CONTRIBUTORS

SCHULTZ, SAMUEL J.
A.B., B.D., S.T.M., Th.D., Emeritus Professor of Biblical Studies and Theology, Wheaton College and Graduate School, Wheaton, Illinois.

SCOTT, JULIUS J., JR.
A.B., B.D., Ph.D., Professor of Biblical and Historical Studies, Wheaton College Graduate School, Wheaton, Illinois.

SEALE, MORRIS S.
B.A., Ph.D., Former Professor, Near East School of Theology, Beirut, Lebanon.

SHEA, WILLIAM H.
B.A., Ph.D., Professor and Chairman, Department of Old Testament, Andrews University Theological Seminary, Berrien Springs, Michigan.

SHERIFFS, ROBERT J. A.
B.A., B.D., Ph.D., Former Lecturer in Old Testament, Rhodes University, Grahamstown, Cape Province, South Africa.

SHERWIN-WHITE, A. N.
M.A., Reader in Ancient History (Retired), Oxford University; Fellow and Tutor in Ancient History, St. John's College, Oxford, England.

SMICK, ELMER
B.A., Th.B., S.T.M., Ph.D., Professor of Old Testament, Gordon-Conwell Theological Seminary, South Hamilton, Massachusetts.

SMITH, EDGAR W., JR.
B.A., B.D., Ph.D., Project Editor, *ISBE* Revision.

SMITH, GARY V.
B.A., M.A., Ph.D., Associate Professor of Old Testament, Bethel Theological Seminary, St. Paul, Minnesota.

SMITH, ROBERT HOUSTON
B.A., B.D., Ph.D., Fox Professor of Religion and Chairman, Department of Religious Studies, The College of Wooster, Wooster, Ohio.

SODERLUND, SVEN K.
B.A., M.A., M.C.S., Ph.D., Assistant Professor of Biblical Studies, Regent College, Vancouver, British Columbia, Canada.

SPARKS, IRVING ALAN
A.B., B.D., S.T.M., Ph.D., Professor and Chairperson, Department of Religious Studies, San Diego State University, San Diego, California.

STEIN, ROBERT H.
B.A., B.D., S.T.M., Ph.D., Professor of New Testament, Bethel Theological Seminary, St. Paul, Minnesota.

STEWART, ROY A.
M.A., B.D., M.Litt., Retired Church of Scotland Minister and Biblical Scholar, Edinburgh, Scotland.

STRANGE, JAMES F.
B.A., M.Div., Ph.D., Professor of Religious Studies and Dean of the College of Arts and Letters, University of South Florida, Tampa, Florida.

STRATTON-PORTER, GENE*
Author and Illustrator; Special Writer on Birds and Nature.

STUART, DOUGLAS
B.A., Ph.D., Professor of Old Testament, Gordon-Conwell Theological Seminary, South Hamilton, Massachusetts.

STUART, STREETER S., JR.
B.S., M.Div., M.A., S.T.M., M.A., Ph.D., Professor of Biblical Studies, United Wesleyan College, Allentown, Pennsylvania.

SUNDSMO, ALLEN
B.A., M.A., Bookstore Manager, William B. Eerdmans Publishing Company, Grand Rapids, Michigan.

THOMPSON, JOHN ALEXANDER
A.B., M.Div., Th.M., Ph.D., Research Consultant, Translations Department, American Bible Society.

THOMPSON, JOHN ARTHUR
B.A., B.Ed., M.Sc., M.A., Ph.D., B.D., Former Reader, Department of Middle Eastern Studies, University of Melbourne, Australia.

THOMSON, J. E. H.*
M.A., D.D., Missionary to the Jews in Palestine.

TIPPETT, ALAN R.
L.Th., M.A., Ph.D., Research Fellow, St. Mark's Library, Canberra, Australia.

TREVER, JOHN C.
B.D., Ph.D., Director, Dead Sea Scrolls Project, School of Theology at Claremont, Claremont, California.

TURNER, GEORGE A.
A.B., B.D., S.T.B., S.T.M., Ph.D., Professor Emeritus of Biblical Literature, Asbury Theological Seminary, Wilmore, Kentucky.

VAN BROEKHOVEN, HAROLD, JR.
B.A., M.A., M.Div., Th.M., Pastor, Tabernacle Baptist Church, Hope, Rhode Island; Faculty, Biblical Studies, Barrington College, Barrington, Rhode Island.

VANELDEREN, BASTIAAN
A.B., B.D., M.A., Th.D., Professor of New Testament, The Free University, Amsterdam, Netherlands.

VAN SELMS, ADRIANUS
D.Th., Emeritus Professor of Semitic Languages, University of Pretoria, South Africa.

VERHEY, ALLEN D.
B.A., B.D., Ph.D., Associate Professor of Religion, Hope College, Holland, Michigan.

VOS, CLARENCE J.
A.B., Th.B., Th.M., Th.D., Professor of Religion and Theology, Calvin College, Grand Rapids, Michigan.

VOS, GEERHARDUS*
D.D., Ph.D., Professor of Biblical Theology, Princeton Theological Seminary, Princeton, New Jersey.

VOS, HOWARD F.
B.A., Th.M., Th.D., M.A., Ph.D., Professor of History and Archaeology, The King's College, Briarcliff Manor, New York.

VRIEND, JOHN
B.Th., M.A., Freelance Religious Writer and Translator, Grand Rapids, Michigan.

WALHOUT, EDWIN
Th.B., Th.M., D.Min., Minister, Christian Reformed Church; Freelance Writer, Grand Rapids, Michigan.

CONTRIBUTORS

WALLACE, DAVID H.
B.A., B.D., Th.M., Ph.D., Retired Professor of Biblical Theology, Newport Beach, California.

WALLACE, RONALD STEWART
B.S., M.A., Ph.D., Professor Emeritus of Biblical Theology, Columbia Theological Seminary, Decatur, Georgia.

WARING, DAWN E.
B.S., M.A., Ph.D., Adjunct Faculty and Interim Director for Women's Concerns, Fuller Theological Seminary, Pasadena, California.

WATTS, JOHN D. W.
B.A., Th.M., Ph.D., Professor of Old Testament Interpretation, Southern Baptist Theological Seminary, Louisville, Kentucky.

WEAD, DAVID W.
A.B., B.Th., B.D., Th.D., Minister, First Christian Church, Nashville, Tennessee.

WEBB, ROBERT ALEXANDER*
B.A., D.D., LL.D., Professor of Apologetics and Systematic Theology, Louisville Presbyterian Theological Seminary, Louisville, Kentucky.

WEBSTER, JOHN HUNTER*
M.A., D.D., Professor of Greek Exegesis and New Testament Literature, Xenia Theological Seminary, St. Louis, Missouri.

WEDDLE, FOREST
A.B., M.S., Ph.D., Late Professor of Biblical Archaeology and History, Fort Wayne Bible College, Fort Wayne, Indiana.

WELCH, E. DOUGLAS
B.S., M.Div., M.A., Ph.D., Scholar in Biblical and Ancient Near Eastern Studies.

WENHAM, GORDON J.
M.A., Ph.D., Senior Lecturer in Religious Studies, The College of Saint Paul and Saint Mary, Cheltenham, Gloucester, England.

WESTERHOLM, STEPHEN
M.A., D.Th., Assistant Professor of Religious Studies, McMaster University, Hamilton, Ontario, Canada.

WIEAND, DAVID JOHN
B.A., M.A., B.D., Ph.D., Emeritus Professor of Biblical Literature, Bethany Theological Seminary, Oak Brook, Illinois.

WILSON, GERALD H.
B.A., M.A., M.Div., M.A., Ph.D., Assistant Professor of Religion, University of Georgia, Athens, Georgia.

WILSON, MARVIN R.
B.A., M.Div., M.A., Ph.D., Ockenga Professor of Biblical Studies, Gordon College, Wenham, Massachusetts.

WILSON, R. McL.
M.A., B.D., Ph.D., D.D., F.B.A., Emeritus Professor of Biblical Criticism, St. Mary's College, University of St. Andrews, Scotland.

WISEMAN, DONALD J.
M.A., D.Lit., F.B.A., Emeritus Professor of Assyriology, University of London, England; Chairman and Former Director, British School of Archaeology in Iraq.

WOLF, HERBERT M.
B.A., Th.M., Ph.D., Associate Professor of Old Testament, Wheaton Graduate School, Wheaton, Illinois.

WOOD, ARTHUR SKEVINGTON
B.A., Ph.D., Principal Emeritus, Cliff College, Derbyshire, England.

WYATT, ROBERT J.
B.A., M.A., Ph.D., Former Editorial Associate, *ISBE* Revision Project; Instructor in Biblical Studies, Bethel College, St. Paul, Minnesota.

WYPER, GLENN
B.A., B.D., Th.M., Registrar and Chairman of the Department of Biblical Studies, Ontario Bible College, Willowdale, Ontario, Canada.

YAMAUCHI, EDWIN M.
B.A., M.A., Ph.D., Professor of History, Miami University, Oxford, Ohio.

YOUNG, FREDERICK E.
A.B., B.D., Ph.D., Dean and Professor of Old Testament, Central Baptist Theological Seminary, Kansas City, Kansas.

YOUNGBLOOD, RONALD F.
B.A., B.D., Ph.D., Professor of Old Testament and Hebrew, Bethel Theological Seminary, West Campus, San Diego, California.

PUBLISHERS' NOTES TO VOLUME THREE

Like Volume II, Volume III includes the Abbreviations (with a few more additions), the Transliteration Scheme, and the Pronunciation Key, as well as its own list of Contributors.

The publishers' staff has seen further changes. While the work of some of those mentioned in Volumes I and II — Smith, Lee, Prus, Beversluis, and Bauer — has continued, Nola J. Opperwall and Gary L. Knapp have replaced Robert J. Wyatt and James E. Hoffine as Editorial Associates; Catherine Rollins-Page has done the work with photographs and the proofreading formerly done by Kimberly Adams; and Genevieve Barney has done much of the typesetting of the latter stages of the volume.

THE PUBLISHERS

ABBREVIATIONS

GENERAL

A	Codex Alexandrinus (*See* TEXT AND MSS OF THE NT I.B)
abbr.	abbreviated, abbreviation
act.	active
Akk.	Akkadian
Amer. Tr.	J. M. P. Smith and E. J. Goodspeed, *The Complete Bible: An American Translation*

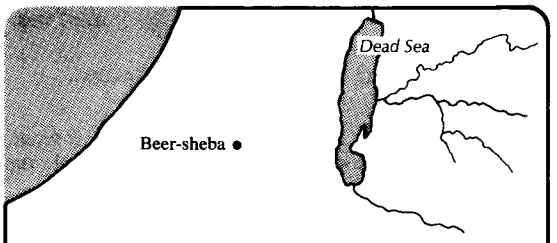
K

KAB kab [Heb. *qaḇ*–'something hollowed out'] (2 K. 6:25); AV CAB. A Hebrew dry and liquid measure equal to about one quart. *See* WEIGHTS AND MEASURES.



KABZEEL kab'zə-el [Heb. *qaḇṣᵉ'ēl*–'may 'El gather']. A city in the Negeb, described as being "in the extreme South" (Josh. 15:21). Benaiah the son of Jehoiada, one of David's mighty men, came from Kabzeel (2 S. 23:20; 1 Ch. 11:22). In Neh. 11:25 Jekabzeel is located in the same general area and is doubtless the same place.

Aharoni originally suggested that Kabzeel be identified with Khirbet Gharrah, "a large town surrounded by a casemate wall . . . mid-way between Beersheba and Arad" (*LBHG*, p. 295), but apparently withdrew this suggestion in the revised edition (1975), which identifies Hormah with Khirbet Gharrah (p. 216). Abel suggested identification with Khirbet Ḥōra, which he did not further describe (*GP*, II, 89). W. S. L. S.

KADES (Jth. 1:9, AV). *See* KADESH **1.**

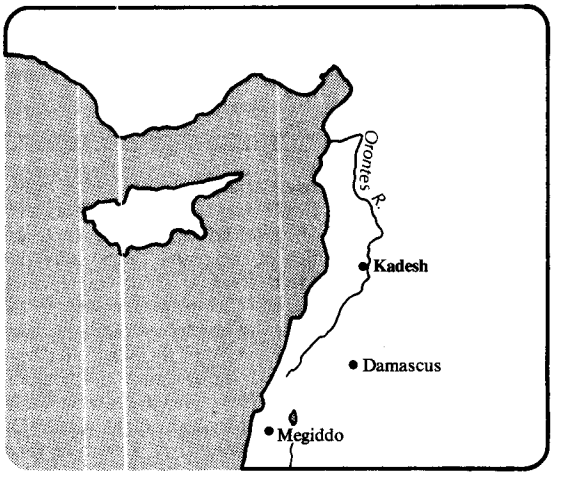
KADESH kā'dəsh [Heb. *qāḏēš*; Gk. *Kadēs*].

1. Also **KADESH-BARNEA** bär-nē'ə [Heb. *qāḏēš barnēa*(*a*)ᶜ; Gk. *Kadēs barnē*]; **KEDESH** ke'dəsh [Heb. *qeḏeš*] (Josh. 15:23); **ENMISHPAT** en-mish'pat [Heb. *'ên mišpāṭ*–'fountain of judgment'] (Gen. 14:7); AV also CADES-BARNE (Jth. 5:14); NEB also CADESH-BARNEA (Jth. 5:14); AV also KADES (Jth. 1:9); NEB also CADESH (Jth. 1:9). An oasis in northeast Sinai on the southern border of the Wilderness of Zin.

When Chedorlaomer's forces marched through Transjordan they penetrated Edomite territory as far as El-paran, turned back to the northwest, and came to Kadesh, called by its alternative name Enmishpat (Gen. 14:7). There they subdued the Amalekites before returning northeast to defeat the kings of the cities of the plain. In the narrative concerning Hagar, the well Beer-lahai-roi was located "between Kadesh and Bered" (16:14) on the way to the wilderness region of Shur in the northwest Sinai isthmus, E of the present Suez canal and W of the Wâdī el-'Arîsh.

The Israelites visited Kadesh-barnea more than once in their wanderings (Nu. 13:26; 20:1), and the site seems to have been their headquarters for thirty-eight years (Dt. 2:14). It was an eleven-day journey from Horeb or Sinai to Kadesh via Mt. Seir (1:2). Moses sent spies into Canaan from Kadesh (Nu. 13:17), and there Israel was condemned to wander in the wilderness for a generation because they had doubted God's ability to give them the Promised Land (14:26-35). At Kadesh-barnea Miriam died and was buried (20:1), and from there messengers were sent in vain to the Edomite king (v. 14). When the oases dried up, Moses was provoked into offending God, and the occasion was commemorated in the name of Meribath-kadesh (Heb. *mᵉrîḇaṯ qāḏēš*), "contention of Kadesh" (27:14).

Kadesh-barnea was to be the southern corner of the southwest boundary of Judah (Nu. 34:4); Ezekiel included it as part of the southern border of his ideal land (Ezk. 47:19; 48:28). The meaning of the word "Barnea," appended to Kadesh to distinguish it from other places with similar names, is unknown. It may be a personal name like Bera and Birsha (Gen. 14:2).



Kadesh-barnea has often been identified with 'Ain Qedeis, one of several springs in a locality 78 km. (49 mi.) SW of Beer-sheba. The water supply there, however, is too limited to have met the needs of the wandering Israelites, and in addition there is doubt concerning the connection of the name Qedeis with Kadesh. The neighboring 'Ain Qeṣeimeh also has an inadequate water supply. A more suitable location for Kadesh-barnea is at 'Ain el-Qudeirât, a spring 8 km. (5 mi.) NW of 'Ain Qedeis. Although these three springs are close to one another, and the wandering Israelites probably used each on occasion, the vegetation near 'Ain el-Qudeirât and its ample supply of water suit very well the topographical requirements of the wilderness narratives.

See *EAEHL*, III, *s.v.* "Kadesh-Barnea" (M. Dothan). R. K. H.

2. Same as KEDESH **3.**

3. Kadesh on the Orontes, mentioned only in 2 S. 24:6 [Heb. *taḥtîm ḥodšî*; corrected by the LXX (Lucian) to Gk. *eis tēn gēn Chetieim Kadēs*–'to the land of the Hittites, toward Kadesh' (cf. RSV, NEB)]; AV TAHTIM-HODSHI. An important Hittite stronghold on the Upper Orontes, just S of Lake Homs, the ancient Lake Kadesh. It was strategically located at the gateway to the plains of Syria.

In the 15th cent. the king of Kadesh, leading a coalition of Canaanite monarchs against the Egyptians at Megiddo, was defeated by Thutmose III, who later captured the city of Kadesh itself. Two hundred years later Ramses II fought against the Hittites at Kadesh and claimed a glorious victory, even though he failed to occupy the city. The Battle of Kadesh is graphically and extensively portrayed on the monuments of Ramses II.

J. Simons (*GTTOT*, §§ 111f., pp. 41-43) contended that the context of 2 S. 24:6 requires a Kadesh near Dan; Kadesh on the Orontes is too far north to be included in the census of David. His conjecture, following Ewald, would restore the text to read Heb. *taḥaṯ ḥermôn*, "at the foot of Hermon" (cf. Josh. 11:3; 13:5; Jgs. 3:3).

A third suggestion, proposed by Guthe and Klostermann, emends the evidently corrupted MT of 2 S. 24:6 to refer to Kadesh of Naphtali, a solution that does not account at all for Heb. *taḥtîm*.

The inclusion of Hittite Kadesh on the Orontes in David's census is unlikely but not historically impossible. The Davidic conquests made tributaries of Damascus and other regions near Kadesh bordering on the state of Hamath (2 S. 8:6-8). A. H. LEWIS

KADMIEL kad'mē-əl [Heb. *qaḏmî'ēl*–'El is ancient'?; AV CADMIEL; NEB CADMIELUS, CADOEL in parallel lists in 1 Esd. 5:26, 58; omitted in LXX B; A reads Gk. *kai Kadmiēlon*]. A Levite (Ezr. 2:40; Neh. 7:43), founder of a family whose descendants returned from captivity with Zerubbabel (Ezr. 2:1; Neh. 7:43; 12:1, 8). He is named among those who praise God for the return (Neh. 9:4f.; 12:24) and those who "took the oversight of" restoring the Lord's house (Ezr. 3:9; 1 Esd. 5:26, 58). He is again mentioned with those who "seal" the new covenant (Neh. 10:28-39 [MT 29-40]) after the reestablishment of worship (vv. 1, 9 [MT 2, 10]).

KADMONITE kad'mən-īt [Heb. *qaḏmōnî*–'easterners'; Gk. *Kedmonaioi*]. The Kadmonites are mentioned in Gen. 15:19 along with the Kenites and Kenizzites of Edom and are doubtless the same as "the people of the east," whose wisdom was celebrated (1 K. 4:30 [MT 5:10]). Kedemah (Heb. *qēḏmâ*, "the East") was a son of Ishmael (Gen. 25:15; cf. v. 6). In an Egyptian story, a political refugee who fled from Egypt in the time of the 12th Dynasty found a refuge in Canaan in the land of Kaduma or Kedem, apparently an area of the Syrian desert E of Byblos. A. H. SAYCE

KAIN kān [Heb. *qayin*] (Nu. 24:22); AV THE KENITE; NEB CAIN. The singular form of the clan name KENITES.

KAIN kān [Heb. *haqqayin*–'the Kenite, smith'(?)]. A city in the southern hill country of Judah, in a grouping of "ten cities and their villages" that were part of the tribal allotment of Judah (Josh. 15:57). Included in the group are a number of places that can be located SE of Hebron (*see* JUDAH, TERRITORY OF). Kain has therefore been tentatively identified with Khirbet Yaqîn, 3 km. (2 mi.) NE of Ziph. The LXX (15:56) combines two names into one, reading *Zakanaïm* (B) or *Zanōakim* (A; this is more clearly from *Zanoah* + *Kain*), and emends "ten" to "nine." If this reading is accepted, the place should be called "Zanoah of the Kenites." Simons's argument that the figure "ten" opposes this reading (*GTTOT*, § 319, p. 150) is not convincing. A stronger argument may be found in Jgs. 4:11, translating "and Heber the Kenite [*haqqênî*] separated himself from Kain [*miqqayin*]," but it is not established that Heber came from Kain since this word is also a proper or a clan name. W. S. L. S.

KAIWAN kā'wän, kī'wän [Heb. *kîyûn*]; AV Chiun (following MT vocalization); NEB "pedestals" (relating *kîyûn* to *kûn*–'be firm, establish'). The name of a god in Am. 5:26. The vocalization by the Masoretes is probably meant to draw the reader's attention to the word *siqqûṣ*, "detested thing," or *gillûl*, "idol" (cf. the similar phenomenon with the god-name Molech [2 K. 23:10; Jer. 32:35], a deliberate misvocalization of the consonants *mlk* with the vowels of the word "shame" [*bōšeṯ*]). Kîyûn is apparently the same as Bab. *kayawânu*, the god-name given to the planet Saturn (cf. Pesh. *ke'wān*). The RSV rearranges the MT and translates "Kaiwan your star-god," which removes a grammatical difficulty (see comms.) and accords well with the identification with the Babylonian god. The first part of the verse mentions SAKKUTH, another name for the Assyrian god Ninurta (= Saturn); this lends credence to the identification of this form (i.e., *kywn*) with the Babylonian god. The LXX translation of the word is *Raiphan*, which many authorities regard as an inner Greek corruption of an original *Kaiphan*. The quotation of Am. 5:26 in Acts 7:43, apparently in dependence on the LXX, has *Raiphan* (or a similar term). The apparent meaning of the verse is that the Israelites will carry the images of their gods into exile beyond Damascus; the images of Saturn are mentioned as representatives. (For alternate views and discussion of the many problems in this verse, see comms.) H. F. VOS

KALCOL kal'kol (1 K. 4:31, NEB). *See* CALCOL.

KALLAI kal'ī [Heb. *qallay* < *qal*–'swift']. A priest among those who returned with Zerubbabel (Neh. 12:1). He represented the family of Sallai (v. 20).

KAMON kā'mən [Heb. *qāmôn*]. AV CAMON. The city, possibly in Gilead (Josephus *Ant.* v.7.6 [254]), where Jair was buried (Jgs. 10:3-5). It may be the Gk. *Kamous* of Polybius (v.70) and has been identified with Qamm, 4 km. (2½ mi.) N of eṭ-Ṭaiyibeh in 'Ajlûn. See Abel, *GP*, II, 412. W. S. L. S.

KANAH kā'nə [Heb. *qānâ*–'reed'].

1. The name of a brook (wadi, NEB "gorge") forming part of the boundary between Ephraim and Manasseh (Josh. 16:8; 17:9). The border of Ephraim extended west from Tappuah to the brook Kanah, ending at the sea; the border of Manasseh from Tappuah "went down to the brook Kanah, south of the brook." There seems to be no good reason to doubt the identification of "the brook Kanah" with the modern Wâdī Qânah. The stream reaches the sea about 6 km. (4 mi.) N of Jaffa.

2. A town in the Lebanon foothills, on the northern border of Asher (Josh. 19:28), probably identical with modern Qânah about 11 km. (7 mi.) SE of Tyre (not to be confused with NT Cana).

See E. Danelius, *PEQ*, 1958, pp. 32-43.

R. P. DUGAN

KAPH käf [כ]. The eleventh letter of the Hebrew alphabet (sometimes rendered caph or kaf), transliterated as *k* when with daghesh and as *k̲* when without. It also came to be used for the number twenty. For name, etc., *see* WRITING.

KAREAH kə-rē'ə [Heb. *qārē(a)ḥ*–'bald head']; AV also CAREAH (2 K. 25:23). The father of the Johanan and Jonathan who after the fall of Jerusalem joined Gedaliah at Mizpah (2 K. 25:23; Jer. 40:8, 13-16; 41:11-16; 42:1, 8; 43:2-5).

KARKA kär'kə [Heb. *haqqarqaʿ*–'the floor, ground']. A location on the southern border of Judah, mentioned between Hazar-addar and Azmon, on the way to Wâdī el-ʿArîsh (Josh. 15:3). Hazar-addar has been identified with ʿAin Qudeirât, hence the suggestion that Karka was located at the confluence of Wâdī el-ʿAin and Umm Hašîm, where a well-built pool has been discovered (*GP*, II, 47). The AV form "Karkaa" was based on a misreading of the locative ending as part of the place name. W. S. L. S.

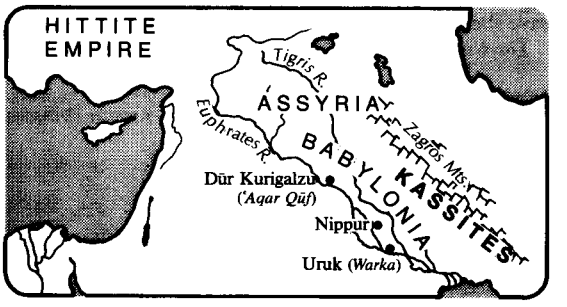
KARKOR kär'kôr [Heb. *qarqōr*]. An unidentified place where Gideon surprised and overwhelmed the remnants of the army of Zeba and Zalmunnah (Jgs. 8:10f.). According to v. 11 the place was on or near a well-known desert highway running N-S, which may have followed roughly the same line as the present pilgrims' highway from Damascus to Mecca and therefore have passed "east of . . . Jogbehah." Thus Qarqar, some 400 km. (250 mi.) from Jogbehah, can hardly be considered a probable location. B. HOVEY

KARNAIM kär-nā'əm [Heb. *qarnāyim*] (Am. 6:13); AV HORNS; NEB POWER; cf. NEB mg. A city in north Gilead; modern Sheikh Saʿd, Syria, perhaps identical with Ashteroth-karnaim of Gen. 14:5 and Carnaim of 1 Macc. 5:26, 43f.; 2 Macc. 12:21, 26. The NEB rendering underlines the play on the meanings of Karnaim, "horns" (symbolizing power; cf. Dt. 33:17), and Lo-debar, "a nothing."

G. WYPER

KARTAH kär'tə [Heb. *qartâ*] (Josh. 21:34). One of the four Levitical cities from the tribal allotment of Zebulun, the others being Jokneam, Dimnah, and Nahalal, each "with its pasture lands." Ramses II mentioned a *qrt*, and the Pilgrim of Bordeaux referred to *mutatio Certha*, leading to the identification of Kartah with Athlit. If this identification is correct, it indicates a westward expansion of Zebulun to the sea at a much earlier period than is generally accepted. The territory of Zebulun is generally thought to have lain N of the Kishon, on the basis of Josh. 19:10-16.

Bibliography.–*GP*, II, 22, 63, 414; *GTTOT*, § 337, no. 38.



W. S. L. S.

KARTAN kär'tən, kär'tan [Heb. *qartān*]. A city in Naphtali given to the Levites (Josh. 21:32). In the parallel passage (1 Ch. 6:76 [MT 61]) Kartan is not mentioned, but Kiriathaim seems to replace it; hence the two are usually identified. Neither name occurs in Josh. 19:32, 38, which instead have Chinnereth. Some scholars have taken this as the original name and suggested that Kartan and Kiriathaim are textual corruptions. Both names, however, begin with *qôp*, a distinctly different sound from the *kap* in Chinnereth. Moreover, *qiryāṯayim* and *qartān* have the same meaning, "double city" (the latter, on the basis of Phoenician evidence, possesses an alternate dual ending). Kartan has been identified provisionally with Khirbet el-Qureiyeh, NE of ʿAin Ibl in Upper Galilee, possibly the Rakkath of Josh. 19:35.

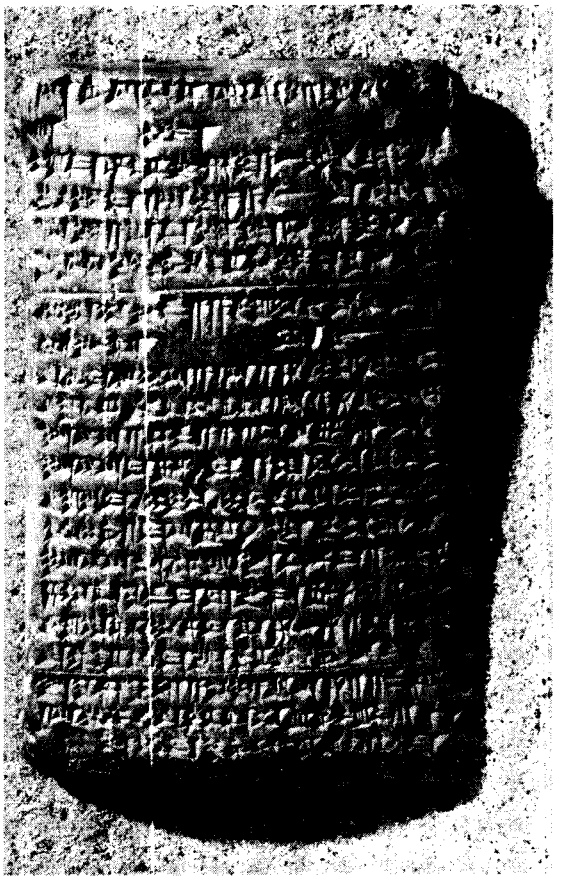
KASSITES kas'īts [Akk. *kaššu*, Nuzi dialect *kuššu*; Gk. *Kossaioi*]. A people who dominated Babylonia from the 16th to 12th cents. B.C. Like so many other mountain peoples who invaded Mesopotamia, the Kassites left little trace of their presence. They were the most successful invaders, however, maintaining a hold on Babylonia for almost half a millennium (*ca.* 1595-1157 B.C.).

The Kassites' opportunity to seize the throne of Babylon came when a sudden raid by the Hittites toppled the Hammurabi dynasty *ca.* 1595 B.C. Since the Hittites could not hold so distant a realm, the Kassites took the kingdom. In fact, the Kassites may have played some part in the raid as allies of the Hittites, for there is evidence of Kassite rule over the state of Khana on the mid-Euphrates a little before Babylon fell, and the conquerors apparently removed the statue of Marduk, patron deity of Babylon, to this district. There had been Kassite settlers, migrants from their Zagros homeland, in Babylonia for decades, and Hammurabi's son had repelled Kassite bands from his territory. Now larger contingents arrived, driven, perhaps, by pressure from the first Indo-European movements into western Iran.



A dark age covered Babylonia for two centuries; later scribes seem to have known very little about the period, and few inscriptions are extant. This lack of documentation prevents the compilation of a precise chronology for the reigns of the first twenty-one of the thirty-six Kassite kings named in the Babylonian King List. Some of the earliest rulers probably overlapped the last years of the Hammurabi dynasty. That the early Kassites were not uncouth barbarians is shown by two dedicatory texts, preserved in later copies. One (a problematic document for the historian) is for the restoration of a shrine in Babylon by Gandash, the first Kassite king, the other for the return of Marduk's statue from Khana by Agum-kakrime, a later king, who claimed to rule most of Babylonia (*ca.* 1550 B.C.).

A separate kingdom had emerged in the 17th cent. B.C.

in the Sea-Land, the marshes of southern Iraq. The Kassites extinguished it soon after 1500 B.C. Their state grew to a position of respectability during the two dark centuries and shortly after 1400 B.C. it had a fraternal relation with Egypt. The Amarna Letters record the marriage of a Babylonian princess to the pharaoh and an exchange of gifts. Kassite kings sent horses, having introduced them in Babylonia for general use, and lapis lazuli, demanding gold in return, a current mode of state trading. One letter, in which Burnaburiaš II complains that Akhenaten of Egypt had slighted him by according recognition to Assyria, Babylon's supposed vassal, marks a turning point in Babylonian history. Burnaburiaš or his son did, in fact, marry a daughter of the Assyrian king Aššur-uballiṭ I (*ca.* 1365-1330 B.C.), an action possibly signifying the inferiority of the girl's father. When the son of this union was murdered for being too pro-Assyrian, Aššur-uballiṭ, whose power had been increasing, invaded Babylonia and installed as king his great-grandson Kurigalzu II (*ca.* 1345-1324 B.C.). The remainder of the Kassite era saw continual warfare between the two states; the Kassites normally held their ground but seldom achieved even fleeting victory over the Assyrians. Tukulti-Ninurta I of Assyria (*ca.* 1244-1208 B.C.) ruled Babylon for seven years (*ca.* 1234-1228 B.C.), and ten years later an Elamite king ruled there briefly. Finally, *ca.* 1160 B.C., a raid by the Elamite Šuttruk-Naḫḫunte gave the death blow to the tottering Kassite rule.

The earliest group of texts from the Kassite period dates from *ca.* 1370 B.C., the majority stemming from Nippur in the south, another collection coming from Dūr Kurigalzu, now 'Aqar Qūf, near Baghdad. These texts are in the Babylonian language and are dated by the year of the king's reign, an innovation. They display occasional Kassite words, notably in texts concerning horses. Personal and divine names and an ancient, fragmentary Kassite-Babylonian "dictionary" are the only other sources for knowledge of the Kassite tongue. The later rulers of the dynasty bore Babylonian names. Parts of an inscribed statue of Kurigalzu I (*ca.* 1400 B.C.) indicate reverence for the local deities and continuing use of the Sumerian tongue for religious texts.

Amarna Letter (ca. 1350 B.C.) in which Burnaburiaš II complains that Akhenaten slighted him by recognizing Assyria (Trustees of the British Museum)

There is evidence that Babylonian scribes copied the "classical" works of the previous age, revising and systematizing them. Several later scribes trace their ancestry to the Kassite period. The famous "Babylonian Job" poem, *I Will Praise the Lord of Wisdom* (W. G. Lambert, *Babylonian Wisdom Literature* [1960], pp. 21-62), and a few other pieces were composed at this time. Some changes are apparent in architecture, although it is hard to attribute any of them to Kassite influence. The remarkable facade of molded and glazed brick figures from Warka (Uruk) is now seen to have Babylonian antecedents (H. Frankfort, *Art and Architecture of the Ancient Orient* [1958], plate 70A). Glass and glazed earthenware were inventions that spread throughout the Fertile Crescent *ca.* 1500 B.C. (although findings at Metsamor suggest an earlier origin). Engraved on the cylinder seals called Kassite are a number of lengthy prayers for the owners — a symptom, perhaps, of an insecure society.

The country was divided into regions; some were large towns, some were tribal territories, and each was administered by an army of officials under a governor responsible to the king. Grants of tax-free land to loyal subjects and the harsh financial and physical penalties for infringement were recorded on boundary stones. Symbols of the gods were carved on the stones to give extra protection. These land donations, coupled with the regional system, aided the breakup of the state at the end of the Kassite dynasty and the settlement of Aramean and Chaldean tribes in the heart of Babylonia.

The Kassites are not mentioned in the Bible, unless "the land of Cush" of Gen. 2:13 is Kassite territory (see E. A. Speiser, *Oriental and Biblical Studies* [1967], pp. 25-28).

KASTELLION. *See* MIRD.

KATTATH kat'əth, kat'äth [Heb. *qaṭṭāṭ*; Gk. *Katanath*, A *Kattath*, Lucian *Kottath*]. One of twelve cities of Zebulun, mentioned in Josh. 19:15. The name is believed, on the basis of the Gk. *Katanath*, to have developed from **qaṭnaṭ*. Since it is named next to Nahalal in Joshua, and Kitron is named next to Nahalol in Jgs. 1:30, Kattath is commonly identified with KITRON. In T.P. *Megillah* i.1, Kattath is identified with Qeṭonith, which was still standing in the time of Rabbi Yosi ben Ḥaninah. On this basis, the site of Kattath/Kitron is located at Khirbet Qoṭeina, 8 km. (5 mi.) SW of Jokneam. According to Simons (*GTTOT*, § 329, p. 182), this location argues against the identification. Abel (*GP*, II, 423) suggested a location at Tell Fâr, on the eastern edge of the plain of Zebulun, about 4 km. (2½ mi.) NE of Kefr Ḥasidim. No scholar has given a certain identification of the site.

W. S. L. S.

KEBAR (Ezk. 1:1, NEB). *See* CHEBAR.

KEDAR kē'där [Heb. *qēḏār*–'black, swarthy'; Gk. *Kēdar*]. The second son of Ishmael (Gen. 25:13; 1 Ch. 1:29) and, eponymously, a people and a country in the East.

I. Location.–The descendants of Ishmael "dwelt from Havilah to Shur" (Gen. 25:18), i.e., in the northern Arabian peninsula and into the Sinai. Isa. 21:13-17, an oracle concerning Arabia, mentions Teman (a brother of Kedar; cf. Gen. 25:15) and the "archers" of Kedar. In a prophecy against Israel Jer. 2:10 uses Kittim (RSV "Cyprus") and Kedar to represent "west" and "east," respectively, and in 49:28 "Kedar" and "the people of the east" occur in parallel strophes. Nebuchadrezzar's attack on "Kedar and the kingdoms of Hazor" (49:28) is probably to be identified with that king's plundering of the "Arabs" in his sixth year (BM 21946 rev. 9f.; Wiseman, *CCK*, pp. 70f.). Ezk. 27:21 associates "Arabia and all the princes of Kedar."

Ashurbanipal referred to Ammuladi and Iauta' son of Hazael as kings of Kedar (*qi-id-ri*), who marched against the kings of the Amurru and whom Ashurbanipal defeated. Iauta' was an Assyrian vassal who "roused the people of Arabia to revolt with him"; he was captured and taken to Nineveh, where, Ashurbanipal recorded, "I put a dog chain upon him and made him guard a kennel" (*ARAB*, II, §§ 820, 869). A comparison of statements in Esarhaddon's and Ashurbanipal's annals seems to indicate that "Kedar" was almost synonymous with "Arabia" (cf. *ANET*, pp. 291f., 298-300). Old South Arabic inscriptions mention *qdrn* (Qadirân or Qadrân), either as a person or as a people (*Corpus Inscriptionum Himyariticarum* [= *CIS*, IV], 493.2; cf. K. Conti Rossini, *Chrestomathia arabica meridionalis ephigraphica* [1931], p. 229). According to an Aramaic inscription from Tell el-Maskhuta in Egypt, Geshem the Arabian (cf. Neh. 2:19; 6:1f., 6) was King of Kedar, and Kedarites lived on the eastern border of Egypt in the 5th cent. B.C. (cf. I. Rabinowitz, *JNES*, 15 [1956], 1-9). A conclusion that Kedar was a prominent Arabian tribe living SE of Damascus and E of Transjordan is thus reasonable.

II. Description.–The Kedarites were possibly of two general types: nomads (Arab. *wabarîya*), who lived in tents (Jer. 49:29), and sedentary people (Arab. *ḥaḍarîya*), who lived in villages (*ḥᵃṣērîm*, Isa. 42:11; cf. BDB, p. 347). In the references to the "tents of Kedar" in Ps. 120:5 and Cant. 1:5 Heb. *qēḏār* could also be translated "black," with no specific reference to Kedar (although the Arabs often made tents of black sheep's wool). The people of Kedar are described as "a nation at ease, that dwells securely" (Jer. 49:31). Isa. 21:16f. refers to their pomp and their warrior activities, particularly their skill with the bow, which are confirmed by the Assyrian records of their raids against the Amurru (the "Westerners"). Their flocks, including lambs, rams, goats, and camels, are mentioned in Isa. 60:7, Jer. 49:29, and Ezk. 27:21. That these items were part of an extensive commerce is indicated in Ezekiel's lament over Tyre (27:21). Since Kedar was closely related to other tribes in the Arabian peninsula (according to both Gen. 25:13-18 and linguistic studies), and since the prophets, particularly Ezekiel, include other tribes in parallel with it, possibly Kedar also traded in "all kinds of spices, and all precious stones, and gold" (Ezek. 27:22). Note Ashurbanipal's references to booty from Arabia and Kedar, which consisted of "cattle, sheep, asses, camels, slaves" in "countless numbers," and his record of yearly tribute of gold and precious stones (*ARAB*, II, §§ 869f.). A. S. FULTON W. S. L. S.

KEDEMAH ked'ə-mä, kə-dē'mə [Heb. *qēḏᵉmâ*–'eastward']. Son of Ishmael (Gen. 25:15), head of a clan (1 Ch. 1:31). *See* KADMONITE.

KEDEMOTH kĕd'ə-mōth [Heb. *qᵉḏēmôṯ*]. A priestly city in the territory of Reuben (Josh. 13:18; 21:37), probably on the Arnon. From the wilderness of Kedemoth Moses sent messengers to Sihon king of Heshbon asking for permission to pass peaceably through his land (Dt. 2:26-29). The city was allotted to Reuben (Josh. 13:18) and then assigned to the Merarites (21:37; 1 Ch. 6:79 [MT 64]).

F. P. W. Buhl identified it with Umm er-Reṣāṣ (*Geographie des alten Palästina* [1896], 268), but more recently it has been identified either with Khirbet er-Remeil (*GP*, II, 415), 4 km. (2½ mi.) WSW of el-Medeiyineh (*GP*, II, 217 n. 2), or with Qaṣr ez-Za'ferân (N. Glueck, *BASOR*, 65 [Feb. 1937], 27), 4 km. (2½ mi.) NW of el-Medeiyineh. Cf. *WHAB*, plate IX. W. S. L. S.

KEDESH kē'desh [Heb. *qeḏeš*–'sacred place, sanctuary'; Gk. *Kadēs*].

1. A town in Judah, described in Josh. 15:23 as "toward the border of Edom in the south" and probably to be identified with Kadesh-barnea (*see* KADESH **1**).

2. A town located in the territory of Issachar and given to the Gershonite Levites (1 Ch. 6:72 [MT 57]). In Josh. 21:28 it is called Kishion (AV, NEB, Kishon); the AV rendering may be more correct since the town was spelled *qsn* in the list of conquered cities compiled under Thutmose III. The entry in the list in 1 Ch. 6:72, "Kedesh with her suburbs," may have arisen through misreading Kishon for Kedesh. The town has been tentatively identified with the modern Tell Abû Qedeis, nearly 5 km. (3 mi.) SE of Megiddo, although the tribal claims of Issachar perhaps did not extend so far south.

3. Also **KEDESH (IN) NAPHTALI** [Heb. *qeḏeš naptālî*; Gk. *Kedes Naphtali*] (Jgs. 4:6; Tob. 1:2); **KEDESH IN GALILEE** [Heb. *qeḏeš baggālîl*] (Josh. 20:7; 21:32; 1 Ch. 6:76); **KADESH IN GALILEE** (1 Macc. 11:63); AV CADES; NEB KADESH-IN-GALILEE. A famous refuge city in the east Galilee uplands assigned to the Gershonite Levites (1 Ch. 6:76).

From its name ("holy") it is thought to have been a pre-Israelite pagan sanctuary, and prior to the Conquest period it was a Canaanite royal city (Josh. 12:22). It recovered some of its ancient character when it was designated as a city of refuge (20:7). It was the home of Barak and the place where he and Deborah assembled their followers for the battle against Sisera (Jgs. 4:1-10).

Tiglath-pileser III captured Kedesh in the time of Pekah of Israel and deported its inhabitants (2 K. 15:29). The great battle between Jonathan Maccabeus and Demetrius was fought near Kedesh (1 Macc. 11:63ff.); in the days of Josephus it belonged to the Phoenicians (*Ant.* xiii.5.6 [154]; *BJ* ii.18.1 [459]; iv.2.3 [105]; etc.). It is the modern Tell Qades, NW of Lake Huleh, and dates from the Early Bronze Age. R. K. H.

KEDORLAOMER ked-ər-lā'ō-mər (Gen. 14:1, 4f., etc., NEB). *See* CHEDORLAOMER.

KEDRON ked'rən, kē'drən [Gk. *Kedrōn*]; AV CEDRON. A place fortified by Cendebeus in obedience to Antiochus Sidetes (1 Macc. 15:39-41). Later, when Cendebeus was defeated, he fled there, hotly pursued by John and Judas (sons of Simon the Maccabee), who burned the city (16:4-10). The context locates Kedron near Jamnia (15:40) and Modein (16:4). The site has been located tentatively at Qaṭrā, a village about 40 km. (25 mi.) W of Jerusalem, near the

modern towns of Gaderah (cf. Josh. 15:36) and Qidron. Simons believed that the name Qaṭrā is derived from Qiṭrôn, the Hebrew name behind the Kedron of 1 Macc. 15:39–16:10 (*GTTOT*, § 318, p. 147).

For Jn. 18:1, NEB, *see* KIDRON. W. S. L. S.

KEEPER [Heb. *'îš*] (Gen. 46:32, 34); [*nāṭar*] (Cant. 1:6; 8:11f.); NEB GUARDIANS; [*nāṣar*] (Isa. 27:3); [*rā'â*] (Gen. 4:2); NEB SHEPHERD; [*śar*] (Gen. 39:21-23); NEB GOVERNOR; [*šāmar*] (Gen. 4:9; 1 S. 17:20, 22; 2 K. 22:4, 14; 1 Ch. 9:19; Neh. 2:8; Ps. 121:5; Eccl. 12:3; etc.); NEB also GUARD, "picket," QUARTERMASTER, "those on duty," etc.; [*šā'ar*] (2 Ch. 31:14); AV PORTER; [Gk. *neōkóros*] (Acts 19:35); AV "worshipper"; NEB WARDEN.

In the OT keepers were custodians or guardians of a variety of things. Some served as herders of cattle (Gen. 46:32, 34) or sheep (4:2; 1 S. 17:20). Some tended vineyards (Cant. 1:6; 8:11f.); Yahweh is depicted as tending His vineyard Israel (Isa. 27:3). Besiegers of Jerusalem are described as men who watch over a field (Jer. 4:17). Other keepers were guardians of a house (Eccl. 12:3), guards (2 Ch. 21:14; Neh. 3:29), or temple officials responsible for the threshold (2 K. 22:4; 23:4; 25:18; 1 Ch. 9:19; 2 Ch. 34:9; Jer. 35:4; 52:24), entrance (1 Ch. 9:19), and wardrobe (2 K. 22:14; 2 Ch. 34:22). Some were prison wardens (Gen. 39:21-23) or forest rangers (Neh. 2:8). When David visited his brothers on the battlefield, he left the things he brought with him in the care of the custodian of the baggage (1 S. 17:22). Cain asked if he were responsible for Abel's whereabouts (Gen. 4:9). The psalmist confessed that Yahweh is mankind's protector (Ps. 121:5).

In Acts 19:35 the town clerk stated that Ephesus was the custodian of the temple of Artemis. J. R. PRICE

KEHELATHAH kē-hə-lā'thə, kə-hel'ə-thə [Heb. *qᵉhēlāṯâ*–'gathering, assembly']. An Israelite camp during the wilderness wanderings, between Rissah and Mt. Shepher (Nu. 33:22f.). The location is unknown.

KEILAH kə-ī'lə [Heb. *qᵉʿîlâ*]. The Garmite, grandson of Hodiah (1 Ch. 4:19).

KEILAH kə-ī'lə [Heb. *qᵉʿîlâ*]. A fortified city of Judah in the Shephelah, about 13.5 km. (8.5 mi.) NW of Hebron, named with Nezib, Achzib, and Mareshah in Josh. 15:43f. It was very high for a city in the Shephelah, being over 450 m. (1500 ft.) above the Mediterranean Sea. The city had gates and bars (1 S. 23:7).

During the Amarna period, Šuwardata prince of Hebron and Abdu-Ḫeba prince of Jerusalem sent numerous letters to Akhenaten pharaoh of Egypt (*ca.* 1369-1353) complaining of his unlawful occupation of Keilah. Apparently Keilah was a boundary city between the two ruling princes in Canaan. The reputed strength of the city in the Amarna area is seen in its repeated listing in the Amarna Tablets with such formidable cities as Rabbah, Gezer, and Gath.

During the monarchy David delivered Keilah from the roving bands of Philistines who had come to rob its threshing floors. He made it his military headquarters for a short time. When informed by the oracle of Abiathar the priest that the treacherous citizens of Keilah planned to hand him over to Saul (1 S. 23:7-13), he and his men quickly left the city and hid in the Wilderness of Ziph.

Exiles returning from Babylon resettled Keilah in the 5th cent. B.C., and some helped to rebuild the wall of Jerusalem under the supervision of Nehemiah. "Next to him Hashabiah, ruler of half the district of Keilah, repaired for his district. After him their brethren repaired: Bavvai the son of Henadad, ruler of half the district of Keilah" (Neh. 3:17f.).

According to an early Christian tradition, the sixth-century-B.C. prophet Habakkuk was buried in Keilah (Eusebius *Onom.*).

Today the site is called Khirbet Qîlā. The hill is covered with ruins, but the terraced slopes surrounding it are covered with grainfields. F. E. YOUNG

KEILAN (1 Esd. 5:15, NEB). *See* KILAN.

KELAIAH kə-lā'yə, kə-lī'ə [Heb. *qēlāyâ*; Gk. *Kōlios*; LXX B *Kōnos*]; AV, NEB Apoc., Colius, Calitas. One of the priests who had a foreign wife (Ezr. 10:23; also KELITA; cf. 1 Esd. 9:23). He was present when Ezra promulgated the law (Neh. 8:7; 1 Esd. 9:48), and was one of those who signed the covenant (Neh. 10:10 [MT 11]). Kelaiah gave up his foreign wife at the behest of Ezra (Ezr. 10:23).

KELITA kel'i-tə, kə-lī'tə [Heb. *qᵉlîṭā'*–'dwarf']; AV, NEB Apoc., Calitas. This is apparently an allusion to the crippled physical condition of KELAIAH and was his nickname.

KEMOSH. *See* CHEMOSH.

KEMUEL kem'u-el, kə-mū'el [Heb. *qᵉmû'ēl*–'God's mound'(?)].

1. Nephew of Abraham (Gen. 22:21), father of Aram, whom H. G. A. Ewald identified with Ram of Job 32:2. But cf. Gen. 10:21f., where Aram is described as one of the children of Shem. They may not have been the same person.

2. A chieftain of Ephraim, one of the land commissioners who divided Canaan (Nu. 34:24).

3. A Levite, father of Hashabiah, one of the tribal princes of David's time, a ruler among the Levites (1 Ch. 27:17).

KENAN kē'nən [Heb. *qēnan*; Gk *Kainan*]. A son of Enosh the son of Seth (Gen. 5:9f., 12-14 [AV Cainan]; 1 Ch. 1:2).

KENATH ke'nəth [Heb. *qᵉnāṯ*]. A city in northern Transjordan taken from the Amorites by Nobah, who gave it his own name (Nu. 32:42). It was recaptured by Geshur and Aram (1 Ch. 2:23) and apparently regained its original name.

Abel (*GP*, II, 417) identified it with Kerak-Kanata 20 km. (12½ mi.) W of Suweida in the fertile plain of the Nuqra (see map IX in *GP*), on the basis of an inscription recording the adduction of waters *eis Kanata*, "to Kanata." Other scholars have identified Kenath with modern Qanawât in the Hauran, 26 km. (16 mi.) NE of Bozrah. Kenath (*qanū*, Am.Tab. 197:14) is mentioned as a city-state in the Amarna Letters. See *WHAB*, plates IV, VIII; Y. Aharoni and M. Avi-Yonah, *Macmillan Bible Atlas* (1968), maps 34, 38, 249, 250. W. S. L. S.

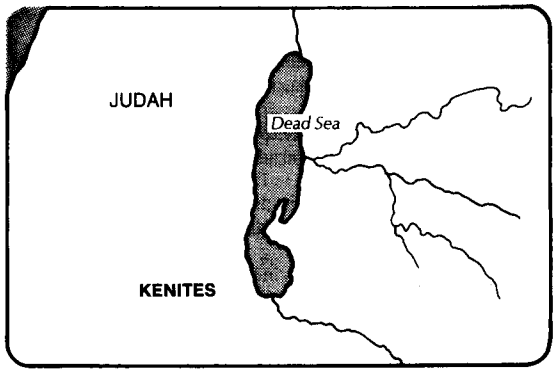
KENAZ kē'naz, kə-naz' [Heb. *qᵉnaz*–'hunting'].

1. A "chief" of Edom, grandson of Esau (Gen. 36:11, 15, 42; 1 Ch. 1:36, 53). He was the eponymous ancestor of the KENIZZITE clan.

2. Father of Othniel (Josh. 15:17; Jgs. 1:13; 3:9, 11; 1 Ch. 4:13).

3. Grandson of Caleb through Elah (1 Ch. 4:15), though the text is obscure here. Elsewhere Caleb's Kenizzite connections are traced through Jephunneh (Nu. 32:12; Josh. 14:6, 14). *See* UKNAZ.

KENEZITE. *See* KENIZZITE.



KENITES ken'īts [Heb. *haqqênî*, also *qayin* (Nu. 24:22; Jgs. 1:16; 4:11); Gk. *Kenaioi, Kinaioi*]; NEB CAIN (Nu. 24:22). A tribe of nomads, named in association with various other peoples. They are first mentioned, along

with Kadmonites and Kenizzites, among the peoples whose land was promised to Abram (Gen. 15:19). Balaam, in the days of the Exodus, punned upon their name *qayin* as he observed them from the heights of Moab. *Qayin* resembles *qēn,* the word for "nest," and Balaam prophesied the Kenites' destruction even though their nest was "set in a rock" (a reference to their mountain home, possibly the city Sela). The name *qayin,* however, means "smith" or "metalworker." Evidence of such artisans is a tomb painting at Beni-hasan, Egypt, of Semites (*see* picture in BELLOWS). They are shown with donkeys and other animals, a lyre, and weapons and possibly a metalworking implement, thus combining all the arts of Lamech's three sons (Gen. 4:19-22): herding (Jabal), playing of musical instruments (Jubal), and metalworking (Tubal-cain, or Tubal, a smith).

Hebrew *qayin* is related to Arab. *qayn,* "worker in iron," and to Aram. *qênā'â,* "metalworker." These similarities provide further linguistic evidence that the Kenites were smiths of some kind. That is not unlikely, since there were deposits of copper ore in what apparently was the Kenites' area — the mountains S of the Dead Sea and in the Sinai Peninsula. It has been conjectured that Moses learned the art of metalworking from the Kenites. But they were evidently not workers in iron, for the Philistines had a monopoly on this trade (1 S. 13:19f.).

Moses' father-in-law, known by three names — Jethro, Reuel, and Hobab (one of these may have been a tribal name) — is called a priest of Midian in Ex. 2:16-21; 3:1; 18:1 and a Midianite in Nu. 10:29 but a Kenite in Jgs. 1:16; 4:11. These passages suggest that the Kenites and Midianites had a close relationship.

The descendants of Jethro the Kenite went up with the people of Judah into the wilderness of Judah in the Negeb near Arad (Jg1:16). The MT, which reads "they settled with the people [*hā'ām*]," has an alternative reading in some of the versions, "they settled with the Amalekites [*hā'ᵃmālēqî*]." The LXX may have been influenced by 1 S. 15:6, where Saul, before attacking the city of Amalek, warns the Kenites to leave the city lest they be destroyed; there is apparently a tradition that some Kenites lived among the Amalekites at that time. One of the Kenite families, that of Heber, migrated north to the Galilee region, indicating that the Kenites were a nomadic group (Jgs. 4:11). The Canaanite general Sisera sheltered in Heber's tent because Heber was at peace with Sisera's king (v. 17), but Heber's wife Jael slew the general (5:24-26). Kenites were not only living again among the Israelites but even killing Israel's enemies.

In general, the Kenites were to be found in the southern Judean territories. They were living there when Saul attacked the Amalekites (1 S. 15:6). A little later, when David was a vassal of the Philistines, he attacked Judah's enemies in these southern areas, although he told the Philistines that he was attacking Judahites, Jerahmeelites, and Kenites (27:10). David later sent Judah and its friends part of the booty of his raids (30:29). Some commentators have suggested that two of David's wives, Abigail of Carmel and Ahinoam of Jezreel (25:42f.), were Kenites because the two villages of Jezreel and Carmel are listed in the same group as Kain (Heb. *qayin*) in Josh. 15:55-57. The claim is tenuous, however; geographical proximity does not presuppose familial identity. Another proposal to link David with the Kenites comes from David's being a musician, like the Kenites, but this proposal is also tenuous, since all kinds of people can produce music.

The Kenites seem to have been a recognizable element in the population in postexilic times, for in 1 Ch. 2:55 Kenite descendants of Hammath, father of the Rechabites, lived near Jabez. By then the Kenites had given up their nomadic ways and their metalworking and become scribes. The Rechabites, who were originally of Kenite stock, were also active in postexilic times. The Rechabite Malchijah, ruler of the district of Beth-haccherem, repaired the Dung Gate of Jerusalem in Nehemiah's day (Neh. 3:14).

According to the so-called Kenite hypothesis Moses learned the name Yahweh from the Kenite-Midianite priest Jethro (Ex. 2:16; 3:1-6; 18:1), who worshiped Yahweh. Support for the theory is found in the unusual zeal for Yahweh displayed by the Rechabites, descended from the Kenites. Further, Jethro's sacrifices to God (18:12) are said to have taught Moses how to worship Yahweh. But it is clear from vv. 10-12 that Jethro was learning of God from Moses. The Kenite hypothesis is not now generally accepted, since the arguments supporting it are of very doubtful validity.

Josephus referred to the Kenites as *Kenetides,* but in his retelling of 1 S. 15 (*Ant.* vi.7.3 [140]) the Kenites appear as "the race of the Sikimites [Shechemites]."

JOHN ARTHUR THOMPSON

KENIZZITE ken'ə-zīt [Heb. *qᵉnizzi*; Gk. *Kenezaios*]; AV also KENEZITE (Nu. 32:12; Josh. 14:6, 14). A prominent Edomite clan that claimed Eliphaz, eldest son of Esau (Gen. 36:11, 15, 42; 1 Ch. 1:36, 53), as ancestor. The name is a gentilic adjective derived from the clan's eponymous ancestor, KENAZ, Eliphaz's youngest son. The territory where they lived, along with the holdings of nine other nations, had been promised by God to Abraham (Gen. 15:19). Jephunneh the father of Caleb was a Kennizite (Nu. 32:12; Josh. 14:6, 14). The tribe apparently migrated to the Negeb area in the Late Bronze Age, but to what extent they were in contact with the Kenites at this period is unknown. During the Settlement period they began to be absorbed into the tribe of Judah. R. K. H.

KENOSIS ken-ō'sis [Gk. *kenōsis* < *kenóō*–'empty']. An early Christian theological term relating to the Incarnation of Christ. Few Christian doctrines have been more discussed and less understood. The main cause of this difficulty lies in the mystery of the incarnation and death of the Son of God, who became a man without ceasing to be God. Great theological interest therefore has centered on Paul's declaration that the divine Christ "emptied him-

self," made Himself "nothing" or "no account," when He assumed the "form of a servant" and thus existed in the form of a man. Although the Gk. *kenóō* is used in this sense only in Phil. 2:7, the idea appears in 2 Cor. 8:9 in Paul's assertion, "Though he was rich, yet for your sake he became poor, so that by his poverty you might become rich." It may also be reflected in Jesus' description of His death upon the cross as His being "treated with contempt" (Mk. 9:12).

Although Scripture teaches and the Christian faith confesses that a divine person became a man and then actually died, both ideas elude the profoundest probings of theological reflection. Moreover, both the manner in which and the purpose for which Paul presents his assertion about the self-emptying of Christ in Phil. 2:5-11 suggest that he himself did not regard his assertion as a special illumination that would throw a brighter light on the general biblical teaching about the incarnation and death of the Son of God, or as a passage of special theological interest.

Appeals to the kenosis have varied with the particular interests of a dogmatic period. In the 19th cent., especially among Lutherans and particularly within the context of the problems raised by their *communicatio idiomatum*, i.e., the transference of the divine attributes to the human nature of Christ, the idea of kenosis was employed to support varying explanations of the human quality of Christ's life on earth. Thomasius held that the Christ retained His divine moral attributes but divested Himself of such attributes as omnipotence, omniscience, and omnipresence and resumed them at the Resurrection. Martensen suggested that during His earthly life Christ lived out of two noncommunicating centers, first as the Son of God within the trinity and then out of a human center where He possessed only ordinary human powers. Earlier Lutherans had suggested that the earthly Christ possessed the divine attributes but used them only on occasion, or concealed them and used them only secretly. None of these views, however, appears to do justice to the self-emptying of Christ.

Modern kenosis theology is far more drastic. Christ is reduced to being no more than the "man for others." In its crudest form the divine self-emptying means that God was in Christ but died when Christ died. Altizer averred that the death of God is a historical event in that through the Incarnation God lost His transcendence (T. J. J. Altizer and W. Hamilton, *Radical Theology and the Death of God* [1966]). Such notions as these, however, do not relate to traditional kenotic theologies.

Theologians in an age of epistemological concern appealed to the kenosis to account for the limitation of Christ's knowledge clearly implied in statements that He "advanced" in wisdom (Lk. 2:52), "learned" obedience (He. 5:8), and was ignorant of the exact time of the Parousia (Mt. 24:36). Yet essentially the same problem of limitation emerges in every aspect of Jesus' human life. That the Christ as incarnate deity possesses limited knowledge is no greater mystery than that He was a helpless baby needing care, food, and clothing to avoid death or that He required rest and sleep throughout His life. These, too, are expressions of the kenosis.

Is the subject of Gk. *ekénōsen* the divine Christ, so that the idea of diminution refers to deity, or is the subject the incarnate Christ, so that the diminution refers to Christ's humanity? The language of Phil. 2 makes it plain that the immediate reference is to the preexistent divine Christ, to Him who existed in "the form of God" (v. 6) but did not regard "equality with God" something to be tenaciously grasped.

Nevertheless, the force and idea of *ekénōsen* also appears in that "being born in the likeness of men" (Phil. 2:7) He as the incarnate man "humbled himself" by becoming "obedient unto death, even death on a cross" (v. 8). This giving over of Himself to death was no less an act of humiliation than that act by which He who existed in the form of God gave Himself over to the existence of a human servant. In each instance, what was more became less, what was rich became poor, and what was something was "set at nought" (Mk. 9:12, AV, ASV); each instance was one of self-emptying. Thus the self-emptying moves from existence as God to the loss of existence in death. From the reality of Christ, Paul's kenotic perspective moves backward to Christ's taking on His servant-human form and to His dying.

This clearly indicates that what Paul declared in the kenosis is not that Christ emptied Himself of His deity in becoming a man. Phil. 2 does not clarify the theological problem of kenosis. This is further substantiated by recognition of Paul's ethical and pastoral purpose in the passage. He is urging the Philippians all to have the "same love" and to be of "one mind" — which they can do only if they act not through "selfishness or conceit" but through a humble estimate of themselves, each counting the others as better than himself. Paul thus exhorts the Philippians, "Have this mind among yourselves, which you have in Christ Jesus" (v. 5) and then describes this mind in the statement that Christ "emptied himself" in becoming man and dying for mankind on the cross as a servant.

Here one approaches the mystery of Christ and of the divine love and grace for sinners without which none can see the kingdom of God. By every rational, commonsense standard of human values, the kenosis of Christ on its levels of both deity and humanity was an unwarranted expenditure that can be justified only in the name of Christian love. Certainly, some Christians are better than others; Paul himself suggests this when he claims he is the chief of sinners. Is Paul the worst sinner that ever lived? Is every Christian at Philippi, is every Christian throughout the world, in objective fact a lesser Christian than all others, and must therefore so regard himself? In terms of objective reality and worth, as well as in terms of logic, obviously not. Yet the Christian must, says Paul, so regard himself and, acting upon this self-estimation, "not look only to his own interests, but also [as Christ did] to the interests of others" (Phil. 2:4). Thus the Christian will have that self-humbling mind of Christ which empties itself for the sake of others. For, says Paul to the Philippians, "it has been granted to you that for the sake of Christ you should not only believe in him, but also suffer for his sake" (1:29), a suffering that is "a clear omen . . . of your salvation" (v. 28) and an inducement to "work out your own salvation with fear and trembling" (2:12).

From the preceding discussion it is clear that the mind of Christ expressed in the kenosis has no special reference to Christ's emptying Himself of His deity. Rather, it exemplifies with that self-emptying of Christ's humanity in death for sinners, the mind of Christ that must characterize all Christians and will unite them all together in one mind and one love, even as it united the divine Christ with mankind both in His humanity and in mankind's sin and death. If the self-emptying of Christ refers only to His action by which He as divine became man, it and the mind of Christ could not be held up as a requirement of the Philippian Christian. J. DAANE

KEPHAR-AMMONI (Josh. 18:24, NEB). *See* CHEPHAR-AMMONI.

KEPHIRAH. *See* CHEPHIRAH.

KERAS (1 Esd. 5:29, NEB). *See* KEROS.

KERCHIEF (Ezk. 13:18, 21, AV). *See* VEIL.

KEREN-HAPPUCH ker-ən-hap'ək [Heb. *qeren happûḵ*–'horn of antimony,' i.e., a cosmetics case; LXX Gk. *Amaltheias kéras*]. Job's third daughter born after his restoration from affliction (Job 42:14). Antimony, producing a brilliant black, was used in the ancient Near East for coloring the edges of the eyelids, making the eyes large and lustrous. Thus this name suggests a little horn or receptacle for the eye paint.

KERETHITES (1 S. 30:14; 2 S. 15:18; etc., NEB). *See* CHERETHITES.

KERIOTH ker'ē-oth [Heb. *qᵉrîyôṯ*–'cities'] (Jer. 48:24, 41; Am. 2:2); AV also KIRIOTH (Am. 2:2). A region in the Mishor (tableland) of Moab (Jer. 48; cf. Eusebius *Onom.* 120, *en chṓra Mōab*). The use of the definite article in two of the word's three occurrences (Jer. 48:41; Am. 2:2) seems to support the translation "the cities" (cf. Am. 2:2, LXX: *tṓn póleōn autḗs*, "of its cities"). The word is translated as the proper noun *Kariōth*, however, in the LXX renderings of the Jeremiah passages (LXX 31:24, 41 [*Akkarioth* in MS A, v. 41]). Moreover, the boast of the king of Moab (Mesha Inscription line 13), that he dragged the altar hearth of Ataroth before Chemosh in Kerioth (*lpny kmš bqryt*), suggests that Kerioth was the site of a sanctuary to the Moabite deity.

Attempts to locate the site differ considerably. Aharoni (*LBHG*, pp. 307f.) placed it at el-Qereiyat, S of Ataroth (Khirbet 'Aṭṭārûs). Simons (*GTTOT*, § 1382, p. 450) tentatively proposed Sâliyeh, SE of Beth-gamul. E. D. Grohman (*IDB*, III, 8) suggested AR, particularly in light of Am. 2:2. BDB (p. 901) records Buhl's identification of Kerioth with Rabbah (Rabbath Moab), 17½ km. (11 mi.) S of the Arnon. Abel (*GP*, II, 422) made the likely proposal that, besides the city of this name, the term with the article refers to the region between the Arnon and the Waleh, where numerous important ruins have been found, most notably at Sâliyeh.

W. S. L. S.

KERIOTH-HEZRON ker'ē-əth hez'rən [Heb. *qᵉrîyôṯ ḥeṣrôn*]. A place in southern Judah, further identified by the phrase "which is Hazor" (Josh. 15:25). The AV takes the Hebrew as indicating two places, Kerioth and Hezron. The verse presents several problems. Kerioth is plural in form and appears to mean "cities." The Hebrew text reads, "And Ḥaṣor-ḥadatta and [(or) even] Qeriot [(or) the cities of] Ḥeṣron, which is Ḥaṣor" (literal translation). The word *ḥᵃḏattâ* has been taken by some scholars as the Aramaic form of the adjective "new," so that it and the preceding word yield "New Hazor." No explanation is given for why an Aramaic word would occur in a name either in this location or in this text. The LXX reads *kaí hai póleis Aserōn (haútē Asōr)*, "and the cities of Aseron (which is Asor [= Hazor])." (Codex Alexandrinus reads *pólis*, "city.") The opening words of the Hebrew verse are not found in the Greek, and Kerioth is taken as a common noun, whether singular or plural. Attempts to identify the site at Khirbet el-Qaryatein, 7 km. (4.4 mi.) S of Ma'în (Maon) or 8 km. (5 mi.) N of Arad (*GTTOT*, § 317, p. 143), or at Hazar-addar (*GP*, II, 345) are not convincing in view of the problems of the text.

W. S. L. S.

KERNEL [Gk. *kókkos*] (1 Cor. 15:37); AV, NEB, GRAIN. The term occurs only here in the RSV, other uses of Gk. *kókkos* being translated "grain." For the whole concept *see* GRAIN; for Nu. 6:4, AV, *see* SEED.

KEROS kē'ros [Heb. *qêrōs*–"fortress"] (Ezr. 2:44; Neh. 7:47); [Gk. *Kēras*] (1 Esd. 5:29); AV also CERAS; NEB also KERAS. One of the NETHINIM, an order appointed to the liturgical offices of the temple.

KERUB (Ezr. 2:59; Neh. 6:1, NEB). *See* CHERUB.

KERYGMA kə-rig'mə, ke'rig-mə [Gk. *kérygma*]. A systematic statement of the theology of the primitive Church as revealed in its preaching. The kerygma was the "proclamation of the death, resurrection, and exaltation of Jesus that led to evaluation of His person as both Lord and Christ, confronted man with the necessity of repentance and promised the forgiveness of sins" (Mounce, p. 84).

The noun *kérygma* occurs eight times in the NT. Its basic meaning is "that which is prewched, the message." In some verses, however, it seems to indicate the activity of preaching: e.g., in Tit. 1:3 Paul speaks of God bringing His word to light through "the preaching [*en kērýgmati*]" entrusted to him. Normally the act of preaching would be *kḗryxis* (not found in the NT). *Kérygma* belongs to the word group including *kḗryx*, "herald," and *kerýssō*, "to announce, proclaim." In the classical period the *kḗryx* held an important place in the royal court. It was his responsibility to call out in a clear and loud voice whatever needed to be made known publicly. He was often a confidant and attendant to the prince. In later periods he served the state rather than the king. It is significant that while the *kḗryx* was everywhere to be found in Hellenistic literature, the designation occurs only four times in the LXX and three times in the NT. At the same time the verb *kērýssō* is found 29 times in the LXX and 61 times in the NT. L. Coenen reasons that this shift makes it clear that the NT witnesses "avoided identifying themselves or the messengers of Jesus with the Gk. institution of the *kḗryx*, open as it was to such a wide variety of interpretation. . . . it is not the institution or the person to which importance is attached, but only the effective act of proclamation" (*DNTT*, III, 52).

Kērýssō does not mean to deliver an edifying discourse but to declare an event. It is through the proclamation itself that divine intervention takes place. Friedrich notes that "the preaching of the apostles is part of God's saving plan for men, like the death and resurrection of Christ" (*TDNT*, III, 709). At the heart of the *kérygma* is God's saving action in and through Jesus Christ. John the Baptist proclaimed the imminence of God's rule (Mt. 3:1). The Synoptists summarize the ministry of Jesus as "teaching . . . and preaching [*kērýssō*] . . . and healing" (Mt. 4:23; Mk. 1:39; Lk. 4:44; cf. Mt. 9:35; 11:1; Lk. 8:1). Like his forerunner, Jesus calls for repentance and declares that the kingdom of heaven is at hand (Mt. 4:17; Mk. 1:15). When we move into the preaching of the primitive Church we find the message no longer to be the kingdom but the king. What is preached is Christ — crucified (1 Cor. 1:23), raised (1 Cor. 15:12), Lord (2 Cor. 4:5). The shift from kingdom to Christ is accounted for by the simple yet central fact that Christ *is* the kingdom. He is the power of God let loose redemptively in time and space. The apostolic heralds could now focus the overarching concept of God's sovereign control onto the One through whom He established forever His reign over humanity.

Any survey of the kerygma in modern thought must acknowledge the major contribution of C. H. Dodd, specifically his work in *Apostolic Preaching and Its Developments*. By examining the fragments of primitive Christian

tradition embedded in the Pauline epistles and comparing these with the early speeches in Acts, Dodd arrived at a resultant kerygma as "a proclamation of the death and resurrection of Jesus Christ, in an eschatological setting from which those facts derive their saving significance" (p. 24). Dodd's approach met with opposition from redaction critics. Nineham, for instance, held that the Gospel account (Mark) is made up of such disconnected units that no basis for a chronology can be derived ("The Order of Events in St. Mark's Gospel — an Examination of Dr. Dodd's Hypothesis," in D. E. Nineham, ed., *Studies in the Gospels* [R. H. Lightfoot, Festschrift, 1955] pp. 223-241). Wilckens demonstrated to the satisfaction of many that the early speeches in Acts do not reveal any pattern of Jewish-Christian missionary preaching (*Die Missionsreden der Apostelgeschichte* [1961]). Others questioned the items included by Dodd in the kerygma (T. F. Glasson, *HibJ*, 51 [1952/53] 129-132) or objected to defining it in terms of content rather than form (W. Baird, *JBL*, 76 [1957], 181-191). Critical methodologies tend to wax and wane. The lasting significance of Dodd's crucial insights will be determined by the validity of his critical methodology.

KESALON (Josh. 15:10, NEB). *See* CHESALON.

KESIL (Josh. 15:30, NEB). *See* CHESIL.

KESULLOTH (Josh. 19:18, NEB). *See* CHESULLOTH.

KETAB kē'tab [Gk. *Kētab*] (1 Esd. 5:30); AV CETAB. An ancestor of a family of NETHINIM, not found in the parallel lists in Ezr. 2:46; Neh. 7:48.

KETTLE. In the RSV this term occurs only in 1 S. 2:14 for Heb. *dûḏ*, a vessel in which meat from the sacrificial animal could be stewed, and Mic. 3:3 for Heb. *sîr*, a cooking pot (cf. AV, NEB).

KETURAH kə-tŏŏ'rə [Heb. *qᵉṭûrâ*; Gk. *Chettoura*–'incense']. The second wife of Abraham (Gen. 25:1). In 1 Ch. 1:32f. she is called his concubine. According to the biblical tradition, he contracted this second marriage after the death of Sarah (cf. Gen. 23) and very likely after the marriage of Isaac (cf. Gen. 24). Possibly, as some writers have suggested, Abraham remarried to overcome the loneliness caused by Isaac's marriage.

In 1 Ch. 1:32 (and also Gen. 25:6) Keturah is not accorded the same dignity as Sarah who, indeed, was the mother of the son of promise. For obvious reasons the sons of Abraham's concubines were separated from Isaac. She was the mother of six sons representing Arab tribes S and E of Palestine (Gen. 25:1-6), so that through the offspring of Keturah Abraham became "the father of many nations."

W. BAUR

KEY [Heb. *maṗtē(a)ḥ*; Gk. *kleís*]. In Mt. 16:19 the expression "keys of the kingdom" is employed to denote the authority committed by Jesus Christ to His disciples (cf. Mt. 18:18; Jn. 20:22f.). In the book of Revelation He is depicted as holding "the key of David" and "the keys of hell and of death" (Rev. 1:18; 3:7; cf. 9:1; 20:1). The rabbis spoke of four keys in the hand of God alone, including that of death. In Isa. 22:22 Eliakim prefigures Christ as being entrusted with "the key of the house of David." It is laid upon his shoulder, where the long and heavy keys of the past were carried (cf. P. Haupt, ed., *Sacred Books of the OT* [1893], pt. 10, p. 160 for an illustration of a Cairene merchant in more recent times).

What Isaiah had in mind no doubt is the grand vizier or majordomo, into whose hands is committed "unlimited authority over the royal household, carrying with it a similar influence in all affairs of state" (J. Skinner, *Isaiah* [1915], I, 170). Jewish commentaries usually interpreted the Eliakim passage as referring to the Messiah. It speaks of Him as "the Heir and Lord of the abiding theocracy" and is clearly related to Rev. 3:7; the reference in each to opening and shutting makes the identification complete. 3:7 and the other verses in Revelation that mention the keys imply that the supreme power and the one true key belong to Christ alone. Only He possesses the key by right. He may, however, bestow it on others for use (Rev. 9:1; 20:1).

That the keys have a connection with doctrine as well as with the destiny of souls is evident from Lk. 11:52. There Jesus castigates the lawyers because they have "taken away the key of knowledge" — that is, of the Scriptures, which are able to make men wise to salvation (2 Tim. 3:15). The function of the scribes was to unlock the Word, so that others might be brought to a knowledge of the truth. Instead, by their concentration on the secondary and the peripheral, they locked the book and threw away the key (G. B. Caird, *Luke* [1964], p. 159). The delivery of a key was part of the scribe's ordination.

The authenticity of Mt. 16:18f. was first questioned by H. J. Holtzmann. By the end of the 19th cent. it was widely rejected by radical scholars, many of whom approached the text with the presupposition that Jesus did not intend to found a Church. Harnack denied only the sentence referring to the Church, but his attempt to prove that it is an interpolation made in Rome about the time of Hadrian (A.D. 117-138) is groundless. No Greek MS or ancient version omits it (K. L. Schmidt, "Die Kirche im NT," in *Festgabe für Adolf Deissmann* [1927], p. 283). In recent years there has been a considerable revision of opinion in favor of its genuineness, although some, like Stauffer, Cullmann, and Weiss, would assign it to a different context. Most conservative scholarship maintains the integrity of the saying in its Matthaean setting.

The recipient of the keys is undoubtedly Peter. The crucial question concerns the capacity in which Peter received the keys and whether his was an exclusive monopoly or a shared trusteeship. Mt. 18:18 and Jn. 20:22f. indicate that what is committed to Peter is also delegated to the rest of the disciples. There is no hint of any restriction of this prerogative to Peter alone. Nor can Mt. 18:18 necessarily be confined to the Twelve; indeed, the implication, reinforced by the verses immediately preceding and following, is that every disciple of Christ is similarly invested. R. Glover rightly concluded in his comment on Mt. 16:18: "The words are misunderstood when applied to men of a particular office rather than to men of a particular spirit" (*Teacher's Comm. on the Gospel of Matthew* [1889], p. 187).

The time factor is not to be overlooked. "I will give" in Mt. 16:19 is parallel with "I will build" in v. 18. Neither had started yet, as v. 20 confirms. As soon as Christ began to build His Church, Peter and the rest would exercise the power of the keys. And throughout the period in which Christ goes on building His Church (i.e., until His return) Christians, of whom Peter was the first representative, will go on exercising the power of the keys. It should be noted that v. 19 concerns the kingdom and v. 18 the Church. The precise relationship between the two is not easy to define, but the NT cannot be interpreted as postponing

the kingdom to the end of the age. Whatever its weaknesses, the "realized-eschatology" school has established that the kingdom was inaugurated with the first advent of Christ and will continue to grow throughout the age of grace. That it is to be consummated at the end should not overshadow its present reality. Scholars have tended to speak rather of an eschatology that is being realized; even C. H. Dodd accepted this interpretation which confirms the use of the keys before the end has come.

What, then, do the keys entrusted to Peter, and to all believers since him, signify? As Flew brought out, there are two possible interpretations that may be justified by the biblical use of the metaphor. The key of the grand vizier in Isa. 22:22 is undoubtedly the authority given to Christ Himself. But Flew argued that the whole history of the Church denies that this authority was transferred to Peter. Peter's leadership was shared with others and even questioned by Paul in one matter (Gal. 2:11; Acts 11:3). There is no trace of any authoritarian attitude on his part.

Flew preferred to interpret the power of the keys as knowledge, based upon Mt. 23:13 and Lk. 11:52. In Scripture *gnôsis* is not merely an intellectual awareness, but "a spiritual possession resting on revelation" (*TDNT*, I, *s.v.* γινώσκω [Bultmann]). In Lk. 1:77 it is linked with salvation and the remission of sins. "The key is the spiritual insight which will enable Peter to lead others in through the door of revelation through which he has passed himself. . . . And this key is not the exclusive possession of Peter, though on the day of Pentecost by common consent he was the first to use it. It belongs to every confessor of the Son of God" (R. N. Flew, *Jesus and His Church* [1956], pp. 132f.).

The allusion to binding and loosing in the remainder of Mt. 16:19 cannot be detached from the promise concerning the keys, although, if the interpretation favored above is correct, the two concepts are not identical. If the power of the keys is exercised primarily through preaching the gospel, then it has a vital connection with the remission of sins, and Jn. 20:22f. may be used to throw light on Mt. 16:19. But there are significant differences; A. Plummer warned not to read the full meaning of the Johannine saying into this (comm. on Matthew [2nd ed. 1910], p. 231). In the passage in Matthew it is "whatsoever"; in John it is "whosesoever." In Matthew it is binding and loosing; in John it is remitting and retaining.

KEYS, POWER OF THE.

I. Problem.–The reference in Mt. 16:19 to the giving of the keys of the kingdom of heaven to Peter has given rise to considerable debate about what the power of the keys is. On the one side Roman Catholicism insists, on the strength of this saying, that the Roman communion to which Peter came as the first bishop has inherited his prerogative; it is the church in which forgiveness is validly proclaimed, entrance to the kingdom insured, and binding ecclesiastical rules established. On the other side, the churces of the Reformation contend that Peter represents the apostles and that the keys refer to the total apostolic mission, being used to convey the message of remission of believers' sins and to order rightly the Church's life and ministry.

II. Statements.–In Mt. 16:19 Jesus makes two clear statements: first, that He will give the keys to Peter, and second, that whatever Peter binds or looses on earth will be bound or loosed in heaven. The second statement finds a direct parallel in Mt. 18:18, where all the disciples are told that whatever they bind or loose on earth is bound or loosed in heaven. A further parallel has been seen in Jn. 20:22f., where the Lord breathes the Spirit on the disciples and connects with this the pronouncement that if they forgive the sins of any these sins are forgiven, and if they retain the sins of any these sins are retained. To be compared with the first statement are the other sayings about keys in the NT, especially in the book of Revelation. The key of death and Hades is in the hands of the First and the Last (1:1). The key of David is held by the True and Holy One who irresistibly opens and shuts (3:7). The key of the bottomless pit is given to angels (20:1). In Lk. 11:52 the lawyers are condemned because they have taken away the key of knowledge, neither entering the kingdom themselves nor letting others do so.

III. Interpretation of the Statements.–All authorities agree, of course, that the statements in Mt. 16:19 are metaphorical. The image of the delivery of a key is sometimes connected with the giving of the "key of knowledge" to a scribe at ordination (cf. Lk. 11:52; *HDB*, *s.v.* "Binding and Loosing"). In Isa. 22:22, Eliakim, at his appointment as steward, has the key of the house of David placed on his shoulder, and it is stated that no one will be able to shut what he opens or opens what he shuts. A relation of the thoughts of scribe and steward with Mt. 16:19 may be that the scribe exercises good stewardship when he imparts knowledge of God's word and work and thereby opens the door of heaven to those he instructs. Binding and loosing may well represent releasing and nonreleasing from offenses, although some scholars prefer to see here again an agreement with rabbinic usage and thus to equate binding and loosing with ecclesiastical rulings on what is right or wrong according to the law of God.

IV. Relation of the Statements.–The relation of the two statements in Mt. 16:19 to each other and to v. 18 has also been debated. There can be no doubt that v. 19 is part of a series of sayings to Peter arising out of his confession in v. 16. Whether building the church on this rock parallels giving the keys of the kingdom to Peter may, however, be debated. The first and second clauses in v. 19 seem to be integrally related. Some scholars have argued that the keys denote a special authority that might also embrace civil matters and that is conferred on Peter alone and (at least by implication) the bishops of Rome as his successors. In contrast, binding and loosing is more general, being elsewhere conferred on all the apostles and finding its counterpart in the common or individual absolving that is the function of every priest. Over against this view one should note that here the two statements are both addressed to Peter and that in the light of the key metaphor they obviously have an inner relation; if in other passages the binding and loosing are related to all the apostles, the same may be said of the keys of the kingdom, too.

V. Role of Peter.–Whether the power of the keys was vested in Peter alone depends in part on the nature of his confession in Mt. 16:16. Since Jesus asked all the disciples who they said He is, Peter most likely made his famous confession not only for himself but for the others, too. Thus one might infer that the reply of Jesus applied to Peter representatively rather than individually. Even if it applied individually, the question arises whether it applied to him as a private person or as a member of the community. Also, if it was spoken exclusively to Peter, the further question arises whether it extended beyond him to those who would succeed him in a specific office (and, if so, what that specific office is). The thesis that the bishops of Rome succeeded to this office, and are thus vested with the keys as Peter was, depends on particular answers that lack convincing support.

VI. Question of Power.–Whether the keys have the primary signification of power may also be debated. Jesus' role as the holder of the key of death and Hades suggests

that just as Peter and the apostles can be the Church's foundation only because Jesus Himself is the one foundation, so they have the authority of the keys only as His authorized stewards. Stewardship, however, implies responsibility or obligation as well as power. The papacy itself implicitly recognizes this when it claims to be Christ's vicar on earth, for the stress in vicariate lies more on accountability than on privilege.

VII. NT Examples.–The NT gives no direct examples of the use of the keys or the exercise of binding and loosing. Nevertheless the opening of doors in Acts seems to correspond to the use of the keys, for with the preaching of the gospel and its offer of forgiveness the door is opened to the kingdom. Peter initiated the apostolic mission in Jerusalem by proclaiming in the name of Jesus the remission of sins (Acts 2). Philip took the message to Samaria (ch. 8), men of Cyprus and Cyrene to Antioch (ch. 11), Paul and Barnabas to Asia Minor (ch. 13), and Paul and Silas to Europe (ch. 16). In this connection one reads not only of the opening of doors to locations but also of the opening of a door of faith to the Gentiles (14:27).

Examples of binding and loosing might also be cited. Peter condemned Ananias and Sapphira in Acts 5 and Simon Magus in ch. 8 and decided to baptize Cornelius and his household in Caesarea (ch. 10). Paul in the Spirit passed judgment on Elymas in ch. 13, ruled in the case of the twelve at Ephesus in ch. 19, ordered the Corinthians to turn over the incestuous person to Satan in 1 Cor. 5:5 (cf. 1 Tim. 1:20), and later urged the restoration of this (or another) person to fellowship on the basis of the divine remission (2 Cor. 2:5-11). An instance of binding and loosing in the sense of giving a ruling might be seen in 1 Cor. 7, where Paul accepts the binding nature of marriage but declares release when a believer is deserted by an unbelieving spouse (vv. 10-15).

VIII. Nature, Agent, and Scope of the Power.–From the NT data one may conclude that the power of the keys is not a special privilege or extraordinary authority reserved for one person or group of people. It has no magical, mystical, or arbitrary features, nor is it ecclesiastical or official in a purely institutional sense. The keys undoubtedly relate to the ministry, but only insofar as it is understood as the proclamation of Jesus Christ and the forgiveness that is mediated through Him, which open to believers the door to the kingdom. The gospel, however, is not a message that Christians devise. It has been divinely given and has received a normative form in the apostolic writings of the NT. It is not something that Christian ministers may arbitrarily choose either to pass on or to withhold. They have a sacred responsibility and even a duty to transmit it to others and may pronounce the door closed only to those who will not repent and turn to Christ for salvation.

Peter did receive the keys, but as a representative of the apostles and indeed of all who join in his confession of Christ as the Son of the living God. All confessing believers may thus exercise the "power" of the keys as they offer forgiveness to others through faith in the crucified and risen Jesus. They do this in concert with others, participating in the ministry of the whole Church, which is more specifically committed to those who are called and set apart for the purpose. The declaration of forgiveness may be continually made to Christians themselves as they acknowledge their ongoing sinfulness, but in terms of entry into the kingdom it has first an evangelistic and missionary function. On the basis of Christ's saving work and the divine commission, ministers of God's Word can boldly state that those who respond in faith to the gospel will have forgiveness, whereas those who do not will still be under the divine judgment unless and until they convert and believe.

Since the use of the keys relates to evangelical ministry, it obviously has nothing to do with political authority. Not before Christ's second coming will the kingdoms of this world be His kingdom. The keys bear no relation to hierarchical structure in the church; although church government involves an external gradation of functions, no greater "power" of the keys lies with those higher in the structure. The evangelical pronouncement has unique boldness and validity because the authority behind it is God's, not man's. Thus it is removed from the sphere of human valuation. Divine authority prevents the manipulation of the keys for the attainment of influence or prestige and allows impregnable ground for confidence in what might otherwise seem to be an arbitrary human evaluation.

Binding and loosing primarily refer to the remitting and nonremitting of sins according to the acceptance or rejection of the gospel by those who hear it. Yet the gospel includes instruction in a new life of discipleship as well as an initial act of faith. Certain things are enjoined and others forbidden, not by arbitrary ecclesiastical judgments, but according to the Scriptures. Hence binding and loosing might involve a broader reference to the rulings (or canons) by which Christians may do some things and not do others. These rulings were first made by Jesus and the apostles and have been embodied in Holy Scripture. Neither the whole Church nor individual Christians can claim the right to change dominical and apostolic rulings or to give the same ongoing validity to new ones in new situations. Church canons, or ecclesiastical rulings in indifferent matters, will always be relative and reformable in distinction from the absolute and irreformable binding and loosing of Jesus and the apostles.

KEZIAH kə-zī'ə [Heb. *qᵉṣî'â*–'cassia'; Gk. *Kasia*]; AV KEZIA. The second daughter born to Job after his restoration from affliction (Job 42:14). The word cassia became a feminine noun from the fragrance of the flower.

KEZIZ. *See* EMEK-KEZIZ.

KHIRBET kēr'bət [Arab. *ḫirba*, construct *ḫirbat*]. A low-lying ruin. The term often is part of a place name for an ancient site (e.g., Khirbet Qumrân, "ruins of Qumrân"). It is sometimes abbreviated *Kh*. The Hebrew equivalent is *ḥorbâ*.

KIBROTH-HATTAAVAH kib'rəth-ha-tā'-ə-və [Heb. *qiḇrôṯ hatta'ᵃwâ*–'the graves of greed'; LXX *Mnēmata tēs epithymias*–'graves of desire' (Nu. 11:34)]. The first stopping-place of the Israelites after leaving Sinai (Nu. 33:16). Here they craved meat, and the Lord sent a strong wind that brought a great quantity of quails, which they ate greedily. Then the Lord smote them "with a very great plague," and many were buried at the place, hence the name (Nu. 11:31-34; cf. Dt. 9:22). Since the next stopping-place was Hazeroth (ʿAin Khaḍrā?), the location of Kibroth-hattaavah must be about halfway between Mt. Sinai (generally identified with Jebel Mûsā) and Hazeroth. A reasonable suggestion is Rueis el-Ebeirig, about ten hours' march from Sinai (*GP*, II, 214; *GTTOT*, § 1632, p. 255). W. S. L. S.

KIBZAIM kib-zā'əm. *See* JOKMEAM.

KICK [Heb. *bā'aṭ*; LXX *apolaktízō*–'kick off (or) away'; Syr. *b^{e}'aṭ*–'kick'] (Dt. 32:15); NEB GROW . . . UNRULY; [Gk. *laktízō*] (Acts 26:14).

Hebrew *bā'aṭ*, which occurs only once else in the OT (1 S. 2:29, if the MT is correct; but see P. K. McCarter, *1 Samuel* [*AB*, 1980], p. 87), is of uncertain meaning in Dt. 32:15. Late Hebrew has two homonyms with this spelling, one meaning "kick" and the other "swell, bulge" (M. Jastrow, *Dictionary* [2nd ed. 1926], p. 180). Either meaning would fit the context. If "kick" is the correct rendering, the imagery of the first line of this verse is that of a domestic animal, probably an ox, that becomes too heavy to work and thus rebels when its master attempts to drive it with a GOAD. If "swell" (which would fit the context very well) is correct, then the imagery could again be that of an overweight animal; alternatively, becoming fat could simply be a metaphor for spiritual indifference. Another possible meaning for *bā'aṭ* here is "despise," suggested by C. Rabin on the basis of an Arabic cognate (*SVT*, 16 [1967], 228-230). If this is correct, the implied object would be God.

"Kick" appears only once in the NT (Acts 26:14), in a proverb addressed to Paul by Christ. This proverb, which has close parallels in Greek literature (e.g., Euripides *Bacchae* 794f.; cf. also Ps. Sol. 16:4; Philo *Decalogue* 87), refers to the pain experienced by an animal when it kicks against the goad. In this context it thus probably means, "It is futile for you to resist your destiny (of becoming My apostle)" (I. H. Marshall, *Acts of the Apostles* [*Tyndale*, 1980], p. 395). Some scholars (e.g., F. F. Bruce, *Acts of the Apostles* [1951], p. 444) have interpreted the goads to be Paul's conscience, which would have been bothering him since he had begun persecuting the Christians.

J. E. H.

KID. The English versions differ very little in their translations of the terms for "kid" (Heb. *g^{e}dî*, "kid"; *g^{e}dî 'izzîm*, *b^{e}nê 'izzîm*, "kid(s) from the flock"; Gk. *ériphos*, "kid"). The meat of a kid was very desirable and was frequently prepared for small feasts (Gen. 27:9; Jgs. 6:29), although the fatted calf was even more desirable and more expensive (Lk. 15:23, 27-29). The kid was used in sacrifices (*'ēz*, Nu. 15:11; *b^{e}nê 'izzîm*, 2 Ch. 35:7). The one figurative use of "kid" is Isa. 11:6, which tells that the leopard will lie down with the kid and the wolf with the lamb, an indication of a future hope of peace.

The prohibition against boiling a kid in its mother's milk (Ex. 23:19; 34:26; Dt. 14:21) led to the Jewish dietary laws, practiced today, of not eating meat with milk. The biblical prohibition has been explained as an attempt in Israel to prevent the unorthodox fertility festivals of its neighbors. This interpretation may be correct, but caution must be exercised, for Craigie showed several problems with the Ugaritic text (*UT* 52:14) that is translated "Cook a kid in milk." This rendering rests on a tenuous reconstruction (*ṯb[ḥ g]d*), and refers only to milk, not mother's milk; moreover, "cook" (Ugar. *ṯbḥ*, "slaughter"; cf. Heb. *ṭbḥ*) is a questionable translation (cf. J. C. L. Gibson, *Canaanite Myths and Legends* [rev. ed. 1978], p. 123). Therefore this text is not a real contrast to the biblical prohibition, although it has often been so cited, and the reason for the prohibition remains unknown.

A very difficult passage is Isa. 5:17. Both the RSV and NEB translations are based on an emendation that follows the LXX, making "kids" parallel "lambs." But the MT *gārîm*, "aliens," does not have to be emended if it is connected to Akk. *gūrū*, "ewe," which also preserves the parallelism with "lambs" (*TDOT*, II, 386).

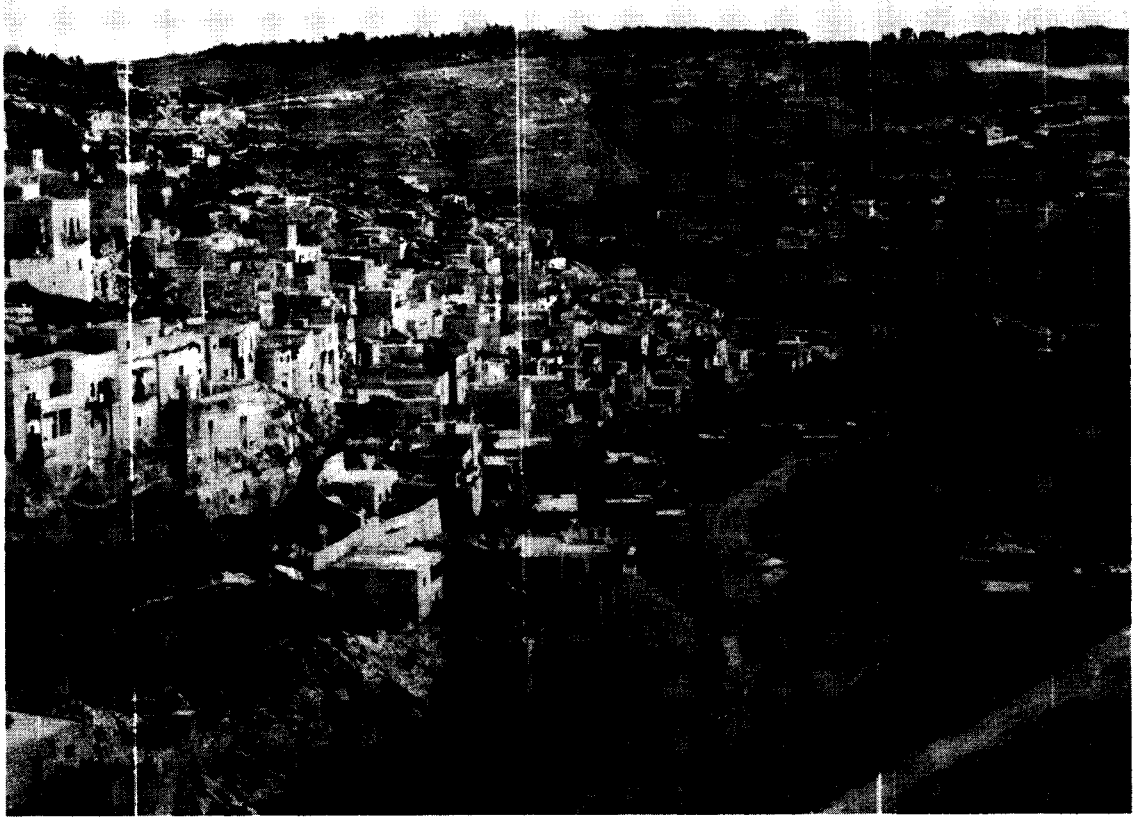
Bibliography.–P. C. Craigie, *Tyndale Bulletin*, 28 (1977), 155-169; *TDOT*, II, *s.v.* "g^{e}dhî" (Botterweck). J. C. MOYER

KIDNAPERS [Gk. *andrapodistès*]; AV MENSTEALERS. The term occurs only in 1 Tim. 1:10, in a catalog of vices that (beginning with the fourth term) corresponds to the Decalogue (Ex. 20:1-17; Dt. 5:6-21). In this passage kidnaping corresponds with the eighth commandment, "You shall not steal" (Ex. 20:15; Dt. 5:19). This should not appear odd when one considers that rabbinic exegesis included under this commandment kidnaping for the purpose of selling a person as a slave (SB, I, 210ff.; cf. Ex. 21:17; Dt. 24:7). In the OT, kidnaping for sale carried the death penalty (Ex. 21:17; Dt. 24:7; cf. Gen. 37:28; 40:15; cf. also Code of Hammurabi, § 14).

KIDNEYS kid'nēz [always in the pl.; Heb. *k^{e}lāyôṯ*; Gk. *nephroí*; Lat. *renes*, whence the English "reins"]. "Reins" and "kidneys" are synonyms, but the AV undertook a distinction by using the former word in the figurative and the latter in the literal passages. In figurative uses the RSV generally translates "heart," "inward parts," "mind," or "soul." The ancient Hebrews assigned specific emotional functions to the major organs of the body, regarding the kidneys as the seat of passion and anger; they apparently did not understand the organs' physiological action.

The kidneys were important in the sacrificial rituals because of the adipose tissue surrounding them. This fat was remarkably pure and in literary use became synonymous with excellence, prosperity, and the like (cf. Job 15:27; Isa. 25:6; Ezk. 34:3; etc.). Being readily combustible, the abdominal fat served sacrificial purposes well and so was credited with a particular sanctity (Lev. 7:22-33; 1 S. 2:16). The kidneys and their accompanying fat were burned in every sacrifice in which the entire animal was not consumed, whether in peace (Lev. 3:4ff.; 9:19), sin (Ex. 29:13; Lev. 4:9; 8:16; 9:10), or guilt (Lev. 7:4) offerings. In Isa. 34:6 the fat of rams' kidneys was equated in importance with the blood of lambs and goats in the sacrificial system. Being rather inaccessible, the kidneys represented dramatically the more remote parts of a person (Ps. 139:13; RSV "inward parts"). Thus to have the kidneys slashed open was tantamount to complete destruction of the individual (cf. Job 16:13).



In a psychosomatic sense, the kidneys were credited with an ability to instruct the mind (Ps. 16:7; RSV "heart") or to challenge motivation (73:21; RSV "heart"). Similarly, God was held to withdraw from those who were governed by the emotions associated with the kidneys (Jer. 12:2; RSV "heart"). Proper control of the passions could bring rejoicing (Prov. 23:16; RSV "soul"); venting them would result in distress (2 Esd. 5:34) or anger (1 Macc. 2:24). God's sovereignty over mankind enables Him to "try the minds and hearts" (Ps. 7:9 [MT 10]; 26:2; Jer. 11:20; 17:10; 20:12; Wisd. 1:6; Rev. 2:23) to determine motivations.

KIDON (1 Ch. 13:9, NEB). *See* CHIDON.

KIDRON, BROOK; KIDRON VALLEY kid'ron, kid'rən [Heb. *naḥal qidrôn*; Gk. *ho cheimárrous toú Kedrōn* (Jn. 18:1)]; AV also CEDRON; NEB also KEDRON. A valley E of Jerusalem, separating it from the Mt. of Olives. The valley results from the confluence of several valleys NE of Jerusalem, probably the most important of which is

Village of Silwan in the Kidron Valley (W. S. LaSor)

Wâdī ej-Jôz, with which it is sometimes identified. It ends, strictly speaking, where it joins the Hinnom Valley to form the Wâdī en-Nâr, with which it is alternatively identified. Locally the Kidron is known successively, from north to south, as Wâdī Sittī Maryam ("the valley of our Lady Mary"), Wâdī Ṭanṭur Far'ûn ("the valley of the tomb of Pharaoh['s Daughter]"), and Wâdī Silwân ("the valley of Siloam"). The Kidron is a seasonal watercourse, i.e., it only carries water in the rainy season; hence it is called a *wâdī* in Arabic, a *nahal* in Hebrew (the only valley in the Jerusalem area so called in the OT), and a *cheimárrous* ("winter-flowing") in the LXX and the Gospel of John. In fact, because of the great quantities of debris, the Kidron seems to have no water at all, even in the rainy season. Its present bed, SE of Jerusalem, is about 12 m. (39 ft.) higher and 27 m. (89 ft.) farther east than the original location.

Near the confluence of the Kidron and the Hinnom is a region of luxuriant growth, suggesting that the "king's garden" (Neh. 3:15) was in this location. There are also references to a watering system in or along the Kidron. The water for such projects came from Spring Gihon, not from the Kidron (*see* JERUSALEM III.C.2.g; D.5.t).

The Kidron Valley is mentioned in the OT only in the period of the kings, and then in only two kinds of references. First, it was the eastern boundary of Jerusalem and, apparently, of the king's direct authority. Thus when David fled from Jerusalem at the time of Absalom's conspiracy, he "crossed the brook Kidron" (2 S. 15:23) and was beyond the reach of the plotters. Again, when Shimei was under "house arrest" in Jerusalem, he was warned by Solomon, "on the day you go forth, and cross the brook Kidron, know for certain that you shall die" (1 K. 2:37). "Crossing the brook Kidron" may have been an idiom for attempting to leave the city by any route, as is perhaps indicated by the sequel to the account in v. 42. The principal gates to the city at that time were on the Kidron side.

Second, the Kidron is the place where images and altars to other deities were destroyed. There Asa burned the idol of his mother Maacah (1 K. 15:13). There Hezekiah destroyed the "uncleanness" that was found in the house of the Lord (2 Ch. 29:16) and the altars for burning incense that were found in Jerusalem (30:14). There Josiah had Hilkiah the high priest burn the Asherah from the house of the Lord (2 K. 23:6) and the altars that the kings of Judah had erected on the roof of the upper chamber of Ahaz and that Manasseh had made in the two courts of the house of the Lord (23:12). Hilkiah also burned in "the fields of the Kidron" the vessels made for Baal, for Asherah, and for all the host of heaven. The word for "fields" is *šᵉḏēmâ*, used only in the plural. In other passages it appears to mean "cultivated fields" (BDB, p. 995). However, it may have a different meaning in 2 K. 23:4 and Jer. 31:40, in light of the ancient versions. The LXX translates — rather, transliterates — the words in 2 K. 23:4,

en sadēmōth Kedrōn, but Lucian translates the words *en tǭ empyrismǭ,* "in the burning-place." In the Jeremiah passage, *K* reads *šᵉrēmôṯ,* emended in *Q* to *šᵉḏēmôṯ,* and the LXX (38:40) follows *K,* reading *Asarēmōth.* The Vulg. translates the phrase *regionem mortis,* "region of the dead," suggesting that it read the Hebrew as *śᵉḏê māweṯ,* dividing the consonants into two words and vocalizing them accordingly. These facts indicate that an area along the Kidron may have been set apart for such acts of iconoclasm, much as took place in the Hinnom Valley.

In the NT, the word Kidron occurs only in Jn. 18:1. Even there, textual variants suggest that the name was not familiar, and manuscripts have *tou Kedrou, tōn Kedrōn,* and *tōn dendrōn,* whereas only Codex Alexandrinus (supported by a few later MSS, the Vulg., and the Syr.) has the correct reading *tou Kedrōn.*

In modern books on eschatology, the Kidron has been given a disproportionately large place. According to Ezk. 47:1-12 a stream of water shall issue from the temple, flow toward the east, and ultimately reach the (Dead) Sea. It shall turn the waters of the sea sweet, so that they become abundant in fish, and the banks of the river shall be lined with trees whose fruit shall be for food and whose leaves for healing. Modern interpreters of this passage often associate the new river with the Kidron Valley and the Wâdī en-Nâr. Likewise, in Joel 3:18 (MT 4:18) a fountain flows from the house of the Lord and waters the valley of Shittim, which is taken to mean the Kidron (more specifically, Wâdī en-Nâr). In Zec. 14:4, 8, however, the living waters flow eastward from Jerusalem through a new opening made in the Mt. of Olives. The spiritual intent of these promises of living water has often been overlooked by such interpreters.

Because of such prophecies and such interpretations, a somewhat fantastic set of identities has developed around the Kidron Valley, beginning about the 4th cent. A.D. It has become the Valley of Jehoshaphat of Joel 3:2 (MT 4:2), the scene of the last judgment. As a result, Jewish, Christian, and Moslem belief in this interpretation has led to a very great number of graves on the slopes of the Kidron, particularly that portion E of the temple mount. The Valley of Hinnom of Jer. 7:31-33 has sometimes been located in the same area, and the distinction between the Hinnom and the Kidron has thus been lost. Even the valley of Baca ("weeping") of Ps. 84:6 (MT 7), because of the promise to make it a "place of springs," has been identified with the Kidron. Doubtless because of such manipulative exegesis, even the name "torrent of Kidron" has come into the vocabulary (cf. *GP,* I, 401 n. 3).

Bibliography.—*GP,* I, 83f., 400f.; *GTTOT,* § 139; *Jerusalem in the OT* (1952), pp. 9f.; G. A. Smith, *Jerusalem* (1907), I, 39-41.

W. S. LASOR

KILAN kī'lən [Gk. *Kilan*]; AV CEILAN; NEB KEILAN. Head of a family whose sons returned with Zerubbabel after the Exile (1 Esd. 5:15). The sons' names do not appear in the lists of Ezra and Nehemiah.

KILL [Heb. *hārag* (e.g., Gen. 4:8), hiphil of *mûṯ* (e.g., Ex. 1:16), hiphil of *nāḵâ* (e.g., Gen. 4:15), *šāḥaṭ* (e.g., Ex. 12:6), *rāṣaḥ* (e.g., Ex. 20:13; Dt. 5:17), *zāḇaḥ, ṭāḇaḥ, ḥālal, qāṭal*]; AV also SLAY, SMITE, PUT TO DEATH; NEB also MURDER, SLAUGHTER, LET DIE, etc.; [Gk. *apokteínō* (e.g., Mt. 10:28); *phoneúō* (e.g., Mt. 5:21), *anairéō* (e.g., Acts 5:33), *thýō* (e.g., Lk. 15:23), *diacheirízō* (Acts 5:30; 26:21), *thanatóō* (Rom. 9:36; 2 Cor. 6:9), *apothnḗskō* (He. 11:37), *phthóra* (noun, 2 Pet. 2:12)]; AV also DO MURDER, PUT TO DEATH, SLAY, etc.; NEB also (COMMIT) MURDER, PUT TO DEATH, MASSACRE, etc.

I. In the OT
  A. Hebrew Terms
  B. Sixth Commandment
II. In the NT

I. In the OT.—A. Hebrew Terms. Although each of the three major Hebrew verbs for killing has its distinctive meaning — *hārag,* "take (someone's) life, kill"; *mûṯ* (hiphil), "put to death"; *nāḵâ* (hiphil), "smite, strike (a mortal blow)" — they are sometimes used as synonyms in the Hebrew Bible. 2 S. 14:7 is especially instructive in that it combines all three: "Give up the man who struck [hiphil of *nāḵâ*] his brother, that we may kill [hiphil of *mûṯ*] him for the life of his brother whom he slew [*hārag*]." Various passages use *hārag* and *mûṯ* (hiphil) interchangeably. In 1 K. 18:12-14 *hārag* represents the penalty for Obadiah's subversive action against Queen Jezebel, yet in v. 9 this same penalty is *mûṯ* (hiphil). Cf. also Gen. 37:18, 20; 2 K. 17:25f.

Hebrew *hārag,* "take life, kill," has Old South Arabic and Moabite cognates, both of which by their usage suggest that the term originated from the vocabulary of holy war — the killing of enemies according to sworn oath. *Hārag* occurs 165 times in the Hebrew Bible, spanning the literature from the earliest texts (e.g., Gen. 49:6; RSV "slay") to the latest (e.g., the Chronicler's history). *Hārag* appears most often in narrative texts and least often in legal texts (see *TDOT,* III, 449f.). Usually the subjects and objects of *hārag* are persons, whether individuals (e.g., Cain in Gen. 4:8; an Egyptian taskmaster in Ex. 2:14), groups (e.g., Simeon and Levi in Gen. 34:25; heirs of Ahab in 2 Ch. 22:8), or nations (e.g., Israel against Midian in Nu. 31:17; Israel in Ex. 5:21). In some instances God Himself is the subject of *hārag* (e.g., Ex. 4:23 [RSV "slay"]; Nu. 11:15). In a few exceptional cases the subject is nonhuman — e.g., lions in 2 K. 17:25 and the viper's tongue in Job 20:16. Of the fifty-five times that the RSV translates *hārag* as "kill," only twice is the object nonhuman: Lev. 20:15f., an animal used in bestiality; Nu. 22:29, Balaam's ass (cf. also Isa. 22:13, oxen [RSV "slaying"]). The killing of animals is elsewhere consistently expressed through the terminology of sacrifice or of meat preparation (esp. *šāḥaṭ, zāḇaḥ,* and *ṭāḇaḥ*; see below). The LXX normally uses *apokteínō,* "kill (someone)," to translate *hārag* (e.g., Neh. 4:11 [MT 5]).

The earliest meaning of *hārag* appears to be "kill enemies in battle or in exercising the ban [Heb. *ḥērem*]." In Nu. 31:17, e.g., *hārag* functions as the equivalent of the hiphil of Heb. *ḥāram,* "put to the ban," in the narration of the ritual destruction of Midian under the rubrics for the conduct of holy war. See also Gen. 34:25; "slay," in 49:6; "slaughtering" in Josh. 8:24-26.

A later usage of *hārag* is for the killing of political opponents (esp. in throne successions, coups, revolutions, etc. [2 Ch. 22:8]), who were often also religious opponents (1 S. 22:21 [cf. the hiphil of *mûṯ* in v. 18]; 1 K. 18:13; Neh. 4:11; 6:10; "slay" in Est. 3:13; 8:11; 9:6, 15f.). *Hārag* designates the penalty for (assumed) treason in 1 S. 16:2; 1 K. 18:12-14, for apostasy in Dt. 13:9, and for regicide in 2 S. 4:12 (David's order of execution for the assassins of Saul's legitimate heir; cf. "slew," v. 10).

Hārag also denotes the killing of (nonpolitical) rivals or opponents. Thus it expresses the violent intent of Esau toward Jacob (Gen. 27:41f.) and of the brothers toward Joseph (37:20), and the violent result of the sibling rivalry between Cain and Abel (the notorious first murder, Gen. 4:8; cf. "have slain," v. 23). See also *TDOT,* III, 453f. Occasionally *hārag* refers in legal texts to a crime. Ex.

21:12-14 distinguishes homicide (understood neutrally, v. 13) from murder (v. 14, *lᵉhorgô bᵉʿormâ*, "to kill him treacherously"). *Hāraǧ* in this usage remains neutral; the qualifier *bᵉʿormâ* makes it wilful murder that disqualifies the killer from refuge. Cf. Ps. 94:6, where the wicked "slay [*hāraǧ*] the widow and the sojourner, and murder [*rāṣaḥ*] the fatherless."

Hāraǧ appears in Ex. 22:24 as a mode of divine retribution (by the sword). In Job 5:2 the simple person "slays" himself through an outburst of anger (par. the hiphil of *mûṯ*). The RSV translates *hāraǧ* "slay" or "slaughter" in numerous other passages.

Hebrew *mûṯ* in the causative stem properly means "put to death" (cf. Lev. 20:4; 2 S. 21:4), but in sixty occurrences the RSV translates "kill." It is used to designate homicidal intent (Gen. 37:18; 1 S. 19:1f.; 1 K. 11:40) as well as homicidal action (Ex. 1:16; 1 S. 17:50f.; 2 S. 3:30). The RSV also renders the hiphil of *mûṯ* as "kill" in contexts of regicide and political assassination (1 K. 15:28; 16:10; 2 K. 21:23; 25:25 par.).

In its primary sense of "cause to die," the hiphil of *mûṯ* appears in the complaint of the people in the wilderness, in combination with *rāʿaḇ* in Ex. 16:3 (NEB "starve to death"), and with *ṣāmāʾ* in Ex. 17:3 (NEB "die of thirst"). In Nu. 14:15f. Moses strives to convince God that it is in His own best interest not to "kill" (*mûṯ* [hiphil]; NEB "put to death") all His timorous people because the other nations would infer that He lacked power to fulfil His divine promises and could thus only slay (*šāḥaṭ*, "slaughter, sacrifice") them in the wilderness. The hiphil of *mûṯ* is also used in Moses' encounter at Midian with the Lord, who sought to "kill" him even though He had only recently called Moses to leadership of His people (Ex. 4:24). This enigmatic story at least underscores the vital significance of the rite of circumcision and thus the seriousness of Moses' oversight (see further Childs, pp. 95ff.). In a similar vein, the faith affirmation that it is the Lord who kills and who makes alive appears in the songs of Moses (Dt. 32:39) and Hannah (1 S. 2:6) as well as on the lips of the king of Israel in the Naaman story (2 K. 5:7); in each instance the verb for "kill" is the hiphil of *mûṯ*. See also the reference in 1 Clem. 59:3 to God as *ho apokteínōn kaí zḗn poiôn*, "the one who kills and makes alive." The hiphil of *mûṯ* also denotes the ox's fatal goring of a person (Ex. 21:29). The hophal of *mûṯ* is used in the conclusion of the same verse to represent the penalty for the negligent owner (RSV "be put to death"). In the sardonic view of the sage, the hiphil of *mûṯ* is used for the death that the sluggard brings upon himself when his desire finally stirs him to unaccustomed action (Prov. 21:25).

Hebrew *nāḵâ* (hiphil) is the major term for "smite, strike down, attack" in the Hebrew Bible (occurring 480 times in the hiphil stem; usually translated by *patássō*, "strike," in the LXX; translated "kill" thirty-six times in the RSV). The hiphil of *nāḵâ* very often refers to the striking of a mortal blow (Ex. 2:12; 1 S. 21:9; 2 S. 21:12; 1 K. 15:27, 29). Since very few cases of smiting and striking down are not fatal (a rare example appears in 2 K. 8:28; RSV "wounded"), the hiphil of *nāḵâ* is easily translated "kill." It may, for example, refer to homicide (Nu. 35:11, 15, 30; Lev. 24:17, 21), violent assault (1 K. 20:36), or defeat in battle (Josh. 7:15; 9:18; Jgs. 3:29; 14:29; 1 S. 17:9). The hiphil of *nāḵâ* is also used in Gen. 4:15 to indicate the mortal attacks that the outlaw fratricide Cain expected to receive from all sides.

The hiphil of *nāḵâ* is frequently combined with the hiphil of *mûṯ* for the more descriptive "struck down and killed" (1 K. 16:10; 2 K. 15:10) or "attacked and killed" (2 K. 25:25 par. Jer. 41:2). In Ex. 22:2 (MT 1) the same combination is translated "struck so that he dies" (cf. NEB "fatally injured"). *Nāḵâ* (hiphil) in the RSV is most frequently translated "smite." *See also* SMITE, STRIKE.

Hebrew *šāḥaṭ* properly means "slaughter (animals as sacrifice)," "kill (so as to drain the blood)" and has clear Akkadian and Arabic cognates with a similar meaning (cf. Ex. 29:16; Ezk. 16:21; 23:39). Although clearly a cultic term, *šāḥaṭ* is simply translated "kill" fifty-three times by the RSV. In most of these occurrences *šāḥaṭ* refers to the slaughter of animals for sacrifice and food (e.g., Ex. 29:11, 20; Lev. 1:5; cf. for Passover Ex. 12:6, 21; 2 Ch. 30:17; 35:6; Ezr. 6:20). It occurs as a sacrificial term in Leviticus altogether thirty-six times. The sole RSV exception, in which a human is the object, is Elijah's killing of the Baal prophets on Mt. Carmel (1 K. 18:40). See the use of *šāḥaṭ* for child sacrifice in Ezk. 16:21; 23:39 (RSV, NEB, "slaughtered") and for Jehu's massacre of the heirs of Ahab in 2 K. 10:7, 14 (RSV "slew"). In Isaiah's indictment of Jerusalem's wrongheaded response to the siege of Sennacherib — celebrating with merriment and sacrifice the completion of its vaunted antisiege defense system instead of issuing a call to repentance — *šāḥaṭ* is paired synonymously with *hāraǧ* (Isa. 22:13, "slaying oxen and killing sheep").

Although Heb. *rāṣaḥ* and its participial forms usually appear as "murder," "manslayer" in the RSV, it is also translated simply as "kill" in five instances. Two of these represent the eventually definitive appearance of the term in the commandment against killing (Ex. 20:13; Dt. 5:17), and one occurrence is in Hosea's charge against Samaria (Hos. 4:2), which strongly echoes the Mosaic commandment. It is particularly enlightening that *rāṣaḥ* is the verb used for Ahab's heinous crime against the life of Naboth (1 K. 21:19; RSV "killed"), for it connotes more strongly than other synonyms the intentional malicious violence of the act (see also I.B below on the sixth commandment as prohibiting murder). The RSV also has "kills" for *rāṣaḥ* in Dt. 4:42 in connection with the provision for refuge for the accidental murderer. *See also* MURDER; MANSLAYER.

The familiar Hebrew paradigm verb, *qāṭal*, "kill," is actually translated "kill" only once by the RSV, in reference to the murderer (*rôṣḗ(a)ḥ*, from *rāṣaḥ*) who rises early to "kill" the poor and needy (Job 24:14).

Hebrew *ḥālal*, "pierce, wound," is twice translated "kill" in the RSV. (Otherwise [Job 13:15; Ps. 139:19] God is the subject of this verb, and the RSV translates "slay.") Since in military terminology *ḥālal* is a technical term for the "wounded" in battle (e.g., 1 K. 11:15; RSV "slain"), in Jgs. 20:31, 39 *ḥᵃlālîm* possibly refers to wounded soldiers (cf. LXX *traumatías*), so that the Benjaminites were beginning their sortie by "smiting" and "killing" those few wounded, the survivors of earlier battles, who were still lying in the open field or along the roads. *See also* WOUND.

Hebrew *zāḇaḥ*, "slaughter, sacrifice," although occurring 113 times in the Hebrew Bible, is translated "kill" only three times in the RSV, always to indicate the sacrificial slaughter of food animals. *Zāḇaḥ* may refer both to the routine work of the butcher in preparing cuts of meat and to the whole ritual procedure of preparing and offering an animal in sacrifice. In contrast with the regulations of the Holiness Code (Lev. 17:3-9), Dt. 12:21 allows those who live far from the temple to slaughter animals at home rather than at the sanctuary. In 1 S. 28:24f. the medium of Endor, after stupefying Saul with her feat of necromancy, "killed" a fatted calf and prepared a meal for Saul before his departure. In his lavish attempt to induce Jehoshaphat to join him against Ramoth-gilead, Ahab "killed" an abundance of sheep and oxen (2 Ch. 18:2). In each of these three instances the LXX has Gk. *thýō*, "sacrifice, immolate," for Heb. *zāḇaḥ*, underscoring the ritual character

of this preparation of food animals. Indeed, the act of slaughtering became sacrifice in that, while much of each animal was consumed as food, the blood, fat, and certain other parts were set aside for God. The RSV also translates *zāḇaḥ* "sacrifice" (e.g., in 1 S. 6:15; Hos. 6:6; cf. LXX *thýō* in both).

The verb *ṭāḇaḥ* occurs only eleven tims in the Hebrew Bible, always applied to food animals in the sense of "slaughter, butcher" (cf. the similar meaning of the cognate *ṭbḥ* in both Akkadian and Ugaritic). *Ṭāḇaḥ* is twice translated "kill" in the RSV. It has its usual nonculticsense of preparing meat for cooking and eating in 1 S. 25:11 (LXX *thýō*) and in Ex. 22:1 (MT 21:37), the regulation covering one who "kills" (LXX *sphágō*, "slaughter") a stolen food animal, obviously to eat it. *Ṭāḇaḥ* occurs in poetic parallelism with *zāḇaḥ* in Isa. 34:6. See further *TDOT*, V, *s.v.* "tabhach" (Hamp).

B. Sixth Commandment. Underlying the prohibition against killing is the deeply ingrained Hebrew conviction of the utter sanctity of human life. The precise nature and scope of "killing" that are signified by the Hebrew verb *rāṣaḥ*, however, have been intensely debated. *Rāṣaḥ* is not as common as *hārag* or the hiphil of *mûṯ* (46 occurrences, compared with 165 and 201, respectively). This relatively sparse use alone has suggested that *rāṣaḥ* has a special meaning, understood by numerous commentators as "murder." Some modern translations have thus understood the prohibition as forbidding the committing of murder and have so translated the term (e.g., NEB "commit murder," NIV, NASB, "murder," Ex. 20:13). The great advantage of this rendering is the elimination of the tension between what appears to be an all-inclusive prohibition against killing in any form and a number of OT passages that sanction the taking of human life either in battle or as punishment for crime (e.g., Ex. 21:12-17; Dt. 20:10-18).

B. Childs, following Stamm and Reventlow, has contended that *rāṣaḥ* was originally part of the vocabulary of blood vengeance and has its earliest definition in such passages as Nu. 35:16-21, where the formula *rōṣē(a)ḥ hû'* (RSV "he is a murderer") delineates these actions that constitute *rāṣaḥ*. Originally the term functioned objectively to define the acts against persons that could not in fairness be allowed to go unrequited by the vengeance of the *gô'ēl*, the kinsman of blood. For cases of unintentional homicide the system of refuge cities was devised to provide sanctuary for the innocent (vv. 6, 22-28). At some later point (before the 8th cent.) *rāṣaḥ* came less and less to be a neutral term for homicide and began more specifically to denote the malicious killing of a person (cf. v. 20). Thus as it now stands the sixth commandment prohibits such acts of intentional and malicious violence against another person (see Childs, pp. 419ff.).

II. In the NT.–Greek *apokteínō*, "kill (someone), put to death," has seventy-four occurences in the NT, and the RSV translates sixty-three of them "kill" (e.g., Mt. 10:28, "those who kill the body but cannot kill the soul"; 21:38 par.; 26:4 par. [NEB "put to death"]; Jn. 5:18; Rom. 11:3). *Apokteínō* occurs and is translated "kill" most often in the Gospels and in Revelation (fifty-three times). Its objects most often are those who represent or speak for God (e.g., Mt. 23:27). In Jn. 16:2 the unfortunate, yet ever recurring, notion that killing an'unbeliever" may constitute a service to God is expressed with *apokteínō*. It may also have the sense "condemn to death" (thus NEB in 2 Cor. 3:6). In the sole NT example of the figurative use of *apokteínō* (Eph. 2:16) the RSV translates "bringing . . . to an end."

In the active voice Gk. *anairéō* means "do away with, destroy (someone)," usually by violent means (combat, assassination, murder, or the like). It is translated "kill" in sixteen instances by the RSV, fifteen of which are in Acts (cf. Acts 9:24; 16:27; 23:15 [NEB "do away with"]). The RSV also translates *anairéō* as "put to death" (e.g., Paul in Acts 26:10; Jesus in Lk. 22:2).

Greek *phoneúō*, "murder," is translated "kill" by the RSV in ten of its eleven NT occurrences. This is the verb that appears whenever Jesus cites the commandment against killing (Mt. 5:21 par. 19:18) and, similarly, in Paul's summary of the law (Rom. 13:9) and in James's interpretation of the commandments (Jas. 2:11).

Greek *thýō*, "sacrifice, immolate," is translated "kill" by the RSV seven times. The specialized ritual character of this verb (preparation of animals for sacrifice and food) may be seen in the circumstances of its use: the "killing" of the fatted calf (Lk. 15:23, 27, 30), of oxen and fat calves for the marriage feast (Mt. 22:4), of the flock by the thief (Jn. 10:10), and of a variety of animals in Peter's Caesarea vision (Acts 10:13; 11:7). Cf. also Tob. 7:8; Ex. 12:21 (of the Passover lamb). The RSV also translates *thýō* "sacrifice" (the Passover, Lk. 22:7; Christ as the paschal lamb, 1 Cor. 5:7). Paul's discussions in 1 Cor. 8:4-13; 10:25-30 are instructive on the close relation between sacrifice and the slaughtering of food animals in the ancient Mediterranean world.

Greek *diacheirízomai*, "handle violently," easily possessses the extended sense "kill" and is so translated by the RSV in both its NT occurrences. This is the verb that characterizes the "killing" of Jesus on the cross in the preaching of Peter and John (Acts 5:30; NEB "had done to death") as well as the intentions of the opposition, to which Paul referred in his defense speech before Herod Agrippa (Acts 26:21; NEB "do away with"); see also Josephus *Ant.* xv.6.1 (173).

Greek *thanatóō*, "deliver up unto death, kill," familiar in the LXX as the equivalent of the Hebrew verbs *hārag* and *mûṯ* (hiphil), appears twice as "kill" in the RSV NT. Paul discovered that it is characteristic of the paradoxical servant life that "we are treated . . . as dying, and behold we live; as punished, and yet not killed" (2 Cor. 6:9; NEB "not done to death"). Rom. 8:36 quotes Ps. 43:22 (= LXX Ps. 44:22 [MT 23]), "For thy sake we are being killed all the day long" (Heb. *hārag*), a clear use of hyperbole for constantly being in danger of death. The RSV more commonly translates *thanatóō* as "put to death" (e.g., in Mt. 27:1; Mk. 13:12; 14:55; 1 Pet. 3:18; cf. also 1 Clem. 12:2).

Greek *apothnḗskō*, "die (of natural causes)," in one instance is translated "killed" by the RSV: the fearful catalog of sufferings borne by faithful martyrs in Heb. 11:37 includes "[being] killed with the sword" (NEB "put to the sword").

2 Peter 2:12 warns against the false teachers who are like "irrational animals . . . born to be caught and killed." Here Gk. *phthóra*, translated "killed," is actually a noun meaning "ruin, dissolution," often having the moral connotation of depravity or corruption (cf. Mic. 2:10, LXX, where *phthóra* represents Heb. *ṭom'â*, "impurity, uncleanness"; 2 Pet. 1:4; 2:19, RSV "corruption").

KIN; KINS(WO)MAN; KINSFOLK [Heb. *'āḥ*–'brother,' *qārôḇ*–'near' (Job 19:14; Ps. 38:11 [MT 12]), *gō'ēl*–'re-

deemer' (Nu. 5:8; 1 K. 16:11), *môḏaʿ* (*Q*; *K mᵉyuddāʿ*) and *môḏaʿaṯ* (Ruth 2:1; 3:2), *ʿam-* 'people' (Jgs. 5:14), *ḥay-* 'life' (1 S. 18:18), *šᵉʾēr-*'flesh' (Jer. 51:35), *dôḏ-*'uncle' (Am. 5:10); Gk. *syngenḗs, syngenís* (Lk. 1:36)]; AV also BROTHER (e.g., Gen. 14:14), LIFE (1 S. 18:18), UNCLE (Am. 6:10), COUSIN (Lk. 1:36), etc.; NEB also BROTHER (e.g., Jgs. 9:18), UNCLE (Am. 6:10), etc.; **KINDRED** [Heb. *môleḏeṯ-*'descendants,' *mišpāḥâ-*'clan, family' (Gen. 24:38, 40f.; Josh. 6:23), *ʿam* (Gen. 25:17); Gk. *syngéneia*]; AV also PEOPLE (Gen. 25:17); NEB also FAMILY (e.g., Gen. 24:38); **NEAR (OF) KIN, NEXT OF KIN, NEAR KINSMAN, etc.** [Heb. *šᵉʾēr, šᵉʾēr bāśār-*'flesh of flesh' (Lev. 18:6; 25:49), *šᵉʾēr haqqārôḇ* (21:2), *gōʾēl haqqārôḇ-*'the nearest (kinsman-)redeemer' (25:25), *gōʾēl-*'one who redeems=next of kin' (Ruth 2:20; 3:9, 12; 4:1, 3, 6, 8, 14), *gāʾal-*'redeem=do the part of next of kin' (3:13), *qārôḇ* (2 S. 19:42 [MT 43])].

1. OT Terms.–The Hebrew terms discussed below indicate various degrees of kinship, from close blood relationship to intertribal relationships according to the tradition that the twelve tribes of Israel were the descendants of Jacob's twelve sons. (For evaluations of this tradition cf. Gottwald; R. de Vaux, *Early History of Israel* [Eng. tr. 1978], pp. 717-749; G. Mendenhall, *Tenth Generation* [1973], pp. 174-197; *see also* PATRIARCHS; TRIBE.) On Albright's theory that *paḥaḏ yiṣḥāq* should be translated "kinsman of Israel," *see* FEAR II.C.

A. Kin, Kinsfolk, Kinsman. These terms most frequently translate Heb. *ʾāḥ*. Although *ʾāḥ* is usually rendered "brother," it can also denote a nephew (Gen. 13:8; 14:14, 16; 29:12, 15), a more distant relative (Ruth 3:2; 4:3), any relative at all (Gen. 16:12; 1 Ch. 9:6, 9, 13), or one descended, according to tradition, from a common ancestor (1 K. 12:24; 1 Ch. 7:5; 2 Ch. 28:8; Jer. 7:15; 29:16). Cf. *TDOT*, I, 190-92.

Other general terms for kin are:

(1) *Gōʾēl*, twice used of distant relatives (Nu. 5:8; 1 K. 16:11; see further below).

(2) *Qārôḇ* (<*qāraḇ*, "draw near, approach"), used in a wordplay ("near"–"far") in Ps. 38:11.

(3) *Môḏaʿ* (the *kethibh* may be preferable; cf. E. Campbell, *Ruth* [*AB*, 1975], pp. 88-90; J. Sasson, *Ruth* [1979], p. 39) and *môḏaʿaṯ* — both from *yāḏaʿ*, "know." These terms are used of Boaz in the book of Ruth, apparently designating a general relative; only when Boaz assumes the kinsman-redeemer role is he called a *gōʾēl* (see below).

(4) *Šᵉʾēr*, also used generally in Jer. 51:35, although textual uncertainty allows a more literal interpretation (see J. A. Thompson, *Jeremiah* [*NICOT*, 1980], p. 761 n. 4; see further below).

(5) *Dôḏ*, Am. 6:10, probably referring to a close relative, although the text is problematic (see the comms.).

(6) *ʿAm*, which, according to J. Gray (*Joshua, Judges and Ruth* [*NCBC*, 1977], p. 222), "denotes a tribal ancestor or senior relative," but the context makes R. Boling's translation, "troops," more likely (*Judges* [*AB*, 1975], p. 102; cf. also *ILC*, I-II, 55f.).

(7) *Ḥay*, which usually means "life, living" but one time (1 S. 18:18) denotes some kind of relative, apparently a member of David's immediate family. *Ḥay* is usually explained on the basis of Arab. *ḥayy*, "tribe" (see W. R. Smith, *Kinship and Marriage in Ancient Arabia* [2nd ed. 1903], pp. 41-46; S. R. Driver, *Notes on the Hebrew Text and Topography of the Books of Samuel* [2nd ed. 1913], p. 153). But Gottwald (pp. 260f.) noted that the feminine form, *ḥayyâ* (2 S. 25:13), refers to a Philistine fighting unit, and thus he suggested that *ḥay* means a specific social unit, probably a military organization, not just "kinsmen."

B. Kindred This is another vague term for relatives. In Gen. 12:1 the progression from country to kindred (Heb. *môleḏeṯ* <*yālaḏ*, "bear [children]") to father's house sets the limits of the term. Thus *môleḏeṯ* does not mean the immediate family (father's house) or just a countryman, but, as G. Wenham (*Leviticus* [*NICOT*, 1979], p. 257) suggested "patrilineage" or "extended family" (cf. also *môleḏeṯ* in Gen. 24:4 and *ʾāḥ* in v. 27).

Gottwald has provided a thorough treatment of *mišpāḥâ*, which he said was composed of "'kinsmen' (not implying common descent as such but basically a community of shared interests) . . . [who] lived together in the same village or neighborhood" (p. 257). Thus he suggested the translation "protective association of extended families" (p. 258; cf. further pp. 301-315; *ILC*, I-II, 46-60). In Gen. 24:38, 40f.; Josh. 6:23, however, *mišpāḥâ* appears to refer to the immediate family (cf. Gottwald, p. 258).

In Gen. 25:17 the RSV arbitrarily translates Heb. *ʿam* "kindred"; *ʿam* in every other occurrence of this expression is rendered "people" (cf. esp. v. 8; *see* GATHER).

C. Near (of) Kin, Next of Kin, Near Kinsman, etc. Except for 2 S. 19:24 these terms appear exclusively in Leviticus and Ruth as the translation of various combinations of *šᵉʾēr, bāśār, qārôḇ*, and *gōʾēl*. According to *CHAL*, p. 357, and *TDOT*, II, 318, *šᵉʾēr* is a synonym of *bāśār*, "flesh." Ugaritic evidence suggests that there are two distinct roots, *ṯʾr*, "kinsman," and *šʾr*, "flesh" (see *UT*, pp. 487, 500), but scholars have disagreed about the meaning of *ṯʾr* (see A. Caquot, M. Sznycer, and A. Herdner, *Textes Ougaritiques*, I [1974], 123f.; M. Dietrich and O. Loretz, "Das Porträt einer Königin in KTU 1.14 I 12-15," *Ugarit-Forschungen*, 12 [1980], 199-204, esp. p. 202). If Ugar. *ṯʾr* does mean "kinsman," then Heb. *šʾr*, "flesh," *šʾr*, "kinsman," and *šʾr*, "remain," are all from distinct roots, and some of the texts discussed below must be interpreted differently. In several texts, however, *bāśār*, which usually means "flesh," does mean "relative" (see BDB, p. 142; *TDOT*, II, 319); thus the one root *šʾr* may also mean both "flesh" and "relative."

The RSV translation of *šᵉʾēr*, "near kin(sman/woman)," reflects a close family relationship in Lev. 18:12f.; 20:19 (aunts); and 18:17 (stepdaughter and stepgranddaughter); cf. Eng. "flesh and blood" as an expression of biological relationship. In 18:6; 25:49 the unusual expression *šᵉʾēr bāśār* (lit. "flesh of flesh"), recalling Gen. 2:23 (*bāśār mibbᵉśārî*; cf. *TDOT*, II, 319, 327f.), seems to mean a close relative (so G. Wenham, *Leviticus* [*NICOT*, 1979], p. 253). Wolff, however (p. 29), interpreted 18:6 in a way that distinguishes *šᵉʾēr* from *bāśār* ("Here *šᵉʾēr*, as the physiological term for flesh . . . is clearly thrown into relief against [*bāśār*] as the legal term for a member of the family"; cf. W. Eichrodt, *Theology of the OT*, II [Eng. tr., *OTL*, 1967], 146f.). But Wolff's distinction is made questionable by 25:49, where the same expression *šᵉʾēr bāśār* clearly means a close relative, one in the same *mišpāḥâ* ("family"), who, after brother (v. 48), uncle, and cousin, is next in line to act as redeemer (*gōʾēl*) for a family member who has sold himself into slavery (see also Gottwald, p. 264).

Šᵉʾēr is also used with *qārôḇ* in referring to the immediate family: mother, father, son, daughter, brother, (unmarried) sister (Lev. 21:2f.). Scholars have disagreed about the interpretation of *šᵉʾērô haqqārôḇ ʾēlāyw mimmišpaḥtô* (lit. "his flesh, the one near to him from his family") in Nu. 27:11. According to Gottwald (p. 265) this expression means "the nearest relative of his *mišpāḥāh*" and refers to "all further degrees of kinship," which have been merged "into one indistinguishable mass"; this interpretation is reflected in most translations (e.g., AV, RSV, NIV). But the NEB's "nearest survivor in his family" reflects the derivation of *šᵉʾēr* from another Hebrew root

š'r, "remain" (cognate to Arab. *ṯ'r*; the first-mentioned Hebrew root *š'r* is cognate to Arab. *s'r*). Although either reading is possible in this context, the NEB's is less likely because of the use of *šᵉ'ēr* and *qārôḇ* mentioned above.

In 2 S. 19:42 *qārôḇ* occurs by itself and means "near (of kin)," referring perhaps to David as a member of the tribe of Judah.

As noted above, the book of Ruth, which is very important for any study of relationships in ancient Hebrew society, has several different terms for relatives. Especially significant are derivatives of the root *g'l.* The part. *gō'ēl,* which eight times in Ruth is used for "next of kin," indicates a relative whose responsibility is to "redeem" his kin, i.e., protect and defend them (cf. *TDOT,* II, 351f.; de Vaux, I, 21f.; on the problem of Ruth see H. H. Rowley, "Marriage of Ruth," in *Servant of the Lord and Other Essays on the OT* [1952], pp. 161-186; Gottwald, pp. 261-64; and esp. the comms. by J. Sasson [1979] and E. F. Campbell [*AB,* 1975]). As the widow of a Hebrew, Ruth had the right to receive full support from her nearest kinsman (cf. Sasson, pp. 90-92, who saw Naomi as the one who would benefit from the kinsman-redeemer's action). In 3:12f. Boaz explains to Ruth that there is a kinsman (*gō'ēl*) nearer to her than he, but that if the other kinsman "will not do the part of the next of kin [*gā'al*]" then Boaz himself will (cf. Lev. 25:25, which tells of the responsibility of the *gō'ēl haqqārôḇ,* "next of kin").

II. NT Terms.–The three NT Greek words denoting kinship are all based on *syn,* "with," + *génos,* "race, stock." Gk. *syngenḗs* in Mk. 6:4 seems to designate distant relatives (note the progression country–kin–house). It may have the same meaning in Luke, especially in 21:16, where the progression is parents–brothers–kinsmen–friends (note also the links with "neighbor" in 1:58, "acquaintances" in 24:4, and "friends, brothers, and neighbors" in 14:12; cf. Acts 10:24). In Lk. 1:36 Gabriel calls Elizabeth Mary's kinswoman (*syngenís*), but the women's exact relationship cannot be deduced from this imprecise Greek term.

In Rom. 9:3 Paul calls the Israelites "my brethren, my kinsmen by race [*katá sárka,* "according to the flesh"]," reflecting the Hebrew notion that all Israelites are relatives. But in 16:7 Paul calls Andronicus and Junias simply "kinsmen," no doubt meaning fellow Jews (cf. vv. 11, 21; E. Käsemann, *Comm. on Romans* [Eng. tr. 1980], p. 414, translating "fellow-countrymen"). Cf. *TDNT,* VII, 740-42.

KINAH kī'nə, kē-nä' [Heb. *qînâ*]. A city allotted to the tribe of Judah during the Conquest (Josh. 15:22). It probably received its name from the KENITES, who established settlements in southern Judah (cf. 1 S. 27:10). The city list in Josh. 15 locates it "in the extreme South, toward the boundary of Edom," and some modern authorities have identified it with Khirbet Ṭaiyib, about 5½ km. (3½ mi.) NNE of biblical Arad (modern Tell ʿArád; cf. *LBHG,* p. 406). This identification has some plausibility because a nearby wadi is named el-Qeini and Kinah is mentioned with ARAD in the Arad ostraca (Y. Aharoni, *Arad Inscriptions* [1975], pp. 48-51; *BASOR,* 197 [Feb. 1970], 16-28; cf. *GP,* I, 273; II, 88, 149; *GTTOT,* §§ 76, 143). J. E. H.

KIND [Heb. *mîn*] (Gen. 1:11f., 21, 25; 6:20; 7:14; Lev. 11:14ff.; Dt. 14:14); [*kil'âyîm*–'two kinds'] (Lev. 19:19); [Gk. *génos*] (Mt. 13:47). In these passages "kind" represents a general classification differentiating animal from animal and plant from plant, and not the precise designation of modern biological species or varieties. Cf. SORT in Gen. 6:19; etc.

KINDNESS [Heb. *ḥeseḏ*] (Gen. 19:19; 20:13; 40:14; Jgs. 8:35; Ruth 2:20; 3:10; 1 S. 15:6; Job 6:14; Hos. 4:1; etc.); AV also MERCY, LOVINGKINDNESS; NEB also LOYALTY, DEVOTION, "keep faith"; [Gk. *epieíkeia*] (Acts 24:4); AV CLEMENCY; NEB INDULGENCE; [*philanthrōpía*] (Acts 28:2); [*chrēstótēs*] (Rom. 2:4; 11:22; 2 Cor. 6:6; Gal. 5:22; Eph. 2:7; Col. 3:12; Tit. 3:4); AV also GOODNESS, GENTLENESS; NEB also KINDLINESS; [*chrēstós*–'kind'] (1 Pet. 2:3); AV GRACIOUS; NEB GOOD; **KIND** [Heb. *ḥāsîḏ*] (Ps. 145:17); AV "holy"; NEB "unchanging"; [*ḥāsed* (pausal)] (Prov. 11:17); AV MERCIFUL; NEB LOYAL(TY); [polel of *ḥānan*–'take pity on'] (Prov. 14:21, 31; 19:17; 28:8); AV HAVE MERCY ON, PITY; NEB BE GENEROUS TO; [*lᵉṭôḇ*–'for good'] (2 Ch. 10:7); NEB "well-disposed"; [Gk. *chrēstós*] (Lk. 6:35; Eph. 4:32); NEB also GENEROUS; [*chrēsteúomai*] (1 Cor. 13:4); [*poiéō kalós*–'do well'] (Acts 10:33; Phil. 4:14); AV "well done"; [*agathós*–'good'] (Tit. 2:5; 1 Pet. 2:18); AV "good"; **KINDLY** [Heb. *ḥesed*] (Josh. 2:12, 14; Jgs. 1:24; Ruth 1:8; 1 S. 20:8); AV also MERCY; NEB "(keep) faith," "honestly," "(see that you come to) no harm" (Jgs. 1:24); [*'al lēḇ*–'to the heart'] (Jgs. 19:3; Ruth 2:13; 2 S. 19:7 [MT 8]); AV FRIENDLY, "comfortably"; NEB also "(appeal) to her" (Jgs. 19:3), "(give) . . . encouragement" (2 S. 19:7 [MT 8]); [*ṭôḇôṯ*–'good things'] (2 K. 25:28; Jer. 52:32); [*agathós*] (1 Thess. 3:6); AV GOOD; [*ḗpion*–'gentle'] (2 Tim. 2:24); AV GENTLE.

"Kindness" in the RSV of the OT is always a translation of Heb. *ḥeseḏ*; this term is also once rendered "kind" and five times "kindly." *Ḥeseḏ* is a rich word that has no satisfactory English equivalent. Its etymological origins are not certain. In the OT it basically denotes an attitude and a behavior that display faithfulness to an obligation to a relative, friend, host, guest, master, subject, etc. (*TDNT,* II, 479). This concept became prominent in the history of Israel particularly in relation to the covenant (see Snaith, p. 98).

Ancient Israel shared with Arabia a tradition in which family and tribal bonds had primary importance. The term *ḥeseḏ* was used to designate behavior that fulfilled obligations to those in the family or tribal relationship. Scripture contains numerous examples of these kinds of relationships.

A basic relationship was marriage. Abraham, traveling in Egypt and afraid for his life because of his beautiful wife, reminded Sarah of her duties to him, saying, "This is the kindness you must do me: at every place to which we come, say of me, 'He is my brother'" (Gen. 20:13). Though she risked the danger of being taken by the Egyptians, she was obligated to show the loyalty and duty that the marriage relationship required. Naomi said that Boaz by letting Ruth glean in his fields showed *ḥeseḏ,* an awareness of his familial obligations as one of the nearest kin of their deceased husbands (Ruth 2:20). Ruth showed *ḥeseḏ* by turning to Boaz to fulfil the next-of-kin's obligation to marry a deceased brother's wife (the levirate law of Dt. 25:5-10). He blessed her for having "made this last kindness greater than the first, in that you have not gone after young men, whether poor or rich" (Ruth 3:10), meaning that the *ḥeseḏ* she showed to her deceased husband by leaving her home and following Naomi to her husband's homeland was even surpassed by the loyalty she showed him in marrying his near kinsman (see Glueck, p. 40).

Obligation between related tribes is seen in Israel's treatment of its neighbors and "relatives" (by Moses' marriage), the Kenites (Jgs. 1:16; 4:11). This tribe had shown *ḥeseḏ* to the Israelites in their exodus from Egypt and

were shown *ḥeseḏ* in return when Saul spared them while fighting the Amalekites who lived around them (1 S. 15:6).

The rights and duties between host and guest, who became "brothers" with reciprocal responsibilities for protection, are illustrated by Lot's offer of his virgin daughters to the men of Sodom who wanted the strangers (angels) visiting him. Because the host's duty to his guests was so sacred that he had to risk his life for their safety if necessary, Lot protected them in his house (Gen. 19). The strangers in turn showed *ḥeseḏ* to Lot by protecting him from the men and foretelling the city's destruction so that he and his family might flee to safety in the mountains (see Glueck, p. 44).

In ancient Israel the relationship of allies was of the greatest importance, and *ḥeseḏ* was the only possible mode of conduct within it. In 2 S. 9:1, 3, 7 David wished to show *ḥeseḏ* to Saul's house for the sake of his friendship with Saul's son Jonathan. This loyal love had the quality of brotherliness but was based on the mutual responsibilities of friendship.

Rulers and subjects also had mutual rights and obligations. As 2 Ch. 24:22 shows, *ḥeseḏ* was sometimes violated. Joash the king did not remember "the kindness [*ḥeseḏ*] which Jehoiada, Zechariah's father, had shown him," and so he had Zechariah killed.

Ḥeseḏ sometimes took the form of "mutual aid," as in Gen. 40:14, where the imprisoned Joseph asked the chief butler to return his *ḥeseḏ* by asking Pharaoh to release him. This request was based on the service that Joseph had rendered in interpreting the butler's dream favorably. Jgs. 8:35 is an example of this relationship broken — the people of Israel did not show to the house of Gideon the *ḥeseḏ* they owed "in return for all the good he had done to Israel."

The meaning of *ḥeseḏ* is greatly expanded in the prophetic literature, where it comes to represent the kind of loving conduct toward all people that pleases God and demonstrates faithfulness to Him (see Glueck, p. 56). In Hosea it "does not reside in the punctilious offering of sacrifices . . . but in ethical and religious behavior and the devoted fulfillment of the divinely ordained ethical commandments" (Glueck, p. 57). Thus there is a reciprocal relationship between God and Israel. "God provides for his people [Hos. 2:10f.], grants peace and rest [2:20], stands by to help [12:10], and is full of benevolence [11:3f.; 3:1]. The people, on the other hand, must obey the divine commandments, heed his demands, and remain faithful in thought and deed" (Glueck, pp. 56f.). In Hos. 4:1 and Mic. 6:1 God has a "controversy" (*rîḇ*) with the people because they have not fulfilled their side of the covenant relationship. In Mic. 6:8 the moral responsibilities for the human side of this relationship are pointed out, the use of *ḥeseḏ* showing that "every man becomes every other man's brother" (Glueck, p. 61). Job 6:14 uses *ḥeseḏ* in the same sense, saying that "he who withholds kindness from a friend forsakes the fear of the Almighty." The obligation appears again in Zec. 7:9: "Thus says the Lord of hosts, Render true judgments, show kindness and mercy each to his brother." The pious man in Ps. 109:12, 16 asks the Lord not to show *ḥeseḏ* to the wicked, for they have not fulfilled their obligations but oppressed the poor and needy.

A praiseworthy woman speaks according to *ḥeseḏ* (Prov. 31:26), and a good man's kind rebuke is not resented (Ps. 141:5). But perhaps the greatest consequence of showing *ḥeseḏ* is found in Prov. 21:21, "He who pursues righteousness and kindness will find life and honor."

In the NT the main word translated by "kindness" is Gk. *chrēstótēs*. It describes human goodness and generosity in 2 Cor. 6:6; Gal. 5:22; Col. 3:12 and conveys the thought of knowing another's need and helping to fulfil it. When used of God in Rom. 2:4 it is linked with both *anochḗ* ("forbearance") and *makrothymía* ("patience"); in 11:22 it appears with its opposite *apotomía* ("severity") as Paul urged the Roman Christians to persevere in showing "kindness" so that God's "kindness" might be shown to them (cf. Eph. 2:7). In Tit. 3:4 *chrēstótēs* describes God and is linked with *philanthrōpía*, which itself is translated "kindness" in Acts 28:2. When used of God the latter term refers to His "love to mankind at large" but usually denotes "love toward individuals in distress" (Guthrie, p. 204). In Acts 28:2 it describes the special hospitality of the natives of Malta toward Paul when he was shipwrecked there. The term *epieíkeia*, which Paul used in addressing Felix, is only a "polite phrase" (Haenchen, p. 653) and occurs in the papyri in the same sense of complimentary address to officials (MM, p. 238). *Chrēstós* is used in Jer. 24:2-5 (LXX) of "good" figs and in Lk. 5:39 of "good" wine, thus meaning "delicious to the taste" (Kelly, p. 86). This same "deliciousness" means "loving" and "benevolent" when applied to God, as His people have "tasted the kindness of the Lord" (1 Pet. 2:3).

I. Introduction.–*A. Biblical Terms.* The biblical words for "king" are Heb. and Aram. *meleḵ*; Gk. *basileús*. The root sense of the Hebrew word was probably "counselor," since the cognate Aramaic verb *mᵉlaḵ* means "advise, counsel." But if this is the derivation, little sign of it remains in biblical usage. An alternative original sense is "possessor"; cf. Arab. *malaka*, "possess."

Hebrew has three words for "kingdom," all derived from *meleḵ*. They are *mamlāḵâ*, *malᵉḵût*, and *mamlāḵûṯ*. The other words are Aram. *malᵉḵû* and Gk. *basileía*.

B. Application of "King." The title "king" is freely

given in the Bible to a considerable variety of rulers. Princes of small city-states are thus designated (e.g., Achish of Gath, 1 S. 27:2), and so are emperors of vast realms such as Cyrus (Ezr. 1:1). In NT times the Roman emperor is given the same title (Acts 17:7; 1 Pet. 2:17). The rulers of many small states, whether independent or tributary, are called kings; this category includes the Hebrew kings, and in NT times Herod the Great and several of his family.

It is also a divine title, applied frequently to God and to Christ, who are viewed as reigning over the kings of the earth (Rev. 1:5). Pagan deities were also sometimes styled kings by their worshipers (cf. Am. 5:26, RSV, NEB). Names of gods such as Milcom, Molech, and Melkart reveal the same Semitic root, and make it clear that those who revered them viewed them in the same light.

C. Application of "Kingdom." The word "kingdom" usually means the territory ruled by a king, or else more specifically his subjects. In NT times the application of the term to the vast Roman empire gave the word almost a cosmic connotation; it implied the political allegiance of a wide diversity of nations and faiths to the one ruling power, vested in one man. Such an understanding of the word "kingdom" may well underlie the NT conception of the kingdom of God (or "of heaven"), which is viewed as having no territorial limits, in a sense embracing diverse elements. Jesus Himself, however, stressed the spiritual as opposed to the political nature of this kingdom. There are strong eschatological elements in the NT portrait of the kingdom of God, and it is not easily decided to what extent Jesus inaugurated the kingdom and to what extent it still awaits its future consummation. *See* ESCHATOLOGY; CHRIST, OFFICES OF IV; KINGDOM OF GOD.

II. Historical Survey.–A. Hebrew Kings. The first Hebrew king was Saul, who took the throne under circumstances of Philistine aggression *ca.* 1020 B.C. David was his successor, and Solomon, David's son, was the third king. During the latter two reigns the kingdom reached its greatest power and extent. After the death of Solomon, however, the northern ten tribes broke away, refusing to give allegiance to the dynasty of David, and thereafter had their own kings, Jeroboam being the first. No one dynasty long held the throne in the northern kingdom (Israel). The last king was Hoshea; in 722 B.C. his kingdom fell to the Assyrians under Sargon II. Meanwhile Judah and Benjamin maintained their own kingdom (Judah), under the Davidic dynasty. The last Davidic king was Zedekiah, deposed and deported to Babylon by Nebuchadrezzar in 587 B.C. Thus ended the kingdom of Judah.

B. Hasmoneans. For some centuries the Jews had no independence and no kings of their own. But the revolt against the Seleucid king Antiochus Epiphanes in 166 B.C., headed by Judas Maccabeus, saw the rise of a militant Jewish nationalism. The family of Judas, correctly called Hasmoneans, gradually won independence for Judea; they were undoubtedly the leaders in this struggle, and eventually they claimed royal title. The first to do so seems to have been Aristobulus I (104-103 B.C.). In 63 B.C. the Romans divested the Hasmoneans of their royal position, but the family remained influential.

C. Herod and His Family. An important Idumean who married into the Hasmonean family, Herod (the Great), was in 37 B.C. given by Rome the position of king of Judea (with Samaria, Galilee, and some territory in Transjordan), with a large measure of independence. After his death in 4 B.C., none of his sons or descendants seemed to display the same abilities, and though several were given tetrarchies, none was given the title of king and set over Judea except Herod Agrippa I (A.D. 41-44), whose realm was as extensive as that of his grandfather Herod the Great. Lesser members of the family such as Herod Antipas are called kings in the NT, though technically their rank was not that high (e.g., Mk. 6:14).

III. Nature of Kingship.–A. General Conception. A great deal of research into the nature of kingship has been carried out in recent years. It is now recognized that in the ancient world generally, kingship was sacral — a sacred, cultic office as well as a political position. The king was, in fact, universally acknowledged as a mediator between god(s) and people. This inevitably led to his being considered at least a semidivine person. In Egypt, indeed, the king was accorded full divine honors; he was a god in human form. In Babylonia, on the other hand, the king was recognized as a human being, elevated to near-divine status. In Egypt the king was a god incarnate; in Babylon he was a mere man whose office conferred deity upon him. Despite the differences, in both areas the king was pivotal in the cultic beliefs and practices. No doubt the Canaanites followed a similar pattern; in the Râs Shamrah tablets the Canaanite king Keret (Kirta, Kirtu) is styled both the "servant of [the deity] El" and the "son of El." Before the Israelites ever entered Canaan, the enigmatic figure of Melchizedek was acting both as king and as priest of 'El 'Elyon, God Most High (Gen. 14:18-24).

B. The Israelite King. It is specifically stated in 1 S. 8:5 that when the Israelites felt they should have a king, they were influenced by the practices of neighboring peoples. It is no surprise, therefore, that the nature of the Israelite kingship was again sacral. Each king was anointed — a sacred ceremony indicating that he had been chosen by Yahweh. As Yahweh's anointed, his person was sacrosanct (cf. 1 S. 26:9). The so-called royal Psalms speak of the throne as "divine" (Ps. 45:6 RSV) and view the king as Yahweh's son (Ps. 2:7). Some of the kings played a part in the cultic ritual (cf. 2 S. 6:17-20; 8:18); David so embedded the kingship in the cultus that his descendants were assured of the throne (of Judah, at least) as a divine right for four centuries. This "Davidic covenant" (cf. Ps. 89:3f. [MT 4f.]) can have had no counterpart in the northern kingdom.

On the other hand, it must be observed that the Israelite king was subject to a measure of control, in matters both moral and cultic. The prophets were prepared to guide the king and moreover to comment on his actions as they felt necessary; thus Nathan fearlessly rebuked David for committing adultery and murder (2 S. 12:1-15), and Elijah denounced Ahab for condoning idolatry and murder (1 K. 21:17-22). For presumptuous actions in cultic affairs Saul was sternly rebuked by Samuel (1 S. 13:8-14), while Uzziah was challenged by the priesthood, and his leprosy was understood to be a punishment for his presumption (2 Ch. 26:16-21). It is quite possible that the priestly functions exercised by David and his immediate successors were related to their position as king in Jerusalem rather than as king of Israel; that would explain the importance attached to Melchizedek — Ps. 110:4 shows that the king's priestly functions were considered to be "after the order of Melchizedek." Possibly the Aaronic priesthood resented the king's assumption of their prerogatives and gradually deprived the ruler of them, the dispute with Uzziah marking the culmination of their efforts.

C. Saul and David. Sacral elements in the Israelite kingship can be granted, then. But it is not clear that such elements were very strong in the case of Saul, the first king. The reasons for his promotion to royal office were purely political: the Philistine menace and Israel's desperate need of strong military leadership. Samuel, as Yahweh's representative, anointed Saul, to be sure; but the

narrative indicates that there was also a considerable measure of religious misgiving and opposition (1 S. 8:6ff.). Saul's person was considered sacrosanct by David (1 S. 26:9-11), but David's men evidently did not share their leader's views (v. 8). It is conceivable that the nature of the kingship was sacral not so much because Israel followed the pattern of neighboring states, but because David deliberately fostered this conception of kingship, both before and during his reign. Even so, the pattern he chose to follow was probably based on earlier practice, the practice of Jerusalem in particular, as has been indicated (see III.B above).

D. Messianic Hope. David's reign was afterward remembered as a golden age. When, later on, kings of Judah proved weak or wicked, the longing arose for another David. This hope received fresh impetus after the Exile when there were kings no longer, and when the state had lost its independence. The expected king was called simply "the anointed" (Heb. *maši[a]ḥ*), a frequent title for the Israelite king in the Psalter (e.g., Ps. 2:2). The Aramaic word for this was *mᵉšîḥā'*, which was transliterated in Greek as *Messias* or was translated as *Christos*. Jesus claimed to be the Davidic Messiah but stressed that His kingdom was not political, and He interpreted His messianic office in terms of the "Suffering Servant" of Isa. 53. (*See* MESSIAH.) The book of Hebrews emphasizes the priestly character of Christ's kingship; Melchizedek again figures as the prototype (He. 5; 6:20–7:28).

E. Character of the Kings. The OT consistently portrays the Persian rulers as thoroughly autocratic, and no doubt the kings of Assyria and Babylon were scarcely less so. But it is clear that the Israelite kings were unable to act in too autocratic and tyrannous a fashion. This is patent in the story of Naboth's vineyard (1 K. 21); King Ahab's wishes were defied by an obstinate landowner, but the king had no intention of taking action to secure what he wanted. His acceptance of the situation elicited from his queen Jezebel the significant remark, "Do you now govern Israel?" (v. 7). Evidently the Phoenician kings of whom Jezebel was the daughter would not have brooked opposition from such a minor individual as Naboth.

The prophets were those chiefly responsible for keeping the king's actions in check. Even so, the Israelite monarchs were guilty of a variety of faults (cf. Dt. 17:16-20; 1 S. 8:11-18); tyrannical behavior and oriental luxury are deprecated. Solomon, in particular, was guilty of the latter, having a huge harem and a most ornate palace and court. The books of Samuel and Kings, however, pronounce judgment on the various kings on the basis of their fidelity to Yahweh; so Solomon is condemned not so much for the size of his harem as for the idolatrous practices he tolerated in order to please his wives (1 K. 11:1ff.).

The character of the ideal king is described in Ps. 101. Dt. 17:14-17 indicates some of the vices of royalty.

F. Marks of Royalty. The Israelite kings were always anointed. Two of them at least, Saul and David, were privately anointed first (by the prophet Samuel) and were later anointed a second time at a public ceremony. The fullest description of such a ceremony is given in 2 K. 11:9-12 (2 Ch. 23:9-11). The usual mode of address to royalty was "Long live the king!" (*yᵉḥî hammeleḵ*).

The royal insignia were the crown or diadem, the scepter, and the throne. Saul held a spear (1 S. 18:10) and wore an armlet (2 S. 1:10). From the reign of David onward, the Israelite kings had palaces and personal troops. Most of the kings of Judah were buried at Jerusalem in the royal tombs.

G. Throne Names. A feature of the Hebrew royalty was the use of regnal names, by which most of the kings are regularly known. Here and there the personal name is mentioned; the most explicit instance is Zedekiah, whose personal name was Mattaniah (2 K. 24:17). David's personal name may have been Elhanan (cf. 2 S. 21:19), Solomon's Jedidiah (cf. 2 S. 12:24f.), Uzziah's Azariah (cf. 2 K. 15:1-7 with 2 Ch. 26). The practice was by no means confined to Israel and Judah; the Assyrian king Tiglath-pileser III held the throne of Babylon under the name Pul (or *Pulu*) and appears with both names in 1 Ch. 5:26.

Detail of a monument in the palace courtyard at Nimrûd (Calah). In the text (*ANET*, pp. 558-560) Ashurnasirpal II (883-859 B.C.; here surrounded by astral symbols of Assyrian gods) describes how he built the city and the (impossibly) large banquet he held upon its completion (Consulate General, Republic of Iraq)

H. Functions and Officers. It was the duty of the king to promote the well-being of his subjects in all respects (indeed, the welfare of the nation was generally thought of as integrally connected with the well-being of the monarch). He was therefore responsible for military, fiscal, and legal administration. Apart from sacral functions, it devolved upon him to promote the worship of Yahweh and to put down idolatrous cults, necromancy, and the like. Of course, the king could and did delegate authority, and several lists of royal officers are given in the OT (2 S. 8:15-18; 20:23-26; 1 K. 4:1-19). David seems to have followed an Egyptian pattern in his appointing of officers.

I. Succession. In the case of Saul and David, who both came to the throne in a way unprecedented in Israel, selection for royal office was due to the "charismatic" qualities they exhibited; both were possessed at times by the "Spirit of Yahweh" (1 S. 11:6; 16:13), which enabled them to be effective leaders in battle. Both were capable of ecstatic actions (1 S. 10:9-13; 2 S. 6:14). In these respects Saul and David resembled their predecessors the "judges." After David, however, the succession was hereditary. Usually the eldest son succeeded to the throne, but not always. David chose Solomon as successor, even though Solomon had an elder brother living, Adonijah (who indeed made every effort to become king). The last king of Judah, Zedekiah, was the uncle of his predecessor Jehoiachin. In the northern kingdom there were frequent usurpations, and only two dynasties outlasted the second generation. The only usurpation in Judah was that of the queen mother Athaliah, and it was only temporary; a counterrevolution placed a Davidic king on the throne once again.

IV. Divine Kingship.–*A. General Conception.* It was a commonplace in the ancient world that gods were understood as ruling like kings over their territories (see I.B above). The human rulers were usually closely associated with them. In Babylon there was an annual ceremony (at the new year) at which the king ritually handed back his royal position to the god Marduk and was then redesignated king by the god for the following year. This was called the Akitu ceremony. There were similar new year rituals elsewhere, and the regular feature was that a god, frequently represented by a human ruler, ritually died and rose again (symbolizing the "death" of vegetation in autumn and its rebirth in spring); a sacred marriage ensued, and the god was reenthroned.

B. Israel's Theocracy. As has been shown, Israel to some extent followed the pattern of its neighbors. Certainly one of its oldest and most basic concepts was that Yahweh was its King. The very early poem in Ex. 15:1-18 concludes with the words "Yahweh will reign for ever and ever." The ark of the covenant, which undoubtedly antedated the conquest of Canaan, was viewed as the throne of Yahweh (cf. 1 S. 4:4; Ps. 99:1). Numerous Psalms speak of the kingship of Yahweh (e.g., Ps. 5:2 [MT 3]). But whereas other peoples had human kings as mediators between them and the god(s), the Israelites were convinced that to appoint a human monarch would be tantamount to rejecting Yahweh's rule over them. This was the attitude throughout the period of the judges (cf. Jgs. 8:22f.; 1 S. 8:7). It was only urgent political necessity that brought Israel a monarchy. After the era of the kings had ended, the theocratic concept again came to the fore, especially in Isa. 40–55 (e.g., 41:21). When the Hasmonean rulers took upon themselves the title of king at the end of the 2nd cent. B.C., the fact was resented by the more devout Jews; but this was probably not so much because of the theocratic concept as because the kingship was thought to belong solely to the house of Judah and the lineage of David.

C. Enthronement Ceremony. In view of the autumnal New Year ceremonies in Babylon and elsewhere, it is fair to ask whether such a ritual ever took place among the Israelites, a ritual including the ceremonial reenthronement of Yahweh (perhaps represented by the king). Yahweh is frequently portrayed as the husband of Israel (cf. Hos. 3:16ff.), which may be an allusion to a ritual marriage annually celebrated between Yahweh and His people. But as noted above, Israel's theocratic concept differed somewhat from that of other nations, and it cannot be taken for granted that such a ceremony was adopted by the Israelites. Certainly there is little hint in the OT that Yahweh was understood to die and revive in the manner of pagan fertility gods.

A number of scholars (particularly the so-called Myth and Ritual School, headed by S. H. Hooke) have contended that such a ritual did take place in Israel; their chief evidence is Zec. 14:16-19, which links references to the Feast of Tabernacles (the New Year Festival) with the thought of the kingship of Yahweh. Also adduced are the Psalms that depict Yahweh as king (e.g., Ps. 93). A recurring phrase in these so-called kingship Psalms is *YHWH mālaḵ*, which is perhaps to be translated "Yahweh has become king" rather than "Yahweh reigns." These Psalms may have been liturgical poems used at such an enthronement ceremony. The phrase, however, may not have this connotation at all; J. Bright suggested the translation "It is Yahweh who reigns." Certainly there is no direct evidence that the Feast of Tabernacles included any such ritual. The hypothesis merits attention, but it is far from proven.

KING JAMES VERSION. *See* ENGLISH VERSIONS V.

KING OF THE JEWS [Gk. *ho basileús tôn Ioudaíōn*]. A title used of Jesus in the Passion narratives both as an insult (Mk. 15:18, etc.) and as an official notice (Gk. *aitía,* Mk. 15:26 par. Mt. 27:37; *titlós,* Jn. 19:19) giving the reason for his execution (cf. Bauer, rev., pp. 26, 180; MM, pp. 15, 637). According to Jn. 19:20, the notice was written in Aramaic, Greek, and Latin (cf. R. Brown, *Gospel According to John,* II [*AB,* 1970], 900-902; J. Blinzler, *Der Prozess Jesu* [3rd ed. 1960], pp. 270f.). *See also* JESUS CHRIST, ARREST AND TRIAL OF V.

The title is used of Jesus more positively in Mt. 2:2, where it not only gives the reasons for Herod's suspicion and violence but also expresses Matthew's emphasis on the Davidic descent of Jesus.

KINGDOM OF GOD [Gk. *hē basileía toú theoú*].

I. Terminology
II. Eschatology and History
III. Prophetic Hope
IV. Messiah, Son of Man, Suffering Servant

V. The NT Fulfillment
A. Gospels
B. Acts
C. Pauline Epistles
D. Revelation

I. Terminology.–According to all three Synoptics, the kingdom of God was the central theme of the preaching and teaching of Jesus. The phrase occurs fourteen times in Mark, thirty-two times in Luke, but only four times in Matthew (12:28; 19:24; 21:31, 43). In its place, Matthew substitutes "the kingdom of heaven" (lit. "the kingdom of the heavens," Gk. *hē basileía tōn ouranōn*). Although dispensational theology has customarily made a theological distinction between these two terms, the simple fact is that they are quite interchangeable (cf. Mt. 19:23 with v. 24; Mk. 10:23). In Jewish rabbinic literature, the common phrase is "the kingdom of the heavens" (Dalman, pp. 91ff.). In Jewish idiom, "heaven" or some similar term was often used in place of the holy name (see Lk. 15:18; Mk. 14:61).

"The kingdom of God" is a rare expression in literature antedating our Gospels. It does not occur in the OT, although the idea is found throughout the Prophets, and it appears only a few times in intertestamental literature (references in Ladd, *Presence of the Future*, pp. 46, 130f.).

Scholars have differed about the basic meaning of the term, whether it conveys an "abstract" idea of God's rule or reign, or a "concrete" idea of the realm over which He will reign — in this case, the age to come. It is established, however, that the meaning of the Heb. *malkût*, which provides the historical background for Jesus' teaching, was the abstract idea of reign, rule. "They shall speak of the glory of thy kingdom and tell of thy power. . . . Thy kingdom is an everlasting kingdom, and thy dominion endures throughout all generations" (Ps. 145:11, 13). "The Lord has established his throne in the heavens, and his kingdom rules over all" (103:19).

The abstract idea appears in the NT and seems to be the root meaning of the Gk. *basileía* (*TDNT*, I, *s.v.* [Schmidt]). The secondary sense is that of the realm over which a king rules.

Both uses appear in the NT. The RSV renders *basileía* in Jn. 18:36 by "kingship." God's kingdom is His rule, by which He overcomes His enemies and brings to His people the benefits of His reign. In the Lord's Prayer, the petition "thy kingdom come" (Mt. 6:10) is similar to the Jewish prayer "And may He set up His sovereignty in your lifetime, and in your days, and in the lifetime of the whole house of Israel, (yea) speedily, and in a time that is near" (Dalman, p. 99). The coming of God's kingdom is an eschatological event when the kingly reign of God, which is His *de jure*, will be manifested on earth *de facto*, so that His will is done on earth as it is in heaven. This means two things: negatively, the judgment of the wicked and the subjugation of every hostile power; positively, the salvation of the righteous and the redemption of a fallen creation from the burden of evil.

This abstract use of *basileía* is found not only as something eschatological but also as something present (Lk. 17:21). It is the rule of God, which people must receive as little children here and now (Mk. 10:15). It is something that people must seek not only in the future but in their present existence (Mt. 6:33 par. Lk. 12:31), for it has actually come among them in the person and works of Jesus (Mt. 12:28).

Other sayings refer to the kingdom as the eschatological order to be established when God manifests His kingly rule. In such sayings, the kingdom is interchangeable with the age to come (Mk. 9:47; 10:23-25; 14:25; Mt. 8:11 par. Lk. 13:28). A further group of sayings refers to the kingdom as a present realm of blessings that is here among people because of the mission of Jesus. Mt. 11:11 contrasts the old order of the prophets that ended with John the Baptist with a new order inaugurated by Jesus, called the "kingdom of heaven." The least in this new order is greater than John, even though John was the greatest of the prophets, because he is the recipient of blessings mediated through the ministry of Jesus that John had not experienced. Jesus said to the priests and elders who rejected His message of the kingdom, "The tax collectors and the harlots go into the kingdom of God before you" (Mt. 21:31). To the Pharisees, who also opposed Him, He said, "You shut the kingdom of heaven against men; for you neither enter yourselves, nor allow those who would enter to go in" (23:13).

II. Eschatology and History.–A future rule, a present rule; a future realm, a present realm; eschatology and history: this is the rather confusing picture presented in the Gospels. Many scholars have insisted that these two kinds of sayings are mutually exclusive and that the critical scholar must accept one and explain away the other. Liberalism rejected the eschatological sayings as the time-conditioned husk that encased the real kernel of Jesus' religious-ethical teaching (A. Harnack). Scholars who represent a fundamentally liberal viewpoint eliminated eschatology in one way or another and interpreted Jesus' message primarily in religious or ethical terms (see C. J. Cadoux, F. C. Grant, H. B. Sharman, W. Manson, possibly J. W. Bowman). Other scholars have insisted that the essence of Jesus' teaching was eschatology. He was a Jewish apocalyptic prophet who (mistakenly) proclaimed the imminent end of the world and the inauguration of the age to come (A. Schweitzer, E. F. Scott, M. S. Enslin, R. H. Fuller, R. Hiers). This consistent eschatology was accepted by R. Bultmann as the correct description of Jesus' message. Instead of merely setting aside this eschatological message as the "husk," however, Bultmann thought of it as a mythological way of describing an important existential truth: the nearness of God. Therefore he "demythologized" the eschatological message and argued that it *means* that God is near, that God is confronting people with the challenge to decision. The overwhelming sense of the nearness of God caused history to seem to fall away and be at an end.

C. H. Dodd made a new kind of interpretation with his "realized eschatology." He accepted the sayings of the present as the most meaningful and interpreted eschatological language as symbolizing the inbreaking of the eternal into the temporal, the wholly other into the historical. He claimed that in the person of Jesus all that the prophets had hoped for and predicted has been realized. In this interpretation "eschatology" assumes new meanings. Traditionally it designates the things that will happen at the end of the world in the consummation of history. For Dodd, the event that belongs at the end of history has happened in the midst of history. Therefore the person and mission of Jesus are both historical and eschatological — historical outwardly, but eschatological in their inner meaning.

Many scholars have accepted both the present and future sayings as authentic and have combined them in one way or another. They have recognized positive elements in each of the schools of thought described above. Jesus' teaching is spiritual and ethical, but it includes an eschatological consummation. The mission of Jesus is a fulfillment of the OT hope (Dodd). The kingdom is both

present and future (see Jeremias, Kümmel, Wilder, Hunter, Schnackenburg, Ridderbos, Ladd). For the history of interpretation, see Lundström and Perrin.

III. Prophetic Hope.–While the prophets did not talk about the kingdom of God, its reality was constantly in their prophesying. In the OT the kingdom of God is largely a matter of hope (Bright). The heart of the OT faith is the revelatory and redeeming acts of God in history (G. E. Wright, *God Who Acts* [*SBT,* 1/8, 1952]). Because God has revealed Himself in history, He has shown Himself to be the Lord of history. History is the scene of the divine activity. History, therefore, has a direction and a goal — the kingdom of God. The certainty of the future kingdom springs from faith in God's work of salvation in the history of Israel. This is the source of Israel's eschatology. The Israelite view of history and eschatology is unique (T. C. Vriezen, *Outline of OT Theology* [1958], p. 229).

The prophetic hope of the kingdom of God is expressed in different forms, but there are several constants. God's rule will be established only as a result of a divine visitation. The God revealed in the OT is "the God who comes." Some scholars have found two different eschatologies in Hebrew-Jewish thought: a truly Hebraic concept of an earthly kingdom that arises out of history, and an apocalyptic concept that despairs of history and sees the kingdom as a completely new and different order (S. Mowinckel, *He That Cometh* [Eng. tr. 1956]). This critical reconstruction cannot be sustained from the biblical texts. The earliest prophetic hope looked for a divine visitation when the whole physical order would be shaken in a cosmic catastrophe (Am. 8:7-9; 9:5f.). This is even more vividly expressed in the prophecy of Zephaniah. The prophetic expectation cannot be described as "historical" or "this-worldly" in the sense that it looks for the kingdom of God to be the product of historical forces. The source of God's kingdom is suprahistorical; God Himself must visit His people. "There is no eschatology without rupture" (E. Jacob, *Theology of the OT* [Eng. tr. 1958], p. 318).

Though the kingdom comes from outside of history — from God — it is always an earthly kingdom. The degree of continuity and discontinuity between the present order and the new eschatological order is differently expressed, but both elements are always present. Sometimes the new order of God's kingdom is pictured as the perfecting of the present earthly order (Am. 9:13-15); sometimes the transformation is more radically pictured, involving a complete disruption of the present order (Isa. 51:6; 34:4) so that a new order may be established (65:17). But the new order is always an earthly one. Behind this is the theology of man as creature who stands in solidarity with the world. Not only man but the whole creation stands in need of the redemption that will be realized in the Day of the Lord. Salvation does not mean deliverance from creaturehood, but the perfecting of the entire creation.

An outstanding characteristic of the prophetic hope is the tension between the acts of God in history and the final act of God to establish His kingdom — between history and eschatology. The prophets were scarcely interested in the chronology of the future; they were interested in God and His acting both in history and at the end of history. The Day of the Lord in Amos is *both* the historical judgment when Israel will be taken into judgment beyond Damascus (5:18-26) and a day of eschatological judgment (7:4; 8:8f.; 9:5). Zephaniah describes the Day of the Lord (1:7, 14) as a historical disaster at the hands of some unnamed foe (1:10-12, 16f.; 2:5-15) but also in terms of a worldwide catastrophe in which all creatures are swept off the face of the earth (1:2f.) and nothing remains (1:18). Yet out of universal conflagration emerges a redeemed remnant (2:3, 7, 9), and beyond judgment is salvation both for Israel (3:11-20) and for the Gentiles (3:9f.). Joel prophesies the visitation of the Day of the Lord as a fearful plague of locusts and drought (1:4-12) and also as a universal eschatological judgment (2:10f.; 3:11-15).

In such prophecies, history and eschatology are so blended as to be inseparable and practically indistinguishable. Behind this blending stands a profound theology. The purpose of prophecy is not to give a scheme of future events but to confront Israel with God — with the God of both judgment and salvation. The God who acts in history both to save and judge His people will also act at the end of history in final judgment and salvation. Both the present and the future will witness the redemptive acts of the same God. The prophetic picture of the future often has height and breadth but not depth. The present and the future are blended together because God will act redemptively both in the immediate and in the more remote future. The purpose of prophecy is not to give a chronological scheme of future events; it is to let the light of God's future shine in the present (2 Pet. 1:19).

The OT hope is always expressed in terms of Israel's future. Israel has been called to be God's people; God acts in history both to judge and bless His people; and God will finally bring His people into the salvation of His kingdom. This salvation is formulated in theocratic terms, with the nation Israel restored to the land. It is never the nation as a whole, however, but a faithful redeemed remnant that is the true people of God (Am. 9:8; Isa. 4:2-4; 10:20-22; 37:20-32; Mic. 2:12; 5:7). The Gentiles participate in this salvation, sometimes by way of subjugation to converted Israel (Am. 9:12; Mic. 5:9; 7:16; Isa. 45:14-16; 49:23; 60:12, 14), sometimes by way of conversion (Zeph. 3:9, 20; Isa. 2:2-4; 42:6f.; 60:1-14; Zec. 8:20-23; 14:16-19). The prophets do not envision what may be called a universalistic kingdom; Israel in the form of a purified, converted remnant is the center of the prophetic hope.

IV. Messiah, Son of Man, Suffering Servant.–The administration of the kingdom is pictured in very diverse terms that are not synthesized in the OT. Sometimes there is no messianic figure (Amos, Habakkuk, Zephaniah). In other prophecies, it is God alone who reigns over His people (Isa. 2). The most prevalent concept is that of a Davidic king who will be endued with divine power and authority to punish the wicked and bless the righteous (Isa. 9:6f.; 11:1-5; Jer. 33:14-26; Mic. 5:2f.). Although this Davidic king is not called "Messiah" in the OT, he came to be known as such in Jewish thought (Ps. Sol. 17) and in rabbinic literature (J. Klausner, *Messianic Idea in Israel* [Eng. tr. 1955], pp. 458ff.).

A very different figure appears in Dnl. 7, where one like a son of man comes with the clouds of heaven to the throne of God to receive an everlasting kingdom (7:13f.). If in Daniel this is a symbolic figure representing the saints of God, as many critics have thought, in Jewish thought the Son of man becomes a preexistent, supernatural heavenly figure who comes from heaven to earth to set up a throne of glory, judge the wicked, and gather the righteous under his rule in the kingdom of God (1 En. 37–71). This kingdom is described as a radically new order, a transformed heaven and earth (45:4), which are the "world to come" (71:15), in contrast to this world of unrighteousness (48:7). While this Son of man is called "Messiah" in two places (48:10; 52:4), the Son of man and the Messiah are two distinct concepts that are only later conflated (2 Esd. 12:32; 13:3, 26, 37f.). The Messiah is an earthly, human Davidic king who arises from among men to establish the kingdom; the

Son of man is a preexistent, heavenly, supernatural being who comes from heaven to establish the kingdom.

A third figure appears in the OT — that of a humble servant who redeems his people by his own sufferings (Isa. 53). He is not identified; he is a solitary figure, neither messianic king nor heavenly Son of man, who suffers for his people to make them righteous. The OT does not conflate these three figures, and later Judaism seldom understood the suffering servant in messianic terms.

V. The NT Fulfillment.–A. Gospels. John the Baptist appeared as a prophet among his people with the proclamation, "The kingdom of heaven is at hand" (Mt. 3:2). It is clear from John's own words that he understood this to be an apocalyptic event. God was about to send a person — designated neither as Messiah nor as Son of man — who would be the agent of the eschatological judgment. He would gather the wheat into the barn and burn the chaff with unquenchable fire (3:12). When "the deeds of the Christ" did not turn out as John had announced, he was perplexed and sent emissaries to Jesus to ask if He really was the one that John had predicted (11:2f.).

Jesus' message is summarized by the same words: "Repent, for the kingdom of heaven is at hand" (Mt. 4:17). He went through all Galilee preaching "the gospel of the kingdom" (4:23). What He meant by this announcement must be decided from His total message. It is a complex idea that involves both fulfillment and radical reinterpretation of the OT hope.

By the kingdom of God, Jesus meant the new eschatological order to be established by a divine visitation. A new terminology emerges in the Gospels that became common in Jewish and rabbinic literature — that of the two ages: this age and the age to come (Ladd, *Jesus and the Kingdom,* pp. 86ff.). Although this terminology is not found in the OT, it is an easy development of the prophetic theology of the kingdom of God. This age is the time of sinfulness, evil, and rebellion against God; the age to come will see the perfect establishment of God's rule in the world and the purging of all sin, evil, and rebellion. The NT interprets the evil of this age in terms of satanic and demonic power. Satan is the "god of this age" (2 Cor. 4:4) who has been allowed in the sovereign wisdom of God to exercise great power in human affairs (Mt. 4:9). Satan is a spirit hostile to God who does all he can to frustrate the will of God. Allied with him are evil spirits — demons — who are capable of taking possession of the human personality. From one point of view, the theology of the entire NT can be understood in terms of a titanic conflict between God and Satan, between the powers of light and the hosts of darkness. The ultimate enemies of God are not sinful people or pagan nations but evil spiritual powers. Since this conflict involves the destiny of individuals and of human history as a whole, however, the conflict is waged on the scene of human history. This is one of the fundamental presuppositions of the Bible — that there is a real invisible spiritual world of both good and evil that impinges upon and determines human existence and destiny. The theology of Satan and demons affirms their existence: evil is not merely human ignorance, failure, or error; nor is it blind fate or irrational chance. Evil has its roots in personality, and it is greater than man and stronger than man. It is God's purpose finally to subdue and destroy these evil powers and deliver people from their enslavement.

This divine victory will be achieved only in the age to come, which will witness the kingdom of God. In fact, it is the coming of His kingdom that will inaugurate the age to come. The term "kingdom of God" is used of the divine visitation (Mt. 6:10; see Rev. 12:10); but in the Gospels it is used more often of the new era to be inaugurated by the coming of God's reign. In this sense, the kingdom of God and the age to come are interchangeable terms.

This is proven by the incident of the rich young ruler. When he asked Jesus how he might inherit eternal life, he was asking about life in the age to come — the life of the resurrection (Dnl. 12:2). In His reply, Jesus spoke about entering the kingdom of God (Mk. 10:23ff.), about being saved (v. 26), and also about receiving eternal life in the age to come (v. 30). Thus Mk. 9:47 tells of entering the kingdom of God, while Mt. 18:9 tells of entering life. Usually this future age is spoken of simply as the kingdom of God into which the righteous will enter and from which the unrighteous will be excluded (Mt. 5:20; 7:21; Mk. 9:47).

This age will end and the new age of God's kingdom will be inaugurated by the coming of the heavenly Son of man. The early Church certainly believed that Jesus taught that He was Himself destined to be the heavenly Son of man who would inaugurate the kingdom of God. Mt. 24:3 reports that the disciples asked what would be the sign of His parousia and the consummation of the age. The discourse that follows speaks at length of the coming of the heavenly Son of man with power and great glory to gather the elect into the kingdom of God (vv. 30f.). The Son of man will come in His glory to sit upon the throne of judgment to decide the destiny of everyone. The righteous will inherit the kingdom of God (25:34), which again means to enter into eternal life (v. 46), while the wicked will suffer the judgment of eternal punishment. The parable of the weeds and wheat teaches that the Son of man will send His angels to gather all causes of sin and all evildoers out of His kingdom; then the righteous will shine like the sun in the kingdom of God (13:41f.). The future destiny of individuals will be decided by the Son of man on the basis of the relationship of individuals to Jesus (Lk. 12:8; the parallel in Mt. 10:32 does not refer to the Son of man but only to Jesus in both His historical and eschatological mission).

The parable of the judgment of the nations implies that it will be the eschatological mission of the Son of man to win the final victory over the demonic powers of evil, for the place of condemnation is called the eternal fire prepared for the devil and his angels (Mt. 25:41). The coming of the kingdom of God will witness the complete expurgation of evil from God's creation.

Life in the eschatological kingdom of God — life in the age to come — will be resurrection life. Although the Gospels say little about resurrection, Luke reports a saying that equates attaining to the age to come with the resurrection (Lk. 20:34f.). Resurrection life will mean a transformed existence very different from the life of this age. There will be no more death; therefore the need for procreation will no longer exist.

The Gospels say very little about the conditions in the kingdom of God. That it will involve a transformation of the whole created order is reflected in Mt. 19:28. The "new world" (RSV) is literally the "regeneration" of the world. Although the word belongs to the world of Hellenistic Judaism and not to Aramaic idiom, it expresses the theology of resurrection and world renewal (*TDNT,* I, 688).

In their treatment of the age to come, the Gospels' primary interest is its soteriological dimension — the restoration of fellowship with God. The pure in heart will see God (Mt. 5:8) and enter into the joy of their Lord (25:21, 23). The harvest will take place and the grain will be gathered into the barn (13:30, 39; Mk. 4:29; cf. Mt. 3:12; Rev. 14:15). The sheep will be separated from the goats and brought safely into the fold (Mt. 25:32). The most common picture is that of a feast or table fellowship.

Jesus will drink wine again with His disciples in the kingdom of God (Mk. 14:25). They will eat and drink at Jesus' table in the kingdom (Lk. 22:30). The consummation is likened to a wedding feast (Mt. 22:1-14; 25:1-12) and a banquet (8:11; Lk. 14:16-24). All these metaphors picture the restoration of communion between God and mankind that had been broken by sin.

Jesus' eschatological understanding of the kingdom of God as the new age does not differ radically from the thought of contemporary Judaism. Both are extensions of the theology of the prophets who looked for the Day of the Lord.

The new element that provides the distinctive center of Jesus' teaching is that in His own person and mission a real fulfillment of the OT hope has taken place in history before the consummation of the age. "The time is fulfilled" (Mk. 1:15). In an early sermon in Nazareth, Jesus cited the messianic prophecy of Isa. 61:1f. and added, "Today this scripture has been fulfilled in your hearing" (Lk. 4:21). When John was in perplexity because Jesus was not fulfilling his proclamation of an eschatological kingdom, he sent emissaries to Jesus to ask whether He was indeed the coming one; Jesus replied by quoting the messianic promise of Isa. 35:5f., indicating that the prophecy was being fulfilled in His own mission. This note of prophetic fulfillment is again sounded in Lk. 10:23f. par. Mt. 13:16f., where Jesus asserts that His contemporaries are actually witnessing what the OT saints longed to see.

The present fulfillment of the OT hope short of its consummation can be understood in light of the basic meaning of the kingdom of God as the divine reign or rule. In the mission of Jesus, God has entered into history in His kingly power to defeat the powers of evil and to bring to people a foretaste of the blessings of the eschatological kingdom while they still live in the old age. This is explicitly affirmed in Mt. 12:28. One of the most characteristic works of Jesus was freeing people from demonic bondage. When accused of employing satanic power, Jesus replied that He cast out demons by the Spirit of God (Lk. 11:20, "the finger of God"), and this was a sign that the kingdom of God had come upon them. Here is an unambiguous statement as to the presence of the kingdom of God, and it is entirely intelligible if the kingdom of God is His kingly power. God's power has come among people in the mission of Jesus to free them from satanic bondage. This is clearly affirmed in v. 29. Jesus has come from God into this age (the strong man's house) to deliver people from Satan's power (plunder his goods), and this He can do because by the power of God's kingly rule in His own person He has defeated Satan (bound the strong man). Before the eschatological destruction of Satan, God in Jesus rendered him a preliminary defeat.

This present defeat of Satan is also seen in the mission of Jesus' disciples, who also proclaimed the kingdom of God and cast out demons (Lk. 10:9, 17). Interpreting their experience, Jesus said in symbolic, mythological language that He saw Satan fallen from his position of power. Such a saying must be taken metaphorically rather than literally; it means simply the defeat of satanic power.

When the Pharisees asked Jesus to give them a timetable for the approach of the eschatological kingdom, Jesus replied that the kingdom of God was already in their midst (Lk. 17:20), but in an unexpected form. It was not accompanied by the signs and outward display that the Pharisees expected and without which they would not have been satisfied. They were blind to the fact that the inbreaking of God's rule, expected at the end of the age, was already occurring in the mission of Jesus.

The difficult saying in Mt. 11:12 is best understood in this context. The Gk. *biázetai* can be either passive — "has suffered violence" (RSV), or middle — "has been coming violently" (RSV mg.; cf. NEB mg.). While this saying has been subjected to many diverse interpretations (Ladd, *Presence of the Future*, pp. 158-164), it best fits the immediate context as well as the total context of Jesus' teaching if it is rendered, "The kingdom of heaven has been coming violently." John was the greatest of the age of the prophets. Since John, something new has been at work in the world: the power of the kingdom of God in the mission of Jesus. The mighty working of the kingdom of God, however, requires a response — a mighty response — of people: "men of violence" must "take it by force." Jesus frequently indicated that His mission demanded a powerful reaction from people (Mk. 9:43, 45, 47; Lk. 14:26; Mt. 13:44ff.; Mk. 10:21); they must be willing and ready to engage in any action, however radical, in response to the presence of the kingdom of God. Because the kingdom of God has come among people, they must receive it here and now like little children with perfect receptivity in order to enter into the eschatological consummation (Mk. 10:15).

Because the kingly rule of God has broken into history in the mission of Jesus, it has brought to people the blessings of God's reign. It has inaugurated a new situation which is also called the kingdom of God. This is the meaning of Mt. 11:11, which says that the least in the kingdom of heaven is greater than John. Although he was the greatest of the prophets, he belonged to the old order; and the new age that Jesus' mission has ushered in brings blessings so much greater that the least in the kingdom of heaven is greater than John — greater not because of position or personal stature but because of the blessings he enjoys.

This is the meaning of the sayings about a present entrance into the kingdom (Mt. 21:31; 23:13; Lk. 11:52; Mk. 12:34). The kingdom as the new age of blessing means the presence of the eschatological salvation (Lk. 19:9f.), restoration to the father's house (15:11ff.; cf. esp. v. 24), the forgiveness of sins (Mk. 2:7), the gift of righteousness (Lk. 18:14), and eschatological joy in the presence of the bridegroom (Mk. 2:19). The fellowship enjoyed in the new order is illustrated most vividly in the frequently repeated table fellowship of Jesus with His disciples. The feast was a common Jewish metaphor of the eschatological salvation (G. F. Moore, *Judaism* [1927-30], II, 363ff.). The fellowship of Jesus with His disciples and those who followed them was an anticipation of the joy and fellowship of the eschatological kingdom. Mark early sounds this note of table fellowship (Mk. 2:15ff.), which was so typical of Jesus' ministry that His critics accused Him of being a glutton and a drunkard (Mt. 11:18). The religious significance of these meals is reflected in Jesus' word, "I came not to call the righteous, but sinners" (Mk. 2:17). He was fulfilling His messianic mission when He gathered sinners into fellowship with Himself. In response to the protest of the scribes and Pharisees that Jesus frequently engaged in such fellowship meals with people outside the pale of legalistic Judaism, Jesus gave the parables of the shepherd seeking his lost sheep, a woman searching for a lost coin, and a father freely forgiving and accepting a penitent son (Lk. 15). The keynote is the joy in heaven over a sinner who repents (15:7, 10), over a son who comes home (15:24).

The coming of the kingdom in history before its eschatological consummation is illustrated by the parables of the kingdom (Mk. 4; Mt. 13). The "mystery of the kingdom" (Mk. 4:11) is precisely this: the kingdom's having come in redemptive history in a new and unexpected way. The background for this mystery or new revelation (see Rom. 16:25) is the OT expectation, further developed in Judaism,

that the coming of the kingdom would be an apocalyptic event, disrupting society in the eschatological judgment, an act of God bringing the old fallen order to its end and inaugurating the age to come. Jesus indeed shared these views; but the new revelation of the kingdom is that it has come in an unexpected way without disrupting society, demanding of men a response in order to be personally meaningful. The kingdom in Jesus' mission was not like a stone shattering godless nations (Dnl. 2); it was rather like a sower scattering seed that required fruitful soil for effective growth. The present coming of the kingdom does not mean the judgment and separation; these will take place in the day of eschatological judgment. Until then the wheat and the weeds grow together; the children of the kingdom and the children of the evil one will live together in the mixed society of this age. The presence of the kingdom in Jesus' mission is not a world-shaking event but a small, insignificant movement of a Jewish teacher and a handful of followers — as insignificant as a grain of mustard seed. Yet in the consummation, it will be like a great tree. At present, it is like a bit of leaven in a great bowl of dough; but one day the dough will fill the bowl, for the leaven will have leavened it throughout. These two parables are parables of contrast — the small unexpected form of the presence of the kingdom contrasted with its greatness in the day of consummation. *How* this greatness is to be achieved is not a part of the two parables. The parables of the tares and of the dragnet indicate that the kingdom will attain its final greatness by an eschatological act of God.

Insignificant as the presence of the kingdom is, it is yet of superlative value and, like a treasure or a matchless pearl, should be acquired at any cost. Furthermore, the kingdom is presently working in an unexpected way in that it has set up a movement that is gathering into it both good and bad men (the dragnet). Publicans, sinners, even a traitor were in the circle of Jesus' followers. The eschatological judgment will not only purify society as a whole; it will also purify the mixed fellowship of Jesus' followers. In spite of this unexpected present coming of the kingdom in Jesus and His followers, the kingdom remains the supernatural act of God that uses the human agency yet transcends all human ability and activity (Mk. 4:26-29); it will inevitably come to eschatological harvest.

The inbreaking of the eschatological kingdom in Jesus' person, words, and mission created a new fellowship. Jesus addressed His offer of the kingdom to Israel as a whole — the natural sons of the kingdom (Mt. 8:12) by right of covenant promises. The disciples were admonished to preach only to Israel — sons of the covenant (Mt. 10:5f.). Israel as a whole, however, rejected Jesus' message and was therefore destined to experience the judgment of God (Mt. 10:20-23; 23:37-39). Jesus predicted the fall of Jerusalem in history (Lk. 21:20-24; 23:27-31) and of the temple (Mk. 13:2; cf. 14:58; 15:29). The historical fall of Jerusalem and the end of the Jewish nation are to be understood as a judgment of the kingdom of God in history.

Yet not all Israel rejected Him. Many responded to His repeated summons, "Follow me" (Mk. 1:17). Jesus' disciples were not bound together by any formal teaching, as were the schools of the scribes, or by any formal organization, as were the Qumrân sectarians; they were bound together only by personal allegiance to Jesus — by the fellowship of the kingdom of God. From His disciples He chose twelve to participate in His mission (Mk. 3:14). The number twelve is symbolic, reflecting the constitution of Israel in twelve tribes and indicating that Jesus' disciples formed the true Israel. It was not a closed fellowship but was open to all who would join the company of Jesus' followers in response to the challenge of the kingdom.

Again when Jesus spoke of founding his *ekklēsía* (Mt. 16:18), he indicated continuity between His disciples and the Israel of God, for *ekklēsía* is the common word in LXX translating *qāhāl* — Israel as the people of God. By a new *ekklēsía* Jesus was not referring to any form of organization or institution; He was designating His followers as the nucleus of the true Israel. As the people of the kingdom, they will be victorious over the powers of death. They will be the instrument of the kingdom in the world. They will be entrusted with the "keys of the kingdom" (Mt. 16:19), for by their preaching of the kingdom of God, He will use them as His actual agents in determining who will enter the eschatological kingdom and who will be excluded, even though the decision will be the eschatological decree God in the day of judgment.

The NT does not identify the kingdom with the Church. The kingdom is the rule of God, and the realm of His blessings; the Church is the people of the kingdom who have received it, who witness to it, and who will inherit it.

The Gospels indicate that in some unexplained way, Jesus' death is essential to the coming of the kingdom. At the last supper with His disciples, Jesus gave them a cup representing His "blood of the covenant, which is poured out for many" (Mk. 14:24). These words take us back to the founding of the old covenant in Ex. 24:8 and to the promise in Jeremiah of a new covenant that God will make with His people in the kingdom of God, issuing in a perfected fellowship. Israel will be regenerated, their sins forgiven, and perfect knowledge of God effected (Jer. 31:31-34). The words of Jesus about the blood of the covenant implicitly claim that this promise of the new covenant in the kingdom of God is about to be fulfilled through His own death. This new covenant is now established not in the eschatological kingdom but in history; nevertheless it looks forward to the coming of the eschatological kingdom (Mk. 14:25; 1 Cor. 11:26). Jesus looked forward beyond death to the perfect fellowship of the consummated kingdom. The meal symbolized the messianic banquet in the kingdom of God, but it also symbolized Jesus' death. Thus His death and the coming of the kingdom are somehow inseparable. This same prophetic theme appears vividly in the book of Revelation. The lion of the tribe of Judah who alone is able to open the book of human destiny and bring history to the kingdom of God is the lamb who has been slain (Rev. 5:5f.).

The necessity for Jesus' death is further affirmed in His present role as the Suffering Servant. He who is destined to be the eschatological Son of man in the consummation of the kingdom is first of all the suffering Son of man who "must suffer many things and be rejected by this generation" (Lk. 17:25). The essential relationship between Jesus' death and the coming of the kingdom is illustrated in that the sayings about His death refer to Him as the Son of man (Mk. 8:31; 9:31; 10:33f.). The Son of man by definition was an apocalyptic figure who would come "with the clouds" as the messianic figure in the eschatological consummation (Dnl. 7:13f.). Before He fulfils His eschatological role, however, the Son of man must appear on earth in a mission of humility and suffering as the Servant of the Lord, to "give his life as a ransom for many" (Mk. 10:45). The eschatological consummation is linked with what God is doing in history in Jesus, especially in His death.

Thus in the teaching of Jesus, not only are history and eschatology held together in a dynamic tension; the very coming of the apocalyptic kingdom is dependent upon what God is doing in history through the mission and death of Jesus. Contemporary Jewish apocalyptic had lost the sense of God's redemptive acts in history. The kingdom of God had become altogether an eschatological en-

tity — a hope for the future, not a present reality in history. Jesus stands with the OT prophets in the tension between history and eschatology. God has not abandoned history; the eschatological kingdom has invaded history in Jesus' life-death-resurrection and continues to work in history through the people of the kingdom (Mk. 13:10 par. Mt. 24:14). History is not abandoned to evil and satanic power, as Jewish apocalyptic thought. Rather, the history of Jesus is the scene of the victory of God's kingdom over the powers of darkness that will issue in the final destruction of evil and the perfect establishment of God's rule over all people.

B. Acts. The death and resurrection of Jesus and the coming of the Holy Spirit led His disciples into a new sense of fellowship. They gathered together in Jerusalem to await the coming of the kingdom (Acts 1:6). Acts 1:3 indicates that Jesus instructed them further concerning the kingdom of God, but these instructions have not been preserved. The motif of the kingdom of God is not prominent in Acts; but the few references indicate that it played a significant role in the preaching of the disciples. These references are to the kingdom as an eschatological entity (8:12; 14:22; 19:8; 20:25; 28:23, 31).

Peter's sermon at Pentecost indicates that Jesus' death, resurrection, and ascension had led him to reinterpret the OT hope. The Gospels refer to Jesus' mission primarily in terms of the Son of man, a theme that appears in Acts only once (7:56). In Judaism, the category of Messiah had become that of a conquering earthly Davidic king; this is why Jesus made little use of this messianic concept (see Jn. 6:15). Peter announced that by virtue of His resurrection and ascension, Jesus has been made Lord and Messiah (Acts 2:36). This cannot mean that Jesus was not regarded as Messiah during His earthly mission, for it was as Messiah that He suffered (3:18). In His ascension, however, Jesus entered into a new exercise of His messiahship. This is expounded in Acts 2:24-35. Jesus has been seated at the right hand of God and installed upon the throne of David (2:30). Here Peter under inspiration reinterprets the prophecy of Ps. 110:1. The throne of David is no longer on earth in Jerusalem; it is in heaven at the right hand of God. Jesus is even now reigning as messianic king (Messiah).

C. Pauline Epistles. This reinterpretation of the reign of the Messiah in His kingdom is carried further in Paul's writings. The kingdom is both an eschatological inheritance (1 Cor. 6:9; 15:50; Gal. 5:21; Eph. 5:5; 1 Thess. 2:12; 2 Thess. 1:5; 2 Tim. 4:1, 18) and a present blessing (Col. 1:13; Rom. 14:17). The most instructive passage is 1 Cor. 15:24-26, which reflects the theology of Christ's session at the right hand of God and His messianic reign. The purpose of this reign is to put His enemies under His feet; the last enemy to be destroyed is death. When He has successfully accomplished His reign, He will turn over His rule to His Father, "that God may be everything to every one" (v. 28). In Paul, as in Acts, messiahship and lordship are interchangeable categories. When Paul said that Jesus died and rose that He might be the Lord (*kyrieúsē*) of the dead and the living (Rom. 14:9), he was saying nothing different from his assertion that He must reign as king (*basileúein*) until He has subdued all His enemies (1 Cor. 15:25). The reason why Paul interpreted the person and mission of Jesus in terms of lordship rather than in terms of Son of man or messianic king is that "Son of man" was distinctly Semitic and not meaningful in the Hellenistic world, and Messiah could be seriously misunderstood. To proclaim any other king than Caesar opened one to the charge of sedition (Acts 17:7).

D. Revelation. The book of Revelation is concerned with the eschatological consummation of the kingdom. It pictures the fortunes of the Church in a hostile world, the conflict between satanic power and the power of God, and the final triumph of the power of God in the destruction of Satan in the lake of fire (Rev. 20:10). The age to come is described in highly symbolic language as a new heaven and a new earth, with the heavenly Jerusalem coming down out of heaven to be the capital of the new order (Rev. 21–22). One of the most debated passages in Revelation is the "millennial" passage in 20:1-6. The most natural exegesis of these verses finds in them a series of events that will follow the second coming of Christ, who is pictured in military idiom in 19:11-16 as a conqueror victorious over his foes. This is followed by a binding of Satan in the abyss, the resurrection of the saints, and the reign of Christ with His saints over the earth for a thousand years. At the end of this millennial reign occurs the resurrection of the rest of the dead, the final judgment, the destruction of Satan and death, and the inauguration of the eternal state of the age to come. This is called the premillennial interpretation, for the return of Christ is followed by a literal, temporal, millennial kingdom on earth. A variant of premillennialism is dispensationalism, which conceives of the millennium primarily in terms of the Jewish theocratic kingdom. Contemporary Jewish literature sometimes conceived of the end as occurring in two states: a temporal earthly kingdom, followed by the age to come (1 En. 91:12-17; 93; 2 Bar. 39–40; 2 Esd. 7:25-43).

Inasmuch as this is the only passage in the NT that clearly teaches a temporal kingdom before the age to come, many scholars, appealing to the analogy of Scripture, have insisted that the thousand years is a symbolic number for the whole Church age, and that the reign of Christ and His saints is either the present messianic reign of Christ at God's right hand that is spiritually shared by all believers (Eph. 2:6), or it is the blessing afforded the martyrs during the intermediate state. This is called the amillennial interpretation, for it does not anticipate a literal millennial reign of Christ after His second coming. In either case, the ultimate goal is the same: not a temporal earthly kingdom, but the age to come, with its new heaven and new earth inhabited by the redeemed community, who have responded in faith to Jesus' proclamation of the present kingdom and therefore are destined to inherit the eschatological kingdom when it comes.

II. Contents
III. Sources
IV. Redaction and Text
V. Chronology
VI. Purpose and Theology

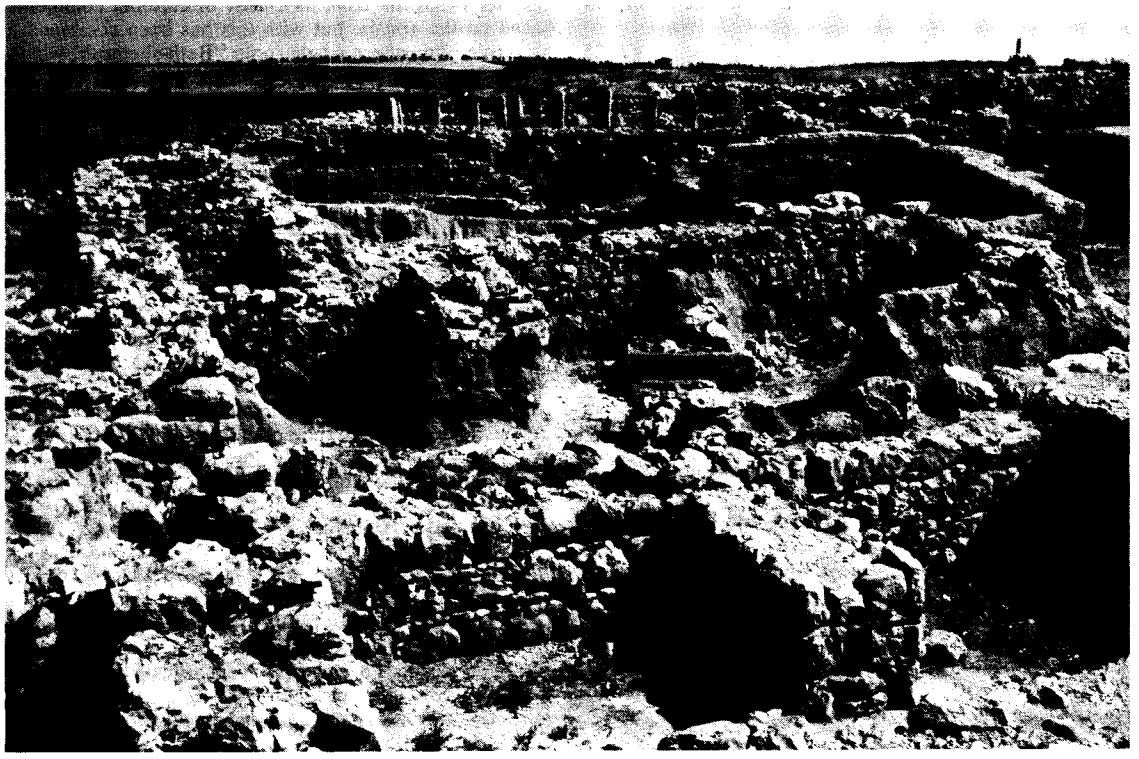
I. Place in Canon.–The division between Samuel and Kings is artificial, since, as most scholars agree, the narrative of 1 K. 1–2 continues that in 2 S. 9–20, with which it has numerous links. Indeed, LXX MSS of the Lucianic recension (cf. Josephus) place the break between 2 and 3 Reigns after our 1 K. 2:11, with the death of David, and it has been observed that there is a change of Greek translators at this point in the LXX (cf. H. St. J. Thackeray, *Septuagint and Jewish Worship* [1923], pp. 16ff.).

Originally Kings itself formed one book (called simply *m^elāḵîm*) in the Hebrew canon (cf. also Origen in Eusebius *HE* vi.25.2, who apparently considered the Hebrew title to be *w^ehammeleḵ dāwîḏ*, from the opening words; it is interesting that *hammeleḵ* alone appears as a title for the book in a MS of the 12th-13th cent. A.D., seemingly pointing to a variant tradition of naming [see W. E. Barnes, *I Kings* (1908), p. x]). The division into two books, which is for practical convenience and does not correspond to any major change in subject matter, appears in the printed Hebrew text of Daniel Bomberg's first rabbinic Bible (Venice, 1516/7), with a marginal note explaining that this division is that of the non-Jews (lit. "those speaking a foreign tongue," *hallô^azîm*; cf. C. D. Ginsburg, *Intro. to the Massoretico-Critical Edition of the Hebrew Bible* [1897], pp. 930f.). This division earlier appears in a MS of 1448 (Ginsburg, pp. 586-590) and perhaps earlier still in what seems to be MS work of at least the 14th cent. (see S. M. Schiller-Szinessy, *Catalogue of the Hebrew Manuscripts preserved in the University Library, Cambridge* [1876], I, 16-19, no. 13). This division was taken over from the LXX, followed by the Vulg., where the books appear respectively as *Basileiōn g'*, *d'* (3 and 4 Reigns) and *tertius, quartus Regum liber* (3 and 4 Kings); it was made in the LXX for reasons of mechanical convenience, and the continuity is maintained by the repetition (in LXX B) of the first verse of the second book at the end of the preceding one.

II. Contents.–The contents of Kings may be outlined as follows; note that the divisions here do not necessarily correspond to actual breaks or divisions in the underlying sources.

I. The Reign of Solomon (1 K. 1:1–11:43)
  A. David's Death and Solomon's Accession (1:1–2:46)
  B. Solomon's Reign (3:1–10:29)
  C. Solomon's Decline (11:1-43)
II. The Divided Monarchy to the Fall of the Northern Kingdom (1 K. 12:1–2 K. 17:41)
  A. The Division of the Kingdom and Worship in the North (1 K. 12:1-32)
  B. Prophetic Stories Relating to Jeroboam I (12:33–14:20)
  C. Judah under Rehoboam, Abijam, and Asa (14:21–15:24)
  D. Israel's Troubled History under the Families of Jeroboam and Baasha, and the Rise of Omri and Ahab (15:25–16:34)
  E. Elijah Stories: the Drought, the Raising of the Widow's Son, the Contest on Carmel and Its Aftermath; Naboth's Vineyard (17:1–19:21, 21:1-29)
  F. Stories Relating to the Wars with Syria (20:1-43; 22:1-40)
  G. Judah under Jehoshaphat (22:41-50)
  H. Ahaziah of Israel and His Relationship with Elijah (22:51–2 K. 1:18)
  I. Stories of the Translation of Elijah and the Commissioning and Ministry of Elisha; Wars with Moab and Syria (2:1–8:15)
  J. Judah under Jehoram and Ahaziah (8:16-29)
  K. The Fall of the House of Ahab; Jehu's Revolt and Reign (9:1–10:36)
  L. The Reign of Athaliah and the Accession and Reign of Joash of Judah (11:1–12:21)
  M. Israel under Jehoram and Jehoash; the Death of Elisha (13:1-25)
  N. Judah under Amaziah (14:1-22)
  O. Israel's Expansion under Jeroboam II and Decline under His Successors; the Assyrian Threat (14:23-29; 15:8-31)
  P. Judah under Azariah (Uzziah) and Jotham (15:1-7, 32-38)
  Q. Judah under Ahaz; His Submission to Assyria (16:1-20)
  R. The Fall of Israel and Its Sequel (17:1-41)
III. The Last Years of the Kingdom of Judah (2 K. 18:1–25:30)
  A. Judah under Hezekiah; His Reformation and the Assyrian Crisis (18:1–20:21)
  B. Manasseh and Amon (21:1-26)
  C. Josiah and His Reformation (22:1–23:30)
  D. The Last Kings of Judah and the Fall of Jerusalem (23:31–25:21)
  E. Babylonian Rule in Judah; the Murder of Gedaliah (25:22-26)
  F. The Raising of Jehoiachin from Prison in Babylon (25:27-30)

III. Sources.–Kings is essentially a compilation from a variety of sources, though not in any simple, mechanical sense; the sources are, rather, molded together to produce a new work, which from a literary point of view is a single whole, or part of a much larger whole, with a coherent message for its own time (and for subsequent generations of God's people). The incorporation of originally diverse source materials into new contexts and connections enables them to take on fresh or extended ranges of meaning.



Comparatively few scholars would now subscribe to the view that the pentateuchal sources J and E continue through the historical books and to a greater or lesser extent into Kings. These scholars, represented by Benzinger, Smend (*ZAW*, 39 [1921], 181-217), Hölscher (*Geschichtsschreibung in Israel* [1952]), and more recently Eissfeldt and Szikszai (*IDB*, II, 26-35), for all their variations, have usually agreed that the sources had already been combined some time before the final redaction(s) of Kings. But it is doubtful whether sufficient continuity exists between the admittedly diverse materials in the book to allow us to postulate extensive sources of this type. Furthermore, certain sources are named, and it is not likely that the material that can plausibly be ascribed to them was incorporated into extensions of the pentateuchal sources before finding its way into Kings. These are "the book of the acts of Solomon" (1 K. 11:41), "the Book of the Chronicles of the Kings of Judah" (1 K. 14:29;

15:7; 22:45; 2 K. 14:18; 23:28; etc.), and "the Book of the Chronicles of the Kings of Israel" (1 K. 14:19; 15:31; 22:39; 2 K. 14:15, 28; etc.). These are, in fact, referred to by the author(s) of Kings as sources of further information on the individual monarchs, but it is usually supposed that they have already been utilized in the composition of the book. Much of the material contained in the pithy, annalistic framework of Kings is commonly regarded as derived from the last two royal chronicles mentioned above, which are perhaps best understood as works based on official court annals rather than as the annals themselves, since they are apparently open to public consultation (Eissfeldt, p. 286) — though it is questionable how far this argument should be pressed (on this whole subject see further T. N. D. Mettinger, *Solomonic State Officials* [1971], pp. 36-42). References to the contents of these documents (cf. 1 K. 14:19; 16:20; 22:39) suggest that in addition to formal chronological notices they also contained brief accounts of major political events, but not, perhaps, extensive narratives. The relationship of these works to the framework of Kings will best be considered later, since at this point source questions merge with those of the overall redactional shape of the book.

There is uncertainty, too, as to what "the book of the acts of Solomon" contained (cf. J. Liver, *Bibl.*, 48 [1967], 75-101). 1 Kings 3–11 comprise an interesting diversity of materials relating to the reign of Solomon, including what appear to be popular stories about the king (e.g., 3:16-28; 10:1-10), lists and other annalistic details (e.g., 4:1-6, 7-19), as well as the detailed description of the temple and its furnishings (6:2–7:51), which forms the centerpiece of the whole carefully constructed account. It is possible that the book of Solomon's acts contained the more biographical narrative material (according to 11:41 it spoke of Solomon's wisdom), while the detailed description of the temple probably derived from the temple archives, and the lists and brief notices of Solomon's activities may have been taken ultimately from official court archives (for possible characteristic marks of such material, cf. J. A. Montgomery, *JBL*, 53 [1934], 46-52). It is perhaps most likely that such material was used by the final editor(s) of Kings via intermediate sources. On the other hand, it has been claimed that the "acts of Solomon," regarded as a product of the scribes of Solomon's court, may itself have contained a great variety of material (E. W. Heaton, *Solomon's New Men* [1974], pp. 15-30; cf. also B. Porten, *HUCA*, 38 [1967], 93-128), in which case this could have been the main though not necessarily the only source used in the composition of 1 K. 3–11. The LXX attributes the little poem connected with the dedication of the temple (8:12, but in the LXX at the end of 8:53) to the "Book of Jashar" (with a simple correction of the underlying Hebrew), while the traditions behind the stories of Hadad and Rezon (11:14-25) and of Jeroboam and Ahijah the prophet (11:29-39) are probably derived from yet other sources. Indeed, the possibility ought not to be ruled out that 1 K. 3–11 contains fragments of the so-called Succession Narrative, which is usually traced through 2 S. 9–20 and 1 K. 1–2, where it is commonly thought to have reached its climax with the establishment of Solomon as king. Neither the precise delimitation nor the commonly accepted dating of this narrative in Solomon's reign is clear. It is certain, on the other hand, that 1 K. 3–11 as it stands cannot originally have been a simple continuation of the story of chs. 1–2, in view of its very different literary character as a whole.

For the chapters that follow an even wider variety of sources has been utilized, and these have been united more or less thoroughly with the narrative framework. 1 K. 12:1-19, which tells of the division of the kingdom after Solomon's death, is assigned by some (e.g., W. O. E. Oesterley and T. H. Robinson, *Intro. to the Books of the*

Gate and wall at Hazor constructed during the Solomonic era (L. T. Geraty)

OT [1934], pp. 95f.) to the royal chronicles, but this is unlikely, given the probable character of the latter. A good narrative tradition was available to the editor here, though its precise derivation remains unknown. The composition of this section is complicated by the variant text-forms represented in the LXX (see below), but it is improbable that 12:1-19 belongs to the same group of stories as that to which the underlying traditions of 11:29-39 and 14:1-18 belong, though Jeroboam figures in each; the latter traditions are more likely to be derived from a collection of prophetic traditions concerning Ahijah of Shiloh. 1 K. 13:1-32, which is linked with the description of Jeroboam's cultic measures by 12:(32)33, concerns a southern prophetic protest against Jeroboam's altar at Bethel, and its sequel. The characters are not named, and it is usually thought that the narrative in its present form is comparatively late (13:2 connects it with Josiah's reforms; cf. 2 K. 23:16-18). This is suggested by the anachronistic reference to the "cities of Samaria" in v. 32 — before the city of Samaria had itself been built, and by a number of late linguistic features (cf. W. E. Lemke, "Way of Obedience," in F. M. Cross, *et al.*, eds., *Magnalia Dei* [1976], pp. 301-326).The following section, 1 K. 14:19–16:34, which covers the rapid succession of kings in Israel after Jeroboam's death, the rise of the house of Omri, and the contemporary events in Judah, consists entirely of framework passages and summary narratives. By contrast, in 1 K. 17–2 K. 8 we have a collection of extended narratives mainly concerning the northern prophets Elijah and Elisha. These stories, many of which are full of dramatic power, are of northern origin, as is indicated by their linguistic character (cf. Burney, pp. 208f.) as well as their subject matter. A number of them are commonly believed to derive from prophetic circles connected with Elijah and Elisha that are frequently mentioned in the narratives. At the same time, they are not all of one origin, and there are indications that these stories have undergone in the course of their transmission a complex development, to a considerable extent shaping them and linking them together before their incorporation into Kings (cf., e.g., G. Fohrer, *Elia* [2nd ed. 1968]).

The Elijah stories in 1 K. 17–19 (cf. R. Smend, *VT*, 25 [1975], 525-544) and 21 (and perhaps also 2 K. 1) are usually thought to belong together. These stories, which focus on the struggle between Yahwism and the religion of Canaan, and its implications, are marked by a strongly religious character and a very critical attitude toward King Ahab. By contrast, chs. 20 and 22, which are separated in the MT by the inserted ch. 21, are more political in character and take a rather more favorable view of Ahab. They have sometimes been attributed to a special source concerning Ahab (so Oesterley and Robinson, pp. 97f.) or to a more extensive account of Israel's wars in this period, to which such stories as those in 2 K. 3:4-27 and 6:24–7:20 might also have belonged, although even these narratives differ somewhat (cf. Eissfeldt, p. 295). 2 Kings 2ff., in addition to the stories just noted, consists chiefly of short tales about Elisha, which derive from the circles of his prophetic disciples and which stress the miraculous aspects of the prophet's ministry (e.g., 2:19-22, 23-25; 4:1-7, 38-41, 42-44; 6:1-7, and longer stories like 4:8-37 and 5:1-27). These stories, themselves not all of a piece, are chronologically disjointed, and it is often supposed that those which depict Elisha as being on friendly terms with the (unnamed) Israelite king properly belong to the time after Jehu's revolution. The same has also been claimed for 1 K. 20 and 22 (cf. J. M. Miller, *JBL*, 85 [1966], 441-454). Although the Elisha stories have been linked with those of Elijah (see esp. 1 K. 19:19-21 and 2 K. 2), the two complexes of narratives were probably originally quite separate, from a tradition-historical point of view, but as they now stand there are many parallels between them both in the works attributed to the two prophets (cf., e.g., 1 K. 17:8-24 with 2 K. 4:1-37) and in language (cf., e.g., 1 K. 18:26, 29 with 2 K. 4:31).

The account of Jehu's revolt in 2 K. 9:1–10:28 is sometimes linked with the source underlying 1 K. 20; 22; 2 K. 3:4-27; 6:24–7:20 (and perhaps 13:14-19), but this is uncertain. (Cf., in general, O. H. Steck, *Überlieferung und Zeitgeschichte in den Elia-Erzählungen* [1968]; H.-C. Schmitt, *Elisa* [1972].) In any case, it must be stressed again that even if such sources can be isolated they are themselves made up of elements of diverse settings and origins that have grown together and mutually influenced each other in such ways that it becomes difficult to disentangle them — and these factors, of course, raise problems for attempted historical reconstructions.

With 2 K. 11:1-20 and 12:4-16, which concern respectively the reign of Queen Athaliah and the accession of Joash and the latter's reform of temple finances, the long collection of northern stories (apart from 13:14-21) ends and source material of Judean origin begins. Wellhausen, Gray, and others have seen here extracts from a source of priestly origin relating to the history of the temple, to which certain other passages on this and similar topics may also be assigned (cf. Gray, pp. 32f.). But since the narratives do not bear a particularly priestly stamp, and since 12:4-16 is even somewhat critical of the priesthood, this cannot be taken for granted, and they could well be the product of secular scribes. Fohrer (*Intro.*, p. 232) thought that this material may even have stood in the "Chronicles of the Kings of Judah," though as indicated above it is not clear that these contained such extensive narratives. Chapter 13, apart from brief narrative statements and characteristic editorial comments, recounts the meeting between the dying Elisha and Jehoash of Israel during the period of the later Syrian wars (vv. 14-19) and has a separate anecdote on the miraculous power of the prophet's bones (vv. 21f.). Chapter 14, again, consists chiefly of editorial comments based on the annals, but with this has been combined a narrative of northern origin (note "Beth-shemesh, which belongs to Judah" in v. 11) concerning King Amaziah's challenge to Jehoash of Israel and its outcome (vv. 8-14). Annalistic material has again been extensively drawn on in 15:1–17:16, which takes us down through the reigns of the last kings of Israel and the contemporary rulers of Judah (Azariah, Jotham, Ahaz) and culminates in the fall of Samaria to the Assyrians and the captivity of the northern kingdom. The account of Ahaz's submission to Tiglath-pileser III and his construction of an altar in the temple (16:10-18) has sometimes been attributed to the "priestly source" mentioned above, but this is quite uncertain.

A further extensive narrative complex, relating to the Assyrian threat to Jerusalem in 701 B.C. and the activities of King Hezekiah and the prophet Isaiah at this time, is contained in 18:7–20:19; this is paralleled in Isa. 36–39, with certain additions there (notably the psalm of Hezekiah in 38:9-20). The latter chapters are commonly regarded as derived from Kings, rather than vice versa. The complicated historical and editorial problems connected with these chapters cannot be considered in detail here (cf. H. H. Rowley, *Men of God* [1963], pp. 98-132; B. S. Childs, *Isaiah and the Assyrian Crisis* [*SBT*, 2/3, 1967]; P. R. Ackroyd, *SJT*, 27 [1974], 329-352; R. E. Clements, *Isaiah and the Deliverance of Jerusalem* [1980]), but we should at least note the probability (after B. Stade, *ZAW*, 4 [1884], 173ff.) that in the account of the crisis itself at least two separate sources have been combined (18:17–19:9a, 36f., and 19:9b-35). A brief notice, not fully paralleled in Isaiah, that relates to

the crisis (18:13-16) is probably derived ultimately from the annals of Judah. As it now stands, 20:1-11, the story of Hezekiah's sickness, is also related to the time of the Assyrian crisis but it may not have been so originally (v. 6b is perhaps a redactional link; cf. 19:34). This is certainly the case with 20:12-19, which is only loosely connected with the preceding material by the phrases "at that time . . . for he heard that Hezekiah had been sick" (v. 12; cf. the similarly weak "in those days" in v. 1), and which belongs historically to an earlier period (cf. Gray, p. 668). It seems likely that these narratives were drawn from a collection of popular stories about Isaiah, not written by the prophet himself, nor preserved by his immediate followers, but probably belonging to a considerably later period or periods. Perhaps (some of) the material was shaped as late as the reign of Zedekiah, since 20:16-18 appears to be linked — at least redactionally — to the events of 597 B.C., while the later fall of Jerusalem and the destruction of the temple are not mentioned. We may compare the report in 24:13-15 (note "as the Lord had foretold" in v. 13), of which, however, vv. 13 and 14 (cf. P. R. Ackroyd, "The Temple Vessels — A Continuity Theme," in *Studies in the Religion of Ancient Israel* [*SVT*, 23, 1972], p. 172) seem to be additions to the text.

Passing by ch. 21, which consists entirely of the framework, together with editorial comment on the evil worship perpetrated by Manasseh and Amon, we hear of the discovery of the "book of the law" during the reign of Josiah (22:3–23:24). This material is of great significance for the editor(s) of Kings, since, as will be seen later, it is from the perspective of that law book that the history is written; the editor(s) were now dealing with the period close to their own day and with matters dear to them. Although the view of some scholars, that this material is a further extract from a priestly source relating to the temple, is not likely, it is generally accepted that the account of Josiah's reformation is historically very valuable (but cf. A. D. H. Mayes, *Deuteronomy* [*NCBC*, 1979], pp. 85ff.). Even so, the extent to which the narrative was written in the light of the particular interests of the editor(s) of the book should not be overlooked. Perhaps two separate sources were combined here; linked with the narrative of the discovery of the law book (22:3–23:3) was a more formal list of the reforms regarded as based on it (23:4-20, with additions; cf. Noth, *Überlieferungsgeschichtliche Studien*, p. 92; Eissfeldt, p. 297; Gray, pp. 714f.; see also D. W. B. Robinson, *Josiah's Reform and the Book of the Law* [1951]). The latter may be based on annalistic material.

For the concluding section of Kings, from the death of Josiah at Megiddo in 609 B.C. down to the fall of Jerusalem in 587/6 and the raising of Jehoiachin from his Babylonian prison in 561, material has been drawn from the Chronicles of the Judean kings and perhaps from other sources (as in, e.g., 25:16f.), but the narrative can be regarded as mainly the editor's or editors' own composition based on personal knowledge of events. Jer. 52, which is an appendix to the prophetic book, is parallel to 2 K. 24:18–25:30, except that the list of deportees in Jer. 52:28-30 does not appear in Kings, and 2 K. 25:22-26 is missing in Jeremiah, perhaps because the events recorded in it had already been reported at greater length in Jer. 40–43.

IV. Redaction and Text.–Redaction is that process of composition and editing whereby the varied source materials referred to above were combined to give Kings its present shape. To a large extent, this shape is given to the book by the characteristic editorial framework, already mentioned, which consists chiefly of stereotyped formulas referring to the reigns of the Israelite and Judean kings. For a Judean king, the introductory formula to his reign commonly runs as follows: "in the . . . year of . . . king of Israel, . . . began to reign over Judah; . . . was . . . years old when he began to reign, and he reigned . . . years in Jerusalem. His mother's name was . . . . And . . . did what was right [or evil] in the eyes of the Lord . . ." (cf., e.g., 1 K. 14:21; 15:9-11; 2 K. 16:1-3; 21:1f.). There are minor variations to this pattern, but it is clear that the characteristic elements are (1) a synchronism with the contemporary king of Israel (missing in the case of Rehoboam, 1 K. 14:21, and, of course, ceasing after the fall of the northern kingdom), (2) a notice of the king's place of residence, (3) a mention of the length of his reign and often a mention of his age at the time of accession, (4) the name of his mother, (5) a religious judgment on the king, with some variety in the form of expression used, and often expanded by fairly formal notices of particular cultic measures of the king in question (cf., e.g., 2 K. 16:3f.; 18:4; 21:3-10). A similar, quite rigid structure appears in the concluding formula to a reign, thus: "now the rest of the acts of . . . and all that he did, are they not written in the Book of the Chronicles of the Kings of Judah? And . . . slept with his fathers and was buried in the city of David. And . . . his son reigned in his stead" (cf., e.g., 1 K. 14:29-31; 15:23f.; 2 K. 21:17f.). Allowing again for variations, the constant elements are (1) a reference to a source of further information, (2) a mention of the king's death and burial place, and (3) the name of his successor. Sometimes the pattern is expanded by means of brief narrative comments (as in, e.g., 2 K. 23:29f.). A very smilar, though not identical, framework structure is used for the kings of Israel. Only occasionally is the framework missing, e.g., Jehu has no introductory formula, but cf. 2 K. 10:34-36. In the introductory formula (cf., e.g., 1 K. 15:25f.; 16:23; 2 K. 13:1f.) there is no mention of the king's mother or of his age at the time of his accession, and the religious verdict is always unfavorable (interestingly qualified in the cases of Jehoram, 2 K. 3:2, and Hoshea, 17:2); the concluding formulas, again with some variations, are closely parallel to those for the kings of Judah.

The varied sources indicated above have been built into this framework. But for a number of kings there is only the formal notice of their reign, expanded to some degree by brief narrative comments (cf., e.g., 1 K. 16:8-10, 23-28; 2 K. 15:13-15, 17-22; 21:19-26; and, more extensively, 21:1-18). A consideration of how much of the framework material is the work of the editor(s) of Kings, albeit based on earlier sources, and how much of it comprises earlier material has an important bearing on theories of how the book came to its present shape (cf. S. R. Bin-Nun, *VT*, 18 [1968], 414-432). Thus Jepsen argued that at the heart of Kings lies a synchronistic chronicle of the Israelite and Judean rulers, composed in Judah in the late 8th cent. and running from 1 K. 2:10 to 2 K. 18:8. This was combined with another single annalistic source (composed in priestly circles in Jerusalem in the 7th cent.) by a priestly redactor in Jerusalem in the years after 587/6 B.C. A further redaction some years later added the extensive prophetic narratives, and another, less thorough one took place in Levitical circles in the late 6th century. The existence of such a synchronistic chronicle as the basis for the work is unlikely, however, and in spite of the thoroughness of Jepsen's work his thesis has rarely been accepted in its full form.

In trying to decide how Kings was produced, we may start from the well-known facts that much of the language of the clearly editorial work is very similar to that of the book of DEUTERONOMY, and, further, that the history in Kings (in particular, the reign of each king) is assessed on the basis of its conformity to the Deuteronomic law. We

have noted also the considerable significance attached to the discovery during Josiah's reign of a law book that is usually identified with Deuteronomy (at least in a shorter form). Hence the editing of Kings is commonly referred to as "Deuteronomistic." A few examples of the use of language parallel to that of Deuteronomy may be noted here (with nonexhaustive references): "walk in the ways of Yahweh" (1 K. 2:3; 3:14; 11:33, 38; cf. Dt. 8:6; 19:9; 26:17); "keep his statutes, his commandments, his judgments, his testimonies" (usually a shorter combination of some of these terms; 1 K. 2:3; 3:14; 9:4, 6; cf. Dt. 4:2; 5:29; 6:2); "do that which is right in the eyes of Yahweh" (1 K. 11:33, 38; 14:8; 15:5; cf. Dt. 6:8; 12:25, 28; 21:9). For detailed lists of characteristic Deuteronomistic phrases, see Burney, pp. xiiif.; S. R. Driver, *Intro. to the Literature of the OT* (9th ed. 1913), pp. 200-202; and M. Weinfeld, *Deuteronomy and the Deuteronomic School* (1972), pp. 320-359. Clearly, care is needed in using such lists, since the use of an isolated phrase may not necessarily indicate Deuteronomistic redactional activity. The evidence for such activity is stronger when such phrases occur in abundance, and when there is other reason to suspect a modification of the source material. (*See* CRITICISM.)

Examination of Kings reveals a great deal of such redactional activity, which has taken various forms. In addition to the framework material (on which see also H. Weippert, *Bibl.*, 53 [1972], 301-339) and related brief narrative comments based on earlier sources, which are sometimes quite extensive (as in 1 K. 14:19–16:34; 2 K. 21), we may note that the editors have also composed more detailed narratives (as in 2 K. 24:18–25:30), and, in addition to the terse theological judgments on the individual kings, a longer theological discourse on the reasons for the fall of the northern kingdom (2 K. 17:7ff.). Furthermore, most scholars regard many of the speeches placed in the mouth of important figures at significant points in the history as, in their present form, Deuteronomistic compositions (so, e.g., 1 K. 2:2-4; 8:14-53). If underlying sources have been used here, it is often no longer possible to isolate them from the editorial composition. Some narratives, too, have been extensively edited (e.g., 1 K. 3:4-15; 14:1-18). The process of editing may also be seen in the arrangement of the material. For example, the troubles of Solomon's reign have been gathered together schematically to the last part of his life (1 K. 11). In some sections, redactional activity is readily apparent, while in others (e.g., the stories of Elijah and Elisha) it is less apparent, but nonetheless present, and in fact may be more extensive than is often thought. Obviously, such broadly conceived editorial work has implications for the historicity of Kings (see below).

Who was responsible for this work? As we have indicated, we are dealing not merely with a work of compilation but with an extensive and intensive editing of the sources so as to produce a new work; hence we may even speak of the editors or redactors as authors. Talmudic tradition (T.B. *Baba Bathra* 15a) ascribes the authorship of Kings to Jeremiah. But as with other such statements, it is quite unlikely that any independent tradition lies behind this ascription. Whether it is based on a recognition of the narrative parallels in Jeremiah and Kings, and the linguistic similarities that exist between parts of Jeremiah and the editorial work in Kings (cf. Driver, p. 203), or on a recognition of its general "prophetic" character, is difficult to say. But Kings also has narrative parallels with Isaiah, and the parts of Jeremiah that have the closest linguistic affinities with Kings are themselves probably to be regarded as editorial activity undertaken from the point of view of Deuteronomy. In any case, Kings takes us down to a period presumably after Jeremiah's death. It is much more likely that Kings is a product of the supposed Deuteronomistic group which, it has been assumed, was active in the 7th cent. and in the years of exile that followed, and with which Jeremiah may, indeed, have had close contacts. According to this view, this group, in the light of the discovery of the law book in the temple in 621 B.C., undertook to produce a historical work showing how Israel had fared in accordance with its obedience — or more often disobedience — to the will of God as expressed in that law.

As to the date and provenance of Kings, two main views have been held in each case. Noth put forward the view that the book was composed not as an independent work, but as part of a continuous "Deuteronomistic history," running from Joshua to Kings, headed by the earlier Deuteronomy, which was composed in Palestine during the exilic period, some time after the last event recorded in 2 K. 25:27-30, *ca.* 550 B.C. Noth regarded this work as an explanation of the disasters that had overtaken Israel and Judah: these had come about because of Yahweh's judgment on His people's disobedience. Noth's approach has had a wide following, though some have preferred a setting in the Babylonian Exile (cf. esp. E. W. Nicholson, *Preaching to the Exiles* [1970], pp. 117ff.). Noth thought of a single Deuteronomistic author who had available to him a wide range of as yet unconnected sources from which he produced a wholly new work.

An older view, represented in the last century by Kuenen and Wellhausen and more recently by such scholars as Burney (p. xvi), Snaith (pp. 10-12), Gray (pp. 6-9), and Cross, is that redaction occurred in two stages, with a first edition of Kings appearing before the Exile, and a second, which brought the story down to the release of Jehoiachin, appearing after the latter event. Those who have taken this view but still have accepted Noth's Deuteronomistic history theory usually have supposed that the whole work was subjected to at least a two-stage editing. In favor of this view are certain references to situations or institutions that continue "to this day," and that thus seem to assume the continued existence of the state of Judah and its temple (cf. 1 K. 8:8; 9:21; 12:19; 2 K. 8:22; 16:6). Noth supposed that such references belong to the preexilic sources utilized by the exilic author of Kings, but a number of them, at least, are clearly redactional. This feature, taken in conjunction with a number of others, some of which taken by themselves are rather less convincing, points to a date before 587/6 for the first edition of Kings.

It has also been argued that Huldah's prophecy in 2 K. 22:20 reflects the time before Josiah's violent death at Megiddo in 609 B.C., so that this provides a *terminus ad quem* for this first edition (so, e.g., Fohrer, *Intro.*, p. 236). Clearly something depends here on the extent to which one thinks it likely that prophecies were "written up" after the event. Conversely, "it may be argued that the word *šālōm* ('peace') here may refer not to the nature of Josiah's death but rather to the fact that he was to die whilst the *šālōm* or 'well-being' of his kingdom was still intact" (E. W. Nicholson, *Deuteronomy and Tradition* [1967], p. 15). Some scholars have preferred to date the first edition *ca.* 600 B.C. (so, e.g., Pfeiffer, pp. 378f.), while Eissfeldt left open the possibility that the first edition may itself have been produced shortly after 587/6 and was later brought down to the time of Jehoiachin's release. The present writer prefers to think of an edition of Kings prior to 587/6, perhaps before 609, and possibly subject to revision before the final fall of Jerusalem, with further redactional activity after that date. How long after

it is hard to say, especially if 2 K. 25:27-30 is regarded as an even later supplement rather than as an integral part of the later stage of editing.

The extent of the post-587/6 redaction continues to be debated. Is one to think of a quite new *edition* of Kings, or simply of a supplement or series of supplements added at the end? The former seems more likely, since a number of passages within the body of the work appear to reflect both pre- and post-587/6 perspectives, so that more than one stage of redaction is apparent (e.g., in Solomon's prayer in 1 K. 8:14-53, if it is correct to see its present form as largely the work of the Deuteronomists). But recent research has suggested an even more complex pattern of editing, and scholars such as W. Dietrich (*Prophetie und Geschichte* [1972]; *VT*, 27 [1977], 13-35) have sought to uncover several distinct redactional strata from the period after the fall of Jerusalem. It is not always clear that the linguistic and other criteria used to isolate such strata are sufficiently distinct to allow the deductions drawn from them; and, while accepting the complexities of the redactional process, one may need to recognize that such views (together with those mentioned above) do not adequately do justice to "a rich and developing tradition in which . . . we may perhaps be more justified in seeing the *ad hoc* quality of exposition, directed to particular moments and needs, than in discovering supposedly different hands at every inconsistency of statement" (P. R. Ackroyd, *JTS*, 27 [1976], 160). One probably has to think, then, not of a single author but at least of a continuing group whose efforts extended over a considerable period.

One should note, too, the probability that the process of revising and glossing the text went on until well into the postexilic period; some scholars have thought, in fact, of quite extensive later additions (see, e.g., Eissfeldt, pp. 300f.). That the text of Kings seems to have remained in a quite fluid state appears to be indicated also by the numerous variations from MT in the text of the LXX Reigns. Apart from many smaller variants, these major differences are of several types and include the different chronological schemes in the LXX (see below) and different grouping of material (e.g., the order of much of the material in 1 K. 3–11 [LXX] differs widely from that in the MT; and the LXX has 1 K. 20 and 21 in the reverse order). One must also recognize the considerable differences in content that are apparent at many points. A notable example of the latter is the existence in the LXX of two accounts concerning Jeroboam and the division of the kingdom, the latter of which (1 K. 12:24a-z in Rahlfs's edition) has no counterpart at this point in the MT, though some of the material in it appears at other points in the MT. Another example is the appearance of two collections of notices after 1 K. 2:35 and 2:46 (LXX), respectively, regarding Solomon's reign; again, some of the material in them has parallels in 1 K. 3–11 (MT), while some of the latter have other parallels in the LXX in those chapters. Obviously one must think in terms of a complex textual history in Kings.

As to the relative worth of the Hebrew and Greek text forms, no simple judgment is possible. The recognition that at many points the LXX represents a better (though not always necessarily a more original) underlying Hebrew text certainly does not mean that it is to be followed in all its variations from the MT. A lively debate is in progress between those who, in broad terms, regard the variations in the LXX as due to an underlying text different from the MT, and those who find in the LXX itself a large element of revision and reinterpretation of the Hebrew text on which it is based. The chief protagonist for the former view is F. M. Cross (see, e.g., *IEJ*, 16 [1966], 81-95; cf. R. W. Klein, *Textual Criticism of the OT* [1974]). Cross, drawing on, and modifying, the discovery of D. Barthélemy (*Les Devanciers d'Aquila* [*SVT*, 10; 1963]) that in 2 S. 11:2–1 K. 2:11 and 1 K. 22:1–2 K. 25:30 the purest form of the early Greek text is represented by certain MSS of the "Lucianic recension," and on the portions of Samuel and Kings in Hebrew discovered at Qumrân, put forward a detailed theory of the development of several recensions of the Hebrew text prior to its standardization. The latter view mentioned above is championed notably by D. W. Gooding, who found a much greater degree of deliberate reinterpretation in the LXX (e.g., on 1 K. 2 [LXX] see his *Relics of Ancient Exegesis* [1976], and on other passages *Textus*, 7 [1969], 1-29, and other articles; on 1 K. 12 [LXX] see also R. P. Gordon, *VT*, 25 [1975], 368-393). This debate, with all its complicating factors, has hardly reached a satisfactory solution, but it seems fair to say that both viewpoints have truth in them. Every particular example of a difference between the MT and LXX has to be considered on its own merits and also in the light of similar deviations elsewhere in (Samuel–) Kings. Absolute priority can be given neither to the MT nor to the text represented by the LXX, but the developing textual history of Kings in the postexilic period needs to be taken into account in discussions of the redaction and exegesis of the book.

If the understanding of the composition of Kings represented above has some degree of validity, some attention must be paid to its historical and theological implications. If we take into account the rich diversity of the source materials drawn on, with their own particular backgrounds and purposes, then any simplistic, blanket assessment of the historicity of Kings seems to be ruled out. A variety of types of narrative writing is represented, as diverse among themselves as they are distant from modern standards of what constitutes historical writing. Some of the materials may be as much akin to what one should call "story" as they are to "history"; such is frequently held to be the case with, e.g., some of the prophetic narratives in Kings. But this need be a problem for understanding the inspiration and authority of Scripture only if one begins with a prior assumption that God's word can come to mankind only through narratives written according to the canons of modern "scientific" historiography. At the same time, it would be wrong to suppose that the "factuality" of the events recorded is without relevance for the validity of the interpretation Kings places on them (cf. J. Goldingay, *Tyndale Bulletin*, 23 [1972], 58ff.). It is the precise nature of such "factuality" that is in question. Furthermore, one needs to ask what constitutes significant "history" in general, and for the writers of Kings in particular. The latter is clearly an interpreted history in which religious considerations play the major role. Eissfeldt (pp. 299f.) implicitly criticized the authors for telling so little about the "real importance" of Omri; but a political chronicle could hardly have sustained the faith of God's people in the period of crisis to which Kings belongs. The very writing and use of the history is itself a significant part of the history, which from this point of view can have only a relative significance (cf. E. H. Carr, *What is History?* [1964], pp. 35f.). That at the same time the people of God find in Scripture His word to them in their own situation constitutes the fundamental basis for biblical hermeneutics. It is the redaction of Kings that has molded together the diverse materials contained in it so as to speak meaningfully to Israel's situation, though it should be noted that some scholars would take a more conservative view of the process of editing than that proposed above. Many of the passages that the present

writer regards as (at least in their present form) products of Deuteronomistic redactional activity have been regarded by others as actually belonging historically to the contexts ascribed to them (see, e.g., E. J. Young, *Intro. to the OT* [2nd ed. 1958], p. 202). The linguistic and other criteria used here can hardly be separated from the question of the date of Deuteronomy itself, though with an early setting for the latter one still has to ask such questions as why the Deuteronomistic language is used only in certain contexts and why the same kind of language should be used in the undoubtedly editorial portions of Kings. To accept a view like that proposed earlier certainly does not mean that the theological message of the "Deuteronomists" has no continuity with the source materials or is without a basis in Israel's prior religious tradition. But it does assert that earlier materials have been written up, interpreted, and expounded in the light of later historical situations. Hence Kings is not simply or even primarily a historical chronicle, but a rich and deep theological evaluation of Israel's history.

V. Chronology.–Notes on the lengths of reigns of the various kings of Israel (e.g., 1 K. 15:25; 2 K. 15:13) and Judah (e.g., 1 K. 14:21; 2 K. 21:1), in addition to the synchronisms between the regnal years of the monarchs of the two kingdoms (e.g., 1 K. 15:1; 2 K. 14:1), form an important constituent of the narrative framework of the book, but present us with problems of some complexity. These problems must at least be indicated here, because of their bearing on questions of redaction and composition in general, from which they cannot ultimately be separated — since, e.g., as has been shown, it is still disputed how much of the framework material is taken from earlier sources and how much is the work of the editors of Kings. A major difficulty arises from the fact that, if the chronology of the monarchy period is computed in terms of the lengths of reigns, then this sum does not coincide with that computed on the basis of the synchronisms. Thus questions of the internal consistency of the data of Kings are at stake, as well as of discrepancies with external data, on which, of course, one must in any case rely in order to establish an absolute chronology. For example, Hezekiah's fourteenth year (2 K. 18:13) is dated at the time of the Assyrian crisis in 701 B.C., placing his accession in 715/4; but in 2 K. 18:1 (cf. v. 10), Hezekiah's accession is placed in the third year of Hoshea of Israel, which is *ca.* 729 B.C. Again, in 2 K. 1:17 the commencement of the reign of Jehoram of Israel is synchronized with the second year of Jehoram son of Jehoshaphat of Judah, yet in 3:1 he is said to have become king in the eighteenth year of Jehoshaphat. There are many similar cases. Furthermore, regnal years for Israel and Judah calculated between two fixed points do not always tally. For instance, the period between the division of the kingdom and the roughly simultaneous deaths of Jehoram (Joram) of Israel and Ahaziah of Judah (cf. 2 K. 9:21ff.) amounts to just over ninety-eight years when calculated according to the Israelite reigns, but to ninety-five years according to those of Judah.

The difficulty of such problems has led to many proposed solutions. Some scholars (e.g., Wellhausen) dismissed the synchronisms (along with the whole chronology) as artificial and largely worthless. Others regarded them more highly than the independent regnal datings (cf. J. Begrich, *Die Chronologie der Könige von Israel und Juda* [1929]; S. Mowinckel, "Die Chronologie der israelitischen und jüdischen Könige," *Acta Orientalia*, 10 [1932], 161-277) and as perhaps derived from an already existing synchronistic chronicle that itself forms the essential skeleton of Kings (so esp. Jepsen). But in spite of the existence of comparable synchronistic material from Mesopotamia (see, e.g., *ANET*, pp. 272-74), such a phenomenon remains unlikely in Israel-Judah. Along with the discussion of the literary and editorial phenomena have gone numerous attempts to work out satisfactory and consistent chronological systems, among the most influential of which, though often subject to greater or lesser modifications, have been those of Begrich, Albright (*BASOR*, 100 [Feb. 1945], 16-22, and Thiele (*MNHK*).

Thiele's work, based on a conviction of the substantial accuracy of the Masoretic textual tradition, attempts to elucidate the principles of computation that underlie the figures in Kings. He found variations in different periods in the two kingdoms as to whether the regnal year was reckoned from a spring or autumn new year and as to whether or not the king's accession year was counted as the first year of his reign. Thiele also made considerable use of the hypothesis (not first suggested by him) that there were a number of co-regencies, in accordance with which regnal years could be reckoned as overlapping, and Gray added others to those postulated by Thiele. Such co-regencies and overlapping regnal years were common in Egypt in various periods (see *VT*, 27 [1977], 268-279), and it is not improbable that they should also be known in Judah and Israel during the monarchy period. There are some scattered hints, other than in the chronological notices themselves, that this was the case. Thus, e.g., when it is said that Jotham was "over the household [*'al habbayit;* but not in itself a distinctively royal function, cf. 1 K. 4:6] governing [Heb. *šōpēṭ*] the people of the land" during the period of Uzziah's leprosy (2 K. 15:5), and when this is taken in conjunction with the relevant regnal figures, a plausible though not a certain inference is that a formal co-regency is being referred to. By applying such principles, Thiele was able to produce a satisfactory chronological system based almost entirely on the figures of the MT; the variant figures represented by the LXX traditions (for which cf. Burney, pp. xlii-xliii) are taken to be secondary attempts to deal with the difficulties of the Hebrew scheme.

On the other hand, according to J. M. Miller, "a weakness of this approach is that, with unlimited appeal to such extenuating circumstances, almost any set of figures within reason could be made to fit" (*OT and the Historian* [1976], p. 38). Shenkel, in particular, drawing on the work of Barthélemy and Cross, tried to demonstrate the superiority of the variant chronology underlying the "proto-Lucianic" tradition of the LXX from 1 K. 22 into 2 Kings, where it represents the Old Greek translation, itself based on a Hebrew text more original than that offered by the MT. While, e.g., Thiele explained the discrepancy between 2 K. 1:17 and 3:1 by the hypothesis of a co-regency of Jehoram with his father Jehoshaphat, Shenkel preferred a solution based on the figures of the recovered Old Greek text. Though the last word has hardly been said (cf. D. W. Gooding, *JTS*, 21 [1970], 118-131), the subject is obviously of considerable importance for understanding the sources and redactional methods used by the editors of Kings.

VI. Purpose and Theology.–It must be stressed that the purpose of Kings is basically theological and religious. Since Noth's work on the Deuteronomistic history, it has been difficult to consider Kings in isolation from the historical books that precede it (but cf. Fohrer, *Intro.*, pp. 192ff.). The work is to be seen as vitally related to the situation of God's people in exile, away from their own land and broken by the apparent defeat of God's promises and purposes. Noth's view was that the history was written around the middle of the 6th cent. to explain why both

the fall of Israel and the Exile had come about, i.e., because the curses of the Deuteronomic law on those disobedient to the covenant (cf. Dt. 28), already seen as active in Israel's earlier history, had come to full fruition. The work can thus be seen as "a comprehensive confession of Israel's guilt" (von Rad, *Theology,* I, 337). Noth's work is basic to an understanding of the theology of Kings, though it has been modified at several important points. Noth himself (*Überlieferungsgeschichtliche Studien,* pp. 107ff.) saw the history as an explanation of Yahweh's righteous judgment, with nothing positive to say about any future possibilities of renewal and restoration. H. W. Wolff (*ZAW,* 73 [1961], 171-186), however, followed by such scholars as von Rad (*Theology,* I, 346) and W. Brueggemann (*Interp.,* 22 [1968], 387-402), rightly saw that the Deuteronomistic history does in fact speak of a hope for Israel in exile, rooted in the grace and faithfulness of Yahweh Himself, which would be manifested as His people turned back to Him (cf. Dt. 4:25-31; 30:1-6; 1 K. 8:46-53). The word of judgment could not be His final word. Von Rad himself (*Studies,* pp. 84-91) had already stressed the tension between grace and judgment in the history, the former being seen preeminently in God's promises to David that are emphasized again and again by the Deuteronomists as the basis for His mercy toward even a sinful royal house of Judah (cf. 1 K. 11:13, 32, 36; 15:4; 2 K. 8:19).

In Kings the Mosaic Torah and the promises to David function as the twin pillars of Israel's history. The book ends on a note of hope based on the raising of the Davidic king Jehoiachin from prison in exile (2 K. 25:27-30, on which see esp. E. Zenger, *BZ,* 12 [1968], 16-30). Nothing definite is said regarding the implications of this for either royal house or people, and the passage remains tantalizingly oblique. But it surely contains the hint — and the faith of the Deuteronomists — that Yahweh has not forgotten His promises, that indeed, even before His people do turn back to Him, as they are being encouraged to do, He is already beginning His gracious work of restoration. No longer is He "like an enemy" (Lam. 2:4f.); His merciful purposes stand.

While such a theological message makes sense for the exilic Kings, basically in its present form, a somewhat different purpose must be supposed for the preexilic edition(s) of the book. Cross suggested that the first edition comes from the period before Josiah's death in 609 B.C., and, with its stress on the sin of Jeroboam son of Nebat on the one hand, and the election of David (and Jerusalem) into a special relationship with Yahweh on the other, serves both to assert the claim of the Davidic dynasty to rule "all Israel" and to encourage Judah to return wholeheartedly to faithfulness to Yahweh after the disobedience of the past. It thus serves as a programmatic support for the reforming activities of Josiah. This is an attractive statement, though inevitably it hangs to some extent on the dating of this first edition before Josiah's death. To the second, exilic, edition of Kings, Cross attributed passages like those indicated above, apparently addressed to the exiles and encouraging them to repent and return to Yahweh, and also the explanation of the final fall of Judah as being due to the sin of Manasseh, which even Josiah's repentance and reforms could not avert (2 K. 21:10-15; 23:26f.; 24:3f.).

As noted above, the main theological themes of Kings (other than the direct stress on the promises to David, for which see 2 S. 7) are derived from Deuteronomy, on the basis of which Israel's history is assessed. Central here is the righteousness demanded by Yahweh of His people, of which the monarchs are seen in Kings as the embodiment and representatives: the regnal framework shows this clearly, judging the rulers according to whether they did what was right or evil in God's eyes. The main criterion for this judgment lies in the king's attitude toward the centralization (and purity) of the worship of Yahweh. In Kings, the place where Yahweh would "put His name," His chosen city (Dt. 12:1ff.; cf. H. Seebass, *TDOT,* II [1975], 79-82), is directly identified by the Deuteronomists as Jerusalem (cf. 1 K. 11:36; 14:21; 2 K. 21:4, 7). The rulers of the northern kingdom are always judged negatively on the basis of their sinful conduct in perpetuating the schism from Jerusalem and from the house of David, the objects of God's election. Thus they are often said to "walk in the sin of Jeroboam the son of Nebat, which he made Israel to sin" (see 1 K. 12:26-32; cf. 15:34; 16:2, 19, 31; 2 K. 3:3; 13:2, 6, 11; etc.), which entailed continuing not only the schism but also the worship of "other gods"or "idols" (cf. 1 K. 16:13; 2 K. 10:29-31; etc.), when Israel was in terms of the covenant bound to the worship of Yahweh alone. One should indeed probably see an element of schematization here, but the sorry tale of woe as the Deuteronomists picture it reaches its climax in the fall of Samaria to the Assyrians and the captivity of the northern kingdom. The "sin of Jeroboam," the consequences of which had already been seen in the judgment on some of those who followed it (cf. 1 K. 15:29f.; 16:7, 12f.), is finally and justly punished. This is the viewpoint expressed in the long Deuteronomistic sermon on the fall of Samaria and the events which followed in 2 K. 17:7-41. Behind this passage seems to lie a rather complex editorial process (cf. Burney, pp. 330ff.; Gray, pp. 638ff.; R. J. Coggins, *Samaritans and Jews* [1975], pp. 13ff.; but see also M. Cogan, *JBL,* 97 [1978], 40-44), but it is sufficient to note the reasons given for the fall of Israel. It is due to Israel's "fearing other gods" (v. 7; cf. vv. 9-12, 15-17), to which it was brought by Jeroboam son of Nebat (vv. 21-23). To turn thus from Yahweh was to despise the covenant with the one who had brought Israel from slavery in Egypt (vv. 7, 15).

But if Israel was thus justly punished, so too, in the end, was Judah. As indicated, the difference is that Judah remained faithful to the chosen house of David after the division of the kingdom. Yahweh had committed Himself to David, and so to his descendants. Time and time again, the Deuteronomists represent God as sparing Judah or as mollifying its punishment because of His promises, though many kings of Judah were as bad as the kings of Israel (cf., e.g., 1 K. 15:3f.; 2 K. 8:18f.). Furthermore, the temple, the other major focus of God's promises — its building is greatly stressed in the account of Solomon's reign — was in Jerusalem. Among those kings who "did what was right in the eyes of the Lord" (cf. 1 K. 15:11-15; 22:43; 2 K. 12:2f.), Hezekiah (2 K. 18:3-7) and Josiah (2 K. 22:2; 23:25) stand supreme. Both kings carried out reforms of the worship of Jerusalem, Josiah's being recounted at length since it was based on the "book of the law." Josiah, who also carried his reforming work into the north (2 K. 23:15-20), is singled out for special praise. He above all others can be compared with David, the righteous king and the standard for all later monarchs (2 K. 22:3); he above all others was faithful to the Mosaic Torah (23:25). Yet the promises to David and his house are not regarded as unconditional: for the Deuteronomists their effective reality is based precisely on the king's obedience to that Deuteronomic Torah, as is stressed from the beginning (cf., e.g., 1 K. 2:2-4; 9:4-9). It is on that obedience that the security of Judah, its king and temple, depend. Nevertheless, even when Jerusalem and the dynasty of David did fall, the promises did not finally fall with them, but, as has been suggested, in some undefined way re-

mained operative. (Equally, it is not made clear how this relates to the possibilities of repentance and restoration for the people; it might even be claimed that 2 K. 25:27-30 was an addition reviving the royal Davidic hopes after Kings had somewhat moved away from these toward a stress on the people as such.)

The reason given for the fall of Jerusalem is the sin of Manasseh (2 K. 23:26f.). Again one should note a certain degree of schematization in the accounts of the last kings of Judah: the very good kings Hezekiah and Josiah serve as contrasts with the evil kings Ahaz and Manasseh, and vice versa. Even the faithful obedience of Josiah was able only to postpone (22:19f.) and not to avert the final catastrophe that Yahweh resolved in the light of Manasseh's sins. The latter are described in some detail in the account of Manasseh's reign in ch. 21, which is the nearest counterpart for Judah to the Deuteronomists' sermon on the fall of Israel in ch. 17; Manasseh functions as the Judean counterpart of Jeroboam son of Nebat. It has often been thought that this whole portrayal of the reasons for the fall of Jerusalem is so schematic as to be highly artificial, and, indeed, that the whole editorial structure of Kings is based on a rigid doctrine of retributive justice, with appropriate blessings or punishment for obedience or disobedience respectively, even where the facts seem not to confirm such an approach. There is some truth in this, but there is also room for exceptions, preeminently Josiah himself, killed at Megiddo (2 K. 23:29; the view that Kings was written after this event, which was nevertheless omitted because it contradicted the rigid doctrine of rewards and punishments [so Pfeiffer, pp. 378f.], seems highly improbable). The schematic presentation is visible in other ways, too. It is seen, e.g., in the way in which the troubles of Solomon's reign are gathered together after the account of his foreign marriages, with the syncretism these encouraged; note that the latter, and not the despotic rule of Solomon (cf. 1 K. 12:6ff.) is regarded as the real reason for the schism of north and south (11:9-13). It is seen, too, in the idealized assessment of David (1 K. 9:4; 11:4, 6; 14:8; etc.), which is qualified only in 15:5 by the mention of "the matter of Uriah the Hittite" (itself sometimes regarded as a gloss). But this is a theological judgment on David rather than a simple historical one, and has to be understood in the light of David's status as the recipient of the divine promises.

A further important theme in Kings, basic to the foregoing discussion, is that of the creative word of God being fulfilled in history. This has been stressed particularly by von Rad (*Studies*, pp. 74ff.), who drew attention to the scheme of prophecy and fulfillment that runs through the book; on many occasions the fulfillment of a previous prophetic oracle is explicitly recorded. So, e.g., 1 K. 14:6ff. is fulfilled in 15:29, and 2 K. 1:6 in 1:17. (The possible different stages of redaction to which such passages belong, and the extent to which earlier material is taken up in them, need not be considered here.) God's word — both of judgment and salvation — when once uttered, must come to pass. Kings thus shares the prophetic understanding of Yahweh as active in the history of Israel and the nations. The One who sent His people into exile is also the One who in mighty power defeated Baal at Carmel and the Assyrians before Jerusalem, and who by implication has the power to deliver His people from their exile.

Prophecy itself, of course, plays a large part in Kings. Prophets function, e.g., in both the appointment and the rejection of northern kings, in the portrayal of which there is often a subtle tension of grace and judgment, since ultimately all the rulers of the northern kingdom are rejected (cf. 1 K. 16:1-7; 19:15-17; 2 K. 9:1-10; 10:30f.). Besides the material concerning such figures as Ahijah of Shiloh (1 K. 11:29-39; 12:15; 14:1-18; 15:29), Shemaiah (1 K. 12:21-24), and the anonymous prophets of 2 K. 21:10-15, the large block of stories about Elijah and Elisha is particularly striking. This material has almost certainly been subject to Deuteronomistic editing, but in many ways the stories already conveyed some of the central themes of Kings, such as the prophetic struggle against apostasy from Yahweh — though nothing is said about the bull-cult of Dan and Bethel. On the other hand, it is striking that there is so little emphasis on the activity of the canonical prophets, with the exception of Isaiah. In the present writer's opinion, the reason for this is perhaps to be found in the Deuteronomists' editing of the books of the preexilic prophets alongside their own history; both alike stand as witnesses for God's people in exile of both His righteous judgment and His purposes of restoration.

In fact, the diverse connections of Kings with the corpus of written prophecy (in addition to the Isaiah material; note its connections with the redaction of the book of Jeremiah, the mention of Jonah in 2 K. 14:25, and some smaller editorial links [cf. *JTS*, 28 (1977), 90-94]) serve to link it with a larger context within the OT canon beyond the limits of the Deuteronomistic history. The book itself stands in the Hebrew Bible among the "former prophets." On the other hand, in its final form and canonical setting in the Hebrew Bible, the book also forms part of the narrative work stretching from Genesis to Kings, the great history of God's dealings with His people from the beginning of the world to the exile of Judah, and can appropriately be viewed and expounded within that larger context also.

E. BALL

KING'S DALE. *See* KING'S VALLEY.

KING'S GARDEN [Heb. *gan-hammelek*]. A garden in the extreme south of Jerusalem somewhere near the "gate between the two walls" (2 K. 25:4; Jer. 39:4; 52:7) and

perhaps near the "king's wine presses" (Zec. 14:10). Josephus located it near En-rogel (*Ant.* ix.10.4 [225]). The garden was in the Kidron Valley, probably on a lower slope of the City of David, where it could have been watered by the overflow from the pool of Siloam (cf. Neh. 3:15), and so flourish all year round. *See also* JERUSALEM III.D.5.t; F.2.f; JERUSALEM maps in I. 1011, 1020.

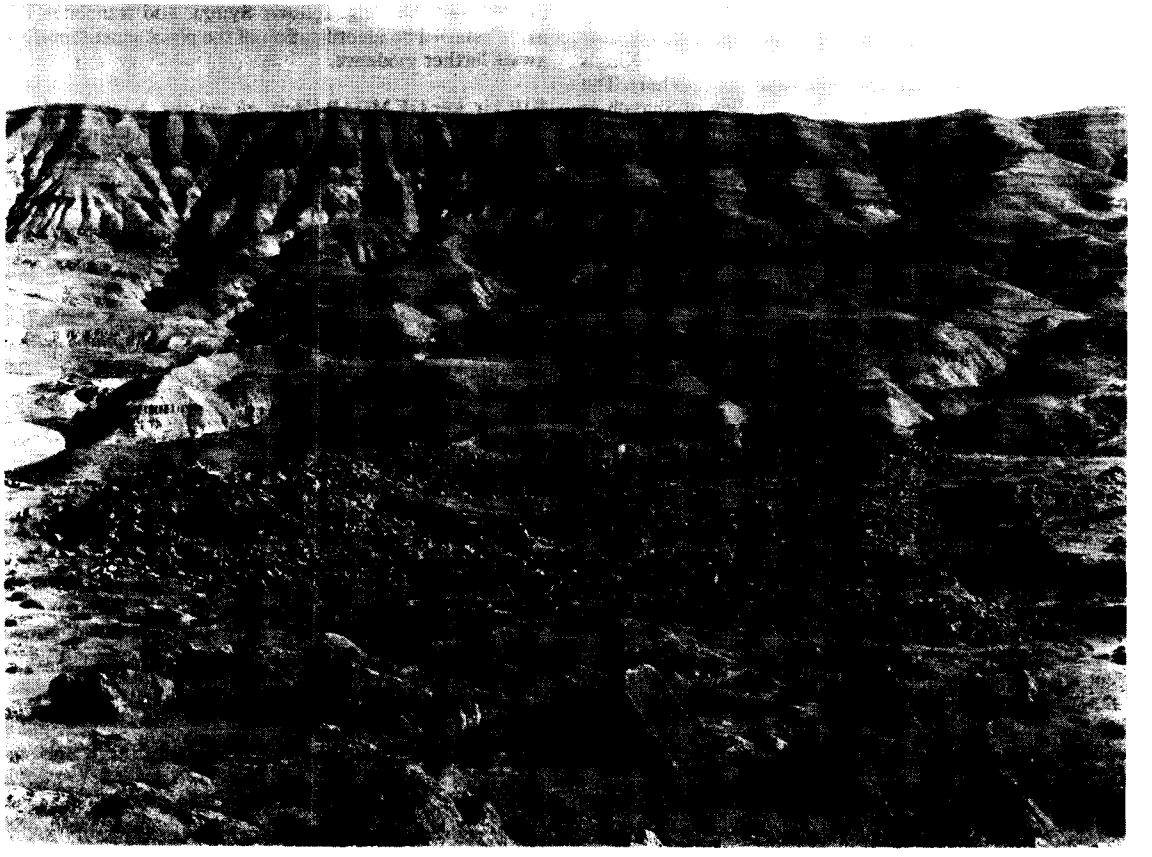
See J. H. Negenman, *New Atlas of the Bible* (Eng. tr. 1969), pp. 66, 109. P. L. GARBER R. K. H.

KING'S HIGHWAY [Heb. *derek hammelek*]. A road or routes in Edom and northern Moab, mentioned in Nu. 20:17; 21:22 (cf. Dt. 2:27).

Since the publication of N. Glueck's exploration of the Transjordan (*Other Side of the Jordan* [1940]), *derek hammelek* has been considered a reference to an ancient way roughly identical with the Roman *Via Nova* and the Turkish "Sultan's Highway." The route of this road follows the narrow strip of highland between the rocky, arid desert and the scarp of the Jordan Rift Valley and connects such prominent sites as Damascus, Gerasa, Rabbath-ammon, Heshbon, Dibon, Kir-hareseth, Bosra, and Petra.

Presumably it connected south Arabia and Elath with Damascus and Mesopotamia. Fortresses along this route from as early as E.B. IV-M.B. I and Iron I seem to confirm its identification with the King's Highway. The description in Gen. 14 of Chedorlaomer's foray seems to assume such a route.

Derek hammelek may not signify a single, named route, however. First, the term may be an appellative (e.g., "the royal road," or any road that the king designated), as early commentators assumed. Second, since Nu. 20:17 describes Moses asking permission to pass through Edomite territory from Kadesh-barnea, and 21:22 shows a quest for passage N of the Arnon, different routes may be indicated. Third, no pattern of Iron Age sites that conforms to the modern or Roman road has been discovered in recent surveys.



North-south routes through Transjordan are likely, however, especially when political stability permitted interregional trade. Control of such trade probably motivated many of the wars and alliances that involved the peoples of Transjordan, such as the Davidic campaigns and the wars of the Omrides (*see* MOAB).

KING'S MOTHER. The queen mother had a very important position at the courts of the kings of Israel. Her authority may have reflected the influence of the ancient Egyptian matriarchate. Examples are: Bathsheba (1 K. 2:19); Maacah (15:13); Athaliah (2 Ch. 22:2); and Nehushta (2 K. 24:8; Jer. 13:18). *See* QUEEN; QUEEN MOTHER.

KING'S POOL [Heb. *b'rēkat hammelek*] A name occurring only in Neh. 2:14. It is apparently another name for the Pool of Shelah (*see* SILOAM) of 3:15 and the "pool that was made" (AV) or "artificial pool" (RSV, NEB) of 3:16.

Ruins of a Roman military camp on a possible route of the King's Highway along the Arnon in northern Moab (A. D. Baly)

KING'S VALLEY [Heb. *ʿēmeq hammeleḵ*] (Gen. 14:17; 2 S. 18:18); AV KING'S DALE; NEB also KING'S VALE (2 S. 18:18); **VALLEY OF SHAVEH** shā'və [Heb. *ʿēmeq šāwēh*–'valley of a plain'(?)] (Gen. 14:17). The place where Abraham, after defeating the coalition of kings, met the king of Sodom (Gen. 14:17); later Absalom built a monument there (2 S. 18:18). Although Gen. 14:17 identifies the King's Valley with the Valley of Shaveh, many scholars have rejected that identification (see below). Geographical and exegetical problems leave the location in doubt.

The geographical problem is that no exact location is given for this valley, although sources and traditions point to possibilities N, E, and SE of Jerusalem. Gen. 14:17f. suggests a locale near Jerusalem (if Salem = Jerusalem, which is doubtful; *see* JERUSALEM I.B), and Josephus (*Ant.* vii.10.3 [243]) stated that it was two stades from Jerusalem. J. Mauchline (*1 and 2 Samuel* [*NCBC*, 1971], p. 287) noted that a "Valley of the Kings" is located about 1 km. (½ mi.) N of the Damascus Gate, but this is a post-Christian name given to the site of the tombs of the first-century Queen Helena (of Adiabene) and her sons. Similarly, in the Kidron Valley just below Gethsemane is the "tomb of Absalom," which a late tradition identifies with Absalom's monument (2 S. 18:18). It was built in late Hellenistic times (probably in the 1st cent. A.D.), however, and according to A. Dillmann (comm. on Genesis [Eng. tr. 1897], II, 48) and J. Simons (*GTTOT*, § 364) a locale in the Kidron Valley is ruled out because the Kidron is always called a *naḥal* ("brook, wadi"), not an *ʿēmeq*. The supposition that the KING'S GARDEN, which is thought to have been near the southeast corner of Jerusalem, was in the vicinity of the King's Valley has little to commend it (*contra* G. A. Barrois, *IDB*, IV, *s.v.* "Shaveh, Valley of"; cf. B. Mazar, *Mountain of the Lord* [Eng. tr. 1975], p. 156, who located the King's Valley near En-rogel, apparently also on the supposition that the King's Valley and the king's garden were near one another). The gloss in 1QapGen 22:13 identifies the Valley of Shaveh as the Valley of Beth-haccerem (Ramat Raḥel, about 3 km. [2 mi.] S of Jerusalem), but no other evidence supports this identification.

The exegetical problem concerns the phrase *ʿēmeq šāwēh*, which makes little literal sense. Since no place called Shaveh was known in Israel (the Shawe mentioned in Papyrus Anastasi I [cf. *ANET*, p. 477] was just N of Byblos), various reconstructions have been proposed. Simons (*GTTOT*, § 364) thought that the text originally read *šāwēh hammeleḵ*, "plain of the king," but that reading hardly helps to locate the place. B. Vawter (*On Genesis* [1977], pp. 196f.) connected the Valley of Shaveh with SHAVEH-KIRIATHAIM (cf. v. 5), where the battle was fought in Transjordan; this is a more likely locale. The phrase "that is, the King's Valley" is generally recognized as a gloss (note the RSV's use of parentheses).

A. Wieder's attempt (*JBL*, 74 [1965], 160-62), followed by C. Gordon (*UT*, p. 501), to relate Heb. *šāwēh* to Ugar. *ṯwy* has three problems. Wieder assumed that the gloss in Gen. 14:17 ("that is, the King's Valley") reflects the meaning of *ʿēmeq šāwēh* and that therefore the root *šwh* must approximate the meaning of *mlk*, "rule, be king." Unfortunately, no evidence supports this assumption. Second, Ugar. *ṯwy* occurs in only three contexts and thus is difficult to define; most scholars have translated it "live, abide." Third, Arab. *ṯwy*, "live," seems to be the cognate of Ugar. *ṯwy*, and Arab. *swy*, "even, level," the cognate of Heb. *šwh*.

For a well-documented summary of this problem, see W. Schatz, *Genesis 14: Eine Untersuchung* (1972), pp. 186f.

KINSFOLK; KINSMAN; KINSWOMAN. *See* KIN.

KIR kir, kēr [Heb. *qîr*–'wall'; cf. Moabite *qr*–'city' (Moabite Stone, lines 11f., 24)]. A place to which Tiglath-pileser, the Assyrian king, deported the Arameans of Damascus (2 K. 16:9f.); it is traditionally considered to have been in Mesopotamia. Am. 1:5 ("and the people of Syria shall go into exile to Kir") is taken to refer to the same or a similar event. (Some scholars have considered this stich to be an editorial gloss [cf. M. C. Astour, *IDB Supp.*, p. 524], but this cannot be supported by the structure of 1:5, which when compared with v. 8 shows that a fourth stich is required to complete the poetic arrangement.) The Kir mentioned in Isa. 22:6 may be identical with the two mentioned above. According to Am. 9:7, the Arameans ("Syrians") originated in Kir. Tiglath-pileser III recorded ". . . 5,400 captives of the city of Dîr I settled in . . . the land of Unki" (*ARAB*, I, § 772). Unki is to be identified with ʿAmuk, where the KaraSu and Orontes rivers form a broad plain. Since no "Kir" is known in Mesopotamia, some have suggested that Heb. *qîr*, "wall," is to be equated with Assyr. *dêr*, "wall," a variant form of the more common *dûru* (cf. *CAD*, III, 197), used as a place name in *di-i-ri i-li*, "wall of god." This suggestion is ingenious, but if the Dîr of Tiglath-pileser's account was located in the ʿAmuk plain, it cannot be equated with Dêr(ili), for that was in Gutium, on the road from Babylon to Elam.

The early versions give no help, for in the pertinent texts the LXX has various readings, none of them place names, and the Vulg. follows Symm. and translates Kir as "Crete." The identification of the place must therefore await further evidence.

W. S. LASOR

KIR kir, kēr **OF MOAB** [Heb. *qîr mô'āḇ*]. A city of Moab, apparently the capital, mentioned in an Isaianic oracle (15:1). In parallel stichs Isaiah, repeating the same words, uses the names Ar and Kir, possibly suggesting that these are identical. The LXX has Gk. *tó teíchos*, "the wall, fortress," for the latter, instead of treating the word as a proper noun. In Moabite, *qr* (pl. *qrn*) means "city" (Moabite Stone 11f., 24, 29). In Hebrew, except in this passage, *qîr* means "wall," the customary word for city being Heb. *ʿîr* (pl. *ʿārîm*). In Nu. 21:28 *ʿār mô'āḇ*, "Ar of Moab," is mentioned, and in passages pertaining to the Israelite journey through Moab (Nu. 21:15; Dt. 2:9, 18, 29), Heb. *ʿār*, "city," occurs.

These facts raise the question whether *ʿr* and *qr* may have been dialectal variants in Moabite, just as *ʾrṣ* and *ʾrq*, "land," were in Aramaic (cf. Jer. 10:11; Moabite exhibits other similarities to Aramaic, as would be expected since the Moabites lived near the Arameans). If so, then Ar of Moab and Kir of Moab would be identical terms, "the city of Moab," meaning the capital city. AR OF MOAB, however, is generally identified with Rabba (Rabbath Moab), about 12 km. (7.5 mi.) further north. Kir of Moab, if the capital city, is probably to be identified with Kir-hareseth (modern el-Kerak).

W. S. L. S.

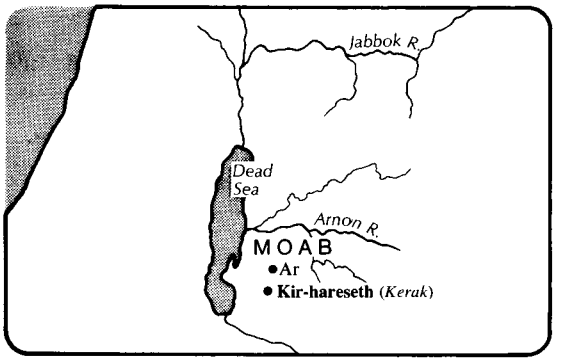
KIRAMA ki-rā'mə (1 Esd. 5:20, NEB). *See* RAMAH 1.

KIR-HARESETH kir-här'ə-seth, kir-hä-rē'seth [Heb. *qîr ḥ^{a}reśeṯ*]; AV also KIR-HARASETH (pausal form in MT, 2 K. 3:25); **KIR-HERES** kir-he'rəs [*qîr ḥereś*]; AV also KIR-HARESH (pausal form incorrectly pointed as in MT, Isa. 16:11). A Moabite city, probably the capital.

The LXX reads *toís katoikoúsin Deseth,* "to the inhabitants of Deseth," in Isa. 16:7; *hōseí teíchos hó enekaínisas,* "as a wall that you have renewed," in 16:11; and *Kiradas* (= Heb. *qîr ḥāḏāš,* "new city"?) in Jer. 48:31, 36 (LXX 31:31, 36). The problem of identifying various cities of Moab is difficult, as the LXX readings suggest. *See* AR; CITY OF MOAB; KIR OF MOAB.

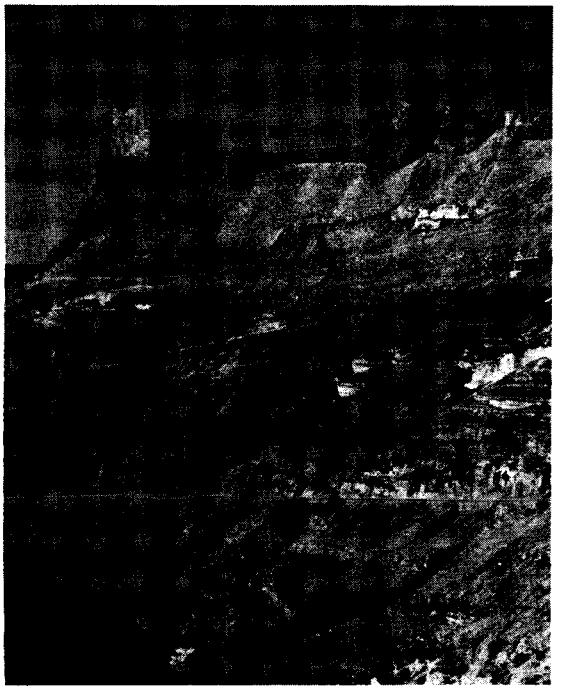
When the kings of Israel, Judah, and Edom went to war against Moab in the days of Elisha, the Israelites slaughtered the Moabites, overthrew the cities, and devastated the land "till only its stones were left in Kir-hareseth" (2 K. 3:25). In an oracle against Moab, Isaiah once put "Moab" and "Kir-hareseth" in parallel stichs (Isa. 16:7) and another time used the word "Kir-heres" in a similar parallel (v. 11). Jeremiah, in a judgment oracle against Moab, put "Moab" and "men of Kir-heres" in parallel stichs (Jer. 48:31, 36). In all these prophecies it seems that Kir-hareseth (or Kir-heres) is synonymous with Moab and therefore probably its chief city or capital. The biblical contexts do not add geographical details but only suggest that the city was inland from where the Israelite forces first engaged the Moabites (2 K. 3:25).

The LXX translations suggest that some Hebrew MSS may have had a *d* instead of an *r* in the second element of the name. (Both in the old Phoenician characters and in later Aramaic square letters the *daleth* and the *resh* were remarkably similar and sometimes confused.) For example, Gk. *Deseth* in Isa. 16:7, the words "as a wall that you have renewed" (= Heb. *ḥaddaštâ*) in v. 11, and Gk. *Kiradas* in Jer. 48:31, 36 all suggest a form with a *d*. The remaining occurrence of Kir-hareseth (2 K. 3:25) is translated by the LXX *héōs toú katalipeín toús líthous toíchou kathēréménous,* "until the torn-down stones of the wall remained," which neither supports nor disproves an *r* in the Hebrew text.



If the suggestion of an original Heb. *qîr ḥāḏāš* (which requires reading *š* for *ś,* as well as *d* for *r*) is accepted, then the name of the Moabite city was "New Town" or "Newburg" — a common enough name for cities. ("Carthage" is almost certainly Phoen. *qart ḥadašt,* "new city.") The presence of a "New Town" suggests the previous existence of an old town, which in turn may suggest how to identify the various cities of Moab whose names all can be translated "city of Moab."

At the time the tribes passed through Moab on the way to the Promised Land, the "city" of Moab seems to have been Ar. The term "Ar" was synonymous with "Moab" (Dt. 2:9; cf. vv. 8, 29); the Moabites dwelt in Ar (v. 29). The "seat of Ar" is in parallel with "the border of Moab" (Nu. 21:14f.). It seems virtually certain that the chief city of Moab at that time was Ar, even though it lay on the northern boundary. The Israelites were told when they were about to enter the land of the Ammonites N of Moab, "This day you are to pass over the boundary of Moab (at) Ar" (Dt. 2:18). Ar is described as "in the valley," perhaps meaning on the very edge of the Arnon gorge (v. 36). "Ar of Moab" is described as "the lords of the heights of the Arnon" (Nu. 21:28). "The city of Moab" (*ʿîr môʾāḇ*) also is described as "on the boundary formed by the Arnon, at the extremity of the border" (22:36). There seems to be no compelling reason to distinguish between this city and Ar.



The identification of Ar with Rabbath Moab (modern Khirbet er-Rabbah), 21.7 km. (13.5 mi.) S of the Arnon, was made at the beginning of the 4th cent. A.D. (The name Rabbath Moab is not biblical.) Rabbath Moab was also known as Areopolis, and Jerome (comm. on Isaiah, 15:1) suggested that this name preserved the biblical name Ar. It is clear, however, both from the image of Mars (= Ares) on coins and from Eusebius *Onom.* 36.26 that the name Areopolis came from the worship of Ares. A little over 3 km. (2 mi.) NW of Rabbath Moab is the site el-Miṣnaʿ, occupied from 2200 to 1800 B.C., which is sometimes, but unconvincingly in light of the previous facts, identified as the location of Ar.

During the Israelite monarchial period, however, the principal city of Moab was Kir-hareseth. Ar is mentioned only once, in a poetic prophecy by Isaiah (Isa. 15:1) where it is paralleled with Kir of Moab. It is perhaps better to regard Ar as the name of the earlier capital transferred to the new capital, "New Town" or Kir-hareseth, than to identify it with Rabbath Moab. (But *see* KIR OF MOAB.)

Kir-hareseth is generally identified with the modern city of Kerak, located 27 km. (17 mi.) S of the Arnon gorge. The Targum renders *Qîr* by *Karak* and *Qîr-Môab* by *Keraka de-Moab.* In the Byzantine era, Gk. *Charachmōba,* "Characmoba" (i.e., Kerak [of] Moab) appears as the name of the episcopal see. When the Moabite territory extended northward to the Jabbok, Ar on the Arnon was not an objectionable site for the principal city. But when the Amorites pushed the Moabite boundary southward to

Crusader fortress on a rocky plateau overlooking the valley at Kir-hareseth (Kerak) (A. D. Baly)

the Arnon, it became necessary to relocate the capital farther inland away from the border. Kerak, standing on a rocky plateau protected on all sides by valleys, was a splendid choice. The Crusaders, who always recognized a strategic location, built a fortress at Kerak, which, though today in ruins, is still magnificent.

Bibliography.–*AASOR*, 14 (1934), 14, 62, 65; 15 (1935), 5; *GP*, II, 69, 248, 418f.; *HGHL*, pp. 379ff. W. S. L. S.

KIR-HERES. *See* KIR-HARESETH.

KIRIATHAIM kir-i-ə-thā'əm [Heb. *qiryāṯayim*–'two cities']; AV also KIRJATHAIM.

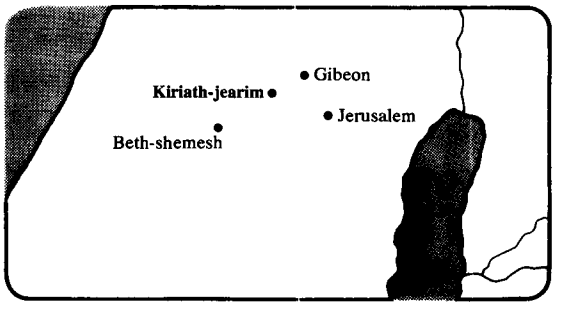
1. A city in the uplands of Moab that was assigned to the tribe of Reuben (Nu. 32:37; Josh. 13:19) and appears in the prophecies against Moab (Jer. 48:1, 23; Ezk. 25:9). The city is often identified with modern el-Qereiyât, 8 km. (5 mi.) NW of Dibon.

2. A city in the territory of Naphtali assigned to the Gershonites (1 Ch. 6:76), probably corresponding to Kartan in Josh. 21:32.

KIRIATH-ARBA kir-i-ath-är'bə. *See* HEBRON.

KIRIATHARIM kir-i-ath-är'əm (Ezr. 2:25; 1 Esd. 5:19). *See* KIRIATH-JEARIM.

KIRIATH-BAAL kir-i-ath-bā'əl. *See* KIRIATH-JEARIM.



KIRIATH-HUZOTH kir-i-ath-hōō'zoth [Heb. *qiryaṯ ḥuṣôṯ*–'city of streets'; Gk. *póleis epaúleōn*–'city of residences,' suggesting an original Heb. *qiryaṯ ḥ^{a}ṣērôṯ*–'city of courts']; AV KIRJATH-HUZOTH. The place to which Balak and Balaam went after their meeting (Nu. 22:39). The "city of Moab" (v. 36) was probably KIR OF MOAB; hence Kiriath-huzoth was not far from Kir in Moab. Tg. Jonathan identifies it with *Bîrôšâ*, possibly el-Barrishî near Rabbah, but the location does not seem to fit the description in Numbers. Abel (*GP*, II, 421) suggested el-Qeryeh, 12 km. (7.5 mi.) NE of Dibon. W. S. L. S.

KIRIATHIARIUS kir-i-ath-ē-ār'ē-əs (1 Esd. 5:19, AV). *See* KIRIATH-JEARIM.

KIRIATH-JEARIM kir-i-ath-je-är'əm [Heb. *qiryaṯ-y^{e}ʿārîm, -hayy^{e}ʿārîm*–'city of (the) forests']; AV KIRJATH (Josh. 18:28), KIRJATH-JEARIM; also **KIRIATHARIM** kir-i-əth-är'əm [Heb. *qiryaṯ ʿārîm*] (Ezr. 2:25); AV KIRJATH-ARIM; **BAALAH** bā'ə-lə [Heb. *baʿ^{a}lâ*] (Josh. 15:9; 1 Ch. 13:6); **BAALE-JUDAH** bā'ə-lə jōō'də [Heb. *baʿ^{a}lê y^{e}hûḏâ*] (2 S. 6:2); AV BAALE OF JUDAH; NEB BAALATH-JUDAH; **KIRIATH-BAAL** kir-i-ath-bā'əl [Heb. *qiryaṯ-baʿal*] (Josh. 15:60; 18:14); AV KIRJATH-BAAL; **JAAR** [Heb. *yāʿar*] (Ps. 132:6); AV "the wood" (cf. *GTTOT*, §§ 666-68, 1708); Apoc. **KIRIATHARIM** [Gk. *Kariathiarios*] (1 Esd. 5:19); AV KIRIATHIARIUS; NEB CARIATH-IARIUS. A town on the boundary between Judah and Benjamin.

The site of the ancient town is now identified as Tell el-Azhar, 14 km. (9 mi.) W of Jerusalem along the road to Jaffa. It is just NW of Abū Ghôsh. The biblical indications appear to place Kiriath-jearim E of Beth-shemesh (Tell er-Rumeileh; cf. 1 S. 6–7) and on higher terrain ("up," 6:21; 7:1). The house of Abinadab, where the ark was kept in Kiriath-jearim, was "on the hill" (7:1).

Kiriath-jearim was the southernmost of the Hivite league of four cities (with Gibeon, Chephirah, and Beeroth [Josh. 9:17]), whose representatives from Gibeon successfully deceived Joshua into making a covenant with them. After

discovering the deception, Joshua made the inhabitants of these cities servants of Israel (vv. 16-27). When a confederation of five kings attacked the Hivite league, the league appealed to the Israelites, who honored their alliance and with divine aid defeated the attackers (ch. 10). In migrating to its later northern location the tribe of Dan camped "at Kiriath-jearim in Judah" (Jgs. 18:12; the site was called MAHANEH-DAN, "the camp of Dan," described as *ʾaḥ^{a}rê* ["behind," AV; "west of," RSV, NEB] Kiriath-jearim; cf. 13:25, which places it "between Zorah and Eshtaol"). After the Philistines returned the ark of the covenant to Israel, the people of Beth-shemesh passed it on to Kiriath-jearim, where it remained "some twenty years" (1 S. 6:21–7:2). David's first attempt to transfer the ark from Kiriath-jearim to Jerusalem ended in the death of Uzzah and the housing of the ark in the home of Obed-edom (1 Ch. 13:5-14), but later David brought the ark to Jerusalem and placed it in a tent he had prepared for it (2 S. 6:12-17; 1 Ch. 15).

In the last days of the Judean kingdom, the prophet Uriah, "the son of Shemaiah of Kiriath-jearim" (Jer. 26:20), prophesied against Jerusalem and Judah with a message similar to Jeremiah's. When Uriah fled to Egypt to escape the wrath of King Jehoiakim, the king sent men to Egypt to bring him back and the prophet was put to death (vv. 20-23). The exiles who returned from Babylon included men of Kiriath-jearim, Chephirah, and Beeroth (Neh. 7:29; Ezr. 2:25; 1 Esd. 5:19). In the genealogy of Judah, Kiriath-jearim also appears as a descendant of Caleb and Ephrathah (1 Ch. 2:50, 53; cf. Ps. 132:6).

Bibliography.–F. D. Cooke, *AASOR*, 5 (1923/24), 105-120; *LBHG*, pp. 224-27, 287, 301. C. E. DEVRIES

KIRIATH-SANNAH kir-i-ath-san'ə [Heb. *qiryaṯ sannâ*]. A city in southern Judah, probably to be identified with KIRIATH-SEPHER, since (1) it is identified as Debir (Josh. 15:49), and (2) the LXX translates Kiriath-sannah, just as it does Kiriath-sepher, as *pólis grammátōn*. *See* DEBIR **1.** W. S. L. S.

KIRIATH-SEPHER kir-i-ath-sē'fər [Heb. *qiryaṯ sēper*–'city of book(s)'; cf. LXX *pólis grammátōn*, but more reasonably "city of the scribe(s)"]. A city in southern Judah (Josh. 15:15f.; Jgs. 1:11f.). Caleb occupied the city by the agency of Othniel (Josh. 15:17), and since Caleb's daughter (who had been given to Othniel as a reward for his valor) referred to the place as "in the Negeb" (v. 19), it is perhaps to be identified with "the Negeb of Caleb" (1 S. 30:14). Kiriath-sepher, however, was not in the Negeb proper, but rather was a "Negeb" (i.e., a comparatively dry location) in the hill country SW of Hebron (Josh. 15:49, emending Kiriath-sannah to Kiriath-sepher, since it is called Debir). For the location of Kiriath-sepher, *see* DEBIR **1.** Caleb was a Kenizzite (Nu. 32:12; Josh. 14:6), a member of a subtribe of the Edomites who occupied the

area that later became southern Judah. It is therefore held by a number of modern scholars that the Kenizzites, who were later absorbed by the Israelite tribe of Judah, were an earlier invasion stage of the "conquest." The story of Caleb, who along with Joshua was one of the twelve spies (Josh. 14:7), is too thoroughly ingrained in the biblical account of the movement toward, and invasion of, the land of Canaan to be dismissed lightly.

See *GTTOT*, § 514. W. S. L. S.

KIRIOTH (Am. 2:2, AV). *See* KERIOTH.

KIRJATH, KIRJATH-. AV form for Kiriath-.

KISAEUS (Ad. Est. 11:2, NEB). *See* KISH **5.**

KISH kish [Heb. *qîš*; Gk. *Kis* (Acts 13:21), *Kisaios* (Ad. Est. 11:2)].

1. The son of Abiel and the father of Saul the first king of Israel. He was of the tribe of Benjamin, of the family of the Matrites (1 S. 9:1; 14:51; 1 S. 10:21; cf. Acts 13:21, AV CIS). 1 Ch. 8:33; 9:39 suggest that Abiel was actually his grandfather and Ner his father, since the term "son" is the equivalent of "descendant" and does not necessarily imply the next generation. Ner had another son named Abner (1 S. 14:51; 1 Ch. 26:28), so Kish would have been Abner's brother. 1 Ch. 12:1 also mentions Kish as the father of Saul. The sepulchre of Kish was located in Zela in the country of Benjamin (2 S. 21:14). He seems to have resided at Gibeah.

2. The son of Jeiel and his wife Maacah (1 Ch. 8:30, 33; 9:36, 39). His relationship to Saul's father has not yet been determined.

3. A Levite, the son of Mahli the Merarite (1 Ch. 23:21f.; cf. 24:29).

4. Another Merarite Levite in the time of Hezekiah (2 Ch. 29:12).

5. The great-grandfather of Mordecai, of the tribe of Benjamin (Est. 2:5; Ad. Est. 11:2, AV CISAI, NEB KISAEUS).

KISHI kish'ī, kē'shē [Heb. *qîšî*–'trapper'(?), 'gift'(?)]. Father of Ethan, one of the singers that David "put in charge of the service of song" in the house of the Lord (1 Ch. 6:31); the Kushaiah of 1 Ch. 15:17.

KISHION kish'i-on, kish'yən [Heb. *qišyôn*]; AV, NEB, also KISHON (Josh. 21:28). A town in the territory of Issachar (Josh. 19:20) given to the Gershonites (21:28) and undoubtedly identical with KEDESH **2.** The site is unknown but has been often identified with Tell el-Muqarqash (Albright) or with Tell el-'Ajjûl (Simons) in the vicinity of Endor.

Bibliography.–W. F. Albright, *ZAW*, 3 (1926), 231; *GP*, II, 422f.; *LBHG*, pp. 160, 280 n. 111, 303, 438; J. Simons, *GTTOT*, § 330.

W. W. BUEHLER

KISHON kī'shon, kish'on [Heb. *qîšôn*–possibly 'bending' or 'winding']; AV also KISON (Ps. 83:9 [MT 10]). The river along whose banks Israel, led by Deborah and Barak, fought the army of Sisera (Jgs. 4:7, 13; 5:21). In the AV it is also called a "brook" (1 K. 18:40; Ps. 83:9); the RSV calls it a "torrent" in Jgs. 5:21, a "brook" in 1 Kings; except in Josh. 19:11 ("gorge") the NEB always refers to it as a "torrent." The Song of Deborah calls the Kishon "the waters of Megiddo" (Jgs. 5:19). Later the river appears as the scene of Elijah's slaughter of the prophets of Baal (1 K. 18:40). It is first mentioned in connection with the boundary of Zebulun, as "the brook which is east of Jokneam" (Josh. 19:11).

The river, modern Nahr el-Muqaṭṭa', rises in the hills of northern Samaria near Megiddo, drains all of the plain of Esdraelon, and then flows NW to the Mediterranean Sea through the plain of Acre, emptying at the foot of Mt. Carmel. In the summer the water from the springs is largely used in irrigation, and the upper portion of the river, which is in the plain, becomes dry. The bed runs along the bottom of a trench 6 m. (20 ft.) deep, which quickly fills in times of heavy rain, making the soft soil of the plain on either side marshy and miry. Apparently mire caused by a heavy storm hampered the movement of Sisera's cavalry and chariots and led to his downfall (Jgs. 5:20f.).

KISS [*nāšaq*] (Gen. 27:26f.; 29:11, 13; 31:28; etc.); NEB also "join hands," SMOTHER, etc.; [*n^{e}šîqâ*] (Prov. 27:6; Cant. 1:2); [*ḥēḳ*–'palate'] (Cant. 7:9); AV "roof of . . . mouth"; NEB WHISPERS; [Gk. *philéō*] (Mt. 26:48; Mk. 14:44); [*phílēma*] (Lk. 7:45; Rom. 16:16; 1 Cor. 16:20; 2 Cor. 13:12; 1 Thess. 5:26; 1 Pet. 5:14); [*kataphiléō*] (Mt. 26:49; Mk. 14:45; Lk. 7:38, 45; 15:20; 22:47f.; Acts 20:37). To touch with the lips, a gesture of affection or homage usually devoid of erotic content in the Bible.

The OT mentions the kiss most often in the context of the family. The son kissed his father in the story of Jacob's deceiving Isaac to obtain his blessing (Gen. 27:26f.; cf. 50:1). In this instance it may be that "Isaac's desire to kiss concealed the secret intention to smell in order to be quite sure [that his uncertainty was unfounded]" (G. von Rad, *Genesis* [Eng. tr., *OTL*, 1961], p. 272). A man (Jacob) kissed his cousin (Rachel) and his uncle (Laban) in 29:11, 13. An older man kissed his children and grandchildren in 31:28, 55 [MT 32:1]; 48:10. At the dramatic reconciliation of Jacob and Esau (33:4) the two brothers wept and embraced, with Esau kissing Jacob as a sign of forgiveness, a point missed by a late Jewish midrash that replaced the words "he kissed him" with "he bit him" (von Rad, p. 322). Other examples of brothers kissing each other occur when Joseph made himself known to his brothers in Egypt (Gen. 45:15) and when Moses and Aaron met in the wilderness (Ex. 4:27). In Ex. 18:7 a man kissed his father-in-law. Naomi kisses her daughters-in-law Ruth and Orpah in Ruth 1:9 (cf. v. 14; these are the only biblical examples of women kissing each other). David kissed his son Absalom as a token of full reconciliation after Absalom's murder of his brother Amnon (2 S. 14:33). Elisha's kissing of his parents was essential to a proper leave-taking (1 K. 19:20).

Examples of kisses exchanged by nonrelations include those exchanged by the weeping David and Jonathan when Jonathan told David to leave his hiding place and flee from Saul (1 S. 20:41). David kissed King Barzillai when the latter returned to Gilead (2 S. 19:39 [MT 40]). The crafty politician Absalom kissed those who "came near to do obeisance to him" and thus "stole the hearts of the men of Israel" (15:5f.). Kissing to feign affection is most vividly seen when, during Sheba's rebellion, Joab seized Amasa's beard in his right hand as if to kiss him but used the opportunity for murder by striking him with the sword drawn by his left hand (20:9f.). Joab's stratagem has been called the "Old Testament kiss of Judas" (H. W. Hertzberg, *Samuel* [Eng. tr., *OTL*, 1965], p. 372; cf. Prov. 27:6).

Limestone relief of Nefertiti and Akhenaten, who is kissing one of their daughters (Tell el-Amarna; 14th cent. B.C.) (Ägyptisches Museum, Staatliche Museen zu Berlin, DDR)

The kiss was used ceremonially in pagan worship, as when worshipers kissed the idol of their affections (Hos. 13:2), e.g., Baal (1 K. 19:18). The reference in Job 31:27 is to throwing kisses to the moon, a practice mentioned only here in the OT but known from other sources. When Samuel ceremonially anointed Saul (1 S. 10:1) he kissed the new king, probably as a sign of his personal affection rather than of loyalty. It is possible, however, that this was related to the act of kissing the feet of a king, signifying self-humiliation and homage, well known from Babylonian and Egyptian documents (A. Weiser, *The Psalms* [Eng. tr., *OTL*, 1962], p. 115; A. A. Anderson, *Psalms (1-72)* [*NCBC*, 1972], pp. 69f.; cf. Isa. 49:23; Mic. 7:17 [lit. "lick the dust"]; esp. Ps. 2:12). In Ps. 85:10 [MT 11] the phrase "righteousness and peace will kiss each other" personifies these spiritual powers in a profound vision of God bowing down from heaven to meet earth and earth reaching up to Him, foretelling the glory of salvation for the people.

The ceremonial or conventional nature of the kiss is further seen in its associations with a greeting, particularly after a long absence (e.g., Gen. 33:4; 45:15; Ex. 4:27), when departure is near (e.g., Gen. 31:28, 55 [MT 32:1]; Ruth 1:9, 14), or when death is at hand (e.g., Gen. 27:26f.; 2 S. 19:39). Yet the kisses were more than conventional; they were enacted with great emotion, as is seen by the frequent accompaniment of embracing, bowing, and weeping. The expressly erotic aspects of the kiss are mentioned in the OT only in the seductive kiss of the immoral woman in Prov. 7:13 and in the romantic kisses of the lovers in Cant. 1:2; 7:9; 8:1. Prov. 24:26 says, "He who gives a right answer kisses the lips," meaning "a straightforward answer is as good as a kiss of friendship" (NEB).

The kiss in the NT is very similar to that in the OT. The father in the parable of the Prodigal Son embraced his son and kissed him when he returned home (Lk. 15:20). The sinful woman wept and kissed Christ's feet out of reverence and gratitude (7:38). In Jewish practice a host was required to place his hand on any guest's shoulder and give him the kiss of peace, a gesture neglected when Jesus dined with Simon the Pharisee (7:45; Daniel-Rops, p. 303). In bidding Paul farewell, the Ephesian elders, out of sorrow and affection, wept while embracing and kissing him (Acts 20:37). The most terrible example of the "kisses of an enemy" (Prov. 27:6) is the "kiss of Judas" (Mt. 26:48f. par. Mk. 14:44f.; Lk. 22:47f.), the customary salutatory kiss of a rabbi by his pupil (SB, I, 996), which became the sign enabling the Roman soldiers to recognize and seize Jesus.

The remaining NT references are in the closing Pauline injunctions to "greet one another with a holy kiss" (*phílēma hágion*; Rom. 16:16; 1 Cor. 16:20; 2 Cor. 13:12; 1 Thess. 5:26) and in the "kiss of love" (*phílēma agápēs*, 1 Pet. 5:14). By this kiss the early Christians expressed the intimate fellowship of the reconciled community (Bauer, rev., p. 859). It developed as a liturgical form in the Church and as the "kiss of peace" is maintained in the liturgy of the Eastern Church. The church order known as the *Testimony of the Lord* calls it "The Peace" (i.23, 30; ii.4, 9). The earliest reference to the kiss as a regular feature of Christian worship is in Justin's *Apol.* i.65, where he reported that in eucharistic worship, "when we have ceased from our prayers, we greet one another with a kiss." Tertullian (*De orat.* 14) spoke of the "holy kiss which is a sign of speech" and asked whether any prayer could be complete "separate from the holy kisses." According to E. G. Selwyn, "by the middle of the second century it was in regular use in the liturgy at the conclusion of the prayers and immediately before the offertory" (*First Epistle of Peter* [1946], p. 244). The "holy kiss" seems also to have been used at baptisms, ordinations of bishops, and marriages (J. B. Lightfoot, *Notes on the Epistles of St. Paul* [1895], p. 91). It became abused, however, and Clement of Alexandria wrote, "Love is judged not in a kiss but in good will. Some do nothing but fill the Churches with noise of kissing" (*Paed.* iii.11). Thus the practice was regulated (*Apost. Const.* ii.57.12) and gradually died out in the West after the 13th century.

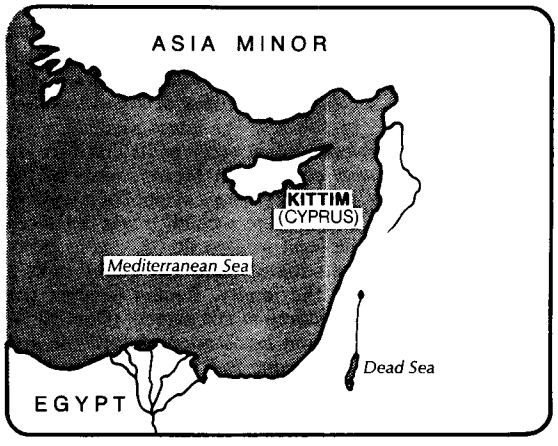
D. K. MCKIM

KITCHENS [Heb. *bêṯ hamᵉḇaššᵉlîm*] (Ezk. 46:24); AV "places of them that boil." Ezekiel's vision of the temple included four small courts at the corners of the larger courtyard. Here sacrifices that the common people were permitted to eat were boiled on the hearths. The Bible does not mention separate rooms in private houses for preparing food, which, in any case, would have been found only in the houses of the rich. G. WYPER

KITE [Heb. *'ayyâ*; Gk. *iktínos*; Lat. *Milvus ictinus* or *regalis*] (Lev. 11:4; Dt. 14:13). A medium-sized member of the hawk family. This bird is 69 cm. (27 in.) long, is bright reddish-brown, and has sharply pointed wings and a deeply forked tail. It is supposed to have exceptionally piercing eyes. It eats moles, mice, young game birds, snakes, and frogs as well as carrion. Its head and facial expression are unusually like the eagle. It was common in Palestine in winter but less visible in summer, since it bred in the hills of Galilee and rough mountainous places. It is listed among the birds of abominations. The Palestinian kites included members of the genera *Milvus* and *Elanus*.



G. STRATTON-PORTER

KITHLISH (Josh. 15:40, AV, NEB). *See* CHITLISH.

KITRON kit'rən, kit'ron [Heb. *qiṭrôn*–'enclosed'(?); Gk. *Kedrōn*, A *Chebrōn*]. A Canaanite enclave in Zebulun named in Jgs. 1:30. Josh. 19:15, an apparently parallel

passage, gives the name KATTATH, thus suggesting that these are identical locations. Abel (*GP*, II, 423), following Alt, identified it with Tell el-Fâr on the eastern edge of the plain of Zebulun, about 4 km. (2½ mi.) NE of Kefr Ḥasidim. Another suggested location is Khirbet Qṭeina, 8 km. (5 mi.) SW of Jokneam (*GP*, II, 63). Simons (*GTTOT*, § 329, p. 182) thought that this location argues against the identification. If the identification of Kitron with Kattath is accepted, it may be significant that Rabbi Yosi ben Ḥaninah equated Kitron with Qeṭonith (T.P. *Megillah* I.1), still standing in his day but now unknown. W. S. L. S.

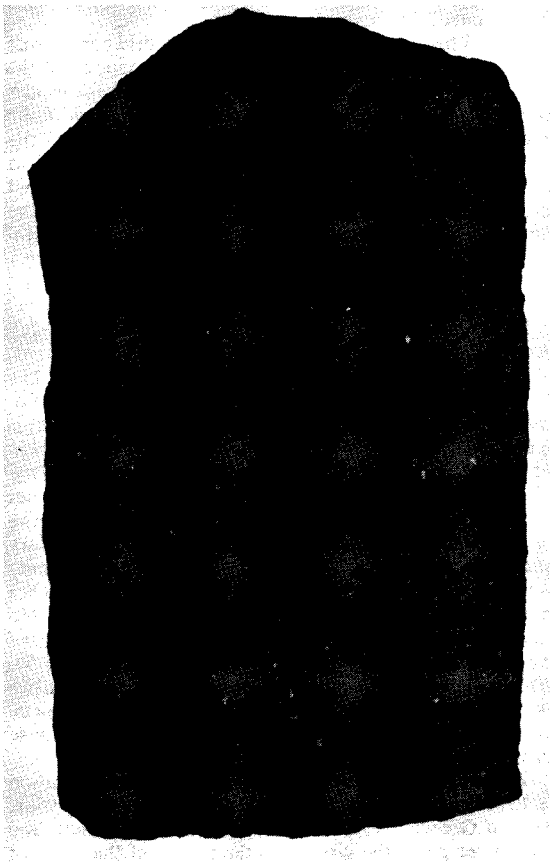
KITTIM kit'əm, ki-tēm' [Heb. *kittîm, kittîyîm* (Gen. 10:4; Nu. 24:24; 1 Ch. 1:7; Isa. 23:12; Jer. 2:10; Ezk. 27:6; Dnl. 11:30), DSS *kitti'im*–probably refers to nationals (Kittites or Kittians) of a place Kit or Kitti]; RSV also CYPRUS (Isa. 23:1, 12; Jer. 2:10; Ezk. 27:6); AV also CHITTIM; NEB also "the west" (Dnl. 11:30). A city on Cyprus, called by the Phoenicians KTY (= *Kitti*). Its Greek name was *Kition*, the name by which the Hebrews designated the island as a whole and then the Mediterranean peoples generally or even certain nations specifically, such as Macedonia and Rome. According to Josephus (*Ant.* i.6.1 [128]), "the name Chethim [was] given by the Hebrews to all islands and to most maritime countries" (cf. "the isles of Kittim" [Jer. 2:10]).

In Gen. 10:4 Kittim is one of the four sons of Javan (= Ionia, or Greece), the others being Elishah, Tarshish, and Rodanim (cf. 1 Ch. 1:7); Elishah may be another city-state of Cyprus. Ezk. 27:6f. also differentiates Kittim from Elishah. Josephus seems to be wrong in identifying Elishah with the Aeolians and Kittim with the whole of Cyprus. The biblical derivation of these islands from Javan is historically correct, as shown by the vast migrations from the north in the second half of the 2nd millennium B.C. In these the aborigines of Greece and Ionia were displaced southward into the islands of the Mediterranean, where they in turn both displaced and mingled with the natives. See *ANET*, pp. 262f.

The oracles of Balaam conclude with the prophecy (Nu. 24:23f.):

"Sea-peoples shall gather from the north;
and ships, from the district of Kittim.
I look, and they afflict Eber;
but they too shall perish forever!"

(This reading follows [in part] W. F. Albright, who has shown that a more exact form of the original text can be obtained through a knowledge of ancient orthography; cf. JB). The final phase of the migrations of sea-peoples mentioned in v. 23 was the coming of the Philistines to Palestine in the 12th cent. B.C. The eponym Eber is here employed as a poetic term for the Hebrews (so the versions) in their homeland. Dramatically, Balaam did at last please Balak by predicting Philistine oppression of the Hebrews, but his last statement gives them their freedom again through the destruction of the Philistines.



Later misreading of v. 24b produced the traditional text:

And they shall afflict Asshur
and they shall afflict Eber;
but they too shall come to destruction.

Cyprus never did subdue Asshur (= Assyria); instead, the Assyrian king Sargon II placed his stele at Kition in 712 B.C. His successors Sennacherib and Esarhaddon strengthened Assyrian rule there, the latter claiming tribute from all the isles from Cyprus to Tarshish (*ANET*, p. 290). References to Kittim in Isa. 23:1, 12 (RSV Cyprus) probably relate to the Assyrian period (despite v. 13). Verse 12 refers to Luli king of Sidon, who sought refuge in Cyprus from Sennacherib but there met his doom (*ANET*, p. 288). Kittim as mercenary soldiers of Judah appear on the ostraca of Arad (*see* ARAD III).

Lacking any literal fulfillment, the Kittian oppression of Assyria and Eber became a mysterious prophecy of the future. Some Jews may have seen in the conquest by

Hebrew ostracon from Arad (*ca.* 600 B.C.) in which Eliashib is ordered to give wine and flour to the Kittim, who were apparently mercenaries in the Judean army (Israel Museum, Jerusalem)

Alexander the Great a fulfillment of this prophecy, with Kittim denoting Macedonia (as in 1 Macc. 1:8; 8:5) and Asshur denoting the Persian empire. An even more intricate interpretation is implied by Dnl. 11:30: "For ships of Kittim shall come against him, and he shall be afraid and withdraw, and be enraged and take action against the holy covenant." The setting of this verse is Antiochus Epiphanes' invasion of Egypt in 168 B.C. Rome intervened by sending its commissioner Gaius Popilius Laenas, who (backed by the Roman navy) successfully demanded the withdrawal of the Syrians.

Cowed but resentful, Antiochus vented his rage on the Jews in a fearsome persecution. According to H. L. Ginsberg (*Studies in Daniel* [1948], p. 72), Daniel interpreted Nu. 24:24b to mean: "The Kittim (= Romans) shall afflict Asshur (= Syria); and they (the Syrians) shall afflict Eber (= Hebrews)."

In the Qumrân Scrolls, the Kittim are the great eschatological foe, the last great earthly empire to precede the messianic kingdom. Since these people have already arrived on the scene of history, the messianic age is not far off. Some scholars have identified these Kittim with Seleucid Syria. This identification fits well the book of Jubilees, a work found among the Qumrân fragments but probably of pre-Qumrânian composition. Jub. 24:28f. predicts punishment of the Philistines by both Kittim and Jews, with probable allusion to ravages of the Palestinian coastal towns by both Seleucids and Maccabees. The mention of Kittim in 37:10 may allude to Seleucid oppression of the Jews. Though some students of the DSS have seen allusions to the Seleucids and Ptolemies in the phrases "Kittim of Assyria" and "Kittim in Egypt" in the War Scroll (1 QM 1:2, 4), these are probably only geographic, not national, distinctions.

The Kittim are generally portrayed as world conquerors and oppressors but not specifically as persecutors of the sect of the Scrolls. According to 1QpHab 9:5ff. the wealth of the "last priests of Jerusalem" (the persecutors of the sect) will in the last days be given up to the army of the Kittim. 4QpIsa[a] 3:7f., however, explains Isa. 10:34 to mean: "They are the Kittim wh[o] will f[all] by the hand of Israel, when the oppressed of [Judah subdue] all the nations." Probably this refers to the expected eschatological war, in which the Sons of Light will defeat the Kittim and all other nations. This "war of the Kittim" (3:11) is elaborately described in 1QM (the War Scroll).

Most descriptions of the Kittim in 1QpHab are general, applying equally well to the Seleucids and the Romans, although giving the impression of a world empire like Rome. Other depictions are clearly more apt for the Romans. "From afar they will fly as an eagle" (Hab. 1:8) is amplified: "From afar they will come, from remote shores of the sea, to devour all the peoples as an eagle" (1QpHab 13:10f.). The Hebrew lacks a word for "remote," but the idea is implicit in the appositional relationship. The reference to the eagle may allude to the worship of military standards and insignia (including the eagle emblem) mentioned in 6:4f. and well attested for the Roman legions but not for the Seleucids. Paleographic study places this MS more than a century earlier than the incident mentioned by Josephus (*BJ* vi.6.1 [316]). The Kittim have *mōš[e]lîm* (rulers, governors, and commanders), but not *m[e]lāḵîm* (kings); but see below. The annual succession of provincial governors, appointed by the Roman senate ("their house of guilt"), is probably referred to in 4:10-13.

The most conclusive proof for the Roman identification is 4QpNah, which after noting the failure of "[Deme]trius, king of Greece . . . to enter Jerusalem" states that God had never given the city "into the power of the kings of Greece from the time of Antiochus until the rulers of the Kittim arose." The clear chronological distinction placing the rise of the "rulers of the Kittim" after the time of the "kings of Greece" (Syria) points conclusively to the Romans as the Kittim. Yet after 44 B.C., when Caesar became a virtual king, one could speak of "the king of the Kittim" (1QM 15:2).

The identification of the Kittim with the Romans in late Jewish thought is well supported by the versions: Nu. 24:24 (Onk., Vulg.); Ezk. 27:6 (Tg. Jonathan, Vulg.); Dnl. 11:30 (LXX, Tg. Jonathan, Vulg.).

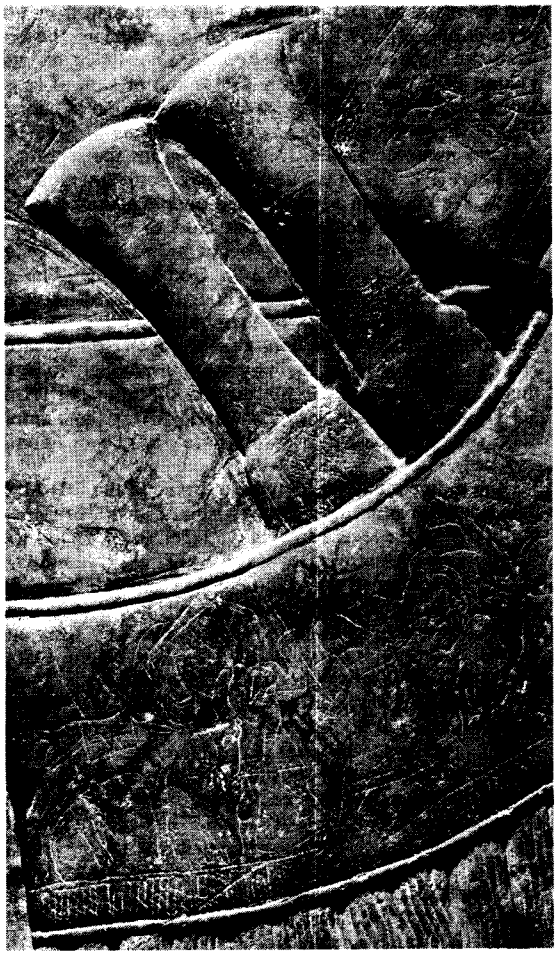
KNEADING. *See* BREAD IV.

KNEE [Heb. *bereḵ*; Aram. *'arḵubbâ*; Gk. *gónу*]; **KNEEL** [Heb. *bāraḵ*; Aram. *b[e]raḵ*; Gk *gonypetéō*]. The knee is the most complex joint of the human body, and in the ancient world it was considered the place of affection and devotion (Jgs. 16:19; cf. 2 K. 4:20; Isa. 66:12). Egyptian sculptures commonly represent this idea by showing the king as an infant seated on the knees of a goddess (*see* picture in NURSE). In Job 3:12 the knees symbolize the place where the newborn infant receives its first care. In another figurative use common in Mesopotamia of the Middle Bronze Age, the knees were a symbol of adoption. When a concubine gave birth to a child, it was delivered "on the knees" of the legal wife so that it was in effect recognized as her own adopted child and therefore as a legitimate member of the family. Rachel became the "mother" of Bilhah's children in this manner (Gen. 30:3), and in an analogous fashion Jacob adopted Ephraim and Manasseh so that they became two separate eponymous ancestors of Israelite tribes. A form of paternal adoption is described in Gen. 50:23, where Joseph received Machir's children in the traditional manner as they were born.

Weakness of the knees resulted from fear (cf. Job 4:4; Isa. 35:3f.; Ezk. 7:17f.; Nah. 2:10; etc.) but also from fasting (Ps. 109:24) or physical disease (Dt. 28:35; *see* BOIL; DISEASE III.I).



The close relationship between the word for "knee" and that for "bless," "praise" (Heb. *bāraḵ*) suggests kneeling as the original posture for these functions. People presenting petitions frequently knelt (cf. Dnl. 6:10 [MT 11]; Acts 9:40; etc.) to acknowledge the superior status of the one being petitioned (cf. 2 K. 1:13; Mt. 17:14; Mk. 1:40; etc.). The Hebrews more often prayed standing than kneeling, a posture in which the individual is most defenseless, but kneeling was nevertheless a recognized part of worship, whether of true (cf. 1 K. 8:54; 2 Ch. 6:13; Ps. 95:6; Isa. 45:23) or false (1 K. 19:18) gods. In the NT kneeling was more commonly associated with prayer (Lk. 5:8; Rom. 11:4; 14:11; Eph. 3:14; Phil. 2:10), though again was not the normative procedure. (In Acts 7:60 Stephen is dying as he kneels and prays.) *See* PRAYER; pictures in GESTURE; JEHU. R. K. HARRISON

KNIFE [Heb. *ma'[a]ḵeleṯ*–lit. an instrument for eating, but the term is used of large knives for slaying animals, cutting

Gold dagger and sheath from a grave at Ur (25th cent. B.C.) (The State Antiquities Organization, Republic of Iraq)

Detail of an alabaster relief from the palace of Ashurnasirpal II (883-859 B.C.) at Nimrûd showing hilts of two daggers over an ornamental border of the king's garment (Staatliche Museen zu Berlin, DDR)

up a carcass or a sacrificial victim (Gen. 22:6, 10; Jgs. 19:29; Prov. 30:14); *ḥereḇ*–'sword,' but in Josh. 5:2f. it is used of stone knives for circumcision (cf. Ex. 4:25) and of probably similar knives in 1 K. 18:28 that were used by Baal prophets to gash themselves; *taʿar*–'razor,' in combination with *hassōpēr*–'knife of the writer' or 'penknife' (Jer. 36:23; *see* PEN); *śakkîn* (Prov. 23:2), cf. Aram. *sakkînāʾ*–'knife']. The earliest knives were made of flint, and such artifacts have been recovered in quantity from Near Eastern sites. Flint was superior to metal, which could not maintain a sharp cutting edge; as a result flint knives continued to be used alongside bronze and iron knives for many centuries, for both religious and secular purposes (*see* picture in FLINT). The most common length for knives was 15 to 25 cm. (6 to 10 in.), and the blade was generally straight with a central ridge. A limestone mold found at Tell Beit Mirsim was designed for an iron knife 40 cm. (16 in.) long. Small knives were worked or cast in one piece, but larger ones, especially those of copper, bronze, or iron, had wooden handles attached, sometimes not very securely. Knives were not generally used at meals; meats were cut into bits before being served and bread was broken into fragments. Herod attempted suicide with a knife that he was using for paring apples (Josephus *Ant.* xvii.7.1 [183]; *BJ* i.33.7 [662]).

E. B. POLLARD

KNIT [Heb. niphal of *qāšar*–'bind' (1 S. 18:1), *(lēḇāḇ) leʿyaḥaḏ*–'(a heart) for union' (1 Ch. 12:17 [MT 18]), *sāḵaḵ*–'interweave' (Job 10:11 [polel]; Ps. 139:13), pual of *śārag*–'intertwine' (Job 40:17); Gk. *symbibázō*–'bring together' (Eph. 4:16; Col. 2:2, 19)]; AV also "fenced," "covered," "wrapped," "compacted"; NEB also "give," "join," "unity."

The Heb. *qāšar* is used figuratively of the soul. Also figurative is the RSV's paraphrase of the Hebrew in 1 Ch. 12:17 (lit. "I have toward you a heart for union"). Both *sāḵaḵ* and *śārag* are Hebrew terms for the close connections of parts of the body, the former being used only for prenatal development. The Gk. *symbibázō* is used in both literal (Eph. 4:16; Col. 2:19) and figurative (Col. 2:2) senses. See also *TDNT*, VII, *s.v.* συμβιβάζω (Delling).

G. A. L.

KNOCK [Heb. hiphil of *nāpal*] (Ex. 21:27); [*dāpaq*] (Cant. 5:2); [Aram. *nᵉqaš*] (Dnl. 5:6); AV also SMITE; [Gk. *kroúō*] (Mt. 7:7f.; Lk. 11:9f.; 12:36; 13:25; Acts 12:13, 16; Rev. 3:20).

In Ex. 21:27 the hiphil of *nāpal* means "cause [a tooth] to fall," i.e., "knock [it] out." The essential meaning of *dāpaq* in the OT is "beat vigorously" (cf. Gen. 33:13 [of driving cattle]; Jgs. 19:22 [of men beating themselves against a door]), but in Cant. 5:2 it simply means "knock [on the door]." The basic meaning of Gk. *kroúō* is "strike"; in the NT it always refers to knocking on a door. "Knock" in Lk. 11:9f. occurs in an instruction about prayer and clearly means "be persistent in prayer" (cf. the similar phraseology in T.B. *Megillah* 12b: "Mordecai knocked at the doors of mercy, and they were opened to him"; also *Pesikta* 176a: "If a man knocks, it will be opened to him" [concerning study of the Mishnah]). The same verb occurs in the parallel Mt. 7:7f., but there the context is different and it is hard to find any connection between vv. 7-11 and what precedes or follows. It seems clear, however, that the meaning is again "be persistent in prayer" (cf. v. 11), and D. Hill is probably correct in supposing that the situation presupposed is that described in Lk. 11:5-8 (*Gospel of Matthew* [*NCBC*, 1972], p. 148). It is possible that the divergent placement of these sayings by Matthew and Luke is a result of their having different recensions of Q material before them (I. H. Marshall, *Comm. on Luke* [*New International Greek Testament Comm* , 1978], p. 463). In Lk. 12:36; 13:25 the metaphor is merely a detail of the parables and does not correspond to any specific theological meaning. In Rev. 3:20 Christ's knocking connotes His desire for a closer fellowship with the Laodicean church, based on their repentance (v. 19).

(Some commentators interpret Cant. 5:2 with reference to this verse.)

KNOW, KNOWLEDGE.

I. Terminology
II. OT
III. NT
IV. Revelation and Truth

I. Terminology.–The Hebrew terms for "know" are mainly *yāḏaʿ* and *nāḵar*, though the latter often has the force of "recognize" (Ruth 3:14). "Knowledge" in the OT is usually expressed by several cognate forms of the verb *yāḏaʿ*. Such terms as *daʿaṯ* can allude to general knowledge (Prov. 24:4), to particular knowledge about an event or a characteristic (Job 10:7), in a negative sense to describe an accidental, nonpurposive activity such as involuntary manslaughter (Dt. 4:42; 19:4; Josh. 20:3, 5) or technical ability (Ex. 31:3; 35:31; 1 K. 7:14, where in each case the technical expertise was linked with wisdom [Heb. *ḥoḵmâ*], one early sense of which was "ability to perform skilled tasks").

In the sense of cognition *daʿaṯ* was applied in Balaam's fourth oracle to knowing God (Nu. 24:16), and in the Garden of Eden narrative to the knowledge of the entire range of morality (Gen. 2:17; *see also* TREE OF KNOWLEDGE). The spirit of knowledge (*rûḥ*[*a*]*ḥ daʿaṯ*), which was to be one endowment of the messianic descendant of Jesse (Isa. 11:2), was closely allied with wisdom and understanding, a sense which *daʿaṯ* has elsewhere (cf. Job 42:3; Ps. 119:66).

The verb *yāḏaʿ* described a process of learning by instruction (cf. Lev. 5:1) or by observation (cf. Jgs. 13:21), the recognition of an acquaintance (Gen. 29:5), the character of instinctual knowledge (Job 28:7), and the experience of a specific situation such as bereavement (Isa. 47:8) or grief in general (Isa. 53:3). In a negative sense *yāḏaʿ* was employed in Pharaoh's refusal to recognize the attainments of Joseph (Ex. 1:8). A common and important usage of "know," "knowledge" was in a sexual context to describe coition (Gen. 4:1; 1 K. 1:4), sometimes of an immoral nature (Gen. 19:5). A wide variety of skills and professional abilities was expressed by the verb *yāḏaʿ* (cf. Gen. 25:27; 1 S. 16:16; 1 K. 9:27), as well as the idea of caring (or not caring) for someone because of knowing that person, whether referring to God (cf. Gen. 18:19; 1 S. 2:12; 2 S. 7:20; Am. 3:2) or to a person (cf. Ps. 79:6; Jer. 4:22; Hos. 5:4).

In the NT "know" is usually either *oída* or *ginṓskō*, together with some use of *epiginṓskō*, which can mean to know with clarity or completeness, but also can have the force of "recognize." The corresponding nouns are *gnṓsis* and *epígnōsis*. Still another term, *epístamai*, occurs several times (e.g., Acts 10:28), usually having the force of "understand."

It is tempting to conclude that *oída* and *ginṓskō* ought to be distinguished from one another in their force, especially when both occur in the same context, appearing to express a distinction, but this is difficult to demonstrate (cf. Jn. 21:17; 1 Jn. 5:20). A limited distinction may be noted, in that *ginṓskō* is sometimes used in the sense of "learn" (Mt. 9:30; Lk. 19:15), whereas *oída* denotes settled knowledge, whether derived from revelation or instruction (Jn. 8:55). In contrast to "opinion" (*dóxa*), *ginṓskō* embraces reality as it truly is, whether truth (*alḗtheia*) or being (*ṓn*).

Some scholars contend that *oída* signifies intuitional knowledge. The LXX uses *ginṓskō* and *epiginṓskō* three times as often as *oída*, but in Ezekiel, in contrast with more than eighty uses of the former terms, *oída* does not appear at all. Yet J. Barr rejects any suggestion that the Ezekiel source considers "the *oída* concept" distasteful; he points out that *ginṓskō* accommodated, whereas *oída* could not, the passive and future senses that Ezekiel requires (*Semantics of Biblical Language* [1961], p. 254). The term *oída* is used interchangeably with *ginṓskō* in the NT in sufficient instances to put one on guard against finding some distinctive meaning in *oída* (cf. *TDNT*, V, 116f.).

II. OT.–Scripture is careful to distinguish the knowledge possessed by God from that which is possible for mankind. The knowledge of the Almighty transcends time and anticipates events (Jer. 1:5). It takes cognizance of people and events alike, and nothing can be concealed from His perception (Ps. 139:1-16). He is able to declare the end from the beginning (Isa. 46:10). His knowledge of individuals (e.g., Abraham, Gen. 18:19) and of nations (e.g., Israel, Am. 3:2) sometimes involves the element of choice. He knows our frame, our physical limitations (Ps. 103:14), and our movements (Ps. 139:2), as well as the secrets of the heart (Ps. 44:21 [MT 22]) and even our thoughts (Ps. 139:2). He knows in advance what people plan to say (Ps. 139:4). This omniscience allows God to treat everyone appropriately, rewarding the believer and punishing the apostate and wicked. In particular, God knows His chosen people (Am. 3:2), who have been bound to Him by a solemn covenant. His awareness of their rebellion and idolatry, despite promises to the contrary, prompts Him to show His continuing love for them by sending prophets to warn them of the punishment that awaits the apostate (Hos. 5:3-12; Am. 2:4f.; Jer. 4:28; Ezk. 5:11), giving them ample opportunity to repent and return to Him in obedience and faith.

Human knowledge is likewise a theme of the OT. Mankind is enjoined not to glory in wisdom, might, or riches, but in the privilege of knowing God (Jer. 9:23f.). God was the supreme reality to believers of the OT era, even though at times they experienced difficulty in understanding the dispensations of His providence (Job 19:25f.). Occasionally the Almighty was pleased to reveal Himself by signs and wonders in order that those who did not belong to the covenant people might become cognizant of His power (Ex. 7:17). He resorted to similar means to strike the conscience of His backslidden people, answering the plea of Elijah when the prophet prayed that fire would come down from heaven and consume the sacrifice he had prepared, thereby assuring Israel that the Lord, not Baal, was the living and true God (1 K. 18:36-39). God's judgments on Israel were for the purpose of bringing the nation back to the realization that He alone is God (Ezk. 11:11). To know the Lord goes beyond a reaching out for Him with the mind. For example, it involves embracing His concern for the poor and needy (Jer. 22:16). Just as the key to Israel's decline was the refusal to retain God in its knowledge and in its acknowledgment (Jer. 4:22), so the key to the nation's renewal is its acknowledgment that the Lord is the nation's God and that there is no other (Joel 2:27).

III. NT.–The NT does not frequently allude to the knowledge possessed by God, since the strong foundation of OT teaching made this unnecessary. Jesus affirmed that God knows the state of the human heart (Lk. 16:15). Indeed, He knows everything (1 Jn. 3:20). "Before him

no creature is hidden, but all are open and laid bare to the eyes of him with whom we have to do" (He. 4:13). Nothing is too trifling to escape His notice or His determining of events (Mt. 10:29). The heavenly Father knows that His children need such items as food and clothing (Mt. 6:32), but instead of making them priorities they are admonished to cease worrying and instead to seek His kingdom as a means of realizing His provision for their needs.

Much more attention is given to the knowledge possessed by the Son. As a lad of twelve, He astonished the learned men who taught in the temple (Lk. 2:46), and He continued to grow in wisdom thereafter (2:52). This was a token of His true humanity. During His ministry He was able to discern the thoughts of those who questioned Him (11:17) and to sense their hypocrisy (12:15). The penetrating insight evident during His public ministry is a matter of frequent emphasis, especially in the Fourth Gospel (2:25; 5:42; 10:14f.; 13:1, 11; 18:4; 19:28; 21:17). He was able to distinguish between true and false believers (Jn. 6:64). It is not made clear whether Jesus knew how long the infirm man had endured his affliction (Jn. 5:6) or whether He learned about it from others. When He did inquire, the reason was not ignorance but a desire to manifest interest and concern about human need.

Specific mention is made of Christ's learning obedience (to the Father) by the things He suffered (He. 5:7). One item of information was withheld from Him, namely, the specific time when He would return to earth (Mk. 13:32). Even in this case He carefully distinguished between Himself and others, whether people or angels. His voluntary admission that He did not know the time of His return has great value, in that it gives assurance that His many assertions about what He did know should be received with utmost seriousness.

During the earthly ministry, Jesus was encouraged and sustained by His unique knowledge of the Father (Jn. 8:55). This involved a clear perception of the Father's will for Him, including His sacrificial death (Lk. 22:42; He. 10:5-7). For those of the human family who desire a clear and satisfying knowledge of God, the Son is indispensable. God can be known in a personal, saving sense by knowing the Son (Jn. 14:7).

In the apostolic age, there were not only apostles, but also pastors and teachers whose task was to build up the believers in knowledge and Christian character (Eph. 4:11-13). The ministry of instruction in the local churches concentrated on the *didachē*, a corpus of information, oral in form, that appealed to the fact that converts to the Christian faith were called to a new life. They were summoned to put off pagan vices and put on Christ, appropriating His power to enable them to live supernaturally transformed lives. The teaching included obligations of family members to one another, responsibilities to fellow believers as well as to society and the state. These injunctions appear in the so-called practical portions of letters to churches. Writers were able to appeal to their readers' knowledge of this body of teaching. For example, in 1 Corinthians Paul repeatedly says "do you not know," chiding his readers for lack of compliance with the instruction they had received (3:16; 5:6; 6:2f., 9, 15f., 19; 9:13, 24).

In addition to human teachers, the believers had the benefit of the ministry of the Holy Spirit, enabling them to understand spiritual truths that remain inaccessible to the unsaved (1 Cor. 2:6-16).

Christian knowledge, despite its reality and richness, is limited in its scope during one's earthly life. Perfection in this area belongs to the age to come (1 Cor. 13:9f.).

IV. Revelation and Truth.–The fall affected the entirety of human nature. Human beings no longer, as at creation, thought God's thoughts after Him, willed to do the known will of God, or loved their Maker with their whole being. The fall, however, did not totally destroy the competence of human reason; although no universally shared system of truth and/or morality survived mankind's rebellion in Eden, human beings were still responsibly related to their Maker and were continually in revolt against light. The knowledge of God that continually penetrates the human mind and conscience even in sinful rebellion (Ps. 19:1 [MT 2]; Rom. 1:18ff.; 2:14f.) is attributed biblically to the universal revelation of God and to mankind's divine creation in the image of God. Modern evolutionary conceptions of the emergence of the categories of reason and morality from the nonmental and amoral undermine the permanent and universal significance of the rational and ethical aspects of human existence. The notion that the idea of God is simply an inference from nature or from human experience, i.e., from the not-God, plays into Ludwig Feuerbach's misconception that human beings fashion God in their own image; the soundest reply to such notions is that God Himself is the source of mankind's idea of Him.

The Bible teaches that truth has its ontological ground in God Himself (Ps. 31:5 [MT 6]; Isa. 65:16; cf. Jn. 14:6). All human knowledge is dependent upon God, who is the source and stipulator of truth. Divine revelation is identified as the truth of God, and the gospel especially is characterized as revealed truth. Apart from divine revelation all merely human affirmations about God and His purposes reduce to conjecture. Legitimate and authoritative pronouncements about God therefore presuppose God who makes Himself known.

The Hebrew and Greek conceptions of truth — both in respect to the method of knowing truth and its content — differ in important ways. But that contrast is not rooted in an essentially contradictive sense of such conceptions as truth and knowledge. Least of all did the conception of truth, either in the OT or the NT, cancel the distinction between truth and falsehood or dissolve the law of contradiction. That the God of the Bible is Himself the Truth and the source and standard of all truth, or that Jesus and the apostles stress that truth is to be done and not simply to be known, do not justify the exaggeration of Hebrew and Greek differences of usage implied by the neoorthodox emphasis on biblical truth as personal rather than propositional.

Christian knowledge does indeed carry a demand for expression in a corresponding manner of life; the practical consequences are continually implied if not actually in view (cf. Jas. 2:26, "faith apart from works is dead"). Christian learning is not an end in itself; it is the means to the love and service of God and under Him of neighbor and mankind. The believer who properly knows God forsakes his pagan vices and lives by the Spirit.

But none of these emphases discredits the importance of theological knowledge or of the cognitive aspects of faith. The researching of Scripture is enjoined by Jesus (Jn. 5:39). The Pauline statement that "knowledge puffs up, but love builds up" (1 Cor. 8:1) has in view, as the subsequent verse indicates, false opinion or misapplied truth.

Since God is the source and stipulator of truth, all human knowledge is dependent upon Him. Divine revelation is the source of truth and the human mind a created instrument for recognizing it. Human knowledge of the cosmos, as well as of other selves, rests on the ontological significance of reason. The Creator has fashioned a *Logos*-ordered and *nomos*-structured universe, one meshed to the categories of understanding implanted in mankind at creation.

Not even the direct recipients of divine revelation — i.e., the biblical prophets and apostles — "see everything from God's point of view." Human beings are and will always be finite; moreover, in their present sinful condition their rebellious disposition complicates the reception and appropriation of knowledge, the more so as knowledge is moral and spiritual in content.

In sharp contrast to the Greek view of prophecy, that mankind is endowed with a divine spark that one may fan into flame, the biblical view regards all truth as mediated by the Logos of God. Even Paul, the great apostle to the Gentiles, for all his reception of special divine revelation, emphasized that "now we know in part" and that only in the future eschatological age will we "see face to face" (1 Cor. 13:12). Yet divine revelation vouchsafes a knowledge to which human beings cannot otherwise attain, knowledge of God and of His will. This is given universally in general revelation (Rom. 1:20, 32; 2:15) and in the special redemptive disclosure conveyed to and through the Judeo-Christian prophets and apostles. The Pauline characterization of Gentiles as those who do not know God (Gal. 4:8) speaks of their culpable ignorance of Him; even the demons, as James says, "believe and tremble" (Jas. 2:19).

It is of the divinely revealed Christ that the apostle John declares: "we may be sure that we know him" (1 Jn. 2:3). Historic Christian theism acknowledges Christ as the incarnate Word of God and Scripture as the written Word of God (2 Tim. 3:16). Despite the emphasis of some theologians on the incarnate Logos as exclusively the Word of God, Jesus spoke of His own sayings (or doctrines) as *logoi* for the neglect or disbelief of which His hearers will be judged.

C. F. H. HENRY
R. K. H.

KOA kō'ə [Heb. *qô(a)'*]. A people named with Pekod and Shoa as enemies of Jerusalem (Ezk. 23:23). Some scholars have associated them with the Gutians, a barbaric people who inhabited areas of the Zagros Mountains, but certain identification is not possible.

KOHATH kō'hath; **KOHATHITES** kō'hath-īts [Heb. *q^{e}hāṯ, q^{o}hāṯî*]. Second son of Levi and ancestor of Moses and Aaron (Gen. 46:11; Ex. 6:16-20; Nu. 3:17; 1 Ch. 6:1 [MT 5:27]; etc.). The Kohathites formed one of the three divisions of the tribe of Levi; the other two were the Gershonites and the Merarites (Nu. 3:17ff.). The Kohathites consisted of four families, the Amramites, Izharites, Hebronites, and Uzzielites (3:19, 27; etc.). In the wilderness they encamped on the southern side of the tabernacle (v. 29); the males from a month old and upward numbered 8600 (v. 28). Their special charge was "the ark, the table, the lampstand, the altars, the vessels of the sanctuary with which the priests minister, and the screen; all the service pertaining to these" (v. 31; cf. 7:9). After the Conquest twenty-three cities were assigned to them by lot (Josh. 21:4-26). In David's time and after, Heman, a Kohathite, and his family had a prominent place in the service as musicians (1 Ch. 6:33-48; 16:41f.; 25:1-8). David likewise divided the Levites into courses (the Kohathites, 23:12-20; 24:20-25). The Kohathites fought at En-gedi in the reign of Jehoshaphat (2 Ch. 20:19) and helped to cleanse the temple in Hezekiah's reign (29:12, 14). J. ORR

KOHELETH. *See* ECCLESIASTES.

KOLA kō'lə [Gk. *Kōla, Chōla, Keila*]; AV COLA; NEB CHOLA. A place mentioned in Jth. 15:4, along with Betomesthaim, Bebai, Choba, "and all the frontiers of Israel," to which Uzziah sent men of Israel to tell of the flight of the Assyrian army. According to 4:6 Betomesthaim "faces Esdraelon, opposite the plain near Dothan." Bebai has not been identified; the name is missing in B and the Vulgate. Choba has sometimes been identified with el-Mekhubbi on the road from Samaria to Beth-shean. Simons (*GTTOT*, § 1606) identified it with Kā'un, between Meḫubba and Beisan, which is in the same region as el-Mekhubbi (= Meḫubba). Abel, however, inclined to the view that this quasi-historical account of Nebuchadnezzar "king of Assyria" and Uzziah took names from other portions of the Bible, such as Gen. 14:15 (*GP*, II, 299). If the account is not historical, attempts to locate the places mentioned will be of little value. If it is, Kola can be located no more specifically than in northern Samaria.

W. S. L. S.

KOLAIAH kō-lā'yə, kō-lī'ə [Heb. *qôlāyâ*–'voice of Yahweh'].

1. A Benjaminite, son of Maaseiah (Neh. 11:7).

2. Father of a false prophet and lecherous man named Ahab (Jer. 29:21).

KONA kō'nə [Gk. *Kōna, Kōla, Keila*; A *kōmas*–'villages']; AV "the villages"; NEB CONA. A place mentioned in Jth. 4:4. The people of Judea had only recently returned from Exile and were preparing to defend the hills and the passes. Kona is mentioned with several other places after the phrase "and to every district of Samaria," suggesting that these places were not in Samaria. Attempts to identify the site have not been sucessful. W. S. L. S.

KOR. *See* COR; WEIGHTS AND MEASURES.

KORAH kō'rə [Heb. *qōraḥ*–'baldness'(?); Gk. *Kore*].

1. One of the three sons of Oholibamah, Esau's Hivite wife. The three were born in Canaan before Esau withdrew to the Seir mountain country. They are mentioned three times from three points of view (Gen. 36:5, 14, 18; 1 Ch. 1:35); the third mention is in the list of chiefs.

2. One of the sons of Eliphaz, the son of Adah, Esau's Hittite wife (Gen. 36:16). He is mentioned as one of the Edomite chiefs.

3. A son of Hebron (1 Ch. 2:43), the son of Mareshah, mentioned in the Caleb group of families in Judah.

4. The son of Izhar the son of Kohath the son of Levi (Ex. 6:16ff.; Nu. 16:1; 1 Ch. 6:18, 31-38 [MT 3, 16-23]), a younger contemporary of Moses. There may have been generations, omitted in the record, between Izhar and Korah; that is a natural way of accounting for Amminadab (1 Ch. 6:22-30 [MT 7-15]).

This Korah is best known as the man whom the opening earth is said to have swallowed up along with his associates when they were challenging the authority of Moses and Aaron in the wilderness (Nu. 16–17). Korah is presented as the central figure in the affair; the company is spoken of as his company, and those who were swallowed up as "all the men that belonged to Korah" (16:11, 32). It is under his name that the affair is mentioned (26:9; 27:3; Jude 11; AV Core). But Dathan and Abiram of the tribe of Reuben are almost as prominent as Korah. In chs. 16 and 26 they are mentioned with him and in Dt. 11:6; Ps. 106:17 are mentioned without him. Another Reu-

benite, On the son of Peleth, was in the conspiracy. It has been inferred that he withdrew, but there is no reason either for or against the inference. Equally baseless is the inference that Zelophehad of Manasseh joined it but withdrew (Nu. 27:3). The account implies that there were other Levites in it besides Korah (16:7-10), and it particularly mentions 250 "well-known men" (vv. 2, 17, 35) who apparently belonged to different tribes.

The malcontents argued, "All the congregation are holy, every one of them" (Nu. 16:3), so that it was a usurpation for Moses and Aaron to confine the functions of an incense-burning priest to Aaron alone. Logically, their objection lay equally against the separation of Aaron and his sons from the rest of the Levites, and against the separation of the Levites from the rest of the people. Moses arranged that Korah and the 250, along with Aaron, take their places at the doorway of the tent of meeting, with their censers and fire and incense, so that Yahweh might indicate His will in the matter. Dathan and Abiram apparently refused his proposals.

Korah, the 250 with their censers, and "all the congregation" met Moses and Aaron at the doorway of the tent of meeting (Nu. 16:19). Yahweh directed Moses to warn the congregation to leave the vicinity. Since Dathan and Abiram were not at the tent of meeting, Moses, followed by the elders of Israel, went to the two men's tents and again warned everyone to leave. Dathan, Abiram, and their households stood near their tents, and the earth opened and swallowed them and their property and all the adherents of Korah. Fire from Yahweh devoured the 250 who offered incense. Ch. 16 does not say what became of Korah or whether Korah's sons participated in the rebellion (but cf. 26:10f., "The earth opened up its mouth and swallowed them up together with Korah. . . . Notwithstanding, the sons of Korah did not die"; cf. also the comms.; G. W. Coats, *Rebellion in the Wilderness* [1968], pp. 156-184). Because the people of Israel criticized Moses and Aaron for the deaths of Korah's company, 14,700 Israelites perished in a plague (16:49 [MT 17:14]).

W. J. BEECHER

KORAHITES kō'rə-īts [Heb. *qorḥî*]; **SONS OF KORAH** [*bᵉnê qōraḥ*]; AV also KORHITES, KORATHITES, SONS OF KORE; NEB also KORAHITE FAMILIES, LINE OF KORAH. This expression denotes Assir, Elkanah, and Abiasaph, Korah's three sons (Ex. 6:24; cf. Nu. 26:11). But it is more frequently used in the titles of Psalms.

The genealogical details concerning Korahites are rather full. In three places are lists of the seven successive generations closing with the prophet Samuel and his son Joel (1 Ch. 6:22-30, 33-38 [MT 7-15, 18-24]; 1 S. 1:1, 20; 8:2); the two in Chronicles mention most of the generations between Korah and Joel. The fragmentary lists in 1 Ch. 9, 25–26 connect the lineage with the four generations following Joel (1 Ch. 6:33 [MT 18]; 9:19-31; 26:1-11) and with two generations in the very latest Bible times (1 Ch. 9:31).

In 1 Ch. 9:31 the adjective Korahite designates an individual, but it is used collectively elsewhere (Ex. 6:24; Nu. 26:58; 1 Ch. 9:19; 12:6 [MT 7]; 26:1, 19; 2 Ch. 20:19). In these passages the families are counted in the same way as the other Levitical families. In 1 Ch. 12:6 five men designated as "the Korahites" joined David at Ziklag — Elkanah, Isshiah, Asarel, Joezer, Jashobeam. They are described as expert warriors, especially with the bow and sling, and as being of Saul's brethren of Benjamin. Some of them may plausibly be identified with men of the same name mentioned elsewhere. These Korahites may have been cousins of the Samuel family, residing near them.

The record speaks with some emphasis of a line of Korahite doorkeepers. One Mattithiah, the first born of Shallum the Korahite, was in charge of making the flat cakes (1 Ch. 9:31). Shallum was "the son of Kore, the son of Ebiasaph, the son of Korah." In this expression fifteen or more generations are omitted between Ebiasaph and Kore and perhaps as many between Kore and Shallum. The record proceeds to supply some of the omitted names between Kore and Shallum. The representative of the line in David's time was Zechariah son of Meshelemiah (v. 21). In all periods the Korahites were keepers of the thresholds of the tent. In the time of Phinehas son of Eleazar, their fathers were in charge of the camp of the Lord (vv. 19f.). Zechariah was, in his time, "gatekeeper at the entrance of the tent of meeting" (v. 21), and Shallum was still the chief of the porters (v. 17). The record for David's time supports and supplements this; the doorkeepers, according to the arrangements made by David, included a Korahite contingent. Its leading men were Meshelemiah the son of Kore of the sons of Asaph, and Meshelemiah's son Zechariah (26:1f., 9, 14). If the common conjecture that Asaph is here a variant for Ebiasaph is accepted, this chapter contains the same abridgment of the genealogical list as ch. 9.

More interesting, however, that the fighting Korahites of Benjamin or the doorkeeping Korahites who claimed succession from Moses to Nehemiah are the "sons of Korah" who were somehow connected with the service of song. The Korahites and Asaphites constituted two guilds of temple singers, and some favorite Korahite compositions are reflected by the titles of Pss. 42; 44–49; 84–85; 87–88 (*see also* PSALMS III.D). In 2 Ch. 20:19 the Kohathites are mentioned in association with the Korahites, as also in 1 Ch. 6:33 (MT 18), with the Kohathites taking precedence. Archeological discoveries in Palestine have confirmed the tradition of music and singing as an important part of culture in the early monarchy. Ugaritic texts refer to a class of temple personnel known as *šārīm*, who were analogous to the Hebrew singers of the monarchy and subsequent periods. Some of David's servants, such as Heman, Calcol, and Darda (1 K. 4:31 [MT 5:11]; 1 Ch. 2:6), had Canaanite names, and their designation as "sons of Mahol" is now known to mean "members of the orchestral guild." David's interest in sacred music is mentioned in connection with Solomon's temple, the times of Joash and Hezekiah and Josiah, and the institutions and exploits of the times after the Exile (e.g., 2 Ch. 7:6; 23:18; 29:25-30; 35:15; Ezr. 3:10; Neh. 12:36, 45f.). Asaph, Heman, and Jeduthun led the magnificent choir and orchestra at the dedication of the temple (2 Ch. 5:12). One of the sons of Asaph prophesied, and the sons of the Korahites sang at the crisis in the time of Jehoshaphat (20:14, 19). Asaph's, Heman's, and Jeduthun's sons were present, and there was instrumental music and loud singing, according to the appointment of David and his associates, at Hezekiah's Passover (29:12ff.). This singing, and Asaph, Heman, Jeduthun, and David have an important place in the record concerning Josiah. The records of the post-exilic times make the singers "sons of Asaph" and make the arrangements of David as conspicuous as the law of Moses itself.

The phrases "sons of Korah," "sons of Asaph," "sons of Heman," and "sons of Jeduthun" denote in some cases merely lineal descent but in other cases aggregates of persons interested in sacred song and music — a guild, society, succession, or group — arising out of the movement that originated in David's time. See "sons of Asaph" (1 Ch. 25:1f.; 2 Ch. 20:14; cf. 20:19; 29:13; 35:15; Ezr. 2:41; 3:10; Neh. 7:44; 11:22) and "sons of Korah" in the titles of Pss. 42–49; 84; 85; 87; 88. Traces of these aggregates

appear in the times of Solomon, Jehoshaphat, Joash, Hezekiah, Josiah, Zerubbabel, and Ezra and Nehemiah.

W. J. BEECHER

KORATHITES (Nu. 26:58, AV). *See* KORAHITES.

KORE kô'rə [Heb. *qôrē'*].

1. A Levite of David's time, descended from Kohath and Korah. (*See* KORAH **4.**) Shallum, chief doorkeeper in the latest OT times, is described as "the son of Kore, son of Ebiasaph, son of Korah" (1 Ch. 9:19). This expression omits the generations between Shallum and Kore and those between Kore and Ebiasaph, perhaps fifteen generations or more in each case. The context supplies two of the omitted names, Meshelemiah and his son Zechariah of the time of David (vv. 21f.); 1 Ch. 26:1f., 9, 14 mention these two, calling Meshelemiah the son of Kore and describing them as Korahites of the sons of Asaph. It is usual to regard this last clause as a variant for "the son of Ebiasaph," making the description identical with that in 9:19; thus "the Korahites," Kore and Meshelemiah and Zechariah, would come midway in a line of sanctuary ministrants extending continuously from Moses to Nehemiah.

2. "The son of Imnah the Levite, keeper of the east gate," who "was over the freewill offerings" in the time of Hezekiah (2 Ch. 31:14) and was very likely in the same line with **1.**

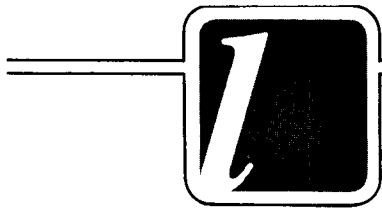
KORHITES (Ex. 6:24; 1 Ch. 12:6; 26:1; 2 Ch. 20:19, AV). *See* KORAHITES.

KOZ koz [Heb *qôṣ*–'thorn']; AV, NEB, COZ. A man of Judah (1 Ch. 4:8), descendant of Caleb. *See* HAKKOZ.

KUE kōō'ə [Heb. *qᵉwēh, qᵉwē'*; Gk. *Koue*; Lat. *Coa*] (1 K. 10:28; 2 Ch. 1:16); AV "linen yarn"; NEB COA. The country from which Solomon imported horses, probably the ancient name for eastern Cilicia.

Kue was one of the small neo-Hittite states of northern Syria and southern Anatolia that formed in the wake of the destruction of the Hittite empire in the 13th cent. B.C. Kue helped Solomon supply horses and chariots to neighboring states (J. Bright, *History of Israel* [2nd ed.], p. 212). A century later it was part of the coalition that fought with Ahab of Israel and Hadadezer of Damascus against the Assyrian king Shalmaneser III at the Battle of Qarqar in 853 B.C. (*ANET*, pp. 278f.). The Zakir inscription (early 8th cent. B.C.) mentions Kue as an ally of Damascus in another war, against Zakir of HAMATH (*ANET*, pp. 655f.).

In 1946 a long inscription in Phoenician and hieroglyphic Hittite was discovered at Karatepe, Turkey, in the ancient region of Kue (*ANET*, pp. 653f.). It contains a record of the deeds of "Azitawadda," a vassal or general of "Awarka king of the Danunians" — i.e., the king of Kue. The inscription affords an important glimpse into the political and religious conditions in this area of the Near East in the 9th-8th cents. B.C.



The AV translators misinterpreted *qᵉwēh* as a form of Heb. *qāw*, "twine, line."

LAADAH lā'ə-də [Heb. *laʿdâ*]. A descendant of Judah (1 Ch. 4:21).

LAADAN lā'ə-dən (AV, NEB, 1 Ch. 7:26; 23:7f.; etc.). *See* LADAN.

LABAN lā'bən [Heb. *lāḇān*–'white'; Gk. *Laban*]. Son of Bethuel, grandson of Nahor, and brother of Rebekah (Gen. 24:24, 29; 25:20; 28:5). He belonged to the branch of the family of Terah derived from Abraham's brother Nahor and niece Milcah. The genealogy of this branch (22:20-24), true to its purpose and place in Genesis, stops at Rebekah without mentioning Laban. Accordingly, the introduction of Rebekah in the narrative of ch. 24 (vv. 15, 24) calls to the reader's mind the genealogy already given. Her brother Laban must be introduced by the express announcement "Rebekah had a brother whose name was Laban" (v. 29).

Laban took a prominent part in receiving Abraham's servant and determining his sister's future. That brothers in OT times had an effective voice in the marriage of their sisters is evident not only from extrabiblical sources but also from the Bible (e.g., Cant. 8:8). In Gen. 24, however, Laban's prominence seems to deviate from the customs of the Palestinian side of the family. He usurped his father Bethuel's functions in arranging Rebekah's marriage (24:50f., 55) without actually denying Bethuel's authority. His self-interest (e.g., his showing eager hospitality after assessing the gifts brought for his sister, vv. 30-33) and his duplicity (e.g., his marrying Jacob first to Leah rather than to Rachel, 29:20-30) suggest that he may well have adapted a number of contemporary customs to his own purposes. Thus it may be unproductive to interpret his behavior according to the social modes of specific northern Mesopotamian cultural centers.

Laban was apparently old when Jacob arrived, but so energetic that even after two decades he could still exercise his role as patriarch with complete authority (Gen. 31:23-35, 43-55). He emerges as an enterprising, selfish, hardy individual, doubtless respected by his contemporaries for these qualities; beside him Jacob appears pallid and weak. He was hardly an ideal father, to judge from his daughters' complaints (vv. 14-16). Indeed, a theophany was necessary before his self-interest was curbed (v. 24).

Laban lived in Haran (*Ḥarrānu* in the cuneiform texts), the area settled by Nahor when the rest of Terah's descendants moved west to Canaan (Gen. 11:31; 12:5). Since Haran and the surrounding region where the flocks grazed belonged to the district known as PADDAN-ARAM, Laban was called "the Aramean" (25:20; 28:5; 31:20, 24; cf. Dt. 26:5), an epithet reflecting the nature of the population associated with the Haran cities and the Aramaic language spoken in the area (Gen. 31:47). The contrast between the two Semitic dialects is brought out forcibly in the MT of vv. 46f.; Laban called the pile of stones *yᵉgar śāhᵃḏûṯā'* and Jacob referred to it as *galʿēḏ*, both terms meaning "the heap of witness."

Archeological discoveries at the Middle Bronze (*ca.* 2000-1550 B.C.) level of NUZI have shed light on the relationship of Jacob and Laban. Probably Laban had no male heirs when Jacob became a member of his household; after Jacob had served stipulated periods of time, Laban allowed him to marry his daughters. The memorial covenant between them required Jacob to forfeit his right of inheritance if he took additional wives (Gen. 31:50). Provisions of this kind at Nuzi were generally part of adoption contracts, and the aged Laban's demonstration of his patriarchal authority (v. 43) indicates that he was treating Jacob as a legally adopted son. But apparently during the two decades in which Jacob served Laban (v. 38), sons were born to Laban, thus depriving Jacob of any rights of primogeniture.

Some scholars have argued that in Nuzi society proof of primogeniture seems to have been possession of the household gods (*tᵉrāp̄îm*). Thus when Rachel absconded with them she would have been trying to secure for Jacob his former rights. But because the patriarch Laban still firmly controlled the entire family, Jacob and his wives would have been legally guilty in leaving the parental household without permission. Other scholars, however, have argued from a reinterpretation of the published Nuzi material that possession of the household gods did not necessarily indicate possession of inheritance rights, since the images seem to have been used only in cultic connections. In the Nuzi texts the household gods were generally bequeathed to the principal heir, and if Laban was following local tradition, the disappearance of the images was probably regarded as simple theft. More serious was the possibility of Laban's incurring the wrath of the deity or deities involved.

LABANA (1 Esd. 5:29, AV, NEB). *See* LEBANAH.

LABOR [Heb. nouns *yᵉgîa(ʿ)*, *maʿᵃśeh*, *mᵉlāʾkâ*, *ʿᵃbōḏâ*, *ʿāmāl*, *ʿeṣeḇ*, *pᵉʿullâ*]; AV also SERVICE; NEB also WORK, PROPERTY (Neh. 5:13), etc.; [verbs *ʿāśâ*, *ʿāḇaḏ*, *yāgaʿ*, *ʿāmal*, *ʾûṣ*]; AV also TRAVAIL, WROUGHT, SERVE; NEB also WORK, TOIL, etc.; [Aram. hithpaal part. of *śᵉḏar*] (Dnl. 6:14 [MT 15]); NEB "continued his efforts"; [Gk. nouns *kópos*, *érgon*]; AV also WORKS; NEB also TOIL, WORK, etc.; [verbs *kopiáō*, *synathléō*, *ergázomai*]; NEB also TOIL, WORK, WORK HARD, etc.; **LABORER** [Heb. part. of *ʿāḇaḏ*] (Eccl. 5:12 [MT 11]); [Gk. *ergátēs*]; AV also WORKMAN; NEB also WORKER, MEN; [part. of *kopiáō*] (1 Cor. 16:16); **LABORIOUS** [Heb. *ʿᵃbōḏâ*]; AV SERVILE; NEB DAILY; **FORCED LABOR** [Heb. *mas*, *sēḇel*]; AV TRIBUTE, LEVY, etc.; NEB also FORCED LEVY, LABOUR-GANGS. For **LABOR (OF CHILDBIRTH)** *see* TRAVAIL.

I. Terms.–Of the many Hebrew and Greek words for "labor," most indicate service, toil, or exertion (*see also* WORK). Although the words differ in connotation and emphasis — with the emphasis variously on the activity itself, growing tired, troublesomeness, or the task — only a few distinctions need to be noted here. The NEB translation of *yᵉgîa(ʿ)* in Neh. 5:13 as "property" correctly signifies the result of labor, i.e., acquired property. The verb *ʾûṣ* in Isa. 22:4 literally means "hasten." One Greek verb for "labor," *synathléō*, literally means "struggle (in an athletic contest) along with someone"; the RSV "labored side by side with" and the NEB "shared [someone's] struggles" (Phil. 4:3) faithfully reflect this meaning. Paul used this verb to explain how early Christians joined him in proclaiming, defending, and advancing the gospel.

In the RSV the word "laborious" occurs only in Lev. 23 and Nu. 28–29. As a crucial aspect of religious feasts and festivals in the liturgical year of Israel, the law prescribed that on certain days the people must not do any "laborious work," i.e., they were to observe a kind of sabbath, a day of joyful rest.

Hebrew *mas* and *sēḇel* ("forced labor") refer to the ancient institution of the levy, by which captives of war were put to work for the state that had taken them. Moses told Israel, "When you draw near to a city to fight against it, offer terms of peace to it. And if its answer to you is peace and it opens to you, then all the people who are found in it shall do forced labor for you and shall serve you" (Dt. 20:10f.). The conquered Canaanites frequently had to endure forced labor for Israel (cf. Josh. 16:10; 17:13; Jgs. 1:28, 30, 33, 35); a military official apparently administered the levy program (cf. 2 S. 20:24; 1 K. 4:6; 11:28; 12:18; 2 Ch. 10:18). At the time of Solomon, when public works and state construction reached their greatest extent, forced labor was necessarily increased to provide the needed manpower for building the temple, the palace, cities and walls, etc. Hence Solomon for some time conscripted the remaining Amorites, Hittites, Perizzites, Hivites, and Jebusites as slave laborers ("forced levy," 1 K. 9:20f. par. 2 Ch. 8:7f.). Even among the Israelites a modified, temporary levy required them to work in quarries and in the forests of Lebanon to obtain building materials for the temple (1 K. 5:13-18 [MT 27-32]; but cf. also 9:22; 2 Ch. 8:9). *See also* LEVY; SLAVE.

M. W. MEYER

II. Theology of Labor in the OT.–God originally intended labor to be an integral part of human existence. Man, on God's behalf, was to master the rest of creation. Labor was something positive, since man was serving God by cooperating in His creative activity (Gen. 2:15). Rain sent by God brought forth plants from the ground that man worked (2:5).

When man fell (Gen. 3:6), he exchanged a life of pleasant tasks for one of grinding toil. Labor took on a new and ominous meaning: pain for women in childbearing (3:16), pain for men in breadwinning (v. 17).

The tilled ground would produce not only good food but also "thorns and thistles" (Gen. 3:18). Man would now be forced to depend largely on his own efforts, working by the sweat of his brow (v. 19), while God cooperated in only a minimal way. Toil became man's curse until the day of death.

Genesis 2 and 3 thus set the pattern for subsequent biblical teaching about work. Labor is a double-edged sword: at its best it cooperates with God's purposes for His people (see, e.g., Gen. 31:6-13), but at its worst it involves rebellion against His will.

Exodus describes various kinds of labor and gives seminal teaching concerning work as a whole. Slave labor, though the lesser of two evils when compared with death itself (Ex. 14:12; cf. Gen. 47:18-25), was nonetheless a particularly severe form of suffering (Ex. 1:8-14; 2:23; cf. Job 7:2f.). But Exodus does not depict nonmanual labor as infinitely better than manual labor, with all its monotony and misery; it gives examples of administrative and mental tasks that can be just as demanding and strenuous as physical toil (Ex. 18:13-18; cf. Eccl. 12:12).

Because daily work in the ancient world was exhausting and because of the human penchant for working themselves and sometimes others too hard and too long, God enjoined sabbath rest for all in Israel, including servants, sojourners, and animals. One day in seven was set aside for more leisurely activity, including especially the worship of God Himself and remembrance of His mighty acts. The rhythm between labor and rest was based on God's own example in creation and on the need for everyone to have a day off after six days of work (Ex. 20:8-11; Dt. 5:12-15). Observance of the sabbath also served as a reminder to God's people

Relief from the tomb of Ti (ca. 2400 B.C.) at Saqqârah showing two carpenters at work (Bildarchiv Foto Marburg)

that He had delivered them from Egyptian slavery (Dt. 5:15). The later institution of sabbatical and jubilee years was a natural extension of the original sabbath-day principle. Sabbatical years were intended to provide rest for the farmland, by letting it lie fallow, as well as freedom for indentured Hebrew slaves. Jubilee years required the remission of all debts. Such further outworking of the principle of the sabbath stressed once again that labor at its best is service to God, who is always the master of both land and time. *See also* FEASTS; SABBATH.

Although divinely ordained work is intended for mankind's benefit, its main purpose — like that of every other good gift — is to glorify the Giver. The Israelites therefore were to bring the first fruits of their labor as an offering to the Lord (Ex. 22:29f.; 23:19; Lev. 27:26; Dt. 26:1-11); a tenth of everything produced was also to be given to God (Lev. 27:30-33; Dt. 14:22-29; 26:12-15), since that tithe belonged to Him (Mal. 3:8-10).

The dual nature of labor is underscored by the Bible's observation that some work was clearly for God while other work was just as clearly against Him. For example, the tabernacle in the desert was built so that God might dwell among (Ex. 25:8) and meet with (29:43) His people. The making of idols, on the other hand, was forbidden as an affront to God's commands and nature as well as to mankind's creaturehood and dignity (Ex. 20:4-6; Dt. 4:15-18, 23; Ps. 106:19f.; Isa. 44:9-20; Jer. 10:3-5, 8f., 14f.). The attempt to build a city and tower at Babel (Gen. 11:1-9) falls into this latter category. Work for God brings His promised blessings (Isa. 65:17-25), while work against Him brings His inexorable curse (Hag. 1:5-11).

Similarly, God blessed the work of those who obeyed Him (Lev. 26:3-13; Dt. 28:1-14; Isa. 32:15-20; Am. 9:13f.; Hag. 2:15-19) and cursed the labor of those who disobeyed Him (Gen. 4:11f.; Lev. 26:14-45; Dt. 28:15-68; Isa. 5:5-7; 7:23-25; Mic. 6:15).

As people at their spiritual best always cooperate with God in labor — for human work is part of God's created order — so their work is to be done according to God's plans and commands, a principle nowhere better exemplified than in the building of the tabernacle (Ex. 25:9, 40; 26:30; 27:8; 31:1-5; etc.). Indeed, human work derives its strength and inspiration from God (Dt. 8:17f.).

Labor, though tedious and toilsome, can and should result in satisfaction and joy (Ex. 39:43; Neh. 2:18; Prov. 31:10-31). Sometimes, however, a person's wealth gained through honest labor is lost to and enjoyed by someone who has not even worked for it (Eccl. 6:1f.). Thus Ecclesiastes, like other OT writings, teaches that people's labor and its results are both good and bad because we live in a fallen world. God gives people sustenance from and joy in their work (Eccl. 2:10, 24-26; 3:12f.; 5:18-20 [MT 17-19]; 8:15; 9:7-10), but ultimately work is wasted because its results are temporary (2:11).

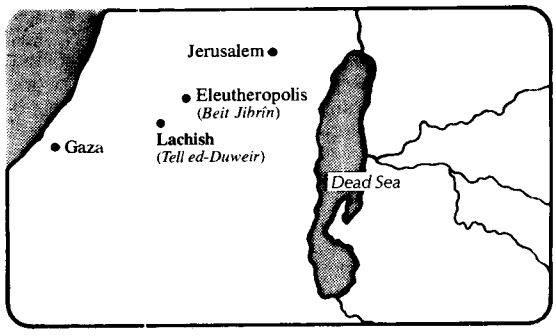
The exchange of wages for labor plays an important role in the OT view of work. The laborer is worthy of his hire (Lev. 19:13; Dt. 24:15; Jer. 22:13; 2 K. 12:13-15; Mal. 3:5; cf. Lk. 10:7; Jas. 5:4). Hunger can force a person to work in order to pay for food and other necessities (Prov. 16:26). Good workers can expect to better themselves by being promoted (1 K. 11:28; Prov. 22:29), while lazy workers jeopardize their future and may die prematurely (Prov. 21:25).

Although God has promised to bless His people when they are diligent and industrious, circumstances sometimes impede the successful completion of tasks (e.g., Neh. 4:10 [MT 4]). It is also evident that human labor attempted without divine help will ultimately prove unsuccessful (Job 5:8-13; Prov. 3:9f.; 10:22).

III. Theology of Labor in the NT.–While building on and reiterating the principles set forth in the OT, the NT has a distinctive emphasis because of the finished revelation in Jesus Christ. Like the OT, the NT shows that work is difficult and wearying (2 Cor. 6:5; 11:23, 27; cf. 1 Cor. 4:12); idleness is deplorable and to be avoided (2 Thess. 3:10-12); the worker deserves his wages (Mt. 10:10 par. Lk. 10:7; 1 Tim. 5:17f.); a man must provide for his family and relatives (1 Thess. 4:11f.; 1 Tim. 5:8). But the NT raises labor to new heights of dignity and significance. God may call people to leave their everyday work to follow Him (Mk. 1:16-20; 2:14; Lk. 5:8-11). Overemphasis on mundane tasks and their monetary benefits can stifle one's receptivity toward God's word and kingdom (Mt. 19:6-30 par. Mk. 4:19; Lk. 17:28-30; 21:34). Moreover, worry over labor and the necessities of life is contrary to God's will for His people; He has promised to provide for their legitimate needs if they seek first His kingdom and righteousness (Mt. 6:25-34). When overweening desire for money becomes the force behind working for a living, it leads to ruin. In the NT work is commendable only if the worker does not love money, trusts in God, and shows generosity (1 Tim. 6:6-10; Acts 20:33-35; Eph. 4:28).

Paul likened his and Timothy's evangelistic work to the work of soldiers, athletes, and farmers: all such responsibilities are hard and painful and require discipline and sacrifice (2 Tim. 2:4-6). But evangelists, like these other workers, do not give up, because they have a sense of obligation and recognize the importance of what they are doing for themselves and others. Those who work for Christ full time have a right to a livable wage. They may decide to relinquish that right, however, in order to serve God by not burdening others unduly (1 Cor. 9:1-18; 2 Thess. 3:6-9).

Bibliography–G. Agrell, *Work, Toil and Sustenance* (1976); A. T. Geoghegan, *The Attitude Towards Labor in Early Christianity and Ancient Culture* (1945). R. F. YOUNGBLOOD



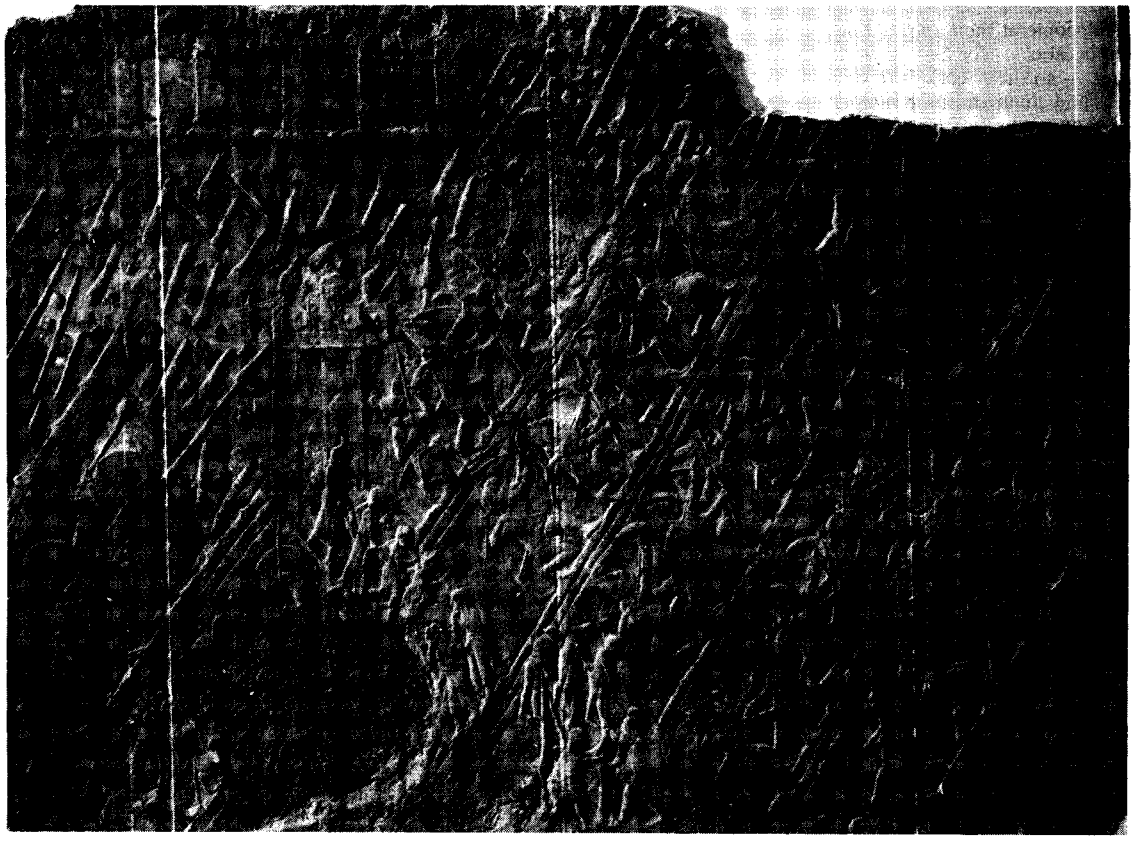
LACCUNUS la-kŏŏ-nəs [Gk. *Lakkounos*]; AV LACUNUS. One of the sons of Addi who returned with Ezra and had a foreign wife (1 Esd. 9:31). The name does not, as might have been expected, occur in Ezr. 10:30.

LACE [Heb. *pāṭîl*]. This term refers to a cord rather than to decorative openwork fabric. In Ex. 28:28; 39:21 it designates the blue cord that joined the rings of the breastplate to those of the ephod. It also fastened the engraved golden plate to the front of the high priest's turban (28:37; 39:31).

LACEDAEMONIANS. *See* SPARTA.

LACHISH lā'kish [Heb. *lāḵîš*]. One of the principal cities of Judah and a royal fortress protecting the southern Judean hill country from invasion from the southern Philistine plain. It stood midway between Jerusalem and Gaza and is identified with Tell ed-Duweir, about 8 km. (5 mi.) SW of Beit Jibrîn (modern Bet Guvrin, ancient Eleutheropolis).

The first mention of Lachish in the Bible occurs in the account of Israel's defeat of the south Canaanite coalition at Gibeon that resulted in the destruction of Lachish and the death of its king Japhia at Makkedah (Josh. 10:3ff.; 12:11). A cartouche of Ramses III, discovered in 1978 in the destruction debris of level VI associated with the city gate, indicates that Canaanite Lachish was destroyed during or following his reign (*ca.* 1182-1151 B.C.). After the conquest Lachish became a part of the territory assigned to the tribe of Judah (15:39). The destroyed site was abandoned for a long period before habitation was reestablished, perhaps in the time of David or Solomon. The



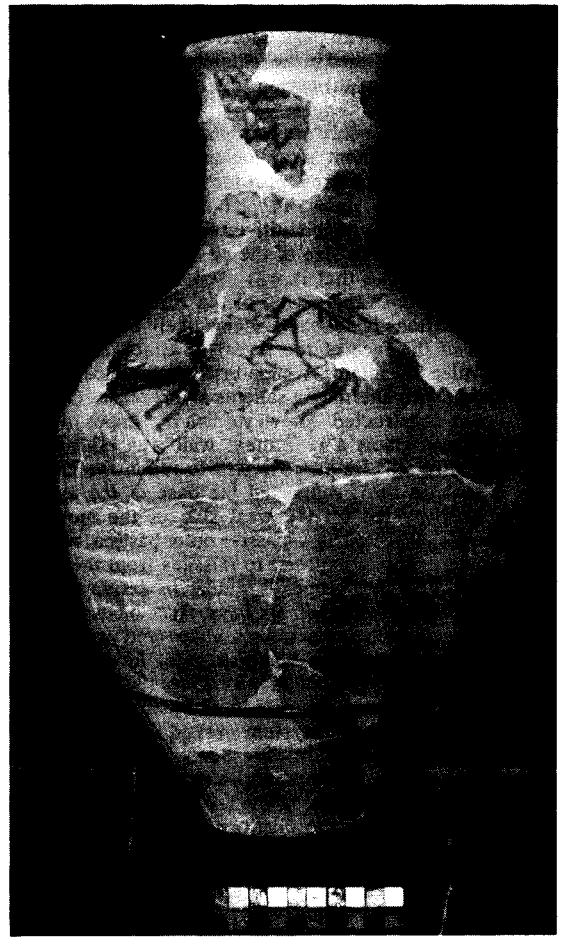
transformation of the site into a major Judean fortified city began with Rehoboam, Solomon's son, in the late 10th cent. (2 Ch. 11:9). The destruction of the early fortifications may be attributed to Pharaoh Sheshonq's (Shishak) campaign (*ca.* 925 B.C.). Amaziah of Judah fled there in a futile effort to escape assassination during a palace revolt (*ca.* 783; 2 K. 14:19; 2 Ch. 25:27). Having swept around Jerusalem in a punitive campaign against Hezekiah (cf. Mic. 1:10-15, esp. v. 13, for the southern invasion route) Sennacherib of Assyria made Lachish his field headquarters (701) and received there Hezekiah's suit for peace (2 K. 18:14, 17; 2 Ch. 32:9; Isa. 36:2). Scholars disagree on whether the Assyrian occupation of Lachish mentioned in 2 K. 19:8 refers to a second, later campaign by Sennacherib; it is more likely that he conducted a single campaign against Hezekiah's kingdom. In an impressive series of bas-reliefs adorning his palace at Nineveh, Sennacherib illustrated and described his capture of the city in 701. A sparsely populated Judean fortified city arose on the ruins of Lachish, only to be destroyed by Nebuchadrezzar of Babylon in his protracted campaign against the stubborn resistance of his rebellious regent Zedekiah (588/86; Jer. 34:7; cf. 52:3b-11). The last mention of the city in the Bible is its inclusion among the cities of southern Judah reoccupied by returnees from Babylon during Nehemiah's administration (440-428, Neh. 11:30).

The earliest extrabiblical reference to Lachish is mentioned in the Ebla commercial texts (*ca.* 2400 B.C.; cf. G. Pettinato, *Archives of Ebla* [Eng. tr. 1981], p. 226). The Amarna Letters (mid-14th cent. B.C.) contain several references to Lachish, including the role of Zimreda, prince of Lachish, in the characteristic squabbles between city-states of Palestine during the Amarna Age.

Archeological exploration of Tell ed-Duweir began with the Wellcome-Marston Research Expedition (1932-1938), directed by J. L. Starkey. His tragic murder at the hands of highwaymen brought the British investigation of the site to an end. O. Tufnell, a member of the expedition, published the four-volume final report. Y. Aharoni carried out a small-scale excavation in the area of the "solar shrine" in 1966 and 1968, a joint University of North Carolina–Hebrew University project, which was published as *Lachish V* (1976). A comprehensive excavation project was initiated at the site in 1973 by the Institute of Archaeology of Tel Aviv University and the Israel Exploration Society under the direction of D. Ussishkin. This long-term project is expected to continue into the 1990's.

The summit of the tell, impressively separated all around

Relief from the palace of Sennacherib (704-681 B.C.) at Nineveh showing the Assyrian attack on Lachish (Trustees of the British Museum)



by a valley, is 7.3 ha. (18 acres); thus it is one of the largest city mounds in Palestine (cf., e.g., Megiddo's summit of 5.3 ha., 13 acres). The well-watered region surrounding Lachish has been inhabited since Upper Paleolithic times, and there is evidence that the hill itself has been occupied since the Neolithic period (8th millennium B.C.). In the late Chalcolithic period (before 3200 B.C.), caves in the surrounding limestone hills provided shelter for the living; in the Early Bronze period (to *ca.* 2800) they became tombs. Little information about the city on the hills is available for this period. Later in the Early Bronze period the population changed (indicated by a change in burial customs from caves to single graves), and toward the end of the 3rd millennium Lachish, like other Palestinian sites, was abandoned.

The site was slowly reoccupied, and the Hyksos rulers of Egypt later made it a major fortress. Below the crest a moat, or fosse, was dug around the circumference; between it and the brick wall, whose foundations began about 30 m. (100 ft.) above the valley floor, a plaster-covered glacis was laid. Within the city a palace-citadel rose above the city walls. The fortifications of this city in the patriarchal period deteriorated after the expulsion of the Hyksos and the restoration of native rule in Egypt in the mid-16th century.

In the fosse, below the northwest corner of the wall, a small temple was built (*ca.* 1550) and twice enlarged (*ca.* 1450, 1350). It provides interesting information about pre-Mosaic Canaanite religious practices — e.g., pottery containers were placed in front of the offering table and on surrounding benches for drink offerings; pits inside and outside the rectangular temple were filled with bones of sheep and goats, especially the right foreleg (cf. Lev. 7:32) used in burnt offerings; and ovens were built outside the temple in which the fine meal for the cereal offering may have been baked (cf. Lev. 2:1-10). The large stones used in the temple were unhewn, but the altar of the last stage had three steps, proscribed by Ex. 20:24-26. The temple, whose design differed from the contemporary Canaanite temples at Hazor and the later temple of Solomon, and the city were destroyed, most likely by Joshua and the Israelites. Interestingly, this Late Bronze Age city (1550-1200 B.C.) was not surrounded by a wall at the crest of the tell, although the steep glacis from the Hyksos period provided an imposing barrier to the attackers. In the ruins of this last Canaanite city on the site, several proto-Canaanite inscriptions have been discovered, with letters reminiscent of the proto-Sinaitic inscriptions discovered early in the 20th cent. at Serābîṭ el-Khâdim in western Sinai.

Excavated Canaanite temple (*ca.* 1550-1350 B.C.) at Lachish (Israel Department of Antiquities and Museums)

Ewer from Lachish (ca. 13th cent. B.C.) with drawings of several animals and an inscription, which has been variously interpreted. The script is similar to that of the Proto-Sinaitic inscriptions (Israel Department of Antiquities and Museums)

Lachish lay abandoned during the period of the judges with reoccupation beginning in the 10th cent., perhaps during the reign of David. A grave from the early monarchy has provided examples of the recently introduced iron technology: weapons and a trident (cf. 1 S. 2:13f.). The new settlement was apparently without protective walls, and little is known of it apart from a cult-room excavated in the solar shrine area. It had been destroyed by fire, an end presumably suffered by the entire settlement. Following this destruction the stump of the old Hyksos Canaanite citadel was enlarged to form a podium 32 m. (105 ft.) square. The Israelite citadel in part covered the remains of a Late Bronze temple that had been built over the ruins of the earlier Hyksos (Middle Bronze) temple. The podium (palace A) was faced with stone and filled with earth and rubble. It may be an example of a "Millo" (= filling, or terrace?), similar to that which David built in Jerusalem (2 S. 5:9). This foundation was used throughout the remaining history of Lachish, although with the major refortification of the city it was lengthened by the addition of palace B. Whether this occurred during Rehoboam's reign or later under Asa or Jehoshaphat is unclear. Before the major destruction of the city in 701 B.C., Palace C, an eastern extension of the combined Palaces A and B, was built. Further to the east was a large enclosed courtyard with a gate to the south that

led to the major gateway of the city. No remains of the buildings atop the Judean palace-fortress were recovered. They had been demolished in the rebuilding of the residency in the postexilic (Persian) period, the last building to occupy the acropolis.

Abutting the palace-fortress complex to the south were the ruins of government storehouses from the Judean period, similar to structures from the same period found at Megiddo and Beer-sheba. These buildings suggest that Lachish served as an administrative center and warehouse complex in Judah. The size of the city and the immense fortifications indicate that it was second in importance only to Jerusalem in the period of the Judean kingdom.

The fortifications of Judean Lachish likely began under Rehoboam in the face of the threat of attack from the Egyptian ruler Sheshonq. A huge brick wall almost 6 m. (20 ft.) thick, with alternating salients and recesses (2 Ch. 11:5-12), was constructed. Midway down the slopes of the Middle Bronze glacis a revetment wall was built that girds the entire tell. Its purpose was to retain the glacis above it that, in turn, supported the base of the upper wall. A roadway led up the west side of the mound, through a gate protected by a massive outer bastion, where attackers were wholly exposed to missiles from the wall above them. The gate proper is similar in design to the "Solomonic" gates with their six bays, three on each side of the roadway, such as have been uncovered at Hazor, Megiddo, and Gezer; the Lachish gate, however, is greater in dimensions: about 24.4 by 25 m. (80 by 82 ft.), compared with the Megiddo gate of 18 by 20.3 m. (59 by 66.6 ft.). This defensive system served Lachish until Sennacherib breached it in 701. Sennacherib's forces penetrated the walls at two points — at the gate complex and at the southwest corner of the tell — by throwing up siege ramps against the fortifications and attacking them with battering rams and supporting fire. The archeological evidence supports the accuracy of the Assyrian artists' vivid depiction of the city's conquest in the reliefs from Sennacherib's palace. A remnant of the siege ramp at the southwest end of the tell remains in place, and a thick burn layer discovered in every area excavated atop the mound indicates that the conquerors put the city to the torch.

Perhaps in preparation for Sennacherib's assault (cf. Hezekiah's digging of the Siloam tunnel in Jerusalem; 2 Ch. 32:5f.), a water reservoir about 22 by 25 by 25 m. (70 by 80 by 80 ft.) was dug inside the southeast corner of the wall; a funnel-shaped depression of crushed chalk or rock chips was to provide drainage into this cistern, which was never completed.

After the Assyrian conquest Lachish remained a desolate and abandoned site for perhaps a half-century, while the conquerors dominated the region during the reigns of Esharhaddon and Ashurbanipal, Sennacherib's son and grandson, respectively. With the weakening of the Assyrian empire the city was reoccupied and refortified, most likely under the reign of Josiah king of Judah (639-609 B.C.). A new city wall and a new gate complex were constructed, but the population appears to have been much smaller than in the previous period. Nevertheless, Lachish once more became a major fortress in the Judean defense system. This period of resurgence was short-lived, however, ending with the conquest of the city by Nebuchadrezzar of Babylon (588-586 B.C.).

It is to the Babylon conquest that the famous "Lachish Letters" relate. Discovered by the British expedition in a room of the bastion, the outer gateway, in 1935, the ostraca are apparently copies of military communiqués. It is quite likely that the dispatches themselves were written on papyrus while the heavier ceramic copies were retained for the record. The correspondence is between Yoash, commander of the city, and Hoshiah, one of his subordinates who was in command of an outlying defensive position. The letters are a grim testimony to the inexorable advance of Nebuchadrezzar. They indicate a deteriorating military situation and a weakening morale caused by, among other things, the words of an unnamed prophet (speculation has often associated him with Jeremiah). The language of the twenty-one ostraca, where legible, is that of Jeremiah, Deuteronomy, and the Deuteronomic history. *See* LACHISH LETTERS.

For more than a century the city lay in ruins. In the mid-5th cent. a palace in the Syrian style (open court surrounded by suites of rooms approached through colonnades) was built on the ancient palace-citadel podium, perhaps as a residence for a Persian official appointed to see to Persian interests in a region controlled by Geshem the Arab (cf. Neh. 6:1) or the Edomites who had moved into the region during the previous century.

A smaller building was erected NE of the palace during the early Hellenistic period (after 330 B.C.). Though initially it was described as a "solar temple," further archeological investigation in 1966 and 1968 has resulted in its being compared in design with the preexilic shrine at Arad. Its orientation (entrance at the east end) and arrangement — an open court (*'ûlām*) with steps leading to an inner room (the *hêḵāl*) and a small chamber beyond (the *d^{e}ḇîr*, "holy of holies") — are strongly reminiscent of the small Arad temple. The Lachish shrine apparently had no altar in the court like that of Arad; Arad had no steps leading up to the *hêḵāl* ("holy place"), unlike Lachish. Both had an incense altar (or altars) in the entry to the *d^{e}ḇîr* and additional rooms off the courtyard and temple. The Lachish structure was probably a Jewish shrine with a conventional design built by Jewish residents (perhaps returnees from the Exile; cf. Neh. 11:30). The Deuteronomic limitation of a single center of worship (at Jerusalem?) would presumably not have been violated, since this region was now under Edomite (Idumean) control (cf. the Jewish temple at Elephantine and the Onias temple [mentioned by Josephus *BJ* vii.10.2-4 (420-436); *Ant.* xiii.3.1-3 (62-73)] at Leontopolis, both in Egypt, as well as the Samaritan temple on Mt. Gerizim and the temple of the Tobiad Hyrcanus at 'Araq el-Amir in Transjordan).

During this period Marisa (Mareshah), 5.6 km. (3.5 mi.) northeast, replaced Lachish as the district's administrative center. During the Maccabean wars Lachish was destroyed for the last time (*ca.* 150 B.C.). Since the establishment of the state of Israel, the ancient site has been surrounded by the agricultural activities of Moshav Lachish.

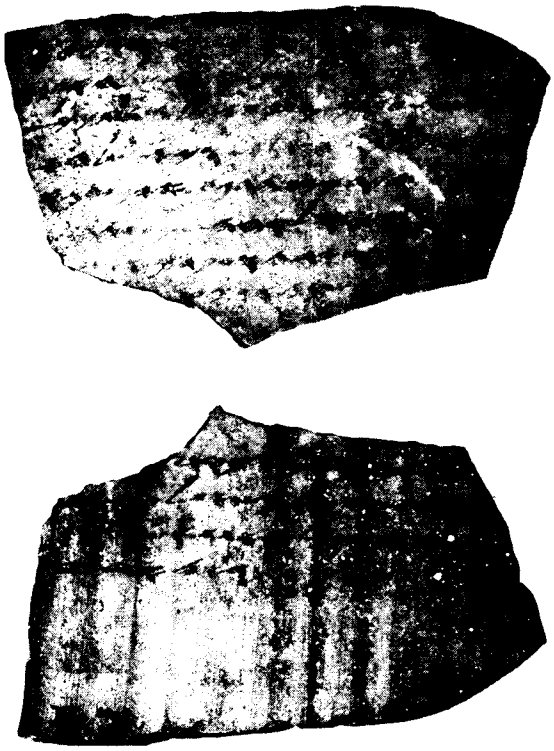
V. R. GOLD K. N. SCHOVILLE

LACHISH lā'kish LETTERS. A corpus of twenty-one inscribed ostraca discovered at Tell ed-Duweir, which is generally identified with biblical Lachish. The first eighteen were discovered in 1935 in a small room under the gate tower, and the remaining three in 1938 in various locations. With the exceptions of nos. 1 and 19 (lists of names) and

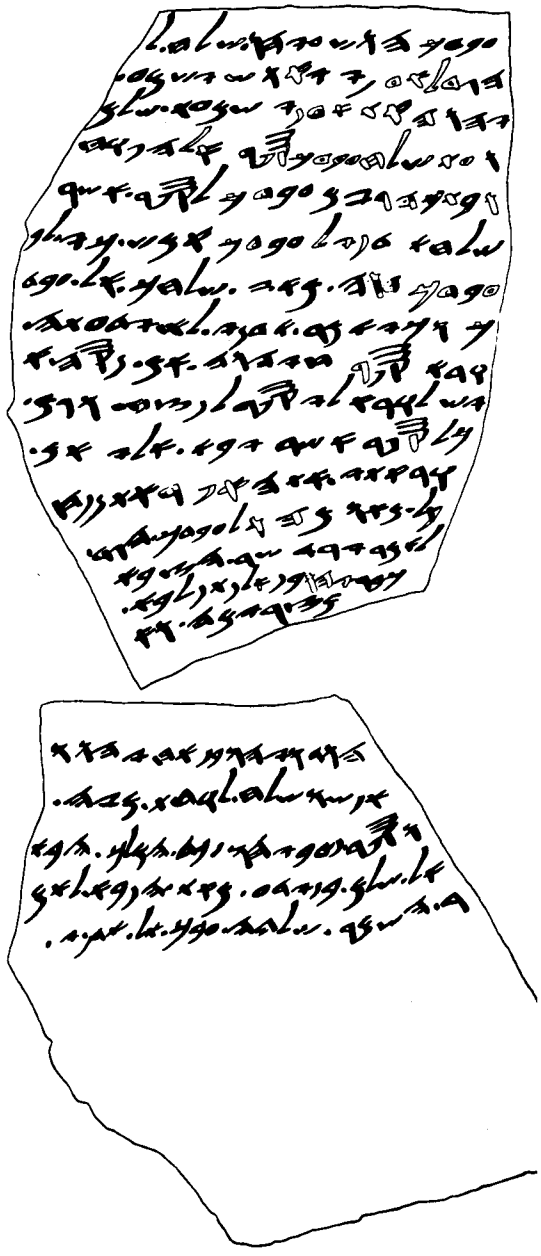
LACHISH LETTERS

no. 20 (a docket), they all appear to be letters. Only about a third are reasonably legible. The first eighteen are dated 597-587 B.C., perhaps more narrowly to 589-588. The latter three are short, fragmentary, and of uncertain date. Four of the letters (nos. 3, 4, 6, 19) are at the Palestine Museum in Jerusalem; the remaining seventeen are in London — two (nos. 20, 21) at the Institute of Archaeology, University of London, and fifteen (nos. 1, 2, 5, 7-18) at the British Museum. The letters are of special linguistic, orthographic, and historical importance.



I. Linguistic Importance.–The language of the letters is identical in all essentials to the classical Hebrew prose of the OT. Some phonological characteristics of southern Hebrew (e.g., diphthongs are usually not contracted) are preserved (see Gibson, p. 36). The tetragrammaton (*YHWH*) occurs frequently (it is amply attested two centuries earlier at Kuntillet ʿAjrūd; see Z. Meshel, *Biblical Archaeology Review*, 5/2 [1979], 24-34). Also frequent are names ending in *-yāhû*, which are typical of the time of Jeremiah. Of interest are the extrabiblical occurrences (in letters 3 and 16) of the Hebrew word for prophet (*nāḇî'*; see below). Further, the letters are important witnesses to classical Hebrew epistolary style (see Pardee).

II. Orthographic Importance.–The letters are written in the Paleo-Hebrew (Canaanite) alphabet. It was gradually replaced after the Babylonian Exile by an Aramaic script, from which the later "Hebrew" alphabet derives (see J. P. Siegal, *Biblical Archaeology Review*, 5/3 [1979], 28-33). The style is basically cursive with frequent ligatures (see Gibson, p. 33). The irregular use of a space or a dot as word divider and the practice of splitting words at the ends of lines suggest how some kinds of textual errors in the Hebrew Bible may have arisen. Occasionally *w* and *y* are used as internal vowel letters. Although several scribal hands are in evidence, the script is basically the same throughout.



III. Historical Importance.–The letters provide firsthand documentation of the tense military and political situation in Judah shortly before the Babylonian victory of 587 B.C. In them a certain Hoshaiah (*hôšaʿyāhû*), a subordinate in charge of a garrison between Lachish and Jerusalem, writes to Yoash (*yāʾûš*), his commander in Lachish (note that both names include the divine element *ya-*).

Most interesting are nos. 3, 4, and 6. Letter 4 attests the use of fire signals for communication: "Let my lord know that we are watching for the signals [*maśʾōṯ*] of

Lachish Letter IV, which mentions the fire-signals from Lachish (line 10) (Israel Department of Antiquities and Museums)

Lachish Letter III mentions *YHWH* (line 9) and "the prophet" (line 20), the first extrabiblical reference to a *nb'* to be discovered (Israel Department of Antiquities and Museums)

Lachish . . . we cannot see Azekah" (*ANET*, p. 322); a similar use of *maś'ēṯ* occurs in Jer. 6:1 and possibly in Jgs. 20:38, 40. Jer. 34:7 tells that Lachish and Azekah were the last of the fortified Judean cities to fall. Letter 6 refers to certain persons in Jerusalem discouraging (lit. "weakening the hands of") the soldiers (presumably). A similar accusation in the same idiom was brought against Jeremiah (38:4; cf. 27:12-16). Some scholars (e.g., Albright, *ANET*, p. 322) have attributed this discouragement to the activity of princes; others (e.g., Gibson, pp. 35f.) have attributed it to "the prophet." Unfortunately, the letter is poorly preserved, and nothing can be affirmed with certainty.

Letter 3 clearly mentions a prophet (*nāḇî'*) who was entrusted with delivering a letter from one of the king's servants. Letter 16 also mentions "the prophet," preceded immediately by the syllable *hû*. Some scholars have sought to identify this prophetic figure with Uriah (*'urîyāhû*; Jer. 26:20-23) or even with Jeremiah (*yirmᵉyāhû*) himself. Although these suggestions are tempting, names ending with *-yāhû* were very common at this time, and the contexts are too broken; again, no firm conclusions can be drawn.

LADDER [Heb. *sullām* < *sālal*–'cast up, build' (Gen. 28:12)].

In the Near East ladders were made of wood, metal, and rope. In Mesopotamia, ladders were used in the 3rd millennium B.C. for constructing buildings and gaining access to the fruit on tall trees. Reliefs from Egypt and Mesopotamia illustrate the value of scaling-ladders when cities were being besieged, the earliest military use of ladders appearing in a limestone relief from Upper Egypt (24th cent. B.C.). Such ladders are not mentioned in Scripture, but are referred to in 1 Macc. 5:30.

The Hebrew term could also refer to stone steps on the exterior of a house leading to the roof and these seem to be implied in Gen. 28:12. Their appearance in Jacob's vision may have been prompted by the steplike configuration of the rocky strata which Jacob viewed at Bethel just before falling asleep. If this is true, "stairway" would be a better rendering of *sullām* than "ladder."

A similar geological structure most probably led to the designation of the narrow coastal strip some 17 km. (11 mi.) N of Ptolemais as the "LADDER OF TYRE."

Tell Ḥalâf relief showing a man using a ladder to scale a palm tree (Trustees of the British Museum)

LADDER OF TYRE [Gk. *klímax Tyrou*] (1 Macc. 11:59). A landmark mentioned in the Apocrypha. Antiochus VI put Simon Maccabeus in charge of the territory "from the Ladder of Tyre to the border of Egypt." Josephus, in commenting on this passage, located the Ladder of Tyre 100 stadia (19 km. [12 mi.]) N of Acre. He described it as the highest mountain of Galilee and Carmel, which is improbable, since Mt. Carmel is 550 m. (1800 ft.) in altitude and the highest point of the ridge overlooking the plain of Acre is only 300 m. (1000 ft.) high.

The most likely identification is with the first of the promontories at the north end of the plain of Acre, called Râs Musheirefeh. Rising sharply to a height of 90 m. (300 ft.), this ridge appears to form distinct steps down into the sea when viewed from the south. Two similar capes, likewise candidates for the historic Ladder of Tyre, are Râs en-Nakurah, only 1.6 km. (1 mi.) N of Râs Musheirefeh, and Râs el-'Abyadh, 10 km. (6 mi.) up the coast in the direction of Tyre. The latter cape is known to have featured man-carved steps in its steep ascent, suggesting a possible origin of the title Ladder of Tyre.

Simons attributed the name to the entire line of jutting promontories S of Tyre. "More exactly the name refers to the narrow, partly man-made passage between the sea and ǧebel el-mushaqqaḥ, from rās en-nāqūrah to rās el-abjaḏ" (*GTTOT*, p. 416). A. H. LEWIS

LADE; LADING (Gen. 42:26; 45:17; Neh. 13:15; etc., AV); **LADEN.** *See* LOAD.

LADY [Heb. *śārâ* (Jgs. 5:29; Est. 1:18), *yᵉqārôṯ* (fem.)–lit. 'precious, honored (ones)' (Ps. 45:9 [MT 10]; *see also* HONOR); Gk. *kyría* (2 Jn. 1, 5)]. In 2 Jn. 1, 5, *kyría* probably denotes a local church rather than an individual (see comms. by R. Bultmann [Eng. tr. *Hermeneia*, 1973], pp. 107f.; I. H. Marshall [*NICNT*, 1978], p. 60).

See also ELECT LADY; JOHN, EPISTLES OF IV.

LAEL lā'əl [Heb. *lā'ēl*–'belonging to God']. Father of Eliasaph, the prince of the fathers' house of the Gershonites (Nu. 3:24).

LAHAD lā'had [Heb. *lāhaḏ*–possibly 'slow, tardy'; cf. Arab. *lahdun* (*IP,* p. 227)]. A descendant of Judah (1 Ch. 4:2).

LAHAI-ROI lə-hī'roi [Heb. *laḥay rō'î*]. *See* BEER-LAHAI-ROI.

LAHMAM lä'məm [Heb. *laḥmās,* but many MSS *laḥmām*]; NEB LAHMAS. A city of Judah, located in the Shephelah (Josh. 15:40). The LXX reads *Maches* (B) or *Lamas* (A); the Targ. reads *lḥmm* and the Vulg. *Leheman.*It has been identified with Khirbet el-Laḥm, 20 km. (13 mi.) WNW of Hebron and 4 km. (2.5 mi.) S of Beit Jibrîn. W. S. L. S.

LAHMAS lä'məs (Josh. 15:40, NEB). *See* LAHMAM.

LAHMI lä'mī [Heb. *laḥmî*]. According to 1 Ch. 20:5, the brother of Goliath of Gath. *See* EL-HANAN **1.**

LAIR [Heb. *'ereḇ*–'hiding place' (Job. 37:8), *māʿôn* (Jer. 9:11 [MT 10]; 10:22), *marbēṣ*–'resting place' (Zeph. 2:15)]; AV DEN, "place to lie down"; NEB also HAUNT. The lairs of wild animals would naturally have been distant from populated areas. The jackal especially liked dry and deserted places. *See also* CAVE. G. WYPER

LAISH lā'ish [Heb. *layiš*]. A Benjaminite, father of the Palti or Paltiel to whom Saul gave his daughter Michal, who had been David's wife (1 S. 25:44; 2 S. 3:15).

LAISH lā'ish [Heb. *layiš*]. A city in the upper Jordan Valley, later called DAN (Jgs. 18:27, 29). It is called LESHEM in Josh. 19:47. Dan was situated near one of the copious springs at the base of Mt. Hermon that becomes Nahr el-Leddan, a tributary of the Jordan River.

For this name in the AV and NEB of Isa. 10:30, *see* LAISHAH. W. S. L. S.

LAISHAH lā'ə-shə [Heb. *layšâ*]. A village near Jerusalem mentioned in Isaiah's prophecy of the Assyrian advance on Jerusalem (Isa. 10:30). The LXX reading, *Laisa,* accounts for the AV and NEB "Laish." The context indicates a site near Anathoth (Anâtâ), 5 km. (3 mi.) NE of Jerusalem. If the tentative identification of Laishah with Khirbet el-ʿIsāwîyeh 2 km. (1.2 mi.) SW of ʿAnâtâ is correct, it is another example of the detaching of an initial *l* to form an article in the Arabic name (cf. el-ʿAzarîyeh from Lazarus, modern Bethany). Cf. *GTTOT,* § 1588, p. 482. W. S. L. S.

LAKE. The OT has no specific word for lake. The Heb. *yām* is generally used of oceans and divided bodies of salt water, e.g., the Mediterranean Sea and the Red Sea. But it is also applied to inland bodies of water, e.g., the freshwater lake known as the Sea of Galilee (*yām kinneret,* Nu. 34:11), and saltwater lakes like the Dead Sea (*yām hammelaḥ,* Gen. 14:3), as well as mighty rivers like the Nile (Nah. 3:8) and Euphrates (Jer. 51:36).

In the NT Gk. *thálassa* and *límnē* designate lakes (though the RSV thus renders only *límnē*). *Thálassa* is employed like Heb. *yām* to indicate the Mediterranean Sea (Acts 10:6), the Red Sea (7:36), and the Lake of Galilee (Mt. 4:18). *Límnē* (<*leibō,* "pour, pour out") is used of the Lake of Gennesaret (Lk. 5:1, etc.) and the LAKE OF FIRE and brimstone (Rev. 19:20, etc.). S. HIGUCHI

LAKE GENNESARET. *See* GALILEE, SEA OF.

LAKE OF FIRE [Gk. *límnē toú pyrós*] (Rev. 19:20; 20:10, 14f.). The place of final torment, usually equated with GEHENNA. Here are thrown the "beast" and false prophet (Rev. 19:20) and later the devil, to "be tormented day and night for ever and ever" (20:10). After the judgment of the "great white throne" the personified Death and Hades are also thrown in, along with anyone whose "name was not found written in the book of life" (20:14f.; cf. 21:8). The lake of fire is called the second death (20:14; 21:8), apparently referring to the ultimate separation from God or spiritual death (*see* DEATH, SECOND).

The specific background of the "lake of fire" is obscure. The Egyptian lake of fire (cf., e.g., *Book of the Dead* 17:40f.; 71:18; 110:19; also J. Zandee, *Death as an Enemy* [1960], pp. 133-146) is too remote to be of direct relevance. (For other ancient Near Eastern background see *TDOT,* I, *s.v.* "'ēsh" [Krecher, Hamp].) The Apocalypse of Zephaniah mentions a lake of fire, but this is a post-Christian work no doubt influenced by the book of Revelation (*see* ZEPHANIAH, APOCALYPSE OF). The closest parallel is the "fiery abyss" of 1 En. 90:25, which according to P. Katz (*TDNT,* VI, 938 n. 51) presupposes a Greek expression very much like that of Revelation.

General background, however, is plentiful. In all the texts of Revelation that mention the lake of fire, "sulphur" (Gk. *theíon*) is added to the description, and this combination is fairly common, probably originating with the story of the destruction of Sodom and Gomorrah (Gen. 19:24; 3 Macc. 2:5; 1 Clem. 11:1; cf. Dt. 29:23 [LXX 22]; Job 18:15; Isa. 34:9). Here God rained brimstone and fire on Sodom and Gomorrah; thus the imagery of water ("rain") is joined with fire (cf. also Ps. 11 [LXX 10]:6; Ezk. 38:22). Similarly, "streams" of brimstone (and fire) are mentioned in contexts of judgment in both the OT (Isa. 30:33) and the intertestamental period (1 En. 67:7).

For a theory about the development of the meaning of the lake of fire, see R. H. Charles, comm. on Revelation (*ICC,* 1920), I, 239-242; cf. G. R. Beasley-Murray, *Revelation* (*New Century Bible Comm.,* 1974; repr. 1981), pp. 303f. G. A. L.

LAKKUM lak'əm [Heb. *laqqûm*]. A town on the border of Naphtali, the last mentioned before the Jordan (Josh. 19:33). It still existed in the time of Rabbi Yosi ben Ḥaninah (*ca.* A.D. 100) and was known as Luqim (T.P. *Megillah* i.1). The site has been tentatively identified as Khirbet el-Manṣûrah, 17 km. (10.5 mi.) NW of the city of Tiberias, but this location seems too far from the Jordan. W. S. L. S.

LAMB [Heb. *keḇeś* and (by metathesis) *keśeḇ*] AV also SHEEP (Gen. 30:35); NEB also RAM, YOUNG RAM, SHEEP; [*kiḇśâ* and (by metathesis) *kiśbeh*] NEB also EWE; [*śeh*] AV also SHEEP (Gen. 30:32); NEB also SHEEP, RAM, YOUNG BEAST (Gen. 22:7f.), YOUNG ANIMAL (Lev. 5:7); [*kar*] NEB also SHEEP (Ezk. 39:18); [*ṭāleh*] (1 S. 7:9; Isa. 40:11; 65:25); [*'immēr*]; [*ben-ṣō'n*] NEB YOUNG SHEEP; [*ṣō'n*] NEB SHEEP; [*pesaḥ*] AV PASSOVER; NEB also PASSOVER, PASSOVER VICTIM; [Gk. *amnós*] AV and NEB also PASSOVER (1 Cor. 5:7); [*arnίon*]; [*arēn*]; [*páscha*] AV also PASSOVER; NEB also PASSOVER VICTIM.

The most frequently used Hebrew term translated "lamb" is *keḇeś* (fem. *kiḇśâ*); it is the common term used in sacrificial contexts. The RSV often distinguishes the masculine and feminine forms by translating *keḇeś* as "male lamb" (AV "he lamb," NEB "ram") and *kiḇśâ* as "ewe lamb." In sacrificial contexts male animals are usually specified. Ordinarily in other nations female animals were sacrificed to goddesses and male animals to gods. In Israel, however, male animals were more valuable for sacrifice because

of Israel's male-oriented monotheism. Only rarely were female animals used (Lev. 5:6; 14:10; etc.).

The other Hebrew terms occur infrequently or are also used with other meanings. The term *śeh* refers to one of the flock, either a sheep or a goat, depending on context. Similarly, *ṣō'n* is a term for small cattle in general, either sheep or goats. The term *pesaḥ* usually means "Passover," but occasionally the RSV translates it "Passover lamb."

In ancient Israel the lamb and sheep were the principal animals of sacrifice. Thus the term "lamb" usually occurs in sacrificial contexts. A lamb was to be offered every morning and evening (Ex. 29:38-42). Two additional lambs were sacrificed every sabbath day (Nu. 28:9f.). Lambs were used for the sin offering (Lev. 4:32), for purification and cleansing (Lev. 12:6; 14:10) and for the dedication of an altar (Nu. 7:15). The lamb was also sacrificed on days of special religious significance: at the beginning of each new month (22:11), at the Feast of Pentecost (28:26ff.), the Feast of Trumpets (29:1f.), the Day of Atonement (vv. 7f.), the Feast of Tabernacles (vv. 12-16), and especially on each of the days of the Passover (28:16-19). The age of the lamb to be sacrificed is often given as one year; any animal, however, was suitable after the seventh day of its life (Lev. 22:26f.). All lambs (and other animals) to be sacrificed had to be without BLEMISH (Lev. 22:19-25).

Outside sacrificial contexts the lamb is less frequently mentioned. Lambs furnished wool for clothing (Prov. 27:26) and were required as tribute from the king of Moab (2 K. 3:4). The grazing of lambs and kids among the ruins describes the devastation of the land after the people have gone into exile (Isa. 5:17). The psalmist describes the mountains and hills skipping like rams and lambs when the extraordinary event of the Israelite exodus from Egypt occurred (Ps. 114:4, 6). More often the lamb is used to symbolize gentleness, innocence, and dependence. God is compared to the shepherd who gathers the lambs in his arms and carries them in his bosom (Isa. 40:11). After David's affair with Bathsheba, Nathan the prophet told a story of a little ewe lamb owned by a poor man who became an innocent victim of a rich man. Since by analogy Bathsheba was the lamb, the story may imply that she was the innocent victim of David's lust. The unusualness of a future age is described as a time when the wolf and lamb eat together (Isa. 65:25) or dwell together (Isa. 11:6). Jeremiah compares himself to a gentle lamb led to the slaughter in the face of plots to kill him (Jer. 11:19). In defeat Babylon will be brought down like lambs to the slaughter (Jer. 51:40). Most striking is the image of the Suffering Servant as a lamb and a sheep: "like a lamb that is led to the slaughter, and like a sheep that before its shearers is dumb, so he opened not his mouth" (Isa. 53:7b).

In the NT the terms usually refer to Christ and are always used in a figurative sense. The four occurrences of *amnós* compare Jesus to a lamb. As the lamb of God His death is efficacious (Jn. 1:29, 36), He is without blemish (1 Pet. 1:19), and He suffered patiently (Acts 8:32, where He is seen as the fulfillment of Isa. 53). (*See* LAMB OF GOD.) Jesus is referred to as the Passover lamb (*páscha*) in 1 Cor. 5:7 (cf. Mk. 14:12; Lk. 22:7). (See also *TDNT*, V, 900f.) The most frequently used term, *arníos*, occurs twenty-nine times — all but one in Revelation. The exact significance in Revelation is debated, though the term always refers to Christ and depicts Him as Redeemer and Ruler who ultimately delivers His people. In Jn. 21:15-17 the lamb represents the Christian community whom Peter is to "feed" and "tend." *Arḗn* appears only in Lk. 10:3, where the seventy are sent out as "lambs in the midst of wolves." The antithesis lambs/wolves stresses the defenseless and dangerous position of the disciples.

J. C. MOYER

LAMB OF GOD [Gk. *amnós toú theoú*] (Jn. 1:29, 36). This messianic title for Jesus appears only in John's account of the ministry of John the Baptist (in Revelation "the Lamb" is always simply *tó arníon*).

Twice John the Baptist called attention to Jesus with the words, "Behold, the Lamb of God!" (Jn. 1:29, 36, adding, in v. 29, "who takes away the sin of the world"). Because the context is so limited and the OT background a bit unclear, the passage has been variously interpreted. The most obvious place to search for the meaning of the term is in connection with the sacrifice of the paschal lamb. Jn. 19:14 emphasized that Jesus was crucified at the very hour that these lambs were being slaughtered for the Passover. In addition, Jesus was called "our passover" in 1 Cor. 5:7. But most scholars consider this background insufficient because there is no connection between the sacrifice of the paschal lambs and John the Baptist's emphasis on the forgiveness of sin. Some authorities, notably A. Schlatter (*Der Evangelist Johannes* [1960], p. 46), have attempted to link the offering of the paschal lambs and the regular Jewish sacrificial offering (Heb. *tāmîḏ*) to explain how the Lamb of God could take away the sin of the world.

C. H. Dodd explained the title "Lamb of God" in terms of the apocalyptic lamb of the book of Revelation who was sacrificed for the redemption of mankind and became the shepherd of His people (5:6-12; 7:14-17; 14:1-5; 17:14; 22:1-5). Although the book unites the redeemer and the apocalyptic leader of the people, the propriety of extending this union into the Gospel of John is questionable. The Gospel uses another related figure — that of the "Good Shepherd" — to express the role of Christ as eschatological leader of His people (Jn. 10:1-18).

Most often the solution to the problem has been found in the Suffering Servant of Isa. 53, who is likened to a lamb (v. 7) and bears the sins of many (v. 12). The only other passages where *amnós* is used in the NT refer to this passage; in Acts 8:32 Philip uses Isa. 53:7 to proclaim Jesus and 1 Pet. 1:19 echoes the terminology of Isaiah in comparing Jesus' sacrifice to that of "a lamb without spot and blemish." The patristic citations in 1 Clem. 16:7 and Barn. 5:2 show that the early Church understood the Lamb of God as the Suffering Servant.

C. J. Ball (*Expos.T.*, 21 [1909/10], 92ff.) and C. F. Burney (pp. 107f.) observed that *amnós toú theoú* might be a translation of the Aram. *talyā' dĕ'lāhā'*, which could mean both "Lamb of God" and "servant of God." J. Jeremias asserted that this is an example of the double meanings used by the author of the Fourth Gospel. Jeremias built his case around the Gk. *país*, which the LXX used instead of *doúlos* to designate the Suffering Servant. *País* may mean "son" or "servant." The most primitive Christologies refer to Jesus as *país* (Acts 3:13, 26; 4:27, 30). This word is used for the Suffering Servant in Mt. 12:18 in a quotation from a servant song (Isa. 42:1). The transition from one double-meaning term, *talyā'*, to another double-meaning term, *país*, was natural.

With this understanding of the Lamb of God as the servant of God, the Evangelist emphasized the messianic role of Jesus' life and ministry from the very beginning. From the time of His baptism Jesus must have been conscious of His role as the Suffering Servant of Yahweh. Thus early in his Gospel (Jn. 1:51) John contrasted Jesus' role as the Lamb of God who suffers to His role as the glorified Son of Man.

The substitutionary atonement became an important part of the role of the Lamb of God. As the Suffering

Servant of Isaiah bore the sins of many (Isa. 53:12), so the Lamb of God takes away the sin of the world (Gk. *aírōn tḗn hamartían*). O. Cullmann showed that the idea of vicarious suffering was connected with the Suffering Servant and was a common theme in Judaism. John emphasized the vicarious suffering of Jesus also in terms of the Good Shepherd who lays down his life for many (Jn. 10:15, 18). In this way the Lamb of God reestablished the covenant between His people and God.

LAME [Heb. *pissē(a)ḥ*] (Lev. 21:18; Dt. 15:21; 2 S. 5:6, 8; 9:13; 19:26 [MT 27]; Job 29:15; Prov. 26:7; Isa. 33:23; 35:6; Jer. 31:8; Mal. 1:8, 13); NEB also CRIPPLED; [niphal of *pāsaḥ*] (2 S. 4:4); [qal fem. part. of *ṣālaʿ*] (Mic. 4:6f.; Zeph. 3:19); AV HALT; NEB LOST; [Gk. *chōlós*] (Mt. 11:5; 15:30f.; 18:8; Lk. 7:22; Acts 3:2; etc.); AV also HALT; NEB also CRIPPLE, DISABLED.

The condition that prevents or impedes walking was common in biblical times. Lameness was one of the bodily imperfections that prohibited a man from becoming a priest (Lev. 21:18) and made an animal unacceptable to Yahweh as a sacrificial victim (Dt. 15:21; Mal. 1:8, 13; cf. Lev. 22:9; Nu. 6:4; Dt. 17:1; etc.).

Jonathan's son Mephibosheth (Meribbaal) became lame because his nurse dropped him (2 S. 4:4; cf. 9:13; 19:26). Knowledge about how widespread this condition was in Israel is uncertain due to lack of data, but 5:6, 8 might imply that in the early years of the monarchy some of the Jebusites who inhabited Jerusalem were blind and lame, for they boasted that even the blind and lame could successfully defend the city against its enemies.

Egyptian stele *ca.* 1200 B.C. showing a deformed right leg, perhaps due to infantile paralysis (Wellcome Institute library, London)

Job recalled his former state of blessedness in which he was praised for being as "eyes to the blind and feet to the lame" (Job 29:15). A proverb in the mouth of fools was said to be as useful as "a lame man's legs" (Prov. 26:7).

In visions of the future, the lame and outcasts are gathered with the rest of the remnant (Jer. 31:8), no longer shamed but praised in the earth (Zeph. 3:19) and subjects of the rule of the Lord (Mic. 4:6f.). The lame will illustrate how easily abundant spoils can be taken (Isa. 33:23), and their "leaping like a hart" provides a picture of the happy conditions of the new age (35:6).

The NT shows that healing the lame was a part of Jesus' therapeutic activity (Mt. 15:30f.; 21:14; Jn. 5:3). When John the Baptist's messengers asked, "Are you he who is to come?" (Mt. 11:3; Lk. 7:19), Jesus pointed to his healings of the blind, lame, and deaf to show that the kingdom of God had arrived (cf. Isa. 35:5ff.; 29:18ff.; 61:1ff.; see Cullmann, p. 194). These characteristics of His ministry are all "age-old phrases in the east for the time of salvation, when there will be no more sorrow, no more crying and no more grief. Thus in Luke 7.22f. we have an eschatological cry of joy uttered by Jesus" (Jeremias, p. 104). His kingdom is to be so desirable for His disciples that they must be willing to enter its life "maimed or lame" rather than face judgment (Mt. 18:8f.; Mk. 9:45). The "beggars" — including the lame — are brought in to enjoy God's great kingdom feast when the respectable righteous reject the invitation (Lk. 14:13, 21).

In Acts 3:2 Peter healed a man "lame from birth" at the Beautiful Gate of the temple; Philip also healed the paralyzed and lame in the city of Samaria (8:7). In He. 12:13 the author used an athletic figure of speech, urging his readers to "make straight paths for your feet, so that what is lame may not be put out of joint, but rather be healed" (cf. Prov. 4:26). Here the "lame" are those who are "spiritually lame" or "religiously weak." They would be the same group of people called the "little ones" (Mt. 10:42; 18:6, 10, 14) who might "stumble" (Buchanan, p. 215), and "who might be prevented from continuing their course if they were tripped up and permanently disabled" (Bruce, p. 363; cf. Isa. 35:3ff.). Believers should walk carefully themselves so that they do not mislead others and should "heal" the weak feet of the religiously insecure that are "out of joint" so that "the whole community may complete the course without loss" (Bruce, p. 364).

D. K. McKIM

LAMECH lā′mek, lā′mək [Heb. *lemeḵ*; Gk. *Lamech*].

1. Son of Methushael and one of the descendants of Cain (Gen. 4:18-24). He was the father of Jabel, Jubal, Tubal-cain, and Naamah. As the husband of two wives, Adah and Zillah, he furnishes the first recorded instance of polygamy.

The brief refrain in Gen. 4:23f. has been described as a "sword song" that magnifies and justifies the weapons of slaughter made by Tubal-cain because they furnish the warrior with superior strength. The poem is structurally of great interest, particularly if it can be dated in the 3rd millennium B.C., because it is an early example of Hebrew poetry in complete parallelism (S. Gevirtz, *Patterns in the Early Poetry of Israel* [1963], pp. 25-34).

2. Son of Methuselah and father of Noah (Gen. 5:25, 28f.; cf. 1 Ch. 1:3; Lk. 3:36). His words (Gen. 5:29) show

the great difference between this descendant of Seth and Lamech the descendant of Cain. The latter was stimulated to a song of defiance by the worldly inventions of his sons; the former, in prophetic mood, expressed his sure belief in the period of comfort and rest that his son Noah would usher in, and he calmly and prayerfully awaited it.

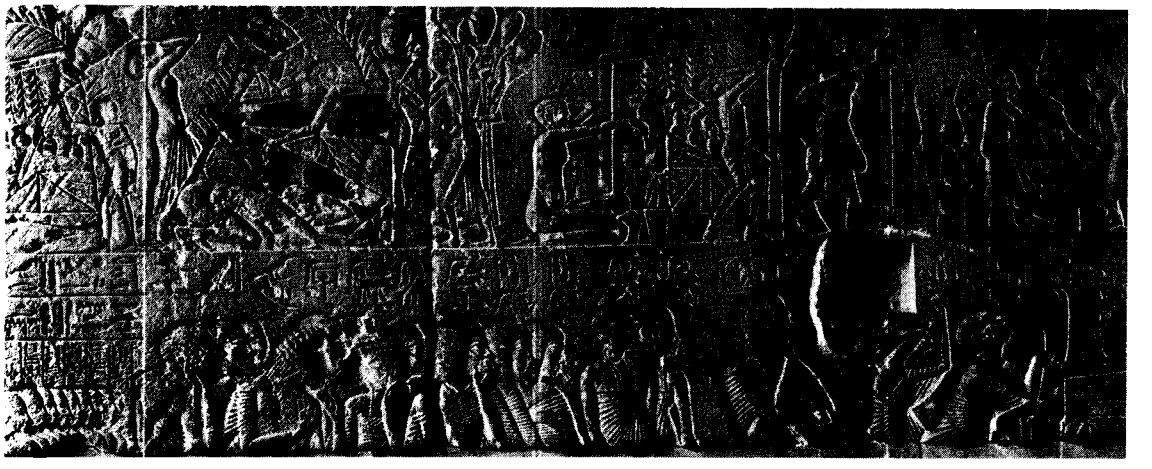
The Genesis Apocryphon (1QapGen), in its Haggadic expansion of Gen. 5:28f., notes how Lamech father of Noah followed the spiritual traditions of Methuselah and Seth. According to this Qumrân scroll, Lamech had some doubt about the paternity of Noah but was ultimately reassured by his wife Bath-Enosh and also by Enoch (J. A. Fitzmyer, *Genesis Apocryphon of Qumran Cave I* [rev. ed. 1971], pp. 77-98).

Adherents of the Graf-Wellhausen hypothesis regard the Cainite Lamech of Gen. 4 and the Sethite Lamech of Gen. 5 as identical, having originated from one tradition. This view seems improbable, however, since the other names in the two lists (4:18-24; 5:25-31) differ so radically as to indicate that two different families are being described. *See also* ANTEDILUVIAN PATRIARCHS II.

W. BAUR R. K. H.

LAMED lä'med [ל]. The twelfth letter of the Hebrew alphabet, transliterated in this encyclopedia as *l*. It also came to be used for the number thirty. *See* WRITING.

LAMENT; LAMENTATION [Heb. *sāpaḏ* (Gen. 50:10; 2 S. 11:26; Jer. 4:8 etc.), *mispēḏ* (Gen. 50:10; Est. 4:3; Jer. 6:26; 48:38; Mic. 1:8), *qîn* (only polel; 2. S. 1:17; 3:33; 2 Ch. 35:25; Ezk. 27:32), *qînâ* (2 S. 1:17; 2 Ch. 35:25; Jer. 7:29), *nᵉhi* (Jer. 9:20 [MT 19]; 31:15; Am. 5:16; Mic. 2:4), *nāhâ* (1 S. 7:2), *ʾāḇal* (Isa. 19:8; Lam. 2:8), *ʾāḇel* (Ps. 35:14), *bāḵâ* (Job 27:15; Ps. 78:64), *ʾᵃnîyâ* (Isa. 29:2; Lam. 2:5), *zᵉʿâqâ* (Est. 9:31), *tānâ* (Jgs. 11:40), *ʾānâ* (Isa. 3:26), *qāḏar* (Jer. 14:2), *ʾālâ* (Joel 1:8); Gk. *thrēnéō* (Lk. 23:27; Jn. 16:20), *thrḗnos* (Mt. 2:18), *kopetós* (Acts 8:2)]; AV also WAIL, WAILING, MOURN, WEEP, SORROW (Isa. 29:2), CRY (Est. 9:31), etc.; NEB also GROAN, HOWL (Mic. 1:8), MOURN, "beat the breast," "chant a dirge," etc. In Isa 43:14 the RSV and NEB emend MT *ʾᵃnîyôṯ* (lit. "ships"; cf. AV) to *ʾᵃnîyôṯ*. In Nah. 2:7 (MT 8), RSV "lamenting" renders MT *mᵉnahᵃgôṯ*, the piel pl. part. of *nāhag*; the RSV, AV ("shall lead her"), and NEB ("are carried off") translations represent differing attempts to render a difficult and possibly corrupt text.



The biblical terms have various nuances. The verb *sāpaḏ* originally referred to "beating the breast" as a sign of mourning (cf. KoB, p. 663). *Qāḏar*, originally "be dark" (cf. AV), can mean "be dirty, unattended, in mourning attire" (KoB, p. 824); it refers to the somber color of mourning garb and/or to the dust and dirt gathered from rolling on the ground. *Qînâ* is a technical term for a type of musical composition, a dirge. Gk. *kopetós*, like *sāpaḏ*, denotes mourning accompanied by breastbeating (Bauer, rev., p. 443); *thrḗnos* signifies a dirge.

Lamentation was an integral part of ancient Semitic life. Death, calamity, devastation by war, consciousness of sin, and intense sickness brought great sorrow. People mourning over these things wore sackcloth (a coarse material) next to their skin, removed their shoes, covered their heads, and possibly veiled their faces. They did not wash or apply ointments and perfumes (2 S. 14:2). They often put earth on their heads, rolled in the dust (Mic. 1:10; cf. Jer. 14:2), and sat on a heap of ashes (Ezk. 27:30). Mourners sometimes shaved their beards and hair. Cutting and lacerating the body, however, was strictly forbidden (Lev. 19:28). Fasting also accompanied mourning; some fasted for seven days (Gen. 50:10). People lamented by loudly and bitterly weeping and beating their breast. They repeated the sharp, shrill cry "Alas! alas!" (Am. 5:16; cf. Jer. 22:18). Professional mourners heightened the atmosphere of grief (Am. 5:16); they chanted a dirge that had a special rhythm (*qînâ*).

The king led at any occasion requiring national lamentation. David mourned the death of Saul and composed a lament for him (2 S. 1:17-27). Later he lamented the death of Abner (3:33f.).

Some prophets were skilled at composing laments, the most famous of whom was Jeremiah. He composed a lament sung at the death of Josiah (2 Ch. 35:25); some scholars have attributed the book of Lamentations, mourning the destruction of Jerusalem, to him (*see* LAMENTATIONS II). Ezekiel at the outset of his ministry was to eat a book filled with dirges, laments, and woes (Ezk. 2:10, NEB); this act would indicate that he too was to prophesy devastation and destruction. When prophets proclaimed a message of destruction, they often were so certain of the fulfillment of the word of the Lord that

Lamentation scene from Memphis (ca. 13th cent. B.C.). Behind the widow (extreme upper right) servants prepare for the funeral. Behind the coffin (lower right) two sons are followed by Haremhab (the future king), two viziers, and other mourners (Bildarchiv Foto Marburg)

they lamented the future destruction as an integral part of their message; thus they attempted to convey the certainty and relevance of the coming horror to the people. Micah, feeling the impact of his message, cried out, "For this I will lament and wail; I will go stripped and naked; I will make lamentation like the jackals, and mourning like the ostriches" (Mic. 1:8). Am. 5 begins: "Hear this word which I take up over you in lamentation, O house of Israel." Ezekiel in similar fashion composed lamentations over the princes of Israel (Ezk. 19) and over Tyre (26:17f.; 27).

People lamented an anticipated calamity, no doubt because they dreaded its coming, but also because they hoped to move God to divert it. The Jews during the time of Queen Esther knew about the planned genocide; therefore they turned to God in fasting and lamentation (Est. 4:3). Their contrition provided a basis for God to work out their deliverance.

Both the crucifixion of Jesus and the martyrdom of Stephen produced great lamentation (Lk. 23:27; Acts 8:2). On the other hand, Jesus taught that his followers would lament while the world rejoiced, but their lamentation would be turned to joy (Jn. 16:20).

LAMENTATIONS lam'ən-tā'shənz. A relatively short book of the OT that mourns the destruction of Jerusalem, 586 B.C. In Jewish synagogues the book is read annually on the 9th of Ab (July/August) in commemoration of this event.

I. Name and Canonical Position
II. Authorship
III. Structure and Meter
IV. Literary Form
V. Theology

I. Name and Canonical Position.–In Hebrew Bibles the book generally bears the title *'ēḳâ* (translated "How!" or "Ah, how!"), the opening lament formula of chs. 1, 2, and 4. The rabbinic designation, however, was *qînôṯ*, meaning "dirges" or "laments" (T.B. *Baba Bathra* 14b; cf. also Jerome's *Prologus Galaetus*). The Greek translation of this word, *Thrēnoi*, became the title of the book in the LXX, later rendered into Latin as *Lamentationes*, from whence it was an easy step to the Eng. *Lamentations*.

In the standard twenty-four book Hebrew canon, Lamentations constitutes one of the Five Megilloth or Scrolls found in the section of the Writings. The conventional position of Lamentations within the Megilloth is third (following Canticles and Ruth), an arrangement based on the order in which the scrolls are read in the Ashkenazi (Eastern European) liturgical calendar. In some sources, however, including the Aleppo and Leningrad MSS (hence also *BH*), the Megilloth are arranged chronologically according to the presumed date of composition, whence Lamentations appears in the fourth position, following Ruth, Canticles, and Ecclesiastes. In the canon of twenty-two books referred to by Josephus (*CAp* i.8 [38]),Lamentations was probably associated with the book of Jeremiah. This connection with the book of Jeremiah is made explicit in the LXX canon, where Lamentations normally follows the books of Jeremiah and Baruch respectively; the association with Jeremiah is further strengthened in the Vulg., where the order of Baruch and Lamentations is reversed, the latter becoming practically an appendix to the text of Jeremiah. Modern Protestant Bibles normally give Lamentations independent status, but perpetuate the tradition of placing it immediately after Jeremiah.

II. Authorship.–The position of the book in the different OT canons relates directly to the question of authorship, for though in the Hebrew canon the book is both anonymous and placed in a section different from that of Jeremiah, in the LXX and Christian canons not only is it placed immediately next to Jeremiah but it is also explicitly attributed to the prophet. This attribution is communicated in the titles given to the book (while some Greek and Latin MSS simply have the title "Lamentations," many have the fuller title "Lamentations of Jeremiah"), but especially in the prologue to the book. In the LXX the text proper of Lamentations is introduced by the words, "And it came to pass after Israel had been taken into captivity and Jerusalem laid waste, that Jeremiah sat weeping and uttered this lament over Jerusalem and said . . ." (to which the Vulg. adds the phrase "with a bitter spirit sighing and weeping"). Since the style of this prologue is Semitic rather than Greek, it may be presumed to antedate the translation, pushing the tradition of Jeremianic authorship even further back in antiquity.

Other ancient versions such as the Tg. and the Pesh. attest to the same tradition concerning Jeremianic authorship. Thus the Tg. on Lamentations begins, "Jeremiah the prophet and chief priest, said . . ." while the Pesh. has the title, "The book of lamentations of Jeremiah the prophet." Similarly, T.B. *Baba Bathra* 15a assigns Lamentations to Jeremiah while many rabbinic passages from Lamentations are introduced by the formula "Jeremiah said." The tradition was carried forward into Christian times by Church Fathers such as Origen and Jerome and incorporated into the title of the book in English versions such as the AV, RV, ASV, and RSV.

In spite of this long tradition, the consensus of modern biblical scholarship has been to reject the Jeremianic authorship of Lamentations. This rejection typically commences with an observation regarding the anonymity of the Hebrew text and proceeds on internal grounds to argue against Jeremiah's involvement in the composition of the book. A main line of argument in this connection has been the contention that ideas expressed in Lamentations often contradict those of Jeremiah. Thus questions such as the following are often asked: (1) Would Jeremiah, who prophesied the destruction of the temple, have written about the enemies of Judah as "those whom thou didst forbid to enter thy congregation" (1:10)? (2) Would Jeremiah, who perceived the Babylonians as God's agents of judgment, call down vengeance upon them (1:21)? (3) Would Jeremiah, a prophet, write, "her prophets obtain no vision from the Lord" (2:9)? (4) Would Jeremiah, who advised against foreign alliances, have lamented, "Our eyes failed, ever watching vainly for help" (4:17)? (5) Would Jeremiah, who had no love for Zedekiah, call the king "the breath of our nostrils" and "he of whom we said, 'Under his shadow he shall live among the nations'" (4:20)? In each case, the answer to these rhetorical questions is assumed to be No.

In addition to the alleged conflicting viewpoints between the books of Jeremiah and Lamentations, it is also often maintained that the phraseology of Lamentations varies considerably from that of Jeremiah. Thus Lamentations contains a large number of words not found in Jeremiah and vice versa (for a listing see S. R. Driver, *Intro. to the Literature of the OT* [6th ed., repr. 1956], p. 463). Others find it difficult to believe that a consummate poet such as Jeremiah could possibly have restricted himself to an artificial poetic form such as the acrostic (see below).

If the case against the Jeremianic authorship is so self-evident, how then did the idea of associating Jeremiah and Lamentations originate? To this there is a simple answer: 2 Ch. 35:25 refers to Jeremiah having composed a lament over the death of Josiah that, along with the

laments of the male and female singers, was preserved in the *qînôṯ*. It was mistakenly assumed that the source in question was the canonical book of Lamentations. In fact, nothing in the canonical Lamentations applies to Josiah; nonetheless -- so the argument goes — in an age when it was considered important to determine the authorship of anonymous books, the connection between Jeremiah and Lamentations was easily made. This connection seemed confirmed by superficial resemblances between characteristic utterances of Jeremiah and similar passages in Lamentations (cf., e.g., Jer. 9:1 [MT 8:23] with Lam. 2:11).

The above challenges to the traditional view regarding the authorship of Lamentations must be taken seriously; yet it cannot be said that they have definitively demonstrated that the Jeremiah tradition is entirely without merit. Some of the indirect arguments against Jeremianic authorship are far from convincing. For instance, the alleged differences of viewpoint referred to above between Jeremiah and Lamentations all have alternate explanations: (1) Although Jeremiah certainly did prophesy the destruction of the temple, there is no reason to doubt that he would nonetheless have affirmed in principle the exclusion of foreigners from the temple precincts as stipulated in Dt. 23:3. (2) It is a popular, but nonetheless unfounded, notion that a prophet who speaks favorably concerning a foreign nation could not also speak of ultimate judgment on that nation. Both themes are clearly present in the book of Jeremiah. (3) Although Jeremiah was a prophet, he himself made a radical distinction between true and false prophets. The latter are no doubt in view in Lam. 2:9. (4) When the poet writes in the first person of "ever watching vainly for help" (4:17), this may simply reflect his sense of corporate identity with the people rather than document his personal faith in foreign alliances. (5) Similarly, the reference to Zedekiah as "the breath of our nostrils" can easily be understood as an expression of the popular mood rather than the author's personal opinion. As for the suggestion that Jeremiah would not likely have restricted himself to the acrostic form, that is surely an arbitrary and overly subjective judgment.

In short, it appears that the internal evidence marshaled against the Jeremianic authorship of Lamentations is far from conclusive. By the same token it has to be said that there is no positive evidence for the identification either, though parts — especially ch. 3 — are particularly consonant with Jeremiah's mood and outlook. We are brought to the conclusion, therefore, that the best policy concerning the authorship of Lamentations is to respect the anonymity of the Hebrew text, while at the same time recognizing the existence of a very ancient — and surely not entirely impossible — tradition regarding the Jeremianic authorship of the book.

With regard to the question of unity, the usual critical view is that more than one person was involved in the composition of the book. R. H. Pfeiffer's position (*Intro. to the OT* [2nd ed. 1948], pp. 722f.) may be taken as typical. Pfeiffer believed that chs. 2 and 4 could come from the same person writing in Babylon *ca.* 560 B.C. He considered the last chapter a composition by a Palestinian author writing not later than 530 B.C. Ch. 1 was composed in Jerusalem after the rebuilding of the temple (520) and before Nehemiah's reforms (444). Ch. 3 reflected the period after Nehemiah. Countering this and similar proposals one has to reckon with the sober judgment of N. K. Gottwald (*IDB*, III, 62) that "all the poems are rooted in the same historical era — i.e., the period of the Palestinian 'exile' (586-538 B.C.)" and that because of the "single mood" that pervades the collection it is likely that at least the first four, and possibly all five, poems come from the same poet.

III. Structure and Meter.–As indicated, Lamentations consists of five poems, each coinciding with a chapter division in our Bibles. Of these, the first four are acrostics based on the twenty-two letter Hebrew alphabet (*see* ACROSTIC), though with slight variations in the acrostic pattern from one poem to another. Chs. 1 and 2 are most alike in that each stanza of these poems consists of three lines (except 1:7 and 2:19 which have four lines), the acrostic pattern being exhibited in the first word of each stanza only. Ch. 4 is similarly constructed but has two rather than three lines per stanza. Ch. 3, on the other hand, displays the most elaborate acrostic structure of all the poems. This poem has three lines per stanza, and each of the three lines commences with the same letter of the Hebrew alphabet (thus there are three *aleph* lines, three *beth* lines, etc.; cf. Ps. 119 where each stanza has eight lines beginning with the same letter). Since every *line* in this poem is consecutively numbered (rather than every *stanza* as in the other poems), ch. 3 has the appearance of being the longest poem, with 66 rather than 22 verses as in the other chapters. In reality, chs. 1, 2, and 3 are practically of identical length. One peculiarity of the alphabetical order of chs. 2, 3, and 4 is that in these poems the letter *p* precedes the ʿ (as in the LXX version of Prov. 31 and as some would prefer to read Ps. 34), whereas ch. 1 follows the usual order of ʿ before *p*. The reason for this variation in alphabetical order in chs. 2–4 is not clear, although A. Demsky and M. Kochavi have suggested that this variation was a local Israelite tradition, reflected also in an abecedary from ʿIzbet Ṣarṭah (*Biblical Archaeology Review*, 4/3 [1978], 23-30). Ch. 5 is not an acrostic poem at all; nevertheless, it does have twenty-two verses of one line each and so is also tied to the Hebrew alphabet.

Another noteworthy feature of Lamentations is its metrical pattern. Whereas according to the traditional analysis of Hebrew verse developed by J. Ley and E. Sievers in the 19th cent. (*see also* POETRY, HEBREW), a line or bicolon of Hebrew poetry consists of two half-lines or cola of approximately equal length (represented by an accentual formula such as 3 + 3), the metrical pattern of most lines of ch. 1–4 is such that the first colon is often slightly longer than the second (e.g., 3 + 2, 4 + 3, or 4 + 2). This at least was the conclusion of K. Budde in his seminal essay on the meter of Lamentations (*ZAW*, 2 [1882], 1-52). He called this the Qinah meter (from the Hebrew word *qînâ*, meaning "lament"; cf. the rabbinic title *qînôṯ* above), since it seemed to him like the "rhythm that always dies away." He then proceeded to identify this same meter in several other biblical passages and suggested that this must have been the meter peculiar to Hebrew elegy.

Since Budde's day, however, this interpretation of the data has been modified in several ways. For example, it is now recognized that Budde overstated his case on the consistency of the Qinah meter in Lamentations. Many bicola are in fact evenly balanced (2 + 2 or 3 + 3), and some may even be of the type 2 -- 3. Again, it is now clear that the typical Qinah meter is not exclusively associated with laments or funeral songs. There are passages such as Isa. 40:9 or Cant. 1:9-11 which display this meter but are manifestly not laments, just as there are other famous elegies, such as David's lament over Saul and Jonathan in 2 S. 1:17-27, which nevertheless do not employ the Qinah meter.

Further questions concerning Budde's analysis have been raised recently by D. R. Hillers. Focusing on the well-known phenomenon of parallelism in Hebrew poetry as a criterion for determining the beginning and end of a colon, Hillers notes that according to his reckoning 101 out of 244 lines in chs. 1–4 (or 41%) do not manifest

traditional Hebrew poetic parallelism (to be contrasted with ch. 5 where only 3 lines out of 22 — or 14% — do not show regular parallelism). With this important criterion for delimiting a colon often missing in chs. 1–4, it becomes proportionately more difficult to determine the accentual formula of the bicola in question, and hence to say whether they are Qinah. Hillers thinks that Budde and others have simply followed a kind of intuition rather than reasoned principle when it comes to deciding the caesura in a given bicolon. In short, the presence of the Qinah meter in Lamentations cannot be affirmed with anything approaching the confidence it once was, though the appropriateness of the designation for much of the poetry in the book need not be denied altogether.

IV. Literary Form.–Another useful way of analyzing the poems of Lamentations is by means of the literary types or *Gattungen* identified by form criticism. Since there is much in Lamentations that is reminiscent of the Psalms, it is not surprising that literary forms discovered there have been applied to Lamentations. Much of the pioneering work in this area was done by H. Gunkel ("Klagelieder Jeremiae," *RGG*, III [2nd ed. 1929], 1049-52) and his student H. Jahnow (*Das hebräische Leichenlied im Rahmen der Völkerdichtung* [*BZAW*, 36, 1923]).

Taking the cue from Gunkel and Jahnow, scholars have generally classified chs. 1, 2, and 4 as *Leichenlieder* or funeral dirges but with national rather than personal application. Each of these poems commences with the characteristic *'êḵâ* (cf. Dt. 1:12; Isa. 1:21; 14:4, 12; Jer. 9:18; 48:17; Ezk. 26:17) and, in continuity with the typical funeral dirge elsewhere, frequently contrasts the former beauty of the deceased (in this case the personified city) with its present lowly state. Ch. 5 is normally identified as a communal complaint psalm of the type found in Pss. 44, 60, 74, 79, 80, 83, and 89.

Much more difficult to identify with regard to type is ch. 3. Is it a communal or individual lament? The matter turns on the identification of "the man" who speaks in vv. 1-24, 52-66. Is he an individual or does he represent personified Jerusalem? Some have argued for the latter, but others, impressed by the masculine word *geḇer*, "man," (rather than the fem. personification in the other poems) and by the intensely personal character of the passage, have sought a more individual interpretation. The trend in critical scholarship has been to favor a communal interpretation, but this trend may yet have to give account to the more natural reading of seeing behind these lines the testimony of a strong personality writing out of the depth of his own experience, possibly even Jeremiah himself. Some scholars (e.g., W. Rudolph) have suggested that at the very least Jeremiah is being depicted here as the people's representative sufferer.

V. Theology.–Although questions of authorship, structure, meter, and literary type are recognized as important in themselves, current scholarship in Lamentations has turned from a preoccupation with these more analytical matters to the broader issues relating to the message and theology of the book. One who has given significant impetus to the study of Lamentations from a theological perspective is N. K. Gottwald. In his important monograph, Gottwald advocated the thesis that "the situational key to the theology of Lamentations [is] the tension between Deuteronomic faith and historical adversity" (pp. 52f.), i.e., the tension between the nation's earnest attempt at reform under Josiah and the bitter experience of the fall of Jerusalem. How can it be, Gottwald assumes the people of Jerusalem to be asking, that at a time when the nation was most bent on reform, disaster struck? Is this not a flagrant contradiction of basic Hebrew theology — as enunciated most clearly in Deuteronomy — of divine retribution for disobedience and blessing for obedience? According to Gottwald the shipwreck of that theology on the rocks of the national catastrophe of 586 B.C. constituted "a clarion call to the entire rethinking of Hebrew religion" (p. 63).

On the above reading of the book, Lamentations is to be viewed as a major contribution to the sixth-century theological debate over the 586 B.C. debacle. In the end the answer given by Lamentations was to reaffirm the Deuteronomic message: Jerusalem had fallen because of its sin; its fate, though severe, was justly deserved. This answer is elaborated by means of various motifs, principally that of "tragic reversal," but also in the public confession of sin, the theme of Yahweh as the Divine Punisher, the Day of Yahweh, and the Great Assize of God.

In spite of Gottwald's considerable contribution to a theological study of Lamentations, his thesis has not generally met with scholarly endorsement. The fundamental weakness in the theory is the lack of positive textual support for the notion that the pressing conundrum of the day was the question, "Why does the nation suffer more than ever immediately after its earnest attempt at reform?" Were this the background, one would have expected to find at least some passage or passages affirming the people's alleged piety and reformist spirit. Instead, one encounters only passages reinforcing the nation's sin and disobedience.

Recognizing this weakness in Gottwald's argument, B. Albrektson sought to ground his interpretation of the theology of Lamentations more explicitly in the text itself. By means of a detailed analysis of Lam. 2:15c; 4:12, 20; and 5:19, Albrektson argued that the theological backdrop for the book is the tradition regarding the inviolability of Zion as enshrined in Pss. 46, 48, and 76. It was this temple tradition which produced an "unbearable contrast to the harsh historical reality after the fall of Jerusalem" (p. 223). At the same time Albrektson acknowledged that Deuteronomic allusions certainly are present in the poems as well, so that it is doubtful that one can speak of one all-inclusive "key" to the theology of the book.

Canonical criticism has sought to shift emphasis away from finding the key to the problem of the book in a tension between different OT traditions. Instead, according to B. S. Childs (*OT as Scripture* [1979]), the issue at stake in the canonical book is "the conflict between those who thought that the destruction of Jerusalem had rendered the truth of Israel's faith in God's promise meaningless, and those who confessed that in spite of the enormous rupture caused by Israel's sin, the avenue of God's renewed mercy, even if withdrawn momentarily, was still open to the faithful as it had been in the past" (p. 596).

The positions of Gottwald, Albrektson, and Childs are representative of some of the new and stimulating things being said about the theology of Lamentations. Even if modern commentators cannot agree on the precise nature of the problem addressed in Lamentations, all are agreed that the book is much more than simply an outpouring of grief over the destruction of Jerusalem; it is a profound reflection on the nature of the community's faith and identity.

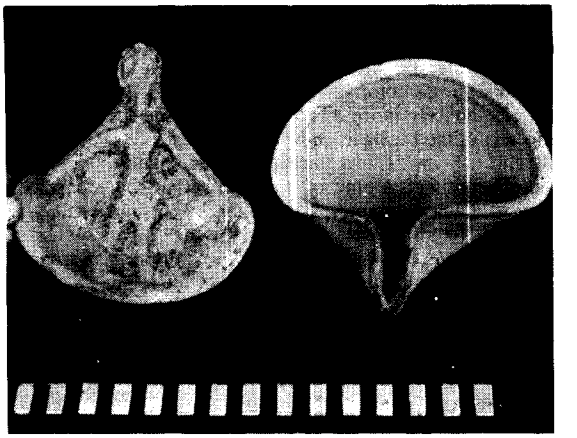
LAMP [Heb. *nēr*, *nîr*, *nir* (Prov. 21:4), *mā'ōr* (Ex. 25:6), *m'nôrâ* (2 K 4:10); Gk. *lýchnos*, *lampás*]; AV also LIGHT, CANDLE, CANDLESTICK (2 K. 4:10), "plowing" (Prov. 21:4); NEB also FLAME, LIGHT, "shines" (Prov. 20:27), EMBERS, LANTERN. In Prov. 21:4 the RSV emends *nir* to read *nēr*, following the LXX Pesh., Targum, and Vulgate. Heb. *lappîḏ*, translated "lamp" in the AV, is really a torch (cf. Jgs. 7:16, 20; 15:4; Isa. 62:1; Ezk. 1:13; Nah. 2:5; etc.).



I. In the OT
II. In the NT
III. As a Symbol

I. In the OT.–The Bible lacks a description of a lamp, although it often mentions the uses of lamps. A few texts refer to their daily use in the tent (Job 18:6) and house (Job 21:17; Prov. 13:9; 20:20; 24:20; Jer. 25:10; Zeph. 1:12), but most references are to the lamps employed in the tabernacle (Ex. 25:37; 27:20; 30:7f.; 35:14; etc.) and the temple (1 K. 7:49; 1 Ch. 28:15; 2 Ch. 4:20f.; 13:11; 29:7). A lamp of average size held enough oil to burn throughout the night. The saying that a good wife's "lamp does not go out at night" (Prov. 31:18) may reflect the household's wealth or stability (C. H. Toy, comm. on Proverbs [*ICC*, 1899], p. 545) or the diligence of the wife (W. McKane, *Proverbs* [*OTL*, 1970], p. 668). Olive oil fueled lamps (Ex. 25:6; 27:20; Mt. 25:3f.).

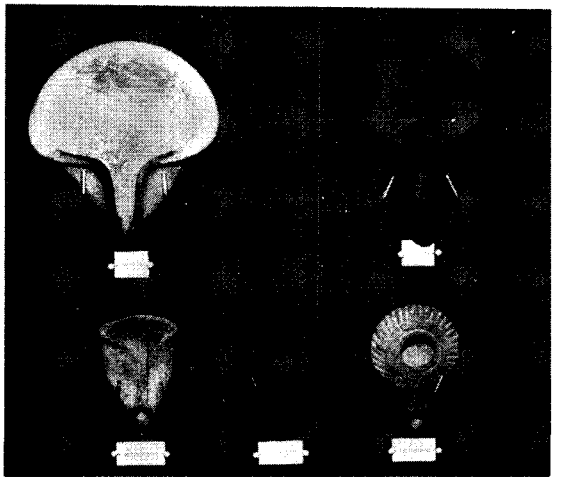
Archeology has provided invaluable information on the origin, development, design, and purpose of lamps, which are among the most significant material artifacts of the ancient Near East. They first appeared in the Bronze Age and were made of clay, but in the Iron Age metal lamps also came into use. Early Bronze Age people used a fairly flat saucer with a slight lip supporting a wick as a lamp; this saucer lamp was actually a development of the common household bowl. Around the beginning of the 2nd millennium potters formed open flat-bottomed bowls with an undulating rim into lamps with four equidistant spouts (cf. Isa. 42:3). These two types served through much of the early patriarchal period and were replaced by a simpler lamp with a single little spout on one side of the saucer. The spout of the "saucer lamp" (also called "shell lamp," though it did not develop from the shell, or "cocked-hat lamp") became increasingly large and well defined during the Middle and Late Bronze ages. The term *mûṣeqeṯ*, which appears only in Zec. 4:2, should probably be translated "spout" rather than "pipe" (AV, NEB), "lip" (RSV), or "tube" (NAB).

Top left: Bronze Age lamp with four spouts. Top right: Iron Age lamp with trefoil spout. Bottom left: Byzantine lamp. Bottom right: Roman lamp (R. H. Johnston)

Two views of a Late Bronze pottery lamp with torso of a man on the back (left) (B. VanElderen)

During the Early Iron Age lamps were fitted with bases to make them more stable. At a number of Iron I and Iron II sites in Palestine specimens of "seven-spout lamps" (cf. Zec. 4:2) have been uncovered (C. Watzinger, *Tell el-Mutesellim II*, fig. 74; Smith, *BA*, 27 [1964], 14 fig. 6). The "cup-and-saucer" (also called "double-bowl") lamp (*ibid.*, p. 15 fig. 7), consisting of a saucer and an inner container, was used in sanctuaries, tombs, and homes from the 13th to 6th cents. B.C. Its fuel may have been solid rather than liquid, perhaps pitch. The "double-spout lamp" appeared in the Iron II period at Megiddo, Samaria (G. Reisner, *Samaria* [1924], fig. 187 no. 2a), and other sites. A rich coat of red slip often decorated Iron Age lamps, making them very attractive when new.

Archeologists identify the *m'nôrâ* referred to in the Elisha narrative (2 K. 4:10) as a pedestal lamp, which has a separate ceramic pedestal elevating the clay lamp to produce more light and make the lamp easier to tend. Examples include the seven-spout lamp from Tell Ta'annak and the one-spout lamps from Tell Beit Mirsim and Tell en-Naṣbeh. Some of these pedestal lamps are clearly associated with cultic activity in homes. Excavators of Palestinian cities have found a great variety of lampstands, usually made of stone, pottery, or terra cotta, but some of bronze or iron from the Iron I and II periods.



In the Persian period a new kind of broad, shallow lamp replaced the footed lamp of Judah. Examples in pottery and bronze were found at Lachish. Iron saucer lamps were found infrequently (Beth-shean and Gezer). Imported Greek lamps in which much of the oil reservoir

was covered to prevent spilling appeared in significant numbers in Palestine in the latter part of the Persian period (after 450 B.C.). The new lamp forms and decorations of the Hellenistic period show the influence of Greek culture and skill. The oil supply in the spout lamp was covered, and the production of lamps on the potter's wheel reduced their size. During this period lamps began to be decorated with simple designs and later with more elaborate decorations and inscriptions. In the 2nd cent. B.C. molded lamps, some with two, three, or more spouts, appeared in Palestine; the earliest examples closely resemble wheel-made lamps.

Most ancient Near Eastern tombs contain lamps, which played an important role in burial rites. Lighting a lamp in the tomb may have symbolized rekindling the flame of life in the deceased, and the ancients buried their dead with lamps probably to provide light for them in the hereafter. Lamps were kept at the entrance to tombs (at Ugarit; cf. *Ugaritica*, III, 180) and in small wall niches similar to the niches in inhabited caves and houses.

II. In the NT.–The lamp with which Jesus was probably most familiar was the "Herodian" lamp, a wheel-made lamp of thin buff or light-brown clay, distinguishable from later specimens by its downward-sloping nozzle. The woman who lights a lamp to search for the lost coin in the parable (Lk. 15:8) and the virgins at the wedding party, five of whom take extra oil and five of whom foolishly do not (Mt. 25:1-12), probably use "Herodian" lamps. Since the virgins' lamps are lighted at dusk and threaten to go out at midnight, they must hold enough oil for at most four to five hours' use. The word for "lamp" in this parable is *lampás*, not the regular term *lýchnos*; *lampás* normally meant "torch" in Hellenistic times (so Jn. 18:3; Rev. 8:10) but here means "lamp," as the parallel Lk. 12:35 shows. In Acts 20:8 *lampádes* must mean "lamps" and not "torches," since they are inside a house. Rev. 4:5 may have a double meaning. Before the heavenly throne burn "seven *lampádes* of fire, which are the seven spirits of God"; the *lampádes* should be visualized as "torches" (so correctly RSV, NEB, NAB), but the reader of NT times would immediately recall the seven lamps on the lampstand in the Jerusalem temple. Jesus alludes to a lampstand, which must have been fairly common in Roman Palestine, and its importance in distributing the lamp's light in Lk. 8:16 (cf. Mt. 5:15; Mk. 4:21; Lk. 11:33).

Top row: Iron II and Persian lamps. Bottom row: Hellenistic lamps. The lamp on the left was formed on a wheel and pinched into shape, and the center and right lamps were made from a mold (L. A. Willis)

III. As a Symbol.–In the OT the lamp and its light function as either a negative or a positive symbol. The "lamp of the wicked" fails because it lacks the life-giving light of God (Prov. 13:9; 21:4; cf. 20:20; 24:20; Job 18:5f.; 21:17). The lamp's going out symbolizes the destruction of the individual and community (Job 18:6; Jer. 25:10). The lamp is a positive metaphor for the continuity of the royal house of David (1 K. 11:36; 15:4; 2 K. 8:19 par. 2 Ch. 21:7; cf. Ps. 132:17) promised by God (2 S. 7; Ps. 132:12). The lamp (2 S. 22:29) and the light (*'ôr*) of the faithful (Mic. 7:8) symbolize God Himself. A Psalm written for the praise and exaltation of the law describes the word of the Lord as a lamp (*nēr*) to the feet and a light (*'ôr*) to the path (Ps. 119:105; cf. G. Vermes, *VT*, 8 [1958], 436f.) leading to life. The father's commandments are a lamp and the mother's teaching a light (Prov. 6:23). A lamp from the Lord lights up the darkest recesses of the human heart and provides the power of introspection by which people can examine their innermost parts (20:27). The lampstand (*m^{e}nôrâ*) symbolism is joined with the lamp and light symbolism in Zec. 4:1-3, 11-14.

Lamp and light symbolism also appears in the NT. John the Baptist was a lamp because he bore witness to the coming Messiah (Jn. 5:35; cf. Ps. 132:17; F. Neugebauer, *ZNW*, 52 [1961], 130). Jesus Christ the Messiah proclaimed Himself to be the light of the world (Jn. 8:12); He claimed as much for His disciples (Mt. 5:14), provided they carry on the work of their Lord and truly reflect Him before the world. The lamp symbolizes works of righteousness whose light shines far into the darkness of the world, giving glory to God (5:15f.; cf. Mk. 4:21f.; Lk. 8:16f.). The eye as the lamp of the body illuminates the inner being and radiates the brightness of the inner light (Mt. 6:22f.; Lk. 11:34-36). In 2 Pet. 1:19 the prophetic message is said to give guidance to the believer as a lamp gives light in a dark place until a new day dawns. John depicts the Lamb, Jesus Christ, as a lamp by whose light the nations shall walk in the new Jerusalem (Rev. 21:23f.). The only acknowledged source of light and life will finally be the Lord God (22:5).

On Jn. 18:3 *see* LANTERN.

LAMPSTAND [Heb. *m^{e}nôrâ* (< *nûr*, "to flame, shine, give light"); Aram. *neḇr^{e}šâ* (Dnl. 5:5); Gk. *lychnía*]; AV CANDLESTICK; NEB also LAMP, STANDING LAMP. Throughout the OT period lampstands seem not to have been common household equipment; a frequent place for a lamp was a shallow wall niche. Only in 2 K. 4:10 is *m^{e}nôrâ* used of a household lampstand (by implication surmounted with a *nēr*, a clay lamp); the stand, like the bed, table, and chair that the passage mentions, was probably made of wood. Not surprisingly in view of their perishable nature, no specimens of wooden lampstands have yet been found in archeological excavations. Lampstands of bronze or iron were rare. Throughout the late Canaanite and early Israelite period terracotta lamps were

occasionally manufactured in Palestine with clay pedestals attached; these may have been intended primarily for ceremonial use. Although the meaning is clear, the etymology of Aram. *nebrʿšâ* is debated; see J. A. Montgomery comm. on Daniel (*ICC*, 1927), p. 255; cf. F. Rosenthal, *Grammar of Biblical Aramaic* [repr. 1968], § 190).

The accounts of the wanderings of the Israelites in the wilderness describe a *mᵉnôrâ* used in the tabernacle (Ex. 25:31-40; 37:17-24; cf. 40:4). The lampstand is said to have been of pure — though hardly solid — gold (Ex. 31:8; 39:37; Nu. 8:4), hammered rather than cast, with its structural parts (identified as base, shaft, cups, capitals, and flowers) being all of one piece. Although the shape cannot be determined precisely and has been the subject of debate since the early rabbinic period, the lampstand is described as being a stylized tree or bush with three branches arranged bisymmetrically on each side of a sturdy central trunk. The branches are described as terminating in capitallike floral shapes, with cups shaped like almonds or almond blossoms at the top. On the trunk and branches, or perhaps only on the trunk, stood seven oil lamps, the material of which is not specified. Each lamp probably had the shape of a bowl, with one or more pinches on the rim to form wick spouts.

The lampstand is reported to have been anointed by Moses with sacred oil (Ex. 30:27) as an evidence of divine sanctification, and is said to have stood on the south side of the tabernacle (Ex. 26:35; 40:24f.). It had as its essential function the illumination of the sanctuary, and it is likely that originally the lamps may have burned only during the hours of darkness. Utensils are said to have been used in connection with the maintenance of the lamps (Ex. 35:14); these must have included storage containers for pure olive oil, a supply of wicks, needles or tongs for adjusting the wicks, and snuffers to extinguish the lamps. Exodus speaks variously of the high priest Aaron and the family of Kohath as having the care of the lampstand and its equipment, a responsibility which included ceremonial packing when the Israelites broke camp (Lev. 24:4; Nu. 3:31; 4:9f.; 8:2f.).

According to 1 K. 7:49f. the sanctuary of Solomon's temple had ten lampstands of pure gold, five on the south side of the chamber and five on the north (cf. 2 Ch. 4:7, 20). The form of the lampstands may have differed from that recorded for the tabernacle *mᵉnôrâ*. In his speech delivered in the northern kingdom during the reign of Jeroboam I, near the end of the 10th cent. B.C., King Abijah of Judah alludes to "the golden lampstand" as if there were only one (2 Ch. 13:10f.), but soon after the capture and sacking of Jerusalem by the Babylonians in 587 B.C. the historian refers to the captors' removal of "the lampstands" (Jer. 52:19).

1 Chronicles 28:15 mentions, along with the golden lampstands, a *mᵉnôrâ* of silver, the relationship of which to the other lampstands is not explained. Some differentiation of function for the various lampstands is suggested by the statement that the amount of gold and silver in the lamps was appropriate for "the use of each lampstand in the service." Nothing is known, however, about any uses of the lampstands during worship. It need not be supposed that all lampstands in the temple were in active use in the sanctuary at all times; some may have been used in other chambers or kept in reserve.

When the temple was rebuilt *ca.* 515 B.C. the sanctuary was outfitted with only one lampstand, of a form which apparently differed from that of the earlier lampstands. It was at this time, if not before, that the temple *mᵉnôrâ* began to be understood as having cosmic significance. Zec. 4, written near the end of the 6th cent. B.C. as the temple was beginning to be reconstructed, describes a vision in which the temple sanctuary is perceived as God's heavenly court in which there is a golden lampstand with a bowl on top and seven lamps (vv. 2, 11); the lamps are said to be the eyes of the Lord (v. 10).

Several decades before the birth of Jesus, Herod the Great rebuilt and refurbished the temple of Jerusalem. One of the benefactions that he — or possibly a Hasmonean ruler a half-century or century before him — bestowed on the temple was a new menorah, fabricated by craftsmen working under Hellenistic influence. This lampstand, which continued in use until the destruction of the temple by the Romans in A.D. 70, is presumably the one depicted on a panel in the triumphal arch set up in Rome more than a decade later in honor of the conquest of Judea by Titus.

Household lampstands may have come into more frequent use by the 1st cent. A.D., although archeological evidence for them remains scanty. The Synoptic Gospels record Jesus' analogical use of the commonsense fact that a lamp should be placed on a lampstand (*lychnía*), not under a basket (Mt. 5:15 par. Lk. 11:33; Mk. 4:21 par. Lk. 8:16). The menorahs of the tabernacle and temple are not mentioned in Jesus's teachings other than perhaps implicitly in the Johannine imagery of Jesus as the light of the world.

The cult menorah is explicitly mentioned in two NT books. He. 9:2 refers to the lampstand of the tabernacle in connection with the Old Covenant. Rev. 1:12, 20 and 2:5, standing in the tradition of prophetic imagery that has a temple setting, describe a vision of seven golden lampstands which represent seven churches (cf. Rev. 4:5, which

Lampstand from the temple in Jerusalem taken to Rome as booty after the capture of Jerusalem in A.D. 70. From the Arch of Titus (R. H. Smith)

transforms the seven lamps into torches that burn before God's throne). Rev. 11:4 draws upon the imagery of Zec. 4 when alluding to two olive trees and two lampstands as heavenly witnesses, while Rev. 1:13 associates the lampstand with the heavenly Son of man (cf. Rev. 2:1). These passages show the imagery of the lampstand moving further toward cosmic symbolism, a development which is reflected in the use of the menorah in Jewish art from the Roman period to the present day as a symbol of God's living presence and redemptive power.

LAND [Heb. *'ereṣ*, also *'ᵃḏāmâ*, *śāḏeh*–'(open) field,' *gᵉḇûl*–'boundary,' 'territory' (1 S. 6:9; Ps. 78:54; Isa. 15:8; Ezk. 45:7), *ḥēleq*–'share of property' (2 K. 3:19, 25; Am. 7:4), *karmel*–'orchard' ("fruitful land," Isa. 10:18; Jer. 4:26; "fertile land," 2 Ch. 26:10), *migraš* ("pasture land," Nu. 35; Josh. 21; 1 Ch. 6; etc.), *nāweh* ("grazing land," Ezk. 34:14), *ṣᵉḇî*–'glory' ("glorious land," Dnl. 8:9; 11:16, 41; etc.), *yabbāšâ* ("dry land," Gen. 1:9f.; Neh. 9:11; Ps. 66:6; 95:5; Jonah 1:9, 13; 2:10 [MT 11]), *ḥārāḇâ* ("dry land," Gen. 7:22; Hag. 2:6), *ṣîyâ* ("dry land," Isa. 35:1), *ṣāmē'* ("thirsty land," Isa. 44:3), *ṣᵉḥîḥâ* ("parched land," Ps. 68:6 [MT 7]), *dûmâ* ("land of silence," Ps. 94:17); Gk. *gḗ*, *agrós*, *chṓra* (Lk. 12:16; Acts 27:27), *chōríon*(Acts 4:34; 5:3, 8; 28:7).]; AV, NEB, also EARTH, COUNTRY, FIELD, DRY LAND, etc.

I. Various Meanings.–The primary Hebrew term for "land" is *'ereṣ*, which is the fourth most frequent noun in the OT (*see also* EARTH; COUNTRY). Though generalization is difficult, a distinction can be drawn between *'ereṣ*, which denotes a geographical or political territory, and *'ᵃḏāmâ*, which refers to arable, productive earth. The LXX translates both terms by Gk. *gḗ*.

"Land" can represent the earth as the place where living things can prosper. On the third day of creation the waters are collected to one place and "dry land" (*yabbāšâ*) — called "earth" (*'ereṣ* — appears (Gen. 1:9f.). The dry land stands in antithesis to the sea, which represents the forces of chaos (cf. Job 38:8-11; Ps. 104:5-9; Rev. 10:2, 5, 8). Thus "land" is the place of safety and security (Jonah 1:9, 13; 2:10 [MT 11]; Acts 27:43f.; He. 11:29).

"Land" occasionally signifies ground or soil (*'ᵃḏāmâ*, Gen. 47:23; Dt. 11:17; Neh. 9:25; Prov. 12:11). Human life comes from the land and is inextricably tied to it (cf. Gen. 2:7; 3:19; Eccl. 12:7). "Land" sometimes designates an individual's tillable field (Heb. *śāḏeh*, Gen. 33:19; Lev. 27:16; Ruth 4:3; 1 S. 14:14; Gk. *agrós*, Mt. 19:29; Mk. 10:29f.).

"Land" (*'ereṣ*) can refer to a generalized region or political territory, as in "the land of his birth" (e.g., Gen. 11:28), "native land" (e.g., Jer. 22:10), "land of your fathers" (e.g., Gen. 31:3), "land of one's possession" (e.g., Gen. 36:43). A portion of Canaan allotted to an Israelite tribe is referred to as that tribe's land (e.g., "land of Ephraim," Dt. 34:2). The term can designate a nation-state in its socio-political as well as geographical dimensions (1 S. 13:19; 2 K. 5:2, 4; 6:23; cf. Gk. *gḗ*, Mt. 2:6, 20f.; 10:15; He. 8:9).

"Land" (*'ereṣ*) can also denote the realm of the dead, as in Jonah 2:6 (cf. "earth," Ex. 15:12; Eccl. 3:21). The place where the dead dwell can be called the "land of the shades" (Isa. 26:19) or the "land of forgetfulness" (Ps. 88:12 [MT 13]). The sense "underworld" is well attested for Akk. *erṣetu* and Ugar. *'rṣ* as well (cf. *UT*, 51:vii:7-9: "And go down into the infirmary of the underworld; you will be counted among those who go down into the land"). *See also* DEATH III.B.

II. Land of Promise.–In the theology of the OT the concepts of land and covenant are closely intertwined. The land is God's gift, which He guarantees by formal covenant, and it is the place where He dispenses covenant blessing. Living in the land of promise is equated with receiving God's blessings and experiencing His presence in the "land of the living" (Isa. 38:11; 53:8; Ezk. 32:23-27, 32). To belong to the Lord is to have a "portion" in His land (cf. Josh. 22:25, 27). Those who trust the Lord will live long in the land (Ps. 37:3, 9, 11, etc.). The Promised Land thus symbolizes the Lord's presence and blessing. Israel's relationship to the land is an indication of its relationship to God. Faith is required for possession of the land; unbelief results in expulsion from the land.

A. Promise of the Land. Land is the central feature of the Abrahamic covenant: "The Lord said to Abram, 'Go from your country [*'ereṣ*] . . . to the land that I will show you . . . to your descendants I will give this land'" (Gen. 12:1, 7; cf. 13:15; 24:7). Associated with the land promise are the covenant promises of nationhood and blessing (12:2f.). The promise is repeated to Isaac (26:3), Jacob (28:4, 13; 35:12), Joseph (48:4), and the other sons of Jacob (50:24). The patriarchs live in the land as sojourners (cf. "land of sojournings," Gen. 17:8; 28:4; 36:7; 37:1; Ex. 6:4); only in token fashion do they achieve ownership (cf. Gen. 23:1-20).

The land promise is of central importance in the Mosaic discourses of Deuteronomy — a book that forms the historical and theological bridge between the patriarchal land promise and the actual possession of the land. Deuteronomy brings together the land promise of the Abrahamic covenant and the stipulations of the Mosaic law covenant. The relationship between land and law is twofold. First, only if the statutes and ordinances are observed will the land be possessed (e.g., Dt. 6:17-19) and retained (e.g., 4:25f., 40). Second, the covenant as explicated and ratified in Deuteronomy is intended to regulate life in the promised land (e.g., 4:5, 14; 5:31); obedience to the covenant will result in prosperity in the land (28:9-11).

The land of promise is a "good land" (e.g., Dt. 1:25, 35). It is so rich, abundant and productive that it is said to "flow with milk and honey" (e.g., Ex. 3:8; Nu. 13:27; Dt. 6:3).

B. Possession of the Land. The so-called Deuteronomistic historical work (Joshua, Judges, Samuel, Kings) recounts Israel's history from the theological perspective of land promise, covenant breaking, and land loss. The justification for Israel's expulsion of the indigenous population is the wickedness of the Canaanites (cf. Gen. 15:16; Dt. 9:4f.). Israel's provisional possession of the land under Joshua's leadership is seen as fulfillment of the promise to the patriarchs (Josh. 21:43-45). Possession of the land brings "rest" (Dt. 12:9; 25:19; Josh. 1:13; 21:44), i.e., both freedom from foreign domination and the end of wandering.

The Lord gives the land as a gift (Dt. 5:31; 9:6; 11:17). Strictly speaking, the land never belongs absolutely to Israel but always remains the property of the Lord (Lev. 25:23). Divine ownership of the land is institutionalized in the SABBATICAL YEAR, in the Year of Jubilee (*see* JUBILEE, YEAR OF II), and in the practice of offering the FIRST FRUITS of the land to the Lord (Dt. 26:9-15; cf. also 14:22-29). The distribution of the land by lot (Nu. 26:55; Josh. 14:2; 18:1-10) is further indication that it is at the Lord's disposal (*see also* PORTION).

The boundaries of the Promised Land are variously delineated (cf. Gen. 15:18; Ex. 23:31; Nu. 34:1-10; Dt. 11:24; Josh. 1:4). While the book of Joshua suggests that full possession was achieved during Joshua's lifetime (Josh. 21:43-45), Judges indicates that the conquest was incomplete (Jgs. 1:1–2:5). Complete possession according to the larger boundaries of Ex. 23:31 takes place only in the reigns of David and Solomon (cf. 1 K. 4:25; 5:4).

C. Exile from the Land. Covenant breaking results in Israel's expulsion from the land (cf. Dt. 4:25f.; 28:63f.; Josh. 23:13, 15; 1 K. 9:6f.; 2 K. 17:22f.; etc.). For the Lord to dwell among His people the land must be clean, but immoral conduct (e.g., idolatry [1 K. 14:15], shedding of blood [Nu. 35:33f.], improper divorce [Dt. 24:1-4]) defiles the land and makes it unclean (*see* CLEAN AND UNCLEAN II.E). It was because the Canaanites had defiled the land through their wickedness that the land "vomited them out" (Lev. 18:24-30; 20:22-26). Likewise, the prophets specify pollution of the land as one reason for Israel's exile (cf. Jer. 12:10-12).

But Israel is not alienated from the land forever. Prophetic preaching sees beyond exile to a return to the land (e.g., Isa. 14:1f.; Jer. 16:15; 23:8; Ezk. 28:25; 36:8-15). In the age of salvation land retains an important place (Jer. 32:15; Ezk. 36:28-32; 37:25). The Lord Himself will redistribute the land in the new age (Ezk. 47:13–48:29). Prophecy is fulfilled when Cyrus issues a decree permitting a return to the land (Ezr. 1:1-4). After his return to Jerusalem, Ezra leads the people in a confession of their guilt in polluting the land, and he implores the people to cleanse the land by renouncing intermarriage (Ezr. 9:10-15).

III. Land Promise Redefined.–References to the promised land are sparse in the NT (He. 11:9; Acts 7:3 quotes Gen. 12:1). The central image of NT proclamation is not land but the kingdom of God and Jesus Christ as its embodiment. According to W. D. Davies (*Gospel and the Land*), the theme of land is displaced in Christianity by the person of Jesus Christ. The NT "personalizes 'holy space' in Christ, who, as a figure of History, is rooted in the land . . . but as Living Lord . . . is also free to move wherever he wills" (p. 367).

The promise of land continues to play a role in NT thought, but it takes on an eschatological dimension. It becomes a symbol of the eschatological society in time and eternity. Possession of the land is promised to the meek (Mt. 5:5; cf. Ps. 37:11). The faithful are promised rest (He. 3–4; cf. Dt. 12:9; 25:19). And the pilgrimage of faith is described in terms of land promise and fulfillment (He. 11:13-16), with the difference that the "better country" is a "heavenly one" (v. 16). *See also* ESCHATOLOGY IX.

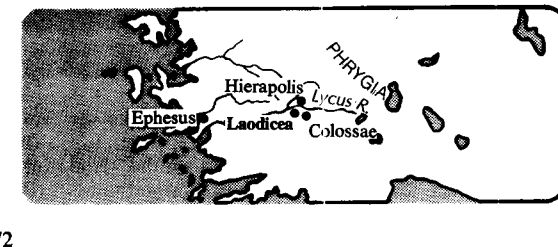
LAND CROCODILE. *See* LIZARD.

LAND LAWS. *See* AGRARIAN LAWS; INHERIT.

LANDING [Heb. *miprāṣ* <*pāraṣ*–'break'] (Jgs. 5:17); AV BREACH; NEB CREEK. Although *miprāṣ* occurs only here, its context and derivation indicate the meaning "harbor" (so JB; cf. Vulg. *portus*, "port, harbor, river mouth") or "landing" (i.e., a break in the coastline).

LANDMARK [Heb. *gᵉḇûl*–'boundary']. The boundary may have been marked simply by a furrow or stone (*see* picture in BORDER). The iniquity of removing a landmark is insisted on (Dt. 19:14; 27:17; Job 24:2 [Heb. *gᵉḇulôṯ*]; Prov. 22:28; 23:10); its removal was equivalent to theft. The rules of the brotherhood at Qumrân stigmatized any who left the community as "those who removed the landmark" (CD 5:20; 8:3; cf. Hos. 5:10).

LANGUAGE [Heb. *lāšôn* (Aram. *liššān*)–'tongue' (Gen. 10:5, 20, 31; Dt. 28:49; Neh. 13:24c; Est. 1:22; 3:12; 8:9; Jer. 5:15; Ezk. 3:5f.; Dnl. 1:4; 3:7, 29; 4:1 [MT 3:31]; 5:19; 6:25 [MT 26]; 7:14), *śāpâ*–'lip' (Gen. 11:1, 6f., 9; Isa. 19:18), qal part. of *l'ẓ*–'speak an incomprehensible foreign language' (Ps. 114:1); Gk. *diálektos* (Acts 1:19; 2:6, 8; 21:40; 22:2; 26:14), *phōnḗ*–'voice' (1 Cor. 14:10f.)]; AV also TONGUE, VOICE; NEB also SPEECH, SOUND. The term is supplied by translators for better understanding of "Hebrew," "Aramaic," etc. in 2 K. 18:26, 28 par. 2 Ch. 32:18 par. Isa. 36:11, 13; Neh. 13:24a, b. *See* TONGUE; SPEECH.



LANGUAGES OF THE BIBLE. *See* ARAMAIC; GREEK LANGUAGE OF THE NT; HEBREW LANGUAGE.

LANTERN [Gk. *phanós*]. "Lantern" is used but once in the NT, in Jn. 18:3 in the plural. There it is connected with Gk. *lampás*, which is correctly translated "torches." Accordingly, the "lanterns" in v. 3 are not torches but other sources of light carried by the mixed mob that arrested Jesus. The lantern is also to be distinguished from the normal LAMP. *Phanós* means "torch" in early Greek literature, but in the period of Koine Greek it is regularly used for "lantern." The "lanterns" referred to may be Roman types, since Roman soldiers were in the mob arresting Jesus (v. 12). Roman lanterns usually consisted of a metal frame with a surrounding cylinder of some type of translucent material, such as horn or bladder.

G. F. HASEL

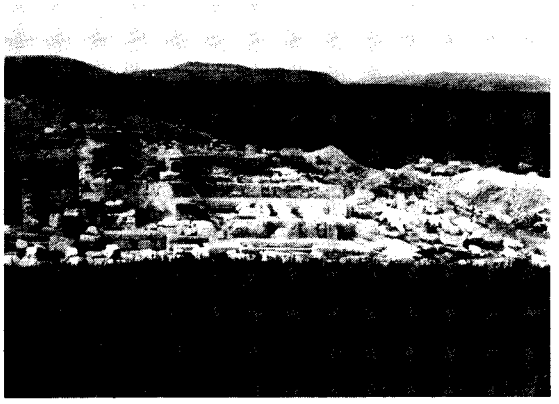
LAODICEA lā-od-ə-sē'ə [Gk. *Laodikia*, or in most Greek literature *Laodikeia*] (Col. 2:1; 4:13-16; Rev. 1:11; 3:14-22). A city of Asia Minor.

The ancient town of Diospolis ("city of Zeus") or Rhoas was fortified as a Seleucid outpost by Antiochus II *ca.* 250 B.C. and renamed for his wife Laodice. Situated on a southern plateau more than 30 m. (100 ft.) above the valley of the Lycus River, Laodicea was flanked by two of its tributaries and protected on the south by the Salbacus and Cadmus mountains. It lay 10 km. (6 mi.) S of Hierapolis, 18 km. (11 mi.) W of Colossae, and slightly more than 160 km. (100 mi.) E of Ephesus.

After the Syrians and the Pergamenes successively dominated the city, the Romans became its rulers in 133 B.C. They reconstructed ancient roads leading into the Anatolian hinterland, and Laodicea became the major junction for traffic west to Ephesus and the Aegean, north and west to Philadelphia, Pergamum, and Smyrna, east through southern Galatia to the Cilician Gates, and south to the Mediterranean. Although it had been a small city, it grew rapidly during Roman rule and became very wealthy (cf. Rev. 3:17). When Laodicea was destroyed by an earthquake *ca.* A.D. 60, it proudly refused imperial financial assistance in rebuilding (Tacitus *Ann.* xiv.27; cf. *RRAM*, I, 564). Among its chief exports were costly, seamless garments woven of glossy, black wool (Strabo *Geog.* xii.8.16), which Ramsay suggested may have been behind the reference to "white garments" in Rev. 3:18.

The population was cosmopolitan: Roman colonizers, the original Phrygians, and immigrant Syrian settlers, including Jews (who in 62 B.C. suffered Roman seizure of their annual contribution to Jerusalem, amounting to 20 pounds of gold; cf. Cicero *Pro Flacco* 68). The deities worshiped in Laodicea reflected this varied background. Zeus Laodicenus had some definitely Phrygian characteristics. Asclepius may have been associated with Men Karou's nearby temple, to which a famous medical school was connected. "Phrygian powder," ground locally in Laodicea, apparently was used to treat diseases of the eyes. Galen, however, regarded such medicinal preparations as magical pharmacopoeia. Nevertheless, the eye salve in Rev. 3:18 is a historically appropriate symbol for Laodicea. Mystery religions, including the cult of Isis (see below), were represented.

Paul or one of his followers (depending on the meaning of Col. 2:1) probably brought Christianity to the region. Although John judged the church there as "lukewarm" (Rev. 3:16), the city soon became the leading bishopric of Phrygia. Its bishop Sagaris was martyred *ca.* A.D. 166, and Nounechios represented this seat at Nicea in 325. The Council of Laodicea, 367, is important for its opposition to the Montanist and Quartodeciman movements as well as for its acceptance of twenty-six books in the NT canon (Revelation was not included).



The city was captured by the Seljuks (11th cent.) and retaken by the Byzantines in 1119. It became part of the Latin kingdom during the Fourth Crusade and then part of the Greek Empire. Tamerlane and the Tartars captured it in 1402, and subsequently the city fell to the Ottoman Turks. The site, known today as Eski Hissar ("old castle"), was abandoned and suffered seriously from scavengers in need of materials for building the railway and the nearby Turkish town of Denizili.

Ruins of the theater (1st or 2nd cent. A.D.) at Laodicea (Québec; Laval University excavations)

Among the distinguishable ruins are a large stadium, a gymnasium, two theaters, gates, and several churches. Also evident are the remains of a great water system. Its fine aqueduct is built from large, tightly fitted, and cemented rectangular stones, through which a circular central channel is bored. The water was transported by the aqueduct from the mountain springs and raised to a tall water-distribution tower by syphon action. Laodicea also has a magnificent nymphaeum (public fountain), near which archeologists uncovered friezes of Zeus and his captive Ganymede and of Theseus and the legendary Minotaur.

The nymphaeum at Laodicea (Québec; Laval University excavations)

Frieze of Ganymede from the nymphaeum at Laodicea (probably 3rd cent. A.D.). Zeus's eagle holds his right arm, while his dog (lower left, head missing) jumps to protect him and a lamb lies between his legs (Québec; Laval University excavations)

A large statue of Isis was also found in the dump associated with the fountain. The statue's original setting is unclear, but its later location is undoubtedly attributable to one of the postearthquake reconstruction periods during the Christian era, when such statues were destroyed or marred.

LAODICEANS, EPISTLE TO THE [Gk. *hē (epistolē) ek Laodikeías*]. The reference in Col. 4:16 to "the letter from Laodicea" has long been a puzzle. It can be taken to mean either a letter written by the Laodiceans to the Colossians or a letter written by Paul from Laodicea. The most obvious interpretation, however, supported by both the context and grammatical considerations, is that Paul wrote a letter to the church at Laodicea at the same time that he wrote the one to the church at Colossae. The problem is that no letter addressed to the Laodiceans has been preserved in the Pauline corpus.

Several attempts have been made to solve the problem. One approach was to create a new document. A pseudepigraphical Epistle to the Laodiceans has survived in a Latin translation and had some acceptance in the Western Church into the Middle Ages (*see* APOCRYPHAL EPISTLES I.B; cf. also H-S, II, 128-132).

Another approach has been to identify the letter mentioned in Col. 4:16 with one of the known Epistles. Some, apparently including Marcion, have identified it with Ephesians (*see* EPHESIANS, EPISTLE TO THE II.D), a position presented at length by J. Rutherfurd in *ISBE* (1929), III, 1836-39. Others have seen Philemon as the missing letter (*see* PHILEMON, EPISTLE TO IV). Although each identification has some plausibility, neither has gained widespread scholarly acceptance. For one reason or another (cf. the possibilities listed by R. P. Martin, *Colossians and Philemon* [*NCBC,* repr. 1981], pp. 138f.) the letter apparently has not been preserved. E. W. S.

LAP [Heb. (vb.) *lāqaq* (Jgs. 7:5-7), (noun) *bereḵ*–'knee' (2 K. 4:20), *beged*–'garment' (2 K. 4:39), *ḥōṣen*–'girdle' (Neh. 5:13), *ḥêq*–'bosom' (Prov. 16:33); Gk. *kólpos*–'bosom' (Lk. 6:38)]; AV also KNEE (2 K. 4:20), BOSOM (Lk. 6:38); NEB also "skirt of a garment" (2 K. 4:39), "fold of a robe" (Neh. 5:13).

Scholars have offered various interpretations of Jgs. 7:5-7, the only passage where the RSV uses "lap" as a verb. The two key phrases are "laps the water with his tongue, as a dog laps" (v. 5), and "those that lapped, putting their hands [lit. "with their hands"] to their mouths" (v. 6). These statements seem contradictory (they are thus rearranged by, e.g., the NEB and R. Boling, *Judges* [*AB,* 1975], pp. 145f.), since a dog does not put his paw to his mouth but licks directly from the source. But possibly those who lapped scooped up handfuls of water and then licked the water like dogs (so KD; A. Cohen, *Joshua. Judges* [*Soncino,* 1950], p. 217).

The significance of this lapping is not clear. J. Myers (*IB,* II, 738) and KD interpreted it as indicating military training. Cohen, however, took it as indicating a lack of such training (cf. Josephus *Ant.* v.6.3 [216f.]) and thus enhancing God's role in the victory (note also in vv. 15-22 that these men apparently did not fight but functioned only to confuse the Midianites). Although no explanation is fully satisfactory, that of Cohen seems to handle the MT best.

The other occurrences of "lap" are less problematic. In 2 K. 4:39 one of the sons of the prophets gathers some wild gourds in his *beged,* probably the folds of his garment. Nehemiah's symbolic gesture of "shaking out his lap" no doubt also refers to a garment, which, according to J. Myers (*Ezra. Nehemiah* [*AB,* 1965], p. 129), was a girdle or sash whose folds served as pockets. The *ḥêq* (Prov. 16:33; LXX *kólpos*) into which the lots were cast may have been the same as the *ḥōšen,* "the breast pocket in the priestly garment where the lots lay (Ex. 28.30; Lev. 8.8)" (W. McKane, *Proverbs* [*OTL,* 1970], p. 499, following R. de Vaux, *Ancient Israel,* II [Eng. tr. 1961], 352; cf. G. André, *TDOT,* IV, 356f.). According to Bauer (rev., p. 442) *kólpos* in Lk. 6:38 means "*the fold of a garment,* formed as it falls from the chest over the girdle . . . used as a pocket." G. A. L.

LAPIS LAZULI la'pis laz'ə-lī [Heb. *sappîr*] (Job 28:6, 16; Cant. 5:14; Isa. 54:11; Lam. 4:7; Ezk. 1:26; 28:13); AV, RSV, SAPPHIRE; NEB also SAPPHIRE; [Gk. *sápphiros*] (Rev. 21:19); AV, RSV, SAPPHIRE. "Lapis lazuli" is the RSV marginal reading for "sapphire" in these passages. It is a precious azure stone frequently showing traces of iron pyrite, more common in Mesopotamia than in Palestine.

See STONES, PRECIOUS.

LAPPIDOTH lap'ə-doth [Heb. *lappîḏôṯ*–'flames, torches']; AV LAPIDOTH. The husband of Deborah (Jgs. 4:4). The name occurs only here, and since no father's name is given, the passage has been interpreted in different ways. Some scholars have preferred to translate the phrase *'ēšeṯ lappîḏôṯ* not as "wife of Lappidoth" but literally, as "woman of flames," i.e., a fiery, spirited woman (see A. Cohen, *Joshua. Judges* [*Soncino,* 1950], p. 186). Others (e.g., R. Boling, *Judges* [*AB,* 1975], p. 95) have taken *lappiḏôṯ* as a nickname of Barak (whose name means "lightning"). The latter suggestion is somewhat plausible but remains conjectural. G. A. L.

LAPWING (AV Lev. 11:19; Dt. 14:18). *See* HOOPOE.

LASCIVIOUSNESS. *See* LICENTIOUSNESS.

LASEA lə-sē'ə [Gk. *Lasaia,* ℵ *Lassaia,* B *Lasea,* A *Laissa*]. A city on the south coast of Crete, 8 km. (5 mi.) E of FAIR HAVENS (Acts 27:8). In 1853 Captain T. A. B. Spratt found ancient ruins there, which G. Brown further examined in 1856. It is thought that ships anchored for any length of time at Fair Havens would have had to buy supplies at Lasea. F. F. Bruce (*Book of Acts* [*NICNT,* 1954], p. 504) identified Lasea with the Lasos mentioned by Pliny (*Nat. hist.* iv.12 [59]).

See T. A. B. Spratt, *Travels and Researches in Crete* (1856), II, 1-6). R. EARLE

LASHA la'shə [Heb. *lāšaʿ,* pausal form of *lešaʿ*]. A city mentioned only once (Gen. 10:19), in a description of the southern boundaries of Canaanite territory. Lasha's association with Sodom, Gomorrah, Admah, and Zeboiim suggests that it was located somewhere near the southeast shore of the Dead Sea, most probably in the Vale of Siddim S of the el-Lisan peninsula. Like the other cities with which it is associated, however, its actual location is unknown.

Following the tradition of the Jerusalem Targum, Jerome identified it with the hot springs at Callirhoe, the modern Zerqā Māʿîn, SW of Medeba near the eastern coast of the Dead Sea; this cannot be substantiated, however. Equally precarious is Wellhausen's suggestion (*Jahrbücher für deutsche Theologie,* 21 [1876], 403f.) that Lasha is a corruption of Heb. *lešam,* or Leshem (Dan), with Gen.

10:19 thus giving the boundary from Gaza to the Dead Sea and from there N to Dan. R. K. H.

LASHARON lə-shâr'ən [Heb. *laššārôn*]. A place mentioned in the list of "the kings of the land whom Joshua and the people of Israel defeated on the west side of the Jordan" (Josh. 12:7, 18). The LXX reads *basiléa Aphek tḗs Sarōn*, "a king of Aphek of Sharon." Some scholars therefore read *laššārôn* in the MT as "[which belongs] to Sharon," modifying "Aphek." The complex sentence structure makes this emendation extremely difficult, however. Since the list of kings and their city-states seems to have no geographical logic, any attempts to locate Lasharon are precarious. W. S. L. S.

LAST DAY. *See* DAY, LAST.

LAST DAYS. *See* ESCHATOLOGY; TIME, LAST.

LAST JUDGMENT. *See* JUDGMENT, LAST.

LAST SUPPER. *See* LORD'S SUPPER.

LAST TIME. *See* TIME, LAST.

LASTHENES las'thə-nēz [Gk. *Lasthenēs*]. A high official under the Seleucid king Demetrius II Nicator. He is called the king's "kinsman" (AV "cousin") and "father" (1 Macc. 11:31f.; Josephus *Ant.* xiii.4.9 [127]), but these are court titles not denoting blood relationship. According to Josephus (*Ant.* xiii.4.3 [86]) he was a native of Crete who raised an army for the king's first descent upon the coast and enabled Demetrius ultimately to wrest the throne of Syria from Alexander Balas (1 Macc. 10:67). The letter addressed to Lasthenes (11:30-37) indicates that he was probably prime minister or grand vizier of the kingdom. J. HUTCHISON

LATCH [Heb. *ḥōr*–'hole'] (Cant. 5:4); AV HOLE; NEB LATCH-HOLE. The Hebrew phrase in which this word occurs reads *min-ḥahōr*, literally "from the hole," rendered "to the latch" by the RSV. The NEB rendering "through the latch-hole" is more likely. The beloved apparently extends his hand from the outside through the hole in the door to unlock it. Some, e.g., M. Pope (*Song of Songs* [*AB*, 1977], pp. 517-19), see in the context an erotic euphemism.

LATCHET. A leather thong used for tying on sandals. *See* THONG.

LATIN [Gk. *Rhōmaïsti*] (Jn. 19:20). The language of the Roman rulers of Palestine in NT times. The term in Jn. 19:20 is an adverb meaning "in the language of the Romans," i.e., "in Latin." It is similar to the adjective found in the marginal reading of the Lukan parallel (23:38), *Rhōmaïkos*. The Bible has no other uses of the term "Latin."

Aramaic was the native language of the Jews at that time, and Greek was the language of culture and commerce, even for Romans, in that part of the world. Latin would have been used by Roman authorities for official communications. Thus the INSCRIPTION on the cross would have been understood by virtually anyone in Jerusalem who could read. E. W. S.

LATIN VERSION, OLD. *See* VERSIONS I.A.

LATRINE [Heb. *K mahᵃrā'ôṯ, Q môṣā'ôṯ*] (2 K. 10:27); AV DRAUGHT HOUSE; NEB PRIVY. The Israelites expressed their contempt for the temple of Baal by using it as a latrine. Cf. Ezr. 6:11. The *kethibh* is related to *ḥᵃrā'îm*, "dung," and the euphemistic *qere* (from the verb *yāṣā'*, "go out") means "places of going out to" (BDB, p. 426), i.e., the outhouse or privy.

LATTER DAYS. *See* ESCHATOLOGY II; TIME, LAST.

LATTER TIME. *See* TIME, LAST.

LATTICE. *See* HOUSE III.D.

LAUD [Heb. piel of *šāḇaḥ* (Ps. 145:4); Gk. *epainéō* (Rom. 15:11, AV)]; NEB COMMEND (Ps. 145:4), PRAISE (Rom. 15:11). A synonym for PRAISE (verb).

LAUGH; LAUGHTER [Heb. *bûz*] (Gen. 38:23); AV BE SHAMED; NEB "get a bad name"; [*lā'ag*] (Job 22:19; Ps. 80:6 [MT 7]); AV also "laugh . . . to scorn"; NEB "make game," MOCK; [*ṣāḥaq*] (Gen. 17:17; 18:12f., 15; 21:6; Ezk. 23:32); NEB also "charged with mockery"; [*ṣᵉḥôq*] (Gen. 21:6); [*śᵉḥôq*] (Job 8:21; Ps. 126:2; Prov. 14:13; Eccl. 2:2; 3:4; 7:3, 6; 10:19); NEB also PLEASURES; [*śāḥaq*] (2 Ch. 30:10; Job 5:22; 39:18, 22; 41:29 [MT 21]; Ps. 2:4; 37:13; 52:6 [MT 8]; 59:8 [MT 9]; Prov. 1:26; 29:9; 31:25; Hab. 1:10); AV also DERIDE, MOCK, REJOICE, SCORN; NEB also DERISION, DESPISE, SCORN; [Gk. *geláō*] (Lk. 6:21, 25); [*gélōs*] (Jas. 4:9); [*katageláō*] (Mt. 9:24 par. Mk. 5:40; Lk. 8:53).

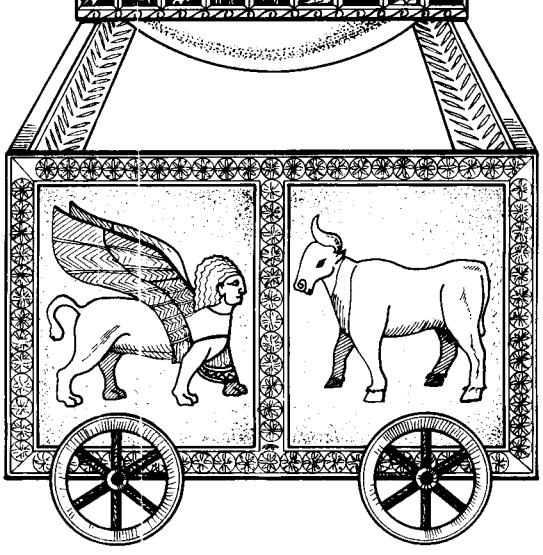
Laughter occurs often in the OT as an expression of mockery or derision. Judah fears that this will be the reaction of his neighbors to the news of Tamar's tricking him (Gen. 38:23). The people laughed at the couriers of Hezekiah who called them to celebrate the Passover in Jerusalem (2 Ch. 30:10). The fool responds with laughter to an argument he cannot counter (Prov. 29:9). The Chaldeans expressed their contempt for their enemies in such a manner (Hab. 1:10), as did the enemies of Israel (Ps. 80:6; Ezk. 23:32). But laughter is also the reaction of the righteous when the wicked reap the fruit of their ways (Job 22:19; Ps. 52:6; Prov. 1:26). Yahweh Himself laughs at the impotence of the wicked (Ps. 2:4; 37:13; 59:8).

Almost as frequently laughter occurs as an expression of joy. It may be the joy of a woman at the birth of a child (Gen. 21:6), or the relief of an accused man at his vindication (Job 8:21), or the joy of a nation when its fortunes are restored (Ps. 126:2). Such joy has its proper time (Eccl. 3:4) — the feast (10:19). Laughter is also closely related, however, to sorrow (Prov. 14:13; Eccl. 7:3), madness (Eccl. 2:2), and foolishness (7:6).

Laughter may also be an expression of disbelief, as when Abraham and Sarah laughed at the announcement of her pregnancy (Gen. 17:17; 18:12f., 15). It sometimes expressed a defiance of fear on the part of man (Job 5:22), the ostrich (39:18), the horse (v. 22), Leviathan (41:29), and the good wife (Prov. 31:25).

In the NT Jesus was the object of derisive laughter when He announced that the daughter of the ruler was not dead (Mt. 9:24 par. Mk. 5:40; Lk. 8:53). Laughter will be the reaction of those who presently weep when the time of blessing comes (Lk. 6:21), while those who now laugh will weep (v. 25). Those who would humble themselves before God should cease their joyful laughter (Jas. 4:9f.). J. R. PRICE

LAUGHINGSTOCK [Heb. *śᵉḥôq* (Job 12:4; Jer. 20:7; Lam. 3:14), *mᵉnôḏ-rō'š*–'a shaking of the head' (Ps. 44:14 [MT 15])];AV MOCK (Job 12:4), DERISION (Jer. 20:7; Lam. 3:14), "shake the head" (Ps. 44:14); NEB also "shake the head." Something laughed at or ridiculed. Job felt he was



a laughingstock to his friends because of his misfortune (Job 12:4); Jeremiah became a laughingstock because of his prophecies of doom (Jer. 20:7). The Israelites when defeated were mocked by other nations (Ps. 44:14; Lam. 3:14). *See also* DERIDE; MOCK.

LAVER [Heb. *kîyôr*; Gk. *loutrón*]; NEB usually BASIN.

I. In the Tabernacle.–Every priest attending the altar of Yahweh was required to wash his hands and feet before beginning his official duties (Ex. 30:19-21). Thus a laver or washstand was ordered to be made as part of the tabernacle equipment (vv. 17-21; 38:8). The laver was brass (bronze) and consisted of two parts, a bowl and its pedestal or stand (30:18). This tabernacle laver was a small one made of the recast hand mirrors of the women who ministered at the door of the tent of meeting (38:8). It was located between the altar and the TABERNACLE (40:30).

II. In the Temple.–In the temple of Solomon ten lavers and a "molten sea" were provided for washing parts of sacrificial carcasses (1 K. 7:23-37; 2 Ch. 4:2-6; *see* SEA, MOLTEN; TEMPLE). The "sea" was for the priests to wash in and therefore replaced the laver of the tabernacle; the ten lavers were used as baths for rinsing the portions used for burnt offerings (2 Ch. 4:6). The lavers themselves were probably cauldrons and were set on separately cast, circular stands, described in 1 K. 7:27-37. These stands were set upon a cubical base, whose four corners projected downward and were fitted with axles and wheels. Similar wheeled cauldron stands, with open-work sides closely corresponding to the "lions, oxen, and cherubim" with which the biblical stands were decorated, have been found in Cyprus and at Megiddo and seem to have been a current Phoenician type. Surviving examples, however, are much smaller than those of the temple, which were 5 cubits (3 m. [8 ft.]) high and supported cauldrons containing about 1500 l. (320 gal.) of water.

Laver and base from Solomon's temple (artist's rendering based on a reconstruction by P. L. Garber)

The idolatrous King Ahaz cut off the border of the bases and removed the lavers from the bases (2 K. 16:17). During the reign of Jehoiakim, Jeremiah foretold that the molten sea and the bases (no lavers existed then) would be carried to Babylon (Jer. 27:19-22). A few year later the bases were broken up and the brass of which they were made was carried away (52:17).

III. In the NT.–Greek *loutrón* occurs twice in the NT. In Eph. 5:26 Paul says that Christ gave Himself for the Church "that he might sanctify her, having cleansed her by the washing ["laver"] of water with the word; in Tit. 3:5 he says that Christians are saved "by the washing ["laver"] of regeneration and renewal in the Holy Spirit." These passages refer to the constant physical purity demanded of the Jewish priests when in attendance upon the temple. Christians are a "holy priesthood" and are cleansed not by water only but, in the former passage, "with the word" (cf. Jn. 15:3), and in the latter passage, by "renewal in the Holy Spirit" (cf. Ezk. 36:25; Jn. 3:5). The foot washing mentioned by Jesus is emblematic of this spiritual cleansing (Jn. 13:10). W. S. CALDECOTT

LAW IN THE OT.

I. Terms
II. Law in the Ancient Near East
III. Written Records
IV. Character and Design
  A. Decalogue
  B. Book of the Covenant
  C. Dt. 12:1–26:19
  D. Lev. 17–26
  E. Ceremonial Law
  F. Final Formation
V. Obsolescence

I. Terms.–The most frequently used Hebrew term for law is *tôrâ*, which occurs some 220 times in the OT. It is apparently derived from a root *yrh* used in its causative active form to mean "direction, guidance, instruction." The primary function of Hebrew law was to serve as a personal and national guide to ethical, moral, social, and spiritual living under the covenant deity. Although this law contains enactments or prohibitions that correspond to occidental concepts of codified law, it also exhibits certain fundamental differences. For example, common law in the western hemisphere is not concerned primarily with what is right or wrong but with what is permissible or not permissible. In the Hebrew enactments, by contrast, a strong and continued insistence upon ethical and moral values shows that they not merely undergird the law but in some instances form its essence. Although scholars have tended to describe Mosaic law as a code, its classification and intent are different from those of most Near Eastern legislative codes, being based more upon covenantal provisions and stipulations than upon *ad hoc* decisions. Hebrew law and Near Eastern codes have some material in common, of course, due to environmental and cultural similarities, but the distinctive ethos and intent of Hebrew law make any correspondences modest indeed.

To clarify the origin of the word *tôrâ* appeal has been made to a closely related verb *yārâ*, "cast," as with lots (Josh. 18:6). *Yārâ* is also used for the shooting of arrows (e.g., 1 S. 20:36f.), although there is no evidence that it ever describes divination by means of discharging or shaking arrows from a quiver, since a different verb is used in the OT for the casting of lots. It thus seems best to regard *tôrâ* as derived from the causative form of the verb *yārâ* and meaning "show, indicate, direct, teach," as in Ex. 24:12; 1 S. 12:23. The word for teacher (*môreh*) is derived from the same root, as in Isa. 30:20. While *tôrâ* may mean simply human direction (Prov. 1:8), it most

LAW IN THE OT

frequently refers in the OT to divine law. The singular form can and does refer to one enactment, but it most commonly describes the general body of divinely revealed law. It conveys no information about the way that the law, in part or whole, was revealed, but indicates that its immediate purpose was to guide the covenant people in the various matters under consideration, thus leading them to a deeper knowledge of God and a more resolute commitment to fellowship with Him.

Seven other words are used as synonyms of *tôrâ*:

(1) *Miṣwâ*, "commandment, command" (Gen. 25:5; Ex. 15:26), is usually understood as a specific instruction from God that is to be obeyed rather than as a general law that is to be observed. The emphasis is therefore categorical rather than casuistic.

(2) *Mišpāṭ*, "judgment, ordinance," is a term with a variety of meanings. It is sometimes used in the singular in an abstract sense (Gen. 18:19; Dt. 34:2) and on other occasions describes the judicial decision itself (Dt. 16:18f.; 17:9; 24:17). The plural designates those enactments within the larger corpus that evidently originated in judicial decisions that were, under divine sanction, incorporated into the larger *tôrâ*. It is therefore quite permissible to translate this term "precedent."

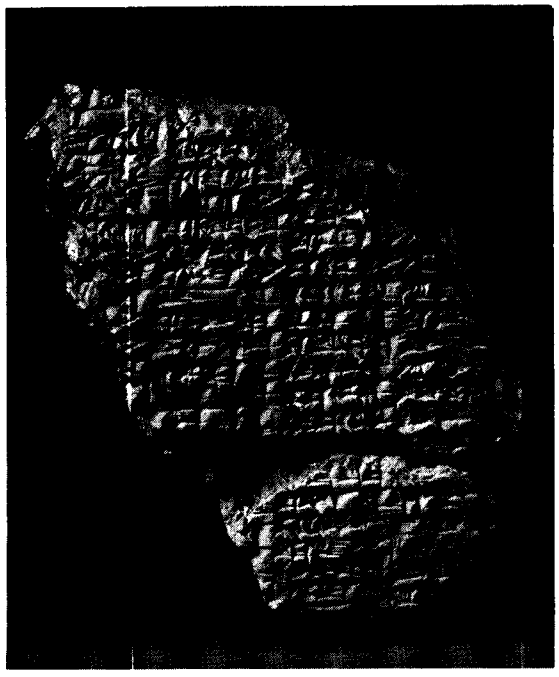
(3) *ʿēḏûṯ*, "admonition, testimony," is a general word for God's law as it exhibits the manner of His dealings with His people Israel. Thus the ark is called the "ark of the testimony" (Ex. 25:22) because it contained the "testimony" or tablets of the law that constitute the basic covenant formulation.

(4) *Ḥuqqîm*, "statutes, oracles," is another general description of law. It apparently designates "something that is engraved" and therefore established unchangeably as a statute by a lawgiver. Such statutes when mentioned in connection with the priesthood were mandatory for worship, but when formulated by the state they had the force of royal pronouncements or decrees. The expression "ordinances and statutes" (Lev. 18:4; Dt. 4:1) describes the entire scope of Hebrew law.

(5) *Piqqûḏîm*, "orders, precepts," is used only in the Psalms (19:8 [MT 9]; 103:18; etc.), of God's orders or assignments.

(6) *Dāḇār*, "word" (Ex. 34:28; Dt. 4:13), is an important synonym for *tôrâ*. It was used early for divine oracles or revelation (Jgs. 3:20) and came to be applied in Jewish tradition especially to the Commandments or "Ten Words." Commentators have remarked frequently that this usage emphasizes the revelatory nature of the pronouncements, whereas "commandments" tends to stress their authoritarian aspect. Only in the sense that the "words" are the revelation of the divine will for the Israelites can they lay claim to the authority that must necessarily characterize a "commandment." Just as the law as a whole can be considered *tôrâ*, so the revelation of God, and especially the Sinaitic covenant, can be regarded as *dāḇār*.

(7) *Daṯ* is an Aramaic form of Old Pers. *dātam*, "royal edict, public law," and is used in this sense in Ezr. 7:26; Dnl. 2:3, 15; 6:8, 12, 15 (MT 9, 13, 16). *Daṯ* also occurs in Ezr. 7:12, 14, 21, 25f.; Dnl. 6:5 (MT 6) to describe divine law and was thus considered equivalent to *tôrâ*. In Dnl. 7:25 and probably in Ezr. 7:25 the term seems to refer to Jewish religious traditions.



The LXX generally translates *tôrâ* by *nómos*, "law," which occurs some 430 times, although only about half of these are actually matched by Hebrew words. The Greek term comes from a verb meaning "deal out, assign, apportion," referring apparently to processes that undergirded principles of legal ownership. *Nómos* occasionally translates *miṣwâ* (Prov. 6:20), *dāḇār* (LXX Ps. 118:57; MT 119:57), *mišpāṭ* (LXX Jer. 30:6; MT 49:12), and *ḥōq* (Josh. 24:25). *Nómos* occurs most frequently in the Pentateuch — about sixty times. Other Greek words include *entolḗ*, "decree, commandment," as a general rendering for *miṣwâ*; *próstagma*, "injunction," which translates *ḥōq* and *ḥuqqâ*; *dikaíōma*, "ordinance, declaration," which sometimes renders *ḥōq* and its cognate forms but more commonly translates *mišpāṭ*; *nómimos*, "conformable to law, lawful."

II. Law in the Ancient Near East.—The earliest formulations of law were made by the Sumerians, a very intelligent and creative people who were responsible for the world's first high culture. The Sumerians greatly emphasized law and order in society, and in the middle of the 3rd millennium B.C. they began to draw up legislation based upon what modern western lawyers would describe as a theory of social contract. By this means the freedom of individual expression was ensured as long as it did not conflict seriously with the aspirations and activities of others. But because the Sumerians were aggressive by nature, it was not long before social disputes needed to be resolved by the authoritarian pronouncements of a disinterested third party. This person was the ensi, the ruler of the individual city-state, who was responsible for the administration of justice. He appointed other citizens to serve as judges, so that court cases were presided over by two or three such officials. The oral decisions that they made constituted legal precedents, which in turn became the basis of written law when the decisions were committed to writing for purposes of reference. The Sumerian word for the record of the court proceedings was ditilla, "completed lawsuit," a term that covered other aspects of litigation as well.

A movement to reform the social abuses that had arisen in Lagash in the middle of the 3rd millennium B.C. resulted in the promulgation of regulations by a vigorous ruler named Urukagina. Coming to power *ca.* 2350 B.C., he instituted reforms to correct rampant political, economic, and social evils. Some of the more oppressive forms of taxation that had been devised by the palace bureaucracy were prohibited, including the acquisition by the ensi of property that belonged to the temple. Certain types of levies that had grown up in previous days were discontinued, and the oppression of various segments of the community was made illegal (S. N. Kramer, *The Sumerians: Their History, Culture, and Character* [1963], pp. 317-323). While there may have been even earlier attempts at the reformation of city-state life by enlightened ensis, Urukagina's regulations are the earliest surviving Sumerian ordinances of their kind. They were unparalleled until the time of Ur-Nammu (*ca.* 2070 B.C.), the Sumerian who established the celebrated Third Dynasty of Ur (*ca.* 2070-1960). To demonstrate their importance Ur-Nammu's legal promulgations may well have been engraved originally on imported stone, but all that has survived of his legislation is a fragmentary and barely legible clay tablet made several centuries after he died. A prologue to the laws contains a certain amount of cosmology, a procedure established by the Sumerians apparently to give due authority to their legal pronouncements. The remainder of the text, where legible, refers to regulations aimed at ridding society of unscrupulous merchants, correcting corrupt civic practices, and forbidding the exploitation of the poor by the wealthy (*ANET*, pp. 523-25).

By this period restitution rather than retribution seems to have been favored by the lawgivers of ancient Sumer, and this trend was continued in the social legislation of Lipit-Ishtar of Isin, *ca.* 1850 B.C. His code, inscribed originally on a stele and copied subsequently onto a single large tablet, comprised a prologue, a body of laws, and an epilogue. Although much of the text has been lost, an examination of the extant material indicates that it was

LAW IN THE OT

Fragment of the Lipit-Ishtar law code from Nippur dealing with boat rental, orchards, and slaves (University Museum, University of Pennsylvania)

compiled far more systematically than the enactments of Ur-Nammu. The regulations deal with boat hiring, the treatment of orchards and of uncultivated ground, the interaction of masters and slaves, inheritance and marriage, and other social issues. The epilogue invokes a blessing upon those who do not deface the original stele and a curse upon those who do. Other nations later applied this concept to the actual legislation that was being promulgated.

The most formally organized collection of laws in Mesopotamia emerged from the period of HAMMURABI of Babylon (*ca.* 1792-1750 B.C.). Apparently dependent to some extent upon Sumerian precursors, his celebrated code was devised for an urban irrigation culture. Enclosed by a prologue and an epilogue cast in poetic form, the legislative section itself contains nearly three hundred prose paragraphs governing commerce, medicine, marriage, adoption, wages, slavery, property, various crimes, etc. The cases mentioned in the legislation are grouped according to subject matter; for this and other reasons the enactments cannot be considered a code in the modern legal sense (D. J. Wiseman, *Zondervan Pictorial Encyclopedia of the Bible*, III, 24). The court cases of that day seldom if ever reflect Hammurabi's enactments, probably because his laws refer to cases that he personally judged. It is thus incorrect to imply that the laws constitute an ideal lacking in practical application, as W. J. Martin suggested (*DOTT*, p. 28). There are certain points of contact between the legislation and Moses', although it must be remembered that the latter laws were intended to meet the needs of a comparatively simple agrarian culture in Palestine.

Several closely related groups of Hittite laws have been recovered from Boghazköy and deal with the matters prominent in the Hammurabi legislation. Like the Sumerians, the Hittites seem to have based their enactments on court decisions and to have formulated them in writing about the 13th cent. B.C., although there are obvious elements from the time of the indigenous Hatti, more than half a millennium earlier.

From a somewhat later period than the Hittite laws come a group of Middle Assyrian enactments, preserved in a recension from the twelfth-century B.C. Classified or codified law does not seem to have existed as such in ancient Egypt, although various kinds of contractual documents, especially those relating to marriage, have survived from different periods.

Near Eastern legal collections often adopted the style of case law; this pattern is reflected in many Mosaic laws, particularly in those dealing with topics of a similar cultural character. Where Hebrew covenantal legislation is characterized by a prologue and an epilogue, the framework is precisely that of the laws of Lipit-Ishtar and Hammurabi. Mesopotamian prologues and epilogues name the pagan gods to whom the legislation owes its origin and from which the human administrators of the laws derive the authority to impose them. The obvious similarities between early Mesopotamian codes and ancient Hebrew law give a thoroughly historical character to the latter.

These similarities are to be expected when it is remembered that Gen. 1–11 consistently reflects a Mesopotamian culture so virile that it pervaded Near Eastern society for millennia. Traces of this culture appear in the Pentateuch, which in addition to purely legal elements has allusions to religious customs and practices from pre-Mosaic times. These include the offering of sacrifice and the use of altars (Gen. 22:13; 28:18f.; etc.), the religious use of pillars (28:18), purification for sacrifice (35:2f.), tithes (14:20; 28:22), circumcision (17:10; Ex. 4:25f.); inquiry at a sanctuary (Gen. 25:22); sacred feasts (Ex. 5:1; etc.), priests (Ex. 19:22), sacred oaths (Gen. 14:22f.), marriage customs (16:1-6; 24:1-9, 34-67; 25:6; 29:16-30), birthright (25:31-34), elders (24:2; 50:7; Ex. 3:16), homicide (Gen. 9:6), etc.

Archeological evidence from Larsa, Mari, Nuzi, Alalakh, and other sites substantiates the biblical record of Mesopotamian society in the patriarchal period. The roots of Hebrew law and tradition reach far back into the Middle Bronze Age and thus help to account for consonance between Hebrew laws and those of other Near Eastern peoples. Although some writers have attempted to disparage the value of M.B. archeological evidence for demonstrating the history of the patriarchs (e.g., T. L. Thompson, *Historicity of the Patriarchal Narratives* [*BZAW*, 133, 1974], J. van Seters, *Abraham in History and Tradition* [1975]), the validity of the elements to which the writers have objected can be shown by reference to other archeological materials antedating the 15th cent. B.C. These include legal, commercial, and personal documents from various Mesopotamian sites (see D. J. Wiseman and A. R. Millard, eds., *Essays on the Patriarchal Narratives* [1980]; for a survey of criticisms of Thompson and van Seters see E. Yamauchi, *Scriptures and Archaeology* [1980], pp. 3-6). Thus there can be no question as to the reality of the customs and traditions of the pre-Mosaic period that are reflected in books such as Genesis, and no reason to deny the genuine nature of Hebrew law as promulgated under Moses.

III. Written Records.–The Sumerian emphasis upon law and order commended itself to various sedentary societies of the ancient Near East, who produced their own legislation, for which, as observed above, there is significant written testimony. But the kind of regulations that governed settled urban communities did not apply in quite the same way to the Hebrew patriarchs, who were seminomadic for the greater part of their history. Thus it is hardly to be expected that they would have felt the need to devise regulations for social conduct that were significantly

LAW IN THE OT

different from the current traditions of desert life. But certain practices of, e.g., Abraham probably show the cultural influence of his native city, Ur of the Chaldees. Following local custom, Abraham adopted his household steward as his heir when it appeared that he would not have a natural descendant (Gen. 15:2f.). An Old Babylonian contract tablet, recovered from Larsa and dated *ca.* 1800 B.C., testifies to the continuance of this provision for males without expectation of descendants. Abraham's reluctance to expel his slave-concubine Hagar and her son, despite his wife Sarai's insistence (21:10f.), is understandable in the light of Lipit-Ishtar's legislation (cf. § 24) protecting the inheritance rights of all children, including those of concubines. As the patriarchs migrated first toward Syria and then to Canaan, they must have become familiar with the customs and laws of such great cultures as Mari, Nuzi, Ebla, and Alalakh. Yet it was only near the end of Jacob's life, when sedentary settlement in Egypt had become a fact for the Hebrews, that social legislation of the Mesopotamian or Hittite pattern would have become a necessity for them.

There can be little doubt that the Hebrews formulated such legislation during their four centuries or so in Goshen to deal with specific situations and contingencies, much as other ancient Near Eastern peoples had done. Since these circumstances would have matched elements of sedentary life in pagan nations, there would obviously have been degrees of correspondence in the resultant enactments. But significant differences would also have emerged, reflecting the distinctive ethos of these early Hebrews and the revelation of the one true God that they possessed through their ancestors. The members of the Goshen community were descendants of the patriarch with whom God had entered into covenant, and their growing numbers were already in fulfillment of one aspect of that great promissory relationship (Gen. 15:5; 17:2; cf. Ex. 1:7). Even before the time of Moses the Hebrews were familiar with the concept of a covenant deity (Gen. 17:7) who promised a land (v. 8) and protection (15:13f.) in return for the keeping of the covenant stipulations (17:9-14). Still to come were the characteristic emphases upon strict monotheism and obedience to a body of enactments designed to infuse the community with moral and spiritual values as well as to order it.

The ancient Near Eastern practice of recording laws and statutes as occasion necessitated may well have been followed by the Hebrews during their sedentary life in the Goshen region, but there is certainly no independent written form of such laws extant. What is more probable is that certain relevant legislation from that period was incorporated into the laws of Israel after the revelation of the Decalogue at Mt. Sinai. Perhaps some of the material in Ex. 21–23 had its beginnings in the Goshen period and along with other sections was modified somewhat before being incorporated into the corpus of Mosaic law. A Near Eastern precedent for this procedure would have been set by Hammurabi, who included enactments from Lipit-Ishtar and the Amorite king Bilalama of Eshnunna in his code.

Whatever the precise origin of this type of enactment, the "Ten Words" were unquestionably unique to Israel. They were in written form from the beginning of Israel's history as a nation, and the existence of two "tablets" of the law (Ex. 32:15) indicates that one was a duplicate, following the pattern of Hittite international treaties. The "Ten Words" were written "in the writing of God" (v. 16), thus embodying the supreme authority of the God of Sinai, and were engraved in stone, symbolizing their permanence for mankind. Since they were meant to be binding upon every class of humanity that would enter into a spiritual relationship with God, they are just as valid in modern Christian worship as they were in ancient Israel. Modern scholars have described them as positive or categorical prohibitions and have noted that in certain instances the manner of their enforcement has not been predicated.

Certain portions of the Torah were credited specifically to Moses himself, such as the judgment against Amalek (Ex. 17:14), the Book of the Covenant (20:22–23:33), the restoration of the Covenant (34:27, referring to vv. 10-26), an itinerary (Nu. 33:1ff., relating to the source underlying vv. 3-40), and the bulk of Deuteronomy (K. Kitchen, *NBD*, p. 849). The committing of material, particularly historical or revelatory material, to writing completely accords with the ancient Near Eastern scribal practice of recording, generally in annalistic form, important events when they occurred or shortly thereafter. By uniform Hebrew tradition the Torah was always copied out on suitably prepared skins of animals, a contingency that harmonizes completely with the wilderness milieu of the leadership of Moses.

Along with the now thoroughly disproved Wellhausenian notion that writing was only invented *ca.* 1000 B.C. must be dispelled the equally misguided concept of nineteenth-century literary-critical scholars that no individual can possibly combine in himself the abilities to compose historical narrative, to write poetry, and to collate legal material. As Kitchen showed (*NBD*, p. 849), a versatile writer who lived as much as seven centuries before Moses combined the talents of poet, educator, and political propagandist and was most probably the literary stylist of *Satire of the Trades*, which was used as a text in the scribal schools. It is not necessary to suppose, of course, that attributing Mosaic authorship to pentateuchal materials means that Moses wrote out every word. Indeed, at least some of the written sources credited specifically to him could have been dictated to scribes rather than written by his own hand. Quite possibly the presence of third-person pronouns in various parts of the enactments indicates that these sections were dictated. Such sections would most probably have been transcribed by the officials mentioned in Nu. 11:16 (*šōṭᵉrîm*; cf. Akk. *šaṭāru*, "write"), whose literacy would obviously have associated them closely with judicial decisions (cf. Dt. 16:18; 1 Ch. 23:4). If portions of the law were written down as the result of discussions relating to specific social or legal issues, the materials on which the verdicts were recorded would most probably have been committed to the priests or scribes for safekeeping until they could be assembled with related enactments and incorporated into a roll.

The written record of the law should thus be seen most properly against the known background of compilatory and editing practices current in the 2nd millennium B.C. It is highly improbable that a person such as Moses, whose guiding powers touched every aspect of life in the wilderness community, would have had minimal contact with the sacred written regulations by which that community began to be governed, particularly when he was the human agent by which the "Ten Words" were transmitted to Israel. On the contrary, it is only to be expected that the educated and literate leader of the people would have devoted himself assiduously to this fundamentally important regulatory area of national life. Such a concern would have involved not merely the composing of the materials attributed in the text to Moses but also the supervision of and probable participation in some of the editing.

Even when a book was approaching its final form, an editor, whether Moses or someone else, could still have inserted additional relevant legislative or other material where two rolls, presumably of leather, were to be joined.

LAW IN THE OT

An example of this may be in Ex. 6, where quite possibly v. 13 marks the end of one roll and v. 28 the beginning of another. Since the genealogy of vv. 14-27 interrupts the continuity of the narrative, it may have been inserted between two rolls. The genealogy is reminiscent of Mesopotamian family trees and ends with a characteristic colophon (v. 26) attesting the scribe or owner of the source ("This is the genealogy of Moses and Aaron," poorly translated both by the RSV, "These are the Aaron and Moses," and by the NEB, "It was this Aaron, together with Moses"). In v. 27 is the scribal dating of the written record to the immediate pre-Exodus period and the concluding statement that the preceding genealogy was that of Moses and Aaron or was written by them. As with the first mention of these two individuals, the English versions confused the issue completely by mistranslation. Since the record was contemporary with Moses and Aaron his brother, Moses might well have been the redactor who inserted a genealogical section, drawn up in familiar Mesopotamian style, at what he considered to be an appropriate point in the historical narrative. That two rolls were joined at that place may be inferred from the similar nature of the material with which one ended and the other commenced, making the second roll able to be read intelligibly yet independently of the first. Such a procedure would have conformed with the literary traditions of both Babylonia and Egypt, where scribes periodically revised and added to literary, liturgical, and other documents (cf. *FSAC*, pp. 79f.). The written record of the law thus proceeds from the life-situation of Israel, not from a pastiche of purely imaginary "documentary sources" such as J, E, and P. Indeed, more than a century of intensive research has failed to uncover any Near Eastern documents, inscriptions, or annals that were compiled according to the literary-critical principles so confidently advocated by nineteenth-century pentateuchal critics.

IV. Character and Design.—Whatever the origin and nature of the social customs governing life among the Hebrews before Moses' time, the Exodus from Egypt and the covenant at Sinai provided the formal basis for Hebrew law, making it in effect covenant law. As such it was intended to undergird the entire life of a community chosen above all other nations to exist consciously before God as "a kingdom of priests and a holy nation" (Ex. 19:6). The Hebrews seem never to have conceived of the law as a static entity, however, but rather as a dynamic reflection of the nature and vitality of the divine revelation. Covenantal law could thus be modified and adapted to meet changing situations without serious difficulty, and even the "Ten Words" themselves were not transmitted with complete verbal consonance in the time of Moses, as the slight divergences (cf. Ex. 20:11 and Dt. 5:15; Ex. 20:17 and Dt. 5:21) in the two records indicate.

Ancient Near Eastern covenants were legally binding agreements between equals (parity treaties) or between an overlord and a vassal (suzerainty treaties). Form-critical and other studies have shown the striking parallels in structure between second-millenium-B.C. suzerainty treaties and the records of the covenant in Exodus and Deuteronomy (*see* COVENANT [OT]). These treaties furnish an excellent historical and legal background for studying the way in which the Sinai covenant was formulated and applied (cf. K. Baltzer, *Covenant Formulary* [Eng. tr. 1971], p. xii). The relationships among different types of groups as described in the Mari texts and in the Amarna correspondence support the biblical contention that the concept of covenant existed for centuries before Moses.

The Hittite suzerainty treaty resembles the biblical covenant in several significant ways. The approach to the prospective vassal is made by a victorious king, who in a preamble identifies himself by title as a powerful monarch (cf. Ex. 20:1; Dt. 1:1-5). In second-millennium-B.C. covenants this is always followed by a historical prologue, in which the great king describes his relationships with the proposed vassal's precursors and emphasizes his beneficence toward those bound to him by covenant (cf. Ex. 20:2; Dt. 1:6–3:29). This feature is noticeably absent from the small group of first-millennium-B.C. treaties that have survived, principally from Syria and Assyria, thus demonstrating the antiquity of the model upon which the Mosaic legislation was based. Not merely do first-millennium-B.C. covenants omit historical prologues but, depending upon the country from which they originate, they vary the order of the curses and stipulations and allow them to be either preceded or followed by the witnesses. Even though some of these treaties have survived only in mutilated form, there is no evidence that they once contained historical prologues like those of second-millennium-B.C. Hittite treaties. Nor are they elaborated on anything like the political scale of their precursors of the previous millennium.

After the introductory formalities are completed, the Hittite treaty continues with the basic stipulations that the vassal is required to observe (cf. Ex. 20:3-17, 22-26; Dt. 4:1–11:32). The detailed stipulations that follow explain more fully the nature of the general terms (cf. Ex. 21:1–23:33; 25:1–31:18). Hittite custom required that a copy of the treaty be deposited in the most revered place acknowledged by the vassal (cf. Ex. 25:16; Dt. 31:9, 24-26), so that it would be accessible for public reading once in a generation (cf. Dt. 31:10-13). Suzerainty treaties always include a list of gods who serve as witnesses, headed by deities that the great king reveres. Since OT monotheism precluded this practice, pagan deities were replaced by memorial stones (Ex. 24:4; Josh. 24:27), by the universe (Dt. 32:1), by the song of Moses (31:16–32:47), by the Book of the Law (31:26), and by the recipients of the covenant (Josh. 24:22). Whereas in Hittite international treaties a section of curses and blessings follows the list of witnesses, in the OT the blessings (cf. Lev. 26:3-13; Dt. 28:1-14) and curses (cf. Lev. 26:14-20; Dt. 28:15-68) precede the witnesses. In Dt 15, as in Hittite treaties, the list of curses for disobedience is considerably longer than that of the blessings for obedience.

Other Hittite-treaty features include a feast to celebrate the ratification of the treaty (cf. Ex. 24:11) and the solemn ceremony of entering into suzerain-vassal relationship (cf. vv. 4-10) or a covenant-renewal rite (Dt. 27:9-26). Finally, there is the provision that the great king can take legal action against a vassal who refuses consistently to honor the obligations of covenant. In the OT this provision takes the form of the "controversy" pattern, by which God proposes to take His people to court for their perfidious behavior (Hos. 12:2; Mic. 6:2; see H. Huffmon, *JBL*, 78 [1959], 285-295; J. Limburg, *JBL*, 88 [1969], 291-304). The biblical use of the Hittite model indicates that it was as familiar to the Hebrews of the 2nd millennium B.C. as to other Near Eastern peoples and makes clear that the Hebrews could never convincingly plead ignorance or lack of understanding for their subsequent violation of the covenant.

Indications of internal design in Hebrew law were postulated by A. Alt, who after studying the Decalogue (Ex. 20:2-17) and the so-called Covenant Code (20:22–23:33) maintained the existence of three principal types of legislation. The first, variously named apodictic or categorical, comprises absolute commands stated positively and negatively. Such prohibitions are generally expressed in the second-person singular and in the future "tense,"

although the second-person plural and the imperative mood are sometimes used. The style is emphatic, rhythmic, and poetic, and apodictic material is frequently thematic in design, presumably to aid memorization and recitation. This genre is well illustrated by the Decalogue. A second type, described as casuistic or case law, resembles much of the legal material in Mesopotamian enactments. Casuistic laws in the Pentateuch normally commence with a protasis ("if" clause) in which the major issues are introduced by Heb. *kî* and subsidiary ones by *'im* (e.g., Ex. 21:2-6). When the offense has been stated, along with associated matters, the response clause or apodosis enunciates the legal pronouncement. This type of enactment has been seen as representing precedents or decisions in actual cases, whether or not from the pre-Mosaic period. A third type that Alt recognized commences with an active participial form ("a person doing . . .") and ends with the death verdict ("he shall surely be put to death," e.g., Ex. 21:12). Alt held that whereas apodictic law is entirely Israelite in origin and comes from a period when the twelve tribes were still seminomadic, casuistic law is pre-Israelite and was inherited from the Canaanites after the Israelites had conquered the land ("The Origins of Israelite Law," in *Essays on OT History and Religion*, pp. 101-171).

Subsequent investigations by other scholars (e.g., E. Gerstenberger, *Wesen und Herkunft des 'Apodiktischen Rechts'* [1965]) have enlarged the field of study and placed more emphasis on the life-setting of the Hebrew regulations. It was questioned whether the prohibitions can even be regarded as law, since no punishments are listed for violations. Some scholars have thought that apodictic law originated with the family circle, with the clan, with leaders of the community, or with tribal heads, and they have suggested that the pronouncements commencing with a participial form and carrying the death penalty derived from tribal deliberations. Other studies have shown that the design of the law includes regulations of a purely cultic character that were to be followed and taught by the priesthood. Inasmuch as these prescriptions aimed to perpetuate holiness in the community of Israel, they are at the heart of the concept of covenant law and are not to be dismissed as mere ritual.

Studies in Mesopotamian law have shown that the casuistic sections are far less likely to have been borrowed from Canaanite society than from the common traditions of the West Semitic peoples, including the Eblaites. Since Israelite law was commonly administered in the city gate, some of the precedents that the judges followed may well have been based originally on purely local issues. It is now thought improper to regard apodictic law as the product of stern desert mores with no reference to more developed cultures, since such law has been found to be consonant with certain treaties of Hittite origin (R. de Vaux, *Ancient Israel* [Eng. tr. 1961], I, 147). Indeed, the modeling of the Sinaitic covenant on the Hittite suzerainty treaty points to the influence of a contemporary high culture and indicates the suitability of the covenant formulation for desert and urban living alike.

The uniqueness of the Decalogue has already been noted, and whatever the origin of the pre-Mosaic legislative elements of the Torah, the moral and spiritual ethos of Sinai clearly imposed its distinctive imprint upon the legal elements as they were assembled. Because innovative practices were forbidden by books such as Leviticus in favor of strict obedience to the revealed will of God, those who collected and arranged the various legal components were apparently guided by the conservative traditions of the Near Eastern scribes. Any redactional presuppositions would have been strictly consonant with the theology of the Sinai revelation, and any updating or accommodating of material to changed historical or social conditions would have followed the normal practices of second-millennium B.C. scribes. Thus the postulate that over a lengthy period of time a "school" of editors (or redactors) comprising "country Levites" or others imposed upon social legislation a distinctive theological imprint, such as a supposed Deuteronomic theology, simply cannot be substantiated by what is now known about the processes of scribal transmission in the ancient Near East. In Hebrew tradition, just as much as among the Sumerians, the scribes were guardians of what had been transmitted to them. They were not innovators, and their theology was consistently that of the tradition.

The corpus of Hebrew law contains certain rather obvious sections of legislation that scholars have frequently labeled, though not very satisfactorily, "codes." Five main units are identified by form criticism.

A. Decalogue. As observed above, the Ten Commandments occur twice in the Pentateuch (Ex. 20:1-17; Dt. 5:6-21), with slight transmissional variations in Deuteronomy due most probably to the material's being quoted from memory. Since Moses was involved on both occasions, the problems raised by the small differences are clearly not very significant. Much more serious has been the debate over the dating of this material, suggestions ranging from the mid-2nd millennium B.C. to the late postexilic period (cf. H. H. Rowley, *Men of God* [1963], pp. 13ff.), with some radical nineteenth-century literary critics denying any connection between the Decalogue and Moses (e.g., K. Budde, *Religion of Israel to the Exile* [Eng. tr. 1899], p. 32). But in uniform Hebrew tradition the "Ten Words" have always been associated with the work of Moses; they must have originated in the 2nd millennium B.C., since they furnished the moral and spiritual basis for the entire historic covenant relationship between God and the Israelite tribes.

If one uses Hittite suzerainty-treaty categories, the "Ten Words" represent the basic stipulations of the covenant. The fourth and fifth commandments appear as positive commands, but the remainder are strongly negative in form. Suggestions that all the commandments were stated originally in a negative manner simply cannot be substantiated. Equally uncertain is the view that every commandment was originally a very short utterance and that some were enlarged subsequently with glosses. Since monotheism and obedience are at the heart of the Sinai covenant, the second and fourth commandments in particular would have needed from the beginning to be expressed in full form. In such a case it is improper to attribute the slight divergences of the two records of the Decalogue to redactional activity at a considerably later period. It is also most precarious to assume, as some critical scholars have done, that no benefits are promised consequent upon obedience, because again there is no factual evidence that the fifth commandment (Ex. 20:12) ever existed in anything other than its present form. Hittite suzerainty treaties consistently list the blessings that will accrue to the obedient vassal, as Dt. 28:1-14 also does. Quite clearly an arbitrary truncating of the "Ten Words" raises real questions that critical scholars then attempt to solve by artificial means.

Considered as the commencement of a covenant form, the structure of the "Ten Words" is quite primitive. The preamble (Ex. 20:1) introduces God in a brief, unceremonious fashion, while the historical prologue (v. 2) is equally forthright and unpretentious. The basic stipulations (vv. 3-17) are emphatic, authoritarian, and unequivocal, as be-

LAW IN THE OT

fits the nature of apodictic pronouncements. By contrast, the covenant as presented by the book of Deuteronomy, which in itself is a covenant-renewal document, is a much more sophisticated and literary composition, even though it contains precisely the same emphases as the Exodus material. While the Ten Commandments have been interpreted as a moral or ethical code, they were in fact analogous to criminal law in their application to the life of the Israelites. Although the offenses named are predominantly against ethical or moral standards, they must still be recognized as offenses. Whether portions of certain commandments had existed in some form prior to Moses' time can only be speculated. What is certain, however, is that the commandments were given definitive form at Mt. Sinai and became fundamental for all future Israelite religious and community life.

B. Book of the Covenant. The Book of the Covenant, popularly regarded by scholars as comprising Ex. 20:22–23:33, corresponds to the detailed stipulations of Hittite international treaties. Quite probably, however, the "Book of the Covenant" that Moses read to the Israelites when the covenant was ratified at Mt. Sinai was only the Decalogue. The material of this book is unquestionably the oldest codified form of Hebrew law and may well have incorporated some pre-Mosaic enactments that had arisen during sedentary life in Goshen. Some may even have reflected community life at Haran in the time of Abraham, thus accounting in part for the correspondences with Mesopotamian legislation.

The life-style presupposed by the laws, while evidently sedentary, is comparatively unsophisticated. As in the Early Bronze Age, wealth was reckoned in terms of cattle and slaves (Ex. 21:20f.), relationships between master and slave were defined carefully (vv. 2-11, 20f., etc.), principles of retaliation and compensation were established (vv. 22-24, 28-32; 22:1-14), agricultural feasts were commanded (23:14-17), and social justice was stressed (22:21-27). Nothing in the legislation demands a life-setting other than the Israelites' lengthy, semisedentary sojourn near Kadesh before their entrance into Canaan. Even the prescribed altars were to be made of earth (20:24), as contrasted with the stone structures of later days.

The Book of the Covenant contains casuistic precedents and apodictic statutes. The historical situation makes it hardly surprising that the categorical prohibitions are like those of the Decalogue. Whatever common tradition of law underlies the enactments, the imprint of the Sinai ethos has very clearly been imposed upon it. Idolatry, bestiality, and unethical behavior are prohibited in favor of obedience to the revealed will of God and a concern for justice, holiness, and mutual responsibility in the community.

Since the legislation constituting the Book of the Covenant could have been amended, revised, or supplemented in very modest ways shortly after the entrance into Canaan, some scholars have dated the corpus *ca.* 1200 B.C. The character of the material, however, suggests that it would hardly have been necessary to introduce significant modifications then, since there were other, more suitable collections of rules and regulations where such changes could have been and probably were made. The Book of the Covenant was not meant to be a comprehensive compilation of laws for the guidance of the covenant community but instead a summary of the most fundamental precepts by which God's people were to live. Quite clearly the Israelites did not need to be in sedentary occupation of Canaan before such rules could be promulgated.

The content of the book has been analyzed as follows: (1) basic instructions for Israelite worship (Ex. 20:22-26); (2) civil legislation (21:1–23:13), dealing with the rights of slaves (vv. 2-11), retaliation (vv. 12-32), property (vv. 33-36), theft, dishonesty, and damage to property (22:1-15), seduction (vv. 16f.), social and religious duties (vv. 18-31), and the protection of rights (23:1-13); (3) regulations for the three major festivals (vv. 14-19); (4) the relationship of God and His covenant people (vv. 20-33).

C. Dt. 12:1–26:19. These passages are a comprehensive exposition of the main laws by which the Israelites were to be governed. Some scholars have seen these passages as another code of laws in whole or in part, and liberal writers have attributed them to the 1st millennium B.C. (cf. R. H. Kennett, *Deuteronomy and the Decalogue* [1920]; F. Horst, *Das Privilegrecht Jahves: Rechtsgeschichtliche Untersuchungen zum Deuteronium* [1930]; R. P. Merendino, *Das deuteronomische Gesetz* [1969]). Many thus have denied any direct Mosaic authorship of the material and have contended that Deuteronomy is a recapitulation of Israelite traditions that were compiled about the time of Josiah (640-609 B.C.). But this view is unnecessary if Deuteronomy is viewed as a covenant-renewal document. Obviously Moses wanted to explain the law to Israel at length (Dt. 1:5) because it was material that had been previously delivered to the nation and that by the end of his lifetime had probably been supplemented and modified to some degree. Perhaps 2:10-12, 20-23; 3:9-11, 13b-17 are illustrations of such additions, which are clearly minor. At a ceremonial renewal of the covenant (cf. Josh. 8:32-35; 24:2-27) such changes would have been acknowledged formally as part of the nation's covenant obligations.

Deuteronomy 12:1–26:19 deals with ethical and religious matters, and while holiness is emphasized, humanitarian concerns are also of great importance. Although this section seems to supplement earlier legislation, it also reviews the history and the ideals of the covenant nation. The material may be summarized as follows: centralization of worship (12:1-32); punishment of idolatry (13:1-18); dietary regulations (14:1-29); the poor and the enslaved (15:1-23); three yearly feasts (16:1-17); judges of the people (vv. 18-20); prohibition of pillars (vv. 21f.); penalties for idolatry (17:1-7); administration of justice (vv. 8-13); appointment of a king (vv. 14-20); priests, Levites, and prophets (18:1-22); criminal laws (19:1-21); laws regarding wars (20:1-20); laws dealing with murder, female captives, and the rights of family members (21:1-23); social and moral behavior (22:1-30); laws governing the congregation (23:1–24:22); lawbreakers' punishment, levirate marriage, and commercial rules (25:1-19); first fruits and tithes (26:1-19). It is very doubtful that this material ever circulated as an independent literary unit, if only because it is so fundamental to the structure of Deuteronomy as a whole.

D. Lev. 17–26. This section has been described by some writers as a "holiness code" because of its emphasis upon the ritual conditions governing the priesthood, the tabernacle, and the nation of Israel. The jubilee enactments of ch. 25 are somewhat out of harmony with the ideals of holiness expressed in this section, but nonetheless the material's antiquity should not be questioned, as many modern liberals have conceded. Since in the ancient world all priestly materials were early rather than late, the rituals and prescriptions of this section can claim their origin quite legitimately in the Mosaic period.

Some scholars (e.g., L. Horst, *Leviticus 17–26 und Hezekiel* [1881], p. 96; M. Noth, *Leviticus* [Eng. tr., *OTL*, 1965], p. 16; cf. the summary by K. W. Carley, *Ezekiel Among the Prophets* [1975], pp. 62-65) have seen an affinity between the "holiness code" and Ezekiel's writings and accordingly have assigned a postexilic date to the Leviticus material. Ezekiel, however, knew Leviticus well enough to quote it (Ezk. 20:11, 13, 21), an understandable famili-

LAW IN THE OT

arity if he had been trained as a temple priest. Leviticus, with its consistent emphasis upon holiness to the Lord, would have been ideal for his purpose of making the exiles in Babylon repentant. Thus it is rather surprising that he did not quote it even more frequently, especially if the code is an exilic or postexilic product, as liberals have maintained. Lev. 17–26 is so firmly integrated into the book as a whole that it most probably never existed as a separate literary unit but instead formed part of the God-given revelation to Moses governing worship and life in the covenant community.

The "holiness code" can be analyzed as follows: proper use of sacrificial blood (Lev. 17:1-16); religious and ethical laws and penalties (18:1–20:27); rules for priestly holiness (21:1–22:33); consecration of seasons (23:1–24:23); Sabbatical and Jubilee Years (25:1-55); blessings and punishments (26:1-46).

E. Ceremonial Law. The ceremonial law, an important part of Israelite life, governed the religious rituals, fasts, and feasts of the community. Because Israel was intended to be a kingdom of priests and a holy nation (Ex. 19:6), the regulations for worship and religious life were specific and exacting. The elaborate rituals governing the consecration of the priests set their own standards of communal holiness, emphasizing implicit obedience to God's commands rather than encouraging innovations, which were subject to severe punishment (cf. Lev. 10:1f.). The elaborate clothing of the priests (*see* GARMENTS VIII; PRIESTS AND LEVITES) was to be worn when they ministered in the holy place (Ex. 39:41); it symbolized "glory and beauty" and is described specifically as "holy" (28:2). Thus in their service of God the priests were intended to be representative of that holiness demanded of the entire community, whether in the days of the tabernacle in the wilderness or in the later period of the temples at Jerusalem. As the spiritual head of the nation, the high priest was required to exhibit a more significant degree of religious purity than other priests (cf. Lev. 21:10-15).

The ceremonies of the offerings and sacrifices were given prominence in the written formulation of Levitical law (Lev. 1-7). The prescribed sacrifices served to gain divine favor and goodwill (1:1-17), to express thanksgiving and to secure divine blessing (2:1-16), to renew fellowship with God in public rejoicing and to secure deliverance from vows (3:1-17; 22:18-30), to purify from sin or defilement (4:1–5:13), or to relieve guilt from offenses involving holy things (5:14-19). The Day of Atonement rituals (16:3-34) were intended to cleanse the entire community annually from sins of omission or inadvertence. All these sacrifices were offered in accordance with ritual provisions, which, to maintain the community holiness that is the intent of all ceremonial law, permitted no deviation (*see* SACRIFICES AND OFFERINGS IN THE OT).

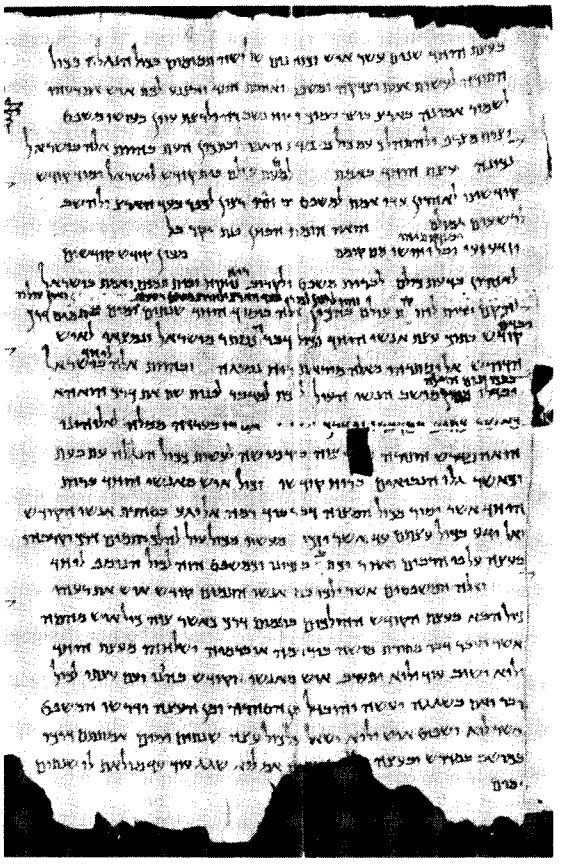
Ceremonial law also governed such matters as the annual festivals of Passover and Unleavened Bread (Ex. 12:3-34; Lev. 23:6), Pentecost (Lev. 23:15), and Tabernacles (Ex. 23:16f.; Lev. 23:33-43), as well as the sabbath (Lev. 23:1), the New Moon Festival (Nu. 28:11-15), and periodic communal feasts (cf. Ex. 5:1; Dt. 16:14). Ceremonies such as the circumcising of male children (*see* CIRCUMCISION) and the cleansing of lepers (Lev. 14:1-32) and those with bodily discharges (15:13-30) were also the concern of ceremonial law, as were the cultic practices of priests and Levites throughout the history of Hebrew religious life (*see* WORSHIP). The abiding principle undergirding ceremonial law was to preserve the ideal of holiness for the nation as well as to prevent national defilement through adoption of the idolatrous practices of neighboring nations.

F. Final Formation. Because of the political and commercial interaction of ancient Near Eastern nations, it is only to be expected that law also would manifest an international character. This has been confirmed by numerous treaty tablets. The Hittite suzerainty and parity treaties have already been mentioned. The use of the second-millennium suzerainty treaty as a model for the Sinaitic covenant indicates that the Hebrews were no strangers to international law. Indeed, they used both treaty forms themselves — the vassal treaty with the Gibeonites (Josh. 9:6-21), and the parity treaty later with the Phoenicians (1 K. 5:1-12), which proved advantageous to both participants.

Precisely how the Torah was finally compiled is open to some conjecture. During the wilderness period the *šōṭᵉrîm* would doubtless have been active with Moses in recording, collecting, and arranging laws and statutes. Once the corpus of law was in substantially its final form, they would probably have assisted the priests in instructing the Israelites in the law. They also would have maintained annals in the usual Near Eastern manner, written charters (cf. 1 S. 10:25), and attended to court correspondence. Since a significant body of evidence indicates that the Pentateuch was largely complete by Joshua's time, the *šōṭᵉrîm* would have shared with the priests the responsibility of preserving and transmitting the Torah. Ancient Near Eastern scribal traditions limited the alterations of a received tradition to the updating of grammar and syntax, the inserting of explanatory glosses, and the recording of minor changes in statutes occasioned by a modification of the original conditions for which the enactments had been intended. Wholesale redactional activity of the kind envisaged by some modern scholars was utterly foreign to the conservative training of ancient Near Eastern scribes. For the Hebrews, the formidable emphasis of divine sanction upon the Sinaitic legislation would have been sufficient to preclude any but the most modest professional changes in the content of the Torah.

Some scholarship has commonly misrepresented this situation by implying that the revelation at Sinai was at best rudimentary in its literary form and that over many centuries the material was shaped, reshaped, and edited vigorously when it came into written form at a comparatively late period, usually thought to be exilic or postexilic (cf. A. Alt, pp. 133-171; M. Noth, pp. 6-107; R. H. Pfeiffer, *Intro. to the OT* [2nd ed. 1948], pp. 210-270). So pervasive has this view become that it has even been echoed by conservative writers (e.g., F. C. Fensham, *Illustrated Bible Dictionary,* II [1980], 885). Thus it is important to remember that scribes in the ancient Near East were concerned to perpetuate received traditions with minimal changes.

Preservation of traditional laws, however, did not preclude legal reforms in OT times. Jehoshaphat of Judah (*ca.* 873-849 B.C.) suppressed much pagan worship and appointed men to teach the law of Moses (2 Ch. 17:7-9). He also reorganized the legal system and established a central appeals court in Jerusalem (19:4-11; cf. W. F. Albright, "Judicial Reform of Jehoshaphat," in *Alexander Marx Jubilee Volume* [1950], pp. 61-82). Josiah of Judah (*ca.* 640-609) similarly reformed public worship under the inspiration of an ancient law scroll discovered in the temple (2 K. 22:8-10; 2 Ch. 34:8-18). As G. E. Mendenhall pointed out, current ritual practices were doubtless purified in the effort to return to the principles and practices of ancient Israelite law (*BA,* 17 [1954], 44).



It is clearly wrong, therefore, to see Ezra the scribe, e.g., as an innovating editor, collecting and collating disparate Hebrew legal traditions that had somehow survived the onslaught of the centuries, and shaping them finally into something that could be dignified with the title "law of Moses." Ezra was a professional scribe (Neh. 8:9) and

LAW IN THE OT

thus a member of a group that composed decrees and edicts in various dialects current in Persia and also formulated official court documents in the manner of the Persian scribes (cf. Est. 9:28f.). Since he was deemed skilled in the law of Moses (Ezr. 7:6), he was obviously familiar with an ancient "received" tradition that he would have transmitted faithfully in proper accord with the traditions of his profession. When the law was promulgated in 444 B.C., it was read "clearly" (Neh. 8:8, RSV, NEB; better, "in sections"; cf. *CHAL*, p. 299) and expounded so that the people understood its import thoroughly. It seems precarious to argue from this verse, as has been done, that Ezra was proclaiming his own edition of the Torah with emendations deemed suitable for the occasion. There is no evidence whatever that Ezra instituted new legal prescriptions; on the contrary, he applied what was already known in the law to the situation in Judea, giving special attention to ensuring the purity of cultic ritual and the separation of foreign elements from the returned community. His reforms, therefore, stand very much in the tradition of those undertaken by Jehoshaphat and Josiah.

Ancient Hebrew law did not exhibit the sequential organization or formal design characteristic of modern occidental law. Sometimes the topics under consideration changed so rapidly as to defy any semblance of rationale, while at other times they dealt with spiritual matters that find no place in modern common law. Yet the loving, humane spirit pervading OT law has set a standard for other bodies of social legislation to emulate. Much of its concern, of course, arose from the nature of the covenant community itself. It was meant to function as a brotherhood in which, ideally, there were no poor (Dt. 15:4) and no exploitation of widows, waifs, or orphans. Each would care for the other, and all would be holy to the Lord as they obeyed the civil and ceremonial regulations enacted during the wilderness period. Naturally there were the usual social distinctions, e.g., "master" and "servant," but even servitude for the Hebrews was very different from the slavery elsewhere in the ancient Near East or from modern concepts of slavery. In Israel a manservant could go free after six years of service unless he chose to remain under his master (Ex. 21:2-6; Dt. 15:12-18). Women servants did not have the same liberty, partly to guard them against exploitation, and partly because it would have been virtually impossible for them to survive independently of a household. Nevertheless, their interests were also safeguarded under OT civil law (Ex. 21:7-11; Dt. 15:12).

While the Mosaic legislation ensured justice for all in Israelite society, it paid special attention to the rights and needs of the poor and underprivileged as compared with other ancient Near Eastern enactments, which tended to favor the interests of the rich. The ceremonial or religious law placed its distinctive imprint upon Israelite society by requiring the members of that community to live according to moral and ethical precepts that were foreign to the creeds of other Near Eastern peoples. The holiness of God was thus established among His covenant people both by precept and deed, making it impossible for anyone in the Mosaic period to be unaware of what was involved in the ethic of Sinai. Provision seems to have been made for every contingency in life, and all that was needed for prosperity and safety was implicit obedience to God's commands. When divine holiness was violated, a comprehensive sacrificial system was available by which atonement might be made for sins of omission or inadvertence, and fellowship renewed with God. Under the law there could be no forgiveness for sins done "with a high hand," i.e., in open defiance of known covenantal spirituality

Col. 8 of the Manual of Discipline from Qumrân (1QS) referring to the importance of Torah study and penalties for transgressing the Torah (J. C. Trever)

(Nu. 15:30). Prescribed feasts and celebrations, although often solemn rituals, allowed the worshiper to express the joy resulting from obeying God's will and to thank Him for the bountiful gifts that He had showered upon His people.

In all these ways the law functioned supremely as *tôrâ* in the best sense, instructing and guiding the Israelites and sustaining them with the high values of the Sinai covenant. When it was neglected or ignored, the quality of community life in Israel inevitably declined. The pleas of several generations of prophets for the nation to return to the principles of covenantal life as enunciated in the law were desperate, if mostly unavailing, attempts to restore the relationship between God and Israel to the level that had existed intermittently during the wilderness wanderings and the early sedentary occupation of the Promised Land. Because the increasingly disobedient, apostate, and idolatrous nation largely ignored the prophets' pleas, God was compelled to bring upon it the curses promised under the covenant stipulations for a disobedient and disloyal vassal. Though severe, the successive destruction and exile of both Israel and Judah as nations were essentially just, inasmuch as the law had already provided for such punishment. Equally characteristic of God's mercy was that act of renewal by which exiled Judah was brought back and given a second chance to function as a religious community in postexilic Judea, obedient to the leadership of God's priesthood.

V. Obsolescence.–Decay is an unavoidable fact of all natural life and therefore of human culture. Most if not all

"high" cultures seem to have appeared in their most advanced forms and then to have decayed in a manner consistent with the law of entropy. While periodic revivals may occur in the history of a culture, obsolescence is inevitable. Comprehensive as the Levitical sacrificial system was for dealing with infractions of covenant spirituality, e.g., it was nevertheless deficient in one important respect. As observed above, it made no provision for the forgiveness of anyone who reviled the Lord by defying covenant laws and statutes. Such a provision could have made the Levitical sacrificial tariffs perfect in every way. It would have ensured the continuance of Hebrew sacrifices for atonement and reconciliation and would consequently have made the work of Christ unnecessary.

But even in obsolescence the law was a standard of spirituality (cf. Mt. 5:18), and its abiding principles reappeared in the NT writings, prompting Paul to regard it as a "custodian until Christ came" (Gal. 3:24). The imperfect sacrificial system foreshadowed One who would make a full, perfect, and sufficient sacrifice on Calvary for human sin. The failure of the Hebrew sacrificial system was abundantly evident during the Babylonian exile, when sacrifice of any kind was impossible. The decline of the Levites (cf. Ezr. 2:36-42; 8:15-20, 24-30; Neh. 11:10-18) further indicated the law's gradual eclipse, for the attempt made under Nehemiah to revive the ancient tithing regulations (Neh. 10:38f.) was apparently abandoned at an early stage (cf. Neh. 13:10-13; Mal. 3:8-10). It is unusual that while the law was becoming obsolete the attitude toward divorce became more rigorous than the Torah's (cf. Mal. 2:16; Mt. 19:7-9), as the "Temple Scroll" from Qumrân also shows.

1. Law in the Gospels.–In the Gospels "law" always refers to the Mosaic law, although it has differing applications. Mosaic law was threefold: moral law, as summed up in the Decalogue; ceremonial law, prescribing the ritual; and civil or political law, relating to the people in their national, political life. The distinctions are not closely observed and generally the whole Mosaic law is meant, although sometimes a certain aspect is emphasized. At times "law" signifies the whole OT (Jn. 10:34; 12:34; 15:25), and at other times the Pentateuch (Lk. 24:44).

Law (Gk. *nómos*) occurs eight times in Matthew, nine in Luke, fourteen in John, and not at all in Mark. Since no certain data exist on which to determine the chronological order of Christ's sayings on *nómos*, the following discussion is topically organized.

A. Reaffirmation of OT Law. 1. Christ, the Pharisees, and the Law. As Bergren observed, the "Accusation portion" of the "Judgment Speeches of Amos, Micah, Isaiah, and Jeremiah reveals a correspondence in content to certain Pentateuchal laws" (p. 221), thus demonstrating the prophets' reaffirmation of the laws. So also Christ explicitly reaffirmed the OT law. He emphatically told the disciples that He had not come to abolish the law and the prophets: "For truly, I say to you, till heaven and earth pass away, not an iota, not a dot, will pass from the law until all is accomplished" (Mt. 5:18); "unless your righteousness exceeds that of the scribes and Pharisees, you will never enter the kingdom of heaven" (v. 20). The scribes and Pharisees not only taught the law and required strict conformity to it but also regarded their only hope of salvation as resting upon and resulting from their law-keeping. Christ, the preacher of grace, insisted that, unless His followers kept the law more thoroughly than the scribes and Pharisees, they could not achieve salvation. Christ was not speaking of imputative righteousness, of which the scribes and Pharisees had no notion. Rather, He taught that His disciples must surpass in the realm of moral conduct those who hope to save themselves by their conduct. This is a radical moral equivalent of His apocalyptic utterance in v. 18 that heaven and earth shall pass away before an iota or a dot pass from the law (cf. Mk. 10:18; Lk. 10:25f.).

2. The Rich Young Ruler. Christ told the rich young ruler (Mk. 10:17-22) that he would fulfil the law by following Him. The young man's question, however, concerned how to find eternal life. When Christ told him to sell all that he had and he found that he could not, he showed that he valued his money more than God. Thus he demonstrated that he had not even understood the first commandment (which, along with all the others, he thought that he had kept). Christ was not calling to a new way of obedience, but to the old way, which the young man thought he had been practicing all along.

How then does following Christ relate to the fulfillment of the law? Banks correctly observed that Jesus' reference to the law here "is primarily intended as an endorsement of its value as a testimony to . . . the more ethically-demanding and uniquely personal claim which follows"

LAW IN THE NT

(p. 164). It seems clear, however, that keeping the law and keeping Christ's commandments are synonymous. Christ said to the rich young ruler, "You know the commandments," and listed some of them as the way by which the young man would achieve his goal. The new commandments that He then gave to him — to sell all that he had, give to the poor, and follow Christ — were mere summaries of the law to love God and neighbor. Thus following Christ is keeping the commandments as a way of life. Since keeping the law of God is the way to eternal life, and keeping the law of Christ is the way to eternal life, the law of God and the law of Christ are identical.

Indeed, there is a kind of advancement on the law of God in one sense: following Christ is more personal than merely following the law of Christ. One law of Christ for the rich young ruler was to sell all and give to the poor. The second law of Christ was to follow Him; whatever He commanded should be obeyed. The law given through Moses was explicit and fixed and seemed complete in itself, although there was subsequent revelation. Christ's more open commandment, "Follow me" (presumably "Follow me and all that I may ever command you"), entails a direct personal relationship in law-keeping, perhaps a relationship implicit in the OT law of God but certainly explicit in the NT law of Christ. The law of Christ does not dispense with the old law or render the Decalogue obsolete but in a sense adds to that law by keeping the followers in constant submission to the continuing disclosure of the will of God in Christ.

3. "Take My Yoke upon You." Christ said, "Come to me, all who labor and are heavy laden, and I will give you rest. Take my yoke upon you, and learn from me; for I am gentle and lowly in heart, and you will find rest for your souls" (Mt. 11:28f.). It is agreed that Christ referred to persons chafing under the burdens of the law, but He neither here nor elsewhere delivered them from legal obligations. Rather, by keeping the law as He required they would find peace. Christ's commandments would fit and be suitable even though they were exacting: "For my yoke is easy, and my burden is light" (v. 30).

4. Specific Commandments. Christ seemed satisfied with the two-table view of the Decalogue (the first part consists of duties to God, and the second of duties to mankind). When a scribe asked, "Which commandment is the first of all?," Jesus answered, "The first is, 'Hear, O Israel: The Lord our God, the Lord is one; and you shall love the Lord your God with all your heart, and with all your soul, and with all your mind, and with all your strength.' The second is this, 'You shall love your neighbor as yourself.' There is no other commandment greater than these" (Mk. 12:28-31).

To see how Christ interpreted the law in the commandments, we shall consider samples from each table. First, as a sample of the law pertaining to God, we shall study Christ's teaching concerning the fourth commandment, the sabbath. Then, in the second table of the law, we shall consider the fifth, sixth, and seventh commandments.

a. Fourth Commandment. Jesus said, "The sabbath was made for man, not man for the sabbath; so the Son of man is lord even of the sabbath" (Mk. 2:27f.). Although many regard this teaching as tantamount to a rejection of the Mosaic law, Christ actually affirmed the sabbath by saying that it was made not just for the Jews, but for mankind, and was made not for one time but for all time, presumably. He observed the sabbath, worshiping and teaching in the synagogue. His conflicts with the scribes and Pharisees concerned His doing good on the sabbath, which He said did not violate the law (3:2; Lk. 13:14).

Since the sabbath was made for people and not vice versa, people cannot determine or use it as they please. It would then cease to be the sabbath and become a day that people, not God, define. Christ was alluding to what the scribes and Pharisees made of the sabbath: a day full of all sorts of regulations, which were very burdensome to conscientious followers of the law. God had not imposed those burdens. He had made the sabbath pleasant; people had made it otherwise. If people form the sabbath in their own image, it does not carry the utility and meaning that Christ attributes to the true sabbath of God. Thus, in this statement that Christians commonly take today as liberating them from sabbatical law, Christ actually bound His followers more tightly to it. It is to be remembered, of course, that God requires man to love mercy as well as do rightly and walk humbly on the Sabbath — that is the law.

b. Fifth Commandment. The Pharisees complained that the disciples transgressed the traditions of the elders by eating with unwashed hands. Jesus retorted, "Why do your disciples transgress the tradition of the elders?," citing their ingenious distinction of Corban that evaded and virtually broke the fifth commandment, to honor one's father and mother (Mk. 7:1-13). Again Jesus condemned and corrected the traditional interpretation while upholding the law itself.

In Mt. 8:21f., however, He told a would-be disciple (who simply stipulated, "Lord, let me go first and bury my father"), "Follow me and leave the dead to bury their own dead." Burying a parent would show the respect traditionally required by the fifth commandment. The prohibition in v. 22 would be out of keeping with filial respect unless made by God or a messenger in His name, who alone have the authority to make such a statement in perfect harmony with divine law. The first table of the law takes precedence over the second table: believers' immediate obligations to God are obviously superior to their obligations to Him via respect for fellow human beings (compare Abraham being commanded by God to sacrifice his son, Gen. 22:1-12).

A further application of the fifth commandment concerned the citizen and the state -- God and Caesar. Christ's teaching (Mt. 22:17-21 par. Mk. 12:14-17; Lk. 20:22-25) was elicited by a loaded question, "Is it lawful to pay taxes to Caesar, or not?" Christ put the question to rest with a rebuke (v. 18) and an object lesson: He took a coin with Caesar's inscription and said, "Render therefore to Caesar the things that are Caesar's, and to God the things that are God's" (v. 21). Although this famous statement has been seen (by Augustine, Calvin, Erasmus, Grotius, Pufendorf, Witherspoon, Hodge, Stauffer, Shannon, Schnackenburg) as Jesus' endorsement of political authority subordinate to the all-comprehending and all-validating authority of God, others (Brandon, Kennard, Lormbrandt) question that interpretation and wonder whether (or assert that) Christ was implying that obedience and taxes should be withheld from Caesar.

The coin (denarius) that Jesus held served a double purpose: people both used it to pay taxes and worshiped the image of Caesar on it. As often happens, the teacher answered the question asked and went on to answer the unasked but implied question. People should render to Caesar what is Caesar's (cf. Eccl. 8:2, "Keep the king's command") and not render to Caesar what is not Caesar's — worship, which is one of "the things that are God's." Jesus' double purpose thus accomplished, a double rebuke is implied: of the Zealots, who would not render to Caesar what is Caesar's, and of the Herodians, who would not render to God what is God's. Christ's third and implicit rebuke is of those who suppose that Caesar's due is parallel to or independent of God's, for Christ had already in-

formed the devil, "You shall worship the Lord your God and him only shall you serve" (Mt. 4:10).

c. Sixth Commandment. Christ's exposition of the sixth commandment seems to have occasioned even more difficulty than His teaching on the fifth. He said, "You have heard that it was said, 'You shall love your neighbor and hate your enemy.' But I say to you, love your enemies and pray for those who persecute you. . ." (Mt. 5:43f.), and this is often considered a reversal of the law of Moses, which supposedly required retaliation and was devoid of the principle of forgiveness and love in dealing with enemies. Jesus, however, was unaware of any such divergence. When He apparently modified Moses' law concerning divorce (Mk. 10:5), He not only frankly acknowledged the alteration but gave the reason for it. Since in Mt. 5:43f. He seemed to reverse Moses in an even sharper manner, it is more likely that modern interpreters have read something into Jesus' pronouncement than that Jesus unknowingly reversed Moses. Jesus had immediately before (according to the arrangement of Matthew) said that He did not come to abolish the law or the prophets (5:17) and made the drastic statement, "Unless your righteousness exceeds that of the scribes and Pharisees, you will never enter the kingdom of heaven" (v. 20). His subsequent statement, "Love your enemies," is cited by these interpreters as illustrating that He did come to abolish the law and His disciples (if they hoped to enter His kingdom) would have to repudiate Moses. Such interpretations are not giving Our Lord much credit for intelligence, sensitivity, or candor.

Moses, moreover, did not demand the inexorable functioning of the law of retaliation. He specifically warned the Israelites, "You shall not take vengeance or bear any grudge against the sons of your own people, but you shall love you neighbor as yourself: I am the Lord" (Lev. 19:17f.). Ex. 23:4f. states, "If you meet your enemy's ox or his ass going astray, you shall bring it back to him. If you see the ass of one who hates you lying under its burden, you shall refrain from leaving him with it, you shall help him to lift it up." Although "an eye for an eye and a tooth for a tooth" is the very principle of perfect justice, OT law was not a stranger to forbearance or unaware of the principle of returning good for evil (cf. Job 31:29; Ps. 35:12f.; Prov. 24:17), and nothing forbade the individual's foregoing some of his rights. Any momentary violence thus done to the law will be rectified by the Judge of all the earth who cannot do wrong.

Christ therefore took exception not to Moses but to what "was said to the men of old" (Mt. 5:21, 33) or simply to what "was said" (vv. 27, 38), a well-known way of referring to rabbinic traditions (in contrast to references to Scripture, introduced by "it is written"). Christ rejected those who rejected Moses, not Moses himself. He exposed the commentators who misrepresented Moses, restoring the lawgiver to his pristine position.

So far was Christ from abolishing the sixth commandment that, if anything, He intensified it. In contrast to the Pharisees and others who supposed a person to be "blameless" with regard to the law (Phil. 3:6) if he had not killed a person, Christ taught that the sixth commandment is first broken in the heart. "But I say to you that every one who is angry with his brother shall be liable to judgment; whoever insults his brother shall be liable to the council; and whoever says, 'You fool!' shall be liable to the fire of hell" (Mt. 5:22). The AV addition "without a cause" after "every one who is angry" is not supported by the best MSS, but its connotation is supported by the best interpreters, for Christ could not oppose all anger while indulging in it Himself (Mk. 3:5). The point of the text is that the law equates unjustified anger (and even more, insults and hatred) with murder.

d. Seventh Commandment. Christ's handling of the seventh commandment, "you shall not commit adultery," followed the same pattern as that of the sixth. Far from repealing the commandment, He intensified it: "I say to you that every one who looks at a woman lustfully has already committed adultery with her in his heart" (Mt. 5:27f.). Adultery, like murder, begins in the heart and exists there whether or not it reaches the bodily act.

In one passage, however, the pericope of the woman taken in adultery (Jn. 7:53–8:11 in some MSS), Jesus seems to some to have set aside the law of Moses completely. Although late and noncanonical, the pericope has many marks of historical authenticity. In Jesus' time persons were still put to death for adultery. Two accusers, who had caught an offender or the offenders in an act indisputably adulterous, were needed to establish the indictment. The scribes and Pharisees tested Jesus' adherence to Mosaic law by asking His judgment on this case.

What is most impressive is that Christ answered the question in a proper legal manner. Perceiving immediately that the witness had, no doubt, been stationed in a place where this suspected crime might occur, He sensed malice and not objectivity in their testimony. He no doubt also noticed the absence of a husband's concern for his erring wife. All of this was contrary to the actual OT regulations concerning such an offense and its litigation.

When Christ said, "Let him who is without sin among you be the first to throw a stone at her" (Jn. 8:7), He was appealing to the legal requirement that accusers be without fault in a matter so serious as this one. Since the legal requirements were not met, He said, "Neither do I condemn you" (v. 11). Not being a witness to the actual crime, he did not accuse the woman either.

No doubt the main reason that the Church has seriously questioned this episode is that it has usually been construed (e.g., by Augustine) as meaning that Christ disregarded the law and forgave when punishment was required. Of course the Lord of the law could have repealed the legislation, but there is no evidence here that He did so; He vitiated the biased judgment because the law was not being strictly observed. He did not Himself forgive the woman but simply refrained from condemning her. Christ's statement "Go, and do not sin again" (Jn. 8:11) contains an implied accusation but no forgiveness because no sin was confessed.

"Let him who is without sin among you be the first to throw a stone at her" (Jn. 8:7) cannot mean that Church disciplinary law requires perfection in its administrators. If Christ had meant that, He would have denied His own clear requirements. His very imperfect apostles, who were taught to pray confessing their debts (Mt. 6:12), were also to "bind" and "loose," "retain" and "forgive" sins (16:19; 18:18; Jn. 20:23), and to treat the unforgiving sinner "as a Gentile and a tax collector" (Mt. 18:17). Christ warned His disciples against trying to remove all who offend (13:36-43), since if only the sinless could discipline, all discipline would be eliminated.

Another passage is taken by many to mean that Jesus was less concessive than Moses. It seems to them that Christ's teaching on adultery in Mk. 10:11 (that those who remarry after divorcing commit adultery) rules out all divorce and thus repeals Moses' permission. The fuller statement in Mt. 5:32, however, "But I say to you that every one who divorces his wife, except on the ground of unchastity, makes her an adulteress; and whoever marries a divorced woman commits adultery," may be the general equivalent of the Mosaic law.

LAW IN THE NT

The fundamental OT law in Ex 20:14 states, "You shall not commit adultery." "Adultery" in law courts commonly refers to intercourse between a married person and someone who is not his or her spouse. But the OT prohibits other sexual irregularities also, which presumably the commandment would prohibit. The question, then, is whether Jesus meant by "unchastity" (*moicheía*) more than the technical term "adultery."

Moses' permission to divorce (Dt. 24:1) appears to be a divinely permissible punishment for a violation of the seventh commandment. That is, if a person committed adultery ("some indecency"), that person could be legitimately divorced by the innocent spouse. The innocent party's divorce and subsequent remarriage would not constitute adultery but would be a proper consequence of adultery and suitable punishment for the adulterous spouse.

But what of "for your hardness of heart Moses allowed you to divorce your wives" (Mt. 19:8)? Ideally (from "the beginning," i.e., of the institution of marriage) marriage should be indissoluble. Forgiveness could heal the broken bond that harcheartedness made permanent through divorce. Christ, true to OT law, stated the ideal in Mt. 19:5f. and the nonideal but legal in 5:32 ("except on the ground of unchastity") and 19:9, just as Moses stated the ideal in Gen. 2:24 and the nonideal but legal in Dt. 24:1f.

The seventh commandment seems to parallel the sixth ("You shall not kill"). The punishment for killing a person is to be killed; the second killing is legitimate and does not violate the sixth commandment. On the contrary, it is the required punishment for violation of the commandment (cf. Ex. 21:12). Analogously, if a married person destroys marriage by committing adultery, that spouse may be destroyed (with regard to marriage) by the divorce and remarriage of the innocent party. There would, properly speaking, be no stigma either on the innocent person who divorces or on the person who executes a killer. Our Lord seems to be perfectly consistent with this pattern of thought by His exceptive clause in Mt. 5:32; 19:9. (Note, too, that the exception to the law of capital punishment, the cities of refuge [Nu. 35:6f.], compares to the exception to indissolubility in marriage law.)

Christ's handling of the seventh commandment followed the same pattern as that of the sixth. Far from repealing either commandment, he intensified them, for adultery, like murder, begins in the heart and exists there whether or not it reaches the bodily act.

5. Summary. Christ's affirmation of the moral law was complete. Rather than setting His disciples free from the law, He tied them more tightly to it. He abrogated not one commandment but instead intensified all, as has been shown. He did not condemn the scribes and Pharisees for tithing mint and anise but for neglecting the weightier matters of the law — justice, mercy, and faith (Mt. 23:23). To be sure, they added some things that did not belong to the law to make themselves look more zealous for the law, but Christ showed that their zeal was for their own traditions, not for the law of God. Not one iota or dot did, indeed, pass away from the law until it was all fulfilled in Christ. Anyone who would come after Him could not expect the slightest diminution of legal demand: "You, therefore, must be perfect, as your heavenly Father is perfect" (5:48).

Christ fulfilled the moral law by obeying it and showing its intense spirituality, thus establishing it on a surer basis than ever as the eternal law of righteousness. He fulfilled the ceremonial and typical law not only by conforming to its requirements but by realizing its spiritual significance. He filled up the shadowy outlines of the types so that they could pass away; believers no longer must observe the Passover or slay the daily lamb, for they have the substance in Christ. He also cleared the law from the traditional excrescences that had gathered around it under the hands of the rabbis (Mt. 5:11; Mk. 7:18-23). He taught His disciples those great principles when, after His resurrection, "beginning with Moses and all the prophets, he interpreted to them in all the scriptures the things concerning himself" (Lk. 24:27) and declared, "These are my words which I spoke to you, while I was still with you, that everything written about me in the law of Moses and the prophets and the psalms must be fulfilled" (v. 44). John sums this up in the pregnant phrase, "The law was given through Moses; grace and truth came through Jesus Christ" (Jn. 1:17). Grace was in contrast to the condemnation of the moral law, and truth was the antithesis of the shadowy outlines of the types and ceremonies.

As for the relation of NT law to OT law there seems to be only a question of how much of the old is continued in the new. Christian theologians generally agree that all of the moral and none of the ceremonial laws are continued, the latter having been fulfilled. How much of the civil-political law continues is the issue. According to contemporary theonomists (Rushdoony, Bahnsen), all of it continues in force (Mt. 5:17) as to equity (essence) with appropriate casuistical modifications (railings required around flat roofs in the OT now required around backyard swimming pools). Most Christian ethicists contend only for some continuation (Murray, Henry, Kline), excommunication, for example, being the NT discipline for adultery, which was punished by death according to the OT law. The theonomic case has not yet received a sound literary refutation.

B. Relationship Between Law and Grace. 1. The Pharisee and the Sinful Tax Collector. Probably Christ's clearest indication of the relation between law and grace is in the parable of the Pharisee and the tax collector (Lk. 18:9-14) and in the narrative of Zacchaeus's conversion (19:1-10). Commenting on the sinful tax collector who could not even lift his eyes to heaven but could only beat his breast and ask God to be merciful to him a sinner, Christ remarked, "I tell you, this man went down to his house justified rather than the other; for every one who exalts himself will be humbled, but he who humbles himself will be exalted" (18:14). God heard the prayer of the tax collector who broke the law but not that of the Pharisee who apparently had kept it scrupulously (v. 11). Christ did not say that the Pharisee was not justified though he kept the law. The point is, rather, that the Pharisee was not, by his very spirit, keeping the law as he claimed, while the tax collector, recognizing the truth about himself and confessing it, was forgiven. The parable does not say that the tax collector began a true and spiritual keeping of the law, but in the historical incident of Zacchaeus, the tax collector was justified when he went down to his house and immediately began to return fourfold all that he had extorted in his earlier law-defying days (19:8).

2. Law and Prophets until John. Luke 16:15-17 is particularly significant in showing Jesus' conception of the relation between the law and His kingdom. The people of Jesus' time who were considered exemplary law-keepers (the scribes and Pharisees) actually loved money instead of God and mankind (v. 15). In the central text, v. 16, where Christ said that the law and the prophets continued until the time of John but that He introduced the kingdom of God and everyone entered it violently, He did not hint that the law would cease to exist (though the scribes and Pharisees would have considered the law to have ceased when followers of Jesus entered the kingdom). Luke used v. 15 as a preface to prevent people from

jumping to that wrong conclusion from v. 16. Verse 16 contains no antithesis between the law and prophets and Christ; Christ opposed only the wrong exponents of the law, not the law itself.

But what did Christ mean by saying that the law and the prophets were until John the Baptist and that He introduced a new dispensation? The preceding verses indicate a difference of degree and not kind — a newer fulfillment of the old dispensation rather than a different dispensation. Lk. 16:17 reiterates what Christ said in His Sermon on the Mount, that not a dot shall disappear from the law until all is fulfilled, even when people violently entered the kingdom. One can see how Luke would need to assert immediately after v. 16 that the comparison of Christ's kingdom with the law and the prophets was not to be construed as an opposition to the continuance of the law.

In Lk. 16:18 Christ gave an example of what He meant by the continuation of the law: the law of divorce is tightened rather than loosened in His kingdom. Clearly a person's faith in Christ establishes his relationship with God but also involves the most rigorous kind of law-keeping. Here again Christ was obviously not abolishing the law; rather, He reaffirmed and implemented it by His own authority as Lord of the kingdom.

Although Christ represented Himself as above the law, He still observed it. Thus He told John the Baptist, "It is fitting for us to fulfil all righteousness" (Mt. 3:15). He received baptism, even though He did not need it, because the law required it. Likewise, He paid the temple tax although He did not need to do so, as He showed by paying with unearned shekels taken from a fish's mouth (17:24-27). He told those whom He healed to present themselves to the priest, in fulfillment of the legal requirements (Lk. 17:14; Mt. 8:4).

3. "Not Far from the Kingdom." Christ's comment to the lawyer (Mk. 12:34), that he was not far from the kingdom, is interesting in its bearing on this point. The lawyer had asked who was his neighbor and Christ had given His classic answer (the parable of the Good Samaritan). The lawyer could recognize the meaning of the law, for he accepted and approved a sound interpretation of it. Christ said, however, that he was not far — implying that he was not yet in the kingdom — apparently because the young man understood but had not committed himself to the practice of the law or, perhaps, did not apply his accurate understanding to his own situation. The experience may be parallel to John Wesley's believing that Christ was the Savior of the world before accepting Him as his personal Savior.

***II. Law in the Acts of the Apostles.**–A. Jerusalem Council.* The Jerusalem Council is a cue to the law in the early Church. According to Acts 15:21, in the Jewish synagogues of the Diaspora there was already fellowship and worship with the uncircumcised. Similar fellowship in a mixed congregation of Jewish and gentile Christians could be defended before the Jewish world if gentile Christians accepted the conditions of the Jerusalem Council's decree. The obligation of the law was not restricted to these points for Jewish Christians, but they could engage in fellowship with Gentiles who accepted these points without giving offense to the Jews and still be consistent with the teaching of Christ. The question has been raised whether this attitude in the Church came from Jesus' teaching or whether His teachings were based on the prevalent attitude among Jews. Gutbrod has rightly argued that it derived from Jesus' teachings (*TDNT*, IV, 1069).

B. Peter and Paul. Peter's strict observance of the ceremonial law was shown in connection with his vision, which taught him that the grace of God may pass beyond the Jewish pale (Acts 10). Paul's preaching emphasized the fulfilling of the Scriptures, both law and prophecy, by Jesus Christ. The gist of his message, as given in his first reported sermon, is, "By him every one that believes is freed from everything from which you could not be freed by the law of Moses" (13:38f.). The conversion of the Gentiles brought up the question of their relation to the ceremonial law, specifically to circumcision. The Jerusalem Council decided that circumcision was unnecessary for Gentiles and only enjoined them to abstain from things strangled and from blood, according to the Mosaic ritual (ch. 15). The subsequent events showed that this provision was for the time of transition. Paul, though strongly opposed to the idea of imposing circumcision on the Gentiles, nevertheless, without inconsistency and as a concession to Jewish feeling, circumcised Timothy (16:3) and himself fulfilled the ceremonial enactments in connection with the taking of a vow (18:18). Following the advice of James, who wished him to conciliate the myriads of believing Jews who were zealous for the law, and to show them the falseness of the charge that he taught the Jews among the Gentiles "to forsake Moses," Paul also ceremonially purified the "four men that have a vow on them" (21:20-26). Paul's offering the required sacrifices showed that for the Jews the sacrificial system remained in force. The sequel to the transaction might raise the question whether, after all, the procedure was a wise one; it certainly did not fulfil the expectations of James. In his defense before Felix, Paul claimed that he was loyal to the Jewish faith, worshiped in the temple, and believed "everything laid down by the law or written in the prophets" (24:11-14). In his address to the Jewish leaders in Rome he declared that he had "done nothing against the people or the customs of our fathers" (28:17) and sought to persuade them concerning Jesus "both from the law of Moses and from the prophets" (v. 23).

III. Law in the Epistles of Paul.–The major development of the NT concept of law is found in the writings of Paul. Like Christ, he reaffirmed the law and explicated the relationship between law and grace.

A. Reaffirmation of the Law. Paul employed the word law (Gk. *nómos*) in various ways. He used it for the whole OT law but also (Rom. 7:7; 13:8f.) for the Decalogue. Like Christ, Paul sometimes used it for the Torah and sometimes for the Pentateuch. The law is holy, just, and good (Rom. 7:12), though it is the occasion of sin (v. 13).

1. Establishing the Law. Paul's basic principle was that Christ is not the negation of the law, but the fulfillment of it. Gal. 2:21 is especially significant: "If justification were through the law, then Christ died to no purpose." Paul was as emphatic as Christ in reaffirming that the law was established, not abolished, by faith. "How can we who died to sin still live in it?" he asked (Rom. 6:2; cf. 1 Cor. 6:9; Gal. 5:19-21). He showed that grace leads again to law (see III.B below). "Are we to continue in sin [violating the law] that grace may abound? By no means!" he said (Rom. 6:1f.). Not continuing in sin is not, however, the same as standing in the law and boasting of virtue (Gal. 3:10), which is what he and his fellow Jews had been doing (Phil. 3:5f.). The Christian lives in obedience to the law, not in merit from it. It was the fatal error of Paul's kinsmen after the flesh, the Jews, to think that they could establish their own righteousness (Rom. 10:1). They were mistaken not in keeping the law but in supposing that they were when in fact its meaning had not even come home to them (7:9; cf. Gal. 3:10).

Some think that Paul said that what the Jewish specialists in revealed law could not do, the pagans who knew only

LAW IN THE NT

natural law did do (Rom. 2:14). But when Paul said, "Gentiles . . . do by nature what the law requires," he did not mean that they see God and do good (v. 14). Otherwise he could never have written in 3:10f.: "None is righteous, no, not one . . . no one seeks for God. . . . No one does good, not even one." What he meant in 2:14 was that the heathen even apart from revelation show by their actions that they are conscious of a "law written in their hearts," not that these actions successfully fulfil the moral demands of the law.

Paul's point was that the Jews were destroying the law in which they boasted while he was establishing what they accused him of destroying. They destroyed the law by misinterpreting it, thereby crediting it with doing what it cannot do and preventing it from doing in them what it was designed to do. He bore witness to their zeal in all this (Rom. 10:1) but not to their wisdom, for he once suffered from the same error (Phil. 3:3f.). The whole Christian way (not Jewish way) is "in order that the just requirement of the law might be fulfilled in us" (Rom. 8:4).

2. Was Paul Antinomian? Gutbrod saw Paul's end result as subtly antinomian: "No longer whatsoever is not of the Law, but whatsoever is not of faith, is sin, R. 14:23" (*TDNT*, IV, 1077). If this were so, Paul could not have exclaimed: "Do we then overthrow the law by this faith? By no means! On the contrary, we uphold the law" (Rom. 3:31). In 14:23, Paul did not replace the law with faith as the code for conduct. So far was Paul from negating the law that he would not allow Christians to act in cases where the teaching of the law seemed unclear unless they believed that the law favored their course of action, because "whatsoever is not of faith, is sin" (v. 23).

B. Relationship Between Law and Grace. 1. "By the Law I Died to the Law." Probably the finest NT statement of the normative use of the law is in Gal. 2:19, "I through the law died to the law" (Gk. *diá nómou nómō apéthanon*). Paul meant that the law became his teacher to lead him away from itself to the Savior. When he fully comprehended the law's meaning (Rom. 7:9), he realized what a violator of it he actually was and died to it as the meritorious ground of salvation. Accordingly, he asked the Galatians, "Tell me, you who desire to be under the law, do you not hear the law?" (4:21). People think they live by the law, which actually condemns them, because they do not hear it.

2. Paul, the Other Rich Young Ruler. There is an interesting contrast between the rich young ruler (Mt. 19:16-30) who was not converted and the rich young ruler Saul, who was converted to become the Apostle Paul. Both of them were "as to righteousness under the law" blameless (Phil. 3:6; cf. Mt. 19:20). The rich young ruler, however, seems to have had misgivings that brought him to Jesus in search of eternal life, although presumably he should have felt (as Saul apparently did) that he was on the way to securing it. The young ruler was offended by Christ's remark directing him back to the very law from which he was turning. But when Christ advised him to give up all that he had and follow Him, the rich young ruler turned away sorrowing and presumably went back to his old ways, cleaving to his fortune (which was shown to be his true god) and violating the law. In contrast, the rich young ruler Saul came to consider all that he had achieved under the law as worthless and prized only what he found in Christ (Phil. 3:8). Paul died to the law while the rich young ruler was simply troubled by it. Paul passed from serene confidence to a shattering disillusionment with the law as a scheme of salvation, whereas the rich young ruler seemed never to have had either the total confidence or the complete disillusionment; he did not die to the law, but continued to die in it.

3. Paul and the Pharisees. According to the Pharisees, people can do what they will and thus can keep the law. For them, the law is all that one needs for a godly life. It was the Jews' particular advantage to have such direction. But Paul realized after his encounter with Christ that the law was only pointed to salvation; Christ is the fulfillment and incorporation of the law and He alone can enable a person to fulfil it.

The mistake of the Pharisees, in Paul's opinion, was overlooking the "second use" of the law, the pedagogical. If one understands the law correctly, it becomes a tutor to bring him to Christ (second use) and Christ becomes the power to fulfil the law (third use). As Drane has seen in Gal. 3:24, "by trying to gain salvation by their own efforts at keeping the Law, men realized that it was an impossible task, and so the way was prepared for God's act of grace in Jesus Christ" (pp. 137f.). But the coming of the Savior did not liberate Paul from the law, but to the law. In fact, for the first time he was able to keep it (cf. Rom. 8:1f.). As R. Bring (p. 22) observed, the Israelites did not understand first that the law was given because of sin, and second that righteousness was to come by promise (Rom. 3:31).

The Pharisees' erroneous interpretation of the law rested on an erroneous view of mankind. They regarded the fall of Adam as simply the first example of a person deciding wrongly; people can still live correctly after the fall if guided by the law. But Paul realized that mankind is in no position to fulfil the law. Nor did faith, for him, presuppose a power to fulfil all the requirements of the law, for a believer was free from the law. In fact, faith itself is the gift of God (Eph. 2:8).

Faith justifies because it means participation in Christ who has fulfilled the law and brought righteousness (Gal. 3:11). Paul contrasted (v. 12) righteousness by the law and righteousness by faith, but believers achieve the latter by Christ's fulfillment of the law, whereas the former is the supposed righteousness of people who trust in themselves. The person who thinks that he can effect works-righteousness does not really hear the law, Paul insisted. Nevertheless, faith-righteousness does not abandon law-righteousness, which is simply placed in Christ rather than the individual. Those who are in Christ really fulfil the law (Rom. 8:4).

R. Bring sees all this very clearly. The one thing that eludes him seems to be that for Paul, Christ fulfilled the law, so that the disciples who live in Him actually fulfil the law (cf. Rom. 4:5; 8:1f.). The way of faith is the way of fulfilling the law, not a substitute for fulfilling it. Bring cited 8:1 to show that the law judges, but for those who are in Christ Jesus there is no judgment, so that the law is overcome for them (p. 28). But he did not seem to realize that the law is overcome because Christ has satisfied it and believers are victors because they actually have overcome in Christ. Believers are free from the law because they in Christ have satisfied it; they no longer stand under it but live in the Spirit.

The Pharisees believed that people by their own willing could fulfil the law; Paul entertained no such notion. But he did not deny "free will" in another sense. People "freely" accept Christ, who gives them His own righteousness, which they could never achieve by "free will." But free will is not to be confused with the ability to earn righteousness by keeping the law. Of course, earning righteousness would involve free will; but, the will can be free without having the ability to earn righteousness (which only Christ could merit). People, as Augustine taught, could be "free" to disobey and disbelieve without being "freed" to accept Christ's fulfillment of the law.

4. "Not under the Law." Galatians 5:18, "But if you

are led by the Spirit you are not under the law" (cf. Rom. 6:14), sets forth both of Paul's emphases: confirmation of the law and the relationship of the law to grace. In Gal. 5:17 Paul showed that the "flesh" prevents the Christian from doing "what you would"; he enumerated the "works of the flesh" (v. 19) and warned, "Those who do such things shall not inherit the kingdom of God" (v. 21). Although Christians feel the flesh's frustrating presence, they cannot be brought under it entirely to do only the "works of the flesh." The law is confirmed, therefore, because Christians bring forth some of the "fruits of the Spirit" and eschew some of the works of the flesh; their inclination to the good fruits and disinclination to the fleshly works honor the continuing law. They are not "under" the law, however, for then a single failure would destroy them totally. As Paul reminded the Galatians: "It is written, 'Cursed be every one who does not abide by all things written in the book of the law, and do them'" (3:10).

IV. Law in Other NT Writings.–While the remainder of the NT is not so full in its treatment, it seems to follow the pattern of teaching found in Christ and Paul.

A. Hebrews. The word "law" occurs fourteen times in this epistle and a great deal of attention is given to the subject, but it is generally the law in its ceremonial and typical aspect that is in question.

The ancient doubt about Paul's authorship of the epistle seems today to have become certainty that Paul did not write it, although the grounds for a conclusion are no stronger than formerly. In their desire to prove the non-Pauline authorship, scholars perhaps overemphasize the supposed un-Pauline character of the teaching. There is, after all, profound harmony between the teaching of the Pauline Epistles and the teaching of Hebrews, including harmony between their teachings on the law. Although Paul stressed the moral law in Romans, in Galatians and elsewhere he dealt with the ceremonial law in much the same way, though not so fully, as the writer to the Hebrews. Such utterances as "for Christ, our paschal lamb, has been sacrificed" (1 Cor. 5:7), "the rock was Christ" (1 Cor. 10:4), "now these things are warnings for us" (v. 6), and "these are only a shadow of what is to come; but the substance belongs to Christ" (Col. 2:17) are exactly in line with the teaching of Hebrews.

The author of Hebrews showed how the law, which was a word spoken through angels, is transcended by the gospel, which has been spoken by the Lord of the angels and so demands greater reverence (He. 2:2-4). It is the transcendent glory of the gospel dispensation introduced by Christ and ascribed to Him, that shines throughout the epistle.

The author dealt specifically in He. 7 and 8 with the law of the priesthood, showing that Christ's Priesthood, "after the order of Melchizedek," is more glorious than the Aaronic priesthood under the law and not only surpasses but supersedes it. The imperfect gives place to the perfect, the shadowy to the real, the earthly to the heavenly, the temporal to the eternal. As Paul supported his doctrine of justification apart from the deeds of the law by referring to OT teaching, so the writer of Hebrews found in the OT prediction of the New Covenant the basis for all his reasoning. His reference to the description of the New Covenant indicates that both he and Paul saw the moral law as now written on the heart and as becoming an internal power rather than an external precept.

He next dealt with the law of the sanctuary, considering the law of the sacrifices (He. 9–10). He showed that Christ's one, all-perfect, eternal sacrfice replaced the many imperfect temporary sacrifices offered under the law. At the best the law had "a shadow of the good things to come" (10:1). The shadow was useful for the time being, and the people were greatly privileged in having it, for it directed them to the great Figure who cast the shadow. The whole ceremonial system really had a system of grace at its heart. The sacrifices themselves could not take away sin, but provisional forgiveness was conveyed through them by virtue of their relation to the coming One. The great sacrifice, having been offered, secured eternal redemption, obtained perfect forgiveness, assured free access into the heavenly holy place, and provided the eternal inheritance. Christ's Spirit-taught servants now made fully known the great truth indicated by Christ Himself. Christ, who "is the end of the law, that every one who has faith may be justified" (Rom. 10:4), is also the end of the ceremonial law, the full realization of all its types and shadows.

B. James. In James the relationship is between faith and works, not faith and the law as in Paul (though the works are the works of the law). What has often been taken in James to be justification by works of the law versus justification by faith turns out to be a "justification" by works identical with "justification" by faith. "Show me your faith apart from your works, and I by my works will show you my faith" (Jas. 2:18). He used Abraham's willingness to sacrifice his son in obedience to God as demonstrative evidence — by works — of faith. Abraham's works justified his faith, but faith justified Abraham himself. That this is the Pauline doctrine is strikingly confirmed by their common proof-text, "Abraham believed God, and it was reckoned to him as righteousness" (Gen. 15:6), cited by James (2:23) and Paul (Rom. 4:3).

LAW, JUDICIAL. The form of divine law that, under the dominion of God the supreme Judge, directed the policy of the Hebrew nation (only). The position of Yahweh as Supreme Ruler was made legally and permanently binding by formal agreement of the amphictyony of the twelve tribes (Ex. 19:3-8; 24:3-8), who clearly understood the terms involved. This covenant between Yahweh and the people was renewed annually (Josh. 8:30-35) so that there would be no question about the matter.

As G. E. Mendenhall pointed out (*Law and Covenant in Israel and the Ancient Near East* [1955]) the stipulations of this covenant seem to have some connection with the vassal treaties of the ancient Near East. The people were to acknowledge Yahweh as Founder of the nation, Sovereign, Ruler, and Judge (Ex. 20:2-6); in this capacity He was to be loved, reverently feared, worshiped, and absolutely obeyed. Breaking the covenant was regarded as high treason and, as in the case of the vassal treaties, was punishable by the strongest means (cf. Ex. 20:3-5, 7; 22:20; Lev. 24:16; Dt. 17:2-5).

The chief substitute of Yahweh was, at the early stages of Israel's history, a specially chosen person like Moses or Joshua; in the time of the judges, charismatic leaders like Gideon or Jephthah; in the monarchy, the kings and

their officials; after the Babylonian Captivity, a senatorial oligarchy.

LAW, ROMAN. *See* ROMAN LAW.

LAWFUL; LAWFULLY [Heb. *mišpāṭ*; Aram. *šallîṭ* (Ezr. 7:24); Gk. *éxesti, nomímōs* (1 Tim. 1:8)]; NEB also JUST; PERMITTED; ALLOWED; etc. Seven times the book of Ezekiel mentions the reward of "life" belonging to those who do "what is lawful [*mišpāṭ*] and right [*ṣᵉḏāqâ*]" (18:5, 19, 21, 27; 33:14, 16, 19). This formula, adopted from the language of the law of the sanctuary (W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], pp. 237f.), refers to conduct that conforms to the commands of that law as taught by the priests. In the letter from Artaxerxes to Ezra preserved in Ezr. 7:12-26 Artaxerxes said, "it shall not be lawful" (Aram. *lā' šallîṭ*) to tax the temple personnel. *Šallîṭ*, which basically means "powerful," in this context means "possessing legal authority."

In the NT "lawful" is usually part of an expression that translates Gk. *éxesti*, "it is permissible." Frequently in NT contexts it connotes "permitted by the OT," or perhaps more specifically, "by the Torah" (Mt. 12:2, 4 par. Mk. 2:24, 26 par. Lk. 6:2, 5; Mt. 12:10; 14:4 par. Mk. 6:18; Mt. 19:3 par. Mk. 10:2; Mt. 22:17 par. Mk. 12:14 par. Lk. 20:22; Mt. 27:6; Mk. 3:4 par. Lk. 6:9; Lk. 14:3; Jn. 5:10). Occasionally it means "permissible under Roman law" (Acts 16:21; 22:25; probably also Jn. 18:31; on this passage see R. E. Brown, *Gospel According to John XIII-XXI* [*AB*, 1970], pp. 849f.). Four times in 1 Corinthians (twice in 6:12, twice in 10:23) Paul used the word in a phrase he was probably quoting from the gnostic element at Corinth (F. F. Bruce, *1 and 2 Corinthians* [*NCBC*, 1971; repr. 1980], p. 62; H. Conzelmann prefers to see its provenance in Stoicism, *1 Corinthians* [Eng. tr. *Hermeneia*, 1975], pp. 108f.); in these occurrences the word thus probably means "morally permissible." In 1 Tim. 1:8 the law (*nómos*) is said to be good if used "lawfully" (*nomímōs*); this may mean "properly," i.e., keeping in mind that the law is meant to reprove and constrain sinful persons, rather than the just, who are already motivated to behave in accordance with its precepts (v. 9; for the problems attending this passage, see the comms.). J. E. H.

LAWGIVER [Gk. *nomothétēs*] (Jas. 4:12). In Jas. 4:11f. James admonished his readers not to speak evil against one another, for that implied that they judged not only one another but also the law and thus usurped God's place as the lawgiver and judge. Although *nomothétēs* occurs only here in the NT, it is used similarly in Ps. 9:20 (LXX) and frequently in Philo and Josephus. Philo applied the term not only to God (e.g., *De sacrificiis Abelis et Caini* 131) but also to Moses (e.g., *De vita Mosis* i.1.1) and to all legislators in general (e.g., *De Decalogo* 176). Similarly, Josephus frequently applied the title to Moses (e.g., *Ant.* i.Proem.4 [18, 20, 22]; i.3.6 [95]) and to legislators in general (i.Proem.4 [22]). G. A. L.

LAWLESS [Gk. *ánomos*] (Acts 2:23; 2 Thess. 2:8; 1 Tim. 1:9; 2 Pet. 2:8); AV also WICKED, UNLAWFUL; NEB also HEATHEN, WICKED, EVIL; [*athémitos*] (1 Pet. 4:3); AV ABOMINABLE; NEB FORBIDDEN; [*áthesmos*] (2 Pet. 3:17); AV WICKED; NEB UNPRINCIPLED; "lawless one" is supplied by the RSV in 2 Thess. 2:9; **LAWLESSNESS** [Heb. *ḥāḵām*–'wise man,' emended to *ḥāmās*–'violence'; LXX *paranómon*–'law-breaking'] (Prov. 11:30); AV WISE; NEB VIOLENCE; [Gk. *anomía*] (2 Thess. 2:3, 7; He. 1:9; 1 Jn. 3:4 bis); AV SIN (based on var. reading, *hamartía*, in 2 Thess. 2:3), INIQUITY, TRANSGRESSION OF LAW; NEB WICKEDNESS, WRONG, "break God's laws."

"Lawless" can refer simply to those who do not know the law, i.e., the Gentiles. In Rom. 2:12 and 1 Cor. 9:20, e.g., those "without the law" or "outside the law" (RSV; Gk. *hoi ánomoi*), the Gentiles, are contrasted to those "under the law" (*hypó nómon*), the Jews. In Acts 2:23 "men of Israel" are accused of putting Jesus to death "by the hands of lawless men," i.e., by Gentiles. Of course, even when used in this sense the term is strongly pejorative.

Used as a term of judgment, "lawless" may refer either to the transgression of a specific law or, more generally, to any wickedness. In 1 Pet. 4:3 "lawless" describes idolatry in terms of its violation of the law against images; as such, idolatry is included in a list of "gentile" vices. On the other hand, in 1 Tim. 1:9f. the reference is not to a specific transgression of the law but to a more general state of wickedness. The latter sense also occurs in 2 Pet. 2:8 (of the "lawless deeds" of the Sodomites, contrasted with the "righteous soul" of Lot) and 3:17 (of the heretics).

Greek *anomía*, similarly, can mean either a specific violation of the law of Moses or a general state of unrighteousness and rebellion. In the passages where the RSV uses "lawlessness," however, the focus is not on the transgression of a specific precept but on hostility toward God (in Mt. 7:23; 13:41; 23:28; 24:12 [RSV "evildoers," "iniquity," "wickedness"] there may be a stronger connection to the law). Some interpret 1 Jn. 3:4 ("Every one who commits sin is guilty of lawlessness; sin is lawlessness") as a rejection of antinomianism (cf. AV, NEB); but if this were so one would expect the formulation to be "lawlessness is sin." The point seems rather that, contrary to those who hold that sin is a matter of indifference to the one who possesses *gnōsis*, sin is rebellion against God and a mark of alienation from God (cf. vv. 6-10; so Gutbrod).

As hostility toward God *anomía* has eschatological associations, suggesting an active, personal, and malicious rebellion against God's reign. In addition to 1 Jn. 3:4, eschatological associations are clear in Mt. 24:12 (RSV "wickedness"); Did. 16:4; the Freer MS of the conclusion to Mark; and 2 Thess. 2, where the "man of lawlessness" is the very embodiment of this eschatological rebellion.

The identity of the "man of lawlessness" (2 Thess. 2:3, 8) has been the subject of much discussion. The wisest course may be to acknowledge at the outset with St. Augustine, "I frankly confess I do not know what he [Paul] means" (*Civ. Dei* xx.19). For however clear the term may have been to the Thessalonians (cf. vv. 5f.), subsequent attempts to identify this figure remain mere conjectures.

Some of the conjectures are clearly wrong. The identification of the "man of lawlessness" with the pope (e.g., the preface to the AV) was plainly inspired more by Protestant polemics than by the text. Other figures remote from Paul and the Thessalonians (e.g., Hitler, Stalin) are surely not what Paul meant or the Thessalonians "knew." Nor can the "man of lawlessness" be merely a principle of rebellion at work in the world or a general hostility toward God (J. B. Lightfoot, *Notes on Epistles of St. Paul* [1904]); for he cannot be simply identified with "the mystery of lawlessness" (v. 7). Identifying him with the Jews or a Jewish leader persecuting the Christians in Thessalonica (and the "rebellion" [*apostasía*] with the unbelief of the Jews, e.g., J. Denney, comm. on 1 and 2 Thess. in *Expos.B.* [1892]) hardly coheres with Paul's attitude toward his

kinsmen in Rom. 9:1-5 or his hopes for them in 11:25-32. And to identify him with the Roman empire (B. B. Warfield, *Biblical Doctrines* [1929], p. 611) hardly fits with 13:1-7.

The more tenable conjectures can be classified as political-historical, mythological, and pastoral-catechetical. The political-historical interpretation is both ancient and persistent (*see* ANTICHRIST). According to this view the "man of lawlessness" was a historical figure of the 1st cent. B.C. Caligula and Nero are most often mentioned. Caligula did order that supplication be made to him as the supreme God and did intend to establish his statue in the Jerusalem temple. Nero persecuted the church, and a legend of his "return" (Nero *redivivus*) developed. Such behavior and such claims would surely have reminded Paul of the royal figures opposed to God in the OT (e.g., Dnl. 11:36, to which there is an evident allusion in the passage). But Caligula died before Paul visited Thessalonica, and Nero did not yet reign when the letter was written (at least if the letter is authentic). A still more telling objection to this view, moreover, is that the "man of lawlessness" is not described as a royal figure in 2 Thess. 2, although it would have been easy to capitalize on the OT passages in this way.

The mythological interpretation is of more recent origin. One representative of this type of interpretation, W. Bousset, identified the "man of lawlessness" with Beliar (cf. Sib. Or. 3:63-73) and Beliar in turn with the mythological primeval adversary in Near Eastern mythology. (Other mythological interpretations have also been proposed as the background of the "man of lawlessness.") The problems of this interpretation (although they may not be overwhelming) are that, whereas Paul distinguishes this figure, as Satan's tool, from the adversary Satan himself (2 Thess. 2:9), Beliar is not clearly distinguishable from Satan (in fact, Paul identifies them in 2 Cor. 6:15); moreover, such flights into mythological speculation seem distant from the pastoral concern that prompted the passage.

The most recent interpretation can be called pastoral-catechetical, for the focus is on Paul's pastoral concern for the Thessalonian church (cf. reference in 2 Thess. 2:5 to his earlier catechetical instruction). C. Giblin has contended that the "man of lawlessness" is part of the catechetical tradition and is representational rather than denoting a definite historical person. The figure is "entatively variable" (p. 287) — i.e., it can be shaped to address the particular situation with pastoral flexibility. Although there may be historical allusions, they need not be constant. Paul's concern in 2 Thessalonians is to meet the threat to faith presented by the claim that the parousia has already occurred (2:2). According to Giblin, Paul uses the traditional Christian teaching (entatively variable) to refer to a false prophet, the "man of lawlessness" who, as the antithesis of the "man of God" or true prophet, stands as a threat to faith and righteousness. It is the claim of the false prophet that the parousia has already occurred. Paul's pastoral response associates this claim with the Church's tradition about rebellion and then deals with the antecedent conditions for the parousia in such a way as to caution the Thessalonians against either pride or sloth, to encourage them to "stand firm" (v. 15). The time is "not yet": the "man of lawlessness" is yet to be revealed; stand firm. He will be the very embodiment of rebellion (*apostasía*); stand firm. His doom (as the "son of perdition," v. 3) is sure — but not until he has wreaked much havoc and deception; stand firm.

This description of the nature and destiny of the "man of lawlessness" is developed in vv. 4 and 8. As the culmination and embodiment of rebellion he opposes God and exalts himself — indeed, he exalts himself to the point of taking God's place, claiming to be God (v. 4). He is presently "restrained." (The identity of this restrainer — Gk. *katéchon* in v. 6, *katéchōn* in v. 7 — and its/his relation to the "man of lawlessness" is also very conjectural; *see* RESTRAIN). But the "mystery of lawlessness" is already at work (v. 7): the alienation and rebellion at work in the world are an open secret to the Thessalonians. When "the lawless one" is revealed, he will be vanquished by the Lord; his deceptions will be unveiled and his power destroyed (v. 8). "So then . . . stand firm" (v. 15).

Vos, *Pauline Eschatology* (repr. 1961), pp. 94-135. A. D. VERHEY

LAWSUIT [Gk. *kríma*] (1 Cor. 6:7); AV, NEB, "go to law"; **SUE** [*krínomai*] (Mt. 5:40); AV "sue . . . at law." These terms refer to the process of bringing suit against another person in a court of law. The references in Mt. 5:40 (cf. Lk. 6:29) and 1 Cor. 6:1-8 indicate that the topic was a concern several times in the NT Church.

The most extensive reference is 1 Cor. 6:1-8, in which Paul condemned believers' bringing civil suits against fellow believers, on two grounds: (1) Christians ought not to have such disputes in the first place; (2) if disputes do arise, they should be settled within the Christian assembly and not by unbelievers in Roman courtrooms. Since Christians will judge angels (v. 3), the Church should have no problem settling comparatively smaller disputes.

Matthew 5:40, by describing in legal terms the taking of a debtor's coat ("if one would sue you"), reflects an awareness of rabbinic Halakah. In Jewish society from OT times, a debtor's garment could be taken as surety but had to be returned before nightfall (cf. Ex. 22:26f.; Am. 2:8; *see* PLEDGE). In NT times goods were actually collected not by one's legal opponent but by an officer of the court (cf. T.B. *Baba Metzia* 114b). Taking goods from someone unable to pay was regarded by some as inflicting injury upon him (cf. Midr. *Ex. Rabbah* xxxi.13). But both Jesus and Paul commanded a spirit of nonretaliation against legal abuse. R. J. W.

In OT studies much has been written about Heb. *rîḇ*, "lawsuit," which has come to designate a particularly important genre in prophetic literature. The verb *rîḇ*, which basically means "dispute," developed juridical connotations; hence it can be translated "conduct a lawsuit," and the noun *rîḇ* can be translated "lawsuit." According to Gemser (pp. 128f.) *rîḇ* took on a specialized meaning in the prophets: "a controversy in which Israel's God summons and accuses, threatens and decides against his chosen people." Huffmon and Harvey have emphasized the relationship between the *rîḇ* and the covenant, defining the *rîḇ* as a covenant lawsuit, which God brings against Israel for its violation of the covenant. For a convenient summary of studies on the covenantal lawsuit see W. E. March, "Prophecy," in J. H. Hayes, ed., *OT Form Criticism* (1974), pp. 155f., 166-68.

Bibliography.—B. Gemser, "The *rib-* or controversy-pattern in Hebrew mentality," in M. Noth and D. W. Thomas, eds., *Wisdom in Israel and in the Ancient Near East* (*SVT*, 3; 1955), pp. 120-137; J. Harvey, *Bibl.*, 43 (1962), 172-196; H. B. Huffmon, *JBL*, 78 (1959), 285-295. G. A. L.

LAWYER [Gk. *nomikós* < *nómos*-'law']. An expert in the Jewish law, specifically the law of Moses; equivalent to "scribe" (*grammateús*) or "doctor of the law" (*nomodidáskalos*). *See* SCRIBES.

The term *nomikós* is used adjectivally once in the NT (Tit. 3:9) in the context of disputes concerning the law

(i.e., the OT). It is used of Zenas in Titus 3:13 probably in the normally secular sense of "lawyer" or "notary." In Luke (7:30; 10:25; 11:45f., 52; 14:3) and possibly also in Matthew (22:35, but perhaps introduced from the Lucan parallel) *nomikoí* are the Jewish leaders with the responsibility of preserving, studying, and applying the law to the situations of everyday life. In this last sense the leaders combined the function of religious teacher with that of civil magistrate or judge in Israel. It is noteworthy that Mark never used the term; if the traditional view that his Gospel was intended for a Roman audience is correct, his readers could have misconstrued *nomikós* as referring to experts in Greek or Roman civil law. "Scribe" appears in the Markan parallel (12:28) to Mt. 22:35; Lk. 10:25.

Luke's references to the *nomikoí* are all deprecatory. The lawyers steadfastly opposed Jesus, rejected the purpose of God by rejecting the message and mission of John, and placed impossible burdens on the shoulders of the common people without lifting so much as a finger to help them.

LAY. A verb used by the English versions to render a great number of Hebrew and Greek terms. Among the OT terms frequently translated "lay" are Heb. *śîm* (lit. "put, place [something somewhere]"; e.g., Gen. 9:23; 22:6, 9), *nāṯan* (lit. "give," "set, put"; e.g., Gen. 15:10; Ex. 7:4), and *šîṯ* (lit. "put, set"; e.g., Gen. 48:14, 17; Ruth 3:15). In the NT it most frequently represents Gk. *títhēmi* (a common LXX translation of Heb. *śîm*; also used for *nāṯan* and *šîṯ*). *See also* HANDS, LAYING ON OF.

The AV uses "lay" in many obsolete or peculiar expressions that are changed by the RSV; cf., e.g., AV "laid before their faces all these words" (Ex. 19:7; RSV "set before them all these words"); AV "lay upon him usury" (Ex. 22:25 [MT 24]; RSV "exact interest from him"); AV "they laid it out to the carpenters and builders" (2 K. 12:11 [MT 12]; RSV "they paid it out . . ."); AV "the sword . . . layeth at him" (Job 41:26 [MT 18]; RSV "the sword reaches him"); AV "I have laid upon thee" (Ezk. 4:5; RSV "I assign to you"); AV "laid meat unto them" (Hos. 11:4; RSV "fed them"). N. J. O.

LAYING ON OF HANDS. *See* HANDS, LAYING ON OF.

LAZARUS [Gk. *Lazaros* < Heb. *laʿzār*, a rabbinic abbreviation of *ʾelʿāzār*–'God has helped'].

1. A man in a parable Jesus told (Lk. 16:19-31) to teach that people's conduct on this side of the grave determines their situations after death. This parable follows a story common in Egyptian and Jewish thought, in which the wicked rich and the pious poor have their positions reversed in the afterlife. It is told from the point of view of the rich man (often called Dives from the Latin for "rich man"), who speaks with Abraham from his place of torment.

The first part merely states the situations of both the rich man and Lazarus. Lazarus, who probably represents all the pious poor, is pictured as a beggar infested with sores who would gladly have filled himself with the leftovers from the table of the rich man.

In the second part both men die, and the rich man finds himself in torment while Lazarus resides with Abraham in a state of blessedness. Although this parable does not intend to give a topographical study of the abode of the dead, it is built upon and thus confirms common Jewish thought (*see* HADES; SHEOL). In the Jewish conception of Hades (e.g., 1 En. 22) the good and the wicked could see each other but were separated by a great impassable chasm. Across this chasm the rich man called to Abraham, begging that Lazarus be sent to comfort him. When he was assured of the impossibility of this, he begged that Lazarus be sent back to warn his brothers of their possible fate. Abraham said that if they would not believe Moses, they would not believe one returned from the dead.

The parable is not designed to teach that riches will bring destruction. Rather, it warns the rich that their possessions do not guarantee their future state. The parable was apparently directed toward Sadducean satisfaction with this life, based upon the belief that there would be no life beyond. Thus, Abraham said that even one from the dead would not convince the living to repent.

2. The brother of Mary and Martha. He appears only in the Gospel of John, although Luke mentions his sisters. The family lived in BETHANY on the southeast side of the Mt. of Olives, about 3 km. (1¾ mi.) from Jerusalem (15 stadia, Jn. 11:18). They were apparently well-to-do, since Lazarus had a private tomb and Mary anointed Jesus with a very expensive ointment.

When Lazarus became ill, his sisters sent a messenger to the territory on the other side of the Jordan River where Jesus and His disciples had withdrawn for their own safety (Jn. 10:40–11:3). Lazarus is described in 11:3 (Gk. *philéō*) and v. 5 (*agapáō*) as one whom Jesus loved. (From these statements and the use of *phílos* in v. 11, many have assumed that Lazarus was "the disciple whom Jesus loved" [13:23; 21:20] and thus the author of the Gospel of John; cf. J. N. Sanders and B. A. Mastin, *Comm. on the Gospel According to St. John* [*HNTC*, 1969].) After the arrival of the messenger, Jesus informed His disciples that Lazarus's sickness was "not unto death" but "for the glory of God" (11:4). His statement indicates the miracle's theological significance, which is further emphasized in His dialogue with Martha (vv. 20-27). The miracle would reveal the glory of Jesus, a glory that would point to His divine nature and role (v. 4b). Jesus delayed two days before departing for Bethany, so that when He arrived Lazarus had been dead four days (v. 17). The rabbis taught that the soul hovered near the deceased for three days after death and then returned to God (SB, II, 544); thus on the fourth day death was assured. As if to emphasize this belief, Martha told Jesus not to roll back the stone, for the body had already begun to putrefy.

Lazarus had been buried according to Jewish custom. In that warm country burial took place very soon after the time of death. Friends and sometimes hired lamenters

The resurrection of Lazarus as depicted in a fresco by Giotto di Bondone (ca. A.D. 1305) in the Arena Chapel in Padua, Italy (Museo Civico, Padua)

mourned, often very dramatically, after the burial, usually for thirty days. The deceased was anointed with a spiced oil and bound with a linen cloth. When Jesus came to the tomb and ordered the stone taken away, He commanded Lazarus to come forth; since he had difficulty moving, Jesus ordered him to be unbound.

The raising of Lazarus divided those Jews who had been mourning his death. Some became firm believers in Jesus; others went into the city and reported the event to the Jewish leaders, who convened the Sanhedrin and decided that Jesus should be put to death (Jn. 11:45-53). The raising of Lazarus fills an important place in the Gospel of John because it sets in motion the action of the Jewish court that culminated in Jesus' death. Here the Gospel of John carries an emphasis very different from that of the Synoptic Gospels, in which the chief causes of Jesus' death are His cleansing of the temple and His teaching during the last week of His life. They omit the raising of Lazarus altogether. The only hint of this event is the generalization in Lk. 19:37 that many went out to praise Jesus at the triumphal entry because they had seen His miracles; Jn. 12:18 relates this short statement to the raising of Lazarus.

Lazarus appears for the last time in Jn. 12:1-11 to emphasize the miracle of his resurrection and the enmity it caused among the Jewish leaders. Six days before the Passover Jesus came to a feast in Bethany where Mary, Lazarus's sister, anointed Him (vv. 1-3; but cf. Mt. 26:6-13; Mk. 14:3-9; Lk. 7:37f.). Lazarus was present at this banquet (Jn. 12:2). Vv. 9-11 relate that Lazarus's testimony to Jesus' power made so many people believe in Jesus that the high priests planned to kill him as well as Jesus.

D. W. WEAD

LEAD; LEADEN [Heb. *ʿôpereṭ*]. A heavy, malleable, blue-gray metal. Lead was one of the first metals to be used in its free state, probably because it was so easily extracted from its ores. In ancient times lead was found in Egypt and the Sinai peninsula. Considerable quantities were also found in northern Syria and in Asia Minor, where it was likely derived from silver production by the process of cupellation (heating in a blast of air so that the oxidized lead partly sinks into a porous shallow cup [cupel]). Tyre imported lead from Tarshish (possibly Tartessos in Spain; Ezk. 27:12). These sources no doubt furnished an important supply in biblical times, since Palestine proper has no lead ores.

Since the ancients regarded lead as the heaviest metal (cf. Sir. 22:14), it was generally used for fish lines and sounding lines (cf. Acts 27:28). All along the Mediterranean shores fishers used lead for sinkers. Pieces of Egyptian fishnets with their lead sinkers still attached, probably dating from *ca.* 1200 B.C., are preserved in the British Museum. This use of lead is reflected in the simile employed by the Song of Moses to describe the drowning of Pharaoh's hosts: "they sank as lead in the mighty waters" (Ex. 15:10). Lead was also used for plummets (*see* MEASURING LINE) and heavy covers (Zec. 5:7f.).

Ancient peoples used lead and other metals to bind stones together, as excavations in Syria have shown. The seams between stones in ancient walls and columns, once lead-filled, have been extracted by plunderers for reuse. The American University of Beirut Museum has several cast-lead sarcophagi dating from the time of Christ.

Already in the Neolithic Age lead glazes were used in ceramic manufacture. In the Late Bronze Age lead was introduced into bronze castings, as is shown by bronze crucible slags found in the Sinai that test to as much as 38 percent lead content. The addition of lead increased the fluidity of the metal, leading to the production of finer objects and more accurate castings (Tylecote, p. 29). The Late Bronze Age also saw the production of lead objects, possibly having cultic or votive significance, in trinket moulds.

Lead figurine of the Egyptian goddess Hathor (7 cm. [2.7 in.] high) from Tell el-ʿAjjûl (Middle Bronze Age) (Israel Department of Antiquities and Museums)

Job 19:24 mentions the use of lead in the engraving of permanent records. Of the various interpretations that have been proposed, two alternatives seem most likely: either the letters were chiseled into a rock and the incision was inlaid with lead, or the inscription was engraved with an iron tool on tablets of lead. Archeology has found examples of both types of inscriptions from ancient times (see comms.).

Lead sometimes appears in lists of metals including gold, bronze, iron, silver, and tin (Nu. 31:22; Ezk. 22:18, 20; 27:12); lead usually appears last in the list (cf. Sir. 47:18; also 22:14f.). Jer. 6:29 (cf. Ezk. 22:18-22; Mal. 3:2f.) shows that the OT writers understood the process of refining silver and gold with lead. *See* REFINE.

See R. F. Tylecote, *History of Metallurgy* (1976).

J. A. PATCH R. A. COUGHENOUR

LEADER [Heb. *nāśîʾ, śar, rōʾš, nāgîḏ, ʾayil, qāṣîn, ʿattûḏ, pinnâ*, etc.; Gk. *archēgós*, part. of *hēgéomai, prôtos*; AV also CAPTAIN, PRINCE, RULER, CHIEF, MASTER, OVERSEER, etc.; NEB also CHIEF, COMMANDER, CAPTAIN, PRINCE, etc.

In the RSV OT (esp. in Numbers) "leader" is frequently the translation of Heb. *nāśî'*, which designates the leader of a tribe (e.g., Nu. 2:3, etc.; 7:18, etc.; 34:18, etc.; Josh. 9:15, etc.; 1 K. 8:1). *Śar* can denote various types of leaders, e.g., the captain of a marauding band (1 K. 11:24), a tribal leader (1 Ch. 27:22), an elder or noble (Neh. 4:16; 11:1), a military commander (Jer. 40:13; 41:11, 13, 16). *Rō'š* (lit. "head") can also be used as a general term for leader (e.g., a clan chief, 1 Ch. 4:42; 9:34; 11:42; a leader in worship, Neh. 11:17). *Nāgîḏ* often signifies a leader of Israel chosen by Yahweh (e.g., Jeroboam, 1 K. 14:7; Baasha, 16:2; Judah, 1 Ch. 28:4; David, Isa. 55:4), but it can also be used of other types of leaders (e.g., a military officer, 1 Ch. 13:1). *Qāṣîn* (e.g., Jgs. 11:6, 11; Isa. 3:6f.) is a general term for a military leader (cf. "chief," Josh. 10:24) or "ruler" (Isa. 1:10). Other terms are used metaphorically: *'ayil* (lit. "ram," representing power; e.g., a chief of Moab, Ex. 15:15; cf. "the mighty one," Ezk. 31:11), *'attûḏ* (lit. "he-goat"; e.g., Isa. 14:9; Zec. 10:3; *see* GOAT V), and *pinnâ* (lit. "cornerstone"; e.g., 1 S. 14:38; cf. Isa. 19:13; Zec. 10:4).

The participle of Gk. *hēgéomai* ("lead, guide") occurs several times as a designation of church leaders (Lk. 22:26; He. 13:7, 17, 24). *Prôtos* means literally "first" or "foremost" (Acts 28:17; *see* PRINCIPAL). *Archēgós* can mean either "leader, prince" (cf. RSV "pioneer," He. 2:10; 12:2) or "source, author" (cf. Acts 3:15). Most scholars agree that in Acts 5:31 the term is used in the former sense or in a combination of both senses (e.g., see F. F. Bruce, *Acts of the Apostles* [2nd ed. 1953], pp. 109, 143).

See also CAPTAIN; CHIEF; COMMANDER; PRINCE; RULER.

R. K. H. N. J. O.

LEAF [Heb. *'āleh*] (Gen. 3:7; 8:11; Lev. 26:36; Neh. 8:15; Job 13:25; 30:4; Ps. 1:3; Prov. 11:28; Isa. 1:30; 34:4; 64:6; Jer. 8:13; 17:8; Ezk. 47:12); AV also BRANCH (Neh. 8:15; Prov. 11:28); BUSHES (Job 30:4); NEB also FOLIAGE (Ezk. 47:12); in Isa. 33:9 the object is not present in the MT but is supplied in translation: "Bashan and Carmel shake off [Heb. *nō'ēr*] their leaves"; AV "shake off their fruits"; NEB "are stripped bare"; [Heb. *ṭerep*] (Ezk. 17:9); [Aram. *'ᵉpî*] (Dnl. 4:12, 14, 21); [Gk. *phýlla*] (Mk. 11:13 par. Mt. 21:19; Mk. 13:28 par. Mt. 24:32 [supplied as object of Gk. *probállō* in Lk. 21:30]; Rev. 22:2); **LEAFY** [Heb. *'ăḇôṯ*] (Lev. 23:40; Neh. 8:15; Ezk. 6:13; 20:28); AV THICK; **LEAFY BRANCHES** [Gk. *stibás*] (Mk. 11:8); AV BRANCHES; NEB BRUSHWOOD; the par. in Mt. 21:8 has Gk. *kládos*, "branch."

The primary Hebrew word for "leaf" is *'āleh*, which has been related etymologically to the verb *'ālâ*, "go up, spring forth." This word designates the leaf of the following trees: fig (Gen. 3:7; Neh. 8:15; cf. Mk. 11:13 par.; 13:28 par.), olive (Gen. 8:11; Neh. 8:15), wild olive (Neh. 8:15), myrtle (Neh. 8:15), palm (Neh. 8:15), oak (Isa. 1:30; Ezk. 6:13). It is also used of bushes (Job 30:4) and vines (Isa. 34:4).

The green, well-nourished leaf is a symbol of prosperity and security, especially of the righteous and godly, e.g., Prov. 11:28, "The righteous shall flourish like a leaf." In this usage "leaf" is frequently found in the vicinity of or paired with "fruit," e.g., Ps. 1:3; Jer. 17:8; Ezk. 17:9; 47:12; Dnl. 4:12, 14, 21; Mk. 11:13; Mt. 21:19.

Conversely, the withering leaf is an image of judgment and the destruction of the wicked, e.g., Isa. 64:6, "We all fade like a leaf, and our iniquities, like the wind, take us away." Separated from its source of life, the leaf withers and dies. The term *nāḇal*, "to wither, decay," is used in association with "leaf" in Ps. 1:3; Isa. 1:30; 34:4; 64:6; Jer. 8:13; Ezk. 47:12. In Ezk. 17:9 the verb is *yāḇēš*, "be dry." In Mt. 21:19 the fig tree withers after Jesus utters a curse upon it; *see* FIG, FIG TREE.

The "leafy trees" in Lev. 23:40; Neh. 8:15 refer to boughs that the Israelites carried in processions and used to make booths at the Feast of Tabernacles. The rabbis (T.B. *Sukkah* 12a; T.P. *Sukkah* iii.53d) interpreted them as MYRTLES.

In Ezekiel's temple vision, the leaves of the trees lining the river serve for healing (Ezk. 47:12). In Rev. 22:2 the river of the water of life nourishes the tree of life, whose leaves are for the healing of the nations.

At Ex. 39:3 the RSV translates Heb. *paḥê-hazzāhāḇ* (lit. "thin plates of gold"; cf. AV, NEB) by "gold leaf," which was worked into threads for the high priest's EPHOD.

B. L. BANDSTRA

LEAGUE [Heb. *bᵉrîṯ*–'covenant', *massēḵâ*, *nāḥâ*–'lead']. The RSV OT uses this term nine times, generally in the sense of a covenant (*bᵉrîṯ*) or military alliance of an unspecified nature or duration (1 K. 15:19 par. 2 Ch. 16:3). In 1 S. 22:8 the concept of contract is implied by the verb *kāraṯ*, "cut, engrave," which is a component of covenant terminology. In Job 5:23 *bᵉrîṯ* is used metaphorically. In vv. 17-27 Eliphaz tells Job that those whom God chastens will be blessed. Part of that blessing will entail harmony with nature; Eliphaz speaks of this harmony in terms of a "league with the stones of the field."

An unusual term, *massēḵâ*, was rendered "league" by the RSV in Isa. 30:1, but "covering" in AV and "schemes" in NEB. Those who argue for "league" base the term on a root *nsk*, which means "to pour out," and thus may refer to a libation made to seal a covenant.

The verb *nāḥâ* was used in Isa. 7:2 of the Syro-Ephraimite coalition against Judah, probably in the sense of Syria "giving leadership" in the alliance. Most English translations do not reflect this sense, however, preferring instead "in league with" (RSV), "is confederate with" (AV), or "had come to terms with" (NEB). The NEB seems to be less a translation of *nḥh* than an attempt to interpret it in the light of the known historical situation.

R. K. H.

LEAH lē'ə [Heb. *lē'â*–'wild cow'; Gk. *Leia*]. Sister of Rachel and elder daughter of Laban (Gen. 29:16). The narrative about her begins (v. 17) by stating that her eyes were "weak" (Heb. *rakkôṯ*; Gk. *astheneís*), which is usually interpreted to mean that her eyes were lackluster and she was therefore unattractive (cf. Josephus *Ant.* i.19.6 [301], "she was not pleasing in appearance"). It is also possible, however, that she was afflicted with an eye disease, such as blepharitis or mucopurulent conjunctivitis. The former is an inflamed condition of the eyelids, particularly of the marginal areas (*blepharitis marginalis*); the latter is a bacillary infection of the conjunctivae that results in a discharge containing both mucus and pus. Ophthalmic disease, often disseminated by flies, was widespread in the ancient Near East (*see* DISEASE III.G). Either interpretation would mean that she was unattractive, as the contrasting description of Rachel in v. 17b suggests. Some scholars, however, translate *rakkôṯ* "tender, delicate," and explain that Leah had attractive eyes, but Rachel was more beautiful (see E. A. Speiser, *Genesis* [*AB*, 1964], p. 225; *CHAL*, p. 339).

Leah became the wife of Jacob by a ruse on the part of her father, who took advantage of the oriental custom of heavily veiling the prospective bride. When taken to task by his irate son-in-law, Laban excused himself by stating it was against the custom of his country "to give the younger before the first-born" (Gen. 29:21-26). Despite Jacob's apparently resenting her as well as her father, Leah endeavored to serve her husband with devotion and

diligence. She bore him six sons — Reuben, Simeon, Levi, Judah (29:31-35), Issachar, and Zebulun (30:17-20) — and a daughter, Dinah (v. 21); three of the children may have been conceived late in her menopausal phase (cf. vv. 9, 17-21). Unlike Leah, Rachel the favorite wife had difficulty bearing children. She bore her first, Joseph, after Leah had already produced seven children, and she died in childbirth with Benjamin (35:16-18).

When Jacob decided to return to the land of his fathers, both of his wives were ready to accompany him (Gen. 31:4, 14). The meeting on the way between Jacob and his brother Esau sorely tried their courage. Although Leah was placed between the handmaids in the front and Rachel with her son Joseph in the rear, she still cannot have derived much comfort from her position. She must have felt relieved when she saw Esau and his four hundred men returning to Seir (33:2, 16).

Leah was buried at Machpelah (Gen. 49:31). According to Ruth 4:11 her conduct had become an example for successive generations to follow, as one of the two women who had "built up the house of Israel."

LEANNOTH. *See* MAHALATH (LEANNOTH).

LEAPING. *See* DANCE.

LEASH. The RSV renders Heb. *qāšar* in Job 41:5 (MT 40:29) "put . . . on leash" (AV "bind"; NEB "keep . . . on a string"). The figure is that of little girls playing with a young sparrow on a string. It illustrates God's total control over Leviathan as opposed to Job's impotence before this impressive creature.

LEASING [Heb. *kāzaḇ*–'lie, deceive'] (AV Ps. 4:2 [MT 3]; 5:6 [MT 7]). Archaic term for LIE.

LEAST [Heb. *ṣā'îr*] (Jgs. 6:15; 1 S. 9:21; Ps. 68:27 [MT 28]); [*qāṭān, qāṭōn*] (2 K. 18:24 par. Isa. 36:9; 60:22; Jer. 6:13; 8:10; 31:34; 42:1, 8; 44:12; Jonah 3:5); AV also LITTLE (Isa. 60:22); NEB also FEW, LOW (Jer. 6:13; 8:10; 31:34; etc.); [Gk. *eláchistos*] (Mt. 2:6; 5:19; 25:40, 45; 1 Cor. 15:9; Eph. 3:8); NEB HUMBLE (Mt. 25:40, 45), LOWEST (Mt. 5:19), INFERIOR (1 Cor. 15:9); [*mikrós*] (Mt. 11:11; Lk. 7:28; 9:48; Acts 8:10; He. 8:11); NEB also LOW; [*exouthenéō*] (1 Cor. 6:4); NEB "count for nothing."

"Least" is used as a translational facilitation for various Hebrew idioms (Gen. 24:55; 32:10 [MT 11]; Ex. 5:11; Nu. 11:32; Jgs. 3:2). In Jeremiah "least" occurs six times in the expression "from the least to the greatest," i.e., everyone. A theme recurring throughout the OT is that one who is politically least becomes great (cf. Jgs. 6:15; 1 S. 9:21; Isa. 60:22).

Although the rabbis and Greeks frequently disdained what was "little" and exalted what was "great," the NT reemphasized the OT theme but in more universal terms. Because the Evangelists believed that the "small" (Mt. 18:6, 10, 14), the "least" (10:42; 25:40, 45), and the "poor" (Lk. 6:20; cf. Mt. 5:3) possess the kingdom, they rejected the value system of this world. This world sees the kingdom of God itself as unimportant, but like the mustard seed the "smallest" kingdom will one day become the greatest of all (Mk. 4:31f.).

The apostle Paul did not lose sight of this understanding. As he matured in his faith, the seriousness of his past persecution of the Church increasingly disturbed him. It kept him from exulting in his achievements. In contrast to those who boasted in their greatness (2 Cor. 11–12) and saw themselves as "superlative apostles" (11:5; 12:11; cf. Gal. 2:6), he boasted in his weakness (2 Cor. 12:10). He marveled at the grace of God; he had been forgiven so much that he would always be the "least of the apostles" (1 Cor. 15:9) and "least of all saints" (Eph. 3:8). To be the "least," however, did not mean to be unimportant or insignificant, for the low and despised were those chosen by God (1 Cor. 1:28). Thus Paul rejected this world's system of values (vv. 18-31). God's grace was not given in vain to him, for he labored more than all the other apostles (15:10) and became a great example of one who, having been forgiven much, loved much (Lk. 7:47).

See *TDNT*, IV, *s.v.* μικρός (Michel). R. H. STEIN

LEATHER [Heb. *'ôr*] (2 K. 1:8); [*tāḥaš*] (Ezk. 16:10); AV BADGERS' SKINS; NEB STOUT HIDE; [Gk. *dermátinos*] (Mt. 3:4; Mk. 1:6); AV LEATHERN, SKIN. Skins, usually of domesticated animals (esp. sheep and goats), treated for practical uses. *See also* TANNED, TANNER; GOATSKINS; SHEEPSKIN.

The art of treating animal skins to make leather by tanning can be traced to the 4th millennium B.C. and before. The technology was highly developed in the Middle East long before the Hebrews began to write. Some leather thongs on a Chalcolithic adze handle (*ca.* 4000 B.C.) and a leather sandal dating from the time of Abraham were discovered in 1951 in Wâdī Murabba'ât Cave 2 near the Dead Sea. Biblical references to animal skins, probably tanned leather, mention garments (Gen. 3:21; Lev. 13:48-59; Nu. 31:20; He. 11:37), girdles (2 K. 1:8; Mt. 3:4; Mk. 1:6), sandals (Ezk. 16:10), coverings for the wilderness tabernacle and its utensils (Ex. 25:5; 26:14; 35:7, 23; 36:19; 39:34; Nu. 4:6-25), probably for David's "shepherd's bag" (1 S. 17:40), water- or milk-skins (Gen. 21:14; Jgs. 4:19; Job 38:37), and wineskins (1 S. 1:24; Mt. 9:17).

Leather was clearly meant by *'ôr taḥaš* ("skin of *taḥaš*") in the Exodus and Numbers passages describing the covering of the wilderness tabernacle. The confusion over the animal skins (AV "badger skin", ASV "sealskin" [mg. "porpoise skin"], RSV "goatskin" [except Nu. 4:25 "sheepskin"], NEB "porpoise-skin" [mg. "sea cow"], Jewish Publication Society translation [1962] "dolphin skin" [mg. "skins of *teḥashîm*"]) suggests the best translation be just "leather" or possibly "goatskin," the most common skins available to people wandering in the Sinai wilderness. The cognate Arabic words *tuḥas* and *duḥs* ("dolphin" or "dugong") can hardly be reconciled with the environment and customs of the biblical accounts. *See also* PORPOISE.

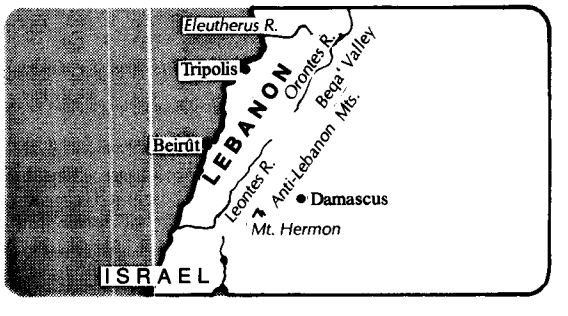
That leather (or PARCHMENT) was primarily used for writing in ancient Palestine has now been established by the DSS discovery. Most of the 600 MSS from the eleven Qumrân caves are leather (or parchment, if the stretching process is the only basis for distinguishing the two terms). 1QIsa^a, the oldest extant biblical MS, was copied *ca.* 100 B.C.; it has 54 cols. of Hebrew text for its 66 chapters on seventeen sheets of a coarse leather (sheepskin) sewn together with linen thread and inscribed with carbon ink, making a scroll 7.3 m. (24 ft.) long. (*See* picture in ISAIAH.) The DSS shed considerable light on the technology of leather and parchment preparation in biblical times. For articles of leather in Mishnaic times see Mish. *Kelim*.

See R. Reed, *Ancient Skins, Parchments and Leathers* (1972). J. C. TREVER

LEAVEN [Heb. *śᵉ'ōr*; *ḥāmēṣ*; Gk. *zýmē*; *zymóō*; Lat. *fermentum*]. Any agent added to a flour mixture or liquids to produce a state of fermentation. The ancient Hebrews always kneaded with their bread a piece of fermented dough reserved from a previous baking (cf. Mt. 13:33). The leaven may also have been softened in water in the mixing bowl before the flour was added. Other forms of leaven used in the ancient world (cf. Pliny *Nat.Hist.* xviii.26

[102-104]) were not mentioned in the Bible, whether or not the Hebrews employed them.

The Hebrew sacrificial system prohibited the use of leaven in cereal offerings and sacrifices to God (cf. Ex. 23:18; 34:25; Lev. 2:11; 6:17; etc.). It was allowed, however, in offerings that humans subsequently consumed (cf. Lev. 7:13; 23:17). It is uncertain whether the showbread was leavened, but Josephus thought that it was (*Ant.* iii.6.6 [142]; x.7 [255]). Why leaven was prohibited in offerings to God is unknown.



Unleavened bread figured prominently in a specific feast of that designation (*see* FEASTS). It commemorated the haste of the Israelites' departure from Egypt at the time of the Exodus, which left them no opportunity to use a rising agent in preparing their bread (Ex. 12:34, 39). An annual observance of this great deliverance formed part of the Passover celebrations. From the fourteenth day of Abib, the first month, the Hebrews were required to eat the "bread of affliction" (Dt. 16:3) for seven days (cf. Ex. 12:14-20; 13:3-10; 23:15; 34:18; Nu. 28:17). Anyone who ate leavened bread or cakes during that period was expelled from the company of the Israelites (cf. Ex. 12:15-20; 13:7). Fermented products other than grain were not affected by the ritual prohibitions governing the Passover celebrations.

Leaven lent itself readily to figurative use as a symbol of pervasiveness (cf. 1 Cor. 5:6-8; Gal. 5:9). Christ mentioned leaven to exemplify the penetrating or transforming power of the kingdom of heaven (Mt. 13:33; Lk. 13:21). He stigmatized the "leaven," i.e., the hypocritical teaching, of the Pharisees and Sadducees (Mt. 16:6, 11f.; Lk. 12:1; cf. Mk. 8:15). Using the Passover celebrations as an allegory, Paul urged the casting out of the leaven of malice and wickedness and the substitution of sincerity and truth as an appropriate means of keeping the feast (1 Cor. 5:6-8).

R. K. H.

LEBANA, LEBANAH lə-bā'nə, lə-bä'nə [Heb. *lᵉḇānâ*; Gk. *Labana* (1 Esd. 5:29)]. Head of a family of returning exiles. The variant spellings in the English versions are curious, since the same person is obviously meant in all the texts. The NEB transliterations are stricter — Lebanah in the OT and Labana in 1 Esd. 5:29 — whereas the RSV uses Lebana in Neh. 7:48 and Lebanah in Ezr. 2:45; 1 Esd. 5:29. The AV agrees with the RSV in the OT but has Labana in 1 Esdras.

LEBANON leb'ə-non [Heb. *lᵉḇānôn*, usually with definite article, "(the) very white"; Gk. *Libanos*]; AV also LIBANUS (Jth. 1:7). A forested mountain range N of Israel, and the land where that range is located. The morphology of the Hebrew, supported by Arab. *libnân* and Akk. *labnânu* (sufformative *-ân*, developing by the "Canaanite shift" to *-ôn*), is probably to be taken as an elative, "*the* white (one)," "the whitest," or "the very white."

The Lebanon range, which parallels the coast, is about 160 km. (100 mi.) long, with an average elevation in the north of 2100 m. (7000 ft.) and in the south of 1650 m. (5400 ft.). It is often considered a part of a mountain range that extends from the Amanus mountains in the north to the Sinai, but the geological structure is more complex, as D. Baly showed (*GB*, 2nd ed., pp. 9-11, 29f., 191). The highest part of the Lebanon range is Qurnat es-Sawda, 3088 m. (10,131 ft.), located 30 km. (19 mi.) ESE of Tripolis (modern Ṭarâbulus). The two portions of the range are divided by a saddle, Darh el-Baidar, 1542 m. (5059 ft.), which provides an easier route from the coastal region (specifically Beirût) to the central valley and on to Damascus. The Lebanon range is cut at the northern end by Nahr el-Kebir (ancient Eleutherus, to be distinguished from another Nahr el-Kebir near Latakia), the boundary between the modern states of Lebanon and Syria, and at the southern end by the gorge of the Litani (there known as Nahr el-Qāsimiyeh). West of the range is a coastal plain, widest in the north near Tripolis, and at some points almost nonexistent because of spurs of the mountain that dip into the Mediterranean.

East of the Lebanon range is a valley, the Beqaʿ (often spelled Baqâʿa or Bakaa, *el-Biqâʿ*; *see* COELESYRIA). The northern portion of it is formed by the Orontes River (Nahr el-ʿĀṣi), which flows N, and the southern portion by the Leontes (Nahr el-Līṭânī, modern Litani), which flows south. The watershed of this valley is north of Baalbek at an altitude of 1149 m. (3770 ft.). The Beqaʿ separates the Lebanon from the Anti-Lebanon (Antilibanos), a parallel range that borders the Syrian desert to the east. The southern portion of the Anti-Lebanon (i.e., S of the pass near Zabdāni that provides passage for the road from Beirût to Damascus) is generally considered a separate range, Jebel esh-Sheikh, the Mt. Hermon of the Bible. *See* Plate 50.

Was the term Lebanon used also of the region adjacent to the mountain range? In Jgs. 3:3 *har hallᵉḇānôn* (lit. "the mountain of the Lebanon," RSV "Mount Lebanon") has been interpreted as a possessive genitive ("Lebanon's mountain"), but it may just as well be appositional ("the mountain, i.e., Lebanon"). In Josh. 9:1 *mûl hallᵉḇānôn* (lit. "in front of [RSV "toward"] the Lebanon") can be taken as the name of the region, but this interpretation is not required by the context. In 11:17 *biqʿaṯ hallᵉḇānôn*, "the valley of the Lebanon," certainly refers to the Beqaʿ — but is "Lebanon" the place where the valley is located, or the mountain range that identifies this particular "valley"? Note that "Lebanon" is apparently the name of the larger region in Cant. 4:8, "come with me from Lebanon," for the same verse mentions the peaks of Amana (in the Anti-Lebanon), Senir (the northern part of Hermon), and Hermon. The cedars of Lebanon are mentioned often (Jgs. 9:15; Isa. 2:13; etc.); possibly they are intended also by "the glory of Lebanon" (Isa. 35:2), "fragrance like Lebanon" (Hos. 14:6 [MT 7]), "wood of Lebanon" (Cant. 3:9), and "Lebanon with its majestic trees" (Isa. 10:34). The "snow of Lebanon" (Jer. 18:14), according to the emendation followed by the RSV, is on the crags of Sirion (Hermon). *See* Plate 2. The "flowing streams of Lebanon" (Cant. 4:15) may indicate numerous water sources in the region, particularly those at the base of Hermon and near Merj ʿAyûn. Thus the Bible seems to use "Lebanon" for a region rather than just for the mountain range; yet the term should properly not be equated with the modern country of that name.

For the possible location of Lebo-Hamath, *see* HAMATH; cf. *GTTOT*, §§ 274, 766f., 1494f.; *LBHG*, rev. ed., pp. 72f.

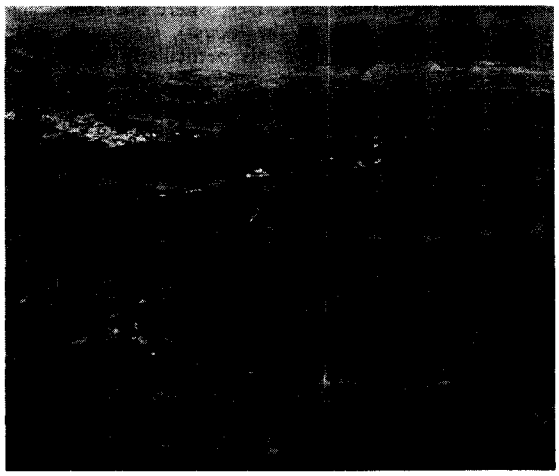
W. S. LASOR



LEBAOTH lə-bā'əth [Heb. *lᵉḇā'ôṯ*]. A site "in the extreme South" belonging to Judah (Josh. 15:32). In 19:2-6, which duplicates much of the list of cities in 15:22-32, BETH-LEBAOTH replaces Lebaoth (cf. 15:32 and 19:6). Moreover, in 19:1 the cities are part of the lot of Simeon, "in the midst of the inheritance of the tribe of Judah." Further complicating the identification, the list in 1 Ch. 4:29-31 has BETH-BIRI instead of (Beth-)Lebaoth. The site is apparently near Sharuhen (Josh. 19:4). W. S. L. S.

LEBBAEUS le-bē'əs [Gk. *Lebbaios*] (Mt. 10:3, AV). *See* THADDAEUS.

LEBO-HAMATH. *See* HAMATH.

LEBONAH lə-bō'nə [Heb. *lᵉḇônâ*]. A village on the road from Bethel to Shechem (Jgs. 21:19). The location of Shiloh was indicated by the phrase "north of Bethel . . . and south of Lebonah," which seems to attribute some importance to Lebonah. It is identified with the small modern village of Khan el-Lubban, just W of the main north-south road where it crosses the Valley of the Dance (the Valley of Jephthah's Daughter). This valley is the traditional dividing line between Judah and Samaria. (Bethel, which was near the southern limits of the kingdom of Israel, is S of the valley; hence the tradition must be handled critically.) The Talmud calls Lebonah Beth Laban ("house of milk"), ostensibly because of milk-white rocks in the area. It was one of five cities that provided wine for libations in the temple (E. Hoade, *Guide to the Holy Land* [1973], p. 665) and even today produces fine grapes. W. S. L. S.

The plain of Lebonah (A. D. Baly)

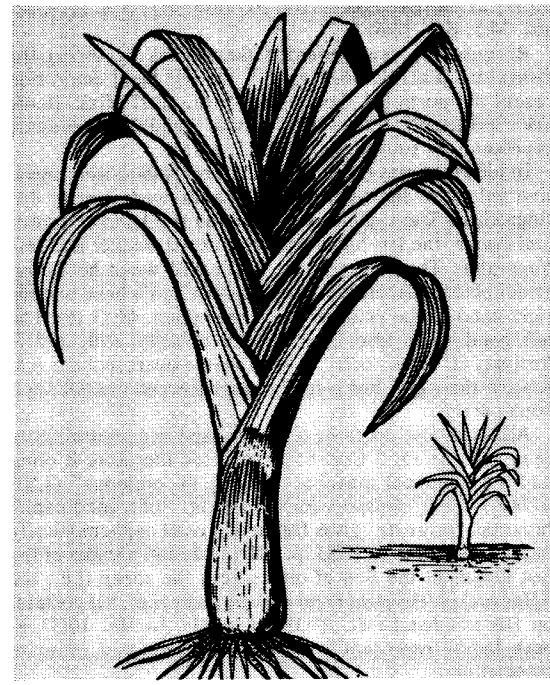
LEB-QAMAI [Heb. *lēḇ qāmāy*] (Jer. 51:1, RSV mg.). A cipher for Chaldea (*see* ATHBASH), formerly taken as a corruption of *qambullay* and identified as Gambulai (BDB, p. 525).

LECAH lē'kə [Heb. *lēḳâ*] (1 Ch. 4:21). A son of Er in the genealogy of Judah (so RSV, AV); some scholars, e.g., KoB, p. 482, have held that Lecah was a village founded by Er (cf. NEB).

LECTIONARY. *See* TEXT AND MSS OF THE NT.

LEDGE [Heb. *karkōḇ* (Ex. 27:5; 38:4), *ᵃzārâ* (Ezk. 43:14, 17, 20; 45:19)]; AV also COMPASS, SETTLE; NEB also PEDESTAL, PEDESTAL-BLOCK.

The ledge described in Ex. 27:5; 38:4 was a shelflike, horizontal projection halfway down the altar of burnt offering that stood in the court of the tabernacle. Its exact purpose is not mentioned. It may have been a convenient storage apron upon which the equipment associated with sacrifice was laid. Although this suggestion is supported by the listing of such implements in the immediate context (27:3), the ledge may instead have been a purely decorative molding.



Ezekiel notes two ledges associated with the altar in the inner court of the eschatological temple (43:14, 17, 20; 45:19). This sacrificial altar is entirely different from that of the tabernacle. It stands on three superimposed stages or platforms (NEB "pedestal-block"). The bottom one is sixteen cubits square. Sitting atop it, and leaving a one-cubit border (or ledge), is a second platform fourteen cubits square. The third level, twelve cubits square, also leaves a one-cubit ledge and is the platform on which the altar actually stands.

These two ledges are thus part of a three-tiered structure, surmounted by an altar, that is vaguely reminiscent of the Babylonian ziggurat. If Ezekiel, an exile in Babylon, had so modeled this altar, then it represents the eschatological fulfillment of ancient religious aspirations as well as the final worship of the true God, in contrast with the false cultus of heathendom (W. Eichrodt, *Ezekiel* [Eng. tr., *OTL*, 1970], p. 557).

See also ALTAR; TEMPLE. K. H. MAAHS

LEECH [Heb. *ᵃlûqâ*; Gk. *bdélla*]; AV HORSELEACH. The Hebrew word occurs once only in the OT (Prov. 30:15), and its general meaning is clear, since it is almost identical with Arab. *ʿalaqâ*, "leech." At least six species of leech flourished in Palestine and Syria in biblical times, having as their habitat pools and streams where animals drank. Once ingested, they attached themselves firmly to the interior of the mouth or pharynx and proved extremely difficult to remove. R. K. H.

Leek (*Allium porrum*)

LEEK [Heb. *ḥāṣîr*]. An herb of the lily family characterized by a cylindrical bulb and linear succulent leaves. Its flavor is similar to the onion's but more pungent. Although Heb. *ḥāṣîr* is almost always translated "grass," its association in Nu. 11:5 with garlic and onions has caused it, at least since the LXX, to be understood as "leek" (Gk. *práson*) in that passage. The leek, *Allium porrum* L., was widely grown and was a very popular food in ancient Egypt and Palestine. Some botanists have suggested the unrelated fenugreek (*Trigonella foenum-graecum* L.), a clover-like annual bearing aromatic seeds and used in medicine and food, but this is improbable.

See *MPB*, pp. 34f. R. K. H.

LEES [Heb. *šᵉmārîm*–'dregs'] (Isa. 25:6; Jer. 48:11; Zeph. 1:12); NEB also WELL-MATURED, DREGS. The DREGS or sediment that settles to the bottom of a receptacle. In biblical times WINE was often left "on the lees" to increase its strength and flavor; just before it was drunk it was strained through a cloth (cf. RSV "refined," Isa. 25:6). To prevent undesirable thickening on the lees, wine was periodically poured from vat to vat. Thus "settled (or thickening) upon one's lees" could be used as a figure for a complacent people: for Moab, who had never suffered exile (Jer. 48:11), and for the residents of Jerusalem who thought that God would not act (Zeph. 1:12). N. J. O.

LEFT (HAND) [Heb. usually *šᵉmō'l*, also *šᵉmā'lî*, hiphil of *šāma'l*–'go to the left'; Gk. usually *euōnymos*, also *aristerós* (Mt. 6:3; Mk. 10:37; Lk. 23:33; 2 Cor. 6:7)]; **LEFT-HANDED** [Heb. *'iṭṭēr yaḏ yāmîn*–'impeded (on) the right hand; Gk. *amphoterodéxios*–'ambidextrous'] (Jgs. 3:15; 20:16). The terms are used primarily to indicate direction of orientation, with or without the terms for "hand." Thus Abraham says to Lot: "If you take the left hand [*šᵉmō'l*], then I will go to the right; or if you take the right hand, then I will go to the left [hiphil of *šāma'l*]" (Gen. 13:9). Frequently in Hebrew idiom the right and left hands are mentioned together to express the idea "everywhere," "anywhere," or "at all" (e.g., Gen. 24:49; Nu. 20:17; 22:26; Dt. 5:32; 17:11, 20; Josh. 1:7; 2 S. 2:19, 21; Isa. 54:3; Zec. 12:6).

Because the Jews oriented themselves by facing the rising sun (Lat. *oriens*, "east"), the left hand could represent the north (cf. Gen. 14:15; Josh. 19:27; Ezk. 16:46; AV "left hand"; RSV, NEB, "north") and the right could represent the south (cf. 2 S. 24:5, AV).

In biblical times (as in many cultures today) the respective values of the right and left hands were clearly distinguished. The right was considered the hand of power and honor; the left hand was considered weaker and less honorable. Thus Joseph was displeased when his father Israel placed his left hand on the elder son's head and his right hand on the younger son's head (Gen. 48:13-19). The left hand could also be a symbol of folly, evil, and ill fortune; cf. Eccl. 10:2: "A wise man's heart inclines him toward the right, but a fool's heart toward the left" (cf. Jonah 4:11).

Although Gk. *aristerós* could be used in a neutral sense (e.g., Lk. 23:33; 2 Cor. 6:7), in Greek literature it often had a symbolical meaning "boding ill, ominous" (LSJ, p. 240; cf. Lat. *sinister*). *Euōnymos* (lit. "of a good name, honored, fortunate") was frequently used euphemistically in place of *aristerós* (LSJ, p. 740). In Jesus' parable of the last judgment the Son of man places the sheep (i.e., the righteous) on His right hand and the goats (i.e., the godless) on His left hand (Mt. 25:33; cf. v. 41). In Mk. 10:37, 40 both hands represent positions of honor and intimate association.

While the left hand was considered weaker than the right, it was the hand that held the bow (Ezk. 39:3). Because a warrior held his shield with his left hand, he was most vulnerable on his right side. Thus a left-handed or ambidextrous warrior could be especially deadly: e.g., Ehud the Benjaminite (Jgs. 3:15, 21), the seven hundred left-handed Benjaminites (20:16), the ambidextrous Benjaminites who assisted David (1 Ch. 12:2); cf. Joab's treacherous slaying of Amasa (2 S. 20:9f.).

N. J. O.

LEG [Heb. *šôq*] (Dt. 28:35; 1 S. 9:24; Ps. 147:10; Prov. 26:7; Cant. 5:15; Isa. 47:2); AV also SHOULDER, THIGH; NEB also THIGH; [*kᵉrā'ayim*] (Ex. 12:9; 29:17; Lev. 1:9, 13; 4:11; 8:21; 9:14; 11:21; Am. 3:12); NEB also SHIN, SHIN BONE; [*regel*] (Ex. 25:26; 37:13; 1 S. 17:6; Ezk. 1:7); AV also FOOT; [*margᵉlôṯ*] (Dnl. 10:6); AV, NEB, FOOT; [Aram. *šāq*] (Dnl. 2:33); [Gk. *skélos*] (Jn. 19:31-33); [*poús*] (Rev. 10:1); AV FOOT. *See also* FOOT.

Šôq particularly refers to a human's lower leg or shank (as distinguished from the thigh, e.g., in Jgs. 15:8: *šôq 'al-yārēḵ*; see C. F. Burney, *Book of Judges* [1920], pp. 369f.) but by extension may also signify the whole leg. Only in 1 S. 9:24 does *šôq* designate a nonhuman leg. In Dnl. 2:33, though the imagery is human, the point of reference of the Aramaic cognate *šāq* is an envisioned symbolic statue. *Šôq* appears once in the Qumrân literature (1QM 6:15), in the military idiom *battê šôqayim*, "greaves, shin-guards" (lit. "shin-receptacles"), the technical term derived from the body part covered by the armor (see Y. Yadin, *Scroll of the War of the Sons of Light Against the Sons of Darkness* [Eng. tr. 1962], pp. 122f.).

With one exception (Lev. 11:21, where the term designates the leaping legs of the locust), *kᵉrā'ayim* refers exclusively to the legs of animals, particularly in sacrificial contexts. Like *šôq*, this term specifies a particular portion of the leg, viz., the shin or lower front section, but also by extension may denote the entire leg. From this term derived the denominative verb *kāra'*, "kneel down."

Regel, properly "foot," occasionally by extension means "leg" (e.g., 1 S. 17:6 uses *raglayim* to indicate where Goliath wore his greaves). The Greek counterpart, *poús*, "foot," is once similarly extended in the NT (Rev. 10:1). The use of *regel* in Ezk. 1:7 and *margᵉlôṯ* in Dnl. 10:6 as apocalyptic images of power and strength prefigures the NT use of *poús* as an eschatological symbol of strength or authority (Rev. 10:1).

The NT seldom refers to legs or parts of legs; *skélos*, "(entire) leg," occurs only three times, all in Jn. 19:31-33, which relates that the legs of the two men crucified with Jesus were broken before the bodies were removed.

LEGEND. Myth, saga, legend, and fairy tale are commonly considered to be the same thing. Even scholars sometimes use the terms interchangeably, and distinctions that are made are not accepted by all. One frequent distinction is that a myth is a wholly invented tale with no factual basis in history, while a legend consists of a kernel of ancient fact encased in a husk of more recent fabrication (*see* MYTH). But even this distinction is not standard.

In modern form criticism of the Bible the legend genre is most frequently confused with saga. Pioneers of OT form criticism (Gunkel, Gressmann, Sellin, Eissfeldt) spoke of myth, saga, legend, novella, fairy tale, and historical narrative, while the NT ground-breakers Dibelius and Bultmann discovered similar forms: tale, myth, legend,

miracle story, and historical story (*see* CRITICISM III). When definitions are sought among these pioneers and their successors it soon becomes apparent that uniformity does not exist — indeed, confusion reigns (cf. Hals). In fact, one of the purposes of a commentary series launched in 1981 — the *Forms of the OT Literature* — is "to bring consistency to the terminology for the genres... of the biblical literature" (from the Editors' Foreword).

I. Terminology.–The English word "legend" (French *légende*) is a derivative of the Low Latin *legenda* (neuter pl.) meaning "things to be read." The classical original was *legere* ("read, gather," etc.), a cognate of Gk. *légō* ("speak," etc.). From the 12th cent. A.D. *legenda* ("something to be read or recited") referred to the stories of saints and martyrs (see H. Delehaye, *Legends of the Saints* [1962]; Jolles, pp. 23ff.). These legends tried to satisfy the need of ordinary Christians to understand the holiness of character in certain godly lives. Gradually these tales became associated with the saints' and martyrs' special days, when their memories were hallowed and their deeds recalled. In the process, popular devotion embroidered the stories with details so fanciful that the original historical facts were all but obscured. They became known as "miracle stories," though in time the term "legend" was also applied to the narratives of nonreligious heroes. Occasionally the story of one saint's life became that of someone else by the simple exchange of names and locales. Finally the *Legendarium* became a body of romantic devotions essentially devoid of biographical material of any real value to the historian.

II. Legend as a Form-Critical Genre — the Present Confusion.–Much modern use of the term "legend" retains the focus on notable human beings, as opposed to myth, which is oriented to the supramundane and to deities rather than mortals. In biblical study the interest is in the earthly leaders of Israel as a covenant people — the patriarchs, prophets, judges, and kings (as well as the later apostles and early Christian missionaries). The stories of the OT heroes are said to have circulated orally in Israel for so long that their eventual written forms contain little historical fact.

The study of legend as a form-critical genre has been severely retarded by the aforementioned confusion of terms and definitions. G. S. Kirk stated the case with both wit and substance: "One man's myth is another man's legend, or saga, or folktale, or oral tadition" (*Nature of Greek Myths* [1975], p. 21). Hals has clearly shown that many of the most distinguished OT scholars have been unable to express clear distinctions between legend and saga — the former often emerging as a mere type of the latter and concentrating on religious rather than secular heroes.

H. Gunkel, the father of OT form-critical study, used the Ger. *Sagen* to designate the original narrative units of the book of Genesis. Apparently he made no attempt to distinguish the oral traditions underlying chs. 1–11 from those of chs. 12–50 by designating them differently. All are *Sagen*. These sagas, originally circulating as separate, self-contained oral traditions, began to attach themselves to the history of the covenant nation. When finally collected into written groups of sagas, according to Gunkel, these stories provided the basis for the written source traditions designated by much of modern OT scholarship as Yahwistic and Elohistic (*Die Sagen der Genesis* [1901]).

Regrettably, the English translator of Gunkel's work consistently used "legend" to render Gunkel's *Sagen*. W. F. Albright, in his introduction to the English translation, noted this fact and implied that it would lead to confusion (pp. xi-xii). Unfortunately, succeeding studies of the sources of Genesis have compounded the problem. By viewing legend as a degenerate form of saga, Gunkel set the stage for further confusion. The great hero-actors of saga became the mere stand-ins of legend, wherein only God can be truly heroic. (Cf. *RGG*, V [2nd ed. 1913], 194-96.)

The Germans who followed Gunkel did little to clear up the confusion. O. Eissfeldt noted the element of the marvelous and unusual in all myths, fairy tales, sagas, and legends. The saga and legend are essentially the same form, distinguished only by the fact that legends have to do with heroes, places, and events that have "religious significance" while the subjects of saga are essentially secular (see also Weiser, pp. 61f.; cf. Fohrer, pp. 86, 90-95).

Hals demonstrated the folly of designating legend as a separate genre if it is merely a form of saga dealing with religiously significant materials. He rightly asked what constitutes the religiously insignificant material that must make up the subject matter of sagas. A. Jolles presented some hope for amelioration of this confusion. According to Jolles the legend stresses "a virtue embodied in a deed," which the readers must imitate. A similar formulation is found in *Forms of the OT Literature:* "A narrative concerned primarily with the wondrous, miraculous, and exemplary... aimed at edification... [It] belongs to the world of oral folklore and storytellers" (B. Long, *1 Kings* [*Forms of the OT Literature*, IX, 1984], p. 252). Since its purpose is edificatory, it is not bound to recount real events, though its setting is the real world.

III. Types of Legend.–Form critics isolate several types of "legendary" material in the Bible:

(1) Sanctuary legends, intended to inculcate awe for a holy place (e.g., Jgs. 6:11-24);

(2) Cultic legends, which encourage awe for ritual practices (e.g., 2 Macc. 1:19-22);

(3) Personal legends, which encourage respect for individuals. Personal legends may be further categorized as (a) layperson legends (e.g., Gen. 22), (b) prophetic legends (e.g., 1 K. 17–19), (c) priestly legends (e.g., Nu. 16–17), (d) court legends (e.g., Dnl. 1), and (e) martyr legends (e.g., 2 Macc. 7).

R. KROEGER

LEGION [Gk. *legeōn, legiōn* < Lat. *legio*]. Literally, a military unit of six thousand soldiers in the Roman army (*see* ARMY, ROMAN I.B; *see also* JERUSALEM III.I). In the NT the term is used to symbolize the immense power and numbers of spiritual forces: both the angelic hosts of the kingdom of God (Mt. 26:53) and the demonic hosts that oppose the kingdom of God (Mk. 5:9, 15 par. Lk. 8:30). As the Son of God, Jesus has the authority to command obedience from both the heavenly and the demonic legions.

Bibliography.–W. L. Lane, *Gospel According to Mark* (*NICNT*, 1974), pp. 184f.; *TDNT*, IV, *s.v.* λεγιών (H. Preisker).

N. J. O.

Three pottery tiles on the Tenth Roman legion from the 1st cent. A.D. (top right) and the 3rd cent. A.D. (left and bottom right) (Israel Museum, Jerusalem)

LEHABIM lə-hā'bim [Heb. *lᵉḥāḇîm*; Gk. *Labieim*]; NEB LEHABITES. Descendants of the Egyptians (Mizraim), according to Gen. 10:13; 1 Ch. 1:11. They are not identifiable, but because of morphological similarity, some scholars have suggested emending the name to Lubim, i.e., Libyans. *See* LIBYA. J. McKENNA

LEHEM lē'həm [Heb. *lāḥem* (pausal form)] (1 Ch. 4:22). The RSV translates the AV JASHUBI-LEHEM as "returned to Lehem." No such place is known. The NEB and many commentators emend to read "returned to Bethlehem." A less drastic emendation, following the Gk. *apéstrepsen autoús*, would be Heb. *wayyāšuḇû lāhem*, "but they returned (to themselves)," an idiom attested elsewhere (cf. Dt. 5:30; 1 S. 26:12).

LEHI lē'hī. *See* RAMATH-LEHI.

LEMUEL lem'yōō-əl [Heb. *lᵉmû'ēl, lᵉmô'ēl*–'belonging to God'; LXX Gk. *eírēntai hypó theoú*–'spoken by God,' i.e., translation rather than transliteration]. An (Arab?) king whose sayings, learned from his mother, constitute vv. 1-9 of Prov. 31. It is also possible that Lemuel was the source of the acrostic poem in Prov. 31:10-31, if the attribution in 31:1 is intended to apply to all of ch. 31.

Lemuel is called "king of Massa" (i.e., king of the Arab kingdom mentioned in Gen. 25:14?) in the RSV and NEB of v. 1. But Heb *maśśā'* can also mean simply "prophecy" (so AV), a meaning it may also have in Prov. 30:1. Nothing otherwise is known of him. Lemuel and/or his mother are notable as non-Israelites through whom inspired Scripture was mediated, and Lemuel's mother as one of the female human authors of Scripture. *See* PROVERBS, BOOK OF. D. STUART

LEND; LENDER; LOAN [Heb. hiphil of *lāwâ*] (Ex. 22:25 [MT 24]; Dt. 28:12, 44; Ps. 37:26; 112:5; Prov. 19:17; 22:7; Isa. 24:2); NEB also ADVANCE (Ex. 22:25); [*nāṯan* (*bᵉ-* or *bannešek*)] (Lev. 25:37; Ezk. 18:8, 13); AV also "give forth (upon usury)"; NEB also ADVANCE; [hiphil of *nāšaḵ*] (Dt. 23:19f. [MT 20f.]); [hiphil of *ʿāḇaṭ*] (Dt. 15:6, 8); [*nāšā'*] (Dt. 24:10f.; Neh. 5:10); AV also EXACT; NEB also ADVANCE, "be a creditor"; [*šᵉ'ēlâ*] (1 S. 2:20); NEB "one (for which you asked)"; [Gk. *daneízō*] (Lk. 6:34f.); [*kíchrēmi*] (Lk. 11:5); **BORROW; BORROWER** [Heb. *lāwâ* (Dt. 28:12; Neh. 5:4; Ps. 37:21; Prov. 22:7; Isa. 24:2), *šā'al*–'ask' (Ex. 22:14 [MT 13]; 2 K. 4:3; 6:5), *ʿāḇaṭ* (Dt. 15:6), *nāšâ* (Jer. 15:10); Gk. mid. of *daneízō* (Mt. 5:42)]; AV also "men have lent to me" (Jer. 15:10).

The OT views riches as a blessing from the Lord (e.g., Prov. 10:22) that entails responsibilities to the poor. The righteous person is characterized as being generous and lending to the poor (Ps. 112:5) One proverb says, "He who is generous to the poor lends to the Lord" (Prov. 19:17, NEB). In Israel the rich were to lend without INTEREST to their neighbors but were permitted to exact interest from a non-Israelite (Lev. 25:35-38; Dt. 23:19f. [MT 20f.]). In addition, controls were placed on a PLEDGE given as security for a loan. The rich person could not enter the borrower's house to seek out a pledge (Dt. 24:10f.). A cloak given in pledge was not to be kept overnight (Ex. 22:26f. [MT 25f.]), and anything that sustained or supported life was not to be accepted as security (Dt. 24:6). Also, a person was not to sell food for profit to a brother who had become poor (Lev. 25:35-38). An Israelite was not to serve as a slave but as a hired servant to pay off a debt, and he was to be released in the year of Jubilee (vv. 39f.).

Just as righteous persons receive the blessing of the Lord, so also does the nation Israel when it is obedient to God (Dt. 28:1-14). As a result, Israel would lend to other nations but not have to borrow (15:6; 28:12). Conversely, one of the curses for Israel's disobedience was that it would have to borrow from a stronger nation (28:44).

Jeremiah referred to the tension and hatred that can build up between a lender and a borrower when he said of the hatred he felt from the people, "I have not lent, nor have I borrowed, yet all of them curse me" (Jer. 15:10). As a result of becoming indebted to a greedy creditor, people could lose their produce, orchards, lands, house, and even their freedom. As Prov. 22:7 states, "The borrower is the slave of the lender." Such a situation existed at the time of Nehemiah, who corrected it by putting an end to lending at interest (Neh. 5:10-13; *see also* MORTGAGE).

Jesus strengthened the OT principles governing loaning. He instructed His followers to loan to everyone, even enemies, without expecting anything in return, for their source of reward is God (Lk. 6:34f.). In the same tenor, Jesus — referring to how a friend, when imposed upon, lends his neighbor bread — invited believers to ask God to satisfy their needs without fear of imposing on Him (11:5-10). *See also* DEBT. J. E. HARTLEY

LENTILS [Heb. *ʿᵃḏāšîm*; Gk. *phakós*] (Gen. 25:34; 2 S. 17:28; 23:11; Ezk. 4:9); AV LENTILES. An annual legume (*Lens esculenta* Moench) whose slender stalks bear pealike pods containing the lentil beans, which make a highly nutritious flour. Three or four varieties of lentils grew in the ancient Near East. Lentils were cut like wheat, threshed, and then stewed to make a soup; *ʿadas* soup is popular with Arabs. The "red pottage" of Gen. 25:34 was doubtless made from reddish-brown lentils.

When David fled from Absalom (2 S. 17:28) he was given lentils for food. Ezekiel made his bread from lentil and other flours (Ezk. 4:9). Shammah, one of David's warriors, defended a patch of lentils against marauding Philistines (2 S. 23:11f.). Some commentators have corrected the "barley" of 1 Ch. 11:13 to "lentils," since both references describe the identical place and event. R. K. H.

LEOPARD [Heb. *nāmēr* (Cant. 4:8; Isa. 11:6; Jer. 5:6; etc.); Aram. *nᵉmar* (Dnl. 7:6); Akk. *nemru*; Arab. *namir*; Gk. *párdalis* (Sir. 28:23; Rev. 13:2)]; NEB also HUNTING-LEOPARD (Hab. 1:8). A swift and ferocious member of the family *Felidae*, of which *F. pardus* is representative. The mature animal has a body length of about 1.5 m. (5 ft.) excluding the tail, which can add as much as 1 m. (3 ft.) to its overall dimensions. Palestinian leopards may have been

somewhat smaller than their counterparts elsewhere, and apparently had paler coats than the species that inhabited forest areas. The very dark spots distributed across the leopard's body, however, were characteristic of all varieties.

In antiquity leopards were found in Africa, Asia Minor, Palestine, and south Asia. It is possible that place names such as Nimrim, Nimrah, and Beth-nimrah (Isa. 15:6; Jer. 48:34; Nu. 32:2f., 6; Josh. 13:27) reflected the original presence of leopards in the area, since the animals survived in Transjordan until the 20th century. Certainly the Wâdī en-Numeirah ("valley of the small leopard"), which enters the Dead Sea S of the Arnon, perpetuates this type of tradition. Because of its predatory nature the leopard has been discouraged from breeding in Palestine, although attempts to rehabilitate the biblical flora and fauna in Israel will doubtless include one variety or other of the leopard, even if the animals have to be kept in captivity.

In the Bible "leopard" occurs mainly in figurative expressions as a large and fierce beast. The leopard is mentioned with the lion and bear (Dnl. 7:6; Hos. 13:7; Rev. 13:2); with the lion, wolf, and bear (Isa. 11:6); with the lion and wolf (Jer. 5:6); with the lion alone (Sir. 28:23); and with the wolf alone (Hab. 1:8; which also refers to its swiftness). Jer. 13:23 uses a rhetorical question — "Can . . . the leopard (change) his spots?" — to indicate human inability to do good.

In Rev. 13:2, the beast that emerged from the sea was likened to a leopard, although the animal alluded to (*párdalis*) was sometimes known by the Greeks as *pánthēr*. The composite nature of the symbolic beast reflects those of Dnl. 7, and represents the concentration of all their abominations. R. K. H.

LEPER lep'ər; **LEPROSY** lep'rə-sē [Heb. *ṣāraʿaṯ*; Gk. *lépra*].

A leper suffers from a specific form of mycobacterial infection that was dreaded in antiquity and that until A.D. 1960 was regarded as intractable and incurable. To reduce the psychological trauma reported by sufferers, the condition has been renamed "Hansen's disease," after G. A. Hansen, who discovered the causative organism (see III below).

I. Terminology
II. Antiquity of Leprosy
III. Symptomatology and Diagnosis
IV. Treatment
V. In the OT
VI. In the NT

I. Terminology.–Both ancient and modern writings show considerable confusion about the terminology for leprosy. Heb. *ṣāraʿaṯ* is of uncertain provenance and meaning, having been related variously to the roots for "strike," "become disfigured in the skin," "erupt," and "hornet." Since the ailment is given more prominence than any other in Scripture, the inability to determine the term's derivation is very unfortunate. In Lev. 13 *ṣāraʿaṯ* is evidently used in a technical sense, describing a class of pathological conditions. If related to Akk. *ṣinnītu*, "eruption," the root can describe any type of cutaneous eruptive lesion, including clinical leprosy. The comprehensive nature of *ṣāraʿaṯ* is indicated by its application not only to human pathology but also to molds, mildews, and mineral efflorescence in the walls of buildings or on fabrics.

The LXX translates *ṣāraʿaṯ* by the comprehensive term *lépra*, which for the Greeks signified an ailment that resulted in a scaly condition of the skin. *Lépra* was associated by Herodotus (i.138) and Hippocrates (who named it the "Phoenician disease") with *leúkē*, a cutaneous affliction characterized by a localized absence of pigment, probably the modern leucoderma. Galen (A.D. 130-201) and some Greek medical writers before him employed *eléphas* or *elephantíasis* for a more serious cutaneous disease that seems to have corresponded closely to modern clinical leprosy. The Romans generally preferred the Greek term *lépra* to the more cumbersome *elephantiasis Graecorum* ("of the Greeks"), and the Vulgate uses *lépra* to render Heb. *ṣāraʿaṯ*. Hence "leprosy" occurs in later English versions of the Bible.

Modern versions have difficulty rendering the obscure Hebrew terms in Lev. 13, which contains diagnostic material intended for priests of the 2nd millennium B.C. In v. 2, e.g., Heb. *śeʾēṯ* (Gk. *oulḗ*) is translated "rising" in the AV, "swelling" in the RSV, and "discoloration" in the NEB. For Heb. *sappaḥaṯ* (Gk. *sēmasía*) in the same verse, the AV has "scab," the RSV "eruption," and the NEB "pustule." Heb. *bahereṯ* (Gk. *tēlaúgēma*) is variously rendered "bright spot" (AV), "spot" (RSV), and "inflammation" (NEB). Particularly unfortunate is the NEB's use of "malignant skin-disease" for *ṣāraʿaṯ*, which is a comprehensive Hebrew term describing a variety of skin afflictions. Some of these were benign, and the priest could pronounce the sufferer clean. Only one form of *ṣāraʿaṯ*, a chronic, spreading affliction, was deemed malignant by the diagnostic procedure and merited the strictures of vv. 45f.

II. Antiquity of Leprosy.–This dreaded disease is supposed to have existed in India and China from *ca.* 4000 B.C., but this dating is very difficult to establish factually. Kinnier Wilson suggested that leprosy may have been the incurable skin condition mentioned in an Old Babylonian omen tablet, since the symptoms include loss of skin pigment, odor, and an apparent outbreak of papules (J. V. Kinnier Wilson, *Revue d'assyriologie et d'archéologie orientale*, 60 [1966], 47). Although serious skin diseases were known to both the Sumerians and the Babylonians, it is impossible to ascertain whether any of the technical terms in the various texts refer to leprosy. But probably the Mesopotamians did become familiar with leprosy during the 3rd millennium B.C.

The disease seems to have been endemic in Egypt from at least the Old Kingdom period (*ca.* 2700-2400 B.C.), and if the term *ukhedu* in the Ebers Papyrus indicates a form of clinical leprosy, then the ailment would have been familiar to the Egyptians before 1500 B.C. *Ukhedu* does seem to describe a malignant disease, but the identification with leprosy is not definite. A malformation in the upper jaw of an Egyptian mummy, *ca.* 1400 B.C., was once thought to be an instance of leprosy but is now regarded as the result of chronic gingival infection. Some writers have expressed surprise at the paucity of cases of leprosy found in Egyptian mummies, since Lucretius (99-55 B.C.) claimed that *eléphas* (leprosy) originated in Egypt. Most probably, however, leprous Egyptians died in some isolated place and were never mummified.

Leprosy was already becoming globally distributed in the 7th cent. B.C., and by *ca.* 250 B.C. it was being reported by Greek physicians. It spread slowly west across Europe, and by *ca.* 40 B.C. it had entered the British Isles.

In view of the lengthy tradition attaching to the existence of the disease, it seems ill-advised to suppose that the Hebrews became acquainted with the affliction only after they had been in sedentary occupation of Canaan for some time. Liberal writers who accept a postexilic date for Leviticus to demonstrate that *ṣāraʿaṯ* had nothing to do with clinical leprosy are actually working against their own theoretical postulates, since the later that Leviticus is dated, the more probable it is that the chronic form of

ṣāraʿaṯ was Hansen's disease, which was unquestionably in Palestine by the 4th cent. B.C.

III. Symptomatology and Diagnosis.–The cause of leprosy is the minute rod-shaped organism *Mycobacterium leprae*, identified by the scientist G. A. Hansen in 1871-1873. (As his terminology indicates, Hansen thought that the infecting agent is a fungus, but it is now known to be a bacillus or bacterium.) Hansen's organism is similar to Koch's bacillus *Mycobacterium tuberculosis* (which causes tuberculosis); indeed, the two bacilli are possibly of common origin, having become different through mutation.

To speak of leprosy symptomatology is to raise some fundamental philosophical issues related to all of human pathology. In the strictest sense there are no such entities as "diseases"; a disease is actually a collection of symptoms that are given a designation for convenience. One must realize that the designation may describe only the principal symptoms, and that a person need not have all the attributed symptoms to have the disease. An equally significant observation is that the pattern, distribution, and character of some diseases have changed over the centuries. Thus Browne (p. 8) properly warned about the dangers of retrospectively diagnosing diseases mentioned in ancient literature, especially if the terminology is indeterminate.

As already noted, Heb. *ṣāraʿaṯ* in Lev. 13–14, although technical and obscure, is known to denote a variety of related conditions (cf. the broad pathological and metaphorical uses of "cancer"). The symptoms of *ṣāraʿaṯ* are detailed in Lev. 13 so that the Hebrew priest-physician could make a differential diagnosis. Since medical legislation in the Torah has a preventative nature, the priest as diagnostician functioned as a health officer more than the Babylonian or Egyptian priest-physician did. The affliction that the Hebrew priest would carefully inspect could have arisen spontaneously (vv. 2-6), or after a prodromal interval of unspecified length (vv. 7f.). It could have succeeded a furuncle, a carbuncle (vv. 18-23), or a burn (vv. 24-28), or it could have developed upon the beard, the head, or elsewhere on the body (vv. 29-44). Preliminary symptoms could include the presence of subcutaneous swellings or nodules (*śeʾēṯ*), a cuticular scab (*sappaḥaṯ*), and whitish-red spots or reddish areas of skin (*bahereṯ*).

If a person with one or more of these symptoms that had turned into a leprous disease presented himself to a priest (13:2), the priest pronounced him leprous after inspection if the local hair had turned white (*leucotrichia*) and if the affliction seemed to have penetrated the skin (v. 3). If the person did not have the last two symptoms, he was quarantined seven days, and then seven more if the symptoms showed no development (vv. 4-6); his condition was diagnosed as an eruption (Heb. *mispaḥaṯ*). *Mispaḥaṯ* appears to be a general term for the slight pustulation occurring in many of the dermatoses.

Another nonmalignant form of *ṣāraʿaṯ* covered the person from head to foot (13:13). This condition could not have been Hansen's disease, which seldom covers the entire body and never makes the skin white. The condition would probably have been psoriasis, in which round reddish patches covered with whitish scales erupt on the scalp, elbows, knees, and back. This common affliction manifests itself in several forms and is sometimes extremely resistant to treatment. Even more probably the sufferer was the victim of vitiligo (acquired leucoderma), a condition marked by white patches on the skin characterized by deficiency of pigment. The body chemistry involved has not yet been explained satisfactorily, but the affliction, like psoriasis, is neither infectious nor harmful.

If, however, the Hebrew sufferer had *bāśār ḥay* (presumably to be translated "raw flesh"), then the condition would no longer have been thought benign (13:14). Apparently ulceration was occurring, as in developed cases of nodular leprosy. If the ulceration or inflammation was local and transitory, the sufferer could be pronounced free of *ṣāraʿaṯ* and therefore would be ceremonially clean again. The extent of cuticular penetration governed the seriousness of the condition, as though the developing pathology was being viewed from inside rather than from outside the skin. This perspective would help explain the decision that any pale or reddish swelling beneath the skin was malignant. The RV translation "deeper than the skin" may thus indicate cutaneous nodules that were about to erupt and form the fetid sores seen in modern lepromatous leprosy. Persistently bright-pink patches of skin (Heb. *bahereṯ*) were a symptom of leprosy; they are sometimes seen on modern lepers.

If the site of a previous staphylococcal infection was ulcerated or inflamed (13:18f.), the symptoms of leucotrichia, cuticular penetration, and the spread of infection determined the seriousness of the condition. The swelling in question (Heb. *šᵉḥîn*; RSV "boil"; NEB "fester") is of uncertain nature, but it could have been a furuncle, a carbuncle, an ulcer, a keloid, or erysipelas on the site of a boil.

The mention of a burn on the skin (13:24-28) is interesting in view of the medical contention that anesthetic patches are not recorded in this chapter. Burns occur commonly among lepers when cutaneous nerve endings have been made insensitive by the disease. Infection resulting in pus formation or ulcers can have serious consequences if left untreated. Verses 24-28 seem to refer to infection of a burn, perhaps sustained because of the occurrence of maculo-anesthetic leprosy; the condition was pronounced malignant if the reddish-white area had spread and the local hair had changed color.

The seriousness of a disease of the scalp or beard (Heb. *neṯeq*; Gk. *thraúsma*) was governed by the degree of skin penetration as well as by the amount of hair lost and a change in hair color from dark to coppery (RSV "yellow," 13:29-37). These conditions, incidentally, are seen periodically in modern lepers and are attributed by some medical authorities to vitamin or protein deficiency. The condition in vv. 29-37, however, seems to be ringworm. This fungus attacks various areas of the skin and is extremely irritant in nature. It can be contracted from cattle. Hair loss accompanied by a pinkish disease spot indicates chronic leprosy, however.

Dull white spots on the body (13:38f.) were not regarded as malignant; eruption (Heb. *bōhaq*; Gk. *alphós*) was probably vitiligo. In a well-developed case of vitiligo the skin exhibits complete loss of pigment, in contrast to leprosy, the lesions of which are never white.

Leviticus 13:47-59 treats "leprous diseases" in cloth and leather garments. The expression "warp or woof" probably refers to the woven or fabricated material as a whole, which was judged diseased if it appeared greenish or reddish. Fungi, mildew, iron mold, or dampness could be the responsible or facilitating agents. Even buildings could be affected by "leprosy" (14:34-53), which was apparently dry rot or mineral efflorescence affecting stone walls.

The diagnostic principles in Leviticus were deemed sufficient both to establish the nature of the various types of *ṣāraʿaṯ* and to provide for malignant cases. Such sufficiency was very important, if only because the malignant *ṣāraʿaṯ* resembled other dermatoses in so many respects, especially in the initial stages of the ailment, just as Hansen's disease does today. Modern clinicians have similarly established cardinal signs of leprosy, namely, localized

LEPER

hypopigmented patches, loss of sensations particularly of temperature or touch, and the presence of *M. leprae* bacilli taken from skin lesions. If a person has more than one of these signs, he or she is deemed to be a leper. Other experts reduce these signs to two, namely, loss or impairment of cutaneous sensation regardless of the presence or absence of a skin patch, and the thickening of nerves. These basic signs indicate the two principal types of leprosy — lepromatous and nonlepromatous, the latter including tuberculoid, maculo-anesthetic, and polyneuritic varieties. In addition, an intermediate leprosy group accommodates borderline and indeterminate cases.

The prodromal symptoms include vague pains in limbs and joints, with intermittent fever. The incubation period can vary between a few months and thirty years, according to some leprologists, but when the eruptive stage occurs the disease begins to assume its special character. In the severe form, lepromatous leprosy, a hypopigmented patch of skin or numbness of skin occur first, although ulcers, nasal blockage, and other symptoms may anticipate the morbid skin changes. Lepromatous (nodular) leprosy is the most severe form, with the nodules occurring in the skin, mucous membranes, and perhaps subcutaneous tissues. Sometimes the nodules ulcerate and discharge bacilli in large quantities. Many of the peripheral nerves are affected, as are internal organs such as the spleen, liver, lymph nodes, and adrenal glands. Lesions often occur in the nasal mucosa, the larynx, and the eyes. In diffusely infiltrated lepromatous leprosy the skin of almost the entire body may thicken and redden; some hair loss commonly occurs, too. The hypopigmented lesions of macular lepromatous leprosy have smooth, reddish surfaces with little loss of sensation and poorly defined margins. By comparison, nonlepromatous leprosy is milder in character. Tuberculoid leprosy has few lesions, which may be hypopigmented or erythematous, with dry, rough surfaces generally occurring. The lesions often affect peripheral nerves, causing a loss of tactile sensation except occasionally on facial patches. Like sufferers from tuberculoid leprosy, maculoanesthetic patients are normally noninfective but exhibit hypopigmented skin lesions that are more or less insensitive to touch. Polyneuritic leprosy only involves peripheral nerves, which thicken and sometimes necrose when nodules form and become abscesses. Frequently in advanced stages motor paralysis occurs.

The table may assist in comparing the malignant condition described in Lev. 13 with some forms of modern clinical leprosy.

Malignant *Ṣāra'aṯ*	**Hansen's Disease**
Papules or nodules on shiny or erythematous skin patch.	Typical of lepromatous leprosy. Skin patch may also exhibit edema.
Hypopigmentation and spreading of patch.	Seen in maculo-anesthetic leprosy, tuberculoid leprosy, and the indeterminate group of leprosy
Pinkish-white patches.	Diffuse cutaneous erythema.
Cuticular crusts.	Low-grade pustulation common.
Subcutaneous nodules.	Seen in nodular lepromatous leprosy.
Loss of scalp hair associated with a cutaneous lesion. (Scalp lesions rare?)	Seen in diffusely infiltrated lepromatous leprosy. Hair loss can occur in different areas of the body.
Leucotrichia.	Not reported in modern leprosy.
A sore on the site of a burn.	Anesthetic skin patches sometimes become infected.
Coppery-colored hair in a facial or scalp lesion.	Hair-color changes from black to coppery reported both in children and adults with some forms of leprosy. Scaly lesions rare.
Skin ulcers.	Lepromatous ulcers.
Disease "deeper than the skin."	Subcutaneous nodules either ready to ulcerate or erupting, seen in lepromatous leprosy.
"Quick raw flesh."	Ulceration or inflammation of lepromatous nodules?
White, spreading eruption, "no deeper than the skin."	Hypopigmented, slightly raised lesions seen in minor tuberculoid leprosy.
"Appearance of leprosy."	Leonine facies, indurated skin typical of diffusely infiltrated lepromatous leprosy.

The comparison in the table suggests more correspondence between the malignant *ṣāra'aṯ* of Lev. 13 and some forms of clinical leprosy than has been conceded by medical practitioners (e.g., Browne, p. 14; R. G. Cochrane, p. 9) and some biblical commentators. But it is true that some features of leprosy are unmentioned in Scripture, e.g., the fetid smell of gangrenous ulcers, the thickening of nerves, contractures of joints, osseous changes, and clawing of the fingers.

The fourteen-day quarantine for suspected malignant *ṣāra'aṯ* has been quite correctly regarded as much too short for clinical leprosy to develop. But it would have allowed certain differential diagnoses, such as scabies or ringworm, to be made. Thus the quarantine would have helped to safeguard the interests of priests and patients alike, since the diagnosis of leprosy even today can be difficult in the early stages of the disease. No doubt ancient lepers, like many of their modern counterparts, usually concealed themselves when they suspected their illness. They probably would have sought a diagnosis only when the symptoms were already well advanced; note that in Lev. 13:2 the patient, his friends, or his relatives seem already to have made a tentative diagnosis. The abysmal terror associated with leprosy from ancient times was an Eastern rather than a Western phenomenon; the modern reductionists who fail to find any connection between Hansen's disease and the malign condition of Lev. 13-14 have been unable to suggest any substitute ailment that would have inspired such abject dread.

IV. Treatment.–In contrast to modern practice, no herbal remedies or therapeutic measures were prescribed by the Hebrew priest-physicians. Instead, the person diagnosed as having malignant *ṣāra'aṯ* was banished from society (Lev. 13:45f.) as a hygienic precaution. He had to proclaim by his appearance and actions his social and religious uncleanness; thus he was prevented from returning and communicating the infection to members of what was meant to be a holy community. There is no record from the ancient Near East of any effort to determine whether leprosy was communicable.

Only if divine healing occurred (cf. Nu. 12:9-15) could the sufferer apply to the priest for a medical discharge. When his healing had been established, he still had to satisfy certain social and religious requirements to be pronounced clean. An appropriate ritual was provided

(14:10-32); the elaborate detail suggests that it was indeed used on occasion.

It must be noted that concepts of cleanness or uncleanness have no real bearing upon the meaning, etiology, or pathology of the term *ṣāraʿaṯ*. The covenant community of Israel was essentially a religious one (Ex. 19:6), and any form of uncleanness or defilement, including that of malignant *ṣāraʿaṯ*, was expressly prohibited. Accordingly, specific cleansing and purifying procedures were followed for mildewed or rotting garments (Lev. 13:47-58) and for buildings similarly affected (14:33-53). These rituals were mandatory when prescribed by the priests, because they carried the full sanction of the law (14:54-57).

Although the leper was regarded under the law as ceremonially unclean, in Scripture leprosy was never considered a sin. To that extent leprosy was merely one of a class of conditions that rendered a person ritually unclean, the main differences being the social abhorrence of the condition and its duration. As with all other forms of healing, the leper's restoration to health was regarded in Scripture as a token of God's grace, and thus the concept of spontaneous remission independent of divine activity had no place in biblical thought.

V. In the OT.–The affliction that God imposed upon Moses as a sign (Ex. 4:6) was evidently not chronic *ṣāraʿaṯ*, which, as has been noted, is never white. It may have been leucoderma or psoriasis and was possibly the same affliction as Miriam's (Nu. 12:9-16). In both texts the gloss "white as snow" (Heb. *kaššāleg*, lit. "like snow") differentiates this *ṣāraʿaṯ* from the chronic form. Naaman (2 K. 5) also does not seem to have been afflicted with Hansen's disease, since he lived and worked among his own people. After Naaman's healing the affliction was transferred to Gehazi (vv. 19-27), a gloss again occurs in the Hebrew text to show that the disease was not Hansen's disease, but perhaps scabies or vitiligo (leucoderma). In the early stages of the latter hypopigmented patches of skin develop and can easily be mistaken for lepromatous leprosy, particularly if the observer has no desire for close contact with the sufferer.

The four leprous men at the gate of Samaria most probably constituted a small "leper colony" living together for mutual support (2 K. 7:3-10); there seems no reason for doubting that they had Hansen's disease. Uzziah (2 Ch. 26:19-21) was "smitten" (Heb. *nāgaʿ*; the related noun *negaʿ* is sometimes used synonymously with *ṣāraʿaṯ*) with an ailment that the priests judged to be leprosy, and accordingly he remained in isolation until his death. Browne (p. 13) dismissed the suggestion that Uzziah had sudden hyperemia in a leprous lesion of the forehead that was otherwise inconspicuous. The perpetual quarantine strongly implies chronic *ṣāraʿaṯ*.

Ṣāraʿaṯ could also be invoked as a curse upon someone (cf. 2 S. 3:28f.).

VI. In the NT.–Although medical and other writers have doubted that OT references to *ṣāraʿaṯ* ever indicate Hansen's disease, it is clear that in Palestine during the NT period clinical leprosy was a reality. The Israelite priests still used the diagnostic criteria of Leviticus (Mt. 8:1-4; Mk. 1:40-44; etc.), and thus "cleansing" is often mentioned in connection with healings recorded in the Gospels. The Gospels' use of "leper" and "leprosy" seems less technical than that of the law, but there is little doubt even from the scanty NT descriptions of the personal and social plight of the sufferers that they were predominantly victims of Hansen's disease.

Jesus and His disciples healed persons with leprosy, but the symptoms associated with that disease are mentioned only in Luke. On their mission of witness the Twelve (cf. Mt. 10:1, 8) were to anticipate the priesthood of all believers by cleansing lepers. The account of the ten lepers (Lk. 17:11-19) uses "cleanse" and "heal" interchangeably, and the believing Samaritan appears as much under the covenant of divine grace as his Jewish companions were. This coterie was most probably a small colony of people suffering from Hansen's disease; doubtless several such groups were scattered about Palestine in NT times. The leper of Lk. 5:12-15 has been considered a victim of a dermatosis other than Hansen's disease, possibly vitiligo, but the description "full of leprosy" (Gk. *plērēs lépras*) seems instead to indicate a chronic condition, quite possibly clinical leprosy. Simon the leper (Mt. 26:6 par. Mk. 14:3) perhaps had only vitiligo or patches of hypopigmented macules, since he was in close contact with society.

R. K. HARRISON

LESHEM lē'shəm [Heb. *lešem*] (Josh. 19:47). A city in the upper Jordan Valley, also called LAISH (Jgs. 18:7, 27, 29). It was captured by the Danites and named DAN. The suggestion has been made (BDB, p. 546) that the name was originally **layšum*, which developed the variants *lešem* (retaining the final *m*) and *layiš* (dropping the final *m*). Lucian reads, "And the sons of Dan went and fought against Lachish[!] . . . and called its name Lesen Dan [B *Lasenndak*, A *Lesen Dan*]," i.e., Leshem-Dan (*md* > *nd*).

W. S. L. S.

LESSAU les'sou [Gk. *Lessaou*]; AV DESSAU, confusing uncial *delta* (Δ) with *lambda* (Λ). A village N of Jerusalem, scene of a battle between Nicanor and the Jews (2 Macc. 14:16). The location is unknown. Simons offered a detailed argument against identifying Lessau (Dessau) with Adasa (*GTTOT*, § 1143, pp. 409f.). *See* ADASA. W. S. L. S.

LET. Sometimes used in the AV (e.g., Rom. 1:13; 2 Thess. 2:7) in the old sense of "hinder, prevent" (Anglo-Saxon *lettan*) instead of the more common sense of "permit" (Anglo-Saxon *lætan*).

LETHECH le'thek [Heb. *leṯek*] (Hos. 3:2). *See* WEIGHTS AND MEASURES.

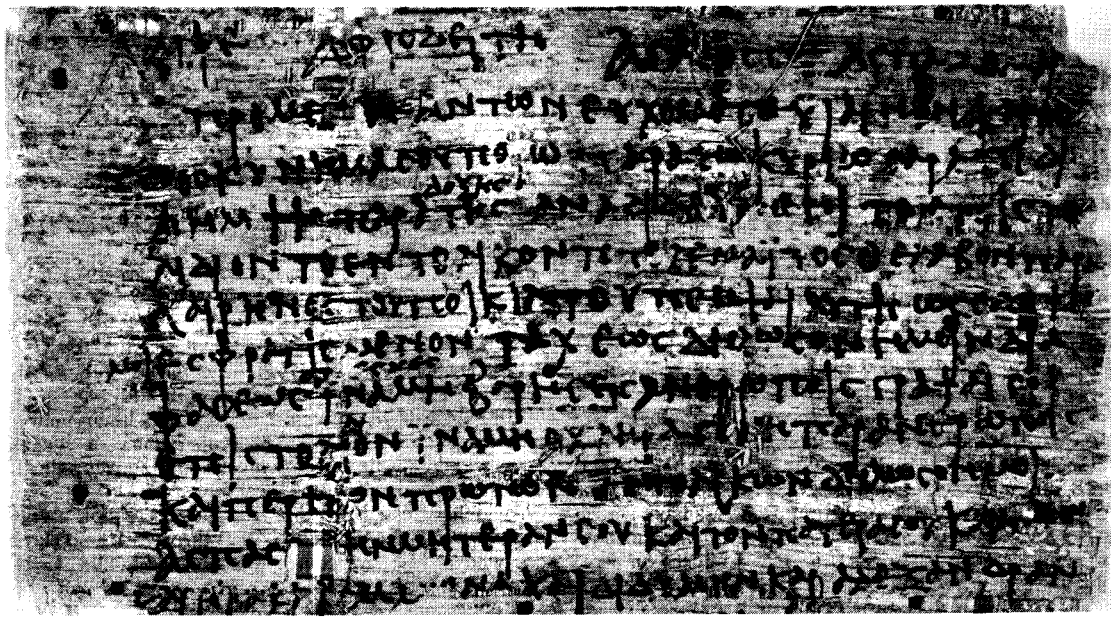
LETTER [Heb. *sēper*–'writing'] (Dnl. 1:4, 17); AV LEARNING; NEB LITERATURE, BOOKS; [Gk. *grámmata*]; AV also "written" (2 Cor. 3:7), "letter"; NEB also "letter by letter" (2 Cor. 3:7). An alphabetical character; by extension, literature.

In Daniel the Eng. pl. "letters" renders the singular form, *sēper*, which can also mean "book" (cf. also LETTERS). The AV and NEB translations are suitable alternative renderings of the term in these contexts. Most commentators agree that here *sēper* refers to the Chaldean literature, which may have included works on magic, divination, and astrology written in Sumerian (contra E. J. Young, *Prophecy of Daniel* [repr. 1978], p. 41; *see* CHALDEA VI).

The letters in 2 Cor. 3:7 refer to the characters in which the law was written on the stone tablets (cf. Ex. 31:18; Dt. 5:22). In Gal 6:11 Paul refers to his own handwriting, which was distinguishable from that of the secretary who wrote the letter from his dictation or draft. Although some have thought that the "large" letters imply awkwardness in Paul's handwriting, it is more likely that they were used for emphasis. E. W. S.

LETTERS [Heb. *sēper*–'book,' 'writing'] (2 S. 11:14f.; 1 K. 21:8f., 11; 2 K. 5:5-7; 10:1f., 6f.; 19:14; 20:12; 2 Ch. 32:17; Est. 1:22; 3:13; 8:5, 10; 9:20, 30; Isa. 37:14; 39:1; Jer. 29:1, 25, 29); NEB also "envoy" (2 K. 20:12 par. Isa. 39:1); [*'iggereṯ*] (2 Ch. 30:1, 6; Neh. 2:7-9; 6:5, 17a, 19; Est. 9:26, 29); [*nišṭᵉwān*] (Ezr. 4:7; 7:11); [*kᵉṯāḇ*–'writing,' 'document' < *kāṯaḇ*–'to write'] (2 Ch. 2:11 [MT 10]); AV WRITING; [*miḵtāḇ* < *kāṯaḇ*] (2 Ch. 21:12); AV WRITING; [Aram. *'iggᵉrâ*] (Ezr. 4:8, 11; 5:6); [*nišṭᵉwān*] (Ezr. 4:18, 23; 5:5); [Gk. *epistolḗ, grámma*] (Acts 28:21); supplied from the context in Neh. 6:17b; Jer. 29:3 (cf. AV); Acts 15:23 (cf. v. 30); 21:25; 23:34 (cf. v. 33); Col. 4:16b. Written documents effecting communication between two or more persons who cannot communicate orally (see Pardee, p. 2).

Archeologists have discovered thousands of ancient Near Eastern letters dealing with political, military, business, and family or personal matters. Perhaps the best-known letters are the several hundred Amarna letters (*see* AMARNA TABLETS) and the several thousand MARI letters. Both these collections are political and military letters, and both are written in Akkadian cuneiform on clay tablets. The Amarna letters include correspondence between the Egyptian pharaohs Amenhotep III and IV and kings of other nations or Egyptian officials and vassals in Palestine-Syria. F. B. Knutson has given a brief overview of the style and content of some of the Amarna letters, some Râs Shamrah letters (in Akkadian), and some Neo-Babylonian letters. For English translations of some cuneiform letters, see *ANET,* pp. 482-490.



Several much smaller collections of Hebrew letters have also been found, including the LACHISH LETTERS and the ARAD letters, both written on OSTRACA, and the Bar Cochba letters from MURABBAʿÂT, written on papyrus (see Pardee for texts, translations, notes, and thorough bibliography). Similarly, several caches of Aramaic letters have been found, including from Egypt the ELEPHANTINE PAPYRI and Hermopolis Papyri, and some of the Bar Cochba correspondence from Naḥal Ḥeber (see Fitzmyer; a few are translated in *ANET,* pp. 491f.; for texts, translations, and notes, see Cowley, Driver, Kraeling, and Porten). These extrabiblical letters offer evidence for the form of letters in biblical times, evidence not available from the biblical examples, which have been modified to fit into the biblical narrative. Fitzmyer has analyzed the formulaic features of Aramaic letters, and Pardee has done the same for Hebrew letters.

The letters begin with a *praescriptio*, the address and greeting formulas (cf. Fitzmyer, p. 31, who limits the *praescriptio* to the name of the sender and the addressee). In Hebrew letters the *praescriptio* often includes the name and epithet of the recipient and only rarely the name of the sender; in Aramaic letters both recipient and sender are usually named. Greeting formulas follow, invoking a blessing (using *brk*) or wish for the welfare (*šlm*) of the recipient. The transition from the *praescriptio* to the body is marked often by *wʿt* in Hebrew pre-Christian letters (cf. *wᵉʿattâ* in 2 K. 5:6 [RSV omits]; 10:2 [RSV "now, then"]) by *š* in the Bar Cochba Hebrew letters, and by *kʿn, kʿt, wkʿn, wkʿt* (cf. *ûḵᵉʿeṯ*, "and now," Ezr. 4:17), *kʿnt* (cf. *ûḵᵉʿeneṯ*, "and now," Ezr. 4:10f.; 7:12), and *dy* (in the Bar Cochba letters) in Aramaic. Of the Hebrew letters only the Bar Cochba letters have closing formulas, comprising closing greetings and the signature. The Aramaic letters often have closing formulas, including at times the mention of a scribe or secretary and the date.

Like many of the extrabiblical letters, the OT letters are mostly political in nature. For a list of the biblical letters, *see* EPISTLE II; for texts, translations, and notes, see Pardee, pp. 169-182.

Some of the OT Hebrew and Aramaic terms for letter correspond to those used outside the OT, although no

Letter of Agathus to Aphrodite (Oxy. P. 1677). Written on papyrus (ca. 3rd cent. A.D.), the letter includes instructions, information, and greetings (Palestine Institute, Pacific School of Religion)

extrabiblical Hebrew letters carry a self-designation. The most common (and probably the oldest) term, both in biblical and extrabiblical letters, is *sēper*, which can refer to any kind of writing (e.g., a book, a document, a letter, an inscription), as can *kᵉṯāḇ* and *miḵtāḇ*. The other terms, *'iggereṯ/'iggᵉrâ* and *nišṭᵉwān* (both of which occur in Hebrew and Aramaic), are loanwords from Akk. *egirtu* ("letter," "tablet") and Pers. *ništāvana* ("written order") respectively. According to Dion (p. 79), *'iggᵉrâ* is a letter of any type, and *nišṭᵉwān* can mean a letter but usually refers to an "official document, often styled as a letter" (p. 84; cf. also Fitzmyer, pp. 30f.). These distinctions do not seem to apply to biblical usage, since different terms refer to the same letter in some cases (Ezr. 4:8, 11; 5:5 — *'iggᵉrâ*; 4:18, 23; 5:6 — *nišṭᵉwān*; Est. 9:20, 30 — *sēper*; vv. 26, 29 — *'iggereṯ*).

The Gk. *grámma*, like Eng. "letter," can refer either to a letter of the alphabet or to a document. Gk. *epistolḗ* (cf. "epistle") refers only to a missive, although its use is broad enough to include both public and private letters. (On A. Deissmann's distinction between epistles and letters, the former being public documents and the latter private, *see* EPISTLE IV.) For a discussion of the NT epistles and their Greco-Roman background, *see* EPISTLE.

G. A. LEE

LETUSHIM lə-to͞o'shim [Heb. *lᵉṭûšîm*] (Gen. 25:3). An obscure Arabian tribe descended from Abraham and Keturah through DEDAN.

LEUMMIM lə-um'im [Heb. *lᵉ'ummîm*] (Gen. 25:3). An obscure Arabian tribe listed with the Asshurim and Letushim as descendants of Abraham and Keturah through DEDAN.

LEVI lē'vī [Heb. *lēwî*; Gk. *Leui*]; AV Apoc. also LEVIS (1 Esd. 9:14). In 1 Esd. 9:14 the AV and NEB follow the LXX (*kaí Leuis*, "and Levi[s]"), but this reading is probably an error for *ho Leuitēs*, "the Levite" (so RSV; cf. Ezr. 10:15; Neh. 8:7).

1. The third son of Jacob and Leah (Gen. 29:34; cf. 35:23; Ex. 1:2; 1 Ch. 2:1) and eponymous ancestor of the tribe of Levi.

The etymology of the name Levi is suggested in Gen. 29:34. Leah says after the birth of Levi, "Now this time my husband will be joined [niphal of *lāwâ*] to me, because I have borne him three sons." The name expressed Leah's assurance that the birth of her third son would enhance the bonds of her husband's affection. A wordplay is apparent in Nu. 18:2, 4, where the tribe of Levi is directed to "join" Aaron in the ministry of the sanctuary.

Many scholars dismiss such "popular" etymologies as "pleasant examples of Biblical folklore" which have no philological support as real etymologies (Cody, pp. 29-33). While generally acknowledging that the meaning and derivation of the name are uncertain, scholars have made various suggestions. J. Wellhausen (*Prolegomena to the History of Israel* [Eng. tr. 1885], p. 145) proposed an etymology which is widely espoused today, namely, that Levi is simply a gentilic form of his mother's name Leah (*lē'â*, "wild cow"). The name has also been interpreted as adjectival, explaining Levites as those who attached themselves to and accompanied the Israelites during the Exodus from Egypt. On the basis of Minaean inscriptions from the trading colony which flourished at el-'Ulā (biblical Dedan) in northern Arabia, W. F. Albright derived Heb. *lēwî*, "Levite," from Arab. *lawiyu*, meaning a "person pledged for a debt or vow" (*ARI*, pp. 106f., 203f. n. 42). For further discussion of proposed etymologies, see *ILC*, III-IV, 680; Cody, pp. 29-33; Meek, pp. 121-132.

Apart from those events common to all the sons of Jacob (Gen. 37; 42–45), Levi is prominent only in Gen. 34. The narrative recounts the rape of Levi's sister Dinah (Gen. 30:21) by Shechem son of Hamor the Hivite. Hamor sought a marriage alliance and the sons of Jacob set the condition of marriage, namely, the circumcision of every male (vv. 13-17). The proposal was approved by the town council and carried out. While the Shechemites were recovering, Dinah's humiliation was violently avenged by Levi and Simeon. Every male was massacred and the city was plundered (vv. 25-29). Concern for self-preservation prompted Jacob's condemnation of this treacherous slaughter (vv. 29f.). This vendetta would be remembered in Jacob's last days (Gen. 49:5-7). The tribes of Simeon and Levi were scattered, but the latter was given a blessed dispersion as the priestly element in Israel (Ex. 32:26ff.; Nu. 18:20, 23; 35:2-8).

Modern critical scholarship tends to assume that the narrative in Gen. 34, together with 49:5-7, represents a personalized history of the tribes of Simeon and Levi in their attempt to settle at Shechem (*NHI*, pp. 70f.; Rowley, pp. 122f.; cf. T. J. Meek, pp. 122ff.).

The three sons of Levi were Gershon (Gen. 46:11; Ex. 6:16; Nu. 3:17) or Gershom (1 Ch. 6:1; 6:16-20, 43, 62, 71; 15:7; 23:6), Kohath, and Merari. The family's migration to Egypt is recorded in Gen. 46:11. Jochebed, wife of Amram and mother of Aaron, Moses, and Miriam, was a daughter of Levi (Nu. 26:59; cf. Ex. 6:14-20). Levi lived to be 137 (Ex. 6:16).

In Exodus and later references Levi appears as a priestly tribe or as a tribe associated with the priesthood as ministers of the sanctuary (Nu. 1:47-54; 8:5-26; 31:30, 47; Dt. 10:8f.; 31:9, 25; 2 S. 15:24; 1 Ch. 16:4f.; 23:24-32; 2 Ch. 8:14f.; 17:7-9; 35:3; Ezr. 3:8-11; Neh. 8:7-9; 10:37-39 [MT 38-40]). For a discussion of the origins and role of the priestly tribe of Levi in Israel's history, *see* PRIESTS AND LEVITES. No further details of the personal history of this patriarch are known.

2. Son of Melchi and father of Matthat in Jesus' genealogy (Lk. 3:24).

3. Son of Simeon and father of Matthat in Jesus' genealogy (Lk. 3:29f.).

4. Another name for the apostle MATTHEW (Mk. 2:14 par. Lk. 5:27, 29).

G. PRATICO

LEVIATHAN lə-vī'-ə-thən [Heb. *liwyāṯān*; cf. Heb. *liwyâ*, "wreath"; Arab. *lawā*, "to twist"] (Job 3:8f.; 41:1 [MT 40:25]; Ps. 74:14; 104:26; Isa. 27:1); AV also "their mourning"; NEB also WHALE. The proper name (it always occurs without the definite article) of a large aquatic animal, perhaps reflecting a mythological monster.

A widely attested theme of the pagan creation myths concerns the draconic monster that threatens the creator god, who at last overcomes the monster in the act of creation (cf. Wakeman, Heidel). But in Ps. 104:26ff. the great sea "monster" of the myths is made to be God's pet

(see M. Dahood, *Psalms*, III [*AB*, 1970], 45, for this rendering so reminiscent of Job 41), who waits submissively for God's life-sustaining provision.

Lotan (or Litan, see J. Emerton, *VT*, 32 [1982], 327-331), the adversary of Baal and Anath in the Ugaritic myths, has long been recognized as the equivalent of OT Leviathan (see M. Pope, *Job* [*AB*, 3rd ed. 1973], pp. 329-331). Among the several references to Lotan in the Ugaritic literature (see *DOTT*, pp. 129-133) is one especially impressive parallel to Isa. 27:1 (*UT*, 67:I:1-3): "When you smote Lotan the fleeing serpent, you made an end of the twisting serpent, the mighty one of the seven heads" (cf. also Ps. 74:14). This parallel does not imply any challenge to the fiercely monotheistic commitment of Isaiah; as E. Smick (*WTJ*, 44 [1982], 90f.) noted, the pagan use of Leviathan exclusively in connection with nature myths is everywhere historicized in the Bible. Thus Isaiah intends it merely as a forceful poetic figure for the ultimate defeat of the power of the evil one at the end of the age (so R. Clements, *Isaiah 1–39* [*NCBC*, 1980], p. 218); cf. M. G. Kline, *Kingdom Prologue* [1981], pp. 56-59).

While Job 3:8f. involves several obscurities, Smick (*WTJ*, 40 [1978], 215) pointed out that Job's appeal to professional cursers to damn the day of his birth may find a reflex in the mythological notion that an eclipse was brought about by the chaos monster swallowing the sun (or encoiling it with its serpentine body; cf. Heidel, p. 106).

Job 41:1-34 (MT 40:25–41:26), the most extended description of Leviathan, suggests to many the crocodile (so RSVmg.). In His confrontation of Job, the Lord's point seems to be that while Job is no more a match for the power of evil than he would be for a crocodile, Yahweh is Lord of both the natural order (Job 38:1–40:2) and the moral order (40:6–41:34) — sovereign even over Satan in the figure of Leviathan, His pet crocodile. Such sovereignty provides the only adequate answer for Job in his anguish — the world is God's not man's, and Job may trust that God's inscrutable ways will not be thwarted.

For use of the Leviathan image in the apocalyptic literature (e.g., 2 Esd. 6:52; 2 Bar. 29:3-8) see O. Kaiser, *Isaiah 13–39* (Eng. tr., *OTL*, 1974), pp. 221-23; J. M. Ford, *Revelation* (*AB*, 1975), pp. 217ff.

While the NT does not explicitly mention Leviathan, the seven-headed dragon of Rev. 12:3f.; 13:1ff. may allude to him (see Ford, pp. 210, 217-221).

See also DRAGON; RAHAB.

LEVITES. *See* PRIESTS AND LEVITES.

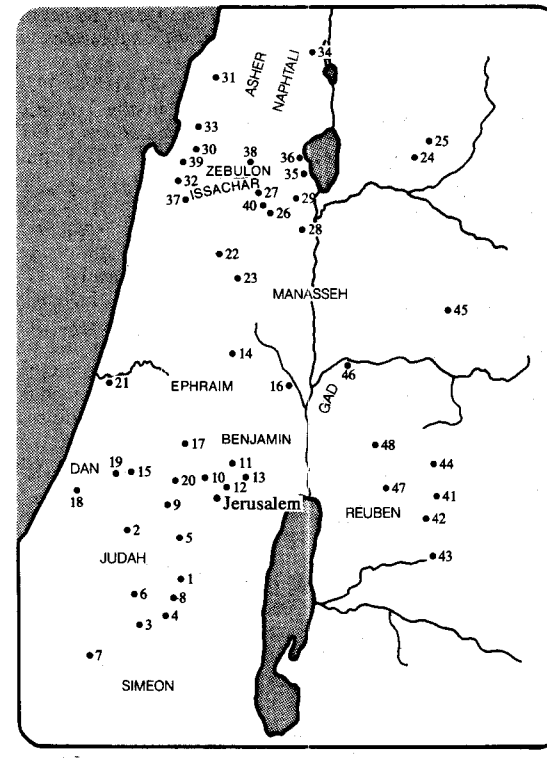
LEVITICAL CITIES. On the eve of Israel's conquest of Canaan, Moses directed that forty-eight cities, distributed proportionately among the various tribal allotments, be set aside for the use of the Levites in lieu of any unified tribal territory of their own (Nu. 35:1-8). In addition, six of these were to be established as cities of refuge (*see* REFUGE, CITIES OF). Apart from scattered references and brief allusions to some of these cities (Josh. 14:14; 1 Ch. 13:2; 2 Ch. 11:14; 31:15, 19), three principal texts require our attention.

Leviticus 25:32-34 grants special rights to Levites within their cities, apparently to protect them from dispossession. Sale of their pasture land (adjacent to the cities, Nu. 35:1-8) is expressly prohibited. If they sell any homes within their cities they are granted an unlimited right of redemption as opposed to the usual one-year limit applicable to other tribes. Finally, all homes revert to their original owners in the Year of Jubilee.

Joshua, Eleazar the priest, and the heads of the tribal families oversaw the actual determination of the forty-eight Levitical cities by lot (Josh. 21:1-42). A close parallel to this text, but with significant variations both in its framework and in the particular cities listed, is 1 Ch. 6:54-81 (MT 39-66). Further significant variants to both these lists as witnessed in the MT are to be found in the versions, especially in the Greek MSS. Some conservatives have tried to explain away these discrepancies, while many critics have interpreted them as evidence of the unhistorical character of the scheme of Levitical cities. Curiously both these approaches are inappropriately reluctant to emend the MT despite the versional evidence.

In the chart below are the Levitical clans, tribal locations, and forty-eight Levitical cities as they appear in both Josh. 21 and 1 Ch. 6 when appropriately emended according to the versional evidence (for a discussion of the text-critical issues see the articles and comms. by Albright, Auld, Boling and Wright, Mazar, and Williamson). Those marked with a question mark are of uncertain location. The six Levitical cities that are also cities of refuge are italicized.

The claim that provision of Levitical cities contradicts the more general assertion that the PRIESTS AND LEVITES would lack an inheritance fails to be decisive for several reasons. (1) This "inheritance" cannot be compared to that of the other tribes because these cities did not constitute a unified land area. (2) The Levites are nowhere actually granted exclusive title to these cities — what they are given is a right to their use (cf. Mazar, p. 193). This appears to be the direct implication of the repeated phrase in Nu. 35:2f. that these cities were for the Levites "to dwell in" (so M. Noth, *Numbers* [Eng. tr., *OTL*, 1968], p. 253). (3) Scripture elsewhere describes these cities as belonging to their respective tribal allotments rather than considering them the possession of a thirteenth tribe, the Levites (e.g., Josh. 21:41; Jer. 32:8).



Later biblical evidence of Levites actually living within these forty-eight cities is surprisingly limited (1 S. 6:13-15; 1 K. 2:26; Jer. 1:1; 32:7-9; 1 Ch. 26:30, 32). This may be due to the "mission station" quality of these cities (see below), or it may simply reflect the failure of practice to conform to precept, as at so many other points of Israel's experience.

Any assessment of the purpose of the arrangement of Levitical cities depends, of course, on the historical setting which is posited for this list. If the canonical context of the Conquest is granted, the purpose of the allotment of these cities was surely related to the special Levitical ministry of covenant teaching among the twelve tribes (Dt. 33:10; 2 Ch. 35:3; Neh. 8:7-9; cf. G. E. Wright, *VT*, 4 [1954], 329; E. F. Campbell, *Ruth* [*AB*, 1975], pp. 21f.; R. B. Robinson, *Studia Biblica et Theologica*, 8 [1978], 3-24; Boling and Wright, pp. 161f.).

The point of the Levitical cities would be to provide not cult shrines (with few exceptions, such places are lacking from the list) but bases of operation so that the Levites could better infiltrate each of the tribes to instruct them in Yahweh's covenant. Such bases would be most needed precisely where we find them: in those areas least accessible to the central sanctuary. Thus we cannot expect that the Levites would be confined to their cities. Rather,

List of Levitical Cities

Aaronic Kohathites:
JUDAH AND SIMEON:
(1) *Hebron*/Kiriath-arba (see Mazar, pp. 196ff.; Auld, *ZAW*, 202)

(41) *Bezer* ?
(42) Jahaz ?
(43) Kedemoth ?
(44) Mephaath ?
GAD:
(45) *Ramoth in Gilead*
(46) Mahanaim ?
(47) Heshbon ?
(48) Jazer ?

we expect exactly what is implied in the example of Abiathar, who first served at Nob, then was attached to David, and finally was dismissed by Solomon for disloyalty and returned to his assigned Levitical city, Anathoth (1 S. 21:2; 22:9-19; 1 K. 2:26).

Of course, to emphasize this teaching aspect of the Levitical ministry is not to deny other dimensions of their ministry (e.g., with respect to the ark and central sanctuary), in particular, the political dimension (cf. Mazar, *et al.*). Certainly the Levitical desire to secure Israel's loyalty to the Lord of the covenant would also imply a commitment to secure loyalty to the Lord's anointed (the king). A good example of the proper blending of political involvement and covenant teaching is 2 Ch. 17:7-9. Here the godly King Jehoshaphat sent out his princes and a number of prominent Levites to teach and further the work of reformation: "and they taught in Judah, having the book of the law of the Lord with them; they went about through all the cities of Judah and taught among the people."

G. P. HUGENBERGER

LEVITICUS lə-vit'i-kəs.

I. Title and Contents
II. Structure
III. Sources
IV. Authorship and Date

V. Theology
VI. Leviticus and the Christian

I. Title and Contents.–The first word of the book serves as its Hebrew title, *wayyiqrā'*, "and he called." The English title Leviticus is borrowed from the Latin Vulgate translation, which in turn had adapted it from the LXX. Leviticus is a fairly appropriate title for the book, for it deals largely with priestly matters, and the priests were drawn from the tribe of Levi.

Leviticus is not simply a manual for priests, however; it is equally, if not more, concerned with the part that the laity should play in worship. Most of the laws apply to all Israel: only a few sections concern the priests alone, e.g., chs. 21–22. Thus the book was relevant to every Israelite, and, as we shall see, is relevant to Christians as well.

II. Structure.–The material in Leviticus is for the most part clearly and logically arranged. This is immediately apparent from a summary of its contents.

I. Laws on Sacrifice (1:1–7:38)
  A. Instructions for the Laity (1:1–6:7 [MT 5:26])
    1. Burnt Offering (Ch. 1)
    2. Cereal Offering (Ch. 2)
    3. Peace Offering (Ch. 3)
    4. Purification Offering (4:1–5:13)
    5. Reparation Offering (5:14–6:7 [MT 5:26])
  B. Instructions for the Priests (6:8 [MT 6:1]–7:38)
    1. Burnt Offering (6:8-13 [MT 1-6])
    2. Cereal Offering (6:14-18 [MT 7-11])
    3. Priests' Cereal Offering (6:19-23 [MT 12-16])
    4. Purification Offering (6:24-30 [MT 17-23])
    5. Reparation Offering (7:1-10)
    6. Peace Offering (7:11-36)
    7. Summary (7:37f.)

  J. Sabbatical and Jubilee Years (Ch. 25)
  K. Exhortation to Obey the Law: Blessing and Curse (Ch. 26)
  L. Redemption of Votive Gifts (Ch. 27)

Under the Sinai covenant Israel was called to become "a kingdom of priests and a holy nation" (Ex. 19:6). Lev. 1–16 focuses almost exclusively on Israel's priestly responsibilities. By preserving its purity these laws enabled Israel to remain in contact with God and witness to His presence in the world. The closing chapters of the book focus on the demand for national holiness: "You must be holy: for I the Lord your God am holy" (Lev. 19:2). This and similar formulas are used repeatedly throughout chs. 18–26 to emphasize that Israel was redeemed to be God's holy people; they also bring together laws on a variety of subjects whose interrelationships are not always obvious. This collection of laws concludes in typical oriental fashion with blessings on the nation if it keeps the laws and threats if it does not. Chapter 27 seems to be a sort of appendix.

One striking feature of the Levitical laws is so obvious that it is easily overlooked. At the beginning of nearly every chapter, and often several times within a chapter, are the words "The Lord spoke to Moses." Thus all the laws are set within a narrative framework. According to the author they were revealed to Moses during Israel's wilderness wanderings to meet specific problems that arose at that time. This historical setting accounts for some features of the book that would seem out of place if it had been arranged in a purely logical fashion. For example, the instructions to the priests in ch. 10 are placed in their present position because they were given then, and the same motive may account for the law on blasphemy in ch. 24. The people knew that it was wrong "to take God's name in vain" (Ex. 20:7) but did not know how to punish those who did. This episode explains how God disclosed that stoning was the appropriate penalty.

The same idea underlies the arrangement of the other groups of laws. Leviticus is part of the Pentateuch and therefore cannot be looked at in isolation. The book of Exodus concludes with the erection of the tabernacle and God's appearing in glory there, a sign that He would be with them wherever they went (Ex. 40:34-38). A church building needs services and ministers as well as God's presence, so it is natural that the sequel to Exodus should begin by describing the worship in the tabernacle (Lev. 1–17). The succeeding chapters are equally apt within the historical framework of the Pentateuch. Israel's goal was Canaan, not the wilderness, and indeed until the disastrous episode of the spies (Nu. 13–14) the Israelites expected to enter the Promised Land very shortly. Guidance as to the conduct befitting a holy people was therefore welcome at this stage of their development. Many of the laws in chs. 18–27 could apply only to a sedentary agricultural community, not to wandering nomads.

III. Sources.–The author did not impose a uniform literary style on the book: the laws are not always cast in the same pattern. Words or turns of phrase characteristic of one section do not always appear in another section, even though both sections may deal with similar topics. In this respect Leviticus more closely resembles the laws of Eshnunna, which have variations in style between different sections, than the laws of Hammurabi, which are drafted in an artificial and uniform style. Criteria such as opening and closing formulas help to distinguish the following groups of laws.

(1) Chs. 1–3	key words: "food offerings"
(2) 4:1–6:7 (MT 5:26)	key words: "he will be forgiven"
(3) 6:8 (MT 6:1)–17:16	opening formula: "this is (the law of)"
(4) Chs. 18–26	regular formula: "I am the Lord (your God)"
(5) Ch. 27	key word: "valuation"

This analysis of the material differs from the usual analysis of Leviticus which ascribes the whole book to the priestly source (P), which in turn used earlier collections of law. Scholars generally have held that only the narrative sections (chs. 8–10, 16) come from P itself. The other sections were originally independent and have been worked over to give them a priestly slant and style. The earlier collections consisted of chs. 1–7, chs. 11–15, chs. 17–26 (the Holiness Code), and ch. 27.

The standard critical analysis just explained seems vulnerable at two points. First, it fails to recognize that the recurring opening phrase "this is" ("these are") links together chs. 6–17. Indeed, 17:2, "This is the thing which the Lord has commanded," is identical with 8:5. It is wrong to propose the existence of different sources merely on the basis that some sections are narrative, others legal. All Leviticus is law within a narrative framework. Second, it is doubtful whether ch. 17 belongs with the following chapters as part of the Holiness Code. Long ago Hoffmann (I, 469) pointed out that ch. 17 seems to belong with what precedes it, not with what follows. Much more recently R. Kilian (*Literarkritische und Formgeschichtliche Untersuchung des Heiligkeitsgesetzes* [1963], pp. 176ff.) pointed out that Lev. 17 is quite distinct from the rest of the Holiness Code.

The tentativeness of all attempts to discover sources in Leviticus must be underlined. Even if one admits their presence it does not necessarily follow that they ever circulated independently of each other. Analyses that purport to distinguish between an original source and the work of later redactors should be treated more warily still. We do not know enough about the development of Hebrew language, law, and religion to make the elaborate analyses offered in some works anything more than conjectures.

IV. Authorship and Date.–Leviticus claims throughout to record what God revealed to Moses; nowhere does it ever state that Moses wrote down what he heard. The book's lack of explicitness about its literary origin is one reason for the great diversity of views among modern scholars. The issue is highly complex; it really involves the question of the composition of the whole Pentateuch. Here it must suffice to set out very briefly the arguments for and against the different views as far as they concern Leviticus.

A. The Traditional View. This is the view that Leviticus was compiled by Moses himself or that at least the material in the book, if not its final shape, goes back to Moses.

Four main arguments are used to support this view. First, the book always presupposes that the laws were given to Moses in the wilderness. Time and again we are told, "The Lord spoke to Moses." The wilderness setting is not merely referred to in the introduction to each group of laws; it is often alluded to in the laws themselves. The sacrifices are offered in the tabernacle, not in the temple (chs. 1–17); lepers must live outside the camp, not outside the city (13:46); 17:1-9 presupposes that every Israelite is within easy reach of the tabernacle. Laws that would apply only to a settled people are generally prefaced by a statement that God is bringing Israel into the land of Canaan, where such laws will become applicable (14:34; 18:3; 23:10; 25:2).

Second, nothing in Leviticus cannot date from the Mosaic period. Elaborate rituals and sacrificial systems are attested in the ancient Near East long before the time of Moses. The normal critical view that these institutions are a late feature of Israelite religion is contrary to what is known about the religious practices in neighboring contemporary cultures.

Third, the book is unsuited to the needs of the postexilic age. For example, although Lev. 18 and 20 deal at length with the question of marriage, nothing is said about intermarriage with Canaanites, the burning issue in Ezra and Nehemiah's time (Ezr. 9–10; Neh. 13:23ff.). While Leviticus magnifies the office of high priest, the priests of Nehemiah's day seem to have been opposed to reform (Neh. 13). The tithe laws (Nu. 18:26ff.), which come from the same source as Leviticus, seem to presuppose a ratio of ten Levites to one priest, yet from Ezr. 8:15 we discover that after the Exile there was a great shortage of Levites; the lists (Ezr. 2:36ff.; Neh. 7:39ff.) suggest a ratio of twelve priests to one Levite among the returning exiles.

Finally, the book of Ezekiel quotes or alludes to Leviticus many times (cf. Lev. 10:10 with Ezk. 22:26; Lev. 18:5 with Ezk. 20:11; Lev. 26 with Ezk. 34). This does not of course prove a Mosaic date for Leviticus but merely that it was an old work whose laws were binding on Israel because they enshrined the covenant between God and His people.

B. The Standard Critical View. The postexilic origin of the priestly work (P) has become an axiom of biblical scholarship. J. Wellhausen's *Prolegomena to the History of Israel* (1878; repr. 1973) is the classic exposition of why P is believed to be the latest of the pentateuchal sources (cf. CRITICISM, esp. II.D).

According to Wellhausen one can trace a development in Israel's religious life and practice. In the earliest days worship was simple, free, and spontaneous. It gradually became more hidebound by law and custom, until eventually it reached a stage of rigid ritualistic legalism. With the growing emphasis on form and ritual went an increase in the power and privileges of the priesthood. P and the books of Chronicles represent the endpoint of this religious evolution.

These trends can be discerned in several different areas of religious life. First, there is the question of the place of worship. In the days of Samuel there was freedom to sacrifice wherever one chose (e.g., 1 S. 16:2). King Josiah, however, limited all sacrifice to the temple in Jerusalem (2 K. 23; cf. Dt. 12). Leviticus (e.g., 17:1-9) simply assumes that all sacrifices must be offered in the tabernacle. According to most critical scholars the tabernacle and the cult described in Leviticus are projections into the Mosaic past of the temple in Jerusalem. That Leviticus simply assumes that all sacrifice will take place in the tabernacle, i.e., the temple, shows that Josiah's centralization measures had been universally accepted, having occurred long before P would have been written.

The trend toward ritualism is obvious in the history of sacrifice. In early times sacrifice was a joyful fellowship meal (Jgs. 13:16ff.). In Leviticus sacrifice has become an elaborate priestly function whose prime purpose is the atonement of sin.

In the great national festivals the flexibility of the early period subsequently gave way to a rigid timetable. The feasts of Unleavened Bread, Weeks, and Booths were originally harvest festivals. In early times each tribe celebrated them at times that suited the state of crops in its area. Later, when all worship was centralized in Jerusalem, it was necessary to give a fixed date so that the whole nation could keep the festivals together. This is what is presupposed in Lev. 23.

Over the years the priestly hierarchy became more highly developed and richer. In early times a priest was not even necessary to offer sacrifice. By postexilic times not only were priests indispensable, but there were great differentiations within the priesthood, which had Levites, priests, and high priest. Leviticus betrays its late origin with its stress on the importance of the high priest. In early times gifts to the priests were optional, or at least unregulated. Gradually the priests extended their rights. In Leviticus they must be given tithes, first fruits, and many parts of the sacrifices. According to Wellhausen this was a late development.

One final argument in favor of a late date for P rests on the difference between the books of Chronicles and Kings. Kings, probably written *ca.* 550 B.C., says little about the worship in Jerusalem. But Chronicles, possibly written

two centuries later than Kings, describes a very elaborate cult with many features akin to P. This similarity between P and Chronicles, it is claimed, proves the late date of P.

Since Wellhausen, many details of the above scheme have been modified; but the general picture has remained unaltered in most textbooks. It is, however, admitted by those who accept this general position that while P (and therefore Leviticus) was not finally edited until the late 5th cent. B.C., it does at some points reflect the practices of the preexilic temple.

C. A Mediating Position. A third view mediates between the traditional view and the standard critical view of Leviticus by maintaining that P is preexilic, but not Mosaic. This view owes its contemporary standing mainly to the advocacy of Y. Kaufmann (*Religion of Israel* [Eng. tr. 1960]), though it was much more common in the 19th cent. before Wellhausen's *Prolegomena* was published.

Kaufmann (p. 178) challenged the basic assumptions of the standard view: "Fixity in times and rites and absence of 'natural spontaneity' characterize the festivals of ancient Babylonia, Egypt, and all known early civilizations. . . . These elements are . . . no indication of lateness." Wellhausen assumed that Israelite society developed from a fairly secular one into one preoccupied with holiness and religion. Usually societies tend to become more secular with time, and this, it is argued, indicates that the priestly source is earlier than Deuteronomy, which is often dated to the 7th cent. B.C.

Kaufmann and his school have advanced more specific grounds for believing in the antiquity of P. Their arguments fall into three main types. First, the language, laws, and institutions of P do not fit with what else is known of the postexilic age. Chronicles, Ezra, and Nehemiah were written after the Exile, Ezekiel during the Exile. Their cultic vocabulary shares a number of terms with postbiblical Hebrew. But quite different terms are used in P. The only feasible explanation seems to be that P comes from a different, earlier period (see A. Hurvitz, *RB*, 81 [1974], 24-57). Similarly, some of the legal terminology in Leviticus was not understood in postexilic times, yet it finds parallels in second-millennium Mesopotamian law. This also points to an early date for Leviticus (see Speiser). Other sacral institutions mentioned in P, e.g., animal tithes, the anointing of the high priest, the Urim and Thummim, did not exist in the era of the second temple. This is very strange if P was composed at this time.

Second, Deuteronomy and Joshua quote Leviticus and other P passages, but not vice versa. This is understandable only if P was written before Deuteronomy.

Third, P's notions of holiness and war, and its laws on sacrifice and blood, closely resemble those mentioned in the books of Judges and Samuel. For example, Lev. 26:31 mentions a multiplicity of sanctuaries where sacrifices are offered. Lev. 17:2-9, which insists that all animals must be slaughtered in the sanctuary, could only apply to the wilderness period. If it had been intended for the settlement situation, it would have prevented most of the population from ever eating meat, unless there were scattered through the land numerous legitimate sanctuaries equivalent to the tabernacle. The ban on eating blood (Lev. 17:10ff.) is referred to in 1 S. 14:33f.

Each of three main positions has its own difficulties, and it would be rash to attempt to decide between them here. Despite the broad scholarly consensus, it does seem that a postexilic date for Leviticus is difficult to maintain in the face of the abundant quotations in Ezekiel and the linguistic evidence that P's vocabulary does not resemble that of late biblical Hebrew. A much earlier date is required by the evidence.

V. Theology.–The theology of Leviticus can hardly be discussed in isolation from that of the other books of the Pentateuch. In particular, when Leviticus is read in conjunction with Exodus and Numbers, the books most closely related to it, some of its theological presuppositions stand out more clearly. For instance, Exodus describes the formation of the Sinai covenant and the erection of the tabernacle: both these institutions are fundamental to the theology of Leviticus. In an attempt to clarify some of the most important themes in the book we shall look at its theology under four main headings: the presence of God, holiness, the role of sacrifice, and the Sinai covenant.

A. The Presence of God. God is always present with Israel in a real way. On occasion His presence becomes both visible and tangible. This idea is expressed repeatedly in Leviticus; indeed, the enduring presence of God is one of the theological presuppositions of the book.

God is preeminently present in worship. The laws on sacrifice say repeatedly that the ceremonies take place "before the Lord" (e.g., 1:5, 11); the food offerings make "a soothing aroma for the Lord" (e.g., 1:9, 13, 17; 2:9; 3:5). In offering sacrifice the priests approach the Lord (16:1; 21:17). It is therefore of supreme importance for them to obey God's instructions strictly when performing their duties (8:9, 13, 17, 21, 29, 36, etc.). Death was a real possibility when priests acted on their own initiative (8:35; 10:2, 6f., 9; 16:2, 13). In one sense God was ever present with His people (Ex. 33:14ff.; 40:36-38), for He spoke regularly to Moses from the tabernacle (1:1; 4:1; etc.; cf. Ex. 29:42). But on special occasions the divine glory appeared in cloud and fire, so that all the people could recognize His coming. The initial lawgiving at Sinai, the erection of the tabernacle, and the ordination of the priesthood (Ex. 19; 40:34ff.; Lev. 9:23f.) were all marked in this spectacular fashion. So too were the judgments on Aaron's sons, the whole nation, and Korah and his supporters (Lev. 10:2; Nu. 14:10ff.; 16:19ff.).

God is present not only in worship but at all times, even in the mundane duties of life. The recurring refrain in the later chapters, "I am the Lord your God" (e.g., Lev. 18:2ff.; 19:3f., 10; 20:7), reminds the people of Israel that every aspect of their life — religion (chs. 21–24), sex (chs. 18 and 20), relations with neighbors (chs. 19, 25) — is of concern to their covenant redeemer. The behavior of each member of the covenant people must mirror that of God Himself (20:7). The fear of God should prompt people to undertake good deeds that they might otherwise neglect, such as help for the blind, the deaf, the elderly, and the poor. Though such people may have no redress against unfair treatment, God is aware of their plight and cares about what His people do to them (19:14, 32; 25:17, 36, 43). The people are warned that if they neglect His law, He will set His face against them. Individuals can expect to be cut off, i.e., suffer premature death (17:9f.; 18:29; 20:5f.; etc.), while the nation will endure the horrible consequences set out in 26:14-45.

For the NT Christian, God's presence was made known in the Incarnation. Alluding to the OT description of the tabernacle, John wrote, "The Word became flesh and tabernacled among us . . . ; we have beheld his glory" (Jn. 1:14). For Paul every Christian is a walking shrine, a temple for the Holy Spirit in which God is to be glorified (1 Cor. 6:19f.). Like the OT tabernacle the Christian enjoys the permanent presence of the Spirit, but just as the old shrine sometimes enjoyed a special manifestation of God's glory, so the Christian should be filled with the Spirit and display God's glory to the world (cf. Acts 6:15; 7:55f.; 2 Cor. 3; Eph. 5:18).

B. Holiness. "Be holy, for I am holy" (11:44f.; 19:2;

20:26) could be termed the motto of Leviticus. Certainly "holy," "clean," "unclean," and cognate words are among the most common in the book. Yet their precise significance is elusive. In this section, an attempt is made to define them more precisely. *See also* CLEAN AND UNCLEAN; HOLINESS, HOLY.

The priests were instructed "to distinguish between the holy and the common, and between the unclean and clean" (10:10). "Common" (*ḥōl*) is opposite of "holy" (*qāḏôš*), just as "profane" (*ḥillēl*) is the converse of "sanctify" (*qiddēš*), and "unclean" (*ṭāmē'*) the opposite of "clean" (*ṭāhôr*). In Hebrew thinking everything was either clean or unclean, holy or common. How do the different concepts relate to each other?

Everything that is not holy is common. Common things divide into two groups, the clean and the unclean. Clean things become holy when they are sanctified. But unclean objects cannot be sanctified. Clean things can be polluted and thus made unclean. Finally, holy items may be defiled and become common, even polluted, and therefore unclean.

Uncleanness may be transmitted from some unclean things by contact (e.g., 11:39f.; 14:36; 15:4ff.; etc.). Similarly, some holy objects make everything that touches them holy (Ex. 29:37; 30:29; Lev. 6:18, 27 [MT 11, 20]). But cleanness is not conveyed to other things. Cleanness is the norm, from which holiness and uncleanness are variations.

The basic meaning of cleanness is purity, as shown by the frequent use of water to purify unclean persons and things (Lev. 11:25, 28; 14:8f.; etc.). But cleanness is a broader concept than purity. It approximates our notion of normality. Many of the diagnostic tests for skin diseases in Lev. 13 conclude with the remark "he is clean" (vv. 13, 17, 39). As the passages make clear, this does not mean the person concerned was not suffering from some complaint, but merely that the complaint was thought unimportant and not to be worried about. As a modern doctor might say, "It is normal." The idea of normality underlies 21:17-23, where any priest with a physical deformity is forbidden to minister at the altar. Admittedly these priests are not said to be unclean, but the notion of normality has very wide ramifications in Levitical theology (see below).

Permanent uncleanness cannot be altered and is not contagious, so no rites are prescribed to cure it. Unclean animals do not pass on their uncleanness to others; they simply cannot be eaten. Paradoxically, temporary uncleanness is taken more seriously. Some types of this uncleanness are contagious and may be passed on to others (e.g., 15:19ff.). All types of temporary uncleanness require cleansing. Those who neglect to undergo the appropriate decontamination procedures endanger themselves and the whole community (Nu. 19:13, 20).

Different degrees of uncleanness require different cleansing rituals. For example, the slight uncleanness consequent on marital intercourse requires the couple to wash and wait till the evening for the uncleanness to clear. Menstrual discharge results in an uncleanness lasting seven days. But unnatural discharges from the sexual organs cause uncleanness that lasts for seven days after the discharge ceases and require washing and sacrifice to cleanse the person (Lev. 15). Similarly, those healed of unclean skin diseases have to wash, wait seven days, and offer sacrifice (ch. 14).

Some persistent skin diseases cause uncleanness, and the sufferer was therefore expelled from the camp for the duration of his illness (13:45f.). Theology, not hygiene, was the reason for this provision. The unclean and the holy must not meet (7:20f.; 22:3). The camp of Israel was holy, and in the middle of it stood the tabernacle, seat of God's most holy presence (cf. Nu. 5:2f.). Neglect of these purity rules polluted the tabernacle and led to the death of the offender (Nu. 19:13, 20). The Day of Atonement ceremonies were designed to cleanse the tabernacle from the uncleanness that it contracted owing to people's negligence in purifying themselves (Lev. 15:31; 16:16, 19).

This insistence on purification of the unclean is a corollary of the idea that Israel, the camp, and especially the tabernacle are holy. Contact between uncleanness and holiness is disastrous. They are utterly distinct in theory and must be kept equally distinct in practice, lest divine judgment fall.

Holiness characterizes God Himself and all that belongs to Him: "Be holy, for I am holy" (11:44f.; 19:2; 20:26). God's name, which expresses His character, is holy (20:3; 22:2, 32). His name is profaned (desanctified) by idolatry, false swearing, and other sins (18:21; 19:12; 20:3; 21:6; 22:2). God demonstrates His holiness in judging sin (10:3; Nu. 20:13). But apart from these remarks there is no explanation of what God's holiness is in itself; it is intrinsic to God's character.

Anyone or anything given to God becomes holy. For example, the priests' portions of the sacrifices are holy. The tabernacle and its equipment are holy (Ex. 40:9; 29:36; 30:29). So, too, are the sabbath and the other religious festivals (Lev. 23).

A person dedicated to the service of God is holy. Preeminently holy in this sense are the priests (Ex. 29:1; 39:30; Lev. 21:6ff.). Similarly the Levites were given wholly to the Lord in place of the firstborn Israelites who had been sanctified. This dedication involves separation from uncleanness, as the case of Nazirite makes clear (Nu. 6:6-8). In a more general sense all Israel is called out from the nations to serve God and is therefore holy (Ex. 19:5f.; cf. Lev. 20:26).

Uncleanness results from natural causes (e.g., disease) or human actions (e.g., sin), but holiness is not simply acquired by ritual action or moral behavior. Leviticus stresses that sanctification has two aspects, a divine act and human actions. God sanctifies and people also sanctify. Only those people whom God calls to be holy can become holy in reality (Nu. 16:7). The divine side to sanctification is expressed in the frequent refrain "I am the Lord your sanctifier" (Lev. 20:8; 21:8, 15, 23; 22:9, 16, 32). Sometimes both the divine and human parts in sanctification are mentioned (Ex. 20:8, 11; Lev. 21:8).

Usually, however, the main emphasis of the book is on the human contribution to sanctification, what a person must do to make something holy. In some cases, e.g., the offering of property or animals to the sanctuary, no special rituals are laid down according to Lev. 27, though sacrifice accompanied the gifts mentioned in Nu. 7. In the more important sanctifications — of the altar, the priesthood, and the tabernacle — the ritual required anointing the holy thing with oil and offering various sacrifices (Ex. 29:1-36; 40:9; cf. Lev. 8–9). When the whole nation was made holy through the covenant at Sinai, they had to cleanse themselves from uncleanness (Ex. 19:10-15), offer sacrifice, and promise to obey the law (24:3-8). Keeping the law is indeed one of the most important duties of the people of Israel if they are to demonstrate holiness (Lev. 19:2ff.; 20:7ff.; Nu. 15:39f.). To disobey God is profanity worthy of death (Ex. 31:14; Nu. 20:12).

This survey of the use of the terms for holiness, cleanness, and uncleanness has demonstrated the importance of these ideas for understanding Leviticus. Cleanness is the natural state of most creatures. Holiness is a state of grace to which people are called by God, and it is attained through obeying the law and carrying out rituals such as

sacrifice. Uncleanness is a substandard condition to which people descend through bodily processes and sin. Every Israelite had a duty to seek release from uncleanness through washing and sacrifice, because uncleanness was quite incompatible with the holiness of the covenant people. (See M. Douglas, pp. 51-54, on the underlying principles that unite these concepts of holiness and cleanness. She argued that holy means more than separation to divine service. It means wholeness and completeness.)

NT theology makes full use of the idea of holiness. All Christians are holy, "saints" in most English translations. That is, they have been called by God to be His people just as ancient Israel was (Col. 1:2; 1 Pet. 1:2; 2:9f.; cf. Ex. 19:5f.). But this state of holiness must find expression in holy living (Col. 1:22; 1 Pet. 1:15). Sanctification is expressed through obedience to the standard of teaching (Rom. 6:17-19), just as in Leviticus it is expressed through obedience to the law. Peter urged his readers to make the motto of Leviticus their own: "Be holy, for I am holy" (1 Pet. 1:16). The imitation of God is a theme that unites the ethics of Old and New Testaments (cf. Mt. 5:48; 1 Cor. 11:1).

C. The Role of Sacrifice. "Under the law almost everything is purified with blood, and without the shedding of blood there is no forgiveness of sins" (He. 9:22). The author of Hebrews had in mind the rites described in Exodus and Numbers as well as those in Leviticus; but Leviticus is particularly concerned with sacrifice, for chs. 1–17 are devoted to explaining the occasions for sacrifice and correct procedures to be followed in it.

Various theories about the significance of OT sacrifice have been advanced, and some will be discussed below to explain the basic principles of OT sacrifice insofar as the Pentateuch makes them plain.

According to D. J. Davies (*ZAW,* 89 [1977], 387-399), Israelite sacrifice was concerned with restoring the relationships between God and Israel and between different members of the nation. The Sinai covenant had created a fellowship characterized by life and order and by harmony between God and mankind and between persons. Outside the covenant and its institutions was the realm of death and disorder from which Israel had been redeemed. Anything that disturbed this order, e.g., death, disease, or sin, was a potential threat to the whole community, and sacrifice was the principal means for remedying the disruption and restoring harmony into the community. Different types of disruptions were corrected by different kinds of sacrifice.

This analysis has much to commend it. But it only partially comes to terms with the concepts of Leviticus. In Leviticus, sacrifice, or more precisely sacrificial blood, is regularly associated with cleansing and sanctification. For example, the hallowing of the altar and the priests is effected through anointing with oil and sacrificial blood (Ex. 29:36f.; Lev. 8:11-15, 23-30). The various purification and reparation offerings detailed in chs. 4–5 are all appointed to deal with the uncleanness associated with sin. All these sacrifices reached their annual climax in the Day of Atonement ceremonies, when each part of the tabernacle was smeared with blood "to cleanse it and sanctify it from the uncleanness of the Israelites" (16:19). Thus sacrifice can undo the effects of sin and human infirmity. Sin and disease lead to profanation of the holy and pollution of the clean. Sacrifice can reverse this process.

Above it is argued that sanctification presupposes a divine call to holiness. Holiness is not acquired merely by obeying the law or undergoing some ritual (e.g., Nu. 16:5). The laws on sacrifice go further still. They assert not only that sacrifice must be in accordance with God's will for it to be effective in the first place, but that it is God Himself who gives the desired result of holiness or cleanness. Many of the laws conclude with the remark "the priest shall make atonement for him and he will be forgiven" (or "be clean") (e.g., Lev. 4:20, 26, 31; 12:7f.). The addition "he will be forgiven" ("clean") is significant. Mere performance of the rite by the priest is inadequate. God is the one who grants forgiveness and cleansing.

If uncleanness caused by sin was left unatoned for by sacrifice, deaths were liable to occur. Indeed, the Pentateuch records a number of incidents where the enormity of the sin led to instant judgment, so that it was impossible to offer a sacrifice quickly enough to avert disaster (Ex. 32:25-35; Lev. 10; Nu. 25). It may not be coincidence that on such occasions, when God's wrath was demonstrated in the death of some of the guilty, no sacrifices are mentioned to renew the holiness of the rest of the people. When a man died there was no need for animals to be sacrificed as well (Nu. 25:6-13; cf. 16:36-50 [MT 17:1-15]).

Another indication that the death of the animal in some way substituted for the death of the guilty person is provided by the verb "make atonement" (*kipper*), which regularly describes what the priest does in sacrifice. Despite its frequent occurrence, its etymology and its meaning are uncertain. One possible derivation is from the Akkadian verb *kuppuru,* "cleanse" or "wipe." This fits those contexts where the altar or the sanctuary is the direct object of the verb and the action involves smearing the altar with blood (Lev. 16:33).

Alternatively, Heb. *kipper* may derive from Heb. *kōper,* "ransom price." A *kōper* is the money that a man condemned to death can pay to escape the death penalty (Ex. 21:30; Prov. 6:35). *Kipper* may then be literally translated "pay a ransom (for one's life)." In certain passages where various monetary payments are said to make atonement, "pay a ransom" would seem to be a much more appropriate rendering than "cleanse" (e.g., Ex. 30:15; Nu. 31:50). Such an understanding is compatible with most of the passages that speak of sacrifice "making atonement" for someone. Through the animal's death and the subsequent rituals people are ransomed from the death that their sin and uncleanness merit.

There were at least three parties involved in every sacrifice: God, the priest, and the worshiper. We have already seen that Leviticus insists that sacrifice must be offered in response to God's call, not on one's own initiative, if it is to be effective in making people holy (cf. Lev. 10). It also points out that correct performance of the atonement rituals by the priest is not enough; God must grant forgiveness and cleansing. It makes one final point concerning the attitude of the worshiper. In the case of unintentional sin, remorse and sacrifice are sufficient for atonement. But if the sin is "high-handed," i.e., deliberate, reparation and public confession are necessary prerequisites to sacrificial atonement (5:1–6:7 [MT 5:1-26]; cf. Nu. 15:27-30).

John the Baptist, Our Lord Himself, Paul, Peter, and the writer of Hebrews are among those in the NT who make use of the idea that Christ's death was a sacrifice that atoned for sin. Unlike the sacrifices in Leviticus, the Crucifixion is unlimited in its scope and requires no repetition (1 Jn. 2:1f.; He. 9:26). But like the OT sacrifices, there must be a divine call to the individual and a response of faith and repentance if anyone is to enjoy the effects of Christ's atonement (cf. Eph. 1–2).

D. The Sinai Covenant. In sharp contrast to the terms for sacrifice and holiness, the covenant is mentioned rarely in Leviticus. In fact, it is mentioned only ten times altogether, of which eight occurrences are in ch. 26. But though the word for covenant (*bᵉrîṯ*) is rare, covenantal ideas pervade the whole book. Like the presence of God

with Israel, the covenant is one of the fundamental presuppositions informing the theology of Leviticus.

Leviticus is the sequel to Exodus. At the heart of Exodus (chs. 19-24) is the Sinai covenant. All that follows in Exodus is a working out of the covenant. Leviticus explains how covenant worship should be conducted (chs. 1–17), then how the covenant people should behave (18–25), and closes with a section of blessings and curses, entirely appropriate to a covenant document (ch. 26). Indeed, the last verse of ch. 26 connects all that precedes with Sinai, where the covenant was concluded.

Various studies have shed much light on the form of the OT covenant (*see* COVENANT [OT]). It bears a marked resemblance to the form used in other Near Eastern texts for drawing up treaties and collections of law. This is entirely appropriate, for the Sinai covenant was at once a treaty between God and Israel and laws imposed on the nation.

The covenant-treaty background of pentateuchal law highlights three important features of the laws. First, the law was given in a context of grace. In the treaty form the stipulations came after the historical prologue. This was analogous to the historical situation: God gave His law to Israel after they had been redeemed from Egypt, not as a means for securing their redemption. God's call to Israel to be His holy people preceded the revelation of the law at Sinai, but only obedience could make holiness a living reality. In Leviticus, whenever the Exodus from Egypt is mentioned it is always as a motive for keeping the law (e.g., 11:45; 18:3; 23:43). The OT believer was to treat others as God had treated him (19:34).

Second, although Israel had been saved from Egyptian bondage and called to be God's people, they were not free to do as they pleased. The very reverse was the case. As a holy nation they had to keep themselves pure from sin and uncleanness lest God's wrath break out against them. The covenant texts express the same notion in the blessings and curses in Lev. 26 and Dt. 28. There the nation is reminded that all God's promises — of good harvests, peace, and His own presence — will be theirs if they observe His commandments. But if they forget His word and go their own way, they will experience all those things that people fear most: sickness, drought, death of children, famine, enemy occupation, and deportation to foreign lands. Leviticus stresses that if such a fate befalls Israel, it will not be in spite of the covenant but because of it. God Himself will punish His disobedient people (26:24, 28; cf. Am. 3:2).

The third point to note about the covenant is its eternity. In the covenant God pledges Himself to Israel forever, and Israel is expected to reciprocate by offering back its eternal allegiance to its sovereign redeemer. The purpose of the horrifying curses in Lev. 26 is to make Israel turn back from its evil ways and listen to God (26:18, 21, 23, 27). But the Israelites are assured that however long they take to come to their right mind and confess their sin, God will be ready to reinstate them when they do change their ways (26:40f.). Even if they do not turn back, they will not be deserted by their God, though they may suffer continued exile from their land (v. 44). The reason for God's faithfulness is His promise to the patriarchs, Abraham, Isaac, and Jacob (vv. 42, 45; cf. Ex. 32:11-14; Dt. 4:30f.; 30:1-10; Isa. 49:15; Jer. 31:36). Divine blessing depends on obedience, but disobedience will not result in total rejection, just continued divine judgment.

The prophets looked forward to a new covenant under which the law would be written in human hearts instead of on stone as the Sinai covenant had been. The NT affirms that this covenant was inaugurated by Christ's death, which saves His people from the bondage of sin. The new covenant, like the old, displays God's grace to sinful mankind and expects obedience to the law (Jn. 14:15). Finally, the new covenant also offers an assurance of God's eternal faithfulness to His people (Jn. 10:28).

VI. Leviticus and the Christian.–Some problems that arise in relating Leviticus to the modern Church's situation also arise for other OT books. Thus examples from other parts of the Pentateuch are included here.

Christians customarily divide the OT law into three parts: the moral, e.g., the Ten Commandments; the civil, i.e., the legislation for OT society; and the ceremonial, i.e., the sacrificial and ritual laws. Many, despite Paul's teaching that "all Scripture is inspired and profitable" (2 Tim. 3:16), assert that only the moral law binds the Christian. This position faces three main difficulties. First, the NT does not seem to distinguish among the different types of law in this way. Second, it is difficult to draw the line between moral precepts and other law. Is the sabbath a moral law or a ceremonial one? Third, much of the civil legislation is grounded on moral judgments, often expressed in the Ten Commandments. Nevertheless, even if the threefold division of the law seems arbitrary and artificial, it does provide a convenient framework for our discussion, in which a slightly different approach will be advocated.

As far as basic principles of behavior are concerned the OT and NT are in broad agreement. "You shall love the Lord your God with all your heart, and with all your soul, and with all your mind, and with all your strength. You shall love your neighbor as yourself" (Mk. 12:30f.; Dt. 6:5; Lev. 19:18). With this double quotation from Deuteronomy and Leviticus Jesus draws out the quintessence of OT law and gives it His own seal of approval. The Ten Commandments are often quoted by the NT. Peter quoted the Levitical injunction to holiness (1 Pet. 1:16). The examples could be multiplied to show that the NT advocates as high a standard of personal morality as the OT. This is to be expected, since the God of the OT is the God of the NT. The people of God are supposed to imitate God. In Leviticus God summons people to "be holy, for I am holy," just as Our Lord urges: "You, therefore, must be perfect, as your heavenly Father is perfect" (Mt. 5:48).

One may go further. The theological setting of the ethical imperatives is similar in both Testaments. In both the OT and NT, law forms part of the covenant relationship between God and His people. Although this has already been alluded to (see V.D above), it is so important that it deserves further elaboration.

Three clear parallels may be drawn between the OT view of the covenant and the NT teaching on law and grace. Although covenant terminology and structures are hard to find in the NT, the principles enshrined in the OT covenant have not disappeared. In the teaching of Jesus and Paul the covenant has come down to the level of basic presuppositions. Though as a rule they do not talk about the covenant, their assumptions about the relationship of grace and law show that their teachings are governed by the principles inherent in the OT covenant.

First and foremost the OT covenants are arrangements of divine grace. God called Abraham. He brought Israel out of Egypt. He chose David. In every case God took the initiative in saving His people and created a relationship of fellowship between Himself and them. In the NT Our Lord came to seek and to save that which was lost and to call sinners to repentance (Lk. 5:32).

Second, the covenants involve law. Abraham was told, "Walk before me and be perfect" (Gen. 17:1). The covenants create a fellowship between God and mankind; the

Davidic covenant is compared to the relationship between father and son (2 S. 7:14). Mankind is expected to respond to God's grace; proper response involves the law, which tells mankind how to imitate God. The NT insists that the law is not a means to salvation but a response to salvation. The disciple is not merely to observe the letter of the commandment; his righteousness must exceed that of the scribes and Pharisees (Mt. 5:17-48).

Finally, the covenant involves blessing and curse. Israel is told that if it obeys the law, it may expect greater and greater prosperity. If it is disobedient, its suffering will be terrible. David was warned that if his son committed iniquity, "I will chasten him with the rods of men" (2 S. 7:14). The same themes reappear in the NT. Those who seek God's kingdom and His righteousness are assured that they will not be short of food and clothing (Mt. 6:25-33). But those who refuse to forgive others will forfeit their own forgiveness (Mt. 18:23-35). Paul compared the experience of Israel in the wilderness to that of the Corinthian church. Many Israelites died in the wilderness for indulging in immorality. The same fate would befall the Corinthians if they did not repent. Indeed, some had suffered already (1 Cor. 10:1–11:32).

It seems fair to say that the NT not only accepts the moral law of the OT but reiterates the basic theology of the covenant of which the law forms a part. If the NT stresses much more strongly the grace of God, this is because Christ's incarnation and death display God's mercy more strikingly than even the Exodus from Egypt.

Besides moral laws such as "you shall love your neighbor as yourself" (19:18), Leviticus contains a number of laws that are sometimes described as civil legislation, e.g., laws about farming (vv. 9f., 19, 23-25; etc.) and rules fixing the death penalty for certain offenses (20:9-16; etc.). This type of law is quoted less frequently in the NT than the simple moral imperatives, but when quoted it is treated as equally authoritative (1 Cor. 9:9 quoting Dt. 25:4; Mk. 7:10 citing Lev. 20:9). The arbitrariness of the distinction between moral and civil law is reinforced by the arrangement of the material in Leviticus. Love of neighbor immediately precedes a prohibition on mixed breeding; the holiness motto comes just before the law on executing unruly children (Lev. 19:18f.; 20:7-9). Instead of distinguishing between moral and civil laws, it is better to say that some injunctions are generally applicable to most societies, while others are more specific and directed at the particular social problems of ancient Israel.

The moral and religious principles underlying OT legislation include the Ten Commandments, but there are other principles as well. It is the underlying principles that should bind the Christian, not the specific applications found in the OT. For example, a recurrent theme in biblical law is that the weakest members of society should be specially protected. The poor, the orphan and widow, the clergy (Levites), and the immigrant (resident alien) are often singled out for special treatment. Lev. 19:9f. says: "When you reap the harvest of your land, you shall not reap your field to its very border, neither shall you gather the gleanings after your harvest. . . . you shall leave them for the poor and for the sojourner: I am the Lord your God."

It is misguided to try to apply this law directly to our society. It does not mean that efficient combine harvesters that gather up every stalk of grain are contrary to the will of God. The aim of this law is very clear, namely, to allow the landless poor to collect some free food. Inefficient combines are of no benefit to the poor in our society, who usually live in city centers far from the harvest fields. But though this law is inapplicable literally in modern societies, the principles underlying it should still challenge Christians to devise the most effective means that can help the poor of our age. It is not the task of the commentator to say which means should be adopted, e.g., food subsidies or welfare benefits, but simply to emphasize that Christian politicians and voters have a duty to support good schemes to help the needy. The Jubilee laws in Lev. 25 also offer very relevant comment on issues of wealth and poverty.

Finally, we come to the question of the ceremonial law. Very detailed comments on the uncleanness regulations and the sacrificial rituals are to be found in the Epistle to the Hebrews. The great argument of that writer is that Christ fulfils all the ideals enshrined in the OT law. His high-priesthood is superior to Aaron's. His sacrifice is more effective in purging sin than the blood of bulls and goats. Unlike the OT rites it need never be repeated, since it has secured the forgiveness of sins once and for all. In one sense, then, the whole ceremonial law in Leviticus is obsolete for the Christian. We are interested in the sacrifice of Christ, not in animal sacrifice. But in another sense the Levitical rituals are still of immense relevance. It was in terms of these sacrifices that Jesus Himself and the early Church understood His atoning death. Leviticus provided the theological models for their understanding. If we wish to walk in Our Lord's steps and think His thoughts after Him, we must attempt to understand the sacrificial system of Leviticus. It was established by the same God who sent His Son to die for us; and in rediscovering the principles of OT worship written there, we may learn something of the way that we should approach a holy God.

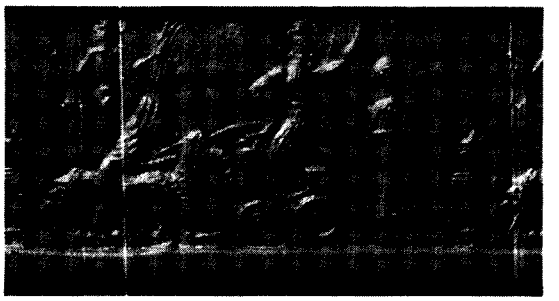
LEVY [Heb. *rûm*–'raise' (Nu. 31:28), hiphil of *ʿālâ*–'cause to go up' (1 K. 9:15), *mas*]. The RSV usually translates the noun *mas* as "forced labor," but also uses "levy" (1 K. 5:13b, 14), "levy of forced labor" (1 K. 5:13a [MT 27a]), and "forced levy" (1 K. 9:21 par. 2 Ch. 8:8). When this noun is translated "levy" the verb *ʿālâ* is translated "make" or "raise." In 2 Ch. 24:6 (cf. also v. 9) the RSV supplies the verb "levy" to make a smooth translation of Heb. *maśʾaṯ mōšeh,* "tax of Moses." *See* LABOR; FORCE (5).



LEWD; LEWDNESS [Heb. *zimmâ* < *zāmam*–'think, plan'] (Jer. 13:27; Ezk. 16:27, 43; 22:9; 23:21, 27, 29, etc.; 24:13); NEB also OBSCENITIES (Ezk. 10:43); [*naḇlûṯ* < *nāḇal*–'act disdainfully,' 'be foolish'] (Hos. 2:10 [MT 12]). *Zimmâ* is not limited in meaning to "lewdness" but can signify any deliberate wickedness (it is translated "wickedness" in Lev. 18:17; 19:29; 20:14; "evil device" in Ps. 26:10; "evil intent" in Prov. 21:27; etc.). The RSV renders *zimmâ* "lewd(ness)" only in Jer. 13:27 and Ezekiel, where it describes the nation's idolatry in terms of adultery; cf. Ezk. 23:44, "For they have gone in to her, as men go in to a harlot. Thus they went in to Oholah and to Oholibah to commit lewdness." In Hos. 2:10 *naḇlûṯ,* "immodesty," "shamelessness," describes the shamefulness of the woman's activity and symbolically the shame of Israel's spiritual adultery.

The word "lewd" does not appear in the NT, though twice the AV translates thus in nonsexual contexts: once in the obsolete sense of "wicked" or "worthless" (Gk. *ponērós*, Acts 17:5) and once where Gk. *rhadioúrgēma* refers to criminal acts (18:14). D. J. KELLY

LIBANUS lib'ə-nus (Jth. 1:7, AV). *See* LEBANON.

LIBATION [Heb. *nesek* (Ex. 29:40f.; 30:9; 2 Ch. 29:35; Ps. 16:4; Jer. 44:17, 19, 25), *nāsaḵ*–'pour out' ("pour out as libation," Ex. 37:16; Hos. 9:4), *mᵉnaqqît*–'offering bowl' (Ex. 25:29; "bowl for libation," Jer. 52:19); Gk. *spéndō* ("pour as a libation," Phil. 2:17)]; AV DRINK-OFFERING, OFFERING (Hos. 9:4), "to cover" (Ex. 25:29; 37:16), "cup" (Jer. 52:19), "be offered" (Phil. 2:17); NEB also DRINK-OFFERING, "flagon" (Jer. 52:19), "lifeblood is to crown" (Phil. 2:17). A liquid offering.

In Israel, as in the rest of the ancient Near East, libations were a secondary type of offering, i.e., they often accompanied other types of offerings (Ex. 29:40f.; 2 Ch. 29:35). Special bowls were used as containers (Ex. 25:29; 37:16; Jer. 52:19). Wine was perhaps the most common libation (Ex. 29:40f.; Hos. 9:4); according to Robertson Smith (p. 231), it was a substitute for blood. That the Israelites knew of blood offerings is clear from Ps. 16:4; 50:13 (cf. 2 S. 23:17), but these texts plainly indicate that the Israelites did not make them. Note also that these texts speak of drinking the libation, whereas normally it was poured out around the base of the altar (a distinctive characteristc of North Semitic ritual according to Robertson Smith, p. 230; cf. Jastrow, p. 666; Josephus *Ant.* iii.9.4 [234]).

On the right a worshiper pours a libation over an altar in honor of the weather-god, who rides in a chariot pulled by a lion-griffin; a goddess stands on the griffin (ca. 24th-23rd cent. B.C.) (Cylinder seal no. 220; The Trustees of the Pierpont Morgan Library)

Jeremiah denounced libations to the QUEEN OF HEAVEN (44:17-19, 25) as well as DRINK offerings to other gods (19:13; 32:29; cf. Zeph. 1:5). The latter were made on rooftops, a practice that is also attested in Ugaritic myths (e.g., Krt, lines 62-80, 156-172).

Paul's use of *spéndō* in Phil. 2:17 ("poured out") shows that he expected to be martyred (the only other NT occurrence of *spéndō* is in 2 Tim. 4:6, where Paul clearly anticipated his impending martyrdom).

LIBERAL; LIBERALITY; LIBERALLY [Heb. *bᵉrāḵâ*] (Prov. 11:25); NEB GENEROUS; [*kᵉyaḏ hammeleḵ*] ("royal liberality," Est. 2:18); AV "according to the state of the king"; NEB "worthy of the king"; [hiphil of *ʿānaq*] ("you shall furnish . . . liberally," Dt. 15:14); NEB LAVISHLY; [*ḥānan*] ("give liberally," Ps. 37:26); AV MERCIFUL; NEB GENEROUSLY; [Gk. *hadrótēs*] (2 Cor. 8:20); AV ABUNDANCE; NEB GENEROUS; [*eumetádotos*] (1 Tim. 6:18); AV "ready to distribute"; NEB "ready to give away"; [*haplótēs*] (Rom. 12:8; 2 Cor. 8:2); AV also SIMPLICITY; NEB "with all your heart," "lavishly open-handed"; [*polýs*] (Acts 10:2); AV MUCH; NEB GENEROUSLY.

The sense of "liberal giving" implicit in Heb. *bārak*, "bless," and the cognate substantive *bᵉrāḵâ*, "blessing," leads naturally in the OT to using the latter to mean "gift, present" (cf. Gen. 33:11; Josh. 15:19; Jgs. 1:15; 1 S. 25:27; 30:26; 2 K. 5:15). In this sense the "person of blessing" (*nepeš bᵉrāḵâ*) in Prov. 11:25 is a "person of bounty" or "liberal man" (RSV).

In Est. 2:18 King Ahasuerus is portrayed as giving gifts "according to the hand of the king" (*kᵉyaḏ hammeleḵ*). The RSV translation "with royal liberality" more felicitously approximates the idiomatic Hebrew.

The combination of the hiphil infinitive absolute *haʿᵃnêq* and impf. *taʿᵃnîq* (< *ʿānaq*) in Dt. 15:14, "make a necklace," "put around one's neck," is figurative for "liberally" or "lavishly supply." Heb. *ḥānan*, "be gracious, show favor," means "be liberal in charity" in contexts describing pious treatment of the poor, needy, etc. (cf. Ps. 37:21; 109:12; 112:5; Prov. 14:31; 19:17; 28:8).

Greek *hadrótēs*, "abundance" (lit. "stoutness, fulness"), is a hapax legomenon in the NT. The RSV renders it "liberal gift" (cf. NEB, "generous gift") in 2 Cor. 8:20, where it refers to a monetary collection. *Eumetádotos*, "bountiful, generous" (derived from *metadídōmi*, "give a share"), is also a hapax legomenon (1 Tim. 6:18). The meaning, however, is clear: the rich are admonished to be "liberal" (*eumetádotos*) and "generous" (*koinōnikós*, lit. "sharing").

The noun *haplótēs*, derived from *haploús*, "simple," thus essentially means "simplicity, plainness." A derived sense was "moderation" (in life-style), which further developed into the sense "moderation that enables one to spare something for others," i.e., "generosity" (cf. 2 Cor. 9:11, 13). It has this sense in Rom. 12:8; 2 Cor. 8:2. The use of *haplótēs* in the pseudepigraphical T. Iss. (3:1f., 8) also illustrates this nuance (see *APOT*, II, 326). Hermas frequently used *haplótēs* to refer to the simple goodness that willingly gives of itself without reserve (see Bauer, rev., p. 85). The more common sense of *haplótēs* in the NT, however, is "purity" or "singleness of heart" (cf., e.g., Eph. 6:5; Col. 3:22).

The common adjective *polýs*, "much, many," appears in Acts 10:2 in the phrase *poiōn eleēmosýnas pollás* (lit. "who did many acts of charity"; cf. AV, "who gave much alms"). To avoid woodenness the RSV translates "gave alms liberally."

A. Ministry of Jesus
B. Emancipation from Slavery
C. Christian Freedom
D. Freedom of Speech
E. Liberty from Sin and Law
F. Personal and Apostolic Liberty
G. Defense of Liberty
H. Consummation of Liberty

I. OT.–The paradigm of liberty in the OT — and to some degree in the whole Bible — is the deliverance of the Israelites from their servitude in Egypt. They had been slaves under Pharaoh; the beginning of their nationhood was marked by an act of divine liberation. As the God of their fathers had liberated them, so the liberty into which He had brought them was to be reflected in their constitution and laws (cf. Ps. 119:45). No Israelite could be deprived of liberty indefinitely. Hence the ordinance requiring that Hebrew slaves be set free in the seventh year. Only if they then made a solemn declaration, of their own choice, that they preferred to serve their master in perpetuity was their slave status to be prolonged beyond the seventh year (Ex. 21:1-6).

A later development, the year of release (Heb. *šᵉmiṭṭâ*, lit. "remission"), provided not only for the freeing of slaves (with adequate provision for economic independence), but also for the remission of debts every seventh year (Dt. 15:1-18). It was foreseen that when the seven-year cycle was well advanced, creditors might be unwilling to lend money, and creditors were exhorted to adopt a generous outlook (vv. 7-11). (In the very different economic situation at the end of the 1st cent. B.C. Hillel instituted the *prozbul*, a provision by which the lender and the borrower agreed to declare publicly that their transaction was exempt from the requirements of the year of release.)

The same principle underlies the regulation that fields remain fallow every seventh year; even the land was to enjoy respite and protection against exploitation (Lev. 25:1-7).

The motives behind the year of release led also to the establishment of the Jubilee Year, at the end of seven sabbatical periods (i.e., every fiftieth year; Lev. 25:8-17). It may have remained an ideal in the statute book rather than an institution observed in practice. The trumpet was to be blown on New Year's Day of the fiftieth year to "proclaim liberty [*dᵉrôr*] throughout the land to all its inhabitants" (Lev. 25:10). This language recurs throughout the OT. *See* JUBILEE, YEAR OF.

During the Babylonian siege of Jerusalem (589-587 B.C.) King Zedekiah made a proclamation of liberty in the city, directing that all Hebrew slaves should be set free (Jer. 34:8f.). But shortly afterward — perhaps when the besieging army temporarily withdrew to deal with an Egyptian diversion and thus raised the Jerusalemites' vain hope that the siege was over (37:5-10) — the proclamation was rescinded and those who had been liberated were reenslaved (34:8-11). In indignation at this breach of the sacred covenant (vv. 12-16) Jeremiah proclaimed to the Jerusalemites a different and sinister liberty: "liberty [*dᵉrôr*] to the sword, to pestilence, and to famine" (34:17). By this outrage the city sealed its doom.

Ezekiel envisaged the "year of liberty" (*dᵉrôr*) as continuing into the new order after the return from Exile (Ezk. 46:17).

The return from the Babylonian Exile was viewed in some degree as a replay of the deliverance from Egypt: once again, by divine power, "the ransomed of the Lord" returned, and those who were "bowed down" found timely release (Isa. 51:11, 14). In similar idiom a prophetic voice later proclaimed a new year of release, "the year of the Lord's favor," which would bring "liberty [*dᵉrôr*] to the captives, and the opening of the prison to those who are bound" (61:1f.). These words were to play a significant part in the inauguration of the gospel age.

II. Intertestamental Literature.–After returning from Exile the Jews under the Persians and then under Hellenistic rulers were sufficiently comfortable for liberation movements to make little headway. But the attempt by the Seleucid king Antiochus IV Epiphanes (175-163 B.C.) to interfere with their ancestral religion provoked the determination to regain not only religious liberty but also political liberty. In 140 B.C., after a long struggle, both had been secured, and Simon the Hasmonean and his sons received public recognition for having "fought and repulsed Israel's enemies and established its freedom" (1 Macc. 14:26). Later Jason of Cyrene, in a work epitomized in 2 Maccabees, recorded how the Hasmonean family "recovered the temple . . . and freed the city and restored the laws" (2 Macc. 2:22).

But some pious groups in Israel did not equate the independence gained by the Hasmoneans with true liberty. For them true liberty involved the triumph of righteousness and the worship of God according to what they believed to be His revealed will.

One of these groups was the Qumrân community, whose members anticipated that Israel would regain its liberty when the sons of light, with heavenly aid, gave battle to the sons of darkness and annihilated them. One way that the community prepared for that consummation was by meticulously observing the sacred epochs, including the Jubilee: "at the beginning of their weeks for the season of liberty" (1QS 10:8). This practice would ensure the coming of the great jubilee at the end of the current era of wickedness. Thus 11QMelch begins by quoting the regulations for the Year of Jubilee (Lev. 25:13; cf. v. 10) and the year of release (Dt. 15:1); it interprets both in terms of the eschatological return from exile. In the tenth and last year of Jubilee, Israel will finally be gathered home. The proc-

lamation of restoration and liberty at that time (cf. Isa. 61:1f.) is assigned to Melchizedek, "for that is the epoch of Melchizedek's 'acceptable year'" (11QMelch 1-9).

From the early phase of the Roman occupation of Judea (63 B.C. onward) comes the collection of poems called the Psalms of Solomon. The work is by a community that excoriated the Hasmoneans for "laying waste the throne of David" (Ps.Sol. 17:8) and saw in the Roman occupation divine judgment on them for their sins. The authors looked forward to being liberated from the foreign yoke when God raised up "their king, the son of David" (v. 23).

Like Anna and her friends in Luke's Nativity narrative, those pious Jews "were looking for the redemption of Jerusalem" (Lk. 2:38). Indeed, the Lukan canticles in a context other than the Nativity might be interpreted in the same vein as the Psalms of Solomon. Mary in the Magnificat welcomed the dethroning of despots and the exalting of the humble (1:52); Zechariah in the Benedictus stressed the fulfillment of the divine promise of deliverance from enemies and oppressors, but he associated this deliverance with God's forgiveness of sins and the people's serving of God in holiness and righteousness (vv. 68-79).

III. NT.–A. Ministry of Jesus. Jesus is described in Luke as inaugurating His Galilean ministry in the synagogue of Nazareth by reading Isa. 61:1f., which announces good news to the poor, release for captives, and the arrival of "the acceptable year of the Lord." "Today," Jesus said, "this scripture has been fulfilled in your hearing" (Lk. 4:16-21). With His exposition of the text and ensuing activity He showed that the liberation which He thus proclaimed was not the kind that many of His contemporaries were anticipating — liberation from imperial Rome. Political liberation was proclaimed in particular by the adherents of the "fourth philosophy" (as Josephus called it in *Ant.* xviii.1.1, 6 [9, 23]), i.e., the followers of Judas of Galilee, who developed in due course into the party of the Zealots. Jesus may have acknowledged the nobility of the Zealots' ideals, but He warned that their chosen way must lead to disaster.

In fact, neither in the teaching of Jesus nor in the rest of the NT does political liberty play a significant part. The incident of the tribute money (Mk. 12:13-17) shows that Jesus did not regard the payment of taxes to Caesar as an obstacle to the interests of the kingdom of God. It did not conflict with the liberty which He proclaimed. Similarly, when Peter told the collectors of the temple tax (the half-shekel) that his master habitually paid it, Jesus reminded him that kings do not exact taxes from their own children: members of the royal family are free (Mt. 17:24-27). Thus members of God's family were evidently exempt from paying Him tribute for the maintenance of His house, the temple. Nevertheless, to avoid giving offense, Jesus' followers should pay the half-shekel voluntarily, not as a religious obligation. This probably was the policy of the church of Jerusalem until its dispersal in A.D. 66.

B. Emancipation from Slavery. On civil liberty, as on political liberty, the NT says little. When Paul sent Onesimus back to his master Philemon, he sent him indeed "no longer as a slave but more than a slave, as a beloved brother," and he charged Philemon to give Onesimus the welcome that Paul himself would have received (Philem. 16f.). But Paul did not expressly tell Philemon to emancipate Onesimus. Onesimus, in fact, was a special case: Paul hinted that what he really wanted Philemon to do was freely and willingly to send Onesimus back, so that Onesimus might continue to be of service to Paul in his imprisonment (vv. 13f.).

The "household tables" in Colossians and Ephesians direct slaves to obey their earthly masters, because in so doing they are serving their heavenly Master (Col. 3:22-25; Eph. 6:5-8). According to 1 Tim. 6:1f. slaves must not withhold respect from their masters if the masters are Christians; they must serve them all the more faithfully. 1 Pet. 2:18-20 requires household slaves (*oikétai*) to render respectful submission not only to kind and considerate masters but even to overbearing and unreasonable ones. If the slaves suffer unjustly, they are to reflect that they are following the example of Christ, who himself suffered unjustly (vv. 21-24).

Paul's fullest statement of the principle of slavery, as distinct from the specific case of Onesimus, comes in 1 Cor. 7:20-24. Those who were slaves when they became Christians should be content to go on serving God in that status. It is not very important whether one is a slave or a free person on the earthly level; the enslaved Christian is the Lord's freedman, while the free Christian is the slave of Christ (v. 22). There is an ambiguity in v. 21b, which advises the Christian slave: "If you can gain your freedom [*eleútheros*], avail yourself of the opportunity [*mállon chrēsai*]." The RSV mg. presents the alternative rendering: "Make use of your present condition [i.e., slavery] instead." But the first reading is supported by v. 23: "Do not become slaves of men."

Masters are not told to liberate their slaves but to treat them mercifully, as their own heavenly Master treats them (Col. 4:1; Eph. 6:9). Within the fellowship of the Church, indeed, the distinction between slave and free has little relevance: "There is neither slave nor free [*eleútheros*] . . . in Christ Jesus" (Gal. 3:28; cf. Col. 3:11).

C. Christian Freedom. There is a counterpart to this NT teaching in Platonism and Stoicism: persons who are legally free but controlled by their vices are really slaves; those who are legally slaves but pursue goodness and truth are really free (cf. the title of Philo's treatise *Quod omnis probus liber sit, "Every good man is free";* cf. 2 Pet. 2:19). But Christian teaching relates true freedom to the person and work of Christ: "with freedom [*eleutheríą*] Christ has set us free" (Gal. 5:1). This freedom is effected for the believer by the Spirit: "Where the Spirit of the Lord is, there is freedom [*eleuthería*]" (2 Cor. 3:17). Similar teaching (in Johannine idiom) appears in the Fourth Gospel: "The truth will make you free. . . . Every one who commits sin is a slave to sin. . . . So if the Son makes you free, you will be free indeed" (Jn. 8:32-36). The Son is the embodiment of liberating truth (cf. 14:6).

D. Freedom of Speech. In addition to *eleuthería,* the Greek term *parrēsía* ("freedom of speech," "free access") plays a part in NT teaching about liberty. *Parrēsía* is used of boldness in preaching the gospel (1 Thess. 2:2), of openness in disclosing the "mystery" of the divine purpose (Eph. 3:12), and of courage in the face of pagan judges, even the imperial tribunal in Rome (Phil. 1:20). It is a characteristic of Paul's ministry.

It is also a recurring note in Acts, from Peter's and John's *parrēsía* (RSV "boldness") before the Sanhedrin (Acts 4:13) to Paul's *parrēsía* as he preached the kingdom of God and told the story of Jesus to all and sundry during his two years' custody in Rome (28:31; cf. vv. 16-30; 24:23).

The term occurs only once in the Synoptic Gospels — in Mk. 8:32, where Jesus, announcing for the first time the impending suffering of the Son of man, "said this plainly [*parrēsíą*]." It is frequent in John's Gospel: Jesus claimed always to speak "openly" (*parrēsíą*), never in secret (18:20).

E. Liberty from Sin and Law. The gospel liberty on which Paul insisted embraced liberty from sin and from law simultaneously.

Sin is presented as a master whose slaves are unable

to escape his control except by dying or becoming the property of another. Both these ways of escape were pressed into service by Paul. Believers pass from the control of sin through their death with Christ. Those who have died to sin can no longer live in sin (Rom. 6:2-11, 15-18). But, having died with Christ, they now "walk in newness of life" (v. 5), living henceforth in the service of God and enjoying present sanctification "and its end, eternal life" (v. 22; cf. "the law of liberty," Jas. 1:25; 2:12).

Sin is also viewed as a jailer who refuses to release his prisoners. This concept is implied in Gal. 3:22, "The scripture [i.e., the written law, concentrated in such an uncompromising form as Dt. 27:26] consigned all to sin" (or "confined all under the power of sin"). The key that liberates the prisoners is the promise made to Abraham, embodied and fulfilled in Christ. Promise displaces law; sin has dominion over men and women as long as they are "under law," but that dominion is broken when they find themselves "not under law but under grace" (Rom. 6:14).

Freedom from law was a central element in Paul's experience and understanding of salvation. It is inseparably bound up with freedom from sin, although the law is not equated with sin. Rather, sin is envisioned as a force that uses the law to tempt people to disobedience so that they incur the death sentence (Rom. 7:11). In Rom. 7:1-4 the law is depicted as a husband to whom his wife (the believer) is bound as long as they both live; the husband's death frees her from that bond and enables her to marry another, namely, the risen Christ.

Galatians 3:23-25 shows that the law has a temporary custodial function in the divine purpose, until the "coming of faith." This "coming of faith" may be understood as an event both in salvation history and in the lives of individual believers. In salvation history it coincides with the appearance of Christ, in whom the parenthetic reign of law ended so that the age of faith, i.e., the age of the fulfillment of the promise to Abraham, might begin. In the lives of believers the "coming of faith" coincides with their abandonment of the attempt to establish their own righteous standing and their acceptance from God of the righteousness received through faith in Christ. The law is compared to the slave (*paidagōgós*, RSV "custodian") who accompanied the freeborn boy wherever he went and exercised a disciplinary responsibility over him until he came of age. With the dawn of faith the people of God come of age spiritually and have no further need of a custodian: they are set free from law.

Liberation from law involves redemption from the curse that the law pronounces on those who fail to keep it (Dt. 27:26). This redemption is effected by Christ's bearing the curse in His people's place (21:23), and it results in their receiving by faith the gift of the Spirit, with the liberty that He conveys (Gal. 3:10-14).

Although converts from paganism had not been under law in the same sense as converts from Judaism (like Paul himself), Paul viewed the two groups as sharing essentially the same preconversion bondage; the lives of both had been regulated by "the elemental spirits [*stoicheía*] of the universe" (Gal. 4:3, 8-10). These seem to be forces that hold in thrall the souls of people who follow their dictates, but lose their potency as soon as these souls are emancipated by the grace of God and the power of His Spirit.

F. Personal and Apostolic Liberty. As the servant of one Lord, Paul would not accept the dictates of anyone else nor submit to anyone else's assessment (cf. 1 Cor. 1-3). He was under an absolute obligation to preach the gospel, and that among the Gentiles, but he was allowed great liberty in the way that he fulfilled his commission. He could decide whether to live at his own expense or at the expense of those among whom he ministered; and in general he was the most adaptable of persons, living among Gentiles as a Gentile and among Jews as a Jew, so that he might convert as many as possible of both groups. "Though I am free from all men, I have made myself a slave to all, that I might win the more. . . . I have become all things to all men, that I might by all means save some. I do it all for the sake of the gospel, that I may share in its blessings" (1 Cor. 9:19, 22f.; cf. vv. 1, 18). It was these words that Luther had in mind when he opened his treatise on *The Liberty of a Christian* with two propositions: "A Christian man is a most free lord of all, subject to none. A Christian man is a most dutiful servant of all, subject to all."

Christian liberty in Paul's eyes, whether for himself or for others, is subject to only one limitation — Christian charity. But this limitation must be self-imposed. How Paul presented it may be seen in his admonition to the Corinthian Christians about eating the flesh of animals sacrificed to pagan divinities (1 Cor. 8:1-13; 10:23–11:1) and in his words to the Roman Christians about avoiding certain kinds of food or observing special days (Rom. 14:1–15:6). These were matters of utter indifference both ethically and religiously; no one had the right to restrict another's liberty with regard to them. But Christians might, and indeed should, restrict their liberty voluntarily if it were evident that by its exercise damage was likely to be done to the consciences of more scrupulous Christians who believed it wrong to eat certain kinds of food or to be lacking in respect for certain holy days. The restriction, however, must be voluntary; the scrupulous should not curb the freedom of those whose conscience was more emancipated, any more than the emancipated should force on the scrupulous a degree of liberty for which they were not yet ready.

G. Defense of Liberty. In his insistence on Christian liberty Paul found himself at times waging a war on two fronts. Legalism was an enemy of liberty (cf. Gal. 2:4), but so was license. This dual conflict appears clearly in the Corinthian correspondence. Some members of the church of Corinth, possibly in reaction to the moral laxity for which the city was notorious, wanted to impose a general rule of celibacy whether or not a person had that exceptional vocation (1 Cor. 7:1). Others, at the opposite extreme, believed that bodily activity of any kind was morally irrelevant. Their watchword was "all things are lawful" — including, it seems, fornication (6:12-20). Paul had to insist that freedom from law did not mean freedom to sin (e.g., Gal. 5:13; cf. 1 Pet. 2:16); that would be exchanging one form of bondage for another. Moreover, proponents of such an argument had failed to grasp the first principles of the gospel (Rom. 6:1-19).

H. Consummation of Liberty. The whole creation, of which the human race forms part, was created good but has been subjected by sin to frustration and futility, change and decay. Christians have been redeemed from bondage and now enjoy "the glorious liberty of the children of God," which will reach its consummation in the resurrection age (Rom. 8:19-23). It will then be shared by all creation.

It is no accident that the redemption of creation coincides with the redemption of the human body — the part of humanity that belongs to the material order. The first man, Adam, was put in charge of the "lower" creation and involved it in his fall; the "second man," Christ, through His redemptive work has broken the entail of the fall not only for humanity but also for the dependent creation. Even now human beings who, by selfish exploitation, can turn the good earth into a dustbowl, can by responsible stewardship make the earth blossom like the

rose. What might a totally redeemed humanity not achieve in this realm? Paul's words imply not the annihilation of the present universe but its transformation, so that it may fulfil the purpose for which it was created.

F. F. BRUCE

LIBNAH lib'nə [Heb. *liḇnâ*].

1. A desert camp of the Israelites between Rimmon-perez and Rissah (Nu. 33:20f.), perhaps the same as Laban (Dt. 1:1; cf. BDB).

2. A town in the Shephelah of Judah (Josh. 15:42) that Joshua captured (10:29-31; 12:15). It also appears in the list of Levitical cities given to the descendants of Aaron (21:13; 1 Ch. 6:57 [MT 42]). Libnah joined the rebellious Edomites in a revolt against Jehoram king of Judah (2 K. 8:22), apparently due to Jehoram's evil reign (2 Ch. 21:10). Sennacherib king of Assyria besieged Libnah during Hezekiah's reign, when Judah seems to have controlled the city once again (2 K. 19:8; Isa. 37:8). The wife of King Josiah was "Hamutal the daughter of Jeremiah of Libnah"; her sons were Jehoahaz and Zedekiah (2 K. 23:31; 24:18; Jer. 52:1).

Libnah probably was a border stronghold of Judah, but its exact site is unknown. Eusebius (*Onom.*) described it, under the name Lob(a)na, as near Eleutheropolis (Beit Jibrîn). On the basis of the excavations of F. J. Bliss and R. A. S. Macalister, Libnah was associated with Tell eṣ-Ṣâfî, situated at the entrance of the valley of Elah. Contemporary scholars, however, have tended to locate Libnah at Tell Bornāt, about 8 km. (5 mi.) farther south.

K. G. JUNG

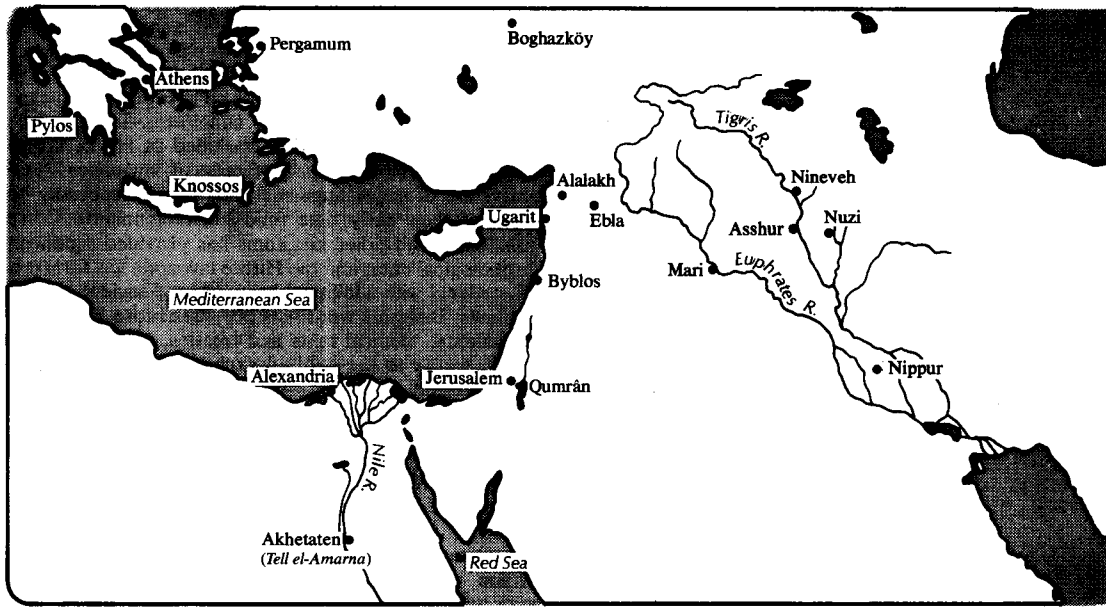
LIBNI lib'nī [Heb. *liḇnî*]; **LIBNITES** lib'nīts [Heb. *halliḇnî*].

1. Son of Gershon and eponym of the Libnites, who were one of the two divisions of Gershonite Levites (Ex. 6:17; Nu. 3:18, 21; 26:58; 1 Ch. 6:17, 20 [MT 2, 5]).

2. Son of Mahli and descendant of Merari, the head of another division of the Levites (1 Ch. 6:29 [MT 14]).

LIBRARY. A collection of writings and other artistic compositions arranged for use. Libraries in antiquity existed as temple, municipal, and private collections and, unlike modern libraries, consisted perhaps entirely of written works. In a limited but no less accurate sense, a book such as the Vedas or the Bible is a library. This article is concerned specifically with ancient libraries of works pertinent to biblical studies.

I. In the Bible
II. In the Ancient Near East
III. In Greece and the Roman Empire



I. In the Bible.–The English Bible does not contain the word "library" but does mention collections of writings several times. The "book of the covenant" (Ex. 24:7) may have been a collection of laws that were revealed to Moses. It is not clear whether the "book of the law" that Hilkiah found in the temple (2 K. 22:8) was the Torah, hence a collection of the five books of Moses, or a composition of the Deuteronomist. The "Book of the Wars of the Lord" (Nu. 21:14) and the "Book of Jashar" (Josh. 10:13; 2 S. 1:18) may have been collections of stories.

More certain are the official records of the kings, such as the acts of King David recorded in the "Chronicles of Samuel the seer, and in the Chronicles of Nathan the prophet, and in the Chronicles of Gad the seer" (1 Ch. 29:29). The "chronicles of King David" (27:24) may refer to the same collection. In the same category should be placed the "book of the acts of Solomon" (1 K. 11:41), the "Book of the Chronicles of the Kings of Israel" (14:19), the "Book of the Chronicles of the Kings of Judah" (v. 29), the "Book of the Kings of Israel" (1 Ch. 9:1), the "Book of the Kings of Judah and Israel" (2 Ch. 16:11), the "Book of the Kings of Israel and Judah" (27:7), the "Book of the Chronicles" (Neh. 12:23), and the "book of the records" (Ezr. 4:15; cf. "the royal archives there in Babylon," 5:17; 6:1). Esther mentions the "Book of the Chronicles" (2:23), the "book of memorable deeds, the chronicles" (6:1), and the "Book of the Chronicles of the kings of Media and Persia" (10:2).

The men appointed to describe the land to Joshua "set down in a book" their information (Josh. 18:9). Joshua wrote the words of the covenant "in the book of the law of God" (24:26). There is no indication that these were placed in a depository, although this is a reasonable assumption. The instruction to Isaiah, "Go, write it before them on a tablet, and inscribe it in a book, that it may be for the time to come as a witness for ever" (Isa. 30:8), implies that the book was preserved "for the time to come." The command to Jeremiah, "Write in a book all the words that I have spoken to you" (30:2), in context also requires that the book be preserved (cf. 45:1; 51:60, 63 [although this last reference suggests the end of that book's useful existence or perhaps is a symbolic expression of the end of the people to whom it was given]). The well-known account of the burning of Jeremiah's scroll by Jehoiakim and the subsequent command to Jeremiah to rewrite it (Jer. 36, esp. v. 28) clearly indicate that the words were of more than ephemeral value and thus would have been preserved in some kind of "library."

The *ʾᵃrôn*, "chest, ark," which was kept first in the tabernacle and later in the temple, may have served as a repository for documents. Heb. *ʾᵃrôn* is used for the ark of the covenant (e.g., Nu. 10:33) and for the ark of testimony (e.g., Ex. 25:22). It is also applied to the chest for offerings in the temple (2 K. 12:10) and to the mummy case of Joseph (Gen. 50:26). Possible support for this theory is found in the fact that Gk. *kibōtós*, "chest," renders *ʾᵃrôn* in the LXX but elsewhere also renders terms for archives (LSJ, *s.v. kibōtós*). The great sanctity of the ark and its location in the most holy place, however, make it an unlikely place for storing frequently used documents. More reasonable would be a depository set aside for this purpose in the temple. For example, the decree that gave Simon authority to be king and high priest was to be inscribed on bronze tablets, copies of which were to be kept "in the treasury" (*en tǫ̑ gazaphylakíǫ̑*, 1 Macc. 14:49). The same basic word is found in the LXX of Ezr. 5:17 (*en oíkǫ̑ tḗs gázēs*), where "royal archives" renders Aram. *bêṯ ginzayyā'*, "treasury."

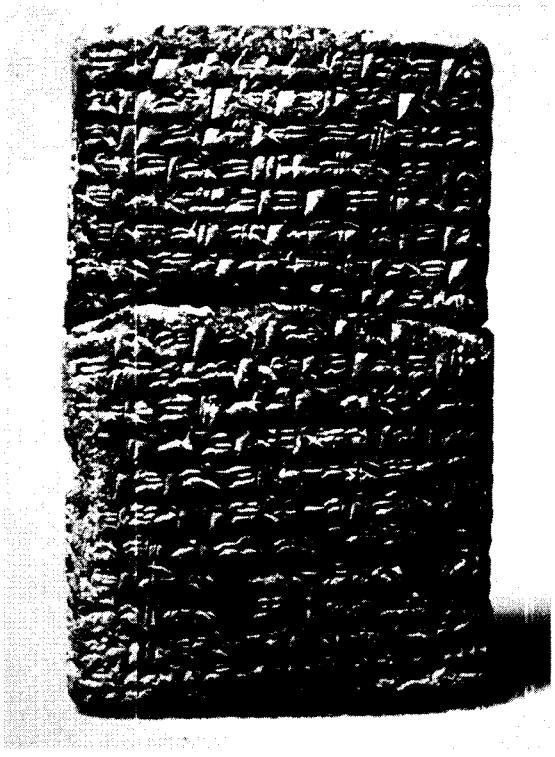
The OT terms for types of written works are *diḇrê*, "acts/affairs of" (1 Ch. 29:29), commonly used with the meaning "words of;" *diḇrê hayyāmîm*, "daily acts," "diary, journal, chronicles" (1 K. 14:19); *sēp̄er diḇrê*, "the book of, the acts of" (1 K. 11:41); and similar combinations with *diḇrê*. The LXX translates this word by *lógoi*, "matters, words" (1 Ch. 27:24), and by *rhēmata*, "sayings,

words" (1 K. 11:41); the latter does not convey the meaning of the Hebrew as fully as does *lógoi*. In the NT Gk. *práxeis*, "activities, acts," occurs in the title of Acts. *Biblía*, "books, collection of books," and *membránai*, "parchments," are found in 2 Tim. 4:13. *Ta biblía*, "the books," was the common title used for the Bible (2 Clem. 14:2), whence the English word. This usage shows that a book which is a collection of writings can be a "library."

II. In the Ancient Near East.–The following survey of ancient libraries helps to sustain some of the above statements concerning collections of documents and their storage as well as to present more background for biblical studies.

The libraries of Tell Mardikh (Ebla), Tell Fārah (Shuruppak), and Tell Abu Ṣalabīḫ (near Nippur), dating to the middle of the 3rd millennium B.C., have provided a wealth of material concerning collections at that early date. At TELL MARDIKH about twenty thousand tablets and fragments have provided data about administration, commercial activities, language, geography, and religion, and in addition have expanded the knowledge of libraries. The tablets were found in a room in the royal palace; their arrangement showed that they had been stacked on shelves according to categories (*see* picture in CANAAN). Lexical texts, many of them bilingual (Eblaic and Sumerian) and preserved in several copies, not only provide the meanings of many words but also exhibit an acrographic arrangement, i.e., the words, written in a cuneiform syllabary, are arranged according to the initial sign of the words.

Perhaps most important is the evidence that there were scribal schools at Tell Mardikh, Tell Fārah, and Tell Abu Ṣalabīḫ that were somehow related. Copies of the same texts written in the same hands were found at each place. Ebla and probably Tell Abu Ṣalabīḫ and Tell Fārah were cultural centers. The scribal school was headed by an *ummia*, "expert," and included the *dubẓuẓu*, "knower of tablets," "teacher," and *dubsar*, "scribe," "student." Student exercises and copies of translations of texts indicate that the student-scribes not only were learning their profession but also were collecting, translating, and duplicating texts. One bilingual tablet with eighteen duplicates lists nearly one thousand translated words. Another contains the names of 289 cities. Lists of animals, birds, fishes, professions, and personal names were found in the trove. Thus many of the elements of a true research library were present several centuries before Abraham in the region spanning southern Mesopotamia and northwestern Syria.



In the 2nd millennium (and possibly earlier in some instances) many places in the Near East had libraries. NIPPUR, 150 km. (90 mi.) SE of Baghdad, has given up thirty thousand to forty thousand tablets, including almost four thousand Sumerian literary works. The city, with its important "academy" (Sum. é-dubba(k), lit. "tablet house"), was Sumer's cultural center. Nippur's history can be traced to 4000 B.C. and its cultural prominence to the early 3rd millennium.

At MARI (Tell el-Ḥarîrī) on the Euphrates, 320 km. (200 mi.) NW of Baghdad, excavations have brought forth the royal archive consisting of about twenty thousand tablets, some in Hurrian, some in both Sumerian and Akkadian, but the majority in Babylonian similar to that of Hammurabi's law code. Some of the later correspondence includes letters exchanged by Zimri-Lim, who completed the building of the palace at Mari, and Hammurabi of Babylon. Mari may have been settled as early as 2600 B.C.

At Alalakh (Tell ʿAṭshânah) in northwestern Syria on the bend of the Orontes, between Aleppo and the Mediterranean, nearly five hundred tablets from the 17th to 15th cents., written in a Babylonian dialect, have been discovered. L. Woolley, the primary excavator, said that these were "only the chance survivors of a vastly greater number" (*Forgotten Kingdom* [1953], p. 64), but they have been of considerable importance for chronological studies.

Excavations at NUZI (Yoghlan [often Yorgan] Tepe, near modern Kirkûk), about 750 km. (470 mi.) to the east, have yielded approximately five thousand tablets dating from the 15th and 14th centuries. Nuzi, a province of the Mitanni, was mentioned in the Mari Texts, and in the Old Akkadian period it was known as Gasur. The Nuzi Texts include contracts of various kinds that have aided our understanding of a number of customs found in the patriarchal narratives of the OT (although not to the extent that some scholars have claimed).

LIBRARY

Two tablets from the Alalakh library. Above is a treaty between Idrimi and Pilliya; below is a tablet in its envelope (D. J. Wiseman)

The history of the HITTITES is very complex, like their language (which is really about eight languages). The excavations at Hattusas (Boghazköy) in central Anatolia yielded about ten thousand tablets of many genres in Nesian ("Hittite"), Babylonian, and four other languages, written in Babylonian syllabic cuneiform. Since at least some of the languages often classified as Hittite are related to the Indo-European family of languages, these tablets are of major linguistic importance, especially because of their early date (mid-2nd millennium). Correspondence with other kingdoms has provided significant chronological data, and the Hittite law code has furnished OT students with additional knowledge of ancient customs and laws. Bilingual word lists provide Hittite-Babylonian equivalents. Medical texts and treaties, chiefly in Babylonian, testify to the cultural exchange in the Near East of that period.

Closely connected with the Hittite library at Boghazköy are the several hundred tablets from Tell el-Amarna in Egypt (*see* AMARNA TABLETS). Found at the capital of Amenhotep IV (Akhenaten), these tablets in cuneiform Babylonian give further proof that this dialect was the lingua franca of the period. Most of them are diplomatic correspondence between the Egyptian rulers Amenhotep III and Amenhotep IV and the allied states that bordered on or were vassals within the Asian portion of the Egyptian empire. Chronological synchronisms are thus established with Kadašman-Enlil I and Burnaburiaš II of the Kassite dynasty in Babylon, with Aššur-uballit I of Assyria, with Tušratta of Mitanni, with Šuppiluliuma of the Hittites, and with an unnamed king of Alašia (Cyprus). Details of vassal rulers in Jerusalem, Byblos, Tyre, Sidon, Qatna, Hazor, and other places in Syro-Palestine can be extracted from this correspondence. The archive was apparently a closed file, most or all of which had been brought from Karnak when Amenhotep IV (Akhenaten) relocated his capital at Akhetaten.

UGARIT (Râs Shamrah) furnished evidence of a royal library and also of a private library that was located in the house of the chief priest (*rb khnm*) in the heart of the temple quarter. Because the private library included mythological and religious texts, some in Hurrian, in addition to vocabularies, syllabaries, and school exercises, it may have been a seminary for training priestly scribes. Excavations indicate that Ugarit was occupied at various periods from *ca.* 6500 B.C. to Roman times, but the thousands of tablets of literary material discovered there date only from the 18th to 13th centuries.

These tablets have contributed immensely to our knowledge of OT language and religion (see esp. the publications of M. Dahood, e.g., *Psalms* [3 vols., *AB*, 1965-70]). Significant among them is a lexical list in four languages. Most of the texts are mythological compositions written in alphabetic cuneiform and documents in the Babylonian lingua franca written in Middle Babylonian syllabic cuneiform.

The alphabet comprised twenty-seven phonemes and the *'aleph-'ileph-'uleph* vocalizations of *'aleph*. The order of the letters, as attested by several copies, is: *a, b, g, ḫ, d, h, w, z, ḥ, ṭ, y, k, š, l, m, ḏ, n, ẓ, s, ', p, ṣ, q, r, ṯ, ġ, t, i, u, ṡ*. It is a reasonable assumption that the Phoenician alphabet, from which the Hebrew and Aramaic alphabets (as well as the Greek) were derived, dropped the unneeded phonemes from the alphabet represented at Ugarit.

The discovery of a library at Pylos in the Peloponnesus indicates a degree of uniformity in the "library science" of the ancient Near East. The tablets (more than twelve hundred) were written in Linear B and belong to the same general category as the four thousand found at Knossos and the limited number uncovered at Mycenae, Tiryns, and other places associated with the Minoan and My-

cenaean civilization. Linear B is written in a syllabary (vowel, or consonant + vowel) of about ninety signs, fifty-nine of which were frequently used (*see* picture in GREECE). Thus it was an improvement over the considerably larger syllabary of the Akkadian language but not as advanced as the alphabet at Ugarit. Thirty different scribal hands have been identified at Pylos and perhaps seventy-five at Knossos. The language has been identified as an early form of Greek, and the system of writing was in use *ca.* 1500-1200 B.C. Apparently a "dark age" followed, for there are no literary remains, and then the Phoenician alphabet was introduced for writing Greek.

Most of the Pylos tablets were kept in an archives room, which contains the remains of shelves, hinged wooden chests, and baskets used for storing the tablets. Since the tablets were dated by month and day, but with no indication of year, it is supposed that the tablet room contained the current year's records. Tablets were found at other locations in the palace.

The link between the alphabetic cuneiform of Ugarit and the linear script of the Phoenicians is probably to be found at Byblos (Gubla, Gebal; *see* GEBAL 1), where artifacts have shown experiments with several types of alphabet. No remains of a library have yet been discovered there, however (cf. M. Dunand, *Biblia grammata: Documents et récherches sur le développement de l'écriture en Phénicie* [1945]).

This survey of the major second-millennium libraries should not close without mention of the Kassite library of Tiglath-pileser I in the temple at Asshur. Much of its contents was taken in the sack of Babylon. For too long the Kassite period has been considered a dark age. It is now recognized that it was a time not only of collecting and arranging many literary documents but also of composing creative works. Before this period authors were anonymous and possibly reworked earlier compositions to a marked degree. C. J. Gadd wrote: "But the Kassite scribes, who begin to take on a degree of individuality, are far different characters. Shadows appear of great names, authors and scholars, whose memory was kept alive and honoured by descendants in the same professions. To such men can be attributed not merely the study, the textual fixation, and the exegesis of traditional works, but more original scholarship than can be actually identified with any other age" (*CAH*, II/2 [1975], 42).

The great library of Ashurbanipal at NINEVEH is doubtless the best known of ancient libraries. Excavated by A. H. Layard in 1845-1851, it is the oldest of the discoveries. Its "K" collection consists of more than twenty thousand tablets and portions of tablets, including nonliterary and literary texts. The nonliterary tablets include administrative texts, letters, public legal documents (e.g., law codes), and private legal documents (contracts, etc.). The literary tablets comprise religious texts, omen literature, royal inscriptions, epics and wisdom literature, and various other genres. There are lexical lists, lists in two or three languages, king lists, *limmu*-lists, annals of various kings, and lists of animals, birds, fishes, plants, stones, and place names.

At one time scholars thought that Ashurbanipal's library was the beginning of such collections, but later studies showed that it was the culmination of a long history of collecting, editing, translating, duplicating, and preserving documents. Tablets were kept on shelves, sometimes stored in baskets with clay labels (*étiquettes*). Multitablet texts had "catch-lines" at the beginnings of tablets, consisting of a few significant words from the end of the preceding tablet to facilitate arranging the tablets in order. It is very significant that Ashurbanipal had his agents search out documents already of great antiquity, so that Sumerian, early Babylonian, and other compositions were gathered, copied, and translated in a kind of seventh-century-B.C. renaissance that resembles what the Arabs did in the 9th cent. A.D.

A vast amount of literature from Egyptian libraries of the 3rd and 2nd millennia B.C. has been preserved, much of it written on the walls of buildings and tombs or on the inner sides of coffins. Egypt had scribal schools, where boys' instruction, enforced with many beatings, began when they were four and lasted twelve years. The student-scribes not only learned to write beautiful hieroglyphs on pieces of pottery or limestone but also copied extracts from the classics on papyrus. Works to be preserved were marked "to be kept in the archives of the governor" and then were given to the chief librarian of the relevant department, who placed them in jars and cataloged them (cf. A. Erman, *Life in Ancient Egypt* [1894], p. 114; for a translation of the 2nd Ger. ed. [not done in Eng.] see *La Civilisation égyptienne* [1952], p. 150 and figs. 139f.). Some scrolls have been found in temples, and a large quantity was discovered at el-Lahun (cf. H. E. Winlock, *Treasure of el Lahun* [1934]).

Extant Egyptian documents also include the Pyramid Texts of the 1st to 8th Dynasties (first half of the 3rd millennium B.C.), royal decrees of the 6th Dynasty (2600-2450), public records of the 20th Dynasty (1200-1090), and medical papyri of the 12th and later Dynasties found at Illahun (A. Gardiner, *Egyptian Grammar* [3rd ed. 1957], pp. 1-24). These texts, the great literary compositions of the Middle Kingdom (*ca.* 2000), and treatises on mathematics, architecture, and astronomy (sciences brought to an advanced state in Egypt) required some method of preserving and retrieving knowledge of previous generations. But no excavations (except at Tell el-Amarna) have produced ancient archives like those of other areas of the Near East.

Knowledge of ancient Egyptian libraries is consequently sparse. One record mentions "the land of the collected works of Khufu" (4th Dynasty). A small temple chamber at Edfu has a book catalog inscribed on a wall (H. Brugsch, *History of Egypt* [1881], I, 240). The Silsileh stele and possibly the Papyrus Harris (20th Dynasty, *ca.* 1000 B.C.) refer to libraries. Diodorus Siculus (1st cent. B.C.) described a library of Osymandyas (Ramses II, *ca.* 1304-1227) that was supposedly located at the Ramesseum in Thebes (*Library of History* i.47). The Amarna Tablets (14th cent.) mention "the place of the records of the king."

The Aramaic documents recovered at Elephantine, Egypt, date from the 4th cent. B.C. and are written on papyrus in the official Aramaic that had replaced Babylonian as the lingua franca of the Persian Empire. These documents represent only one or two genres. *See* ELEPHANTINE PAPYRI.

The extant DEAD SEA SCROLLS were found in caves near Qumrân, some of them in jars apparently made for preservation of MSS. The excavations at Khirbet Qumrân have revealed a library and scriptorium. The library, which might better be termed a reading room, is about 5 by 9 m. (16½ by 29½ ft.) and has a low clay bench around its sides and a receptacle in the wall that is believed to have held water for ritual washing of the hands after handling of the Scriptures. On the floor above the reading room was the scriptorium, attested by the remains of what seem to be large desks of clay, benches, and inkwells. In this room the scribes produced whatever scrolls were actually written at Qumrân (see R. de Vaux, *Archaeology and the Dead Sea Scrolls* [rev. Eng. tr. 1973], pp. 29-33; F. M. Cross, *Ancient Library of Qumran* [1961], pp. 66f.).

Among the Israelites religious literature was long known and passed on from generation to generation. Theories

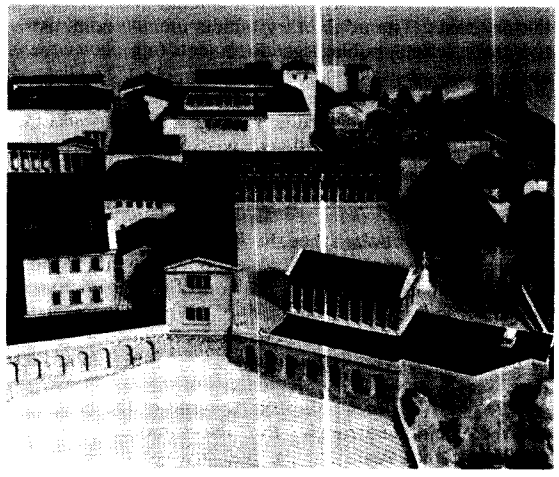
that this literature existed solely as oral tradition are being seriously challenged, particularly in view of the large number of archives antedating and contemporary with the Israelites. Later, as shown in I above, the temple was the repository of documents. It is reasonable to assume that this practice, too, had a long previous history, possibly dating back to the tabernacle (cf. Ex. 25:16, 22; Nu. 10:33).

W. S. LASOR

III. In Greece and the Roman Empire.–The tyrants Pisistratus of Athens and Polycrates of Samos (6th cent. B.C.) founded the first Greek public libraries, according to Gellius (*Noctium Atticarum* vii.17.1f.) and Athenaeus (*Deipnosophistae* i.3.A), but these sources are late (2nd and 3rd cents. A.D.). The book trade in Greece was well developed in the time of Pericles (5th cent. B.C.), although private libraries like those of Euripides, Plato, and Aristotle were still unusual (Hessel, p. 3). Aristotle's pupils may have consulted a library at his school (excavations show that the school could have accommodated one [Jackson, p. 7]). His student Alexander the Great, like earlier Macedonian kings, had a private library. The island of Cos, where Hippocrates lived, may have had a medical library by the early 4th cent. B.C. (Jackson, p. 9; see quotations in Platthy, pp. 146-48). Athens' libraries were so numerous by the 3rd cent. B.C. that the historian Timaeus, exiled from Syracuse, could research there for fifty years (Polybius xii.25.D-H). Libraries and the book trade depended mainly upon the labors of literate slaves, who individually copied MSS or as a group took dictation to produce multiple copies (Jackson, p. 7).

The literary center of the Hellenistic world was Alexandria. Its great library was founded, perhaps as an adjunct to the museum, by Ptolemy I Soter (d. *ca.* 283 B.C.) and Ptolemy II Philadelphus, with Demetrius of Phalerum as adviser. Ptolemy II's request that the Jews make copies of their own literature for the library (Tertullian *Apol.* xviii) led, according to the Epistle of Aristeas, to the production of the SEPTUAGINT. In the 3rd cent. B.C. a secondary library was established at the Serapeum, perhaps to hold duplicates and inferior rolls overflowing the main library. Early estimates of the library's size vary from 100,000 to 700,000 rolls (Edwards, pp. 20 n., 21).

The Ptolemies ruthlessly ensured the library's growth. Ptolemy III Euergetes (ruled 247-222) seized the books of travelers and kept those needed by the library, returning cheap papyrus copies to the owners (G. Sarton, *History of Science,* II [1959], 143f.). He gave the famine-stricken Athenians a deposit of fifteen silver talents in order to borrow the state MSS of Aeschylus, Sophocles, and Euripides; he forfeited the deposit by returning copies and keeping the originals (Galen *Comm. II in Hippocratis Epidem.* iii.239f.).



The Alexandrian collection was renowned not only for its size but also for its quality, achieved by the efforts of the scholar-librarians. These men had to identify and edit the MSS as well as to catalog and arrange them (Sarton, pp. 144f.). The standard texts produced in Alexandria made that city the center of the book trade until Caesar's time (Hessel, p. 4). Callimachus of Cyrene, a library associate, wrote the *Pinaces,* an elaborate catalog of the library's holdings that included biographical and critical information and became the model for all ancient bibliographies (Sarton, pp. 151f.; Hessel, p. 5).

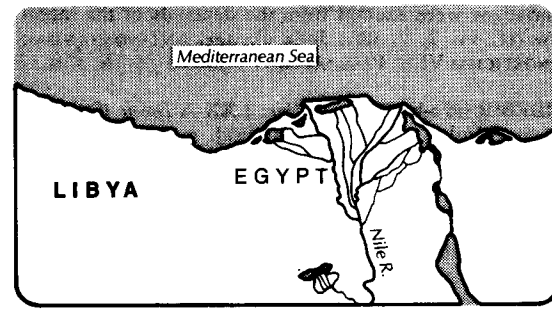
Julius Caesar burned the Alexandrian library while attacking the city in 47 B.C., according to Plutarch (*Caesar* 49.3f.). Probably the damage was partial (Seneca estimated it at forty thousand volumes [*De tranquillitate animi* ix.5]); perhaps only books stored at the harborside burned (cf. Dio Cassius *Hist.* [*LCL*] xlii.38; Jackson, pp. 16f.; Savage, p. 10). But Mark Antony's reported gift to Cleopatra of the Pergamum library (41 B.C.) may indicate that replacement books were needed in Alexandria (Plutarch *Antony* 58.5–59.1; Plutarch called his source unreliable). In A.D. 272 Emperor Aurelian razed much of the Brucheion quarter of Alexandria, and with it perhaps the main library. The library of the Serapeum, thereafter the more important one, was probably destroyed in 389 on the urging of Theophilus bishop of Alexandria, who opposed pagan literature.

Alexandria's rival was the library of Pergamum in Asia Minor, founded by Attalus I (241-197 B.C.) and enlarged by his successor, Eumenes II. Pliny's report that parchment (Gk. *chárta pérgamena*) was invented because the Alexandrian kings would not export papyrus for book copying (*Nat. hist.* xiii.21 [70]) is factually inaccurate (*see* PARCHMENT). But rivalry did exist between the Ptolemies and Attalids, as shown by Eumenes' effort to hire an Alexandrian librarian and famed philologist, Aristophanes of Byzantine; Ptolemy V kept the librarian by imprisoning him (Savage, p. 13). Attempting to enlarge their collection to Alexandrian size, the Attalids seized private libraries (on the concealing of Aristotle's library from these kings, see Strabo *Geog.* xii.1.54f.). They also increased book production, at the expense of accuracy and even authenticity (Savage, p. 13; Platthy, p. 162). The Pergamum collection given to Cleopatra numbered 200,000 books (Plutarch *Antony* 58.5).

The Pergamum library was probably the model in several ways for the libraries of Rome. When Crates of Mallos, first head of the Pergamum library, lectured in Rome (*ca.* 168 B.C.), the Romans became interested in scholarly study of Greek literature, to which their Greek slave-tutors had exposed them (Savage, pp. 14f.; Suetonius *De grammaticis* 2). Moreover, Roman libraries physically resembled the one excavated at Pergamum. Usual features were proximity to a temple (at Pergamum, Athena's) and a statue of the deity in the library itself. A colonnaded portico was typically the library's study (Hessel, p. 5). In adjacent rooms the labeled papyrus rolls were stored on shelves; Roman libraries usually had separate rooms for Greek and Roman literature. Discovered at Pergamum were stones inscribed with authors' names (e.g., Homer), which have been identified as labels for portrait busts

Part of the reconstructed model of the Athena temple complex at Pergamum. The temple itself is lower right, and the library to its left (Staatliche Museen zu Berlin, DDR)

or medallions; these portraits were probably placed by the storage areas of the depicted authors' work (Jackson, pp. 22f.). *See also* PERGAMUM.



The first libraries in Rome were the spoils of war. Aemilius Paulus reportedly gathered up the books of Perseus of Macedonia after defeating him at Pydna in 168 B.C. (see Platthy, p. 140). Lucullus's library, generously open to all Greeks in Rome (Plutarch *Lucullus* 42), was taken from Mithradates of Pontus, according to Isidore of Seville (7th cent. A.D.; see Jackson, p. 8). Sulla captured Athens in 86 B.C. and with it the library of Apellicon, which originally may have been Aristotle's (Strabo *Geog.* xii.1.54f.; cf. Plutarch *Sulla* 26.1f.). Cicero, his brother Quintus, and the publisher Atticus had private libraries; such collections became so popular even among nonliterary aristocrats that Seneca commented, "Nowadays a library takes rank with a bath-room as a necessary ornament of a house" (*De tranquillitate animi* ix.4, tr. J. W. Clark). The remains of a private library were uncovered at Herculaneum in 1752.

Julius Caesar, with the help of the wealthy scholar M. Terentius Varro, planned the first public library for Rome, but not until 39 B.C., five years after Caesar's death, did C. Asinius Pollio build one (cf. Savage, p. 16, and Jackson, p. 18, with *Oxford Classical Dictionary* [1970], *s.v.* "Libraries" [F. G. Kenyon and C. H. Roberts], on the connection between Caesar's plans and Pollio's library). The Roman emperors, notably Augustus, Trajan, and Hadrian, built public libraries in imperial cities like Athens as well as in Rome (which had twenty-eight by the late 4th cent. A.D.). Antioch of Syria, Ephesus (see classical attestations in Platthy, pp. 154-57, 170-73; *see* Plate 1), and most large provincial cities had public collections, to which wealthy citizens customarily contributed funds; authors gave their own works, with benefit of publicity for themselves. Since papyrus rolls exposed to air lasted two hundred years or less, libraries had their own copying schools and also bought from dealers. New authors as well as the old masters sold well (Jackson, p. 22). In the 1st and 2nd cents. A.D. parchment codices began to be used alongside papyrus rolls and became predominant by the 5th cent. (Sarton, p. 148).

Eusebius relied upon the Christian libraries of Jerusalem (founded A.D. 212) and Caesarea (existence attested 231-386) in composing his church history. Both libraries included books by Origen and other church fathers; the one at Caesarea, unusual among Greco-Roman libraries, had law literature (Jackson, p. 29; Platthy, pp. 176f.). The early Christians organized church libraries of Scriptures, polemics, and records, which Diocletian in 303 attempted to burn. Ten years later Constantine reversed this policy by encouraging production and propagation of Christian literature; his successors maintained libraries at Constantinople (Jackson, p. 29). In the East and West, church libraries (e.g., at Nola in Italy), monasteries like Benedict's Monte Cassino and Cassiodorus's Vivarium (both founded in the 6th cent. A.D. in Italy), medieval cathedral and court schools, and Arabic translations of Greek science and philosophy (made especially in ninth- and tenth-century Spain) preserved both Christian and classical literature for later generations. LIBYA lib'ē-ə, lib'yə [Heb. *lûḇîm* (2 Ch. 12:3; 16:8; Nah. 3:9), *luḇîm* (Dnl. 11:43); LXX Gk. *Libyes* (pl. of *Libyē;* RSV uses *Libyes* instead of Heb. *kûḇ* in Ezk. 30:5); NT Gk. *Libyē* (Acts 2:10)]; AV also LUBIM(S) (2 Ch. 12:3; 16:8; Nah. 3:9), CHUB (Ezk. 30:5). A land in northern Africa W of Egypt.

The location and significance of Libya are clear in the biblical text. A people called *rbw* occur in Egyptian texts of the 13th-12th centuries. (Since Egyptian writing had no character for *l* — *r* or *n* being used to represent the sound — *rbw* was probably pronounced "Labu.") This word apparently gave the Greeks the word *Libyē* and the Hebrews the word *lûḇîm*. Libyans raided Egypt sporadically in the 12th-10th cents., and were in the forces of Shishak ("Sheshonq" in Egyptian texts; 2 Ch. 12:3) and of Zerah (2 Ch. 14:9; 16:8). Shishak established a foreign rule over Egypt, quite possibly Libyan (cf. A. H. Gardiner, *Egypt of the Pharaohs* [1961], p. 324).

The relationship of the Lubim to the Lehabim is obscure. Put was the third son of Ham and a brother of Egypt (Gen. 10:6); Lehabim was the third son of Egypt (v. 13). But Heb. *miṣrayim* ("Egypt") and *l*ᵉ*hāḇîm* ("Lehabim") are almost certainly gentilics, i.e., names of peoples, not of individuals (the same can be said of many other names in Gen. 10). Thus a tradition linked Lehabim, Put, and Egypt (to name just these three) with Ham, making them Hamitic peoples. "Hamitic" has generally been used to designate the people, or at least the languages, of Libya.

In the NT Simon of Cyrene was from Libya (Mt. 27:32 par.; *see* CYRENE), and people from "the parts of Libya belonging to Cyrene" were among those who witnessed the phenomena at Pentecost (Acts 2:10). W. S. LASOR

LICE. The AV translation of Heb. *kēn, kinnîm* in Ex. 8:16-18 (MT 12-14); Ps. 105:31; *see* GNAT. The expression "picking lice" occurs in the NEB at Cant. 1:7. The MT *ʿōṭᵉyâ* (from the verb *ʿāṭâ*) can be translated literally "one who is veiled" (so RSV mg.) or, following a different verb of the same spelling, "one who delouses" (cf. Jer. 43:12; RSV "cleans [his cloak] of vermin"; NEB "scours [his clothes] to rid them of lice"; *see* VERMIN). The AV and RSV, following the Syr., Vulg., and Symm., emend the MT to *ṭōʿîyá*, "one who wanders" (so RSV).

LICENTIOUS; LICENTIOUSNESS [Gk. *asélgeia*]; AV LASCIVIOUSNESS, WANTONNESS (Rom. 13:13; 2 Pet. 2:18), PERNICIOUS (2:2), FILTHY (2:7); NEB also VICE, DEBAUCHERY, DISSOLUTE PRACTICES, SENSUALITY, INDECENCY, etc. Extreme indulgence in sensuality without regard for moral restraints.

The single Gospel occurrence of *asélgeia* is in Mk. 7:22, where Jesus lists it among the vices that come from the heart and defile a person. It occurs nine times in the NT Epistles, usually in the specific sense of sexual excess. Paul listed it among the "works of the flesh" (Gal. 5:19; cf. Rom. 13:13f.; *see* FLESH III.B). This vice was characteristic of pagans (Eph. 4:17-19; 1 Pet. 4:3); but the Epistles repeatedly warned that there was no place for such behavior in the Christian community (e.g., 2 Cor. 12:21; cf. Eph. 4:20-24) — a warning that was particularly urgent because "false prophets" (2 Pet. 2:1) were teaching that Christians were exempt from the demands of the moral law (cf. vv. 2, 7, 18f.; Jude 4). *See* ANTINOMIANISM; GNOSTICISM VI.C; PASSION II. N. J. O.

LIDEBIR lid·ə-bər [Heb. *liḏᵉḇir*; LXX A *Dabir* (followed by Syr., Vulg.), B *Daibōn*, L *Debēr*]. A city in the tribal inheritance of Gad (Josh. 13:26, RSV mg.). Lidebir is generally taken to be a scribal error for LO-DEBAR (so NEB). The suggestion that the *lamed* is possessive ("[the boundary] belonging to Debir"; cf. AV, RSV) requires a definite article on *gᵉḇûl* that the MT lacks. W. S. L. S.

LIE. To assume, or rest in, a horizontal position. In the OT it most often represents Heb. *šāḵaḇ*, "lie down" (e.g., in sleep, Ruth 3:4, 7f., 13f.; 1 S. 3:3, 5f.; etc.; or in death, Gen. 47:30; Lam. 2:21; Ezk. 32:21, 27-30; etc.). The common phrase *šāḵaḇ ʿim* ("lie with") is a euphemism for sexual relations; deprecatory in tone, the expression is generally used to describe an illicit or inappropriate sexual act, e.g., incest (Gen. 19:32-35; Lev. 20:11f.; Dt. 27:20, 22f.), adultery (Gen. 39:7, 10, etc.; Dt. 22:22f.; 2 S. 11:4), rape (Gen. 34:2; Dt. 22:25, 28; 2 S. 13:14), homosexual relations (Lev. 18:22; 20:13), and bestiality (Ex. 22:19 [MT 18]; Dt. 27:21). *See* CRIME.

Another OT verb, Heb. *rāḇaṣ*, usually connotes a lying down to rest or a state of repose (e.g., Gen. 29:2; Isa. 11:6f.; 14:30; Zeph. 2:7, 14; hiphil in Ps. 23:2; Ezk. 34:15). The expression "lie in wait," usually translating Heb. *ʾāraḇ* (e.g., Jgs. 9:32; 21:20; 1 S. 22:8, 13), refers to the AMBUSH as a method of warfare.

See *TWOT*, I, 68; II, 830, 921f. N. J. O.

LIE; LYING [Heb. *šāqar, šeqer, kāzaḇ, kāzāḇ, kāḥaš, kaḥaš, šāw'*–'emptiness, worthlessness' (Ps. 12:2 [MT 3]; 144:8, 11; Isa. 59:4); Aram. *kiḏḇā* (Dnl. 2:9); Gk. *pseúdomai, pseúdos, apseudḗs*–'free from deceit' (Tit. 1:2, "never lies")]; AV also FALSEHOOD, FALSELY, VANITY, LEASING (Ps. 4:2; 5:6 [MT 4:3; 5:7]), GUILE (Rev. 14:5), etc.; NEB also DECEIVE, "break my word," SHAM, etc.; **LIAR** [Heb. *kāzaḇ, ʾîš kāzāḇ* (Prov. 19:22), *šeqer* (Ps. 63:11 [MT 12]; Prov. 17:4), *baḏ* (Isa. 44:25); Gk. *pseústēs* (Jn 8:44, 55; 1 Tim. 1:10; etc.), *pseudḗs* (Rev. 21:8), *pseudólogos* (1 Tim 4:2)]; AV also LIE; NEB also WRONG, FALSIFY, FALSEHOOD, etc. A statement used with the intention of deceiving or defrauding. Not only the spoken word but also an action (1 Jn. 1:6) or an idol (Am. 2:4) may be called a lie.

From the very beginning of the OT people lied and were condemned for it. Eve accepted Satan's lie in the garden (Gen. 3). Cain killed his brother and then attempted to cover his sin with a lie (4:9). Thus lying became characteristic of humankind separated from God (e.g., Ps. 12:2 [MT 3]; 58:3 [MT 4]; 62:4 [MT 5]; cf. Jer. 9:5 [MT 4]).

From the earliest times lying was considered a breach of the moral code. The ninth commandment forbids lying, or bearing false witness (Ex. 20:16; Dt. 5:20). Both the OT and the NT consider telling the truth a religious obligation (e.g., Lev. 6:2-7 [MT 5:21-26]; 19:11; Ps. 5:6; Prov. 6:16-19; 12:19-22; Eph. 4:25; Col. 3:9). In the Sermon on the Mount Jesus stressed that a Christian's communication should be honest without the need of an oath (Mt. 5:33-37).

Many instances of lying are recorded in the OT. Some lies are motivated by fear for one's own or another's safety. Both Abraham and Isaac lied about their wives out of fear for their own lives (Gen. 12:10-20; 20:1-18; 26:6-11). By means of an elaborate deception the Gibeonites purchased their lives at the cost of the lowest form of slavery (Josh. 9). Samson lied to Delilah three times because he did not trust her (Jgs. 16:6-17). Sometimes lying is motivated by desire for personal gain or advantage. At his mother Rebekah's instigation, Jacob deceived his father Isaac in order to obtain the blessing intended for Esau (Gen. 27). Later Jacob himself was the victim of deception by his uncle Laban (29:15-30; 30:31-36). In other instances lies are used to cover up other sins. Jacob's sons used deception to conceal from their father that they had sold Joseph to Ishmaelite traders (37:26-33). In his attempt to conceal his adultery with Bathsheba, David went so far as to have her husband Uriah killed (2 S. 11).

In several instances the Scriptures appear to commend people for using deception to gain a desired end. By deception the Hebrew midwives preserved the lives of many Hebrew male babies while the Israelites were in Egypt (Ex 1:15-21). Rahab the prostitute saved the Israelite spies from certain death by hiding them and telling their pursuers that they had already left the city of Jericho; because of this act, which demonstrated her faith in Yahweh, Rahab and her family were preserved when the Israelites killed everyone else in Jericho (Josh. 2; 6:17, 22-25). Ehud deceived Eglon the king of Moab by using words that could be interpreted in two ways. After presenting tribute to Eglon, Ehud requested a private session to reveal "a message from God." The "message" was delivered in the form of a sword that Ehud thrust into Eglon's abdomen, thereby delivering the Israelites from Moabite oppression (Jgs. 3:15-30). Jael lured the exhausted Sisera into her tent with a promise of security and, after soothing him to sleep with warm milk, drove a tent peg through his head (Jgs. 4:17-22). She is praised for this act that destroyed a great enemy of Israel (5:24-27).

During the prophetic period of Israel's history, false prophets represented a significant threat to the faith and life of Israel as God's people. Isa. 9:15 (MT 14) lists them as the most despicable of all persons in Israel. Jeremiah

denounced them repeatedly and cited them as the cause of the Exile (e.g., Jer. 5:31; 14:14; 23:14, 25-32; 27:9f., 14-16). These condemnations are echoed in Ezekiel (e.g., 13:1-17; 22:28), Lamentations (2:14), and Zechariah (10:2; 13:3-6).

The NT warns that false prophets are also characteristic of the end time (e.g., Mt. 7:15; 24:11; 2 Pet. 2:1; 1 Jn. 4:1). They show signs but deliver a false message about the things of God (Mt. 24:24; Mk. 13:22; cf. Rev. 16:13f.; 19:20). *See also* PROPHECY, FALSE.

The NT presents the lie as a part of the struggle in the world between the forces of good and evil. God, as the personification of all that is good, cannot lie (Tit. 1:2; cf. Nu. 23:19; He. 6:18). Satan, however, is the father of lies, and his children may be known in the world by their lying (Jn. 8:44). Jesus warned His followers that their opponents would persecute them with lies (Mt. 5:11).

This struggle between the forces of truth and falsehood also bears upon Christians' lives. Eph. 4:25 exhorts Christians to put away lying and speak the truth with their neighbors. 2 Thess. 2:9-12 warns that unbelievers, because they have closed their hearts to the truth, will receive from the Lord a "strong delusion" that will "make them believe what is false." Rom. 1:25 characterizes such persons as having "exchanged the truth about God for a lie." Thus the absolute distinction between truth and the lie distinguishes Christians from non-Christians (1 Jn. 2:21-27). Those who deny that Jesus is the Christ are liars (v. 22). The anointing by the Spirit that Christians have received teaches them what is true and frees them from lies (v. 27).

The seriousness with which the early Church viewed the sin of lying is illustrated by the story of Ananias and Sapphira, who met with sudden death after Peter confronted them with having attempted to deceive the Christian community (Acts 5:1-11). A Jewish "false prophet" named Bar-Jesus was struck with blindness after Paul denounced him as a "son of the devil... full of all deceit" (Acts 13:6-11).

The book of Revelation depicts a time when Christians will finally be free from all deceit. The 144,000 who are blessed forever are found to have no lie in their mouth (14:5). No liars will profane the new Jerusalem (21:27). The deceiving devil and the false prophet will be destroyed (19:20; 20:10), as will all those who have lived the lie (21:8; 22:15).

Paul often uses the term "lie" in a formula affirming the truthfulness of his speech and the trustworthiness of his letters (Rom. 9:1; 2 Cor. 11:31; Gal. 1:20, 1 Tim. 2:7). He emphasizes that God knows that his speech (unlike that of the FALSE APOSTLES) is true.

In the NT Gk. *pseúdos* ("false") is often combined with other terms to describe those who pervert the truth or claim to be what they are not. Most common is *pseudoprophḗtēs*, "false prophet" (see above). *Pseúdos* is also joined to *adelphós* ("brother", 2 Cor. 11:26; Gal. 2:4), *apóstolos* ("apostle," 2 Cor. 11:13), *didáskalos* ("teacher," 2 Pet. 2:1), *mártys* ("witness," Mt. 26:60; 1 Cor. 15:15), *martyría* ("testimony," Mt. 15:19; 26:59), *martyréō* ("bear witness," Mt. 19:18; Mk. 10:19; etc.), *christós* ("christ," Mt. 24:24; Mk. 13:32), and *lógos* ("word"; RSV "liar," 1 Tim. 4:2). *See also* TRUTH.

D. W. WEAD

LIEUTENANTS (AV Ezr. 8:36; Est. 3:12; 8:9; 9:3). *See* SATRAPS.

LIFE. The most basic reality common to God and mankind, native to God and imparted by Him to His creatures, first by creation, then by redemption. Angels, plants, and animals constitute other orders of created life.

Hebrew terms include *nepeš*, meaning "soul" (that which animates the body), "breath," and by extension a living being (*nepeš ḥayyâ*, Gen. 2:7), also life in general (Dt. 30:19). Sometimes *nepeš* is linked with blood, the life of the flesh, hence the prohibition of eating blood (Lev. 17:10-12, 14; Dt. 12:23). It can also mean livelihood (Dt. 24:6).

Ḥayyîm is used somewhat more frequently. The reason for the plural form is uncertain. It may be due to the fact that it is an abstract noun with more than one possible frame of reference, including the plural term Elohim, i.e., God the Almighty. *Ḥayyîm* is frequently used in connection with the span of human existence (Gen. 23:1). One's experience can affect one's evaluation of life adversely (Job 3:20) or positively (Ps. 23:6). Its full import reaches beyond the limit of human existence, for one owes one's life to God and must answer to Him.

Hebrew *ḥayyâ* occurs with the meaning "living creature" (Ezk. 1:5). The verb *ḥāyâ* ("live") expresses the process of temporal existence (Gen. 5:3), but can also denote the quality of life as successful because one seeks to honor God's will as set forth in the commandments (Ps. 119:144). The adj. *ḥay*, "living" or "alive" (1 K. 3:22), has its counterpart in the Gk. *zōn* (Acts 1:3). Heb. *yāmîm* ("days") is used occasionally in a context indicating prolongation of life (1 K. 3:11).

Greek terms for life are principally *bíos, psychḗ*, and *zōḗ*. Of these, *bíos* is limited to the natural order. It is used of life span (Prov. 31:12, LXX) and of the financial resources essential for the sustenance of physical life (Lk. 21:4). It also involves such items as cares, riches, and pleasures (Lk. 8:14) or worldly goods (1 Jn. 3:17), and even life-style (1 Tim. 2:2). *Psychḗ* denotes self-conscious physical existence, corresponding to Heb. *nepeš* (Acts 20:10). *Zōḗ* can mean lifetime (Lk. 16:25). It also indicates life as the native possession of God (Jn. 5:26) and as His gift to mankind whereby people are able to feel, think, and act (Acts 17:25). In Acts 5:20 it is used as a substitute for the word "gospel." It often denotes life on the highest plane as redeemed and devoted to God (Jn. 10:10). It is the only term for life with which the adj. "eternal" is used (17:3). Occurring rather infrequently are *agōgḗ*, "manner of life" (2 Tim. 3:10); *anastrophḗ*, "way of life, conduct" (Gal. 1:13); *biōtikós*, "pertaining to ordinary life" (Lk. 21:34); *bíōsis*, "manner of life" (Acts 26:4); *zōopoiéō*, "make alive, impart life" (Rom. 4:17).

I. OT
II. Intertestamental Period
III. NT
IV. Conclusion

I. OT.–The opening words of Scripture presuppose the existence of God and go on to describe His activity in creation (Gen. 1:1). Although He is not described as the living God at an early point in the biblical text (Dt. 5:26 is the first such description), the delay may well indicate that there was no felt need to have this unique quality pointed out. It was a "given." God imparted life to His handiwork in all its forms, climaxed by the creation of mankind (Gen. 1:20–2:23). It is recognized that He alone has creative power (2 K. 5:7). Mankind is accountable to Him for the life He bestows. A stewardship is involved.

The folly of idolatry is increased by the fact that the images of human devising are inferior not only to the living God but even to those who fashion and worship them, for they lack the element of life. Human beings are not creators in the true sense of the word, for they are unable to impart to the objects of their craftsmanship the

breath of life they themselves have received from God (Ps. 115:2-8).

In the creation account the concept of life is associated with the breath of God imparted to the form He had molded (Gen. 2:7). Another approach is presented in the prohibition of eating flesh with the blood in it, on the ground that the life is in the blood (Gen. 9:4). The entire human family can be described as "all flesh" (Gen. 6:12), which emphasizes the physical aspect of mankind and may well hint at perishability also. An additional nuance is provided by texts in which "life" seems intended to denote life-style or the conditions under which one is obliged to live (Job 10:1).

With the fall came the disclosure that the tenure of human life would be limited, marked by toil, and terminated by death (Gen. 3:17-19). Nevertheless, a distinctive feature of the account of the antediluvians is the longevity ascribed to them, reaching 969 years in the case of Methuselah (Gen. 5:27). No formal explanation is given for this phenomenon, but a hint may be provided in the following chapter, in the statement that the wickedness of man was great in the earth (Gen. 6:5). The passage of time, however lengthy, did not improve the quality of human life. The earth was filled with violence and corruption (Gen. 6:11). It seemed that the human race was incapable of producing any considerable change. The enjoyment of long life on a personal basis, however, was promised to those who would cleave to God in loving obedience (Ps. 91:16). It should be noted that throughout Israel's history God's servants were reminded that their lives were in His hand. To suffer or to be at ease, to live or to die, must depend on the divine will. In connection with long life, it may seem strange that Daniel would say to King Darius, "O king, live for ever" (Dnl. 6:21 [MT 22]), but this was the conventional language of flattery that no one, including the king, took seriously (cf. Ps. 89:48 [MT 49]).

Long life in itself is not necessarily a blessing. Generally it is extolled because the quality of life is assumed to be good, characterized by divine favor and prospering. This is made clear by Ps. 91, where the culminating favor provided by God, long life (v. 16), is for one "who abides in the shadow of the Almighty" (v. 1). To the pious Hebrew, living meant more than the continuance of bodily strength and vitality. It meant fearing God and enjoying His favor because of obedience to His will (Dt. 8:1). The purpose behind the provision of manna for Israel in the wilderness was not merely that the people might live but also that they might come to know that mankind does not live by bread alone but by every word that proceeds out of the mouth of the Lord (v. 3).

The background of the story of Job is a debate between Satan and God. Permitted to strip Job of family and fortune, Satan had to admit after his failure that Job was still loyal to God, but he insisted that deprivation of health would lead Job to renounce God (Job 2:4). Given permission to afflict Job's body, Satan tried hard but failed. Job remained loyal to his Maker, despite his misery (7:16) and the mystery of being allowed to suffer grievously with respect to possessions, family, and his own person. He continued to cling to life when it seemed no longer worthwhile to do so. By refusing to curse God and die, he refuted the claim of the evil one.

The young king Solomon, given the privilege of asking God for anything he chose (1 K. 3:5), named wisdom rather than material things. To illustrate the penetrating quality of that wisdom, the sacred historian introduced into his narrative the story of two women who came before Solomon contesting the ownership of a baby. The king called for a sword to cut the child in half so that each woman could have a portion, knowing that the true mother would not consent but would offer to let the other woman take the child, so great was the mother's love and yearning that her child might live (1 K. 3:16-28).

The word "life" is occasionally used as a synonym for health. "A tranquil mind gives life to the flesh" (Prov. 14:30). Apparently there was awareness of the influence of the state of mind on the bodily condition.

Reverence for life as the divine intention in human relations is underscored in the sixth commandment: "You shall not kill" (Ex. 20:13). The verb has no object, but human beings are clearly intended (cf. Lev. 24:17). After the Flood, permission was given to kill animals for food (Gen. 9:3f.), so they are not in view in the Decalogue, nor is death that occurs in a war that is justified (Ex. 17:8-16; Dt. 20:13-18; 1 S. 17:50). What the commandment prohibits is murder. The death penalty is biblically based (Gen. 9:5f.; Nu. 35:33) and it magnifies both the importance and sacredness of human life as made in the image of God. Far from representing an inhumane attitude by calling for the death penalty, the commandment exalts the value of human life by protecting it.

By virtue of possessing divine revelation, Israel had a loftier evaluation of human life than its neighbors. The crucial point of distinction was the heathen practice of offering up human lives as a sacrifice to the gods. Among the reasons for Israel's exile to Assyria was their resorting to this practice (2 K. 16:3; 17:17). King Manasseh in particular is cited for burning his sons as an offering (2 Ch. 33:6; cf. v. 9).

Though life is the common possession of all mankind, there is a distinctive character to each individual. Each one reflects to some extent the physical features and characteristics of the parents, yet each individual life remains unique. This uniqueness in the physical realm is doubtless intended to be a reflection of the uniqueness of each individual person in the sight of God.

In OT days people coveted the experience of enjoying a combination of long life, health, and prosperity. These were promised to those who loved and obeyed God (Dt. 30:11-16; Ps. 91:14-16). The highest plane reached by OT saints, however, was not exclusively determined by their outward circumstances, for these were not to be compared to the joy of knowing God as the greatest possible blessing (Ps. 73:23-26). When David was in the wilderness of Judah and in a potentially dangerous situation, he had opportunity for soul searching. As a result he was able to say to God, "Thy steadfast love is better than life" (Ps. 63:3 [MT 4]).

Beyond reasonable doubt, however, people in those days shrank from the prospect of death, which involved a shift from the known to the unknown. When pronouncements are made about what death involves, the reader may well be uncertain whether these are based on revelation or human speculation. Job's declaration of confidence regarding his own future state (Job 19:25-27) was possibly based on his conviction that the fellowship he had enjoyed with the Almighty was so real and personal that he refused to concede that death could terminate it. David comforted himself over the death of his child, saying, "I shall go to him, but he will not return to me" (2 S. 22:23). Such an expression of confidence seems to involve more than the prospect of sharing Sheol. It breathes hope of personal reunion. This is in line with David's word in another connection: "As for me, I shall behold thy face in righteousness; when I awake, I shall be satisfied with beholding thy form" (Ps. 17:15; see also 16:9-11). An unbroken relationship with God tended to carry with it the assurance that death could not sever the relationship. It is

likely that "sleep," when used of one who has died, is intended to suggest relief from life's cares, pains, and sorrows rather than to connote lack of consciousness in the intermediate state.

It is important to keep in view the relationship between life and law. At the time of its emergence as a nation, Israel participated in an arrangement that was covenantal in nature. God chose Israel as His special people (Am. 3:2). This choice was a matter of His own initiative. It meant life and blessing for Israel (Dt. 30:15). But pursuant to this election God set before them the commandments and ordinances to test thir obedience (Lev. 18:5; Dt. 8:1). Failure on the part of Israel, especially in terms of acknowledging gods of human invention and worshiping them, would serve to curtail their enjoyment of the land of promise (Dt. 30:17-19). Such conduct would abrogate the covenant.

A special approach is found in the wisdom literature (chiefly Proverbs and Ecclesiastes), which was mainly concerned with life in this world rather than in the life to come. Basically its method was to resort to the observation of human life more than earlier Scripture had done. It tended to encourage the fostering of intellectual pursuits and achievements, focusing attention on the wise as an elite group and manifesting a somewhat condescending attitude toward the ordinary person. Yet it depended in part on the folk wisdom of the masses and on such use of earlier Scripture as would add an element of authority. Its keynote is found in the adage, "The fear of the Lord is the beginning of wisdom" (Prov. 1:7). Wisdom is described as a tree of life (3:18). The words of wisdom are life to the one who finds them (4:22).

The wisdom tradition continued into the intertestamental period, appearing especially in Sirach and the Wisdom of Solomon. It is noted that God set before Israel the covenant. "He . . . allotted to them the law of life" (Sir. 17:11) is an apparent reference to the Mosaic law. The writer of the Wisdom of Solomon asserted, "The righteous live for ever and their reward is with the Lord" (Wisd. 5:5).

The godly Israelite did not excel in excogitating his own ideas. Rather, he reflected on God's power and design in His creative handiwork and satisfied his spirit by meditating on His word, seeking to think His thoughts after Him (Ps. 92:5 [MT 6]; 139:17). He was the beneficiary of special revelation. In contrast, the typical Greek was preoccupied with the world around him and with his relationship to other individuals. He was part of a highly gregarious society, having a keen interest in politics, philosophical speculation, and scientific development. Death was an experience to be dreaded, followed by a shadowy existence, although for some, perchance, it could mean sharing the life of the gods. The Greek excelled as an inquirer, the Hebrew as a listener. It should be granted that Philo was greatly affected by Greek thought, especially that of Plato, and that he espoused the immortality of the soul rather than resurrection, but he was hardly representative of his nation in this respect. For the Hebrew, wisdom did not center in factual information about the world and what it contained, even though Solomon showed considerable interest in the natural order. The Hebrew concentrated on the life of man in relation to his Maker. Wisdom is "a fountain of life to him who has it" (Prov. 16:22). It helped one to be appreciative of nature and human life as gifts from God to be used for His glory. Next to worship, one's highest occupation was to take to heart God's word and act in accordance with its teaching.

The only clear reference in the OT to everlasting life is Dnl. 12:2, where it is linked to resurrection. The emphasis is not only on the temporal setting (the predicted time of Jacob's trouble), but even more on the quality of the resurrection life, for it is contrasted with the lot of those who will experience shame and everlasting contempt. This scanty use of "everlasting life" should not lead one to surmise that there was little expectation of a life to come. Notwithstanding its preoccupation with the present, Ecclesiastes speaks of man going to his eternal home (12:5) and of his spirit returning to God who gave it (12:7). Job also was confident that his Redeemer lived and that, when his own life was spent, he would see God (Job 19:25f.).

Isaiah 26:19 may have prepared the way for the prophetic insight expressed in Dnl. 12:2, although the life mentioned by Isaiah is not described as everlasting. The information contained in the Daniel passage is credited to superhuman (angelic) disclosure granted by Michael, the prince charged with supernatural oversight of Israel (10:21).

Several instances of resuscitation are noted in the course of Israel's history (1 K. 17:21f.; 2 K. 4:32-35; 13:20f.), but these are not properly regarded as resurrections. Closer in time and nature to Daniel's prophecy is Ezekiel's vision of the valley of dry bones in which the Spirit bestowed flesh and sinews upon them and gave them breath and life (Ezk. 37:10). It is not necessary to look to Persian sources as background for Israel's hope of resurrection. Such disclosure belongs to the ministry of the Spirit (1 Pet. 1:10f.).

II. Intertestamental Period.–This was a difficult time for the nation Israel, but as life in this world became more tenuous, hope became more firmly fixed on the life to come. This is illustrated by the case of seven famous brothers. When one of them was being tortured, he said to his assailant, "You dismiss us from this present life, but the King of the universe will raise us up to an everlasting renewal of life because we have died for his laws" (2 Macc. 7:9). A similar outlook characterizes the book of Enoch: "And the righteous shall be in the light of the sun, and the elect in the light of eternal life" (1 En. 58:3). In another passage the righteous are described as "those who are found to be such as loved heaven more than their life [breath] in the world" (108:10).

Under rabbinic influence Judaism tended to link a future life of bliss with rigorous adherence to the law in the present existence. D. Hill noted that the literature of the Qumrân community does not appear to make a deliberate correlation of Torah and life, yet the law was no doubt a dominant factor in showing the way to present obedience and future participation in eschatological life (p. 183). He noted further that in the passages where the terminology of eternal life occurs "the context is clearly eschatological" (p. 185).

III. NT.–A. Synoptic Gospels. With few exceptions, references to life are in the words of Jesus. He referred to life in the sense of livelihood (Gk. *bíos*) in Mk. 12:44. He used *psychḗ* with the force of soul (Mt. 22:37) as well as mortal existence (Mk. 8:35) and the means for sustaining life (Mt. 6:25 par. Lk. 12:22). His use of *zōḗ* included the concept of lifetime (Lk. 16:25), although *zōḗ* is more frequently used to denote a state that one may enter, not as a native possession but rather as a divine bestowal (Mt. 18:8f.; Lk. 18:24).

The Master warned that a person's life *(zōḗ)* does not consist in the abundance of possessions (Lk. 12:15). Similarly, He noted that life *(psychḗ)*, i.e., one's existence, is more than food that sustains it (v. 23). In one of His "hard" sayings (14:26) He declared that if one desired to become His follower he must "hate" his dear ones and even his own life *(psychḗ)*. Clearly this is a specialized use of the word "hate." The saying should be understood as calling for a renunciation of every demand that competes with Jesus' call for allegiance, no matter how valid such demands may seem to be. With keen insight the Master de-

scribed the prodigal son as "dead" during his profligate days but as "alive" in view of his return to his father's house (15:24. 32). By his return the youth showed that his perception of values had radically changed. Now he was responsive to family ties.

In referring to eternal life, Jesus invariably used *zōē*, which is consistent with NT practice in general. A few problem passages merit special attention. Jesus told an inquirer that if he would enter life (*zōē*) he must keep the commandments (Mt. 19:17). He was responding to His interlocutor's question, "What good deed must I do, to have eternal life?" The Lord met the inquirer on his own ground ("What must I do?") by exposing his lack of love for his neighbor, since he was unwilling to sell his possessions and give to the poor. In Lk. 18:29f. the promise of eternal life in the age to come is not grounded on the sacrifices that one is prepared to make, for back of them is what inspired the sacrifices, namely, the faith that produces devotion and sacrificial service (cf. Mk. 10:29f.).

A crucial feature of Jesus' teaching dealt with the purpose of His mission. He declared that He "came not to be served but to serve, and to give his life [*psychē*] as a ransom for many" (Mk. 10:45). Such a statement demonstrated the incalculable worth of that life.

B. Gospel of John. This Gospel refers to life not only more frequently than the Synoptics but also in a definitely different way. The Synoptics present life primarily as an eschatological experience to be realized in the age to come, as in Mk. 10:30. In John, however, eternal life is characteristically a present reality, as stated most emphatically in Jn. 5:24, where Jesus asserts that one who hears His word and believes the One who sent Him has eternal life. Evidently the believer does not have to wait for eternal life until he passes from his present existence. It is the new life in Christ, mediated by the Spirit and therefore imperishable. But the futuristic aspect of life is not lacking in John, as indicated by 12:25. Yet a problem remains, for a present aspect of eternal life seems to be lacking in the Synoptics. It may be that since the kingdom of God is represented as having come in the person and work of Jesus (Mt. 12:28), the conferring of eternal life in the present is implied (Ladd, p. 76). Support for this conclusion may be found in Mk. 9:43-47, where life seems to be equated with the kingdom of God, a term that has both future and present application.

The reader of the Fourth gospel is alerted to the crucial importance of the concept of life by its early appearance (1:4), providing a broad hint that, if people are to receive this life, they must have a saving relationship with the living Word. What is here implied becomes explicit throughout the Gospel. John's statement about the purpose of his account (20:31) confirms this. In between, all references to life are credited to Jesus with the exception of Peter's confession directed to Him, "You have the words of eternal life" (6:68). The statement in 1:4 is important for the clear indication it provides that life was not imparted to the Word but was His by virtue of His participation in the Godhead. He did not gain it nor did he lose it by becoming incarnate.

Jesus referred frequently to eternal life (e.g., 10:28), distinguishing it from mortal existence. "Eternal" may refer more to the kind of life than its duration. It is the life of God shared with His people, therefore both imperishable and blessed.

The provision of life is at the very heart of the gospel message (3:16). It is a divine gift rather than a reward for human achievement (10:28). In keeping with this truth, it can be received only by faith (3:36), though John does not use the term, possibly because faith could indicate simply a concept, whereas "believe" expresses decision. Eternal life becomes one's possession not at some future time but as soon as faith is exercised. "He who believes in the Son has [here and now] eternal life" (3:36).

In the course of His teaching ministry Jesus had much to say about Himself. John has captured more of this than the Synoptists. The Lord was not content merely to assert His eternal existence as the I AM (8:58). In other sayings He added a predicate of various kinds, including "the bread of life" (6:35), "the light of life" (8:12), "the good shepherd [who] lays down his life for the sheep" (10:11), "the way and the truth and the life" (14:6), and "the resurrection and the life" (11:25). This was His chosen method of underscoring both the indispensability and the variegated nature of His person and ministry offered on behalf of humanity.

It is relatively easy for a casual reader of Scripture to magnify the public ministry of Jesus and to deplore His death. His inimitable teaching and His works of compassionate love compel admiration and gratitude, but they were not the central objective of His mission. In His own estimation the climax was reached in His self-giving at the cross (10:15). The resurrection certified that His ministry, climaxed by His redeeming death, was carried out in conformity with the will of God.

As recipients of eternal life, believers have a responsibility to ponder its meaning. It is tempting to stress its unending character, but Jesus put the emphasis elsewhere. He epitomized it as knowing God and the Son who came to reveal Him (17:3). This knowledge has its inception at conversion, its expansion during the course of Christian experience, and its consummation in the life to come.

C. Book of Acts. Since the Lord Jesus had conquered death, as attested by His resurrection, it was fitting that Peter should proclaim that He was not only alive but was the Author of life (3:15). The risen Lord was the guarantor of indestructible life for all who were or would be related to Him by faith (cf. 1 Cor. 15:20). Shortly thereafter the apostles, supernaturally freed from prison, were commanded to speak to the people "all the words of this Life" (Acts 5:20). The proclaimed message promised not only salvation from sin but the gift of abundant and eternal life. The new life in Christ quickly manifested its dynamic reality in two directions. Believers began to meet together, pray together, and provide for the material needs of the less fortunate among them (2:44-46; 4:32). The other development was a demonstration of fidelity and fearlessness in maintaining a testimony to the people, despite warnings from the rulers and the imprisonment of their leaders (4:18-20, 31; 5:42).

Peter's historic proclamation of the gospel to Gentiles at Caesarea brought home to the Jerusalem church the realization that God had granted to the Gentiles repentance unto life (11:18). Renunciation of their sinful past was a necessary accompaniment of the reception of new life through the Savior. This phenomenon was repeated frequently, as reported in other locations. At Pisidian Antioch, for example, "as many as were ordained to eternal life believed" (13:48). The gospel message invited them. They proved their divine ordination by their faith.

In his Areopagus address Paul said in reference to God that "he himself gives to all men life and breath and everything" (17:25). We might have expected him to use *psychē* here rather than *zōē*. But *zōē* had been used by Greek writers in this same way with reference to human existence, so Paul accommodated himself to the background of his audience. Actually, it was not a strange use of terminology, for the LXX used *zōē* of the creation of the first man (Gen. 2:7). Paul himself apparently used it elsewhere in

the broad, general sense when he contrasted it with death (Rom. 8:38).

D. Pauline Epistles. The apostle recognized that mankind falls into two groups: the so-called natural man, who is spiritually dead (unresponsive) to God (Eph. 2:1), and the Christian, who because of his acceptance of Christ has become alive spiritually, sharing the life of the Son of God (Rom. 6:11). The former group included Paul himself in his pre-Christian period. Complacent in the possession of the law, he did not realize his true condition (Rom. 7:7-12). Though the law was holy, sin was able to provoke him to sin (vv. 8, 10). The second company includes all genuine believers. Two phases are to be noted in their spiritual pilgrimage. As long as they are in this earthly life they have to contend against indwelling sin. They are no longer lost sinners but neither are they yet entirely free from the hold of sin upon them. They have not attained to their heavenly inheritance and the complete freedom from sin that will be theirs when they reach their heavenly home. In this intermediate position between the life of sin and the life of glorious perfection, the Christian's life is hid with Christ in God (Col. 3:3). It is a hidden relationship, but spiritually dynamic. As Paul expressed it, Christ is our life (Col. 3:4), not in the sense that He extinguishes or suppresses our life, but rather in the sense that He controls and permeates our life, conforming it to His holy nature as much as we permit Him to do so. To share Christ's life in the ultimate sense promised to the Christian is the heart of the believer's hope (Tit. 1:2; 3:7).

In his use of the first Adam/last Adam tension, the apostle expounded the theme of sin leading to death and righteousness leading to spiritual life (Rom. 5). He also addressed the theme of physical death and bodily resurrection by means of the same tension (1 Cor. 15). Whereas the first Adam became a living being, the last Adam became a life-giving spirit (v. 45), the head of a new community living by Him and for Him.

Since the present situation of the Christian is that which should give him most concern, it is important to see that God has made special provision for it, namely, by making the indwelling of Christ an experiential reality. Paul expressed it most adequately by asserting that "the law of the Spirit of life in Christ Jesus has set me free from the law of sin and death" (Rom. 8:2). Two items need emphasis here. Christ Jesus was no longer on earth to assist Paul, but the Spirit is not spatially conditioned. Dwelling in the redeemed spirit of Paul (and in all believers), He was able to transmit the resources of the sinless, victorious Christ to His servant on earth. Furthermore, the effective transmission of power to maintain a transformed life, conformed to God's will, is plainly suggested by the use of the term "law." Clearly the word does not refer here to the Mosaic law, but rather points to the regularity and reliability of the Spirit's operation in the life of the believer so as to make actual the production of righteousness and true holiness. The chapter as a whole is a commentary on the effectiveness of the Spirit's activity in the experience of the child of God.

Recognition should be given also to the way in which the life of the risen Lord Jesus affected the witness of His servants. This is the theme of 2 Cor. 4:1-12. Pressure from a hostile world is heavy and there is weakness in the human vessel. Yet Paul could assert, "While we live we are always being given up to death for Jesus' sake, so that the life of Jesus may be manifested in our mortal flesh" (v. 11). The risen life of the Son of God can communicate faithfulness and fortitude to His ministering servants. Paul conceived of his God-given task as summoning him to hold forth the word of life (Phil. 2:16, AV). It was a message that promised and produced a new life in those who received it. As the apostle neared the close of his career, he naturally expressed his own hope in terms of eternal life (Tit. 3:7).

Paul is unique among NT writers in describing the Christian church as the body of Christ and believers as individual members of that body under the authority of Christ the Head (Rom. 12:5; Col. 1:18). The NT nowhere envisions an individual relationship to Christ apart from fellowship with other believers. The apostle Paul made it clear that, in addition to believers' responsibility to their sovereign Lord, they have a large area of relationship to fellow Christians. Believers are members one of another (Eph. 4:25). They have a responsibility to love one another (Rom. 13:8), to instruct one another (15:14), to encourage one another (1:12), to live in harmony with one another (12:16; 15:5), to be truthful to one another (Col. 3:9), to be subject to one another (Eph. 5:21), to be kind to one another (4:32), forbearing one another and forgiving one another (Col. 3:13), comforting one another (1 Thess. 4:18), etc. Evidently Christians are not intended to live in isolation or in neglect of fellow believers. They belong to a community of faith and life. They are expected to witness together, worship together, pray for one another, share in the sufferings and sorrows of their fellows in the faith. It all adds up to the realization that under normal conditions Christian life is a life of mutual relationship. By virtue of regeneration every believer is made a member of the one body of which Christ is the Head. Christian life is not a venture in isolationism, but rather an experience of communication and cooperation.

E. Remainder of the NT. Hebrews affirms the permanent nature of the priesthood of Jesus and His constant, faithful ministry on behalf of the saints. This is possible because He has an endless, indestructible life (He. 7:13, 16). Other references to life pertain to the Christian. One underscores the limited tenure of earthly life (Jas. 4:14). Another holds out the prospect of receiving the crown of life, a figurative term for recognition and reward for fidelity and endurance (1:12). In the Christian home, husbands are not to assume a superior attitude toward their wives because these women are physically weaker, but are to realize that both parties are "joint heirs of the grace of life" (1 Pet. 3:7). Husband and wife share equally in the enjoyment of spiritual life as God's gift, a life that begins on earth and reaches into eternity. We are assured of the divine sufficiency granted to us for the living of a godly Christian life (2 Pet. 1:3). Believers are bidden to recall that their spiritual life rests on divine mercy and will never end (Jude 21).

In 1 John the emphasis is on the fact that eternal life is in the Son and therefore cannot be obtained independently of Him or even simply through Him. This line of thought appears also in John's Gospel (1:4; 5:26), but it is presented more prominently in the Epistle. The Word of Jn. 1:1 is now presented as the Word of life (1 Jn. 1:1). As the Word, He is the faithful and true Witness; as the life, He is the eternal Son of God, whom death could not hold. He is risen and alive for evermore. He is even equated with eternal life (5:20). The concluding portion of the Epistle (5:13-21) is largely devoted to this theme.

In the book of Revelation the distinctive feature of the treatment of life (*zōē*) is that the word is always coordinated with some other term: breath (11:11), tree (2:7; 22:2, 14, 19), crown (2:10), book (3:5; 13:8; 17:8; 20:12, 15; 21:27), water (21:6; 22:1, 17). Nothing in the heavenly setting fails to exhibit the perfection and permanence of the living God and His operations. It is also noteworthy that the key to the unfolding picture of victory and glory

throughout the book is provided in the opening chapter, where the Son of God proclaims Himself as the living one who has survived death and is alive for evermore (1:8; cf. 1 Tim. 6:16).

IV. Conclusion.–The writers of the NT do not offer readers a series of platitudes about life. Their message is that Jesus Christ is not only the Savior who died to provide redemption from sin, but the One who is their life, their all in all. Their relationship to Him depends on their faith, and faith will be rewarded by sight and the enjoyment of His presence throughout the ages to come.

E. F. HARRISON

LIFE, TREE OF. *See* TREE OF KNOWLEDGE, TREE OF LIFE.

LIFT. A common English verb meaning to RAISE or elevate, used by the RSV to translate a great variety of Hebrew, Aramaic, and Greek terms. In the OT it most often represents Heb. *nāśā'*, a very common verb meaning "raise, lift up," "support," "carry," or "exalt." Other OT terms include Heb. *rûm* (qal, "be high," e.g., Dt. 8:14; Ps. 27:6; hiphil, "raise, exalt," e.g., Gen. 39:15; 41:44; Ex. 7:20; 14:10; Nu. 20:11), the hiphil of *qûm* ("raise up," e.g., Dt. 22:4; Eccl. 4:10), hiphil of *nûp* ("wield, swing," e.g., Dt. 27:5; Josh. 8:31), *nāṯan* ("give," e.g., Jer. 22:20), the polel of *'ûḏ* ("help up," Ps. 147:6), *gāḇah* ("be high, haughty," e.g., Ps. 131:1), Aram. *nᵉṭal* ("lift up," e.g., Dnl. 4:34 [MT 31]), etc. The most common NT term for "lift" is Gk. *epaírō* ("raise, lift," e.g., Mt. 17:8; Lk. 6:20; 16:23); other terms include *hypsóō* ("exalt, lift high," e.g., Jn. 3:14), *aírō* ("lift, carry away," Lk. 17:13; Jn. 11:41; Acts 4:24; Rev. 10:5), *egeírō* ("raise," Mk. 1:31; 9:27; Acts 10:26), *anístēmi* ("raise up," Acts 9:41), etc.

"Lift" is sometimes used literally in both the OT and NT to denote the physical lifting up of a person (e.g., Gen. 21:18; Eccl. 4:10; Mk. 1:31; 9:27; Jn. 3:14) or an animal (e.g., Dt. 22:4; Mt. 12:11). More often, however, the term is used to describe a gesture that has symbolic meaning. For example, the Lord "lifts up" — i.e., restores the rights and dignity of — the poor and the oppressed (Ps. 113:7f. par. 1 S. 2:8; Ps. 146:8; 147:6). Similarly, to "lift up" a person's HEAD or face meant to show that person favor (e.g., Gen. 40:13 [but cf. v. 19]; Ps. 3:3 [MT 4]; Jer. 52:31); but to lift one's own head demonstrated pride or rebellion (e.g., Jgs. 8:28; *see also* GESTURE V). Likewise, to have a heart that was "lifted up" was to be proud (e.g., Dt. 8:14; 17:20; 2 Ch. 25:19; Ps. 131:1; Dnl. 5:20; Hos. 13:6). *See also* EXALT.

The raising of the hand(s) could have a variety of meanings (*see* GESTURE I), e.g., rebellion (2 S. 20:21; 1 K. 11:26f.), the taking of an oath (e.g., Dt. 32:40), or the conferral of a blessing (e.g., Lev. 9:22; Lk. 24:50). The hands were also raised in prayer (e.g., Ps. 28:2; 63:4 [MT 5]; Lam. 3:41; 1 Tim. 2:8), symbolizing the internal "lifting up" of the soul — i.e., directing one's whole being — to the Lord (cf. Ps. 25:1; 86:4; 143:8). Lifting up one's horn (a symbol of strength) was a metaphor for a display of arrogance (Ps. 75:4f. [MT 5f.]), while raising a sword signified preparation for war (Isa. 2:4; Mic. 4:3) and raising a rod or staff could symbolize an intention to punish (e.g., Isa. 10:15, 24, 26).

Two very common expressions are to "lift up one's voice" and to "lift up one's eyes." The former meant to shout or cry aloud (e.g., Gen. 39:15, 18; Lk. 17:13; Acts 14:11; 22:22), whether in addressing a crowd (e.g., Isa. 42:2; 58:1; Acts 2:14) or in expressing emotions such as grief (e.g., Gen. 27:38; Ruth 1:9, 14; 2 S. 3:32) or praise and rejoicing (e.g., Isa. 24:14; 40:9; 42:11; 52:8). To "lift up one's eyes" meant simply to look up, usually in order to gaze at something in the distance (e.g., Gen. 13:10, 14; 22:4; 24:64; Dt. 3:27; 1 S. 6:13; 2 S. 18:24; Isa. 49:18; Jer. 3:2; Jn. 4:35). Lifting one's eyes to God indicated an attitude of prayer and of trust that He would provide help (e.g., Ps. 121:1; 123:1f.; cf. the prohibition against lifting one's eyes to idols, heavenly bodies, or other nations as a source of help, e.g., Dt. 4:19; Ezk. 18:6, 15; 23:27; 33:25; *see also* GESTURE V.B). Used with a human subject, to "lift up one's face" could simply mean to look up (e.g., 2 K. 9:32), or it could connote looking at someone with confidence, free of guilt and shame (2 S. 22:2; Job 22:26; cf. 10:15). But when used with God as its subject the phrase indicated favorable regard (Nu. 6:26; Ps. 4:6 [MT 7]). *See also* LOOK I.

The precise meaning of "lift [Heb. hiphil of *gāḏal*; LXX *megalýnō*; lit. "make great"] the heel against (someone)" (Ps. 41:9 [MT 10]) is disputed. Some have interpreted it as referring to a kick (cf. KD *in loc.*). G. B. Caird (*JTS*, N.S. 20 [1969], 32) translated the LXX "'has magnified his going-behind-the-back', i.e., 'has given me a grave stab in the back.'" E. F. F. Bishop claimed that to Near Eastern peoples, showing someone the sole of one's foot is considered an insult (*Expos.T.*, 70 [1958/59], 331f.). In any case the context of the psalm — as well as Jesus' application of the verse to Judas's betrayal of Him (Jn. 13:18) — points to a cruel act of treachery and contempt.

The prophets Jeremiah and Nahum used the expression "lift up the skirts" (a euphemism for a sexual attack) as a metaphor to describe the humiliation and devastation that Jerusalem (Jer. 13:22, 26) and Nineveh (Nah. 3:5) would soon suffer as punishment for their wickedness. Here "lift up" represents Heb. *gālâ*, "uncover, reveal" (niphal, Jer. 13:22; piel, Nah. 3:5), and *ḥāśap*, "strip naked" (Jer. 13:26).

Three times in John's Gospel Jesus refers to His death in terms of being "lifted up" (Gk. *hypsóō*, Jn. 3:14; 8:28; 12:32-34). As Moses' lifting up the serpent in the wilderness preserved the lives of those who looked upon it (Nu. 21:8f.), so Jesus' death on the cross gives eternal life to all who look to Him for salvation (Jn. 3:14). Some commentators have argued convincingly that Jesus' being "lifted up" refers not only to His crucifixion but also to His resurrection and ascension (cf. *hypsóō* [RSV "exalt"] in Isa. 52:13, LXX; Acts 2:33; 5:31; *hyperypsóō* in Phil. 2:9; see comms. on John, esp. R. E. Brown, I [*AB*, 1966], 145f., and L. Morris [*NICNT*, 1971], pp. 225f.).

N. J. O.

LIGHT [Heb. nouns: usually *'ôr* (Gen. 1:3-5, 11; etc.), also *'ûr* (Isa. 50:11), *'ôrâ* (Est. 8:16; Ps. 139:12), *mā'ôr* (Gen. 1:14-16; etc.), *nōgah* (Isa. 50:10), *nᵉhārâ* (Job 3:4); vbs.: hiphil of *'ôr* (Gen. 1:15; etc.), hiphil of *yāpaʿ* (Job 10:22), hiphil of *nāgah* (2 S. 22:29), etc.; Aram. *nᵉhôr* (Dnl. 2:22), *nahîrû* (Dnl. 5:11, 14); Gk. nouns: usually *phós* (Mt. 4:16; etc.), also *lampás* (Acts 20:8), *phéngos* (Mt. 24:29; Mk. 13:24), *phōstḗr* (Phil. 2:15; Rev. 21:11), *phōtismós* (2 Cor. 4:4, 6); vbs.: *háptō* (Lk. 8:16; 11:33), *kaíō* (Mt. 5:15), *phōtízō* (Jn. 1:9); *epiphaínō* (Lk. 1:79), *epiphaúskō* (Eph. 5:14), *lámpō* (Mt. 5:15), *astráptō* (Lk. 17:24); adjective: *phōteinós* (Mt. 6:22)].

The variety of words translated "light" show no great

difference in meaning. Generally the nouns refer to light itself or to a source of light (e.g., a lamp or a star), while the verbs mean "give light" or "kindle a light." The adjective *phōteinós* means "characterized by light."

I. In the OT.–Light was the first thing created. God's first words recorded in the Bible are, "Let there be light," after which light immediately appeared (Gen. 1:3). This implies that light existed before the sun (see vv. 14-18) — which was worshiped as a god by many peoples of OT times; and the light was not god or creator, for light itself was created.

The Scriptures refer to physical light many times. It may be associated with the heavenly bodies (e.g., Ps. 136:7; Jer. 4:23), lightning (Ps. 77:18 [MT 19]; 97:4), dawn (1 S. 14:36), a lamp (Ex. 27:20), or the pillar of fire that God gave the Israelites in the wilderness (13:21). But however familiar light may be, it nevertheless remains a mystery. Mankind cannot answer the questions, "Where is the way to the dwelling of light?" and "What is the way to the place where the light is distributed?" (Job 38:19, 24).

The OT constantly associates light with God. It is His garment (Ps. 104:2). It lives with Him (Dnl. 2:22). His brightness is like light (Hab. 3:4; cf. "the light of thine arrows," v. 11). The psalmist could say, "The Lord is my light" (Ps. 27:1; cf. 2 S. 22:29; Isa. 10:17). Therefore it is not surprising that darkness cannot triumph over light: God "brings deep darkness [the shadow of death] to light" (Job 12:22). In creation it is the Lord who "gives the sun for light by day and the fixed order of the moon and the stars for light by night" (Jer. 31:35).

Serving God can be described as walking in His light (Isa. 2:5). His servant is a "light" to others (42:6; 49:6; 60:3; cf. 51:4). God's word lights the path of His servant (Ps. 119:105; cf. v. 130; Prov. 6:23; Isa. 51:4). Divine favor may be expressed as lifting up "the light of [God's] countenance" (Ps. 4:6 [MT 7]; 44:3 [MT 4]; 89:15 [MT 16]; conversely, no sin can be hidden from that countenance, 90:8). The eschatological bliss of God's people may be expressed in terms of the Lord being their "everlasting light" — a light that replaces the light of sun and moon and never ceases (Isa. 60:19f.; cf. 30:26; Zec. 14:7).

"Light" is often used as a symbol of goodness, uprightness, or blessing. "Light dawns for the righteous, and joy for the upright in heart" (Ps. 97:11). Even "in the darkness" light rises for the upright because the Lord is gracious (112:4). Thus the psalmist could pray that God would send His light and truth to bring him to God's dwelling (43:3). The path of the righteous "is like the light of dawn" that continually grows brighter (Prov. 4:18). The failure to recognize the light is the most serious perversion. Those who do so "call evil good and good evil" and "put darkness for light and light for darkness" (Isa. 5:20).

Since light is linked so closely with Yahweh and with goodness, it is not surprising that it can serve as a symbol of God's blessing. This blessing may be predominantly in the "here and now," as when the warrior rejoiced: "Thou dost light my lamp; the Lord my God lightens my darkness. Yea, by thee I can crush a troop . . ." (Ps. 18:28f. [MT 29f.]; cf. Job 22:28). And this blessing can merge into "spiritual" prosperity, as when the prophet spoke of people "who walked in darkness" as having "seen a great light" (Isa. 9:2-6). Light can also be linked with mental excellence (Dnl. 5:11, 14). Life itself and light go closely together: "For with thee is the fountain of life; in thy light do we see light" (Ps. 36:9 [MT 10]; the Psalm goes on to speak of God's steadfast love and salvation; cf. 56:13 [MT 14]; Job 3:20). "To see the light" means much the same as "to be alive" (Job 3:16; 33:28, 30; Ps. 49:19 [MT 20]). Some impressive passages use this imagery to convey the importance of trusting God even when things are difficult. The prophet looked for one "who walks in darkness and has no light, yet trusts in the name of the Lord and relies upon his God" (Isa. 50:10). As he neared the end of his prophecy, Micah warned: "Rejoice not over me, O my enemy; when I fall, I shall rise; when I sit in darkness, the Lord will be a light to me. . . . He will bring me forth to the light; I shall behold his deliverance" (Mic. 7:8f.).

The absence of light is linked with disaster (Jer. 4:23; Ezk. 32:7f.). Darkness is the proper abode of the wicked. In some striking passages, sinners find "the day of the Lord" to be darkness rather than the light of blessing they anticipated (Isa. 13:9-11; Am. 5:18-20). The wicked, e.g., murderers and adulterers, operate at night (Job 24:14-17). They "do not know the light" (v. 16), but rebel against it (v. 13). The punishment of the wicked person is described as putting out his light, darkening his tent, and thrusting him from light into darkness (18:5f., 18).

II. In the NT.–Turning to the NT, one is impressed by the way light is constantly associated with God and with the servants of God. The NT occasionally refers to such phenomena as the light of a lamp (Mt. 5:15; Lk. 11:33, 36) or fire (Lk. 22:56), or "the light of this world" (Jn. 11:9). Some eschatological passages speak of the heavenly lights being darkened (Mt. 24:29f.; Mk. 13:24; Rev. 8:12). But for NT writers the great truth was that "God is light and in him is no darkness at all" (1 Jn. 1:5). God is said to dwell in light (1 Tim. 6:16; 1 Jn. 1:7); He is "the Father of lights" (Jas. 1:17). The seer envisioned heaven as a place that needs no sun or moon, for God is its light (Rev. 21:23f.; 22:5). Light thus forms a natural figure for God in His purity and beauty.

Again and again light is used to describe Jesus and His mission. The Gospel of John especially favors this imagery and begins to use it in the fourth verse: "In him [the Word] was life, and the life was the light of men." John continually associates life with Jesus and moves easily from the thought that life is "in" Him to the thought that this life is "the light of men," i.e., human beings owe all their life and all their light to Christ. John's Gospel proceeds, "The light shines in the darkness, and the darkness has not overcome it" (v. 5). In the conflict between good and evil, between light and darkness, the dark evil does not prevail. Notice the use of the present: light continually shines; its function is to shine precisely in the darkness.

The Gospel of John proceeds to tell how John the Baptist came to bear witness to the light (not being the light himself; Jn. 1:6-8). Then comes the great thought: the "true light," who gives light to all persons, was coming into the world (v. 9). John was not writing about a remote, holy but uncaring deity, but about One who, in addition to being light, is love (cf. 1 Jn. 4:8, 16). The God who is light shines on people for their good, i.e., He illumines them, cares for them, and lights up their way. The coming of Jesus meant the coming of the divine light to bring mankind illumination and salvation. John wrote his Gospel to convince people that Jesus is the Christ, the Son of God, so that they might enter life (Jn. 20:30f.). John did this in part by showing that Jesus is the light.

Jesus alone is "the light of the world" (Jn. 8:12; 9:5; cf. 12:46). All the illumination people have comes ultimately from Him. Anyone who follows Him "will not walk in darkness, but will have the light of life" (8:12). One's ultimate fate depends on one's reaction to the light that "has come into the world" (3:19). Sinners love darkness rather than light, and in that is their condemnation; but

those who do the truth come to the light (vv. 19-21). Near the end of His public ministry Jesus challenged the crowd: "The light is with you for a little longer. . . . While you have the light, believe in the light, that you may become sons of light" (12:35f.; cf. Lk. 16:8; 1 Thess. 5:5; "children of light," Eph. 5:8). This terminology is not confined to Christianity. (It was widespread among the rabbis [see the many passages listed in SB, I, 236-38; II, 427f.; III, 656]. One of the most important Qumrân scrolls deals with the war of "the sons of light" with "the sons of darkness." Another scroll is called "The Words of the Heavenly Lights." The members of the sect frequently refer to themselves as "the sons of light.") But it has special significance in John.

Contact with the light influences conduct. It is the gospel of Christ that brings people into the light (2 Cor. 4:4). Because God commanded, "Let light shine out of darkness," and because He "has shone in our hearts," believers have received "the light of the knowledge of the glory of God in the face of Christ" (v. 6). The ascended Jesus commissioned Paul to bring the gospel to the Gentiles, "to open their eyes, that they may turn from darkness to light and from the power of Satan to God" (Acts 26:18; cf. Eph. 5:14). God has called believers "out of darkness into his marvelous light" (1 Pet. 2:9). The basic challenge of the gospel, to repent of evil and trust in Christ, is often expressed in terms of coming to the light.

The NT writers also saw light as a useful way to characterize the whole life of the Christian. To "walk in the light, as he is in the light" (1 Jn. 1:7), means to live in love. Those who claim to live in the light but hate their brothers are still in darkness (2:9); it is those who love their brothers who are really in the light (1:10). Similarly, Paul asked, "What fellowship has light with darkness?" (2 Cor. 6:14). This line of thought goes back to Christ, who taught the importance of having one's "whole body . . . full of light" (Lk. 11:34, 36; cf. Mt. 6:22) and warned, "Be careful lest the light in you be darkness" (Lk. 11:35).

Jesus called His followers "the light of the world" (Mt. 5:14). The nature of light is to shine in the darkness. It is important that those who have been illuminated become illuminators and not simply keep to themselves the light they have received. Thus Jesus said, "Let your light so shine before men, that they may see your good works and give glory to your Father who is in heaven" (Mt. 5:16). Paul described the Philippian Christians as "children of God . . . in the midst of a crooked and perverse generation, among whom you shine as lights in the world" (Phil. 2:15). Similarly, the Ephesians, who were once "darkness, but now . . . light in the Lord," are exhorted to "Walk as children of light (for the fruit of light is found in all that is good and right and true)" (Eph. 5:8f.). Paul called on the Romans to "cast off the works of darkness and put on the armor of light" (Rom. 13:12). Because this challenge was addressed to believers, it was clearly not a call to become Christians; it was rather a reminder that believers wage a continual battle with the forces of darkness, and that they can win the victory only through the light they receive from Christ. In one passage Paul spoke of the final victory as a sharing in "the inheritance of the saints in light" (Col. 1:12). But more commonly the NT writers used the imagery of light for those still in the conflict.

In both Testaments, then, light lent itself to significant spiritual imagery. Light is naturally associated with God, but the great teaching of the Bible is that God does not remain at a distance. The light came into the world to bring deliverance. And the delivered must live as those who are in the light.

LIGHTNING [Heb. *bārāq*, also *'ôr*–'light' (Job 36:30, 32; 37:3, etc.), *ḥāzîa*–'storm-cloud' (28:26), *lappîḏ* (Ex. 20:18), *'ēš*–'fire' (Ps. 105:32). Gk. *astrapē*]; AV also LIGHT, BRIGHT, FIRE, GLITTER(ING); NEB also THUNDERSTORM, MIST, FLAME, etc.; RSV mg., AV, "them" (Job 37:4, following MT; RSV emends *yᵉ'aqqᵉḇēm* to read *yᵉ'aqqēḇ bᵉrāqîm*). The spectacular discharge of enormous amounts of electrical energy within a cloud itself or as part

Basalt relief from Arslan Tash (*ca* 740 B.C.) of the storm-god (Hadad?) holding lightning bolts in both hands (Louvre)

of a thunderstorm. Water and ice particles in a thundercloud are thought to generate electricity as they collide because of turbulence within the cloud. Some lightning is confined to the cumulo-nimbus formation, but the tendency for electricity to ground itself leads to an explosive discharge as the lightning flashes to earth.

In the Scriptures lightning is frequently mentioned (esp. in poetic literature) as an example of the power and wisdom of God. Only God commands the forces of nature and knows its secrets: "Can you send forth lightnings. . . ?" (Job 38:35; cf. 28:26; 37:15; Ps. 18:14 [MT 15]; 77:18 [MT 19]; 97:4; 135:7; 144:6; Jer. 10:13; 51:16; etc.). Lightning was one of the signs of Yahweh's presence at Mt. Sinai that evoked awe and terror in the Israelites (Ex. 19:16; 20:18); cf. the visions of Ezekiel (Ezk. 1:13) and John (Rev. 4:5; 8:5; 11:19; 16:18).

Lightning is also used as a simile to describe something that shines brightly (Ezk. 21:10, 15, 28 [MT 15, 20, 33]; Dnl. 10:6; Mt. 28:3) or moves with great speed (Ezk. 1:14; Nah. 2:4 [MT 5]; Zec. 9:14; Lk. 10:18). In Mt. 24:27 par. Lk. 17:24 Jesus compares His parousia to the brightness and universal visibility of lighting. R. K. H. N. J. O.

LIGN-ALOES. *See* ALOES.

LIGURE lig'ər (AV Ex. 28:19; 39:12). AV for jacinth. *See* STONES, PRECIOUS.

LIKEN [Heb. *dāmâ*] (Isa. 40:18; 46:5; Lam. 2:13); NEB also COMPARE, etc.; **LIKENESS** [Heb. *dᵉmût*]; AV also SIMILITUDE (Dnl. 10:16); NEB also FORM, SEMBLANCE, etc.; [*tᵉmûnâ*] (Ex. 20:4; Dt. 5:8); [*taḇnît*] (Dt. 4:16-18); NEB probably FORM; [Gk. *eikṓn*] (Mt. 22:20 par. Mk. 12:16; Lk. 20:24; 2 Cor. 3:18; 4:4); AV IMAGE; NEB also HEAD, IMAGE; [*homoióō*] (Acts 14:11); NEB FORM; [*homoíōma*] (Rom. 8:3; Phil. 2:7); NEB also "form like that"; [*homoiótēs*] (He. 7:15); AV SIMILITUDE; NEB LIKE; [*homoíōsis*] (Jas. 3:9); AV SIMILITUDE. In Ezk. 31:3 the AV reads "Assyrian" and the NEB reads "Assyria," both following the MT (*'aššûr*); the RSV, however, apparently prefers emending to hiphil of *šāwâ*, "liken." In 41:17 the RSV conjectures "likenesses" (pl. of Heb. *dᵉmût*), the AV has "measure," and the NEB has "figures"; the MT reads *middâ* (pl. *middôṯ*–"measures") and probably needs emendation. In Eph. 4:24 the RSV translates *katá* as "after the likeness of," while the AV uses "after" and the NEB paraphrases. The meaning of this verse, however, seems clear: the new life gained in Christ is a work of God, a creation characterized by true goodness and holiness.

The Bible teaches that people were created "in the likeness [*dᵉmût*] of God" (Gen. 5:1; cf. 1:26; Jas. 3:9) or in the "image" (*ṣelem*, Gen. 1:26) of God: people resemble God in a significant and unique sense. Although both people and animals are part of the same natural created order, people are set apart from the animals, over which they are masters. For persons, like God, can govern, reason, will, choose, and enter into intimate relationships with others and with God. They, however, are not God but are only made in His likeness; consequently human creatures must remember their totally dependent place before their Father and Creator. Fallen humanity, whose likeness to God is distorted and darkened through sin, may be restored to the glorious image of God in Christ (cf. 2 Cor. 3:18), who Himself is the "likeness (*eikṓn*) of God" (4:4). *See* IMAGE OF GOD.

Israel, unlike many of the surrounding peoples, worshiped a God who would allow no visible representations of Himself: "You shall not make for yourself a graven image, or any likeness [*tᵉmûnâ*] of anything" for the purpose of worship (Ex. 20:4; Dt. 5:8; cf. also Dt. 4:16-18). Any artistic representation of God would tend to create a conception of a God limited in power and glory. Furthermore, the people of God should never bow down and serve powerless created objects, but only the powerful Creator. Finally, idolatry was associated with religious systems frequently noted for their excesses, abuses, and cultic abominations. *See* IDOL; IDOLATRY.

Three times in the NT Gk. *eikṓn* designates the portrait of the Roman emperor on a coin (Mt. 22:20; Mk. 12:16; Lk. 20:24).

Romans 8:3 and Phil. 2:7 state that Jesus came in the "likeness" (*homoíōma*) of sinful flesh and of men — i.e., although Christ was indeed true God, He was also most certainly true man, yet without sin.

LIKHI lik'hī [Heb. *liqḥî*]. Son of Shemida and descendant of Manasseh (1 Ch. 7:19).

LILIES (ACCCORDING TO). The RSV translation of Heb. *'al-šôšannîm* in the superscriptions to Pss. 45, 69, and 80 (AV "upon Shoshannim"; NEB omits superscriptions). "Lilies" may refer to the title or the first word of a song to the tune of which these psalms were sung. *See* EDUTH; *see also* MUSIC III.B.3.

LILITH lil'əth. *See* NIGHT HAG.

LILY [Heb. *šôšan, šûšan, šôšannâ*; Gk. *kríon*] (1 K. 7:19, 22, 26; Cant. 2:1f.; Sir. 39:14; etc.). The Hebrew term presents difficulties in botanical identification but seems related philologically to Akk. *šešanu*, a large flower such as the *Lilium candidum*, and Egyp. *sšn*, the lotus or waterlily, *Nymphaea lotus* L. The latter was probably depicted on the columns of the temple porch (1 K. 7:19), the pillars (v. 22), and the everted rim of the metal basin (v. 26).

Probably the Hebrew word was used widely of a number of flowers. The "lilies" of Cant. 5:13 may be the scarlet *Lilium chalcedonicum* L. and those of Mt. 6:28 and Lk. 12:27f. the colorful Palestinian windflowers, *Anemone coronaria* L. (cf. T. W. Manson, *Sayings of Jesus* [repr. 1979], pp. 111-13). The remaining references in Canticles (NEB omits at 4:5) may be to the garden hyacinth, *Hyacinthus orientalis* L., or the Madonna lily, *Lilium candidum* L. The "lilies" of Hos. 14:5 [MT 6]; Sir. 39:14; 50:8 are probably the yellow flag, *Iris pseudacorus* L.

Some commentators hold that names such as Susa, Shoshannim, and Shushan Eduth refer to the lily in some way (*see* LILIES, ACCORDING TO). Later Jewish literature alluded to the lily symbolically, and a lotus or lily was depicted on several Jewish coins. In ancient Ugarit the lily was a symbol of sex appeal. R. K. H.

LILY-WORK [Heb. *maʿᵃśēh šûšan*]. A feature of the capitals of the two pillars standing on either side of the entrance to Solomon's temple (1 K. 7:19, 22). Details in the description of the capitals are obscure, however.

The "lily-work" refers either to a curving outward at the top of the capitals in a "lily" shape (note the NEB rendering "shaped like lilies" in 7:19; and cf. 7:26), or, more probably, to an ornamentation on the sides of the capitals in the form of stylized long, narrow "leaves," the latter a common architectural ornament in the ancient Near East.

LIME [Heb. *śîḏ*] (Isa. 33:12; Am. 2:1); NEB ASH, WHITEWASH. A white, alkaline substance consisting of calcium oxide obtained from limestone (calcium carbonate) in Palestine, but also from shells, by burning at temperatures above 550°C. (1022° F.) in a large roofless kiln so that the carbon dioxide could be swept away in the wind. It is

Excavated lime kiln from Heshbon (Byzantine period) (L. T. Geraty)

also called quicklime and may be used loosely to indicate slaked lime (calcium hydroxide) when water is added. It is used especially in making whitewash, mortar, and plaster for coating walls, floors, and cisterns.

It would seem that the ancients may also have burned animal bones to obtain a product similar to lime (calcium phosphate). Am. 2:1, where human bones are burned, assumes an acquaintance with the results of bone burning, but seems to suggest that the burning of human bones was remarkable (cremation does not seem to have been regularly practiced by the Semites in the ancient Near East). Isa. 33:12 is certainly talking of the same process, but it is the whole body which is reduced to "lime."

Although the use of lime in ancient technologies of the Bible lands does not seem to have flowered until the Iron Age (*ca.* 1200 B.C.), its use in processed or raw form (crushed, unburned limestone) was put to advantage relatively infrequently as early as Neolithic times (the plastered skulls from Jericho). Walls were plastered in the Chalcolithic period at Ghassul to prepare for paintings. Some form of crushed limestone was used to form water-resistant surfaces at many periods. A well-preserved lime kiln from the Byzantine period has been found at Heshbon.

L. G. HERR

LIMIT [Heb. *'aḏ taḵlîṯ* (Job 11:7), *gāra'*–'withdraw' (Job 15:8), *qēṣ* (Ps. 119:96; Nah. 3:9), *ḥōq* (Prov. 8:29), *tôṣā'ôṯ* (1 Ch. 5:16); Gk. *ámetros* ("beyond limit," 2 Cor. 10:13a, 15), *tó métron tón kanános* (2 Cor. 10:13b)]; AV END, RESTRAIN, MEASURE, etc.; NEB also "perfection," "usurp," "come to an end," etc.; **LIMITATION** [Gk. *asthenía* (Rom. 6:19)]; AV "infirmity"; NEB "weakness."

The RSV uses the noun "limit" in several different contexts. In 1 Ch. 5:16 it refers to a geographical boundary; in Nah. 3:9 the military-political might of Egypt is "without limit." In a series of rhetorical questions (Job 11:7-11), Zophar (and later Eliphaz; cf. 15:8) attacks Job for questioning God. While Zophar is correct in pointing out the finitude of man, especially vis-à-vis God's infinity, he fails to understand or sympathize with Job. This failure points up one of the dangers of dogmatism: the misapplication of a theological truth. Prov. 8:29 refers to creation, when God gave limits or orders to the sea (cf. Job 28:26; Ps. 148:6).

Although the general sense of Ps. 119:96 is clearly a contrast between the finitude of earthly things and the boundless nature of God's commands, the precise meaning of the hapax legomenon *tiḵlâ* (RSV "perfection") is uncertain. It seems to be related to *taḵlîṯ* (both < *klh*, "complete, finish," "destroy").

In Rom. 6:19 the RSV reading is unfortunate; the AV and NEB, though literal, also miss the meaning according to E. Käsemann (*Comm. on Romans* [Eng. tr. 1980], p. 182): "In Paul *asthenía* never means some kind of feebleness but the temptation . . . of Christians through the impulses of the flesh . . . not the impotence of the weak . . . but the defiance of the strong." Here Paul "envisions neither ethical [contra *TDNT*, I, 491] nor intellectual weakness [contra Bauer, rev., p. 115] nor immaturity."

In 2 Cor. 10 Paul offers a strong defense of his ministry and appears quite concerned to answer charges of boasting on his part. To that end he claims that he boasts within the limits God has set (vv. 13, 15). The NEB "proper sphere" is a suitable rendering; Paul inveighs against opponents who have invaded his sphere of ministry.

G. A. L.

LIMP [Heb. *ṣāla'*] (Gen. 32:31 [MT 32]); [*pāsaḥ*] (1 K. 18:21, 26); AV HALT; LEAP; NEB "sit on the fence"; "dance wildly." Jacob's limp, which arose from the injury incurred during his wrestling with the divine adversary at the ford of the Jabbok, is remembered in a prohibition against eating the sciatic muscle. Nowhere else in the OT is this restriction noted, but it does appear in rabbinic Judaism (T.B. *Pesahim* 22a, 83b). Today the taboo is sometimes explained symbolically as the victory of the nation Israel (Jacob) over brute force (the adversary understood as Esau's demon). See I. Grunfeld, *Jewish Dietary Laws* (1972), I, 20.

In 1 K. 18:21 Elijah asks the people, who have been vacillating between Yahweh and Baal, how long they will "go limping between two different opinions." The irony of this choice of words is evident in v. 26, when the prophets of Baal perform a limping dance as part of their ritual. This dance, involving frenzied shouts, self-laceration, and limping around the altar, is a variant of a ritual common in the ancient Near East (1 K. 18:25-29; cf. J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 396). Both religious devotees and the deities that they worshiped engaged in such dancing. In the Bible some religious dancing is approved and some not. *See* DANCE.

LINE.

(1) Most references have to do with measuring, so that Eng. "line" represents a Hebrew word for "cord," e.g., *paṯîl* (Ezk. 40:3), *ḥûṭ* (1 K. 7:15), *ḥeḇel* (2 S. 8:2; Ps. 16:6; Am. 7:17; Mic. 2:5; Zec. 2:1 [MT 5]), or *qāw* or *qaw* (1 K. 7:23; 2 K. 21:13; 2 Ch. 4:2; 13:3; Job 38:5; Isa. 28:17;

etc.). "Plumb line" in Am. 7:7f. represents *'ănāḵ*, "lead." *See* MEASURING LINE.

(2) Whether the "lines" of Isa. 28:10, 13 (*qāw*) also refer to such cords or to "syllable[s] imitating prophetic speech" (*CHAL*, p. 315) has long been debated (see comms.; *see also* METE).

(3) In Nu. 34:7 "mark out a line" represents the verb *tā'â* ("draw a line, mark out"; so translated in vv. 8, 10), which is used in reference to boundaries.

(4) References to battle lines always represent the verb *'ārak*, "set in rows, draw up in [battle] order" (Jgs. 20:20, 22; 1 S. 4:2; 17:2; 2 Ch. 13:3; 14:10; AV usually "set in array"), or the derived substantive *ma'ᵃrāḵâ*, "row, battle line" (1 S. 4:12; 17:20, 48; AV "army," "fight").

(5) The Hebrew term for "line" in the sense of lineage (Lev. 22:4; Ps. 89:29, 36) is *zera'*, "seed, descendants." The Greek equivalent is *spérma*, used in 1 Macc. 7:14. "Lineage" in the Apocrypha represents Gk. *génos* (1 Macc. 3:32) or *geneá* (Tob. 5:13 [LXX 14]; 1 Esd. 5:5, 37), each a singular noun for the descendants of a common ancestor. In Lk. 2:4 "lineage" represents Gk. *patriá*, which is related to the word for "father" (translated "family" in Tob. 5:13 and "father's house" in 1 Esd. 5:37).

(6) "Line" as a verb for covering an interior surface represents Heb. *bānâ*, "build," in 1 K. 6:15 and *ḥāpâ*, "cover" in 2 Ch. 3:5, 7 (translated "overlay" in v. 9).

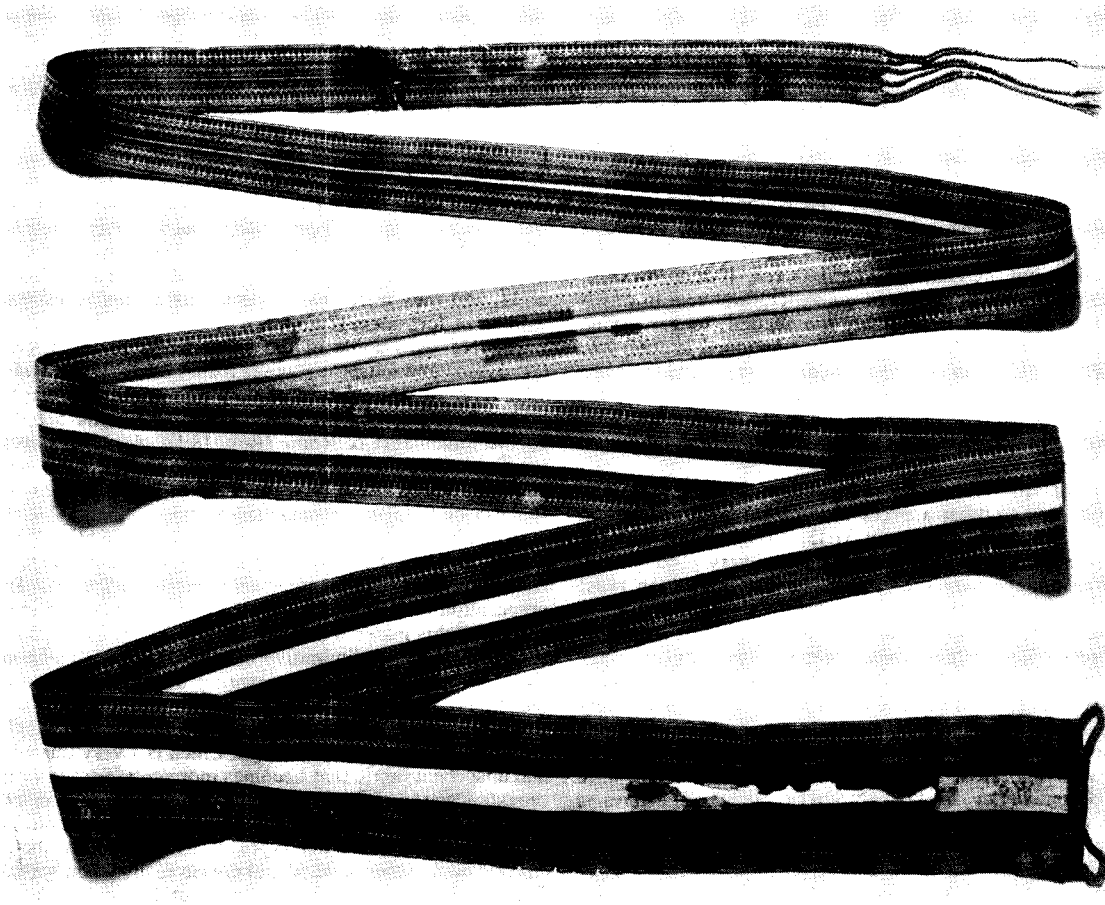
LINEAGE. *See* LINE (5).



LINEN; FINE LINEN; LINEN GARMENT [Heb. *šēš* (e.g., Ex. 26–28, 35–36, 38–39), *baḏ* (e.g., Lev. 6:10 [MT 3]; 1 S. 22:18), *pištâ, pēšeṯ* (pl. *pištîm*) (e.g., Dt. 22:11), *sāḏîn* (e.g., Jgs. 14:12f.), *bûṣ* (e.g., 1 Ch. 4:21), *'ēṭûn* (Prov. 7:16); Gk. *sindṓn* (e.g., Mt. 27:59), *býssos* (e.g., Lk. 16:19), *býssinos* (e.g., Rev. 18:16), *othónion* (e.g., Jn. 19:40), *línon* (Rev. 15:6)]; AV also SHEET (Jgs. 14:12f.), SILK (Prov. 31:22).

I. Archeological Finds.–Linen and wool, both locally produced, were the only two fibers generally available for clothing and other uses during most of the biblical period. Cotton (*ḥôrāy*, Isa. 19:9; *karpas*, Est. 1:6) was a foreign product, as was the *meší* of Ezk. 16:10, 13, thought to be silk.

The earliest extant textiles from the ancient Near East were found in Neolithic Level VI (*ca.* 6000 B.C.) at Çatal Hüyük in present-day Turkey. These fragments of cloth are so badly disintegrated that analysis cannot determine whether their origin was animal or vegetable. Their thread is plyed, i.e., two spun threads have been spun together for strength and durability. (*See* SPIN.)

The dry climate of Egypt has preserved numerous examples (*ca.* 5000-4000 B.C.) of linen, palm bast, and rhamie. The earliest textiles from Palestine, probably made from plant fibers, come from the Chalcolithic (*ca.* 4000-

A finely weaved linen girdle of Ramses III, said to be found on a mummy at Saqqârah (Merseyside County Museums, Liverpool)

3000 B.C.) settlement at Teleilât el-Ghassûl on the east bank of the Jordan Valley. All but one of the fragments of burial garments from Jericho tombs in the Early and Middle Bronze Ages (*ca.* 3100-1700 B.C.) were made from plant fibers, either palm bast or linen. The thread is plyed, and some pieces show a selvedge. (*See* WEAVING.) The cloth has up to 45 by 50 threads per inch, similar to a fine linen handkerchief today. From the Late Bronze (*ca.* 1550-1250 B.C.) mining settlement at el-Menê'iye (Timna') near the Gulf of Aqabah comes a relatively large find of wool and linen fabric dyed red and yellow (*see* DYE); some pieces were used as hangings and awnings for a shrine. The fabric is probably a product of Palestine.

No textile remains from the OT period proper have been found in Palestine, but textile finds from the Roman and following periods (63 B.C.) are rather numerous. Cave I at QUMRÂN contained seventy-seven fragments of linen cloth, among them wrappings for the scrolls. Some of these pieces show a selvedge as well as a woven design in blue thread dyed with indigo (cf. Nu. 15:38). Fineness ranges from 25 by 20 to 45 by 45 threads per inch. From the Cave of Letters, a shelter during the Bar Cochba Revolt (A.D. 132-135), come many well-preserved, dyed linen fragments and rolls of thread. The caves of the Wâdî Murabba'ât have yielded a large number of garments and fragments of linen, wool, and cotton cloth (many of them dyed and embroidered), as well as mixed fabrics — cotton-wool, cotton-linen, and silk-linen. Although it is not possible to date the textiles from the last two sites with certainty, they are probably from the Roman period and later.

II. Production of Linen.–Linen fabric is made from the stalks of the FLAX plant (*Linum usitatissimum*; Heb. *pištâ*), whose growth is described in Ex. 9:31. When the stalks (Heb. *pištê hā'ēṣ*) are about half a meter (2 ft.) tall, they are pulled up, allowed to dry for a time in the field, then soaked (retted) for several weeks and allowed to dry again for a much longer period — about two years. After that they are beaten, scraped, and combed (hackled) to remove the outer covering and pulp, leaving the fibers. The Bible does not contain a description of the steps in linen production, but the GEZER CALENDAR (*ca.* 10th or 9th cent. B.C.) refers to the month of the agricultural year in which flax is pulled. It is probably the second, longer drying period after the "retting" that is mentioned in Josh 2:6. After the flax fibers are cleaned and combed, they are ready to be spun. The spun thread is woven into cloth, which can then be draped or sewn into GARMENTS. Lev. 19:19 prohibits the mixing of two fibers, probably wool and linen.

The many OT references to women spinning (e.g., Ex. 35:25) and to other aspects of the local linen production (Josh. 2:6; 1 Ch. 4:21; Prov. 31:13, 19), combined with the above-mentioned local finds of linen of very good quality, make unnecessary the hypothesis that fine linen must have been imported from Egypt.

III. Biblical Terms.–The OT and NT contain a number of terms for flax and linen. Heb. *pištâ* refers to the flax plant (Ex. 9:31) or to lamp wicks of flax or tow (Isa. 42:3; 43:17; cf. *línon* in the LXX and Mt. 12:20). *Pištim* refers to stalks of flax (*pištê hā'ēṣ*, Josh. 2:6; LXX *linokaláme*), rope made of flax (Ezk. 40:3), a supply of flax for spinning or weaving (Hos. 2:5; Prov. 31:13), or plain linen fabric in general (Lev. 13:47f., 52, 59; Dt. 22:11). The term is also used for the fabric of Jeremiah's waistcloth (Jer. 13:1) and the garments of the priests in Ezekiel's vision (Ezk. 44:17f.).

Hebrew *baḏ* (LXX *línon, býssinos, bad*) likewise refers to linen fabric for garments. It usually appears in compound expressions that specify the kind of garment, e.g., breeches (Ex. 28:42; 39:28; etc.), all priestly garments (Lev. 16:4, 23, 32; *see* GARMENTS VIII), an ephod (1 S. 2:18). In later writings the plural *bāḏîm* occurs in the expression "man clothed in linen," which in Ezekiel's vision refers to a scribe of priestly or angelic character (Ezk. 9:2f., 11; 10:2, 6f.) and in Daniel's vision refers to an angelic being (Dn. 10:5; 12:6f.).

Hebrew *šēš* (LXX *býssos, býssinos*) seems to be another linen fabric, probably of finer quality than *baḏ*, and more specific than *pištim*. It occurs in expressions indicating that it was used by rich, important, or priestly people: the pharaoh gave Joseph garments of *šēš* (Gen. 41:42); it was worn by the competent and prosperous woman in Prov. 31:22; and it occurs repeatedly in the Exodus instructions for the tabernacle and priestly vestments in the expression *šēš mošzar* (<*šāzar*, "twist"), "fine twined [or twisted] linen" (Ex. 25:4; 26:1, 31, 36; etc.). Since all linen is twisted in spinning, that expression may refer either poetically to the initial process or, more likely, to a second twisting process — i.e., the plying of two spun threads into a stronger thread, of which the textile remains from Jericho and Qumrân furnish examples.

Hebrew *bûṣ* (LXX *býssos, býssinos*) and its Greek derivatives are usually translated "fine linen." These terms can also refer, however, to fabric of linen, cotton and wool mixed, or even silk; therefore they apparently refer to the fabric's quality (i.e., its fineness and whiteness) rather than its fiber. *Bûṣ* was produced locally (cf. 1 Ch. 4:21, which refers to a family business in Beth-ashbeah) as well as in Edom (or Syria), which traded it — along with crimson, purple, and embroidered fabrics — with Tyre (Ezk. 27:16). This fine white fabric was used for royal (cf. Est. 8:15) and priestly (cf. 1 Ch. 15:27; 2 Ch. 5:12) garments and in the veil of Solomon's temple (2 Ch. 3:14; cf. 2:14 [MT 13]). Cords of *bûṣ* were used to hold up the hangings at the palace of Susa (Est. 1:6).

Hebrew *sāḏîn* (LXX *sindṓn, hyakínthinos*) denotes a large linen sheet of considerable value that could be used either as a covering of some sort or as an outer garment (cf. Jgs. 14:12f.). These linen wrappers were among items made and sold by the ideal woman described in Prov. 31:24, and they were among the luxuries enjoyed by the women of Jerusalem (Isa. 3:23).

The NT uses some of the same terms as the LXX. Gk. *býssos* and *býssinos* ("made from *býssos*"), like Heb. *bûṣ*, refer to white fabric of very fine quality. It was a luxury item worn by the rich (cf. Lk. 16:19) and bought by the inhabitants of Rome (Rev. 18:12, 16). It was also the garb of the Lamb's bride and of the armies of heaven in John's vision (Rev. 19:8, 14; cf. 15:6, which uses *línon* to describe the robes of angelic beings).

Greek *sindṓn* refers to linen cloth of fine quality. The young man who fled naked on the night of Jesus' arrest had worn only a linen tunic or sheet (Mk. 14:51f.). In preparation for His burial, Jesus' body was wrapped in a shroud of this material (Mt. 27:59; Mk. 15:46; Lk. 23:53).

Greek *othónion* (diminutive of *othónē*) refers to a linen cloth or bandage used in preparing a corpse for burial (Jn. 19:40; 20:5-7).

An allusion is probably made to linen in Eph. 5:27, although the fabric is not named. Linen is a very durable and absorbent fabric that becomes more comfortable with repeated washing. Its absorbency, while making it more comfortable in warm weather, also makes it susceptible to grease spots and other types of stains, and its fibers wrinkle badly when washed and crease easily when worn. Thus the beauty of a garment "without spot or wrinkle" (Eph. 5:27) was easily understood as a symbol of perfection.

LINTEL [Heb. *mašqôp* (Ex. 12:7, 22f.), *'ayil* (1 K. 6:31)]; AV also UPPER DOOR POST (Ex. 12:7); NEB also PILASTER (1 K. 6:31). *Mašqôp* is the wooden beam across the tops of the doorposts that ties the walls together and holds up the structure above it. At the time of the Exodus the Israelites splattered the blood of the Passover lamb on the posts and the lintel. *'Ayil* is more difficult to translate with certainty. In Ezekiel's vision of the temple the word, used twenty-two times, is translated "vestibule" (40:14), "jambs" (v. 16, RSV), "portico" (NIV), "side pillar" (NASB), etc. BDB translates it "projecting pillar or pilaster" (p. 18). The LXX rendering in Ezekiel is *pylē*, "gate," "door." Complicating the matter is the use of *'ayil* in 1 K. 6:31. The MT reads *hā'ayil mᵉzûzôṯ ḥᵃmišîṯ*, which the RSV translates, "The lintel and doorposts formed a pentagon." The LXX reads *kaí phliás pentaplás*, "and the lintel was fivefold." O. R. Sellers (*IDB*, III, 135f.) suggested that there was no horizontal lintel; instead, two beams met at an angle and with the doorposts formed a pentagon. This is structurally unsound. Also, the MT says nothing about two beams, while the LXX does not mention doorposts. It is impossible to translate the MT as "the lintel of the doorposts" because of the location of the definite article. The ordinal cannot be a numerical adjective because of its gender and number. The LXX allows the best translation, but caution is necessary. W. S. L. S.

LINUS lī'nəs [Gk. *Linos*]. One of those who joined the apostle in sending greetings, presumably from Rome, to Timothy (2 Tim. 4:21). This Christian was obviously an associate of the writer and must have been prominent in the Church, possibly an elder, but Scripture itself does not give any information about him. Irenaeus, however, in *Adv. haer.* iii.3.3, identified him with the Linus who was the immediate successor of Peter and Paul in the leadership of the Roman church. Tertullian, it is true, moved directly from the apostles to Clement (*De praescr. haer.* 32), but Eusebius (*HE* iii.2) had the same succession and made the same identification as Irenaeus. Eusebius added (iii.13) that the bishopric of Linus lasted twelve years from the death of Peter, usually calculated as A.D. 64-76. This became the established tradition in the Church, except that Jerome gave eleven years rather than twelve as the length of Linus's episcopate. Apost. Const. vii.46 contains a report, which cannot be verified, that a bishop of Rome was "Linus the son of Claudia," apparently the Claudia mentioned in 2 Tim. 4:21. The theory has been advanced that the Pudens of the same text might have been Linus's father, and that this PUDENS and CLAUDIA were the couple mentioned by the Roman author Martial (*Epigrams* iv.13). The Roman Breviary supplies the additional details, also without support, that Linus was born in Volterra, Etruria, and that he suffered martyrdom under the consul Saturninus. The latter statement is particularly doubtful, since there are no reports of persecution at that period. September 23 has been set aside as the day for the commemoration of Linus. G. W. B.

LION [Heb. *'aryēh* (Gen. 49:9; Dt. 33:22; Jgs. 14:8f.; etc.), *'ᵃrî* (Nu. 23:24; 24:9; Jgs. 14:5; etc.); cf. Akk. *arū*; *kᵉpîr* (Jer. 2:15; 51:38; Ezk. 32:2; etc.; "young lion," Job 4:10; Ps. 17:12; 34:10 [MT 11]; etc.), *kᵉpîr 'ᵃrāyôṯ* ("young lions," Jgs. 14:5), *lāḇî'* (Dt. 33:20; Job 38:39; Isa. 5:29; etc.; "lioness," Gen. 49:9; Nu. 23:24; 24:9; etc.), *lᵉḇîyâ* ("lioness," Ezk. 19:2); cf. Ugar. *lb'*; Akk. *lābu*; *layiš* (Prov. 30:30; Isa. 30:6; "strong lion," Job 4:10); cf. Arab. *laith*; *šaḥal* (Job 10:16; 28:8; Ps. 91:13); "fierce lion," Job 4:10); Aram. *'aryēh* (Dnl. 6:7, 12, 16 [MT 8, 13, 17], etc.); Gk. *léōn* (2 Tim. 4:17; He. 11:33; 1 Pet. 5:8; etc.); Lat. *leo*]. Heb. *'aryēh* and *'ᵃrî* occur most frequently; the other terms occur only as poetic variants.

The lions of ancient Palestine were the Asiatic subspecies (*Panthera leo persica* Mey) of the species *Felis leo*, and were fierce carnivores that were found also in Syria, Asia Minor, Greece, Mesopotamia, and northwest India. In Africa the lion was distributed widely, and though some had large manes, others of the species had shorter and paler manes. The population has been reduced dramatically over the centuries and now requires human assistance to ensure its survival. Lions had ceased to inhabit Greece by *ca.* A.D. 100, and apparently became extinct in Palestine with the end of the Crusades (13th cent. A.D.). They survived longer in Syria and Mesopotamia, being reported there as late as the 19th century. The last Asiatic lions in Iraq and Iran evidently disappeared in the early decades of the 20th century.

As opposed to some other carnivores, the lion lives and hunts in groups, having large animals as its prey. Lions normally attack humans only when provoked, although some develop a taste for human flesh. In antiquity the lion was a prized animal of the hunt, being particularly favored by Assyrian kings because of its strength and boldness. But apart from being hunted for sport, lions were sometimes kept in captivity, and the den of lions into which Daniel was thrown (Dnl. 6:7) was perhaps part of a royal zoo. The Assyrian king Ashurnasirpal II (*ca.* 883-859 B.C.) is reported to have maintained a breeding farm for lions at Nimrûd, while in Egypt Ramses II (*ca.* 1290-1224 B.C.) supposedly had a pet lion that he took into battle.

Such a respected animal naturally found its way into both ancient Near Eastern art and religion. When equipped with wings, presumably to augment its already formidable strength, it appeared in mythology and art as a divine cherub. Statues of winged lions were placed at the entrances of palaces and important public buildings in Assyria and Babylonia to bring the protection of magical forces to the structures and their occupants. Assyrian palaces were not infrequently decorated with bas-reliefs showing the king and his courtiers engaged in a lion hunt (*see* picture in ASHURBANIPAL). Probably the most outstanding artistic representation of a lion was seen in the glazed brick figures that decorated the Processional Street leading from the Ishtar Gate in Babylon (6th cent. B.C.; *see* Vol. I, Plate 6). The artists responsible for executing these remarkable depictions had clearly studied the musculature of the lion at first hand, and the work is a dramatic illustration of the heights to which contemporary Mesopotamian art had risen.

In Palestinian art the lion had attained a place of prominence by the end of the Amarna age, as indicated by the statue of a lion excavated from the ruins of a Canaanite shrine found in levels at Hazor that were dated to the 13th cent. B.C. (Y. Yadin, *BA*, 19 [1956], 10, figure 1).

The association of lions with temples and palaces in Mesopotamia and Canaan was followed in the construction of the Solomonic palace (1 K. 10:19f.) and the temple (1 K. 7:29, 36). This motif appeared again in Ezekiel's vision of the temple, in which the wood paneling that lined the inner room of the temple was decorated with various objects, including the face of a young lion (Ezk. 41:15-19). Other instances of Hebrew art involving lions include the ivory inlays from Samaria (9th cent. B.C.; cf. J. W. and G. M. Crowfoot, *Early Ivories from Samaria* [1938]), and the seal of Shema, Jeroboam II's steward, which depicted a lion (*see* picture in SHEMA). *See also* Plate 3.

In Mesopotamian religion the goddess Ishtar was generally represented in Assyria as the war deity, and rode upon, or was accompanied by, a lion. In Babylon, by contrast, she was associated with the mythological dragon (*mušrussu*), as on the Ishtar Gate (S. H. Hooke, *Babylonian and Assyrian Religion* [1953], p. 30). In the Assyrian form of the New Year Festival (*akîtu*), the traditional Babylonian enactment between Marduk and the Dragon of Chaos may have been replaced by some form of contest between the king and a lion or lions, but this is uncertain. According to E. D. Van Buren the lion symbolized the militant character of most early Mesopotamian deities rather than being the emblem of a particular god (*Fauna of Ancient Mesopotamia as Represented in Art* [1939], p. 4).

In Egyptian religion the lion was less prominent than the bull (J. Černý, *Ancient Egyptian Religion* [1952], p. 24). A superbly chiseled granite lion was recovered from Tutankhamen's tomb (G. Steindorff and K. C. Seele, *When Egypt Ruled the East* [1963], p. 100 and figure 25), and bore an inscription to the effect that Tutankhamen had commissioned it in memory of his "father" Amenhotep III.

Lions are mentioned in the Bible for their strength (Jgs. 14:18), boldness (2 S. 17:10), ferocity (Ps. 7:2 [MT 3]), and stealth (Ps. 10:9; Lam. 3:10). The striking character of the millennial period is illustrated by references to fierce animals such as the lion, bear, and leopard living peaceably with other animals and children (Ps. 91:13; Isa. 11:6-8; 65:25). The roaring of the lion is often mentioned (Job 4:10; Ps. 104:21; Isa. 31:4; Jer. 51:38; Ezk. 22:25; Hos. 11:10). Judah is a "lion's whelp" (Gen. 49:9), likewise Dan (Dt. 33:22). The facial appearance of some of David's warriors was described as leonine (1 Ch. 12:8), while the wrath of the king was likened to the roaring of a lion (Prov. 19:12). David's enemy (Ps. 17:12) and the devil (1 Pet. 5:8) were curiously alike as far as their marauding, greedy ways were concerned. The violence of divine anger against Israel and Judah suggested to Hosea the threat of a predatory lion (Hos. 5:14).

Nearly all references to the lion are figurative. The only notices of the lions in narrative are of the lions slain by Samson (Jgs. 14:5), by David (1 S. 17:34f.), by Benaiah (2 S. 23:20); the prophet slain by a lion (1 K. 13:24; also 20:36); the lions sent by the Lord among the settlers in Samaria (2 K. 17:25f.); Daniel in the lions' den (Dnl. 6:16). In all these cases the word used is *'aryēh* or *'ᵉrî*, although in Jgs. 14:9-18 no fewer than three different terms (*kᵉpîr*, *'aryēh*, and *'ᵉrî*) occur. This matches the variety of usage in poetic passages such as Job 4:10f., where *'aryēh*, *šaḥal*, *kᵉpîr*, *layiš*, and *bᵉnê lāḇē'* are found.

LIP [Heb. *śāpâ*, *śᵉpāṯayim*]; NEB also MOUTH, WORDS, SPEECH, TONGUE, TALK, "(cattle from our) pens" (Hos. 14:2 [MT 3]; see comms.), etc.; [*śāpām*] (Ezk. 24:17, 22; Mic. 3:7); NEB UPPER LIP, MOUTHS; [*ḥēḵ*] (Hos. 8:1); AV MOUTH; [*peh*] (Ps. 50:16; Prov. 6:2; Jer. 7:28; Ezk. 29:21; 33:31); AV MOUTH; NEB also various paraphrases; [*mûṣāqâ*] (Zec. 4:2); AV, NEB, PIPES; [Gk. *cheílos*] (Mt. 15:8; Mk. 7:6; Rom. 3:13; 1 Cor. 14:21; He. 13:15; 1 Pet. 3:10); [*stóma*–'mouth'] (Lk. 22:71; Rom. 10:8-10; 1 Pet. 2:22); AV MOUTH; NEB also "retort"; **UPPER LIP** [Heb. *śāpām*] (Lev. 13:45).

In general, Hebraic thought regarded lips not only as physical organs but also as organs of speech. As physical organs, the lips may indeed be beautiful, "like a scarlet thread" (Cant. 4:3), and may be touched, as in Isaiah's vision (Isa. 6:7). Like the MOUTH and TONGUE in Hebraic thought, however, the lips are primarily associated with speech; as organs of speech they frequently seem to act independently. The lips may proclaim God's praises (Ps. 119:171), shout for joy (71:23), and spread knowledge (Prov. 15:7); or they may utter sinful words (Ps. 59:12 [MT 13]), speak insolently and dishonestly (31:18 [MT 19]), and talk of mischief (Prov. 24:2). The lips may function independently of the heart, in a hypocritical manner (Isa. 29:13; Mt. 15:8f. par. Mk. 7:6f.). But ultimately the heart and mind, the central and inner life of a person, direct the utterances of the lips: "The mind [AV "heart"; Heb. *lēḇ*] of the wise makes his speech judicious, and adds persuasiveness to his lips" (Prov. 16:23; also cf. 4:23; Rom. 10:8-10).

The term occurs in certain Hebrew idioms. Moses' claim to be "a man of uncircumcised lips" (Ex. 6:12, 30) meant that he was slow of speech, "a halting speaker" (NEB). In the Hebrew idioms "truthful lips" (Prov. 12:19), "righteous lips" (16:13), etc., "lips" by synecdoche may designate a person uttering a speech; thus the NEB has "truth spoken" in Prov. 12:19 and "honest speech" in 16:13. "Lip" (Heb. *śāpâ*; Gk. *cheílos*) may also mean language (Isa. 28:11; 1 Cor. 14:21; the RSV translates *śāpâ* "language" in Gen. 11:1; Isa. 19:18).

Three Hebrew terms require further explanation. *Śāpām* refers to the upper lip, moustache, or beard; according to proper Hebrew practice, a person covered his *śāpām* with his hand or his clothing to express deep grief, shame, and silent submission. Hence the unclean leper had to cover his *śāpām* and cry "Unclean, unclean" (Lev. 13:45). Ezekiel was told not to cover his *śāpām* and thus not to follow the rites for mourning when sinful Israel was to be decimated (Ezk. 24:17, 22). Micah spoke of false prophets who covered their *śāpām* in shame and confusion (Mic. 3:7). *Ḥēḵ* refers to the palate, gums, or lips, the part of the mouth (in Hos. 8:1) in contact with the trumpet. *Mûṣāqâ*, or *mûṣeqeṯ*, refers to one of the lips (or protuberances, spouts, or pipes) for oil lamps (Zec. 4:2); perhaps the wicks rested by these lips, or perhaps oil was poured through a *mûṣāqâ*. *See* LAMP I. M. W. MEYER

LIQUOR (AV Ex. 22:29 [MT 28]; Nu. 6:3; Cant. 7:2 [MT 3]). The AV rendering of three hapax legomena. In Ex. 22:29, AV, "liquor" translates Heb. *dema'*, which appears to be related to *dāma'*, "shed tears" (RSV "outflow of a press" is a paraphrase based on the context). Most commentators have followed the LXX and have taken *dema'* as the product of the wine press, i.e., wine, although it could refer to olive oil, also the product of a press. In Nu. 6:3 the Nazirite is prohibited from drinking Heb. *mišrâ*, which probably indicates the "juice" (so RSV) of the grapes; cf. *šārâ*, "let loose," hence *mišrâ*, "that which is let loose." In Cant. 7:2, as in rabbinical Hebrew and Aramaic, Heb. *mezeg* probably refers to mixed or spiced wine (see also M. Pope, *Song of Songs* [*AB*, 1977], pp. 619f.).

See also DRINK, STRONG; WINE. G. A. L.

LIST [Heb. *mispār*–'number'] (1 Ch. 25:1; 27:1); AV, NEB, NUMBER. The RSV paraphrases Heb. *mispār* in these two texts since in the context what follows is a list of names rather than a number. The AV uses "list" in the obsolete sense of "wish" to translate Gk. *thélō* (RSV "please," Mt. 17:12 par. Mk. 9:13; RSV "will," Jn. 3:8) and *boúlomai* (RSV "desire," Jas. 3:4).

LISTEN. Most often in the RSV OT a translation of Heb. *šāmaʿ* (AV usually "hearken") and in the RSV NT a translation of Gk. *akoúō* (AV often "hear"). Other NT terms that convey the idea of active listening, and sometimes also of understanding, responding to, or obeying, are: *eisakoúō* ("obey," 1 Cor. 14:21), *epakoúō* (2 Cor. 6:2), *epakroáomai* (Acts 16:25), *peitharchéō* (Acts 27:21), *manthánō* ("learn from someone as a teacher," 2 Tim. 3:7). "Listening" in 2 Tim. 4:4 translates the noun *akoḗ*.

I. General.–Literary scholars and general readers alike agree that the Bible is the greatest body of literature in human history. Surely it is supreme in English literature (with which this article is concerned); so much so, indeed, that great treasures in English literature from Caedmon to T. S. Eliot are incomprehensible to those ignorant of the Bible. For many generations, and certainly from the 17th cent. through most of the 19th, the only two books commonly found in simple but literate English and American homes were the Bible and the works of Shakespeare. They were sufficient to provide a liberal education and a deep grounding in the power, beauty, and wisdom of great literature. (Shakespeare himself relied partly on the Great Bible of 1539 but chiefly on the Geneva Bible of 1560, translated by English Puritans fleeing the persecutions of Mary Tudor's reign. The AV appeared only five years before Shakespeare's death in 1616, after the bulk of his work was accomplished.)

II. Compatibility of Hebrew and English.–When one remembers that literary style resides largely in the elements of the original language — sounds, rhythms, figures of speech, word connotations, and the like — and that it is notoriously difficult to capture in translation, one is grateful for the richness and variety of English. Our language is a river into which has flowed (in approximately chronological order) the blunt vigor of Anglo-Saxon, the rotund power of Latin words and periods, the precision of Greek, the melody and lilt of Italian, the mellifluous grace of French, and the muscularity of German. Hence, English is uniquely capable of reflecting the literary qualities of other languages, particularly those of OT Hebrew, which, though deficient in words of abstract meaning, is rich in concrete, vivid, sensuous imagery. Ernest Renan observed that this "primitive union of sensation and idea" distinguishes Semitic languages from the Aryan. When, therefore, the imagery of the Hebrew is translated literally into English (relying heavily on the Anglo-Saxon element in English), the translation captures precisely the meaning and the feeling intended by the original writer. The translatability is enhanced, too, by the universality of Hebrew imagery, drawn as it is from the forces of nature (e.g., lightning [Nah. 2:4]; rain [Ps. 72:6]; drought [Hos. 13:5]; thunder [Job 26:14]), animals (e.g., hart [Ps. 42:1]; horse [Job 39:19-25]; lion and leopard and bear [Hos. 13:7]; eagle [Ps. 103:5]; whale [Job 41:1-3]), the human body (e.g., heart [Ps. 4:7]; bones [Ezk. 32:27]; hands [Isa. 49:16]); home and shelter (Ps. 84:3f. [MT 4f.]); crops and agriculture; shepherding; food and drink; and household relationships. There is no end to the use of such imagery, and one may, literally, turn to the OT at random and find instances on every page. Such imagery, based on the most universal experiences of humankind, enhances immensely the translator's ability to transfer the literary qualities of the original to another tongue. Hundreds of such images have become a part of our language — "the sweat of his brow," "by the skin of my teeth," "a thorn in the flesh," "weighed and found wanting," "arose as one man," etc. In every case the abstract is communicated by the concrete, the idea is (in John Donne's phrase) "felt upon the pulses," the intangible is given three-dimensional tangibility. David could have written (and if he had been Greek he probably would have), "Deity manifests an interest in and a protective concern over the affairs of mankind." But he didn't. He wrote, "The Lord is my shepherd." From that point on, Ps. 23 consists of a succession of concrete images, each evocative of emotion and sensuousness, each going to our hearts as well as to our heads.

III. Characteristics of Literature.–"Literature" is that kind of writing which is as concerned with moving the reader as with informing him. Plain expository prose is as effective as literature, and more economical, in transmitting facts and ideas from one mind to another. (Hamlet really adds nothing to the basic idea after he has said: "To be or not to be, that is the question." The rest of the soliloquy, largely imagery, is literature.)

Literature is not, however, merely the adorning of ideas for the sake of adornment. An analogy may be found in the ark containing the tablets of the law. A simple wooden box would have served just as well for mere containment. But by God's own command, and on His own specifications, the ark was to be enriched in meaning and power by visible beauty (Ex. 25:10-22). It was God's purpose to commune with His people from above the mercy seat (Ex. 25:22). It was both fitting and necessary that His presence should show forth His beauty. How much more, then, should His written Word be invested with beauty, for in His Word He communes with His people constantly and intimately.

A. Order. How or why humankind is moved by beauty is ultimately a mystery. The aesthetic capability is innate in humankind, put there by God as one aspect of humankind's reflection of the Creator's image. Very near the heart of the mystery, perhaps, is fallen humanity's desperate yearning for order, the opposite of chaos. Order implies purpose, meaning, sequence, beginning-middle-ending. All works of true literature have this quality of wholeness, although the area encompassed may be small. They all (to use Milton's phrase from "Lycidas") comb the tangled

LITERATURE, THE BIBLE AS

locks of grief and confusion, enabling us to transcend the fragmentariness, the seeming meaninglessness and hopelessness, of random chance. The Bible, from Genesis to Revelation, gives us the ultimate order, the order determined from eternity by God for His universe.

B. Unity. Order implies also unity. And here, the Bible, humanly considered, presents another mystery. How can a book written over some fifteen hundred years by at least a score of authors, some learned and some not, reflecting widely divergent geographical, social, political, and intellectual environments, winnowed out over the centuries from masses of seemingly similar writings, possess unity? Embraced within the book's covers are all forms of literature — prose and poetry, narrative, history, epic and lyric verse, drama, biography, parable, debate, and many more. Here are myriad characters reflecting every human condition from the most elevated to the most debased, all presented with an economical vividness unsurpassed by Shakespeare or Dickens. Here is the rise and fall of empires, the life of the desert nomad and that of the silken courtier in great palaces. Here is every philosophy, theology, ethical system, social organization humanity has ever thought of. As Dryden said, figuratively, of Chaucer, "Here is God's plenty." The Bible is that, literally.

To the natural mind this scope and unity have no explanation. To the believer there is only one explanation: God so ordained it and brought it into being. Using the varied intellectual, spiritual, and aesthetic talents of many writers, He fashioned a verbal tapestry as intricate and exquisite as the fabric of nature, formed by His fingers.

Nor is the unifying theme far to seek, for at the center is God's revelation of Himself and of His redemptive plan. In the words of Roland Frye (*The Bible: Selections from the King James Version* [1965], p. xvi), this self-revelation is accomplished through "the interaction between individuals, societies, and God. . . . The characterization of God may indeed be said to be the central literary concern of the Bible, and it is pursued from beginning to end, for the principal character, or actor, or protagonist of the Bible is God."

It is not surprising, therefore, that the Creator of every aesthetic principle should choose (set apart, "sanctify") for His purposes those endued with literary capabilities, guiding them and preventing them from error but not overriding their individualities, to compose His Book — just as He chose cunning workmen of every craft to build and adorn His wilderness tabernacle (Ex. 26–27) and His Jerusalem temple (1 K. 6–7).

C. Wholeness, Resolution, Serenity. Great literature serves not only the human yearning and need for order and unity, but also the need for harmony, serenity, and fulfillment. According to Aristotle the objective of great literature is *kátharsis,* the purging or purification of the passions and the will through the participation of the reader or auditor in the sufferings of others, chiefly the hero, leading to understanding and serenity. "Calm of mind, all passion spent" is how Milton phrased it in the last line of *Samson Agonistes.* The Bible calls it "peace" (Jn. 14:27). Matthew Arnold asserted that great literature (as distinct from mere light verbal entertainment) always changes the reader's conduct and understanding of life. The greatness of the Bible measured by this criterion is transcendent.

***IV. Literary Devices in the Bible.**–A. Parallelism.* The most common device is parallelism, the repetition of an idea in parallel form for emphasis, enrichment, and memorability. Students of Hebrew poetry agree that there are three basic forms of parallelism: synonymous, antithetic, and "shadow" (or synthetic). In the first the idea is simply repeated in another or an enlarged image, e.g., "The Lord reigns; let the peoples tremble!/He sits enthroned upon the cherubim; let the earth quake!" (Ps. 99:1). In the second the basic idea is repeated from an opposite or contrasting perspective, e.g., "A wise son makes a glad father,/but a foolish son is a sorrow to his mother" (Prov. 10:1). In the third, "shadow" parallelism, the correspondence comes from a rhythmic balance between the two parts, and uses an entirely different kind of image, not a repetition of the first in positive or negative form, e.g., "As the heart longs for flowing streams,/so longs my soul for thee, O God" (Ps. 42:1). (The book of Proverbs consists almost entirely of thoughts expressed in parallel structures, and the Psalms are filled with all kinds of parallelisms.)

B. Rhythm. We think of poetry primarily as rhythm, with its metronomic regularity of alternation of stressed and unstressed syllables (as in Alexander Pope's "Be NOT the FIRST, by WHOM the NEW is TRIED,/Nor YET the LAST to LAY the OLD aSIDE"). But there is "another harmony of prose," as Dryden phrased it, and it can be of a subtler, richer kind than that of mechanically regular scansion. A review of the styles of the great English translations of the Bible from Wyclif (*ca.* 1382-1384) to the present shows a constant effort not only to say what the original writers meant to say but to do so with a moving and pleasing rhythm. (The RSV retains the rhythm of the AV almost intact.) Wyclif, for example, wrote, "Thei schulen no more hungre nether thirst" (Rev. 7:16). The AV addition of just two words (kept in the RSV) enhances the rhythm: "They shall hunger no more, neither thirst any more." The simple change adds the magic, with its quiet, serene (unaccented) ending. Wyclif wrote, "He is suche a man as hath good experience of sorrows and infirmities" (Isa. 53:3). The Geneva version made it, "A man of sorrows and hath experience of infirmities." With enhanced rhythmic beauty, the AV and RSV read, "A man of sorrows and acquainted with grief." (The passages must be read aloud if one is to hear the rhythmic quality sought.) Such illustrations could be multiplied almost without number. Every language has its own rhythmic capabilities (listen to the Irish, even when they are speaking English!); but when one hears Hebrew spoken well, one realizes that the rhythmic characteristics of the original tongue, like its concreteness and imagery, are eminently transferable to English.

C. Imagery. Another major literary device of both Hebrew and English, already referred to above in passing, is the constant use of imagery — the abstract expressed in concrete ways, figurativeness. Imagery serves many purposes, including vividness, brevity, and memorability. The most important and prevalent figure of speech in the Bible is metaphor, the expression of a correspondence between different things. We use metaphors every day — "his anger blazed up," "she's the apple of her father's eye," "he's climbed to the top of the ladder," etc. These statements are not literally true, but are "truer" by reason of their mingling of the physical with the mental, and by a deeper-than-literal correspondence. Dramatizing the variety of metaphors in the Bible, Harry Boonstra has written (*Christianity Today*, Dec. 17, 1976, p. 22): "God as a dragon, or a leopard, or lye, or a hunger, or a woman in labor. God's people as stubborn oxen, dry rot, pottery, silver, soil, dew, a bride. God's relationship with his people as that of a lover wooing his sweetheart, a ferocious bear ready to tear up his prey, a parent teaching a toddler how to walk . . ." — all metaphors.

Next to metaphor, simile is the most frequent figure

LITERATURE, THE BIBLE AS

of speech in the Bible. In simile the comparison is stated with "like" or "as": "Is not my word like fire, says the Lord, and like a hammer which breaks the rock in pieces?" (Jer. 23:29); ". . . coming up like locusts for number . . ." (Jgs. 6:5); "my love is like a gazelle or a young stag" (Cant. 2:9); etc. Synecdoche, also frequent in the Bible, represents a whole by referring to a part, as in "Thou preparest a table before me . . ." (Ps. 23:5), where "table" stands for the entire feast — honor, friends, food and drink, and fitting dining room. Metonymy is that figure of speech in which the name of one object or idea is used for another to which it is related, as in "Thou hast exalted my horn . . ." (Ps. 92:10), wherein "horn" connotes power, rule, authority. Litotes is similar to irony, involving a statement recognized as conveying a literal meaning opposite to the one intended, as in Job's bitter indictment of his "friends": "No doubt you are the people and wisdom shall die with you" (Job 12:2). Hyperbole is deliberate exaggeration for dramatic effect, as in "I will surely . . . make thy seed as the sand of the sea" (Gen. 32:12). Symbolism, though technically not a figure of speech, is similar in its expansion of the meaning and implication of the truth uttered, going, indeed, far beyond the immediately understood. Ezekiel is rich in symbolism (see particularly 1:4-28), as is Revelation.

D. Sound and Connotation. Another literary device, and the one least translatable directly, is the use of words for their sounds and original connotations. In his splendid essay on the AV, "The Noblest Monument of English Prose" (*Essays in Appreciation* [1936]), the great Harvard professor of literature, John Livingstone Lowes, pointed out how nearly impossible it would be to translate the following lines of Shakespeare without losing the effect of their drowsy, narcotic sounds and connotations: "Not poppy nor mandragora,/Nor all the drowsy syrups of the world/Shall ever med'cine thee to that sweet sleep/Which thou owedst yesterday" (*Othello*, III, 3, lines 331f.). Onomatopoeia, the use of words that actually sound like the objects denoted, is the most difficult device to translate, and the original effect is usually lost. A notable example of both sound-connotation and onomatopoeia occurs in Isa. 28:10, 13 (*see* HUMOR IN THE BIBLE). The best that the translator can do is to search for the English word best expressive of the effect of the original.

V. Genres in the Bible.–A. Epic Drama. The term that most aptly describes the genre of the Bible as a whole is "epic drama." An epic is a long, serious, noble work expressive of the essence of a people, its history, ideals, nature, and greatness — e.g., the *Odyssey*, the *Iliad*, the *Aeneid*, *Beowulf*, *Paradise Lost*. The epic involves mighty deeds, marvelous adventures, myriad characters, the search by an entire people or nation for destiny and fulfillment, replete with victory and life, sacrifice and death, great battles — and, above all, the deeds of a hero who embodies all that is glorious. In these respects, the Bible, viewed as a single, unified whole, obviously transcends all literature. John Milton, desiring to write an epic encompassing all humanity, not just a single nation or period, inerrantly recognized that there is in human history on earth only one Hero, and in *Paradise Lost* and *Paradise Regained* the Son of God, named on earth Jesus, is He. (Some critics, understanding neither Milton nor his reliance on the Bible, have foolishly declared that Adam is the hero, and some perversely have even put Satan in that role.)

B. History. As a genre, history is recognized as an art. Anyone with patience can collect such facts as are available and arrange them in chronological order; but the historical portions of the Bible (a major portion of the whole) seem effortlessly to do what only the greatest historians have done. By a marvel of selectivity, a period of thousands of years is given unity, continuity, comprehensibility, and vividness. By the mingling of sharply etched moments of action, character, and dialogue with summary sweeps of long periods of time, one is held engrossed. Always the focus is maintained: the story is about God's dealing with His own people, and the working out of His redemptive plan. Great nations rise and fall, but they appear only as they affect Israel. Episodes are never inserted at random, nor extended beyond their significance. (The story of Joseph takes up the last fourteen chapters of Genesis because the spiritual lessons are central.) When we see the Bible as a whole, we discover the force of Jesus' words to the two on the Emmaus road: "And beginning with Moses and all the prophets, he interpreted to them in all the scriptures the things concerning himself" (Lk. 24:27), for He is the pervasive Hero.

C. Lyric Poetry. The modifier "lyric" (from "lyre") reminds us that Hebrew poetry was commonly chanted to the accompaniment of stringed instruments, not in elaborate melodies like modern arias but with rhythmic musical beats to emphasize the couplet (or distich) form of the verse. Each couplet normally contains a complete meaning, often in parallel form, and may be best seen in "wisdom" (gnomic, aphoristic) literature, as exemplified in Proverbs. Such regularity served a mnemonic as well as a rhetorical and aesthetic purpose. The greatest storehouse of lyric poetry is the book of PSALMS, an unmatched collection, which has served as the hymnbook of Jews and Christians ever since David. Even in the chiefly historical books of the OT, lyric poetry abounds — public prayers (2 Ch. 6:14-42; Neh. 9:6-37), songs of praise and thanksgiving (1 Ch. 16:5-36), elegies (2 S. 1:19-27), songs of victory (Jgs. 5:2-31), and even songs of imprecation (Gen. 9:25-27). The prophets wrote preponderantly in verse, which may be noted simply by thumbing through the RSV or any other translation that prints verse in its proper form. Canticles is a supreme example of lyric love poetry, as is Ruth, in the genre later called "pastoral romance." Ecclesiastes, though only partly in verse, is poetically lovely throughout and has influenced the poets of all ages (in our day, notably, T. S. Eliot) by its haunting images expressive of the beauty, brevity, and vanity of human life. In the NT, poetry is less commonly found, though Paul's paean to love in 1 Cor. 13 has every essential attribute of verse and is unsurpassed in secular literature.

D. Short Story. The Bible teaches how this genre should be handled, whether historically factual, as in such stories as those about Joseph, David and Jonathan, Jonah, etc., or parabolic, as in the story of the Prodigal Son (Lk.15:11-32).

E. Drama. This genre (embracing also features of "wisdom" literature) appears in Job, written in verse, and probably so early as not to have been influenced (as some critics believe) by early Greek drama. The careful threefold structure of the work indicates the conscious literary artistry applied to this account of an actual event. Overall, the work falls naturally into three parts: introduction, body, and epilogue (or conclusion). Each of Job's three friends is given three speeches, each answered by Job — with the dramatic touch of Zophar's despairing relinquishment of his third "turn" in view of Job's stubborn refusal to listen to "reason." Intellectually the work moves to its conclusion through Job's contest with his friends; Elihu's speech; and God's utterance. (The form of this drama, incidentally, is similar to that of the medieval *débat*.)

F. Biography. The biographical riches of the Bible are almost endless, from the smallest vignettes (e.g., the unforgettable picture of the contemptible Shimei cursing and throwing dirt and stones at the aged King David as he

flees his capital, now occupied by the rebellious Absalom, with the loyal Abishai dancing along beside David, pleading, "Let me go over, I pray thee, and take off his head" [2 S. 16:5-13]) to the extended life stories of the great figures of the Bible, now woven inextricably into our cultural heritage. And transcending all, bestriding the world, forming the hinge of time before Him and after Him, the figure of Jesus Christ Himself, subject of four incomparable biographies, the Gospels, whose varying but complementary points of view give such dynamic reality to their subject that no age, no nation, no individual can ignore Him. In their brief, simple, objective narratives (only Luke shows evidence of formal rhetorical learning), stressing unerringly those events and sayings in Jesus's life crucial to our knowledge of Him, the Synoptic Gospels offer, as it were, a three-dimensional picture of the earthly scene, while the Fourth Gospel extends our gaze to the heavenly.

G. Epistle. Paul's literary genius is best seen in his unique mingling of the formal essay with the informal epistolary style. Immersed in disciplined learning from his boyhood, and possessed of a powerful, quick temperament, he infused his densely packed intellectual treatises with the quality of his own personality. Not only was he master of the immense Hebrew tradition of learning, but under Gamaliel he was permitted to enter into and absorb the Greek intellectual tradition as well, in a way not permitted by many of the great rabbis of the day. All Paul's intellectual power, mental quickness, spiritual understanding, and verbal resources come together in his closely reasoned Epistle to the Romans, which has been called the greatest short philosophical/theological treatise in literature.

H. Apocalypse. The aged John, on Patmos, his inner gaze fixed on unimaginably vast and glorious events still future, gives us the very name "apocalyptic" literature. From Dante to Blake to Dylan Thomas (to name at random), John's literary style, if not the fulness of his inspired vision, has moved beneath and inspired secular literature, emerging in visions of symbolic splendor and full-orchestrated rhythms. "After this I looked, and lo, in heaven an open door! . . . And lo, a throne stood in heaven, with one seated on the throne! And he who sat there appeared like jasper and carnelian, and round the throne was a rainbow that looked like an emerald. Round the throne were twenty-four thrones. . . . From the throne issue flashes of lightning, and voices and peals of thunder, and before the throne burn seven torches of fire, which are the seven spirits of God; and before the throne there is as it were a sea of glass, like crystal" (Rev. 4:1-6). His work is a fitting climax to the epic drama.

C. D. LINTON

LITTER [Heb. *ṣāḇ*] (Isa. 66:20); NEB WAGON; [*miṭṭâ*] (Cant. 3:7); AV BED; [Gk. *phórion*] (2 Macc. 9:8); AV HORSE-LITTER. *Miṭṭâ* is a general term for couch; in Cant. 3:7 it refers to a covered and curtained couch outfitted with shafts and used for carrying a person. King Solomon's litter is described as being quite luxurious (cf. vv. 6, 9f.: *see* PALANQUIN).

The *ṣabbîm* in Isa. 66:20 are probably covered wagons rather than litters (cf. NEB; also RSV "covered wagons" for *'eglôṯ ṣāḇ* in Nu. 7:3). The Gk. *phórion* of 2 Macc. 9:8 was apparently a stretcher used for carrying a sick or wounded person (cf. 3:27).

See also BED.

N. J. O.

LITTLE GENESIS. A name for the book of Jubilees. *See* APOCALYPTIC LITERATURE III.B.

LIVE. In the English versions the verb "live" is most often a translation of Heb. *ḥāyâ* (or one of its cognates) in the OT and of Gk. *záō* in the NT. As such, the most common meaning is "be alive, have life," as the opposite of "be dead"; cf. the expression "live and not die" (e.g., Gen. 42:2; Nu. 4:19; Dt. 33:6; 2 K. 18:32). *See* LIFE. On the expression "as I live" or "as the Lord lives," *see* OATH.

A second meaning, more common in the NT than in the OT, is "behave, conduct one's life." Gk. *záō* sometimes has this sense, especially when combined with an adverb or modifying phrase; cf. *záō eusebṓs* (RSV "live a godly life," 2 Tim. 3:12; cf. Tit. 2:12), *záō Pharisaíos* ("live as a Pharisee," Acts 26:5), *záō en pístei* ("live by faith," Gal. 2:20), *záō katá sárka* ("live according to the flesh," Rom. 8:12f.). The RSV sometimes renders "live" for *peripatéō* (lit. "walk" [so AV]; fig. "conduct oneself"), e.g., 2 Cor. 10:3; Eph. 4:17; Phil. 3:17f.; 1 Thess. 4:1 (*see* WALK).

A third meaning is "inhabit" or "dwell." In the RSV OT (and more often in the NEB OT) "live" occurs frequently as a translation of Heb. *yāšaḇ* (AV, lit., "dwell"; e.g., Gen. 21:20f.; Nu. 32:17; Dt. 1:4, 44); less often it renders *gûr* (AV, lit., "sojourn" or "dwell"; e.g., Jgs. 17:8; Jer. 42:15, 17, 22; 43:2, 5) or *šāḵan* (AV, lit., "dwell"; e.g., Job 15:28; Ob. 3). In the NT "live" in this sense usually represents Gk. *katoikéō* (AV, lit., "dwell"; e.g., Acts 7:2, 4; 9:22, 32; cf. *oikéō*, 1 Cor. 7:12f.; *synoikéō*, 1 Pet. 3:7; *enkatoikéō*, 2 Pet. 2:8). *See* DWELL.

N. J. O.

LIVER [Heb. *kāḇēḏ*] (Ex. 29:13, 22; Lev. 3:4, 10, 15, etc.]. As the heftiest of the internal body glands, the liver apparently came to its name quite naturally from the verbal root *kbd*, "be heavy" (cf. other Semitic cognates for liver; Ugar. *kbd*, Akk. *kabittu*, and Aram. *kaḇdā'*).

In eleven of the twelve times that *kāḇēḏ* is translated "liver" by the RSV the reference is to the "appendage [so RSV; NEB "long lobe"; AV "caul"] of the liver" (Heb. *hayyṓṯereṯ 'al-hakkāḇēḏ*), which, along with the fat on the entrails and the kidneys of a sacrificial animal, is burned upon the altar as an offering.

The twelfth occurrence of *kāḇēḏ* (Ezk. 21:21 [MT 26]) constitutes the lone biblical example of the common Mesopotamian practice of hepatoscopy (i.e., liver examination for purposes of divination). The grimly foreboding "song of the sword" in the early part of Ezk. 21 is directly followed (leaving little doubt as to whom it portends) by the ominous figure of the king of Babylon. He is on the march westward with all his irresistible military forces, and is portrayed as pausing where the fork in the highway offers a route either to Amman or to Jerusalem. Before moving in either direction the king stops to seek divine guidance, for battle was not entered into without first ascertaining the divine will (cf., e.g., 1 S. 23:9-12, where David, under threat of an attack by Saul's forces, acts only after consulting the Lord through the ephod; 23:2ff.; 2 S. 5:19, 23). In this instance the Babylonian king is said to have cast arrows, consulted the teraphim, and examined the liver, in an unparalleled threefold procedure in which "features of Israelite oracle seeking are mixed with others

of a specifically Babylonian coloring" (W. Zimmerli, *Ezekiel,* I [Eng. tr. 1979], 443; see also A. Oppenheim, *Ancient Mesopotamia* [1964], p. 209, for a caution about the lack of cuneiform documentation for such an unusual combination of divination practices). This text may simply reflect a tradition known to Ezekiel that Nebuchadrezzar was very careful to use several corroborative methods of divination before proceeding into combat (rather than one unprecedented threefold combination), since he was concerned to ascertain both the favorable target and the propitiousness of action at that time. On hepatoscopy *see* DIVINATION III.E.

Beyond these twelve instances *kāḇēḏ* occurs only twice more in the entire MT (Lam. 2:11 and Prov. 7:23), in neither case translated "liver" by the RSV. Only in Lam. 2:11 does *kāḇēḏ* refer to the human liver (thus AV, but RSV has "heart" and NEB "bile"). See D. Hillers, *Lamentations* (*AB,* 1972), pp. 32, 45. It is possible that *kāḇēḏ* in Prov. 7:23 (AV "liver"; RSV "entrails"; NEB "vitals") may also refer to the human liver rather than that of a stag (cf. RSV in vv. 22b-23a, "or as a stag is caught fast till an arrow pierces its entrails"). (See the comms.)

With but fourteen occurrences in the entire MT, *kāḇēḏ* is not a common term. Even the possibility that the traditional vowel pointing has obscured further occurrences (see, e.g., KoB, p. 420, and such possible examples as Gen. 49:6; Ps. 7:5 [MT 6]; 16:9; 30:12 [MT 13]; 57:8 [MT 9]; 108:1 [MT 2]) does not diminish the rarity. Ps. 16:9 offers a striking example of ambiguous vowel pointing: *śāmaḥ libbî,* "my heart is glad," stands in parallel with *wayyāgel kᵉḇôḏî,* "my soul [RSV]/spirit [NEB] rejoices" (the LXX here has the less than enlightening *hē glōssa mou,* "my tongue"). In the light of the parallel with "heart" and the liver's understood character as a sensitive organ and the seat of the emotions, as well as Akkadian examples of the cognate *kabittu* as that organ or internal area which "rejoices" and is associated with happiness (see *CAD,* VIII, 12ff., for examples), the possibility that "my liver" is strictly intended here merits serious consideration.

In the light of the ample Syro-Palestinian evidence for the use of clay liver models (see, e.g., H. Tadmor and B. Landsberger, *IEJ,* 14 [1964], 201-217; M. Dietrich and O. Loretz, "Beschriftete Lungen- und Lebermodelle aus Ugarit," *Ugaritica,* VI [1969], 165-179), the lexical paucity of *kāḇēḏ* in the Hebrew Bible is striking. Its minimal use may well be traceable to a polemic against the pervasive hepatoscopic practices of the pagan world, one aspect of a set of cultic policies by which Israel was determined to set itself apart from the nations (A. Caquot, p. 106). Indeed, there is no evidence that hepatoscopy was ever practiced as a part of Hebrew religion, contra the singular attempt of M. Bič to substantiate Amos as an hepatoscoper (*VT,* I [1951], 293-96; see a subsequent refutation in A. Murtonen, *VT,* 2 [1952], 170f.; cf. S. Segert, "Zur Bedeutung des Wortes *nōqēḏ,*" in B. Hartmann, *et al.,* eds., *Hebräische Wortforschung* [*SVT,* 16; 1967], pp. 279-283). *See also* MESHA 3.

LIVING; LIVE; LIVELY; ALIVE. The adjectives "living" and "live" (Ex. 21:35; Lev. 16:20f.) are most often a translation of Heb. *ḥay* (cf. *ḥāyâ,* "have life, be alive") in the OT and of the participle of Gk. *záō* in the NT. *Ḥayyîm* can denote all beings that have life (cf. Gen. 2:19; 3:20; 9:15f.). "The land of the living" therefore denotes the opposite of Sheol, the abode of the dead (cf. Ps. 27:13; 116:9; Isa. 38:11; etc.); on "book of the living," *see* BOOK OF LIFE. In contrast to lifeless pagan deities, Yahweh is characterized as "the living God" (e.g., Dt. 5:26; Josh. 3:10; Jer. 10:10; Mt. 16:16; 26:63; Acts 14:15). "Living" is sometimes applied figuratively to inanimate objects: flowing water can be called "living water" because it gives life, and thus it serves also as a figure for the presence and Spirit of the Giver of life (Jer. 2:13; 17:13; cf. Jn. 4:10f.; 7:38; Rev. 7:17); cf. "living bread" (Jn. 6:51), "living oracles" (Acts 7:38), and "living stone(s)" (1 Pet. 2:4f.). *See* LIFE.

"Living creature" is usually a translation of Heb. *ḥayyâ* or Gk. *zōon; see* CREATURE, LIVING.

The AV occasionally uses "lively" in its obsolete sense of "living" (Acts 7:38; 1 Pet. 1:3; 2:5). In Ps. 38:19 (MT 20) the RSV and NEB, following many scholars (e.g., *BHS*), emend MT *ḥayyîm* (AV "lively") to *ḥinnām,* "without cause," since *ḥayyîm* makes little sense in the context and *ḥinnām* occurs in two other very similar contexts (Ps. 35:19; 69:4 [MT 5]; in both, *ʾōyᵉḇay šeqer* parallels *śōnᵉʾay ḥinnām*). But A. A. Anderson (*Psalms 1–72* [*NCBC,* repr. 1981], p. 307) noted the value of M. Dahood's suggestion (*Psalms I* [*AB,* 1965], 237) that the MT be retained and translated "my mortal enemies" (lit. "my enemies of life," i.e., "the enemies of my life"). N. J. O.

"Alive" appears in the RSV over a hundred times, usually translating Heb. *ḥay* in the OT and Gk. *záō* in the NT. Related forms are Gk. *anazáō* ("live again," Lk. 15:24), *zōḗ* ("life," Rom. 8:10), *zᾠogonéō* ("keep alive," Acts 7:19), *zᾠopoiéō* ("make alive," 1 Cor. 15:22; Gal. 3:21; 1 Pet. 3:18), and *syzōopoiéō* ("make alive together with," Eph. 2:5 [whence supplied in v. 1]; Col. 2:13). "Alive" in Mt. 6:30 par. Lk. 12:28 renders Gk. *eimí,* "be"; "still alive" in 1 Cor. 15:6 renders Gk. *ménō,* "remain." "Alive" is often found in contrast to "dead" (e.g., 1 K. 3:23), as in expressions of concern for family by Joseph (Gen. 43:7) and Moses (Ex. 4:18). It is also used about Jesus by the women who reported their encounter with the angel at the tomb (Lk. 24:23; cf. Acts 1:3). Luke's account of the revivification of Eutychus contains the term (Acts 20:12). That Jesus was alive by virtue of His resurrection was an important element in Paul's preaching, an item that Jewish leaders disputed (25:19). The spirits of believers are alive because of Christ's righteousness bestowed on them (Rom. 8:10; see the comms.). In Gal. 3:21 Paul noted the inability of the law to "make alive." Conversely, God has made believers spiritually alive together with the risen Christ (Eph. 2:5). "We who are alive" in 1 Thess. 4:15 expresses a contrast with believers who have experienced physical death (v. 13). He. 9:17 observes that a will remains inoperative while the one who prepared it is still alive. "Made alive in spirit" in 1 Pet. 3:18 seems to refer to Christ's own spirit, in which He carried on the activity that occurred between His death and His resurrection (cf. v. 19). *See also* LIFE. E. F. H.

LIZARD. Of the eight unclean "swarming things" listed in Lev. 11:29f., perhaps as many as six may have had some reptilian form, and thus could be considered as lizards in a general sense. These are: Heb. *ṣāḇ* (AV TORTOISE, NEB THORN-TAILED LIZARD, RSV GREAT LIZARD), *ʿᵃnāqâ* (AV FERRET; NEB, RSV, GECKO), *kō(a)ḥ* (lit. "strength"; AV CHAMELEON; cf. LXX *chamailéōn*; RSV LAND CROCODILE, NEB SAND-GECKO), *lᵉṭāʾâ* (AV, RSV, LIZARD; NEB WALL-GECKO), *ḥōmeṭ* (AV SNAIL, NEB GREAT LIZARD, RSV SAND LIZARD), and *tinšemeṭ* (AV MOLE; cf. LXX *aspálax,* "mole"; RSV, NEB, CHAMELEON). In Prov. 30:28 *sᵉmāmîṯ* (AV SPIDER; RSV, NEB, LIZARD)

seems also to convey the idea of a small reptile. The Hebrew terms are obscure at best, and are amenable to different interpretations (cf. G. R. Driver, *PEQ*, 87 [1955], 5-20; G. Bare, *Plants and Animals of the Bible* [1969], p. iii). It is also possible that the same terms carried different meanings in various parts of the ancient Near East, thus making for greater confusion.

The Heb. *lᵉṭā'â* appears to be a fairly certain designation of a lizard (cf. Arab. *laṭa'a*, "cling to the ground"), as does *śᵉmāmîṯ* (cf. Syr. *samāmîṯā'*, "venomous lizard"; but cf. postbiblical Heb. *śᵉmāmîṯ* [or *sᵉmāmîṯ*], "spider," whence AV). Again, the Heb. *ṣāb* has been compared with the Arab. *dubb*, a lizard sometimes used for food by the Bedouin (KoB, p. 790, suggests the *Uromastix spinipes*, a spiny-tailed lizard). Heb. *ʾᵃnāqâ* may have referred to sounds made by the gecko, several species of which utter various cries (cf. *ʾānaq*, "sigh, moan"). Heb. *kō(a)ḥ* probably refers to a large reptile, such as the land crocodile (also known as the land monitor), which may be 1.5 m. (4 ft.) long. Heb. *ḥōmeṭ* may refer to a skink (*CHAL*, p. 108), and may be cognate to Akk. *ḫamāṭu*, "hasten" (KoB, p. 310) or Aram. *ḥᵃmaṭ*, "kneel" (cf. BDB, p. 328); but cf. Syr. *ḥûlmāṭā'*, "chameleon." Heb. *tinšemeṭ* appears to derive from the root *nšm*, "pant, breathe," and thus would be a fitting name for the chameleon, which puffs up its body with air and hisses (cf. Pliny *Nat. hist.* viii.51).

Lizards were conspicuous members of the ancient Palestinian fauna, and whereas Tristram isolated twenty-two species, this number has now been enlarged greatly. The lizard is a member of the vertebrate suborder Sauria, comprising twenty separate families which contain some three thousand species across the world. Characteristically lizards are quadrupeds that have a cylinder-shaped body, a tail that is as long again as the body proper, and mobile lower eyelids. The animals vary in length from just over 2 cm. (1 in.) to 3 m. (10 ft.), but average about 30 cm. (1 ft.). Some have colored areas on the body, whereas others are barely distinguishable from their surroundings.

See G. S. Cansdale, *Animals of Bible Lands* (1970), esp. pp. 199-202. R. K. H.

LOAD [(vb.) *ʿāmas* (Gen. 44:13; Neh. 13:15; Isa. 46:1), *nāśāʾ*–'lift' (Gen. 42:26; 45:23), *ṭāʿan* (Gen. 45:17), *ṭōraḥ* (Job 37:11), hiphil of *kāḇaḏ*–'make heavy' (Hab. 2:6); Gk. *phortízō* (Lk. 11:46); (noun) Heb. *maśśāʾ* < *nāśāʾ* (2 K. 8:9); Gk. *phortíon* (Gal. 6:5)]; AV also BURDEN, "weary"; NEB also CARRY, PILE (ON), BURDEN, "enrich"; **LADEN** [Heb. *nāśāʾ* (Neh. 4:17 [MT 11]), *kāḇēḏ*–'weighty, heavy' (Isa. 1:4; Ezk. 27:25); Gk. *phortízō* (Mt. 11:28)]; AV also LADE "make glorious"; NEB also LOAD.

"Load" usually refers to a physical burden. Most of these texts are straightforward, but a few call for comment. Heb. *ṭāʿan* occurs only in Gen. 45:17, but the context, and its later use in Aramaic leave no doubt about its meaning (on the supposed Ugaritic cognate see H. Cohen, *Biblical Hapax Legomena in the Light of Akkadian and Ugaritic* [1978], p. 127 n. 50). In Lam. 5:13 the RSV and NEB supply "load" (also implied by the AV), but the meaning of the whole verse is obscure (cf. LXX and Tg., both of which may refer to punishment by hanging). In 1 S. 16:20 the RSV and AV supply "laden"; the MT has *ḥᵃmôr leḥem* (lit. "ass of bread"), while the NEB "homer of bread" is based on the LXX, which apparently read *ḥōmer leḥem* (see comms.). The Hebrew verb *ṭāraḥ* occurs only in Job 37:11, but its meaning is clear from its cognate noun *ṭōraḥ*, "burden" (Dt. 1:12; Isa. 1:14). Although scholars have proposed various emendations for the verse, the MT makes sense and need not be emended (see L. Grabbe, *Comparative Philology and the Text of Job* [1971], pp. 114-16).

A few texts refer to various spiritual and emotional burdens. Thus Isaiah refers to Israel as "a people laden with iniquity," i.e., burdened with the weight of sin (1:4; cf. Ps. 39:4 [MT 5]; He. 12:1). In the first of a series of five woes Habakkuk warns the one who "loads himself with pledges," i.e., who exacts far more in securities than the loan was originally worth that he will be in turn plundered (2:6-8). The AV "ladeth himself with thick clay" points up the problem of translating the hapax legomenon *ʿaḇṭîṭ* (RSV "pledges"); the AV has apparently taken it as two words: *ʿaḇ*, "cloud," and *ṭîṭ*, "clay." Although the context and cognates (see Heb. *ʿāḇaṭ*, "borrow") support the RSV, 1QpHab offers an interpretation similar to the AV (see W. H. Brownlee, *Midrash Pesher of Habakkuk* [1979], p. 134).

In Mt. 11:28 Jesus invites His listeners: "Come to me, all who labor and are heavy laden, and I will give you rest." According to many scholars the burden here is Pharisaic legalism (see comms. by W. C. Allen [*ICC*, 1907], pp. 124f.; D. Hill [*NCBC*, repr. 1981], pp. 207f.; F. W. Beare [1981], pp. 267f.), though as R. Gundry pointed out, Jesus actually offered a stricter interpretation of the law than the Pharisees (*Matthew* [1982], pp. 218-220). Thus for Gundry the burden is the attention that the Pharisees demand, and the contrast is between the conceit of the Pharisees and the meekness of Jesus. T. H. Robinson (*Gospel of Matthew* [*MNTC*, 1928] pp. 105f.) took a broader view, including all the burdens of life, which Jesus shares and hence makes easier to bear (cf. also *TDNT*, IX, 86f.; A. Plummer, comm. on Matthew [repr. 1953], pp. 170f.).

In Lk. 11:46 Jesus delivers the first of a series of woes, accusing the lawyers of loading people with burdens hard to bear. According to T. W. Manson Jesus refers here to the burden of the law and implies that the lawyers do not help those struggling with this burden (*Sayings of Jesus* [repr. 1978], pp. 100f.). But according to other scholars (e.g., I. H. Marshall, *Gospel of Luke* [*NIGTC*, 1978], p. 500) the charge against the lawyers is that they escape the obligations of the laws that they impose on others.

Finally, the interpretation of Gal. 6:5 has also been disputed. The major problem is the relation of v. 5 to v. 2. According to some commentators, the "burdens" (Gk. *bárē*) of v. 2 differ from the "load" (Gk. *phortíon*) of v. 5, the former being "whatever oppresses man spiritually" (H. N. Ridderbos [Eng. tr. *NICNT*, 1970], pp. 213-15) or the "crushing weight" of temptation (D. Guthrie [*NCBC*, repr. 1981], pp. 144f.), while the latter is "the general load which all must carry" (Guthrie) or "the normal duty which falls upon every man" (Ridderbos). Cf. also *TDNT*, I, 555; F. F. Bruce, *NIGTC*, 1983, pp. 262f. But for E. Burton (*ICC*, 1920, pp. 333f.) and H. D. Betz (*Hermeneia*, 1979, pp. 303f.) no sharp distinction should be made between these terms: for Betz both terms refer to the general burdens of human life (pp. 299, 303f.), and for Burton both refer to the burdens of temptation and sin (pp. 329, 334). (The attempt of J. G. Strelan [*JBL*, 94 (1975), 266-276] to limit *bárē* to financial burdens is unconvincing.)

G. A. L.

LOAF; LOAVES [Heb. *leḥem*–'bread,' *kikkār*–'disk-shaped loaf of bread' (Ex. 29:23; Jgs. 8:5; 1 S. 2:36; 10:3; 1 Ch. 16:3; Prov. 6:26; Jer. 37:21); Gk. *ártos*–'bread']; AV also MORSEL, PIECE; NEB also ROUND LOAF. *See* BREAD.

LO-AMMI lō-am'mē lō-am'mī [Heb. *lō' 'ammî*–'not my people' (so RSV); LXX Gk. *ou laós mou,* translation rather than transliteration]. The AV and NEB transliteration of the name of the third child (second son) born to the prophet Hosea and his first wife Gomer, *ca.* 755 B.C. (Hos. 1:9). Hosea's three children were, at God's behest, given symbolic names indicating respectively coming military destruction (JEZREEL, v. 4), withdrawal of covenant protection (LO-RUHAMAH, v. 6, AV; cf. RSV "Not pitied"), and withdrawal of covenant relationship (Lo-ammi). Lo-ammi is parallelled in v. 9 by *lō'-'ehyeh lāḵem* ("I am not your *'hyh*"), an allusion to the initiation of the covenant by revelation of the divine name (Ex. 3:14). The negative impact of the name is reversed in 1:10 (MT 2:1) and 2:1 (MT 3), quoted in Rom. 9:25f. D. STUART

LOCK. *See* HAIR; LOCKS AND KEYS.

LOCKS AND KEYS. Devices for securing gates or doors. The earliest lock was a wooden bar or beam that fitted into sockets in the posts of the door or gate. Later clamps were added to the leaves of the gate so that the bar, clamps, and sockets formed a firm unit. Such a lock, of course, could not be opened from the outside, although it could be opened by an unauthorized person from within. The earliest known lock and key, from *ca.* 2000 B.C., was discovered at Khorsabad; it consists of a wooden beam and wooden pegs or pins that drop into holes in the beam so that it cannot be slid back from the socket in the doorpost. The key is also made of wood; its pins are arranged so that they lift the pins from the bar, permitting the bar to be withdrawn from the socket. The Egyptians had a similar lock and key.

The Romans invented the metal lock and key. The lock was made with wards surrounding the keyhole, and the key had slots cut so that it would turn in these wards. A key not properly cut would not turn, and the lock could not be unlocked.

In the OT the noun *man'ûl,* "bar," "bolt," "lock" (Neh. 3:3, 6, 13-15) and the verb from which it was derived, *nā'al,* "bar," "bolt," "lock" (2 S. 13:18), are found. Other OT terms are *b'rî(a)ḥ,* "bar," "shaft" (Dt. 3:5, etc.), *baddîm* (pl. only), "poles," "bars" (Hos. 11:6; Job 17:16 [fig. of the bars of Sheol]), and *m'ṭil,* "bar [of iron]" (Job 40:18). The word for "key" is *maptē(a)ḥ,* "that which opens," "opener," from *pāṭaḥ,* "open" (Jgs. 9:25; 1 Ch. 9:27; Isa. 22:22 [fig.]; cf. Rev. 3:7). Jgs. 3:23-25 describes the use of the lock and key.

The Greek equivalents, *kleíthron* and *mochlós,* both meaning "bar," "bolt," occur in the LXX but not in the NT. Unlike the Hebrew word for key, which comes from the verb "open," *kleís* comes from the verb *kleiō,* "close," "lock" (Acts 5:23; cf. Mt. 6:6; Rev. 3:8).

In Cant. 4:12; 5:4f., according to one interpretation, the imagery of locks and doors is used euphemistically in an erotic love song (see M. Pope, *Song of Songs* [*AB,* 1977], pp. 488, 518-525).

LOCUST [Heb. *'arbeh* < *rāḇâ*–'increase, multiply' (Ex. 10:4, 12-14, 19; Lev. 11:22a; etc.; "swarming locust," Joel 1:4; 2:25), *yeleq* (Nah. 3:15a, 16; "hopping locust," Joel 1:4; "young locust," Ps. 105:34b), *ḥāsîl* < *ḥāsal*–'devour' ("destroying locust," Joel 1:4), *gāzām* (Am. 4:9; "cutting locust," Joel 1:4), *gōḇay* (Am. 7:1; Nah. 3:17), *gôḇ* (Nah. 3:17), *gēḇ* (Isa. 33:4), *ḥāgāḇ* (2 Ch. 7:13), *sol'ām* ("bald locust," Lev. 11:22), *ṣ'lāṣal* (Dt. 28:42); Gk. *akrís* (Mt. 3:4 par. Mk. 1:6; Rev. 9:3, 7)]; AV also "palmerworm," "cankerworm," "caterpillar" (all in Joel 1:4), GRASSHOPPER (Nah. 3:17), etc.; NEB also GREAT LOCUST, LONG-HEADED LOCUST, GREEN LOCUST, DESERT LOCUST (all in Lev. 11:22), "grub" (Ps. 78:46), etc.; **GRASSHOPPER** [Heb. *ḥāgāḇ* (Lev. 11:22; Nu. 13:33; Eccl. 12:5; Isa. 40:22), *'arbeh* (Nah. 3:15, 17)]; AV also LOCUST, NEB also HOPPER, DESERT LOCUST, LOCUST. A jumping or leaping insect of the order *Orthoptera.* Although the terms grasshopper and locust are often used interchangeably, grasshoppers encompass two families (*Acridiidae* and *Tettigoniidae*), whereas locusts are only a few species of the *Acridiidae* family. Both insects can cause great devastation to plant life.

I. Identification.–The Heb. *'arbeh* is the most common OT word for locust; it refers to a clean species that is fully developed. Heb. *yeleq* perhaps refers to an insect at an immature stage of growth (see "young locust," Ps. 105:34b; "hopping locust," Joel 1:4). *Hāsîl* may also describe a locust at a particular stage of its development. *Gāzām* may indicate an underdeveloped form of locust, rather than a separate species. *Gōḇay* and *gēḇ* refer to swarms of locusts; in Nah. 3:17 many scholars delete *gôḇ* as a gloss (e.g., *BHS*; but cf. KD). *Ḥāgāḇ* is a clean species, perhaps one or more of the small grasshoppers. *Sol'ām* is also a clean species, perhaps one of the genera Truxalis or Acrida. *Ṣ'lāṣal* is an onomatopoeic word meaning "whirring," an accurate description of the sound made by a locust swarm. The LXX *erysíbē* (Vulg. *rubigo*), "rusty," suggests the reddish cricket *Gryllotalpa* (so NEB "mole-cricket"). Heb. *ḥargōl* in Lev. 11:22 (RSV "cricket") may be of the family *Tettigoniidae* (see NEB "green locust").

The most common LXX term is *akrís,* the same word used in the NT (cf. also *broúchos,* "wingless locust," Lev. 11:22; 1 K. 8:37; Nah. 3:15).

II. Habits.–Biblical writers were mainly concerned with the *Schistocerca gregaria,* the desert locust. This locust is responsible for periodic devastating attacks upon the vegetation of the Mediterranean region. The migratory locust (*Locusta migratoria*) and the Moroccan locust (*Dociastaurus maroccanus*) have also been reported in Palestine.

The migratory locust matures in three stages, each of which exhibits the essential characteristics of a hopping insect. The first stage, or larva, is represented by wingless locusts which hop like fleas. In the second stage, the pupa, the wings of the locust are encased in a sack. The locusts of the second stage walk like ordinary insects with only occasional jumping. The adult stage is the full-fledged

Grasshoppers and oxen heads in a ceiling pattern from the tomb of Neferhotep in Thebes (late 14th cent. B.C.) (Oriental Institute, University of Chicago)

flying insect. The locust is quite destructive at each stage of its development.

Locusts multiply rapidly, with eggs deposited by females with ovipositors containing as many as one hundred eggs each. They enable the female to deposit her eggs in holes some 26 cm. (4 in.) deep, even in the hardest of soils.

Descriptions by observers leave little question concerning the destructive potential of locusts in migration. Once such a plague begins, it is virtually impossible to control or stop, bringing tremendous destruction to affected areas. Swarms of ten billion locusts periodically enter areas in Africa, southwest Asia, and southern Europe. Areas up to 1000 sq. km. (400 sq. mi.) can be covered by locust swarms, which leave a barren, denuded landscape in their wake. It is easy to see why the locust is identified as one of biblical man's greatest calamities.

III. Theological Significance of Locusts.–Locusts are "clean" animals that can be used for food by the Hebrew people (Lev. 11), but they also represent an instrument of divine wrath. Thus in Rev. 9:3, 7 the locusts are used as an eschatological plague of God, and while they may be symbolic, their use is consistent with the OT concept of the plague locust.

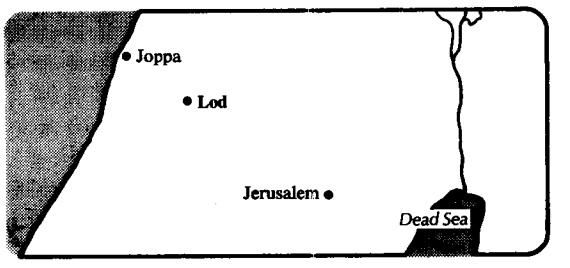
A. Locusts as Food. Lev. 11:22 presents several insects that are considered "clean" and suitable as part of the diet of the Hebrew people, as do the Gospel references to John the Baptist's diet (Mt. 3:4 par. Mk. 1:6). The thorax of the locust is prepared by modern Arabs for food. The head is pulled away, bringing the viscera with it. The abdomen and legs are removed. The thoraxes may be eaten at once or dried for later use. All the insect references in Lev. 11 involve the locust family.

B. Plague Locusts as Instruments of Divine Wrath. 1. The Egyptian Plague of Ex. 10. The locusts of Ex. 10 (all Heb. *'arbeh*) are said to "cover the face of the land," "eat every tree," and "fill your houses" (vv. 3-6). This description is remarkably similar to descriptions of the plague of locusts that swept through Palestine in the spring of 1915.

2. Locusts and the Day of the Lord in Joel. Joel's controversial references to locusts form part of his message concerning the coming Day of the Lord. This event is of great eschatological significance for Israel, but its nature contradicts much of the popular tradition associated with the Day of the Lord. Whereas the prophets proclaimed judgment upon a disobedient and rebellious people, the popular tradition portrayed the Day of the Lord as a time when God would vindicate Israel in the presence of its enemies and affirm it as His covenant people, thus ignoring national sin.

Joel's locust invasion (1:4; 2:25) is a vivid description of God's judgment in action. The terrifying image of destruction is graphically represented in a way the people cannot ignore. As early as Credner (1831), an attempt was made to identify Joel's use of various locust names as representative developmental stages in the locust cycle. Whereas Credner used *'arbeh*, for one of the less significant developmental stages, subsequent research indicates that *yeleq*, *hāsîl*, and *gāzām* may describe successive stages in the developing locust.

Alternatively, the multiple use of names for locusts as rhetorical devices would serve to emphasize the complete destruction caused by the locusts. This interpretation is less complicated and is felt by many scholars to be the more credible of the two. However the use of multiple names is interpreted, the physical description of the locust invasion seems to indicate an actual plague, not a symbolic image. At the same time, use of terms like the "northerner" (2:20) may suggest directly the destructive locusts, but may also allow for the more symbolic identification with those "northern" foes who act as God's agents of judgment upon Israel in the 8th-6th cents. B.C.



C. Locusts as Images. Locusts (and grasshoppers) were used frequently in biblical imagery. As one might expect, most of the imagery concerns the prominent characteristics of this insect: leaping ability (Job 39:20; Isa. 33:4; Jer. 51:27), devouring appetite (Nah. 3:15f.), large numbers (Jgs. 6:5; 7:12; Jer. 46:23; etc.), and small size (Nu. 13:33; Isa. 40:22; cf. Ps. 109:23).

G. L. KEOWN

LOD lod; **LYDDA** lid'ə [Heb. *lōḏ*; Gk. *Lydda*]. A Benjaminite town located in the picturesque plain of Sharon 18 km. (11 mi.) SE of Joppa. The name's earliest appearance is in the inscription of Thutmose III (1482-1450 B.C.) at Karnak, which lists it among the Palestinian towns held by Egypt. In 1 Ch. 8:12 the construction of the Israelite town of Lod, along with Ono, is attributed to Shemed of Benjamin. After the Babylonian Exile, families from Lod, Ono, and Hadid, numbering about 725 exiles, returned to their home towns in 521 B.C. (Ezr. 2:33; Neh. 7:37; 11:35).

Lod was located at the intersection of the highway between Babylon and Egypt with the main road between Jerusalem and Joppa. It was therefore of great military and commercial importance. In the Maccabean period it

was known as Lydda. Under Syrian rule it was part of Samaria, but in 145 B.C. it was one of three Samaritan districts that were annexed to Judea by King Demetrius II at the request of Jonathan Maccabeus (1 Macc. 11:34; cf. 10:30, 38; 11:28; Josephus *Ant.* xiii.4.9 [127]). According to Josephus, Lydda presided over one of the eleven toparchies into which Judea was divided (*BJ* iii.3.5 [54-58]). Along with nearby Joppa, Lydda was granted by Julius Caesar to John Hyrcanus and the Jews (*Ant.* xiv.10.6 [205-208]). After Caesar's death, however, the inhabitants of Lydda and certain other towns were sold into slavery by Cassius for failing to pay the taxes he had demanded (*Ant.* xiv.11.2 [271-76]). Subsequently they were released by a decree of Marcus Antonius (*Ant.* xiv.12.2 [304f.]). Lydda suffered severely under Cestius Gallus, who in A.D. 66 burned the city while its inhabitants were celebrating the Feast of Tabernacles in Jerusalem (*BJ* ii.19.1 [515f.]). Along with Jamnia it surrendered in A.D. 68 to Vespasian, who populated the city with inhabitants from other places (*BJ* iv.8.1 [444]).

In NT times Lydda was the site of an early Christian community. It was during a visit to this community that Peter healed the paralyzed Aeneas (Acts 9:32-35) and was summoned to nearby Joppa upon the death of Tabitha (v. 38). After the fall of Jerusalem in A.D. 70, Lydda became noted as a seat of rabbinical learning. *Ca.* 200, however, it was made a Roman colony and renamed Diospolis. It became a center of trade in purple. Judaism virtually disappeared from the city, but Christianity survived. In the 4th cent. Diospolis had its own bishop, who attended the Council of Nicea (325). The trial of Pelagius for heresy took place at the Synod of Diospolis in 415.

Under Moslem rule Lydda was a provincial capital and boasted a magnificent mosque. During this time the city grew famous due to legends surrounding St. George, who according to tradition was martyred there in 303. The city's large Christian church was destroyed by the Moslems but captured by the Crusaders, who built a new cathedral over St. George's tomb and dedicated it to him. For a time the city itself was called St. George. The cathedral, however, was demolished by Saladin in 1191 and by the Mongols in 1271; only ruins remain. The Arabs restored the city's original name, calling it Ludd.

Modern Lod is located about 18 km. (11 mi.) E of Tel Aviv and accommodates Israel's international airport.

LO-DEBAR lō'də-bär [Heb. *lô ḏᵉḇār* (2 S. 9:4f.), *lō' ḏᵉḇār* (17:27)—meaning uncertain]. A Transjordanian site in the region of Gilead. It was near Mahanaim, but its precise location is not certain (see *GTTOT*, §§ 300, 769, 1515).

Mephibosheth the son of Jonathan lived after Saul's death at the home of Machir the son of Ammiel at Lodebar; David brought him from there to join the royal household in Jerusalem (2 S. 9:4f.). When David fled before Absalom and arrived at Mahanaim, Machir of Lodebar was among those who brought provisions to him (17:27-29).

According to the MT of Josh. 13:26, the division of Gad extended from Mahanaim to the border or territory *liḏᵉḇir*. The AV and RSV read "of Debir" (with LXX, Syr., Vulg.; RSV mg. "Lidebir"). Many scholars and the NEB agree with F. M. Abel, who identifies it with the Lo-debar of 2 S. 17:27 and as modern Umm ed-Dabar (or Dubar), about 14 km. (9 mi.) S of the Sea of Galilee (*GP*, II, 304; cf. *WHAB*, p. 40). *See* DEBIR.

Amos 6:13 addresses those who rejoice in *lō' ḏāḇār*, apparently a reference to military successes of Jeroboam II in Transjordan. The RSV text gives the place name "Lodebar," but the margin reads "a thing of nought" (with AV; NEB "a nothing"). The expression is possibly a play on words (*see* KARNAIM). C. E. DE VRIES

LODGE; LODGING PLACE. *See* INN.

LOFT (1 K. 17:19, AV). *See* CHAMBER.

LOFTY; LOFTILY; LOFTINESS [Heb. *gāḇô(a)h, mārôm* (Ps. 73:8), niphal part. of *nāśā'* (Isa. 57:15), *rûm* (Isa. 2:12), *śāgaḇ* (Isa. 26:5); Gk. *hyperochḗ* (1 Cor. 2:1)]; AV also EMINENT, EXALT, EXCELLENCY, HAUGHTY, HIGH, LIFTED UP; NEB also EXALTED, FINE, HAUGHTY, HIGH, PROUD, SCORNFULLY, TOP.

Referring to a state of elevated height, perhaps of imposing or towering proportions. Hence, reference is made to lofty battlements (Zeph. 1:16), trees (Isa. 2:13; Ezk. 17:22; 31:14), hills (Isa. 2:14), and mountains (Isa. 30:25; 57:7; Ezk. 17:22). A further extension of the word denotes the starry abode or even the very being of God Himself (Job 22:12; Ps. 104:13; Isa. 57:15).

The "lofty places" of Ezk. 16:24-39 are elements of an allegory in which the prophet indicts the Israelites for playing the harlot (see v. 16) and being faithless to their true husband, Yahweh. In keeping with this context of spiritual adultery, "lofty places" are thinly veiled references to the "high places" of Canaanite nature religion, where sexual immorality was rampant. Symbolically, then, the religious cultus of Israel, i.e., its shrines, sacrifices, temple, and faith, had become a "lofty place," a spiritual brothel. It had polluted the land, and thus, had become like the Canaanites (cf. Lev. 18:19-28; Dt. 18:9-12). Another allegory is found in Ezk. 31:14. Here Pharaoh and his cohorts are likened to a lofty cedar (vv. 2f.) which God will strike down because of their pride.

Figuratively, the word "lofty" came to mean hubris, haughtiness, or arrogance. A statistical study of its most important Hebrew root, *gbh* (the root of *gāḇô[a]h*), indicates that this root is most frequently found in wisdom sayings. When so used it is a comment on the idolatry of the horizontal domain that exalts itself against the vertical and transcendent dominion of God. Human "loftiness" is an encroachment on that which rightfully belongs to Him alone. Thus, lofty are the eyes (Prov. 30:13) and threats (Ps. 73:8)) of the proud and arrogant (Jer. 48:29, note the amplifying synonyms). Therefore, there is a day of reckoning, on which all that is "lofty" (Isa. 2:12; cf. 10:33) will be leveled by divine judgment, a day in which "the Lord alone will be exalted" (12:17). But, further, it must also be a day of victory for all those humble of spirit, for the true "lofty one who inhabits eternity" also dwells with them (Isa. 57:15).

In 1 Cor. 2:1 Paul asserts that he did not preach to the Corinthians in "lofty words or wisdom" (the nuance of "lofty" is more appropriate than AV "excellency of speech"). The Gk. *hyperochḗ* means superiority; what Paul means is that he did not distinguish himself by his oratory or wisdom, for that would have detracted from the gospel (cf. v. 2). See F. Grosheide, comm. on 1 Corinthians (*NICNT*, 1953), pp. 57f.

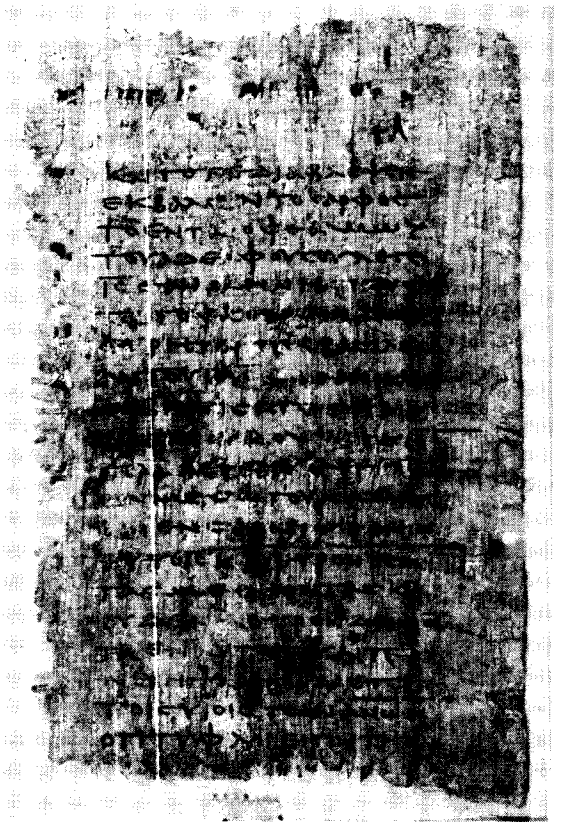
K. H. MAAHS

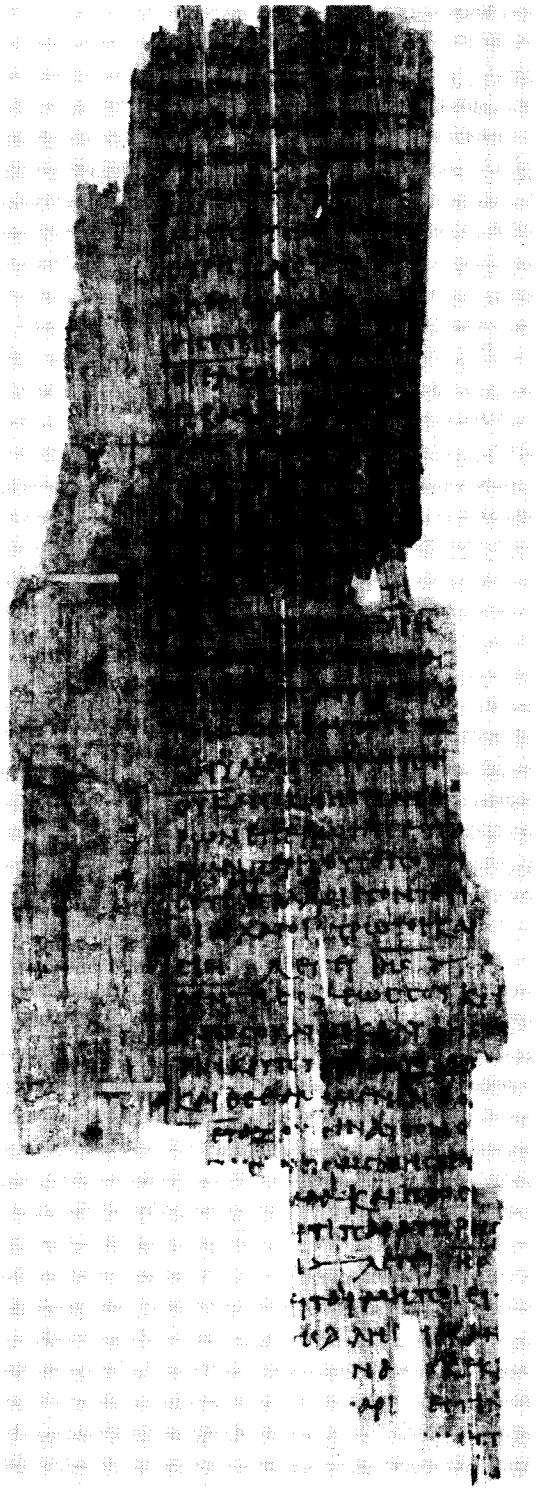
LOG [Heb. *qôrâ*–'beam' (2 K. 6:2, 5), *'ēṣ*–'tree, timber' (Eccl. 10:9; Ezk. 24:10); Gk. *xýlon*–'wood' as construction material (1 Esd. 5:55 [LXX 53]), *dokós*–'beam' (Mt. 7:3-5 par. Lk. 6:41f.)].

Hebrew *'ēṣ* and Gk. *xýlon* are more general terms, while Heb. *qôrâ* and Gk. *dokós* have to do with wood used in construction. The beams sought by the sons of the prophets need not have been large, only what would have been needed for the minimal shelter required in the Jericho area (J. Gray, *I & II Kings* [*OTL*, 2nd ed. 1970], p. 511). In Ezk. 24:5 the term "log" is supplied from v. 10, substituting *hā'ēṣîm* ("the logs") for *hā'aṣāmîm* ("the bones"), which occurs in the next line of v. 5 (see RSV mg.). Gk. *dokós* is used as a striking contrast with the *kárphos*, a tiny piece of straw or wood.

For Lev. 14:10, 12, 15, 21, 24, *see* WEIGHTS AND MEASURES.



E. W. S.



LOGIA lō'jē-ə, lō'gē-ə.

1. Definition.–Logia, "sayings," is the plural of Gk. *lógion*, which is a diminutive form of *lógos*, "word." In classical texts *lógion* means an oracle, the saying of a deity. In the LXX it denotes the word of God. It is used in the NT as the "oracles" of God (Acts 7:38; Rom. 3:2; He. 5:12; 1 Pet. 4:11). Polyc. Phil. 7:1 mentions "the *logia* of the Lord."

Scholars use the word to designate sayings of Jesus, especially collections of sayings that the Gospel writers may have used. It has also been applied to the sayings of Jesus found among the Oxyrhynchus papyri, the Semitic source associated by Papias with Matthew, the so-called Q source of the Synoptic Gospels, and the sayings of Jesus in the Gospel of Thomas.

Oxy. P. 1, containing (on two sides) the Greek form of logia 26b-33 of the Gospel of Thomas. Logion 27 reads: "Jesus said, 'If you do not fast as regards the world, you will not find the Kingdom. If you do not observe the Sabbath as a Sabbath, you will not see the Father.'" (Bodleian Library, Oxford)

Oxy. P. 654, containing the prologue and logia 1-6 of the Gospel of Thomas (note that the ends of the lines are missing). A reconstruction of logion 2 reads: "Jesus said, 'Let him who seeks not cease seeking until he finds; and when he finds he will be amazed, and being amazed, he will rule, and ruling he will rest'" (cf. the Nag Hammadi reading: "he will marvel and he will reign over the All") (British Library)

II. Oxyrhynchus Papyri.–In 1897 B. P. Grenfell and A. S. Hunt discovered at Oxyrhynchus in Egypt a Greek papyrus fragment (Oxy. P. 1) containing seven noncanonical sayings attributed to Jesus (see *ISBE* [1929], III, *s.v.* [W. T. Smith]). The papyrus is dated *ca.* A.D. 200. Two other fragments (Oxy. P. 654 and 655), containing six and four additional sayings, were discovered in 1904 and dated to the 3rd cent. A.D.

In their initial publication in 1897 Grenfell and Hunt named the material *Logia Iēsou* ("Sayings of Jesus"). In retrospect, the designation was misleading. Though the term *lógoi*, "words," is found in these fragments, nowhere does the term *lógia* appear.

These discoveries caused great excitement and set off numerous speculations about the nature of these new sayings of Jesus (see the bibliography listed by Fitzmyer, pp. 420-433). A number of the APOCRYPHAL GOSPELS were considered as the source of these sayings, such as the Gospel According to the Egyptians (so A. Harnack, *Expos.* 5th ser., 6 [1897], 404-416), the Gospel According to the Hebrews (Grenfell and Hunt; P. Battifol, *RB*, 6 [1897], 501-515), and the Gospel of the Ebionites (T. Zahn, *Neue kirchliche Zeitschrift*, 16 [1905], 94-105, 165-178). Others wished to connect the sayings with the *logia* spoken of by Papias, which he claimed were used by Matthew. Not until the discovery of the Nag Hammadi Library in 1945 were the Oxyrhynchus papyri identified with certainty. They are now known to be copies of the Greek text of the Gospel of Thomas, which was recovered in a complete Coptic translation from Nag Hammadi. Oxy. P. 654 corresponds to the prologue and the first six logia of Thomas, Oxy. P. 1 matches logia 26-33, and, Oxy. P. 655 logia 36-39 of Thomas (see Fitzmyer, Till).

III. Papias and the Gospel of Matthew.–Papias bishop of Hierapolis (*ca.* 60-130) is an early but not always discriminating witness of the postapostolic period. According to Eusebius (*HE* iii.39) he wrote a work that has not been preserved entitled "Interpretation of the Lord's Logia." Eusebius quoted him as claiming: "Matthew compiled the oracles [*tá lógia*] in the Hebrew [i.e., Aramaic] language, and everyone translated [or "interpreted"] them as best he could."

Ever since F. Schleiermacher (*Theologische Studien und Kritiken*, 5 [1832], 735ff.) suggested that the logia mentioned by Papias should be understood not as the Gospel of Matthew but as a collection of the sayings of Jesus, their identification has been extensively discussed. Among the suggestions made are the following: (1) oracles from the OT, in particular messianic testimonia (so J. R. Harris, *Contemporary Review*, 72 [July-Dec. 1897], 341-48); (2) logia from the apocryphal Gospel According to the Hebrews (Grant); (3) the hypothetical source K (for *Koinos*) of the Synoptic Gospels (P. Parker); (4) the hypothetical source Q of the Synoptic Gospels (T. W. Manson, *Sayings of Jesus* [1957; repr. 1979], pp. 18-20; see IV below); (5) a collection of sayings and deeds of Jesus incorporated into the Gospel of Matthew (J. Munck, *HTR*, 52 [1959], 228; C. F. D. Moule, *Birth of the NT* [1962; 2nd ed. 1966], p. 89; Tasker concluded that the apostle Matthew originally compiled Papias's logia in Aramaic and later incorporated them into his Gospel; see Martin, pp. 238-243); (6) the Aramaic original of the Gospel of Matthew. Though some scholars such as Torrey, Burney, Black, and most recently Zimmermann have argued that parts of the Gospels or even entire Gospels were based on Aramaic originals, most scholars are convinced that the Gospel of Matthew was composed in Greek and not translated from Aramaic.

IV. Quelle.–One of the more popular suggestions for the identification of Papias's logia is the hypothetical source Q (from Ger. *Quelle*, "source"), which designates the non-Markan material common to Matthew and Luke. These two hundred or so verses include the Lord's Prayer, the Sermon on the Mount, and many other sayings of Jesus.

As early as 1838 C. H. Weisse (*Die evangelische Geschichte kritisch und philosophisch bearbeitet* [2 vols., 1838]) had discerned such a distinctive source. For a long time a two-source (Mark and Q) approach to the Synoptic Gospels was the dominant view, but it has been criticized for some years (see Martin, pp. 143-160). Because of its relatively amorphous nature some (e.g., Parker) have even questioned the existence of Q as a distinct document.

J. M. Robinson sought to isolate a new *Gattung* (literary genre) called *lógoi sophōn*, "sayings of the sages," derived from Jewish wisdom traditions, which would include Q and the Gospel of Thomas in a gnosticizing trajectory. According to Koester, "Thus, Thomas does not use Q, but he does represent the eastern branch of the gattung, *logoi*, the western branch being represented by the synoptic *logoi* of Q, which was used in western Syria by Matthew and later by Luke" (Robinson and Koester, p. 136; cf. Devisch, Worden).

V. Gospel of Thomas.–The Gospel of Thomas contains 114 logia or sayings ascribed to Jesus, about half of which are related to sayings of Jesus found in the Synoptic Gospels. It is striking that there are no direct allusions to events in the life of Jesus such as His infancy, baptism, crucifixion, or resurrection.

Although some scholars, e.g., Koester, have argued for the early Palestinian origin and the independent value of the Gospel of Thomas, the Gnostic (or Encratite) cast of these logia make it extremely dubious that more than a few are genuine agrapha (cf. MacRae, Ménard, Schoedel). *See* AGRAPHA.

VI. Form Criticism and the Logia of Jesus.–Radical form critics such as R. Bultmann have supposed that most of the dominical logia in the Gospels are not the actual sayings of Jesus but were created in the post-Easter preaching of the early Church and originally circulated orally as separate pericopes over a considerable period of time. These critics reject as unauthentic the sayings of Jesus that: (1) accord with the teaching of the early Church; (2) accord with the contemporary teaching of Judaism; (3) presuppose a situation unthinkable at the time of Jesus; (4) contradict other, more genuine sayings; or (5) are shown when compared with the Gospels to be a development of something found in them (Calvert, p. 211; Marrow). Moderate critics have pointed out that these criteria are too narrowly based on circular arguments and presuppose an unreasonable isolation of Jesus' teachings from Judaism and from the early Church (cf. Carlston, Hooker [*NTS*], Stanton). Jesus, it is believed, customarily spoke in Aramaic, although he certainly knew Hebrew and possibly even Greek. Conservative scholars have recognized that the differences in the citations of Jesus' logia indicate that usually the Gospels do not attempt to preserve the *ipsissima verba* ("very words") of Jesus but rather His *ipsissima vox* ("very voice"). These scholars have acknowledged that the Evangelists modified the logia of Jesus but have denied that they or the early Christians created them (cf. Chilton, France, Longenecker, Maier).

VII. Authentic Words of Jesus.–In contrast to the skepticism of some form critics about the possibility of recovering authentic sayings of Jesus, other scholars have noted elements that give reason for optimism. J. Jeremias, for example, has identified in Jesus' sayings distinctive words, e.g., "Abba," and certain Aramaisms. H. Schürmann has shown that even on purely form-critical grounds scholars

must deal with the fact that the followers of Jesus began to preserve His sayings even before Easter.

The Swedish scholars H. Riesenfeld and B. Gerhardsson have argued that Jesus like the rabbis must have taught his disciples to memorize His sayings. He transmitted them by text and commentary, terse and incisive statements, didactic and poetic devices, repetition, half-sung recitation, and written memoranda. According to Gerhardsson (*Origins of the Gospel Tradition* [1977], p. 69), Jesus' teachings were not prosaic, everyday statements: "Rather they consist of brief, laconic, well-rounded texts, of pointed statements with a clear profile, rich in content and poetic in form." This feature facilitated their accurate transmission. Gerhardsson (*Memory and Manuscript* [1961], p. 335) concluded, "They [the evangelists] worked on a basis of a fixed, distinct tradition from, and about, Jesus — a tradition which was partly memorized and partly written down in notebooks and private scrolls, but invariably isolated from the teachings of other doctrinal authorities."

The Riesenfeld-Gerhardsson thesis has been criticized (e.g., by M. Smith) on the grounds that it is uncertain that the rabbis used such methods prior to A.D. 70 and that the disciples cannot be compared to the "scholarly" disciples of the rabbis. Some scholars, such as R. Gundry and E. Ellis, have accepted the possibility that the disciples wrote down Jesus' sayings. This assumption would dispense with the long oral period presupposed by form critics and do much to insure the transmission of authentic logia of Jesus.

LOGOS. *See* WORD.

LOINS [Heb. *moṯnayim*]; NEB also WAIST, BODY, LIMBS, MIGHT, etc.; [*ḥ^{a}lāṣayim*] (Job 31:20; 38:3; 40:7; Isa. 11:5; 32:11; Jer. 30:6); AV also REINS; NEB BODY, WAISTS, SIDES, etc.; [*kesel*] (Lev. 3:4, 10, 15; 4:9; 7:4; Job 15:27; Ps. 38:7 [MT 8]); AV also FLANKS; NEB also HAUNCHES, SIDES; [Gk. *osphýs*] (Lk. 12:35; Eph. 6:14; He. 7:10); NEB also paraphrases. The RSV conjectures "loins" (Heb. *mē^{c}îm*–"bowels," "belly") in Isa. 48:1, while the AV has "waters" (*mayim*, with the MT), the NEB "seed" (with the Targum [*zera^{c}*]), and the LXX only "from Judah." For further discussion of this passage, see comms. (e.g., C. R. North, *Second Isaiah* [1964], p. 174).

The loins designate that general area of the body between the ribs and the thighs, the midsection between the upper and lower body that includes the hips, the small of the back, the waist, and the reproductive organs. As the place of the reproductive organs, the loins frequently denote virility and procreation: the Hebrew idiom "come forth from [someone's] loins" (cf. He. 7:10) indicates physical birth, descent, or generation. The RSV, however, tends to paraphrase this idiom: Gen. 35:11, "kings shall spring from you" (NEB "kings shall spring from your body"; AV "kings shall come out of thy loins"); 1 K. 8:19, "your son who shall be born to you" (NEB "the son who is to be born to you"; AV "thy son that shall come forth out of thy loins").

The waist or loins are naturally the place to wear a belt or girdle. Often a garment would be worn ungirded at home, and thus the act of fastening the belt and even at times tucking up the garment indicated preparation for some activity or journey. Consequently, the common Hebrew phrase "gird up the loins" (cf. 1 K. 18:46, which NEB paraphrases as "tucked up his robe"; 2 K. 4:29, NEB "hitch up your cloak"; figuratively, Eph. 6:14, NEB "fasten on the belt of truth") refers to preparation and readiness for action. Before the Exodus the people of Israel ate the Passover with their "loins girded" (NEB "belt fastened"), sandals on, and staff in hand (Ex. 12:11). Before God questioned Job He told him to "gird up [his] loins like a man" (NEB "brace yourself and stand up like a man") in readiness for God's questions (Job 38:3; cf. 40:7). Jesus told His disciples to await alertly His second coming with their loins girded (NEB "belts fastened") and lamps lit (Lk. 12:35). Clearly, then, the girding up of the loins is an idiom describing actual or symbolic dressing for action.

As the important source of procreative strength, as the place where the sword was worn (cf. 2 S. 20:8), and as the vital midsection, the loins can be seen as a center and symbol of strength and vigor (cf. Job 40:16 [Behemoth]). The good wife of Prov. 31 "girds her loins with strength and makes her arms strong" (v. 17; NEB "She sets about her duties with vigour and braces herself for the work"). Rehoboam emphasized his supreme power and harshness: "My little finger is thicker than my father's loins" (1 K. 12:10; 2 Ch. 10:10). Nahum warned the people of Nineveh, "Gird your loins; collect all your strength" (Nah. 2:1). The Lord crushes the loins (NEB "hip and thigh") of His enemies (Dt. 33:11) and ungirds "the loins [NEB "might"] of kings" (Isa. 45:1) by rendering them weaponless and powerless.

Despite their strength, the loins are prone to sickness,

pain, and fear. The loins can be "filled with burning" (Ps. 38:7) and fever, afflicted with trembling (69:23 [MT 24]), "filled with anguish" as in childbirth (Isa. 21:3; cf. Jer. 30:6), or incapacitated by grief, fear, and dread (Nah. 2:10). Such descriptions may refer to some specific abdominal disorder but frequently seem intended to depict graphically loss of strength, utter helplessness, and personal incapacitation.

Wearing sackcloth on the loins was an expression of mourning (cf. Isa. 32:11; Am. 8:10; etc.). The ceremonial law of Israel made specific statements concerning the sacrifice of certain animal parts, including the fatty parts at the loins (*kesel*) or flanks or haunches (Lev. 3:4, 10, 15; etc.). *See* SACRIFICES AND OFFERINGS IN THE OT V.

M. W. MEYER

LOIS lō'is [Gk. *Lōis*]. Grandmother of Timothy and probably mother of his mother Eunice, in view of the close relationship between the two women (2 Tim. 1:5). Although her name is Greek, she was a Hellenistic Jew. Apparently she helped to rear Timothy, training him especially in the OT Scriptures (cf. 3:15). Paul did not claim the two women as his converts, but probably they were brought to the Lord during his first visit to Lystra (Acts 14:6f.), for on his next visit Eunice was a believer (16:1). It is likely that Lois took a similar stand. E. F. H.

LONELY [Heb. *yāḥîḏ*–'only,' 'solitary,' 'isolated'] (Ps. 25:16); AV DESOLATE; [part. of *bāḏaḏ*–'be isolated, alone,' *bāḏāḏ*] (Ps. 102:7 [MT 8]; Lam. 1:1); AV ALONE, SOLITARY; NEB IN SOLITUDE, SOLITARY; [Gk. *érēmos*–'abandoned,' 'desolate,' 'solitary']; AV also SOLITARY.

In ancient times (as sometimes today) SUFFERING was often intensified by the afflicted one's isolation from human fellowship. Because adversity was regarded as divine punishment, the sufferer frequently had to endure abandonment by the human community as well as the devastating fear of having been forsaken by God (e.g., Ps. 25:16; cf. 22:1f., 6-8 [MT 2f., 7-9]). The writer of Ps. 102 compares his isolation to that of "a vulture of the wilderness . . . an owl of the waste places . . . a lonely bird on the housetop" (vv. 6f. [MT 7f.]; cf. vv. 8, 10 [9, 11]). Jerusalem's terrible loneliness (Lam. 1:1) is twofold: her people ("children") have been taken into exile (vv. 1, 4f.), and her former allies ("lovers") have turned against her (vv. 2, 5); cf. the description of the "solitary" (Heb. *bāḏāḏ*) city in Isa. 27:10.

In the NT Gk. *érēmos* occurs most often as a substantive, which the RSV usually renders "wilderness" (or, twice, "desert"); cf. also *erēmía* (RSV "desert," "wilderness"). As an adjective *érēmos* occurs nine times in the phrase *érēmos tópos* (RSV "lonely place," except in Mk. 1:45, where it unfortunately renders "country"). *Érēmos* can denote any place that is uninhabited, not necessarily a DESERT region lacking water and vegetation. Jesus retreats to a "lonely place" when He wants to escape the press of the crowds; but the crowds pursue Him, even into areas where no food is available (e.g., Mt. 14:13-15 par. Mk. 6:31-36; Lk. 9:10-12; cf. Mk. 1:45). In the "lonely place" (or WILDERNESS) one can be alone to fast and pray, to experience dependence on God and communion with Him. It is to such a place that Jesus withdraws for forty days after His baptism (Mt. 4:1f. par.). And to such places He returns when He seeks an opportunity for prayer (e.g., Mk. 1:35; cf. 6:45f. par.) or for rest with His disciples (e.g., 6:31f.).

LONG (FOR) [Heb. *tā'aḇ* (Ps. 119:40, 174), *yā'aḇ* (119:131), *kāsap* (Job 14:15; niphal, Gen. 31:30; Ps. 84:2 [MT 3]), *šā'ap*–'gasp for' (Job 7:2; 36:20 [MT 21]), piel of *kālâ*–'fail (with longing)' (2 S. 13:39), piel of *ḥāḵâ*–'wait for' (Job 3:21), piel of *nāśā' nepeš*–'lift up one's desire' (Jer. 22:27), *ḥāšaq*–'cling to' (Gen. 34:8), *ḥēšeq*–'pleasure' (Isa. 21:4), piel of *qāwâ*–'wait for' (Lam. 2:16), *pāqaḏ*–'miss, long for' (Ezk. 23:21), *pû(a)ḥ*–'blow' (Ps. 12:5 [MT 6]), *'ārag*–'pant for' (Ps. 42:1 [MT 2]); Gk. *epipothéō*–'desire' (Rom. 1:11; 2 Cor. 5:2; etc.), *échō epipothían*–'have a longing' (Rom. 15:23), *epipóthētos*–'longed for, desired' (Phil. 4:1), *epithyméō*–'desire' (Mt. 13:17; 1 Pet. 1:12; Rev. 9:6), *epithymía*–'yearning' (Rev. 18:14)]; AV also DESIRE (GREATLY/EARNESTLY), PANT (Ps. 42:1 [MT 2]), PUFF (12:5 [MT 6]), etc.; NEB also WAIT FOR, HAVE FEAR (Job 36:20), PINE, WAIT FOR, RELIVE (Ezk. 23:21), DESIRE, etc.; **LONGING** [Heb. *tā'ᵃḇâ*–'craving, longing' (Ps. 38:9 [MT 10]; 119:20), *kālâ*–'cease, fail' ("fail with longing," Dt. 28:32); Gk. *epipóthesis* (2 Cor. 7:7, 11), *apokaradokía*–'eager expectation' (Rom. 8:19)]; AV also (EARNEST/VEHEMENT) DESIRE, EARNEST EXPECTATION; NEB also LAMENT, EAGER EXPECTATION; **LONGINGLY** [Heb. hithpael of *'āwâ*–'crave'] (2 S. 23:15 par. 1 Ch. 11:17); AV LONG; NEB LONGING.

English "long, longing" are used by the RSV for a wide range of human desires and cravings. Frequently the terms denote natural human emotions that are not judged to be morally good or bad. E.g., it is natural for parents to miss their children when they are separated from them (cf. Dt. 28:32; 2 S. 13:39) and for Christians to long for one another's fellowship (e.g., Rom. 1:11; 15:23; 2 Cor. 7:7, 11; 9:14; Phil. 2:26; 4:1; 1 Thess. 3:6; 2 Tim. 1:4). Homesickness (Gen. 31:30; Jer. 22:27; cf. 2 S. 23:15 par.) and sexual desire (cf. Gen. 34:8) are likewise emotions common to mankind. Those who are oppressed long for safety (Ps. 12:5 [MT 6]), while persons suffering extreme pain may even yearn for death (Job 3:21; Rev. 9:6; cf. Paul's desire for the resurrection life, 2 Cor. 5:2).

Certain desires, however, are contrary to God's will and thus are judged to be sinful; cf. Israel's lust for illicit alliances (Ezk. 23:21) and the worldly merchants' craving for the luxuries and vices of Rome (Rev. 18:14).

By contrast, the godly Israelite longs for knowledge of God's will (Ps. 119:20, 40, 131), for God's salvation (v. 174; cf. v. 81), and for communion with God Himself (42:1 [MT 2]; 84:2 [MT 3]). 1 Pet. 2:2 instructs Christians to crave spiritual nourishment. Righteous men and prophets (Mt. 13:17) and even angels (1 Pet. 1:12) are depicted as longing to see the salvation that God has revealed in Jesus Christ, and the whole creation as anxiously awaiting its own liberation (Rom. 8:19).

LOOK. The translation of a large number of Hebrew and Greek terms.

I. In the OT.–The most common Hebrew verb for looking is *rā'â* (usually rendered "see"). In the literal sense it simply denotes seeing with the eyes (e.g., Gen. 8:13); but it can also be used for "seeing" in a dream or vision

(e.g., Ezk. 1:15; 2:9; cf. *rō'eh*, "seer") or for God's awareness of the hearts and actions of mankind (e.g., 1 S. 16:7). Another figurative use occurs in the phrase "look one another in the face" (hithpael of *rā'â* + *pānîm*), which means to meet in battle (2 K. 14:8; cf. v. 11; par. 2 Ch. 25:17; cf. v. 21). *Ḥāzâ*, like *rā'â*, is frequently used for supernatural visions as well as natural vision (e.g., Cant. 6:13 [MT 7:1]; "gaze," Mic. 4:11; cf. *ḥōzeh*, "seer," rendered "those who gaze" in Isa. 47:13). Another common term, *pānâ* (lit. "turn the face"), generally involves turning to look in a particular direction (e.g., Ex. 2:12; 16:10). *Šāqap* (niphal or hiphil) means to look down from a high place, e.g., from a mountain (Gen. 18:16; 19:28; Nu. 21:20; 1 S. 13:18), from a window (2 K. 9:30, 32; cf. also Gen. 26:8; Jgs. 5:28; 2 S. 6:16 par. 1 Ch. 15:29; Cant. 2:9), or (of God) from heaven or a cloud (Ex. 14:24; Dt. 26:15; Ps. 14:2; 53:2 [MT 3]; 102:19 [MT 20]).

The hiphil of *nāḇaṭ* usually means to fix one's gaze on a person or thing (e.g., Gen. 19:17; Ex. 33:8; 1 S. 16:7a; cf. "gaze," Prov. 4:25; Hab. 2:15). Continually "looking to" someone (or something) indicates faith in the object of one's attention (e.g., Isa. 22:8, 11). Yahweh rewards all those who look to Him (Ps. 34:5 [MT 6]). Isaiah prophesies of a day when "men will regard [*šā'â*, lit. "look at with interest"] their Maker, and their eyes will look to [*rā'â 'el-*] the Holy one of Israel" (17:7; cf. v. 8). The piel of *qāwâ* (lit. "wait for") can be used in a similar manner. Steadfast waiting demonstrates faith that God will act to save His people (*see also* WAIT). Isa. 64:3 praises God for performing mighty acts that Israel had not even expected. But at other times God's people express bitter disappointment that they have looked in vain for help (e.g., Job 30:26), for compassion (Ps. 69:20 [MT 21]), for justice (Isa. 59:11), for peace and healing (Jer. 8:15; 14:19); and Yahweh complains about disappointed expectations for His people (Isa. 5:2, 4, 7).

Hiding the face or eyes can signify shame, fear, or reverence, as when "Moses hid his face, for he was afraid to look [hiphil of *nāḇaṭ*] at God" (Ex. 3:6; cf. Acts 7:32; cf. also Elijah, 1 K. 19:13). But in other contexts this gesture can be a sign of indifference or rejection (e.g., Prov. 28:27; cf. the references to Yahweh hiding His face, e.g., Dt. 31:17f.; Job 13:24; Ps. 13:1 [MT 2]; 27:9; Ezk. 39:23). By contrast, looking upon persons often means turning one's attention to them in love and showing them favor (e.g., 1 S. 1:11; 2 S. 16:12; Ps. 84:9 [MT 10]; 101:6; 119:153; Lam. 1:11; cf. Am. 5:22; in the NT, cf. Mk. 10:21; Lk. 1:25, 48 ["regard"]; 9:38). God's look is imbued with great power: "[He] looks on the earth and it trembles" (Ps. 104:32). In extreme distress, God's people sometimes experience His look as hostile and pray that He will "look away from" them (*šā'â min*, e.g., Job 7:19; 14:6; Ps. 39:13 [MT 14]; cf. Isa. 22:4). At other times they cry out to God to look down on an evil situation and act to set it right (e.g., Isa. 63:15; Lam. 1:11; 2:20; cf. Acts 4:29), and they complain when He appears to be looking on passively (e.g., Ps. 35:17; Hab. 1:13).

In addition to functioning as an organ for sight, the eyes express many emotions. Thus a look can express envy (e.g., 1 S. 2:29, 32; Ps. 68:16 [MT 17]), pride (e.g., Ps. 101:5; Isa. 2:11; cf. AV Ps. 18:27 [MT 28]; Prov. 21:4), contempt (e.g., Gen. 16:4f.; Est. 1:17), anger (e.g., Prov. 25:23; Jer. 3:12), horror (e.g., Isa. 13:8; cf. Nah. 3:5-7), triumph (e.g., Ps. 59:10 [MT 11]; 118:7), amazement (e.g., Gen. 43:33), favor (e.g., Ps. 101:6), disgust (e.g., 119:158), dismay (e.g., Ezk. 4:17; cf. Mt. 6:16), etc. *See also* EYE; EVIL EYE; FACE.

II. In the NT.--The most common NT verb for seeing is Gk. *eídon* (frequently used by the LXX to render Heb. *rā'â*; usually rendered "see"). Like *rā'â*, Gk. *eídon* has a range of meanings, including literal sight with the eyes (e.g., Mk. 12:15; Lk. 18:24; 21:29) and visionary perception (Rev. 4:1; 5:11; 6:12; etc.). The demonstrative particles *idoú* and *íde* ("Look!") are used to draw attention to something (e.g., Mt. 12:2 par.; Mk. 11:21; 13:1). *Blépō* generally has a greater emphasis on the function of the eyes in seeing (cf. passages where "seeing" is contrasted with blindness, e.g., Mt. 12:22). The variety of its nuances is reflected in the RSV's renderings, which include "look" (e.g., Eph. 5:15), "look at" (e.g., Mt. 5:28), "look into" (Rev. 5:3f.), "look out for" (Phil. 3:2), and "look to" (2 Jn. 8). Among its compounds, *emblépō* is usually rendered "look at" (e.g., Mt. 6:26; 19:26 par.). The type of look that Jesus gave Peter (Lk. 22:61) is not described, but its effect was powerful: Peter "remembered . . . and he went out and wept bitterly" (vv. 61f.); cf. the maid's look in Mk. 14:67. *Anablépō* can mean either "see again" (cf. "receive one's sight," Mt. 11:5; etc.) or "look up" (e.g., Mk. 16:4; Lk. 19:5; 21:1); the term is used of Jesus' characteristic manner of looking up to heaven when He prayed (Mt. 14:19 par.; Mk. 7:34). *Periblépō* ("look around [at]") is used primarily by Mark (3:5, 34; 5:32; 9:8; etc.; cf. also Lk. 6:10). Other compounds are *epiblépō* ("look upon," Lk. 9:38; cf. 1:25 [*epeídon*]; "regard" in v. 48 [for *epiblépō*]; see I above), *apoblépō* ("look to," He. 11:26), and *diablépō* ("look intently," Mk. 8:25).

"Look for" sometimes means simply to search for a person (e.g., rendering *zētéō*, Lk. 2:48; Jn. 7:11; etc.; *anazētéō*, Acts 11:25; *see* SEEK; cf. also "look after" [*zētéō*], Phil. 2:21). But it can also mean to WAIT expectantly for the Messiah (*prosdokáō*, Mt. 11:3 par.) or for the kingdom of God (*prosdéchomai*, Mk. 15:43 par.; Lk. 2:25, 38); cf. He. 11:10: "For he looked forward to [*ekdéchomai*, lit. "wait for"] the city which has foundations. . . ."

Atenízō denotes the intensity of a look (e.g., "look closely at," Acts 11:6). The men on the council "gazed at" Stephen's shining face (6:15; cf. "gaze" in Lk. 22:56; Acts 1:10; 3:4; 7:55); but Moses' face shone so brightly that the Israelites could not look at it (2 Cor. 3:7). Interestingly, in three passages the term is used in connection with a miracle (Acts 3:4; 13:9; 14:9). Some rabbinic stories about healing and cursing make reference to eye contact (SB, II, 713-15), and in later Hellenistic times *atenízō* came to be used in connection with magic (*DNTT*, III, 520). The emphasis in these passages is not, however, on any kind of magical power in the glance of Peter or Paul. (See E. Haenchen, *Acts of the Apostles* [Eng. tr. 1971], pp. 199 n. 4, 400 n. 2; *see also* EVIL EYE.)

Skopéō, rendered "look to" three times by the RSV, can mean to inspect something critically and then hold it before oneself as a model. Paul admonishes the Corinthians (2 Cor. 4:18) to discriminate between what is eternal and what is transitory, the Galatians (6:1) to practice self-examination lest they fall into temptation, and the Philippians (2:4) to give careful consideration to the interests of others as well as themselves (cf. also "mark," 3:17; "be careful," Lk. 11:35; "take note of," Rom. 16:17).

Theáomai often means simply to observe something (e.g., Mt. 22:11), but it can also connote a "beholding" that includes the apprehension of a spiritual reality (cf. 1 Jn. 1:1; "behold," Jn. 1:14). *Parakýptō* can signify either a literal (Jn. 20:5, 11; cf. Lk. 24:12) or figurative (Jas. 1:25; 1 Pet. 1:12) stooping to look into something; cf. *anakýptō* (lit. "stand erect, raise oneself up"; RSV "look up," Lk. 21:28; Jn. 8:10; cf. Lk. 13:11).

LOOPS [Heb. *lulā'ōṯ*] (Ex. 26:4f., 10f.; 36:11f., 17). Rings or folds made of blue thread along the outermost edge of each set of five curtains, so that the two sets could be coupled with gold clasps, "that the tabernacle may be one whole" (26:6). *See* TABERNACLE.

LORD [Heb. *YHWH* (Gen. 2:4f., 7f., etc.), *'ᵃḏōnāy* (Gen. 15:2, 8; 18:3; etc.), *yāh* (Ps. 68:18 [MT 19]; 77:11 [MT 12]; etc.), *'āḏôn* (e.g., Gen. 19:2), *ba'al*–'master' (Nu. 21:28; Isa. 16:8), *gᵉḇîr*–'lord, master' (Gen. 27:29, 37), *seren*–'prince, tyrant' (Jgs. 3:3; 16:5; etc.), *śar*–'leader, chief' (Jgs. 16:23; Ezr. 8:25), *šālîš* (2 K. 7:2, 17, 19; *see* CAPTAIN), *'addîr*–'mighty one' (Jer. 25:34-36), (verb) *šālaṭ* (Eccl. 8:9); Aram. *mārē'*–'lord, master' (Dnl. 2:47; 4:19 [MT 22]), pl. *raḇrᵉḇānîn*–'nobles, lords' (e.g., Dnl. 4:36 [MT 33]); Gk. *kýrios* (e.g., Mt. 1:22), *despótēs* (Lk. 2:29)]; AV also RULETH (Eccl. 8:9), PRINCIPAL (Jer. 25:34-36); NEB also OFFICER (Ezr. 8:25), NOBLES (Dnl. 4:36), LIEUTENANT (2 K. 7:2, 17, 19), etc. A form of the verb *kyrieúō* ("rule") is generally rendered "lords" in 1 Tim. 6:15. The AV also renders Gk. *megistán* (Mk. 6:21; RSV COURTIER) and *rhabbouní* (Mk. 10:51; Jn. 20:16; RSV MASTER, TEACHER) as "lord."

A number of the words may be applied to any person who possesses and exercises authority, from the owner of cattle (Isa. 1:3, *ba'al*) to "the Lord of all the earth" (Josh. 3:11; Ps. 97:5; Mic. 4:13, *'āḏôn*). Lordship may vary from the legitimate use of rightful authority (e.g., Lk. 20:15f.) to the arbitrary exercise of assumed power (e.g., Mk. 10:42).

I. Important OT Terms
  A. *'āḏôn*
  B. *YHWH*
  C. *'ᵃḏōnāy*
II. NT Terms
  A. *Kýrios*
  B. *Despótēs*

I. Important OT Terms.–A. 'āḏôn. Basically denoting the right to command, this honorific title (found more than 300 times) was used: (1) as a courteous form of address ("Sir," e.g., 2 S. 1:10); (2) when a subordinate addressed a person of superior rank, such as God (Ps. 97:5; Isa. 1:24), a king (Isa. 26:13), a master (Gen. 24:18), a father (31:35), or a husband (18:12). The form *'ᵃḏōnî* ("my lord") (pl. *'ᵃḏōnay*), a royal title (1 S. 29:8), is to be carefully distinguished from the divine title *'ᵃḏōnāy* ("my Lord," "Lord," or "O Lord"), used over 130 times of Yahweh, especially in the Psalms and Isaiah (see I.C below).

B. YHWH. These four consonants, which form the so-called tetragrammaton, are usually vocalized *Yahweh*. This form has been explained in various ways: (1) as a substantive from the root *hwh* (an old form of *hyh*, "be, become") with the preformative *y*, meaning "the self-existent One"; (2) as an archaic imperfect qal form of *hwh* (equivalent to *yihyeh*), meaning "He exists" and alluding to the divine self-existence; (3) as the imperfect hiphil of this same root, meaning either "He who brings into existence" (a reference to the creative activity of God) or "He who causes to come to pass" (a reference to the divine providence); (4) as an abbreviation of *yahweh 'ᵃšer yihweh* (cf. Ex. 3:14), "He brings into being whatever exists."

Unlike *'ᵉlōhîm*, a common or generic noun which is the general name for deity, *Yahweh* is a proper noun, the personal name of Israel's God, "the God of Abraham, the God of Isaac, and the God of Jacob" (Ex. 3:15). Ex. 6:3 implies, not that the patriarchs did not call God "Yahweh," but that, knowing Him as *'ēl šadday* (Gen. 17:1), they lacked knowledge of His character or nature as expressed by the name Yahweh.

C. 'ᵃḏōnāy. Like *'ᵉlōhîm*, this form is often explained as a plural of majesty, excellence, or intensity (lit. "my Lords," the special plural form distinguishing it from *'ᵃḏōnay*, "my lords"). Others interpret *'ᵃḏōnāy* as meaning "Lord of all" (e.g., Eissfeldt). In either case the form highlights the power and sovereignty of Yahweh as "Lord."

The postexilic Jewish practice of substituting *'ᵃḏōnāy* (or *'ᵉlōhîm*) for *Yahweh* in the public reading or reciting of the Scriptures may have arisen from Lev. 24:16, interpreted (erroneously) to mean that the simple utterance of the sacred tetragrammaton was a capital offense, or from the fear that to pronounce the divine name would be to reduce God to the status of a pagan deity who was addressed by a personal name.

This customary substitution of *'ᵃḏōnāy* ("Lord") for *Yahweh*, due to the reverential avoidance of the ineffable name of the God of Israel, explains: (1) why Greek-speaking Jews in the 1st cent. A.D. (and probably before) regularly used *Kýrios* ("Lord"), the Greek equivalent of *'ᵃḏōnāy*, to refer to God; (2) why the Masoretes in the 7th cent. A.D. vocalized the consonants *YHWH* with the vowels of *'ᵃḏōnāy* (which in turn produced the hybrid English form "Jehovah"); (3) why English Bibles commonly use "LORD" for *Yahweh* and Latin versions use *Dominus*. (Where the Hebrew is *'ᵃḏōnāy Yahweh* [e.g., Gen. 15:2, 8], the AV, RSV, and NEB have "Lord GOD" [the ASV has "Lord Jehovah"] to avoid the repetition of "Lord.")

II. NT Terms.–A. Kýrios. Originally an adjective (with the sense "having power"), *kýrios* serves only as a noun in the NT, occurring in every NT book except Titus and 1, 2, and 3 John. It means "sir," "owner," "master," "lord," or "Lord," being used of a man as an owner (Mt. 20:8), master (Lk. 13:8), father (Mt. 21:30), or one worthy of respect ("Sir," Jn. 4:11); of an angel (Acts 10:4); of Jesus, both during His ministry (Lk. 9:54) and after His resurrection (Eph. 6:5-10); and of God (Lk. 1:6; Acts 7:33; Jas. 1:7).

Although in the first-century pagan world *kýrios* was not a proper name but a title added to a deity's name (e.g., "the lord Serapis"), it became a personal name by which Christians referred to Jesus as shown by the Aramaic phrase *Māranā ṯā* ("Our Lord, come!") in 1 Cor. 16:22. Indeed, Christians are described as "those who call upon the name of the Lord" (Acts 9:14, 21; 22:16; Rom. 10:13; 1 Cor. 1:2; 2 Tim. 2:22; cf. Joel 3:5, LXX), whether in baptism, prayer, or exorcism.

Scholars offer various explanations for the Christian application of the title *Kýrios* to Christ. (1) The pre-Pauline Hellenistic churches derived the term from the religious terminology of oriental Hellenism (cf. 1 Cor. 8:5f.); "at the very outset the un-modified expression 'the Lord' is unthinkable in Jewish usage" (R. Bultmann, *Theology of the NT*, I [Eng. tr. 1952], 51; cf. pp. 124f., following W. Bousset, pp. 119-152). (2) In the confession "Jesus (Christ) is Lord" (Rom. 10:9; Phil. 2:11), Christian wor-

shipers registered a silent protest (cf. Jude 4) against the contemporary use of the term to refer to pagan deities or to apotheosize human rulers in the cult of the Caesar (Deiss.*LAE*, pp. 349-362). (3) Considered in the light of Christ's sharing of Yahweh's authority and functions and exercise of Yahweh's rights (note, e.g., the use of Ps. 34:8 [MT 9] in 1 Pet. 2:3, or Isa. 8:12f. in 1 Pet. 3:14f.), the LXX rendering of *YHWH* by *kýrios* may have prompted the Christians to adopt the name to designate Jesus (see Baudissin, II, 236-241; III, 697-710). Later discoveries, however, show that in the LXX the divine name *YHWH* probably was not rendered by *kýrios* but was written out in Aramaic or paleo-Hebraic letters or was transliterated into Greek letters, e.g., *IAŌ* (see G. Howard, *JBL*, 96 [1977], 63-83). (4) God's vindication of Christ by His resurrection and elevation to universal recognition and cosmic dominion as Lord, recalled in Christian worship (Phil. 2:9-11), invested the *kýrios* title with its full significance (see Cullmann, pp. 195-237).

Certainly *kýrios* is the distinctive NT title signifying the resurrected and ascended Jesus (2 Cor. 5:6, 8; 1 Thess. 4:15f.) as universal sovereign and head of the Church, although the concept of His being "Lord" doubtless arose during His earthly life as a consequence of His authoritative teaching and divine power (see Mk. 11:3; 12:35-37, citing Ps. 110:1; cf. Jn. 13:13f.). That is, the preresurrectional historical experience of the lordship of Jesus foreshadowed the postresurrectional theological confession of Jesus as Lord.

Whenever worshiping Christians repeated the Church's earliest confession of faith, "Jesus is Lord," they were: (1) implying that the Christ of faith was none other than the Jesus of history (Acts 2:34-36); (2) acknowledging the deity of Christ (Jn. 20:28; Phil. 2:6, 9-11); (3) admitting the Lord's personal rights to absolute supremacy in the universe, the Church, and individual lives (Acts 10:36; Rom. 10:12; 14:8; 1 Cor. 8:6; Jas. 4:15); (4) affirming the triumph of Christ over death and hostile cosmic powers when God raised Him from the dead (Rom. 10:9; 14:9; Eph. 1:20-22; Col. 2:10, 15), and therefore also the Christian's hope of resurrection (1 Cor. 6:14; 2 Cor. 4:14); (5) epitomizing the Christian message (*kērygma*, cf. Rom. 10:8f.; 2 Cor. 4:5) and defining the basis of the teaching (*didachē*, cf. Col. 2:6f.); (6) declaring everyone's accountability to the Lord, the righteous judge (1 Cor. 4:5; 2 Tim. 4:1, 8); (7) making a personal and public declaration of faith (Rom. 10:9), which testified to their being led by the Holy Spirit (1 Cor. 12:3); (8) repudiating their former allegiance to many pagan "lords" and reaffirming their loyalty to the one Lord through and in whom they existed (8:5f.; 1 Tim. 6:15).

B. Despótēs. The word is used of God the Father (Lk. 2:29; Acts 4:24; Rev. 6:10), Christ (2 Tim. 2:21; 2 Pet. 2:1; Jude 4), and human masters (e.g., 1 Pet. 2:18). See further *TDNT*, II, *s.v.* δεσπότης (K. H. Rengstorf).

J. HARRIS

LORD OF HOSTS. *See* GOD, NAMES OF II.C; HOST OF HEAVEN.

LORDLY [Heb. *'addîr* (Jgs. 5:25), *'eḏer* (Zec. 11:13)]; AV also GOODLY (Zec. 11:13); NEB "fit for a chieftain" (Jgs. 5:25), NOBLE (Zec. 11:13). Both terms describe what befits persons of noble rank.

LORDS OF THE PHILISTINES [Heb. *sarnê pᵉlištîm* (Jgs. 3:3; 16:5, 8, etc.)]. The precise meaning and etymology of Heb. *seren* are unclear, although the contexts in which it occurs indicate that it refers to Philistine officials or rulers (cf. Josh. 13:3). *Seren* is probably a loanword, and scholars have appealed to various languages for its cognates. Many have assumed a relation with Gk. *týrannos*. Hence J. Soggin (*Joshua* [Eng. tr., *OTL*, 1972], p. 149) translated it "tyrannies"; although he admitted that this etymology may not be correct, he thought that the translation accurately reflected the situation of the Philistine city-states (cf. R. Boling, *Joshua* [*AB*, 1982], p. 337, who claimed the cognate is Aegean-Anatolian *tyrannos*). I. Eitan (*Revue des études juives*, 82 [1926], 223) appealed to Egyp. *śr.n.(t)*, "high official of a city," which accords well with the biblical meaning. Finally, P. K. McCarter (*I Samuel* [*AB*, 1980], p. 123) noted another possibility: hieroglyphic Hittite *tarwanas*, a title of Neo-Hittite rulers.

G. A. L.

LORD'S DAY.

I. NT.–The expression "Lord's Day" (Gk. *kyriakḗ hēméra*), found only in Christian sources, first appears in Rev. 1:10 as a designation of the first day of the week. It is not to be confused with the eschatological "day of the Lord" (*hēméra toú kyríou*). The most plausible explanation of the term is that it derives from the parallel expression "Lord's Supper" (1 Cor. 11:20), since the early Christians gathered on the first day of the week to celebrate this meal as the culmination of their corporate worship. An account of an early (late 50's) Lord's Day service is found in Acts 20:7-11, beginning with the words "on the first day of the week, when we were gathered together to break bread." Christians chose the first day of the week for worship undoubtedly because Christ rose on that day and met with the gathered disciples at the time of the evening meal. At this time He ate and drank with them (Lk. 24:41-43; cf. Acts 10:41), renewing the table fellowship that He had shared with them on the night on which He was betrayed. Hence Lord's Day worship is the Christian festival of the Resurrection, in which Christians, like the original disciples, have fellowship with one another and with the risen Christ whom they trust as Savior and worship as God.

This conclusion throws light on Paul's reference to the first day of the week when writing to the Corinthians about a collection for the Jerusalem church: "On the first day of the week, each of you is to put something aside and store it up, as he may prosper, so that contributions need not be made when I come" (1 Cor. 16:2). Paul did not choose the first day above others as peculiar to the situation of the Corinthians; he said that he gave the same instructions to the churches of Galatia (v. 1). Nor does the idea of regular saving of money imply that it must be done on the first day of the week. Hence there must have been some other reason, understood by Paul and his readers, why he expressly designated the first day. Since in a later letter (2 Cor. 9:12) he called the collection set aside on this day a *leitourgía*, i.e., a ministration of a sacred character, the choice of the day definitely points to its religious significance. Here then is further evidence that by the middle of the 1st cent. the first day of the week had unique meaning for the Christian community.

The testimony to first-day worship in the postapostolic age is in every way consonant with this view. By Justin's time (mid-2nd cent.), however, most Christians gathered on Sunday morning, evidently because the emperor Trajan's edict against seditious assemblies proscribed evening meetings. From that time to the present Christians have customarily worshiped on the morning and/or evening of the first day of the week.

Christians' worshiping on the first day not of the month but of the week indicates that the Church, as the "new Israel," accepted the sabbatical rhythm of time revealed to Israel through Moses. Some have construed the fourth commandment, "Remember the sabbath day, to keep it holy" (Ex. 20:8-11), as a mere ceremonialism, fulfilled in Christ after the analogy of the OT sacrificial ritual. Others have insisted that the Church is bound to observe the seventh day just as it is bound to refrain from idolatry, stealing, and the like. The great majority, however, have recognized that the truth lies between these two extremes.

Surely the gentile Church's universal acceptance of the weekly cycle of time indicates that it was a part of the authoritative, apostolic tradition or "pattern of teaching to which they were delivered" (Rom. 6:17). It is clear, however, that while the Christians universally observed the sabbatical rhythm of time, they did not specifically or primarily observe the sabbath (= seventh) day. Thus the apostolic Church spoke both a "yes" and a "no" to the fourth commandment. This dialectic is a specific instance of the general truth that the fulfillment of the OT in Jesus Christ is a fulfillment in principle but not yet in finality. The sabbath rest, which believers have in Christ, is not only a present reality but also a future hope; they have indeed found rest unto their souls but at the same time must give all diligence to enter into God's rest. The principle of the sabbath, then, is both an OT ceremonialism that has been fulfilled in Christ and a permanent interpretative category of redemptive history with definite eschatological implications. Christians, therefore, are free from the sabbath in that they can gather on the first day, and at the same time stand under the sign of the sabbath in that they gather every seventh day.

The unique relationship of the Jewish sabbath to the Christian Lord's Day bears on the ethical question of how Christians should observe the Lord's Day. The English Puritan tradition requires that one refrain from all labor and recreation (except "works of mercy and necessity") and spend the whole day in private and public devotion. Proponents have appealed to the OT proscription of all labor on the sabbath and traditionally have preferred the term "Sabbath Day" to designate the Christian day of worship. A less strict view, sometimes described as the "Continental Sunday," has stressed only the need for common worship on the Lord's Day, without prohibiting recreation and amusements.

Americans have traditionally observed the English Puritan sabbath. The colonists enforced observance of the day by civil legislation, now popularly called "blue laws." Many of these laws are still on the books and some are locally enforced. The constitutional separation of church and state, however, has precluded a national Sunday-closing law. Although few would advocate a return to a legally enforced observance of the Lord's Day, discerning Christian leaders are increasingly concerned that the American Sunday is being rapidly turned into a fun-day and that Christians must be taught the importance of the Lord's Day in the life of the Church and the nation. In keeping with this concern are three general principles bearing on the observance of the Lord's Day.

(1) One rightly observes the day who does so in a faith that renounces all self-confidence and trust in one's own works and rests only in God for deliverance from sin. Because believers have not yet entered the final rest of the life to come, however, they cannot say that this rest in the Lord is only a matter of the heart. An outward sign should correspond to the inner reality; they should cease their labors as a public witness of their renouncing all their works and of their trust in God's grace alone.

(2) One rightly observes the day who meets with God's people for worship. The "rest" of the Lord's Day is not idleness but a gathering in which believers have fellowship with one another and with the risen Lord. The Lord's Day is not a private day; it belongs to the Church. In fact, the Church was born as a Lord's Day assembly, whether one thinks of the original gathering of the disciples on the evening of the first Easter or of the subsequent gathering in the upper room at Pentecost when the Spirit was poured out and Christians first preached. Without such gatherings the Church cannot survive, and without the Church Christians cannot survive. Voltaire thus remarked, "If you want to kill Christianity, you must abolish Sunday."

(3) One rightly observes the day who does so with joy. The "rest" of the Lord's Day is the joyous rest of a festive day. It goes back to the original joy of the disciples when they became convinced that "the Lord is risen; he is risen indeed." Therefore Barth's rejection of Goethe's apothegm, "Bitter week, happy festival," is well taken. The joy of the Lord's Day festival illumines the remainder of the Christian week.

P. K. JEWETT

II. Early Church.–The period immediately after the NT sheds little clear light on the Church's observance of the Lord's Day. Four apparent references, three of them by Christian writers, have been the subject of intense debate. (1) Ignatius refers to those who have "obtained new hope, no longer keeping the sabbath [lit. "sabbathing"] but living according to the Lord's Day [Gk. *kyriakḗ*, i.e, without the word for "day"] on which our life dawned through him and his death" (Magn. 9:1). *Kyriakḗ* here seems to be a shortened form of the expression used in Rev. 1:10, and this fact, along with the context, leads to use of the word "day" in translating the passage. Ignatius does not specifically mention worship in this context. (2) Did. 14:1 uses the odd expression *kyriakḗ kyríou*, "Lord's [Day] of the Lord," for the occasion of Christian worship, but does not contrast this occasion with the sabbath. (3) Similarly, Pliny, in his famous letter to Trajan (*Ep.*x.96) says that Christians meet on a fixed day to sing a hymn (or recite a form of words), but he does not specify the day. (4) Barn. 15:9 brings out the significance of the first day (called the eighth day of the old creation), but does not use the term *kyriakḗ*. Only when taken together do these passages imply that early Christians gathered for worship on the first day of the week, the day of the Resurrection.

More solid testimony comes when Justin Martyr, wanting to give a candid exposition of Christianity, offers an account of the services that were held on the day of the sun, which he identifies as the day of creation and also of the Resurrection (*Apol.* i.67). Justin obviously had in view an established practice, and although he wrote in Rome, he neither suggested that Rome had initiated the custom nor that it had only a local application. The reason he advanced for the importance of the day agrees with the thought of Barnabas (the day of the two creations) and also with the NT witness to the first day of the week as the day both of the Resurrection and of the risen Lord's meetings with His disciples.

After Justin evidence for the first day's status as the day of Christian worship accumulates rapidly. As yet, however, no suggestion was made that this day should be a day of rest. Jewish Christians already had the sabbath for this purpose, but gentile Christians enjoyed no manda-

tory weekly day of rest and were thus forced to worship either early in the morning or late in the evening. Tertullian, perceiving the close relation between rest and worship, was one of the first to advise those who could do so to defer business on the Lord's Day so as to devote themselves more fully to its proper celebration (*De orat.* 23). In the 3rd cent. Cyprian of Carthage added to the arguments for the special nature of the Lord's Day the further consideration that it was the day of the covenant sign of circumcision, in which he found a prefiguring of the Resurrection (*Epistula* 64.4).

The next step came with the accession of Constantine and his recognition and favoring of the Christian Church. Hitherto the Roman empire had had no firmly established week, although Mithraism had observed the first day as the day of the sun and the seventh day had often been made a special day for feasting. In A.D. 321 Constantine, who also had some attachment to the sun-god, made the first day a regular public holiday, decreeing that all "judges, city-people, and craftsmen" should "rest on this venerable day of the sun," but allowing farmers to attend to agriculture when natural conditions made it advisable. This law naturally facilitated Christian worship, and Christians not only hailed the day as the day of the true Sun of righteousness but also claimed that its observance as a day of worship rested not on compliance with a state decision but on apostolic tradition (Eusebius *HE* v.23). Theodosius reissued the law of Constantine in A.D. 368, and testimony at this period shows increasing recognition of the Lord's Day as a day of rest as well as worship. Thus the *Apostolic Constitutions,* although focusing chiefly on worship, forbade fasting and work on both the sabbath and the Lord's Day (7.23; 8.33). Both Ambrose (*In Ps. 47*) and Chrysostom (*Hom. 10 in Gen.*) made the critical point that the fourth commandment, not an imperial enactment, forms the reason why Christians should refrain from work on the Lord's Day. The Council of Laodicea (A.D. 363) made a significant decision, illustrative of the hardening attitude toward Jewish Christians, when it condemned resting on the sabbath as Judaizing but commended resting on the Lord's Day as an obvious replacement or fulfillment.

From the end of the 4th cent. onward a trend very naturally developed toward the fuller equation of the Lord's Day with the OT sabbath, which it was now in fact to a large extent supplanting in Christian circles. The Council of Carthage in A.D. 451 forbade attendance at the games on the Lord's Day. In the 6th cent. the Council of Orleans included a rule prohibiting manual labor on the Lord's Day (canon 28). Alcuin, toward the end of the 8th cent., specifically transferred the sabbath command to the Lord's Day. Peter Alphonsus in the 12th cent. capped the whole development by describing the Lord's Day as the Christian sabbath. Voices like that of Thomas Aquinas might still be heard opposing the implied threat of legalism, and the Reformation would reopen the question of the Lord's Day and its true significance and observance in a new and challenging way; but the course was now firmly set toward the more detailed sabbath legislation of the medieval period and the Puritan sabbatarianism that succeeded it.

  B. Tradition History
IV. Jewish Parallels
V. Use in the Early Church
VI. Theology

I. Context.–The two versions of the Lord's Prayer occur in very different contexts, where they serve distinctive purposes. It is important to study both the common core that they share and their individual contexts.

A. Matthew. In Matthew the prayer occurs in the SERMON ON THE MOUNT. The immediate context deals with the kind of religious activity that is pleasing to God. It is thus presented in antithesis to ostentatious and empty prayer. In this section Jesus provides three examples of popular piety: almsgiving, prayer, and fasting (Mt. 6:1-18). These activities easily lent themselves to public display, especially if they were carried on at the temple, and even more so during a time of public feasting or repentance, when there would have been large crowds and under certain circumstances a trumpet would have been sounded (Mt. 6:2; cf. Finkel in Finkel and Frizzell, pp. 132-34). The first element in the context of the Matthaean Lord's Prayer is therefore a statement concerning the *purpose* of prayer. Its purpose is not to attract attention to oneself (vv. 1, 5). Prayer that is truly directed to God alone can be done perfectly well in one's own room (v. 6).

Jesus then provides the second element, a statement about the *nature* of prayer: communication with an understanding heavenly Father (vv. 7f.). Therefore one should not babble on in an attempt to gain a hearing. Jesus' reference here to Gentiles is part of a pattern in the Sermon on the Mount in which He contrasts pagan attitudes to people (5:47), to God (6:7), and to things (6:32) with the qualitatively different attitudes of believers.

B. Luke. In Luke, on the other hand, the prayer is introduced as a response to the disciples' request that Jesus provide instruction in prayer, as John the Baptist (along with other ancient teachers) did (11:1). It is followed by an encouragement to pray with assurance (vv. 5-13; cf. 18:1-8). The prayer's larger context is the entire Gospel, which features prayer as a characteristic of Jesus (e.g., 3:21; 6:12; 9:18). Significantly, Luke sometimes mentions Jesus at prayer even where Matthew, in the parallel passages, does not. The crisp style of this prayer is appropriate to Luke's practical emphasis and to his gentile readership. (See further III.B below.)

It is not clear how much significance should be attached to the differing commands: "Pray then like this . . ." (Mt. 6:9), and "When you pray, say . . ." (Lk. 11:2). Matthew's concern with the manner of prayer, both its purpose and nature, makes instruction to pray "like this" especially appropriate. The implication of the differing commands is that the Lord's Prayer can be used both as a general guide without verbatim repetition (Matthew), and also as a model to be repeated exactly (Luke).

II. Content.–Like the Ten Commandments, the petitions of the Lord's Prayer can be divided into two parts. The first contains "you" or "thou" petitions, which pertain to God's honor and kingdom. The second contains "we" petitions, which relate to the needs of the petitioners.

A. Address. In Matthew's Gospel Jesus instructs the

LORD'S PRAYER

disciples to address God as *"Our Father who art in heaven"* (Luke: "Father"). The familiar term "Father" recalls the preceding teaching in Matthew (v. 8, "your Father knows what you need") and anticipates the following encouragement in Luke (v. 13, "how much more will the heavenly Father give"). The use of "Father" in direct address to God marked an advance on common usage. Although the concept of God as a father was not absent from Hebrew thought (e.g., Dt. 32:6; Ps. 103:13; Isa. 63:16; Hos. 11:1; Mal. 2:10; T.B. *Taanith* 23b), it is difficult to establish that Jewish people before Christ approached God personally in this manner (see Jeremias, *Prayers of Jesus*, pp. 11-65, 95-98, although his position has been challenged, e.g., by Zeller, "God as Father in the Proclamation and in the Prayer of Jesus," in Finkel and Frizzell, pp. 117-125). Jesus used the term in a unique way, conscious of the special relationship of sonship that He alone bore to God, but He also taught that God was father to the believer (cf. Rom. 8:14-17; Gal. 4:6f.).

The simple form in the Lukan version ("Father") corresponds to the intimate *Abbá*, which was apparently used primarily (but not exclusively) by little children (*see* ABBA). Matthew's words "in heaven" stand in striking contrast to the familiarity of "Father"; the entire phrase thus reminds us at once both of God's immanence and of His transcendence. Apart from this prayer, Luke seldom refers to God as a heavenly Father (cf. Lk. 10:21; 11:13). The idea is frequent, however, in the Sermon on the Mount (e.g., Mt. 5:16, 45, 48) and elsewhere in Matthew's Gospel (e.g., 10:32; 12:50; 15:13; 16:17).

B. "Thou" Petitions. The first petition, *"Hallowed be thy name,"* is identical in both versions. In biblical times the NAME was much more closely identified with the person than it is in our culture. To glorify the name of God was to acknowledge what God was in actuality; thus to "hallow" God's name was to acknowledge that He is indeed holy. (In other contexts, *hagiázō* can mean to "make holy," but that meaning is obviously excluded here. A similar use occurs in 1 Pet. 3:15: "reverence Christ as Lord.")

The name of God was revealed in Ex. 3:13-15 (cf. Gen. 4:26) and was proclaimed by God along with a further description of His character in Ex. 34:5-7 (*see* GOD, NAMES OF I, II.C). In the OT God's people frequently expressed concern for God's name or reputation, which was maintained by His mighty saving acts (cf. Dnl. 9:19, "O Lord, give heed . . . because thy city and thy people are called by thy name"). God Himself declared, "I will vindicate the holiness of my great name" (Ezk. 36:23). The psalmist sought deliverance and forgiveness for the glory of God's name (e.g., Ps. 79:9f.). The redeemed people of God are to keep His name holy (Lev. 22:32; Isa. 29:23). It may be assumed that the hallowing of God's name is therefore the ultimate object of each of the petitions that follow.

The second petition, *"Thy kingdom come,"* has a very close association with the preceding petition. Ps. 145 combines these elements: it addresses God as "my God and King" (v. 1) and celebrates the glory of God's kingdom (vv. 11-13); it also praises God's name (vv. 1-3) and concludes with "let all flesh bless his holy name for ever and ever" (v. 21). Inherent in the idea of the kingdom is the dynamic expression of God's sovereignty, which must some day find expression throughout the whole earth. God is praised as "a great king over all the earth" to whom belong the "shields of the earth" (Ps. 47:2, 7-9 [MT 3, 8-10]). Similarly, the Jewish Kaddish prayer contains the petition, "May he let his kingdom rule in your lifetime and in your days and in the lifetime of the whole house of Israel, speedily and soon."

God's kingdom has already been introduced with the coming of Christ (cf. Mt. 12:28; Lk. 11:20), and believers have already been brought into it from the dominion of darkness (Col. 1:13). But its consummation still lies in the future. The verb in this petition (Gk. *elthétō*) is in the aorist tense, which usually signifies a simple action in contrast to a continuing one. This implies, although it does not in itself establish, that the coming of the kingdom is a particular event rather than a gradual accomplishment. That *hagiasthḗtō* in the first petition is also aorist may suggest that while God's name ought always to be hallowed, this petition will not find its ultimate fulfillment until the coming of God's kingdom.

The third petition in the Matthaean version is *"Thy will be done, on earth as it is in heaven."* The earliest MSS of the Lukan version (including p^{75} and B) do not contain this petition. The aorist tense (*genēthḗtō*) once again suggests that the petition's ultimate fulfillment will coincide with the coming of God's kingdom. The "will of God" here represents not some individualized set of predetermined steps to be followed, but the revealed commands of God to be lived out in a whole range of righteous deeds as modeled by Christ, who came to do the will of God (He. 10:5-7).

C. "We" Petitions. The Matthaean version has as the fourth petition, *"Give us this day our daily bread."* Luke's version differs significantly at this point. Matthew has "give" in the aorist tense (*dós*, simple action), but Luke has it in the present (*dídou*, suggesting repeated or continuous action). Matthew has *sḗmeron* ("today"), but Luke has *tó kath' hēméran* ("each day"). These differences have led to the inference that whereas Matthew apparently refers to a specific time or act of giving — possibly, but not necessarily, at the consummation of the kingdom — Luke seems to refer to the supply of needs day by day.

Interpretation is complicated by the uncertain meaning of *epioúsion*, which modifies "bread." It is usually translated "daily," but it occurs only here in the NT, and the only external evidence is unclear (cf. Manson, p. 111; Metzger, pp. 52-54; Orchard, pp. 274-282; Yamauchi, p. 145). The usual approach is to understand it as a participle based on a compound verb using *epí* as a prefix with *eínai* ("to be, exist, be present") or *iénai* ("to go, come"). The latter derivation, which would give the translation "for the coming day," has received the widest acceptance (see *TDNT*, II, 591f.; Jeremias, *Prayers*, p. 100). This interpretation is supported by Jerome's statement that the lost Gospel of the Nazarenes had Aram. *maḥar*, "tomorrow" (Jerome *Comm. ad Matt.*), and by the use of *hḗ epioúsa* to denote "the following day" in Acts 7:26; 16:11; 20:15; 21:18 (cf. 23:11). Thus the petition could refer to the bread of the coming day (esp. if one prayed at sundown as the next day was beginning). Others, including some of the church fathers, have interpreted it eschatologically as entreating God for the "bread" (a symbol of all physical and spiritual gifts) of the future consummation, the great "Tomorrow." If, on the other hand, *epioúsion* is derived from *eimí*, then a present idea is involved. It might have a literal meaning, i.e., "for this day." It could also have a more general sense, however, such as "sufficient" or "necessary" (cf. Yamauchi, pp. 147-156). The last might be the best choice, on the basis not only of derivation but also of the context, for it would eliminate the redundancy of a double reference to time.

In any case, the basic thought is an expression of trust in God. In a culture in which workers were hired only one day at a time (Mt. 20:1-5) and bread could not be preserved as it can today, one was especially aware of the need to trust God for one's bread day by day. As a basic food, "bread" by extension represents all necessary food (cf. 2 Thess. 3:8) and the totality of one's daily needs. The

eucharistic interpretation of some of the early church fathers — i.e., that the petition is a request for a "supersubstantial" bread such as Christ's coming as the "bread of life" — is not easily derived from the text itself (but cf. Brown, pp. 301-308; Jeremias, *Prayers*, pp. 100-102).

In Matthew the fifth petition reads, *"And forgive us our debts, as we also have forgiven our debtors."* Luke has "and forgive us our sins, for we ourselves forgive every one who is indebted to us." The two versions have the same meaning, for in Judaism sins were thought of as debts to God. The second clause has the present tense ("as we forgive") in Luke; Matthew has the aorist, best rendered as "have forgiven." Jesus' emphasis on the necessity of forgiving others cannot be interpreted to mean that forgiveness is earned by forgiving others, for two reasons. First, the prayer is addressed to "our Father," indicating that those who thus pray have already been reconciled to God and their guilt has already been forgiven on the basis of the cross. Daily fellowship with God is in view (cf. 1 Jn. 1:9). Second, throughout Scripture a proper approach to God is conditioned on personal qualities or attitudes, including right relationships with God and with others (*see* PRAYER VI.C). Although one does not earn the right to pray or to be forgiven, one can obstruct prayer and forgiveness by having the wrong attitude. Significantly, Jesus singles out for immediate comment this one aspect of the Lord's Prayer (Mt. 6:14f.). He emphasizes the point further in the parable of the two debtors (18:21-35), in which He shows that those who have been forgiven an immense debt to God should forgive others, whose debts to them are minuscule by comparison (cf. Lk. 17:3f.).

The sixth petition, *"And lead us not into temptation,"* has also been understood in various ways. Most interpreters agree that there is no implication that God would draw into sin someone who did not pray (see Jas. 1:13-15). The prayer is rather a request that God *prevent* those praying from falling into such temptation. It also seems clear that "temptation" (*peirasmós*) here does not have the sense of enticement to sin. Although *peirázō* does have that sense in Jas. 1:13f. and it might be inferred from Mt. 4:1, neither *peirasmós* nor *peirázō* is used in this sense in the pre-Christian literature (see Moule, pp. 69f.); rather, these terms have a neutral meaning of "test" and "testing." Testing, in the sense of external pressure, can nevertheless issue in personal failure and sin. Some scholars have read this petition as referring to the final great testing, the eschatological time of tribulation when the final battle is fought between God and Satan (see, e.g., Brown, pp. 315-17; Jeremias, *Prayers*, pp. 105f.). One would expect, however, to find a definite article with *peirasmós* if a specific time were indicated (cf. Rev. 3:10). The petition probably relates, then, to a testing that might result in defection and sin (cf. Luke's special emphasis on testing and perseverance; see S. Brown, *Apostasy and Perseverance in the Theology of Luke* [1969]).

The next question is the specific objective of the petition. It seems unlikely that Jesus would have instructed His followers to request complete freedom from testing, because elsewhere He taught that testing is an inevitable part of life in this world (cf. Lk. 22:31; Jn. 16:33; 17:15). Carmignac (pp. 268-282) suggested that the idea is not merely of entering temptation, but of going "inside" it in the sense of falling and succumbing to it. Moule (pp. 73-75) proposed, probably correctly, that the petition refers to being kept not *from* but *during* a time of testing (cf. 1 Cor. 10:13; 2 Pet. 2:9; Rev. 3:10).

"But deliver us from evil" occurs only in the Matthaean version. It is probably best understood as referring to the "evil one," since the preposition used is *apó* rather than *ek*, and since the definite article is used with *ponērós*, "evil" (cf. Mt. 13:19). This interpretation is also consistent with the concept, not only in the NT but also in the Qumrân literature (see R. E. Brown, p. 317), of a continuing holy war between God's people and the evil spiritual forces under the leadership of Satan.

D. Doxology. The doxology, *"For thine is the kingdom and the power and the glory for ever"* (cf. AV, RSV mg.), is lacking entirely in Luke and also in the earliest MSS of Matthew (see III.A below). It is generally thought to have been added later for liturgical reasons; the content is possibly based on 1 Ch. 29:10-13 (see B. M. Metzger, *Textual Comm. on the Greek NT* [1971], pp. 16f.). Although the doxology is probably not a part of the original text, it was Jewish practice to conclude prayers with a doxology, and it is highly unlikely that the prayer was ever offered in NT times without some form of doxology (see, e.g., D. Hill, *Gospel of Matthew* [*NCBC*, repr. 1981], p. 139; Jeremias, *Prayers*, pp. 106f.).

III. Critical Issues.–A. Text. The major textual issue is the doxological conclusion to the prayer in Matthew, which most scholars hold to be a later liturgical addition. It is missing in such MSS as ℵ, B, D, and also in early patristic commentaries; it is found in such MSS as K, L, W, and other Byzantine witnesses, as well as the Didache. (For the longer reading, see J. van Bruggen, pp. 78-87; for a defense of the shorter reading, cf. Bandstra, pp. 15-30.) Most modern translations omit the liturgical ending.

B. Tradition History. Scholarly opinion on the tradition history of the prayer is more diverse. At least five different views have been presented: (1) Jesus gave the prayer on two separate occasions as described in Matthew and Luke; in neither prayer has the form been modified by liturgical or other influence, either Christian or Jewish; (2) Jesus gave the prayer on two separate occasions as described in Matthew and Luke, but the actual wording may have been modified somewhat in transmission or editing (on the assumption that the Gospels contain the *ipsissima vox* of Jesus even if not the *ipsissima verba*); (3) Matthew provides the original form; Luke modified it; (4) Luke provides the original form; Matthew modified it; (5) the prayer originated elsewhere (e.g., possibly in Mark's account of the Gethsemane prayer, Mk. 14:32-42), and through form-critical and redactional analysis we can trace its development into its Matthaean and Lukan forms.

Theories (3), (4), and (5) are built on the common assumption that the development of the Gospel traditions is related to the situation of the Christian communities addressed by the individual Gospel writers (cf. J. Jeremias, *NT Theology*, I [Eng. tr. 1971], 195). The fifth position, represented by M. D. Goulder (*JTS*, 14 [1963], 32-45; *Midrash and Lection in Matthew* [1974], pp. 296-301) and S. van Tilborg, is unnecessarily speculative. With regard to positions (3) and (4), the brevity of Luke's version seems to support its priority, assuming that Christians would be unlikely to reduce a prayer taught by their Lord. Individual words and phrases in Luke (e.g., "Father") might be closer to what Jesus actually taught His disciples. Yet many scholars support Jeremias's view that, although Luke is more original with regard to length, Matthew is more original with regard to wording (Jeremias, *Prayers*, p. 93). While there seems to have been a tendency to introduce liturgical expansion, consideration of the actual words in Matthew and their probable underlying Aramaic structure speak for the integrity of the Matthaean form (pp. 89-94; see also R. E. Brown, p. 279).

Such observations can also be used to support position (2). Nothing in the texts themselves rules out the possibility of two distinct settings and prayers, except the

assumed improbability that Jesus would have repeated the prayer to the same group of disciples as though they had never heard the first presentation. Other reasons for reconstructing a tradition history flow from assumptions about the composition of the Gospels rather than from within the respective texts. The belief in two distinct settings does not require, however, a denial of the probability that each prayer was adapted and edited for its own specific use in the Gospel context. If indeed the Gospels addressed the needs of different communities, there is no reason to exclude the Lord's Prayer from this function. In Matthew it can speak to those who are in danger of the meaningless repetition of formulas, and in Luke it can speak to gentile Christians, like Theophilus, who need initial instruction in prayer. This understanding in no way affects the integrity of the canonical text. View (2), therefore, has much to commend it.

IV. Jewish Parallels.–The phraseology of the Lord's Prayer has many parallels in Jewish literature. First, the prayer contains significant allusions to the OT (e.g., see II.B above; cf. J. Swetnam, pp. 556-563). Second, the prayer contains some theological concepts that were also held by Jewish teachers in the first several centuries of our era. Some of the terminology in the Talmud is close to the wording of Jesus' prayer. It is difficult, however, to determine the antiquity or origin of such traditions. Examples include: "Deliver us . . . from the evil impulse . . . and from the destructive Accuser" (T.B. *Berakoth* 16b; attributed to Rabbi Judah ha-Nasi, *ca.* 135-217); "do not bring me into sin, or into iniquity, or into temptation" (T.B. *Berakoth* 60b; origin uncertain); "One should never [intentionally] bring himself to the test" (T.B. *Sanhedrin* 107a; attributed through Rabbi Judah [d. 299] to Rab [d.247]); "Do Thy will in heaven above" (attributed to Rabbi Eliezer, late 1st cent. A.D.; see SB, I, 419). One earlier nonrabbinic example appears in Sir. 28:2: "Forgive your neighbor the wrong he has done, and then your sins will be pardoned when you pray"; but this concept does not seem to have been taught by the rabbis.

Third, several Jewish prayers contain terminology and petitions similar to those in the Lord's Prayer. The Kaddish reads, "Exalted and hallowed be his great name. . . . May he establish his kingdom in your lifetime. . . ." Among the Eighteen Benedictions, some of which were already in use in the 1st cent. A.D., the sixth reads, "Forgive us, Father. . . ," and "redeem us for the sake of Your Name." The Abinu Malkenu, used at New Year's services, begins, "Our Father, our King," an address attributed originally to Rabbi Akiba (late 1st to early 2nd cent.).

On these and other less clear or later parallels, see also I. Abrahams (pp. 94-108), A. Finkel ("Prayer of Jesus in Matthew," in Finkel and Frizzell, pp. 131-169), C. G. Montefiore (pp. 125-135), and the articles by J. J. Petuchowski, B. Graubard, S. Lauer, and J. Heinemann, in Petuchowski and Brocke (pp. 21-89).

V. Use in the Early Church.–The Lord's Prayer was apparently used extensively in the early Church. It appears in the Didache (of uncertain date, perhaps early 2nd cent.), where it is preceded by words from the Matthaean context and followed by the injunction to pray it three times daily (8:2f.). Its placement between sections on baptism and the Lord's Supper may imply its connection with one of these sacraments. Certainly it was assumed that the prayer was to be used by baptized believers only. Since it is unlikely that Christians met three times daily at that time, the prayer was apparently used privately as well as publicly. Although it is not quoted elsewhere in the earliest literature, it is mentioned by the church fathers. We may conclude that the prayer was well known and did not need to be taught in writing. In fact, since it was apparently considered so sacred that only members of the Church should repeat it, there may have been a reluctance to put it into writing, especially in the apologetic materials that were to be read by unbelievers. Both Origen and Tertullian refer to it as a model (Kistemaker, p. 327). A further connection with baptism occurs in the Apostolic Constitutions (vii.45.1), where those baptized recite it following the rite.

VI. Theology.–The Lord's Prayer is clearly intended to be used by believers who can call God their Father. This distinguishes it from the prayer that Jesus Himself prayed in Jn. 17 — a prayer that in essence and content reflects Jesus' unique relationship with God (cf. Jesus' distinction between "my Father and your Father" in Jn. 20:17). There is no indication in either Matthew or Luke that Jesus prayed the Lord's Prayer with His disciples. Nevertheless, these two prayers have common elements, e.g., the glorification of God (Jn. 17:1), the accomplishment of God's work on earth (v. 4), the name of God (v. 6), and being kept from evil or the evil one (v. 15). The theology of the prayer is also found throughout Paul's writings (Gal. 4:6; Phil. 2:9; 1 Cor. 15:28; Rom. 12:2; Eph. 4:32; 1 Cor. 10:13; see G. J. Brooke, *Downside Review*, 98 [1980], 306).

The Lord's Prayer expresses the repeated concern of the OT that God's name be known and glorified throughout the world. In this sense it is a missionary prayer. The order and proportion (a near balance) of "we" and "thou" petitions is also instructive. By putting the "thou" petitions first, Jesus taught that the purpose of prayer is not self-gratification. (On the petition for bread, cf. Jesus' teaching that follows in Mt. 6:25-34 par. Lk. 12:22-31.) If one's primary concern is the actualization of God's rule on earth, prayers for oneself will be made subservient to that great purpose. This recalls Jesus' promise that if we seek God's kingdom, all that we need will be ours as well (Mt. 6:33; Lk. 12:31).

It was observed above (II.C) that the petition concerning forgiveness is the only one to receive special comment at the close of the prayer. This demonstrates the strong emphasis that Jesus placed on the importance of personal relationships in connection with answers to prayer.

The closing petition regarding protection in a situation of testing and deliverance from the evil (one) reflects Jesus' teaching and miracles throughout the Gospels, in which He demonstrated the power of His kingdom against that of Satan. The final defeat of Satan will indeed mean the hallowing of God's name and the consummation of His kingdom on earth. (*See* KINGDOM OF GOD V.A.)

LORD'S SUPPER (EUCHARIST).

I. Fellowship Meals with Jesus and the Last Supper
II. Accounts of the Last Supper
III. Last Supper as Passover
IV. Basis of Interpretation
A. OT Background
B. NT Context
V. Development of Eucharistic Doctrine
VI. Development of the Liturgy
VII. Reformation of Doctrine and Liturgy
VIII. Some Essential Features in the Interpretation of the Supper

I. Fellowship Meals with Jesus and the Last Supper.–Throughout its history the Church has kept at the center of its life and worship not only the preaching of the Word of God but also the celebration of the Lord's Supper or eucharist. In this rite the Church follows the example and command given by Jesus Himself during His last supper with His disciples. It acts in His name and seeks His presence, believing that in the celebration Christ renews His fellowship with His people, strengthens their faith and hope, communicates to them the power of His death and resurrection, and thus enables them to present themselves afresh, within the membership of His body, as a living sacrifice devoted thus by Him more wholly to His service.

Immediately after Pentecost the Church "devoted themselves to the apostles' teaching and fellowship, to the breaking of bread and the prayers" (Acts 2:42). A glad realization of the presence of the risen Jesus in their midst seems to have marked "breaking of bread" at a common meal.

The custom of placing the eucharist at the heart of the worship and fellowship of the Church may have been inspired not only by the disciples' memory of the Last Supper with Jesus but also by the memory of their fellowship meals with Him during both His days on earth and the forty days of His risen appearances. They now realized that He had made eating and drinking with them a pledge that He, the Messiah, would renew, perfect, and make eternal such table fellowship in the fulness and glory of His kingdom, and with this belief they celebrated their eucharistic meals, awaiting His final return. Despite the memories of all their meals with Jesus before and after His resurrection, they recognized that His words and actions at the Last Supper had a deep significance of their own.

II. Accounts of the Last Supper.–The NT contains four accounts of what Jesus did and said at the Last Supper: Mt. 26:26-30; Mk. 14:22-25; Lk. 22:14-20; 1 Cor. 11:23-26. The common features of Luke's and Paul's accounts suggest a tradition distinct from that of Mark and Matthew. Both Luke and Paul introduce the words "This do in remembrance of me" as spoken by Jesus. Luke places this utterance at the end of the bread-saying, Paul in connection with the giving of both bread and wine. Matthew and Mark denote the cup as "my blood of the covenant which is poured out for many," whereas Luke and Paul use "the new covenant in my blood" and omit "for many." Paul alone has "for you" after the bread-saying; only Luke has "for you" after the cup-saying. Both Paul and Luke consistently use Gk. *eucharistēsas* for "having given thanks," but Matthew and Mark change this term to *eulogēsas* when referring to thanksgiving for the bread.

Some important MSS omit Lk. 22:19b-20 and alter the order of other verses, but there are good grounds for accepting the longer and more complicated account as arising from genuine traditions that were worth preserving. Luke's longer account, if accepted, may be regarded as including an extra cup not mentioned by the other traditions, or as collating two accounts, each valuable for helping the Church understand the meaning of the Supper.

The accounts all agree that the Supper took place on the night when Jesus was betrayed, that He took bread, and, when He had given thanks, He broke it and said, "This is my body." They agree that He also gave some significance to the cup. Matthew, Mark, and Luke preserve a pledge of Jesus to abstain from drinking the fruit of the vine until the kingdom comes (Mt. 26:29; Mk. 14:25; Lk. 22:16). In Matthew and Mark Jesus makes this pledge after the action with the bread and wine; in Luke it introduces the whole action. Paul's account omits this saying but contains the rubric "as often as you eat this bread and drink the cup, you proclaim the Lord's death until he comes."

Scholars disagree about which account represents the earliest tradition. Some think that Paul's statement, "I received from the Lord what I also delivered to you," is a claim that he had a special communication from the risen Lord. Others think that these words imply only that Paul was receiving and handing on a reliable church tradition. Some think that the parallelism of Mark's phraseology ("this is my body" — "this is my blood") indicates a tendency to assimilate one saying to another through usage in the Church and therefore must be later than the Pauline phraseology at these points. Others argue that Paul's repetition of "this do in remembrance of me" was molded by liturgical usage and thus indicates a late date. Some think that Luke's account shows contact with a very primitive source. The variations between Paul and Mark seem to point to access to distinct traditions. Luke certainly knew Paul's account but also had his own particular source. Matthew largely depended on Mark.

It is worthwhile to attempt to establish the most primitive facts and to show how variations could have arisen within the keen intensity of the life of the early Christian community. Even if some of these variations may seem mutually exclusive when regarded as historical accounts of the original meal, readers can thankfully accept each account as helping them to interpret and more fully understand the rite.

III. Last Supper as Passover.–From the precise dating of events in the Fourth Gospel, the question arises whether the supper recorded in the Synoptic Gospels can properly be regarded as a Passover feast. Jn. 18:28; 19:14, 31 indicate that Jesus died on the afternoon before the Passover lambs were slain in the temple. This sequence has given rise to the theory that the "Last Supper" was a kiddush, a simple meal of preparation either for a sabbath or for a festival at which, after religious discussion, a cup of wine mixed with water was blessed and drunk and a benediction pronounced over bread. This theory makes it easy to explain certain otherwise awkward details: why no account of the Last Supper mentions a paschal lamb, why ordinary bread was used instead of unleavened bread, and why only one cup apparently was used. The theory also accounts for how Jesus could be arrested after the Passover feast had begun, how a linen cloth could then be purchased for His burial, and how Simon of Cyrene could be found coming from work in the fields on what was apparently a holiday.

The chronology of Mark, however (cf. 14:1, 12, 16f.), apparently confirmed by Mt. 26:17; Lk. 22:15, indicates that the Last Supper took place at the regular time of the feast in the city and therefore took the form of a Passover.

Other details in the Synoptics characterize the Supper as a Passover: it was a lengthy and well-prepared meal; it took place at night; the disciples reclined at the table (Mk. 14:18) and drank wine; the whole meal closed with an act of praise (v. 26). This identification with the Passover allows for deeper and richer possibilities of interpretation.

In an effort to harmonize John's account with the Synoptics, scholars have suggested that the Sadducees and the Pharisees disputed that year over the timing of the feast and as a result fixed two different dates. A calendar found in the Qumrân community places the Passover on Tuesday evening, several days before the official Passover. Possibly Jesus Himself deliberately celebrated Passover early with His disciples.

Although certain obscurities must remain owing to the variation in the accounts, Jesus apparently interrupted the usual Passover feast at certain points with decisive words and actions. He seems to have broken and shared the bread immediately before the consumption of the lamb; His action either corresponded to the usual breaking of the cakes of unleavened bread or to the explanation by the head of the family of the deep significance of the meal in response to the traditional questions by the youngest member present about the meaning of the rite.

Jesus' offering the cup, apparently after the lamb was eaten, was connected with the blessing on the third of the four cups (1 Cor. 11:25; Lk. 22:20). His vow of abstinence and words expressing expectation and hope of the fulfillment of what was symbolized may have preceded (as in Mk. 14:24f.) the group's partaking of the fourth cup.

IV. Basis of Interpretation.–A. OT Background. Jesus' words and actions at the Last Supper should be considered in the light of related OT texts and ritual. The disciples would have understood the Supper in this rich and vivid context, especially after the meaning of the death and resurrection of Jesus began to dawn upon them.

It has been noted that, whether or not the Last Supper was a regular Passover meal, "the atmosphere of the Passover pervaded the whole thought and feeling of the upper room." The disciples, dwelling on the significance for the Jewish people of the Exodus from Egypt, would have interpreted Jesus' words "This do in remembrance of me" in this context; they would have remembered how He had spoken of the significance of the "exodus" He would accomplish through His death (Lk. 9:30).

The Exodus from Egypt is for the Jews an event of unique significance. It was regarded as God's once-for-all deliverance involving not only the generation that actually experienced it historically but all the succeeding generations. The celebration of the Exodus in the annual Passover feast (cf. Ex. 12) is intended not simply to evoke pious and thankful memories of the past but to bring each generation under the living power of this unique eschatological event (vv. 26f.; 13:8). Thus, in displacing the ritual of the remembrance of the Exodus by a new ritual centered on His death and resurrection, Jesus indicated that these events would uniquely affect the destiny of all generations of mankind. He deliberately instituted for His Church a means by which the power and reality of His death and resurrection could be brought to bear upon the life of each generation within the Church.

The killing of the lamb at the Passover feast, the sprinkling of its blood on the lintels and doorposts, and the partaking of its flesh (Ex. 12:7f.) signify a sacrifice that brings protection from judgment and evil powers and the favor of God. Jesus' substituting, for the lamb sacrificed in the temple and lying before them to be eaten, His own broken body and shed blood as the disciples' protection and food is thus deeply significant. This substitution signifies and pledges that His self-offering in death will be the sacrifice on which they could rely, and His blood will be their protection from the powers that hold mankind in bondage.

Jesus spoke of Himself not only as the paschal lamb, but also as a sacrifice in accordance with other OT analogies. In the sacrificial ritual, the portion of peace offering not consumed by fire, and thus not offered to God as His food (see Lev. 3:1-11; Nu. 28:2), was eaten by priest and people (Lev. 19:5f.; 1 S. 9:13) in an act of association with the altar and the sacrifice (Ex. 24:1-11; Dt. 27:7; cf. 1 Cor. 10). Jesus' giving the elements to His disciples was not only a further sign of their own fellowship and participation in His sacrificial death but also an assurance that by partaking of Him they would have fellowship with God in the reconciliation He would accomplish.

Although the traditional Jewish Passover feast may have already taken on features belonging to a meal ratifying a covenant, Jesus' words and actions were deliberately calculated to give this Passover meal a covenantal character. In the OT, after making a covenant, often by sprinkling sacrificial blood as at Sinai (cf. Ex. 24:1-8), the participants had fellowship and mutually pledged loyalty in a meal (Gen. 26:30; 31:54; 2 S. 3:20). The covenant made between God and Israel at Sinai was likewise followed by a meal in which the people "ate and drank and saw God" (Ex. 24:11). Jesus thus ratified in the Supper the new covenant (Jer. 31:1-34) between the Lord and His people.

In celebrating the Supper Jesus emphasized the messianic and eschatological significance of the Passover meal. At the Passover the Jews looked forward to a future deliverance that the Exodus foreshadowed. They set aside a cup for the Messiah in case he came that very night to deliver them and fulfil the promise of the messianic banquet (cf. Isa. 25–26; 65:13; etc.). It may have been this cup that Jesus took in the institution of the new rite, indicating that even now the Messiah was present to feast with His people.

After the Resurrection the disciples would see their frequent celebrations of the Supper (Acts 2:42-46; 20:7) as the climax of Jesus' table fellowship with publicans and sinners (Mt. 11:18f.; Lk. 15:2) and of their own daily meals with Him. They would interpret it not only as a bare prophecy but as a real foretaste of the messianic banquet and a sign of the presence of the kingdom of God in their midst in the person of Jesus (Mt. 8:11; cf. Mk. 10:35f.; Lk. 14:15-24). They would see its meaning in relation to His living presence in the Church, brought out fully in the Easter meals they had shared with Him (Lk. 24:13-35; Jn. 21:1-14; Acts 10:41). It would be a supper in the presence of the risen Lord, their Host. They would see in the messianic miracle of His feeding the multitude and in His words about Himself as the bread of life a sign of His continual hidden self-giving in the Lord's Supper.

B. NT Context. In 1 Cor. 10 Paul refers to Israel's being saved, revived, and nourished by miracles corresponding to the NT sacraments of baptism and the Lord's Supper. Paul asserts that Christ's presence in OT Israel was so real, and the spiritual blessing He bestowed on His people was so closely bound up with the miraculous physical help He gave them, that He could actually be identified with one of the objects He used in mediating His blessing to them — "that Rock was Christ" (v. 4).

Despite Christ's sacramental presence that generation of Israel was unfaithful, and many of them perished with a judgment that was all the more severe because they had despised His real presence so greatly. Paul uses the tragic example of this judgment to enforce his appeal to the Corinthians to shun idol worship, participation in pagan

sacrificial meals, and conformity to heathen practices: "The cup of blessing which we bless, is it not a participation in the body of Christ? Because there is one loaf, we who are many are one body, for we all partake of the one bread. . . . You cannot partake of the table of the Lord and the table of demons" (1 Cor. 10:16f., 21b). In Paul's thinking the real presence of Christ, actively forming His people into one body with Himself, clearly dominates the Church's celebration of the Lord's Supper. Moreover, partaking of the Lord's Supper brings Christians into a living relationship with the power of the sacrificial death and resurrection of Christ. Paul's allusion that those who partook of the sacrifices made in heathen temples to devils entered into real and powerful communion with the devils themselves (vv. 18-21) reinforces this conclusion.

With a similar thought Paul later speaks of people's damning themselves by eating and drinking "unworthily" at the Lord's Supper through "not discerning" the Lord's body (1 Cor. 11:29). This "damnation" is not the deity's quasi-physical automatic reaction to unworthy people's eating and drinking the elements. It is rather a personal judgment incurred in a sphere where the presence of Christ is real and powerful. A casual approach to the gracious personal encounter mediated through the sacrament between Christ and His people can only spurn and profane the grace of Christ and inevitably merit judgment and rejection by Christ Himself.

Because of the NT context of the Lord's Supper, the words "this do in remembrance of me" (Gk. *eis tēn emēn anámnēsin*, 1 Cor. 11:24f.) call for careful discussion. The word "remembrance" (*anámnēsis*) echoes Ex. 12:14, which institutes the Passover as a "memorial day." The paschal feast is designed not simply to restore fading mental impressions of the past event but also to reestablish the former relationship to divine grace. The Passover "remembrance" is intended to reactualize what is remembered. In the same way, to celebrate the Lord's Supper in "remembrance" of Christ means to seek fresh communion with Him so that, as Paul says in Phil. 3:10f., "I may know him, and the power of his resurrection, and may share his sufferings, becoming like him in his death, that if possible I may attain the resurrection from the dead." In this process, however, remembering the historical events of the death and resurrection of Jesus also plays an important part.

Anámnēsis can also mean a memorial before God (e.g., Acts 10:4; Mk. 14:9). Thus some believe that in the Last Supper the Church recalls the sacrifice of Christ to make it again become effective. The *anámnēsis*, however, is better related to the intercession that the Church must inevitably make in its thankful response to God's grace in the sacrament. It is impossible that the Church should not pray at the Lord's table for the salvation of mankind; this intercession and Christ's own heavenly intercession (*see* INTERCESSION OF CHRIST) might be thought of as an *anámnēsis* before God.

One should similarly interpret 1 Cor. 11:26: "For as often as you eat this bread and drink the cup, you proclaim the Lord's death until he comes." Proclamation here means more than a dramatic representation of the death of Christ. Like the kerygma, it involves re-presenting in both word and action the redemptive event itself, so that participants in the eucharistic ritual relate themselves in a powerful and living way to the unique sacrifice of Christ on the cross. But all the celebrations of the Supper involve only the one sacrifice. "It is clear . . . that the bringing of the Eucharist under the rubric of proclamation excludes the idea of its being a sacrifice in itself or in its own right. Not the actual and literal offering of the sacrifice, but an action proclaiming a sacrifice once offered and eternally valid before the Father, is what the Eucharist effects" (T. F. Torrance, *Conflict and Agreement in the Church* (1959), II, 179f.).

In His discourse about the bread of life in Jn. 6, Jesus uses analogies about the spiritual hunger of people for God and its satisfaction in the Word and Wisdom of God. "The Word became flesh" (Jn. 1:14) and was offered upon the cross so that people might obtain everlasting life and be raised up at the last day (6:50-54). Through this sacrifice the eternal life of the Word is made available to all believers as their spiritual food and drink (v. 47), which alone unites them to the incarnate Word (v. 56) and enables them to have spiritual life (v. 53).

At the heart of this discourse, just as in Jn. 15, is Jesus' insistence that a real and living communion, which is the source of His people's salvation and Christian life, must exist between Him and them in every age. The institution of the Supper later gave a visible clue that enables Christians to grasp the fuller meaning of Jesus' "hard saying" (Jn. 6:60) about eating His flesh and drinking His blood. But Jn. 6 seems equally to give a clue to the interpretation of the Lord's Supper: the Supper is a means by which the Church has communion with the incarnate life that became the life of mankind. Even though Jesus has ascended to heaven, His presence in the Lord's Supper is "just as real as His physical presence was to the Apostles" (Higgins, p. 77). The Supper, however, must not be interpreted as if the mere eating and drinking of the elements had some inherently magical effect, for "it is the spirit that gives life, the flesh is of no avail" (v. 63).

V. Development of Eucharistic Doctrine.–The Lord's Supper was the central point in the life and worship of the early Church. Ignatius (*ca.* 35-107), Justin Martyr (*ca.* 100-165), and Irenaeus (*ca.* 130-200) referred to it in phrases deriving from a realistic interpretation of the language of Jn. 6. Ignatius, and later Irenaeus, thought of it as "the medicine of immortality, and the antidote that we should not die but that we should live in Jesus Christ forever" (Eph. 20:2). Justin said: "The food which is blessed by the prayer of His Word, and by which our blood and flesh by transmutation are nourished, is the flesh and blood of that Jesus which was made flesh" (*Apol.* i.66).

But such language is not to be understood in any crudely materialistic sense. The food is spiritual. Christians had not yet devised any theory relating the elements to the body and blood of Christ.

Similarly, late in the 1st cent. the eucharist was regarded as the Gentiles' "pure offering" referred to in Mal. 1:11. This sacrifice, however, consists especially of prayers, thanksgivings, and the offerings of gifts for the needy. The Supper was emphasized as a bond of brotherly union, and the Church as a whole was thought to make its spiritual offering to the Lord.

Christians from the 3rd cent. onward paid greater attention to the words of institution. Tertullian (*ca.* 60-220), Hippolytus (*ca.* 170-236), and Cyprian (d. 258) tended to identify the bread and wine with the body and blood of Christ and to attach the real presence of Christ to the elements. But they often clearly distinguished things spoken of at other times as identical. Tertullian called the bread the "figure" of the body. Origen (*ca.* 185-254) figuratively and allegorically referred to the Supper. Cyprian developed the idea of the eucharist as a sacrifice. Since Christ in His suffering and sacrifice is identified with His people and offers them in Himself, in a reciprocal and parallel way the Church now identified itself with Christ who is its head and thus offered a spiritual and bloodless sacrifice in the union with Christ created through the sacrament.

LORD'S SUPPER

In the 4th and 5th cents. two tendencies are noticeable. (1) Cyril of Jerusalem (*ca.* 315-386), Gregory of Nyssa (*ca.* 330-395), Chrysostom (*ca.* 347-407), and the most influential exponent, Ambrose (*ca.* 339-397), tended to identify the bread and wine with the body and blood of Christ by alluding to a transformation of the elements themselves. Thus they used an analogy from the biblical miracle of the change of water into wine. By the Word and the Holy Spirit the bread becomes what it was not previously. These writers used realist language in an unqualified way. (2) In the same period others maintained the tradition that the elements signified things that they could not contain, but also affirmed that the elements were signs of realities actually present. Augustine (354-430), the predominant figure in this school, emphasized the distinction between the sign and the thing signified, the visible and invisible realities, of which the latter were apprehended by faith alone. He so emphasized the spiritual sense of the words bearing on the sacrament that he could say: "Believe and thou hast eaten." He also stressed the resemblance between the sign and the invisible reality, the power and place of the Word in the making of a sacrament, and the corporate nature of the mystical body in which the faithful live by word and sacrament.

Developing along with this eucharistic theology was the doctrine that the Christian shares in the divine nature through union with the incarnate Son of God. This doctrine led to the view that the incarnational union of Christ with human flesh continues in every generation of the Church through the celebration of the eucharist. The incorporation of the Christian into Christ through the sacraments was deepened (e.g., in Augustine) by the idea of the eucharist as a sacrifice. Since the Church is the body of Christ united to the Head through mystical and real union, the Church has its part in the once-for-all self-offering of the Head.

Popular superstitions and the Gallican and Roman liturgies influenced ninth-century developments of sacramental doctrine. Paschasius Radbertus (*ca.* 785-860), following Ambrose's lead, identified the eucharistic bread with the historical body of the Lord and affirmed that the real presence takes place through a change in the elements. In opposition, Ratramnus (d. 868), developing the thought of Augustine, affirmed that the bread symbolizes the mystical body of Christ, which is composed of head and members. In the 11th cent. Berengar of Tours again revived a dynamic-symbolic teaching that emphasized the spiritual aspect of the eucharist; church councils condemned his teaching. In 1215 the Fourth Lateran Council asserted that the body and blood of Christ "are truly contained in the sacrament of the altar under the forms (*sub speciebus*) of bread and wine, the bread being transubstantiated into the body and the wine into the blood by divine power, so that for the accomplishment of the mystery of unity we ourselves receive from his what he himself received from ours." With the help of Aristotle's philosophy, Aquinas (*ca.* 1225-1274) worked out this teaching in detail in a period of great development of popular eucharistic devotion.

Such teaching altered the Church's conception of grace, which came to be thought of as an impersonal substance that could be infused into the life of the Church by the sacraments, which themselves caused grace. The counter-reformational Council of Trent in 1547 decided that the sacraments confer grace *ex opere operato* (by the force of the action itself), provided no obstacle is put in the way; they do not depend on the faith of the recipient.

VI. Development of the Liturgy.–Immediately after Pentecost, what was essential to the Lord's Supper was removed from its Passover context and celebrated as a more ordinary Jewish community meal. Probably in one form of the earliest celebration (cf. the accounts of Paul and Luke) the bread was broken with a blessing at the start of the meal and the cup with its blessing was postponed till the end. But at an early stage the bread was given with the cup, and the two thanksgiving prayers were merged into one. The accompanying meal was dropped at an early date — already in Paul's time in Corinth it had taken on undesirable features (cf. 1 Cor. 11:20ff.). The "Supper" then became joined to the service of readings, prayers, praises, and sermon patterned after Jewish synagogue worship. Quite soon the Supper was named "eucharist."

Thirteenth-century mosaic of the "Last Supper" by an anonymous artist of the Italian school (New Orleans Museum of Art, New Orleans, Louisiana, The Samuel H. Kress Collection)

Justin Martyr described the order of second-century Christian worship as readings (from the Prophets, Gospel, and Epistles), a sermon, intercession, the kiss of peace, offering of gifts, bringing of the elements, a thanksgiving prayer, the amen of the people, and the distribution of broken bread and wine.

In the early centuries of the Church a group of liturgical elements either consisting of phrases taken from Holy Scripture or built up from scriptural expressions (such as the *Kyrie, Sanctus, Benedictus, Pax*) took definite shape. Each element was recognized as adding a helpful or essential feature to a pattern of worship centered on both the Word and the Lord's Supper. The prayer of thanksgiving before the distribution of the elements became important; it was regarded as consecrating the bread and wine. Extempore prayer was allowed, but the authority and value of universal custom were recognized. These traditional liturgical features appear in varying order and interrelation in the important early liturgies that shaped later tradition. They are the basis of the Eastern liturgy and the Roman mass. The Reformers incorporated them into their forms of service, and they are universally used today.

In eucharistic celebrations of earlier centuries the whole congregation participated in every important aspect and could see the minister perform all the actions; the accompanying ceremonial was subordinated to the clear emergence of the meaning of the central action. Before large churches were built the vestments and accompaniments of the service were simple.

Liturgical rites became unified and fixed, mainly according to the usage in two great centers, Byzantium in the East and Rome in the West. The only variable elements allowed were ultimately those prescribed for various sea-

sons of the church year. In the Byzantine liturgy the eucharistic elements were consecrated behind a screen and a veil; two processions, one the "little entry," in which the Word was brought in before being read, the other the "great entry," in which the elements themselves were brought in, dominated the service.

The Western Church applied the name "mass" to the eucharist. The term apparently derived from the words with which the congregation was dismissed, or blessed, at the close of the service, *ite missa est* ("Go, you are dismissed"). In the Roman liturgy the "canon" of the mass, the central core that orders the action of the actual eucharist, was gradually developed until it became fixed about the 5th century. Before long the whole service received an authoritative form.

Several influences largely deprived the eucharistic rite of its original clarity and simplicity. Especially in the East the Church's worship, coming under the emperor's patronage, developed a grandeur reflecting the secular court. Since the people could not see the central act of the mystery, they tended to center devotion on the processions, which developed features unrelated to the original institution of the Supper.

The Roman mass also became a complicated and elaborate celebration. Dramatic accompaniments added to the ritual made it resemble a spectacle that onlookers admired instead of a service that involved the congregation. The details of these accompaniments were interpreted in later centuries as a visible enactment of the life and passion of Christ. The use of Latin long after it had ceased to be a vernacular accentuated the impression that only the clergy could actively participate in the mass. The canon of the mass and the doctrine of transubstantiation led to a primarily sacrificial interpretation of the rite; moreover, the priest stood with his back to the people in front of an altar, above which he elevated the host as if offering a sacrifice to God. The development of the "low mass," an adaptation of the "high" service for more ordinary and occasional use, caused the multiplication of altars within large churches and the celebration of private masses, with the idea that each mass had its own value and could be directed by priest or church to achieve desired ends.

In the 12th cent. giving the cup to the laity was discontinued lest even a drop of the consecrated wine be spilled. The whole Christ, however, was understood to be present in the bread.

At the Council of Trent a commission was appointed to revise and purify the mass, and from 1570 until the Second Vatican Council one official form of the rite was imposed on the whole Roman Catholic Church.

VII. Reformation of Doctrine and Liturgy.–The Reformers denied that the mass is a sacrifice offered to God. They rejected the doctrine of transubstantiation, the philosophy that led to it, and the unnecessary miracle it implied. They insisted that the sacraments bestow their blessings only when received by a person with a personal relationship of faith in God, which is created by the Word, and that the sacraments are effective only in the sovereignty and freedom of the Holy Spirit.

The earliest writings of Martin Luther (1483-1546) emphasize the Lord's Supper as a joyful communion with Christ within the fellowship of the Church. Partaking of the one bread Christians minister to each other in a love that is a thankful response to the love of Christ. In communion with Christ in the sacrament, they find that Christ bears all their burdens and endows them with His wealth and blessing, so that in love they can bear each other's burdens.

The early writings of Ulrich Zwingli (1484-1531) also totally reject the mass as a sacrifice. Zwingli stressed the importance of the Supper as a remembrance of the historical event of the crucifixion and a valuable means of communion with Christ.

In the controversy that broke out when differences between the German and Swiss views became more apparent, Zwingli tended to emphasize the contemplation of the cross in the Supper at the expense of the place he had earlier given to the communion aspect. He insisted on interpreting the words "This is my body" by the phrase "This signifies my body" and implied that the main effect of the sacrament was simply strengthened faith — though for him faith was itself inseparable from real communion with Christ.

Luther, in conflict with Zwingli, Oecolampadius, and others, was forced to read the early fathers; with a variety of vivid expressions that could easily be misunderstood, he insisted that in the Lord's Supper a miracle takes place comparable to the Incarnation. He emphasized that the sacrament was a gift or testament made by God that assures believers of forgiveness, not a sacrifice made to God. Under the influence of Peter d'Ailly (1350-1420) Luther denied the necessity of any inward change in the elements, but at the same time he emphasized the infallible power of the words "This is my body" to make the body of Christ objectively present in the sacrament along with the elements.

In discussing the possibility and nature of such a miracle, Luther asserted that Christ's body because of its union with deity is omnipresent. The right hand of God, to which Christ ascended in His bodily nature, can be regarded as being everywhere, since the term means God's almighty rule. Christ's body is therefore wherever God rules. But the Christian has real access to the body of Christ by faith only where the Word of God declares that body to be present, as in the sacrament. So objectively real, however, is the presence of the body of Christ in the sacrament that the wicked can damn themselves by eating it.

For Calvin (1509-1564) one of the central mysteries of the faith was the "mystical union" of Christ, the head of the Church, with the members of His body. This union is comparable to the union of the Word with human nature in the Incarnation. Paul's use of the terms "in Christ" and "Christ in us" indicates the reality and mystery of this relationship. Jesus described this union in His discourses on the bread of life in Jn. 6 and the true vine in ch. 15. But no words can sufficiently explain this mystery; God therefore gives a living picture of it in the Lord's Supper. Since God does not mock anyone, the giving and receiving of the physical bread and wine must be regarded as a reliable sign of Christ's hidden spiritual self-giving of His body and blood, or His whole humanity, to His people. In the Supper, therefore, participants' receiving Christ by their faith involves more than the mere increase and exercise of faith. Calvin thus insisted no less than the Lutherans and Romanists that Christ is truly given and received in the sacrament. He differed from them only in explaining how this mystery occurs. While he admitted that it was better, in this matter, to adore than to explain, he formulated a doctrine that won the approval of Melanchthon and brought agreement among the Swiss churches.

Calvin's doctrine asserts that the humanity of Christ remains in its integrity in heaven, which is regarded as beyond the conceivable world. By the inconceivable power of the Holy Spirit, the power and virtue belonging to the humanity of Christ are communicated to the partaker of the sacrament by faith. This faith itself is so miraculous that it can ascend to Christ to feed upon Him. Calvin thus sought to preserve a dynamic parallelism between earthly

and heavenly action, which are distinct yet inseparable. His doctrine of realized eschatology, which stresses the Church's participation here and now in the resurrection of Christ, enabled him to interpret the sacrament very realistically and to speak of it as giving a foretaste of eternal life and as being a pledge of the resurrection of the body. He also stressed church members' communion with one another in the sharing of the one loaf, and the eucharistic sacrifice of thanksgiving that the Church can make by participating in the one priesthood of Christ.

While revising eucharistic doctrine through their new understanding of Scripture, the Reformers also found themselves forced to revise the liturgy. At an early date they restored communion in both kinds to the laity. The Reformers aimed "not to abolish but to cleanse"; they attempted to preserve what was essential and helpful in the traditional ritual and purge what was irreconcilable with the gospel. Andreas Karlstadt (1480-1541) and Thomas Münzer (1490-1525), who had otherwise extreme views, at early dates produced restrained and worthy liturgical forms for the celebration of the Supper.

Luther in 1523 was content to preserve most of the liturgy in Latin and just radically revised the prayer of consecration, through which he believed the mass had been turned into a sacrifice. In 1525, however, he translated the mass into German, changing the liturgy more drastically and ensuring that the uncorrupted words of the institution of the sacrament would remain the chief feature in the consecration. Luther's most valuable contributions in this field were restoring the sermon to its true place and introducing German hymns to allow the fuller participation of the people. At an early period, anxious to safeguard the rite from profanation, he included the discipline of careful self-examination or confession by the participants. He retained features that other Reformers rejected, such as the elevation of the host and traditional vestments.

Zwingli far more radically altered the traditional outward form and designed a service in which the communion was celebrated as if it were a family meal around a table. The ministers dressed soberly. There was no prayer of consecration. The elements were distributed and received in silence after the Scripture reading, the Apostles' Creed, the fencing of the tables, a prayer of humble access, and the words of institution.

In deciding the form for the celebration of the Lord's Supper in Geneva, Calvin was influenced by the form of prayers produced by William Farel (1489-1565) in 1524 and by the liturgical reform that had taken place in Strasbourg largely under the leadership of Martin Bucer (1491-1551), to whom Calvin was deeply indebted even for the wording of some prayers. Calvin's concern was to maintain the order he believed to have been prevalent in the ancient Church and to attain the ideal of a service that centered on the preaching of the Word of God and was incomplete without the celebration of the Lord's Supper. Calvin hoped that this dual celebration of Word and sacrament would take place every Sunday. He left room for freedom of prayer and sought to avoid anything that would prevent the original action at the table from being clearly expressed in its primitive simplicity.

The eucharistic doctrine expressed in the definitive (Edwardian) formulations of the Anglican Church at the Reformation is consistently Calvinistic. The Anglican liturgy took final shape when tension existed between those who wished to retain as much of the medieval practices as circumstances would allow and adherents of an incipient Puritan movement who desired more radical reconstruction after the manner of the Swiss churches. The successive prayer books reflect the influence of both points of view. Those who were more "Catholic" in their sympathies regarded the first prayer book, issued by Cranmer in 1549, as admirable and well balanced in every way. But some, supported by Martin Bucer and Peter Martyr (1500-1562), who were then in exile in England from the Continent, strongly protested this book. Its drastic revision (1552) culminated ultimately in the present prayer book of 1662. The doctrinal articles from the first version in 1553 (Forty-Two) to the definitive form in 1571 (Thirty-Nine) agree substantially with Calvin's understanding.

From the Reformation to comparatively recent times eucharistic theology has had, generally speaking, few important developments. The theology of the period of Protestant orthodoxy, the Enlightenment, and the 19th cent. was not likely to promote fresh and creative thinking on the sacraments. But the Confession of Faith and the Directory of Public Worship produced by the Westminster Assembly provided for the Presbyterian Church a worthy and rich doctrine of the presence of Christ in the sacraments. Moreover, the importance of the Lord's Supper in the devotion and experience of the common people often prevented its actual celebration from suffering too acutely from the poverty of doctrine and liturgy. Anglican theologians, like Calvin, always tended to stress the relationship of the sacrament to the Incarnation. In all the churches of the main Reformation traditions a concern has recently arisen to restore to the Church what it might have lost by neglecting its liturgical tradition. Churches are also paying fresh attention to the doctrine of the Lord's Supper, which is currently the subject of much creative thinking and writing. The Second Vatican Council made important changes in the form of the mass; it is now conducted mainly in the vernacular, and the officiating priest faces the people.

VIII. Some Essential Features in the Interpretation of the Supper.–From a study of the biblical background of the rite, the exegesis of Christ's own words, the traditional interpretation of the rite within the mainstream of church life, and the modern discussion, it is obvious that the Supper has never failed to present certain features that most Christians have found valuable and meaningful.

(1) Through the Lord's Supper the efficacy and power of the redemptive work of Jesus Christ in His death and resurrection are applied to His people in each generation (see IV above).

(2) Through the Supper the risen Jesus Christ is present in the midst of His people in each generation. Many commentators have agreed that the best interpretation of the words "This is my body" is "This is Myself." Others have pointed out that this sense is possibly obtained by the twofold assertion "This is my body," "This is my blood." The words were spoken to the disciples by a Christ who was leaving them (Jn. 14:2f., 28) and whose promise to come to them again (vv. 3, 28) referred not simply to a final coming in glory but to a coming through the Spirit within the continuing life of the Church. He gave the bread with these significant words to pledge that He would be with them in His risen power whenever they met to break bread in His name as He had taught them. He would make the bread signify and convey to them in part what His body had signified and conveyed when He had been with them (cf. Mt. 18:20). The table fellowship that depended on the presence and action of His earthly or resurrection body would be reconstituted around the taking of the bread and wine.

(3) In the Supper Jesus gives to all His people an irrevocable pledge of their share in His eternal destiny. At the Lord's table the disciples knew that Jesus had identified Himself with them in their need and wretched-

ness. His baptism had been a sign and the cross, to which He was now fully pledging Himself, was the climax of His ministry's self-identification with the condition and fate of sinners. But since the cross restored Him to glory, before He was crucified He deliberately gave His disciples a sign that He never willed to be without them, that henceforth they could always with complete certainty identify themselves with Him in His glorious victory and destiny. With His words "for you" and His command to all present to "take and eat," Jesus thus associated each of His disciples with Himself in all His triumphant power and heavenly greatness. In giving the bread Jesus gives Himself to the believing souls who receive it. As He gave Himself for them, so He gives Himself to them. What He did for them, He accomplishes in them (cf. Leenhardt, p. 65).

(4) Through the Lord's Supper Jesus Christ incorporates humanity into His body, as the counterpart of the completed union with all mankind effected in His incarnation, death, and resurrection. To formulate sacramental doctrine one must give due weight, as Luther, Calvin, and the early fathers did, to Jn. 6 and the realistic NT descriptions of the Church as the body of Christ and of the union of the members of the body with the Head. Through the ministry of word and sacrament, the members of Christ are incorporated into His body by faith in a union of being, which has a substantial element but is nevertheless dominated by a personal-faith relationship. This incorporation is not the "extension" of an incarnation that somehow awaits completion (as, e.g., in Gore, p. 59). The ingrafting of the branches is not necessary to complete the vine (Jn. 15:5), and basically, as Calvin pointed out, the Incarnation has already set up a relationship of flesh with all mankind as the head of all things (cf. Wallace, p. 148). Phrases such as "reenactment" or "repeated actualization" are better than "extension" or "completion" (cf. Torrance, II, 188f.).

(5) The Lord's Supper is intended to be both a representation of Christ's one sacrifice and church members' eucharistic offering of themselves to God. The Lord's Supper leads the Church to realize afresh its own involvement in the saving event of the death and resurrection of Christ and to become related in a new way to this event. In a sense, therefore, God re-presents the sacrifice of Christ to His people within the sacrament. But the sacrament presents the historical event as one in which the people did not and cannot actively take part — an event in which Christ suffered alone in their place to save them and set them free. The Church, therefore, does not reenact the sacrifice of Christ through its initiative or sacramental activity or offer afresh a sacrifice identical to the one-time sacrifice made without its cooperation.

The Church, moreover, makes a glad self-sacrifice of thanksgiving in response to Christ's sacrifice of propitiation. It is supremely in the context of the Lord's Supper that the members of the Church within the one body can present themselves in body and soul as a living sacrifice, holy and acceptable to God (Rom. 12:1).

(6) Interpretations of the Lord's Supper must take full account of its corporate nature. The Supper is a meal, which is essentially a social means of fellowship. The early Church had an actual fellowship meal between the giving of the bread and the wine. The Jewish Passover feast, which forms the background of the Lord's Supper, essentially celebrates an action in which God dealt with His people as members of one body, and individuals find themselves strengthened and built up within the revitalizing of the corporate fellowship with God. The "new covenant" is a covenant between God and His whole people before it is a covenant between God and the individual.

Christians' communion with each other within the one fellowship is, therefore, an important aspect of the Lord's Supper. Paul referred to this communion in 1 Cor. 10:17, "For we being many are one bread, and one body: for we are all partakers of that one bread." The meal strengthens, first of all, the fellowship of love and service. The Reformed custom of each member handing the elements to another, thus serving the other and encouraging the other to partake, has a deeply significant meaning.

(7) Participants in the Lord's Supper encounter in the present the actuality of what is future. The Lord's Supper, like the Passover, is the "remembrance" of a unique event, whose effect is decisive not only for those who participated in it historically but also for those in each generation who participate in it sacramentally (cf. IV.A above). But the Lord's Supper also anticipates what is to come. Instead of returning immediately in the glory of His completed kingdom, to usher in visibly the new age for mankind, Jesus Christ has held back the final full irruption and manifestation of His reign. In the lengthened interim He gives within His Church, especially in the Lord's Supper, a foretaste of the final marriage supper of the Lamb (Rev. 19:7-9) and of the powers of the age to come (He. 6:4f.).

Participants in the Supper, therefore, within a temporal form and through a transitory event confront, as far as possible while still in the "last days" (He. 1:1; 1 Pet. 1:20), what will belong to them in Christ when they see Him as He is (1 Jn. 3:2). At present they can have this confrontation only through a sacramental veil. The sacrament is thus the appointed means by which God gives participants this gracious encounter with what is to come, and it is meant to make them always look forward in hope to the glory of the final destiny of all things, even while they offer themselves, in union with the crucified Lord, to the service of His word in the life of this present world. The prayer *Maranatha*, "Lord, come!", must ever spontaneously arise from the Church in the celebration of the sacrament (cf. 1 Cor. 11:26; 16:22).

LO-RUHAMAH lō-rōō-hä'mə [Heb. *lō' ruḥāmâ*–'not shown compassion' (cf. RSV "Not pitied"); LXX Gk. *Ouk ēleēménē*, translation rather than transliteration]. The AV and NEB transliteration of the name of the second child (only daughter) born to the prophet Hosea and his wife Gomer, *ca.* 758 B.C. (Hos. 1:6). God commanded Hosea to give his three children symbolic names (*see* JEZREEL; LO-AMMI). The name Lo-ruhamah connoted a withdrawal of covenant protection (or "love," using ancient Near Eastern legal terminology) and thus indicated that the covenant had been abrogated and punishment was due (v. 6). Lo-ruhamah was weaned, i.e., was at least 3 years old, when Hosea's third child was born (v. 8). Nothing otherwise is known of her or the other children.

D. STUART

LOSE; LOSS; LOST [Heb. *'ābaḏ* (e.g., Ps. 119:176; piel, Ecc. 3:6), *'ᵃḇēḏâ* ("lost thing," e.g., Ex. 22:9[MT 8]), *šᵉḵôl*– 'loss of children' (Isa. 47:8f.), *'āsap* (Jgs. 18:25),

bôš–'be ashamed' ("at a loss," Jgs. 3:25), niphal of *gāzar* –'be cut off' (Lam. 3:54), niphal of *dāmâ*–'be silent' (Isa. 6:5), piel of *ḥāṭā'* ("bear the loss," Gen. 31:39), *yāṣā'*–'go out' (Josh. 19:47), hiphil and niphal of *kāraṭ*–'be cut off' (e.g., Zeph. 3:7), *nāpal*–'fall' (1 K. 20:25), *šāgâ*–'stray' (Prov. 5:23), hithpael of *šāḵaḥ*–'forget' (Eccl. 9:5); Aram. *ʿezaq* ("suffer loss," Dnl. 6:2 [MT 3]); Gk. *apóllymi* (e.g., Mt. 10:39), *zēmióō, zēmía* (e.g., Acts 27:10), *apobolḗ* (v. 22), *aporéō* ("be at a loss," 25:20), *eklýomai* (e.g., "lose courage," He. 12:5), *enkakéō* ("lose heart," Lk. 18:1; 2 Cor. 4:1, 16; etc.), *ekpíptō*–'fall out' (2 Pet. 3:17), *mōraínō* ("lose its taste," Mt. 5:13; Lk. 14:34), *gónomai ánomos* ("lose its saltness," Mk. 9:50)]; AV also PERISH, FAINT, DAMAGE, FORGOTTEN, UNDONE, FADE AWAY, SILENCED (Isa. 6:5), BE CUT OFF (Zeph. 3:7), GO ASTRAY (Prov. 5:23), etc.; NEB also STRAY, CLOSED, MISSING, UTTERLY FORGOTTEN (Eccl. 9:5), etc.

Because Eng. "lose" is often used idiomatically, it represents a wide variety of Hebrew and Greek words. E.g., in Gal. 6:9 the passive of Gk. *eklýō* is appropriately translated by the idiom "lose heart," while it means literally "be unloosed" or "relax." Hence, only a few of the words listed above carry the simple meaning of "lose" or "loss."

The predominant Hebrew word rendered "lose" in the nonidiomatic sense by the RSV is *'āḇaḏ*. This term occurs most often with reference to lost domestic animals that face certain doom alone in the wilds (e.g., 1 S. 9:3, 20); indeed, it always carries the sense of being on the point of destruction — a connotation that is clearer in its alternate translation as "perish" (e.g., Lev. 26:38; *see* PERISH). Because the note of urgency is lacking in Eng. "lose," which can mean merely "misplace," it is easy to miss the theological significance of the analogy of Israel to lost (*'āḇaḏ*) sheep (Jer. 50:6; Ezk. 34:4, 16; cf. Isa. 27:13). Occasionally the text suggests the sheep have wilfully wandered (Isa. 53:6), but more often the shepherds have not cared adequately for the precious but feeble flock (e.g., Ezk. 34:1-10). The significance of Yahweh as the sheep's rescuer (vv. 11-31) is grasped only in view of the urgency of their perilous and helpless predicament.

The pathos of being "lost" comes through more clearly in English when interpreted psychologically; but *'āḇaḏ* never really has this sense. Isaiah's visionary experience is sometimes considered paradigmatic of the feeling of "lostness": "Woe is me! For I am lost . . ." (Isa. 6:5). The term used here is not *'āḇaḏ* but *dāmâ* (niphal, "be silenced"), which refers to Isaiah's being struck dumb with terror.

By far the most common NT term rendered "lose" or "lost" by the RSV (esp. in the Gospels) is Gk. *apóllymi*. Used frequently by the LXX to translate Heb. *'āḇaḏ*, Gk. *apóllymi* retains the threat of imminent destruction. It occurs in the Synoptic passages that use the lost sheep analogy to describe sinners doomed to perish unless they are rescued (Mt. 10:6; 15:24; 18:11; Lk. 15:4, 6). In Lk. 15 the parable of the lost sheep is grouped with those of the lost coin and the lost son. These stories tell about the joyful reception of the infinitely precious lost sinner into the Kingdom. Jesus, who seeks the sinner, risks great loss in the process — even His life (cf. Jn. 10:11).

Other passages use *apóllymi* in the sense of sacrificing one thing to gain something more precious; these passages refer to Jesus and His followers enduring loss. Jesus exhorts His followers to be prepared to lose their lives for His sake; those who do so will save their lives (Mt. 16:25 par. Mk. 8:35; Lk. 9:24; also Mt. 10:39; Lk. 17:33; Jn. 12:25). This startling reversal evokes the image of Jesus' own life-giving death and summons His disciples to follow His example, letting go of the life of the world to gain life in the Kingdom. Similarly, Jesus' hyperbolic saying in Mt. 5:29f. teaches the need to sacrifice those things that would exclude one from the kingdom of God.

Whereas *apóllymi* is the predominant term for "lose" in the Gospels, the verb *zēmióō* and noun *zēmía* ("loss") appear more often in the Epistles (e.g., 1 Cor. 3:15; 2 Cor. 7:9). In Phil. 3:4-6 Paul tells of his former accomplishments; then in v. 7 he changes course suddenly and states that he counts all these things as loss (*zēmía*) in the light of the supreme worth of knowing Christ Jesus (cf. vv. 8-11). His loss — like the loss of life or bodily member — is not to be lightly understood. What the disciple forfeits is of some consequence, but it is small compared to what is gained in Christ.

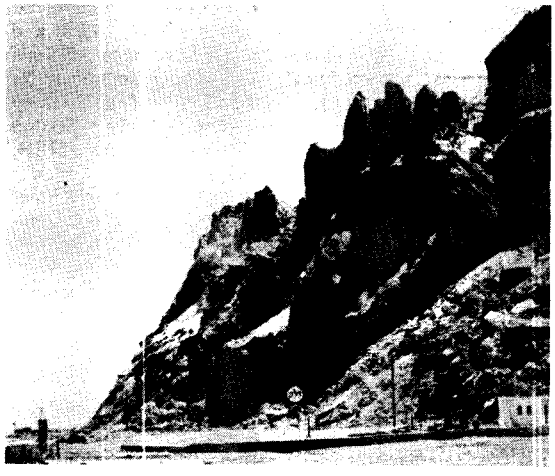
LOT lot [Heb. *lôṭ*; Gk. *Lōt*]. The son of Haran, grandson of Terah the father of Abram (Gen. 11:27, 31; 12:5). As Abram's nephew Lot played a significant role in the patriarchal migration from Ur to Har(r)an (Gen. 11) and on into Canaan (ch. 12) before his own move to Sodom (ch. 13). The rescue of Lot from the allied kings who had raided the plain of Jordan and captured him (ch. 14) and from the later divine destruction of Sodom, the city into which Lot married (ch. 19), both became notable for the spiritual lessons to be drawn from them.

I. Name.–The meaning of the name of Lot is uncertain, though it is a name of the "serial type," i.e., Lot-ben-Haran. It is usually taken to mean "covering" (< Heb. *lôṭ*, "envelop, wrap closely"), perhaps denoting the close relationship with his uncle. The name could as wel be related to Akk. *lâṭu*, "control, keep in check."

II. Life.–Lot's birthplace is not stated, but since he is first mentioned with his father in Ur of the Chaldeans he was probably born there. When his father died Lot joined his grandfather and Abram for the migration to Canaan via Haran (11:31). Terah died at Haran and Lot moved with the seventy-five-year-old Abram from that city to Bethel in Canaan. He was with Abram when he went down to Egypt, became increasingly prosperous there (13:1), and moved back with him to the Negeb and eventually to Bethel. Abram's growing wealth, especially in herds and flocks (including camels), led to tension between him and his nephew since pasturage was limited, and their respective employees quarreled (13:5-7).

Until this episode relations between the childless uncle and fatherless nephew were close. Lot was in a covenant relationship with Abram ("we are brothers," 13:8) and may have anticipated that he should have been Abram's *de facto* heir. To avoid strife Abram magnanimously let Lot choose the portion he wished to take of the divinely promised inheritance. Lot chose to move E of the Jordan (13:11) and pitched his tents "toward" (so AV; NEB, NIV, "near") Sodom (v. 12). The "valley" (AV "plain"; Heb. *kikkār*) of Jordan was well populated at this time. V. 12 does not suggest that Lot was necessarily a seminomad, for such groups were at this time normally associated also with urban relatives. Soon thereafter Lot appears as a householder in Sodom (19:2) and possibly a member of the local council and judiciary ("sitting in the [city] gate," 19:1; but cf. below).

A. Rescue. Lot's life was marked by two remarkable deliverances. First, when in Sodom he was abducted by a group of four rulers from Shinar, Ellassar, Elam, and Goiim (Heb. *gôyim*, "nations"), who, according to tradition (see 1QapGen 21:23-28), struck from the Euphrates



River to sack the prosperous region of Sodom and Gomorrah. This region had been defeated at the battle of Siddim, probably to be located some way off (14:1-12). When Abram heard this he mounted an unprecedented night attack on the coalition as it retreated through Dan to Damascus (14:15). This was a tactic also used successfully by succeeding Israelites (Jgs. 7; 1 S. 14:36). Using his own trained retainers and those of his allies Mamre, Eschol, and Aner, Abram brought back Lot, his possessions, the women, and others (Gen. 14:13-16). Lot presumably returned to Sodom following the meeting of Abram with the king of Sodom at Shaveh (v. 16). Lot may have heard his uncle decline any share of the spoils (vv. 21-24).

In Gen. 18 the Lord tells Abraham that Sodom will be destroyed. Abraham's plea for Sodom and thus for Lot's family depended on there being only ten righteous persons found there (18:32). This may have been the extent of Lot's family. Lot was considered "a righteous man" (2 Pet. 2:7f.), hospitable to strangers and vexed with the lawlessness around him (19:3, 7f.). The warning which saved his life is expressly linked with God's remembrance of Abraham (19:29). God delivers the righteous (Ezk. 14:14; 1 Pet. 3:12), whose manner of life He judges (Ps. 7:11 [MT 12]) and knows (Ps. 1:6).

When Lot received, with typical oriental hospitality, the two messengers (or angels) sent by God, the townsfolk accused Lot, an alien ("sojourner"), of wanting to act as judge (v. 9). This may imply that in receiving the messengers Lot was thought to have usurped the judicial function of the city's elders.

B. Lot's Wife. Lot left Sodom with his wife and daughters, fleeing overnight to Zoar. This is identified with the small town of eṣ-Ṣâfī in the Wâdī el-Ḥesā at the delta of the brook of Zered about 5 km. (3 mi.) from the southern shore of the Dead Sea. They had been warned to flee to the hills without looking back, i.e., delaying. Lot's wife held back and was apparently overcome by the sulfur cloud and eruption associated with the sudden destruction of Sodom and Gomorrah. She became a "pillar of salt" (Gen. 19:26). Tradition associates this with the salty marl at the southwest end of the Dead Sea that forms hillocks of strange shapes in the salt cliffs of Jebel Usdum. This persistent tradition was repeated in Wisd. 10:7 ("a pillar of salt [still] standing as a monument to an unbelieving soul") and by Josephus (*Ant.* i.11.4 [203]).

Salt cliffs overlooking the Dead Sea at Jebel Usdum. The knarls (pillars?) at the top of the cliff are traditionally associated with Lot's wife (W. S. LaSor)

Jesus Christ cited Lot's wife as an example of the dire consequences of disbelief in God's warnings to flee, and thus of reluctance to leave, a doomed city (Lk. 17:31f.). She had come as close as possible to the point of deliverance yet without achieving it, being overwhelmed suddenly. The episode of Lot's wife was also taken by Christ as a warning of the suddenness of the coming of the Day of the Lord, just as the unexpected immediacy of the destruction of Sodom that caught people eating and drinking, buying and selling, planting and building (Lk. 17:28f.). The deliverance of Lot thus became an example to be remembered of divine action in salvation (2 Pet. 2:7f.).

C. Lot's End. Lot's final disappearance was due to alcohol and the disbelieving fear that, contrary to the divine promise and action, he would be overwhelmed in the destruction. He sheltered in a cave in Moab where his daughters, fearing a lack of husband and descendants, slept with him incestuously (Gen. 19:30-38). Why they should not have been willing to intermarry with locals cannot just be explained as an instance of later Israelite insularity in relation to neighbors coloring the narrative (cf. Gen. 36:20-30; 1 S. 22:3f.; Ruth). The progeny of this incest were Moab and Ben-ammi, the fathers of the Moabites and Ammonites.

III. Theories.–Lot's story has been considered an etiological fiction to explain the origin of the Ammonites and Moabites; and according to some (e.g., C. Westermann, *Genesis* [*BKAT*, 2nd ed. 1975], p. 375], the metamorphosis of his wife, unique in the OT, resulted from the transgression of a magic taboo. But these remain hypotheses. Nor is there substantiated reasoning why the person of Lot should be considered unhistorical, mythological, or merely the personification of a group (*Volksname*). The proposed connection of Lot with the Seir Horite ("cave dweller") Lotan (Gen. 36:20, 22, 26) is unlikely since the latter may be the same as Egyptian *rtn* (A. Gardiner, *Ancient Egyptian Onomastica* [1947], I, 148). Lot is revered today by some Arabs as an ancestral patriarchal figure.

Bibliography.–D. J. Wiseman, "Abraham reassessed," in A. R. Millard and D. J. Wiseman, eds., *Essays on the Patriarchal Narratives* (1980), pp. 139-149; H. C. van Hatten, *BA*, 44 (1981), 90f.

D. J. WISEMAN

LOTAN lō'tan [Heb. *lôṭān*]. First son of Seir; a clan chief of the Horites (Gen. 36:20, 22, 29; 1 Ch. 1:38f.), who were the inhabitants of Edom before it was occupied by the Edomites.

Lotan was also the name of a serpent defeated by Baal in Canaanite mythology, probably the Ugaritic prototype of LEVIATHAN.

LOTHASUBUS loth-ə-sōō'bəs [Gk. *Lōthasoubos*]. One of those who stood at Ezra's left hand at the public reading of the law (1 Esd. 9:44); called Hashum in Neh. 8:4.

LOTS [Heb. *gôrāl*; LXX *klḗros* (Lev. 16:8-105 Nu. 26:55; etc.)]; [Heb. *qesem*] (Ezk. 21:22 [MT 27]); NEB AUGUR'S ARROW; AV DIVINATION; [Gk. *klḗros*] (Mt. 27:35; Mk. 15:24; Lk. 23:34; Jn. 19:24; Acts 1:26). Both Heb. *gôrāl* and Gk. *klḗros* have two primary meanings: (1) a device used to determine the will of god or of the gods, i.e., a form of DIVINATION; (2) by extension, "share," "portion," "inheritance," i.e., that which is received by the drawing or casting of lots. For the latter meaning *see* ALLOTMENT; PORTION.

I. Terminology.–The Heb. *gōrāl* is derived from the Semitic root *grl*, which in Arabic is the basis for words meaning "stony," "stony ground" (KoB, p. 195) and probably referred originally to small stones or markers used for divination. Eventually a variety of small objects of

stone, wood, clay, or other material were also used. Several verbs are used with *gôrāl*, all of which can mean "throw" or "cast" lots (*yārâ*, e.g., Josh. 18:6; hiphil of *šālaḵ*, e.g., Josh. 18:8; hiphil of *nāpal*, e.g., Prov. 1:14; Isa. 34:17; *yāḏaḏ*, Joel 3:3 [MT 4:3]; Ob. 11; Nah. 3:10). The lots appear to have been kept in a container in which they were shaken until one was thrown or sprang out (three different verbs are used for this: *yāṣā'*, e.g., Nu. 33:54; Josh. 15:1; *'ālâ*, e.g., Lev. 16:9f.; *nāpal*, e.g., Jonah 1:7). The Heb. *qesem* is the only reference in the OT to a specific type of lot, namely, arrow divination. The terms *pûr* and *pûrîm* are Hebrew transliterations or adaptations of the Akk. *pūrū*, which is used for the casting of lots for the purpose of divination (see Hallo; *see also* PURIM). The term occurs in the singular in Est. 3:7 and 9:24, 26, and in the plural in Est. 9:26, 28f., 31.

II. In the OT.–Although the casting or taking of lots is but one of many forms of divination, there is a wide variation in the use of lots throughout the ancient world. The central presupposition behind the use of lots in the OT and NT is clearly expressed in Prov. 16:33, "The lot is cast into the lap, but the decision is wholly from the Lord." The use of lots in making decisions, therefore, was regarded as a means of allowing God to make the choice (cf. Josh. 18:6, 8, 10).

Lots, though a form of divination, were never a forbidden practice in ancient Israel as were the other major forms of divination (cf. Dt. 18:9-14). One form of sacral lot was the URIM AND THUMMIM, which were kept in a pocket in the EPHOD worn by the high priest (Ex. 28:30). The Urim and Thummim were probably two small objects (stones, dice, small pieces of wood) that were used to secure either a yes or no answer, and were used for such sacral functions as the annual selection of goats to represent Yahweh and Azazel on the Day of Atonement (Lev. 16:7-10).

Similar to the positive or negative response expected of the Urim and Thummim, other forms of the lot were primarily used to secure a yes or no answer to a particular proposal. In the OT the lot is most frequently mentioned in connection with the apportionment of land (Nu. 26:55; 33:54; 34:13; 36:2f.; Josh. 14:2; 15:1; 17:14, 17; 18:6, 8, 10f.; 19:1, 10, 17, 24, 32, 40, 51; 21:4-6, 8, 10; 1 Ch. 6:54, 61, 65), with the result that the land so allotted expressed the divine will and thereafter became a portion or inheritance that could not be alienated.

Lots were frequently used to narrow gradually the field of choice before the final lot was cast. Thus 1 S. 10:20f. narrates how through lot the tribe of Benjamin was selected, then the family of Matrites was selected, and finally Saul was selected as God's choice of king of Israel. Similarly, the lot was probably used to determine who had caused Israel's defeat at Ai (Josh. 7:16-18); the guilty party was discovered by first narrowing the choice to the tribe of Judah, then the family of the Zerahites, then the household of Zabdi, and finally Achan was revealed as the culprit. Similarly Haman in Est. 3:7 had lots cast for each of the months of the year, and when Adar received a positive response, he determined that the Jews would be destroyed on that month.

Lots were employed in other ways as well. During the second temple period, lots were cast for the priests, Levites, and people to determine a rotation for those who would supply wood for the altar of the Lord (Neh. 10:34 [MT 35]). Lots were also cast at that time to determine who would live in Jerusalem; one man in ten was so selected (Neh. 11:1). The Chronicler also reports how the workers in the service of the first temple were organized by the casting of lots (1 Ch. 24:5, 7, 9; 26:13f.).

In three passages the rare expression *yāḏaḏ gôrāl* occurs (Joel 3:3; Ob. 11; Nah. 3:10), apparently belonging to a tradition of the oracles against the nations. In Joel 3:3 and Nah. 3:10 the lot is cast for people, apparently referring to the distribution of the prisoners of war, a fact which emphasizes their negligible value (H. W. Wolff, *Joel and Amos* [Eng. tr., *Hermeneia*, 1977], p. 77).

III. In the NT.–The Gospels have four references to the casting of lots (Mt. 27:35; Mk. 15:24; Lk. 23:34; Jn. 19:24), all of which reflect the tradition that the soldiers cast lots for the garments of Jesus at the foot of the cross in fulfillment of Ps. 22:18 (MT 19). As in the OT references to the casting of lots for orphans (Job 6:27) or prisoners of war (Joel 3:3; Nah. 3:10), the utter degradation of Jesus is emphasized in this way. Acts 1:26 refers to the casting of lots to select one of two candidates, Joseph Barsabbas or Matthias, as a successor to the apostle Judas. Here, unlike the OT, there is no narrowing down of a larger field of candidates, but in conformity to Roman practice the community chooses the two candidates, though the choice between those two is made by casting lots that are an expression of the will of God.

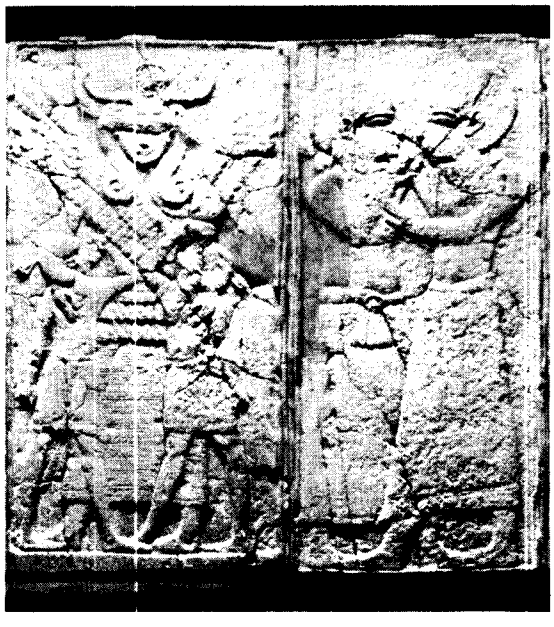
  1. In Other Epistles
  2. Charity

With the exception of the word "life," love is the most important abstract term in the Bible. God's love, the basis for His dealing with humans in the OT, climaxes in the NT in the incarnation and death of Jesus Christ. It is the key word in the Christian summary of biblical revelation (cf. Mt. 22:37; Jn. 3:16; Rom. 13:9; Gal. 5:14; Jas. 2:8).

I. In the OT.–A. Vocabulary. The most important Hebrew term for love is *'āhaḇ*. It has the same varied meanings as the corresponding term in English, including romantic, fraternal, and divine love. It occurs about 250 times in the OT in varied forms, the verb far more frequently than the noun. *'Āhaḇ* describes spontaneous and outflowing love, in contrast to love arising from deliberate choice. It is used both for human and for divine-human relations.



The second most important word for love is *ḥeseḏ*, denoting a deliberate choice of affection and kindness. The AV usually translates *ḥeseḏ* as "mercy." "Kindness" frequently describes King David's attitude toward his friends (2 Samuel). (*See also* STEADFAST LOVE.) *Ḥeseḏ* is less spontaneous than *'āhaḇ* and emphasizes the idea of loyalty. The term occurs most often in Genesis (human love), Deuteronomy (divine love), Psalms, and Proverbs. Various terms — "lovingkindness," "reciprocal love" (N. Glueck), "covenant love" (N. H. Snaith), "unfailing love," and "steadfast love" (RSV) — are all good translations, for *ḥeseḏ* cannot be pressed into any one formula (cf. the various NEB renderings). The threefold meaning of kindness, mercy, and love is perhaps best conveyed in the "lovingkindness" of the AV and RV.

Another synonym is *rāḥam*, meaning "love," "be merciful," "have compassion." It appears more than twenty-six times and comes from a root meaning "born from the same womb," hence "brotherly feeling." Typical is Dt. 30:3, "God will . . . have compassion." The other synonyms for love occur less frequently and usually refer to love or affection among people (but see Dt. 7:7; 33:12; Ps. 91:14; Isa. 38:17).

B. Human Love. Basic to all these meanings is the love relationship between man and woman. It has sexual connotations but usually includes affection, loyalty, and admiration. Jacob's love for Rachel indicates the spontaneous nature of this love (Gen. 29:18). The sexual meaning of the term is emphasized most in Ezekiel but is also prominent in Hosea and Jeremiah (Ezk. 16:33, 36f.; 23:5, 9, 22; Jer. 2:25; Hos. 3:1; cf. Ezk. 16:8). Canticles shows sexual love in its more inclusive and wholesome aspect; the term occurs both as a noun and as a verb (1:9; 3:1). Cant. 8:6 eloquently describes this impulse's power: "Love is strong as death, jealousy is cruel as the grave" (cf. 2 S. 13:1, 4, 15).

The OT much more frequently refers to the love of one person for another, or brotherly love. This love characterizes a wide variety of person-to-person relationships: between man and man (1 S. 18:1; 2 S. 1:26; 1 K. 5:1), woman and woman (Ruth 4:15), man and woman (Gen. 29:20; 1 S. 18:20; Prov. 5:19; Eccl. 9:9), and parents and children (Gen. 22:2; 25:28; 37:3). It is difficult to see the basis for Snaith's generalization that *'āhaḇ* particularly "is used of the attitude of a superior to an inferior" (p. 169). Instances of love between persons who are equal in status include Shechem and Dinah (Gen. 34:3f.), David and Jonathan (2 S. 1:26), Isaac and Rebecca (Gen. 24:67), bride and groom (Cant. 3:4), friends (Prov. 17:17), and neighbors (Lev. 19:18).

Ivory panel from the headboard of an Ugaritic king's bed. On the right two people embrace, on the left a goddess suckles two children. From Râs Shamrah, ca. 1400-1350 B.C. (Direction Générale des Antiquités et des Musées, Damascus, Syria)

Although in most contexts love involves relationships between persons, human and divine, the OT does mention love of food (Gen. 27:4, 9, 14), God's law (Ps. 119:97), sleep (Prov. 20:13; Isa. 56:10), silver (Eccl. 5:20), bribes (Isa. 1:23; Hos. 9:1), and instruction (Prov. 12:1).

C. Divine Love. Several terms express God's love for humans. The basic one is *'āhaḇ* (Dt. 7:8; 2 S. 12:24; Prov. 3:12; Isa. 43:4; Hos. 11:1). The second synonym (*ḥeseḏ*) emphasizes the covenant relationship (Ps. 36:7 [MT 8]; Isa. 63:7; Gen. 19:19; 2 Ch. 1:8). *Rāḥam* frequently expresses God's solicitude for humans, as in Ps. 103:13, "The Lord pities those who fear him" (cf. Gen. 43:14; Ex. 33:19; Ps. 51:1 [MT 3]). Often *ḥēn* denotes God's love and favor, e.g., Prov. 8:35, "obtains favor from the Lord" (cf. Ps. 102:13 [MT 14]; 1 S. 2:26).

The noblest expression of divine love is in Hosea, whose prophecy throbs with the pathos of this love shown even to those who are unlovely, unresponsive, and antagonistic. The divine love in Isa. 43:25 may be the highest expression of grace in the OT.

D. Human Love for God. The Psalms most frequently express human love for God. The psalmist loved God because of gratitude for past mercies (Ps. 116:1). Israelites are exhorted to love God with their total personality in a dynamic, growing relationship (Dt. 6:5; 30:6; Ps. 31:23 [MT 24]; 145:20). This love is a reaction to the divine initiative: God manifests His love, and people either accept or reject Him.

The most distinctive element in the OT revelation of God is that His basic attitude toward people is one of love, good will, and willingness to act on their behalf. The OT God differs from the gods of other religions because He loves, seeks, and suffers for the welfare of mankind. Gradually the particularistic emphasis in OT religion widened to embrace all peoples (Isa. 60–66). Emphasis also shifted from the group to the individual (Ezk. 18).

II. Intertestamental Development.–*A. Greek Emphasis.* The most common word for love in Classical Greek is *érōs*, which is sexual love — sensual, impulsive, spontaneous — caused in mythology by the love-god Eros. "The sexual union of gods and men narrated in mythology finds current actualization in the cultus" (Quell, p. 35). From the grosser ideas and practices of eroticism the concept arose in Plato and his successors of a purely contemplative aspiration for the divine (Plato *Symposium*). Indeed, the Platonic concept of *érōs* as the basis of human aspiration for God played an important role in the preparation of the world for Christianity (Nygren). Even the higher Platonic treatment of *érōs*, however, contrasts to love in the Bible, for in the latter God's love pursues humans, while Platonism (and paganism generally) emphasizes the human quest for God.

The derivation of *agápē* is uncertain; it was a colorless word, seldom used by the Greeks, signifying desire for someone or something. *Érōs* denoted satisfaction sought wherever it could be found, but *agápē* was selective. It often denoted the divine love specifically sought by human beings.

B. Influence of the LXX. Those who translated the OT into Greek ignored the common Greek term for love (*érōs*) because of its sensual associations and chose instead the obscure term *agápē* to translate Heb. *'āhaḇ* and its synonyms. *Érōs* passed from the scene as the Judeo-Christian influence became dominant; it appears only once in the LXX (Prov. 7:18), never in the NT, and only once in the early fathers (Ign. Rom. 7:2; cf. Gal. 6:14). In contrast to *érōs* with its inclusiveness, Heb. *'āhaḇ* and its Greek counterpart *agápē* stress exclusiveness, specifically God's love for His chosen people. The LXX uses *agapáō* (more than three hundred occurrences) to translate seventeen different Hebrew synonyms, but by far the greatest number of occurrences render *'āhaḇ* (HR).

Fraternal love (Gk. *philadelphía*) appears in the LXX only six times (2 Macc. 15:14; 4 Macc. 13:21, 23, 26; 14:1; 15:10). In ancient Greek it meant the love of gods for people or the love of people for each other. *Philadelphía* indicated nobility and sense of duty, in contrast to the subjectivistic nature of *érōs*. The noun *phílos* in classical Greek means "friend," "loved one," "favorite (of the gods)," "friend of the king" (sometimes when no affection is intended). The noun *philía* means "love, affection," especially for a spouse.

C. Extrabiblical Jewish Literature. The covenantal aspect of *agápē* is stressed in intertestamental literature as in the OT. God's love for Israel received grateful acknowledgment (Ps. Sol. 18:4). The faithful are assured of God's love and final deliverance from all adversaries (Wisd. 3:9; 4 Macc. 15:2; 16:19). The love for one's neighbor is often emphasized (T. Gad 5:2; Shep. Herm. Sim. 4:7) but lacks the universal scope of divine love found in the NT.

In the hymns of the Dead Sea Scrolls the Qumrân community frequently expressed gratitude for God's covenant love, lovingkindness, and compassion (see 1QH 5, 10, 11, 13). These hymns, like the OT, show little awareness of God's love for the world as a whole but instead emphasize gratitude for God's mercy and grace to the covenant people in contrast to the wicked. The emphasis differs from the OT in being highly personal rather than national, resembling some of the canonical Psalms. The Qumrân hymns, however, like many of the Psalms, anticipate the NT emphasis of God's grace consciously experienced. Unlike the NT, their concern is almost entirely with individual salvation rather than evangelism.

D. Rabbinic Emphasis. Rabbinic literature stresses God's love for humans because they are made in God's image; Israel is loved because of the covenant with the patriarchs. Love for neighbor is limited to one's countrymen. God should be loved for His own sake. The supreme expression of human love for God is being willing to die for one's faith. "By three things is the world sustained," said Simon the Just (*ca.* 220 B.C.), "by the Law, by the [Temple-] service, and by deeds of loving-kindness" (Mish. *Aboth* i.2). The rabbis were confident that the person most certain to inherit the world to come is the one known for disinterested acts of benevolence.

III. In the NT.–A. Vocabulary. The word for erotic love (*érōs*) never appears in the NT and seldom in the church fathers, reflecting the LXX precedent. The noun *phílos* occurs thirty times in the NT (eighteen in Luke-Acts), usually designating a close personal friendship (e.g., Lk. 14:12; Jn. 11:11; Acts 19:31). It is the term used in the expression "friend of the bridegroom" (Jn. 3:29). The disciples are called *philoi* of Jesus (Lk. 12:4; Jn. 15:13-15). Abraham is called "friend of God" (Jas. 2:23; cf. Jn. 8:34-40). In contrast to the LXX, the NT uses *phílos* only once in a political context, the Jews' challenge to Pilate to prove he was a *phílos* of Caesar (Jn. 19:12). In postbiblical Christian writings *phílos* (in contrast to forms of *agápē* and *agapáō*) was used infrequently.

The verb *philéō* occurs in the NT about twenty-five times. It is used for parental love (Mt. 10:37), Jesus' love for Lazarus (Jn. 11:3, 36), the disciples' love for Jesus (21:15-17; 1 Cor. 16:22), God's love for His Son (Jn. 5:50) and for His people (16:27; Rev. 3:19; but never human love for God). Once it is used for the disciple "whom Jesus loved" (Jn. 20:2); otherwise *agapáō* is the verb in this expression (13:23; 19:26; 21:7, 20). As in early Greek literature it also means "to kiss" (Mt. 26:48; Mk. 14:44; Lk. 22:47).

The main NT word for love, *agapáō*, occurs 137 times as a verb and 116 times as a noun. Both noun and verb are usually translated "love" (in the AV 29 times as "charity"). Like its Hebrew equivalent it expresses desire, leading to quest ("they loved the praise of men," Jn. 12:43), or it may mean a discriminating choice, whether of the world ("Demas, in love with this present world," 2 Tim. 4:10), of God ("You shall love the Lord your God," Mt. 22:37), or of men ("Love your enemies," 5:44). The cognate term *agapētós* — occurring 62 times — is usually translated "beloved." Besides frequent use as a designation for the Christian brethren, it also designates the Father's attitude toward the Son (Mt. 12:18; Mk. 1:11; 2 Pet. 1:17) and toward His people (e.g., Rom. 11:28).

B. Synoptic Gospels and Acts. Love, as set forth by Jesus, is the keynote of the new kingdom. It is also the epitome of the OT ethic. The rabbis often discussed how the Torah could be condensed and reduced to its essential elements. When a lawyer asked Him which is the law's great commandment, Jesus responded, "You shall love the Lord your God. . . . and your neighbor as yourself" (Mt. 22:37-40; cf. Lev. 19:18; Dt. 6:5). This obligation to love is really one "law" and the foundation of the entire Torah.

But Jesus went further than the OT. While love in the OT was selective and nationalistic, the Christian "Torah" is supranationalistic: the obligation to love extends not only to one's relatives (the primitive meaning of the term), not only to one's neighbor (the characteristic Hebrew emphasis), but even to one's enemies (Christ's unique contribution). The kinship of this concept with compassion, mercy, or pity, as noted in the word studies, is implicit in the Master's announcement. After stating that God the Father treats His enemies better than they deserve by sending them sunshine and rain (Mt. 5:45), Jesus declared that disciples must love even their enemies. This is more than passive resistance (Mt. 5:38-42); it is the positive reaction of love expressed in deeds (vv. 44-48; cf. Rom. 12:20). Jesus' own example on the cross — His prayer for His executioners (Lk. 23:34) — continued this emphasis. The best test of the revolutionary new ethic is Stephen's praying for his murderers, one of the noblest expressions of divine grace ever recorded (Acts 7:60). Acts shows the new dynamic of Christian love in the community of believers after the effusion of the Holy Spirit at Pentecost (2:42). As H. B. Swete has noted (*The Holy Spirit in the NT* [1910], p. 80), this dynamic fellowship (*koinōnía*) among the believers was a greater miracle than the phenomena of Pentecost. The result of the new release of love and energy was aptly termed a "new race" (A. Harnack). The new impetus to brother-love led to pioneering efforts in social responsibility. Thus gentile converts sent gifts to the poorer brethren in Judea, both as a spontaneous expression of God's love and as a fulfillment of a recognized social obligation (Acts 11:29; cf. Gal. 2:10; Rom. 15:25-27).

C. Pauline Emphasis. As already indicated, Paul, like his Master, placed central emphasis on the manifestation

of God as love. Paul also developed the idea that God's love in giving His Son is the supreme expression of His love for mankind (Rom. 5:8; cf. Mk. 10:45; 2 Cor. 5:14). This supreme demonstration of divine love not only calls for a grateful response (2 Cor. 5:15; Rom. 10:10) but results in the divine love flowing into and through the life of the believer (Rom. 5:5). Although the source of love remains in God, believers become not only its recipients but also the channels by which it affects others. In such love is the law fulfilled, its purpose fully expressed (13:8-10).

Paul singled out love for special emphasis and, by a series of contrasts, raised it to the pinnacle of Christian graces. In addition to placing it first in the list of effects of the Spirit-filled life (Gal. 5:22), he contrasted it to the relatively inferior gifts of the Spirit such as wisdom, prophecy, and tongues (1 Cor. 12–14). After noting the supremacy of love (13:1-4) and before emphasizing its permanence (vv. 8-13) he presented the most effective analysis of its nature found in Scripture (vv. 4-8). He described love (*agápē*) as freedom from jealousy, conceit, ostentation, arrogance, self-centeredness, and resentment; love's characteristics are patience, kindness, truth, righteousness, hope, benevolence, and endurance. It even exceeds in value faith and hope, although usually it is classed with them (v. 13; cf. 1 Thess. 1:3; Gal. 5:6; Col. 1:5f.).

D. Johannine Emphasis. The Gospel and First Epistle of John stress love as much as or more than Paul's Epistles do. John's Gospel contains the "Golden Text of the Bible" — that God loved the world to the extent that He gave up His only Son (3:16) — and a distinctive emphasis on the love of the Father for His Son (3:35; 5:20 [*philéō*]; 10:17). This emphasis on divine love embraces believers: the same love that the Father has for the Son is given also to the disciples (17:26; 1 Jn. 3:1).

No less remarkable is the emphasis on brother-love; it is the supreme badge of discipleship (Jn. 13:35). Without it no one can pretend to be a child of God (1 Jn. 3:14). Divine love means the difference between life and death. It is expressed by word but especially by deed (vv. 17f.; cf. Jas. 2:15). The central thesis of 1 John is that since God is love, this quality characterizes His children, who by faith partake of His nature (4:7; cf. 2 Pet. 1:4).

Although *philéō* and *agapáō* appear to be used interchangeably in several passages (Prov. 8:17, LXX; Jn. 13:23; cf. 20:2; 12:25; cf. 1 Jn. 2:15; Rev. 1:5; cf. 3:19), their meanings are not necessarily identical. For example, *agapáō* never means "to kiss," but *philéō* does (Gen. 27:26, LXX; Mk. 14:44; Lk. 22:47). The Vulgate translates *agapáō* by *diligere,* a love that is discriminating and involves choice, while *philéō* is rendered *amo,* a term that, like *érōs,* means spontaneous affection. *Philéō* is linked with *phílos,* meaning a friend, and is the normal term for expressing friendship (Mt. 10:37). Origen (comm. on Lam. 1:2) concluded, "*Agapáō* is the more divine and, so to speak, the more spiritual meaning, but *philein* is bodily and savours of men" (cited in E. A. Abbott, *Johannine Grammar* [1906], p. 431). Many scholars, however, including J. H. Bernard, J. Moffatt, C. K. Barrett, L. Morris, and G. Stählin, have doubted whether any distinction is intended in such places as Jn. 21:15-17, where Jesus used both terms while questioning Peter about his loyalty. Morris demonstrated convincingly that such variation is a consistent feature of John's style (*Studies in the Fourth Gospel* [1969], pp. 293-319).

E. Related Concepts. 1. In Other Epistles. In the Epistle to the Hebrews hope and faith receive greater emphasis than love. The author, however, commended the readers for their brother-love expressed in deeds (6:10; 10:24; 13:1). James emphasized that the OT law is fulfilled when one shows love to a neighbor (Jas. 2:8; cf. Jesus' statement in Mt. 22:37-40; Paul's in Rom. 13:8) and called believers in God "those who love Him" (1:12; 2:5). Christian love is presented not as a merit to be earned but as a characteristic of the new nature that results from a new birth (1 Pet. 1:23; 2:2; 3:8; 2 Pet. 1:4, 7). Love is said to be the climax of the Christian graces — "above all hold unfailing your love for one another, since love covers a multitude of sins" (1 Pet. 4:8; cf. Prov. 10:12). The relationship of the Christian to the Lord and to other Christians is best expressed in terms of love (1 Pet. 1:8, 22; 2 Pet. 1:7). Christ's love for His church and the believer's love for his Lord are voiced in the book of Revelation (1:5; 3:9, 19), but the emphasis is more upon heroic qualities of loyalty.

2. Charity. The English term "charity" derives from Lat. *caritas.* To translate Gk. *agápē* in the Vulgate Jerome chose *caritas,* which means "affection," "love," "esteem," with a connotation of sacrifice, and *dilectio,* which means "prize," "choice," "love," "high esteem." The difficulty of finding a Latin equivalent of *agápē* and the similarity of these terms explain Jerome's inconsistent usage. In the AV NT "charity" likewise translates *agápē* in twenty-eight of its 116 occurrences. It occurs in English versions prior to 1881 due to the Vulgate's influence; English, like Latin, lacks an exact equivalent of *agápē* as used in the NT. During the past two centuries the term "charity" has changed in meaning to connote benevolence or almsgiving ("bestowing one's goods to feed the poor"), which Paul placed in contrast to *agápē* (1 Cor. 13:3). The other contemporary meaning of tolerance of those with whom one differs also diverges considerably from the original meaning.

Due to the influence of the Vulgate, "charity" appears eighty-two times in the NT of the Douay (Douai) Version, though only thrice in the OT. The revisers wisely decided in 1881 and 1901 to drop this term in favor of "love," a precedent since followed in all English translations. "Charity" occurs only once in the RSV (Acts 9:36) and ten times in the NEB NT, in places where "alms" is the usual translation.

LOVE, BROTHERLY. *See* BROTHERLY LOVE.

LOVE-FEAST. *See* AGAPE.

LOVELY. The RSV translates several Hebrew words and phrases as "lovely." Usually it denotes personal physical beauty; Rachel was *yᵉpaṯ mar'eh,* lit. "beautiful of appearance" (AV "well-formed"; NEB "beautiful"), and Esther was *ṭôḇaṯ mar'eh,* lit. "good of appearance" (AV "beautiful"; NEB "charming"). In a metaphor Prov. 5:19 describes a wife as a "lovely [Heb. *ʾᵃhāḇîm;* AV "loving" is a literal translation] hind." Cant. 1:16 characterizes the beloved as "truly lovely" (Heb. *ʾap nāʿîm*; AV and NEB "pleasant" is more literal), and in the famous description in ch. 4 the woman's mouth (or speech; see the comms.) is lovely (4:3, Heb. *nāʾweh,* which the RSV translates "comely" in 1:5, 10; 2:14; 6:4).

In his lament over Saul and Jonathan David calls them "beloved and lovely" (Heb. *hanneʾᵉhāḇîm wᵉhannᵉʿîmim,* 2 S. 1:23). Although *nāʿîm* hardly seems to apply to Saul, especially in relation to David, it is perhaps natural that

David would remember his amiable times with Saul (1 S. 24:16-19; 26:21-25; cf. KD, *Books of Samuel*, p. 291). The RSV translation is perhaps a little misleading; although Saul is called "handsome" (Heb. *ṭôḇ*) in 1 S. 9:2, the AV "pleasant" or NEB "delightful" seems more appropriate here.

The final OT reference is Ps. 84:1 (MT 2), which describes God's dwelling place (Heb. *miškānôṯ*; the plural form probably refers to the various rooms in the sanctuary [see GKC, § 124b], or it may be a "plural of amplification" [A. A. Anderson, *Psalms 1-72* (*New Century Bible Comms.*, 1972; repr. 1981), p. 336]). This was the central sanctuary at Jerusalem that Solomon had built; it was known for its beauty (1 K. 6–7).

In Phil. 4:8 the hapax legomenon *prosphilḗs* describes one of the things about which Christians ought to think. Although F. W. Beare (*Epistle to the Philippians* [*HNTC*, 1959], p. 148) stated, "Paul here sanctifies, as it were, the generally accepted virtues of pagan morality," R. P. Martin (*Philippians* [*New Century Bible Comms.*, 1976; repr. 1980], p. 158) pointed out that *prosphilḗs* "is absent from contemporary ethical lists." In Sir. 4:7; 20:13 and Josephus *Ant.* i.18.1 (258); xvii.6.2 (149) *prosphilḗs* refers to a person and means simply "beloved."

G. A. L.

LOVER. In the OT "lover" usually renders the Hebrew verb *'āhēḇ* or its participle *'ōhēḇ* (e.g., Ps. 88:18 [MT 19]; 99:4; Lam. 1:2, 19; Ezk. 23:5, 9, 22; Hos. 8:9). This term also often means "friend" (e.g., 1 K. 5:1, JB [AV "lover" in this sense]), which probably should be the rendering in Ps. 88:18 (RSV, AV, NEB, "lover"). Where it is translated "lover" it refers more frequently to objects of religious prostitution; the "lovers" receive Israel's and Judah's misplaced and wanton affection (Jer. 2:33; 22:20, 22; 30:14; Ezk. 16:33, 36f., etc.; Hos. 2:5, 7, etc.). Jeremiah used *rē(a)ʿ*, "friend," "companion," and *'āgaḇ*, "to lust," in the same way; in 3:1 the *rēʿîm* are those false gods after whom Judah chases, and in 4:30 *'ōgᵉḇîm* (pl. part. of *'āgaḇ*) is derisive, denoting adulterous paramours. *See also* HARLOT. The prophet Isaiah condemned the people of Babylon for their love of luxury (*ʿᵃḏînâ*, 47:8). In Cant. 5:1 *dôḏîm*, "lovers" (AV "beloved"), is used in poetic parallelism with "friends" (*rēʿîm*) in an invitation to the marriage feast.

In the NT "lover" occurs only in certain compound words that describe the object of personal affection: *philárgyros*, "lover of money" (AV "covetous," Lk. 16:14; 2 Tim. 3:2; cf. *aphilárgyros*, 1 Tim. 3:3); *philótheos*, "lover of God" (2 Tim. 3:4); *philágathos*, "lover of goodness" (Tit. 1:8; AV "lover of good men"; NEB "right-minded"; cf. *aphilágathos*, 2 Tim. 3:3); *phílautos*, "lover of self" (v. 2; NEB "arrogant"); *philḗdonos*, "lover of pleasure" (v. 4). Cf. also *philóxenos*, "hospitable" (lit. "lover of hospitality," Tit. 1:8).

D. J. KELLY

LOVES [Heb. *yᵉḏîḏôṯ*]. The AV's literal translation of part of the title of Ps. 45 (MT v. 1). Although the form is plural in Hebrew, it may be understood as a singular (GKC, § 124e). Hence the RSV "love song" is quite appropriate; Ps. 45 is generally recognized as an epithalamium or wedding song (see, e.g., C. H. Briggs, comm. on the Psalms, I [*ICC*, 1906], 384, and M. Dahood, *Psalms I* [*AB*, 1965], p. 270).

LOVESICK [Heb. *ʿᵃmulâ*] (Ezk. 16:30); AV WEAK; NEB ANGER. In the MT the clause reads *mâ ʿᵃmulâ libbāṯēḵ*. The LXX, taking *ʿᵃmulâ* as first person singular and *libbāṯēḵ* as *lᵉḇittēḵ*, translates the phrase *tí diathṓ tḗn thygatéra sou*, "how can I dispose of thy daughter?" Similarly, the Syriac version has "why should I judge thy daughter?" Symmachus rendered it *en tíni kathariṓ tḗn kardían sou*, "in what way shall I purify thy heart?" The Targum has "how strong was the wickedness of thy heart." The AV follows the tradition of the last two with the more literal "how weak is thy heart." The NEB reflects the use of the phrase in an Aramaic sense, "full of wrath against you"; the RSV interprets *'āmal*, literally "weak," as "lovesick" in the context of Israel's playing the harlot.

LUCIFER (Isa. 14:12, AV). *See* DAY STAR.

LUCIUS lo͞o'shəs [Gk. *Loukios* < Lat. *Lucius*– 'light, bright', *Leukios*].

1. A Roman CONSUL who, according to 1 Macc. 15:15-24, wrote to Ptolemy VII (145-117 B.C.) of Egypt and other Near Eastern kings notifying them of the Roman senate's support for the Jewish state. Lucius's letter (*ca.* 139 B.C.) reports that the Roman senate had accepted from the Jews a large golden shield and had renewed the alliance made with them in the time of Judas Maccabeus (cf. 8:17-32); it also warns interested parties not to harm or make war upon the Jews, nor to align themselves with the Jews' enemies.

Because only the praenomen of the consul is given, identification of Lucius is difficult. The probability seems to lie with Cnaeus (or Lucius) Calpurnius Piso, who was a consul in 139 B.C. That his praenomen sometimes appears in other sources as Cnaeus rather than Lucius is then explained by an error in transcription. An earlier consul, Lucius Caecilius Metellus, has also been suggested; but since his consulship was in 142 B.C., this proposal requires the theory that 1 Macc. 15:15-24 is out of sequence and actually belongs to ch. 14 (see Goldstein, pp. 493ff.).

Some have questioned the genuineness of the letter on several grounds, including the fact that Josephus seems to have stopped using 1 Maccabees as a historical source after 14:15. In *Ant.* xiv.8.5 (145-48) Josephus includes a document of the Roman senate that refers to a "praetor" (Gk. *stratēgós*, which rarely means "consul"; see LSJ, p. 1652; *TDNT*, VII, 704 n. 19) named Lucius Valerius. The document is strikingly similar to the letter in 1 Macc. 15:16-24, but Josephus assigns it to the time of Hyrcanus II (47 B.C.). The document's fragmentary character makes its source and date somewhat uncertain.

2. A native of Cyrene who ministered with others to the church in Syrian Antioch as a prophet (Acts 13:1).

3. A "kinsman" of Paul on whose behalf the apostle sent a greeting to the church at Rome (Rom. 16:21). Possibly he is to be identified with **2.** Identification with Luke is improbable, since Paul elsewhere did not refer to Luke as Lucius (cf. 2 Tim. 4:11). E. F. H.

LUCRE lo͞o'kər. Monetary gain; used by the AV always in a pejorative sense of dishonest or unjust gain (e.g., 1 S. 8:3, Heb. *beṣaʿ*; RSV "gain"). "Filthy lucre" is used in translating Gk. *aischrós kérdos* (lit. "shameful gain," Tit. 1:11) and the compounds *aischrokerdḗs* (Tit. 1:7; 1 Tim. 3:3, 8) and *aischrokerdṓs* (1 Pet. 5:2). Greed for unjust gain was a serious threat to the early Christian community, and thus it was listed among the vices that made one unfit for the office of bishop or deacon. *See* GAIN; GREED.

LUD lud; **LUDIM** lo͞o'dim [Heb. *lûḏ, lûḏîm, lûḏîyîm* (*K*, 1 Ch. 1:11); Gk. *Loud, Loudieim*]. A people descended from Egypt and named with Put and Cush and once with Persia (Gen. 10:13, 22; 1 Ch. 1:11, 17; Isa. 66:19; Jer. 46:9; Ezk. 27:10; 30:5). Scholars have either equated the Ludim with the Lydians in Asia Minor (cf. Jer. 46:9, AV) or considered them an unidentified people of north Africa near Egypt.

In Gen. 10:13f. Egypt (*Miṣrayim*) is named as the father of "Ludim, Anamim, Lehabim, Naphtuhim, Pathrusim, Casluhim (whence came the Philistines), and Caphtorim" (= 1 Ch. 1:11). Gen. 10:22 lists Lud among the sons of Shem, along with Elam, Asshur, Arpachshad, and Aram (1 Ch. 1:17 lists these and adds the sons of Aram [Gen. 10:23] as sons of Shem). The identifiable names in 10:13 belong to northern Africa and the eastern Mediterranean, and those in v. 22 to the Mesopotamian region. Thus there is already a mixed tradition, which finds support in the population shifts of the Near East throughout much of history.

In Isa. 66:19 Lud is mentioned after Put; after a parenthetical statement Tubal and Javan are named. If Put is taken as a part of Libya (on which there is much disagreement), Lud is again linked with both northern Africa and Asia Minor (Javan is Ionia, the western coastal region of Asia Minor). Jer. 46:9 mentions Lud along with Ethiopia and Put. Ezk. 27:10 associates Persia, Lud, and Put; in 30:5 the grouping is "Ethiopia, and Put, and Lud, and all Arabia, and Libya [Heb. *kûḇ*]." In all three prophets Lud is a warrior people, described as those "who draw the bow" (Isa. 66:19) or who are "skilled in handling the bow" (Jer. 46:9). In his prophecy against Tyre Ezekiel said, "Persia and Lud and Put were in your army as your men of war" (27:10). In Jeremiah Lud is an ally of Egypt.

On biblical evidence alone the problem is seemingly insoluble. A strong case can be made for identifying Lud with Lydia, principally on the linguistic similarity, along with some later participation of Lydians in Egypt as mercenaries (cf. *IDB*, III, 179). An equally strong case can be made for a north African people, chiefly on the basis of the tradition in Gen. 10:13, which has some support in other passages (cf. *GTTOT*, §§ 150f., p. 56; BDB, p. 530). T. G. Pinches (*ISBE* [1929], III, 1935) thought that two peoples had the same name: Semitic Ludim, who lived in Lydia in Asia Minor, and Egyptian Ludim, who cannot be further identified. This solution seems a bit strained, particularly in its identification of the Lydians as a Semitic people. W. S. LASOR

LUHITH lo͞o'hith, **ASCENT OF** [Heb. *maʿᵃlēh hallûḥîṯ*]. A place mentioned in Isaiah's oracle concerning Moab (Isa. 15:5). Its context includes the road to Horonaim and the waters of Nimrim. A similar oracle in Jer. 48:3-5 mentions the descent of Horonaim and Zoar. Since the definite article appears on the word in both passages, Luhith could be other than a place name; a Nabatean inscription found at Medeba contains the name Luḥitu, however. The location is to be sought in Transjordan S of the Arnon, possibly toward the southern end of the Dead Sea. Eusebius (*Onom.* 122.29) identified it with Loueitha; cf. LXX *Loueith*.

See *GTTOT*, § 125b; *GP*, II, 370. W. S. L. S.

LUKE [Gk. *Loukas*]. A sometime traveling companion and co-worker of Paul, traditionally regarded as the author of the Third Gospel and the book of Acts.

I. Associate of Paul.—Luke's name occurs three times in the letters of Paul. Philem. 24 lists him, Mark, and Aristarchus as among Paul's "fellow workers." Col. 4:10-14, presumably written about the same time, mentions this same trio along with Jesus "who is called Justus" and Epaphras; here Luke is given the epithet "the [possibly "my"] beloved physician" and is distinguished from the first three colleagues, who are called "men of the circumcision." 2 Tim. 4:11 finds him as the faithful companion of Paul in Rome, shortly before the apostle's martyrdom.

II. Hypothetical Identifications.—As early as Origen (*ca.* 185-254; *Comm. on Romans*) Luke was identified with the

otherwise unknown Lucius (Gk. *Loukios*), whom Paul referred to as his "kinsman" (Gk. *syngenēs*, "relative" or "fellow countryman") in Rom. 16:21. Ephrem Syrus (*ca.* 306-373; *Comm. on Acts*) suggested that he was Lucius of Cyrene, the Christian prophet and teacher at Antioch (Acts 13:1). Although various modern scholars (e.g., Deissmann [*LAE*, pp. 435-38] and Reicke [pp. 12-16]) have identified Luke with one or both of these men, the most that can be said for these suggestions is that probably the two names are equivalent, Luke being the more familiar form (though some have equated the name Luke with Lucanus or argued that it was originally an Aramaic name totally independent of the Greek Lucius), and that a strong early tradition connects Luke with Antioch (i.e., the so-called anti-Marcionite prologue to Luke, *ca.* 170, and the Western text of Acts 11:28). Ramsay combined the Antiochene tradition with the suggestion that Luke was a member of the tribe of Makedones, who settled in Antioch, and thus gave Luke an additional link with Philippi, a city in which the Evangelist also showed special interest (cf. Acts 16:12). Thus Ramsay (*Luke the Physician* [1908], pp. 35ff.) thought that Luke could be the "man of Macedonia" who appeared to Paul in a vision (Acts 16:9). He further speculated that Luke was also the brother of Titus, which explains the absence of both names from the narrative of Acts. Others have proposed an identification with "the brother who is famous among all the churches for his preaching of the gospel" (2 Cor. 8:18; note that 2 Corinthians was written from Macedonia). All these suggestions are possible, but unprovable.

III. His Ministry and Special Interests.–If the tradition connecting Luke with the Third Gospel and Acts is reliable — and there are very good reasons to think so — one can know more about his life, ministry, and personal interests and convictions as a Christian leader and thinker. His sharing in Paul's missionary endeavor is indicated by the "we" sections of Acts, where the author introduced his presence by the use of the 1st person plural (Acts 16:10-17; 20:5–21:18; 27:1–28:16). The suggestions that the "we" is introduced for dramatic effect (so Haenchen [*Journal for Theology and the Church*, 1 (1965), 65-99] and Conzelmann) or represents an itinerary source (so nineteenth-century German exegetes and, more recently, Dibelius [*passim*] and Trocmé [pp. 121-153]) have proved unconvincing. Luke shared in Paul's missionary work only for a few years (namely, during the initial mission in Greece, *ca.* 57/58; on the voyage as a prisoner to Rome, *ca.* 59/60; and at the time of his final Roman imprisonment 65/66). Luke may have used the period of Paul's imprisonment in Caesarea to collect data for his two-volume account of Christian origins. In the preface to his first volume (Lk. 1:1-4, probably to be understood as the preface to Luke-Acts as a whole), he distinguished himself from the first generation of Christian leaders, who were "from the beginning eyewitnesses and ministers of the word," and identified himself with the recipients of their tradition, though he had been part of the Christian movement for some time and therefore had become well informed (so Cadbury, *et al.*). His writings indicate that he was an educated person, whose Greek was the most literary in the NT (along with that in Hebrews); a church member, profoundly interested in both the mission and unity of the Church; a historian, showing interest in the life and times of Jesus and the early Church and using common techniques of Greco-Roman historiography (thus justifying Dibelius's appellation of "the first Christian historian"); an apologist, seeking to promote the faith by both explaining its main tenets and answering the criticism that the followers of "the Way" menaced imperial law and order; an evangelist, preaching the gospel as he understood Jesus and the early apostles to have preached it; and a theologian, whose version of the story of Jesus and the early Church brought out his own theological concerns. He had a special interest in the poor and down-trodden of the world, prophecy and prophets, women, the ministry of the Holy Spirit, prayer, the relationship between Jews and Gentiles, and the special mission of Paul. He was a physician (according to the witness of Col. 4:14; but, contrary to Hobart, Ramsay, and Harnack, his writings do not evince a special medical vocabulary: see, e.g., H. J. Cadbury, *Style and Literary Method of Luke* [1919-20]).

IV. Jew or Gentile?–Luke may have been a Gentile (cf. Col. 4:11), though some scholars have challenged this view (e.g., Ellis, who argued that "men of the circumcision" referred to a particular type of Jewish Christian, namely, those who strictly observed the rituals of Judaism, followed a Greek life-style and took a more relaxed approach to ritual observance). The chief argument for the view that Luke was a Jewish Christian rather than a gentile Christian is the author's intimate knowledge of the OT. A gentile Christian, however, particularly if he had been a "God-fearer" before his conversion, could have been as interested in the OT and attained as intimate a knowledge of its contents as a Jewish Christian, as subsequent history has demonstrated. Arguments supporting the traditional view, still held by most scholars, that Luke was a Gentile, are that the author of Acts refers to "the Jews" as a group distinct from the early Christians and that Greek elements (as distinct from Roman and Jewish) seem to permeate his writings more than other NT writings (cf. Cadbury, *Book of Acts in History* [1955], ch. 2). For example, Acts 28:2, where Luke speaks of "the foreigners" (Gk. *bárbaroi*) who "showed us extraordinary kindness," is characteristically Greek, as is also his habit of looking at the world in terms of the city rather than other geographical or political units. Although the author possibly was a Hellenistically oriented Jew or proselyte, the Gentile alternative seems at least plausible if not more probable.

V. Author of Luke-Acts?–Some scholars, primarily on the basis of alleged differences between the theologies of Paul and the author of Luke-Acts, have strongly denied that Luke or any other missionary companion of Paul could have written Luke-Acts (e.g., Vielhauer ["On the 'Paulinism' of Acts," in Keck and Martyn, eds., *Studies in Luke-Acts*, pp. 33-50], Haenchen, pp. 112-16, and Conzelmann). In particular, the Paul portrayed in Acts seems to have had a radically different perspective from the Paul known through the Epistles. Paul in Acts stresses the resurrection rather than the cross and sounds strikingly like Peter in the earlier chapters; he also frequents synagogues and keeps Jewish customs. Could this be the Paul who wrote Romans and Galatians? Contemporary critics are divided on the answer. While recognizing that Lukan theology is quite distinct from Pauline — this distinction is the major achievement of more recent scholarship — many believe that the contemporary German scholars' portrayal of the "Paul of the Epistles" is influenced more by the writings of Martin Luther and F. C. Baur than by balanced exegesis of Paul's letters. Luke was not an intimate associate of Paul over a long period of time, and even if he had been, perhaps, as Harnack quipped many years ago, Paul allowed more diversity of opinion among his followers than some professors of theology allow among theirs! Thus most contemporary scholars do not regard the obvious differences between the theology of Luke-Acts and that of Paul as ruling out the traditional Lukan authorship. If Luke did not write the Third Gospel and Acts, it is difficult to explain how the tradition connecting his name with these documents ever arose, since he is otherwise an insignificant figure in the early Church.

I. Background of the Research.–*A. Early Tradition. 1. Author.* The author of the Third Gospel is first mentioned in the latter half of the 2nd century. In *ca.* 180 Irenaeus (*Adv. haer.* iii.1.1; 3.3; 14.1) attributed the Gospel to Luke the physician and "follower" of Paul. Somewhat earlier, perhaps, is the similar witness of the Muratorian Canon. The "anti-Marcionite" prologue to the Gospel gives a more detailed description. At least in its earliest form this prologue may also have originated during the late 2nd cent. (cf. Ellis, *Gospel of Luke*, p. 41).

The Gospel of the heretic Marcion, dating from *ca.* 150, also indirectly supports Lukan authorship. As reconstructed from quotations and detailed references in Tertullian and Epiphanius, it represents an abbreviated form of Luke (so Harnack, *TU*, 45 [1921], 231; see I.B.2 below).

The title "according to Luke" appears in the best MSS of the Gospel. The Church created it to distinguish Luke from other known Gospels. The presence of similar titles on the Gnostic Gospels "according to" (*katá*) Philip and Thomas suggests that the practice goes back at least to the middle of the 2nd century.

The name of Luke, however, probably was attached to the Gospel at the beginning. In the ancient Orient, a book was identified by title. "The most significant contribution which the Greeks made to [book] cataloging was the use of the author of a work for its entry" (R. F. Strout, *Toward a Better Cataloguing Code* [1956], p. 7). "If the *titulus* was lacking, the roll would be tagged with the name of the author when it was placed in a library, for after going to the general subject . . . [the reader] was accustomed to look next for the author — title was secondary" (*ibid.*). Private libraries had become very common among the rich, and a copy of Luke's volumes, properly tagged, was in all likelihood placed in the library of his patron, Theophilus. (Cf. M. Hadas, *Ancilla to Classical Reading* [1954], p. 25; Seneca *De tranquillitate animi* 9.4ff.; Suetonius *De gram.* 6; Aurelius *Ad Frontonem* 4.5.)

2. Authority. The authority of the Gospel, i.e., its canonical status in (many areas of) the Church, is explicitly affirmed from the time of Irenaeus. Indirectly, it may be traced back to the first half of the 2nd century. (1) Marcion (or his teacher Cerdo) used Luke in constructing his own "Gospel" (see above). (2) Before 140 it probably was cited as Scripture in 2 Clem. 13:4 ("says God") and, a little later, alluded to by the Gospel of Truth (33:15) and the Gospel of Philip (126:7). (3) About mid-century Justin used the Gospel or a harmony based on it (cf. *Apol.* i.34.2; *Dial.* 51.3; 76.6; Lk. 2:2; 16:16; 10:19; 2:1-5; B. F. Westcott, *Canon of the NT* [1881], pp. 100-173). (4) Valentinus derived his chronology from it (Irenaeus *Adv. haer.* ii.22.4; Lk. 3:23; cf. 4:19; cf. J. B. Lightfoot, *Biblical Essays* [1904], pp. 56f.), and his disciple Heracleon apparently wrote a commentary on it (Clement *Misc.* iv.9). (5) It is a part of the second-century tradition of the "fourfold" Gospel (see 3 below).

Apparently the status accorded to the Gospel had a twofold basis: the association of Luke with Paul's apostolic authority, and the conviction that Luke himself was a prophet. Irenaeus, Tertullian (*Adv. Marc.* iv.5), and perhaps even Justin Martyr (*Dial.* 103.8) pointed to Luke's relation to Paul. Like the Muratorian Canon and the prologue mentioned above, however, Origen (*Homily on Luke 1*) included Luke among Evangelists who "wrote from the Holy Spirit" (cf. Ellis, *Gospel of Luke*, pp. 38-41).

3. Relationship to Other Gospels. The relationship of Luke and the other Gospels is mentioned most frequently in connection with their chronological sequence. According to Eusebius (*HE* vi.14.5ff.), Clement believed that the Gospels containing genealogies, i.e., Matthew and Luke, were written first. Tertullian (*Adv. Marc.* iv.2) placed Luke and Mark after John and Matthew. Although there are other such variations, most of the canonical lists and other statements refer to the Gospels in the order in which they now appear in the NT.

B. Beginnings of Modern Research. In the post-Reformation period, the historical analysis of biblical writings raised again the patristic issues and initiated new questions. Before the end of the 17th cent., R. Simon concluded that Luke's title, like those of the other Gospels, was not

Vellum Vulgate of the illuminated Lindisfarne Gospels (*ca.* A.D. 700) showing the end of the index of contents that precedes Luke's Gospel. The Anglo-Saxon interlinear glosses were added by Aldred in the 10th cent. (Trustees of the British Museum)

original (cf. Kümmel, *Problems,* p. 44). A century later J. D. Michaelis (*Intro. to the NT* [Eng. tr. 1793-1801], I, 87-97) questioned Luke's inspired authority and canonical status since it, like Mark, was not written by an apostle. Going further, his pupil J. G. Eichhorn (cited in Kümmel, *Problems,* p. 88; cf. S. Davidson, *Intro. to the NT* [1848-51], I, 184f.) rejected the second-century view that Luke wrote under Paul's oversight as a mistaken inference designed to place the Gospel under an apostolic umbrella. These departures from the tradition were not in themselves critical of the historical accuracy or authenticity of the Gospel, nor was Lukan authorship seriously questioned.

A challenge to Lukan authorship was implicit, however, in J. S. Semler's suggestion (in 1776) that both Luke and Marcion's Gospel were offshoots of a common original. J. G. Eichhorn (*Einleitung in das NT* [5 vols., 1804-1827], I, 43-84) and others virtually regarded the Marcionite Gospel as the original Gospel of Luke (cf. J. Knox, *Marcion and the NT* [1942], p. 78).

This novel hypothesis, which turned the patristic testimony upside down, rested on rather slight historical evidence: (1) some readings in the Marcionite Gospel were more primitive than Tertullian's canonical text; and (2) the earliest second-century citations of Luke may have been from the "original" Gospel. Scholars generally rejected the hypothesis (cf. F. Bleek, *Intro. to the NT* [Eng. tr. 1873-74], I, 143-45; Davidson, I, 202f.). It gained new support, however, from F. C. Baur (*Evangelien,* p. 424), who found it congenial to his views of early Christian history. J. Knox (cf. p. 139) revived it with variations in the present century but had little success. The early witness to the fourfold Gospel, the tendentious character of Marcion's Gospel, the stylistic unity of Luke-Acts, and the lack of telltale marks of a second-century composition have confirmed the priority of the canonical Gospel in the minds of almost all contemporary students.

In this period the relationships of what now were termed the "Synoptic" Gospels, particularly their origin and sequence, were intensively investigated. Scholars maintained the Augustinian view of the literary interdependence of the Gospels but suggested various opinions as to their chronological order (cf. Marsh, pp. 5-18). Most influential, perhaps, was the sequence advocated by H. Owen and, in more detail, by J. J. Griesbach: Matthew, Luke, Mark. G. E. Lessing ("New Hypothesis Concerning the Evangelists Considered as merely Human Historians," in H. Chadwick, ed., *Theological Writings* [Eng. tr. 1956], pp. 65-81) suggested that the Gospels were independently derived from an original Aramaic Gospel written in narrative form, were based on apostolic tradition, and were developed in variant recensions (cf. Farmer, pp. 3-11; Kümmel, *Problems,* pp. 74-79).

H. Marsh (pp. 196-211), following the suggestion of Lessing (in *Theological Writings,* p. 77 § 45), argued that the title of this Gospel actually appeared in the preface of Luke (1:1f.): "A narrative of the things that have been fulfilled among us just as they, who from the beginning were eyewitnesses and ministers of the Word, delivered to us." Elaborating the views of Michaelis and Eichhorn, he suggested further that this "narrative of *facts*" (א) formed the basis of (Aramaic) Matthew, Luke, and Mark and was supplemented by "a *collection of precepts, parables, and discourses*" (ב) that was used, in different copies, "only by St. Matthew and St. Luke" (p. 202). In distinguishing a "narrative" and a "sayings" document and in combining theories of literary interdependence (of Greek Matthew on Mark and Luke) with theories of precanonical written sources, Marsh contributed to later research more than has usually been recognized.

Both J. G. Herder (pp. 174ff., 210-232) and B. F. Westcott much later (*Intro. to the Study of the Gospels* [1860], pp. 165-212) rejected written sources, posited an original oral Gospel reflecting the apostolic preaching and containing narratives and teachings, and gave to Mark chronological priority — Mark, Luke, Greek Matthew. Herder (pp. 174-77) anticipated later research and issues of contemporary debate in a number of ways. (1) Rejecting the hypothesis that the oldest Gospel arose out of hearsay, he identified the locus of the tradition's transmission as a school (cf. B. Gerhardsson, *Memory and MS* [1961], pp. 324-335). (2) He connected the writing of Gospels with the baptismal instruction of converts (cf. Schürmann, I, 383). (3) He advocated the priority of Mark and thus of the *narrative* Gospel-form and recognized a two-document source for Luke and Greek Matthew. (4) He anticipated the problems of form criticism and of the historical Jesus, i.e., that in the Gospels one must look for the work and teaching of Jesus (Kümmel, *Problems,* pp. 82f.). (5) He posited an oral narrative delivered by the apostles to "ministers of the Word" who put it into written form (cf. G. Klein, "Lukas 1,1-4 als theologisches Programm," in E. Dinkler, ed., *Zeit und Geschichte* [1964], pp. 200, 205; contra Haenchen, pp. 126f.).

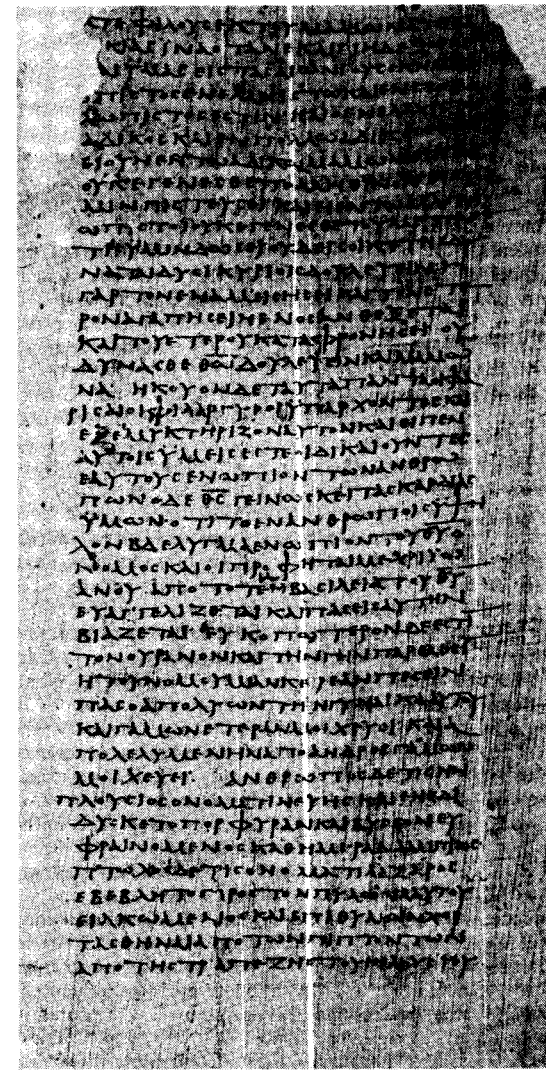
Like Marsh, F. Schleiermacher (pp. 366-69, 382ff.) also postulated a "sayings" document and a collection of "words and deeds of Christ" (p. 387), identifying them respectively with Papias's Matthaean *logia* and his "Mark" (Eusebius *HE* iii.39.15f.). K. Lachmann and others developed this idea into the two-document hypothesis, which became the dominant theory explaining the relationship of the Synoptic Gospels (cf. Kümmel, *Problems,* pp. 146-155; S. Neill, *Interpretation of the NT* [1964], pp. 108-112; Farmer, pp. 22-25, 36-47).

F. C. Baur, influenced by the dialectical process theory of G. W. F. Hegel, reconstructed the history of early Christianity in terms of its postulates. Earliest Jewish Christianity (Hegel's "thesis"), with its continuing commitment to the Mosaic rituals, encountered an "antithesis" in Paul's emphasis on freedom from the law and salvation through faith. The "tendency" of later Christianity was to achieve a compromise between the conflicting attitudes (e.g., Baur, *Church History,* I, 99-116, 180-83).

For Baur the book of Acts represents such a compromise or "synthesis" and cannot, therefore, be the work of Luke the companion of Paul, "at least in the form . . . in which we possess the work" (*Paul,* I, 12). To support this, Baur argued (*ibid.,* I, 103f., 129-137) that the presentation of the death of Christ (Acts 13:26-41), the philosophical ideas of the Areopagus speech (ch. 17), and the general attitude toward the law conflicted with the Paul of the letters. Like Acts, the canonical Luke (and Mark) shows the same conciliating "tendency" (Baur, *Markus,* pp. 211-226). Only Matthew, reflecting Jewish (i.e., Judaizing) Christianity, is relatively free from it. Baur's dialectical approach led him, therefore, to support the view that Luke represents a second-century reaction to Marcion and to champion the order of the Gospels given by Griesbach and earlier by Clement of Alexandria: Matthew, Luke, Mark, John (so also Farmer, p. 200).

Baur made a decisive impact on NT — and especially Lukan — studies. (1) By tying literary-historical analysis to an imaginative philosophical framework, he initiated a new and comprehensive approach, which still has appeal, to the reconstruction of early Christian history (see IV.C below; cf. Haenchen, p. 17). (2) With both good and ill effect his dialectic laid the foundation of later "tendency criticism" and of "adversary theology," i.e., the interpretation of a document or an age in terms of the (supposed)

opposition that it addresses (see II.D below). (3) He made the first consistent effort to explain the origin and development of Christianity in accordance with principles of historical criticism.



Nevertheless, Baur's views reflected an unjustified skepticism toward the patristic testimony and weighted the historical probabilities in the interest of a largely theoretical reconstruction of Christian origins. Also, there is truth in the charge that Baur was more a systematic theologian (*Systematiker*) than a critical historian (E. Barnikol, *F. C. Baur als rationalistisch-kirchlicher Theologe* [1970], pp. 38f.). For his reconstruction of early Christian history was decisively shaped by his a priori acceptance of Hegelian dialectic and philosophical rationalism. Thus Baur, like nineteenth-century "scientific historians" generally (cf. J. S. Lawton, *Miracles and Revelation* [1959], pp. 93-105), considered "miraculous claims clearly *incompatible* with historical considerations" (P. C. Hodgson, *Formation of Historical Theology* [1966], p. 192; cf. Baur, *Church History*, I, 1f.). Viewing historical reality as a closed continuum of natural causes and effects, Baur, like R. Bultmann (e.g., in *Kerygma and Myth*, ed. H. W. Bartsch [1960], p. 7) in the 20th cent., axiomatically excluded miracle from historical inquiry (cf. A. Richardson, *History, Sacred and Profane* [1947], p. 121). Baur's world view allowed him to give only psychological or mythological explanations of reported miracles, e.g., Paul's conversion (cf. *Paul*, I, 55-77). He freed NT exegesis from the domination of traditional dogma only to make it the servant of contemporary philosophy. Although his historical reconstructions did not last, the philosophical commitments he popularized significantly influence current NT studies (cf. Ellis, "Gospels Criticism"; B. Rigaux, *St. Paul and His Letters* [1966], pp. 10-16).

II. Trends in the 20th Century.–Lukan studies from the later 19th cent. until the present largely follow trends set by earlier scholarship. Some of these earlier issues remain in the forefront of contemporary discussion; some have moved toward a consensus or have quietly been left to die. In the last category is the short-lived hypothesis that Luke used Josephus (cf. Zahn, III, 94-100).

A. Literary Style. Since the stylistic analysis of J. C. Hawkins (*Horae Synopticae* [1909], pp. 174-193) and others, there has been a virtual consensus that Luke-Acts is a literary unity. Luke's style, rightly described as that of "a gentleman of ability and breadth of interest," is characterized by sensitivity and variety (cf. Cadbury, *Making*, pp. 213-238). Generally written in a more polished Greek than Mark, it at times removes Mark's Hebraisms (cf. Mark 11:9; 14:36) or substitutes Greek equivalents (Lk. 3:12; 6:15; 23:33). But some Hebraic idioms, e.g., "it came to pass that," are common in Luke; several (L) sections seem to reflect Semitic sources: Lk. 1:5–2:40; 5:1-11; 7:11-17, 36-50; 8:1-3; 9:51-56; 11:27f.; 13:10-17; 14:1-6; 17:11-19; 19:1-10; 23:50–24:53 (E. Schweizer, *TZ*, 6 [1950], 183). Less probable is the view, e.g., of H. J. Cadbury, that such idioms represent a Lukan imitation of LXX Greek (cf. Ellis, *Gospel of Luke*, pp. 3, 28).

B. Text. In the last century studies in textual criticism called attention to the variations between the Western and Alexandrian textual families. To solve the problem, F. Blass (pp. 138-164; cf. Zahn, III, 8-25) developed the thesis that Luke wrote the Gospel first in Palestine at the time of Paul's Caesarean imprisonment and issued a second, "Western" draft later from Rome. His thesis was not generally accepted, although a Caesarean origin may be reconsidered if the Qumrân fragment 7Q5 (? = Mk. 6:52f.) does, in fact, prove that Mark's Gospel was then present in Palestine. But this identification of the fragment appears

LUKE, GOSPEL ACCORDING TO

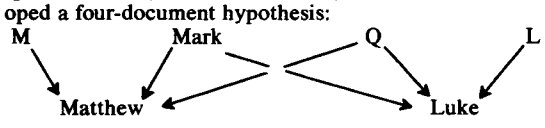
Luke 16:9-21 in Bodmer Papyrus XIV, the earliest known copy of Luke's Gospel (p^{75}; ca. A.D. 175-225) (Bodmer Library, Geneva)

doubtful. The solution of Westcott and Hort, that only the "non-interpolations" in the Western text are original, also is unsatisfactory. Today the evaluation of the individual reading rather than of its family plays a more decisive role in determining the original text of Luke. Among the important variants the following passages have Western readings absent or different from the Alexandrian text: Lk. 3:22; 6:5; 9:55; 11:2-4; 22:43f. The following have Alexandrian readings absent from the Western text: Lk. 14:5; 20:36; 22:19f.; 24:51f.

C. History and Theology. The Evangelist's secular-historical and geographical notices express not only his literary technique but also his concern to relate the history of Jesus and the Church to general history. Synchronisms with world history occur at Lk. 2:1f.; 3:1f., and similar geographical notices appear to be a regular feature in Luke-Acts: "Capernaum, a city of Galilee," "Emmaus, about seven miles from Jerusalem," "Perga in Pamphylia," "Antioch by Pisidia," "Phoenix, a harbor of Crete looking northeast and southeast," "Manaen, a member of the

court of Herod, the tetrarch" (cf. Cadbury, *Making*, pp. 239-253). Note also the suitably vague *hēgemonías* (Lk. 3:1) referring to an office whose precise title varied during the 1st cent.: an inscription found in Caesarea in 1961 (*L'Année epigraphique* [1963], p. 26, no. 104) reads, "[PON]TIUS PILATUS [PRAE]FECTUS JUDAE[AE]" (*see* picture in CAESAREA).

The remarkable accuracy of such references, confirmed by his own observations and archeological finds in Asia Minor, caused W. M. Ramsay (cf. *Pauline and Other Studies* [1906], pp. 199f.) to withdraw his earlier sympathy for the reconstructions of F. C. Baur and to become a convinced advocate of Luke's historical reliability. Contemporary Roman historians have concurred (cf. A. N. Sherwin-White, *Roman Society and Roman Law in the NT* [1963], pp. 188f.). Ramsay (*SPT*, p. 20), however, recognized that Luke "could not stand with the same confidence on the soil of Syria and Palestine as on that of Asia and Greece." H. Conzelmann (pp. 18-94; cf. Ellis, *Gospel of Luke*, p. 209; see III.B below) pursued this question further. The judgment of Ramsay and, e.g., E. Meyer (*Ursprung und Anfänge des Christentums* [1921-23], I, 2f.; III, 167f.) brought a renewed emphasis on "Luke the historian" (cf. H. J. Cadbury in *BC*, II, 7-29; IV, 405-407; Bruce, pp. 15-18).



But scholars began to realize that they could not ignore the theological character of Luke. In contrast to a popular nineteenth-century view, "historian" meant more than Schleiermacher's "collector and arranger." M. Dibelius (pp. 123-185) contributed importantly to this trend: Luke is "an historian who expounds the meaning of an event by striking description; we see him also in his capacity as *herald* and *evangelist*, a role which he fulfills completely in his first book and wishes ultimately to fulfil also in Acts" (pp. 134f.). Dibelius may at times have drawn too sharp a dichotomy between history and interpretation in Luke, as subsequent writers certainly did. For, in the words of C. K. Barrett (pp. 39f.), "Luke was well equipped to write history, and the form his history took arose not out of his imagination but out of the historical event itself." Within this context Luke's conscious interpretative orientation and his subordination of other interests to his theological concerns do not in themselves detract from his reputation as a historian (cf. Stonehouse, p. 67; Marshall, *Luke: Historian and Theologian*, pp. 18-20). But these factors increasingly led researchers to consider "Luke the theologian" and tempted them to fall back into the "tendency" interpretation of the Baur School (see IV.C below; J. Rohde, *Rediscovering the Teaching of the Evangelists* [1968], pp. 153-239). All in all, the resulting "composition criticism" has fostered a new appreciation for the contribution of the Gospel of Luke to the theology of the NT.

D. Purpose. Some scholars have identified the Lukan writings as an apologetic intended to defend Christianity before Roman officialdom (e.g., H. Sahlin, *Der Messias und das Gottesvolk* [1945], pp. 44ff.) or to present its claims to the Roman public (e.g., Streeter, p. 535; Bruce, pp. 30f.; O'Neill, pp. 180-83). Others have thought that Luke meant to confirm believers in their faith (cf. Lk. 1:3f.) by writing a careful history of Christian origins (Plummer, p. xxxvi) within the context of a "salvation" motif (Marshall, *Luke: Historian and Theologian*, p. 9) or by offering (in the Gospel) an extensive post-baptismal instruction for Christian converts (Schürmann, I, 179-183, 258f.). Somewhat similar is E. Haenchen's (pp. 100-103) view: Luke intended to show the continuity of the mission to the Gentiles, carried out apart from the law, with the salvation history of Israel. A third group of scholars has seen Luke-Acts as an expression of "adversary theology": Luke wrote to counter gnosticizing influences in the Church (C. H. Talbert, *Luke and the Gnostics* [1966]) or to respond to attacks of Judaizers on Paul (Trocmé, p. 67).

The content and emphases in Luke-Acts show that its message was directed primarily to the Church and to issues important for the Church. Within this context probably no exclusive purpose should be singled out, but at least three significant motifs may be discerned. (1) Luke emphasized Jesus' virgin conception and physical resurrection (Lk. 1:35; 3:23; 24:39) and the identity of the suffering Jesus with the ascended/returning Christ (9:51; 24:26; Acts 1:11) apparently to counter docetic/gnosticizing aberrations in the Church (cf. Schürmann, I, 11, 259; C. H. Talbert, *NTS*, 14 [1967-68], 259-271). (2) The "delay" motif in Luke's eschatology (e.g., Lk. 17:22-25; 19:11; 21:8f.; 20:24; Acts 1:7f.) probably is a calculated response to those who view the kingdom of God solely in terms of an immediate (and/or secret) return of Jesus. (3) The most pervasive theme, which echoes the concern of Paul in Rom. 9–11, is the problem of the Jewish rejection of the Messiah (e.g., Lk. 2:34f.; 4:16-30; Acts 28:25-28). Luke approached each of these matters in terms of the instruction of believers, rather than of direct apologetic, and within the framework of a comprehensive theology of salvation history. (Cf. Conzelmann; O. Cullmann, *Salvation in History* [1967], pp. 239-268; Ellis, *Gospel of Luke*, pp. 58f.; P. Borgen, *CBQ*, 31 [1969], 168-182.)

E. Date of Composition. The last two motifs apparently reflect a time of apocalyptic fever and of crisis in the relationship of Judaism and the Church. Luke's sixfold repetition of Jesus' judgments against Jerusalem (11:49-52; 13:1-9, 34f.; 19:41-44; 21:20-24; 23:28-31; cf. 20:16) and simultaneous stress on the Church's abiding relationship to that city (2:38; 9:31; 20:24; 24:47; Acts 1:8) support this view. These and other factors suggest a date for Luke-Acts of *ca.* 70 (cf. T. W. Manson, *Studies in the Gospels and Epistles* [1962], p. 67), although such concerns may have arisen in 60-65 (A. Harnack, *Date of the Acts and of the Synoptic Gospels* [1911], pp. 116-125; Bruce, pp. 10-14; cf. Blass, pp. 33f.) or 70-90 (Kümmel, *Intro.*, pp. 150f.). But see Ellis, *Gospel of Luke*, pp. 55-58. In fact, Luke-Acts depicts Christianity as a sect within Judaism, a situation that changed drastically with the Neronian persecution in 65-68, and displays no knowledge of any events after the mid to late 60's, neither the deaths of James or Peter or (perhaps) of Paul nor the fall of Jerusalem, which is described (Lk. 21:20-24) "*entirely* from the language of the Old Testament" and in some respects at odds with the A.D. 70 destruction (C. H. Dodd, "The Fall of Jerusalem and 'The Abomination of Desolation,'" in *More NT Studies* [1968], p. 79). Second-century dates suggested by J. C. O'Neill (pp. 17-21) and A. Loisy (*L'Évangile selon Luc* [1924], pp. 44-63) have little to commend them (cf. V. Taylor, *NT Essays* [1970], pp. 72-82).

***III. Formation and Structure.**–A. Sources. 1. Two-Document Hypothesis.* In the present century the two-document hypothesis, popularized in Germany by H. J. Holtzmann (see I.B above), became dominant in British and American scholarship as well. It postulated that Matthew and Luke depended on two primary documents, Mark and Q, the latter inferred from non-Markan passages common to Matthew and Luke. B. H. Streeter (pp. 223-270) proposed special Lukan (L) and Matthaean (M) sources and developed a four-document hypothesis:

This reconstruction, however, has not settled the matter. (1) A number of scholars have raised important objections to the priority of Mark (cf. Farmer, pp. 118-176), and at least one writer (R. L. Lindsey, *A Hebrew Translation of the Gospel of Mark* [1969], pp. 12-31) has argued, partly on the basis of Luke's Hebraic idioms and word structure, that the Third Gospel is the earliest. (2) With due respect to Kümmel (*Intro.*, pp. 63-76), neither the common sequence in Mark and Luke of *some* Q episodes nor any other criterion has demonstrated that Q is one document.

But some scholars, e.g., A. Farrer ("On Dispensing with Q," in D. E. Nineham, ed., *Studies in the Gospels*, [1955]), who favor in Q passages a simple dependence of Luke on Matthew, also cannot be followed. Several considerations require a hypothesis that Luke used, in non-Markan passages paralleled in Matthew, a source or sources on which Matthew also depended (further, cf. Kümmel, *Intro.*, pp. 64-67). (1) A few non-Matthaean settings (e.g., Lk. 11:1) and textual variations (e.g., 7:1; 11:49) do not appear to be Lukan editorial. (2) Some repetitious phraseology (e.g., 7:19f.; 11:47f.), an un-Lukan characteristic (cf. Cadbury, *Style*, pp. 83ff.), also is not in Matthew. (3) Some Matthaean sayings presuppose a non-Markan source that appears in Luke (e.g., 12:38, *phylakē*; cf. Mt. 24:43). Probably Q is best understood as several independent tracts existing in varied textual forms on which Matthew and Luke drew (so W. L. Knox, *Sources of the Synoptic Gospels*, II [1957], 4f., 45-47; cf. Ellis, *Gospel of Luke*, pp. 21-24).

2. Proto-Luke. Posing a more fundamental alteration in the two-document hypothesis, B. H. Streeter (pp. 201-222; cf. P. Feine, *Eine vorkanonische Überlieferung des Lukas* [1891], pp. 124f.) and others suggested that Q + L (less Lk. 1–2) were joined to form a "proto-Luke" into which Markan material was inserted. This theory encounters a number of objections. (1) There is no evidence for the contention of F. Rehkopf (*Die lukanische Sonderquelle* [1959], pp. 86-90) and V. Taylor (*Behind the Third Gospel* [1926], pp. 68f., 172f.) that these Lukan passages were once a unified document. (2) The non-Markan sections of Luke presuppose the context and order of the canonical Gospel and are better understood as separate pieces that Luke fitted to his present format (cf. Conzelmann, pp. 32f., 60f.). (3) The presence in Luke of Markan "blocks" and the development of the central division of Luke on the structure of the journey in Mk. 10 indicate that Mark provided the scaffold or "form" into which Q and L materials were incorporated. But Luke also omitted parts of Mark and enriched his Markan passages with parallel materials from other sources (cf. T. Schramm, *Der Markus Stoff bei Lukas* [1971], pp. 185f.); i.e., the Evangelist subordinated Mark no less than the Q and L traditions to his own purposes.

3. Classification of Q and L Elements. Many scholars have attempted to classify elements of the Q and L materials used in Luke. The Mary/Martha stories, the Satanic possession of Judas, the prominence given to Samaria, and other items found only in Luke and John suggest a source or sources common to these two Gospels (cf. J. Schniewind, *Die Parallelperikopen bei Lukas und Johannes* [1914]). A number of episodes contain a similar "Hebraizing" style (see II.A above). Others may reflect a special Lukan (L) Passion narrative and a Jerusalem source incorporating prophetic oracles on a given theme (e.g., Lk. 11:49–51; 13:34f.; 21:20-24). As is the case for Q, however, the unity of those segments of tradition has not been established. Perhaps the sixfold cycle of prophecies and visions in 1:5–2:40 makes the strongest case for derivation from one document — at least the visions, which present a similar and non-Lukan structure (cf. Ellis, *Gospel of Luke*, p. 65). Luke's use of his sources shows that no one of them is the foundation of his Gospel. All are building blocks quarried and shaped to fit an edifice that is, in its specific form and content, Luke's own creative achievement.

B. Structure and Theme. According to H. Schürmann (I, 258f.) Mark originated the Gospel pattern by placing traditions about "the way of Jesus" between two pre-Markan traditions, a "narrative of beginnings" and a "Passion narrative." To this pattern Luke prefixed a "narrative of origins" (Lk. 1–2). Schürmann's view accords with the general division of Luke's Gospel into four sections reflecting both a chronological and a geographical sequence: (1) the Jerusalem infancy narratives (1–2), (2) the Galilean mission (3:1–9:50), (3) the journey to Jerusalem (9:51–19:44), and (4) the Jerusalem ministry, death, and resurrection of Jesus (19:45–24:53).

The transition points in the theme and sources further define the structure. An initial source (Lk. 1:5–2:40) precedes six non-Markan "witnesses to Messiah" (2:41–4:30), including the baptism (3:21f.), which Luke treats independently by placing it after the Baptist's witness (3:20). Mark is the basis of the following six stories (except one: 5:1-11) illustrating "the authority of Messiah" over various areas of life (4:31–6:11), and of the final twelve "messianic acts" of the Galilean mission (8:1–9:50). Inserted between these sections are six non-Markan episodes that emphasize certain "characteristics of the messianic kingdom" (6:12–7:50). The structure develops the theme; throughout and within the individual episodes the acts of the Messiah implicitly direct the reader to His teachings.

A journey provides the framework for the central division (e.g., 13:22; 17:11), although actual movement toward Jerusalem, begun in 9:51f., resumes only with the return to the Markan episodes at 18:15. The division's primary concern is not geography but "the teaching of Messiah" (cf. Ellis, *Gospel of Luke*, pp. 146-49). It oscillates between the instruction of disciples and discussion with opponents and culminates in the movement via Jericho to Jerusalem (18:15–19:44).

The concluding division, "the consummation of Messiah's mission" (19:45–24:53), uses Mark only in a few episodes and then only in a supplementary fashion. Characteristically the structure serves a thematic interest: "Messiah and the temple" (19:45–21:38) and "the meaning of Messiah's death" (22:1–23:25). The last six episodes set forth "the glorification of Messiah" (23:26–24:53) in terms of the fulfillment of prophecy, the theme with which Luke's story began (cf. P. Schubert, in W. Eltester, ed., *Neutestamentliche Studien für Rudolf Bultmann* [1954], pp. 178f.).

C. Special Lukan Interests. Luke's emphasis on particular themes and editorial alteration, supplementation, and arrangement of material display his special theological concerns. Among them is the role of the Holy Spirit, which he stressed more than the other Evangelists. By the Spirit Jesus was conceived (Lk. 1:35) and confirmed (3:22), proclaimed His message (4:14; 10:21), and healed (4:10; 11:20; cf. 5:17). After His resurrection He mediated the Spirit to His followers (3:16; 24:49; cf. Acts 2:33). Similarly, contemporary prophecy is prominent in the Infancy narratives. The Holy Spirit is none other than the OT "Spirit of the Lord" (cf. 4:18). But He appears now in a new role, which brings into being the new creation, the kingdom of God (11:13, 20; cf. 9:27).

The kingdom of God is, of course, a central motif in all the Synoptic Gospels, but Luke distinctively underscores and develops it. Unlike Matthew (3:2), Luke began the proclamation of the kingdom with the mission of Jesus

LUKE, GOSPEL ACCORDING TO

(4:43). In accord with Jesus' teaching Luke presented the kingdom of God as both a future and a present reality (11:2, 20) but tended to set the two aspects in explicit contrast (16:16, 19-31; 17:21, 22-37; cf. 3:16f.; 9:26f.; 23:42f.). These practices show an affinity with the Gospel of John (Jn 5:25, 28f.; 6:54; 11:24f.; 14:3, 18; cf. Maddox, pp. 100-157, 182f.).

Luke defined the ministry of Jesus not only in connection with the Spirit and the kingdom but also in connection with Jerusalem. He began and ended his Gospel in the Holy City: the Infancy narratives are written from the perspective of "the redemption of Jerusalem" (Lk. 2:38), and all of the resurrection appearances in ch. 24 are located there. Jesus "set his face to go to Jerusalem" (9:51), for it was not fitting for Him to meet His death elsewhere (13:33). Consequently, as a judgment motif, Luke more than any other Gospel draws attention to prophecies of the destruction of Jerusalem (those in 13:1-9; 19:41-44; 23:28-31 occur only in Luke).

The importance of the temple in Luke's presentation (1:13; 2:27, 49; 4:9; 21:6; Acts 6:13f.) is also related to the theological significance of Jerusalem. Our Lord's act of judgment in cleansing the temple (19:47) was the prelude to His ejection as the "rejected stone" (20:17). Jesus would become the "cornerstone" not of the temple in Jerusalem but of a new temple of God "not made with hands" (Acts 7:48). With such traditional imagery Luke made clear that the locus of God's presence and the identification of God's people no longer were to be found in the house or city of national Judaism.

IV. Authorship.–A. Case for Lukan Authorship. Scholars in the early 20th cent. reaffirmed Lukan authorship — even those who, like Harnack and Dibelius, found important historical and theological differences between the Paul of Acts and the Paul of the Epistles (cf. Dibelius, pp. 77, 88-90, 192 n.; A. Harnack, *Luke the Physician* [1907], pp. 139-145; Streeter, pp. 540-562; Zahn, III, 142-165). Several reasons account for this affirmative verdict. (1) Differences are to be expected since Luke was only an occasional companion, not a disciple, of Paul, and (as a good historian) made his own interpretations. (2) Although the "medical language" in Luke-Acts cannot prove that the author was a physician (rightly, Cadbury, *Style*, pp. 39-72), as W. K. Hobart (*Medical Language of St. Luke* [1882]) and Harnack contended, it significantly corroborates the patristic witness. (3) The "we" passages in Acts 16; 20–21; 27–28, like the "I" in Luke 1:3; Acts 1:1, are most reasonably explained as a reference to the author. The use of such "travel reports" agrees with ancient practice (e.g., Ammianus Marcellinus xviii.6.5) and, in the judgment of A. D. Nock (*Essays on Religion* [2 vols., 1972], II, 827f.), there is little if any evidence for a writer in antiquity to use another's notes in this fashion (cf. J. Dupont, *Sources of Acts* [Eng. tr. 1964], pp. 126-132, 129n.). (4) The accuracy of Luke-Acts, both in the historical-geographical notices and in the depiction of Paul's missionary practice, suggests a writer not far removed from the events (see II.C above; *TDNT*, VI, 744 [H. W. Kuhn]). (5) The Gospel was identified from the beginning with the name "Luke," implying that its first recipient tagged it with the author's name (Streeter, p. 588; Dibelius, p. 89; see I.A.1 above).

B. Mid-Century Objections. While most scholars continued to affirm Lukan authorship, some German writers in the mid-20th cent. again raised objections (cf. Kümmel, *Intro.*, pp. 147-150; Ellis, *Gospel of Luke*, pp. 42-52). They pointed to theological emphases and historical descriptions in Luke-Acts that differ fundamentally from those in Paul's letters. Their objections rested in part on exegetical judgments, e.g., a philosophical interpretation of the Areopagus speech, the general attitude toward the law in Acts, and the traditional identification of Gal. 2 with the conference in Acts 15. They also presupposed the second-century tradition that Luke was a disciple of Paul and would therefore have reflected his theology. In each instance the conclusions are questionable, if not doubtful; in some they are only a return to the views of F. C. Baur.

More serious are the differences between the portrait of Paul in Acts and the impression one receives of him in the Epistles. But these differences have sometimes been exaggerated. For example, is the Paul of Acts, as opposed to his opponents' estimate in 2 Cor. 10:10; 11:6, really presented as "an *outstanding orator*," as E. Haenchen thought (p. 114), when he could not hold his audience (Acts 22:22; 23:1f.), impressed some listeners as absurd or mad (17:32; 26:24), and frightened his friends with a proposal to speak to a hostile crowd (19:30f.)? In any case, the differences do not exceed the variation that might be expected between a sometime colleague's impressions of a man and the man's own letters that the colleague did not take into account (cf. Trocmé, pp. 143-47).

C. The Underlying "Hegelian Factor." The rejection of Lukan authorship did not arise primarily from individual historical or theological problems, however, but from a conviction about Luke's place in the development of early Christianity. A certain preconception about this development was implicit in the work, e.g., of H. Conzelmann (pp. 131-36), E. Haenchen (pp. 95f., 100-103, 115f.), E. Käsemann (*Essays on NT Themes* [Eng. tr., *SBT*, 1/41, 1964], pp. 28f.), and P. Vielhauer (cf. Keck, pp. 47, 290f., 302, 306f.). Like Baur in the 19th cent., these scholars also read history in the framework of Hegelian dialectic (see I.B above). Although a number of themes, including Baur's specific concerns, reflect this framework, it is perhaps most evident in the area of eschatology: the imminent expectation of the Parousia in the earliest Church ("thesis") encounters the problem of its delay ("antithesis") and is resolved, in the case of Luke-Acts, with a theology of salvation history ("synthesis"). These scholars followed Baur by placing Luke-Acts in the third stage of the dialectic, decisively separated from Paul; they concluded that Paul's colleague could not have written it and that it cannot accurately represent that period of the Church's life (cf. Ellis, *Eschatology*, pp. 17f.; *NTS*, 26 [1979/80], 499f.).

This approach to the history of early Christianity has a number of weaknesses, many of which were observable in Baur. (1) It equates theological difference with chronological distance and assumes, in the words of E. R. Goodenough, that Christianity advanced from stage to stage as a block (cf. Keck, p. 57). (2) It tends toward an exaggerated "adversary theology." (3) Most seriously, in an inordinate and indeed rather arbitrary manner it allows an abstract philosophical theory about history to shape the selection and interpretation of historical data.

While the scholars mentioned above offered many valuable insights, their general reconstruction and concomitant conclusion about the authorship of Luke-Acts were untenable. Recent work (e.g., of Fitzmyer, Hengel, and Marshall) has tended to confirm the tradition of Lukan authorship, which is, on the whole, consistent with the literary and historical character of the documents and can be accepted with reasonable certainty.

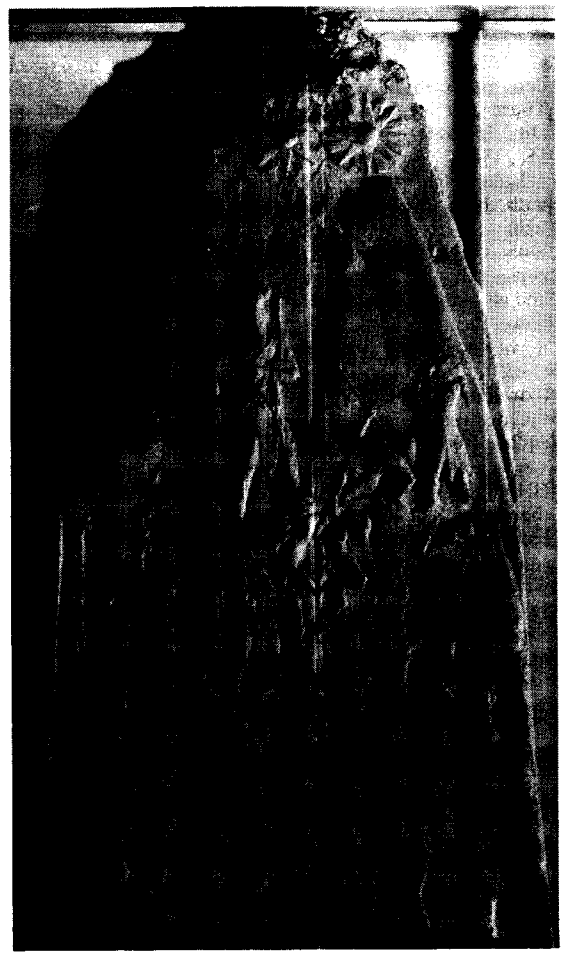
E. E. ELLIS



LULLUBI loo'lə-bē; **LULLU** lo͞o'loo [Akk. *lu-lu-bu-(um), l/nu-ul-lu(me)*]. An ancient people who inhabited the mountain region of modern Iraq around Sulaimaniya and the Shahrazur Valley. Their origins are unknown, although they can be associated with the neighboring Gutians and Elamites on linguistic grounds.

In the 3rd millennium B.C. they came into conflict with the expanding empires of the Akkad and Ur III dynasties of Babylonia and were conquered several times. Naram-Sin of Akkad celebrated his victory over King Satuni of Lullubi by carving a rock relief at Darband-i-Gawr. Sculptures on cliffs near Sar-i-Pul bearing inscriptions of Anubaninu and another Lullubi monarch, however, evince a period of local power. These texts are written in Akkadian, invoke Akkadian deities, and accompany reliefs in a provincial Akkadian style. Their date can be given only approximately as late 3rd millennium B.C.

A later Babylonian legend describes a war between Naram-Sin and 360,000 ferocious raven-faced soldiers led by an Anubaninu, probably the king of the Sar-i-Pul inscriptions or a descendant. Even if this legend exaggerates, it illustrates the mental image the city-dwelling Babylonians had of their alien neighbors. Similarly, Lullubi is named as a hated enemy to be defeated in the Irra Epic, written at the end of the 2nd millennium B.C. when Babylon had suffered from raids by the mountain tribes. These hardy mountain people, however, made tough slaves for work in the cities, as the archives of Nuzi frequently attest (to this day the porters of Baghdad are drawn from the same area). Hittite texts list Lullubi with Habiru, perhaps as two sources of cheap labor. According to the Hittites and lists compiled for Egyptian kings of the 15th cent. B.C. and shortly after, the Lullu land was the eastern extremity of the world.

Assyrian kings fought against Lullume with varying success from Adadnirari I (*ca.* 1307-1275 B.C.) onward until Ashurnasirpal conquered the region *ca.* 880 B.C. and annexed it as the province of Zamua. Lullubi was not then an organized state, and perhaps various ethnic groups had settled there in previous centuries, although the term Lullu lingered as a regional and linguistic marker.

A. R. MILLARD

LUNATICK (AV Mt. 4:24; 17:15). *See* EPILEPSY.

LURK [Heb. *'ārab*] (Ps. 10:9); AV LIE IN WAIT; NEB CROUCH; [*šûr*–'regard, gaze on'] (Jer. 5:26; Hos. 13:7); AV LAY WAIT, OBSERVE; NEB LAY SNARES, PROWL; [*yāšab*–'sit, crouch'] (Ps. 17:12); NEB CROUCH; [hiphil of *ṣāpan*–'hide'] (Ps. 56:6 [MT 7]); AV HIDE THEMSELVES; NEB WATCH; [*maḥᵃḇō'îm*] ("lurking places," 1 S. 23:23); NEB HIDING-PLACES. To lie in wait in a concealed place with the intention to do harm, as a predatory animal crouches in readiness to spring on its prey (*see also* AMBUSH). This image is usually applied to evildoers, but Hos. 13:7 applies it to God.

LUST [Heb. *hawwâ*] (Prov. 11:6); AV NAUGHTINESS; NEB GREED; [niphal part. of *ḥāmam*] ("you who burn with lust," Isa. 57:5); AV "enflaming yourselves"; [*taʾᵃnâ*] (Jer. 2:24); AV "occasion"; NEB HEAT; [*taznûṯ*] (Ezk. 23:8, 17); AV WHOREDOM; NEB FORNICATION; [Gk. *epithymía*] (Rom. 1:24; Eph. 4:22; 1 Thess. 4:5; 2 Pet. 2:10; 1 Jn. 2:16f.); AV also CONCUPISCENCE; NEB also VILENESS, "pander to," "entice," ALLUREMENTS;

[*sárx*] (Jude 7); AV FLESH; **LUSTFUL** [Heb. *giḏlê ḇāśār*] (Ezk. 16:26); AV "great of flesh"; NEB GROSS; **LUSTFULLY** [Gk. *epithyméō*] (Mt. 5:28); AV "to lust after"; NEB "with a lustful eye." In Ps. 68:30 (MT 31) the RSV renders the MT *raṣṣé-ḵāsep* "those who lust after tribute," apparently taking *raṣṣé* as a participle of *rāṣâ*, "be pleased with." The AV understands *raṣṣê* as a noun meaning "pieces," and the NEB conjectures "precious stones."

Though contemporary English uses "lust" only in a negative way, the word originally meant "craving, strong desire" and was morally neutral. Passages in which the original words mean "desire" and only the AV (reflecting earlier English usage) has "lust" include: the hithpael of Heb. *'āwâ* ("crave") in Nu. 11:34 (RSV "craving"; NEB "be greedy") and the piel in Dt. 14:26 (RSV, NEB, "desire"); *ḥāmaḏ* ("covet") in Prov. 6:25 (RSV, NEB, "desire"); *nepeš* ("soul," "desire") in Ex. 15:9 (RSV "desire"; NEB "appetite"); Ps. 78:18 (RSV "craved"; NEB "hunger").

Meanings of the frequently used Gk. *epithymía* include: "[any] strong desire" (Mk. 4:19; Rev. 18:14), "pure desire" (LXX Gen. 31:30; LXX Prov. 10:24; Lk. 22:15; Phil. 1:23; 1 Thess. 2:17), "evil desire for something forbidden" (LXX Wisd. 4:12; Rom. 7:7; 2 Pet. 1:4). "sexual passion or obsession" (Eph. 2:3; 1 Thess. 4:5). Most frequently the term has negative connotations (although the Bible does not deprecate the natural use of sex). Among the passages in which *epithymía* or *epithyméō* refer to strong desire, and accordingly the AV has "lust" or "lust after," are Mk. 4:19; Jn. 8:44; Rom. 6:12; 7:7; 13:14; Gal. 5:16, 24; Eph. 2:3. The NEB uses "lust" only in the bad sense, e.g., for Gk. *porneía* in 1 Cor. 6:13 (RSV "immorality"; AV "fornication") and for *páthos* in Col. 3:5 (RSV "passion"; AV "inordinate affection").

If a biblical term has two or more meanings, its context usually provides the key to meaning and translation. Accordingly, although *páthos* means "emotion" for Philo, "bad impulses" sixty-three times in the LXX of 4 Maccabees, and "sickness" in Prov. 25:20, in Col. 3:5 a list of four closely related concepts makes clear that *páthos* here means "erotic passions." Similarly, the verb *orégō* (lit. "reach, stretch out") carries the commendable meaning of "aspire to" or "strive for" in 1 Tim. 3:1; He. 11:16, but the context indicates the unfavorable meaning "sexual desire" for the noun *oréxis* in Rom. 1:27 (cf. Josephus *Ant.* vii.8.1 [169]). A third term, *hēdonḗ* (cf. *hēdýs*, "sweet, pleasant, delightful"), carries a noble meaning in classical Greek philosophy; later, however, in popular philosophy influenced by the Cynics and Stoics, it designates a vice. In the NT *hēdonḗ* "represents one of the many forces which belong to the world of unsanctified carnality, which strive against the work of God and His Spirit and which drag man back again into the kingdom of evil" (*TDNT*, II, 909). Since simple pleasure as such is not contrary to God's will, *hēdonḗ* in the NT designates "evil pleasure" or "enslaving desire," much like the "evil impulse" of Judaism (Heb. *yēṣer hārāʿ*; see SB, IV, 469f.).

G. GIBBS

LUSTY [Heb. *maškîm*] (Jer. 5:8); AV "in the morning." *Maškîm*, perhaps a hiphil participle of **šāḵâ*, "roam at large(?)," may alternatively be an abbreviated form of *ma'ᵃšîḵîm* (denominative < *'ešeḵ*, "testicle" [Lev. 21:20]), "having (strong) testicles"; cf. BDB (p. 1013) and KoB (p. 968). The LXX translates it *thelymaneís*, "mad after females." Aquila and Theodotion have *hélkontes*, "drawing, attracting." The context seems to support the RSV and NEB over the AV, which apparently bases its translation on the Hebrew verb *šāḵam*, "rise early."

LUTE. *See* MUSIC II.B.

LUXURIANT [Heb. *bôqēq*] (Hos. 10:1); AV "empty"; NEB RANK. Hebrew *bôqēq* is apparently a participle modifying "vine" (Heb. *gepen*; the difference in gender [*gepen* is fem.; *bôqēq* masc.] is explained by *bôqēq*'s proximity to [masc.] "Israel") in a metaphor about Israel (cf. Ps. 80:8-16 [MT 9-17]; Isa. 5:1-7; 27:2-6; Ezk. 17:5-10; 19:10-14). But *bqq* elsewhere means "empty" (hence AV), a meaning that does not seem appropriate in the context; thus the RSV and NEB follow the LXX *euklēmatoúsa*, "growing luxuriantly." In accordance with the LXX reading, various scholars have posited either another Hebrew root *bqq* (e.g., BDB, p. 132) or a root *bwq* (F. I. Andersen and D. N. Freedman, *Hosea* [*AB*, 1980], pp. 549f.). Support for such roots comes from Arab. *baqqa*, "branch off, split, spread" (H. W. Wolff, *Hosea* [Eng. tr., *Hermeneia*, 1974], p. 170). Perhaps equally plausible is KD's explanation, that the "primary meaning" of *bqq* is "pour out, overflow," and hence "run luxuriantly" in Hos. 10:1.

G. A. L.

LUXURY [Heb. *ta'ᵃnûg*] (Prov. 19:10); AV DELICATE LIVING; NEB "at the helm"; [*šāmēn ḥelqô*] (Hab. 1:16); AV "his portion is fat"; NEB SUMPTUOUSLY; [Gk. *tryphḗ*] (Lk. 7:25); AV DELICATELY; [*trypháō*] (Jas. 5:5); AV DELICATELY; NEB WANTON LUXURY. Rich surroundings and life-style. The term has evaluative connotations in Scripture. Prov. 19:10, "It is not fitting for a fool to live in luxury," e.g., neither simply condemns the "newly rich" nor confirms that "a fool and his money are soon parted." It rather advises that both luxury and power (v. 10b), though not wrong, can easily tempt to wrong and become wrong themselves if not handled with wisdom. In Hab. 1:16 luxury tempts people to idolatry; the prophet's answer condemns unjust gain (2:7-13) and idolatry (2:18f.).

In Lk. 7:25 Jesus referred to luxury in His rhetorical questions concerning the people's expectations of John the Baptist. Matthew (11:8) only mentioned soft clothing. This peculiarity of Luke is one instance of his advocacy of the poor. To say that Luke had an "Ebionite tendency," i.e., that he regarded poverty itself as pleasing to God and promised the poor compensation in the future aeon (cf. E. Percy, *Die Botschaft Jesu* [1953], pp. 89-106), is an exaggeration. But Luke undeniably was an advocate for the poor and a prosecutor of the wealthy. He was sensitive to the temptations of luxury, e.g., idolatry and avarice, and to the opportunity in poverty of a remarkable freedom to serve God. Lk. 7:25 rejects luxury as a criterion of value. It is not an Ebionite rejection, which keeps luxury as a criterion but with a contrary formulation, moving from "luxury is good" to "luxury is evil"; it is rather a total dismissal of luxury as a standard. The service of God, responsibility to the Lord, is the standard by which John the Baptist and "the least in the Kingdom" are discerned to be good.

James inveighed fiercely against the unjust exploiter who, living in "luxury," delights in the excess of his field, table, and savings while his conscience is insensitive to the dignity of his laborers (Jas. 5:5).

The Bible does not, however, prohibit surplus or adornment beyond the mere necessities of life. It would seem

impossible to deny people the "luxury" that gives quality to life — e.g., play and decoration — and still affirm their humanity. The question is therefore posed: when does the enjoyment of excess become idolatry and injustice? This difficult question has steep slopes to error on both sides: the dangers of legalism and irresponsibility. Calvin, for one, recognized these dangers and cautioned against legalism: "If a man begins to doubt whether he may use linen for sheets . . . he will afterward be uncertain also about hemp; finally doubt will even arise over tow" (*Inst.* iii.19.7; on irresponsibility cf. iv.10).

As well as warning against idolatry and injustice, the Scripture forbids identification of luxury and virtue. Luxury is not a moral criterion; rather, it must be subject to a moral criterion — responsibility to the Lord (Lk. 7:25), which is given concrete significance as responsibility for one's fellow men (Jas. 5:5). Luxury is proscribed when the dignity of others is injured. Luxury without responsibility to God is idolatry; luxury without responsibility for the needs of one's neighbors is injustice. Luxury can serve joy — but only where it also serves the love of God and neighbor.

LUZ luz [Heb. *lûz*].

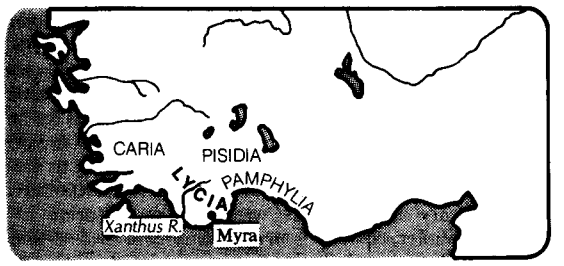
1. A Canaanite city, renamed Bethel by Jacob (Gen. 28:19). This tradition is also preserved in Gen. 35:6; Josh. 18:13; Jgs. 1:23; Jub. 27:19, 26. However, Josh. 16:2 reads "then going from Bethel to Luz," suggesting that these are two places. The MT has *mibbêṯ-'ēl lûzāh* (with *hê* directive), "from Beth-el toward Luz." The LXX supports this reading with *Louza* but appears to make Bethel-Louza a single place by using one preposition, *eis*, "to," before the two words. Scholars have therefore been divided, some holding to the identification of Luz with Bethel, others considering the two as different places and the passages that support Gen. 28:19 as containing glosses (cf. *GTTOT*, p. 164). *See* BETHEL **1.**

2. A city in the land of the Hittites built by a man who had escaped from Canaanite Luz after betraying it to "the house of Joseph" (Jgs. 1:26). It could be anywhere in the region now known as Syria and Lebanon, which the Hittites occupied. Simon (*GTTOT*, p. 283) suggested that Luweizeh, halfway between Sidon (Saida) and Ḥasbeiyeh, may preserve the ancient name. W. S. L. S.

LYCAONIA lik-ā-ō'nē-ə, lī-kə-ō'nē-ə [Gk. *Lykaonia*]. A region in the southern part of the Anatolian plateau (Acts 14:6). Anatolia (Asia Minor) is divided into three geographical regions: the Armenian highlands in the east, the Anatolian plateau in the center, and the mountainous region, cut by valleys that provide access between the Aegean coastal region and the plateau, forming the western part of Asia Minor. The Anatolian plateau, which has an average elevation of about 1000 m. (3300 ft.), is bordered on the north by the Pontus range and on the south by the Taurus range, both mountain systems extending from the Armenian highlands. In Roman times most of the plateau was the province of Galatia, but Lycaonia still retained some of its more ancient character (the term "Galatic Lycaonia" is sometimes used, and the people spoke the Lycaonian dialect [Acts 14:11]). Using the older divisions, we may therefore describe Lycaonia as bordered on the north by Galatia, on the east by Cappadocia, on the south by Cilicia Tracheia, on the southwest by Pamphylia, and on the west by Pisidia and Phrygia. The boundary between Lycaonia and Pisidia probably lay between Iconium and Antioch of

Pisidia, although Strabo called it "Antioch toward Pisidia" (*Geog.* xii.8.14). The boundary between Lycaonia and Phrygia is even more indefinite, for the inhabitants of Iconium considered themselves to be Phrygian, which may have influenced Luke's language in Acts 14:6. According to Strabo, however, Iconium at that time was an important city of Lycaonia (*Geog.* xii.6.1). Lystra and Derbe, visited by Paul, were also in Lycaonia; Strabo said that Derbe was almost at its border with Cappadocia, an obvious mental lapse for Cilicia (*Geog.* xii.6.3). Lycaonia is a flat, dry, and almost treeless plain, extremely dusty at the end of summer, and inhospitably cold in winter. Near Karaman (and also Derbe) the plain is broken by the volcanic mountain group known today as Kara Dağ ("Black Mountain"), which rises to 2272 m. (7454 ft.).

The early history of Lycaonia is unclear. It was long believed that there were no early inhabitants in the Anatolian plateau, but archeological discoveries have disproved this theory. The *lu-* element indicates that Lycaonia, and perhaps also Lystra, were connected with the Luwian peoples, ancestors of the Hittites. Although a main road from Ephesus to the Cilician Gates passed through a part of Lycaonia, the region seems to have maintained relative independence in the Persian period. Lycaonia came under control of Alexander the Great and, after him, the Seleucids. When Antiochus the Great was defeated by the Romans at Magnesia in 190 B.C. Lycaonia was given to Pergamum. Later it was parceled up among Galatia, Cappadocia, and Cilicia. In 36 B.C. it was given to Amyntas when he became king of Galatia. When he died (25 B.C.) the Romans made his kingdom into the province of Galatia. There were Jewish communities in Antioch and Iconium, probably from the Seleucid era. Lycaonia was Christianized early, as a result of Paul's work and his oversight of the churches there. By the 4th cent. A.D. the Church was well organized, spreading over most of Galatia.



Paul visited Lycaonia at least three times. On his "first journey" he and Barnabas traveled from Pisidian Antioch to Iconium (Acts 13:51), Lystra, and Derbe (14:6). The apostles returned from Derbe by the same route. On his "second journey" Paul took Silas and journeyed from Cilicia to Derbe and Lystra (16:1) and certainly Iconium. Timothy joined the evangelistic team either at Derbe or at Lystra (16:1; that Timothy was "well spoken of by the brethren at Lystra and Iconium" lends some support to the view that he came from Derbe). Paul also visited this region when he "went from place to place through the region of Galatia and Phrygia" on his "third journey" (18:23; the RSV does not accurately represent the Greek, "the Galatic region and Phrygia"). It is generally believed today, according to the "South Galatian theory" (*see* GALATIANS, EPISTLE TO THE III), that Paul's letter to the Galatians was written to the churches of the southern part of Galatia, which would include Lycaonia.

Central Anatolian plain and volcanic cones near Iconium (A. D. Baly)

LYCIA lish'yə [Gk. *Lykia*]. A region on the western part of the southern coast of Asia Minor, bounded on the west by Caria, on the east by Pamphylia, and on the north by Pisidia (1 Macc. 15:23; Acts 27:5). Lycia is a rugged, mountainous region, the only level portions being the alluvial plains formed by the Xanthus (modern Koca [kō-ja]) and the Limyrus rivers. The mountains are actually spurs developed from the Taurus range, some of them rising to considerable heights (two above 3000 m. [10,000 ft.] and at least three others above 2300 m. [7600 ft.]). Each of the highest mountains bears the local name of Ak Dağ, "White Mountain," the higher (3086 m. [10,125 ft.]) being the ancient Massicytus. Solyma (2375 m. [7792 ft.]), in the extreme eastern part, slopes into the Gulf of Antalya, making direct passage from Lycia to Pamphylia impossible. The mountainous topography accounts for the inhospitable coastline, the rivers providing the few good harbors: Patara (Acts 21:1) at the mouth of the Xanthus (now useless because of silting); Myra (Acts 27:5; modern Demre) at the entrance to the Andriacus valley (also silted up); and Limyra, near the modern Fenike (Phoenicus) at the mouth of the Limyrus. Telmessus (modern Fethiye) on the Gulf of Fethiye is still a good harbor.

The history of Lycia is still not known to a satisfactory degree. The early inhabitants, an Anatolian people related to the Hittites, can be traced back to the Bronze Age. The *lu-* element in the names Lycia, Lycaonia, Lydia, Lulahhi, and Luwian indicates some common background. Linguistic remains from Lycia give satisfactory evidence that it is a dialect of the Luwian language, and Luwian deities can be identified in personal names. Archeological discoveries at Elmalı point to a settlement there in the Early Bronze Age (M. J. Mellink, *American Journal of Archaeology*, 68 [1964], 269-278). According to tradition, the cyclopean walls of Tiryns were built by Cyclops, who had been sent by the king of Lycia, along with an army, to make Tiryns secure for his daughter. In an Amarna Letter the king of Alashiya wrote the king of Egypt, complaining, "Year by year the people of Lukki have taken a small city from my land" (Am.Tab. 38:11f.). A king of Ugarit appealed to the king of Alashiya for help, saying, "My forces and chariots are stationed in Khatti Land, and all my ships are in Lukka Land" (*CAH*, II/2, 369). In the battle between Ramses II and the Hittite Muwatallish, at Qadesh on the Orontes (*ca.* 1300 B.C.), an Egyptian scribe listed the *Rk* (= *Lk*) among the Hittite allies. These are sometimes identified as the Lukka. The Lukka lands are men-

tioned in Hittite records as a turbulent area (*CAH*, II/2, 361). Merneptah boasted that he had won a victory in Libya in his fifth year against an alliance that included *Lk* (Lukka). According to the Iliad, the Lycians, led by Sarpedon, were allies of Troy (*Il.* ii.876; v.479). Hephaestus, god of fire and husband of Aphrodite, was probably a Lycian god whose cult moved westward to the islands and to Lemnos.

Neither the Phyrgians nor the Lydians were able to conquer Lycia, but after Croesus was defeated (*ca.* 546 B.C.) Lycian cities were conquered by Harpagus, one of Cyrus's generals. Lycia was incorporated into the kingdom of Alexander the Great. Its location afforded a large degree of independence, however, even into Roman times. In 188 B.C. it was given by the Romans to Rhodes but was free twenty years later, as attested by the letters of Lucius the Roman consul written to Ptolemy and the heads of a number of other countries, including Lycia, on behalf of the Jewish populations in those lands (1 Macc. 15:16-24). The Romans made Lycia a province in A.D. 43, and Vespasian united it with Pamphylia in A.D. 74, but it became a separate province again in the 4th century.

In the Iron Age the principal cities of Lycia were Xanthus (near modern Kınık), Myra, Pinara, Phellus (modern Suaret), and Antiphellus (modern Kaş). Artemidorus (*ca.* 100 B.C.) reported that twenty-three towns made up the Lycian league. Pliny stated that Lycia at one time possessed seventy towns, but that only twenty-six of these remained at the time of his writing.

The apostle Paul, on his journey from Miletus to Palestine, came to Patara from Rhodes and then caught a ship to Phoenicia (Acts 21:1). On his journey to Rome, he landed at Myra, where he boarded a ship for Italy (27:5). Myra is noted in church history as the seat of Nikolas bishop of Myra, who was martyred under Diocletian. Saint Nicholas, as he has come to be known, endeared himself by giving many gifts. He is the patron saint of sailors and children; through Dutch tradition, he became the Santa Claus of western Christendom.

LYDDA lid'ə. *See* LOD.

LYDIA lid'ē-ə [Gk. *Lydia*]. A woman residing in Philippi who apparently was Paul's first convert in Europe (Acts 16:14f., 40). Lydia may have been not her given name but rather a means of identifying her as originally from Lydia, a section of western Asia Minor. Her native city was Thyatira, famous for its purple dye. Whether unmarried or widowed, she had a commodious house in Philippi where she sold purple goods.

While living in Thyatira she had become attracted to the Jewish faith but was a God-fearer (*see* DISPERSION V.C) rather than a proselyte (16:14). Faithful to this commitment, she frequented the "place of prayer" outside the city of Philippi, where she heard Paul's presentation of the gospel. The Lord opened her heart to the truth and she accepted baptism. Her "household," whether employees, children, or both, followed her in baptism. She showed her gratitude by urging the missionary party to be her guests.

Rather strangely, her name does not appear in Paul's letter to the Philippian church. Some have conjectured that her real name was either Euodia or Syntyche (Phil. 4:2), but these women's tendency to disputation hardly fits the portrayal of Lydia in Acts 16. It is likely, however, that the prominence of women in Paul's letter reflects Lydia's continuing influence in the church, even as this congregation's generosity toward Paul, attested by the letter, reflects her initial care for his welfare.

E. F. H.

LYDIA lid'ē-ə [Gk. *Lydia*]. A region in the western part of Asia Minor, bounded on the north by Mysia, on the east by Phrygia, on the south by Caria, and on the west by the Aegean Sea. The western third of Asia Minor (W of 31 degrees East Longitude) is a mountainous region cut by numerous river valleys. Historically, these valleys have provided the trade routes as well as the settlements of peoples. Lydia lay between the valley of the Hermus (modern Gediz) in the north and that of the Meander (modern Büyük Menderes, "Big Meander," to distinguish it from the Küçük Menderes, "Little Meander," which we know better as the Caÿster), in the south. It included the valley of the Caÿster. The border with Mysia was somewhat N of the Hermus; that with Phrygia was disputed throughout much of Lydia's history. The Meander formed the boundary between Lydia and Caria (Strabo *Geog.* xii.8.15). The western portion of Lydia was often occupied by Greeks. Important cities of Lydia included Sardis (the capital), Ephesus, Thyatira, Philadelphia, Colophon, Lebedos (Ptolemais), Clazomenas, Teos, and Phocaea. Although the place name Lydia does not occur in the Bible, the region is of great importance under the name of ASIA, which came into existence as a Roman province after 133 B.C. and included Lydia, Caria, Mysia, and part of Phrygia.

The early history of Lydia is obscure. The *lu-* element in the name suggests Luwian (early Hattic or Proto-Hittite) origin. Hittite records have no mention of Lydia, but it is possible that Aššuwa (from which probably comes the name Asia) was the term by which the region was then known. Luwian was written in Hittite hieroglyphs (*CAH*, II/2, 435), and a bas relief of a warrior or god located near Karabel bears an inscription in this system of writing (cf. Herodotus ii.106). Homer recorded that the region under Mt. Tmolus (Boz Dağ) and around the Gygean Lake (Marmara Gölü) was assigned to the Meonians (*Il.* ii.864-66). Herodotus thought these were the Lydians (i.7), but Strabo recorded differing opinions (*Geog.* xiii.4.5). The invasion of the Phrygians (probably from Thrace) in the 12th cent. B.C. isolated the Luwians of western Anatolia and was instrumental in pushing the Hittites east from the Halys region toward Syria. Troy fell *ca.* 1200 B.C.; Troy VIIb, built after the city was destroyed by fire, had a new population using pottery of a coarse material. About this same time the sea-peoples, probably as a result of this same population movement, were attempting invasions of Egypt; some landed on the coast of Palestine. According to Lydian tradition, the Philistines were from Lydia (Xanthus, contemporary of Herodotus, was a Lydian historian; cf. C. and T. Muller, eds., *Fragmenta Historicum Graecorum*, I [1841]). The word Philistine has been related to Pelasti-

kon = Pelasgikon, the "spear-brandishing Pelasgians" of Homer (*Il.* ii.840; cf. *CAH*, II/2, 512f.). The Hebrew word *seren*, "tyrant, lord," is a loanword from the Philistine *seranim*, which was also taken over by the Greeks as *týrannos* (Acts 5:39, D). If this complex theory can be established, it may support some of the references to Lud in the OT (cf. Jer. 46:9; *see* LUD). Another tradition speaks of famine for eighteen years that led the king finally to divide the people into two groups and draw lots. One group, under his son Tyrrhenus, emigrated to Umbria in Italy, founding Tyrrhenia, better known as Etruria, home of the Etruscans (Herodotus i.94). If this legend is historically based, the event must have taken place before 1000 B.C. According to Gen. 10:2 the sons of Japheth included Tiras (the Tyrsenoi or Tyrrhenians), Tubal and Meshech, both of whom are often identified with peoples in Asia Minor, and Javan (Ionia), who settled the Ionian coastal region of Lydia.

The Heraclid (Tylonid) dynasty ended with Candaules (Myrsilus), *ca.* 700 B.C., after reigning for 505 years. This would put the start of that dynasty, under Agron the first king of Sardis, *ca.* 1205 B.C. Before Agron the kings were descended from Lydus son of Atys, from whom the Lydians took their name (Herodotus i.7). Candaules was slain by Gyges (Herodotus i.13), with whom Lydia comes into history. Gyges (reigned 685-652 B.C.) attacked Greek cities on the coast; then the Cimmerians invaded Asia Minor, and he turned to Ashurbanipal to form an alliance, *ca.* 668 B.C. (Rassam Cylinder, *ARAB*, II, §§ 784, 849, 909, where he is called Guggu, considered by some to be the Gog of Ezk. 39:1). After the defeat of the Cimmerians, Gyges sought an alliance with Psamtik I of Egypt, and sent troops to help liberate Egypt from Assyria (*ca.* 654 B.C.). The Cimmerians, however, ransacked Lydia, and Gyges died. He was succeeded by his son Ardys (652-615), who restored good relations with Assyria and was followed by Sadyattes (*ca.* 615-605).

The next king, Alyattes (*ca.* 605-560), finally expelled the Cimmerians, but Indo-European migrations brought Scythians and Medes into Asia Minor. Alyattes waged a war with the Median ruler Cyaxares, which can be dated by the eclipse of the sun that occurred in its sixth year (on May 28, 585). The war ended with a peace treaty that set the Halys River (KIZIL) as the boundary between the Lydian and Median kingdoms. Alyattes' daughter was married to Astyages son of Cyaxares. According to Herodotus (i.15-108, *passim*; but cf. denial by Ctesias *Persica* exc. 2) their daughter Mandane was married to Cambyses, and from this union was born Cyrus the Great.

Alyattes' son Croesus, who reigned 560-546, was the last king of Lydia. He gained lasting fame because of his wealth, obtained from the gold-filled sandy bed of the Pactolus River flowing from Mt. Tmolus. Croesus made lavish gifts to the oracle at Delphi and to the rebuilding of the archaic temple of Artemis at Ephesus.

Cyrus captured Sardis in 546, overthrew Croesus, and made Lydia a Persian satrapy separate from the Ionian satrapy. Lydia came under the rule of Alexander the Great when he defeated the Persians at the battle of Granicus in 334. It was subsequently ruled by the Seleucids until the defeat of Antiochus III at Magnesia in 190, when it was given to Pergamum (1 Macc. 8:8). On the death of Attalus III in 133 B.C., by the terms of his will, the region passed to the Romans; the proconsular province of Asia was formed subsequently.

Lydians were famed as horsemen, warriors, merchants, and bankers. During the famine that led to the Tyrrhenian emigration they are supposed to have invented games, "dice and knuckle-bones and ball" (Herodotus i.94). The daughters of the commoners became prostitutes in order to collect dowries and get husbands (Herodotus i.93). (These statements by Herodotus are disputable.) The Lydians were also well known for textiles, carpets, a Roman guild of woolworkers and dyers (cf. Lydia of Thyatira, Acts 16:14), and perfumes put up in containers of a shape known as Lydion. Most important, the Lydians were the first (mid-7th cent. B.C.) to coin gold and electrum into stamped ingots that could not be unnoticeably reduced in weight. Through trade, and particularly through the Persian empire, coinage became the accepted medium of exchange.

Kybele (Cybele, Artemis; the Luwian Kubaba [Herodotus, v.102]) was the great mother-goddess of Lydia, with traces of her worship going back to Neolithic times. At Sardis (Sart) the remains of a temple dedicated to her can still be seen. The great temple at Ephesus, however, was destroyed by the Goths (A.D. 262), and columns were later taken to adorn the basilicas of Hagia Sophia at Istanbul and St. John at Aysaluk (modern Ephesus). The cult of Bacchus (Dionysus) was imported from the Lydian region to Greece (*CAH*, II/2, 887). The adoration of a triad consisting of the mother-goddess, a male god later equated with Zeus, and the equestrian moon-god Mēn has been posited (*CAH*, II/2, 439). (It may be more than a coincidence that the *theotókos* ["Mother of God"] dogma came into Christendom by the Council of Ephesus [A.D. 431].) Antiochus III was responsible for settling two thousand Jews from Babylon in Lydia and Phrygia (Josephus *Ant.* xii.3.4 [§§ 147-153]). Paul the apostle, with unerring instinct, early set his sights on proconsular Asia (Acts 16:6) and later put that vision into reality with a work in Ephesus that resulted in the evangelization of much of Asia (19:10). The Seven Churches of Asia (Rev. 2–3) doubtless originated from that work, as did churches at Colossae and Hierapolis (Col. 4:13), Miletus, Magnesia, Tralles, and other places known from early church history.

LYDIAN lid'ē-ən (Jer. 46:9, AV). *See* LUD, LUDIM.

LYE [Heb. *bōr*] (Job 9:30; Isa. 1:25); AV "clean," "purely"; NEB also POTASH; [*neṯer*] (Jer. 2:22); AV NITRE; NEB SODA. A strongly alkaline substance used in cleaning and making soap.

It is difficult to know precisely how the two Hebrew terms translated "lye" differ. *Bōr* may have been potassium carbonate leached from wood ash or other vegetation. It would have been readily available in Palestine, and when combined with oil it could have been used like modern soap. In Job 9:30 it is not strong enough, however, to take away Job's guilt. It is elsewhere translated "cleanness" (e.g., 2 S. 22:21; Job 22:30), which may have influenced the AV translation here (cf. also Syr.). The RSV and NEB "lye" is preferable, however (note the parallelism). Isa. 1:25 refers to the ancient practice of adding lye or another alkali during smelting in order to accelerate the process (so KD).

Neṯer, together with its Semitic cognates, reflects the origin of Eng. "natron" and "nitre"; in antiquity it seems to have been saltpeter (nitre). In Jer. 2:22 it is very clearly a cleansing agent. In Prov. 25:20 *neṯer* is translated "wound" following the LXX, but "lye" would make sense in the context just as well, because vinegar added to lye (an alkali) makes it useless. Suggestions that it was sodium carbonate, obtainable from Egypt and Armenia, probably are not correct, since vinegar would effervesce with it, thus rendering Prov. 25:20 meaningless. Moreover, to have imported sodium carbonate when other good cleansing agents

were locally available is not reasonable. Cf. W. McKane, *Proverbs* (*OTL*, 1970), pp. 588f.

LYRE. *See* MUSIC II.B.

LYSANIAS lə-sā'nē-əs [Gk. *Lysanias*]. Tetrarch of ABILENE when John the Baptist began his ministry (Lk. 3:1). As can be seen from this passage, a tetrarch ruled a minor area as compared with a governor's jurisdiction.

No further information about Lysanias is provided in the NT; however, the name occurs several times in the writings of Josephus. Some scholars have concluded that Luke must have depended on the Jewish historian for the name Lysanias and assigned him a role in history *ca.* A.D. 28, whereas the Lysanias introduced by Josephus died in 36 B.C. For a historian of Luke's caliber to have made such a mistake in chronology is antecedently improbable, however (cf. Lk. 1:3). Moreover, certain evidence suggests that two men named Lysanias ruled in the same general area but at different times. The earlier Lysanias is mentioned by Josephus (*Ant.* xix.5.1 [274f.]; *BJ* ii.11.5 [215f.]), who states that Gaius gave to Agrippa I not only the territory that had been governed by Agrippa's grandfather Herod but also Abila, which had been ruled by Lysanias.

It is worth noting that earlier references in Josephus mention Lysanias's father, a certain Ptolemy (*Ant.* xiv.13.3 [330-33]; xv.4.1 [92]; *BJ* i.13.1 [248]). Other passages dealing with Lysanias, which from their contents must refer to a later time, do not refer to the father. Nor does Luke mention Ptolemy.

In his first reference to a Lysanias, Josephus designated him a ruler of Chalcis in Lebanon (*Ant.* xiv.13.3 [330-33]). Since Chalcis was a larger territory than Abilene, the two districts were probably ruled by different men named Lysanias. Further substantiation of Luke's chronology in 3:1 is an inscription found near Abila datable no later than A.D. 14; it claims to be the work of Nymphaeus, a freedman of Lysanias (Easton, p. 35).

It appears reasonably clear that Josephus noted two men by the name of Lysanias, whereas Luke mentioned only the later one. Thus the confusion probably has been caused by Josephus's failure to distinguish the men clearly, rather than by a lapse on the part of Luke. Still, some readers of Luke may wonder why he, in giving the setting for the entrance of John the Baptist on the stage of history, mentioned a relatively obscure ruler of a minor section of the Roman empire. But nine of Josephus's eleven references to Lysanias concern persons or situations in Palestine, so his territory must have been closely related to Palestine.

E. F. HARRISON

LYSIAS lis'i-əs [Gk. *Lysias*].

1. A Seleucid nobleman whom Antiochus IV Epiphanes appointed regent of Syria and guardian of his son while he attacked Persia (the Parthians) in 166-165 B.C. (1 Macc. 3:32f.; cf. 2 Macc. 10:10f.; Josephus *Ant.* xii.7.2 [295-97]). His charge from Antiochus included waging a punitive war against Judas Maccabeus (1 Macc. 3:34-37). Lysias sent Ptolemy, Nicanor, and Gorgias with a large army against Judas, but the Jews soundly defeated them near Emmaus (3:38–4:25; *Ant.* xii.7.3f. [298-312]). The following year Lysias personally led an invasion of Judea and encamped at Beth-zur (1 Macc. 4:26-29; 2 Macc. 11:1-5; *Ant.* xii.7.5 [313]). Although discrepancies exist between the accounts of 1 and 2 Maccabees, it appears that Judas defeated Lysias (1 Macc. 4:34f.; cf. 2 Macc. 11:6-12; *Ant.* xii.7.5 [314f.]) and that this victory occasioned the cleansing and rededication of the Jerusalem temple in 164 B.C. (1 Macc. 4:36-59; *Ant.* xii.7.6f. [316-325]; cf. 2 Macc. 10:1-8), which has been celebrated ever since in the Feast of Lights (also called the Feast of Dedication, or Hanukkah).

Upon his deathbed Antiochus Epiphanes appointed PHILIP (4) regent and guardian of his son in place of Lysias. But when Lysias learned of Antiochus's death, he set up the king's son, ANTIOCHUS V EUPATOR, as king of Syria (1 Macc. 6:14-17; *Ant.* xii.9.2 [360f.]) and continued to function as his guardian. Lysias and Eupator invaded Judea with troops and elephants, defeated Judas at Beth-zechariah in a battle in which Judas's brother Eleazar was killed, and besieged Jerusalem. Philip's arrival in Antioch and attempt to take control of the government forced Lysias and Eupator to withdraw and to make peace with the Jews (which Eupator immediately violated by breaking down walls in Jerusalem). Lysias defeated Philip at Antioch but was later killed by another claimant to the Seleucid throne, Demetrius. (See 1 Macc. 6:27–7:4; cf. 2 Macc. 13:1–14:2; *Ant.* xii.9.3–10.1 [366-390].)

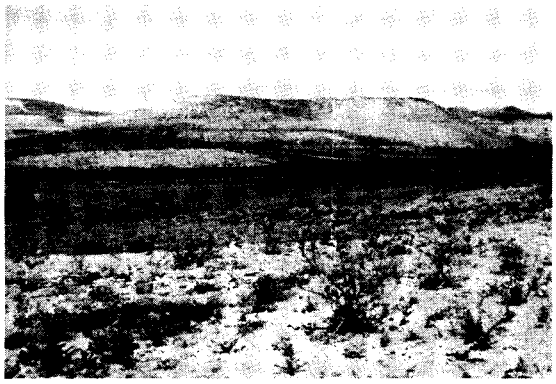
LYSIMACHUS lī-sim'ə-kəs [Gk. *Lysimachos*].

1. Son of Ptolemy; a Jerusalem Jew who is said by Ad. Est. 11:1 to have translated the book of Esther into Greek.



2. Brother of the unscrupulous Menelaus who outbid Jason for the high priesthood during the reign of Antiochus IV Epiphanes (175-163 B.C.). When forced to appear before the king for failing to continue payments for his office, Menelaus appointed Lysimachus as his deputy in the high priesthood (2 Macc. 4:29). Lysimachus, with the connivance of his brother, stole some of the gold vessels of the temple and committed other acts of sacrilege. When the Jews learned of this they became incensed, and a crowd assembled to protest these actions. Lysimachus attempted to disperse the crowd with an armed force, but the crowd counterattacked by throwing stones, blocks of wood, and ashes. Lysimachus's men were put to flight, and he himself was killed (4:32-42). J. J. SCOTT, JR.

LYSTRA lis'trə [Gk. *Lystra*; occurs also as neut. pl. dative *Lystrois*]. A city of south-central Asia Minor that Paul evangelized on his first missionary journey and where he nearly lost his life from stoning (Acts 14:8-21); he revisited it on his second (16:1) and probably his third (18:23) missionary journeys.

I. Topography and Character.–Little is known of the early history of Lystra (the name is apparently from the Lycaonian language). J. R. S. Sterrett in 1885 established its location beyond doubt as the large mound just N of the Turkish village of Hatun Sarai ("Lady's Mansion"), thus 29 km. (18 mi.) SSW of Iconium in the region of Lycaonia. The site is exceptionally attractive, in a secluded valley at the junction of two broad streams, and was probably inhabited from prehistoric times. (No systematic archeological excavation has been undertaken.) But since Lystra did not lie along the course of the main roads, it was not destined to become a great city. It was able, therefore, to preserve its primitive, local character more than cities such as Iconium; Hellenism (during the hundred-year rule of the Seleucids), for example, apparently made little impact on Lystra.

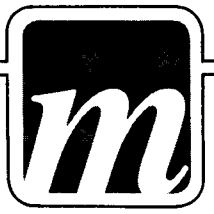
The site of Lystra (W. S. LaSor)

Despite these drawbacks, Augustus designated Lystra, with Antioch of Pisidia, a Roman colony in A.D. 6, thereby necessitating a Roman road ("the Imperial Road") to be built between the two cities. The Romans had ruled Lystra for some time previously, following the reigns of the Seleucids and Attalids. Amyntas of Galatia had willed the city to the Romans at his death (25 B.C.). Augustus's generals regarded Lystra as a suitable place for the Roman garrison charged to defend the province of Galatia, primarily from the mountain tribes to the west and south. This decision was obviously important to the development of Lystra (although the threat of the mountain tribes soon diminished remarkably); the official Roman presence, which must have contrasted strongly with the native Lycaonian populace and culture, brought the city prestige. Colonial coins of Lystra and a statue of Concord sent by Lystra toward the end of the 2nd cent. to its sister colony Antioch have been recovered. The later history of Lystra is not well known. The foundations of a Byzantine church have been found at the eastern slope of the tell.

II. Paul and Barnabas.–Ramsay has argued that Lystra was probably not significant enough to have been on Paul's original itinerary. Paul and Barnabas were driven there from Iconium by hostile opponents, and thus Lystra functioned as a relatively unimportant city of refuge, as did Berea later when Paul and Silas fled the wrath of the Thessalonians (Acts 17:10).

In Lystra, identified along with Derbe by the author of Acts as "cities of Lycaonia" (in contrast to Iconium), Paul and Barnabas healed a man crippled from birth (Acts 14:8-18). This miracle caused the greatest astonishment among the inhabitants of the city, who immediately concluded in their own language, "The gods have come down to us in the likeness of men!" (v. 11). Their use of Lycaonian, an ancient language of the region, rather than Greek, supports the conclusion that Lystra more than other cities retained its own local culture against Hellenism. (The language continued to be spoken as late as the 6th century A.D.) It also indicates that the crowds were natives rather than Roman colonists, who would have spoken Latin.

Paul and Barnabas apparently did not understand, until they saw the preparations for sacrifice, that they were being hailed as gods — namely Zeus (Barnabas) and Hermes his messenger (Paul the spokesman). Lystra had a temple of Zeus just before the gates of the city, although the religion represented was probably a local Lycaonian type with only a Greek veneer. Inscriptions from the middle of the 3rd cent. A.D. discovered by W. M. Calder in the vicinity of Lystra refer to "priests of Zeus" and a statue of Hermes dedicated to Zeus, thus confirming the historical probability of the Acts account. An altar dedicated to the "Hearer of Prayer" (Zeus) and Hermes has also been found. Moreover, in a popular tale of Ovid, Philemon and Baucis unknowingly entertained Jupiter and Mercury, the Roman counterparts of Zeus and Hermes (*Metamorphoses* viii.626ff.). Conceivably the native populace regarded such a spectacular occurrence as a theophany (cf. Acts 28:6). Paul and Barnabas reacted by rending their garments, a Jewish practice in the presence of blasphemy.



Paul's remarks were the first address to a pagan audience in Acts (the other occasion was at Athens, 17:22-31). In this telescoped sermon he alluded to good news and announced the truth of one living God who is the source of all good things experienced by human beings and who is sovereign over their lives. As at Athens, Paul began with a point of common knowledge to draw his listeners into the truth of the gospel.

Converts were made at Lystra (Acts 14:21-22), but the fickle majority allowed themselves to be carried away by Jews from Antioch and nearby Iconium into supporting an abrupt attempt on Paul's life. Although Lystra was a Roman colony, the account contains no hint of the Roman order or justice one might expect. At the end of his career Paul referred to the persecution he experienced at Lystra (2 Tim. 3:11). Earlier, when he explicitly referred to having been once stoned (2 Cor. 11:25), he had in mind the episode at Lystra. It is also possible, if not probable, that he alluded to this experience in the letter to the Galatians, sent poignantly to Lystra among other churches of Galatia: "I bear on my body the marks of Jesus" (6:17).

III. Timothy.–On his second missionary journey Paul met Timothy at Lystra (Acts 16:1-5). Timothy, who may have been converted as the result of Paul's first visit to Lystra, was highly regarded by the brethren at Lystra and Iconium. His Jewish mother had become a believer (with his grandmother, 2 Tim. 1:5); his father is described as a Greek (Acts 16:1) and thus would have belonged to the small elite class of Lystra who had been educated in Greek language and culture.

D. A. HAGNER

M. *See* GOSPELS, SYNOPTIC V.D.

MAACAH mā'ə-kə [Heb. *ma'ᵃkâ*–'stupid, foolish'(?)]; AV usually MAACHAH.

1. Son of Abraham's brother Nahor by his concubine Reumah (Gen. 22:24).

2. Wife of David; daughter of Talmai king of Geshur; mother of Absalom (2 S. 3:3; 1 Ch. 3:2).

3. Father of Achish king of Gath (1 K. 2:39); probably the same as MAOCH in 1 S. 27:2.

4. Granddaughter of Abishalom (Absalom); favorite wife of Rehoboam (2 Ch. 11:21); mother of Abijam (1 K. 15:2; 2 Ch. 11:20, 22); grandmother of Abijam's son King Asa. According to 1 K. 15:2; 2 Ch. 11:20f. she was the daughter of Absalom, but Tamar was Absalom's only daughter (2 S. 14:27), and Maacah was probably the daughter of Tamar and Uriel of Gibeah (cf. 2 Ch. 13:2; *see* MICAIAH **1**). In 1 K. 15:10, 13; 2 Ch. 15:16 Maacah is called the mother of Asa; this may be because she held the position of queen mother until he deposed her on account of her idolatrous practices.

5. Concubine of Caleb son of Hezron, and mother of Sheber, Tirhanah, Shaaph, and Sheva (1 Ch. 2:48f.).

6. Wife of Machir the Manassite (1 Ch. 7:16); but apparently called his sister in v. 15. The text is corrupt.

7. Wife of Jeiel from Gibeon; an ancestor of King Saul (1 Ch. 8:29; 9:35).

8. Father or ancestor of Hanan, one of David's mighty men (1 Ch. 11:43).

9. Father or ancestor of Shephatiah, chief officer of the Simeonites under King David (1 Ch. 27:16). N. J. O.

MAACAH mā'ə-kə [Heb. *ma'ᵃkâ*; Gk. *Maacha, Mōcha*]; AV also MAACHAH (1 Ch. 19:7); **MAACATH** mā'ə-kath [Heb. *ma'ᵃkāṯ*] (Josh. 13:13); AV MAACHATHITES; NEB MAACATHITES. A small Syrian kingdom in the Golan Heights S of Mt. Hermon, N of Gilead, and W of Bashan. The kingdom of Geshur, which is mentioned frequently with Maacah, adjoined it to the south. The name ABEL-BETH-MAACAH indicates that this city once belonged to Maacah.

In Dt. 3:14 the border of the MAACATHITES (the inhabitants of Maacah) and Geshurites defines the limits of the territory in Bashan conquered by Jair the Manassite (cf. Josh. 12:5). Josh. 13:11, 13 lists the land of the Maacathites and the Geshurites as part of the territory in Transjordan given to the half-tribe of Manasseh, the Reubenites, and the Gadites. The region's inhabitants, who were among the native peoples that Israel failed to expel, were Arameans. Consequently the name of the country is given as Aram-maacah in 1 Ch. 19:6, RSV (simply "Aram" in 2:23), and Maacah is the name of one of the sons of Nahor (Gen. 22:24).

Apparently this little kingdom had regained its independence by the time of David, for the mercenaries hired by the Ammonites for their encounter with David included a thousand soldiers from Maacah. Joab completely routed these Maacathites (2 S. 10:6-14). The kingdom became a vassal of Israel and may ultimately have been absorbed into the kingdom of Damascus.

See B. Mazar, *JBL*, 80 [1961], 16-28.

D. H. MADVIG

MAACATHITES mā-ak'ə-thīts [Heb. *hamma'ᵃkāṯî*; Gk. B *ho Machatei*, A *Machathi*]; AV MAACHATHITES, also MAACHATHI (Dt. 3:14); NEB also BETH-MAACA. The inhabitants of MAACAH. Maacathites mentioned by name are Ahasbai (2 S. 23:24; but cf. 1 Ch. 11:36; *see* MECHERATHITE), Jaazaniah (2 K. 25:23), Eshtemoa (1 Ch. 4:19), and Jezaniah (Jer. 40:8).

MAADAI mā'ə-dī [Heb. *ma'ᵃḏay*; Gk. *Moodi*, Apoc. *Momdios*]; AV Apoc., NEB Apoc., MOMDIS. One of the Israelites who divorced their foreign wives; a son of Bani (Ezr. 10:34; 1 Esd. 9:34).

MAADIAH mā-ə-dī'ə [Heb. *ma'aḏyâ* < *yhwh*–'Yahweh' + *mā'aḏ*–'shakes' or possibly Old South Arabic *m'd*–'promises']. A priest who returned from the Babylonian Exile with Zerubbabel (Neh. 12:5); cf. the names Moadiah in 12:17 and Maaziah in 10:8, either of which may refer to this person.

MAAI mā'ī [Heb. *mā'ay*]. A musician who took part in the procession at the dedication of the walls of Jerusalem (Neh. 12:36).

MAALEH-ACRABBIM mā-ə-le-ə-krab'im (Josh. 15:3, AV). *See* AKRABBIM, ASCENT OF.

MAANI mā'ə-nī.

1. (1 Esd. 5:31, NEB). *See* MEUNIM.

2. (1 Esd. 9:34, AV). *See* BANI **5.**

MAARATH mā'ə-rath [Heb. *ma'ᵃraṯ*; Gk. B *Magarōth*, A *Marōth*]. A city in the hill country of Judah, mentioned

between Gedor and Beth-anoth and along with Halhul, Beth-zur, and Eltekon (Josh. 15:59). The reading in B with *gamma* suggests an original *ghain* (cf. Lucian *Maarōth*), but A reads as though the *'ayin* had already become silent. The identification of Maarath with Maroth (Mic. 1:12) is, according to Simons, "very questionable" (*GTTOT*, § 1534). He (§ 319, D-4) and Abel (*GP*, II, 91) identified Maaroth with Beit-Ummar (-Immar), about 10.5 km. (6.5 mi.) N of Hebron and 1.2 km. (¾ mi.) W of the Bethlehem-Hebron highway. W. S. L. S.

MAAREH-GEBA mā'ə-rē-gē-bə [Heb. *(mim)ma'ᵃrē-gāḇa'*; Gk. A *(apó) dysmōn tēs Gabaa*–'from the west of Geba'; B *(apó) Maarugabe*]; RSV "place west of Geba"; AV "out of the meadows of Gibeah"; NEB "neighborhood of Gibeah." A place where Israelites lay in ambush against the Benjaminites (Jgs. 20:33, RV). Because of the reading in A the RSV and many scholars have emended the Hebrew to read *min-ma'ᵃraḇ*, "from the west of"; B, however, supports the Hebrew text. Simons suggested that the unemended text might be read "from the vicinity of Geba" (*GTTOT*, § 637; cf. NEB), but BDB translates "from the bare (open) space of Geba' (*si vera l.* ['if properly read'])" (p. 789).

A second problem is the possible identification of GEBA with Gibeah. Because of the textual problems, particularly the ambivalence of the Greek, it may be specious to insist on emending the text. A location in Benjamin near Baal-tamar is certainly indicated, but this site is also unknown. W. S. L. S.

MAASAI mā'ə-sī [Heb. *ma'śay*–'work (of Yahweh)']; AV MAASIAI. A priest who returned from the Babylonian Exile (1 Ch. 9:12). In Neh. 11:13 the corresponding name is Amashsai.

MAASEIAH mā-ə-sē'ə, mā-ə-sī'ə [Heb. *ma'ᵃśēyâ, ma'ᵃśē-yāhû*–'Yahweh's work'; Gk. usually *Maasaia*, also *Masaia, Maasia, Maasēa, Masēa* (for Gk. Apoc. see below)].

1. A Levite musician of the second order, among those appointed by David to make music when the ark was brought up to Jerusalem (1 Ch. 15:18, 20).

2. A Levite military commander who aided Jehoiada in overthrowing Queen Athaliah and putting Joash on the throne (2 Ch. 23:1).

3. A military officer under King Uzziah who helped to number the army under the direction of Hananiah (2 Ch. 26:11).

4. Son of King Ahaz of Judah; he was slain by Zichri of Ephraim in a war between Israel and Judah (2 Ch. 28:7).

5. The governor of Jerusalem during the reign of King Josiah; he assisted in repairing the temple (2 Ch. 34:8).

6. [Gk. Apoc. *Mathēlas*, Lucian *Maasias*]; AV MATTHELAS; NEB MATHELAS. A priest from the family of Jeshua who was required to divorce his foreign wife (Ezr. 10:18; 1 Esd. 9:19).

7. [Gk. Apoc. *Manēs*, Lucian *Maasias*]; AV EANES; NEB MANES. A priest from the family of Harim who was required to divorce his foreign wife (Ezr. 10:21; 1 Esd. 9:21). *See* MANES.

8. [Gk. Apoc. *Massias*]; AV, NEB, MASSIAS. A priest from the family of Pashhur who was required to divorce his foreign wife (Ezr. 10:22; 1 Esd. 9:22).

9. A layman from the family of Pahath-moab who was required to divorce his foreign wife (Ezr. 10:30; cf. "Moossias" in 1 Esd. 9:31, whose father is listed as Addi); possibly the same as **11** or **13.**

10. Father of the Azariah who helped to rebuild the wall of Jerusalem (Neh. 3:23).

11. One of those who stood at Ezra's right hand during the reading of the law (Neh. 8:4; cf. 1 Esd. 9:43, where the name is Baalsamus); possibly the same as **9** or **13.**

12. [Gk. Apoc. *Maiannas*]; AV MAIANEAS; NEB MAEANNAS; RSV mg. MAIANNAS. One of the Levites who interpreted the law to the people after Ezra's reading of it (Neh. 8:7; 1 Esd. 9:48).

13. One of the "chiefs of the people" who sealed the covenant with Nehemiah (Neh. 10:25 [MT 26]); possibly the same as **9** or **11.**

14. A Shilonite who lived in Jerusalem after returning from the Exile (Neh. 11:5; called Asaiah in 1 Ch. 9:5).

15. A Benjaminite ancestor of Sallu, who lived in Jerusalem after returning from the Exile (Neh. 11:7; not listed in 1 Ch. 9:7f.).

16, 17. Two priests who took part in the music at the dedication of the wall of Jerusalem (Neh. 12:41f.); either may be the same as **6, 7,** or **8.**

18. Father of Zephaniah the priest, who lived during the reign of King Zedekiah and the ministry of Jeremiah (Jer. 21:1; 29:25; 37:3).

19. Father of the false prophet Zedekiah (Jer. 29:21).

20. Son of Shallum; a doorkeeper in the temple during the reign of King Jehoiakim (Jer. 35:4).

21. (Jer. 32:12; 51:59, AV). *See* MAHSEIAH. N. J. O.

MAASIAI mā-as'ē-ī (Ch. 9:12, AV). *See* MAASAI.

MAASIAS mā-ə-sī'əs (Bar. 1:1, AV). *See* MAHSEIAH.

MAASMAS mā-as'məs [Gk. *Maasmas*]; AV MASMAN. One of the leading men sent by Ezra to obtain Levites, after it was discovered that the latter were not represented in the group returning to Jerusalem (1 Esd. 8:43).

MAATH mā'əth [Gk. *Maath*]. An ancestor of Jesus in Luke's genealogy (Lk. 3:26).

MAAZ mā'əz [Heb. *ma'aṣ*]. A descendant of Judah (1 Ch. 2:27).

MAAZIAH mā-ə-zī'ə.

1. [Heb. *ma'azyāhû*]. One of David's priests and the leader of the twenty-fourth course (1 Ch. 24:18).

2. [Heb. *ma'azyâ*]. A priest who took part in sealing the covenant of Ezra (Neh. 10:8 [MT 9]), possibly representing the family of priests who traced their lineage back to Maaziah **1.**

MABDAI mab'dī (1 Esd. 9:34, AV). *See* MAMDAI.

MACALON mak'ə-lon (AV, NEB, 1 Esd. 5:21). Gk. *Makalōn* here corresponds to *Machmas* in Ezr. 2:27. *See* MICHMAS, MICHMASH.

MACCABEES mak'ə-bēz [Gk. *Makkabaioi*]. Maccabeus is the name given to Judas son of Mattathias (*Ioudas ho kaloumenos Makkabaios*; 1 Macc. 2:4; 3:1; cf. Josephus *Ant.* xii.6.1 [266]), who defended the rights and traditions of the Jews in the 2nd cent. B.C. By extension his family and party were called Maccabees.

The name Maccabee has a rather obscure derivation. It may mean "extinguisher" or "quencher" of Hellenism (Heb. *mᵉḳabbî* < *kāḇâ*, "be extinguished, quenched"), or, more likely, it means "hammer," in reference either to Judas's crushing military feats or to the mallet or hammer shape of his head (cf. Mish. *Bekhoroth* vii.1; *maqqāḇî* < *maqqeḇeṯ*, "hammer"). "Hammerhead" is the most preferred explanation because commonly in the Hellenistic

world, and apparently in Judas's family (1 Macc. 2:2-4), people were named for their physical characteristics.

Judas's family is designated as the HASMONEANS in the rabbinic literature (Mish. *Middoth* i.6) and in Josephus (*Ant.* xi.4.8 [111]; xii.6.1 [265]; xiv.16.4 [490f.]; xv.11.4 [403]; xvi.7.1 [187]; xvii.7.3 [162]; xx.8.11 [190]; 10.3 [238]; 10.5 [247, 249]; *BJ* i.proem 7 [19]: 1.3 [36]; *Vita* 1 [2, 4]). This name derives from the great-great grandfather of Judas, Hashman (Josephus *Ant.* xii.6.1 [265]).

I. Historical Background
   A. Alexander the Great (356-323 B.C.)
   B. Ptolemaic Rule (323-198 B.C.)
   C. Seleucidian Rule (198-63 B.C.)

II. Maccabean Revolt
   A. Antiochus's Revenge (168-166 B.C.)
   B. Mattathias (166 B.C.)
   C. Judas Maccabeus (166-160 B.C.)

      2. Religious Freedom Gained (163 B.C.)
      3. Political Freedom Attempted (162-160 B.C.)
   D. Jonathan (160-143 B.C.)

I. Historical Background.–A survey of the historical background will clarify the reason for the Maccabean revolt.

A. Alexander the Great (356-323 B.C.). While the Persian empire was rapidly disintegrating, Philip II of Macedon was consolidating his forces and preparing to destroy it (Diodorus xvi.91.2f.; 92.3f.; Plutarch *Alexander* viii.5). He wanted to see Grecian control of the whole world. But in 336 B.C. he was murdered by his bodyguard Pausanius (Diodorus xvi.94.1-4; Plutarch *Alexander* x.4).

Philip's son Alexander III, the Great, was only twenty years old when he took the throne. Aristotle had tutored him since he was thirteen, and he was convinced that the Greek way of life was superior; consequently his dream was to continue his father's conquest of the world in order to hellenize it. His first two years of rule involved the consolidation of the Hellenic League (Arrian i.1.1–10.6; Plutarch *Alexander* xi-xiv; Diodorus xvii.1.1–16.4). In 334 he crossed the Hellespont and soundly defeated the Persian army at the foot of Mt. Ida by the river Granicus (the Troy area). This opened Asia Minor to Alexander, and in little more than a year he was at Issus. In the fall of 333 he defeated Darius III at Issus and marched southward, conquering Tyre and Gaza (Plutarch *Alexander* xi-xxv; Diodorus xvii.17.1–48.7; Curtius Rufus iv.6.7-30). While in Palestine (though it is difficult to know the chronological sequence) Alexander went to the temple in Jerusalem and offered sacrifices to God under the direction of the high priest Jaddua (Josephus *Ant.* xi.8.4f. [326-339]; cf. also T.B. *Yoma* 69a). Alexander was shown from the book of Daniel that he was the one predicted to destroy the Persian empire (cf. Dnl. 8:5-7, 20f.). He accepted this interpretation, and being favorably disposed, he granted the Jews' request that in Palestine, Babylonia, and Media they might live according to their ancestral laws and might be exempt from tribute every sabbatical year. Although the historicity of this account has been greatly disputed among scholars, it does show that the relationship between Alexander and the Jews was amicable, and history gives no reason to doubt this.

Alexander then proceeded to Egypt, conquered it without trouble, and spent the winter there. In the spring of 331 he marched east and by July, 330, he had defeated Darius and become king over Persia (Arrian iii.1-22; Plutarch *Alexander* xxvi-xliii; Diodorus xviii.49-73). He moved eastward as far as the Lower Indus and died in Babylon in 323 as a world conqueror when he was only four months short of age thirty-three (Arrian vii.28.1).

B. Ptolemaic Rule (323-198 B.C.). Alexander's death caused great strife among his generals as they attempted to gain control of portions of his kingdom. By 311 B.C. Seleucus was recognized as the ruler of Babylonia; this marked the commencement of the Seleucid dynasty/era (Appian *Syr.* 54). Between 323 and 301 Palestine was the battlefield in the strife among the generals. For eight years it was controlled by the Ptolemies, but in 315 it was taken by Antigonus (ruler of Asia Minor and northern Syria). Ptolemy recaptured it in 312, only soon to lose it again to Antigonus. In 301, however, Antigonus was killed in a decisive battle at Ipsus in Phrygia. An agreement had been made (in 303) that upon Antigonus's defeat Coelesyria should be given to Ptolemy. Since Ptolemy had not taken part in the battle as had been planned, Seleucus felt that he (Seleucus) should receive Coelesyria, but Ptolemy forestalled him and took the land. This action was the bone of contention between the Seleucidian and Ptolemaic houses for decades to come. Palestine remained under the control of the Ptolemies until won by the Seleucids led by Antiochus III (the Great) at the Battle of Panias (Caesarea Philippi of the NT) in 198. (Josephus *Ant.* xii.3.3 [132-37]; Polybius xvi.18f.; xxviii.1; Dnl. 11:13-16). Thus the Seleucids finally acquired the land that they considered rightly theirs.

C. Seleucidian Rule (198-63 B.C.). The rule of the Seleucids over Palestine lasted until Pompey made it a Roman province in 63 B.C. This article discusses the period only from 198, when Palestine came under Seleucid control, until 143, when Israel gained its independence (for the later development, *see* HASMONEANS II, III). Upon the victory over the Ptolemies, Antiochus III allowed the Jews to worship according to their laws and to complete and maintain the temple. He exempted the council of elders, priests, and the scribes of the temple from taxes; the citizens of Jerusalem enjoyed this exemption for three years and after that period were exempted from a third part of their taxes. Antiochus also released the prisoners (Josephus *Ant.* xii.3.3f. [138-153]). The Jews enjoyed a brief period of tranquillity under the Seleucids because of these privileges and also because their rulers were concentrating their efforts in the West.

Rome had defeated both Hannibal at Zama (near Carthage) in 202 and the Macedonian monarch in 197. Because of the new threat, the Seleucids made a peace treaty with Egypt (Polybius xxviii.20; Appian *Syr.* 5; Josephus *Ant.* xii.4.1 [154]; Dnl. 11:17). Antiochus then invaded Thrace in 196, and with the persuasion of Hannibal he invaded Greece (which the Romans had evacuated) in 194. The Romans retaliated, however, and defeated Antiochus at Thermopylae in 191 and at Magnesia in Asia Minor in 190. At Apamea in 189 a peace treaty was signed; Antiochus agreed to give up Asia Minor N and W of the Tarsus Mountains and much of his military force and to pay a heavy indemnity over a twelve-year period. To guarantee the payment of the indemnity, the Romans took twenty hostages to Rome, among them Antiochus's son Antiochus IV Epiphanes (Appian *Syr.* 36-39; Polybius xx-xxi; Livy xxxvi-xxxvii; Dnl. 11:18f.; 1 Macc. 1:10; 8:6-8; Josephus *Ant.* xii.10.6 [414]).

Antiochus III was succeeded by his second son Seleucus IV Philopater in 187. In 175, however, Heliodorus assassinated Seleucus to seize the throne. Antiochus's third son, Antiochus IV Epiphanes, had just been released from Rome as a hostage, and with the help of Eumenes II king of Pergamum he ousted Heliodorus and made himself king. Because his newly acquired kingdom lacked political and financial stability, Antiochus IV attempted to unify it by a vigorous hellenization program (Tacitus *Hist.* v.8). One of the unifying factors was religion; he

encouraged the people (*ca.* 169) to worship his own person in the form of the Olympian Zeus (Dnl. 11:21-24). Although his name *Theos Epiphanēs* means "the manifest god," his enemies called him *Epimanēs* (a change of only one letter in Greek), which means "madman" or "insane" (Polybius xxvi.10).

Soon after Antiochus had acquired the throne, he had to settle a dispute between the high priest Onias III, who was pro-Ptolemaic, and Onias's brother Jason (the Greek name that he preferred over Jesus for his Hebrew name Joshua), who was pro-Seleucid. By offering a larger payment of money to Antiochus and by pledging his wholehearted support in the hellenization of the Jerusalemites, Jason secured the high priesthood in 174 (1 Macc. 1:10-15; 2 Macc. 4:7-17; Josephus *Ant.* xii.5.1 [237-241]). In 171 Menelaus, a friend of Jason, obtained the high priesthood by offering three hundred more talents than Jason and by promising a vigorous hellenization program. Antiochus gladly accepted this offer because he was in desperate need of funds and because a high priest outside the Aaronic line (according to 2 Macc. 4:23; 3:4 Menelaus was a Benjaminite) destroyed a great unifying force among the Jews. The nomination also deprived the Jews of the privilege of selecting their own high priest. Jason went into hiding in the Ammonite country.

The next year, in 170, Ptolemy VI Philometor, who was a minor, was advised to avenge Panias by recovering Coelesyria from the Seleucids. Antiochus, hearing of their plans, with a large army invaded Egypt in 170/169 and defeated Ptolemy VI. He proclaimed himself king of Egypt and allowed rivalry to exist there by making Ptolemy VI Philometor king of Memphis and his brother Ptolemy VIII Euergetes king of Alexandria (Dnl. 11:25-27). Upon returning from Egypt, Antiochus heard that the inhabitants of Jerusalem, with the help of Jason (who had come out of hiding in the Ammonite territory), had had to take refuge in the Acra. In fact, Menelaus had plundered the temple and the people had begun to riot. Furthermore, it had been rumored that Antiochus had died in Egypt. This had emboldened Jason to come out of hiding and help the Jerusalemites avenge Menelaus's plunder of the temple. Upon hearing this Antiochus felt that this was a rebellion against himself and thus decided to subdue Jerusalem (2 Macc. 5:11-17). On returning to Jerusalem Antiochus, with Menelaus, desecrated and plundered the temple of its treasures and left the city under the rule of one of his commanders, Philip, a Phrygian (1 Macc. 1:20-29; 2 Macc. 5:18-22; Josephus *Ant.* xii.5.3 [246f.]). (On the chronological problems of these events see *HJP*^{2}, I, 149-154, esp. nn. 32, 37.)

II. Maccabean Revolt.–A. Antiochus's Revenge (168-166 B.C.). In the winter of 169/168, the rival brothers Ptolemy VI and Ptolemy VIII agreed to end their dispute and united against their uncle Antiochus IV. Thus, in the spring of 168 Antiochus IV invaded Egypt a second time. He captured Memphis, but when he attempted to subdue Eleusis, a suburb of Alexandria, the Roman general Popillius Laenas gave him an ultimatum from the senate to withdraw immediately from Egypt (cf. Polybius xxix.2.1-4; 27.1-8; Livy xlv.12.1-6; Diodorus xxxi.2; Velleius Paterculus i.10.1f.; Appian *Syr.* 66; Justinus xxxiv.3; Dnl. 11:28-30). Antiochus immediately retreated, having learned of Rome's power as its hostage for fourteen years.

Embittered, Antiochus decided to establish Palestine as a buffer state between him and the Roman encroachment (Polybius xxix.27.9; Dnl. 11:30). He destroyed the walls of Jerusalem and refortified the old Davidic city making it the pagan stronghold (Acra). Considering himself Zeus Epiphanes, he ordered a vigorous hellenization program that would exterminate the Jewish religion. He forbade the Jews to celebrate the sabbath and feasts, to offer the traditional sacrifices, and to perform circumcision, and he ordered the destruction of the copies of the Torah.

The Jews were ordered to offer up unclean sacrifices on idolatrous altars and to eat swine's flesh (2 Macc. 6:18). The climactic act was on 25 Chislev (Dec. 16) 167, when the temple of Jerusalem became the place of worship of the Olympian Zeus. The altar of Zeus was erected on the altar of burnt offering, and swine's flesh was offered on it (Dnl. 11:31f.; 1 Macc. 1:41-64; 2 Macc. 6:1-11).

B. Mattathias (166 B.C.). In every village of Palestine sacrifice was to be offered to the heathen gods under the supervision of imperial representatives. In the village of Modein (27 km., 17 mi., NW of Jerusalem) an aged priest named Mattathias defied the command of Antiochus IV's legate to offer the sacrifice on the heathen altar. When another Jew was about to comply, Mattathias killed him and the legate and destroyed the altar, saying, "Let everyone who is zealous for the law and supports the covenant come out with me" (1 Macc. 2:15-27; Josephus *Ant.* xii.6.1f. [265-272]; cf. Dnl. 11:32-35). Mattathias, his five sons (John, Simon, Judas, Eleazar, and Jonathan) and many other Jews fled to the mountains; this marked the beginning of the Maccabean revolt.

Mattathias and his followers exhorted Jews everywhere to join their struggle against hellenization. They gained the support of the Hasidim, those who were faithful to the Torah. They tore down heathen altars and circumcised children who had been left uncircumcised. After a long life, Mattathias died in 166. He exhorted his sons to continue the struggle and appointed his third son Judas as the commander of the war (1 Macc. 2:42-70; Josephus *Ant.* xii.6.2-4 [273-286]).

C. Judas Maccabeus (166-160 B.C.). *1. Rededication of the Temple* (166-164 B.C.). The selection of Judas to carry on the struggle was the right one, for he proved to be a very capable leader in defeating the Seleucids. In his first year he defeated the Syrian governors Apollonius and Seron (1 Macc. 3:10-26; Josephus *Ant.* xii.7.1 [287-292]).

Part of Antiochus's inability to put down the Maccabees was caused by the trouble he had in the East, which prevented him from being involved in Judea himself. Instead, he ordered Lysias, regent of the western part of the empire (Syria), to stop the rebellion and to destroy the Jewish race (1 Macc. 3:32-36; Josephus *Ant.* xii.7.2 [295f.]). Lysias sent a large army under the leadership of Ptolemy, Nicanor, and Gorgias. So confident they were of victory that traders went along to purchase Jewish slaves (1 Macc. 3:38-41). But Judas decisively defeated Gorgias at Emmaus, causing the Syrian soldiers to flee (1 Macc. 4:1-27; Josephus *Ant.* xii.7.4 [305-312]).

In 164 Lysias made one last attempt against the Jews by personally leading a larger army to attack Jerusalem from the south. Judas, however, completely defeated him in Beth-zur (24 km., 15 mi., S of Jerusalem). Lysias retreated, and Judas marched to Jerusalem and regained all of Jerusalem except the Acra. Having captured the temple mount, he destroyed the altar of the Olympian Zeus, built a new altar, rebuilt the temple, and selected a priest who had remained faithful to Yahweh. Thus on 25 Chislev (Dec. 14) 164, exactly three years after its desecration, the temple was rededicated and the daily sacrifices were restored (1 Macc. 4:36-59; 2 Macc. 10:1-8; Josephus *Ant.* xii.7.6f. [316-326]). This event marked the beginning of the Jewish Feast of Dedication or Lights (Hanukkah). Judas then fortified the Jerusalem walls and the city of Beth-zur. This completed the first phase of the Maccabean struggle. The Maccabees could rejoice, for they had not experienced defeat.

2. Religious Freedom Gained (163 B.C.). Judas's vic-

tories made Judah reasonably secure. Two things, however, needed to be accomplished. First, although Judah was reasonably secure, it was felt that all the Jews of Palestine had to be independent from Antiochus's rule. After several campaigns this freedom was won.

Second, the Maccabees wanted to end Syrian control of the Acra in Jerusalem. The Syrian presence was a constant reminder of Antiochus's hellenization program intended to exterminate the Jewish religion. When Judas laid siege to the Acra in the spring or summer of 163, some Syrian soldiers and Hellenistic Jews escaped and went to Antioch for help (1 Macc. 6:18-27).

Antiochus IV died in 163 (Polybius xxxi.9.3f.; Josephus *Ant.* xii.9.1 [356-59]) and was succeeded by his nine-year-old son Antiochus V Eupator. Just before his death, Antiochus IV had appointed his friend Philip as the regent and guardian over Antiochus V. But Lysias claimed that these privileges had been given to him at an earlier date, and so he crowned Antiochus V (both he and Philip were in Antioch when Antiochus IV died). Because of the troubles in Jerusalem, Lysias with the boy-king went south and defeated Judas at Beth-zechariah (18 km., 11 mi., SW of Jerusalem). There Judas's youngest brother Eleazar was killed.

Lysias then laid siege to Jerusalem (1 Macc. 6:28-54). Judas faced severe food shortages (because it was the sabbatical year) and was about to be defeated. Lysias, however, received the news that Philip was marching from Persia to Syria to claim the boy-king Antiochus V and the kingdom; thus he was anxious to make a peace treaty with Judas. Judas agreed to tear down the walls of Jerusalem, and Lysias guaranteed religious freedom to the Jews (1 Macc. 6:55-63). The Jews, however, were still under the Seleucidian rule.

3. Political Freedom Attempted (162-160 B.C.). Having obtained religious freedom, Judas now wanted political freedom. To counteract his drive, the Seleucids strengthened the Hellenistic elements among the Jews. Lysias, it seems, appointed the high priest Alcimus (Jakim or Jehoakim) who, although of Aaronic descent, was ideologically a Hellenist (cf. 1 Macc. 7:14; 2 Macc. 14:3-7; Josephus *Ant.* xii.9.7 [384-88]; xx.10.3 [235]) and thus unacceptable to Judas.

Meanwhile in Syria, Demetrius I Soter, nephew of Antiochus IV and cousin of Antiochus V, escaped from Rome (where he had gone as a hostage when Antiochus IV had been released), killed both Lysias and Antiochus V, and assumed the throne. He confirmed Alcimus as high priest (162) of Israel and sent him with an army to Judea under his general Bacchides. The Hasidim accepted Alcimus as the high priest probably, it can be conjectured, because he was of Aaronic descent and because the Syrians (or Seleucids) had guaranteed them freedom of worship. Thus the Hasidim broke from Judas's ranks, but they quickly returned when Alcimus, disregarding his promise not to harm them, slew sixty of them (1 Macc. 7:15-20; Josephus *Ant.* xii.10.2 [393-97]). Hence Alcimus asked Demetrius for more military help against Judas and his followers, called the HASIDEANS (2 Macc. 14:6). Demetrius sent NICANOR, but he was defeated and killed at Adasa (6 km., 4 mi., N of Jerusalem) on 13 Adar (Mar. 9) 161, (which the Jews celebrate annually as Nicanor's Day); the army fled to Gazara (32 km., 20 mi., W of Adasa) and was destroyed. Alcimus fled to Syria (1 Macc. 7:26-50; Josephus *Ant.* xii.10.3-5 [398-412]).

Judas sent for help from Rome, but before any could arrive, Demetrius sent Bacchides with Alcimus to avenge Nicanor's death. Because of the might of the Syrian army, many deserted Judas, and in the Battle of Elasa (about 16 km., 10 mi., N of Jerusalem) he was slain (160). His brothers Jonathan and Simon took his body to be buried at Modein (1 Macc. 8:1–9:22; Josephus *Ant.* xii.10.6–11.2 [413-434]).

D. Jonathan (160-143 B.C.). Judas's death was a great blow to morale. The Hellenists were temporarily in control while Jonathan and his followers were in the wilderness of Tekoa, waging only guerrilla warfare. Bacchides fortified Jerusalem and other Judean cities against possible Maccabean attacks. In May, 159 B.C., Alcimus died, and no successor was chosen. Soon after, Bacchides left his command in Judah and returned to Antioch (157); he went back to Jerusalem at the request of the Hellenists but was defeated at Beth-basi (10 km., 6 mi., S of Jerusalem). He made a peace treaty with Jonathan and then returned to Antioch.

This treaty weakened the Hellenists' position. Jonathan made Michmash (14 km., 9 mi., S of Jerusalem) his headquarters, where he judged the people, punishing the hellenizers (1 Macc. 9:23-27; Josephus *Ant.* xiii.1.1-6 [1-34]). During the next five years his power increased. In 152 he was further helped by internal struggles for power in Syria. A pretender, Alexander Balas, who claimed to be the son of Antiochus Epiphanes, challenged Demetrius I. Both desired Jonathan's support. Fortunately, Jonathan sided with Alexander Balas, for in 150 Demetrius was slain in a battle against Alexander. Alexander made Jonathan a general, governor, and high priest of Judah and considered him one of his chief friends (1 Macc. 10:22-66; Josephus *Ant.* xiii.2.3f. [46-61]; 4.1f. [80-85]). This was certainly a strange alliance, i.e., Alexander Balas, professed son of Antiochus Epiphanes, in league with a Maccabean!

New troubles came in Syria. Demetrius's son, Demetrius II Nicator, challenged Alexander Balas in 147 and finally defeated him in 145. Since Demetrius II was only sixteen and inexperienced, Jonathan took the opportunity to attack the Acra in Jerusalem, where the Hellenistic Jews were still in control. Although Demetrius II opposed the attack, he later conceded to Jonathan by confirming his high-priesthood and granting his request for three districts in southern Samaria. Jonathan was not able to conquer the Acra, however.

In 143 Demetrius II's army rebelled, and Diodotus Trypho (a general of Alexander Balas) claimed the Syrian throne (becoming its first non-Seleucid king) in the name of Alexander Balas's son Antiochus VI. Jonathan took advantage of the situation and sided with Trypho, who in turn made him civil and religious head of the Jews and his brother Simon head of the military. Trypho, however, fearful of Jonathan's success, deceived him, arranged a meeting with him, and subsequently killed him. Jonathan was buried at Modein (1 Macc. 10:67–13:30; Josephus *Ant.* xiii.4.3–6.6 [86-212]).

Jonathan was succeeded by Simon, the only remaining son of Mattathias. A new phase of the Maccabean rule had emerged. Although generally speaking one does apply the term "Hasmonean" to the whole of the Maccabean family, it is more specifically applied to the high-priestly house from the time of Simon to Rome's intervention in 63 because in that period the Maccabean dream had finally come true, namely, the Israelites had become an independent nation. Hence the political and religious life was headed by one family or dynasty — the Hasmoneans.

MACCABEES, BOOKS OF. Books of the OT Apocrypha (1 and 2 Maccabees) and Pseudepigrapha (3, 4, and 5 Maccabees). Since the history of the Maccabean period is nowhere better delineated than in 1 and 2 Maccabees, this article concentrates on the exposition of those books, treating other topics synoptically. Outside the Protestant canon of Scripture, few documents are of greater importance for the history and theology of the faith.

IV. Third, Fourth, and Fifth Maccabees

I. Historical Introduction.–Alexander the Great defeated the Persians at the Battle of Issus in 333 B.C., and after further whirlwind victories and unexampled triumphs, he died an untimely death ten years later. His rapidly gained empire passed to his generals, and thus Greeks came to occupy Asiatic thrones. Palestine survived precariously and sometimes turbulently between the rival power blocs of Egypt and Syria. In 198 Antiochus III finally conquered Syria, which became part of the Seleucid empire begun in Babylonia in 312. (Seleucid chronology is discussed in *ORHI*, II, 23f. Round dates are sufficient here.) The Jews, some already Hellenistic in tendency and unfaithful at heart to the strict religion of the OT, accepted Antiochus III favorably enough, and the zealous observers of the law were left at peace. The whole structure and being of Judaism was threatened, however, after Antiochus IV Epiphanes came to the Syrian throne in 175.

Antiochus IV, a typical oriental despot, saw an outward Judaism that Moses would have failed to recognize, for it was rotten to the core. Moreover, its worst enemies were within its own ranks. Small wonder that the tyrant failed to make sufficient allowance for the sacredness of the high priest's office and treated it as something to sell for profit — there were Jews by blood far more blameworthy than himself. He determined further to abolish all Mosaic ceremonial and observance and compel the Jews to conform to a unified Greek culture. The extremity of these measures saved the historic faith by arousing a frenzy of religious zeal in the family of the Maccabees, who prevailed against fantastic odds and saved the Jewish nation, albeit in a bloodbath.

Mattathias sparked the Maccabean rebellion and led it from 168 until 166 B.C. Of his sons, Judas Maccabeus exercised command until 161, Jonathan to 143, and Simon until 135. Fortunately for the Jews, a period of plot and counterplot followed Antiochus's death in 164. His young son Antiochus V Eupator had a brief nominal reign but with his regent was assassinated by the treachery of Demetrius I Soter (162-150), who was ousted in turn by the upstart Alexander Balas (150-145). Revolts punctuated the reign of Demetrius II Nicator (145-138); his successor, Antiochus VII Sidetes (138-128), was the last Syrian monarch to reign within the main Maccabean period.

For a map of Palestine under the Maccabees, *see* Vol. I, Map XV.

II. First Maccabees.–A. Literary Introduction. The testimony of Origen and Jerome, reinforced by internal textual evidence, points to a Hebrew original for 1 Maccabees that perished at an early date, leaving the Greek text as the primary extant witness. Swete (*OTG*, III, 594-661) covers all the uncial evidence. Two Latin and two Syriac recensions of the Greek exist.

The author, an unknown but burning patriot, avoids the name of God and does not ostensibly preach. His religion seems implicit rather than explicit, Sadducean rather than Pharisaic, natural rather than supernatural; yet he possesses a religious sincerity of his own. The events of the narrative, accurately presented, range from 175 to 135 B.C. The date of writing may be given roundly as 100 B.C., with editorial opinions swinging in both directions.

The etymology of "Maccabee" is an unsolved problem. The name is a nickname adapted from a Hebrew or Aramaic word subsequently transliterated as Gk. *makkabaios*. The process of development from the original root to the nickname and thence to the Greek transliteration provided ample opportunity for changes in the vocalization and spelling of the original word (Goldstein, pp. 230f.). Jerome (*Prologus Galeatus*) states that 1 Maccabees was written in Hebrew, and Origen (Eusebius *HE* vi.25) gives the title as Gk. *sarbēthsabanaiel* (*LCL* ed. II, 74) or *sarbēth sarbane ēl* (H. Valesius, *Eusebius Pamphili Ecclesiasticae Historiae* [1720]), another enigmatic transliteration from a Semitic original, variously construed as "history of the house of the warriors" (J. Oulton and H. J. Lawlor, *HE* [*LCL*], II, 74f.), "the Book of the House of the Princes of God" (W. Brownlee, *IDB*, III, 203), etc. Though Origen's title has no direct relationship in meaning to *makkabaoi*, it does reflect knowledge of a Hebrew (or Aramaic) version of the book. The name "Maccabees" does not appear in the Talmud or midrash; there the equivalent term is "Hasmoneans" (cf. Mish. *Middoth* i.6; 1 Macc. 4:46).

The most widely accepted solution for *makkabaios* is that found in G. Dalman, *Grammatik des jüdisch-palästinischen Aramäisch und aramäische Dialektproblem* (2nd ed. 1905), who postulated an original *maqqᵉḇ'* or *maqqᵉḇay*, both similar to Heb. *maqqeḇeṯ*, "hammer, mallet." Thus, "Maccabee" could mean "hammer," i.e., the one who hammers or strikes the enemy, but Dalman also suggested the translation "(he whose head is shaped like) a hammer" on the basis of *maqqᵉbān* (p. 178 n. 3; cf. Mish. *Bekoroth* vii.1; T.J. *Bekoroth* 43b). Other suggestions include "general," from Arab. *manqab*; "(a man with unusual) nostrils," from Syr. *mqb' dnḥyr'* (lit. "hole of the nose, nostril"; F. Perles, *JQR*, 17 [1926/27], 403-406); "designated by the Lord," from Heb. *nāqaḇ*, "name, designate" (A. A. Bevan, *JTS*, 30 [1929], 191f.); "(source of) hope" from Heb. *miqweh*, etc. (see *HJP*^{2}, I, 158; *Jew.Enc.*, VIII, 238).

B. Historical Prologue, Ch. 1. Summary. The prologue is a lightning sketch, partially inaccurate, of Alexander's last ten years, which marked the inception of Greek influence in the East. The writer then leaped straight to the far-off consequence of Alexander's campaigns, the

accession to the Syrian throne in 175 of Antiochus IV Epiphanes, the pagan villain of all that is to follow (vv.1-10). The apostate, hellenizing, Torah-breaking party within Judaism, however, not Antiochus, was the real root of all the trouble (vv. 11-15). Antiochus made a successful military campaign against Egypt (vv. 16-19) and a first raid on the temple to pillage its wealth (vv. 20-28), followed by a dastardly sabbath attack on Jerusalem itself (vv. 29-40). Finally he attempted to exterminate the Jewish faith but only made martyrs (vv. 41-64).

Notes. 1:10. Greek *Epiphanēs,* "manifest, renowned, etc." — an honorific title of pagan deities self-claimed by Antiochus, speedily turned to the mocking assonance *Epimanēs,* "madman." Gk. *rhíza,* Heb. *šōreš,* "root" — better, as Antiochus was an end product, "sprout" or "shoot." For the root metaphor with good implications, cf. Isa. 11:1; Rev. 5:5; with bad connotations, Dt. 29:18; 1 Tim. 6:10. He. 12:15 is more complex than Dt. 29:18 and seems to mix both metaphors. See further *TDNT,* VI, *s.v.* ῥίζα (Maurer).

1:15. Greek *akrobystía* here means not uncircumcision, but epispasm, surgical manipulation of the prepuce to conceal evidence of circumcision — the extremity of apostasy. Many Jews wished to exercise naked with their Greek friends in the new gymnasium and avoid being ridiculed because of their race. Nakedness in public was abhorrent enough to their orthodox brethren. See Celsus *De medecina* vii.25. The Greek technical verb is *epispáō,* used in the middle; see 1 Cor. 7:18. The Talmud uses *mšk 'rlh,* "stretch the prepuce" (e.g., *Sanhedrin* 38b, etc.). For copious references see Winer, *Biblisches Realwörterbuch,* I (1847), *s.v. "Beschneidung,"* esp. pp. 160f. Cf. also Bauer, rev., p. 299; SB, IV, 33f.; *TDNT,* VI, *s.v.* περιτέμνω (Meyer).

1:34. "Sinful people" — cf. "strangers," v. 38 — probably means apostate Jews rather than the heathen garrison.

1:36. "Adversary" — Gk. *diábolos,* Heb. *śāṭān* — is an interesting collective personification. The stone building and all the men inside formed a fused entity in the writer's mind.

1:45-49, 56f. With devilish insight the very pillars of Judaism are attacked — temple, sabbath, law, circumcision, abstinence from pork, etc. Jewish horror of the pig went far beyond the pentateuchal food prohibitions in Lev. 11:7; Dt. 14:8 — cf. modern Islam. Frequently the Talmud will not give the animal its name, *ḥᵃzír,* but employs the circumlocution of abhorrence, *dbr 'ḥr,* lit. "another thing." Cf. further Prov. 11:22; Isa. 65:4; 66:3, 17; Mt. 7:16; etc. The barbarity of Antiochus's extremes fanned the flames of martyr zeal.

1:54. The *bdēlygma erēmōseōs,* the abomination of desolation, Heb. *šiqqûṣ šōmēm* and cognates, the "desolating sacrilege" is here specifically the small idol altar superimposed on the altar of burnt offering (cf. v. 59), the crowning insult to Judaism's temple and God. Cf. Dnl. 9:27; 11:31; 12:11, Greek and Hebrew. Mk. 13:14 may point symbolically to the antichrist; cf. Mt. 24:15. *See* DESOLATING SACRILEGE; see further *s.v.* "Abomination of Desolation" in *HDB; Jew.Enc.;* cf. SB, I, 951; *TDNT,* I, *s.v.* βδέλυγμα (Foerster).

C. Career of Mattathias, 2:1-70. Summary. Mattathias defied the king's edict to offer heathen sacrifice, slew lawfully an apostate Jew on the detested heathen altar, and declared open war by slaying the king's officer and summoning others to his revolt (vv. 15-30). A thousand Jews who had not sided with Mattathias were attacked on the sabbath and died without resistance rather than break the law. But Mattathias elected to resist if necessary. Sympathetic compatriot elements joined him (vv. 31-48). The dying charges of old Mattathias included a briefer and more law-oriented version of He. 11 and the appointment of Judas Maccabeus as his successor (vv. 49-70).

Notes: 2:6. Blasphemy is by derivation spoken and invisible; sacrilegious deeds are included only figuratively. Cf. 2 Macc. 8:4, etc.; *TDNT,* I, *s.v.* βλησφημέω (Beyer).

2:19f. Cf. Peter in Mt. 26:33. Mattathias emerges better.

2:41. A difficult decision for Jews who loved precedent. The proscription of sabbath attack is still a heavy military disadvantage.

2:42. The aloof Hasidim, spiritual ancestors of the Pharisees, were stricter in observance but joined Mattathias through pressure of circumstance.

2:44ff. The boldness of the Jews against the Seleucids is due to shining courage, Palestinian topography, and guerrilla potential.

2:57. Wace, *in loc.*: "The continuance of the temporal kingdom was conditional (Ps. 132:12) and . . . forfeited. But the spiritual kingdom remains in the line of David for ever and ever through the eternity of the kingdom of Christ."

D. Career of Judas Maccabeus, 3:1–9:22. Summary. The incredible military successes of Judas stretched in an almost unbroken chain till his death on the field of battle. A bold initiative in attack was his guiding principle. Against frightening odds he regained Jewish religious independence and rededicated the profaned temple. His lifetime witnessed also the death of Antiochus and the alliance with Rome. See *HNTT,* pp. 464-68. In the poetic panegyric in his praise (3:2-9) he is aptly likened to giant and lion. Selfless, a man of deeds and not words, he fought fanatically and singlemindedly for the faith of his fathers. Like the Homeric Agamemnon, he was a "king of men."

Notes. 3:45ff. A scene of infinite drama and pathos. Within sight of Jerusalem, occupied but soon to be regained, Judas and his followers accurately and expectantly enacted the sacred ritual. They then went forth in frenzy to a holy war. Before such men an Antiochus may well tremble.

4:1-61. The reader gasps at the defeats of the stronger Gorgias and Lysias and then at the bold reappropriation of the temple for God, literally under fire. The stones of the abomination of desolation were ejected with loathing (v. 43), but the altar of burnt offering posed a casuistic problem (vv. 44f.): which weighed more, the recent desecration or the former consecration? Because the matter could not be settled without a prophet and there had been none since Malachi, the stones were dismantled but carefully preserved for a later decision (Mish. *Middoth* i.6).

5:5. Greek *anathematízō* and Heb. *ḥāram* mean "devote to extermination" — as enemies of religion. Cf. Saul's orders to wipe out the Amalekites (1 S. 15) and his disobedience.

5:16. Greek *ekklēsía* signifies (1) a summoned pagan assembly; (2) the called Jewish theocracy; (3) the called Christian Church.

5:19. Disobedience brought dire consequences; see vv. 55-62.

6:8. The king's psychological ailment was plausibly attributed to remorse for sacrilege, which Josephus (*Ant.* xii.9.1 [357-59]), against Polybius, connected with the Jerusalem temple.

6:37. Probably two or three warriors rode each elephant, not thirty-two; see *APOT* and Wace. "Tower" doubtless meant a glorified saddle with protective canopy. Habituating the elephants to smaller accompanying animals (v. 36) and inciting them with fermented fruit liquors (v. 34) sound graphic and accurate. Eleazar, youngest brother of Judas, was crushed as he killed an elephant he thought carried Antiochus V Eupator (vv. 43-46).

6:39. Prose burst into Homeric poetry, in exquisite description.

6:47-54. The admission of Jewish defeat establishes the honesty of the writer. Note how the personal ambition of Lysias saved the Jews (v. 55), how the unscrupulous Lysias broke the treaty (v. 62), and how Syrian rivalry and intrigue for the throne saved Judas once again (7:4).

7:5ff. Cf. vv. 21ff. The contemptible apostate compatriots whom Judas had roughly treated hated him.

7:8-20. The sneaking treachery and inept, futile murderings of Bacchides brought no military advantage. He beguiled certain trusting Hasideans with the bait of a high priest Alcimus, of the right family though otherwise unworthy, but was rightly spurned by the sturdy, perceptive Judas. Judas and the Hasideans doubtless made uneasy bedfellows; cf. 2:42.

7:26. The relationships of Judas and Nicanor are very differently portrayed in 2 Macc. 14. Change of heart or treachery with a time interval might reconcile some of the statements, but probably the tradition itself contains a discrepancy.

7:33. Given religious freedom, the Jews did not mind praying for a secular overlord.

8:1-32. The Jewish approach to Rome aimed at freedom from the Syrian yoke — and Rome loved to curb larger powers by temporary magnanimity toward smaller ones. Cordial in its inception, tragic in its final outcome, this move of Judas is of profound significance in the history of religion. The writer's assessment of the Romans, secondhand and too laudatory (cf. v. 16) and also inaccurate in minor particulars (vv. 8, 15, etc.), is yet amazingly shrewd and balanced in essentials. But v. 13 has ominous undertones, perhaps imperfectly understood. Judas seemed, humanly speaking, to make a good policy move (v. 17), but it came too late to serve the immediate crisis and led to the ultimate downfall of his nation. His fatal misjudgment, often repeated in history, was that because the friendship of the larger power was prompt, it would also be disinterested.

9:10-18. The Jews' breathtaking courage and hours of stubborn resistance against a larger host resulted in final defeat and the fall of one of the greatest battle heroes of all ages — but defeat in a blaze of imperishable glory!

E. Career of Jonathan, 9:23–12:53. Summary. 9:23-73. The death of Judas left the patriots discomfited and leaderless. Famine and apostate reprisals encouraged by Bacchides caused much suffering, and Jonathan was pressed into command. Although Jonathan lacked the admirable selflessness and piety of Judas, his more earthy cunning and ruthlessness made him a skillful leader and brought him to pinnacles of worldly glory unconceived by Judas. Bacchides, endeavoring to crush him, found his efforts strangely thwarted.

10:1-89. Balas, probably a low-born pretender, styled himself Alexander son of Antiochus Epiphanes and challenged Demetrius for the Syrian crown (*see* ALEXANDER BALAS). His incredible rise was furthered by Demetrius's being obnoxious to Rome and hated by his own subjects for drunkenness and misrule. Demetrius, proud potentate at heart, offered Jonathan inadequate concessions; Jonathan cleverly profited but entirely ignored the other side of the bargain (vv. 10f.). Balas, knowing his man, bid higher for Jonathan's favor, recognizing his sovereignty and conceding him the high-priesthood (v. 20). Probably Jonathan neither knew nor cared whether his patron's blood was royal, desiring merely the best bargain. Demetrius, now maddened by lost opportunity, tried in magnificent style to outbid Balas (vv. 25-45), but the Jews distrusted him and threw in their lot with the pretender. Two years later, in 150, Demetrius fell in battle, and Balas triumphed (v. 50). The upstart, seeking to consolidate his prestige, married the daughter of Ptolemy VI Philometor, and his friend Jonathan rose with him — though the pomp of both men smacked somewhat of nouveau riche. In 148 a second Demetrius, son of the slain king, advanced his claims against Balas. He scornfully challenged Jonathan (vv. 70f.), but the Maccabean, more at home on the battlefield than in the royal purple, gained a resounding victory, which led him to further honors.

11:1-74. Ptolemy guilefully and slanderously turned against his new son-in-law Balas, minded to gain Syria for himself. He offered hypocritical support and his already married daughter to Demetrius. Balas was slain in battle, but Ptolemy himself died within days. The new Syrian monarch (*ca.* 144) was Demetrius II, but Trypho produced another claimant: young Antiochus son of Balas. Jonathan rode the rough seas of rival dynasties with remarkable skill but learned that Demetrius was not to be trusted.

12:1-53. Jonathan by embassy renewed covenant with Rome and forged friendship with Sparta. Both the Jews and Spartans believed that they had descended from Abraham. These foreign prestige alliances did not materially affect Jonathan's immediate problems in Palestine. Jonathan had a further brief period of military success, discomfiting the forces of Demetrius II. Trypho, ostensibly championing Antiochus, but with purely personal ambitions, desired to eliminate the formidable Jonathan, who was not really his enemy. With perfidious gestures of friendship he lured him, with a thousand men, into Ptolemais, only to massacre his men and take him prisoner. Jonathan, who was executed a little later in *ca.* 144, may have been an opportunist, but the Jews lost in him another leader of astonishing courage and skill.

Notes. 9:23. After Judas's death, the apostates, for whom the reader's dislike steadily grows, "peep out," as a snail from its shell — a literal translation of the vivid Gk. *ekkýptō.*

9:40. The murder of Jonathan's brother John was a dubious excuse for an ugly vendetta that might fall on the innocent. The incident is not to Jonathan's credit.

9:43. Contrast 2:31-38. Bacchides' hopes that Jonathan would show an equal sabbath strictness were disappointed.

9:54-56. High priest Alcimus, detestable above most apostates, more hostile than Bacchides, tried to pull down the wall of the inner court of the temple to obliterate the Jew-Gentile distinction. He died of a stroke, naturally interpreted as a divine judgment.

9:58-73. The patriot cause prospered in two years of respite; the apostates finally recalled Bacchides to hostilities. Jonathan had high morale and the verbal support of Rome. Bacchides failed dismally and then exacted deserved penalties from his own apostate friends (v. 69). Jonathan governed peaceably from 156 to 152.

10:25-45. The bait was tempting, and the fiscal details are historically important. Demetrius probably tried to bargain with the people against Jonathan. Ptolemais (v. 39), now held by Balas, was a reward requiring proximate support and ultimate victory for its realization.

10:50. 150 B.C.

10:61. "Pestilent men" — Gk. *ándres loimoí,* Vulg. *viri pestilentes* — was an admirable description from the Maccabean viewpoint. Cf. 15:21.

11:10. Balas was ill fitted for royal status, as Ptolemy knew, but the postulated intention of assassination was probably a fictitious pretext for treachery. The account of Josephus is discrepant (*Ant.* xiii.4.1 [80-82]).

11:34. The exemptions were for the orthodox patriots, not the hellenizers.

11:53. Demetrius II, enormously helped by the Jews

and Jonathan, perfidiously and to his own loss preferred greedy exaction to loyal and valuable friendship.

12:9. The tone shows the arrogance of a "chosen people."

12:21. The ethnic kinship probably rested on the gratuitous postulate of a nonexistent document — a diplomatic fiction convenient for the moment to both parties (cf. 14:20ff.).

F. Career of Simon, Chs. 13–16. Summary. 13:1-53. Simon had already distinguished himself in subordinate command (11:59; 12:35f.). In this fresh crisis, believing his brother dead, he stepped forward as leader with loyal acclaim. But Trypho really held Jonathan captive, offering his release for 100 talents of silver and two of his sons. Simon, realistically skeptical of Trypho's good faith but fearing compatriot misunderstanding, fulfilled these terms to the letter; Trypho then callously executed Jonathan. Simon buried his brother and erected magnificent family memorials at Modein. In 142 Trypho murdered young Antiochus and styled himself king in opposition to Demetrius II. Simon made friends with Demetrius, gained virtual political independence for Israel, and inaugurated what to some was a new Jewish calendar. Simon made himself master of Gaza (or Gazara, see note on v. 43) and Jerusalem.

14:1-49. Demetrius failed to prevail against Trypho and was captured. Simon was confirmed as high priest and ruler in an Israel temporarily peaceful; he demonstrated abilities not exclusively military. Friendship with the Spartans and Romans was reaffirmed. The Jews memorialized the deeds of Simon on tables of brass to be erected on Mt. Zion.

15:1-41. Antiochus VII Sidetes, son of Demetrius I and brother of Demetrius II, anxious to overthrow the usurper Trypho, sought Jewish friendship and right of passage. The Romans were cordial. Antiochus proved as dastardly as Trypho, and the clouds of war returned.

16:1-24. Simon, too old to fight, appointed his sons Judas and John. Unfortunately, through betrayed trust and the pleasures of wine, the father and two of the sons were trapped and killed just as Jonathan was; John Hyrcanus, however, escaped. The year 135 closed a forty-year family record of almost unparalleled contest between the Maccabees and their enemies.

Notes. 13:43. Gaza is probably an error for Gazara (so Josephus), an apostate city practicing idolatry. The (Gk.) *elépolis* was probably a wooden tower on wheels, brought close to the walls for attack.

14:4. The tranquillity lasted three or four years, not throughout Simon's career. The poetic praise of vv. 6-15 contains further exaggerations.

14:14. John the Baptist fulfilled Mal. 4:5. An earlier acknowledged realization would have superseded any hereditary monarchy.

14:18f. The munificent gift to Rome (cf. 14:24) was not wasted.

16:13. Ptolemy son of Abubus plotted to succeed the Maccabeans in Jewish sovereignty and made his victims drunk in order to murder them (v. 16). The escape of John Hyrcanus foiled his plan, but three good men succumbed to him.

G. Conclusion. 1 Maccabees is an unvarnished historical record of gripping sincerity, in which shining heroism and despicable treachery sharply contrast. The reader quickly and rather justly detests the apostate Jews, quislings, and renegades. The book, though basically honest, is a partisan document, and this reaction is precisely the one that the writer intended. 1 Maccabees says little of God or religion in specific terms, but it does show the patriotic and observant side of Judaism at its highest. For the historian, it provides one source of reliable information for the period between the prophet Malachi and the prophet John.

III. Second Maccabees.–A. Literary Introduction. 2 Maccabees was originally written in Greek, though certain limited quoted documents may be translations from Hebrew. Swete (*OTG*, III, 662-708) prints the A-text in full, with the variants from V and several minuscules. Versions in Syriac and Latin also exist. See further *HNTT*, pp. 499-506.

2 Maccabees was almost certainly put together by an Alexandrian Jew, who professedly epitomizes, from ch. 3 onward, a larger work in five books by the otherwise unknown Jason of Cyrene. It has been argued that the redactor was a poor hack and contrariwise that he transformed an unreadable treatise into a fine and popular book. The arguments for dismissing Jason as a figment of the writer's imagination seem insufficient: the Jason-redactor pattern may be accepted in outline, with frank admission that the work of the two men is intertangled beyond the resources of confident analysis. The question of dating is complicated and double-barreled. A round mediating figure might be 100 B.C. for Jason's work, 80 B.C. for that of the redactor, but other arguable options exist.

The second book is Pharisaic rather than Sadducean, cultic rather than military, theological rather than accurately historical, supernatural rather than objective. In fact, this is not Pharisaism at its best, and for once the better job seems to have emanated from the Sadducean school of thought. The Roman Church insists on the canonicity of the second book because it seems to support dogmas such as prayer for the dead, intercession of saints, and treasury of merits. Apart from this special interest, the second book is largely a variant presentation of the first, supplementing it particularly in the period just before and after Antiochus Epiphanes. The subjoined notes, presupposing the first book, will stress matters of fresh interest.

B. Chs. 1–2. The writer quotes two letters professedly from Jews of Palestine to Jews of Egypt, (1:1–2:18) and adds his own preface to the book (2:19-32). It has been widely suspected that the writer, honest perhaps in intention, was duped by worthless forgeries, and that these chapters should have been omitted. The ostensible purpose of the second letter is to persuade the Egyptian Jews to join their Palestinian coreligionists in celebrating two new anniversaries, the Festival of Lights or Hanukkah, memorializing Judas Maccabeus's rededication of the temple exactly three years after Antiochus Epiphanes had defiled it, and Nicanor's Day, celebrating the Jewish victory over the enemy general. With Hanukkah is associated the story of the miraculous preservation of sacred fire from the days of the first temple and the elaboration of the account into the days of Jeremiah.

Two of the writer's key themes make their first appearance in these chapters: the doctrine of reconciliation, 1:5, and his marked propensity to invoke the miraculous, 2:21.

C. Historic Roots of the Maccabean Revolt, Chs. 3–7. Summary. These chapters are a valuable supplement to 1 Maccabees. The first two show apostate Jews shamefully bartering their own sacred high-priesthood; the last three record the persecutions of heathendom.

3:1-40. Onias III was lawfully and peacefully serving as high priest *ca.* 187 when a jealous colleague Simon caused Apollonius to incite the greed of Seleucus IV king of Syria for the temple treasure. To the horror of all the pious, the king ordered Heliodorus to raid and appropriate. The officer, however, was circumvented in the temple itself by an apparition of horse and rider, scourged by two men in wondrous apparel, carried out as though dead, and revived by Onias.

4:1-50. Simon still attempted to overthrow Onias, but Jason, the high priest's own brother, supplanted him in of-

fice by bribing the new Syrian king Antiochus IV Epiphanes. Onias had served from 198 until 175. A thorough Hellenist, despising his ancestral religion and its most sacred office, Jason built a Greek gymnasium in Jerusalem itself. Three years later Menelaus, brother of Simon, offered Antiochus larger payment and ousted Jason from office. Pressed to meet his rash commitments, he robbed and sold temple vessels and had the protesting Onias murdered. An angry mob killed Lysimachus, a temple freebooter in league with Menelaus.

5:1-27. While Antiochus was in Egypt, Jerusalem witnessed prodigious celestial signs. Jason, falsely informed that the king had died, attempted to wrest back the high-priesthood from Menelaus, slaying many compatriots, but utterly failed. Antiochus returned in fury, punished Jerusalem, and, aided by Menelaus, plundered the temple. Judas Maccabeus retired with a few companions. (The second book never mentions Mattathias.)

6:1-9. The temple was heathenized, and death penalties for observing the Jewish faith were instituted.

6:10–7:42. This gruesome martyrology reflects on retribution as chastisement.

Notes. 3:4. This verse foreshadows the split between orthodox patriots and hellenizing apostates.

3:24-34. Cf. 2:21. The comments of 3:32 and 4:1 increase suspicion in the "miracle." The trick may be historical, but the horseman and angelic attendants were almost certainly temple attendants exercising their histrionic skill.

4:7. Jason, typically, had hellenized his true name of Joshua; v. 13 aptly describes his character.

4:37. If this is historical, it is a pleasing and unusual slant on Antiochus.

5:2-4. The "miracle," whether physical product of refraction and reflection, optical illusion, or genuine prodigy, had impressed the writer. Before "forty," a round and sacred number, the qualifying preposition *schedón* "almost," reads strangely.

5:6. Usurper Jason, unlike Menelaus, had been at least a high priest "of the blood," although his shameful conduct entirely negated this qualification. Note the theology of retribution, vv. 7-10.

5:11-21. Antiochus, greedy for temple treasure, found a feeble pretext in the crushed Jason. He, however, could not have succeeded in his impious purpose, the writer insisted, if the temple servants had been lawful and holy, for God would have blasted him in wrath. Note the doctrine of reconciliation in v. 20; cf. 1:5; 7:33; etc.

5:25. Cf. 1 Macc. 2:31-38; 2 Macc. 6:11; etc.

5:27. The silence concerning Mattathias is one of the puzzling discrepancies with the first book.

6:1-9. This account of the "abomination of desolation" occurring in 168 differs from 1 Maccabees.

6:12-17. This profound theological reflection on the purifying power and final mercy of God's judgment, has special reference to apostates.

6:18-31. The resistance under torture of Eleazar, innocent, distinguished nonagenarian, is deeply moving. To him the eating of pork was equivalent to the Christian denial of Christ. His positive eschatology, which gives glow and volition to his dying, comes out in v. 26. Cf. He. 11:35.

7:1-42. Seven brothers and their mother were martyred under like circumstances. Cf. 4 Macc. 8–18 for a longer account. Critics may speak of "detailed ghastliness," "poor rhetoric," or "an anguish that was once real and quivering" (*APOT,* I, 130f.), but if martyrdom means anything at all, these were noble exemplars. The developed theological and eschatological ideas of the chapter include creation *ex nihilo* (v. 28), the potential of gaining (v. 9) and losing (v. 29) eternal life, corporeal resurrection (v. 11) and its parallelism with conception (vv. 22f.), and the denial of resurrection for the wicked (v. 14).

D. Career of Judas Maccabeus, Chs. 8–15. Summary. The writer recounted in his own way, with exaggerations, distortions, and valuable additions, the story of 1 Macc. 3:1–9:22.

Notes. 9:5. The epithet applied to God, Gk. *panepóptēs,* really means all-observing, with the implication of action following observation.

9:6. This value judgment may contain elements both of theological interpretation and wishful thinking.

9:13. This further theological interpretation, sin beyond repentance, is not strictly relevant. Prov. 1:24-31; He. 10:26f.; 12:17; etc. refer to apostates, not heathens. Antiochus's intent to become a proselyte (v. 17) probably existed only in the writer's imagination. The king's letter to the Jews (vv. 19-27) is a nonsensical forgery.

10:10. The picture is misleading. Antiochus Eupator the new king is a mere child, Lysias the regent and real ruler.

10:17-23. Gross numerical hyperbole, with obvious discrepancy between v. 18 and v. 23. Susceptibility to bribery (v. 20) is here sharply punished.

10:25-31. The power of prayer is sufficient, without the celestial co-warriors. Cf. 11:8.

11:1ff. This campaign really belongs to the reign of Antiochus IV Epiphanes — so 1 Maccabees. There are numerous additional errors.

11:13. The Jews had profoundly impressed Lysias regardless of whether he acknowledged the power of their God to the extent claimed.

12:15. For Gk. *dynástēs,* well translated "potentate," see HR, p. 355; *TDNT,* II, *s.v.* (Grundmann). The NT applies the word both to human beings (Lk. 1:52; Acts 8:27) and to God (1 Tim. 6:15). The emphasis is on the power, not the person.

12:16. This verse contains another of the hyperboles that blemish the book.

12:24, 40. The Greek names (v. 24) and the heathen amulets concealed on the persons of unsuspected Jews (v. 40) show the permeation of Hellenism.

12:43-45. Neither canonical Scripture nor early Jewish literature outside the present passage contains injunctions to offer sacrifice or prayer for the dead. The mourner's kaddish of the Jewish liturgy (cf. J. H. Hertz, *Authorized Daily Prayer Book with Comm.* [1947], pp. 212f.) is used in memorial for the dead, not in intercession. The usual rabbinic approach (cf. T.B. *Zebahim* 9b) is *'yn kprh lmtym* — no atonement is to be made for the dead. Judaism seems to give no clearly documented support for the doctrine. Evangelical theology treats the doctrine of the second chance with considerable reserve. The Roman Catholic Church uses this passage to support the doctrines of purgatory and the communion of saints. The two sides are well stated in the *Catholic Encyclopedia,* IV, 653-58, and the *Protestant Dictionary* (1933), pp. 166-68. The *Dictionary* argues that Judas may merely have made a sin offering for his living soldiers, textual corruption suggesting the wrong interpretation, or, alternatively, that the epitomizer was a schismatic Egyptian Jew whose teaching cannot be accepted as orthodox. The second hypothesis seems more plausible. Cf. the LXX and Vulg. texts.

13:4. Gk. *basileús tón basiléōn* is a title of earthly kings now advanced to divine service. Cf. Rev. 17:14; 19:16; etc. Cf. also *TDNT,* I, *s.v.* (Kleinknecht, Schmidt).

13:23. Cf. 1 Macc. 6. Syrian throne rivalries, humanly speaking, saved Judaism from utter annihilation.

14:24f. Some hyperbole may be suspected. Cf. note on 1 Macc. 7:26.

14:37-46. The suicide of Razis, shorn of its unedifying and physiologically impossible conclusion, probably rests on fact. The author's apparent approval of suicide in certain circumstances is a further rebuttal of the canonicity of the book.

15:1ff. Inconsistent with 1 Macc. 2:41. The incident subjoined is probably unhistorical.

15:12-16. The doctrine of the treasury of merits, familiar in rabbinic and Catholic theology, is presupposed. Cf. notes on 12:43-45 above.

15:30ff. The punishment of Nicanor's exceptional sin (14:33) took an exceptional form, normally foreign to Judaism. His defeat inaugurated Nicanor's Day.

15:37-39. The author's epilogue.

IV. Third, Fourth, and Fifth Maccabees.–These books have never been part of either the Roman Catholic or Protestant canon. Their reputation for historical exactitude stands somewhat low, although a substratum of truth may be present. The professed events of 3 Maccabees are dated *ca.* 217 B.C., whatever the date of composition may be, and have no real connection with the Maccabees. Ptolemy IV Philopator visited the Jerusalem temple and insolently determined to enter the holy of holies, but he became divinely smitten with temporary paralysis. Infuriated, he schemed bitter revenge on his Jewish subjects in Egypt, but intoxicated elephants expected to trample them to death turned instead on their Egyptian masters, and Ptolemy was forced to respect the chosen people. The propaganda motive is obvious. *See* PSEUDEPIGRAPHA III.

4 Maccabees is a Jewish interpretation of Stoic philosophy, designed to prove reason stronger than passion and choosing Maccabean heroes as exemplars. *See* PSEUDEPIGRAPHA IV.

Recent study suggests that 5 Maccabees may be a composite of several first-century documents, some of which were possibly written originally in Hebrew. The oldest surviving version is in Arabic.

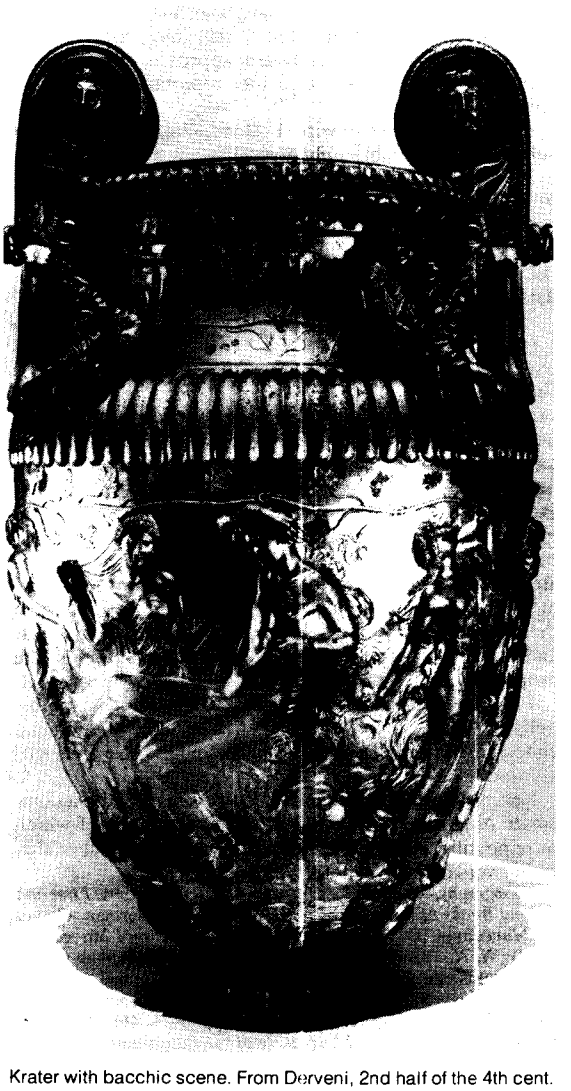
  I. Roman Rule, 148 B.C.-A.D. 44
  J. Macedonia after A.D. 44

I. Land and Climate.–Ancient Macedonia lay on the Balkan peninsula N of Greece, S of Illyria and Thrace, and E of Epirus. Its territory included the Haliacmon and Axius rivers and their tributaries, which flow SE to the Thermaic Gulf of the Aegean Sea. Most of the country is mountainous, cut by great river valleys, and remote from the sea. Unlike peninsular Greece, its climate is much more eastern European than Mediterranean, with summer and winter rains, severe winters, and very hot summers; this makes it suitable for most horses, cattle, sheep, cereals, and European fruits, but not for olives or figs.

II. Ethnic Identity of the Peoples.–The Neolithic peoples in Macedonia were evidently related to similar groups in the Danube basin. Early in the Bronze Age (*ca.* 2800 B.C.) new immigrants from Anatolia brought copper-smithing skills. The cultural clash produced a vigorous ethnic mix that had contacts as far west as Hungary. During the Early Helladic period (*ca.* 2800-1900) the first Kurgan peoples entered Macedonia, evidently from the north and east. The Middle Helladic period (*ca.* 1900-1600) saw the first invasion, from the north, of Greek-speaking peoples. Some settled in Macedonia while others occupied Greece.

III. History.–*A. Prehistory.* The early Neolithic settlers of Macedonia were of various cultures. The southern settlers had well-developed architectural and artistic abilities; their artifacts include human clay figurines, chipped axes of serpentine, woolen garments, and beautiful serpentine figurines of frogs. The people of this period (*ca.* 6000-3000 B.C.) were clearly dependent upon the horse.



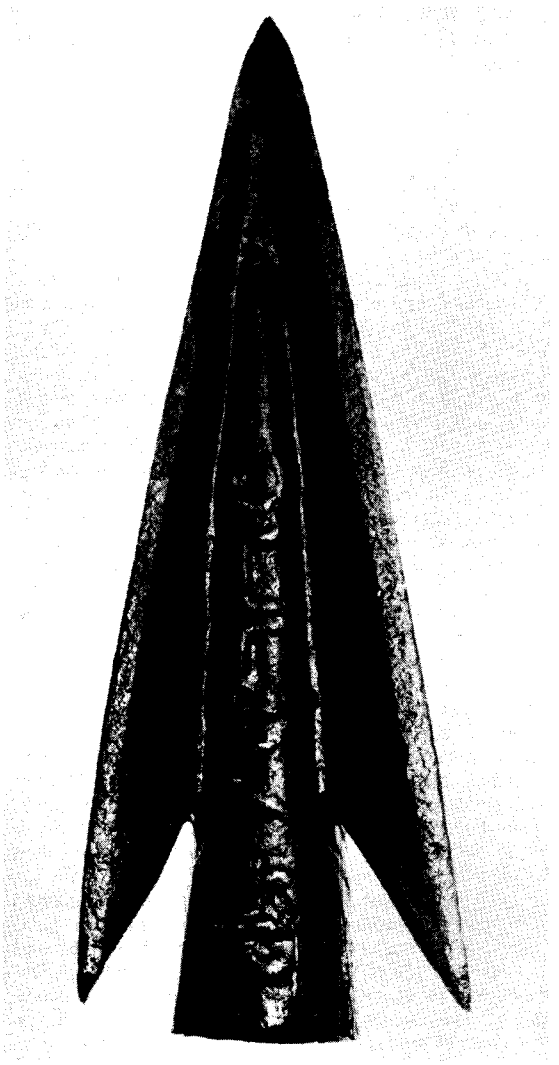
B. Bronze Age. The period from *ca.* 3000 to *ca.* 1125 B.C. chronicles the gradual formation of the cultures known collectively as "Greek." Greek dialects gradually displaced the old Illyrian and other languages, and the general

culture remained tribal. Pottery, jewelry, and metalworking developed toward classical Greek forms but remained distinctly Macedonian; e.g., chiefs were usually buried in a tumulus tomb. Archeological evidence from about the Middle Helladic period points to an ethnic distinction between the preexisting local population and a ruling class of invading Indo-Europeans. This period had passed its zenith in material culture when contacts with Mycenaean civilization to the south (*ca.* 1350 B.C.) brought a new infusion of ideas in warfare, art, and technology.

C. Historical Developments, 1125-550 B.C. Around 1125 B.C. a major technological breakthrough occurred throughout Greece and Macedonia: the making of iron. Iron was used first for making knives, later for swords, then for other weapons and tools such as plow points. This metallurgical advance — which may have come with the Phrygian invaders — coincided with the emergence of a vigorous culture and burgeoning literacy throughout the entire Middle East. But it was also a time of great cultural dislocations, immigrations, and incessant wars. Thus the Dorians, evidently speakers of Western Greek, invaded southwestern Thessaly during the 12th cent. B.C., possibly due to displacement by the Phrygians (Appian *Bella Civilia Romana* ii.39) who now occupied Macedonia. Later, *ca.* 700 B.C., an invasion by the Cimmerians from Anatolia shattered an Illyrian dominance that had begun *ca.* 800 B.C. Within this instability, sometime after 650 B.C., the Macedonian monarchy was founded by Perdiccas I (Herodotus viii.139). The Macedones controlled most of the mountains and the coastal plain.

D. Rise of the Macedonian State, 550-359 B.C. The Macedones did not long maintain their dominance. The Paeonian tribes of the interior immediately gained power and broke through to the coast. They remained in power until Darius invaded Scythia *ca.* 513 B.C. Persian control directed Macedonian trade — and therefore its culture — eastward. Macedonian silver and timber were in demand by both Persians and Greeks. During the Persian advances of 483-480 only Macedonia evaded Persian suspicions, partially because the Persian triremes were built of Macedonian timber. After the withdrawal of Xerxes in 480 the Persians allowed Alexander I, seventh king of the Macedonians, to expand his territory. Alexander also cultivated relations with Greek city-states, but he was killed before Xerxes' assassination in 466 B.C. Free from Persian interference, Perdiccas II, son of Alexander, made his way to power by deception. By 434 he was at war with Athens, but almost immediately he turned about to ally with Athens against his Macedonian neighbors. His erratic relationship with Athens persisted until his death at the hands of the Illyrians in 359.

E. Philip II, 358-337 B.C. At the death of Perdiccas II in 359 B.C. Macedonia was thrown into disarray. The army came together (a Macedonian custom) and acclaimed Philip II their new ruler. He immediately set out to neutralize the threat of the Paeonians, Thracians, and Illyrians. Philip was successful in both war and diplomacy. By 357 he had brilliantly defeated his enemies and contracted the first two of at least six political marriages. By his third wife, Olympias the daughter of King Arybbas of Epirus, he fathered Alexander, later called "the Great." Philip campaigned throughout Greece, Thessaly, Epirus, and as far east as Byzantium. In addition, he functioned as a judge (cf. Plutarch *Moralia* 178A-179C) and appointed judges at his court at Pella in eastern Macedonia. He developed the Macedonian institution of the "Companions" (or retinue) of the king, selecting Greeks as well as Macedonians to serve as his advisors, confidants, and deputies. (This group later became Alexander's formal Council.)



Krater with bacchic scene. From Derveni, 2nd half of the 4th cent. B.C. (Archaeological Museum of Thessalonike, Republic of Greece)

A man of culture, Philip successfully persuaded Aristotle to become Alexander's tutor. Philip's assassination in 336 by a Macedonian noble was described by Aristotle as murder for personal revenge (*Pol.* v.1311b). *See also* PHILIP 1.

Recent archeological excavations at Vergina have shed further light on this period of history. Vergina is almost certainly ancient Aegeae, the burial place of all the Macedonian kings except Alexander the Great. In 1949 archeologists began a systematic excavation of the Great Tumulus at Vergina, which was so imposing (12.5 m. [41 ft.] high and 110 m. [360 ft.] in diameter) that scholars believed it to be the burial place of Macedonian royalty. In 1977 excavators discovered an older, smaller tumulus beneath the southwest edge of the Great Tumulus. Within this smaller tumulus was a masonry tomb (3.50 by 2.09 m. [11.5 by 6.9 ft.]) that had been one of three: two built beneath the ground and one above, but all covered by the Great Tumulus. The first tomb, clearly of the 4th cent. B.C. and decorated with magnificent frescoes, had been robbed in antiquity. The second, equally beautifully decorated,

MACEDONIA

Bronze arrowhead inscribed *Philippo*, "of Philip," from Olynthos (Archaeological Museum of Thessalonike, Republic of Greece)

was unexpectedly intact. Its inner chamber measured 4.46 by 4.46 m. (14.6 by 14.6 ft.) and was separated from its antechamber by a marble door. The finds from this inner chamber included bronze and silver vessels, remains of a richly decorated shield, an iron helmet, a sword, a cuirass with a gold plaque of the head of Athena in relief, and remains of a diadem and a scepter — all dated *ca.* 350-325 B.C., pointing almost certainly to Philip II as the Macedonian king buried here. Within the marble sarcophagus was found a footed, gold larnax or box, measuring 40 by 33.5 by 17 cm. high (15.7 by 13.2 by 6.7 in.) and containing bones and ash. A series of small ivory heads (remnants of statuettes) included two that resembled well-known portraits of Philip and Alexander and also one identified by the excavator as Olympias. Within the antechamber was another marble sarcophagus with a gold box containing bones and a woman's diadem. M. Andronikos, the excavator, believed that the woman was Cleopatra, Philip's last wife; it is also possible, however, that she was the Scythian King Atheas's daughter (Justinus ix.2.1-6).

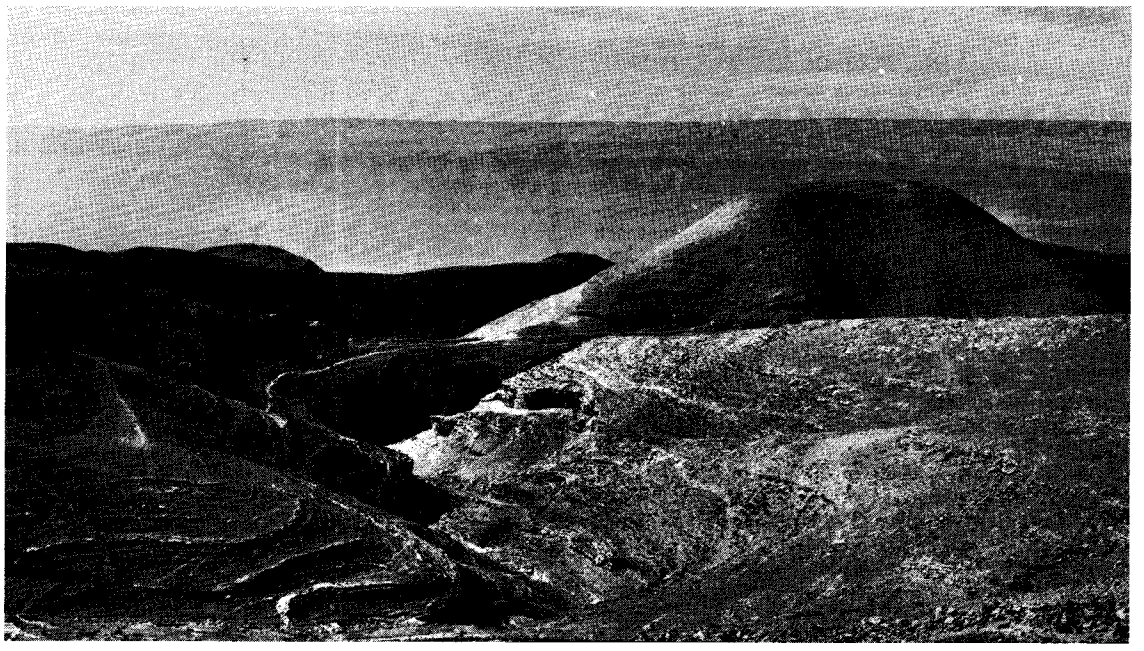
F. Alexander the Great, 336-323 B.C. ALEXANDER THE GREAT (mentioned in 1 Macc. 1:1 and 6:2 as "the son of Philip the Macedonian") spent the greater part of his short but energetic reign outside Macedonia. Antipater, Philip's trusted general and ambassador, now served as the young king's deputy in Macedonia. There he quelled rebellions and dispatched relief troops to Alexander. Alexander in turn sent back prodigious sums he had gained through conquest, enabling him to avoid taxing the Macedonians. Although he ruled ably, Antipater had trouble with Olympias, who apparently warned her son that Antipater's powerful position might threaten Alexander's own place. Alexander sent the Macedonian troops home in 324 under Craterus, who was to replace Antipater upon arrival. But the replacement never occurred, because Alexander died in Babylon on June 10, 323 B.C., at the age of thirty-two, master of Greece, Macedonia, Asia, Egypt, and the Fertile Crescent as far as India.

G. Macedonia from 323 to 276 B.C. Upon Alexander's death a tremendous power struggle broke out among his generals, who divided up the satrapies and attempted to take control of the whole empire. By 321 war had erupted among the "Successors" (Diodochi) of Alexander. The rule of Macedonia proper (and control of Greece) fell to Antipater. He formed a coalition with Antigonus of Phrygia and Ptolemy I of Egypt against Perdiccas of the house of Orestis, who had taken control of Asia. After Perdiccas's defeat and death, the united Macedonian armies proclaimed Antipater regent, an office he held until his death in 319. He was succeeded by the ineffectual Polyperchon. By 316, however, Antipater's son Cassander had seized control of Macedonia and Greece (Diodorus xix.52). His death in 298 resulted in civil war. Demetrius took control in 294, but in 288 he failed to prevent Thrace and Epirus from partitioning Macedonia. Lysimachus of Thrace ruled Macedonia from 285, in addition to Thessaly and part of Asia, until his death in battle in 281. Invading Gauls killed King Ceraunus in 279 B.C. Into this state of anarchy and chaos stepped Antigonus II Gonatus, son of Demetrius, who had just defeated the Gauls in Thrace. In 276 he was accepted by the army as king (Polybius ii.45; ix.29).

H. Antigonus II Gonatus and Decline, 276-148 B.C. Antigonus and the Antigonid dynasty ruled until the Roman invasion of 168 B.C. Antigonus represented a return to some of the older Macedonian values. He cultivated the Stoic philosophers Menedemus and Zeno, reestablished Pella as his capital, and earned his subjects' gratitude by his moderate policies. He won the Chremonidean War against Athens and its allies in 262 B.C. and restored Macedonia proper to its fullest historical boundaries. Together with Antiochus II of Syria he won a naval victory over Ptolemy II Philadelphus, thus gaining control of the Aegean Sea. But in 243 he lost Corinth, a key city, through revolt. He died *ca.* 239 B.C. without regaining Corinth and left his son Demetrius II a defensive war with the Aetolian and Achaean Leagues.

This melancholy decline continued largely unabated until the accession of Philip V in 221. By 215 Philip had joined with Hannibal of Carthage in an attempt to drive Rome from Illyria. Despite Rome's alliance with Aetolia in the First Macedonian War (212-205), Philip was victorious. But Roman military might was now looming large, and Macedonian forces were exhausted by generations of war. The Romans finally defeated Philip at the close of the Second Macedonian War (197 B.C.). The rest of the period to 148 B.C. saw a rapid decline in Macedonia's independence. The crowning blow came in 168 B.C., when Philip's son Perseus (cf. 1 Macc. 8:5) was utterly defeated at Pydna by the Roman consul Paulus at the end of the Fourth Macedonian War (Polybius xxix.17-21; Plutarch

Alexander the Great in Heliopolitan costume, reflecting his belief that he was the son of Amon-Re, the Egyptian sun-god whose main temple was at Heliopolis (Louvre)



Aemilius Paulus xvi-xxii). Rome now turned vengeful, dividing Macedonia into four republics (Pella, Thessalonica, Amphipolis, and Pelagonia) and elevating the old leagues to a position of power equal with Macedonia (Livy xlv.17f., 29f.). Macedonia played almost no role in world politics until it was made a Roman province twenty years later.

I. Roman Rule, 148 B.C.-A.D. 44. For two decades after the battle of Pydna Macedonia continued to decline. Then in 149 a certain Andriscus arose, claiming to be Philip the son of Perseus. This false "Philip" scored a victory over a small Roman force in Thessaly in 148, but later that same year he was defeated by the Roman praetor Metellus and sent to Rome for execution. Rome solved the problem of administering this troubled area by making it a province. Thus when the old Achaean League declared war on Sparta in 148, Rome intervened from Macedonia. Metellus razed Athens, massacred the male citizens, and sold the women and children as slaves. Rome dissolved the Achaean League and made Greece a Roman protectorate administered from Macedonia. Interestingly, the apocryphal Additions to Esther, dating from this time, include a false accusation by Artaxerxes that Hamman was a Macedonian bent upon overthrowing the Persian empire (Ad. Est. 16:10, 14). Without an Athens or Corinth to attract peripatetic philosophers, Macedonia sank slowly into obscurity. When Mithridates Eupator of Pontus in Asia rose against Rome in 88 B.C., many Macedonians joined him, but Rome seemed not to notice Macedonian complicity. This was fortunate, for the Romans razed rebellious Greek cities to the ground, in some cases so thoroughly that they virtually disappeared from history.

In 27 B.C. Augustus perceived the political and cultural differences between Macedonia and Greece and separated them into the two provinces of Macedonia and Achaia. While the Greeks held to a democratic ideal, the Macedonians remained monarchic. The Caesars saw to it that the Via Egnatia, the existing major west-east route through Macedonia, was paved, maintained, and elevated to imperial status. This highway led from Apollonia in the west to Thessalonica (which Augustus had allowed to remain a free city) in the east. Economically the province prospered, but politically it remained submissive. Macedonians, unlike Greeks, were sought for military conscription, especially for the imperial guard. No significant changes occurred until A.D. 44, when Claudius made Macedonia again a senatorial province. The spirit of Philip II had died out in Macedonia.

J. Macedonia after A.D. 44. The political fortunes of Macedonia did not improve after Tiberius. Yet this politically depressed province figured prominently in Paul's second and third missionary journeys. During Paul's second journey he and Silas sailed from Asia to Thrace, then walked or rode by way of the Via Egnatia to Philippi (Acts 15:36–16:40). After their escape from the Philippian prison they traveled through Amphipolis and Apollonia to Thessalonica (17:1-9), again on the Via Egnatia, but then moved SW to Beroea of Macedonia (vv. 10-13). On his third journey he sent Timothy and Erastus to an unnamed locality in Macedonia (19:22) while he stayed in Asia. Later, Paul traveled again to Macedonia but continued on to Greece (20:1f.). He returned to Troas of Asia via Macedonia (v. 3), this time accompanied by — among others — Macedonian believers (v. 4). In his correspondence Paul spoke of the Macedonian Christians or of the province at least sixteen times in six letters (Romans, 1 and 2 Corinthians, Philippians, 1 Thessalonians, 1 Timothy). He addressed three letters to Macedonian congregations (Philippians, 1 and 2 Thessalonians) "Macedonia and Achaia" are mentioned together three times by Paul (Rom. 15:26; 1 Thess. 1:7f.) and once by Luke (Acts 19:21); this reflects the order of Paul's reception in Europe but also the political reality of the two provinces of Greece that contained Pauline churches. On Paul's final trip to Rome, he and Luke were accompanied by "Aristarchus, a Macedonian from Thessalonica" (Acts 27:2), who is surely the same companion mentioned in 20:4.

Apart from the Pauline references, we know about Macedonia at this period only from the action of Emperor Nero (A.D. 54-68), who proclaimed "the freedom of Greece." This actually meant that Achaia was again split off from Macedonia. Trajan (96-117) heavily taxed the upper classes to support his wars in Dacia and Parthia. The later wars with Parthia (161-165) resulted in a plague that devastated the population not only in Macedonia but throughout the empire. A century later Macedonia had to absorb the invading Goths. Yet in this unhappy atmosphere Christianity took root and flourished. As early as the reign of Diocletian (A.D. 284-305) there were sufficient numbers of Christians in this area to warrant a diocese

Site of Herod's fortress overlooking the Dead Sea from the east. In the background is the plateau of Judah (A. D. Baly)

of Moesia, which included Achaia and Macedonia. In 383 the Christian emperor Theodosius condemned "Macedonianism," a heresy that insisted on the created nature of the Holy Spirit. Archeological evidence for churches is extensive and continues to witness to the "Christianization" of this province.

STRANGE

MACHAERUS ma-kē′rəs [Gk. *Machairous*]. A mountain fortress, second in strength to Jerusalem, identified with the modern Mukâwer, overlooking the eastern shore of the Dead Sea. It was fortified first by Alexander Janneus (*BJ* vii.6.2 [171-77]) and then demolished by Gabinius (*BJ* i.8.5 [167f.]; *Ant.* xiv.5.4 [90]). Herod the Great established a residence on the site and refortified it (*BJ* vii.6.1f. [163-177]). On his death the citadel was assigned to Herod Antipas, and following the rule of Antipas it became a Roman garrison until the Jewish uprising in A.D. 66, when the Jews captured it. The Romans under Lucilius Bassus recaptured and destroyed it in 72.

Josephus stated that the Nabatean wife of Herod Antipas asked to be sent there when she became aware of her husband's infidelity, because the region was allegedly subject to her father Aretas (*Ant.* xviii.5.1 [111f.]). It seems more likely, however, that Machaerus served as a prison for Antipas's wife. Josephus also suggested that John the Baptist was imprisoned and beheaded there (xviii.5.2[119]). Descriptions of the palace, which was situated on the slope of the mountain (elevation 720 m., 2360 ft.), suggest that Antipas probably lived there in the summer to escape the heat of Tiberias and hence could have housed John there. The beheading related in Mk. 6:14-29, however, may well have occurred in a prison farther north.

The ruins in the area have not yet been excavated.

See C. Kopp, *Holy Places of the Gospels* (1963), pp. 141f.

G. L. BORCHERT

MACHBANNAI mak′ba-nī [Heb. *maḵbannay*]; AV, NEB, MACHBANAI. One of the mighty warriors from the tribe of Gad who joined David at Ziklag and were appointed officers of his troops (1 Ch. 12:13 [MT 14]).

MACHBENAH mak-bē′nə [Heb. *maḵbēnâ*; Gk. *Machabēna*]. A name recorded in the genealogy of Judah in 1 Ch. 2:49. It is considered to have been a settlement of the sons of Caleb in the Judean hills S of Beth-zur and Hebron (*LBHG*, rev. ed., p. 248; cf. NEB). BDB, p. 460, suggests identifying Cabbon (Josh. 15:40) with Machbenah (both names may be from the same Hebrew root, *kbn*), but this is speculative. J. MCKENNA

MACHI mā′kī [Heb. *māḵî*]. A man from the tribe of Gad whose son Geuel was chosen as one of the twelve spies (Nu. 13:15).

MACHIR mā′kər [Heb. *māḵîr*]; **MACHIRITES** mā′kər-īts [Heb. *māḵîrî*]; NEB also MACHIRITE FAMILY.

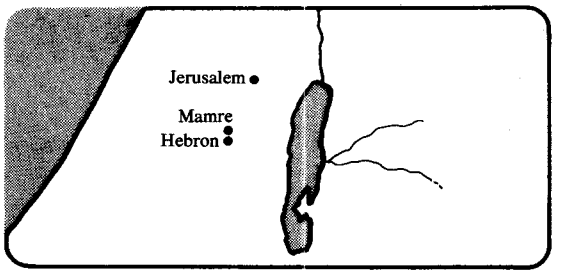
1. The firstborn son of Manasseh (Gen. 50:23; Josh. 17:1); the father of Gilead (Nu. 26:29; 27:1; 36:1; Josh. 17:3; 1 Ch. 2:21, 23; etc.). The genealogy of 1 Ch. 7:14-19, which appears to have undergone significant textual disruption, lists Manasseh's Aramean concubine as Machir's mother (v. 14); it names Maacah first as Machir's sister (v. 15) and later as his wife (v. 16).

In the distribution of the land in the Transjordan under Moses, the family of Machir was given the region of Bashan and Gilead (Nu. 32:40; Dt. 3:15; Josh. 13:29-31; *see* Vol. I, Map VI), apparently because Machir and his sons had fought for and conquered the area (Nu. 32:39; cf. Josh. 17:1). Machir's military exploits must have been memorable, for he is one of the select few designated by name as a "man of war" (Josh. 17:1; cf. David, 2 S. 17:8; Goliath, 1 S. 17:23; Yahweh, Ex. 15:3).

The relationship between the tribal names Manasseh and Machir is problematic. According to Nu. 32:33, 39f.; Josh. 13:29-31; etc., Machir is identified with the half-tribe of Manasseh (or at least the main part of it) that settled E of the Jordan (see Boling and Wright). But the Song of Deborah, one of the oldest passages in the OT, names Machir (instead of the western half-tribe of Manasseh) among the tribes W of the Jordan that went out to do battle against the Canaanites (Jgs. 5:14). These passages suggest that at one time the name Machir could refer to the whole tribe of Manasseh. This problem has also been explained by various theories about the migrations of the Machirite clan (see, e.g., Aharoni and Avi-Yonah, Noth, and Soggin).

2. A namesake of the earlier Machir from the half-tribe of Manasseh in the Transjordan; son of Ammiel. He was a wealthy man who lived in Lo-debar in the region of Gilead. After the death of Saul and Jonathan, Machir sheltered Jonathan's son Mephibosheth until David brought Mephibosheth to Jerusalem and restored his princely status (2 S. 9:4f.; cf. Josephus *Ant.* vii.5.5 [113-16]). During the revolt of Absalom, Machir aided David and his troops at Mahanaim by supplying them with beds, vessels, and foodstuffs (2 S. 17:27-29; cf. *Ant.* vii.9.8 [230f.]).

Noth, *History of Israel* (Eng. tr. rev. ed. 1960), pp. 61f., 73 n. 1; J. A. Soggin, *Joshua* (Eng. tr., *OTL*, 1972), pp. 159, 181; M. H. Woudstra, *Book of Joshua* (*NICOT*, 1981), pp. 223f., 263. D. H. ENGELHARD N. J. O.



MACHMAS mak'məs (1 Macc. 9:73, AV). *See* MICHMASH.

MACHNADEBAI mak-nad'ə-bī [Heb. *maḵnaḏ^{e}ḇay*] (Ezr. 10:40); NEB MAKNADEBAI. A son of Binnui; one of the Israelites who were required to divorce their foreign wives. Machnadebai is unusual as a Hebrew name form, and the text may be corrupt. Some have conjectured, on the basis of the LXX of the parallel name list in 1 Esd. 9:34, that the text originally read "of the sons of Ezora" (Heb. *mibbᵉnê-ʿazzûr*). In 1 Esd. 9:34 the RSV renders "Machnadebai" for LXX *Mamnitanaimos* (AV Mamnitanaimus; NEB Mamnitanaemus) in an attempt to reconcile the two lists of names. This rendering, however, is quite unlikely, since the names that precede and follow "Machnadebai" on the two lists do not match.

See comms., especially L. H. Brockington, *Ezra, Nehemiah and Esther* (*NCBC*, repr. 1977); J. M. Myers, *I and II Esdras* (*AB*, 1974). N. J. O.

MACHPELAH mak-pē'lä [Heb. *maḵpēlâ*–prob. 'double'; Gk. *tó diploún*]. A field E of Mamre, with trees and an adjacent cave, in the western part of what was later Hebron. The name (with the article; cf. the LXX) may somehow describe the form of the cave. Abraham bought Machpelah from Ephron the Hittite for 400 shekels of silver and buried his wife Sarah there (Gen. 23:8-16). Later he (25:9), Isaac, Rebekah, Leah (49:31), Jacob (50:13), and possibly others were buried there.

Modern research, comparing Abraham's transaction

with ancient Assyrian and Hittite laws, lends verisimilitude to Gen. 23. The trees growing in the field, the bargaining of Abraham and Ephron, the weighing of the silver used for payment, and the witnesses who sat at the city gate, where the sale was made, all accord with Hittite laws, forgotten at the dissolution of the Hittite kingdom *ca.* 1200 B.C. Ephron's desire to sell the entire field, although Abraham asked for just "the cave of Machpelah . . . which is in the end of his field" (v. 9), is connected with the law and feudal practice of the period. According to the Hittite collection of laws found in Boghazköy, the buyer was to submit to certain feudal duties (taxation and other hardships) if he bought all the property of the seller. If just part of the property was sold, these duties remained with the seller. Ephron probably demanded that Abraham buy the entire field (v. 11) so that the latter would become a vassal responsible for the whole field. *See also* HITTITES III.

Josephus (*BJ* iv.9.7 [530f.]) mentioned that a monument of the patriarchs stood in Hebron in the days of Jesus. A pilgrim in A.D. 333 told of the extraordinary beauty of the cave tombs. Today the cave tomb lies at the southern end of a mosque, Ḥarâm el-Khalîl (Abraham's mosque). A massive stone wall (its area 61 m. by 34 m. [197 ft. by 111 ft.]) surrounds the cave, above which is, among other things, Sarah's memorial tomb. The area has not been excavated.

Mosque built over the patriarchal tomb in the cave of Machpelah (J. Finegan)

Certain authorities believe that on the site of the present mosque was once an important building dating as early as the time of Herod. The square wall surrounding the cave mosque is probably the best extant masonry dating back to Herod and may even antedate him. In any case, it has been found to belong to the same period as the lower parts of the Wailing Wall of Jerusalem. The wall is 2.6 m. (8.5 ft.) thick, and some of the stones are over 7.3 m. (24 ft.) long.

Christians and Jews cannot enter the mosque without special permission of the supreme council of Moslems. Visitors have described the memorial tombs of Abraham, Isaac, and their wives as covered with richly decorated cloths. The actual cave tomb lies under the monument. A memorial tomb W of the Mosque of Women at Machpelah marks the traditional site of Joseph's grave, but according to Josh. 24:32 Joseph was buried in Shechem.

A. A. SAARISALO

MACRON mā'kron [Gk. *Makrōn*]. Ptolemy Macron, who had been appointed governor of Cyprus by Ptolemy VI Philometor king of Egypt but deserted to Antiochus IV Epiphanes king of Syria (2 Macc. 10:12f.). Under the rule of Antiochus V Eupator, successor of Antiochus IV Epiphanes, Macron espoused pro-Jewish policies, was accused of treason by the king's supporters, and consequently poisoned himself and died.

Opinions differ whether Ptolemy Macron is to be identified as Ptolemy son of Dorymenes, whose attitude toward the Jews was different. According to 1 Macc. 3:38–4:25, when Antiochus IV was in Persia, Lysias (1) chose Ptolemy son of Dorymenes along with two others to lead in battle against Judas Maccabeus, who defeated their army of 47,000 men.

The account in 2 Macc. 8:8f. that identifies Ptolemy son of Dorymenes as governor of Coelesyria and Phoenicia, one of the seventy-two satrapies of Antiochus IV's kingdom, is perhaps more accurate than the parallel in 1 Macc. 3:38ff. Ptolemy son of Dorymenes was bribed by Menelaus (2 Macc. 4:45-47) and then pursuaded Antiochus IV to clear Menelaus of the accusations made against him by the Jews. 2 Macc. 6:8 further reveals this Ptolemy's hostility toward the Jews by stating that he issued the order for Jews to conform with Greek customs and sacrifices (cf. Goldstein, *II Maccabees*, pp. 268, 276-78).

R. L. OMANSON

MAD; MADNESS; MADMAN [Heb. pual and hithpael of *šāgaʿ* (Dt. 28:34; 1 S. 21:14 [MT 15]; 2 K. 9:11; Hos. 9:7; pual and hithpael part., 1 S. 21:15 [MT 16]; Jer. 29:26), *šiggāʿôn* (Dt. 28:28; Zec. 12:4), poel part. and hithpoel of *hālal* (1 S. 21:13 [MT 14]; Eccl. 2:2; Jer. 50:38; 51:7), *hôlēlôṯ* (Eccl. 1:17; 2:12; 7:25; 9:3), *hôlēlûṯ* (Eccl. 10:13), hithpalpel part. of *lāhah* (Prov. 26:18); Gk. *maínomai* (Jn. 10:20; Acts 12:15; 26:24f.; 1 Cor. 14:23), *manía* (Acts 26:24), *paraphronéō* (2 Cor. 11:23), *paraphronía* (2 Pet. 2:16)]; AV also BESIDE ONESELF (Acts 26:24), FOOL (2 Cor. 11:23); NEB also CRAZY, RAVING, etc. In all cases the English words refer to exceptional mental states and intense inward excitement. It would be a mistake, however, to assume that the biblical terms they translate all have the same meaning or that they can be understood in any modern, clinical sense.

The verb *hālal* and cognate nouns *hôlēlôṯ* and *hôlēlûṯ* denote foolish, irrational behavior. The author of Ecclesiastes usually links these terms with *śiḵlûṯ/śiḵlûṯ* ("foolishness, folly"; e.g., 2:12; 10:13). H. Cazelles suggested that the root meaning is "nothingness, powerlessness," and that the terms therefore refer to worthless activity (*TDOT*, III, 412f.; cf. Eccl. 2:2, 12). The verb seems to connote insanity in 1 S. 21:13, however, which states: "So he [David] changed his behavior before them, and feigned himself mad in their hands, and made marks on the doors of the gate, and let his spittle run down his beard." (The verb *šāgaʿ* is used in vv. 14f.) *Hālal* is used to describe the senselessness of idolatry in Jer. 50:38 and drunken behavior in 51:7.

Less benign are the verb *šāgaʿ* and its derivative noun *šiggāʿôn*, which refer to being driven to despair or wildness. Madness here means panic or lack of control, with the implication that some stress has provoked extreme anxiety and an inability to cope. In Dt. 28:34 Moses warns the Israelites that the horrifying curses that will befall them if they disobey God's commandments will be too much to bear: "you shall be driven mad by the sight which your eyes shall see." Zec. 12:4 promises that God will strike panic in the hearts of Judah's enemies. Prophets were sometimes accused of being madmen, perhaps because they foresaw the events about which they prophesied and were frightened by the future (cf. 2 K. 9:11; Jer. 29:26; Hos. 9:7). The prophets' strange behavior resulting from their ecstatic experiences may also have contributed to their reputation for madness (*see also* Prophecy III.D).

In Prov. 26:18 "a madman" is used to translate the hithpalpel part. of *lāhah* ("startle," "amaze," "stupefy"). The emphasis here is on the wild and dangerous behavior of the madman.

Like the OT prophets, Jesus and His followers are sometimes accused of being "mad." The Greek verb *maínomai* ("rave, be crazed, be out of one's mind") is applied several times to those who bring an incredible message. In Acts 12:15 the disciples call Rhoda "mad" when she announces Peter's miraculous deliverance from prison. Similarly, Festus, having heard Paul's testimony, says to him, "Paul, you are mad; your great learning is turning you mad" (26:24). Here much learning is compared with strong drink's capacity to rob a person of his better judgment; thus Paul defends himself by saying that he is "sober" (v. 25). In 1 Cor. 14:23 Paul admonishes the early Christians that visitors who witness the whole congregation speaking in tongues might think them mad. An important use of this term occurs in Jn. 10:20, where the unbelieving Jews react to Jesus' message by saying, "He has a demon, and he is mad; why listen to him?" The two accusations mean the same thing for in first-century Palestine insanity was thought to be the result of demonic possession. While those who believed Jesus' words recognized them as coming from God, to unbelievers they were madness.

Both the verb *paraphronéō* and its cognate noun *paraphronía* refer to thinking that occurs outside of or beside the mind. In 2 Cor. 11:23 Paul applies the verb to himself in order to indicate his awareness that the boasting in which he is engaging is irrational behavior for an apostle. He implies that what he is saying comes from outside his normal mind and is different from his customary way of thinking. The writer of 2 Pet. 2:16 describes the "prophet" Baalam, "who loved gain from wrong doing" (v. 15), as having been "out of his mind" until he was restrained by an ass speaking with a human voice.

The Apocrypha uses "mad" or "madness" to translate several other Greek terms. Gk. *ánoia* (2 Macc. 14:5) basically means "unreason." The same term is rendered "fury" (in the sense of an irrational rage) in Lk. 6:11 and "folly" in 2 Tim. 3:9. The cognate term *apónoia* (2 Macc. 6:29) refers to an even more intense loss of all sense. On the other hand, the verb *agrióō* (3 Macc. 5:2) implies wildness and savagery.

In OT times people pitied and were in awe of both prophets and the insane, because both were thought inspired or possessed by God. The people's reaction to King Saul at the time of his ecstasy was, "Is Saul also among the prophets?" (1 S. 10:11). Since his insanity was thought to be divinely inspired, no one interfered with him.

In some cases in the OT insanity was meted out by God as punishment. Nebuchadrezzar was possessed by an evil spirit as God's punishment for his pride. He thought he was an animal and ate grass like an ox (cf. Dnl. 4:28-33). The Israelites who disobeyed God were threatened with "madness and blindness and confusion of mind" (Dt. 28:28; cf. Jer. 25:16; Zec. 12:4; see above).

In the NT two changes occur. First, it is not kings and nations but common folk who are afflicted with madness (e.g., Mt. 17:14-18; Lk. 8:26-33). Second, the insane are no longer considered possessed by God. Instead, reflecting the changes that occurred in Jewish demonology during the exilic and postexilic periods, mental illness is now thought to result from demonic possession. The insane are not protected or held in awe (cf. the treatment of the epileptic boy [Mt. 17:14f.] and the demoniac [Lk. 8:27, 29]). Rather, the evil spirits are considered alien to the Spirit of God; they must be driven out to effect a cure. (*See* DEMONOLOGY.)

MADAI mā'dī [Heb. *māḏay*] (Gen. 10:2; 1 Ch. 1:5). One of the sons of Japheth, whose descendants lived in Media. *See* MEDES; TABLE OF NATIONS.

MADEBA (MAP). *See* MEDEBA.

MADIABUN mə-dī'ə-bun (1 Esd. 5:58, AV). *See* EMADABUN.

MADIAN mā'dē-ən (AV Acts 7:29; Jth. 2:26). *See* MIDIAN.

MADMANNAH mad-man'ə [Heb. *maḏmannâ*; Gk. B *Machareim*, A *Bedebēna* (Josh. 15:31), B *Marmēna*, A *Madmēna* (1 Ch. 2:49)]. A town in the Negeb of Judah, listed after Ziklag. In a comparable list (Josh. 19:5) the replacement of Madmannah with Beth-marcaboth suggests that the one location had two names. Since Beth-marcaboth means "house of chariots," it may have been an alternate name from the time of Solomon (who was famous for his chariots). The various Greek translations suggest some confusion over the name. In Neh. 11:28 the name Meconah follows Ziklag. 1 Ch. 2:49 calls Shaaph the father of Madmannah and then names Sheva as the father of two cities, Machbenah and Gibea. Simons (*GTTOT*, § 322, p. 155) suggested that Machbenah is another name for Madmannah. If all these suggestions are accepted, Madmannah = Beth-marcaboth = Machbenah = Meconah. Madmannah has been identified with Khirbet Umm Deimneh, 6 km. (4 mi.) E of Ziklag and about 19 km. (12 mi.) NE of Beer-sheba, but Y. Aharoni (*LBHG*, 2nd ed., 1979, p. 353) and others have prefered Khirbet Tatrît, a nearby site with Iron Age (and later) remains. W. S. L. S.

MADMEN mad'men [Heb. *maḏmēn*]. A place mentioned by Jeremiah in his oracle against Moab (Jer. 48:2). The name is generally emended to Dimon (= DIBON) and identified with Khirbet Dimneh, about 13 km. (8 mi.) from the Dead Sea E of Masada. Some scholars have suggested that Heb. *mê dîmôn*, "waters of Dimon," in Isa. 15:9 may refer to a place by that name, but there is no objective support for this theory. The LXX *kaí paúsin paúsetai* (Jer. 48:2 [LXX 31:2]), "she shall be completely still," suggests that Jeremiah was making a play on words that is lost to modern readers. One possibility is an original **maḏmēm*, from the root *dmm*, which is also the root of the following verb, thus reading, "Silencer, you shall be silenced." Aharoni, however, took the name as descriptive of the soil (*LBHG*, 2nd ed., 1979, p. 109). W. S. L. S.

MADMENAH mad-mē'nə [Heb. *maḏmēnâ*–'dunghill' (Isa. 10:31; cf. 25:10)]. A place mentioned in Isaiah's prophecy of the Assyrian invasion of Jerusalem, after Anathoth and before Gebim and Nob; therefore it was probably close to the northern limits of Jerusalem. L. Grollenberg (*GAB*, p. 156) suggested that Madmenah was Shu'fat, but no identification is certain.

MADON mā'dən [Heb. *māḏôn*; Gk. B *Marrōn*, A *Madōn* (Josh. 11:1), B *Mamrōth*, A *Marōn* (Josh. 12:19 [LXX 20])]. A Canaanite city in Galilee whose king sided with the surrounding rulers against Joshua (Josh. 11:1). It is probably identical with the Maron of 12:19, where the common confusion of Heb. ר for ד has likely occurred. The site is uncertain, but it is probably to be identified with modern Qarn Ḥaṭṭîn about 8 km. (5 mi.) NW of Tiberias.

MAEANNAS mī-an'əs (1 Esd. 9:48, NEB). *See* MAASEIAH **12.**

MAELUS mā-ē'ləs (AV, NEB, 1 Esd. 9:26); LXX A *Maēlos*, B *Milēlos*. The RSV renders "Mijamin" to reconcile this name with the parallel in Ezr. 10:25. *See* MIJAMIN **2.**

MAGADAN mag'ə-dan [Gk. *Magadan*]; AV MAGDALA. A place visited by Jesus after the feeding of the four thousand (Mt. 15:39). The parallel passage (Mk. 8:10) has "Dalmanutha" instead of "Magadan." Both passages have a number of variant readings. In Codex Koridethi both read "Magdala," but the late date of this codex (9th cent.) and lack of other significant support do not commend this reading. Some late MSS of Mark read "Magadan," but this seems to be harmonistic.

Magadan and Dalmanutha are often considered to be contiguous locations on the eastern shore of the Sea of Galilee, but a number of scholars have placed Magadan on the western shore, possibly near the plain of Gennesaret. The general progression in Mark is not conclusive. Since Jesus and the disciples had come from the region of Tyre through Sidon and the region of the Decapolis to the Sea of Galilee (Mk. 7:31), they apparently approached Galilee from the east. The crossing of the sea (8:13), then, would have been from east to west. The insertion of "in those days" (8:1), however, suggests that Mark had begun a new part of his story; thus no geographical connection with the end of ch. 7 is required. "Bethsaida" (8:22) is likewise of no help, for there were possibly two places of this name (the word means "place of fish[ing]"), one on the northwestern shore near Capernaum (possibly 'Ain eṭ-Ṭâbghah), and one near the entrance of the Upper Jordan into the Sea of Galilee. *See* BETHSAIDA. W. S. LASOR

MAGBISH mag'bish [Heb. *maḡbîš*; Gk. *Magebōs*; Apoc. *Niphis;* A *Phineis*]; RSV Apoc. mg. NIPHIS; AV Apoc. NEPHIS; NEB Apoc. PHINIS. A place settled by 156 persons who returned from exile with Zerubbabel (Ezr. 2:30; cf. 1 Esd. 5:21, where the RSV renders LXX *Niphis*

by "Magbish," probably to harmonize the list with Ezr. 2:30). The parallel account (Neh. 7:33) omits Magbish (Lucian, however, has *Magbeis*). Abel (*GP*, II, 373) located it at Khirbet el-Makhbiyeh, 5 km. (3 mi.) SW of Adullam and 8 km. (5 mi.) ENE of Beit Jibrîn (Beth Guvrin, Eleutheropolis) in the Shephelah. Simons (*GTTOT*, p. 380) said that Khirbet Qanân Mugheimis, 2 km. (1.2 mi.) W of 'Elam, is "considerably more probable," basing his statement on the proximity of 'Elam in the text of Ezra. However, there seems to be no geographical arrangement of the places mentioned in Ezr. 2:21-35. Further complicating the problem is the probability that some of the names are of persons rather than places. W. S. L. S.

MAGDALA mag'də-lə. *See* MAGADAN.

MAGDALENE mag'də-lēn, mag-də-lē'nə. *See* MARY 1.

MAGDIEL mag'dē-əl [Heb. *magdî'ēl*] (Gen. 36:43; 1 Ch. 1:54). One of the chiefs of Edom.

MAGED mā'gəd. *See* MAKED.

MAGGOT. *See* WORM.

MAGI. *See* MELCHIOR; WISE MEN.

MAGI, STAR OF THE. *See* STAR OF THE WISE MEN.

MAGIC; MAGICIAN. The English cognates are derived from Gk. *mageía* ("magic"), *mageúō* ("practice magic"), and *mágos* ("a Magus, magician"), all found in the NT and all taken from the Iranian noun *magus* (etymology unknown), which was the name of a Median tribe with priestly specializations. In Latin the term *magus* was used both of a class of Persian priests and diviners (Cicero *De legibus* ii.26; *De divinatione* i.90; Vitruvius viii.1; Pliny *Nat. hist.* xvi.249; xxv.13) and also in a pejorative sense of sorcerers or magicians (Horace *Carmina* i.27.22; Ovid *Metamorphoses* vii.195; Quintillian *Institutio Oratoria* ii.10.5); the cognate noun *magia* ("magic," "sorcery") and adjective *magicus* ("concerned with magic," "magical") were frequently used in a pejorative manner (Ovid *Fasti* ii.426; Pliny *Nat. hist.* xxvii.57; Apuleius *Metamorphosis* iii.16; vi.26), though in Apuleius *Apologia* 2 *magia* is used of the religion of the Persian Magi. Similarly, the Greek noun *mágos* was used to refer to members of the Median tribe of that name (Herodotus i.101) as well as to astrologers, interpreters of dreams, and fortune tellers from the East (Herodotus vii.37; Josephus *Ant.* xx.7.2 [142]; Dnl. 2:2 [LXX]; 1:20 [Theod.]). Many different terms are used for magic and magicians in biblical Greek, Hebrew, and Aramaic. A consideration of the more important terms will precede the discussion of the OT and NT evidence.

I. Definition.–Developments in the religious history of the Western world since the 16th cent. have made it difficult to investigate and understand the phenomenon of magic, particularly with regard to religion. In the ancient Mediterranean world, terms corresponding to such modern words as "magic," "witchcraft," and "sorcery" were used in a primarily pejorative manner because the phenomena that they described were considered illegal or antisocial. Magic was not regarded as a distinct institution with its own specialized characteristics but rather as a set of beliefs and practices that were deviant in character. It was not until after the Reformation in the 16th cent. that the concept of magic became associated with ritual words and actions that function *ex opere operato* (i.e., have their desired effect merely by being performed or spoken).

Protestant reaction to Roman Catholic sacramentalism led to the idea that an essential feature of magic is the automatic efficacy of ritual words (incantations) and procedures (magical operations). On this basis magic and religion were further differentiated in terms of two very different fundamental relationships between humankind and the gods (or God). Magic (primarily because of its supposed *ex opere operato* character) was said to be manipulative and coercive, while religion (viewed from the Reformation emphasis on faith) was said to be based on the attitudes of supplication and veneration.

This dichotomy is inherently problematic, however, for many religions (e.g., ancient Egyptian and ancient Roman religion) exhibit a stronger emphasis on the manipulative than on the supplicative aspect. Even the obsolete distinction between "white" and "black" magic (the former regarded as socially benevolent, the latter as socially malevolent) reveals an ambivalent attitude toward magic, yet clings to the term itself because of its supposed *ex opere operato* character over against religion. Since field anthropology, from its beginnings in the 19th cent. until well into the 20th cent., was closely related to Protestant missionary activity, it was natural that the conceptual framework used to understand the cultures of small societies was based in part on the post-Reformation dichotomy between manipulative magic and supplicative religion. Magic even came to be regarded as a rudimentary form of religion that characterized human culture in earlier stages of development. Yet the religions of many third-world societies seem to be constituted of both manipulative and supplicative elements; and because of the difficulty of separating these elements, twentieth-century anthropologists began to speak more cautiously of "magical-religious phenomena." Similarly, a leading historian of ancient Near Eastern religions, Helmer Ringgren, has concluded that "religion" and "magic" are almost inseparable in Sumerian, Babylonian, and West Semitic religion (pp. 34f., 90f., 168f.).

W. J. Goode, a leading American anthropologist, recognized the difficulties in rigidly distinguishing magic from religion and proposed seven "nondichotomous" empirical differences between them (*Religion*, pp. 50-55): (1) Magic tends to adopt a manipulative, religion a supplicative, attitude toward extra-ordinary reality. (2) Magical activities tend to be used instrumentally to achieve particular goals, while religious activities tend to be regarded as ends in themselves. (3) Magic tends to focus on individual goals, religion on group goals. (4) Magical activities tend to be private and individual, while religious activities tend to occur in groups. (5) Magic tends to develop professional-client relationships, while religion tends to emphasize the "shepherd-follower" relationship. (6) In cases of failure, magic tends to introduce substitute techniques, while substitution is less characteristic of religion. (7) Magic tends

to act impersonally, with minimal emphasis on emotion, while religion tends to make greater use of emotion and to evoke attitudes of awe and worship.

While Goode's description of the "nondichotomous" differences between magic and religion is carefully formulated and represents the tendency in modern anthropology to avoid rigid distinctions between magic and religion, it does not take into account the one universal characteristic of magic, namely, its perceived illegal or antisocial character. This ancient perception of magic again became influential in modern times through the work of the French sociological school represented by Emile Durkheim and Marcel Mauss. Mauss emphasized the illegal or deviant character of magic: "A magical rite is any rite which does not play a part in organized cults — it is private, secret, mysterious and approaches the limit of a prohibited rite" (p. 24). Once magic is viewed in terms of its religiously, and hence socially, deviant character, it can be seen that many of Goode's distinctions between magic and religion (particularly nos. 2, 3, and 4) are correlatives of the deviant social setting within which magicians operate.

A definition of magic may best take into account its illegal and antisocial character by using the theoretical framework of the sociology of deviance, i.e., by understanding magic as a form of deviant behavior. This leads to a two-stage definition. First, magic is that form of religious deviance in which individual or social goals are sought by means not normally sanctioned by the dominant religious institutions. Second, such religious deviance is magical only when the goals sought are considered virtually guaranteed through the management of supernatural powers. Probably any social institution that functions to improve or rectify human existence will have deviant counterparts that pretend to provide benefits more effectively, concretely, and rapidly than the dominant institution; thus legal systems have their deviant counterparts in kangaroo courts and lynch law, medical institutions in quackery, and religion in magic. If the central characteristic of magic is religious deviance, then what is magic depends upon the judgment of those who represent dominant social norms and values, rather than upon any universal beliefs and practices attributed to magic and magicians. Thus, as indicated below, even though Jesus and the early Christians were not infrequently charged by both Jews and pagans with practicing magic, they certainly viewed their own beliefs and practices in a totally different way. The distinction between "magic" and "miracle," then, is primarily based on perspective. Early Christian "miracles" were regarded as "magic" by Jewish and pagan opponents, while pagan "miracles" were labeled "magic" by the early Christians.

Modern anthropologists have also found it useful to distinguish between witchcraft and sorcery, based on distinctions found in the languages of some, though certainly not all, modern small-scale societies in the third world (cf. E. E. Evans-Pritchard). Among anthropologists "witch" is widely used as a technical designation of a person with innate supernatural powers (e.g., the evil eye), while "sorcerer" denotes a specialist who has learned from a master practitioner the craft of controlling or using supernatural powers. The former is feared but usually tolerated, while the latter is feared and subjected to various penalties from persecution or ostracism to death.

II. OT.–A. Terminology. (1) The regular Hebrew term for "magic" is derived from the stem *kšp.* The verb in the piel (*kiššēp*) means "practice magic," "enchant" (2 Ch. 33:6, RSV "practice sorcery"). The piel participle (*mᵉkaššēp*) is used to refer to magicians or sorcerers (RSV "sorcerer," Ex. 7:11; Dt. 18:10; Dnl. 2:2; Mal. 3:5; fem. *mᵉkaššēpâ*, RSV "sorceress," Ex. 22:18 [MT 17]), as is the term *kaššāp* in Jer. 27:9 (RSV "sorcerer"). The noun *kešep*, meaning "magical art, magic," is used only in the plural and is consistently translated "sorceries" by the RSV (2 K. 9:22; Isa. 47:9, 12; Mic. 5:12 [MT 11]; Nah. 3:4), with the exception of Nah. 3:4 (RSV "charms"). *Kᵉšāpîm* is paired with *ḥᵃḇārîm* ("enchantments") in Isa. 47:9, 12, and with *mᵉʿônᵉnîm* ("soothsayers") in Mic. 5:12 (MT 11).

The stem *kšp* corresponds to Akk. *kašāpu* ("enchant," "bewitch") and nominal forms *kišpu* ("magic," "sorcery") and *kaššāpu* ("sorcerer," "magician"). Thus Heb. *kᵉšāpîm* appears to be one of the more general terms for "magic" and "sorcery," perhaps along with *ḥereš*, a term found in the OT only once, in the phrase *ḥᵃḳam ḥᵃrāšîm* (RSV "skilful magician," Isa. 3:3; AV "cunning artificer"). While not attested in Akkadian or Arabic, *ḥrš* does occur with the connotation "practice magic" in Ugaritic, Aramaic, Ethiopic, and Syriac (*TWAT* III, 237f.; KoB, 3rd ed., p. 344).

(2) The Hebrew and Aramaic term *ḥarṭōm* (never used with a magical connotation in the Talmud or midrashim) occurs in the OT only in the plural (except in Dnl. 2:10) and is consistently translated "magicians" in the RSV (Gen. 41:8, 24; Ex. 7:11, 22; 8:7, 18f. [MT 3, 14f.]; 9:11; Dnl. 1:20; 2:2, 10, 27; 4:7, 9 [MT 4, 6]; 5:11). Derived from Demotic Egyp. *ḥr-tp* ("recitation-priest," "magician-priest"), the term is used of Egyptian dream interpreters in Gen. 41 and of Babylonian dream interpreters in the Daniel stories (which appear to be modeled after those in Genesis). In Ex. 7-9 it is used of Pharaoh's wonder-workers. The LXX translates *ḥarṭōm* by Gk. *exēgētēs* ("interpreter") in Gen. 41:8, 24, but uses *epaoidós* ("singer of spells," "enchanter") or *sophós* ("wise") in the Exodus and Daniel passages. The interpretation of the Daniel texts is complicated by the lists of three or four kinds of magicians or diviners that occur in every passage except 1:20 and 4:9. It is clear, however, that the task of all these specialists was to interpret the king's dreams (2:2, 27f.; 4:4-9).

All three passages in which this term appears deal with struggles between sages whose mantic wisdom is given by God (Joseph, Moses, and Daniel) and various types of magicians and diviners whose powers (though not inconsiderable, according to Ex. 7–9) are no match for those of the God-fearing contestants (cf. Gen. 41:8; Dnl. 2:10, 27). Similar contests are described in the NT and in later Christian literature (e.g., the *Clementine Homilies* vii.1-12; *Recognitions* ii.5-72; iii.52-65), confirming the idea that the distinction between magic and miracle is primarily one of theological perspective.

(3) The OT uses two terms from the stem *ḥbr.* They are probably derived from the Semitic stem *ḥbr,* "sound," "noise," rather than *ḥbr,* "tie," "bind" (cf. Finkelstein, p. 331). In Isa. 47:9, 12 the noun *ḥeḇer* occurs in the plural (RSV "enchantments"). The substantival participle *ḥōḇēr* is twice used with the noun in the phrase *ḥōḇēr ḥeḇer,* obviously referring to some type of magic or sorcery (RSV "charmer," Dt. 18:11; "enchanter," Ps. 58:5 [MT 6]). Finkelstein concluded that the magical activity referred to was neither knot-tying nor "weaving words together" (common older views; cf. BDB, pp. 287f.); rather, he proposed that *ḥōḇēr ḥeḇer* denoted a charmer or enchanter in the sense of "one who mutters sounds," "a mutterer" (cf. LXX *epaeidōn epaoidēn,* "one who sings enchantments," in Dt. 18:11). The connection of *ḥōḇēr* with snake charming is evident from Sir. 12:13.

(4) The stem *ḥš* ("whisper") occurs in Ps. 58:5 (MT 6) as a plural substantival participle *mᵉlaḥᵃšîm* (RSV "charmers"; cf. LXX *epaidontōn,* "those who sing charms"), in what

is probably a synonymous parallelism with *ḥôḇēr ḥaḇārîm*. The nominal form *laḥaš* ("a whispering," "charming") clearly refers to snake charming in Jer. 8:17 and Eccl. 10:11.

(5) The poel of *ʿānan* (apparently derived from a stem meaning "appear," "present oneself"; cf. KoB, p. 721b), means "practice soothsaying." It occurs ten times in the OT and is usually translated "soothsayer" or "practice soothsaying" by the RSV (Lev. 19:26 [RSV "witchcraft"]; Dt. 18:10, 14; Jgs. 9:37 [RSV "Diviner's (Oak)"]; 2 K. 21:6 par. 2 Ch. 33:6; Isa. 2:6; 57:3 [RSV "sorceress"]; Jer. 27:9; Mic. 5:12 [MT 11]). The LXX often translates these terms with the Gk. *klēdon-* stem, which connotes divination of some type. The practice is condemned in Lev. 19:26; Dt. 18:10, 14; 2 K. 21:6 par. 2 Ch. 33:6 and mentioned negatively in Mic. 5:12.

(6) The stem *nḥš* in its nominal form means "divination" or "enchantment" (RSV "enchantment," Nu. 23:23; "omens," 24:1), while the piel of *nāḥaš* means "practice divination," "observe signs" (cf. RSV "divine" [using a cup], Gen. 44:5, 15; "watch for an omen," 1 K. 20:33). The practice is condemned in Lev. 19:26 and Dt. 18:10 (RSV "augury," "augur"); it is listed in 2 K. 21:6 par. 2 Ch. 33:6 (RSV "augury") as one of the sins of Manasseh and in 2 K. 17:17 (RSV "use sorcery") as a sin of Israel. In Gen. 30:27 the RSV renders the niphal form as "learn by divination." It is noteworthy that several passages (e.g., Gen. 30:27; 44:5, 15; 1 K. 20:33) neither explicitly condemn nor approve of the practice.

Cippus (amulet) of Horus with a hieroglyphic inscription used magically to heal those attacked by scorpions, snakes, and other animals. 24th-25th Dynasties (*ca.* 700 B.C.) (Oriental Institute, University of Chicago)

(7) The enigmatic "magic bands" (*kᵉsāṯôṯ*) of Ezk. 13:18, 20 (AV "pillows") are apparently magical amulets intended to bring about untimely deaths, expressed as "hunting for souls [i.e., lives]." The "veils" (*mispāḥôṯ*) mentioned in the same context apparently complement the magic bands, perhaps in a "binding/loosening" pattern (W. Zimmerli, *Ezekiel*, I [Eng. tr., *Hermeneia*, 1979], 297).

B. Lists of Terms. Since most of the terms discussed above occur in the OT only in lists of prohibited professions and practices and are never described more specifically, it is often very difficult to define precisely the kinds of professions and practices they refer to. The most comprehensive list is in Dt. 18:10f., which has the juridical intention of prohibiting all forms of sorcery and divination with the single exception of prophecy. Similar though less extensive lists of prohibited practices and professions occur in 2 K. 21:6 par. 2 Ch. 33:6 (the latter adds *kiššēp*, "practice sorcery," to the list of 2 Kings); Jer. 27:9; Lev. 19:26, 31; 20:6, 27; and Ex. 22:18, where the death penalty is prescribed for a sorceress. In addition, lists of various types of divination and sorcery appear in contexts that express strong disapproval (2 K. 9:22; 17:17; 23:24; Isa. 2:6; 8:19; 47:9, 12; Mic. 5:12 [MT 11]). These texts clearly show that the various named types of magic can appropriately be viewed from the perspective of their illegality or social deviance. Since many of the terms are derived from the languages of surrounding nations (primarily Babylonia, Assyria, and Egypt), the corresponding practices are both alien and unacceptable to the OT (Dt. 18:14). Though in many lists in Daniel the various types of Babylonian diviners and sorcerers are mentioned without express disapproval (Dnl. 1:20; 2:2, 10, 27; 4:7 [MT 4]; 5:11), the entire context makes it clear that such arts are no match for one who depends upon God for wisdom (Dn. 2:27; cf. 2:10).

The lists of prohibited professions and practices contain two basic types of magical art: DIVINATION and sorcery. While divination is an attempt to understand and interpret messages from the gods (often received in coded form), sorcery is basically concerned with influencing people and events for personal reasons or for clients. (Witchcraft, i.e., the possession of innate supernatural powers [e.g., the *ʿayin hārāʿ*, or "evil eye," mentioned in 1 S. 18:9; Prov. 28:22, RSV "miserly"], so prevalent in later rabbinical literature, is remarkably rare in the OT.) Yet sorcery and divination cannot be neatly distinguished, not only because sorcery is often concerned with revelation, but also because Canaanite and Israelite prophets often attempted to influence the outcome of the events they predicted (cf. the symbolic or magical actions of the Israelite prophet Zedekiah ben Chenaanah in 1 K. 22:11) by "creating" the fulfillment of their prophecies.

C. Forms of Magic. Aside from the various forms of magical DIVINATION referred to in the OT, and such specializations as snake charming (Jer. 8:17; Eccl. 10:11), very little is known about the specific practices that characterized magic in ancient Israel. Certainly the reiterated prohibitions of various magical practices throughout the various strata of OT literature suggest that the religious establishment in ancient Israel saw such practices as constituting a widespread and persistent problem. Magic was also associated with other forms of social deviance, e.g., prostitution (Lev. 19:26-29, 31; 2 K. 9:22; Isa. 57:3; Nah. 3:4).

Many of the Hebrew terms for magical practioners suggest that the chanting of ritual incantations was one of the characteristic features of their activities. In spite of Urbach's claim that "there is no adjuration by God's

name" in the OT (I, 124), the opposite is suggested by 2 K. 2:23f., which presents Elisha as cursing some boys "in the name of the Lord," with the result that they were attacked by bears and many of them killed. Further, the third commandment (Ex. 20:7 par. Dt. 5:11), "You shall not take the name of the Lord your God in vain [*laššaw'*]," may well reflect the negative, hence evil, use of God's name for magical purposes (M. Noth, *Exodus* [Eng. tr., *OTL*, 1962], p. 163). The stem *šāw'* ("evil," "emptiness") also appears to have magical connotations elsewhere in the OT (cf. Isa. 5:18; Ps. 41: 6 [MT 7]; Job 11:11; 31:5; Ps. 24:4; 26:4; see M. Klopfenstein, pp. 315f.). S. Mowinckel (*Psalmenstudien*, I, 50-57) has maintained the use of the same stem with magical connotations in many other biblical Psalms (12:2 [MT 3]; 26:4; 119:37; 144:8; etc.; but cf. *Psalms in Israel's Worship* [Eng. tr. 1962], I, 182 n. 195; II, 25 n. 64). It was perhaps due to the magical misuse of the divine name that the tetragrammaton (now commonly vocalized "Yahweh") was so rarely pronounced that its original pronunciation was forgotten. The use of the name of the God of Israel in magical adjurations appears to have become more popular during the second temple period. In 1 En. 69:13 Kasbeel, the chief of oaths (his name is probably related to the stem *kšp*, from which the regular Hebrew terms for magic are derived), asks Michael to show him the hidden name, that he might use it in the oath "so that those might quake before that name and oath who revealed all that was in secret to the children of men." In Jub. 36:7 Isaac makes his children swear a great oath "by the name glorious and honoured and great and splendid and wonderful and mighty." The Mishnah (*Taanith* iii.8) quotes Honi the Circle-Drawer, an enigmatic Jewish sage who apparently dabbled in magic. Honi made it rain by drawing a circle (a magical diagram), standing within it, and pronouncing, "I swear by thy great name that I will not stir hence until thou have pity on thy children."

The malevolent use of magic may also be reflected in the Psalms. Mowinckel has proposed that the expression *pō'ᵃlê 'āwen* ("workers of iniquity"), which occurs some sixteen times in the Psalms, refers to those who used sorcery to bring illness and destruction upon the psalmist; cf. esp. Pss. 38 and 41 (S. Mowinckel, *Offersang og Sangoffer* [1951], pp. 254-56).

In sum, the evidence shows that the practice of magic in various forms in ancient Israel was probably widespread. But the censorship exercised by various authors and redactors has not permitted a more intimate acquaintance with the exact forms and settings of such magical activities. More light may be shed by postbiblical Jewish sources, yet the extent to which they illuminate on earlier periods is questionable.

Execration text written in hieratic on a clay figurine, which was broken to effect the curse. From Saqqârah, *ca.* 18th cent. B.C. (Brussels, Musées Royaux d'Art et d'Histoire, inv. E. 7442. *Copyright A. C. L., Bruxelles)*

III. Postbiblical Judaism. *–A. Rabbinic Judaism.* Rabbinic literature (extending from the final redaction of the Mishnah by Rabbi Judah the Prince toward the end of the 2nd cent. A.D. to the completion of the Jerusalem and Babylonian Talmuds four centuries or more later) does not exhibit a unified perspective on magic. While the rabbinic sages were well acquainted with the prohibitions against the various forms of divination and sorcery in the Torah, they were also well acquainted with magical practices. Some even practiced the art themselves. There are several reasons for this tension between theory and practice. The rabbis, like other ancients, made no clear distinction between science and magic, particularly in the areas of diagnosis and curing (cf. T.B. *Shabbath* 33a, where three causes of dropsy are proposed [sin, hunger, or magic], based on the nature of the specific symptoms). What appear to be magical healing remedies are discussed extensively in rabbinic literature (cf. T.B. *Shabbath* 66b-67a), including even the prescription of *voces magicae* (i.e., magical gibberish), such as those quoted in T.B. *Shabbath* 67a: "Bazak, bazik, bibazik, mismasik, kamun kamik." Similarly, the nature and function of amulets receive extensive discussion (cf. 61a-62a), and the sages appear to have been fully aware of the legal and theological problems involved. Thus 61a says: "Our Rabbis taught: What is an approved amulet? One that has healed (once), a second time and a third time; whether it is an amulet in writing or an amulet of roots, whether it is for an invalid whose life is endangered or for an invalid whose life is not endangered." Furthermore, the rabbis could deviate from the biblical prohibitions for the purpose of studying and familiarizing themselves with magical arts. Finally, it appears that they were able to harmonize the biblical prohibitions with the practice of some forms of magic by redefining both. Nevertheless, the rabbis' opposition to

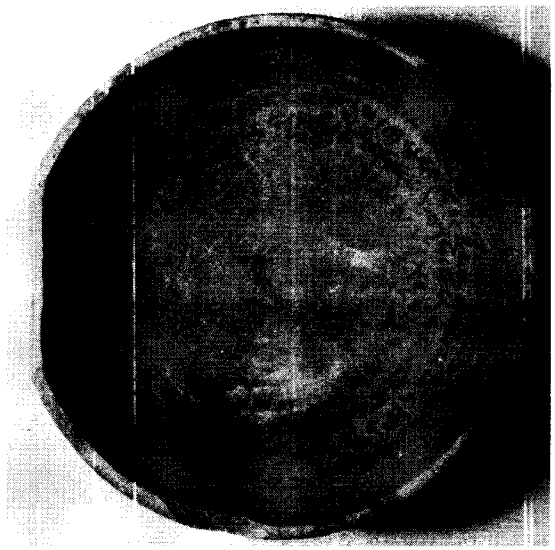
the prohibited practices is clear from this representative saying of Rabbi Simeon ben Eleazar (Mish. *Sotah* ix.13): "Fornication and sorceries have made an end of everything." The strong antifeminist tendencies in rabbinic literature (probably originating in the effect of relationships between men and women on ritual purity) found expression in the rabbinic view that many, if not all, women engage in witchcraft (T.B. *Sanhedrin* 67a; *Berakoth* 53a; *Erubin* 64b), for "the best of women is a sorceress."

B. Sepher ha-Razim. The *Sepher ha-Razim,* "Book of Mysteries," is a carefully constructed Jewish magical handbook, compiled rather late (6th to 7th cents. A.D.) but probably reflecting material contemporaneous with the earlier talmudic period (3rd-4th cents. A.D.). According to the *Sepher ha-Razim* itself, the book (with many similar books) was revealed to Noah by the angel Raziel before the flood, and then passed down with other such literature to Solomon, who was associated with traditions of magic and healing and was regarded as the patron of Jewish exorcists (SB, IV, 510-12, 533f.; L. Ginzberg, *Legends of the Jews* [repr. 1956], IV, 149-154; VI, 291-93). The handbook deals with three kinds of magic: magical healing, magical revelation, and magical procedures for gaining power over enemies. The primary agents for the magician are angelic beings, whose proper names must be called out or written down so that they can be sent on their missions. The book has a cosmological structure, being divided into seven parts corresponding to the seven heavens, with various classes of angels located in each of the heavens.

The book is remarkable for several reasons. First, it was apparently compiled by an educated Jew (though many of the practices were doubtless popular) in spite of the numerous and clear biblical prohibitions of nearly all forms of divination and sorcery. Second, a number of features are strikingly pagan: the inclusion of a procedure for consulting the dead, the sacrifice of a white rooster and the offering of incense to the moon and stars, and a prayer to Helios, the sun. On the other hand, the *voces magicae* (magical gibberish) found typically in the Greek magical papyri are totally absent, and the spiritual forces relied upon are of course not gods and daimons, but angels organized into complex groups. The *Sepher ha-Razim* constitutes one more piece of a growing body of evidence that Judaism of late antiquity exhibited a more heterodox character than was previously supposed.

C. Judaism and the Greek Magical Papyri. The importance and popularity of Jewish magic in the Greco-Roman world can be partially gauged by the influence that it apparently exerted on pagan magical practices. One of the more striking examples of this influence is seen in the popularity of the Jewish names for God used in pagan magical procedures. Such names as Iao, Sabaoth, Adonai, and Eloe occur frequently (Preisendanz [hereafter *PGM*], IV, 1577; V, 481; VII, 400; XXXVI, 42; XLIII, 13), often in combination (Iao, Sabaoth, Adonai, Eloai, and Abrasax are found together in *PGM,* XXXVI, 42; Adonai, Eloai, Abraam in V, 481; Sabaoth, Adonai, Eloai, in XLIII, 13). Furthermore, biblical names appear, e.g., Adam (*PGM,* III, 146), Abraham (VII, 315, 481), and Moses (XIII, 970; VII, 619); so also do the names of angels from Jewish tradition (Michael in *PGM,* I, 301; III, 148; VII, 609; Gabriel in XLIII, 23; VII, 1018; Raphael in XXXV, 3; III, 212; and others). Moreover, a number of magical names and words end in *-oth,* a typical Semitic ending.

Several magical papyri exhibit a particularly striking Jewish influence. *PGM,* XIII, e.g., is a complex composition entitled "Eighth Book of Moses," embodying several earlier documents and traditions. It includes the "Key of Moses" (XIII, 21) and another section that begins with the description, "The sacred secret book of Moses called the eighth or holy" (XIII, 343f.). The *subscriptio* of the composition appears in line 730 as "The Eighth Hidden Book of Moses," but the author has supplied an alternate title as well: "In another copy it was written, 'The Hidden Book of Moses on the Great Name, that for Everything, in which is the Name of the One Who Rules All." At the conclusion of the papyrus (lines 1077f.) is another *subscriptio,* "The Tenth Hidden Book of Moses." These varied titles indicate that the document has had a very long and complex literary history. The content is predominantly pagan, despite a veneer of Jewish magical and religious traditions. Another, much shorter, document is called "From the Diadem of Moses" (*PGM,* VII, 619-627). It is apparently an excerpt from a much larger collection and contains formulas for invisibility and for attracting the love of women. The divine names Iao, Sabaoth, and Adonai are part of the incantation (lines 626f.). Yet another magical composition, called the "Prayer of Jacob" (*PGM,* XXIIb), appears to be thoroughly Jewish with scarcely a trace of pagan elements. The closing lines clearly exhibit its Jewish character:



> I invoke you who gives power of the Abyss
> to those above, to those below, and
> to those under the earth.
> Hear the one who has this prayer,
> Lord God of the Hebrews Epangaēl alamn
> of whom is the eternal power, Elōēl, Souēl.
> Maintain the one who possesses this prayer,
> who is from the stock of Israel and from those
> who have been favored by you.

Thus the Greek magical papyri provide evidence both that Jewish magic was influential upon its pagan counterpart, and that (as in the OT), pagan magic had a profound impact upon Jewish magical practices as well.

D. Aramaic Incantation Bowls. One important source of knowledge about Jewish magical practices is the nearly eighty extant incantation bowls made by Jews in Babylonia during the Sassanian period (A.D. 226-636). Such bowls have been found primarily at Nippur, but also at Khuzestan, Hamadân, and Nehavand. They are made of clay and contain magical texts written in spirals beginning at the center of the bowl. Though the exact use of the bowls is disputed, their function is clearly apotropaic in that they are meant to ward off the evil effects of a number of malevolent supernatural beings and influences, e.g., the evil eye, Lilith, and Bagdana. These evil effects are often associated with witchcraft rather than sorcery and are thought to be activated by jealousy. Children are particularly susceptible. Lilith (Heb. *lîlîṯ*, occurring in the OT only in Isa. 34:14 [RSV "night hag"]), regarded as a demonic creature of the night, was depicted by the rabbis as a being with wings and long flowing hair. As a female succubus Lilith was thought to be capable of taking on the likeness of a man's wife and luring him into sexual relations. As a male incubus (Aram. *lyly*) Lilith could similarly impersonate a husband in order to have sexual relations with his wife, perhaps producing children. (*See also* NIGHT HAG.) Bagdana, regarded as a high-ranking demon, was called "king and ruler" of the liliths, demons, and devils, and "great ruler of the liliths."

The bowls used quotations from the OT for their apotropaic powers. Zec. 3:2 occurs most frequently: "And the Lord said to Satan, 'The Lord rebuke you, O Satan! The Lord who has chosen Jerusalem rebuke you! Is not this a brand plucked from the fire?'" One name that occurs several times on the bowls is that of an apparently famous rabbi, Joshua ben Peraḥiah, who was also a magician. In one text in which Lilith is exorcised with divorce termi-

MAGIC

nology, the text concludes "I bind and I seal with the seal of El Shaddai and with the seal of Joshua b. Perahia the healer" (Neusner, pp. 335f.). Joshua ben Perahiah is placed, in rabbinic legend, in relation to Jesus of Nazareth, whom he reportedly excommunicated (T.B. *Sanhedrin* 109b; *Sotah* 47a). The Aramaic incantation bowls, despite the many problems involved in their proper interpretation, again suggest that Judaism of late antiquity exhibited a great deal of magic.

IV. NT.–A. Terminology. In the NT the Greek noun *mageía* (RSV, NEB, "magic"; AV "sorceries") is used only in Acts 8:11, while the verb *mageúō* (RSV "practice magic"; AV "use sorcery"; NEB "magical arts") is also used but once, in the same context (8:9). The noun *mágos* (RSV "magician"; AV, NEB, "sorcerer") is found only twice in the NT with a pejorative meaning (Acts 13:6, 8); it also occurs four times in the Matthaean infancy narrative (Mt. 2:1, 7, 16) with its more original nonpejorative meaning of "wise man" (RSV, AV; cf. NEB "astrologer"). Gk. *phármakos* ("sorcerer") occurs twice in the NT (Rev. 21:8; 22:15), while *pharmakeía* (always "sorcery" in RSV) is found three times (Gal. 5:20 [AV "witchcraft"]; Rev. 9:21; 18:23; cf. *érga pharmakeíōn*, Wisd. 12:4). Furthermore, the term *periergos* (with the vb. *prássō*, "do," "practice") occurs once in the NT with the meaning "magical arts" (RSV, Acts 19:19; AV "curious arts"; NEB "magic"; but cf. its use in the sense of "busybody" in 1 Tim. 5:13). The noun *práxis* is used in Acts 19:18 as a technical term meaning "magical practice" or "magical procedure"; it is translated "practice" by the RSV, "deed" by the AV, but more appropriately "magical spell" by the NEB.

Several general observations can be made on the basis of this relatively meager terminological evidence. First, aside from the single reference in Gal. 5:20, the technical terminology for magic occurs only in Revelation and Acts. Each of these writings exhibits an opposition to current magical practices, which suggests that magic posed a serious threat to these authors and the communities in which they wrote. Second, the author of Luke-Acts is particularly familiar with the technical terminology of magic. Third, as in the OT, some of the terms for magic or its practitioners occur in lists of vices or offenders with which they were apparently closely associated. Thus in Gal. 5:19-21 sorcery appears in a list of "works of the flesh" that also includes fornication, impurity, licentiousness, idolatry, enmity, strife, jealousy, anger, selfishness, dissension, party spirit, envy, drunkenness, and carousing. In Rev. 21:8 the list of those excluded from the Holy City includes the cowardly, faithless, polluted, murderers, fornicators, idolaters, and liars, in addition to sorcerers. A similar list in 22:15 includes "dogs and sorcerers and fornicators and murderers and idolaters, and every one who loves and practices falsehood." As in the OT, the mere mention of magical practices in a list of vices does not offer much information about what these practices involved. It is clear, however, that, in spite of the relatively few uses of magical terminology in the NT, ancient magic had a profound impact on early Christianity, both as an external enemy and as an internal threat.

B. Magic in the World of the NT. The Greco-Roman world within which Christianity originated and began to expand was a world in which various religions and philosophies from both East and West competed with one another. Because most of these religions focused on myths and rituals rather than theology, leaving them open to influences from other religions, the period was characterized by syncretism. Various magical traditions from the East moved into the West and became, often because of a nostalgia for the ancient and mysterious, part of a growing body of international magical lore. From Assyria and Babylonia came an interest in astrology. From Egypt came an emphasis on the power inherent in the spoken or written word, especially the secret name. From Persia came an emphasis on demons, both as causes of illness and human problems and also as agents that could be enlisted to carry out the wishes of the magical practitioner. From Israel came a repertoire of divine and angelic names that were considered particularly effective in magical incantations. Greco-Roman magic was thoroughly utilitarian, and particular magicians, incantations, and amulets were judged primarily by their rates of success. This is one reason why many of the procedures preserved in the Greek magical papyri conclude with a statement such as "this one really works," or "this spell is guaranteed to produce the desired results."

Greco-Roman magic can be divided into four major categories according to purpose: (1) protective or apotropaic magic (particularly against dreaded illnesses), (2) aggressive and malevolent magic, (3) love magic and magic aimed at the acquisition of power over others, and (4) magical divination or revelation. Along with erotic magic, magical revelation was one of the more popular and widespread types of magical practice. The Elymas of Acts 13:6 was both a magician and a false prophet.

C. Antimagical Polemic. Jesus and the earliest Christians were persistently charged, by both Jews and pagans, with practicing the magical arts. The controversy centered on the performance of miracles of healing and exorcism. Jesus and the early Christians claimed that they were agents of God, while their opponents charged that they were rather agents of evil spiritual forces. These charges were serious enough to require refutation. Consequently, a vigorous antimagical polemic permeates the four Gospels and Acts, and traces of it can be found in the remainder of the NT as well.

In the Synoptic Gospels this antimagical polemic is clearly reflected in the Beelzebul pericope (Mk. 3:22 par. Mt. 12:24; Lk. 11:15f.). BEELZEBUL is apparently a name for Satan, and the phrase "by the prince of demons"

(Matthew and Luke have "by Beelzebul") must be understood as a contraction of "in the name of the prince of demons," or "in the name of Beelzebul." Jesus, then, is here charged with practicing magic, for His opponents accuse Him of having performed His healings and exorcisms by the power of Beelzebul, who is supposedly indwelling Jesus and being controlled by Him. Mt. 10:25 suggests that Jesus' opponents may have actually nicknamed Him "Beelzebul." This charge and all that it implies are refuted in the following pericope (Mk. 3:23-30 par.). In the Fourth Gospel Jesus is three times accused of having a demon (Jn. 7:20; 8:48-52; 10:20f.), which is an abbreviated way of charging Him with being a fake prophet and a charlatan whose powers to perform miracles come from Satan. Similarly, the accusation that Jesus was an impostor or deceiver (e.g., Mt. 27:63; Jn. 7:12, 47) must be understood in relation to the charge that He practiced magic, for false prophets and magicians were subject to the death penalty according to the Deuteronomic code (Dt. 13:5; 18:20). Jesus' Jewish opponents may have used these ancient laws to justify His execution.

The Gospel accounts of the temptation of Jesus (Mt. 4:1-11 par. Lk. 4:1-13; cf. Mk. 1:12f.) also express an antimagical polemic. Only Satan's offer of the kingdoms of the world can be considered a "messianic" temptation. The accounts of the other two temptations should be understood as depicting Jesus' rejection of conventional magical means to attain His goals. Such feats as turning stones to bread and flying through the air are commonly claimed by magicians.

The charge that Jesus practiced magic is reflected in Mark's account of the various rumors that King Herod heard about Jesus' miraculous deeds (6:14-16). According to one rumor, "John the baptizer has been raised from the dead; that is why these powers are at work in him" (v. 14). Those who died violent deaths were thought particularly susceptible to postmortem control by magical practitioners (cf. Lucian *Philopsendes* 29; Tertullian *Apol.* 23; *PGM*, IV, 333, 1914, 1950; LVII, 6); thus Jesus is here accused of performing wonders by gaining control of the restless spirit of John the Baptist.

These representative examples reveal the widespread nature of the antimagical polemic in the Gospels. The charge that Jesus was a magician has also been preserved outside the NT in both pagan and Jewish traditions (Jewish sources: T.B. *Sanhedrin* 43a; cf. Klausner, pp. 18-47; pagan traditions: Origen *Contra Celsum* i.6, 38, 68; Koran 5:113).

Antimagical polemic also occupies a prominent place in the Acts of the Apostles, and the author of Luke-Acts appears to have been exceptionally well informed regarding the techniques and technical terms of Greco-Roman magic. This is most evident in three important passages: Acts 8:9-24; 13:4-12; and 19:11-20. The first describes how the infamous Simon Magus, who has a great reputation as a powerful magician (and in later Christian literature is the arch-magician and father of Christian heresies), is drawn to the Christian faith by the superior power exhibited by Christians through the Holy Spirit. Acts 13:6-12 describes a contest between Paul and Elymas or Bar-Jesus, the false prophet and magician, in the court of the Roman proconsul Sergius Paulus. Paul's power proves superior to that of Elymas, who is struck blind by a judicial miracle performed by Paul. In 19:11-20 seven Jewish exorcists or magicians attempt to use the name of Jesus in their exorcisms, only to be overpowered by the demoniac whom they are attempting to cure. The story ends with many in Ephesus confessing their magical practices and burning their magical handbooks. All of these passages describe contests between Christians with miraculous powers and magicians whose powers are derived from incantations and the control of malevolent supernatural forces. The author of Acts carefully demonstrates the superiority of Christianity in each of these encounters.

V. After the NT.–In the 2nd cent. A.D. and later, Greco-Roman magic continued to pose a formidable threat to Christianity, and some deviant forms of Christianity (e.g., the Gnostic groups) developed a complex magical lore of their own. Christians continued to be accused by both Jews and pagans of practicing magic, and they hurled back the charge with equal vigor. Celsus, a second-century critic of Christianity, charged that Christians got their power by pronouncing the names of certain demons and using incantations (Origen *Contra Celsum* i.6). Origen, a firm believer in the efficacy if not the legitimacy of magical practices, responded that Christians received power by pronouncing the name of Jesus and reciting narratives concerning Him. Justin Martyr also contrasted the successful Christian exorcists, who used the name of Jesus, with others (presumably pagans) who relied on incantations and drugs. Ignatius of Antioch (d. *ca.* A.D. 115) noted that one significant effect of Jesus' incarnation was the dissolution of the powers of magic (Ign. Eph. 19:3). Three vice lists in the Apostolic Fathers (Barn. 20:1; Did. 2:2; 5:1) pair the terms *pharmakeía* ("sorcery") and *mageía* ("magic"), or *pharmakeúō* ("practice sorcery") and *mageúō* ("practice magic"). Such lists clearly indicate that magical practices were categorized as deviant and inconsistent with the Christian faith.

MAGISTRATE [Aram. *šāpēṭ*] (Ezr. 7:25); NEB ARBITRATORS; [pl. of *tiptāy*] (Dnl. 3:2f.); AV SHERIFFS; NEB CHIEF CONSTABLES; [Gk. *árchōn*] (Lk. 12:58); NEB COURT; [pl. of *stratēgós*] (Acts 16:20, 22, 35f., 38). The term is used for a variety of officials whose functions, while not precisely known, are generally judicial. In the expression "magistrates and judges" (Ezr. 7:25) the terms are practically synonymous, since the former (not found elsewhere in Aramaic) is a loanword from Heb. *šāpaṭ*, "judge"; however, the LXX reading, "scribes" (Gk.

grammateís = Aram. *sapᵉrîn*), is often preferred. In the lists of Persian titles for officials in Dnl. 3:2f. "magistrate" translates a term whose meaning is unknown, but is probably a loanword from Persian *tāyu-pātā*, "police chief"(?). Gk. *árchōn* may denote any of a wide variety of authorities (see Delling, *TDNT*, I, 488f.); e.g., the same author uses it in Acts 16:19 ("rulers"), as a synonym for the *stratēgoí* of v. 20. The latter were the leading officials of the Roman colony of Philippi, the *duumviri*. E. W. S.

MAGNIFICAL. An old form retained by the AV from the Genevan Version at 1 Ch. 22:5, translating the Heb. hiphil of *gāḏal* (lit. "make great"; RSV, NEB, "magnificent").

MAGNIFICAT, THE mag-nif'i-kat. Luke 1:46-55, the song of praise attributed to Mary the Lord's mother; she offered it in response to Elizabeth's blessing (vv. 41-45). The name comes from the first word of this passage in the Vulg.: *Magnificat anima mea Dominum* ("My soul magnifies the Lord"). The passage forms one of several Lukan canticles (Lat. *canticulum*, "little song") and has liturgical significance as a song used in Christian worship that was not from the OT Psalter.

Scholarship has attained a consensus that this is a poetic speech (possibly of the genre known as "Hymns of Praise," Heb. *hodāyôṯ*, from the Dead Sea Scroll 1QH). It is definitely Hebraic in its meter, with the use of couplets (*parallelismus membrorum*), and in its use of OT idioms. There is less certainty whether it is based on a Semitic original (as suggested by H. Gunkel, who has been supported by Aytoun, D. R. Jones, Laurentin, and P. Winter), perhaps even going back directly to an Aramaic poem sung by Mary in her Galilean dialect (J. G. Machen, *Virgin Birth of Christ* [1930], pp. 95-98).

But a Hebrew or Aramaic *Vorlage* for the Magnificat is a minority position, although several scholars have lent support to it (see Marshall, p. 47). When this view is linked with the notion of the Lukan canticles (the Magnificat of Mary, the Benedictus of Zechariah [1:68-79], and the Nunc Dimittis of Simeon [2:29-32]) as directly emanating from a local tradition associated with the holy family at Nazareth, it is summarily dismissed. In fact, the modern debate has sought a more complex origin for the Magnificat, as indicated below.

I. Who Spoke the Magnificat?–The textual witnesses in Lk. 1:46 present an interesting problem. Almost all the Greek MSS, ancient versions, and patristic citations read "Mary" (*Mariam*, but *Maria* in MSS C* D), but three copies of the Old Latin version have "Elizabeth" (with variant spellings). Elizabeth was taken to be the speaker by Irenaeus (*Adv. haer.* iv.7.1), in Jerome's translation of Origen *In Luc. Hom.* 7, and by Bishop Niceta(s) of Remesiana (*ca.* A.D. 400). See R. E. Brown, pp. 334-336, for a full discussion turning on the variant textual data, which are of doubtful worth and chiefly from Latin sources.

The textual evidence for an attribution to Elizabeth is so slender that if it alone counted none would entertain its value. But other factors have entered the picture (listed by S. Benko, *JBL*, 86 [1967], 263-275, and discussed in detail by R. Laurentin). The chief argument is that of *lectio difficilior* ("a more difficult reading"); i.e., one can understand a later scribe changing Elizabeth to Mary but not the other way around. Other arguments in favor of Elizabeth as the speaker are (1) the evidence of her being "filled with the Holy Spirit" (Lk. 1:41) and so gifted to prophesy; (2) the parallel of the speaker's condition with that of Hannah (1 S. 2:1-10), which suggests that Elizabeth's praise would have been occasioned by her bearing a child when her physical condition rendered motherhood unlikely; (3) the speaker's reference in v. 48 to her own "low estate" (*tapeínōsis*, lit. "humiliation"), which fits Elizabeth's barrenness (vv. 7, 25) more than Mary's modesty; (4) the parallelism that would be secured between the two speeches assigned to two parents of John (Elizabeth in the Magnificat and Zechariah in the Benedictus); (5) the awkward mention of Mary in v. 56, since she has already been introduced as the speaker in v. 46. This double allusion to Mary's name in the MSS led A. von Harnack to conjecture that the original text lacked a name altogether and read simply *kaí eípen*, "and she said." R. Laurentin, on the basis of his theory of a Hebrew original, tried to support this theory by arguing that the verb "magnifies" (*megalýnei*) translates the Hebrew part. *mᵉrômâ* (<*rûm*), "raises on high, exalts"; thus it plays on Mary's Hebrew name *miryām*, which would have been added by dittography (*Bibl.*, 38 [1957], 1-23). But this argument requires a Semitic *Vorlage*, which is doubtful. See also W. Wink, *John the Baptist in the Gospel Tradition* (1968), pp. 64f.

None of the above suggestions carries much weight, and there are counterbalancing arguments for each (see Marshall, p. 78; Fitzmyer, p. 366; Brown, pp. 335f.; J. McHugh, *Mother of Jesus in the NT* [1975], p. 445, with additional bibliography). (1) Much of the Magnificat fits neither woman, but the macarism (blessing) of Lk. 1:48b matches the macarism applied to Mary in v. 45a. (2) The song fits Elizabeth on the model of Hannah (in 1 S. 2:1-10), but Mary's presenting her child and meeting Simeon also parallel Hannah (in 1 S. 1:21-28; 2:19f.). (3) If Elizabeth's name did stand in Lk. 1:46, then it is as repetitious as Mary's name (in vv. 46, 56), since v. 41 mentions Elizabeth twice. (4) What scribe would have altered "Mary" to "Elizabeth" or inserted Elizabeth's name *de novo* in the light of the encomium of v. 48b: "all generations will call me blessed"? (5) There is a powerful symmetry in having Mary and Zechariah as authors of hymns of praise, since both persons are recipients of angelic annunciations.

II. Composition of the Magnificat.–Even with the majority opinion settling for Mary as the name in the text and the one to whom the canticle is assigned, it is by no means agreed that she composed the Magnificat. Marshall (p. 79), who considered the song appropriately attributed to Mary, conceded that of all the canticles "the hymns . . . are unlikely to have been spontaneous compositions" (p. 46).

Various compositional possibilities present themselves. (1) The Magnificat was a Lukan creation, composed by him *ad hoc* as he was writing his Gospel. The chief difficulty is that all the canticles fit only loosely into the narrative framework and can be easily removed. (2) The song of Mary along with the other canticles was composed by Luke and added to an already existing narrative (a pre-Lukan source or birth-cycle has been postulated by several scholars; see Marshall, pp. 47-49). (3) The most persuasive view, stated by Brown (pp. 346-357), is that the Lukan birth hymns are pre-Lukan and were added by the Evangelist to an existing narrative frame. The lines of argument are literary (their OT and Qumranic character but stylized composition), form-critical (involving Luke's method of composition in both Gospel and Acts, where the speeches appear to be kerygmatic pieces inserted in appropriate places), and especially topical (i.e., related to content).

The warlike character (as some interpreters have judged) of such lines as Lk. 1:52f. has suggested a setting in the battle hymns of the Maccabean times (so Winter). Moreover, the past tenses in the canticle suggest that in its original form the hymn celebrated God's providential deliverance as already in the past; it would have combined personal thanksgiving and praise to God for His eschato-

logical deeds (so H. Schürmann, p. 71, who found this "mixed form" acceptable).

The scholarly consensus is that the Magnificat originated in Jewish-Christian circles rather than in a strictly Jewish milieu. As Brown asked pertinently (p. 350), what Jewish setting would explain the tremendous sense of accomplished salvation through the house of David? And the fulfillment of the covenant with Abraham (Lk. 1:55) seems clearly to reflect Jewish-Christian convictions, which are also mirrored in the early chapters of Acts. Brown took this line further and postulated the *Sitz im Leben* of the Lukan canticles in the Anawim (whose presence he found in Acts 2:43-47; 4:32-37), a group of Jewish messianic pietists who were centered in Jerusalem and treasured these expressions of faith. The way that Luke associated the hymns with John's origins and the holy family is entirely fitting.

III. The Picture of Mary.–The song attributed to Mary is in keeping with Luke's characterization of Jesus' mother throughout the Third Gospel. The notes of joy voiced by Elizabeth (Lk. 1:41, 44) and Mary (v. 47) recur in the body of the Evangelist's work, where Gk. *agalliasis* indicates eschatological joy caused by God's intervention in salvation-history (see R. Bultmann, *TDNT*, I, 19-21).

Mary is accordingly set forth as a model believer and a spokesperson for Christian discipleship. The "blessedness" that she is given (Lk. 1:48b) is, to be sure, unique to her as the mother of the Lord, but it is a joy that, on its human side, hinges on her obedient acceptance of a divine vocation (vv. 38, 45). Mary is a prototypical believer, in Luke's picture of Christian existence, and a founding member of the eschatological family around Jesus (8:21). Indeed, some would highlight her role as the first "Pentecostal" Christian (see J. M. Ford, *Six Pentecosts* [1976], pp. 7-14). Luke evidently wished to portray Mary as having a pivotal role in salvation-history, as the most illustrious representative of the group in early Christianity upon whom the Spirit came at Pentecost (Acts 1:14; 2:1ff.) and whose life-style as the "poor" (Lk. 6:20-22) was specially favored by God.

IV. Meaning of the Magnificat.–The stately couplets that form this song of Mary have been suggestively arranged into (1) an introduction (Lk. 1:46b-47), (2) strophe 1 (vv. 48-50), (3) strophe 2 (vv. 51-53), and (4) a conclusion (vv. 54f.). See Brown (pp. 357-365), who demonstrated how the canticle is made up of a *cento* of OT passages arranged in a series of couplets (see also J. M. Creed, *Gospel According to St. Luke* [1930; repr. 1942], pp. 303f.). V. 48 is best treated, as by many recent commentators, as a sign of Luke's editorial adaptation of a precomposed Jewish-Christian hymn of praise in order to make the hymn applicable to Mary's situation; the verse — "Because he has looked favorably on the lowly condition of his servant. From now on all generations will call me blessed" — is rich in Lukan expressions and recalls the descriptions of Mary's own character in vv. 38, 45a.

Strophe 1 emphasizes a personal reaction to God's holiness and His mercy shown to the pious who trust in Him (the Anawim). The community that speaks this language recognizes in the crucified and risen Jesus precisely these traits of the divine character (Acts 3:14; 4:27, 30), but on human lips the praise of an individual (Mary) who speaks for the group.

Strophe 2 is less individualistic. The six verbs, all in the past tense, express the community's praise for God's redeeming acts in the Messiah and celebrate His covenant faithfulness (Heb. *ḥesed*) in the new age of messianic salvation (a theme in Acts 2–4). The strophe also contains a claim to self-identity, as this group sees how Jesus' own teaching on eschatological "reversal" (*Umwertung*), especially in the Lukan Beatitudes (Lk. 6:20-26) and the parables (12:16-21; 14:7-11; 16:19-31), has been understood in the group's own situation and in retrospect in the life and service of its "patron," Mary. She found true blessedness and joy in accepting her lowly situation and was raised to high privilege by becoming the vehicle of God's saving purpose. Thus the community's praise is rightly placed on her lips, since she speaks for it and for all Christians who believe in God, whose nature and grace are revealed in the incarnation and exaltation of His Son (Phil. 2:6-11; 2 Cor. 8:9).

R. P. MARTIN

MAGNIFICENCE [Gk. *megaleiótēs*–'greatness'] (Acts 19:27); NEB DIVINE PRE-EMINENCE. The Greek term is rendered "majesty" by the RSV when used of God (Lk. 9:43) or Christ (2 Pet. 1:16). *See* MAJESTY.

MAGNIFY; MAGNIFICENT [Heb. *gāḏal*–'become great,' 'consider great' (hiphil, 1 Ch. 22:5; Job 19:5; etc.; qal, 2 S. 7:26; 1 Ch. 17:24; piel, Ps. 34:3 [MT 4]; 69:30 [MT 31]; hithpael, Isa. 10:15; Dnl. 11:36f.), *rāḇâ*–'become great, numerous' (Dnl. 11:39); Gk. *megalýnō*–'make large' (Lk. 1:46), *doxázō* (Rom. 11:13)]; AV also MAGNIFICAL, BOAST, BECOME GREAT, WAX GREAT, INCREASE; NEB also BE GREAT, DEFY, GLORIFY, etc. To cause someone to be held in higher esteem.

While the Hebrew and Greek roots (esp. *gdl*) have widely varied usage, the translation "magnify" is used by the RSV primarily to denote human exaltation of God or human self-exaltation — the latter usually being depicted as presumptuous. The AV also uses "magnify" several times to denote God's exaltation of a person (e.g., Josh. 4:14). In seven of the RSV occurrences, God is exalted (e.g., Ps. 34:3: "O magnify the Lord with me, and let us exalt his name together"), while in eleven occurrences men magnify themselves. In the latter category the royal interloper of Dnl. 11:21-39 is especially notable: he will "magnify himself above every god, and shall speak astonishing things against the God of gods" (v. 36). He will also magnify those who recognize him (v. 39). Isa. 10:15 uses a rhetorical question and a metaphor to describe the absurdity of the Assyrian king's claim to have conquered by his own might: "Shall . . . the saw magnify itself against him who wields it?" Job complains that his "friends" have wronged him by magnifying themselves at his expense (19:5).

In one instance the exaltation of one's own work is not cast in negative light. In Rom. 11:13 Paul says that he magnifies (i.e., "boasts of," "makes much of") his ministry to the Gentiles in the hope of thereby effecting the salvation of Jews.

Perhaps the most sublime and familiar use of "magnify" is found in Mary's hymn of praise to God in Lk. 1:46-55, the Latin version of which begins with the words "*Magnificat anima mea Dominum*" (*see* MAGNIFICAT, THE).

See *TDOT*, II, *s.v.* "gādhal" (Bergman-Ringgren, Mosis).

S. S. STUART

MAGOG mā'gog [Heb. *māgôg*; Gk. *Magōg*]. Named as a son (or descendant) of Japheth in a list that includes Gomer, Tubal, and Meshech (Gen. 10:2; 1 Ch. 1:5). In Ezekiel's prophecy Magog is the kingdom of Gog, the chief prince of Meshech and Tubal (Ezk. 38:2; 39:6) and

an invader of Israel. Josephus identified the Magogites with the Scythians, who were a sinister military power in the 6th cent. B.C. (*Ant.* i.6.1 [123]). A resemblance between the names Gog and Gyges (Gugu) king of Lydia (*ca.* 600 B.C.) has led to the suggestion by some scholars that Magog is Lydia; others, however, urge that Magog is probably only a variant of Gog (cf. Assyr. *māt gugu*, "land of Gog"). The LXX understands Magog as a people, not a country; and if the identification with either the Scythians or the inhabitants of Lydia is tenable, it is difficult to see Magog as simply an eschatological figure for challengers of the divine supremacy over mankind (cf. D. S. Russell, *Method and Message of Jewish Apocalyptic* [*OTL*, 1964], pp. 190-93).

In the book of Revelation Gog and Magog represent all the heathen opponents of the Messiah (20:8). In this sense these names recur frequently in Jewish apocalyptic literature (e.g., Jub. 7:19; 9:8; see R. H. Charles, comm. on Revelation [*ICC*, 1920], II, 188f., for other references to Gog and Magog).

See GOG **2, 3.**

See *TDOT*, II, *s.v.* "gôgh" (Otzen).

J. A. LEES R. K. H.

MAGOR-MISSABIB mā-gōr' mis-ə-bib' [Heb. *māgôr missāḇîḇ*–'terror all around' (cf. RSV "Terror on every side"); LXX Gk. *Metoikon*–'exile', reading *māgôr* II and omitting *missāḇîḇ*]. The AV and NEB transliteration of a symbolic name given to Pashhur son of Immer, the governor of the temple, who had ordered Jeremiah beaten and held in stocks (Jer. 20:3). The name signified the coming terrors of war via the Babylonian invasion as punishment for Judah. The same expression is found, though not as a name, in a variety of other passages (Ps. 31:13 [MT 14]; Jer. 6:25; 20:10; 46:5; 49:29; Lam. 2:22). Since the LXX and Syr. do not witness to the second part of the compound (*missāḇîḇ*) in Jer. 20:3 it is possible that the name in the original text was simply *Magor* ("terror").

D. STUART

MAGPIASH mag'pē-ash [Heb. *magpî'āš*]. One of the "chiefs of the people" who signed the covenant of Ezra (Neh. 10:20 [MT 21]).

MAGUS, SIMON. *See* SIMON MAGUS.

MAHALAB mā'ə-lab [Heb. *mēḥeḇel*] (Josh. 19:29); AV "from the coast"; NEB MEHALBEH. A term traditionally understood as a town, but better taken as "district, area."

Mahalab has been proposed as a site in Asherite territory on the assumption that it was the Ahlab of Jgs. 1:31, and that the compiler's understanding of Helbah as a separate settlement resulted from confusion or misreading. On such a view Ahlab-Helbah would be one coastal city named Meheleb, conveniently identified by Y. Aharoni (*LBHG*, rev., p. 235) and others with Khirbet el-Maḥâlib, about 6 km. (4 mi.) NE of Tyre. While it probably preserves the ancient name Ahlab, it does not do the same for Helbah.

The MT of Josh. 19:21 reads "from Hebel"; thus the conjectured place name involves a transposition of the last two Hebrew consonants. Such a change might be explained by metathesis, as some have argued from the LXX, which interpreted the MT *mēḥeḇel* as a town or district named Leb.

Judges 1:31, however, furnishes no textual warrant either in the MT or the LXX for assuming that Ahlab and Helbah were different names for a site named Mahalab. Consequently the translation of MT *mēḥeḇel* by "Mahalab" seems purely conjectural, and it appears more satisfactory to regard *ḥeḇel* as a common noun meaning "district, area of land" (cf. Dt. 3:4; 1 K. 4:13) than as a place name. Josh. 19:29 would thus read preferably ". . . at the sea by the region of Achzib," as in the New King James Version.

See M. H. Woudstra, *Joshua* (*NICOT*, 1981), pp. 289f.

R. K. H.

MAHALAH mā'hə-lä (AV, NEB, 1 Ch. 7:18). *See* MAHLAH.

MAHALALEEL mə-hal'ə-lēl [Gk. *Maleleēl*] (Lk. 3:37); AV MALELEEL; **MAHALALEL** mə-hal'ə-lel [Heb. *mahᵃlal'ēl* –'God flashes forth,' 'praise of God'; AV MAHALALEEL.

1. Son of Kenan in the line of Seth; father of Jared; ancestor of Joseph the father ("as was supposed," Lk. 3:23) of Jesus (Gen. 5:12f., 15-17; 1 Ch. 1:2; Lk. 3:37). Some (e.g., *IDB*, *s.v.* "Mehujael") think this is the Sethite variant of MEHUJAEL in the Cainite genealogy (5:12f.), though others (e.g., KD) maintain that these genealogies are distinct.

2. Son of Perez; father of Shephatiah; a Judahite whose descendants lived in Jerusalem after the Exile (Neh. 11:4).

MAHALATH mā'hə-lath [Heb. *maḥᵃlaṯ, māḥᵃlaṯ*].

1. The daughter of Ishmael and sister of Nebaioth whom Esau married because his father Isaac was displeased with his Canaanite wives (Gen. 28:9). *See also* BASEMATH **1.**

2. One of the eighteen wives of Rehoboam and a granddaughter of David (2 Ch. 11:18).

MAHALATH (LEANNOTH) mā'hə-lath (lə-an'ôth) [Heb. *māḥᵃlaṯ (lᵉʿannôṯ)*]. Technical terms of uncertain meaning. *Māḥᵃlaṯ* occurs in the superscriptions to Pss. 53 and 88 (MT 53:1; 88:1), in the latter instance followed by *lᵉʿannôṯ*. Several interpretations have been suggested. (1) Some have read *ʿal-māḥᵃlaṯ* as "for the round dance," derived from *ḥwl*; cf. M. Dahood, who then derived *lᵉʿannôṯ* from *ʿny*, "sing an antiphonal song" (*Psalms*, II [*AB*, 2nd ed., 1973], 302). (2) Others have noted that the somber tone of these Psalms renders the dance interpretation unlikely. S. Mowinckel read *ʿal-māḥᵃlaṯ* as "in connection with illness" and *lᵉʿannôṯ* as "to humiliate [one's soul]," thus indicating a psalm of penitence, possibly as part of a ritual of purification from illness (*Psalms in Israel's Worship* [Eng. tr. 1962], II, 211f.). (3) Still others have suggested that this phrase represents "the opening words of a well-known song, to the tune of which the Psalm was to be performed" (A. A. Anderson, *Psalms (1–72)* [*NCBC*, repr. 1981], p. 47; cf. C. A. Briggs and E. G. Briggs, comm. on Psalms, I [*ICC*, 1906], lxxv-lxxvi).

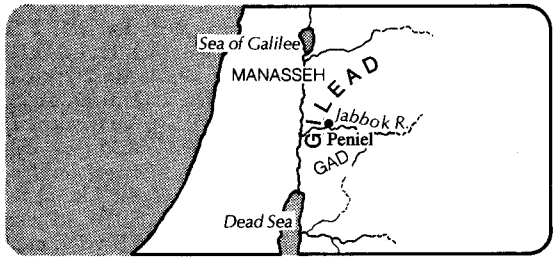
MAHALI mā'hə-lī (Ex. 6:19, AV). *See* MAHLI.



MAHANAIM mā'hə-nā-əm [Heb. *maḥᵃnayim*–'two camps']. A fortified city in Gilead that was Ishbosheth's headquarters after Saul's death and David's refuge during Absalom's coup (Gen. 32:2 [MT 3]; 2 S. 2:8; 17:24).

I. Location.–The OT locates Mahanaim E of the Jordan in Gilead. It was a town of Gad (Josh. 21:38; 1 Ch. 6:80 [MT 65]) on the border between the territories of that tribe and the half-tribe of Manasseh (13:30). Gen. 32 implies that Mahanaim was slightly N of the Jabbok (v. 22), possibly on its north bank across from Peniel (v. 30).

After his truce with Joab, Abner crossed the Jordan, marched "the whole forenoon" (*habbiṯrôn*), and arrived at Mahanaim (2 S. 2:29). This half-day journey would locate Mahanaim some distance from the Jordan. But *biṯrôn*

can also mean "cleft, ravine" (*BDB*, p. 144; W. Arnold, *AJSL*, 28 [1911], 274ff.), in which case Mahanaim would probably be situated on the side of a wadi.

Because he "ran by the way of the [Jordan] plain" (2 S. 18:23) and not across the hills, Ahimaaz preceded the Cushite in bringing the news of Absalom's death to David, who was waiting at Mahanaim. If Mahanaim was on the north bank of the Jabbok or any other "ravine," then Ahimaaz took the longer but smoother route down the Jordan plain and up the wadi. That the watchman saw the two runners coming also implies that Mahanaim was on high ground.

Beyond this, the precise location of Mahanaim cannot be confirmed, although suggestions are many (cf. Bartlett). Tulûl edh-Dhahab was once considered a possible site, but it is probably Peniel instead (cf. Glueck). Merrill suggested Khirbet Saleikhat, which is about 5 km. (3 mi.) E of the Jordan and about 6 km. (4 mi.) N of Wâdī Ajun. It is about 100 m. (300 ft.) above the plain and would afford David's watchman a high vantage point from which he could see Ahimaaz and the Cushite running (2 S. 18:24ff.). Others (e.g., *WHAB*) have suggested Khirbet Maḥneh, about 14 km. (9 mi.) E of the Jordan and 20 km. (12½ mi.) N of the Jabbok near ʿAjlûn. This is the only place that may preserve the ancient name. ʿAjlûn has been suggested, but both it and Khirbet Maḥneh are farther from the Jordan than Jacob's comment about "this Jordan" (Gen. 32:10) may imply, and are too far north. De Vaux (*Vivre et penser*, 1 [1941], 16ff., 31), followed by Simons, suggested Tell Ḥajjāj, which is S of Tulûl edh-Dhahab and the Jabbok. Aharoni thought that it is Tell edh-Dhahab el-Gharbi, since he identified Tell edh-Dhahab esh-Sherqiyeh as Peniel (*LBHG* [2nd ed. 1979], p. 34). According to Ottoson (*Gilead* [1969], p. 127) it is Tell Ḥeggāg, but this is S of the Jabbok.

II. Name.–On his return to Canaan Jacob met the angels of God, exclaimed, "This is God's army," and named the place Mahanaim, which means "two camps," i.e., God's and Jacob's (Gen. 32:1f. [MT 31:55–32:1]). Jacob mentioned "two companies" in Gen. 32:10 (MT 11) because the previous night he had divided all he had into two companies (v. 7 [MT 8]); thus this verse is not necessarily a second explanation of the name Mahanaim. S. Cohen (*IDB*, III, *s.v.*) commented that originally the form might have been "'Mahaneh' ('encampment'), lengthened by mimation to 'Mahanem,' which in turn became 'Mahanaim' (cf. *yᵉrûshālēm* and *yᵉrûshālayim* for 'Jerusalem')." But other explanations are also possible (cf. P. Joüon, *Grammaire de l'hébreu biblique* [1923], § 91h; on the form of Jerusalem *see* JERUSALEM I.A).

III. History.–Mahanaim is first mentioned as the place where Jacob rested the night before his reconciliation with Esau (Gen. 32:2). It was a Levitical (Merarite) city (Josh. 21:38; 1 Ch. 6:80 [MT 65]) within the inheritance of the Gadites (Josh. 13:26, 30). After Saul's death Abner took Ishbosheth to Mahanaim to make him king (2 S. 2:8, 12), and Abner returned there after his defeat at Gibeon (v. 29). It was probably also at Mahanaim that Ishbosheth was murdered (4:1-8).

David chose Mahanaim as his refuge from Absalom (2 S. 17:24, 27; 19:32 [MT 33]; cf. 1 K. 2:8). From here he fought Absalom, and here he wept over his son's death (2 S. 18:33).

Mahanaim was the seat of Solomon's seventh district; each district provided the king's food for one month (1 K. 4:14). The only other time Mahanaim may be mentioned in the OT is Cant. 6:13 (MT 7:1), which can be translated either "the dance of Mahanaim" (NIV) or "a dance before two companies" (RSV).

In *ca.* 925 B.C. Mahanaim was overrun by Shishak of Egypt in his raid on Palestine (cf. J. Simons, *Egyptian Topographical Lists Relating to Western Asia* [1938], pp. 89-101, 178-186).

MOUNCE

MAHANEH-DAN mā'hə-nə-dan [Heb. *maḥᵃnēh-ḏān*– 'the camp of Dan']; AV also "the camp of Dan" (Jgs. 13:25). A place where "the Spirit of the Lord began to stir" Samson (Jgs. 13:25) and where six hundred Danites camped before migrating northward (18:12). According to 13:25, it was between Zorah and Eshtaol, which were only a mile apart. Jgs. 18:12, however, states that the Danites came from Zorah and Eshtaol and pitched camp in Judah "behind" (i.e., W of) Kiriath-jearim. A camp between Zorah and Eshtaol would not be in Judah and could hardly be said to be "behind" Kiriath-jearim regardless of whether Kiriath-jearim is identified with Kiryat-el-enab or with Tell el-Azhar. Since the site was only a camp, one need not look for ruins, but the event was so memorable that long afterward the place was still called "the camp of Dan." Suggested solutions for the discrepancy in location are that a temporary camp might shift about or be only vaguely defined, or that the mention of Zorah and Eshtaol immediately before Mahaneh-dan in Jgs. 18:12 may have prompted a copyist to insert the name in 13:25 also.

In his excavation of Tell Dan, A. Biran found that the stratum believed to have been occupied by the Danite forces who conquered Laish was a level platform with no house foundations, only a few pits used for grain storage. This suggests that the site remained a mere tent camp for some time after the Danite settlement.

Bibliography–GTTOT, § 606, p. 301; A. Biran, *BA*, 43 (1980), 173f. F. WEDDLE

MAHARAI mā'hə-rī [Heb. *mahᵃray*–'servant of Yahweh'(?)]. One of the thirty chief men in David's army, who were renowned for their heroic deeds (2 S. 23:28; 1 Ch. 11:30). He came from Netophah in Judah, from the clan of the Zerahites, and was commander of the tenth division of the army (1 Ch. 27:13). Cf. the common Punic name *mhrbʿl*, "servant of Baal"(?) (or perhaps "soldier of Baal"; on Ugar. *mhr*, cf. A. F. Rainey, *JNES*, 24 [1965], 24). See F. L. Benz, *Personal Names in the Phoenician and Punic Inscriptions* (1972), pp. 340f.

MAHATH mā'hath [Heb. *maḥaṯ*].

1. Son of Amasai, a Levite of the Kohathite family (1 Ch. 6:35).

2. A Kohathite Levite, son of Amasai, who assisted in cleansing the temple (2 Ch. 29:12) and overseeing the offerings brought into the temple (31:13) during the reign of Hezekiah.

MAHAVITE mā'hə-vīt [Heb. *maḥ^{a}wîm*; Gk. *Mawi*; Vulg. *Mahumites*]. A name used to describe Eliel, one of David's thirty chief men (1 Ch. 11:46). The MT is obscure here, and some scholars have suggested emending it to *maḥ^{a}naymî*, "of Mahanaim" (see *BHS*; KD; and other comms.).

MAHAZIOTH mə-hā'zē-əth [Heb. *maḥ^{a}zî'ôṯ*–'visions']. One of the sons of Heman, appointed by David as a musician in the temple (1 Ch. 25:4, 30). *See also* JOSHBEKASHAH.

MAHER-SHALAL-HASH-BAZ mā'hər-shal'əl-hash'baz [Heb. *maher šālāl ḥāš baz*–'the spoil speeds, the prey hastes' (RSV mg.)] (Isa. 8:1, 3). A symbolic name given to Isaiah's third son (cf. SHEARJASHUB; IMMANUEL). The name was first recorded on a tablet in the presence of legal witnesses before the child was even conceived, so that later, when Isaiah's prediction of the destruction of Syria and Ephraim was fulfilled, the tablet would bear witness to the truth of the prophet's message and Ahaz's culpability in refusing to trust that message.

MAHLAH mä'lə [Heb. *maḥlâ*–'sickness' or 'weakness'(?)]; AV, NEB, also MAHALAH (1 Ch. 7:18).

1. The oldest of the five daughters of Zelophehad of the tribe of Manasseh (Nu. 26:33; 27:1; 36:11; Josh. 17:3). Because their father had no sons, they petitioned Moses that they be allowed to claim the family inheritance (Nu. 27:1-4). Their request was granted, on the condition that they marry within their father's tribe (36:1-9). They met this condition by marrying their cousins (vv. 10-12).

2. A descendant of Manasseh, possibly male (1 Ch. 7:18).

MAHLI mä'lī [Heb. *maḥlî*–'weak one'(?); Gk. *Mooli*]; AV also MAHALI, AV Apoc. MOLI; NEB Apoc. MOOLI.

1. Son of Merari and brother of Mushi; head of the Levitical family of MAHLITES (Ex. 6:19; Nu. 3:20, 33; 26:58; 1 Ch. 6:19, 29 [MT 6:4, 14]; 23:21; 24:26, 28; Ezr. 8:18; 1 Esd. 8:47).

2. Grandson of Merari and son of Mushi (1 Ch. 6:47 [MT 32]; 23:23; 24:30).

MAHLITES mä'līts [Heb. *maḥlî*–'weak ones'(?); Gk. *Mooli*]. A Levitical family; descendants of MAHLI (**1**) the son of Merari (Nu. 3:33; 26:58). They appear to have followed the example of the daughters of Zelophehad (*see* MAHLAH **1**): because Eleazar had no sons, his daughters married the sons of his brother Kish (1 Ch. 23:21f.).

MAHLON mä'lōn [Heb. *maḥlôn*–'weakness'(?)]. Son of Elimelech and Naomi; first husband of Ruth the Moabitess (Ruth 1:2, 5). He died in Moab without any children, and thus, to perpetuate his name in his inheritance, his widow Ruth married his kinsman Boaz (4:9f.).

MAHOL mā'hōl [Heb. *māḥôl*–'dance,' 'place of dancing,' 'orchestra']. Most versions render *b^{e}nê māḥôl* as "sons of Mahol" (AV, RSV, NEB, 1 K. 4:31 [MT 5:11]); thus, Mahol would be the proper name of the father of the four wise men whom Solomon surpassed in wisdom. Scholars have demonstrated, however, that the phrase is more correctly translated "members of the orchestral guild" (Albright) or "choristers" (de Vaux). In the ancient Orient wisdom and poetry were considered to be inspired by the same spirit, and thus it is not surprising that these men were renowned for their wisdom as well as their psalmody (cf. superscriptions to Pss. 88, 89).

N. J. O.

MAHSEIAH mä-sē'yə [Heb. *maḥsēyâ*–'Yahweh is a refuge'; Gk. *Maasaias*]; AV MAASEIAH, Apoc. MAASIAS. Grandfather of Baruch (Jer. 32:12 [LXX 39:12]; Bar. 1:1) and of Seraiah (51:59 [LXX 28:59]).

MAIANEAS mā-ən-ē'əs (1 Esd. 9:48, AV). *See* MAASEIAH **12.**

MAID; MAIDEN [Heb. *šipḥâ* (Gen. 16:1ff.; 25:12; 29:24, 29; 30:4ff.; 32:22 [MT 23]; 33:1f., 6; 35:25f.; Ps. 123:2; Prov. 30:23; Isa. 24:2), *'āmâ* (Gen. 30:3; Ex. 2:5; 2 S. 6:20, 22; Nah. 2:7 [MT 8]), *na^{a}râ* (Gen. 34:3, 12; 1 S. 9:11; 1 K. 1:3f.; Job 41:5 [MT 40:29]; Prov. 27:27; Am. 2:7; etc.), *b^{e}ṯûlâ* (1 K. 1:2; Ps. 78:63; 148:12; Jer. 2:32; 31:13; 51:22; Lam. 1:4, 18; 2:10, 21; Ezk. 9:6; Zec. 9:17), *baṯ* (Cant. 2:2; 6:9; 7:1 [MT 2]; Lam. 3:51), *'almâ* (Ps. 68:25 [MT 26]; Prov. 30:19; Cant. 1:3; 6:8), *yaldâ* (Gen. 34:4), *raḥam* (Jgs. 5:30); Gk. *paidískē* (Mt. 26:69; Mk. 14:66, 69; Lk. 22:56; Jn. 18:17; Acts 12:13), *parthénos* (Mt. 25:1, 7, 11)]; AV also HANDMAID, DAMSEL, DAUGHTER, VIRGIN, etc.; NEB also SLAVE-GIRL, VIRGIN, DAUGHTER, GIRL, etc.; **MAIDSERVANT** [Heb. *šipḥâ* (Gen. 12:16; 24:35; 30:43; 32:5 [MT 6]; Ex. 11:5; 1 S. 8:16; 2 S. 17:17; 2 K. 5:26; Joel 2:29; etc.), *'āmâ* (Gen. 31:33; Ex. 20:10, 17; Dt. 5:14, 21; Jgs. 9:18; 19:19; 1 K. 1:13, 17; Job 19:15; 31:13; etc.); Gk. *paidískē* (Lk. 12:45), *doúlē* (Acts 2:18)]; AV also HANDMAIDEN, etc.; NEB also FEMALE SLAVE, SLAVE-GIRL, etc.

These terms have two different meanings: (1) an unmarried girl or woman, and (2) a female slave. According to strict English usage, "maiden" denotes an unmarried girl or woman, "maidservant" denotes a female slave, and "maid" can be used with either meaning.

I. Unmarried Young Woman.–Hebrew *na^{a}râ* has the primary meaning of a marriageable but unmarried young woman (e.g., Gen. 24:14, 16, etc.; Est. 2:4, 7ff.; cf. also Ruth 2:5f.; 4:12, where the widow Ruth is called a *na^{a}râ*). In some instances, however, the term can signify a female attendant or maid (e.g., Gen. 24:61; Ex. 2:5; 1 S. 25:42; 2 K. 5:2, 4; Est. 4:4, 16; Prov. 9:3; 31:15; cf. also Ruth 2:8, 22f.; 3:2), parallel to the use of *na'ar* ("lad, youth") to signify a male attendant (e.g., Gen. 22:3; Nu. 22:22).

B^{e}ṯûlâ is usually translated "virgin" (e.g., KoB, p. 160), but some scholars have contested this interpretation (e.g., G. J. Wenham, M. Tsevat). Probably the term originally denoted a marriageable young woman (who was normally a virgin) but later developed the narrower meaning "virgin" (cf. the same development in Gk. *parthénos* and Ger. *Jungfrau*).

Other OT terms rendered "maiden" are *baṯ* (lit. "daughter" but also "girl, young woman"), *'almâ* ("girl at the age of puberty," "marriageable young woman"), *yaldâ* ("girl, young woman"; cf. *yeleḏ*, "boy, young man"), and *raḥam* (lit. "womb," used contemptuously in Jgs. 5:30).

Greek *parthénos* is the usual LXX translation of Heb. *b^{e}ṯûlâ*, and its meaning appears to have evolved in the same way (see above). In Mt. 25:1-12 the *parthénoi* are virgins.

See also GIRL; MARRIAGE; VIRGIN.

II. Female Slave.–In the OT Heb. *šipḥâ* and *'āmâ* appear to be virtually synonymous designations for "female slave" (a common RSV translation in the Pentateuch). Both can also be used figuratively by a woman to express humility or submission when she speaks to a man or to God (e.g.,

'āmâ in Ruth 3:9; 1 S. 1:11, 16; 2 S. 20:17; 1 K. 3:20; *šiphâ* in Ruth 2:13; 1 S. 1:18; 2 K. 4:2, 16). Although no distinction between *šiphâ* and *'āmâ* is apparent, possibly the *šiphâ* was originally more closely associated with the family (*mišpāḥâ*). Another term that sometimes denotes a female servant is *na'ᵃrâ* (see I above).

In the NT Gk. *paidískē* (cognate of *país*, "child") and *doúlē* (cognate of *doúlos*, "servant") always designate a female slave (cf. RSV "slave" for *paidískē* in Gal. 4:22f., 30f.; "slave girl" in Acts 16:16).

See also HANDMAID; SERVANT; SLAVE.

Bibliography.—*DNTT*, III, 1071-73 (O. Becker, C. Brown); *TDNT*, V, *s.v.* παρθένος (G. Delling); *TDOT*, II, *s.v.* "bᵉthûlāh" (M. Tsevat); *TWOT*, I, 49f., 137f.; II, 946f.; G. J. Wenham, *VT*, 22 (1972), 326-348. N. J. O.

MAIL. *See* WEAPONS OF WAR.

MAIMED [Heb. niphal of *šāḇar*] (Zec. 11:16); AV "that that is broken"; NEB INJURED; [Gk. *kyllós*] (Mt. 15:30f.; 18:8; Mk. 9:43); AV also HALT; NEB also CRIPPLED; [*anápēros*] (Lk. 14:13, 21); NEB CRIPPLED.

The niphal part. *nišbār/nišbereṭ*, "maimed, crippled," in its few applications specifically denotes the "breaking of a limb," as its verbal root (*šāḇar*, "break") suggests. In Zec. 11:16 *nišbereṭ* refers to a maimed or injured sheep that the incompetent shepherd fails to heal; it also is applied to injured animals in Ex. 22:10, 14; Ezk. 34:4, 16. *See* CRIPPLE; HURT; LAME. This term is used of people only in Isa. 8:15; 28:13, where it describes those who have figuratively stumbled over the law.

Kyllós specifically denotes a human limb that is abnormal or incapacitated, whether by congenital defect or injury. It is thus used substantively to designate those who are "deformed," "crippled," or "maimed." Twice (Mt. 15:30f.) it delineates a special subclass of the disadvantaged society, "the cripples." In the remaining two occurrences the sense of "disabling injury" or "maiming" is pronounced. Gk. *anápēros*, appearing only twice in the NT, is also used substantively to denote the same societal subclass. D. G. BURKE

MAINSAIL. *See* SHIPS.

MAJESTY; MAJESTIC [Heb. *gā'ôn*] (Ex. 15:17; Job 37:4; 40:10; Isa. 2:10, 19, 21; 24:14; 60:15; Mic. 5:4); AV also EXCELLENCY; NEB also TRIUMPH, PRIDE; [*ga'ᵃwâ*] (Dt. 33:26; Ps. 68:34 [MT 35]); AV EXCELLENCY; NEB GLORY, PRIDE; [*gᵉ'ûṯ*] (Ps. 93:1; Isa. 26:10); [*hāḏār*] (1 Ch. 16:27; Ps. 21:5 [MT 6]; 29:4; 45:3f. [MT 4f.]; 96:6; 104:1; 111:3; Isa. 35:2); AV also HONOUR, GLORIOUS, EXCELLENCY; NEB also SPLENDOUR, HONOUR; [*hôḏ*] (1 Ch. 29:11, 25; JOB 37:22; 39:20; Ps. 145:5; Isa. 30:30); AV also GLORY, GLORIOUS; NEB also "shrill"; [*'addîr*] (Ps. 8:1, 9 [MT 2, 10]; 76:4 [MT 5]; Isa. 10:34; 33:21; Ezk. 32:18); AV GLORIOUS, EXCELLENT, MIGHTY, FAMOUS; NEB GLORIOUS, MIGHTY, NOBLE; [niphal of *'āḏar*] (Ex. 15:11); AV GLORIOUS; [*gᵉḏûlâ*] (Est. 1:4); [*śᵉ'ēṯ*] (Job 13:11; 31:23); AV EXCELLENCY, HIGHNESS; [Aram. *hᵃḏar*] (Dnl. 4:30 [MT 27]); [*rᵉḇû*] (Dnl. 4:36 [MT 33]; 5:18); [Gk. *megaleiótēs*] (Lk. 9:43; 2 Pet. 1:16); AV also MIGHTY POWER; [*megalōsýnē*] (He. 1:3; 8:1; Jude 25); [*megaloprepḗs*] (2 Pet. 1:17); AV EXCELLENT; NEB SUBLIME. When one generation commends to another generation the mighty acts of Yahweh, they speak of His majesty (Ps. 145:4f.), which is associated with His greatness, power, glory, victory, and kingship over the heavens and the earth (1 Ch. 29:11f.). Creation bears witness to it (Ps. 104:1-4). His acts of redemption and judgment proclaim it (Ex. 15:1, 7, 11, 21). Although God's majesty is in the skies (Ps. 68:34) and on the earth (Isa. 35:2), the wicked cannot now perceive it (Isa. 26:10). But on the Day of Yahweh it will be something from which they will wish to hide (Isa. 2:10, 19, 21). For the upright, in contrast, God's majesty is the reason for wholehearted praise (Ps. 111:1-3).

Man himself is crowned with majesty (RSV "honor") by this One whose very name is majestic (Ps. 8:1, 5, 9). The king especially is the recipient of that divine gift (Ps. 21:5). But the glory given to the creature is not identical with that possessed by the Lord Himself; only if one were to clothe himself in the divine majesty would he be able to exercise divine power (Job 40:10-14).

In the NT God's majesty is closely associated with Jesus Christ. Christ's exorcising a demon from a child is viewed as an expression of it (Lk. 9:42f.). At the transfiguration the apostles heard the voice of the Father borne by the Majestic Glory while they were eyewitnesses of the glory of the Lord Jesus (2 Pet. 1:16-18). In He. 1:3; 8:1 "majesty" is a synonym for God Himself; it is at the right hand of the Majesty on high that Christ has seated Himself after having made purification for sin. G. WYPER

MAKAZ mā'kaz [Heb. *māqaṣ*—'cutting-off place, end'(?); Gk. *Machemas, Machmas, Magchas*]. A city under Bendeker in the second administrative district of Solomon (1 K. 4:9). Other cities in the district were Shaalbim, Beth-shemesh, and Elon-beth-hanan; hence this district was in the Shephelah on the western border of Dan (cf. Josh. 19:40-46). Since the LXX readings suggest a Hebrew original with *ḥ* instead of *q*, Makaz has tentatively been identified with Khirbet el-Mukheizin, about 6 km. (4 mi.) S of Ekron (*GAB*, Map 17). This site accords with the general location indicated by the other cities, but no positive identification has been made. W. S. L. S.

MAKE; MAKER. Some of the most common terms rendered by these words are Heb. *'āśâ, nāṯan, śîm śûm, šîṯ*, and Gk. *poiéō*. God is repeatedly acknowledged as the maker of heaven and earth (e.g., Gen. 14:19, 22). Since humans are made in the image of God, they can fashion the raw materials of creation into articles useful for their existence (1:26-28). Here lies the God-given potential — as well as justification — for the arts and crafts of human society. The potential can be used for good, as when the tabernacle was built with meticulous attention to precise specifications so that the finished product would reflect the glory of God and the proper approach to Him in worship (Ex. 25:40). It can also be used for evil, as in the making of idols (20:4).

The manifold nuances of "make" include: engage in some form of activity, e.g., war (1 Ch. 5:10); prepare something, e.g., a feast (Est. 1:3); write a book (Eccl. 12:12; Acts 1:1); publish a decree (Ezr. 5:13); voice a prayer (Lk. 5:33); win followers to a cause (Mt. 28:19, NEB); accord a certain status to a person (Acts 2:36); misrepresent someone (1 Jn. 1:10); pervert by misuse (Jn. 2:16); make claims about oneself that others consider false (5:18; 19:12).

Especially significant is the promise of Jesus to make certain prospective disciples "fishers of men" (Mk. 1:17). His example, teaching, and mighty works were needed to achieve the promised result.

The verb in "was made flesh" in Jn. 1:14, AV, expressing transition from one state or mode of existence to another, renders Gk. *gínomai*, which is usually translated "became" (RSV, NEB, etc.).

See also CREATION; CREATOR. E. F. H.

MAKEBATES māk'bāts (AV mg. 2 Tim. 3:3; Tit. 2:3). Archaic term for one who stirs up strife, translating Gk. *diáboloi* (cf. AV "false accusers"; RSV "slanderers"). *See* SLANDER.

MAKED mā'kəd [Gk. א *Maked* A *Makeb*]; AV also Maged (1 Macc. 5:36). A "strong and large" city in Gilead (1 Macc. 5:26, 36). Judas Maccabeus and his brother Jonathan "crossed the Jordan and went three days into the wilderness" (v. 24) to rescue Jews captured "by the Gentiles in Gilead" (v. 9) and "shut up" in five cities, including Maked (v. 26). Judas and his army captured those cities, slaughtering many (vv. 28-36).

Thutmose III in his roster of Canaanite towns lists *m-q-t* between Ashtaroth and Laish; see *LBHG*, rev., p. 160. *GAB* identifies Maked with Tell Miqdâd (p. 156), but this is open to question. W. S. L. S.

MAKER. *See* MAKE.

MAKHELOTH mak-hē'loth [Heb. *maqhēlōṯ*–'places of assembling'(?)]. One of Israelites' stopping-places in their journey from Sinai to Kadesh-barnea (Nu. 33:25). It was located between Haradah (v. 24) and Tahath (v. 26), but none of these sites has been positively identified. Because of the similarity of the terms Makheloth and Kehelathah (v. 22), some scholars have equated them and suggested a location at modern Kuntillet Jerâya (*GAB*, p. 156; *GP*, II, 214, gives the name as "*Kuntilet Qrayé*, also called *'Aǧrûd*"). However, this site breaks the sequence of the stations as given in vv. 16-37 and has no textual support. The LXX distinguishes *Makellath* (v. 22) and *Makēlōth* (v. 25). W. S. L. S.

MAKKEDAH mə-kē'də [Heb. *maqqēḏâ*; Gk. *Makēda*] (Josh. 10; 12:16; 15:41). A royal Canaanite enclave in the southern Shephelah that became part of the inheritance of Judah (15:41). Josh. 10 tells the story of Joshua's victory over five "Amorite" kings. During a battle the kings hid in "the cave" at Makkedah; Joshua closed them in with great stones while the Israelites routed their troops. Then the kings were brought out, put to death, hung on trees, and finally thrown back into the cave (vv. 10-29). 12:16 includes the king of Makkedah in the catalog of kings conquered by Joshua.

The site has not been identified with certainty. Aharoni was content to locate it "somewhere in the Lachish region" (*LBHG*, rev., p. 278 n. 73). Simons said, "None of the proposed identifications . . . is quite satisfactory" (*GTTOT*, § 318, p. 147; § 492, p. 273). Eusebius located it 8 Roman mi. (12 km., 7.3 mi.) E of Eleutheropolis (Beit Jibrîn). Some scholars have placed it N of Beit Jibrîn, possibly at Tell eṣ-Ṣâfî. W. S. L. S.

MAKNADEBAI mak-nad'ə-bī (Ezr. 10:40, NEB). *See* MACHNADEBAI.

MAKTESH, THE. *See* MORTAR, THE.

MALACHI mal'ə-kī [Heb. *mal'āḵî*–'my messenger, angel']. The title associated with the last of the twelve Minor Prophets.

I. Author
II. The Book
  A. Outline of the Message
  B. Composition of the Prophecy
  C. Theological Significance

I. Author.–Malachi is traditionally thought to have written the book of that name on the basis of the superscription in 1:1, but early textual variants cast some doubt on this position. The LXX, instead of giving a name, rendered "his messenger, angel" (*angéllou autoú*; but cf. Aq., Symm., Th., *malachion*, "of Malachi") as if the word in question was a common noun. The Targum of Jonathan ben Uzziel explicitly stated that Ezra the scribe was "my messenger" in Mal. 1:1. Jerome and Calvin, in the prefaces to their comms. on Malachi, also supported this view. Rashi and T.B. *Megillah* 15a recorded a similar view, but Rabbi Naḥman said that Malachi was really Mordecai (Est. 10:3). The Ezra tradition can hardly be trusted, for it seems to be based purely on a few similarities between the books (Mal. 2:11 and Ezr. 10:2). Later scholars objected to the construction of the prophet's name (most preferred *mal'āḵîāh*, "messenger of Yahweh") and credited the present superscription to an editor who arranged the three anonymous "burdens" in Zec. 9:1; 12:1; Mal. 1:1. "My messenger" was the name given to the final collection of oracles on the basis of its use in Mal. 3:1. G. Wallis believed that the messenger was an "interpreting angel" ("Wesen und Struktur der Botschaft Maleachis," in F. Maass, ed., *Das ferne und nahe Wort* [*BZAW*, 105, 1967], pp. 229-231).

In spite of the scarcity of evidence concerning the authorship of this prophecy, there are good reasons to believe that Malachi is the name of the author. The word *mal'āḵî* is comparable to other Hebrew names that end in *î*, such as Beeri, "my well" (Gen. 26:34; Hos. 1:1) or Ethni, "my gift" (1 Ch. 6:41), and it is placed where one would expect to find the name of the author. The similarities of Zec. 9:1; 12:1; Mal. 1:1 are superficial (Zec. 9:1; 12:1 do not function as superscriptions; cf. B. Childs, *Intro. to the OT as Scripture* [1979], pp. 491f.). Finally, the anonymity theory heavily depends on the nearly impossible editorial blunder of interpreting the messenger in Mal. 3:1 as the author of the book.

The book itself provides very little information about the prophet. Presumably he lived in or near Jerusalem and had an intimate knowledge of worship practices in the temple (1:6–2:9). Pseudo-Epiphanius recorded the view that he was a Levite from the tribe of Zebulun. His message demonstrates his concern for proper spiritual leadership (2:1-9) as well as popular morality (vv. 10-16; 3:5). He was traditional in his application of the Torah to life and forthright in his demands for holiness and performance of duty.

II. The Book.–Since the date of the book is not given, it must be determined from internal evidence. A summary of the prophet's message will provide a general introduction to the book's setting and to discussions of its date, structure, unity, and theological significance.

A. Outline of the Message. A general analysis of the contents of the book leads to a division of these oracles into six units (see II.B.3 below). The six oracles concentrate on present problems within the community caused by a misunderstanding of the nature and character of God. The book begins with a superscription (1:1) and ends with a conclusion (4:4-6 [MT 3:22-24]); both are outside the dialogue pattern of the rest of the book.

1. "I have loved you" (1:2-5). Malachi countered the Israelites' skepticism by reminding them of God's love for them. Although Deuteronomy emphasizes this teaching (4:37; 7:7f.; 10:15), the prophet chose to contrast God's election of Jacob with His rejection of Esau because God had verified his anger toward Edom in recent historical events. God's anger that caused Edom's destruction would prevent all attempts to rebuild that nation (Mal. 1:3f.). Earlier prophets had told that God's hatred for Edom was due to the Edomites' sins against Israel (Obadiah; Ezk. 35:1-15). God's anger is proof of His greatness (Mal. 1:5) and love for His people.

2. "Where is my honor?" (1:6–2:9). Such love and great-

ness requires a response of fear and love (Dt. 5:10; 6:5; 11:1, 13; 30:15, 19f.), but the priests despised God and did not even give Him the honor due a father or master (Mal. 1:6f.). They could not expect God to be gracious to them if they continued to offer sick and lame sacrifices (vv. 8f.). It would have been better not to sacrifice at all (v. 10) than to go through the motions with an unworthy offering (vv. 12f.). God is the King feared among the nations (vv. 11, 14), but where was His honor in Israel? These accusations are followed by a threat: God would curse the priests if they did not glorify Him (2:1-3). The warning was given so that the priests would honor and fear God (v. 5), be true messengers of His law (vv. 6-9), and continue His covenant with Levi (vv. 4f.; cf. Ex. 33:26-29; Nu. 25:11-13; Jer. 33:12).

3. "Why are we faithless to one another?" (2:10-16). Faithlessness was contrary to the natural and spiritual unity (by creation and the covenant) between God and Israel and among the individual Israelites. Marriages with heathen women (vv. 11f.) and divorce (vv. 13-15) were faithless acts that destroyed this unity; God could not accept the offerings from disunified homes.

4. "Where is the God of justice?" (2:17–3:5). In spite of God's love and the people's unfaithfulness, some accused Him of injustice because He did not judge the wicked (2:17). God assured the nation that He would judge the wicked priests (3:3f.) as well as those who mistreated others (v. 5). These people would learn to fear and please God when the "coming one" appeared to purify the nation (vv. 1-4) and establish justice.

5. "Return to me and I will return to you" (3:6-12). The famine (3:11) that had already struck the nation illustrated the justice of God. Because He is consistent in His judgment, He could not change (3:6) until the nation turned to Him and tithed (Nu. 18:21; Lev. 27:30) what He had given to them (Mal. 3:8f.). When they turned to God, He would turn to them, and all would see how His blessings filled the land to overflowing (vv. 10b-12).

6. "I will distinguish between the righteous and the wicked" (3:13–4:3 [MT 3:13-21]). The prosperity of the wicked, who do not serve God, caused some to wonder about the value of serving God (3:13-15), but those who truly feared God encouraged one another with His promises (v. 16). God will remember their righteousness and treat them as persons very special and dearly loved (vv. 17f.). On the day of judgment, He will distinguish the wicked from the righteous (v. 18); the wicked will be destroyed, but the righteous ones who fear God will enjoy His blessings forever (4:1-3).

The final three verses (4:4-6 [MT 3:22-24]) summarize the book and present two challenges. The first encourages the people to follow God's word through Moses (4:4), and the second reminds them to put their lives in order before the appearing of Elijah on the great day of the Lord.

B. Composition of the Prophecy. 1. Date. The references to sacrifice (1:7-14) and the doors (v. 10) point to a period of Jewish history when the temple was standing. The reference to the governor (Heb. *peḥâ*) in v. 8 (Hag. 1:1; Neh. 5:14; 12:26) indicates that Malachi lived in the Persian period after the completion of the second temple in 515 B.C. (Ezr. 6:14f.). The laxity with which the priest fulfilled his duties (Mal. 1:8-13) and the failure of the people to pay their tithe (3:8-10) suggest a date when religious fervor had begun to wane, well after 515 B.C. Ezra and Nehemiah also faced the problems of tithing (Neh. 10:32-39 [MT 33-40]; 13:10-13), mixed marriages (Mal. 2:10f.; Ezr. 9:1f.; Neh. 13:1-3, 23-27), and oppression of the poor (Mal. 3:5; Neh. 5:1-5). The exact relationship of Ezra and Nehemiah to Malachi is not given in the text. Scholars argue three main possibilities.

a. Before Ezra. The majority of scholars, including Marti, von Bulmerincq, Dentan, and Baldwin, have placed Malachi *ca.* 460 B.C., before the time of Ezra. The two main supports for this view are that Malachi must be before Ezra and Nehemiah, since Malachi never mentioned their work in his book, and that Malachi's tithing (Dt. 14:22-29) and offering laws (Dt. 15:1; 17:1) and use of Levites and priests as synonyms (Dt. 21:5) indicate that he relied on Deuteronomy and preceded the "priestly writings." Von Bulmerincq supposed that Malachi was Ezra's assistant, but others attributed the success of Ezra's preaching to the earlier work of Malachi. Mason questioned both of these main criteria and dated the book on the basis of style, tone, and eschatology to an earlier period just after Haggai.

b. Around the Time of Nehemiah's Second Visit to Jerusalem. Other scholars, e.g., Perowne and J. M. P. Smith, have placed Malachi between, during, or shortly after Nehemiah's visit to Jerusalem *ca.* 432 B.C. (Neh. 13). The backbone of proof is the existence of identical abuses in Nehemiah and Malachi (tithes in Mal. 3:8-10 and Neh. 13:10-14; mixed marriages in Mal. 2:11 and Neh. 13:23; social ills in Mal. 3:5 and Neh. 5:1-13). Additional support for this view includes, first, Malachi's and Nehemiah's presupposition that the law was in force (thus after Ezra), and, second, the need for temple funds, which does not fit the period of Ezra when the cost of the temple was met from the royal treasury (Ezr. 6:15-17, 20-24).

c. Long after Nehemiah. O. Kaiser (*Intro. to the OT* [Eng. tr. 1975], pp. 285f.) dated Malachi *ca.* 400-350 B.C., while O. Holtzmann (*Archiv für Religionswissenschaft*, 39 [1931], 1-21) put the book in the first half of the 3rd cent. because he identified the "company of the Hasideans" in 1 Macc. 2:42 with the covenant of those who feared God in Mal. 3:6.

d. Conclusions. A date around the second visit of Nehemiah is most likely. The absence of any reference to Malachi in Ezra or Nehemiah or to Ezra and Nehemiah in Malachi is a double-edged sword that in the end cannot determine the order of the books. An early date for Malachi cannot be based on his use of Deuteronomy and disuse of a later "priestly writing," for Malachi's tithe formula is closer to the "priestly" guideline in Nu. 18:21 than to Dt. 14:22-29. The relationship of the priests and Levites in Mal. 2:4-9 is also an inadequate criterion for dating the book, for these groups are not synonymous in the official list of those returning from exile *ca.* 536 B.C. (Ezr. 2:36-42) or in other postexilic writings (Ezr. 6:18; 8:15; 10:18, 23; Neh. 11:10, 15). One apparently cannot date Malachi on the basis of its pentateuchal sources. A date *ca.* 420 B.C. is preferable, since it is far enough away from Nehemiah's reform to explain the failure of the two to mention one another. A considerable amount of time between Malachi and Nehemiah allows one to take Nehemiah's reform seriously and provides time for its effects to have worn thin. There is also a distinction between the marriage problems in Neh. 13 and Mal. 2:10-16. "I hate divorce" (Mal. 2:16) addresses a later problem that developed among Israelite couples because Ezra's and Nehemiah's permission to divorce foreign women was later extended to all marriages. The problem of the tithe in Malachi is also later than Nehemiah. In Neh. 13:4-9 Tobiah prevented the bringing of the tithes, thus causing the Levites to forsake the temple and go to work (vv. 10-14), but in Malachi the Levites were back teaching and sacrificing in the temple (1:6–2:9), and famine was the reason that the "full tithe" was not brought (2:11).

2. Unity. Most scholars have maintained the essential unity of Malachi although questioning a few short verses. Elliger rejected Mal. 1:11-14, Marti questioned 2:7, and Mason believed that 3:1b-4 are secondary, but the major

problems are 2:11f. and 4:4-6 (MT 3:22-24). Mal. 2:11f. is frequently assigned to a later editorial stage because it introduces the extraneous topic of foreign wives into the discussion of divorce in vv. 10-16, uses third-person verbs instead of first person (cf. vv. 10, 13), and makes a distinction between Israel and Judah. These peculiarities, however, indicate only the complexity of the socio-religious issue with which the author dealt and the difficulty of the Hebrew text (esp. v. 12), not the secondary nature of the verses.

Malachi 4:4-6 (MT 3:22-24) is clearly outside the regular dialogue pattern of the rest of the book. While some have regarded these verses as completely foreign to Malachi, others have seen them as a fitting conclusion to the prophetic canon as a whole (cf. Rudolph, pp. 291-93). The former view (cf. J. M. P. Smith, pp. 81-85) is that v. 4 is a later addition by a strict legalist who used terminology from Deuteronomy ("remember," "servant," "statutes," "all Israel," "law of Moses," and "Horeb") that is foreign to the rest of Malachi. Childs (*Intro. to the OT as Scripture*, p. 495) argued against both views and integrated vv. 4-6 into the context of Malachi itself. Verses 5f. develop 3:1 by explaining the role of the future Elijah by analogy to the first Elijah.

3. Structure and Style. The dialogue style of Malachi determines the structure within the paragraphs. Each paragraph is structured around (a) an initial statement; (b) an objection to the statement; and (c) a detailed substantiation of the statement that ends with a promise, threat, or encouragement. This framework enables one to identify six main paragraphs within the book. The overall structure of the book is difficult to perceive. Sellin transposed 3:6-12 and 2:10-16 after 1:2-5 to create a more natural progression: oracles of repentance to the people, to the priests, and to the doubters. Wallis attempted to arrange the material on the basis of the audience and nature of the message: rebuke, threat, salvation message. The parallel development of the justice of God in 2:17–3:5; 3:13-21 and the connection of the intervening paragraph (3:6-13) with the earlier section on worship make the material look unorganized. The difficulty of arranging the book on the basis of the audience, topic, or type of message suggests that the book is arranged around the theological statements at the beginning of each section. The flow of the message is: "I love you [1:2] but you do not honor me [v. 6] and are not faithful to me [2:10]; therefore I will show my justice [v. 17]. If you return to me, I will return to you and bless you [3:7], for I will distinguish between the wicked and the righteous who serve me [vv. 14, 18]."

The style of the book resembles "prophetic disputations" (cf. C. Westermann, *Basic Forms of Prophetic Speech* [Eng. tr. 1967], p. 201) and the dialogue style of Haggai. These short and direct challenges put in the mouth of the people are rhetorical literary devices used to focus attention on underlying theological issues that motivate behavior. The book is prose with a limited use of figurative language.

C. Theological Significance. If the preceding analysis is correct, Malachi was not a shallow legalistic scribe with no prophetic insight (cf. Neil, *IDB*, III, p. 231). The book lacks any reference to widespread discouragement among the people because the glories of the messianic age had not come (cf. Dentan, p. 1118; J. M. P. Smith, p. 11). Two very common problems faced the community: economic depression (3:10f.), and a lack of sound theological teaching (2:6-8). Since the people had no theological foundation, the economic conditions led to a misunderstanding of God's character and thus to a perversion of morality and worship. Malachi provided the instructions they needed by emphasizing the lordship of God. God is like a father and master (1:6), a great king (v. 16) and creator (2:10, 15); He loves those who fear and serve Him and judges the wicked (3:17). Because the priests failed to instruct the nation, the basis for morality, worship, and service did not exist, and many people did not fear or honor God. In Malachi God assured the people of His blessings on those who returned to Him, reminded them of His love, and promised that the "coming one," who would be preceded by Elijah, would refine the nation through judgment.

Among the many important theological themes within the book, the universalism of Mal. 1:11 is one of the most problematic. Elliger denied the authenticity of the verse, but many others (cf., e.g., Torrey, Marti, Dentan, and Mason) held that Malachi was teaching that God accepts the universal worship of other gods as true worship of Himself. In light of the condemnation of the heathen gods in the rest of the OT and Malachi's teaching concerning God's hatred of Edom (1:2-5) and His rejection of mixed marriages (2:11f.), this view must be rejected. The Targum, Rashi, von Orelli, and J. M. P. Smith believed that the verse refers only to the worship of Jews still in exile or possibly Jewish proselytes. A few scholars have thought that the prophet was just making a nontheological exaggeration to prove a point. But the particularism of "my name" and "pure offering" can only be fully integrated into the universalism of "every place, from the rising of the sun to the setting of it" if the verse has a future reference. This traditional interpretation does not deny the present "greatness of God's name beyond the borders of Israel" (1:5, 14) through His acts of grace and judgment, but neither does it mean that all nations now worship Him in purity and truth (v. 11).

Of particular significance to the NT is the prophecy of the messenger who "prepares the way" before the coming of the Lord in 3:1. This phraseology is picked up from Isa. 40:3 and applied to a new Elijah in Mal. 4:5 (MT 3:23). In the NT an angel connected this idea with the birth of a child to Zechariah and Elizabeth (Lk. 1:17), and later Jesus identified John the Baptist as this Elijah (Mt. 11:10, 14; Mk. 9:11-13).

G. V. SMITH

MALACHY mal'ə-kī (2 Esd. 1:40, AV). Another form of the name of the prophet MALACHI.

MALCAM mal'kam [Heb. *malkām*].

1. AV, NEB, MALCHAM. Head of a Benjaminite family; son of Shaharaim and Hodesh (1 Ch. 8:9).

2. (RV Jer. 49:1, 3; Zeph. 1:5; cf. RSV, NEB, "Milcom";

AV "their king," "Malcham"). The national deity of Ammon, usually called MOLECH or Milcom.

MALCHIAH mal-kī'ə. Alternate form of MALCHIJAH.

MALCHIEL mal'kē-əl [Heb. *malkî'ēl*–'God is king']. Descendant of Asher (Gen. 46:17; Nu. 26:45; 1 Ch. 7:31).

MALCHIELITES mal'ki-əl-īts [Heb. *malkî'ēlî*]. Descendants of Malchiel (Nu. 26:45).

MALCHIJAH mal-kī'jə; **MALCHIAH** mal-kī'ə; **MELCHIAS** mel-kī'əs [Heb. *malkîyâ, malkîyāhû* (Jer. 38:6)–'Yahweh is king'; Gk. Apoc. *Melchias*]; AV also MELCHIAH; NEB omits in Jer. 38:6.

1. A Gershomite Levite; father of Baaseiah and ancestor of Asaph, one of the leading temple musicians in David's time (1 Ch. 6:40 [MT 25]).

2. Son of Parosh; a layman who divorced his foreign wife (Ezr. 10:25a; 1 Esd. 9:26).

3. (Ezr. 10:25b, AV, NEB). *See* HASHABIAH **12.** The RSV follows the LXX (*Asabia*; cf. also Asibias in par. 1 Esd. 9:26), while the AV and NEB follow the MT.

4. Son of Harim; a layman who divorced his foreign wife (Ezr. 10:31; cf. 1 Esd. 9:32, where he is called a son of Annan); probably the same man who helped to rebuild the wall of Jerusalem under Nehemiah (Neh. 3:11).

5. A descendant of Aaron and head of the Levitical family assigned by David to the fifth division of temple service (1 Ch. 24:9). Adaiah, a descendant of this family, was one of the first priests to settle in Jerusalem after the Exile (1 Ch. 9:12; Neh. 11:12).

6. Son of Rechab; one who helped to rebuild the Dung Gate in the time of Nehemiah (Neh. 3:14).

7. A goldsmith who helped to rebuild the wall of Jerusalem (Neh. 3:31).

8. One of those who stood at Ezra's left hand when he read the law to the people (Neh. 8:4; cf. 1 Esd. 9:44); possibly the same as **2, 4, 6,** or **7** above.

9. A priest who signed the covenant with Nehemiah (Neh. 10:3 [MT 4]).

10. A priest who sang in the choir at the dedication of the rebuilt wall of Jerusalem (Neh. 12:42); possibly the same as **9.**

11. Son of King Zedekiah and owner of the cistern in which Jeremiah was imprisoned (Jer. 38:6); possibly the same as **12.**

12. The father of Pashhur, an officer of King Zedekiah and persecutor of Jeremiah (Jer. 21:1; 38:1); possibly the same as **11,** but to be distinguished from **5.** N. J. O.

MALCHIRAM mal-kī'rəm [Heb. *malkîrām*–'my king is uplifted']. Son of Jeconiah (Jehoiachin), descendant of David (1 Ch. 3:18).

MALCHISHUA mal-kə-shōō'ə [Heb. *malkîšû(a)'*–'my king saves']; AV also MELCHISHUA. One of the sons of Saul (1 S. 14:49; 31:2; 1 Ch. 8:33; 9:39). He was slain with his father and brother by the Philistines in the battle on Mt. Gilboa (1 Ch. 10:2; 1 S. 31:2).

MALCHUS mal'kəs [Gk. *Malchos*]. The servant of the high priest, whose right ear was cut off by Peter when Jesus was arrested (Jn. 18:10). The Gospel of John alone names the assailant and the victim (cf. Mk. 14:47; Mt. 26:51; Lk. 22:50). All four Gospels report that the victim was a servant or slave (*doúlos*) of the high priest (probably Caiaphas; cf. Jn. 18:13) and therefore not one of the officers or attendants (*hypērétai*, Jn. 18:3, 18). Both Luke and John report that it was the right ear that was wounded. Only Luke records that Jesus healed the ear (Lk. 22:51). Only John's Gospel reports that one of Peter's challengers when he denied his Lord was another of the high priest's servants who had seen him in the garden and who was a relative of Malchus (Jn. 18:26). These details in John perhaps derive from the author's personal acquaintance with the high priest (Jn. 18:15).

The name Malchus is the Grecized form derived from the Semitic root for king (*mlk*). It also appears in Greek as *Malichos* and *Malchaios*. The name was particularly common among the Nabatean Arabs (two Nabatean kings bore the name, Malchus I, 50-28 B.C., and Malchus II, A.D. 40-71). It is also prominent among the Palmyrene inscriptions. It has been suggested from this that Malchus was an Arab slave (cf. Josephus *Ant.* xiii.5.1 [131]; 1 Macc. 11:39).

Why was Malchus struck? Was it an act of defense or defiance? The high priest's servants were noted for their high-handed violence (cf. Tosefta *Menahoth* xiii.21; Josephus *Ant.* xx.8.8, 9.2 [181, 206]). Peter may have lashed out to defend Jesus in the spirit expressed in Jn. 13:37. On the other hand, it is quite possible that this was a symbolic act of defiance deliberately directed against the servant of the high priest who was present as his representative. An insult could be directed against the master by contemptuously striking his surrogate (cf. 2 S. 10:4; Mt. 21:35). Wounding the ear was a particularly suggestive form of violence against one associated with the high priest (see Daube; cf. Josephus *Ant.* xiv.13.10 [366]; Tosefta *Parah* iii.8). The particular manner in which Malchus was wounded would not have disqualified the high priest, but it would have been taken as a patently contemptuous act. If this were an act of defiance, the right ear may have been the one struck because the right organ was considered the most valuable according to the indemnity laws of the time. It need not mean that the servant dodged the blow or was struck from behind, nor that Peter was left-handed.

MALE [Heb. *zāḵār*]; AV also MAN CHILD (Gen. 17:10, 12, 14; etc.), MANKIND (Lev. 18:22; 20:13); NEB also HE-GOAT, etc.; [*'îš*] (Gen. 7:2); [*maštîn bᵉqîr*] (1 S. 25:22, 34; 1 K. 14:10; 16:11; 21:21; 2 K. 9:8); AV "(one) that pisseth against the wall"; NEB "mother's son"; [Gk. *ársēn*] (Mt. 19:4; Mk. 10:6; Lk. 2:23; Gal. 3:28); **MALE CHILD** [Heb. *yeleḏ*] (Ex. 1:17f.); AV MAN CHILD; NEB BOY; [Gk. *país*] (Mt. 2:16); AV, NEB, CHILD; [*ársēn*] (Rev. 12:5, 13); AV MAN CHILD; **MALE SLAVE** [Heb. *'eḇeḏ*] (Gen. 20:14; Ex. 21:7, 27, 32; Lev. 25:44; etc.); AV SERVANT, MAN-SERVANT, BONDMAN; NEB also SLAVE; **MALE MEMBER** [*šopᵉḵâ*] (Dt. 23:1 [MT 2]); AV PRIVY MEMBER; NEB TESTICLES; **MALE LAMB** [*keḇeś*] (Lev. 14:10, 12, 21; 23:12, 19; Nu. 6:12; etc.); AV LAMB, HE LAMB; NEB EWE, RAM, SHEEP; **MALE GOAT** [*śā'îr*]; AV KID; NEB HE-GOAT; [*'attûḏ*]; AV, NEB, HE-GOAT; **MALE (CULT) PROSTITUTE** [*qāḏēš*] (1 K. 14:24; 15:12; 22:46); AV SODOMITE.

Hebrew *zāḵār* (Akk. *zikru, zikaru*), though common in the OT, is of unknown etymology. It designates the male of the species, as in Gen. 6:19; Lev. 3:1; Nu. 1:2, in contrast to the female (*nᵉqēḇâ*). Heb. *'îš*, more commonly rendered "man," describes a man as the counterpart of a woman (Gen. 2:24; Lev. 15:19; etc.), or a male animal as opposed to a female animal (Gen. 7:2). The two terms may be used indiscriminately of animals and men, e.g., "Take with you seven pairs of all clean animals, the male

['îš] and his mate . . . and seven pairs of the birds of the air also, male [zāḵār] and female" (Gen. 7:2f.; but note that Sam. Pent. and the versions presuppose *zāḵār* instead of *'îš*; see *BHS*). The Hebrew phrase *maštîn bᵉqîr*, translated literally by the AV, expresses maleness by a circumlocution. It is apparently from *šîn*, "urinate" (cf. Ugar. *tyn*); *CHAL*, p. 367, suggests calling the anomalous form a "hiftil," although BDB, p. 1010, prefers to designate it a secondary verb, *štn* (<*šyn*), in the hiphil. This expression is always used of those male members of a family who are to be executed. Thus the AV's slightly vulgar translation may accurately convey the nuance of this Hebrew expression.

Hebrew parents generally preferred male children to female, as shown by the desire for male progeny (1 S. 1:8-18) and the ransom paid to Yahweh for firstborn sons (Ex. 13:12; Lk. 2:23). It was the Christian faith that proclaimed the equality of the sexes, as it does of the races and condition of humans. The NT speaks clearly on the matter, e.g., "There is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female; for you are all one in Christ Jesus" (Gal. 3:28).

One of the prevalent practices among ancient peoples was the sexual relationship of male with male. Heb. *qāḏēš* refers to the male devotee of lascivious idolatry (cf. Dt. 23:17; 1 K. 14:24; 15:12; 22:46; 2 K. 23:7; Job 36:14 [RSV mg.]). The Greek word is a compound noun, *arsenokoítes*, which means literally "he who lies with man." Scripture regards this unnatural vice as an abomination and frequently warns God's people against it (1 Cor. 6:9).

See also SERVANT; SLAVE.

MALEFACTOR mal'ə-fak-tər (Jn. 18:30, AV). *See* EVIL-DOING; EVILDOER.

MALELEEL mal'ə-lēl (Lk. 3:37, AV). *See* MAHALALEL 1.

MALICE [Heb. *raʿ* (Ps. 41:5 [MT 6]; 73:8, *šᵉʾāṯ* (Ezk. 25:6, 15); Gk. *ponēria* (Mt. 22:11), *kakía* (Rom. 1:29; 1 Cor. 5:8; Eph. 4:31; Col. 3:8; Tit. 3:3; 1 Pet. 2:1)]; AV also EVIL, WICKEDLY, WICKEDNESS, DESPITE(FUL); NEB also "desperate" (Ps. 41:5), SCORN, MALICIOUS, CORRUPTION, BAD FEELING; **MALICIOUS** [Heb. *ḥāmās*] (Ex. 23:1; Dt. 19:16; Ps. 35:11); AV UNRIGHTEOUS, FALSE; **MALICIOUSLY** [Heb. *mᵉzimmâ* (Ps. 139:20)]; AV WICKEDLY; NEB DELIBERATE EVIL; [Aram. *qᵉraṣ* (Dnl. 3:8)]; AV WICKEDLY, "accused"; NEB VICIOUS, "brought a charge"; **MALIGNANT** [hiphil fem. part. of Heb. *nāʾar* (Lev. 13:51f.; 14:44)]; AV FRETTING; NEB ROTTING, CORROSIVE; **MALIGNITY** [Gk. *kakoétheia*] (Rom. 1:29); NEB MALEVOLENCE. The RSV supplies "malign" in Mt. 10:25, where the Greek verb of the previous clause (*epikaléō*) is understood.

The RSV translates five OT terms as "malice," "malicious," or "maliciously." *Raʿ* appears over five hundred times with the usual translation of "evil"; only twice is the word rendered "malice." Heb. *šᵉʾāṯ*, "contempt," describes the vengeful attitude of Israel's enemies toward it. *Ḥāmās* carries the sense of "violent wrong," so that the AV "unrighteous/false witness" (*ʿēḏ-ḥāmās*) is weak; the RSV and NEB rendering, "malicious," more accurately shows that the witnesses are guilty of hateful intent. *Mᵉzimmâ*, translated 'wicked deeds" in Jer. 11:15, is rendered "maliciously" in Ps. 139:20 in reference to the disposition of those who defy God. The RSV "maliciously accused" in Dnl. 3:8 translates the Aramaic idiom *ʾᵃḵal qarṣîn*, lit. "eat the pieces of," thus "gnaw at" or "denounce."

The RSV uses "malignant" only to describe leprosy; most commentators point out that "persistent" (cf. LXX) is a better translation of *mamʾereṯ*, whose meaning is uncertain (cf. G. Wenham, *Book of Leviticus* [*NICOT*, 1979], p. 202; N. Snaith, *Leviticus and Numbers* [*NCBC*, repr. 1977], p. 72). *See also* LEPER, LEPROSY.

In the NT two Greek words are rendered "malice" and one "malignity." In Hellenistic thought *kakós* represented the principle of evil, a concept that lost its significance for NT writers. *Kakía*, sometimes designating a special moral depravity, is the quality, or working out of the quality, of *kakós* (*TDNT*, III, 482). It is usually rendered "malice" and denotes a particular evil disposition of the person unreconciled to God. Like *kakía*, *ponērós* is a LXX translation of Heb. *raʿ*; in the NT it occurs over seventy times and is usually translated "evil." *Kakoétheia* occurs in the NT only at Rom. 1:29 in the list of vices, where it denotes "conscious and intentional wickedness" (*TDNT*, III, 485).

See *TDNT*, III, *s.v.* κακός (Grundmann).

D. J. KELLY

MALLET [Heb. *halmûṯ*] (Jgs. 5:26); AV, NEB, HAMMER. A workman's tool, normally used to drive tent pegs, used by Jael to kill the Canaanite commander Sisera (cf. 4:21). *See also* HAMMER.

MALLOS mal'əs (2 Macc. 4:30, AV). *See* MALLUS.

MALLOTHI mal'ə-thī [Heb. *malloṯî*]. Son of Heman, head of the nineteenth division of temple musicians (1 Ch. 25:4, 26). *See also* JOSHBEKASHAH.

MALLOW [Heb. *mallû(a)h*; Gk. *halimón*] (Job 30:4); AV MALLOWS; NEB SALTWORT; in Job 24:24 the RSV ("mallow") and NEB ("mallow-flower") follow the LXX (Gk. *molóchē*) rather than the MT (Heb. *kōl*). Because the Hebrew root implies saltiness, botanists have assumed that species of the saltwort plant (*Atriplex*) are indicated. Gk. *halimón* is the sea orach (*A. halimus* L.), a shrub related to the spinach. Any one of the twenty-one kinds of saltwort in Palestine, however, would suit the biblical requirements of being short-lived and edible in times of privation.

Some authorities think the reference is to some kind of "mallow," an herb of the genus *Malva* that starving people could eat. The marsh mallow (*M. sylvestris* L.) and dwarf mallow (*M. rotundifolia* L.) grow wild in Palestine, but how often they were used as food in antiquity is uncertain.

R. K. H.

MALLUCH mal'ək [Heb. *malluḵ*].

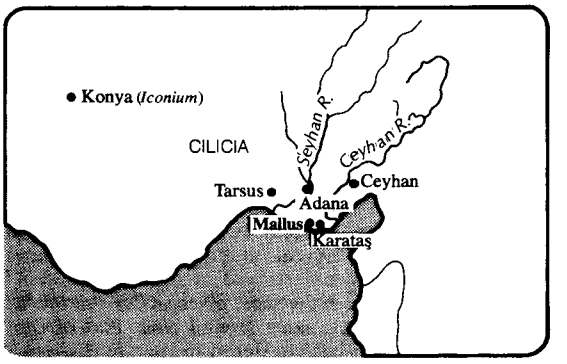
1. A Levite of the Merari branch, ancestor of Ethan the temple musician (1 Ch. 6:44 [MT 29]).

2. [Gk. Apoc. *Mamouchos*]; AV, NEB, MAMUCHUS. Son of Bani; a layman who divorced his foreign wife (Ezr. 10:29; 1 Esd. 9:30).

3. Son of Harim; a layman who divorced his foreign wife (Ezr. 10:32).

4. A priest who signed the covenant with Nehemiah (Neh. 10:4 [MT 5]).

5. A "chief of the people" who signed the covenant with Nehemiah (Neh. 10:27 [MT 28]); possibly the same as **2** or **3** above.



6. A priest who returned from the Exile with Zerubbabel (Neh. 12:2); probably the same as "Malluchi" (NEB Malluch) in v. 14; possibly the same as **4** above.

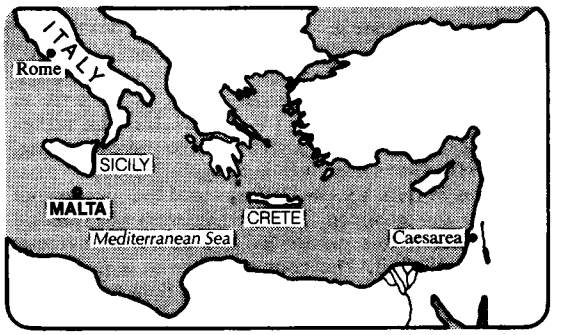
N. J. O.

MALLUCHI mal'oo-kī [Heb. *mallûḵî*; Gk. *Malouch*]; AV MELICU; NEB MALLUCH. The head of a family of priests in the time of Joiakim (Neh. 12:14); probably the same as MALLUCH **6.**

MALLUS mal'əs [Gk. *Mallos*]; AV MALLOS. A city in Cilicia, Asia Minor, inhabited by the *Mallōtai* (2 Macc. 4:30). The RSV translates "the people of . . . Mallus." Its inhabitants and those of nearby Tarsus revolted because Antiochus IV Epiphanes had given the cities to his concubine Antiochis. W. Ramsay (*Cities of St. Paul* [1907], pp. 161f.) said that Persian kings had begun this practice of giving the taxes from a city to favorites.

According to Strabo (*Geog.* xv.16), Mallus, located on a height above the Pyramus (Ceyhan) River, was founded by Amphilochus and Mopsus (after the Trojan War) and was the birthplace of Crates the grammarian. Modern discoveries indicate that the area was settled at least as early as the time of the Hittites.

The modern highway from Adana to Osmaniyeh crosses the Ceyhan at the village of Ceyhan. The route followed by Alexander the Great went from Konya (Iconium), through the Taurus range by the Cilician Gates, and then through Tarsus and Mallus to Issus (*CAH*, VI [1953], Map 9). Adana (Seyhan) — the most important modern city in the area — is 36 km. (22 mi.) from Tarsus and 48 km. (29 mi.) from Ceyhan. The region S of this route is today largely an alluvial plain formed by the deposits of the Seyhan (Sarus) and Ceyhan (Pyramus) rivers. The only road goes from Adana to the seaport of Karataş (49 km., 30 mi.). The site of Mallus is a short distance W of Karataş, where inscriptions of Antiocheia and Mallus were found. Antiocheia (one of many cities of the same name) was possibly Magarsus, which may have been the port of Mallus. Doubtless the silting-up of the Cilician plain and the navigability of the Sarus to Tarsus led to the decreasing importance of Mallus. The remaining sixteen arches of a Roman bridge across the Seyhan at Adana indicate that the route had shifted by Roman times.



W. S. L. S.

MALOBATHRON mal-ə-bath'rən [Heb. *hārê ḇāṯer* (pausal form of *beṯer*); Gk. *órē koilōmátōn*] (Cant. 2:17, RV mg.); AV "mountains of Bether"; RSV "rugged mountains"; NEB "hills where cinnamon grows." Cant. 2:17 is followed closely by Cant. 8:14, except that the last phrase reads *hārê ḇᵉśāmîm* (RSV "mountains of spices"; NEB "spice-bearing mountains") and clearly alludes to rugged elevations.

The spice malobathron, derived from the *Cassia cinnamomum*, is not native to Palestine, being thought to have been imported from Ceylon, and thus it probably did not given its name to a mountain or a range in Israelite territory. The spice could, however, have been associated with BETHER, a site in the uplands of Judah near Jerusalem that perhaps served as a staging point for spice caravans from the east in the Solomonic period. It thus appears preferable to retain Bether as a proper name in Cant. 2:17 and "mountains of spices" as a general poetic description in 8:14.

R. K. H.

MALTA mal'tə [Gk. *Melitē* (Acts 28:1)]; AV MELITA. The island where Paul was shipwrecked. Though some have identified Malta with Meleda on the east coast of the Adriatic Sea, the African Melita (Malta) is most likely the correct identification. The Romans called the island and principal town Melita.

Malta is a rocky islet 93 km. (58 mi.) S of Sicily, 240 km. (149 mi.) S of the Italian mainland, and 290 km. (180 mi.) N of Cape Bon in Tunisia. A little over 27 km. (17 mi.) long, 14 km. (9 mi.) wide, and with a shoreline of 137 km. (85 mi.), it is the chief island of the Maltese group — which includes Gozo and Comino islands.

Though Malta lacks significant natural resources, it has often had strategic importance as a base from which to control the Mediterranean narrows. Its excellent harbor can accommodate a considerable fleet.

Phoenicians occupied Malta in Paul's day. Luke's calling the people *bárbaroi* (not Greco-Roman; Acts 28:2) agrees with the testimony of Diodorus (v. 12) that they were Phoenicians, neither hellenized nor romanized. The date of the Phoenician arrival is uncertain, but Carthage dominated Malta after the 6th cent. B.C. and Rome captured the Maltese islands from Carthage in 218 B.C.

On his voyage to Rome, Paul was shipwrecked on the island (Acts 27:43) and stayed there three months until favorable sailing weather (28:11). The traditional site of Paul's shipwreck is 13 km. (8 mi.) NW of the present capital of Valletta at a place now called St. Paul's Bay. The location is reasonably certain. W. Ramsay (*SPT*) and J. Smith (*Voyage and Shipwreck of St. Paul* [1880]) have exhaustively treated the topographical question.

Two points about the incident of Paul and the snake (Acts 28:3-6) need mention. First, as F. F. Bruce (comm. on Acts [*NICNT*, 1954], pp. 521f.) and others have pointed out, there are now no snakes on Maltâ, but there may have been in Paul's day. Second, in the natives' initial reaction to the incident, "Though he has escaped from the sea, justice [Gk. *díkē*] has not allowed him to live," Gk. *díkē* is probably Luke's hellenizing of a Punic deity (see E. Haenchen, comm on Acts [Eng. tr. 1971], p. 713 n. 5). Thus Bauer, rev., p. 198, defined *díkē* here as "*Justice* personified as a goddess" (cf. NEB "divine justice"; NASB, NIV, Justice).

H. F. VOS

MAMAIAS mə-mā'əs (1 Esd. 8:44, AV). *See* SHEMAIAH **19.**

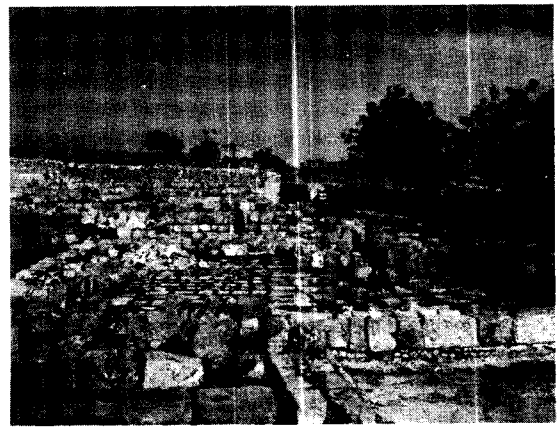
MAMDAI mam'dī [Gk. B *Mamdai*, A *Mandai*]; AV MAB-DAI; NEB MANDAE. An Israelite who divorced his foreign wife at Ezra's order (1 Esd. 9:34). The parallel in Ezr. 10:35 is BENAIAH 11.

MAMMON mam'ən [Gk. *mamōnás*]; NEB also MONEY (Mt. 6:24); WEALTH (Lk. 16:9, 11). The Greek transliteration of the common Aramaic term *māmônā'* (the emphatic state of the noun *māmôn*), meaning wealth of any kind.

The etymology of the term is disputed. One possibility is that it derives from *'mn* ("trust") to refer to that in which one trusts because it appears to provide security. The meaning, however, is clear; it refers to wealth, property, anything of value. The word appears frequently in the Targums and rabbinic literature. It also occurs in Sirach (e.g., 31:8), 1 Enoch (e.g., 63:10), and the Dead Sea Scrolls. Although the word could be applied to something gained dishonestly, it had no bad connotation in Jewish usage (cf. *TDNT*, IV, 389). It referred simply to property in general (cf. Mish. *Sanhedrin* i.1; *Aboth* ii.12). This makes Jesus' statements about mammon all the more arresting, because He always used it in a derogatory sense.

In Mt. 6:24 (par. Lk. 16:13) Jesus said that one cannot serve God and mammon. The Aramaic term was retained here because it was personified and stood in antithetic parallelism to God. The context refers to a slave who becomes the property of two owners and finds that divided loyalties are impossible. Similarly, one cannot devote oneself to making money and to serving God at the same time (cf. Lk. 14:33).

In the conclusion to the parable of the unjust steward the term "unrighteous mammon" is used (Lk. 16:9, 11), perhaps as a reference to money or property acquired dishonestly. But does the command "make friends for yourselves of unrighteous mammon" simply mean that money gained wrongfully should be given away? It seems more likely that for Jesus, "All money, however acquired, is tainted unless it is used in God's service" (G. B. Caird, *Saint Luke* [*Pelican*, 1963], p. 189). The steward recognized his crisis and acted boldly, using what was not his, to ensure his security in this world. So disciples should use their worldly possessions, which are only on temporary loan from God, in deeds of mercy to store up treasures for themselves in heaven (cf. Mt. 6:19-21; 19:21).



Bibliography.—*DCG*, II, *s.v.* (J. Moffatt); *TDNT*, IV, *s.v.* Μαμωνάς (F. Hauck); H. P. Rüger, *ZNW*, 64 (1973), 127-131.

D. E. GARLAND

MAMNITANAEMUS mam-nə-tə-nē'məs [Gk. A *Mamnitanaimos*, B *Mamtitanaimos*] (1 Esd. 9:34, RSV mg.); AV MAMNITANAIMUS; NEB MAMNITANAEMUS. An Israelite who consented to divorce his foreign wife. *See* MACHNADEBAI.

MAMRE mam'rə [Heb. *mamrē'*]. One of the three Amorite brothers who fought with Abraham against Chedorlaomer king of Elam and three other kings to rescue Abraham's nephew Lot and the other captives from Sodom and Gomorrah (Gen. 14:13). Abraham refused the recovered goods that the king of Sodom offered him but asked that Mamre and his brothers receive their share (v. 24).

MAMRE mam'rə [Heb. *mamrē'*]. The oak grove where Abraham dwelt and built his altar (Gen. 13:18), traditionally identified with Râmet el-Khalîl ("friend's [Abraham's] hill"), a hill 3 km. (2 mi.) N of what is now Hebron. The Lord appeared to Abraham at his tent by the oaks (Josephus *BJ* iv.9.7 [530-33] and NEB "terebinths") in

Herodian ruins at Râmet el-Khalîl (J. C. Trever)

Mamre and promised him and Sarah a son (18:1-15). From there Abraham saw the smoke of the destruction of Sodom and Gomorrah (19:27f.). East of Mamre were the field and cave of Machpelah, which Abraham bought from Ephron the Hittite for the burying place of Sarah (23:17-19). Later Abraham's son Isaac lived in Mamre (35:27).

Because of Abraham Mamre was very early a holy place for the Jews. The paving there dates from the 9th or 8th cent. B.C. In the 4th cent. A.D. Constantine had a basilica built next to the oak at Râmet el-Khalîl. New churches replaced those destroyed in wars; the present ruins are thought to be in the same place as Constantine's basilica and to have the same ground plan. Part of the surrounding wall dates back to Herod and part to Hadrian.

See *EAEHL*, III, *s.v.* (S. Appelbaum).

A. A. SAARISALO

MAMUCHUS mə-mōō'kəs [Gk. *Mamouchos*] (RSV mg., AV, NEB, 1 Esd. 9:30). One who consented to divorce his foreign wife. The RSV renders MALLUCH (2) because of the parallel in Ezr. 10:29.

MAN. *See* ANTHROPOLOGY.

MAN, NATURAL. *See* SPIRITUAL.

MAN, NEW. *See* NEW MAN.

MAN OF LAWLESSNESS [Gk. *ho ánthrōpos tês anomías*] (2 Thess. 2:3); AV MAN OF SIN; NEB "wickedness . . . in human form." *See* LAWLESS

MAN OF SIN. The AV translation of Gk. *ho ánthrōpos tês hamartías* in 2 Thess. 2:3. The RSV ("man of lawlessness") follows earlier MSS (B, ℵ) that read *anomías* instead of *hamartías*. *See* LAWLESS.

MAN, OLD. *See* OLD NATURE; NEW MAN.

MAN, OUTWARD. *See* INNER MAN; NEW MAN I.

MAN, SON OF. *See* SON OF MAN.

MANACH man'ək [Gk. *Manochō*]. A town of Judah listed only in Josh. 15:59, NEB, following the LXX (v. 59a), which adds eleven names apparently making up the Bethlehem district (*LBHG*, rev., p. 355). These names may have been accidentally omitted from the MT (see comms.).

MANAEN man'ə-en [Gk. *Manaēn*; Greek form of the Hebrew name Menahem–'comforter,' 'consoler'; cf. LXX *Manaēm* (2 K. 15:14)]. One of five "prophets and teachers," including Barnabas and Saul, of the church at Antioch (Acts 13:1). He is described as *sýntrophos* of Herod (Antipas) the tetrarch. The precise meaning of *sýntrophos* (lit. "fed/reared with") here is debated. The term was often applied to children of the same age as royal or noble children, with whom they were brought up. According to F. F. Bruce, the translation "foster brother" is more appropriate here than "courtier" or "intimate friend" (*Book of the Acts* [*NICNT*, 1954], pp. 260ff.).

This mention of Manaen implies that he was a person of some influence, because of his connection with Herod Antipas. He was probably one of those who "laid their hands" on Barnabas and Saul (Acts 13:3) and may have been one of the "others" who represented the Antioch church at the Council of Jerusalem (15:2).

Josephus mentions an older Manaen, associated with Herod the Great (*Ant.* xv.10.5 [373-79]). According to Bruce this Manaen may have been the grandfather of the NT Manaen. Both Bruce and I. H. Marshall (*Acts of the Apostles* [*Tyndale*, 1980], p. 215) suggested that Manaen was Luke's source of information about the Herodian dynasty. E. WALHOUT

MANAHATH man'ə-hath [Heb. *mānaḥaṯ*]. The second son of Shobal and grandson of Seir the Horite (Gen. 36:23; 1 Ch. 1:40); the ancestor of an Edomite clan.

MANAHATH man'ə-hath [Heb. *mānaḥaṯ*]. A place to which certain Benjaminites from Geba, victims apparently of intratribal jealousy, were carried captive (1 Ch. 8:6). It is mentioned in the Amarna Letters (Am.Tab. 292:30) and is often identified with Manocho, which the LXX adds to the list of towns in Judah (Josh. 15:59; NEB Manach). The modern town is Mâlḥā, about 5 km. (3 mi.) SW of Jerusalem. D. J. WIEAND

MANAHATHITES man'ə-hath'īts [Heb. *mānaḥṯî*]; AV, NEB, MANAHETHITES. A clan that descended from CALEB (**2, 3**). Half of the clan were descendants of Salma (1 Ch. 2:54); the other half are probably to be identified with the half of the MENUHOTH (so RSV; cf. AV, NEB, "Manahethites") who descended from Shobal (v. 52). They apparently resided in the vicinity of MANAHATH. (See KD.)

MANAHETHITES man'ə-heth'īts (AV, NEB, 1 Ch. 2:52, 54). *See* MANAHATHITES; MENUHOTH.

MANASSEAS man-ə-sē'əs [Gk. *Manassēas*]. A layman who had married a foreign woman (1 Esd. 9:31).

MANASSEH mə-na'sə [Heb. *mᵉnaššeh*–'(God) has made (me) forget,' *mᵉnaššî*; Gk. *Mannassēs*]; AV Apoc. and NT MANASSES; NEB Apoc. MANASSES.

1. The firstborn son of Joseph, and a tribe and territory of Israel. His mother was Asenath the daughter of Potiphera priest of On (Gen. 41:50). Joseph named his firstborn son Manasseh ("causing to forget") because, he said, "God has made me forget all my hardship and all my father's house" (v. 51). When Jacob was near death, Joseph brought his two sons to his father, who blessed them. Because Jacob was a younger son who had received the blessing of the firstborn, he preferred Ephraim, the second son of Joseph, to Manasseh the elder brother, thus indicating the relative positions of their descendants (Gen. 48). Before Joseph died he saw the children of Machir, son of Manasseh (50:23) by his Aramean concubine (1 Ch. 7:14). Scripture records no details of Manasseh's personal life. According to Jewish tradition he became steward of his father's house and acted as interpreter between Joseph and his brethren. The tribe of Manasseh subsequently traced its ancestry to Machir (1 Ch. 7:14).

At the beginning of the desert march Manasseh's men of war numbered 32,200 (Nu. 1:34f.). At the second census they had increased to 62,700 (26:34). Their position in the wilderness was with the tribe of Benjamin, by the standard of the tribe of Ephraim W of the tabernacle. At Sinai the prince of the tribe was Gamaliel son of Pedahzur (2:20). Gaddi son of Susi represented the tribe among the spies (cf. 13:11, where "tribe of Joseph" seems to be used as an alternative). At the census in the plains of Moab, Manasseh is named before Ephraim and appears as much the stronger tribe (26:28ff.). Manassites performed the main military exploits in the conquest of eastern Palestine. Machir son of Manasseh conquered the Amorites and Gilead (32:39). Jair son of Manasseh took all the region of Argob, containing sixty cities, and called them by his own name, "Havvoth-jair" (32:41; Dt. 3:4, 14). Nobah captured Kenath and its villages (Nu. 32:42; Josh. 17:1, 5). The warriors of this half-tribe passed over with those of Reuben and Gad before the host of Israel, and took their share in the conquest of western Palestine (Josh. 22). They helped to raise the great altar in the Jordan Valley, which so nearly led to disastrous consequences (vv. 10ff.).

Only a general outline can be given of the territory of Manasseh, principally because the extent of the tribe's holdings varied from time to time. Their territory straddled the Jordan in central Canaan, with the west section of the tribe having its S border at the Wâdī Kanah, but also including on the southeast an extent of territory stretching from Shechem to Jericho. To the north the tribe was allotted holdings up to the foot of Mt. Carmel (cf. Josh. 17:15), close to where Issachar and Zebulun had their territory. Manasseh experienced great difficulty in uprooting the Canaanites in Beth-shean, Dor, Ibleam, and Megiddo (Jgs. 1:27), and may not have controlled the coast in the northwestern part of its holdings. During the wars with the Canaanites Issachar suffered more than all the other tribes and was forced to retreat from areas that were its patrimony, which Manasseh then occupied (Josh. 17:11-13). Gideon of the tribe of Manasseh fought the Midianites at the foot of the hill of More in the Valley of Esdraelon in the center of Issachar's territory. Y. Aharoni suggested identifying Ophrah, Gideon's home, with the village eṭ-Ṭaiyibeh NE of the hill of More. Thus Manasseh's expansion northward took land from the tribes in Galilee, Issachar, and perhaps Asher. The Valley of Esdraelon (with the cities Beth-shean, Ibleam, Dor, Endor, Taanach, and Megiddo) was not actually conquered in the beginning (Jgs. 1:27f.) but came under Manasseh's influence; probably part of the valley fell into Manasseh's hands after Deborah's war and the rest at the time of the monarchy.

The half-tribe of Manasseh located E of the Jordan (Josh. 13:29-31) occupied territory S of the Sea of Galilee close to Syrian holdings. It included the villages of Jair (NEB Havvoth-jair) in Bashan, half of Gilead, as well as Ashtaroth and Edrei. By this means the former kingdom of Og, ruler of Bashan, was kept in subjection. The southern border was most probably the river Jabbok, but in any event it ran close to Mahanaim, an important city of Gilead in Gadite territory. The northern and eastern boundaries of Transjordanian Manasseh are impossible to establish with certainty, as is the degree of control which the tribe exerted over its holdings. Biblical tradition (1 Ch. 5:23) included Mt. Hermon as the northern limit of Ma-

nasseh's eastern holdings, but the reference may be to the maximum extent of the kingdom in the Davidic period rather than to the tribal holdings in the time of Joshua.

Some problems have arisen with respect to the genealogies of Manasseh as a tribe in Nu. 26:26-34; Josh. 17:1-3; 1 Ch. 2:21-23; 7:14-19. Part of the difficulty may be topographical in nature, especially where Manasseh is mentioned in connection with neighboring Ephraim on the one hand (cf. Josh. 21:5) and Reuben and Gad on the other (cf. Josh. 21:27), where both halves of the tribe of Manasseh are being considered. More serious is the genealogical problem presented by comparing Nu. 26:29-34 and 1 Ch. 7:14-19, especially the insertion of Huppim in 1 Ch. 7:15. The text may well have preserved the name as a variant form of Hupham, one of Benjamin's sons (Nu. 26:39), since he is not mentioned elsewhere by the name Huppim. Similarly Shuppim is probably a postexilic contracted form of Shephupham (cf. Nu. 26:39), also a Benjaminite, and the incidence of the names in Chronicles is probably the result of an accidental gloss from the preceding Benjaminite genealogy.

Ten cities W of the Jordan, in the portion of Manasseh, were given to the Levites, and thirteen in the eastern portion (Josh. 21:5f.). Manasseh took part in the conflict with the host of Sisera (Jgs. 5:14). Two famous judges, Gideon and Jephthah, belonged to this tribe. The men of the half-tribe E of the Jordan were noted for skill and valor as warriors (1 Ch. 5:18, 23f.). Some men of Manasseh had joined David before the battle of Gilboa (12:20). Others, all mighty men and captains in the host, joined him on the way to Ziklag and helped him against the band of rovers (vv. 21ff.). From the half-tribe W of the Jordan 18,000 men were expressly summoned to Hebron to make David king (v. 31). Those who came from the east numbered, along with the men of Reuben and Gad, 120,000 (v. 37). David organized the eastern tribes under 2700 overseers for "everything pertaining to God and for the affairs of the king" (26:32). The rulers of Manasseh were Joel son of Pedaiah in the west and Iddo son of Zechariah in the east (27:20f.). Many belonging to Manasseh humbled themselves and came to Jerusalem at the invitation of Hezekiah to celebrate the Passover (2 Ch. 30:11). Although not cleansed according to the purification of the sanctuary, they ate the Passover. The king successfully sought pardon for them, because they set their hearts to seek God (vv. 18ff.).

The eastern half-tribe "played the harlot after the gods of the peoples of the land" and in consequence were overwhelmed and expatriated by Tiglath-pileser king of Assyria (1 Ch. 5:25f.). 2 Ch. 31:1; 34:6 refer to the idolatries of the western half-tribe.

Ezekiel's ideal picture provides a portion for Manasseh (48:4), and the tribe appears in a list in Rev. 7:6.

2. The son of Hezekiah and successor to the Davidic throne in Jerusalem (2 K. 21:1-18; 2 Ch. 33:1-20; Mt. 1:10).

Manasseh's reign was the longest in the Davidic line. Including a decade of co-regency with his father, Manasseh reigned fifty-five years (696-642 B.C.). Apparently he was made king in 696/695 at the age of twelve when he became a "son of the law," but he probably had little opportunity to assert himself while Hezekiah was living.

There are two accounts of Manasseh's reign (2 K. 21:1-18 and 2 Ch. 33:1-20) that diverge to a significant degree. Unmentioned in the Chronicles account are the name of his mother (2 K. 21:1), the comparison of his idolatry with that of Ahab, especially the Asherah idol (v. 3), the divine prophecy of doom upon Judah (vv. 10-15), and Manasseh's shedding of innocent blood (v. 16). Whereas in the Kings narrative Manasseh burned "his son," in the Chronicles account he burned "his sons." Absent from the Kings description but mentioned in 2 Ch. 33:1-20 are Manasseh's Assyrian captivity, his repentance (vv. 11-13), and his rebuilding activities in Jerusalem, accompanied by the destruction of pagan shrines (vv. 14-17). The source for the Kings narrative is the Book of the Chronicles of the Kings of Judah, while the Chronicler drew upon two works, the Chronicles of the Kings of Israel and the Chronicles of the Seers.

The life of Manasseh is thus attested in no fewer than three annalistic sources, though to what extent they were quoted verbatim is unknown. Where verbal correspondences occur in the two biblical descriptions the Chronicler may have had the Kings narrative as his source, or else had access to the tradition upon which the author of Kings drew. His use of such material, however, was obviously limited by the special approach which he adopted in interpreting preexilic history. It seems probable that the Chronicler's mention of Manasseh's disobedience, punishment, and repentance was a deliberate attempt to emphasize to the nation the fundamental need for covenantal obedience and holiness to characterize the theocracy, which because of the return from exile had a new opportunity to manifest the ethos of the Sinai agreement. Whatever the sources of the divergent narratives it must be apparent that if the cited material underlying the Kings account is taken as genuine, those on which the Chronicler based his account must be accorded the same recognition also.

Manasseh plunged his nation into gross idolatry unequaled in Palestine since the days of Ahab and Jezebel. His reign was the antithesis of his father's, which was marked by godly zeal and piety. Worship of stars and planets was instituted as part of the religious rites and ceremonies. In the Hinnom Valley outside the city wall of Jerusalem the Hebrew king sacrificed children to the Ammonite deity Moloch. This was one of the most abominable rites of Canaanite paganism; Ps. 106:36f. associates it with demon worship. Manasseh also allowed divination, occultism, and astrology. Altars in the temple courts used for worshiping the host of heaven and graven images of Asherah the wife of Baal in the temple itself represented open defiance of God. Moreover, Manasseh shed much innocent blood; protesters against these abominable practices were likely silenced by death (cf. 2 K. 21:16). Although the last king associated with Isaiah in the historical record is Hezekiah, the tradition attributing the martyrdom of Isaiah to King Manasseh seems reasonable. Since the moral and spiritual conditions in Judah were worse than those of the nations that the Israelites were commanded to exterminate under the leadership of Joshua, Isaiah doubtless thought that the judgment he had announced upon Judah and Jerusalem was inevitable.

Scripture does not indicate how much Assyria influenced Manasseh in his idolatrous practices. Under Esarhaddon and Ashurbanipal the Assyrian kingdom reached its pinnacle of wealth and prestige. In all likelihood Manasseh curried the favor of Esarhaddon in subservient vassalage when the Assyrian king subjugated Tyre in 678 and extended his control down into Egypt, occupying Memphis is 673 and capturing Tirhaka a few years later. In his list of twenty-two kings from the Hittite country, Esarhaddon mentions Manasseh king of Judah among those who made

a compulsory visit to Nineveh in 678. Although Babylon perhaps was rebuilt by then, Unger's assertion that Manasseh was taken to Babylon at this time may be incorrect (cf. M. F. Unger, *Archaeology and the OT* [1954], pp. 280f.).

Ashurbanipal (669-633) extended Assyrian control about 800 km. (500 mi.) along the Nile with the capture of Thebes in 663. A bloody civil war in Babylon in 652 shook the Assyrian empire; although it was suppressed in four years, other rebellions erupted in Syria and Palestine. Judah may have joined Edom and Moab, which are named in the Assyrian inscriptions. Since Moab's autonomy was terminated at that time, Judah's king Manasseh probably was taken as a captive to Babylon then and released later (2 Ch. 33:10-13).

The biblical record seems to substantiate a late date for Manasseh's captivity. Although he repented and was returned to this throne, the conditions that existed when Josiah assumed the kingship after Amon's short reign do not indicate much of a change from Manasseh's earlier evil influence. In all likelihood Manasseh was not able to turn the idolatrous tide in Judah after his return, and it is probable that his own reforms were short-lived.

See also MANASSEH, PRAYER OF. S. J. SCHULTZ
R. K. H.

3. A layman who divorced his foreign wife in the time of Ezra (Ezr. 10:30); called Manasseas in 1 Esd. 9:31.

4. Another layman who divorced his foreign wife; son of Hashum (Ezr. 10:33 par. 1 Esd. 9:33).

5. Judith's wealthy husband, who died of sunstroke during the barley harvest (Jth. 8:2f., 7; 10:3; 16:22-24).

6. The Manasseh of Jgs. 18:30f. (AV, NASB) is evidently a deliberate attempt to avoid the suggestion that the esteemed Moses (a name read by RSV, NIV, NEB, following some MSS) had an idolatrous descendant. A small *n* has been inserted in the Hebrew text above and between the first and second consonants in the word Moses, which also happened to be the name of the priest officiating at the idolatrous shrine of Dan. The scribal insertion, probably added some centuries after Judges was written, effectively changed "Moses" into "Manasseh," thereby removing any possible stigma from the Hebrew lawgiver's name and reminding subsequent generations of a notorious royal idolator in Judah.

MANASSEH mə-nas'sə, **PRAYER OF.** This piece of devotional literature is an anonymous composition which exhibits elegance of construction, correctness of liturgical form, and the finest traditions of historic Jewish piety. Its scant fifteen verses make it the shortest book of the Apocrypha.

I. Title.–In Codex Alexandrinus (5th cent. A.D.) it was entitled "A Prayer of Manasseh" and included in a collection of Odes (Ode 8, following Isa. 38:9-20). In the Vulg. it was known as "A Prayer of Manasses, king of Judah, when he was held captive in Babylon," a title which the AV and RV followed.

II. Canonicity and Text.–Doubtless on the authority of Codex Alexandrinus, which has preserved the LXX textual tradition better than any of the comparable codices, the Greek church has always included the Prayer in its canonical Scriptures. Yet it does not seem to have been part of the original LXX; it appeared first in the 3rd cent. A.D. in Syriac in the *Didascalia* (ii.21), a manual of church order. The Prayer formed part of a midrash, and the Syriac balanced the reference to confession in v. 9 by a statement concerning punishment in a way characteristic of Hebrew poetic parallelism. The enlargement may have filled a gap in the Greek text, but this is uncertain.

In the 4th cent. it was incorporated into the *Apostolic Constitutions*, a situation which led some scholars to assign a very late date to the Prayer. Apparently the composition was unknown to Jerome also, since it was not included in his Vulg., a revised form of the Old Latin version. Its presence in some medieval Latin MSS led to the inclusion of the Prayer in the Stephanus (1540) edition of the Vulg., but it was excluded from the Vulg. of Sixtus V (1590). It reappeared, however, in the edition of Pope Clement VIII (1592), but only in the Appendix. Its position varies in MSS, versions, and printed editions of the LXX. It is most frequently found among the odes or canticles following the Psalter (as in A T; see Rahlfs' ed., II, 180f.). In Swete's LXX the Psalms of Solomon, followed by the odes (of which the Prayer is the eighth), appear as an Appendix after 4 Maccabees. It was placed after 2 Chronicles in the original Vulg., but in the Romanist Vulg. it stands first, followed by 3 and 4 (1 and 2) Esdras in the apocryphal appendix. It is found in all MSS of the Armenian Bible, where, as in Swete's LXX, it is one of many odes. Though not included in Coverdale's Bible or the Geneva version, it was retained (at the close of the Apocrypha) in Luther's translation, in Matthew's Bible, and in the Bishops' Bible, whence it passed into our English versions. The text has been preserved very well, and no significant problems seem to have arisen during its transmission. The Prayer is omitted from several modern editions of the LXX.

III. Background.–The composition purports to contain what Manasseh said as he prayed for divine mercy during his incarceration in Babylon. While the ascription of the work to the cruel and idolatrous Hebrew monarch is unhistorical, the tradition of Manasseh's captivity in Babylonia (2 Ch. 33:11) should not be casually dismissed. Manasseh's reign was notorious for its idolatry (2 K. 21:1-18), and the Chronicler regarded the Assyrian invasion of Jerusalem and Manasseh's exile as a divine punishment for national sin (2 Ch. 33:1-20). Archeological sources have not confirmed Manasseh's presence in Babylon, although Assyrian records mention a visit by him to Nineveh at the command of Esarhaddon (*ARAB*, II, 690). The name "Manasseh king of Judah" appeared on the prisms of both Esarhaddon and Ashurbanipal (*ANET*, p. 294), the latter attesting to his status as a vassal. Manasseh's exile may have occurred as a consequence of a revolt against Assyria in support of the viceroy of Babylon, Šamaš-šum-ukīn (cf. *ANET*, p. 298), probably *ca.* 650 B.C. The Chronicler evidently preserved an otherwise unrecorded tradition about Manasseh's captivity and release, a parallel to which can be observed in Ashurbanipal's treatment of Pharaoh Neco I, as recorded on the Rassam Cylinder. (*ANET*, p. 295).

The Chronicler indicated that Manasseh repented of his evil ways, and also made two references to his prayer to God (2 Ch. 33:18f.). Whether this prayer was some formal dedication at the time of his succession (cf. 1 K. 8:23-53) or an expression of penitence toward the end of his rule is uncertain. Whatever its nature, the prayer was preserved in the Chronicles of the Kings of Israel, and also independently in the Sayings of Hozai (New King James Version; RSV and NEB have "the seers," following one LXX MS, with other MSS reading "my seers"). None of this material is extant, however, and it is thus impossible to be certain of the prayer's form, or of any correspondence to the Prayer of Manasseh. The latter may have been composed by a pious scribe as a theodicy, attempting to show that God tolerated Manasseh's iniquitous reign because He knew that repentance would occur ultimately.

IV. Original Language, Authorship, and Date.–In such a short document it is difficult to determine whether the

composition was first written in Hebrew or Greek. The formulation of the Prayer and its syntax would suggest Hebrew or Aramaic as the original language, but nothing precludes its composition in Greek, due to its flexibility of style and simple religious vocabulary. Hebrew thought and structure go hand in hand with reflections of LXX language, and while most modern scholars have suggested a Greek original, it is equally possible that the Prayer was translated into Greek from a Hebrew source that is no longer extant. The Prayer is strictly anonymous, and speculation about authorship is thus largely unproductive, other than that the author was a Jew. He may have composed the Prayer between *ca.* 250 and 150 B.C., and he could have been Palestinian or Alexandrian in origin. Perhaps the Maccabean period, with its great evils, inspired the composition of the Prayer. As such it may have been related, as one product of pietistic activity, to the fragmentary Prayer of Nabonidus recovered from Qumrân cave 4 and dated to the same period.

V. Content and Theology.–The Prayer opens with an invocation to the Lord as God of the patriarchs, the God who orders the entire creation by His power and mercy. God is extolled as One who has promised forgiveness to the penitent sinner, and on this basis the supplicant implores pardon for his manifold iniquities. He confesses them in the confidence that he will be pardoned through divine mercy, and ends his petition on a note of continuous praise. The composition contains the appropriate liturgical elements of adoration (vv. 1-7), confession (vv. 8-10, 12), petition (vv. 11, 13f.), and praise (v. 15).

The Prayer is a noteworthy manifestation of postexilic Jewish piety, but as a confession of sin it is quite general in character and content. As such it could be employed on a variety of occasions in public worship, quite apart from being used profitably in private devotion. Had the Prayer reflected the situation of Manasseh to any great degree, it would certainly have made more specific reference to the apostasy and human sacrifice of which he was guilty. By contrast, only the most general transgressions are confessed. A discordant theological note is struck by the attribution of sinlessness to the patriarchs (v. 8). This claim is unscriptural, and would have been untenable in any other than a late postexilic period of Jewish theology (cf. R. A. Stewart, *Rabbinic Theology* [1961], pp. 127-131). The terms "God of the righteous" and "God of those who repent" are characteristic of postexilic Judaism, as is the reference to the "glorious name" and its associated power, but the main emphasis upon God's mercy to the penitent sinner is thoroughly orthodox.

MANASSES mə-na'sēz.

1. (AV Mt. 1:10; Rev. 7:6; AV, NEB, 1 Esd. 9:33; Jth. 8:2f., 7; etc.). *See* MANASSEH.

2. A person mentioned in the AV of Tob. 14:10, following Gk. B and A (*Manassēs epoiēsen eleēmosýnēn*, "Manasses gave alms"). The NEB follows ℵ (*en tō̃ poiēsai me eleēmosýnēn*, "Because I gave alms"). The RSV also follows ℵ but deletes *me* and understands *Achiacharos* as the subject ("Ahikar gave alms"). The RSV and NEB readings make more sense than the AV reading, but no satisfactory explanation has yet been offered for the insertion of *Manassēs* in the text of B and A. N. J. O.

MANASSITES mə-na'sīts [Heb. *mᵉnaśśî, bᵉnê-mᵉnaśśeh*] (Dt. 4:43; 29:8 [MT 7]; Josh. 13:29; etc.); AV also CHILDREN OF MANASSEH, etc.; NEB also MANASSEH, (MANASSEH'S) SONS. Members of the tribe of MANASSEH (1).

MAN-CHILD. The AV and RSV translation of Heb. *geḇer* ("vigorous young man") in Job 3:3, where Job curses the night of his conception (MT; but according to the LXX, his birth). The AV also renders "man child" five times for *zāḵār*, "male" (Gen. 17:10, 12, 14; Lev. 12:2; Isa. 66:7).

MANDAE man'dī (1 Esd. 9:34, NEB). *See* MAMDAI.

MANDAISM man-dē'izm. An ancient Gnostic religion that began in the 2nd cent. A.D. or earlier. Its adherents, known as Mandeans, assert that the original group came from Palestine; they now inhabit areas close to the marshy swamps of southern Mesopotamia (modern Iraq and Iran). Because John the Baptist is extolled as one of their prophets, travelers of the 17th cent. named them "St. John's Christians." The Mandeans are highly critical of orthodox Christianity and virulently anti-Jewish. Their sect is the only form of ancient GNOSTICISM that has survived into modern times. They consider themselves descendants of the Egyptians who were saved from drowning in the Red Sea, with Pharaoh functioning as their first high priest and king.

Mandean mythology populates the universe with an enormous number of spiritual and astrological beings, both good and evil. The myths are obscure and sometimes contradictory. The major savior figure is Manda d-Hayye (Knowledge of Life). Man was formed in the image of a beneficent male deity, while woman was made in the form of Ruha, an evil female demon whose misdemeanors were in part responsible for the creation of the material universe. The physical body is a tomb that holds the soul as in a prison. Ritual purity is effected through rites, taboos, and strict conformity to the prescribed rules. Purification of body and soul through continual baptisms is an essential practice. At death the pure soul ascends past the hostile demons of the planets to the presence of the Great Life, the Supreme Entity of the Universe.

The religion makes a sharp distinction between the relatively ignorant laity, who are known as Mandeans or Gnostics, and the priests, who are divided into three ranks: the *asganda* or apprentice, who must have an unblemished pedigree in a priestly family; the *tarmida* or ordinary priest, to whom the fundamental mysteries are revealed; and the *nasoreans* (disciples), who have reached the highest stage of knowledge and purity. The head priest is known as the *ganzibra* or treasurer. Qualifications for the priesthood are extremely rigorous, and the group faces extinction because of a lack of eligible priests. Chaste marriage and the procreation of large families are considered the highest duties of the nasoreans.

The sect has numerous sacraments and ritual meals, including a feast for the dead. Cult huts, ritual garments, and sacred handclasps all figure in elaborate ceremonies. Running water is especially reverenced. Incantations, astrology, and magic are widely practiced.

Mandaic literature has been available to the western world since the 19th cent., especially through E. S. Drower's efforts. The texts, some of quite early composition, are written in an Eastern Aramaic similar to that used in the Babylonian Talmud. Gnostic, Jewish, Iranian, Platonic, astrological, and ancient Egyptian and Babylonian influences are all evident. Certain Manichaean Psalms (*see* MANICHAEISM) of the late 3rd cent. appear to be adaptations of earlier Mandean writings. Earlier speculation that the writer of the Fourth Gospel used Mandean literary

sources now appears doubtful, since the highly dualistic nature of Mandaism stands in stark contrast to the monotheism of John.

MANDRAKES man'drāks [Heb. *dûḏā'îm*; Gk. *mandragóras*] (Gen. 30:14-16; Cant. 7:13 [MT 14]). The mandrake (*Mandragora officinarum* L.) is a member of the *Solanaceae* or potato order and is closely allied to the nightshade and tomato. Commonly found in Palestine, it ripens during the wheat harvest (Gen. 30:14). The mandrake bears a rosette of lanceolate green leaves, with purple flowers and yellowish globular fruit. The root was venerated superstitiously in antiquity (cf. Josephus *BJ* vii.6.3 [178-189]) and was considered an aphrodisiac (cf. Cant. 7:13). But the suggested rendering "love apples" (Gen. 39:14, RV mg.) incorrectly associates Heb. *dûḏā'îm* with *dôḏîm*, "love," unless the dual form is an oblique, erotic designation of the female breasts. Even the most vivid imagination would be hard pressed to see in the shape of the mandrake root anything approaching that of an apple, regardless of the reputed aphrodisiac qualities of the plant.

Possibly Ugar. *ddym*, occurring occasionally in the Anath cycle, is related to the Hebrew for "mandrakes" (cf. J. C. L. Gibson, *Canaanite Myths and Legends* [rev. ed. 1978], pp. 49, 51, 144). The reference in 'nt IV:53 to setting mandrakes in the dust (C. H. Gordon, *Ugaritic Literature* [1949], p. 20) has been interpreted, although not uniformly, in an erotic sense. But if the translation "mandrakes" is correct, the allusion is almost certainly poetic, not a factual reference to the planting of mandrakes (cf. M. H. Pope, *Song of Songs* [*AB*, 1977], p. 600). R. K. H.

MANEH mā'nā. *See* MINA.

MANES mā'nēz (1 Esd. 9:21, NEB). One of those who divorced their foreign wives. The parallel in Ezr. 10:21 (LXX) reads Gk. *Masaia kaí Elia* in place of *Manēs*. Thus, in 1 Esd. 9:21 the RSV reads MAASEIAH (7) instead of Manes in an attempt to reconcile the two name lists. The AV has Eanes, apparently mistaking *M* for *H* in the Greek text.

MANGER mān'jər [Gk. *phátnē*]; AV also STALL (Lk. 13:15). A term in the NT used only in Lk. 2:7, 12, 16; 13:15 and usually understood to mean a feeding trough for cattle, although the usage is ambiguous. In Lk. 2 *phátnē* could be the stable, in contrast to the inn proper where the people were lodged, or a feeding trough in an open field. But on the basis of contemporary Arab practice, K. Bailey (*Theological Review*, 2 [1979], 33-44) has suggested that the manger was actually in the house, which was divided into an upper level for the people and a lower level for the animals. In Lk. 13:15 the reference is to a "stall" or "pen" for animals.

In the LXX *phátnē* translates four Hebrew words that range in meaning from "manger" or "crib" (Job 39:9; Prov. 14:4; Isa. 1:3) to "stall" or "cattle pen" (2 Ch. 32:28; Hab. 3:17) and even "fodder" (Job 6:5). In classical Greek the term usually means "manger" or "crib."

Several sites where barns or inns were built near or over caves used as stables have been uncovered. The early Church believed that Jesus was born in a cave (Justin Martyr *Dial.* 78.5, *ca.* A.D. 150), and in 330 Constantine erected a basilica, to which Justinian later added, over the traditional grotto in Bethlehem. It is known today as the Church of the Nativity.

The excavations at Megiddo have uncovered mangers hewn out of solid blocks of limestone, and stone feeding troughs were found at Lachish. This archeological evidence and the scarcity of wood in Palestine lend some credence to Jerome's statement that the manger was made of mud or clay (*Homily 88, On the Navity of the Lord*).

The manger serves to emphasize the humble birth of the Son of God, who came not as a mighty king or general on a horse, but, in fulfillment of Zec. 9:9, humble and riding on an ass. He came not to be served but to serve and to give his life as a ransom for many (Mt. 20:28).

W. W. BUEHLER

MANI.

1. mā'nē (AV, NEB RSV mg., 1 Esd. 9:30). Head of a family whose sons had married foreign wives. The RSV renders BANI 4 (cf. Gk. *Mani*) because that form appears in the parallel Ezr. 10:29.

2. ma'nē. Founder of MANICHAEISM, also known as Manes or Manicheus.

MANICHAEISM ma-nə-kē'izm, man'ə-kē-izm. A syncretistic religion that flourished in the 3rd-14th centuries. Mani, the founder of Manichaeism, was born to an aristocratic Parthian family in Babylonia *ca.* A.D. 216. Shortly thereafter his father, Pattik, became involved in a baptistic sect, probably of Elkesaite origin, in southern Mesopotamia. Mani also joined the group, but broke with it at the age of twenty-four, after two encounters with an angel who was identified as his "twin companion." Mani began to preach a new religion derived from his revelatory experiences and soon gained adherents. Shapur, the Parthian king, supported his message, although there was serious hostility from other regimes.

Both Mani and his followers traveled widely as they propagated the new faith, which spread within his own lifetime as far as Egypt, China, and India. Drawing heavily upon Christian, Jewish, Persian, Gnostic, and perhaps Babylonian and Buddhist traditions, Mani himself wrote extensively and encouraged the faithful to translate and reproduce the texts. He viewed himself as the Paraclete promised by Jesus and as the ultimate prophet after Adam, Abraham, and Jesus.

Despite his claim of seeking to integrate the old Persian wisdom with Christianity, Mani met fierce opposition from representatives of Persian religious traditions, including Zoroastrianism, and was crucified by them in A.D. 276. The cult, perpetuated and augmented by Mani's disciples, developed an extensive following among a variety of peoples from North Africa to China. It survived until at least the 14th century. In Europe, Manichaeism influenced the thought of the Bogomils, Albigensians, and Paulicians.

Manichaean theology may be described as a consistent Gnostic dualism. It posits two opposing forces in the universe, which were originally separate and totally antagonistic to one another both essentially and existentially. Mani called these two governing principles God and Hyle (matter) and thought them to be expressed in the universe by darkness and light. The boundaries between the realms of darkness and light were breached, however, with the result that the whole world, including all humanity, became filled with a mingling of the two principles. For Manichaeism the goal of history is to achieve an ultimate reseparation of the two forces, which would render evil harmless and never again able to merge with good. An elaborate mythology embodies these theological tenets.

Humanity might be delivered from evil by a recognition

of the forces of good and evil and by adherence to precepts gained through recognition of this universal dualism. Human beings have the special responsibility of preventing further harm to the light. They are also to release from admixture with darkness the particle of light that lies within themselves. At the death of an elect Manichee, the light-particle trapped within the body might pass again to the realm of light. If the light does not thus escape from its union with evil, it must pass again into another human body.

Manichaean devotees were divided into two classifications, the "elect" and the "hearers." The elect were monks and nuns who had been initiated into the complete mysteries of Manichaeism and were forbidden normal activities and occupations in the world, including all sexual activity and the consumption of meat. The hearers, commissioned with providing support for the elect, lived in the world but avoided killing, idolatry, sorcery, and sexual immorality. A hearer might hope to return to this life as one of the elect. Before his conversion to Christianity, Augustine was a Manichaean hearer for nine years.

Mani held orthodox Christianity to be a grievous error. Three different figures of Jesus appear in Manichaeism, but none is congruent with the biblical picture of Him. In consequence, Manichaeism met with vehement opposition and condemnation by Christians, among whom Augustine became a leading proponent.

A considerable amount of Manichaean literature has been preserved, including a recently published account of Mani's life (see Henrichs). Manichaean homilies, psalms, and theological writings are also extant. Most are beautifully copied translations from the original Eastern Aramaic dialect in which Mani wrote. In the 19th cent. significant new texts were discovered, principally in Egypt and Chinese Turkestan. More recently the Cologne Mani Codex and some personal letters attributed to Mani have been published.

R. C. AND C. C. KROEGER

MANIFEST [Heb. *rā'â*] (Ps. 90:16); AV APPEAR; NEB SHOW; [hophal of *yāḏa'*] (Ps. 77:14 [MT 15]); AV DECLARED; NEB SHOWN; [Gk. *phanerós*] (Lk. 8:17; Acts 4:16; 1 Cor. 3:13); NEB DISCLOSED, PUBLIC, etc.; [*phaneróō*] (Mk. 4:22; Jn. 2:11; 9:3; Rom. 3:21; Col. 1:26; Tit. 1:3; etc.); AV also APPEAR; NEB also DISPLAYED, SHOWN, REVEALED, etc.: [*emphanízō*] (Jn. 14:21f.); NEB DISCLOSE; [*epiphanḗs*] (Acts 2:20); AV NOTABLE; NEB RESPLENDENT; [*emphanḗs*] (Acts 10:40); AV SHEWED; NEB APPEAR; [*deiknýō*] (1 Tim. 6:15); AV SHEW; NEB APPEARANCE; **MANIFESTATION** [Gk. *anádeixis*] (Lk. 1:80); AV SHEWING; NEB APPEARED; [*phanérōsis*] (1 Cor. 12:7); NEB MANIFESTED; [*pneumátōn*] ("manifestation of the Spirit," 1 Cor. 14:12); AV, NEB, GIFTS. The RSV and NEB follow the LXX in emending the MT of Isa. 24:23 to read *yikkāḇēḏ* (niphal of *kāḇēḏ*) instead of *kāḇôḏ*. In Ezk. 20:41; 28:22, 25, the RSV employs "manifest" in rendering the niphal form of the verbs *qāḏaš* ("show oneself holy") and *kāḇēḏ* ("show one's glory").

In both the OT and NT "manifest" describes God's revelation of Himself or His purposes to the world. Characteristically, God and His purposes are "hidden" from the understanding of sinful humans until He chooses to make Himself known through word or act (*see* HIDE; REVELATION). His saving and redeeming of His covenant people are celebrated throughout the OT and led the psalmist to praise the God who works wonders, who manifests His might among the peoples (Ps. 77:14 [MT 15]; cf. 92:5 [MT 6]). Moses prayed that God's gracious will and work might be shown to His servants and their children (Ps. 90:16). God's being the One who "shows his holiness" that the peoples might know Him is a favorite theme in Ezekiel (20:41; 28:22, 25).

The NT uses the Greek verb *phaneróō* and related words to portray God's activity of revelation as His disclosure and "display" of His purposes. Jesus reveals His glory in His first miracle at Cana (Jn. 2:11). The man born blind is healed "that the works of God might be made manifest [displayed] in him" (9:3). To those to whom God has given Him, to those who keep His commandments and love Him (14:21f.), Jesus has made known His Father's name (17:6). God's purpose in His Kingdom, though hidden from His disciples, will not always be so, for there is "nothing hidden which is not bound to become known" (Lk. 8:17; *Expos. G.T.*, I, 521) and to come to the light for all to see plainly (Mk. 4:22).

Yet, too, for the early Church the "mystery hidden for ages and generations" (Col. 1:26) has already come into the open through Jesus Christ's appearing in the flesh (1 Tim. 3:16; 1 Jn. 1:2; 1 Pet. 1:20). In Him the secret divine purpose for salvation has now been revealed to the world in culmination of the "hope of eternal life which God . . . promised ages ago" (Tit. 1:2f.; 2 Tim. 1:9f.). This incarnate Christ now brings to light the "righteousness of God" (Rom. 3:21) through His act of redemption, by which comes salvation by grace as God's free gift (v. 24).

The final disclosure of God will take place when the chief Shepherd appears (1 Pet. 5:4; cf. Col. 3:4; 1 Jn. 3:2) at the "proper time" set by God (1 Tim. 6:15; cf. 1 Clem. 5:5). Before Him in that Day of Judgment "each man's work" will become visible and be tested (1 Cor. 3:13). The "day of the Lord" is "splendid" or "glorious" (Acts 2:20). In this life, though, Christians are united with Christ in suffering, so that the world might see the life of Jesus lived in their lives (2 Cor. 4:10f.).

In 1 Cor. 12:7 the "revelation of the Spirit" may mean either that the Spirit is being revealed or that the Spirit is revealing something, perhaps the gifts as an "announcement" (Bauer, rev., p. 853) of His presence. Paul stated that the people of Corinth were "zealous for spirits" (14:12), meaning that they were fascinated with and desired to obtain the gifts given to the Church. (The Greek plural referring to the "Spirit of God" probably describes the varieties of spiritual gifts bestowed by the Spirit, hence the RSV's "manifestations of the Spirit.")

D. K. McKIM

MANIFOLD [Heb. *kepel*–'double' (Job 11:6), *rāḇaḇ*–'be numerous' (Ps. 104:24); Gk. *pollaplasíōn*–'many times as much' ("manifold more," Lk. 18:30), *polypoíkilos*–'most varied' (Eph. 3:10)]; AV also DOUBLE (Job 11:6); NEB WONDERFUL, COUNTLESS, "many times over," "in all its varied forms." Great in number or in variety.

The meaning of Job 11:6 is obscure. The dual form *kiplayim* literally means "double" (cf. AV). According to the RSV interpretation, Zophar reminds Job that God's wisdom is greater in its dimensions than Job thinks. Several commentators have suggested deleting the *k* as dittography and reading *pᵉlā'îm*, "marvelous, wonderful" (cf. NEB; see Rowley, p. 88). M. Pope, on the other hand, has taken *kiplayim* to mean "duplex, two-sided": "For there are two sides to wisdom" (pp. 83-85). Ps. 104:24 also refers to God's great wisdom. The psalmist marvels at the tremendous number and variety of things that God has created (cf. vv. 1-23). In Eph. 3:10 Paul states that the wisdom of God, which "has shown itself in Christ to be varied

beyond measure and in a way which surpasses all previous knowledge thereof" (*TDNT*, VI, 485), is now being made known to the principalities and powers through the Church.

Jesus assured His followers that those who gave up families and possessions for the sake of God's kingdom would receive such blessings in far greater numbers in the present life through their entry into the kingdom of God (Lk. 18:30); i.e., His followers would become members of a far greater family and would share in its common property (cf. Acts 4:32, 34f.).

MANIUS, TITUS man'i-əs, tī'təs [Gk. *Titos Maniōs*] (2 Macc. 11:34); AV TITUS MANLIUS (cf. Vulg. *Titus Manilius*). A Roman ambassador (Gk. *presbytai*) who with Quintus Memmius, sent a letter to the Jews (addressed as a political body; see Abel, p. 430) verifying certain agreements with the Syrian Lysias, the guardian and relative of King Antiochus.

Since there are no other references to these two legates, their identification is difficult. Some have identified Manius with Manius Sergius, a Roman envoy (with C. Sulpicius) to Syria before the death of Antiochus IV (Polybius xxxi.9.6; see Abel, p. 430). This identification requires the spelling "Manios" (as in A V Syr.) which is less likely than "Manilius." The dates also pose problems. (Cf. Goldstein, pp. 423f.) Others have identified Titus Manius with Titus Manlius Torquatus, noted by Livy (xliii.11) as ambassador in Egypt (not Syria!) in 164 B.C., but this identification also has its difficulties.

The historicity of the letters in 2 Macc. 11 is also questionable, especially because of differences between 2 Maccabees and 1 Maccabees, which is generally regarded as the more reliable of the two. 1 Macc. 4:26-35, e.g., describes Lysias's campaign in 165 B.C. as taking place before the death of Antiochus IV and the rededication of the temple, and it makes no mention of negotiation with the Jews. According to 1 Macc. 6:28-63 a second expedition took place three years later; the letter of 2 Macc. 11 may be confusing the two campaigns. That the date of Titus Manius's letter (2 Macc. 11:38) is exactly the same as that of the preceding letter (v. 33) also makes its reliability suspect. Furthermore, only fifteen days are allowed between the writing of the letter and the final date of the amnesty. According to 1 Macc. 8 it was not until 162 B.C., after the arrival of Demetrius I and Nicanor's defeat, that Judas Maccabeus first communicated with the Romans.

On the other hand, some chronological differences between 1 Maccabees and 2 Maccabees are easily reconciled when it is noted that 1 Maccabees uses the calendar of Judea in the Seleucid era beginning in the autumn of 313 B.C., whereas 2 Maccabees uses that of the Seleucid empire, beginning in the autumn of 312 B.C. (Zeitlin, pp. 57ff.). Differences in the sequence of historical events are more difficult to explain. For an attempt at reconstructing the order of events, see Zeitlin, pp. 65ff.

MANKIND [Heb. *'āḏām* (Isa. 13:12; Jer. 32:20; Zeph. 1:3), *bᵉśar-'îš* (Job 12:10); Gk. *ánthrōpos* (Rev. 9:4, 15, 18, 20; 14:4), *hoí loipoí*–'the others' (Eph. 2:3)]; AV usually MEN, OTHERS (Eph. 2:13); NEB also MEN, HUMAN KIND, THE REST (Eph. 2:3). The human race, including males and females. Heb. *'āḏām* and Gk. *ánthrōpos* both designate "human being" or, collectively, the "human race" (cf. Heb. *'îš* and Gk. *anḗr*, usually "man" as distinguished from "woman"). The RSV, like the AV and most other versions, usually translates *'āḏām* and *ánthrōpos* "man" (in the generic sense); in the above passages, however, it uses "mankind" to emphasize the totality of the human race. In Lev. 18:22; 20:13 the AV renders "mankind" for Heb. *zāḵār*, "a male" (cf. RSV). N. J. O.

MANLIUS man'lē-əs, **TITUS** tī'təs. *See* MANIUS, TITUS.

MANNA man'ə [Heb. *mān* (Ex. 16:31, 33, 35; Nu. 11:6f., 9; Dt. 8:3, 16; Josh. 5:12; Neh. 9:20; Ps. 78:24); Gk. *mánna* (Jn. 6:31, 49; He. 9:4; Rev. 2:17)]. The breadlike food miraculously supplied for Israel during their forty years in the wilderness. Ex. 16:15 explains the etymology of the Hebrew term: When the Israelites saw (the manna), they said to one another, *mān hû'* (RSV, NEB, "What is it?"; AV, incorrectly, "It is manna"), because they did not know "what it was" (*mah-hû'*). Gk. *mánna* was used in Greek literature from the time of Hippocrates (5th cent. B.C.) to denote grains, crumbs, or morsels of food. It was used by the LXX to render Heb. *mān* (except in Ex. 16, where the LXX simply transliterates the Hebrew), possibly because of the similarity in sound.

The word "manna" first appears in Ex. 16. In the second month after their exodus from Egypt, as they were journeying through the wilderness of Sin, the Israelites complained about the lack of food (vv. 1-3). God responded to this complaint by providing quails in the evening (vv. 8, 12f.) and "bread from heaven" in the morning (v. 4; cf. v. 12). In response to the question "What is it?" Moses said: "It is the bread which the Lord has given you to eat" (v. 15). In spite of the people's frequent complaints and general ingratitude, the daily provision of the "bread from heaven" continued for forty years (Ex. 16:35; Josh. 5:12).

This *mān*, as the Israelites named it, appeared on the ground with the morning dew. It is described in Ex. 16:14, 31 and in Nu. 11:7-9. It consisted of small, flake-like particles similar to frost (Ex. 16:14) or coriander seed (v. 31; Nu. 11:7; i.e., about 3-4 mm. or ⅛ in. in diameter) and was white (Ex. 16:31) or pale amber in color. It looked like BDELLIUM (Nu. 11:7), and its taste was like honey-wafers (Ex. 16:31) or "like cakes baked with oil" (Nu. 11:8; NEB "butter-cakes").

Manna could be ground into flour in mills or mortars (Nu. 11:8) and baked into cakes or boiled into a sort of porridge (Ex. 16:23). It probably could also be eaten raw.

Ever since ancient times many attempts have been made to identify the OT manna with some natural edible substance found in the Sinai desert. Josephus, e.g., claimed that "to this very day all that region is watered by a rain like to that which then, as a favour to Moses, the Deity sent down for men's sustenance" (*Ant.* iii.1.6 [33]). One common theory postulates some sort of lichen or fungus, but there is little evidence for any such identification. The most widely held theory, which has received support from scientific investigations, links manna with a secretion of the tamarisk tree (*Tamarix gallica*) that forms small, yellowish-white balls that are very sweet. The substance melts in the heat of the sun. F. S. Bodenheimer has argued that these are actually excretions of insects that penetrate the tender bark of the twigs, rather than a product of the tree itself. In either case, this phenomenon normally occurs for only a few weeks beginning in June. The OT reports that the manna began "on the fifteenth day of the second month" (Ex. 16:1) — i.e., no later than early May — and continued for forty years on a regular six-day cycle; this demands a more-than-natural explanation. One possible explanation is that the Israelites, familiar with

this natural "manna," were surprised at seeing something so similar in appearance in such quantity and so early in the season. They may have simply carried the name over to their new food.

Every Israelite man was instructed to gather each morning "as much as he can eat . . . an omer [about 2.2 liters, or slightly more than 2 dry quarts] apiece, according to the number of persons whom each . . . has in his tent" (Ex. 16:16). The manna could not be kept for more than one day or it would spoil and breed maggots (vv. 19f.). On the sixth day, however, a double portion was collected, and the unused portion was kept, unspoiled, for the sabbath (vv. 22-30). This miraculous provision continued until the entrance into Canaan at Gilgal (Josh. 5:12).

While the Exodus account emphasizes the relationship between the provision of manna and the sabbath, and the Numbers account the appearance and preparation of the manna, the other OT references focus on manna as a sign of God's continuing provision for the needs of His people. An omer of manna was later placed in a jar and kept in the tabernacle as a physical reminder of that provision (Ex. 16:33f.; cf. He. 9:4). The leaders of the community also reminded the people of that provision. Moses spoke of the pedagogical purpose of manna: it was to remind the people of their total dependence on God. "And he . . . fed you with manna . . . that he might make you know that man does not live by bread alone, but . . . by everything that proceeds out of the mouth of the Lord" (Dt. 8:3, 16; cf. Mt. 4:4; Lk. 4:4). Ps. 105:40 praises God for supplying His people with "bread from heaven in abundance."

Psalm 78 refers to manna in the context of God's judgment upon the Israelites (vv. 17-31; cf. Nu. 11); the psalmist sharply contrasts the people's ingratitude and rebelliousness with God's faithful provision of the "grain of heaven" (Heb. *dᵉgan šᵉmayim*, v. 24). In v. 25 most versions and biblical scholars render Heb. *leḥem 'abbîrîm* "bread of the angels," following the LXX (Gk. *ártos angélōn*; see, e.g., RSV, NEB; cf. Wisd. 16:20; see *TDOT*, I, *s.v.* "'ābhîr, 'abbîr" [A. Baumann]). But since there is no other instance in the OT where *'abbîrîm* means "angels," a better translation might be "bread of the mighty" (so AV); the plural form might represent a poetic plural for God (i.e., "the mighty One"), giving the translation "bread from God."

In his public confession, Ezra linked God's provision of the manna with the giving of His Spirit to instruct the people (Neh. 9:20). This reflects the sequence of events in Nu. 11, where the manna episode precedes the giving of the Spirit to the seventy elders (cf. 11:16f., 24f.).

The motif of manna played an important role in later Jewish literature. Philo, e.g., interpreted the OT references to manna as a type of the divine *lógos* (*Legum allegoria* iii.56-61 [162-176]). Apocalyptic and haggadic literature (written texts all date from post-NT times) provide evidence of a popular expectation that in the time of the messianic kingdom God would again provide manna for the faithful (e.g., 2 Bar. 29:8; Sib. Or. Fragment 3:46-49; for rabbinic literature, see SB, II, 479-484; *TDNT*, IV, 463f.; Brown, pp. 265f.). The "latter redeemer" would "cause manna to descend" in the same way that Moses, the "first redeemer," had caused bread to rain from heaven (Midr. *Eccl. Rabbah* i.9).

Although the later date of these written documents makes it difficult to be certain about how important a place the manna motif had in the oral tradition of NT times, haggadic traditions do appear to lie behind the references to "manna" and "bread from heaven" in Jn. 6 (see Borgen; Childs, pp. 293-297). The Jews' response to the "sign" of Jesus' multiplication of the loaves was to see Him as the expected Prophet like Moses (v. 14; cf. Dt. 8:15f.; see Brown, pp. 234, 265). In this light, it is strange that on the next day the Jews demanded that Jesus give them a sign such as Moses' giving of the manna (vv. 30f., which includes a conflation of Ex. 16:4, 15; Ps. 78:24; Wisd. 16:20). Some commentators (e.g., L. Morris, *Gospel According to John* [*NICNT*, 1971], pp. 362f.) have suggested that they were demanding a greater sign, e.g., manna that could supply the whole nation with food for forty years (cf. v. 34). In any case, Jesus responded that He Himself was the true "bread from heaven" (vv. 32-51), for in contrast to the wilderness manna, the "living bread which came down from heaven" confers eternal life to all who eat of it (vv. 47-51). Thus, using the symbolism of bread for the divine *lógos* (cf. Philo), Jesus identified Himself as the incarnation of the divine wisdom and revelation (see Brown).

Manna is also referred to in He. 9:4. Based on a scribal deduction from Ex. 16:33f. (cf. T.B. *Yoma* 3, 7; see *TDNT*, IV, 464, 466), the "golden urn holding the manna" was included in the ark of the covenant along with the tables of the law (cf. 1 K. 8:9 par. 2 Ch. 5:10, which states that the ark contained nothing but the two tables of stone). This idea may also underlie the statement in Rev. 2:17 that "to him who conquers I will give some of the hidden manna." According to Jewish tradition the ark and its contents were hidden by Jeremiah in a cave of Mt. Nebo (2 Macc. 2:4-7). This passage probably also reflects the tradition that the manna will appear again in the messianic kingdom (see above).

MANNER [Heb. *'ōraḥ*] (Gen. 18:11); NEB AGE; [*dereḵ*] (Gen. 19:31; Ezk. 20:30; Am. 4:10); NEB WAY, LIKE; [*kāḵâ*] (Ex. 12:11; Jer. 27:12); AV "thus," "according to"; NEB WAY; [*dāḇār*] (Dt. 15:2; Neh. 6:4); NEB "how"; [*mišpāṭ*] (Josh. 6:15; Jgs. 13:12; 18:7; 2 K. 17:33f., 40); AV ORDER; NEB WAY, FORM, CUSTOM, PRACTICES, etc.; [*zan*] (Ps. 144:13); [*kāzō't*] ("after this manner," 1 K. 7:37); NEB "this is how"; [Gk. *homoíōs*] (Mk. 4:16; Lk. 16:25; Jude 8); AV "likewise"; NEB "same," "so too"; [*akríbeia*] ("strict manner," Acts 22:3); AV PERFECT; NEB "in every point"; [*bíōsis*] ("manner of life," Acts 26:4); NEB LIFE; [*pás*] ("all manner," Rom. 1:29); AV "all"; NEB KIND; [*anáviōs*] ("manner of life," Eph. 4:22); AV CONVERSATION; NEB WAY OF LIFE; [*politeúomai*] ("manner of life," Phil. 1:27); AV CONVERSATION; NEB CONDUCT. In Ruth 4:7 the AV and RSV supply "manner" and the NEB "custom," following the LXX, Syriac, and Targum, which apparently read *mišpāṭ*, a term not occurring in the MT of this passage.

"Manner" in the OT is generally equivalent to "way," "custom," "habit," etc. Sometimes it refers to the habit or mode of life of a people, e.g., the Sidonians (Jgs. 18:7), the pagan foreigners who inhabited Samaria after the fall of Israel (2 K. 17:33f., 40; cf. Ezk. 20:30), or the Israelites, who customarily confirmed a transaction by removing a sandal and giving it to the other party (Ruth 4:7). In Gen. 18:11 "after the manner of women" denotes menstruation (cf. 31:35); thus Sarah was past the age of child-bearing (cf. NEB). When Lot's daughter feared that "there is not a man on earth to come to us after the manner of all the earth" (19:31), she meant that no men would marry them and produce offspring.

The term sometimes expresses a particular way of doing something, e.g., eating the Passover (Ex. 12:11), releasing

debtors from their debts (Dt. 15:2), marching around the walls of Jericho (Josh. 6:15), or making the stands of bronze for Solomon's temple (1 K. 7:37). Heb. *mišpāṭ* is the word for the "orderly government or training" (Gray, p. 345) or "manner of life" that Samson was to receive as a Nazirite (Jgs. 13:12). "Manner" refers to a way of speaking in Nehemiah's four-time refusal to stop work on the temple (Neh. 6:4) and in Jeremiah's speech to King Zedekiah (Jer. 27:12). The *derek* of Am. 4:10 describes the coming pestilence as "after the manner of Egypt" but does not specify the similarities (see W. R. Harper, *Amos and Hosea* [*ICC*, 1905], p. 100).

Zan means "kind" rather than "way." It is thought to be a Persian loan word, literally meaning "from kind to kind" (Anderson, p. 935). It expresses the "every kind" of earthly blessing gleaned from the rich harvest in Ps. 144:13 (cf. Ps. 72:16).

The NT renders a number of Greek terms "manner." The adverb *homoíōs*, meaning "likewise," "so," or "in the same way," is found in the parable of the Sower (Mk. 4:16), in the description of the rich man and Lazarus (Lk. 16:23), and in a warning against false teachers (Jude 8). Paul's training "in the manner of the law of our fathers" (Acts 22:3) means "according to careful observance of the law given to the fathers" (Haenchen, p. 625), i.e., with exact strictness (Bauer, rev., p. 33). His phrase "my manner [way] of life" (*bíōsis*, Acts 26:4) similarly implies that he grew up as a strict Jew.

Paul affirmed that one's old nature which belongs to a former "manner of life" is to be put off like a change of clothes (Eph. 4:22). He used *politeúomai* in his injunction, "Let your manner of life be worthy of the gospel of Christ" (Phil. 1:27). This term signifies "conduct relative to some law of life — political, moral, social, or religious" (Brewer, p. 80). Paul chose it to instruct the people about their public duties both as citizens under the Roman empire and as members of the community of Philippi. They had to reject all patriotic pressures to give to the state more than its due, however; their conduct had to be "worthy of the gospel of Christ," who is lord over the state.

In Rom. 1:29 Paul used "manner" (RSV) in the sense of "everything belonging to a certain class" — in this case the vices of the pagans (see Bauer, rev., p. 631). A textual variant in Lk. 9:55 is similarly rendered, "You do not know what manner of spirit you are of."

MANOAH mə-nō'ə [Heb. *mānô(a)ḥ*–'rest,' 'resting place']. A member of the tribe of Dan and a resident of Zorah, 23 km. (14 mi.) W of Jerusalem across the valley from Beth-shemesh. Manoah was the father of Samson. His unnamed wife, like Sarah (Gen. 15–16) and Elizabeth (Lk. 1), was barren (Jgs. 13:2). An angel of the Lord revealed to her that she would conceive and bear a child; he would be a Nazirite who would deliver Israel from the Philistines (vv. 3-5). Manoah's piety is shown by his praying for the angel to return and instruct his wife in the proper care of the coming child (v. 8). The request was granted (vv. 9-13). The angel rejected Manoah's hospitality and instead commanded a sacrifice to Yahweh. When Manoah placed the sacrifice on the altar, the angel disappeared in the flame (vv. 15-21). In due time the child was born and named Samson. The parents accompanied Samson when he asked for the hand of the Philistine woman of Timnah in marriage; they also attended the wedding. When Samson died, his brothers brought his body from Gaza to bury beside Manoah in the family tomb near Zorah (16:31).

D. W. DEERE

MANSERVANT [Heb. *'eḇeḏ*] (Ex. 20:10, 17; Dt. 5:14, 21; 12:18; 16:11, 14; Job 31:13); NEB SLAVE, MALE SLAVE. A male slave; usually coupled with "maidservant." *See* SERVANT; SLAVE.

MANSION. A term used by the AV in the archaic sense of "dwelling, abode," to render Gk. *monḗ* (Jn. 14:2; RSV "room"; NEB "dwelling-place"). A cognate of the verb *ménō* ("remain, abide"; cf. 15:4-10), *monḗ* expresses the permanence of the believer's dwelling in the Father's house after death. In 14:23 *monḗ* is used similarly to describe Jesus' and the Father's dwelling in the believer (AV "abode"; RSV "home"; NEB "dwelling").

Bibliography.–R. E. Brown, *Gospel According to John XIII–XXI* (*AB*, 1970), pp. 618f., 625-27; *TDNT*, IV, *s.v.* μένω κτλ.: μονή (F. Hauck). N. J. O.

MANSLAYER [Heb. *rōṣē(a)ḥ* (Nu. 35:6, 11, etc.), *hammakkeh* (Nu. 35:24)]; AV also SLAYER; NEB also HOMICIDE, STRIKER; [Gk. *androphónos* (1 Tim. 1:9)]; NEB MURDERERS.

Of the eighteen occurrences of Heb. *rōṣē(a)ḥ* in Nu. 35, the RSV translates seven as "manslayer" (vv. 6, 11f., 25-28) and eleven as "murderer" (vv. 16-19, 21, 30f.). "Manslayer" distinguishes one who accidentally commits homicide (v. 11) from one who premeditatedly murders and is thus "guilty of death" (vv. 20, 31). The NEB makes a similar distinction here by using the terms homicide and murderer (cf. the AV "slayer," "manslayer," and "murderer").

Numbers 35:11 provides for cities of refuge, to which "the manslayer who kills any person without intent" (Heb. *rōṣē[a]ḥ makkēh-neṗeš bišᵉgāgâ*) could flee. In these cities the manslayer was legally protected from the avenger of blood, so that he "may not die until he stands before the congregation for judgment" (v. 12). In cases of killing without enmity (vv. 22-24) the congregation (Heb. *hāʿēḏâ*) had as its responsibility to "judge between the manslayer [Heb. *hammakkeh*] and the avenger of blood [Heb. *gōʾēl haddām*] in accordance with these ordinances" (v. 24) and to "rescue the manslayer from the hand of the avenger of blood" (v. 25). When the manslayer was restored to his city of refuge after his trial, he had to be content to remain within its bounds; if he ventured beyond them, the avenger of blood had the right to kill him (vv. 25-27). After the death of the incumbent high priest the accidental homicide could return to his original landholdings (v. 28).

The RSV also translates Heb. *rōṣē(a)ḥ* "manslayer" in Josh. 20:3 and in Dt. 4:42; 19:3f., 6 (cf. AV "slayer," NEB "homicide"). Each passage designates cities of refuge (in Dt. 4:42, Bezer, Ramoth-gilead, and Golan, chosen by Moses) for the manslayer (Heb. *rōṣē[a]ḥ*) "who kills [Heb. *yirṣaḥ*] his neighbor unintentionally [Heb. *biḇlî-ḏaʿaṯ*], without being at enmity with him in time past" (4:42; 19:4). One city was located in each third of the land (19:3), so that the manslayer who kills without enmity (e.g., one whose loose axe-head slays another, v. 5) would not be overtaken by the avenger because the distance to refuge was excessive (v. 6).

Greek *androphónos*, "murderer," appears only once in the NT, in the plural in 1 Tim. 1:9. The RSV translates "manslayers" (cf. NEB "murderers"). This rare Greek term also appears in 2 Macc. 9:28, applied to Antiochus IV Epiphanes, the Seleucid monarch. *See also* MURDER; KILL; CITIES OF REFUGE. D. G. BURKE

MANSTEALING. *See* CRIME, *s.v.* "Kidnapping."

MANTELET mant'lət [Heb. *sōḵēḵ*] (Nah. 2:5 [MT 6]); AV DEFENCE. A portable protective shelter used by besiegers when attacking a city. Because it appears only once in the MT, the precise meaning of *sōḵēḵ* is uncertain. "Mantelet" does, however, seem to be the best translation for this piece of protective equipment used by the attackers of Nineveh, assuming that it is a cognate of *sāḵaḵ*, "block an advance," "cover," "protect"; cf. LXX *prophylakē*, "advanced guard." *See* SIEGE.

MANTLE [Heb. *'addereṯ*] (Gen. 25:25; Josh. 7:21, 24; 1 K. 19:13, 19; 2 K. 2:8, 13f.; Zec. 13:4); AV also GARMENT; NEB also CLOAK; [*śimlâ, śalmâ*] (Ex. 12:34; 22:27; Isa. 3:6f.); AV RAIMENT, CLOTHING, CLOTHES; NEB CLOAK; [*miṭpaḥaṭ*] (Ruth 3:15); AV VAIL; NEB CLOAK; [*mᵉʿîl*] (Ezr. 9:3, 5; Ps. 109:29; Isa. 59:17); AV, NEB, also CLOAK; [*taḵrîḵ*] (Est. 8:15); AV GARMENT; NEB CLOAK; [*rᵉḏîḏ*] (Cant. 5:7); AV VEIL; NEB CLOAK; [*maʿᵃṭeh*] (Isa. 61:3); AV, NEB, GARMENT; [*maʿᵃṭāpâ*] (Isa. 3:22); [Aram. *sarbāl*] (Dnl. 3:21, 27); AV COATS; NEB TROUSERS; [Gk. *himátion*] (Mt. 24:18; Mk. 10:50; 13:16; Lk. 22:36; Acts 12:8); AV CLOTHES, GARMENT; NEB COAT, CLOAK; [*chitṓn*] (Mk. 14:63); AV CLOTHES; NEB ROBES; [*peribólaion*] (He. 1:12); AV VESTURE; NEB CLOAK.

"Mantle" in the RSV designates several types of clothing. The *'addereṯ* was a cloak that could be made of animal hair (Gen. 25:25), could be quite beautiful and costly (Josh. 7:21, 24), and could be worn by prophets like Elijah (1 K. 19:13, 19; etc.). The common *śimlâ* was used not only as a basic outer garment but also as a blanket (Ex. 22:27) and cloth basket (12:34). Other cloaks or robes included the *taḵrîḵ*, the *mᵉʿîl* (used figuratively in Ps. 109:29; Isa. 59:17), the *maʿᵃṭeh* (cf. "the mantle of praise" in Isa. 61:3), and the *maʿᵃṭāpâ*. Ruth carried her barley in her *miṭpaḥaṭ*, a wrapper, mantle, or headcloth for women. The *rᵉḏîḏ* (Cant. 5:7) could have been some kind of wide wrapper, veil, or stole; in its other occurrence in the OT (Isa. 3:23), the RSV translates it as "veils" (AV "vails"; NEB "flowing veils"). What precisely the *sarbāl* was remains quite uncertain. Suggestions include trousers, cloak, or shoes. According to K. Kitchen ("The Aramaic of Daniel," in D. J. Wiseman, *et al., Notes on Some Problems in the Book of Daniel* [1965], p. 35 n. 24), the common designation of *sarbāl* as a loanword from Persian is unlikely.

The *himátion* was an outer robe and the *chitṓn* an undertunic, although a more general meaning for *chitṓn* may be preferable in Mk. 14:63, particularly since the plural is used. The *peribólaion*, used in a figure of speech in He. 1:12, was some sort of wrap.

See also CLOAK; COAT; GARMENTS; ROBE.

M. W. MEYER

MANUSCRIPT. In the broadest sense, any handwritten document. In a narrower sense a MS is a handwritten codex, roll, or folded document, as distinguished from a printed book or an inscription. The Hebrew and Greek MSS of the OT and NT, respectively, are the primary sources used in the attempt to determine the text or original words of the authors. MSS play the same part in the attempt to determine the original text of subordinate sources such as versions, writings of the church fathers, and quotations from other ancient writers who referred to biblical matters.

See TEXT AND MSS OF THE OT; TEXT AND MSS OF THE NT; VERSIONS; WRITING.

MANUSCRIPTS OF THE OT. *See* TEXT AND MSS OF THE OT.

MANUSCRIPTS OF THE NT. *See* TEXT AND MSS OF THE NT.

MANY WATERS [Heb. *mayim rabbîm*] (Nu. 24:7; 2 S. 22:17; Ps. 18:16 [MT 17]; 29:3; 93:4; 107:23; 144:7; Cant. 8:7; Isa. 17:13; 23:2; Jer. 51:13, 55; Ezk. 1:24; 32:13; 43:2; Hab. 3:15); AV also GREAT WATERS; NEB also GREAT WATERS, MIGHTY WATERS, GREAT TORRENT, MIGHTY TORRENT; [Gk. *hydáta pollá*] (Rev. 1:15; 14:2; 19:6); NEB RUSHING WATER. The imagery of many waters is used in a variety of contexts. It can refer to the fruitful blessing of God on Israel (Nu. 24:7) or to the enemy from whom the psalmist is rescued (2 S. 22:17f. par. Ps. 18:16f.). It may describe marine trading routes (Isa. 23:2; "great waters," Ps. 107:23) or the location of the capital of an empire (Jer. 51:13, 55). Ezk. 1:24; 43:2 associate the sound of many waters with the vision of the glory of Yahweh, and Rev. 1:15 compares it with the voice of the glorified Christ.

Because of the Ugaritic myth in which Baal contends with the sea, cosmic overtones have been discerned in at least some of the occurrences of *mayim rabbîm* (see H. G. May, *JBL*, 74 [1955], 9-21). Yahweh's victory over Pharaoh's army at the Sea of Reeds is pictured as a defeat of Rahab the chaos monster (Isa. 51:9f.). Although *mayim rabbîm* is not explicitly mentioned in Isa. 51, the parallel in Hab. 3:13-15 does include the term. Ps. 89:9f., moreover, understands the defeat of Rahab and the stilling of the waters as the scattering of Yahweh's enemies, a prominent motif in the Song of Moses in Ex. 15. However, Ex. 15 describes Yahweh as using the might of the waters as His weapon in destroying just such enemies. The cosmic metaphor, then, is biblically relevant but is not to be seen in all occurrences of *mayim rabbîm*.

G. WYPER

MAOCH mā'ok [Heb. *māʿôḵ*]. King of Gath; father of Achish, with whom David and his men took refuge while fleeing from Saul (1 S. 27:2). He is probably the same as MAACAH 3.

MAON mā'on [Heb. *māʿôn*–'abode,' 'dwelling']. The son of Shammai, of the family of Caleb and tribe of Judah. He was the "father" (ancestor) of the inhabitants of the city of BETH-ZUR (1 Ch. 2:45), a fortress city important in Maccabean times.

MAON mā'on [Heb. *māʿôn*–'abode,' 'dwelling']. An important town (modern Tell Maʿîn) named along with Carmel and Ziph (Josh. 15:55), situated upon a high isolated hilltop in southern Judah W of the Dead Sea. It was about 11 km. (7 mi.) S of Hebron, where David and his men hid from Saul (1 S. 23:24f.). An urgent message about a Philistine raid relieved David of the pressure of Saul's pursuit and allowed him to flee south into the Wilderness of Ziph.

It was also the home of NABAL, a churlish property owner and great flock master. He denied to David and his outlaw band the customary felicitations accorded men who "protect" one's property (1 S. 25:2). The hasty but wise counsel of Nabal's wife Abigail averted David's plan to kill the family of Nabal. After hearing of these events, at a feast, Nabal was fatally stricken. David married the widowed Abigail and they had one son, Chileab.

F. E. YOUNG

MAONITES. *See* MEUNIM 1.

MAR [Heb. hiphil of *šāḥaṭ*–'destroy, disfigure'] (Lev. 19:27); NEB SHAVE; **MARRED** [*mišḥāṭ*–'destruction, disfigurement'] (Isa. 52:14); NEB DISFIGURED (transposed to 53:2). The Torah forbade the Israelites to engage in pagan Semitic rites that included cutting HAIR (II, IV) from the head or BEARD (Lev. 19:27; cf. 21:5; Dt. 14:1). Nevertheless, this custom apparently persisted in Israel as a sign of mourning throughout OT times (cf. Job 1:20; Isa. 22:12; Jer. 16:6; etc.; *see also* BALDNESS). The same verb form is rendered "mar" by the AV in Ruth 4:6 (RSV "impair"); 1 S. 6:5 (RSV "ravage"); Jer. 13:9 (RSV "spoil"); cf. the piel in Nah. 2:2 (MT 3; RSV "ruin").

Isaiah describes the Suffering Servant as being so disfigured by his suffering that he no longer looks like a man (52:14). Because of its apparent connection with 53:2f., many commentators have transposed this verse to the end of 53:2 (cf. NEB). N. J. O.

MARA mā'rə [Heb. *mārā'*–'bitter']. A name NAOMI applied to herself on her return from Moab to her native country. The name Bitter seemed more appropriate than Naomi ("pleasant"), "for the Almighty has dealt very bitterly with me" (Ruth 1:20).

MARAH mar'ə, mar'a, mā'rə [Heb. *mārâ*, 'bitter']. The first stopping-place of the Israelites after they crossed the Red Sea (Ex. 15:23). It was reached by a three-day journey into the Wilderness of Shur (v. 22; "the Wilderness of Etham," Nu. 33:8). The Israelites, thirsty from the journey, complained because they could not drink the bitter water; at the Lord's direction Moses threw a tree into the water "and the water became sweet" (Ex. 15:25). Some scholars have regarded the account as an etiological explanation of the name. One suggested site is 'Ain Hawâra, about 11 km. (7 mi.) E of the Red Sea (*GAB*, p. 156).

W. S. L. S.

MARALAH mar'ə-lə [Heb. *mar'ᵃlâ*; Gk. B *Maragella*, A *Marila*]. A place on the western border of Zebulun (Josh. 19:11), possibly in the plain of the Kishon, modern Tell Ghalta. The RSV reads MAREAL, taking the ending as *hê* directive, as is the case on the preceding word, but neither the MT pointing nor the versions support this reading. Moreover, if Abel's suggestion that Heb. *'ayin* was an original *ghain* is followed (Gk. *Maragella* also suggests this) and if *Ghalta* is accepted as the modern form, the *t* seems to require an original *t* (> *h* in Hebrew).

W. S. L. S.

MARANATHA mar-ənath'ə [Gk. *maranathá* < Aram. *māranā' ṯā'* or *māran ʾᵉṯā'*–'Our Lord, come!' or *māran ʾᵃṯā'*–'Our Lord has come']. An ancient Palestinian Aramaic expression recorded in transliterated Aramaic in 1 Cor. 16:22 and in Greek translation (*érchou, kýrie Iēsou*) in Rev. 22:20. Scholars differ on (1) whether to divide the transliterated Aramaic as *māran ʾᵃṯā'* or *māranā' ṯā'*, (2) whether "Our Lord" could have been either *māran* or *māranā'* (in Aramaic), and (3) whether "come" could have been *ʾᵃṯā'* or *tā'*. The problem is complex.

If the word is divided as *māran ʾᵃṯā'* (see AV "Maranatha"), it is best understood as a perfect indicative assertion meaning "Our Lord has come." If it is divided as *māranā' ṯā'*, it is best interpreted as an imperatival prayer, "Our Lord, come!" (so RSV; cf. NEB "Marana tha — Come O Lord"). Understood as an indicative, *māran ʾᵃṯā'* can refer to either Christ's incarnational presence in the historical past or His spiritual presence in the Eucharist. If the imperatival *māranā' ṯā'* is correct, however, it is a plea either for Christ's parousia or for His presence at the Eucharistic celebration.

As Fitzmyer and others have shown, the underlying Aramaic was probably an imperatival *māranā' ṯā'*, "Our Lord, come!" This interpretation is supported by the unambiguous translation of *maranathá* in Rev. 22:20 as a Greek imperative. Furthermore, Conzelmann argued that 1 Cor. 11:26 ("until he comes") is probably an allusion to the (*maranathá*) formula and so confirms an imperatival-eschatological interpretation of 1 Cor. 16:22.

The sudden occurrence of such an untranslated Aramaic expression in Paul's letter to the Greek-speaking church at Corinth suggests a widely accepted liturgical use of this phrase (much like "Amen" and "Hosanna"). This use would have originated among the Jewish Christians in Jerusalem. Thus, "Lord" should be interpreted in terms of a Jewish understanding of Yahweh rather than a Hellenistic conception of the gods of the mystery religions. The presence of *maranathá* in Did. 10:6 (*ca.* A.D. 100) — at the end of a discussion on the Eucharist — is further evidence that it had acquired quasi-official liturgical status in early Christian worship.

But as Moule has rightly shown, 1 Cor. 16:22 has no "eucharistic context." The verse is not a plea for Christ to be present at the Lord's Supper but a plea for the parousia of Christ in judgment on those who do not love the Lord. The context is one of cursing and judgment. Let those who have no love for the Lord be *anáthema*, Paul said (1 Cor. 16:22a), then added, *maranathá* — "Our Lord, come!" (1 Cor. 16:22b). *Maranathá* reinforces the *anáthema* formula without itself being limited to use in curses. *See* ANATHEMA. Similarly, "Come, Lord Jesus!" in Rev. 22:20 seems to be a plea for the parousia of Christ in judgment.

Because it is early, widespread, liturgical, and Palestinian, *maranathá* reflects the early Church's high Christology: Jesus is Lord. As such, He is worthy to receive the worship and praise once reserved exclusively for Yahweh. And as Lord, He will return in judgment.

MARAUDER; MARAUDING BAND [Heb. *gᵉḏûḏ*] (1 K. 11:24; 2 K. 13:21; Jer. 18:22); AV TROOP, BAND; NEB RAIDERS, FREEBOOTERS. The Hebrew term may refer to a band of men in pursuit of plunder, though the contexts of 1 K. 11:24 and Jer. 18:22 point instead to another possible meaning, "troop, army."

—

MARBLE mär'bəl [Heb. *šayiš* (1 Ch. 29:2), *šēš* (Est. 1:6); Gk. *mármaros*–'brilliant,' 'sparkling' (Rev. 18:12)]; NEB also ALABASTER. Petrologically, marble is limestone or dolostone that has metamorphosed to form a recrystallized mosaic of calcite or dolomite grains. Crystal size and coloration vary from quarry to quarry and even within a given rock mass. Small amounts of iron, manganese, carbon, and silicates introduce color patterns in the material, which is sometimes quarried for effects. Aegean and North African sources are especially known for colorful varieties. The soft brilliance of white marble, chosen for sculpture and architecture (from Paros, Pentelicus, and Carrara), occurs as a result of the internal reflectivity of the mineral's rhombohedral cleavage planes and crystal faces. Historically, the term marble seems also to have included carbonate rocks of the Levant capable of taking a polish, such as that used for the Solomonic and Herodian temples (cf. Josephus *Ant.* viii.3.2 [64], white stones, quarried

in Lebanon; also, the golden and pink Judean limestone formation was quarried by Herod's workmen for the temple closure walls). Known and valued sources for marble in the biblical world were the Aegean islands with the Greek and the Anatolian (Carian and Phrygian) mainlands, Apuan Alpine (Carrara), North African (e.g., Chemtou), and Persian quarries. Est. 1:6 describes the palace of Xerxes (Ahasuerus) at Susa (Shushan) as having pillars of marble (cf. Cant. 5:15) and a patterned flooring, *opus sectile*, of white marble, oriental alabaster, and lithics of other colors.

In Rev. 18:12 marble is part of Babylon's cargo that no one buys any more. R. G. BULLARD

MARDUK mär'dōōk; **MERODACH** mer'ə-dak [Heb. *mᵉrôḏāḵ*] (Jer. 50:2). Chief god of the Babylonian pantheon, whose name in Sumerograms is ^{d}AMAR.UTU, "calf of the sun," but is attested syllabically as ^{d}*Ma-ru-du-uk-ku* (A. Deimel, *Šumerisches Lexikon*, II [1928-1933], 841). Upon the political ascendancy of Hammurabi of Babylon (*ca.* 1750 B.C.), Marduk the god of Babylon became supreme among the older Sumerian gods as creator and ruler — a position formerly enjoyed by Enlil but affirmed for Marduk in the Code of Hammurabi (*ANET*, pp. 163-180) and the Creation Epic (*ANET*, pp. 60-72) and retained until the end of indigenous Mesopotamian religion (*ca.* A.D. 100-200). Jeremiah prophesied that Marduk, also called *Bêl*, "lord," would be put to shame (Jer. 50:2).

The divine name Marduk can be seen in the royal names Merodach-baladan (2 K. 20:12 par. Isa. 39:1; cf. Akk. *Marduk-apal-iddin*, "Marduk has given a son") and Evil-merodach (2 K. 25:27 par. Jer. 52:31; cf. Akk. *amel-Marduk*, "man of Marduk"), and possibly in the name Mordecai. *See* RELIGIONS OF THE BIBLICAL WORLD: ASSYRIA AND BABYLONIA.

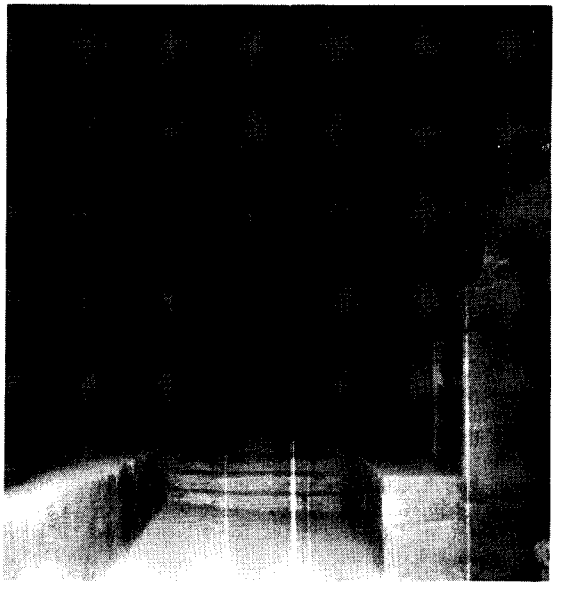
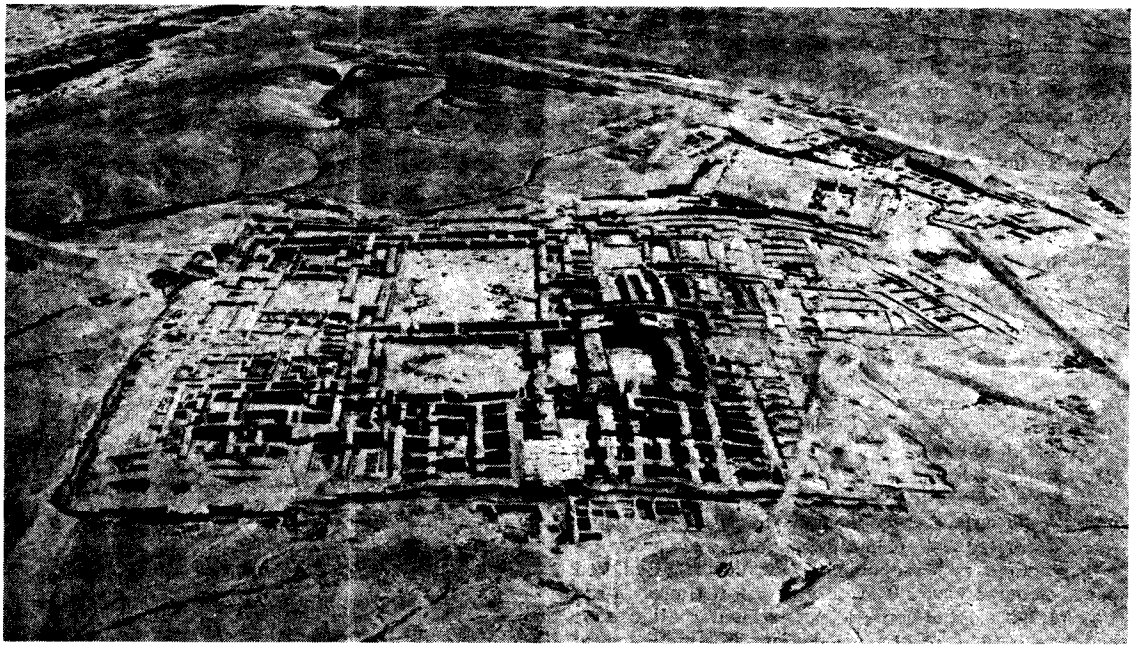
MAREAL mā're-əl [Heb. *mar'ᵉālāh*; Gk. B *Maragella*, A *Marila*]. A place on the western border of Zebulun (Josh. 19:11). The RSV Mareal appears to be derived from a misreading of the final *hê* as *nê* directive. *See* MARALAH.

W. S. L. S.

MARESHAH mə-rē'shə [Heb. *mārēšâ*, *mêšā'* (1 Ch. 2:42a)]; AV, NEB, RSV mg., also MESHA (2:42a).



1. The first son of Caleb; the father of Ziph and Hebron (1 Ch. 2:42). The AV and NEB follow the MT, in which Caleb's son is first called *mêša'* (v. 42a) and later *mārēšâ* (v. 42b). The RSV follows the LXX, which has *Marisa* in both places.



2. A Judahite, son of Laadah (1 Ch. 4:21).

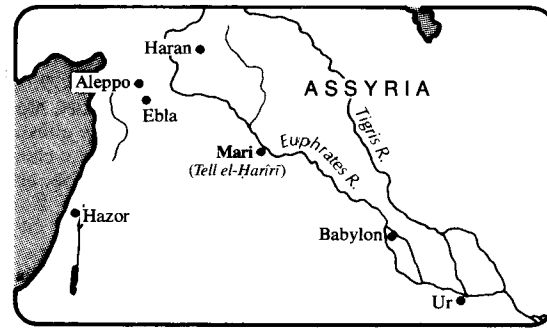
MARESHAH mä-rē'shə [Heb. *mārēšâ*; Gk. *Marēsa*]; Apoc. **MARISA** [Gk. *Marisa*]; AV, RV, also "Samaria" (1 Macc. 5:66). A Palestinian town in the Shephelah. It is represented today by Tell Sandaḥannah, which also is the site of Hellenistic Marisa, 1.6 km. (1 mi.) S of Beit Jibrin (Eleutheropolis). F. J. Bliss excavated the site in 1900; in 1902 interesting painted tombs were discovered.

Interior of a tomb at Mareshah (Israel Department of Antiquities and Museums)

Aerial view of the excavations at Mari (Institut Francais d'Archéologie du Proche-Orient, Beirut)

Mareshah first appears in the Bible in Josh. 15:44, in a grouping of nine cities of Judah. It was one of the cities fortified by Rehoboam after the division of the kingdom (2 Ch. 11:8). Asa's troops decisively defeated an army of Ethiopians in a battle that began in the Valley of Zephathah near Mareshah (14:9-14). Eliezer the son of Dodavahu of Mareshah prophesied against King Jehoshaphat for joining Ahaziah of Israel in a shipping enterprise (20:37). In prophecies of Micah concerning an Assyrian invasion Mareshah is mentioned with Achzib and Moresheth-gath (Mic. 1:14f.).

In Hellenistic times Marisa was a leading town of the Idumeans and figured often in the wars of the Maccabees. Judas Maccabeus captured and burned Marisa after defeating the Idumeans and before conquering Philistia (Josephus *Ant.* xii.8.6 [353]; 1 Macc. 5:66). In a battle between Jonathan's forces and the Idumeans, Gorgias the governor of Idumea was nearly taken captive, but a Thracian horseman rescued him, and he escaped to Marisa. His army was routed (2 Macc. 12:35). After the death of Antiochus Epiphanes, John Hyrcanus captured Marisa but allowed the Idumeans to remain there after they agreed to be circumcised and observe the Jewish law (*Ant.* xiii.9.1 [257]). John Hyrcanus completely destroyed Samaria because of injuries the people of that city had done to Marisa, "a colony of the Jews and confederate with them" (*Ant.* xiii.10.2 [275]). The Jews possessed Marisa in the time of Alexander Janneus (*Ant.* xiii.15.4 [396]).



In 63 B.C. the Romans under Pompey restored Marisa to its people and gave it independence (*Ant.* xiv.4.4 [75]). The actual rebuilding of the city is attributed to Gabinius (*Ant.* xiv.5.3 [88]). Antigonus secured Parthian aid against Herod, who made Marisa a stronghold; the Parthians destroyed the city in 40 B.C. (*Ant.* xiv.13.9 [364]).

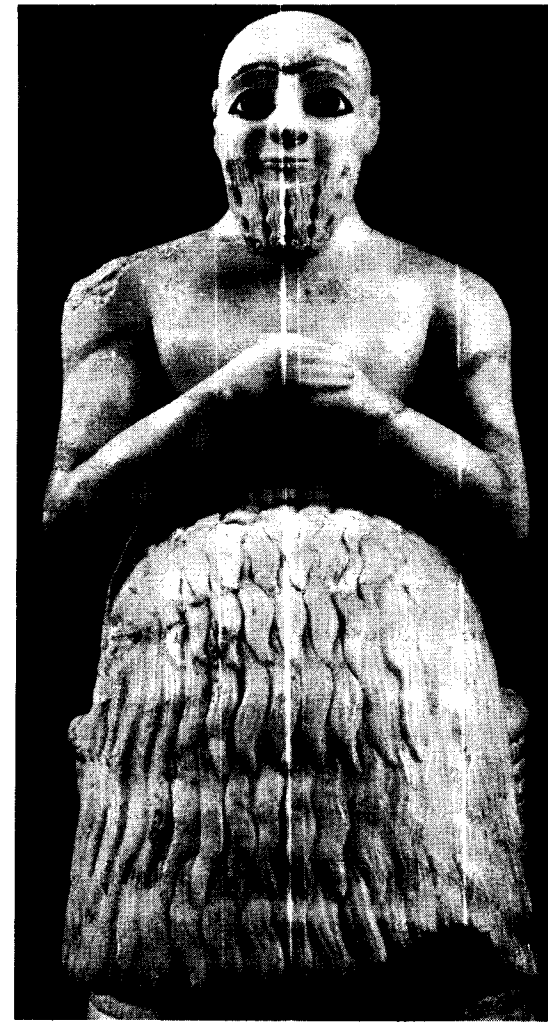
C. E. DE VRIES

MARI mā'rē. An ancient city in eastern Syria, identified with modern Tell el-Ḥarîrī near the west bank of the Euphrates River, about 25 km. (15 mi.) from the border

of Iraq. Mari is not mentioned in the Bible, but heightened recognition of the importance of Syria since the discoveries at Tell Mardikh (Ebla) enhances the significance of information from Mari about West Semitic civilization and the pastoral nomadic background of Israel.

I. Location
II. Archeology
III. History
IV. The Mari Letters
V. The Letters' Relationship to the Bible

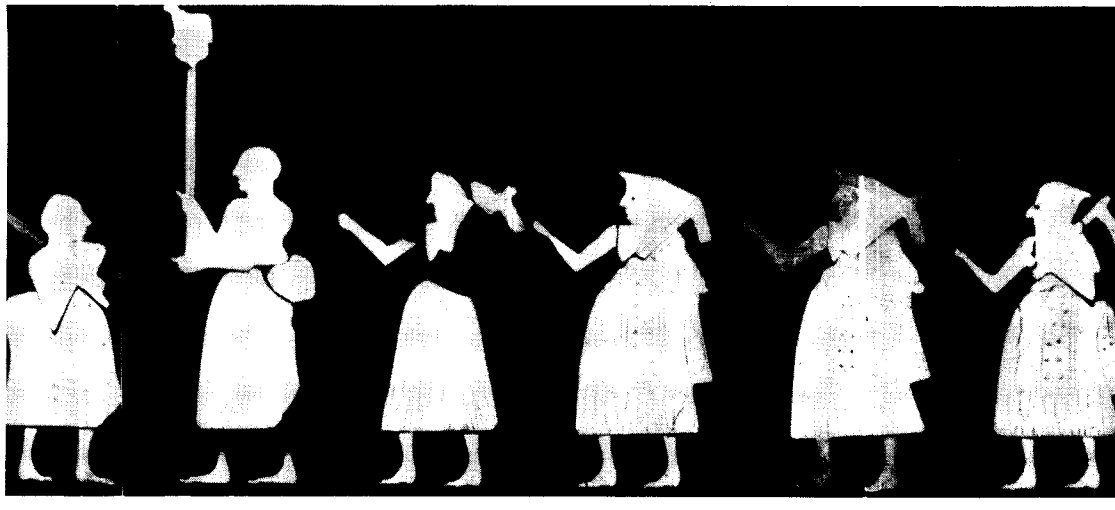
I. Location.–In the 3rd and early 2nd millennia B.C. the metropolis of Mari, like nearby Dura Europos in Roman times, probably owed its importance to its location. The fertile Euphrates valley was the main trade route from Ur and Babylon to western Syria and the Haran area. Mari stood midway between Babylon and the Syrian cities of Aleppo and Ebla. Moreover, it was a terminus of a caravan road that led via Tadmor (Palmyra) to Qatna in the Orontes valley and thence to Damascus and Hazor.



II. Archeology.–Mari was already well known from Mesopotamian sources in 1925 when W. F. Albright observed a large mound with abundant Bronze Age pottery. In 1933 bedouin found a broken statue, and identification of the site was soon confirmed. Excavations were begun at once by A. Parrot for the Louvre and were still in progress in 1981.

Although its population may always have been ethnically West Semitic, the kingdom was a flourishing outpost of Sumerian culture in the Early Dynastic Period from *ca.* 3000 B.C. until Sargon's conquest of the city, *ca.* 2300 B.C. Two palaces, one superimposed on the other, have been recovered, along with temples of Šamaš the sun-god, Ishtar (biblical Ashtoreth, Gk. Astarte), and Dagan (biblical Dagon), the principal deity of the region. Dagan's main sanctuary was at Terqa, about 50 km. (30 mi.) upstream on the Euphrates. Abundant artifacts from this period include votive images and statues of the kings.

A second era of prosperity in the Isin-Larsa and Old Babylonian periods, *ca.* 2000 to 1750 B.C., furnishes a contemporary background for the patriarchal narratives of Genesis. An enormous palace complex, the showplace of the ancient Near East, was built above the remains of its earlier counterparts. A single, heavily fortified block of buildings, now partially eroded, it must have covered an area well in excess of 2.5 ha. (6.3 acres). More than three hundred rooms and spacious courtyards, whose walls are preserved to a height of 5.0 m. (16.5 ft.), lie just beneath the surface of the mound. The palace was elaborately decorated with sculpture, fountains, and the earliest wall paintings in Mesopotamia. One delicately colored panel, about 2.5 by 2.0 m. (8.3 by 6.6 ft.), now in the Louvre, has a spiral border clearly related to Minoan art and depicts the investiture of the king in a mythological scene with trees and streams of water reminiscent of the garden of Eden.



Also uncovered at Mari were a school for scribes and an archive of more than twenty thousand cuneiform tablets comparable in importance to the Amarna Tablets, to the texts from Ugarit, and to finds at Tell Mardikh (Ebla).

III. History.–According to the Sumerian King List, Mari was the tenth royal city after the Flood. Oblique attestations to its status in the Early Dynastic Period are a claim of victory by a Sumerian ruler, Eannatum of Lagash, and tentative evidence from Tell Mardikh (Ebla) that King Iblul-Il of Mari submitted and paid tribute to that city. Sargon made Mari a part of the first Semitic empire *ca.* 2300 B.C., and the city remained subject to Mesopotamian rulers of Agade and Ur until Ishbi-Erra, a "man of Mari," overthrew the Sumerian Third Dynasty of Ur (Malamat, p. 2). In the 19th and 18th cents. B.C. Mari was ruled by a powerful but ill-starred West Semitic dynasty. King

Statue of the steward Ebih-Il with inscription to Ishtar (mid-3rd millennium B.C.) (Louvre)

Shell fragments of human figures, including a soldier (left) facing a standard-bearer, who is followed by four dignitaries. From Mari, mid-3rd millennium B.C (Louvre)

Yaḥdun-Lim led his armies to the Mediterranean Sea but did not long enjoy his victories. The murder of Yaḥdun-Lim in his palace was almost certainly arranged by the formidable King Šamši-Adad of Assyria, who installed his son, Yasmaḥ-Adad, as viceroy at Mari. Yaḥdun-Lim's son Zimri-Lim, a tragic figure, took refuge at Aleppo, capital of the Syrian state of Yamḥad, where he married Shibtu daughter of the king. When Šamši-Adad died, Zimri-Lim regained his throne and ruled an extensive domain for about two decades until overwhelmed by new danger. HAMMURABI of Babylon conquered his city and burned the splendid palace, which was never rebuilt. Buried in the rubble were records that shed a brilliant light on the history and society of the period.

IV. The Mari Letters.–Most of the tablets contain administrative records, and there are texts from earlier periods, some in Sumerian and Hurrian. But of primary interest to historians and biblical scholars is a large archive of correspondence from the reigns of Yasmaḥ-Adad and Zimri-Lim. By 1981 well over 1000 letters of kings of Mari, Assyria, Babylon, Aleppo, and Qatna, of ambassadors, officials, and members of the royal household, including 179 letters to or from women, had been published with meticulous care by a distinguished team of French Assyriologists (*ARM*). Although Amorite, a language known to scholars only through personal names, may have been spoken in the city, the Mari Letters are in Akkadian, the *lingua franca* of the ancient Near East, with only minimal traces of West Semitic influence on the Old Babylonian dialect of Akkadian that was normative of that time. This royal archive deals with such topics as troop movements, state affairs, military victories, the lighting of signal fires by the nomads, the repair of dikes, and the procurement of locusts for the king's table and of lions for the royal hunt.

From their tone the letters seem to have been dictated personally rather than issued in the name of the king from a royal chancery: "To Yasmaḥ-Adad speak: thus Šamši-Adad your father. . . . How long must we continue to direct you? You are young. Don't you have a beard on your chin? . . . . Will you not look at your brother who commands great armies?" (*ARM*, I, no. 73). The king of Qatna, paid with tin instead of silver for two horses that had been sent across five hundred miles of desert via Tadmor and Mari, wrote to Išme-Dagan of Assyria: "If you had not sent anything at all, I would not have been angry. But you sent tin. . . . Any one who hears of it will talk about us. . . . You are not a great king. Why have you done this? (But) this house is (still) your house" (*ARM*, V, no. 20). The final expression of allegiance is still current among the Arabs of Iraq, and, through the Moors, may have come to us in the Spanish response: *Esta es su casa*. The king of Aleppo wrote to a recalcitrant vassal that his city "would have been windblown dust, like chaff" (*Syria*, 33 [1956], 63-69; cf. Ps. 1:4; Isa. 40:24).

About twenty-five letters report brief ecstatic utterances in the name of a god. Šibtu the queen wrote to Zimri-Lim: "In the temple of Annunitum [probably an epithet of Ishtar] Selibum went into a trance: 'Thus says Annunitum: "O Zimri-Lim, they will test you in a revolt. Take care of yourself. Set up around you trustworthy servants whom you love. Station them and let them guard you. Do not go walking about by yourself. As for the men who are testing you, I will hand over these men to you"'" (*ARM*, X, no. 7).

Above all, the letters vividly portray the tribes of pastoral nomads, often called Amorites by modern scholars. Roaming vast grasslands from southern Mesopotamia to Syria and Lebanon, but most numerous in the central area around Haran, they tended their flocks, took part in raids, served in the armies of the king, and founded new dynasties of their own.

V. The Letters' Relationship to the Bible.–The prophetic letters are unique in portent-ridden Mesopotamia, where professional divination from omens was the standard practice. Ecstatic utterance of a divine message could well be a West Semitic phenomenon related to biblical prophecy, especially to the oracles of Balaam, who may have come from eastern Syria (Nu. 22:5). But the prophecies' obvious relevance to biblical study should not divert attention from their brevity (none is much longer than the one quoted above) or from their stark contrast to the superb poetry and ethical monotheism of the Hebrew prophets.

Some suggested parallels appear problematical. The so-called Benjaminites ($TUR^{MEŠ}$ *Ia-mi-na*) are now simply designated Yaminites, "people [lit. "sons"] of the South" ($TUR^{MEŠ}$ means "sons"). In the personal name Yawi-Ila, the element *Yawi*, followed by *Ila*, "god," seems to be not the name Yahweh but rather a verb, "be, become," as attested with familiar gods in the common theophoric names Yawi-Adad and Yawi-Dagan (cf. H. Huffmon, "Yahweh and Mari," in H. Goedicke, ed., *Near Eastern Studies in Honor of William Foxwell Albright* [1971], pp. 283-89).

Nonetheless, the letters may provide early confirmation of certain biblical traditions. (1) Hazor, which is described in Josh. 11:10 as "*formerly* the head of all those kingdoms," is the only Palestinian city often mentioned in the Mari Letters. (2) There is a reference to Laish (*La-yi-si-im*^{KI}, *ARM*, XVI/1, 21), the former name of Tell Dan (Jgs. 18:7). (3) There are attestations of *šāpiṭum*, "judge" (*ARM*, XV, 205), which make "untenable . . . the widely accepted opinion that the concept *šōfēt* in the Book of Judges represents a later editorial (the so-called Deuteronomic) stage" (Malamat, p. 46 n. 3). (4) Naḥur (biblical Nahor) and Haran (Ḥarran), related to Ur as a second sanctuary of the moon-god Sin, furnish obvious links to the patriarchal traditions.

While other affinities, admirably set forth by Malamat, might be cited, the general contribution of the Mari texts far exceeds in significance any specific parallel. The world of the 2nd millennium is well known from many cuneiform sources, but these are complementary to the Mari texts, and strong overtones from Mari reverberate throughout the cuneiform sources. Led by W. F. Albright (e.g., *FSAC*, pp. 236-39) and R. de Vaux (e.g., *Early History of Israel* [Eng. tr. 1978], pp. 229-233), many scholars have placed the patriarchal traditions of the Bible firmly in the early 2nd millennium, although particular items of evidence, e.g., the "Benjaminites," adduced in support of this consensus have recently been called into question, notably by T. L. Thompson (*Historicity of the Patriarchal Narratives* [1974]). Controversy may continue, but the general picture of the pastoral nomads remains valid, and the probability that there actually was a desert sheikh named Abram who resembled the ancestors of Šamši-Adad and Zimri-Lim cannot easily be set aside.

P. W. GAEBELEIN, JR.

MARIMOTH mar'ə-moth (AV, NEB, 2 Esd. 1:2). *See* MERAIOTH.

MARINER [Heb. *mallāḥ*] (Ezk. 27:9, 27, 29; Jonah 1:5); NEB SAILOR. According to BDB, p. 572, Heb. *mallāḥ* is a loanword from Akk. *malaḫu*, "sailor"; the Akkadian word is in turn a loanword from Sum. ma-laḫu, "boat builder." Cognates are also found in Phoenician, Aramaic, and Arabic.

The infrequent use of this term in the OT reflects Israel's lack of interest in the sea, no doubt due in part to Phoenicia's hold on the seacoast. The references in Ezk. 27 are in the context of a lament over Tyre, the most important coastal city in Phoenicia. Jonah went to Joppa on the Palestinian coast in his effort to flee from the Lord; the mariners on his ship were non-Israelite, probably Phoenician. G. A. L.

MARISA mar'i-sə. *See* MARESHAH.

MARISH mar'ish (Ezk. 47:11, AV). An archaic form of MARSH.

MARITAL RIGHTS [Heb. *ʿōnâ*] (Ex. 21:10); AV "duty of marriage"; NEB CONJUGAL RIGHTS; **CONJUGAL RIGHTS** [Gk *opheilḗ*] (1 Cor. 7:3); AV DUE BENEVOLENCE; NEB DUE.

The meaning of Heb. *ʿōnâ* is uncertain. Traditionally scholars have taken it to refer to conjugal rights on the basis of the context. But other interpretations are also possible. U. Cassuto (*Comm. on the Book of Exodus* [Eng. tr. 1967], p. 269) suggested "the condition of her abode" (cf. *māʿôn*, "dwelling"); thus the master shall provide her basic needs of food, clothing, and shelter. According to S. M. Paul (*Studies on the Book of the Covenant in the Light of Cuneiform and Biblical Law* [*SVT*, 18; 1970], pp. 55-61; *JNES*, 28 [1969], 48-53) *ʿōnâ* means "oil, ointment"; he deduced this on the basis of parallels from cuneiform texts in which provision for food, clothing, and oil is made (e.g., Code of Lipit-Ishtar, § 27; *ANET*, p. 160).

The Gk. *opheilḗ* is a more general term for "obligation," used in 1 Cor. 7:3 as a euphemism for the marital obligation of cohabitation (cf. *TDNT*, V, *s.v.* ὀφείλω κτλ.: ὀφειλή [Hauck]). G. A. L.

MARK nouns: [Heb. *ʾôṯ, qaʿaqaʿ, tāw, mipgāʿ, maṭṭārâ, maṭṭārâ*; Gk. *cháragma, stígma, sēmeíon, týpos* (Jn. 20:25)]; AV also TOKEN, PRINT; NEB also SIGN, TARGET; verbs: [Heb. *šāmar, śîm, śîm lēḇ(lᵉ)* ("mark well"), *rāʾâ, yāḏaʿ, bîn*, hiphil of *nāḵar*, piel of *tāʾar*, piel of *tāwâ* ("make marks," 1 S. 21:13); Gk. *skopéō, epéchō*]; AV also DISCERN, CONSIDER, SCRABBLE, APPOINT; NEB also RECOGNIZE, WATCH, LOOK AT, TRACE OUT, etc.; **MARK OUT** [Heb. piel of *tāʾâ*, piel of *tāʾar, ḥāqaq*]; AV also POINT OUT, APPOINT; NEB also DRAW, MEASURE; **MARK OFF** [Heb. *nāṭâ*, piel of *tāḵan*]; AV STRETCH OUT, METE OUT; NEB TAKE MEASURE, SET LIMITS; **MISS THE MARK** [Gk. *astochéo*] (1 Tim. 6:21); AV ERR; NEB SHOT FAR WIDE; **REMOVE THE MARKS OF CIRCUMCISION** [Gk. *epispáomai*] (1 Cor. 7:18); AV BECOME UNCIRCUMCIZED.

I. As a Noun.–The use of religious tattoos or markings on the hand or FOREHEAD to symbolize one's devotion to the deity and desire for protection was widespread in the ancient world. This may be the background of the protective mark (Heb. *ʾôṯ*) that Yahweh gave to Cain (Gen. 4:15), which was possibly some form of TATTOO that later became the tribal mark of the Kenites (see G. von Rad, *Genesis* [Eng. tr., *OTL*, 1972], pp. 107-109). The Israelites were forbidden to deface their bodies with the tattoos used in the pagan cults (*qaʿaqa* , Lev. 19:28; *see also* CUTTINGS IN THE FLESH). As an analogy to this practice, however, they were commanded to demonstrate their consecration to Yahweh by keeping the feast of unleavened bread and circumcising the first born "as a mark [*ʾôṯ*, "sign"] on your head or frontlets between your eyes" (Ex. 13:16; cf. v. 9; Dt. 6:4-9; 11:18-21). This command was later interpreted literally and is still fulfilled by wearing phylacteries on the hand and forehead (*see* PHYLACTERY).

In Ezekiel's vision (9:4, 6) all the faithful who grieved over the wickedness of Jerusalem were to have written on their foreheads the Hebrew letter *tāw* (X in ancient Canaanite script), a protective mark that early Christians interpreted as a symbol of Christ. Reminiscent of this is the SEAL (Gk. *sphrágis*) of ownership and protection with which God's servants are marked in John's apocalyptic vision (Rev. 7:2-8; 14:1); by contrast, those who worship the beast have the numbers of his name stamped on their foreheads (*cháragma*, 13:16f.; 14:9, 11; 16:2; 19:20; 20:4). In Gal. 6:17 Paul apparently alluded to the custom of branding slaves when he called his scars from beatings and stonings the *stígmata* of Jesus."

In 1 Cor. 7:18 Gk. *epispáomai* is a medical term for removing the marks of circumcision. Some Hellenistic Jews underwent this operation so that they could pass for Greeks (cf. 1 Macc. 1:15).

In several passages "mark" denotes a target for arrows (e.g., 1 S. 20:20, Heb. *maṭṭārâ*). In Lam. 3:12 the poet complains that Yahweh has made him His target (*maṭṭārâ*); similarly, Job complains that he has become the object of God's attack (*mipgāʿ*, 7:20; cf. 16:32). In 1 Tim. 6:21 "miss the mark" is a literal translation of Gk. *astochéō* (cf. 1:6, "swerve"); in 6:11f. Timothy is instructed about the targets at which he should aim (see J. N. D. Kelly, *Pastoral Epistles* [*HNTC*, 1963], pp. 47f., 152).

As was the custom, Paul concluded his letters in his own handwriting as a sign (*sēmeíon*) of their genuineness (2 Thess. 3:17).

II. As a Verb.–Most often the verb "mark" denotes a mental attitude of watching, discerning, or paying close attention to something being said or done (e.g., Heb. *bîn*, Ps. 50:22; hiphil of *nāḵar*, Gen. 38:25; *yāḏaʿ*, 1 K. 20:7; *rāʾâ*, 2 S. 13:28; *śîm lēḇ(lᵉ)*, Ezk. 44:5; Gk. *epéchō*, Lk. 14:7; *skopéō*, Phil. 3:17). Heb. *šāmar* is sometimes used in this sense (Ps. 37:37), but in Job 10:14 it has the hostile sense of guarding a prisoner (cf. also Ps. 130:3). *See also* LOOK II; NOTE, TAKE NOTE OF.

In other passages "mark" denotes a physical action. In contexts (often metaphorical) about surveying, constructing a building, or carpentering, it means to draw or measure (usually with a tightly stretched line): e.g., Lam. 2:8 (*nāṭâ*); Nu. 34:7f., 10 (piel of *tāʾâ*); Prov. 8:29 (*ḥāqaq*); Isa. 40:12 (piel of *tāḵan*); 44:13 (piel of *tāʾar*). In Ezk. 21:19f. (MT 24f.) the prophet is told to mark out (*śîm*) with a signpost a route for the enemy. N. J. OPPERWALL

I. Mark's Gospel in the Early Church.–The Gospel according to Mark has had a checkered history since the time of its publication. A number of facts show that the first Christians accepted it enthusiastically and acknowledged its authoritative witness to the life of the Lord. The other Synoptic Evangelists used this Gospel (*see* GOSPELS, SYNOPTIC). It was evidently known to the Johannine Evangelist (see B. H. Streeter, *The Four Gospels* [1924], pp. 397ff.) and the author of the *Gospel of Peter* (a second-century "Passion gospel"; cf. L. Vaganay, *L'Évangile de Pierre* [1930]).

Later attestation in early Christian literature includes Shepherd of Hermas (*ca.* 130) in Mand. 4:2 (cf. Mk. 6:52; 8:17) and Tatian, who compiled a Harmony of the Gospels (the *Diatessaron*) *ca.* 170 and used Mark as one of his sources. Irenaeus (180) regarded it as one of the canonical documents, adding the testimony: "After their departure [i.e., Peter's and Paul's death], Mark the disciple and interpreter of Peter, did also hand down to us in writing what had been preached by Peter." Clement of Alexandria, in the next decade, endorsed this statement, "Mark wrote his Gospel from matter preached by Peter."

For direct citation of the text of the Gospel, however, there is little evidence from the early centuries. That the Gospel of Mark was known and highly regarded is clear; but it is a singular fact that the Apostolic Fathers and Apologists (in the 2nd cent.) seldom cited it (cf. P. N. Harrison, *Polycarp's Two Epistles to the Philippians* [1926], pp. 285-88, for Polycarp's knowledge of the Gospel). Moreover, although the Gospel found a place in the canon, its position in the order of the Gospels is unsettled. It is never placed first, and in some lists (e.g., the Old Latin, and the Greek MSS D and W) it is last. Irenaeus, in his celebrated description of the Gospel writers that likens them to the four cherubim of Ezk. 1 and the four living creatures of Rev. 4, reflected the confusion over the place and office of the Gospel of Mark. The father in successive parts of his writing depicted Mark as an eagle, a lion, a man, and a calf, apparently unable to decide which characterization fitted the Evangelist best.

No commentary on the Gospel of Mark was written before that of Victor of Antioch in the 5th century. There is evidence that the Gospel was neglected, mainly on the ground that the larger Gospels of Matthew and Luke embodied most of its contents and were much smoother than Mark's rugged and unstylistic account. Moreover, the theory that Matthew's Gospel was the first to be written and that Mark was "one who followed Matthew's footsteps and shortened his Gospel" (*pedisequus et breviator Matthaei*), as Augustine put it, was commonly held until the rise of modern criticism.

Thus the facts of the early dissemination and recognition of Mark point to two conclusions. First, it was immediately received on its publication as a fundamental witness to the life of Christ; and its prestige in the Church was greatest just after it was written (Rawlinson, p. xxv). These features led Rawlinson to believe that the Gospel was circulated with the backing of some important church; he found that the double tradition that this church was the one at Rome and that Peter's authority assured to the Gospel a ready reception in the churches throughout the Christian world most adequately explained its initial acceptance. Second, after Mark was incorporated into the later evangelical records, its popularity waned, and it was seldom quoted in the following centuries. As a consequence of the modern assessment of Mark as the earliest Gospel to be written and the claim that it objectively records Jesus' historical life — two suppositions deriving from H. J. Holtzmann's *Die synoptischen Evangelien* (1863) — the Gospel of Mark has come into its own once again. The last century of biblical scholarship has witnessed a resurgence of interest in this Gospel and its writer — "The saint who first found grace to pen/The life which was the Life of men" (L. Housman).

II. Outline.–The Gospel opens with a summary of the mission of John the Baptist (1:1-13) as a frontispiece to the narratives of the baptism and temptation of Jesus. These events lead into the public ministry of Jesus, which is depicted in two large sections: the Galilean ministry (1:14–9:50) and the Judean ministry (chs. 10–13). The former is further divided into a summary of Jesus' work in eastern Galilee (1:14–7:23), with His headquarters at Capernaum, and His later ministry in northern Galilee (7:24–9:50). He returned to Capernaum and journeyed farther south into Judea (chs. 10–13); this section concludes with His triumphal entry into Jerusalem (11:1-27), His controversies with the Jerusalem religious authorities (11:27–12:44), and His apocalyptic discourse (13:1-37). The remainder of the book is a full, graphic depiction of His arrest, trial, crucifixion, and burial (14:1–15:47). Mark abruptly ends with the account of how three women arriving at the tomb found His grave empty and heard an angel bidding them to return with the disciples to Galilee (16:1-8).

III. Features.–A. Linguistic Style. Vincent Taylor (chs. 5–6) has the fullest modern discussion, in which the important studies of Swete and C. H. Turner are used. Interest has centered upon Mark's supposed Semitic style, about which Taylor concluded: "We have good reason to speak of an Aramaic background to the Greek of the Gospel; there are grounds for suspecting the existence of Aramaic sources, which may, however, be oral; and we can speak of the Evangelist's use of a tradition which ultimately is Aramaic; but to say more is speculation" (p. 56).

The most evident features of a Semitic style are: the way the sentences are joined by the paratactic *kaí* in preference to the use of subordinate clauses; the use of *ḗrxato,* "he began," before the verb; the introduction of direct speech by the participle *légōn,* "saying" — a common OT feature; the very common genitival pronoun; the habit of using *pollá,* "many," with adverbial force (see Moulton, *Grammar,* II, 446); and the arrangement of pericopes in groups of two or usually three (a Semitic trait to which E. Lohmeyer and W. Grundmann called attention in their comms.).

A second trait of Markan style is his predilection for Latin terms and expressions. The most obvious are in verses in which the Greek thinly disguises the underlying Latin word or words: *modius* (4:21), *legio* (5:9, 15), *speculator* (6:27), *denarius* (6:37), *sextarius* (7:4), *census* (12:14), *quadrans* (12:42), *flagellare* (15:15), *praetorium* (15:16),

centurio (15:39, 44f.). Some of these are direct loanwords (i.e., Latin words written in Greek characters). It is also significant that in the case of *centurio*, the parallel verses in Matthew and Luke (which do not use this word) read the Gk. *hekatontárchēs* in place of Mark's *kentyriōn*. The term *Hērōdianoi* in a section (3:6) that contains another Latinism is particularly striking (see the comms. on the phrase *symboúlion edídoun*, "they held a council"). Other Latinisms include *verberibus eum acceperunt* ("they received him with blows," 14:65); *satisfacere* ("satisfy," 15:15); *genua ponere* ("kneel," 15:19). Mark retained the names of Simon's sons — Alexander and Rufus (15:21) — which recur in Rom. 16:13 as the names of church members at Rome, where presumably Latin was the language used. Mark's Latinisms directly bear on the question of the recipients of the Gospel (so Grundmann, p. 19).

B. Distinctive Presentation. The vivid way in which the stories are told impresses all careful readers. The narratives are full of intimate details, unimportant in themselves, yet such as an eyewitness would have been likely to recall later when he related the mighty works and words of Jesus and the decisive reactions of those present. For instance, Mark reported the attitudes, the expression, and even the gestures of Jesus (see 7:34; 9:36; 10:16) with special emphasis upon His observation (5:32) and His attitude toward those who came under His scrutiny (1:41, where the reading *orgistheís*, "being angry," is to be preferred to the TR; 3:5, 34; 10:21, 23; 11:11). Similarly, he noted snatches of conversation between the disciples and the remarks of the onlookers and the crowd; the unusual wealth of detail in 9:14-29 convinced even the form critic K. L. Schmidt (*RGJ*, p. 227) that the story "can only go back to good tradition." The story of the rich young man (10:17-22) in the parallel version in Luke (18:18-27) lacks the details that an eyewitness might have supplied. Luke does not tell that the young man ran and knelt, that Jesus looked upon him and loved him, or that when faced with the Lord's challenge, his countenance fell. In Mk. 10:32, Jesus walked alone on the last journey to Jerusalem, and as the disciples followed Him, fear gripped them. B. K. Rattey commented, "Mark alone tells us all this; but who told Mark? It could only have been one of the Twelve" (*Making of the Synoptic Gospels* [1942], p. 32). This deduction has been severely criticized, however, by form critics and redaction critics; see Martin, *Mark: Evangelist and Theologian*, pp. 55-61 for details.

J. Weiss noticed that some stories are told more from the standpoint of those who see Jesus than from the standpoint of Jesus Himself, especially the story of the call of the Galilean fishermen (1:16-20, cited by V. Taylor, *The Gospels* [5th ed. 1945], p. 53 n.). This observation again indicates that Mark depended upon an eyewitness tradition, notably that of Peter himself.

Another distinguishing feature of the Gospel is its attitude toward Peter. B. W. Bacon pointed out that Peter was shown as disgraced or rebuked in most Markan references to him (see, e.g., 8:27ff.; 9:5f.; 10:28ff.; 14:29ff., 66-72). Rawlinson (p. xxix) deduced from these candid criticisms of Peter that when the Gospel was published, Peter was already revered as a martyr and no stain drawn from the record of this earthly life could dishonor him. Rawlinson's explanation is plausible but lacks proof. A second explanation is that Peter's own confessions of failure and disgrace account for the report of these episodes; his name is significantly attached to certain parts of the record where the other Gospels give only a vague reference to "they" or "one of the disciples" (1:36; 11:21; 16:7). If Mark had desired to glorify Peter, he would not have omitted the encomium of Mt. 16:17-19; only the humbled apostle who willingly related in such detail his denial of the Lord would have left out the words of the Lord's blessing upon him. Further, 11:21 ("And Peter remembered and said") must have come to the Evangelist directly from Peter himself.

A further confirmation that Mark depended directly on Peter for these details is that he spared no detail when reporting the failures and misunderstandings of the Twelve. The clearest instance of this feature is 4:38 — "Teacher, do you not care if we perish?" — a curt reproof on the lips of the disciples in the boat, which the corresponding accounts in Matthew (8:25) and Luke (8:24) soften.

The prominence given to the cross is a marked trait of this Gospel, whose *Leitmotiv* may be said to be suffering and martyrdom. Almost a third of Mark is the Passion story, and the shadow of the cross falls across the page as early as 2:20 and 3:6. The book explicitly predicts the Passion three times (8:31; 9:31; and 10:33f.) and contains allusions, sometimes veiled (9:12), sometimes not (10:45), to the way in which Jesus expected His ministry to end. (On these Passion prophecies, see the important study of R. H. Fuller, *Mission and Achievement of Jesus* [1954], pp. 55-64.) Interwoven with the thought that the Lord would die a sacrificial death for sinners is the teaching that His followers must expect to suffer for His sake (8:34ff.; 10:38f.). Rawlinson (p. xvii) proposed that this interest shows that the Gospel was first addressed to a church that was being persecuted at Rome and faced the very real possibility of martyrdom.

The emphases on the cross and on the teaching of the disciples' dying for Christ's sake are the two most important supports for the theory, put out by G. Volkmar in 1857 and maintained since by B. W. Bacon, that the entire Gospel was a narrative in the form of an allegory written to undergird the distinctive tenets of Paulinism. (For the other features of Mark that are supposedly Pauline see V. Taylor, *The Gospels*, pp. 56f.) The theory has met with little acceptance (cf. J. Moffatt, *Intro. to the Literature of the NT* [1911], pp. 235f.; Rawlinson, pp. xliii ff.; and esp. M. Werner, whose book *Der Einfluss paulinischer Theologie im Markusevangelium* [1923] was written expressly to refute this notion). A later trend in Markan interpretation, however, was to see Mark as a Pauline theologian of the cross (cf. E. Schweizer; essays by W. L. Lane and R. P. Martin in *Southwestern Journal of Theology*, 21 [1978]).

IV. Genre and Structure.—It is an axiom of modern Gospel criticism that Mark (like the other Evangelists) did not present a biography of Jesus, in the popular sense of that term (see J. M. Robinson, ch. 1, on the influence of modern historiographical views on the understanding of the nature of the Gospels). The exordium in 1:1 makes it clear that Mark intended to write a *gospel*, i.e., a record of the good news that came with Jesus Christ (cf. 1:14f.; 14:9; the appendix, 16:15). Christ's coming into the world constituted the content of this good news; His proclamation of the gospel made Him its author. Mark was not concerned, however, to describe fully the Lord's personality. His focusing attention upon the events of the ministry explains his obvious omissions (e.g., the Birth narratives, accounts of Jesus' boyhood, influences on His thought and career, an estimate of His personal appearance, the impact of His personality on others [although there *are* certain hints of this feature, as already shown], and a day-to-day diary of events in chronological and orderly sequence). Mark himself is hidden; he made no attempt to pass a personal judgment on the story he narrated. Likewise all the persons who appear on the stage are mentioned not for their own sake but for the Lord's.

A. Markan Hypothesis. Even if Mark's Gospel was not intended to be a biography of the historical Jesus after the style of Boswell's *Life of Johnson*, it may present an intended sequence of events, set in a true historical framework, of Jesus' public ministry and activity. This theory, known as the "Markan hypothesis," was the basis of the once-popular "Lives of Jesus." The two best-known titles were J. Stalker's *Life of Jesus Christ* (2nd ed. 1891) and A. C. Headlam's *Life and Teaching of Jesus Christ* (1923). C. E. Raven and E. Raven in 1933 wrote *Life and Teaching of Jesus Christ* and in an engaging style offered (in ch. 3) what they called "An Outline of the Ministry," which traced the historical and psychological development in three phases: the public ministry in Galilee, the training of the disciples, and the crisis in Jerusalem. The authors held that Jesus' public and private teaching corresponded to the different phases of development.

The rise of form criticism has caused this theory to be seriously attacked. The first effects of opposition to the Markan hypothesis are seen in A. E. J. Rawlinson's commentary, which starts from the premise that "such attempts to treat the Marcan arrangement of the Gospel materials as supplying an outline, in chronological order, of the course of events are profoundly mistaken" (p. xx). He recorded the ways in which the Markan hypothesis "in recent years has been riddled with criticisms of the most damaging kind." The most fundamental difficulty, he said, is the intrinsic improbability that a chronological outline of Jesus' ministry or an itinerary of His movements would be preserved for a generation as oral tradition by a Church not primarily interested in such matters. On this view, the Gospel writers themselves provided the framework and arranged the materials, which were derived from the tradition. This assumption may be said to be the guiding principle of the form-critical approach to the Gospels and to Mark in particular. The form critics developed their approach as a denial of the Markan hypothesis. C. H. Dodd, in an important article (*Expos.T.* 43 [1932], 396-400; repr. in *NT Studies* [1951] as "Framework of Gospel Narrative," pp. 1-11), argued that the Markan framework conforms to the pattern of the Acts kerygma (especially in Peter's speech in Acts 10:34ff.) and that Mark's "generalizing summaries," when placed together, form a continuous piece of narrative. This proposal has bolstered the Markan hypothesis by showing that the author evidently did intend some historical progression in his relating of the movements of Jesus. Dodd's article, however, was critically scrutinized by D. E. Nineham ("The Order of Events in St. Mark's Gospel — an Examination of Dr. Dodd's Hypothesis," in *Studies in the Gospels* [1955], pp. 223-239), who held that the order of events was of no significance in the apostolic preaching. But Dodd's thesis has proved very influential, especially in Britain, and has checked any large-scale capitulation to the conclusions of the form critics, for his conclusion runs counter to theirs: "Marcan order does represent a genuine succession of events, within which movement and development can be traced."

B. Form-Critical Assessment. A view at the opposite end of the scale from Dodd's was that of the German form critics Dibelius and Bultmann. Their argument, popularized by R. H. Lightfoot (*History and Interpretation in the Gospels* [1934]) and F. C. Grant (*The Earliest Gospel* [1943]), was that the Markan material forms an accidental collection of disconnected stories and sayings. K. L. Schmidt made an even more devastating attack on Mark's order of events: "As a whole, there is no life of Jesus in the sense of an evolving biography, no chronological sketch of the story of Jesus, but only single stories, sections (*pericopae*), which are put into a framework" (*RGJ*, p. 317). V. Taylor (*The Gospels*, p. 59) mentioned the points of interest that emerged from this treatment but said, "Schmidt's views have every appearance of a reaction which has been carried too far." The tide in scholarly circles has been running against this negative assessment, and most later commentators (Anderson, Schmid, Schweizer, Pesch — but not Lane) treat the Markan material as a loose collection of individual pericopes (or paragraphs) put together by the Evangelist for his own purposes.

Other theories of the way that Mark's Gospel is built up may be tabulated.

C. Vincent Taylor's View. Taylor started from the supposition that the Evangelist used a series of "complexes" (after Dodd, p. 10), which he regarded as small groups of narratives or sayings that belong together (see his comm., pp. 90-104). Mark, according to Taylor, took over these complexes (which had an independent existence), added his own comments, and connected them with some simple literary ligatures. On this view Mark's role is strictly that of editor and compiler.

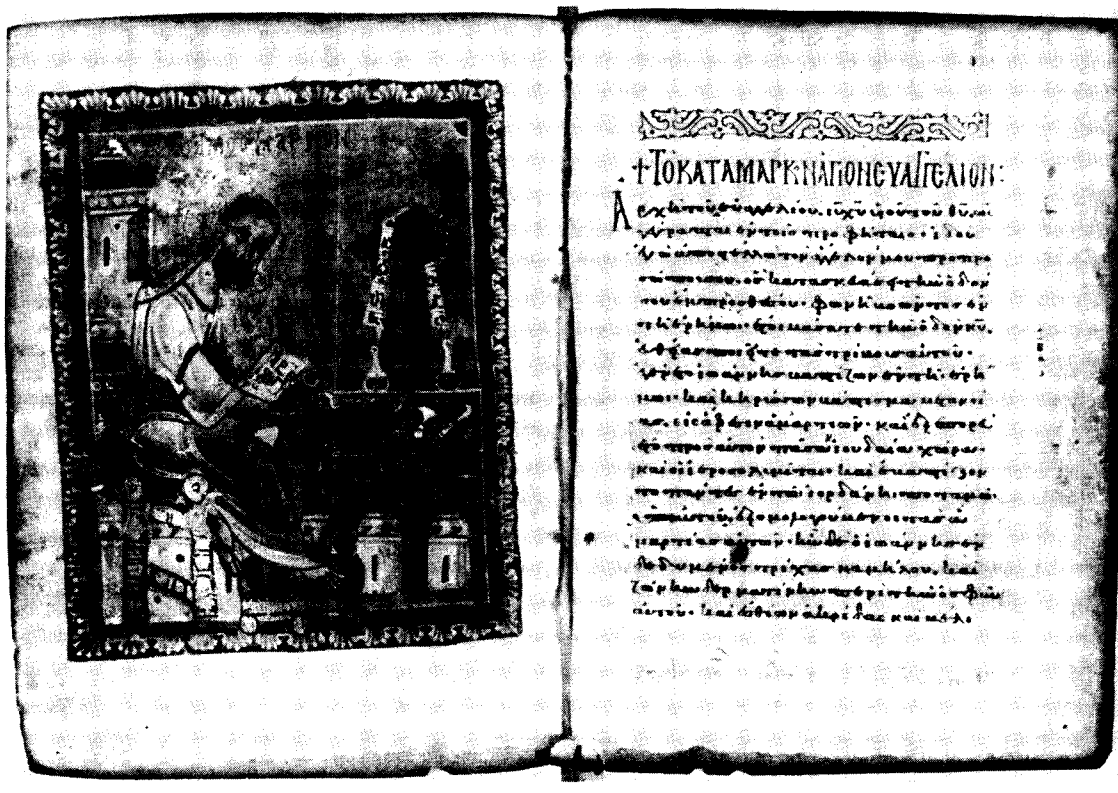
A modification of this idea is found in the attractively presented work of H. A. Guy, who discerned in Mark a *Grundschrift*, which consisted of the papyrus leaves on which were written stories of Jesus and which would have proved of inestimable value to the early preachers. An unknown editor brought these sheets together and added teaching material but did not arrange them into any coherent pattern. John Mark, who was held in high esteem in the churches on account of his association with Peter, undertook the task of "compiler."

Taylor (ch. 7) described older views of Markan sources that scholars have postulated. Of special note are the elaborate attempt at source-criticism by W. L. Knox (*Sources of the Synoptic Gospels*, I [1953], especially his isolation of the "Twelve-source" showing Jesus' dealings with the disciples and a Passion story); B. S. Easton's work on the controversy stories of Mk. 2–3, 12 ("A Primitive Tradition in Mark," in S. J. Case, ed., *Studies in Early Christianity* [1928], pp. 85-101), according to which 2:13–3:6 and 12:13-27 were originally a unit that "was formed in pre-Markan times and belonged to the tradition of the Palestinian Christian community" (p. 92); and T. W. Manson's development of the views of C. H. Turner, who sought to isolate certain passages as "Petrine." Manson (*BJRL*, 28 [1944], 119-136; repr. in his *Studies in the Gospels and Epistles* [1962], pp. 28-45) sought to enlarge the scope of this Petrine material and to classify it (pp. 41ff.). He added that other sources of considerable antiquity and consequent worth were at Mark's disposal, such as the "Passion of John" (6:17-29), which "has all the appearance of being a piece of Palestinian (originally Aramaic) tradition" (p. 43). The tendency that Manson's work represents led to an increased confidence in the Gospel record and away from the form-critical idea that the sections of the Gospel were "manufactured" by preachers in the Hellenistic Church. On the other hand, P. J. Achtemeier's contributions on the theme of "Pre-Markan Miracle Catenae" (*JBL*, 89 [1970], 265-291; 91 [1972], 198-221) have given the Evangelist a more creative role in incorporating collections of miracle stories, and E. J. Pryke, *Redactional Style in the Marcan Gospel* (1978) offers a systematic stylistic analysis of Mark in the hope of separating out a corpus of Markan source material (S) from redactional elements (R). This exercise has produced little that is conclusive, however.

D. Liturgical Theories. Some scholars have maintained that Mark's structure is governed by considerations arising from the liturgical and cultic needs of the early churches. The best-known views are those of P. Carrington and

A. Farrer. Carrington in *The Primitive Christian Calendar* (1952, with later studies in *Expos.T.*, 67 [1956]; and *According to Mark* [1961]) began with the assumption that the Church took over a lectionary scheme from Jewish synagogue worship; the sections of Mark follow the order of festivals in the Jewish festal lectionary. This novel theory has met with little favor (see the criticisms by R. P. Casey, *Theology*, 55 [1952], 362ff.; and in great detail by W. D. Davies in his contribution to the *Dodd Festschrift* ["Reflections on Archbishop Carrington's *The Primitive Christian Calendar*" in W. D. Davies and D. Daube, eds., *The Background of the NT and Its Eschatology* (1954), pp. 124-152], repr. in his *Christian Origins and Judaism* [1962], pp. 67-95). Its weakness is its implication, *ex hypothesi*, that the Gospel material was altered to conform to a supposed liturgical pattern and that some verses do not fit in and therefore need to be ironed out. The transmission of the gospel via the worshiping life of the early churches is nonetheless a presupposition for which recent study has produced some important evidence.

Austin Farrer, in a series of erudite volumes, supported the view that the governing principle of Mark's composition is conformity to OT typology and prefigurations. On this theory, even the simplest Gospel story becomes invested with cryptic significance and esoteric meaning, especially if it employs numbers. The elaborateness of such a construction does not argue for its cogency, and its oversubtlety is its weakness. Farrer himself revised its construction (cf. his modification of the earlier *Study in St. Mark* [1952] in *St. Matthew and St. Mark* [1954]). Helen Gardner, in a penetrating survey of Farrer's ideas ("The Poetry of St. Mark," *Limits of Literary Criticism* [1956]), placed her finger upon the real point: "I find it hard . . . to believe that the first readers of St. Mark would have been as ingenious in picking up symbolic references as is suggested [by Farrer]" (p. 34). The same negative judgment must be passed on the latest attempt to find symbolism in Mark, F. Kermode's *Genesis of Secrecy* (1979), ch. 3. J. M. Robinson found fault with the methodological assumptions of both Carrington and Farrer, whose "argument is not built upon what Mark clearly and repeatedly has to say, but upon inferences as to the basis of the Marcan order, a subject upon which Mark is silent" (p. 12). If the Markan order is uncertain, then Carrington and Farrer have lost their cases.



E. Gottfried Schille's View. Schille considered the catechetical needs of the early Christians the decisive issue in Mark's structure (*NTS*, 4 [1957/58], 1-24). Schille maintained that the entire composition of the Gospel elaborately paralleled the life of the Lord and the experience of catechumens who came into the Church through the gateway of baptism, instruction, the holy supper, and the prospect of martyrdom. Other parts of early Christian literature (esp. He. 6:1ff. and Didache) also reflect this sequence.

F. Ernst Lohmeyer's View. Lohmeyer based his elaborate thesis (*Galiläa und Jerusalem* [1936]) on the geographical data of the Gospel. His advocacy of the idea that there were two main centers of early Christianity, quite distinct from each other and located in Galilee and Jerusalem, has been examined sympathetically by R. H. Lightfoot, *Locality and Doctrine in the Gospels* (1938), F. C. Grant, *The Earliest Gospel* (1943), amd Marxsen, *Mark the Evangelist*. The dominant motif in Mark, according to Lohmeyer, is the importance of Galilee as the locus of divine revelation and the place to which the apocalyptic Son of man will return as a prelude to the Parousia (see 14:28; 16:7, on which Lohmeyer built much of his theory). Lohmeyer detected that Markan material is grouped into threes (see pp. 6f. for this triadic structure of the entire Gospel), but his rigid literary analysis made his proof unconvincing.

V. Authorship.—The earliest witnesses to the Gospel (Papias, Irenaeus, Clement of Alexandria, Origen, Jerome, and probably the Muratorian Canon if the usually allowed textual conjecture is accepted; see Rawlinson, p. xxvii) associated the author of the Gospel with Mark and equally linked him with Peter. Vincent Taylor (pp. 1-7) dealt with the original texts in the church fathers. The Papias tradition (related in Eusebius *HE* iii.39) has pride of place in the patristic tradition: "The Elder said this also; Mark who had been Peter's interpreter, wrote down carefully as much as he remembered, recording both sayings and doings of Christ, not however in order. For he was not a hearer of the Lord, nor a follower, but later a follower of Peter, as I said. And he [Peter or Mark] adapted his teachings to the needs of his hearers (not as arranging them) as one who is engaged in making a compendium of the Lord's precepts." (Cf. H. E. W. Turner, *Expos.T.*, 71 [1960], 260-63.) Modern discussion has raised many objections to the validity of this ancient *testimonium*, but none is decisive (cf. A. C. Perumalil, "Are Not Papias and Irenaeus Competent to Report on the Gospels?" *Expos.T.*, 91 [1980], 332-37; that the matter is not so simple is shown by Martin, *Mark: Evangelist and Theologian*, pp. 80-83). The important argument attacks the traditional connection between the author of the Gospel and the apostle Peter. The lack of a strict chronological outline and Mark's dependence upon traditional material make it hard to explain the somewhat ambiguous statement that he adapted Peter's teaching to the needs of the hearers of the moment. But one should also observe the qualifying remark that follows, as well as the preceding comment of the Elder that Mark wrote of the "sayings and doings" of Christ but not, however, "in order." (For the different uses of the term "order" [Gk. *táxis*] — chronological, rhetorical, and calendrical — see H. A. Guy, ch. 2.)

This testimony does make three positive points. First, it traces one of Mark's sources back to Peter's teaching. Second, it remarks that Mark himself had no firsthand knowledge of the sayings and deeds of the Lord but depended upon eyewitnesses. Third, Mark picked up his information in his work as Peter's *hermēneutēs*, a term meaning something like "private secretary" and aide-de-camp (so T. W. Manson, *The Teaching of Jesus* [1935], p. 23 n.). The anti-Marcionite prologue to the Gospel similarly describes the Evangelist as Peter's *interpres* (see W. F. Howard, *Expos.T.*, 47 [1936], 534-38). The same document declares that Mark composed his Gospel in Italy after Peter's "departure" (*post excessionem*). Although problems are connected with this statement, T. W. Manson's assessment seems reasonable (*Studies in the Gospels and Epistles* [1962], p. 40): "If Peter had paid a visit to Rome some time between 55 and 60; if Mark had been his interpreter then; if after Peter's departure from the city Mark had taken in hand — at the request of the Roman hearers — a written record of what Peter had said; then all the essential points in the evidence would be satisfied."

John Mark is known from references in Acts (12:12, 25; 13:5, 13; 15:37, 39) and the Epistles (Col. 4:10; 2 Tim. 4:11; Philem. 24; 1 Pet. 5:13). These texts clearly indicate his close association with apostolic testimony. Both his home and his family connections played an important part in early Christian history. His mother (of sufficient importance to be named) was a member of the Jerusalem church; to her home, a regular place of Christian assembly, Peter came after his escape from prison. Subsequently Mark had intimate contact with Paul and his party, associated

Miniature of Mark, who is writing the first word of his Gospel, and the first page of his Gospel. Michigan MS 22 (11th cent. A.D.) (Department of Rare Books and Special Collections, The University of Michigan Library)

with his own cousin Barnabas, and went on the mission to Cyprus. About twelve years later (according to the Captivity Epistles) Mark was reconciled to Paul, who commended him to the church at Colossae. Paul asked Timothy to bring Mark to him at Rome, saying, "He is useful to me for ministering." At last Mark rejoined Peter, who referred to him as "my son" in a letter written from Rome (so 1 Pet. 5:13, apparently; see Papias in Eusebius *HE* ii.25; E. G. Selwyn, *First Epistle of St. Peter* [1947], pp. 60-62). *See* MARK, JOHN for a possible link between Mark (and his Gospel) and Paul.

These varied allusions to Mark's acquaintance with early Christian leaders confirm the judgment of T. W. Manson that "Mark had considerable opportunities of gathering knowledge of the kind that would later be useful in the composition of the Gospel" (*Studies*, p. 37). Furthermore, Mark's close contact with Peter, both in Jerusalem and in Rome, greatly helps to explain the phenomenon to which C. H. Turner has drawn attention, that Mark's account of many incidents stands in direct contrast to Matthew's and Luke's. Mark's version "may be called autobiographical. They [Matthew and Luke] write Lives of Christ, he records the experience of an eye-witness and companion" (*New Comm. on Holy Scripture*, ed. Gore, *et al.*, pt. 3 [1928], p. 48). Turner perceptively noted that changing the 3rd person plurals in Mark to 1st person plurals would make his narration vivid and forceful. He applied this principle to Mk. 1:29 and read: "We came into our house with James and John; and my wife's mother was ill in bed with a fever, and at once we tell him about her." Mark's 3rd person may be understood as representing a 1st person plural of Peter's discourse; the same process may be detected elsewhere in the Gospel (at 1:21; 5:1, 38; 6:53f.; 8:22; 9:14, 30, 33; 10:32, 46; 11:1, 12, 15, 20, 27; 14:18, 22, 26, 32). Turner's observations are one of the most cogent proofs of the apostolic testimony (Peter's) behind the Second Gospel, written by John Mark.

VI. Date.–A. External Evidence. The external data speak with no decisive voice. Irenaeus (*Adv. haer.* iii.1.2) wrote, "After their deaths [Peter's and Paul's] Mark, the disciple and interpreter of Peter, himself also handed down to us in writing the things which Peter had proclaimed." On the other hand, Clement of Alexandria said that Peter instructed Mark to write what he had said, and that this literary effort was published later, but in Peter's lifetime, for Peter's comment on the composition is recorded (in Eusebius *HE* vi.14). A view discounting this interpretation suggests that Irenaeus intended not to give chronological information but simply to state the continuity of Mark's writing and Peter's preaching. This deduction (which Taylor granted, *The Gospels*, p. 51) is far from obvious, although the accuracy of Irenaeus may be impugned because of his earlier remark that Matthew was produced while Peter and Paul were still preaching — a statement that would be difficult to maintain historically. The external evidence is thus divided, and no certain dating is possible from this source.

B. Internal Evidence. The references to persecutions (8:34-38; 9:31; 10:33f., 45; 13:8, 10; see Rawlinson, pp. xvi f.) and to the controversies that surrounded the issue of gentile freedom (7:17-23, 26f.; 13:10) have been taken to mean that the Gospel belongs to the decade 60-70 (so Taylor, comm., p. 31).

The cryptic allusion to the profanation of the Jerusalem temple in 13:14, "But when you see the desolating sacrilege [Gk. *to bdélygma tḗs erēmṓseōs*] set up where it ought

not to be (let the reader understand), then let those that are in Judea flee to the mountains," has been used to suggest that Mark must have been written within a few years of the siege of the Holy City in A.D. 66-70. On this verse see G. R. Beasley-Murray, *Jesus and the Future* (1954), pp. 255ff.; *Southwestern Journal of Theology*, 21 (1978), 37-53; *Comm. on Mk. 13* (1957), pp. 59-72.

As an alternative proposal, C. C. Torrey (*Our Translated Gospels* [1936], p. 262) and T. W. Manson (*Sayings of Jesus* [1949; repr. 1979], p. 329) sought to relate the text to Caligula's attempt to set up his statue in the temple in A.D. 40. For some scholars (e.g., B. W. Bacon, *Gospel of Mark* [1925], p. 93) the reference to the desolating scourge is a prophecy *post eventum* and therefore has a different bearing on the question of the Gospel's dating. Against this view is the objective fact that certain verses (13:1ff.) imply that the temple was still standing when the Evangelist wrote.

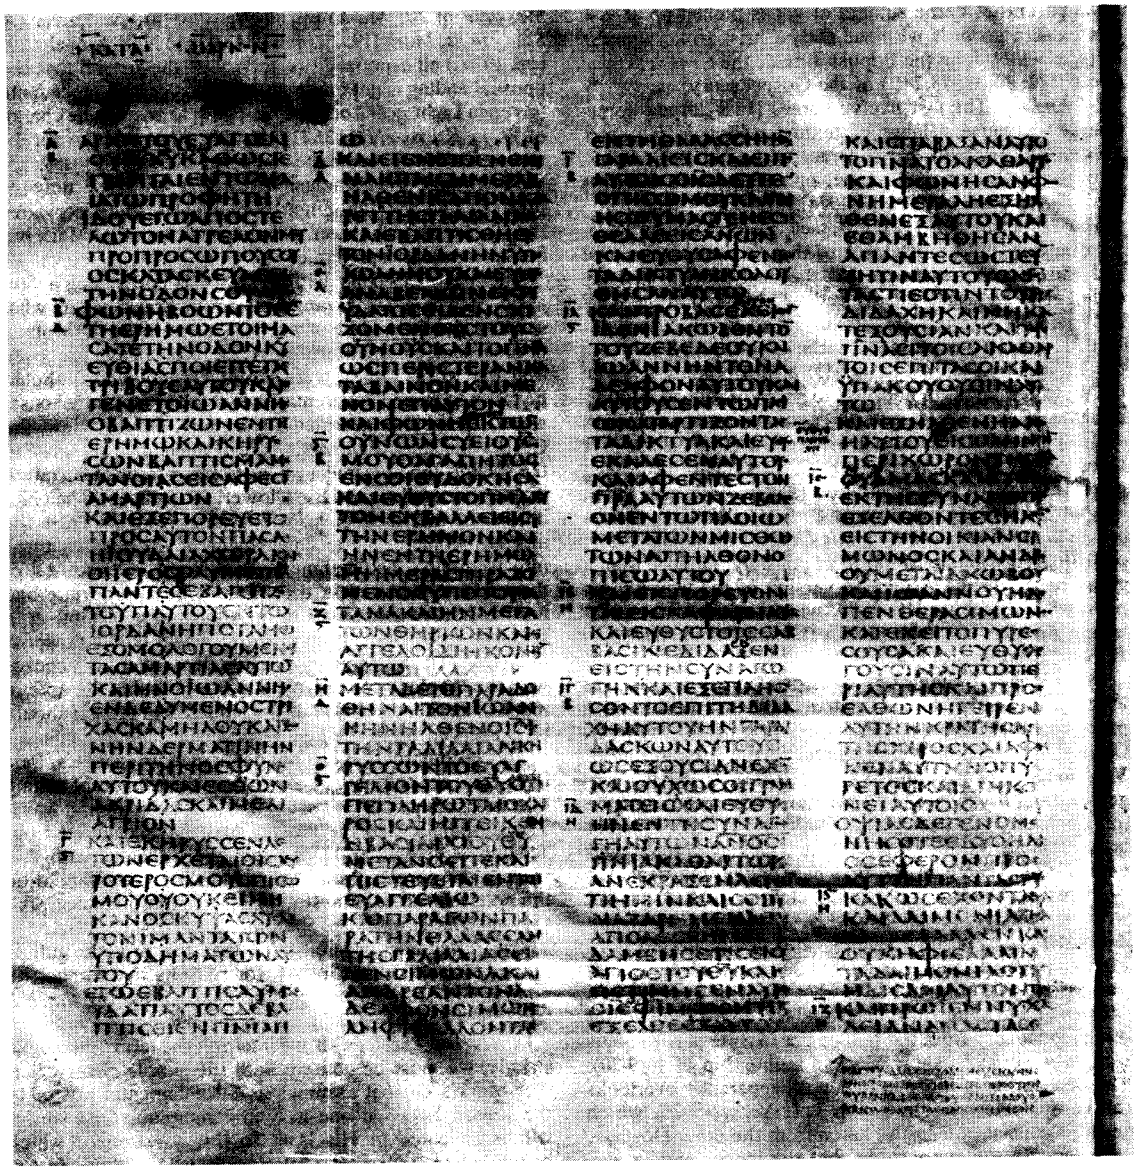
A date in the decade 60-70 seems certain, despite some notable attempts to champion an early dating, e.g., Harnack (*Date of the Acts and Synoptic Gospels* [1911], p. 126-133, before A.D. 60) and W. C. Allen (before 50). Rawlinson (pp. xxix f.), Blunt (pp. 69-76), and Taylor (comm., p. 32) offered a more precise dating: 65-67, chiefly because the vague and imprecise references in ch. 13 do not show that the Jewish War had begun. On the other hand, S. E. Johnson (p. 20) thought that the Gospel may have been written after the destruction of the temple (which seems to be hinted at, he said, in certain premonitory signs of ch. 13, esp. vv. 19-22) but before the hostilities in Palestine ended in April, 73; thus the writing of the Gospel may have occurred within a larger period of time. Marxsen has argued that ch. 13 indicates that Mark wrote between A.D. 67 and 69 to urge the church to leave Jerusalem and resettle in Pella. S. G. F. Brandon, in *Jesus and the Gospels* (1967), ch. 5, placed the publication date of Mark at the opposite end of the historical continuum, A.D. 66-72, and made Mark an apologist for the Church in the years after the Flavian triumph of A.D. 71-72. The sociological setting of Mark is the theme of H. C. Kee's *Community of the New Age: Studies in Mark's Gospel*. Kee placed the Markan community in rural Syria and thought it had suffered persecution in the early years of the war of A.D. 66-70.

VII. Origin and Destination.–No final answers are possible to the queries where and to whom the Gospel was written, but external and internal evidence imply that Mark wrote in Rome and for a gentile constituency.

A statement in Irenaeus, endorsed by the otherwise divergent testimony of Clement, is that Mark was in Rome when the Gospel was published. The anti-Marcionite prologue preserves the same tradition: "After the departure of Peter himself he [Mark] wrote down this same Gospel in the regions of Italy [*in partibus Italiae*]." (Cf. also R. M. Grant, *ATR*, 23 [1941], 231ff.)

This evidence tallies with Papias's witness that Mark was Peter's interpreter and the knowledge that Peter was martyred at Rome. (Cf. O. Cullmann's full treatment in *Peter* [Eng. tr., 2nd ed. 1962], pt. 1, ch. 3.) 2 Tim. 4:11 and 1 Pet. 5:13 locate Mark in Rome, if one assumes (with most commentators) that in the latter text "Babylon" is a cryptogram for the capital city of the empire.

The earliest attestation of the use of the Gospel comes from 1 Clem. 15:2 and Shep. Herm. Sim. 5:2, which are both associated with Rome. (On the latter text, see Johnson, p. 7.) 1 Clement quotes Isa. 29:3 in the form in which it is used in Mk. 7:6 (cf. H. Köster, *Synoptische Überlieferung bei den apostolischen Vätern* [*TU*, 65, 1957], pp. 2ff.; cf. pp. 105f. on 2 Clem. 7:6 (= 1 Clem. 17:5), which cites Isa. 66:24b in the same way as Mk. 9:48 does).



A Roman place of origin is consonant with the references in Mk. 8:34-38; 10:38f.; 13:9-13 to persecutions and martyrdom. The claim that these texts are best understood in the light of Nero's treatment of Christians in Rome in the 60's is not conclusive, despite Rawlinson's attractive case for it (pp. xxi f.). (Cf. Streeter, *The Four Gospels*, pp. 495ff.; W. L. Lane, comm., pp. 12-17.)

This consentient witness to the Roman origin of the Gospel is contradicted by Chrysostom's report that the Gospel originated in Egypt (*Hom. 1 in Mt.* 7). This statement, as Johnson said (p. 15), is probably based on a misunderstanding of Eusebius (*HE* ii.16.1): "They say that Mark set out for Egypt and was first to preach there the Gospel which he had composed" (cf. also Eusebius *HE* ii.24 on Mark's association with the church at Alexandria). An Alexandrian connection with Mark should not be lightly dismissed (see Manson, *Studies*, pp. 38f.), but the evidence seems weighted in favor of Rome.

The arguments of some modern scholars (e.g., J. V. Bartlet, comm. [1922], pp. 36f., following G. C. Storr of Tübingen), that Antioch was the place of origin, are more speculative than substantial. Storr, for instance, claimed that Mk. 15:21 referred to the father of Alexander and Rufus because his sons went to Antioch in the gentile mission of Acts 11:19f., but this is sheer hypothesis. Nor is W. C. Allen's theory any more convincing. He believed (following Blass and C. C. Torrey) that the Gospel was first written in Aramaic in Jerusalem and later translated into Greek at Antioch, a bilingual center of early Christianity of which G. Dix (*Jew and Greek* [1953], p. 33) wrote: "It was a bastion of Hellenism in the Syriac lands . . . the inevitable meeting point of the two worlds." More recently, W. Marxsen (pp. 64-66) sought to uphold the view that the Gospel was first published in Galilee.

The internal evidence of the Gospel almost conclusively proves that Mark wrote for gentile readers. The Evangelist explained Jewish customs and practices that may have been unfamiliar to his non-Palestinian readers (e.g., 7:3f.). Aramaic expressions that remain in the text in a Grecized form are interpreted, e.g., *Abba* (14:36), which receives the same interpretative addition in Rom. 8:15; Gal. 4:6. But the addition is only approximately correct, as Johnson noted (pp. 15f.). In other places, however, Mark incorporated a block of teaching in its Aramaic form, woodenly turning it into Greek (esp. in 14:22ff., the Semitic background of which has been demonstrated by J. Jeremias, *Eucharistic Words of Jesus* [Eng. tr. 1966], pp. 173-184). A series of Latinisms (see III.A above) betrays both the author's gentile milieu and a gentile audience for whom these expressions would have been meaningful. Some scholars (e.g., Johnson, pp. 15, 18f.) have claimed that Mark was unacquainted with Palestine because his references to place names (such as Dalmanutha, 8:10; Gerasa, 5:1; Bethsaida, 7:26), the Herodian family (6:17), and Jewish divorce laws (10:12) show no firsthand knowledge of Palestinian topography and life. The allegation of inaccuracy is unnecessary if Mark was simply following the tradition he received. He normally wrote as if more concerned to relate the gospel tradition than to interject his personal reminiscences.

VIII. Special Problems.–A. Opening. The abrupt opening of the Gospel (1:1), "The beginning of the Gospel of Jesus Christ, the Son of God," has often called forth comment. The usual view is that this sentence is the title of the whole book (e.g., Marxsen, p. 125), but it may be simply the heading of the first paragraphs (to 1:8 or 1:13, as R. H. Lightfoot thought, *Gospel Message of St. Mark*, pp. 15ff.; cf. also N. B. Stonehouse, ch. 1). The textual problem, involving the omitting of "Son of God," is well considered

Beginning of Mark's Gospel in Codex Sinaiticus (4th cent. A.D.), which does not have the later reading "son of God" in v. 1 (Trustees of the British Museum)

by Cranfield, comm., p. 38, with reasons given for its (non-significant) omission from patristic and some textual authorities.

Allied with the theory that the first verse introduces only the opening sections of the Gospel are two other suggestions. The first is that the verse is syntactically related to what follows in v. 4. Verses 2f. are thus a parenthesis of the OT *pēšer* type, citing Malachi and Isaiah as prophetic witnesses to the advent of Christ. If this OT section is omitted, the text reads smoothly: "The beginning of the Gospel of Jesus Christ . . . was [Gk. *egéneto*] John, who baptized in the wilderness."

T. W. Manson (*Studies*, pp. 31ff.), following Spitta, argued that Mark's beginning is defective because it fails to follow the "normal order . . . that first the fact is stated, and then the relevant [OT proof] text . . . cited with the formula *kathṓs gégraptai* or the like." Manson's explanation was that the first page of Mark's Gospel became mutilated or missing (he assumed that the Gospel was written in codex form). This explanation was criticized by H. A. Guy (pp. 155ff.) on the ground that if the page was lost through "fair wear and tear" (as Manson claimed), it is difficult to imagine that the autograph became mutilated in this particular way. (Guy's argument bears on the related question of the so-called Lost Ending of Mark.) Also, Manson's statement that Christian practice was first to give the event and then to add the OT corroboration holds for only a certain usage; many instances of Christian apologetic in Acts begin with the OT texts and then show how Jesus fulfilled them.

Explanations of the opening verses, therefore, need not have recourse to the idea of a lost page. If the OT texts

are a parenthesis, the subject of v. 1 is picked up at v. 4; this pattern accords with the early Christian kerygma of Acts, in which John the Baptist is made the *terminus a quo* (Acts 1:22; 10:37; 13:24f.) of the Gospel story.

B. Ending. The last twelve verses (16:9-20) are something of a cause célèbre of textual criticism. (Cf. esp. Rawlinson, pp. 267ff.; F. F. Bruce, *EQ*, 17 [1945], 169ff.; also N. B. Stonehouse, ch. 4, pp. 86ff.; W. R. Farmer, *Last Twelve Verses of Mark* [1974].)

The facts are that (1) the verses are omitted by ℵ, B, Sinaitic Syr., and most MSS of the Armenian versions; and Eusebius is a witness that the best MSS in his day ended at v. 8a; (2) a "shorter ending" (printed in the RSV and NEB) is attested along with TR in L, Ψ, 579, Sah., Eth., Harclean Syr., and the earliest Boh. MS, while in k the shorter text stands alone; (3) a third ending is given by W, which adds, in addition to vv. 9-20, an extra interpolation after v. 14; (4) a tenth-century Armenian version ascribing vv. 9-20 to "the presbyter Ariston" is too late to be of any value, although F. C. Conybeare professed great respect for this attribution (*Expos.* [4th ser. 1893], pp. 241-254; [1896], pp. 401ff.). C. S. C. Williams (*Alterations to the Text of the Synoptic Gospels and Acts* [1951], p. 41) regarded this attribution as possibly no more than a guess based on the Armenian version of the well-known passage in Eusebius *HE* iii.39, which refers to the presbyters Aristion and John (notice the spelling in Armenian E 299: *"Ariston [sic] eritzu"*).

The "longer ending" (which is printed in the AV) was apparently known to Tatian (*ca.* 170) and occurs in a preponderant number of MSS (C, L, Sah., Boh., A, W, D, Old Lat. — except k, which represents the African Latin). Von Soden (*Schriften des NT* [1902-1913], I, 1621ff.) suggested that Justin (*ca.* 140) wrote this longer recension (but contra see E. R. Buckley, *JTS*, 36 [1935], 176). Whether or not this attribution is correct, it is clear that the longer ending was written in the first half of the 2nd cent. (so Williams, p. 42). But it is equally clear that Mark did not write it (clearly shown by J. K. Elliott [*Theologische Zeitschrift*, 27 (1971), 255-262], who demonstrated non-Markan linguistic elements in 16:9-20). Several minuscules marked it with an asterisk to show that it was suspect. Moreover, both the vocabulary and the style of the verses differ noticeably from the rest of the Gospel (against Farmer, who seeks to show Markan authorship of 16:9-20). The description of Mary in 16:9, e.g., apparently overlooks the earlier reference to her in v. 1. Verses 9-20, which seem to consist of material taken from the other Gospels, also endorse the supposition that the longer ending was added (as were the "shorter" and the "third" ending) by a later scribe or editor who thought that "they were afraid" (16:8) should not close the chapter and the Gospel. See Lane's full note in his comm., pp. 601-605.

The question now emerges whether Mark intended to finish here. Was it accidental that he did so? Was he prevented from completing his task? Or was the ending deliberately suppressed because it was believed to contradict the Resurrection accounts in the other Gospels, as K. Lake (*The Resurrection of Jesus Christ* [1907], pp. 70f., 88ff., 143ff., 224ff.) and R. Bultmann (*HST*) believed? See also Williams, pp. 44f., for further motives for suppressing the original ending.

Many scholars following the initial discussion of Wellhausen (*Das Evangelium Marci* [1903], p. 146) argued that Mark intended his work to finish with the cryptic *ephoboúnto gár*, "for they were afraid." J. M. Creed (*JTS*, 30 [1930], 175ff.), R. R. Ottley (*JTS*, 27 [1926], 407ff.), Lohmeyer (pp. 356-360), and especially R. H. Lightfoot (*Locality and Doctrine in the Gospels* [1938], chs. 1–2; *Gospel Message of St. Mark*, pp. 80-97, 106-116), A. Farrer (*A Study in St. Mark* [1952], pp. 172-181), and N. B. Stonehouse (pp. 101ff.) all espoused this theory on the ground that the unusual ending is not impossible and has certain precedents (given in Lightfoot, *Locality*, pp. 10-18, to answer the charge of W. L. Knox, *HTR*, 35 [1942], 13ff., that such an abrupt ending would violate all the canons of ancient story-telling). Furthermore, the conclusion accords with the note of mystery and the "numinous" that some think pervades the Gospel as a whole (cf. Dibelius's dictum that Mark is a book of "secret epiphanies").

The major difficulty with this view is conceiving a situation in which the Evangelist would break off in what seems to be the middle of a sentence and leave the women in great fear. Some interpreters, therefore, have proposed that the words "they were afraid" (*ephoboúnto*) should be taken to mean "reverential awe or fear" (so Stonehouse, p. 107) rather than terrified uncertainty. On this view, the Gospel ends on the climactic note of the human response to the solemn announcement (in vv. 6f.) that Jesus of Nazareth is risen and will await His followers in Galilee. "The chief impact of the verse [i.e., v. 8] is simply to describe the indescribable. . . . The amazement of the women turns into trembling, astonishment, fear, flight, silence. All of these are considered in the Bible to be appropriate and normal human responses to an appearance of God, to a message from God, to an event in which God's power is released" (P. S. Minear, p. 136). Moreover, it accords with the theology of the Gospel as a whole that the note of mystery in the revelation of the hidden Son of man should be preserved up to the last verse.

This reconstruction has not persuaded all scholars. Perhaps most are content to believe that Mark's abrupt ending may be explained in one of a number of coincidental ways. The termination of the Gospel may have resulted from accidental or deliberate damage; the difficulty with this view is the corollary that "this damaged copy should be the sole legitimate ancestor of all existing manuscripts" (Taylor, *The Gospels*, p. 50).

The remaining possibility is that the original author never completed the Gospel, for reasons that cannot be ascertained (Rawlinson, p. 270; Zahn, *Intro. to the NT* [Eng. tr. 1909], II, 930ff.).

IX. Markan Theology.–If we interpret the term "theology" strictly, we must be content with the simple observation that Mark's Gospel assumes as a fundamental postulate the Jewish belief in one holy and righteous God whose will is revealed in His law. To the question of which commandment is most important, Jesus replied, in the orthodox Jewish fashion, "The most important is . . . ," and quoted Dt. 6:4-9 (the first word of which, Heb. *šᵉmaʿ*, formed the Jewish credo, along with Dt. 11:13-21; Nu. 15:37-41). This great statement of Hebrew monotheism underlies also Mk. 2:7; 10:18. To confess the Shema (see the rubrics for this in Mish. *Berakoth* i-iii) was tantamount to professing Judaism, taking upon oneself the yoke of the kingdom. The binding authority of God's holy law forms the basis of the controversy story in Mk. 7:1-23.

With a wider understanding of the word "theology" there are two main themes in the Gospel — the kingdom of God and the Christological presentation of Jesus. (For a wider setting of the Evangelist's theology see R. P. Martin, *Southwestern Journal of Theology*, 21 [1978], 23-36.) But these themes cannot be considered in isolation from each other. This Gospel illustrates more than any other book in the NT the famous dictum of Origen (comm. on Mt. 18:23) that Christ Himself is the kingdom (*autobasileía*). Moreover, Jesus did not herald and explicate the reign of God as though He were but its announcer, as Bultmann

argued (*Jesus and the Word* [Eng. tr., 2nd ed. 1958]; see the perceptive criticism of this evaluation in G. Lundström, *Kingdom of God in the Teaching of Jesus* [Eng. tr. 1963], pp. 146-155). Rather, the kingdom brought Him, as R. Otto showed in *The Kingdom of God and the Son of Man* (Eng. tr., 2nd ed. 1943), p. 103.

A. Kingdom of God. C. E. B. Cranfield's commentary (pp. 63-68) contains a lucid account of the meaning of this term in the Gospels. The kingdom of God is God's rule in human life. It is an axiom of the modern study of biblical language that the Greek phrase *hē basileía toú theoú (tōn ouranōn)* goes back to Heb. *malkûṯ šāmayim* (Aram. *malkûṯā' dišmayā'*), which can denote only the kingly rule of God, the activity of God in His sovereignty and rulership. One aspect of this kingly rule is the personal allegiance of the pious Jews, who are said by the rabbis to take upon themselves "the yoke of the kingdom" (e.g., T.P. *Berakoth* 4a, 7b; so Dalman, *Words of Jesus* [Eng. tr. 1902], pp. 96ff.). It has also been maintained, however, that the immediate background of Jesus' use of the term "kingdom of God" is to be sought not in rabbinic Judaism but in the apocalyptic literature. N. Perrin (*Kingdom of God in the Teaching of Jesus* [1963], pp. 168ff.) cited and discussed the most germane texts: Ps. Sol. 17:3; Sib. Or. 3:46f.; Asm. M. 10:1; 1QM 6:6; 12:7. In these five references the key term, the kingdom of God, expresses the expectation that God will act decisively and openly and bring about the inauguration of a new age in which He will manifest His sovereignty over all His foes (and foes of Israel or a remnant within Israel). A synagogue prayer (in the Kaddish) voices the same earnest hope: "May He [God] establish His sovereignty in your lifetime and in your days and in the lifetime of all the house of Israel even speedily and at a near time."

The Gospels show that the coming of Jesus and His teaching in Galilee signaled that this expectation was being realized. Mk. 1:15 contains the important announcement that with the coming of Christ the kingdom is present: "The time is fulfilled; the rule of God is at hand; repent and put your trust in the good news." In Mark this fact is attested in four ways.

(1) The parables, such as 4:26-29 (found only in Mark) and Jesus' illustrations of His work in 2:18-22, assume that a new order has appeared.

(2) The binding of the "strong man" in 3:27 is to be understood in the light of the expectation that Satan would be bound in the last days (Asm. M. 10:1). W. G. Kümmel (p. 109) commented: "It is the meaning of the mission of Jesus, when announcing the *approach* of the Kingdom of God, to make this future at the same time already now a present reality." The Qumrân texts have shown the added importance of this claim that the devil is bound, for the men of Qumrân confessed that the powers of evil ("the dominion of Belial") were strong against them (e.g., 1QM 13) and yearned for an eschatological deliverance when Satan would be cursed and checked. The community's expectation of a new, eschatological Torah (see esp. CD 12:23; 14:19) elucidates Jesus' claim to supersede the law of Moses in its rabbinized form (cf. Mk. 10:2-10).

(3) Many of the acts of Jesus can make sense only if they are seen as His tacit announcement that the kingdom is on the scene. The outstanding events in Mark are (a) the conflict with the demons (Mt. 12:28 par. Lk. 11:20; cf. the important discussion of Kümmel, p. 105, and the extended comment of J. M. Robinson, pp. 33-42); (b) the entry into the Holy City (Mk. 11:1-10) and the cleansing of the temple (11:15-17), both of which are His claim to realize the present hour as the Savior who was expected at the end time; and (c) His offering bread and wine at the Last Supper (14:17-25), which allowed "the disciples to share the messianic salvation in present experience" (Kümmel, p. 121).

(4) Finally, His claim to build a new temple (reported in 14:57f.) was an overt admission that He had come to establish in the present a new order to replace the old Judaic one. Such an expectation was cherished by the apocalyptists (1 En. 90–91; Jub. 1) and the Qumrân covenanters (see B. Gärtner, *The Temple and the Community in Qumran and the NT* [1965]).

It seems indisputable, then, that the Jesus of Mark claimed to embody the present kingdom in His own person and acts. But this is not the whole story, or else the school of "realized eschatology" would have carried the day. Side by side with the teaching "the kingdom of God is in your midst" (Lk. 17:21) is the idea that the kingdom is an object of future hope. In Mark the clearest references are: 9:1 — the coming of the kingdom "with power" lies in the future (i.e., some time after the announcement of the Passion); 13:26 — the Son of man will come in apocalyptic glory, at an unspecified time (v. 32). This prospect is held out at the trial scene (14:62), since it had formed the future orientation of the Lord's thought and the disciples' hope at the Last Supper (v. 25).

These apocalyptic pronouncements should not be dismissed as spurious or as misunderstood by the early Church. The attempts of T. F. Glasson (*Second Advent* [3rd ed. 1963]) and J. A. T. Robinson (*Jesus and His Coming* [1957]) to do so have not carried conviction, mainly because verses like Mk. 13:26 and 14:62 do not demand any other interpretation than the most straightforward one, that Jesus envisaged a visible coming to earth and that advent explains the Parousia hope of the later Church (cf. J. E. Fison, *The Christian Hope* [1955]; G. R. Beasley-Murray, *Jesus and the Future* [1954], pp. 90f.). See D. Wenham, *Theological Student Fellowship Bulletin,* 71 (1974), 6-15; 72 (1975), 1-9.

It is scarcely possible to survey the modern attempts to hold together the twin ideas of a kingdom that came with the announcement of Jesus in Galilee (1:15) and the futurist hope of 13:26, 30; 14:62. Kümmel supplied what may be the Ariadne's thread out of the maze of solutions. He wrote: "The inseparable union of hope and present experience demonstrate the fact that the true meaning of Jesus' eschatological message is to be found in its reference to God's action in Jesus himself, that the essential content of Jesus' preaching about the Kingdom of God is the news of the divine authority of Jesus, who has appeared on earth and is awaited in the last days as the one who effects the divine purpose of mercy" (p. 155). In more precise form, the issue of the kingdom is a christological one; the thought that binds together the kingdom's present manifestation and its future glory is the ambiguous character of the kingdom of God itself.

The kingdom came in Christ. This strand of teaching is shown clearly in Mt. 11:2-6 par. Lk. 7:18-23; Mt. 12:28; 13:16f. par. Lk. 10:23f.; Lk. 10:18; 16:16; and probably in Mt. 11:12f. But Jesus revealed the kingdom "not in such a way as to make assent unavoidable, but in a way that still left room for men to make a personal decision" (Cranfield, p. 67). Mark's account of Jesus' teaching makes this plain. The Lord announced to His disciples "the secret [Gk. *mystérion*] of the kingdom of God" (4:11), which is the truth that the rule of God was personally present in His advent as the Son and Messiah of God. But the incarnate Lord shunned all that would give the impression of earthly splendor and worldly power. He taught indirectly by parables to avoid inflaming the people and leading them to expect a messianic war against the Roman power (Ps. Sol. 17–18 had, a few decades earlier than the time of the public

ministry, hinted that this war would be the true work of the Lord's anointed). Jesus tried to conceal His identity (see Cranfield, p. 157). Yet the kingdom is a divine reality no less real because it is hidden and because its presence is unattended by signs and portents that would unmistakably declare its power (cf. A. M. Ambrozic, *The Hidden Kingdom: A Redaction-Critical Study of the References to the Kingdom of God in Mark's Gospel* [1972]). But to those who by faith penetrate the Lord's humanity and His claims to allegiance and discipleship, the truth is given that He is the divine Son and the King of glory whose ultimate destiny is a universal dominion (8:38–9:1; 13:26; 14:62).

This is the significance of Peter's confession at Caesarea Philippi and the subsequent disclosure in the Transfiguration. But the disciples had still to learn that the way to lordship is the way of the cross and that His title to universal sovereignty was in a ministry of service and obedience to death (10:35-45). Jesus taught the mystery of the kingdom to disabuse their wrong notions of the kingdom (they [vv. 35ff.] and the crowd [11:10] thought of it in terms of political influence and worldly fame) and to show that the kingdom involves lowly service on behalf of others. The greatest object lesson was His self-sacrifice on the cross; only by His death and resurrection could the kingdom come.

B. Person of Jesus Christ. Just as the kingdom was veiled throughout Jesus' earthly ministry with the promise that one day it would be openly displayed, so nothing in Jesus of Nazareth compelled belief that in Him God was personally present and active in saving power. Jesus' own townspeople recognized Him as "the carpenter" (6:3), who belonged to an ordinary family, and were scandalized. Not less affronted were the religious authorities, who sought to explain His exorcisms by insinuating that He was a fake "holy man" in league with the devil (3:22f.). Moreover, there is some justification for fastening upon His human traits in Mark's Gospel. Particularly in the Passion narrative the stark reality of His sufferings comes out — at Gethsemane (14:33f.) and on the cross (15:34). Mark more than the other Gospels reveals the grim realism and unspeakable horror of His Passion (Hans-Ruedi Weber, *The Cross: Tradition and Interpretation* [Eng. tr. 1979], pp. 103-110).

Yet the darkness of the Lord's humiliation and suffering is relieved and shot through with shafts of light. For all his preoccupation with the persecuted Church to which he addressed his Gospel, Mark did not picture the Lord as a martyr. The Evangelist made the frontispiece of the entire Gospel the full post-Easter confession — that Jesus Christ is the Son of God (*si vera lectio*). The citation of OT prophecy (1:3 quoting Isa. 40:3) indicates that "in the Prologue he [Mark] is pointing to the truth . . . that the One whose ministry he is about to record is the One whom the church acknowledges as 'the Lord'" (Cranfield, *IDB*, III, 273).

Throughout His public ministry the Lord deliberately made no overt claims to His divine nature and status. The "hiddenness" of Mark's christological portrait is an outstanding feature. He recorded that Jesus refused to offer a sign (8:11f.), silenced demons who knew Him (1:25, 34; 3:12), shunned all publicity after performing miracles (1:44; 5:43; 7:36; 8:26), commanded the disciples not to publish the news of His messiahship (8:30; 9:9), and taught by the indirect method of parables (4:33f.).

Yet some confessed His true stature; they were forthwith bidden to secrecy. The demons were the first (1:24, 34; 3:11f.), followed by various classes of folk who witnessed His miracles (1:45; 5:43; 7:36f.; 8:26; 10:52). The disciples confessed Him as the Messiah and were similarly enjoined to secrecy (8:30; 9:9). The Roman soldier admitted His more-than-human character (15:39), and the women at the tomb were confronted with the news of His victory over death, which they greeted with a stunned silence (16:8).

W. Wrede used this body of evidence (in his influential *Das Messiasgeheimnis in den Evangelien* [1901]) to support the theory of the "messianic secret" in Mark. (See V. Taylor, *Expos.T.*, 59 [1947/48], 146-151; 65 [1953/54], 246-250.) On Wrede's view, Jesus never claimed to be the Messiah in His earthly life; the Church created this status after the Resurrection and read it back into the Gospel story as a piece of dogmatic belief superimposed upon the evidence. Rawlinson (pp. 258ff.) showed the weakness of this hypothesis but noted that Mark *does* contain a messianic secret, bound up with Jesus' claim to be the Messiah (cf. J. D. G. Dunn, *Tyndale Bulletin*, 21 [1970], 92-117; Martin, *Mark*, pp. 91-97).

This leads to a consideration of the chief christological titles in Mark: Messiah, Son of man, Son of God.

1. Messiah. First-century Palestinian Judaism had two definite strands of messianic expectation (although it must be conceded that the sources do not always yield consistent pictures, and the evidence from Qumrân shows that such expectation could acquire features differing from normative, rabbinic Judaism). The Messiah was viewed as both a political warrior-king (as in Ps. Sol. 17–18, although cf. *TDNT*, IX, *s.v.* χρίω κτλ. [Grundmann, Hesse, de Jonge, van der Woude] in relation to this assumption) and as a celestial, quasi-divine figure who executes a universal judgment (as in the Enoch literature, although the dating of 1 Enoch is disputed and the Similitudes of Enoch significantly have not been found in the Qumrân caves). Despite the ambiguity of the texts depicting the messianic salvation for which the pious Jews yearned, it seems clear from the data of the Gospels themselves that both the disciples and the people associated the Messiah with national glory and supremacy. The temptation narrative of Mt. 4:1-11 par. Lk. 4:1-13 provides the best insight into dominant messianic expectations. Miraculous manna, worldly dominion, and preternatural signs — these were the hopes of a people subject to the Roman *imperium* who groaned because of economic taxation and spiritual frustration.

On the assumption that messiahship conjured up a picture of a messianic war with Rome and Israel's worldwide victory and glory, we can understand why Jesus at every point turned away from the popular ideal. When the crowd followed Him seeking food or healing, He retired lest His mission be misunderstood (Mk. 1:36-38; cf. Jn. 6:15, 26). When the disciples asked for thrones or defended Him with force, He rebuked them (Mk. 10:35-45; Lk. 22:49-51). He preemptorily refused to provide a sign as a credential of His ministry (Mk. 8:11-13; cf. Lk. 11:29f.).

It is not surprising, then, that in Mark's witness to Him, Jesus adopted an attitude of distinct reserve to the actual title "Messiah." Three texts in particular merit attention: Mk. 8:27ff.; 14:61f.; and 15:2ff. O. Cullmann's convincing treatment (*Christology of the NT* [Eng. tr., 2nd ed. 1963], pp. 117ff.) demonstrated that (1) Jesus showed extreme reserve toward the title "Messiah" and, as it was connected with popular ideas of earthly power, saw in it Satanic temptations; (2) in decisive passages He substituted for Messiah the title "Son of man"; and (3) over against the Jewish political conceptions He set the picture of His mission as the suffering Servant of the Lord in Isaiah.

2. Son of Man. This enigmatic title (found esp. in Mark at 2:28; 8:31ff.; 10:45; 14:62) was peculiarly suited to Jesus' purposes, for it could easily carry the overtones of His

characteristic and distinctive teaching. For Him the person of the Messiah blended a present humiliation and obedience unto death with a future glory. (Phil. 2:6-11 may well be the "text" of which Mark's Gospel is the extended commentary.) He spoke, therefore, about the Son of man who is rejected and killed (cf. the predictions of the Passion) but who is vindicated by God and enters upon His kingdom and dominion. This theme of humiliation-exaltation is common in much early Christian literature (see the evidence of early hymns and confessions in R. P. Martin, "Some Reflections on NT Hymns," in H. H. Rowdon, ed., *Essays in Christology Presented to Donald Guthrie* [1982]; "NT Hymns: Background and Development," *Expos.T.*, 93 [1982]). In the Markan Christology, Jesus is the true Servant-Son who offered to God a perfect obedience and is honored by Him in His future triumph.

3. Son of God. The title "Son of God" is frequent, whether explicitly or implicitly, in this Gospel (1:1[?], 11; 3:11; 8:38; 9:7; 12:6; 13:32; 14:36, 61; 15:39). The OT background seems to be that of Pss. 2:7 and 89:27 (MT 28), but the texts that speak of Israel as God's son (Ex. 4:22f.; Hos. 11:1; etc.) should not be overlooked. Certain scholars (e.g., Bultmann, *Theology of the NT* [Eng. tr. 1952], I, 128ff.) have argued that this title was applied to Jesus in the Hellenistic Church on the supposed analogy between Jesus and Greek "divine men" who exercised a peripatetic ministry in the ancient world (like Apollonius of Tyana). But a careful examination of the Gospel data shows that the picture of Jesus as Son of God in Mark especially is "completely un-Greek" (see J. Bieneck, *Sohn Gottes als Christusbezeichnung der Synoptiker* [1951]; J. D. G. Dunn, *Christology in the Making* [1980], ch. 2). The most direct antecedents of the title are Jewish.

No evidence, however, clearly shows that "Son of God" was ever applied to the Messiah in rabbinic Judaism (see W. Manson, *Jesus the Messiah* [1942], pp. 103ff.). (Evidence from Qumrân, in 4QPs Dan A[a], has been taken to mean that "son of God *was just coming into use* as a Messianic title in pre-Christian Judaism" [R. H. Fuller, *Foundations of NT Christology* (1965), p. 32]. Earlier references in the DSS are in 4QFlor, citing 2 S. 7:14, and 1Q28*a*, which seems to refer Ps. 2:7 to God's begetting the Messiah.) Thus the title apparently derives from the Lord's unique, personal relationship to God, from His awareness of His destiny, which "had its support, if not its origin, in something which . . . can only be called the filial quality of his spirit in relation to God" (Manson, p. 107). Verses in Mark such as 1:11; 9:7; 12:6; 13:32; 14:36 are a window through which Christian eyes may see the mystery of the unique filial relationship of Jesus to God the Father. The superscription of 1:1 is congruous with the presentation of the Lord in the Gospel, for the following record tells of the Father's Beloved, whose real and filial nature is His secret, disclosed only to favored persons (4:11), who trod a pathway of lowly obedience and suffering to His death, yet who, after the pattern of Isaac (see A. Richardson, *Intro. to the Theology of the NT* [1958], pp. 228f., for Isaac-Christology), came again from the place of sacrifice, truly "raised up" and vindicated. The Christology of Mark upon close examination turns out to be as high as that of John (I. H. Marshall, *Origins of NT Christology* [1976], ch. 7).

MARK, JOHN. A person known variously as "John whose other name was Mark," "John called Mark," and simply "John" or "Mark" (Acts 12:12, 25; 13:5, 13; 15:37, 39; Col. 4:10; 2 Tim. 4:11; Philem. 24; 1 Pet. 5:13; AV also Marcus [Col. 4:10; Phlm. 24]). These texts indicate his close association with the first apostles, especially Paul and Peter, and family connection to his "cousin" Barnabas (Col. 4:10). Both his home and family played an important part in early Christian history. His mother Mary was a member of the Jerusalem church. Christians regularly met in her home (Acts 12:12), and Peter came there after his release from prison.

Mark's first days as a believer are unknown. Zahn's fanciful suggestion that the "young man" of Mk. 4:51f. should be identified with John Mark lacks substance. The first solid evidence about him is that he joined the missionary party sent out from Antioch in Syria (Acts 13).

I. Mark and Paul.—From the time of Acts 13:5 John Mark traveled with Paul and Barnabas, possibly in the role of catechist (so W. Barclay, "A Comparison of Paul's Preaching," in W. W. Gasque and R. P. Martin, eds., *Apostolic History and the Gospel* [1970], pp. 169ff.). But Mark's decision (for reasons not supplied in the NT) to leave the apostolic group as it pressed beyond the Taurus mountains of Asia Minor (v. 13) caused some bitterness later when Barnabas wanted to take him on the second journey (15:39). The result was that Barnabas, out of loyalty to his kinsman Mark, left Paul and went off with Mark to Cyprus.

Some years later (exactly how long depends on a dating of the letter to the Colossians) Mark was restored to Paul's favor (Col. 4:10), although the wording of the appeal — "If he comes to you, receive him" — has suggested to commentators (see R. P. Martin, *Colossians* [1972], pp. 142f.) that Mark was perhaps only slowly winning back his reputation in the Pauline mission churches. Thus he would have needed Paul's special plea, "receive him," i.e., without censure or suspicion, especially since Mark does not seem to have been widely known at this period and had to be identified as Barnabas's cousin. An even more moving display of reconciliation comes in 2 Tim. 4:11, where Mark is unhesitatingly commended as a faithful Christian worker. His restoration was apparently complete and, if the letter to Timothy was written while Paul was a prisoner in Rome, the summons to bring Mark to Rome would mean that he was at Paul's side during the apostle's final days.

II. Mark and Peter.—1 Peter 5:13 also suggests that John Mark was in Rome. Greetings are sent from the church "at Babylon" and from "my son Mark." "Babylon" is usually regarded here as a sobriquet for Rome, as in Rev. 14:8; 17:5 (Eusebius *HE* ii.25.5-8; *see also* PETER, FIRST EPISTLE OF).

The first link between Mark and Peter is found in 1 Peter. This reading of the evidence, however, has been challenged on two grounds. The first, set forth by D. E. Nineham, is that "Mark (Marcus) was the commonest Latin name in the Roman Empire and that the early Church must have contained innumerable Marks" (*St. Mark* [1963], p. 39). The inference is that the tradition associating Mark with Peter and with the writing of the second Gospel is probably mistaken, since many persons with the same name may have lived in Rome. No one can know how many people in Christian circles were named Mark. Nineham's many examples of Romans whose *praenomen* (first name) was Marcus are inconclusive, because Marcus was the *cognomen* (family name) of John Mark. What can be maintained with some plausibility (as by W. Michaelis, *Einleitung in das NT* [2nd ed. 1965], pp. 53-55) is that the several allusions to "John whose other name was Mark" in the NT form a consistent picture and that no other Mark is recognized as a candidate for the office of evangelist or companion of Paul and Peter in patristic times.

The second ground on which the theory is challenged is that 1 Peter is a later, nonapostolic composition. Thus, alleged F. W. Beare (comm. on 1 Peter [3rd ed. 1970], *in loc.*), the collection of names in 5:12-14 is a literary device to recall the distant apostolic age, and "it required no great effort of the imagination to place Marcus and Silvanus in the entourage of Peter at Rome." But the hypothesis that 1 Peter is a postapostolic document is far from proved and, when tested by the objective evidence of its historical allusions to persecution and the type of Christianity it describes, can hardly support other conclusions drawn from it (see J. N. D. Kelly, *Comm. on the Epistles of Peter and Jude* [*HNTC*, 1969], pp. 26ff., 33ff., as well as his observations on 5:13, p. 220).

III. Mark and the Second Gospel.—The *testimonium* of Papias (recorded in Eusebius *HE* xxxix) that situates Mark at Rome with Peter ascribes a close relationship to Mark and Peter. It thus confirms the authenticity of Mark's authorship of his Gospel, since authenticity depends upon his intimate association with Peter, whose teaching he purportedly related. The key term describing Mark's relationship to Peter, *hermēneutēs*, has several possible meanings. The most likely are: "translator," as Mark turned Peter's Aramaic or Greek into a more acceptable form; or "interpreter," as Mark acted as teacher and applied the *didachē* as a follow-up to Peter's preaching of the *kērygma*. W. C. van Unnik (*ZNW*, 54 [1963], 276f.) has made the positive suggestion that, whatever the nuance of this Greek word, the content of Mark's interpretation is more important than the way that he performed his role as interpreter. The implication is that Mark became Peter's *hermēneutēs* by publishing a Gospel in which he recorded Peter's teaching — or as much of it as he remembered, modified by his knowledge of Paul's gospel and of that gospel's effect on the life of the mission churches in the Greco-Roman world.

This last statement raises the question of Papias's purpose in closely connecting Mark's Gospel and Peter's teaching. Recent discussion of the Papias text (see R. P. Martin, *Mark: Evangelist and Theologian* [1972], pp. 80-83) shows that this church father probably defended Mark's Gospel to refute Marcion's gnostic use of Luke's Gospel. Papias's evident interest in binding Mark as an interpreter of the apostolic gospel as closely as possible to an apostolic source would explain his insistence on Mark's strong link to Peter. Once that link is seen to be no more than an inference from the NT data, it becomes possible to submit that Mark's closer ties are with Paul. Mark should then be given his due as the evangelist who records, in the newly created literary *Gattung* of Gospel, the essential message of the Pauline *kērygma*, namely, the two-beat rhythm of the rejection and death of the Son of God and His vindication, set within the framework of the story of a fully human life (for an elaboration of this thesis see R. P. Martin, *Expos.T.*, 80 [1969], pp. 361-64; *Mark: Evangelist and Theologian* [1972]).

See MARK, GOSPEL ACCORDING TO V.

R. P. MARTIN

MARKET; MARKET PLACE [Heb. *rᵉḥôḇ*] (Ps. 55:11 [MT 12]; Prov. 1:20; 7:12); AV STREETS; NEB PUBLIC SQUARE, PUBLIC PLACES; [*sᵉḥōrâ*] (Ezk. 27:15); AV MERCHANDISE; NEB SOURCE OF COMMERCE; [Gk. *agorá*] (Mt. 11:16; 20:3; 23:7; Mk. 6:56; 7:4; 12:38; Lk. 7:32; 11:43; 20:46; Acts 16:19; 17:17); AV also STREETS; NEB also STREET, MAIN SQUARE, CITY SQUARE; **MEAT MARKET** [Gk. *mákellon*] (1 Cor. 10:25); AV SHAMBLES.

Hebrew *rᵉḥôḇ* usually seems to designate a broad, open place near the city gate or gates. This plaza was the site of formal and informal assemblies and meetings; of speeches, proclamations (Prov. 1:20), celebrations, and military displays; of public lamentations; of playing, sitting, shopping, socializing (Prov. 7:12), judging (Ps. 55:11), and even sleeping if no lodging was available (Gen. 19:2, RSV "street"). *See also* STREET.

Heb. *sᵉḥōrâ* occurs only in Ezk. 27:15, where it apparently means "merchandise," "source of trade," "territorial market," or "commercial client." The text may require minor emendation.

The well-known *agorá* or public square, frequently characterized by busy crowds, functioned as the center of public life in NT times. There children danced and played (Mt. 11:16; Lk. 7:32) and the unemployed wandered about and perhaps eventually obtained a job (Mt. 20:3). The haughty scribes and Pharisees strutted in the market place in search of honor and adulation (Mt. 23:7; Mk. 12:38; Lk. 11:43; 20:46). Sick people were brought there for the compassionate Jesus to heal (Mk. 6:56). At the *agorá* in Philippi Paul and Silas were given a hearing in the public law courts before the magistrates (Acts 16:19). At the *agorá* in Athens, Paul discussed and debated the Christian religion with all sorts of interested passersby, even some Epicurean and Stoic philosophers (17:17).

The precise background and significance of Gk. *mákellon* (1 Cor. 10:25; RSV "meat market") are uncertain. Both J. Schneider (*TDNT*, IV, 370) and MM (p. 336) noted a possible connection with Heb. *miḵlâ*, "enclosure"; Bauer (rev., p. 487) and H. Conzelmann (*1 Corinthians* [Eng. tr., *Hermeneia*, 1975], p. 176) agreed with Schneider that Gk. *mákellon* is not a loanword from Lat. *macellum* (contra F. F. Bruce, *1 and 2 Corinthians* [*New Century Bible Comm.*, 1971; repr. 1981], p. 98). At Corinth H. J. Cadbury (*JBL*, 53 [1934], 134-141) found a fragmentary Latin inscription (1st cent. A.D.) that mentions the *macellum*. Some evidence suggests that this *macellum* was a general marketplace selling fish, fruit, and bread as well as meat; thus the NAB's "market" is perhaps a more accurate translation of Gk. *mákellon*. This rendering does not change the point that Paul made (1 Cor. 10:25), as Conzelmann noted, "since the principle of freedom is upheld."

MARKET, SHEEP. *See* SHEEP MARKET.

MARMATHI mär'mə-thī (1 Esd. 8:62, NEB); **MARMOTH** mär'məth (AV). *See* MEREMOTH 3.

MAROTH mâr'oth [Heb. *mārôṯ*]. A town mentioned in Mic. 1:12 and otherwise not identified. The LXX reads *katoikoúsē odýnas*, "who is dwelling in sorrows," rendering *mārôṯ* as a common noun. Some scholars have suggested that Maroth is equivalent to MAARATH (Heb. *ma'ᵃrāṯ*), but this possibility is highly unlikely, since it does not explain the LXX translation, and since the *'ayin* could hardly have been so easily lost. It should be noted that the places mentioned in vv. 10-16 seem to suggest the points that the prophet wishes to make (cf. NIV mg.); possibly he alterred some of the names to make the play on words more apparent. W. S. L. S.

I. Terms.–The RSV terms for "marry" include Heb. *lāqaḥ*, lit. "take" (Gen. 19:14; 28:1; Lev. 21:7f.; AV "take a wife"), *nāṯan lᵉ'iššâ*, lit. "give for a wife" (RSV "give . . . in marriage"; AV "give . . . to wife"; Gen. 34:8; 41:45; Jgs. 21:1; 1 K. 11:19), *hāyâ lᵉnāšîm*, lit. "be for wives" (Nu. 36:3, 6, 11f.), hiphil of *yāšaḇ*, lit. "make a resident" (Ezr. 10:2, 10, 17f.; Neh. 13:27; AV "take"), *nāśā'*, lit. "carry away, take" (1 Ch. 23:22; Ezr. 10:44; AV "take"), *bā'al*, "marry," "rule over" (Dt. 24:1; Isa. 54:1; 62:4f.), and the hithpael of *ḥāṯan*, lit. "make oneself a daughter's husband" (1 K. 3:1; 2 Ch. 18:1; AV "make/join affinity").

Throughout the OT Heb. *kallâ* is rendered "bride" by the RSV (AV "spouse" in Cant. 4:8-12; 5:1). This term generally refers to a woman before marriage (e.g., Isa. 49:18; 61:10; Jer. 2:32) but may also refer to her after marriage (Hos. 4:13f.). Heb. *ḥāṯān* (RSV "bridegroom," Ex. 4:25f.; AV "husband") is "one who becomes related to another family by marriage" (*CHAL*, p. 120). "Bride" and "bridegroom" occur together in Isa. 62:5; Jer. 7:34; 25:10; and Rev. 18:23; where they depict the joy and happiness that accompany the marriage celebration.

"Wife" usually represents Heb. *'iššâ* (AV "woman" in Prov. 12:4; 31:10) and "wives" *nāšîm* (Gen. 4:19, 23). Abraham's wife Sarah is referred to in Gen. 20:3 as a *bᵉ'ulāṯ bā'al* (NEB "married woman"), a phrase that connotes her husband's ownership. The OT terms for "husband" include *'îš*, "man" (Gen. 3:6, 16), *ba'al*, "owner, lord" (Ex. 21:22; Dt. 24:4), *'āḏôn*, "lord" (Gen. 18:12; Am. 4:1), *rē(a)'*, "friend, companion, fellow" (Jer. 3:20), and *'ĕnôš*, "man, mankind" (Ruth 1:11; Jer. 44:19; AV "man").

In the NT Gk. *gaméō* is the most common verb for "marry." Another term, *gamízō*, is used in both the active sense ("give in marriage," Mt. 24:38) and passive sense ("be given in marriage," Mt. 22:30; Mk. 12:25; Lk. 17:27; 20:35; cf. *gamískomai*, v. 34). The use of Gk. *epigambreúō* (lit. "marry as next of kin") in Mt. 22:24 probably reflects the LXX of Gen. 38:8 (cf. the levirate law in Dt. 25:5).

The cognate noun *gámos*, a word commonly used in the LXX for Heb. *mišteh* ("drinking," "feast"; cf. Gen. 19:3; Est. 2:18), refers either to a marriage celebration (Mt. 22:2-14; Jn. 2:1f.) or banquet (Lk. 12:36; 14:8), or to the institution of marriage (He. 13:4). In Rev. 19:7, 9 *gámos* is a figure for the joy of the messianic kingdom.

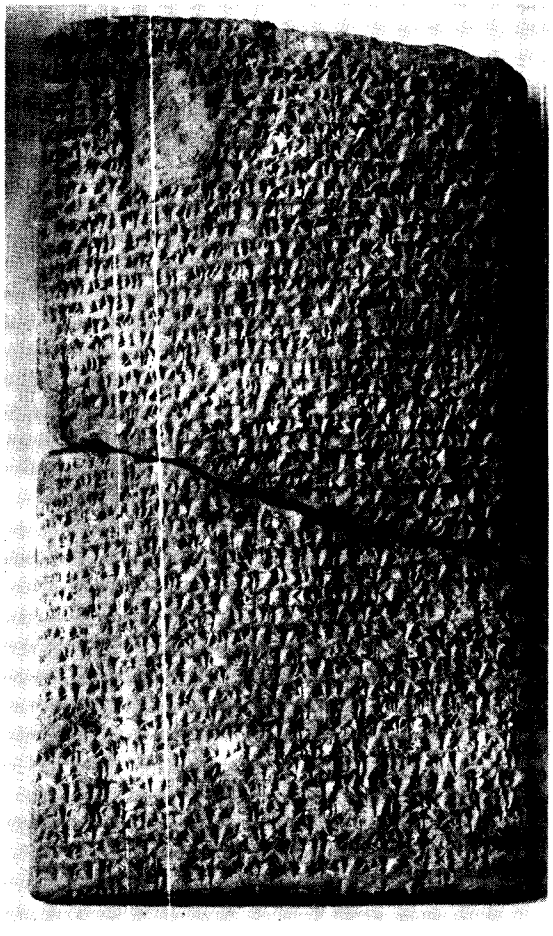
The NT terms for "bride" and "bridegroom" are Gk. *nýmphē* ("daughter-in-law" in Mt. 10:35; Lk. 12:53) and *nymphíos* respectively. "Bride" also translates *parthénos* in 2 Cor. 11:2 (AV, NEB, "virgin") and *gynḗ* in Rev. 19:7 (AV "wife"). *Gynḗ* is most commonly rendered "wife" (e.g., 1 Cor. 7; Eph. 5:22; etc.), although it may refer simply to a woman as a female person (e.g., Mt. 5:28; Jn. 4:7, 9, etc.), or to one who is betrothed (RSV "wife," Mt. 1:20, 24; cf. Dt. 22:24, LXX). The translation of *skeúos* in 1 Thess. 4:4 presents various difficulties. While there is evidence to support the translation "wife" (RSV), there is also strong support for *skeúos* referring to a man's own body (cf. AV "vessel"; NEB, NIV, "body"). For a fuller discussion see I. H. Marshall, *1 and 2 Thessalonians* (*NCBC*, repr. 1983), pp. 107f.

Greek *anḗr* is the usual term for "husband" in the NT (AV "man" in 1 Cor. 7:16; 11:3). An exception is the use of the hapax legomenon *phílandros* (lit. "loving her husband") in Tit. 2:4.

II. Nature of Marriage.–A. Definition. Marriage may be defined as that lifelong and exclusive state in which a man and a woman are wholly commited to live with each other in sexual relationship under conditions normally approved and witnessed to by their social group or society. Although Christian opinion is divided on the necessity of coitus for validating marriage, Paul plainly taught that it is the specific act by which man and woman become one flesh (Bailey, *Sexual Relation in Christian Thought*, p. 119). True marriage, therefore, must not be confused with a wedding ceremony, which only solemnizes and symbolizes a couple's total commitment.

Although cultural forces influence marriage as an institution, its essential core is determined primarily by the orders of creation (Thielicke, p. 104). Thus today monogamy is generally accepted from both a natural point of view (e.g., conjugation takes place between two persons, and children are produced by two parents) and a biblical one ("the two shall become one," Mt. 19:5; Eph. 5:31), despite the varied and complex social customs that have allowed for polyandry, polygyny, and other marital arrangements.

Marriage has been described as a biological act, as a legal contract, and as an economic arrangement. Personal, social, property, and inheritance rights for the partners as well as for any progeny have been concerns in all such views. A theological view of marriage does not exclude such considerations but goes beyond them in affirming the involvement of a divine element in all true marriages ("what therefore God has joined together . . ." Mt. 19:6).



B. Marriage and the Church. Historically, weddings were family or community events; not until after the 10th cent. A.D. were they performed in the church. Nevertheless, wedding ceremonies in both the OT and NT periods had a distinctly religious dimension because religion was woven into the daily life of the Hebrew family. The Church's recognition of civil weddings — which perhaps lack the religious symbolism of a church ceremony —

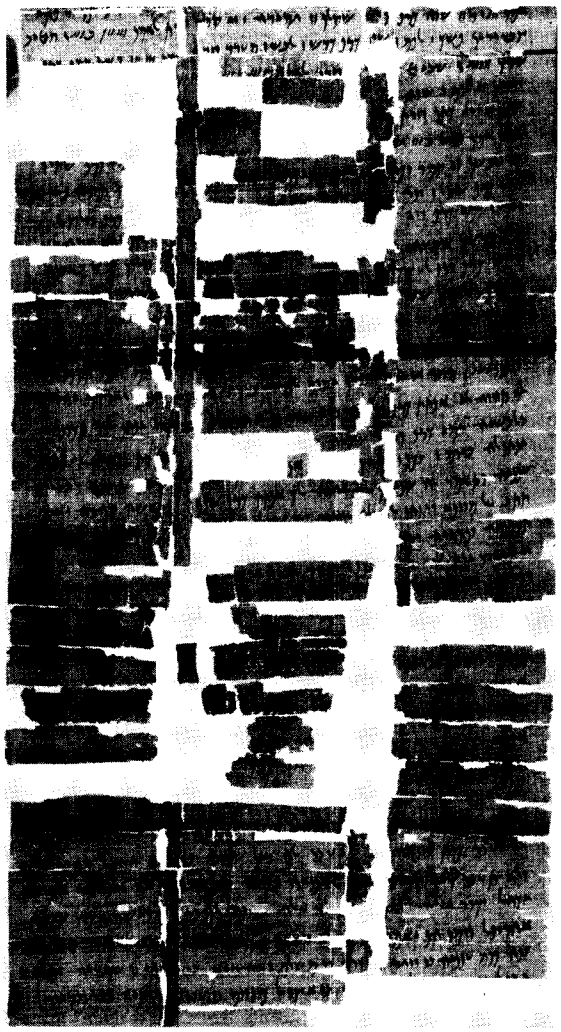
acknowledges the right of the state to regulate marriage as it does other social institutions. In accordance with Rom. 13, the Church expects couples who desire marriage to seek civil approval before the performance of any church ceremony.

III. In the Ancient Near East.–In the ancient Near East the primary purpose of marriage was procreation rather than companionship or mutual support. At a very early period marriages began to be arranged by parents, and this resulted in greater social solidarity, since mergers of families were involved. While marriage frequently had a mercenary aspect, genuine love and even some surreptitious degree of intimacy were by no means unknown.

The engagement of a man and a woman was sealed when the prospective bridegroom gave a gift to the bride's father. To describe this as a "bride price" may be confusing, since the wife was not purchased as a slave was, but it could well be considered some compensation to the bride's father for the loss of her services to his household. The marriage itself was probably conducted in some area of the local temple, and the couple was united by a priest who administered oaths. A tablet containing contractual material was inscribed by both parties and remained the official record of the marriage, after which the bride and groom were legally entitled to recognition as a married couple (cf. S. N. Kramer, *Sumerians* [1963], pp. 78, 250-57).

Amarna Tablet discussing the marriage of a Kassite princess to Pharaoh and the gifts exchanged (horses and lapis lazuli) (Trustees of the British Museum)

Marriage contracts were used widely in subsequent times. At Ugarit the contract generally spelled out the terms of the union, which by agreement could be either temporary or permanent and indissoluble. Of the many tablets recovered from Nuzi, one specified that if a wife remained childless for any reason, she was obligated to provide a concubine for her husband, so that children might be born into the family (C. H. Gordon, *BA*, 3 [1940], 3). The Middle Assyrian *erēbu*-legislation provided for the husband to reside with his wife's family rather than his own, which seems to have been intended to protect the marriage of a woman with a foreign man in her homeland (cf. C. H. Gordon, *Common Background of Greek and Hebrew Civilizations* [rev. ed. 1965], pp. 249f.).



While Egyptian women were normally discouraged from marrying foreigners, especially when Egypt was strong militarily, the *erēbu*-marriage was not unknown even there. Egyptian sources have preserved records of international marriages, instituted for political reasons, such as that between Amenhotep III and the Mitannian princess Tadu-ḥepa, for whom the pharaoh was compelled to pay an enormous bride price (G. Steindorff and K. C. Seele, *When Egypt Ruled the East* [1962], pp. 108f.). Marriage between native Egyptians was celebrated on a much smaller scale, but involved betrothals, dowries, legal settlements, and general marriage festivities common to all cultures. Marriage contracts seem to have come into use gradually among the middle and upper classes in Egypt, and by the Saitic period (26th Dynasty) were fairly common. An Aramaic wedding contract (5th cent. B.C.) from Elephantine stated the terms of the marriage, made provision for alimony in the event of a divorce, and settled the disposition of the family property should the husband Ananiah or his wife Tamut die. A woman named Mibtahiah who contracted three marriages, the second of which was liquidated in a settlement of claim by oath (*ANET*, p. 491), left two contracts, duly witnessed, attesting to her nuptial endeavors (*ANET*, pp. 222ff.).

IV. In the OT.–A. Patriarchal Structure. In Hebrew culture, society was built on the family, and the family in turn on the institution of marriage. Within the marital framework, patriarchal supremacy was the unquestioned pattern. A man could have more than one wife; he could divorce her but she could not divorce him. The law required a bridal sum (Heb. *mōhar*) to be given to the family of the bride (Gen. 34:11f.; Ex. 22:16 [MT 15]; Dt. 22:29). The woman, however, had no part in this transaction as an independent individual under the law.

Because property and inheritance were primarily concerned with the males in the family, it was almost imperative that a man have a son who could continue the family line and to whom he could leave his estate. This need for a male successor is critical to the understanding of Hebrew marriage practice in the OT.

1. Polygyny. Hebrew marriage was from the beginning essentially monogamous (Mace, p. 262), but since a man needed a male heir he could take another woman if his first wife was barren. Polygyny (the practice of having multiple wives) was largely confined to the ruling and upper classes. It was practiced by Abraham (Gen. 16), Jacob (Gen. 30:1-8), Gideon (Jgs. 8:30), King David (1 S. 25:39f.; 2 S. 3:2f.; 5:13), Solomon (1 K. 9:16; 11:3; Cant. 6:8), and Rehoboam (2 Ch. 11:21).

Concubinage existed along with polygyny (the OT offers no clear evidence of polyandry) and was a legalized form of cohabitation. A wife held much higher status than a concubine because of her birth and family's support. Children born to concubines could receive gifts as a form of inheritance (Gen. 25:6), and some were known to rise to

Aramaic marriage contract (from Elephantine) listing gifts for groom and bride and the bride's possessions, as well as the conditions for divorce (Brooklyn Museum)

positions of power (Jgs. 8:31–9:22), but their rights were obviously less protected than those of children born to wives. Both concubinage and polygyny created problems in Hebrew married life: cf. Abraham's and Hagar's unhappiness (Gen. 21:8-16), Rachel's bitterness (Gen. 30:15), the death of Gideon's offspring (Jgs. 9), Hannah's anger (1 S. 1:6f.), David's complicity in the death of Bathsheba's husband (2 S. 11), and Solomon's idolatry (1 K. 11:1-8). Hebrew kings were especially warned against multiplying wives because their hearts might be turned away from God (Dt. 17:17). *See* POLYGAMY.

2. Levirate Marriage. This form of marriage (named from Lat. *levir*, "husband's brother") allowed a man to receive his deceased brother's property and manage it for the widow, thereby keeping the family property and possessions intact. If the deceased brother left no male children, then the surviving brother was expected to take the deceased's wife. Any son born of this relationship to the widow would be counted as the dead brother's heir, who would then be expected to continue the family line (Dt. 25:5-10). It was apparently the infraction of levirate law (although a male relative was not without option in this regard) that brought judgment upon Onan, not his effort of contraception itself (Gen. 38:8-10). Levirate practice extended beyond immediate brothers to other relatives; e.g., Boaz took Ruth as his wife after a closer kinsman waived his right to her (Ruth 4:5f.). *See also* HUSBAND'S BROTHER; BROTHER'S WIFE.

B. Mate Selection. Hebrews usually chose wives from their own nation (e.g., Gen. 24:2-4; 28:1f.; Neh. 13:25), but occasionally wives were purchased as slaves (Ex. 21:7-11) or taken as prizes of war (Dt. 21:10-13).

1. General Procedure. The selection of a bride or groom was usually left to the families, but customs varied widely. Sarah's maid Hagar chose a wife for her son Ishmael (Gen. 21:21) and Judah for his son Er (38:6). Reuel gave his daughter Zipporah to Moses (Ex. 2:21). Caleb offered the hand of his daughter Achsah to "whoever smites Kiriath-sepher" (Josh. 15:16), and Saul offered his daughter Merab to David (1 S. 18:17). Sometimes the woman's family chose the mate, as with Naomi (Ruth 3:1f.) and Saul, whose daughter Michal loved David (1 S. 18:20-22). At other times the groom made the selection and then prevailed upon his family to work out the necessary arrangements with the woman's family, as in the cases of Shechem (Gen. 34:4, 8) and Samson, who told his reluctant parents to "get her for me as my wife" (Jgs. 14:2). Apparently a family sometimes sought the consent of a daughter: Rebekah was asked, "Will you go with this man?" (Gen. 24:58), and Abraham had instructed his servant that if the woman was "not willing," the servant was released from his promise to find a wife for Isaac (v.8).

The importance of romantic attraction in mate selection was not entirely unknown. Jacob's love for Rachel led him to remain with his father-in-law for an additional seven years to earn her as his wife (Gen. 29:20). Shechem loved Jacob's daughter Dinah (34:3), and Michal, Saul's daughter, loved David (1 S. 18:20).

2. Betrothal. The usual Hebrew word for "betroth" (e.g., Ex. 22:16 [MT 15]; Dt. 22:23, etc.; 28:30) is *'āraś* (NEB also "pledge"), though Lev. 19:20 uses the niphal of *hārap* (NEB "assign"). The AV also uses "betroth" (RSV "designate") for the Heb. *yā'aḏ* (lit. "appoint") in Ex. 21:8f.

The NT renders several words "betroth" or "(be) betrothed": the pass. of *mnēsteúō* in Mt. 1:18; Lk. 1:27; 2:5 (AV "espoused"); *parthénos* in 1 Cor. 7:36f. (AV "virgin"; NEB "partner"); *harmózomai* in 2 Cor. 11:2 (AV "espoused"; *see also* BETROTH).

Betrothal in the Bible differs considerably from modern engagements. As an act preliminary to marriage, betrothal implied a commitment almost as binding as marriage itself; its dissolution involved at least a formal divorce (Mt. 1:19). The betrothed persons were referred to as "husband and wife" (Gen. 29:21; Mt. 1:18, 20) and were to be completely faithful to each other. Any violation of the betrothed state was treated as adultery and could result in death for the offender (Dt. 22:23-25). The permanency and faithfulness within the betrothal bond are pictured in God's relation to Israel: "I will betroth you to me forever . . . I will betroth you to me in faithfulness" (Hos. 2:19f.). Miscellaneous Jewish traditional laws concerning betrothals are found in Mish. *Kiddushin*.

a. Kinds. At the time of Mary and Joseph betrothal called for a solemn oral commitment in the presence of witnesses with an added pledge of a piece of money or a written pledge (*šᵉṭārê 'ērûsîn*) that would conclude with a benediction. Another kind of betrothal, cohabitation, was strongly disapproved by the rabbis (see T. B. *Yebamoth* 118b; cf. Mish. *Ketuboth* iv.4; *LTJM*, I, 149).

b. Gifts in Betrothal. Of the three types of gifts con-

nected with bethrothal, the *mōhar* (only in Gen. 34:12; Ex. 22:16f.; 1 S. 18:25) or "marriage present" (RSV), given by the bridegroom to the bride's family, was probably the most important. Although the bridal sum was originally thought to be a purchase price, M. Burrows and others have noted that the father of the bride gave his daughter a dowry and did not merely exchange value for value, as was the case in purchase of a concubine. Instead, the payment of the *mōhar* was a form of compensation and constituted a betrothal because it sealed the covenant between the two families (Burrows, p. 13; Mace, pp. 169, 172). The payment or gift may have been in the form of money, service (such as Jacob provided, Gen. 29), or other consideration (1 S. 18:25; cf. Josh. 15:16).

The dowry was a gift presented usually by the bride's father to his daughter or to the groom. It may have consisted of servants (Gen. 24:59-61; 29:24, 29), valued possessions, or land (Jgs. 1:14f.), though the case of Solomon's marriage to Pharaoh's daughter (1 K. 9:16) perhaps reflects Egyptian custom (de Vaux, p. 28). The bridegroom apparently had a gift for the bride, also, such as the jewelry and clothes presented to Rebekah (Gen. 24:51-53).

The interval between betrothal and marriage under normal circumstances did not exceed twelve months (*LTJM*, I, 353f.).

3. Limitations. Restrictions on the choice of spouses were usually enacted to assure the continuation of the Hebrews as a nation.

a. Intermarriage. Marriages with foreigners were strictly opposed (Dt. 7:3; Josh. 23:12; Ezr. 9:2f.; Neh. 13:23ff.; Tob. 4:12f.). Esau married two Hittite women, making life "bitter" for the parents (Gen. 26:34f.), and Moses married a Cushite woman, causing his siblings, Miriam and Aaron, to speak against him (Nu. 12:1). Solomon intermarried and had his heart turned away "after other gods" (1 K. 11:1-4). Forced dissolution of intermarriages occurred rarely, however, and was usually a drastic effort to preserve the Hebrews as a people (Ezr. 10).

b. Intrafamilial Marriage. Danger lay not simply in intermarriage with those too distant from the Hebrews. Mates too closely related also threatened the psychological and social stability of the family. The code on female consanguinity (also females associated by affinity, e.g., marriage) that was the foundation of the Hebrew law on this subject appears to have included all the females whose relationship to a male were not more distant than two successive steps by blood and one by marriage (cf. Lev. 18:6-18; 20:10-21). Thus, as determined by Mace, the forbidden consanguinous and affinity relationships are: (a) mother, sister, daughter (assumed); (b) father's wife, brother's wife, son's wife; (c) grandmother, mother's sister, father's sister, sister's daughter, brother's daughter, daughter's daughter, son's daughter; (d) grandfather's wife, mother's brother's wife, father's brother's wife, sister's son's wife, brother's son's wife, daughter's son's wife, son's son's wife; (e) wife's mother, wife's sister (in lifetime of wife), wife's daughter; and (f) wife's grandmother, wife's mother's sister, wife's father's sister, wife's sister's daughter, wife's brother's daughter, wife's daughter's daughter, and wife's son's daughter (pp. 154-56).

These regulations on marriage provided societal and familial stability and preserved property within the family (Nu. 36). Patai observed that in the patriarchal family of Abraham and his descendants marriage between first-degree relatives did occur. Although the limited biblical evidence does not indicate its frequency, there can be no doubt that it was legal but fell into disuse by the end of the period of the Hebrew monarchy (p. 26).

C. Rituals. Occasionally a marriage ceremony was marked by certain unusual procedures, such as Solomon being crowned by his mother, rather than by a high priest, on his wedding day (Cant. 3:11). But under normal conditions the activities connected with marriage (preceded by betrothal) were: (1) the transfer of the bride to the bridegroom's home, (2) the marriage feast, and (3) the consummation. The transfer of the bride was probably a joyful procession (Jer. 7:34; 16:9; 25:10). The wedding feast took place in the evening, as suggested by the parable of the ten virgins (Mt. 25:1-13) and the servants who with their lamps burning waited for their master to return from the marriage feast (Lk. 12:35-38). Riddles (Jgs. 14:12-14), love songs (Ps. 78:63; Isa. 5:1; Ezk. 33:32), and a joyous spirit marked the feast (cf. Mt. 9:15; Mk. 2:19; Lk. 5:34) which might have been as long as a week (Jgs. 14:12-17), or even two weeks (Tob. 8:20–9:2; 10:7). A high point in the feast was the custom of spreading the cloak or skirt over the bride to indicate the marital commitment. Ruth 3:9 and Ezk. 16:8 (God speaking symbolically to Israel: "I spread my skirt over you . . . I plighted my troth to you and entered into a covenant with you . . . and you became mine") seem to refer to this custom. The couple entered the nuptial chamber *(ḥeḏer)*, in which the bridal bed stood with its canopy, to show that the marriage would be consummated. The final act, the proving of the bride's virginity, was the responsibility of the bride's parents (Dt. 22:13-21).

D. Status of the Hebrew Wife. The wife in the Hebrew home was restricted but was highly respected. Though the man was called the lord *(baʿal)* and the woman was called property *(bᵉʿûlâ)* and the seduction of a virgin was a violation of property rather than of personal rights (Ex. 22:15f.; Dt. 22:28f.), a wife was not property in the usual sense. Wives were not classified along with concubines (e.g., Jgs. 8:30f.). A wife may have been under her husband's authority, but she was a free woman, not bound or owned by him, as were many concubines. A wife shared with her husband not only the functions of sex and parenthood but also comradeship, in which she ranked as his equal. Although this principle may have been abused, it was nonetheless the basis of the Hebrew marriage relation (Mace, p. xiv).

Any review of the practice of marriage in the OT will reveal departures at many points from the original intentions of the Creator. Gen. 2:24; Canticles; Ezk. 16; and Hos. 1–3, however, provided descriptions of true marriages that at different times influenced individual lives and the people as a whole.

V. In the NT.–A. Jesus' Teaching. Our Lord's instruction about marriage is found primarily in the Synoptic Gospels (Mt. 5:31f.; 19:3-12; Mk. 10:2-12; Lk. 16:18). Instead of disputing with the Pharisees (Mt. 19:3; Mk. 10:2) about OT practices in marriage and divorce, He directed them to the true nature of marriage as found in Gen. 2:24. Man and woman were created to become "one flesh," i.e., a unity effected by God Himself so that a permanent union would result (Mt. 19:5f.). "Flesh" in Hebrew thought represents the entire person: thus marriage involves a unity of soul and body, of sympathy, interest, and purpose: a husband and wife are no longer two, but one flesh, one spirit, one person (A. B. Bruce, "Synoptic Gospels," in *Expos. G. T.*, I, 246). Thus Jesus recalled the original order of creation, assuring the elementary unity and inviolability of marriage (*TDNT*, I, 649f.). Jesus pointed people to the true nature of marriage so that they would abandon the imperfect and move steadily toward a marriage that reflected God's revealed purpose.

Jesus' teaching contains certain reservations about the married state, however. He said that marriage is an institution for this life only (Mk. 12:25). Not all people

necessarily marry, nor are all given the gift of celibacy (Mt. 19:11). Celibacy, therefore, is not a higher state for which one strives but a gift from God which one may or may not receive.

Divine involvement in true marriage implies that wedlock is good, holy, and honorable (He. 13:4). Our Lord's presence at the wedding in Cana of Galilee (Jn. 2) also suggests this, as does Paul's use of the union of man and woman as one flesh to signify the relationship of Christ with His Church (Eph. 5:31f.).

B. Paul's Teaching. In his treatment of marriage, Paul tied together the body, the self, and the flesh (Eph. 5:28-31), quoting Gen. 2:24 ("[the two] shall become one flesh"; cf. also 1 Cor. 6:16), the same Genesis passage that Jesus quoted (Sampley, p. 143). Sexual union involves a physical and also a metaphysical factor (*TDNT*, I, 651), the latter undoubtedly including spiritual and psychological elements.

Paul dealt with the subject of love in terms of Christ's love for the Church and its implications for marriage: husbands should love their wives as they do themselves and as Christ loved the Church (Eph. 5:25). Paul added that wives should submit to their husbands as the Church submits to Christ's authority (vv. 22-24); this "is fitting in the Lord" (Col. 3:18). But it comes within mutual subjection (Eph. 5:21).

VI. Symbolism.–A. Interpretations. In analyzing the institution of marriage in the Bible, one finds that figurative language is highly important. Marriage is a symbol for God's covenant with His people (*TDNT*, I, 654). The unity, sacrificial love, and interdependence usually associated with marriage enable the individual to comprehend, in part, the unity, love, and interdependent features of God's relationship with His people under the symbols of God's covenant with Israel and the Church as bride and body of Christ. The focus is on the individual's understanding of the relationship between God and His people. Spiritual realities are made clearer by comparison with earthly experiences. The NT "bride image," e.g., emphasizes certain basic truths: (1) the Church-bride is elected to God's purpose but is free to make a choice (Eph. 4:1); (2) Christ in love gives Himself to establish a covenant relationship with His *one* bride; (3) Christ's atonement is a "betrothal gift"; (4) Christ's love cleanses and makes the bride worthy of Him; (5) the bride looks to the future wedding day (Parousia) (Batey, pp. 29f.). *See* BRIDE OF CHRIST.

An equally important interpretative approach is viewing the intimate relationship between God and His people (God and Israel, Christ and His Church) as a paradigm (Sampley, p. 152) or christological analogy of the husband-wife relationship in its earthly existence (Batey, pp. 31f.).

B. Ethical Implications. Covenantal and Church-bride imagery suggest that certain qualities are essential to marriage from a biblical perspective. Marriages should be characterized by (a) intentions of a permanent relationship (Hos. 2:19; Mt. 19:6), (b) overriding, sacrificial love of the husband for the wife (Hos. 2:19; Eph. 5:25), and (c) a unity by which the two become one, physically and spiritually.

Means for achieving a unity of husband and wife appear to include primarily sexual intercourse (1 Cor. 6:16), and secondarily mutual subjection out of reverence for Christ (Eph. 5:21) and submission of the wife to the husband as the "head" of the marriage (vv. 22, 24; 1 Cor. 11:3).

In respect to a wife's submission, some scholars (e.g., K. Stendahl) dispute the general universality of the biblical model of marriage and hold that Near Eastern thought patterns may or may not be relevant to contemporary movements or needs (pp. 22-37). Passages quoted by Stendahl and others stress the interdependence and reciprocal nature of marriage as found in Gal. 3:28 ("there is neither male nor female . . . in Christ Jesus"), 1 Cor. 7:3f. ("the wife does not rule over her own body, but the husband does; likewise the husband does not rule over his own body, but the wife does"), and 1 Pet. 3:7b ("you are joint heirs of the grace of life").

The traditional view holds that the interdependent factor is important to the marital relationship and that the husband's headship in the marriage has been God's directive for married couples since the fall (Gen. 3:16). The doctrine of subordination declares that neither man nor woman is different in status before God (Gal. 3:28), especially since marriage does not exist in the aeon beyond this one (Mk. 12:25). In the present age, however, some hierarchical organization appears to be necessary for marriage as for churches and other institutions. It is not a hierarchy dictated by coercion but rather one adopted out of devotion to Christ (Eph. 5:21f.). It is a practical hierarchy of function in which the wife and husband have equal standing before God and complementary relationships with each other. The husband's headship does not rule out all decision making by the wife; one gathers, e.g., that Priscilla had a strong role to play in her joint activities with her husband Aquila (Acts 18:18, 26; Rom. 16:3f.; 2 Tim. 4:19; cf. 1 Cor. 16:19). It should be stressed that subordination does not mean inferiority.

VII. Sex.–Sexuality is an expression of one's being. It testifies to the fact that mankind was created male and female (Gen. 1:27) with natural attraction between the sexes. It points up the human need for fellowship and personal fulfillment; it is good and honorable, though sin or misunderstanding may distort its goodness (He. 13:4). The use of the sexual relationship as a symbol of the unity of Christ with His church (Eph. 5:22f.) indicates that God approves the act when rightly used. It is the means of procreation, which the Hebrews of the OT saw as a gift of God to be received with gratitude (Mace, p. 262). A man and a woman find in sexual relationship a source of joy and freedom, as pictured in Canticles. Paul declared (without referring to a need for procreation) that husbands and wives are entitled to conjugal rights, which are essential to the marriage relationship (1 Cor. 7:3-5).

Without the definite intention of establishing a marriage relationship, both OT and NT disapprove of premarital and extramarital relations. Paul warned that even a sexual liaison with a prostitute makes the two persons "one flesh" (1 Cor. 6:16). Theological and psychological evidence suggests that varying degrees of attachment result from acts of sexual intercourse, however casual they may seem initially. In the OT period if an unmarried, unbetrothed couple were discovered in the act of sexual relations, the young man was forced to take the woman as his wife and make a payment of money to her father (Dt. 22:29), unless the father (in line with patriarchal prerogative) refused to enforce this regulation (Ex. 22:17). Betrothal was considered such an intimate relationship that, if a betrothed woman voluntarily engaged in sexual relations with a man to whom she was not betrothed, both were condemned to death (Dt. 22:22), although this penalty was apparently modified at a later period to permit divorce (Mt. 1:19; cf. Mish. *Sotah* i.5).

Gen. 2:24 stresses that man "cleaves" to his wife, signifying an underlying sense of "belongingness" or commitment (cf. *TDOT*, IV, *s.v.* "dābhaq" [Wallis]). Commitment is essential, therefore, to any true marriage as described in the Scriptures and requires more than a voluntary physical experience (contra Piper pp. 138f.). A scriptural view cautions against sexual relations without

the intention of a permanent relationship and also against a concept of marriage that stresses a physical relationship with no lifelong commitment.

MARRIAGE ALLIANCE [Heb. hithpael of *ḥāṯan*–'marry'] (1 K. 3:1; 2 Ch. 18:1); AV AFFINITY; NEB ALLIED . . . BY MARRYING. Literally, the hiphil of *ḥāṯan* means "become somebody's son-in-law." In biblical times marriage was viewed as a covenant between two families, and thus marriages often served the political function of cementing a treaty between two families or nations. INTERMARRIAGE with pagan nations was opposed by the prophets because it would lead to the worship of other gods, as it did with Solomon (1 K. 11:1-8).

MARROW [Heb. *mō(a)ḥ* (Job 21:24), *ḥēleḇ*–'fat' (Ps. 63:5 [MT 6]), pual part. of *māḥâ*–'fatty dishes' (Isa. 25:6); Gk. *myelós* (He. 4:12)]; NEB also RICH. Because the marrow nourishes and strengthens the bones, moist bones are a figure of health (Job 21:24; cf. Prov. 3:8). In Ps. 63:5 (MT 6) and Isa. 25:6 "marrow" denotes the fatty foods served at a sacrificial feast or messianic banquet (see C. A. Briggs and E. G. Briggs, Comm. on Psalms, II [*ICC*, 1907], 73); figuratively, these foods represent the satisfaction of one's total needs, spiritual as well as physical. The author of the Epistle to the Hebrews speaks of the divine revelation as penetrating and laying bare the innermost core of a person's being (4:12).

On the use of "bones" and "marrow" to represent the whole personality, see A. R. Johnson, *Vitality of the Individual in the Thought of Ancient Israel* (1964), pp. 67-69.

N. J. O.

MARS' HILL (Acts 17:22, AV). *See* AREOPAGUS.

MARSENA mär-sē'nə [Heb. *marsᵉnā'*]. One of the "seven princes of Persia and Media" under Ahasuerus (Est. 1:14). *See* PRINCES, THE SEVEN.

MARSH [Heb. *biṣṣâ*] (Job 8:11; 40:21); AV MIRE, FENS; [*geḇe'*–'cistern,' 'pool'] (Ezk. 47:11); AV MARISH; NEB POOL. The climate in Palestine is dry and the terrain is generally rocky; thus marshes are almost unknown except along the shore of the Dead Sea, especially at its south end. The marshes referred to in Job are probably in Egypt's Nile Delta, where papyrus grows in the extensive marshes. In Ezekiel's vision the salty waters of the Dead Sea are purified by the river of fresh water issuing from under the threshold of the temple; but the "swamps and marshes" (Heb. *biṣṣâ* and *geḇe'*) will remain salty so that the industry of collecting salt can be maintained.

MARSHAL [Heb. *sōp̄ēr*–'scribe'] (Jgs. 5:14); AV WRITER; NEB MUSTERER; [*ṭip̄sār* < Akk. *ṭupšarru*–'tablet writer'] (Jer. 51:27); AV CAPTAIN; NEB COMMANDER-IN-CHIEF. A high-ranking military officer. The context of Jgs. 5:14 indicates that *sōp̄ēr* must refer to an officer who mustered the troops. In later military organization this duty was assigned to a specific officer (cf. 2 K. 25:19; 2 Ch. 26:11; 1 Macc. 5:42), but in this text it is probably the general military leader of the clan. The same function appears to have been performed by the *ṭip̄sār*, a term that occurs also in Nah. 3:17 (RSV "scribes"; but RSV mg., more appropriately, "marshals") parallel to "princes" (Heb. *minnᵉzārîm* < Akk. *manzazu*, "courtier").

MART. *See* MERCHANT.

MARTHA mär'thə [Gk. *Martha* < Aram. *mārtâ*–'lady' or 'mistress (of the house)']. A friend of Jesus; the sister of Mary and Lazarus, who lived in Bethany (Lk. 10:38-39; Jn. 11:1f., 18f., 39; 12:2). Although Luke may appear to locate Martha's house in southern Galilee, the central section of his Gospel (9:51–19:27) shows little concern for chronological or geographical order; also, the indefinite phrase *kōmēn tiná*, "a village," indicates his deliberate lack of precision (10:38). Luke's account may reflect one of Jesus' journeys to Jerusalem during the last six months of His ministry, when He frequently lodged in Bethany (cf., e.g., Mt. 21:17; 26:6).

Martha, the older sister, was mistress of the house (Jn. 11:5, 19; Lk. 10:38). When Jesus visited them Martha bore the responsibility of meeting, welcoming, and serving Him (Lk. 10:38, 40; Jn. 11:20; 12:2). Because she served dinner at Simon the leper's home in Bethany when Mary anointed Jesus, some have surmised that Martha was Simon's wife, widow, or daughter (Mk. 14:3 par. Jn. 12:1-3). But the relation of Martha and Simon is never stated. (The anointing in Lk. 7:36-50 happened in the house of Simon a Pharisee.)

Martha was less famous than her brother, whom Jesus raised from the dead (Jn. 11:38-44), and her sister, who anointed Jesus' feet (Jn. 11:2; 12:3; cf. Mt. 26:6f. par.), but John records that "Jesus loved Martha and her sister and Lazarus" (11:5). It was Martha who met and conversed with Jesus as He approached Bethany after Lazarus's death. On that occasion she was the first to declare openly her faith in Jesus' power to heal and in His identity as the Son of God and the Messiah (Jn. 11:21f., 27).

Luke and John deliberately contrast Mary's and Martha's responses to Christ. Martha's impatient preoccupation with showing hospitality to Jesus precluded paying adequate attention to Him and His teaching (Lk. 10:39-42) and thus differs from Mary's humility and abandonment in her devotion to the Lord (Lk. 10:39, 42; Jn. 12:3). Jesus reprimanded Martha for being "anxious and troubled about many things," whereas "only one thing is needful" (Lk. 10:41f.). Mary had "chosen the good portion, which shall not be taken away" (Lk. 10:42). Although no less devoted to Jesus than Mary, Martha was engrossed in the details of the meal and so failed to discern what would please Jesus most.

Jesus' reference to "the good portion, which shall not be taken away" is a wordplay that associates the ideas of spiritual nourishment and food. True and everlasting nourishment is found only in devotion to Christ. This was Mary's spiritual insight, reflected in her devout contemplation of the Lord as she sat listening at His feet, that Jesus commended to Martha (Lk. 10:39-42). The proper way to serve and honor Him, Mary had discerned, is to heed His words. Interestingly, the Mishnah exhibits a similar concern in the exhortation "Let thy house be a meeting-house for the Sages and sit amid the dust of their feet and drink in their words with thirst" (*Aboth* i.4).

MARTYR [Gk. *mártys*–'witness'] (Rev. 17:6). The word appears in the AV also in Acts 22:20 and Rev. 2:13, where the RSV translates "witness," the primary sense of *mártys*. In its developed ecclesiastical usage, found indisputably for the first time in the late 2nd cent. A.D. (M. Polyc. 17:3; cf. Eusebius *HE* v.2.3 for usage in Lyons in A.D. 177), "martyr" denotes a believer who voluntarily died for his confession of Christ.

Various answers have been given to the problem of the semantic transition from the active sense of the word "witness" to the passive sense of "martyr." Similarities between the attitudes and circumstances of the martyrs and of non-Christian people of conviction shed some light on the history of rhetorical writing but are not particularly relevant to the semantic concern. Elijah (1 K. 19:10) and Uriah (Jer. 26:20-23) were indeed persecuted, but the former did not die a martyr's death, and the latter attempted to escape from his persecutors. The sufferings of Israel encouraged heroic adherence to the faith (cf. 1 Macc. 2:50), but in the exhortation of 1 Macc. 2 the witnessing of Caleb (v. 56) is only one of many displays of heroism. Socrates (cf. Plato *Apologia* 39c) and the Stoics (cf. Epictetus i.19.8) offered models for calmness in the face of death (cf. Asc.Isa. 5:14; Martyrdom of Polycarp; 4 Maccabees) and lack of vindictiveness (cf. Lk. 23:34), but even Epictetus's statement about the witness called by God (i.29.46f.) does not explain the later reservation of the word "martyr" for those who die for their religious convictions. A more probable connection is with Rev. 17:6 and 2:13, but even in these passages the primary sense of witness still appears to be dominant. Gk. *mártyres* in Rev. 17:6 must mean "witnesses," since a reference to "martyrs" would be inexplicable after a clear reference in the same passage to the saints who sacrificed their lives for the faith. Antipas is similarly called *ho mártys mou* ("my witness," Rev. 2:13); the use of the possessive pronoun parallels Acts 22:20, where Stephen is a witness of Christ (cf. Acts 7:54-56). Both the addition of the phrase "who was killed among you" (Rev. 2:13) and the parallel expression *martyría* in Acts 22:18 point to the meaning "witness." That others who remained faithful to death are not called *mártys* (Rev. 6:9-11; 13:15; 20:4), despite testimony to Christ (6:9; 20:4), suggests, however, that *mártys* in Acts 22:20; Rev. 2:13; 17:6 is associated with a special type of witnessing (cf. 1 Clem. 5:3-7). These latter passages, then, represent a transitional stage in the history of the word *mártys*; it is erroneous to read them as though the transition had already taken place or as though other factors did not condition the semantic development.

One of these factors is the heavy accent placed by the writers of the NT on the continuity of the history of salvation. NT terms for witness associate the apostolic mission with that of earlier Israel. David is called a witness to the people (Isa. 55:4); Israel will call to the nations (vv. 5f.). According to Isa. 43:10, 12; 44:8, the people of Israel are God's witnesses. The twelve apostles assume jurisdiction over Israel (cf. Lk. 22:30), and Jesus sent them forth as witnesses of God's beneficence (24:48; Acts 1:8). Since Jesus and His work constituted the message of the eyewitness, any member of this Israel who proclaimed that message even without having seen Jesus could also be called a witness (e.g., Stephen, Acts 22:20; *martýrion* and *euangélion* are in fact interchangeable; cf. Mk. 13:9f.; Lk. 21:13). Jesus, as the true remnant in Israel (cf. Lk. 3:22; Isa. 42:1), would be the *mártys kat' exochḗn* ("par excellence"; cf. the use of the verb in Jn. 3:11; 4:44; 18:37), greater than Moses (cf. Jn. 1:17; on Moses as a witness see Jub. 6:30). Jesus as the Lord is the "faithful" witness (Rev. 1:5; 3:14; cf. Jer. 42:5). That He is said to have made a good confession before Pontius Pilate (1 Tim. 6:13), which culminated in His death, undoubtedly encouraged the use of the word "martyr" as a description of confessors faithful to death. Jesus' expressions about the hazards of association with Him (cf. Mk. 8:34-38; Jn. 15:20; 16:2) and an observation like Paul's in 1 Thess. 2:14f. are also probable factors in the semantic development of *mártys*. When the term becomes technical in the sense of one who seals his witness in death, the expression *homologḗtēs* is applied to those confessors who have not yet resisted to blood (cf. Eusebius *Onom.* 5.2).

DANKER

MARVEL [Heb. *pālā'*, *pele'*] (Ex. 34:10; Ps. 78:12); AV also MARVELOUS; NEB MIRACLE, WONDER; [Gk. *thaumázō*] (Mt. 8:10, 27; 9:33; 21:20; 22:22; Mk. 5:20; 6:6; Lk. 1:63; 2:33; 7:9; 8:25; 9:43; 11:14; 20:26; Jn. 3:10; 4:27; 5:20, 28; 7:15, 21; 2 Thess. 1:10; Rev. 17:6-8); AV also WONDER, ADMIRE; NEB ASTONISHED, TAKEN ABACK, AMAZED, ADMIRE, etc.; [*thaumastós*] (Jn. 9:30); NEB EXTRAORDINARY THING; **MARVELOUS** [Heb. *pālā'*] (1 Ch. 16:24; Job 5:9; 9:10; Ps. 96:3; 98:1; 118:23; 131:1; Isa. 29:14; Mic. 7:15; Zec. 8:6); AV also WONDER, HIGH; NEB also MIRACLE, IMPOSSIBLE, etc.; [Gk. *thaumastós*] (Mt. 21:42; Mk. 12:11; 1 Pet. 2:9); NEB also WONDERFUL; **MARVELOUSLY** [Heb. *pālā'*] (2 Ch. 26:15); NEB WONDERFULLY.

"Marvel" in the RSV expresses a sense of wonder and astonishment linked with an act of God's revelation or an object or experience that seems to "transcend all human possibilities" (*TDNT*, III, 29). The miracle is that He who is "hidden" (*see* HIDE) should now reveal Himself and allow people to experience His presence.

In the OT, Israel's faith in Yahweh as the Lord who shapes history and controls the powers of nature according to His sovereign will is affirmed in the remembrance of His "marvelous works" (1 Ch. 16:24; Ps. 96:3; cf. Ps. 9:1 [MT 2]; 78:11; etc.). Yahweh's extraordinary works of creation, saving actions toward His covenant people (Ps. 78:12; 98:1), and "unbroken rule" in their nation stun one's power of comprehension (Ps. 131:1; 118:23; Job 5:9; 9:10). Human wisdom, pride, and hypocrisy "perish" in the face of Yahweh's "wonderful and marvelous" deeds (Isa. 29:14; Zec. 8:6), which are "miraculous help" to His people (2 Ch. 26:15). The prophet desired Yahweh to "do marvels" as He had promised before (Ex. 34:10) in order to humiliate Israel's enemies (Mic. 7:15).

In the Synoptics *thaumázō* (also translated "wonder," Mt. 15:31; 27:14; Mk. 15:5; Lk. 24:41; etc.) is used in connection with miracle stories to show the miracles' effect on the spectators. The disciples expressed their astonishment at Christ's stilling the storm and asked, "What sort of man is this?" (Mt. 8:27; Lk. 8:25). Their amazement after seeing the barren fig tree that Jesus had cursed showed in their question, "How did the fig tree wither at once?" (Mt. 21:20). When Jesus cast the demons out of

the dumb man, the crowd's exclamation was, "Never was anything like this seen in Israel" (9:33; cf. also Mk. 5:20; Lk. 9:43; 11:14).

The teachings of Jesus, e.g., about taxes (Mt. 22:22; cf. Mk. 12:17; Lk. 20:26), promoted wonder and surprise. The "divine wisdom with which he saw through and refuted his enemies" (*TDNT*, III, 38) astonished His opponents, according to early exegesis. In keeping with Jewish messianic expectation, Jesus applied Ps. 118:22ff. to Himself in the parable of the Wicked Husbandman (Mt. 21:42; Mk. 12:11).

"Marveling" occurs twice in Lukan Infancy stories (cf. Lk. 1:21 and 2:18 for *thaumázō* as "wondering"). People marveled at the miraculous concurrence of Zechariah and Elizabeth in naming John the Baptist (1:63). The prophecy of Simeon in the temple astonished Joseph and Mary (2:33). The other Synoptic uses of "marveling" refer to Jesus Himself: He expressed astonishment at the faith of the Roman centurion (Mt. 8:10; Lk. 7:9) and at the unbelief among His people in Nazareth (Mk. 6:6).

In the Gospel of John expressions of amazement and surprise are not related to individual miracles. Rather, "marvel" describes the "impact made by the works of Jesus" (*TDNT*, III, 40), as in 5:20, where He spoke with unbelieving opponents in mind, and in 7:21 (cf. Sir. 11:21), where He intended to surprise and shock (Brown, pp. 214, 312). Knowing the Jewish and rabbinic warnings against speaking with women in public (cf. Sir. 9:1-9; *Expos.G.T.*, I, 729), the disciples were "shocked" to see Jesus conversing with a Samaritan woman (Jn. 4:27). His learning caused wonderment among the Jews (7:14); in another context the blind man whom He healed taunted the Pharisees, "That's strange! Here you don't even know where he comes from; yet he opened my eyes" (9:30; Brown, p. 370). Yet Jesus' admonition in the story of Nicodemus (3:7) and in the saying concerning the hour of revelation (5:28; cf. 1 Jn. 3:13) is "Do not be surprised" (cf. the rabbinic phrase *'al tiṯmah*, "do not wonder," e.g., Mish. *Pesahim* vi.2).

In the rest of the NT uses of "marvel," the eschatological tones are strong. Peter reminded his readers that as God's own people they had been called out of the "darkness" of their former heathen lives to new life in God's "marvelous light" (1 Pet. 2:9; cf. 1 Clem. 36:2). In 2 Thess. 1:10 the verb is in the passive and refers to the manifestation of the Lord Jesus in His glory among the saints and believers.

A more literal translation of Rev. 17:6b is: "And seeing her I was amazed with great amazement." John's astonishment may have been mystification regarding the significance of the sight (17:6f.), or it may have been human wonderment at the sight of such an antigodly being (*TDNT*, III, 41). In the latter case the angel's question may be seen as a warning to prevent astonishment from leading to prostration before the beast and whore.

D. K. McKIM

MARY [Gk. *Maria, Mariam* < Heb. *miryām*–'fat one'?].

1. Mary Magdalene. The name Magdalene was derived from Magdala, a town on the western shore of the Sea of Galilee. The only mention of her outside the Crucifixion and Resurrection narratives is in Lk. 8:2. (She is not to be identified, as she frequently used to be, with the woman of Lk. 7, "who was a sinner.") Jesus had cast several demons out of her, and this helps to explain the devotion to Him that she showed by the following actions. (1) Together with other formerly demon-possessed women, she followed Jesus and His disciples from town to town, helping to support them from her own means (Lk. 8:1-3). (2) She followed Him to Jerusalem to care for His needs (Mt. 27:55), and even when His disciples fled, she followed Him to the cross (Mk. 15:40). (3) She watched to see where He would be buried (Mk. 15:47). (4) On the day of the Resurrection she was among the first who went to the tomb to bring spices for Jesus' body (Mt. 28:1; Mk. 16:1). On seeing that the tomb was empty, she ran and told Peter and John (Jn. 20:2) and then returned to the tomb. There she met Jesus and wanted to cling to Him. But He told her not to hold on to Him, for He wanted her to realize that His former way of living among the disciples was to be changed, since He was to ascend to heaven. He commanded her to go and tell the disciples that He would ascend into heaven (Jn. 20:17); she obediently went and reported, "I have seen the Lord."

2. Mary the sister of Martha and Lazarus, who all lived in Bethany. Two striking characteristics of her are set forth in the Gospels. (1) She had a contemplative nature. Luke reports that on one occasion when Jesus stopped at their home, Mary sat at His feet listening to Jesus while Martha was busy as a hostess (10:38-42). Jesus complimented Mary on choosing the "good portion." John reports that a year later at the death of Lazarus, Mary stayed home while Martha went out to meet Jesus (11:20). When Jesus subsequently visited Bethany, Martha again served Him, while Mary expressed her devotion to Him by anointing Him with perfume (Jn. 12:1-8).

(2) She was deeply devoted to Jesus. Mt. 26:6-13, Mk. 14:3-9, and Jn. 12:1-8 all tell of an incident in Bethany at the home of Simon the leper, where Mary lavished nard (perfume) on Jesus. Judas—and even the other disciples—objected to such extravagance as a waste, but Jesus defended her action as a "beautiful thing" (Mt. 26:10), stating that it would be remembered wherever the gospel was preached. (This incident should not be confused with a similar anointing of Jesus by a woman "who was a sinner" in Lk. 7:36-50.)

3. Mary the mother of James and Joseph (sometimes called Joses). She was probably the wife of Clopas (Jn. 19:25; cf. Mk. 15:40), but this depends on two suppositions: (1) that "Mary of Clopas" is not in apposition to "his mother's sister" (this seems likely, since there would hardly be two Marys in one family); and (2) that the literal "Mary the of Clopas" means "Mary the wife of Clopas" (it seems unlikely that it means "Mary the daughter of Clopas," since she seems to have had grown-up sons and would more likely have been known by her relation to her husband than to her father; see the comms.).

This Mary's devotion to Jesus can be seen by the following data. (1) With other women, she followed Jesus in Galilee and to Jerusalem, taking care of His needs (Mt. 27:55; Mk. 15:40f.; cf. Lk. 8:3; 23:49). (2) In spite of danger, she stayed close to Him at the cross (Mt. 27:55; Mk. 15:40; Jn. 19:25). (3) She watched His burial (Mt. 27:61; Mk. 15:47; cf. Lk. 23:55). (4) She was with the first group at the empty tomb, bringing spices (Mt. 28:1; Mk. 16:1; cf. Lk. 23:56). (5) She reported His resurrection to the disciples (Lk. 24:10).

4. Mary the mother of John Mark. Several facts about her can be gathered from Acts 12:12, the only place where she is mentioned in Scripture. (1) She was the mother of John Mark, who helped Paul and Barnabas and probably wrote the Gospel of Mark. (2) She was wealthy, for her home was large enough for many to gather there for prayer, and she had at least one maidservant. (3) Her house was a prominent center for the local church, since Peter went directly to it after his release from prison, and the church

was praying there. (4) She was probably a widow, since there is no mention of her husband. (5) She was the aunt of the missionary Barnabas (Col. 4:10).

5. Mary of Rome. All that is known about her is that she was one of the twenty-four people whom Paul greeted at the end of his letter to the Romans (16:6), and that she worked hard for the church at Rome. These data suggest that she was one of its earliest members.

E. H. PALMER

6. Mary the mother of Jesus.

I. Ancestry
II. The Virgin Birth
III. Marital Relations
IV. Character
V. Separation from Her Son
VI. Mariology

I. Ancestry.–Just as Joseph was descended from David (Mt. 1:1-16), so also was Mary. This cannot be proved conclusively from the genealogy of Lk. 3:23-38; otherwise there would never have been the long and indecisive controversy as to whether "of the house of David" goes with "virgin" or "Joseph" in Lk. 1:27. The former seems more probable. But v. 32 does point in the direction of Mary's Davidic ancestry when it says, "The Lord God will give to him the throne of his father David," for Mary was engaged but not yet married to Joseph. It is evident that Mary realized that Joseph was excluded when she said, "How shall this be, since I have no husband?"

Similarly, in Acts 2:30 the expression Luke used of Jesus' ancestry, "one of his [i.e., David's] descendants," can hardly refer to an ancestry through a purely legal relationship, via Joseph. It implies a flesh-and-blood relationship, through Mary (cf. Rom. 1:3; 2 Tim. 2:8). *See* GENEALOGY OF JESUS.

II. The Virgin Birth.–The VIRGIN BIRTH, or, more accurately, the virgin conception, is attested in many ways in Matthew and Luke. (1) The sharp contrast between the long series of verses that use "begot" and the statement that Joseph was "the husband of Mary, of whom Jesus was born" (Mt. 1:16) clearly implies that a man was not involved in the procreation of Jesus. (2) Mt. 1:18 states, "Before they came together she was found to be with child of the Holy Spirit." (3) Joseph's desire to divorce her quietly presupposes that he had had no sexual relations with her (Mt. 1:19). (4) The angel said "That which is conceived in her is of the Holy Spirit" (Mt. 1:20). (5) In citing Isa. 7:14, Matthew called Mary a virgin (1:23). (6) Joseph "knew her not until she had borne a son" (Mt. 1:25). (7) Twice Luke called her a virgin and said that she was betrothed, which, although almost tantamount to marriage, was not marriage in the fullest sense (1:27). (8) Mary was amazed at the angel's announcement that she would conceive, since, as she said, "I know not a man" (Lk. 1:34, ASV). (9) Luke said delicately but explicitly that the Holy Spirit, and not Joseph, would be the cause of the conception (1:35).

Thus Joseph was completely excluded from the procreation of Jesus. This fact, along with Mary's completely passive role, points to God's sovereignty in the Virgin Birth. Mary responded to the angel's announcement with "Behold, I am the handmaid of the Lord" (Lk. 1:38), but she was not first asked permission. Rather, she was simply told by Gabriel that she would conceive and bear a son. She responded in faith and obedience to that sovereign act of God.

III. Marital Relations.–The Roman Catholic Church teaches that Mary was a virgin *ante partum, in partu, et post partum*. The *ante partum* is substantiated in the comments above on the virgin conception. The *in partu* concept (of virginity during birth) is based on highly speculative deductions. The *post partum* or perpetual-virginity concept is held by some Protestants and was held by many Reformers (e.g., Calvin in his sermon on Mt. 1:22-25), but the Scriptures probably do not substantiate it.

The evidence points to normal marital relations between Mary and Joseph after the birth of Jesus. (1) The negative *ouk* plus *héōs*, "until" ("knew her not until she had borne a son"), does not automatically mean that the negative action is replaced by a positive one, i.e., that Joseph did "know" her after Jesus' birth (Mt. 1:25). But it often does imply a reversal of action. And if Mary and Joseph did not have normal marital relationships after the birth of Jesus, then the "until" clause has little meaning.

(2) The term "first-born son" (Lk. 2:7) does not always signify that other children follow this birth. If Mary had died in childbirth, Jesus would still have been called her firstborn. But the term usually signifies that other children followed and, in the light of the previous and following two comments, it is significant.

(3) Several passages speak of the brothers and sisters of Jesus and even name some of them (Mt. 12:46f.; Mk. 3:31f.; 6:3; Lk. 8:19f.; Jn. 2:12; 7:3, 5, 10; Acts 1:14). Although the Greek word can be taken in a wider sense than uterine brothers, the natural usage would be in the uterine sense.

(4) Much of Roman Catholic argumentation for the *semper virgo* concept stems from the thought that sexual abstinence or celibacy is more holy than sexual activity. But there is no basis for that idea in either the OT or the NT.

The natural reading of these several passages is that Mary and Joseph had normal marital relations.

IV. Character.–The intent of Scripture is not to portray Mary, but Jesus (Jn. 20:31). Matthew sets the tone for the entire NT with its opening words: "The book of the genealogy of Jesus Christ" (cf. also the openings of the other three Gospels). Yet in the course of the telling of the good news, a small glimpse of Mary's character is given. One dominant trait stands out: her faith in God. It evidences itself in her humility, obedience, praise, and familiarity with the OT.

When Gabriel announced to her that she would have the awesome task of carrying in her womb and then nurturing the Messiah, the son of God, and that this baby would not be from Joseph but from the Spirit of God, instead of weighing her unworthiness and insufficiency, or expressing disbelief as Zechariah did (Lk. 1:18), after the initial question she simply declared in humble, faithful obedience, "I am the Lord's servant; as you have spoken, so be it" (NEB). When Mary did not understand a message from an angel or her Son, she believingly pondered its meaning (Lk. 2:19, 51).

Mary's response to Elizabeth was steeped in praise of God. This is seen not only in the express statements, "My soul magnifies the Lord" and "my spirit rejoices in God my Savior," but also in the recitation of all the good things God has done (Lk. 1:46-56). In addition to praise, the Magnificat abounds in true humility before God, which is the foundation of her obedience.

That she was at home with the OT is seen in her allusions and phraseology in the Magnificat and in her faithful adherence to the OT regulations about circumcision (Lk. 2:21), purification and presentation in the temple (vv. 22-28), and the Passover (v. 41).

V. Separation from Her Son.–Mary's prime task in life was to bear the Savior of the world and bring Him up. But once that work was accomplished, and even while

she was doing it, she had to begin to separate herself from her son. Although she was His mother, she was subservient to Him. He was her Lord and Savior. She needed to ask Him for the forgiveness of her sins. This fact of necessary separation and subservience must be kept in mind in order to understand the post-Infancy narratives where Mary appears.

A. The Boy Jesus at the Temple (Lk. 2:41-51). Although the conclusion of this episode is that Jesus went home "and was obedient" to His parents, there is already a hint of the separation between Jesus and His parents that had to come. For the first time He intimated His messianic work, when He asked them, "Did you not know that I must be in my Father's house?" (2:49).

B. Wedding at Cana (Jn. 2:1-12). Although Jesus was still obedient to Mary at the temple, the separation was clearly evidenced at the wedding in Cana. The story begins with "the mother of Jesus" (2:1-11) but ends with the disciples. Mary knew of John the Baptist's pointing to the Lamb of God and of the calling of Andrew, John, Peter, and Philip. She recalled the miraculous birth thirty years earlier and the appearance of the angels and the star. And now at the wedding, as His mother, she was suggesting that He assert His authority. Surely His hour had come.

But Jesus, in order to draw more sharply the Lord-servant, Savior-saved relationship between Himself and His mother, said to her: "O woman, what have you to do with me? My hour has not yet come" (2:4). He used "woman" instead of "mother" not out of disrespect but as a polite form of address to show that He was no longer under His mother. The separation was now definite. Mother must no longer dominate. He was the Messiah. John caught this import by beginning with Jesus' mother but ending the episode by narrating that this was the first of the signs Jesus did and that His disciples put their faith in Him.

C. Jesus' Mother and Brothers (Mt. 12:46-50; Mk. 3:31-35; Lk. 8:19-21). It is only by understanding this spirit of independence from His mother that Jesus' reply to His mother and brothers can be understood. When they tried to see Him, it was not out of discourtesy that He pointed to His disciples and said, "Here are my mother and my brothers!" Rather, He wanted to impress on His mother and brothers that they must become His spiritual daughter and sons.

D. Mary at the Cross (Jn. 19:25-27). At the cross the separation was made definite. The close mother-son relationship now had to be severed by death and replaced by a John-Mary, son-mother relationship. But more importantly, Mary had to learn that the woman-Lord relationship had to replace that of the mother-son. In this tender moment Jesus brought this out clearly and kindly by addressing her as "woman."

E. Mary and the Apostles. This separation of Mary from her son found its fulfillment in her spiritual union with Him. Luke provided this final glimpse when he stated that after the Ascension Mary joined in continual prayer with the apostles (Acts 1:14). Nothing more is recorded of her, even though, in the judgment of many, Luke's Infancy narrative indicates that he had received this information from her and therefore had been close to her. Mary had fulfilled her task of bearing the Messiah. Once her work was done, she had to join other believers and be like them. When Luke recorded Peter's Pentecostal speech or Paul's work, he made no reference to Mary. Her place was in the Church, not in heaven as the Dispensatrix of all grace.

John's treatment of her in his Gospel proclaims the same truth. Jn. 19:27 reports that from the time of the crucifixion John took her into his home. If any apostle could have told a great deal about Mary, it was John. Yet he mentioned her only twice (at the wedding of Cana and at the cross), and on both occasions instead of exalting her he brought out that she was subservient to her son. This fits in perfectly with the purpose of his Gospel (Jn. 20:31), which is to point to Christ. E. H. PALMER

VI. Mariology.–A. Mary in Scripture. 1. Dignity of Mary. It is not to be questioned that Mary occupies a place of peculiar honor and dignity in Scripture. To be chosen as the human mother of the Messiah, the incarnate Word, is indeed to be the recipient of the high favor or grace of God (Lk. 1:28). There is thus every reason for the Magnificat as Mary's song of praise for the exaltation of His humble servant, and for the greeting of Elizabeth in v. 42: "And why is this granted me, that the mother of my Lord should come to me?"

Nor is Mary to be honored only for this exaltation. We must also respect her humble but obedient faith manifested in response to the divine decision and communication. What she was told was undoubtedly difficult to credit (Lk. 1:29, 34). Yet in spite of her initial questioning and astonishment, Mary made a quick response of faith (Lk. 1:38). Again, what was asked exposed her to particular difficulties in spite of its intrinsic dignity. Yet while she must have had many fears, her "Let it be to me" is in its way a model of unassuming yet resolute obedience to the divine call and commission -- an obedience that she no doubt continued to manifest in the comparative obscurity of her later church membership (Acts 1:14).

That her motherhood involved a unique exercise of miraculous power is a further reason to approach this servant of God with due respect. We can easily do her disservice at this point by excessively exalting Mary in virtue of the miracle. We can also do her disservice, however, by rejecting the miracle. Neither mistake should be allowed to obscure the singular dignity of her service as the virgin mother.

2. Fallibility of Mary. Nevertheless, when these points have been made, it is still to be recognized that Mary did nothing of herself even in this supreme moment of her life. She was passive in the great miracle of the conception of Christ. She simply offered herself as a handmaid of the Lord. Neither in herself nor as a representative of the race did she contribute positively to the great work of reconciliation. Rightly in the Magnificat she turned her thoughts to God as her Savior. So little did she participate in the final act of reconciliation that Jesus on the cross could not merely make provision for her but as it were transferred the filial relationship, in order that He might truly die alone and in order that the motherhood might not be misunderstood in relation to His resurrection, ascension, and session.

Moreover, as Mary contributed nothing of herself to the great work of God, she gave evidence that in herself she was only an errant and sinful mortal like all others. She did not even grasp the wonder of what took place at Bethlehem (Lk. 2:19). She was bewildered by the action of the Lord Jesus as a boy in the temple (Lk. 2:48-50). With the brethren, she even tried to interrupt the public ministry of the Lord (Mk. 3:31ff.). Although she was faithful at the cross and the tomb, learning the aptness of her name and experiencing to the full the piercing prophesied by Simeon, she was no quicker than others to see through the tragedy to the triumph.

We are not to censure Mary for her human fallibility or to dwell upon it in a spirit of superiority. She is not worse than others in her lack of understanding at these early stages. She won through to a place among the first believers when what was dark was made plain. But the point is that,

if she is not to be blamed or scorned, she is also not to be exalted as a supernatural being full of all graces and wisdom and exempt from all human frailty. We honor Mary best by giving her the dignity that is hers in Scripture and not by indulging in speculative glorification.

B. Early Church. 1. Virgin Birth. A first stage in thinking about Mary was the legitimate defense of the Virgin Birth against the unbelief of the Jews and the scoffing of pagans. The Apologists in particular were exercised about this question. Justin Martyr, for example, devoted much attention to the fulfillment of Isa. 7:14, both in his *Apology* and in the *Dialogue with Trypho*; in the *Apology* he also took into account the corrupt parallels in pagan mythology, which he ascribed to Satanic imitation. The miracle of the Virgin Birth is naturally linked with the chastity of Mary herself, so that some of these defenses perhaps tend to shift the emphasis at some points to the moral character of the Virgin. In some writers the parallel of Christ with Adam and the fulfillment in the Virgin Birth of the prophecy of Gen. 3:15 also suggest an understanding of Mary as the new Eve. But one hardly sees more than the possibilities of later Mariology in these first postapostolic statements.

2. Perpetual Virginity. From the later 2nd cent., the growing emphasis on the ascetic life, and particularly on celibacy, as a supposedly superior form of Christian practice combined with the emphasis on the chastity of Mary to produce the very different conception of her perpetual virginity. To the monastic mind, influenced to some degree by dualistic considerations, all sexual intercourse, even in lawful wedlock, carried with it at least a suggestion of sin, and therefore it was inconceivable that after the birth of Jesus Mary should have lived a normal married life and had children in the usual way. To be sure, there are references in the Bible to the brethren of Jesus, but it could be argued that the Greek term does not necessarily denote true brothers and sisters, that it might be used for cousins or for the children of Joseph by a previous marriage, and that in any case the word cannot be applied too strictly, since even children of Joseph and Mary would not be full brothers and sisters of Jesus. By the end of the 4th cent. the great Jerome could thus condemn as a shocking error the idea of Mary as a normal wife and mother, and Bishop Siricius wrote to Anysius (392): "For the Lord Jesus would not have chosen to be born of a virgin if he had judged that she would be so incontinent as to taint the birthplace of the body of the Lord, the home of the eternal king, with the seed of human intercourse." One detects a certain strain of Docetism, as well as of Gnostic dualism, in this pontifical utterance. Also apparent are a common Mariological phenomenon, namely, the appeal to the glory of the son as a ground for exalting the mother, and a refusal plainly to face up to the biblical data.

3. Theotókos. The christological debates of the 4th, 5th, and 6th cents. added a new element to the developing Mariology of the period. As we have seen, the exaltation of the Son naturally seemed to many to carry with it the exaltation of His mother. Thus the struggle for the true deity of Christ in His incarnation demanded literal acceptance of the statement in Lk. 1:35 and therefore of the implied fact that Mary is the one who bears God (*theotókos*), i.e., the mother of God . In the Nestorian controversy of the early 5th cent. *theotókos* became indeed a catchword of christological orthodoxy. To reject it was to reject the true deity of Christ, to see an illegitimate distinction between the divine nature and the human, and therefore to overthrow the unity of the person. Now from the christological angle and in a christological context the term is in fact unobjectionable and has been accepted by all orthodox theologians. Yet it is not a biblical term, and is perhaps better avoided in view of its dangerous Mariological implications when isolated from Christology and applied more strictly to Mary herself. We are certainly not surprised to find that insistence on the term carried with it a spread of false notions concerning Mary, both in relation to salvation as the new Eve and in relation to the Godhead as the mother, which helped to distort later theology and to prepare the way for the further elevation of Mary.

C. Middle Ages. 1. Theological Considerations. Several forces combined to foster Mariological development during the Middle Ages, especially, although not exclusively, in the Western church. Among the more directly theological factors we may mention the whole conception of sacramental grace, the consequent false dilemma of postbaptismal sin, the idea of a compensating treasury of merit and the efficacy of the intercession of saints, and the associated sense of the need of a special intercessor between the Lord and His people after the analogy of Cana of Galilee, where the Son is approached through the mother. In relation to the person of Mary there is no great development during this period apart from the growing tendency to postulate her freedom from original sin. But there is a marked growth of emphasis on the mediatorial or intercessory office and work of Mary and therefore a growing cult of the Virgin that found expression even in the prayers of so great a theologian as Anselm.

2. Intercession of Mary. The theological root of this emphasis, and of the related cult, is the postulate that nothing but severity can be expected from Jesus once we have spoiled His work and spurned His sacrifice by postbaptismal sin. To be sure, salvation from hell still finally depends on the atoning work of Christ. But how can we approach Him again when we have failed so miserably? Can we expect at His hands anything but the prolonged if purifying torments of purgatory? It is here that the intercession of saints, and more particularly of Mary, can help us, even as the pleas of confessors helped those who lapsed in days of persecution. The mother, it is argued, will plead our cause with the Son; her gentleness will mitigate His severity. As the mother of God, and therefore as Lady even in the courts of heaven, already exalted in virtue of her sanctity, she is in a position of influence to open again the fountain of divine mercy. Hence penitent sinners may turn the more naturally to her than to the Lord.

3. Veneration of Mary. They do so, however, with a full sense of her exaltation, as suppliants enlisting the aid of one who has power and authority. Hence there is required an adoration of Mary in her greatness and goodness. Mary's intercession is naturally accompanied by veneration of Mary. In strict theological definition, of course, careful distinctions are made at this point. The Lord Himself is still true God and the true fountain of grace, even though an approach is made to Him through the mother. The Virgin is mother of God and Lady of heaven, but she obviously cannot be described as herself God. The worship or veneration rendered to her cannot be the same as that accorded to God. In terms of the distinctions here made, the term Mariolatry is not strictly correct for the devotion rendered to Mary. *Latria* (true worship) is proper to God alone. *Hyperdulia* (extreme honor) is proper to Mary, and *dulia* (honor) to the saints. It can hardly be contested, however, that in relation to both the forms and the language of veneration these theological distinctions are of little practical significance. The same forms both of speech and action are used in relation to Mary as to God Himself. Indeed, some of the prayers and hymns to Mary achieve a magnificence and extravagance of adulation nowhere surpassed in addresses either to the trinity or to any one

of the three persons. Mariolatry may not correspond to the verbal definitions; it is certainly in keeping with the attested practice.

Certain nontheological factors probably contributed quite heavily to this development. The notion of a female deity is widespread in paganism, and in Mariology there is a modified though perhaps unconscious counterpart filling a gap in popular religion. The medieval development of chivalry, with its ideal of the lady's honor and knightly devotion to it, both derived from and yet also influenced thinking about Mary. The rough-and-ready justice of the age, occasionally tempered by the gentler feelings and pleas of women, provided something of a model for the imagined procedure in the court of heaven. Without the basic theological misunderstanding it is doubtful whether these factors could have played any great part. But in the circumstances they could make a strong and distinctive contribution, especially at the popular level.

D. Modern Period. 1. Trent. Rather strangely, the Council of Trent made no great addition to Mariological development in spite of the decisive Reformation criticism and the insistence of the Reformers on the sole mediatorship of Christ. The most that can be said is that no ground was yielded to the Reformers, e.g., in relation to the intercession or veneration of Mary, and that the statement on original sin left the way open for the later dogma of the Immaculate Conception: "It is not its intent to include in this decree on original sin the blessed and immaculate Virgin Mary, Mother of God." As yet, however, there was no positive definition of this dogma.

2. The Mary Cult. The Roman Catholic revival of the 19th cent. seems to have brought a tremendous development of popular Mariology continuing far into the 20th century. Congregations of Mary were formed, and, incongruous though it might seem, an age affected by romantic ideas of love almost seemed to find a place for a quasi-erotic element, calling young men especially to dedicate to the Virgin the devotion that young women might more easily give to Jesus. The part played by this element in the whole development of the Mary cult is, of course, difficult to assess. One may suspect that it is present even in an early celibate like Jerome. It is certainly a factor in the medieval period. It is an irrefutable element in the pagan intrusion. It seems almost to have been sanctioned in the 19th century. We certainly go astray if we isolate this element and make it a guiding principle in our whole understanding. On the other hand, one of the surprising features of Mariology is the part played by popular instincts and pressures, so that in the later period at least the theological definition seems to be a product of popular demand rather than the contrary.

3. The Immaculate Conception. The Mary cult of the 19th cent. was quickly accompanied by the promulgation of the Immaculate Conception by Pius IX in the bull *Ineffabilis Deus* (1854). The statement is: "We declare, pronounce and define: the doctrine that maintains that the most Blessed Virgin Mary in the first instant of her conception, by a unique grace and privilege of the omnipotent God, and in consideration of the merits of Christ Jesus the Savior of the human race, was preserved free from all stain of original sin, is a doctrine revealed by God, and therefore must be firmly and constantly held by all the faithful." It should be noted that the pope took the initiative in this definition, thus making an early practical experiment in the direction of papal infallibility in a field where he could rely on strong popular support. The status of Jesus Christ is carefully safeguarded in the decree, since the Virgin's freedom from original sin is not by nature but only in virtue of His merits. Yet the uniqueness of the Virgin is also asserted, since a completely sinless life is now postulated, whether in respect of original sin or actual. The claim to divine revelation is odd in view of the silence of Scripture and the late promulgation of the doctrine in Christian history. Incidentally, the Immaculate Conception is not to be confused with the purity of Mary in respect of the Virgin Birth.

4. The Assumption. It has often been noted that popes whose ex cathedra pronouncements are now claimed to be infallible are very sparing in such pronouncements. Nor is it less significant that Mariology again suggested itself as a safe and proper sphere for the exercise of this alleged infallibility. The next stage was reached in the *Munificentissimus Deus* of Pius XII (1950), which defined as an article of divinely revealed faith, necessary to be believed on pain of damnation, that the Blessed Virgin Mary, having completed her earthly life, was in body and soul assumed into heavenly glory. This strange belief seems to come originally from some apocryphal fourth-century writings (*The Passing of Mary*, etc.), which Gelasius had condemned as spurious, but the point of which was adopted by writers like Gregory of Tours. John of Damascus described the assumption as an ancient catholic tradition, and from his age it passed into the Middle Ages as a pious opinion. Nevertheless, as late as 1740 Benedict XIV could say that the tradition is not of such a kind as to warrant the elevation of the belief to the rank of a doctrine of faith. The twentieth-century decision, however, is more in keeping with Mariological development. For if it is inconceivable that she should have been guilty of any form of sin, it is surely no less inconceivable that she should be subject to the ordinary processes of mortality and corruption. In other words, if Mary is to be removed from the ordinary ranks of human nature in virtue of the one unique and special action of the birth of Jesus, she might just as well be removed at every point.

5. Coredemptrix. Recent Mariological development has been related more to the person of Mary than to her work, although the two aspects are plainly linked. Emphasis on the intercessory role of the Virgin has increased rather than diminished, and the intensified Mary cult is obviously related to her assumed mediatorial role. Hence many circles believed for a time that the strands would be pulled together at an even higher level by her official recognition as mediatrix or coredemptrix, which would further elevate her person and exalt the conception of her work, both in its original stage as the mother of the Lord and in its later stages as the one who mercifully pleads for sinners. But more recent developments in Roman Catholicism have halted this process and have raised serious and yet unanswered questions regarding the status of Mary.

E. Significance of Mariology. In view of the slender basis on which it is built, Mariology is in some sense a mystifying structure. What is the secret of its power? What is the driving religious impulse behind it? How are we to explain and therefore to meet it?

1. Heresy. A first answer is that it takes up and perpetuates various heretical but persistent conceptions that appeal to the natural mind. The strain of Docetism has already called for notice. But most important in this regard is probably the element of Gnostic or semi-Gnostic dualism, especially in its interrelation with the high estimation of virginity. A failure to understand and accept the normative authority of Scripture removed the most powerful restraining factor and allowed fanciful traditions unduly to influence later thinking and action.

2. Paganism. Yet Mariology can hardly be explained merely in terms of such factors, and we may therefore suggest the second answer, that it derives much of its

power from its enshrining many of the conceptions and impulses of pagan religion. The quasi-erotic factor may be recalled in this respect. Also relevant are the belief in female as well as male deities, the whole conception of deity in terms of supernatural humanity, and the ease with which pagan festivals can often be adapted to the Mary cult.

3. Anthropocentricity. Again, however, we cannot come to the simple conclusion that Mariology is merely a badly baptized paganism. We are thus led to a third and final answer, which in a very real sense underlies the first two, that Mariology corresponds in a Christianized form and context to our constant urge and need to fashion our own religion, to achieve our own salvation, to be our own god. In Mariology, of course, there is a twofold reservation, which can also serve as a twofold disguise. The movement here takes place within the saving work and revelation of God Himself in grace, and it is related to the idealized figure of Mary rather than to humanity in general. Yet a little reflection shows that in this idealized figure we may indeed cooperate in our salvation, attain almost to the title of deity, and enjoy an autonomous apotheosis. To see this heart of Mariology is to understand why it could so readily incorporate heretical and pagan features. It is also to see why it could arise so easily at a time when the evangelical doctrines were increasingly obscured. It is to grasp why it can flourish most readily in the Roman synergism worked out in the Middle Ages and formally sanctioned from the Tridentine period. It is to perceive the perennial appeal to the human mind and heart either of Mariology or of its more rationalistic substitute in Liberal Protestantism. And it is finally to see the antidote in an exclusive commitment to, and proclamation of, Jesus Christ Himself as our only and all-sufficient Savior both in life and in death.

MARY, PASSING OF. *See* APOCRYPHAL GOSPELS II.F.

MASADA mə-sä'də [Heb. *m^{e}ṣāḏâ*–'mountain fortress'; Gk. *Masada*]. A rocky plateau rising from the western shore of the Dead Sea, used as a fortress by Herod the Great and then by the Zealots, and given lasting memory by Josephus. Although it is not mentioned by name in the Bible, this subject should be included in a Bible dictionary for several reasons. (1) It allows further insight into the almost psychoneurotic character of Herod the Great. (2) It sheds light on the next-to-final chapter of the Jewish revolt against Rome. (3) The manuscript fragments discovered there include canonical as well as deuterocanonical writings that are indisputably related to those found at Qumrân.

I. Physical Description
II. Historical Outline
III. Herodian Constructions
IV. Zealot Occupation

I. Physical Description.–Masada (es-Sebbe) is well described by Josephus: "A rock of no slight circumference and lofty from end to end is abruptly terminated on every side by deep ravines, the precipices rising sheer from an invisible base and being inaccessible to the foot of any living creature, save in two places where the rock permits no easy ascent" (*BJ* vii.8.3 [280], *LCL*). It is an isolated rock bluff or table mountain 16 km. (10 mi.) S of En-gedi on the western shore of the Dead Sea, opposite el-Lisan ("the tongue") peninsula. The rock is separated from the cliffs that border the western shore of the Dead Sea by

deep wadis on the west and south. According to D. Baly, Masada is at the northeastern end of the Dimona ridge (*GB*, 2nd ed., pp. 35f.). The top is 59 m. (193 ft.) above sea level, and the surface of the Dead Sea is 399 m. (1309 ft.) below sea level (1976 survey; still lower at the time of this writing). Masada rises to a height of about 400 m. (1300 ft.) above the surrounding land, but because of the accumulation of detritus at its base, its eastern face is 250 m. (820 ft.) high, and its western face 180 m. (600 ft.). Masada is about 580 m. (1900 ft.) from north to south and 200 m. (650 ft.) from east to west, pointed at each end, with almost sheer sides. The top, with an area of about 8 ha. (20 acres), is flat, somewhat lower at the southern end, so that to a traveler approaching from the north it resembles a huge ship.

There are only two approaches to the top of Masada. One is the famous "snake path" (cf. Josephus *BJ* vii.8.3 [282]), a tortuous trail that winds up the eastern side and takes a person in excellent condition fifty minutes to climb. The other is a ramp built by the Romans during the siege of Masada that in effect connects the insular rock with the cliffs from which it had originally been severed. Josephus mentioned a second "track" on the western side "by which the approach is easier" (281), which "Herod barred at its narrowest point by a great tower" (293). This track was probably covered by the Roman ramp. A gate in the western wall suggests an earlier access at that point.

II. Historical Outline.–According to Y. Yadin remains (discovered 1963-1965) in caves in the Masada cliffs revealed Chalcolithic occupation in the 4th millennium. Scattered sherds from the time of the first temple (10th-7th cents. B.C.) have been found, but there are no indications of buildings or other evidence of occupation. Coins of Alexander Janneus (104-78 B.C.) indicate that Josephus may have been correct in attributing the first defenses on Masada to the Hasmonean period (specifically to the high priest Jonathan [161-143]; cf. *BJ* vii.8.3 [285]). Yadin, however, considered any buildings and cisterns constructed on the site before the Herodian period the work of the king Alexander Janneus (*Masada*, p. 203).

In 42 B.C. Helix, who opposed Herod and his brother Phasael, occupied Masada while Herod was in Syria. Recognizing the military value of the place, Herod recaptured it and located his family there while he went to Rome to claim his kingdom (40-39 B.C.; *BJ* i.12.1f. [236-39]; i.13.7f. [263-67]; i.15.1 [286f.]; *Ant.* xiv.13.8f. [355-364]; xiv.14.6 [390-93]). Upon his return from Rome Herod forced Antigonus to lift the siege of Masada, thus freeing the members of his family (*BJ* i.15.3f. [290-94]; i.16.1 [303]; *Ant.* xiv.15.1f. [394-405]).

The major period of building at Masada was during the reign of Herod the Great (37-4 B.C.) and evidently occurred in two stages. Some of the earlier construction, which Yadin was inclined to attribute to Herod rather than to

Aerial view of Masada showing Herod's three-tiered palace (W. Braun)

Jonathan or Janneus, was altered by later operations (see III below).

The Romans had a garrison in Masada from *ca.* A.D. 6 until the summer of 66, the first year of the Jewish Revolt, when the soldiers were slain by Jews (*BJ* ii.17.1 [208]). The Jews — called "Sicarii" by Josephus and "Zealots" by Yadin — then took over the site, modifying buildings, constructing dwellings, a synagogue, and ritual baths (*miqwîm* or *miqwā'ôt*) and altering the place in other ways. The revolt ended in 73 (see IV below). There are indications of the presence of a Roman garrison at Masada in 73-111. During the Byzantine era (5th-6th cents. A.D.) a chapel and monks' cells were built. Of these periods only the Herodian and the Zealot are of concern in this article.

III. Herodian Constructions.–There were two large Herodian palaces, the northern and the western, and a few smaller palaces. The northern palace was a private villa (hence Yadin's term "palace-villa"), built in three tiers at the northern end of the rock and on its cliff. The uppermost level consisted of a large semicircular porch and ornately decorated living quarters (only four rooms, indicating that it was a family villa rather than a royal palace). The middle level, 20 m. (66 ft.) below, had a circular pavilion and a colonnade whose columns and capitals suggest that it had been roofed over; to the south were the living quarters, described by Yadin as "a place where one could sit, eat, relax and look at the view" (*Masada,* p. 59). The lowest level, 15 m. (50 ft.) below the second, consisted of buildings on a platform 17 by 17 m. (57 by 57 ft.) that was raised at the narrowest point of the rock and therefore required elaborately engineered retaining walls. Mosaic floors, beautiful frescoes, and columns and panels simulated in plaster (some veined to resemble marble), provided lavish decoration throughout the villa. For a description with numerous illustrations (monochrome and color) see Yadin, *Masada,* pp. 41-86.

The western palace was the largest (3340 sq. m., 36,000 sq. ft.) and was the administrative center. It was divided

into four blocks: the southeastern containing living quarters and the throne room; the northwestern, the administrative wing; the northeastern, service and work rooms; and the southwestern, store rooms, one very long (70 m., 230 ft.) and three smaller. The palace's main entrance was on its north side, and the western gate was just N of the palace itself. (Cf. Yadin, *Masada* 117-140.) The smaller palaces were for members of the king's family and for the court functionaries.

South of the palace-villa was an elaborate bath, very well preserved, built in Roman fashion with warm, tepid, and cold rooms. Alongside, to the east and to the south, were large storerooms, five long rooms measuring 20 by 3.7 m. (66 by 12 ft.) in the northern block, and eleven even longer rooms measuring 27 by 4 m. (88 by 13 ft.) in the southern block. An administrative building completed the building complex at the northern end (the highest part of the rock, and the most easily defended).

Other buildings included an "apartment" or garrison building that housed the top administrators, a swimming pool S of the western palace, and a columbarium, 7.5 m. (25 ft.) in diameter, designed to hold the ashes of non-Jewish members of the Herodian garrison, toward the southern end of the rock. For descriptions see Yadin, *Masada*, pp. 75-110.

A large casemate wall surrounded the entire area except for the palace-villa area. Josephus described it as follows: "First he [Herod] enclosed the entire summit, a circuit measuring seven furlongs [Gk. *stádia*], with a wall of white stone, twelve cubits high and eight broad; on it stood thirty-seven towers, fifty cubits high, from which access was obtained to apartments constructed round the whole interior of the wall" (*BJ* vii.8.3 [286], *LCL*). Seven stadia (1295 m., 4250 ft.) is quite close to the measurement given by Yadin (4200 ft.). The description of "apartments round the whole interior" fits the discovery that the wall was casemate, i.e., a double wall, with rooms between the walls, actually 110 rooms, varying in size from 5.5 m. (18 ft.) to 35 m. (114 ft.) in length, and 4.1 m. (13.5 ft.) in width (i.e., the width between the walls). It appears that Josephus's figure of the breadth of the wall (8 cubits, approximately 3.6 m., 12 ft.), takes into account only the space between the two walls. Yadin found thirty towers (cf. Josephus's 38), and he challenged Josephus's figures on the height of the wall (12 cubits = 5.5 m., 18 ft.) and of the towers (50 cubits = 23 m., 75 ft.). The wall was entirely constructed of dolomite, which was obtainable on the site. According to Yadin, Josephus described the color as white because the wall was covered with plaster, remains of which were found by the excavators. The rooms in the wall contained many personal items from the Zealot occupation, including hundreds of coins from Years 1-5 of the Jewish revolt. See Yadin, *Masada*, pp. 141-163.

The northwest gate, located at the northern end of the western wall, provided access to the upper row of cisterns on the western cliffs. The southern (cistern) gate, NE of the southern end of the wall, gave access to the cistern on the southeastern cliff. The western gate, mentioned above, guarded the western path, and the gate on the eastern wall, near the northern complex of buildings, guarded the access by the snake path to the plateau.

An elaborate system of water collection and storage was essential to life on Masada, and the remains of some of it can be seen today. Rain water was collected from the surface of the plateau and particularly from dams that had been built in the wadis N and S of the rock, and stored in cisterns. In the rainy season, water flowed by gravity from the dammed-up areas to huge cisterns built on the northwestern cliffs of Masada. The visitor who ventures over the Roman ramp and looks back at the rock can see two rows of cisterns, eight in the upper row and two in the lower, each having a capacity of 3900 cu. m. (140,000 cu. ft.), for a total of nearly 40,000 cu. m. (1,400,000 cu. ft., approximately 10.5 million U.S. gallons). The wadi at the southern end of Masada fed the upper row of cisterns, while that at the northern end fed the lower row. Other cisterns at the top of Masada were filled during the rainy season by surface water but during most of the year by persons who carried the water from the cisterns on the flanks of the rock. See Yadin, *Masada*, pp. 21-34.

The reason for the extensive fortification of this impregnable rock is given by Josephus: "For it is said that Herod furnished this fortress as a refuge for himself, suspecting a twofold danger: peril on the one hand from the Jewish people, lest they should depose him and restore their former dynasty to power; the greater and more serious from Cleopatra, queen of Egypt" (*BJ* vii.8.4 [300 f.], *LCL*). The same fear led Herod to build fortresses at Machaerus in Transjordan and at the Herodium in Cisjordan.

IV. Zealot Occupation.–In the summer of A.D. 66, according to Josephus, "some of the more ardent promoters of hostilities banded together and made an assault on a fortress called Masada; and having gained possession of it by strategem, they slew the Roman guards and put a garrison of their own in their place" (*BJ* ii.17.2 [408], *LCL*). Some of the weapons from Herod's armory were used in the revolt in Jerusalem (ii.17.8 [433f.]). When Jerusalem fell (A.D. 70) and pockets of Jewish resistance were wiped out, only Masada remained; it was finally taken by Silva in 73.

During this period some changes were made in the Herodian structures. Private dwellings were built toward the southern part of the eastern wall. The rooms in the casemate wall were modified. Columns and capitals from the Herodian buildings were used in this construction, not only causing great damage to those buildings but also scattering the parts, thus making the task of the archeologists more difficult. The palace-villa was modified to become the military headquarters, as attested by quantities of arrows and other weapons. The western palace was the administrative center, which became the main target of the Roman attack via the ramp and the breaching of the wall. Quantities of burnt arrows and coins from the days of the revolt were found there. The smaller palaces were divided with interior walls to provide additional private housing. *See* Plate 44.

Ritual baths (*miqwîm*) were installed. When discovered the first *miqweh* drew great interest from the orthodox religious Jews, for it was the earliest known, and they were concerned to see whether it had been built in accordance with the detailed regulations preserved in the Talmud. It had been: it contained "forty measures." Because of the shortage of "pure" water, the provision had been made to admit a very small amount of "pure" water, which was supposed to purify the rest — a practice that not only violates physical law but even seems to oppose the principle set forth in Hag. 2:12f. An almost identical *miqweh* was discovered on the opposite side of the plateau. See Yadin, *Masada*, pp. 164-67.

A long room in Palace XIII had been converted to what apparently was a religious study house. Benches were found along three sides of the room, and in the center was a table (*EAEHL*, III, 809).

There was also a synagogue 12.5 by 10.4 m. (41.0 by 34.1 ft.) on the western wall, opposite the administrative building at the northern end. It faced west (i.e., toward

Jerusalem) and had four tiers of benches along three of its walls. According to Yadin the building existed in two stages. The earlier building (which likely also served as a synagogue) was constructed in the Herodian period by removing the inner wall and extending the casemate. There is clear evidence that the second-stage building was from the Zealot occupation. (See Yadin, *Masada,* pp. 181-191.) This synagogue is of great significance, since it is the earliest and the only one from the second temple period discovered to date.

The story of the siege of Masada, including the stubborn resistance of the Jewish inhabitants that ended in self-imposed death, has been brilliantly described by Josephus (*BJ* vii.8.1 [252f.]; vii.8.2–9.2 [275-406]) and illustrated by the excavations. Silva built a circumvallation around the base of Masada and located Roman camps at several points. The remains can be clearly seen from the top of the rock. The Zealots had a supply of food from the Herodian period, some of it from the time of Cleopatra, according to Josephus (vii.8.4 [297]). Huge stones weighing 45.5 kg. (100 lbs.), ostensibly used to roll down onto the heads of invaders, as well as stores of arrows, were found. Silva ordered slaves to build a ramp from a projection of rock called Leuke ("white") to the western side of Masada. The ramp, according to Josephus, was 200 cubits high (91.4 m., 300 ft.). (Visitors today who arrive via Arad can cross this ramp, scale a flight of steps, and enter the fortified area atop Masada.)

When it became apparent that the Romans would breach the wall, in spite of valiant defense efforts, Eleazar, the leader of the Zealots, made a speech (reconstructed by Josephus *BJ* vii.8.6f. [323-388]) urging the 960 inhabitants to die rather than submit to slavery. The men killed their wives and children and then were slain by ten who had been chosen by lot for the deed. Finally one, chosen also by lot, slew the nine and then killed himself. The Zealots had burned everything that could be of use to the Romans, preserving only a small store of food to show that they had died willingly while life was still possible. There were seven survivors, women and children, who it seems had hidden to escape the death pact and then surrendered to the invaders. The story of that pact is probably to be traced to their accounts. According to Josephus the end came on the 15th of Xanthicus, or May 2, A.D. 73 (or, according to another calculation, the year was 72; cf. Josephus *BJ* vii.9.1 [401], with note in *LCL*).

Among the archeological discoveries were 700 ostraca, most inscribed in Hebrew or Aramaic but some in Greek or Latin, which Yadin suggested were ration chits. Some had a single name and one the name Ben Ya'ir, quite possibly Eleazar ben-Ya'ir the commander of Masada (cf. Josephus *BJ* ii.17.9 [447]). Yadin suggested that these ostraca bore the names drawn by lot and were mute evidence of the gruesome pact. In the palace-villa Yadin discovered remains of a youth, a female, and a male; he asked the poignant question, "Could it be that we had discovered the bones of that very fighter and of his kith?" (*Masada,* p. 58, referring to Josephus *BJ* vii.9.1 [397]). See Yadin, *Masada,* pp. 193-99.

Also among the discoveries were quantities of pottery, leather, glass, stone, bronze ware, remains of food, and coins. Most important are the manuscript finds. Those from various parts of the plateau include fragments of the Psalms, notably 81–85 and 150; small fragments of Leviticus; and of the Songs of the Sabbath Sacrifice (fragments of which were also found at Qumrân; the texts from both sites are clearly Essenic or sectarian); and fragments in Hebrew of the Wisdom of Ben Sira and of Jubilees. In the synagogue were found portions of fourteen scrolls, and in a genizah under the floor of the synagogue parts of Ezk. 37 and the two final chapters of Deuteronomy.

W. S. LASOR

MASALOTH mas'ə-loth (1 Macc. 9:2, AV). *See* MESALOTH.

MASCHIL mas'kil. *See* MASKIL.

MASH mash [Heb. *maš*; Gk. *Mosoch*]. Named as a son of Aram (Gen. 10:23). The name is given as Meshech in 1 Ch. 1:17; cf. LXX *Mosoch* in both passages. Meshech, however, is a Japhetic name (Gen. 10:2 par. 1 Ch. 1:5), and Mash may be the correct Shemite name. It is possible that Mash is to be identified with a mountain, perhaps the Mons Masius of classical writers (e.g., Strabo, *Geog.* xi.14.2) on the northern boundary of Mesopotamia.

MASHAL mā'shäl [Heb. *māšāl*] (1 Ch. 6:74 [MT 59]). A town in Asher given to the Levites; called MISHAL in Josh. 19:26; 21:30.

MASIAH mə-sī'ə [Gk. A *Masias,* B *Meisaias*]; AV, NEB, MASIAS. Head of a family of Solomon's servants who returned from the Exile with Zerubbabel (1 Esd. 5:34); the name is not listed in the parallel accounts in Ezr. 2:57; Neh. 7:59.

MASKIL mas'kil [Heb. *maśkîl*]; AV MASCHIL; NEB omits all Psalm titles. A technical term in the titles to Pss. 32, 42, 44, 45, 52–55, 74, 78, 88, 89, and 142. It designates a type of psalm, but its meaning is uncertain. It is derived from the hiphil of *śāḵal,* "have insight," "have success." According to S. Mowinckel, "the verb *hiśkîl* means to know how to reach one's aims and succeed in reaching them, and thus be justified as a wise man" (*Psalms in Israel's Worship* [Eng. tr. 1962], II, 209). He suggested the translation "efficacious song." Others have suggested "didactic poem," "meditative poem" (e.g., C. A. Briggs and E. G. Briggs, comm. on Psalms, I [*ICC,* 1906], lxi), "sense-giving harmony" (M. Dahood, *Psalms,* I [*AB,* 1965], 194), etc. *Maśkîl* occurs once within the body of a Psalm (Ps. 47:7 [MT 8]), where it is variously rendered "psalm" (RSV), "understanding" (AV), "all your art" (NEB), "skillful song" (*AB*), etc.

MASMAN mas'mən (1 Esd. 8:43, AV). *See* MAASMAS.

MASON [part. of *gāḏar* (2 K. 12:12 [MT 13]; 22:6), part. of *ḥāṣaḇ* (2 Ch. 24:12; Ezr. 3:7), *ḥārāš qîr* (1 Ch. 14:1), *ḥārāš 'eḇen* (1 Ch. 22:15), *ḥārāš 'eḇen qîr* (2 S. 5:11)]; AV also WORKER OF STONE; NEB also SCULPTOR, STONE-MASON; **MASONRY** [supplied by the context] (Ezk. 46:23); AV "building"; NEB "stones." A (usually skilled) worker who cuts, forms, and lays stone or brick for construction purposes.

The verb *gāḏar* (part. *gōḏēr*) seems to refer specifically to the building of a wall; the term may thus refer to a person who lays stones (or bricks) into wall formation; in 2 K. 12:12 he is separated from the "stonecutter," who is called a *ḥōṣēḇ* (part. of *ḥāṣaḇ*), qualified by the word for "stone." The latter term thus refers to the skilled workmen who prepared the stones for placement in the wall by the *gōḏēr.* The *ḥārāš 'eḇen qîr* of 2 S. 5:11 was probably identical to the *ḥōṣēḇ,* because the phrase, literally translated, means "cutter of the stone of the city (or

wall)"; it could refer to quarriers, however. 1 Ch. 14:1, *ḥārāš qîr*, is repeating 2 S. 5:11 minus the word *'eḇen* (note 1 Ch. 22:15, *ḥāraš 'eḇen*, perhaps another variant of the fuller expression). Although bricks were used frequently for superstructures in Palestine, the Bible does not seem to mention brick masons.

Stone masonry has been used from earliest times, when it was largely done with unhewn stones. During the 18th and 17th cents. B.C. extremely large stones were used for fortifications in a style named after the Greek Cyclops (cf. Gezer, Hazor, Megiddo, etc.). During the period of the monarchy, very finely-hewn stones (ashlars) were used in a header-stretcher fashion for governmental constructions. The largest stones, up to 7.5 m. (24.6 ft.) long, were used by Herod the Great for his construction of the Jerusalem temple. It was to these that the disciples alluded in Mt. 24:2. The stones for most common houses were only slightly hewn.

MASREKAH mas'rə-kə, mas-rē'kə [Heb. *maśrēqâ*–'place of choice vines'; Gk. *Masekka*]. A place in Edom, probably a royal city (Gen. 36:36; 1 Ch. 1:47). "Samlah of Masrekah" is named as the successor of Hadad but is not called that king's son. Eusebius (*Onom.* 125.16) located Masrekah in the Gebalene in the northern part of Edom. Because of the similarity of names modern scholars have suggested that it was near Jebel el-Mushraq, 32 km. (20 mi.) SSW of Ma'an, near the Nabatean site of et-Telajeh. Cf. *AASOR*, 15 (1935), 62; *GP*, II, 380f. W. S. L. S.

MASSA mas'sə [Heb. *maśśā'*–'load, burden,' 'oracle']. Name of the seventh of the twelve sons of Ishmael (Gen. 25:14; 1 Ch. 1:30); evidently eponymous head of a tribe of the same name. Since other sons of Ishmael, e.g., Dumah, Tema, etc., seem to be associated with northeast Arabia, it is probable that the descendants of Massa settled in this area as well. An inscription of Tiglath-pileser III (745-727 B.C.) indicates that tribes from the area of north Arabia, including the "inhabitants of Mas'a [and] of Tema . . . ," brought him tribute (*ANET*, p. 283). From the Jebel Ghunayn region a text of the 6th cent. B.C. indicates the presence of the tribe (*Massā'*) in the region between al-Jauf and Taymā' (Tema) (Winnett, pp. 90f., 101f.). The tribe of Massa is possibly connected with the *Masanoi* of the Arabian desert, mentioned by Ptolemy (*Geog.* v.18.2).

In Prov. 30:1 and 31:1 the RSV and NEB indicate Massa as the name of a country or tribe from which Agur and Lemuel came. The AV translates *maśśā'* as "prophecy," partially supported by the LXX. *Maśśā'* as an oracle, however, usually conveys the sense of doom or judgment, which does not fit the context. The former interpretation is more probable, for the personal names are non-Hebrew, appearing in Minaean and other south Arabian inscriptions (Hitti, p. 43). The construct configuration in 31:1, "the king of Massa," favors this interpretation. The suggestion of wise men being from this region agrees with the later note that "the sons of Hagar [= Ishmaelites or north Arabians] . . . see for understanding on the earth" (Bar. 3:23).

Bibliography.–P. K. Hitti, *History of the Arabs* (1951); F. W. Winnett, *et al.*, *Ancient Records from North Arabia* (1970).

MASSACRE OF THE INNOCENTS. *See* INNOCENTS, MASSACRE OF THE.

MASSAH AND MERIBAH mas'ə, mer'ə-bə [Heb. *massâ ûmᵉrîḇâ*–'proving and strife'; Gk. *peirasmós kaí loidórēsis*]. These names occur together to indicate a single place only in Ex. 17, although according to some (e.g., M. Noth, *Exodus* [Eng. tr. *OTL*, 1962], pp. 139f.) this passage conflates two traditions: "Meribah and Massah were two different places, each with its own special local tradition." This conflation, it is thought, was due to these two places being paralleled in Ps. 95:8 and Dt. 33:8 (see Noth, p. 139). Outside Ex. 17 the two names clearly apply to two separate places. Although many scholars also assert that the accounts in Ex. 17:1-7 and Nu. 20:1-13 are variants of one tradition (see the discussion of B. Childs, *Book of Exodus* [*OTL*, 1974], pp. 305-309), others hold that these are two separate but quite similar stories (e.g., KD). Thus Massah in Ex. 17:7 refers to the incident near the outset of the journey of Israel, and Meribah in Ex. 17:7 and Nu. 20:13 to the incident at Kadesh just before the people entered the Promised Land. Each incident had elements of strife, but in Ex. 17 the element of "proving" is uppermost.

(1) Exodus 17:1 records that at REPHIDIM, near the beginning of the desert wanderings, the people murmured and complained because they lacked water. Moses, appealing to God, was told to take with him the elders of Israel and smite with his rod the rock on which Yahweh stood in Horeb. Water gushed forth, and the people drank. Moses alone was God's agent and did nothing blameworthy in this account. He called the place Massah (<*nāsâ*, "test") and Meribah (<*rîḇ*, "strive") because the children of Israel caused strife and tempted the Lord (note the wordplay in vv. 2, 7: "find fault," *rîḇ*, "put to the proof," *nāsâ*). In some way not indicated, here and at Meribah, God tested the Levites (Dt. 33:8; cf. Ps. 95:8f.).

(2) The second narrative, Nu. 20:1-13, describes an episode at Kadesh (i.e., Kadesh-barnea) when the desert wanderings had nearly ended. The flow of water from the famous spring for some reason had ceased. In their distress the people became impatient and petulant. At the door of the tent of meeting Moses and Aaron received Yahweh's instructions; but instead of speaking to the rock as commanded, Moses struck it twice with his rod. The flow of water was at once restored, but Moses and Aaron were severely punished because they did not uphold God's holiness in the eyes of the people. The waters of Meribah was the name given to the scene of this strife.

M. A. MACLEOD

MASSEBAH mə-sē'bə. Transcription of Heb. *maṣṣēḇâ*, "pillar," "stone set up as a memorial"; a technical term in archeology for a sacred pillar. *See* PILLAR.

MASSIAS mə-sī'əs [Gk. A *Massias*, B *Asseias*] (AV, NEB, 1 Esd. 9:22). *See* MAASEIAH 8.

MAST [Heb. *tōren*] (Isa. 33:23; Ezk. 27:5); [*ḥibbēl*] (Prov. 23:34); NEB RIGGING. A long pole rising from the keel or deck of a ship and supporting the sails. Heb. *ḥibbēl* is a hapax legomenon for which various translations have been suggested; the NEB understands it as an intensive form of

ḥeḇel, "rope." Following the proposal of P. Calderone (*CBQ,* 24 [1962], 412f. n. 5), M. Dahood (*Proverbs and Northwest Semitic Philology* [1963], pp. 49f.) suggested that *ḥbl* be translated "mountain" as the cognate of Ugar. *ḫlb* and Akk. *ḫalbu.* But this proposal is not only semantically improbable, since Akk. *ḫalbu* means "forest" (*CAD,* VI, 40f.; note, however, that Ugar. *ḫlb* is often rendered "forested height"), but also contextually inappropriate, since it moves the image from sea to land. See the discussion in W. McKane, *Proverbs* (*OTL,* 1970), pp. 395f.

G. A. L.

MASTER [Heb. *māšal*] (Gen. 4:7); AV RULE; [*šālaṭ*] (Eccl. 2:19); AV RULE; [*bāʿal*] ("be master," Jer. 3:14); AV "be married"; NEB "be patient"; [*ʾāḏôn*]; AV also LORD; NEB also KING, etc.; [*baʿal*] (Jgs. 19:22f.; Isa. 1:3); NEB also OWNER, etc.; [*ʾommān*] (Cant. 7:1 [MT 7:2]); AV CUNNING WORKMAN; NEB SKILLED CRAFTSMAN; [Gk. *katakyrieúō*] (Acts 19:16); AV OVERCOME; NEB OVERPOWER; [*kýrios*]; AV also LORD, GOD (Rom. 14:4); NEB also EMPLOYER; [*kathēgētḗs*] (Mt. 23:10); NEB TEACHER; [*rhabbí*] (Mt. 26:25, 49; Mk. 9:5; 11:21; 14:45); NEB RABBI; [*rhabbouní*] (Mk. 10:51); AV LORD; [*epistátēs*] (Lk. 5:5; 8:24, 45; 9:33, 49; 17:13); [*despótēs*] (1 Tim. 6:1f.; Tit. 2:9; 1 Pet. 2:18; 2 Pet. 2:1; Jude 4); AV also LORD; **MASTER BUILDER** [Gk. *architéktōn*] (1 Cor. 3:10); **MASTER OF THE HOUSE** [Gk. *despótēs*] (2 Tim. 2:21); AV MASTER; [*oikodespótēs*] (Mt. 10:25); NEB MASTER; **MASTERY** [Heb. *šālaṭ*] ("get the mastery," Est. 9:1); AV "have power," "had rule"; NEB "gain the upper hand." For Prov. 8:30, the RSV reads "master workman" (Heb. *ʾāmôn* or even *ʾommān*), though the margin suggests another reading: "little child" (*ʾāmûn*); the AV reads "one brought up with him," while the NEB has "darling." (See R. B. Y. Scott, *Proverbs* [*AB,* 1965], p. 72 for a discussion of the possibilities.) In Rom. 14:4 the AV does not follow *kýrios* but rather an inferior reading, *theós,* "God." In Tit. 1:8 the RSV paraphrases *sṓphrōn* as "master of himself" (AV lit. "sober"; NEB lit. "temperate").

Hebrew *ʾāḏôn* refers to the possessor of servants or slaves (Gen. 24; 39; Ex. 21; etc.); a husband of a concubine (Jgs. 19:26f.); a prophet with a young helper-apprentice, servants, or the "sons of the prophets" (2 K. 2; 5; 6; etc.); a king with administrators and servants under him (2 K. 5; 9; 10; etc.); and other authority figures (see *TDOT,* I, *s.v.* "ʾādhôn" [Eissfeldt]). God, too, is termed a "master" (Mal. 1:6; for *ʾᵃḏōnāy,* "my Lord," as a divine name, *see* LORD). *Baʿal* as "master" denotes the owner of a house (Jgs. 19:22f.) or of an animal (Isa. 1:3); for *baʿal* as the name of the Canaanite god, *see* BAAL I.

The Gk. *kyrios,* frequently translated "lord" in the NT, refers particularly to God or Jesus but also to certain human "masters": the possessor of servants or stewards (Mt. 10:24f.; 25:19-26; etc.), the owner of a household (Mk. 13:35), or the owner of an animal (Mt. 15:27). Masters of slaves are urged to treat their slaves kindly, justly, and fairly: both masters and slaves "have the same Master [*kýrios*] in heaven, and he has no favourites" (Eph. 6:9, NEB; cf. also Col. 4:1). Jesus frequently mentioned masters in parables and warned that believers cannot be slaves of "two masters," God and money (Mt. 6:24; Lk. 16:13). See *TDNT,* III, *s.v.* κύριος κτλ. (Quell, Foerster).

Kathēgētḗs used twice in Mt. 23:10 (and only in this passage), designates a teacher. *Rhabbí* and the heightened form *rhabbouní* in the Greek NT are transliterations of Heb. *rabbî,* meaning "my master" or, as the NT indicates, "my teacher" (cf. Jn. 1:38; 20:16; *TDNT,* VI, *s.v.* ῥαββί, ῥαββουνί [Lohse]). *Rhabbí* and *rhabbouní* were thus respectful and honorary titles used for addressing people like John the Baptist (Jn. 3:26, RSV "rabbi"), teachers like the scribes and Pharisees (Mt. 23:7, RSV "rabbi"), and Jesus (RSV "master," "rabbi," or "rabboni"). *See also* RABBI. *Epistátēs* is used only in Luke, as a title given to Jesus (see *TDNT,* II, *s.v.* ἐπιστάτης [Oepke]).

As a translation of *despótēs,* "master" usually refers to humans (1 Tim. 6:1f.; 2 Tim. 2:21; Tit. 2:9; 1 Pet. 2:18), though twice it refers to Christ (2 Pet. 2:1; Jude 4; cf. *oikodespótēs* in Mt. 10:25; cf. also *despótēs,* translated "Sovereign Lord" in Acts 4:24; Rev. 6:10, and "Lord" in Lk. 2:29). See *TDNT,* II, *s.v.* δεσπότης κτλ. (Rengstorf).

Finally, *architéktōn* is a hapax legomenon in the NT (1 Cor. 3:10), though it occurs a few times in the LXX and elsewhere in Greek literature and was even a loanword in rabbinic Hebrew (*ʾarᵉḵîṭîqṭôn*).

See also SERVANT; SLAVE; TEACHER.

M. W. MEYER

MASTIC [Gk. *schínos*] (Sus. 54); AV MASTICK; NEB CLOVE (to preserve original pun). The lentisk or mastic tree (*Pistacia lentiscus* L.) is a shrub that grows in thickets in Mediterranean lands, attaining a maximum height of 3½ m. (12 ft.). From incisions in the bark it exudes a fragrant terebinthine sap ("mastic" or "mastich"), which has been a commercial article from earliest times. Even today it is used as a masticatory to preserve the teeth and gums.

It is thought that the "balm" of Gen. 43:11 was actually mastic gum, since the substance sent by Jacob to Joseph must have been native to Palestine and unknown in Egypt. It could not have been either *Commiphora opobalsamum* or *Commiphora myrrha,* the true myrrh, since neither is indigenous to Palestine.

R. K. H.

MATHANIAS math-ə-nī'əs (1 Esd. 9:31, AV). *See* MATTANIAH **12.**

MATHELAS ma-thē'ləs (1 Esd. 9:19, NEB). *See* MAASEIAH **6.**

MATHUSALA mə-thōō'sə-lə (Lk. 3:37, AV). *See* METHUSELAH.

MATRED mā'trəd [Heb. *maṭrēḏ*] (Gen. 36:39; 1 Ch. 1:50). The mother or father of Mehetabel, the wife of Hadad ("Hadar," Gen. 36:39) king of Edom. According to the MT, Matred was the "daughter" (*baṭ*) of Mezahab, but the LXX and Syr. read "son" (*ben*). The same problem occurs in vv. 2, 14 (see RSV mg.; *BHS*).

MATRI mā'trī (AV, NEB, 1 S. 10:21). *See* MATRITES.

MATRITES mā'trīts [Heb. *hammaṭrî*]; AV, NEB, MATRI. A family of the tribe of Benjamin to which King Saul belonged (1 S. 10:21).

MATTAN mat'ən [Heb. *mattān*–'gift'].

1. A priest of Baal, slain before Baal's altar by the followers of Jehoiada (2 K. 11:18; 2 Ch. 23:17).

2. The father of Shephatiah, a prince of Judah under King Zedekiah during the time of Jeremiah (Jer. 38:1).

MATTANAH mat'ə-nə [Heb. *mattānâ*–'gift'; Gk. B *Manthanaein,* A *Manthanein*]. An encampment of the Israelites on their journey north from the river Arnon toward Pisgah and the territory of Sihon king of the Amorites (Nu. 21:18f.). Mattanah was between Beer and Nahaliel (vv. 16, 18f.). Eusebius located it 19 km. (12 mi.) SE of Medeba. Possibly

the site is modern Khirbet el-Medeiyineh, about 18 km. (11 mi.) NE of Dibon (*GTTOT*, § 441, p. 262; cf. N. Glueck, *AASOR*, 14 [1934], 13-27). If *miṯnî* is gentilic (1 Ch. 11:34; < **mitt'nî*) it may refer to Mattanah (*GTTOT*, § 844, p. 344).

MATTANIAH mat-ə-nī'ə [Heb. *mattanyâ, mattanyāhú*–'gift of Yahweh'; Gk. *Maththanias, Mathania, Manthanias, Matthanias*, etc.]; NEB also MATTANAIAH.

1. The original name of ZEDEKIAH king of Judah, changed by Nebuchadrezzar king of Babylon when he made Mattaniah king in place of his nephew Jehoiachin (2 K. 24:17).

2. An Asaphite Levite, son of Mica; one of the first to live in Jerusalem after the Exile (1 Ch. 9:15) and a leader in the temple choir (Neh. 11:17; 12:8).

3. Son of Heman; a musician in the temple choir in the time of King David (1 Ch. 25:4, 16).

4. An Asaphite Levite; ancestor of the Jahaziel who prophesied in the time of King Jehoshaphat of Judah (2 Ch. 20:14).

5. An Asaphite Levite who assisted in cleansing the temple during the reign of King Hezekiah (2 Ch. 29:13).

6. An Asaphite Levite, son of Mica, father of Hashabiah, and great-grandfather of the Uzzi who was overseer of the Levites in postexilic Jerusalem (Neh. 11:22); possibly the same as **2.**

7. A Levite who guarded the storehouses of the gates of Jerusalem in the time of Joiakim, Nehemiah, and Ezra (Neh. 12:25).

8. An Asaphite Levite, son of Micaiah, father of Shemaiah, and great-grandfather of the Zechariah who played the trumpet at the dedication of the rebuilt walls of Jerusalem (Neh. 12:35).

9. Father of Zaccur and grandfather of Hanan, the assistant to the treasurer of the Levitical storehouse in the time of Nehemiah (Neh. 13:13).

10. [Gk. Apoc. B *Matanias*, A *Matthanias*]; AV Apoc., NEB Apoc., MATTHANIAS. Son of Elam; a layman who divorced his foreign wife as directed by Ezra (Ezr. 10:26; 1 Esd. 9:27).

11. Son of Zattu; another layman who divorced his foreign wife (Ezr. 10:27); called Othoniah in 1 Esd. 9:28.

12. Son of Pahath-moab; another layman who divorced his foreign wife (Ezr. 10:30). In 1 Esd. 9:31 the AV (Mathanias) and NEB (Matthanias) follow Gk. A *Matthanias*; but the RSV (Bescaspasmys) follows Gk. B *Beskaspasmys*.

13. Son of Bani; another layman who divorced his foreign wife (Ezr. 10:37). In 1 Esd. 9:34 the text may be corrupted by the blending of "Matthaniah" with "Mattenai," resulting in Gk. *Mamnitanaimos* (cf. AV, NEB, RSV mg). incorrectly rendered MACHNADEBAI by the RSV.

N. J. O.

MATTATHA mat'ə-thə [Gk. *Mattatha*]. Son of Nathan the son of David; an ancestor of Jesus (Lk. 3:31).

MATTATHAH mat'ə-thə (Ezr. 10:33, AV). *See* MATTATTAH

MATTATHIAH mat-ə-thī'ə [Gk. *Mattathias*] (1 Esd. 9:43); AV, NEB, MATTATHIAS. One of those who stood at Ezra's right hand during the public reading of the law; called MATTITHIAH (**4**) in Neh. 8:4.

MATTATHIAS mat-ə-thī'əs [Gk. *Mattathias*].

1. (1 Esd. 9:33, NEB). *See* MATTATTAH.

2. (1 Esd. 9:43, AV, NEB). *See* MATTATHIAH.

3. A pious priest of the family of Jehoiarib (cf. 1 Ch. 24:7) who moved from Jerusalem to MODEIN, evidently because of the hellenizing activities of Antiochus Epiphanes (1 Macc. 2:1; Josephus *Ant.* xii.6.1 [265]). When the Seleucids insisted on pagan sacrifice in Modein, the refusal of Mattathias and his five sons precipitated the rebellion that eventually led to the cleansing of the temple (*ca.* 164 B.C.) and Jewish independence (*ca.* 142 B.C.). Thus, Mattathias is the "father" of the Maccabean (from the name of his son, Judas Maccabeus) or Hasmonean (from his great-grandfather, Hashman) period of Hebrew history, which extended until the Roman conquest in 63 B.C. (*See also* HASMONEANS I; MACCABEES II.B.)

In spite of his great age, Mattathias fled to the wilderness, gathered loyal Jews, and personally led the resistance movement for one year (1 Macc. 2:27-70; *Ant.* xii.6.2-4 [271-285]). Following his death (in his 146th year) and burial in Modein, leadership passed to his sons, of whom Judas Maccabeus, Jonathan, and Simon were the most prominent. Mattathias's cry, "Let everyone who is zealous for the law and supports the covenant come out with me!" became a slogan for the movement. He established the principle that the Jewish fighters would engage in defensive actions on the sabbath (1 Macc. 2:41; *Ant.* xii.6.2 [276]). According to Josephus, his belief in the resurrection of the dead helped to embolden his followers (*Ant.* xii.6.3 [282]).

In the Talmud (*Meg.* 11a) Mattathias is memorialized in Hanukkah prayers. Some have suggested that he is represented by the mysterious "Taxo" figure in Asm. M. 9:1 (*see* APOCALYPTIC LITERATURE III.E).

See E. Schürer, *History of the Jewish People in the Age of Jesus Christ*, I (rev. ed. 1973), 155-58.

4. Son of Absalom; a commander of the Jewish army under Jonathan the Hasmonean (1 Macc. 11:70). In combat in Galilee with the Seleucid Demetrius, Jonathan's forces were ambushed. All of Jonathan's army fled except for Mattathias and another comander, Judas. The example of these two seems to have given to Jonathan and the rest of the army the courage necessary to defeat the enemy.

5. Third son of Simon and grandson of Mattathias **3.** 1 Macc. 16:11-17 relates that Simon and two of his sons, Mattathias and Judas, were murdered by Ptolemy, governor of Jericho and a son-in-law of Simon, while they were in a drunken condition at a banquet in that city. Josephus (*Ant.* XIII.7.4 [228]) does not mention this Mattathias.

6. An envoy sent by Nicanor to make a treaty with Judas Maccabeus, according to the account in 2 Macc. 14:19.

7. Son of Amos; an ancestor of Joseph the father of Jesus (Lk. 3:25).

8. Son of Semein; another ancestor of Joseph the father of Jesus (Lk. 3:26).

J. J. SCOTT, JR.

MATTATTAH mat'ə-tə [Heb. *mattattâ*–'gift'; Gk. *Mathatha*, Apoc. *Mattathias*] (Ezr. 10:33; 1 Esd. 9:33); AV MATTATHAH, Apoc. MATTHIAS; NEB Apoc. MATTATHIAS. A son of Hashum; one of the returned exiles who divorced their foreign wives.

MATTENAI mat'ə-nī [Heb. *matt'nay*–'gift'; Gk. Apoc. A *Altannaios*, B *Maltannaios*]; AV Apoc. ALTANEUS; NEB Apoc. ALTANNAEUS.

1. A son of Hashum; one of the returned exiles who divorced their foreign wives (Ezr. 10:33; 1 Esd. 9:33).

2. A son of Bani; another of the returned exiles who divorced their foreign wives (Ezr. 10:37; not listed in par. 1 Esd. 9:34).

3. A priest representing the family of Joiarib in the time of Joiakim the high priest (Neh. 12:19).

MATTHAN math'an [Gk. *Matthan*; cf. Heb. *mattān* (*see* MATTAN)]. An ancestor of Jesus; grandfather of Joseph the husband of Mary (Mt. 1:15); given as MATTHAT in Luke's genealogy.

MATTHANIAS math-ə-nī'əs.

1. (AV, NEB, 1 Esd. 9:27). *See* MATTANIAH **10.**

2. (1 Esd. 9:31, NEB). The RSV, following LXX B, reads "Bescaspasmys." *See* MATTANIAH 12.

MATTHAT math'ət [Gk. *Matthat, Maththath, Maththat, Mattath*].

1. An ancestor of Jesus; grandfather of Joseph the husband of Mary (Lk. 3:24); given as MATTHAN in Matthew's genealogy.

2. Another ancestor of Jesus in Luke's genealogy (3:29).

MATTHELAS ma-thē'ləs (1 Esd. 9:19, AV). *See* MAASEIAH 6.

MATTHEW math'ū [Gk. *Matthaios*]. One of the twelve apostles.

Greek *Matthaios* is an approximate transliteration of the Aramaic (or Hebrew) *matta'y* or *matt^{e}yā'*, abbreviations of *mattanyāh* or *mattiṯyāh*. The name derives from the noun *matnān*, "gift" (<*nāṯan*, "give") combined with the name *Yāh*, so it means "gift of Yahweh."

Beyond its regular appearance in the four lists of the twelve apostles (Mt. 10:3; Mk. 3:18; Lk. 6:15; Acts 1:13), the name occurs only once in the NT — in Mt. 9:9 the tax collector who follows Jesus is called Matthew, whereas the parallel accounts (Mk. 2:14; Lk. 5:27, 29) identify him as Levi. It is virtually certain that the Gospel of Matthew is dependent upon Mark in this passage. Mark and Luke, had they been dependent upon Matthew, would hardly have felt free to substitute the name of an otherwise unknown person, Levi, for the name of an apostle. It is thus very probable that the author of the Gospel of Matthew changed the name Levi to Matthew in this passage. Also, as though to alert readers to the intended equation of the two names, when in the next chapter (10:3) the Evangelist lists the Twelve, he alone adds "the tax collector" to Matthew's name. But why did the Evangelist change the name Levi to Matthew? The most natural conclusion is that the tax collector Levi came to be called Matthew (a name so appropriate to the situation) after his conversion, and that this new name, now the name of an apostle, was significant to the author of the Gospel — a Gospel that, according to tradition, derived from that very Matthew.

We know very little about Matthew beyond the fact that he was one of the Twelve. He was the son of Alphaeus (Mk. 2:14), but we have no evidence that this Alphaeus is to be identified with the father of the Apostle James (Mk. 3:18). We do know that Matthew was a tax collector, who, upon his call and decision to follow Jesus, gave a "great banquet" (Lk. 5:29) for Jesus in his house, together with a "large company of tax collectors" and "sinners." As a tax collector Matthew probably lived in or near Capernaum and collected tolls for Herod Antipas on the commercial traffic using the major road between Damascus and cities of Palestine. We may infer that he had become relatively wealthy and that to become a disciple of Jesus meant a dramatically new style of life. Beyond this the NT is silent about Matthew, as it is about most of the Twelve.

By far the most widely attested tradition concerning Matthew in the early Church concerns his association with the Gospel that bears his name. Early in the 2nd cent. Papias referred to Matthew as the collector of the "oracles" of Jesus; shortly thereafter the Gospel as a whole was attributed to Matthew (*see* full discussion under MATTHEW, GOSPEL ACCORDING TO I.A). Later traditions about Matthew are mixed and unreliable. Eusebius said only that Matthew first preached to "the Hebrews" and then to "others" (*HE* iii.24.6), the latter being amplified in later sources to include residents of such places as Ethiopia, Persia, Parthia, Macedonia, and Syria. Clement of Alexandria provided the interesting note that "the apostle Matthew partook of seeds, and nuts, and vegetables, without flesh" (*Paed.* ii.1). The traditions about Matthew's death are contradictory. According to some, Matthew was a martyr for his faith, although the place and means of his martyrdom vary considerably in different reports. Part of the confusion in these later traditions may be due to the similarity of the names Matthew and Matthias. Probably more reliable is the conclusion that Matthew died a normal death, as implied by Heracleon (recorded by Clement of Alexandria in *Stromata* iv.9).

Bibliography.–E. J. Goodspeed, *Matthew, Apostle and Evangelist* (1959); for a representative account of Matthew's martyrdom, see *ANT*, pp. 460-62; for a tabulation of the traditions concerning Matthew, see H-S, II, 60f., 64. D. A. HAGNER

MATTHEW, GOSPEL ACCORDING TO.

The Gospel of Matthew dominated the attention of the early Church, at least so far as the Synoptic Gospels are concerned, to the extent that it all but eclipsed the others. The church fathers cited Matthew far more than either of the other Synoptics (cf. E. Massaux, *Influence de l'Évangile de saint Matthieu sur la littérature chrétienne avant saint Irénée* [1950]), and Matthew was much more prominent in the liturgies of the early Church. Only in the 19th cent., with the hypothesis of the priority of Mark and the resulting new importance of that Gospel, did this situation change. In the 20th cent. the discovery and use of new methods of study have made Matthew the subject of renewed interest. The Gospel remains enigmatic at many points, however, and continues to challenge interpreters.

1. Sources.–The Gospel of Matthew itself says nothing about its sources. Information must be gained from comparative study of the other Synoptics and what can be learned from available traditional materials.

A. Tradition about Matthew. The earliest information comes from Papias, bishop of Hierapolis in Asia Minor, who in the first quarter of the 2nd cent. wrote (according to the fourth-century church historian Eusebius): "Matthew composed the logia [Gk. *tá lógia*] in the Hebrew tongue and everyone interpreted them as he was able" (*HE* iii.39.16). The interpretation of this passage turns on the meaning of the word *lógia*. Traditionally, and in accord with the priority of Matthew in the corpus of the four Gospels, it has been understood to mean the Gospel of Matthew itself. Those who "interpreted" in this case may be the other Evangelists, who supposedly made use of Matthew's *lógia* in drawing up their own accounts. According to this view, Matthew is the earliest of the Gospels and nothing is known of the sources Matthew may have used. It is questionable, however, whether Papias is to be interpreted in this way and, even if so, whether Papias can be trusted regarding this information. The word *lógia*, literally "oracles," is an unusual word to use in referring to the Gospel, and there are several other more natural options for the meaning of the word.

So far as *lógia* itself is concerned, the most natural meaning is "words of the OT" (which were called "oracles" by the early fathers), in this case perhaps a collection of OT prophecies or prooftexts (Lat. *testimonia*) concerning the Messiah or messianic fulfillment. This would agree well with the fact that Matthew contains some interesting quotations from the OT (see below) and these could indeed raise the problem of interpretation. A second possibility is that the word refers to a collection of the sayings of Jesus, perhaps Q (or something like Q), the sayings source used in the Gospels of Matthew and Luke (although in this case one would expect the word *lógoi* rather than *lógia*). In favor of accepting the word *lógia* as referring to the Gospel itself, however, is the fact that a few lines earlier Eusebius (*HE* iii.39.15) quotes Papias as mentioning "the Lord's oracles" (*tá kyriaká lógia*) in reference to the Gospel of Mark, a Gospel hardly known for its record of the sayings of Jesus. Papias himself had written a five-volume commentary entitled *Exegesis of the Oracles of the Lord* (*exḗgēsis logíōn kyriakṓn* [*HE* iii.39.1]). Was this a commentary on both the deeds and words of Jesus as contained in one or more of the Gospels, or are we to understand "oracles" as referring only to the sayings of Jesus? The latter is more probable, as can be seen from Papias's specific interest in "the commandments from the Lord" (*HE* iii.39.3), and Eusebius's reference to Papias's inclusion of "some strange parables and teachings of the Savior" and "other interpretations of the words of the Lord" (*hoi toú kyríou lógoi, HE* iii.39.14). True, Eusebius also refers to Papias's inclusion of "certain marvels [*parádoxá tina*] and other details" (*HE* iii.39.8).

Probably the explanation is that by *lógia* ("oracles") Papias meant in the first instance the words of Jesus. As early as the 2nd cent. these came to be treasured as the supreme authority in the early Church. Indeed, already by the time of Clement of Rome the words of Jesus were put alongside the OT in authority, and even came to supersede them in authority (cf. esp. 1 Clem. 13). Papias could easily have used the word "oracles" to refer to the words of Jesus, for Jesus was the divine revelation of God and His words thus ranked in authority with those of the OT. For Papias, then, because the words of Jesus were supremely authoritative, *lógia* or "oracles" became synonymous with the term "Gospel." Thus Papias could refer both to the words of Jesus as *lógia* and to the written Gospels as collections of the *lógia* of Jesus, alongside, of course, His deeds. When Papias wrote, therefore, that "Matthew collected the oracles of Jesus," he could have referred either to what we know as the Gospel of Matthew or to a collection of the sayings of Jesus. The reasons for preferring the latter interpretation will emerge below.

B. Problems with the Tradition. Two main problems with the Papias tradition as it is understood by some scholars are: (1) our Greek Gospel of Matthew is not the translation of a Hebrew or Aramaic original; (2) modern study of the Synoptics for the most part does not support the priority of Matthew and the consequent dependence of Mark and Luke upon Matthew. Almost all scholars agree that our Gospel of Matthew was originally written in Greek and is not a translated document. Matthew's Greek reveals none of the telltale marks of a translation. Furthermore, Matthew's OT quotations are derived from the LXX rather than the Hebrew text (see below), although of course they could be derived from a different Hebrew text or could later have been made to conform to the LXX text. The assessment that Matthew was originally written in Greek has caused advocates of the priority of Matthew to set forth a complicated hypothesis wherein the present Gospel of Matthew is said to be dependent upon the Greek of Mark's Gospel while being simultaneously the perpetuator of Matthew's Aramaic tradition. Thus the Aramaic Gospel supposedly referred to by Papias can at best be a Proto-Matthew, which somehow became incorporated or transformed into the present Gospel of Matthew other than by direct translation, while at the same time being influenced by the Greek of Mark.

On the question of dependence, it must be acknowledged that a growing number of scholars question the hypothesis of Markan priority. Advocates of Matthaean priority, led by W. R. Farmer (*Synoptic Problem* [1964]), include B. Orchard (*Matthew, Luke and Mark* [1976]) and H. H. Stoldt (*History and Criticism of the Markan Hypothesis* [Eng. tr. 1980]). They follow in the steps of such earlier proponents of Matthaean priority as J. Chapman (*Matthew, Mark, Luke: A Study in the Order and Interrelation of the Synoptic Gospels* [1937]), B. C. Butler (*Originality of St. Matthew* [1957]) and L. Vaganay (*Le problème synoptique* [1954]). J. M. Rist (*On the Independence of Matthew and Mark* [1978]) has argued the independence of Matthew and Mark, explaining the common material on the basis of a common oral tradition. Although this ferment serves as an important and useful reminder that Markan priority is only a hypothesis and can never be assumed in an absolute way or without further thought, the majority of NT scholars remain convinced that Markan priority is a superior hypothesis.

In the face of these problems it must be concluded either that Papias was wrong in what he said or, giving him the benefit of the doubt, that he has been misunderstood, perhaps by the early church fathers (e.g., Irenaeus, Pantaenus, Origen, who seem dependent upon him for their view of the priority of Matthew), and certainly by scholarship until the 19th cent. Although the evidence allows only speculation, it may well be that what Papias referred to was a collection of sayings of Jesus in Aramaic that ultimately, in Greek, became the core of Matthew's Gospel, and that the whole then took the name of the part—"the oracles of the Lord." Papias was misunderstood not only because of the ambiguity of the word *lógia*, but also because several Jewish Christian Gospels apparently existed in the 2nd cent. (e.g., the Gospels of the Nazarenes, of the Ebionites, and of the Hebrews; *see* APOCRYPHAL GOSPELS IV), and it was easy enough to suppose that one

or all of them originated in the *lógia* referred to by Papias. Even the great Jerome at first identified one of these Gospels, which he examined in Syria, with the work of Matthew, only later to withdraw this conclusion (cf. *De vir. ill.* 3; *Adv. Pelag.* iii.2; Comm. on Mt. 12:13).

C. Two-Source Hypothesis. (*See* GOSPELS, SYNOPTIC.) The arguments for the priority of Mark and Matthew's dependence upon Mark are too strong to be overthrown by the testimony of Papias, which as we have seen is difficult to interpret. Matthew reproduces some 90 percent of Mark, much of it verbatim. In single pericopes drawn from Mark, Matthew's version is generally more terse; Matthew pares away redundancies. Matthew furthermore improves the Greek of Mark at many points. The Markan sequence of events, moreover, seems normative for the Synoptics in that Matthew and Luke never agree against the order of Mark: where Matthew departs from the Markan order, Luke follows it; where Luke departs from the Markan order, Matthew follows it. These facts, combined with Mark's directness and freshness, which itself makes it very unlikely that Mark is simply an abbreviation of Matthew and Luke, suggest Markan priority and Matthew's dependence on Mark as highly probable. That there was no need for an abridgment of Matthew, as some regard Mark, is clear from the neglect of Mark in the Church once Matthew became available. Thus, despite the reopening of the question by advocates of Matthaean priority, it is best to accept the priority of Mark as a working hypothesis.

Because of the unlikelihood that the author of Matthew knew the Gospel of Luke or vice versa (the differences are too great to accept dependence either way), a second source is needed to explain the many agreements of Matthew and Luke when Mark is not the source. For convenience this source is called Q. It is possible — even probable — that Q is to be understood as oral tradition(s) rather than a written source. Oral tradition could equally explain the so-called minor agreements between Matthew and Luke against Mark in "triple tradition" passages, a point often used against Markan priority. We may, then, with a fair degree of confidence assume that the author of Matthew had two major sources available, Q and the Gospel of Mark. Indeed, if our understanding of Papias is correct, then Matthew himself had collected the sayings of Jesus in Aramaic, possibly into something similar to Q; indeed, Q may well have been Matthew's *lógia* in Greek translation(s). A third source sometimes mentioned in discussions of Matthew is that from which the author derived his special material, usually designated M. It is particularly difficult, however, to isolate this material from that which may derive from the Evangelist himself, and therefore M is not a very helpful classification.

II. Structure.—A. Five Discourses. The most conspicuous structural element in the Gospel is the phrase repeated with slight modifications at the end of each of the five major discourses: "When Jesus finished all these sayings . . ." (7:28; 11:1; 13:53; 19:1; 26:1). B. W. Bacon argued that the Evangelist intended this fivefold structure to correspond to the five books of the Pentateuch, with Jesus represented as a new Moses who brings a new law. Although this may indeed be possible, W. D. Davies has pointed out that Matthew does very little with the implicit Moses typology in the Gospel. A fivefold structure, moreover, is found in other Jewish writings (e.g., the five books of Psalms; the five Scrolls) and need not point to the Pentateuch. In a way similar to the Fourth Gospel, the author alternates his blocks of the teaching of Jesus with narratives describing the mighty deeds of Jesus; unlike John, however, he makes little attempt to relate the deeds to the content of the discourses. The discourses, which appear to have been artistically constructed by the Evangelist rather than delivered by Jesus as they stand, seem to have decidedly catechetical interests: (1) the Sermon on the Mount, chs. 5–7; (2) mission directives to the Twelve, ch. 10; (3) parables of the Kingdom, ch. 13; (4) discipleship and discipline, ch. 18; (5) eschatology, chs. 24–25. Although this fivefold structure may be meant to include a section of narrative preceding each discourse (chs. 3–4; 8–9; 11–12; 14–17; 19–22), it seems hardly adequate to be regarded as the basic plan of the Gospel. Certain parts of the Gospel do not fit into the structure at all. Thus ch. 23 (the criticism of the Pharisees) is not a part of the eschatological discourse that follows, and ch. 11 contains a number of sayings of Jesus outside the structure of the five teaching discourses. A more serious point is that the fivefold structure excludes the Infancy narrative and the Passion narratives, with the result that these two important passages must be regarded as prologue and epilogue. The narrative of the death of Jesus, however, is the goal and climax of the story, and thus any analysis of Matthew's structure must include it as a major element. Accordingly, the fivefold discourse structure should be recognized as a subsidiary structure rather than the primary one. For the latter we are better advised to look to the major divisions of the Gospel.

B. Two Major Turning Points. Two pivotal points in the Gospel are noted with the phrase "From that time Jesus began" (4:17; 16:21). J. D. Kingsbury (*Matthew: Structure, Christology, Kingdom*, pp. 1-39) understands these phrases as indicating the basic structure of the Gospel, which he then describes under the following three headings: The Person of Jesus Messiah (1:1–4:16); The Proclamation of Jesus Messiah (4:17-16:20); The Suffering, Death, and Resurrection of Jesus Messiah (16:21–28:20). Because these are such critical junctures in the narrative, we can probably do no better in defining the basic structure of Matthew. The five discourses may then be regarded as an additional structural element, to be taken as important but subordinate to the more basic threefold structure.

C. Other Structural Elements. In addition to the two major structural frameworks mentioned above, other more minor elements of structure deserve mention. Matthew repeatedly gives capsule summaries of the ministry of Jesus, some of which are at the conclusion of narrative and teaching sections (e.g., 4:23-25; 9:35; 11:1; 14:35f.; 15:29-31; 19:1f.; 21:14). Within smaller sections of the Gospel the author displays his literary artistry in grouping certain items. As examples, note his grouping of ten "mighty deeds" of Jesus in chs. 8–9, but particularly his groupings of sevens (e.g., the seven petitions of the Lord's prayer, 6:9-13; the seven parables in ch. 13; the seven woes in ch. 23; the double sevens of the genealogy) and of threes (e.g., the three divisions of the genealogy, 1:1-17; the three kinds of piety, 6:1-18). It is not the numbers themselves that are significant but the Evangelist's practice of grouping (cf. the six antitheses, 5:21-48; the nine benedictions, 5:3-11).

The Evangelist also apparently has a tendency to double items drawn from his sources, as in the two demoniacs of 8:28-34 (cf. Mk. 5:1-20), the two blind men of 20:29-34 (cf. Mk. 10:46-52), and the probable doublet of 20:29-34 in 9:27-31. This, like some of the threes in the Gospel, may well be due to the concern to have the two or three witnesses required by the Law (18:16; cf. 26:60). The author uses other stylistic devices in his Gospel, such as chiasm (e.g., 13:15; 8:14f.) and poetry (see Goulder, pp. 70-94). The twelve formula quotations from the OT, the preponderance of which occur in the first two chapters, are not significant structural elements for the Gospel as

a whole, although they do occasionally have structural significance for smaller portions in which they occur.

Matthew shows careful, if complex, organization. The author has used a variety of stylistic devices with considerable artistry. The result is an alternating presentation of deeds and words of Jesus, which have been collected and arranged topically for the sake of their impact on the reader. Apart from the larger, fixed points in the life of Christ, chronology is not a concern of the author.

III. Genre.–The genre, or literary character and form, of a document is vitally related to the purposes of its author. How can the Gospel of Matthew be described so as to account for its unique emphases and its peculiar formal elements? Several answers must be considered.

A. Gospel. Matthew is of course preeminently a Gospel, an account of the life of Jesus, though not a biography in the modern sense. Matthew, like the other Gospels, is an expansion of the kerygma concerning the fulfillment brought through Jesus, especially in His death and resurrection. Fundamentally a Gospel proclaims the good news concerning the saving activity of God. Without question Matthew does this in a most powerful way. In addition, however, its special characteristics have raised the question of whether Matthew may also be seen to possess the traits of a more specific genre. The categories listed below are not necessarily parallel and by no means mutually exclusive, but are grouped in this way for convenience.

B. Midrash. This word is used with various meanings by scholars who have applied it to Matthew. "Midrash" is a noun derived from the Hebrew verb *dāraš*, which means "investigate" or "inquire into." In Jewish literature it came to mean interpretation of biblical texts. In its broader meaning, when applied to Matthew, it refers to the setting forth of an edifying, theological interpretation of Jesus in, or under the form of, historical narrative. In its more restricted meaning, midrash refers to such "historicizing" done in connection with specific OT quotations. Many scholars argue that Matthew contains much midrash, in both the narrower and the wider sense of the word. According to M. D. Goulder, Matthew is a midrashic (or "interpretative") expansion of the Gospel of Mark, to be compared to the Chronicler's treatment of Kings. R. H. Gundry argues for the midrashic character of much of Matthew and maintains that Matthew's readers would have had no trouble in distinguishing the midrashic material from straightforward historical narrative or in accepting it for what it was. It cannot be denied that the Evangelist works midrashically with some of his OT quotations, but it does not follow from this that whatever appears as historical narrative in Matthew is without any historical basis. Matthew contains narratives (e.g., the Infancy narrative) that make much use of OT quotations, and these indeed appear to have had their effect on the wording of the narratives. But this does not mean that the author created historical narratives at will for his own convenience.

C. Lectionary. Following G. D. Kilpatrick and P. Carrington (*The Primitive Christian Calendar* [1952]), M. D. Goulder has argued not merely that the composition of the Gospel of Matthew was determined by the lectionary year, but also that it was in fact written to be used liturgically, by supplying consecutive readings based on the Jewish festal year (pp. 171-198). For Goulder the genre of Gospel is liturgical rather than strictly literary.

D. Catechesis or Catechetical Manual. The collection of the sayings of Jesus into the five discourses, one of the most obvious characteristics of Matthew, has led many scholars to conclude that it should be thought of as a catechetical document for the upbuilding of Christian discipleship. It is clear that in the early Church the sayings of Jesus were supremely authoritative, and that they played a great role in the instruction of new converts as well as older members of the Church. The view of the Gospel as catechesis is in keeping with the importance of teaching throughout the Gospel (see esp. 28:20). K. Stendahl extended this view of Matthew as catechesis to the hypothesis of a Matthaean School, modeled on the rabbinic schools, that produced in the Gospel a kind of teacher's manual, a Christian equivalent to the Qumrân community's Manual of Discipline. Particular evidence of the school's work, according to Stendahl, is seen in the use of the OT quotations throughout the Gospel.

E. Church Correctives. Some have seen Matthew as providing correctives to a community facing serious difficulties, and find in the negative material a clue to the purpose of the Gospel. W. G. Thompson, in a study of 17:22–18:35, argued that Matthew's community was seriously divided and that scandal was commonplace. It is of course possible to argue that behind every positive instruction of the Gospel lies a corresponding vice in the community. Kingsbury (*Parables of Jesus in Matthew 13*) found indications in ch. 13 that Matthew's community was troubled not only by internal strife but also by a spiritual malaise that manifested itself in materialism, secularism, and a disregard for the law. Others (e.g., Minear and Trilling) detected a special concern for the leaders of Matthew's community who were in danger of becoming false prophets or falling into hypocrisy. Still others (e.g., E. Schweizer) have called attention to the polemic in Matthew against false prophets and certain charismatics in the community who did not keep the law (7:15-23). Although the Evangelist accepts the place of prophecy and charismatic healings in the Church, he has no tolerance for the exercise of these gifts apart from the other Christian virtues that are exemplified preeminently in the keeping of the law.

F. Missionary Propaganda. Since one of the main intentions of the Gospel is to demonstrate that Jesus is the Messiah, it is possible to see the Gospel as primarily a tool to be used in the Church's mission to the Jews. B. Gärtner and R. S. McConnell have explained the unique OT quotations in Matthew as derived from the missionary preaching directed to the Jews. The great stress on fulfillment throughout the Gospel can be taken as support for this hypothesis.

G. Polemic Against the Rabbis. That Jesus debates and criticizes the Pharisees so frequently through the course of the Gospel (see esp. ch. 23) leads naturally to the conclusion that the author and his readers faced a continuing problem in their defense of the gospel against the claims of the synagogue. The debate concerned the question of who possessed the true interpretation of the Torah. Thus the Gospel draws on the traditions about Jesus and the Pharisees and uses this material in the struggle with the Pharisaic Judaism of a later time.

This variety of options concerning the genre of Matthew indicates its multifaceted character. Several of these explanations may well be equally true. The Evangelist could have had several purposes. It is at least clear that Matthew is a "community book," written for the immediate needs of the Evangelist's church during the interim period between the historical events narrated and the return of Christ. The author wrote above all for the Church, in order to interpret the Christ-event, but also to instruct and edify the Christians of his own and future generations.

IV. Theological Emphases.–Although Matthew contains much material in common with Mark and Luke, it has some distinctive theological emphases. These are evident

both from the Gospel's unique material and from the Evangelist's handling of his sources.

A. Fulfillment: The Kingdom of Heaven. Without question the theme of fulfillment is a favorite of Matthew. Indeed, the central emphasis of the book is found in "the gospel of the kingdom" (4:23; 9:35; 24:14; cf. 26:13), the good news that the reign or rule of God is now realized in history through the presence of Jesus Christ. Matthew is practically a demonstration of the reality of this kingdom through the words and deeds of Jesus. The Evangelist prefers the Jewish expression the "kingdom of heaven" (lit. "the heavens"), a circumlocution for "kingdom of God" (which, however, does occur in Matthew in 12:28; 19:24; 21:31, 43). The importance of the kingdom for him is obvious from the fact that Matthew uses the word much more frequently than does any of the other Gospels, nearly three times as often as Mark. The message of Jesus (like that of John the Baptist, 3:2) is the coming of the kingdom (4:17) and this in turn becomes the message of the disciples (10:7). Everything in the Gospel relates in one way or another to this controlling theme. To be sure, the kingdom of God has come as a mystery, in an unexpected way, as we learn especially from the parables of ch. 13. In particular, the kind of fulfillment brought by Jesus involves a delay in the judgment of the wicked (13:36-42, 47-50). Nevertheless, the excitement of what has come is not to be missed: "Blessed are your eyes, for they see, and your ears, for they hear. Truly I say to you, many prophets and righteous men longed to see what you see, and to hear what you hear, and did not hear it" (13:16f.). Matthew's special interest in the theme of fulfillment, however, is most clearly evident in the frequent quotations from the OT, particularly the so-called fulfillment quotations.

B. Use of the OT. Matthew contains over sixty explicit or substantial quotations (not including far more numerous allusions) from the OT, more than twice as many as any other Gospel. Among these quotations twelve stand out because of the emphasis on fulfillment in the introductory formulae, e.g., "This happened to fulfil what was spoken by the prophet." Ten of these employ the verb "fulfil" (*plēróō*): 1:23 (Isa. 7:14); 2:15 (Hos. 11:1); 2:17f. (Jer. 31:15); 2:23 (Isa. 11:1?); 4:14-16 (Isa. 9:1f.); 8:17 (Isa. 53:4); 12:17-21 (Isa. 42:1-4); 13:35 (Ps. 78:2); 21:4f. (Isa. 62:11; Zec. 9:9); 27:9f. (Zec. 11:12; Jer. 18:2ff.). In 13:14f. a compound form of "fulfil" (*anaplēróō*) occurs (Isa. 6:9f.), and 2:6 (Mic. 5:2) is often ranked alongside these quotations, although it lacks any form of "fulfil" in the formula ("for so it is written by the prophet," words spoken by Herod's chief priests and scribes). These quotations are unique to Matthew among the Gospels except for the quotations of Zec. 9:9 in Jn. 12:15 and Isa. 6:9f. in Mk. 4:12. Matthew's interest in the fulfillment of the OT in relation to the Passion narrative may also be seen in 25:56: "But all this has taken place that the scriptures of the prophets might be fulfilled" (cf. 26:54).

These quotations (except for 13:14f.) are distinctive in that, unlike those taken over from Mark and Q (the text of which is consistently dependent upon the LXX), they exhibit a mixed text, i.e., a text reflecting dependence upon the Hebrew (Masoretic) text of the OT but also influenced by the LXX and other contemporary text forms (see Gundry, *Use of the OT*). The explanation of this and the answer to the related question concerning the source of these special quotations have been much debated. Earlier speculation about Matthew's dependence upon a written *testimonia* source or a fixed oral tradition for the quotations has given way to more specialized theories. K. Stendahl proposed the interesting hypothesis of a Matthaean school, wherein exegesis of OT texts was undertaken using principles similar to the *pesher* hermeneutic (i.e., arguing "this is that") practiced by the Qumrân community. According to Stendahl, this school is responsible for producing the distinctive formula quotations. B. Gärtner has argued against this hypothesis, denying the similarity of Matthew's quotations to the quotations used by the Qumrân community. Gärtner (like Rothfuchs) prefers to understand the formula quotations as derived from the missionary preaching of the early Church, possibly directed against Jewish opponents. Opinion remains divided, however, about whether the formula quotations came to the Evangelist from some form of tradition or whether they were his own formulations. Because they reflect the Evangelist's theology, with its strong emphasis on fulfillment, it is clear that he at least made the quotations his own in his portrayal of Jesus as the Messiah. The argument of the quotations often depends not upon the historico-grammatical meaning of the OT texts, but upon their *sensus plenior* (i.e., a fuller or deeper sense, of which the original authors were unaware at the time they wrote), particularly patterns of typological correspondence. That is, a deeper meaning of these texts is seen by the Evangelist in retrospect and in the light of Christ as the *télos* (the ultimate goal) of the OT expectation.

C. Christology. Matthew's doctrine of Christ is fundamentally important to every theological emphasis in the Gospel, for it is the identity of Jesus that determines such things as fulfillment, authoritative exposition of the law, discipleship, ecclesiology, and eschatology. Matthew heightens the Christology of the material drawn from Mark, making it more explicit (e.g., Mk. 8:29, "You are the Christ," becomes in Mt. 16:16, "You are the Christ, the Son of the living God"; cf. Mt. 19:17 with Mk. 10:18; Mt. 9:3 with Mk. 2:7). However, it is in Matthew's unique material that the Evangelist's emphasis on Christology is most apparent.

According to Kingsbury (*Matthew: Structure, Christology, Kingdom,* pp. 40-83) the key christological title in Matthew is "Son of God." This emerges not only where the title actually occurs (e.g., 8:29; 14:33; 16:16; cf. 3:17 and 17:5) but also in such passages as 1:23, "his name shall be called Emmanuel (which means, God with us)"; 14:27, "it is I" (Gk. *egō eimi*; cf. Ex. 3:14); and the passages promising the future presence of Jesus with His disciples (18:20 and 28:20). Matthew also stresses the sonship of Jesus by having Him refer to God as His Father some twenty-three times, fifteen of which are unique to Matthew (eight in original material, seven in redactional alteration). For Matthew the most exalted confession, which alone expresses the mystery of Jesus' identity, is that He is the Son of God (16:16). This confession is made only by believers (except where it is blasphemy), and only by revelation (16:17; 11:27; cf. 13:11). The second major title, Son of man, is regularly used by Jesus and thus serves as the public counterpart to the confessional title. In references to the Parousia and the eschatological judgment, it tends to coincide with Son of God. Kingsbury finds no material difference between the titles. J. P. Meier (*The Vision of Matthew*) has argued the equal importance of the two titles.

The important title "Lord" (Gk. *kýrios*) is analogous to Son of God, being found almost exclusively on the lips of the disciples. Messiah (Gk. *Christos*) and Son of David, being closely linked with the stress on fulfillment, are also very important in Matthew. Kingsbury, however, is probably correct in arguing that these titles support the title Son of God. The same is true of such lesser titles or categories as Son of Abraham, The Coming One, Teacher

(Rabbi), Shepherd, and Servant. Some scholars (esp. M. J. Suggs; cf. J. M. Gibbs, "The Son of God as the Torah Incarnate in Matthew," *SE*, IV [1968], 38-46; R. G. Hamerton-Kelly, *Pre-Existence, Wisdom and the Son of Man* [1973], pp. 67-83) have found the key to Matthew's Christology in the concept of Jesus as the incarnation of Wisdom (e.g., 11:19, 25-27; 23:34-39) and Torah (e.g., 11:28-30). These analyses are consistent with Matthew's emphasis on a Son of God Christology, i.e., "God with us."

D. Discipleship and Righteousness. The Evangelist emphasizes the importance of discipleship. The noun "disciple" (*mathētēs*) occurs much more often in Matthew (seventy-three times) than in the other Synoptic Gospels, and the verb "disciple" (*mathēteuō*) occurs only in Matthew among all four Gospels (13:52; 27:57; 28:19). Disciples are called "sons of God" (5:9, 45), but more frequently by terms meant to emphasize humility, e.g., "brothers" (esp. 12:49f.; 18:15, 21, 35; 23:8; 25:40; 28:10) and, most distinctively, "little ones" (*mikroí*, 10:42; 18:6, 10, 14). Discipleship involves following in the steps of the Lord, which entails self-denial and taking up one's cross (10:38f.; 16:24-26), the suffering of persecution (5:10-12; 10:16-25; 24:9-13), and the humility of a servant (20:26f.; 23:11f.) or child (18:1-4).

Discipleship for this author is inseparable from "righteousness" (*dikaiosýnē*), a word that occurs only in Matthew among the Synoptic Gospels (except for Lk. 1:75). Some of the references have what may be described as a salvation-history orientation (3:15; 5:6, 10; 21:32), but others refer to an unmistakable call to personal righteousness associated with discipleship (5:20; 6:1, 33). The cognate word *díkaios* (usually translated "just") occurs seventeen times, more than all the references in the other three Gospels. This righteousness finds its definition and standard in the law, especially as authoritatively interpreted by Jesus. B. Przybylski properly noted, however, that righteousness in Matthew should not be regarded as the key to discipleship, since the word tends to be limited to the demand of God upon mankind and thus necessarily falls short of describing the good news that Matthew proclaims in Jesus. It is at least a better or higher righteousness to which Jesus calls His disciples. It is a call to the doing of the will of the Father (7:21; 12:50; 21:31).

E. Community (Church). The Greek word for "church" (*ekklēsía*) occurs among the Gospels only in Matthew (16:18; 18:17 twice). In ch. 16, at Peter's confession that Jesus is "the Christ, the Son of the living God," Jesus promises to build His community (as the underlying Aramaic would have to be translated) upon Peter. The authority bestowed on Peter in 16:19 (singular verbs) is extended to the Church in a disciplinary context in 18:18 (plural verbs). Here Matthew's church receives its commission to exercise discipline over believers in the full knowledge that it is being led by the Lord (see esp. 18:19, "if two of you agree on earth about anything they ask, it will be done for them by my Father in heaven"). Matthew can appropriately be called an "ecclesiastical" Gospel for other reasons as well. We have already noted that the Evangelist, in his collecting of sayings of Jesus into major discourses, writes particularly for the instruction and edification of the Church. The disciples and their experiences serve as models for the Evangelist's contemporaries; Peter is a prototype of Christian leadership.

It is clear that the Evangelist addresses some urgent matters in his Gospel. His community was probably experiencing division, lawlessness, and even apostasy. He accordingly stresses that the Church is a mixed community that includes both true and false disciples (e.g., 13:29f., 47-50; 22:11-14). He gives severe warnings concerning "false prophets," that is, charismatic enthusiasts who prophesy, cast out demons, and heal — all in the name of Jesus — who come "in sheep's clothing but inwardly are ravenous wolves" (7:15-23). The fault in these false prophets is that they are "evildoers" who bear "evil fruit"; they do not observe the law (cf. E. Schweizer, *NTS*, 16 [1969/70], 213-230). Elsewhere (10:41) the author can encourage hospitality to the itinerant prophet. He urges leaders to avoid the pride and hypocrisy of the Pharisees (23:8-12), who also fail to keep the law. He repeatedly uses the words of Jesus to address the needs of his own church.

F. Eschatology. The special interest in eschatology can be seen simply from the length of the apocalyptic discourse compared with that of Mk. 13. Not only is ch. 24 longer than its Markan source (including the warning pericopes 24:37-51, drawn from Q), but the author adds a whole chapter of material not found in Mark, centering on the reality of eschatological judgment. (The parables of the ten virgins [25:1-13] and the last judgment [25:31-46] are unique to Matthew.) Other unique eschatological material in Matthew is found in 13:24-30, 36-43; 20:1-16; and 22:1-14. The technical word *parousía*, which refers to the eschatological return of Christ, is found only in Matthew (24:3, 27, 37, 39) among the Gospels. G. Bornkamm has furthermore shown ("End-Expectation and Church in Matthew," in *Tradition and Interpretation in Matthew*, pp. 15-51) that the Evangelist's eschatology is vitally important to his ecclesiology, Christology, and view of the law. As is true throughout the NT, the primary purpose of eschatology for Matthew is not so much to provide information concerning the future as to motivate the Church to conduct that is appropriate in the light of imminent judgment. Thus in Matthew eschatology is important not only to theology but also to discipleship. The promise of future judgment and deliverance make perseverance in the present a possibility as well as a necessity.

G. Salvation-History. Much debate has centered on the structure of Matthew's salvation-history perspective — that is, does the author conceive of three epochs (Israel, Jesus, and the Church) or two (Israel and Jesus, with the Church an extension of the latter)? Kingsbury (*Matthew: Structure, Christology, Kingdom*, pp. 25-37) has argued in favor of two because of the greater importance of Christology than ecclesiology in the Gospel. The threefold analysis, however, may be held without concluding that ecclesiology is the dominant theme of the Gospel. A threefold analysis can give proper emphasis to Christology and the schema of promise and fulfillment while at the same time finding a place for the obvious importance of the transition from Israel to the Church, the limitations of the time of Jesus (cf. the restriction of the mission to Israel), and the determinative significance of the cross and Resurrection for Matthew (cf. J. P. Meier, *The Vision of Matthew*, pp. 26-39).

V. Theological Tensions.—On some very important issues Matthew holds perspectives that seem antithetical. These have presented to interpreters some of their largest challenges. The conclusions drawn concerning these issues can affect many other important questions.

A. Particularism and Universalism. The particularist emphasis in Matthew is at first shocking. Jesus limits the mission of the Twelve by forbidding them to go to either the Gentiles or the Samaritans (10:5f.), and when entreated by a gentile woman He responds, "I was sent only to the lost sheep of the house of Israel" (15:24). This attitude is so contradictory to the attitude of the author's day, when the Gentile mission was an undeniable reality, that even the most radical scholars accept these sayings as

originating from the historical Jesus. This emphasis fits well the basic Jewish orientation of Matthew. Alongside this particularism, however, a universalism is implicit throughout the Gospel (e.g., the Magi from the East, 2:1-12; the Roman centurion, 8:5-13; the Canaanite woman, 15:21-28; the parable of the tenants, 21:33-43; the parable of the marriage feast, 22:1-10; the prophecy in 24:14) that finally becomes explicit in the climactic commission in 28:18-20. It seems logical to conclude from this pattern that particularism was appropriate before the death and resurrection of Christ, but that once this salvific goal had been reached the particularism necessarily gave way to the universal proclamation of the good news. The author, unlike the other Evangelists, retains the record of this particularism during the ministry of Jesus for the sake of his Jewish-Christian congregation. The effect of this motif is to stress to these Jewish-Christian readers the actuality of the fulfillment of the promises to Israel, the continuity of God's purpose for His covenant people. In the face of an increasingly gentile church, which must have given its Jewish opponents the embarrassing ability to argue that Christianity was an alien religion, the readers were able to realize that they, unlike the Gentiles, had a place in the ministry of Jesus from the beginning. They were thus important in the fulfillment of God's plan as a righteous remnant attesting the faithfulness of God to His covenant promises.

B. Israel and the Church. This tension, closely related to the preceding one, grows out of the apparently antithetical attitudes toward Israel in Matthew. Alongside the positive orientation to the Jews already noted (see also 2:6; 15:31), as well as the thoroughly Jewish character of the Gospel, Matthew contains a polemic against the Jews. This is most conspicuous in the passages that refer to a transference of the kingdom from Israel to those who believe (the Church): "the sons of the kingdom will be thrown into the outer darkness" (8:12; cf. 21:41, 43). The judgment of unbelieving Israel is found also in such passages as 11:20-24; 12:45 ("this evil generation"); 13:10-15 (the citation of the judgment oracle of Isa. 6:9f.); 22:1-10 ("those invited were not worthy"); and 23:37f. ("your house is forsaken and desolate"). This Gospel emphasizes this motif more than do the other Synoptic Gospels, and only Matthew includes the bitter words "His blood be upon us and on our children" (27:25). This material raises the difficult question of the relation between the Church and Israel or, more concretely, between the author's congregation and the synagogue. He can write "their synagogues" (9:35), "your synagogues" (23:34), and "the Jews to this day" (28:15). Throughout the book the Pharisees are Jesus' main antagonists (cf. "their scribes," 7:29), and the author speaks of Jewish persecution of the Church (23:34; cf. 10:23).

Several divergent conclusions have been drawn from these negative data. Some have argued that the Evangelist's church was gentile rather than Jewish, others that it was Jewish but that the split between synagogue and church (*ca.* A.D. 85) had already taken place (see below). If the latter is not true, the author's Jewish-Christian congregation had at least begun to think of itself as separate from, and over against, unbelieving Judaism — a righteous remnant against the rabbinic Judaism represented in the Gospel by the Pharisees. The transference of the kingdom brought about by Jewish unbelief produced the Church as a "true" Israel, which inherits the promises and within which believing Jews find their rightful place. Against D. R. A. Hare, it is probably the case, moreover, that the author of Matthew had not abandoned the mission to the Jews. The whole thrust of the Gospel argues against such an abandonment, as does the "Great Commission," which should not be understood as excluding Jews (cf. also 23:39). The polemics against, and the distance from, "the Jews" reflected in Matthew are by no means unthinkable within a Jewish-Christian context, but may be akin to intramural criticism of Israel in the prophetic tradition, and are indeed what was naturally to be expected, given the circumstances.

C. Law and Grace. Matthew is well known for its emphasis upon Jesus' faithfulness to the law, particularly as expressed in 5:17f.: "Think not that I have come to abolish the law and the prophets; I have not come to abolish them but to fulfil them. For truly, I say to you, till heaven and earth pass away, not an iota, not a dot, will pass from the law until all is accomplished." Jesus' teaching about righteousness and the doing of the will of the Father (7:21; 12:50; 21:31) is understood throughout the Gospel as nothing other than the explication of the true meaning of the law. For the sake of his Jewish-Christian readers the Evangelist portrays Jesus as less radical toward the law than does Mark (against Mk. 7:1-23 compare 15:1-20, where Matthew avoids the conclusion that Jesus "declared all foods clean," and emphasizes only the issue of hand-washing). Jesus is, moreover, shown to agree in principle with the Pharisees (23:2f.), that is, to the extent that they truly expound the meaning of the Mosaic law. Even in Matthew, however, Jesus transcends not only the teachings of the Pharisees (see 9:10-17; 15:1-20) but also the letter of the law while penetrating to its inner spirit (see 5:31-42; 12:1-14; 15:11; 19:3-9). This uniquely authoritative interpretation of the law is possible only because of who Jesus is (the Messiah) and what He has brought (the kingdom). The Pharisees are accordingly no match for Jesus in their interpretation of the law, and at the same time the author's Jewish-Christian church and not the synagogue is shown to be in true succession to Moses. The emphasis upon the law in Matthew is thus much more probably due to the Jewish-Christian orientation of the Gospel than to a direct attempt to counteract a "Pauline" antinomianism, as some have thought.

The law as expounded by Jesus is not a "new" law (note Matthew's omission of Mark's reference to "a new teaching" [1:27]) but the "true" or intended meaning of the Mosaic law. Matthew's stress on the law, however, occurs in the context of the good news of the presence of the kingdom. The announcement of grace is antecedent to the call to live out the righteousness of the law (e.g., the Beatitudes precede the exposition of the law in the Sermon on the Mount). Thus, alongside the stern calls to righteousness (e.g., 5:19f.; 7:21-27; 25:31-46) is also an emphasis upon grace (e.g., 5:3-12; 9:12f.; 10:7f.; 11:28-30; 18:23-35; 20:1-16; 22:1-10; 26:26-28). The grace of the kingdom and the demands of the law as interpreted by the messianic King stand in dynamic tension throughout the Gospel.
