).

II. God as the Father of Jesus.–The distinction between "my Father" and "your Father" suggests that Jesus sustained a different relationship to God. This is supported by two exegetical facts. John seems to reflect a solid tradition when he quotes Jesus as saying, "I am ascending to my Father and your Father, to my God and your God" (20:17).

More crucial, however, is the Q passage in Mt. 11:27 (par. Lk. 10:22): "All things have been delivered to me by my Father; and no one knows the Son except the Father, and no one knows the Father except the Son and anyone to whom the Son chooses to reveal him." This passage contains such a "high" Christology that critics have often suggested that it cannot be an authentic saying of Jesus. But more conservative critics have recognized its authenticity (see A. M. Hunter, pp. 241-48). This is a decisive passage, for it puts Jesus' knowledge of God on a different level from that of His disciples. The Son knows the Father as the *Father knows the Son*. It is self-evident that the Father's knowledge of the Son is that of a direct, intuitive, innate, and unmediated knowledge. The Son knows the Father in the same way the Father knows the Son — by way of a *direct, intuitive, innate, unmediated knowledge*. Jesus sustains a mutual relationship with the Father that He can share with no other. The knowledge of God which people may come to possess is not an innate knowledge; it is not something they already possess. Christ possesses this innate knowledge of God because He is God's Son. Other people do not share this knowledge. They may come to a knowledge of God only secondhand, by way of mediation through the Son. This is not an innate knowledge, but is one that is experienced as people become disciples of Jesus. The Son knows the Father because He is by nature the Son; other people must become children through the mediation of Christ.

Another fact of great importance is His use of Father. It is brought out in His prayer in Mk. 14:36. Facing His agony of suffering and death, Jesus prayed, "Abba, Father, all things are possible to thee; remove this cup from me; yet not what I will, but what thou wilt." We are here indebted to the researches of J. Jeremias. He has thoroughly investigated the rabbinic literature of the time, and has come to the following conclusions which have been widely accepted. *'Abba* is an Aramaic word for father, an intimate word used by children when addressing their father, and by adults as well in the intimacy of the family relationship. Furthermore, Jeremias has discovered that the Jew avoided applying the word *'Abba* to God, even outside of prayers. "*We do not have a single example* of God being addressed as *'abbā* in Judaism but Jesus *always* addressed God in this way in his prayers" (Jeremias, *Theology*, p. 66). Furthermore, Jesus taught His disciples to call God "Abba, Father." This is proved by two passages (Rom. 8:15 and Gal. 4:6) where Paul reflects the early Christian practice of prayer, according to which God is addressed as "Abba." Here is an instance of an Aramaic word so imbedding itself in the Christian vocabulary that it can be merely transliterated into Greek. This represents the attitude Christians are to have toward

God. They are to approach Him with all the openness and confidence and affection of small children.

III. Limited Scope of Divine Fatherhood.–At one point, NT criticism has experienced a radical change. This is on the question whether Jesus saw the Fatherhood of God as limited to His disciples or as a relationship that exists for all mankind, i.e., the universal Fatherhood of God. Some of the "old liberal" scholars held that God was the universal Father because God is and remains what He ought to be, but people have relinquished their kinship through sin. Even the first edition of *ISBE* carries the statement, "Every man is born a child of God and heir of His kingdom" (T. Rees, *ISBE*, II, 1261). The ideas of the universal Fatherhood of God and the universal brotherhood of man became two of the chief elements in the theology of Old Liberalism (A. Harnack, *What Is Christianity?* [Eng. tr. 1900], pp. 69ff.). It is now commonly recognized, however, that this is an erroneous interpretation (cf. H. F. D. Sparks, p. 260). This more recent conclusion is based on two exegetical facts: (1) Jesus never grouped Himself together with His disciples as the sons of God, since His messianic sonship is different from the sonship of His disciples; (2) Jesus never applied the category of sonship to any but His disciples. People became children of God by recognizing His messianic sonship (see C. F. D. Moule, p. 560).

A universal Fatherhood of God has been seen in Jesus' saying, "Love your enemies and pray for those who persecute you, so that you may be sons of your Father who is in heaven; for he makes his sun rise on the evil and on the good, and sends rain on the just and on the unjust" (Mt. 5:44). This saying has been interpreted to mean that love for one's enemies is required because God is the universal Father and Jesus' disciples must love all mankind because God loves all people as His children. This interpretation reads something into the saying. Actually God is viewed only as the Father of Jesus' disciples. The goodness of God in sending rain to all mankind, good and evil alike, is not to be confused with the divine Fatherhood. The same exegesis should govern our understanding of another passage: "Look at the birds of the air; they neither sow nor reap nor gather into barns, and yet your heavenly Father feeds them" (6:26). It is not as Father that God cares for the birds, and it is not as Father that God bestows His creaturely blessings on those who are not His children. The Fatherhood of God belongs to those who have responded to the divine love and have submitted themselves to God's kingdom. God seeks people, not because He is their Father, but because He would become their Father.

The universal Fatherhood of God has also been seen in the parable of the Prodigal Son. The prodigal has been interpreted to mean that every person is by nature a child of God and needs only to return to where he belongs. (Cf. "The prodigal son may become unworthy to be called a son but the father always remains a father" [*ISBE*, II, 1262]). This ignores the fact that a parable is a story drawn from daily life whose purpose is to set forth a basic truth and whose details cannot be pressed. It is improper exegesis to say that this parable teaches that all people are by nature children of God, just as it would be to say that dumb beasts are also sons of God (Lk. 15:1-7). The central truth is not about a sheep nor a coin nor a son; the central truth is about the shepherd and the woman and the father. It is that God yearns for the lost and in Jesus' mission is like a shepherd seeking his lost sheep, or a woman searching for a lost coin, or a father weeping for the return of the prodigal, and *unconditionally* welcoming him when he returns home. The prodigal is a parable about the father, not about the son. The one element all three parables embody about the lost is belonging — the lost sheep belongs to the fold; the lost coin belongs to the housewife's possessions; the son belongs in his father's house. People, although lost, find their proper place in the house of their father.

God's Fatherhood is a gift of God's kingdom. God, in Jesus' mission, is seeking out sinners and inviting them to submit to His reign that He may become their Father. An inseparable relationship exists between the kingdom of God and the Fatherhood of God, and it is particularly notable that the affinity between the two concepts appears most frequently in an eschatological setting. In the eschatological salvation the righteous will enter the kingdom of their Father (Mt. 13:43). It is the Father who has prepared for the blessed the eschatological inheritance of the kingdom (Mt. 25:34). It is the Father who will bestow on Jesus' disciples the gift of the kingdom (Lk. 12:32). The highest gift of God's Fatherhood is participation in God's sovereignty which is to be exercised over all the world. In that day Jesus will enjoy a renewed fellowship with His disciples in the Father's kingdom (Mt. 26:29). Since the greatest joy of the children of God is that of sharing the blessings of the kingdom, Jesus taught His disciples to pray, "Our Father who art in heaven . . . Thy kingdom come" (Mt. 6:9, 10). Clearly kingship and Fatherhood are closely related concepts.

These eschatological sayings illustrate one important fact about God's Fatherhood. It is a blessing and a relationship which cannot be enjoyed by all people by some innate right, but only by those who are to enter the eschatological kingdom. The concept of Fatherhood is qualified by that of the kingdom. It is as the Father that God will grant entrance into the eschatological kingdom; and it follows that those who do not enter the kingdom will not enjoy the relationship to God as their Father.

IV. Comfort of Divine Fatherhood.–The gift of Fatherhood belongs not only to the eschatological consummation; it is also a present gift. That Jesus taught His disciples to call God Abba, Father, and look upon Him as such, indicates that the future blessing of the kingdom is dependent upon a present relationship. But even in this present relationship, Fatherhood is inseparable from the kingdom. Those who know God as their Father are those for whom the highest good is life in the kingdom of God and its righteousness.

Accepting the Fatherhood of God not only means eschatological salvation; it means also security in everyday life in view of the fact that God will care for Jesus' disciples as a father cares for his children. As Father, God knows what His children need (Mt. 6:8, 32; Lk. 12:30). The Father's goodness and care are boundless (Mt. 5:45). Nothing is too insignificant to escape His attention. The rabbis explicitly prohibited prayers that God's mercy should extend "even to a bird's nest" (J. Jeremias, *Theology*, p. 182). It was considered disrespectful to associate God with something as small as a tiny bird. By way of contrast, Jesus says that God's care embraces even sparrows. Although two of them can be bought for a "penny" (Gk. *assárion*, a tiny, worthless copper coin, Mt. 10:29f.), God extends His special protection even to the smallest animals. In the heavenly world, angels who encircle the divine throne, standing in the innermost circle immediately before God, guard the little children (18:10).

The certainty of participating in the eschatological salvation and the security granted by knowing God's fatherly care give the disciples courage to submit to the unpredictable elements in the divine will. The riddles of life remain. It is difficult to understand why the gospel should be rejected by the wise and learned (Mt. 11:25f.), why so much

of the Sower's work is in vain (Mk. 4:4-7). Jesus never attempts to vindicate God or prove His existence — the word "Father" suffices.

In particular, suffering appears in a new light when people are conscious of being children of God. At this point, Judaism had a cruel theology: all suffering is a punishment for particular individual sins. That was the firm conviction of the time (Jn. 9:2). God watches to see that guilt and punishment correspond exactly, measure for measure. If one meets a person who is maimed, lame, blind, or leprous, it is a pious duty to murmur, "Praise be the reliable judge" (J. Jeremias, *Theology*, p. 183). If a small child dies, the parents must have committed particular sins which God is punishing. This suffering is seen as the scourge of God.

Jesus strictly forbids such calculations. In Lk. 13:1-5 He attacks the dogma that misfortune is a punishment for the definite sins of a particular people. Rather, suffering is a call for repentance, a call which goes out to all. Whereas His contemporaries ask, "What is the cause of suffering?" the disciples of Jesus are to ask, "What is the purpose of suffering?"

In addition to God's purpose of summoning to repentance, Jesus knows of another purpose for which God uses suffering: some suffering serves God's glory. This purpose is not only clear in John (9:3; 11:4), but it is also implicitly contained in the statements of all four Gospels that deal with Jesus' way of suffering and the persecution of the disciples. Suffering for Jesus' sake is our occasion for joy because it serves to glorify God and is therefore recompensed by God (Mt. 5:11f.; Lk. 6:23).

When one knows God as one's Father and thus becomes a child of God, even death appears in a different light. Thus in Mt. 10:29-31, no sparrow dies without God's will; He has a hand even in that (v. 29). He has counted the hairs on His disciples' heads; His concern for His people includes even the most insignificant detail (v. 30). Then Jesus draws the logical conclusion, "You are of much more value than many sparrows" (v. 31). If no sparrow falls without God's permission, how much more is it the case that He holds the life and death of His people in His hands? This certainty frees them from anxiety, so Jesus can demand "Fear not" (v. 31).

In another saying, Jesus affirmed that God is not God of the dead but of the living (Mt. 22:32 par.). In the remarkable brevity of this saying, Jesus declares that faith in God includes the certainty of conquering death. Where one knows God as one's Father, the eternally unfathomable riddle of evil is left in God's hands. Even the devil's action is bounded by God's will. Satan has to request to be permitted to sift His disciples as one who sifts wheat (Lk. 22:31f.). Nothing happens without God. Jesus teaches that unconditionally. Stronger than all questions, riddles, and anxieties is the one word *abba*.

In the Pauline letters the description of God as Father occurs forty times, normally in liturgical formulas of blessings (Rom. 1:27; 1 Cor. 1:3; 2 Cor. 1:2), doxologies (Rom. 15:6; 2 Cor. 1:3; Eph. 1:3), creeds (1 Cor. 8:6; Eph. 4:5), and prayers (Eph. 5:20; Col. 1:12). When Paul uses, in addition to God the "Father" and "God our Father," the phrase "the God and Father of our Lord Jesus Christ," as he frequently does (Rom. 15:6; 2 Cor. 1:3; 11:31), he is emphasizing that God has revealed Himself as Father in Jesus Christ and can hence be recognized only in Him. The Fatherhood of God is not a part of nature, but an eschatological miracle (Rom. 8:14-17; Gal. 4:1-7).

Only on three occasions in the NT does the concept of God's Fatherhood appear without a christological context. In Eph. 3:14f., God in His capacity as Creator of the world is called "The Father . . . [of] every family in heaven and on earth." In He. 12:9 in His capacity as the Creator of people's souls He is called the "Father of spirits." In Jas. 1:17 as Creator of the stars, He is called the "Father of lights." It is possible that in these passages we see a trace of the doctrine of the universal Fatherhood of God which rests in creation, not redemption. This doctrine is expounded without referring to God as Father in Acts 17:27f.

III. The Modern Period
  A. Orthodoxy
  B. Unitarianism
  C. The Liberal View and the Early View
  D. Women's Liberation

I. The Early Period.—*A. The Creeds.* The creeds of the early Church offer testimony that, in line with Mt. 28:19, an expression of belief in God the Father, the Son, and the Holy Spirit soon came to form the essence of the baptismal confession. Thus a second-century creed contains a simple statement of faith "in (the Father), the ruler of the universe," in "Jesus Christ (our Redeemer)," in "the Holy Spirit (the Paraclete)" (*The Epistle of the Apostles*, 5). Another confession refers more familiarly to "God the Father Almighty, His only-begotten Son our Lord Jesus Christ, and the Holy Spirit" (the *Dêr Balyzeh Papyrus*). The baptismal office in the Hippolytan rite (*ca.* 200) poses the threefold question: "Dost thou believe in God the Father Almighty, Christ Jesus, the Son of God . . . , and the Holy Spirit?" (Hippolytus *Traditio apostolica* 21f.). From the very outset, then, belief in God the Father, along with the Son and Spirit, is an integral and constitutive part of being a Christian and making a Christian confession.

B. Early Writings. The confessional statements obviously coincide with those of the first Christian writings. One need only cite two examples, the church order known as the Didache, and Justin in his first Apology. In both these texts we learn that baptism was ordinarily given in or into the name of the Father, the Son, and the Holy Spirit.

C. The Gnostic Problem. The early confession involves

an identification of God the Father as the Creator of heaven and earth. This direct equation was opposed by Gnostic teachers and their schools in the 2nd century. As they saw it, the true God is undoubtedly the supreme Father, the author of all things, but only indirectly — through a series of emanations — is He the Creator of the present world. The real creator of this world is a demiurge who may certainly be seen as the God of the OT but who is not the same as the transcendent and ineffable Father who sent forth Christ and the Spirit. For the present world, as a world of matter, is evil, and the soul, which is from the true God, has to be redeemed out of it. Evil comes from the demiurge, not from the true God and Father.

D. The Orthodox Reply. Taught by Scripture, the Church firmly resisted this separation of Father and Creator. Hermas tells us that God "created and established all things" (Shep. Herm. Mand. 1). Clement describes God as the "Creator of the entire cosmos" (1 Clem. 19:2). The apologist Aristides identifies Him as "the creator and demiurge of all things" (15). Justin specifically dismisses any distinction between God and the demiurge (*Apol.* i.58). Irenaeus argues that in relation to origins one cannot stop at a subsidiary cause or a supposedly lesser god. All things go back to the first cause and this cause, the source and father of all things, is God (*Adv. haer.* ii.1.4; 6.1).

E. The Father as God. It should be noted that in the earliest thinking of the Church the tendency when speaking of God the Father is to conceive of Him first, not as the Father of Jesus Christ, but as the source of all being. Hence God the Father is, as it were, God par excellence. To Him belong such descriptions as unoriginate, immortal, immutable, ineffable, invisible, and ingenerate. It is He who has made all things, including the very stuff of creation, out of nothing. If He has the Son and the Spirit eternally in Himself, it is He who generates the Son and sends forth the Spirit for the purposes of creation, revelation, and redemption. Godhead and Fatherhood are coterminous.

This might seem to suggest that the Father alone is properly God and the Son and Spirit are only secondarily so. Many early statements appear to support this. Hermas gives a lower place to the Son and Spirit, whom he also tends to confuse. Justin, too, refers to veneration of the Son and Spirit in the second and third ranks. Yet one must not read too much into these less precise expressions of emerging trinitarian theology. The existence of Word and Spirit in and with God is clearly recognized. The reason why they are seen as second and third in order is not because they are so eternally in God but because their generation and procession are economic in time, i.e., for the purpose of God's dealings with what is outside Himself, not essential in eternity, i.e., in God's being in Himself. No inferiority in deity is thus involved. As Irenaeus puts it, "the Father is God and the Son is God, for whatever is begotten of God is God" (*Demonstration* 47).

II. The Trinitarian Period.–*A. Modalism.* Modalism, of course, could not accept an eternal distinction of Father, Son, and Spirit. Noetus equated God specifically with the Father and argued that if Christ is God then He must be the same as the Father. For this reason he embraced the idea of the suffering Father (patripassianism). What Christ endures, the Father endures, even to the death and passion. On this view the term Father has meaning only in the sense of the fount of all being. It has no trinitarian content. As Hippolytus pointed out, the terms "Father and Son can be used interchangeably as the situation suggests" (*Ref.* 9f.). Praxeas took a similar line, so that, as Tertullian put it, he might just as well speak of the incarnation of the Father (*Adv. Prax.* 10). The equation does not extend to Jesus, however, so that illogically Jesus as the Christ would become His own father! Sabellius gave modalism a more sensible and consistent shape by developing the intrinsically orthodox doctrine of an economic trinity. In his three major external works God manifested Himself in three modes: in creation as Father, in redemption as Son, in imparting grace as Spirit. For particular purposes the Son and Spirit came forth from the Father and then returned. They have, however, no eternal being of their own in God, who is intrinsically and eternally single as the one God.

B. Tertullian and Hippolytus. Two fathers in particular, Tertullian and Hippolytus, exposed the modalistic error and in so doing advanced trinitarian understanding. For them God in Himself, while solitary in relation to everything outside Himself, is eternally accompanied by the Word and Wisdom, each of which constitutes God a second or third time (Tertullian *Adv. Prax.* 5). It is this eternal "threeness" of God which comes to manifestation in the outside works of creation and so forth in which the Son and the Spirit act alongside the Father. On this view God the Father is the fount of deity but the Word is light from light, God a second time but not a second God, and certainly not a creature. In the more restricted sense God the Word becomes the Son only as He comes forth in God's external works, so that God the specific Father of the Son as distinct from the Father of all things assumes importance only at the economic level (*Adv. Prax.* 7). To be sure, God is essentially a trinity in unity within which the Father is the source of deity. Only economically, however, does this come to expression in the more specific relation in which God the Father begets the Word and the Word begotten by the Father is designated God the Son.

C. Novatian and Origen. Thus far the divine generation had been linked to God's external work either in creation or the Incarnation. By the middle of the 3rd cent., however, the momentous step was taken of presenting the generation itself as eternal and essential. Novatian took this step in the West. In his work *On the Trinity* (*ca.* 250) he could still call the one God the Father of all being. He could also reason, however, that since God has always been Father there must always have been a Son. This Son, deriving His being uniquely from the Father, cannot be called ingenerate as the Father is. In this sense He is subordinate to the Father as the original Godhead. Yet, being generated in eternity, and sharing the nature of the Father who begot Him, He is no less God. Origen of Alexandria took a similar step in the East. For him, as for Novatian, the Father is strictly God. But outside time, He eternally generates the Son as also God (Preface, *De prin.* 4). Since the generation is eternal the Father is essentially and not just economically the Father of the Son. A similar relation arises in the case of the Spirit too. Thus the Father, Son, and Spirit may in their eternal distinctiveness be called three hypostases (individual subsistences), although, since the deity of the Son and Spirit is by participation, this does not rule out a unity of substance (*De prin.* iv.4.1).

D. Adoptionism. Failure to keep pace with this development seems to underlie the more refined forms of adoptionism or dynamic monarchianism. Basically the adoptionists, rejecting a true Incarnation, viewed Jesus as a man upon whom the Word of Christ descended, so that he was adopted into the deity. The Word was apparently divine but impersonal, while Jesus might be called Son of God but was not God in the true sense. The Father alone

was God, the Son being man upon whom the Word came, and the Spirit being the grace that dwelt in the apostles. It is to deny that the Word has a distinct being that Paul of Samosata describes it as "of one substance with the Father." This is why a term that later came to be the touchstone of orthodoxy was condemned as heretical at Antioch in 268. The one God, the Father, embraces the Word. He becomes the Father of the Son only when the Word alights upon Jesus and Jesus is thus adopted, not generated, as the Son.

E. Arianism. While not specifically adoptionist, Arianism agrees with adoptionism in viewing the Father alone as God in the strict and proper sense. The *Thalia* of Arius show this when they say that the Father is "foreign in essence from the Son, since he alone is without beginning." Thus even when the Son was not, the Father was God. Arius builds his case on the uniqueness of God the Father. Ingenerate, He cannot communicate His own essence. Even the Son cannot also be ingenerate. Thus the Son and all other beings derive their existence from Him and exist at His will. The logic of generation supports this. Even if generation be before time, He who generates precedes Him who is generated. It follows, then, that "there was when the Son was not" — the primary Arian thesis. It also follows that the Son, not being ingenerate, is a creature, even if He is the most excellent of all creatures. As creature, he cannot be equal to God. He is not of one substance with the Father. He does not fully know the Father, for "God is ineffable to his Son." In principle, if not in fact, he is mutable. If he is called Word or Wisdom, he is not identical with, but only participates in, the Word and Wisdom that belong essentially to God. At this point the adoptionist element surfaces. Although the Son is created in eternity, it is only in virtue of his unique creation and participation that he may be called, improperly, the Son of God or even God. The Father alone, the unoriginated origin of all else, is truly God.

F. The Nicene Answer. Against Arianism, although not without a good deal of preliminary confusion, the theses were formulated that became the orthodox trinitarian teaching. The first of these acknowledges that the Father is the fount of deity, for the Son is from the substance of the Father. It is denied, however, that generation means creation: He is begotten, not made. Nor does generation impose an alien substance: He is of one substance with the Father. Furthermore, the Son can Himself be described as the Creator, for while God is still equated with the Creator of heaven and earth, and of all things visible and invisible, it is also stated of the Son that by Him all things were made.

The ultimate implication of these theses in relation to the Father is an important one. The Father is still, within the Godhead, the source of being of the Son and the Spirit. Substantially, however, the Son and the Spirit are no less God than the Father. This means that when we speak of God as the source of all being outside Himself, we do not speak exclusively of the Father but also of the Son and the Spirit. In relation to the created order the source and origin is the one God as Father, Son, and Spirit, or Father, Son, and Spirit as the one God. When we refer to God the Father, then, the primary reference must be an inner trinitarian one to the Father as the Father of the Son or the Source of the Spirit. When we speak of God the Father as the Author of all creation, we have to think of the triune God and not of God the Father as distinct from God the Son or God the Holy Spirit.

G. Augustine and Cyril of Jerusalem. This implication may be seen in Augustine's work *De trinitate.* For Augustine the one God is the triune God within whom each of the persons is consubstantial and co-inherent with the others. The distinction of persons arises only within the one Godhead. The Father is Father because He begets the Son and the Son is Son because He is begotten by the Father, and the Spirit is distinguished as proceeding from the Father and the Son. Augustine sees that the word "person" is inadequate to describe the Father, Son, and Spirit, and he finds it hard to distinguish between the generation of the Son and the procession of the Spirit, for the Father is the primary fount of divine being of both the Son and the Spirit. The problem, however, is one of human language, not of the reality it denotes. If Father, Son, and Spirit are distinguished within the trinity, the unity of God must be stressed in relation to the outward works. Creation cannot be viewed as exclusively the work of the Father, nor atonement as exclusively the work of the Son, nor regeneration and charismatic endowment as exclusively the work of the Spirit. All God's external works are works of the whole trinity; it is only by appropriation that creation is related more specifically to the Father or reconciliation to the Son. Within these works, however, the roles of the persons vary, so that while one can say that God suffered on the cross in the person of the Son one could not say that He did so in the person of the Father. The reconciling work of the Father consists in His giving of the Son, not in the giving of Himself. On the other hand, even in His death, the Son does not act without the Father and the Spirit.

If the outward works of God are works of the whole trinity, this means that God is no longer seen first as the Father in His capacity as the source of all created being. He is primarily and properly the Father within the one triune God. This is clearly expressed in the *Catecheses* of Cyril of Jerusalem. Dealing with the first article of the Creed, Cyril states plainly that God is properly Father as the Father of the Only-begotten. Then, by adoption, He is Father of those who believe in the Son. Only in an extended and figurative sense is He then Father of all created things, and this designation applies to the whole Godhead and only by appropriation to the person of God the Father. The Fatherhood of God is not just a fatherhood in relation to creation Nor, within the trinity, is it merely an economic fatherhood. It is an eternal and essential fatherhood irrespective of any external works. This fatherhood is graciously enlarged, as it were, when human creatures of God are enabled, by regeneration/adoption, to participate in the sonship of Christ and to become fellow-children and fellow-heirs of the Father in Him. In the ultimate sense, however, within the Godhead which is the source of all other being, there is only one Son. It is in virtue of this exclusive sonship, into which we are privileged to be adopted by grace and faith, that God is God the Father, and that we know and confess Him as such.

III. The Modern Period.–*A. Orthodoxy.* Throughout the 4th-16th cents. the understanding of God the Father that was achieved in reply to Arianism remained for the most part uncontested. The schoolmen examined this teaching along with all teaching, but since it seemed so plainly to derive from revelation they raised no rational objections. Similarly the reformers, while they questioned much else in the medieval tradition, saw no reason for reforming activity in this area of Christian doctrine. Indeed, even after the Reformation orthodox statements may be found in the seventeenth-century dogmaticians, and as late as the early 20th cent. a brilliant restatement of Nicene orthodoxy may be found in the *Church Dogmatics* (I/1) of Karl Barth. Discussing the Father, Barth moves from God as Creator (§ 10, 1) to the eternal Father (§ 10, 2), and ar-

gues, as Cyril did, that "God alone as He is who He is by Himself, and therefore as the eternal Father of His eternal Son, is properly and adequately to be called Father" (p. 393).

B. Unitarianism. At the same time the modern age has spawned a host of questions and alternatives, mainly on the ground that the developed doctrine either exceeds what we learn from Scripture or involves irrational enigmas. For the most part these criticisms and reconstructions have introduced nothing new but have simply led to various forms of unitarianism such as one finds in the early centuries. The principal feature is that in some way God is Father, not specifically as the Father of the Son, but more generally as the source and origin of all being.

Deism, e.g., advances a natural theology and a natural law in which God is pictured as the Creator — the celestial clockmaker — who makes the universe, imposes its laws, and leaves it to its own operation. Christ comes forward as the teacher of natural religion, but the Church has unfortunately changed His simple teaching into complicated dogmas, laws, and ceremonies. Pantheism brings an even greater simplification in which God is equated with the totality of being (i.e., reality as a whole is self-existent or self-generating) and Christ may have at best only a mediatorial role between the one, represented by God, and the many, represented by individual beings. Idealism can find a place for the trinity but only as the ultimate form of the triad that is the structure of all reality; thus Father, Son, and Spirit are merely terms for other realities, or, more properly, for abstractions, e.g., the Father as idea, the Son as opposing objectification, the Spirit as the union of the two. Unitarianism in the narrower sense can retain a high regard for the Son and the Spirit but strictly and properly only the Father is God and He is the Father of Jesus only in a quantitatively, not a qualitatively, different way. Liberal Protestantism, even when it is not expressly unitarian, focuses similarly on the extended Fatherhood of God. Harnack, e.g., says bluntly in his *What is Christianity?* that the gospel is that of the Father and not of the Son. Jesus, he thinks, taught us to see in the Father, not just His own Father, nor in fact the general Father of all creatures, but the Father of men and women. Hence the divine Fatherhood has for him a predominantly human reference.

C. The Liberal View and the Early View. Superficially the modern reinterpretation seems to be a return to the early Christian thinking which started with the concept of God as the unoriginated origin of all things and thus made the more specific equation of God and Father. Nevertheless, two important differences should be noted. First, the early Church, even if only in a rudimentary way, tried to do justice to the biblical demand that Christ and the Spirit be also accepted and confessed as God. Second, they did this not only by associating the Word and Wisdom eternally with the Father but also by discerning a specific generation of the Son (and procession of the Spirit) in relation to God's external work. For all the apparent likeness, then, the undeveloped trinitarianism of the early Church stands in marked contrast to the developed unitarianism of the modern period.

D. Women's Liberation. A more recent challenge to the confession of God the Father has come from the women's liberation movement, which dislikes the sex discrimination implied in the term father. This criticism may take extreme forms, as in a refusal to use the address in the Lord's Prayer, or in the wilder and counter-discriminatory substitution of Mother for Father. On the other hand the criticism has some healthy aspects. It has brought into focus the fact that in Scripture God can be presented as the mother of His people as well as their father. In so doing it has issued both a warning and a reminder. We are warned against a misrepresentation of the Fatherhood of God in which God is modeled on man and therefore understood as a male. We are reminded that the male-female distinction, even if it reflects the unity-in-distinction of the trinity, still belongs to man and not to God, so that the Fatherhood of God as the one who begets the Son undoubtedly embraces more than the fatherhood of the human male as a joint-progenitor of human offspring. Along these lines the criticism also plays a useful role by never allowing us to forget the inadequacy of our human language when we speak of God. Like all our terms, the word father is analogical. It points to a similarity in spite of obvious dissimilarity. It must not be taken to mean that we know what God is from what man is. If we use for God a term that applies to man we do so with a definite recollection of the difference.

For all that, the term father is valid for two reasons. First, if God is not like man, man (male and female) is like God. God has made man, if not as a replica of Himself, at any rate in His image and likeness. In human parenthood there is thus a likeness of the divine Fatherhood. Human fatherhood as an image points authentically to divine Fatherhood as the original. Second, God Himself validates the term by choosing it in the inspired writings. He validates mother as well as father, but in the intratrinitarian relation it is Father/Son, not Mother/Daughter, that is selected and used. This does not mean, as we have seen, that the Father and the Son are males, for the male/female distinction cannot be read back into God. It also does not mean, however, that God in His revelation is the victim of a male-oriented culture. In the divine likeness in Gen. 1–2, Adam's role with respect to Eve corresponds to the Father's role with respect to the Son and the Spirit — although naturally within a common and equal humanity (cf. 1 Cor. 11:2-16). It is with aptness, then, that in giving us an analogical vocabulary by which to express the divine being, God should have Himself described, not as Mother, nor neutrally as Parent, but more specifically as Father. The Son and Spirit share in creating all the being outside God, as Adam and Eve share in giving life to their descendants. But the Father is the source of the Son and the Spirit even though they be equally God, and similarly Adam is the source of Eve even though she be equally man. The term father is human, but it derives its content from the divine reality that is imaged in the human.

GOD, UNKNOWN. *See* UNKNOWN GOD.

GODDESS. There is no separate Hebrew word for goddess in the OT. In the only occurrence of the word in the OT of the RSV (1 K. 11:5, 33, Heb. *ʾĕlōhîm*), the gender is determined by name: "Ashtoreth the goddess [lit. god] of the Sidonians." In the NT the Greek term *theá*, "goddess," is applied to Diana of Ephesus (Acts 19:27, 37).

GOD-FEARER. *See* DEVOUT; DISPERSION V.C; FEAR.

GODHEAD. *See* DEITY.

GODLESS (MEN) [Heb. *ḥānēp*] (Job 8:13; 13:16; 15:34; 17:8; 20:5; 27:8; 34:30; 36:13; Prov. 11:9; Isa. 9:17 [MT 16];

10:6; 33:14); AV HYPOCRITE; NEB also "my plight" (Job 17:8), PROUD MEN (Job 36:13); [*zēḏ*] (Ps. 119:51, 69, 78, 85, 122); AV, NEB, PROUD; [*bᵉliyaʿal*] (2 S. 23:6); AV "sons of Belial"; NEB UNGODLY; [*ʾônîm*] (Prov. 11:7); AV UNJUST MEN; NEB "affluence"; [Gk. *bébēlos*] (1 Tim. 4:7; 6:20; 2 Tim. 2:16); AV PROFANE; NEB also WORLDLY.

I. In the OT.–In the OT "godless" usually renders *ḥānēp*, which means "alienated from God" (KoB, p. 317). The root *ḥnp* also includes the idea of pollution or defilement. *Zēḏ*, "insolent, arrogant," is rendered "godless" only in Ps. 119. *Bᵉliyaʿal* usually occurs in combination with "sons of," "man of," etc. Its meaning is uncertain; though the AV renders it as a proper name, in the OT it generally denotes wickedness (cf. *TDOT*, II, *s.v.* "bᵉliyyaʿal" [Otzen]). In Prov. 11:7 the AV and RSV apparently take *ʾônîm* to be the plural of *ʾāwen* ("wickedness"), following the LXX *tōn asebōn* ("the impious, irreligious"). The NEB seems to read it as the plural of *ʾôn*, "strength, riches" (cf. W. McKane, *Proverbs* [*OTL*, 1970], pp. 439f.).

The "godless" are not merely without God but assume an attitude of opposition toward God. The godless person is not merely atheistic, unbelieving, or even irreligious, but openly impious, wicked, and profane. It is hardly correct to claim that the idea of hypocrisy is involved (cf. AV "hypocrite" for Heb. *ḥānēp*), for the godless person is not one who professes one thing and lives another, but one who openly avows not only disbelief in God, but also open opposition to God.

II. In the NT.–In the NT the term is used not of persons but of Gnostic teachings. The basic meaning of *bébēlos* is "profane" as opposed to "holy." "In opposition to their claim to offer an inward truth of religion inaccessible to others, the Gnostic statements concerning God are actually seen to be outside the sphere of the holy God and His Gospel" (*TDNT*, I, 605). N. J. O.

GODLINESS [Gk. *eusébeia*] (1 Tim. 4:7f.; 6:3, 5f., 11; Tit. 1:1; 2 Pet. 1:3, 6f.; 3:11); NEB RELIGION, RELIGIOUS, TRUE RELIGION, PIETY, DEDICATED; **GODLY** [Heb. *ḥāsîḏ*] (Dt. 33:8; Ps. 4:3 [MT 4]; 12:1 [MT 2]; 16:10; 32:6; 52:9 [MT 11]; 86:2; Mic. 7:2); AV also HOLY (ONE), SAINTS, GOOD MAN; NEB "loyal servant" (Dt. 33:8), "marvellous love" (Ps. 4:3), "loyalty" (Ps. 12:1), "faithful servant" (Ps. 16:10), etc.; [*ʾᵉlōhîm*] (Mal. 2:15); [Gk. *theoú*] (2 Cor. 1:12); [*katá theón*] (2 Cor. 7:9-11); NEB "as God would have you bear it," "borne in God's way"; [*eusébeia*] (1 Tim. 2:2); NEB RELIGION; [*eusebṓs*] (2 Tim. 3:12; Tit. 2:12); NEB also GODLINESS (Tit. 2:12); [*eusebḗs*] (2 Pet. 2:9); [*eulábeia*] ("godly fear," He. 5:7); AV FEAR; NEB "humble submission." In Ps. 52:1 (MT 3) the RSV emends the MT *ḥeseḏ ʾēl* (AV lit. "goodness of God") to read *ʾel-ḥāsîḏ*, "against the godly," following the Syriac (cf. the NEB "against God's loyal servant")

In the OT the usual term is *ḥāsîḏ*, often rendered "holy" by the AV. *Ḥāsîḏ* literally means "one who has come under the bond of *ḥeseḏ*," then "one who practices *ḥeseḏ*," a term denoting loyalty, faithfulness, kindness, and thus devoutness if used of one's relationship to God. In 2 Cor. 7:9-11 the phrase *katá theón* occurs three times, referring to the kind of grief that is according to the will or pleasure of God. The *euseb-* group is used to describe the Christian life only in the Pastorals and 2 Peter. Its general meaning is "piety" as the sort of conduct that honors God. The author of the Pastorals "uses it to denote respect for the divinely created orders which his opponents [the Gnostics] despise" (*TDNT*, VII, 183). Here the problem is a movement that considers creation to be evil, advocates asceticism, and despises all the established orders and standards. In 2 Peter, on the other hand, the term is used for the moral life in contrast with the ungodly sort of conduct practiced by the libertines.

GODS [Heb. *ʾᵉlōhîm*; Gk. *theoí*]. Beings of superhuman qualities and powers conceived as dominating nature or some part of nature, whom, through proper worship, people can appease, or from whom help can be obtained.

I. OT Terms.–The English versions usually translate Heb. *ʾᵉlōhîm* (pl.) as "God." This plural form means the one deity who possesses all divine powers; this usage is sometimes called "the plural of majesty." Thus, *ʾᵉlōhîm* is to be worshiped as the one God: "Hear, O Israel: The Lord [Yahweh] our God is one Lord" (Dt. 6:4); cf. "Yahweh is greater than all gods" (Ex. 18:11); "Our God [*ʾᵉlōhîm*] is greater than all gods [*ʾᵉlōhîm*]" (2 Ch. 2:5 [MT 4]); Yahweh is "God [*ʾᵉlōhîm*] of gods [*ʾᵉlōhîm*]" (Ps. 136:2); all other gods are "not gods" (Isa. 37:19; Jer. 5:7; 16:20).

Usually the English translation of *ʾᵉlōhîm* is "God," but where the context demands it *ʾᵉlōhîm* can be translated as "gods," e.g., "Thou shalt have no other gods [*ʾᵉlōhîm*] before me" (Ex. 20:3; cf. "the gods [*ʾᵉlōhîm*] of Egypt," Ex. 12:12). Occasionally problems arise in translating *ʾᵉlōhîm*, e.g., Ps. 8:5 (MT 6) where the AV translates it as "angel," the RSV as "God," and the NEB as "a god." Often the Hebrew writers add various adjectives to make explicit that *ʾᵉlōhîm* is used as "gods," e.g., "other," as "you shall have no other gods [*ʾᵉlōhîm*] before me" (Ex. 20:3; Dt. 5:7); "their" (118 times in RSV), as "you shall not bow down to their gods" (Ex. 23:24); "strange" or "foreign" (Josh. 24:20, 23); "new" (Jgs. 5:8); or, flatly, "no gods" (Jer. 5:7). Identification is also accomplished by reference to alien peoples or nations, as to the gods of Egypt, Babylonia, Assyria, Phoenicia, Syria, Moab, Edom, Tyre, the Philistines, and the Amorites.

"To bring to God [*ʾᵉlōhîm*]" (Ex. 21:6; 22:8) is an expression for a juridical oath or a serious sort of religious test, "a common feature of the Nuzu trials" (Gordon).

Hebrew *ʾᵉlōhîm* may be translated "the gods" when it refers to Yahweh's divine council (Ps. 82:1), the host gathered about Him (1 K. 22:19; Job 1–2; Ps. 89:6f.; Isa. 40:1f.). As members of an earthly king's council come "into the king's presence" (1 K. 1:28), the *ʾᵉlōhîm* of Yahweh's court share His counsel (1 K. 22:19), are associated with His rule (perhaps reflected in "us" of Gen. 1:26), may be sent as His messengers (*see* ANGEL), can serve as single warriors for Yahweh ("commander of the army of Yahweh," Josh. 5:14), or make up God's army (Gen. 32:1f.). The context of this meaning of *ʾᵉlōhîm* may be seen in "heavenly beings" (Ps. 29:1), "sons of gods" (Ps. 29:1, RSV mg.; 89:6, RSV mg.; Ps. 97:7), and "the sons of God" (Job 38:7). (*See also* SONS OF GOD.)

II. NT Terms.–Greek *theoí* refers to deities other than God, e.g., those of the Greco-Roman pantheon. In Acts 19:27, 35-37, Diana is called by her followers "the great goddess" and "our goddess" (*see* ARTEMIS). Acts 14:11f. tell how at Lystra the crowds mistook Barnabas for Zeus and Paul for Hermes. In 17:18 Luke reports that Paul's Athenian listeners thought he was a preacher of "foreign [Asiatic?] deities" (AV "strange gods"). The Gk. *daimónion*, translated "deities" or "gods," is derived from Gk.

daímōn (cf. Eng. "demon") and is the common NT word for demon, evil spirit, or devil. In Rev. 13, the sea beast, often taken as a symbol of emperor worship with deified Caesars, is said in v. 2 to have been given "his power and his throne and great authority" by "the dragon," the author's designation of the devil or Satan. *See* RELIGIONS OF THE BIBLICAL WORLD: GRECO-ROMAN.

Paul wrote, "What pagans sacrifice, they offer to demons, and not to God" (1 Cor. 10:20). Devotees of the gods are unable to share the kingdom of God now or ever (Gal. 5:21; Eph. 5:5). One text consigns idolaters to be burned "with fire and brimstone" (Rev. 21:8). In another, the idolaters have a place only outside the new Jerusalem (Rev. 22:15).

"Although there may be so-called gods in heaven or on earth — as indeed there are many 'gods' and many 'lords' — yet for us [Christians] there is one God, the Father, . . . and one Lord, Jesus . . ." (1 Cor. 8:5f.). For the NT, pagan deities were "beings that by nature are no gods" (Gal. 4:8). He who turns to God from the gods has turned away from what is deadly and false "to serve a living and true God" (1 Thess. 1:9).

III. Ancient Near Eastern Gods.—The Sumerians first identified and listed deities, thereby setting a pattern for other Near Eastern cultures. For the Sumerians the gods were initially the forces of nature as experienced personally, but in due course acquired an overlay of mythology. The principal beneficent deities of the pantheon who supervised the cosmos were An, the sky-god, Enlil, the air-deity, Enki, lord of the abyss, Ninḫursag, a creating goddess and perhaps the consort of An, Nanna, the moon-god, the daughter of Nanna, a deity named Inanna, familiar to the Semites as Ishtar, and her husband Dumuzi (Tammuz).

The pantheon was thought to govern like an assembly under the leadership of a king. All gods were regarded as specifically human in form and activity, but possessing characteristic attributes of invisibility and immortality. Evil demons from the underworld were assumed to be the agents of misfortune, sickness, and death, bringing hapless people to the nether world from which they did not return. The Sumerians honored the members of the pantheon creatively and imaginatively in lengthy mythological texts, cultic rituals, and ceremonies, carried on in association with the worship in the early temples and later ziggurats.

The Babylonians adopted the Sumerian religious traditions and accommodated them to their own ethos. The deity that ultimately emerged as leader of the pantheon was Marduk, although Ea (Sum. Enki), the powerful water-deity, was also prominent and had his own cult center as far back as the 3rd millennium B.C., and perhaps even earlier. In the magical texts Ea and his "son" Marduk commonly cooperated in insuring the efficacy of the incantations or spells.

The mother goddess Ninḫursag (also known as Damkina, Ninki, etc.) was associated with Ea or Enlil in creating human beings, following the general Sumerian tradition. The Babylonian gods were worshiped by a variety of rituals in elaborate temples, which were controlled by a highly regulated priestly hierarchy. An important difference between Babylonian and Assyrian religion is that, in the pantheon of the latter, the war-goddess Ishtar claimed equal status with Ashur, the local deity of the Assyrian capital in the 1st millennium B.C.

King Akhenaten (1370-1353 B.C.) and Queen Nefertiti (left) make offerings to the sun-god Aten. Limestone relief on balustrade at Tell el-Amarna (photograph courtesy of Metropolitan Museum of Art)

In ancient Egypt in the 4th millennium B.C., the worship of specific deities arose in different localities. At Heliopolis, the god Atum was held to have emerged from primeval chaos, after which he created the god Shu (Show) and the goddess Tefnut, who subsequently procreated the other deities of the pantheon. The cosmogony of Hermopolis described the initial chaos in terms of a primeval ocean, Nun, who was assigned a counterpart named Naunet. Thoth, son of the falcon-deity Horus, was credited with creating the world and bringing culture to mankind. During the First Intermediate Period (*ca.* 2250-2000 B.C.) the cosmogony of Hermopolis was assimilated to that current in Heliopolis, where the sun-deity Re was honored. His cult members believed that he had created all the other gods, and that he had also given life to the world and mankind. He was immensely influential in Egyptian religion, and his worship overshadowed that of all other cults.

At an early period the pharaoh was proclaimed a son of Re, or at times even the sun-deity himself, and the cultic priests devised complicated liturgies that involved the pharaoh himself. Egyptian deities had their totem animals, so that the vulture, e.g., was associated with the goddess Nekhbet, the ibis with Thoth, the cow with Hathor, the cat with Bastet, etc. Some deities were normally depicted with a human body but having the head of the appropriate cult animal. Thus Horus had the head of a falcon, and Anubis that of a dog. Ptah and Atum, by contrast, always appeared in fully human form.

Mold-pressed glass figure of Astarte. Possibly from Syria or Mesopotamia, *ca.* 1400 B.C. (Corning Museum of Glass)

The principal deity of the Canaanite list of gods was 'El, the word being a common Semitic term for deity. In the Ugaritic mythological texts he was a vague figure at best, being overshadowed by his "son" Baal, a vegetation-deity who was also known sometimes as Haddu (Hadad), the god of wind and storm. Baal had a consort named Anath, who was variously identified with Astarte (Akk. Ishtar), Asherah, and Ashtoreth in the cultic worship of Near Eastern nations. She was depicted as a vicious and savage goddess, who according to the mythological texts delighted in slaughter. In one of the myths, Baal's leadership of the pantheon was challenged by Mot, the god of misfortune who lived in the underworld and who brought about Baal's death. The process by which Baal was revived was reminiscent of the Isis and Osiris cultic rituals in Egypt, and was linked to the cycle of seasons. Baal was worshiped in various Canaanite communities either under his own name or as Hadad.

Hittite religion, rather like that of Egypt, was distributed among a number of cults, but in general the chief deity of the pantheon was Tešub, the weather-god, who had a consort named Hebat. According to Hittite mythology they produced a "son" Sharruma, who also occupied an important place in the pantheon. Prominent in cultic

Reliefs from Khirbet et-Tannur (SE of the Dead Sea) of Atargatis as grain goddess (left) and dolphin goddess (right). This Aramean deity was Hadad's consort; her attributes are like those of the Babylonian goddess Ishtar and Phoenician goddess Astarte (E. K. Vogel; picture American Schools of Oriental Research)

Procession of twelve unidentified Hittite gods. From Yazilikaya, near Boghazköy in central Anatolia (B. K. Condit)

worship was the goddess Shaushka, commonly identified with Ishtar. All of these were Hurrian deities, and along with such familiar Mesopotamian gods as Anu, Enlil, Ea, and Damkina, found a ready place in the syncretistic religion of the Hittites.

Gods of the indigenous Hatti that were venerated included the sun-goddess Wurusemu, along with her "daughters" Mezulla and Hulla, as well as an agriculture-deity named Telipinu. The official state pantheon was based on the identities of gods venerated at local shrines; Wurusemu was the principal deity at Arinna, "Queen of the land of Hatti," the great Hittite religious center. Her consort was Taru, the weather-god of Hatti, described as "King of Heaven," and he was also a god of war who represented Hittite interests in treaties with foreign powers.

In ancient cultic worship the gods were often represented as exhibiting rather fluid personalities, so that it was not always possible for them to be described consistently. Furthermore, the identification of deities with certain comparable gods from other nations was also common, so that a goddess such as Ishtar could be worshiped across the ancient Near East under a variety of names.

GOG gog [Heb. *gôg*; Gk. *Goug, Gōg*].

1. A son of Joel and descendant of the tribe of Reuben (1 Ch. 5:4).

2. The chief prince of Meshech and Tubal (Ezk. 38:2f.; 39:1-16). His territory was known as the land of Magog, and he was the chief of those northern hordes who were to make a final onslaught upon Israel while the latter was enjoying the blessings of the messianic age. He has been identified with Gugu, known in his own land of Lydia as Gyges, and mentioned in the records of Ashurbanipal. The phonetic similarity is too uncertain for positive identification, however.

According to Ezekiel's account Gog's vast army included men from Persia, Cush, Put, Gomer (or the Cimmerians), and Togarmah, all from the extreme north, completely equipped for war. They were to come upon the mountains of Israel and cover the land like a cloud. Their purpose was plunder, for the people of Israel were rich and dwelt in towns and villages without walls. Gog's coming, which had been prophesied by the seers of Israel, was to be accompanied by a theophany and great convulsions in nature. A panic would seize the hosts of Gog; rain, hailstones, pestilence, fire, and brimstone would consume them. Their bodies would be food for the birds, their weapons would serve as firewood for seven years, and their bones would be buried E of the Jordan in Hamon-gog and thus not defile the holy land.

Perhaps Ezekiel had in mind something of the eschatology of Zec. 14, in which the nations that represented "the ends of the earth" would rise against Jerusalem in a final, desperate battle in which God will intervene by returning to earth.

See also EZEKIEL V.E.

3. In Rev. 20:7f. Satan is let loose and goes to the nations at the four corners of the earth, Gog and Magog, to muster his hosts for the final struggle against God. In Ezekiel the invasion of Gog occurs during the messianic age, while in Revelation it occurs just at the close of the millennium. In Ezekiel Gog and Magog are gathered by Yahweh for their destruction; in Revelation they are gathered

by Satan. In both cases the number is vast; the destruction, by supernatural means, is complete and final. *See* MAGOG.

J. J. REEVE R. K. H.

GOIIM goi'im [Heb. *gôyim*]. This term occurs only in Gen. 14:1, 9 and Josh. 12:23 in the RSV, replacing the "nations," "heathen," or "Gentiles" of most English versions. The Genesis references indicate a Mesopotamian nation or tribal group, perhaps non-Semitic in character. An identification with early Hittites on the basis of some similarity between the name Tidal and a royal Hittite personage named Tudḫalias has been suggested with some plausibility. The people mentioned in Josh. 12:23 (NEB "Gaiam") have been related by some scholars to the Philistines. The RSV and NEB follow the LXX in referring to "Galilee," whereas the MT has "nations to Gilgal." This latter might thus refer to some group located in the region of Aphek.

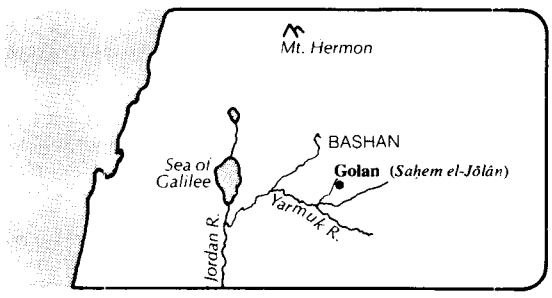
R. K. H.

GOLAN gō'lan [Heb. *gôlān*–possibly 'dust and sand'; Gk. *Gaulōn*]. A city in the territory allotted to Manasseh in Bashan The surrounding region to which it gave its name is Gaulanitis, mentioned often in Josephus.

Golan was one of the cities of refuge (*see* REFUGE, CITIES OF), the most northerly of those in Transjordan (Dt. 4:43; Josh. 20:8). It was assigned to the Gershonites, one of the families of the Levites (Josh. 21:27; 1 Ch. 6:71). The city was known to Josephus, who listed it among the cities taken by Alexander Janneus in Transjordan (*Ant.* xiii.15.3 [393]). The site of Golan has not been identified positively, but Abel (*GP*, II, 73) and others suggested Saḥem el-Jōlân as a possibility. This site, located about 16 km. (10 mi.) NW of Der'ā and 27 km. (17 mi.) E of the Sea of Galilee, would seem to be too far E to be located in the territory of Gaulanitis, or the modern Jōlân.



Gaulanitis (also spelled Gaulonitis), as the Greek word suggests, was the region belonging to Gaulan or Golan. (The Greek form *Gaulanitis* indicates that the original vocalization of the Hebrew was *Gawlān*.) Josephus made frequent use of this term; thus it is relatively easy to identify its location. Gaulanitis formed the east boundary of Galilee and was part of the tetrarchy of Philip (*Ant.* xvii.8.1 [189]; xviii.4.6 [106]; cf. Lk. 3:1). If we may judge from the boundaries of modern Jōlân, Gaulanitis extended from the foot of Mt. Hermon in the north to the Yarmuk River in the south. The east boundary is not clearly marked but may have been the Nahr er-Ruqqâd or the Nahr el-'Allan; if we are to identify Saḥem el-Jōlân with Golan, then we must push the boundary E of the Nahr el-'Allan. The territory, about 70 km. (45 mi.) long, is chiefly a plateau sloping N-S. The elevation at el-Quneitra is 1010 m. (3323 ft.), and at Khifsîn is 478 m. (1570 ft.) (see *GP*, I, 14). Along the west, numerous wadis cut their way into the upper Jordan River and the Sea of Galilee. A line of volcanic cones, rising 150-210 m. (500-700 ft.) above the surface of the plateau, runs in a NNW-SSE direction in northern Jōlân, just W of Wâdī er-Ruqqâd. Northern Jōlân is rather arid, but the south is well irrigated, with many springs (according to Abel seventy-five springs or groups of springs in addition to wells and reservoirs; *GP*, I, 153). The area has always provided excellent pastureland for nomads, and in addition produced wheat and some olives. There are traces of ancient forests, but today the region is practically without trees. *See* Vol. I, Map VI.

W. S. L. S.

GOLD. This highly prized metal is mentioned 385 times in the Bible, more often than any other metal. In spite of its frequent mention it was not native to Palestine. It had to be imported from OPHIR, Havilah (Gen. 2:11f.), Sheba (1 K. 10:2 par. 2 Ch. 9:10, 14), Raamah (Ezk. 27:22), and Uphaz (Jer. 10:9; Dnl. 10:5). The location of these areas remains uncertain (cf. *TDOT*, IV, 36).

The most frequently used OT word for "gold" is Heb. *zāhāḇ*, rendered at times "pure gold" (*zāhāḇ sāgûr*, 1 K. 6:20; 2 Ch. 4:20; etc., and *zāhāḇ ṭāhôr*, Ex. 25:11; 2 Ch. 3:4; etc.), "refined gold" (*zāhāḇ mᵉzuqqāq*, 1 Ch. 28:18), "fine gold" (*zāhāḇ ṭôḇ*, 2 Ch. 3:5), "finest gold" (*K zāhāḇ mûpaz*, 1 K. 10:18), etc. It occurs with silver and other metals and has a wide range of application. Less frequent

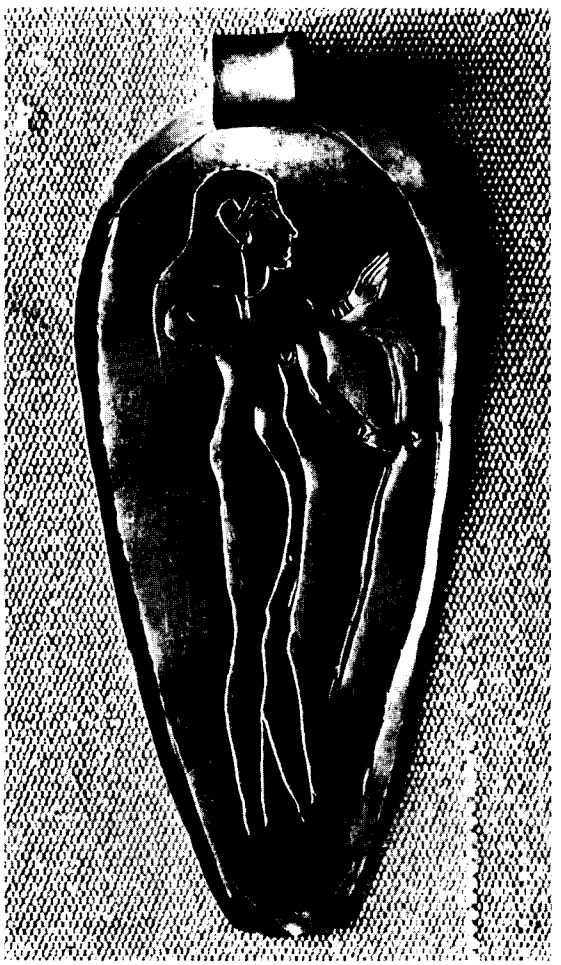
Late Bronze pendant from Beth-shean showing a goddess holding a scepter (Israel Department of Antiquities and Museums)



are Heb. *paz*, *ḥārûṣ* (rendered "green gold," *yᵉraqraq ḥārûṣ*, in Ps. 68:13 [MT 14]; AV, NEB, "yellow gold"), *keṯem* and *sᵉgôr* (or *sāgûr*; cf. *BH*, Job 28:15), and Aram. *dᵉhaḇ*. Many of these terms occur only in wisdom literature; *dᵉhaḇ* is found only in Ezra (chs. 5, 7) and Daniel (chs. 2, 5) and refers to inanimate objects. *Paz* seems to have been the most precious gold (cf. Isa. 13:12), valued above *zāhāḇ* (Ps. 19:10 [MT 11]; 119:127) and *ḥārûṣ* (Prov. 8:19).

While *bāṣer* in Job 22:24 ("gold," RSV, AV) may refer to gold ore (*TDOT*, IV, 34), *bᵉṣār* in Job 36:19 should not be related to gold (AV, cf. NEB) but to *ṣār*, "distress" (RSV), *lō' bᵉṣār* meaning "not with affliction" (cf. KD, *in loc.*). The AV mg. follows MT *zāhāḇ* in Job 37:22; the RSV ("golden splendor") and the NEB ("golden glow") are based on the emendation to *zōhar*, "brightness"; *TDOT*, IV, 37 favors the MT, while KoB, p. 252 favors the emendation. On the interpretation of Isa. 14:4 *see* GOLDEN CITY.

The NT words for gold are *chrysíon*, and cognates *chrysós*, *chrysoús* (2 Tim. 2:20; Rev. 9:20; 21:15), and *chrysodaktýlios*, "gold-fingered" ("with gold rings," Jas. 2:2). "Pure gold" renders Gk. *chrysíon katharón* (Rev. 21:18, 21), while "golden" is *chrysoús*.

Gold was very important in public worship. The calf fashioned by Aaron and worshiped by the Israelites was made of gold contributed by the congregation (Ex. 32:2-4, 24). It was made by melting gold and later engraving the casting; thus it appeared to have been both a molten image (v. 24) and a graven image (v. 4). Gold was used lavishly in the construction of the tabernacle. The wooden ark was to be covered with gold within and without (Ex. 25:11). Most of the furniture of the building was gold-plated. The vessels and utensils were of "pure gold." The accoutrements of the high priest, including his crown, ephod, and breastplate, were also of gold (Ex. 39:2-30).

The offerings for worship in the wilderness included golden dishes totaling 120 shekels in weight (Nu. 7:86; *see also* WEIGHTS AND MEASURES). Gold was used even more lavishly in the temple of Solomon (1 K. 6:20-28; 2 Ch. 3:4–4:22; cf. 1 Ch. 29:2-7).

Gold acquired great importance in commercial exchanges. The annual importation of gold during the "golden age" of Solomon was said to total more than 666 talents (1 K. 10:14), some of which was made into "beaten gold" (MT *zāhāḇ šāḥûṭ*, lit. "slaughtered [i.e., hammered"] gold," so BDB, p. 1006; cf. J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 265) for ornamental shields (1 K. 10:16f. par. 2 Ch. 9:15f.). Gold was used almost exclusively in temple and palace since silver "was not considered as anything in the days of Solomon" (1 K. 10:21). Hiram of Tyre gave Solomon 120 talents of gold, although it is not stated on what basis (1 K. 9:14; KD, *in loc.*, suggests it was a loan).

The twofold use of gold among the Hebrews caused a twofold sin. (1) In wisdom literature the excessive preoccupation with the accumulation of gold was condemned and gold was valued below wisdom (Job 28:15, 17; Prov. 3:14; 8:10, 19; 16:16) and (religious) knowledge (Ps. 19:10 [MT 11]; 119:72, 127; Prov. 20:15; cf. 1 Pet. 1:7, where faith is valued above gold). Job resolved not to place his trust in gold (Job 31:24). Later it became a "stumbling block of their iniquity" (Ezk. 7:19), and though they were devoted to it as to a god, it could not avert God's judgment (Zeph. 1:18). (2) The worshiping of golden images (e.g., Ps. 115:4; Isa. 2:20; 31:7; Hos. 8:4) began in the wilderness wanderings and intensified at the beginning of the separation of Israel from Judah (1 K. 12:28f.). It became a substitute for the true worship of Yahweh but was declared to be of no value to the Hebrews (Isa. 46:5; Ps. 135:15; cf. Hos. 8:4).

But gold also retained its (positive) value. In Isa. 60:6 the possession of gold and the worship of Yahweh are compatible, and God will give gold instead of bronze (v. 17) for the rebuilding of the temple. Since gold belongs to God (Hag. 2:8), He can dispense it to His people (Hos. 2:8; cf. Ezk. 28:13, alluding to creation, and Isa. 13:12, possibly referring to judgment; cf. also its use in imagery in Prov. 25:11f.; Cant. 5:11, 14f.; Lam. 4:2).

The same ambiguity toward gold persisted in the NT. It was deemed "perishable" (1 Pet. 1:18; cf. Jas. 5:3). The apostles considered the possession of gold unnecessary (Mt. 10:9; Acts 3:6). The wearing of gold was not to be considered an indication of worth (Jas. 2:2); indeed, such ornamentation was expressly forbidden by Paul and Peter (1 Tim. 2:9; 1 Pet. 3:3).

On the positive side, the church at Laodicea was admonished to purchase "gold" (Rev. 3:18), i.e., "spiritual wealth that has passed through the refiner's fire and has been found to be totally trustworthy" (R. H. Mounce, comm. on Revelation [*NICNT*, 1977], p. 127). The wise men brought gold to the infant Jesus (Mt. 2:11), and the Holy City (Jerusalem) will consist of "pure gold, clear as glass" (Rev. 21:18). But mixed feelings remained: the elders wore "golden crowns" (Rev. 4:4), but the "great harlot" was "bedecked with gold" (17:4; cf. 18:16) too. It represented real wealth and served as a standard by which to measure wealth (1 Pet. 1:18); it also could be deceptive and worse than useless if it obscured higher moral and spiritual values (1 Tim. 6:9f.).

Of interest is the image of testing in 1 Cor. 3:12f., an image that has a long OT history (cf. Prov. 17:3; 27:21; Zec. 13:9; Mal. 3:3). If the believer builds his life with Christ as the foundation, his golden works will endure the testing by fire on the Day of Judgment (F. W. Grosheide, comm. on 1 Corinthians [*NICNT*, 1953], pp. 85-87).

GOLDEN CALF. *See* CALF, GOLDEN.

GOLDEN CITY. The translation "golden city" (AV, Isa. 14:4) is an attempt to render the TR Heb. *maḏhēḇâ*, but can hardly be justified. (But cf. KD *in loc.*) Almost all the ancient versions read Heb. *marhēḇâ*, a word which connotes unrest and insolence, fitting the context well (cf. RSV "insolent fury"; NEB "frenzy").

GOLDEN RULE. A title commonly applied to the saying of Jesus in Mt. 7:12: "So whatever you wish that men would do to you, do so to them; for this is the law and the prophets" (cf. Lk. 6:31: "And as you wish that men would do to you, do so to them"). In the context of Matthew's Sermon on the Mount, it sums up the conduct demanded of Jesus' disciples (Mt. 5:2–7:27). The "golden rule" is a summary statement of the moral exhortations of the Law and the Prophets, given by Jesus to guide His followers. Thus, He claimed to fulfil the Law and the Prophets and demanded that the disciples, in their conduct, do the same.

The "golden rule" is not to be understood, however, as a new legal precept, but rather as a simplified reassertion of what the Decalogue taught concerning behavior toward others (Ex. 20:13-17; Dt. 5:17-21). In Matthew's Gospel, the triad of the "golden rule" and the twofold commandment of loving God above all and one's neighbor as oneself reflected Jesus' understanding of the law (Davies, p. 93). The twofold commandment is also said to be a summation of the Law and the Prophets (Mt. 22:37-40); Jesus is teaching the essence of the Law, not a new law.

The "golden rule" as it appears in Luke is found in abbreviated form, lacking the statement concerning the Law and the Prophets. Here the saying is not a summary statement, but part of a section of teaching that concerns itself with the ideal response of the disciples to persecutors and enemies, a response of merciful and generous love (Lk. 6:20-38; cf. Marshall, pp. 243-45; 261f.).

The general principle of reciprocity embodied in the "golden rule" is not unique to Jesus' teaching. Among the Greeks, Isocrates stated a similar principle: "You should be such in your dealings with others as you expect me to be in my dealings with you" (*Nicocles or The Cyprians* 49). Similar maxims are found in the Apocrypha and Pseudepigrapha that antedate the ministry of Jesus. "As you wish that no evil should befall you, but to be a partaker of all good things, so you should act on the same principle towards your subjects and offenders" (Letter of Aristeas 207). "Just as a man asks [something] for his

own soul from God, so let him do to every living soul" (2 En. 61:1; cf. Tob. 4:15). None of these sources considers this principle to be a summation of the Law and the Prophets. This idea is, however, found in the story of Rabbi Hillel's advice to a proselyte who asked him to explain the whole law while the proselyte stood on one foot. Hillel is reported to have replied, "That which displeases you do not do to another. This is the whole law; the rest is commentary" (T. B. *Shabbath* 31a). The concluding remarks are similar to those of Mt. 7:12, indicating that there was a belief in first-century (A.D.) Judaism that the revelation of God in the OT could be taught in a single principle.

Some have concluded (e.g., R. G. Hammerton-Kelly, *IDB Supp.*, p. 369) that the "golden rule" originated in the Sophist movement in Greece (5th cent. B.C.), was taken over by Hellenistic Judaism, and from there found its way into early Christian teaching. It is incontestable that Christianity derived this principle from Judaism, but an ultimate origin in Stoicism may be doubted since the rule is also found in the distant writings of Confucius: "Tzu Kung asked: 'Is there any one word that can serve as a principle for the conduct of life?' Confucius said: 'Perhaps the word "reciprocity"; Do not do to others what you would not want others to do to you'" (*Analects* XV. 23). It may be that the embodiment of the principle of reciprocity in a single maxim was an attempt in several cultures to distill the essence of ethical teaching.

The "golden rule" appeared many times in later Christian literature. It is found in a negative form in the Did. 1:2. Tertullian, while attacking Marcion's concept of God, gave both the positive and negative forms of this precept (*Adv. Marc.* iv.16).

The "golden rule" in both Mt. 7:12 and Lk. 6:31 is applied specifically to the community of those who are disciples of Jesus (Mt. 5:1; Lk. 6:20), who are expected to suffer on His behalf (Mt. 5:11; Lk. 6:22). This removes the "golden rule" from the realm of a general ethical teaching for mankind and places it in a special relationship between Jesus and the Church.

GOLD-PLATED [Heb. *'puddaṭ zāhāḇ*–'ephod of gold'] (Isa. 30:22); AV ORNAMENT OF GOLD; NEB SHEATHED IN GOLD; **GOLD-WOVEN** [Heb. *mimmiš-bᵉṣôṭ zāhāḇ*] (Ps. 45:13 [MT 14]); AV WROUGHT GOLD; NEB CLOTH-OF-GOLD. The manufacture of golden images was one of many ways in which the Hebrew GOLDSMITH used his skill (cf. Jgs. 8:26f.; Jer. 10:14). Special clothing was also ornamented with gold, either brocade of filigree, e.g., the priests' garments in Ex. 28:5-38.

See GOLD.

GOLDSMITH [Heb. *ṣōrēp*]. The only biblical references to the activities of this skilled craftsman are in the OT, alluding to the goldsmith as the one who fashioned elegant and costly idols (e.g., Jer. 10:9, 14; 51:17; AV "founder").

Superb examples of the goldsmith's art have been recovered from numerous early Sumerian levels, one of the more significant artifacts being the celebrated golden helmet from Ur, found in a first-dynasty burial pit. This object had been fashioned from solid gold in the form of a wig, on which the locks of hair had been hammered in relief and the individual hairs engraved with great delicacy and skill. A new decorating technique known as granulation appeared in the Middle Bronze Age; this consisted of tiny spheres of gold arranged in pattern form and then brazed onto the golden surface.

Like other peoples, the Hebrews employed the art of the goldsmith in their environment of worship, both in the tabernacle (cf. Ex. 31:4; 35:32) and the Solomonic temple (cf. 1 K. 6:20-35). In the postexilic period the guilds of goldsmiths were involved in the repair and restoration of Jerusalem (Neh. 3:8, 31f.; AV "goldsmiths"). Most large Near Eastern cities had a specific area in which the goldsmiths plied their craft.

R. K. H.

GOLGOTHA gol'gə-thə [Gk. *Golgotha* < Aram. *gûlgaltā*'–'the skull' (cf. Heb. *gulgōleṯ*, Jgs. 9:53; 2 K. 9:35)]. In three references (Mt. 27:33; Mk. 15:22; Jn. 19:17) it is interpreted to mean (Gk.) *kraníou tópos*, "the place of a skull." In Lk. 23:33, AV, it is called "Calvary" (from Vulg. *calvaria*, "skull"), but in the RSV and NEB simply "The Skull." From the NT we may gather that it

Goldsmith at work; detail from N. Davies' painting of a mural in the tomb of Nebamen and Ipuki (late 20th Dynasty) at Thebes (Oriental Institute, University of Chicago)

Helmet from Ur made from a single sheet of gold (*ca.* 2500 B.C.) (State Antiquities Organization, Republic of Iraq)

was outside the city (He. 13:12), but close to it (Jn. 19:20), apparently near some public thoroughfare (Mt. 27:39). It was a spot visible from afar (Mk. 15:40; Lk. 23:49); this is the only possible biblical basis for calling Calvary a hill.

I. The Name.–Three reasons have been suggested for the name Golgotha or "skull." (1) It was a spot where skulls were to be found lying about and probably therefore a public place of execution. This tradition apparently originated with Jerome (*ca.* A.D. 347-420). (2) The name was due to the skull-like shape of the hill — a modern popular view. None of the church fathers suggested such an idea, and the NT offers no evidence that the crucifixion occurred on a raised place at all. (The tradition embodied in the name *Mons Calvary* appeared as early as the 4th cent., materialized in the traditional site of the crucifixion in the Church of the Holy Sepulchre.) (3) The name was due to an ancient pre-Christian tradition that the skull of Adam was found there. The first mention of this came from Origen (*ca.* 185-254), who himself lived in Palestine many years. This is by far the most ancient explanation of the name Golgotha, and may, in spite of the absurdity of the original tradition about Adam, be the true one.

II. The Site.–The NT gives no indication whatever about the position of Calvary and the tomb; indeed, by those who abandon tradition, sites have been suggested on all sides of the city. Two views dominate today: (1) the site of the crucifixion, or at any rate that of the tomb, is included within the precincts of the Church of the Holy Sepulchre; (2) a prominent, rounded, grassy hill above the so-called "Grotto of Jeremiah," NE of the modern Damascus Gate, is probably the true site. Both lie on the northeast side of ancient Jerusalem.

The Church of the Holy Sepulchre has the support of traditions going back to the 4th cent. The historian Eusebius (A.D. 263-339) stated that on the site stood a temple to Aphrodite (*Vita Constantini* iii.26). The church itself was erected on the same spot during the reign of Constantine and dedicated in A.D. 335. The tradition known to Eusebius may well be correct, but we cannot trace it back any further. The real question to be faced is whether the true site was forgotten when Jerusalem fell to the Roman armies in A.D. 70 and again in 135; the latter capture resulted in a drastic rebuilding of the city that may well have obliterated the true site. The traditional site has also been opposed in the past on the grounds that it may have lain within the city walls of Our Lord's time; but the latest excavations in Jerusalem have shown that the city wall must almost certainly have run to the south of the site of the church. See K. M. Kenyon, *BA*, 26 (1964), 34-52; she concludes, "The site of the Church. . . . may be based on an authentic tradition surviving to the time of Queen Helena [Constantine's mother]" (p. 50). *See* Plate 40.

The so-called skull hill appears to have appealed first to Otto Thenius (1842), but received its greatest support through the advocacy of Colonel Conder and General Gordon (thus the site is often called "Gordon's Calvary"). Two main arguments for this site are: (1) Its conspicuous and elevated position must impress every reverent pilgrim as strikingly suitable for an imaginary reconstruction of the scene. The very greenness of the hill may influence the subconsciousness of those who have been brought up from childhood to think of the "green hill far away," as the popular hymn puts it. But an imaginary reconstruction is not evidence. (2) The supposed resemblance to a human skull strikes many people, but it may be stated without hesitation that the most arresting points of the resemblance, the "eyeholes" and the rounded top, are not ancient; the former are due to artificial excavations going back perhaps a couple of centuries. Probably the whole formation of the hill is an entirely new condition since NT times.

Gordon's Calvary, one of the traditional sites of Golgotha (W. S. LaSor)

Thus probability favors the traditional site, though there can be no certainty. If it is not the true site, however, there are still no grounds for accepting "Gordon's Calvary" either.

GOLIATH gə-lī'əth [Heb. *golyāṯ*; Gk. *Goliath*].

1. The giant of Gath, and champion of the Philistine army (1 S. 17:4-23; 21:9; 22:10; 2 S. 21:19; 1 Ch. 20:5ff.). He defied the armies of Israel, challenging anyone to meet him in single combat while the two armies faced each other at Ephesdammim. He was slain by the youthful David.

It is probable that Goliath was not actually of Philistine stock, but instead was a descendant of an aboriginal group such as the Rephaim, Anakim, or Awim. These peoples may have served as combat troops in the Philistine forces, and some of them were certainly living in the area of Gath at the time of Saul (cf. 2 S. 21:22; 1 Ch. 20:8). The stature of Goliath was unusual, and if the cubit is taken at 45 cm. (18 in.), he would have been almost 3 m. (9 ft.) in height. (*See* DISEASE III.F; GIANTS.) The details of his encounter with David are in complete accord with the traditions of combat between two champions in the Near East.

2. The reference in 2 S. 21:19 to a Goliath slain by Elhanan seems to be the result of a transcriptional error in the text. When read in the light of 1 Ch. 20:5 it becomes clear that it was the brother of Goliath, not Goliath himself, who was killed by Elhanan.

See also ELHANAN **1.** R. K. H.

GOMER gō'mər [Heb. *gômer*; Assyr. *Gimirrai*; Gk. *Kimmerioi*].

1. A nomadic people descended from Japheth and known also as Cimmerians. In the ancient geographical list of Gen. 10:2f.; 1 Ch. 1:5f. (*see* TABLE OF NATIONS)

Gomer appears among the Indo-European Japhethites, closely related to the Medes, Ionians, and certain peoples of Anatolia, and the Scythians (Ashkenaz). A similar association is implied in Ezk. 38:6, where Gomer supplies a part of the force of Gog, beside the Persians and other nations. These are the only biblical references to the Cimmerians.

The information of the OT can be supplemented with historical allusions from Akkadian sources and references in various classical writers, together with a certain amount of archeological evidence. The Cimmerians were nomadic herdsmen, apparently unacquainted with the horse as a mount, and distinguished for their archery (Babylonian texts of the 6th cent. B.C. list numbers of Cimmerian bows and arrows, after the Cimmerians as a people had ceased to exist). The few personal names preserved suggest that they were of Iranian stock, related to the Scythians, but this is disputed by some scholars.

Late in the 2nd millennium B.C. they were driven from their homeland N of the Caucasus into those mountains and into the Crimea by the Scythians, when their attempted expansion eastward into China was repulsed. The horse-riding Scythians continued to press the Cimmerians across the Caucasus and into Azerbaijan (Mannai), Armenia, Anatolia, and Eastern Europe. By the end of the 8th cent. B.C. the influx of Cimmerians was felt in all the peripheral states N and E of the Fertile Crescent. The power of Urartu was severely curtailed and the Assyrian king Sargon II was probably killed in a battle that prevented them from penetrating S of Lake Van (705 B.C.). The governors of Esarhaddon of Assyria defeated another attack in the Taurus Mountains in 679 B.C., though the Cimmerians continued their penetration by serving as mercenaries in the Assyrian army. By 670 the Cimmerians had taken control of central Anatolia, overrunning the Phrygians (Meshech) and their king Midas.

Their first assault upon the Lydians was defeated when Gyges gained Assyrian aid *ca.* 663 B.C.; but they took Sardis in 652 B.C., after Gyges had rebelled against Assyria, and held it until Alyattes drove them out in 626 B.C. Until that date they constantly threatened to break through into Assyrian territory, but thereafter the Scythians gradually subjected the Cimmerians, who were absorbed into the local populations and disappeared from history, leaving only their name as the Armenian term for Cappadocia, Gamirkʿ.

Bibliography.–*CAH* (3rd ed.), II/2, 425f.; T. Sulimirski, *Bulletin of the Institute of Archaeology* (of the Univ. of London), 2 (1959), 45-66. A. R. MILLARD

2. Wife of Hosea. Hosea married Gomer according to divine appointment, and this was the beginning of God's word to him (Hos. 1:3; 3:1-4). She was to be a wife of whoredom and they were to have children of whoredom.

This fact has been accounted for by the suggestion that Gomer was a temple prostitute before her marriage; but unfortunately very little is known about the women who acted as prostitutes in the Baal fertility cults, and even less about such persons in a possible relationship to the Jerusalem cultus. Some scholars have adopted various interpretative devices to make Gomer rather more reputable, but the text leaves little doubt that Gomer was a practicing harlot before her marriage to Hosea, and that subsequently she went deeper into sin. She seems to have left him and become the slave of her paramour (3:1). Hosea is then commanded by Yahweh to buy her back, paying the price of the ordinary slave. The prophet kept her in confinement and without a husband for some time.

This experience of the prophet was typical of Israel's unfaithfulness, of Israel's exile, and of God bringing her back after the punishment of the Exile.

GOMORRAH gə-môr'ə [Heb. *ʿāmōrâ*; Gk. *Gomorra*]. One of the CITIES OF THE VALLEY, destroyed by fire for its wickedness in the days of Lot (Gen. 19:23-29).

Good topographic and geographic factors indicate that the "cities of the valley" were not the Middle Bronze Age communities lying on the eastern side of the Ghor terrace of the Jordan River, but were situated in an extension of the Circle of the Jordan at the south end of the Dead Sea, immediately S of the peninsula known as el-Lisan (*see* Plate 7). Soundings in this locality indicate that the water is far shallower S of the promontory than N of it (*see also* DEAD SEA). Whereas Sodom was probably situated W of where the stream Seil en-Numeirah enters the Dead Sea, Gomorrah was probably located near the mouth of the Seil 'Esal, a little farther to the north. The conflagration probably resulted from an explosion of petroleum gases in the area.

It is incorrect to identify Gomorrah with Khirbet Qumrân, despite superficial resemblances.

GONG [Gk. *chalkós*–'(brass) gong'] (1 Cor. 13:1). *See* MUSIC II.D.

GOOD.

I. Terminology.–The 650 uses of "good" in the RSV translate a variety of Hebrew and Greek terms. By far the most common are Heb. *ṭôḇ* and Gk. *agathós*. Other frequent words are Heb. *ṭûḇ* ("good thing," Dt. 6:11; "the good," Isa. 1:19), the hiphil of *yāṭaḇ* ("do good," e.g., Gen. 32:12 [MT 13]; Zeph. 1:12), and Gk. *kalós* (e.g., Mt. 3:10; Jn. 10:11).

Hebrew *ṭôḇ* contains all the moral and nonmoral nuances mentioned under II below. Gk. *agathós* has basically a moral meaning. Gk. *kalós* can mean "beautiful" (Bauer, rev., p. 400), is sometimes synonymous with *agathós*, as in Jn. 10:32 ("good works") and Tit. 2:7 ("good deeds"), and expresses the quality of goodness in Mt. 3:10 and Lk. 3:9 ("good fruit").

The RSV uses "good" in translating various phrases. Thus in 2 Tim. 2:14 the RSV translates Gk. *epʾ oudén chrēsimon* as "does no good," in Lk. 13:9 *eis tó méllon* as "well and good," in 1 Cor. 9:11 *tá pneumatiká* as "spiritual good," in 10:24 *tó heautoú* as "his own good," and in He. 11:12 *taúta nenekrōménou* as "as good as dead." The RSV retains the AV rendering of *eudokía* as "good pleasure" in Phil. 2:13 (cf. Lk. 12:32), but changes it to "purpose" in Eph. 1:9. The RSV's "good news"

sometimes replaces the AV's "gospel," "good tidings," and "glad tidings" (*see* GOOD NEWS).

II. Uses.--The term "good" has many nuances, both nonmoral and moral. (1) Useful for the accomplishment of some end or purpose: "the waistcloth was . . . good for nothing" (Jer. 13:7, 10), "good for edifying" (Eph. 4:29). (2) Pleasing, agreeable: "good-looking" (Gen. 39:6), "good fruit" (Jgs. 9:11), "good wine" (Jn. 2:10). (3) Advantageous, profitable: "it is vain to serve God. What is the good of our keeping his charge . . . ?" (Mal. 3:14), "to each is given the manifestation of the Spirit for the common good [Gk. *sympheron*]" (1 Cor. 12:7). (4) Fitting, appropriate: "we have sinned; do to us whatever seems good to thee" (Jgs. 10:15), "your boasting is not good" (1 Cor. 5:6). (5) Abundant, full measure: "good success" (Josh. 1:7), "a good old age" (e.g., Gen. 15:15). (6) Generous, benevolent: "My generosity" (Mt. 20:15; AV "good"; NEB "kind"), "kind and gentle" (1 Pet. 2:18; AV "good and gentle"). (7) Free from defects, sound, fine (usually Gk. *kalós* in contrast to *saprós*, "decayed," "rotten," or *ponērós*, "in poor condition," "sick"): "good fish" (Mt. 13:48), "either make the tree good, and its fruit good . . ." (Mt. 12:33), "good fruit" (7:17f.). (8) In every respect unobjectionable, excellent: "a good wife" (Prov. 31:10), "you will be a good minister of Jesus Christ" (1 Tim. 4:6). (9) Morally upright, righteous: "and you shall do what is right and good in the sight of the Lord" (Dt. 6:18), "a good man" (Jn. 7:12), "good deeds" (1 Tim. 5:10). (10) Just: "learn to do good; seek justice, correct oppression" (Isa. 1:17), "for rulers are not a terror to good conduct, but to bad" (Rom. 13:3).

Greek *agathē syneidēsis* ("good conscience," Acts 23:1; 1 Tim. 1:5, 19) designates a "clear [Gk. *kalós*] conscience" (He. 13:18), cleansed by Christ's sacrifice from "dead works" unto service of the "living God" (He. 9:14). According to Prov. 19:11 it is a mark of "good sense" (Heb. *śēkel*, "insight, prudence," KoB, p. 922; NEB "intelligence") to restrain one's anger (cf. Jas 1:19). To say "neither good nor bad" (Gen. 24:50; 31:24; 2 S. 13:22) signifies that nothing can be added or altered. The phrase "no knowledge of good and evil" (e.g., Dt. 1:39) may be a Hebrew way of saying no knowledge whatsoever (*see also* EVIL II.B), or it may refer to an inability to discern (cf. P. C. Craigie, comm. on Deuteronomy [*NICOT*, 1976], p. 105); its obverse, "the knowledge of good and evil" (Gen. 2:9, 17), may denote all possible knowledge (cf. G. von Rad, *Genesis* [Eng. tr., *OTL*, rev. ed. 1972], p. 78), or simply knowledge in general (cf. E. A. Speiser, *Genesis* [*AB*, 1964], p. 26; B. Vawter, *On Genesis* [1977], pp. 70f.). On "good fortune" (Gen. 30:11) *see* FORTUNE.

III. Theological Significance.--In biblical thought, the most profound and absolute sense of "good" is predicated of God alone. Thus, though "good" is used freely in all of the above-mentioned senses (and others), though everything created by God is good (1 Tim. 4:4), and though there are good and bad individuals (e.g., Mt. 5:45), Jesus affirms that God alone is good (Mk. 10:18 par.). The original creation was good, not due to its own intrinsic nature, but because it was created by God who is good (Gen. 1).

God's dealings with His people are good because they are the revelation and expression of His goodness. Yahweh's redemptive plan for Israel, His promises to the patriarchs (Gen. 32:12), His deliverance of His people from Egypt, and His continued preservation of them (Ex. 18:9; Nu. 10:29) — all these are called "good." God's law, delivered through Moses, is good and is the source for human knowledge about the good (Neh. 9:13; Ps. 119:39; cf. Rom. 7:7-20).

But after the fall the OT declares, "there is none that does good, no, not one" (Ps. 14:3; cf. Eccl. 7:20). Though God in His holy law has offered the good to His creatures, they are bound by the law of sin, which, according to Paul, is "working death . . . through what is good [i.e., God's law]" (Rom. 7:13). Thus "nothing good dwells within" them (v. 18). Because the law is powerless to accomplish the good in the face of human sin, God offers the good to Israel, not by pointing them back to the Mosaic law, but by the way of promise (Jer. 24:4-7; 32:36-41), which is fulfilled in the redemptive work of Christ. God's good for mankind, His gift of salvation, is freely offered a second time in a new covenant in Christ, who is the "high priest of the good things that have come" (He. 9:11). The OT (good) law, when viewed from the redemptive perspective of fulfillment, contained "but a shadow of the good things to come" (He. 10:1), which are now given freely to people in Christ. Thus with the accomplished redemptive work of Christ in view, Paul can say that "we are his [God's] workmanship, created in Christ Jesus for good works, which God prepared beforehand, that we should walk in them" (Eph. 2:10), and he can pray that the Colossians "lead a life worthy of the Lord, fully pleasing to him, bearing fruit in every good work and increasing in the knowledge of God" (Col. 1:10).

IV. Unresolved Questions.--Since God is good, what is the relation between God and the standard of human morality? To the Greek dilemma whether things are good because the gods say so or because of their participation in an objective standard of goodness (e.g., Plato *Euthyphro* 10a), the Scripture would reply that God Himself is that standard. Christians have always been closer to Plato's affirmation of an objective standard of morality (e.g., *Res publica* vii.517; cf. Harkness, p. 189; Bourke, p. 20) than to the Epicurean adage that morality is subjective (in this case based on pleasure; *see also* EPICUREANS). This identification permits an objective ethics on the one hand, and on the other hand insures that the standard is not merely abstract but one upheld by a personal God (see Henry, ch. 8). Christianity is perhaps more explicit on the content of the good than Plato. Morality implies worship (Ps. 16:2), praise (Ps. 92:1; 147:1), and justice (Am. 5:14f.). As Micah so succinctly asked, "What does the Lord require of you but to do justice, and to love kindness, and to walk humbly with your God?" (6:8). (*See also* ETHICS: OT; ETHICS: NT.)

It is difficult to harmonize the claim that after the fall no one can render any good with the exhortations of the prophets to *do* good (e.g., Am. 5:14f.; Isa. 1:17). For if no human being can do good, then moral injunctions are meaningless, and the Bible seems to be deceptive with its promise that divine blessings accompany good deeds (e.g., Dt. 6:18, 24; 12:28). Problems arise when we read that the OT expressly ascribes goodness and good deeds to some OT kings, e.g., to Asa (2 Ch. 14:2 [MT 1]), to Jehoshaphat (19:3), and to Hezekiah (31:20; 32:32; cf. Isa. 38:3). The doctrine of common grace, according to which God gives a measure of grace to all people (Mt. 5:45; cf. Ps. 145:9; Acts 14:17) to allow them to do some good, may be a partial solution. (See Calvin *Inst.* iii.14.2f.) In addition, God is of course directly at work in Israel to bring people to repentance, faith, and obedience.

An equally vexing problem is the interplay between God (who is good) and evil. Scripture clearly confers the attribute of goodness on God (e.g., 1 Ch. 16:34; 2 Ch. 5:13; Ps. 136:1). It is God who gives good gifts to people (Mt. 7:11; Jas. 1:17). The complaint that "the Lord will not do good" (Zeph. 1:12) is understandable particularly in adversity, but it is not Scripture's last word. God may

punish sinners with physical evil (Jer. 21:10; Am. 9:4), but He will turn physical evil into good for His faithful, both the community (Jer. 32:40, 42; 33:9) and individuals (cf. Joseph, Gen. 50:20; Job, Job 42:10-17; and Jeremiah, Jer. 39:11-14; 40:4). Sometimes God's use of evil may be a means of testing His people's loyalties (Dt. 8:16; Ps. 119:71; He. 12:10). In the end Scripture portrays the eschatological triumph of the good (God) over evil (Satan). (*See also* EVIL III.)

R. C. TOGTMAN R. W. V.

GOOD, CHIEF. *See* GOOD.

GOOD NEWS; PREACH GOOD NEWS; etc. [Heb. *bāśar*] (1 S. 31:9; 2 S. 4:10; 1 K. 1:42; 1 Ch. 10:9); AV PUBLISH, TIDINGS, GOOD TIDINGS; [*bᵉśôrâ*] (2 S. 18:27; 2 K. 7:9); AV GOOD TIDINGS; [*śᵉmûʿâ ṭôḇâ*] (Prov. 15:30; 25:25); AV also GOOD REPORT (25:25); [Gk. *euangelízō, euangelízomai, euangélion*] (Mt. 11:5; Lk. 1:19; 3:18; 4:18; etc.); AV GOSPEL, GLAD TIDINGS, GOOD TIDINGS, PREACH, etc.; NEB also GOSPEL (1 Pet. 1:12, 25).

In the OT good news usually concerns victory in battle, though in 1 K. 1:42 political victory is the subject of the news. The texts in Proverbs seem to refer more generally to anything good that is heard, and to the refreshing effect such news has on the hearer. The "glad news of deliverance" of Ps. 40:9 (MT 10) may be the OT counterpart of the NT good news, proclaimed here among fellow believers. (For more general and more theological meanings of Heb. *bśr*, cf. *TDOT*, II, *s.v.* "bśr" [Schilling]; cf. also *TDNT*, II, *s.v.* εὐαγγελίζομαι κτλ. [Friedrich]; M. Burrows, *JBL*, 44 [1925], 21-33.)

The variety of ways in which *euangelízō* is translated in the English versions is due to a great extent to the fact that this verb is used both absolutely (e.g., "gospel," 1 Cor. 1:17; 9:16), and with other terms, such as "the kingdom of God" (Lk. 4:43; 8:1), "Jesus as the Christ" (Acts 5:42), "Jesus" (8:35), "the Lord Jesus" (11:20), "Jesus and the resurrection" (17:18), "the word" (8:4), "peace" (10:36; Eph. 2:17), "the gospel" (1 Cor. 15:1; Gal. 1:11), etc. Uniformity in translation is difficult since no common English verb such as "gospelize" is available to translate *euangelízō*. At times the immediate context also requires the verb to be translated in a way that does not permit uniformity (cf. Rev. 10:7).

The terms "good news," "gospel" (from Anglo-Saxon *god-spell*, which means "good tidings"), Lat. *evangelium*, and Gk. *euangélion* are literal equivalents. For the theological significance of these NT terms *see* GOSPEL.

R. H. STEIN

GOODLINESS (Isa. 40:6, AV). *See* BEAUTY.

GOODLY [Heb. *ṭôḇ*] (Ex. 2:2; Dt. 3:25; 6:10; 8:12; Ps. 21:3 [MT 4]; 45:1 [MT 2]; Prov. 28:10); AV also GOODNESS (Ps. 21:3), GOOD (Ps. 45:1; Prov. 28:10); NEB also FINE, PROSPERITY (Ps. 21:3), NOBLE (Ps. 45:1), "a fortune" (Prov. 28:10); [*ḥîn*] (Job 41:12 [MT 4]); AV COMELY; NEB GRACE; [*šāpār*] (Ps. 16:6); NEB "well content"; [*tōʾar*] (Jer. 11:16); NEB FAIR; **GOODLY TREES** [*ʿēṣ hāḏār*] (Lev. 23:40); NEB CITRUS-TREE.

Hebrew *ṭôḇ* often refers to a physically pleasing attractiveness, an appeal to the senses; but it also may have a more general meaning of pleasing or agreeable (cf. Ps. 23:1; Prov. 28:10; *see also* GOOD). Heb. *tōʾar* clearly refers to the physical form, usually with a positive connotation (cf. 1 S. 16:18 for a similar use). Heb. *šāpār* means "to be pleasing, beautiful" in a general sense (cf. postbiblical Heb., Aram. *špr*). Heb. *ḥîn*, a hapax legomenon, appears to be related to Heb. *ḥānan*, "to show favor, be gracious," but such a meaning hardly fits the context (cf. the comms., and BDB, p. 336).

Hebrew *hāḏār* usually means splendor or majesty, and thus here it probably referred to the beauty of these trees. It was one of four species of plants used in the Feast of Tabernacles. The Talmud (T.B. *Sukkah* 35a) spoke of this as the "Holy Citron," or etrog, a tradition going back to Maccabean times. Josephus (*Ant.* xiii.13.5 [372]) recorded that infuriated Jews threw citrons at Alexander Janneus while he served at the altar during this feast. The reference is probably to the *Citrus medica* var. *lageriformis* Roem., which may have been imported from Babylon by returning exiles.

R. K. H.

GOODMAN. The word occurs only once in the OT as the obsolete AV translation of the ordinary word for "man," Heb. *ʾîš* (Prov. 7:19): "the goodman *is* not at home." The RSV, along with the Geneva, Douay, and Wyclif versions, has "my husband is not at home," while the NEB has "the man of the house is away." In the NT the AV uses "goodman" five times for Gk. *oikodespótēs* (Mt. 20:11; 24:43; Mk. 14:14; Lk. 12:39; 22:11). The Greek term occurs twelve times in the Synoptics; the RSV and NEB generally render it "householder" or "master of the house," as does the AV in Mt. 10:25; 13:27, 52; 20:1; 21:33; Lk. 13:25; 14:21. (See also *TDNT*, II, 49.) The adjective was a mark of respect and was used somewhat as our word "Mr.," as an appellative of respect or civility. Relationship by marriage was distinguished by this epithet, as "good-father," "good-sister," both in England and Scotland. Later the adjective lost its distinguishing force and was replaced by the noun goodman.

J. J. REEVE

GOODNESS [Heb. *ṭôḇ*–'good'] (2 Ch. 6:41; Ps. 23:6; 68:10 [MT 11]); NEB also PROSPERITY (1 K. 8:66; 2 Ch. 6:41); [*ṭôḇâ*–'good things'] (1 K. 8:66 par. 2 Ch. 7:10); NEB PROSPERITY; [*ṭûḇ*] (Ex. 33:19; Neh. 9:25, 35; Ps. 27:13; 31:19 [MT 20]; 65:4 [MT 5]; 145:7; Isa. 63:7; Jer. 31:12, 14; Hos. 3:5); NEB also PROSPERITY (Neh. 9:35), BLESSING (Ps. 65:4), BOUNTY (Jer. 31:12, 14; Hos. 3:5); [Gk. adjective *agathós*] (Philem. 14); AV BENEFIT, NEB KINDNESS; [*agathōsýnē*] (Rom. 15:14; Gal. 5:22); [*kalós*–'beautiful, good'] (He. 6:5); AV GOOD; [*chrēstótēs*–'goodness, kindness'] (Tit. 3:4); AV, NEB, KINDNESS; **GOODNESS' SAKE** [Heb. *ṭûḇ*] (Ps. 25:7; cf. NEB v. 5); **LOVER OF GOODNESS** [Gk. *philágathos*] (Tit. 1:8); AV LOVER OF GOOD MEN; NEB "right-minded."

In the OT, God is always the source of goodness, which may be seen in the physical, earthly aspects of life as well as the spiritual and eternal. Thus He provides land and food (Neh. 9:25, 35; Ps. 68:10; Jer. 31:12), political deliverance (Ps. 145:7; Isa. 63:7), personal deliverance (Ps. 27:13) and protection (23:6; 31:19), a temple (1 K. 8:66; 2 Ch. 6:41) where one may be spiritually satisfied (Ps. 65:4; cf. Jer. 31:14 for another instance of the satisfying nature of His goodness), and forgiveness (Ps. 25:7; Hos. 3:5). God's character is described as goodness in Ex. 33:19 (cf. NEB mg., and Ps. 25:7).

In the NT, goodness is used in a more general sense, though still with God as the source, as the contexts imply in Rom. 15:14; Gal. 5:22; Tit. 1:8 (but cf. Philem. 14). In Tit. 3:4 the goodness of God, as evidenced in Christ, is contrasted with the evil of human life without God (cf. Gal. 5:19-23 and Tit. 1:7-10 for a similar contrast; cf. also Bauer, p. 866; MM, pp. 668f.). In He. 6:5 the "goodness of the word of God" is probably synonymous with the gospel (but cf. B. F. Westcott, *Epistle to the Hebrews* [repr. 1973], p. 149).

GOODS [Heb. *rᵉḵuš* or *rᵉḵûš*, *kᵉlî* (Gen. 31:37; 45:20; Ex. 22:7 [MT 6]), *mᵉlā'ḵâ* (Ex. 22:8 [MT 7]; Nu. 16:32), *ḥayil* (Nu. 31:9; Ob. 13; Zeph. 1:13), *kᵉḇûḏâ* (Jgs. 18:21), *ṭûḇ* (2 K. 8:9), *ṭôḇ* (Eccl. 5:11 [MT 10]), *šālāl* (Est. 3:13; 8:11), *pᵉquddâ* (Ps. 109:8), *hôn* (Prov. 1:13; 6:31), *maᶜᵃśeh* (Ezk. 27:16, 18), *qinyān* (Ezk. 38:12f.); Aram. *nᵉḵas* (Ezr. 7:26); Gk. *skeúos* (Mt. 12:29; Mk. 3:27; Lk. 17:31), *tá hypárchonta* (Lk. 11:21; 16:1; 19:8), *hypárxis* (Acts 2:45), *katéchō*–'hold ("have no goods," 1 Cor. 7:30), *agathá* (Lk. 12:18f.), *tà sá* (Lk. 6:30), *bíos*–'life' (1 Jn. 3:17)]; AV also RICHES, SUBSTANCE, STUFF, VESSELS, TO TAKE SPOILS, CARRIAGE (Jgs. 18:21), OFFICE (Ps. 109:8), etc.; NEB also HERDS, PROPERTY, POSSESSIONS, CHATTELS, TREASURE, WEALTH, etc.; **SELLER OF PURPLE GOODS** [Gk. *porphyrópōlis*] (Acts 16:14); AV "seller of purple"; NEB "dealer in purple fabric." Material possessions of various kinds, often used of that which is plundered, stolen, or confiscated.

Both Heb. *hôn* (occurring only in poetry) and Heb. *ḥayil* speak of wealth in general; except for Prov. 6:31, all of the above-mentioned occurrences of these two words concern the seizure or plunder of such wealth. Heb. *rᵉḵuš* is a general term for possessions (cf. Ezr. 8:21; texts which refer to plundering are Gen. 14:11f., 16, 21; 2 Ch. 20:25; Dnl. 11:24), being linked with silver, gold, and animals in Gen. 46:6; Ezr. 1:4, 6. Similarly, Heb. *kᵉlî* and Heb. *mᵉlā'ḵâ* are general terms for possessions, with some overlap in meaning apparent in Ex. 22:7f. Heb. *maᶜᵃśeh* (< Heb. *'āśâ*, "do, make") probably refers to man-made or processed goods of all kinds (cf. Ezk. 27:18, where Heb. *hôn* further defines Heb. *maᶜᵃśeh*). Heb. (Aram.? cf. BDB, p 889) *qinyān* refers to purchased property (cf. Heb. *qānâ* "get, acquire"); note the context in Ezk. 38:12 is again one of plunder. Heb. *šālāl*, a common word for booty or plunder, is probably translated as "goods" in Esther to avoid awkwardness. Although Heb. *pᵉquddâ* usually means "charge" or "visitation" (cf. BDB, p. 824), it may also mean what is in one's charge (cf. Isa. 15:7); note again the context of seizing another's property. Heb. *kᵉḇûḏâ* occurs in a plunder context; but the spectrum of meaning associated with Heb. *kbd* (cf. BDB, pp. 457-59) makes it uncertain whether it is the splendor (NEB "valuables"; cf. G. F. Moore, *Judges* [*ICC*, 1901], pp. 397f.) or the weight (AV "carriage"; cf. R. Boling, *Judges* [*AB*, 1975], p. 264) which is meant; perhaps both. Aram. *nᵉḵas* (cf. Heb. *nᵉḵāsîm*) is another general term for possessions, common in Egyptian Aramaic (cf. A. Cowley, *Aramaic Papyri of the Fifth Century B.C.* [1923], pp. 20, 38, 42, etc.).

In the NT the meaning of the words is more obvious. Four speak of "possession": Gk. *tá sá* (lit. "what is your"), *ta hypárchonta*, and *hypárxis* ("what one has"), as well as *katéchō* ("to possess"). Gk. *bíos*, referring to earthly life or manner of life, emphasizes the "means of living" generally on a subsistence level (cf. Mk. 12:44; Lk. 8:43 [variant reading]; 15:12, 30; 21:4). Gk. *porphyrópōlis* (Acts 16:14) is a dealer in purple fabrics or goods (*see also* PURPLE).

H. VAN BROEKHOVEN, JR.
G. A. L.

GOPHER WOOD [Heb. *ᶜᵃṣê-gōper*; Gk. *tetragōnía*]; NEB RIBS OF CYPRESS (Gen. 6:14). The Hebrew term has not been attested in cognate languages, and a connection with the Akk. *kuprītu*, "brimstone," seems improbable. Equally unlikely is the attempt to relate it to the modern Arabic *kufa* or boat made from interwoven willow branches and palm leaves coated with bitumen. Probably some resinous wood is implied; most botanical authorities favor the evergreen cypress, *Cupressus sempervirens*, an extremely durable species found throughout ancient Palestine and used by the Egyptians for making coffins.

R. K. H.

GORE [Heb. *nāgaḥ*] (Ex. 21:28f., 31f., 36); AV also PUSH; NEB also "be vicious." The basic meaning of the verb is "push," as indicated by the AV in Ex. 21:29, 32, 36.

GORGEOUS; GORGEOUSLY. This adjective and adverb occur once each in the RSV, both times to describe apparel befitting a king or his court. In Lk. 23:11 Gk. *lamprós* ("bright, shining"; cf. Acts 10:30) describes the kingly apparel in which Herod and his soldiers mockingly arrayed Jesus. In 7:25 Jesus told the crowds that "those who are gorgeously [Gk. *éndoxos*, "splendid, glorious"] appareled . . . are in kings' courts" — they are not to be found among the prophets.

GORGIAS gôr'gē-əs [Gk. *Gorgias*]. A general in the service of Antiochus Epiphanes (1 Macc. 3:38; 2 Macc. 8:9). Lysias, who had been left as regent during the absence of Antiochus in Persia, appointed Gorgias to take the command against Judea in 166 B.C. In 1 Macc. 4:1-24 is recorded a night attack by Gorgias with five thousand infantry and one thousand cavalry upon the camp of Judas Maccabeus near Emmaus, in which Judas was completely victorious. The victory was all the more striking as Judas's force was considerably smaller in number (1 Macc. 4:6). Later (164 B.C.) he held a garrison in Jamnia, and gained a victory over the forces of Joseph and Azariah who, envying the glory of Judas and Jonathan, in direct disobedience to the orders of Judas, attacked Gorgias and were defeated.

Jamnia, as given in Josephus *Ant.* xii.8.6 (350), is probably the correct reading for Idumea in 2 Macc. 12:32. The doings of Gorgias in 2 Maccabees are recorded with some confusion. He was regarded with special hostility by the Jews. In 2 Macc. 12 35 he is described as "the accursed man." J. HUTCHISON

GORTYNA gôr-tī'nə [Gk. *Gortyna*]. A city in south central Crete, second only to Knossus in importance. About 139 B.C. the Romans sent to it letters favoring the Jews (1 Macc. 15:23). R. EARLE

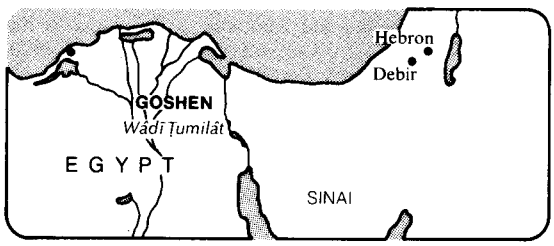
GOSHEN gō'shən [Heb. *gōšen*]. Attempts to derive "Goshen" from one or another Egyptian root are probably misdirected. It is most likely of Semitic origin (though the root is uncertain), since it designated a city and a region in southern Judah (see 1 and 2 below), as well as an area in Egypt.

1. Josh. 15:51 mentions a city by this name in a list of eleven cities in the hill country of Judah. It is preceded in the list by Anim and followed by Holon. The mention of Debir in the same context gives the general location. Some

believe it is to be identified with modern Ẓâharîyeh, about 19 km. (12 mi.) SW of Hebron.

2. A district of Goshen — possibly the territory surrounding the city by the same name — is mentioned as one of the regions conquered by Joshua (Josh. 10:41; 11:16).

3. The region in which the Israelites settled during the lifetime of Joseph and in which they still lived at the time of the Exodus (cf. Ex. 8:22 [MT 18]; 9:26). The Israelites particularly desired this region because it was near enough to Joseph that he could look after them during the famine and apparently also because it would provide good grazing for their animals (cf. Gen. 45:9-11; 46:31–47:6). From the perspective of Joseph's own residence Goshen apparently lay in the direction of Canaan, for Joseph went up there to meet his father coming down from Canaan (Gen. 46:28f.).



Added evidence for the identification of this region comes from the LXX, which usually translates Heb. *gōšen* as *Gesem Arabias,* "Gesem of Arabia" (45:10; 46:34; 47:1, 4, 27; 50:8). This rendering appears to identify Goshen with the later Egyptian nome of Arabia, which was located in the Wâdī Ṭumilât area. In 46:28b the LXX has *gế Ramessế,* "land of Ramses," apparently another name for the same area (cf. 47:11). And in 46:28a, 29 the LXX has *Hērōōn pólis,* "city of heroes," i.e., Hierapolis, which was also located in this area. The practice of allowing shepherds within the Egyptian domain was not unknown (cf. J. Skinner, comm. on Genesis [*ICC,* 1910], p. 497); some even identify one area where such shepherds were as Goshen (*ANET,* p. 259 n. 4).

E. D. WELCH

GOSPEL [Gk. *euangélion*]; NEB also GOOD NEWS (Mt. 9:35; Mk. 16:15; Rom. 10:16; Eph. 1:13; 1 Thess. 2:9), "purpose" (Eph. 6:19), "mission" (Phil. 4:15); **PREACH THE GOSPEL** [Gk. *euangelízomai*]; NEB also TELL THE GOOD NEWS (Lk. 9:6; 20:1), BRING THE GOOD NEWS (Acts 8:25; 14:21; 16:10), PREACH (Acts 8:40; 1 Cor. 9:16), SPREAD THE GOOD NEWS (Acts 14:7), BRING THE GOSPEL (Rom. 15:20), CARRY THE GOSPEL (2 Cor. 10:16); **PREACH BEFOREHAND THE GOSPEL** [Gk. *proeuangelízomai*] (Gal. 3:8). In several texts the RSV supplies "gospel" where the Greek text has only a pronoun referring to *euangélion* (Rom. 1:3; Gal. 1:7; Eph. 3:7; 2 Tim. 1:11; 2:9) or an elliptical construction (Gal. 1:11b; 2:7b).

  C. In Matthew
  D. In Luke
  E. Elsewhere
V. Summary

I. Derivation of the Term.–The family of Greek words rendered "gospel" or "proclaim" derives from the noun *ángelos* ("messenger"), and the verb *angéllō* ("announce, proclaim, publish news"). Basically the term "gospel," meaning "good news," is the content of what is preached, while the activity is characterized in the phrase "proclaim the good news" (Gk. *euangelízomai*). The epithet "good" is supplied to translate the prefix in *euangélion.* In the NT period *euangelízomai* was the activity of public or private speaking or else believing or receiving, but not writing or reading. The use of the word in the sense of written documents (e.g., the four Gospels) was much later, first found in Justin's description of a liturgical service at which the "memoirs of the apostles . . . called gospels" were read out to the congregation (*Apol.* i.66). In fact, the plural "gospels" was not a NT usage (*see* GOSPELS, SYNOPTIC).

Related terms are the verb *kērýssō,* "preach," and the noun *kḗrygma,* "preaching," both deriving from *kḗryx,* "herald." There is no apparent distinction in meaning between *euangélion* and *kḗrygma* (*see* PREACH).

II. Origin and Background.–The noun form *euangélion* meant originally the reward offered to a messenger who brought news of victory in battle or escape from danger. By a natural transference it came to mean the content of the message he brought, i.e., not simply news but good news. The immediate reaction on receiving the news was the offering of sacrifice to the gods as a token of gratitude. (*See* GOOD NEWS.)

The religious connotation gathered around the noun *euangélion* through the cult of the Roman emperor (cf. H-S, I, 71-73; *TDNT,* II, 724f.; P. Stuhlmacher, *Das paulinische Euangelium,* I [FRLANT, 95, 1968], 196-206 [critical of Schneemelcher]). Of special interest is the enthronement inscription from Priene in Asia Minor, dated 9 B.C., in which the birthday of the emperor Augustus was hailed as "the beginning of the joyful news [*euangélia*] for the world." The parallel with the NT announcement of "good news" through the coming of Jesus the Lord (as in Lk. 2:10f.) is impressive since the phrase in the imperial cult associated with Augustus' new age not only heralded that era but actually brought it about. "The proclamation is itself the *euangelion,* since the salvation it proclaims is already present in it" (*DNTT,* II, 108). But the general attitude of the NT writers to the veneration of the Roman emperor was at best neutral (1 Pet. 2:17; 1 Tim. 2:2) and sometimes definitely hostile (cf. comms. on Rev. 13, 17). It is therefore unlikely that Christians would borrow this term from a pagan source, especially since its religious overtones, setting up a competitive allegiance, were considerable.

More relevant is the background provided by the OT. To be sure, J. Schniewind denies any connection between the LXX and the NT use (*Euangelion: Ursprung und erste Gestalt des Begriffs Evangelium,* I [1927], 78). He correctly observes that the noun *euangélion* is absent from the LXX, but it is difficult to justify his contention that "the idea of a messenger of good news" is missing too. Especially in Isa. 40:9; 52:7-10; 60:6; 61:1 the herald of good news (Heb. *mᵉḇaśśēr,* rendered *euangelizómenos* in the LXX; *see* GOOD NEWS) played a prominent role. He announced a new age in which Yahweh is king and His rule is inaugurated. Gk. *euangelízomai* parallels *kērýssō,* "proclaim" (often a synonym in the NT), in Ps. Sol. 11:1f. (*ca.* 50 B.C.).

The influence of the Isaiah passages in later Judaism was considerable, especially at Qumrân (cf. 1QM 18:14: "a messenger . . . of Thy goodness; that to the humble he might bring glad tidings of Thy great mercy, [proclaiming salvation]," G. Vermes, *Dead Sea Scrolls in English* [1962],

p. 200) and among the rabbis, who used the participle *m°baśśēr* for the herald of the messianic era of joy. The omission of the noun has caused some difficulty, but rather than conclude that early Christianity borrowed it from Greek usage, one might suggest that, with the precedent of the verb form the first Christians boldly appropriated a newly coined noun to express their conviction that the Jews' eschatological expectation had indeed arrived in history with the advent, ministry, passion, and triumph of Israel's messiah and the Church's Lord (see W. K. L. Clarke, "What Is the Gospel?" in *Divine Humanity* [1936], pp. 87-100; *TDOT,* II, 316).

III. Distribution.–An interesting statistical analysis yields the following result (drawn from R. Morgenthaler, *Statistik des NT Wortschatzes* [1958], p. 101): Both verb (twenty-one times, including Ephesians) and noun (sixty times, including four times in Ephesians and four times in the Pastorals) are most frequent in Paul. The Johannine literature (Gospel and Epistles) lacks both the verb and the noun, preferring parallel terms such as "witness" or "truth," with corresponding verbs. Luke favored the verb (twenty-five times in Luke-Acts) to the almost complete exclusion of the noun (only in Acts 15:7; 20:24), while Matthew had *euangelízomai* once (11:5) and amplified the noun with the description "of the kingdom" (4:23; 9:35), as though to give an extra dimension to the gospel's content in contrast to Mark. Mark preferred the noun (seven or eight times) to the verb (which is not found) and often used the noun in passages that are usually regarded as showing his own redactional handiwork (R. P. Martin, *Mark: Evangelist and Theologian* [1972], pp. 24-28). He alone of the Evangelists used *euangélion* as a technical term on its own, and in this respect he followed closely the pattern set by Paul, who provided the fullest exposition of what "gospel" meant and who used the unqualified term *euangélion* some twenty-three times.

IV. Meaning.–A. In Paul. The way Paul used the term without qualification ("the gospel") and without further explanation of its meaning has suggested to most scholars that he was drawing on a term borrowed or inherited from pre-Pauline Christianity. This is evident in Rom. 1:1-4, which incorporated a pre-Pauline creedal formulary (cf. K. Wengst, *Christologische Formeln und Lieder des Urchristentums* [1972], pp. 112ff.; M. Hengel, *The Son of God* [Eng. tr. 1976], pp. 59-66, tracing the section back to the first Jewish-Christian community in Jerusalem, even if Paul adapted it to conform to his theology of the Lord's preexistence), and in 1 Cor. 15:3-5. The latter is the oldest testimony to Jesus' resurrection; it was probably a Palestinian credo reformulated in a Jewish-Hellenistic milieu and used in proclaiming the gospel with a later adaptation as a baptismal confession like Rom. 6:3f.; Col. 2:12 (so J. Kloppenborg, *CBQ,* 40 [1978], 351-367). These statements in Rom. 1 and 1 Cor. 15 carry literary marks of their pre-Pauline origin (e.g., non-Pauline vocabulary) and a poetic or rhythmical arrangement of the lines that suggests a liturgical origin. More importantly, they relate the good news of Christ's person to His atoning and saving work, emphasize the centrality of His resurrection from the dead, and make it clear that these events of incarnation, death, and vindication occurred in accordance with the OT Scriptures (cf. C. H. Dodd, *According to the Scriptures* [1952]; F. F. Bruce, *NT Development of OT Themes* [1968]). These items form the heart of Paul's message centered in Christ's person as Son of God (2 Cor. 1:19) and risen Lord. Paul was called and commissioned as "apostle to the Gentiles" (1 Cor. 1:17; Rom. 10:14-17; Gal. 1:15f.) to preach this kerygma that leads to salvation (1 Cor. 15:1f., 11; 2 Thess. 2:13f.). "Gospel" and "apostleship" were intimately bound together in Paul's view; his whole missionary activity can be summed up in the one verb *euangelízomai* (1 Cor. 1:17). He saw his vocation to be the specially chosen herald of the "mystery" of God's plan for the Gentiles (Col. 1:24-29; Eph. 3:2-7), which he called not surprisingly "my gospel" (Rom. 2:16; 16:25) or "our gospel" (2 Cor. 4:3).

Among several reasons for this personal description, one was Paul's unique consciousness of being "an eschatological apostle" (A. Fridrichsen, *The Apostle and His Message* [1947]; J. Munck, *Paul and the Salvation of Mankind* [Eng. tr. 1959], pp. 40-49, 119-122, stressing how, according to his self-understanding, Paul's conversion led to his becoming "the central figure in the story of salvation" [p. 49]). Second, this destiny was seen as the fulfillment of the OT forecast of "a herald" who would proclaim God's kingly rule; Paul interpreted this in the light of his role as the servant who was to be a light to the nations (Gal. 1:15-17; 2 Cor. 6:1-4; Rom. 15:21; cf. Acts 13:47f.; see L. Cerfaux, *Recueil,* 2 [1954], 447f.).

Third, Paul's understanding of "preaching the gospel" — and the noun *euangélion* could also mean the act or service implied in making the gospel known (as in 1 Cor. 9:14, 18; Phil. 1:5; 2:22) — involved much more than a dispassionate recital of bare facts relating to Christ's death and resurrection. The apostle's whole person was included (cf. 1 Thess. 2:8). But more importantly Paul's rehearsing of the good news was no mere human statement. It was the activity of an apostle "entrusted with the gospel" (1 Thess. 2:4), which he conveyed "not as the word of men but as what it really is, the word of God" (1 Thess. 2:13). In fact, Paul's proclamation was nothing less than "God making his appeal through us" (2 Cor. 5:20; cf. 6:1, "working together with him [God]"; cf. J. Murphy-O'Connor, *Paul on Preaching* [1964], p. 75: "The preachers co-operate with God because they speak for him, or rather, because he uses them to convey his message to men"). The conclusion to be drawn from this statement is striking: "To proclaim the gospel" in Paul's missionary theology was to make actual and available the reality of God's salvation in Christ that is announced. "The gospel does not merely bear witness to salvation history; it is itself salvation history" (*TDNT,* II, 731). Paul could therefore use "gospel" to include the sphere of human life that is drawn into God's saving design, i.e., the Church (e.g., 2 Cor. 8:18, where "in the gospel" and "in all the churches" are parallel phrases). And he could employ "gospel" to mean the ethical standard required of those who are saved, as in Phil. 1:27, and possibly Gal. 2:14.

Finally, Paul called his message "my/our gospel" in distinction from a message "peddled" (cf. 2 Cor. 2:17) by other preachers in the early communities. Sometimes the variant message had only a change of emphasis; Paul regretted this but did not oppose it since "Christ is being proclaimed; and in that I rejoice" (Phil. 1:12-18; on the identity of these rival preachers, see R. P. Martin, *Philippians* [*New Century Bible,* 1976], pp. 72-74). More seriously, there were in Galatia (Gal. 1:1-11) and at Corinth (2 Cor. 11:4) — and probably elsewhere (Philippi, Thessalonica, Ephesus [1 Tim. 4; 2 Tim. 2:17f.]) — those whom Paul labeled "false apostles" (2 Cor. 11:13) and Satan's servants (11:15). They preached "another Jesus" and "a different [*héteros*] gospel from the one you accepted." In Galatia the alien gospel was a mixture of legalistic Judaism (as in Rom. 2–4; 2 Cor. 10–13; Phil. 3) and a species of Hellenistic Gnosticism (see R. Jewett, *NTS,* 17 [1970/71], 198-212). The deviant teaching that invaded the Corinthian church was chiefly christological (cf. 1 Cor. 12:3 — prob-

ably this refers, in the cry "Jesus be cursed," to a docetic denial of the earthly Jesus and an undue exalting of the heavenly aeon Christ), and was related to a false conception of salvation that denied all future hope of a bodily resurrection (1 Cor. 15:12; J. H. Wilson, *ZNW*, 59 [1968], 90-107; but cf. D. J. Doughty, *ZNW*, 66 [1975], 61-90; A. C. Thistleton, *NTS*, 24 [1978], 510-526).

Paul treated errors regarding the person of Jesus Christ (mainly by reducing Him to one intermediary in a gnostic system, as at Colossae) and the way of salvation (which for Paul and his disciples is "by grace alone, through faith alone" [Eph. 2:1-10] with no addition of legalistic merit [Gal. 2:21; Phil. 3:9]) as subversive of his gospel, thus needing (and receiving) clear refutation. No less disastrous was an antinomian disregard for the strict demands of a holy life by the Spirit, and Paul's call to his people to remain loyal to the gospel they had received included a summons to live in a manner pleasing to God and in conscious social responsibility for their neighbors (Col. 1:5f.). In this way a Christian's personal and corporate life becomes "worthy of the gospel" (Phil. 1:27; here "gospel" means the entire work of God in salvation; cf. 1 Thess. 2:12).

B. In Mark. Both in frequency of mention and in the significance attached to the term, Mark followed the path set by Paul. For this Evangelist Jesus' ministry was portrayed as a proclaiming of the good news by speech and deed; in this regard Matthew shared a common understanding (Mk. 1:14f. par. Mt. 4:7, 23). But Mark was clearly a writer closer to Paul in that (1) he used "gospel" as a technical expression for the kerygmatic announcement of God's salvation, whereas Matthew preferred to relate "gospel" to Jesus' teaching ministry; (2) he editorialized the tradition by adding *euangélion* at places where the other Evangelists did not choose to follow him (8:35; 10:29). This point suggests that Mark had a preference for "gospel" (as in 13:10, which is absent from parallel verses in Matthew and Luke); and this is seen especially in 1:1, where "gospel" is a title for his entire book (so W. Marxsen, *Mark the Evangelist* [Eng. tr. 1969], pp. 117-150; N. Perrin, *Expos.T.*, 82 [1970], 4-7), and in 1:14f. where "gospel" is the epitome of Jesus' message *both* in the sense of the message He preached *and* in the reality of God's rule He embodied. "Christology and the preaching of the kingdom" comprised two formulated centers of power that were held firmly together through the conception of the "gospel of God" (so G. Dautzenberg, *BZ*, 21 [1977], 219-234; 22 [1978], 76-91). Mark, therefore, was clearly an exponent of Paul's gospel who related the apostolic kerygma of a crucified and exalted Lord to some pressing needs in his day. These occasions may have been apologetic (to offer a rationale for some historical events, such as the fall of Jerusalem in A.D. 70), pastoral (to encourage persecuted and afflicted Christians in Rome in A.D. 65 when Nero's pogrom began), or christological (to refute an incipient Docetism by joining together precanonical miracle stories of Jesus as a wonder worker and the Passion narrative, thereby propounding and illustrating Paul's theme of Jesus' mission as one who was "crucified in weakness, but lives by the power of God" [2 Cor. 13:4; for this linkage of ideas see R. P. Martin, *Mark: Evangelist and Theologian* (1972), pp. 214-17; *Southwestern Journal of Theology*, 21 [1978], 23-36]). In the latter proposal, "gospel" for Mark was the fleshing out in historical detail of the substance of Paul's gospel of the Son of God, once rejected and crucified yet now risen, enthroned, and active in the Church.

C. In Matthew. Matthew's redaction of the Synoptic tradition is made fairly obvious by observing the direction of his pedagogical interests. So "gospel" became "gospel of the kingdom" (4:23; 9:35; 24:14) — a term that embodied the new life-style expected of Christians living in a Judeo-Hellenistic environment and needing a summons to the moral demands of the gospel (see W. D. Davies, *Setting of the Sermon on the Mount* [1964]). The process by which the kerygmatic gospel of Paul and Mark became adapted to *didachḗ* (teaching) in the later Church (e.g., the Didache [*ca.* A.D. 80-100], which draws extensively on Matthew's Gospel for its moralistic teaching) is seen to begin with Matthew's work (titled in 1:1 "the scroll of the origin of Jesus Christ") with its heavy emphasis on the new "law" (5:17-19), the higher righteousness (5:20), the call to perfection (5:48; 19:21), and obedience to Jesus' teaching (23:10; 28:20). These times are all set within the OT framework of "promise and fulfillment."

D. In Luke. As mentioned above (see III), Luke did not employ the noun *euangélion* in his Gospel, and it appears only twice in Acts (see H. Conzelmann, *Theology of St. Luke* [Eng. tr. 1960], p. 221 n. 1; *euangélion* is not found in Q either, except in Mt. 11:5 par. Luke 7:22). An interesting conclusion has been drawn from this datum, namely, that Luke deliberately avoided the noun since his purpose was to compose not a gospel but a "life of Jesus" with a paradigmatic value and related to the mission of the Church in Luke's day (W. Marxsen, *Mark the Evangelist* [Eng. tr. 1969], pp. 142-46). This conclusion is partly offset by the fact that the verb *euangelízomai* is frequent in Luke (ten times in the Gospel; fifteen times in Acts), though it covers a wide range of meanings (cf. 1:19; 2:10; 3:18). After the Baptist's death (16:16) the content of the gospel proclamation is given as the kingdom of God — a usage found in Acts (8:12; 20:25; 28:31) in a sense hardly different from "preaching the gospel."

What emerges from Luke's distinctive usage is his consistent emphasis on the act of preaching that is explained by the direct object that accompanies the verb; but the eschatological dimension has been lost in the use of the verb in the Birth stories and in reference to John the Baptist (3:8). Of all the Evangelists only Luke assumed the role of historian and set about the task of constructing a life of Jesus. "His Gospel is indeed the first 'life of Jesus' " (E. Käsemann, *Essays on NT Themes* [*SBT*, 41, 1964], p. 29; cf. R. P. Martin, *NT Foundations*, I [1975], 259f., with a reason sought in Luke's pastoral purpose. How far the term "gospel" here has assumed a biographical character is considered by G. N. Stanton, *Jesus of Nazareth in NT Preaching* [1974], pp. 31-66, and C. H. Talbert, *What Is a Gospel?* [1977]).

E. Elsewhere. Allusions and specific references in the remaining NT books do not alter the picture drawn above. Hebrews has the verb twice, used of the kerygmatic message the readers had received (4:6 refers back to 4:2 and parallels the use of the verb in Gal. 3:8). 1 Peter repeats this emphasis (1:12, 25 referring to the readers' new life in Christ), but in 4:6 has a tantalizing description of the gospel being proclaimed to the dead (see W. J. Dalton, *Christ's Proclamation to the Spirits* [1965], concluding with E. G. Selwyn, *First Epistle of St. Peter* [1946], and now J. N. D. Kelly, *Commentary on the Epistles of Peter and Jude* [*HNTC*, 1969], that the preaching was to Christians — since deceased — in their lifetime). The verb *kērýssō* in 1 Pet. 3:19 has to do with the doom of evil spirits [but cf. *TDNT*, III, 707]).

Revelation 14:6f. stands apart, since here the angel is the proclaimer of an "eternal gospel" (no definite article). This may be a verdict of judgment at the final Day (J. Jeremias, *Jesus' Promise to the Nations* [Eng. tr. 1958], p. 69), but an argument for taking *euangélion* in its un-

varying NT sense of *good* news is cogent (*TDNT*, II, 735; G. B. Caird, comm. on Revelation [*HNTC*, 1966], p. 182).

V. Summary.–"Jesus Christ, risen from the dead, descended from David" (2 Tim. 2:8) may well stand as a summary of what the entire NT means by "gospel." It has to do with the person of Christ, though with an equal stress on Christ's saving work centered in the cross and Resurrection. The advent of salvation is depicted in the OT terms of promise and fulfillment (Rom. 3:21; 15:4-9; 1 Cor. 10:11). The present availability of that salvation is offered "by grace alone, through faith alone"; the work of reconciliation is both complete, i.e., God in Christ has effected the world's salvation (2 Cor. 5:19, 21), and incomplete, i.e., God has entrusted the gospel to His servants who as ambassadors for Christ call men and women to accept all that has been accomplished (5:20). "Gospel" is the link between these two ideas, meaning both all that has been done in Christ for human redemption (thus it is "good news"), and the offer freely extended to the hearers to "repent and believe the good news" by acceptance and obedience.

VI. Dating the Sources and Gospels

I. Introduction.–A. The Gospels in Christian Literature. The word "gospel" (Gk. *euangélion*), used earlier in Greek to mean "good news" or a reward for good tidings, was used by Jesus and His first followers to mean the good news that now, in Jesus Christ, God was acting to fulfil His promises and establish His kingdom. Since this action of God centered in the ministry, death, resurrection, and exaltation of Jesus Christ, this oral gospel was from the beginning a historical narrative with Jesus as the focal point. Only later did the Church begin to use the word "gospel" of the writings that told this story. The special word "gospel" was needed for such writings, for the biblical Gospels were a new literary form. They are not biographies or memoirs but the story of God's decisive action in Jesus Christ. No other literature has any real parallel to them; they are a distinctively Christian literary form. And while in later generations Christian writers tried to imitate the early Gospels, no later apocryphal gospel rivals the fourfold group of Gospels preserved in the NT. They are basic for the faith, life, worship, and witness of the Church in every generation.

B. Meaning of the Word "Synoptic." Among these four Gospels the first three — Matthew, Mark, and Luke — form a special group. To a considerable degree they share the same material in much the same order and in much the same wording. Yet each of the three has its own material, sequence, vocabulary, and style; none of the three is a mere copy of the others. The word "Synoptic," from Gk. *sýn* ("together") plus *ópsis* ("view"), means "giving a common view" of the Gospel story, and is used to refer to these three Gospels. The word emphasizes their agreements, but must not be allowed to obscure their differences; each Gospel has its own special content, outline, and style.

II. Synoptic Problem.–In order to understand what the Synoptic problem really is, some facts must be noted about the content of each Synoptic Gospel. (For comparison note that only 8 or 9 percent of John is paralleled in any of the Synoptic Gospels.) Of Mark's 661 verses, Matthew has a substantial parallel to more than 600 and Luke to over 350. Either Matthew or Luke or both follow Mark in the order of incidents, with only one exception; and Matthew and Luke never agree against Mark in the order of incidents. While each Gospel has its own special vocabulary and style, Matthew and Luke each parallel over half of the actual words used in Mark. In addition to the material in Mark that is paralleled by Matthew or Luke or both, about 200 verses that are not in Mark are found in both Matthew and Luke. These latter passages of Matthew and Luke consist mostly of sayings of Jesus; while parallel in content and to a greater or lesser extent in wording, their setting in the narrative outline and their order of appearance generally differ. Furthermore, each of the three Synoptic Gospels has material peculiar to itself. Mark has a few dozen verses not found in Matthew or Luke; Matthew has some 300 verses not found in Mark or Luke; Luke has some 520 verses not found in Matthew or Mark.

In addition to having a notable amount of material in common, with a great amount of agreement in the order of incidents, these three Gospels also have extensive agreement in wording. On the whole, the wording in the sayings of Jesus agrees most closely, but common narrative passages also show considerable agreement in actual wording. Yet rarely is the agreement complete; each Gospel writer has his own special vocabulary and points of style.

The problem raised by these data is this: how did it happen that these three Gospels were written with so much agreement in material, order, and wording, and yet with such differences that each writer remains an author and not a mere copyist of the Gospel tradition as recorded by others? Any solution of the problem must explain the similarities and agreements as well as the differences.

III. Languages of the Early Tradition.–A. Aramaic. In first-century Palestine and in the Roman empire three languages furnished the ordinary means of communication. One was Latin, the official language for Roman records. For our purpose it may be disregarded. It was little used in Roman provinces, and even first-century Rome was largely Greek-speaking. (Paul wrote to the Roman church in Greek; the Roman church *ca.* A.D. 95 wrote 1 Clement to Corinth in Greek.) Far more important was Aramaic. It

was widely used in Palestine, Syria, and the Mesopotamian region, and was probably the daily tongue of the common people with whom Jesus talked. The survival in the Gospels of a few Aramaic words, e.g., *Abba, Rabbi, talitha cumi, ephphatha,* supports the conclusion, as G. Dalman argued in *Jesus-Jeshua* (Eng. tr. 1929), pp. 1-16, that Jesus Himself ordinarily spoke Aramaic; it also indicates that at least most of His first disciples did and that at first the Gospel tradition was mainly preserved in Aramaic form. It has been argued by H. Birkeland, *Language of Jesus* (1954), that Hebrew was a living language in Jesus' day. While this was no doubt true of certain groups, as the Qumrân Scrolls show, the common language for daily life in Palestine was more likely Aramaic.

B. Greek. The other language widely used during the 1st cent. A.D. was Greek. This was true even in Palestine, which had many Greek cities — not only the Decapolis but also a number of others, such as Samaria and Caesarea. In them Greek was the chief language. Even in other cities where Aramaic prevailed, dealings with the Romans and Herodians, and with traders and travelers, required at least some of the people to know Greek for use in business and government contacts. It seems highly probable that Jesus, coming from Galilee where Gentiles were rather numerous, could speak some Greek when occasion demanded (Dalman); and the Greek names of some of His disciples indicate that Greek background was not lacking in the life of such followers.

From the beginning, then, the apostolic Church probably included disciples who could speak only Greek, some who could speak only Aramaic, and some who could speak both Aramaic and Greek. The Hellenists named in Acts 6 attest the presence of Greek-speaking Christians in the earliest Church. The Semitic quality of our Greek Gospels shows that Aramaic was the prevailing language in the early Church. (C. C. Torrey, *The Four Gospels* [1933], even argued that the four canonical Gospels were written in Aramaic. A more balanced view is given by M. Black, *An Aramaic Approach to the Gospels and Acts* [3rd ed. 1967].) But some Greek was spoken from the first by Jewish disciples in the Jerusalem church, and this means — a most important point — that in the earliest years of the Church the Gospel tradition, while commonly used in Aramaic form, must also have been available in Greek for Greek-speaking Jewish Christians.

IV. Oral Gospel Tradition.—It is unlikely that the Gospel tradition was written down during the very first years of the Church. It is true that the Qumrân Scrolls show that a first-century Jewish sect dedicated to intensive study of their Scripture had a written Manual of Discipline and wrote down their interpretation of prophetic passages of Scripture. But the disciples in the earliest days of the Church, while they earnestly studied the Scripture and interpreted the coming and work of Jesus as the fulfillment of Scripture, were intent not so much on technical study as on urgent evangelistic appeal to their countrymen. Thus it is highly probable that for some years the Gospel tradition was preserved only in oral form.

A. Used in the Church. This account implies that the tradition was preserved and found daily use in the life, preaching, and teaching of the Church. It would be wrong to think that only a few key disciples with retentive memories treasured the Gospel tradition and then after many years wrote down their recollections or told them to another Christian who wrote them down. Those who knew the tradition continually passed it on. They told it as they remembered it to other believers; they spoke of it to unbelievers. The oral tradition was in constant use in the Church.

B. Role of Eyewitnesses. In those earliest years eyewitnesses played an important role. The disciples no doubt focused their attention on the fact of the resurrection and present lordship of Christ. But it was the Jesus who had lived, taught, and died who was now the exalted risen Lord; what He had done and said was an essential part of the gospel message. Thus those who had seen and heard Him during His ministry had a basic role in preserving and handing on the Gospel tradition, particularly in the first years, when the membership of the Church was small and most, if not all, new believers could know some who had seen and heard Jesus during His ministry.

C. Role of Christian Teachers. As time passed, teachers inevitably took an increasing role in preserving and handing on the Gospel tradition. The Church spread into places Jesus had never visited, places where the original disciples rarely or never came. In such places other evangelists and teachers played an important role. Those converted by evangelistic preaching needed instruction, and those who heard the message and were interested but had questions needed more detailed information about Jesus. The NT often speaks of teaching and teachers. The continual work of such teachers underlies the four canonical Gospels.

D. A Fixed Oral Tradition? The presence in the Synoptic Gospels of so many agreements not merely in content and order but especially in wording has led some to think that during the period when the Gospel story was preserved in oral form, this oral tradition was handed on in a fixed wording. This fixed oral tradition was then used by the Synoptic writers with such stylistic variations as each author chose to make. This idea of a fixed and carefully memorized tradition, which each new convert and especially each new teacher memorized and handed on, is too rigid to fit the facts. It might explain the agreements among the Gospels, but it hardly allows for the continual variation in wording that each Gospel exhibits. The idea of such an officially fixed oral tradition, handed on word for word, meets an added difficulty. The agreements we find in the Gospels are in Greek, and if an original oral tradition, handed on in Aramaic, was fixed and memorized by Aramaic-speaking Christians, it then must have been officially translated into Greek and its Greek form likewise strictly supervised to make sure it was handed on in accurate wording. No evidence exists for this complicated process, and the enthusiasm once felt for such a theory has practically disappeared.

E. Form Criticism. Since the 1920's the study of the oral period of Gospel tradition has been dominated by the method commonly known as form criticism. For this method extravagant claims have been made, but the extreme assertions by some of its advocates must not prevent us from seeing the contribution it can make to the understanding of the Gospels and the early Church. (*See* CRITICISM III.)

K. L. Schmidt (*RGJ*) argued that in the Gospel of Mark the chronological and narrative links between the units of tradition were provided by the writer of the Gospel. They do not preserve the actual historical order of events; the units of tradition had been preserved separately, without connecting links. Thus the actual order of events cannot be recovered. M. Dibelius (1919; Eng. tr., *From Tradition to Gospel* [1935]) emphasized that the Gospel writers used material that had been preserved in separate units and given literary form in church use. The Gospel tradition, he held, was remembered because the Church needed it in missionary work; and the original tradition about Jesus was preserved in church preaching. He singled out as literary types paradigms (concise narratives that climax in a saying of Jesus), individual stories that show Jesus

as the marvelous wonder-worker, legends ("religious narratives of a saintly man in whose works and fate interest is taken"), and the Passion story. The last took form as a connected narrative in the very early days of the Church, sometime before the writing of any of the Gospels, and so was the one exception, Dibelius held, to the view that the oral Gospel tradition was preserved in unlinked, separate units. R. Bultmann in 1921 (Eng. tr., *HST*) divided the sayings material into apophthegms (including controversial and didactic sayings as well as biographical apophthegms) and sayings of the Lord (including logia or wisdom sayings, prophetic and apocalyptic sayings, legal sayings and community rules, and "I"-sayings). The narrative material he divided into miracle stories, historical narratives, and legends. His study is quite detailed, and the tendency among form critics to deny that we can know what Jesus said and did reached its most radical expression in him. For a more balanced view of the possibilities of form criticism see V. Taylor, *Formation of the Gospel Tradition* (1933), and L. J. McGinley, *Form-Criticism of the Synoptic Healing Narratives* (1944).

The form-critical method holds that the period between Jesus' death and the writing of the Gospels had a decisive role in shaping the Gospel tradition. This tradition was preserved only in oral form for the first two or three decades. It was used continually by the Church to meet its needs in worship, instruction of converts and immature believers, life guidance, and controversy. The material remembered and used for such purposes was chosen and its form was shaped to meet these church needs; we can discern and reconstruct with fair accuracy the situation in which the material was preserved and used. The early Church, in the view of extreme form critics, had no clear historical sense or interest; it was concerned to express its faith in the risen Christ its Lord. Therefore the Gospels resulting from this process are a direct witness to the faith and thought of the early Church rather than to the actual ministry and teaching of Jesus Himself. We really cannot know much about the historical Jesus; the Gospels attest only what the Church believed and taught about Him.

The form-critical method has real points of strength. It sees correctly that the first decades of the Church were of crucial importance; what happened to the Gospel tradition in those first years determined whether we can put any trust in the Gospels. Just when the Gospel material began to be written down is hard to say, but it may be accepted that the prevailing form of the tradition in the first two decades was oral. The material was continually used in the Church to meet the needs of its members; what Jesus had done and said was seen from the beginning as an aid to His followers. The selection and the form of the material were meant to serve these felt needs of Christians: an incident with a teaching point would be so told that the teaching point came as the climax of the story; and a healing story would be so told that the sickness was evident, the action and word of Jesus were clear, and the fact of the healing was in some way attested. The Gospel tradition does reflect the life of the Church; what the Church remembered, used, and applied to its needs tells much about its life, needs, and witness.

But it must be insisted that the attempt of form criticism to reconstruct the situation in the first two decades of the Church is difficult to carry out. Still more important, form criticism often underrates the historical sense of the early Church, and seems to trust its own hypothetical reconstructions more than the testimony of the first disciples. Their intention was to testify to what Jesus did and said; and while they centered their faith in the risen Christ their Lord, they were clear that He was the one who had lived, worked, taught, and died for them, and that only through knowing His earthly career could people know what His claim was and what His lordship meant. Moreover, some form critics tend to work with unexamined presuppositions, e.g., the assumption that most of the miraculous events told in the Gospel story could not have happened as reported.

V. Written Gospel Sources.—The early period in which the Gospel tradition was preserved entirely or almost entirely in oral form did not last long. The more the Church spread and eyewitnesses died, the more the need of a written account made itself felt. The agreements among the Synoptic Gospels suggest that back of them lay written sources. Can anything trustworthy be said about such written sources?

A. Earlier Source Theories. Among views of the last two centuries three may be noted. One held that at first many brief fragments were written, each telling one incident or saying, or at most a few such items; the Synoptic Gospels were composed by combining many such fragments, with each Gospel writer making his own selection. A second theory was that before the writing of our Synoptic Gospels a large and comprehensive "Primitive Gospel" (now lost) had been written. From it each Synoptic writer drew the material that seemed most important to him, and thus produced a kind of "Reader's Digest" summary of the larger work. The third view, suggested in ancient times, held that two of the three Synoptic writers depended on the preceding author(s). Who wrote first and who next has been disputed, and every possible combination has been suggested, but the view most often defended was that Matthew was written first, Mark was a summary of Matthew, and Luke was dependent on Matthew and perhaps also on Mark. None of these theories has wide support today.

B. Two-Document Theory. For well over a century scholars have generally agreed that Mark is the earliest Synoptic Gospel and was used as a written source by the authors of Matthew and Luke. From this view developed the widely accepted Two-Document theory, which is that the writers of Matthew and Luke used as written sources both Mark and a second document, consisting mainly of sayings and commonly known as Q (*see* Q). In this view the writers of Matthew and Luke derived from Mark the bulk of their narrative material and from Q most of the sayings material they have in common.

C. Proto-Luke Theory. The Two-Document theory could claim to explain the source of most of Matthew's and Luke's material, but Matthew and Luke each contain material found in no other Gospel. Whence was it derived? Was Q in fact so extensive a document that it contained not only what Matthew and Luke have in common, but also much of the teaching of Jesus found in only one of them? This explanation might be used to account for the origin of part of the material peculiar to each of these two Gospels, but it pushes the theory too far to say that Q was the source of all such material. B. H. Streeter (*The Four Gospels* [1924]), followed by V. Taylor (*Behind the Third Gospel* [1926]), developed another theory to explain the origin of Luke. Instead of taking Mark as the basic source behind Luke, he suggested that Luke himself gathered a great deal of Gospel tradition; we may call this body of material L. Luke also knew Q. He combined Q with L to produce a gospel that we may call Proto-Luke. Later, when Luke had access to Mark, he inserted over half of Mark into his Proto-Luke, and this gave him what we know as the Gospel of Luke. Since everyone preferred the fuller Gospel, the earlier shorter draft fell into disuse and disappeared.

D. Four-Document Theory. Streeter soon took one more

GOSPELS, SYNOPTIC

step, to explain how Matthew came to its present form. He followed the Two-Document theory as far as it went; the author of Matthew used Mark as his narrative base and derived teachings of Jesus from Q. But now Streeter conjectured that in addition the author of Matthew had and used a written collection of Gospel material, which may be called M. Our Matthew is thus a combination of Mark, Q, and M. This M, like Q and Proto-Luke, disappeared because the Church preferred to use the more complete Gospel, Matthew. (That longer Gospels were favored is a fact; in ancient and medieval times Mark was copied much less often than Matthew and Luke. This lesser popularity of Mark in ancient times may be illustrated by the present ending of Mark. Mark as we now have it ends at 16:8; what follows in the AV was a later addition to the original Gospel; but it is hard to believe that Mark ended his Gospel at 16:8. That Mark survives only in a mutilated form shows how little interest it received in ancient times. Matthew and Luke were more valued because they were more complete.)

Thus Streeter arrived at his Four-Document theory. Matthew and Luke had four written sources; behind Matthew were Mark, Q, and M; while behind Luke lay L and Q, combined to form Proto-Luke, into which large portions of Mark were later inserted to produce our Gospel of Luke. Streeter held that in addition to these main written sources the author of Matthew had and used some minor items of "Antiochene tradition," while Luke had a written document as his source for Lk. 1–2. (Streeter assigned each source to a main center of the first-century Church: Mark was written at Rome, Q and L at Caesarea, M at Jerusalem, Matthew at Antioch, and Luke perhaps at Corinth.)

Critical scholars differ about the validity of Streeter's views. It is now generally agreed that the authors of Matthew and Luke used Mark as a source, and that they both used a now lost document Q, though a few scholars deny that Q existed and prefer to say that Luke knew the Gospel of Matthew and used it in writing his Gospel. That a document L was written and that Q was combined with L to form Proto-Luke is less widely accepted, and the existence of a written document M is still more debatable. Streeter did not claim finality for his results. He made an honest, resourceful attempt to explain how the Gospels were written and how Matthew and Luke came to show such similarities to one another and to Mark while at the same time each differed from the other in noteworthy respects.

E. Renewed Claim for the Priority of Matthew. Criticism of Streeter's views follows three main lines. Some scholars hold that he has not established the probability of the conjectured sources M and L. Others point out that form criticism, for which Streeter showed little interest, has made the problem of written sources relatively unimportant; what really counts is the study of the earlier stage of oral tradition; written sources no doubt existed, but at a relatively unimportant later stage in the origin of the Gospels. Still other scholars, including Roman Catholics and also a few Protestants, maintain that Matthew was the first of our Gospels to be written, as an ancient tradition asserted, or at least that even if the author of the present Greek Matthew used our Greek Mark as a source, an earlier (Aramaic or Hebrew) draft of Matthew was the first Gospel written (see B. C. Butler, *Originality of St. Matthew* [1951]; P. Parker, *The Gospel Before Mark* [1953]). Such reactions remind us that Streeter's views represent intelligent theories rather than established facts.

F. Conclusions. We now make a cautious attempt to sum up the results of generations of scholarly study of the Synoptic Gospels. The Gospel tradition was used in the Church from the earliest days, for worship, instruction, guidance for life, and controversy with opponents. At first it was used in oral form, and the selection and literary shaping of what was preserved occurred under the influence of the needs of the Church. This explanation does not deny to key eyewitnesses, such as Peter, a role in preserving the tradition, but it recognizes that many other eyewitnesses and teachers shared in the continual use of the Gospel material. Nor does it mean that as new needs arose the Church freely invented incidents and sayings; the Church rather met its needs by selecting and shaping remembered items of what Jesus had done and said. The writing down of such material began within two or three decades of Jesus' death; Lk. 1:1 speaks of a number of such earlier documents, though we may safely state that no gospel of the scope of the present Gospels was produced before Mark wrote the earliest canonical Gospel. It seems reasonably clear that Mark was the chief written source of Matthew and Luke, and it is almost as convincing that behind Matthew and Luke lay also some such document as Q, which we can never reconstruct with any finality. The writers of Matthew and Luke had access to other material, partly written but some still oral; yet the exact extent and source of such material eludes us. Each of the Gospels had an author of originality and skill and each possesses its own individuality. None of the Synoptists was a mere scribe, setting down what was already complete and fixed; each was an author, who showed remarkable skill in the selection and final phrasing of his material. Each Synoptic author aimed not only to honor Jesus Christ the risen Lord but also to record actual historical facts about Jesus of Nazareth, whose ministry, death, and resurrection are of the very essence of the gospel.

VI. Dating the Sources and Gospels.—Some books confidently give exact dates for the Gospels and profess to know just when their written sources were composed. But in fact we cannot determine exactly when any of the Gospels was written. The Gospels themselves contain no unmistakable testimony about their date of writing. This uncertainty results largely from our meager knowledge of the early generations of the Church. We know almost nothing about the stages of church life from A.D. 65 to the end of the 1st century.

In view of this uncertainty, two lines of approach may be followed. One is the ancient tradition of the Church about when the Gospels were written. This tradition is not entirely consistent. The earliest tradition (anti-Marcionite prologue; Irenaeus; Eusebius *HE* iii.39.15) indicates that Mark was written after Peter's death, which may be dated in A.D. 64. A later tradition suggests that Mark wrote while Peter was still alive. Probably the date after Peter's death should be preferred (A.D. 65-70). Then, if Mark was a written source for Matthew and Luke, these two Gospels must be dated some years after this date of Mark.

Another method of dating the Synoptic Gospels starts from the book of Acts. Acts ends with Paul spending two years in prison at Rome (28:30), *ca.* A.D. 61-63. If Luke wrote Acts while Paul was still in prison at Rome (one view is that Luke wrote Luke-Acts as a document for use by Paul in his trial before the emperor), then Luke would have to be dated before A.D. 63, for Acts 1:1 refers to Luke as already written. If Luke used Mark as a written source, Mark would have to be dated still earlier, in the 50's of the 1st century. If, however, as seems more likely, Luke and Acts were written after Paul's Roman imprisonment mentioned in Acts 28:30, and Mark was written after Peter's death, the dates assigned to the Synoptic Gospels will be a number of years later.

Tentatively and with the free admission that no certainty is possible (or necessary), we may follow the earliest tradition and date Mark after Peter's death, *ca.* A.D. 65-70. Since Matthew and Luke show use of Mark as a source, we must date them later than Mark. A date not later than A.D. 85 may be suggested for Matthew and a date not later than A.D. 80 or 85 for Luke; Acts then may be dated a very few years later than Luke (up to A.D. 85-90). (For an attempt to support early dates for all NT writings see J. A. T. Robinson, *Redating the NT* [1976].)

F. V. FILSON

GOSSIP [Heb. *rāḵîl*] (Prov. 20:19); AV TALEBEARER; [*dibbâ*] ("evil gossip," Ezk. 36:3); AV INFAMY; NEB COMMON TALK OF MEN; [Gk. *psithyrismós*] (2 Cor. 12:20); AV WHISPERINGS; [*psithyristḗs*] (Rom. 1:29); AV, NEB, WHISPERER; [*phlýaros*] (1 Tim. 5:13); AV TATTLER. In its biblical setting, "gossip" is used to designate the spreading of secrets or rumors, usually for the purpose of slander (which is the translation of *rāḵîl* in Lev. 19:16; Jer. 6:28; 9:3 [MT 2]). This designation is supported, e.g., by the literal meaning of the onomatopoeic term *psithyristḗs*, "whisperer." According to Prov. 20:19, the one who "goes about gossiping reveals secrets," and therefore no one should associate with one who "speaks foolishly" (cf. Prov. 11:13, where *rāḵîl* is translated "talebearer").

In the NT, Paul placed "gossip" in the midst of two separate lists of evil practices (2 Cor. 12:20; Rom. 1:29). The latter reference is part of a catalog of sins that characterized the pagan world in its opposition to God. Since people did not acknowledge God for what He is, "God gave them up to a base mind and to improper conduct" (v. 28). As a result, they were, among other things, gossips, slanderers, haters of God, and inventors of evil (Rom. 1:29-32). Paul also warned against enrolling younger widows for church ministry and support, since it was quite possible that they would desire to marry again. "Besides that," said Paul, "they learn to be idlers, gadding about from house to house, and not only idlers but gossips and busybodies, saying what they should not" (1 Tim. 5:13).

A. J. BIRKEY

GOTHIC VERSION. *See* VERSIONS VIII.

GOTHOLIAH goth-ə-lī'ə [Gk. *Gotholias*] (1 Esd. 8:33); AV, NEB, GOTHOLIAS. Father of Jeshaiah, one of the sons of Elam who returned from Babylon with Ezra. The name corresponds to Athaliah, the Gk. *gamma* being substituted for the Heb. guttural *ayin*, as in Gomorrah, Gaza, etc.

GOTHONIEL gō-thon'ī-əl [Gk. *Gothoniel*]. The same as Othniel father of Chabris, one of the governors of the city of Bethulia (Jth. 6:15).

GOUGE. *See* PUNISH IV.

GOURD. 1. [Heb. *qîqāyôn*; Gk. *kolokýnthē*] ("plant," Jonah 4:6f., 9f.); AV mg. PALMCRIST; RV mg. PALMA CHRISTI. The Hebrew appears to be connected with the "kiki" oil derived by the Egyptians from the castor-oil plant *Ricinus communis* L. (cf. RSV mg., NEB mg.); the Vulgate "ivy" (*Hedera helix* L.) is incorrect. Widespread in the Orient, the shady castor-oil plant quickly attains a height of up to 4½ m. (15 ft.). The "bottle gourd" *(Cucurbita lagenaria)* has been suggested as an alternative, but it was unknown in Palestine at the time of Jonah.

See *MPB*, pp. 203f.

2. [Heb. *p*ᵉ*qāʿîm*] (1 K. 6:18; 7:24); AV KNOP; [Heb. *bāqār*–'ox'] (2 Ch. 4:3); AV "oxen." In 1 Kings, Heb. *p*ᵉ*qāʿîm* are gourdlike ornaments of the lining of Solomon's temple, and of the molten sea. The RSV and NEB attempt to make the parallel description in 2 Ch. 4 more consistent with 1 Kings by reading "gourds" where the MT (and AV) has "oxen," taking *b*ᵉ*qārîm* as an error for *p*ᵉ*qāʿîm*.

See also SEA, MOLTEN.

3. WILD GOURD [Heb. *paqquʿōṯ śāḏeh*; Gk. *tolýpē agría*] (2 K. 4:39); NEB BITTER-APPLES. The Heb. root *pqʿ*, "split," has led some authorities to identify this gourd with the squirting cucumber (*Ecballium elaterium* [L.] Rich.), which at maturity discharges an irritating juice when touched or shaken. Its spiny appearance as well as its violent cathartic qualities preclude it as a dietary item. The traditional plant named by Linnaeus, the *Cucumis prophetarum* or globe cucumber, bears prickly, bitter fruit which is small and inedible. The most probable plant is the colocynth (*Citrullus colocynthis* [L.] Schrad.; cf. Syr. *paqôʿā*'), a trailing, cucumber-like vine that bears round, orange-colored gourds containing a bitter, extremely poisonous pulp.

See *MPB*, pp. 78-80. R. K. H.

GOVERNMENT. The biblical records give fragmentary information about political forms, institutions, and procedures for the governing of the body politic. Although they give detailed legislation, which may be classified as civil or judicial, for the nation of Israel itself, one must infer from meager and scattered references information about political administration and civil jurisprudence. Even when the information is explicit, all too often it reflects the theological, social, and political ideal, without necessarily coinciding with actual historical practice. (This is doubly problematic for those who would make practical application of these principles in our day and time, because much of the legislation was intended for Israel as a theocratic nation.) Nevertheless, the biblical data have been providentially verified by archeological and epigraphic materials discovered and published during the last half century. One must realize that in comparing biblical and extrabiblical sources, the Scriptures present all of life, including governmental, political, and judicial institutions, from a unique perspective, i.e., that God is the sovereign creator of the universe and that man stands in a privileged relationship with God. The conviction in ancient Israel that set it apart from all the surrounding nations and cultures was that it was specially chosen by the Creator to share His blessings in a unique covenantal relationship of redemption (*see* ELECTION; COVENANT). This relationship ultimately accounts for the canonical Scriptures of both OT and NT and must be considered the basic and normative principle, especially for Israelite government, political institutions, and administrative procedures. Hence, although Israel's political ideology and even specific legislation may have been shared or even borrowed from surrounding cultures, the sacred Scriptures present them transformed for the benefit of the covenant community.

I. Patriarchal Traditions.–There is ample archeological evidence for the historicity of the patriarchal narratives in Genesis. It seems incontrovertible that the patriarchs exhibit the culture and customs of the ancient Near East, specifically the Mesopotamian and Syrian social structures and legal institutions that formed part of their ancestral background. (To a lesser degree the biblical sources reflect the Egyptian culture with which they came into contact as a result of famines and commercial enterprises.) This should surprise no one, for Abram lived in the Mesopotamian cities of Ur and Haran until the age of seventy-five (Gen. 11:31–12:4; cf. Dt. 26:5). The background is illustrated by government, political institutions, and administration in two major cities of northern Syria and Mesopotamia. The vast archives discovered at Mari (since 1933) and at Ebla (since 1974) gave us a wealth of information from which to make comparisons and draw conclusions.

A. Government in Ebla. In northern Syria, some 120 km. (75 mi.) from the Mediterranean Sea, the ancient empire of Ebla flourished during the second half of the 3rd millennium, reaching its zenith *ca.* 2300 B.C. It continued into the 2nd millennium, though in the shadow of other city-states, e.g., Aleppo. Ebla was an important commercial and agricultural center dealing in grain, vineyards, and cattle, as well as metalworking (gold, silver, copper), gems, textiles, woodworking, and pottery. Foreign trade, especially of textiles and metalware, was recorded on huge tablets, and ledgers were kept for the balance of payments. Trade was carried on under treaty arrangements in the empire of Akkad to the east, in the Anatolian plateau N of the Taurus Mountains, to the south in Palestine (already called Canaan) and even the Sinai peninsula. Many place names from the patriarchal narratives are mentioned in the Ebla tablets, either as part of the great empire or as cities and peoples with whom Ebla maintained commercial ties. It is a fair assumption that the patriarchs were familiar with the empire's kind of government and may even have benefited by its rule and protection. Furthermore, if the Eblaic language is correctly classified as Paleo-Canaanite it would strengthen the theory that even when the patriarchs did migrate south to Canaan they would have remained under a political government not unlike what they had experienced in northern Syria or upper Mesopotamia (Haran was only 200 km. [125 mi.] NE of Ebla).

The government of Ebla was centered in the acropolis and was ruled by a king and his royal family. The four major centers on the acropolis were the Palace of the King, the Palace of the City, the Stables, and the Palace of Service. The king's palace undoubtedly served as the central office for the administration of state and foreign affairs. The municipal affairs were handled in the second palace. The Stables may have governed the tremendous commercial enterprise of the empire, while the fourth may have been responsible for labor and related affairs of the state. In each of the first two palaces were ten officials, each with about six deputies under him. In each of the last two palaces there were some eighty leaders with almost one hundred subordinates — these last two groups having a lower status than those in the royal and city palaces. The records show that almost five thousand people worked in the acropolis, in a city of a quarter-million population. The bureaucratic activity points to considerable administrative sophistication for a third-millennium empire.

The lower city was divided into four quarters, each with a gate in the wall that surrounded Ebla. These districts were governed by a chief inspector with as many as twenty leaders and one hundred aides, or as few as ten officers with only thirty deputies. The Eblaic title for these officers was *nase* (cf. Heb. *nāśî'*, "leader, ruler, prince").

The king was called by the Sumerian title *en*, "lord," corresponding to Eblaic *malik*, "king" (cf. Heb. *melek*). Also sharing in matters of state was the queen (Eblaic *maliktum*). Their sons were also involved in the administration of the empire — the crown prince in home affairs and the second son in foreign affairs. These sovereigns called rulers of equal status *en* or *malik*. Officials of lower status they called *lugal* (Sumerian for "chief man, king") or *diku*, "judge" (cf. Heb. *šōpēṭ* and *dayyān*, "judge").

B. Mesopotamian Political Institutions. Although scholarly opinion is divided on the location of Ur of the Chaldees, the ancestral home of Abraham — either at the southeastern end of the Mesopotamian valley near the confluence of the Tigris and Euphrates rivers or near Haran in the northwest, as suggested by the Ebla tablets — it is significant that the cultural background of the patriarchs reflects Mesopotamian, if not Hurrian, culture.

One of the great cultural and political centers of the 19th and 18th cents. B.C. was Mari, situated on the Euphrates approximately 325 km. (200 mi.) SE of Haran. Mari had already enjoyed a position of preeminence during the 3rd millennium. From its royal archive more than 20,000 tablets have been recovered, dealing with administrative, legal, economic, and religious matters from which the juridical, commercial, social, and political life of upper Mesopotamia and Syria can be studied. They also reflect contemporary ethnological movements. They provide some of the earliest insights into the complex relationships of suzerains and vassals, and diplomatic protocol, including the prominent role of women in the affairs of state. They reveal that the city-state was controlled by West Semitic peoples known as "Amorites." Although the place where these dynasties originated is not clearly indicated, the available evidence points to northern Syria. It is also significant that the cities of Nahor and Haran, the ancestral home of the patriarchs, were important centers dependent on and governed from Mari.

The archives reveal a tribal society very similar to the patriarchal society in organizational structure and institu-

tions. The indigenous population was confronted by different kinds of tribal life. The tribes were at various stages of development, from fully nomadic to completely sedentary. Zimri-Lim's two titles, "king of the Haneans" and "king of the Akkadians," represented the two main population strata, the seminomadic tribe of Hana and the indigenous settled population of Akkadians. The term *hana* was applied not only to the land but also to a type of soldier and to a kind of wool, possibly reflecting their profession and trade, respectively. Furthermore, the Haneans had a broad tribal federation with the Yaminites, "the sons of the south," who were less settled and posed a threat to the government. The Yaminites, subdivided into subtribes, were scattered from the southern Mesopotamian valley to the northern extremities of the Euphrates, their major concentration being at the bend of the Euphrates. They had even extended themselves into the land of Amurru in southern Syria. Two other tribal groups are barely mentioned, the "sons of the north" who wandered in the Haran area, and the Sutu tribe, a fully nomadic people who become more prominent in later history. Tribal society, then, seems to be found in nomadic and urban forms, even at times combining both — habitation of the desert or steppe during the grazing season and urban settlement in "off" seasons. For example, the Haneans and the Yaminites lived in towns or villages (Akk. *ālāni*, "cities") and were engaged in cultivation as well as herding, or they lived in temporary camps (Akk. *nawūm*, "desert, uncultivated field"; cf. Heb. *nāweh*, "habitation, abode of shepherd") while tending flocks. Other groups established themselves in a settlement called a *ḥaṣārum* (cf. the application of Heb. *ḥᵃṣērîm* to a settlement of Ishmaelites [Gen. 25:16] or of Avvites [Dt. 2:23]).

The family was the basic unit of patriarchal tribal organization. The tribal rulers (called *abū*, lit. "fathers," used as a synonym for "tribal chiefs") were the family heads. Hence, the central governing institution seems to have been the council of elders, whose function was to decide on war and peace, to make treaties, and to represent the tribe before the governing authorities. The tribal hierarchy was led by a king (Akk. *šarru*), who seems to have been a military leader (cf. Heb. *śar*, "chieftain, captain, prince"). In some references, a group of "kings" seems to compose the collective tribal leadership, similar perhaps to the structure found among the Midianites (Nu. 31:8, Jgs. 8:12), the Edomites (Gen. 36:31-43), and the Arameans (1 S. 14:47).

Various tribal customs and institutions mentioned in the Mari archives have analogies in the patriarchal and Israelite tradition. For example, covenant making in Mari seems to have been concluded not so much by documents as by symbolic actions (contrast "the Book of the Covenant" in Exodus and Deuteronomy with the ritual sacrifice in Gen. 15:9f.), as in the case of the ritual killing of an ass-foal. An official in the Haran region relates to his king a peace treaty concluded between the Haneans and the land of Idamaraṣ and says, "They brought a whelp and a goat, but I obeyed my lord and did not allow a whelp and a goat. I caused the foal of a she-ass to be slaughtered" (*ARM*, II, 37:6-12).

Another example is the "patrimony" (Akk. *niḫlatum*; cf. Heb. *naḥᶜlâ*), a possession or inheritance that could not be sold through an ordinary business transaction, but could be transferred only by inheritance within a quasi-familial framework (cf. Lev. 25:23). The law could be circumvented through the "adoption" of the purchaser. Even in the case of a man without progeny, the adoption procedure ensured the continuation of his line and patrimony. Indeed, some adoption contracts concerned the primogeniture of the eldest (i.e., the first adopted) son, stipulating that his inheritance benefits be a double portion (cf. the case of Abraham's heir, Eliezer of Damascus [Gen. 15:2; also Dt. 21:15-17]).

As a third example, a leader was denoted by the term "judge" (Akk. *šāpiṭum*; cf. Heb. *šōpēṭ*). This person was a prominent man of a tribe whose authority far exceeded that of merely administering justice. In fact, the primary connotation of the word and its derivatives is not so much judicial (denoted by Akk. *dayānu*) as of the broader concept of governor or ruler. One need only remember that the post-Conquest "judges" acquired such authority for ruling, even exercising military leadership, although in some cases they rendered judicial decisions.

One may further compare the materials from the Nuzi archives of the 15th cent. as well as legal and economic texts from Ugarit and Alalakh. The preceding evidence is sufficient, however, to demonstrate that many political practices of the late 3rd and early 2nd millennia continue to be reflected not only in the patriarchal period, but in some cases even in the periods of the commonwealth and monarchy.

C. Patriarchs. In light of the foregoing information one may make certain assessments of patriarchal life and institutions. It would be a serious mistake to assume that the patriarchs were nomadic keepers of flocks descending from the desert steppes, expressing the nomad's "aversion to the urban life" of the settled community (cf. *IDB*, II, 451). They were tribal, yes, but certainly not fully nomadic. The narratives of Genesis reflect the seminomadic life of transhumance, i.e., settlement in urban bases (e.g., Hebron, Beer-sheba, Gerar, Rehoboth, Shechem, Bethel) in the "off" months with migration in the spring and summer months to appropriate grazing lands (e.g., the migration of Joseph's brothers to the area around Shechem and Dothan [Gen. 37:12, 17]; cf. also Isaac's actions at Gerar [Gen. 26:12-17]). If one takes seriously the evaluation of a much later writer, Abraham set out on his nomadic journey precisely to receive as an inheritance a land in which to settle. He dwelt in tents yet looked for a city, not just any urban community, but far more, "the city whose builder and maker is God" (He. 11:10). Here we have an emerging covenantal concept of a theocratic nation. He and his descendants were willing to wait for the land promised by covenant (cf. Gen. 12:1, 7; 15:7, 18; 26:3; 28:13) while living in tents, yet purchasing property (e.g., Ephron's field near Hebron [Gen. 23:17-20]; the plot near Shechem [33:18-20]) as evidence of their faith. They not only raised flocks, but also cultivated crops (26:12-14). Furthermore, when they moved into Egypt they purchased lands (47:27) and evidently lived in a settled urban community. It was not until the Exodus that the Israelites may be considered nomadic — and then only for a relatively short period of forty years.

Regarding relations with other political units, one must observe that the patriarchs recognized the political authorities in Canaan and Egypt by abiding by the laws and customs of the land. Several examples are in order.

Official and legal transactions took place at the city gate — the place for public meetings or for the deliberation of the council of elders. The episode of Abraham's purchase of a burial site from the sons of Heth at the city gate (Gen. 23:3-20) offers a most illuminating example of careful legal procedures. The accurate description of the location for proper identification (v. 9), the fiscal references (vv. 9, 13, 15f.), and specific mention of trees (v. 17) reflect authentic judicial activity, as does the report of the burial on the property (v. 19), which constitutes the final stamp of transfer of ownership. Many Nuzi legal tablets conclude with the formula that the tablet was written "after the procla-

mation in the entrance of the gate." Whether the action recorded in Gen. 23 is best understood in terms of the Hittite law code or of the profound Mesopotamian influence via the Hurrians is open to question. What is indisputable is that the patriarchs as resident aliens acknowledge the local authority but also the law of the land (cf. Gen. 34:20, 24, and the prophetic concern that Israel establish justice in the gate [Amos 5:12, 15]).

Furthermore, as a distinct tribal group they acted within the limits of their sovereignty by making treaties. Parity treaties may have been made when Abraham led his military allies against the coalition of five kings under Chedorlaomer (Gen. 14). Another example is Abimelech's peace treaty with Isaac, sealed by an oath and ratified by a feast (26:26-31).

D. Moses: Transition to Commonwealth. Toward the end of the Egyptian bondage, leadership within the tribe was vested in the "elders" (*zᵉqēnîm*, variously referred to as "elders of Israel" or "elders of the people," Ex. 3:16; 4:29; etc.). They undoubtedly achieved this dignity by virtue of experience, and possibly by seniority. It was they who accepted the leadership of Moses and Aaron (Ex. 3:16; 4:29-31). Several years earlier Moses had assumed that, since he was in a position of leadership in Egypt, the Israelites should have accepted him. Their response, however, was "Who made you a prince [*śar*] or a judge [*šōpēṭ*] over us?" (Ex. 2:14), pointing to an established procedure. Furthermore, the foundation of this political superstructure (i.e., Moses/Aaron and the elders) was the congregation of Israel (*ʿēḏâ*, first used in Ex. 12:3). When assembled for a public meeting, it was called a *qāhāl*, "assembly" (LXX *ekklēsía*), which therefore constituted the body politic of Israel as the people of God. The "people" (*ʿam*) of Israel were subdivided according to ancestry into the twelve "tribes" (*šēḇeṭ* [Gen. 49:28] or *maṭṭeh* [Ex. 32:2]), and these in turn were subdivided by families or "clans" (*mišpāḥâ* [Ex. 6:14; cf. Gen. 10:5]) with the basic unit being the "household" (*bayiṯ* [Ex. 1:1; cf. Gen. 7:1; 17:13, 27]) or "father's house" (*bêṯ ʾāḇ* [Ex. 12:3]). These terms sometimes overlap (e.g., cf. Ex. 12:3 with v. 21), and indeed sometimes go beyond the notion of mere consanguinity to include household servants (cf. Gen. 15:2f.; 17:27) or others who shared in the ideals of the community, i.e., their history, way of life, and destiny.

Another group was called the "leaders of the congregation" (*nᵉśîʾê hāʿēḏâ*, Ex. 16:22; Nu. 16:2; 32:2; sometimes rendered by "chief princes"). These may be officials serving at a lower level of administration, perhaps comparable to the *nase* officers of the lower city of Ebla.

The principle of representative government seems to have existed among the tribal communities even as early as the 3rd millennium. With the emergence of the city-state in ancient Mesopotamia, H. Frankfort claimed that "ultimate political power rested with a general assembly of all adult freemen. Normally the everyday affairs of the community were guided by a council of elders; but in times of crisis, for instance, when war threatened, the general assembly could confer absolute powers on one of its members and proclaim him king. Such kingship was an office held for a limited term; and as the assembly could confer it, so it could also revoke it when a crisis was past" (*Intellectual Adventure*, p. 141). Moses may well have failed to appreciate this when sitting to render administrative and judicial decisions (Ex. 18:13), but his father-in-law alerted him to this dangerous precedent, reminding him of the principle of representation and its corollary of delegation of authority (Ex. 18:17-27; cf. the later application of these principles in Dt. 16:18–17:20). It was through such representation that the assembly could carry out its deliberative, administrative, and judicial functions (cf. Ex. 24:1f.; Nu. 11:16; 27:1-4; contrast Dt. 31:28, 30 with Nu. 14:4, which reports the grumbling mob's desire to appoint a "leader" [*rōʾš*, "head"] and return to Egypt).

E. Treaties, Covenants, and Law Codes. A body politic is governed by an accepted standard, referred to in modern times as law. Such is the case with the social and political institutions in patriarchal times, as noted above (cf. Gen. 26:5). Valuable information about ancient laws comes from the well-known Code of Hammurabi and the older codes of Lipit-Ishtar, Ur-Nammu, and Eshnunna.

Far more significant, however, are the more than forty extant ancient Near Eastern treaties dating from the late 3rd millennium down to the late 1st millennium. Parity treaties were made between major city-state empires (e.g., Ebla and Assyria, Hatti and Egypt), as well as between tribal groups forming a confederacy (e.g., the tribes of Hana and Yamini; cf. also Gen. 14).

Suzerainty-vassal treaties were made between nations or tribes of unequal power. The special relationship established between two kings, the suzerain of the empire and the vassal king of the conquered people, may have served as a model for the unique covenant relationship between God, the Great King, and Abraham as vassal king (compare the numerous references in the treaties to the suzerain as the great king with Ps. 48:2 [MT 3]; 95:3). The pattern of the twenty-one reasonably preserved Hittite treaties of the 14th and 13th cents. B.C. generally follows the structure: (1) Title/Preamble; (2) Historical prologue; (3) Stipulations: (a) general, (b) specific; (4) Deposit and regular reading of the treaty; (5) Witnesses; and (6) Sanctions: (a) blessings, (b) curses. In addition, though not always in writing, the following items might be found: (7) Oath; (8) Solemn ceremony of ratification; and (9) A note of sanctions. This general formal framework coincides with the structure of Ex. 20–24 (the Book of the Covenant at Sinai; see Ex. 24:7), Deuteronomy (the covenant renewal at Moab), Josh. 24 (the covenant renewal at Gilgal), and 1 S. 11:14–12:25 (also at Gilgal). One may discern the same pattern in Gen. 15 and 17 (the Abrahamic covenant), and some of these elements are present even in the Adamic covenant of Gen. 2. In any case, the covenant that Yahweh the suzerain made with Israel the vassal — beginning with Abraham, renewed with Isaac (Gen. 26:3-5, 24) and Jacob (35:11f.), continued with Moses, and renewed before and after the Conquest — implanted a unique theocratic relationship in the consciousness of the people of Israel (cf. Ex. 19:4-6; Dt. 7:6; 26:19). It was this consciousness of a covenantal bond with Yahweh that would serve as a bond of union among Abraham's descendants. The rejection of that covenant relationship would in essence serve notice of separation and secession (as in the case of Esau [Gen. 28:6-9], and possibly Ishmael [21:12-21]). Conversely, acceptance of Yahweh and His covenant would serve to bind even non-Abrahamic people to the nation (e.g., Eliezer of Damascus, Rahab, Ruth the Moabitess, Uriah the Hittite, as well as the "mixed multitude" from Egypt; cf. Rom 2:28f.; Gal. 3:29).

II. Theocratic Commonwealth.—The transfer of leadership from Moses to Joshua was progressive. Shortly after the Exodus Joshua was appointed by Moses as his military adjutant (Ex. 17:9f.). Toward the end of the wilderness wanderings, God instructed Moses to commission Joshua before Eleazar the priest and the congregation of the people of Israel (Nu. 27:15-23). The ceremony of laying hands upon him, symbolizing the delegation of authority, probably followed the model of the priestly sacrifice, symbolizing the transference of sin and guilt to the animal (Ex. 29:10, 15, 19). The final transfer of authority is re-

ported just before the death of Moses (Dt. 34:9). The narrative in Nu. 27 states that this was done at Moses' initiative as well as by the divine decree that Joshua be so commissioned. The people and elders of the council were essentially passive, possibly playing a consultative, corroborative, and permissive role. It could be argued, however, that the people had a more active participation through the elders, judging from the events reported in Josh. 1:12-18. During the period of the judges no leadership emerged merely by divine decree. The leadership arose when people recognized their extremities and acknowledged the capabilities of someone, who was called upon to serve the people as judge and military leader. (See II.A.3 below; cf. also Nu. 14:1-4; 2 K. 12.)

A. Tribal Confederacy. The biblical sources reveal that the Israelites in Egypt lived a sedentary life. After the Exodus they lived a nomadic or seminomadic life, but only for a relatively short period of thirty-eight or forty years. By the end of the desert period, the tribes of Reuben, Gad, and half of Manasseh were settling into Transjordan N of Amon and Moab. Through the military genius of Joshua, aided by miraculous events, the Israelites conquered the Canaanite territory W of the Jordan. However one correlates the chronology with the Amarna age, the evidence is clear that the Canaanite city-states, though nominally under Egyptian rule and protection, were themselves in a state of factious anarchy. This condition may well have lasted longer than the quarter of a century assigned to the Amarna period itself. Even so, it took Joshua's military leadership of the confederacy to break whatever coalitions developed against the incoming Israelites (*see* JOSHUA, BOOK OF).

The biblical narrative emphasizes that the bond of unity within the tribal confederacy was the covenant between God and His people. The crossing of the Jordan, the taking of Jericho, the final ratification of covenant renewal at Mt. Ebal, the defeat of the Amorites at Gibeon and Aijalon, the distribution of territory to the various tribes, and the covenant renewal at Shechem — all point to God as the suzerain and sovereign covenant Lord who acts out His benevolence on His obedient and faithful people. At the same time, the disobedience of Achan brought about the defeat at Ai, showing how seriously the covenant Lord takes His sanctions.

The covenant renewal documents of the ancient Near East provided for transition of leadership. Such was the book of Deuteronomy. It updated the historical benevolent activity of the suzerain Lord, but also considerably expanded the covenant stipulations, both general (chs. 5–11) and specific (chs. 12–26). The impending Conquest and Settlement in the land of promise called for such an amplification of the earlier Book of the Covenant (Ex. 20–24). Hence, this renewal document may be considered the basic constitution of the theocratic commonwealth. The provisions for governing, political institutions, and juridical processes given in Deuteronomy may be compared with their implementation or lack of implementation in the subsequent historical books. Several institutions need to be considered.

1. Territorial Allocation. The apportionment of the tribal territories to the remaining nine-and-a-half tribes as recorded in Josh. 13–22 is said to fulfil the arrangements made by Moses (Nu. 34:16-29). It is to be noted that the territory is not parceled out through arbitrary decisions of an autocratic leader. Joshua, together with Eleazar the high priest and one leader from each tribal group (*nāśî'*, equated with *rā'šê 'ᵃḇôṯ*–'heads of households/fathers') had the responsibility for the apportionment. In the case of land to be allocated for seven tribes, three surveyors from each of these tribes were appointed to write out a description of their survey (Josh. 18:4). These portions were then allocated by casting lots.

The distribution of territory apparently was not regarded as absolute, for the borders in some instances were rather vague. For example, in Joshua's time the mountain country of Judah and Ephraim was conquered, and most of that territory was rather clearly surveyed and allocated; but much of the Shephelah and the coastal plains were yet controlled by Canaanite strongholds of resistance. Even the Jebusite city Jerusalem, originally allocated to Benjamin (Josh. 18:28), was not taken until David's time, and then incorporated into Judah. The tribe of Dan, apparently unable to gain control of its inheritance in the coastal regions between Judah and Ephraim (Josh. 19:40-48), began seeking an inheritance elsewhere. Eventually the Danites settled at Laish, at the headwaters of the Jordan (Jgs. 18). Their migration may have been motivated by the promise to Abraham that his seed would dwell "from the river of Egypt to the... Euphrates" (Gen. 15:18) and by the provision for additional cities of refuge (Dt. 19:8-10). This flexibility may be the reason why Solomon felt free to reorganize the kingdom into twelve districts rather than preserve tribal lines (1 K. 4).

2. Cities of Refuge and Levitical Cities. The Levites did not receive a territorial inheritance (Dt. 18:1f.). Instead they were given forty-eight cities (including six cities of refuge) proportionately distributed throughout the land (Nu. 35:1-8; Josh. 21). The Levitical priests had not only religious functions, but educational and even juridical responsibilities, as may be surmised from their control of the cities of refuge (Dt. 19:1-10) and their involvement with the judges and officers in the administration of justice (Dt. 17:8-13; 19:17).

3. Decentralized Government. A central seat of government did not emerge until the Davidic monarchy in Jerusalem. Under the strong leadership of Joshua, the covenant renewal ratification took place at Shechem (Josh. 8:30), the tribe of Judah and Caleb went to Joshua at Gilgal to request their territorial allocation (Josh. 14:6), and later in Shiloh, where the tabernacle had been set up, Joshua allocated the territorial inheritance to the last group of tribes. This decentralization, even more apparent during the period of the judges, continued down to the time when Samuel emerged as a leader who unified the tribal confederacy to a large degree. Yet his leadership was exercised in an annual circuit of Bethel, Gilgal, Mizpah, and his hometown of Ramah (1 S. 7:15-17). Even the most unifying influence, the tabernacle itself, did not find a permanent home during the period of the theocratic commonwealth; indeed, it was not stationary until Solomon's temple was erected in Jerusalem in the 10th century. Historically, the ark of the covenant is mentioned as located at Shechem (Josh. 8:33; 24:26), at Shiloh (Josh. 18:1; 1 S. 1:3, 9; Jgs. 18:31), at Bethel (Jgs. 20:26f.), and at Kiriath-jearim (1 S. 7:1f.). The provision of Dt. 12:5 to seek the Lord "at the place which the Lord your God shall choose from all your tribes, to establish His name there for His dwelling" need not be understood as mandating a single central sanctuary. Rather, in contrast to the innumerable idolatrous Canaanite sites, it may be taken distributively, allowing for several such locations in accordance with the stipulations in Ex. 20:24, "in every place where I cause my name to be remembered." This may account for the ease with which Jeroboam the son of Nebat was able to institute (or possibly continue) Yahweh worship in Bethel and Dan.

With the settlement in the land there began to be a shift of the basic political unit from the genealogically related

clan or family to the urban communities themselves. The urban communities that emerged were controlled by the elders, who administered the affairs of the city, both civil and judicial, at the gates of the city (cf. the provision for judges and officers in Dt. 16:18-20, and "the elders of his city, at the gate of the place where he lives" in 21:19). For example, the elders (*zᵉqēnîm*) of Gilead approached Jephtha, a valiant warrior (*gibbôr ḥayil*), asking him to become "head" (*rō'š*) of all the inhabitants of Gilead in their struggle with the Ammonites (Jgs. 11:4-11). It is not clear whether these elders were representatives elected from each town in Gilead, or merely a group of leaders acclaimed by the people (cf. Jgs. 10:17f.). In Ruth 3:11 the expression "all the gate of my people" may reflect a pure democracy in which the whole community acted as a public assembly; or it may simply refer to the leadership of the elders at the gate. In some cases the elders were relatives in a single family or dominant clan, e.g., the Abiezer clan of Ophrah, Gideon's city (Jgs. 6:24); the thirty sons of Jair who controlled thirty cities of Gilead (10:3f.); and the people of Shechem, who through their leaders proclaimed Abimelech king over them (9:1-6), but learning of his treachery and conspiracy, were ready to replace him with Gaal the son of Ebed (9:26-29).

Only in response to a very critical situation does one find a modicum of concerted action. Even during Joshua's leadership, after seven years of united action to establish territorial claim, the tribes and their clans were set free to establish themselves in their territorial inheritance (cf. Josh. 14). The whole tribal confederacy was not involved in joint political and military action. Defense against foreign invaders was the responsibility of each tribe or clan until the dawn of the monarchy. On some occasions there was joint action among the tribes, e.g., Naphtali and Zebulun under the leadership of Deborah of the tribe of Ephraim (Jgs. 4–5); the people of Ephraim, Benjamin, Issachar, and possibly Reuben may have participated, but Asher, Dan, Gad, and perhaps Reuben and Manasseh failed to do so [5:15-17]).

Only one exception is recorded, when the whole assembly of the people of God, all the sons of Israel from Dan to Beer-sheba, met at Mizpah in order to make retribution for the heinous crime committed by men of Gibeah. Their fellow Benjaminites refused to hand them over for judicial process. This action so outraged Israel that for once they recognized the essence of covenantal responsibilities (Jgs. 20:1-11).

B. Judges. The expressed concern of Dt. 12:8 against potential anarchy was unfortunately realized in the next three hundred years (Jgs. 17:6; 21:25). The kind of leadership that Moses and Joshua typified apparently could not be replicated. Some leaders were successful, but none commanded the attention of the whole commonwealth. Perhaps the reason for this is more in the theological and moral spheres than in the political and social spheres. In any case, the kind of leadership that emerged was that of the so-called "judge" (*šōpēṭ*; *see* JUDGE). The term may be misleading, since the functions of the various judges may or may not have included judicial activities, but certainly involved public administration and even military leadership. It has already been noted that Deuteronomy uses the term judge (16:18) in juxtaposition with elder (19:12). More specifically, some leaders were called "deliverer" (*môšî(a)ʿ*) rather than judge, e.g., Ehud (Jgs. 3:15), Shamgar (3:31), and Gideon (6:14, 36). Others were simply called "judge," e.g., Jair (10:3-5), Ibzan (12:8-10), Elon (12:11f.), and Abdon (12:13-15); or it is said of them that they judged Israel, e.g., Deborah (Jgs. 4:4f.), Eli (1 S. 4:18), and Samuel (1 S. 7:15-17). It is noteworthy that Deborah was also called a prophetess, that Eli was a priest, and that Samuel was a prophet and a priest. Still others were referred to by both titles, judge and deliverer, e.g., Othniel (Jgs. 3:9f.), Tola (10:1f.), Jephthah (11:13; 12:7), and Samson (13:5; 15:18, 20).

It was the juridical function that kept alive the cohesion of the tribal alliance by considering problem cases in the light of the covenantal stipulations. The function of judging civil cases was one of many responsibilities of civil leaders throughout the history of Israel, including this period. The dominant role of the judges and the major concern of the people and elders, however, was defense against foreign aggression. It was precisely because of Jephtha's military prowess that the elders of Gilead called him to be "head and leader over them" (Jgs. 11:11; *qāṣîn*, "leader, chief, dictator," here bears the meaning "commander in war").

The biblical records point to the divine authority with which these judges were endowed. Insofar as this is mentioned, it came either as a direct revelation through a prophet (as with Barak [Jgs. 4:6-9]), or was granted through angelic mediation (as with Gideon [6:12-24] and Samuel [1 S. 3:4-9]), or through victory in battle (as with Jephthah [Jgs. 11:9]), or even through a special proclamation at birth (as with Samson [13:2-5]).

III. Theocratic Monarchy.—The possibility of a monarchy was already anticipated in the Deuteronomic constitution (Dt. 17:14-20). The warning there is against autocratic as opposed to theocratic government. It should be noted that since the monarchy was not mandated, but rather permitted, kingship was not considered antithetical to the founding principle of theocratic government; no specific form of government was demanded. Furthermore, it is clear that absolute monarchy was precluded, since the whole context envisions the continuation of other leaders in the theocracy, namely, judges and officers, priests and Levites, whose authority was covenantal rather than delegated by the king. In keeping with the treaty-covenant analogy, it was the suzerain's prerogative to oversee the vassal's choice of leadership; hence the concern that Israel have a king "whom the Lord your God shall choose" (Dt. 17:15). God's choice was revealed by a prophet (cf. 1 S. 10:24; 16:12f.; 1 Ch. 17:11-15; 22:8-10; 1 K. 19:15f.). The king was to be a fellow covenant servant; a foreigner was not to be considered. As a covenant vassal, he was to read regularly his own copy of the covenant document, the originals having been deposited in the ark of the covenant in the sanctuary (Dt. 17:18-20; Ex. 25:21 and Dt. 31:9; cf. 2 K. 11:12, where Joash was crowned and presented with the "testimony" [Heb. *ʿēḏût*], i.e., the covenant stipulations). The restrictions enunciated for the Israelite monarchy were based on the covenant principle that Yahweh was king of Israel, in contrast to the typical Mesopotamian, Syrian, and Canaanite conceptualization of a king who was (or became) god; hence the concern for continual faith in Yahweh the covenant suzerain. Therefore, restrictions were placed on the king's personal, military, and economic aggrandizement, and even upon his harem, this last restriction because of its potential for syncretism and idolatry (Dt. 17:16f.; cf. Solomon's violations [1 K. 10:26–11:8] and the exhortation in Eccl. 5:10 [MT 9]). The possibility of dynastic succession was also envisioned (Dt. 17:20).

A. Emergence of Monarchy. The covenantal commonwealth had lasted for more than three hundred years. However, each tribal group had maintained a somewhat semiautonomous government and the confederacy was all the while deteriorating in power and unity. When some attempted to resolve the leadership crisis by choosing

Gideon (and his descendants) to rule over (*māšal b*^{e}) them, Gideon wisely refused because he perceived their concept of government to be inconsistent with the theocratic principle of the covenant (Jgs. 8:22f.). Similarly, Abimelech's attempt to establish himself as king over Shechem was based on the model of the Canaanite city-state, which was incongruous with the principle of covenant unity and hence doomed to failure (Jgs. 9). Samuel himself sought to perpetuate his judgeship by appointing (*śûm*, "set, place, establish") his two sons as judges (1 S. 8:1), though it may be debated whether he intended to make the office hereditary. Their ethical and legal corruption, however, made them unfit for public service. The elders of Israel therefore took the initiative and exercised their prerogative of seeking to consolidate their leadership in a king. That the elders were acting in a representative role may be deduced from the way God answered Samuel: "Listen to the voice of the people" (1 S. 8:7; cf. vv. 10, 19, 21). The scope of their representation is not clear, but it must have included at least the southern tribes (as far south as Beer-sheba) and the central tribes of Ephraim and Benjamin. They certainly had a legitimate claim for their request, based on the Deuteronomic covenant (Dt. 17:14f.). Whatever Samuel's own reasons for disappointment in their request, Yahweh's response clearly implies that their motive was improper when they asked for a king "like all the nations" (1 S. 8:5). In essence, they were rejecting the theocratic suzerainty of Yahweh, which clearly implied that, wittingly or unwittingly, they were rebelling in order to serve "other gods" (v. 8). The description of the arrogant, despotic kingship would have underscored the meaning of "like all the nations" (vv. 6-20). Saul became the first example of such an absolute monarch. The later kings of the northern kingdom were to follow that negative pattern. On the other hand, David set the standard (in spite of his lapse) for what Yahweh intended a theocratic king to be.

B. Monarchy. The monarchy was founded when Samuel anointed Saul as king over Israel (1 S. 10:1). The ceremony must be considered a public recognition of the gifts and authority of the king, being declaratory in nature rather than vesting authority upon the individual. It was the Spirit of the Lord who invested a person with power for service (1 S. 10:6; cf. the anointing of the priests [Ex. 40:9-15; Num. 3:3; etc.]), and when that Spirit was removed, the wisdom and power for governing was withdrawn (1 S. 16:14; 18:12; 28:15; cf. Zech. 4:6; 1 Cor. 9:26f.). Saul, however, did not turn out to be the king that the people had expected. Whether he had the necessary military and political sagacity may be debated. The biblical data point out the weakness of his spiritual and moral qualifications for the task (1 S. 13:13f.).

In contrast to Saul, it was David who, in spite of glaring weaknesses, was a man after God's own heart. He united the fractured confederacy. That he was crowned king in Hebron and only seven years later became king of the northern sector points to considerable independence among the tribal groups. This is shown also by the division of the kingdom in the days of Rehoboam and later in the days of Omri (1 K. 12; 16:21f.).

1. Office of King. In contrast to the Mesopotamian or Egyptian concept of kingship, in which the king was a human being who reflected the actions of the gods or was himself a god in human form, the Israelite kings were to reflect the theocratic character of the covenant, i.e., they were human beings who were to acknowledge the suzerainty of Yahweh as King over the people of God (cf. Pss. 93–100). David was therefore to be the vassal king. Likewise, Yahweh was the true Shepherd of Israel, but David was the under-shepherd serving as God's representative. This is quite explicit in Ezk. 34, where the last kings of Judah are excoriated as shepherds who miserably failed to carry out their responsibilities, forming the background for the magnificent Messianic prophecy that "My Servant David . . . will be their shepherd . . . will be prince among them."

Deuteronomy 17, anticipating the monarchy, limited the power of the king of Israel. The absolute, despotic authority of Near Eastern kings was not to be the model for the theocratic monarchy. For example, David himself was willing to pay the full price for Araunah's threshing floor (2 S. 24:24), recognizing the law of the covenant relating to family property. In contrast, a radical departure from this Israelite tradition took place in the northern kingdom in the next century. Ahab, though he was not willing to expropriate Naboth's vineyard, nevertheless allowed Jezebel his Phoenician-born queen to confiscate the property by having Naboth killed through judicial subterfuge (1 K. 21:1-16). This event marked a turning point in Israel's history as evidenced by the prophetic chorus of criticism against such arbitrary, unjust, selfish actions by kings (e.g., Hos. 5:10; Amos 5:10-13; Isa. 5:8; Mic. 2:1f.).

If Dt. 17 delimited the king's power, Ezk. 34 explicitly developed the duties and responsibilities of a theocratic monarch. He was responsible for the protection of his people from the nation's enemies (34:10, 22). He was responsible for consolidating the confederacy and maintaining the unity of the nation (34:11f., 16). He was also to be concerned for the general welfare of the people, administrating agricultural production as well as providing medical care (Ezk. 34:13-16a; cf. 2 S. 14:4 and 2 K. 6:26 — individuals appealed to him for help). Finally, he was responsible for justice in the land, which was to be carried out according to the principles of the covenant (34:16b-22; cf. 2 S. 15:1-5 and 2 K. 3:16-28 — people appealed to the king for justice). The humble attitude was to be a characteristic of the kingly vassal, since "God is the Judge, He puts down one and exalts another" (Ps. 75:7 [MT 8]; cf. 1 Pet. 5:2-4, where this principle is applied to church rulers).

The principle of dynastic succession was established with David (2 S. 7:15f.), it seems, primarily for the covenantal typology of a Davidic messiah, secondarily for the stabilizing influence that such continuity has politically. Solomon's kingdom was disrupted because of his disregard for convenantal stipulations (1 K. 11:8-13) and more immediately because of the irresponsible heavy taxation policy both of Solomon and his son Rehoboam (1 K. 12:1-11). In the northern kingdom only two dynasties of any significance were established — the house of Omri, by which Israel was known throughout the ancient Near East (cf. Akk. *bit Ḫumri*), and Jehu's dynasty, which lasted almost a century. Otherwise, succession was based on violence, including the execution of the king and his heirs (cf. 1 K. 15:27-29; 16:2; 2 K. 9; 15:8-31).

2. Civil Administration. In carrying out his royal responsibilities, David proved himself a master administrator, delegating authority to functionaries generally designated "servants" (*ʿabādîm*). Throughout the monarchy this term was used for officials in the diplomatic corps (2 S. 10:2f.), the military (2 S. 2:12f.), the merchant marine (1 K. 9:26-28), and the investigative bureau (2 K. 22:12f.). More specifically, for the administration of public and domestic affairs the following "officials" (*śārîm*) are mentioned in the reigns of David and Solomon (2 S. 8:15-18; 1 K. 4:1-7).

(1) The "recorder" (*mazkîr* [1 Ch. 18:15; 2 S. 20:24; 2 K. 18:18, 37; 2 Ch. 34:8]) was not merely a historian or

archivist, but a record keeper of the most important affairs of the nation and the king; he reported the news to the king, served as spokesman for the king, and regulated royal audiences and royal protocol. His office was comparable to the royal herald of the Egyptian court, or the *waka nuvis* of the Persian court, or even the *magister memoria* of the Roman empire.

(2) The "secretary" (*sōpēr*, "scribe" [1 Ch. 18:16; 2 S. 20:25; 2 K. 12:10 [MT 11]; 22:3, 8-14; 25:19; Jer. 36:10; 37:15; etc.]) was the trained professional who, with a battery of scribes, kept official records and tabulations. In Jer. 36:10-12, the "secretary's chamber" was sufficiently large to accommodate a good-sized audience. It is not clear if the office was adopted from the Egyptian court, as might be suggested by the confusion in the spelling of the secretary's name (i.e., Seraiah, Shavsha, Sheva, or Shisha), which may be of Egyptian origin.

(3) The "priest" (*kōhēn* [1 Ch. 18:17; 2 S. 20:25f.; 1 K. 4:5]) need not be considered part of the cultic retinue serving as chaplain or spiritual adviser, but may well have served as the king's confidential advisor or ombudsman. His function may have been to represent the concerns of the people to the king, as a comparison of 2 S. 8:18b with 1 Ch. 18:17b suggests. In the former passage David's sons are called "priests," but in the latter "chiefs at the king's side" (lit. "first at the hand of the king"). In Solomon's list, the "priest" is further identified as "the friend of the king" (*rē'eh hammelek* [2 S. 15:37; 1 K. 4:5]), a title also found in the Amarna correspondence.

In this connection, the biblical data mention the "counselor" (*yô'ēṣ* [2 S. 15:12; 16:20-23; 1 K. 12:6-10; 2 Ch. 22:3f.; Isa. 1:26]), who may not have had official standing but nevertheless played an important role in the kingdom. For example, Ahithophel the Gilonite was a priest who performed his sacerdotal functions, yet at the same time served as David's counselor, whose advice was "as if one inquired of the word of God" (2 S. 16:23).

(4) "The one in charge of corvée laborers" (*'ašer 'al hammas* [2 S. 20:24; 1 K. 5:14 (MT 28)]) was responsible for recruiting and overseeing the forced labor groups composed of war captives, Canaanites, and even some Israelites (1 K. 5:13 [MT 27; AV erroneously "tribute"]; 1 K. 9:20f.). This officer would not be a popular person, as shown in the case of Rehoboam's superintendent of the corvée, who was stoned to death (1 K. 12:18). Yet Jeroboam the son of Nebat had been such an official before becoming king in northern Israel (1 K. 11:28). This office was apparently established toward the end of David's reign.

(5) "The one over the house" (*'ašer 'al habbayit* [1 K. 18:3, 6; 2 K. 18:18, 37; 19:2; Isa. 22:15, 20-22]) was the primary palace official. Instituted in Solomon's reign, this officer seems to have been the steward of the palace or of the king's household, although later he may have become the most prestigious official, judging from Isaiah's oracle against Shebna (Isa. 22:20-23).

(6) The one "over the deputies" (*'al hannissābîm* [1 K. 4:5, 7, 27 (MT 5:7)]) was the king's chief internal revenue officer. This office, too, must have been instituted during Solomon's reign, although one may presume that David developed a similar system for the collection of taxes and tributes. It is clear that Solomon reorganized his expanded empire into twelve administrative districts, each of which was to supply the king and his royal staff with food for one month out of the year. Each district had its own appointed "deputy" (*nissāb*). This revenue system was perhaps the best administered program introduced during the monarchy. Jar handles and ostraca give archeological witness to the extensive use of the system.

The officials mentioned above represent the administration of the national monarchy, but it should be remembered that at the local level the authority of "the elders and the nobles" (*hazzeqēnîm wehahōrîm* [1 K. 21:8, 11; Isa. 34:12; Jer. 27:20; 39:6]) continued. The same inference need not be drawn, however, respecting the "judges and officers" (*šôpeṭîm wešôṭerîm* [Dt. 16:18-20; 17:8-13]), since they are mentioned only in connection with the Levitical organization (1 Ch. 23:4; 26:29). The juridical function undoubtedly was taken over by the elders who sat at the gate of the city. Jehoshaphat, however, apparently reintroduced the judicial offices by appointing judges "in all the fortified cities" and assigning the Levites the responsibilities of the "officer" (2 Ch. 19:5-11; note the distinction that emerges between that which is cultic and "that which pertains to the king").

3. Foreign Relations and the Military. Astute leadership, then as now, was backed up by a strong military force. David recognized this, but not at the expense of his trust in Yahweh the God of the covenant (cf. 1 S. 17 with the bitter lesson of 2 S. 24). Military power was essential to fulfil the responsibility of defense (cf. 2 K. 13:5; 14:27). The king himself sometimes led the army in battle as supreme commander (cf. 2 S. 18:3; 21:15-17), even at the risk of dying, as did Saul, Ahab, and Josiah (1 S. 31:3; 1 K. 22:34-37; 2 K. 23:29). David's great organizational skill, much of it learned through his experience with Saul, enabled him to train an efficient military structure. The officers were generally designated "commanders" (*śārîm*), whether they were over thousands, hundreds, fifties, or tens (2 S. 18:1; 2 K. 1:9-14). The title of "commander of the army" (*śar haṣṣābā'* [1 S. 14:50; 17:55]) or "over the army" (*'al haṣṣābā'* [2 S. 8:16; 1 K. 4:4]) was given to the highest military officer under the king. The various units of David's army were his "mighty men" (*haggibbōrîm* [2 S. 10:7; 23:8-39]), "the choice men of Israel" (*beḥûrê bîśrā'ēl* [10:9]), "the servants of David" (*'abedê dāwid* [11:17]), and foreign mercenaries, e.g., the Gittites from Gath in Philistia (15:18), and the "Cherethites and Pelethites" (8:18) who may well have been his personal bodyguard. Carite mercenaries appear later, in the days of Jehoida's regency (2 K. 11:4, 19). Other military units were introduced on a large scale during Solomon's reign, i.e., the chariots and the cavalry (1 K. 9:19; 10:26; cf. David's earlier use of these components while seeking to observe the limitations of Dt. 17:16; cf. also 2 S. 8:4). The chariotry was a distinct unit from the foot soldiers, led by its own commanders (1 K. 9:22; 16:8). "The men armed for war" undoubtedly were the archers often seen on reliefs, sometimes described as "armed with bow and shield" (*nōšeqê qešet ûmāgēn*; 2 Ch. 17:17f. [1 Ch. 12:8, 24, 34]).

Foreign diplomatic relations, often involving the display of military power, were employed both constructively and negatively. They were used to provoke hostilities (2 K. 14:8-10), to prevent hostilities (1 K. 15:18f.; 2 K. 12:17f. [MT 18f.]; 16:7-9; 18:14), to negotiate cease-fire agreements (1 K. 20:1-35), to establish coalitions (2 K. 3:6-8) and covenants or peace treaties (2 S. 3:12-16; 10:19), as well as to arrange for royal marriages consummating treaties (1 K. 3:1; 11:1-3; 16:31), to negotiate trade relations (2 S. 5:11; 1 K. 5:1-12 [MT 15-26]; 9:27f.; 20:34), and to handle protocol between visiting dignitaries (1 K. 9:10-14; 10:1-13; 2 K. 16:10; 20:12f.). Ambassadors or envoys (*ṣîr* [Isa. 18:2; 57:9; Jer. 49:14; Ob. 1; Prov. 13:17]) were appointed to carry on negotiations, though special delegations were also employed as messengers, i.e., representatives of the king (1 K. 20:2, 5, 9; 2 K. 14:8-10; 18:18).

C. Vassals of Assyria and Babylon. Although the theo-

cratic monarchy continued in the north down to the fall of Samaria (722/721 B.C.) and in the south until the fall of Jerusalem (587/586 B.C.), neither Israel nor Judah enjoyed complete independence throughout the period. Territorial expansion or reduction depended on the relation of the military strength of Israel and/or Judah to that of the surrounding nations. Their rivalry was with the Aramean powers to the north, especially in the 9th cent., but the revival of the Assyrian empire and then of the Babylonian empire posed a greater threat (*see* ASSYRIA; BABYLON). When Tiglath-Pileser III came to power in 745 B.C., he imposed a heavy tribute tax on Menahem (2 K. 15:19f.), which caused an intensification of an existing climate of anarchy and brought about rebellion and final calamity on Samaria (2 K. 15:29f.; 17:2-6). Judah did not escape such pressures; Ahaz and his successors paid rather heavily to maintain their own independence (2 K. 16:7f.; 18:7, 13-16), and Manasseh ruled as a puppet king (2 K. 21; 2 Ch. 33:11-13). When the northern kingdom fell the Assyrians incorporated the territory, reorganizing it into the four provinces of Dor, Gilead, Megiddo, and Samaria, with a "governor" (Akk. *bêl paḫâti*) over each, under whom the "head of cities" (Akk. *rab alâni*) served as tribute collector.

The Assyrians had a policy of deporting peoples and replacing them with other conquered peoples, for better control of possible rebellions. The deportation of large numbers of Israelites and their replacement by Babylonians and Syrians (2 K. 17:24) had a continuing effect on the governing of the land down to the 1st cent. A.D.

With the rise of the Babylonians, Judah's independence was short-lived. The vassal king Zedekiah was replaced by Gedaliah, whom the king of Babylon appointed to rule over the province (2 K. 25:22f.; Jer. 40:5, 9). The Babylonians apparently did not replace the people whom they deported from Judah.

IV. Jewish Commonwealth.—The disastrous fall of Jerusalem under Nebuchadrezzar in 586 B.C. ended the monarchy and began a period of dependence under various world empires. The Babylonians appointed their own provincial governors or commissioners. The Persians who replaced them, however, adopted a benevolent policy with conquered peoples, allowing a measure of autonomous rule, while keeping a firm hand on the military power, thereby controlling the political destinies of the nations.

A. Governors and Elders. The Persians organized the conquered provinces into satrapies, with the satrap of Beyond the River (Aram. *paḥaṭ ʿabar nahʿrâ* [Ezr. 5:6]) responsible for Syria and Palestine, and the provincial governors (*ʿparseʿkāyē'*) responsible with him to the king. Zerubbabel was one such "governor of the Jews" (Heb. *paḥaṭ yehûḏâ* [Hag. 1:1, 14; 2:2, 21]) who ruled in Jerusalem together with the "elders of the Jews" (Aram. *ḥśābê yehûḏāyē'* [Ezr. 5:9; 6:7]). These elders were responsible for the rebuilding of the second temple (Ezr. 6:14-18). Some seventy years later Nehemiah, who had enjoyed a high position as cupbearer in the Persian court, arrived in Jerusalem as the governor of the province of Judah (Neh. 5:14). He was permitted to rebuild the walls as well as the city of Jerusalem (Neh. 2:4-8). Jerusalem became the capital of Judah, a "province" (Heb. *meḏînâ* [Ezr. 5:8; Neh. 1:3; 7:6]) subdivided into districts (*peleḵ* [Neh. 3:9-18]), each ruled by a *śar* ("prince, ruler"). That Nehemiah enjoyed a measure of autonomy is further evidenced by his accomplishments: dealing with economic problems (5:1-15) and religious abuses (7:61-65; 13:4-28), instituting a genealogical registry (7:5) and a security force under the command of a "captain of the castle" (*śar habbîrâ* [7:2f.]). The political governor of the province continued to be an appointed official, as is evident from an Elephantine papyrus that refers to a certain Bagoas who was governor of Judea *ca.* 408 B.C.

B. High Priest and Scribes. The policy of allowing a large measure of autonomy led to a significant development of the influence of the high priest and also of "the scribe" (*hassôpēr*). The concern of the Jews in the Diaspora (*see* DISPERSION) to determine how to continue their religious culture following the destruction of the temple led to the renewed study of the Torah. This in turn brought about the development of the office of the scribe, who was to be "skilled in the Law of Moses" and teach "his statutes and ordinances in Israel" (Ezr. 7:6, 10). Furthermore, the Persian policy encouraging the restoration of the culture and religious practice of the subjected peoples gave additional impetus to the development of this profession. Toward the end of the biblical period the scribes were either Levites or priests (cf. 2 Ch. 34:13; Ezr. 7:21). The great importance attached to the Law of Moses for autocratic governing made the priests and scribes powerful political forces in the following centuries.

Regarding the high priest, one should remember that the Zadokite priests were reinstated in the temple service following the return from Exile (e.g., Jeshua ben Jozadak [Ezr. 3:2; 5:2]). The Zadokites gained greater authority during the Hellenistic period, when the Ptolemies and Seleucids recognized the high priest as the presiding officer of the elders, ascribing to him the title "ethnarch." He was responsible for the tribute payment and was thus empowered to levy taxes. When Onias was replaced by his brother Jason, who was more open to the hellenizing movement, the office became a political appointment rather than hereditary. Further intrigues brought about the rebellion, led by Mattathias of the Hasmonean family, against the Syrian Hellenistic pressures. Although not from Zadokite lineage, the Hasmonean priest Simon Maccabeus restored Judah to independence in 142 B.C. and continued as titular head of government. A grandson of Simon, Aristobulus I (104 B.C.) took the title "king," the first to do so since the Exile. These events led to serious difficulties for the more orthodox Jews, who looked for a Davidic king. Nevertheless, it is clear how powerful and important the office of priest was, especially since no Davidic political leader emerged after the collapse of the kingdom in 586.

C. Sanhedrin. One of the most powerful institutions of the second commonwealth period was the SANHEDRIN (Gk. *synédrion* [Mt. 26:59; Acts 5:21], sometimes translated "council"). Josephus mentions five Sanhedrins as the council that governed the five Roman districts of Judea (*Ant.* xiv.5.4 [91]). This council also had judicial authority; it was considered the supreme Jewish court (Mt. 26:59; Jn. 11:47; Acts 4:15; etc.). Its origin is not clear, but the elders of Ezr. 5:5, 9; 6:7, 14; 10:8; Neh. 2:16; 4:14, 19 [MT 8, 13]; 7:5 may have served as the prototype. During the Greek period a "senate" (Gk. *gerousía* [Josephus *Ant.* xii.3.3 [142]); 1 Macc. 12:3, 6; 14:20] was organized, with elders representing the nation. Under the Roman Gabinius this body was given considerable power, though Julius Caesar curtailed the territorial extent of its authority. Nevertheless, the internal governing of Judea was in its hands. There were local courts or councils (*synédria* or *boulaí* [Mt. 5:22; 10:17; Mk. 13:9; Josephus *Ant.* iv.8.14 (214)]), which reported to the central authority. These local courts consisted of at least seven elders, but in larger towns they had up to twenty-three elders. The Sanhedrin was abolished in A.D. 70 and replaced by the "Court of Judgment" (Heb. *bēṯ dîn*), which was composed only of scribes and had no political authority.

Originally the Sanhedrin was composed of the predominantly Sadducean priestly aristocracy. Queen Alexandra

(76-67 B.C.), however, included scribes and Pharisees whom she favored. By NT times the Great Sanhedrin was composed of the high priest, serving as the presiding officer, and former high priests, the elders, and the scribes (who were the legal authorities), all of them either Sadducees or Pharisees (cf. Mt. 26:3, 57, 59; Acts 4:1, 5; 5:17, 21, 34; 22:30; 23:6).

D. Synagogue. The basic meaning of Gk. *synagōgḗ* is "a place of meeting." The LXX often uses the word for the assembly of Israel (translating Heb. *qāhāl* or *ʿēḏâ*). As a Jewish institution, the origins of the synagogue (*see* SYNAGOGUE) go back to the Diaspora, the earliest testimonies coming from the 3rd cent. B.C., which mention synagogues in Egypt. Larger cities of the Roman empire seem to have had several places of Jewish worship, depending on the size of the Jewish community. In Palestine every town had its synagogue, where people worshiped, the Law was studied, and children were taught. The local Jewish congregation was governed by a board of directors consisting of three "elders" (Gk. *presbýteroi*). The *archisynágōgos* was the presiding officer. The instruction and discipline of the children was entrusted to the synagogue "attendant" or "servant," the only other official. Such instruction and discipline was to be in conformity with the law of Moses. Punishment was exercised by scourging or excommunication. As a school where the Law was studied, it was also called the "house of instruction." The synagogue became the center of community life, where people gathered to discuss community affairs.

V. NT on Government.–The *locus classicus* on civil government in the NT is Rom. 13:1-7. In making this statement, however, one should caution against looking only to these verses to understand the biblical teaching on civil government. They do not address themselves, e.g., to the question of what form this government should take, nor to the question of conscientious disobedience, nor to the question of whether Christians may participate in government. In considering government in the NT, due consideration must be given not only to Pauline theory and practice, but also to Christ's teaching and practice under Jewish autocratic rule and Roman imperial authority. For information on Roman law and civil administration which is helpful in formulating a clear and definitive background for NT teaching on government, *see* ROMAN EMPIRE AND CHRISTIANITY; ROMAN LAW. As mentioned at the outset, even though the biblical records give fragmentary information on political forms, institutions, and procedures for the governing of the body politic, there nevertheless emerges a clear and significant teaching in the NT on human government, i.e., the state as the body politic in the world, in contradistinction to the Church as the people or kingdom of God.

A. Authority of the State. The concise statement of Paul in Rom. 13:1 with respect to "governing authorities" (*exousíais hyperechoúsais*; NEB "supreme authorities") is that "there is no authority except from God, and those that exist have been instituted by God" (cf. 1 Pet. 2:14). All authority is ultimately derived from God, even though people may ignore Him or reject Him. God is sovereign over His creation, the world, and the people who live in it. The testimony of the OT agrees with this (cf. Gen. 9:5f.; Isa. 10:5; 45:1; Dnl. 4:34f. [MT 31f.]; Ps. 75:6f. [MT 7f.]). The judgments of the omnipotent God on the nations serve to underscore the truth of His sovereignty (cf. Ex. 7–12; Joel 3; Isa. 13–27; etc.). In the NT Christ acknowledged the authority of the Jewish Sanhedrin, the high priest, Herod the king, and Pilate the Roman procurator (cf. Mt. 26:59; 27:1f.; etc.); He even recognized the civil authority of Caesar (22:15-22). Eschatologically, God's final judgment on the empires of the world and the dragon that deceives the nations confirms the teaching that God is the ultimate authority from whom all other authority is derived (Rev. 17–20). It is then inconsistent with the Scriptures to consider that human governments derive their legitimate authority ultimately from a "social compact," or from "the consent of the governed," or even from "the will of the majority."

The state, then, may be considered an expression of God's common grace extended to all mankind. Hence, to resist the governing authorities is tantamount to resisting God (Rom. 13:2). Furthermore, the NT does not designate any particular form of civil government any more than the OT did (see III above, though it may be observed that the OT theocracy in whatever form was not designed as a pattern for all nations). Nor does the authority of the government depend on the moral character of its leadership. Whatever the character of a ruler in NT times, whether high priest or king, procurator or emperor, the authority vested in him was to be honored and respected. Paul's own practice under the autocratic Roman government was to acknowledge its authority. He frequently asserted his own obedient subjection to the laws of the empire, and even when imprisoned, his appeal to Caesar was a further recognition of the supreme authority whose laws he had obeyed and whose protection he sought. In this he followed the example of Christ, who was tried by Pilate, a man unworthy of his high office. Even though the trial proved to be a miscarriage of justice, Jesus firmly reminded him, "You would have no authority over me, unless it had been given you from above" (Jn. 19:11).

B. Function of the State. The governing authorities are vested with twofold responsibility: the administration of justice and the promotion of the general welfare. Regarding the first, Paul states that the government wields the sword as a "servant of God, an avenger who brings wrath upon the one who practices evil" (Rom. 13:4). It is thus responsible for restraining evil by punishing crime and violence. Furthermore, the justice meted out upon evil reflects to a greater or lesser degree the righteous judgment of God, the Judge of all the earth. The ministers of divine justice, therefore, must take appropriate measures that fairness, firmness, and mercy be exhibited. Only in this way will retribution function for the defense and encouragement of good people as well as for the punishment of criminals.

The second responsibility of government is the promotion of the general welfare (Rom. 13:4-7). The OT prophets, concerned about the needy, especially urged upon kings their responsibility to care for "the afflicted and needy," for "the orphan and the widow," and even for the resident alien (cf. Ps. 72:1-4, 12-14; Jer. 22:16; Ezk. 34:16). This general welfare was described by Paul in another connection. When urging Christians to pray "for kings and all who are in authority," he expressed the reason: "in order that you may lead a tranquil and quiet life" (1 Tim. 3:2). Without doubt, the general peace brought by the Romans (*pax Romana*) was one of the great blessings for the general well-being of the people in that period. Paul may already have had a premonition of times of distress and persecution, especially for Christians, in the decades ahead. Peter also acknowledged government's positive role of promoting the general good when he instructed believers to submit themselves to "governors as sent by Him for the punishment of evildoers and the praise of those who do right" (1 Pet. 2:14). The public recognition of those who do right is a tacit acknowledgment that government is responsible for promoting moral standards in the community and nation. There may be differences of

opinion about how much government should do, but consideration should be given to maintaining programs of public health and education, to encouraging philanthropic activities, and to protecting the disadvantaged from abuses by the wealthy and powerful sectors of society.

C. Responsibility of Citizenship. Peter and Paul clearly called for submission to the powers that be (Rom. 13:1; 1Pet. 2:13). Paul further admonished believers to pay taxes "to whom tax is due" (Rom. 13:6f.). In a very intriguing conversation between Peter and his Lord, one finds that Christ's own practice was to pay His taxes (Mt. 17:24-27). The principle seems to be that those who enjoy the benefits of the general protection and welfare of the state should share in the costs of maintaining that state. Citizens are to obey the laws of the land, to pray for civil authorities and all levels of government, and to give honor to whom it is due. Furthermore, the NT does not specifically forbid Christians to participate in government service — whether in military service or in judicial, executive, or legislative responsibilities. This is shown by the rather large number of converts who held public office without anyone calling them to renounce their position; e.g., the Ethiopian eunuch, Cornelius, Sergius Paulus, the Philippian jailer. Paul's references to "those in Caesar's household" possibly refer to persons holding official status in the government of the Roman empire. Again, this is in keeping with the positions of authority of certain OT believers, e.g., Joseph in Egypt, Daniel in Babylon, Mordecai in Persia, Naaman in Syria. The conclusion of most Christians is that they may participate in government as the political situation allows, not only by voting but also by serving as employees or as elected officials. In any case, believers exercise this prerogative as individual Christian citizens and not as representatives of the Church.

D. Civil Disobedience. Although human government is divinely instituted, it does not follow that its authority is unlimited. On the contrary, the Scriptures give ample evidence that when governments usurp the authority of God by demanding subjection to laws contrary to clear commands of Scripture, they have exceeded their authority. Acts 5:29 summarizes the concluding arguments of believers before the Sanhedrin: "We must obey God rather than men." No one may claim that he is entitled to disobey the laws merely because of his personal disagreement with them. In totalitarian societies some laws may be hard to accept, but Christians as well as all other citizens are responsible to obey them. No Christian, however, may be forced to declare "Caesar is Lord" as a recognition of Caesar's deity and as a denial of the Lordship of Christ. Furthermore, when governments oppress the righteous, reward evildoing, prevent justice, and subvert the ordinances of God, it may be necessary for Christians to resist them.

The major difficulty is arriving at a consensus about when such a government has gone too far. The nature of the opposition to be offered is also a debatable issue. Resistance, demonstrations, and propagandizing for a particular position within the law is one thing. Civil disobedience that goes beyond the law, such as advocating or participating in the violent overthrow of the government, is another. Such critical situations in the political affairs of government call for special periods of prayer "for kings and all who are in authority" (1Tim. 2:1-4). This is not simply a pious platitude, but rather a sincere realization that "we wrestle not against flesh and blood" (Eph. 6:12) and that 'the weapons of our warfare are not worldly" (2 Cor. 10:4).

David's experiences with Saul and other enemies amply illustrate this point. Hence, such prayers as Ps. 35:1; 43:1; 119:154; 129:1-4 may prove to be an encouragement. It is God who reigns and controls the destinies of the defiant rulers (Ps. 2:4; Rom. 9:14-24). In Rev. 6:10; 11:17f.; 15:2-4 the prayers of the saints persecuted and martyred by a demonically empowered world empire may hold the clue for Christians living under less severe conditions. Their trust is in a sovereign God who remains in control of political powers and who ultimately will vindicate the cause of the righteous.

GOVERNMENTS (1 Cor. 12:28, AV). *See* ADMINISTRATORS.

GOVERNOR [Heb. and Aram. *peḥâ*]; AV also PRINCE, DEPUTY; NEB also VICEROY; [Heb. hiphil of *pāqaḏ*–'appoint a governor']; AV also SET OVER; [part. of *māšal*] (2 Ch. 23:20); [*śar*]: AV also PRINCE, RULER; [*nāgîḏ*]; AV also RULER; NEB also PRINCE; [*šallîṭ*] (Gen. 42:6); [*tiršāṯā'*] (Neh. 7:65; 10:1 [MT 2]); [Aram. *'aparsᵉḵāy*] (Ezr. 5:6b; 6:6b). AV APHARSACHITE; NEB INSPECTOR; [*'aparsaṯḵāy*] (Ezr. 4:9); AV APHARSATHCHITE; NEB COMMISSIONER; [Gk. *hēgemṓn, hēgemoneúō*–'be governor,' *hēgéomai*–'lead']; AV also RULER; NEB also CHIEF ADMINISTRATOR; [*ethnárchēs*] (2 Cor. 11:32); NEB COMMISSIONER. (For Jas. 3:4, AV, *see* PILOT.)

The OT term most frequently rendered "governor" by the RSV is *peḥâ*, a loanword from Akk. *pīḫatu*, "governor." The hiphil of *pāqaḏ* is used in regard to Gedaliah (2 K. 25:22f.; Jer. 40:5, 7, 11). *Māšal* is a general term for rule; its participial form may indicate a sovereign. *Śar* (cf. Akk. *šarru*, "king") has a wide range of meaning, including the designation of rank; as "governor" it indicates the overseer of the sanctuary (1 Ch. 24:5, AV), the mayor of the capital (2 Ch. 34:8), and the officer over a district (1 K. 20:14f.). In Gen. 42:6 the term *šallîṭ* is used of Joseph, the appointed head over Egypt; here it indicates a very high-ranking official, perhaps vizier. Nehemiah bore the title of the Persian governor in Judah, *tiršāṯā'*. Dnl. 3:2 provides a list of the various officers of the Neo-Babylonian empire. The AV translates the second word on the list (Aram. *sᵉgan*) as "governor" (RSV, NEB, "prefect"); the RSV assigns "governor" to the third word (*peḥâ*, AV "captain"; NEB "viceroy"); and the NEB renders "governor" for the summary word, **šilṭōn* (AV "ruler"; RSV "official"). In 2:48 Nebuchadrezzar appoints Daniel ruler (*śᵉlēṭ*; NEB "regent") over all the province of Babylon and chief of the prefects (*sᵉgan*, AV "governors") over all the wise men of Babylon. The AV renders *'aparsᵉḵāy* and *'aparsaṯḵāy* (Ezr. 4:9; 5:6; 6:6) as proper nouns, but many take these as the title of an office (cf. RSV, NEB); *see* APHARSACHITES, APHARSATHCHITES, APHARSITES.

The NT terms most frequently rendered "governor" are *hēgemṓn* and its cognates. These terms generally refer to a provincial governor, or procurator. The title *ethnárchēs* refers to the deputy of a king. The ethnarch who

desired to capture Paul was head of Damascus and responsible to King Aretas of Nabatea. *See* ETHNARCH.

"Governor" is a general administrative term with wide range of use for a ruler with great responsibility, usually a king. Its use includes the head over a city, a province, or a territory. Translations use it quite freely: the AV widely employs it for God Himself but also for the captain or pilot of a boat. As a governmental title it varies drastically according to the numerous political systems that dominated Palestine. It is used most often for positions in foreign administrations.

Joseph is referred to as governor over Egypt (Gen. 42:6; AV 45:26). At the time of Ahab there were governors over districts who were responsible for supplying soldiers for the king's campaigns (1 K. 20:14-19). Each capital city of divided Israel had a governor; Amon was governor (*śar*) of Samaria at the time of Ahab (1 K. 22:26), and two governors of Jerusalem are mentioned during the reign of Josiah (Joshua and Maaseiah, 2 K. 23:8; 2 Ch. 34:8). After the fall of Jerusalem in 586 B.C., Nebuchadrezzar appointed Gedaliah governor over Judah at Mizpah (2 K. 25:22), but unfortunately he was assassinated (v. 25). During the postexilic period Nehemiah appointed Hananiah, who had been governor over the fortress in Jerusalem, head of that city (Neh. 7:2).

During the Persian period the OT mentions three governors of the province of Judah: Sheshbazzar under Cyrus (Ezr. 5:14; cf. 1:8, 11), Zerubbabel under Darius I (Hag. 1:1, 14), and Nehemiah under Artaxerxes I (Neh. 5:14). For Zerubbabel Ezr. 6:7 uses the title "governor of the Jews." These men were appointed by the Persian emperor. Nehemiah initially had to gain clearance for his journey to Jerusalem from the governor of the province Beyond the River (i.e., beyond the Euphrates, including Palestine and Syria) (Neh. 2:7-9). In the RSV of Ezr. 5:6; 6:6 both Tattenai, head of this province, and his associates are called "governor"; but two different Aramaic words are represented. According to J. M. Myers, Tattenai was assistant to Ushtani, the satrap of Babylon and Across (RSV "Beyond") the River (pp. 67f.). Tattenai challenged the work of rebuilding the temple, and as an unexpected result of his appeal to Darius he was commissioned by Darius to assist in the work (Ezr. 5f.).

Shortly before the birth of Christ, Augustus refined the administration of the Roman empire. Peaceful provinces came under the senate, which appointed a propraetor or a proconsul; other provinces were subject to the emperor, who as proconsul appointed a legate; more unruly provinces requiring a resident army were under a PROCURATOR responsible to the emperor — Egypt and Judea were famous in this regard. Quirinius was legate over Syria at the time of Jesus' birth (Lk. 2:2). The procurator over Judea resided at Caesarea, built for that purpose by King Herod. Pontius Pilate was procurator at the time of Jesus' death. Paul was imprisoned in Caesarea during portions of the terms of two procurators, FELIX and FESTUS (Acts 23:24; 24:27). As is evident from events in the lives of Jesus and Paul, the procurator was the judge in matters pertaining to disturbances.

The AV uses "governor" for the part. of Heb. *māšal* in reference to God and the Messiah. God is "the governor [RSV "he rules"] among the nations" (Ps. 22:28 [MT 29]). According to Jeremiah the Messiah is to be the governor (RSV "ruler") over restored Israel (30:21). In Matthew, Jesus is the one who comes to rule His people as governor (2:5f.).

The early Christians were exhorted to be subject to those in authority, including emperors and governors (1 Pet. 2:13f.). But they were also warned that they should expect to come under the state's suspicion and condemnation if they adhered to the teaching of Christ. During such a trial the Holy Spirit would guide them in giving a proper answer to the authorities (Mt. 10:17-21).

J. E. HARTLEY

GOZAN gō'zan (Heb. *gôzān*; Akk. *Guzana*). A city or region in northern Mesopotamia. Sennacherib, the king of Assyria, boasted to Hezekiah that Gozan was among the "nations" that his fathers had destroyed (2 K. 19:12 par. Isa. 37:12). The "river of Gozan" is given as a descriptive name of the Habor (Ḫābûr), in an account of the places to which Israelites were taken captive when Samaria was destroyed (2 K. 17:6; 18:11; in 1 Ch. 5:26, however, the RSV translates "the river Gozan," where the MT reads "the river of Gozan"). Adadnirari II recorded, "The Habur I crossed; against Guzanu which Abisalamu, son of Bahiani held, I marched" (*ARAB*, I, § 373). Shalmaneser III referred to "Asu the Guzanite" (*ARAB*, I, § 598). In an eponym *(limmu-)* list, the eponym of Nergal-ilia contains the description "field marshal against Guzana" (*ARAB*, II, § 1198 no. 809). We should therefore take Guzana as a city-state through which the Habor River flowed. It has been identified with the Gauzanitis mentioned by Ptolemy (v. 18) and modern Tell Halâf (the site from which Halafian pottery drew its name), E of Haran. W. S. L. S.

GRABA grā'bə (1 Esd. 5:29, AV). *See* HAGABAH.

GRACE. In the OT, the RSV renders *ḥēn* by "grace" on four occasions only (Est. 2:17; Ps. 45:2 [MT 3]; Jer. 31:2; Zec. 4:7), while in two other instances (Zec. 11:7, 10) *nō'am* (cf. Ugar. *n'm*), "grace," "kindness," is used to convey the concept. *Ḥēn* is widely translated as "favor" in the RSV and NEB, where the AV reads "grace." The term carried some breadth of meaning for OT writers, beginning with the ordinary sense of that which brought approval, delight, and joy (Gen. 33:15; 1 S. 16:22) and also describing aesthetic experiences of loveliness and sweetness (Est. 2:9; 5:2). In a more developed form it signified goodwill toward a person, as between God and man (Gen. 6:8), and found special expression in the master-servant relationship (Gen. 39:4; Neh. 2:5). The common usage of "grace," "kindness" seems reflected in the term *nō'am*, used by Zechariah in naming one of his two symbolic staffs (Zec. 11:7, 10; *see* GRACE AND UNION).

Grace or favor is the positive emotional reaction of approbation to some form of relationship, whether between man and nature, or something restricted to the level of human associations. Where God is involved in this relationship, it is He alone who bestows the estimate and consequences of favor and grace upon man (Prov. 12:2; Jer. 26:19). The term *ḥeseḏ*, which is broadly descriptive of covenant love, is translated in the RSV by "favor" only in Est. 2:9 (AV "kindness"; NEB "special favor") and Dnl. 1:9 (AV "favor"; NEB "show kindness"), and in no instance by "grace." Apart from the six references involving *ḥēn* and *nō'am*, the word "grace" does not appear in the RSV OT. R. K. H.

The word "grace" in its special Christian sense refers to the freedom of salvation in Jesus Christ. As used by Paul in particular, the word underscores the fact that salvation is freely given by God to undeserving sinners. This is its central meaning; it also has other meanings, some of them peripheral to the NT message of salvation.

The Greek term is *cháris*, a common word in secular Greek. The LXX uses *cháris* to translate OT Hebrew terms that often bear only a faint suggestion of the Pauline sense of *cháris*. NT writers other than Paul use the term, sometimes in a sense similar to Paul's, but none uses it consistently with its central Christian meaning, and a few do not use it at all. Once the Pauline sense of the word is grasped, however, we can recognize all the saving acts of God as acts of grace, even when the word is not used. Our primary objective will be to examine the uses of the word *cháris* in the Bible; but it must be kept in mind that, in the light of its most pregnant meaning, the reality of grace appears clearly wherever God is revealed in His redeeming purposes and actions as the God who saves freely, without obligation and without regard for merit.

V. Conclusion

I. Grace in Secular Greek.—*Cháris* is used to convey several meanings in secular Greek literature, some of which recommended the word to biblical writers. The first, and perhaps the original sense is the quality of anything that brings delight or pleasure, or that wins favor. A good wine and fine choice of words are examples of *cháris*. Persons have *cháris* when they are delicate, tactful, or artful; in this sense. Plutarch speaks of Homer's *cháris*. In this way, things or people win the *cháris* (favor) of others by having *cháris* (charm).

Cháris has an ethical as well as aesthetic side, for kindness and generosity are also graces. One shows *cháris* by displaying benevolence to inferiors. Aristotle speaks of the gods bestowing *cháris* on citizens. He also speaks of the moral quality of "helpfulness [*cháris*] toward someone in need, not... that the helper may get anything but for the sake of the person who is helped" (*Rhet.* ii.7). The gods have *cháris* in both the above senses.

In return for *cháris*, one ought to give thanks; and the word for thanks is *cháris*. To have *cháris* is to be thankful; to give *cháris* is to give thanks. Here *cháris* indicates both a delight in receiving the favor of a superior and the thanks one offers for it.

We have, then, three uses of *cháris* in classical Greek: (1) a charming quality that wins favor, (2) a quality of benevolence that gives favor to inferiors, and (3) a response of thankfulness for the favor given. As we shall see, it is the second sense that commends *cháris* for adoption into the NT vocabulary to indicate the benevolence of God toward sinners. The other senses are also taken over in biblical use, but are always peripheral to the central NT meaning.

It may be added that in later Greek *cháris* also had the sense of force or power. It could be a spell, or demonic force, affecting human life with supernatural influences. In Euripides, it was a power from the underworld that could convey the virtues of a dead hero to his living family or followers. This sense, too, though set in a new context, was used in the NT: grace became the power of God to enable Christians to live the new life in Christ.

Finally, in Hellenism, showing *cháris* to people came to suggest favoritism, or what the NT calls "respect of persons." To show *cháris* suggested an unfair bias toward those who ingratiated themselves, perhaps by bribery, with their superior.

II. Grace in the LXX.—The LXX used *cháris* to translate Heb. *ḥēn*. When translated as *cháris*, *ḥēn* refers to a quality that makes a favorable impression on someone, usually a superior. Grace, then, is not in the giver, not in the one impressed, but in the one receiving. Appeals to kings often begin with, "If now I have found favor [*ḥēn*] in your sight..." (Gen. 30:27; 1 S. 16:22; 2 S. 14:22; Prov. 18:22). In the same sense, people are said to find favor (*ḥēn*) in God's sight, as in the case of Noah and others (Gen. 6:8; Ex. 33:13; 2 S. 15:25). Jacob tried to win Esau's favor by plying him with gifts (Gen. 33:5). Joseph won approval (*ḥēn*) in Potiphar's house (Gen. 39:4). In such cases, grace is a personal quality that is recognized and rewarded. It is the sense commonly found in classical Greek, but bearing little resemblance to the deeper Christian sense given the word "grace" by Paul.

Sometimes, the quality of *ḥēn* is aesthetic. It refers to anything attractive or pleasant. An adornment is a *ḥēn* (Prov. 1:9; 3:22). Even a harlot's enticement is *ḥēn*. God promises to make the Israelites *ḥēn* (attractive) to the Egyptians, the better to help them make off with expensive objects (Ex. 3:21f.). So, too, the temple is *ḥēn*, or beautiful (Zec. 4:7). Here again, the translation of *ḥēn* by *cháris* manifests little sense of the central NT meaning of "grace."

The verb form *ḥānan* comes closer to the NT notion of *cháris*. *Ḥānan* usually denotes a superior's responding generously to inferiors. This form is found mostly in the Psalms, where God is invoked to hear prayer (4:1 [MT 2]), heal (6:2 [MT 3]), redeem (26:11), and forgive (51:1 [MT 3]) in connection with showing *ḥānan*. Though occasionally it is suggested that someone has a moral claim on *ḥānan* (26:11), the appeal is made mostly on the basis of need, the weakness (6:2), loneliness (25:16), or affliction (31:9) of the person seeking *ḥēn*.

Ḥānan demonstrates God's sovereign freedom: "I am gracious to whom I am gracious..." (Ex. 33:19). This, while harsh in sound, is said to indicate the freedom of God in electing Israel (cf. Rom. 9:14). In other instances, however, there appears a correlation between God's *ḥānan* and Israel's justice (cf. Am. 5:15).

The verb refers to a benevolent attitude that is expressed in concrete action. Yahweh shows *ḥēn* in giving Jacob children (Gen. 33:5). The righteous demonstrate their *ḥēn* to the poor and needy by giving generously (Ps. 37:21, 26). One does *ḥēn* also by sparing the lives of a defeated enemy (Dt. 7:2).

"Grace" is often paired with "mercy" (*ḥeseḏ*), as in Ex. 33:19, but most prominently in liturgical formulas (cf. Ex. 34:6; Josh. 2:13; 2 Ch. 30:9; Neh. 9:17; Ps. 11:4; 86:15; 103:8; Jonah 4:2). The words of Ex. 34:6 are a model: "The Lord,

the Lord, a God merciful and gracious, slow to anger, and abounding in steadfast love and faithfulness. . . ."

The Heb. *ḥeseḏ* comes closer than *ḥēn* to the NT concept of grace; but the LXX translates *ḥeseḏ* with Gk. *éleos*. The English rendering of *ḥeseḏ* is sometimes "mercy" (AV), but more adequately "steadfast love" (RSV) or equivalents. *Ḥeseḏ* suggests, most often, Yahweh's freely given commitment to love. It is the character and conduct typical of God within the covenant He freely made with Israel. He shows "steadfast love to thousands of them that love me and keep my commandments" (Ex. 20:6; Dt. 5:10). "Know therefore that the Lord your God is God, the faithful God who keeps covenant and steadfast love . . ." (Dt. 7:9; cf. Jer. 9:24; 32:18). Within His covenant community, He abounds in *ḥeseḏ* (Ps. 86:15; Ex. 34:9). The faithful know that "goodness and steadfast love" will follow them all the days of their lives (Ps. 23:6). The kind of spontaneous generosity with which He responds to the people of His covenant (e.g., 1 K. 8:23; Isa. 55:3; Ps. 89:29, 50; 106:45) is a harbinger of the grace that appeared bringing salvation to all people in Christ (Tit. 2:11).

In summary, the deep meaning Paul conveys with the word "grace" is hardly suggested by the Hebrew word *ḥēn*, which the LXX translated as *cháris*, "grace." The OT *ḥeseḏ* — translated with *éleos* by the LXX — comes closer to Paul's "grace." It is not surprising that Paul never quotes from the OT in order to establish his use of the word "grace." Reading the OT in the light of the NT, however, we do not look merely to the word "grace" to discover the OT presentation of the reality of God's grace. All that God does in electing, saving, leading, forgiving, and preserving Israel is a revelation of His grace, whether the word "grace" is used or not.

III. Grace in the Letters of Paul.–The word "grace" was adopted by Paul to declare the ways of God with sinful people. He used it to point to the unique and unmerited acts of God to save sinners through Jesus Christ. Paul was not the only NT writer to use "grace" to indicate that salvation was wholly God's work. And Paul sometimes used the word in its older, weaker sense. But it is nonetheless true that in Paul's letters, as nowhere else, "grace" points to the several dimensions of God's loving act to bring salvation freely to those who cannot merit it.

The sheer number of times Paul uses the word suggests that it is integral to his theology of salvation. He uses it twice as often as all other NT writers. Only Luke, among the Synoptists, uses it at all. 1 John and 3 John do not use it, Jude and Revelation hardly ever. It occurs 51 times in books other than the Pauline letters, 27 of which are in Acts and 1 Peter. We find it 101 times in Paul.

A. Grace as God's Grace. Grace is uniquely God's to give; this is the special Pauline message. In all that he writes about the foundation and creation of the Christian life, he stresses one thing above all: that what comes to needy man comes as a gift from God. That it comes freely, as a result of God's decision and God's actions, is what is meant when Paul says it is of grace.

Paul does not distinguish precisely between the "grace of God" and the "grace of our Lord Jesus Christ." He almost always greets his readers with a variation of "Grace to you and peace from God our Father and the Lord Jesus Christ" (Rom. 1:7). Paul speaks of the "grace of our God and the Lord Jesus Christ" (2 Thess. 1:12; cf. 1 Cor. 1:3), and again of the "grace of God and the free gift in the grace of that one man Jesus Christ . . ." (Rom. 5:15). He refers grace to Jesus Christ rather frequently in his closing benedictions. It is found in the triune blessing of 2 Cor. 13:14: "The grace of the Lord Jesus Christ and the love of God and the fellowship of the Holy Spirit be with you all" (cf. also Rom. 16:20; 1 Cor. 16:23; Gal. 6:18; Phil. 4:23; 1 Thess. 5:23; 2 Thess. 3:18). Grace is also ascribed to God in His gifts to Paul (1 Cor. 15:10; Eph. 3:7) and to others (2 Cor. 6:1; 8:1; 9:14).

Grace is ascribed to both because God's decision to save people was effected in and through the incarnate Son of God, the man Christ Jesus. It was Christ, "the image of the invisible God" (Col. 1:15), through whom God reconciled the world to Himself and made believing sinners alive to God. And this fact, which is epitomized in the statement "by grace you have been saved" (Eph. 2:5), makes it reasonable to ascribe grace to both God the Father and Jesus Christ the Savior.

B. Freedom of Grace. The word "grace" conveys the truth that God is free in giving salvation to sinners through Christ. To say that grace is free is a tautology, since grace by definition indicates freedom. It indicates God's freedom. God is free in giving salvation because He is not obligated, nor constrained by some inner necessity or the moral merits of people who have earned salvation. Neither an inner necessity nor an external obligation accounts for what God has done for sinners. Only grace accounts for it; that is, only His free, loving will accounts for it. This is what is meant by the freedom of grace. Strictly speaking, no entity is given the label "grace"; therefore, grace is not a gift. Salvation is a gift; and Paul indicates its givenness by the word "grace."

Paul uses the word "grace" as shorthand for the entire event of Jesus Christ and His ministry. When he says, in Tit. 2:11, that the "grace of God has appeared for the salvation of all men," it can be understood as meaning that Christ has appeared, or that God's decision to save people freely has been enacted in Christ's appearance. When he says that we are saved by grace (Eph. 2:5), it can be taken to mean that we are saved by God's action in Christ, freely and divinely. In short, grace is not an *entity* which God and Christ dispense. Nor is it a moral *property* of the divine nature. It is a word that epitomizes the *freeness* of God's saving act on our behalf.

C. Grace in Justification. The act of justification demonstrates the freedom of grace. For it is in justifying sinners, rather than morally meritorious saints, that God's freedom to be gracious becomes abundantly apparent. Both Jews and Gentiles, none of whom could claim a merited favor with God as a right, are in fact justified through the free exercise of His grace (Rom. 3:23). Justification is clearly an act of God. And since it cannot be claimed as a right, it must be received as a gift (Gal. 2:17-21). Its givenness is what makes it an act of grace. Not even faith counts as a reason or basis for justification; we are not justified because we have faith, but are justified by grace *through* faith. The fact that it is by grace excludes the possibility of boasting or self-glory; the only proper boasting (1 Cor. 1:29, 31) or glorying (Gal. 6:14) is in the Lord and His cross.

D. Grace in Salvation. In Ephesians the great gift is called "salvation," which is a global term for all that God does for mankind in Christ (Eph. 2:1-10). Here Paul (we will assume he is the author) repeats with resounding clarity that salvation is by grace alone (Eph. 2:5, 8). "Salvation" is all that God gives to a person in Christ — the renewal of his life, rebirth from death to life, justification and sanctification, forgiveness, adoption, acceptance, glorification, all that can be swept into the meaning of being a new creature in Christ — and it is all a gift, and is therefore by grace.

E. Grace and Righteousness. The proclamation that people are justified by grace aroused the religious wrath

of Judaism. To declare that God justified sinners seemed to make God a party to unrighteousness. For only just people may rightly be declared just; and just people are those who fulfil the law. Paul did not respond to this moral appeal to justice by setting NT grace in opposition to OT justice. Rather, he declared that God demonstrated His justice precisely in graciously declaring sinners just in Christ Jesus. "But now the righteousness of God has been manifested apart from the law..." (Rom. 3:21). Grace is a manifestation of evangelical righteousness or justice; in the act of grace God proves that He is indeed righteous (Rom. 3:26). Hence, the biblical ideal of the justice of God must be interpreted in the light of the grace of God; God's justice was satisfied in the judgment of the cross, but in His grace He freely apportions to sinners the liberating effect of that judgment.

F. Grace and Faith. The relationship between mankind's faith and God's grace has been the subject of long theological debate. The issue focuses on whether grace is given to mankind because of his faith or whether mankind's faith is the effect of God's grace. Whatever the disagreements in the Church's theology, Paul gave no sign that he felt a tension between faith and grace. We are saved by grace through faith (Eph. 2:8). We are justified by faith so that the promise will rest on grace alone (Rom. 4:16). Paul does not suggest that human faith is a cause or ground of God's grace. He says, rather, that faith is mankind's manner of receiving God's gift of grace. Indeed, it is in faith that a person is conscious that the gift is totally free (Rom 3:24f.). Therefore it is most unlikely that faith could be construed as a Christian means of meriting grace. Faith and grace together form an antithesis to claims of merit. Faith excludes the claim of merit (Rom. 3:21-31) for the same reason that grace excludes it (Rom. 6:14; Gal. 2:21; 5:4).

In Galatians, Paul counters the Judaistic contention that mankind gains favor with God by moral and religious achievement with the declaration that mankind has status with God only through faith. His argument that justification is only through faith excludes all kinds of merit as the basis for mankind's status with God, including any merit that might be claimed for faith itself as an ersatz achievement. In other words, justification by faith eliminates merit of any sort, including the merit of believing; faith is precisely mankind's way of accepting salvation as a free and unearned gift of God, that is, as grace. To fall from the way of faith is to fall from the way of grace (Gal. 5:4).

G. Grace and Sin. Grace is the antithesis of sin. It denotes God's free act in Christ of overcoming sin and His free act of forgiving personal sin. The sin that Christ overcomes is not only personal sinfulness, but sin as the prevailing power of the old age. Sin manifests itself as a "law of sin and death" (Rom. 8:2) and as such reigns over human life until Christ's death and resurrection (Rom. 5:21). Since God's victory in Christ, grace has become the dominant power (Rom. 5:21). Thus, grace and sin are in conflict as the ruling forces of the two hostile kingdoms, the kingdom of darkness and the kingdom of grace. We can, in the light of this antithesis, see how grace can be a synonym for Christ and the Spirit. To be "in grace" (Rom. 5:2; cf. 1 Pet. 5:12) is the same as to be "in Christ" (Rom. 8:1; 2 Cor. 5:17) and "in the Spirit" (Rom. 8:9). Christ is the Lord of the new age, and the Spirit is the Lord at work in the Church (2 Cor. 3:17f.); and grace, as the typical way in which Christ rules, can be a synonym for Christ.

Grace is also the contradiction of sin in personal life. Some people interpreted the presence of grace as an invitation to sin; since God's free justification of sinners was not conditioned on moral merit, sin could not be a condition for rejection or condemnation. The more one sinned, in fact, the more the grace of acceptance abounded (Rom. 6:1, 15). Paul's answer is that it is grace that releases us from the dominion of sin; the law provokes people to sin and grace releases them from the necessity of sin (Rom. 5:14). To live in sin and in grace at the same time is unthinkable; it is to be loyal to two conflicting kingdoms. In grace, one is a "new creature in Christ" (2 Cor. 5:17) and is, through the Spirit, "alive because of righteousness" (Rom. 8:10).

H. Grace as Power. Grace is a renewing power as well as the free gift of pardon and acceptance. Grace present within the life of the Church is shown in the Church's overflow of generosity toward others (2 Cor. 8). In Tit. 2:11-13, Paul speaks of grace disciplining life unto sobriety, righteousness, and piety. Paul seems to be speaking of the power of grace within him when he says that what he is, he is by the grace of God; he works very hard, he says, but then is quick to credit his own achievements to "the grace of God which is with me" (1 Cor. 15:10). The promise that grace would be sufficient for him in his personal distress is probably also a promise of inner power through grace (2 Cor. 12:9).

Grace is sometimes personified. Paul speaks of grace reigning through righteousness (Rom. 5:20f.). It should be noted that he speaks of sin in the same way. Grace and sin, then, become the dominant powers of the new age and of the old age respectively. The grace-sin conflict is the same as the Spirit-flesh conflict (cf. Rom. 8:5-8). Grace and Spirit, then, stand for the dominant power of the new age. To live by grace, by the Spirit, and by Jesus Christ, come to one and the same thing; but when grace is mentioned, Paul probably wants to stress the surprising generosity in which the gift of power is given.

In this connection it may be mentioned that the Spirit gives grace-gifts (*charísmata*), which are, in effect, grace-powers. The one Spirit gives differing grace-gifts to individuals (1 Cor. 7:7; 1 Cor. 12). In Rom. 12:6, Paul speaks of gifts differing "according to the grace given us." But *charísmata* (grace-powers) and *pneumátika* (spirit-powers) are the same (cf. 1 Cor. 12:1; 14:1 and 1 Cor. 12:4; 1 Tim. 4:14). This suggests that Paul makes no sharp distinction between grace and the Spirit as the source of personal power in the Christian age.

I. Grace and Office. Paul saw his own apostolic office as a gift of grace. He had received "grace and apostleship" from the risen Christ to bring about the obedience of faith among the nations (Rom. 1:5). Though undeserving, he was commissioned by God Himself (Col. 3:10). His apostleship was not earned but given; it was of grace in this sense (Gal. 1:15f.; 1 Cor. 15:9). But he also spoke of the apostolic office as the result of a *chárisma*: "Are all apostles?" which is to say, "Do all have this grace-power?" (1 Cor. 12:29; cf. Rom. 12:3-8). No doubt the grace that the other apostles noted in Paul, convincing them that he was truly commissioned, was grace in the sense of power (Gal. 2:9). Others in the Church participate with him in his gift of ministry (Phil. 1:7); they are not apostles, but they share in the power of grace given to the apostles. God called him through grace (Gal. 1:15). The word "grace," then, stresses that (a) his office was not deserved but freely given, and (b) he was freely empowered to fulfil it; the strength and fruits of his efforts were attributable to God.

J. Grace Abounding. Paul exults in the abundance of grace (Rom. 5:15). Grace is multiplied to us (2 Cor. 4:15). It always exceeds our limited expectations (Eph. 2:7) as it comes in great richness (Eph. 1:7, 23). Disagreement exists as to whether Paul thinks of grace abounding only in

an intensive sense, abounding to the persons who are in grace, or whether it abounds in an extensive sense, reaching those who are outside the believing community. In certain passages, its abundance suggests that it extends to all mankind; as Adam's sin led to the condemnation of all, so Christ's righteousness led to the acquittal of all (Rom. 5:18); to this, he added, as if by comment, the fact that "where sin increased, grace abounded all the more" (Rom. 5:20; cf. Rom. 11:32). In another passage (Tit. 2:11) Paul speaks ambiguously, saying, according to one translation, "For the grace of God has appeared for the salvation of all men" (RSV). But the passage is also translatable as, "For the grace of God that brings salvation has appeared to all men," leaving the extent of salvation unspecified, though grace is universally offered. To balance passages that universalize grace, one must recall Paul's dynamic coupling of grace with faith: we are saved by grace only through faith (Eph. 2:5). We must recall also his concern lest some might receive the grace of God in vain (2 Cor. 6:1). Paul's urgent summons to faith suggests that the extensive presence of grace should be understood in the light of the necessary correlation of faith and grace.

K. Grace Irresistible. Grace is the unqualified and unconditional gift of God, given freely, wholly apart from merit. It would seem, then, that grace would be irresistible; it is of God who gives it sovereignly. Yet, Paul worries that the Galatians might make void or nullify the grace of God (Gal. 2:11). He rebukes them for having fallen away from grace (Gal. 5:4). He pleads with others not to accept the grace of God in vain (2 Cor. 6:1). Paul does not systematically reconcile the sovereignty of grace with mankind's ability to deny or frustrate grace. He stresses the imperative of faith, the urgency of accepting grace and responding to it in the totality of one's life. Yet, when he turns to God in thanks, he is willing to concede that all that he is he owes to grace. The dynamic relationship between the objective work of grace and the subjective response to it is never precisely defined. Grace, in all its divine priority, cannot be taken for granted; yet, grace, in its abundance, can be wholly trusted as adequate for even the most unworthy and unfaithful.

L. Grace and Election. Divine election, according to Paul, is a divine act of grace. It is not as though God arbitrarily, apart from grace, chooses some people to whom He will give grace. It is rather that God's choice itself is a gracious choice. The remnant of Israel was "chosen by grace" (Rom. 11:5). Israel itself was elect, not "because of works, but because of his call" (Rom. 9:11). Paul does not use the word "grace" here, but his contrast between "works" and "call" is the same as the contrast between "works" and "grace." Israel owed its special role in history to electing grace. We are all, says Paul, chosen in Christ from before the foundation of the world (Eph. 1:4). This strongly suggests that God elects people for salvation in the same decision that He elected Christ as their Savior. This means, at least, that Christ, who is the gift of grace, the revelation of grace, and the medium of grace, in a sense contains us in Himself from the very beginning. Our election, therefore, is not only *unto* the receiving of grace, but is *in* grace from the beginning. Election is God's grace-filled decision to love and save sinners.

M. Grace and Love. No clear distinction is made between grace and love. *Agápē* (love) stresses God's personal disposition toward unworthy creatures, while grace stresses His freedom from obligation in saving them. But the distinction is not clearly nor consistently made. Both love and grace come to us through Christ (Rom. 5:8; Gal. 1:6). And both are unique in that they are undeserved. Both terms, *agápē* and *cháris*, are weak secular words adapted by the Bible to express the deepest dimensions of God's relation to mankind.

N. Grace as Thanksgiving. Grace refers to the Christian response to the free gift as well as to the gift itself. To "say grace" is to give thanks to the Lord (1 Tim. 1:12). The expression *cháris tṓ Theṓ*, "grace be to God," is translated as "thanks be to God," or its equivalent, in several places (Rom. 6:17; 1 Cor. 15:57; 2 Cor. 8:16; 2 Cor. 2:14). In such places, Paul is probably using the common secular expression, though the content is quite his own.

O. "Grace" in Greetings. In secular Greek usage, *chaíre* or *chaírete*, which means "rejoice," was a common form of greeting. Paul's greetings usually contain *cháris*. He is perhaps adapting the secular usage, informing it with a radical new significance. The letters usually open with a greeting of "grace and peace" from God the Father and/or the Lord Jesus Christ. They often close with a benediction that is one or another variant of "The grace of our Lord Jesus Christ be with you" (cf. Rom. 16:20; 1 Cor. 16:23; 2 Cor. 13:4; Gal. 6:18; Phil. 4:23; etc.). That his greetings and benedictions are not personal ones is suggested by the fact that he uses the same forms in letters to churches he has not personally visited, such as Rome and Colossae. They are not mere polite formulas. Paul evidently intends his greetings and farewells to be serious invocations of the grace that came, and continues to come, from the risen Lord Jesus.

P. Acts of God in the Light of Grace. By examining Paul's use of the word "grace" we see that all God's saving acts, even where the Bible does not use the word "grace," must be interpreted as acts of grace. We can overlook the weak LXX use of the word "grace" and recognize all the saving acts of God in the OT as truly gracious acts. God's covenant with Abraham is a covenant of grace. God's liberation of Israel from Egypt is a mighty act of grace. Indeed, even God's gift of the law witnesses to His grace (Rom. 3:21). His steadfast faithfulness to His covenant, during all of Israel's apostasy, was grace. The incarnation of His Son Jesus Christ was an act of grace, as was Christ's acceptance of poverty and humiliation (2 Cor. 8:9). Indeed, all of God's saving and forgiving, His calling and commissioning, His electing and justifying, are of grace. In the light of Paul's use of the word, we may say that "grace" refers to all that God is and does on behalf of His children, particularly to His free, utterly amazing decision to adopt, justify, forgive, renew, and glorify them as His new creation in Christ.

IV. Grace in the Non-Pauline Writings. *–A. Gospels.* Luke's is the only Synoptic Gospel where *cháris* occurs; it is used here in a variety of ways. Luke employs "grace" in the weak sense of Heb. *ḥēn*, as having favor or being pleasing. Mary found favor in God's sight (Lk. 1:30). Jesus found favor in the eyes of people as He grew up (Lk. 2:40, 52). Luke characterizes Jesus' words as "gracious words" (RSV) or "words of grace" (NEB). On four occasions, *cháris* is used for "thanks" (6:32-34; 17:9). Paul would see the entire Gospel of Luke as the story of God's acts of grace; but Luke does not use the word in this sense.

John uses the word "grace" only in his prologue, but then uses it four times, and very significantly. Grace comes into the world, along with truth, in the Word's incarnation (1:14). It is from Him that we receive grace, indeed "grace upon grace" (1:16). Herein lies the crucial difference between Jesus and Moses: Jesus brought grace to mankind; Moses gave only the law (1:17). The prologue to John's Gospel, then, seems to reflect Paul's Christ-centered definition of "grace."

B. Acts. The book of Acts uses "grace" in both its

special Christian sense and in a weaker, more general, sense. *Cháris* points to the salvation that appeared in Jesus Christ (Acts 15:11). The gospel is the word of grace (14:3). Miracles accompany the preaching of grace, perhaps demonstrating its power (6:8; 14:3). Grace enables Apollos to help believers (18:28). Paul commends the elders of Ephesus to the "word of his grace that has power to build you up . . ." (20:32), and the churches commend Paul and Barnabas to the grace of God for the work they did among them (14:26). The presence of grace marked the new believing community; the fellowship of unstinted love was the fruit of grace in the midst of the new communion (4 33; 11:23; 13:43; 15:40).

But *cháris* is also used to say that someone had favor in another's eyes: the early Church found *cháris* with "all the people" (2:47). Stephen recalls that Joseph found favor with Pharaoh (7:10), and David with God (7:46). The other places speak of someone doing another person a favor (24:27; 25:3, 9).

C. Hebrews. The writer of Hebrews uses "grace" in notably varied ways, some of them leaving unclear impressions. He says that Jesus became man "so that by the grace of God he might taste death for every man" (2:9). This probably means that the saving effects of Christ's death for sinners were a gift of God; it could also mean that Christ went to His death in the power of God's grace. Christians draw near to the "throne of grace" (4:16); this expression means, no doubt, that the exalted God receives petitioners and hears them out of His undeserved love. The writer also speaks vaguely of the Spirit of grace (10:29). In other places, he uses "grace" as meaning "thanks" (12:28, RSV), as a general reference to the help of God (12:15; 13:9), and in the benediction, "Grace be with all of you" (13:25).

D. Peter. In his first epistle Peter uses "grace" in association with the Christian life and ministry. He speaks of the "grace of life" (3:7) and outlines the kind of life that bespeaks "grace" or (as in RSV) God's "approval" (2:19f.). Grace is a "gift" that ought to be used for others (4:10). His readers are urged to "stand fast" in the "true grace of God" (5:12). Peter refers usually to the "grace of God" with reference to God's actions in Christ (1:10, 13; 5:10). Once he quotes Prov. 3:34: "God . . . gives grace to the humble" (5:5).

2 Peter uses the word "grace" in only one place other than the greeting (1:2). Here Peter challenges believers to "grow in the grace and knowledge of our Lord and Savior Jesus Christ" (3:18), probably having the sense of maturing in the kind of character Jesus Christ empowers one to have.

E. James. The epistle of "faith that works" uses the term "grace" only twice, both times to encourage submission to God's will. "He gives more grace," James says, somewhat vaguely, and then repeats (as 2 Peter does) the proverb: "God opposes the proud, but gives grace to the humble" (4:6).

F. Jude. Jude speaks of grace once, and there condemns people for perverting "the grace of our God into licentiousness" (v. 4). He is probably referring to people who supposed that since grace is freely given, it gives license to do as one pleases. (Cf. Paul's outrage against this attitude, Rom. 6:1.)

G. Revelation. "Grace" occurs in the Apocalypse only in the greeting and in the farewell. The same is true of 2 John. 1 and 3 John do not use the word.

V. Conclusion.–We have seen that the apostle Paul used a rather colorless Greek word, *cháris*, to signify the deepest truths about God's free and undeserved act of mercy to mankind. In secular Greek and in the LXX, *cháris* meant little more than to be approved of by a superior, to be found attractive or favorable. But in Paul's letters it became a word that vibrated with the amazing revelation that God's salvation came to sinful mankind freely, generously, and undeservedly. Used in many and varied contexts, and given several different nuances, the word "grace" always pointed to the reality of God's saving initiative. Paul did not use the word in this enormously full sense in every instance. And it must be recalled that not every NT writer used the word "grace" in the large Pauline sense. But in its vocabulary the Christian Church takes its cue from Paul and allows the word "grace" to speak to it of the broad range of God's sovereign gift of salvation. Taking the word from the pages of Paul's letters, the reader can use it as shorthand to describe the motive and manner of the whole program of redemption, from the beginning to the end, even where the word itself had not yet been put into Christian service. In this way, too, we confess that all that we have received and hope to receive, we receive not as a reward for services rendered, but as a gift, whose source is the God who became a servant to bring us salvation — which is to say, with Paul, that we are saved by grace.

GRACE AND UNION [Heb. *nō'am*–'pleasantness, graciousness,' *ḥōḇ'lîm*–'cords, ropes'] (Zec. 11:7, 10, 14); AV BEAUTY AND BANDS; NEB FAVOUR AND UNION. The names given to two symbolical staffs. (As R. C. Dentan [*IB*, VI, 1104] points out, an Ugaritic text [*UT* 68:11-19] offers an interesting, if remote, parallel. Here Baal is given two named clubs [Ugar. *ṣmd*] with which to vanquish his enemies.) Heb. *nō'am* is characteristic of God (cf. "beauty" in Ps. 27:4; "favor" in Ps. 90:17), and here signifies Yahweh's Covenant of Grace with His people. Heb. *ḥōḇ'lîm* may signify "union," i.e., the binding together of people (cf. 1 S. 10:5, 10, where *ḥeḇel* means "band" or "group"; cf. also Ugar. *ḥbl*, "flock of birds," "band of personages"); such union is "the intended outcome of gracious leadership" (J. Baldwin, *Haggai, Zechariah, Malachi* [*Tyndale OT Comms.*, 1972], p. 180). Thus the second staff represents the brotherhood of Judah and Israel (cf. Ezk. 37:16-23, where two sticks are joined to symbolize this unity). The breaking of the two staffs, then, symbolizes the breaking of Yahweh's covenant and of the union between Judah and Israel. G. A. L.

GRACIOUS [Heb. *ḥānan*, *ḥannûn*, *ḥēn* (Ruth 2:13; Prov. 11:16; 22:11), *ṭôḇ* (Zec. 1:13), *nā'îm* (Ps. 135:3; 147:1); Gk. *eudokía* (Mt. 11:26; Lk. 10:21), *eúphēmos* (Phil. 4:8), *cháris* (Lk. 4:22; 2 Cor. 8:6f., 19; Col. 4:6)]; AV also SHOW, HAVE MERCY, MERCIFUL, FIND FAVOUR (Ruth 2:13), GOOD (Zec. 1:13; Mt. 11:26; Lk. 10:21), GRACE (Prov. 22:11; 2 Cor. 8:6f., 19; Col. 4:6), "of good report" (Phil. 4:8), "pleasant" (Ps. 135:3; 147:1); NEB also SHOW FAVOUR, "ask as a favour" (Ruth 2:13), "look with favour" (2 K. 13:23), "speak in favour" (Job 33:24), BENEFICENT (2 Cor. 8:19), GENEROUS (2 Cor. 8:7), etc. On the basis of one Hebrew MS, the LXX, and the Pesh., the RSV adds two lines to Ps. 145:13; "gracious" here translates Heb. *ḥāsîḏ* (the AV follows the MT; the NEB adds the lines to v. 14, and translates "unchanging"). **GRACIOUSLY** [Heb. *ḥānan* ("graciously

given," Gen. 33:5; "dealt graciously," Gen. 33:11; "grant graciously," Jgs. 21:22; "graciously teach," Ps. 119:29; "speak graciously," Prov. 26:25), *nāśā' 'eṯ-rō'š* ("graciously freed," 2 K. 25:27); Gk. *kreíttōn* (He. 12:24)]; AV also "be favourable" (Jgs. 21:22), "grant graciously" (Ps. 119:29), "speak fair" (Prov. 26:25), "lift up the head" (2 K. 25:27), "better things" (He. 12:24); NEB also "be gracious" (Gen. 33:11; Prov. 26:25), "grant grace" (Ps. 119:29), "let us keep with approval" (Jgs. 21:22), "show favour" (2 K. 25:27), "better things" (He. 12:24).

Graciousness is a quality frequently attributed to God, particularly in the sense of a superior showing favor to the undeserving (for examples of this on a human level, cf. Ruth 2:13; 2 K. 25:27). One of the few recurring confessions about Yahweh affirms, "Thou, O Lord, art a God merciful and gracious, slow to anger and abounding in steadfast love and faithfulness" (Ex. 34:6; Neh. 9:17; Ps. 86:15; 103:8; 145:8; Joel 2:13; Jonah 4:2). God manifested His grace in redeeming Israel from Egypt (Ps. 111:4), and continued to manifest it during the kingdom by delivering Israel from her enemies (2 K. 13:23). He continually showed His graciousness by being faithful to the covenant (Ps. 111:5). Therefore, many petitions were made to Him "to be merciful" (e.g., Ps. 4:1 [MT 2]; 9:13 [MT 14]). When the psalmists were weak, lonely, afflicted, distressed, or when they had sinned against God, they sought His favor (Ps. 6:2 [MT 3]; 25:16; 31:9 [MT 10]; 41:4 [MT 5]). God extended His grace in meeting their needs and in forgiving their sins. God's bearing to mankind is one of grace and often He waits for the time when mankind will seek His favor so that He can demonstrate His grace (Isa. 30:18f.). Inspired by this God, the prophets call the people to repentance and base the reason for seeking God on the fact that He is gracious (Joel 2:13f.).

Graciousness may also be a human quality, especially in the sense of a kind, gentle personality. Prov. 11:16 says, "a gracious woman gets honor." To become gracious one needs to think on that which is gracious (Phil. 4:8). Gracious speech which finds its source in a pure heart is also a very desirable quality (Prov. 22:11; Col. 4:6). Luke records that the people marveled at the gracious speech of Jesus (Lk. 4:22). Gracious speech in itself is not sufficient, however; according to Prov. 26:25, the gracious speech of an enemy is never to be believed. In 2 Cor. 8:1-7, 19 Paul describes the work of sharing gifts for the relief of the saints, even out of poverty, as "this gracious work."

GRAECIA grē'shə. *See* GREECE.

GRAFT [Gk. *enkentrízō*] (Rom. 11:17-24); AV GRAFF. The word occurs six times in Rom. 11. Paul assumed that those living about Rome were familiar with the process of grafting olive trees, for olive culture had been adopted by the Greeks and Romans in Paul's time. It is often pointed out that Paul's figure is not an accurate picture of how this grafting is actually done. Cultivated branches are grafted onto wild trees, not wild branches onto cultivated trees. The wild olive trees are cut back, slits made on the freshly sawed branch ends, and two or three grafts from a cultivated olive are inserted in such a way that the bark of the scion and of the branch coincide. The exposed ends are smeared with mud made from clay, and then bound with cloth or date straw, which is held by thongs made from the bark of young mulberry branches. Good fruit is thus obtained. J. Murray (*Epistle to the Romans* [*NICNT*, 1973 repr.], *loc. cit.*) and F. F. Bruce (comm. on Romans [*Tyndale NT Comms.*, 1963], pp. 217f.), however, point out that the grafting of a wild olive branch onto a cultivated olive tree was practiced occasionally (cf. Columella *De re rustica* v. 9; W. Ramsay, *Expos.*, 6th ser., 9 [1905], 16-34, 152-160).

Although wild olives cannot be made cultivated olives by ingrafting, as Paul implies (v. 24), the meaning of his figure is clear. As a wild olive branch thus grafted would thrive, so Gentiles flourish spiritually when grafted onto the rich heritage of Israel. Paul warns the Gentiles, however, that as God did not spare the natural branches (the Jews), but for unbelief broke them off so that the Gentiles might be grafted in, so also He could break them off; and if God has grafted them, wild branches, onto the cultivated tree, how much more will He graft the natural branches back onto their own tree. J. A. PATCH

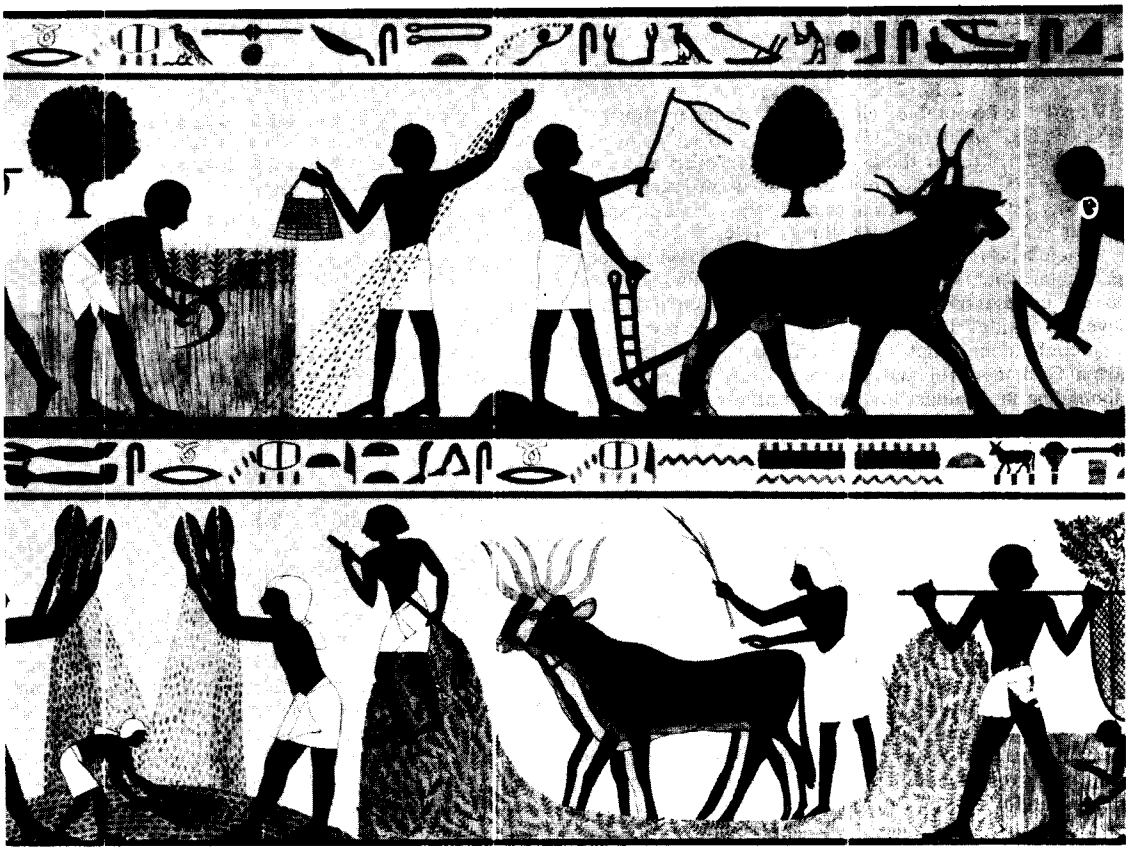
GRAIN. A number of Hebrew words are used to describe the edible grains of certain cultivated crops. The AV employed the old English generic term "corn" to translate the various words, but the current association of corn with maize makes this undesirable.

The Heb. *bar*, *dāgān* (Ugar. *dgn*), and *šeḇer* were all used to describe types of grain, the Gk. counterparts being *kókkos* and *sítos*. Other terms include Heb. *gereś*, "crushed grain" (Lev. 2:14, 16), *karmel*, "fresh ears" (Lev. 2:14; 23:14; 2 K. 4:42), *ʿᵃrēmâ*, "heap of grain" (Ruth 3:7; Neh. 13:15), *mᵉlîlâ*, "ear" (of grain) (Dt. 23:25 [MT 26]), *qālî*, "parched grain" (Lev. 23:14; 1 S. 17:17; etc.), *qāmâ*, Gk. *spórima*, "standing grain" (Ex. 22:6 [MT 5]; Dt. 16:9; "grainfield," Mt. 12:1; etc.), *rîṗôṯ*, "grain" (2 S. 17:19; Prov. 27:22); and *šibbōleṯ*, Gk. *stáchys*, "ear of grain" (Ruth 2:2; Job 24:24; "head of grain," Mt. 12:1; etc.). The AV rendered the *bālîl* of Job 24:6 (RSV "fodder") as "corn."

The chief biblical grains were wheat, millet (Ezk. 4:9), barley, and spelt (*Triticum sativum* L.). Much of it was grown in the fertile Galilee valleys, the Shephelah and the Philistine plain, as well as on the plateau of Transjordan. Stalks of grain appeared early in the decorative motifs of Near Eastern art, occurring on cylinder seals and bas-reliefs from various sites and periods. The necessity for good crops stimulated fertility-cult worship, and one of the best-known grain deities was DAGON. His worship was well established in Mesopotamia during the Amorite period, and also flourished at Râs Shamrah (Ugarit).

Excavations at certain biblical sites in Palestine have disclosed the presence of storage jars containing amounts of carbonized grain. At Megiddo, a large grain-storage

Grain storage pits at Tanis (W. S. LaSor)



Workers (from top right to bottom left) break the ground with plow and hoe, scatter the seed, reap the grain, have cattle tread it out on a circular threshing floor, and separate grain from chaff. Reconstruction of Egyptian wall paintings (Royal Ontario Museum, Toronto)

pit with a pair of winding stairs was uncovered at level III (*ca.* 780-650 B.C.). The cultivation of grain was mentioned on the Gezer Calendar, a late tenth-century-B.C. limestone plaque that listed certain agricultural pursuits. The Feast of Weeks (Pentecost) occurred at the completion of the wheat harvest (Lev. 23:15f.; Dt. 16:9f.), and was a time of celebration.

Grain cultivation supplied imagery for certain parables of Jesus, such as the sower (Mt. 13:3-23 par. Mk. 4:3-20), the wheat and the weeds (Mt. 13:24-30), and the farmer and his barns (Lk. 12:16-21). The analogy of sown seed was also used by Paul in connection with the resurrection body (1 Cor. 15:35-44).

GRANARY. *See* STOREHOUSES.

GRANDCHILDREN; GRANDSON; GRANDDAUGHTER [Heb. *bēn*] (Gen. 31:55 [MT 32:1]; 2 Ch. 22:9); AV, NEB, SON; [*ben bᵉnô*] (Gen. 11:31; Jgs. 8:22); AV [HIS] SON'S SON; [*bᵉnê bānîm*] (Jgs. 12:14; 1 Ch. 8:40; Prov. 17:6; Jer. 27:7); AV NEPHEWS, SON'S SONS, CHILDREN'S CHILDREN; [*baṯ*] (2 K. 8:26; 2 Ch. 22:2); AV DAUGHTER; [Gk. *ékgonos*–'descendant'] (1 Tim. 5:4); AV NEPHEWS. Grandchildren — especially grandsons — were regarded as a great blessing (Ruth 4:13-15; Prov. 17:6; cf. W. McKane, *Proverbs* [*OTL*, 1975], p. 503). Children were taught a sense of duty toward their own family (1 Tim. 5:4).

See also SEED.

GRAPE [Heb. *ʿēnāḇ*, *bᵉʾušîm* (Isa. 5:2, 4), *bēser* (Job 15:33), *bōser* (Isa. 18:5; Jer. 31:29f.; Ezk. 18:2), *pereṭ* ("fallen grape," Lev. 19:10), *tîrôš* (Mic. 6:15), *ʿōlēlôṯ* ("gleaning of the grapes," Jgs. 8:2); Gk. *staphylḗ* (Mt. 7:16; Lk. 6:44; Rev. 14:18)]; AV also "sweet wine" (Mic. 6:15); NEB also BERRY (Isa. 18:5), "gleanings" (Jgs. 8:2), CLUSTERS (Rev. 14:18).

"Wild grapes" seem to be intended by Heb. *bᵉʾušîm*; "sour" or unripe grapes are Heb. *bōser*; "unripe grapes" are also called *bēser* (Job 15:33). Partly formed grape clusters may be intended by Heb. *nisṣâ*, "blossom, flower," in Gen. 40:10; Isa. 18:5. A "cluster" of ripe grapes is called *ʾeškōl* (e.g., Gen. 40:10; Cant. 7:7f.; Mic. 7:1), and Gk.

Workers harvest grapes and tread them in a stone vat to make wine, which is then bottled and recorded. Reconstruction of a wall painting in the tomb of Nakht, Thebes (15th cent. B.C.) (Royal Ontario Museum, Toronto)

bótrys (Rev. 14:18); *see* ESHCOL. The "seeds" of grapes are Heb. *ḥarṣannîm*, the "skins," *zāg* in Nu. 6:4 (AV "kernels" and "husk"; NEB "shoot" and "berry").

In 2 Esdras are found Lat. *botrus* (9:21) and *racemus* (16:30) for "cluster," *acinium* (9:21) and *uva* (16:26) for "grape."

See also VINE. R. K. H.

GRAPE-GATHERER [part. of Heb. *bāṣar*–'gather grapes'] (Jer. 6:9; 49:9; Ob. 5); NEB VINTAGER. Grapes were harvested in August and September to be eaten as fresh fruit, dried, boiled to a thick syrup, or made into wine. Vintagers gathered the grapes and pressed them in the sun with their bare feet. Jeremiah is to search through Israel for a righteous man just as a grape-gatherer looks for grapes (6:9).

GRAPES, WILD. *See* GRAPE; VINE.

GRASP [Heb. *kap*–'palm'] (Ps. 71:4; Jer. 15:21); AV HAND; NEB CLUTCHES, omits in Jer. 15:21; [*qārā'*–'encounter, meet'] (Prov. 27:16); AV BEWRAY; NEB "pick up"; [*lāpaṭ*] (Jgs. 16:29); AV "take hold"; NEB "put arms round"; [*ḥāzaq*] (Isa. 45:1); AV HOLD; NEB TAKE; [*tāpaś*] (Ezk. 29:7); AV "take hold"; [Gk. *ginṓskō*–'know, understand'] (Lk. 18:34); AV KNOW; [*harpagmós*] ("a thing to be grasped," Phil. 2:6); AV ROBBERY; NEB "snatch at." By derivation the term may denote either an act of seizing or the result of the action. In Lk. 18:34 the reference is to grasping with the intellect, or comprehending.

Greek *harpagmós* occurs rarely in secular Greek, not at all in the LXX, and only once in the NT. The term has been interpreted in many different ways. The AV renders it "robbery"; the meaning here is that Christ, "being in the form of God," in fact always possessed equality with God and would not have needed to seize it. The RSV renders it "a thing to be grasped," perhaps referring to a prize, booty, or windfall (cf. Bauer, rev., pp. 108f.). W. Foerster suggests a third meaning for the phrase *harpágmon hygḗsato*: "to take up an attitude to something as one does to what presents itself as a prey to be grasped, a chance discovery, or a gift of fate, i.e., appropriating and using it, treating it as something desired and won" (*TDNT*, I, 473). The sense of Phil. 2:6b would then be that "Jesus did not regard equality with God as a gain to be utilised" (*op. cit.*, p. 474; but cf. *Expos.G.T.*, III, 436f.). In any case, Paul's point in this passage is that Christ was willing for our sakes to lay aside His equality with God, rather than treating it as a treasure to be held and utilized for Himself. *See also* KENOSIS.

See *TDNT*, I, *s.v.* ἁρπαγμός (Foerster). N. J. O.

GRASS [Heb. *dešeʾ*, *ḥāṣîr*, *yereq*, *ʿēśeḇ*, *ʾāḥû*, *gēz*, *ḥᵃšaš*, vb. *dāšāʾ*; Aram. *deṭeʾ*, *ʿᵃśaḇ*; Gk. *chórtos*]; AV also HERB(S), HAY, CHAFF, MEADOW, etc.; NEB also REEDS, PASTURE, GREEN PLANT, HERBAGE, HERBS, CROPS, "heat" (Isa. 5:24), GREEN, etc.

The Heb. *ʿēśeḇ* is a general term for "vegetation" and is so rendered by the RSV in Zec. 10:1. Besides "grass" (e.g., Dt. 11:15; Job 5:25; Ps. 72:16; 92:7 [MT 8]; Prov. 19:12; Am. 7:2; Mic. 5:7 [MT 6]), the RSV translates it "herb" (e.g., Dt. 32:2), "herbage" (Jer. 14:6), and "plants" (Gen. 1:11f.; 2 K. 19:26; Isa. 37:27). The Aramaic form occurs in Dnl. 4:15, 25, 32f. (MT 12, 22, 29f.); 5:21. Another general term is *ḥāṣîr* (e.g., 1 K. 18:5; 2 K. 19:26; Job 40:15), rendered "hay" in Prov. 27:25, AV.

The Heb. *dešeʾ* is rendered "vegetation" by the RSV in Gen. 1:11f., "tender grass" in Dt. 32:2; 2 K. 19:26; Isa. 37:27, and "grass" in Job 6:5; 38:27; Isa. 66:14; Jer. 14:5; the AV often has "herbs." The Aramaic form occurs in Dnl. 4:15, 23 (MT 12, 20), "tender grass." The verb form in Jer. 50:11 (Heb. *dāšâ*), a heifer "at grass," is in the NEB a heifer "after threshing."

The RSV has "reed grass" (for *ʾāḥû*) in Gen. 41:2, 18, where the NEB has "reeds" and the AV "meadow"; in Job 8:11 the RSV and the NEB have "reeds" (AV "flag"). Other terms are *yereq* (Nu. 22:4), *gēz* ("mown grass," Ps. 72:6; cf. Am. 7:1), *ḥᵃšaš* ("dry grass," Isa. 5:24; AV "chaff"; NEB "heat"; cf. 33:11).

The NT word is Gk. *chórtos* (Mt. 6:30; 14:19; Mk. 6:39; Lk. 12:28; Jn. 6:10; etc.), which is "hay" in 1 Cor. 3:12, "blade" in Mk. 4:28, and "plants" in Mt. 13:26.

Grass was not sown artificially in antiquity, and no distinction was made between the true grasses (N.O. *Gramineae*) and other herbs. The rooftop grass (Ps. 129:6; Isa. 37:27) consisted of seeds germinating in the mud roofs. They withered quickly under the hot sun. Dew or rain on grass is mentioned in Dt. 32:6; Ps. 72:6; Prov. 19:12; Mic. 5:7.

Although human beings are concerned with abundance of grass for their cattle, it is God who ultimately makes the grass grow (Dt. 11:15; cf. Job 38:27), and He can punish His people by letting the grass wither (Dt. 29:23; Jer. 12:4). Metaphorically, grass may be a symbol of

abundance (Job 5:25, parallel to "many"; Ps. 72:16; 92:7); more frequently, it symbolizes the brevity of life (Isa. 51:12, parallel to "death"). This theme runs through the Psalms (37:2; 90:5f.; 102:11 [MT 12]; 103:15f.) and is dramatized in Isa. 40:6-8 (cf. 37:27): only God is eternal; people are temporal and mortal. Isaiah's summary may have been a "catechetical source" for the NT (J. Adamson, comm. on James [*NICNT*, 1976], p. 63). James (1:10) and Peter (1 Pet. 1:24) quoted Isaiah to remind their readers that human life apart from faith does not go on forever. Our Lord combined this theme with that of the beauty of the flora to point to God's providential care (Mt. 6:30 par. Lk. 12:28).

GRASSHOPPER. *See* LOCUST.

GRATING [Heb. *miḵbār*] (Ex. 27:4; 35:16; 38:4f., 30; 39:39); AV GRATE. A "network of bronze" (Ex. 27:4; 38:4) on the altar of burnt offering in the court of the tabernacle. The grating was situated under the ledge of the altar, and extended halfway down the side. At its four corners were rings through which poles were inserted for carrying the altar.

GRATITUDE. *See* THANK.

GRAVE. *See* BURIAL III.

GRAVE; GRAVING. *See* CARVING; CRAFTS.

GRAVEL. The term occurs twice in the RSV (Prov. 20:17; NEB "grit"; Lam. 3:16) for Heb. *ḥāṣāṣ*, from the verb *ḥāṣaṣ*, "divide." These passages suggest the frequent occurrence of grit in the coarse bread. The source of the grit may have been the grindstones themselves, or perhaps smaller stones originally mixed with the grain at threshing time and ground even smaller when the flour was being made. The teeth of some Egyptian mummies are worn level with the gums due to the incidence of grit and gravel in foodstuffs, bread, and confections.

GRAVEN IMAGE. *See* IDOL.

GRAVITY. In the RSV this term occurs only in Tit. 2:7 (NEB "high principle"), where it renders Gk. *semnótēs*. In his teaching Titus is to set an example of the type of dignity and seriousness that compels the respect even of opponents (cf. v. 8).

GRAY. *See* COLOR V.D.

GREASE (Ps. 119:70, AV). *See* GROSS.

GREAT. "Great" translates a wide variety of Hebrew and Greek terms. In the OT it most often renders Heb. *gāḏôl* (also *gāḏal*–'be or become great') and *raḇ* (also *rāḇâ*–'be or become numerous, great'). Heb. *gāḏôl* can indicate both quantitative and qualitative greatness. In the quantitative sense of "much, large" (in dimensions, extent, intensity, etc.) it occurs as "great lights" (Gen. 1:16), "great darkness" (15:12), "great nation" (17:20), "great plenty" (41:29), "Great Sea" (Nu. 34:7), "great slaughter" (1 S. 4:10), etc. Expressing qualitative greatness of significance, excellence, importance, etc., it appears as "great sight" (Ex. 3:3, in reference to the burning bush), "great acts of judgment" (6:6), "great and terrible God" (Dt. 7:21), "great signs" (Josh. 24:17), "Great is the Lord" (Ps. 145:3), etc. Heb. *gāḏal* and its derivatives *gāḏôl* and *gōḏel* are the terms most frequently used to express the greatness of God, of His name, and of His actions and expressions of Himself on behalf of Israel. Thus, God is great (2 S. 7:22; 1 Ch. 16:25), He accomplishes "great and terrible things" (Dt. 10:21), His name is great (Josh. 7:9; 1 S. 12:22), His wrath is great (2 K. 22:13; 23:26), as are His power (Neh. 1:10), love (Ps. 57:10 [MT 11]; 86:13), and goodness (Neh. 9:25).

The other common OT terms, Heb. *raḇ* and *rōḇ*, mean "many, numerous, abundant," and designate mainly greatness of quantity. Thus, "the wickedness of man was great in the earth" (Gen. 6:5), "great household" (26:14), "his mercy is great" (2 S. 24:14), "the number of your days is great" (Job 38:21), etc. But it is also used for "great" in other senses, e.g., "greatness of God's majesty (Ex. 15:7), "great and noble Osnappar" (Ezr. 4:10), "great God" (5:8), "great king" (5:11), "I will divide him a portion with the great" (Isa. 53:12).

One interesting Hebrew expression for "great" involves the use of *'ĕlōhîm*, "gods." In 1 S. 14:15 the battle caused "a very great panic" (Heb. *ḥerdaṯ 'ĕlōhîm*, lit. "trembling of the gods," i.e., it was enough to make the gods tremble). And in Jonah 3:3, Nineveh was an "exceedingly great city" (Heb. *'îr gᵉḏôlâ lē'lōhîm*, lit. "a large city for the gods," i.e., the city would seem large even to the gods). The NEB follows many modern commentators (e.g., E. A. Speiser [*AB*, 1964], pp. 3, 5; B. Vawter, *On Genesis* [1977], pp. 40f.) in understanding the *rû(a)ḥ 'ĕlōhîm* of Gen. 1:2 as a great or "mighty wind" (but cf. E. J. Young, *Studies in Genesis One* [1976], pp. 36-42); cf. the similar understanding in Gen. 23:6 ("mighty prince," Heb. *nᵉśî' 'ĕlōhîm*); Ps. 68:15 (MT 16) ("mighty mountain," Heb. *har-'ĕlōhîm*); and the same use of *'el*, "god," in Ps. 80:10 (MT 11) ("mighty cedars," Heb. *'arzê-'ēl*); for other possible examples see BDB, pp. 42f.

In the OT "greatly" is sometimes expressed by means of pleonasms. Thus, e.g., God says "I will greatly multiply" (Heb. *harbâ 'arbeh*) Hagar's descendants (Gen. 16:10); Laban tells Jacob "you longed greatly [Heb. *niḵsōp niḵsaptâ*] for your father's house" (Gen. 31:30); David rejoiced greatly" (Heb. *śāmaḥ śimḥâ gᵉḏôlâ*, lit. "he rejoiced a great joy") when the people gave their freewill offerings (1 Ch. 29:9); the father of the righteous "will greatly rejoice" (*Q gîl yāgûl, K gôl yāgûl*; Prov. 23:24) as did Isaiah (*śôś 'āśîś*, 61:10).

The much more common way of expressing "greatly" is the use of the adverb *mᵉ'ōḏ*, "very." Thus the phrase "he [God] is greatly to be praised" is Heb. *mᵉhullāl mᵉ'ōḏ* (1 Ch. 16:25 par. Ps. 96:4; Ps. 48:1 [MT 2]; 145:3). Heb. *mᵉ'ōḏ* also modifies bless (Gen. 24:35), fear (Gen. 32:7 [MT 8]; Josh. 9:24; 10:2; etc.), rejoice (1 S. 11:15; 1 K. 5:7 [MT 21]; Zech. 9:9), etc.

The most common NT words translated as "great" are Gk. *mégas* (comparative, *meízōn*, e.g., Mt. 18:1; 1 Cor. 13:13; superlative *mégistos*, 2 Pet. 1:4, "very great") and *polýs* (comparative, *pleíon*, Mt. 12:41f. par. Lk. 11:31f.; Acts 15:28), which the LXX uses to translate Heb. *gāḏôl* and *raḇ* respectively. Gk. *mégas*, like its Hebrew counterpart, can express greatness in both a quantitative and a qualitative sense. Quantitatively, it can indicate greatness of extension in space ("great stone," Mt. 27:60; "great mountain," Rev. 8:8), of number ("great herd of swine," Mk. 5:11), of age ("small and great," Acts 26:22; Rev. 11:18), of magnitude ("great reward," He. 10:35), of intensity ("great joy," Mt. 2:10; "great power," Acts 4:33; "great clamor," 23:9; "great lamentation," 8:2; "great storm," Mk. 4:37), etc. Qualitatively, it can express greatness of significance, excellence, dignity, and

importance: "great signs and wonders" (Mt. 24:24; Acts 6:8), "greater [*meízō*] things than these" (Jn. 1:50), "great God and Savior" (Tit. 2:13, said of Christ [see *TDNT*, IV, 538]), "great prophet" (Lk. 7:16), "great mystery" (Eph. 5:32 [AV]; 1 Tim. 3:16), "great and first commandment" (Mt. 22:38). The Day of Judgment is called "the great day" (Gk. *hē hēméra hē megálē*, Acts 2:20; Jude 6; Rev. 6:17; 16:14; cf. Heb. *yôm-yhwh haggāḏôl*, "the great day of the Lord," Zeph. 1:14; Mal. 4:5 [MT 3:23]). Gk. *polýs*, like Heb. *raḇ*, has primarily a quantitative, numerical sense, and can mean "many, numerous, much, extensive": "great crowds" (Mt. 4:25; 8:1), "great possessions" (Mt. 19:22), "great learning" (Acts 26:24), "great opposition" (1 Thess. 2:2), "great glory" (Mt. 24:30), "great love" (Eph. 2:4).

"Greatly" renders Gk. *lían*, "much" (Mt. 27:14; 2 Jn. 4; 3 Jn. 3), *méga* (Rev. 17:6), *megálōs*, "greatly" (Phil. 4:10), *polýs*, "much" (Acts 18:27), *sphódra*, "very much" (e.g., Mt. 17:23), etc. John's Jewish background may be reflected in his use of pleonasm to express "greatly" in Jn. 3:29. Here Jesus states that the friend of the bridegroom "rejoices greatly" (Gk. *chará chaírei*; cf. L. Morris, comm. on John [*NICNT*, 1971], p. 241 n. 109). The only NT occurrence of "greatness" (*mégethos*, Eph. 1:19) refers to the "immeasurable greatness of [God's] power" in believers.

On Acts 8:10, "'This man is that power of God which is called Great,'" see *TDNT*, IV, 540f. *See also* SIMON MAGUS.

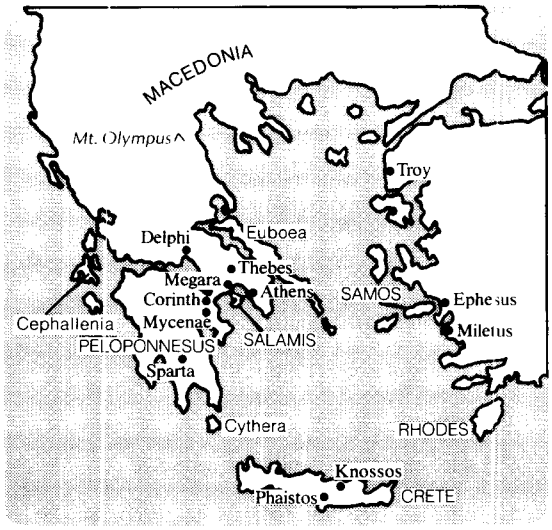
I. Name.—In earliest times no single name was universally and exclusively used either of the people or of the land of Greece. In Homer, three appellations — *Achaioi*, *Danaoi*, and *Argeioi* — were with no apparent discrimination applied to all the Greeks. The Hebrews called them Ionians (see IV.C below; *see also* JAVAN). The name *Hellēnes*, which in historical times came into general use as a collective appellation, was applied in Homer to a small tribe in Thessaly. But the corresponding name *Hellas* was not primarily a geographical term but designated wherever the Hellenes had their own states or cities. In the 4th cent. B.C. many felt, as did Isocrates, that even "Hellene" stood not so much for a distinction in race as for preeminence of culture, in contrast to the despised "barbarian." Hence there was much dispute over whether certain peoples, e.g., the Epirotes, Macedonians, and even the Thessalians, should be considered Hellenes and included in Hellas. Aristotle said that the word *Graikoi* (Lat. *Graeci*) was an older name for those who were later called Hellenes. The meaning and truth of this statement are alike in doubt, but he probably referred only to the tribe living near Dodona in Epirus. At any rate, *Graeci* and *Graecia* practically owed their introduction to the Romans after their contact with the Greeks in the war with Pyrrhus; consequently the terms included Epirus and Macedonia (which "Hellenes" and "Hellas" did not).

II. Geography.—*A. Location and Area.* Hellas as the land of the Hellenes was used in a broad sense to include not only Greece proper but also the islands of the Ionian and Aegean seas; the seaboards of the Hellespont, Pontus, and Asia Minor; the flourishing colonial regions of Magna Graecia, Sicily, and Crete; and occasionally Cyprus, Cyrene, and the scattered colonies dotting the shore of the Mediterranean, almost to the Pillars of Hercules. Graecia, however, was restricted to continental Greece, which forms the southern extremity of the Balkan peninsula. While the Romans included Macedonia and Epirus, it is preferable to limit Greece to the territory lying roughly below 40° and extending almost to 36° North Latitude, and ranging between 17° and 23° East Longitude. If, as is proper, one includes the immediately adjacent islands, its greatest length, from Mt. Olympus in the north to Cythera in the south, is about 450 km. (280 mi.); its greatest breadth, from Cephallenia in the west to Euboea in the east, is about 390 km. (240 mi.). The area, however, owing to the great irregularity of its contour, is far less than one might expect, amounting to about 78,000 sq. km. (30,000 sq. mi.). With an area, therefore, considerably less than that of Portugal, Greece has a coastline longer than those of Spain and Portugal combined.

B. Mountains. The northern boundary of Greece is



formed by an irregular series of mountain chains, beginning on the west with the Acroceraunian range and ending in Mt. Olympus (2920 m. [9570 ft.]) on the east. Intersecting this line, the lofty Pindus range, forming the backbone of northern Greece, extends southward to Mt. Tymphrestus (2320 m. [7610 ft.]) in Aetolia, where spurs radiate through central Greece. The highest peaks are Mt. Corax (2490 m. [8180 ft.]) in Aetolia, Mt. Oeta (2150 m. [7060 ft.]), Parnassus (2500 m. [8200 ft.]), Helicon (1790 m. [5870 ft.]). Cithaeron (1410 m. [4630 ft.]) on the boundary between Boeotia and Attica, Mt. Geranea (1370 m. [4500 ft.]) N of the Isthmus, and, in Attica, Parnes (1410 m. [4640 ft.]), Pentelicon (1110 m. [3640 ft.]), and Hymettus (1030 m. [3370 ft.]). Along the eastern coast extends a broken range of mountains, the highest peaks of which are Ossa (1950 m. [6400 ft.]), Pelion (1620 m. [5310 ft.]), and, in Euboea, which virtually belongs to this range, Dirphys (1750 m. [5730 ft.]) and Ocha (1410 m. [4610 ft.]). Southern Greece, or the Peloponnesus, is united to central Greece only by a narrow isthmus (now cut by a canal 6 km. [4 mi.] long), with a minimum altitude of about 76 m. (250 ft.). In the northern portion, a confused mass of mountains rises to great heights: Cyllene (2380 m. [7790 ft.]), Erymanthus (2230 m. [7300 ft.]), Maenalus (1980 m. [6500 ft.]), all in Arcadia, Panachaicus (1930 m. [6320 ft.]) in Achaia, and, running southward through Laconia, the two important ranges called Taÿgetus (2410 m. [7900 ft.]) and Parnon (1960 m. [6430 ft.]). Minor ranges jut seaward in Argolis, Laconia, and Messenia.

C. Rivers and Lakes. The rainfall in Greece is not abundant and is confined largely to late autumn and winter. Whether the present rainfall differs much in amount from that of antiquity is disputed, although presumably the progressive denudation of the mountains since the 5th cent. A.D. has resulted in a corresponding loss in humidity. Even in antiquity, however, the rivers of Greece were much like the arroyos of the southwestern portion of the United States, which are in winter raging mountain torrents, and in summer dry channels. Because the sea is near all points in Greece, the rivers are short, and the scarcity of springs makes them dependent upon direct rainfall. The more considerable rivers include, in northern Greece (Thessaly), the Peneius, with its tributaries; in central Greece (Aetolia), the Achelous and the Evenus; the Spercheius, flowing between Oeta and Othrys into the Maliac Gulf; the storied, but actually insignificant, Ilyssus and Cephissus of the Attic plain; in southern Greece, the Alpheius, rising in Arcadia and flowing westward through Elis, and the Eurotas, which drains Laconia. In eastern Greece a series of basins become lakes in winter and are pestilent marshes in summer unless nature or man has afforded an outlet. The former is the case with the Peneius, which has cut a channel through the celebrated Vale of Tempe. Lake Copais in Boeotia affords an example of human activity. The prehistoric Minyae are credited with first enlarging the natural outlets and so draining the basin for a time. Similar basins occur at Lake Boebeis in Thessaly and Lake Stymphalus in Arcadia. The relatively few such basins in western Greece include Lake Pambotis in Epirus and Lake Trichonis in Aetolia. Often if no surface outlet to these basins exists, subterranean channels (called katavothrae by the Greeks) are formed in the calcareous rock, through which the waters drain and occasionally are again brought to the surface at a lower level.

D. Geology. The western half of Greece, in which the mountain ranges run generally from north to south, consists of a formation of greyish and yellowish-white compact limestone, while the eastern half — Macedonia, Thessaly, Euboea, Cyllene, and the mountains from Artemision to Cape Malea and Taygetus — together with the greater part of Attica and of the Cyclades, consists of mica-schist and crystalline-granular limestone (marble). Tertiary formations occur in narrow strips on the northern and northwestern slope of the ranges in the Peloponnesus and in the valley of the Eurotas in Boeotia and Euboea. The parallel elevations of similar or contemporary formation and the earthquakes frequent in all ages, especially in southern and central Greece and the islands of the Aegean, evince volcanic action. Perennially active volcanoes are nowhere found in Greece, but new formations due to volcanic action are most clearly seen on the island of Thera among the Cyclades, where they have occurred within the last half-century. The solfatara between Megara and Corinth, the abundant hot springs at widely scattered points in Greece, bear witness to the volcanic character of the region and the ruined temples of many ancient sites venerated for their sanctity in antiquity, like Delphi and Olympia. History records repeated instances of cities engulfed by tidal waves of appalling height.

E. Divisions. Mention has already been made of the sinuous coastline of Greece, and the land has been spoken of as consisting of three divisions. Northern Greece, to which Epirus and Thessaly belong, is marked off from central Greece by the deep indentations of the Ambracian Gulf on the west and the Maliac Gulf on the east. The Pegasaean Gulf, virtually continued by Lake Boebeis, reaches far into Thessaly and divides it from Magnesia, which lies to the east. The land of the Dolopians really belongs to northern Greece. Central Greece consists of Acarnania and Aetolia on the west and Phocis, Boeotia, and Attica (with the adjacent island of Euboea) on the east, separated by a group of lesser states — Aenis, Oetaea, Doris, Locris, and Phocis. Southern Greece is separated from central Greece by the Corinthian and Saronic gulfs, which almost meet at the Isthmus of Corinth and are now, after repeated efforts dating from the time of Julius Caesar, united by a sea-level canal. Megaris, which by its position belongs to central Greece, is here in accordance with its political affinities and predilections classed with Corinth, the keeper of the isthmus, as belonging to southern Greece. Facing the Corinthian Gulf, Achaia forms the northern division of the Peloponnesus, touching Elis, Arcadia, and Argolis, which belt the peninsula in this order from west to east. Arcadia is the only political division that does not have access to the sea; it occupies the great central plateau inter-

sected by lesser ranges of varying height. The southernmost divisions, Messenia and Laconia, are deeply indented by the Messeniac and Laconic gulfs, and Laconia is separated from the peninsula of Argolis by the Argolic Gulf, all of which head in a somewhat northwesterly direction. Of the subjacent islands, which a reasonable view must include in the boundaries of Greece, Euboea has already been mentioned; but one should add the group of great islands lying in the Ionian Sea, namely Corcyra, Leukas, Ithaca, Cephallenia, Zacynthus, and Cythera at the mouth of the Laconic Gulf, as well as Salamis and Aegina in the Saronic Gulf.

F. Climate. The climate of Greece has probably changed little from ancient times, except that it may have been more salubrious when the land was more thickly populated and better cultivated. Herodotus said that of all countries, Greece possessed the most happily tempered seasons; Hippocrates and Aristotle commended its absence of extremes of heat and cold as favorable for intelligence and energy. But because of extreme variations in the land's altitude, the climate varies greatly in different districts. In the highlands of the interior the winter is often cold and severe, the snow lying on the ground until late in the spring, while in the lowlands near the sea there is rarely any severe weather and snow is almost unknown. The following data for Athens may be taken as a basis for comparison: humidity, 41 percent; rainfall, 33.5 cm. (13.2 in.), distributed over 100 days; mean temperature, January, 9° C. (48° F.), July, 27° C. (81° F.). Greece lies open to the northern winds that during certain seasons give a bracing quality to the air not always present in places of the same latitude.

W. A. HEIDEL

III. Early Civilizations (6100-1200 B.C.).–*A. Pre-Minoan.* Ordinarily historians identify the earliest settlements with the Early Neolithic I (6100-5100 B.C.) villages in the Aegean isles. These settlements are known at Knossos (Cnossus) and elsewhere and dated by carbon-14 to *ca.* 6100 B.C. The settlers built flat-roofed houses of fired brick. They imported obsidian from the island of Melos, which indicates a seagoing trade network. Evidence for religion includes anthropomorphic figurines, which can be interpreted in terms of ancestor worship, or, more generally, a fertility cult.

By the Neolithic II period (5100-3000 B.C.) regular town planning, indicating a complex social structure, is evident. Houses consisted of clusters of rooms with pebbled courtyards.

During the Early Bronze period (3000-2000 B.C.) waves of immigrants from Asia Minor settled in the Cyclades islands and in east and central Crete. These people founded the Minoan culture.

B. Minoan. At the beginning of the second phase of the Early Bronze Age a new people appeared in the plain of Phaistos (Phaestus). Perhaps their most striking innovation was a large, circular, thatched charnel house measuring up to 13 m. (42 ft.) in diameter. Several hundred skeletons have been found in one charnel house, suggesting long use by the extended family.

The early Minoan people used copper extensively, revealing great skill in metallurgy. They cast tools, weapons, and the famous votive double axes that appear to have played a vital role in Minoan religion. They also worked gold into jewelry with great craftsmanship. Their villages and towns yield faience, steatite, and fine Egyptian stone wares.

From 2000 to 1600 B.C. Minoan civilization was at its height. Their material culture and city planning were impressive. Their trade network extended from Egypt to mainland Greece and eastward to Anatolia and Syria. Economic success seems to have required invention of a writing system, pictographic in its earliest stages. The most famous and perhaps earliest extant example of this picture writing is the Phaistos Disk, on which the text was impressed in a spiral with dies while the clay was still soft. Scribes eventually developed a cursive script. Some scholars have proposed that this native language was Semitic and that the early Minoans were therefore a Semitic people (cf. C. H. Gordon, *Forgotten Scripts* [1971]).

Knossos and Phaistos, cities about 40 km. (25 mi.) apart on Crete, were the centers of Minoan civilization. Other traces of this civilization are found on a number of the Aegean islands, most dramatically on Thera (modern Santorini), 100 km. (60 mi.) N of Crete.

Minoan civilization at Knossos and Phaistos is generally dated 1900-1700 B.C. These centers traded briskly with cities to the north and west. The elaborate palace at Knossos occupied about 1½ ha. (3¾ acres). Masterful wall paintings, weaving, numerous examples of bronze smelting, and skillful ceramics and masonry provide further evidence of their civilization.

The possible eastern origins of this civilization may be enshrined in the Europa myth. The story is set in Canaan or Phoenicia (Tyre), where Europa and her five brothers are born to Agenor and Telephassa. Zeus falls in love with the beautiful Europa and appears in her father's herd as a snow-white bull. He carries her on his back to Crete, where as an eagle he ravishes her. Europa bears Zeus three sons: Rhadamanthys, Sarpedon, and Minos, who founded and ruled respectively Phaistos, Mallia, and

Minoan octopus vase. The dark coloration on a light background and the marine motif were typical of this period (*ca.* 1450 B.C.) (National Museum, Athens; picture Rosenthal Art Slides)

Knossos. From Minos comes the name of the Minoan civilization.

Religion in the Minoan realm apparently concentrated on worship of the Great Mother, a feature it held in common with Anatolian religion. The Great Mother had many names on Crete, especially Hellotis. (She was best known on the Greek mainland as Demeter.) She appeared in Minoan art as the lady of the snakes and later as a huntress. Sometimes she was flanked by lions, at other times by doves. Her consort was a younger male deity whom she overshadowed in importance. This pairing calls to mind Cybele and Attis, Tammuz and Ishtar, Adonis and Astarte, Demeter and Hades, or even 'El and Asherah at Ugarit. Her worship evidently included a reenactment of a sacred marriage to Zeus.

The destruction of Knossos and other centers of Minoan civilization is usually attributed to earthquakes *ca.* 1700 B.C. These civilizations, however, were too vigorous to disappear; the palace at Knossos, for instance, was rebuilt and the city flourished again. The date of the true end of the Minoans is still debated. One of the most popular theories is that the violent eruption of Thera (modern Santorini) destroyed all of Crete *ca.* 1450. Yet excavations reveal that no such disaster overtook Knossos, which seems inexplicable. Another view is that mainland Greeks seized Knossos *ca.* 1400 and the city continued as a prosperous, but now Mycenaean, city-state until the Dorians invaded and demolished it *ca.* 1180. In any case, after *ca.* 1600 the rising Middle and Late Helladic (Mycenaean) peoples gradually eclipsed the Minoans. Most Minoan palaces were violently destroyed *ca.* 1400.

C. Mycenaean. It is this civilization that figures in the myths of Homer and Greek memories of the Heroic Age. The names of Mycenaean centers appear in Homer, e.g., as the birthplaces of heroes, and probably represent genuine memories of the glories of Mycenae.

The destruction of Minoan civilization or its decline and displacement allowed the development of new centers of power in the mainland cities. These centers had been occupied as early as 6200 B.C. (at Nea Nikomedia in Macedonia), but not until the Minoan power was broken did these peoples advance in power and influence. In the Middle and Late Bronze (Helladic) Ages the tide of immigration turned from the east to the north, and Greek-speaking peoples occupied the mainland. These peoples produced a vigorous art, invested prodigious energies in building grave circles for their heroes, prospered mightily in trade, and vanquished neighbors through exceptional skill in war. Their art was distinctive and highly developed. Their gold-foil death masks and gold-inlay hunting scenes on bronze daggers are rightly famous. *See* Plate 23.

The grave circles of Mycenae are very unusual. Grave Circle B, e.g., was laid out 27.5 m. (90 ft.) in diameter. It contained twenty-four graves of heroes buried with extensive weaponry and often with the gold-foil death masks mentioned above. The grave goods resemble those of Albania of the same period, leading some scholars to suggest that the Mycenaeans owed their origins to central Albania (cf. R. A. Crossland and A. Birchall, eds., *Bronze Age Migrations in the Aegean* [1974], pp. 189-197).

Mycenaean grave circle (Rosenthal Art Slides)

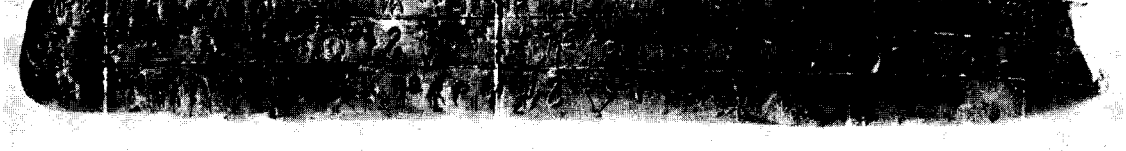
About 1450 B.C. a Greek dynasty came to power at Knossos and ruled Crete. Its scribes developed a script now called "Linear B" (cf. J. Chadwick, *Decipherment of Linear B* [1958]), to record their form of Greek for administrative and economic texts. Perhaps more importantly for the social historian, the texts reveal an extensive bureaucracy that administered every aspect of the national life.

The principle figures of Mycenaean religion have long been known from the stanzas of Homer and Hesiod, but a coherent picture of beliefs and cultic acts has not emerged. Excavations within the citadel at Mycenae, however, brought to light a temple complex built about 1250 B.C. and destroyed near the end of that century. It contained a room furnished with platforms, a storeroom harboring nineteen idols with arms raised and extended outward (in blessing?), and a collection of seventeen broken clay snakes modeled naturalistically. One tablet from Pylos mentions offerings to seven Greek deities, among them Poseidon, Hermes, and Hera. The offerings included gold cups, bowls, and male and female slaves.

At least at Pylos a large body of religious functionaries was distinguishable from the civil bureaucrats. The king was central to the religious society. Possibly the elaborate burials of Mycenae indicate that Mycenaean religion involved ancestor worship. Such beliefs were well known in classical times, e.g., in the dramas of Aeschylus.

The Mycenaeans lived side by side with other great powers of the period, particularly the Egyptians, Phoenicians, Hittites, and smaller Anatolian kingdoms. They traded extensively with these lands for goods not naturally

Part of an inventory of vessels and furniture found in 1952 at Pylos on the southwestern coast of the Peloponnesus. This palm-leaf-shaped tablet was invaluable as a conclusive check on the decipherment of Linear B (National Archaeological Museum, Athens)



available in mainland Greece or Crete, e.g., gold, rope, papyrus, and linen from Egypt, silver from Asia Minor, copper from Syria, Cyprus, and the Sinai, and tin from Cirrha near Delphi. In return Mycenae exported timber, hides, dyes, wine, and olive oil to its trading partners, which included Troy, Italy, and Sicily.

In military matters Mycenae enjoyed success. Mycenaean warriors fought from horse-drawn chariots beginning in the 16th cent. B.C. Hittite records mention the sack of Cyprus *ca.* 1225 B.C., perhaps by Arteus, king of Mycenae and father of Agamemnon. The Egyptians had to repulse Achaian invaders in 1221.

These advances far outside the Greek confines of Mycenae were not signs of health, however, but of decline. Serious warfare on the Greek mainland, disruption of trade routes, and the massive displacements of peoples during the 12th cent. B.C. document the demise of Greek Mycenaean civilization.

IV. The Great Migrations (**1200-850** B.C.).–*A. Troy.* Although Troy was already a large city in the Early Bronze Age, its greatness is usually dated *ca.* 1900-1300 B.C. (Troy VI). An earthquake destroyed this city *ca.* 1300, but its citizens rebuilt it immediately. The new city (Troy VIIA) resembled a Mycenaean stronghold, complete with giant fortification walls. It and its predecessor controlled trade between Asia and Europe and therefore accumulated considerable wealth. Yet even greater economic power could not stop the hordes that shifted west from ancient Phrygia in central Asia Minor; they attacked and destroyed not only Troy but also Tarsus and Mirsin in southern Asia Minor and even the mighty Hittite empire. It is often said that other displaced peoples from southwestern Asia Minor and the Greek islands (the sea-peoples) played a major role in this widespread destruction (cf. R. A. Crossland and A. Birchall, eds., *Bronze Age Migrations in the Aegean* [1974]). Not even the legendary Troy could escape an advancing holocaust from these migratory tribes.

B. Dorians. Archeology documents a violent end to Greek civilization about the close of the 13th cent. B.C. The citadel at Mycenae was breached and burned to the ground. The city of Tiryns was leveled and turned into a cemetery. Virtually all the settlements of central Macedonia were destroyed and not reoccupied. The great trade and communications network of Mycenaean civilization vanished with nothing to replace it.

The invaders, according to their material remains, were not a single group. They apparently lived as nomads and had no urban traditions. Their utensils were wood, as were their idols. They seem to have had no developed art, at least in an imperishable medium.

Greek traditions remember the main group as Dorians, Greek-speaking tribes whose last point of departure before attacking the Greek mainland was Doris, a small district to the north bordering on Mycenae. The tradition (Hestod fragment 7) records that their leaders were an Achaian clan. The Greek histories by Herodotus (i.56; ix.26) and others suggest that the Dorians originated in northwestern Greece (Epirus), where they learned seamanship. They brought with them Northwest Greek, Doric, and the cult of Apollo-Karneios, likely a syncretism of their original ram-god and the indigenous Apollo.

The Dorian invaders held sway in the southern Peloponnesus from this time forward. Although at first hard taskmasters over their conquered cousins, they were gradually absorbed. Their descendants formed royal houses in Greece through classical times.

C. Aeolians and Ionians. The clash of the Dorians with local populations resulted, predictably, in displacement of certain local tribes. These refugees, Aeolians from Thessaly, Phocis, Locris, and Boeotia, sailed away to Thrace, Asia Minor, and the Greek islands. Here, of course, they met resistance from the indigenous Greeks but managed over several successive waves of migration to mingle with the local peoples. Nevertheless, memories of bitter fighting between the migrants and the indigenous populations of the Peloponnesus survive in the writings of Pausanias.

The oldest Greek dialect is usually thought to be that of the Ionians. During the Late Helladic (Bronze III) Period it was spoken in Attica (cf. Homer *Il.* xiii.685). Historians usually designate Ionian as the language of the first Greek-speaking settlers. The Ionians felt the shock of the Dorian advance in Achaia and fled to Attica, where the royal house of Pylos had already taken refuge. Other Ionians settled in Samos and introduced the cult of Hera.

From the list of Athenian kings it is possible to deduce that a main body of Ionian migrants settled in Attica *ca.* 1020 B.C. According to another tradition, the Ionian migration began four generations after the Aeolian. Either way, historians ordinarily identify the Ionians with the people who introduced proto-Geometric pottery into Athens during the first quarter of the 11th cent. B.C.

The Ionians' accomplishments imprinted their names indelibly on history. They continued their migrations east and by the 10th cent. B.C. occupied twelve cities on the coast of Asia Minor, including Miletus, Priene, Ephesus, Colophon, and the islands of Chios and Samos. They adopted a common name, *iaones* (< *iawov*), which appears in the Hebrew Bible (applied to all Greeks) as *yāwān.* The Ionians in Asia considered Athens their home city and Attica their homeland. The ties between the eastern and mainland Greeks remained strong for centuries.

It is Ionia that is reflected in the *Iliad,* which was recited in the Ionian dialect. Thus this poem described and codified the received traditions of the Ionians.

V. Rise of the Greek City-States (**850-546** B.C.).–*A. Cultural and Political Revival.* The composition of the *Iliad* and the *Odyssey* in Ionia during the 9th cent. B.C. may be a barometer of the renewed vigor of the Greek city-states in this period. Greek art flourished in the Dorian cities, Crete, Corinth, and Sparta. Hesiod composed the *Works and Days, Theogony,* and *Catalogues* in Boeotia. The production of literature was encouraged by the emergence of a stable system of tiny city-states in the Greek world, none of which was the kind of threat that the Mycenaean states had been.

On the mainland and in the south the gradually emerging city-states were on the same small order, but in a somewhat more settled condition. As a result of contact with the powerful emerging Iron Age civilizations of the Near East, the Greeks adopted the Phoenician alphabet, perhaps *ca.* 825 B.C. Carved ivories from Syria and Phoenicia dated 850-750 have been found in Crete, Rhodes, Samos, Sparta, and Athens, indicating renewed trade. Hesiod's celebration of law and order in his poems implies that chaos in the affairs of men had receded but was still an acrid memory.

Greek tradition places the adoption of constitutions on Crete in this period. The idea of a constitution is fundamental and far-reaching, orienting the individual citizens to the state rather than to the family. The polis, or independent Greek city-state, which Aristotle (*Pol.* i.2 [8]) called a cooperation of several villages, emerged in Crete and mainland Greece as the answer to the political fragmentation and instability of the previous centuries.

B. Colonial Expansion. Five Spartan villages united under one king *ca.* 800 B.C. and began to conquer the surrounding villages. By 720 Sparta ruled Messenia and

had become the richest and most powerful state in Greece.

The Spartan example inspired other Dorians. In the Megarid the Dorian state of Megara appeared and fought with Corinth. The Megarans also started foreign colonies. The Corinthians united other villages into the single polis of Corinth. This pattern appeared repeatedly, even at Thebes; the polis became virtually the hallmark of Hellenic civilization, eventually honored even by the Romans, who gave special privileges to the conquered Greek city-states.

The expansion of the city-state into international trade followed the logic of its internal development. Each city-state recognized the value of setting up trading colonies in areas of rich markets. The mother city, after proper consultation with Apollo or Zeus, sent whole families from all classes and trades, for the new colony was to be self-supporting but loyal to the mother city. Thus Miletus set up colonies around the Black Sea, exploiting the amber trade. Lesbos sent colonists to the rich agricultural lands on the European side of the Hellespont. Chalcis and Eretria founded colonies in Sicily and Italy. Greek colonies appeared also in Spain, Gaul, Illyria, Corsica, North Africa, and Egypt. The Greeks had to contend with the hostility of the Phoenicians in their efforts to expand their trade, but the Phoenicians were curtailed by the Assyrian sack of Tyre in 701 and the Babylonian sack of Sidon in 677 (cf. J. Katzenstein, *History of Tyre* [1973]).

Thus from 750 to 550 the trade networks of the previous Greek civilizations reappeared, but with the added complication of colonization. Colonization increased warfare (see III.D below), but the commercial benefits were enormous. By 610 Ionia was fabulously wealthy. The Ionian fleets ruled the seas off the coast of Asia Minor and in the southeastern Mediterranean. Ionian mercenaries found employment far and wide. Ionian art, politics, philosophy, and poetry flourished in a commercial and artistic golden age.

C. Warfare (750-550 B.C.). In the competition between city-states for markets, territory, and position, warfare was inevitable. As noted above, the Spartans enslaved the Messenians (740-720 B.C.). Likewise Corinth and Megara warred over the southern territory of Megara. The victory of Corinth left it a commercial center second to none. Much later (600-540) the Athenians attacked Megara over the island of Salamis, which Megara also lost. Colonies also fought one another, sometimes because their mother cities were at war, sometimes because of competition for the same market, and sometimes in a struggle for general military supremacy.

Sparta lost decisively to Argos in 669 B.C. and for a while declined in prestige and power. Various colonies revolted from *ca.* 640 until 546, when Sparta defeated the Argos in the battle of the "Three Hundred Champions" of each side and reemerged as the most powerful military state in the Peloponnesus.

In central Greece the Phocan states of Delphi and Crisa fought the First Sacred War (595-586 B.C.), a local dispute in which Delphi utterly razed Crisa, vindicating the oracle in the eyes of many. Then the forces of Thessaly, in which Delphi lay, invaded Boeotia but were defeated.

None of these and other developments in war can be understood apart from certain Greek ideals, particularly the elevation of success in warfare as the highest aspiration of a young man. Defeat in battle meant death or enslavement, i.e., noncombatants were enslaved, while wounded or disarmed soldiers were simply killed. Thus war involved great strength, skill, and courage, as well as training — a considerable investment of men and intelligence, reflecting Greek ideals and values.

D. Tyranny. The main problem faced by the city-states was establishing a stable government. Stability could be achieved under the traditional king, but with the development of an inner unity as opposed to an imposed unity, kingship declined. For example, the new city-states in the eastern Aegean were republics. Aegina and Megara understood themselves to be founded by the god Apollo, not by a leader or king. It was Sparta that retained the traditional king in the sense of an absolute monarch. Nevertheless, the constitutional monarch became the overarching ideal in many cases. This king's authority was sanctioned either by an unwritten constitution of religion and custom or by an actual written constitution dividing authority between political institutions and the king. The king's council and court limited royal power in Argos, Athens, Corinth, and Ephesus.

On occasion city-states could not establish a stable government. Into the vacuum stepped a "tyrant" (Gk. *týrannos,* possibly a loanword from Lydian), who did not need to be an aristocrat or to have any special claim to power except brute force. In periods of tension between the traditional aristocracy of birth and the new nonaristocratic oligarchy of rapidly accumulated wealth, an interloper could all too easily seize power. Thus tyrannies emerged at Corinth, Sicyon, and Megara, powerful commercial centers. Tyrants generally held their powers by suppressing personal rights and political freedom. Therefore they always suffered from the ill will of citizens and feared revolt. So strongly did the Corinthians hate Psammetichus, tyrant of Corinth, that when he was assassinated in 582 B.C. they threw his corpse and the bones of his ancestors outside the city.

E. Athens and the Rise of Democracy. A quite different state of affairs existed in Athens during this period. This city-state had once (10th-7th cents. B.C.) been the most powerful on the mainland, but gradually others surpassed it in wealth, power, and commerce. Athens still depended on its tribal organization for political stability, while the new Dorian city-states developed small, compact structures that enabled them to move decisively in time of threat.

Athens operated on a constitution that recognized the "natural" groups of clan and tribe. There were four tribes, each divided into three brotherhoods. The brotherhoods in turn were composed of "thirds" and of clansmen and guildsmen. The clansmen owned and worked the land, and the guildsmen engaged in trades and handicrafts. Every adult male was admitted either into a clan or a guild, an event of considerable religious seriousness.

After the demise of kingship in Athens, power was divided among three magistrates. The duties of the king were administered by the royal archon, the duties of the army by the military archon, and the civil duties by the eponymous archon. Eventually Athens instituted the Areopagus Council, consisting of nine archons or magistrates.

The strength of the constitution lay in its long tradition and therefore in the awe in which it was held. Its weakness lay in the undiminished power of the clans. In 632 B.C. the followers of Cylon, who had attempted to seize power, took refuge at the altar of Athena but were slaughtered by the clan of the Alcemonidae. About 600 a jury of three hundred chosen by their birth found them guilty, banished the living members of the clan, and cast out the bones of their ancestors.

The massacre amounted to a crisis of conscience in Athens, and into this tense situation stepped a reformer, Draco, who instituted legal reforms that effectively strengthened the state at the expense of the individual, family, or other blood group.

Draco's reforms increased civil tensions rather than lessened them, and virtual civil war broke out. Then Solon, eponymous archon of 594/593 B.C., instituted reforms in debt penalties, law, and currency; his constitutional reforms were the most extensive. The new constitution's recognition of four "classes" defined by wealth, each eligible for various state offices, enabled citizens of lowly birth to participate in government.

Under Solon there were two legislative bodies: the traditional Council of the Areopagus, formed of ex-archons, and the new "Council of Four Hundred," composed of one hundred members from each tribe. The most radical departure from tradition was the institution of the Assembly, a judicial body elected by lot from the population at large. Aristotle labeled this body "democratic," since it was composed of the people (*démos*).

The ideals of Solon, as discussed by Aristotle, are now often considered the best in ancient Greece. It is true that Solon placed the state first, forced citizens to participate in government, and required the people to take a stand on political issues. He was also a religious reformer, requiring every citizen to take an oath of obedience to the state under the vengeful eye of Zeus. He lived his ideals as he programmed them into the new state constitution.

F. Religion. Religion remained a controlling factor during the city-states' rise to power. Families worshiped Hestia, goddess of the hearth, Zeus as protector of the courtyard, and their own gods and heroes. Every man was expected to maintain the family shrines, honor his ancestors in their tombs, invoke the familial Apollo, and revere his parents.

Every political group within the state was also a religious entity. Therefore each tribe, brotherhood, clan, and guild worshiped in its assemblies and gatherings. Every meeting of the council or assembly included homage to the appropriate deities.

Each state worshiped Hestia and also the god credited with its founding. Therefore Athenians worshiped Athena, but Spartans venerated Zeus. Every state meeting included time for public worship.

Regional centers provided a loose sense of identity among the Greeks. Greek pilgrims assembled continually at such centers as Delphi and Delos. Panhellenic festivals were held at Olympia, Delphi, Isthmus, and Nemea. All states consulted the oracles of the gods at Delphi, Dodona, and Didyma, but none of the priests at these centers held power over the states.

Alongside family religion, tribal and clan religion, and regional observance gradually emerged alternative religious expressions, notably the worship of Demeter the mother goddess, and also Dionysus, whose origins are usually traced to Bronze Age Thrace. Dionysus was worshiped sometimes in orgiastic frenzy, though the priests at Delphi adopted his worship in a more dignified mode. His attributes that guaranteed fertility closely parallel those of Demeter, who also seems to have controlled agricultural cycles. The worship of Demeter originated at Eleusis and may have included use of hallucinogens. The rites were called the "Eleusinian Mysteries" because the secrets of eternal life were promised to the initiates.

Another mystery religion (well portrayed in Euripides' *Bacchae*) was Orphism. Adherents experienced ecstatic frenzies, as in the worship of Dionysus and Demeter. Orphism also developed its own cosmogony, which gave it a philosophical facade. All three of the mysteries so far mentioned depended strongly on a well-developed myth and particularly attracted women.

Greeks in this period produced a wide range not only of religious prose but also of music and poetry. The musical and poetic genres included myth, elegy, hymn, processional song, personal poetry, triumph song, and satire. Sparta and Corinth became renowned as centers of music, dance, and poetry, most of which was associated with religious ceremony.

See RELIGIONS OF THE BIBLICAL WORLD: GRECO-ROMAN.

***VI. Triumph of Greece* (546-466 B.C.).**–*A. Persia v. Athens.* In the same year that Sparta emerged as the most powerful city-state in Greece (546 B.C.), Cyrus king of Persia defeated Croesus king of Lydia, an ally of Sparta, in Asia Minor. Sparta sent envoys to warn Cyrus not to advance on the Greek city-states in Asia, but sent no troops. Cyrus ignored Sparta and the other mainland states and proceeded to overrun the Asian Greek city-states. Persia turned its attention southward briefly, reaching as far as Egypt by 525 B.C., during the reign of Cambyses, successor to Cyrus.

Subsequently Darius I (522-486 B.C.) consolidated a vast empire that stretched from the Mediterranean to the Indus and from the Caucasus Mountains to the Persian Gulf. Persia commanded the mightiest army between Greece and China and used the Phoenician navy. Darius built roads from his capital at Susa, one of which terminated at Ephesus on the Ionian coast. He reigned as an absolute despot, though with twenty satraps or governors administering territories in his empire. Capital in the form of gold and silver flowed to Susa rather than to the Aegean.

Darius continued a policy of expansion and thereby threatened the Greek city-states. He annexed Arabia, Cyrenaica, Samos, and Barca. In a foolish gesture of power he ordered his largely Greek eastern troops to attack the Scythians on the north coast of the Black Sea. He lost that engagement, but by 500 B.C. he controlled all but peninsular Greece, his next target.

Meanwhile Athens had suffered thirty-six years of continuous tyranny (546-510 B.C.) at the hand of Pesistratus, former polemarch (military archon). He died in 528/527, but his descendants held power until Athens revolted in 510. In the turbulent months that followed, Athens actually sent envoys to Persia to seek protection from Sparta, which had been severely bruised by Athens under Pesistratus. Persia demanded no less than submission to the Persian yoke, which Athens rejected. Civil war broke out in Athens, but the city shortly regained inner stability. In fact, it now was the center of Greek power and the most important Greek rival to Persia.

B. Spartan Alliance. At this time Sparta was implacably hostile to all things Persian. The Spartans attacked Samos (an ally of Persia) *ca.* 524 B.C. and began collecting allies. By 510 the alliance included Boeotia, Phocis, Athens, and perhaps Chalcis. This group implemented a governing body of two equal and independent houses: the Assembly of Spartiates and the Congress of Allies. The purpose of the body was to develop a common policy against Persia. The Congress of Allies in effect acknowledged the military leadership of Sparta.

C. Ionian Revolt and Battle of Marathon. The Ionian city-states overthrew and expelled pro-Persian tyrants in Ionia *ca.* 500 B.C. and asked Sparta's support. But King Cleomenes decided not to risk direct confrontation when he learned that Persia could deploy armies a three-months' march away from Persia. Ionia turned to Athens. The Athenian assembly sent a portion of their fleet to Ionia, thus notifying the Persians of their hostile intent. The revolt spread to the Greek city-states of the Hellespont and the Bosporus. Darius sent Histiaeus, tyrant of Myrcinus and his agent in the area, and Athens withdrew.

By 497 B.C. Greeks friendly to Persia had sacked many Ionian coastal cities. In fact, by the summer of 493 Persia had regained all the rebellious city-states.

Darius sent a well-equipped punitive force against Eretria and Athens early in 490 B.C. On the way to Athens he subdued four large Euboian city-states. The Persian fleet anchored in the bay of Marathon NE of Athens. The planned deployment of troops in the plain of Marathon gave the edge to the Persian cavalry. But this calculation went awry, and the Athenians routed the Persians brilliantly under their general Miltiades. The Persians withdrew to their ships and then sailed around the point to attack Athens by surprise off Phalerum. But the Athenians foiled Darius again; the Persians withdrew to Asia Minor to regroup and await the arrival of the army.

D. Persian Invasion of Mainland Greece. Unfortunately Miltiades' aggressive policy died with him from a wound suffered at Paros. Now the initiative lay with Persia, which lost no time. Squadrons of Persian ships anchored off Doriscus, supplied by the Persian allies and subjugated peoples of Phoenicia, Egypt, Cyprus, and Greece. Xerxes, now leading Persia, delayed in Macedonia to construct a safe supply route. A sudden gale smashed part of his fleet, but the remainder was still so gigantic that the Greeks grew faint when they caught sight of it at Artemesium.

The Persian assault on the pass at Thermopylae was a disaster for them. The Greek general Leonidas held the pass, which narrowed to 2 m. (6½ ft.) wide. The Persians streamed fearlessly through to a veritable slaughter but finally overwhelmed the Greeks through sheer numbers. Meanwhile, in the first engagement of the Persian and Greek fleets, the odds were with the Persians, who nonetheless suffered worse in the conflict. In two more engagements the Persians finally emerged victorious but at a fearful cost. Now Xerxes was the victor in two land assaults and three naval battles, though the Greeks had distinguished themselves as superior soldiers and sailors.

Xerxes continued to wage war, assembling a huge fleet off Salamis, where the Greek fleet lay anchored. The Persians outnumbered the Greeks three to one but still lost the sea battle because of superior Greek tactics at every turn.

In 479 B.C., the following year, the war went much worse for the mainland Greeks. The Persian commander Mardonius actually burned Athens, though its population had withdrawn to Salamis under the protection of their fleet. Furthermore, the Greek alliance stood ever in danger of splitting because each group (Spartans, Athenians, Megarans, Plataeans, etc.) acted in its own interest first. Nevertheless, in the great collisions of Greek and Persian forces at Plataea and Mycale the Greeks managed to carry the day, even slaying Mardonius early in the conflict. Thus were the Persians stayed.

E. Athenian Alliance. By the close of Xerxes' and Mardonius's attack against mainland Greece, Athens was clearly the leading naval power and second only to Sparta in total military power. Increasing friction between Athens and Sparta led to Sparta's withdrawal from active command of the Greek League late in 478 B.C.

Athens, now in control of the league, reorganized the system of command according to Athenian ideals. This new Athenian Alliance ruled the Aegean seas, putting an end to piracy, expelling pro-Persian governors, and stimulating sea-borne trade. It is often called a "thalassocracy" because it ruled the seas until the death of Xerxes in 465 B.C.

F. Western Greeks. The Greeks in Sicily and the West found Carthage a much greater threat than Persia. Gelon had become tyrant of Gela on the south shores of Sicily and eventually controlled almost all the south coast. He and his descendants first fought Carthage in 481 B.C. and crushed it; they ruled in Sicily until 461.

Tyranny strengthened Hellenism in the West. The aggressive policies of the tyrants suppressed local ethnic groups and cleared the way for commercial expansion. The western Greek city-states grew strong economically and thus attracted immigrants from the Greek islands, Ionia, and the Greek mainland. At the very time that separatism was the rule in the Greek homeland, unity prevailed among the western Greeks.

G. Literature, Philosophy, and Art. The period from 546 to 466 B.C. is recognized as one of the most creative in Greek history. As prosperity increased, so did an educated aristocracy that shared freely their ideals in religion, statecraft, education, and art In fact, a kind of Panhellenism was afoot, which came to expression in the Greek festivals at Olympia, Delphi, Corinth, and Nemea. The center of common worship for the Greek world was Olympia, where Zeus, king of the gods, was honored.

Pindar, a Dorian of Thebes, wrote his choral lyric poetry between 498 and 446 B.C. Pindar celebrated victories of his contemporaries, setting them in the context of Greek heroes and deities from the mythic past.

Meanwhile Ionian philosophers and dramatists, principally Aeschylus, Pythagoras, and Parmenides of Elea (an Ionian colony in Italy) were gaining prominence.

Aeschylus is usually dated *ca.* 525-456 B.C., precisely during the darkest threats from Persia. He fought at Marathon and Salamis; this experience is sometimes understood as the reason for the piety in his plays, in which the will of the gods, not the skills of men, determines history.

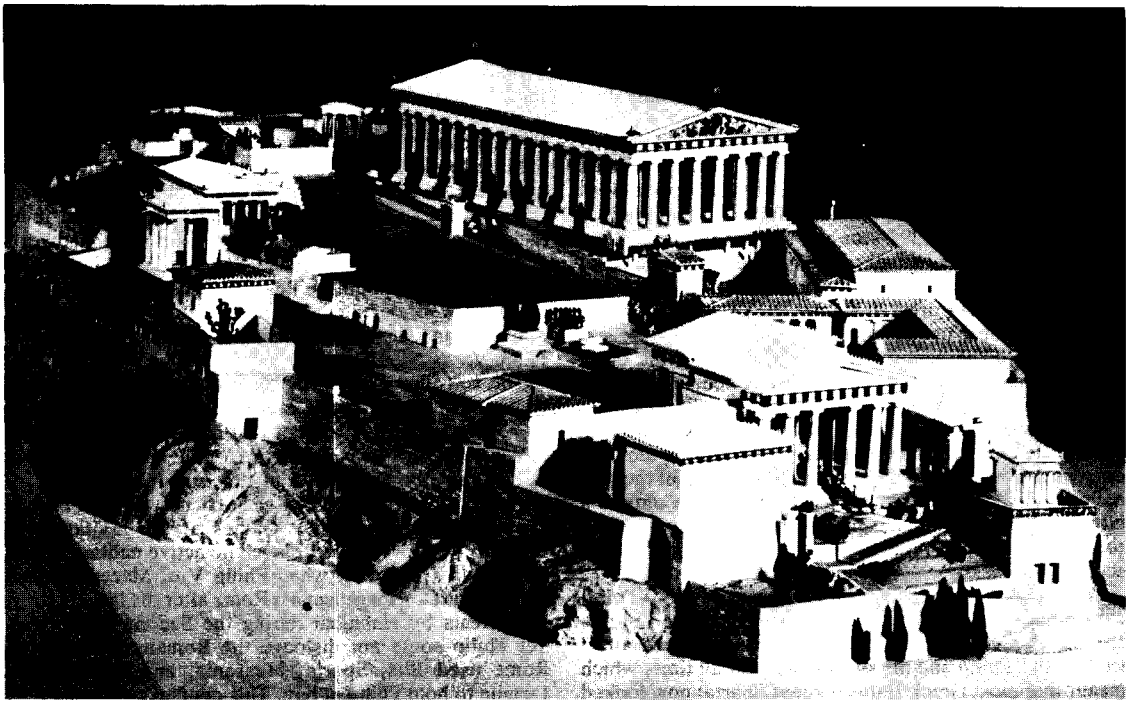
Pythagoras fled Samos when the tyrant Polycrates came to power. He found asylum in Croton in Italy, where he and his followers engaged not only in philosophical debate but also in political activity *ca.* 530-510 B.C. At Croton he founded a religious fraternity designed to bring mankind into proper relationship with the divine. His cosmogony is not well understood today, but some still invoke two of his principles: *harmonia* and *philosophia*.

By the beginning of the 5th cent. Heraclitus of Ephesus had bitterly attacked the ideas of Pythagoras. Since all things flow and change, said Heraclitus, it is pointless to speak of a harmonizing principle in the human soul and in nature. Parmenides of Elea (*ca.* 485-450 B.C.) also rejected most of Pythagoras's ideas and defined pure reason as that which apprehends truth.

Most Greek thinkers wrote in prose, eschewing poetry as fit for religion, not rational discourse. Their prose works in geography, history, and medicine were epitomes of rational expression. For example, Hecataeus of Miletus (*ca.* 500 B.C.) produced a veritable handbook of the world, including descriptions of peoples, customs, flora and fauna, and place names, so thorough that Alexander the Great used it in his sorties toward India.

Painting on pottery grew into one of the most cultivated of the arts. Athens became the center for this art, which attracted artists from all over the Greek world. These artists painted their figures black on red-fired ceramics. By 530 B.C. they outlined their figures in white on lustrous black wares. In other words, the red-fired clay of the vessel formed the figures, for which the artist provided detail in white lines. The black glaze provided the background. *See* Plate 24. Some artists signed their works.

Many other thinkers and artists were active in this period, e.g., the Ionian poet Xenophanes, the historian Cadmus of Miletus, and the writer of comedy Epicharmus of Syracuse. Others remained anonymous, or nearly so:



Reconstruction of the Acropolis, Athens' central fortress and sanctuary, which Pericles rebuilt after the Persians destroyed it in 479 B.C. Work began with the Parthenon (center), the temple of Athena Parthenos (Maiden), in 447. View from the northwest (Royal Ontario Museum, Toronto)

Athenian painters, architects of splendid temples and other public buildings, and fine engravers of coin-dies — themselves fine works of art.

VII. Crisis of the Fifth Century: Peloponnesian Wars.– When Persia was defeated after the assassination of Xerxes in 465 B.C., the outside threat that had held Greece together was dispelled, at least temporarily. As a consequence the internal tensions growing toward disruption of the alliance gained momentum. Leaders of the democratic party grasped power in Athens. They deposed the Areopagus, imposed their will on the allies of Athens, and finally broke with Sparta. Ephialtes and Pericles led the democratic opposition to the old aristocracy. They vigorously promoted Athenian interests above those of others in the alliance, even at the expense of Sparta. By 460 B.C. Athens was at war both with Sparta and with Persia. Pericles commanded the western fleet against the Peloponnesus (Sparta).

The years 460-455 were given to victory and expansion. By 454, however, Athens had lost so heavily in military campaigns even in Egypt that other states in the alliance revolted. Fighting finally ceased in 446, mainly because of the exhaustion of Athens and Sparta and their allies.

For fifteen years peace reigned in the Aegean and on the mainland, though Thucydides (i.18.3) reports that Sparta and Athens were preparing for war. When new hostilities broke out in 431 among the Greek city-states, Athens stood at the head of an empire. Wealth in the form of tribute from subjugated states and reparations from subdued rebel states had poured into the Athenian coffers. In turn Athens had protected these perhaps three hundred subject states from pirates, so that their trade prospered. Yet Athens had gained power through an imperialistic policy that seemed ill-conceived in terms of its own idealistic history. Furthermore, certain policies of war and economics overloaded the Athenian state with slaves, who had to be supported. The acknowledged leadership of Pericles did guarantee some form of stability to Athens and its empire. This stability, however, depended on the good will, nationalism, and integrity of Pericles, not upon the inner strength of the political institutions of Athenian democracy.

The first part of the Peloponnesian War (431-421 B.C.), resulted in Sparta's defeat of Athens. In the last engagement at Amphipolis the Athenian general Cleon was killed and Athens sued for peace. This peace lasted only until 416. War raged from 416 to 404, at the end of which Athens lay in total defeat, all its institutions and ideals in shambles.

The Peloponnesian Wars brought a cultural crisis to Athens. The young were attracted to sophists, who spoke elegantly but not always sensibly. Although Socrates (469-399 B.C.) had a strong following, his good sense and clear dialectics did not save him from disgrace and death. The violence of war seems to have polarized the citizens, so that either they advanced what amounted to superstition as an intellectual art or simply advocated a type of primitive revolutionary life. Extremism ruled the day rather than the old virtues of prudence and moderation.

Nevertheless, this century did produce the great dramatists Euripides (*ca.* 485-406 B.C.) and Aristophanes (*ca.* 450-385), the historian Thucydides (*ca.* 460-400), the orator Antiphon (*ca.* 480-411), the physician Hippocrates of Cos (*ca.* 460-400), the philosopher Democritus of Abdera (*ca.* 460-370), and others. Although the society was in many ways in crisis from the protracted wars, culture flourished.

VIII. Transition of the Fourth Century.–After defeating Athens, Sparta became the most powerful city-state in the Greek homeland. Persia and Carthage both threatened Greece, and most of the remaining Greek states were de-

moralized and bankrupt. But Sparta was also corrupted by the war and could not provide sustained leadership. Furthermore, internal economic problems sapped its energies. For forty years it remained the most dominant state in Greece, but its repressive policies betrayed its inner struggles.

The rest of the century is a melancholy record of wars and rumors of wars. Civil war shook Attica. Sparta went to war against Persia. An anti-Spartan confederacy fomented wars from 395 B.C. and opened the Corinthian War in 394. Hannibal attacked Sicily, and during the ensuing wars Dionysius ruled Syracuse with an iron hand. Fighting at Thebes drew in many Greek states, culminating in the collapse of Sparta in 368.

The rest of the century saw the collapse of the other Greek states, the decline of the new Athenian Alliance, and the disintegration of the Boeotian Coalition. Sicily moved toward anarchy. Finally Philip of Macedon came to power. He was immensely popular with his army and the citizens and is often credited with creating one of the first national territorial states not based on the autonomy of a city. He distinguished himself in war, diplomacy, and culture, setting precedents that his son Alexander could scarcely surpass.

IX. Alexander and His Successors **(336-217 B.C.).**– Political stability in Greece was apparently guaranteed by the League of Corinth in 337 B.C. This congress had allied itself with "Philip and his successors" for all time, which meant that most Greek states (except Sparta) now looked to a Macedonian, Alexander the Great, for leadership. Alexander immediately revealed his leadership qualities at the two revolts of Thebes in 336 and 335. The first rebellion he forgave, but at the second he destroyed the city and enslaved its inhabitants.

Alexander immediately set off on his world conquests (334), which encouraged Achaia, Sparta, Elis, and part of Arcadia to revolt in 331. As soon as they armed themselves, however, Antigonus, Alexander's regent in Macedonia, defeated them. To the ignominy of defeat were added the horrors of seven years of famine.

The internal instability of the mainland cities resulted in an endless stream of distinguished citizens being sent into exile. In 324 Alexander interfered directly by decreeing that all exiles must be repatriated. He also stirred up shocked animosity by requesting deification. Athens declared him a son of Dionysus but did so with contempt. Other states followed suit.

By 323 Alexander was dead. At the first confirmation of the news Athens led a new revolt against Macedonia called the "Greek Wars" by Greek historians. Even though almost all of Greece fanned the flames of revolt, it was all over by the next year. The Athenian navy was utterly destroyed, and Athens surrendered unconditionally. Demosthenes of Athens committed suicide. Athens and all the Peloponnesian states became protectorates of Macedonia.

For the rest of the 4th cent. the political situation was far from settled, though mainland Greece managed to stay clear of other international wars. The Near East was wracked from 320 to 275 B.C. by the Diadochi (Successor) Wars among Alexander's generals. The attacks of Pyrrhus of Epirus on Macedonian allies beginning in 292 marred the partial peace.

Rampant piracy was a major threat to security and economic stability in the 3rd century. Unchecked looting, kidnapping of wealthy citizens, and burning of coastal cities continued from 280 to 221. The Greeks responded to this and other threats by refounding city leagues. In 280 the old Achaian League was reformed; by 228 most of the Peloponnese had joined. The Aetolian League and the new Macedonian king, Antigonus Gonatas, succeeded in beating off the ferocious invasions of the Celts (Gauls) in 278.

Macedon still asserted its will to rule over Greece. In the Chremonidean Wars of 267-262 the Macedonian states were pitted against Athens, Sparta, and Ptolemy II Philadelphus of Egypt. Macedon finally prevailed.

Macedon held effective control of mainland Greece until 224, when the Aetolian League defeated the Boeotian League. Almost all central Greece became independent of Macedon. The Macedonians struggled from 224 to 205 to hold on to Greece, having success in the field at Sellasia in the southern Peloponnesus in 222, where the Spartans were defeated for the first time in history. The Macedonian king Antigonus died in 221; his successor was Philip V.

The so-called Social War against the Aetolian League occupied the new Greek League from 220 to 217. The outcome was indecisive, except that Macedon lost nothing.

X. Coming of Rome **(229-146 B.C.).**–By 229 Rome controlled the Illyrian coast and the island of Corcyra off the coast of Epirus. The next year friendly Roman envoys appeared at the Isthmian Games at the invitation of Corinth. Rome, however, played no active military role in Greece until 215 B.C., when Philip V of Macedon allied himself with Carthage against Rome after the latter's stinging defeats by Hannibal during the Second Punic War. Yet Philip could not dislodge the Romans from Illyria. Rome used Elis, Sparta, Messenia, and the Aetolian League to hold Philip at bay. This conflict continued until 205 B.C. with no clear advantage to either side.

Rome's strategy of divide and rule became clear only after 197 B.C. The Romans, at the invitation of Pergamum and Athens, finally defeated Philip at Cynocephalae NW of Athens, thus confining him to Macedon. Subsequently Rome treated Philip lightly to wean him from Antiochus III ("the Great") of Syria and treated its Aetolian allies rather shabbily. The Romans officially proclaimed the independence of the Greek cities and promptly withdrew.

The somewhat miffed Aetolians invited Antiochus III into Greece. Antiochus obliged, but the Roman general Cato routed him at Thermopylae in 191. The war continued at sea and in Asia, with thousands of Roman sailors manning transport ships to Samos. As a result Rome defeated Antiochus at Magnesia in Asia in 190/89, deprived him of Asia west of the Taurus Mountains, and effectively boxed in Greece.

The Romans took the precaution of quieting the just fears of the Greeks by proclaiming the freedom of the Greek cities at the peace of Apamea in 188. Athens enjoyed the best return on the investment of good will in the Roman cause; it became virtually a center of Roman pilgrimage during the first third of the 2nd cent. B.C.

Philip's son Perseus, who became king in Macedonia in 179, had dreams of power that did not go unnoticed by the Romans. Finally, in 171 the Romans ordered him to disband his newly formed coalition army. He refused, and Rome attacked.

This, the Third Macedonian War, appeared to go badly for Rome and its allies at first. The campaigns of 171, 170, and 169 demanded much in men and materiel from Rome and its Greek allies. Athens had supplied huge levies of grain from its sparse stores.

The war ended in Rome's favor at the Battle of Pydna in Macedon in 168. Rome annihilated the Macedonian armies. Athens was given the city of Haliartus, the island of Lemnos, and the coveted port of Delos as a reward for unswerving loyalty. Now Rome, though it had annexed no Greek territory, was functionally the master of Greece. The Roman Senate became the body to which Greek

city-states appealed their disputes. Roman fleets controlled the high seas and routed pirates. Roman armies enforced fines and levies.

By 148 Rome had annexed Macedon as Provincia Macedonia. In 146 the Romans intervened between Athens and the Achaian League in a dispute over the territory of Oropus. Rome dissolved the Achaian League and put these cities directly under the Macedonian proconsul. Corinth was utterly and brutally destroyed, probably as an object lesson to the other Greek cities. The Roman Senate declared the territories of Corinth and Thebes, and probably Boeotia, Chalcis, and the remainder of Euboea, properties of the Roman people. Athens and Sparta were allowed to remain free cities.

***XI. Rule of Rome* (146 B.C.-A.D. 100).**–The widespread destruction of the wars, heavy conscriptions, and oppressive taxations of the Romans depleted Greece severely. Thracians invaded the relatively unstable land in 135. Slave revolts caught the citizens of Attica off guard in 134 and again in 104-100. Piracy and brigandage were such a problem that Rome finally sent M. Antonius in 103 to restore order at sea and establish a permanent military presence in the heart of the troubles, Cilicia. During Antonius's visit to Athens a revolt occurred in which democracy was overthrown in favor of oligarchy.

Mithradates VI Eupator, who gained and consolidated territories in Asia, including Cappadocia, emerged as a new threat to Greece, and therefore to Rome. Rome faced Mithradates down in 100-95, but by 88 war had broken out. Mithradates had success at first and attracted Greek allies to his side. By 85, however, Rome had carried the day, though anti-Roman pirate bands continued to plunder coastal towns for almost twenty years.

The Roman general Pompey crushed the pirates in 67, but the Roman civil wars prevented peace. Julius Caesar decisively defeated Pompey on Greek soil at Pharsalus in 48. After Caesar's assassination many Greeks supported Brutus. Octavian (Augustus), victorious in the civil wars, incorporated Thessaly into Macedonia and organized the rest of Greece into the Roman senatorial province of Achaia. Athens and Sparta remained free states.

Greece spent the years to 15 A.D. reviving economically and demographically. In that year the Greeks successfully petitioned the emperor Tiberius to place them under a Roman legate rather than the Senate. In A.D. 44 Claudius restored Greece to the Roman Senate. Nero freed Greece for a few months, but Vespasian quickly rescinded what he regarded as a madman's order. Otherwise the provinces of Macedonia and Achaia lived in relative quiet under firm Roman control, engaging in commerce and the arts and remembering the past.

XII. Biblical References.–Greece is specifically mentioned four times in the OT (Heb. *yāwān*; Dnl. 8:21; 10:20; 11:2; Zec. 9:13; see IV.C above) and once in 1 Maccabees (1:1, Gk. *Hellas*), while Greeks are mentioned once (Joel 3:6 [MT 4:6]). Other more obscure references that are usually interpreted to mean Greece or the Greek people are Javan the fourth son of Japheth (Gen. 10:2, 4; 1 Ch. 1:5, 7; Isa. 66:19; Ezk. 27:13), the Dodanim (Gen. 10:4; 1 Ch. 1:7), Gog and Magog (Ezk. 38–39), the Philistines (Jgs. 14–15; 1 S. 17–18; etc.), and the "islands" (Ps. 72:10; Isa. 40:15; etc. — Cyprus, Crete, and the Aegean islands?).

In the NT the name occurs only once (Acts 20:2, Gk. *Hellas*), where it is distinguished from Macedonia; in this passage it is used as a popular synonym for Achaia, the Roman name of the territory. Reference to Greeks, however, is frequent (Jn. 12:20; Acts 11:20; 16:1; Rom. 1:14; 1 Cor. 1:22; etc.; as applied to the Syrophoenician woman in Mk. 7:26 the term Greek means Greek-speaking, Greek in culture, or possibly Gentile, pagan). The cities of Greece which Paul visited on his missionary journeys include Neapolis, Philippi, Amphipolis, Apollonia, Thessalonica, Beroea, Athens, Corinth, and Cenchreae (Acts 16–18; 20; *see* Vol. I, Maps XIX-XX).

GREECE, RELIGION IN ANCIENT. *See* RELIGIONS OF THE BIBLICAL WORLD: GRECO-ROMAN.

GREED [Heb. *nepeš*, *beṣen*–'inner most part' (Job 20:20); Gk. *pleonexía*–'desire to have more' (1 Thess. 2:5; 2 Pet. 2:3, 14), *pleonéktēs* ("guilty of . . . greed," 1 Cor. 5:11)]; AV COVETOUSNESS, DESIRE (Hab. 2:5), "will" (Ezk. 16:27), etc.; NEB also APPETITE (Job 20:20), "mouth" (Hab. 2:5), etc.; **GREEDY** (adjective) [Heb. *reḥaḇ nepeš* (Prov. 28:25), *bāṣaʿ* (Ps. 10:3), *bāṣaʿ beṣaʿ*, *nāśāʾ nepeš*–'lift up the soul' (Hos. 4:8); Gk. *pleonexía* (Eph. 4:19), *aischrokerdēs*–'fond of dishonest gain' ("greedy for gain," 1 Tim. 3:8; Tit. 1:7)]; AV OF A PROUD HEART (Prov. 28:25), COVETOUS, etc.; NEB SELF-IMPORTANT (Prov. 28:25), "stop at nothing" (Eph. 4:19), "given to filthy lucre" (Tit. 1:17), etc.; (noun) [*pleonéktēs* (1 Cor. 5:10; 6:10)]; **GREEDILY** (DEVOUR) [Heb. *lāhaṭ* (Ps. 57:4 [MT 5])].

Hebrew *nepeš*, rendered usually "soul," is translated "greed" in Ezk. 16:27; Hab. 2:5. The NEB's renderings "women who hate you" and "opens his mouth as wide as" (preserving the spatial image of Sheol and the parallelism with the next line) are to be preferred. The compound term *reḥaḇ nepeš*, "broad soul," does have the meaning of "being greedy" in Prov. 28:25.

The Hebrew pleonasm *bāṣaʿ beṣaʿ*, "be greedy with greed" (Prov. 15:27; Jer. 6:13; 8:10) means "acquire excessive gain." Originally *bāṣaʿ* meant "cut off" and referred to a ready-woven piece of material that was cut off from the thrum (*TDOT*, II, 206). Later on it acquired the connotation of cutting off someone's profit. The RSV is as correct in its translation of *bōṣē(a)ʿ bērēḵ* in Ps. 10:3 (following *K*) as the AV or NEB.

In Ps. 57:4 the RSV interprets MT *lōhᵃṭîm* as "greedily devour" (cf. KoB, pp. 474f.) instead of AV "set on fire," RSV mg. "are aflame." It may be that two roots overlap in meaning (cf. *ʾākal*, which can refer to humans eating or to fire consuming; cf. also *CHAL*, p. 173). The RSV also emends *tiḇʿᵃṭû* (< *bʿṭ*, "kick"; cf. AV, RSV mg.) of 1 S. 2:29 to *tabbîṭ* (< *nāḇaṭ*, "look at"; cf. KoB, p. 137; cf. LXX *epéblepsas*). The mg. has "treat with scorn," which is a better rendering and could be based on *bʿṭ*, "kick" (cf. AV, NEB; cf. also *CHAL*, p. 43).

The most often used Greek word is *pleonexía*, which the LXX used to translate *beṣaʿ*. Another important word is *pleonéktēs*.

In the OT greed may range from an insatiable appetite

(Job 20:20f.) to an excessive urge to acquire military power (Hab. 2:5), "unjust gain" (Prov. 15:27; Jer. 6:13 par. 8:10), and religious evil (Hos. 4:8). In Ps. 57:4 greed is likened to a lion devouring people; in Prov. 28:25 greed leads to strife.

In both the OT and NT greed is condemned as a vice among the wicked (e.g., Ps. 10:3, "and renounces the Lord"), among the people "of the world" (1 Cor. 5:10), and among the Gentiles (Eph. 4:19). For Paul, greed will not permit a person to inherit the kingdom of God; he considered it a vice like immorality, idolatry, drunkenness, etc. (1 Cor. 5:11). Unjust gain is a "trouble for a household" the opposite of honest dealings (Prov. 15:27). Wealth as such is not subject to strictures, but the unlawful pursuit of it is (cf. *TDOT*, II, 207f.). The bishops and deacons should fulfil their office without considering (unlawful) gain (1 Tim. 3:8; Tit. 1:7). Those who trust the Lord will receive material and spiritual riches (Prov. 28:25).

Peter related greed to false teachers who eagerly exploited the religiously naive (2 Pet. 2:3). For him, greed is located in the human heart (v. 14), which may be similar to the OT notion of *nepeš* (cf. Prov. 28:25).

GREEK LANGUAGE OF THE NT. The Greek used in the NT is the Koine ("common dialect"), the stage in the development of the language from the classical Attic to the modern idiom; it prevailed from *ca.* 300 B.C. to the 6th cent. A.D. Koine is the form of the language used when Greek had attained its greatest territorial expansion as the lingua franca of the Mediterranean world. Greek colonies had been founded in Sicily, southern Italy, and Marseilles in Gaul, and there were other colonies as far west as Spain, as well as in the east: Asia Minor, Palestine, Syria, and upper Mesopotamia. The deliberate hellenizing of the lands conquered by Alexander the Great increased the use of Greek even further. It was widely used in Rome itself, and the services of the Roman Church were in Greek till the middle of the 3rd century.

Since most school grammars have been based on the classical Attic, descriptions of the NT language usually are in terms of the changes that occurred between the Attic of the 5th cent. B.C. and the language of the 1st cent. A.D. The differences in pronunciation, grammar, and vocabulary are noteworthy.

I. Pronunciation
  A. Vowels
  B. Consonants
II. Parts of Speech
  A. Nouns
  B. Verbs
  C. Prepositions
  D. Conjunctions and Particles
III. Syntax
IV. Vocabulary
V. Semitism
VI. Language of Individual Books

I. Pronunciation.–*A. Vowels.* The most noticeable changes in pronunciation, it seems, affected vowels and diphthongs. Throughout the history of the Greek language α, ε, ι, ο seem to have been pronounced somewhat as they are today, i.e., approximately as the Latin *a, e, i, o*. The letter υ, however, had long before the 1st cent. A.D. ceased to be pronounced like the Latin *u*, so Latins had adopted the uniform practice, except in diphthongs, of transliterating υ by *y*, adding *y* to their own alphabet because no Latin vowel corresponded in sound. The sound of υ seems in Koine to have been something like the German *ü* or French *u*. Also, υ was often confused with οι, the latter apparently no longer representing a diphthong but a sound like *ü*.

Some distinctions in vowel quantity seem to have been lost, so that ο and ω were pronounced alike (B. F. Westcott and F. J. A. Hort, *NT in the Original Greek* [1886], II, 309), as they have been ever since. But ε and η were not confused. Although literary Latin always transliterated both by *e*, since the original distinction was one of quantity, a difference in quality had developed. Attic η already had the sound of ι in the 2nd cent. B.C. (for history of sounds cf. Schwyzer, I, 174-414, esp. the table on p. 233), but ι and η are not often confused in the papyri till about three centuries later.

The confusion of αι and ε, though attested in the 2nd cent. B.C., does not seem to have become general until two centuries or more later, after which it has remained constant. Confusion in NT MSS to some extent reflects the pronunciation of later centuries.

The pronunciation of αυ seems to have varied between *a* and *aw*, the latter eventually developing into *av* and *af*, as at present. In the papyri of the 1st cent. A.D. it seems still to have been a true diphthong. It continued to be transliterated by *au* because standards of transliteration had become fixed, ceasing to reflect changes in pronunciation, except in the writing of the semiliterate. Even in the 2nd cent. B.C. instances of αυ = *av* occur.

The evidence for ευ = *ev* and *ef* is a few centuries later, so that in the 1st cent. A.D. ευ seems still to have been pronounced *e* + *u*.

By the beginning of the Koine period ει and ι were pronounced alike. In view of the abundant evidence from the 4th cent. B.C. on, it is mere carelessness not to pronounce ει as ι, the equation that has prevailed for over twenty-three centuries. (Cf. W. W. Goodwin and C. B. Gulick, *Greek Grammar* [1930], p. 10.)

The diphthong ου was regularly transliterated by Latin *u*. This means that even at the beginning of the Koine period ου had this sound, and that this sound was no longer represented by υ.

The diphthong υι had become equivalent to υ late in the classical period, though for some centuries a few still pronounced the ι, simply because it was written.

In summary, it seems that the prevailing pronunciation of the vowels and diphthongs in the 1st cent. A.D. was as follows:

α=a in arm	αι=ai in aisle, or e in met
ε=e in met	αυ=a+w, or a+wh, or av, or ow in owl
η=i in machine(?)	ει=i in machine
ι=i in machine	οι=German ü
ο=o in smoke	ου=oo in boot
υ=German ü	υι=German ü
ω=o in smoke	

As a result of the changes listed above, and others during the following centuries, substandard orthography in Koine documents and NT MSS much resembles the spelling of semiliterate Greeks today.

B. Consonants. Several features of consonant pronunciation should next be noted. By the Koine period φ and χ were changing from the aspirated "mutes" (stops) that had given rise to the Latin transliterations *ph* and *ch* into the continuants represented by *f* and German *ch*. The θ seems still to have been an aspirated stop, i.e., differing from τ somewhat as *t* in *tick* does from *t* in *stick*, and not yet to have acquired the sound represented in English by *th* in "thin," which it has had in later centuries.

The rough breathing (῾), represented in English by *h*, was no longer pronounced, though it has continued to be

written down to the present day, even by the most avowed colloquial writers, because of the extreme conservatism of Greek orthography. It seems that some still pronounced it in the 1st cent. just because it was written, as most Americans now pronounce the *h* of "humble" and "forehead," and some are beginning to pronounce the *h* of "herb," all of which were previously silent. This phenomenon of recomposition is found in all written languages, especially when a historical orthography lags far behind changes in pronunciation.

The nonassimilation of ν before κ, γ, χ seems to have been common in the 1st century. There was also confusion of κ and γ, δ and τ, β and π, κ and χ, λ and ϱ, π and φ — some probably due to foreign influences. There were both omission and insertion of γ (e.g., ὀλίος for ὀλίγος and μναγιαῖον for μναῖαῖον), because γ was being pronounced as *gh* and *y* as early as the beginning of the Koine period.

The pronunciation of β was perhaps the most variable, ranging from *b* through *w* to *v* until the Christian era, when it settled down to *v*. The standard Latin transliteration for β has been *b* from early times, but there is considerable evidence that, as in Hebrew, the letter had more than one pronunciation (cf. LSJ, derivations under B, *passim*). The sound *v*, or *w*, is shown in the LXX Δαβιδ (*Dabid*) for David and in Λειβία (*Leibía*) for Livia, at the beginning of the Christian era; later in such spellings as *Bergílios* and *Bereníkē* for Vergil and Veronica (Schwyzer, I, 207ff., 829).

During the entire Hellenistic period δ was occasionally pronounced *dh* (as *th* in *this*), which has been its regular pronunciation through most of the Christian era.

In the combinations μβ, γγ, νδ, the consonants β, γ, δ have always been voiced stops, i.e., *b*, *g*, *d*.

The rough breathing on initial ῥ indicates some now unknown peculiarity in its ancient pronunciation.

The occasional confusion of λ and ϱ, e.g., φραγελλῶ (*phragellṓ*), from Lat. *flagello*, is a phenomenon common to other languages.

The σ before β, γ, δ, μ had been vocalized since early Hellenistic times, as it still is today, e.g., *Smýrnē*, pronounced *zmirni*, cf. Turkish *Izmir*.

The ζ had definitely become *z*, instead of *sd*, or possible *ds*.

Evidence for the statements above is well known to students of the papyri and inscriptions. Vast collections of papyri, as well as thousands of inscriptions and ostraca, have now been published. Convenient illustrative selections from this wealth of testimony may be studied in two small volumes: G. Milligan, *Greek Papyri* (1910); and R. Helbing, *Auswahl aus griechischen Inschriften* (1912). Deiss.*LAE* also offers numerous examples.

II. Parts of Speech.–*A. Nouns.* In common with other Indo-European languages, Greek in the historical period has tended to lose case forms and to depend more and more on prepositions and word order. The drift in Greek, however, has not been as rapid as in certain other languages, e.g., the Romance group.

The dual number, moribund in Attic, is completely absent from the NT. Luke once puts a dative plural on *dýo*. The dative case form, soon to die, had a final burst of extensive use in Koine. The Attic 2nd declension survives only in the relic *híleōs*.

Except for the dual, the first two declensions in their common forms are preserved intact, though the vocative case form is not always used.

The 3rd declension shows considerable loss, some of it made possible by the spread of the *-ion* ending, e.g., *thēríon, kynárion, ichthýdion, daimónion,* instead of *thḗr, kýōn, ichthýs, daímōn* (cf. D. C. Swanson, *JBL*, 77 [1958], 134-151). Others are replaced by second-declension nouns of different roots, e.g., *ónar, phréar, hýs, oís* by *enýpnion, pēgḗ, choíros, próbaton*. The NT often exhibits this phenomenon in process, having both old and new forms, e.g., *kýlix* and *potḗrion, phréar* and *pēgḗ*. Although *oús* was on the way out, neither *ōtárion* nor *ōtíon* proved satisfactory substitutes; all three occur in the NT. Long before the Koine period, *hēméra* had replaced *ḗmar*, as *nerón* was to replace *hýdōr* and *ánoixis éar*, then *ánoixē* replaced *ánoixis* and so on as the 3rd declension eroded further.

Third-declension accusative singulars in α sometimes received a ν on the analogy of the 1st declension, e.g., *astéran, cheíran, eikónan, mḗnan*. In view of the character of the MS evidence it is probable that *astéran* (Mt. 2:10) and *cheíran* (Jn. 20:25) are the original forms. (Copyists are usually "correctors.") Third-declension plurals in ς were changing to ας, e.g., *bóas, ichthýas*. The change of accusative plurals in ας to ες is extremely rare in NT MSS, *tésseres* being the only example, but on very good authority.

The treatment of the Semitic names *Iēsous, Ioudas, Leuis, Satanas,* making no changes except to add ς in the nominative and ν in the accusative, points in the direction of the modern colloquial masculine declension that has developed from the ancient 1st and 3rd, using the ancient accusative stem throughout, but adding ς to the nominative singular. Classical Lesbian and Doric masculine genitive singulars in α may possibly have aided the process. Subscript ι in the dative is purely orthographic.

Most Semitic names are treated in the NT as indeclinables, e.g., those in the genealogies of Matthew and Luke: *Abraam, Isaak, Iakōb, Rhouth, Adam, Sēth, Enōs*.

B. Verbs. In verb inflection the general Indo-European drift from synthetic to analytic forms is evident, not so much in the appearance of new analytic phrases as by the disappearance of certain synthetic forms, e.g., future perfect, future participle, and optative. This apparent impoverishment of the language, and actual impoverishment of the written language, is due to a reluctance to write new forms, even though they were in common use in the spoken language.

The Attic infinitive was in the process of being displaced by a new analytic infinitive, consisting of *hína* + subjunctive, usually in the aorist, e.g., *hína lýsē* instead of *lýsai*. This involved specification of person and number, e.g., *thélomen hína poiḗsēs*, "we want you to do"; *parḗngeilen autoís hína mēdén aírōsin*, "he ordered them to take nothing"; *hína ginṓskōsi tṓn theón*, "for *them* to know God." Note that this periphrasis does not involve the writing of a new form. This *hína* survives in modern Greek in the form *ná*.

Non-Attic forms of certain words do occur, however, such as the imperfects *edídoun, etíthoun, ḗmēn* (*ēn*), *ḗmetha* (*ēmen*), the aorists *kráxas* (*kragṓn*), *ēnoígēsan* (*aneṓchthēsan*), *kerdḗsai* (*kerdánai*), *epeínasen* (*epeínēsen*), *eípas* (*eipōn*), perfects *oídate* (*íste*), *gégonan* (*gegónasi*), and the new presents *katharízō* (*katháirō*), *stḗkō* (from *héstēka*), the subjunctives *gnoí, doís, doí, dṓē* (*gnṓ, dṓs, dṓ*), and the optative *dṓē* (*doíē*).

The optative was almost dead, occurring mainly in the Lucan and Pauline books, and in these only rarely and in more or less set phrases. Of the sixty-seven optatives in the NT all but four are in the 3rd person; fourteen of the thirty-four Pauline optatives are the one word *génoito;* twelve of Luke's are the word *eíē*, which is the only optative form of *eimí* in the NT. Almost all of Luke's optatives follow expressions of inquiry. Both 1 Peter and Jude have two optatives and Mark, Hebrews, and 2 Peter

one each. The optative *génoito* is still used in the modern language in the expression *génoito ho lógos*, more or less equivalent to "amen." No optative of a contract verb occurs.

In ο contracts there was a tendency to level the subjunctive to the same form as the indicative, e.g., *zēloúte* (Gal. 4:17), *physioústhe* (1 Cor. 4:6). Some confusion of indicative and subjunctive was due to the loss of quantitative distinction between ω and ο, and identity in the sound of ει and η.

The invasion of the 2nd aorist by the 1st aorist α, though found in Attic, is more prevalent in the NT, and was on the way to complete occupation.

The three Attic aorists in κα by NT times had the κα in the plural as well as the singular of the indicative, e.g., *aphḗkamen, edṓkate, éthēkan*. Whereas the 3rd plural sometimes had κα in classical Greek, Koine sometimes shows the older form.

The new infinitive, *hína* + subjunctive, was sometimes used as a substitute for the 3rd person imperative, a use that was to increase, along with *ás* + subjunctive, until the 3rd person imperative forms became extinct, e.g., *hē dé gynḗ hína phobḗtai tón ándra*, "and let the wife respect her husband" (Eph. 5:33).

The Koine pluperfect had lost the augment, and in the active voice has ει in all persons and numbers; NT examples are *pepoiḗkeisan, ēdeisan*. An analytic paraphrase, such as *ḗn endedyménas*, is sometimes used instead of the pluperfect. Although the pluperfect was to become obsolete in later centuries, it shows no special signs of weakness in the NT. The perfect also was to disappear, except for the middle and passive participles, but was in full use in the NT.

C. Prepositions. The Attic prepositions *amphí* and *aná* do not occur; *metá* and *perí* no longer take the dative; *prós* is moribund and limited almost entirely to the accusative. The instrumental use of *en*, rare in Attic, was greatly expanded, though the preposition was soon to die with its case. *Eis* is occasionally used to express location, a use that was to become normal with the extinction of the dative. As in Attic, *ex* sometimes expresses location, e.g., *ho patḗr hēmṓn ex ouranṓn*, "our father in heaven"; *éti ek koilías mētrós*, "still in his mother's womb" (cf. J. M. Rife, *Bibliotheca Sacra*, 80 [Apr. 1931], 220). (Cf. also *DNTT*, III, 1171-1215.)

D. Conjunctions and Particles. Certain characteristic Attic conjunctions and particles are rare and were soon to disappear, at least from the spoken language and from natural writing, though Atticists long continued their use; e.g., *mén, dé, te, oún, ge*, were in varying stages of obsolescence at the beginning of the Christian era, though the first two still appear in atticizing composition today. As suggested above, the decline of the classical particles does not mean that the language was at any stage denuded of particles, but rather that the written language was impoverished due to prejudice against writing non-Attic forms. This development is an inevitable phenomenon in any written language, and the more serious the subject, the more archaizing and artificial the language.

III. Syntax.—Some of the departures from Attic verb syntax that appear in the NT are: *hótan* with the indicative, e.g., *hótan stḗkete proseuchómenoi* (Mk. 11:25); *hótan* with a past tense, *hótan opsé egéneto* (Mk. 11:19); *hína* with the indicative, *hína hymás katadoulṓsousin* (Gal. 2:4); *eán* for *án* with the subjunctive in quasi-conditional clauses, *hópou eán eisélthēte* (Mk. 6:10), one of the phenomena peculiar to Koine, i.e., not found in the later language; *eán* beginning to replace *ei* (which was to survive in later centuries only in the expression *ei mḗ*), *eán hymeís stḗkete* (1 Thess. 3:8); extension of the use of *mḗ* to everything but the indicative, *mḗ dynámenoi* (Mk. 2:4), *anástasin mḕ eínai* (Mk. 12:18); the future indicative used as an imperative, *ópsesthe autoí*, "see to it yourselves" (Acts 18:15); the increasing use of plural verbs with neuter plural subjects, which was to become regular in later centuries; the rarity of the future participle and the rare use of the participle in indirect discourse, these last two being among the learned survivals in the NT.

Non-Attic developments in the use of pronouns include the interrogative use of the relative, e.g., *eph' hó párei?*, "What are you here for?" (Mt. 26:50); the use of the 3rd person of the reflexive for all persons, *martyreíte heautoís*, "You testify against yourselves" (Mt. 23:31), *en heautoís stenázomen*, "We groan within ourselves" (Rom. 8:23). The regular classical position of *tis*, after the noun it qualifies, is found mainly in the Lukan writings, where it averages almost once a chapter, but only once per book in John, 1 Corinthians, James, and 2 Peter. As might be expected, it occurs more frequently in Hebrews, five times.

The retreat of adjective comparison to two degrees is almost complete, so that usually the comparative does duty for the superlative as well, e.g., Mk. 4:32, *meízon pántōn tōn lachánōn*, where "greater than all" equals "greatest of all" (cf. 1 Cor. 13:13). Most of the surviving superlatives in the NT are used in the elative sense, e.g., *krátiste Phēlix* (Acts 24:3) means "very excellent Felix," not that Felix is the most excellent of all men.

The changes illustrated above are treated exhaustively in Schwyzer, and very interestingly in J. H. Moulton, I, *Prolegomena*. W. F. Moulton and A. S. Geden, *Concordance to the Greek NT* (5th ed. 1978), is an indispensable convenience for investigating NT usage. BDF is very useful. Other useful historical treatments are L. von Radermacher, Jannaris, Costas, Kühner and Gerth, A. T. Robertson. Good descriptive grammars of the modern colloquial and literary languages respectively are K. Petraris, *Lehrbuch der Neugriechischen Volks- und Umgangssprache* (1914); and K. Petraris and A. Maltos, *Neugriechische Konversations-Grammatik* (1914). The last work is cited especially because most writers, in using modern Greek as an aid to understanding the language of the NT, seem oblivious to the fact that Greeks read and write as well as talk. As in the case of every civilized people, the written and spoken forms constantly influence each other. The writings of Hatzidakis are useful reminders of this fact.

IV. Vocabulary.—For three millennia a core of basic words has persisted in written Greek with the same spelling, and no doubt with somewhat similar pronunciation, e.g., *theós, ánthrōpos, thálassa, gḗ, pólis, potamós, ouranós, kaí, pṓs, blépō, lógos, diá, katá, metá, ónoma, éltheleíde, éphage, ángelos, éthnos, epískopos, zōḗ, phōs*. Changes of course took place, both in the choice of words and in their meanings. Certain words were adapted first to Jewish and then to Christian usage, and their older meanings were lost, e.g., *ekklēsía* in pre-Christian Greek was "town meeting," but throughout the Christian era has meant "church"; *daímōn* in pre-Jewish usage was any supernatural spirit, but by Jews and Christians has been applied only to evil spirits; the common nouns *diákonos, presbýteros, epískopos* became titles of church officials; *ángelos* was no longer "messenger," but "angel"; *graphḗ*, "writing," became "scripture"; *éthnos*, "nation," acquired the additional meanings "heathen" and "Gentile," as did *Héllēn* in some contexts; *euangelízō* became "preach the gospel," instead of "bring good news"; *eucharistía*, "gratitude," became "communion service." For detailed discussion of certain words see D. Hill, *Greek Words and Hebrew Meanings* (1967).

The extreme conservatism of the language is illustrated by the following: of approximately 1300 words in the first book of Xenophon's *Anabasis*, the NT contains about 900 and the roots of over 300 others, in spite of the wide difference in subject matter. Hatzidakis (quoted in Schwyzer, p. 40) said, "Of about 4900 NT words, one half are still in use, and of the other half, only 400 are no longer intelligible."

Linguistic conservatism in Greek is mainly Atticism. Due to the dominance of Athens in the 5th cent. B.C., and its intellectual dominance for some centuries afterward, most writers of Greek ever since have rather closely followed Attic models. Only during the past century has it been customary for writers of poetry and fiction to use the colloquial language, though even this is never entirely free from atticizing. (Colloquialism certainly is no bar to eloquence, as evidenced by some of Paul's outstanding passages.) Varying with schooling, linguistic ability, and taste, the amount of atticizing in the 1st cent. A.D. ranges all the way from the artless note of an Egyptian schoolboy to the stilted archaism of Josephus in his attempts to make OT history and Judaism respectable in the eyes of cultured pedants of his day.

Among the Gospels, Mark shows the least evidence of formal schooling, and Luke the most. Of all NT books Revelation seems least affected by the schools. Paul's Greek is more or less colloquial, but that may be partly due to his amanuenses. Opinions differ about which NT books most nearly approach Attic standards. Hebrews, James, and 2 Peter have each been mentioned for this distinction. It seems clear that Christians early became sensitive to the plebeian language of some of their writers. The Catholic Epistles and Apostolic Fathers show a marked increase of atticizing, 2 Peter being an outstanding example, both in vocabulary and sentence structure.

Atticism not only influenced the original writers but also had considerable influence on the transmission of the text. Educated copyists tend to "correct" the matter they are copying. Hence, e.g., Codex Borgianus (T) and the ecclesiastical text (i.e., the form used by Greek Orthodox Christians in their public and private devotions) of the Lord's Prayer have *elthétō* and *aphíemen* instead of *eltháto* and *aphḗkamen*. Thus, during the fourteen centuries of hand copying, the Greek text of the NT was a variable moving toward Attic standards.

The chief non-Attic influence in the development of the Koine was Ionic, the dialect of Ionia on the west coast of Asia Minor, closely related to the dialect of Attica, Euboea, and most of the Aegean Islands. Ionic had gone through some centuries of more or less independent development until the rise of the Athenian empire in the 5th cent. B.C. again brought close relations. As Attic developed into an international language its peculiar ττ gave way, in most words, to the σσ of other dialects, e.g., *thálassa*. Such Ionic vocabulary as *basílissa, tésseres, nossós,* and *eleúsomai* became standard; noun endings in μα and ας increased, e.g., *Dēmas, Epapras, Hermas, Kēphas, Thōmas*; ρσ was substituted for ρρ; third-declension forms of *noús* were used; etc. (For further details cf. Bauer, rev., pp. xiii-xiv.)

One of the most obvious changes in vocabulary was in the length of words due to: prefixes, as in *apophthéngomai*; compound prefixes, as in *apekdéchomai*; the spread of various suffixes, as in *himatismós hagíasma*; and the compounding of root elements, as in *oikodespótēs*. These increases in length refer to the written language. It is probable that many of these long words had shorter synonyms in the spoken language, as a Greek today might tell an inquiring foreigner that the word for pawnshop is *enechyrodaneistērion*, but in speaking use the folk etymology *pansophí*, or as in American schools one hears abbreviations like "lab" and "exam" more often than the longer, more formal words.

The NT contains a number of Latin words, such as *praitōrion, kēnsos, spekoulátōr, mílion, sandálion, kaísar, soudárion*. The suffix *-ianós*, as in *Christianós*, is a Latin borrowing; and *-ēsios* in *Philippēsios*, an ending like the classical *Ithakēsios*, is thought to have been influenced by Latin *-enses*. Aside from vocabulary items, there seems to be little if any Latin influence on the language of the NT.

V. Semitism.—With regard to the Gospels in particular, but also for the rest of the NT, the claim has sometimes been made that its Greek is a Jewish dialect. In fact, this view was widely accepted until less than a century ago when the massive evidence of the papyri began to accumulate, showing that the Greek in general use by Gentiles in the Koine period was the same as that in which the NT was written. The major credit for scholarly realization of this fact is given to A. Deissman. His two works most often cited in this connection are *Bibelstudien* and *Licht vom Osten*. The former first appeared in 1895, and *Neue Bibelstudien* in 1897 (Eng. tr. A. Deissmann, *Bible Studies* [2nd ed. 1909], including both German works). *Licht vom Osten* first appeared in 1908 (4th ed. Eng. tr. Deiss.*LAE*).

Some or all of the Gospels have often been considered translations from Aramaic originals. This idea is as old as the statement of Papias that Matthew wrote his *logia* in the Hebrew dialect, and each one interpreted them as best he could. By "Hebrew dialect" he doubtless meant Aramaic. This same Papias wrote that "Mark, since he had been Peter's interpreter, wrote accurately, though not in order, as much as he could remember of the things said or done by Christ; for he himself had neither heard the Lord nor followed him" (quoted in Eusebius *HE* iii.39.15). As a matter of fact, Matthew shows less evidence of being a translation from a Semitic original than does Mark.

Christianity does, of course, have a Jewish background. It is rather generally agreed that Jesus and His disciples spoke Aramaic, though some have argued that they spoke Greek in Jewish Palestine. The chief considerations are: all Palestinian Jews knew Aramaic; upper-class Jews like Josephus had a Greek education; the government did not maintain a public educational system; those who had dealings with the government knew Greek more or less; Greek cities were established in Palestine, especially the Decapolis; there is no reason to suppose that the peasants, the Jewish masses, knew Greek; the language of Palestinian Christianity was Aramaic.

The most convincing testimony is found in the NT quotations of Aramaic, Mk. 5:41; 14:36; 15:34; Rom. 8:15; 1 Cor. 16:22 (see RSV mg.); Gal. 4:6; and the statements in Acts 21:40; 22:2 that Paul addressed the crowd at Jerusalem in Hebrew (Aramaic). That no interpreters are mentioned in certain situations is of no weight. It is a common practice to report bilingual conversations without mention of interpreters. In Papias's account of Mark and Peter, the interpreter is an essential feature of the statement.

That Jesus spoke Aramaic seems certain. Whether He used any Greek cannot be determined.

Papias's account of Mark and Peter seems to be at least partially true. Some of the early Christians were undoubtedly bilingual, e.g., Mark, since his family had moved to Jerusalem from Cyprus, a part of the Greek world. Paul was evidently another, for in Jerusalem he used Greek or Aramaic as the occasion demanded. Bilingual people who hear something in one of their languages often report it in the other language without conscious

attention to idiom. This process, like Mark's alleged writing in Greek what he heard Peter say in Aramaic without even following the same word order, is quite different from translating a book. The most reasonable view is that the writers of the Gospels were either themselves bilingual, or obtained their information from people who were.

In view of the above facts and probabilities, and also inasmuch as the language of the LXX (the Bible of the early Church), which is mainly a translation from Semitic originals, was familiar to NT writers and extensively quoted by them, it would have been impossible to keep all Semitic coloring out of their Greek. No matter how many languages the NT passes through in translation, Christians still keep the Semitic words amen, hallelujah, hosannah, abba, and maranatha. But there seems to be no decisive evidence that any of the NT books is a translation from a Semitic original.

Attempts to prove that this or that Gospel is a translation have usually taken the form of claiming that certain expressions were Semitic idioms not native to Greek. (Cf. C. F. Burney, *Aramaic Origin of the Fourth Gospel* [1922]; J. A. Montgomery, *Origin of the Gospel According to St. John* [1923]; C. C. Torrey, *HTR*, 16 [1923], 305-344.) Such claims have been shown almost entirely groundless by demonstration that the idioms in question can be found in Greek that is free composition (cf. E. C. Colwell, *Greek of the Fourth Gospel* [1931]; M. Burrows, *JBL*, 49 [1930], 95ff.; J. C. Doudna, *Greek of the Gospel of Mark* [*JBL* Monograph Series, 12, 1961]).

Certain difficult passages are also claimed to be mistranslations. Even if they are, it is no proof that the whole book is a translation. Furthermore, the Semitic originals of the alleged translations and mistranslations are purely hypothetical. (Cf. M. Black, *An Aramaic Approach to the Gospels and Acts* [3rd ed. 1967].)

A more decisive criterion by which to detect translation Greek is word order. Greek, like Latin, has a comparatively flexible word order. Semitic languages have a relatively rigid word order for various sentence elements. The order in translation Greek tends to follow that of the Semitic original. This tendency can be endlessly illustrated by its regular occurrence in the LXX. Insofar as this test has been applied to NT books, the indications are that none is a translation from Aramaic (cf. J. M. Rife, *JBL*, 52 [1933]).

VI. Language of Individual Books.—The language of Matthew and Mark is often contrasted. Mark is less premeditated and more vigorous. In Matthew at the baptism the skies are "opened," but in Mark they are "split"; the voice from the sky speaks directly in the 2nd person in Mark and Luke, but more impersonally in the 3rd person in Matthew. At the healing of the leper Mark (1:41) says Jesus was "moved with pity" for him, but Matthew (8:3) and Luke (5:13) omit this detail. In Mark (6:39f.) at the feeding of the five thousand it is said that the multitude was seated "in picnic groups on the green grass, like one flower bed after another," three colorful details omitted by Matthew and Luke.

It seems quite possible that considerations of space may explain the comparative briefness of Matthew and Luke in some passages, or in many. A papyrus scroll longer than the length of Matthew's Gospel would probably be inconvenient to handle. Luke filled two rolls of this length; Mark had room to spare because he recorded fewer incidents.

At any rate, Mark is not as polished a production. The opening is comparatively abrupt, the transitions rougher, the sentence structure paratactic. These facts have been recognized from ancient times. There are, however, compensating features of vividness and vigor. Mark's Greek is literary in the sense that it is not illiterate. It shows constant though not total conformity to grammatical standards; e.g., he is one of the NT writers who strictly adhere to the rule for cases used with *akoúō*. Parataxis of itself does not necessarily destroy unity of thought or logical subordination of clauses or high literary effect. Outstanding examples of these truths are Ps. 23 and Isa. 40:12. J. A. Kleist, who long made a special study of Mark, wrote, "Mark is graphic and sure of his Greek" (*Gospel of St. Mark* [1936], p. 205, and similar observations *passim*).

Luke, who apparently followed written sources, seems to have refrained from demonstrating his own literary attainments when quoting; but when composing freely, as in the preface to his first volume, he reached a literary level in sentence structure not found elsewhere in the Gospels. As can be seen in any Greek harmony of the Gospels, both Matthew and Luke frequently used vocabulary and sentence structure considered more elegant than Mark's.

Matthew's preference for neat symmetrical arrangement appears in: the three divisions of his genealogy; his five concentrations of discourse material marked with opening and closing formulas; the poetic parallelism of his Beatitudes; the stanza-like structure of his paragraphs on the spiritual fulfillment of the law (5:17-47); the six on charity, prayer, and fasting; the seven woes pronounced on scholars and Pharisees (23:14-27); the concluding lament over Jerusalem; the unforgettable little rhyme in 21:41, *kakoús kakôs apolései autoús;* and the classic form of his Lord's Prayer.

It seems fair to say that Luke is the most beautiful of the four Gospels. This impression is largely due to the first two chapters, in which Hebraic parallelism plays such a prominent part in the canticles; but the impression is strengthened throughout the Gospel. This seems, however, due less to diction and sentence structure than to the scenes he chose to represent.

John is really the most colloquial of the Gospels, the easiest for a modern Greek to understand, either by reading or hearing, on account of its vocabulary, the simple sentence structure, and the great amount of repetition. It has a core vocabulary, words used everywhere and always by Greeks, or sometimes, as in the case of *trṓgō*, the modern word instead of the classical or more prevalent Koine. Here again, the ideas combine with the form of language to produce the almost unrivaled devotional atmosphere of the book.

In Acts one finds more learned language than in any of the Gospels, even Luke. Vocabulary, sentence structure, and inflectional forms are less common (*koiné*), nearer the classical, but occasionally Luke uses a construction or a meaning that seems more colloquial than anything in Mark.

It is the subject matter of the Epistles that makes them harder reading even than Acts. By its nature, narrative is easier reading than discussion of ideas. Most narrative is necessarily concrete, while the ideas of the NT Epistles largely concern the intangible and abstract. Romans makes a strong impression of profundity, but the reader does not feel that Paul has been to school as much as Luke. The book has become a Christian classic of the first rank due to Paul's natural eloquence and intensity of feeling, rather than because of his advanced Greek schooling. Yet one may well ponder the statement of a native Greek classical scholar that "Paul... follows a middle course writing the language of an educated gentleman of his time" (Costas, p. 55).

The foregoing statements apply to the Pauline writings in general, but special mention should be made of a type of sentence of which two examples appear in Col. 1. It is well known that the long sentence of vv. 3-5 follows an elastic pattern that Paul used in other letters, i.e., a somewhat formal expression of warmhearted appreciation and confidence, varied to suit the occasion, and no doubt developed by repeated use. The much longer sentence of vv. 9-20 must be the result of similar practice in summing up the various phases of his gospel in one majestic period. A similar impression is made by the extensive summary of Eph. 1:3-14, as well as by the grandly flowing sentences of the rest of the latter Epistle. Written in the popular Greek of its time, it is of a style comparable to the art and beauty of the Greek Orthodox liturgy, in which it is quite at home.

Also worth mentioning are the irresistibly diplomatic appeal in Philemon and the repeated puns on the meaning of the name Onesimus: *áchrēstos, eúchrēstos, opheílei, prosopheíleis, onaímēn, xenían*. Was not an ironic pun also intended in connection with the names Euodia ("good journey, success") and Syntyche ("[good] luck, success") in Phil. 4:2?

Hebrews has a markedly different kind of language. It was only after the difference had been obscured by translation into Latin that attentive readers could fail to see the divergences from Paul's language. Clement of Alexandria, the earliest extant writer to discuss the matter, clearly recognized the difference from Paul's Greek. Hebrews is a masterpiece of impressive rhetoric. It is hard to say which is more striking, the distinguished character of the vocabulary, or the refined art of sentence building. Clement of Alexandria saw a similarity to Luke (quoted in Eusebius HE vi.14). Schwyzer called it a work of polished art ("das erste Denkmal christlicher Kunstprosa," p. 126); Moulton stated that Luke was "the only NT writer except the author of Hebrews to show any conscious attention to Greek ideas of style" (p. 18).

In the Catholic Epistles one finds a certain elegance of language, and in two or three of them considerable atticizing, indicating that the authors, or their amanuenses, had read more Greek literature than other NT writers, except Luke and the author of Hebrews. Renan said, "The Greek of James is pure and almost classic" (*L'Antichrist*, p. 47); he considered 1 Peter more like Paul's writing (p. 115). Judgments vary with regard to some of these books. Certainly there is more atticizing in Jude and 2 Peter than in the other Catholic Epistles. The language of the Johannine Epistles is clearly of the same kind as that of the Gospel (see above).

The Greek of Revelation is the least schooled of any book in the NT, but as a work of art it is the finest flower of apocalyptic literature. Its author used language of an elementary character, and it is the easiest Greek in the NT for a beginner to read. This is due to the concreteness of the imagery, the simplicity of sentence structure, the prevalence of action, the everyday nature of the vocabulary, and the minimum of Greek syntax involved. Its variety is of visualized things rather than of ideas.

The differences in language in different NT books are largely obliterated in translations. An ideal NT translation would make each book correspond to the literary character of its Greek.

GREEK VERSIONS. *See* SEPTUAGINT; VERSIONS.

GREEKS grēks; **GRECIANS** grē'shənz [Heb. *bᵉnê hayᵉwānîm*] (Joel 3:6 [MT 4:6], AV); [Gk. *Hellēn, Hellēnis*] (Jn. 12:20; Acts 14:1; Rom. 1:14; etc.); AV also GRECIANS. The word for Greeks occurs only once in the OT. (For references to Greece in the OT *see* GREECE XII; JAVAN.) In the AV of the Apocrypha "Grecians" and "Greeks" are used without distinction, e.g., 1 Macc. 6:2; 8:9; 2 Macc. 4:15, 36. Thus in 1 Macc. 1:1, Alexander the Great is spoken of as king of Greece, and in 1 Macc. 1:10 the Macedonian empire is called "the kingdom of the Greeks" (Gk. *basileías Hellēnōn*). In 2 Macc. 13:2 the army of Antiochus king of Syria is called "Grecian" (*dýnamin Hellēnikēn*), and in 2 Macc. 6:8 the "cities of the heathen" (*Hellēnidas póleis*) are Macedonian colonies. In 2 Macc. 6:1 an aged Athenian is sent by Antiochus the king and charged with the duty of Hellenizing the Jews; in 2 Macc. 9:15 Antiochus vows that he will make the Jews equal to the Athenians; in 1 Macc. 12–14 reference is made to negotiations of Jonathan the high priest with the Spartans, whom he calls brethren, seeking the renewal of a treaty of alliance and amity against the Syrians. With the spread of Greek power and influence, everything not specifically Jewish was called Greek; thus in 2 Macc. 4:36; 11:2; 3 Macc. 3:8, the "Greeks" contrasted with the Jews are simply non-Jews, so called because of the prevalence of Greek institutions and culture. "Greek" even came to be used in the sense of "anti-Jewish" (2 Macc. 4:10, 15; 6:9; 11:24).

In Isa. 9:12 (MT, LXX 11) the LXX reads *toús Hellēnas* for Heb. *pᵉlištîm*, "Philistines"; but we are not therefore justified in assuming a racial connection between the PHILISTINES and the Greeks. Further light on the ethnography of the Mediterranean basin may in time show that there was actually such a connection; but the rendering in question proves nothing, since "the sword of the oppressor" of Jer. 46:16 (LXX 26:16) and 50:16 (LXX 27:16) is likewise rendered in the LXX with "the sword of the Greeks" (*machaíras Hellēnikēs*). In all these cases the translators were influenced by the conditions existing in their own day, and were certainly not disclosing obscure relations long forgotten and newly discovered.

In the NT the AV, RSV, and NEB attempt to distinguish between Gk. *Hellēnes* and *Hellēnistai*. The AV and RSV generally render "Greeks" for *Hellēnes* (but cf. Jn. 7:35, AV; in Acts 11:20 the AV follows a textual tradition that reads *Hellēnistai*) while the NEB uses "Greeks" or "Gentiles." For *Hellēnistai* (Acts 6:1; 9:29) the AV gives "Grecians," the RSV "Hellenists, and the NEB "those who spoke Greek," "Greek-speaking Jews" (mg. "Hellenists"). These latter were Jews of the Dispersion who spoke Greek (*see* HELLENISM; HELLENIST), as distinguished from Palestinian Jews; but since many of the latter also spoke Greek by preference, the distinction could in no sense be absolute. In Jn. 7:35, e.g., *Hellēnes* can hardly refer to any but Greek-speaking Jews, and in Jn. 12:20 the "Greeks" (*Hellēnes*) who went up to worship at the FEAST of the Passover were almost certainly in the same category.

This difficulty is aggravated by the application of the term *Hellēnes* not only to those of Hellenic descent, but also to all those who had appropriated the language of Greece and the ideals and customs collectively known as Hellenism. These people were thus in the strict sense Hellenists, differing from the "Hellenists" (*Hellēnistai*) of the RSV only in that they were not of Jewish descent. In other words, *Hellēnes* (except perhaps in Jn. 7:35 and 12:20, as noted above) is in general equivalent to *tá éthnē*, "Gentiles" (*see* GENTILE). The various readings of the MSS (and thus the difference between AV [and NEB] and RSV) in 1 Cor. 1:23 well illustrate this.

Consequently there is much confusion, and in some cases it is quite impossible, with our limited knowledge of the facts, to clear up this confusion. In general, it would seem probable that where "Greeks" are comprehensively contrasted with "Jews," the reference is actually to "Gentiles," as in Acts 14:1; 17:4; 18:4; 19:10, 17; 20:21; Rom. 1:16; 10:12; 1 Cor. 1:22-24 (RSV "Gentiles," Gk. *éthnesin*); Gal. 3:28; Col. 3:11. In Mk. 7:26 the woman of Tyre, called "a Greek [NEB "Gentile"], a Syrophoenician by birth," was clearly not of Hellenic descent. Whether Titus (Gal. 2:3) and the father of Timothy (Acts 16:1, 3) were in the strict sense "Greeks," we have no means of knowing. Rom. 1:14, "I am under obligation both to Greeks and to barbarians," undoubtedly refers to Greeks strictly so called; possibly, though by no means certainly, the "Greeks" of Acts 21:28, alluding to Trophimus the Ephesian (v. 29), are to be taken in the same sense. In Acts 11:20 the MSS vary between *Hellēnistas* and *Hellēnas* (AV "Grecians"; RSV "Greeks"; NEB "Gentiles"). Even if one adopts the reading *Hellēnas*, however, it is not clear whether true Greeks or Gentiles are intended. *See* HELLENIST.

W. A. HEIDEL

GREEN; GREENISH. *See* COLOR.

GREET; GREETING [Heb. *šā'al lᵉšālôm*] (1 S. 10:4; 17:22; 25:5; 2 S. 8:10; 1 Ch. 18:10); AV also SALUTE, "enquire of his welfare" (1 Ch. 18:10); [*bārak*] (2 K. 10:15); AV SALUTE; [Aram. *šᵉlām*] (Ezr. 4:17); AV "Peace"; [Gk. *aspázomai*] (Mk. 9:15; Lk. 1:40; Acts 18:22; 21:7, 19; etc.); AV also SALUTE, EMBRACE (He. 11:13); NEB also WELCOME (Mk. 9:15), "pay respects" (Acts 18:22), HAIL (He. 11:13), etc.; [*aspasmós*] (Lk. 1:29, 41, 44; 1 Cor. 16:21; Col. 4:18; 2 Thess. 3:17); AV SALUTATION; [*chaírō*] (Acts 15:23; 23:26; Jas. 1:1; 2 Jn. 10f.); AV also BID GOD SPEED (2 Jn. 10f.); NEB omits in Acts 23:26. (In Isa. 14:9 the RSV supplies "greet," the NEB "meet"; the AV "for thee" is to be preferred; in Ezr. 4:11 the RSV supplies "send greeting.")

The OT has no word for "greet" or "greeting." *Bārak* means "bless." The expression *šā'al lᵉšālôm*, however, was a form of greeting. *Šā'al* means to "ask" and *šālôm* denotes "peace, prosperity, well-being"; thus *šā'al lᵉšālôm* means to "inquire about one's welfare." Elsewhere the RSV translates this expression literally, e.g., Gen. 43:27; Ex. 18:7; 2 S. 11:7. Other OT greetings are: "Is it well with you, my brother?" (Heb. *hᵃšālôm 'attâ 'āḥî*, 2 S. 20:9), "The Lord be with you!" (*YHWH 'immāḵem*, Ruth 2:4), "The Lord bless you!" (*yᵉbārekᵉḵā YHWH*, Ruth 2:4), "The blessing of the Lord be upon you!" (*birkaṯ-YHWH 'ᵃlêḵem*, Ps. 129:8), etc. For the king the greeting was "Long live the king!" (*yᵉḥî hammeleḵ*, 1 S. 10:24, etc.; cf. 1 K. 1:31, "May my lord King David live for ever!").

In the NT the usual word for "greeting" is *aspasmós* (cf. vb. *aspázomai*). A frequent form of greeting is *chaírō* ("rejoice"); the infinitive, *chaírein*, and imperative, *chaíre*, *chaírete* (lit. "Rejoice!" "Joy to you!"), are frequently translated "Hail!" or "All Hail!" (Mt. 26:49; 27:29; 28:9; Mk. 15:18; Lk. 1:28; Jn. 19:3). (Cf. *TDNT*, IX, 367.) When Jesus sent forth His disciples they were to "salute" the house they came to (Mt. 10:12), saying, "Peace [*eirḗnē*] be to this house!" (Lk. 10:5). After His resurrection Jesus greeted His disciples saying, "Peace be with you" (*eirḗnē hymín*, Jn. 20:19, 21, 26). He left His "peace" (*eirḗnē*) with them — "not as the world gives," in merely a formal way — as His parting blessing (Jn. 14:27). As used in these NT greetings, *eirḗnē* has a far broader meaning than our Eng. "peace." This Greek term was used in the LXX to translate Heb. *šālôm* and thus it took on the meaning of that term. In greetings it generally denotes well-being or salvation (*TDNT*, II, 411-17).

Epistolary greetings are found in the OT, the Apocrypha, and the NT. The Aram. *šᵉlām* (cognate of Heb. *šālôm*) occurs in Ezr. 4:17; 5:7; Dnl. 4:1 (MT 3:31); 6:25 (MT 26). In the Apocrypha *chaírō* is frequent (1 Esd. 6:8; 8:9; 1 Macc. 10:18; etc.). The same form is used in Acts 15:23; 23:26. 3 John closes with "Peace [*eirḗnē*] be to you. The friends greet [*aspázomai*] you" (v. 15). Paul opened most of his letters with the special Christian greeting, "Grace to you and peace from God our Father and the Lord Jesus Christ" (Rom. 1:7; 1 Cor. 1:3; 2 Cor. 1:2; etc.); most of them close with "The grace of the Lord Jesus (Christ) be with you" (1 Cor. 16:23; 2 Cor. 13:14; etc.). He also sent greetings from those who were with him and directed that greetings be given to various persons (Rom. 16:3-23; 1 Cor. 16:19f.; 2 Cor. 13:12f.; Phil. 4:21f.; Col. 4:10-15; etc.). In these cases the word is *aspázomai*.

See also EPISTLE; GOD SPEED; KISS; SALUTATION.

See *TDNT*, II, *s.v.* εἰρήνη (Foerster).

W. L. WALKER

GREYHOUND (Prov. 30:31, AV). *See* COCK.

GRIDDLE [Heb. *maḥᵃḇaṯ*] (Lev. 2:5; 6:21 [MT 14]; 7:9); AV PAN. A thick plate of pottery or metal, used for frying the cereal offering. Cf. the use of *maḥᵃḇaṯ* ("iron plate") in Ezk. 4:3. *See* BREAD IV.

GRIEF; GRIEVE [Heb. *ka'as* (Ps. 6:7 [MT 8]; 31:9 [MT 10]; Prov. 17:25), *ka'aś* (Job 17:7), *tûgâ* (Prov. 14:13; 17:21), *ḥᵒlî* (Isa. 53:3f.), *ḥālâ* (Ps. 77:10 [MT 11]; Isa. 17:11; 53:10; Am. 6:6), *pûqâ* ("cause of grief," 1 S. 25:31), *yāgôn* (Jer. 8:18), hiphil and piel of *yāgâ* (Lam. 3:32f.), *mᵉrîrût* ("bitter grief," Ezk. 21:6 [MT 11]), hiphil of *'āḏaḇ* (1 S. 2:33), hithpael of *'āḇal* (1 S. 15:35; 16:1), *'āṣaḇ* (Gen. 6:6; 1 S. 20:3, 34; 2 S. 19:2 [MT 3]; Neh. 8:10f.; Ps. 78:40; Isa. 54:6; 63:10), *'āgam* (Job 30:25), *'āgēm* (Isa. 19:10); Gk. *lypḗ* (2 Cor. 7:10), *lypéō* (Jn. 21:17; 2 Cor. 7:8f., 11; Eph. 4:30; 1 Thess. 4:13), *syllypéō* (Mk. 3:5)]; AV also SORROW, INFIRMITY, HEAVINESS (Prov. 14:13), MOURN, SORRY, VEX (Isa. 63:10); NEB also SORROW, SUFFERING, BANE, "stumble" (1 S. 25:31), "exasperate" (Prov. 17:25), WOUND, HURT, etc. The RSV supplies "grieved" in Ps. 35:14 (cf. the AV); "grief" in Lam. 2:11 to translate Heb. *lā'āreṣ* (AV lit. "to the ground"; NEB "on the earth"); "cause grief" in 3:51 to translate *'ālal lᵉnepeš* (AV lit. "affect [my] heart"; NEB "torment"); and "grief" in Eccl. 5:17, following the LXX (cf. NEB "gnawing anxiety") *contra* the MT (cf. the AV). The AV takes *'agmê* in Isa. 19:10 to represent the noun *'ᵃgam*, "pond" or "pool"; cf. Ex. 7:19.

The RSV uses "grief" to refer to sorrow, pain, and suffering, which may be physical and/or mental in nature. The Suffering Servant is reported to be "acquainted with grief" and to have "borne our griefs." "Grief" in these expressions literally means "sickness" or "disease" but

may be used here for "suffering" in a more general sense (Isa. 53:3f.; cf. Isa. 17:11; Ps. 77:10). The psalmist who complains that his "eye wastes away because of grief" (6:7) is petitioning Yahweh to deliver him from grave illness which has caused such grief that his eyes are wasting away with weeping. Yet it is improper to draw too sharp a distinction between mental and physical suffering in Hebrew thought, which understood a person as a whole rather than as a composite of body and mind. Physical, mental, and even spiritual suffering are interrelated (Ps. 31:9).

Grief is the opposite or surcease of joy (Prov. 14:13) and may result when one is demoralized, as when Jeremiah pondered the fate of Judah (Jer. 8:18). One may experience grief when one has "pangs of conscience" or when one is annoyed or irritated (Prov. 17:21, 25). In 2 Cor. 7:10 Paul made a distinction between a "godly grief" — a deep sorrow that leads to repentance and opens the eyes to the gift of salvation — and a worldly grief that shrinks from guilt. This "worldly grief" blinds a person to the forgiveness offered in Christ and leads him only to deeper and deeper sorrow and finally to death (cf. P. E. Hughes, comm. on 2nd Corinthians [*NICNT*, 1962], pp. 271-73).

To "grieve" is to be (or cause someone to be) sad, troubled, irritated, distressed, or mournful. It is characteristic of the OT to attribute human emotions to Yahweh. The OT reports that Yahweh was grieved by the rebellion of Israel in the wilderness period (Ps. 78:40; cf. Isa. 63:10). Mankind caused Yahweh so much distress and trouble that He was grieved that He even made them (Gen. 6:6). Israel experienced grief during the Exile, when the prophet said that Yahweh called Israel as a wife "forsaken and grieved in spirit" (Isa. 54:6). Though Yahweh was the cause of the grief Israel experienced during the Exile, He will also have compassion on Israel (Lam. 3:32). Both the OT and the NT speak of grieving the Holy Spirit (Isa. 63:10; Eph. 4:30). To grieve means also to mourn the dead, as Samuel mourned the death of Saul (1 S. 15:35) and as David mourned Absalom (2 S. 19:2; cf. 1 Thess. 4:13). Jesus was grieved and angry at the hardness of heart of those around Him when they disapproved of His healing on the sabbath the man who had a withered hand (Mk. 3:5). Peter was grieved when Jesus asked him for the third time, ". . . do you love me?" (Jn. 21:17).

Bibliography.—*TDNT*, IV, *s.v.* λύπη κτλ.: λύπη, λυπέω (Bultmann); *TDOT*, I, *s.v.* "'abhal" (Baumann). E. W. CONRAD

GRIEVANCE. Occurs in the RSV only in 1 Cor. 6:1, where the Gk. *prágma* (AV "matter"; NEB "dispute") is used in a forensic sense, meaning "lawsuit." This usage is common in the papyri (cf. MM, p. 532). The AV uses it only in Hab. 1:3, for Heb. *'āmāl* (RSV "trouble"; NEB "wrongdoing").

GRIEVOUS [Heb. *ra'*–'evil' (Dt. 6:22; 28:35, 59; Eccl. 2:17), *ḥālâ* (Eccl. 5:13, 16 [MT 12, 15]; Jer. 10:19; 14:17; 30:12; Nah. 3:19), niphal of *māraṣ*–'be sick' (1 K. 2:8; Mic. 2:10), *kāḇēḏ*–'heavy' (Gen. 41:31; 50:11)]; AV also SORE; NEB CRUEL, MALIGNANT, "singular," SEVERE, MORTAL, BITTERLY, "disaster" (Dt. 6:22), "trouble" (Eccl. 2:17). "Grievous" is used of something severe or intense. The word is frequently used to describe physical sickness (e.g., Dt. 28:59) or wounds (e.g., Jer. 30:12), but may be used to describe famines (Gen. 41:31), curses (1 K. 2:8), etc. "Grievously" does not translate a Hebrew term but is a translation device in the RSV for the emphatic use of the infinitive absolute in Ezk. 25:12 (*'āšam*, "be guilty"), and Zec. 12:3 (*śāraṭ*, "make incisions"); in Lam. 1:8 it is the use of the direct object (*ḥēṭ'*) with its cognate verb (*ḥāṭā'*, "sin"; cf. W. Gesenius, E. Kautzsch, and A. E. Cowley, *Hebrew Grammar* [1910], §§ 113o-r, 117). E. W. CONRAD

GRIND [Heb. *ṭāḥan* (Job 31:10; Isa. 47:2; Lam. 5:13), *gāras* (Lam. 3:16); Gk. *brýchō* (Acts 7:54), *trízō* (Mk. 9:18)]; AV also HAS BROKEN (Lam. 3:16); NEB also "be [a] slave" (Job 31:10), HAS BROKEN (Lam. 3:16); **GRINDERS** [Heb. *ṭōḥ^{a}nôṯ*] (Eccl. 12:3); **GRINDING** (part.) [Heb. *ṭāḥan* (Dt. 9:21; Isa. 3:15); Gk. *alḗthō* (Mt. 24:41 par. Lk. 17:35)]; (noun) [Heb. *ṭaḥ^{a}nâ* (Eccl. 12:4), *qôl*–'voice' (Jer. 25:10)]; AV, NEB, also SOUND (Jer. 25:10).

The grinding of flour was usually done at the MILL (Isa. 47:2; cf. Dt. 9:21 for the idea of pulverizing). Normally it was the work of women (Ex. 11:5; Isa. 47:2), though men did it too (Jgs. 16:21; Lam. 5:13). The cessation of grinding at the mill was a sign of desolation or loss of prosperity (Jer. 25:10; cf. Rev. 18:22). The grinders of Eccl. 12:3 are human teeth (Heb. *ṭōḥ^{a}nôṯ*, "grinding ones, molar teeth," KoB, p. 351), which in old age are few in number and no longer capable of fulfilling their task. Likewise, the "sound of . . . grinding" in v. 4 may have expressed the inability to speak (E. W. Hengstenberg, comm. on Ecclesiastes [repr. 1977], pp. 246f.; R. Gordis, *Koheleth – The Man and His World* [3rd ed. 1968], pp. 342f.).

The "grinding of the teeth" may mean a literal grinding in Mk. 9:18 (the result of a seizure), or it may be physical evidence of extreme anger (Acts 7:54; *see* GNASH). "Grinding gravel" in Lam. 3:16 may refer to lack of food, or oppression (parallel to the next line; cf. Isa. 3:15). (In Prov. 20:17 Heb. *ḥāṣaṣ*, "gravel," has a negative connotation too; cf. W. McKane, *Proverbs* [*OTL*, 1970], pp. 539f.; but *see* GRAVEL.) The idea of sexual molesting seems implied in Job 31:10 (paralleling the next line; cf. KoB, p. 351; M. Pope, *Job* [*AB*, 1973], p. 231; but cf. KD *in loc.*), and perhaps in Lam. 5:13. The MT in Lam. 5:13 is *ṭ^{e}ḥôn nāśā'û*, which may be understood as "they lifted up the handmill" (cf. KD *in loc.*), or "they took [young men] to grind" (cf. D. R. Hillers, *Lamentations* [*AB*, 1972], p. 99). The sexual connotation is supported by the Vulg., but does not seem to fit the context.

Our Lord used the scene of two women grinding together at a mill (Mt. 24:41 par. Lk. 17:35) as one example of what will happen when He returns in glory. R. W. V.

GRISLED (Gen. 31:10, 12; Zec. 6:36, AV). *See* DAPPLED.

GROAN [Heb. *'ānaḥ*, *'^{a}nāḥâ*, *'ānaq*, *'^{a}nāqâ*, *nā'aq*, *n^{e}'āqâ*, *šā'ag* (Ps. 38:8 [MT 9]), *š^{e}'āgâ*, *nāham*, *hāgîg* (Ps. 5:1 [MT 2]), *gî(a)ḥ* (Mic. 4:10); Gk. *stenázō* (Rom. 8:23; 2 Cor. 5:2), *stenagmós* (Acts 7:34), *sustenázō* (Rom. 8:22)]; AV also SIGH, MOURN, CRY, "meditation" (Ps. 5:1 [MT 2]), "labour to bring forth" (Mic. 4:10); NEB also SIGH, MOAN, LAMENT, "starve" (Prov. 5:11), "exhaust" (Joel 1:18), "trouble" (Job 23:2), "inmost thoughts" (Ps. 5:1), "labour" (Jer. 45:3). In Lam. 1:4, the NEB adds "and sigh" to "groan," thus conflating the RSV and the AV. In Jer. 22:23 MT *nēḥant* may be from *'ānaḥ*, "groan" (so RSV, NEB; cf. W. Gesenius, E. Kautzsch, A. E. Cowley, *Hebrew Grammar* [1910], p. 80 n. 1); the AV "be gracious" assumes that *ḥnn* is the root, but that root occurs nowhere else in the niphal, whereas *'ānaḥ* always occurs in the niphal (cf. also the LXX *katastenázō*, which elsewhere translates only *'nḥ*).

"Groaning" expresses strong pain or very deep distress in unintelligible sounds. The mortally wounded in battle groan (Jer. 51:52). Job bore his great physical and emotional distress by pouring forth his groaning like water (Job 3:24). The physical suffering resulting from the emotional stress over sinning is expressed in "groaning all day long" (Ps. 32:3; cf. Ezk. 30:24). He who succumbs to a harlot ends his life in groaning as his "flesh and body are consumed" (Prov. 5:11). Beasts that are deprived of food and water groan (Joel 1:18).

The community, like the individual, may groan under strenuous circumstances. One proverb stated: "When the wicked rule, the people groan" (Prov. 29:2). During the bondage in Egypt, which Pharaoh intensified in order to keep the Hebrews under control, the people of Israel groaned (Ex. 2:23). During the period of the judges, whenever a foreign nation oppressed Israel, the people groaned on account of their affliction (Jgs. 2:18). Jerusalem is personified as groaning intensely after it was decimated and the people taken captive (Lam. 1:4, 8, 11, 21f.; cf. Mic. 4:10). God hears the groaning of His people, however, and He intervenes to relieve His people's distress. This truth was uniquely demonstrated through the Exodus (Ex. 2:24; 6:5; Acts 7:34; cf. Ps. 102:20 [MT 21]).

The righteous are not afraid to present their groans before Yahweh. Yahweh opposes the wicked who boast against the upright, and He will come to His people's aid (Ps. 5 1f.). When the righteous see the disintegration of the community on account of its abominations, they groan and weep for its conversion. Yet on the Day of Judgment only they are delivered (Ezk. 9:4; cf. 14:16, 18, 20).

In the NT groaning occurs on three levels: nature desiring to be restored, the believer desiring to leave the burdens and limitations of the present body for the new resurrection body, and the Christian earnestly praying in the Spirit to God, troubled beyond words over the sin and corruption of this present world (Rom. 8:22f., 26; 2 Cor. 5:2, 4).

The use of "groan" in Jn. 11:33, 38 (AV; RSV "was deeply moved") is variously understood. When Jesus was confronted by Mary and the weeping crowds at Lazarus's death, He was deeply moved in His innermost being (His spirit). The Greek verb *embrimáomai* means with animals "snort in rage" and with people "be indignant." (In Mk. 1:43, the RSV renders it "charge sternly.") Commentators disagree whether Jesus was angry, or full of grief, or deeply distressed. No doubt Jesus' deep emotions here are complex, but this word probably denotes at least a strong element of anger — anger at death itself which Jesus was about to battle in His own death, and anger at the inadequate manner of coping with death in the surrounding crowds. Jesus' whole being was involved in His redemptive mission, especially His miracles, for they expressed the creative power of the new order overcoming the old, cursed order (Mt. 8:16f.). The greatest enemy of the old order is death. Thus in His inner preparation to overcome it by raising Lazarus Jesus was very deeply troubled.

Bibliography.–R. Brown, *John I-XII* (*AB*, 1966); L. Morris, *John* (*NICNT*, 1971); B. F. Westcott, *John* (1924); *TDNT*, VII, *s.v.* στενάζω κτλ. (Schneider). J. E. HARTLEY

GROSS. Used once by the RSV to translate Heb. *ṭāpaš* ("be insensitive") in Ps. 119:70, "their heart is gross like fat" (AV "fat as grease"; NEB "thick and gross"). The AV twice uses "wax gross" (RSV "grow dull"; NEB "become gross") of the heart in translating Gk. *pachýnō*, 'make fat" (Mt. 13:15; Acts 28:27). *See* DULLNESS (OF HEART); FAT.

GROUND [Heb. *'ᵃḏāmâ*, *'ereṣ*, *yabbāšâ* ("dry ground," Ex. 4:9; Josh. 4:22), *māqôm*, *mîšôr*–'plain' ("level ground," e.g., Ps. 26:12), *nîr* ("fallow ground," Prov. 13:23; Jer. 4:3; Hos. 10:12), *'āpār*–'dust, ground,' *'āqōḇ* ("uneven ground," Isa. 40:4), *pāneh*–'face' (Prov. 24:31), *ṣāmā'* ("parched ground," Jer. 48:18), *ṣîyâ* ("desolate ground," Job 30:3), *ṣimmā'ôn* ("thirsty ground," cf. Ps. 107:33), *šāḏeh*; Gk. *gḗ*, *chamaí* ("on the ground," Jn. 9:6; 18:6), *édaphos*–'ground' (Acts 22 7), *edaphízō* ("dash . . . to the ground," Lk. 19:44), *petrṓdēs* ("rocky ground," Mt. 13:5, 20 par. Mk. 4:5, 16)]; AV also LAND, EARTH, DUST, FACE (Prov. 24:31), etc.; NEB also LAND, SOIL, COUNTRY, FIELD, DOWNWARDS, BATTLEFIELD (Ps. 83:10 [MT 11]), etc.

I. Terminology and Use.–The RSV renders the Heb. *ḥᵃrōš ḥᵃrîšô*, "plow his plowing," as "plow his ground" (1 S. 8:12). Although the text of Job 30:3 is corrupt (cf. *BH* and comms.), the meaning of Heb. *ṣîyâ*, "desolate ground," is clear (AV "wilderness"; NEB "desert"). Though the RSV's translation "punishment" (following the emendation to *mûsārōh*, "chastening"; cf. KoB, p. 503; *BH*; cf. also NEB "chastisement") is appropriate in Isa. 30:32, the AV's rendering "grounded (staff)" (following MT *mûsāḏâ*, "foundation") could be retained when understood as "(rod of) decree" (KD *in loc.*) or "appointment" (E. J. Young, comm. on Isaiah [1969], II, 368; he also points out that 1QIsa[a] agrees with the MT).

The most frequently used OT words for "ground" are Heb. *'ᵃḏāmâ* and *'ereṣ*. *'ᵃḏāmâ* often means the cultivated land, property, or a region, but it can also mean simply dirt or humus (cf. *TDOT*, I 90-94). Thus *'ᵃḏāmâ* usually refers to a particular piece or area of ground and less often to the world or earth as a whole (cf. Stadelmann, pp. 128f.). On the other hand, *'ereṣ* usually expresses "ground" in general, i.e., the land, the earth, etc. Thus it is a contrast to heaven, the sea, and the underworld (*TDOT*, I, 393, 399f.; note, however, that it can also refer to the underworld [cf. Stadelmann, pp. 167f., 170-73; *TDOT*, I, 399f.], like its Ugaritic and Akkadian cognates), and is never used, e.g., for a handful of dirt. The most common NT word is Gk. *gḗ*, which combines the meaning of *'ᵃḏāmâ* and *'ereṣ* (Bauer, rev., p. 157).

"Ground" occurs often in a variety of expressions in the OT. (1) To bow (with one's face) to the ground indicates respect (e.g., Gen. 42:6; 1 S. 28:14; 2 S. 1:2; 1 Ch. 21:21) or an act of worship (Neh. 8:6; Job 1:20; Dnl. 10:9). (*See also* GESTURE IV.) (2) One sits "on the ground" to lament (Jer. 14:2; Lam. 2:10; Ezk. 26:16), possibly because of the association of burial with a grave in the ground (for the significance of grave *see* BURIAL I). To sit on the ground can also signify humiliation (e.g., Isa. 47:1; cf. Ps. 89:44 [MT 45]) or sharing in human misery (Job 2:13). (3) To "clear the ground" signifies taking possession (Josh. 17:15) or preparing for cultivation (Ps. 80:9 [MT 10]). (4) To "smite," "strike," "level" (Jer. 51:58), etc., to the ground means to beat severely, kill, or destroy. In 2 K. 13:18f. Elisha tells Joash to strike arrows on the ground three times in order to symbolize the future war with Syria (cf. J. Gray, *I & II Kings* [*OTL*, rev. ed. 1972], pp. 599f.). (5) Words not "fallen to the ground" (1 S. 3:19; 2 K. 10:10) are apparently prophecies that have been fulfilled; the truth "cast to the ground" points at truth trampled down and disregarded (Dnl. 8:12). (6) To "give one's ground" to someone else (lit. "give the place," *nāṯan māqôm*, Jgs. 20:36) shows that one is yielding. (7) In the sense of "reason" or "cause" one may have "ground" for complaint (Dnl. 6:4f. [MT 5f.], Aram. *'illâ* [cf. Syr. *'eltā'*; postbiblical Heb. and Aram. *'îlâ*]; cf. "ground for boasting," 1 Cor. 9:15f., Gk. *kaúchēmá*). (8) "On ground of" in the sense of "because

of" renders Heb. *'al* in Dnl. 9:18 (cf. KoB, p. 704) (cf. Gk. *diá, ek, hóti* in Rom. 3:30; 1 Cor. 10:25-27; 1 Tim. 6:2).

The NT does not have some of these expressions, and others are less frequent. The expression "fall on the ground" in prayer occurs only in Mk. 14:35, and "dash . . . to the ground" in the sense of severe beating only in Lk. 19:44. To "sit on the ground" does not carry any negative connotations (Mt. 15:35; Mk. 8:6). Divine providence is expressed with "not one of [your] hairs will fall to the ground" (Mt. 10:29, quoting 1 S. 14:45; cf. 2 S. 14:11). Jesus' writing with His finger on the ground (Jn. 8:6, 8) is enigmatic (cf. comms., esp. R. E. Brown, I [*AB*, 1966], 333f.).

II. Theology of the Earth.–When God created the universe, he created human beings (Gen. 2:7), trees (v. 9), and animals (v. 19) from the ground. Subsequently, He cared for the ground (v. 6). All this intimates that human beings are tied to the ground and continue to be dependent on it for sustenance (cf. v. 15). It also indicates that the physical aspect of creation is not in opposition to the spiritual aspect nor an expression of evil and sin. (*See* DUST.)

Sin did, however, enter into the human heart and, according to Gen. 3, the ground is cursed because of the fall. The ground will now produce "thorns and thistles" and turn work into labor. It will also be linked with death — we must return to it (3:17-19). In ch. 4 the soil "drinks" the shed blood of Abel, and Cain is no longer able to "till" the ground.

But God promised to bless the land with an abundance of crops (e.g., Dt. 7:12f.; 26:2; 28:1-14), in response to which the Israelites were to render the firstfruits of their increase to their Maker (Ex. 23:19; 34:26; cf. Neh. 10:35). Israel's frequent religious and cultic lapses affected God's dealings with His people: He not only threatened that locusts would consume the harvest (Dt. 28:15, 42; Jer. 7:20), but also sent them (Amos. 7:1). At times the nations became so deeply involved in licentious adultery that the ground "vomited" them out; the same could happen to Israel if it disobeyed the Lord (Lev. 18:24-28). To the prophets the curse of the land was frightfully real (Isa. 24:5-13).

Although Israel refused to be faithful to its Protector, God remained faithful and renewed the ground (Ps. 104:30). Even human work loses part of the curse of labor (Gen. 5:29; 8:21). The prophets looked for a time of abundance of rain and fruition (Isa. 30:23f.; Ezk. 36:33-36; Zec. 8:12). The final restoration of all things in the NT includes the ground. In Rev. 22 the curse is completely lifted from the ground, and nature will again yield its increase as before the fall.

III. Metaphors.–The ground can "open its mouth" (Gen. 4:11; Nu. 16:30), "mourn" (Joel 1:10), "be dismayed" (Jer. 14:4), or "thirsty" (cf. Ps. 107:33; cf. Isa. 44:3 for the symbol of "abundant water"). Faithfulness can spring up out of the ground (Ps. 85:11 [MT 12]). The "face of the earth" (AV) is rendered the "face of the ground" by the RSV. The heart is pictured as soil, which must be broken up, i.e., surrendered to God in true repentance (Jer. 4:3). In the parable of the sower, the various kinds of ground signify the various responses to the word of God sown in the human heart (Mt. 13:3-8 par. Mk. 4:3-20). In Eph. 3:17 love is compared to a foundation ("rooted and grounded in love") through which believers may comprehend the scope of divine love. The Suffering Servant "grew up" as a root "out of dry ground" (Isa. 53:2), i.e., among miserable circumstances and corruption (KD *in loc.*).

On "holy ground" (Ex. 3:5; Acts 7:33) *see* HOLY, HOLINESS.

J. E. HARTLEY R. W. V.

GROUPINGS [Heb. *pᵉluggâ*] (2 Ch. 35:5); [*miplaggâ*] (2 Ch. 35:12); AV DIVISIONS; NEB GROUPS. Both terms are based on the verb *pālag*, "divide." They refer to divisions of priests (v. 5) and of laymen (v. 12), according to the families who traced their lineage from a common forefather. *See also* CLAN.

GROUPS [Gk. *prasiá*] (Mk. 6:40); AV RANKS; NEB ROWS. Literally a garden plot (cf. Sir. 24:31). The term *prasiá* is repeated in Mk. 6:40 (*prasiaí prasiaí*) and therefore carries with it a distributive effect (cf. repetition in Mk. 6:7, 39). The groups consisting of hundreds and fifties looked like garden plots distributed throughout and contrasting with the green grass (v. 39).

GROVE (Gen. 21:33; Ex. 34:13, AV). *See* ASHERAH; TAMARISK.

GRUDGE [Heb. *nāṭar*] ("bear a grudge," Lev. 19:18); NEB CHERISH ANGER; [hiphil of *rʿʿ* + *'ayin*–'eye'] (Dt. 28:54, 56); AV "eye shall be evil"; NEB "will not share"; [Gk. *enéchō*] ("have a grudge," Mk. 6:19); AV HAVE A QUARREL; NEB NURSE A GRUDGE; **GRUDGING** [qal of Heb. *rʿʿ*–'look with displeasure at'] (Dt. 15:10); AV "be grieved." In the RSV "grudge" occurs as a verb only in Dt. 28:54, 56, where it means to do or give something unwillingly (*see* EVIL EYE). In earlier versions it was used frequently as a verb with the obsolete meaning of "murmur" or "grumble," e.g., Wyclif has in Lk. 15:2, "The farisies and scribis grucchiden seiyenge. . . ." The AV employs it in this sense in Ps. 59:15 (MT 16) and Jas. 5:9.

"Grudge" occurs twice as a noun in the RSV in the phrase "bear a grudge" or "have a grudge" (Lev. 19:18; Mk. 6:19). In each case the verb translated has reference to the nursing of feelings of ill will and resentment. According to Dt. 15:10 the creditors were to loan freely to the poor even when the year of release was near, without any grudge (P. C. Craigie, comm. on Deuteronomy [*NICOT*, 1976], p. 237).

GRUMBLE. *See* MURMUR.

GUARANTEE. The Greek term *arrabṓn* occurs three times in the NT (2 Cor. 1:22; 5:5; Eph. 1:14), translated in each case by "guarantee" in the RSV, "earnest" in the AV, and "pledge" in the NEB. It has an equivalent in Heb. *ʿērāḇôn* (Gen. 38:17f., 20), in Lat. *arrabo*, in French *arrhes*, and in Old English *arles*. The term is mercantile and comes originally from the Phoenicians. Its general meaning is that of a pledge or token given as the assurance of the fulfillment of a bargain or promise. It also carries with it the idea of forfeit, such as is now common in land deals, only from the obverse side. In other words, the one promising to convey property, wages, or blessing, binds the promise with an advance gift or pledge partaking of the quality of the benefit to be bestowed. If the agreement is about wages, then a part of the wages is advanced; if it is about land, then a clod given to the purchaser or beneficiary may stand as the pledge of final and complete conveyance of the property.

In the spiritual sense, as used in the passages above named, the reference is to the work of the Spirit of God in our hearts being a token and pledge of a perfect redemption and a heavenly inheritance. There is more than

the idea of security in the word as used, for it clearly implies the continuity and identity of the blessing.

See also PLEDGE. C. E. SCHENK

GUARD (vb.) [Heb. *šāmar* (Gen. 3:24; Ex. 23:20; 1 S. 2:9; etc.), *nāṣar* (Prov. 2:11; 4:6, 13; 5:2; etc.), *šāqaḏ* (Ezr. 8:29); Gk. *phylássō, diaphylássō* (Lk. 4:10), *phrouréō* (2 Cor. 11:32; 1 Pet. 1:5), *tēréō* (Acts 12:6)]; AV also KEEP, "keep the watch," WATCH (Ezr. 8:29), "keep the ward" (Neh. 12:25), PRESERVE (Ps. 12:7 [MT 8]), WAIT (Prov. 27:18), "keep bound" (Lk. 8:29); NEB also "be on duty," "be on guard," WATCH, PROTECT, DEFEND, "keep safe," KEEP, etc.; (noun) [Heb. part. of *rûṣ, ṭabbāḥîm, maṭṭārâ, mišmār, šomrâ* (Ps. 141:3), *miṣṣāḇâ* (Zec. 9:8); Aram. *ṭabbāḥayyā'* (Dnl. 2:14); Gk. *koustōdía, hypērétēs, spekoulátor* (Mk. 6:27), *phylakḗ* (Acts 12:10), part. of *tēréō* (Mt. 28:4)]; AV also WATCH, WARD, PRISON, FOOTMAN (1 S. 22:17), ARMY (Zec. 9:8), SERVANT, KEEPER (Mt. 28:4), OFFICER (Mt. 5:25), EXECUTIONER (Mk. 6:27); NEB also BODYGUARD, ESCORT, OUTRUNNER, GUARDHOUSE, WATCH, GARRISON (Zec. 9:8), ATTENDANT (Mt. 26:58; Mk. 14:54), CONSTABLE (Mt. 5:25), GUARD-POST (Acts 12:10), "High Priest's men" (Mk. 14:65); **REAR GUARD** [Heb. *'āsap*–'gather' (Josh. 6:9, 13; Isa. 52:12; 58:8), *'āqēḇ* (Josh. 8:13)]; AV also REREWARD, LIERS IN WAIT (Josh. 8:13).

The verb means to protect, defend, watch (Eccl. 5:1). It occurs frequently in both the OT and the NT in the sense of guarding prisoners or captives (Josh. 10:18; Acts 12:4; 23:35; etc.). The word also means to protect someone or something from danger (1 S. 25:21; Neh. 4:22). God Himself guards His people (1 S. 2:9; Ps. 104:4; Jn. 17:12; 1 Pet. 1:5) or sends an angel to guard them (Ex. 23:20; Ps. 91:11; Lk. 4:10). When the psalmist said that he would guard his ways in order that he would not sin (Ps. 39:1 [MT 2]), he meant that he would restrain himself or keep himself within bounds. In wisdom literature the expression "guard one's mouth" means to be prudent of speech (Prov. 5:2; Ps. 141:3; cf. Mic. 7:5). In Prov. 2:11; 4:6 "understanding will guard" a person; conversely one should guard instruction (Prov. 4:13) and knowledge (1 Tim. 6:20; 2 Tim. 1:14).

The noun "guard" refers to an individual or a group of men who are responsible for guarding a person or a place; also to a place of confinement, a prison.

Ṭabbāḥîm is used for the special bodyguard of both the Egyptian pharaoh (Gen. 37:6; 39:1; 40:3f.; 2 K. 25:8-20) and the Babylonian king (Jer. 39:9–52:30; Dnl. 2:14). It occurs only in the phrase "captain of the guard." The literal or original meaning of the Hebrew term is "butchers" or "cooks," but it lost this meaning. The reason the royal bodyguard possessed this title is not known. An oriental monarch's bodyguard consisted of picked men attached to his person and ready to fulfil his pleasure in important and confidential concerns.

The royal guard or escort of the Israelite king, however, is designated by the term *rāṣîm* (lit. "runners"). These men acted as royal messengers or couriers from the time of Saul onward (2 K. 10:25; 11:6); and this designation connects them with the couriers of the kings of Persia (Est. 3:13, 15; 8:14).

The men of the royal bodyguard were usually foreigners like the janissaries of oriental monarchs down to modern times, who preferred to have around themselves warriors uninfluenced by family connection with the people of the land. Ramses II had such a bodyguard whose commanders ranked with the great officers of the crown. David's bodyguard of six hundred, known also as the *gibbōrîm* or "mighty men," consisted of Cherethites, Pelethites, and Gittites (2 S. 15:18; 20:23), and we read of Carites (2 K. 11:19), who may have been Carians or Cretans, as forming part of the guard at the coronation of King Jehoash.

It was the responsibility of these officers to guard the palace and the guardroom which housed the royal treasures (1 K. 14:27f.). That this guard had duties in connection with the temple as well as the king's house seems clear. They accompanied King Rehoboam when he visited the temple (v. 28). Jehoiada employed their captains to put Athaliah to death and to exterminate the worshipers of Baal who had fled to the temple precincts (2 K. 11:4-19); the temple gate leading to the palace was called "the gate of the guards" (v. 19). For this occasion, at least, the royal bodyguards were the temple guards. The temple in Ezekiel's vision apparently had guardrooms (*see* GUARDROOM).

Mišmār literally means "prison." Only in late OT writings did it come to mean one who guards or keeps watch (1 Ch. 9:23; Neh. 4:22f. [MT 16f.]; 7:3).

A prison is denoted by the word *maṭṭārâ* and with this sense it always occurs in one of two phrases: (1) *ḥ^{a}ṣar hammaṭṭārâ* ("court of the guard"; cf. Jer. 32:2, 8, 12; 33:7; 37:21; 38:6, 13, 28; 39:14f.; Neh. 3:25; 12:39), referring to a place in the palace complex for detaining prisoners. It was here that Jeremiah was held prisoner in the closing days of Judah's existence. Jeremiah apparently had enough freedom to continue to prophesy and even to purchase a field from his cousin at Anathoth (Jer. 32:6-25). (2) *Ša'ar hammaṭṭārâ* ("gate of the guard," Neh. 12:39). The location of this gate is disputed. It may have been either a gate of the palace compound or one of the city gates.

In the NT *koustōdía* is used for the guard assigned to watch over Jesus' grave (Mt. 27:65f.; 28:11). A Latin loanword, it probably refers to soldiers of the Roman army, although they may have been Jewish. *Spekoulátōr* (Mk. 6:27) is also a Latin loanword (<*speculari*, "look, watch"), which could mean "executioner" (AV), but here refers to the bodyguard of Herod Antipas. *Hypērétēs* in Mt. 5:25; 26:58; Mk. 14:54, 65 refers to the servants of a court. According to Mk. 14:44 Judas instructed the crowd to lead Jesus to trial as a prisoner ("under guard"; cf. JB "well guarded"); the AV and NEB convey more the idea of protection, which may be closer to the meaning of Gk. *asphalṓs* ("securely," MM, p. 88).

T. NICOL E. W. CONRAD

GUARDIAN [Heb. *'ōmēn*] (2 K. 10:1, 5); AV "them that brought up," "bringers up"; NEB TUTOR; [*sōḵēḵ*] (Ezk. 28:14, 16); AV "that covereth," "covering"; [Gk. *epískopos*] (Acts 20:28; 1 Pet. 2:25); AV OVERSEER, BISHOP; NEB also "give charge"; [*epítropos*] (Gal. 4:2; 2 Macc. 11:1; 13:2; 14:2); AV TUTOR, PROTECTOR (Apoc.).

In the OT, Heb. *'ōmēn* (part. of the vb. *'āman*, "be faithful," "be entrusted with"; cf. Nu. 12:7) denotes one who was put in charge of training the children (*see* NURSE; cf. *TDOT*, I, 294). *Sōḵēḵ* is a participle of *sāḵaḵ*, "cover," "block off" (in order to protect). The AV follows the MT in Ezk. 28:14, 16, taking the king of Tyre to be the guardian cherub. The RSV and NEB (following the LXX and Syriac) read *'eṯ*, "with," instead of *'aṯ*, "you," in v. 14; and in v. 16 they read the consonants *w'bdk* as *w^{e}'ibbaḏkā*, "and he drove you out," rather than *wā'abbeḏkā*, "and I will destroy you." (Cf. *IB*, VI, 221.) The RSV and NEB readings have been adopted by most expositors. The function of the guardian cherub seems to parallel that of the CHERUBIM placed in the garden of Eden (cf. Gen. 3:24).

In the NT "guardian" is used twice by the RSV to render *epískipos*, a cognate of the verbs *episképtomai*,

"look at, examine, inspect," and *episkopéō*, "look at, care for, watch over, oversee" (Bauer, rev., pp. 298f.). The LXX uses *epískopos* with reference to God as the one who sees all things, even what is hidden in the heart (cf. Wisd. 1:6), and in reference to men who are appointed as overseers (cf. Neh. 11:9, 14, 22). The term is frequently associated with the idea of shepherding (*poimaínō*), thus denoting "one who keeps watch over the flock" (*TDNT*, II, 615). It has this sense in both Acts 20:28, which refers to elders as guardians of "the flock," and 1 Pet. 2:25, which speaks of Christ as the "Shepherd and Guardian of your souls" (cf. 1 Pet. 5:2-4). While the term *epískopos* soon came to be used for "bishop" (cf. 1 Pet. 2:25, AV; *see* BISHOP) as the highest ecclesiastical office, this is not the case in these two passages. Peter uses the term to emphasize Jesus' intimate knowledge of the souls over which He is watching. In Acts 20:28 Paul is speaking to the Ephesian elders (*presbýteroi*); thus *presbýteros* and *epískopos* are used of the same people, *presbýteros* referring to the office and *epískopos* to an aspect of the elder's responsibility.

Epítropos is a common Greek term for one to whom is entrusted the entire care of a minor. Such was the responsibility of Lysias to the youthful Antiochus Eupator (cf. 1 Macc. 3:32f.; 6:15-17). Paul used the guardian as a figure for the law (Gal. 4:2) in order to make the point that those who through Christ have been adopted as children of God have reached maturity, and therefore are no longer under the supervision of the law (cf. 3:24; *see also* CUSTODIAN).

See *TDNT*, II, *s.v.* ἐπισκέπτομαι κτλ.: ἐπισκέπτομαι, ἐπισκοπέω, ἐπίσκοπος (Beyer). N. J. O.

GUARDROOM [Heb. *tā' hārāṣîm*–'room of the runners'] (1 K. 14:28 par. 2 Ch. 12:11); AV GUARD CHAMBER. Rooms in Solomon's temple where the golden shields and other treasures were stored. The "side rooms" (Ezk. 40:7-36, Heb. *tā'*) in Ezekiel's vision of the temple may have been in the same location or have served a similar function.

GUDGODAH gud-gō'də [Heb. *guḏgōḏâ*]. A place of encampment in the wilderness journeyings, listed between Moserah, where Aaron died, and Jotbatah (Dt. 10:7). It is called HOR-HAGGIDGAD in Nu. 33:32f. In the LXX the name occurs as *Gadgad* in both passages. W. S. L. S.

GUEST. In the OT "guest" generally translates some form of the Hebrew verb *qārā'*, literally "call." The noun *gēr*, "sojourner," and verb *gûr*, "stay as a *gēr*," are used of one who leaves his own tribe or village and lives elsewhere as an alien (cf. *TDOT*, II, *s.v.* "gûr" [D. Kellermann]). The usual words in the NT are Gk. *anakeímenos*, "one reclining at table" (Mt. 22:10f.; Mk. 6:26), and the cognate *synanakeímenos*, "one reclining at table with" (Mt. 14:9; Mk. 6:22). All three Synoptists recorded the saying of Jesus, "Can the wedding guests [*hoi huioí toú nymphōnos*; AV lit. "children of the bridechamber"] fast [or mourn] while the bridegroom is with them?" In Acts 10:23 the word translated is *xenízo*, "receive as a guest."

Oriental customs growing out of a nomadic life demand a greater abandon and freedom with respect to the relation of host and guest than are permitted by the conventionalities of Western life. A householder is expected to entertain a traveler, and in turn the traveler may accept with perfect ease the hospitality shown without any obligation to pay. (*See* ENTERTAIN.) The significance of the Hebrew word is that of one who is called or invited. A certain sacredness, unknown to modern Western society, was attached to the guest, so that a special apartment was set aside for the guests. (*See* GUEST ROOM.)

The relation between host and guest is strikingly illustrated by the attitudes of Jesus on various occasions. Notable among these are the hospitality of Matthew (Lk. 5:29-32), Jesus' relation to Martha and Mary (10:38), and His entrance into the home of Zacchaeus (Lk. 19:1-10). Likewise, Jesus spoke frequently of the relation that should exist between the guest and his host (see Lk. 7:44-46; Mt. 25:35). W. G. CLIPPINGER

GUEST ROOM [Gk. *katályma*] (Mk. 14:14; Lk. 22:11); AV GUEST-CHAMBER; NEB ROOM; [*xenía*] (Philem. 22); AV LODGING; NEB ROOM. The Gk. *katályma* is derived from *katalýō*, "slacken, loosen," referring to the ropes of the beasts of burden, and hence "rest, find lodging." While in Mk. 14:14 it alludes to the room borrowed for the Last Supper, the normal usage was in connection with a single room in which travelers could stay overnight. In classical literature *xenía* meant "hospitality, entertainment," but in Philem. 22 it is used by metonymy of the place of entertainment itself. *See also* ENTERTAIN.

GUIDANCE [Heb. *taḥbulôṯ*] (Job 37:12; Prov. 11:14; "wise guidance," 20:18; 24:6); AV COUNSEL(S), WISE COUNSEL (Prov. 24:6), GOOD ADVICE (Prov. 20:18); NEB "guiding hand" (Job 37:12), "skilful strategy"; [*dāraš*] ("seek guidance," 1 Ch. 10:13f.); AV ENQUIRE. *Taḥbulôṯ* comes from *ḥeḇel*, "rope," "measuring line," and seems originally to have been a nautical term for "steering" or "guiding" a ship. It occurs only in Proverbs and Job, where it is used in the general sense of "steering, skilful direction" (KoB, p. 1025). *Dāraš* is a common word for "seek, inquire."

See also COUNSEL; SKILL.

GUIDE (vb.) [Heb. *nāḥâ* (Job 31:18; 38:32; Ps. 67:4 [MT 5]; 73:24; 78:72; Prov. 11:3; Isa. 58:11), *nāhal* (Ex. 15:13; Ps. 31:3 [MT 4]; Isa. 49:10; 51:18), *nāhag* (Ps. 78:52), *dāraḵ* (Isa. 42:16); Gk. *hodēgéō* (Jn. 16:13; Acts 8:31; Rev. 7:17), *metágō* (Jas. 3:3f.), *kateuthýnō* (Lk. 1:79)]; AV also LEAD, GOVERN, ACQUAINT (Eccl. 2:3), TURN ABOUT (Jas. 3:3f.); NEB also TAKE (Isa. 49:10), DIRECT, "give the clue" (Acts 8:31); (noun) [Heb. *nāhag* (Ps. 48:14 [MT 15]); Gk. *hodēgós* (Mt. 15:14; 23:16, 24; Acts 1:16; Rom. 2:19), *paidagōgós* (1 Cor. 4:15)]; AV also LEADER, INSTRUCTOR; NEB also TUTOR.

The word often occurs with Yahweh as the one who guides His people (Ps. 48:14; Ex. 15:13). The root *nhl* literally means to lead or guide to a watering place and to give rest there; thus the imagery is that of a shepherd guiding or leading his flock (Isa. 49:10; Ps. 78:52). Such imagery is appropriate for Yahweh, who will guide His people from exile (Isa. 49:10). In Rev. 17:7 the paradoxical picture is presented of the Lamb who, as a shepherd, will lead God's people to springs of living water.

People also guide or conduct, as Job guided the life of an orphan from birth (Job 31:18); and in the Benedictus it is said that John the Baptist will "guide our feet into the way of peace" (Lk. 1:79). The Ethiopian eunuch who was reading the prophet Isaiah needed to be guided so that he might understand (Acts 8:31).

In Acts 1:16 Judas is described as the one "who was guide to those who arrested Jesus," and in Mt. 15:14 and 23:16, 24 the scribes and Pharisees are described as "blind guides." The *paidagōgós* (lit. "boy-leader") was the slave who cared for a child when he was not in school. Paul used this word (1 Cor. 4:15) for other teachers in

the church, they are related to the Corinthians as a *paidagōgós*, while Paul considered himself to be more intimately related to them as a father (cf. F. W. Grosheide, comm. on 1st Corinthians [*NICNT*, 1960], p. 112).

E. W. CONRAD

GUIDEPOSTS [Heb. *tamrûrîm*] (Jer. 31:21); AV HIGH HEAPS; NEB SIGN-POSTS. The Hebrew word is synonymous in the parallel structure of the verse with WAYMARK. Perhaps the object was formed of a heap of stones (cf. *tîmārâ*, Joel 2:30 [MT 3:3]; "column," Cant. 3:6; *tōmer*, "scarecrow," Jer. 10:5). Jeremiah may be using the term in a figurative sense; i.e., he may be telling the Israelites to note the mistakes that had led them into captivity in order that they will know the way to restoration and not repeat their past mistakes.

GUILE [Heb. *mirmâ*] (Gen. 27:35); AV SUBTILTY; NEB TREACHEROUSLY; [*šeqer*] (Ps. 119:78); AV PERVERSELY; NEB LIES; [*maššā'ôn*] (Prov. 26:26); AV DECEIT; NEB DISSIMULATION; [Gk. *dólos*] (Jn. 1:47; 2 Cor. 12:16; 1 Thess. 2:3; 1 Pet. 2:1, 22; 3:10); NEB FALSE, TRICK, DECEIVE, DECEIT, FALSEHOOD; **GUILELESS** [Gk. *akéraios*] (Rom. 16:19); AV SIMPLE; NEB SIMPLETONS. The basic meaning of each of the Hebrew and Greek terms is that of deceit, fraud, or dissimulation. Heb. *mirmâ* is frequently used for deceptive balances (Hos. 12:7 [MT 8]; Am. 8:5), but most often for treacherous or crafty speech in general (cf. Gen. 34:13; Ps. 17:1; 52:4 [MT 6]). Heb. *šeqer* often occurs in connection with the practice of fraud (Hos. 7:1; Jer. 6:13; 2 S. 18:13), a false oath (Zec. 8:17; Jer. 5:2), and false prophecy (Jer. 14:14; 23:25f.). Gk. *dolóō*, the verb form of *dólos*, was sometimes used for the deceit involved in the adulteration of wine (Bauer, rev., p. 203).

Guile is regularly understood as a particularly reprehensible sin. It is the godless, according to Ps. 119:78, who use guile to conceal their true intent (Prov. 26:26). In Gen. 27:35 Isaac relates the bitter news to Esau that his brother has come with guile and fraudulently taken his blessing. Significantly, the same Hebrew word used for the guile of Jacob is used in the "Suffering Servant" passage in Isa. 53:9, "there was no deceit [*mirmâ*] in his mouth." The biblical demand for truthfulness and honesty carries with it the implication that all fraudulent behavior is to be condemned and that the true representative of Israel (Isa. 53:10) should be without deceit.

In the NT the same judgment on guile is to be found. To be "without guile" is the ideal, as the reference to Nathanael indicates (Jn. 1:47). Part of the apostle Paul's defense of his own work was the claim that it had been without guile. In Paul's day it was inevitable that some might compare him to the wandering orators who went from city to city, many of whom were charlatans and deceived their hearers (cf. Dio Chrysostom *Orations* 32). Such comparisons probably evoked Paul's statement in 1 Thess. 2:3 that his appeal had not been made with guile. Paul found it necessary in 2 Cor. 12:16 to defend himself against opponents who had claimed that he was "crafty" and had deceived the church. Similar charges seem to lie behind Paul's defense in 2 Cor. 4:2, where he used the verb *dolóō* to say that he had not "tamper[ed] with" (or "adulterated") the Word of God (cf. 7:2). Whereas Paul insisted that his work had been without guile (2 Cor. 12:16), he charged that his opponents had used "cunning" (*panourgía*) to lead the church astray (2 Cor. 11:3).

In NT ethical teaching, guile is considered a reprehensible sin that is to be put away by every Christian. In Mk. 7:22; Rom. 1:29, *dólos* (RSV "deceit") is mentioned in lists of sins. In 1 Pet. 2:1; 3:10, the community is encouraged to put away guile. The basis of this exhortation is, as 1 Pet. 2:22 indicates, christological. Jesus, as the Suffering Servant of Isa. 53:9, was without guile; consequently the community, which follows "in his steps" (1 Pet. 2:21), is also to live without guile (Rom. 16:19).

J. W. THOMPSON

GUILT; GUILTY [Heb. *'āšam, 'āšēm, 'āšām, 'āšmâ*]; AV also TRESPASS, SIN, OFFEND, OFFENCE, DESTROY, "be desolate" (Isa. 24:6), "become desolate" (Hos. 13:16 [MT 14:1]), ACKNOWLEDGE THEIR OFFENCE (Hos. 5:15); NEB PAY, PUNISH, DISMAY, LIABLE TO RETRIBUTION, OFFENCE, WICKEDNESS, TRANSGRESSION, BRING RUIN, "become desolate" (Hos. 13:16 [MT 14:1]), IN HORROR (5:15), "stand aghast" (Isa. 24:6); [Heb. *'āwōn*]; NEB also SIN, INIQUITY, OFFENCE, WRONG, WRONGDOING, WILFUL SIN, WICKEDNESS, EVIL DEEDS, PENALTY, BLAMES, BEHAVED DISGRACEFULLY (2 S. 19:19 [MT 20]); [Heb. *nāqâ*]; AV also ACQUIT (THE WICKED) (Nah. 1:3); NEB also CLEAR THE GUILTY (Nah. 1:3); [Heb. *rāšā'*]; AV also WICKED, WORTHY TO BE BEATEN; [Heb. *rā'â*]; [Heb. *dāmîm*]; AV "blood," "innocent blood," "bloody house"; NEB BLOOD-GUILT; [Gk. *énochos*]; AV also "in danger" (Mk. 3:29); [Gk. *hamartía*]; AV SIN; [Gk. *aítios*]; AV FAULT; NEB SUPPORT YOUR CHARGES (Lk. 23:14).

Guilt is both the legal and moral condition that results from breaking God's law. A number of terms are used in the Bible to communicate this concept. Most of these, however, tend to include the concepts of sin and punishment (cf. *TDNT*, I, 279f., 297f.; *see* SIN V). Newer translations have sought to express the nuances reflected in modern English usage. Consequently "guilt" is used much more frequently in the RSV and the NEB.

I. In the OT.–One of the most frequent Hebrew roots connected with guilt is *'šm*, which as a verb means "commit an offense" (e.g., 2 Ch. 19:10: "... you shall warn them to commit no offence against the Lord ..." [NEB]). An extension of this meaning is "be guilty" (e.g., Lev. 5:3f.). Here someone commits the offense unwittingly, but when he knows of it, then he shall be guilty. Very closely related to this is the idea of being held guilty for something: "Do not slander a servant to his master, lest he curse you, and you be held guilty" (Prov. 30:10). In other cases the idea is that of bearing guilt, e.g., Hos. 13:16, "Samaria shall bear her guilt, because she has rebelled against her God." In Hos. 4:15 and 10:2 the NEB unnecessarily emends the text (cf. H. H. Wolff, *Hosea* [Eng. tr. 1974], pp. 72, 89, 170). Textual problems in Hab. 1:11 lead some (e.g., *TDOT*, I, 435) to replace "guilty" (Heb. *'āšām*) with "and he set" (Heb. *yāśîm*). The NEB apparently emends to some form of *šāmam*, "be dismayed, appalled," as in Isa. 24:6, where it followed the Targum and translated "stand aghast." The Hebrew nouns *'āšām* and *'ašmâ*, however, include both the iniquitous act and the guilt associated with that act; thus the emendations may be unnecessary. (*See also* SACRIFICES AND OFFERINGS IN THE OT V.H.)

Another common Hebrew term is *'āwōn*, which also combines the ideas of iniquity, the guilt accompanying iniquity, and the punishment for the iniquity. Differences in the translations are frequent. Usually, when the RSV translates Heb. *'āwōn* as "guilt" the AV has "iniquity"

(e.g., Ex. 28:38, 43; 1 S. 20:8). The NEB sometimes has "guilt" along with numerous synonyms for "iniquity." Ezk. 21:23 (MT 28) is typical of this diversity: "he brings their guilt [AV "iniquity"; NEB "wrongdoing"] to remembrance, that they may be captured." A careful study of the context is the only way to determine the various shades of meanings for both Heb. *'āwōn* and *'āšām*.

Other terms for "guilt" occur less frequently. On three occasions the RSV translates *nāqâ* as "clear the guilty" (Ex. 34:7; Joel 3:21 [MT 4:21]; Nah. 1:3). (On Joel 3:21 see L. C. Allen, comm. on Joel [*NICOT*, 1976], p. 117 n. 47.) The Hebrew root *rš'*, which often refers to wickedness (e.g., 2 Ch. 22:3), points also to one guilty of a crime (Dt. 25:1). In the hiphil the verb *rāšā'* can mean "condemn as guilty" (KoB, p. 910). The common Hebrew word for "evil," *rā'â*, is translated "guilt" in 1 S. 26:18 (AV "evil"; NEB "mischief"). Several times the plural of "blood" (Heb. *dāmîm*) is translated "bloodguilt" (e.g., Ex. 22:2) or "guilt of blood" (Dt. 22:8). In Dt. 19:10 the shedding of innocent blood also leads to "guilt of blood." The RSV and AV interpret Ps. 51:14 (MT 16) as referring to bloodguiltiness (NEB "bloodshed"; M. Dahood [*Psalms* (*AB*, 1968), II, 8] proposes *dammîm*, "tears of death," but cf. A. Weiser, *Psalms* [*OTL*, 1962],. pp. 408f.; *TDOT*, III, 243-45).

Sometimes the RSV translation is not based on any word for guilt but is an attempt to achieve equivalent effect. In Jer. 3:11 the AV has "backsliding Israel hath justified herself more than treacherous Judah." The MT uses the verb "justify" with the comparative, but the RSV translates "Faithless Israel has shown herself less guilty than false Judah." In Ezk. 18:24 the RSV changes the pleonasm retained in the AV's "in his trespass that he hath trespassed" (Heb. *b^{e}ma'^{a}lô ^{a}šer-mā'al*) to "for the treachery of which he is guilty."

Several passages are difficult to interpret and have occasioned textual changes. In Ezk. 35:6 both the RSV and NEB follow the LXX and translate "guilty of blood." The AV and the RSV mg. follow the MT and read "hate blood," but this is less likely in light of the context (cf. *BH*; *TDOT*, I, 436, also follows the LXX). Prov. 21:8 is difficult because the meaning of Heb. *wāzār* (a hapax legomenon) is uncertain. The RSV and NEB follow KD in relating it to Arab. *wazara*, "carry a burden" "commit a sin" (cf. also C. H. Toy, comm. on Proverbs [*ICC*, 1899], p. 402); the related Arab. noun *wizr* can also mean "crime" (cf. W. McKane, *Proverbs* [*OTL*, 1970], p. 562). The AV "strange" reflects the common meaning of Heb. *zār* (the *wā* is understood as the conjunction "and"). Others (e.g., *BH*; *CHAL*, p. 85) suggest deleting it as a dittography of the word following it (Heb. *w^{e}zaḳ*). The reference to "guilt" in 1 S. 14:41 is based on a valuable addition of the LXX (followed by both the RSV and NEB).

II. In the NT.–The words "guilt" or "guilty" are used rarely in the NT. Gk. *énochos* is used in the legal sense of "liable, answerable" or "guilty." To break one law is to be guilty of (breaking) the whole law (Jas. 2:10). Eating the bread or drinking the cup unworthily is to be guilty of (desecrating) the Lord's body and blood (1 Cor. 11:27). To slander the Holy Spirit makes one guilty of eternal sin (Mk. 3:29). The common word for sin, Gk. *hamartía*, is used to refer to the guilt resulting from the sin of the Pharisees (Jn. 9:41). In Lk. 23:14 Pilate does not find Jesus guilty (Gk. *aítios*) of any of the charges brought against Him. Although there is no Greek word for "guilty" in 1 Cor. 5:11, the RSV achieves equivalent effect by translating "if [anyone] is guilty of immorality," instead of "if any man . . . be a fornicator" (AV).

For the religious significance of "guilt" and "guilty" *see* SIN VI-IX.

J. C. MOYER

GUILT OFFERING. *See* SACRIFICES AND OFFERINGS IN THE OT V.G, H.

GUILTLESS [Heb. *nāqâ*, *nāqî*; Gk. *anaítios*, *anénklētos*, *hagnós*]; AV also BLAMELESS, INNOCENT, QUIT OF THINE OATH (Josh. 2:20), APPROVED YOURSELVES TO BE CLEAR (2 Cor. 7:11); NEB BLAMELESS, INNOCENT, QUIT OF THE OATH (Josh. 2:19f.), BE RELEASED (Josh. 2:17), NOT HELD AGAINST THEM (Mt. 12:5), WITHOUT REPROACH (1 Cor. 1:8), CLEARED YOURSELVES OF BLAME (2 Cor. 7:11).

The Hebrew root *nqh* is primarily associated with cleanness. The verb *nāqâ* in the niphal means to "be clean," "free from guilt," "innocent," "free from punishment." After Jeremiah had accused the inhabitants of Jerusalem of killing the guiltless poor (Jer. 2:34), they protested that they were innocent (2:35a) and reiterated it with the parallel expression that they had not sinned (*lō' ḥāṭā'*, 2:35b). In 1 S. 26:9f. David said that no one who killed the Lord's anointed would be free from punishment. In the piel the meaning is to "hold guiltless," "acquit," "leave unpunished." The Lord will not hold the person guiltless who misuses His name (Ex. 20:7 par. Dt. 5:11), and David told Solomon not to leave Shimei unpunished (1 K. 2:9). Five times the adjective *nāqî* is translated "guiltless." On three occasions it refers to a freedom from obligations (Josh. 2:17, 19f., referring to the oath of Rahab). The other two references are to innocence (2 S. 3:28; 14:9).

In the NT Gk. *anaítios*, "without a reason, guilt," occurs in Mt. 12:5, 7 where, under certain conditions, priests who break the sabbath are still counted guiltless. (The LXX translates the phrase "innocent blood," Heb. *dām nāqî* [e.g., Dt. 19:10], with *anaítios*.) In 1 Cor. 1:8 the reference is to Christians whom Jesus will establish as guiltless or blameless (*anénklētos*) in the Day of the Lord. The word *hagnós* means "pure" or "holy," but the RSV translates it "guiltless" in 2 Cor. 7:11 (cf. NEB "you have cleared yourselves of blame").

J. C. MOYER

GULF. The AV rendering (RSV, NEB, "chasm") of Gk. *chásma* (<*chaínō*, "gape, yawn"), which occurs only in Lk. 16:26, "between us and you a great chasm has been fixed" (cf. "far off" in v. 23). This is very different from, though it probably reflects, the rabbinic conception of the separation between the two compartments of Hades (Sheol) by "a hand's breadth," "a wall," or even, later, "a chasm," for the parable can be given here only a figurative significance, and is of purely ethical import. The fundamental difference between the rich man and Lazarus lies not in their conditions but in their characters. For "besides all this" (v. 26) RV mg. gives "in all these things," thus implying that the moral distinctions that exist in this life (v. 25) become more pronounced ("fixed") in the next world, and the "gulf" is impassable in the sense that a change of condition will not necessarily produce a change of soul. *See also* ABRAHAM'S BOSOM.

M. O. EVANS

GUM [Heb. *n^{e}ḳō'ṯ*; LXX *thymíama*–'incense'] (Gen. 37:25; 43:11); AV SPICERY, SPICES; NEB GUM TRAGACANTH. Some have suggested "storax," the gum resin

exuded by the *Styrax officinalis*. This plant is found in the Levant, but the identification is unlikely (*MPB*, p. 52). More likely is the application of Heb. *nᵉḳō'ṯ* to the gum-tragacanth (cf. Arab. *naka'at*, "gum tragacanth"), probably the *Astragalus tragacantha* or the *Astragalus gummifer*. The latter shrub naturally exudes a nonaromatic gum from its stem and branches (*MPB*, p. 52). Such resins, along with oil, spices, nuts, etc., were an important article of trade in the ancient Near East.

GUNI gōō'nī [Heb. *gûnî*]; **GUNITES** gōō'nīts [*haggûnî*].

1. The name of a Naphtalite clan (Gen. 46:24; Nu. 26:48; 1 Ch. 7:13).

2. The head of a Gadite family (1 Ch. 5:15).

GUR gûr [Heb. *gûr*]. An ascent near Ibleam where Ahaziah of Judah was wounded by Jehu's archers (2 K. 9:27). Aharoni identified it with the Gurra near Taanach, mentioned in the Taanach Tablets (*LBHG*, p. 157).

W. S. L. S.

GURBAAL gûr-bā'al [Heb. *gûr-bā'al*]. A small colony town of Arabs, against which Uzziah king of Judah was given divine aid (2 Ch. 26:7). It remains unidentified, but probably was somewhere in Edom. Its mention immediately after the Philistines may have suggested the "Gerar" of the Targum, but association with the Meunites (elsewhere called Meunim) points to the east. Jebel Nebī Hārūn, near Petra, has always been crowned by a sanctuary. This may have been "the dwelling place of Baal"; or, accepting the reading of the LXX (Gk. *pétra*) and the Vulg., it may be *ṣ/ṭûr bā'al*, the "rock" or "mountain of Baal."

D. B. PECOTA

GUTI; GUTIANS gōō'tē, gōō'tē-ənz [Akk. *gu-ti-um, g/qu-tū*]. A people who dominated part of Babylonia in the 22nd cent. B.C.

The powerful dynasty of Akkad in Babylonia (*ca.* 2370-2200 B.C.) was faced constantly by threat of attack from the wild mountaineers of the Zagros. Prominent among these were the Guti, whose homeland was the area of Persian Kurdistan. They spread from there across northern Mesopotamia, it appears, sacking the city of Asshur and mixing with the West Semitic tribes of the mid-Euphrates region. In due course they spread southward and overthrew the rule of Akkad. As so often happened, they could not replace what they had destroyed, and confusion resulted. Their suzerainty left little mark upon the history of Babylonia; rather they became partly civilized, and their few royal inscriptions attest devotion to the gods of the cities they had conquered. After a few decades of supremacy the invaders were driven out by Utu-hegal king of Uruk (*ca.* 2120 B.C.).

Despite so meager a record, the period of Gutian rule left a lasting impression on the Babylonian mind. The invasion was reckoned a punishment for impious behavior on the part of an Akkadian king, and counted an era in history. The Sumerian king list gives almost a century for their dynasty and a score or so kings; but it is clear that the period was largely concurrent with the Akkad dynasty, and many of the kings may have been contemporaries. At about the same time as the fall of Akkad, the Guti also overwhelmed Elam, inaugurating a century of decline.

The toponym Gutu continued in use until the Persian period as a rather vague district name, but nothing is certain about the population of the area in this age. The ethnic relation of the third-millennium Guti is generally sought with the adjacent Lullubi, Elamites, etc. Certain names have distinctive form, e.g., Tirikan and Sargalab. The area passed through the control of the Elamites, Kassites, and Assyrians before the Persian empire inherited it from the Babylonians.

Some contend that Guti appeared under the banner of Nebuchadrezzar as Koa (Heb. *qô(a)'*; Gk. *Koue*), a contingent in the army attacking Jerusalem (Ezk. 23:23, where Shoa is Akk. Suhi of the Syrian desert, Shuah in Gen. 25:2). It has been suggested that the Guti survived as the Kurds.

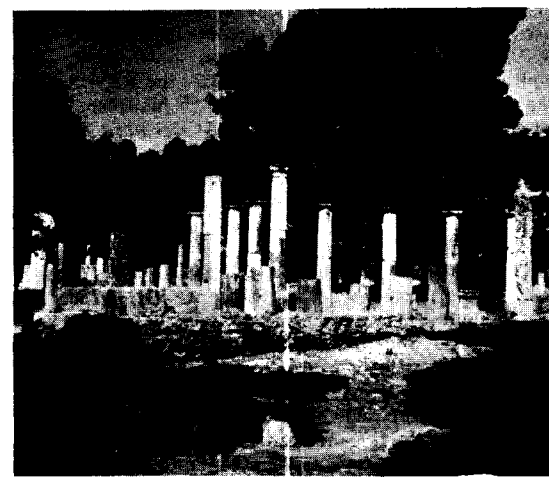
A. R. MILLARD

GUTTER (Gen. 30:38, 41, AV). *See* RUNNEL.

GYMNASIUM [Gk. *gymnásion*] (1 Macc. 1:14; 2 Macc. 4:9, 12). The gymnasium was an athletics ground used primarily for training the male youth of ancient Greece to run, wrestle, throw the javelin or discus, etc. It was usually located in a grove by a stream outside the city, where the shade and water could benefit its patrons. It most often had a *palaístra*, a building with rooms for undressing and dressing, bathing, powdering the body, etc. The word *gymnásion* first meant "an exercise performed while naked" but later was applied to the place where such exercise was done.



Ruins of the gymnasium at Olympia, Greece (Rosenthal Art Slides)

In Maccabean times Antiochus IV Epiphanes permitted hellenizing Jews to establish a gymnasium in Jerusalem (1 Macc. 1:14). The Jews who exercised there "covered over" their circumcision (ostensibly by undergoing some kind of operation) in order to imitate the Greeks more completely (Josephus *Ant.* xii.v.1 [241]; 1 Macc. 1:15).

In the NT Paul used some of the activities of the gymnasium as metaphors for Christian experience — running (1 Cor. 9:24-27; Gal. 2:2; Phil. 2:16), boxing (1 Cor. 9:26), and wrestling (Eph. 6:12, AV; RSV "contending"). Gk. *gymnasía*, "exercise (in a gymnasium)," occurs in 1 Tim. 4:8, where such activity is acknowledged to have some value for the body.

III. Theology

I. The Prophet.–A. Name. Some of the ancient rabbis, imagining that the prophet was the son of the Shunammite woman of 2 K. 4:16, assumed that the name came from the promise given, "You shall embrace [Heb. *ḥāḇaq*] a son." Jerome and others thought the name meant "wrestler," and reflected the prophet's spiritual struggle with God.

B. Life. Practically nothing is known of Habakkuk. The book bearing his name casts little light upon his life except by inference and the rest of the OT is silent concerning him, although numerous legends have grown up around his name. The identification of the prophet with the son of the Shunammite woman is one example, although biblical chronology renders it impossible by over a hundred years. Another example, equally anachronistic, connects Isa. 21:6 with Hab. 2:1 and makes Habakkuk the watchman set by Isaiah to watch for the fall of Babylon. One of the recensions of the LXX text of Bel and the Dragon declares that the story was taken "from the prophecy of Habakkuk the son of Jesus of the tribe of Levi." This may refer to an unknown apocryphal book ascribed to our prophet. The authority for calling his father Jesus is unknown. But the claim that he was of the tribe of Levi has usually been based on the presence of the musical notation at the end of the psalm (3:19). According to the *Lives of the Prophets* (ascribed erroneously to Epiphanius, Bishop of Salamis during the late 4th cent. A.D.), he belonged to Beth Zohar of the tribe of Simeon. Another interesting though equally anachronistic story is found in Bel 33-39. In this tale Habakkuk, while on his way to the field with a bowl of pottage, was taken by an angel to Babylon, placed in the lions' den where Daniel ate the pottage, and afterward returned to his own place. None of these legends has much historical value.

II. The Book.–A. Content. The book is generally divided into five sections comprising chs. 1 and 2, followed by ch. 3, the prayer or psalm of Habakkuk.

1. The Prophet's First Complaint (1:1-4). Following the traditional interpretation, this section forms the prophet's first lament to God concerning the violence and lawlessness rampant in the community of Judea surrounding him. According to this interpretation of the book, these verses describe conditions existing shortly before the destruction of Judah by the Babylonian invader in the early 6th century.

2. Yahweh's First Reply (1:5-11). God's reply to the prophet indicates that he should expect the unknown as a response to his prayer for justice. The unknown in this case is the raising up of the Chaldean horde to whom will be given the task of meting out divine justice to the wicked citizens of Judah. The suggestion in v. 5 that the arrival of the Chaldeans would be something unexpected suggests that the prophecy should be dated either shortly before or after the fall of the Assyrian capital Nineveh to the Babylonians in 612 B.C. Various scholars, following Wellhausen, have omitted these verses as a secondary addition and identified the violent, wicked men of 1:2-4 with the Chaldeans and the righteous men with the Judeans. The lament is then understood to be continued in vv. 12-17 (see O. Eissfeldt, *The OT: An Intro.* [Eng. tr., 3rd ed. 1968], p. 418).

3. The Prophet's Second Complaint (1:12-17). These verses form a response to the divine oracle concerning the Chaldeans in 1:5-11. In this section the prophet is per-

plexed and cannot understand how a righteous God can use these barbarians to execute judgment upon a people more righteous than they. He considers even the wicked among the Jews better than the Chaldeans. The section ends with the prophet's poignant question, "Is he then to keep on emptying his net and mercilessly slaying nations forever?"

4. Yahweh's Second Reply (2:1-4). In this section, which begins with the prophet stationed on his watchtower to await God's reply, an indication is given that the exaltation of the Chaldeans will only be temporary; in the end they will meet their doom, while the righteous will live by their faith (or alternatively, by God's faithfulness). The vision of God's direction for history is hastening toward its appointed time, and the prophet is asked to await its coming.

5. The Taunt Song Against Babylon (2:5-20). This section consists of five woe oracles, following similar but slightly varying form, directed against the Chaldean oppressor. Each woe is cast in the mouth of a nation that has suffered at the hand of Babylon and, with the exception of the fifth woe which opposes idolatry, deals with a nation arrogantly building its own power at the expense of its less able neighbors. The five taunting songs are punctuated by a vision of universal knowledge of God's glory (v. 14) and climaxed by a call for reverent submission to the Lord of history, who through all the vicissitudes of history remains seated in His holy temple (v. 20).

6. The Prayer of Habakkuk (3:1-19). This final section, which is often separated from the remainder of the book, comes to us replete with musical directions (vv. 1, 19b) and functions in its context as the prophet's reply to all that has been revealed in the opening two chapters. The divine revelation of ch. 2 is bypassed in favor of the timeless pictures of God's power in theophanies, allusions to which cover the entire expanse of Israel's history with its redeemer. The purpose of God's anger — the salvation of His people — is struck as a keynote in v. 13, while the section closes with the prophet's personal response in vv. 16-19. This final response, one of the great statements of faith in God in the face of adversity, lends its tone to the entire book and is probably the reason Habakkuk is preeminent among the minor prophets.
